**Gabro, Jaroslav**, b 31 July 1919 in Chicago, d 28 March 1980 in Chicago. Ukrainian Catholic bishop. A graduate of the Catholic University of America and St Joseph's Seminary in Washington, DC, he was ordained in 1945. In 1961 he was consecrated bishop of the new Chicago eparchy for Ukrainians. He established a number of missions and the eparchial weekly *Nova Zoria* (The New Star). His introduction of the Gregorian calendar in 1964 aroused much controversy and led to the founding of the dissident ss Volodymyr and Olga parish.

**Gabrusevych, Ivan** [Gabrusevyč] (pseud. John, Irten), 1902–44. Political leader and activist of the nationalist movement in Western Ukraine. Gabrusevych belonged to the radical wing of the Ukrainian Military Organization and to the Organization of Ukrainian Nationalists. In 1930 he was a regional leader of the latter organization. As a member and leader of the Union of Ukrainian Nationalist Youth, he conducted agitational work and propaganda among Ukrainian youth. In 1929 Gabrusevych published the underground political journal *Iunak*, and in 1930 helped organize acts of sabotage against the Polish government. After a brief arrest and imprisonment, he left Western Ukraine in 1932 and stayed in Germany until the Nazi-Soviet invasion of Poland. He was arrested by the Gestapo during the Second World War and died in the Sachsenhausen concentration camp.

**Gadzinsky, Volodymyr** [Gadzins'kyj] (pseud. Yosyf Hrikh, Oskar Reding, Trylsky), b 21 August 1888 in Cracow, d 11 August 1932 in Odessa. Poet and critic. From 1919 he lived in Soviet Ukraine, where he worked as an editor and belonged to the writers' organizations \*Hart and the All-Ukrainian Association of Proletarian Writers. His literary output consists of the poetry collections (mainly narrative poems) *Z dorohy* (From the Road, 1922), *Ainshtain, Zemlia* (Einstein, Earth, 1925), *USSR* (Ukrainian SSR, 1925), *Zaklyk chervonoho renesansu* (The Call of the Red Renaissance, 1926), and *Ne – abstrakty* (Not – Abstracts, 1927); the novelette *Kinets'* (The End, 1927); and two books of literary polemics, reviews, and criticism: *Na bezkrovnomu fronti* (On the Bloodless Front, 1926) and *Fragmenty stykhiï* (Fragments of the Elemental Force, 1927). Persecuted during the Stalinist terror, he committed suicide.

**Gaganets, Yosyf** [Gaganec', Josyf], b 10 April 1793 in Vyslok Velykyi near Sianik, Galicia, d 22 December 1875 in Prešov. Greek Catholic bishop. After studying theology at the Trnava academy, he was ordained in 1817 and served as a village priest. He became canon (1835), vicar capitular (1841), and bishop (1843) of Prešov eparchy. As bishop, he opposed Magyarization and promoted the Byzantine rite and the Ukrainian language. He founded many parish schools and institutions and

Ivan Gabrusevych

Bishop Yosyf Gaganets

built a new episcopal residence and cathedral. He urged his priests (he ordained 237) to pay more attention to their parishioners' secular problems. In 1846 he obtained regular state incomes for his clergy. His support of Ukrainian autonomy and his pro-Habsburg stance during the Revolution of 1848–9 resulted in attempts by Hungarian circles to have him removed from office. For his loyalty to the crown he was appointed counselor to the Austrian court in 1868.

**Gagauzy.** An ethnic group native to southern \*Bessarabia, which now constitutes parts of the Moldavian SSR and Odessa oblast. Origins of the Gagauzy are uncertain. Their ancestors were either Turkic Oghuz or Cumans who settled in \*Dobrudja in the Middle Ages, or perhaps Bulgarians who were forcibly Turkified from the 14th century onward. Although they speak Turkic, they are Orthodox, not Moslem, and are culturally close to Bulgarians, with whom they migrated to Bessarabia in the first half of the 19th century during the Turkish-Russian wars. A part of the Gagauzy resettled in the 1860s from Bessarabia to the vicinity of Berdianske on the Azov coast, and in 1908–14 to Central Asia. In 1970, 156,600 Gagauzy lived in the USSR, 26,400 of them in Ukraine and 125,000 in Moldavia. In 1979, 173,200 Gagauzy lived in the USSR. The majority are rural (82 percent in Ukraine in 1970) and have retained Gagauz as their mother tongue (89 percent in 1979).

**Galagan.** Surname of a Cossack *starshyna* family, which originated with Col Hnat \*Galagan (d 1748) and his brother Semen, acting colonel of Myrhorod during the Crimean campaign of 1736. Other notable members of the family were Hryhorii (1716–77), colonel of Pryluka (1739–63) and a participant in Russian campaigns against the Turks and Prussians, and Hryhorii \*Galagan, a civic leader.

With the death of the latter's son Pavlo (1853–69) the Galagan line came to an end.

**Galagan, Hnat**, b ? , d 1748 in Pryluka. In 1706 he was elected colonel at the Zaporozhian Sich and served under I. Mazepa as a colonel of a mercenary regiment. In 1708 he joined the side of Peter I against Mazepa. On 14 May 1709 he helped the Russian army to raze the Zaporozhian Sich, for which he was generously rewarded by the tsar. He served as colonel of Chyhyryn (1709–14) and Pryluka (1714–39) and was known as a careerist and oppressive exploiter of peasants.

Hryhorii Galagan

Volodymyr Galan

**Galagan, Hryhorii**, b 15 August 1819 in Kiev, d 25 September 1888 in Kiev. Ukrainophile civic leader, ethnographer, and patron of Ukrainian culture. A large landholder in the Poltava and Chernihiv regions, he was personally acquainted with T. Shevchenko, M. Maksymovych, P. Kulish, V. Antonovych, and many members of the \*Hromada of Kiev. As a judge and a member of government agencies preparing and supervising the 1861 reforms and, from 1882, as a member of the State Council, he defended the interests of the Ukrainian peasantry. From 1865 until his death he was an active promoter of zemstvos. In Sokyryntsi, Pryluka county, he opened and subsidized the first peasant savings and loans association in Ukraine. He initiated and financially assisted the creation of elementary schools in Pryluka county and, in 1874, the Pryluka gymnasium. In memory of his son Pavlo, he founded \*Galagan College in Kiev in 1871. A great benefactor and patron of the arts, he had buildings constructed in the traditional Ukrainian style, bought art works (including some by T. Shevchenko), supported the development of choral singing and *vertep* drama, and financially contributed to the journal *Kievskaiia starina*. In 1873–5 he was president of the \*Southwestern Branch of the Imperial Russian Geographic Society.

**Galagan College** (Kolegiia Pavla Galagana). Preparatory boarding school in Kiev founded on 1 October 1871 by H. \*Galagan in memory of his deceased son Pavlo. The college was under the supervision of Kiev University and had four grades. In contrast to regular secondary schools it treated modern languages, drawing, and choir singing, but not Greek, as compulsory subjects. It also offered enriched courses in mathematics and Russian. Its extensive library was based on M. Markevych's collection. Fifty to sixty students per year studied at the

Galagan College

college in a family atmosphere, about half of them supported by the Galagan Foundation. Admission was restricted to boys of the Orthodox faith and preference was given to applicants from Pryluka county. Many of the school's graduates, including A. \*Krymsky, went on to play important roles in Ukrainian scholarship and culture. Under the Soviet regime the college was turned into a \*labor school in 1920.

**Galan, Volodymyr** (Gallan, Walter), b 3 April 1893 in Hlyniany, Peremyshliany county, Galicia, d 5 July 1978 in Philadelphia. Civic leader and banking executive. Galan studied law and economics in Lviv, Prague (LL D 1922), and Philadelphia. During the First World War he served in the Austrian army and then commanded a unit known as the Battery of Death in the Ukrainian Galician Army. In 1923 he immigrated to the United States. He was a founder and president (1929–40) of the United Ukrainian American Organizations of Philadelphia and helped to establish the Ukrainian Congress Committee of America. After chairing the Relief Committee for Carpatho-Ukraine (1938–9), Galan was a founder, executive director (1947–55), and president (1955–) of the \*United Ukrainian American Relief Committee. He was also a founder and president of the United Ukrainian Veterans of America. He contributed many articles to the Ukrainian press and wrote a book of war memoirs, *Bateriia smerty* (The Battery of Death, 1968).

**Galați**. VIII-9. City (1980 pop 261,000) and district center in southeastern Rumania, situated at the confluence of the Danube and Seret rivers. Nearby the Prut River joins the Danube. Galați is an important trade and industrial center, inland port, and naval base. The largest shipyard in Rumania is found there. In the late 11th and 12th centuries it was known as Malyi Halych and played an important role in Galicia's trade with Bulgaria, the Byzantines, the Italian cities, and the Orient. From the early 16th century to 1829 it was an important Ottoman port, and from 1834 to 1883 a free port. Hetman I. Mazepa died and was buried there in St George's Cathedral.

**Galay, Theodore** (Ted), b 16 July 1941 in Beausejour, Manitoba. Playwright. Educated at the universities of Manitoba and British Columbia (PH D), Galay teaches mathematics at Vancouver Community College. His plays focus on ethnic identity and generational conflict. His one-act plays *After Baba's Funeral* (1979) and *Sweet and Sour Pickles* (1980) won the Best Play Award at the The-

atre Ontario '80 Festival and the Drama Award of the Canadian Authors' Association in 1981. These were followed by *The Grabowski Girls* (1983), *Tsymbaly* (1985), which won the Jessie Award for Best Original Play in Vancouver in 1984–5, and *Primrose School District 109* (1985).

Archimandrite Ioanikii  
Galiatovsky

**Galiatovsky, Ioanikii** [Galjatovs'kyj, Ioanikij], b ? , d 12 January 1688 in Chernihiv. Writer and Orthodox church leader. Galiatovsky was educated at the Kievan College, then lectured there (1650–69) and served as its rector (from 1657) and hegumen of the Kiev Epiphany Brotherhood monastery. From 1669 he was archimandrite of the Yeletskiy Dormition Monastery in Chernihiv. He was a renowned orator and the author of a collection of sermons, *Kliuch rozumieniia* (The Key of Understanding, 1659, 1663), which included 'Nauka, albo sposob zlozhenia kazania' (Teaching, or the Manner of Composing a Sermon, 1659) explaining the theory of baroque sermons. He also wrote baroque poetry, a collection of stories about the miracles wrought by the Virgin Mary, *Nebo novoie* (The New Heaven, 1665), and several polemical treatises in Polish attacking the Church Union of Berestia, Judaism, and Islam, including *Łabędź z piórami swemi* (The Swan with Its Feathers, 1679), *Alphabetum rozmaitym Heretykom ...* (A Primer for Various Heretics, 1681), and *Alkoran Machometow* (The Muslims' Koran, 1683).

**Galicia** (Ukrainian: Halychyna). A historical region in southwestern Ukraine. Its ethnic Ukrainian territory occupies the basins of the upper and middle Dniester, the upper Prut and Buh, and most of the Sian, and has an area of 55,700 sq km. Its population was 5,824,100 in 1939. The name is derived from that of the city \*Halych.

**Location and territory.** Galicia lies in the middle of the European landmass between the Black and Baltic seas, to which it is linked by the rivers Dniester and Prut, and the Buh and Sian respectively. It is linked to the rest of Ukraine by land routes only. It is bounded by Poland in the west, \*Transcarpathia and the \*Lemko region in the southwest, \*Bukovyna in the southeast, \*Podilia in the east, \*Volhynia in the northeast, and the \*Kholm region in the northwest. Its location on the crossroads to the seas led its expansionist foreign neighbors, especially Poland and Hungary, to strive repeatedly to gain control of Galicia.

Galicia's location protected it from the incursions of Asiatic nomadic peoples and facilitated contact with the rest of Europe. After the demise of Kiev as the capital of Rus' and the decline of the Varangian trade routes, the main trade route linking the Baltic Sea with the Black Sea and Byzantium passed through Galicia. Because of its distance from the Eurasian steppe, medieval Rus'-Ukrainian statehood survived there as the Principality of \*Galicia-Volhynia for another century after the sack of Kiev by the Mongols in 1240. The principality provided refuge to the people from other parts of Rus' who had fled the Mongol invasion. It thus became a reservoir of Ukrainian population, much of which later remigrated to the east. With the decline of commerce in the Black Sea Basin in the 16th century, Galicia lost its importance as the link with the Baltic. Its peripheral role vis-à-vis developments in Ukraine during the period of the \*Hetman state rendered it relatively insignificant.

Only the southern, natural frontier of Galicia – shaped by the Carpathian Mountains – remained unchanged.

#### GALICIA

1. Ukrainian Galicia (and the territory of the Western Ukrainian National Republic in 1918–20)
2. Boundaries of Halych principality
3. Boundaries of Rus' and Belz voivodeships under Polish rule (to 1772)
4. Boundaries of Galicia under Austrian rule (1772–1918)
5. Western boundary of the Ternopil region under Russian rule (1809–15)
6. Ukrainian-Polish ethnic boundary
7. Jurisdictional boundary between the Lviv and Cracow appellate courts
8. Curzon Line
9. Boundary between Lviv and Cracow voivodeships
10. Western and northern boundaries of District Galicia during the German occupation (1941–4)
11. Current border of the Ukrainian SSR, Poland, Czechoslovakia, and Rumania
12. Boundary of Kremianets district within Ternopil oblast (1939–44)

The rulers of the Principality of Galicia-Volhynia had extended the eastern frontier past the Zbruch River and into the steppe; at one time (end of 12th century), they ruled lands as far south as the lower Danube. Under Polish rule (1340–1772) Galicia constituted first Rus' land (*Regnum Russiae*) and then from 1434 \*Rus' voivodeship (palatinate) and the western part of \*Podilia voivodeship.

Under Austrian rule (1772–1918), Galicia was bounded in the east by the Zbruch River, and in the southeast, as it had been under Poland, by the Cheremosh and Dniester rivers. After the final partition of Poland in 1795 and territorial adjustments in 1809 during the Napoleonic wars, the administrative territory of Austrian Galicia also encompassed the western, Polish ethnographic part of Galicia – the area west of the jurisdictional boundary between the Lviv and Cracow higher crownland courts, which ran along the western limits of Sianik, Brzozów, Peremyshl, and Jarosław counties. Thus, Galicia embraced almost all the territory of the former Rus' voivodeship, the southern part of Belz voivodeship, and small parts of Podilia and Volhynia voivodeships, as well as some Polish ethnic lands. From 1787 to 1849 and again in 1859–61, Bukovyna was also administratively part of Galicia. From 1809 to 1815, the Ternopil region was occupied by Russia. The \*Western Ukrainian National Republic (1918–19) encompassed all of Ukrainian Galicia and, for a short time, the Ukrainian parts of Bukovyna and Transcarpathia. Under interwar Poland Ukrainian Galicia consisted of Lviv, Stanyslaviv, and Ternopil voivodeships. During the Nazi occupation (1941–4) it constituted the so-called Galicia district of the \*Generalgouvernement. In 1945 the west and northwestern borderlands of Ukrainian Galicia became part of Poland. The remaining territory was divided among four Soviet oblasts: \*Lviv, Drohobych (incorporated in 1959 into Lviv oblast), Stanyslaviv (renamed \*Ivano-Frankivske in 1962), and \*Ternopil.

**Physical geography.** Galicia is not a biotope, but consists of several natural regions: (1) the \*Carpathian Mountains; (2) the upper \*Sian region and \*Subcarpathia; and (3) the upland chain of \*Roztochia, \*Opilia, Podilia, and \*Pokutia, which are separated by the \*Buh Depression from the southern fringe of the \*Volhynia-Kholm Upland. No other part of Ukraine has such a large variety of landforms (mountains, foothills, plateaus, and glacial depressions) in so small an area. Galicia's \*climate changes gradually from maritime in the northwest to continental in the east, mountain in the south, and Black Sea coastal in the southeast. There are corresponding vegetation zones: mountain forest and alpine meadow in the Carpathians, mixed forest in the west, and \*forest-steppe in the east. The eastern perimeter of the beech and fir forests runs through Galicia.

**Prehistory.** The oldest inhabitants of Galicia migrated into the Dniester Basin from southern Ukraine during the Middle Paleolithic. The remains of a few settlements of the \*Mousterian culture (Bilche-Zolote, Bukivna, Zalishchyky-Pecherna, Kasperivtsi) have been uncovered there. Upper Paleolithic Aurignacian peoples relatively densely populated the basin between present-day Ivano-Frankivske and Bukovyna, as well as southern Podilia. In the Mesolithic, northern Galicia between the rivers Sian and Buh was sparsely populated. In the Neolithic and Eneolithic, the northeast was inhabited by agricultural tribes of the so-called Buh culture. The Dniester

Basin and part of western Podilia were inhabited by people of the \*Trypilian culture. The first migrating peoples from Silesia arrived, bringing with them pottery decorated with linear bands. They were followed by seminomadic Nordic tribes of the Corded Ware culture. A Nordic tribe that buried its dead in stone slab-cists settled in the Buh Basin and spread into western Podilia.

In the Bronze Age, seminomadic peoples from the west forced a part of the autochthons in the Buh Basin to resettle in Polisia. Later, they penetrated into the region between the Dniester and the Carpathian Mountains, where they came into contact with bronze-making tribes from Transcarpathia, and a mixed variant of the \*Komariv culture arose. In the middle Dniester Basin the Trypilian culture continued. In the 13th and 14th centuries BC, the first wave of the ancestors of the western proto-Slavs from Silesia penetrated into the lower Sian Basin; these tribes of the \*Lusatian culture occupied the western bank of the Sian as far north as its confluence with the Tanew River.

In the Iron Age, agricultural tribes migrated back from Polisia into the upper Buh Basin and gave rise to the \*Vysotske culture. In the Dniester Basin the \*Thracian Hallstatt culture developed. In western Podilia, the so-called Scythian Ploughmen, who were most likely proto-Slavic tribes of the \*Chorny Lis culture, made their appearance. At the end of the La Tène period, a second wave of western proto-Slavs, the \*Venedi, penetrated into the Dniester Basin and western Podilia. The \*Lypytzia culture arose; it is perhaps connected with the \*Getae who settled in the upper Dniester Basin, particularly after the Roman occupation of Dacia.

Galicia in the era of European tribal migration (AD 300–700) is not well known; a few proto-Slavic hamlets with gray, wheel-turned pottery and barrows with the cremated remains of the ancestors of the Tivertsians have been uncovered. Many archeological remains of the Princely era have been found, however: eg, fortified towns, settlements, burial grounds, architectural remains (the ruins of the Dormition Cathedral and other churches in Halych and \*Krylos), and the \*Zbruch idol. Evidence of foreign in-migration can be found in various localities: eg, ancient Magyar barrows near Krylos, Varangian barrows in the ancient town of \*Plisnesk, caches of Varangian arms, medieval foreign coins, and Cuman \*stone baby.

#### History

*The Princely era.* In the second half of the first millennium AD, the Buh, Sian, and Dniester basins were inhabited by tribes of \*Buzhanians, \*Dulibians, \*White Croats, and \*Tivertsians. Their fortified towns – \*Terebovlia, \*Halych, \*Zvenyhorod, \*Peremyshl, and others – flourished because of their location on trade routes linking the Baltic with the Black Sea and Kiev with Cracow, Prague, and Regensburg. This region was first mentioned in the medieval chronicle *Povist' vremennykh lit* (Tale of Bygone Years), which described Grand Prince \*Volodymyr the Great's war with the Poles in 981 and his annexation of the Peremyshl and \*Cherven towns to Kievan Rus'. In 992, Volodymyr marched on the White Croats and annexed Subcarpathia. Thus, by the end of the 10th century all of Galicia's territory was part of \*Kievan Rus', and it shared its political, social, economic, religious, and cultural development.

After the death of Grand Prince \*Yaroslav the Wise in

1054, Kievan Rus' began to fall apart into its component principalities. From 1084 Yaroslav's great-grandsons, \*Riuryk, \*Volodar, and \*Vasylo Rostyslavych, ruled the lands of Peremyshl, Zvenyhorod, and Terebovlia. Volodar's son, \*Volodymyrko, inherited the Zvenyhorod land in 1124, the Peremyshl land in 1129, and the Terebovlia and Halych lands in 1141; he made Halych his capital. Volodymyrko's son, \*Yaroslav Osmomysl, the pre-eminent prince of the Rostyslavych dynasty, enlarged Halych principality during his reign (1153–87) to encompass all the lands between the Carpathian Mountains and the Dniester River as far south as the lower Danube. Trade and salt mining stimulated the rise of a powerful boyar estate in Galicia. The \*boyars often opposed the policies and plans of the Galician princes and undermined their rule by provoking internal strife and supporting foreign intervention. When \*Volodymyr Yaroslavych, the last prince of the Rostyslavych dynasty, died in 1199, the boyars invited Prince \*Roman Mstyslavych of Volhynia to take the throne.

Roman united Galicia with Volhynia and thus created the Principality of Galicia-Volhynia. It was ruled by the Romanovych dynasty until 1340. The period from 1205 to 1238 in the Galician-Volhynian state was one of further intervention by Hungary and Poland, of internal strife among the appanage princes and the boyars, and hence of economic decline. During the reign of \*Danylo Romanovych (1238–64), however, Galicia-Volhynia flourished, despite the Mongol invasion of 1240–1. Danylo promoted the development of existing towns and built new ones (Lviv, Kholm, and others), furthered the status of his allies (the burghers), and subdued the rebellious boyars. Using diplomacy and dynastic ties with Europe's rulers, he strove to stem the Mongol expansion. The Galicia-Volhynian state flourished under Danylo's successors. In 1272 Lviv became the capital, and in 1303 \*Halych metropolity was founded. But resurgent boyar defiance, the Mongol presence, and the territorial ambitions of Poland and Hungary took their toll. The Romanovych dynasty came to an end in 1340 when boyars poisoned Prince \*Yurii II Boleslav, and rivalry among the rulers of Poland, Hungary, Lithuania, and the Mongols for possession of Galicia and Volhynia ensued.

*The Polish era.* The struggle lasted until 1387. In 1340 King \*Casimir III the Great of Poland attacked Lviv and departed with the Galician-Volhynian regalia. A boyar oligarchy ruled Galicia under the leadership of D. \*Dedko until 1349, when Casimir again invaded and progressively occupied it. In 1370 Casimir's nephew, Louis I of Hungary, also became the king of Poland; he appointed Prince \*Władysław Opolczyk in 1372 and Hungarian vicegerents from 1378 to govern Galicia. After the marriage of Grand Duke \*Jagiello of Lithuania and Louis's daughter, Queen \*Jadwiga of Poland, and the resulting dynastic union in 1386, an agreement was reached whereby Galicia and the Kholm region were acquired from Hungary by Poland, and Volhynia became part of the Grand Duchy of Lithuania.

Under Polish rule, Galicia was known at first as the 'Rus' land' or 'Red Rus' and was administered by a starosta, or vicegerent, appointed by the king. Roman Catholic dioceses were established in Peremyshl, Halych, and Kholm and were granted large estates and government subsidies. In 1365 a Catholic archdiocese was founded in Halych; it was transferred to Lviv in

1414. In the early 15th century, the region was renamed Rus' voivodeship. Its capital became Lviv, and it was divided into four lands: Lviv, Halych, Peremyshl, and Sianik; in the 16th century, the Kholm land was also incorporated. In 1434, \*Rus' law was abolished in Galicia and replaced by \*Polish law and the Polish administrative system. Land was distributed among the nobility, who proceeded to build up latifundia and to subject and exploit the peasants.

Major social changes occurred in Galicia. Boyars who refused to convert to Catholicism forfeited their estates. Many resettled in the Lithuanian lands; those who did not became impoverished, déclassé petty nobles and, with time, commoners. Certain boyars received royal privileges; they gradually renounced their Orthodox faith and stopped speaking Ukrainian, and became instead Polonized Catholics. The tendency to assimilate permeated all of Galicia's upper strata and was particularly prominent in the second half of the 16th century; by the end of the 17th century most of the Ukrainian nobility had become Polonized. At the same time Ukrainian merchants and artisans were deprived of their rights by the now favored Polish Catholic burghers who colonized the towns and received official positions and privileges granted solely to them by \*Magdeburg law. Polish government circles encouraged the inflow of Polish and foreign nobles and Catholic peasants into Galicia. The number of Poles, Germans, Armenians, and (later) Jews increased in the towns, where they established separate communities. The government's discrimination and limitations imposed by the guilds on the Ukrainian burghers provoked them to form \*brotherhoods to defend their rights towards the end of the 16th century.

In the 16th century corvée (see \*Serfdom) was introduced in the Polish Commonwealth. This excessive exploitation of peasant labor, which in many cases became actual slavery, led to peasant uprisings, among them the \*Mukha rebellion of 1490–2. Many peasants also escaped from the oppression to the steppe frontier of central Ukraine.

The Orthodox church, which had the support of the Ukrainian masses, had played an important role in Galicia. Yet the separate existence of Halych metropolity had been opposed from 1330 on by the metropolitans of Kiev, who resided in Moscow. Halych metropolity therefore had no hierarch in the years 1355–70 and was abolished in 1401. Halych eparchy had no bishop from 1406 to 1539. At the end of the 16th century, in response to the Roman Catholic threat as well as the Reformation, a Ukrainian Orthodox religious and cultural revival began. The defense of Ukrainian interests was assumed by the aforementioned brotherhoods. One of the first was the \*Lviv Dormition Brotherhood, which existed as early as 1463, but whose earnest activity began in the 1580s, when it received Stauropegion status and founded a school, printing press, and hospital. Brotherhoods were founded in many other towns in Galicia using the one in Lviv as the model. Because of the brotherhoods, Galicia became an important center of Ukrainian cultural and religious life. The Lviv brotherhood, for example, nurtured such major Ukrainian figures as P. Sahaidachny, Y. Boretsky, Ye. Pletenetsky, Z. Kopystensky, and P. Mohyla.

After the 1596 Church Union of \*Berestia established the Ruthenian Uniate church, a long period of bitter internal strife between the Ukrainian Orthodox oppo-

nents of the union and its Uniate supporters ensued. (See \*Church history, \*Poetical literature.) The Orthodox church lost its official status, which was not restored by the Polish king until 1632, and Galicia's role as the bastion of Ukrainian Orthodoxy was eclipsed. When the efforts of the leaders of the Hetman state to unite all the Ukrainian territories failed, the Orthodox hierarchs in Galicia and the Lviv brotherhood accepted the church union, and in 1709 Uniate Catholicism became the only faith practiced by Galicia's Ukrainians.

Under Polish rule, many Ukrainians in Galicia who opposed the Polish state's and nobles' restrictions, interdictions, and oppression fled to the east, where they participated in the organized life and events of central and eastern Ukraine and the Zaporozhian Cossacks. (Hetman P. \*Sahaidachny, for example, was from Galicia.) When Hetman B. Khmelnytsky's army entered Galicia in 1648, 1649, and 1655 during the \*Cossack-Polish War, Galicia's Ukrainians organized the Pokutia rebellion against the Poles in 1648, joined Khmelnytsky's forces, and many retreated with them. After the war there were other manifestations of support for pan-Ukrainian political unity by Galicia's Ukrainians, but not on a mass scale. Galicia remained primarily a theater where the Cossack and Polish armies clashed; consequently, much of its population fled and settled in the Hetman state and Slobidska Ukraine.

In the Polish era, popular reaction to Polish rule and oppression in Galicia also took the form of social banditry. The brigands, called \*opryshoks, were particularly active in Subcarpathia and Pokutia from the 16th to the 19th century; their most famous leader was O. \*Dovbush. From the second half of the 17th century, Poland experienced a series of wars and political, social, and economic crises leading to a general weakening of the regime that its neighbors (Austria, Prussia, and Russia) exploited. In 1772 the first partition of Poland occurred, and Galicia was annexed by the Austrian Empire.

*The Austrian era.* Austria laid claim to Galicia on the grounds that its empress, Maria Theresa, was also the queen of Hungary, which had occupied the Principality of Galicia-Volhynia in 1214–21 and 1370–87. The new Austrian province, called the Kingdom of Galicia and Lodomeria, had an area of some 83,000 sq km and around 2,800,000 inhabitants (in 1786). This artificial union of ethnic Ukrainian lands (with huge Polish latifundia) and Polish lands gave rise to constant disputes between the Poles and the Ukrainians under Austrian rule.

During their reigns, Austria's \*Maria Theresa (1740–80) and \*Joseph II (1780–90) introduced reforms to regulate landlord-peasant relations and improve the education of the clergy. In 1786 Austrian codes replaced Polish law and the \*dietines were replaced by an assembly of estates composed of the magnates, nobility, and clergy, which had no real powers. All the power was placed in the hands of the Austrian bureaucracy and the imperial governor in Lemberg (Lviv). In 1782, personal subjection of the peasants was abolished and serfdom was introduced, whereby the peasantry received certain personal and property rights; this, however, was not well enforced following Joseph's death.

In general, Galicia under Austrian rule was an undeveloped and backward agricultural province that provided food products and conscripts for the empire. The new state boundaries had cut it off from the old trade

routes and natural markets, resulting in the decline of its towns. But Austrian rule proved favorable to the Ukrainians' religious life and education. In 1774, the Uniate church was officially renamed the \*Greek Catholic church; it and its clergy were granted the same rights and privileges as the (Polish) Roman Catholic church. Halych metropolity was reinstated in 1807 with its see in Lviv; it consisted of \*Lviv and \*Peremyshl eparchies. A Greek Catholic seminary, the \*Barbareum (1774–84), was founded in Vienna by Maria Theresa to give the clergy a proper education. The \*Greek Catholic Theological Seminary was founded in Lviv in 1783, and a special school, \*Studium Ruthenum (1787–1809), was established at \*Lviv University (founded in 1784) to train candidates for the priesthood who did not know Latin. These institutions prepared the future leaders of the Ukrainian cultural and national revival in Galicia, which occurred despite the fact that under the regime of State Chancellor K. von Metternich Austrian policy towards cultural and social emancipation in outlying provinces had changed for the worse. Under Leopold II, Ukrainian primary schools were abolished where Polish or German ones existed; by 1792 instruction in Ukrainian and Greek Catholic religion was very limited; and in 1812 compulsory education, introduced by Joseph II, was abolished. Lectures at Lviv University (which was closed from 1805 to 1817) were given in German and Latin, and Polish was the language of the primary schools. To counteract these developments, the church under Metropolitan M. \*Levytsky began founding Ukrainian-language parochial schools, which were approved by the emperor in 1818. (See also \*Education.)

Under the impact of \*Romanticism and developments in Russian-ruled Ukraine and in other Slavic countries, a Ukrainian cultural and national renaissance began in Galicia in the 1820s. It was initiated by the seminary students M. \*Shashkevych, Ya. \*Holovatsky, and I. \*Vahylevych, who were known as the \*Ruthenian Triad; they published the first Galician Ukrainian miscellany, \**Rusalka dnistrovaia* (The Dniester Water Nymph), in 1837. This renaissance reached its apogee in the \*Revolution of 1848–9. On 22 April 1848 Governor F. \*Stadion announced the abolition of serfdom in Galicia on the basis of an imperial decree. In May, elections to the first Austrian parliament were held. Thirty-nine Ukrainian deputies were elected, and they soon began demanding social reforms and the division of Galicia along national (Ukrainian and Polish) lines.

The main representative of Galician Ukrainian national aspirations became the \*Supreme Ruthenian Council, which was founded in Lviv in May 1848. In its manifesto, the council proclaimed the unity of Galicia's Ukrainians with the rest of the Ukrainian people and demanded the creation of a separate crownland (province) in the Austrian Empire consisting of the Ukrainian parts of Galicia, Bukovyna, and Transcarpathia. It published the first Ukrainian newspaper, \**Zoria halys'ka*. Its representatives participated in the \*Slavic Congress in Prague in June 1848, where the Ukrainians were recognized as a separate people. The council also organized a national guard, a \*people's militia, and the \*Ruthenian Battalion of Mountain Riflemen. The existence of the council challenged the Polish claim that Galicia was part of Poland, and Polish leaders tried to undermine the council's position by creating a pro-Polish body consisting of nobles

and Polonophile intellectuals – the \*Ruthenian Congress, which published the newspaper \**Dniewnyk Ruskiy*. During the revolution, two cultural and educational institutions, the \*People's Home in Lviv and the \*Halytsko-Ruska Matytsia society, were founded, and the \*Congress of Ruthenian Scholars was held.

The various political and cultural activities ended with the suppression of the revolution, aided by the intervention of the Russian army in Hungary. The government of Emperor \*Francis Joseph I (1848–1916) tightened its grip throughout the empire, re-established centralized rule, and introduced neoabsolutist policies. The Supreme Ruthenian Council was forced to dissolve in 1851. The Polish leaders in Galicia came to an agreement with the government whereby in exchange for their support they would have a free hand in administering the province. The devoted servant of Vienna, A. \*Gołuchowski, was appointed governor (from 1865 vicegerent) of Galicia in 1849; he governed, with a few interruptions, until 1875. Gołuchowski was opposed to all Ukrainian national aspirations and Galicia's territorial division. He filled the ranks of the civil service in Galicia with Poles and Polonized Lviv University. The actions of the government disillusioned a section of the Ukrainian intelligentsia and contributed to the growth of the \*Russophiles who claimed an affinity between the language of Galicia's Ukrainians and Russian. Their clerical-conservative leaders initially had a general, vague sympathy for tsarist Russia. These \*Old Ruthenians, as they called themselves, cultivated a macaronic, artificial idiom called \**ya-zychiie* by its opponents and opposed the use of the Ukrainian vernacular, which was being promoted by their opponents, the Ukrainophile \*Populists. The Russophiles took control of the Halytsko-Ruska Matytsia society, the \*Stauropogon Institute, and the People's Home, and created the \*Kachkovsky Society in 1874. They also published the newspaper \**Slovo*, the popular monthly \**Nauka*, the semimonthly \**Ruskaia rada* and *Besieda*, and other periodicals.

The Young Ruthenians – the young, secular intellectuals of Galicia, many of whom were teachers – organized the Populist movement in reaction to the cultural and political orientation of the Russophiles. They believed in the existence of a Ukrainian nation and considered themselves to be part of it, and they championed the use of the vernacular in schools and in literature. They maintained close ties with intellectuals in Russian-ruled Ukraine, including P. Kulish, M. Kostomarov, O. Konytsky, M. Drahomanov, V. Antonovych, and M. Hrushevsky. Inspired by the ideas expressed in the poetry of T. Shevchenko, the ideology of the \*Cyril and Methodius Brotherhood, and the work of the \*Hromada of Kiev, the Populists organized the \*Ruska Besida cultural society in 1861, the \*Prosvita educational society in 1868, and, with the co-operation and financial aid of Ukrainians under Russian rule, the literary Shevchenko Society in Lviv (later the \*Shevchenko Scientific Society) in 1873. They began publishing various periodicals, including the widely read \**Pravda*, \**Dilo*, and \**Zoria*. In the late 1870s a bitter struggle arose between the Russophile and Populist camps, in which the latter, supported by the students (among them I. \*Franko and M. \*Pavlyk) and the majority of the Ukrainian intelligentsia, emerged victorious. Thereafter the Russophiles lost most of their popular support and became peripheral to cultural de-

velopments. The support given to the Populists by leaders from Russian-ruled Ukraine, especially M. Drahomanov, helped secure their victory.

After 10 years of neoabsolutism, the constitutional period began in the Austrian state in February 1861, when the emperor issued a special patent creating a bicameral central parliament – consisting of a house of lords and a house of representatives – and provincial diets. Initially representatives to the central parliament were designated by the provincial diets, but from 1873 they were elected by four curiae: the large landowners, chambers of commerce, municipalities, and everyone else, primarily rural communities. In 1897 a fifth curia was created in which virtually every literate male could vote, and in 1907 the curiae were abolished and universal male suffrage was introduced. Greek Catholic bishops were ex-officio members of the upper house. In the lower house the number of Ukrainian members varied, the highest being 49, in 1861, and the lowest 3, in 1879. Even though the Ukrainians constituted half of the population of Austrian Galicia, their share in the diet was never more than a third, and often much less, owing to Polish control of the provincial administration and to electoral manipulation. The Ukrainian members of the central parliament and the Galician diet (in Lviv) constantly demanded the administrative and political division of Galicia along national lines, universal suffrage instead of the curial system, the expansion of the Ukrainian secondary-school network, and the creation of a Ukrainian university in Lviv.

After serfdom was abolished in 1848, the peasantry owned only tiny subsistence holdings. Until 1900, up to 40 percent of the arable land remained in the hands of the large landowners. The gentry claimed ownership of pastures and forests and the peasants no longer had the right of use, which they had previously according to the traditional 'servitudes,' but now had to pay for their use. The Polish nobility strongly opposed any improvement of the peasants' condition and the equitable distribution of land. As their population rapidly increased, the peasants were forced to subdivide their small holdings even further and to earn money by working on estates. This led to a series of agrarian strikes, the largest of which occurred in July–August 1902 with the participation of some 200,000 peasants. To alleviate the condition of the peasantry, the Populist intelligentsia strove to develop a strong \*co-operative movement, \*credit unions, and insurance companies. But for many impoverished peasants, even these efforts were insufficient. Beginning in the 1880s, a mass \*emigration began, mainly to the United States, Canada, Brazil, and Argentina; by 1914, some 380,000 Ukrainians had left Galicia.

In the period 1867–1914, Ukrainian cultural and, to some extent, political life in Galicia underwent a remarkable growth. After the \*Ems Ukase prohibited Ukrainian publications in Russian-ruled Ukraine in 1876, Galicia became the 'Piedmont' of the Ukrainian movement. Much emphasis was placed on education as the basis of national consciousness and as the means of fostering new leaders, and significant progress in this field was made, especially in the decade before the First World War. By 1914 there were 2,500 public Ukrainian-language primary schools, but only 16 gymnasiums (10 of them private) and 10 teachers' colleges. At Lviv University, 10 chairs held lectures in Ukrainian; the Chair of Ukrainian

History directed by M. \*Hrushevsky was particularly important.

The Austrian government's efforts in 1890–4 to bring about a Polish-Ukrainian compromise (the so-called \*New Era) because of the threat of war with Russia benefited the Poles more than the Ukrainians and did not gain popular support. It resulted, however, in a regrouping of Ukrainian political forces. The \*Ukrainian Radical party (RP) was founded in 1890. The champion of agrarian socialism and anticlericalism, it opposed the policy of the New Era and the Populists who supported it. In 1895, influenced by Yu. Bachynsky's *Ukraina Irredenta*, the RP adopted the principle of Ukrainian independence. In 1899, the majority of the Populists and certain Radicals founded the \*National Democratic party (NDP). Advocating pan-Ukrainian independence as the final goal, this coalition party promoted democratic nationalism, social reform, and autonomy of the Ukrainian lands within the Austro-Hungarian Empire. Also in 1899, the socialist faction of the RP broke away and founded the \*Ukrainian Social Democratic party (USDP). It pursued the goal of organizing Ukrainian workers in trade unions. In elections to the central parliament and the Galician diet, the NDP usually got about 60 percent of the Ukrainian popular vote, the RP, about 30 percent, and the USDP, about 8 percent.

In 1900, A. \*Sheptytsky became the new Greek Catholic metropolitan. Under his direction the Greek Catholic church became a staunch supporter of the Ukrainian national cause, and the priests played a much more active role in civic life. At the time, Ukrainian organized life flourished because of the efforts of the Prosvita society, the sports and youth organizations \*Sich and \*Sokil, and the various economic and co-operative associations. Ukrainian-Polish differences were manifested by Ukrainian obstructionism in the diet, election campaign violence, Polish support of the Russophiles, Polish opposition to electoral reform, open hostility of the Poles to the creation of a separate Ukrainian university in Lviv, and student demonstrations and violence. Ethnic relations deteriorated to the extent that in 1908 the anti-Ukrainian Galician vicegerent A. Potocki was assassinated by the student M. Sichynsky. In this period international tensions came to play an important role in Galicia's domestic affairs. Worried about the impact of the Ukrainian national movement in Galicia on the population of its Ukrainian gubernias, the tsarist regime channeled much more funds to the movement's opponents in Galicia, the Russophiles, who disseminated pro-Russian propaganda in their press. The threat of a European war had existed since 1908, and on 7 December 1912, 200 leading members of the NDP, RP, and USDP met in Lviv to discuss the international crisis caused by the Balkan War. They issued a declaration reaffirming the loyalty of Galicia's Ukrainians to Austria (this loyalty was suspected by the authorities because of the Russophiles' activity) and stating that in the event of war the Ukrainians would actively support Austria against Russia, the greatest enemy of the Ukrainian people.

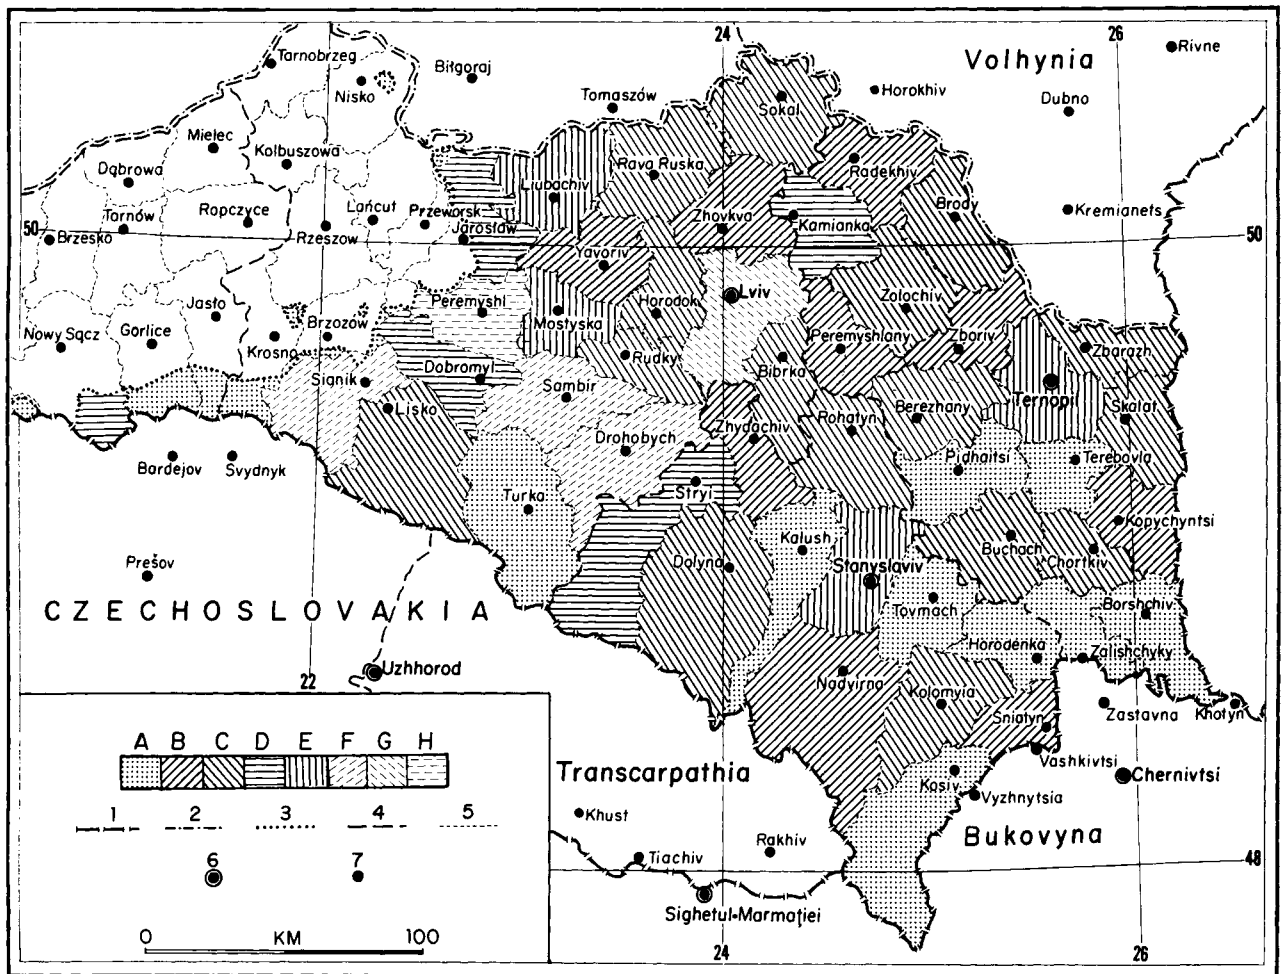

When the First World War broke out, the Ukrainian parties founded the Supreme Ukrainian Council in August 1914 in Lviv. Headed by K. Levytsky, the leader of the NDP, it called for struggle against Russia as a means of liberating Ukraine and sponsored the creation of a legion of volunteers, the \*Ukrainian Sich Riflemen, within

the Austrian army. In fall 1914, Russian forces occupied most of Galicia. Ukrainian organizations and the Ukrainian language were outlawed, and thousands of prominent Ukrainians, including Metropolitan A. Sheptytsky, were arrested and deported to the east. During the Austrian retreat tens of thousands of Ukrainians suspected, rightly or wrongly, of sympathizing with Russia or being Russian agents were summarily executed; thousands were deported to internment camps, of which \*Talerhof near Graz was the largest.

The Russian occupational administration under G. Bobrinsky pursued a policy of Russification with the cooperation of local Russophiles. Ukrainian leaders who had avoided deportation fled westward, mostly to Vienna. There, in May 1915, the \*General Ukrainian Council (GUC) was founded as the highest political representation of Ukrainians in the Austrian Empire. It consisted not only of 24 Galician and 7 Bukovynian representatives, but also of 3 members of the \*Union for the Liberation of Ukraine, an organization of political émigrés from Russian-ruled Ukraine. In spring 1915, Austrian armies reoccupied most of Galicia, except for a strip of land between the Seret and Zbruch rivers. The GUC strove to obtain territorial autonomy for the Ukrainians of Galicia, but the Austrian regime sided with the Polish conservatives who proposed a Polish state consisting of Congress Poland and Galicia linked with the Habsburg monarchy by ties similar to those between Austria and Hungary. The Ukrainian parliamentary deputies in Vienna, headed by Ye. \*Petrushevych, spoke out against the Polish proposal, demanding a separate Galician Ukrainian province and the guarantee of national autonomy well before the end of the war. The establishment of an autonomous Ukrainian government in Central Ukraine in 1917 – the \*Central Rada in Kiev – encouraged the Galician Ukrainian deputies to demand autonomy and, in late 1918, independence and the union of Galicia with the \*Ukrainian National Republic. Galician autonomy was demanded by the Ukrainian delegation during negotiations of the Peace Treaty of \*Brest-Litovsk with the Central Powers and was the subject of a secret additional agreement between the UNR and the Austro-Hungarian government signed on 9 February 1918.

*The period of Western Ukrainian statehood.* Before the collapse of the Habsburg state, Galician and Bukovynian political leaders – the members of parliament and the provincial diets and party delegates – gathered in Lviv on 18 October 1918 and created a constituent assembly, the \*Ukrainian National Rada. Headed by Ye. Petrushevych, it proclaimed a Ukrainian state on the territories of Galicia, northern Bukovyna, and Ukrainian Transcarpathia. On 1 November, the Rada seized the government buildings in Lviv and in the county towns of Galicia, thus bringing to an end nearly 150 years of Austrian rule. On 9 November, the Rada defined the structure of the new Western Ukrainian National Republic (ZUNR) and elected its executive body – the \*State Secretariat headed by K. Levytsky. From the start, the ZUNR encountered stubborn opposition from the Poles, and heavy fighting ensued. On 21 November, the Rada was forced to quit Lviv and move to Ternopil and, in late December, to Stanyslaviv. The ZUNR began negotiating unification with the UNR, and on 3 January 1919 the Rada ratified the law on unification. The union of the two states was officially proclaimed in Kiev on 22 January 1919 and confirmed by the pan-Ukrainian \*Labor Congress there.

## GALICIA IN THE 1920S

Population with Ukrainian as the mother tongue\*

- A. 85 percent and over
- B. 80–84.9 percent
- C. 75–79.9 percent
- D. 70–74.9 percent
- E. 65–69.9 percent
- F. 60–64.9 percent
- G. 55–59.9 percent
- H. 50–54.9 percent

\*Including Roman Catholic Ukrainians and Ukrainianized Poles

National unification did not change the situation in Galicia where the administration remained in local Ukrainian hands (see \*Dictatorship of the Western Province of the Ukrainian National Republic), and the \*Ukrainian Galician Army (UHA) continued fighting the advancing Polish army, reinforced by the divisions of Gen J. \*Haller. The \*Ukrainian-Polish War in Galicia lasted until July 1919, when the Ukrainian government and the UHA were forced to retreat east across the Zbruch River. The UHA fought alongside the \*Army of the UNR against the Red Army (see \*Ukrainian-Soviet War). The ZUNR government under Ye. Petrushevych went into exile in late 1919 and continued a diplomatic struggle from Vienna and Paris for the independence of Galicia and its recognition by the Entente Powers. During the Red Army's offensive

against Poland in Galicia, the \*Galician Socialist Soviet Republic existed from July to September 1920 and was headed by a Moscow-backed provisional government – the \*Galician Revolutionary Committee led by V. Zaton-sky. Poland emerged victorious in the Polish-Soviet War, and its occupation of Galicia and western Volhynia was recognized in the Peace Treaty of \*Riga in March 1921. In March 1923 the \*Conference of Ambassadors accepted that Ukrainian Galicia was part of Poland but with the proviso that Galicia would retain a certain degree of autonomy. This proviso was never honored by the interwar Polish government.

*Galicia within interwar Poland, 1919–39.* Well before the final international recognition of Galicia as part of Poland, Galicia was being administered as an integral part

of Poland. In 1920 Galicia's diet was formally abolished. Galicia was divided among the voivodeships of Cracow, Lviv, Stanyslaviv, and Ternopil; the latter three constituted 'Eastern Little Poland,' and its Ukrainian inhabitants were officially referred to as Ruthenians (*Rusini*). The Ukrainians were subjected to a regime of terror – mass arrests, imprisonment in concentration camps, deportation, and the outlawing of Ukrainian organizations and periodicals. Ukrainians' access to government employment was denied. The region was left in a state of economic stagnation (made worse by wartime destruction), and the plight of the landless peasants was exacerbated by the officially promoted colonization of Galicia by ethnic Polish peasants.

The Ukrainians reacted by refusing to recognize the Polish regime. They boycotted the census of Galicia taken on 30 September 1921 and the 1922 elections to the Polish Sejm and Senate. The Ukrainian Labor, Radical, Social Democratic, and Christian Social parties joined forces in the \*Interparty Council (1919–23), which decided what lawful tactics to use against Polish policies and protested against the Polish occupation. Because Ukrainians were effectively excluded from Lviv University in the early 1920s and the university's Ukrainian chairs and lectureships were abolished, the Ukrainians organized various clandestine courses and then the \*Lviv (Underground) Ukrainian University (1921–5). Revolutionary nationalist struggle against the regime took the form of the underground \*Ukrainian Military Organization (uvo), led by Ye. Konovalets, beginning in 1920.

In 1923, Ukrainian political tactics toward the regime began to change. Old parties were reconstituted, and new ones were formed. From 1925 the \*Ukrainian National Democratic Alliance (UNDO) continued in the pragmatic tradition of the prewar National Democratic party and the \*Ukrainian Labor party (1919–25) to obtain certain advantages for the Ukrainians. It dominated several central cultural-educational and economic institutions – Prosvita society, the Audit Union of Ukrainian Co-operatives, the Tsentrosoiuz union of farming and trade associations, and the Dnister fire-insurance association – and controlled the influential daily *Dilo*. The Ukrainian Socialist Radical party replaced the Ukrainian Radical party in 1926. The Ukrainian Social Democratic party became pro-Soviet in 1923, was suppressed in 1924, and was revived in 1928 as a member of the Second International. Various parties of the \*Christian Social Movement remained active throughout the period. The Sovietophile \*Sel-Rob (Ukrainian Peasants' and Workers' Socialist Alliance) was founded in 1926, split into two factions in 1927, and was suppressed in 1932. Its majority supported the illegal, underground \*Communist Party of Western Ukraine, founded in 1919 as the Communist Party of Eastern Galicia, which advocated Galicia's unification with Soviet Ukraine. After the party split in 1927 into a national-Communist majority (which was expelled from the \*Communist International in 1928) and a Stalinist minority, it lost much of its support. The underground \*Organization of Ukrainian Nationalists replaced the uvo in 1929. Its leader remained Ye. Konovalets, and its main base of support, as well as its main area of activity, was in Galicia. The Polish government responded to the revolutionary sabotage of the uvo-OUN and Ukrainian opposition to the regime with the military and police \*Pacification of Galicia in the fall of 1930 – the

destruction of Ukrainian institutional property, brutalization of Ukrainian leaders and activists, and mass arrests. This did not deter the OUN, which intensified its anti-Polish activity and assassinated the Polish minister of internal affairs, B. Pieracki, in 1934, giving the regime the pretext to establish the \*Bereza Kartuzka concentration camp and to arrest and convict various OUN leaders, including S. \*Bandera and M. \*Lebed.

The legal activity of the Ukrainian parties in Galicia in the Polish Sejm and Senate from 1928 did not produce significant results. The UNDO's efforts at reaching a Polish-Ukrainian compromise in the 1930s – the so-called \*Normalization – were inconclusive, because of the chauvinistic attitude of the Polish authorities and society at large and the increasingly authoritarian and repressive policies of the military rule under J. \*Pilsudski.

Ukrainian culture and education suffered under interwar Polish rule. In 1921 education in Poland was centralized, and in 1924 Ukrainian and Polish schools were unified and made bilingual. By the 1930s many of these schools were Polish. To counterbalance the Polonization of education, Ukrainians began opening private schools with the help of the \*Ridna Shkola Ukrainian pedagogical society. In the latter half of the 1930s, nearly 60 percent of all Ukrainian gymnasiums, teachers' colleges, and vocational schools, with about 40 percent of all Ukrainian students, were privately run. Between the wars, the co-operative movement became better organized and helped the Ukrainian farmers and farm workers – the majority of the Ukrainian population – to withstand economic instability and the Great Depression. The leading co-operative institutions were the \*Audit Union of Ukrainian Co-operatives, the \*Tsentrosoiuz union, the \*Maslosoiuz dairy association, the \*Silskyi Hospodar farmers' association, and the \*Union of Ukrainian Merchants and Entrepreneurs. They and other groups, such as the rapidly expanding women's movement and its organization, \*Union of Ukrainian Women, also contributed a great deal to the cultural development of Galicia's Ukrainians.

As in the Austrian era, the Ukrainians continued to maintain their own scholarly life, literature, press, and book publishing. The leading scholarly institutions were the Shevchenko Scientific Society and the \*Ukrainian Theological Scholarly Society, both of which published books and serials. Important scholarly, political, and cultural works were also published in the Basilian Fathers' \**Analecta Ordinis S. Basilii Magni / Zapysky ChSVV* and in the leading Galician journal, \**Literaturno-naukovyi vistnyk*, which in 1932 was replaced by \**Vistnyk*, edited by the influential D. \*Dontsov.

*The Second World War.* On the basis of the secret \*Molotov-Ribbentrop Pact, which divided Eastern Europe into German and Soviet spheres of influence on 23 August 1939, Galicia east of the Sian River was occupied by the Red Army between 17 and 23 September after Germany invaded Poland on 1 September. Soviet-style elections were held on 22 October to a \*People's Assembly of Western Ukraine, which in turn 'requested' the incorporation of the region into Soviet Ukraine. This request was ratified by the Supreme Soviet of the USSR on 1 November. A Soviet administration was immediately set up in Galicia. The new regime introduced fundamental changes – collectivization of agriculture, the nationalization of industry, the reorganization of the educational system on the Soviet model, albeit with Ukrainian as the

language of instruction, the abolition of all existing Ukrainian institutions and periodicals, and the curtailment of the churches' activities. On 4 December Galicia was divided into four oblasts: Lviv, Drohobych, Stanyslaviv, and Ternopil. Many Ukrainian political and cultural leaders managed to flee west across the Sian and Buh rivers into the German-held \*Generalgouvernement of Poland, but many others did not. Thousands were arrested and deported to the east or died in prisons.

Germany broke the non-aggression pact and invaded the USSR on 22 June 1941. The German army took Lviv on 30 June 1941 and overran all of Galicia in July. Before they retreated, the Soviets executed some 10,000 Ukrainians who had been imprisoned in Galicia.

On 30 June 1941 in Lviv, the \*Bandera faction of OUN, which had organized the \*Legion of Ukrainian Nationalists to fight with the Germans against the Bolsheviks, proclaimed the re-establishment of the Ukrainian state in Western Ukraine and formed the \*Ukrainian State Administration under Ya. Stetsko. This government was suppressed by the Germans on 12 July, and its members and leading OUN members were arrested.

On 1 August, Galicia became the fifth district of the Generalgouvernement. The German annexation was protested by the \*Ukrainian National Council (UNC), a public body representing Galicia's Ukrainians that was founded in Lviv on 30 July and headed by K. Levytsky (the honorary president was Metropolitan A. Sheptytsky). The UNC in Lviv was suppressed in March 1942 after Metropolitan Sheptytsky sent a letter to Himmler protesting against the Germans' persecution of the Jews. The \*Ukrainian Regional Committee, founded in September 1941, remained the only legal civic umbrella institution; its general secretary was K. Pankivsky. In March 1942, the functions of the committee were taken over by the \*Ukrainian Central Committee (ucc) based in Cracow, which had represented Ukrainians in the Generalgouvernement since 1940; V. \*Kubijovyč was its president, and Pankivsky became the vice-president. Ukrainian civic, cultural, and educational institutions were allowed by the German authorities (Gov Gen H. \*Frank and Gov O. \*Wächter) within the framework of the ucc. Besides organizing the Ukrainians economically and culturally and overseeing relief work, the ucc was instrumental in the creation of the volunteer \*Division Galizien in April 1943.

Compared to other Ukrainian territories under Nazi rule, Galicia was relatively better off. Nonetheless, the regime there was very severe: acts aimed at gaining political independence were forbidden; all opposition was brutally suppressed; and the vast majority of Galicia's Jews and Gypsies, as well as many Ukrainians, were murdered or sent to Nazi death camps. From June 1943, the \*Ukrainian Insurgent Army (UPA) engaged in guerrilla warfare from its bases in the Carpathian Mountains against both the Germans and S. \*Kovpak's Soviet partisans. As the Germans began retreating from Galicia, leaving Ternopil in April 1944, Lviv and Stanyslaviv in July, and Drohobych in August, the UPA and its political leadership, the \*Ukrainian Supreme Liberation Council, continued their struggle against the advancing Red Army.

*The Soviet period.* When the USSR reoccupied all of Galicia in the fall of 1944, the prewar Soviet regime was reinstalled. The mass persecution of Ukrainians who had cooperated with the German regime or had fought for Ukrainian sovereignty (ie, members of the OUN and sol-

diers of the UPA and the Division Galizien) ensued. Many Ukrainians were executed, and many others were sentenced to maximum terms in labor camps or deported to Soviet Asia. The official attitude towards the Ukrainian Catholic church was one of extreme hostility. Metropolitan A. Sheptytsky died on 1 November 1944. The hierarchs of the church, including the new metropolitan, Y. Slipy, were arrested on 11 April 1945 and sentenced to long terms in prison, where most of them died. The Soviet-staged \*Sobor of the Greek Catholic Church held in Lviv on 8–10 March 1946 renounced the Church Union of Berestia and decreed the abolition of the Ukrainian Catholic church and its 'reunification' with the Russian Orthodox church. Priests who refused to submit to these changes were imprisoned and/or deported. Well before the Soviet takeover, a large number of the Galician Ukrainian intelligentsia had fled westward. When the war ended, they became \*displaced persons in Germany.

According to a Soviet-Polish agreement made in Moscow on 16 August 1945, the border between Polish- and Soviet-occupied Galicia ran along the \*Curzon Line; thus the Sian region (including Peremyshl) and the Kholm and Lemko regions were ceded to Poland. Soon after, Poles living on Soviet territory were resettled in Poland, and most of the Ukrainians living in the above regions were forcibly resettled in the Soviet Ukraine or in the regions newly acquired by Poland from Germany. In 1951 the border between Poland and Lviv oblast was slightly modified. The forcible depopulation of Ukrainians in the border regions was calculated to destroy the social base of the UPA, which continued its activity in the Carpathian Mountains until the mid-1950s.

Because of the profound political, administrative, cultural, religious, social, economic, and demographic changes that have occurred under Soviet rule, historical Galicia has ceased to exist. The name is no longer used officially; instead, 'Western Ukraine' is now used to designate the territory of former Galicia (Lviv, Ternopil, and Ivano-Frankivske oblasts) together with western Volhynia (Volhynia and Rivne oblasts), northern Bukovyna (Chernivtsi oblast), and Transcarpathia (Transcarpathia oblast).

**Population.** Galicia has long been the most densely populated part of Ukraine. Although in 1939 it constituted only 6 percent of all Ukrainian ethnic territory, it had 10.5 percent of the latter's total population and almost 10 percent of all Ukrainians. Galicia was already densely populated during the Princely era. Most densely populated were the vicinities of Peremyshl, Lviv, and Halych. From the 13th to the 16th century, the population increased because of the influx of Ukrainians from the east and Polish colonists from the west. From the 15th to the 18th century Galicia also experienced population losses, caused primarily by the peasantry's flight from serfdom to the steppe frontier. After the Austrian annexation, this large-scale flight was stemmed because the Russian-Austrian border now separated Galicia from the rest of Ukraine, and the population rose steadily. It increased by 45 percent between 1869 and 1910. This growth was interrupted only by mass emigration, beginning in the 1890s. In 1939, the average population density in Galicia was 104 per sq km; in the belt between Peremyshl and Pokutia it was as high as 150 per sq km. The urban population grew slowly, from 19 percent in 1900 to 23 percent in 1931; the greatest growth occurred

in Lviv and in the towns of the \*Drohobych-Boryslav Industrial Region. The cities with over 20,000 inhabitants in 1931 (their 1984 pop is given in parentheses) were Lviv, 316,000 (728,000); Stanyslaviv (Ivano-Frankivske), 60,000 (200,000); Peremyshl 51,000 (61,000); Boryslav, 42,000 (34,000 in 1968); Ternopil, 36,000 (175,000); Kolomyia, 33,000 (59,000); Drohobych, 33,000 (73,000); Stryi, 31,000 (60,000); and Sambir, 22,000 (32,000 in 1975).

Until the Second World War, Galicia was one of the most overpopulated agrarian regions in Europe, with 101 agriculturalists per 100 ha of arable land (the corresponding figure for all of Ukraine was 54, for Germany, 51, and for Holland, 70). In the last 100 years, certain demographic trends can be singled out: (a) until 1890, a small annual growth (around 1.1 percent) and a high mortality rate; (b) from 1890 to 1914, an average annual natural increase of 14–15 per 1,000 inhabitants (in 1911–13, the birth rate was 40.3 and the mortality rate was 25.9 per 1,000), mass emigration overseas (a total of 380,000 persons), a high rate of seasonal migration for work (up to 100,000 annually), and an influx of Poles into the towns and the countryside; (c) from 1914 to 1921, a population decline of 12 percent; (d) from 1920 to 1939, a sharp decline in natural growth (eg, in 1938 there were 23.9 births and 15.6 deaths per 1,000 inhabitants) and a decrease in emigration (a total of 120,000) and in the influx of Poles; (e) from 1939 to 1945, continued decline in natural growth, the almost total extermination of the Jewish population, the resettlement of the Ukrainian and Polish populations on either side of the new, postwar Soviet-Polish border, the emigration of over 100,000 Ukrainians to the West, and the deportation of an unknown but large number of Ukrainians to the Soviet east; and (f) in the postwar period, a nearly normal rate of natural increase, \*migration of part of the population to other Soviet regions (particularly to the Donbas and the virgin lands of Central Asia), intensive \*urbanization, and a large influx of Russians.

Because of centuries-long Polish expansion there, Galicia was the first region of Ukraine to cease being purely Ukrainian; this process transpired first in the towns and later in the most fertile areas of the countryside. The percentage of Poles and/or Roman Catholics increased because their in-migration occurred at the same time as the mass emigration of Ukrainians. In the period 1880–1939 the number of Roman Catholics rose from 19.9 to 25 percent, while the number of Greek Catholics and Jews fell from 66.8 to 64.4 percent and 12.3 to 9.8 percent respectively. An intermediate ethnic category arose, the so-called \**Latynnyky* (Ukrainian-speaking Roman Catholics), ie, either Ukrainians who had converted to Roman Catholicism or the descendants of Polish colonists who had to a large degree assimilated into the Ukrainian milieu. A smaller transitional category consisted of Ukrainian Catholics living in a Polish milieu who had become linguistically Polonized (mainly in the western borderlands and in Lviv).

It has been estimated by V. Kubijovyč (1983) that on 1 January 1939 Galicia had a population of 5,824,100, consisting (percentages are given in parentheses) of 3,727,600 Ukrainians (64.1); 16,400 Polish-speaking Ukrainian Greek Catholics (0.3); 947,500 Poles (16.2), of whom 72,300 (1.2) arrived in the years 1920–39; 515,100 *Latynnyky* (8.8); 569,300 Jews (9.8); and 49,000 Germans and other ethnic minorities (0.8).

**Economy.** In the Princely era, the economic base of Galicia changed gradually from hunting and utilization of forest resources to agriculture. At the time, grain, as well as hides and wax, was already being exported to Byzantium. Trade in salt mined in Subcarpathia was of particular economic importance. It was exported west via the Sian River and east to Kiev via land trade routes. From the 12th century, Galicia played the role of intermediary in the trade between the West and the Black Sea. In the 15th and 16th centuries, an economy based on the \**filvarok* developed; the nobility exploited the peasantry in order to export as much grain, beef, wax, and timber products as possible to the rest of Europe. At the same time the salt industry grew, and other industries, such as liquor distilling, brewing, and arms manufacturing (in Lviv), arose. In the 16th century, trade with lands to the east became more difficult; the cities and towns declined because of the detrimental policies of the Polish nobility. Incessant wars and the oppression of the Ukrainian burghers and peasantry resulted in the impoverishment of the population. When Austria annexed Galicia in 1772, it was a poor, backward, and overpopulated land.

Under Austria, Galicia's depressed economy only minimally improved. Its recovery was hindered by a thoroughly unhealthy agrarian system (which did not change even after the abolition of serfdom) and by Austrian economic policies that maintained Galicia as a primarily agricultural internal colony from which the western Austrian provinces could draw cheap farm produce and timber and which they could use as a ready market for their manufactured goods (particularly textiles). Small industrial enterprises (most of them in the hands of landowners), such as textile factories, foundries, glass works, salt mines, paper mills, and sugar refineries, that had been productive in the first half of the 19th century declined thereafter because they were unable to compete with the industries of the western provinces and could not modernize because of a lack of capital, the absence of indigenous coal and iron ore, the long distance from Austria's industrial centers, and poor commercial and communication links with the rest of Ukraine. Only the food industry (distilling and milling by small enterprises) and, beginning in the 1850s, the \**petroleum* industry were developed in Galicia, and only the latter attracted foreign investment. Intensive agriculture could not develop because the peasants had little land, which was further parceled among the family members, and no capital, while the large landowners preferred to maintain the status quo and showed no initiative. Only emigration saved the peasants from destitution; with the exception of Transcarpathia, this process was more significant in Galicia than anywhere else in Ukraine.

Under interwar Poland, Galicia's economic state became even worse. Rural overpopulation increased because of a decline in emigration and the mass influx of Polish colonists, and industry deteriorated even further. The situation of the Ukrainian population became even more precarious with its exclusion from jobs in the civil service and in Polish-owned enterprises. Only through self-organization, especially through the co-operative movement, were the Ukrainians able to avoid economic ruin.

The postwar Soviet annexation placed Galicia's economy on a par with that of the rest of Ukraine. Agriculture

was collectivized, and intensive cultivation of industrial crops, mainly sugar beets and corn, was introduced. Great changes occurred in the industrial sector by way of the large-scale exploitation of energy resources and the introduction of new industries.

In general Galicia's economy had been neglected for centuries, and its economic potential – based on its generally good farmland and propitious climate (milder and more humid than in other parts of Ukraine), sources of energy (rivers, petroleum, natural gas, timber, peat, lignite, and anthracite), and abundant labor supply – has been underdeveloped. As late as 1931, for example, 74.6 percent of the population (88 percent of the Ukrainians) were still engaged in agriculture, while only 10.9 percent (5.8 percent) were engaged in industry, 4.7 percent (1.7 percent) in trade and transport, and 9.8 percent (4.4 percent) in other professions. Arable land and farmsteads took up 52 percent of the territory; pastures, grassland, and meadows, 18 percent; forest, 25 percent; and other land, 5 percent. In the Carpathian Mountains forest took up 43 percent; pastures and meadows, 35 percent; and arable land, only 16 percent. In eastern Galician Podilia and Pokutia, arable land took up 77 percent. In Roztochia, western Galician Podilia, and Subcarpathia, arable land took up 50 percent (25 percent was forest and 20 percent was meadows and pastures).

Before the Second World War, Galicia had a sown area of 2,540,000 ha, of which 470,000 ha (18.5 percent) were devoted to wheat, 520,000 ha (20.5 percent) to rye, 220,000 ha (8.7 percent) to barley, 390,000 ha (15.4 percent) to oats, 80,000 ha (3.2 percent) to corn, 60,000 ha (2.4 percent) to buckwheat, 20,000 ha (0.8 percent) to millet, 440,000 ha (17.3 percent) to potatoes, 260,000 ha (10.2 percent) to fodder crops, and 50,000 ha (2.0 percent) to industrial crops (of which sugar beets took up 11,000 ha; flax, 13,000 ha; hemp, 15,000 ha; and rape, 5,000 ha). After the war, the area sown with industrial crops (especially with sugar beets and corn) was increased. In the Carpathian Mountains, oats and potatoes predominated; corn predominated in Pokutia and southeast Podilia; and more wheat than rye was grown in Pokutia, eastern Podilia, and Sokal county.

The poverty of the peasantry is reflected by their holdings in the 1930s. Landowning peasants together possessed only 55 percent of the land, including forests and pastures (80 percent of the arable land); 52 percent of the peasants had less than 2 ha each, 37 percent had from 2 to 5 ha, and only 11 percent had more than 5 ha. Landlessness was rampant and constantly increasing. Consequently, intensive crop growing was not possible, and harvest yields were very low, on the average 5,000 kg of grain and 5,500 kg of potatoes per ha. Even though the population had barely enough food for its own use (before the war, an annual per capita average of 90 kg of wheat and rye, 70 kg of other grain, and 395 kg of potatoes), 200,000 t of wheat and barley were annually exported from Galicia, and only a small amount of rye flour was imported. Animal husbandry was practiced more intensively and constituted the basis of the peasant budget. In 1936, for example (figures in parentheses are per 100 ha of arable land and per 100 inhabitants), 649,000 (17, 11) horses, 1,602,000 (42, 28) head of cattle, of which 1,116,000 were cows, 648,000 (17, 11) pigs, and 387,000 (10, 7) goats and sheep were raised. In general the livestock density in relation to the farmland area in Galicia

was greater than elsewhere in Ukraine, and the population's livestock supply was adequate. Horticulture, orcharding (including viticulture in southeast Podilia), and beekeeping played a secondary role.

Industry in Galicia before 1945 was less developed than elsewhere in Ukraine. Manufacturing was based on the processing of indigenous raw materials, including agricultural products, timber, petroleum, and potassium salts; there was practically no textile industry or metallurgy. Therefore the prewar industrial work force was small (with a maximum of 44,000 in 1938), only 2.2 percent of Galicia's hydroelectric capacity was exploited, and electrification proceeded very slowly. Low-grade lignite was mined around Kolomyia, Rava-Ruska, Zhovkva, and Zolochiv, but not on a large scale because of competition from Silesia's coal companies (see \*Subcarpathian Lignite Region). Petroleum extraction near Boryslav, Bytkiv, Nadvirna, and elsewhere in the \*Subcarpathian Petroleum and Natural Gas Region was 2,100,000 t (5 percent of world production) in 1909; it fell to 717,000 t in 1938. The natural-gas industry arose in 1923 and was centered in \*Dashava, which supplied gas to towns in Subcarpathia; in 1938 215 million cu m of gas were extracted. Salt mines near Drohobych, Dobromyl, Bolekhiv, and Dolyna produced in the prewar years a mere 40,000 t, or 2 percent of Ukraine's salt. Ozocerite was mined near Boryslav, Truskavets, Starunia, and Dzvy-niach; its production fell from 12,300 t in 1885 to 600 t in 1938. The mining of potassium salt near Stebnyk and Kalush increased, reaching 567,000 t in 1938. The lumber industry in Subcarpathia was well developed; two-thirds of its products were exported. The food industry was underdeveloped; it produced primarily flour, beer, liquor, meat and dairy products, and beet sugar (only three sugar refineries existed before the war). The building-materials industry produced, on a limited scale, glass (in Lviv and Stryi), plaster of paris and lime (in the Dniester Basin), bricks, and tiles. Light industry was not developed enough to supply the population's needs; small companies manufactured leather, wadding, quilts, curtains, shoes, and clothing accessories. Machine building was not well developed; it was based in Lviv and Sianik.

Before the Soviet period artisans and the cottage industry played an important role in Galicia, especially in the Hutsul region. \*Health resorts, \*mineral waters, and spas, most of them in the Carpathian Mountains, attracted thousands of visitors. The network of railroads and highways was denser than elsewhere in Ukraine, but most roads were in a state of disrepair. Rivers were used merely to float timber to sawmills. (For the economy of postwar Galicia, see \*Ivano-Frankivske oblast, \*Lviv oblast, and \*Ternopol oblast.)

**Galicia Division.** See Division Galizien.

**Galician Army.** See Ukrainian Galician Army.

**Galician Battalion of the Sich Riflemen.** See Sich Riflemen.

**Galician metropoly.** See Halych metropoly.

**Galician Revolutionary Committee** (Halytskyi revoliutsiyni komitet or Halrevkom). Provisional Soviet government that briefly governed Galicia during its occupation by the Red Army in the summer of 1920. The committee was set up on 8 July 1920 in Kharkiv on V. Lenin's orders. When the Red Army troops captured eastern Galicia, the Halrevkom established itself in Ternopil on 1 August and began to issue decrees replacing existing political, legal, social, and economic institutions with Soviet ones. It created 18 departments to administer the new state called the \*Galician Socialist Soviet Republic. The chairman of the committee was V. \*Zatonsky and the secretary was I. Nemolovsky – both natives of eastern Ukraine, unfamiliar with conditions in Galicia. The other key members were three Galician Ukrainians – M. Baran (vice-chairman), F. Konar (replaced soon by A. Baral), and M. Levytsky – and a Galician Pole, K. Litwinowicz. Later, new members, such as M. Havryliv, M. Kozoris, I. Siiak, and I. Kulyk, were added to the committee. When the Red Army retreated under the pressure of Ukrainian and Polish forces, the committee

left Galicia and was dissolved on 23 September 1920. Most of its members stayed in Soviet Ukraine, where in the 1930s some were arrested and liquidated as 'enemies of the people.'

W. Veryha

**Galician Socialist Soviet Republic** (Halytska Sotsialistychna Radianska Respublika). Short-lived state set up during the Polish-Soviet War in Soviet-occupied Galicia. The Galician SSR was proclaimed on 15 July 1920 as the Red Army approached the eastern border of Galicia. On 1 August a \*Galician Revolutionary Committee was established in Ternopil as the provisional government of the new state and set about reconstructing the political, social, and economic system in the territory under its control. It declared the separation of church and state and began expropriating large landholdings, nationalizing factories and businesses, and dissolving the 'bourgeois' legal system. It imposed monetary levies on the wealthy and food requisitions on the peasants. The expropriated estates and church lands were not distributed among poor, landless peasants, but were to be turned over to state farms. The committee further prohibited private trade between town and country. Public order was maintained by the Cheka.

At its height the Galician SSR encompassed 14 complete counties and parts of several other counties in eastern Galicia. Its western boundary ran from the Dniester River northwest along the Rohatyn-Bibrka line, passing east of Lviv and west of Kamianka-Strumyl'ova (now Kamianka-Buzka) and Sokal, and then continuing along the Buh River. Its territory covered 18,000 sq km, or about a third of Galicia's area, and its population was approximately 1,800,000. The government maintained itself in Ternopil for approximately 50 days.

Young Galicians who initially volunteered for the Red Army quickly discovered that neither it nor the new state was Ukrainian. The committee that officially formed the government, and its communist officials, received their orders from Moscow. Hence, Galician Ukrainians regarded the regime as a foreign one.

By the end of September Soviet forces were expelled from Galicia by Polish and UNR units. This marked the end of the Galician SSR, which was an artificial Bolshevik creation.

**Galician-Bukovynian Committee** (Halytsko-Bukovynskyi komitet). Organization founded in Kiev in July-August 1917 to provide relief to Ukrainian prisoners of war and refugees from Galicia and Bukovyna. Its members were mostly from Western Ukraine: D. Levytsky, V. Okhrymovych, M. Shukhevych, M. Sabat, M. Baltarovych, and I. Herasymovych. Thanks to the committee's efforts, at the end of 1917 a Ukrainian Catholic church was built on Pavlovska Street in Kiev, and on 13 November 1917 the Galician Battalion of Sich Riflemen was founded.

**Galician-Ruthenian Matytsia society.** See Halytsko-Ruska Matytsia society.

**Galician-Volhynian Chronicle.** A medieval chronicle covering the years 1201-91 in the history of the Principality of Galicia-Volhynia, written in the late 1280s and preserved in the \*Hypatian Chronicle compilation. An important source to the history of southwestern Rus' (Western Ukraine), it continues the record of events begun in \**Povist' vremennykh lit* (The Tale of Bygone Years) and the \*Kiev Chronicle. The chronology presented in individual historical narratives was introduced in the later redactions of the original (at least five) on which the general compilation was based.

The chronicle consists of a Galician section, written in Halych, encompassing events from 1201 to 1261 and centering primarily on the reign of Prince Danylo Romanovych; and a Volhynian section, written probably in Volodymyr, encompassing events in Volhynia from 1262 to 1292 during the reigns of Prince Vasylo Romanovych and his son Volodymyr and their relations with the rulers of Lithuania and Poland. The anonymous authors evaluate events and individuals from the standpoint of the need for a unified Rus' and thus for strong princes, who counteract the centrifugal actions of rebellious boyars; the authors also defend the Galician-Volhynian princes' claims to the Kievan throne. The chronicle is a valuable literary monument, whose ornamental narrative style is reminiscent of that found in \**Slovo o polku Ihorevi* (The Tale of Ihor's Campaign).

**Galician-Volhynian state.** See Galicia-Volhynia, Principality of.

**Galicia-Volhynia, Principality of.** A state founded in 1199 by \*Roman Mstyslavych, the prince of Volhynia from 1170, who united Galicia and Volhynia under his rule. The Romanovych line ruled the state until its demise in 1340.

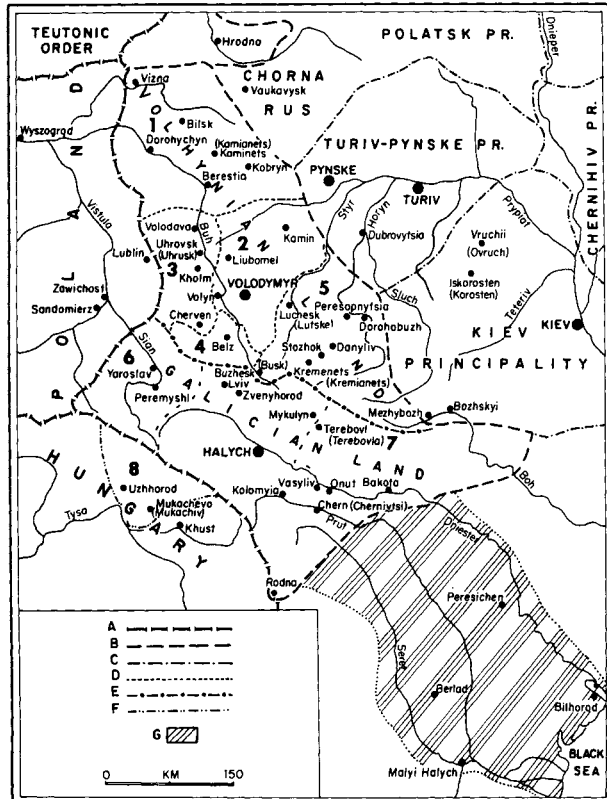

After the death of Grand Prince Yaroslav the Wise of Kiev in 1054, Kievan Rus' had disintegrated into 5 and then 13 separate principalities, including those of Halych (see \*Galicia) and \*Volodymyr-Volynskyi (Volhynia). Roman took Halych after the death of \*Volodymyr Yaroslavych and in 1202 occupied Kiev with its domains as far east as the Dnieper River, thereby creating a powerful state in western Rus'. Like other princes before and after him, he had to contend with a rebellious Galician boyar oligarchy throughout his reign. He died in battle at Z'achost against Prince Leszek of Cracow. Interminable boyar rebellions arose, which Leszek and Andrew II of Hungary exploited, and in 1214 they occupied Peremyshl and Halych. In 1221 Prince \*Mstyslav Mstyslavych of Novgorod drove the Hungarians from Halych, where he ruled with difficulty until 1228.

The rebellions and wars lasted until 1238, when Roman's son, \*Danylo Romanovych, having consolidated his rule in Volhynia, finally seized Galicia. After subduing the boyars in 1241-2 and defeating the Chernihiv princes and their Polish and Hungarian allies at Yaroslav in 1245, Danylo consolidated his control of Galicia. He took Hrodna, Slonim, and other Chorna Rus' towns from Lithuania in the north in 1250-2 and extended his rule beyond Kiev in the east. Because of Danylo's close alliance with his brother \*Vasylko Romanovych, who ruled Volodymyr from 1241 to 1269, the Galician-Volhynian state attained the apex of its power during his reign. After the enormous destruction wreaked by the Mongol

invasion of Rus' in 1239-41, Danylo was forced to pledge allegiance to Khan Batu of the Golden Horde in 1246. He strove, however, to rid his realm of the Mongol yoke by attempting, unsuccessfully, to establish military alliances with other European rulers. In internal affairs, Danylo depended on the support of the burghers. During his reign the cities of Lviv and Kholm were founded. After the Mongols razed Halych in 1241, Kholm became the new capital.

Danylo died in 1264. His son and successor, \*Lev I Danylovych (1264-1301), accepted Mongol suzerainty. Lev made Lviv the new capital in 1272 and took part of Transcarpathia, including Mukachiv, from the Hungarians in 1280 and the Lublin land from the Poles ca 1292. His son and successor, \*Yurii Lvovych (1301-15), formally reunited Galicia and Volhynia and succeeded in getting \*Halych metropolity established, but lost Transcarpathia and the Lublin land. His sons, \*Lev II and Andrii Yuriovych, ruled together from 1315 to 1323. They encouraged commerce and colonization by foreign merchants (see \*Germans). The brothers joined forces with Polish princes to fight the Mongols and possibly perished in battle. The last prince, \*Yurii II Boleslav (1323-40), the nephew of Yurii Lvovych, also encouraged foreign colonization, which led to conflicts with the boyars, who poisoned him and offered the throne to the Lithuanian prince \*Liubartas. That same year \*Casimir III the Great of Poland attacked Lviv, and the period of Lithuanian-Polish rivalry over Galicia-Volhynia began.

Because the powerful and influential \*boyars constantly competed for power with the princes, certain tendencies toward \*feudalism existed in the principality, unlike in other parts of Ukraine. Trade with other Rus' principalities, Hungary, Poland, Bohemia, the Holy Roman Empire, Lithuania, Bulgaria, and the Byzantine Empire was developed, and the principality prospered. It also flourished culturally, as evidenced by architectural remains and various chronicles, especially the \*Galician-Volhynian Chronicle. With the death of Yurii II, it ceased existing as a separate state, and with it the Princely era in Ukraine came to an end. Over 80 towns and cities were located in the principality.

PRINCIPALITY OF GALICIA-VOLHYNIA CA 1300

- A. Boundaries of Rus'
- B. Boundaries of the Principality of Galicia-Volhynia
- C. Principality boundaries
- D. Boundaries of appanage principalities and lands
- E. Northmost boundary of Mongol control
- F. Boundary of Transcarpathian land (1280-1320)
- G. Lands controlled by Galician princes and captured by the Mongols

1. Berestia land
2. Volodymyr-Volynskiy principality proper
3. Cherven-Kholm land
4. Belz land
5. Luchesk (Lutske) principality
6. Peremyshl principality and land
7. Terebovl (Terebovia) principality and land
8. Transcarpathian land

**Galicisms.** Words and expressions borrowed from the French language or coined on the French pattern. In the second half of the 18th and the first third of the 19th century Gallicisms acquired currency in the language of the Russian and Polish upper classes. This stimulated their widespread adoption into Ukrainian. Many French terms entered Ukrainian via Polish; eg, *cyvil'nyj* (from the French *civil*), *cytryna* (*citron*), *kravatka* (*cravate*), *parada*

(*parade*), and *teren* (*terrain*). Gallicisms adopted from Russian include *ataka* (*attaque*), *bjuro* (*bureau*), *odekol'on* (*eau de Cologne*), *pal'to* (*paletot*), and *portfel'* (*portfeuille*). Often a Gallicism would enter Ukrainian from both Polish and Russian. Typically Gallicisms refer to the theater and the fine arts: *antrakt* (*entracte*), *balet* (*ballet*), *bjust* (*buste*), *parter* (*parterre*), *pejzaž* (*paysage*); to everyday life and fashion: *vaza* (*vase*), *bljuza* (*blouse*), *kotleta* (*côtelette*), *ljampa* (*lampe*), *restoran* (*restaurant*); to military affairs: *avangard* (*avant-garde*), *artylerija* (*artillerie*), *batal'jon* (*bataillon*), *brygada* (*brigade*), *kanonada* (*canonnade*); and to social and political life and psychology: *buržuazija* (*bourgeoisie*), *parlament* (*parlement*), *entuzijazm* (*enthousiasme*), *interes* (*intérêt*). Relatively few Gallicisms are related to technology: *monter* (*monteur*), *resora* (*ressort*). Literary Ukrainian phraseology contains many French loan translations; for example, *blyskučyj uspix* (*succès brillant*), *vytončenyj smak* (*goût raffiné*), *maty misce* (*avoir lieu*). Many words restored from or based on Greek or Latin also entered Ukrainian via French in the 18th and 19th centuries.

G.Y. Shevelov

**Games.** Many popular games originated in the distant past and are part of the folk tradition. Not included in this category and not discussed here are games of foreign origin that were once played only by the upper strata of society (eg, sophisticated card and board games), school games learned from textbooks as part of school programs, or athletic games of recent origin (eg, soccer, hockey, and volleyball).

In Ukraine numerous folk games have been played by the people from early childhood to old age since time immemorial. However, they have not been adequately described or studied and have been regarded for the most part as part of \*children's folklore, \*folk customs, \*folk dance, folk theater, folk teachings, and physical education.

Playing and games originated in primitive antiquity and are an expression of the play instinct. They are universal and cross-cultural. The vast majority of games pass from the adults' repertoire to that of children. The basic nature of games – as imitations of adult practices – has been preserved to the present. Preschool-age children are receptive to nursery rhymes, songs, and jingles (*zabavlianky* or *utishky*) recited by adults that accompany babies' games. Very common in Ukrainian folklore, they are acted out by the adult using specific rhythmic movements, handling of the infant's face, fingers, and toes, representative gestures, and mimicking. Their language is simple and is adapted to the child's level of understanding; alliteration, assonance, exclamation, use of diminutives, and onomatopoeia are the prevalent devices. The content is linear and happy. Repetition, particularly that of opening words, is frequently used. *Zabavlianky* reflect the feelings and expectations of adults, chiefly of mothers.

There are several distinct groups: the *hoidalky* – short refrains that are recited while rocking a child in a cradle and begin with the word *hoida* or *khyti*; *chukalky* – refrains beginning with the words *chuk*, *chuky*, *hop*, or *hutsy* that are recited while bouncing a child on the knee or foot; and *nastyrlyvi kazochky* (persistent tales) or *bezknonechni zabavlianky* (endless jingles). A number of *zabavlianky*, such as 'Ide, ide pan, pan, na konyku sam, sam' (A noble rides, a noble rides, on a horse alone, alone), are accom-

panied by imitations of riding a horse. Others have a dialogue structure consisting of numerous questions and answers. The characters in all of them are usually people and animals found in the child's immediate environment: parents and grandparents, crows, magpies, horses, cats, mice, hares, sparrows, hens, and roosters.

From the age of three children have traditionally played games that imitate domestic life. Children who tend sheep or cattle play in the pasture, where they imitate agricultural tasks such as ploughing, planting, haying, and harvesting. School-age children (6–12-year-olds) play more complex chasing, running, and catching games requiring some organization into teams and the observance of certain rudimentary, unformulated rules and prohibitions. Leaders are chosen by common agreement, by testing skill, and by counting out using incantatory verbal formulas.

Mimicry of family rituals, such as baptisms, weddings, and funerals (using dolls, rarely children), is popular among children of all ages. The imitation of betrothals and weddings by older children has erotic overtones. Sometimes the mimicking is very accurate, particularly the details of rituals. Such games are usually played by girls. Boys usually play more physical and competitive games, such as 'war,' using handmade toy weapons. They also enjoy target games, guessing games, sledding, walking on stilts, playing on homemade swings and seesaws, and mumblety-peg. All of these games, of course, are universal, and have been played not only in Ukraine. Other universal games, with widely accepted rules, have included *dovha loza* (leapfrog), *okhotnyk i zaitzi* (hide-and-seek), *kovinky* (field hockey), *panas* (blindman's bluff), *dzhut* (hot cockles), and numerous ballgames (*krynytsia*, *obizhka*, *korol*).

Today folk games in Ukraine, as in other countries, have been replaced by athletic games. The games played by children and juveniles are greatly influenced by films and television. Children play at Cowboys and Indians, Dovbush, cosmonauts, spies, sailors, and other celluloid heroes.

Traditionally children's games have required minimal equipment – sticks, stones, and potsherds. These serve as anything the children imagine them to be. Children love to make dolls, boats, wagons, watermills, sleds, necklaces, garlands, and simple wind and percussion musical instruments, thus imitating adults. Parents rarely make toys for their children, and store-bought toys have been unheard of among peasant children.

Figurative, dramatic playacting, mostly of a ritualistic nature, has constituted a distinct group of traditional folk games. It simulates particular events, acts, plants, animals, or objects using simple movements, dances (*\*khorovody*), songs, and elements of acting, and has been executed according to fixed notions. Most playacting has been done by young, unmarried adults and has been connected with calendric rites, most importantly those of the spring. The original, magical function of these games eventually became transformed into an erotic one, which was preserved until recent times. Gradually, the connection between figurative playacting and calendric rites disappeared.

The genetic tie of figurative games with the prehistoric period was emphasized in the early ethnographic literature, but recent researchers have shown that most of them originated in the 17th to 19th century. Many games

were associated with pre-Lenten festivities (masquerading as the opposite sex or as representations of various occupations, parading with straw or wooden figures, etc), St John's feast (witch games), St Andrew's feast (love charms, flax sowing), and Christmas (the 'goat,' caroling with a star, parading with an 'aurochs,' etc). In the Christmas cycle a special group of plays dealt with the birth of Christ: 'Bethlehem' and the \**vertep*, the former with actors, the latter with puppets.

Playacting had an important place in traditional wedding rituals; they include the mock kidnapping of the bride, sung dialogues between the groom's and the bride's retainers, the attempt to substitute another girl for the bride, and circling the wedding guests' houses on the second or third day of the wedding carrying a zoomorphic or anthropomorphic figure.

At evening parties (*vechernytsi*) figurative games such as 'horrors,' 'old man and woman,' 'Gypsy,' and 'confession' were played by young people. Games such as 'rooster' and 'tug-of-war' emphasized physical strength.

Funeral games, which were most widespread in the Hutsul region, were a class in themselves. They were played by young people at night during the prefuneral wake. Their original purpose was to propitiate the dead. Several dozen have been counted, including such games as 'shovels,' 'pear,' 'mill,' 'rooster,' and 'gander.' Many of them ended with a boy kissing a girl; their erotic undertone is obvious. Sometimes the deceased figured in the games. Today such games have virtually disappeared, for they clash with modern attitudes to funerals.

Because folk games have been passed on orally, they have been open to variation and improvisation. Because certain original, ancient words or properties were misunderstood, the content of dramatic games, in particular, changed considerably over time.

