Foreword

THIS is the first of a series of statistical publications to be issued separately on the Ukrainians in Canada. In this issue the reader will find ready reference data on the Ukrainian population based on the figures of the Dominion Bureau of Statistics from the census of 1941. It contains facts on their numerical strength, religious denominations, occupations, birth-place, immigration, naturalization, citizenship, mother tongue, conjugal condition, age, education, etc. The material is first given for Canada as a whole and then subdivided into provinces. The number of Ukrainians in each city, town, village, municipality, etc., is also included.

It is a common misconception that the Ukrainians in Canada are a small relatively unimportant group, most of whom are foreign born and owe their allegiance to a country outside Canada. Actually, with a population of nearly a third of a million, they are fourth in numerical importance, 65.2% of whom are Canadian born, 90.8% of whom are British subjects and 93.02% use one or the other of the official languages of Canada. The title "Canadians of Ukrainian Origin", which has been chosen for this series of publications is, therefore, an appropriate expression for the Ukrainian element in Canada.

In the tabulations on the number of Ukrainians in each city, town, village, municipality, etc., the figures are also given for the Austrian, Polish, Roumanian and Russian population. It is a widely accepted fact that there are many thousands of Ukrainians throughout Canada, who during the census were included under these racial groups. A correct figure for the number of Ukrainians in any particular city, town, village, municipality, etc., cannot be obtained without an estimate of

the number that are included in these other groups. It is hoped that the Dominion Bureau of Statistics is fully aware of these inaccuracies and more accurate statistical data on the Ukrainians will be compiled in the future.

Throughout the entire text the present tense has been used. It should be remembered, however, that the figures given are based on the census of 1941, and there have been many changes in the last three or four years. For example, in the analysis of the gainfully occupied population, twelve dentists are shown, whereas, at the present time there are more than three times that number. Similarly, there has been a rapid increase in the number of lawyers, medical doctors, engineers and other professionals.—N. J. H.

It is evident that the French come first in numerical importance, English second, Scottish third, Irish fourth, Germans fifth, and the Ukrainians come sixth with a population of 305,929 which represents 2.66% of the total Canadian population. When all the British Isles races are taken together then they have the greatest population, the French come second, Germans third, and the Ukrainians rank fourth.

Of all the Slavic races in Canada Ukrainians have the greatest population. Their population is greater than the combined population of Austrian, Belgian, Bulgarian, Czech, Slovak, Finnish, Greek, Hungarian, Icelandic, Lithuanian, Roumanian and Yugoslavic. It is also greater than that of Russian, Polish and Danish put together. Their numerical importance becomes more apparent when an analysis is made of those that learned Ukrainian as the first language in childhood. Over 31,000 people report that Ukrainian is their mother tongue but state a racial origin other than Ukrainian. The confusion arose during immigration and to date many Ukrainians consider that they are of Polish, Russian, Roumanian and Austrian racial origin due to the fact that these were their former countries of allegiance.

One of the most important changes in the racial composition of the Canadian population in the twenty year period prior to 1941 was the moving up of the Ukrainians from eleventh place in numerical importance in 1921 to sixth place in 1941. The growth of their population as compared with the total population of Canada for the period 1901 to 1941 was as follows:

| | Canadian Population | Ukrainian Population |
|------------|--------------------------------|---------------------------------|
| 1901 | 5,371,315 | 5,682 |
| 1911 | 7,206,643 | 75,432 |
| 1921 | 8,787,949 | 106,721 |
| 1931 | 10,376,786 | 225,113 |
| 1941 | 11,506,655 | 305,929 |

Starting with a total of 5,682 in 1901 the population* increased to 75,432 in 1911, an increase of 69,750 or 1227.5% in the decade. This was chiefly due to a heavy immigration. Between 1911 and 1921 the population increased by 31,289 or 41.5% in the decade as compared with 21.9% for the total Canadian population. Between 1921 and 1941 the population increased by 199,208 or 186.67% for the twenty year period as compared with 30.9% for the total population of Canada.

The rapid increase between 1921 and 1941 cannot all be attributed to immigration. Of the total population reported in 1941 only 45,101 immigrated between 1921 and 1941 which

* Throughout the text population, children, persons, etc., means population, children, persons, etc., of Ukrainian origin, unless otherwise stated.

accounts for only 22.64% of the increase in numbers. A good percentage of the increase was due to the birth rate. In 1941 there were 128,700 boys and girls, 19 years of age or less, who were, of course, born after 1921. But an important part of the increase was made up by those that had previously confused racial origin with their former country of allegiance and in 1941 properly recorded themselves as Ukrainians. Some of the 128,700 that were born after 1921, were born from parents who in 1921 were included among other racial groups.

The Ukrainian population according to provinces, as compared with the total population, is as follows:

| | Canadian Population | Total Ukrainian Population | | |
|----------------------------|------------------------|-------------------------------|-------------|-------------|
| | | Male | Female | Total |
| Prince Edward Island | 95,047 | | 2 | 2 |
| Nova Scotia | 577,962 | 403 | 308 | 711 |

| CANADA | 11,506,655 | 162,600 | 143,329 | 305,929 |

Of the total Ukrainian population in Canada 78.9% is settled in the three Prairie Provinces where most of those reported as gainfully occupied in agriculture are found. The combined population in British Columbia, Ontario, Quebec, Yukon, North West Territories and the Maritime Provinces is not as great as that found in any one of the three Prairie Provinces.

The Evangelical church finds most of its followers in Alberta and Saskatchewan and ranks twelfth in numerical strength. The balance of the religions have less than 500 followers.

OCCUPATIONS

Definition of Gainful Occupation:

A gainful occupation is defined in the census as one "by which the person who pursues it earns money or in which he assists in the production of marketable goods." Persons unemployed at the census date were asked to report the occupation in which last employed. Those who indicated that they had been unemployed for some lengthy period were further asked whether they were still seeking employment before being considered as gainfully occupied. Persons who reported that they were no longer following their former occupation because of old age or physical disability, and did not expect to return to it, were enumerated as "retired." As for young persons, only those not attending school and employed regularly in some gainful occupation were included among the gainfully occupied. Children of working age, that is, 14 years of age and over, assisting parents in the work of the farm or in some family business in a "no pay" capacity were reported as having a gainful occupation, but daughters helping in the domestic work of the home without pay were not included in the population gainfully occupied. Where a person customarily followed more than one occupation the enumerator recorded the occupation at which the person was employed most of the time during the year or from which he received the greater part of his annual earnings.

There are 113,921 Ukrainians, 14 years of age and over, gainfully occupied as follows:

OFFICIAL LANGUAGE AND MOTHER TONGUE

Official languages are not to be confused with mother tongues. By mother tongue is meant the first language learned in childhood if still understood by the person. Mother tongue, being used in the home, is natural to a person even if he is unable to speak it on account of youth, infirmity or for some other reason, whereas the official language or languages are those recognized by statute for general use. Thus the immigrants to a new country bring with them their mother tongues and continue to use them in their homes, but these have no relation to the official languages in the country of their adoption.

The population speaking one, both or neither of the official languages of Canada, divided between male and female, is as follows:
