Your Summer Drink Should Be Bottled For Purity's Sake

Pure Water — pure flavors and sterilized bottles all handled by machinery — never touched by human hands, makes 7-UP as pure as driven snow.

Then CO₂ — Carbon Dioxide — gas, purifies everything it contacts. So don't waste the gas by agitation. Drink slowly — smoothly. If you pour — pour slowly on the side of the glass.

ELIMINATE FOOD WASTE

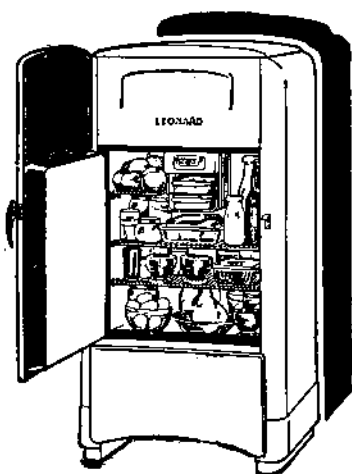

by **ELECTRIC Refrigeration**

Waste not — Want not... This adage would never have written if electrical refrigeration had been heard of at that time, for with the present day process of refrigeration there is no waste. The wasting of foodstuffs is caused by spoilage or because certain foods cannot be kept during hot weather. With a refrigerator in the home food can be kept in a fresh and wholesome condition for several days, thus eliminating unnecessary food expense which eats into a housewife's budget.

A Refrigerator for every Home

City Hydro Showrooms display a make or style to suit every home and every purse. There is the Westinghouse with the DUAL AUTOMATIC CONTROL which maintains a constant low temperature at all times, the Leonard with the famous MASTER DIAL that lets you control the operation of your refrigerator to secure low operating cost, and the General Electric with the THRIFT UNIT and SLIDING SHELVES. There are many more advantages to be obtained from these famous makes. Let our refrigeration experts explain more fully at your convenience.