The oldest general descriptions of Ukrainian folk games are found in the writings of the Polish ethnographers Ł. Gołębiowski (1831), W. Zaleski (1833), and Z. Pauli (1839–40), and the Ukrainian K. Sementovsky (1843). More detailed, though limited, descriptions were written in the second half of the 19th century by Ya. Holovatsky, P. Chubynsky, M. Markevych, B. Hrinchenko, O. Kolberg, P. Ivanov, V. Yastrebov, S. Isaievych, Kh. Yashchurzhytsky, A. Wankl, Yu. Kakovsky, and M. Derlytsia. M. Kostomarov, O. Potebnia, A. Veselovsky, E. Anichkov, E. Pokrovsky, and V. Kharuzina wrote about folk games from a Romantic perspective.

In the early part of the 20th century, important contributions to the study of games were made by F. Vovk, K. Kvitka, V. Hnatiuk, Z. Kuzelia, and P. Bogatyrev. In his *Pobut selians'koï dytyny* (Folkways of the Peasant Child, 1929), N. Zahlada gave a sociological analysis of Ukrainian folk games. Since the Second World War, many new descriptions of Ukrainian folk games have appeared in the works of O. Voropai, O. Dei, and A. Kutser. Studies in the context of ritual folklore have been written by O. Zilynsky, O. Dei, and L. Hratsianska, and in the context of children's folklore by V. Boiko and H. Dovzhenok. But no definitive study of folk games, or even a comprehensive collection or rigid classification of them, has appeared in Soviet Ukraine or abroad.

**Gamow, George**, b 4 March 1904 in Odessa, d 19 August 1968 in Boulder, Colorado. American physicist. On his mother's side he was a descendant of the Ukrainian Lebedynets family. He studied in Odessa and Leningrad. As a visiting fellow (1928–31) in Göttingen, Copenhagen, and Cambridge, he contributed to the early development of quantum theory, notably by explaining the radioactive alpha decay. He left the USSR in 1933 and in 1934 accepted a professorial appointment in theoretical physics at George Washington University in Washington, DC. During this period he and E. Teller jointly made substantial contributions to the theory of beta decay. Gamow did pioneering work in cosmology and biophysics as well as nuclear physics. From 1956 till his death he was a professor of physics at the University of Colorado.

**Garlic** (*Allium sativum*; Ukrainian: *chasnyk*). Pungent bulbous plant used as an aliment, and as an important seasoning and preservative. Its function as medicine and charm in folk life was based on a belief in its sympathetic and contiguous powers: its pungency suggested that it could repulse pain and illness. Because of its chemical constituents, it was a successful remedy for certain diseases. Garlic has been used as a charm during pregnancy and at baptisms and weddings. Pregnant Hutsul women wore a man's shirt with a head of garlic tied to it to fend off the 'evil eye.' A head of garlic was attached to an infant's baptismal cloth for the same purpose. Boiko and Lemko brides wove garlic into their wedding garland. Garlic was worn widely during epidemics of cholera, typhus fever, and the plague. According to popular belief, human and animal ailments were caused by witchcraft; hence, the use of garlic in folk medicine was accompanied by incantations. The sign of a cross or a triangle was made three times with a knife in a bowl of water with three heads of garlic in it to the accompaniment of a suitable incantation, and the water was applied to the body as a remedy for sharp skeletal pains and muscular cramps. Cows that did not produce milk had garlic rubbed between their horns and on the udder. Because garlic was believed to be a potent substance, those who handled it had to take certain precautionary measures. Winter garlic, for example, could not be planted on a Saturday, otherwise a member of the farmer's family would die.

B. Medwidsky

**Gartner, Theodor**, b 4 November 1843 in Vienna, d 29 April 1925 in Innsbruck. German philologist; a professor at Chernivtsi University. Together with S. Smal-Stotsky he wrote a Ukrainian school grammar (1893, 4th edn 1928), which was widely used in Austrian-ruled Ukraine, and the scholarly *Grammatik der ruthenischen (ukrainischen) Sprache* (1913). He favored a phonetic spelling in the discussions on orthography in Western Ukraine.

**Gas industry.** See Natural gas industry.

**Gattenberger, Konstantin**, b 28 December 1843 in St Petersburg, d 30 May 1893 in Kharkiv. Russian economist and jurist of Swiss origin. A graduate of the faculty of law at Kharkiv University (1866), he taught criminal law at the university from 1868 until his death. He was a follower of J.S. Mill and, as a liberal, opposed socialism but recognized the shortcomings of capitalism and looked to trade unions, not co-operatives, for improvements in the living standard of workers. His chief works were *Vliianie russkogo zakonodatel'stva na torgovyi i bankovyi kredit* (The Influence of Russian Legislation on Commercial and Bank Credit, 1870), his doctoral thesis *Zakonodatel'stvo i birzhevaia spekulatsiia* (Legislation and Stock-Market Speculation, 1872), and *Venskii krizis 1873 g.* (The Vienna Crisis of 1873, 1877).

**Gawroński, Franciszek** (pen name Rawita), b 4 November 1845 in Stepashky, Haisyn county, Podilia gubernia, d 16 April 1930 in Józefów, Poland. Polish agronomist, writer, publicist, and historian. He wrote several historical novellas with Ukrainian themes and articles on Ukrainian literature. At first he was sympathetic to the Ukrainian cause, but gradually he became hostile to it. His anti-Ukrainian attitude is expressed most vividly in *Historia ruchów hajdamackich w 18 w.* (A History of Haidamaka Movements in the 18th Century, 2 vols, 1899, 1901), *Bohdan Chmielnicki* (Bohdan Khmelnytsky, 2 vols, 1908–9), and *Kozaczyzna ukrainna w Rzeczypospolitej Polskiej* (Borderland Cossacks in the Polish Commonwealth, 1923).

*Gazette de Léopol*

**Gazette de Léopol.** A weekly French newspaper edited and published by Chevalier Ossoudi in 1776 in Lviv. It was one of the first newspapers published on Ukrainian territory; 52 issues appeared.

**Gdańsk** (German: Danzig). City in Poland (1980 pop 448,000). A historically important commercial-industrial center and port on the Baltic Sea. Towards the end of the 13th century, its merchants established trade relations with Rus'. From 1919 to 1939, according to the Treaty of Versailles, it was a free city in customs union with Poland, which also controlled its foreign relations. Since 1945 Gdańsk has been part of the Polish People's Republic.

From 1922 to 1945 a few hundred Ukrainians, mainly from Galicia, studied at the Danzig Polytechnic. They had their own Osnova Union of Ukrainian Students, the fraternities Halych, Zarevo, and Chornomore, the socialist Drahomanov Hromada and Franko Society, the Smoloskyp chemistry students' circle, and the Surma choir. The first ordinary congress of the Central Union of Ukrainian Students was held in Danzig in July 1923. Ukrainian student activity peaked in the mid-1920s, but the number of students subsequently dwindled because of economic difficulties.

In 1947, as part of the Polish state's policy to depopulate the Polish-Ukrainian borderland of its indigenous Ukrainians, some 10,000 Ukrainians from the \*Sian region were forcibly resettled in Gdańsk voivodeship. Since 1956 the second-largest branch (400 members) of the \*Ukrainian Social and Cultural Society in Poland has been located in Gdańsk; it has held youth fairs and, in 1983 and 1985 in nearby Sopot, festivals of Ukrainian song. Ukrainian was taught at Gdańsk University in 1983–5.

Nikolai Ge

**Ge, Nikolai** (also: Gay, Gué), b 27 February 1831 in Voronezh, Russia, d 13 April 1894 at Ivanovskiy khutir (now the village of Shevchenko), Bakhmach county, Chernihiv gubernia. Russian painter of French origin; one of the founders of the \*Peredvizhniki group of Russian populist painters. Ge studied at the universities of Kiev (1847) and St Petersburg (1848–9), and at the St Petersburg Art Academy (1850–7), where he became a professor in 1863. Ge's realistic works are characterized by their psychological depth; his early works show the influence of his teacher K. Briullov and A. Ivanov. Ge executed many paintings on historical subjects, portraits

(including one of M. Kostomarov, 1870), a self-portrait (1892–3), several Italian landscapes, and a famous cycle of works on New Testament themes exhibiting the influence of L. Tolstoy's ideas. From 1876 Ge lived in the Chernihiv region, where he spread Tolstoy's ideas among the peasants and took a keen interest in Ukrainian culture, particularly the works of T. Shevchenko. Many of his later paintings have Ukrainian peasants and landscapes as their subjects. Ge helped establish M. Murashko's \*Kiev Drawing School. Large collections of his works are in the Kiev Museum of Russian Painting and the Tretyakov Gallery in Moscow.

**Gebei, Petro** [Gebej], b 20 July 1864 in Kalnyk, Bereg county, Transcarpathia, d 26 April 1931 in Uzhhorod. Greek Catholic bishop, educator, and civic figure. He completed his theological studies in the Budapest Central Seminary (1889), and began teaching canon law at the Uzhhorod Eparchial Seminary, later becoming its rector. In 1927 he was consecrated bishop of the Mukachiv Eparchy. In 1918–19 he was active in the Ruthenian People's Council, which sought Ukrainian national and religious autonomy both from the Hungarian and the Czechoslovak regimes. In 1925 he created the Central Chancellery for the Defense of the Faith, which successfully stemmed the mass conversions to Orthodoxy, defended his church's rights, and convinced the Czechoslovak state to restore confiscated properties to the church. A popular bishop, he had a populist orientation and belonged to both the Prosvita and the Dukhnovych societies.

**Gebus-Baranetska, Stefaniia** [Gebus-Baranec'ka, Stefaniia], b 19 December 1905 in Peremyshl, Galicia. Painter and graphics artist. Gebus-Baranetska studied at the Lviv Art School (1926–9) and at the Lviv Polytechnical Institute (1928–33). She taught graphic art, weaving, and composition in various art schools in Lviv. She is best known for her woodcuts, landscapes, and bookplates. Her work is realistic in style and draws on Ukrainian folk art and themes: eg, *Shepherd* (1935), *Washerwoman* (1935), *Folk Dances* (1937), and *Kosiv Potters* (1956). Gebus-Baranetska is the subject of a monograph by A. Viunyk (1968).

**Gediminas** (Ukrainian: Gedymin), ca 1275–ca 1340. Grand duke of Lithuania from 1316. During his reign most of Belorussia and the Ukrainian territories of Turiv-Pynske and northern Volhynia were incorporated into the Grand Duchy of Lithuania. Gediminas called himself 'rex lithuanorum et multorum ruthenorum.' Through dynastic alliances he controlled or influenced many other realms. His brother Theodore ruled Kiev principality, his daughter Euphemia (Ofka) married Prince \*Yurii II Boleslav of Volhynia in 1331, and through marriage his son \*Liubartas became the prince of Galicia-Volhynia in 1340.

**Gedroits, Kostiantyn** [Gedrojč, Kostjantyn], b 6 April 1872 in Bendery, Moldavia, d 5 October 1932 in Moscow. Soil scientist, agrochemist; full VUAN member from 1930. A graduate of the St Petersburg Forestry Institute (1898) and St Petersburg University (1903), he became professor at the Forestry Institute in 1918. He was one of the founders and then a director (1922–30) of the agrochemical department of the Nosivka Agricultural Research Station

Kostiantyn Gedroits

Tyt Gembytsky

in the Chernihiv region. For many years he edited *Zhurnal opytnoi agronomii*. Among his scientific contributions are an explanation of the role of colloids in the formation and fertility of soils, a theory of the origin of solonetz soils and of their amelioration, and new chemical methods of soil analysis. His most important publications are *Uchenie o poglotitel'noi sposobnosti pochv* (The Theory of the Adsorptive Capacity of Soils, 4th edn 1933) and *Khimicheskii analiz pochv* (The Chemical Analysis of Soils, 4th edn 1935).

**Gembytsky, Tyt** [Gembyc'kyj], b 15 January 1842 in Liulyntsi, Vinnytsia county, Podilia gubernia, d 23 January 1908 in Lviv. Stage actor and director. In 1867 he founded a troupe that toured Right-Bank Ukraine. From 1869 he worked as an actor and director at the Ruska Besida theater in Lviv, where he appeared in many roles, including the mayor in N. Gogol's *Inspector General*, Martyn in I. Karpenko-Kary's *Martyn Borulia*, and Leiba in I. Tobilevych's *Zhydyvka-vykhrestka* (The Baptized Jewess). He wrote a historical survey of the founding and development of Ukrainian theater in Galicia (1904) and translated Russian and West European plays into Ukrainian.

**Gendarmes.** See Police.

**Gender** (Ukrainian: *rid*). Modern Ukrainian preserves the category of grammatical gender, inherited via Common Slavic from Indo-European. Every noun in the singular (sing) is assigned to one of the three genders – masculine (m), feminine (f), or neuter (n) – but is not inflected as adjectives are.

The specific gender is determined by the ending of the noun in the nominative (nom) case sing in conjunction with the declensional type. Most m nouns have a zero ending in the nom sing, with the ending *-a* or *-u* in the genitive (gen) sing; f nouns end in *-a* or *a* (functionally) soft consonant in the nom sing, and in *-y* or *-i* in the gen sing; n nouns end in *-o*, *-e*, or *-a* in the nom sing, and in *-a* or *-y* in the gen sing, with minor complications. Semantic factors also influence gender: the names of males are usually m nouns regardless of the ending, and female names are f nouns.

Although gender in nouns is a classificatory category, in adjectives it is inflectional. Singular adjectives agree

in gender with the nouns they modify. Gender distinctions in the nominative and accusative cases of the plural disappeared by the 15th century, and in the other cases of the plural by the 17th. Because in the singular of nouns gender is a live category, loan words in Ukrainian are either assigned a gender according to their ending (eg, *m bar* [bar], from the German *f* noun *die Bar*), or preserve the gender of the original language while adapting the appropriate ending for such a gender in Ukrainian (eg, *f* noun *akcija*, from the French *f* noun *action*).

G.Y. Shevelov

Genealogical vine of the Sviatopolk-Chetvertynsky princely family, from an engraving in *Teraturhima* (1638)

**Genealogy.** An auxiliary historical discipline that deals with family history and the lineage of individuals. It is closely related to \*heraldry and diplomatics. Interest in genealogy was already evident in the Princely era (for example, in Nestor the Chronicler), but as a discipline it developed only during the Cossack period of the 17th and 18th century, when members of the Cossack *starshyna* began tracing their lineages. The most important contributions to Ukrainian genealogy have been made by O. Lazarevsky, H. Myloradovych, J. Wolff, and V. Modzalevsky. In the course of their research, other historians have also uncovered valuable genealogical information; these include O. Bodiansky, M. Kostomarov, P. Yefymenko, V. Lypynsky, M. Hrushevsky, D. Bahalii, I. Krypiakevych, B. Krupnytsky, O. Ohloblyn, and V. Seniutovych-Berezhny. There is a wealth of information on Ukrainian pedigrees at the Archives of the Department of Heraldry in Leningrad and at the Central Historical Archive in Kiev; the holdings of the latter have been partly published. Today genealogy is not a flourishing discipline in Soviet Ukraine. Since all vital records are under police control, access to them is most difficult.

A genealogical section has been created (1984) as part of the Ukrainian Museum in New York to help Ukrainians in North America in tracing their family histories.

M. Miller

**General chancellor** (*heneralnyi pysar*). The title of a senior member of the \*General Officer Staff in the Hetman state who managed the \*General Military Chancellery and supervised the hetman's domestic and foreign correspondence. The office was filled by an educated person who knew several languages and diplomatic protocol and had administrative experience, usually as a scribe or a regimental chancellor. He performed many senior diplomatic functions, guarded the state seal, supervised the state archives, and signed the hetman's decrees in his absence. He also supervised the preparation of all decrees, charters, and land grants by his many subordinates, prepared the agenda of meetings of the council of the General Officer Staff, and performed other tasks assigned to him by the hetman. The general chancellors I. Vyhovsky (1648-57), P. Teteria (1660-3), and P. Orlyk (1706-9) later became hetmans.

The title was revived in 1917 under the Central Rada to designate the state functionary who, in a ministerial capacity, guarded the state seal and documents. The post was held by P. Khrystiuk (28 June-3 September 1917), O. Lototsky (3 September-November 1917), and I. Mirny (November 1917-22 January 1918). Thereafter the post was called state secretary.

**General Court** (*Heneralnyi sud*). The highest judicial body in the UNR, enacted by the Central Rada on 17 December 1917. The General Court was empowered to rule on legal matters arising in the UNR that prior to the 1917 Revolution had been adjudicated by the Russian Senate. The court had three divisions - criminal, civil, and administrative - and a prosecutors' office. On 15 January and 2 April 1918 the Central Rada appointed the following as judges of the General Court: P. Achkasov, O. Butovsky, A. Margolin, D. Markovych, Popov, Pukhtynsky, M. Radchenko, O. Khrutsky, S. Shelukhyn, H. Shyianov, A. Viazlov, and P. Yatsenko. On 8 July 1918 the General Court was transformed by the Hetman government into the \*State Senate.

**General flag-bearer** (*heneralnyi khorunzhyi*). Title of a low-ranking member of the \*General Officer Staff in the Hetman state. His role was primarily ceremonial: to carry the great military banner (*viiskova khoruhva*) on important occasions. He also performed political, diplomatic, and military tasks assigned to him by the hetman and could serve as acting hetman.

**General judge** (*heneralnyi suddia*). Title of the military judge of the Cossacks and, from 1648 to 1782, of a member of the \*General Officer Staff of the Hetman state. From 1654 there were usually two general judges, who collectively headed the General Court, the appellate court of the Hetman state. Most general judges had no legal experience. In addition to their judicial responsibility they also performed executive, advisory, and military functions and served as acting hetmans and diplomatic envoys. Hetman I. Samoilovych was a general judge in 1669–72.

**General land survey.** From 1766 to the mid-19th century, the tsarist government carried out several general land surveys throughout the Russian Empire, including Ukraine, for the purpose of establishing the boundaries of villages and towns, state lands, and various private landholdings. In the Poltava and Chernihiv regions surveys were begun in the 1760s. In Slobidska Ukraine a survey was conducted in 1769–81, in Katerynoslav and Kherson gubernias in 1798–1828, and in Tavriia gubernia in 1829–43. By means of these surveys the right of peasants to occupy land freely – a right based on customary law – was abrogated, the properties of the old owners or of new owners who had received estates from the state in the course of the surveys were consolidated, and the number of communal lands and scattered estates was sharply reduced. The surveyors produced plans of individual holdings, which were used to prepare county maps and gubernial atlases, and economic descriptions of the various land units surveyed. The documents of the general land surveys served as the legal basis of property relations until the 1917 Revolution.

**General Little Russian Court** (*Heneralnyi malorosii-skyi sud*). The highest judicial body in Left-Bank Ukraine from 1797 to 1831. It consisted of a civil and a criminal division and functioned as an appellate court in Little Russia gubernia. Its two judges and ten jurors were elected by the gentry for three-year terms. Located in Chernihiv throughout its existence, the court was subordinated to the \*Russian Senate.

**General Military Chancellery** (*Heneralna viiskova kantseliariia*). The central administrative body in the Hetman state from 1648 to 1764 through which the hetmans exercised their military and civil authority. The chancellery was directed by the \*general chancellor and supervised all affairs, maintained the state archives and registers, prepared the hetman's decrees, charters, and land grants, and resolved disputes regarding membership in the Cossack estate. Regimental chancellors were trained at the chancellery, and the \*General Officer Staff held its meetings on its premises, which were located in the same town as the hetman's residence (Chyhyryn, Hadiache, Baturyn, Hlukhiv). In 1720 its financial and judicial powers were abrogated by Peter I, and it was reorganized according to the collegial principle.

**General Military Council** (*Heneralna viiskova rada*). A principal political body in the Hetman state from 1648 to 1750. It assumed the functions of the Cossack Council, the ruling body of the Zaporozhian Sich, and the general Cossack councils (see \**Chorna rada*); elected the hetman and senior Cossack *starshyna*; and debated and resolved

all (domestic and external) political, administrative, judicial, and military affairs. The council was an example of direct, popular self-rule, similar to the medieval *viche*. All members of the Cossack estate could participate in it (at times delegations representing burghers, and even peasants, took part); thus the council involved several thousand people. There was no one place of assembly; the most frequent gathering places were by the Rosava River southwest of Kiev and in Pereiaslav. During the \*Cossack-Polish War, the council was the supreme legislative body. By a show of hands, it sanctioned the alliance with Muscovy in Pereiaslav (see \**Pereiaslav Treaty of 1654*), with Sweden in Korsun in 1657, and with Turkey in Korsun in 1669. Its powers often coincided and competed with those of the hetman and the \*Council of Officers, and in the late 17th century its governing powers were lost to them. Thereafter it convened only to sanction ceremonially the election of a new hetman.

**General Military Court** (*Heneralnyi viiskovyi sud*). The highest judicial body in the Hetman state. It was formed in 1654 during B. Khmelnytsky's hetmancy and was based on the Cossack company and regimental courts. The hetman was its president, but in practice one of the two \*general judges, the hetman's permanent deputy, normally presided over it. The court was a collegial institution, consisting also of other members of the \*General Officer Staff and of \*notable military fellows, who served on the bench in important cases. Usually, however, only one judge heard a case; he was aided by a judicial scribe. For those disagreeing with regimental or company court rulings, the General Military Court served as an appellate court; for members of the General Officer Staff and individuals under the hetman's special protection it served as a court of the first instance. Decisions of the court could be appealed only to the hetman. In the 18th century the court came under the jurisdiction of the \*General Military Chancellery. In 1764 it was subordinated to the \*Little Russian Collegium. The Russian government formally abolished the court in 1781, when it reorganized the Hetman state into three vicegerencies, but the court continued functioning until 1790.

**General Officer Staff** (*Heneralna starshyna*). The \*hetman's senior officers in the Hetman state (1648–1782). Its members were the \*general quartermaster, two \*general judges, the \*general chancellor, \*general treasurer, two \*general osauls, the \*general flag-bearer, and the \*general standard-bearer. They were elected by either a general Cossack council or the \*Council of Officers or were appointed by the hetman or, after 1725, the Russian government. All these titles, except for the general treasurer, existed before 1648, when they designated the most senior officers in the Cossack army.

After 1648 these officers constituted a council (similar to a cabinet) that advised the hetman on the conduct of all affairs, helped formulate and execute policy, planned and directed military affairs, and ruled the state during an interregnum or in the hetman's absence; at times the council acted as the highest appellate court (eg, for charges of treason). Individual officers presided over the central administrative, judicial, and financial institutions or were personal deputies and envoys of the hetman. Their importance grew as the hetman's authority was eroded from 1709 by the Russian government, and by the mid-

18th century they were in the forefront of the movement among the Cossack *starshyna* for incorporation into the Russian imperial gentry. The members of the General Officer Staff were remunerated for their services either by large land grants, or money, or in kind.

#### BIBLIOGRAPHY

Gajecky, G. *The Cossack Administration of the Hetmanate*, 2 vols (Cambridge, Mass 1978)

**General osaul** (*heneralnyi osaul*). Title of a senior officer in the Cossack army and, after 1648, of a member of the \*General Officer Staff in the Hetman state. As a rule, there were two general osauls. Their primary role was military: supervising the army's condition, commanding large detachments in wartime, managing muster rolls, directing the army engineers, commanding mercenary troops, and occasionally serving as acting hetman. They also served as the hetman's envoys, supervised matters of internal security (including reconnaissance and the suppression of mutinies), and conducted annual regimental musters and inspections. Four hetmans were former general osauls: P. Doroshenko (1663–4), D. Mnohohrishny (1668), I. Mazepa (1682–7), and I. Skoropadsky (1701–6).

**General quartermaster** (*heneralnyi oboznyi*). Title of the head of the \*General Officer Staff in the Hetman state, who also commanded the army artillery and was responsible for army munitions, supplies, and transport. As the highest official after the hetman, he served as chief executive during an interregnum, as acting hetman, and, on occasion, as the hetman's special foreign envoy. He also managed all military affairs in the \*General Military Chancellery.

**General Secretariat of the Central Rada** (*Heneralnyi Sekretariat Ukrainskoi Tsentralnoi Rady*). Chief executive body of the UNR from 28 June 1917 to 22 January 1918. Five days after the proclamation of the First \*Universal the Executive Committee (later Little Rada) of the \*Central Rada accepted a proposal of the Ukrainian Party of Socialist Revolutionaries (UPSR) and formed the General Secretariat as a coalition 'cabinet' of Ukraine's autonomous government. At first the General Secretariat consisted of eight general secretaries and a general chancellor. Its chairman and general secretary (sec) for internal affairs was V. \*Vynnychenko (Ukrainian Social Democratic Workers' party [USDRP]); the general chancellor was P. Khrystiuk (UPSR). The other general secretaries were: sec of finance Kh. Baranovsky (a non-partisan co-operative leader); sec of nationalities S. Yefremov (Ukrainian Party of Socialists-Federalists [UPSf]) and (from 10 July 1917) O. Shulhyn (UPSf); sec for military affairs S. Petliura (USDRP); sec for agrarian affairs B. Martos (USDRP); sec of justice V. Sadovsky (USDRP); sec of education I. Steshenko (an independent); and sec of food supply M. Stasiuk (UPSR). The USDRP held a majority of the portfolios.

In Ukrainian circles early opinion on the role of the General Secretariat differed. Some thought it was to lay the groundwork for autonomy; others thought it was to exercise the powers of government. In non-Ukrainian circles it was regarded with great hostility. On 9 July 1917, the General Secretariat published a declaration that

General Secretariat of the Central Rada: (sitting, from left) S. Petliura, S. Yefremov, V. Vynnychenko, Kh. Baranovsky, I. Steshenko; (standing, from left) V. Sadovsky, B. Martos, M. Stasiuk, P. Khrystiuk

defined it as 'the executive body of the Central Rada.' Negotiations between the Central Rada and the Russian \*Provisional Government on 11–13 July 1917 led to the latter's recognition of the General Secretariat as the highest executive power on Ukrainian territory. It was agreed that the Central Rada would be expanded to include representatives of the national minorities in Ukraine and that members of the General Secretariat, chosen from Central Rada deputies, would be confirmed by the Provisional Government. The General Secretariat was to be responsible to the Rada. By the end of July the Central Rada was enlarged by representatives of the national minorities and workers' deputies elected by the First \*All-Ukrainian Workers' Congress. This change was reflected in a new General Secretariat to which five portfolios were added. V. Holubovych (UPSR) became sec of transport; A. Zarubin (Russian Socialist-Revolutionary), sec of postal and telegraph services; and M. Rafes (Jewish Bund), general controller. Two portfolios reserved for Russian Social Democrats – trade and industry, and labor – remained vacant. Three undersecretaries for nationalities were created in the General Secretariat: one for Jewish affairs, filled by M. Silberfarb (United Jewish Socialist Workers' party), one for Polish affairs, filled by M. Mickiewicz (Polish Democratic Center party), and one for Russian affairs, which remained vacant for a time.

After long hesitation the Central Rada accepted the 'Provisional Instruction to the General Secretariat' issued on 17 August 1917 by the Provisional Government. According to this decree the General Secretariat, reduced from 14 to 8 general secretaries (not counting the chancellor), was to be the highest organ of the Provisional Government in the regional administration of Ukraine and was to be appointed by the Provisional Government on the recommendation of the Central Rada. After a long, heated debate the Central Rada accepted these humiliating conditions. V. Vynnychenko resigned under severe criticism by the UPSR, and D. Doroshenko was asked to form a new General Secretariat. When he failed, V. Vynnychenko assumed the task and by September 3 completed it. On 14 September the Provisional Government confirmed the new General Secretariat. It consisted of V. Vynnychenko, chairman and sec for internal affairs; I. Steshenko, sec of education; M. Tuhan-Baranovsky (UPSf), sec of finance; O. Shulhyn, sec for nationalities;

M. Silberfarb and M. Mickiewicz, undersecretaries; M. Savchenko-Bilsky (UPSR sympathizer), sec for agrarian affairs; A. Zarubin, general controller; O. Lototsky (UPSF), general chancellor; and P. Stebnytsky (UPSF), UNR commissioner to the Provisional Government. On 10 October 1917 the program of the General Secretariat was presented to the Little Rada. Its general purpose was stated to be 'the unification of all Ukrainian territories and the entire Ukrainian people in one autonomous entity.'

After the Bolsheviks had overthrown the Provisional Government and UNR troops had taken control of Kiev, the Central Rada, with the encouragement of the Third \*All-Ukrainian Military Congress, enlarged the General Secretariat by adding the following portfolios: food supply, assumed by M. Kovalevsky (UPSR); military affairs, S. Petliura; labor, M. Porsh (USDRP); trade and industry, V. Holubovych; justice, M. Tkachenko (USDRP); transport, V. Yeshchenko (Ukrainian Party of Socialists-Independents); and postal and telegraph services, A. Zarubin. D. Odynets (Russian Popular Socialist party) was appointed undersecretary for Russian affairs. After the proclamation of the Third \*Universal on 20 November 1917, the membership of the General Secretariat changed again: M. Tuhan-Baranovsky (temporarily replaced by V. Mazurenko), M. Savchenko-Bilsky, A. Zarubin, and O. Lototsky resigned. On 6 January 1918, S. Petliura left the General Secretariat. After further changes in early January 1918, the General Secretariat was left with the following members: V. Vynnychenko, chairman and sec for internal affairs; M. Tkachenko, sec of justice; M. Porsh, sec for military affairs and labor; O. Zhukovsky (UPSR), undersecretary for military affairs; O. Zarudny (UPSR), sec for agrarian affairs; M. Kovalevsky, sec for food supply; O. Shulhyn, sec of foreign affairs; V. Yeshchenko, sec of transport; M. Shapoval (UPSR), sec of postal and telegraph services; D. Antonovych (USDRP), sec for naval affairs; V. Mazurenko (USDRP), acting sec of finance; V. Holubovych, sec of trade and industry; I. Steshenko, sec of education; D. Odynets, undersecretary for Russian affairs; M. Silberfarb, undersecretary for Jewish affairs; M. Mickiewicz, undersecretary for Polish affairs; A. Zolotarev (Jewish Bund), general controller; and I. Mirny, acting general chancellor. The Fourth \*Universal, proclaimed on 25 January 1918 (the document, however, was dated 22 January), transformed the General Secretariat into the \*Council of National Ministers of the UNR.

**General Staff of the UNR Army** (Heneralnyi shtab Armii UNR). Organized in November 1917 by the General

Secretariat of Military Affairs of the UNR, it was patterned on the General Staff of the Russian imperial army. While at first it had several departments, after reorganization the number was reduced to two – the organizational department and the quartermaster's department – run by assistants to the chief of staff. During its brief existence the general staff dealt mostly with organizational, not operational, matters. It drafted mobilization plans and organizational schemes, organized military schools, and prepared field manuals. Gen B. Bobrovsky was chief of general staff until March 1918, when he was succeeded by Col O. Slyvynsky. In February 1919, when the Directory of the UNR retreated from Kiev, the officers of the general staff were reassigned to the Active Army Staff. (See \*Army of the Ukrainian National Republic.)

**General standard-bearer** (*heneralnyi bunchuzhnyi*). A senior official in the Hetman state of the 17th and 18th centuries and member of the \*General Officer Staff. Formally he was responsible for safeguarding and displaying the symbol of the hetman's authority – the *bunchuk*, a standard consisting of a staff topped by an orb or spearhead and decorated with a horsetail or tassels – during ceremonies and military campaigns. He carried out various military, diplomatic, and judicial tasks assigned to him by the hetman.

**General starshyna**. See General Officer Staff.

**General Survey of Landholdings** (*Heneralne slidstvo o maietnostiakh*). A census of landowners, holdings, and peasants in Left-Bank Ukraine conducted in 1729–31 on the orders of Hetman D. Apostol with the object of establishing the rightful titles to properties and halting any further distribution of rank estates into hereditary ones. Titles were awarded for service by the Russian government, the hetmans, and, frequently, regimental colonels and were held in trust. The survey divided properties into rank estates, estates awarded on merit, town estates, free estates, disputed estates, and monastic estates. It resulted in the discovery that no more than a third of the peasants remained free commoners, the other two-thirds being subjects of the holders of rank, private, or monastic estates. After the survey the number of rank estates declined, while the number of large, permanent estates owned by the Cossack *starshyna* or monasteries increased.

**General treasurer** (*heneralnyi pidskarbi*). Title of a senior officer in the Hetman state, who became a member of the \*General Officer Staff in 1728. His primary responsibility was to supervise government finances and to collect revenues through taxes, rents, and licenses. He also fulfilled other tasks assigned to him by the hetman.

**General Ukrainian Council** (*Zahalna ukrainska rada*). Ukrainian interparty political organization formed on 5 May 1915 in Vienna out of the Galician \*Supreme Ukrainian Council by enlarging its mandate and membership. The General Ukrainian Council was to represent Ukrainians during the war, and was to be its chief spokesman within Austria-Hungary. The council consisted of 34 members. Galicia was represented by 24 delegates (most were from the National Democratic party, but a number were from the Ukrainian Radical party and 1 was from

General Ukrainian Council, 5 May 1915: (sitting, from left) T. Drachynsky, V. Bachynsky, M. Hankevych, M. Vasylo, K. Levytsky, Ye. Petrushevych, L. Bachynsky, Ye. Olesnytsky, V. Paneiko; (standing, from left) I. Bobersky, V. Doroshenko, Yu. Bachynsky, A. Skoropys, V. Temnytsky, M. Lahodynsky, O. Nazaruk, I. Makukh, L. Levytsky, K. Trylovsky, I. Semaka, S. Holubovych, V. Yasenysk, Ya. Vesolovsky, O. Popovych, S. Baran, O. Onyshkevych

the Ukrainian Social Democratic party), Bukovyna by 7 delegates (5 from the National Democratic party, and 1 each from the Ukrainian Social Democratic party and the Ukrainian People's party), and Russian-ruled Ukraine by 3 delegates from the Union for the Liberation of Ukraine. Individual membership in the council changed frequently.

According to the council's program, Ukrainian territories under Russian rule were to form an independent Ukrainian state while the Ukrainian territories under Austria-Hungary were to become merely autonomous and unified into a single Ukrainian region. The presidium was the executive body of the council. It consisted of a president (K. Levytsky), three vice-presidents (M. Vasylo, L. Bachynsky, replaced later by Ya. Vesolovsky, and M. Hankevych, replaced later by V. Temnytsky), a deputy from the Union for the Liberation of Ukraine (O. Skoropys-Yoltukhovskiy, replaced by M. Melenevsky), and a secretary (V. Temnytsky). Ye. Olesnytsky, S. Rudnytsky, S. Tomashivsky, S. Dnistriansky, and L. Tsehelsky served as special advisers to the council. The imperial manifesto of 4 November 1916, which established the Polish Kingdom and sanctioned an autonomous, Polish-dominated Galicia within Austria-Hungary, undermined the position of the council; subsequently, leadership in Ukrainian political life passed to the Ukrainian parliamentary representation.

**General Ukrainian Non-Party Democratic Organization** (Zahalna ukrainska bezpartiina demokratychna orhanizatsiia, aka the Ukrainian General Organization [Ukrainska zahalna orhanizatsiia]). A clandestine cultural organization founded in Kiev in the fall of 1897 on the initiative of O. \*Konysky and V. \*Antonovych. Many of its first members also belonged to a \*hromada or the \*Brotherhood of Taras. With about 150 members in 1901, it was enlarged and reorganized into an association of 3–10-member autonomous groups that held periodic congresses every three years to elect the executive. Most of its energy was devoted to publishing: it maintained the Vik publishing house and the Kievskaiia Starina bookstore. It also encouraged the student, zemstvo, and

co-operative movement, helped persecuted Ukrainian activists, and agitated for the use of the Ukrainian language in the schools. In 1903 it organized a Kotliarevsky jubilee in Poltava. In 1904 the organization adopted a full political program and changed its name to the \*Ukrainian Democratic party, demanding national autonomy for Ukrainians and other nationalities within a federated Russia and radical economic and social reforms. In the following year it merged with the Ukrainian Radical party to form the \*Ukrainian Democratic Radical party (UDRP), which lasted to 1907. In 1908 the groups which previously had belonged to the General Ukrainian Non-Party Democratic Organization and the UDRP established a similar secret association, the \*Society of Ukrainian Progressives, which in 1917 became the Ukrainian Party of Socialist Federalists. The most important members of the organization were V. Antonovych, P. Zhytetsky, M. Lysenko, I. Shrah, Ye. Chykalenko, M. Hrushevsky, B. Hrinchenko, I. Steshenko, Ye. Tymchenko, M. Kononenko, O. Cherniakhivsky, O. Borodai, S. Yefremov, M. Mikhnovsky, O. Rusov, T. Rylsky, V. Berenshtam, and O. Lototsky.

**Generalgouvernement.** Political administrative entity comprising the central part of Poland occupied by Nazi Germany in 1939–45 but not incorporated directly into the Third Reich. The capital of the Generalgouvernement was Cracow. It was created by Hitler's declaration of 12 October 1939 and was essentially a German colony with a totalitarian regime and only minimal rights for the local population. The Nazis persecuted the inhabitants and deported hundreds of thousands of people to work as forced laborers in Germany. Initially composed of Kielce, Cracow, Lublin, and parts of Łódź and Warsaw voivodeships, it had an area of 95,000 sq km and a population of some 12 million. The Generalgouvernement included the borderlands of Western Ukraine – Podlachia and the Lemko, Kholm, and part of the Sian regions; covering some 16,000 sq km, these territories had 1.2 million inhabitants of whom 525,000 were Ukrainians and 170,000 were Ukrainian-speaking Roman Catholics (*latynnyky*).

After Germany invaded the USSR, Galicia (the voivodeships of Lviv, Stanyslaviv, and Ternopil) was annexed to the Generalgouvernement on 1 August 1941, increasing its territory to 145,000 sq km and its population to 18 million. Ukrainian territories in the expanded Generalgouvernement covered 63,000 sq km with a population of over 7 million, of which the total number of Ukrainians was nearly 4 million, excluding 500,000 *latynnyky*.

The organization of the Generalgouvernement resembled that of a centralized administrative unit of the Third Reich but was closer to that of a directly occupied territory (eg, \*Reichskommissariat Ukraine) than to a pseudo-state formation like the Protectorate of Bohemia and Moravia. All power was in the hands of the Nazi governor-general H. \*Frank, who acted directly on Hitler's orders and was accountable to him alone. All responsible po-

sitions in the administration were staffed by Germans; Polish and Ukrainian officials were used only in minor capacities. The central administration consisted of 12 (later 14) main departments and a Secretariat of State. The territory was divided into five districts, each with a corresponding administrative structure. Limited local self-rule existed, although officials and members of consultative councils were appointed, and the Führerprinzip was adopted everywhere. Ukrainians were in a minority in the Cracow and Lublin districts but formed the majority in the 'Distrikt Galizien,' governed by O. \*Wächter.

Galicia was annexed to the Generalgouvernement against the will of the Ukrainian population, dashing all hopes that the Ukrainians may have had to statehood and to political independence. The local language (Ukrainian or Polish) was used together with German in the courts, local administration, and schools. In order to promote cultural and welfare activities, and to stimulate some areas of the economy, the \*Ukrainian Central Committee (1939-45) was created in Cracow and the \*Ukrainian Regional Committee (1941-2) was founded in Lviv. These social institutions were controlled by the Germans.

**Genetics.** Branch of biology dealing with the inheritance of characters in living organisms. It is concerned with the principles of the mutation, conservation, transfer, and expression of information contained in genes. Because both physicochemical and behavioral character-

istics depend to a large extent on an organism's genetic structure, genetics underlies all other biological disciplines and has had a great influence on their development. It is central to studies of populations, evolution, speciation, and phylogeny, as well as to much of biochemistry and cytology. G. Mendel, who in 1865 first formulated the basic laws of the transmission of hereditary traits and postulated discrete units of heredity to account for these laws, is recognized as the founder of genetics, although the science began to develop only in the early 20th century when Mendel's works were rediscovered. In 1912 A. Sapiiehin began to teach genetics at New Russia (Odessa) University.

In Ukraine Mendelian genetics began to develop in the early 1920s as the new ideas from Western Europe were introduced by the Ukrainian cytologist H. Levytsky. Adopting T. Morgan's chromosomal theory of heredity in 1922, H. Levytsky popularized cytogenetics and other recent discoveries in genetics. In 1923 the Commission of Experimental Biology and Genetics was set up at the vUAN to co-ordinate research in genetics and selection in Ukraine. Its chairman was I. Shmalhauzen, who worked in the Department of Experimental Zoology at the vUAN Institute of Zoology and Biology on certain phenogenetic traits and the development of vertebrates. In 1934 a genetics department, headed by I. Ahol, was established at this institute. Its most important research dealt with radiation-induced mutations in drosophila (P. Sytko and P. Khranovsky) and the effects of X-rays on chicken spermatozoa and embryos (N. Tarnavsky). In 1937 under S. Hershenson's leadership the department turned to research on chemically induced mutations, the mutagenic effect of exogenic DNA, and the role of genetic polymorphism in speciation. Besides Hershenson, P. Rokytsky and T. Dobzhansky did early research in population genetics in Ukraine. Among Ukrainian biologists who made contributions to applied genetics and selection before the Second World War were M. Vetukhiv, H. Karpechenko, V. Remeslo, and M. Ivanov.

From the mid-1930s Mendelian genetics in the USSR came under increasing attack by T. \*Lysenko and his supporters in the scientific community and the Communist party. Defenders of the discipline were dismissed from their posts and some (I. Ahol, H. Karpechenko, and H. Levytsky) were even arrested and perished in prison. In 1948 Lysenkoism was established as the official Soviet position in biology. Hundreds of Soviet scientists were dismissed or demoted, departments and institutes of genetics were closed down, and books on genetics were destroyed. For 16 years Lysenko and his followers enjoyed virtually complete control over Soviet biology and agronomy and immunity from criticism. The downfall of their staunch supporter N. Khrushchev in 1964 exposed them to strong criticism from the scientific community and led to a rapid loss of influence.

The rebirth of genetics in Ukraine is closely associated with S. Hershenson, who survived the repeated purges of Lysenko's opponents without abandoning genetic research. In the 1950s he pioneered the development of molecular genetics in Ukraine. Genetic research at the AN URSS was expanded significantly in 1968 when the Sector of Molecular Biology and Genetics was organized. In 1973 it was converted into the Institute of Molecular Biology and Genetics. As acting director of the new institute, Hershenson promoted the development of ge-

netic engineering. The mutagenic activity of viruses and exogenous DNA continues to be studied. The transfer of bacterial genes into the cells of higher organisms and the fermentative synthesis of genes outside the organism are investigated. A number of genes have been synthesized by V. Kavsan and A. Ryndich using the method of inverse transcription from RNA to DNA. The biological effects of transplanting embryos at an early stage of development have been studied by V. Evsikov, L. Morozova, and T. Titok. The institute applies genetic techniques to improve plant and animal varieties and to detect and correct genetic defects in human cells. Research in genetics is also conducted at the USSR Academy of Medical Sciences \*Institute of Gerontology and at the AN URSR institutes of zoology and botany. The principal journal in the field of genetics, *Tsitologija i genetika*, has been published in Russian since 1967. (See also \*Biology and \*Botany.)

C. Spolsky

**Geneva.** City (1985 pop 160,000) on the Rhône River in \*Switzerland. Administrative and commercial center of Geneva canton, European headquarters of the UN World Health Organization and other international organizations. As the home to scores of Ukrainian émigrés from the Russian Empire and Austria-Hungary in the late 19th and early 20th century, it was a center of Ukrainian political and cultural life. M. \*Drahomanov, a resident from 1876 to 1889, published the journal \**Hromada* in Geneva and helped to establish the *Ukrainska Drukarnia* press there; directed by A. Liakhotsky, it released numerous books, journals, and pamphlets from 1876 to 1918, including many classics of Ukrainian literature and important political tracts. From 1878 to 1881 M. Pavlyk, S. Podolynsky, F. Vovk, M. Ziber, and other Ukrainian socialists collaborated with Drahomanov in Geneva. A number of Ukrainian political figures and journalists have been permanent or temporary residents of Geneva: eg, Ye. Konovalets (1930–6), L. Yurkevych, P. Chyzhevsky, M. Lozynsky, E. Batchinsky, M. Yeremiiv, M. Kushnir, M. Rudnytska, and M. Trotsky. The Ukrainian Red Cross, the Ukraina student organization, the Ukrainian Relief Committee, and the French-language bulletin *Ofinor* had offices there. Today a very small Ukrainian community (about 20 members) exists in Geneva. The city museum owns a portrait of Diderot by D. Levytsky.

**Genghis Khan** (né Temüjin), b 1155, 1162, or 1167, d 18 August 1227. One of the world's great conquerors. At the turn of the 13th century he united all the nomadic Mongol tribes in a centralized, despotic, military state and then plundered and subjugated neighboring peoples. After proclaiming himself 'universal ruler' in 1206, his armies conquered Siberia (1207), northern China (1211–15), Central Asia (1218–21), and Caucasia. By 1221 they had reached the Crimea. In 1223 the Mongols invaded Rus' after crushing at the \*Kalka River the allied forces of the southern Rus' princes and the Cumans. Then they attacked the Volga Bulgars. Genghis Khan's successors continued to raid Asia and Europe. His grandson \*Batu

Khan laid waste to Rus' in 1237–42, and with his \*Golden Horde maintained supremacy over it for many years.

Kyrlo Genik

**Genik, Kyrlo (Cyril)**, né Genyk-Berezovsky [Genyk-Berezovs'kyj], b 1857 in Bereziv Nyzhnii, Kolomyia county, Galicia, d 12 February 1925 in Winnipeg. Pioneer community leader. Genik briefly studied law at the University of Chernivtsi. In 1880 he established a school in his native village. Acquainted with prominent radicals, including I. Franko and M. Pavlyk, he was arrested in 1880 after socialist writings were found in his home. In 1896 he led a contingent of settlers to Canada. One of the first educated Ukrainians to settle in Canada, he was employed by the Department of the Interior as an immigration officer (1897–1911) in Winnipeg. From 1897 Genik contributed articles to the Ukrainian-American newspaper *Svoboda* in which he encouraged Ukrainians to join workingmen's associations and insisted that religious life focus on moral improvement rather than ritual and tradition. In 1899 he organized the first Ukrainian urban reading association in Canada, and in 1903 helped to establish the newspaper \**Kanadiis'kyi farmer*. He also participated in the founding of the \*Independent Greek church. Shunned by radical circles as a suspected agent of the Liberal party and discredited among conservatives for his religious views, Genik gradually withdrew from Ukrainian life after 1905.

**Genocchi, Giovanni**, b 30 July 1860 in Ravenna, Italy, d 6 June 1926 in Rome. Missionary, specialist in oriental languages, and biblical scholar. After serving as a member of the apostolic legation in Syria and Istanbul and as a missionary, Genocchi was appointed in 1920 by Pope Benedict xv apostolic visitor (with diplomatic powers) to Ukraine. He was prevented from visiting Ukraine and carried out his duties mostly in Poland. In 1923 he became apostolic visitor to Galicia, assisted by Rev I. Buchko as secretary. Genocchi's diplomatic mission is described in two articles by Rev I. Khoma in *Analecta Ordinis S. Basilii Magni*, 3, nos 1–4 (1958–60).

**Genocide.** A crime against humanity consisting of the deliberate, systematic destruction of entire racial, na-

tional, ethnic, or religious groups. Genocide has been practiced throughout history. In the 20th century, the Turkish genocide of the Armenians in 1915–17 was the first instance. The best-known genocides were perpetrated by the Nazi regime during the Second World War, especially against the \*Jews and \*Gypsies, in Germany and the occupied countries. The term was in fact coined by R. Lemkin in 1944 to describe the Nazi destruction of nations during the war.

Ukrainians have been subjected to genocide under the Soviet regime, especially during the Stalinist \*terror, the Second World War, and most notably in the man-made \*famine of 1932–3, which afflicted Ukraine, northern Caucasia, and the Volga German ASSR. The genocidal intent of the Soviet authorities is confirmed by the geographic extent of the famine, which affected only certain national groups and especially the Ukrainians; the official Soviet policy of forced grain procurement throughout this period and the speed with which the famine abated after that policy was abandoned; the official rejection of all Western offers of assistance; and especially the continued Soviet export of grain throughout the period. Despite the existence of sufficient food reserves and satisfactory harvests, food was not released to the people and consequently 7 to 10 million people perished, either from starvation or from diseases caused by severe malnutrition. In the case of Ukraine the famine was calculated to destroy the indigenous culture by decimating the nation.

Soviet historians and leaders have denied the existence of any famine in 1932–3, although they have infrequently referred to 'difficulties in the food situation' in the early 1930s, which have been attributed to natural causes and the dislocations resulting from \*collectivization and industrialization; these explanations were generally accepted by many contemporary Western observers and later historians. This is due, at least partly, to the fact that Stalin, unlike Hitler, never articulated a genocidal policy vis-à-vis the Ukrainians.

Genocide was recognized as a crime under international law in 1946 under the impact of the revelations at the Nuremberg trials. In 1948, the General Assembly of the United Nations approved the Convention on the Prevention and Punishment of the Crime of Genocide. It went into effect in 1951, but no court of international jurisdiction was created, and international sanctions against violators of the convention have been largely ineffective. The Ukrainian SSR signed and ratified the convention in 1954.

**Genre painting.** A style of painting characterized by the depiction of scenes from everyday life. Ukrainian genre painting usually depicts village life. Scenes from everyday life are already found in Scythian art and in the frescoes of St Sophia Cathedral in Kiev (11th century). By definition, however, genre painting is associated with European easel painting, which dates back to the late Middle Ages in the West and the 18th century in Ukraine. Early examples of genre painting in Ukraine include works by V. Shternberg (*Easter in Ukraine*), I. Soshenko (*Boys Fishing*), and T. Shevchenko (*In the Apiary and Peasant Family*). With the rise of the \*Peredvizhniki group of painters in the late 19th century, genre painting came to enjoy great popularity in the Russian Empire, including Ukraine. At that time K. Trutovsky (*Ukrainian Market and Girls at the Well*), I. Repin (*Vechernytsi and Village Musicians*), M. Bodarevsky (*Wedding in Ukraine*), and M. Pymonenko (*On the Stile*) were among the more prominent genre painters. Later works depicting everyday life were painted by, among others, P. Martynovych, I. Izhakevych, F. Krasysky, A. Zhdakha, F. Krychevsky, I. Severyn, O. Murashko, and A. Petrytsky, many of whom were associated with the Peredvizhniki, and by the Western Ukrainians O. Kulchytska, I. Trush, M. Ivasiuk, Y. Bokshay, O. Kurylas, and V. Yarotsky.

In the first half of the 20th century, with the influence of Western experimentalism, genre painting declined in Western Ukraine and often appeared simply as a pretext to formal stylization, especially in graphic arts. Examples of this include the historical works of E. Kozak, M. Butovych, and H. Mazepa. In Soviet Ukraine, the first works depicting contemporary Soviet life were painted by O. Pavlenko (*Village Consultation*), K. Trokhymenko (*The Felling of Oaks*), V. Korovchynsky (*Laying Out a Newspaper*), S. Prokhorov (*Women's Section, Village Commune, and The Homeless*), I. Padalka (*Harvesting Eggplants*), and others. In the 1930s, in addition to village life, industrial themes also became popular subjects for genre painting (eg, K. Trokhymenko's *Kadry Dniprobudu*), while war scenes became a dominant theme during and after the Second World War (eg, A. Cherkasky's *Tragedy on the Dnieper* and Ye. Svitlychny's *Meeting in the Hospital*). More recently, prominent painters in this style have included V. Chekaniuk (*First Acquaintance and Siberian Morning*), V. Patyk, O. Maksymenko (*Before Sowing*), S. Hryhoriev (*Enrollment in the Komsomol*), V. Ovchynnykov (*Call to Strike*), M. Bozhiy, and T. Yablonska. In the USSR, genre painting is widely propagated as the expression of socialist realism. Among emigrants, M. Dmytrenko and D. Potoroka have specialized in genre painting.

J. Hnizdovsky

**Gensorsky, Antin** [Gens'ors'kyj], b 1890 in Bolestrashychi, Peremyshl county, Galicia, d 15 June 1970 in Lviv. Historian of the Ukrainian language. He graduated from St Petersburg University in 1913. After the First World War he worked as a teacher and in the library of the People's Home in Lviv. From 1939 he taught at Lviv

University, and in 1949–63 he was a senior scholarly associate at the Institute of Social Sciences of the Academy of Sciences in Lviv. He is the author of studies on Ukrainian-Polish linguistic relations in the 13th century and the linguistic influence of Ukrainian on Russian, and of a series of detailed studies on the makeup, paleography, language, and style of the \*Galician-Volhynian Chronicle. He was a compiler and coeditor of the Polish-Ukrainian dictionary (1958–60).

**Gentry.** See Nobility.

**Genyk-Berezovska, Zina** [Genyk-Berezovs'ka], b 11 April 1928 in Solopisky near Prague. Specialist in Ukrainian literature. After graduating from Prague University in 1953, she taught Ukrainian literature there until 1960. Later she became a research associate of the Czechoslovak Academy of Sciences. She is the author of many articles in Czech and Ukrainian on H. Skovoroda, T. Shevchenko, I. Franko, and M. Pavlyk, and on modern Ukrainian writers and poets such as O. Dovzhenko, Yu. Yanovsky, P. Fylypovych, and the \*Shestydesiatnyky, and has published surveys of contemporary Ukrainian drama and poetry.

**Genyk-Berezovsky, Kyrylo.** See Genik, Kyrylo.

**Genyk-Berezovsky, Yulian** [Genyk-Berezovs'kyj, Julijan], b 20 June 1906 in Bereziv Nyzhnii, Kolomyia county, Galicia, d 16 November 1952 in Toronto. Literary recitalist; member of the Shevchenko Scientific Society. He taught Ukrainian at Cracow University and, after 1945, Ukrainian, Russian, and Polish at the universities of Graz and Toronto. He was renowned for his recitations of the works of such writers as V. Stefanyk, O. Fedkovych, M. Cheremshyna, and B. Lepky, both in Western Ukraine and in the diaspora.

**Geobotany.** See Phytogeography.

**Geochemistry.** Study of the distribution and migration of chemical elements and their isotopes in the various geospheres (solid earth, hydrosphere, and atmosphere). It covers such diverse topics as mineral exploration by geochemical prospecting, environmental pollution, hydrology, climatology, mineral phase equilibria, radiometric dating, origin of life, and paleoclimatology. Geochemical approaches supplement geological studies. They are important in discovering mineral deposits and fossil fuels for commercial exploitation. In Ukraine pioneering work in the field was done by V. \*Vernadsky. Geochemical research is conducted at the Institute of Geochemistry and the Physics of Minerals and at the \*Institute of Geological Sciences and the Geochemistry of Combustible Materials, both of the Academy of Sciences of the Ukrainian SSR.

**Geographic Society of the Ukrainian SSR** (Heohrafichne tovarystvo URSR). A scholarly and professional organization devoted to the study of theoretical and practical matters in the field of geography. Founded in 1947 as a branch of the Geographic Society of the USSR, since 1958 it has been affiliated with the AN URSR. In 1978 it had 6,850 members – including scientists, professors, environmentalists, and school teachers – in 27 branches.

The central office is in Kiev. The society has 17 subject sections, among them: physical geography, economic geography, geomorphology, cartography, hydrology, meteorology and climatology, regional studies and tourism, and conservation. The most important tasks of the society include studying natural conditions and resources in Ukraine to ensure more rational development and the most convenient placement of industry, environmental protection, the popularization of geography, and the improvement of education. The society organizes conferences and congresses, and publishes scholarly collections.

**Geography.** The study of the spatial variation and interrelation of physical, biological, and social phenomena on the earth's surface. A broad and general field of knowledge, it is divided into various narrower branches of science: physical geography includes geomorphology and biogeography (phytogeography and zoogeography); human geography incorporates ethnogeography, population geography (\*demography), \*economic geography, political geography, urban geography, historical geography, and regional geography. Related disciplines include geodesy, \*cartography, \*geology, \*soil science, ecology, \*climatology and meteorology, \*hydrology, and \*oceanography.

The earliest geographic accounts of what is today Ukraine were written by Greek scholars. Herodotus (ca 484–ca 425 BC) described the natural environment and the population of the Black Sea region. His account was corroborated and supplemented by Hippocrates (ca 460–ca 377 BC). In their works, two eminent Greek geographers of the ancient world, Strabo (64 BC–after AD 23) and Ptolemy (2nd century AD), and the Roman naturalist Pliny the Elder (AD 23–79) devoted some attention to the Black Sea region.

In the 10th century, the Byzantine scholar Constantine VII Porphyrogenitus and Arab travelers, such as Ibn Faḍlan, described Rus' in their writings. Much geographic information can be found in the chronicle *Povist' vremennykh lit* (Tale of Bygone Years), the richest source for the history and geography of 12th-century Rus'. From the 13th century onward, descriptions of Ukraine were provided by western-European travelers: in the 13th century by the papal envoy G. da Pian del Carpini and the envoy of Louis IX of France, William of Rubruck; in the 15th century by the French minister G. de Lannoy and the Venetian noble J. Barbaro; and in 1523–4 by A. Camperio in his report on Muscovy to Pope Clement VII.

Several important geographic sources on Ukraine were written in the early-modern period. The 'Two Sarmatias' by Maciej of Miechów (1517) was translated into several languages and remained for many years a basic source of knowledge about Eastern Europe. The German S. von Herberstein's account of his 1517 and 1526 travels in Muscovy, Lithuania, and Ukraine was published in 1549. The travel accounts of Michalo Litanus (1550, publ 1615), Blaise de Vigenère (publ 1573), and E. Lassota von Steblau (1594, publ 1854, 1866) contain much valuable information about Ukraine. Less important, but still valuable, are descriptions of Poland and Ukraine written by the Poles M. Kromer (1577) and M. Strykowski (1573). In the 17th century the most important works dealing with Ukraine's geography were G. Le Vasseur de \*Beauplan's *Description of Ukraine* (1650, 1660, 1661) and his maps (1:1,800,000 and 1:452,000).

The Cossack Hetman state established by B. Khmelnytsky attracted many foreign visitors, some of whom included geographic descriptions in the accounts of their trips. Most were envoys: for example, the Venetian A. Vimina (1650, publ 1650, 1890); Paul of Aleppo, the secretary to Patriarch Macarius III of Antioch (1654 and 1656, publ 1896–1900); K. Hildebrandt, a Swedish legate in 1656–7 (publ 1937); the Swedish officer Weihe (ca 1709, publ 1907); and the Dane J. Just (1711).

The first census books of the towns and counties of Left-Bank Ukraine, containing a wealth of historical and geographical information, and the 'chertezh' maps of Ukraine appeared in the second half of the 17th century. The Don and Azov regions' topography was mapped at the end of the 17th century, and Left-Bank Ukraine's in the 1730s. These maps were used in preparing the atlas of Russia published by the Imperial Academy of Sciences in St Petersburg in 1745. In the 18th century the first systematic geographic descriptions of Ukraine were commissioned by the Russian government. At the same time the first systematic topographic surveys were begun. In the latter half of the 18th century Russian officers charted the coast of the Azov and Black seas and the mouths of the Dnieper, Dniester, and Danube rivers. After the Russian annexation of Southern Ukraine (New Russia), the Imperial Academy of Sciences organized expeditions to study this territory. German scholars, such as J. Gölldenstädt (in 1768 and 1773–4), P. Pallas (in 1793–4 and 1796), and S. Gmelin (in 1768–9), played key roles in these expeditions. The results of the research conducted appeared in numerous records and publications. In 1781–2 V. Zuev studied the lower Dnieper, Dniester, and Boh basins. Later, in 1837, A. Demidov led a research expedition to the Crimea and the Donbas, which he described in a 4-volume account published in Paris in 1841–2.

The \*Rumiantsev census of 1765–9 yielded valuable geographic information, as did several economic-statistical surveys of Left-Bank Ukraine, including O. Shafon'sky's topographic and geographic surveys of Chernihiv vicegerency (1786, publ 1851) and the Kharkiv region (1788), K. German's survey of Tavriia (1807), and D. Zhuravsky's survey of the Kiev region (1852). Sections on Ukraine appeared in the geographic, statistical, and nature surveys of the Russian Empire by A. Büsching, Kh. Chebotarev (1776), I. Hackmann, S. Pleshcheev (1786), and notably J. Georgi (3 vols, 1797–1802). By the late 18th century fairly accurate topographical maps had been prepared in Russia and Austria.

The foundations of geography as an independent, modern science were laid in the early 19th century by the German scholars A. von Humboldt and C. Ritter. Modern geography in the strict sense was unknown in 19th-century Russia and Ukraine. Its main branches – geomorphology and human geography – were not developed, and what passed for geography consisted mostly of a description of the earth, ie, of the sum total of geographical data. At the same time, however, certain branches of geography, such as climatology and meteorology, hydrogeography and oceanography, and phytogeography and zoogeography, developed independently. The Imperial Russian Geographic Society, which was founded in St Petersburg in 1845, primarily explored and studied the as yet unknown territories of the empire in Asia and conducted research in geology,

ethnography, and statistics. In Ukraine, the \*South-western Branch of the society existed only in the years 1873–6, and it was not until the 1880s that geography chairs were established at the universities of Kharkiv, Lviv, and Chernivtsi.

Studies in geography were usually written by specialists in related fields working in Ukraine. The statistician P. Köppen, for example, produced an ethnographic map of European Russia (1851) and studied the physical geography of southern Ukraine and the Crimea. J. Kohl, a German geographer, wrote *Reisen in Südrussland* (1847). Research in geomorphology was conducted mostly by geologists, such as N. Borysiak, K. Feofilaktov, A. Gurov, V. Laskarev, I. Levakovsky, I. Sintsov, N. Sokolov, G. Tanfilev, and P. Tutkovsky. Research in climatology and meteorology was conducted by P. Brounov, O. Klosovsky, B. Sreznevsky, and others. M. Maksymovych studied hydrology. Important contributions were made by the soil scientists V. Dokuchaev and Yu. Vysotsky, and the phytogeographers A. Krasnov, J. Paczoski, and G. Tanfilev. Materials on the geography of Ukraine were published in regional and topographic series, such as *Materialy dlia geografii i statistiki Rossii, \*Trudy etnograficheskoi statisticheskoi ekspeditsii v Zapadno-Russkii kraii* (1872–8), and particularly volumes 2, 7, 9, and 14 of *Rosii: Polnoe geograficheskoe opisaniie nashego otechestva* (1899–1914) edited by V. Semenov, as well as in such reference works as *Geograficheskoi statisticheskii slovar' Rossiiskoi Imperii* (Geographical-Statistical Dictionary of the Russian Empire, 5 vols, 1863–85), and *Słownik geograficzny Królestwa Polskiego i innych krajów słowiańskich* (Geographical Dictionary of the Kingdom of Poland and Other Slavic Countries, 15 vols, 1880–1900). *Die österreichisch-ungarische Monarchie in Wort und Bild*, of which vol 12 (1898) was devoted to Galicia and vol 13 (1899) to Bukovyna, was a useful reference tool to Western Ukraine. In Galicia geographic research was conducted at first by German and (mostly) Polish specialists, such as H. Stupnicki, K. Schmedes, J. Jandaurek, A. Rehman, and E. Romer.

Most scholars before the First World War regarded Ukraine's territories as integral parts of Russia, Poland, or Austria-Hungary; they did not envision Ukraine as a unified whole. The famous French geographer E. Reclus, however, who had been influenced by M. Drahomanov, presented the Ukrainians as a distinct entity in his multi-volume work. The best prewar account of Ukraine's physical geography appeared in G. Tanfilev's four-volume geography of Russia (1916–24).

The beginnings of modern Ukrainian geography date from the first decade of the 20th century and are connected with the scholarly activity of the Mathematics–Natural Science–Medicine Section of the Shevchenko Scientific Society in Lviv and that of S. \*Rudnytsky, the acknowledged father of Ukrainian geography and author of the first geographic works in Ukrainian. During and immediately after the First World War Rudnytsky wrote works mostly on the geomorphology of the Carpathian Mountains and of Podilia; he produced the first study of Ukrainian geographic terminology and prepared the first geographic conspectus of Ukraine's national territories, which also examined the various branches of geography; he made a survey of the ethnogeography and political geography of Ukraine, and prepared the first and only textbook on Ukraine's geography in a foreign language – *Ukraina, Land und Volk* (1916; English transl:

*Ukraine: The Land and Its People*, 1918). The first maps of all of Ukraine's territories were also prepared by him.

In the 1920s the flourishing growth of research on Ukraine's natural world at the All-Ukrainian Academy of Sciences (vUAN) did not embrace geography to any great extent. As before the First World War, geographic research was conducted mostly as a sideline by specialists in related disciplines, particularly in geology. The geologist P. Tutkovsky, for example, produced the first comprehensive description of Ukraine's landforms (1924). Research in economic geography was more advanced: in the 1920s several textbooks on Ukraine's economic geography were written by such specialists as I. Feshchenko-Chopivsky, K. Vobly, O. Sukhov, and P. Fomin. Finally, in 1927 the Ukrainian Scientific Research Institute of Geography and Cartography was established in Kharkiv. Its founders hoped to make it the center of geographic studies in Soviet Ukraine. S. Rudnytsky came from Prague at the invitation of the Soviet government to direct the institute; at the beginning of the 1930s he was also appointed to the newly created chair of geography at vUAN. Associates of the institute included such scholars as M. Dmytriiev, V. Butsura, and K. Dubniak. The institute published two volumes of its journal *Zapysky* and several maps before it was abolished in 1934 and Rudnytsky was exiled for 'propagating nationalism and fascism in geography.' Thus the Stalinist terror resulted in the decline of geography as an independent science.

Except for Kiev and Kharkiv universities, no postsecondary school in Soviet Ukraine in the interwar period had a geography department. (A Geographic Institute was founded in 1917; directed by P. Tutkovsky, it became part of Kiev University in 1919.) As before the First World War, Ukrainian-language works dealing with geography continued to be written mostly by geologists. Contributions on Ukraine's geomorphology were written by R. Virzhykovsky, M. Dmytriiev, H. Zakrevska, V. Krokos, B. Lichkov, and S. Sobolev. V. Herynovych (who was persecuted in the 1930s) and H. Velychko, an urban geographer, researched the human geography of Podilia. Geographic methodology was studied by K. Dubniak. Besides the scholars who were active before the Second World War, L. Danylov, M. Danylevsky, A. Ohiiievsky, Ye. Oppokiv, and others contributed to climatology and hydrology. Research in biogeography was conducted by D. Zerov, Ye. Lavrenko, Yu. Kleopov, O. Fomin, O. Yanata, M. Sharleman, and others. H. Makhiv studied soil science, and he, Tutkovsky, Fomin, and Yanata contributed works on regionalization and in regional studies. Most of these works appeared before the Stalinist suppression of Ukrainian studies and were a significant contribution to the geography of Ukraine.

In interwar Western Ukraine geographical research was conducted in Lviv by Polish scholars, such as E. Romer, A. Zierhoffer, and J. Czyzewski of the Geographic Institute at Lviv University, and by the Geographic Commission of the Shevchenko Scientific Society, which was chaired by V. Kubijovyč, a specialist in the human geography of the Carpathian region and the demography of Ukraine. Yu. Poliansky's geological research, particularly on Podilia, touched on questions of geography. Among the geographers associated with the commission were M. Dolnytsky (who lived and taught in Prague), M. Kulytsky, V. Ohonovsky, S. Pashkevych, O. Stepaniv-Dashkevych, I. Teslia, and I. Fediv.

Since the 1930s geography in the Ukrainian SSR has been subservient to Soviet economic policy, and the political aims and economic programs of the Communist party have directly influenced not only the scientific pursuits of Ukrainian geographers, but also geography as a science. During the Stalin period Soviet geography was severely circumscribed. To legitimize his grandiose economic plans, which demanded extraordinary effort, Stalin proclaimed that it was incorrect to connect the economic laws of development with nature's physical processes. Consequently Soviet geography was divided into two separate systems of science – the physical sciences and the economic sciences (ie, physical geography and economic geography). The division of theoretical work into narrow specialties and the underestimation of the practical value of geography resulted in major blunders in the utilization of natural resources.

N. Khrushchev's economic reforms, which introduced decentralization and regional administration, induced the enthusiastic study of 'economic regionalization, a discussion on integrating the physical and economic aspects of the environment in research, and even the proposal that geography be treated as a unified science. Khrushchev's ambitious plans, however, were questioned by specialists, and to preserve party discipline the concept of geography as a unified science was rejected officially.

After Khrushchev's ouster L. Brezhnev's cautious policies and the party's appeals to make better use of natural resources, to protect the environment, and to plan economic complexes more efficiently obliged physical geographers to focus on the influence of human activity on the natural world, and allowed economic geographers to assess natural environment as an important factor in economic development. The study of labor resources, urban and regional planning, and the interaction between human groups and the environment pointed out the need for an understanding of sociological processes. As a result of the emphasis placed on the social aspects of development in the plans of the CPSU, economic geography was officially renamed socioeconomic geography at the 1980 congress of the Geographical Society of the USSR.

Geography in Soviet Ukraine has developed through similar stages to that in the USSR as a whole. It has not been directed, however, as in Moscow or to some extent in Leningrad, toward the development of theory or a broader range of problems, but toward the republic's internal, practical needs. With the aim of improving agriculture, work has been undertaken in the study of natural-territorial complexes, the production of large-scale soil maps, the assessment of soils and the compilation of a land cadastre, the testing of countermeasures against soil erosion, waterlogging, droughts, and hot, dry wind action, studies of the thermal and water regime of Ukraine, particularly in areas of agricultural irrigation, the introduction of agroclimatic regionalization, and the assessment of natural resources. To meet the demands of industry and economic development in general, work on economic regionalization and research on territorial production complexes, on the geography of separate branches of the economy, and on human and urban geography by research institutes, planning institutes, and university geography departments has been promoted.

The Stalinist terror decimated the number of geographers in Ukraine, and new specialists were trained only after the Second World War, when geography chairs

were established at many higher educational institutions and geography faculties were created at Kiev, Kharkiv, Lviv, Odessa, Chernivtsi, and Symferopol universities. Because of the shortage of Ukrainian geographers, many graduates of Moscow University received teaching appointments in Ukraine. Later, candidates of geographic sciences from Kiev University were hired by the faculties of some universities, by pedagogical and economic institutes, and by research agencies in Ukraine.

Geographic research has been conducted not only at the universities, but also by the Ukrainian Geological Committee (est 1918), the Ukrainian Geodetic Administration (est 1919), the Ukrainian Hydrometeorological Service (est 1921), the Ukrainian Hydrometeorological Institute (est 1953), the Council (previously Commission) for the Study of the Productive Resources of the Ukrainian SSR (est 1934), the AN USSR institutes of Economics, Geological Sciences, Botany, Zoology, Hydrobiology, the Biology of Southern Seas, Marine Hydrophysics, and Geophysics, and such Ukrainian planning and research institutes as the Institute of Soil Science and Agrochemistry, the Institute of City Planning, the Institute of Water Management Construction, the Institute of Land Regulation, and the Institute of the Coal, Ore, Petroleum, and Gas Industries. The Sector of Geography was established in 1964 at the AN USSR Institute of Geological Sciences; since 1982 it has been a section of the Institute of Marine Hydrophysics. Its six departments have adopted a multifaceted research program, but an authoritative institute of geography like the one that existed in Kharkiv from 1927 to 1934 has not been re-established.

The Geographic Society of the USSR, which superseded the Imperial Russian Geographic Society, co-ordinated and popularized geographic research in the Soviet Union. In 1947 it established a branch in Kiev, with 27 city and oblast departments. In 1959 this branch was named the Ukrainian Geographic Society; in 1964 it was renamed the \*Geographic Society of the Ukrainian SSR.

From 1935 to 1953 geographic works published in Soviet Ukraine had small pressruns and were written almost without exception in Russian. After Stalin's death the number of Ukrainian-language publications increased, and new periodicals, monographs, and atlases appeared. Monograph publications in the physical and biological branches of geography have been more numerous and of a better quality than those in the human and social branches. Many good monographs and textbooks in geomorphology, in particular, have been written by such scholars as V. Bondarchuk, K. Herenchuk, A. Lanko, O. Marynych, P. Tsys, and M. Veklych. Many monographs in \*climatology, hydrography, soil science, and phytogeography have also appeared. The first volumes in a series of attractive, well-researched monographs on the natural environment of Ukraine's oblasts have been published under the general editorship of O. Marynych in Kiev and K. Herenchuk in Lviv. *Ukraina i Moldaviia* (Ukraine and Moldavia, 1972), edited by O. Marynych and M. Palamarchuk, is a solid contribution to the all-Union series *Prirodnye usloviia i estestvennye resursy SSSR* (The Natural Conditions and Natural Resources of the USSR).

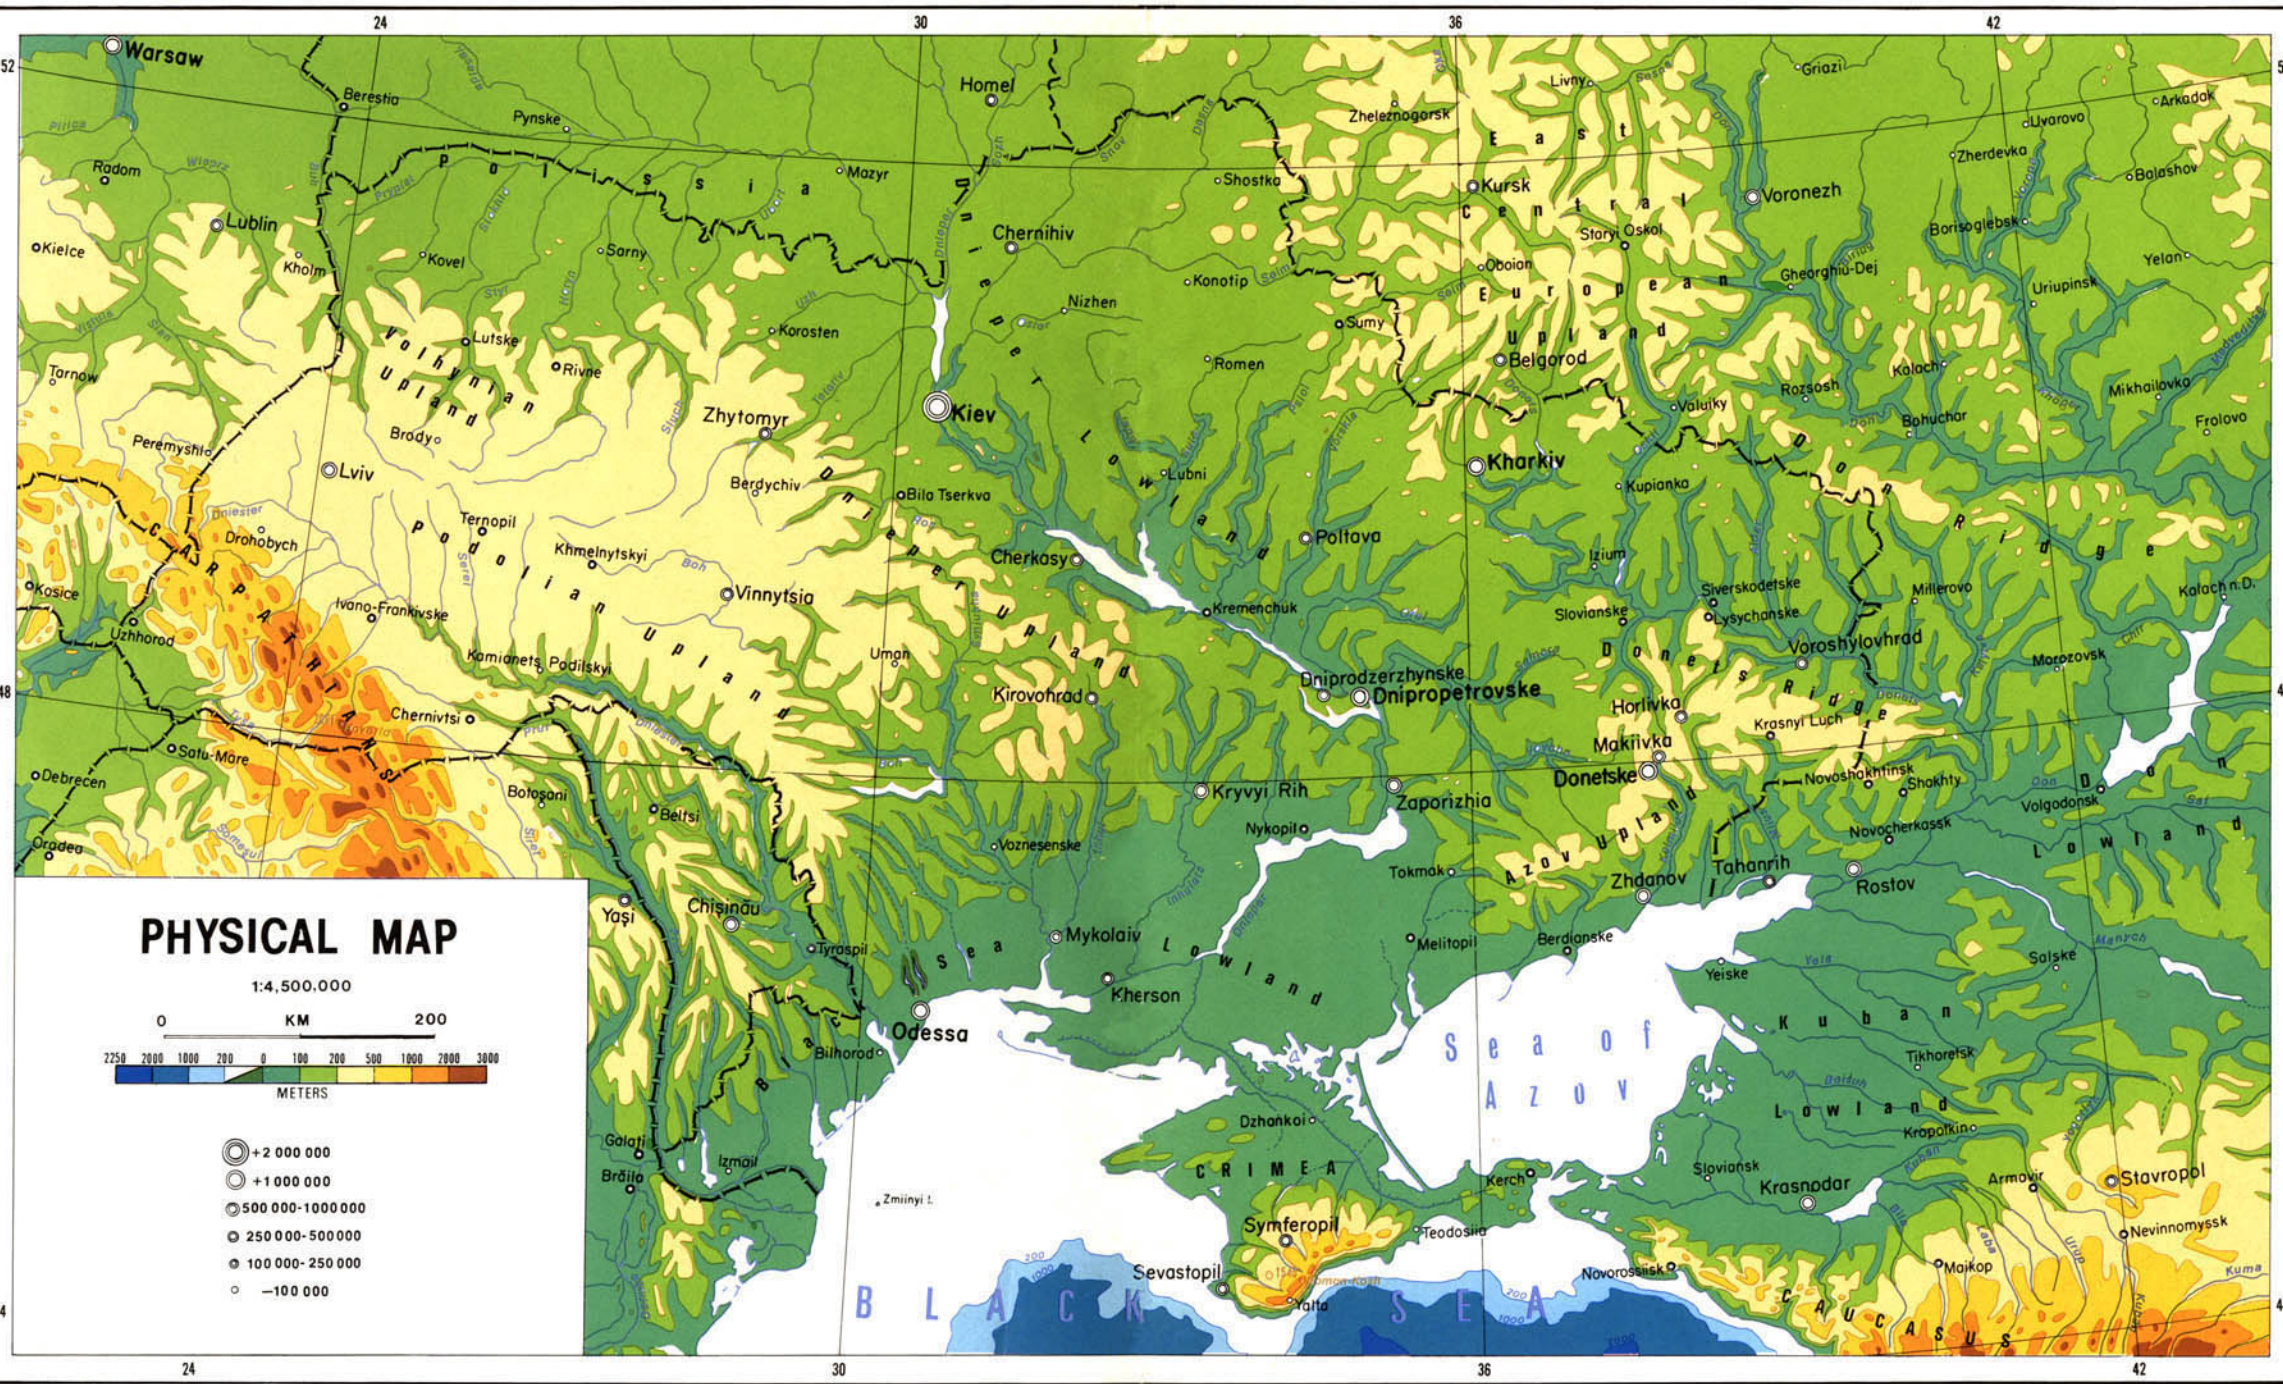

Human geography in Soviet Ukraine has been dominated by economic geography, and most textbooks have been surveys of physical and economic geography. They include O. Dibrova's *Heohrafiia Ukrain's'koi RSR* (Geog-

raphy of the Ukrainian SSR, 1954, 2nd edn 1958), and a recent text with the same title edited by M. Pistun and Ye. Shypovych (1982). M. Palamarchuk's *Ekonomichna heohrafiia Ukrain's'koi RSR* (Economic Geography of the Ukrainian SSR, 1975) is used as a handbook by teachers. The large work published by the AN USSR Institute of Economics, *Narysy ekonomichnoi heohrafiï URSS* (Studies of the Economic Geography of the Ukrainian SSR, 2 vols, 1949, 1952), has not yet been surpassed by any other publications, including the two all-Union series, each of which has two volumes devoted to Ukraine (Moscow 1957-8 and 1969). Most monographs in economic geography, by such authors as O. Davydenko, H. Hradov, I. Mukomel, M. Palamarchuk, Ye. Pitiurenko, V. Popovkin, and F. Zastavny, are devoted mostly to the development of economic regions, territorial specialization, industrial complexes, or urban systems.

Human geography, in which ethnographic, sociological, historical, and political factors play an important role, does not exist in the USSR. Research on the history of population shifts and migration, particularly in southern Ukraine, has been conducted by demographers or historians, such as E. Druzhinina, V. Kabuzan, and H. Makhnova. Similarly, ethnographers, and not geographers, study regional and ethnic traits, interethnic relations, and the interrelationship between ethnicity and the natural environment. Only a few monographs have been published on these subjects, several of them by V. Naulko.

Geographic periodicals reflect the skewed and fragmented state of geography in Soviet Ukraine. Until 1956 articles on physical geography dominated in university serial publications. Since then research in other areas has developed, particularly in economic geography. The Ukrainian Branch of the Geographic Society began publishing *Heohrafichnyi zbirnyk* in 1956, and its Lviv, Kharkiv, Crimea, Chernivtsi, Dnipropetrovske, and Melitopol departments have published their own series and bulletins in Ukrainian or Russian. Several important serial publications and interagency series have appeared: Kiev University's *Naukovi zapysky Kyïvs'koho universytetu: Trudy heohrafichnoho fakul'tetu* (1950-), *Visnyk Kyïvs'koho universytetu: Seriiia heolohii ta heohrafiï* (1958-), *Rozmishchennia produktyvnykh syl Ukrain's'koi RSR: Mizhvidomchyi naukovyi zbirnyk* (1964-), and *Ekonomichna heohrafiia: Mizhvidomchyi naukovyi zbirnyk* (1966-); Lviv University's *Visnyk L'viv's'koho universytetu: Seriiia heohrafichna* (1962-); Kharkiv University's *Ekonomicheskaiia geografiia: Respublikanskii mezhvedomstvennyi nauchnyi sbornik* (1964-); *Heohrafichni doslidzhennia na Ukraini* (1969-), published jointly by the AN USSR and the Geographic Society; *Demohrafichni doslidzhennia: Respublikansk'kyi mizhvidomchyi naukovyi zbirnyk* (1970-) of the AN USSR Institute of Economics; *Fizychna heohrafiia ta heomorfolohiia: Mizhvidomchyi naukovyi zbirnyk* (1970-); *Ukrain's'kyi istoriko-heohrafichnyi zbirnyk* (1971-) of the AN USSR Institute of History; and *Problemy heohrafichnoi nauky v Ukrain's'kii RSR* (1972-) of the AN USSR Sector of Geography. Geographic serials have not flourished, however. After a few years many have been discontinued, while the leading interagency collections *Ekonomichna heohrafiia* and *Fizychna heohrafiia i heomorfolohiia* have been published, like *Geodeziia, kartografiia i aerofotos'emka: Respublikanskii mezhvedomstvennyi nauchnotekhnicheskii sbornik* (1964), in Russian since 1977.

**Geography of Ukraine, physical.** From a geographical viewpoint Ukraine consists not only of the Ukrainian SSR but also of the adjacent lands inhabited predominantly by Ukrainians (see national and ethnic \*territory). It lies between 44°30' and 52°50' north latitude and between 20°30' and 42°00' east longitude, and extends from the Tysa River, the mouth of the Danube, the Black Sea, and the Caucasus Mountains in the south to Narev River, the swamps of Polisia, and the upper reaches of the Desna River in the north; and from the Poprad, Sian, and Vepr rivers and the Bilovezha Forest in the west to the semideserts between the Don River and the Caspian Sea in the east.

Ukraine is one of the natural regions of Eastern Europe. It differs from neighboring regions by a series of gradations without any sharp breaks. From the standpoint of geology (see \*Geology of Ukraine), the core of the natural region consists of the Ukrainian Shield. Occupying the southwestern part of the East European Platform, Ukraine serves as a transition to the Mediterranean Geosyncline in the south. The Ukrainian part underwent greater and more recent tectonic disturbance than the rest of the East European Platform. The southern frame of Ukraine consists of the Carpathian-Crimean-Caucasian Folded Zone; its northern and northeastern frame, of the Don-Dnieper Aulacogen; its western frame, of the Lviv Trough and the Lviv-Lublin Depression; and its eastern frame, which merges with the Voronezh Crystalline Massif in the north and the Black Sea-Caspian Sea Divide in the south, of the Azov-Kuban Depression.

The relief is superimposed on this geological framework. It consists mostly of flat to gently rolling lowland, a legacy of the long period of stability of the East European Platform. Since mountains rising above 1,000 m occupy only 1.5 percent of Ukrainian territory, the mean elevation for Ukraine is 207 m.

Ukraine's relief is characterized by parallel, non-continuous belts of mountains, depressions, uplands, and lowlands that extend from west to east. Five belts may be distinguished: (1) the belt of folded mountains in the south consisting of the Carpathian, Crimean, and Caucasus mountains, which is bounded in the south by the Tysa Lowland and the Black Sea Depression, while the mountain ranges are separated from each other by the Moldavian Plain, the Black Sea, and the narrow Kerch Strait; (2) the belt of submontane and southern depressions lying north of the mountains and consisting of the Sian, Dniester (Subcarpathia), Black Sea, Azov, Lower-Don, and Kuban lowlands; (3) the compact belt of uplands north of the depressions, extending from the upper

Vistula River in the west to the Donets River in the east, and consisting of the Roztochia, Opilia, Volhynia-Kholm, Podilia, Pokutia-Bessarabia, and Dnieper uplands, the Zaporozhian and Donets ridges, and the Azov Upland; (4) the belt of northern lowlands, which includes Podlachia and the Polisia, Chernihiv, Dnieper, and Donets lowlands; and (5) the separate system in the northeast consisting of the southern spurs of the Central (East European Central or Central Russian) Upland and of the Don Lowland, both of which have a meridional orientation.

The drainage system, which cuts across the relief belts, unifies Ukraine in the north-south direction. Most of the rivers flow into the Black and Azov seas. The drainage basins of the Dniester, Boh, and Kuban lie entirely within Ukrainian territory, as does most of the Dnieper and some of the Don Basin. Only the upper reaches of the Buh, Sian, and other tributaries of the Vistula, which flows into the Baltic Sea, lie within Ukraine.

Fluvial processes (erosion, transportation, and deposition of materials by water) were the chief agents that shaped Ukraine's landforms. As is evident from the substantial deposits of loess throughout Ukraine, except for Polisia and mountain slopes, Ukraine remained beyond the reach of the continental ice sheet during the Pleistocene glaciation. It was only in the Riss (or Dnieper) stage, when glaciation was at its height, that the ice cap covered Polisia and sent lobes down the Dnieper and Don lowlands. The continental ice sheet was a formidable source of meltwater that left huge ravines and valleys as it flowed south.

Glaciation left a distinct imprint on the landforms only in northwestern Ukraine. On territory that was covered by or adjacent to the ice sheet three types of landforms emerged: (1) ground moraine, which formed under the ice; (2) terminal moraine, which formed at the edge of the ice; and (3) outwash plain, formed by braided streams of meltwater extending well beyond the ice sheet. Ground moraine landforms are most common in Polisia and less so in the Desna Basin. In the Dnieper Lowland southeast of Kiev they are covered by a veneer of loess. Terminal moraine deposits are limited to northwestern Ukraine: to the region near Lake Svytiaz north of Kovel, and to a gentle arc from Verkhly through Volodymyrets and Vysotske. Outwash plains are found in the northern part of the Chernihiv Lowland, the southern part of Polisia, interspersed among the moraines of Polisia and Podlachia, and in the western part of Subcarpathia. They were formed by meltwaters from the continental ice sheet northwest of them and from mountain glaciers in the Carpathians. Drying winds caused erosion of the light-textured surface and formed sand dunes, many of which are anchored by vegetation.

Aeolian processes were particularly intensive during the glacial stages of the Pleistocene, when strong, dry winds removed fine particles from the bare periglacial surfaces and deposited them further south in sheltered valleys or in areas with more substantial vegetation. Thus loess accumulated throughout most of Ukraine. The deepest deposits (25-50 m) were left on the oldest uplands and on high river terraces that were least prone to erosion. Wind and water continued to modify the loess layer. In the Black Sea and Kuban lowlands, where the climate is drier and hot, dry winds are common, some of the shallow depressions or \*pody were formed probably by the wind.

Fluvial processes are still the dominant relief-shaping force. In the mountains swift streams cut deep valleys, undermine slopes causing slides, and in flood carry coarse sediment downstream. Traces of ice erosion such as U-shaped valleys, cirques, and horns can be found only at the higher elevations of the Carpathian and Crimean mountains, and in the Caucasus (where glaciers still exist). Little remains of the terminal moraines, many of which were removed or modified by the fluvial processes. The highest uplands are deeply incised by rivers and streams. Even lower uplands, which are covered with loess, are susceptible to erosion that forms gullies and ravines. In the lowlands, water erosion is negligible and deposition prevails. Slow-flowing rivers form braided streams with many islands.

\*Climate, which includes the forces of erosion and affects the development of \*soils, \*flora, and \*fauna, is a major landscape-forming factor. The climate of Ukraine is temperate, cool, and semicontinental. It differs considerably from that of adjacent regions (the Central European climate of Poland, the East European continental climate of the Moscow region, and the subarid climate of the Caspian Lowland), and constitutes a transitional stage to the Mediterranean climate.

Precipitation and temperature vary inversely in Ukraine. A moisture surplus (compared to the amount necessary for secure crop production) is encountered only in the Carpathians and at the higher elevations of the Caucasus and Crimean mountains. In low-lying areas moisture decreases from north to south: northwestern and northern Ukraine receive an adequate amount; central Ukraine, a varying amount; and south-central Ukraine, the Donets Upland, and the Kuban Lowland, an inadequate amount. Dry conditions prevail in the northern Crimea, the Black Sea Lowland, the Donets Lowland, and the Lower-Don Lowland.

The zonation of moisture balance is reflected in the zonation of soils, natural vegetation (before it was cleared for farming), and wildlife. In northern and northwestern Ukraine gray, acid podzol soils developed on sandy fluvio-glacial deposits under a canopy of coniferous and mixed forests that provide a habitat for a fauna common to the Central European forests. The zone of unstable moisture conditions was conducive to the development, on a loess base, of gray forest soils under broadleaf groves (usually at higher elevations), typical chernozems under meadow steppe, and degraded chernozems under forests that had replaced meadows. Forest and grassland fauna intermingled in this transitional zone of forest-steppe. In the zone of moisture deficiency to the south of the forest-steppe a complex of common chernozems developed on a loess base and under a grassy meadow steppe. The dry Black Sea Lowland was covered with a narrow-leaved grassy steppe, which is associated with southern chernozems and chestnut soils. The fauna of both steppe zones was the typical fauna of the temperate grassland biome.

While moisture balance serves as the major controlling factor in the latitudinal zonation of soils, flora, and fauna, the increasing severity of winters from west to east limits the longitudinal distribution of plants, particularly of broadleaf tree species. Thus the English yew is limited to the westernmost extreme of Ukraine, the hornbeam does not grow beyond the Poltava-Homel line in the east, and Ukraine's border region in the Lower-Don Lowland,

with its severe winter and shallow snow cover, marks the eastern limit of winter wheat. The increasing continentality of the climate towards the east, including the depth of ground freezing, results in corresponding modifications of the soil.

Mountains are characterized by a vertical zonation of climate, soils, vegetation, and fauna. Most species of the fauna inhabiting the \*Carpathian Mountains are common to the middle-European forests; those in the \*Crimean Mountains, a mixture of Mediterranean and endemic species; and those in the Caucasus, a mixture of species from Asia and Europe.

From the standpoint of climate, flora, and fauna, Ukraine is unique. It is the only country in Europe with a predominantly meadow natural vegetation (associated with the forest-steppe and the adjacent meadow steppe) that merges gradually with the forest vegetation in the northwest, the steppe vegetation in the south and east, and the Mediterranean vegetation on the Black Sea shore. (See also \*Forest belt, \*Forest-steppe, \*Regions of Ukraine, \*Rivers, \*Steppe, and \*Water resources.)

*Geologicheskii zhurnal* (Geological Journal). Scientific bimonthly published in Kiev by the AN USSR Division of Earth Sciences and the Ministry of Geology of the Ukrainian SSR. It first appeared in 1932 under the title *Zhurnal heoloho-heohrafichnoho tsyklu*. In 1934 it continued under the title *Heolohichnyi zhurnal*, published by the AN USSR Institute of Geological Sciences. Its frequency was increased in 1958 from four to six issues per year. In 1963 the Division of Earth Sciences and the Ministry of Geology assumed responsibility for it. Since 1978 the journal has appeared only in Russian under the present title.

**Geology.** A science dealing with the structure, composition, and history of the earth's crust. Its major divisions are structural geology (the study of rock geometry and deformation); petrology, mineralogy, crystallography, and geochemistry (dealing with the physical and chemical properties of rock); geotectonics (the study of the structure and movement of the earth's crust); historical geology (the study of the historical origins of the earth's crust and its surface); stratigraphy (the study of rock layers and their formation); paleontology (the study of fossils); economic geology (the study of deposits of useful minerals); hydrogeology (the study of ground-

water); engineering geology (the study of geological factors affecting man-made structures); and geophysics (the study of the physical parameters of earth). Because its results are of great economic importance, geological research and the preparation of geological maps often are undertaken by special state institutes. The emergence of geology as a science dates back to the second half of the 18th century.

The first geological explorations in Ukraine were conducted after the 1750s by the Russian Academy of Sciences. The researchers (P. Pallas, S. Gmelin, J. Gldenstdt, and J. Georgi), who were of German origin, studied various aspects of Southern Ukraine, the Crimea, and Caucasia. Beginning in the 1820s, the development of geology and a realization of its practical importance led to the undertaking of more precise surveys. In the 1830s the first detailed descriptions and geological maps of the Donets Basin were made by E. Kovalevsky, O. Ivanytsky, A. Oliveri, and by the expedition organized by A. Demidov. The first geological maps of Ukrainian territories included those of G. Gelmersen (1841), R. Murchison (1845), and A. Meindorf (1849).

Until 1834 geological research in the Russian Empire was overseen by the Department of Mining and Salt Affairs, then by the General Staff of the Corps of Mining Engineers, and from 1882 by the Geological Committee in St Petersburg, which stressed particularly the development of geological cartography. Departments of geology, including mineralogy and petrology, were established at Kharkiv (under I. Levakovsky), Kiev (under K. Feofilaktov), and Odessa universities, and then at the Mining Institute in Katerynoslav. In the second half of the 19th century, also engaged in geological research were N. Borysiak, O. Hurov, I. Levakovsky, N. Krishtafovich, M. Klemm, and P. Piatnytsky in Kharkiv; M. Andrusiv, P. Armashevsky, V. Luchytsky, and N. Shmalhauzen in Kiev; I. Syntsov and V. Laskarev in Odessa; and N. Lebedev in Katerynoslav. In addition members of the St Petersburg Geological Committee, such as N. Barbot de Marni, conducted geological research in Ukraine in the 1860s, as did N. Sokolov and L. Lutugin in the 1880s. In the 1880s geological surveys and in the 1890s the preparation of the 10-verst geological map of European Russia stimulated research. Studies on Ukraine's geology were published by the universities and the Geological Committee (in its *Trudy*, *Izvestiia*, and *Materialy*). In the 1860s the serial *Sbornik materialov, ot-nosiashchikhsia k geologii luzhnoi Rossii* began to appear in Kharkiv.

Before 1917 the geology of central and eastern Ukraine was studied more than that of any other part of the Russian Empire. This was mostly a result of the need to assess the mineral resources of the Donets Basin, the Kryvyi Rih Iron-Ore Basin, and the Nykopol Manganese Basin. Some prominent geologists who worked in Ukraine, and their areas of specialization, were F. Chernyshev, N. Borysiak, N. Yakovlev, and L. Lutugin (Donets Basin), K. Feofilaktov (Poltava and Kiev regions), P. Piatnytsky (Kryvyi Rih Basin), V. Laskarev (Southern Ukraine, Ukrainian Shield, Volhynia), N. Sokolov (Lower Triassic deposits in Southern Ukraine), I. Levakovsky, O. Hurov (Left-Bank Ukraine, Donets Basin), M. Andrusiv (Neogene deposits), P. Armashevsky (Left-Bank Ukraine), A. Mikhalsky (Podilia), P. Tutkovsky (Volhynia and Polisia), and Ye. Oppokiv (Polisia). V. Dokuchaev studied

the Quaternary deposits of Southern Ukraine and A. Karpinsky worked on the tectonics of Ukraine in the context of Eastern Europe.

In Western Ukraine geological research was conducted first by official institutions: the Geological Institute in Vienna, and later the Polish Academy of Sciences in Cracow (1873-). From 1887 to 1911 the academy's Physiographic Commission published a major geological atlas of Galicia (1:75,000) with an explanatory text. In Lviv the Polish Copernicus Society of Naturalists published geological research in its periodical *Kosmos*. Geology was taught at Lviv University and then at the Lviv Polytechnic. Some research was begun at the Mathematical-Scientific-Medical Section of the Shevchenko Scientific Society. Noted specialists in the geology of Western Ukraine included V. Uhlig and R. Tietze (Carpathian Mountains), J. Siemiradzki and W. Teisseyre of Lviv University, J. Niedzwiedzki of the Lviv Polytechnic, R. Zuber, A. Alth, F. Bieniasz, W. Łoziński, and M. Łomnicki.

After the First World War geological research in Ukrainian territory under Polish rule was directed by the State Geological Institute, which had a branch in Galicia - the Boryslav Station for Petroleum Prospecting. Among Polish geologists who studied Ukrainian lands were K. Tołwiński (map of the eastern Carpathian Mountains, 1:200,000), B. Świdorski, H. Teisseyre, and W. Rogala (mostly the eastern Carpathians). Ukrainian geologists such as Yu. Poliansky (loess in Podilia, diluvium in Polisia), S. Pasternak (mineralogy), and I. Oleksyshyn (Miocene in Podilia) were associates of the Shevchenko Scientific Society.

In Transcarpathia geological research was overseen by the Czechoslovak Geological Institute. S. Rudnytsky, a Ukrainian geographer, made some contributions to geology.

In Soviet Ukraine geology developed rapidly in the 1920s. Most of the research was concentrated in the VUAN, whose first president was the renowned mineralogist V. Vernadsky. Within the academy's physical-mathematical division a chair of geology, a geology cabinet, a geology section, and the Commission for the Study of the Natural Resources of Ukraine were established. All of these bodies were directed by P. Tutkovsky. The geology section published its own periodical, *Ukrains'ki heolohichni visti*. In 1917 a group of scholars led by V. Luchytsky and B. Lichkov organized in Kiev the Ukrainian Geological Committee, on the model of the St Petersburg Geological Committee. In 1922 the committee was reconstituted as an autonomous branch of the latter committee. It published the journal *Visnyk*. The main task of the committee was to carry out geological surveys and to assess the mineral resources of Ukraine.

In 1926 the Geological Institute was established to coordinate the work of the various VUAN bodies, as well as several government-sponsored research centers. Directed by P. Tutkovsky, and then by V. Riznychenko, the institute published the journal *Trudy* (5 vols, 1928-34). Geologists who worked in the above-mentioned institutions included V. Krokos, Ye. Oppokiv, M. Bezborodko (Ukrainian Shield), V. Chyrvynsky, H. Zakrevska, R. Virzhikovsky (Podilia), O. Kaptarenko-Chernousova, and M. Melnyk. Geological work was conducted also in postsecondary schools and scientific institutes in Kharkiv, Odessa, Dnipropetrovske, Mykolaiv, and Kamianets-Podilskyi. Geologists working in Ukraine published

their studies, mostly regional geologies, in Ukrainian, usually in the publications of the VUAN. P. Tutkovsky and F. Polonsky compiled the first Ukrainian geological dictionary.

During the 1930s, as the Academy of Sciences was reorganized, geology in Ukraine regressed. The geological institutions in Kiev were reorganized into the AN USSR \*Institute of Geological Sciences and geological research was restricted to areas of immediate use – mineral prospecting, hydrogeology, and engineering geology. At the same time, Russian replaced Ukrainian as the primary language of the discipline in Ukraine. In 1929 the Geological Committee was transformed into a branch of the Chief Geological Surveys Administration, which was responsible to the USSR Supreme Council of the National Economy. This body assumed responsibility for most geological exploration in Ukraine. Later this role was assumed by the Committee for Geological Affairs at the USSR Council of People's Commissars, and since 1946 by the USSR Ministry of Geology, which was renamed in 1953 the Ministry of Geology and the Conservation of Mineral Resources. Some research was carried out by the Ukrainian branches of all-Union research institutions under the ministries of the petroleum industry, coal industry, and heavy industry.

Geological surveying, particularly of mining regions, developed rapidly. The entire Ukrainian SSR was mapped on the scale of 1:420,000 and then 1:200,000. Maps of the Donets, Kryvyi Rih, and Nykopol basins, and the Carpathian Mountains were prepared on the scales of 1:42,000, 1:50,000, 1:25,000, and even larger.

Geology chairs and departments were established at universities, polytechnics, and mining and agricultural institutes to train professional geologists. In the 1930s the largest geological institute was the Institute of Geological Prospecting in Kiev, which in 1935 had an enrollment of 1,159 and a faculty of 62. The universities published many geological collections, mostly in Russian.

In the interwar period chairs of geology and mineralogy were established at the Ukrainian Free University in Prague and at the Ukrainian Husbandry Academy in Poděbrady. The faculty included such émigré Ukrainian geologists as F. Shvets, O. Orlov, and A. Cherniavsky.

After the war Kiev, Lviv, and Kharkiv became the main centers for geological research. Geological exploration was placed under one state organization, which in 1965 became the Ministry of Geology of the Ukrainian SSR. Continuous prospecting by its 12 geological and geophysical trusts has led to higher estimates of coal reserves in the Donbas and iron-ore reserves in the Kryvyi Rih Basin, and to the discovery of coal, gas, petroleum, iron ore, magnesium, titanium, and other useful minerals. Seven specialized geological research institutes and the geological faculties at institutions of higher learning have also increased knowledge of the geology of Ukraine. But most research is conducted at such institutes of the AN USSR as the Institute of Geological Sciences, the \*Institute of the Geochemistry and Physics of Minerals, the \*Institute of Geophysics, the Institute of the \*Geology and Geochemistry of Combustible Minerals, and the \*Marine Hydrophysical Institute.

Except for such work as that of I. Chebanenko, who proposed a theory of the earth's geological development, most research has been oriented to the practical goals of the five-year plans. The need to expand petroleum and

natural-gas reserves prompted research on new types of structures containing hydrocarbons, on methods of prognosis (V. Havrysh), on the distribution of these structures in the Dnieper-Donets Depression and the Black Sea Shelf (H. Dolenko), on seismic detection techniques, and on methods of extraction. Similarly, the need for rare ferrous and non-ferrous metals sparked considerable research on the structure of the Ukrainian Shield (V. Bondarchuk, Yu. Dovhal, G. Kaliaev, and O. Slenzak) and on ore-forming processes. Some research on earthquake prediction, explosion prevention in mines, and groundwater utilization has also been done. Complex geological studies of regions have been very common. Geologists who began making scholarly contributions to the geology of Ukraine after the war include V. Bondarchuk (Polisia, Dnieper-Donets Depression, Carpathian Mountains); M. Bezborodko, L. Lunhershauzen, K. Makov, M. Mirchynk, K. Novyk, N. Pimenova, V. Selsky, and M. Svitalsky; M. Semenenko, and D. Soboliev (Ukrainian Shield); P. Stepanov (Donets Basin); L. Tkachuk (Carpathian Mountains); O. Kaptarenko-Chernousova; and N. Shatsky. Almost all of them contributed to regional geology. More recent researchers of the geology of Ukraine are M. Balukhovskiy (Dnieper-Donets Depression); A. Drannik (Ovruch Ridge); B. Hurevych (Moldavian Platform); V. Kaliuzhny (deep rock mineral-bearing fluids); V. Khomenko (Transcarpathian Depression); D. Khrushchov (salt deposits in the Carpathian Foredeep); V. Kityk (salt tectonics of the Dnieper-Donets Depression); I. Maidanovych (Donbas); B. Merlych (hydrology of Transcarpathia); M. Muratov and V. Pchelintsev (the Crimea); O. Petrichenko (salt deposits of the Carpathian Foredeep); O. Vialov (tectonics of the Carpathians and stratigraphy of the Volhynia-Podilia Platform); and A. Radzivill, P. Bukatchuk, Ye. Lazarenko, and B. Volovnyk (Volhynia-Podilia Platform).

Until the mid-1960s many geological publications appeared in Ukrainian. Two landmark reference works were published – V. Bondarchuk's *Heolohiia Ukrainy* (Geology of Ukraine, 1959) and *Atlas paleoheohrafichnykh kart Ukrain's'koi i Moldav's'koi RSR* (Atlas of Paleogeographic Maps of the Ukrainian SSR and Moldavian SSR, 1960). A major series, *Stratyhrafiiia USSR*, was started in 1963, but the 11 planned volumes were never completed. Since 1963 no comparable major work on Ukraine has been undertaken, and technical literature has been published almost exclusively in Russian. Even *Heolohichnyi zhurnal*, the AN USSR geological periodical from 1934, changed from Ukrainian to Russian in 1978.

**Geology of Ukraine.** The geological framework of Ukraine consists of two major regions: (1) the southwestern part of the Precambrian East European Platform (centered on the Ukrainian Shield) with adjoining fragments of the Hercynian Platform, and (2) the Carpathian-Crimean-Caucasian Folded Zone, which is part of the Mediterranean Geosyncline. The first represents a portion of the ancestral European landmass that has displayed no tectonism since the end of the Paleozoic Era some 570 million years ago. Previously, in the Archean and Proterozoic eras this area was so intensively folded and subjected to magmatic intrusions that it became very rigid and resistant to subsequent orogenic movement. This craton, however, experienced epeirogenic movements, consisting of broad, reversible, and slow uplift, and subsidence. The former exposed the surface to erosion; the latter, accompanied by submergence, led to the accumulation of sediments that covered the Precambrian rocks to various depths.

The Ukrainian Shield (I) forms the central core of the platform part of Ukraine. It extends in crescent form from Polisia south and southeastward to the vicinity of the coast of the Sea of Azov. Covered by a thin (5–15 m) veneer of Quaternary deposits, these intensively folded Precambrian metamorphic, intrusive, and extrusive rocks are exposed by streams and rivers in an area that, since the Proterozoic Era, has experienced differential uplift.

By contrast, the surrounding parts of the platform experienced various degrees of relative subsidence, downwarping, and accumulation of sedimentary deposits. To the west, southwest, and south the Precambrian rocks lie 1–3 km below the surface of the Volhynia-Podilia Platform (XII), the Bessarabian Platform (XIV), and the Black Sea Platform, whose basement slopes southward towards the Black Sea Depression (XV). West of the Volhynia-Podilia Platform, the Precambrian basement dips below the Lviv Trough (XI) to 6–7 km and continues northwestward under the Lviv-Lublin Depression (VIII). To the north and northeast the Precambrian basement lies 1 km below the Pynske Trough (XIII) and, except for the Chernihiv Arch (IV), again drops precipitously towards the northeast to as much as 10–12 km below the surface of the Dnieper-Donets Trough (V), and then re-emerges to the northeast as the Voronezh Crystalline Massif (II). Southeast of the Dnieper-Donets Trough Hercynian tectonic activity becomes evident in the Donets Suborogen (VI) and even more so in the folded structure of the Donets Basin (VII). Because this chain of troughs, extending from the Donets Basin to the Prypiat Trough, underwent some folding like a geosyncline but then again became part of the East European Platform, it is considered transitional and was called an 'aulacogen' by N. Shatsky.

The Carpathian-Crimean-Caucasian Folded Zone belongs to the Alpine mountain-building phase of the Tertiary Period. However, it contains rocks that reveal older tectonic activity, such as the early-to-mid-Paleozoic Caledonian orogeny, and touches the remaining fragments of the Hercynian Platform, which are also part of the

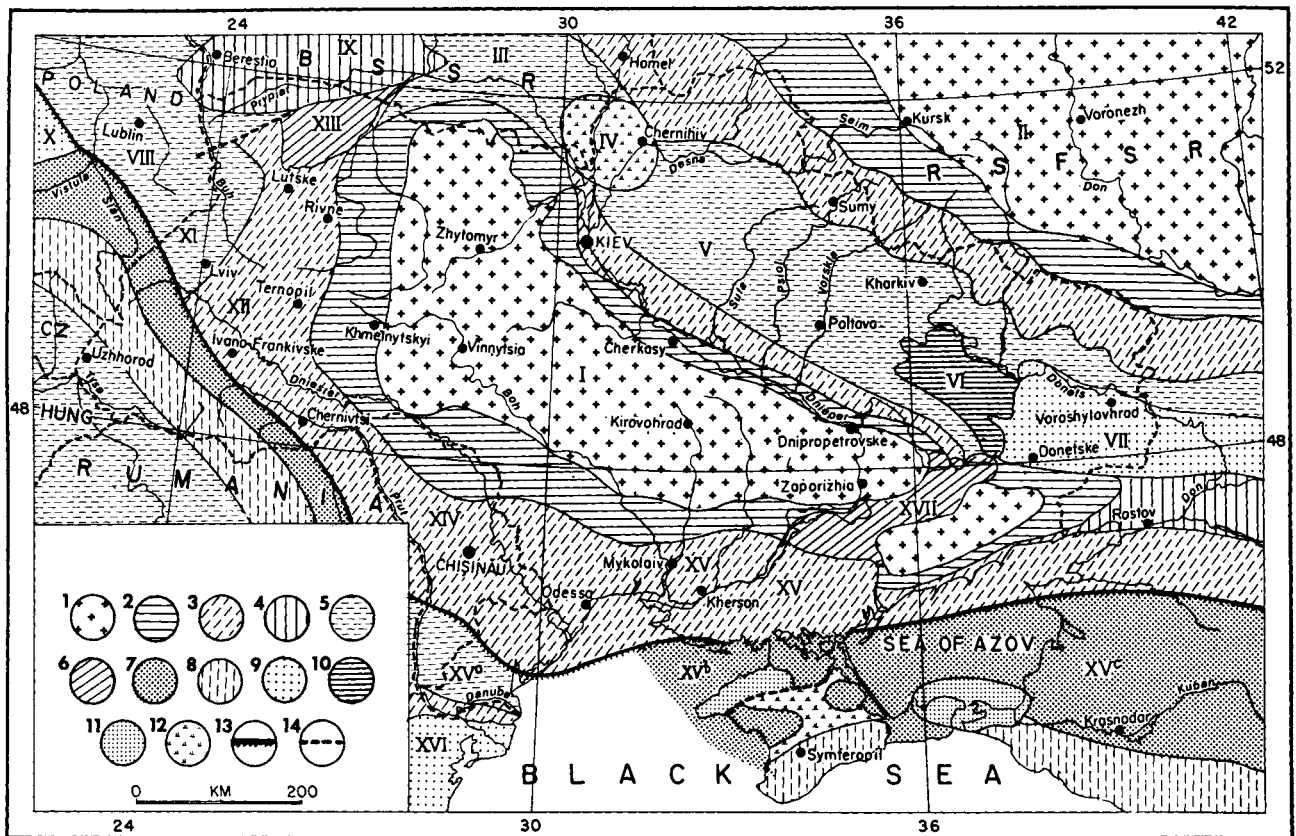

Mediterranean Geosyncline. The main components of this zone are the intensively folded and raised structures of the Carpathian, Crimean, and Caucasus mountains. They are bounded to the northeast and the north by their respective foredeeps, including the Carpathian Fore-deep, the Moldavian Depression (XVA), the Karkinitzka Trough (XVB), and the Azov-Kuban Depression (XVC). At both the northwestern and the southeastern ends the Carpathians and their foredeeps are offset by two Hercynian orogens – the Kielce-Sandomierz Ridge (X) in Poland and the Dobrudja orogen (XVI) south of the Danube. Remnants of Hercynian orogens also make up the Scythian Platform, which manifests itself as the central part of the Crimea and, east of the Sea of Azov, the Azov-Kuban Depression and the Stavropil Uplift.

**Geological history.** The oldest deposits that form the foundation of the East European Platform occur at shallow depths only within the Ukrainian Shield. Their intensive exploration and study has revealed a complex history that is not yet fully understood. The Ukrainian Shield rocks, dating from 750 to 3,650 million years ago, are mostly metamorphic in origin consisting of gneisses, migmatites, and metabasites. Less than 10 percent of them are magmatic rocks, among which granitoids predominate.

*Archean.* In the history of the formation of the Ukrainian Shield several successive geosynclinal and platform stages are distinguished. Extensive volcanic processes and the accumulation of very thick sedimentary effusive deposits characterize the earliest recorded stages of the Archean Era. Subsequent folding, intrusive magmatism, and metamorphism produced the strata of gneiss and migmatite, which are oriented mainly in the northwesterly direction. Three complexes are distinguished in this series: the Dnieper complex (gneisses, amphibolites, and migmatites separated by intrusions of granite in the central part of the shield), the Podilia-Berdychiv complex (gneiss), and the Teteriv-Boh complex (gneiss-migmatite). The Teteriv-Boh gneisses are major repositories of graphite. The ultrabasic deposits are associated with the occurrence of chrome, nickel, cobalt, and copper.

*Proterozoic.* After another mountain-building period the Kryvyi Rih group was deposited in a subgeosyncline that was subsequently folded with its axis in a southerly orientation. The group consists of the Inhul-Inhulets series of biotite, biotite-amphibole, and pyroxene-rich granitic gneisses, the metabasite series of metamorphosed volcanic rocks, and the Saksahan series of arkosic sandstones, phyllites, talc-chlorite schists, clays, marbles, and vast jaspilitic iron-ore deposits.

Subsequently, the Ukrainian Shield underwent erosion and peneplanation. There are no known platform sediment accumulations on it, however, except for the rare Ovruchian series. Located in the northwestern part of the shield, it contains conglomerates, quartzites, sandstones, and pyrophyllitic schists. Concurrently and subsequently, the shield experienced fracture dislocations, intrusions, and effusions. These processes gave rise to the Korosten complex (gabbro and rapakivi-like granite containing titanium-rich ilmenite) in the northwestern Korosten and central Novomyrhorod parts of the shield, and the syenite complex (parts of the Donets Ridge) near the Sea of Azov. They also caused the blocks, into which the shield was fragmented along its axis and perpendicular to it, to rise or subside relative to one another and

to form a checkerboard pattern of exposed Archean and Proterozoic deposits as peneplanation continued. Mineralization along the fractures, particularly at their intersection, provided for the occurrence of lead. Weathering of crystalline rocks such as granite resulted in the formation of kaolin. Towards the end of the Proterozoic Era a transgression from the west left Riphean deposits of sandstone near Ostrih.

*Paleozoic.* This era was marked by the beginning of subsidence around the Ukrainian Shield, marine trans-

gression, and the accumulation of sedimentary deposits. After a recession in the early Cambrian, when terrigenous clays and sands were deposited, the West European Sea encroached again, accumulating clays with phosphate rock, argillites, siltstones, and sandstones in Volhynia and Podilia. These were overlain by Ordovician limestones and, after a phase of uplift and erosion, with Silurian limestones, dolomites, shales, and marls, including pelites, arkoses, and sandstones. Deposits also occurred in the geosyncline that spread through the Car-

pathian and Caucasus zones, but the Caledonian folding towards the end of the Silurian Period modified the deposits into the Marmara metamorphic rocks that were preserved in the Carpathians (south of Rakhiv) and the phyllites and quartzites of the western Caucasus.

In the beginning of the Devonian Period sand was deposited in lagoons to become the Old Red Sandstone of Podilia. Continued marine transgression in the middle Devonian, however, provided for the accumulation of dolomites, limestones, and sandstones in Volhynia and Podilia. Particularly thick limestone deposits were laid down in the Carpathian Zone; limestones, clays, sandstones, and conglomerates in the Crimean and Caucasus zones; and sandstones, dolomites, limestones, gypsum, and rock salt, which formed into domes that served as traps for petroleum and natural gas, in the Dnieper-Donets Trough. Iron-bearing sandstones and shales were deposited in the Donbas. Towards the end of the Devonian Period, the Hercynian folding known as the Breton phase was associated with volcanism in the Dnieper-Donets Trough and the Donbas, and with the intrusions of granite in the Caucasus.

At the beginning of the Carboniferous Period marine transgression from the east into the Dnieper-Donets Trough and from the west into the Lviv Trough contributed to thick shale and limestone deposits. By the middle Carboniferous Period marine sedimentation changed to lagoon deposition alternating with terrestrial deposition of plant material that turned into coal. Many layers of shale, sandstones, limestones, and coal seams produced up to 12 km of Carboniferous deposits in the Donbas. A less complete record survived in the Dnieper-Donets Trough and the Lviv Trough in the west.

In the Permian Period Ukraine was mostly dry land. Submergence was confined mostly to the south. Marine transgression in the Donbas and the Dnieper-Donets Trough contributed to the deposition of what became sandstone, limestone, dolomite, gypsum, and rock salt, which later domed upward into Mesozoic strata, forming traps for petroleum and gas. The Lower Permian deposits consisted of conglomerates, sandstones, and dolomites in the Caucasus, and outliers of conglomerates, dolomites, quartzites, and sandstones in the Crimean and Carpathian zones.

*Mesozoic.* Beginning with the Triassic Period, continental conditions prevailed. Only in the south did marine transgression provide for the accumulation of a series of conglomerates, gray-green phyllites, and limestone-dolomites in the Carpathian Zone, dark gray mica schists and sandstones with limestone lenses in the Crimean Zone, and shales, sandstones, and limestones in the Caucasus Zone. Lacustrine colored clays, alluvial sandstones, and marls were deposited in the Dnieper-Donets Trough. The end of the Triassic Period was marked in the Donbas, Crimea, and Caucasia by a crustal disturbance known as the Old Cimmerian folding. Upwarping of the dome-like anticline in the Donbas triggered the release of mercury-bearing fluids from the magma below through fissures into the porous layers of Carboniferous sandstone and produced commercial concentrations of mercury.

In the Jurassic Period the sea in the south deepened and widened until by the Late Jurassic Period it also covered part of the Donbas and the entire Dnieper-Donets Trough. Clays, later interbedded with limestone and oolitic

iron-bearing sandstone, were deposited here. In the Carpathian-Dobrudja region the continental deposits were replaced with marine shales and limestones. In the Crimean and Caucasus zones, however, volcanic activity added tuff and lava to the marine deposits of shales, limestones, and dolomites. Volcanism was associated with the New Cimmerian folding, which towards the end of the Jurassic Period affected both the Crimean and Caucasus zones and the Donbas.

Among the Mesozoic deposits the most widespread were the Cretaceous ones. They involved the deposition of conglomerates, sandstones, shales, and marls (collectively known as flysh) into the geosyncline of the Carpathian Zone. In the Crimean and Caucasus zones, however, limestone was deposited. By the Middle Cretaceous Period the sea invaded the Dnieper-Donets Trough from the north and then inundated Podilia and Volhynia, leaving as major islands the Ukrainian Shield and the Donets Ridge. Under these conditions thick strata of carbonate-rich sediments consisting of chalk, marls, limestone, and phosphate-rich sediments were deposited in deeper water, while glauconite sands were laid down along the shores of the remaining islands. The Cretaceous Period was brought to a close with folding in the Donbas, which also marked the beginning of the Alpine folding in the Carpathian-Crimea-Caucasian Zone and led to the regression of the sea.

*Cenozoic.* The Tertiary Period was marked by the emergence of the Carpathian and Caucasus mountains. By the end of the period the principal topographic landforms and drainage patterns of Ukraine emerged. But during the Paleogene (the earlier epoch of the Tertiary Period), flysh, including oil-bearing shale, was still being deposited in the Carpathian Zone. In the flysh were trapped many useful minerals, including oil and natural gas. Along the Black Sea Platform (the Crimean and Caucasus zones) sandstones and shales, with occasional lenses of phosphate rock, alternated with the prevailing limestone deposits. The Dnieper-Donets Trough was accumulating alternating layers of clays and sands with occasional marls. In the late Eocene (the latter half of the Paleogene Period) a shallow sea even covered much of the central part of the Ukrainian Shield, reworking in places the weathered surface to form small concentrations of bauxite, and leaving behind a veneer of sand, clay, sandstone, and marl.

By the Neogene Epoch of the Tertiary Period the Carpathians emerged as overlapping folds, leaving a narrow body of water, which gradually retreated to the southwest, in the foredeep. In the permeable strata the folds retained commercial deposits of petroleum. Clays, sands, and limestones with rock salt, potassium salts, gypsum, anhydrite, oil, ozocerite, and sulfur were deposited in the intramontane basins and the foredeep. On the south side of the Carpathians the Pannonian Massif sank below the sea, while a ring of volcanoes released great masses of effusives (andesites, dacites, and rhyolites) to form the inner side of the Carpathian Arc. Volcanic eruptions ejected tuff, which was deposited along with clays in the Pannonian Basin. The Crimean Mountains, already established during the New Cimmerian folding at the end of the Jurassic Period, were raised to higher elevations. Large quantities of iron ore were deposited near Kerch. The Caucasus, an archipelago in the Paleogene Period, emerged from the sea as a mountain range. Deposits of

petroleum and gas were trapped in the folds. Sediments from the Caucasus, chiefly in the form of clays and sands, were deposited in the Azov-Kuban Depression. The shallow sea retreated from the southeastern part of the Ukrainian Shield, leaving behind bottom deposits of limestone, sand, and clay, bog deposits of lignite, and, along the shore, major concentrations of manganese and titanium.

In the Quaternary Period the Black Sea assumed its present configuration. When drainage into the Mediterranean Sea through the Dardanelles and Bosphorus was established, the base level of erosion dropped and deep valleys, which are evident in Ukraine's landscape today, began to be carved by widely meandering streams. As the climate cooled, a series of glacial and interglacial stages provided the last major imprint on the surface deposits of Ukraine. Of the last four glacial ages (Günz, Mindel, Riss, and Würm), all were associated with glacial scour and deposition in the Caucasus, and the last two with minor mountain glaciation in the Carpathians. During the glacial stages deep loess deposits covered nearly three-fourths of Ukraine. During the Riss stage the continental ice sheet modified the surface with scouring and left moraine deposits in the north and down the Dnieper Lowland to Kremenchuk. Its meltwaters left outwash deposits in Polisia. Meanwhile, epeirogenic movements slowly raised the Carpathian, Crimean, and, particularly, the Caucasus Mountains, as well as the Podilian Plateau, the Bessarabian Upland, and the Right-Bank Upland, thus accelerating the erosion processes. At the same time the Black Sea and the Black Sea Lowland continued to subside. This led to the formation of limans. In Polisia peat bogs and small deposits of bog iron ore formed because of impeded drainage.

**Geophysics.** Study of the earth's physical properties and of the physical processes in the different geospheres. The three major branches of geophysics are solid-earth physics, hydrospheric physics, and atmospheric physics. Some of the branches of the first are gravimetry, geodesy, seismology, geomagnetism, and geothermal studies; of the second, oceanography and land hydrology; and of the third, aeronomy, meteorology, climatology, atmospheric optics and radiotransmission, stratospheric and ionospheric physics.

In Ukraine important contributors to the development of geophysics were V. \*Selsky and S. \*Subbotin. The chief center of geophysical research is the AN URSS \*Institute of Geophysics. The movement of the magnetic poles and motions within the earth's interior are measured at the academy's Poltava Gravimetric Observatory. Geophysical research is conducted also at several universities and specialized institutions in Ukraine.

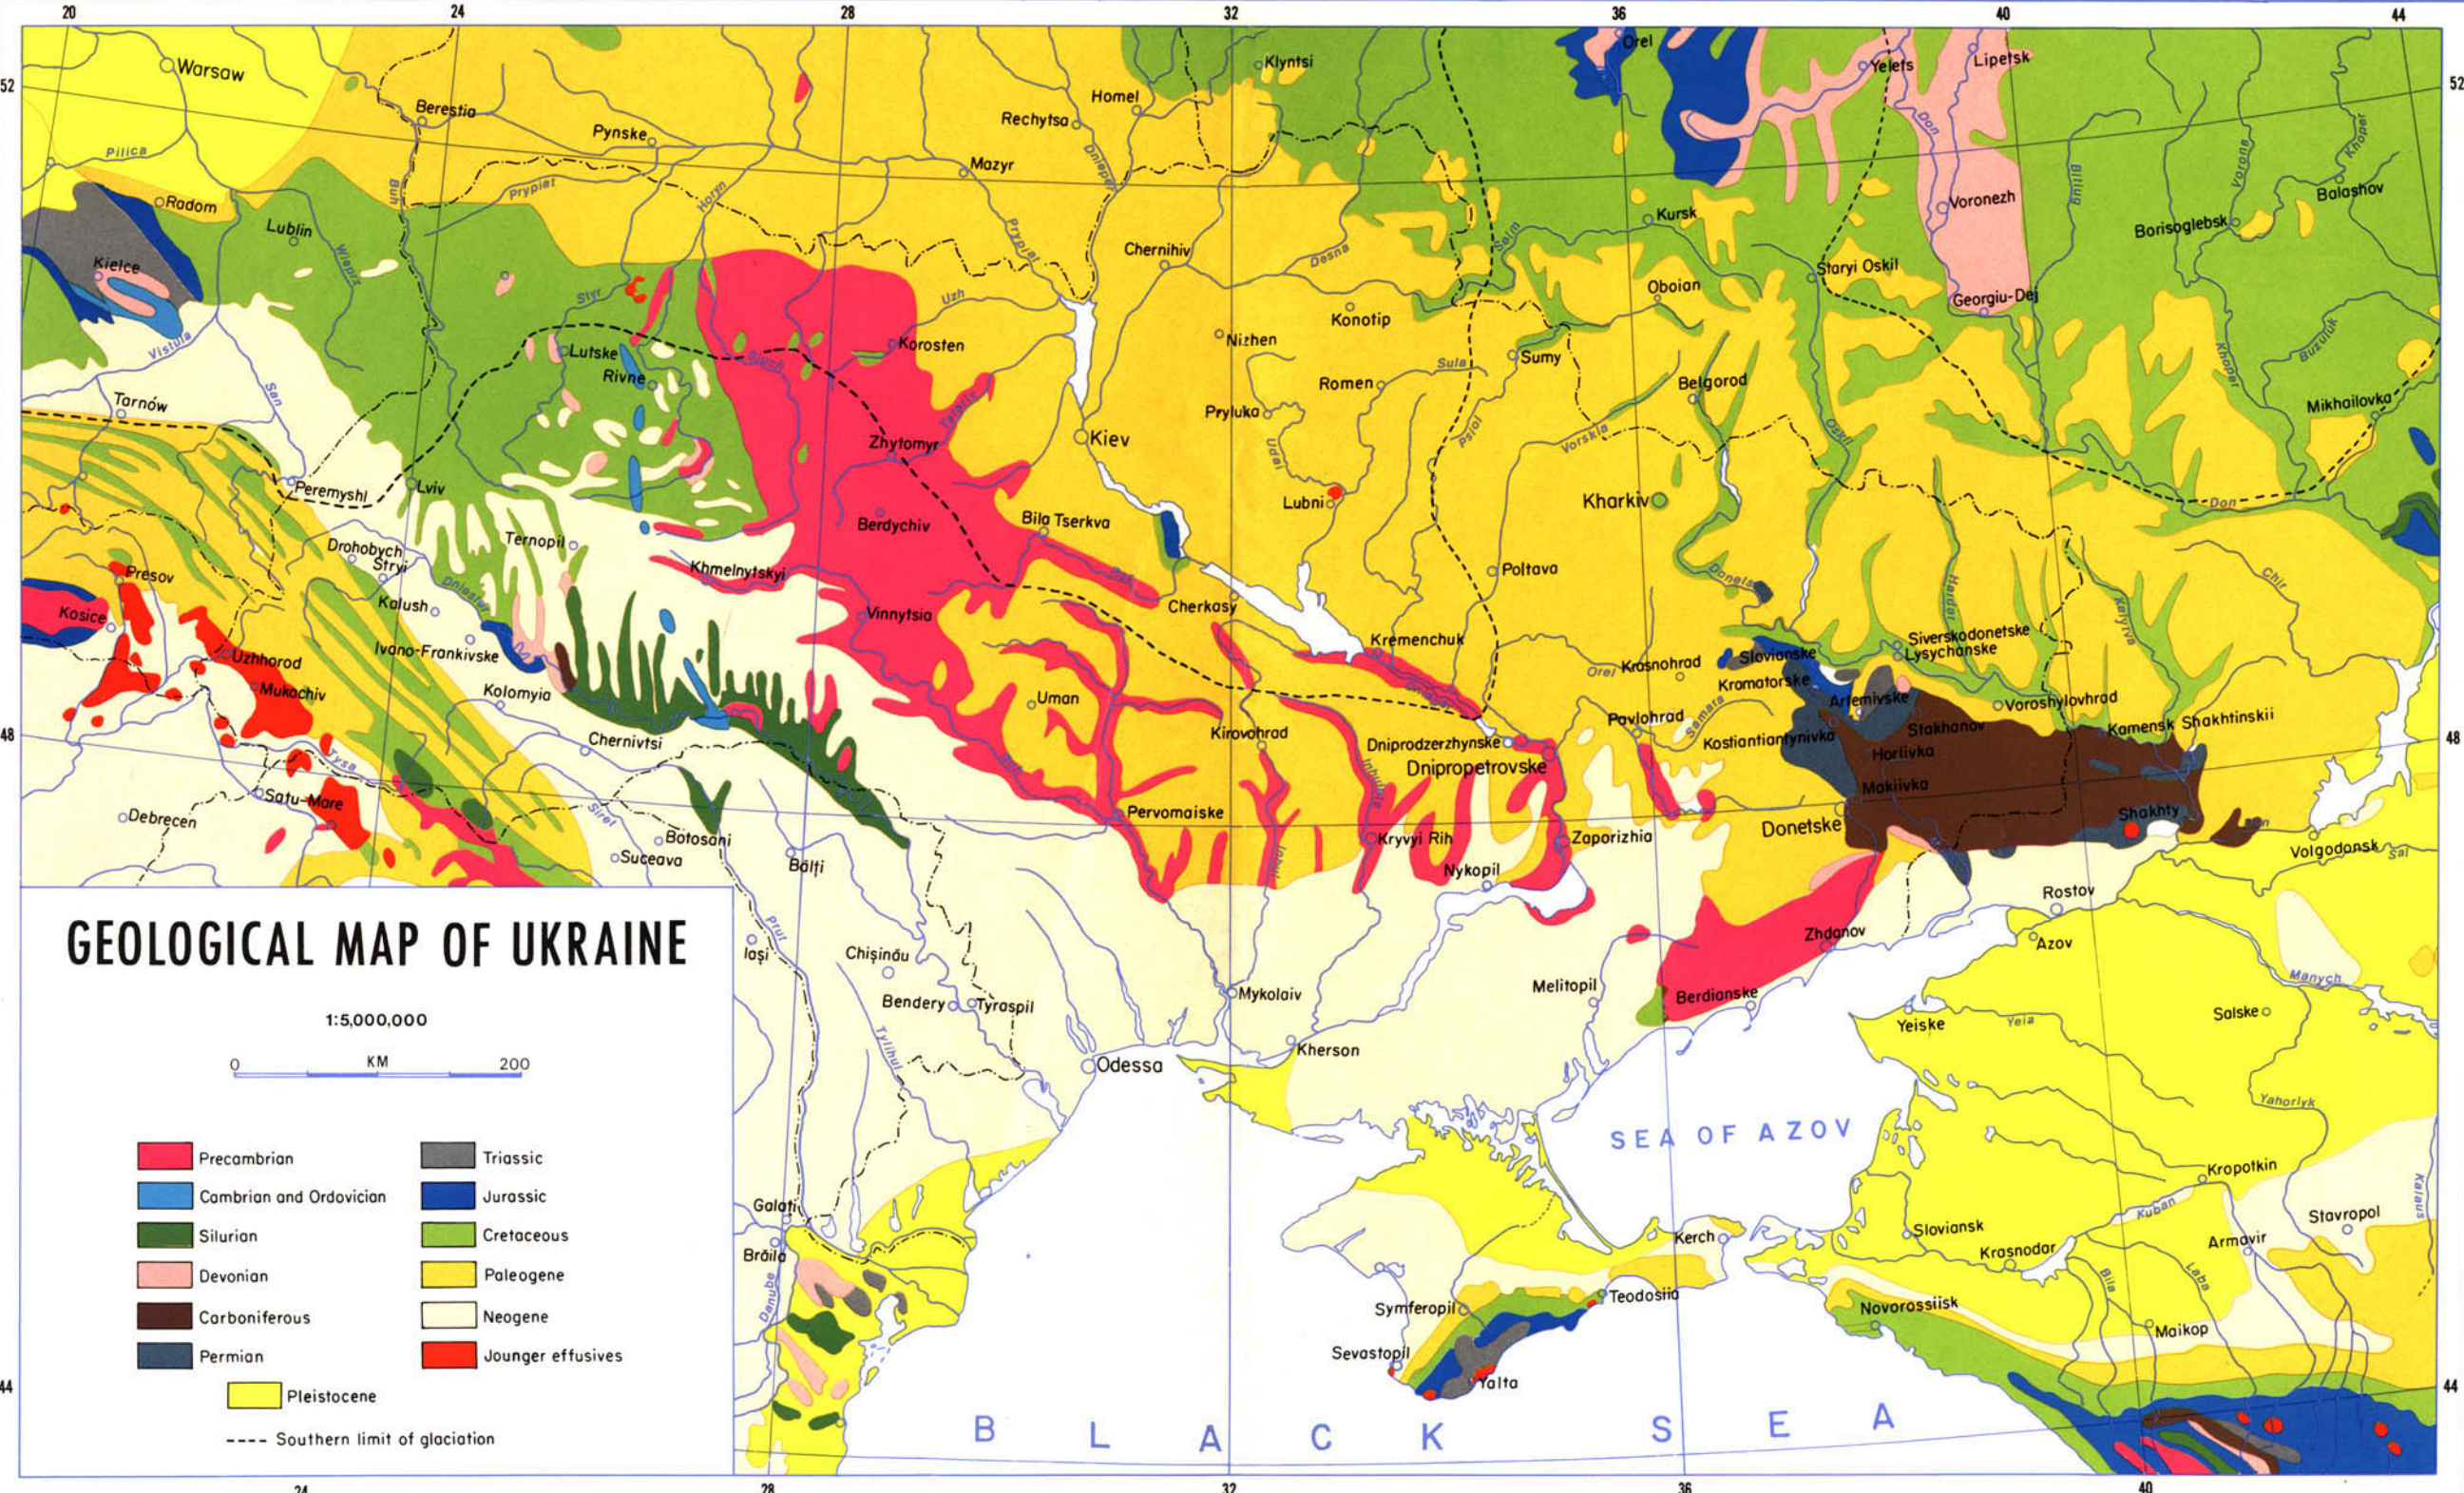

**Geophysics, Institute of the Academy of Sciences of the Ukrainian SSR.** See Institute of Geophysics of the Academy of Sciences of the Ukrainian SSR.

**Georgia** (Georgian: Sakartvelo). A country in central Transcaucasia lying on the coast of the Black Sea. The capital city is Tbilisi (called Tiflis until 1936). In 1921 Soviet rule was established in Georgia. On 13 December 1922 it became part of the Transcaucasian Soviet Federated Socialist Republic. On 5 December 1936 Georgia became a union republic, encompassing the Abkhaz ASSR, Adzhar ASSR, and the South-Ossetian Autonomous oblast. Its area is 69,700 sq km; in 1979 its population was 4,993,200, consisting of Georgians (69 percent), Ossetians (3), Abkhazians (2), Armenians (9), Russians (7), Azerbaidzhanians (5), Greeks (2), Ukrainians (1), Jews, Kurds, and others. Of the 45,000 Ukrainians there, only 53 percent considered Ukrainian to be their mother tongue. Of the 3,570,500 Georgians in the USSR in 1979, 89,400 lived in the Russian SFSR; 16,300 lived in Ukraine; 11,400 in Azerbaijan SSR; and 3,445,000 in the Georgian SSR. Ninety-eight percent of all Georgians in the USSR consider Georgian to be their mother tongue.

Georgia has been a distinct country for two millennia. During the reign of Queen Tamara (1184–1213) it was one of the mightiest states in the Near East. Iranian and Turkish aggression compelled Erekle II to accept Russian suzerainty in 1783. In 1801–10 Russia annexed Georgia, and its royal house was replaced by military governors. Anti-Russian uprisings took place there in 1804, 1812, 1820, 1835, 1840, and 1857. After the fall of the tsarist regime, Georgia experienced a national revival. On 26 May 1918 its Menshevik-dominated national council proclaimed an independent Georgian Democratic Republic; it survived until it was invaded by Soviet troops in February 1921.

Until the 19th century contacts between Ukrainians and Georgians were sporadic and temporary. In the Princely era economic relations existed for a brief while between Georgia and Tmutorokan principality. In 1154 the grand prince of Kiev, Iziaslav Mstyslavych, married Rusudan, the daughter of Dimitri I of Georgia. Thirty years later, Queen Tamara married Yurii, the son of Prince Andrei Bogoliubskii. In the 17th and 18th centuries Cossacks and Georgians occasionally fought the Turks together, and Cossacks fled to Georgia from Turkish captivity. The works of P. Mohyla, D. Tuptalo, and T. Prokopovych were translated into Georgian and widely read. From 1743 many Georgian noble families were granted estates in the Hetman state. These nobles married members of the Ukrainian Cossack *starshyna* and the Ukrainian nobility. In 1738 the Georgian poet D. \*Guramishvili settled in the Myrhorod region.

In the first half of the 19th century Ukrainians began living in Georgia, either as exiles or as part of the Russian military or civil service. In the 1860s and 1870s many Georgians began studying at higher schools in Ukraine, particularly at the Kiev Theological Academy. Among them was the writer and teacher Ya. Gogebashvili, who first raised the idea of translating Ukrainian literature into Georgian. Many Georgians remained in Ukraine as lawyers, physicians, or bureaucrats, and formed little communities in the larger towns. Several Georgian figures who graduated from higher schools in Kiev or Khar'kiv – L. Ketskhoveli, Sh. Chitadze, Yasamani (M.

Kintsurashvili), N. Gambarashvili, and N. Lomouri – popularized Ukrainian literature in the Georgian press.

The noted Georgian poet A. \*Tsereteli (1840–1915), who knew T. Shevchenko personally and greatly admired his work, did much to promote Ukrainian-Georgian contacts. The first Georgian translation of a poem by Shevchenko – ‘Naimychka’ (The Servant Girl), by N. Lomouri – was published in 1881. Translations of several other poems appeared in the following decades, as did articles about Shevchenko, and they had a significant influence on Tsereteli and other writers. The Georgians demonstrated their appreciation for Shevchenko in articles and translations on the occasion of the quinquagenary of his death in 1911 and the centenary of his birth in 1914. They protested against the government ban on commemorations of his centennial.

Other Ukrainian writers were also translated into Georgian, and Ukrainian scholars became involved in Georgian studies. Translations of I. Kotliarevsky, H. Kvitka-Osnovianenko, M. Kotsiubynsky, and I. Franko by various writers appeared in Georgian journals in the late 19th and early 20th century. During their long stay in Caucasia, M. Hulak and O. Navrotsky, both of them former members of the Cyril and Methodius Brotherhood, promoted understanding between the two peoples. Hulak worked in Kutais and Tiflis as a teacher in 1863–86 and wrote about Georgian literature. Navrotsky lived in Yerevan and worked on a Ukrainian translation of Sh. Rustaveli’s *Man in the Tiger Skin*. Lesia Ukrainka lived with her husband, K. Kvitka, in Georgia for the greater part of 1903–13; during this period she wrote some of her finest plays. In the 1890s D. Mordovets wrote several historical novels set in Georgia. From the 1880s Ukrainian scholars, such as M. Sumtsov, O. Potebnia, and A. Krymsky, visited Georgia and studied its history, literature, and culture.

Ukrainian plays were staged in Georgia beginning in 1845, when the Yatsenko troupe visited Tiflis. In 1889 M. Starytsky’s troupe and in 1890 M. Kropyvnytsky’s troupe toured Georgia and were well received. In the early 20th century a Ukrainian troupe directed by M. Biliaieva existed in Tiflis; it staged over 45 plays between 1902 and 1919. The first Ukrainian translations of Georgian literature were of I. Chavchavadze’s poems by O. Lototsky and B. Hrinchenko in 1893 in the Lviv journal *Pravda* and by P. Hrabovsky in 1897 in the Lviv paper *Zoria*.

The Georgians and the Ukrainians often collaborated in the struggle for national liberation. In 1906 their deputies to the First Russian State Duma joined the \*Autonomists’ Union. Its Ukrainian vice-chairman was I. Shrah, and his Georgian counterpart was Prince V. Gelovani. In the Fourth State Duma the Menshevik leader N. Chkheidze spoke out against the religious and cultural persecution of Ukrainians in Russian-occupied Galicia. After the February Revolution Georgians took part in the congress of nationalities of Russia held in Kiev on 23–28 September 1917 by the Central Rada. In 1918 diplomatic relations were established between the Ukrainian Hetman government and the Georgian republic. On 5 December 1918 the Ukrainian Hetman and Georgian governments, represented by S. Borodaievsky and V. Tevzaiia respectively, signed an agreement on consular exchange, trade, sea use, and transit rights. The Ukrainian consul general was stationed in Tiflis. Ukrainian

consulates in Batumi and Gagra remained in operation until the end of 1920. Prof V. Tevzaiia headed the Georgian mission in Kiev. Abroad, Ukrainians and Georgians have worked together in such political bodies as the \*Promethean movement, the \*Anti-Bolshevik Bloc of Nations, and the \*Paris Bloc.

Under the Soviet regime, Ukrainian-Georgian relations have been allowed to develop only in the cultural sphere. Visits to Georgia by Ukrainian writers and to Ukraine by Georgian writers have become a tradition. Since the 1920s the Dumka State Kapelle, the Berezil theater, the Franko Theater, and other troupes have staged performances in Georgia, and the Rustaveli Theater, the Mardzhanishvili Theater, and other ensembles have toured Ukraine. Articles on Ukrainian-Georgian relations appeared in the journal *Skhidnyi svit* in 1927–31. The monuments to D. Guramishvili in Myrhorod (1949) and to Lesia Ukrainka in Surami (1952) were erected as official expressions of friendship between the two peoples.

Literary translation is well developed in both literatures. The first book of Georgian literature translated into Ukrainian was a novella by M. Dgebundze-Pularia in 1929. Besides many individual poems and novellas, large editions of T. Shevchenko’s poetry appeared in Georgian in 1939, 1952, and 1961. In the 1940s I. Franko’s works, including ‘Moisei’ (Moses), were translated. In 1949 and 1952 collections of Lesia Ukrainka’s works were published in translation. The contributors were such well-known Georgian writers as S. Chikovani, K. Lortkipanidze, I. Mosashvili, A. Mashashvili, I. Abashidze, R. Gvetadze, V. Gaprindashvili, S. Shanshiashvili, and A. Kurateli. The works of many Soviet Ukrainian writers – M. Bazhan, P. Tychyna, M. Rylsky, O. Dovzhenko, V. Sosiura, M. Kulish, P. Panch, I. Kocherha, O. Kornii-chuk, O. Honchar, and others – have been translated into Georgian. M. Bazhan has translated the Georgian classics: Sh. Rustaveli’s *Man in the Tiger Skin* in 1950 and D. Guramishvili’s *Davitiani* in 1955. The works of Georgian writers N. Baratashvili, I. Chavchavadze, A. Tsereteli, A. Kazbegi, Sh. Dadiani, G. Leonidze, S. Chikovani, Yasamani, N. Lordkipanidze, I. Abashidze, D. Shengelaia, K. Kaladze, I. Mosashvili, D. Gulia, G. Tabidze, and others have been translated by M. Bazhan, M. Rylsky, L. Pervomaisky, I. Kulyk, Ye. Pluzhnyk, O. Oles, A. Malyshko, P. Voronko, M. Nahnybida, O. Novytsky, S. Kryzhanivsky, G. Namoradze, and others.

Some Ukrainians from the Kuban moved to Georgia in the 1930s, fleeing the man-made famine of 1933. The Ukrainian population of Georgia thus grew from 14,400 in 1926 to 46,000 in 1939. The largest concentration of Ukrainians in Georgia is in Tbilisi (11,000 in 1959).

**Georgievsky, Evlogii** [Georgijevskij, Evlogij] (secular name: Vasiliï), b 10 April 1868 in Somovo, Odoev county, Tula gubernia, d 8 August 1946 in Paris. Russian Ortho-

dox metropolitan. In 1902 he was appointed bishop of Lublin and in 1905 bishop of Kholm. A staunch monarchist and leader of the Union of the Russian People, he served as a deputy to the Second and Third Russian state dumas. Through his influence the Kholm region was established as a separate gubernia. In 1914 he was elevated to archbishop of Volhynia. As administrator of church affairs in Russian-occupied Galicia (1914–15), he persecuted the Ukrainian Catholic church and tried to impose Russian Orthodoxy in the region. At the beginning of 1918 he took part in the All-Ukrainian Church Sobor in Kiev. Despite his anti-Ukrainian attitude, during the Hetman government he sat on the Supreme Church Council. Under the Directory of the UNR he was arrested and exiled to the Basilian monastery in Buchach. With the defeat of the Whites he immigrated to Serbia and became administrator of Russian parishes in Western Europe and then metropolitan. His memoirs *Put' moei zhizni* (My Life's Path, 1947) contain interesting details about the Kholm region and Volhynia.

**Gerbel, Nikolai** [Gerbel', Nikolaj], b 8 December 1827 in Tver, Russia, d 20 March 1883 in St Petersburg. Russian poet, translator, and publisher; the first Russian translator of T. Shevchenko's poetry. Gerbel first met Shevchenko in 1846 at the Nizhen Lyceum. In 1860 he edited and published Shevchenko's *Kobzar* in Russian (rev edn 1869 and 1876). The anthology *Poeziia slavian* (Poetry of the Slavs, 1871), also published by Gerbel, contained translations of several Ukrainian poets and a survey of Ukrainian poetry by M. Kostomarov.

**Gerbel, Sergei** [Gerbel', Sergej], b and d ? Political leader and government official. Gerbel was a landowner from the Kherson region who was governor of Kharkiv gubernia until the Revolution of 1917. In the summer of 1918 he became minister of food provisions in the Hetman government, retaining this position in the cabinet formed by F. Lyzohub in October 1918. When the Hetman government proclaimed its federation with Russia on 14 November, Gerbel became prime minister and minister of agrarian affairs. He held these positions until 14 December 1918.

**Gerken-Rusova, Natalia**, b 14 June 1897 in Kiev. Scenographer, painter, and journalist. She studied art in Kiev under M. Boichuk, V. Krychevsky, and H. Narbut. She continued her studies in Florence, Nice, and Paris, where she graduated from the Ecole Nationale des Beaux Arts in 1927, and worked as a set designer in Paris, Prague, Brno, Bratislava, and Bucharest. She lived in Bucharest with her husband Yu. \*Rusov from 1930 to 1941; there she also worked as an interior decorator for the king of Rumania. She is the author of *Heroïchnyi teatr* (The Heroic Theater, 1939, 1957), the plays *Shevchenko u Repninykh* (Shevchenko at the Repnins, 1947) and *Sviato dvokh epokh* (The Fete of Two Epochs, 1949), and articles in émigré periodicals. Her art works have been exhibited several times in Europe. Since the war she has lived in Montreal.

**German Labor Front** (Deutsche Arbeitsfront or DAF). A compulsory organization of employers and employees set up in 1934 by the Nazi regime after its abolition of trade unions (1933); it had departments for foreign workers. In 1941 a special DAF department – Betreuungstelle

für ukrainische Arbeiter – for Ukrainian conscript workers from the \*Generalgouvernement and from countries allied with Germany was established; its head office was in Berlin. K. Graebe, assisted by B. Bilynkevych, was in charge of the department. Through offices in Berlin, Dresden, Breslau (now Wrocław), Hamburg, Hannover, Frankfurt, Munich, Vienna, and Stuttgart, Ukrainian DAF officials provided social and, to a lesser extent, cultural services for thousands of Ukrainian laborers in 15 German provinces. These officials co-operated closely with Ukrainian civic organizations in Germany – the Ukrainian National Alliance and the Ukrainian Hromada – in serving the workers' cultural needs and defending their limited rights. Under A. Kishka's supervision the Ukrainian officials of the Reich Food Office (Reichsnährstand) looked after the needs of farm workers. From 1942 to 1945 *Visti*, a newspaper for industrial workers, was published in Berlin under H. Stetsiuk's editorship; it was followed in 1943 by *Zemlia*, a weekly for farm workers edited by S. Nykorovych.

V. Maruniak

**Germanic law.** A designation covering the customary and civil laws of the various Germanic peoples from the time of the ancient tribes to the modern period of nationhood. In Ukraine, Germanic law (GL) has usually been identified with \*Magdeburg law (municipal autonomy), but it embraces many other legal institutions, norms, and traditions. Medieval collections of GL, such as the *Sachsenspiegel* and later codifications, were translated or revised by the Poles (eg, B. Groicki in 1558–9) and were thus known in Ukraine. They had some influence on the \*Lithuanian Statute and legal practices in the Lithuanian-Ruthenian and Hetman states.

GL was brought to Ukraine under Poland and Lithuania by \*Germans, who founded self-governing farming settlements and urban communities. An enterprising German would pay a lord or the state a sum of money for the right to found a colony under GL. This tenant, called the *lokator* or *osadchyi*, would normally be appointed the \**soltys* – the lord's steward and village administrator. He was granted privileges for his feudal services: land, part of the money rent collected for the lord from the settlers, the right to demand certain corvée labor, freedom to build a mill or tavern, and the exclusive right to judge the settlers.

In the 14th century Polish nobles began purchasing the *soltys* titles and privileges from the original holding families. The new Polish owners abolished rural self-government under GL and introduced large-scale corvée. Only on crown and church estates did a measure of self-government remain. In the villages, GL had coexisted with traditional \*Rus' law, which had given its inhabitants greater economic security and a degree of self-government. In the late 15th and the 16th century the distinction between the two laws disappeared; certain forms of GL (the *soltys*, fiefs) were combined with the practices of Rus' law. This process was accompanied by the total abrogation of village self-rule and the imposition of \*serfdom.

**Germanisms.** Words and expressions borrowed from the Germanic languages. The Ukrainian language inherited some Germanisms from Common Slavic, which had adopted some loan words from the Common Germanic, Gothic, and Balkan-Germanic languages. These words are part of the vocabulary of military-political and trade relations, material culture, and partly Christian practice; for example, *meč* (sword), *polk* (regiment), *knjaz'* (prince), *korol'* (king), *lyxva* (usury), *cjata* (a coin), *xyža* (hut), *morkva* (carrot), and *pip* (priest). Very few loan words from Old Swedish entered Ukrainian; they include *ščohla* (mast), *stjah* (flag), and *kodola* (hawser). A large number of Germanisms from Low and High German were absorbed in the 14th and 15th centuries, some directly, but mostly via Polish. At that time German craftsmen emigrated in large numbers to Poland and settled in towns in western Ukraine. Some Germanisms were also introduced by Jewish settlers. The loan words of this period are mostly part of the vocabulary of the skilled trades, commerce, guilds, and municipal self-government. Some general and abstract terms were also adopted. These borrowings include *sljusar* (locksmith), *druk* (print), *xutro* (fur), *cal'* (inch), *rynok* (market), *vuxnal'* (horseshoe nail), *ratuša* (town hall), *djakuvaty* (to thank), *rjatuvaty* (to save), and *smak* (taste). From the 18th to the 20th century Germanisms became widespread in the Ukrainian spoken in Galicia and Bukovyna under Austrian rule. Some of them, for example, *strajk* (strike), *mušlja* (shell), and *tran* (whale oil), and such calques as *zlovžyvannja* (misuse, based on *Missbrauch*), *zabezpečennja* (security, based on *Versicherung*), *muzyka majbutn'oho* (a castle in the air, from *Zukunftsmusik*), made their way into the standard language. But most remained merely local expressions; for example, *l'os* (lottery ticket), *fajnyj* (fine), and such syntactic constructions as *tikaty pered kym* (to run away before one), *dumaty na ščo* (to think on something). The quantity and choice of Germanisms in Ukrainian bring the language closer to the West Slavic languages.

G.Y. Shevelov

**Germans.** Until 1940 the fourth-largest ethnic minority in the Ukrainian lands. Very few Germans live in Ukraine today.

**The Princely era.** The presence of Germans in Ukraine was first recorded when Christianity was introduced in the 10th century, as merchants, members of German legations, clerics, and travelers began visiting Ukraine. At the same time that German and Ukrainian princely families established dynastic ties through marriage in the 11th and 12th centuries, Germans from Regensburg, Vienna, Mainz, and Lubeck founded small but discrete communities in Ukraine and engaged in commerce in the towns, particularly in Kiev, Volodymyr-Volynskyi, and Lutske. The presence of German merchants in Kiev during the latter half of the 12th and in the 13th century is mentioned in the Hypatian Chronicle.

A more significant influx of Germans, particularly in western Ukraine, occurred only after the Mongol inva-

sion of Rus' in 1240–1 and the destruction of many towns. The princes of Galicia-Volhynia, imitating their Polish and Hungarian counterparts, invited Germans to rebuild the razed towns and develop trade and crafts by granting the Germans various privileges (eg, temporary tax exemptions), a large degree of autonomy, and the retention of their own legal system based on \*Magdeburg law. As early as the mid-13th century, King Danylo Romanovych invited German merchants and manufacturers to newly founded Kholm, and such centers as Volodymyr-Volynskyi, Lutske, Lviv, Peremyshl, Sianik were settled thereafter. From 1270 to 1290, the mayors of Volodymyr-Volynskyi and Lutske were German. During his reign (1324–40), Prince Yurii II Boleslav, in particular, promoted the settlement of Germans in Galicia.

In Transcarpathia, German colonization had begun under Hungarian rule in the 12th century in the Ukrainian-Slovak ethnic borderland. In the 13th century, Levoča, Bardejov, Košice, and other towns there were founded by Germans, many of whom later resettled in Prešov, Uzhhorod, Mukachiv, Berehove, Khust, and, in the 14th century, Tiachiv, Vyshkove, and Dovhe Pole. The Hungarian kings accorded the Germans many privileges but obliged them to pay for land.

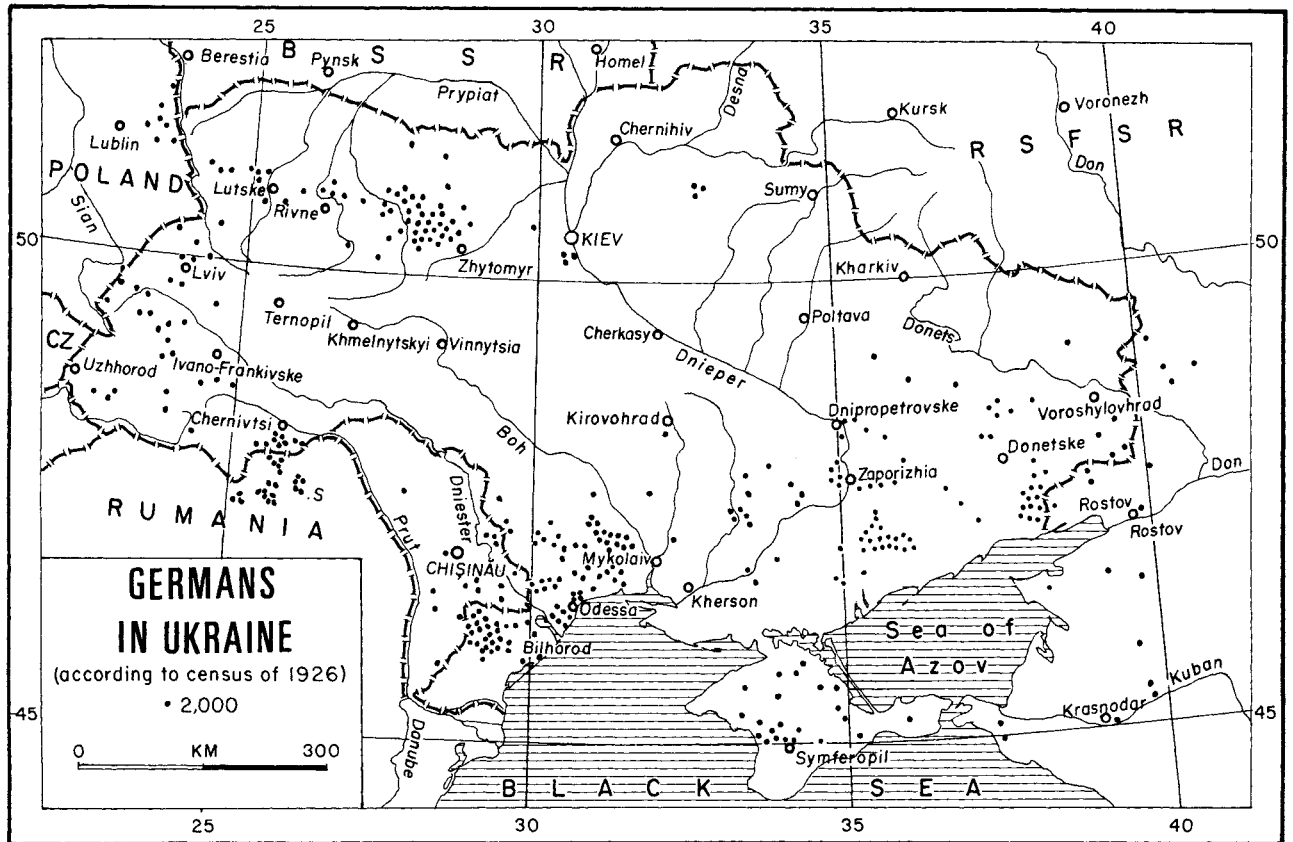

**The Lithuanian-Polish period.** German colonization intensified after the annexation of Galicia by Poland and of Volhynia and Podolia by Lithuania. It was stimulated by the granting of Magdeburg law and other privileges by the new rulers to many western Ukrainian towns. It was in these towns that Germans first settled and played an important role. From 1352 to 1550, for example, the Germans were so influential in Lviv that the mayor and most of the town councillors were elected from among them and official books and documents were written in German. New German settlers continually moved into Galicia's towns. From the late 14th century, German colonization spread into the towns of Volhynia and Podilia. The first Catholic bishops of Peremyshl, Lviv, Kholm, and Kamianets-Podilskyi were German.

German peasant colonization was markedly weaker. Until the 15th century it was limited to the Sian and Lviv regions. Peasant settlements were also granted special privileges including self-government by \*Germanic law. Most of the colonists of this period came from Silesia.

German migration into Ukraine's towns declined in the mid-15th century, with only professionals and artisans arriving thereafter. Owing to the centuries-old German influence, many of Ukraine's towns resembled those of central Europe architecturally and economically and in the way they were governed. Many \*Germanisms had entered the language of government, commerce, the crafts, the trade guilds, and construction. The influence of German colonization was so strong that Ukrainian burghers were occasionally forced out.

With the decline of colonization, many Germans in Ukraine became Polonized. This process, which began in the villages and smaller, isolated towns and spread to the larger towns and cities, such as Lviv, was aided by the fact that the Germans and the Poles shared a common faith – Roman Catholicism. It led ultimately to the consolidation of Polish influence in western and Right-Bank Ukraine. Only a negligible number of Germans became Ukrainianized.

In Bukovyna, German settlement was sporadic; it originated mainly in Transylvania and Galicia. After the 15th

century, Germans took part in the development of the towns of Seret and Suceava and in commercial ties with Lviv.

**The Hetman state.** A separate German group on Ukrainian soil consisted of the soldiers and officers who served in various Polish and Lithuanian military formations. During the Cossack-Polish War in particular, the Polish army employed a considerable number of German mercenaries who played a decisive role in the Battle of Berestechko (1651).

In Left-Bank and Dnieper Ukraine, German merchants and manufacturers (mainly from the Danzig region) became more numerous in the 16th and the first half of the 17th century. They leased and exploited large estates, particularly in the Korostyshiv area, and established potash and smalt factories. In the Hetman state of the 17th and 18th centuries, considerable numbers of German artisans, who worked as managers or skilled workers in factories, agricultural specialists, architects, doctors, professional soldiers, and teachers, settled in the towns and on the Cossack *starshyna* estates. German mercenaries were employed by hetmans I. Vyhovsky and P. Doroshenko. They also served in the Russian army and in garrisons in Ukraine, particularly after the Battle of Poltava (1709). In the 18th century, German artisans, civil servants, and doctors formed permanent colonies in the cities (especially in Kiev) of the Hetman state. Some of these colonies still existed in the 20th century.

Prominent figures of German origin in Ukraine in the 17th and 18th centuries were the church leader I. \*Gizel, the theologian and military engineer A. \*Zörnigau, the architects J. \*Baptist and J.-G. \*Schädel, and the general

osaul of artillery F. von \*Königsek. Some Germans (mostly army officers) married into the Cossack *starshyna*, acquired estates, and settled down permanently in Ukraine, eg, the Hampfs, Lammsdorfs, Brinckens, Ritters, and Pols (O. \*Pol was prominent in the Katerynoslav region).

**1760–1914.** In the second half of the 18th century, the Ukrainian territories under both Russian and Austrian rule were settled by a new wave of German colonists, as a few manufacturers and a large number of artisans responded to invitations by Polish magnates to settle in the towns of Right-Bank Ukraine and to work in various factories. Their number grew in the first half of the 19th century in Right-Bank and Left-Bank Ukraine, particularly in the Poltava region.

Large numbers of German farmers colonized the unpopulated expanses of \*Southern Ukraine; they were attracted by the decrees of Catherine II (1763–4) and Alexander I (1804) granting them free land, freedom of religion, local autonomy, tax exemptions for 10 to 30 years, immunity from military service, interest-free loans, and the right to buy additional land. In Left-Bank Ukraine, a few small German colonies were established – in the Chernihiv region near Borzna in 1765–7 and near Krolevets in 1770. Through special agreements in 1789–90, \*Mennonites settled the lands of the former Zaporozhian Host – Khortytsia Island and its vicinity near Katerynoslav.

Beginning in the early 19th century, many more Germans settled in Southern Ukraine. They came mainly from the war-torn, depressed, and overpopulated rural areas of southwest Germany (Baden, Württemberg, Alsace, Hesse, the Palatinate), West Prussia and the Danzig area, and the Congress Kingdom of Poland. Large col-

onies also arose in southern Bessarabia (Akkerman county) after its annexation by Russia in 1812, and in Kherson, Katerynoslav, and Tavriia gubernias and the Tahanrih region. A few thousand Germans settled in the Kuban and the Stavropol region of Subcaucasia. According to the 1897 census, 292,500 Germans lived in Akkerman county and in Kherson, Katerynoslav, and Tavriia gubernias (4.6 percent of these regions' population). In 1911 German sources gave the number as 489,000 (42.6 percent Evangelicals, 36.7 percent Catholics, and 20.7 percent Mennonites).

A German church in the Crimea (1902)

A second large group of Germans settled in Volhynia. The first settlers were Mennonites brought in by the Polish gentry towards the end of the 18th century; most later migrated to Southern Ukraine. In 1860 about 5,000 Germans lived in 35 colonies in Volhynia, and their number grew after the serfs were emancipated and the local Polish gentry began importing labor and renting or selling their land. Smaller numbers were also invited to work the land confiscated from the Poles who had participated in the 1863 insurrection. By 1871, 28,600 Germans lived in 139 colonies in Volhynia. The greatest influx occurred after 1883. According to the 1897 census, 171,000 Germans lived in Volhynia gubernia in over 550 villages. In 1914, their number was estimated at 241,000 (66,000 in Zhytomyr county, 53,000 in Novohrad-Volynskiy county, 43,000 in Lutske county, 35,000 in Rivne county, 22,000 in Volodymyr-Volynskiy county, and 10,000 in Dubno county). Most came from Poland, and almost all were Evangelicals. Germans also settled in Podlachia and Kholm bordering on Volhynia. In 1914, Kholm county numbered 25,800 Germans (13.3 percent of the population) and Volodava county, 5,700 (4.7 percent).

In 1914, 784,100 Germans lived in the Russian-ruled Ukrainian compact ethnic territories and composed 2 percent of their population: 430,400 lived in the gubernias of Southern Ukraine, 272,100 lived in Volhynia and the Kholm region, and 81,600 lived elsewhere. They constituted either large compact islands among the indigenous population or small settlements (colonies), or lived on farmsteads. Even when the influx abated, the German population continued to increase because of a high birth rate. The number of German colonies in Southern Ukraine grew from 384 in 1890 to 966 in 1914. Buying up increas-

ingly more land from the gentry, the Germans owned 3.8 million desiatins by 1911, including such huge estates as that of the Falz-Fein family (200,000 desiatins). Only about a tenth of the Germans lived in towns (10,000 in Odessa in 1897).

The Germans lived apart from the Ukrainians and were distinguished by their language, religion, folkways, folklore, dress, village architecture, higher economic status (especially in the south), and level of education. They had extensive rights of self-rule and settled their internal affairs democratically, choosing their own councils, teachers, and pastors. German was the official language in their colonies; these were grouped into districts, governed by central administrations in Katerynoslav (1800–22), Kishinev (1822–33), and Odessa (1833–71), which were subordinated directly to the Ministry of Internal Affairs in St Petersburg. The privileges granted after 1763 were abolished in 1871, and Russian became the official language in 1875. Thereafter many Germans, especially Mennonites, emigrated to the New World.

A German colony in the Crimea

The colonies were organized around the churches, which ran German-language religious primary schools. Secondary schools and teachers' seminaries also existed, with a *Realschule* in Odessa. After 1905 German-language private high schools were founded. The Germans also had their own philanthropic institutions, societies, hospitals, press (eg, the daily *Odessauer Zeitung* [1863–1914] and the Catholic daily *Deutsche Rundschau* [1906–14]), and publishers, particularly of almanacs and calendars.

Generally the Germans maintained their national identity and language despite the lack of links with their homeland. It was only in the towns that some Russification occurred. Relations between the Ukrainians and the German colonists were limited to neighborly contacts, the adoption of sophisticated methods of German agriculture, and the hiring of Ukrainians as seasonal workers. Many Germans took part in Ukraine's industrial development. Because of German influence, \*Evangelical Christians, particularly \*Stundists, grew in numbers among the Ukrainian population in the latter half of the 19th century.

Beginning in the 19th century many scholars of German descent taught at universities and colleges in Ukraine. Among the more renowned were the physicist N. \*Shiller (Schiller), the mathematician H. (G.) \*Pfeiffer, the astronomer R. \*Fogel (Vogel), the chemist N. Bunge, the botanists W. \*Besser, E.-R. \*Trautfetter, and I. \*Schmal-

hausen, the physiologist A. \*Walter, the medical scientists M. Dieterichs and G. Rein, the lawyer O. \*Eikhelman, the economist N. \*Bunge, the philologists I. Neukirch, F. Knauer, I. Letsius, and B. Varneke, the archeologist E. Stern, and the art historians F. Schmit and F. \*Ernst. The Ukrainian poet Yu. \*Klen was also of German descent.

Considerably fewer Germans colonized Austrian-ruled Western Ukraine. After the annexation of Galicia (1772) and Bukovyna (1774) by Austria, the Germanization policies of the new regime brought German civil servants and farmers, the latter being encouraged to settle in the eastern borderlands by patents from Maria Theresa (1774) and Joseph II (1781) that granted privileges to the Catholics and the Evangelicals through land grants and exemption from military service and taxes. Because of indigenous rural overpopulation the influx was relatively small. Of the 249 German settlements (mostly small villages or village suburbs) in Galicia at the turn of the 20th century, 134 had been founded during the reign of Joseph II. Small-scale colonization occurred until the 1840s.

The German settlers in Galicia came from Baden, Württemberg, Hesse, the Palatinate, and, in the first half of the 19th century, northwestern Bohemia. They settled mostly in Subcarpathia or the Lviv region.

After Galicia was granted autonomy in 1861, its administration was taken over by the Poles and the official language became Polish. Many German civil servants emigrated; others became Polonized. The German farming colonies, however, did not undergo major losses. In 1914 there were 47,600 Germans in Galicia (0.9 percent of the population); 5,900 of them lived in Lviv. Half were Evangelicals and half Roman Catholics.

In Bukovyna, the German colonization was considerably greater than in Galicia as a result of the low population density and the poorly developed towns. Germans and Germanized Jews settled mostly in the towns, which soon acquired a German character. Because Germans held the highest government posts and German was the official language until 1918, their influence was greater than their numbers warranted. In 1910, 21,100 Germans (4.6 percent of the population) lived in the Ukrainian parts of Bukovyna. Its capital, \*Chernivtsi, had the largest urban concentration of Germans on Ukrainian ethnic territory and was the only 'German' city in Ukraine.

In Transcarpathia, the old German colonies began to wane in the 16th century, and most Germans became Magyarized. An insignificant number of settlers arrived in 1723 and 1748, when the village of Pausching near Mukachiv was founded. It is the only locality in Ukraine where the descendants of the original German settlers live today. Other Germans arrived in 1765–77 and in the early 19th century. In 1914 about 6,000 Germans lived in Transcarpathia; they were mostly farmers (mainly in the vicinity of Mukachiv) or lumberjacks and foresters in the Carpathian Mountains.

**The First World War and the Revolution.** On the eve of the First World War, 859,000 Germans (1.9 percent of the population) lived on Ukrainian soil: 784,100 in the Russian Empire and 74,700 in Austria-Hungary. During the war Germans living in the Russian Empire experienced restrictions, hostility, and even persecution. In 1915, 150,000 Germans living in Volhynia and the Kholm region were deported, mostly to Siberia, and only a fraction returned to their homes after the war.

In 1917–20, the attitude of Ukraine's Germans to the

UNR and Ukrainian independence was mainly one of indifference. Even so, some high-ranking officers in the UNR Army were of German descent (eg, Gen S. Delvig). Galicia's Germans, in contrast, actively collaborated with the Western Ukrainian National Republic and had representatives in the Ukrainian National Rada; many Galician-born Germans who had been Austrian army officers joined the Ukrainian Galician Army (eg, Lt Col A. Bizanz, Capt H. Koch, Gen A. Kraus). Bukovyna's Germans, however, openly supported its annexation by Rumania and the new Rumanian regime.

The First World War and the years of revolutionary turmoil led to a drastic reduction in the number of Germans in Ukraine. In Southern Ukraine many German farmers were victims of pogroms by the anarchist forces of N. \*Makhno in 1919 as well as of the 1921–2 famine; a large number fled to Germany and then emigrated to North America, while others assimilated in the towns. As a result, the German population in Ukraine's compact territories fell from 872,000 in 1914 to 514,000 in 1926. The greatest losses occurred in Volhynia gubernia and Radomyshl county of Kiev gubernia, where Germans decreased from 250,000 in 1914 to 108,000 in 1926; and in the Kholm region, where they fell from 35,000 to 13,000.

**The interwar years.** According to the 1926 Soviet census, 514,000 Germans lived in the Ukrainian ethnic territories of the USSR: 394,000 (1.4 percent of the total population), of which 34,300 (8.7 percent) were urban, lived in Soviet Ukraine; 43,600 (6.1 percent) lived in the Crimea; and 80,000 lived in northern Caucasia. Ukrainian territories under Poland had 87,000 Germans (1931); those under Rumania had 36,000 (1930); and those under Czechoslovakia had 13,000 (1930). In 1932, the total number of Germans on all of Ukrainian compact territory was 610,000 (1.2 percent of the total population); together with the mixed ethnic territories the number rose to 720,000 (1.3 percent of the total population).

In the Ukrainian SSR in 1928–9, there were six German raions and 244 German village soviets. The Germans had their own schools (including a pedagogical institute in Odessa), publishing houses, press, and cultural institutions. During the \*collectivization drive of 1929–30 and the \*famine of 1932–3, the German farmers suffered enormously; many thousands were branded \*kulaks and were persecuted, dispossessed, and deported to Soviet Asia. Their way of life was uprooted, their churches and other institutions were shut down, and their national raions and village soviets were abolished. Finally, in the 1936–8 Stalinist terror most of the Soviet German intelligentsia (clerics, writers, teachers, scholars, doctors) perished. To save themselves, many Germans fled their villages and disappeared into the towns.

In contrast to the prewar period, German organized life in interwar Western Ukraine, particularly in Volhynia (48,000 Germans in 1930), improved because many Germans established closer ties with their ancestral homeland. Germans under Polish rule co-operated with Ukrainians (eg, in the Bloc of National Minorities during elections to the Polish Senate and Sejm in 1922 and 1928). In Bukovyna, however, the Germans supported the ruling Rumanian parties.

**The Second World War.** On the basis of German Soviet treaties, many Germans living in Soviet-annexed Galicia, Volhynia, and the Kholm region were allowed to move to Germany after the 1939 partition of Poland. In 1940,

when the USSR occupied Bukovyna and Bessarabia, the Germans living there were also repatriated. After the Soviet-German war broke out in 1941, the Soviet authorities, beginning on 21 August, deported about 100,000 Germans living in the Crimea and Left-Bank Ukraine to northern Caucasia, and thence to Kazakhstan; they did not have time, however, to deport those in Right-Bank Ukraine and in the Odessa region. During the Nazi occupation, the latter had \*Volksdeutscher status and numerous privileges not granted to Ukrainians. Some joined military, police, and paramilitary formations and thus became collaborators in the brutal policy of the \*Reichskommissariat Ukraine. This created considerable animosity between Ukrainians and Germans in Ukraine.

As the German army retreated from Ukraine in 1943 and 1944, some 350,000 Germans were evacuated to the Warthegau region of West Prussia and thence to Germany. After the Soviet army occupied part of Germany in 1945, some 250,000 Germans from Ukraine were deported and confined in labor camps in Soviet Asia. On 13 December 1955, they were amnestied and allowed to live anywhere in the USSR except their former homes. In 1964, after pressure from the West German government, the Soviet Germans were exonerated of wartime treason. Many have since assimilated, and many others have emigrated to West Germany. According to the 1970 Soviet census, only 29,900 Germans lived in Ukraine. Their number today is unknown, Soviet sources being purposely silent. (See also \*Austria, \*Germany, \*Volga German ASSR.)

Book about Germany published by the German-Ukrainian Society

**German-Ukrainian Society** (Deutsch-Ukrainische Gesellschaft). A society for cultivating German-Ukrainian political, economic, and cultural relations, founded in March 1918 in Berlin by P. Rohrbach (its first president) and A. Schmidt (its first general secretary). The society's journal – *Die Ukraine* (40 issues, 1918–26) – contained valuable information about Ukraine. On H. Prokopchuk's initiative the society was revived in Munich in 1948. Since then the following have served as presidents: K. Bensch, K. Graebe, F. Roeder, O. Poebing, H. Prohaska, and E. Blauss. In 1960 it merged with the Herder German-Ukrainian Society, which had also been established in Munich in 1948 by such proponents of Ukrainian-German understanding as H. Koch, E. Mitlich, and I. Mirchuk. In the years 1952–6 and 1962–8 the society published 44 issues of *\*Ukraine in Vergangenheit und Gegenwart* (editor: H. Prokopchuk). It also published a few dozen monographs on Ukrainian émigrés in Germany and organized lectures, art exhibits, and commemorative concerts. Since the 1970s the society has been inactive.

**Germany.** The largest country in Central Europe, covering, until 1914, an area of 540,520 sq km. After Germany's defeat in the First World War, the Treaty of Versailles in 1919 reduced its territory to 472,030 sq km. In 1945, after its defeat in the Second World War, Germany was occupied by the Allied forces, and the Potsdam Conference left Germany with 356,270 sq km. In 1949 the United States, British, and French occupation zones became the Federal Republic of Germany (1985 pop est 60,940,000) with an area of 248,680 sq km and Bonn as the new capital; the Soviet zone became the German Democratic Republic (1985 pop est 16,703,000) with an area of 108,330 sq km and East Berlin as the capital.

Although Germany and Ukraine never shared a common border, the historical states on their territories and their peoples have had various ties since the 9th century. The closeness and distance of these ties have been affected by geopolitics, particularly by the centuries-old domination of Ukraine by Poland and Russia.

**The Middle Ages.** The first record of contacts dates from 18 May 838, when 'Rhos' accompanied a Byzantine legation to Ingelheim on the Rhine, the capital of Louis I the Pious. Most historians agree that the 'Rhos' were Varangians in the service of Rus'. In the 9th century, active economic relations were established between Kiev and \*Regensburg via Cracow, Prague, and other towns in Poland, Moravia, and Bohemia on the main trade route between Europe and the Orient. The Franks furnished arms and other metal products, glass, ceramics, wine, cloth, and jewelry in exchange for furs, honey, wax, silver, potash, horses, and slaves from Rus'. In order to control this trade, King Louis the German (843–76) issued customs regulations in Raffelstetten, Bavaria, in which merchants from Rus' ('Rugi') are mentioned. Similar customs measures were issued by King Louis the Child in 903–7. In the 10th century, Theophilus, a monk from Helmershausen near Paderborn, Saxony, noted that 'Rus' is particularly talented in enamelling.' The records of Regensburg's merchants of 1191 refer to trade with 'Ruzarii.' Economic relations between Rus' and Regensburg were intensive until the 13th century, when the Mongol invasions and the impact of Italian merchant fleets in east-west trade led to a general decline in relations between Ukraine and Germany.

Through the activity of religious missionaries from the 10th century onward, church ties between Germany and Ukraine were established. Princess Olha dispatched emissaries in 959 to King Otto I the Great with a request to send priests and a bishop to Kiev. Around 961, the monk Adalbert from Trier arrived in Kiev as bishop, but he soon fled, having incurred the enmity of Olha's son, the pagan grand prince Sviatoslav I. Sviatoslav's son Yaropolk I (972–ca 978) tried to maintain friendly relations with Emperor Otto II; his envoys attended the great assembly in Quedlimburg in 973, where they solicited German aid against Polish expansion. His brother Volodymyr the Great (ca 980–1015) also pursued a friendly orientation toward Germany. Having married Anna, the sister of the Byzantine emperor Basil II, in 990, he became the brother-in-law of Anna's sister Theophano, the wife of Otto II. Emperor Henry II (1002–24) tried to obtain the support of Rus' in his protracted war against Bolesław I the Brave of Poland. The war forced Archbishop Bruno of Querfurt to abandon his mission among the Prussians; instead he pursued the conversion of the Pechenegs, during which he was received by Volodymyr in Kiev in 1007 and 1008. Bruno's letter to Henry is the oldest extant German written reference to Rus'.

His wife Anna having died in 1011, Volodymyr the Great married (in 1012) the daughter of Count Kuno von Enningen (and granddaughter of Otto I and Henry II). Although this marriage should have strengthened the ties of Rus' with Germany, the opposite, in fact, happened, because Bolesław I negotiated a pact with Henry II at Merseburg in 1013, and German troops helped Bolesław to invade Rus' and occupy the Cherven towns. After Volodymyr's death, the rivalry between his sons Sviatopolk and Yaroslav the Wise for the Kievan throne

resulted in the interference of the rulers of Poland and Germany in the affairs of Rus'. The joint campaign of Sviatopolk and Bolesław against Yaroslav and the capture of Kiev in 1018 are described in the chronicle of Bishop \*Thietmar of Merseburg. After consolidating his rule, Yaroslav entered into an alliance with Emperor Conrad II, and during the renewed Polish-German war he annexed the town of Belz (1030) and the Cherven towns (1031) with German consent. Emperor Henry III received Yaroslav's envoys in Allstedt, Thuringia, in 1040, and negotiated trade and political agreements with them. In 1043 Yaroslav offered his daughter's hand in marriage to Henry, but the offer was refused. Nonetheless, cordial relations between the Kievan state and Germany were maintained. In 1061 Henry IV gave asylum to Yaroslav's daughter Anastasiia, the wife of King Andrew I of Hungary, and sent legations to her brother Grand Prince Iziaslav Yaroslavych.

Marriages between the members of the reigning families of Germany and Rus' facilitated the political relationships between the two states. From the 11th to the 13th century, at least 12 such marriages took place. A son of Yaroslav the Wise, Sviatoslav II, the prince of Chernihiv (1054–73) and grand prince of Kiev (1073–6), married the daughter of Count Etheler of Dithmarschen. Another of Yaroslav's sons, Volodymyr, the prince of Novgorod (1034–52), was married to Oda, the daughter of Count Leopold of Stade. In 1073, another son, Grand Prince Iziaslav Yaroslavych, was forced to flee from Kiev by his brother Sviatoslav. He went to Poland and thence to Mainz to the court of Henry IV, where he appealed to Henry to help him recover the throne of Kiev from his brother. Henry sent an envoy, Bishop Burchardt of Trier, to Kiev to Sviatoslav, who in turn offered the king many precious gifts. In Germany, Iziaslav and his son Yaropolk stayed with the margrave of Thuringia, and Yaropolk married Kunigunde, the daughter of Count Otto of Orlamünde-Reichlingen. When Iziaslav failed to receive help from Henry, he sent Yaropolk with an appeal to Henry's foe, Pope Gregory VII; his plea is recorded in the Trier Psalter, which contains miniatures depicting Yaropolk's family. As the prince of Volodymyr-Volynskyi (1078–87), Yaropolk maintained personal ties with German noble houses, and his daughter married a German count. In 1089 in Cologne, Henry IV married Yevpraksiia (Praxedis Adelheid), the eldest daughter of Grand Prince Vsevolod Yaroslavych and widow of Henry, the margrave of Saxony. Through this union, Henry hoped to gain Vsevolod's political and financial support.

In the 12th century the Kievan state began to decline as a result of the internecine wars, and its constituent principalities developed on their own. From the latter half of the 12th century, the princes of Halych (Galicia) and Volodymyr (Volhynia) increased their contacts with the West. After Béla III of Hungary invaded his realm in 1189, Prince Volodymyr Yaroslavych of Halych sought refuge at the court of Emperor Frederick I Barbarossa, who received him 'with great respect' and together with Prince Casimir II the Just of Cracow helped him regain his throne. Volodymyr's successor, Roman Mstyslavych – the founder of the united Principality of Galicia-Volhynia – was involved in the wars between the German houses of Welf and Hohenstaufen and was killed in 1205 in the Battle of Zawichost against Leszek the White of

Cracow while he was an ally of King Philip of Swabia. The marriage in 1252 of Roman, the son of the Galician-Volhynian prince Danylo Romanovych, to Gertrude of Babenberg, heiress to the Austrian duchy, opened up the possibility for a Ukrainian dynasty to rule Austria. The duchy was seized by King Otakar II of Bohemia, however, and Roman was forced to flee Austria. Prince Danylo and his successors formed alliances with the \*Teutonic Knights in Prussia and Livonia in order to counter the territorial ambitions of Poland and Lithuania. They also encouraged the colonization of their realm by \*Germans, whose influx into the towns made it possible for the latter to receive the privileges of \*Magdeburg law. Thus, from the mid-13th century on, the western Ukrainian lands of Galicia, Volhynia, and the Kholm region found themselves in the German cultural and economic sphere of influence. Entire German rural communities were established there, and for some time they were governed according to \*Germanic law.

Kievan Rus' and the Principality of Galicia-Volhynia maintained ties with Germany in order to have an ally against Poland. The political balance of forces in the Rus'-Polish-German triangle was the constant aim of the Ukrainian rulers and at the same time an important factor in the political life of Europe as a whole. When medieval Ukrainian statehood came to an end in 1340, Ukraine's territories were incorporated into the Lithuanian-Ruthenian and Polish states, under which (particularly after the Union of \*Krevo in 1386) the Ukrainians' autonomy was increasingly limited and they were forced to participate in the Polish-Lithuanian wars with the Teutonic Knights. Thus, at the Battle of Grunwald (1410), where the knights were decisively defeated, 9 of the 15 regiments in the Polish army were from Galicia and Podilia, and 6 of the 17 regiments in the Lithuanian army were from Volhynia and Polisia. After this victory, trading towns began developing on the Baltic littoral, and they became an outlet for Ukraine's products.

**The 15th century to 1917.** In this long period, when the Ukrainians were essentially stateless, Ukrainian-German relations were primarily manifested in the cultural sphere. In the 16th century, with the advent of the Reformation, Ukrainians began studying at German universities. A. Pronsky, the son of a Kiev voivode, studied at Heidelberg in the mid-16th century; in the 17th century many students from Volhynia (eg, the brothers A. and Kh. Seniuta and I. Malyshko) and Podilia (eg, P. Bohynetsky) also studied there. The registers of the University of Leipzig from the mid-16th to the late 17th century contain a few dozen 'Ruthenian' students, including natives of Lviv (F. Bernatovych), Buchach (P. Yazlovetsky), and Volhynia (I. Herburt); in the 18th century, students from Russian-ruled Ukraine (H. Kozytzky from Kiev, M. Motonis from Nizhen), including the sons of Cossacks (the brothers Ostrohradsky, A. Bezborodko) and M. Smotrytsky, also studied there. Soon after Königsberg (Kaliningrad) University was founded in 1544, Ukrainians from Galicia and Podilia (K. Besky, the Zernytsky brothers, M. Danylovych, H. and M. Sakharovsky, I. Valovych, S. Biletsky) were among the first students. In the 18th century, I. Kant's lectures there were attended by S. Husarevsky, the brothers Tuman-sky, Hornovsky, and Leontovych, V. Beliavsky, O. Karasevsky, M. Shcherbak, and I. Khmelnytsky, a descendant of Hetman B. Khmelnytsky. Ukrainians also

studied at the universities of Göttingen, Cologne, Kiel, Leiden, Jena, Wittenberg, Halle, and Breslau (Wrocław). Graduates of the Kievian Mohyla Academy studied medicine at Strassburg (Strasbourg) University in the 18th century (M. Terekhovsky, O. Shumliansky, M. Karpynsky, N. Ambodyk-Maksymovych).

As the power of the Zaporozhian Cossacks grew, so did their fame. In 1594, Emperor Rudolf II sent a legation under E. \*Lassota von Steblau to the Zaporozhian Sich to solicit the Cossacks' aid in stemming Ottoman expansion in Europe; Lassota's diary of his trip is a valuable source about the history and geography of Ukraine. To encourage the Cossacks to join the anti-Turkish coalition, Rudolf offered them his banner as a symbol of his imperial protection over them. This displeased the Poles, who, in the Battle of Solonytsia near Lubni in 1596, defeated the Cossack rebels led by S. Nalyvaiko and captured the banner. Thus ended this short-lived attempt at German-Cossack collaboration.

During the Polish-Cossack wars of the first half of the 17th century, Brandenburg-Prussia, as Poland's fief, was obliged to aid Poland militarily. In 1635, a German garrison stationed at the Kodak fortress had the task of stopping fugitives from reaching the Sich.

The Cossack-Polish War of 1648-57 waged during the hetmancy of B. Khmelnytsky weakened Poland considerably and gave Duke Frederick William of Brandenburg-Prussia the opportunity to break away from Poland. In mid-1649 and 1651 a rumor spread throughout Poland that Frederick had come to an agreement with Khmelnytsky through the mediation of Prince György II Rákóczi of Transylvania. But it was only in 1655 that Frederick instructed his envoy U.G. von Somnitz to conclude such an agreement. In October 1656 Khmelnytsky joined the Swedish-Transylvanian-Brandenburg coalition against Poland. In June 1657 the Swedish envoy Daniel Oliveberg de Graecani Atheniensis arrived in Chyhyryn with Frederick's proposal to conclude a treaty of friendship, to which Khmelnytsky responded affirmatively. Negotiations continued in 1657-8, even after Khmelnytsky's death. Once Frederick had obtained complete independence from Poland, he assumed the role of mediator in peace negotiations between Poland and the Cossacks. But he also sent his envoy A. Achilles-Meyn to Hetman I. Vyhovsky to explore the possibility of a 'Protestant-Cossack alliance' in the event of conflict with Poland. Vyhovsky and his adviser Yu. Nemyrych reacted favorably, since the proposal, if it had been implemented, would have guaranteed independence for both sides from Poland and from Muscovy.

At the same time Austria feared the expansion of its imperial enemies Turkey and Sweden and any rapprochement between them and Khmelnytsky. In early 1657 Emperor Ferdinand III sent a legation headed by Archbishop P. Parchevich to Chyhyryn to promote a reconciliation between Poland and the Cossacks and to negotiate a coalition against Turkey. Khmelnytsky received the envoy with full honors and promised to halt the joint Cossack-Transylvanian offensive against Poland (he did not keep his promise).

Contacts between Ukrainian hetmans and Austrian and German rulers continued. For example, Hetman I. Mazepa corresponded in 1707 with Emperor Joseph I about receiving the title of imperial prince. Mazepa's émigré successor, P. Orlyk, conducted diplomatic cor-

respondence with Augustus II of Saxony, met with Baron A. von Bernsdorf, the chief minister of George I, in Hannover, and stayed under Habsburg protection in 1721 in Breslau, where he met and gained the sympathy of Duke Charles Frederick of Holstein. His son H. Orlyk was accepted into Augustus's own regiment in Dresden. Mazepa's nephew A. Voinarovsky fled to Germany after Mazepa's defeat and lived in Hamburg, where he was abducted by Russian agents in 1716.

German-Ukrainian relations were manifested not only in the diplomatic sphere. Thousands of Cossacks served as mercenaries in the Habsburg army during the Thirty Years' War, and over 20,000 served in the Polish army that liberated Vienna from the Turks in 1683.

During the hetmancy of I. Mazepa (1687–1709), Ukraine's cultural and economic contacts with Germany were expanded. A large part of Ukraine's raw materials and agricultural products was exported to Prussia, Silesia, and other German lands, and Danzig and Breslau became important centers for Ukraine's export trade; Breslau also supplied Ukraine with many books and periodicals. From the 18th century, Kievan artisans and merchants sold German-made products and exported their own to Saxony and Prussia.

Ukrainians continued to study at German universities. Many others, including H. Skovoroda, sojourned in Germany. The German press, such as Leipzig's *Leipziger Post* and *Europäische Fama*, Berlin's *Mercurius*, *Postilion*, *Fama*, and *Relations-Courier*, and Hamburg's *Historische Remarques über die neuesten Sachen in Europa*, reported on events in Ukraine. Several 17th-century German historians wrote about Ukraine, including J. \*Pastorius, author of *Bellum Scythico-Cosacicum* (1652), S. von Puffendorf, and J. \*Herbinius. In the late 18th century, the explorers and naturalists J. \*Güldenstädt, P. \*Pallas, K. Hablitz, and S. Gmelin wrote valuable descriptions of Southern Ukraine, and the Austrian historian J.-C. \*Engel wrote two of the first scholarly accounts of Ukrainian history.

After the first partition of Poland in 1772, Austria occupied \*Galicia and, in 1774, \*Bukovyna. Under Austrian rule the population of these lands was subjected to the evils of Germanization and foreign domination, but it also benefited from living under a relatively liberal regime (compared to Ukraine under Russian rule) and being exposed to the achievements of Germano-Austrian culture.

With the erosion of Ukrainian autonomy and finally its abolition under Russian rule in the second half of the 18th century, direct German-Ukrainian political relations declined but did not entirely disappear. In 1791, for example, V. \*Kapnist was sent on a secret mission to Berlin by a group of Ukrainian noble patriots to solicit support for a Ukrainian rebellion in the event of a Prussian-Russian war.

In the 19th century, the Germans were only marginally aware of the Ukrainian national revival, despite the fact that it was initially inspired by the ideas of the German philosopher J. \*Herder, and only a few Germans took an active interest in Ukrainian affairs. In 1861 the second secretary of the Prussian embassy in St Petersburg, K. von Schlötzer, sent a report to the Foreign Office in Berlin in which he described and supported 'Little Russian' separatist sentiments. In 1888 the Prussian philosopher E. von Hartmann, in his article 'Russland und Europa' (*Gegenwart*, 33, nos 1–3), called for the creation of an independent 'Kingdom of Kiev' in order to weaken Rus-

sia. Nevertheless, the official Prussian position until 1914 towards the dismemberment of the Russian Empire and Ukrainian independence was reserved and at times even hostile.

From the second half of the 19th century until the First World War, intensive maritime trade between Germany and Ukraine took place. Wheat, sugar beets, and mineral ores were exported to Germany, and agricultural machinery, chemicals, and textiles were imported into Ukraine. The investment and influence of German capital in the industries and mines of Russian-ruled Ukraine was significant.

In the cultural sphere, certain German and Austrian writers took an interest in Ukrainian literature, particularly in T. Shevchenko (H.-L. Zunk, J.-G. Obrist [*Taras Grigoriewicz Szeuczzenko, ein kleinrussischer Dichter*, 1870], K.-E. Franzos, W. Kawerau, W. Umlauf, G. Karpeles, J. Hart, A. Seelieb, J. Virginia, A.-M. Bosch, W. Fischer), and surveys of Ukrainian literature were published in German encyclopedias. I. Franko translated German literature into Ukrainian and informed the German-speaking world about Ukrainian affairs (some of these writings were republished in *Ivan Franko. Beiträge zur Geschichte und Kultur der Ukraine*, Berlin 1963). The works of Shevchenko, Franko, O. Kobyljanska, V. Stefanyk, and other writers were also translated into German. Ukrainian political émigrés maintained contacts with German revolutionaries; eg, S. Podolynsky and M. Ziber corresponded with K. Marx, and they read each other's works.

**The First World War and the Ukrainian Revolution.** With the outbreak of German-Russian hostilities, German policy towards Ukraine changed completely. Although the Ukrainian problem did not figure prominently in German plans for the East until 1916, German and Austrian military and diplomatic circles secretly began aiding the \*Union for the Liberation of Ukraine (svu) – an organization founded by émigrés from Russian-ruled Ukraine that promoted the idea of an independent Ukrainian state – as a means of undermining Russia. The svu had its headquarters in Vienna from August 1914; when the Austrians reduced their support in favor of the Poles, the svu moved to Berlin in spring 1915. In spring 1918 the Germans permitted the creation of two Ukrainian divisions, the so-called \*Bluecoats, from among the Ukrainians in the Russian army who were German prisoners of war. (In 1915 the Austrians had permitted the organization of two special camps for Ukrainian prisoners, and three similar German camps had been established later that year.)

During the war certain German historians and publicists wrote studies and articles about the threat of Russian expansion, while supporting the idea of Ukrainian independence and underlining the importance of the Ukrainian question for Germany and for world politics as a whole. The most prominent were P. \*Rohrbach, one of Germany's best-informed eastern experts, K. Nötzel (*Die Unabhängigkeit der Ukraine als einzige Rettung vor der russischen Gefahr*, 1915), G. Cleinow (*Das Problem der Ukraina*, 1915), and O. Kessler (*Die Ukraine. Beiträge zur Geschichte, Kultur und Volkswirtschaft*, 1916). In December 1915, the German society Ukraine was formed in Berlin; headed by Gen K. Gebattel, it published its own organ, *Osteuropäische Zukunft* (editor F. Schupp). The Ukrainian question was treated in the compendium *Die Ukraine* (1916) (particularly in F. Schupp's article 'Die Ukraine,

Deutschlands Brücke zum Morgenland'), in P. Ostwald's *Die Ukraine und die ukrainische Bewegung* (1916), A. Schmidt's *Das Ziel Russlands* (1916), and A. Penck's article 'Die Ukraine' in *Zeitschrift der Gesellschaft für Erdkunde zu Berlin* (1916). While most of Germany's eastern experts advocated playing the Ukrainian card, German and Austrian governing circles favored the creation of a Polish kingdom to counter Russia.

The February Revolution of 1917 in the Russian Empire and the creation of the Ukrainian Central Rada in Kiev caught the German government off guard. The German supporters of the Ukrainian movement, Rohrbach, Schmidt, Schupp, and others, continued and even stepped up their activity in the hope of influencing German public and government opinion about the importance of an independent Ukrainian state. The German and Austrian governments continued funding the *svu* and subsidized Ukrainian political publications, but they failed to attract the support of the UNR leaders. Nonetheless, Germany and the other Central Powers, as a result of developments in the war and the Allied blockade, were obliged to deal with the UNR and to negotiate the Peace Treaty of Brest-Litovsk with the UNR separately from their treaty with Soviet Russia. The treaty was signed on 9 February 1918, and the UNR and Germany exchanged ambassadors, and the German government ratified the treaty on 24 July 1918.

In order to ensure delivery of Ukrainian grain and other foodstuffs as negotiated in the treaty, the Germans offered military aid to help clear the territories of the UNR of Bolshevik forces; the UNR leaders responded favorably. Between 19 February and early April 1918, a 800,000-strong German-Austrian army under the command of Field Marshal H. von \*Eichhorn occupied all of Ukraine. But the interference of the German high command in Ukrainian affairs, its seizure of the transportation network, and the arbitrary and brutal requisitioning methods of the German and Austrian forces in Ukraine led to a conflict with the UNR Central Rada. This, in turn, led to the German-backed monarchist coup d'état of Gen P. \*Skoropadsky on 29 April 1918. Earlier in the month Gen W. \*Groener, chief of staff of the German high command, and the German ambassador P. Mumm von Schwarzenstein had come to terms with Skoropadsky concerning future German-Ukrainian collaboration. The agreement, which gave the Germans a free hand in trade and raw-materials procurement and strengthened German control of Ukraine (by then viewed by the Germans as their satellite), considerably restricted the actions of Skoropadsky's \*Hetman government. The population deeply resented the German military overlordship and responded to it with peasant risings and partisan warfare. After Skoropadsky met with Emperor William II in Berlin from 4 to 17 September 1918, and new agreements were made, German policy toward the Hetman regime became friendlier and more co-operative. But by then it was too late: two months later Germany capitulated and began withdrawing its troops from Ukraine. During the Austro-German occupation of 1918, Ukraine supplied 42,000 – 75,000 carloads (roughly 840,000 to 1.5 million tonnes) of foodstuffs to Germany and Austria.

During the period of the Central Rada, the Ukrainian ambassador to Germany was O. Sevriuk. The Hetman government's ambassador was F. Shteingel. After the \*Directory of the UNR overthrew Skoropadsky, the am-

bassador was M. Porsh, who was succeeded in 1920 by M. Vasylo. The German plenipotentiary in Kiev from January 1919 was O. Meissner. From 1919 to 1921 the Western Ukrainian National Republic (ZUNR) was represented in Germany by R. Smal-Stotsky. V. Orenchuk was the UNR consul in Munich from 1919 to 1922. From 1921 to 1923 V. Aussem was the first representative of the Ukrainian SSR in Berlin.

The press of the day extensively covered the Brest-Litovsk treaty and the German occupation of Ukraine in 1918. Valuable memoirs of the period have been written by several key German and Austrian figures – generals M. Hoffmann, E. von Ludendorff, and W. Groener, R. von Kühlmann, O. von Czernin, and others.

In March 1918, the \*German-Ukrainian Society was formed, headed by P. Rohrbach and A. Schmidt; it was critical of German policy in Ukraine, including the engineering of Skoropadsky's coup.

**The interwar years.** After the USSR and Germany signed the Treaty of Rapallo and the Berlin Agreement in 1922, economic relations between Soviet Ukraine and Germany were normalized. Germany and Ukraine became major trade partners, and German workers and experts helped to rebuild Ukraine's industries. A Soviet Ukrainian trade delegation was established in Berlin, and a German counterpart was located in Kharkiv. The People's Commissariat of Education of Ukraine, which created a bureau in Berlin in 1922, bought German books for Ukraine's libraries and supervised scientific and cultural co-operation, exchanges, and contacts. In the years 1925–8 over 400 Ukrainian scholars made official research trips to Germany. In 1925, scholarly and book exchanges were established between the VUAN and the Bavarian Academy of Sciences in Munich. The VUAN social-economic division had close ties with Berlin University. In the 1920s, Soviet Ukrainian writers, filmmakers, actors, opera singers, and musicians, including P. Tychna, I. Mykytenko, M. Khvylovy, O. Dovzhenko, H. Yura, L. Kurbas, M. Boichuk, V. Sedliar, V. Meller, V. Polishchuk, and O. Dosvitny, toured Germany, and German cultural figures visited and performed in Ukraine.

The German-Ukrainian Society continued its activity, and its members' writings influenced the eastern policies of the Weimar Republic. Among the society's publications were the journal *Die Ukraine* (40 issues, 1918–26) and *Knyzhka pro Nimechchynu* (Book about Germany, 1920) edited by A. Schmidt and Z. Kuzelia. On the initiative of P. Skoropadsky and with the backing of the Ukrainian Refugee Aid Society and the Society for the Advancement of Ukrainian Culture and Knowledge (and, from 1931, the German Ministry of Education), the \*Ukrainian Scientific Institute in Berlin was founded in 1926 to foster Ukrainian scholarship, provide and publish information about Ukraine, and conduct and publish research about Ukraine's relations with the West, particularly with Germany. From 1934 the institute was a state institution; it was affiliated with Berlin University until 1938.

Among the more active German Ukrainian specialists were H. \*Koch, who studied Ukrainian church history; P. Rohrbach, the author of *Deutschlands Ukraine Politik* (1918); T. von Biberstein, the author of *Die ukrainische Frage: Die Ukraine vor und nach dem Weltkrieg im Lichte der neuesten wissenschaftlichen Quellen* (1934); and particularly A. Schmidt, who in his articles and the book *Ukraine, Land der Zukunft* (1939) promoted the idea of an inde-

pendent Ukraine as being in the interest of Germany itself. Schmidt's orientation ran counter to A. \*Hitler's expansionist and racist views, however, and his works were not allowed to circulate in 1941.

1. International borders
2. Boundaries of West German states and East German districts
3. West and East German capitals

**The Second World War.** The real intentions of Nazi Germany vis-à-vis Ukraine first became evident in March 1939, when it occupied Bohemia and Moravia and sanctioned the Hungarian annexation of Carpatho-Ukraine, which in 1938 had acquired national autonomy as part of the Czechoslovak Republic. In August 1939 Germany and the USSR signed the \*Molotov-Ribbentrop Pact, according to which the USSR occupied most of Polish-ruled Western Ukraine after Germany invaded Poland in September. In the western Ukrainian borderlands that were incorporated into the Nazi \*Generalgouvernement of Poland after the invasion, minimal cultural and social activity was allowed within the framework of the \*Ukrainian Central Committee. In June 1940, the USSR took northern Bukovyna and Bessarabia from Rumania with German assent.

In June 1941, the Germans quickly overran most of Ukraine. Many Ukrainians greeted the Germans as their liberators from Soviet oppression, but this attitude soon changed as Nazi policy became evident. In July the new, Nazi, totalitarian regime suppressed the attempt to re-establish a Ukrainian state after the \*Proclamation of Ukrainian Statehood in Lviv by leaders of the Bandera faction of the OUN on 30 June and placed many OUN leaders in \*concentration camps. On 1 August, Galicia was incorporated as a district of the Generalgouvernement. The \*Reichskommissariat Ukraine was created on 20 August on the territory of Right-Bank Ukraine and large parts of central Left-Bank Ukraine; it was governed by E. \*Koch from Rivne. Northern Bukovyna, parts of Bessarabia, and so-called \*Transnistria were administered by Axis Rumania.

At the start of the Second World War, Ukrainians con-

sidered the Germans as partners in their struggle to free Ukraine from Soviet Russian domination. But from the summer of 1941 Nazi Germany began treating Ukraine as its colony (*Lebensraum*). The initial somewhat positive attitude toward Ukrainians as expressed by A. \*Rosenberg gave way to the extreme policies of Hitler, H. Himmler, and E. Koch. Although conditions were somewhat better for Ukrainians who found themselves under the Generalgouvernement, in general all Ukrainians were treated by the Nazi regime as a subhuman (*Untermenschen*) work pool. Most Ukrainians therefore actively or passively resisted Nazi policies in Ukraine and paid dearly for this resistance.

During the German wartime occupation, 6.8 million inhabitants of Ukraine perished as a consequence of the German-Soviet war or of German terror and the Holocaust; more than 700 cities and towns and over 28,000 villages were destroyed. Between two and three million Ukrainians were deported as \*Ostarbeiter, or slave laborers, to the Third Reich. All oppositionist and independentist groups, such as the \*Ukrainian national councils founded in Lviv in July and in Kiev in October 1941, the \*Organization of Ukrainian Nationalists, and its expeditionary groups, were brutally persecuted, and the organized Ukrainian nationalist movement became an anti-German underground that contributed to Germany's defeat on the Eastern Front. From 1941, groups of Ukrainian partisans led by T. \*Borovets in Volhynia and Polisia engaged in guerrilla warfare against both the German and the Soviet military (including the Soviet partisans). From 1943 this guerrilla warfare was spearheaded in Western Ukraine by the \*Ukrainian Insurgent Army. In 1943, however, a Ukrainian volunteer formation, the \*Division Galizien, was created as part of the German armed forces on the Soviet front; it was supported by the Ukrainians not as a German unit, but as the core of the armed forces in a future independent Ukraine. From August 1943 the Soviet offensive in Ukraine gained momentum, but it was only in October 1944 that the last German forces retreated from Ukrainian soil.

**The postwar period.** Since the Second World War, Ukraine has had official economic and cultural ties primarily with the Soviet client state of East Germany. The nature and extent of these ties are decided in Moscow. In 1958, a Ukrainian section, headed by I. Bilodid, of the Society for Soviet-German Friendship and Cultural Relations was founded in Kiev. The inhumane and destructive policies of the Nazi regime in Ukraine have tainted the perception of Germans in Soviet Ukraine. West Germany, in particular, is viewed negatively from the Soviet perspective as the successor to the Third Reich and an enemy because of its NATO affiliation; this has precluded any meaningful co-operation between Bonn and Kiev. Nonetheless, in 1986 the governments of the West German Federal Republic and the USSR agreed to open a German consulate in Kiev and a Soviet one in Munich. Other Ukrainian-German relations exist in West Germany as a result of the presence of émigrés and displaced persons who took refuge there after the war.

In 1948 the German-Ukrainian Society was revived in Munich. Between 1952 and 1958 it published 44 issues of the journal *Ukraine in Vergangenheit und Gegenwart* (editor H. Prokopchuk) and several books. In 1960 the society was merged with the \*Herder German-Ukrainian Society, which was founded in Munich on the initiative of I. Mirchuk and H. Koch in 1948.

Ukrainian Studies Building in Munich, home of the Ukrainian Free University, the Shevchenko Scientific Society, and the Ukrainian Technical and Husbandry Institute

In 1946, the \*Ukrainian Free University (UVU), which from 1921 to 1945 was located in Prague, was re-established in Munich. The \*Shevchenko Scientific Society – the leading scholarly society in Western Ukraine from 1873 to 1939 – was revived in Munich in 1947, and the \*Ukrainian Technical and Husbandry Institute – the correspondence school of the Ukrainian Husbandry Academy in Poděbrady, Bohemia, from 1932 to 1945 – was revived in Regensburg in 1945. In order to facilitate contacts with German academic circles, these three institutions formed the \*Association for the Advancement of Ukrainian Studies in 1962.

#### Ukrainians in Germany

To 1939. Until 1914, Ukrainians came to Germany on an individual basis and only temporarily, as visitors or as students; eg, M. Lysenko studied at the Leipzig Conservatory and A. Sheptytsky, the future metropolitan, studied at Breslau University. From the late 19th century, certain Ukrainian artists have gone to Germany to study and to improve their technique (eg, M. Ivasiuk, M. Sosenko, I. Trush, Yu. Narbut, O. Murashko, M. Parashchuk, Ye. Lipetsky, D. Horniatkevych). Thousands of Ukrainians from Austrian-ruled Western Ukraine went there for seasonal work. The club *Ukraina* was founded in Hamburg in 1908. During the First World War, Germany was home to members of the svu and other expatriates, who were involved in relief work on behalf of some 200,000 Ukrainian soldiers in the Russian army interned in German prisoner-of-war camps near \*Wetzlar, \*Rastatt, and \*Salzwedel. From 1918 to 1921, the UNR and the Ukrainian State (the Hetman government) had an embassy and numerous missions in Berlin.

In 1919, relatively small numbers of political refugees who had taken part in the Ukrainian struggle for independence began settling in Germany. \*Berlin became the center of Ukrainian activity. The \*Ukrainska Hromada society was founded there in 1919; at first a non-partisan society, it became the center of the Hetmanite movement. In 1933 the \*Ukrainian National Alliance was founded in Berlin; an OUN affiliate from 1937, it became a powerful civic organization. Two major Ukrainian publishing houses existed in Berlin: Ya. Orenstein's \*Ukrainska Nakladnia (1919–33) and \*Ukrainske Slovo (1921–6),

directed by Z. Kuzelia. There were also several smaller publishers. Several Ukrainian newspapers and periodicals were published there, including \*Ukrains'ke slovo (1921–4), \*Ukrains'kyi prapor (1923–31), \*Osteuropäische Korrespondenz (1926–30), and *Ukrainischer Pressedienst / Ukrains'ka presova sluzhba* (1931–9) (bulletins of the \*Ukrainian Press Service).

A few hundred Ukrainian émigré students attended German universities. In 1921 they organized the Association of Ukrainian Students in Germany; branches, as well as independent student societies, were created in Berlin, Königsberg, Kiel, Göttingen, Breslau, Danzig (\*Gdansk), and elsewhere. In 1924 an umbrella organization, called from 1925 the Union of Ukrainian Student Organizations in Germany and Danzig, was founded; in 1939 it was renamed the National Union of Ukrainian Student Organizations in Germany and in 1941 the \*Nationalist Organization of Ukrainian Students.

Emigré leaders, such as Hetman P. Skoropadsky, Ye. Petrushevych, the president of the Western Ukrainian National Republic, and Ye. Konovalets, the head of the Ukrainian Military Organization, lived in Berlin with their close associates. From 1919 I. Poltavets-Ostrianytsia, the leader of the Free Cossacks, lived in Munich. In 1927 a Ukrainian Greek-Catholic parish was created in Berlin; in 1940 its pastor, P. Verhun, became the apostolic visitor for Ukrainian Catholics in Germany, and a parish was also created in Munich. In the 1930s a Ukrainian Orthodox parish also existed in Berlin.

*The Second World War.* On the eve of the war about 10,000 Ukrainians lived in Germany. They were joined by Ukrainians fleeing from Hungarian-occupied Transcarpathia in 1938. After Poland fell in 1939, Ukrainians – former soldiers in the Polish army, inhabitants of the Generalgouvernement, and refugees fleeing the Soviet occupation of Western Ukraine – found their way to Germany. During the German-Soviet war of 1941–5, hundreds of thousands of Ukrainians in the Soviet army who had been captured or surrendered were interned in Germany and brutally treated; many of them died in the prison camps. In pursuit of *Lebensraum*, and to ease the labor shortage caused by conscription, and to keep the German economy going, millions of foreigners were recruited or forcibly deported to work in Germany. Beginning in 1940 certain Ukrainians in the Generalgouvernement went to work in Germany voluntarily; many more were taken forcibly, as were between two and three million Ostarbeiter from Soviet Ukraine. The latter, in particular, were treated as *Untermenschen*, had no rights, and were subjected to extremely poor living and working conditions and harsh treatment, including beatings, executions, and incarceration in concentration camps for any infractions. Only in late 1944, after the Germans had retreated from Ukraine, did the Nazi regime attempt to moderate its attitude towards the Ostarbeiter as a whole. The Ukrainian Ostarbeiter were allowed to have a Ukrainian custodial agency, the *Ukrainische Betreuungsstelle*, headed by O. Semenenko (the former mayor of Kharkiv), which looked after their cultural needs. From 1941 Ukrainian workers in Germany from the territory of the Generalgouvernement were represented and aided by the Berlin bureau (directed by A. Figol) of the \*Ukrainian Central Committee. With the wartime increase of the number of Ukrainians in Germany, the two major Ukrainian civic organizations already existing there expanded.

The nationalist Ukrainian National Alliance (headed by T. Omelchenko) by 1942 had 42,000 members in 1,268 branches; it published the newspaper *\*Ukrains'kyi visnyk*. The Hetmanite *Ukrainska Hromada* had over 6,000 members and published the newspaper *\*Ukrains'ka diisnist'*. An official German agency, the *\*Ukrainian Institution of Trust* (*Ukrainische Vertrauensstelle im Deutschen Reich*, headed by M. Sushko), kept a register of Ukrainians in Germany and issued identity papers. As a result of its efforts, the *\*German Labor Front* created a department to take care of the Ukrainian workers' social and cultural needs.

*The postwar period.* At the end of the war, some 2.5 to 3 million Ukrainians found themselves in Germany. Most were forcibly repatriated to the USSR during 1945 (see *\*Repatriation*). Thus, at the beginning of 1946 only about 180,000 Ukrainians remained in Germany – after the Poles, the second largest national group of *\*displaced persons*. Most of them were resettled within five years in Belgium, France, Great Britain, and later the United States, Canada, Brazil, Australia, and elsewhere overseas. Because of *\*emigration*, the number of Ukrainians in Germany fell to 140,000 in 1947, 111,000 in 1948, 86,000 in 1949, and 55,000 in 1950.

The Ukrainian displaced persons camp near Augsburg, 1947

In 1947 most Ukrainians were housed in 134 displaced persons camps; a minority lived in private dwellings. The largest concentrations of Ukrainians were in the regions of Bavaria (66,000), Baden (9,400), and Hesse (8,200) in the American occupation zone; Lower Saxony (10,800), north Rhineland-Westphalia (6,800), Schleswig-Holstein (1,500), and Hamburg (3,200) in the British zone; and Rhineland Pfalz (3,300) and Württemberg (2,200) in the French zone. In 1946–7, the camps with large numbers of Ukrainians were: in the American zone, Regensburg (4,660), Mittenwald-Jäger-Kaserne (2,890), Augsburg-Somme-Kaserne (2,640), Munich-Freimann (2,580), Cornberg (2,340), Ellwangen (2,330), Ettlingen (2,150), Berchtesgaden-Orlyk' (2,110), Bayreuth (2,170), Munich-Schleissheim (2,020), Aschaffenburg-Pionier-Kaserne (2,000), Neu-Ulm (1,930), Mainz-Kastel (1,800), Dillingen (1,660), Stuttgart-Zufenhausen (1,580), Aschaffenburg-Artillerie-Kaserne (1,450), Bamberg (1,380),

Aschaffenburg-Lagerde (1,300), Aschaffenburg-Bois Brule (1,300), Karlsruhe (1,300), Ingolstadt (1,280), Mittenwald-Pionier-Kaserne (1,190), Stephanskirchen (1,170), Pforzheim (1,130), Neumarkt (1,070), Reiterzeich (970), Landshut (900), Erlangen (810), Ludwigsburg (800), and Munich-Laim (720); in the British zone, Hannover-Ly-senko' (3,430), Heidenau (3,030), Rheine (1,910), Münster-Lager (1,530), Mülheim-Ruhr (1,440), Hallendorf (1,420), Bathorn (1,350), Lintorf (1,320), Goslar (1,200), Hamburg-Falkenberg (1,110), Burgdorf (970), Braunschweig (900), Bielefeld (850), Delmenhorst (800), Korigen (740), Göttingen (680), and Godenau (650); and in the French zone, Gneisenau (1,370), Bad Kreuznach (670), Landstuhl (610), and Trier (530).

*Since 1950.* When mass resettlement came to a halt at the beginning of the 1950s, only about 20,000 Ukrainians remained in West Germany (most were elderly or disabled and not eligible for resettlement). When the camps were closed down, these persons were registered as stateless, granted rights (excluding political rights) equal to those of the German population, and integrated into German society. Most of the employable Ukrainians moved into urban-industrial areas. In 1970, 8,700 (44 percent) of the Ukrainians lived in Bavaria, 3,500 (18 percent) in Baden-Württemberg, 3,300 (16 percent) in Hesse, 1,550 (7.3 percent) in Westphalia, 1,450 (7.2 percent) in Lower Saxony, 500 (2.3 percent) in Hamburg, 400 (2 percent) in Bremen, and about 600 (3 percent) elsewhere. Eighty percent of the employable Ukrainians worked in industry and construction, 5 percent worked in agriculture, and 3 percent worked for Ukrainian civic organizations and community enterprises. After the war a small number of Ukrainians started up their own businesses and private enterprises. Some Ukrainians are professionals (doctors, dentists, engineers, lawyers, teachers, professors, etc).

Most Ukrainians in West Germany (67 percent) are Byzantine Catholics, a third (31 percent) are Orthodox, and 2 percent belong to other denominations. In 1948 the Catholics had 39 communities and 151 priests, the Orthodox had 38 communities and 99 priests, and the Evangelicals had 17 communities and 19 ministers. By 1949, the number had declined to 21 Catholic communities and 48 priests, 23 Orthodox communities and 52 priests, and 12 Evangelical communities and 12 ministers. In 1980, there were 21 Catholic communities ministered to by 26 priests and 20 Orthodox communities with 10 priests. The Ukrainian Catholic church in Germany became an exarchate in 1959. Headed by Bishop P. *\*Kornyliak*, it consists today of four deaneries with about 13,000 faithful. The Ukrainian Autocephalous Orthodox church (UAOC) was headed by Metropolitan N. *\*Abramovych*; he was succeeded by Archbishop O. Iva-niuk, who was succeeded in 1981 by Archbishop A. *\*Dubliansky*. The administrator of the UAOC in Germany is Archpresbyter P. *Dubysky*. A part of the Orthodox faithful belong to the Ukrainian Autocephalous Orthodox Church (Conciliar).

In the immediate postwar period, there were five institutions of higher education – the Ukrainian Free University, the Ukrainian Technical and Husbandry Institute, the *\*Ukrainian Higher School of Economics* (1945–51), the *\*Theological Academy of the UAOC* in Munich, and the Ukrainian Catholic Theological Seminary in Hirschberg (1946–9) – with a total of 1,270 students and 314

professors/lecturers. With the departure of most of the Ukrainians the network of Ukrainian schools fell apart, and Saturday schools were created to provide children with a Ukrainian education. The latter are supervised by the \*Central Representation of the Ukrainian Emigration in Germany, an umbrella civic body created in 1945. The number of Ukrainian schools and nursery schools has decreased: in 1955 there were 41 Saturday schools and 24 nursery schools, but in 1970 there were only 20 and 3 respectively.

From 1945 to 1951, the Ukrainians' civic, cultural, professional, and political activity was very dynamic. They had 41 organizations with 638 local branches and 58,000 members; 44 publishing houses, which issued 147 periodicals and over 700 books; 31 orchestras and bands, 60 choirs, and 54 amateur theatrical groups. Among the professional groups were the theatrical troupes directed by V. Blavatsky and Y. Hirniak, the choirs conducted by N. Horodovenko and V. Bozhyk, and the Ukrainian Banduryst Chorus directed by H. Kytasty. Various professional and co-operative associations also existed. Artists, musicians, and writers had their own organizations, the most prominent being \*MUR – the Artistic Ukrainian Movement. There was also an Association of Ukrainian Journalists. The 2,300 postsecondary students in 1947 were members of well-organized, active Ukrainian student communities, and from 1946 to 1952 the \*Central Union of Ukrainian Students had its headquarters in Munich. The scholarly Ukrainian Free Academy of Sciences and the \*Shevchenko Scientific Society were based in Germany for a few years after the war until most of their members were resettled.

Since the Second World War, \*Munich has been the center not only of Ukrainian cultural, scholarly, and civic activity, but also of most of the Ukrainian émigré political organizations in West Germany, such as the \*Ukrainian National Council, the \*Government-in-exile of the Ukrainian National Republic, and the \*Anti-Bolshevik Bloc of Nations. The OUN leaders S. \*Bandera and L. \*Rebet were killed by Soviet agents while living in Munich. Since the war several Ukrainian publishing houses have been located in Germany: Suchasnist, \*Ukrainske Vydavnytstvo, Logos, Dnirova Khvyliia, Verlag Ukraine of the German-Ukrainian Society, \*Molode Zhyttia, Khrystyianskyi Holos, the M. Orest Institute of Literature, Na Hori, and Ukrainski Visti. Together, in the years 1951–80 they published some 220 titles.

Two Ukrainian weeklies – \*Shliakh peremohy and \*Khrystyians'kyi holos – the monthly journal \*Suchasnist, and the UAOC quarterly \*Ridna tserkva still appear in Germany. The newspapers \*Meta and \*Ukrains'ki visti were recently transferred to the United States. Such periodicals as \*Ukrains'ka trybuna, \*Suchasna Ukraïna, \*Ukrains'kyi samostiinyk, \*Vpered, Ukrains'kyi zbirnyk, and Ukrainian Review of the \*Institute for the Study of the USSR, \*Digest of the Soviet Ukrainian Press, and \*Ukraïna i svit (Hannover) have ceased publication.

Various civic, cultural, religious, youth, and student organizations have existed in West Germany since the war. All of the organizations are constituent members of the Central Representation of the Ukrainian Emigration in Germany. Some scholars who remained in West Germany have taught at universities: D. Chyzhevsky at Heidelberg, O. Horbach at Frankfurt, Yu. Blokhyn, A. Bilynsky, H. Nakonechna, and M. Antokhii at Munich,

D. Zlepko at Bonn, and B. Osadchuk at the Free University of Berlin. Several Ukrainians have systematically provided the German press with information about Ukraine and the Ukrainians: the Sovietologists B. Levytsky and B. Osadchuk, and the literary specialist and translator A.H. Horbach.

Many other émigrés who remained in Germany have left their mark in the life of the Ukrainian community in many spheres – in politics: A. and M. Livytsky, S. Baran, I. Mazepa, V. Vytvytsky, S. Dovhal, I. Bahriany, Ya. and S. Stetsko, L. and D. Rebet, B. Kordiuk, D. Andriievsky, O. Boidunyk, M. Kapustiansky, V. Dolenko, F. Pigido, and Ya. Makovetsky; in scholarship: I. Mirchuk, Yu. Paineiko, V. Oreletsky, Yu. Boiko-Blokhyn, V. Yaniv, B. Krupnytsky, N. Polonska-Vasylenko, P. Zaitsev, Ye. Glovynsky, Yu. Studynsky, M. Miller, P. Kurinny, O. Horbach, P. Fedenko, I. Hrynokh, M. Hotsii, H. Vaskevych, and Z. Sokoliuk at the Ukrainian Free University, and B. Ivanytsky, P. Savytsky, R. Yendyk, M. Korzhan, I. Maistrenko, and A. Figol at the Ukrainian Technical and Husbandry Institute; in literature and literary scholarship: M. Orest, E. Andriievska, I. Kachurovsky, I. Kostetsky, V. Derzhavyn, I. Koshelivets, and O. Hrytsai; in art: H. Kruk, V. Vardashko, V. Strelnikov, and V. Sazonov; in journalism: Z. Pelensky, V. Stakhiv, M. Konovalets, M. Styranka, H. Horbach, V. Maruniak, and H. Prokopchuk; in social-cultural work: Yu. Pavlykovsky, V. Pliushch, A. Melnyk, V. Didovych (now archbishop), S. Mudryk, I. Zheguts, V. Lenyk, and Yu. Kavlachuk.

The generation of Ukrainians raised in Germany after the war has by and large been assimilated by its host society. Many individuals can no longer speak Ukrainian and take no part in community life. This process has particularly affected the offspring of mixed marriages and individuals living in cities where there is no organized community.

Germans who have contributed to the field of Ukrainian studies in the postwar period include G. Stadtmüller, E. Koschmieder, A. Schmaus, H. Rheinfelder, N. Lobkowicz, J. Madey, T. Rhode, L. Müller, F. Heyer, G. Horn, E. Völkl, H. Glassel, and B. Gröschel in West Germany; and E. Winter, E. Reissner, B. Widera, L. Richter, and M. Wegner in East Germany.

A. Zhukovsky

**Gerontology.** Branch of science dealing with the phenomenon of aging in living beings, including man. Gerontology includes the study of the biology and pathology of aging, diseases and debilities of the aged and medical care for old people (geriatrics), and the social aspects of aging. Research encompasses not only medical and scientific methods of prolonging life and improving the quality of life in old age, but also addresses public policies affecting the aged. Some interest in the problem of aging can be detected among practitioners of the healing arts in Kievan Rus', who observed and noted the characteristic symptoms of aging. Concern for the aged increased after the introduction of Christianity; Grand Prince Volodymyr the Great decreed that every church establish an almshouse, and every monastery a settlement for the aged. Later, nobles, hetmans, and then the tsar's treasury were responsible for maintaining such institutions.

In 1712 Peter I ordered the establishment of poorhouses for old people throughout the Russian Empire, including its Ukrainian possessions. In 1864 they were placed under the \*zemstvos, and from 1870, at least partly, under municipal governments.

Beginning in the 18th and 19th centuries, individual physicians in Ukraine began studying aspects of the pathology of aging. The first scientific school of gerontology, not only in Ukraine but in the entire Russian Empire, was founded by I. \*Mechnikov in 1886 in Odessa. He developed a theory on aging and claimed that the process could be controlled by means of a proper diet and surgery. In Kiev, M. \*Strazhesko devoted much attention to gerontological and geriatric problems. Like his teacher V. Obratsov (1849-1920), he distinguished physiological and pathological aging, and emphasized the dominant role of the central nervous system in all physiological and pathological processes.

After the 1917 Revolution the first important gerontological schools in the USSR arose in Ukraine. One of them was founded by the pathophysiological O. \*Bohomolets, who in 1931 established the Institute of Experimental Biology and Pathology in Kiev. In 1938 Bohomolets helped organize a large conference in Kiev on aging and longevity, the first such conference in the USSR. Its proceedings were published by the AN USSR in a collection titled *Starost'* (Old Age, 1940). A second major school of gerontology emerged at the Institute of Biology of Kharkiv University under the biochemist O. \*Nahorny.

After the war gerontological research was resumed in Kiev by students of Bohomolets, and in Kharkiv by Nahorny and his school. In 1950 Nahorny's book *Starenie i prodlenie zhizni* (Aging and the Prolongation of Life) appeared. In the following year Bohomolets's students under the direction of Yu. Spasokukotsky carried out a clinical-physiological survey of about 11,000 old people throughout Ukraine (except the Crimea). This survey involved the participation of over 1,500 medical workers. In the second half of the 1950s similar surveys were begun for the entire USSR.

In fall 1958 the \*Institute of Gerontology of the USSR Academy of Medical Sciences was established in Kiev. Under its directors M. \*Horiev (N. Gorev) and D. \*Chebotarov, it has co-ordinated all gerontological and geriatric research and practical work in the USSR. In 1959 the institute established geriatric cabinets at polyclinics in Kiev, and in 1960 at polyclinics in Kharkiv. At the same time it carried out a USSR-wide survey of people over 80 years of age. In 1961 the institute sponsored a conference with over 400 participants from all parts of the USSR; the impact of the conference was so great that the goal of extending life expectancy by means of social, economic, and medical measures was added to the CPSU program.

In 1963 a USSR conference on aging and a symposium of World Health Organization gerontologists were held in Kiev, and the USSR Association of Gerontologists and Geriatricians was founded. A 1964 symposium 'Way of Life and Human Aging' was followed by the establishment of new gerontological and geriatric institutions in various cities of the USSR and of the Chair of Gerontology at the Kiev Institute for the Upgrading of Physicians. In subsequent years international gerontological courses (1965, 1967), an international symposium on kinetic activity and aging (1968), and the Ninth International Gerontological Congress (1972), the proceedings of which

were published in English, were held in Kiev. Many Ukrainian scientists have contributed to the development of gerontology; they include O. Makarchenko, M. Mankivsky, O. Mints, E. Podrushniak, I. Bazylevych, and (in Rumania) V. Jucovschi (Zhukovsky).

H. Schulz

**Gerovsky, Georgii** [Gerovskij, Georgij], b 6 October 1886 in Lviv, d 1959 near Prešov, Slovakia. Linguist specializing in the dialects of Transcarpathia, who graduated from the universities of Leipzig and Saratov. He was a grandson of A. \*Dobriansky, whose Russophile tradition he continued. Opposed to Ukrainian being the standard language of the region, Gerovsky promoted Russian and attacked I. \*Pankevych and his Ukrainian grammar (1930). He wrote articles on the history, literature, and language of Transcarpathia and a survey of Transcarpathian dialects in the Czechoslovak compendium *Československá vlastivěda* (vol 3, 1934), which is rich in factual material but marred by his Russophile views. In his last years Gerovsky taught Russian language and literature at Prešov University.

Yaroslava Gerulak: *Athena and Zeus* (terra-cotta)

**Gerulak, Yaroslava** [Geruljak, Jaroslava], b 5 May 1933 in Stopnica, near Kielce, Poland. Artist. Gerulak studied at Siena Heights College, Northwestern University, and the Art Institute of Chicago, and taught at Manhattanville College in Purchase, New York (1955–7). She is a member of the Association of Ukrainian Artists of America and has exhibited in Paris, New York, Toronto, and other cities. Gerulak works in a number of mediums; of special interest are her ceramic sculptures, in which she depicts mythical and folklore themes in both archaic and modern forms (eg, *Young Neptune on a Fish*, *Prince Thor*, *Sun on a Bicycle*).

**Gestapo** (abbreviation of Geheime Staatspolizei). Secret police of Nazi Germany. Created in 1933, it became an adjunct to H. Himmler's ss and developed into the most

dreaded Nazi security agency, using its virtually unlimited powers to uncover, imprison, and kill 'enemies of the Reich.'

After the signing of the Molotov-Ribbentrop pact the Gestapo collaborated with the NKVD in persecuting political opponents. Following the invasion of the USSR, Gestapo officials headed the ss mobile killer squads (*Einsatzgruppen*) that murdered Jews in the occupied territories; they also organized the deportation of Jews to extermination camps. The Gestapo's other principal wartime function was to suppress resistance movements throughout Europe. In 1939–40 Gestapo agents arrested members of the UNR government-in-exile in Warsaw and Paris. When the Ukrainian nationalist movement began to oppose German policy, the Gestapo imprisoned leaders of the OUN (Bandera faction) and killed leading OUN (Melnyk faction) figures in Zhytomyr and Kiev (including I. Irlivsky, I. Rohach, and O. Teliha). It conducted mass arrests and executions of rank-and-file nationalists and played a leading role in terrorizing the population during the Nazi occupation of Ukraine.

**Getae.** North Thracian tribes, also called Dacians, that in the 5th century BC inhabited the lower Danube region. From the 4th century BC, they occupied the area south of the Carpathian Mountains from Dobrudja to the Dniester River. About 60–50 BC, their king Burebistas united them and the neighboring Boii and Tauri into a powerful Getic-Dacian kingdom, which fell apart after his death. In AD 106, the Getae were subdued by Rome. Many of them were killed or driven northward, and their territories were incorporated into the Roman provinces of Moesia and Dacia.

Lev Gets

**Gets, Lev** [Gec] (Getz, Leon), b 13 April 1896 in Lviv, d 16 December 1971 in Cracow. Painter and graphic artist. Gets studied with I. Levynsky and O. Novakivsky in Lviv and at the Cracow Academy of Art (1919–23). He was a member of the Association of Independent Ukrainian Artists, and exhibited with this group in Lviv, Prague, Berlin, and Rome. After the Second World War, Gets became a professor at the Academy of Art in Cracow (1950–8). His earlier works include [*Sich*] *Rifleman's Anthology 1915–18* (over 500 drawings and sketches), a cycle of drawings from his stay in the Polish concentration camp at Dąbie, many drawings of Sianik, and over 100 works depicting the life of the Lemkos. His Cracow period includes almost 500 drawings of the old architecture of Cracow. Now housed in the city's historical museum,

100 of these were published as an album titled *Dawne dziedzińce i podwórza Krakowa w rysunkach Leona Getza* (Old Courts and Courtyards of Cracow in the Drawings of Leon Getz, 1958). The influence of symbolism imparts to his realistic paintings and drawings a surreal quality. Gets is the subject of a monograph by P. Kovzhun (1939).

**Giannini, Amadeo**, b 19 September 1886 in Naples, d 19 December 1960 in Rome. Italian jurist, specialist in international law, diplomat, senator, professor of Rome University, expert on East European affairs. He was a founder of the Institute of Eastern Europe, president of the Central State Archive in Rome, director of the Department of Commercial Affairs at the Foreign Ministry (1937–42), president of the Italian-Ukrainian Friendship Society (from 1952), and a full member of the Shevchenko Scientific Society (from 1955). He wrote numerous books on diplomatic history and international law and many publicistic works on contemporary Eastern Europe.

**Giliarov, Aleksei** [Giljarov], b 20 December 1855 in Moscow, d 7 December 1938 in Kiev. Philosopher; from 1922 full member of the AN URSR. Giliarov graduated from Moscow University and was a professor at Kiev University from 1891. As a Platonist he held that philosophy was not a science but a striving to reconcile the truth of reason with the truth of the heart. Besides studies of the Greek sophists and of Platonism, he wrote *Znachenie filosofii* (The Significance of Philosophy, 1888) and *Filosofia v ee sushchestve, znachenii i istorii* (Philosophy in Its Essence, Meaning, and History, 2 vols, 1916–19). In his unfinished work *Skhema istorii filosofii v osveshchenii istoricheskogo materializma* (A Schema of the History of Philosophy in the Light of Historical Materialism, 1926–7) he attempted to revise his philosophical outlook to accommodate Marxism. He was also a student of literature, chemistry, psychology, and physiology.

**Girei** (Girāy). A dynasty of Crimean khans from the 15th to the 18th century, founded ca 1434 by Haji-Girei (d 1466) who, with the disintegration of the \*Golden Horde, proclaimed himself the ruler of an independent Crimean Khanate. In 1475, Mengli-Girei became a vassal of the Turkish sultan. The name Girei is linked with large, continual raids on Ukraine, involving pillaging and burning of villages and the capture of slaves. \*Islam-Girei III formed a pact with Hetman B. Khmelnytsky against Poland. In 1783, the last of the Gireis, Shagin-Girei, was forced to abdicate and the Crimea was annexed to the Russian Empire (see \*Crimea).

**Girsa, Václav**, b 28 November 1875 in Shepetivka, Zaslav county, Volhynia gubernia, d 1942? Czech political figure. After completing his medical studies in 1900, he worked as a physician in Kiev. In 1917–18 he was a leading figure in the Czech movement in Ukraine and assisted in the organization of the Czechoslovak Legion. From 1921 to 1928 he directed a department of the Czechoslovak foreign ministry, and he then worked in the diplomatic service. Girsa headed relief programs for Ukrainian immigrants in Czechoslovakia. With his help a number of Ukrainian scientific and cultural institutions were established, including the Union of Ukrainian Physicians.

Innokentii Gizel

**Gizel, Innokentii** [Gizel', Innokentij], b ca 1600 in East Prussia, d 28 November 1683 in Kiev. Orthodox church and cultural figure of German descent. After graduating from the Kievan College (later the \*Kievan Mohyla Academy) in 1642, Gizel continued his studies at the Zamostia Academy and abroad. From 1646 to 1656, he was the hegumen of a number of Kievan monasteries, as well as a professor of philosophy and rector of the Kievan College (1645–56). As archimandrite of the Kievan Cave Monastery (1656–83), he was director of its printing house. In the 1650s he participated in negotiations with Russian church leaders on the status of the Ukrainian Orthodox church. He may have been responsible for the publication of the \*Kievan Cave Patericon in 1661 and 1678, and the author of the \**Sinopsis* (1674), the first handbook of Ukrainian history. Gizel wrote a textbook of general philosophy, *Opus totius philosophiae* (1647), for his courses and *Myr s Bohom choloviku* (Man's Peace with God, 1669, 1671), which summarized his views of contemporary ethical and religious standards. He also wrote several polemical works against Catholicism. One of the most erudite scholars of the Kievan College, Gizel was referred to by his contemporaries as the 'Aristotle' of Kiev. He is the subject of an extensive biography by M. Sumtsov in *Kiev-skaia starina*, 1884, no. 10.

**Gizhytska, Zoia** [Gižyc'ka, Zoja], 1895–1935. Botanist, mycologist. Gizhytska was the head of the mycology laboratory at the Institute of Botany of the VUAN. A number of her articles on mycology and phytopathology were published in *Visnyk Kyivs'koho botanichnoho sadu*. Persecuted by the Soviet authorities, she committed suicide.

**Glagolitic alphabet.** An old Slavic script in which the most ancient Old Church Slavonic manuscripts were written. Its origin has been disputed for a long time but it was most likely invented by \*St Cyril, who also included some Hebrew letters. Under Byzantine influence it was soon replaced by the \*Cyrillic alphabet, which in the shape of most letters was patterned on the Greek alphabet. There is no information on the systematic use of Glagolitic in Kievan Rus', although individual Glagolitic letters and short Glagolitic insertions occasionally occur in 15 (according to G. Ilinsky) East Slavic manuscripts of the 11th to 15th centuries, two of which are from Ukraine.

**Glass, art.** Branch of decorative applied art and of the \*glass industry, producing glassware, sculptures, stained glass, small mosaics, architectural details, and bijouterie. In the 10th–13th centuries polychrome and gilt smalts, decorated religious objects, chimes, glass ornaments, colored windowpanes, and figural drinking vessels were produced in Ukraine at such localities as Kiev and Kolodiazhyn, Volhynia. The earliest techniques of shaping glass were drawing and casting. At the turn of the 10th century glassblowing was mastered. Later, refining by double melting was used to produce clear, transparent glass. Surviving glassware from the 10th–13th centuries shows that there were two types of products: cheap glassware made of ordinary green glass or Waldglas, and expensive glassware made of valuable white or crystal glass. The glassware was decorated with monochrome or polychrome glass thread or ribbon which was applied to form spirals, wavy lines, or geometric designs. In later centuries this remained the basic ornament of Ukrainian glass products. In the 16th–19th centuries the main glass-making areas were the Lviv (Belz, Liubachiv) and Chernihiv regions.

The manufacture of artistic glass reached its highest state of development in the 18th and beginning of the

19th century. New, well-equipped glassworks were built. The cylindrical technique of making plate glass was mastered, and new methods of working and decorating glass, such as enameling, cutting, engraving, and gilding, were adopted. A Ukrainian style, consisting essentially of a close link between the form of the object and its decoration, evolved. Figural products were a unique feature of Ukrainian art glass: bottles and cylindrical containers were shaped as animals or birds, or as grotesque figures from folktales and proverbs. Bowl-baskets made of thin applied glass and candelabra with filigree ornamentation were a specialty of Volhynia. The Lviv region (Zhovkva) specialized in glass chandeliers. Many kinds of decoration were used in the 18th–19th centuries: molded applied ornaments (geometric designs, small figures), enamel painting on thin-walled products (mostly floral motifs and sometimes thematic representations), oil painting, which was related to folk wall painting (mostly floral motifs), incision of floral patterns (sunflowers, daisies) by means of round or oval notches, engraving (portraits, coats-of-arms), and gilding.

In the second half of the 19th century the manufacture of art glass began to decline because of competition from factory-made goods. It was only in the 1930s that glass-

Glass art: (above) ram, 18th century, free-blown colorless glass (Kiev Museum of Ukrainian Decorative Folk Art); (right) decanter, early 19th century, engraved free-blown colorless glass (Ukrainian State Museum of Ethnography and Crafts, Lviv)

works in Soviet Ukraine began to produce art glass such as the ruby *Kremlin Stars* (1937) and the crystal fountain for the Soviet pavilion at the New York World's Fair (1939), which were made at the Kostiantynivka Avtosklo Plant. Art glass was increasingly used in architecture and in decorative applied art. The art of stained glass was revived. Most stained-glass windows were assembled at glassworks factories in Kiev and Kostiantynivka. The best-known works of the period were *The Council of Pereiaslav*, a window designed by G. Yun, V. Davidov, and S. Kyrychenko for Ukraine's pavilion at the USSR Exhibition of the Achievements of the National Economy, and *Friendship of Nations*, designed by A. Mysyn and others. Since the 1950s, the manufacture of unique articles used in exhibits, prizes, and souvenirs has been emphasized. Cutting and deep-etching of layered-glass products (the so-called Gallé technique) are commonly used. Today most art glass and cut glass is manufactured at the Kiev Art Glass Plant and the Raiduha Production Association in Lviv, which since 1962 includes the Lviv No. 1 Glass Factory, the Stryi Glass Factory, and five smaller enterprises. Some specialized factories in Zhdanov, Dnipropetrovske, Dzerzhynske (Romanivka), Artemivka, and Shchyrets also produce glass products. The glass shop of the Lviv Ceramics and Sculpture Factory has been producing free-blown glass since the 1950s. Most of the glass artists at these plants are graduates of Lviv Institute of Applied and Decorative Arts. The more prominent ones are I. Apollonov, A. Balabin, A. Bokotei, O. Bohuslavsky, S. Holembovska, I. Zarytsky, O. Lasovsky, Z. Masliak, Ye. Meri, L. Mytiaieva, H. Palamar, and M. Tarnavsky. Among folk craftsmen who work in glass are B. Valko, P. Dumych, R. Zhuk, Ya. Matsiievsky, M. Pavlovsky, V. Pohrebny, and I. Chaban. Adapting traditional glassware designs, these artists create household and decorative glassware, mostly for mass production, as well as small glass sculptures.

The Kiev Museum of Ukrainian Folk Decorative Art, the Ukrainian State Museum of Ethnography and Crafts in Lviv, the Sumy Museum of Art, the historical mu-

Glass art: figurines by Y. Matsiievsky (artist's collection)

seums of Kiev, Lviv, and Chernihiv, the regional museums of Lutske (collection of 15th–17th century art glass) and Kremianets, the Leningrad Museum of the Ethnography of the Peoples of the USSR, and the Moscow Historical Museum all maintain collections of Ukrainian artistic glass.

**Glass industry.** Branch of industry that produces glass and various glass products such as construction glass (window glass, glass blocks, glass tubes), container glass (bottles, jars), laboratory glassware, light bulbs and vacuum tubes, household glassware (tableware, mirrors), electrical components (insulators, capacitors, resistors), medical glassware, optical glass, glass fibers, and art glass.

Raw materials for making glass are readily available in Ukraine. There are large deposits of quartz sand with a high silica content (at least 90 percent), which is the chief constituent of glass. The best-known deposits are located in Avdiivka (Donetske oblast), Novoselivka (Kharkiv oblast), Rokytno (Rivne oblast), Hlyboke (Chernihiv oblast), and Lviv. The annual output of quartz sand is about 2 million t, enough to meet domestic demand and to provide surplus for export. Other minerals needed for glass production such as soda, lime, gypsum, and potash are also found in Ukraine.

In ancient times glass products such as ornaments and then tableware were imported to Ukraine from Greece and the Near East, and later from the Roman Empire and Byzantium. In the 11th–13th centuries glass and glass products, mostly for decorative purposes, began to be produced domestically in Kiev (near the Church of the Tithes and the Kievan Cave Monastery), Chernihiv, Liubech, and Halych. After the Mongol invasion glassmaking declined. Its revival in the 14th–16th centuries saw a shift of its main centers from the larger cities to forest regions with readily available fuel and sand. In the mid-16th century glass was made in the districts of Belz, Liubachiv (near Potylych), and Horodok. Artisan workshops were replaced by small, factory-like glassworks. In the 17th century such enterprises appeared in the districts of Lviv and Mukachiv, the Kiev region, Volhynia, Left-Bank Ukraine, and Slobidska Ukraine. By the end of century there were 25 glassworks in Left-Bank Ukraine, established by entrepreneurs or by leaseholding craftsmen on the estates of magnates, nobles, monasteries, or (on the Left Bank) Cossack officers. Some of these enterprises were run by the same family – eg, the Los, Bilozersky, Bohynsky, Skabychevsky, and Chumak families – for many generations. With support from landowners, many of whom owned glassworks, and the Hetman administration, particularly under I. Mazepa, the industry expanded. Its output consisted mostly of window glass, glassware, particularly apothecary glassware, bottles, cut glass, and optical glass, some of which was exported to Russia, Belorussia, Poland, and the Baltic countries.

In the 18th century glass manufacturing grew quickly, particularly in the Chernihiv region. At various times a total of nearly 100 glassworks operated in Left-Bank

Ukraine. In the second half of the 18th century a number of glass factories known as *manufakturny* were set up by large landowners such as K. Rozumovsky, P. Rumiantssev, and P. Zavadovsky. Their assorted products, particularly cut glass and artistic glass, were in great demand at home and abroad. At the beginning of the 19th century there were about 40 glassworks in Ukraine, employing about 1,000 workers. Most were in Volhynia, where wood fuel was abundant. In the middle of the century glass production declined, following which began a period of concentration, when larger and more productive enterprises, organized on a capitalist basis, were established. Thus, in 1883 in Right-Bank Ukraine 30 glassworks employing 458 workers produced glass and glass products worth 180,000 rubles, while in 1900, 20 glassworks with 2,711 workers produced output worth 1,549,000 rubles. Most of the production consisted of household and apothecary glassware, tiles, and lamp components. Most enterprises, particularly the largest ones, were owned by merchants, including many Jews. On the eve of the First World War there were 17 glass factories in Right-Bank Ukraine with an annual output worth 2 million rubles. The largest of them were located in Rokytno, Ovruch county (500 workers, 700,000 rubles' worth of output), and Romanivka, Novohrad-Volynskyi county (400 workers, 200,000 rubles' worth of output), both in Volhynia gubernia, and in Myrcha, Kiev county (195 workers, 126,000 rubles' worth of output). Large glass factories using fossil fuel also appeared in the Donbas at the end of the 19th century. The largest were in Kostiantynivka and Lysychanske. By 1913 the Donbas accounted for two-thirds of Ukraine's glass output. Altogether there were about 40 glass factories in Ukraine: 10 in the Donbas and 15 in Volhynia. They produced 6,700,000 t of glass.

Glass output in Soviet Ukraine (in 1,000 sq m)

	1970	1980	1983
Window glass	51,315	39,912	49,041
Polished glass	1,685	4,578	4,914
Wired glass	2,867	3,012	2,923
Tempered, unpolished glass	1,183	1,789	1,850
Unpolished safety glass	102	63	—

During the First World War and the Revolution the glass industry declined. It began to recover during the 1920s, and by 1928–9 in Right-Bank Ukraine there were 14 glass plants with 5,398 workers producing output worth 9,100,000 rubles. The industry was reconstructed and modernized twice: during the industrialization drive in the 1930s and after the Second World War. New plants were built and new products were introduced. Production became more concentrated: the number of plants diminished from 70 in 1940 to 60 in 1971 to under 40 in 1981, while from 1940 to 1971 output increased by a factor of 4. The largest plants are in Kostiantynivka, Lysychanske, Lviv, Kherson, Kerch, Odessa, Bucha (Kiev oblast), and Kiev. Today Ukraine produces sheet glass, shaped glass, glass blocks, glazed glass, wired glass, patterned glass, heat-resistant glass, safety glass, tempered glass, mosaic tiles, marbled glass, aventurine glass, and fine glassware. Research on the scientific and technical aspects of glassmaking is done at the Kiev Branch

of the Scientific Research Institute of Glass in Moscow and at the Scientific Research Institute of Glass at the Kostiantynivka Avtosklo Plant. In 1983 Ukraine accounted for 19.9 percent of the USSR glass output.

**Glauberger, Abba**, b 1917 in Warsaw, d ? Solid state physicist. A graduate of Odessa University (1939), he taught physics at Lviv University. In 1966 he was appointed director of the Scientific Research Institute of Physics at Odessa University. Among his publications is an advanced textbook, *Kvantova mekhanika* (Quantum Mechanics, 1962), one of the few Soviet textbooks of its kind published in Ukrainian.

**Glavche, Egor** [Glavče, Jegor], b 21 January 1871 in Kishinev, Bessarabia, d 17 August 1919 in Odessa. Dermatologist and venereologist. A graduate of Moscow University (1895), from 1900 he worked as a physician in Odessa and played a leading role in the fight against venereal disease. He did research on prophylactic measures, gave public lectures on venereal disease and prostitution, and recruited and trained physicians in dermatovenereology. In 1917 he established the first polyclinic for dermatovenereological and urogenital diseases in the Russian Empire, at which he treated patients free of charge. In 1922 the clinic was converted into the Odessa Scientific Research Institute of Dermatology and Venereology. Glavche published a number of books on syphilis and its treatment, including his doctoral thesis *Limfaticheskie zhelezy i sifilis* (The Lymph Glands and Syphilis, 1916).

**Glavlit** (Glavnoe upravlenie po delam literatury i izdatelstv [Chief Administration for Literary and Publishing Affairs]; Ukrainian: Holovlit). Most powerful censorship agency in the USSR. It was established under the People's Commissariat of Education in June 1922 by the RSFSR Council of People's Commissars to maintain ideological orthodoxy and to prevent breaches of state security in the media. Restricted in its powers at first, by the 1930s it attained almost total control over publishing activity: it approves new publishing houses and periodicals, appointments to all positions in publishing, and all published materials. It also controls radio and television broadcasting, film and theater productions, musical performances and recordings, public lectures, art exhibits, advertising and labeling, and the import and export of published material. Glavlit compiles lists of proscribed works, subjects, and information. Besides military and economic secrets, sensitive matters have included natural disasters and accidents in the Soviet Union, salaries of top officials, jamming of foreign radio broadcasts, and the operations of Glavlit itself. A few years after Stalin's death the agency's official name was

changed to Glavnoe upravlenie po okhrane gosudarstvennykh tain v pechati (Chief Administration for the Preservation of State Secrets in the Press) and in 1966 it was brought directly under the USSR Council of Ministers. The old acronym is still used, however.

I. Koshelivets

**Gleb.** See Hlib.

**Glière, Reinhold**, b 11 January 1875 in Kiev, d 23 June 1956 in Moscow. Conductor, composer, and teacher of Belgian Jewish descent. A graduate of the Kiev School of Music and the Moscow Conservatory, he was a professor (1913–20) and director (from 1914) of the Kiev Conservatory. Among Glière's pupils were the composers L. Revutsky, B. Liatoshynsky, and P. Kozytsky. He edited and orchestrated M. Lysenko's operettas *Natalka Poltavka* (Natalka from Poltava) and *Chornomortsi* (Black Sea Cossacks), K. Stetsenko's *Haidamaky* (Haidamakas) and the cantata *Shevchenkovi* (To Shevchenko), and rewrote the orchestration for S. Hulak-Artemovsky's *Zaporozhets za Dunaiem* (Zaporozhian Cossack beyond the Danube). He composed over 500 works in a variety of genres, including the symphony *Illia Muromets* (1909–11) dedicated to the hero of the Kiev *bylyna* cycle, the symphonic tableau *Zaporozhtsi* (Zaporozhian Cossacks, 1921) inspired by I. Repin's painting, the symphonic poem *Zapovit* (Testament, 1939–41) dedicated to T. Shevchenko, and the ballet *Taras Bulba* (1951–2).

**Globular Amphora culture.** Archeological culture of the Eneolithic period that was widespread in territories now comprising East Germany, Czechoslovakia, Poland, Ukraine (only the Volhynia and Podilia regions), and Moldavia. Today three variants of the culture are distinguished: the Western (covering Germany, Czechoslovakia, and Western Poland), Central (Poland), and Eastern (Ukraine and Moldavia). In Ukraine the Volhynian version is distinct from the Podilian. Since the end of the 19th century about 70 burial sites, but no settlements, have been discovered in Ukraine. The dead were buried in a flexed position in rectangular sarcophaguses built of stone slabs. Group burials of what appear to be whole families were common. Cremation was rare. Various pieces of earthenware such as amphoras, tools such as stone axes and wedges, and ornaments were buried with the dead. The amphoras had a globular body, cylindrical neck, two to four handles, and a flat or concave bottom. The tribes of the Globular Amphora culture lived in large patriarchal families and practiced animal husbandry and perhaps plant cultivation.

**Glovinsky, Yevhen** [Glovins'kyj, Jevhen], b 1 November 1894 in Rzhyschiv, Kiev gubernia, d 7 July 1964 in Munich. Economist and civic figure. An artillery officer in the UNR army, he emigrated in 1922 to Czechoslovakia. In 1927 he received a degree in economic engineering from the Ukrainian Husbandry Academy in Poděbrady. From 1930 to 1939 he was a secretary and research associate of the Ukrainian Scientific Institute (UNI) in Warsaw. In 1944 he fled west from the Soviet advance to Bohemia and then to Austria, where he lived in a displaced persons camp near Salzburg. In 1949 he settled in Munich, where he became a professor of the Ukrainian Technical and Husbandry Institute and the Ukrainian

Yevhen Glovinsky

Free University (1952) and a full member of the Shevchenko Scientific Society (1953) and member of the editorial board of its *Entsyklopedia ukraïnoznavstva* (Encyclopedia of Ukraine). In the interwar years he was active in émigré student and engineering organizations. After the war he was the representative of the Ukrainian National State Union party to the Ukrainian National Council, where he served as deputy chairman and member of the presidium. Glovinsky is the author of articles on Ukraine's economy in the collections of the UNI and in postwar émigré and Western Sovietological journals, and of the study *Finansy USSR* (Finances of the Ukrainian SSR, 1939).

**Gmina** (Polish term derived from the German *Gemeinde*). Smallest administrative territorial unit borrowed by the Poles from the Germans during the period of German colonization in the 13th and 14th centuries, and corresponding to the Ukrainian *\*hromada* or the Russian *volost*. Under the Polish Commonwealth a *gmina* consisted usually of a village belonging to a single landlord and run by an elected council and reeve (Polish *wójt*, Ukrainian *viit*). In Galicia under Austrian rule it was administered by an elected council and an executive selected by the council. A *viit* headed the executive and held office for three (from 1884 or six) years. The council and its executive were responsible for road maintenance, care of the poor, and issuing ordinances. They also participated in tax collecting and census taking. The *gmina* court and its elected assessors settled disputes and maintained order. In interwar Poland a *gmina* could consist of a village, small town, or several villages (called *gmina zbiorowa*).

**Gmünd.** Town (1985 pop 6,400) in Lower Austria on the Czechoslovak border. During the First World War a camp housing Ukrainian refugees from the Russian occupation of Galicia and Ukrainians forcibly deported by the Austrian authorities for their Russophile tendencies was located there. It had its own Ukrainian schools (including a gymnasium), and cultural and social institutions. Harsh living conditions led to a high mortality rate. From 1914 to 1917 the camp held some 14,000 Ukrainians.

**Gnedich, Nikolai** [Gnedič, Nikolaj] (Hnidych, Mykola), b 13 February 1784 in Poltava, d 15 February 1833 in St Petersburg. Russian writer and translator of Ukrainian descent. He was educated at the Poltava Theological Seminary, Kharkiv College, and Moscow University. He translated a collection of modern Greek folk songs (1825), J. Schiller's *Die Verschwörung des Fiesco zu Genua*, and

Voltaire's *Tancredi*, but is best known for his translation in hexameters of Homer's *Iliad* (1829). Gnedich dedicated a number of poems, such as 'Lastivka' (The Swallow), to Ukraine, and wrote some poetry in Ukrainian. His poetry, plays, and prose works contain elements of classicism and sentimentalism.

**Gneiss.** A metamorphic foliated rock formed from sedimentary (paragneiss) or magmatic (orthogneiss) rock at considerable depths in the earth's crust under high temperatures and pressure. Containing quartz, feldspar, and mica, along with \*granite it is a basic rock of the Ukrainian Crystalline Shield. It is found also in the Maramureş-Bukovynian Upland. Gneiss is used mostly as aggregate, paving stone, and facing material.

**Goat farming.** Branch of animal husbandry that raises goats for their milk, meat, hide, and wool. It has been practiced in Ukraine since the Neolithic period. The distribution of goat farming is similar to that of \*sheep farming, but its economic importance is much less. In 1916 there were 554,000 goats in Ukraine (as defined by present boundaries), in contrast to 6,850,000 sheep. In 1928 there were only 53,000 goats in Soviet Ukraine. The collectivization of the 1930s led to a sharp increase in the population of goats, which are easy to raise and often replaced cows. By 1935 there were 215,000 goats in Soviet Ukraine, 209,000 of them privately owned. Goat farming was concentrated in industrialized areas such as the Kharkiv region and the Donbas. In 1933 in Western Ukraine there were 37,000 goats in Galicia and Volhynia, 20,000 in Transcarpathia, and 7,000 in Bukovyna (1932). In Soviet Ukraine there were 625,000 goats in 1941, 1,209,000 in 1956, 696,000 in 1966, 252,000 in 1976, and 293,000 in 1984. Today goats are raised only on private plots, mostly in Transcarpathia, Odessa, Ivano-Frankivske, and Poltava oblasts. Dairy breeds predominate.

**Goby** (Gobiidae; Ukrainian: *bychok*). Common name for fish of various species in the family Gobiidae, order Perciformes. In Ukraine, Gobiidae are found in the Black and Azov seas and their estuaries, in rivers draining into the Black Sea, and in rivers of the Crimea. Some species are found only in the sea basins. As all species are edible, commercial goby fishing and canning are important, well-developed industries along the Black and Azov sea-coasts. There are some 53 species in 19 genera in the family, of which 9 genera are found in Ukraine. The main commercial species in the Black and Azov seas is *Neogobius melanostomus* (round goby; Ukrainian: *bychok-kruhlok*).

**GOELRO or State Commission for the Electrification of Russia.** A Soviet Russian commission established in 1920 to plan the rapid expansion of \*electric power production. The commission's plan provided for the construction, in the course of 10 to 15 years, of 20 thermal and 10 hydroelectric power stations with a total capacity of 1.75 million kW in various regions of Russia and Ukraine as the basis of the subsequent industrialization process.

The building of power stations in Ukraine according to the plan was co-ordinated in Ukraine by the Commission for the Electrification of Ukraine (est 1921), as well as by various other committees and building trusts. Nine power stations were to be built in Ukraine (thermal

ones, such as the Shterivka, Lysychanske, and Izium stations, and hydroelectric ones, such as the Dnieper and Boh stations). The GOELRO plan also provided for the construction of coal-and-gas power stations. Ukrainian officials hoped that the output of Dnieper hydroelectric stations in particular would be used to deliver cheap electricity to the villages and further the industrialization of the largely agricultural Right-Bank Ukraine. However, the GOELRO plan did not address these issues, and instead focused on the reconstruction of the Donbas's metallurgical and chemical industry, the electrification of the Moscow-Kharkiv-Yuzivka (today Donetsk) railway, and the creation of an unobstructed water route on the Dnieper River between Kiev and Kherson. In 1932, of 40 regional electric power stations completed, five were in Ukraine, including the \*Dnieper Hydroelectric Station, the largest electric power station in Europe. The aggregate capacity of the stations in Ukraine was 480,000 kW.

I. Myhul

**Goetz, Leopold Karl**, b 7 October 1868 in Karlsruhe, d 2 April 1931 in Bonn. German church and law historian; professor at Bonn University from 1902. Among his works are several dealing with Kievan Rus': *Das Kiever Höhlenkloster als Kulturzentrum des vormongolischen Russlands* (1904), *Kirchenrechtliche und kulturgeschichtliche Denkmäler Altrusslands nebst Geschichte des russischen Kirchenrechts* (1905), *Staat und Kirche in Altrussland: Kiever Periode, 988–1249* (1908). He also translated and edited the German version of \**Ruskaia Pravda: Das russische Recht* (4 vols, 1910–13).

Nikolai Gogol; portrait by A. Ivanov (1841)

**Gogol, Nikolai** [Gogol', Nikolaj] (Ukrainian: Hohol, Mykola), b 1 April 1809 in Velyki Sorochyntsi, Myrhorod county, Poltava gubernia, d 4 March 1852 in Moscow. The most famous Russian writer of Ukrainian origin. Having graduated from the Nizhen gymnasium, he left for St Petersburg in 1828 armed with a manuscript and hope for a successful literary career. His aspirations were abruptly arrested by extremely negative criticism of his sentimentally Romantic narrative poem *Hans Kuechelgarten*, which he published at his own expense in 1829 and copies of which he subsequently bought out and destroyed. He tried to survive economically by working as a bureaucrat, a teacher at a boarding school for daughters of the nobility, and very briefly as a lecturer of history at St Petersburg University. In 1836 he left Russia and, except for two brief eight-month intervals (1838–9, 1841–

2), he lived abroad, mostly in Rome, until 1849, when he returned via Palestine to Russia.

While working as a minor civil servant, Gogol spent his free time composing short stories based on his observations and memories of life in Ukraine. The first two volumes of these stories, *Večera na khutore bliz Dikan'ki* (Evenings on a Farm near Dykanka, 1831–2), brought him immediate fame. Hiding behind the authorial mask of Rudy Panko the beekeeper, Gogol managed to portray a world where fantasy and reality intermingle in the prism of the worldly-wise but unsophisticated narrator, and thus Ukraine becomes at once fanciful, humorous, nostalgic, and somewhat poignant in its quaintness.

In his second two-volume collection of Ukrainian stories, *Mirgorod* (Myrhorod, 1835), containing the first version of his famous historical novelette *Taras Bul'ba*, Gogol's nostalgic tone gives way to a more satiric view of his native land. In the same year he also published *Arabeski* (Arabesques, 1835), in which his stories dealing with the world of the St Petersburg civil servant first appeared. Simultaneously he turned to writing drama and published his great *Revizor* (The Inspector-General, 1835), which needed the approval of the emperor to be staged in 1836. This was followed by his second completed play, *Zhenit'ba* (The Marriage, 1835), and the famous satirical story *Nos* (The Nose, 1835). His other plays remained unfinished.

The staging of *The Inspector-General* did not produce the result Gogol intended. Shattered by the fact that his idea of the moral influence of true art (artistically formulated in the story 'Portret' [The Portrait] in *Arabeski*) did not have the desired effect, he left Russia. The years abroad were less productive. Gogol devoted himself to his epic work, *Mertvyie dushi* (Dead Souls, 1842), but managed to finish successfully only the first of three intended parts. He also wrote his famous story *Shinel'* (The Overcoat, 1841), and revised *Taras Bul'ba* and 'Portret.' In 1845 he wrote his didactic essays, *Vybrannye mesta iz perepiski s druziami* (Selected Passages from Correspondence with Friends, 1847). Disillusioned by the attacks that followed this publication, Gogol blamed himself for being incapable of producing morally ennobling art. His attempt at preparing himself morally for his task of 'serving God and humanity' sent him first on a pilgrimage to Jerusalem; finally, under the influence of a religious fanatic, Rev M. Konstantinovskiy, who demanded that he enter a monastery and destroy his 'evil' art, Gogol burned the second part of *Dead Souls*, refused all food, and stayed in bed until his death.

His works have been published by P. Kulish (6 vols, 1857), N. Tikhonravov, and V. Shenrok (7 vols, 1889–96). The fullest edition is that published by the USSR Academy of Sciences (14 vols, 1940–52). His letters were published by Kulish, Shenrok (in 4 vols, 1901), and V. Gippius. Gogol's collection of about 1,000 Ukrainian folk songs was used by M. Maksymovych and published by G. Georgievskiy in 1908. His collection of materials for a Ukrainian dictionary is included in the collected works prepared by Gippius. There are numerous Ukrainian translations of Gogol's individual works and two editions of selected works, of which the most recent appeared in 1952 (3 vols).

Gogol's works display different variations of the Romantic style and a masterly use of metaphor, hyperbole, and ironic grotesque. His language is exceptionally

rhythmic and euphonic. He was the first writer of the so-called Ukrainian school in Russian literature to employ a host of lexical and syntactic Ukrainianisms, primarily to play with various stylistic levels from the vulgar to the pathetic. Some of his Ukrainian stories are the earliest examples of the Russian naturalist school, which combined Romantic ideology with a negative, 'low' depiction of everyday life. Gogol's writings were frequently imitated by such Ukrainian writers as H. Kvitka-Osnovianenko, P. Kulish, and O. Storozhenko, and by such writers of the Ukrainian school in Russian literature as Ye. Hrebinka; Gogol's influence was felt in the early writings of I. Turgenev, F. Dostoevsky, V. Sollogub, and by the Russian Symbolists F. Sologub, A. Remizov, and A. Bely.

There are hundreds of translations of Gogol's works, and he is recognized as one of the greatest writers of the 19th century. His ideological writings provoked a prolonged controversy. His *Vybrannye mesta* was criticized severely by the Russian Westernizers (eg, V. Belinsky), who valued in the works of his naturalist period mainly the satire on Russian life. A popular schematic biography of Gogol spread the idea that he experienced a religious crisis abroad. It was only in the 20th century that serious studies of the formal qualities of Gogol were written (by I. Mandelshtam), and a more analytic approach to his world outlook was taken. D. Merezhkovskiy studied Gogol as a religious thinker. V. Zenkovskiy detected in Gogol all the basic ideas for which Dostoevsky later gained fame, as well as the same Romantic psychology. V. Gippius, following Zenkovskiy to some extent, described Gogol's development as a conflict between his aesthetic and religious outlook. In the 1920s Russian Formalists (Yu. Tynianov, B. Eikhenbaum, V. Vinogradov) often used Gogol's works as the material for formulating their theories. Some recent (eg, S. Karlinsky's) studies have concentrated on the sexual conflicts inherent in Gogol's personality and reflected in his works. Other scholars have emphasized the consistency of his outlook throughout his life.

Gogol's relation to Ukraine is a controversial issue. His indifference to the Ukrainian question was sharply condemned by the critics S. Yefremov and, even more severely, Ye. Malaniuk in the 1920s. P. Fylypovych and V. Doroshenko stressed the importance of Ukrainian elements in Gogol's writings and the contribution his Russian works made to the development of a Ukrainian national identity. The whole question of Gogol's ambivalent attitude toward Ukraine received a very thorough analysis in G. Luckyj's *Between Gogol' and Ševčenko* (1971).

Bishop Pavlo Goidych

Solomon Goldelman

**Goidych, Pavlo Petro** [Gojdyč], b 17 July 1888 in Ruski Pekliany in the Prešov region, d 17 July 1960 in Leopoldov, Slovakia. Greek Catholic bishop, church and cultural figure. He was ordained in 1911 after studying theology in Prešov and Budapest. He worked in the Prešov eparchy administration from 1914 until 1922, when he entered the Basilian Chernencha Hora Monastery near Mukachiv. In 1927 he was appointed bishop-administrator and in 1940 ordinary bishop of \*Prešov eparchy. The eparchy flourished under Goidych's care: he founded monasteries, a gymnasium, a bursa, and the Blahovisnyk publishing house, promoted charities, and resisted the Slovakization of the Ukrainian minority. His arrest in June 1950 and mock trial in January 1951 for 'espionage and treason' in Bratislava marked the first step in the abolition of the Greek Catholic church in Czechoslovakia. He died in Leopoldov prison. After the restoration of the Greek Catholic church in 1968, his remains were transferred to the Prešov Cathedral.

A. Pekar

**Goldelman, Solomon**, b 5 December 1885 in Soroka, Bessarabia, d 3 January 1974 in Jerusalem. Jewish and Ukrainian scholar and political figure; an economist by profession. He studied at the Kiev Commercial Institute

(1907–13) and then worked there (1913–15) and for the Union of Zemstvos (1915–17). From June 1917 to April 1918 he represented the socialist Zionist party Po'alei Zion in the Central Rada and the Little Rada. Under the Hetman government he lived in Odessa, where he edited *Unser Leben*, a Po'alei Zion daily. In December 1918 he was appointed acting minister of labor and acting secretary for national minorities in the UNR Directory's government. Until February 1919 he also served as deputy to S. Ostapenko, the minister of trade and industry; from August to April 1920 he was deputy minister of labor in I. Mazepa's cabinet.

In mid-1920 Goldelman immigrated to Vienna. In 1922 he helped organize the \*Ukrainian Husbandry Academy in Poděbrady; he taught there and at the Ukrainian Technical and Husbandry Institute until 1939, when he immigrated to Palestine. He maintained close ties with Ukrainian émigré institutions and promoted Ukrainian-Jewish co-operation to the end of his life. Goldelman wrote in Ukrainian an exhaustive study on the theory of stock companies (1925) and textbooks on economics and industrial policy (1923), international economic policy (1924), and the economics of industry (1934). He also wrote many articles, in Ukrainian, Yiddish, Hebrew, Russian, and German, on economics and politics, as well as the books *Lysty zhydivs'koho sotsial-demokrata pro Ukraïnu ...* (Letters of a Jewish Social Democrat about Ukraine ..., 1921, repr 1964), *Löst der Kommunismus die Jüdenfrage? ...* (1937), *Zhydivs'ka natsional'na avtonomiia na Ukraïni, 1917–1920* (Jewish National Autonomy in Ukraine, 1917–1920, 1963, 2nd edn 1967, English trans 1968), and *Jüden-Bauern in der Ukraine ...* (1973).

**Golden Charter.** A fictitious proclamation, which according to popular legend was issued by Catherine II, calling upon the Orthodox population of Right-Bank Ukraine to take up arms against the Poles and Jews and to help the Russian forces to expel the Polish authorities. It was spread orally and in handwritten copies, particularly during the \*Koliivshchyna rebellion of 1768. It was propagated by M. Znachko-Yavorsky, the hegumen of the Motronynskyi Monastery near Chyhyryn, and was used by M. Zalizniak and other rebel leaders.

**Golden Gate** (Zoloti vorota). One of the most important architectural and historical monuments remaining from the Kievan Rus' period. Located in the southwestern part of ancient Kiev, the Golden Gate (GG) was begun in 1037 during the reign of Yaroslav the Wise. It was constructed at about the same time as St Sophia Cathedral and the upper city fortifications, and functioned as the main triumphal entrance and as a defensible portal to the fortified section of the city. The GG was built of brick and stone and consisted of a tower with a vaulted passageway (12 m high and up to 7.5 m wide), topped by a platform for guards and the small Church of the Annunciation. The passageway probably had a wooden or gilded gate, and there may have been turrets on the

Golden Gate: remnants

Golden Gate: restored

tower. The origin of the gate's name is unknown. It may have been named for the roof of the church, which was possibly covered with gold, for the copper fittings or gilt of the gate in the passageway, or for the Golden Gate of Constantinople. It served as the model for a gate built in Vladimir in the 1160s by Prince Andrei Bogoliubskii.

In 1240 the GG was partially destroyed by the Mongols; however, it remained in use as a portal until the middle of the 16th century. Such 15th- and 16th-century travelers as Paul of Aleppo and E. Lasotta von Steblau mentioned it in their writings, and a drawing (1651) by the Dutch artist A. Van Westerfeld shows the remains of the church. In 1648, after their victory over the Poles, Hetman B. \*Khmelnitsky and his army made their triumphal entrance into Kiev through the GG. In 1750 the gate's remains were covered with earth. The ruins were excavated in 1832 by the archeologist K. \*Lokhvitsky, and the structure was reinforced with a metal framework. Of the original GG only the brick and stone walls and portions of the arch remain. On the outside of the walls can be seen impressions left by the oak-beam framework of the walls that encircled the old city. Based on archeological excavations, scholars have created various models of the original GG, which was last restored in the early 1980s. A book about the GG, by S. Vysotsky, was published in Kiev in 1982.

**Golden Horde.** A Mongol-Tatar state founded about 1242 on the Volga River and lasting until the 15th century. Its first capital Sarai, founded by \*Batu Khan, was near Astrakhan. The state was founded after the \*Mongols had overrun much of Rus' and extended even into

Poland and Hungary. Neighboring Rus' principalities became vassals of the Golden Horde. Prince \*Danylo Romanovych strove in vain to form a coalition of European nations to combat the Golden Horde. After reaching its zenith in the mid-14th century, when it covered much of central Asia, the Golden Horde began to decline, losing control over its peripheries. In the 15th century it disintegrated into several independent khanates, including the \*Crimean Khanate. (See also \*Tatars.)

**Golden-Domed St Michael's Monastery.** See St Michael's Golden-Domed Monastery.

Oleksander Goldman

**Goldman, Oleksander,** b 3 February 1884 in Warsaw, d 30 December 1971 in Kiev. Solid-state physicist; from 1929 full member of the AN URSR. A graduate of Leipzig (1908) and Kiev (1909) universities, he worked for several years in Leningrad and then in 1918 joined the faculty of the Kiev Polytechnical Institute. In 1923 he organized and became director of the Chair of Physics in Kiev, one of the first physics research centers in Ukraine. When the chair was reorganized into the Kiev Scientific Research Institute of Physics in 1929 (now the AN URSR Institute of Physics), he was appointed director. In 1927 he founded the journal *Fizychni zapysky*, which played an important role in the advancement of physics in Ukraine and the development of Ukrainian terminology in the field. Goldman was one of the first researchers in Ukraine to study the properties of semiconductors, in particular rectification and metal-semiconductor contacts. He also carried out extensive research in electroluminescence.

**Goldsmithery.** See Jewelry.

**Golitsyn, Vasiliï** [Golicyn, Vasiliï], 1643–1714. Russian prince and diplomat, adviser and confidant of the Russian regent \*Sofia Alekseevna (1682–9) and initiator of the \*Eternal Peace of 1686 with Poland. He led Russian campaigns against the Crimean Tatars in 1687 and 1689. In the unsuccessful campaign of 1687, 50,000 Cossacks took part, many of whom lost their lives after the Tatars set fire to the steppe. The blame was placed on Hetman I. \*Samoilovych, and Golitsyn with the support of a part of the Cossack *starshyna* had him deposed and exiled. Golitsyn supported the candidacy of I. \*Mazepa as the new hetman. The campaign of 1689, led jointly by Golitsyn and Mazepa, was also not successful, and Golitsyn was removed from office when Peter I became tsar.

**Gololobov, Yurii**, b 2 September 1930 in Moscow. Organic chemist; since 1976 corresponding member of the AN URSR. A graduate of the Moscow Chemical-Technical Institute (1953), he worked in different chemical institutes of the USSR Academy of Sciences in Moscow. In 1970 he was appointed chairman of a department of the AN URSR Institute of Organic Chemistry. His research deals with the synthesis of organophosphorus compounds and their chemical and biological properties, with the practical goal of finding ways to produce new pesticides, complexing agents, and medicines.

**Golovin, Pavel**, b 3 July 1885 in Izhevskoe, Riazan gubernia, d 22 January 1964 in Kiev. Chemist; from 1939 corresponding member of the AN URSR. A graduate of the Moscow Higher Technical School, he worked as an engineer and lecturer in Moscow. In 1932 he moved to Kiev, where he worked for six years at the Central Sugar Institute and then directed the Laboratory of Carbohydrate Chemistry and Technology at the AN URSR Institute of Organic Chemistry. At the same time he lectured at the Kiev Technological Institute of the Food Industry. He published over 90 papers, mostly on the chemistry of sugars and on food-processing technology.

**Golubev, Stepan**, b 1849, d 8 November 1920 in Kiev. Church historian. He taught at Kiev University and the Kiev Theological Academy. Among his many works are *Kievskii mitropolit Petr Mogila i ego spodvizhniki* (The Kiev Metropolitan Petro Mohyla and His Champions, 2 vols, 1883, 1898), *Istoriia Kievskoi Dukhovnoi Akademii: Period do-Mogilianskii* (The History of the Kiev Theological Academy: The Pre-Mohyla Period, 1886), and *Kievskaiia Akademiia v kontse xvii i nachale xviii st.* (The Kiev Academy at the End of the 17th and the Beginning of the 18th Century, 1901). Many of his articles on Ukrainian cultural and church history of the 16th to 18th centuries appeared in *Kievskaiia starina*, *Arkhiv Iugo-Zapadnoi Rossii*, *Trudy Kievskoi Dukhovnoi Akademii*, and *Chteniia Istoricheskogo obshchestva Nestora Letopistsa*. He compiled and edited *Materialy dlia istorii zapadno-russkoi pravoslavnoi Tserkvi (xvi i xvii st.)* (Materials on the History of the West Russian Orthodox Church [The 16th and 17th Centuries], 1879, 1891), a volume with the same title for the 18th century (1895), and *Pamiatniki literaturnoi polemiki pravoslavnykh iuzhnorusstsev s latino-uniatami* (Monuments of the Literary Polemics of the Orthodox South Russians with the Latin-Rite Uniates, 3 vols, 1887, 1893, 1914).

A. Zhukovskiy

**Golubinsky, Evgenii** [Golubinskii, Evgenij], b 12 March 1834, d 20 January 1912. Russian church historian. From 1861 he taught at the Moscow Theological Academy, becoming a professor in 1881, and was a member of the Historical Society of Nestor the Chronicler. In 1903 he was elected to the Russian Academy of Sciences. His major works are *Istoriia russkoi tserkvi* (The History of the Russian Church, 2 vols, 4 parts, 1880–1911, repr 1969), which contains valuable information about the Ukrainian church to the middle of the 15th century, and *Istoriia kanonizatsii sviatykh v Russkoi Tserkvi* (A History of Canonization in the Russian Church, 1902, repr 1969). He is also the author of many articles in Moscow theological journals. His harsh criticism of generally accepted views

and the originality of his works influenced the historiography of the Russian church.

**Golubovskiy, Petr** [Golubovskii, Pjotr], b 28 June 1857 in Minusinsk, Enisei gubernia, d 31 March 1907 in Kiev. Russian historian; student of V. Antonovych. He chaired the Department of Russian History at Kiev University. He wrote a number of monographs on medieval Ukraine and Belorussia; eg, *Istoriia Severskoi zemli do poloviny xv stoletia* (History of the Novhorod-Siverskyi Land to the Mid-14th Century, 1882), *Pechenegi, torki, i polovtsy do nashestviia tatar: Istoriia iuzhno-russkikh stepei ix–xiii vv* (The Pechenegs, Torks, and Cumans before the Tatar Invasion: A History of the Southern Rus' Steppes in the 9th–13th Centuries, 1884), and *Istoriia Smolenskoi zemli do nachala xv v.* (History of the Smolensk Land to the Beginning of the 15th Century, 1895). He also published many articles in *Kievskaiia starina*.

**Goluchowski, Agenor**, b 8 February 1812 in Skala, Borshchiv circle, Galicia, d 3 August 1875 in Skala. Polish count and Austrian statesman. He was the vicegerent of Galicia in 1849–59, 1866–7, and 1871–5, the Austrian minister of internal affairs in 1859, and minister of state in 1860. He resisted the efforts of Galicia's Ukrainians to gain equal national and social rights with the Poles. He pressed for the abolition of the Chair of Ukrainian Language at Lviv University, the introduction of a Latin script for the Ukrainians, and the adoption of the Gregorian calendar by the Ukrainian church. During his term in office he promoted home rule for Galicia's Poles, and the Galician civil service and Lviv University were Polonized, ending the era of Germanization.

Roman Gonsett

**Gonsett, Roman** [Gons'kyj], b 1891 in Zelena, Brody county, Galicia, d 25 June 1951 in North Hollywood, California. Inventor. After immigrating to Canada in 1907, Gonsett began experimenting with electricity in Edmonton. He moved to Chicago in 1916 and settled in Los Angeles during the 1920s. With his son, Faust, he worked on the development of the 'walkie-talkie' and patented almost 100 inventions, many in the field of two-way and mobile radio equipment. Contracts received from the US Department of National Defense and Security during the Second World War led to the establishment of the Gonsett Company. Gonsett bequeathed his library to the University of Alberta, Edmonton, as well as funds for the purchase of Ukrainian books. An artifact collection

of his inventions is housed in the Provincial Museum of Alberta.

**Gonta, Ivan**, b ? in Rozsishky near Uman, Bratslav voivodeship, d 1768 in Serby (now Gontivka) near Mohyliv, Kamianets-Podilskyi voivodeship. One of the leaders of the \*Koliivshchyna rebellion. A captain in the Cossack household militia of F. Potocki, the voivode of Kiev, in Uman from 1757, he was ordered to attack the approaching Haidamaka forces led by M. \*Zalizniak. Instead, he and his militia joined the rebels, and the joint forces captured and ravaged Uman on 21 June 1768, massacring Polish nobles, Jews, and Uniates. Gonta was proclaimed colonel of Uman. Fearing that the rebellion would spread into their domain, the Russian government sent a regiment of Don Cossacks to Uman to suppress it. Its colonel, Gurev, tricked the rebels into believing he sided with them. He invited them to a banquet, at which about 900 of them were seized and handed over to the Polish crown hetman, K. Branicki. Before being executed, Gonta and others were tortured cruelly for several days. Parts of his body were nailed to gallows in 14 towns. Many folk songs and legends were composed about him, and he is one of the heroes in T. Shevchenko's long poem *Haidamaky* (The Haidamakas).

Ivan Gonta

**Good Friday, Church of** (Piatnytska Tserkva; also Tserkva sv. Paraskevyy). An important architectural monument of the Kievan Rus' period in Chernihiv, built near the site of a former market in the late 12th or early 13th century. The church differs from others in Chernihiv by its finish, ornamentation, and the structure of its vault. Its general shape is square. The church has three naves (8.2 m by 12.5 m) and three apses, with four supporting pillars, which carry the weight of the vault and one cupola. The interior is distinctive for its sense of great spaciousness. Restorations in the Ukrainian Baroque style were made to the church in 1670 and in the 1690s (probably by the architect I. Zarudny), and paid for by the colonel of Chernihiv regiment, V. Dunin-Borkovsky. In the 17th century a convent was attached to the church, but it burned down in 1750. In the 1820s a bell tower, designed by the architect A. Kartashevsky, was built for the church; the tower was torn down during restorations. The church, damaged in 1941, was restored after the Second World War under the direction of P. Baranovsky.

Church of Good Friday in Chernihiv (12th–13th century)

Church of Good Friday in Lviv

**Good Friday, Church of** (Piatnytska Tserkva; also Tserkva sv. Paraskevyy). An important architectural and historical monument in Lviv, located at the foot of Zamkova Hora mountain in the center of the old city. The church's construction was paid for by the Moldavian hospodar V. \*Lupu, and several Moldavian rulers are buried in the church. Built in the early 1640s on the site of previous churches, the present structure is made of unfinished stone blocks. Such features as small, highly placed windows, thick walls, and embrasures emphasize the fortress-like aspects of its architecture. The church combines elements of many styles, in particular Gothic and the late Renaissance: its interior lines are severe and laconic, but enlivened by a highly ornamented iconostasis.

The great value of the church lies in the masterpieces of Lviv painters and woodcarvers of the early 17th century adorning it. Of particular note is the five-tiered Renaissance iconostasis (a sixth row was added in 1870, to give a total of 70 icons), with Baroque gates topped by a crucifix. The richest and most elaborate part of the iconostasis is the portal with an icon of Christ the Archpriest over the arch. The icons added in 1870 (ss Cyril and Methodius, ss Olha and Volodymyr, St Nicholas, and St John Chrysostom) were painted by A. Kachmarsky. The vault and walls of the presbytery are decorated with late 18th-century frescoes by L. \*Dolynsky. The church has been damaged several times; it was last restored in 1908.

**Goose** (genus *Anser*; Ukrainian: *huska*). Order Anseriformes, family Anatidae. Although all four species in the genus *Anser* ('true' geese) are found in Ukraine, only *A. anser* (synonym: *A. cinereus*; common: grey or greylag goose; Ukrainian: *sira huska*) and *A. fabalis* (bean goose; Ukrainian: *humennyk*) breed there. *A. albifrons* (syn: *A. casarca*; white-fronted goose; Ukrainian: *biloloba huska* or *kozarka*) and *A. erythropus* (lesser white-fronted goose, squeaking goose; Ukrainian: *piskulka*, *mala kozarka*) migrate through Ukraine; in warm years small numbers of both species winter on the Black Sea coast and in Crimea. Domesticated goose, *A. anser domesticus*, was derived from the native gray goose, and is an important commercial food source because of its efficient and fast growth rate. The best-known breeds of domesticated goose in Ukraine include the Toulouse, Emden, Great Gray, Camomile, Kholmohory, Pereiaslav, and West Ukrainian breeds.

**Gorbunov, Borys**, b 4 February 1901 in Kiev, d 28 July 1944 in Kiev. Specialist in structural mechanics and welding; corresponding member of the AN USSR from 1939. He worked at various institutes of the Academy of Sciences contributing to the analysis of the stability of bridge structures, the strength of welding joints, and the strength of materials. Together with Ye. Paton he contributed to the theory of welded bridge structures.

**Gorgany Mountains.** The central part of the Carpathian \*Beskyds, situated between the Mizunka River in the west and the Prut River in the east, and between the limits of the Carpathian Mountains in the north and the Middle-Carpathian Depression in the south. Covering an area of approximately 2,500 sq km, the Gorgany are the least accessible and least populated part of the Ukrainian Carpathians. They are formed mostly of hard and

resistant sandstones. The transverse valleys of the Mizunka, Svicha, Chechva, Limnytsia, Bystrytsia Nadvirnianska, Bystrytsia Solotvynska, and Prut rivers dissecting the longitudinal ridges have transformed the latticed structure of the mountains into a feathered, and sometimes insular, form.

The elevation of the mountains increases from 1,400 m in the west (Mt Gorgan Vyshkivskyyi at 1,448 m) to 1,800 m in the Limnytsia Basin (the peaks: Grofa at 1,748 m, Popadia at 1,742 m, Syvulia at 1,836 m, Ihrovyshe at 1,807 m, and Vysoka at 1,805 m) and then decreases towards the east (the peaks: Doboshanka at 1,760 m, Syniak at 1,664 m, and Khomiak at 1,544 m). The peaks, which are often separated from one another by deep ravines, are more differentiated than the peaks in other parts of the Beskyds. Extensive fields (up to 5 sq km) of sandstone boulders (the result of wind erosion) cover the higher peaks, particularly their southern slopes, and weak traces of past glaciation are found on the highest slopes. River valleys in the Gorgany are deeply incised (up to 1,000 m) and narrow and their slopes are steep. The rivers have an irregular flow, which is often interrupted by rapids and falls (eg, the Bukhtovets and Prut rivers). The Gorgany remain largely forested. Eighty percent of their total area is covered by forests consisting mostly of spruce; mixed forests are found only on the periphery and in Transcarpathia. Above the upper forest line (at 1,450–1,550 m) Swiss mountain pine is more widespread than in other parts of the Ukrainian Carpathians. Because of this and the sandstone fields, mountain meadows seldom occur in the Gorgany. The Beskyds lying between the two arms of the Middle-Carpathian Depression represent a transitional form between the landscape of the Gorgany and that of the Polonynian Beskyd. This is particularly evident in the basin of the upper Tereblia River in Transcarpathia (the peaks: Kanch, 1,583 m; Strimba, 1,723 m; Streminis, 1,599 m).

Because of their inhospitable environment, the Gorgany are very sparsely populated. In the western and central Gorgany, inhabited by the \*Boikos, villages are situated mostly on the mountain periphery; the interior is penetrated only by settlements of the \*Hutsuls in the Bystrytsia Nadvirnianska and Prut river valleys. The towns of \*Nadvirna and \*Diliatyn are located on the periphery. Non-Ukrainians – Jews, Poles, and Germans – appeared in this region in the 19th century when the forests began to be commercially exploited; in 1939 they composed close to 10 percent of the total population. These minorities are no longer found there.

The forests are the principal natural resource of the Gorgany. Their exploitation was facilitated in the late 19th century by the construction of a dense network of narrow-gauge track on which timber was transported to large lumber mills in Vyhoda, Broshniv-Osada, Nadvirna, and other towns. A small petroleum industry was located in Bytkiv, Pasichna, and Ripne. The health resorts of the Prut River valley – Vorokhta, Yaremcha, Yamne, Mykulychyn, and others – acquired a nationwide reputation; their development was facilitated by the only railroad in the Gorgany, which links the Prut River valley with Transcarpathia through the Tatarskyi Pass.

**Gorlice** (Ukrainian: Horlytsi [Horlyci]). IV-2. County town (1983 pop 26,300) in Poland, situated on the Ropa River in the Low Beskyd foothills. Until 1946 the southern part of Gorlice county was within Ukrainian ethnic territory (the western part of the \*Lemko region). In 1939, 27,000 of the county's 29,000 inhabitants were Ukrainian. In 1945–6 most of them were forcibly resettled in the western oblasts of Soviet Ukraine or in the western regions of Poland newly acquired from Germany.

**Gorodtsov, Vasiliij** [Gorodcov, Vasilij], b 11 March 1860 in Dubrovichi, Riazan gubernia, Russia, d 3 February 1945 in Moscow. Russian archeologist. A professor at Moscow University from 1918, he studied the monuments of various epochs from the Paleolithic period to medieval times, developed a periodization scheme for the Bronze Age in eastern Europe, and was the first to note the distinct features of the \*Middle-Dnieper culture. He conducted archeological excavations in the Crimea and in the Poltava, Kharkiv, and Donetsk regions. His numerous works (over 200) on archeology, ethnography, and historical geography laid the foundation for much of Soviet archeological writing, field research, and methodology; they include widely used textbooks on the archeology of primitive society (1908) and on ancient folkways (1910), and a book on the Stone Age (1923).

Semen Goruk

**Goruk, Semen**, b 13 September 1873 in Sniatyn, Galicia, d 1920? Senior officer of the Ukrainian Galician Army. Active in prewar paramilitary organizations in Galicia, Goruk became commander of a company (August 1914) and then of a battalion (March 1915) of the Ukrainian Sich Riflemen. On 30 September 1916, he was captured by the Russian army and spent the remainder of the war as a prisoner. On 5 November 1918 he became the chief of staff of the Ukrainian Galician Army, and on 10 December 1918 he was transferred to the Secretariat of Military Affairs, serving as its personnel officer until he returned to work in the General Staff. On 1 January 1919, Goruk was promoted to the rank of major. In April 1920, while commanding a unit of the Ukrainian Galician army, he was captured by the Bolsheviks in Kiev and incarcerated on the Solovets Islands.

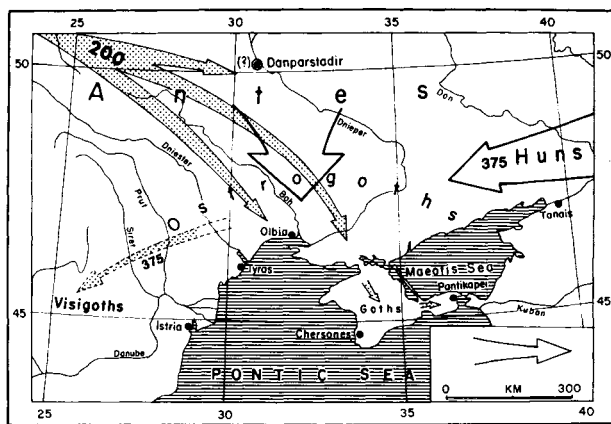

**Gospel.** See Bible.

**Gosplan.** See State Planning Committee.

**Goszczyński, Seweryn**, b 4 November 1801 in Illintsi, Lypovets county, Kiev gubernia, d 25 February 1876 in

Lviv. Polish Romantic poet, publicist, and political activist; a leading member of the \*Ukrainian school in Polish literature. His narrative poem *Zamek Kaniowski* (Kaniv Castle, 1828) depicts the Haidamaka rebellion of 1768. The influence of Ukrainian folklore and history is evident in the versified novella *Król zamczyska* (King of the Castle, 1842) and other poems. His collected works (4 vols) appeared in Lviv in 1911; his biography, by B. Suchodolski, was published in 1927.

**Gothic style.** Dominant artistic style of Western and Central Europe in the Middle Ages. In architecture it is characterized by pointed arches and ribbed vaults supported by vertical shafts and buttresses. The pointed arch was known along the Black Sea coast in the early Christian period and was reintroduced to Ukraine in the 14th–15th centuries from Western and Southern Europe. Gothic architecture was relatively rare in the 14th–16th centuries, and was restricted mainly to Western Ukraine, where it served as a transitory style. It was used mainly in castles and fortifications such as those in Khotyn, Lutske, Kamianets, Mezhybizh, and Nevytske, and in Makovytsia in Transcarpathia. Elements of the Gothic style are also found in churches in Rohatyn, Sutkivtsi, Ostrih, and Derman, and more frequently in Roman Catholic churches such as the Lviv Cathedral and the church in Vyzhniany near Zolochiv. The Gothic style can be discerned in the domes of wooden churches in the Khust region of Transcarpathia – eg, St Parasceve's Church (17th century) in Oleksandrivka and St Nicholas's Church (1779) in Danylove. The naturalistic trend in Gothic art had an influence on Ukrainian monumental and iconographic painting, on engraving and handicrafts, and especially on metalworking and jewelry making in the 15th–17th centuries.

## GOTHS IN UKRAINE

**Goths.** The name of ancient Germanic tribes that migrated from southern Scandinavia and in the 1st century AD inhabited the southeast coast of the Baltic Sea and the Vistula River basin. In the second half of the 2nd century they began migrating south and reached the Black Sea, where they intermixed with local Scythians and Sarmatians and established a tribal state. From the middle of the 3rd century they raided the Roman provinces, forcing the Romans to abandon Dacia in 271. Internal divisions resulted in the creation of two realms: that of the Ostrogoths, from the Donets River and the

Kuban to the Dniester River, and that of the Visigoths, between the Dniester and the Danube rivers. The Ostrogoths captured the Black Sea states of Olbia, Tyras, and the Bosporan Kingdom and established a large empire, which reached its zenith during the reign of King Ermanaric (350–75). In the 4th century the Goths adopted Arian Christianity, and their bishop, Ulfilas, translated the Bible into Gothic (extant portions are known as the *Codex Argenteus*). In 375 the Huns conquered the Ostrogothic state. Some Ostrogoths remained behind in the Crimea, where they managed to survive until the 17th century, but most moved into Thrace, and later into Pannonia and, in 455, into Italy. They ruled Italy from 493 to 526; in 554 they were dispersed by Emperor Justinian and disappeared. Gothic metal products and goldware were distributed widely throughout Eastern Europe, and with their great migration the Goths brought their metal-working skills to Western Europe. The artistic style they introduced is known as the Merovingian or Gothic style.

**Gouzenko, Igor** [Guzenko, Ihor], b 13 January 1919 in Rohachiv, Volhynia gubernia, d late June 1982 near Toronto. Soviet defector. Educated at the Moscow Military Intelligence Academy, Gouzenko was assigned in 1943 to the Soviet embassy in Ottawa as a cipher clerk. In September 1945 he defected with documents on Soviet espionage activities aimed particularly at Western atomic bomb secrets. His information led to the arrest and conviction of atomic physicists A.N. May and K. Fuchs. In Canada 10 of 18 persons charged with espionage, including Communist-Progressive MP F. Rose, were convicted. Gouzenko wrote two books: his memoirs *This Was My Choice* (1948) and the novel *The Fall of a Titan* (1954).

**Governing Council of the Hetman Office** (Pravlenie getmanskogo uriada). A provisional government in the Hetman state of Left-Bank Ukraine from 1734 to 1750. After the death of Hetman D. \*Apostol, the tsarist government forbade the election of a new hetman. In order to further limit Ukrainian \*autonomy, Empress Anna Ivanovna assigned the Hetman's functions to an appointed council of three Russian officials and three members of the Cossack *starshyna*, who were to rule according to Ukrainian customary law, the empress's decrees, and the *Reshitel'nye punkty*, the constitution imposed in the Hetman state by Russia in 1728. Although all members were to have equal authority, the council was actually ruled by Prince A. Shakhovskoi until 1737, briefly by Prince I. Bariatinsky, and then by Gen I. Bibikov until 1745 with secret instructions from the empress to further subjugate Ukraine. The senior Ukrainian member of the council was General Quartermaster Ya. Lyzohub. Other Ukrainian members included General Judge M. Zabala, General Osaul F. Lysenko, and General Treasurer A. Markovych. The council's decisions could be overruled by the Chancellery of Little Russian Affairs of the Russian Senate, to which the council was subordinated. During

the council's rule, Ukraine bore the brunt of the economic destruction and population losses wreaked by the Russo-Turkish War of 1735–9. The council existed until Empress Elizabeth I restored the \*General Military Chancellery and K. \*Rozumovsky was appointed hetman in 1750.

**Government, municipal.** See Municipal government.

**Government borrowing.** See State loans.

**Government-in-exile of the Ukrainian National Republic** (Uriad Ukrainskoi Narodnoi Respubliky v ekzyli). The government institutions of the UNR were evacuated first partly (end of 1919) and then totally (1920) from Ukraine as Bolshevik troops occupied the country. Most of the institutions were relocated in Tarnów, Poland, and a few in Częstochowa. Later they were moved to Warsaw, Paris, and Prague.

The UNR government-in-exile was based on the Law on the Temporary Supreme Authority and the Legislative System of the UNR and the Law on the State People's Council, which were adopted by the \*Directory of the UNR in Ukraine on 12 November 1920. These acts, which were based on the resolutions of the \*Labor Congress, transferred legislative powers and ultimate authority over the government to the State People's Council. But until this council would be convened, its functions were assigned to the UNR Council of National Ministers, while the Directory, or more precisely its head, was empowered to act as the supreme state authority: to approve laws, treaties, appointments, foreign representation, etc. If the Directory head became unable to carry out these responsibilities, they would be transferred to a special college, and if this college could not be convened, they would be assumed by the head of the Council of National Ministers.

Apart from the shortlived \*Council of the Republic in Tarnów, which consisted of representatives of political parties, professional associations, and cultural organizations, there was no legislative body among the state institutions in exile. It was only in 1947 that the \*Ukrainian National Council was formed to act as a parliament in exile, with authority to elect succeeding governments.

Until 25 May 1926 the head of the Directory, and hence of the state, was S. \*Petliura. After Petliura's death this office was assumed by A. \*Livytsky, and in 1939–40 by V. \*Prokopovych. The Council of National Ministers was headed in exile by A. Livytsky (1920–1 and 1922–6), P. \*Pylypchuk (1921–2), V. Prokopovych (1926–39), O. \*Shulhyn (1939–40), and K. \*Pankivsky (1945–8). The government-in-exile suspended activities during the Second World War, but A. Livytsky, as head of the Directory, signed various petitions to the German government. After the war the composition of the government changed as activists of several Western Ukrainian political parties and of civic organizations from Soviet Ukraine joined the government.

The government-in-exile never established itself as the sole political center for Ukrainians in the diaspora: it was opposed both by parties active in the UNR during the struggle for Ukrainian independence and in interwar Western Ukraine. Often, the government was treated as just another party, whose members were labeled '*uenerivtsi*.' The government's strongest support came from the Ukrainian Radical Democratic party (see \*Ukrainian Party of Socialists-Federalists), which provided most of

the government officials. The Ukrainian Social Democratic Workers' party did not join the government, but recognized its legitimacy. In contrast, the Ukrainian Party of Socialist Revolutionaries, led by M. Shapoval, strongly opposed the government, as did the Hetmanite \*Ukrainian Union of Agrarians-Statists and the \*Organization of Ukrainian Nationalists. The attitude of political circles from Galicia, particularly of the \*Ukrainian National Democratic Alliance, changed from rejection (because of the Treaty of \*Warsaw), to indifference, and finally to co-operation on specific political and civic issues.

The government acted through a number of ministries and institutions. External affairs – the sphere of most intensive activity – were overseen by A. \*Nikovsky, and then by O. Shulhyn (until 1946). At first the government maintained UNR diplomatic representatives in a number of countries, among them K. Matsiievych in Rumania, A. Livytsky in Poland, M. Slavinsky in Czechoslovakia, R. Smal-Stotsky in Germany, M. Vasylo in Switzerland, V. Mursky in Turkey, and O. Shulhyn in France. Except for France, all the missions in those countries were abolished at the beginning of the 1920s. As head of the mission in Paris and later as minister for foreign affairs, O. Shulhyn maintained contact with the \*League of Nations, where he protested against the Bolshevik occupation of Ukraine, Soviet diplomatic initiatives, and the Stalinist terror and man-made famine in Ukraine. The government-in-exile conducted some of its activities in foreign affairs through the Ukrainian Association for the League of Nations and, from 1933 to 1939, through a permanent secretariat in Geneva, run by M. \*Livytsky. It was also active in organizing the \*Promethean movement among émigrés from countries occupied by Soviet Russia.

The government-in-exile devoted special attention to military organs, which were responsible for training military personnel, organizing former soldiers, and maintaining clandestine contacts with supporters in Soviet Ukraine. These were overseen by V. \*Salsky, the minister of military affairs (to 1940), and by Generals O. \*Udovychenko, M. \*Bezrucho, V. \*Petriv, and M. \*Omelianovych-Pavlenko. Some UNR officers worked under special contract for the Polish army and received Polish military training. To promote the military profession the government organized the Ukrainian Military History Society and published journals such as *Tabor* and *Za derzhavnist'* as well as other literature.

In civic and cultural spheres the UNR government-in-exile acted through various associations that supported it: the \*Union of Ukrainian Emigré Organizations in France, the \*Ukrainian Central Committee in Warsaw, the \*Public Relief Committee of Ukrainian Emigrants in Rumania, the \*Ukrainian Alliance in Czechoslovakia, and others. Their work was co-ordinated by the \*Supreme Emigration Council headed by O. Shulhyn. The \*Petliura Ukrainian Library (est 1926) in Paris preserved UNR archives. In 1938 the government founded the \*Ukrainian Mohylo-Mazepian Academy of Arts and Sciences. Thanks to the efforts of the government-in-exile, the Polish government set up the \*Ukrainian Scientific Institute in Warsaw. The weekly \*Tryzub, published in Paris from 1925 to 1940, was an unofficial publication of the government-in-exile. An important source of support for the government was the Brotherhood of Ukrainian Statism, founded in Ukraine during the struggle for independence. Composed of civic

leaders and intellectuals organized in a number of clandestine branches, members of the brotherhood met regularly to review the work of the government and to discuss changes in its composition and other matters.

After the Second World War the head of the Directory, A. Livytsky, reorganized the UNR government-in-exile. Thus, in 1947 the \*Ukrainian National Council was set up as a pre-parliament of the UNR state center in exile to continue the ideological and legal tradition of the UNR government.

**Governor** (*hubernator*). The ruler of a \*gubernia in Russia appointed by the tsar, usually from amongst the nobility. At the beginning of the 19th century, some gubernias (eg, Kiev, Podilia, and Little Russia) had military governors; this position also existed in certain ports (eg, Mykolaiv) and in the Kuban and other Cossack territories. The governor was responsible for the judicial system, police, finances, and general administration of the gubernia, and supervised the autonomous \*zemstvos. He was accountable to the minister of internal affairs, although some governors were supervised by a \*governor-general. The nature of the position changed constantly, depending on the needs of the state and the personalities of the individuals involved. After the 1917 Revolution, the gubernias were ruled by \*gubernial commissioners during the period of the Central Rada and by gubernial elders (*starosty*) during the Hetman government. Several governors were appointed when the Russian army occupied Galicia and Bukovyna during the First World War.

The head of autonomous Subcarpathian Ruthenia (1920–38) was also called a governor and was appointed by the president of Czechoslovakia. This was mostly a figure-head position, as his authority was limited by the central government and real power was in the hands of a Czech vice-governor.

**Governor-general** (*heneral-hubernator*). A high-ranking official in the civil or military administration in Russia who supervised several \*gubernias or \*vicegerencies, or had other special duties. Since he was accountable only to the tsar and the Senate, a governor-general had large discretionary powers. From the beginning of the 18th century, the title of governor-general was given to the commanders of the Russian armies in Ukraine; they also had considerable influence in civil matters, especially in Kiev. After the abolition of the Hetman state in 1764, P. \*Rumiantsev-Zadunaisky was appointed president of the Little Russian Collegium and governor-general of Little Russia. After a series of administrative territorial changes resulting from the abolition of the Cossack regiments and the introduction of the provincial reforms, Little Russia general-gubernia was re-established in 1802. It lasted until 1835, and for much of this period the post was occupied

by N. \*Repnin. Kharkiv general-gubernia, comprising Kharkiv and Voronezh gubernias, existed from 1775 until 1796. In 1832 Kiev general-gubernia was established, comprising the Right-Bank gubernias of Kiev, Podilia, and Volhynia. D. \*Bibikov used this post (1837–52) to further the Russification of the area. It survived the longest of all the general-gubernias in Ukraine, lasting until 1914. The New Russia general-gubernia (1797–1874) consisted of the steppe gubernias of Kherson, Katerynoslav, and Tavriia, and, for shorter periods, Bessarabia and the Kuban. Others were of a temporary nature, eg, Odessa general-gubernia (1905–8), formed because of a state of war or political upheavals in a given region.

The title of governor-general was given to the chief civilian administrator of Galicia and Bukovyna when they were occupied by Russian armies in 1914–17. The administrative center was in Chernivtsi. The first person to serve in this post was Count G. Bobrynsky, followed in 1916 by Gen V. Trepov. In April 1917 this post was taken over by D. Doroshenko.

V. Markus

**Gowda, Michael** [Govda, Myxajlo], b 8 November 1874 in Vetlyn, Jarosław county, Galicia, d 8 July 1953 in Edmonton. To avoid military service Gowda immigrated to Canada and settled in Alberta in 1898. Employed as an interpreter by an Edmonton retailer, he published articles and poems in the Ukrainian-American newspaper *Svoboda*, urging the public to support education. He was one of the founders of the first Ukrainian reading club in Edmonton and one of the leaders of the Federation of Ukrainian Socialist Democrats of Canada. In 1913 he and seven other Ukrainians ran as independents for the Alberta legislature.

**Goy, Luba** [Goj, Ljuba], b 8 November 1945 in Haltern, Germany. Actress and comedienne. Goy came to Canada with her parents in 1951 and settled in Ottawa. She studied at the National Theatre School in Montreal (1967–70). She has performed at Stratford's Third Stage, with the Stratford Festival's National Arts Centre Company and The Jest Society. Since the mid-1970s Goy has been a regular on CBC radio and TV's satirical review 'The Royal Canadian Air Farce,' for which she has been a cowinner of three ACTRA awards. She has performed across Canada in *Just a Kommedia* (written by N. Rylsky), a play on growing up Ukrainian in Canada.

**GPU** (Gosudarstvennoe politicheskoe upravlenie; in Ukrainian: DPU or Derzhavne politychne upravlinnia [State Political Administration]). Organ of Soviet security police created on 6 February 1922 in place of the \*Cheka. Unlike its predecessor, the GPU was a regular agency operating within a legal framework under the control of the People's Commissariat of Internal Affairs. Its functions were espionage, suppression of counter-revolutionary activity, and protection of the borders and railways. In Ukraine a republican GPU directed by V. Balytsky was set up by the 22 March 1922 resolution of the All-Ukrainian Central Executive Committee. With the founding of the USSR, all the republican GPUs were brought under a new central agency, the OGPU (Obedinennoe gosudarstvennoe politicheskoe upravlenie [Unified State Political Administration]), in November 1923. The status of the agency was raised to that of a separate commissariat directly under

the USSR Council of People's Commissars. For the first time the secret police was recognized as a permanent and legitimate feature of the Soviet system and was fixed in the constitution. In spite of its legal position the OGPU continued to be used as an instrument of Party policy. F. \*Dzerzhinsky stayed on as its director and in 1926 was succeeded by his deputy, V. Menzhinsky (1926–34). In the republics the OGPU had its subsidiary organs and a representative on the republican councils of people's commissars. In 1924 the GPU in Ukraine became a people's commissariat of the Ukrainian SSR. It was headed by V. Balytsky, who sat on the republic's Council of People's Commissars. Branches were organized at the gubernia, okruha, and oblast levels. At first the GPU and OGPU were denied the punitive powers of the Cheka, and retained only investigative and examining powers. By the end of the 1920s, however, the OGPU reclaimed all the extraordinary powers of its predecessor. Sentences were passed without trial and in camera, as in the Cheka period, by the so-called Separate Council of the GPU in Ukraine, or by the Judicial Collegium of the OGPU in Moscow. Like the Cheka the OGPU used ruthless terror against members or suspected sympathizers of any opposition within or outside the Party. It fabricated conspiracies, staged show trials, carried out mass arrests, ran the system of corrective labor camps, and provided forced labor for large-scale projects. In Ukraine the GPU mopped up what remained of the insurgent movement (1922–3), organized the trial of the Union for the Liberation of Ukraine (1929–30), directed mass repressions during collectivization (1929–33), exterminated activists of the Ukrainian Autocephalous Orthodox church and Ukrainian cultural leaders, and suppressed various Party deviations (see \*Terror). In 1934, after G. Yagoda became head of the agency, the OGPU was reorganized into the \*NKVD.

**Grabar, Igor.** See Hrabar, Ihor.

**Grabar (Hrabar), Vladimir**, b 22 January 1865 in Vienna, d 26 November 1956 in Moscow. Specialist in the history and theory of international law; brother of I. Hrabar (Grabar). As a child Grabar lived near Prešov in the home of his grandfather A. \*Dobriansky. In 1871 he emigrated to Russia to join his father E. Grabar, a lawyer and member of the Hungarian parliament who had been forced to become a political émigré. After studies at Galagan College and graduation from Moscow University (1888), he taught at the universities of Tartu (1893–1918), Voronezh (1919–22), and Moscow (1922–4). An associate of the Institute of Law of the USSR Academy of Sciences and a full member of the AN USSR from 1926, he was a legal adviser to the Soviet Commissariat of Foreign Trade (1922–9) and the Soviet delegation at the Conference of Lausanne (1922–3). His many works in Russian, Ukrainian, French, and German include *Rimskoe pravo v istorii mezhdunarodno-pravovyykh uchenii: Elementy mezhdunarodnogo prava v trudakh legistov XII–XIV vv.* (Roman Law in the History of International-Law Doctrines: Elements of International Law in the Works of 12th- to 14th-Century Legists, 1901) and *Materialy k istorii literatury mezhdunarodnogo prava v Rossii (1647–1917)* (Materials on the History of the Literature of International Law in Russia [1647–1917], 1958).

**Grabowicz, George** [Hrabovyč, Hryhorij], b 12 October 1943 in Cracow, Poland. Literary scholar. Grabowicz received his PhD from Harvard University in 1975, and since then has been a professor at that university, where he holds the Dmytro Čyževs'kyj Chair of Ukrainian Literature. He is the author of articles on literary history and theory, as well as the books *Toward a History of Ukrainian Literature* (1981) and *The Poet as Mythmaker: A Study of Symbolic Meaning in Taras Ševčenko* (1982).

**Grabowski, Michał**, b 25 September 1804 in Zolotiv (now part of Rivne), Volhynia, d 19 November 1863 in Warsaw. Polish Romantic writer and literary critic. A friend of P. Kulish, he contributed to his ethnographic collection *Zapiski o luzhnoi Rusi* (Notes on Southern Rus') and influenced Kulish's views on the Cossacks. A notable member of the \*Ukrainian school in Polish literature, he wrote historical novelettes with Ukrainian subject matter, such as *Koliszczyzna i stepy* (The Koliivshchyna Rebellion and the Steppes, 1838) and *Stanica Hulajpolska* (The Huliai-Pole Station, 1840–1), and contributed to *Obozrenie mogil, valov i gorodishch Kievskoi gubernii* (Survey of Kurhans, Battlements, and Fortified Cities of Kiev Gubernia, 1848) as well as to several other compendiums of historical, ethnographic, and archeological studies, including *Ukraina dawna i terażniejsza* (Ukraine Ancient and Contemporary, 1850).

**Grabski, Stanisław**, b 5 April 1871 in Borowa, Łowicz county, Warsaw gubernia, d 6 May 1949 in Sulejówek near Warsaw. Polish economist and political figure, a leader of the National Democracy party. He was professor at Lviv (1910–39) and Warsaw (1946–9) universities. From 1919 to 1927 he served as deputy to the Sejm, and in 1923 and 1925–6 as minister of religious faiths and education. He favored a pro-Russian policy. Grabski was the author of the so-called *Lex Grabski*, passed on 31 July 1924, concerning the unification of Polish and Ukrainian schools into bilingual schools with Polish as the language of instruction unless the census figures (25 percent Ukrainian population) warranted a referendum on the language of instruction. This resulted in a virtual disappearance of Ukrainian schooling, the number of schools teaching in Ukrainian falling from 2,426 in 1921–2 to 745 in 1927–8.

**Grądzki, Samuel** (Grondski), b ?, d ca 1672 in Galicia. Polish diplomat and historian. In 1655 he participated in negotiations between King Jan II Casimir Vasa and Hetman B. Khmelnytsky. A year later he served as envoy of Charles x Gustavus of Sweden to Khmelnytsky, and then as representative of Prince György II Rákóczy of Transylvania in negotiations with Col A. Zhdanovych of

the Kiev Cossack regiment. His *Historia belli Cosacco-Polonici authore Samuele Grondski de Grondi conscripta anno 1675* (published in Hungary in 1789) is a valuable source of information on the Khmelnytsky period.

**Graebe, Kurt**, b 9 February 1874 in Karniszewo, Gniezno county, Poland, d 8 August 1952 in Munich. German political figure in interwar Poland; from 1922 to 1930 a member of the Polish Sejm. Graebe co-operated with Ukrainian deputies in organizing a Bloc of National Minorities in the Sejm and at the \*Congress of National Minorities in Geneva. During the Second World War, as head of a department of the \*German Labor Front, he was responsible for the welfare of Western Ukrainian workers in Germany. In 1951–2 he was president of the \*German-Ukrainian Society.

**Graffiti.** Inscriptions or drawings usually scratched on pillars and walls. The oldest known graffiti in Ukraine were found during the excavations of the sites of the \*ancient states on the Northern Black Sea coast. The best described are those in the St Sophia Cathedral in Kiev (dating from ca 1042 onwards). Other important graffiti (12th century) were discovered in a cave of the Kievan Cave Monastery. Graffiti are important for linguists and historians because they often reveal the spoken language, everyday life, and important events of a period. Although useful also for the study of archeology, paleography, art history, and onomastics, they should be approached with caution, as occasionally people from outside regions and countries, often pilgrims, drew them. Ukrainians may have left graffiti outside of Ukraine; for example, at the Hagia Sophia in Constantinople. Ukrainian graffiti have been discovered, studied, and published by I. Sreznevsky (1881), I. Tolstoi (1953), S. Vysotsky (*Drevnerusskie nadpisi Sofii Kievskoi* [Old Rus' Inscriptions in the St Sophia Cathedral of Kiev, 1966]; *Srednevekovye nadpisi Sofii Kievskoi* [Medieval Inscriptions in the St Sofia Cathedral of Kiev, 1976]), and others.

**Grain procurement.** The means by which the state obtains large grain reserves to feed the armed forces, the civil service, and the industrial work force, to use as export, and to be fully able to satisfy the consumption needs of the population. In contrast to purchase on the open market, procurement is compulsory in nature and involves a fixed, stable, and, as a rule, low price.

Grain procurement was introduced by the tsarist regime during the First World War. The Ministry of Agriculture and a special board of food supply procured grain at fixed prices that were, at first, higher than the market prices. Rampant inflation and speculation caused an increase in the market prices, however, and farmers

Cyrillic graffiti on a wall of the St Sophia Cathedral in Kiev

became reluctant to sell grain to the state. The authorities then resorted to requisitioning, which aroused deep discontent among the peasantry. In 1914–15, the state procured 41.7 percent of the grain available on the open market; in 1915–16, 51.3 percent; and in 1916–17, 67.9 percent. Even though it possessed two-thirds of all marketable grain on the eve of the revolution, the state was unable to supply the population adequately.

During the period of \*War Communism the Bolshevik state applied the policy of forced grain expropriation on a massive scale. A \*surplus appropriation system (*prodrazverstka*) was introduced, whereby each peasant household was ordered to turn over its food surplus to the state at a fixed price. As a result of rampant inflation and the lack of manufactured market goods, however, money lost its value, and state payments for grain deliveries became worthless; when they were finally abolished the farmers did not even notice it. In March 1919 the *prodrazverstka* (Ukrainian: *prodrozkladka*) was extended to Ukraine. It was implemented with the help of \*committees of poor peasants, armed workers' detachments, and the Cheka, which seized grain and punished the 'hoarders.' The peasants, left with almost no food, naturally resisted, and armed struggle ensued between the Soviet regime and the peasants and among the peasants themselves. Peasant partisans resisted and attacked the Reds and the Whites throughout Ukraine, and until the Red Army emerged victorious, the Ukrainian peasantry combated the *prodrazverstka* via armed struggle, the black market, reduced sowings, and concealment.

In 1920–1, when the main anti-Bolshevik forces had been defeated, Ukrainian grain deliveries to the Soviet state amounted to 2.6 million t out of a gross harvest of about 8.6 million t. This expropriation, combined with drought and reduced sowings, led to the \*famine of 1921–2 and millions of deaths in the five southern gubernias of Ukraine. Faced with declining productivity and mass unrest, the authorities decided to replace the *prodrazverstka* with a less stringent \*tax in kind. This shift marked the beginning of the \*New Economic Policy and the restoration of the private sector in small-scale trade and industry. In 1921–2 grain deliveries to the state amounted to 1.9 million t, parts of which were used to create local reserves. In 1924 compulsory deliveries of food supplies were abandoned and were replaced by a monetary tax.

The period of freedom from compulsory deliveries of grain and other farm products did not last long. In January 1928 they were reinstated. Peasants were forced to sell grain at a fixed low price; in Ukraine in 1927–8 they were paid 7 rubles per 100 kg of wheat, and in 1928–9, 8.30 rubles (the free market price was 11 and 26 rubles respectively). Peasants who refused to surrender their grain to the state were charged under article 127 of the Criminal Code of the Ukrainian SSR with speculation and concealment of goods, which were punishable by one year of imprisonment and the confiscation of property. A quarter of the grain obtained in this way was distributed free to the rural poor to gain their support for \*collectivization and for punitive measures against the peasants (\*kulaks), who were held responsible for the shortages.

The peasants responded to the reintroduction of compulsory deliveries by decreasing productivity. This, in turn, provoked the state to implement new, drastic measures, such as grain seizures, arrests, and confis-

cation. At the 11th Congress of the CP(B)U in 1930, it was stated that in only 22 of Ukraine's 41 okruhas, 33,000 peasant households were prosecuted and their property confiscated. In order to give the compulsory deliveries a legalistic semblance, seeded land was declared to be under contract.

In contrast to common practice, however, the contracts were not entered into voluntarily by the peasantry and the state did not assume any obligations, such as supplying seed, equipment, or goods. Directives for the procurement plan came from the center, were confirmed at a general meeting of the poor peasants or of all the inhabitants of a village, and then were vigorously implemented by local officials, who were given the authority to impose fines up to five times the imposed quota for late or incomplete grain delivery and even to confiscate the property of uncooperative peasants. Deliveries were officially viewed as the 'natural' fulfillment of the agricultural tax and of other obligations, which were numerous by the late 1920s – self-assessment, compulsory insurance, obligatory loans for the consolidation of peasant holdings, and obligatory industrialization loans – and often exceeded a peasant family's total income.

After collectivization began, extremely high delivery quotas were levied to compensate for earlier shortfalls. When the kulaks and other peasants refused or were unable to meet them, practically all their grain stocks were confiscated. After the 'liquidation of the kulaks as a class,' the \*collective and state farms assumed the burden of grain deliveries. Peasant opposition to collectivization caused agricultural production to decline dramatically, yet the state continued to demand delivery of the same and even greater grain quotas (see table).

Before collectivization the peasants had surrendered less than a fifth of their harvest to the state. In 1929–30 the state increased the share to 30 percent for the USSR as a whole and 40 percent for Ukraine. In fact, the state received an even higher percentage because harvest yields were distorted. In January 1933, CP(B)U General Secretary S. Kosior referred to the previously standard methods of estimating harvests as 'kulak arithmetic' and urged party workers to ignore them. The Central Statistical Administration had been abolished, many noted statisticians and other critics had been arrested, and officials were thus able to demand excessive procurements using an artificial device called 'biological yield.' For example, the real USSR harvest in 1933 was 68.4 million t, whereas the biological harvest was estimated at 89.8 million t. Consequently delivery plans were increased to impossible levels.

This state of affairs led to the terrible, man-made famine of 1932–3 (see \*Genocide). Special detachments of urban activists searched the homes of collective and independent farmers and seized all the grain they could find to fulfill the delivery quota. Peasants were forbidden to save grain for seed, feed, or even human consumption; all of it was removed. Even so, the excessive delivery plans imposed in Ukraine could not be fulfilled. As punishment, individual villages, rural soviets, and even raions were blacklisted and deprived of commodities, all institutions in them were closed down, trade was prohibited, and the population's livestock was confiscated for next year's meat delivery. All these measures resulted in several million deaths from starvation and related diseases in Ukraine. At the time, the absolute priority of

## Gross harvests and state procurements of grain

\*Average for 1911-15

state procurements was enacted. In mid-1933 the state issued a compulsory procurement decree. According to it, collective farms in Ukraine had to deliver 3,100 kg of grain from every ha of seeded land that was not worked by a \*machine-tractor station (MTS), and 2,500 kg from every ha that was worked by an MTS. The state received even more grain – approx 20 percent of the harvest (150–200 kg/ha) paid by each collective farm to the MTS for its services. The delivery quotas of independent and collective farmers with \*private plots were even higher. In general, quotas were not based on the harvest, and non-fulfillment resulted in fines, expropriation, imprisonment, and deportation.

The 1933 decree guaranteed that collective farmers had the right to freely dispose of all grain left over after the collective farms had fulfilled their obligations to the state and had made full provision for seed, reserve, and feed funds. The quantity of grain taken by the state was so great, however, that in most cases, after fulfilling their deliveries and stocking their funds, the collective farms had no surplus. The payments in kind to the MTS changed several times in subsequent years. In 1937–9 the rate was 45–50 percent of all grain collected and depended on the harvest and the type of work done; in 1954–7 the rate was fixed at 220 kg per ha of arable (instead of sowed) land. Besides procuring most of its grain by compulsory means, the state also purchased a smaller amount (10–15 percent) from the collective farmers at above-quota prices. In 1939, for example, the procurement price paid for wheat was 9.42 rubles per 100 kg, while the above-

quota price was 23.97 rubles per 100 kg. Procurement prices barely changed for over 20 years and became divorced completely from real costs and values. Thus, in 1953 the state paid 10 kopecks for 1 kg of wheat, whereas it sold 1 kg of flour for 5 rubles. This disparity discouraged incentive and productivity. From time to time enormous procurements would leave the rural population without grain and famine would again flare up, as it did in 1946 in most of the oblasts of Ukraine and Moldavia.

When the Germans occupied Ukraine during the Second World War they left largely intact the entire Soviet collective- and state-farm system. In some regions of Ukraine, grain quotas imposed by the Nazis on collective farms were double the 1941 Soviet norm. Between 1941 and 1944 over 80 percent of the six million tons of grain requisitioned by the Reich from the occupied territories of the USSR came from Ukraine. After J. Stalin's death the Soviet procurement system began to change. The September 1953 CC CPSU plenum raised the purchase prices of grain significantly and reduced the quotas of compulsory deliveries. Even more important changes took place in 1958 and 1965: the purchase prices were raised by a large factor, a bonus of 50 percent for deliveries above the quota was established, payment in kind for MTS services was abolished, and the MTS were finally disbanded. Purchase prices began varying regionally across the USSR. In 1968, for example, the average price of wheat was 68 rubles per t; in southern Ukraine it was 65 rubles on collective farms and 28.5 rubles on state farms; in the Soviet Far East it was 121 rubles. These

changes resulted in increased productivity, larger harvests, and larger purchases in the 1960s. At the same time Ukraine's contribution to the general procurement plan was lowered, and the percentage of the grain taken from Ukrainian peasants fell (see table).

In the last 15 years, however, the situation has again become more complex. At first gross harvests ceased to increase; then they began to decline. As a result, official data about harvests have not been published. In order to remedy this state of affairs, the authorities have conducted various experiments in the countryside. But compulsory deliveries of grain and other farm products to the state have not been abolished. (See also \*Agricultural procurement.)

**Grain production.** Major branch of agriculture producing grain cultures. In 1984, 15,695,000 ha in Ukraine were devoted to grain crops; this accounted for 47.6 percent of Ukraine's arable land and for 13 percent of the land under grain in the USSR. Similar percentages held in the 1960s and 1970s, but earlier the picture was different. In 1913 (within present-day boundaries) the area devoted to grain in Ukraine equaled 24,700,000 ha, or 88 percent of the total cultivated land area in Ukraine and 23.6 percent of the land under grain in the USSR.

The structure of grain production in Ukraine has changed significantly in the course of history, as a result not only of climatic and economic conditions but also of government policy. Grain growing has been practiced in Ukraine since the Neolithic period: in the Trypilian culture, grains, chiefly \*millet, spring \*wheat, and \*barley, were a staple of the diet. In the Hallstatt period (1000-500 BC) \*rye appeared; then in the 1st century AD \*buckwheat and finally \*oats. From the mid-7th century BC to the 4th century AD, the Black Sea region of Ukraine was an important source of grain for Greece and Asia Minor. During the Slavic period the most important grain was millet. In the second half of the 1st millennium AD rye became a staple, along with wheat and barley. The introduction of winter varieties made possible a partial transition to a two-year, and even a three-year, rotation system. In the Princely era grain production met the demands of the local population and provided a surplus for export to the Crimea and Byzantium in the south and to Novgorod in the north. After the Mongol invasion grain production temporarily declined. In the 14th and 15th centuries the cultivation of oats continued to expand. The state collected oats as tribute to meet the need of its army for horse fodder. By the end of the 15th century Ukraine regained its status of bread basket as the Polish-Lithuanian Commonwealth began to export grain to the rest of Europe, particularly to Holland. Nobles set up \**filoarky* to bring more land under cultivation and to increase *corvée*. The grain was transported by river to the Baltic Sea. First Western Ukraine, drained by the Buh and Sian basins, and then in the 16th and

17th centuries the Boh and Dnieper regions, served as the source of export grain. As Left-Bank and Slobidska Ukraine were colonized in the 17th century, the area under grain cultivation expanded. In these regions, however, grain production was not commercial.

A new period in the history of grain production began at the end of the 18th century when the Russian Empire reached the coast of the Black Sea and rapid settlement proceeded on the steppes. In southern Ukraine, land under cultivation increased quickly from 880,000 ha at the beginning of the 18th century to 6,000,000 in 1860, ie, from 4.5 percent to 34 percent of the total land area. The importance of Ukraine's grain production grew particularly after the 1860s, when the demand for grain in Turkey, Greece, and the industrial countries of Europe (Britain, Germany, and Holland) rose and the construction of railroads in the 1870s facilitated export through Black Sea ports. The land area devoted to grain in Russian-ruled Ukraine expanded from 18,150,000 ha in 1881 to 22,770,000 in 1913. In Subcaucasia it expanded from 3,740,000 ha in 1898 to 7,370,000 in 1913. The proportion of commercial grain varieties increased: from 1881 to 1913, the percentage of all land under wheat and barley increased from 35 and 16 to 38 and 25 percent respectively, while the percentage of land under rye decreased from 26 to 18. These changes occurred mostly in southern Ukraine. There the main trends in farming were the opening of the entire steppe to cultivation; the abandonment of the fallow-land system; the concentration on grain production, with grain crops taking up 96 percent of the total sown area; the specialization in spring wheat and barley, which accounted for 75 percent of the land under grain; the mechanization of agriculture; relatively low yields; and finally, a rise in commercial agriculture, with 50 percent of the harvest being exported. In Right-Bank Ukraine grain farming was more intensive. The three-field system was being replaced by the four-field system; all grains were grown, although winter wheat and rye received preference; and yields were higher because of the introduction of sugar beets, which permitted some crop rotation and thus led to a stabilization and then decrease in the amount of land under grain between 1881 and 1913 by 5 percent. Grain exports barely reached 20 percent of the harvest because of higher population density. In Western Ukraine crop rotation was more widespread, and only 70-80 percent of all arable land was under grain. While yields at the end of the 19th century (especially in Galicia) were fairly high, the greater population density and relatively small area sown with grain kept exports insignificant; there was also little specialization in grains. Grain farming conditions in Subcaucasia were similar to those in southern Ukraine, while conditions in Left-Bank Ukraine were transitional between those of Right-Bank Ukraine and the steppe. In northern Ukraine rye and oats were the chief grains. The three-field system there was being replaced by the many-field rotation system. The region was not self-sufficient in grain.

In Ukraine as a whole, the expansion in the land area devoted to grain and increasing yields resulted in rising gross harvests, which increased more rapidly than the population, and hence ever-larger grain surpluses. During the First World War grain production underwent fundamental changes as exports stopped entirely and the military's demand for feed grain rose sharply. Thus,

the area seeded with barley in Ukraine and northern Caucasia increased from 3,235,500 ha in 1913 to 3,633,300 ha in 1916, or to 36.5 percent of all the land devoted to barley in the empire. The area devoted to oats and great cultures also increased, while the area devoted to wheat decreased slightly. Despite shortages of farm labor and machinery, the proportion of winter wheat to spring wheat grown in Ukraine continued to rise. This indicated that in general Ukrainian farmers were well off and could afford substantial labor and capital investments. The rising price of grain, which more than doubled, improved the living standard of the middle and prosperous peasant. During 1917–21 the entire farming system was transformed radically: the large estates were divided among the peasants; landholdings were generally equalized; the use of forests became free; seed supply to farmers was diminished sharply; and Bolshevik food appropriation detachments were sent into the villages. While the average peasant family saw an improvement in its farm buildings and the size of its landholdings and livestock herd, it was threatened by the forcible grain requisitions and the peasants reduced the area seeded with grain. In 1921 increasing grain confiscation by the state (see \*War Communism) and crop failure in the south led to \*famine. With the introduction of the \*New Economic Policy agricultural production began to rise rapidly.

The \*collectivization drive led to a sharp decline in grain production. The total sown area in Ukraine was reduced; yields and gross harvests fell. The imposition of drastic grain delivery quotas by the state resulted in the man-made famine of 1932–3, during which millions died, and in serious undernourishment of the peasantry in subsequent years. By establishing collective and state farms, the state gained control over all grain production. Henceforth, only state functionaries could decide what would be sown and when, and when it would be harvested. All of this restructuring undermined production. At the same time the structure of grain production continued to change as winter wheat and corn became the predominant grains; by 1957 they accounted for 62 per-

cent of the land devoted to grains, whereas in 1913 they had accounted for only 38 percent.

The production of wheat, the principal staple of the diet in Ukraine, is concentrated on large farms in Odessa, Mykolaiv, Kherson, Kirovohrad, and Crimea oblasts. To increase yields wheat is preceded by perennial grasses and legume crops. Sowing wheat on bare fallow, a widespread practice in the 1940s and 1950s, is rare today. Barley is the second most-important grain in Ukraine today and the chief spring crop. Like wheat, barley is mostly grown in the southern oblasts and on relatively large farms. It is used primarily in industry and as animal feed. Corn not only is grown for its grain but is also important as green fodder, which is used as silage. In the 1960s, under N. Khrushchev's influence, corn was introduced by compulsion throughout the USSR and in Ukraine came to take up almost one-third of the total sown area. Recently, the importance of corn grain has fallen dramatically and its cultivation is limited to the traditional southern and western regions. Rye, which at one time was Ukraine's principal grain, accounted for some 2 percent of the total sown area in 1983. It continues to be an important crop only in the northern and western oblasts – Chernihiv, Zhytomyr, Vinnytsia, and Volhynia – and is grown on relatively small tracts. This reduction in rye production is attributable to the higher yields, resistance, and adaptability of the new wheat varieties, as well as to government policies.

\*Legume cultures have steadily gained importance as an integral part of the crop-rotation system and as fodder crop. The amount of land area devoted to grain is increasing very slowly because of the expansion of potato, vegetable, beet, and industrial crops, and also because the four-field rotation system is being replaced by the five-field system. (See table 1.)

In the mid-19th century backward farming methods kept grain yields very low. Thus, in the 1860s–1880s the yield in the southern (steppe) regions was 3.0–3.1 centners per ha, on the Left Bank 3.8–4.1, and on the Right Bank 4.7–5.4. Subsequently, yields rose significantly, so

that in 1900-10 the steppe produced 5.9 centners per ha, the Left Bank 6.9, and the Right Bank 9.6. In Galicia at the time grain yields were somewhat higher, while in Bukovyna and Transcarpathia they were only slightly higher or about the same as in Russian-ruled Ukraine. In 1913 the average yield in Ukraine as a whole was 9.4 centners per ha (see table 2). The yield of the principal grains was similar to yields in the United States in this period, and greater than those in Canada.

After the revolution the average yield fell somewhat to 8.5-8.9 centners per ha in good harvest years (1923, 1926, 1927) and to 6-7 centners per ha in bad harvest years (1924, 1928). During the collectivization period yields declined, but because of the disruption of the statistics-gathering system, it is difficult to establish exactly by how much. In 1931 the yield was about 8.7 centners per ha; in 1932, 6.6 centners per ha; and in 1933, 7.5 centners per ha. In 1934-5 it did not exceed 6-7 centners per ha, and in 1936 it began to rise. In Galicia, the average yield of the principal grains in 1934-8 was 10.1 centners per ha, while in Volhynia it reached 11.4 centners per ha. From the mid-1950s to the end of the 1960s wheat and barley yields improved considerably, approaching those of the United States and Canada, although the corn yield was only half of North America's. In recent years, although the yield of grain crops in Ukraine is significantly higher than in other grain-producing regions of the USSR, Ukraine's yields have not been rising. In 1975, for example, the grain yield in Ukraine was 20 centners per ha, while the average yield for the USSR was 10.9 centners per ha. At the same time Ukraine's yield of the more important grain crops is below that of other grain-growing countries. In 1975 Hungary produced 38.2 centners per ha, Poland and Romania 24.5, and Czechoslovakia 33.3. The lack of any progress in grain yields during the last decade is a cause of great concern.

In 1913 the gross grain harvest in Russian-ruled Ukraine was 23 million t or 28 percent of the entire harvest in the empire. Of this, the wheat harvest of 8 million accounted for 15 percent of world production. From 1909 to 1913, after meeting domestic demands for food (230 kg of wheat and rye, and 290 kg of all grains per person per year), feed, and seed, Russian-ruled Ukrainian territories exported annually 8 million t of grain, or one-third of their total harvest. This amounted to 80 percent of the grain exports of the empire and 21 percent of world exports. The nine Ukrainian gubernias supplied 6.7 million t (in-

cluding 3.9 million t by steppe Ukraine), and Kuban supplied 1.4 million t. Ukraine exported more wheat than any other country in the world: 4.3 million t (20 percent of world exports) compared to the United States' 2.7 million t or Argentina's 2.6 million t. Ukraine's barley exports of 2.7 million t accounted for 43 percent of world exports. Ukraine's export of other grains (600,000 t) was not very important. Twenty percent of Ukraine's grain products was sold within the Russian Empire, mostly as flour, while 80 percent was sold abroad, mostly to Germany (barley, wheat), Italy (wheat), Britain, France, and Greece. From 1909 to 1911 the average annual export of grain and flour from the nine Ukrainian gubernias alone was valued at 368 million rubles, or 46.5 percent of the value of all their exports.

After the outbreak of the First World War gross harvests declined, and during 1917-21 they fell catastrophically. In 1921 the gross harvest came to 8.5, and in 1922, 10.5 million t. In 1925-7, 17-18 million t of grain were harvested annually, while in 1932 and 1934 the harvest probably did not exceed 12 million t, and taking into account losses during harvesting, must have been even lower. In 1933 and 1935 harvests were close to 17, and after 1936 remained at about 20 million t. Ukraine's share of the total grain production of the USSR increased in the prewar period to about one-third. However, Ukraine's share of world production fell significantly: in 1938 the republic's wheat harvest amounted to only 5 percent of the world harvest.

From 1946 to 1950 Ukraine produced annually about 17 million t of grain. N. Khrushchev's reforms in the mid-1950s resulted in considerably larger harvests. From 1951 to 1960 they were generally 23-24 million t; from 1961 to 1970, 31 million t; and from 1971 to 1980, 42 million t. The average annual harvest from 1976 to 1980 was 43 million t, or almost double the 1913 harvest. At the same time grain procurements were reduced because of the vigorous development of animal husbandry. Ukraine's share in world grain production continues to decline (see table 3). At the end of the 1970s the republic produced only 3-3.5 percent of the world's wheat, less than one-fourth of that produced by the United States.

Since 1980, Ukraine and other regions of the USSR have experienced a crisis in grain farming. Gross harvests are no longer increasing, in spite of the intensive use of machinery, fertilizers, chemicals, and plant breeding. Obviously, this is due to the structural defects of the

TABLE 3  
Gross grain harvests in thousands of t

	1913	1940	1950	1960	1970	1971	1976-80
All grains	23,157	26,420	20,448	21,790	36,392	33,803	43,151

Soviet agricultural system – lack of incentive for the farming population to improve production – and to soil exhaustion. To achieve the growth rates similar to those of the so-called green revolution, major reforms in farm production and management are necessary. (See also \*Agriculture.)

**Grains.** The most important group of cultivated plants whose seeds are used as a staple of the human diet, animal feed, and raw material in many industries. The grains are divided into cereals and legumes. Most cereals, including wheat, rye, barley, rice, oats, and corn, belong to the botanical family Gramineae; buckwheat is a member of the family Polygonaceae.

Grain crops have a long history in Ukraine. Evidence suggests that as early as the Neolithic period, in the 5th to 4th centuries BC, wheat, barley, and millet were grown along the Buh and Dniester rivers. In 1913 (within the present boundaries of Ukraine) 24,696,000 ha were devoted to growing grain, or 88 percent of the total cultivated land area in Ukraine. In 1983 the figure was 15,783,000 ha or 48 percent of the area under cultivation in Ukraine. In 1913 the gross grain harvest in Ukraine was 23,157,000 t; in 1980, 38,100,000 t. In 1980 Ukraine accounted for 20 percent of the USSR's gross grain harvest. The average yield of grain crops in Ukraine was 9.4 centners per ha in 1913 and 23.1 centners per ha in 1980. The most important grain crop in Ukraine is winter wheat, followed by spring barley, corn, and peas (see \*Grain production).

B. Krawchenko

**Grammar.** The study of the formation of words, their inflections (morphology), and their functions and relations in the sentence (syntax). The first grammar known in Ukraine was an anonymous translation and adaptation of an unfinished Greek grammatical treatise – 'O osmikh' chastikh' slova, elika pishem' i gl[agol]em'" (On the Eight Parts of Speech as Written and Spoken), the authorship of which was attributed without foundation in the Middle Ages to St John of Damascus and then to Ioann, the exarch of Bulgaria. The oldest extant manuscript copies of this grammar date from the 16th century and deal only with four parts of speech: the noun, verb, participle, and article. A 15th-century treatise on letters by the Bulgarian Serbian scholar Constantine the Grammarian from Kostenev was also used, though less widely, at the time. 'On the Eight Parts of Speech' became the model for the first Ukrainian printed grammars – I. Fedorovych's primer (1574) and \**Khramatyka sloven'ska iazyka* (Grammar of the Slavic Language, 1586). It also had some impact on the more original, larger grammars of the late 16th and early 17th century, whose authors were part of the movement to restore and purify Church Slavonic. The most important were the Greek grammar \**Adelphotes* (1591) and the grammars of L. Zyziannii (1596) and M. Smotrytsky (1619); the latter definitely influenced the form of Church Slavonic language in Ukraine, Russia, Serbia, and Croatia. None of these grammars dealt with the vernacular, but only with the language of church ritual and theological writings.

The philosophical-rationalist grammar that became influential in Western Europe at that time had a very limited impact in Ukraine because of the cultural dominance of the church in the 17th century and the general decline of cultural life in the 18th century. Even in the first half of the 19th century ecclesiastical, bookish traditions prevailed in Galicia and Transcarpathia. The grammars of M. Luchkai (1830), Y. Levytsky (1834), and I. Vahylevych (1845) still retained much of the Church Slavonic tradition. The influence of the Romantic approach spread slowly; it was applied hesitantly at first in the grammars of O. Pavlovsky (written before 1805 and published in 1818), I. Mohylnytsky (written before 1824), and Y. Lozynsky (written before 1833 and published in 1846). Thereafter the Romantic approach, which focused on the distinctive features of the folk vernacular as the immutable expressions of the 'spirit of a people,' became a long-standing tradition in Ukrainian grammar and led to an insistence on the preservation and development in the language of all that was 'native' and 'natural' at the expense of that which was 'bookish,' 'false.'

Title page of the 1596 Slavonic grammar by L. Zyzani

Title page of the 1918 Ukrainian grammar by V. Simovych

The positivist-comparative approach to the study of the Slavic languages, including Ukrainian, began spreading after the publication of *Vergleichende Grammatik der slavischen Sprachen* (vol 1, 1852) by the Serbian scholar F. Miklosich. This new approach was combined with the Romantic one in O. Ohonovsky's *Studien auf dem Gebiete der ruthenischen Sprache* (1880); in P. Zhytetsky's *Ocherk zvukovoi istorii malorusskogo narechiia* (Outline of the Historical Phonology of the Little Russian Dialect, 1876); in the first Galician Ukrainian school grammars, by M. Osadtsa (1862, 1864, 1876), H. Shashkevych (1865), P. Diachan (1865), and O. Partytsky (1873); and even in the first school grammars in Russian-ruled Ukraine, which were permitted to appear after 1905, by P. Zalozny (pt 1, 1906, 1912, 1917; pt 2, 1913), H. Sherstiuk (pt 1, 1907, 1912, 1917; pt 2, 1909, 1917), Ye. Tymchenko (1907, 1917), A. Krymsky (1907), I. Nechui-Levytsky (1914), and O. Kurylo (1917). While O. Potebnia transcended the eclectic, Romantic, and positivist (neogrammarian) combination of approaches found in the books of his predecessors in his synthesizing works on historical syntax, S. Smal-Stotsky and T. Gartner attempted, in their *Grammatik der ruthenischen (ukrainischen) Sprache* (1913), to defend the essentially Romantic approach by means of the neogrammarian method, in a rather mechanical way.

During the period from 1917 to 1933 in Soviet Ukraine, when the Ukrainian literary language underwent substantial standardization, the Romantic approach became more and more obviously puristic. This is evident in such works as O. Kurylo's *Uvahy do suchasnoi ukrains'koi literaturnoi movy* (Commentaries on the Contemporary Ukrainian Literary Language, 1920, 1923, 1925), V. Simovych's *Ukrainian grammars* (1919, 1921), I. Ohienko's *Chystota i pravyl'nist' ukrains'koi movy* (The Purity and Correctness of the Ukrainian Language, 1925), and especially in S. Smerechynsky's *Narysy z ukrains'koi syntaksy* (Essays on Ukrainian Syntax, 1932) and Ye. Tymchenko's monographs on functions of grammatical cases (1913–28). In this period most grammar textbooks were also written from the purist perspective (eg, by H. Ivanytsia, M. Hladky, O. Kurylo, P. Horetsky, I. Shalia). A less radically romantic and puristic approach is represented in O. Syniavsky's works, such as *Normy ukrains'koi literaturnoi movy* (The Norms of the Ukrainian

Literary Language, 1931), in *Pidvyshchenyi kurs ukrains'koi movy* (An Advanced Course in the Ukrainian Language, 1930, prepared by L. Bulakhovsky's followers and edited by him), and in textbooks by O. Syniavsky, M. Sulyma, M. Yohansen, M. Nakonechny, and others.

In the early 1930s such scholars as O. Kurylo and O. Syniavsky became interested in structural linguistics, but this development was cut short by the Stalinist suppression of Ukrainian culture. It has been manifested outside Ukraine, however, in V. Simovych's articles and in Yu. Sherekh's (Shevelov's) *Narys suchasnoi ukrains'koi literaturnoi movy* (An Outline of the Contemporary Ukrainian Standard Language, 1951). In Ukraine the compulsory method in grammar since the 1930s has been based on a combination of revived logicist-rationalist theory and political propaganda; most books of that time have served to Russify the Ukrainian literary language. The best works published there in the past 50 years are *Kurs suchasnoi ukrains'koi literaturnoi movy* (A Course in the Contemporary Ukrainian Literary Language, 1951), edited by L. Bulakhovsky, and three volumes of *Suchasna ukrains'ka literaturna mova* (The Contemporary Ukrainian Literary Language, 1969–72), edited by I. Bilodid. (See also \*Lexicology, \*Linguistics, and \*Syntax.)

G.Y. Shevelov

**Grand hetman** (*hetman velykyi* or *hetman zemskyi*). Chief military commander in the Grand Duchy of Lithuania. Usually the palatine of Vilnius, originally he was appointed to command only during military campaigns. The formation of armies, their armament, and the state's defense were the responsibility of the \*Council of Lords; his duties began after the armies had assembled and concerned such matters as discipline, strategy, and organization; he led the soldiers into battle. The Ukrainian prince K. \*Ostrozky (1463–1533) is the first man documented with the title of grand hetman (1497). In the early 16th century the position became a permanent one. In 1568 the grand hetman was given the right to raise money for the maintenance of the army and became the minister of defense, assisted by a field hetman. Until the Union of \*Lublin in 1569 he was also a member of the Council of Lords. Poland had an equivalent office, called royal grand hetman.

**Grand prince** (*velykyi kniaz*). Title of the prince who headed the Riurikid senior princes of Kievan Rus'. From the 10th to the 13th century the title was assumed, as a rule, by the rulers of Kiev. The powers of the grand prince over other princes were limited. In practical terms they consisted of the ability to convene princely congresses, hold supreme command during military campaigns, and exert influence in the appointment of bishops. These powers were gradually constricted, mirroring the collapse of the political order in Kievan Rus' and its fragmentation into appanage principalities. By the end of the 12th century the title itself was used by many other princes and by the second half of the 13th century the Kievan princes had completely lost the right to the name. The title passed to the princes of Galicia-Volhynia and Suzdal-Vladimir.

The title was also frequently claimed by senior princes of other eastern Slavic lands. From the 12th to the 16th century it was adopted by the supreme rulers of Lithuania. After the Union of \*Lublin in 1569, the Polish king

was also the grand prince of Lithuania. In Russia, after the liquidation of the other principalities, the title was used by the Muscovite princes to signify the supreme ruler of all the Russian lands. The title was used there until 1547, when Grand Prince Ivan IV the Terrible assumed the appellation of tsar. From 1797 until 1886 'grand prince' was used by the tsar's sons, brothers, grandsons, great-grandsons, and great-great-grandsons through the male line. From 1886 to 1917 the use of the title was limited to the tsar's sons, brothers, and nephews.

**Granite.** A medium- or coarse-grained igneous rock that is rich in quartz, feldspar, and mica. The most common plutonic rock of the earth's crust, granite is valued as a building stone; its better varieties are used for ornamentation. In Ukraine granite and \*gneiss are the basic rocks of the \*Ukrainian Crystalline Shield; there, in the river valleys, outcrops of granite form a unique landscape. Many varieties of granite, differing in composition, origin, physical properties, color, and economic value, are found in Ukraine. Before the Second World War Ukraine accounted for 25 percent of the granite produced in the USSR. Granite is quarried near Klesiv in Rivne oblast (gray and pink granites); at Novohrad-Volynskiy, Korostyshiv, and Korosten in Zhytomyr oblast and Sudykiv in Khmelnytskyi oblast (red granite); in the Vinnytsia-Hnivan region (dark-gray granite); along the Ros River (Pohrebyshe, Horodyshe, Bila Tserkva, and Bohuslav); in the Uman-Talne region of Cherkasy oblast; and near Kremenchuk and in the Yanchivske-Natalivka deposit in Zaporizhia oblast. Deposits in the southern Boh River region and the Azov Upland are little exploited because of their distance from transportation facilities.

Alexander Granovsky

**Granovsky, Alexander** [Hranov's'kyj, Oleksander] (full name: Neprytsky-Hranovsky), b 4 November 1887 in Berezhitsi, Kremianets county, Volhynia gubernia, d 4 November 1976 in St Paul, Minnesota. Zoologist, publicist, community leader, and poet. Granovsky studied at the Kiev Commercial Institute (1909–10) before immigrating to the United States in 1913. He continued his studies at the Sorbonne and University of Wisconsin (PH D, 1926) and taught entomology and economic zoology at the universities of Wisconsin (1922–30) and Minnesota (1930–56). He wrote numerous scientific articles and was a worldwide authority on the biology and taxonomy of the Aphididae, two species of which were named after him: *Calaphis granovskyi* and *Drephanaphis granovskyi*. He also pioneered in studies of insect transmission of plant

diseases and was the first entomologist in the United States to carry out large-scale field testing of the insecticide DDT for control of potato insects.

Granovsky was a full member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences in the US, president (1935–63) of the Organization for the Rebirth of Ukraine, and member of the senate of the OUN. He was a founding member of and held various positions (from 1944) in the Ukrainian Congress Committee of America. He is the author of many political essays and books, including *Ukraine's Case for Independence* (1940), *Vil'na Ukraina neobkhidna dlia postinoho myru* (A Free Ukraine Is Necessary for a Lasting Peace, 1945), and *Na shliakhu do derzhavnosti* (On the Road to Statehood, 1965). His modernist poetry first appeared in the Kiev journals *Ukrains'ka khata* and *Ridnyi kraj*. He wrote seven collections of poetry (1910–14, 1953–64).

C. Spolsky

**Grape growing.** See Viticulture.

**Grapes** (*Vitis*; Ukrainian: *vynohrad*). A group of shrubs and vines in the genus *Vitis*. Five species occur in Ukraine; these include the sole native European species, *V. vinifera* L. 1753; an Asian species, *V. amurensis* Rupr. 1859; and three New World species, *V. berlandieri* Planchon 1880, *V. rupestris* Scheele 1848, and *V. vulpina* L. 1753. *V. vinifera* consists of two subspecies, *V. v. sylvestris* (= *V. sylvestris* Gmelin) and *V. v. vinifera* (= *V. v. sativa* Hegi). All cultivated European varieties belong to the subspecies *V. v. vinifera* and were derived, at least in part, by selection from the subspecies *V. v. sylvestris*, although recent hybridization between the two subspecies, as well as with the New World species, makes the taxonomy somewhat confusing. New World species are used as phylloxera-resistant root stocks for cultivars of *V. v. vinifera* or of hybrids between the latter and New World species. Of the 100 or so varieties of *V. v. vinifera* in Ukraine, the most common ones are white and pink shasla, Hamburg muscat, Rhine riesling, pearl of Saba, Matiash yanosh, and Alexandrian muscat.

Grapes are used in making wine, brandy, vodka, alcohol, vinegar, aldehyde, grape juice, syrup, raisins, and jams and are eaten fresh. In the USSR some varieties are considered to have medicinal value in the treatment of anemia, metabolic disorders, and stomach and kidney ailments. Roasted seeds are used as a coffee substitute. Seed oil is used as food, in soap manufacture, and as a fuel. Because of the economic importance of grapes in both agriculture and industry, much effort since 1936 has been put into improving viticulture. The Ukrainian Scientific Research Institute of Viticulture and Wine Making in Odessa is the main research institution in this field; some research is also carried out in the departments of viticulture of the Odessa and the Crimea agricultural institutes.

C. Spolsky

**Graphic art.** A form of pictorial art that is predominantly linear in effect and includes original drawings and \*illuminations as well as reproductions, such as book \*illustrations, \*bookplates, \*posters, and prints, that are made by various printing techniques (woodcut, engraving, etching, aquatint, \*lithography, and the like).

In Ukraine, from the 11th to the 16th century manu-

Bazylevych, illustration for *Eneida* by I. Kotliarevsky.

script books were ornamented with headpieces, initials, tailpieces, and illuminations. Many of these features appeared as well in the first printed books. Lviv became the first center of printing and graphic art after I. \*Fedorovych established his printing house there in 1573. One of the first influential engravers was L. Fylypovych-Pukhalsky. Graphic-art centers also arose at presses established in Ostrih, Volhynia (where the Ostrih Bible was published in 1581), in Striatyn and Krylos in Galicia, and finally in Kiev at the highly advanced engraving shop of the Kievan Cave Monastery Press. In the first half of the 17th century T. Petrovych of Kiev, who illustrated the Discourses of St John the Evangelist (1623), and A. Klyryk of Lviv were renowned engravers; other craftsmen are only known by their first name – eg, Luka or Illia – or by the initials they left on their engravings.

Beginning in the second half of the 17th century, in addition to religious themes, secular and everyday subjects, portraits, town plans, etc were depicted in graphic form. Realism, which came to Ukraine with the Renaissance and baroque art, fundamentally changed graphic art. During the Ukrainian baroque period, which coincided with the Hetman state, engraving became highly developed, utilizing not only new forms, but also allegory, symbolism, heraldry, and very ornate decoration. These characteristics suited the belligerency and dynamism of the Cossack era, whose apogee during the hetmanacy of I. Mazepa defined the artistic fashion for the late 17th and early 18th centuries. At this time, graphic art began to be used for purposes other than book publishing. An interesting new form, the so-called *tezy* – large graphics on paper or silk, dedicated to famous political or church figures with their portraits and elaborate poetical dedications – became popular.

The turn of the 18th century saw the emergence of the first engraved landscapes – eg, D. Sinkevych's view of the Krekhiv Monastery (1699) – as well as the first engravings with historical themes – eg, N. Zubrytsky's depiction of the siege of Pochaiv (1704). Zubrytsky produced 67 engravings for *\*Ifika iieropolitika* (1712). He, Sinkevych, and other baroque engravers (eg, Ye. Zavadovsky) came from Western Ukraine. But the main center remained Kiev: engraving was taught at the Kievan Mohyla Academy and the Kievan Cave Monastery Press, whose students were often sent to study abroad, especially in Germany. The most famous Kievan craftsman of the time was the portraitist and illustrator O. Tarasevych (active from 1667 to 1720). His pupil D. Haliakhovsky produced the great *teza* with the portrait of I. Mazepa. Other notable craftsmen were Z. Samoilovych, I. Shchyrsky, L. Tarasevych, I. Strelbytsky, and I. Myhura, who was known for his very personal style incorporating folk art motifs. All these craftsmen were in great demand in Poland, Lithuania, Belorussia, Moldavia, and Muscovy.

After the defeat of Mazepa in 1709, cultural life in Ukraine declined because of Russian political restrictions and the migration of Ukrainian intellectuals and artists to St Petersburg. Nevertheless, Kiev still had such craftsmen as A. Kozachkivsky and especially H. Levytsky, the most prominent Ukrainian engraver of the 18th century who created the large *teza* of Archbishop R. Zaborovsky (1739). In Western Ukraine, particularly in Pochaiv, Volhynia, renowned engravers included Y. and A. Gochemsky and F. Strelbytsky.

Lithography, which was developed in Europe in the

1790s, was taken up by Ukrainian artists in Lviv in 1822, in Kiev from 1828, and later in Odessa and other centers. Etching as a technique was made popular by T. Shevchenko, who in 1844 published an album of six etchings, *Zhivopisnaia Ukraina* (Picturesque Ukraine), and later executed numerous portraits, landscapes, and illustrations. Shevchenko was also a pioneer in modern aquatint.

The 1863 and 1876 Russian prohibitions against Ukrainian-language publications delayed the further development of graphic arts in Ukraine. Conditions improved somewhat at the beginning of the 20th century, and new graphic artists and illustrators appeared, such as I. Izhakevych, S. Vasylykivsky, M. Samokysh, O. Slastion, A. Zhdakha, and in Lviv, O. Kulchytka. All of them were largely influenced by realism. V. Krychevsky first explored the possibilities of a new style, combining elements of traditional Ukrainian printing with popular folk motives and using the latest graphic technology, particularly in book publishing.

The major craftsman of modern Ukrainian graphic art was Yu. \*Narbut, who became renowned in St Petersburg in the Russian circle Mir Iskusstva and its journal *Apollon*. After the 1917 Revolution, he returned to Kiev, where he made his most significant contributions to the development of Ukrainian graphic art. His designs of official UNR bank notes, postage stamps, seals, and book decorations are among the finest achievements of Ukrainian graphic art (see \*Currency). In these and other works, Narbut aimed at a synthesis of Ukrainian baroque graphic traditions with a modern approach and flowing, rhythmic linearity. At the newly established Ukrainian State Academy of Arts in Kiev, he taught his craft to such artists as L. Lozovsky, M. Kyrnarsky, and R. Lisovsky.

Graphic art was also nurtured by M. Boichuk, who advocated the continuation of Ukrainian artistic traditions, particularly Byzantine ones, through modern art forms; his followers include his wife S. Nalepinska, I. Padalka, O. Sakhnovska, M. Kotliarevska, V. Sedliar, and O. Dovhal. The realist style was espoused by the talented and prolific V. \*Kasiian, who produced many engravings and illustrations on political and labor themes; as a professor at the Kharkiv and Kiev art institutes, he had a major influence on the development of socialist realism in graphic art. Other artists such as A. Sereda, A. Strakhov, L. Khyzhynsky, H. Pustoviit, and B. Kriukov also contributed to the development of Soviet Ukrainian graphic art in the 1920s and 1930s.

In interwar Polish-ruled Galicia, there arose in Lviv an important group of graphic artists who were closely connected with artists in other European cities. The more prominent of these were P. Kovzhun, who was well known for his cubist and constructivist book designs, M. Butovych, R. Lisovsky, P. Kholodny Jr, N. Khasevych, V. Tsymbal, V. Masiutyn, H. Mazepa, and E. Kozak. The Lviv exhibit of Ukrainian graphic art in 1932 was one of the biggest events of its kind, with 1,392 works from all branches of the graphic arts, including works by artists from Soviet Ukraine. Ukrainian graphic artists also exhibited in various Western European cities; eg, in Berlin at the State Art Library in 1933 and in Rome in 1938.

Since the Second World War all graphic art in Ukraine has had to conform to the official style of socialist realism and has been used as an instrument in political and economic propaganda. It was only during the brief thaw

after Stalin's death that Western influences were allowed. In the last decade a number of new talented artists have attempted to expand the boundaries of socialist realism while remaining faithful to the tradition of the Kasiian school. The more prominent postwar artists of the prerevolutionary generation are M. Derehus, O. Pashchenko, and V. Lytvynenko. Artists born after the revolution include S. Adamovych, A. Bazylevych, O. Danchenko, H. Havrylenko, O. Hubariiev, S. Karaffa-Korbut, V. Kutkin, I. Ostafiichuk, V. Panfilov, V. Pereval'sky, I. Pryntsev'sky, and H. Yakutovych.

After the Second World War many Ukrainian artists emigrated to the West, especially to North and South America, where they continued to make important contributions: eg, J. Hnizdovsky, who settled in the United States and achieved international prominence with his woodcuts, P. Andrusiv, V. Balias, M. Butovych, M. Dmytrenko, I. Keivan, E. Kozak, P. Kholodny Jr, M. Levysky, H. Mazepa, and V. Tsymbal. A postwar generation of Western graphic artists of Ukrainian origin, including B. Bozhemsky, L. Hutsaliuk, A. Lysak, R. Logush, A. Maday, A. Olen'ska-Petryshyn, Z. Onyshkevych, and B. Pachovsky, has also arisen; it has been joined by recent Soviet émigrés such as R. Bahautdyn, Yu. Lytvyn, V. Makarenko, and V. Strelnikov. **Graphite** (Ukrainian: *hrafit*). A naturally occurring form of carbon having high electrical conductivity, chemical inertness, and lubricity. It is widely used in metallurgical, chemical, nuclear, electrotechnical, and other industries. Ukraine is the major producer of graphite for the USSR. It is found in crystalline veins in Precambrian

gneisses, primarily in three regions: western Kirovohrad oblast (the Zavallia deposit, with current reserves of 25 million t), the Kryvyi Rih region around Petrivske (with reserves of 7.5 million t), and near Staryi Krym in southern Donets oblast (with reserves of 3.4 million t). Ukrainian graphite is very flaky, the ores containing concentrations of 17-70 percent. In Ukraine there are two enrichment plants, which process the ore from neighboring mines, in Zavallia and Staryi Krym.

**Gratovich, Eugene** [Gratovyč, Jevhen], b 26 September 1941 in Alchevske, Luhanske oblast. Violinist, educator. He studied violin with J. Heifetz, and completed his music studies at the Boston Conservatory and Boston University (DMA 1968). At age 16 he was appointed soloist with the Philadelphia Orchestra. For his debut at Carnegie Hall, New York, in 1976 he performed works by J. Carpenter, C. Ives, A. von Webern, and S. Prokofiev. He has taught music at De Paul University and at the universities of Missouri and California-San Diego. In 1979 he recorded an album with V. Baley and B. Turetzky, *20th Century Ukrainian Violin Music*. He is a leading authority on, and performer of, C. Ives.

**Grave, Dmytro**, b 6 September 1863 in Kirillov, Novgorod gubernia, d 19 December 1939 in Kiev. Mathematician; from 1919 full member of the AN USSR, from 1923 full member of the Shevchenko Scientific Society, and from 1929 honorary member of the Academy of Sciences of the USSR. After obtaining a doctorate from St Petersburg University in 1897, he was first a professor at Kharkiv University (till 1899) and then at Kiev University (till 1939). From 1934 to 1939 he was also director of the AN USSR Institute of Mathematics in Kiev, where he made important contributions to Galois theory, the theory of ideals, number theory, the three-body problem, and equations of the 5th degree. Later, he contributed to the advancement of applied mathematics, mathematical physics, and mechanics. Grave is regarded as the founder of the Kiev school of algebra, which became the center of algebraic studies for the entire USSR. Besides numerous research articles, Grave wrote several books, including *Teoriia konechnykh grupp* (The Theory of Finite Groups, 1908), *Kurs algebraicheskogo analiza* (A Course of Algebraic Analysis, 1910), and *Teoreticheskaia mekhanika na osnove tekhniki* (Theoretical Mechanics Based on Technology, 1932).

**Gray Ukrainian cattle.** See Great horned cattle.

**Graycoats** (Sirozhupannyky). The popular name of an infantry division formed by the Austrian army in Volodymyr-Volyn'skyi during March-August 1918. Recruited from among Ukrainian prisoners of war in Austria, it was officially designated the First Rifle-Cossack Division, under the command of Col I. Perlyk. It was composed of four infantry regiments and various other combat and support units, with a total strength of 6,140. On 28 August 1918, the Graycoats were transferred to the Ukrainian Hetman government army and stationed in the vicinity of Konotip. In October 1918, the division was reduced in strength, but during the November insurrection it declared its allegiance to the UNR Directory and was reinforced with insurgents. Reorganized in December 1918 as the Gray Division of the \*Army of the

The Graycoat Division on parade, Kiev, 15 August 1918

UNR and placed under the command of Gen A. Puzytsky, it fought against Bolshevik forces on the Ovruch–Korosten–Berdychiv line. In April 1919 it was expanded into a corps unit of two infantry divisions and transferred to the Polish front, where in May it was decimated in combat against the Polish army. Subsequently, the unit was reformed as the 4th Gray Division with a strength of 700, then reduced to a brigade of the 2nd Volhynian Division; it participated in combat until November 1920. Other commanders of the Graycoats included Otaman Palii, Lt Col Abaza, Gen Martyniuk, and Col Handzha.

**Graywolves Company of the Ukrainian Insurgent Army** (Sotnia Siromantsi). A combat unit of the UPA in Galicia, organized in October 1943 near Dolyna in the Carpathian Mountains, in the 4th UPA Military District (MD – Stanyslaviv region) of UPA-West. It was initially commanded by Lt D. \*Karpenko. In November 1943, the Graywolves was assigned to the 3rd MD (Ternopil region) and sent northwest to the 2nd MD (Lviv region) to fight against the Polish Home Army in the Rava-Ruska area. The Graywolves operated in that area from April through August 1944, and then returned to the 3rd MD. On 30 September 1944, the Graywolves played a key role in a battle with a motorized НКВД battalion near Univ (now Mizhhiria), Peremyshliany county. For the remainder of 1944, the company participated in almost continuous armed combat, culminating on 17 December 1944 in a successful attack on Novi Strilyshcha. Lt Kosach committed suicide in March 1946 when his bunker was discovered by Soviet security forces, and the last skirmish attributed to the Graywolves occurred on 15 July 1946. During the summer of 1947, the company was officially demobilized. It was one of the few UPA units that integrated soldiers from various parts of Ukraine.

P.R. Sodal

**Graz.** City in Austria (1984 pop 246,000), capital of Styria province. A Ukrainian community, mostly of students from Galicia and Bukovyna, was established there in the late 19th century. The Rus' mutual aid association was organized there in 1895 and renamed the Ukrainian students' society \*Sich in 1910. The 50 Ukrainian students in Graz after the First World War grew to about 200 after the Second World War, when many displaced persons enrolled at the university; they published the journal

*Students'kyi klych* in 1947. Ukrainian language and literature were taught at Graz University. From 1945 to 1949 a Ukrainian refugee representation in Styria, directed by V. Tymtsiurak, was based there. Today the Ukrainian community in Graz is very small. The history of Ukrainian student life has been documented in the collection *Ukraïn'skyi Grats-Leoben* (Ukrainian Graz-Leoben, 1985), edited by M. Chyrovsky.

*Grazhda*

***Grazhda.*** Archaic form of an enclosed, rectangular farmstead constructed of logs. It consisted of a house with a steep two- or four-sided roof and a veranda and windows facing the yard, and such farm buildings as a storehouse, stable, sheepfold, sty, separate root cellar, shelter annex, and woodshed. The buildings were arranged in such a way as to protect the yard from snow and predators. *Grazhdy* were common in the Carpathian Mountains, particularly in the Hutsul region. Examples of them have been preserved at the Ukrainian SSR (Kiev), Lviv, and Transcarpathian (Uzhhorod) museums of folk architecture and folkways. The *zymivoka*, *zymarka*, and *salash* are simplified winter variants of the *grazhda*. The *grazhda* is related to the so-called Etruscan house, which is known to have been used as early as the 8th century BC. F. Vovk believed that the *grazhda* is the oldest form of Ukrainian residential building, and traced back to it the whole evolution of farmsteads in Ukraine.

**Grazhdanka alphabet.** See Hrazhdanka alphabet.

**Great Britain** (official name: United Kingdom of Great Britain and Northern Ireland). A constitutional monarchy, its territory covers 244,100 sq km, and its population in 1985 was 56,520,000, including about 30,000 Ukrainians. The capital is London.

**Ukrainian-British contacts.** At first, relations between Ukraine and Great Britain were sporadic. According to the sagas, after Canute's conquest of England in 1016 the sons of the English king Edmund II found refuge in Kiev. \*Gytha, the daughter of King Harold II, was married to Prince Volodymyr Monomakh and brought an English retinue with her to Kiev. Besides dynastic ties, there was some trade between the two countries. In the 12th century a Scottish monastery and church were built in Kiev. For the next few centuries, however, British-Ukrainian relations were interrupted. In the 15th century grain and lumber began to be exported via the Baltic Sea from Ukraine to Britain. At the beginning of the 17th century the noble Yu. \*Nemyrych studied at Oxford and Cambridge.

In the 17th century English readers began to take an interest in the Cossacks, receiving much of their information through the English legation in Turkey. R. Knolles, in his *The Generall Historie of the Turks* (1603), described Cossack naval expeditions on the Black Sea. English official circles were especially interested in the Cossacks as potential allies in their conflict with the European Catholic states, including Poland-Lithuania, in the early 17th century. Newspapers such as *Mercurius Politicus*, *London Gazette*, *The Moderate Intelligencer*, and *Several Proceedings* informed the English public about developments in Ukraine under B. Khmelnytsky and subsequent hetmans. The diary of P. Gordon, a Scottish general of the Russian army, contained much interesting information about Ukraine. Other early sources of information about Ukraine included E. Browne's translation of P. Chevalier's *Histoire de la guerre des Cosaques contre la Pologne* titled *A Discourse of the Origin, Countrey, Manners, Gouvernement and Religion of the Cossacks ...* (1672), P. Heylyn's world geography (1666), A. Tyler's *Memoires of John the Great ... Present King of Poland ...* (1685), Fr P. D'Alerac's *Les Anecdotes de Pologne* (English edn 1700), and F. Tellow's *The Ancient and Present State of Moskovy ...* (1698). A collection of letters by the personal physician to the Polish king John III, B. Connor, to various English dignitaries was published in 1690 as *The History of Poland ...* One of these letters, to William, Duke of Devonshire and Lord Steward, contained an especially detailed description of Ukraine and the Cossacks.

In the 18th century Peter I's victory over Charles XII of Sweden and Hetman I. Mazepa at the Battle of Poltava (1709) again aroused the British public's interest in Ukraine. British diplomats and envoys, who were alarmed by the growth of Russian power, followed closely developments in Ukraine, and especially Ukrainian independence sentiments. P. Orlyk, the émigré hetman of Ukraine, maintained contacts with British government circles. A translation of G. de Beauplan's *Description d'Ukraine*, published in J. Churchill's collection of travel accounts (1704), was widely read. J. James, J. Marshall, E. Clarke, and others wrote descriptions of Ukraine in the 18th and early 19th century. Lord Byron's romantic tale *Mazeppa: A Poem* (1819) did much to popularize the famous hetman in the 19th century. At the end of the 18th century the British government defended non-Catholics who were being persecuted in the Polish Commonwealth.

In the 1860s British economic ties with Ukraine expanded. The New Russia Ironworks Company (est 1870), founded by J. Hughes and funded mostly by British capital, provided strong competition for Belgian, French, and Russian companies. In the 1870s it established a metallurgical plant in Bakhmut county, which used Donbas coal to process iron ore brought in from Kryvyi Rih. By the turn of the century it was one of the largest providers of iron and metal products for both the imperial Russian economy and for export. Meanwhile, in Galicia several petroleum consortiums were organized to exploit the resources in the Drohobych region: the Anglo-Austrian Society in Tustanovychi (est 1906), the Anglo-Polish Trade Society (est 1908), and the English Stock Company in Lviv (est 1912). From 1904 R. Zalozetsky-Sas acted as honorary British consul in Lviv. Around the turn of the century Britain was a major consumer of Ukrainian grain and sugar (as much as one-third of all Ukrainian exports of the latter), as well as of substantial quantities of livestock and iron ore.

In the second half of the 19th century English works on Ukrainian folklore and literature began to appear in print; eg, W. Morfill's articles on T. Shevchenko, E. Voynich's collection of Shevchenko translations (1911), and later works by R. Seton-Watson, A. Toynbee, W. Napier, and C. Macartney. The journal *Athenaeum* published some articles and reviews of Ukrainian subjects, including a description of the Kiev branch of the Russian Geographical Society by M. Drahomanov. Between 1912 and 1915 G. \*Raffalovich (pseud: Bedwin Sands), a Jew from Ukraine, advocated Ukrainian independence in his numerous journalistic writings until he was forced to leave Britain, having been accused of pro-German sympathies. Raffalovich also translated M. Hrushevsky's *The Historical Evolution of the Ukrainian Problem* (London 1915). After the Second World War W. Matthews, a Slavist, and the historian H. Seton-Watson published studies on Ukraine.

The attitude of the British government to Ukrainian independence was reserved, but not hostile. In December 1917 J.P. Bage was sent to Kiev to represent Great Britain in the UNR. The UNR Directory sent a diplomatic mission to Great Britain – headed by M. Stakhovsky and then by A. Margolin and Ya. Olesnytsky – but it did not receive official recognition from Britain. The mission of the Western Ukrainian National Republic also was not formally recognized. The work of these missions was limited to informing the British public about Ukrainian affairs and to preparing several memorandums. The British government actively supported the White armies of generals A. Denikin and P. Wrangel.

During the Paris Peace Conference various solutions to the problem of eastern (Ukrainian) Galicia were considered by the British government, including its incorporation into Czechoslovakia or a non-Bolshevik Russia and its inclusion as an autonomous territory in the Polish Republic. The \*Curzon Line, which was proposed by the British foreign secretary, Lord G. Curzon, was adopted by the Allied Supreme Council as Poland's eastern border, and after the Yalta Conference (1945) it became the basis of the Polish-Ukrainian border.

During the interwar period protests against anti-Ukrainian policies of the Polish authorities were often voiced in Britain. The British press, and particularly the *Manchester Guardian*, criticized the so-called \*Pacification. An objective report on the campaign by M. Sheepshanks,

the general secretary of the International Women's Union who visited eastern Galicia immediately after the Pacification, appeared in the *Manchester Guardian Weekly*. The British consul in Warsaw spent much of the autumn of 1930 in Lviv, keeping his government informed of events in Galicia. On 5 October 1932 a group of 32 MP's and five members of the House of Lords submitted the 'Petition to the League of Nations concerning the Ukrainian Minority in Poland and the Question of the Establishment of an Autonomous Regime in the Territory Known as Eastern Galicia ...'

In 1933 the British government became even more interested in Ukraine. Its missions in Warsaw and Moscow were instructed to follow closely Ukrainian affairs. M. Muggeridge, an English correspondent in Moscow, sent in accurate reports on the man-made 'famine in Ukraine. Questions about the famine were raised in the House of Commons. For much of this period T. Philipps, the British relief commissioner in 'South Russia' in 1921, was one of the more influential British officials who was knowledgeable about Ukrainian affairs.

From 1932 to 1939 V. \*Kaye-Kysilevsky directed the Ukrainian Press Bureau in London, which was financed by Ya. Makohin. In 1933-5 Ye. Liakhovych acted as the representative of the OUN in London and in the late 1930s the Ukrainian Canadian S. Davidovich ran the Ukrainian Information Bureau there. A group of Hetmanite supporters published *The Investigator*, an English-language information bulletin edited by V. Korostovets.

In 1935 the Anglo-Ukrainian Committee was formed in London to promote the cause of Ukrainian independence. Its members included Lord Dickinson, Mrs Dugdale, G. Gooch, L. Lawton, F. Lincoln, C. Macartney, Col C. L'Estrange Malone, G. le M. Mander, Sir W. Napier, and M. Sheepshanks.

After the Second World War the British government supported the Soviet annexation of Galicia. In a House of Commons debate on 21 February 1945, A. Eden argued that the annexation would strengthen Ukraine's political and ethnic unity. In 1947 and 1950 the British government tried to establish diplomatic relations with the Ukrainian SSR, but it could not gain the approval of the Soviet authorities in Moscow.

In the 1950s the Scottish League for European Freedom in Edinburgh, headed by D. Stewart, maintained close ties with the \*Anti-Bolshevik Bloc of Nations and the OUN (Bandera faction), and in its publications supported the idea of Ukrainian independence. A number of English politicians were members of the Anglo-Ukrainian Society, which was organized by A. \*Herbert. In 1951 some House of Commons members proposed that a Ukrainian radio program on the BBC be established, but failed to win majority support. In the 1960s the Anglo-Ukrainian Mazepa Society was founded.

**Ukrainians in Great Britain.** There were a few Ukrainians in Great Britain before 1939: members of diplomatic missions from the period of Ukrainian independence, a group of political émigrés, and a small number of students. There was also a community of Ukrainian workers in Manchester, who in 1893 on their way to North America had decided to stay in England. By 1912 the community numbered 500. Most of them immigrated to the United States before the outbreak of war in 1914. Those who remained worked mostly as tailors and had their own Ukrainian Club (est 1929). After the fall of France

in 1940 some Ukrainian soldiers in the Polish army went to England. During the Second World War a representative of the Government-in-exile of the UNR, V. Solovii, was active in London. D. Skoropadsky, a leader of the Hetmanite movement, lived in London during the war.

Ukrainians appeared in Britain in larger numbers during and immediately after the war. Among them were soldiers of the Canadian armed forces and of the Polish army, some of them evacuated from France but most (about 6,000 members of Gen W. Anders's corps) brought in from Italy. The first Ukrainians in the \*Division Galizien (eventually totaling 8,361 men) arrived as contract laborers in Britain from the British POW camp in Rimini, Italy in April 1947. In June the so-called European Voluntary Workers who were recruited by special commissions in the British zones in Germany and Austria began to arrive; within two years 21,000-24,000 Ukrainians, including about 5,000 women, came in under this classification. People with higher education were not admitted, and elderly people were accepted very reluctantly. About 2,000 Ukrainian women from Yugoslavia and Poland were admitted in subsequent years on invitation from prospective husbands. Ukrainian men married Italian, German, and Irish women, but rarely English women. At the beginning of the 1950s Ukrainians began to emigrate from Britain to North America. Eventually, 8,000-10,000 individuals left.

Ukrainian veterans of the Polish army were treated on a par with Poles and Englishmen; they had a free choice of occupation and residence. Members of the Division

Major concentrations of Ukrainians in Great Britain

Galizien, however, continued to be treated as prisoners, living in hostels and working as farm laborers; only at the end of 1948 and the beginning of 1949 were they freed from their obligations and restrictions and allowed to work and live where they desired. The European Voluntary Workers were contracted for three years of regimented labor on farms, in textile factories or coal mines, as hospital orderlies, or as domestic help, after which they too became free workers. All foreign workers received the same wages as British workers. Ukrainians tended to move from the farms into the cities, taking jobs as unskilled labor in transport (railways and buses) and the textile, coal, and construction industries. Many with some secondary education tried to upgrade their education to qualify for a white-collar job. Women tended to work as nurses. Ukrainians of the younger generation (born in Britain) usually do not attend university and are satisfied with a secondary education and vocational training. A large proportion of them, particularly women, work as teachers or as office clerks. Only a few (600–800) have completed university studies and become professionals. In 1983 S. Terlecky, a Ukrainian, was elected as a Conservative to the House of Commons.

The overwhelming majority of Ukrainians in Britain (75–80 percent) own their own homes, and 5–7 percent own more than one house. Relatively few postwar immigrants – usually only those with some education – have applied for British citizenship; Ukrainians born in Britain have become citizens automatically. In general, Ukrainians have a good reputation among the British: they are believed to be thrifty, enterprising, hard working, and conscientious. They are also quick to attain a decent standard of living. Two-thirds of Ukrainian immigrants in Britain are Galicians; the rest come from other parts of Ukraine.

The territorial distribution of Ukrainians in Britain has changed dramatically. Immediately after the war, about 10,000 Ukrainians lived in Scotland, but by 1980 at most 1,000 remained there. There are almost no Ukrainians in northern Wales or in Northern Ireland, and only 250–300 in southern Wales. Ukrainians are concentrated mostly in London and in central England – in Manchester and vicinity (Rochdale, Bolton, Bury); in the textile region of Leeds, Bradford, Halifax, and Huddersfield; in the heavy-industry region of Birmingham, Coventry, and Wolverhampton; and in Nottingham and Leicester. In 1985 there were about 1,500 Ukrainians in London, 2,000 in Nottingham, 2,000 in Bradford, and 4,000 in metropolitan Manchester.

*Religion.* Of the 30,000 Ukrainians in Great Britain in 1985, 3,500–4,000 were Orthodox, 21,000–22,000 were Ukrainian Catholic, and the rest belonged to other denominations or to none at all.

The first Ukrainian priests were chaplains of the Canadian armed forces – Rev S. Savchuk (Orthodox) and Rev M. Horoshko (Catholic) – who arrived in the summer of 1944. In 1946 Rev J. Jean, a Basilian monk, was sent from Canada. Ukrainian Catholics in Britain came under the jurisdiction of the apostolic visitor of Ukrainians in Western Europe. From the end of 1946 this office was held by Bishop I. Buchko, who visited England in early 1947 and, with the co-operation of the British hierarchy, established the organizational structure for Ukrainian Catholics. Rev J. Jean, who later became general vicar, was appointed to the London parish and assigned eight

Ukrainian Catholic Cathedral in London

priests (four former chaplains of the Division Galizien, two former chaplains of Anders's corps, and two priests sent from Rome) to serve all of Britain. The first church was established in London in Saffron Hill, and congregational centers were set up in Manchester, Nottingham, Rochdale, Bradford, Cambridge, and Edinburgh. The arrival of more priests from Germany increased the total number to 17. In 1949 Rev V. Malanchuk became vicar-general; he was succeeded in 1950 by Rev O. Malynovsky and in 1957 by Rev P. Maliuga. An exarchate (from 1967 an apostolic exarchate), initially headed by the archbishop of Westminster, W. Godfrey, was set up for Ukrainians in 1957. In 1961 he was replaced by Bishop A. Horniak. A large Ukrainian Catholic cathedral was opened in the following year in the Mayfair district of London. In 1985 the exarchate encompassed 16 churches and 13 priests in England and Scotland.

Two priests and their congregations remain outside the jurisdiction of the exarch because of a major controversy that developed in the 1970s between Bishop Horniak and Archbishop Major Y. Slipy over the problem of a Ukrainian Catholic patriarchate. They formed first the Central Committee for a Ukrainian Catholic Patriarchate and then the Ukrainian Catholic Patriarchate Lay Association, which in 1985 represented 75 branches and 16 member organizations with about 5,000 members.

Most Orthodox Ukrainians in Britain belong to the Western European Metropolitanate of the \*Ukrainian Autocephalous Orthodox church. The first Orthodox congregations arose in the 1940s when about 5,000 Orthodox laymen and a number of priests arrived from Germany as European voluntary workers. An administrative board for England headed by Rev I. Hubarzhev-

sky and then by Rev S. Molchanivsky was elected. A Ukrainian Orthodox bishop for Great Britain – V. Didovych – was not appointed until 1983. Since 1948 over 30 priests have ministered to the Ukrainian Orthodox in England. Today there are eight priests and two deacons. There are five Orthodox churches but 18 parish centers. Parishes that do not have their own churches conduct services in Anglican churches. In 1977 a Ukrainian Orthodox cathedral, religious center, and episcopal residence were established in London.

In the 1960s and 1970s a small number of Orthodox Ukrainians belonged to the Ukrainian Autocephalous Orthodox Church (Conciliar), which was led by Rev I. Hubarzhevsky. A number of congregations of the All-Ukrainian Evangelical Baptist Fellowship are still active in Britain.

*Civic and political organizations.* During the Second World War the \*Ukrainian Canadian Servicemen's Association was established in London. It, in turn, organized the \*Central Ukrainian Relief Bureau to assist the \*displaced persons in Europe. In January 1946 the \*Association of Ukrainians in Great Britain (SUB) was organized, mostly by Ukrainian soldiers of the Polish army. By the beginning of 1947 its membership numbered 1,430. As the influx of refugees from Europe increased, SUB membership grew rapidly and by 1949 reached 22,000. A power struggle within the association culminated in the victory of the OUN (Bandera faction) at the convention of March 1949, and the secession of the defeated minorities, who formed the \*Federation of Ukrainians in Great Britain. This schism in the Ukrainian community of Great Britain has had a decisive influence in almost all facets of community life.

SUB remains the largest Ukrainian organization in Britain: almost 27,000 people have passed through its ranks. At the end of 1984 it had 58 branches, 12 local chapters, and a membership of 16,700. Other important organizations include the \*Ukrainian Former Combatants in Great Britain, which in the 1950s had a membership of 4,000 and in 1986 still had 1,740 members and 50 branches; the Bandera faction's \*Ukrainian Youth Association (est 1948), which once claimed a membership of close to 5,000 and in 1986 still had about 3,000 members; and the \*Association of Ukrainian Women in Great Britain, with 2,500–2,800 members. The \*Plast Ukrainian scouting organization was established in Great Britain in 1950; in 1985 it had 215 members.

Every Ukrainian émigré political party has some sympathizers in Great Britain, but the most numerous and active force consists of supporters of the Bandera faction. Adherents of this group have gained control of most Ukrainian organizations, the press, and economic institutions (several co-operative unions) in Great Britain. Supporters of the Hetmanite movement, which had some influence while D. Skoropadsky was alive, have collaborated with the Bandera faction. The Federation of Ukrainians in Great Britain is controlled by the OUN (Melnik faction). In the past the Ukrainian Revolutionary Democratic party, which controlled the Petliura Legion, and the supporters of the \*Ukrainian National Council, who formed the Ukrainian Association of Great Britain, had some influence in the Ukrainian community. The Ukrainian-Polish Society, of which K. Zelenko is copresident, has a membership of 190 and is still politically active.

*Education.* In the immediate postwar years there were

few Ukrainian children of school age in Great Britain. Their numbers began to increase from the end of the 1950s as children born in Britain reached school age. Ukrainian schools were organized by SUB, the Union of Ukrainian Teachers and Instructors (est 1955), and a few other associations. By the mid-1960s there were 45 Ukrainian Saturday schools, with a total enrollment of about 3,000. At the same time there were 15 Ukrainian nurseries with about 200 children. Up to 230 individuals taught in these institutions. Eventually, the number of students and schools declined: by 1984 there were 14 schools with an enrollment of 350. Most teachers now are graduates of Ukrainian Saturday schools. Since 1980 the teachers' union has been headed by B. Marchenko.

The number of Ukrainian students attending British post-secondary schools peaked in the 1970s: in 1973 it was over 700. The Ukrainian Student Club at the time had over 100 members. The Ukrainian Graduate Society, whose membership consists of recent graduates of higher schools, conducts cultural and social activities at an academic level. In 1979 a branch of the Ukrainian Catholic University was set up in London.

*Literature, art, music, and science.* There are not many Ukrainian intellectuals or writers in England. Some of the writers who lived there are V. Shaian, S. Fostun (president of the Society of Ukrainian Litterateurs since 1976), and the poets B. Bora (Shkandrii), H. Mazurenko, and A. Lehit. The English poet V. Rich has translated Ukrainian literature. Several Ukrainian émigré scholars have worked in England: the archeologist V. Shcherbakivsky, the historian P. Fedenko, the forester O. Paramoniv, the biochemist M. Zakomorny, and the Slavist V. Swoboda. Well-known artists have included the painters V. Perebyinis, H. Mazurenko, and R. Hluvko; the graphic artists R. Lisovsky and I. Voloshchak; and the enamelist M. Ladyk.

The best Ukrainian choir in Great Britain is Homin (formerly Burlaka) in Manchester, which won first prize at an international competition in Llangollen, Wales; its conductors have been Ye. Pasika (until 1965) and Ya. Babuniak. The Orlyk dance ensemble, directed by P. Dnistrovyk and M. Babych, has received international recognition. A number of dance and instrumental ensembles are supported by local branches of the Ukrainian Youth Association. V. Lutsiv, a bandura player and impresario, is also active in Ukrainian musical life.

*Publishing.* The Ukrainian Publishers, Ltd has been an important publisher for the Bandera faction not only in Britain, but in the West as a whole. The firm has published SUB weekly \**Ukrains'ka dumka*, the journals \**Vyzvol'nyi shliakh*, \**Ukrainian Review*, and *Holos molodi*, and belletristic and publicistic works. The veterans' quarterly \**Surmach* still appears, but the socialist journal *Nashe slovo* and the monarchist newspaper *Ranok* were short-lived. A number of religious periodicals have been published in England: the Catholic journal *Nasha tserkva* (1953–75), the Orthodox *Vidomosti Heneral'noho tserkovnoho upravlinnia UAPTS* (since 1950), and the Baptist quarterly *Visnyk spasinnia* (since 1949). A group of Ukrainian students and graduates known as the Vitrage Society published the journal *Vitrazh* (1977–83).

*General features and prospects.* From its beginning the Ukrainian community in Great Britain had some distinctive features: it consisted mostly of young men who had served the cause of Ukrainian independence during

the Second World War. Because of their age and political experience, the first generation of emigrants was extremely active, in comparison with other emigrant groups, in community affairs: almost 80 percent of all Ukrainians belonged to Ukrainian organizations and churches. The high degree of political commitment facilitated the dominance of the community by radicals. Furthermore, the religious conflict within the Catholic church had a detrimental effect on the community. As a result of a shortage of Ukrainian women, quite a few postwar immigrant men remained single and the number of mixed marriages was high, making it difficult to maintain the Ukrainian language and culture among the second generation. Consequently a relatively small proportion of young people of Ukrainian origin attend Ukrainian schools and belong to Ukrainian youth organizations today, and the process of linguistic assimilation has advanced quite far.

With the passing of the older generation, the dynamism of the Ukrainian community has declined in the 1980s. This is evident from the falling membership of Ukrainian organizations and the declining circulation of the Ukrainian press. And the occupational profile of the Ukrainian community is changing: the younger generation is entering the professions and is advancing beyond its elders in economic status. Those who remain conscious of their ethnic identity continue to participate in community life, which is changing in form and content.

#### Great Horde. See Tatars.

**Great horned cattle** (*Bos taurus*; Ukrainian: *velyka rohata khudoba*). Species of domestic cow, *Bos taurus*, which originated most probably from the extinct wild *aurochs* and was domesticated a few thousand years ago. Great horned cattle are an important source of milk, meat, and leather and, previously, of fertilizer and draft power as well. They are particularly valued for high milk productivity (up to 8.2 kg of good-quality milk per day).

The main breeds of great horned cattle in Ukraine are the Simmental, Red Steppe, Lebedyn, Spotted Black, Gray Ukrainian, White-headed Ukrainian, Red Polish,

Great horned cow

and Carpathian Brown. Of these, the Simmental and Red Steppe breeds constitute 80 percent of the cattle on collective and state farms. The Simmental, a meat and dairy breed developed in Switzerland, was introduced in Ukraine in the second half of the 19th century. The crossing of Simmental bulls with Gray Ukrainian cows produced a Ukrainian subbreed of Simmentals. The Red Steppe, one of the better dairy breeds, was developed in Ukraine in the first half of the 19th century by crossing various dairy breeds from Germany with local breeds, mainly the Gray Ukrainian, followed by inbreeding and selection for milk yield and red coat. The Lebedyn, recognized as a specific breed in 1950, was developed in Sumy oblast by crossing local cows, mainly the Gray Ukrainian, with bulls of the Suisse (Swiss Brown) breed. It is bred in Sumy, Kharkiv, and Chernihiv oblasts. The Spotted Black, recognized as a separate dairy breed in 1959, was developed by crossing local cattle with Ostfriesian and some other derived Dutch breeds. The breed is raised mostly in Khmelnytskyi, Zhytomyr, Kiev, Poltava, Volhynia, Rivne, and Lviv oblasts. The Gray Ukrainian, a meat and dairy breed distinguished by good health and endurance, is reared mainly in Poltava and Dnipropetrovske oblasts. It is highly valued for developing and improving new breeds. The White-headed Ukrainian, a dairy breed, was developed in the 19th century in Ukraine by crossing the Polisia breed with the Spotted Black Dutch breed. It is bred in Zhytomyr, Khmelnytskyi, and Kiev oblasts. The Red Polish, a dairy breed developed at the end of the 19th century in Poland from central European red cattle, is raised mostly in Volhynia, Ternopil, Rivne, and Lviv oblasts. It is very similar to, but smaller than,

the Red Steppe breed. The Carpathian Brown, a meat and dairy breed, was developed in the Carpathian region in the first half of the 20th century. A mountain breed raised chiefly in the Carpathian oblasts, it is also used for improving local breeds of cattle in Armenia and the Asian republics of the USSR. (See also \*Cattle raising.)

C. Spolsky

**Great Russian Office** (Velikorossiiskii prikaz). An institution of the Muscovite central government in the 17th and 18th centuries. Its function from 1688 was to control and supervise the Cossack regiments in Left-Bank Ukraine that were not part of the Hetman state, ie, Okhlyrka, Sumy, Izium, and Kharkiv regiments. It also administered the Cossack population in Slobidska Ukraine. The office was located in Moscow and was responsible to the Posolskii prikaz, the central office for foreign affairs.

**Grecisms.** See Hellenisms.

**Greece.** Republic situated in the southern Balkan Peninsula and on neighboring islands of the Ionian and Aegean seas. Its land area is 132,000 sq km, and its population in 1985 was 9,967,000. The capital is Athens (1981 pop 886,000). Greece became an independent state in 1829. From 1832 to 1974 it was a constitutional monarchy; since then it has been a republic.

Because of Ukraine's dependent status, political, economic, and even cultural contacts between Ukraine and Greece have been sporadic and short-lived. From the mid-19th century the Greek merchant navy played an active role in servicing Ukrainian ports. But there has never been significant trade between the two countries. From January to April 1919, over 23,000 Greek troops were part of the Allied interventionist forces and occupied areas around Odessa, elsewhere in southern Ukraine, and in the Crimea. From March 1919 to July 1920 a diplomatic mission represented the UNR in Athens; it was headed by F. Matushevsky and, after his death in October 1919, by M. Levytsky. A Greek consul was based in Kiev until August 1918. During the Soviet period minor cultural contacts have existed between Greece and Ukraine.

Greek themes are found in the works of such Ukrainian writers as M. Kostomarov and Ya. Shchoholiv in the 19th century and M. Rylsky, M. Zerov, B. Ten, and L. Pervomaisky in the 20th century. Translations of works by M. Ludemis, N. Kazantzakis, K. Kodzas, Y. Ritsos, E. Alexiou, and other writers have been published in Ukraine. The works of T. Shevchenko (ed E. Alexiou, 1964), Lesia Ukrainka, and I. Franko (trans S. Mavroidi-Papadaki) have been translated into Greek. Today the leading Hellenists in Ukraine are A. Biletsky (classical philology) and T. Chernyshova (modern Greek at Kiev University). (See also \*Ancient states on the northern Black Sea coast, \*Byzantine Empire, and \*Greeks.)

A. Zhukovsky

**Greek art.** In Ukraine Greek art objects are found mostly along the Black Sea coast and in the Crimea. Examples of ancient Greek art from the 7th–6th century BC to the 2nd–3rd century AD have been found at the sites of former Greek colonies such as Tyras, Olbia, Chersonese Taurica, Theodosia, Panticapaeum, Phanagoria, Taman, and Gorgippia. The most prominent influence is that of

the Ionian colonists from Asia Minor, particularly from Miletos, Priene, and Herakleia. But samples of Athenian art dating back to the 5th century BC are also present.

Greek art attained its widest influence in the 4th–3rd century BC, although it reached some regions only in the Hellenistic period. Its influence spread as far as the Kiev, Kharkiv, Poltava, and Zaporizhia regions, Podilia, and Galicia, and left its mark on the art and crafts of the local populations such as the Scythians, Sarmatians, Alans, Roxolani, and Antes. At the same time these autochthons influenced Greek art in the Black Sea colonies, especially the clothing, women's ornaments, and jewelry of the colonists. The fusion of Greek and indigenous elements resulted in an art particular to the Greek colonies in Ukraine.

Greek art in Ukraine: vase, 5th–4th century BC, from Phanagoria in the Crimea

Greek cities on the Black Sea coast were surrounded by walls with gates and towers; those of Olbia, Ilurat, and Chersonese Taurica are well preserved. Within the walls there were fine civic buildings, temples, and private homes with pools and fountains. The foundations of some of these have been preserved. Excavations of various types of graves, including vaulted graves built of wedge-shaped stone that were unknown in Greece, have yielded much information about Greek construction methods. The burial chambers of the kurhans Zolota Mohyla (near Symferopil) and Tsarskyi Kurhan (near Kerch), dating back to the 4th century BC, are masterpieces of construction.

A few sculptural remnants, which are not older than the 4th century BC, have been found. A number of better-preserved fragments from the Hellenistic period, carved in the style of Praxiteles, Polyclitus, or Scopas, were found in Olbia (a marble statue of Artemis) and Chersonese Taurica. A larger number of grave stelai with carved or painted representations of the deceased and the tools of their trade have been preserved. A Chersonese stele with a portrait of a youth is a unique relic of 5th-century carving. Marble reliefs depicting the exploits of Hercules, Dionysius, Silenus, Satyrs, and Maenades date back to the 2nd century AD. Many terra-cotta statuettes associated with the cults of Demeter, Astarte, and Aphrodite or depicting everyday activities and scenes have been found. Ceramic products with figures painted in the so-called black and red style have been discovered in Olbia, Kerch, and Smila. Ceramic griffons, eagles, sphinxes, etc, display eastern and local artistic features. From the scenes that are engraved on the famous gold

vase from the \*Kul Oba kurhan and the silver amphora from the \*Chortomlyk kurhan, it is evident that the artists were familiar with everyday life of the Scythians or Roxolani. The artistic etchings on bronze articles, mostly from Olbia, are in the Ionic style and probably were made locally. Objects made later are decorated in the style of the Hellenistic and Roman period.

There is a large variety of fine jewelry such as gold earrings with pendants, masks, bracelets, and rings with precious stones. Pontic coins of the 4th century BC from Panticapaeum are considered to be the highest achievements of ancient engraving. Many Greek art objects were lost at the end of the 18th and during the 19th century because of the negligence of Russian authorities. Only a small part of the art treasures have been preserved in the Hermitage museum in Leningrad and in Kiev and Odessa museums.

V. Sichynsky

**Greek Catholic church.** The historical name given to churches in the eastern half of the Roman Empire or in lands culturally dependent on the Byzantine Empire that gave allegiance to Rome but at the same time maintained many of their traditional Eastern religious customs. Some of these emerged in the early centuries of the Christian era, although most arose after the split between Eastern Orthodoxy and Western Catholicism in 1054.

Ideally, the Roman church was a universal cultural and religious entity without any national connotations whereas the Slavic and other churches in the East (Russian, Ukrainian-Belorussian, Bulgarian, Rumanian, etc) were culturally (and usually administratively) dependent on Byzantium and were thus viewed as 'Greek' churches practicing the Greek rite. Ukrainian Christians in the 16th and 17th centuries called themselves 'people of the Greek-Eastern rite.' The Church Union of \*Berestia (1596), with its pragmatic though only partial solutions to the problems of church unity, attempted to overcome the divisions between East and West by creating a number of 'Greek' eparchies united administratively and by creed to the Roman Catholic world. The term *Graeci catholici* was coined by the Vatican to distinguish this new entity from the rest of the Eastern world – the *Graeci schismatici* or simply *Graeci*. However, as early as the 1620s, the term *Rutheni catholici* began to be used to characterize Ukrainian (and Belorussian) Catholicism, thus recognizing at least a nascent national character in these churches (Ukrainians and Belorussians not united with Rome were called *Rutheni schismatici*). These same terms were used to describe the rite of the Ukrainian churches. Similarly, the names *Rutheni uniti* and *Rutheni non uniti* or just simply *uniti* and *non uniti* were used especially by Polish religious as well as lay circles in order to underline the singularity of Ukrainian Catholicism and to imply its inferiority vis-à-vis their own Roman Catholicism. The Orthodox in Eastern Europe also used the name 'Uniate' pejoratively.

As an official appellation 'Greek Catholic' (*Griechisch-katolisch*) was introduced by the Austrian administration during the reign of Empress Maria Theresa in order to group under one name all the Eastern rite Catholics in the Austro-Hungarian Empire (ie, Ukrainians, Rumanians, Serbs, Croats, Hungarians, etc). This designation outlived the empire and was retained as the official name by its successor states. The name was also adopted in countries to which adherents of these churches emigrated. In fact, however, the appellation 'Greek' was irrational for it incorrectly implied that the liturgical language was Greek. For this reason, the Vatican now officially calls the earlier 'Greek' rite 'Byzantine,' a designation that encompasses the Albanians, Belorussians, Bulgarians, Greeks, Italians, Syrian Melchites, Hungarians, Russians, Rumanians, Slovaks, Croats, and Ukrainians regardless of their place of residence. Furthermore, the national character of these churches is also now generally recognized by Rome; thus Ukrainian Catholics are more specifically Catholics of the Ukrainian-Byzantine rite, Rumanian Catholics are Catholics of the Rumanian-Byzantine rite, and so on.

Among the various branches of the Byzantine rite, the Ukrainians are the most numerous (about 5.5 million in 1939), followed by the Rumanians (1.7 million), Hungarians (250,000), and others. The Hungarian and Slovak Byzantine-rite Catholics are mostly assimilated Ukrainians from Transcarpathia (see \*Mukachiv and \*Prešov eparchies). Today, although it is anachronistic to ignore the national dimension of these churches by simply referring to them as Greek Catholic, this name is still given to Ukrainian Catholics living in Poland, Czechoslovakia, and Yugoslavia where, for political reasons, the appellation 'Ukrainian' is avoided. Similarly, the term 'Greek Catholic church' is employed for Eastern-rite Catholics in Hungary. In the 1960s, the name \*Ukrainian Catholic church was adopted to designate Ukrainian Catholics in the diaspora as well as the underground Ukrainian Catholic communities in the USSR.

A. Velyky

Greek Catholic Theological Academy in Lviv

**Greek Catholic Theological Academy** (Hreko-katolytska bohoslowska akademiia; aka Ukrainian Theological Academy). The academy was founded in Lviv in 1928 by Metropolitan A. \*Sheptytsky to foster theological studies with particular emphasis on the liturgical and other particularities of the Eastern rite, the history of the union of the Ukrainian church with Rome, and Eastern

dogma. It was also a school of higher education for candidates to the priesthood. The academy was to serve as the embryo of a future Ukrainian university. Organized on the same principles as Catholic universities in the West, it offered a five-year program. It had faculties of philosophy and theology, and a law faculty was to have been established in fall 1939. There were 350–400 students between 1932 and 1939, with 50–70 graduating each year, and a teaching staff of about 30 professors and lecturers. Ukrainian and Latin were the languages of instruction. The academy was directed by a rector appointed by the metropolitan from among the full professors. For the entire period of its existence the rector was Rev (later metropolitan and cardinal) Y. \*Slipy.

Altogether the academy published 21 volumes of works. The history seminar published (irregularly) its *Arkhiv Seminara istorii*; the Slavic philology seminar, the semi-annual *Slovo*; and the history seminar of art, the quarterly *Mystetsvo i kul'tura*. The academy maintained a library and a museum (est 1932) with icons from the 14th to the 16th centuries. Scholars such as Metropolitan A. Sheptytsky, Bishop M. Charnetsky, reverends Y. Slipy, T. Myshkovsky, V. Laba, D. Dorozhinsky, Ya. Levytsky, M. Konrad, A. Ishchak, and Yu. Dzerovych, and laymen M. Chubaty, I. Krypiakivych, Ya. Pasternak, Yu. Poliansky, K. Chekhovych, V. Zalozetsky, and B. Kudryk served on its faculty. The academy was closed by the Soviet authorities in 1939 and again in 1944. From 1941 to 1944 it had an enrollment of 97 students. When Metropolitan Y. Slipy came to the West in 1963 he founded the \*Ukrainian Catholic University in Rome and re-established the academy as its faculty of theology.

W. Lencyk

**Greek Catholic Theological Seminary in Lviv** (Hreko-katolytska dukhovna seminariia u Lvovi). Seminary established under Bishop P. Biliansky in 1783 by Joseph II as a general seminary to educate and train Greek Catholic clergy for the Ukrainian population of the Austrian Empire. It replaced the seminary known as the \*Barbareum in Vienna. Spiritual training and education in the Eastern rite were conducted at the seminary under the supervision of the rector, while theological subjects were studied at the theological faculty of Lviv University. The program took four years to complete. In the 1880s the average annual enrollment was 200. The seminarians came from Lviv and Peremyshl eparchies. In 1845 Bishop I. Snihursky of Peremyshl established a theological seminary in Peremyshl, at which seminarians from his eparchy who had completed the first three years at the Lviv seminary could register for the final year.

After the First World War the seminary in Lviv became an archeparchial seminary. When the Polish authorities refused to respect the rights of the Ukrainian Catholic professors of the theological faculty at Lviv University,

a theological faculty was established at the seminary. In 1928 this faculty was reorganized into the \*Greek Catholic Theological Academy. In 1907 a seminary was opened in Stanyslaviv, and in 1921 the Peremyshl seminary began to offer a complete four-year program. The Lviv seminary, however, remained the largest seminary for Catholics of the Eastern rite, with approximately 400 students in 1935. Some of its seminarians came from other eparchies and from outside Galicia – from Bukovyna, Transcarpathia, Yugoslavia, and Bulgaria. A student association known as the Shashkevych Reading Society was active at the seminary; it published lectures, music notes, almanacs, and the journal *Katolyts'kyi vskhid* (1904–7). The seminary itself published the monograph series *Asketychna biblioteka* under the editorship of Rev Y. Slipy, and from 1783 maintained a valuable library and archive. Some prominent church leaders, such as A. Anhelovych, M. Skorodynsky, O. Bachynsky, H. Yakhymovych, H. Khomyshyn, Y. Botsian, T. Halushchynsky, and Y. Slipy, served as rectors of the seminary. Rev I. Chorniak was the last rector.

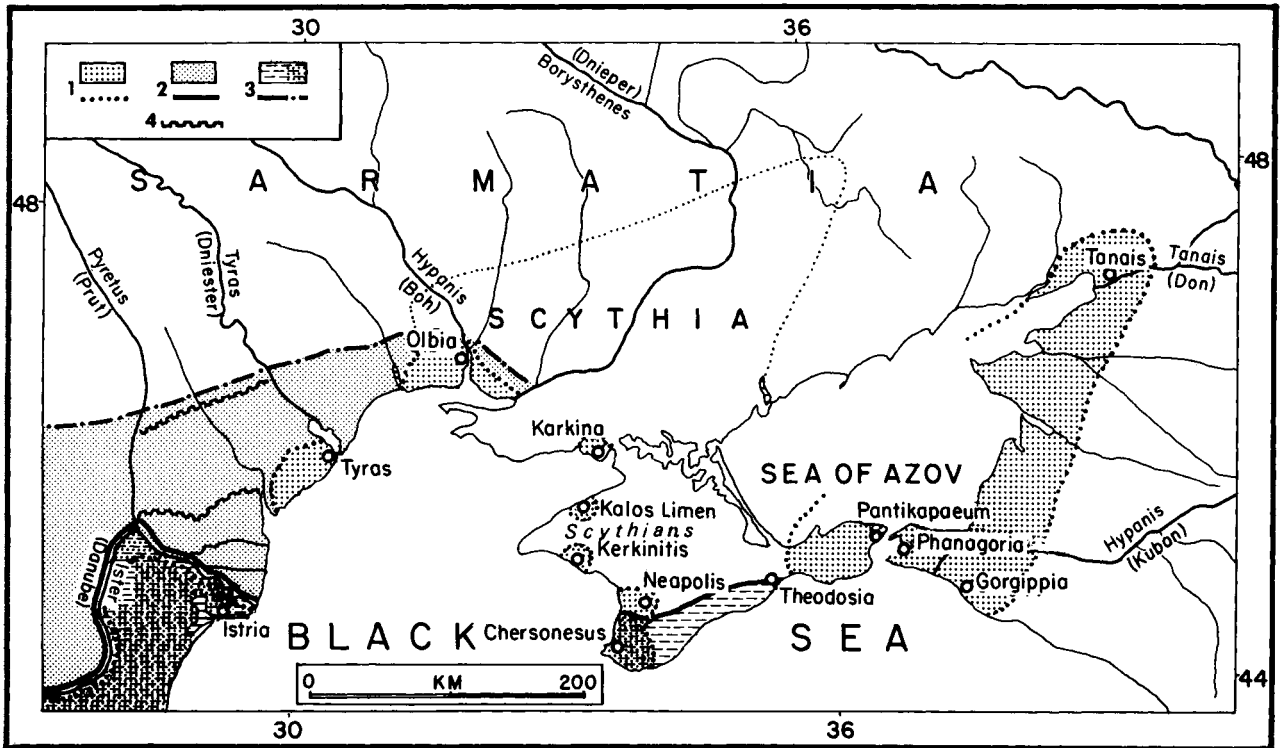

The seminary was housed in a building erected in 1888. It contained a chapel painted by P. Kholodny Sr (1929). The seminary also owned two old buildings, formerly owned by the Dominican Sisters, and the Church of the Holy Spirit, which was destroyed by a German bomb in 1939. The seminary was closed down by Soviet authorities in 1939, but reopened in 1941. In 1944 it was abolished permanently by the Soviet government along with the entire Ukrainian Catholic church. Its property was nationalized, and its library was transferred to the Lviv branch of the AN URSR.

**Greek Catholic Union of the USA** (Soedinienie greko-katolicheskikh russkikh bratstv). Largest fraternal society of Transcarpathian immigrants and their descendants in the United States. It was founded in 1892 in Wilkes-Barre, Pennsylvania, to unite Carpatho-Ruthenians of the Greek Catholic faith, promote education, build churches, and support widows, orphans, and the indigent. Galician Ukrainians also belonged to the union until they set up the populist Ruthenian National Association (later the \*Ukrainian National Association) in 1894. For a long time the union played a leading role in the Carpatho-Ruthenian community. In 1918–19 its support proved important for the incorporation of Transcarpathia into Czechoslovakia. The national orientation of the union was usually Russophile – although sometimes it espoused a distinct Ruthenian identity – and consistently anti-Ukrainian. At its height in 1928 the union consisted of 1,328 lodges with 120,000 members. In the 1960s it was weakened by assimilation. The term 'russkii' was dropped from its official name, and its biweekly *Messenger* (formerly \**Amerikanskii russkii viestnik*) began to appear only in English. As its cultural and educational functions diminished, the union was reduced to a mere mutual benefit and insurance association. In 1985 it claimed 52,000 members in 400 lodges.

**Greek loan words.** See Hellenisms.

HELLENIC STATES AND COLONIES ON THE NORTHERN BLACK SEA COAST

- 1. Bosphoran Kingdom and other Greek, Byzantine, and Roman colonies (5th century BC–4th century AD)
- 2. Roman expansion (1st–2nd centuries AD)
- 3. Territory under Byzantine control (4th–6th and 9th–11th centuries AD)
- 4. Trajan's Walls (98–117 AD)

**Greeks** (Ukrainian: *hrekly*). Greeks first appeared in Ukraine about 1000 BC to trade with the peoples living on the Black Sea littoral. The first Greek (Ionian) colony was established at the end of the 7th century BC on \*Bezanz Island. Most others arose in the 6th century BC: \*Olbia on the Boh Estuary and \*Tyras on the Dniester Estuary; Theodosia (now \*Teodosiia), \*Pantikapaum, Myrmecium, and \*Nyphaeum in the Crimea; and \*Phanagoria, Cegi, and Hermonassa in the Taman Peninsula. \*Chersonese Taurica, a Doric colony, arose in the Crimea in the 5th century BC. The easternmost colony, \*Tanaïs, was founded in the 3rd century BC at the mouth of the Don River. Ceramic ware, weapons, jewelry, ornaments, oil, and wine were traded for local grain, slaves, fish, hides, and pelts, which were exported to the Greek city-states on the Aegean coast. With time the larger colonies themselves became Greco-barbarian city-states. In the 5th century BC several Greek poleis united with the indigenous peoples to create the \*Bosphoran Kingdom. From the 1st century BC to the 3rd century AD the Greek city-states in southern Ukraine were part of the Roman Empire. Apart from Chersonese Taurica and Pantikapaum, they were destroyed by the Huns in the 4th century.

From the 9th century on, the principalities of Rus' had close ties with the \*Byzantine Empire, particularly after the adoption of Christianity from Byzantium in 988 by Grand Prince \*Volodymyr the Great of Kiev. With a few exceptions the hierarchy of the Orthodox church in medieval Ukraine consisted of Greeks. Even after the fall of the empire in 1453, Ukrainian-Greek church and eco-

nomical relations were maintained. But they were not of any great consequence until the end of the 16th and most of the 17th century, when Greek merchants settled in Lviv, Kamianets-Podilskyi, and other cities and participated in the activities of the Orthodox brotherhoods. As the Polish Catholic-Ukrainian Orthodox struggle intensified, Orthodox Ukrainians strengthened their ties with the patriarchs of Constantinople, who had jurisdiction over \*Kiev Metropolis until 1686. In the cultural sphere, the \*brotherhood schools originally had Greek-Church Slavonic curriculums. Greek scholars in Ukraine, such as \*Arsenii (Arsenius) of Elasson and C. \*Lucaris, and Ukrainian scholars who had direct contact with Greece, such as Kypriian of Ostrih, Friar Joseph from Mt Athos, and Hegumen I. \*Boryskovych, or who were versed in the Greek language and literature, such as L. and S. Zyzanii, K. Stavrovetsky, M. Smotrytsky, and Z. Kopystensky, all played key roles in the Ukrainian cultural and religious revival, particularly in Ostrih and Lviv. The earliest textbooks were modeled on Greek examples. Each year dozens of monks came from Mt \*Athos to collect alms in Ukraine.

Greek clerics often acted as advisers in Ukrainian church matters; Prince K. Ostrozky, for example, was advised by Dionysius Paleologos and Moskhopulos, who lived in Ostrih. Some Greek clergymen – for example, Patriarch Jeremias II of Constantinople, the protosyncellus Nicephorus, C. Lucaris, and M. Syrigos – came to Ukraine on special missions and took part in church events. Some of them were involved in political affairs; for example,

as patriarch, C. Lucaris conducted negotiations with the Cossacks in the 1620s. There were Greeks in the upper echelons of the Hetman state: \*Daniel Oliveberg de Graecani Atheniensis served as Hetman B. Khmelnytsky's envoy; and Astamatos (Ostamatenko) served as the envoy of hetmans Yu. Khmelnytsky and P. Doroshenko to Constantinople. A number of Ukrainian families of the Cossack *starshyna* or noble estate were of Greek descent: Tomara, Kapnist, Ternaviot, Levytsky, Yanzhul, Konstantynovych, Khrystoforovych, Manuilovych, Ursal, Motonis, Komburlei, Mazapet, and Mazaraka.

Greek merchants and entrepreneurs prospered in Ukraine. In 1657 Hetman B. Khmelnytsky granted trading privileges to a group of Greek merchants who settled in Nizhen. The annual fairs organized by it turned \*Nizhen into an emporium that retained its importance until the founding of Odessa (1794) and other Black Sea ports in the late 18th century. A sizable community of Greek traders and artisans remained in Nizhen county until the early 19th century. Greeks also lived in Pereiaslav and Kiev. In 1748 the Greek colony in Kiev established St Catherine's Monastery in the Podil district.

In the 18th century political conditions in the Russian Empire did not serve to promote Ukrainian-Greek economic relations. Religious and cultural ties continued to be maintained, however, particularly through the Kievan Mohyla Academy and other colleges (later seminaries), which attracted Greek students well into the 19th century. N. \*Theotokis, who hailed from Corfu, founded the Poltava Seminary and was the archbishop of Kherson in 1779–86.

Ruins of a Greek house in Ukraine (late 18th century)

Towards the end of the 18th century the number of Greeks in Ukraine rose sharply. After protracted wars with Turkey, Russia finally gained control of the steppes in southern Ukraine and began colonizing them. Foreign settlers were offered various concessions and assistance, including exemptions from taxation and military service, unrestricted fishing rights, and material support. After the 1768–74 war ended, the Russian authorities helped several thousand Greeks who had sympathized with or fought on the Russian side during the war to emigrate from Asia Minor to the Crimea, Tahanrih, and Kherson. In 1774–83, 18,400 Greeks were forcibly resettled from the Crimea to Azov gubernia on the coast of the Sea of Azov and along the Solona and Kalmiuis rivers. During the first two winters there, 4,655 died from the cold, lack of food and shelter, and disease. Those who survived built the city of Mariupil (now \*Zhdanov) and populated 22 other settlements. In 1897, 69,400 Greeks lived in Katerynoslav gubernia, most of them in the Mariupil re-

gion. Many of them retained their distinctive Greek-Tatar dialects and folkways well into the 20th century, even though in the 1870s they lost the right to have their own schools and self-government that they had been granted in 1779. Twelve villages were settled by the so-called Greek Hellenes, who spoke a modern Greek dialect; 10 were settled by the so-called Greek Tatars, who spoke a language resembling Tatar.

A Greek woman wearing a traditional headdress (late 19th century)

Other Greeks settled in the steppe interior, particularly near the Dnieper rapids, and were among the original inhabitants of Katerynoslav (now Dnipropetrovske), Novomoskovske, and other towns. In the 1790s many emigrants from the Aegean islands settled in towns along the Black Sea littoral – Odessa, Kherson, Mykolaiv, and others. After 1812 the number of emigrants declined.

Some Greeks were organized at first into military settlements and battalions (near Odessa and Balaklava in the Crimea), but the majority turned to farming, artisanry, or trade. After the Russian-Turkish wars ended, many Phanariote boyars and officials from Moldavia and Walachia were endowed with pensions and lands by the Russian government. The Cantacuzino family, for example, received 19,000 desiatins of land near Zolotonosha, over 13,000 near Voznesenske, and up to 400 in the Romen region; Prince C. Ypsilantis received 14,000 desiatins in the Chernihiv region; and the engineer Karadzhi was granted an estate near Bohodukhiv.

Greeks played a significant role in Ukraine's commerce. At the beginning of the 19th century trade in Mariupil, Mykolaiv, Yelysavet (now Kirovohrad), and Tahanrih was controlled by Greeks, who also played a particularly important role in the development of \*Odessa as an international trade center. In 1814 the revolutionary secret society Philikí Etaireía, which in the 1820s was headed by A. and D. Ypsilantis, was established by Greek merchants in Odessa, and the city became an important center of the Greek national independence movement. Odessa's relatively small Greek community (5,070 in 1897) maintained its importance in the city's commerce, and that of Southern Ukraine as a whole, until the 1917 Revolution.

With the consolidation of Soviet power in 1920, many Greek merchants lost their properties to the state. Thousands of Greek professionals lost their jobs and many fled to Greece and other countries.

According to the 1926 Soviet census, there were 105,000 Greeks in the Ukrainian SSR, of which 64,200 lived in the Mariupil region and 3,500 in the Odessa region. An

additional 22,000 Greeks lived in the Kuban, 24,000 in the Crimea, and 10,000 in eastern Subcaucasia. In 1933, 156,000 Greeks lived on Ukraine's compact ethnographic territory, and 167,000 in all the territories inhabited wholly or in part by Ukrainians. In the USSR as a whole there were 214,000 Greeks according to the 1926 census, and 286,000 according to the 1939 census.

In 1926, 4,000 (11,500 in 1816) of the Greek inhabitants in the region between Mariupol and Staline (now Donetsk) lived in Mariupol and constituted 10 percent of the city's population (in 1897 they constituted 30 percent); 93,000 lived in about 29 large villages, 15 of them purely Greek. Among the largest were Yalta, Manhush (now Pershotravneve), Urzuf, and Staryi Krym near the Azov coast; Sartana, Hnativka (now Starohnativka), Karan (now Hranitne), Chermalyk (now Zamozhne), Styla, and Starobesheve along the Kalmiuis River; and Velykyi Yanyzol (now Velyka Novosilka), Komar, Bohatyr, Staryi Kermenchyk (now Staromlynivka), and Nova Karakuba (now Krasna Poliana) in the northwest along the Mokri Yaly River. Together the Greeks accounted for 10 percent of the population in the region.

In the Crimea, about 60 percent of the Greeks lived in the cities and suburbs of Yalta, Sevastopol, Symferopol, Kerch, and Teodosiia. In the Odessa region, besides the old Greek colony (1,400) in Odessa, there was a colony (1,400) in the village of Sverdlove. There were also small Greek communities in Staline (700), Kharkiv (500), and Kiev (300). In other cities, such as Nizhen, Mykolaiv, and Dnipropetrovske, which at one time had Greek inhabitants, the Greeks had merged with the local population.

In the Kuban and eastern littoral of the Black Sea, Greeks lived in and around the coastal cities of Novorosiiske, Anapa, Helendzyk, Tuapse, and Sochi, as well as in the interior Abynske and Krymske raions and the city of Krasnodar. Thirty-one percent of them were urban dwellers (10.3 percent in Soviet Ukraine).

A contemporary Greek house in Donetsk oblast

In the 1920s and early 1930s, the Greeks had three national raions and 30 national rural soviets in Soviet Ukraine. But they were not adequately provided with education in their mother tongue, and 76 percent of all Greek children attended Russian schools (only 2 percent attended Ukrainian schools). Hence, in spite of the high literacy rate among the Greeks (64 percent in 1926), only

1 percent of them could write in Greek. During the period of Ukrainization in the 1920s, a Greek-language pedagogical tekhnikum and agricultural school existed in Mariupol and Greek newspapers were published. During the Stalin terror the schools were closed and all nationally conscious Greek activists were repressed. The Greek poet H. \*Kostoprav died in a labor camp. In the late 1920s the All-Ukrainian Scientific Association of Oriental Studies (A. Kovalivsky and others) conducted research on the Greek colonies in the Mariupol region.

According to the 1959 census there were 104,400 Greeks in the Ukrainian SSR, 93,000 of them in Donetsk oblast. Only 8 percent (81 percent in 1926) gave Greek as their mother tongue, while 89 percent (17 percent in 1926) gave Russian, and 3 percent gave Ukrainian. These language-use data were basically repeated in the 1979 census: of the 104,100 Greeks in Ukraine, only 9 percent gave Greek as their mother tongue. The cataclysmic events in Soviet history (famine, terror, war), assimilation, and Russification have contributed to the population decline and changing culture of Greeks in Ukraine.

In 1969 a small selection of H. Kostoprav's poetry was published in Kiev in Ukrainian translation. A few years later a parallel Greek-Ukrainian edition of poetry by Greeks from Donetsk oblast was published.

Alexander Gregorovich

**Gregorovich, Alexander** [Hryhorovyč, Oleksander], b 11 March 1893 in Orelets, Sniatyn county, Galicia, d 24 June 1970 in Hamilton, Ontario. Community leader. Gregorovich emigrated from Galicia in 1911 and settled in Alberta; he became one of the first Ukrainian teachers in rural Ukrainian school districts. A founding member of the \*Ukrainian National Federation, he was president of its first national executive (1932-6) and its first branch in Edmonton. He served as administrator and coeditor (1934-40) of *Novyi shliakh*, and was a founder (1939) of

Nova Hromada, the first Ukrainian credit union in Canada. He cotranslated two works under the pseudonym Oreletsky: *The Black Deeds of the Kremlin* (1953) and Ivan Bahriany's novel *The Hunters and the Hunted* (1954). In 1957 he compiled and published on microfilm a scarce collection of Ukrainian scientific dictionaries that had been published in Ukraine in the 1920s.

**Gregory of Nazianzus, Sermons of Saint.** Gregory's 13 orations had been translated from Greek into Church Slavonic, possibly in the \*Glagolitic alphabet, their East Slavic copies being perhaps the earliest extant text written in Ukraine, probably in Galicia, in the mid-11th century (376 folios). The Ukrainian copyist added to the often mistranslated Church Slavonic original many new mistakes; as a result, the text occasionally is unintelligible. The manuscript is preserved in the Leningrad Public Library. The language of the text was studied by A. Budilovich (1871), who also published the text (1875).

**Gregory the Bulgarian.** See Bolharyn, Hryhorii II.

**Grekov, Boris**, b 21 April 1882 in Myrhorod, Poltava gubernia, d 9 September 1953 in Moscow. Russian medieval historian. A professor at the universities of Leningrad and Moscow, he became a full member of the Academy of Sciences of the USSR in 1935 and the director of its institutes of History (1937–53), the History of Material Culture (1944–6), and Slavic Studies (1946–53). His major works are *Rabstvo i feodalizm v drevnei Rusi* (Slavery and Feudalism in Ancient Rus', 1934), *Kievskaiia Rus'* (Kievan Rus', 1939, 1944, 1953; Ukrainian transl 1951; English transl 1959), *Kul'tura Kievskoi Rusi* (The Culture of Kievan Rus', 1944; English transl 1947), and *Krest'iane na Rusi s drevneishikh vremen do XVII veka* (Peasants in Rus' from Oldest Times to the 17th Century, 2nd edn, 2 vols, 1952–4). Writing in conformity with official Soviet views on historiography, he attempted to refute M. \*Hrushevsky's and M. Pokrovsky's theories and to prove that Kievan Rus' was the common patrimony of the Russians, the Ukrainians, and the Belorussians. His collected works were published in Moscow (4 vols, 1959–60).

Vasyl Grendzha-Donsky

Petro Grigorenko

**Grendzha-Donsky, Vasyl** [Grendzha-Dons'kyj, Vasyl'] b 23 April 1897 in Volove (now Mizhhiria), Transcarpathia, d 25 November 1974 in Bratislava, Slovakia. Writer and journalist. Grendzha-Donsky was befriended by the poet V. \*Pachovsky, under whose influence he actively participated in the cultural revival of Ukrainians

in Transcarpathia and was the first Transcarpathian author to write in literary Ukrainian. The editor of *Nasha zemlia* (1927–8) and *Nova svoboda* (1938–9) in Uzhhorod, he was a prolific writer in the 1920s and 1930s. His works, which are imbued with patriotic romanticism, include collections of poetry: *Kvity z terniamy* (Flowers with Thorns, 1923), *Zoloti kliuchi* (Golden Springs, 1923), *Shliakhom ternovym* (On the Thorny Path, 1924), *Tobi ridnyi kraiu* (To You, Native Land, 1936), and others; collections of short stories: *Opovidannia z karpats'kykh polonyn* (Stories from the Carpathian Meadows, 1926), *Nazustrich voli* (A Rendezvous with Freedom, 1929); the drama in verse *Ostannii bii* (The Last Battle, 1930); the historical drama *Sotnia Mocharenka* (Mocharenko's Company, 1932); and the novelettes *Il'ko Lypei, rozbiinyk* (Ilko Lypei, the Brigand, 1936) and *Petro Petrovych* (1937). In 1964 a selection of his works was published in Prešov; its title *Shliakhom ternovym* suitably summarizes the life of Grendzha-Donsky, whose national orientation often made his existence difficult under the various regimes he lived through. By 1986 the Carpathian Alliance in Washington had published seven volumes of his complete works.

D.H. Struk

**Greschuk, Demetrius** [Greščuk, Dmytro], b 7 November 1923 in Innisfree, Alberta. Bishop of the Ukrainian Catholic church. Educated at St Augustine's Seminary in Toronto, Greschuk was ordained in 1950 and served in the Eparchy of Edmonton (Edmonton and Calgary). In 1974 he was appointed bishop of Nazianzus and consecrated auxiliary bishop of the Ukrainian Catholic Eparchy of Edmonton. In 1984 he was appointed apostolic administrator of Edmonton and the Northwest Territories, and in 1986, bishop of Edmonton.

**Gridnev, Vitalii.** See Hridniev, Vitalii.

**Grigorenko (Hryhorenko), Petro**, b 16 October 1907 in Borysivka, Nohaiske county, Tavriia gubernia, d 21 February 1987 in New York City. Former major general in the Soviet army, military engineer, and dissident. Grigorenko attended the Kharkiv Polytechnical Institute (1929–31), the Moscow Military Engineering Academy (1931–4), and the General Staff Academy in Moscow (1937–9). Serving in the Far East after 1939, he was reprimanded in 1941 for criticizing Stalin's purge of the Red Army. A division commander on the German front (1943–5), he taught at the Frunze Military Academy in Moscow (1945–61), became head of the Faculty of Military Cybernetics, and was promoted to the rank of general in 1956.

On 7 September 1961, at a local Moscow CP conference, Grigorenko advocated democratization of the CPSU and criticized corrupt officials, the privileges of leading Communists, and the repression directed against Communist reformers. He was subsequently fired from his post, transferred to the Far East, and removed from active service. He founded (1963) the League of Struggle for the Revival of Leninism and publicly championed the right of the Crimean Tatars, deported under Stalin, to return to their homeland. Arrested in February 1964, he was committed to psychiatric prisons in 1964–5 and 1969–74. He was one of the founders of the \*Ukrainian Helsinki Group (1976) and its representative to the Moscow Helsinki Group. In 1977 he left for medical treatment in the United States and was stripped of his Soviet citizenship

in absentia, thus preventing his return. He is the author of over 80 works in military science, as well as dissident writings; his memoirs have appeared in Russian (1973, 1976), Ukrainian (1984), and other languages.

**Grinberg, Lev**, b 1790 in Volhynia, d 1850 in Warsaw. Physician. A graduate of Berlin University (1824), he practiced medicine in Kiev and Zaslav. In 1829 he was sent to do research on the plague in Bessarabia. His publications include a number of important monographs such as *Theorie der orientalischen Cholera* (1836) and *Vseobshchii terminologicheskii meditsinskii leksikon na latinskom, nemetskom i russkom iazykakh* (Universal Terminological Medical Lexicon in the Latin, German, and Russian Languages, 1839–42).

**Gritchenko, Alexis**. See Hryshchenko, Oleksa.

**Groener, Wilhelm**, b 22 November 1867 in Ludwigsburg, Württemberg, d 3 May 1939 in Bornstedt, Germany. German general; later a statesman in the Weimar Republic. The chief of staff of the German Supreme Army Command in Ukraine from March to December 1918, he was highly critical of the Central Rada and engineered Hetman P. Skoropadsky's coup d'état of 29 April 1918. He pursued the policy of exploiting Ukraine as an occupied country, extracting from it grain, other foodstuffs, and raw materials. At his insistence the Bluecoat and Graycoat divisions, the Galician Sich Riflemen regiment, and other Ukrainian units were disarmed, and he further hindered the formation of Ukrainian military units. Later he was one of the founders of the Ukrainian Scientific Institute in Berlin and the first chairman of its board of trustees (1926–34). His memoirs were published in 1957.

**Gross national income**. See National income.

**Gross national product**. See National income.

**Grossman, Vasilii**, b 12 December 1905 in Berdychiv, Kiev gubernia, d 14 September 1964 in Moscow. Russian writer of Jewish origin. His writing career began in the 1930s and his literary output includes a play and several novels. Grossman was attacked during the anti-Jewish campaign in 1953; although he was later rehabilitated (a monograph on him by A. Bocharov appeared in 1970), some of his most important work has been published only in the West. His fictionalized memoirs, *Vse techet*, published abroad in 1970 (in English as *Forever Flowing* in 1972), are remarkable for their moving accounts of collectivization and the man-made famine in Ukraine, and for the argument that Lenin, not just Stalin, was to blame for the evils of Soviet society.

**Grottaferrata Monastery** (also called *Crypta ferrata*). Founded in 1004 by Nilus of Rossano as an abbey of the Byzantine rite; its residents are Basilian monks mostly of Albanian, Greek, and Italian origin. Only a few have been Ukrainian. Located 20 km southeast of Rome, the monastery contains valuable Medieval and Renaissance masterpieces, a large library of old books, and a book-restoration laboratory. Its printing shop, established in 1909, produces Greek and Slavic liturgical books that are used by the Ukrainian Catholic church.

**Group of Ukrainian National Youth** (*Hrupa ukraïnskoï natsionalnoi molodi* or HUNM). A nationalist organization founded in 1922 by soldiers of the Ukrainian Galician Army at the internment camp in Josefov, Bohemia as a result of increasing political divisions in the Ukrainian student movement. In the mid-1920s, it developed close ties to the \*Ukrainian Military Organization and attempted to unite all Ukrainian émigré organizations on a nationalist platform. Its central office in Prague co-ordinated the work of many branches: in Brno, Příbram, Liberec, Bratislava, and Josefov in Czechoslovakia; in Vienna, Graz, and Leoben in Austria; and in Lviv and other towns in Galicia. The branches in Galicia reorganized themselves in 1926 into the \*Union of Ukrainian Nationalist Youth. In 1929 both organizations merged with the newly founded \*Organization of Ukrainian Nationalists. The monthly \**Natsional'na dumka* was the official journal of HUNM. Its presidents, in chronological order, were Z. Petriv, L. Makarushka, M. Konovalets, I. Gyzha, S. Nyzhankivsky, and O. Boidunyk.

**Grudziński, Stanisław**, b 27 April 1852 in Vodianyky, Zvenyhorodka county, Kiev gubernia, d 3 June 1884 in Warsaw. Polish poet and writer. He studied in Kiev and translated three of T. Shevchenko's poems into Polish. His poem 'Dwie mogiły' (Two Kurhans, 1879) and collection *Powieści ukraińskie* (Ukrainian Novellas, 2 vols, 1879–80) contain depictions of the life of Ukrainian peasants.

**Gubernia** (*huberniia*). An administrative territorial unit in the Russian Empire. The division into gubernias was introduced by Peter I. In Ukraine, Azov and Kiev gubernias were formed in 1708; the latter existed alongside the Ukrainian regimental administrative system, which was abolished in 1764–81. The extent and status of gubernias in Ukraine changed often (see \*Administrative territorial division). Most administrative, fiscal, judicial, and military institutions were headed by the \*governor, although they were staffed by officials of the respective ministry. Reforms enacted in 1775–85 were intended to create an elaborate system of administration involving the representative institutions of the nobility, urban strata, and peasants. These were only partly successful, although the gubernia Gentry Assemblies (founded in 1785) had a noticeable influence on local government. Self-administrating institutions in the gubernias, the \*zemstvos, began to appear in the 1860s. Towards the end of the 18th century, alongside the gubernias, the government created \*vicegerencies; these later became gubernias or were included in pre-existing gubernias. In 1914, there were 10 gubernias (Chernihiv, Katerynoslav, Kharkiv, Kherson, Kholm, Kiev, Podilia, Poltava, Tavriia, and Volhynia) on Ukrainian ethnic territory, and eight (Bessarabia, Hrodna, Kursk, Lublin, Mahiliou, Minsk, Orel, and Voronezh) in ethnically mixed territories. Most gubernia administrations published an official newspaper called *Gubernskie vedomosti*. At certain times some individual gubernias were united to create general-gubernias, headed by a \*governor-general. This occurred in Ukraine in the first half of the 19th century. Gubernias were in turn subdivided into counties (*povity*; Russian: *uezdy*). Gubernias were abolished in the USSR in 1925.

**Gubernial commissioners** (*huberniialni komisary*). Gubernial administrators who under the Russian Provisional Government replaced the \*governors of the tsarist regime. In March 1917, the Provisional Government appointed the heads of the gubernia zemstvo administrations as the first commissioners. In Ukraine these officials were recognized by the Central Rada in the summer of 1917. In gubernias where the Provisional Government recognized the authority of the Central Rada, the commissioners were M. Sukovkin and then O. Salikovskiy in Kiev; A. Livytsky in Poltava; M. Iskrytsky and then D. Doroshenko in Chernihiv; A. Viazlov in Volhynia; and M. Stakhovskiy in Podilia. After the proclamation of the UNR in November 1917, the Ukrainian government also accepted the gubernial commissioners previously confirmed by the Provisional Government in other gubernias of the UNR. As the influence of Bolshevik soviets increased, the power of the commissioners, especially in large industrial centers such as Kharkiv, Katerynoslav, and Odessa, diminished. Counties were administered by county commissioners. When in the spring of 1918 the Central Rada returned to Kiev, it appointed its own gubernial commissioners as well as gubernial military commanders. On 14 May 1918 the commissioners were replaced by the Hetman government with 11 gubernial starostas; most of them were indifferent or even hostile to Ukrainian interests.

Mykola Gudzii

**Gudzii, Mykola** [Gudzij], b 3 May 1887 in Mohyliv, Podilia gubernia, d 29 October 1965 in Moscow. Literary scholar. He graduated in 1911 from Kiev University, where he studied under V. Peretts. In 1922 he was appointed professor at Moscow University; in 1945 he became a full member of the AN URSR and worked at its Institute of Literature. From 1951 to 1963 he headed the Commission on the History of Philological Sciences of the AN URSR. Gudzii wrote many studies of old and modern Ukrainian literature, including *Literatura Kievskoi Rusi i drevneishie inoslavianskie literatury* (The Literature of Kievan Rus' and the Oldest Other Slavic Literatures, 1958) and *Istoriia drevnei russkoi literatury* (A History of Old Russian Literature, 1st edn 1938, 7th edn 1966; English trans 1949, 1970), and articles on *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign). He compiled the important *Khrestomatiiia po drevnei russkoi literatury* (Anthology of Old Russian Literature, 1st edn 1935, 6th edn 1955), and was editor in chief of the complete edition of T. Shevchenko's works (6 vols, 1963–4) and a coeditor of the works of V. Stefanyk (3 vols, 1949–54).

**Guerrilla warfare.** See Partisan movement in Ukraine, 1918–22, Soviet partisans in Ukraine, 1941–5, and Ukrainian Insurgent Army.

**Guild** (Ukrainian: *tsekh*; German: *Zunft* or *Zech*). Closed corporate association of craftsmen working either in a single trade or in several closely related \*crafts. Guilds arose and began to spread in the towns of Western Europe during the 11th and 12th centuries. The typical form of a guild as a corporation uniting the craftsmen of a trade emerged in the Middle Ages. These corporations were particularly well organized in German territories; from there, by way of Poland, they spread to Ukraine, especially in towns governed by \*Magdeburg law. At first, these corporations were only professional and social organizations of craftsmen. They were especially important as charitable and mutual-benefit associations. At the same time, they defended the craftsmen's economic interests by obtaining and guarding certain exclusive rights, eliminating competition from other social groups, controlling working conditions and wages, and regulating prices and supplies. Certain trades were monopolized by the guilds, which became closed circles of members (known as brothers) maintaining strict internal discipline. Membership was made difficult to gain and was strictly controlled by the apprenticeship system. Over time, the guilds took on a political character, acting as the representative body for the craftsmen. Through the guilds, together with the patricians, merchants, and other urban strata, the craftsmen participated in the administration and governing of \*cities and towns. Similar associations arose among doctors, teachers, lawyers, pharmacists, notaries, and members of other professions. In the Russian Empire these professional organizations came to be called *gildy*, while trade corporations kept the name *tsekh*.

The precursors of the guilds in Ukraine are mentioned in the Rus' chronicles and were known as trade companies (*druzhyyny*), ruled by elders (*starshyny*). Little is known about their organization or function. In Ukraine, the first Western-style guilds appeared in the 14th century (eg, the cobblers' guild in Peremyshl in the 1380s). Later, well-known guilds arose in Lviv (there were 10 in 1425, 20 in 1579, and 30 in the mid-17th century). Guilds also appeared in Lutske (five in the mid-16th century), Kovel, Volodymyr, Kholm, Krasnystaw, Ternopil, and other towns. The most renowned guilds in Ukraine at the time were those of the carpenters and the goldsmiths.

In time, the guilds emerged as the basic form of association for craftsmen in towns and cities throughout Ukraine. Guilds became particularly significant in the 16th–18th centuries, when they spread from Galicia to Right-Bank Ukraine and the Hetman state. By 1552 there were 17 guilds in Kiev. The largest were the cobblers' (in 1762 it had 643 master craftsmen), the tailors' (327), the weavers' (109), the fishermen's (266), the musicians' (243), the coopers' (243), the bakers' (130), the butchers' (124), and the painters' (177).

Guild membership was limited to a trade's master craftsmen who owned necessary tools and a workshop. New members were elected to the guild subject to certain other conditions, such as the completion of an apprenticeship, the employment of a journeyman (*pidmaister* or *cheliadnyk*) and apprentice (*uchen*), the production of a masterpiece, and the payment of guild dues. These conditions were eased for the sons and sons-in-law of a

master with a hereditary workshop. In addition to taking the oath of the guild, a member had to swear to respect the town's laws before the magistrates. Only master craftsmen enjoyed full rights; journeymen and apprentices were in a subordinate position and the latter were particularly exploited. Therefore, in some towns, separate organizations of journeymen were formed for self-defense and to provide mutual aid. In some cases they had their own homes (*hospody*) where they lodged under the supervision of an elderly master.

As in Western Europe, the guilds defended the economic interests of the master craftsmen, controlled prices by excluding craftsmen who were not guild members from the market, and supervised the professional ethics and standards of their members (their expertise, the quality of their products, prices, etc). The guilds were headed by an elected guild master and executive. They had their own charter, which was approved by the magistrates or in some cases by the king. Some major guilds ratified the charters of other, less-important guilds. Guilds had their representatives on the town council and other institutions of local administration, and these bodies, as well as the central government, upheld the guild's laws and decisions. In many towns the guilds helped to finance and staff the town watch, police, and fire department. The support of town councils was particularly important in the struggle between the guilds and craftsmen outside the guilds; councils fined the non-affiliated craftsmen, the so-called *partachi*, for violating guild privileges and often even confiscated their wares and arrested them. Therefore, the latter could only work in the suburbs, in small towns and villages, or on gentry estates, where the guilds did not have the right to a monopoly. In comparison with guild members, these craftsmen had very limited rights, were poorly organized, and generally were discouraged from practicing their trade.

The craftsmen within the guilds followed their own code of behavior and discipline, enforced by guild courts. They had their own elaborate rituals, treasury (the guild 'trunk'), flag, seal and emblem (the *tsekha*), and even ceremonial dress for special occasions (church feasts, funerals, banquets, official meetings, etc). Each guild also had its own coat of arms (*herb*), which depicted the respective trade. The members (*bratchyky*) of the guild celebrated religious feasts together and often undertook the upkeep of a church or a chapel, financing renovations and providing it with wax used in the services. Some guilds had private quarters; eg, in Kiev, the cobblers' guild had a building and an eatery in the Podil district. Certain guilds had their own stores for retailing their members' products. The musicians' guild in Kiev was the founder of the city's orchestra and a school of music in the 18th century. The guilds also played an important social role by providing charity and benevolent services for impoverished members and their widows and orphans.

In economic matters, conflicts arose between the guilds and the merchants or their corporations because the latter favored free enterprise and competition among craftsmen and the unrestricted access of non-guild craftsmen to the market. The gentry and nobility were also opposed to the autonomy of the guild corporations and to the 'guild coercion' that obliged craftsmen outside the guilds to renounce certain rights.

Because of their Western European origin, guilds in Ukraine were closely associated with the Roman Catholic

faith, drawing members at first only from the Catholic population (Germans and Poles). Orthodox Ukrainians and Armenians were ineligible for membership unless they became Catholics or, later, Uniates, and even then they were denied full rights. It was exceptional for an Orthodox to be tolerated even as a journeyman or apprentice. In the Hetman state, however, guilds founded by Orthodox craftsmen existed. Jews were generally prohibited from joining guilds, although in time they monopolized certain trades, even as *partachi*.

In towns where Roman Catholic guilds existed, the Orthodox Ukrainians formed separate organizations, the so-called Brotherhoods. These associations were not based on trades and instead united all Orthodox burghers. Since their concerns were cultural and religious, and above all related to the defence of their nationality, they did not fulfill the same economic functions as guilds. While guilds in Western Europe were also often connected with religious life, these ties were much stronger in Ukraine. The Jews sometimes founded their own guilds with the permission of either the town council or the central government. The increase in the number of *partachi*, the beginning of industrial manufacturing, the rise in imports of manufactured goods, the internal decline of the guilds through indiscipline and the relaxation of professional standards, and the opposition of merchants and nobles all weakened the power of the guilds and finally led to the dissolution of the system in Poland.

Although guilds existed throughout the 18th century, they no longer enjoyed an economic monopoly or their previous autonomy, especially as craftsmen outside the guilds became progressively more emancipated. In 1785 in Left-Bank Ukraine, and in 1840 on the Right-Bank, the Russian government formally curtailed the autonomy of the guilds and subordinated them to local authorities. The craftsmen's activity became regulated by the guild statutes of Peter I (1722) and Catherine II (1785). Under the terms of the latter, the guild craftsmen became one of six categories of town dwellers, although at the time they did not form a separate craftsmen's class. The 1799 'Guild Charter' of Paul I and the 1802 guild reforms led to the creation of a separate craftsmen's estate. The craftsmen who gained life membership in the guilds (*vichnozapyysani*) had all the rights and privileges of town dwellers and paid taxes according to services rendered and the number of workmen employed.

In general, the frequent reforms and changes in official policy reflected ambivalence on the part of the government; at the same time, the state endeavored to retain control over all social strata and to encourage the individual initiative which, it was believed, would further the development of crafts and manufacturing. These contradictions ensured that the nature and functions of the guilds changed slowly under Russian rule. At the end of the 19th century, Russian legislation began to abolish the guilds, turning them into trade associations with charitable goals (eg, in 1886, the Kiev cobblers' guild became a mutual-aid society). The guilds were finally abolished in Western Ukraine by the Austrian government in 1860 and in Russia in 1900.

Herman Gummerus

**Gulag.** See Concentration camps.

**Güldenstädt, Johann Anton**, b 10 May 1745 in Riga, d 3 April 1781 in St Petersburg. German naturalist and physician. At the request of the St Petersburg Academy of Sciences Güldenstädt visited Ukraine in 1773–4 and was the first to describe carefully the flora, fauna, and soils of the Ukrainian steppe, and to explain the origin of chernozem. He also discovered a number of previously unknown small animals (molerats, a new species of suslik) and collected materials on the history of the Crimea. His writings contain detailed descriptions of the natural features, daily life, and economy of Ukraine. His most important scientific work is *Reisen durch Russland und im Caucasischen Gebirge* (2 vols, 1787, 1791).

**Gumilevsky, Filaret** (secular name: Konobeevsky, Dmitrii), b 23 October 1805 in Konobeev, Shatsk county, Tambov gubernia, d 9 August 1866 in Chernihiv. Russian theologian and church historian; a graduate and later rector (1835–41) of the Moscow Theological Academy. In 1848 he was appointed bishop of Kharkiv and in 1859 archbishop of Chernihiv. He founded the newspaper *Chernigovskie eparkhial'nye izvestiia*. Among his numerous publications the most significant historical works are *Istoriia russkoi tserkvi* (A History of the Russian Church, 1847–8), *Istorko-statisticheskoe opisanie khar'kovskoi eparkhii* (A Historical-Statistical Description of Kharkiv Eparchy, 1852–9), and *Istorko-statisticheskoe opisanie chernigovskoi eparkhii* (A Historical-Statistical Description of Chernihiv Eparchy, 1873). His most important theological works are *Pravoslavnoe dogmaticheskoe bogoslovie* (Orthodox Dogmatic Theology, 1864) and *Obzor russkoi dukhovnoi literatury* (A Review of Russian Theological Literature, 1859–63). He also wrote about the history of Slobidska Ukraine.

**Gummerus, Herman**, b 24 December 1877, d 18 July 1948. Finnish politician and historian. A professor at Helsinki University, he was an active supporter of Ukraine's right to independence. He maintained contact with Ukrainian revolutionary circles, particularly during the First World War, when he was the Stockholm representative of the Union of Nations Enslaved by Russia. In 1918–19 he was head of Finland's diplomatic mission in Ukraine. He is the author of many speeches and articles on Ukraine and the Swedish book *Orostider i Ukraina* (Turbulent Times in Ukraine, 1931; published in Finnish as *Ukrainan murrosajolta*).

**Guramishvili, David** [Guramišvili], b 1705 in Saguramo, Georgia, d 1 August 1792 in Myrhorod, Poltava gubernia. Georgian poet. From 1738 he served in the Russian army, retiring in 1760 to an estate granted to him near Myrhorod. His famous collection of autobiographical poetry *Davitiani* (1787), particularly the poem 'The Shepherd Katsviia,' contains descriptions of Ukrainian landscapes and elements of Ukrainian folk songs and poetry. The collection was translated into Ukrainian by M. Bazhan and published in 1955.

**Gutkovsky, Klym** [Gutkovs'kyj], b 18 August 1881 in Ternopil, Galicia, d 29 May 1915 in Budapest. Sports organizer, who was active in the Sich and Sokil sports organizations in Galicia and was a well-known cyclist and hiker. He discovered the stalactite caves at Kryvche village in Podilia. In 1914 he joined the Legion of the Ukrainian Sich Riflemen and organized a Hutsul company in Strabychove, Transcarpathia. After a brief training period in Khust, the company distinguished itself under his command defending Vyshkiv Pass against Russian troops in early 1915. Gutkovsky died of battle wounds in a hospital.

**Gvardiiske** [Gvardiis'ke]. VIII-14–15. Town smt (1977 pop 12,300) in Symferopil raion, Crimea oblast, situated on the Salhyr River. Until 1944 it was called Sarabuz. The Crimean Orchard Research Station, a branch of the Nikita Botanical Garden, and a republican orchard-planning institute are located here. The food industry is the mainstay of the local economy.

**Gymnasium.** A general-education secondary school preparing students for university. Gymnasiums originated in Germany in the 16th century.

**Galicia.** Under the Polish Commonwealth, \*education in Ukraine was parochial; the \*brotherhood schools and later the \*Basilian monastic order administered elementary and secondary education for Ukrainians, while the Jesuit order was primarily responsible for educating Roman Catholics. Austria's recognition of the equality of the Greek Catholic and Roman Catholic churches in the territories acquired by it from Poland in 1772 led to important educational reforms. With the dissolution of the Jesuit order in 1773, its schools in Galicia were replaced by state schools, including four gymnasiums. Most of the students were children of Polish nobles or of German or Czech officials. In 1784, however, Joseph II decreed

that only gymnasium graduates would be admitted to seminaries and established Lviv University and the \*Academic Gymnasium of Lviv for training Greek Catholic priests with a command of Ukrainian (Ruthenian). The medium of instruction was Latin, with German as an auxiliary language. Ukrainian was taught as a subject. In 1818 the curriculum was expanded from five to six grades; two more grades were added in 1849.

In 1849 the Supreme Ruthenian Council demanded that Ukrainian be introduced as the language of instruction in state schools located in predominantly Ukrainian areas of Galicia. While accepting the demand in principle, the central authorities postponed its implementation out of practical considerations and made Ukrainian a compulsory subject. It retained this status until 1856.

Under the constitution of 1867, the Poles gained control of Galicia's provincial government and educational system. State-funded schools, which had been overseen from 1848 by the imperial Ministry of Education and from 1855 by the consistories, were placed under the Provincial School Board. In the gymnasiums Polish replaced German as the language of instruction. Ukrainian was admitted only as a 'conditionally compulsory' subject (one's choice could not be changed later). Ukrainian was allowed as the medium of instruction only at the Academic Gymnasium of Lviv, at first only in the four lower grades; in the upper grades Polish was used until 1874. State funding for new classes or schools was granted by the Polish-dominated Galician Diet; hence Ukrainian gymnasiums and even parallel Ukrainian classes at Polish gymnasiums could not be established without a determined political struggle. By 1910 there were 35 state gymnasiums in eastern Galicia: 28 Polish, 5 (and a branch) Ukrainian, and 1 German. Thus, there was one Polish gymnasium per 60,400 Poles and one Ukrainian gymnasium per 666,000 Ukrainians. Ukrainian was the language of instruction at the following state gymnasiums: the Academic Gymnasium and its branch (est 1906) in Lviv, and the Peremyshl (parallel Ukrainian courses from 1888, an independent school from 1895), Kolomyia (parallel courses from 1893, independent from 1900), Ternopil (parallel courses from 1898, independent from 1906), and Stanyslaviv (1905) gymnasiums. Parallel Ukrainian classes were also established in the Polish gymnasiums in Berezhany (1906) and Stryi (1907).

Their access to public funding blocked by Polish authorities, Ukrainians turned to organizing privately funded schools. Most of the private Ukrainian gymnasiums were sponsored by the Ruthenian (from 1912 Ukrainian) Pedagogical Society (see \*Ridna Shkola) and the \*Provincial School Union. By 1914 the following towns had private gymnasiums: Kopychyntsi (1908), Yavoriv (1908), Buchach (1908), Horodenka (1909), Rohatyn (1909), Brody (1909), Peremyshliany (1909), Zbarazh (1910), Buzke (1910), Dolyna (1911), and Chortkiv (1911). For girls there were two secondary schools: a lyceum of the Ukrainian Girls' Institute in Peremyshl (1903) and the first Ukrainian gymnasium for girls run by the Basilian nuns in Lviv (1906). It was difficult to obtain accreditation for these schools from the Provincial School Board, which was controlled by the Poles. Unaccredited gymnasiums could not issue diplomas and could not apply for state support. While many private Polish gymnasiums were accepted after one or two years into the state school system, private Ukrainian schools were not and re-

mained a heavy drain on the financial resources of the Ukrainian community. From 1908 to 1911, Ukrainian boys in Galician gymnasiums numbered 5,670-7,230, or approximately 21-23 percent of the total enrollment in all boys' gymnasiums. Meanwhile, the greater importance of private education is evidenced by the fact that in 1911-12 Ukrainian boys accounted for 33 percent of the enrollment in private gymnasiums; the respective figure for girls was approximately 8 percent. At the time Ukrainians accounted for 42 percent of the province's population.

All Ukrainian gymnasiums were of the classical type, emphasizing Latin and Greek. Their curriculum consisted of the following compulsory subjects: religion, Latin, the language of instruction (Ukrainian or Polish), world geography and history, mathematics (all taught from grades one to eight), Greek (from grade three to eight), biology (grades one, two, five, and six), and physics (grades three, four, seven, and eight). German, French, music, art, physical education, history of Austria-Hungary, stenography, and the other provincial language (Polish or Ukrainian) were electives. Few Ukrainians attended so-called realgymnasiums, which emphasized modern languages and science, or technical schools, partly because these were Polish and partly because technical education was not held in high esteem.

Ukrainian gymnasiums were closed down during the Russian occupation of Galicia (1914-17). In February 1919 the government of the Western Ukrainian National Republic nationalized some private Ukrainian gymnasiums and Ukrainianized some Polish state gymnasiums in Galicia. Thus, the number of Ukrainian state gymnasiums rose to 20. Upon conquering Galicia the Polish authorities recognized only the seven Ukrainian state gymnasiums that had existed before 1 November 1918. In 1920 the gymnasium system was reformed and the humanistic gymnasium (without the Greek language) was introduced. The Ukrainian state gymnasiums were all classical ones, but some new private gymnasiums were humanistic. By 1923 there were 14 Ukrainian gymnasiums financed by the Ukrainian Pedagogical Society (renamed *Ridna Shkola* in 1926) and parallel Ukrainian classes at the Polish gymnasium in Stryi. In Volhynia, annexed by Poland in 1919, there were only three coeducational private Ukrainian gymnasiums: in Lutske (1918), Kremianets (1923), and Rivne (1923). From 1924 instruction in history, geography, and Polish civics at Ukrainian gymnasiums had to be given by Polish teachers. Later some military training became compulsory as well. Ukrainian was taught to all boys at some Polish gymnasiums because of its possible usefulness in war against the USSR. In 1932 extensive gymnasium reforms were introduced: grades three to six of the old gymnasium were turned into a new four-year gymnasium, while grades seven and eight became a two-grade \*lyceum. By curriculum the gymnasiums were classified into mathematically-physical, naturalistic, humanistic, classical, and other categories. By 1939 the number of Ukrainian state gymnasiums declined to 5, while the number of private gymnasiums increased to 22. Of the 27 gymnasiums, 13 were coeducational, 7 were for boys, and 7 for girls. There were also 5 state-funded and 16 private Ukrainian lyceums. At the same time there were 114 Polish gymnasiums and 106 lyceums in Galicia. The total enrollment in Ukrainian gymnasiums and lyceums was 6,000.

During the Second World War the \*Generalgouvernement Ukrainian gymnasiums were established in Jarosław and Kholm. With the incorporation of Galicia into the Generalgouvernement in 1941, ten more Ukrainian gymnasiums were established. By 1942 enrollment at the 12 gymnasiums reached 7,017 students, including 2,137 girls; enrollments fell to 5,700 in the following years because of restrictions imposed by German authorities. After the second Soviet occupation of Galicia in 1944, gymnasiums were replaced with \*ten-year schools. The gymnasiums in Jarosław and Kholm, which became part of Poland, were closed down by the authorities.

**Transcarpathia.** The first gymnasium in Transcarpathia was established at Uzhhorod as the Royal Archgymnasium (later \*Uzhhorod Gymnasium) in 1778. In 1790 Latin replaced German as the language of instruction, and in 1796 Hungarian replaced Latin. The limited use of Ukrainian was permitted from 1849 to 1851 as a reward to the Ukrainians for their loyalty during the Hungarian revolution. Ukrainian was an optional subject at the Hungarian gymnasiums in Mukachiv (est 1872) and Berehove. With the incorporation of Transcarpathia into Czechoslovakia in 1919, the gymnasiums were transformed into realgymnasiums and Ukrainian was introduced as a language of instruction. By 1921–2 a fourth Ukrainian gymnasium had opened in Khust, and in 1922–3 Ukrainian students numbered 1,660. In 1936 a Ukrainian classical gymnasium was founded by the Basilians in Uzhhorod. By 1938 Subcarpathian Ruthenia had five Ukrainian (three of which offered parallel courses in Czech or Magyar), one Czech, and two Hebrew gymnasiums. In the autonomous state of Carpatho-Ukraine (October 1938–March 1939) there was one private and seven state-funded Ukrainian gymnasiums with an enrollment of 1,941 boys and 1,193 girls. Under the Hungarian occupation (1939–44) all but three Ukrainian gymnasiums were Magyarized; only the local dialect was permitted in the schools, and the term 'Ukrainian' was banned. In 1945 the Soviet school system was introduced and ten-year schools replaced gymnasiums. In the Prešov region there were three Ruthenian-Russian gymnasiums in 1945–6. Later they were transformed into Ukrainian secondary schools.

**Bukovyna.** The first gymnasium in Bukovyna was a German one opened in Chernivtsi in 1808. Ukrainian was offered as a subject at this school only from 1851. A second German gymnasium with parallel classes taught in Ukrainian was opened in Chernivtsi in 1896, and a similar school was established in Kitsman in 1904. There were two Ukrainian schools: a classical state gymnasium in Vyzhnytsia (1908–21) and a private realgymnasium in Vashkivtsi (from 1912). The German gymnasium in Seret introduced parallel Ukrainian courses in 1914. On the eve of the Rumanian invasion at the end of 1918 there were five Ukrainian gymnasiums (in Chernivtsi, Vyzhnytsia, Vashkivtsi, and two girls' gymnasiums in Chernivtsi and Kitsman) and three bilingual gymnasiums (in Chernivtsi, Kitsman, and Seret); their Ukrainian enrollment was 2,820. Under Rumanian rule all gymnasiums in Bukovyna were Rumanianized by 1924. When the region was incorporated into Soviet Ukraine, the gymnasiums were replaced by Soviet ten-year schools.

**Russian-ruled Ukraine.** The first gymnasiums appeared at the beginning of the 19th century in the larger

cities: Poltava (1804), Kharkiv (1805), Chernihiv (1808), Novhorod-Siverskyi (1808), Kremianets (1812), Katerynoslav (1812), Kiev (1812), Kherson (1814), and Vinnytsia (1814). Prior to that, higher education was provided mostly by the \*colleges. In time many county towns had gymnasiums. These schools were an important means of Russifying the offspring of the Cossack officer elite and assimilating them to the Russian nobility. Besides the four-year classical gymnasiums, there were two commercial gymnasiums – in Odessa (1804–17) and Tahanrih (1806–37). After the Polish insurrection of 1830–1, the Polish school system in Right-Bank Ukraine was dismantled and Russian gymnasiums were introduced. Responsibility for administering gymnasiums in Ukrainian territories was transferred from Kharkiv and Vilnius universities to school district curators. In 1864 the gymnasiums were reorganized into classical (offering both Latin and Greek), semiclassical (offering Latin only), and realgymnasiums (offering no ancient languages). Furthermore, the progymnasium, corresponding to the first four years (and later six years) of a regular gymnasium, was introduced. The gymnasium curriculum consisted of religion, Russian language, French or German, mathematics (compulsory in all seven grades), Greek and history (grades three to seven), geography (grades one to four), natural history (grades one to three), and penmanship (grades one to four). Military gymnasiums established in 1862 were converted to cadet schools in 1882. Under the school statute of 1871, ancient languages were emphasized and science was removed from the curriculum. Grade seven was extended to two years, and admission of non-nobles was severely restricted. The realgymnasium was demoted to a realschule, which prepared students for higher technical schools. Towards the end of the century the gymnasium curriculum diverged from the 1871 standard and admission requirements were eased considerably. The growth in the number of gymnasiums and progymnasiums and in their total enrollment is presented in table 1.

At the beginning of the 20th century the number of gymnasiums, especially private ones, rose sharply. Most students were local Ukrainians with a strong admixture of Poles in Right-Bank Ukraine and, in the latter half of the 19th century, Jews in the south. This is illustrated in table 3 by data on the religious composition of the student body in 1887.

Data on the social composition of the student body in 1887 show that gymnasiums basically educated young nobles and townsmen. Sons of clergy were encouraged to enter seminaries, not gymnasiums. (See table 2.)

In 1862 private seven-year girls' gymnasiums began to be organized. The Ministry of Public Education began to set up similar gymnasiums in 1870. These schools did not offer ancient languages, but had seven regular grades and an eighth grade for training elementary-school teachers and governesses. Four- and five-grade state progymnasiums were also founded. There were many more private gymnasiums than state ones. By 1887 in the Kharkiv school district there were 18 girls' gymnasiums and 40 progymnasiums with a total enrollment of 10,337, while in the Odessa school district the respective figures were 17, 18, and 6,451. Before 1917 the gymnasiums in Ukraine were entirely Russian institutions. Only two private boys' gymnasiums – V. Naumenko's in Kiev and

Kovalchuk's in Odessa – encouraged an interest in Ukrainian culture. At the turn of the century secret Ukrainian student circles existed at gymnasiums in Kiev, Poltava, Pryluky, and Lubni.

After the February Revolution of 1917 the Russian Provisional Government permitted the opening of only two Ukrainian gymnasiums. The efforts of the UNR Secretariat of Education to Ukrainianize gymnasiums were hampered by Russified school administrators and teachers. The Ukrainian community, however, began to establish its own gymnasiums: the Shevchenko Gymnasium, the Cyril and Methodius Gymnasium, and three others in Kiev; the Kotliarevsky Gymnasium in Poltava; the Hrinchenko Gymnasium in Kharkiv; the Drahomanov Gymnasium in Odessa; and others in Katerynoslav, Kamianets, Kherson, and even in some county centers and larger villages. By the end of 1918 there were about 150 Ukrainian gymnasiums. The Ukrainian language and Ukrainian studies were taught at the established Russian gymnasiums in Ukraine. At the beginning of 1919 there were a total of 836 gymnasiums in the UNR, of which 161 were state-funded, 409 community-funded, and 266 privately funded; 474 were for boys, 362 for girls. Two Ukrainian gymnasiums were established in the Kuban. In 1920, after the Bolsheviks occupied Ukraine, the gymnasiums were converted into 'labor schools.

**Abroad.** A number of Ukrainian gymnasiums were organized by Ukrainian émigrés; eg, in Harbin, Manchuria, in 1917 (closed down by Chinese authorities in the 1920s). After the war refugees and prisoners of war from the UNR set up a gymnasium in Kalisz, Poland (1924–34) and a realgymnasium in Prague (1925, transferred to Řevnice in 1927 and to Modřany in 1937). After

the Second World War 27 DP camps in Germany and two in Austria had Ukrainian gymnasiums in 1947–8. As Ukrainians emigrated to countries with a different educational system, the Ukrainian gymnasium became all but extinct. One Ruthenian gymnasium, using the \*Bačka dialect as the medium of instruction, was established in 1945 in Ruski Krstur, Serbia.

**Gymnastics.** A sport involving systematic and usually rhythmic physical exercises for men and women as well as performances on special gymnastic apparatus. In Ukraine, gymnastics was first practiced in the first half of the 19th century by the youth of the nobility. The sport came from Western Europe and was widely publicized in the press as a form of physical therapy. In 1838 commanders in the Russian army were ordered to institute the use of gymnastics among the troops, but the practice did not spread. In the early 20th century Swedish-style gymnastics spread in Western Ukraine, promoted by such youth organizations as \*Sokil, \*Sich, and \*Plast, which were modeled on the Czech Sokol movement. Towns in Russian-ruled Ukraine had Russian Sokol organizations, in which some Ukrainian youths participated. In 1913 the first All-Russian Olympiad was held in Kiev; gymnastics was included in the program.

The first years of Soviet rule in Ukraine saw the emergence of the so-called proletarian-culture movement, whose founders labeled competitive gymnastics a 'bourgeois' sport and promoted instead 'labor' gymnastics (*trudova himnastyka*). In the 1930s, sports, including gymnastics, became widespread in Ukraine since they were included in the party's program of the education of workers. Efforts

were made at a number of conferences to standardize the sport by establishing set rules and criteria for competition. In 1937 all-Union regulations were adopted and Soviet athletes began to compete in international meets, although it was only in 1938–40 that gymnastics began to enjoy great success in Ukraine. In 1938, the Kiev gymnast A. Ibadulaiev became the all-round champion of the USSR.

After the Second World War, O. Myshakov was placed in charge of Ukrainian gymnastics. As a result of his training methods, the Ukrainian gymnasts M. Horokhovska, L. Latynina, N. Bocharova, V. Chukarin, B. Shakhlin, D. Leonkin, M. Nikolaeva, Yu. Titov, and P. Astakhova became world and Olympic champions in gymnastics. In four consecutive Olympic games (1952–64), Ukrainian gymnasts won a total of 27 individual or team gold medals, 17 silver, and 13 bronze, and were repeatedly world and European champions. After Myshakov was dismissed from his post gymnastics in Ukraine declined, and in the next four Olympic games (1968–80) Ukrainian gymnasts did not win a single individual gold medal. At the start of the 1980s, a revival of gymnastics began in Ukraine, with such international-class gymnasts as S. Zakharova (Kiev) and B. Makuts (Lviv). The 1985 world championships in Montreal saw O. Omelianchuk from Kiev share the title of all-round women's champion. In 1976, Ukrainian gymnast Yu. Titov was elected president of the International Gymnastics Federation.

**György II Rákóczi.** See Rákóczi II, György.

**Gypsies** (Ukrainian: *tsyhany*). Gypsies (from 'Egyptians,' as they were known in the English statutes) are the descendants of wandering tribes that left northern India toward the end of the 1st millennium AD. They call themselves Rom, meaning 'Men,' and their language is known as Romani; its structure is derived from Sanskrit, and it contains Greek, Rumanian, and Slavic features. At first the Gypsies settled in Persia and Armenia. Brought to Anatolia by the Byzantines, in the 13th and 14th centuries they spread into the Balkans and Eastern Europe, and thence into Central and Western Europe. They were eventually dispersed, often by expulsion, throughout the world, in which there is today an estimated 8 to 10 million. All Gypsies who speak Romani are bilingual: besides their mother tongue they speak the language of the country in which they live.

The presence of Gypsies in Ukraine was first documented in the early 15th century (Sianik, 1428). In general, they led a closed, aloof, nomadic or semisettled way of life. In winter they usually lived in huts, wagons, and tents on the outskirts of villages. Traditionally they worked as artisans (blacksmiths, carpenters, coppersmiths), horse traders, animal trainers, and peddlers. Streetcorner entertaining, music-making, singing, dancing, conjuring, fortune-telling, begging, and petty crime were sources of supplementary income. In Left-Bank Ukraine, where

they were more sedentary and wealthier than in Right-Bank Ukraine, some intermarried with Ukrainians. The nomadic Gypsies maintained their social organization and folkways, shunning non-Gypsy contacts, education, and values, often as a reaction to prevailing anti-Gypsy attitudes and persecution. Each clan (an alliance of families) elected its own chieftain. Repeated attempts by the Polish, Austrian, and Russian authorities to force the Gypsies to integrate and adopt a settled way of life proved unsuccessful. To some extent, however, the Gypsies did accept the language and faith of the dominant society, being Orthodox in most of Ukraine, Catholics in Galicia and Transcarpathia, and Moslems in the Crimea.

During the Second World War Nazi policies to exterminate the Gypsies were implemented in occupied Ukraine, as in other countries. In July 1943 the Rumanian authorities transported some 25,000 Gypsies to Transnistria, along the Boh River; about half of them perished because of brutal treatment. Estimates of the total number murdered in Europe range from 220,000 to 400,000; in Ukraine thousands were killed at Babyn Yar in Kiev, and in the Crimea, Podilia, Galicia, and Volhynia.

According to the 1926 Soviet census, there were 13,600 Gypsies in the Ukrainian SSR, 2,500 of whom lived in cities. In the Crimea there were 1,300, and in northern Caucasia, 6,800. On all of the Ukrainian ethnic territories there were close to 20,000. According to the 1970 census there were 30,100 Gypsies in the Ukrainian SSR (up from 28,000 in 1959), and 175,300 in the USSR as a whole. In 1979 there were 209,200 Gypsies in the USSR according to the census; of these, 34,500 were in Ukraine. Western experts estimate there were 480,000 in the USSR in 1980, although the estimate of the World Romani Union is considerably higher.

Gypsies are scattered throughout Ukraine, but their largest concentrations are in Transcarpathia, Crimea, and Odessa oblasts. Almost half of them live in cities. Forty percent of urban Gypsies and 35 percent of rural Gypsies consider Romani their mother tongue. With the Soviet authorities forcing the Gypsies to adopt a settled way of life (resolution in 1926 and a government decree in 1956), more are increasingly being employed in agriculture and industry.

The material culture of the Gypsies has never differed appreciably from that of the dominant society except in dress. They have, however, a rich folk tradition, with its own mythology and magic, oral literature, songs, music, and dance. Gypsy themes can be found in Ukrainian literature (particularly in the writings of S. Rudansky, M. Starytsky, I. Franko, and O. Kobylanska) and in music.

**Gypsum.** Mineral, hydrous calcium sulfate. In nature it is usually found in a granular (alabaster), fibrous (selenite), or crystalline form. Pure gypsum is colorless and transparent; different impurities give it different colors. Gypsum is used widely in manufacturing cementing materials, paints, enamels, and glazes; in improving the soil (gypsuming); in medicine and optics. Before 1917 gypsum was produced mostly on a seasonal basis using artisan techniques. In 1913 Ukraine produced only 62,000 t, which accounted for 31 percent of the total gypsum production of the Russian Empire. By 1940 Ukraine's gypsum production reached 892,000 t, and by 1983, 956,000 t or approximately 29 percent of the USSR production. The largest deposits of gypsum lie in the Donets Basin, and were formed in the Permian period. Second in importance are the deposits along the Dniester River in Western Ukraine. Smaller deposits are located in Sumy, Poltava, and Crimea oblasts.

**Gytha,** dates unknown. Daughter of the last Anglo-Saxon king in England, Harold II. After Harold's death in the Battle of Hastings in 1066, she took refuge at the court of the Danish king Sweyn II. In 1074 or 1075 she became the first wife of Prince \*Volodymyr Monomakh.

**Gzhytsky, Volodymyr** [Gzhyts'kyj], b 15 October 1895 in Ostrivets, Terebovlia county, Galicia, d 19 December 1973 in Lviv. Writer. After serving in the Ukrainian Galician Army in 1918–19, he moved to Kharkiv. He was a

Volodymyr Gzhytsky

member of the writers' groups \*Pluh and \*Zakhidnia Ukraina. The history of Western Ukraine is the subject of many of his works. His novel *Chorne ozero* (The Black Lake, 1929) provoked severe official criticism because it exposed Russian colonial policies towards other nations of the USSR. In 1934 he was sent to a Soviet concentration camp. He was released and rehabilitated in 1956 and returned to Lviv. There he published, among other works, the prose collection *Povernennia* (The Return, 1958), the autobiographical novel *U shyrokyi svit* (Into the Wide World, 1960), and the novels *Opryshky* (Opryshoks, 1962), parts of which first appeared in the 1930s, *Slovo chesty* (Word of Honor, 1968), and *Karmeliuk* (1971).

**Haas, Maara** (née Lazechko, Myroslava), b 12 February 1920 in Winnipeg. Canadian poet and writer of Ukrainian origin. She has translated in her own poetic idiom much of T. Shevchenko's poetry and has written a television script about his life. Her best-known work is the humorous autobiographical novel *The Street Where I Live* (1976), which depicts Winnipeg's north end in the 1930s.

**Habsburg dynasty.** Family that ruled the Duchy (later Archduchy) of Austria from 1278. In 1526 they gained possession of the Bohemian and Hungarian kingdoms (including Transcarpathia), and from 1452 to 1806 members of the family were the emperors of the Holy Roman Empire; in the 19th century they took the title of Emperor of Austria (from 1867 the Dual Monarchy of Austria-Hungary). The Habsburgs also acquired the titles of King of Galicia and Lodomeria (Volodymeria) after the annexation of Galicia in 1772, and Prince of Bukovyna in 1849. \*Maria Theresa (1740–80), \*Joseph II (1780–90), Leopold II (1790–2), Francis I (1792–1835), Ferdinand I (1835–48), \*Francis Joseph I (1848–1916), and Charles I (1916–18) were all Habsburgs who ruled over Galicia and Bukovyna. In general, the policy of the Habsburgs was oriented towards maintaining a centralized empire, to which end they followed the maxim of *divide et impera*. They tolerated national differences in cultural matters, but repressed any separatist movements. In socio-economic affairs, Austria under the Habsburgs maintained the non-German provinces as internal colonies. The reign of the Habsburgs in Galicia and Bukovyna ended when the \*Western Ukrainian National Republic was created on 1 November 1918 in Galicia and on 6 November 1918 in Bukovyna.

Archduke Wilhelm  
Habsburg-Lothringen  
(Vasyl Vyshyvany)

**Habsburg-Lothringen, Wilhelm**, b 10 February 1895 in Pula, Dalmatia (now Yugoslavia), d 1949. Austrian prince and army officer. A supporter of the Ukrainian cultural and national movement who adopted the name

Vasyl Vyshyvany, Habsburg won wide popularity among Galician Ukrainians. In 1918 he commanded Austrian army units in southern Ukraine, including units of the \*Ukrainian Sich Riflemen. In the autumn of 1918 his command was transferred from Oleksandrivske (now Zaporizhia) to Bukovyna. During 1919 Habsburg served as a colonel in the UNR war ministry. In August 1947 he was arrested by the MVD in Vienna and imprisoned in the USSR, where he later died. He is the subject of a biography by N. Hirniak (1956).

**Hacquet, Baltazar**, b 1739 or 1740 in Leconquet, Brittany, France, d 10 January 1815 in Vienna. Austrian physician and naturalist of French origin. Hacquet was a professor of natural history and medicine at Lviv University from 1787 to 1805, concentrating on the fields of geology and biology. He carried out a number of scientific expeditions to various regions of the Austrian empire, leaving descriptions of the environment, natural resources, and the customs of the inhabitants in numerous works, such as his four-volume *Neueste physikalisch-politische Reisen in den Jahren 1788 und 1789 durch die Dacischen und Sarmatischen oder Nördlichen Karpathen* (1790–6).

**Hadiache or Hadiach** [Hadjače or Hadjač]. III-14. Town (1969 pop 13,200) and raion center in Poltava oblast. Established in 1634, under the Hetman state it was a fortified regimental center (1648–9, 1672–1783). There Hetman I. Vyhovsky concluded the Treaty of \*Hadiache with Poland in 1658. Under Russian rule it was a county town in Poltava gubernia (1803–1917). The scholar and civic leader M. Drahomanov was born there in 1841. The P. Prokopovych Research Station of Apiculture, an agricultural school, and a regional history museum are located there.

**Hadiache, Treaty of.** An agreement with Poland signed on 16 September 1658 by Hetman I. \*Vyhovsky after he suppressed a revolt led by the colonel of Poltava, M. \*Pushkar, and severed relations with Muscovy for its violations of the 1654 Treaty of \*Pereiaslav. The Polish commission at the negotiations was led by S. Bieniewski and K. Jewłaszewski; the Ukrainian, by Yu. \*Nemyrych, the architect of the treaty, and P. \*Teteria.

According to the treaty, Kiev, Chernihiv, and Bratslav palatinates were to constitute the independent Grand Duchy of Rus', whose nobles and Cossack *starshyna* would be equal partners with their Polish and Lithuanian counterparts in a gentry-ruled federation under a commonly elected king. The duchy was to be governed by a hetman elected for life from among four candidates presented by the Ukrainian estates and confirmed by the king. There were to be an autonomous duchy administration,

duchy senators and deputies to the common Sejm, and a separate court system, treasury, currency, and army of 30,000 registered Cossacks and 10,000 regular mercenaries, paid from public taxes. The hetman and his army were to remain faithful to the Crown and the duchy could not have diplomatic relations or enter into alliances with foreign states. The Polish and Lithuanian armies were denied the right to enter the duchy, except in the event of war, and then they would come under the hetman's command. Up to 100 worthy Cossacks in each regiment could be granted noble status. Poles who had lost their properties during the \*Cossack-Polish War would have them restored, subject to the hetman's approval. A general amnesty was to be effected. The Orthodox were to enjoy the same unrestricted rights as the Catholics throughout the Commonwealth, and the Orthodox metropolitan of Kiev and the bishops of Lutske, Lviv, Peremyshl, Kholm, and Mstislau were to sit in the common Senate. No Uniate monasteries or churches were to be built in the duchy. Two Orthodox academies (universities) – in Kiev and elsewhere – were to be opened. An unlimited number of Orthodox schools, colleges, gymnasiums, and printing presses could be established, and the freedom to publish was guaranteed.

In protracted negotiations the Ukrainian envoys strove unsuccessfully to have Volhynia, Belz, Galicia, Podilia, Pynske, Starodub, and Ovruch palatinates included in the Grand Duchy of Rus'. The treaty was finally ratified by the Sejm on 22 May 1659, but, in spite of support from the Cossack *starshyna*, Ukrainian nobles, and higher clergy, it did not find favor among the Cossack and peasant masses, which remained hostile to the restoration of de facto Polish rule and the prewar status quo, and to greater stratification among the Cossacks. Because of Vyhovsky's failures in the war with Muscovy that followed his initial victory at \*Konotip in June 1659, uprisings against him, and his withdrawal from political affairs and demise, the terms of the treaty were never implemented.

**Hadzhega, Vasyl** [Hadžega, Vasyl'], b 28 July 1864 in Poliana, Máramaros county, d 15 March 1938 in Uzhhorod. Greek Catholic priest (canon and archpriest) in Transcarpathia; historian, pedagogue, and civic leader; full and honorary member of the Shevchenko Scientific Society. After graduating from a seminary in Budapest and obtaining a doctorate in theology in Vienna, he became archivist of the Mukachiv Eparchy and professor at the Uzhhorod Theological Seminary. He was

Vasyl Hadzhega

active in pro-Ukrainian institutions, a leading member of the Christian Popular party, and supporter of Rev A. \*Voloshyn's views. As archivist, he did extensive research in the socio-economic history of Transcarpathia, and particularly in the history of the church. Many of his articles were published in the periodicals *Naukovyi zbirnyk tovarystva Prosvita v Uzhhorodi*, which he edited, and *Podkarpatskaia Rus'*, which he coedited. He also wrote a novelette, *Vyshchehrad* (1926). A complete bibliography of his works appeared in *Naukovyi zbirnyk tovarystva Prosvita v Uzhhorodi*, vols 13–14 (1938).

**Hadziewicz, Rafał**, b 13 October 1803 in Zamch near Biłgoraj (now Poland), d 17 September 1886 in Kielce, Poland. Classical painter and graphic artist. Having studied art in Warsaw (1822–9), Dresden and Paris (1829–31), and Italy (1831–3), he taught painting and drawing at the Art School in Cracow (1834–9), Moscow University (1839–44), and the School of Fine Arts (1844–64) and the Drawing Class (1864–71) in Warsaw. In 1871 he retired to Kielce. Hadziewicz was an eclectic painter who dealt with mythological, religious, and historical themes. He is noted for his self-portraits and portraits. His genre paintings on Ukrainian themes include *The Blind Man Playing the Guitar* and *A Ukrainian Peasant Family in the Evening around a Lamp*. Among his religious works is the well-known iconostasis (1844–6) of the Stariava village church in Mostyska county, Galicia.

**Hadzinsky, Mykola** [Hadzins'kyj], b 1901 in Kamianets, Brest county, Hrodna gubernia, d 4 August 1984 in Rochester, New York. Experimental physicist. A graduate of Kharkiv University, from 1932 to 1941 he chaired the Department of Physics at the Kharkiv Zootechnical Institute and did research at the Kharkiv Roentgen-Radium Institute. He contributed to the early development of nuclear physics in Kharkiv. Immigrating to Germany and in 1951 to the United States, he served as professor and chairman of the Physics Department at Wilberforce University, and then from 1955 to 1969 as professor of physics at the Rochester Institute of Technology. He was one of the leaders of the \*United Hetman Organization and served as the chairman of its presidium.

**Hagiography.** Biographies, tales, and legends about saints, including accounts of miracles performed by them, particular episodes from their lives, and their martyrdom. These writings are among the most important monuments of old Ukrainian literature. By the 11th century there were already many translations of Greek and Latin

hagiographic writings, individual lives of saints such as the Pannonian Lives of ss Cyril and Methodius, the Czech lives of St Václav and St Ludmila, and the Moravian Life of St Vitus; patericons (collections of episodes from lives of monks) such as the Patericon of Sinai, of Jerusalem, and of Rome (a redaction of Pope Gregory the Great's *Dialogues*); reading menologies (collections of lives and sermons arranged according to the church calendar, not for liturgical use but for daily reading); and prologues or synaxaries (collections similar to menologies but with abridged lives). Original works written in Ukraine include the Lives of ss Borys and Hlib (*Chtenie*) and the Life of St Theodosius of the Kievan Cave Monastery, both by Nestor the Chronicler (end of the 11th century), the beautifully composed *Skazanie* (Tale) of the murder of Borys and Hlib, and the Life of Prince Mstyslav. The lives of St Volodymyr the Great, St Olha, Mykhailo of Chernihiv, and Boyar Fedir have come down to us only in later redactions. Fragments of the Life of the Varangians Slaughtered by Pagans in Kiev, the Life of St Anthony of the Kievan Cave Monastery, and the Life of Prince Ihor of Chernihiv have been preserved in the chronicles. The \*Kievan Cave Patericon, consisting of the correspondence between Bishop Simon and Brother Polycarp (1215–25) and several tales by Polycarp (1223–33), is an important monument of hagiographic literature.

Because of Western European and Polish influence, there was a revival of hagiographic literature in the 17th century. A new redaction of a two-volume prologue with versed epigrams, a Polish and a Ukrainian Church Slavonic edition of the Kievan Cave Patericon, A. Kalnofoisky's *Teraturgema*, and lives of Uniate saints, mostly in Latin, were published. P. Mohyla collected tales of a hagiographic nature that remained unpublished. Some of his material was used by I. Gizel and V. Yasynsky. D. Tuptalo's reading menology based on Slavonic and Latin literature as well as some new manuscript sources is a masterpiece of Ukrainian hagiographic literature. This work influenced the literatures of all Orthodox Slavs. In the 18th–20th centuries lives of saints assumed an official character. This is true of the lives of St Dmytro (Tuptalo), St Tikhon Zadonsky, St Innocent of Irkutsk, and Y. \*Horlenko. Lives of saints are an important auxiliary source for the history of Ukraine.

**Hahilky.** See *Vesnianky-hahilky*.

**Hai, Oleksander** [Haj], b 8 August 1914 in Katerynoslav (now Dnipropetrovske). Stage and screen actor. He began his career at the Dnipropetrovske Ukrainian Music and Drama Theater in 1929. A graduate of the Moscow Artistic Academic Theater (1936), in 1947 he joined the Lviv Ukrainian Drama Theater, where he has appeared in various plays. His film credits include the lead role in *Hryhorii Skovoroda* (1958), M. Kotsiubynsky in *Rodyna Kotsiubyns'kykh* (The Kotsiubynsky Family, 1970), and Ter-

racini in the screen version of O. Korniiuchuk's play *Pam'iat' sertsia* (Memory of the Heart, 1971).

**Hai-Holovko, Oleksa** [Haj-Holovko] (Hay-Holowko), b 12 August 1910 in Pysarivka, Balta county, Podilia gubernia. Writer. He worked as an editor for the journal *Chervonyi shliakh* in Kharkiv and the Kiev film studio in the 1930s and was a member of the Ukrainian Writers' Union from 1933. In 1940 he moved to Lviv and during the war he worked as a forced laborer in Germany. He immigrated to England in 1948 and settled in Canada in 1949. Among his works are the collections of poetry *Shturmovi baliady* (Storming Ballads, 1934) and *Surmach* (The Bugler, 1942); the short stories *Svitannia* (Dawn, 1936) and *Odchaidushni* (The Audacious, 1959); the satirical long poem *Kokhaniada* (The Love-in, 1947); and the autobiographical accounts *Poiedynok z dyiavolom* (Duel with the Devil, 2 vols, 1950) and *Smertel'noiu dorohoiu* (Along the Road of Death, 2 vols, 1979, 1983). His collected poetical works appeared in Toronto in 1970 and 1978.

**Haida** [Hajda]. Discovered in 1978 in the Carpathian foothills by an expedition of the Museum of Folk Architecture and Folkways of the Ukrainian SSR, a folk musical instrument in the form of a straight whistle flute with two movable wooden rings. It was carved from wood and decorated with elaborate and original designs. Some scholars, such as I. Shramko, believe that this instrument was directly connected with an ancient cult of a fertility god.

**Haidai, Mykhailo** [Hajdaj, Myxajlo], b 9 December 1878 in Dankivka khutir, Pryluky county, Chernihiv gubernia, d 9 September 1965 in Kiev. Composer, choir director, ethnographer. A conductor of various Ukrainian choirs in Vinnytsia, Moscow, and Kiev, where he conducted *DUMKA* (1924–7), Haidai wrote choral works and arrangements of Ukrainian folk songs. As an ethnographer, he was associated with the VUAN Ethnographic Commission (1920–33), the AN URSR Institute of Folklore (1936–41), and the Institute of Fine Arts, Folklore, and Ethnography. He transcribed over 2,000 folk songs, many of which were published in his *Zrazky narodnoi polifonii* (Examples of Folk Polyphony, 2 vols, 1928–9).

**Haidai, Zoia** [Hajdaj, Zoja], b 2 June 1902 in Tambov, Russia, d 21 April 1965 in Kiev. Operatic soprano. A

Zoia Haidai

graduate of the Lysenko Music and Drama Institute in Kiev (1927), she was a soloist of the Kiev (1928–30, 1935–55) and Kharkiv (1930–4) opera and ballet theaters, and a teacher at the Kiev Conservatory (1947–65). She appeared in over 50 Ukrainian, Russian, and Western European operas, including S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube* (as Oksana) and M. Verykivskyy's *Servant Girl* (as Hanna). She also appeared on the stage outside the USSR in such countries as China, Canada, and the United States. In 1960 L. Doroshenko wrote a biography of Haidai.

**Haidamaka, Dmytro** [Hajdamaka] (real name: Vertepov), b 7 February 1864 in Lukovskaia near Piatigorsk in Caucasia, d 9 May 1936 in Dnipropetrovske. Stage impresario, actor, and director. He began his acting and directing career in M. \*Kropyvnytsky's troupe in 1891. From 1897 to 1917 he managed his own troupe, consisting of 40–60 actors and a choir of 30–40 people, and staged classical and contemporary plays, operas, and operettas. Thereafter he worked with various troupes, including those of the Donetske (1927–34), Leningrad, and Dnipropetrovske (1934–6) Ukrainian drama theaters.

**Haidamaka.** A participant in spontaneous, popular uprisings against the Polish regime in Right-Bank Ukraine in the 18th century. The term's origin is Turkish (*hajdamak*, 'to pursue'); it signifies a restless, rebellious individual. The Balkan Slavs have a corresponding term – *hajduk*. The Galician Ukrainian equivalent is \*opryshok. Haidamakas were recruited from among dissatisfied peasants, fugitive serfs, hired laborers, and even artisans and burghers. They formed detachments or bands under the leadership of chieftains who collaborated to organize large-scale rebellions known as the \*haidamaka uprisings. The earliest information about haidamakas comes from 1708, when rebels led by H. Pashchenko were active in Volhynia; by 1712 they had extended their operations to Podilia and the Bratslav and Kiev regions. The term was first used in a document dated 22 February 1717.

**Haidamaka Battalion of Slobidska Ukraine** (Haidamatskyi Kish Slobidskoi Ukrainy). Military unit formed in Kiev during December 1917 by S. \*Petliura, who became its first commander. Initially composed of one infantry battalion and one artillery battery with a total strength of 300, it played a prominent role in the battle for Kiev during January and February 1918. Many of its first members were students from local military schools. In March 1918 the unit was incorporated into the Zaporozhian Corps as the 3rd Haidamaka Infantry Regiment under Col V. Sikevych. In June 1919 it was transformed into a brigade consisting of four infantry battalions and other units under Otaman O. Volokh. Later that year the unit, under Volokh's influence, mutinied against the UNR and acted independently until its destruction in 1920.

**Haidamaka Cavalry Regiment** (Haidamatskyi kinyi polk im. K. Hordiienka). The first regular cavalry unit of the Army of the UNR. It originated within the Turkestan Division of the Russian army in southwestern Volhynia in late 1917 under Col V. Petriv. During January 1918 it fought its way to Kiev and participated in combat defending the Central Rada. In March 1918 the regiment

was incorporated into the \*Zaporozhian Corps and remained part of it until the war for Ukrainian independence ended.

**Haidamaka Units of the Army of the UNR.** Military formations that arose in 1917 either as a result of the officially sanctioned Ukrainianization of certain units of the Russian army, or in a spontaneous, revolutionary manner, against the will of the Russian commanders. Most of the haidamaka units disintegrated with the collapse of the Russian army. Others – such as the haidamaka battalions in Katerynoslav and Odessa, the haidamaka companies in Uman and Oleksandrivske, and the haidamaka company formed in the Finland Division of the Russian army – took part in battles with Bolshevik forces in December 1917. They were routed with heavy losses and ceased to exist. Only two haidamaka formations were incorporated within the regular Ukrainian army in February 1918: the \*Haidamaka Battalion of Slobidska Ukraine and the K. Hordiienko \*Haidamaka Cavalry Regiment.

**Haidamaka uprisings** (Haidamachchyna). Eighteenth-century popular rebellions against the social, national, and religious oppression of the Polish regime in Right-Bank Ukraine.

As corvée obligations and the abuse of power by Polish magnates and nobles and their Jewish stewards in Ukraine increased, disaffection among the common people grew; serfs, other peasants, impoverished Cossacks, artisans, petty burghers, and agricultural colonists fled from their oppressors into the steppes or forests. There they formed bands of \*haidamakas, which moved swiftly from one area to another to attack their unwary enemy and disappeared again into the wilds. Zaporozhian Cossacks played leading roles as organizers of the rebel bands, which plundered and burned towns and nobles' estates, killing Roman Catholic and Uniate clerics, nobles and their agents, Jewish stewards, innkeepers, and money lenders, thereby inflicting heavy economic losses on the latifundia system. The Poles reacted by further repressing the peasantry. Haidamakas who were captured were tortured and cruelly executed. Yet the haidamakas' call for a land free from Poles, Jews, and landlords, for the abolition of serfdom, and for the free exercise of the Orthodox faith found sympathy among the peasantry and many Orthodox monks, who often provided them with shelter, supplies, and hiding places. The small Polish army in Ukraine and the magnates' household militias (consisting of Cossacks who often switched sides) found it hard to counteract them, and haidamaka raids became more and more common, thus turning into mass uprisings that covered the entire breadth of Right-Bank Ukraine.

The first general insurrection broke out in 1734 during the war for the Polish throne after the death of Augustus II. Russian troops, which had been sent to depose King \*Stanisław I Leszczyński, were viewed as the harbingers of liberation from Polish oppression, and the masses of the Kiev region rebelled. The uprising quickly spread to Podilia and part of Volhynia, where it became particularly violent. \*Verlan, the former captain of the Lubomirski family's Cossack militia in Sharhorod, became the supreme commander of the rebel army. Other leaders included S. \*Chaly, who eventually betrayed the hai-

damakas, M. \*Hryva, I. Medvid, M. Motorny, and Py-sarenko. In summer 1734 the haidamakas captured several towns, including Vinnytsia, Zhvanets, Kremianets, Brody, and Zbarazh, and penetrated as far as Kamianets-Podilskyy and Lviv. The uprising was crushed by the intervention of Russian troops, after Augustus III ascended the Polish throne. Thereafter smaller haidamak rebellions continued for some time (see H. \*Holy).

The second major uprising broke out in 1750 without an external stimulus, but simply as a result of the movement's increased popular support. Having organized themselves on the territory of the Zaporozhian Cossacks, the haidamakas crossed into the southern part of the Kiev palatinate. Led by M. Sukhy, P. Taran, O. Pysmenny, I. Pokoliaka, M. Teslia, Mochula, and others, they roused almost the entire populace of Right-Bank Ukraine to revolt. They captured Uman, Vinnytsia, Chyhyryn, Khvastiv, Liatychiv, Korsun, Trakhtemyriv, and other towns before the uprising was suppressed by the combined Polish noble forces of Kiev, Podilia, and Volhynia palatinates. Failure of the revolt can be attributed to the lack of co-ordination among the various haidamaka detachments, of a general plan of action, and of a common leader.

The largest and bloodiest haidamaka uprising, known as the \*Koliivshchyna, broke out in 1768 in the Kiev and Bratslav regions and spread to Podilia, Volhynia, and even Subcarpathia. It was sparked by the appearance in Right-Bank Ukraine of Russian troops, sent to suppress the anti-Russian Polish noble Confederation of \*Bar. The main leaders of the uprising were the Zaporozhian Cossack M. \*Zalizniak and the captain of the Uman Cossack militia, I. \*Gonta. Many towns were captured by the rebels, and their Polish and Jewish inhabitants were slaughtered. Again, the Poles managed to crush the uprising only with the help of Russian troops.

After 1768 haidamaka uprisings in Right-Bank Ukraine declined. Such later revolts as that led by U. \*Karmaliuk, however, were not unlike the earlier ones. The haidamakas and their uprisings have been preserved in the collective memory in the form of legends and folksongs. The haidamakas, and particularly the Koliivshchyna, have been presented in a heroic light in the works of T. Shevchenko, members of the Ukrainian School in Polish literature, and such Soviet writers as I. Kocherha, M. Mushketyk, and M. Syrotiuk. They were also idealized to some extent by Ukrainian populist historians of the 19th century.

B. Krupnytsky, A. Zhukovsky

**Haidamaky.** Radical left-wing political organization in the United States founded in 1907 with headquarters in New York and chapters in a number of cities. It published its own periodical, *Haidamaky* (1909–16), which gradually changed from a monthly to a weekly, under the editorship of M. Zhandoga, A. Petriv, and Ya. Kor-nat. In 1910 the organization began to provide relief and insurance services for its members. By 1914 its membership was close to 1,000. The president was I. Boro-daikevych. As a national organization it was dissolved in 1918, although its Trenton chapter continued to operate until 1925. Most of its chapters joined the Ukrainian Workingmen's Association, while some joined pro-communist organizations.

**Haidamaky.** A popular weekly newspaper of a nationalist and democratic character that appeared in Lviv from October 1902 to 1907. The publisher was the teacher M. Petrytsky, and the editors were M. Petrytsky and A. Sembratovych (1904).

**Haidarivsky, Vasyl** [Hajdarivs'kyj, Vasyl'] (pen name of V. Haivoronsky), b 1 December 1908 in Kostiantynivka, in the Donbas, d 13 November 1972 in Philadelphia. Writer. A member of the literary group Zaboï and the All-Ukrainian Association of Proletarian Writers, in 1933 he was exiled but escaped and lived in hiding in Caucasia. In 1944 he moved to Lviv, and after the war he immigrated to the United States. Many of his stories appeared in Soviet, West Ukrainian, and émigré periodicals. He is the author of the story collection *A sviit takyi harnyi* (And the World Is So Beautiful, 1962) and the novellas *Puhachiv's'ka rudnia* (The Puhachiv Mine, 1933), *Shche odno kokhannia* (One More Love, 1946), and *Zaiachyi pastukh* (The Hare Herder, 1962).

Stepan Haiduchok

Hryhorii Haievsky

**Haiduchok, Stepan** [Hajdučok], b 13 March 1890 in Pidtemne, Lviv county, d 16 March 1976 in Lviv. Physical education instructor and leading figure in the sports movement in Western Ukraine. A follower of I. \*Bobersky, he organized fitness programs and hiking clubs;

he was one of the first promoters of skiing and skating in Western Ukraine and wrote textbooks and numerous articles on physical education.

**Haïenko, Fedir** [Hajenko], b 6 June 1906 in Myshuryn Rih, Verkhnodniprovske county, Katerynoslav gubernia, d 13 December 1983 in Neu-Ulm, Germany. Political leader, journalist, economist. He graduated from the Kharkiv Institute of the National Economy in 1936. After the Second World War he lived in Austria and from 1952 in Germany. A leading member of the Ukrainian Revolutionary Democratic party, he served as its general secretary (1963–7) and editor in chief of its weekly *Ukrain-s'ki visti* (1973–8). For many years (1953–69) he sat on the Presidium of the Ukrainian National Council. He was a founding member of the Congress of Free Political Thought (1972–6) and a research associate of the Institute for the Study of the USSR (1954–71). His analytical articles on developments in the USSR, and particularly in Ukraine, appeared in various journals and newspapers, including *Vestnik po izucheniiu sssr*.

**Haïevsky, Hryhorii** [Hajevs'kyj, Hryhorij], b 26 January 1872 in Tulchyn, Bratslav county, Podilia gubernia, d 1933 in Kiev. Stage director and educator. From 1904 he taught at the Lysenko Music and Drama School in Kiev and later at the Kiev State Art Institute and other higher schools. He directed plays at the Ukrainian National Theater in Kiev (1917–18) and at the Mykhailchenko Theater in Kiev in the 1920s. Among his published works are a study *Zavdannia rezhysera* (The Task of a Stage Director, 1920) and Ukrainian translations and adaptations of works by S. Maugham and U. Sinclair.

**Haïevsky, Sylvestr** [Hajevs'kyj, Syl'vestr] (secular name: Stepan), b 9 January 1876 in Mykhyryntsi, Starokostiantyniv county, Volhynia gubernia, d 9 September 1975 in Melbourne. Specialist in Ukrainian studies, pedagogue, and archbishop of the Ukrainian Autocephalous Orthodox church (UAOC); full member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences. He completed philological studies at Kiev University in 1912. From 1918 to 1919 he served as vice-chancellor and then as director of the general department of the State Chancellery of the UNR. In 1921 he was appointed professor of Kamianets-Podilskiy Ukrainian State University. He was arrested in 1922 and again in 1932. After his second release he spent two years in Kazakhstan and Uzbekistan and then taught at pedagogical institutes in Ukraine. On 16 May 1942 he was consecrated bishop of Lubni Eparchy. In 1949 he immigrated to Australia, where he served as acting bishop and archbishop of the UAOC for Australia and New Zealand until 1963. His chief works are *'Aleksandriia' v davnii ukrains'kii literaturi* ('Alexandria' in Old Ukrainian Literature, 1929), *Tserkovnyi ustrij v Ukraini* (The Structure of the Church in Ukraine, 1946), *Zapovit Mytropolyta P. Mohyly* (The Testament of Metropolitan P. Mohyla, 1947), *Frankiv 'Moisei'* (Franko's 'Moisei,' 1948), and *Berestejs'ka Uniiia 1596 roku* (The Union of Berestia in 1596, 1963).

**Haïevsky, Valentyn** [Hajevs'kyj] (pseuds: Vasyl Halaida, V. Hlushko, V. Horenko, Tahorenko), b 29 July 1902 in Kiev. Specialist in the history of Ukrainian theater, drama critic, pedagogue; son of Hryhorii \*Haïevsky.

A graduate of Kiev University (1935) and the Kiev Theater Institute (1940), he lectured at the latter (1938–43). During the war he emigrated to Germany and in 1950 settled in the USA. His publications include studies of T. Shevchenko's association with M. Shchepkin (1939), P. Saksahansky as stage director (1939), the actor H. Yura (1940), and sketches on modern Ukrainian theater (1940), as well as over 80 articles and reviews.

Haimanova mohyla: silver embossed, engraved, and gilded cup with a frieze depicting Scythian warriors, 4th century BC

**Haimanova mohyla.** A large Scythian royal kurhan of the 4th century BC situated near Balky, Vasylivka raion, Zaporizhia oblast. It was excavated in 1969–70 by V. Bidzilia. Remnants of carts and a burial feast, four burials with seven human skeletons, over 250 gold ornaments, and numerous iron, bronze, wood, bone, and clay artifacts and weapons were unearthed. The most noteworthy find was a gilded silver cup with a frieze depicting Scythian warriors.

Haimanova mohyla: stamped gold plaques depicting maenads, 4th century BC

**Haisyn** [Hajsyn]. v-10. City (1971 pop 23,725) on the Sob River in eastern Podilia and a raion center in Vinnytsia oblast. First mentioned in 1545, from 1797 to 1917 it was a county town in Podilia gubernia. In spring 1919

Otaman A. \*Volynets's partisans fought the Bolshevik Tarashcha Division in the Haisyn region. In fall 1919 the Ukrainian Sich Riflemen Brigade and units of the UNR Army fought the Fourth Corps of A. Denikin's Volunteer Army on the Huncha-Hraniv-Marianivka-Tymar-Ziatkivtsi front. The Haisyn-Bratslav partisan brigade was organized there by Otaman Volynets in the spring of 1920. Foodstuffs, kitchenware, alcohol, furniture, bricks, and clothing are produced in the city.

**Haivas, Yaroslav** [Hajvas, Jaroslav], b 8 January 1912 in Sosnivka, Zolochiv county, Galicia. Civic leader and political activist. Haivas was a member of the national executive of the OUN in Western Ukraine (1937–9). After the split in the OUN he joined the Melnyk faction, with which he remained until 1972. During the German occupation of Ukraine, he was a leading member of the national executive of the OUN in Reichskommissariat Ukraine (1941–4). He immigrated to Germany in 1945 and to the United States in 1950. He is the author of two memoirs, *Koly kinchaiet'sia epokha* (On the Threshold of a New Era, 1964) and *Volia tsiny ne maie* (Freedom Has No Price, 1972).

**Haivazovsky, Ivan.** See Aivazovsky, Ivan.

**Haivoron** [Hajvoron]. v-10. Town (1970 pop 14,400) and raion centre in Kirovohrad oblast, situated on the Boh River. A railway junction, it has a granite quarry and machine-building tekhnikum. The 6th-century \*Haivoron settlement was excavated nearby in 1960.

**Haivoron settlement.** An ancient Slavic iron-working center discovered on an island in the Boh River near the town of Haivoron in Kirovohrad oblast. Excavation done in 1960–1 by V. Bidzilia revealed that the settlement was active in the 6th and 7th centuries AD. The dig uncovered 25 iron-smelting furnaces, a semi-pit dwelling, storage pits, tools, pottery, various objects of daily use, and ornaments.

Mykhailo Haivoronsky

Anatol Hak

**Haivoronsky, Mykhailo** [Hajvorons'kyj, Myxajlo], b 15 September 1892 in Zalishchyky, Galicia, d 11 September 1949 in New York. Conductor and composer. A graduate of the Lysenko Higher Institute of Music in Lviv, he organized and conducted the Ukrainian Sich Riflemen Band (1914–19) and then served as chief bandmaster of

the UNR Army. From 1920 he taught music and conducted various choirs in Lviv. In 1923 he immigrated to the United States, where he founded (1930) and conducted the United Ukrainian Chorus. He composed many Sich Riflemen songs, choral works, church music, and instrumental music for violin, string orchestra, band, and symphony orchestra. He also arranged many folk songs and compiled a number of songbooks. A monograph on him by W. Wytwycky appeared in New York in 1954.

**Hajdúdorog eparchy.** Greek Catholic eparchy set up in 1912 by Francis Joseph I under pressure from the Hungarian government and confirmed by Pius X. Its first seat was the town of Hajdúdorog in northeastern Hungary. Its faithful are Hungarian Catholics of the Eastern rite, primarily descendants of Magyarized Transcarpathian Ukrainians who lived in formerly Ukrainian ethnic territories or in pockets scattered among the Hungarian majority. (See \*Hungary and \*Transcarpathia.)

At first the Hajdúdorog eparchy encompassed 162 parishes, eight of which were transferred from the Prešov eparchy, 70 from the Mukachiv eparchy, and 83 from Rumanian eparchies in Transylvania. After 1919 most of the Rumanian eparchies became part of Rumania; hence, the eparchy consisted mostly of former Ukrainian parishes. At present the eparchy has 126 parishes, 170 priests, and about 300,000 faithful. The first bishop of Hajdúdorog eparchy was I. Miklossi and his successor was M. Dudás. Since 1975 the bishop has been I. Timkó. The present seat of the eparchy is Nyiregyháza.

**Hak, Anatol** (pen name of Ivan Antypenko; other pen names: Osa, Antosha Ko, Martyn Zadeka), b 20 June 1893 on a khutir near Huliai Pole, Katerynoslav gubernia, d 4 December 1980 in Philadelphia. Writer and feuilletonist. Hak was first published in a tsarist army newspaper in 1917 while serving on the Rumanian front. In the 1920s he belonged to the writers' association \*Pluh and was published in various periodicals, including *Selians'ka pravda* in Kharkiv. Emigrating at the end of the Second World War, he contributed to the émigré press in Germany and, from 1949, in the United States. Hak's numerous feuilletons and satirical sketches were aimed both at the Soviet regime and at the émigrés. He is the author of nine collections of humorous stories, including *Lopans'ki raky* (The Crabs of Lopan, 1926), *Radio-invalidy* (Radio-Invalids, 1927), and *Parazyty pid mikroskopom* (Parasites under a Microscope, 1930); the novel *Moloda nappruha* (The Young Force, 1933); several plays, including *Studenty* (Students, 1924), *Rodyna patsiukiv* (A Family of Rats, 1927), and *Spadkoiemtsi misis Pylipson* (The Inheritors of Mrs Pilipson, 1977); the feuilleton collections *Mizhplanetni liudy* (The Interplanetary People, 1947) and *Na dvokh trybunakh* (On Two Tribunals, 1966); and the book of memoirs *Vid Huliai-Polia do N'iu-lorku* (From Huliai-Pole to New York, 1973), which contains a wealth of information about the literary world of the 1920s in Soviet Ukraine.

D.H. Struk

**Hakkebush, Liubov** [Hakkebuš, Ljubov], b 26 September 1888 in Nemyriv, Bratslav county, Podilia gubernia, d 28 May 1947 in Kiev. Prominent stage actress and teacher. She studied at the Moscow Kamernyi Thea-

Liubov Hakkebush

Bishop Yevhen Hakman

ter and appeared in amateur productions staged by the Kobzar Ukrainian club in Moscow. She first appeared on the Ukrainian stage in 1918 at the State National Theater in Kiev. From 1918 to 1926 she worked in Kiev at the State Drama Theater, the First Theater of the Ukrainian Soviet Republic, and under the direction of L. Kurbas in the Kiev Drama Theater (\*Kyidramte) and the \*Berezil theater. She then worked at the Ukrainian drama theaters of Odessa (1926–8, 1939–41), Kharkiv (1928–33), and Staline (Donetske, 1933–9). She also taught acting at the theaters, the music and drama institutes of Kiev (1922–6), Odessa (1926–8), and Kharkiv (1929–33), and the Kiev Institute of Theater Arts (1944–7). She appeared in over 80 leading and supporting roles in such plays as H. Ibsen's *Vikings at Helgeland*, M. Kulish's *Komuna v stepakh* (Commune in the Steppes), C. Goldoni's *La locandiera*, and Molière's *Le Bourgeois gentilhomme*. Most memorable were her renditions of Lady Macbeth in *Macbeth* and Fru Alving in Ibsen's *Ghosts*. Hakkebush's life and career are described in N. Yermakova's *Aktors'ka maisternist' Liubovy Hakkebush* (The Thespian Mastery of Liubov Hakkebush, 1979).

V. Revutsky

**Hakman, Yevhen**, b 1793 in Vaslovivtsi, Zastavna county, Bukovyna, d 31 March 1873 in Chernivtsi. Orthodox bishop of Bukovyna from 1834 to 1873. Hakman introduced improvements in the life of the Ukrainian Orthodox in Bukovyna. During his administration Ukrainian became the second language of the Bukovynian diocese in 1838; the educational level of the clergy was raised through the appointment of qualified theology professors; the diocese was reorganized into 12 proto-presbyteries; and clergymen were granted regular salaries. In 1848 and 1849 he supported Rumanian and German petitions to the Austrian government to grant political autonomy to Bukovyna by separating it from Galicia, but opposed Rumanian efforts to create a Rumanian metropolitanate of Bukovyna, Transylvania, and the Banat. When Bukovyna was made into an autonomous crownland in 1861, he became the first marshal of the Bukovynian Diet. At the Orthodox synod in Karlovci, Slavonia, in 1864 and through his pastoral letter of 1865, he successfully opposed efforts to have his diocese subordinated to the newly created Rumanian metropolitanate of Transylvania. It was on Hakman's initiative that \*Ruska

Besida, the first Ukrainian civic organization in Bukovyna, was founded in 1869. In January 1873, because of his efforts the diocese became a metropolitanate, and Hakman became the first metropolitan of Bukovyna and Dalmatia. The Orthodox cathedral and the metropolitan's residence built by his orders in Chernivtsi now house Chernivtsi University. He is the author of *Nationale und Kirchliche Bestrebungen der Rumänen in der Bukowina 1848–1865* (1889). His pastoral letters were published in 1899 by S. Smal-Stotsky.

R. Yanchinski

Mykola Halahan

**Halahan, Mykola**, b 1882 in Trebukhiv, Oster county, Chernihiv gubernia, d ? Political and community leader, publicist. A physicist by profession, Halahan was a member (1903–5) of the Revolutionary Ukrainian party and then of Spilka. In 1917 he joined the Ukrainian Social Democratic Workers' party and became a representative of the Central Rada in the Kuban and then in Rumania (1918). During the Directory he led the Ukrainian diplomatic mission in Hungary. He immigrated to Vienna, where he headed the Ukrainian Relief Committee, and then to Prague. There he directed the Ukrainian Community Publishing Fund, organized and headed the Ukrainian Civic Committee in Czechoslovakia (1927–39), and taught at the Ukrainian gymnasium. He is the author of memoirs in four volumes (1930), books on social and political themes, and works on physics. After 1945 his fate is unknown.

**Halaichuk, Bohdan** [Halajčuk] (Halajczuk), b 21 July 1911 in Uhersko, Stryi county, Galicia, d 31 July 1974 in Buenos Aires. Specialist in international law, publicist, Catholic activist; full member of the Shevchenko Scientific Society and of the Ukrainian Academy of Arts and Sciences. He studied at the Catholic University of Louvain and Innsbruck University (PH D 1946). In 1949 he immigrated to Argentina. Appointed professor of international law at the Catholic Pontifical University of Argentina in 1959, he directed the Institute of Soviet Studies, which he helped to organize. In the 1970s he served as president of the Ukrainian Catholic Alliance and director of a branch of the Ukrainian Catholic University in Buenos Aires. Besides numerous journal and newspaper articles, he wrote books in international law and political science: *Los estados conquistados ante el derecho internacional* (1950), *El estado ucranio del siglo 20* (1953), *Natsiia ponevolena, ale derzhavna* (A Subjugated, but State-Possessing

Nation, 1953), and *Historia de la organización política de Europa Oriental* (1972). In his legal works he defended the view that Soviet Ukraine is a subject of international law.

**Halan, Anatol** (pen name of A. Kalynovsky; other pen names: I. Eventualny, A. Chechko), b 22 August 1901 in Zemlianka, Hlukhiv county, Chernihiv gubernia. Writer and journalist. From 1924 his stories were published in Soviet Ukrainian journals. He ceased writing in 1933 and resumed only in 1946 in Austria, from where he emigrated to Argentina and then to the United States. His first poetry collection (1930) and first play (1932) were followed by eight collections of stories, three novellas, a novella in verse, a poetry collection, three collections of satires, two volumes of memoirs, and a play. Halan's prolific output is often satirical or humorous and marked by a journalistic facility and emphasis on plot at the expense of psychological depth.

**Halan, Yaroslav**, b 27 July 1902 in Dynów, Brzozów county, Galicia, d 25 October 1949 in Lviv. Communist journalist and writer. Before Galicia's incorporation into the Soviet Ukraine Halan was a member of the literary group \*Horno and a contributor to the Lviv Sovietophile journal \**Vikna*. First published in 1927, he is the author of propaganda plays – *Vantazh* (Cargo, 1928), *Veronika* (1930), *Pid zolotym orlom* (Under the Golden Eagle, 1948), and *Liubov na svitanni* (Love at Dawn, 1949) – and socialist-realist stories and pamphlets, many of them aimed against the Ukrainian nationalist and independence movement and the Ukrainian Catholic church. His pro-Soviet activities before and after the Second World War led to his assassination by Ukrainian nationalists. His life and death have been effectively exploited by the Soviet regime in its attacks on 'Ukrainian bourgeois nationalism.' Since 1964 the Halan prize has been awarded by the Writers' Union of Ukraine for the best propagandistic journalism. Halan's works in three volumes were published in Kiev in 1977–8.

**Halecki, Oskar**, b 26 May 1891 in Vienna, d 17 September 1973 in White Plains, New York. Polish historian and political figure. While a professor at Warsaw University (1918–39), he served as a historical expert in the Polish delegation at the Paris Peace Conference (1919). His report *Les Relations entre la Pologne et les terres lithuaniennes et ruthènes avant les partages* (1919) to the peace conference supported Polish territorial claims. In 1940 he moved to the United States, where he taught East European history at Fordham University (1944–61). He is the author of many works on medieval and early modern Polish history, including *From Florence to Brest, 1439–1596* (1958), which stresses the 'civilizing mission' of Polish Catholicism in Eastern Europe and Ukraine. His main contribution to Ukrainian historiography is *Przylączenie Podlasia, Wołynia i Kijowszczyzny do Korony w roku 1569* (The Annexation of Podlachia, Volhynia, and the Kiev Region to the [Polish] Crown in 1569, 1915).

**Haliakhovsky, Danylo** [Haljaxovs'kyj], b and d? Noted engraver. A graduate of the Kievan Mohyla Academy, he worked in Kiev from 1674 to 1709. His best-known works are two panegyric prints dedicated to metropolitans V. Yasynsky and Y. Krokovsky, a large announce-

ment of a debate at the Kievan Mohyla Academy dedicated to I. Mazepa (1708; the unique *teza* displays the hetman's portrait and is preserved at the Krasin'ski Library in Warsaw), and an engraving of John the Evangelist in the Bible of the Kievan Cave Monastery (1707).

Mykhailo Halibei

Teodot Halip

**Halibei, Mykhailo** [Halibej, Myxajlo], b 22 August 1885 in Yezupil, Stanyslaviv county, Galicia, d 27 June 1964 in Oakland, California. Artisan, entrepreneur, and civic leader. He was a Ukrainian National Democratic party delegate at the Labor Congress in Kiev in 1919 and a member of the Ukrainian National Council of the Western Ukrainian National Republic and of the central committee of the Ukrainian National Democratic Alliance (1928–39). In the interwar years he owned a ceramic-tile works in Lviv and was active in many civic organizations including the Zoria association, the Burgher Brotherhood (cofounder and secretary, 1920–30), and the Ridna Shkola and Prosvita societies. He was a member of the board of directors of the Sokil-Batko athletic association (1920–8), the Dilo publishing association (1928–39), and various banks, co-operative associations, schools, and hospitals. He wrote several articles on the history of Lviv's Ukrainian burghers in the newspaper *Dilo*. From 1948 he lived in the United States, where he was active in community organizations.

**Halich, Wasyl** [Halyč, Vasyl'], b 6 April 1896 in Strilbychi, Sambir county, Galicia. Historian and community leader in the United States. He received his PH D from the University of Iowa in 1934 and was a professor of history at the University of Wisconsin in Superior from 1946 to 1966. He is a full member of the Shevchenko Scientific Society. He is a pioneer of studies on Ukrainians in the United States and author of *Ukrainians in the United States* (1937, 1974).

**Halip, Teodot**, b 19 June 1873 in Voloka, Vashkivtsi county, Bukovyna, d 6 April 1943 in Brno, Czechoslovakia. Lawyer, civic and political leader in Bukovyna, writer and publicist. Halip was the president of the Sich Union (1904–14) and the leader of the Ukrainian Radical party in Bukovyna (1906–18). In 1911 he was elected to the Bukovynian Diet. When Rumania occupied Bukovyna in November 1918, he left for Galicia. He sat on the Ukrainian National Rada of the Western Ukrainian National Republic in Stanyslaviv, and later served as a member of the UNR diplomatic mission in Rome. From

1920 he worked as an attorney in Khust and in 1939 moved to Brno. He also lectured on criminal law at the Ukrainian Free University in Prague. Halip is an author of a collection of short stories, *Pershii zori* (First Stars, 1895); two collections of poetry, *Dumy ta pisni* (Thoughts and Songs, 1901) and *Dyka rozha* (Wild Rose, 1919); memoirs (in the newspaper *Krakov's'ki visti*, 1943); and studies of Transcarpathian customary law.

**Halkin, Oleksander**, b 21 July 1914 in Bardianske, Tavriia gubernia, d 22 October 1982. Physicist; full member of the AN URSR from 1965. He began his experimental research at the Ukrainian Physico-Technical Institute in 1937, two years before graduating from Kharkiv University. After the Second World War he resumed work at the same institute. In 1965 he became the director of the AN URSR Physico-Technical Institute at Donetsk and a professor of Donetsk University. His chief publications deal with superconductivity, acoustical properties of solids at low temperatures, dispersion of sound velocity in metals in a magnetic field, and nuclear magnetic resonance. He oversaw the construction of special radiospectrometers for probing nuclear resonance.

**Halkyn, Oleksa**, b 21 September 1866 in Kiev gubernia, d 1940 in Lviv. General staff officer in the Russian army and in 1918 chief of the general staff of the Ukrainian army of the Hetman government. In 1919 Halkyn was a member of the UNR high military council and during 1920–1 he headed the UNR war ministry. He was promoted to lieutenant general. He was arrested by the NKVD in Lviv in 1940 and executed.

**Haller, Józef**, b 13 August 1873 in Jurczyce, near Cracow, Poland, d 4 June 1960 in London. General of the Polish army which was organized in France during 1918. In April 1919 Haller and his army of six infantry divisions arrived in Warsaw with Allied directives to operate against the Red Army. However, his divisions engaged the Ukrainian Galician Army in intensive combat during May–July and succeeded in pushing it out of Galicia into central Ukraine. On 1 June 1919 Haller was promoted to full general, and he continued to hold key positions in the Polish army until 1926.

**Hallstatt culture.** An archeologically defined culture of the Late Bronze Age and the Early Iron Age (ca 10th–5th centuries BC). The name is derived from a burial ground discovered in 1846 near the town of Hallstatt in southwestern Austria, where objects characteristic of the period were first identified. The culture was spread throughout south-central Europe and has been identified with the Celts and Illyrians. These groups were engaged in agriculture, animal husbandry, ceramic production, and the mining of salt, copper, and iron. Their semi-fortified settlements consisted of surface and semi-pit dwellings.

**Halpern, Yakiv** [Hal'pern, Jakiv], b 1 January 1876 in Vilnius, d 22 December 1941 in Dnipropetrovske. Surgeon. A graduate of Kiev University (1899), he taught at the Dnipropetrovske Medical Institute from 1922 and edited (1921–41) the medical journal *Novyi khirurgicheskii arkhiv*. He wrote a number of works on stomach and digestive-tract surgery, and on blood transfusion.

Mykhailo Halushchynsky

Tyt Teodosii Halushchynsky

**Halushchynsky, Mykhailo** [Haluščyns'kyj, Myxajlo], b 26 September 1878 in Zvyniach, Chortkiv county, Galicia, d 25 September 1931 in Lviv. Political and cultural leader, pedagogue. After completing his studies in Lviv and Vienna he taught secondary school in Zolochiv until he became director of the Ridna Shkola gymnasium in Rohatyn in 1910. During the First World War, he was an officer of the Ukrainian Sich Riflemen (uss) and then a uss liaison officer at the Austrian High Command. After the war he taught at the Lviv (Underground) Ukrainian University. From 1923 to 1931 he was president of the Prosvita society in Lviv and editor of its educational magazine *Zhyttia i znannia*. A candidate of the Ukrainian National Democratic Alliance, in 1928 he was elected to the Polish Senate and served as its vice-president. He wrote a book of memoirs – *Z Ukraïns'kymy Sichovymy Stril'ctsiamy* (Among the Ukrainian Sich Riflemen, 1934) – and a number of pedagogical works.

**Halushchynsky, Tyt Teodosii** [Haluščyns'kyj], b 13 April 1880 in Buchach, Galicia, d 31 August 1952 in Mundare, Alberta. Priest, biblical scholar, and church historian; brother of M. \*Halushchynsky. After studying philosophy and theology at the universities of Lviv, Fribourg, Vienna (D TH, 1906), and Innsbruck, he taught at the Stanyslaviv Theological Seminary. He took monastic vows in 1908 and was appointed lecturer at Lviv University (1915) and at the Greek Catholic Theological Seminary (1920), where he also served as rector (1920–5). He was a founding member and president (1923–6) of the Ukrainian Theological Scholarly Society. In 1931 he became the spiritual adviser at St Josaphat's College in Rome. In 1949 he was elected archimandrite of the Basilian order of monks and appointed consultator to the Sacred Congregation for the Oriental Churches. Besides numerous articles on public affairs, philosophy, and theology, Halushchynsky wrote *Istoriia bibliina Staroho Zavita* (Biblical History of the Old Testament, 3 vols, 1914–34) and *De urbis Babel exordiis ac de primo in terra Sinear regno* (1917), and edited *Acta Innocentii PP. III (1198–1216) A Registris Vaticanis* (1944).

**Halych** [Halyč]. IV-3. City (1971 pop 4,800) at the confluence of the Lukva and Dniester rivers, raion center of Ivano-Frankivske oblast. It arose in the 14th century,

some time after the Mongols destroyed princely Halych, on the site of the city's river port 5 km north of the city. By the middle of the century the town and the surrounding territory were annexed by Poland. In 1367 Halych was granted the rights of Magdeburg law and soon a castle was built to protect it against the Tatars. From the 14th century it was the see of the \*Halych metropoly and from 1375 the see of a Latin-rite Catholic diocese. By the 16th century the town was one of the larger trade centers in eastern Galicia. Many of its inhabitants joined B. Khmelnytsky's rebellion. In the second half of the 17th century the castle and part of the town were destroyed by the Tatars. Henceforth Halych remained an insignificant small town. In 1772 it was acquired by Austria in the first partition of Poland. It revived somewhat toward the end of the 19th century with the construction of a railway line linking it with Lviv, Stanyslaviv, and Chernivtsi. In June 1915 the Ukrainian Sich Riflemen pushed the Russian army out of Halych. In the summer of 1919 the city witnessed several battles between the Third Corps of the Ukrainian Galician Army and the Poles. Halych's

14. Church of the Resurrection

most valuable architectural monuments are the Nativity Church (built at the turn of the 14th century and restored in 1825) and the remnants of the castle.

**Halych, princely.** City located at the site of present-day \*Krylos, dating back to the turn of the 9th century. An important trade and cultural center of medieval Rus', it reached the height of its power in the second half of the 12th century. The suburbs or lower town, the location of the city's river port, is now the site of modern \*Halych; monasteries, churches, and small fortified settlements were also located on the city's outskirts. From 1144 it was the capital of Yaroslav Osmomysl's Principality of Galicia, and from 1199 the capital of Roman Mstyslavych's Principality of \*Galicia-Volhynia. In 1238 Danylo Romanovych established his residence at Halych. Three years later the city was razed by the Mongols.

Archeological excavations of the city began in the early 20th century and continued into the 1950s. The remains of the Dormition Cathedral (built in 1157), the city walls, castle moats, and many stone buildings of the lower town have been uncovered, as have Yaroslav Osmomysl's sarcophagus and skeleton and an abundance of metal, ceramic, and glass products. At Shevchenkove village nearby the remains of St Panteleimon's Church (built in 1200) have been excavated.

Halych Gospel (1144)

**Halych Gospel (1144).** The oldest extant dated text written in Western Ukraine and the oldest extant tetraevangelium written in Ukraine. The text comprises 260 folios, of which folios 229–260 were added later, in the 12th or 13th century. The text was copied from a south Slavic source; the scribe introduced some features of the local dialect. The manuscript is preserved at the Moscow History Museum. It has been published in two not-quite-reliable volumes by Archimandrite Amfilokhii (Moscow, 1882–3). Its language has been studied by V. Jagić (1884), V. Le-Juge (1897), and E. Blokhina (1976).

**Halych Gospel.** A gospel written in Old Ukrainian between 1266 and 1301, most likely in 1288. An aprakos-evangelium of 175 folios, it was copied by the Presbyter Georgii in or near Halych from a Bulgarian original. The manuscript is preserved at the Leningrad Public Library. Fragments of it were published by A. Sobolevsky (1884), who also studied the language of the text.

**Halych metropolity.** A metropolity of the Ukrainian church established in 1303 in the city of Halych. From around 1156 Halych had been the see of Halych eparchy, for which a cathedral was built in 1157. When in 1299 the Kievan metropolitan Maximos transferred his see to Vladimir on the Kliazma, Prince Lev Danylovych of Galicia-Volhynia demanded the creation of a metropolity in his principality. Lev was concerned that the Kievan metropolitan would be under the influence of the Suzdal princes, and that he would be unable to devote attention to his distant eparchies. But it was only during the reign of Lev's son, Prince Yurii Lvovych, that the Byzantine emperor, Andronicus II Palaeologus, issued a bull and Patriarch Athanasios of Constantinople a charter granting the establishment of the Halych metropolity. At first it consisted of five eparchies: Volodymyr, Peremyshl, Lutske, Turiv, and Kholm. Little is known about the first metropolitan, Niphont. He was succeeded by Petro, who was consecrated metropolitan of Kiev, Halych, and all Rus' (1308–26), with residence in Moscow (see \*Church, history of the Ukrainian). The third metropolitan, Gabriel, died shortly after his consecration. This initiated a period of crisis as the new metropolitan of Kiev, Theognostos, attempted to suppress the rival metropolity and consecrated Gabriel's successor Theodore as only the bishop of Halych. Theodore appealed to Patriarch John Calecas, and for a brief period succeeded in acquiring the Halych see. Finally in 1347 the Kievan metropolitan, supported by Prince Simeon of Moscow, prevailed upon the new emperor John Cantaczenus to formally abolish the Halych metropolity; in 1355 its eparchies were transferred to the newly created metropolity of Lithuania and Volhynia.

In 1370 the Polish king, Casimir II, fearing the growing Lithuanian influence in Galicia-Volhynia, dispatched a candidate named Antonii to Patriarch Philotheos for consecration as metropolitan of a renewed and autonomous Halych metropolity. The patriarch agreed, and Antonii served as metropolitan from 1371 to 1391, but with responsibility for only three eparchies. Upon Antonii's death, the Polish king Jagiełło tried to have Ivan, bishop of Lutske, named as his successor, but this time the nomination was not confirmed by the patriarch. Instead, in 1401 the Lithuanian metropolitan, \*Cyprian, was confirmed as metropolitan of Kiev, Halych, and All-Rus'. At that time the Halych metropolity ceased to exist (in 1406 the eparchy too was disbanded), and responsibility for local administration was given to vicars, appointed first by the Kiev metropolitan and from 1509 by the Roman Catholic archbishop of Lviv, with the approval of the Polish king.

In 1539 the eparchy was re-established when Makarii Tuchapsky became bishop of Halych, Lviv, and Kame-nets, with his see in Lviv. In 1700, under Bishop Y. Shumliansky, the eparchy accepted the Church Union of \*Berestia. After the partitions of Poland, Russian repression of the Uniate church in its newly acquired territories, which included the de facto abolishment of the Uniate metropolity of Kiev, led the Uniate hierarchy to increase its efforts in securing the re-establishment of the Halych metropolity in Austria-Hungary. This was facilitated by the more tolerant religious policies of the Habsburgs. In 1806 Emperor Francis I officially supported these efforts, and on 17 April 1807 Pope Pius VII issued the bull *In Universalis Ecclesiae Regimine* restoring

the Halych metropolity with two eparchies (Lviv and Peremyshl). In 1885 a new eparchy of Stanyslaviv (now part of Lviv archeparchy) was created, and in 1934 the \*Lemko Apostolic Administration was separated from Peremyshl eparchy. The bishop of Peremyshl, A. Anhelovych, was consecrated as the first metropolitan. The Halych metropolitan was accorded the same rights as the metropolitan of Kiev as outlined in the 1596 bull of Pope Clement VIII, *Decet Romanum Pontificem*. A. Anhelovych was metropolitan from 1807 to 1814. He was succeeded by M. Levytsky (1816–58), H. Yakhymovych (1860–3), S. Lytvynovych (1863–9), Y. Sembratovych (1870–82), S. Sembratovych (1885–98), Yu. Sas-Kuilovsky (1899–1900), A. Sheptytsky (1900–44), and Y. Slipy (1944–84), who was arrested by the Soviet authorities in Lviv in 1945 and imprisoned until 1963 when he was permitted to immigrate to Rome. The successor of Y. Slipy, M. Liubachivsky, now resides in Rome. In the 19th and 20th centuries, the Halych metropolity was a major center of the cultural and civic life of Ukrainians in Galicia.

W. Lencyk

**Halych principality.** See Galicia.

**Halychanyn** (The Galician). A semimonthly sociopolitical and literary supplement to the Russophile newspaper *Slovo*. A total of 90 issues were published in Lviv from January 1867 to 1870. The editor and publisher was B. Didytsky. *Halychanyn* appeared in *yazychie*, an artificial mixture of Ukrainian and Russian. Its contents included articles dealing with the history of Ukraine, poetry by such writers as M. Maksymovych, S. Vorobkevych, and K. Ustyianovych, as well as works by the Russian writers I. Turgenev, F. Tiutchev, and others.

**Halychanyn** (The Galician). Daily newspaper published in Lviv from 1893 to 1913 by Russophile Galicians subsidized by the Russian government and supported by the Polish authorities. It replaced \**Halytskaia Rus'*. Its editors (V. Lutsyk, I. Pelekh, O. \*Markov, and others) opposed the Ukrainian national orientation. Semimonthly supplements included *Vienochek* (1904–8), an illustrated children's magazine, and *Lemko* (1911–13), edited by H. Hanuliak and others.

**Halychoruskii vistnyk** (Galician-Ruthenian Herald). The official government newspaper for Ukrainians in the Austrian Empire. It appeared three times a week in Lviv from 2 July 1849 until February 1850. In total, 94 issues were published. It was edited by M. Ustyianovych with the assistance of I. Holovatsky, M. Kossak, and B. Didytsky. In addition to official decrees and edicts, the newspaper published articles on national and international politics, and on Ukrainian affairs, such as problems of the Ukrainian language and orthography (I.

Lozynsky and I. Levytsky) and education. Some literary works, particularly by M. Ustyianovych, were also published, as were biographies, obituaries, and reports from the homeland. In February 1850 its head office was moved to Vienna, and the name of the newspaper was changed to *\*Vistnyk*.

Dmytro Halychyn

Alimpii Halyk: Portrait of a Youth (1750s)

**Halychyn, Dmytro** [Halyčyn], b 30 October 1895 in Dychky, Rohatyn county, Galicia, d 26 March 1961 in New York. Prominent Ukrainian-American community leader. Having served as an officer in the Ukrainian army, he studied foreign trade at the University of Vienna before immigrating in 1923 to the United States. He served as the first president of the United Ukrainian War Veterans of America, sat on the executive of the United Ukrainian Organizations in America, and was active in the Pan-American Ukrainian Conference. He was a founder, vice-chairman (1952–6), and chairman (1956–61) of the Ukrainian Congress Committee of America. For many years he represented the Ukrainian community in the ethnic department of the national committee of the Republican party. His most important contribution was his work as supreme secretary (1933–50) and supreme president (1950–61) of the *\*Ukrainian National Association*. During his term of office the membership of the association grew from 20,000 in 1933 to 79,000 in 1961. The Ukrainian Free University conferred an honorary doctorate in law on Halychyn.

**Halychyna.** See Galicia.

**Halyk, Alimpii**, b ca 1685 in Bohuslav, Kiev voivodeship, d May 1768 in Kiev. Icon painter and engraver. As a member (1724–44) and head (1744–55) of the Kievan Cave Monastery Icon Painting Studio, he took part in painting the interior of the monastery's Dormition Cathedral (1724–31) and the exterior of the Trinity Gate Church (1742–4). He also painted the icons of St Elizabeth's Church and Fortress (1754), of St Cyril's Monastery in Kiev (1759), and of many other churches in the Kiev region. Icon sketches, prints, and portraits bearing his signature have been preserved in the albums of the Icon Painting Studio.

**Halyn, Martyrii**, 1856–1943? Physician; civic leader. Halyn was a medical officer in the Russian army before joining the Army of the UNR during the struggle for Ukrainian independence. A member of the Ukrainian Scientific Society in Kiev, he supervised its work in the area of medical terminology. During the Hetman government of 1918, he was the director of the Terminology Commission of the Ministry of Public Health. In 1920 he immigrated to Rumania. He is the author of *Rosiis'ko-ukraïns'kyi medychnyi slovnyk* (Russian-Ukrainian Medical Dictionary, 1920) and *Medychnyi latyns'ko-ukraïns'kyi slovnyk* (Medical Latin-Ukrainian Dictionary, 1926). He also wrote memoirs (published in the journal *Za derzhavnist'* and separately) and a number of works on surgery.

**Halytskaia Rus'** (Galician Rus'). A Russophile daily newspaper, subsidized by the Russian government, that was published in Lviv from April 1891 to December 1892. It replaced *Chervonaia Rus'* (1888–91), which had been banned. It was edited by O. Avdykovsky and I. Pelekh. A total of 215 issues appeared. In a pastoral letter of 22 December 1892, the Ukrainian Galician episcopate forbade the clergy and the faithful to read and propagate the newspaper. Soon afterwards *Halytskaia Rus'* ceased publication and in its place *\*Halychanyn* began to appear.

**Halytskii Sion.** See *Ruskii Sion*.

**Halytsko-Ruska Matytsia** (HRM). A literary and educational society established in June 1848 in Lviv by the *\*Supreme Ruthenian Council*. Modeled on Serbian (1826), Czech (1831), and other similar predecessors, the HRM fostered schooling and general cultural enlightenment by publishing popular-science literature, grammars, and textbooks. Rev M. Kuzemsky was its first head. In 1850 it had 193 dues-paying members, 69 of whom were priests. In 1861 its statute was ratified. In the 1860s it was taken over by the *\*Russophiles* (Ya. Holovatsky, A. Petrushevych, B. Didytsky, and others), who promoted the use of the artificial, bookish *\*yazychie* language and later even Russian. Consequently, the Galician populists founded the *\*Prosvita* society in 1868. The activity and influence of the HRM declined in the 1880s, but it continued to exist (with periods of inactivity, 1895–1900, 1909–22) until 1939. The HRM published about 60 books (15 in 1848–50, 15 in 1850–61, 26 in 1862–99, 4 in 1900–39). It also published scholarly serials: *Galitskii istoricheskii sbornik* (3 vols, 1853–60), *Naukovyi sbornik* (4 vols, 1865–8), *\*Literaturnyi sbornik* (15 vols, 1869–73, 1885–90, 1896–7), and *Nauchno-literaturnyi sbornik* (8 vols, 1901–2, 1904–6, 1908, 1930, 1934).

I. Myhul

**Hamaliia.** Name of several family lines, probably of different origin, extending back to Cossack times. Mykhailo was the founder of one such line. In 1649 he was registered as a Cossack of Cherkasy company and in 1662 was appointed colonel of Cherkasy regiment by Hetman

Ya. Somko. His sons, Hryhori and Andrii, were prominent Cossack officers. The latter served, at first, as captain of Lohvytsia company and then, under I. Mazepa, as general osaul (1689–94). Andrii's son Mykhailo (d ca 1724) served as captain of Lohvytsia company (1690–3), general standard-bearer (1701–4), acting colonel of Poltava (1705), and general osaul (1707–9). Because of his close ties with Mazepa, after the hetman's defeat he was forced to reside in Moscow until 1715. His brother, Antin (d 1728), was Mazepa's general osaul. In 1712 Antin was exiled to Siberia and then forced to live in Moscow until his death. Ivan (b 17 December 1699, d 21 March 1766), nephew of Mykhailo and Antin, served in various capacities under D. Apostol, and took part in campaigns against Poland and Turkey. In 1750 he became acting colonel of Myrhorod, and in 1762 general judge. Platon Hamaliia (b 28 November 1766, d 21 July 1817), the son of Yakiv, was a seaman and a scholar. A graduate of the Kievan Mohyla Academy and the Naval Academy, he served in the imperial navy and saw action against the Swedes. He began to lecture on naval theory and practice in 1793 and wrote several books on the subject. In 1808 he was elected full member of the Imperial Academy of Sciences.

O. Ohloblyn

Mykola Hamaliia

Serhii Hamchenko

**Hamaliia, Mykola** [Hamalija], b 17 February 1859 in Odessa, d 29 March 1949 in Moscow. Microbiologist and epidemiologist; from 1940 honorary member of the USSR Academy of Sciences, and from 1945 full member of the USSR Academy of Medical Sciences. A graduate of Odessa (New Russia) University (1880) and the Military Medical Academy in St Petersburg (1883), he worked briefly in 1886 under L. Pasteur in Paris. Later that year in Odessa Hamaliia founded, with I. Mechnikov, the first bacteriological station in the Russian Empire and performed the first rabies vaccinations. The succeeding years were devoted to research on rabies, tuberculosis, cholera, and cattle plague. He was a founder of the Bacteriological Institute in Odessa and served as its director (1899–1908). In 1901–2 he combated the plague in Odessa, and then cholera in Transcaucasia, the Volga region, and the Donbas. Hamaliia founded and edited (1910–13) *Gigiena i sanitariia*, the first journal of its kind in the Russian Empire. Then he served as director of the Vaccination Institute in Leningrad (1912–28) and of the Central Institute of Epidemiology and Bacteriology (1930–8), as chairman

of the microbiology department of the Second Moscow Medical Institute (1938–49), and as honorary president of the All-Union Society of Microbiologists, Epidemiologists, and Infectionists (1939–49), which he founded. In his final years he headed a laboratory at the Institute of Epidemiology and Microbiology of the USSR Academy of Medical Sciences. Hamaliia wrote over 300 scientific works on rabies, the plague, cholera, smallpox, and other infectious diseases, and made a number of important discoveries. His collected works were published posthumously.

M. Adams

**Hamaliia, Semen** [Hamalija], b 12 August 1743 in Ky-taihorod, Poltava regiment, d 22 May 1822 in Avdotin, Moscow gubernia. Philosopher, mystic. A graduate of the Kievan Mohyla Academy (1763) and of the Academic University in St Petersburg (1769), he taught Latin briefly at a cadet school, served as a functionary of the Imperial Senate (1770–4), and ran Count Z. Chernyshev's chancellery. He was also a member of the Society for Promoting the Translation of Foreign Books (est 1768) and the Typographic Company of Moscow (est 1784). Retiring in 1784, he devoted the rest of his years to translating the works of mystics such as J. Böhme, J. Vives, and L. Saint-Martin, and to organizing Masonic lodges. His correspondence was published in 1832 and again in 1836–9, but most of his translations remain unpublished.

**Hamarnik, Yan**, b 2 June 1894 in Zhytomyr, d 31 May 1937. Communist party and Red Army activist of Polish origin. In 1917 he was a member of the Kiev Communist party committee and from October 1917, a member of its revolutionary committee. In 1918–20 he was a leading member of the Odessa, Kharkiv, and Crimea party organizations, and a political commissar in the Red Army. From 1920 to 1923 he was chairman of the Odessa and then Kiev gubernia party organizations. During 1923–9 he was a CP and Red Army activist in Siberia and Belorussia, and in 1928 secretary of the CC of the Belorussian CP. Hamarnik became chief of the Red Army political department in 1929 and deputy defense minister of the USSR (1930–7). He committed suicide during the Red Army purges, but was posthumously rehabilitated.

**Hamchenko, Serhii** [Hamčenko, Serhij], b 7 October 1859 in Ratne, Kovel county, Volhynia, d 1934 in Zhytomyr. Archeologist. He studied at Kiev University (1876–80); in 1878 he helped V. Antonovych excavate a Rus' burial ground near Zhytomyr. His independent archeological work began in 1886. In 1900 he initiated the establishment of the Volhynia Research Society. A member of the Russian Archeological Society from 1908, in 1909–13 he conducted digs in Podilia. From 1919 he lived in Zhytomyr and worked for the Volhynian Museum. In 1926 he began working with the All-Ukrainian Archeological Committee (VUAK), of which he became vice-president in 1928. In his numerous articles and research reports in Ukrainian and Russian archeological publications Hamchenko made major contributions to research on the Trypillian, Timber-Grave, Cherniakhiv, and Zarubyntsi cultures. He conducted many digs of burial grounds and settlements in Volhynia and Podilia, as well as in Kiev and the vicinities of Cherkasy, Kremenchuk, Izium, Luhanske, Kupianske, Artemivske, Kharkiv, and the Dnieper Hydroelectric Station. He gathered around

him a school of younger archeologists (I. Levytsky, F. Kozubovsky, O. Lahodovska, M. Makarevych, and others).

**Hamilton.** City (1981 pop 537,600) and leading industrial center in Ontario, Canada. In 1981, 11,600 of its residents were of Ukrainian origin. The first Ukrainian organizations in Hamilton were socialist – the Shevchenko Prosvita Association (1910), a branch of the Ukrainian Social Democratic Party of Canada (1915), and the Women's Educational Organization (1920). A congregation of Ukrainian Baptists had formed by 1914. The Church of the Holy Ghost, a Ukrainian Catholic church, was built in 1918. During the interwar years branches of the Ukrainian Labour-Farmer Temple Association, the Canadian Sich Organization, the Ukrainian National Federation, the United Hetman Organization, and the Ukrainian Catholic Brotherhood of Canada were established. By 1941 there were 2,265 Ukrainians in Hamilton.

Today the Ukrainian community in Hamilton is served by three Catholic and one Orthodox parish, a Presbyterian congregation, three Ukrainian schools (one of them a Catholic day school), several youth associations, and the Ukrainian Canadian Social Services Inc.

The largest organizations are the local branches of the Ukrainian National Federation, the Canadian League for Ukraine's Liberation, and the Ukrainian Self-Reliance League of Canada. There are four Ukrainian credit unions and a branch of the Ukrainian Canadian Professional and Business Federation. The community as a whole is represented by the local office of the Ukrainian Canadian Committee.

**Hamkalo, Ivan**, b 1 May 1939 in Horodyshche Korolivske, Bibrka county, Galicia. Conductor and educator. Hamkalo graduated from the Lviv Conservatory in 1963. He has conducted the Lviv Oblast Ukrainian Music and Drama Theater in Drohobych (1963–5), the Donetske Symphony Orchestra (1968–70), and the orchestra of the Kiev Theater of Opera and Ballet (since 1970). He has taught at the Kiev Conservatory (1977–81) and the Kiev Institute of Culture (since 1981).

**Hamorak, Yurii.** See Stefanyk, Yurii.

**Handziuk, Yakiv** [Handzjuk, Jakiv], b 1863, d February 1918 in Kiev. Senior officer in the Ukrainian army, 1917–18. In the fall of 1917 he organized and commanded the 1st Division of the 1st Ukrainian Corps. In January 1918 he took over command of the entire corps. He was captured by Bolshevik forces in Kiev and executed.

**Hankenstein Codex.** An 11th–12th century Church Slavonic manuscript written in Western Ukraine and preserved at the Austrian National Library in Vienna. Also called the Ochoechus of Vienna, it is a 289-folio liturgical anthology. Its language, which has many local features, has been studied by S. Smal-Stotsky (1886), K. Kysilevsky (1953), and G. Shevelov (1979).

**Hankevych, Klymentii** [Hankevyč, Klymentij] (Haniewicz, Clemens), b 1842 in Nastasiv, Ternopil circle, d 1924. Galician pedagogue and linguist. He wrote comparative studies on accent in Sanskrit, Greek, and Ukrainian; of greater importance because of their factual material

are his descriptive works on accent in Ukrainian dialects and on folk etymology. He also wrote on the history of Slavic philosophy and psychology.

Lev Hankevych

Mykola Hankevych

**Hankevych, Lev** [Hankevyč], b 1 June 1881 in Staromishchyna, Skalat county, Galicia, d 14 December 1962 in New York. Political figure, publicist, and attorney. In the early 20th century he was active in socialist circles in Galicia, heading \*Moloda Ukraina (1901–3) and working with the committee in exile of the Revolutionary Ukrainian Party in Lviv. He also co-operated with the Ukrainian Social Democratic Workers' party, making illegal trips to Russian-ruled Ukraine. During the First World War he collaborated with the \*Union for the Liberation of Ukraine and was its emissary in Bulgaria. In 1918 he was a member of the Ukrainian National Council of the Western Ukrainian National Republic. Hankevych was an especially prominent activist in the \*Ukrainian Social Democratic party (USDP) and head of its executive in 1921–3 and 1930–4. In the 1930s he gained renown as the defense counsel in political trials of OUN and Ukrainian Military Organization members in Polish courts. He was also a president of the Union of Ukrainian Lawyers in Lviv and vice-president of the Lviv Bar Association. In 1944 he immigrated to Munich and later to New York. He contributed to *Pravnychy Vistnyk* (1910–13), coedited *Vpered* (1918–22), the journal of the USDP, and wrote publicistic essays on the history of Ukrainian socialism.

A. Zhukovsky

**Hankevych, Mykola** [Hankevyč], b 16 May 1867 in Sniatyn, Galicia, d 31 July 1931 in Shklo, Yavoriv county, Galicia. Political and trade-union leader. A graduate of Lviv university and a lawyer by profession, Hankevych was active in socialist circles in Galicia and played an important role in organizing Ukrainian workers. In the 1890s he published briefly the newspaper *Robitnyk*, then became a founding member of the Ukrainian Social Democratic party. During the First World War he was vice-president of the Supreme Ukrainian Council in Lviv and a founder of the General Ukrainian Council in Vienna. Hankevych edited *Volia* (1900–7), the newspaper of the Ukrainian Social Democratic party, and wrote prolifically for Polish and Ukrainian journals and newspapers. He was an active proponent of co-operation between Ukrainian and Polish socialists.

**Hannover.** City (1983 pop 527,500) and capital of the state of Lower Saxony, West Germany. During the Second World War many Ukrainians were conscripted to work in factories located in Hannover and its suburbs. In one such suburb, Saltzgitte, there is a monument to the memory of the many Ukrainians who died while working in the large metallurgical plant located there. In 1945–9 Hannover and its vicinity had the largest concentration of Ukrainians in northern Germany. Ukrainian displaced persons (about 5,000 in 1945 and 2,840 in 1948) were housed in the M. Lysenko camp, which served as the center of Ukrainian organizations in the British occupation zone. The camp had a nursery, a primary school, a gymnasium, and a technical school, as well as various cultural groups and civic organizations. A camp near the neighboring town of Burgdorf housed 800 Ukrainians in 1948. Today Ukrainians in Hannover number about 300. A single Ukrainian church, St Volodymyr's, serves both Ukrainian Catholic and Orthodox communities in that city.

Vsevolod Hantsov

**Hantsov, Vsevolod** [Hancov], b 25 November 1892 in Chernihiv, d autumn 1979 in Chernihiv. Noted linguist. After graduating from Galagan College, he studied under L. Shcherba, A. Shakhmatov, and J. Baudouin de Courtenay at St Petersburg University and taught there in 1916–17. In 1918 he was the education commissioner in Kozelets county. In October 1918 he became a professor at Kiev University. In 1920 he became the director of the VUAN Commission for Compiling a Dictionary of Spoken Ukrainian in Kiev, and from 1924 he was a co-editor of the VUAN Russian-Ukrainian dictionary. He played an active role in the Kharkiv Orthographic Commission. At the Stalinist show trial of the \*Union for the Liberation of Ukraine in 1930, he was sentenced to eight years' imprisonment, which were later extended, apart from a short break in 1947, until 1956. He then returned to Chernihiv and tried to resume scholarly activity, but was prevented from doing so by I. \*Bilodid. (A short article by him did appear, however, in *Radianske literaturoznavstvo*, 1966, no. 3.)

Before his arrest Hantsov worked on problems of the normalization of literary Ukrainian and on the history of Belorussian (a study of the Radziwill Chronicle, 1927), but his most important contributions were in the field of Ukrainian historical dialectology. On the basis of his analysis of Ukrainian dialects in the Chernihiv region he proposed the theory that the Ukrainian language was formed by the fusion of originally distinct dialectal groups

– the southern and northern groups, of which the present-day southwestern and northern Ukrainian dialects are a continuation. This led him to reclassify Ukrainian dialects (1924) and to develop a scheme of the early history of Ukrainian. His division of Ukrainian dialects into three groups – northern, northwestern, and relatively recent southeastern (formed by the synthesis of two former groups) – provided the foundation for subsequent studies of Ukrainian dialectology. An analysis of Hantsov's works can be found in Yu. Sherekh's *Vsevolod Hantsov*, Olena Kurylo (1954).

G.Y. Shevelov

**Hanulia, Yosyf** [Hanulja], b 10 August 1873 in Nyzhnyi Ripashi, in the Prešov region, Transcarpathia, d 8 October 1962 in Cleveland. Transcarpathian cultural leader, writer, and Greek Catholic priest. A graduate of the Prešov Greek Catholic Seminary, Hanulia served in several parishes in Prešov eparchy, before being sent in 1904 to the United States to minister to the needs of Carpatho-Ruthenian immigrants. From 1914 until his death he served in a parish in Cleveland, Ohio. There in 1927 he helped establish the Rusin Elite Society, which published the bilingual English-Ruthenian illustrated monthly magazine *Vozhd–The Leader* (1929–30). He also served as president of the Rusin Cultural Garden Association. He founded and edited the newspaper *Rusin–The Ruthenian* (1910–16) and wrote a series of pioneering textbooks for the network of Ruthenian schools in the United States. A staunch defender of the traditions of the Greek Catholic church, he elaborated his views in his study *The Eastern Ritual* (2 vols, 1954).

**Hanuliak, Hryhorii** [Hanuljak, Hryhorij] (pen names: H. Marusyn, Hryts Zazulia, Hrytsko Mamalyga), b 1 March 1883 in Syniava, Sianok county, Galicia, d 29 August 1945 in Sianok. Publisher, journalist, and writer. In 1908 he began to write in the Lemko vernacular for the Russophile press (*Nauka, Halychanyn, Prikarpataskaia Rus', Volia narodu*). In the 1920s he adopted a Ukrainophile orientation. He published a collection of poems, *Vesnianyi sny* (Spring Dreams, 1909), and several short stories and humorous monologues. In the 1930s he wrote 10 plays for folk theaters. In 1921 he founded the publishing house Rusalka and published the popular series *Knyhozbirnia shkoliaryka* (children's stories, many of which were authored by Hanuliak), *Literarturna biblioteka, Narodna biblioteka* (both edited by S. Kalynets), and *Teatralna biblioteka* (about 150 plays for amateur theatrical groups). He also published the journals *Teatral'ne mystetstvo* (1922–5) and *Veselyi kalendar* (to 1939). Hanuliak headed the Union of Ukrainian Merchants and Entrepreneurs in Lviv (1928–34).

**Hanuschak, Ben** [Hanusčak], b 29 April 1930 in Earl Grey, Saskatchewan. Teacher, lawyer, and politician. A graduate of the University of Manitoba, he taught in Winnipeg and served as president of the Winnipeg Teachers' Association before entering politics. From 1966 to 1981 he was the New Democratic party (NDP) member of the Manitoba legislature for Burrows. He served as secretary of the Manitoba NDP (1966–8), speaker of the Manitoba assembly (1969–70), minister of consumer and corporate affairs (1970–3), minister of education (1971–3), minister of colleges and university affairs (1973–6),

minister of continuing education and manpower (1976–7), and minister of tourism, recreation, and cultural affairs (1976–7). In February 1981 Hanuschak left the NDP, citing differences with party policy on the Canadian constitution, and became one of the founders of the Progressive party. In November 1981 he failed to win re-election to the legislature.

**Hanushevsky, Mykhailo** [Hanuševs'kyj, Myxajlo], b 5 December 1880 in Sukhovolia, Lviv county, Galicia, d 9 February 1962 in Uhornyky, Lviv oblast. Ukrainian Catholic priest, civic and political leader. He studied at the Greek Catholic Theological Seminary in Lviv, and philosophy and law at Lviv and Vienna universities. He was a chaplain to Metropolitan A. Sheptytsky (1905–6), but was transferred on his own request to work in small parishes throughout Galicia. One of the pioneers of the dairy and credit-union co-operative movement, Hanushevsky also organized many branches of the Prosvita Society and various health and temperance groups. In 1928 he was elected to the Polish Sejm as a representative of the Ukrainian National Democratic Alliance. In 1939 he was arrested by the Gestapo and held in prison for several months. In 1946 Hanushevsky was arrested by the Soviet authorities and sent to Siberia where he was incarcerated for 11 years.

**Hanusz, Jan**, b 13 July 1858 in Kolodiivka, Stanyslaviv circle, Galicia, d 26 July 1887 in Paris. Polish linguist of Ukrainian origin. His PhD dissertation (1883) at Cracow University, 'Über die Betonung der Substantiva im Kleinerussischen,' was published in 1884. From 1884 until his death he was a docent at the University of Vienna, where he taught Sanskrit, Lithuanian, and comparative and Celtic linguistics. He is the author of around 150 works, including articles on stress in Ukrainian dialects, the general character of the Ukrainian language, and the language of Armenians in Western Ukraine.

**Hanzha, Ivan** [Hanža], b ?, d September 1648 near Pyliavtsi, Podilia. Military leader during the time of Hetman B. Khmelnytsky. An officer in the army of the Polish magnate A. Koniecpolski, he joined the Cossack side with the outbreak of the \*Cossack-Polish War in 1648. During the Battle of \*Zhovti Vody, on orders from Khmelnytsky, he persuaded an army of four to five thousand registered Cossacks to abandon the Polish forces. After the Battle of Korsun he successfully led a peasant uprising against the Polish nobility in the Uman region. In the summer of 1648 he organized the Uman Regiment and became its first colonel, but died soon after in the Battle of Pyliavtsi.

**Haraksim, L'udovít**, b 1 August 1928 in Uzhhorod. Slovak historian, specialist in Ukrainian history. From 1956 to 1973 he worked first at the Slovak Academy of Sciences and then at the Slovak National Museum in Bratislava. His publications focus on the cultural and political life of Ukrainians in Eastern Slovakia in the 19th century. Among them is the monograph *K sociálnym a kultúrnym dejinám Ukrajincov na Slovensku do roku 1867* (On the Social and Cultural History of Ukrainians in Slovakia to 1867, 1961). Since 1972 he has not been permitted to publish.

**Harald III** (Hardraade or Hardruler), b 1015, d 25 September 1066 in Stamfordbridge, England. King of Norway from 1045 to 1066. After the Danish victory in the Battle of Stiklestad (1030), Harald fled to Rus'. There he headed the Varangian guard of Prince Yaroslav the Wise, whose daughter \*Yelysaveta Yaroslavna he later married. Some of his poetry is extant, including a song he composed in Yelysaveta's honor, which was translated into Ukrainian by I. Franko. From Rus' he went to Constantinople, where for some 10 years he headed the Varangian guard of the Byzantine emperor Michael IV, becoming the most famous Varangian in the Byzantine service. In 1045 Harald returned through Rus' and Sweden to Norway and shared the kingdom with his nephew Magnus I; upon Magnus's death in 1047, he became sole ruler of Norway. He invaded England in 1066 and died in battle at Stamfordbridge, where the Norwegians were routed.

**Harambašić, August**, b 14 July 1861 in Donja-Miholjac, Slovenia, d 16 July 1911 in Stenjevec. Croatian Romantic poet. His translations of T. Shevchenko's poetry appeared in various Yugoslav journals; eight narrative poems were published as a book, together with Shevchenko's autobiography and a scholarly introduction, in 1887. He also translated Marko Vovchok's short stories, which were published with an extensive introduction in 1899.

**Harapiak, Harry** [Harapjak], b 17 September 1938 in Cowan, Manitoba. Politician. A railway engineman, Harapiak was elected to the Manitoba legislature in 1981 as the New Democratic party member for The Pas. In January 1985 he was appointed minister of northern affairs.

**Harapnyk** (The Whip). Illustrated magazine of humor and satire published irregularly from 1921 to 1935 in Edmonton and Andrew, Alberta, by T. Tomashevsky. It featured illustrations by O. Hryhorovych, Ya. Maidanyk, and L. Snaichuk. It made biting comments on labor and farm issues and on the Great Depression.

**Haras, Mykola**, b 1870 in Vashkivtsi, Bukovyna, d ? Civic and religious leader. Haras cofounded and headed the teacher's organization *Ukrainska Shkola* in Chernivtsi. He was also the leader of the Ukrainian faction at the eparchial assemblies of the Bukovynian Orthodox church (1931–8). He authored *Istorychnyi ohliad i suchasnyi stan ukraïnskoï osvity i kul'tury na Bukovyni* (Historical Survey and the Current Situation of Ukrainian Education and Culture in Bukovyna, 1934) and *Illustrovana istoriia tovarystva Ukraïns'ka Shkola v Chernivtsiakh, 1887–1937* (An Illustrated History of the Society 'Ukrainska Shkola' in Chernivtsi, 1887–1937, 1937).

**Harasevych, Andrii** [Harasevyč, Andrii] (pseud: Surmach, Vasyl), b 13 August 1917 in Lviv, d 24 July 1947 while climbing Mt Wazmann near Berchtesgaden, West Germany. Poet. He began writing when still a student in Khust and Uzhhorod and his poems were published in various newspapers and periodicals there and in Lviv. While a student in Prague, he fell under the influence of the nationalist school, especially the poet O. \*Olzhych; his first collection of poems, *Sonety* (Sonnets, 1941), is imbued with the then-current nationalist sentiments. Most

of his poems appeared posthumously in the collection *Do vershyn* (To the Heights, 1959). Several short stories appeared in various periodicals.

Mykhailo Harasevych

**Harasevych, Mykhailo** [Harasevyč, Myxajlo], b 1763 in Zolochiv county, Galicia, d 1836. Baron of Neustern, church historian, and prominent Galician religious figure. He studied theology at the Barbareum in Vienna. In 1787 he was given the Chair of Pastoral Theology in Lviv, and later also taught in a Ukrainian theological institute; he was twice vicar-general of the Lviv eparchy. Through his efforts in Vienna and Rome the Galician metropolis of the Ukrainian Catholic church was restored in 1806, the Lviv *kapitula* was recognized, and the church became equal to and completely independent of the Polish Roman Catholic church. After the death of Metropolitan A. Anhelovych in August 1814, Harasevych administered the metropolis until the appointment of Metropolitan M. Levytsky in March 1816. Harasevych is the author of *Annales Ecclesiae Ruthenae* (1862), a documented history of the Ukrainian Catholic church, in which he defended the church's status from a historico-legal position.

**Harasevych, Oleksander** [Harasevyč], 1876–1934. Galician agronomist and pedagogue. Before the First World War Harasevych worked as an organizer of dairy co-operatives, an agriculture instructor for the Prosvita society (1904–9), and a lecturer at the Lviv teachers' seminary. He was one of the founders and a long-term president of the \*Vidrozhennia temperance society. In the 1920s he lived in Soviet Ukraine; he died in Kharkiv during the 1933–4 purge.

**Harashchenko, Ivan** [Haraščenko], b 5 May 1881 in Krasnyi Kut, Sloviaoserbkske county, Katerynoslav gubernia, d 20 March 1952 in New York. Businessman, church and civic leader. Active in the Orthodox church in Kharkiv and Slobidska Ukraine, in 1921 he was elected vice-chairman of the All-Ukrainian Orthodox Church Council in Kiev. To finance the publication of religious books, he sold all his property. For his religious activism he spent 10 years in Soviet concentration camps. He left Ukraine during the Second World War. In 1943 he became a member of the Great and Little Councils of the Ukrainian Autocephalous Orthodox Church (Conciliar). In 1950 he was ordained in West Germany and in 1951 immigrated to the United States.

**Harbin.** City (1982 pop 2,550,000) in northeast China, capital of Heilungkiang province. Harbin was founded in 1898 as a railway center of the Chinese Eastern Railway, which was built by Russia on Chinese territory to link the Trans-Siberian Railroad with Vladivostok. Most of the inhabitants were employees of the railway company, including mostly Russians but also Ukrainians and other nationalities. Ukrainians formed their own artistic groups and maintained close ties with Ukraine and their countrymen in the \*Far East. In 1907 the Ukrainian Club was founded. After the February Revolution of 1917 the Ukrainian community in Harbin became much more active. Several new institutions such as the Ukrainian Council and the Manchurian Regional Council were created to provide political leadership in the Far East and to maintain close ties with Ukraine. In 1917 a company of Ukrainian troops was sent from Harbin to Ukraine. It was commanded by P. Tverdovsky, who returned to Harbin a year later as a consul of the UNR. A Ukrainian school and gymnasium were established on the premises of the Ukrainian Club. In 1918 the Ukrainian Orthodox parish of the Holy Protectress was organized by Rev. M. Trufaniv. By 1929 it had built its own church.

From 1922 to 1931 the Ukrainian community in Harbin was isolated from other Ukrainian centers and treated unfairly by Chinese authorities, who were influenced by local Russians. The Ukrainian People's Home was confiscated and the Ukrainian schools and other institutions

Ukrainian Orthodox Chapel in the Ukrainian Club in Harbin, ca 1930

were abolished. Only the Prosvita society continued to operate under the auspices of the УМСА. It maintained a drama group and published a weekly – *Ukrainske zhyttia*.

The fortunes of the Ukrainian community improved in 1931 when the Japanese buffer state of Manchukuo was set up. The Ukrainian People's Home was restored to the Ukrainian community. The Ukrainian Political Center assumed the leading role in Ukrainian life in Manchuria. It founded the Ukrainian Publishing Union, which published *Man'dzhurs'kyi vistnyk* (ed I. Svit, 1932–7) as well as books and brochures. From 1934 Ukrainians had their own radio programs. The Zelenyi Klyn association and the Ukrainian Youth Association merged to form the Association of Ukrainian Youth. In 1935 the Ukrainian National Colony was founded as an umbrella organization for all Ukrainian communities in Manchuria. When Manchuria was occupied by the Soviet armies in 1945, most Ukrainians were arrested and deported and their institutions were abolished. Until then the number of Ukrainians in Harbin was close to 15,000. (See also \*China.)

V. Kubijovyč

Oleksa Harbuziuk

**Harbuziuk, Oleksa** [Harbuzjuk], b 29 March 1920 in Berehy, Dubno county, Volhynia. Baptist pastor, church leader, and journalist. He studied theology and journalism in Germany and has lived in Chicago since 1949. From 1968 to 1972 he was president of the Ukrainian Evangelical Baptist Convention of the USA, and in 1972 he became president of the All-Ukrainian Evangelical Baptist Fellowship. He is a member of the presidium of the secretariat of the World Congress of Free Ukrainians and an executive committee member of the American Council of Christian Churches. In 1966 he began broadcasting religious programs to Ukraine and editing *\*Pisla-nets' pravdy*.

**Hare** (*Lepus*; Ukrainian: *zaiats*). Mammal of the family Leporidae of the order Lagomorpha. Distinguished from rabbits by physical and developmental characteristics, the hare is about 47 cm long and 1.5–4 kg in weight, depending on the species. Two species are found in Ukraine: the brown, or common hare (*L. europaeus*), most numerous in the steppe, forest-steppe, and Kuban regions, and the white, or blue hare (*L. timidus*), infrequently found in the northwestern parts of Ukraine. Hares are herbivorous and occasionally damage pastures, crops, and forest vegetation. Hare are hunted in Ukraine for their meat and fur.

**Harkusha, Semen** [Harkuša], b ca 1739 in Berezan, in the Homel region of Belorussia, d ? Zaporozhian Cossack, merchant, and rebel leader. Born Mykolaienko and nicknamed Harkusha at the Zaporozhian Sich, he fought in the Russian-Turkish War of 1768–74 with the Zaporozhian army, and took part in the Ochakiv and Khadzhybei campaigns. From the early 1770s on he led a group of rebels who raided gentry estates in Slobidska, Left-Bank and Right-Bank Ukraine, and Belorussia. Captured in 1773, 1778, and 1783, he escaped from prison all three times. In 1784 he was again apprehended, tortured, and sentenced to a life term of forced labor in Kherson.

**Harmashiv, Vsevolod** [Harmašiv], b 1868 in Mykolaiv, Kherson gubernia, d 1953 in Munich. Surgeon. From 1897 to 1914 he served as senior physician on the staff of the Kiev Military Hospital. During the war he served in the active Russian army, and then returned to the Kiev hospital with the rank of general of medical services. In 1922 Harmashiv immigrated to Czechoslovakia, where he was appointed professor of biology and hygiene at the Ukrainian Higher Pedagogical Institute in Prague. From 1930 to 1933 he was rector of the institute. He founded a number of clinical sanatoriums for emigrants in Czechoslovakia. In 1945 he moved to Germany.

**Harmatii, Vasyl** [Harmatij, Vasyl'], 1810–1900. Peasant leader in Galicia. Harmatii was a representative to the Austrian parliament in 1848, and later was a founder of the radical movement and a leader of the Ukrainian Radical party. His sons Luka (1866–1925) and Mykhailo (killed by the Soviets in 1939) were also members of the Ukrainian Radical party.

**Harness making.** See Saddle making.

Hart, title page

**Hart** (Tempering). A literary and political monthly published in Kharkiv in the years 1927–32 by the \*All-Ukrainian Association of Proletarian Writers (vusp), which claimed to be the direct offspring of the 'proletarian' writers' group \*Hart (1923–5) and was an archenemy of the literary group \*Vaplite and its successors. Among its contributors were Yu. Smolych, K. Hordiienko, I. Le, N. Zabala, I. Kyrylenko, O. Kundzich, L. Pervomaisky, O. Vlyzko, V. Sosiura, M. Dolengo, B. Kovalenko, L. Skryp-

nyk, I. Mykytenko, I. Kulyk, V. Koriak, Ya. Savchenko, S. Shchupak. The journal ceased publication when VUSPP was dissolved in 1932.

**Hart** (Tempering). An association of proletarian writers founded in Kharkiv in January 1923 by V. \*Blakytny. According to its program, its purpose was 'to struggle against bourgeois art' and 'to attract the proletarian masses to literary creativity.' Branches of the association were set up in Kiev, Katerynoslav, Odessa, Kamianets-Podil'skyi, and other cities. It published two almanacs: *Hart* (Kharkiv, 1924) and *Kyiv-Hart* (Kiev, 1925). Among its members were V. Ellan-Blakytny, K. Hordiienko, I. Dni-provsky, D. Falkivsky M. Yohansen, H. Koliada, O. Kopylenko, V. Koriak, H. Kotsiuba, I. Kulyk, V. Polishchuk, Ya. Savchenko, I. Senchenko, M. Kulish, V. Sosiura, P. Tychyna, M. Khvylovy. A disagreement between the adherents of its official mass orientation and the supporters of M. \*Khvylovy, who advocated artistry as the goal of literary activity (the Urbino group), led to Hart's dissolution in December 1925. Khvylovy and his supporters founded the writers' group \*Vaplite, while most of the other members joined the \*All-Ukrainian Association of Proletarian Writers.

Harvard Ukrainian Research Institute

**Harvard Ukrainian Research Institute (HURI).** A research institute of Ukrainian studies at Harvard University in Cambridge, Massachusetts. It was established in June 1973 on the recommendation of the university's ad hoc Committee on Ukrainian Studies. This committee, which included professors O. Pritsak, I. Ševčenko, R. Pipes, H. Lunt, W. Weintraub, and E. Keenan, had been appointed in 1968 by the dean of the Faculty of Arts and Sciences to formulate and supervise a program for Ukrainian studies at Harvard. The founding of HURI followed the endowment of chairs in Ukrainian history (1968), literature (1973), and linguistics (1973) and the introduction of courses in Ukrainian studies in several Harvard departments. In 1974 the ad hoc committee became the Standing Committee on Ukrainian Studies, an event that marked the completion of the formal structure of Ukrainian studies at Harvard.

The goals of the institute are to support research,

publications, and teaching in Ukrainian studies. HURI conducts a weekly seminar in Ukrainian studies, holds conferences, and sponsors approximately 30 research associates yearly. Publications of the Harvard Series in Ukrainian Studies include monographs, conference proceedings, documents, and offprints. HURI also publishes the scholarly journal *\*Harvard Ukrainian Studies* and *Minutes of the Seminar in Ukrainian Studies*. Special projects undertaken by HURI include research on the famine of 1932-3 and the publication of texts and documents relating to the millennium of Christianity in Ukraine. The institute, in conjunction with the Harvard Summer School, has offered courses in Ukrainian disciplines since 1971. HURI has on staff a Ukrainian specialist who oversees the collection of Ucrainica in the Harvard University library system, including the reference library located at the institute. From its beginnings, the director of the institute has been O. Pritsak and the associate director I. Ševčenko, except in 1977 and 1985-6, when Ševčenko served as director. F. Sysyn was appointed associate director in 1985. Financial support for HURI is provided by the \*Ukrainian Studies Fund.

M. Baziuk

**Harvard Ukrainian Studies.** The scholarly journal of the \*Harvard Ukrainian Research Institute, published quarterly in Cambridge, Massachusetts, since March 1977 under the editorship of O. Pritsak and I. Ševčenko. The journal deals primarily with history, linguistics, and literature, although related disciplines are sometimes represented. It also publishes historical documents.

**Harvest rituals.** Folk ceremonies dating back to ancient times and marking the opening and closing of the harvest period. These ceremonies were characterized by a sequence of magical rituals that interacted with natural processes and phenomena. The spiritualization of nature was at the essence of these rites, which could influence critically the fate of the harvest.

*Zazhynky* marked the commencement of harvesting and took place at the end of June or the beginning of July. In the morning, all the reapers went into the fields together. The master or village elder took off his hat, turned to the sun, and uttered a special incantation requesting the fields to surrender their harvest and to give the reapers sufficient strength with which to gather it in. In more recent times, the incantation was replaced with a prayer. Then, the mistress or a woman reputed to be lucky (called *postadnytsia* in some regions) cut the first sheaf of grain, which was called *voievoda*. Women reapers rolled around on a cleared patch of the field with the purpose of absorbing strength from the soil. The *postadnytsia* presented the master with the first sheaf after which he offered everyone liquor and food. In the evening, the *voievoda* sheaf was brought to the master's house and was placed in the icon corner where it was to stand until the end of the harvesting.

*Obzhynky* marked the end of the harvesting, usually at the end of July or the beginning of August. After the last clutch of grain had been cut, a solemn procession around the field took place. A clump of unreaped wheat or rye left at the edge of the field was tied into a sheaf known alternatively as 'Volos's beard,' 'Elijah's beard,' 'the Savior's beard,' 'Grandfather's beard,' 'goat,' or sim-

ply 'beard' and was left as an offering to the gods of the fields. In some regions the 'beard' was thought to contain the benevolent spirits of ancestors who would protect the fields. Thereafter the reapers walked in a procession from the fields to the master's house, carrying the last sheaf (*ostalets*). The sheaf was then presented to the master and mistress accompanied with wishes of happiness and abundance. The master carried the ceremonial gift into the house and placed it in the icon corner. A harvest feast ensued, whereupon everyone was treated to drinks and food in the house or yard. These rituals, which are very similar to wedding rituals, were accompanied with special songs (see \*Harvest songs). Some elements of the *obzhynky* rituals have been revived in 'harvest feasts' that are held today in Soviet Ukraine; eg, grain garlands are carried in procession and presented to chairmen of artels or collective farms. This ceremony is followed by dancing, singing, games, or sports competitions.

**Harvest songs.** Class of ritual and lyric folk songs associated with the harvest period and divisible into three groups that coincided with the preparations for harvesting, the harvest itself, and the aftermath of the harvest.

*Zazhynky* songs accompanied the rituals at the beginning of the harvest (see \*Harvest rituals) such as the tying of the first sheaf. They bestow honor upon the master and mistress and ask nature to yield its fruits and grant the reapers strength to ensure an easy and successful harvesting period.

Harvesting (*zhnyvarski*) songs were not associated with any form of ritual. They were sung while working in the fields or walking to and from the fields. Most of them spoke of the reaper's hard work from sunrise to sunset. Besides field labor, they depict relations between the farmhands and the master. Harvesting songs often address the forces of nature: they rebuke the sun for rising too early and setting too late, or ask the moon to light the way home.

*Obzhynky* songs are related to the rituals that close the harvest. By theme they can be divided into several subgroups: (1) finishing songs, which are connected with the reaping of the last field ('Oi, ty, nyvo, nyvon'ko' and 'Do kintsia, zhenchyky, do kintsia'); (2) songs for the tying of the 'beard' at the border of the mown field ('Borodu pololy, ruchky pokololy' and 'Oi, chyia to boroda'); (3) songs for the tying of the last sheaf and *obzhynky* garland ('Ziidy khmaron'ko z neba' and 'Kotyvsia vinochok po poliu'); (4) songs accompanying the procession to the master's cottage ('Buvai, nyvo, zdorova' and 'Shchos' u seli dym kuryt'); (5) songs for the arrival at the master's cottage ('Vyidy, panochku, vyidy' and 'Kazala nam nyvka'); and (6) songs sung in the master's house ('A v nashoho hospodaria toloka' and 'Sydyt' pan na pokuti').

The composition of harvest songs is distinct. They are remarkable for their emotive language, colorful epithets, and hyperbolic comparisons. Psychological parallelism and the personification of natural entities are typical of

these songs. Their melodies are archaic and closely related to \*wedding songs. Today in Ukraine the traditional harvest songs are being revived to some extent. They appear with increasing frequency in the repertoire of amateur artistic groups. However, attempts to compose new 'Soviet harvest songs' have not been very successful. Contemporary harvest songs account for only 12.5 percent of the total collection, and even these are essentially modifications of traditional songs incorporating the use of current terminology.

 M. Hnatiukivsky

**Hashynsky, Arkadii** [Hašyns'kyj, Arkadij], b 29 July 1920 in Melitopil, Katerynoslav gubernia. Stage actor and teacher. A graduate of the Moscow State Institute of Theater Arts (1945), since 1948 he has worked at the Kiev Ukrainian Drama Theater and has appeared in numerous roles. He also teaches at the Kiev Institute of Theater Arts.

**Hasidism** (from the Hebrew *hasidim*, meaning pious, righteous). Jewish religious movement which arose in Ukraine in the 18th century in opposition to the dogmatic and ritualistic formalism of the established orthodox Judaism. It originated as a loose network of small local groups devoted to an ascetic or ecstatic way of life, practicing their own rites, and embracing a mystical world view, which was influenced to some extent by the medieval Jewish Kaballah. These groups were led by charismatic, righteous individuals, the *zaddikim*. Hasidism was a popular movement that actively preached social reform and appealed particularly to the lower classes of Jewish society.

The first Hasidic leader was Israel Ba'al Shem Tov (1700–60), who was active in Podilia and traveled to other parts of the Polish Commonwealth to propagate his ideas. He was widely reputed as a holy man with supernatural powers of healing and mystical visions. His doctrines and counsels were formulated in pithy sayings. Important early centers of Hasidism included Mezhyrich, Chornobyl, and Medzhybizh. The movement soon spread to Austria-Hungary, and Hasidic communities sprang up in Galicia, Bukovyna, and Transcarpathia. Hasidic schools and printing presses were set up in Korets, Zhytomyr, Berdychiv, Zhovkva, and other towns. Russia's code for Jews, issued in 1804, legalized Hasidism by allowing Hasidic communities to build their own synagogues and choose their own rabbis. By the mid-19th century the majority of Jews in Ukraine were Hasidic and the movement was accepted by orthodox Jewry. Hasidic folklore (songs, dances, and sayings) is rich in Ukrainian themes. From Ukraine Hasidic Jews immigrated to Palestine and to the United States. In the 20th century, as Jewish life became increasingly secularized, Hasidism declined. Its opposition to the Zionist movement diminished its political influence. During the Holocaust Hasidism was completely eradicated in Eastern Europe; only a small number of its remaining adherents managed to emigrate. M. Buber's and A. Heschel's philosophical systems are known as neo-Hasidism.

**Hasko, Mechyslav**, b 27 January 1907 in Lutske, Volhynia gubernia. A poet, prose writer, and translator. In 1925 he immigrated to the Ukrainian SSR. He graduated from the Kharkiv Institute of National Economy in 1929. He belonged to the \*Zakhidnia Ukraina writers' association. His early works included the poetry collections *Obabich kordonu* (On Both Sides of the Border, 1930) and *Shliu vam svii pryvit* (I Send You My Greetings, 1931) and the long poem 'Nad aerodromom' (Over the Airfield, 1931). Repressed during the Stalin terror, he was rehabilitated in 1956. A new collection of his poems appeared in 1958, followed by *Lanky zhyttia* (The Links of Life, 1967). He has also published studies on Shevchenko – *Pro shcho rozpovidaiut' maliunky Tarasa Shevchenka* (What the Paintings of Taras Shevchenko Tell, 1970) and *U koli Shevchenkovykh ta Hoholevykh druziv* (In Shevchenko's and Gogol's Circle of Friends, 1980) – and translations from Polish and English.

**Haslo** (The Slogan). The monthly organ of the \*Revolutionary Ukrainian party, published in Chernivtsi from March 1902 to May 1903. A total of 17 issues appeared. It was edited in Kiev and then Lviv by D. Antonovych and M. Rusov, then taken to Chernivtsi, where L. Kohut and V. Simovych supervised its publication. Most of the copies were then smuggled back into Russian-ruled Ukraine for distribution. The journal advocated social democracy and Ukrainian autonomy. It published articles on international politics and reported extensively on current affairs throughout Ukraine.

**Hasyn, Oleksa** (*nom de guerre*: Lytsar), b 8 July 1907 in Koniukhiv, Stryi county, Galicia, d 31 January 1949 in Lviv. Senior officer of the UPA. In 1935 he was appointed chief of the military and organizational department of the national executive of the OUN in Galicia. Hasyn was arrested several times by Polish authorities and spent a year in the Bereza Kartuzka concentration camp. In 1937 he left Poland illegally to work abroad in the military department of the OUN leadership. He completed an officer course and wrote a military textbook. A founding member of the OUN (Bandera faction), in the summer of 1941 he organized and commanded a clandestine officer school in the Lviv region. After escaping from a Gestapo prison in 1942, Hasyn served as military instructor of OUN. In 1943 he was appointed UPA deputy chief of staff, and in 1946, chief of staff. A year later he became a member of the supreme command and in 1948 was promoted to colonel. He was killed in action in Lviv.

**Hattsuk, Oleksa** [Hatkuk], b 14 October 1832 in Odessa, d 5 December 1891 in Moscow. Archeologist, journalist, and publisher. Hattsuk graduated from Moscow University in 1857. He was involved in the publication of the literary-scholarly monthly \*Osnova in St Petersburg. Until 1875 he also contributed to the newspaper *Odesskii vestnik*. From 1875 to 1890 in Moscow he published the

annual *Krestnyi kalendar'* and a political-literary-artistic weekly, popularly called *Gazeta A. Gattsuka*. He is the author of popular and scholarly articles, a version of the Ukrainian alphabet (*Ukrains'ka abetka* 1861), and the first popular book on the prehistoric archeology of Russia and Ukraine: *Starina Russkoi zemli ...* (Antiquity of the Russian Land ..., 1866).

**Havlíček-Borovský, Karel**, b 21 October 1821 in Borová (now Zbraslavice), Kutná Hora county, Bohemia, d 29 July 1856 in Prague. Czech poet and publicist. From 1842 to 1844 he taught in Lviv and Moscow and visited Kiev. He was a close acquaintance of Ya. \*Holovatsky and O. \*Bodiansky. He became a Slavophile and was a strong proponent of national rights for the peoples of the Austro-Hungarian Empire, including the Ukrainians. He is the author of a number of political tracts and satirical poems. His poetry was translated into Ukrainian by I. Franko.

**Havrylenko, Alla**, b 6 December 1934 in Kremenchuk. Ballerina. A graduate of the Kiev School of Choreography (1954), she joined the Kiev Theater of Opera and Ballet in 1955 as a soloist. She has danced the lead roles in K. Dankevych's *Lileia* (The Lily) and A. Adam's *Giselle*, Mavka in M. Skorulsky's *Lisova pisnia* (The Forest Song), Juliet in S. Prokofiev's *Romeo and Juliet*, and the White Lady in A. Glazunov's *Raymonda*.

**Havryliuk, Oleksander** [Havryljuk], b 23 April 1911 in Zabolottia, Biła county, Podlachia, d 22 June 1941 in Lviv. A communist writer in interwar Western Ukraine. A member of the \*Horno writers' group in Lviv, he published in the journal *Vikna* and other Galician communist periodicals of the 1930s and was imprisoned by the Poles for his political activity. He became the director of the literary fund in Lviv after the Soviet occupation in 1939 and was killed during the city's bombardment by the Germans. His poetry, stories, essays, and novella *Bereza* have been published in several Soviet editions of his works.

Mykhailo Havrylko

**Havrylko, Mykhailo**, b 5 October 1882 in Runivshchyna, Poltava county, Poltava gubernia, d 1920? Sculptor. He studied art under F. Balavensky in Myrhorod (1899–1904), at Baron A. Shtiglits's Art School in St Petersburg (1904–5), the Cracow Academy of Arts (1907–

10), and A. Bourdelle's studio in Paris. His works include portraits such as *Hannusia* (1909); busts of the writers M. Shashkevych (1910), T. Shevchenko (1911, 1919), and Yu. Fedkovych (1913); thematic compositions such as *Banduryst*, *The Parting*, and *Cossack on a Horse*; and a well-known bas-relief medallion of T. Shevchenko (1911). He took part in four competitions for a T. Shevchenko memorial in Kiev (1910–13), but without success. His first proposal (1910) was the most interesting one: it presented the poet in Cossack dress on a high pedestal surrounded by the heroes of his poems. Later the Soviet sculptor M. Manizer augmented this composition with workers and Red Army soldiers and used it for his Shevchenko memorial in Kharkiv (1935). In 1915 Havrylko joined the Sich Riflemen, was wounded in battle, and then transferred to the \*Graycoats. His last work was a bust of T. Shevchenko for the foyer of the Gogol Theater in Poltava (1919).

**Havryshchuk, Mykola** [Havryščuk], 1878–1942. Bukovynian primary school teacher, pedagogue, political activist. He was one of the leaders of the Social Democratic party in Bukovyna and a deputy to the Bukovynian Diet (1911–18). From 1920 he worked in Transcarpathia. He wrote textbooks on methodology such as *Metodyka pochatkovoï nauky v narodnii shkoli* (Methods of Elementary Teaching in Public School, 1913) and translated a number of German pedagogical books.

**Hawrelak, William** [Havreljak, Vasyl'], b 4 October 1914 in Wasel, Alberta, d 7 November 1975 in Edmonton. Entrepreneur and politician. Owner of a soft-drink company and a real-estate developer, in 1949 Hawrelak was the first Ukrainian elected to the city council of Edmonton. In 1951 he was elected mayor of Edmonton, the first Ukrainian mayor of a major Canadian city. He served three terms – 1952–9, 1963–5, and 1974–5 – and in 1956 was elected president of the Canadian Federation of Mayors. Forced to resign from office in 1959 and 1965 because of real-estate scandals, he was exonerated in the later case by the Supreme Court of Canada. Hawrelak was a member of the Ukrainian Canadian Professional and Business Federation and active in the Ukrainian Greek Orthodox church.

Bohdan Hawrylyshyn

**Hawrylyshyn, Bohdan** [Havrylyšyn], b 19 October 1926 in Koropets, Buchach county, Galicia. Business educator. A graduate of the University of Toronto, the Centre

d'Etudes Industrielles (now the International Management Institute) in Geneva, and the University of Geneva (PH D 1975), since 1960 he has been a faculty member, and since 1968 director, of the institute. A lecturer and consultant to international organizations and corporations, he is a Fellow of the World Academy of Arts and Sciences, the International Academy of Management, and the Club of Rome. Hawrylyshyn sits on the editorial board of several professional journals and is the author of *Road Maps to the Future: Towards More Effective Societies* (1980).

**Haydak, Mykola** [Hajdak], b 12 May 1898 in Malyi Yanyzol, Mariupol county, Katerynoslav gubernia, d 12 August 1971 in Minnesota. Apiculturist and specialist in beekeeping; full member of the Ukrainian Academy of Arts and Sciences. He studied at Kiev University and in Prague at the Ukrainian Free University and the Czech Polytechnical Institute, graduating from the latter in 1927. In 1930 Haydak immigrated to the United States, and in 1933 he obtained his PH D in apiculture at the University of Wisconsin. He worked as a professor at the University of Minnesota until 1966. Haydak wrote a textbook on beekeeping for the Ukrainian Husbandry Academy in Poděbrady and some 220 papers dealing with apiculture.

**Hayfields.** Land covered by cereal (eg, timothy, rye-grass) and pulse (eg, red and pink clover) grasses that are used for various types of feed: hay, haylage, hay meal, and roughage. In 1984 the total hayland in Ukraine comprised 2,100,000 ha (4.3 percent of the republic's arable land and 6.1 percent of the USSR hayland).

About 25 percent of the hayland in Ukraine is sown; the rest is natural. Almost a half of the latter is dry land (yielding 12–15 centners per ha), and the rest is flooded (20–25 centners per ha) or low-lying (12–15 centners of acidic hay per ha). Tilled fields have a much higher yield – 80–100 centners per ha.

Hayfields are unevenly distributed throughout Ukraine. They comprise 10 percent of all farmland in Polisia and the Carpathian region, 5 percent in the forest-steppe, and 0.7 percent in the steppe. Regions with less hayland generally devote more land to other \*fodder forage crops such as tubers and corn. The area of hayland in Ukraine is steadily decreasing, while the fodder crop area is increasing. In 1913, 10,000,000 ha in Ukraine were devoted to fodder crops, of which 91 percent were hayland or pastureland. In 1959 fodder crops took up 17,700,000 ha, yet hayfields and pastures accounted for only 45 percent of the area (in the USSR as a whole, hayland accounted for as much as 83 percent of all fodder cropland). This trend in Ukraine can be explained by the move to intensive livestock farming, which increases the demand for feed. Since hay is one of the least productive fodder crops, it is increasingly being replaced by other types of fodder.

C. Freeland

**Hazelnut** (*Corylus*; Ukrainian: *lishchyna zvychaina*; American: filbert). An important nut-bearing plant; a genus of the birch (*Betulaceae*) family which grows most frequently as a tall bush (2–4 m) and less frequently as a tree (7–8 m). Two species grow in Ukraine: the common or European hazel (*C. avellana*), found as brush in mixed forests in Polisia and in the forest-steppe region, and the

giant hazel (*C. maxima*), cultivated in the Crimea and in eastern and southeastern Ukraine. Hazelnuts are grown commercially for food and processed for oil; the wood is used in carpentry. Hazelnut trees are planted for anti-erosion and decorative purposes throughout Ukraine.

**Hazeta dlia narodnykh uchyteliei** (Newspaper for Elementary School Teachers). An official weekly publication of the Hungarian Ministry of National Education, which appeared in Budapest from 1868 to 1873. It was published in the languages of the nations living in Hungary – Hungarian, German, Rumanian, Slovak, Ukrainian (Ruthenian), Serbian, and Croatian – and distributed free of charge to schools in Hungary. Beginning in 1872 (issue 42), it was printed using phonetic spelling.

**Hazeta shkol'na** (School Newspaper). Periodical devoted to education, published semimonthly in Lviv from 27 May 1875 to the end of 1879 (from 1877 it was also a literary journal). A total of 110 issues appeared. It was published and edited by O. \*Partytsky, who also was author of many articles on pedagogical, historical, and literary subjects. Contributors included O. Barvinsky, O. Ohonovsky, H. Vretsona, S. Kurylovych, O. Oryshkevych, Z. Savchynsky, and P. Zaklynsky. Literary works by such writers as T. Shevchenko, M. Shashkevych, Yu. Fedkovych, M. Vovchok, M. Ustyianovych, O. Konysky, F. Zarevych, and S. Vorobkevych were also published. The journal published articles on the methodology of teaching various subjects and on cultural and economic issues, as well as reviews, biographies, and reports from the homeland. *Hazeta shkol'na* was populist in character and advocated the use of Ukrainian in schools.

**Health care.** See Public health.

**Health education.** The system of dissemination of health, sanitation, and medical knowledge with the aim of improving conditions in the workplace and of life in general, maintaining health and longevity.

In Ukraine, early texts such as the *Izbornik* of Sviatoslav, *Fizioloh*, and *Pchola* contained advice on medicine and hygiene. In the 16th and 17th centuries such advice was dispensed in various herbals and self-healing manuals (*lechebnyky*, *zelnyky*, *vertohrady*), most of which were translations of Byzantine or Western European texts. In the 18th and 19th centuries medical knowledge was disseminated by Ukrainian medical scientists, including D. Samoiloivych, K. Yahelsky, O. Shafonsky, M. Hamaliia, F. Barsuk-Moisieiev, N. Ambodyk-Maksymovych, and Ye. Mukhin. Popular medical texts were written by S. Venechansky (about the treatment of venereal diseases), Ya. Sapolovych and I. Kamenetsky (for priests and seminarians), I. Kashynsky, F. Loievsky, and O. Maslovsky.

In the Russian Empire in the 19th and early 20th centuries, Ukrainians published articles in such popular medical publications as *Drug zdaviaia*, *Populiarnaia meditsina*, *Zdorov'e*, *Vegeterianskii vestnik*, *Vegeterianskoe obozrenie*, and *Zdorovaia zhizn'*. Important work in health education was done by the zemstvos (see \*Zemstvo medicine) and the Pirogov Society of Russian Physicians, under whose auspices the Commission for Popular Hygiene Education was formed in 1894. Both the zemstvos and the Pirogov society published popular pamphlets on health care, including some by Ukrainian authors such

as O. Yakovenko and O. Tarasenko. They were published in Ukrainian by the \*Philanthropic Society for Publishing Generally Useful and Inexpensive Books in St Petersburg. Health care was taught in army units from 1861. In Kiev, public lectures in medicine were given from 1886. Other popular medical works written in the latter half of the 19th century include *Pro khvoroby i iak im zapobihaty* (On Diseases and Their Prevention, 1874) by S. Nis and S. Podolynsky's *Zhyttia i zdorov'ia liudei na Ukraini* (The Life and Health of the People in Ukraine, 1879). *Zhyttia i Znannia*, the first Ukrainian-language medical journal in Russian-ruled Ukraine, was published in Poltava in 1913–14.

During the period of the struggle for Ukrainian independence health education was conducted by the Ministry of Public Health and the Ukrainian Red Cross under both the government of the UNR and the Hetman government. In the Western Ukrainian National Republic it was the responsibility of the Commissariat and Council for the Protection of Peoples' Health.

In Western Ukraine, in addition to the work done by official agencies in Galicia and Bukovyna, considerable health education was conducted by the \*Prosvita society. Later, various other Ukrainian health organizations included the temperance and anti-nicotine Vidrodzhennia society (founded 1909), the Ukrainian Physicians' Society (founded 1910), the Ukrainian National Society for Child and Adolescent Care (founded 1917), and the Ukrainian Hygienic Society (founded 1929). These organizations, with their local branches, published pamphlets on health protection and hygiene, and organized lectures, displays, and other activities. In addition, magazines such as *Zdorovlie*, *Vidrodzhennia*, and *Narodne zdorovia* educated the masses about health care.

In the USSR, health education is conducted by the Ministry of Health, the Ukrainian Red Cross, the Znannia Society, various cultural-enlightenment organizations, trade unions, sport associations, and universities. Health education is taught in schools. Workers in the agricultural and food industry and food services are required to conform to minimal sanitary and hygienic standards. Lectures on industrial health and hygiene are given to industrial workers. In villages there are community health schools. Systematic health education is also conducted by various institutions of preventative medicine (eg, \*sanitary-epidemiological stations, hospitals) and by the military. Each oblast and raion center has a health-education council under the Ministry of Health of the Ukrainian SSR as well as buildings of sanitary education that co-ordinate health education in the various centers. In 1977 there were 86 such buildings in Ukraine. At the Ukrainian Scientific Research Institute of General and Communal Hygiene there is a methodological center for health education. Medical knowledge is also spread through the press, cinema, and television. Before the Second World War, many popular health journals were published, including *Shliakh do zdorov'ia* (1925–41), *Chervonyi Khrest* (1929–41), *Iunatskyi Chervonyi Khrest*, and *Psyhohihienu v masy* (1933–4). Recently, however, the publication of materials on health and hygiene in Ukrainian has decreased greatly. Much health education in the USSR is intended to serve the political and economic interests of the state. Besides simple health care, its goals include the propagation of a socialist lifestyle, the 'rational use of work and leisure time,' and the struggle

against alcoholism, illegal drug use, and other harmful practices. Continuing problems in public health – eg, periodic outbreaks of epidemics almost unknown in developed countries, high absentee rates due to illness, and a recent and unprecedented decline in life expectancy rates – suggest that health education in Ukraine may not be particularly effective, despite the considerable resources devoted to it.

From 1945 onwards, health education among Ukrainian émigrés was conducted by the Ukrainian Red Cross in West Germany and Austria and by the Ukrainian Medical-Charitable Service, based in Munich. Some work is also done by the Ukrainian Medical Association of North America.

V. Pliushch

**Health resorts and sanatoriums.** Facilities for treating or preventing diseases and improving health. Health resorts are located in areas with natural curative resources such as a favorable climate, mineral springs, muds, limans, beaches, and special local foods. Although their medicinal value is sometimes questioned, health resorts are extremely popular in Ukraine and are an important component of the entire system of public-health care. Some sanatoriums and rest homes are located at health resorts. Others serve as vacation spots, although they may also offer a varied program of physiotherapy and general or specialized medical treatment.

The earliest records about curative localities in Ukraine refer to mineral springs in Transcarpathia, then under Hungarian rule. Ivan IV's envoys, returning in 1558 from Constantinople to Moscow through the Carpathian Mountains, observed that mineral baths in this region provided an effective cure for various illnesses. For many centuries local inhabitants took advantage of the curative powers of mineral springs and muds in Ukraine. Some areas in Galicia such as Shklo, Liuben Velykyi, and Nemyriv attracted visitors from abroad as early as the 17th century. In Russian-ruled Ukraine health resorts began to develop at the beginning of the 19th century on the limans near Odessa, at Slovianske and Berdianske, and particularly on the Crimean coast. Private hospitals and boarding homes with a total of up to 1,000 beds were established there. Patients bathed directly on the beach or at the spring. The first baths were built in Kuialnyk only in 1834. In the second half of the 19th century the expansion of the railway network led to the rapid development of health resorts. With the opening of the Odessa–Kuialnyk railroad in 1873 Kuialnyk was developed rapidly as a resort area. By the turn of the 20th century the resort areas in southern Ukraine provided such facilities as sanatoriums, hotels, boarding homes, and balneological hospitals, all of them private, profit-making facilities. At the same time so-called cottage districts were established in the vicinity of the larger cities. By 1917 the boarding homes (excluding those in cottage districts and hotels) in Russian-ruled Ukraine had a capacity of 2,000 boarders.

Balneological research was begun in Ukraine at the end of the 19th century by Y. Mochutkovsky, who founded the Odessa Balneological Society. Other contributors to the field included Ya. Bardakh and O. Veryho. In 1914 O. Shcherbak founded the Sechenov Clinical Institute of Physical Therapy in Sevastopol, which he directed for 20 years. New methods of balneotherapy (mud therapy), which won recognition abroad, were developed there.

After the Revolution of 1917 all health resorts came under the authority of the mining department of the RSFSR Supreme Council of the National Economy, and in 1918 under the People's Commissariat of Health of the RSFSR. In March 1919 all health resorts and health resort areas were nationalized, and in 1920–1 the Crimean palaces, private buildings, and cottages located in resort areas were confiscated for the purpose of converting them into sanatoriums and rest homes. The Sanatorium–Health Resort Administration of the People's Commissariat of Health of the Ukrainian SSR was set up in 1919, but it did not gain control over all-Union resort areas of Odessa, Berdianske, and Slovianske until 1925. In 1920 Ukraine's Commissariat of Health established a health resort commission, which included such members as Ye. Brukser, T. Brusylovsky, and S. Nalbandov, to oversee the development of health resorts. This commission laid the foundations of health-resort studies in Ukraine. In 1920 there were 46 general sanatoriums with 4,050 beds and a number of mud sanatoriums in Ukraine (excluding the Crimea and Western Ukraine).

In 1922 a state tuberculosis institute was founded in Yalta, at which, from 1925, research on the microclimate of the resorts on the southern coast of the Crimea was done. In 1931 this institute was reorganized into the Institute for the Climatotherapy of Tuberculosis, which in 1955 was merged with the Institute of Physiotherapy in Sevastopol to form the Scientific Research Institute of Physiotherapy and Climatotherapy in Yalta. The Scientific Research Institute of Health Resort Studies, which is the chief research institute in the field, was established in Odessa in 1928 on the basis of the All-Ukrainian Balneological Institute (Lermontov Resort), founded in 1923. The institute has four departments, four clinics, a number of research laboratories, a branch in Uzhhorod, clinical resorts in Berdianske and Truskavets, and 30 control and biochemical stations in various localities of Ukraine. It publishes the annual collection *Kurortologiya i fizioterapiia*.

By 1936 there were 359 sanatoriums and 173 rest homes with 58,923 beds in Soviet Ukraine. Twenty-five health-resort areas in Vinnytsia, Dnipropetrovske, Donetsk, Kiev, Odessa, Kharkiv, and Chernihiv oblasts had been developed. Besides health facilities run by the Commissariat of Health, there were health resorts and rest homes managed by various government departments and trade unions. In this period there were three curative mud areas in Ukraine (Kuialnyk, Khadzhybei Liman, and Hola Prystan), three balneological areas (Myrhorod, Berezivski Mineralni Vody, and Shepetivka), three mixed resort areas (Slovianske, Kyrlyvka, and Berdianske), and numerous climatic resort areas, such as Sosnivka, the suburbs of Kiev, Hadiache, Sharivka, and Krominne. The annexation of Western Ukraine during the Second World War greatly increased the number of resorts in Ukraine, although many were closed or damaged during the war. In 1954 the Crimea with its numerous resorts was also incorporated into Ukraine; hence, the number of sana-

toriums increased to 506 (69,500 beds) and the number of rest homes to 148 (25,130 beds). In 1956 all health resorts were placed under Ukraine's Ministry of Health, and in 1960, except for tuberculosis facilities, they were transferred to the All-Union Central Council of Trade Unions. Today all health resorts and sanatoriums in Ukraine, except tuberculosis and childrens' sanatoriums, as well as a few maintained for Party and government leaders and the KGB, are overseen by the Ukrainian Health Resort Administration of the Trade Unions in Kiev. In 1970 a system classifying health resorts by union, republican, and local status was introduced. Resorts on the Crimean coast, in Truskavets, Odessa, and Berdianske, were given union status. The increase in the number of health facilities in Ukraine is depicted in table 1.

TABLE 1  
Number of sanatoriums, rest homes, and resorts  
(number of beds, in thousands, in parentheses)

Type of facility	1970	1975	1980	1984
Sanatoriums and rest homes	1,847 (301)	2,737 (462)	2,991 (561)	3,243 (614)
Sanatoriums and boarding homes with medical care	483 (113)	486 (122)	507 (143)	508 (150)
Children's sanatoriums	202 (34)	206 (35)	210 (37)	213 (39)
Preventive sanatoriums	266 (19)	320 (26)	393 (36)	437 (41)
Rest homes and boarding homes	186 (51)	242 (77)	270 (93)	292 (98)
Rest resorts	804 (94)	1,499 (175)	1,643 (219)	1,816 (256)
Tourist resorts	108 (24)	190 (62)	178 (70)	190 (69)

Except for Lviv oblast, health resorts in western Ukraine are as yet underdeveloped. The largest number of health-care facilities is found in the Crimea and Odessa oblast. In number of health resorts, Ukraine is second only to the RSFSR in the Soviet Union. Ukraine has resorts of every type. In quantity and variety, Ukraine has some of the richest reserves of mineral waters in the USSR. Over 500 mineral springs have been registered by the AN USSR. The largest number of springs is located in western Ukraine. The most famous resort is Truskavets in Lviv oblast. Mineral waters from its 14 springs are used in treating stomach, intestine, and liver disorders. Its unique spring called Naftusia yields water that is reputed to be effective against kidney stones. Stomach, intestine, and liver ailments as well as metabolism disorders are treated also at Poliana, Soimy, Shaian (Transcarpathia), and Morshyn (Lviv oblast). The hydrogen sulfide springs in Nemyriv, Liuben Velykyi, Shklo (Lviv oblast), and Syniak (Transcarpathia) are thought to be helpful in treating cardiovascular, gynecological, dermatological, and neurological diseases. Peat muds and ozocerite, which are found in these areas, are also used in the treatment. Transcarpathia, with over 300 springs producing carbonic, hydrogen sulfide, sodium chloride,

hydrocarbonate-sodium chloride, sodium hydrocarbonate, and other waters, is well known throughout the USSR. Mineral waters with different chemical contents are found also in the Lemko region, in Ivano-Frankivske, Poltava, Kharkiv, and Crimea oblasts, and elsewhere. Radioactive mineral waters in large quantities are available in Khmilnyk in Vinnytsia oblast, Kyrylivka and Berdianske in Zaporizhia oblast, Teterivske in Zhytomyr oblast, Bila Tserkva and Myronivka in Kiev oblast, and other places in south-central Ukraine. Resorts on the limans (Kuialnyk, Khadzhybei, and Sukhyi) and lakes of the Odessa region, on the Azov coast (Yeiske and Utiuk limans and lakes near Zhdanov and Berdianske), and in the Crimea (Saky, Chokratske, Adzhi-Hal, Syvash lakes) are famous for their mud baths. Besides muds of marine origin there are muds of continental origin on Hola Prystan Lake and Hopra Liman in Kherson oblast, Solenyi Liman in Dnipropetrovske oblast, and at Slovianske, Donetsk oblast. In northwestern Ukraine there are also rich deposits of peat muds suited for medicinal use.

Climatic resorts are scattered throughout Ukraine. In the west they are located near balneological resorts. Tuberculosis is treated at mountain resorts of Ivano-Frankivske oblast such as Yaremcha, Vorokhta, and Kosiv. Staryi Krym in the Crimea is also a mountain resort. The most popular climatic resorts are the sea-bathing resorts on the southern coast of the Crimea (Alupka, Alushta, Haspra, Hurzuf, Yevpatoriia, Koreiz, Livadiia, Planetsarske, Simeiz, Sudak, Teodosiia, Foros, and Yalta), and in the vicinity of Odessa (Velykyi Fontan and Zatoka). There are many climatic resorts in the coniferous and mixed forests of Kiev oblast (in Boiarka, Bucha, Verzel, Irpin, and Koncha-Zaspa), Kharkiv oblast (in Volodymyrivka, Zanky, and Komarivka), Cherkasy oblast (in Prokhorivka), Vinnytsia oblast (in Pechera and Khmilnyk), and Lviv oblast (in Briukhovychi).

The importance of rest resorts and tourist resorts is increasing steadily. Adults usually take advantage of sanatoriums and boarding homes on designated tourist routes. Young people stay in facilities maintained by the Pioneer organization and schools, and in children's recuperative facilities under the control of the Ministry of Health. The number of people using health resorts is given in table 2. In 1985, 11.4 million people made use of the various resorts, sanatoriums, and rest facilities in Ukraine. Of these 9.7 million received lengthy treatment or rest, 0.8 million received one- or two-days' rest, and 0.9 million used the sanatoriums on tourist routes during holidays. Over 5 million children and teenagers used the facilities. The normal stay at sanatoriums was 24 days to two months, and at rest homes from 12 to 24 days. Individuals usually use sanatoriums and health-resort facilities free of charge (the costs are covered by the trade unions), or else, on a physician's recommendation and with the approval of trade-union authorities, pay 30 percent of the cost. Over a million people from other republics of the USSR and from abroad make use of Ukraine's health resorts. Some 40,000 people work in these facilities, including 3,500 physicians and over 8,000 middle-level medical staff.

There are plans to distribute sanatoriums and health resorts more evenly throughout Ukraine and to increase the output of bottled mineral water. At present, about 0.5 million bottles are produced at 30 springs, and most

TABLE 2  
Number of people using sanatoriums and rest homes on an annual basis, by type of facility (in thousands)

Type of facility	1970	1975	1980	1983
Sanatoriums and rest facilities	3,255	6,375	7,809	9,650
Sanatoriums and boarding homes with medical care	882	1,118	1,377	1,477
Preventive sanatoriums	203	293	453	534
Resort polyclinics on tourist routes	244	260	337	313
Rest homes and boarding homes	759	1,064	1,148	1,200
Rest resorts	424	949	1,112	1,441
Tourist resorts	743	2,691	3,382	4,685

of them are consumed outside Ukraine. Plans call for the training of more health resort physicians.

**Heather** (*Calluna*; Ukrainian: *veres*). Plant genus of the Ericaceae family containing one species – the Scotch heather (*C. vulgaris*). This evergreen bush reaches a height of 30–60 cm. It is closely leaved and has purplish pink, bell-shaped, honey-yielding flowers. It grows in forests (mostly pine forests), forest clearings, and peat bogs. In Ukraine heather is found in Polisia, the forest belt of the Carpathian Mountains, and Roztochia-Opilia, but rarely in the forest-steppe belt.

**Heavy industry.** Group of industries that turn out producer goods in contrast to light industry, which manufactures consumer goods. According to Soviet classification heavy industry includes such branches as the \*electric power, \*fuel, \*metallurgical, \*chemical, \*petrochemical, \*machine-building, \*metalworking, \*lumber, \*paper, and \*building-materials industries. In 1984 heavy industry accounted for 66 percent of both Ukraine's and the USSR's total industrial output. Since Stalin's industrialization drive heavy industry has been stressed more than any other branch of the Soviet economy. Soviet authorities view heavy industry as the source of raw materials, capital stock, and technology for other branches, and as the moving force in the growth of the economy as a whole.

Ukraine's share of heavy industry under the Russian Empire was very high. By the end of the 19th century a number of heavy-industry centers had sprung up in Ukraine: the \*Donets Basin (coal, iron, chemicals, and machines), the \*Dnieper Industrial Region (iron and non-ferrous ores and metallurgy), the \*Kryvyi Rih Iron-Ore Basin, and the Kharkiv region (machines and metalworking). In 1913 Ukraine produced over 90 percent of the empire's output of coke, 78 percent of its coal, 75 percent of its iron ores, 69 percent of its pig iron, and 58 percent of its steel. Yet the Ukrainian economy was

still not biased towards heavy industry; its gross national product was divided almost equally between industry and agriculture. Except for the petroleum industry, which developed rapidly towards the end of the 19th century in Galicia, Western Ukraine under Austrian rule remained an industrially undeveloped region.

In the Soviet period Ukraine's heavy industry served as the basis of the accelerated industrialization of the USSR. The construction in the 1930s of the \*Dnieper Hydroelectric Station, the largest station in Europe at the time, was a major achievement. Coal mining and the iron and steel industry in Ukraine, which were important for strategic as well as economic reasons, were strongly supported. The growth in producer goods was much faster than in consumer goods. With the rise of new industrial centers in the Urals and western Siberia, Ukraine's share in the total USSR output of most producer goods fell. Ukraine's heavy industry recovered slowly from the destruction it sustained during the Second World War. For most of its products, 1940 output levels were reached only in the early 1950s, when Ukraine's industry grew at a faster rate than the USSR's or the RSFSR's industry. Again producer goods were favored over consumer goods. New industries producing automobiles, electrotechnical equipment, precast reinforced-concrete structures, and other products were established. The pace of industrial growth slowed in the 1960s and 1970s.

In the early 1980s more than 85 percent of Ukraine's electric power was produced by thermal power stations, most of which burned coal. The fuel is supplied mostly by the Donets Basin and is becoming more and more difficult to extract. To reduce dependence on fossil fuels and to increase the power supply of the European part of the USSR and Eastern Europe, nuclear power stations are being rapidly constructed. In the 1981–5 period construction work on seven stations, three of which were already in operation, was under way: Chornobyl, Zaporizhia, Khmelnytskyi, Odessa, Crimean, Rivne, and southern Ukraine.

In 1983 Ukraine's output of iron ore exceeded the combined output of the United States and Canada. The metal content of Ukraine's ore is higher than that of ores from other parts of the USSR, but because of lack of proper equipment the ore is not always enriched. Obsolescent equipment is a problem that plagues the Ukrainian iron and steel industry. In recent years serious attempts have been made to modernize technology and to improve the quality of metals. To increase the output of coke, lack of which restricts the growth of the iron and steel industry, much attention is given to the substitution of low-grade for high-grade coal in its production.

Ukraine is rich in minerals: more than 7,000 deposits have been discovered and 4,000 of these have been explored. Mining is a mixed blessing, however. Of the 1.5 billion cu m of rock extracted annually, 70 percent is dumped. This is extremely harmful to the environment. Strip mining and building-materials quarrying are also contributing to environmental problems.

Ukraine's chemical industry expanded in the 1950s, and its share in the country's total industrial output has grown steadily. It is more successful in meeting agriculture's demand for fertilizers than industry's demand for synthetic materials. The petrochemical industry is relatively new to Ukraine. Automobile tires and various consumer goods began to be manufactured only 30 years ago.

TABLE 1  
Ukraine's output of important heavy-industry products (percent of USSR output in parentheses)

Product group	1940	1960	1970	1980	1983
Electric power (billions of kWh)	12.4 (25.3)	53.9 (18.5)	137.6 (18.6)	236.0 (18.2)	242.9 (17.2)
Coal (millions of tonnes)	83.8 (49.6)	172.1 (42.7)	207.1 (41.2)	197.1 (34.0)	-
Rolled steel (millions of tonnes)	6.5 (49.6)	18.0 (35.3)	32.7 (35.4)	36.0 (30.4)	37.6 (30.8)
Iron ore (million of tonnes)	20.2 (67.6)	59.1 (55.8)	111.2 (56.4)	125.5 (51.3)	124.0 (50.6)
Mineral fertilizers (at 100% nutrients, millions of tonnes)	0.2 (30.0)	0.8 (25.4)	2.5 (19.1)	4.1 (16.5)	5.0 (16.8)
Chemical fibers (thousands of tonnes)	1.6 (14.5)	14.2 (6.7)	65.3 (14.7)	161.2 (15.2)	181.7 (15.9)
Metal-cutting machine tools (thousands of units)	11.7 (20.0)	20.5 (13.1)	29.6 (14.7)	32.9 (15.2)	30.2 (15.9)
Tractors (thousands of units)	10.4 (32.9)	88.0 (36.8)	147.5 (32.1)	135.6 (24.4)	134.7 (23.9)
Excavators (units)	17 (0)	3,053 (24.6)	7,741 (25.0)	9,874 (23.6)	9,435 (22.5)
Diesel locomotives (units)	1 (20.0)	1,142 (87.6)	1,390 (93.6)	1,311 (95.1)	1,306 (95.0)
Freight cars (thousands of units)	10.3 (33.3)	17.6 (48.4)	29.6 (50.8)	31.6 (50.2)	30.6 (52.4)
Paper (thousands of tonnes)	27.9 (3.3)	134.3 (5.8)	187.4 (4.5)	209.0 (4.0)	274.2 (4.8)
Cement (millions of tonnes)	1.2 (20.7)	8.1 (17.8)	17.3 (18.1)	-	-

Ukraine's machine-building and metalworking industries are among the most advanced industries in the USSR. There is virtually no branch of these industries in Ukraine that is not well developed. Their share in Ukraine's industrial output doubled between 1965 and 1985. By 1990 they will account for almost one-third of the total output. These industries are modernizing their technology.

TABLE 2  
Share (in percent) of branches of heavy industry in Ukraine's industrial output (at 1982 prices)

Branch	1965	1975	1983
Electric power	3.3	3.4	3.2
Fuel	11.4	7.7	6.1
Chemical and petrochemical	3.6	5.4	6.2
Machine building and metalworking	14.5	21.2	27.4
Lumber and paper	3.1	2.7	2.7
Building materials	4.5	4.4	3.7
Total heavy industry	40.4	44.8	49.3

The growth of the lumber and paper industries in Ukraine is limited by the forest resources, which are located primarily in the Carpathian region. While lumber output declined during 1965-85, the paper industry, which imported raw materials from other Union republics, almost doubled its output.

The importance of the building-materials industry is evident from the fact that its low output has become a serious constraint on the rate of investment in Ukraine. Among its most important products are cement, precast reinforced-concrete structures, and wall materials.

According to the Twelfth Five-Year Plan (1986-90), Ukraine's total industrial output as well as its heavy-industry output is to increase by 18-21 percent. This increase entails an average annual growth rate of 3.6 percent, which is below the projected rate (4.1 percent) for the USSR as a whole. The emphasis is on electric power, iron and manganese ores, chemicals, and machines. In the machine-building and metalworking sector, higher-than-average growth rates are projected for the instruments, machine-tool, and chemical-machinery industries. Among specific products, programmed machine tools, robots, automatic machines, and computers

are given the highest priority. The technological modernization of the iron and steel industry and coal mining is viewed as the key to the smooth development of Ukraine's entire heavy industry. (See also \*International economic relations.)

**Heavy-machine-building industry.** See Machine building.

**Hebrew sources for the history of the Ukrainian language.** From the time of Kievan Rus', such sources are scarce. A letter of recommendation from the Jewish community of Kiev in the first half of the 10th century contains the first-ever record of the name of the city of Kiev; the so-called Schechter text (10th century) contains references to several ethnic names in Ukraine. There are a few records from the time of the mass settlement of Jews in Ukraine, beginning in the 14th century. The number of records increased substantially in the 16th and 17th centuries. They consist mostly of rabbinical responsa (by J. Hoeschel ben Joseph, A. Rapoport, J. Sirkes, and others), but also of several Hebrew chronicles, including N. Hanover's chronicle (1653; English trans 1950) of the Cossack-Polish War. These texts contain mentions of some Ukrainian place-names. Their linguistic value is diminished by the failure of the Hebrew alphabet to render vowels.

**Hegelianism.** The philosophy of G. Hegel (1770-1831) was the culmination of German idealism, which at the beginning of the 19th century had a dominant influence on philosophical thought in the Russian Empire, including Ukraine. This influence can be attributed partly to the government's effort to insulate Russia from French revolutionary ideas and to encourage intellectual contacts with Germany, and partly to the strength of Eastern Christian mysticism in Russia, which in the 17th and 18th centuries readily absorbed elements of German mysticism. The mystical interpretation of reality as a dy-

namic, spiritual whole determined by an internal dialectic prepared the ground for German idealism. The popularity of Romanticist literature in the second quarter of the 19th century made the reading public receptive to certain ideas espoused by German idealists.

In Ukraine, as in other parts of the Russian Empire, Hegel attracted attention first among university students, then among the reading public, and finally among university faculty. In 1833 a student circle devoted to the study of German idealism, particularly Hegel, arose at Kharkiv University. Among its members were I. Sreznevsky and A. Metlynsky. In the 1840s, when a brother of N. \*Stankevich (one of the first Hegel enthusiasts in Russia) studied in Kharkiv, a student circle devoted to German idealism was active there. In Kiev a student circle devoted to Hegel formed around Professor M. Kostyr, but no information about it is available. A Hegelian circle, to which I. Lashniukov belonged, arose in the 1840s at Nizhen Lyceum. From student circles Hegelian ideas spread to literary magazines and salons.

I. Borisov, rector of the Kiev Theological Academy (1830–6), encouraged the study of German idealism at the school and was a specialist on the subject. S. \*Hohotsky and O. \*Novytsky, two graduates of the academy who later taught philosophy at Kiev University, were strongly influenced by Hegel's historical approach and dialectical method. In his *Obozrenie sistemy filosofii Gegel'ia* (A Survey of Hegel's System of Philosophy, 1860) and his monumental *Filosofskii leksikon* (Philosophical Lexicon, 4 vols, 1857–73), Hohotsky recognized Hegel's system as the culmination of philosophy, but rejected his concept of the absolute and his deduction of finite subjects. By removing God and finite spirits from the scope of the dialectic, Hohotsky attempted to reconcile Hegel with theism. Novytsky's major work, *Postепенnoe razvitiie drevnikh filosofskikh uchenii v sviazi s razvitiem iazycheskikh verovanii* (The Gradual Development of Ancient Philosophical Doctrines in Relation to the Development of Pagan Beliefs, 4 vols, 1860–2), was greatly influenced by Hegel. K. Nevolin, who in 1829 attended Hegel's lectures in Berlin, taught law at Kiev University (1834–43) and was one of the most successful propagators of Hegelian ideas in Ukraine. A number of other professors of Kiev University were influenced by Hegel to one degree or another: M. \*Ivanyshch, a specialist in state law who had studied in Berlin and had known N. Stankevich; M. Piliankevych, assistant professor of law; V. Krasov, professor of literary theory (1837–9) and a friend of N. Stankevich; M. Kostyr, professor of literary history (1839–50, then at Kharkiv University 1850–3); O. \*Fedotov-Chekhovskiy, a historian of law; and P. Pavlov, professor of Russian history and the history of art (1847–59). Traces of Hegelianism can be detected in the outlook of the university's first rector, M. \*Maksymovych, who was influenced mostly by Schelling, and in the writings of the historian M. Kostomarov.

At Kharkiv University the most influential teacher of Hegel's philosophy of history was M. Lunin, professor of universal history (1835–44). His student, A. Roslavsky-Petrovsky, a historian and statistician, dealt with philosophical problems of history in a Hegelian spirit (1837–72). A. Metlynsky, professor of Russian literature, was influenced deeply by Hegel, particularly on the question of national culture. Two other members of the Kharkiv faculty were influenced by Hegel: A. Walicki,

professor of classical philology (1835–58), and A. Paliumbetsky, professor of law (1838–76).

In Odessa A. Bakunin, a Hegelian and the brother of M. Bakunin, taught jurisprudence at the Richelieu Lyceum (1844–6). O. \*Mykhnevych, professor of philosophy at the lyceum, attempted to reconcile German idealism with theism and was influenced by Hegel's historicism. Hegel's ideas were mentioned often in the lectures of K. Zelenetsky, professor of literary history (1812–58) and a follower of Schelling. At Nizhen Lyceum I. Lashniukov, professor of Russian history (1853–68), was familiar with Hegel's ideas and referred to them in his lectures, and M. \*Tulov, professor of literature who had studied with O. Novytsky, was interested in Hegel.

In Austrian-ruled Galicia some acquaintance with Hegel was evident in Y. Chachkovsky's work *Versuch der Vereinigung der Wissenschaften* (pt 1, 1863), in which he proposed an original system of categories. K. Hankevych, a philologist, referred to Hegel in his attempt to define the character of Slavic philosophy.

In the 20th century the Ukrainian émigré scholar D. \*Chyzhevsky explored Hegel's influence in such works as *Hegel bei den Slaven* (1934) and *Gegel' v Rossii* (Hegel in Russia, 1939). In the Ukrainian SSR P. Demchuk and V. Yurynets have studied Hegel from a Marxist viewpoint. V. Shynkaruk has made an important contribution to Hegelian studies: *Logika, dialektika i teoriia poznaniia Gegel'ia* (Hegel's Logic, Dialectics, and Theory of Knowledge, 1964).

Although it was quite extensive, Hegel's influence in Ukraine was not very deep. While many specific ideas were borrowed from him, no original contributions to his system were made and no new system was inspired by him.

**Hegumen** (*ihumen*). Title of the superior of a small monastery in the Eastern church (the superior of a large monastery is called an \*archimandrite). In the Russian Empire after the secularization of monastic properties in 1764, a hegumen was the superior of a monastery relegated to the so-called third class; first- and second-class monasteries were headed by archimandrites. The superior of a convent is called an *ihumenia*. In the Greek Catholic church the superior of all the monasteries in a given province is called a *protoihumen*. In Ukraine hegumens were influential during the Princely and Cossack eras, especially in the fields of literature and education. They participated in sobors, in the election of bishops, and occasionally in Cossack councils.

**Heimanovych, Oleksander** [Hejmanovyč], b 4 August 1882 in Kharkiv, d 18 April 1958 in Kharkiv. Neurologist. A graduate of Moscow University (1909), he organized a neurological center in Kharkiv during the First World War and in 1920–1 reorganized it into the Ukrainian Neurological Institute. He served as the first director of the institute and then as director of its neurological clinic and neurological laboratory (1937–53). In 1932 Heimanovych was elected vice-president of the

Ukrainian Psychoneurological Academy. Heimanovych wrote over 300 works on neuropathology, neurosurgery, infectious diseases and traumatic injuries of the central nervous system, and swelling of the brain.

Maksym Hekhter

Ivan Hel

**Hekhter, Maksym** [Hexter], b 1885 in the Kiev region, d 25 December 1947 in Prague. Publicist and political activist of Jewish descent. Hekhter was a member of the Revolutionary Ukrainian party and the Bund. In 1905 he was arrested for propagating Ukrainian autonomy among workers and briefly imprisoned. He worked for the journals *Rada*, *Literaturno-naukovyi vistnyk*, *Ekonomist* (1904–14), *Dilo*, and others, contributing mostly articles on socioeconomic subjects. The UNR Directory appointed him a member of its diplomatic mission to the United States in 1919, but he was unable to take up his position. In the interwar period he settled in Prague. He wrote prolifically on cultural and political life in Ukraine for the Western press, particularly for such journals as *Prager Presse* (1921–38) and *Slavische Rundschau* (1929–39).

**Hel, Ivan** [Hel'], b 18 July 1937 in Klitsko, Horodok county, Galicia. Political dissident. Hel was expelled from secondary school in 1952 for refusing to join the Kom-somol. In 1954 he graduated from a trade school in Sambir and went to work in Lviv. In 1965 he was arrested for distributing Ukrainian samvydav. He received a sentence of three years in a labor camp, which he served in Mordovia. During this time he wrote a number of protests to Soviet officials. Released in 1968, Hel worked as a metalworker and teacher until his dismissal because of political activism. He was rearrested in 1972 and sentenced to 10 years in labor camps and 5 years in exile. He was released in 1987 and returned to Lviv.

**Helias, Yaroslav** [Heljas, Jaroslav], b 21 November 1916 in Terpylivka, Zbarazh county, Galicia. Stage actor and director. He made his stage debut in 1935 in the touring Tobilevych Ukrainian People's Theater in Galicia. He has worked at the Ukrainian drama theaters of Lviv (1939–49, 1958–61), Kharkiv (1949–57), Odessa (1961–3), and Ternopil (1963–74). In 1974 he was appointed chief stage director at the Transcarpathian Ukrainian Music and Drama Theater in Uzhhorod. He has directed plays by I. Franko, O. Dovzhenko, J. Słowacki, S. Petőfi, L. Zabolshata, K. Čapek, and others. Some of his best roles have been Zadorozhny in I. Franko's *Ukradene shchastia*

Yaroslav Helias

(*Stolen Happiness*) in 1940, Don Juan in Lesia Ukrainka's *Kamynnyi hospodar* (*The Stone Host*) in 1942, Hamlet in W. Shakespeare's play (1943 and 1957), Vorkaliuk in Ya. Halan's *Liubov na svitanku* (*Love at Dawn*) in 1952, Chatsky in A. Griboedov's *Woe from Wit* in 1948, and Vadym in O. Levada's *Faust i smert'* (*Faust and Death*) in 1961.

**Hellenisms.** Words and expressions borrowed from the Greek (Gk). Their number in proto-Slavic was very limited: *komora* (Gk *kamára*, 'vault'), *korabel'* (Gk *karábion*, 'ship'), and possibly *banja* (Gk *bálaneion*, 'bathhouse') and *terem* (Gk *téremnon*, 'house,' 'dwelling'). With the Christianization of Rus' many Hellenisms entered into the Old Ukrainian language, primarily via Bulgarian. Certain ones were used only in the bookish language; others, however, also became part of the vernacular. Most Hellenisms of this period were religious and ecclesiastical terms: eg, *apostol* (Gk *apóstolos*, 'apostle'), *jevanhelije* (Gk *euaggélion*, 'Gospel'), *ieretyk* (Gk *airetikós*, 'heretic'), *idol* (Gk *eidōlon*, 'idol'), *panaxyda* (Gk *pannukhída*, 'requiem'), and *janhol* (Gk *ággelos*, 'angel'); first names: eg, Vasyľ' (Gk *Basileios*) and Sofija (Gk *Sophia*); and scientific terms: eg, *apostrof* (Gk *apostrophē*, 'apostrophe'), *aromat* (Gk *árōma*, 'aroma'), *astronomija* (Gk *astronomía*, 'astronomy'), *dijalekt* (Gk *diálektos*, 'dialect'), *hramatyka* (Gk *grammatikē*, 'grammar'), *dijafrahma* (Gk *diáphragma*, 'diaphragm'), *piramida* (Gk *pūramíd*, 'pyramid'), and *planeta* (Gk *plánētes*, 'planet'). Such Hellenisms as *kyparys* (Gk *kupárisos*, 'cypress'), *kyt* (Gk *kētōs*, 'sea monster,' 'whale'), *okean* (Gk *Ōkeanós*, 'ocean'), *kutja* (Gk *koukkía*, 'beans,' 'seed,' a festive dish made of wheat kernels, poppy seed, and honey), *voxxra* (Gk *ōkhra*, 'ochre'), possibly *ohirok* (Gk *ágouros*, 'cucumber') and *subota* (Gk *Sámbaton*, 'Saturday') were widespread. Gk calques were also widely used, eg, *vseleuniaia* (Gk *oikouménē*, 'universe'), *Bohorodycja* (Gk *Theotókos*, 'Mother of God'), and *blahoslovennja* (Gk *eulogía*, 'benediction'). A number of Ukrainian phrases and proverbs are of Gk origin; eg, *klyn klynom vybyvajut* ('a wedge is knocked out with a wedge') and *vyjty sukhym z vody* ('to emerge dry from the water').

A second, smaller influx of Hellenisms occurred in the 15th and 16th centuries. They were introduced through literature by Balkan refugees fleeing Turkish rule and partly by Rumanian and Bulgarian settlers and herders moving in the Carpathian region. The latter brought such words as *kolyba* (Gk *kalúbē*, 'cottage,' 'hut') and *trojanda* (Gk *triántáphullon*, 'rose'). Later (18th and 19th century) Hellenisms were part of the argot into which they pen-

erated from Greek merchants and settlers on the Black Sea littoral – eg, *joryj* (Gk *geraiós*, 'old') and *kimaty* (Gk *koimōmai*, 'to sleep') – and did not enter standard Ukrainian. However, many words formed from Gk elements in Western Europe have been widely used as scientific terms in Ukrainian; eg, *daktyloskopiia* (dactyloscopy) and *telefon* (telephone).

G.Y. Shevelov

**Helman, Maks** [Hel'man], b 10 December 1892 in Odessa. Sculptor and pedagogue. He studied in art schools in Petrograd (1916–17), Moscow (1921–2), and Leningrad, where he was a student of A. Matveev. From 1926 he was a lecturer and then a professor (1939–69) at the Kiev State Art Institute. His works on revolutionary themes include the bas-reliefs *The Barricades* and *Zymoov's Assault* (1927), the sculptures *Our Change* and *The Guardian in the Air* (1929), and the frieze on the building of the Council of People's Commissars in Kiev (1933). He is also known for his sculpted portraits of writers such as G. Shkurepuii and V. Pidmohylny, and the artists V. Kasiian and M. Zankovetska.

**Helsinki Accords.** See Ukrainian Helsinki Group.

**Hemp** (*Cannabis sativa*; Ukrainian: *konoplia* or the plural *konopli*). A plant of the Cannabaceae family, or its fiber; one of the group of plants from which bast fibers are obtained. The best soils for hemp are chernozems and drained peat bogs. In Ukraine the most common sorts of hemp are Dnipropetrovske hybrids 1 and 4; the Southern maturing monoecious 1, 4, and 9; the Poltava monoecious 3; and the Southern Cherkasy. Hemp is grown primarily in Chernihiv, Cherkasy, Poltava, Sumy, Mykolaiv, Dnipropetrovske, and Odessa oblasts.

Hemp has been used in Ukraine for a very long time. Archeological evidence confirms Herodotus's observation that the Scythians used hemp as a narcotic, and it is possible that they introduced the plant into Europe. Under the Russian Empire, hemp became a very important export crop. Local processing, however, was not encouraged (see \*Jute-hemp industry). The amount of land in Ukraine seeded with hemp has decreased greatly over the years, from 161,300 ha in 1901–5 to 183,000 ha in 1950, 80,000 ha in 1965, and 30,000 ha in 1982. The total yield of hemp fiber in 1982 was 43,000 t.

Hemp fiber was used by Ukrainian peasants for many purposes, but mainly for clothing. Hemp has also been used in folk medicine. The juice, flowers, and seeds were taken internally for their diuretic, pain-relieving, and sleep-inducing effects. Other uses of the plant included poultices and sutures in operations. Today hemp is used by the textile industry, for cordage (rope, twine, etc), fishnets, canvas, and upholstery and drapery materials. Its seeds contain 30–35 percent fatty oil, which is used in foods, paints, varnishes, soaps, and animal fodder. The garden variety of hemp is grown as an ornamental.

V. Kubijovyč, R. Yanchynski

**Heneralna starshyna.** See General Officer Staff.

**Henicheske** [Heničes'ke]. VII-15. City (1966 pop 18,600) and raion center in Kherson oblast, situated on the north-west coast of the Sea of Azov at the entrance to Syvash Lake. It was founded as a fort in 1784 and from 1812 was

also known as Ust-Ozivske. It was a port and a trade center on the salt route that went from the Crimea north to Ukraine and Russia; at the turn of the 20th century it had one of the largest flour mills in southern Ukraine. The administration of the \*Azov-Syvash Game Preserve is located there.

**Henicheske salt lakes.** A group of over 40 shallow saltwater lakes on Arabat Spit in the Crimea. The largest of these, Henicheske Lake (4.9 km long, up to 2.9 km wide, and up to 0.6 m deep), is exploited as a salt pan.

**Henicheske Strait.** A narrow, shallow strait joining Syvash Lake with the Sea of Azov off the northern tip of Arabat Spit. It is up to 150 m wide, 4 km long, and 4.6 m deep.

**Henry I**, b ca 1008, d 4 August 1060 at Vitry-aux-Loges, near Orléans. The king of France from 1031. In 1051 he married \*Anna Yaroslavna of Kiev, the daughter of Grand Prince Yaroslav the Wise. Henry's and Anna's older son, Philip I, was the successor to Henry; their younger son, Hugh, became the count of Vermandois.

**Heolohichnyi zhurnal.** See *Geologicheskii zhurnal*.

**Heorhii** [Heorhij], ?–1079. Kievan metropolitan. Of Greek origin, Heorhii arrived in Ukraine around 1062 and became, subsequently, the seventh metropolitan of Kiev. He was the author of a polemical work, *Stiazanie s latinoiu* (Struggle against the Roman Church).

**Heorhii of Zarub** [Heorhij Zarubs'kyj]. A monk at the Zarub monastery, which was located near present-day Zarubynsi, Kaniv raion, Cherkasy oblast. He is the author of an 'Instruction for Spiritual Offspring,' written probably in the late 12th or early 13th century, in which he rejects worldly pleasures, particularly entertainment by \*skomorokhy and musicians.

**Heorhiivka** [Heorhijivka]. v-20. Town smt (1977 pop 8,100) in Lutuhyne raion, Voroshylovhrad oblast. From the mid-18th century until 1917 it was called Konoplianiivka. It has a building-materials plant and a fish-packing plant.

**Heraldry.** The science and art dealing with hereditary insignia distinguishing individuals, institutions, and corporations, specifically with their origin and evolution and the rules governing their forms and use. As an ancillary historical discipline, heraldry is closely related to archeology, \*genealogy, paleography, numismatics, and sphragistics. (See also \*Coat of arms.)

Symbolic emblems were commonly used in patriarchal societies to designate the possessions of the clan. With the rise of feudalism and the emergence of private property, emblems were used to represent individual families or houses. The oldest signs were elementary symbols such as the cross (more than 200 forms are known in heraldry), the swastika, the square, the lozenge, the circle, and other simple signs mostly symbolizing the sun. In Ukraine, letter-like signs are also known. They were probably of Gothic origin, although some may possibly be relics of ancient Slavic writing. The oldest Ukrainian emblems have been found on pottery from the 8th cen-

tury, while crests and emblems of some princely and boyar families date back to the 10th century. Family emblems are mentioned frequently in *Ruskaia Pravda* (11th century), where they are called *rizy*, *mity*, and *p'iatna*. Many of these were based on a monogram of the family name. Crests of noble families were already widespread in the Galician-Volhynian Principality.

In the 15th and 16th centuries Western European heraldry – particularly in the form that it developed in Poland – began to strongly influence Ukrainian heraldry. Typical symbols such as the star, crescent, flowers, and weapons, as well as heraldic beasts and birds (eg, the lion, unicorn, horse, deer, griffin, eagle, stork, and raven), appeared in Ukrainian crests, often alongside older symbols. Most Ukrainian nobles in the Polish-Lithuanian Commonwealth (the Ostrozkys, Zaslavskys, Zbarazhskys, etc) had family crests, many of which can be found in the earliest published collections (eg, B. Paprocki's *Panosza* [1575] and *Herby rycerstwa polskiego* [1584] and J. Sibmacher's *Allgemeines grosses und vollständiges Wappenbuch ...* [1637]). In the 17th and 18th centuries many Cossack *starshyna* also adopted crests. These often stressed military motifs, and under the influence of the baroque became very elaborate. As some of these families and individuals rose to prominence in the Russian Empire, popular symbols from Russian heraldry were incorporated (eg, the crest of the Rozumovsky family includes two humble Cossacks as well as the two-headed eagle symbolizing the Russian throne). In the late 18th century many of the *starshyna* and older noble families sought to have their crests recognized by the imperial authorities.

The study of heraldry contributes to the understanding of family and national traditions and relations. Yu. Narbut illustrated several collections of Ukrainian and Russian crests, as well as the journal *Gerboved*, published in St Petersburg (1913–14). V. Lukomsky, V. Modzalevsky, and H. Mylorodovych made many contributions to heraldry in Ukraine in the early 20th century, as have the émigrés M. Bytynsky, V. Seniutovych-Berezhny, V. Shcherbakivsky, V. Sichynsky, and M. Miller. In the Ukrainian SSR in recent years heraldry has gained considerable popularity as an ancillary historical discipline.

M. Miller

**Herashchenko, Oleh** [Heraščenko], b 12 August 1925 in Chuvalachi, Uzbek SSR. Specialist in thermodynamics; since 1976 a corresponding member of the AN URSS. A graduate of the Kiev Polytechnical Institute, in 1951 he became a research associate of the AN URSS Institute of Technical Thermodynamics, and in 1974 he was appointed its director.

**Herasiuta, Mykola** [Herasjuta], b 18 December 1919 in Oleksandriia, Kherson gubernia. Specialist in me-

chanics and machine building; corresponding member of the AN URSS since 1967. Since 1952 he has taught at Dnipropetrovske University. His work is devoted to the dynamics of complex mechanical systems.

Lidiia Herasymchuk

**Herasymchuk, Lidiia** [Herasymčuk, Lidija], b 5 April 1922 in Kiev, d 5 December 1958 in Kiev. Ballerina. A graduate of the Kiev School of Choreography (1937), she worked as a soloist with the Kiev Opera and Ballet Theater (1935–41, 1944–58) and the Kirov Opera and Ballet Theater in Leningrad (1941–4). She appeared in numerous roles, including Marusia in A. Svechnikov's *Marusia Bohuslavka*, Venus and Mariula in K. Dankevych's *Lileia* (The Lily), and the Water Nymph in M. Skorulsky's *Lisova pisnia* (The Forest Song).

**Herasymchuk, Vasyl** [Herasymčuk, Vasyl'], 1880–1944. Galician historian and student of M. Hrushevsky; full member of the Shevchenko Scientific Society. He wrote primarily about Cossack history of the latter half of the 17th century. He compiled materials on the history of the Khmelnytsky period from Polish sources for the Archeographic Commission of the VUAN, but they were never published. He is the author of *Chudniv's'ka kampaniia 1660 r.* (Chudniv Campaign of 1660, 1913) and many articles in *Zapysky Naukovoho tovarystva im Shevchenka*.

**Herasymenko, Kost**, b 11 May 1907 in Prykhidky, Pryiatyn county, Poltava gubernia, d 27 September 1942. Poet and playwright. His first poems were published in 1925. He is the author of the poetry collections *Zrist* (Growth, 1933), *Veresen'* (September, 1935), *Pam'iat'* (Memory, 1938), *Doroha* (The Road, 1939), and *Portret* (Portrait, 1941); of the plays *Pry byttii dorozii* (By the Well-Travelled Road, 1939) and *Lehenda* (The Legend, 1941); and of the libretto to M. Verykivsky's opera *Naimychka* (The Servant Girl). A war correspondent, he was killed on the Caucasian front.

**Herasymovych, Ivan** [Herasymovyč], b 27 November 1876 in Halych, Galicia, d 11 May 1942 in Berlin. Educator

and community leader. From 1898 Herasymovych taught in various schools in Halych county. Fired from his position by the Polish authorities for nationalist activities, he resumed teaching in Bukovyna. In Chernivtsi he founded and published the semimonthly *Promin'* (1904–7), the first Ukrainian-language teachers' journal in the Austrian Empire. In 1918–19 he was the head of the press bureau of the Supreme Command of the Ukrainian Galician Army. With the Bolshevik takeover of Ukraine he fled to Berlin, where he edited the weekly *Ukrains'ke slovo* and wrote *Holod na Ukraïni* (Famine in Ukraine, 1922). From 1922 he lived in Lviv, where he worked in the central administration of the Ridna Shkola educational society and edited (1932–9) its journal by the same name. During the German occupation of Western Ukraine he worked in the schools department of the Ukrainian Central Committee in Cracow. He wrote textbooks and articles on educational matters.

**Herasymovych, Sylvestr** [Herasymovyč, Syl'vestr], b 1881, d June 1943. Co-operative organizer, Galician political leader. At the beginning of the 1920s he served as director of the Provincial Union of Farming and Trading Associations and as the Union's representative on the executive of the Provincial Audit Union. He was a founding member of the Provincial Committee for Organizing Co-operatives (est in Lviv in 1921). When the Provincial Union of Farming and Trading Associations was reorganized into \*Tsentrosoiuz in 1924, Herasymovych continued as director until 1929. At the same time he sat on the executive board of \*Silskyi Hospodar. In the 1930s he helped found the \*Front of National Unity and headed its political collegium. He also served as an editor in the Front's publishing house \*Batkivshchyna. In 1940 he was arrested by Soviet authorities and exiled to Kazakhstan.

**Herbert, Auberon**, b 1922, d 21 July 1974 in Dulverton, England. English journalist, defender of Soviet-occupied East-European nations. He graduated from Balliol College in Oxford. During the Second World War Herbert served as a volunteer in the Polish Corps. He was a founder (1953) and vice-president of the Anglo-Ukrainian Society. Later he was active in the Mazeppa Society. He published articles about the captive nations under Russia, particularly in the weekly *The Tablet* and in *The Daily Telegraph*.

**Herbest, Benedykt**, b ca 1531 in Nove Misto near Dobromyl, Galicia, d 4 March 1598 in Jarosław, Galicia. Polish Jesuit theologian and scholar. A graduate of the Cracow Academy, he was the rector of schools in Lviv (1555–8), Cracow, and Poznań, and the Jesuit college in Jarosław. An advocate of the Counter-Reformation in Western Ukraine, he actively promoted the conversion of the Ukrainian Orthodox elite to Catholicism and initiated a written polemic with H. \*Smotrytsky on this topic with his brochure *Wiary kościoła rzymskiego wywody y greckiego niewolstwa historia ... dla Rusi nawrócenia pisaney* (Elucidations of the Faith of the Roman Church and the History of Greek Enslavement ... Written for the Conversion of Rus', 1586).

**Herbilsky, Hryhorii** [Herbil's'kyj, Hryhorij], b 14 December 1904 in Katerynoslav (now Dnipropetrovske). Historian. From 1931 to 1946 he lectured in several in-

stitutions, including Saratov and Kiev universities. He worked at Lviv University from 1946 and specialized in Galician history. He has written over 50 works, including *Ukrainskie kozatskie polki i ukrainskoe opolchenie v Otechestvennoi voïne 1812 g.* (Ukrainian Cossack Regiments and the Ukrainian Levy en Masse in the Patriotic War of 1812, 1943), *Peredova suspil'na dumka v Halychyni (30-i–sередyna 40-kh rokiv XIX stolittia)* (Leading Social Thought in Galicia [1830s–mid-1840s], 1959), and *Rozvytok prohresyvnnykh idei v Halychyni v pershii polovyni XIX st. (do 1848 r.)* (The Development of Progressive Ideas in Galicia in the First Half of the 19th Century [to 1848], 1964).

**Herbinus, Johannes** (Kapusta, Jan), b ca 1627–33 in Byczyna (Pietschen), Silesia, d March 1679 in Grudziądz, Poland. Polish-German scholar. A Lutheran minister, theologian, and pedagogue, he lived in Sweden, Denmark, Poland, and Lithuania. In 1674 he obtained materials on the Kievan Cave Monastery from its archimandrite, I. \*Gizel, and used them to write *Religiosae Kijovienses Cryptae, s. Kijovia subterranea* (1675).

Jan Herburt (portrait, 1570)

**Herburt, Jan Szcześny**, b 1567 probably in Bonevychi, Dobromyl county, Galicia, d 31 December 1616 in Dobromyl, Galicia. Polish community leader, publisher, and writer of Ukrainian origin. In 1611 he established his own printing press in Dobromyl. In his *Zdanie o narodzie ruskim* (A Note about the Ruthenian People, 1611) he defended the right of Ukrainians to remain Orthodox and spoke out against the imposed Church Union of Berestia of 1596. He is the author of *Victoriae Kozakorum de tartaris Tauricianis in anno 1608 narratio*; he also wrote some poetry in Ukrainian, the most famous being *Hadka Hrytsia z Fortunoiu* (Hryts's Dialogue with Fortune).

**Herder, Johann Gottfried von**, b 25 August 1744 in Mohrungen, East Prussia, d 18 December 1803 in Weimar. German philosopher, theologian, and writer; a theorist of the *Sturm und Drang* literary movement and an important thinker in the philosophy of history and culture. He emphasized the role of folklore in the development of literature and compiled the first anthology of folk poetry from various nations – *Volkslieder* (1778–9). His work influenced M. Maksymovych and I. Metlynsky in Ukraine.

**Herder German-Ukrainian Society** (Deutsch-Ukrainische Herder-Gesellschaft). Society created in Munich in 1948 to promote contacts between Ukrainian and German scholars. Its presidents were K. Graebe, H. Koch,

E. Mittich, and I. Mirchuk. In 1960 the society merged with the \*German-Ukrainian Society.

**Hereta, Ihor**, b 25 September 1938 in Skomorokhy, Ternopil county, Galicia. Archeologist and art scholar. A graduate of Chernivtsi University, in 1962 he became a research associate of the Ternopil Regional Museum. He helped found the Ternopil Art Gallery, of which he became director in 1978, the Krushelnytska Memorial Museum in Bila, and the Kurbas Memorial Museum in Staryi Skalat. In the course of his archeological digs in Western Ukraine, Hereta discovered over 50 monuments of various epochs and cultures, but mostly of the \*Cherniakhiv culture. He has compiled guides to several memorial museums and published numerous scholarly articles.

**Heritage Savings and Trust.** A financial institution incorporated on 1 May 1967 in Edmonton, Alberta. It was formed with support from the local Ukrainian community and its directors included W. Sereda, P. Shewchuk, P. Savaryn, and Z. Matishak. Initial shareholder capital amounted to \$1,233,236 with investments primarily in mortgage, bond, and stock portfolios. It grew rapidly during the 1970s; in 1981 its total assets amounted to \$142,515,111.

Yosyf Hermaize

Metropolitan Maksym Hermaniuk

**Hermaize, Yosyf** [Hermajze, Josyf], b 1892 in Kiev, d? Historian and political figure of Karaite origin. He was a member of the Ukrainian Social Democratic Workers' party and sat on the All-Ukrainian Council of Military Deputies and the Little Rada of the Central Rada. A graduate of, and later professor at, Kiev University, he specialized in the sociopolitical history of Ukraine. A close associate of M. Hrushevsky, he was secretary of the Historical Section of the vUAN and director of its Archeographic Commission. Arrested in 1929 and accused of belonging to the \*Union for the Liberation of Ukraine, he was sentenced to six years in labor camps, which he served in Yaroslavl and on the Solovets Islands. He then settled in Saratov, but was soon rearrested and sentenced to an additional 10 years. His subsequent fate is unknown. Hermaize wrote many works, a number of them pioneering studies. His *Narysy z istorii revoliutsii-noho rukhu na Ukraini* (Essays on the History of the Revolutionary Movement in Ukraine, vol 1, 1926) has thus far been the only monograph on the \*Revolutionary Ukrainian party. He is the author of articles and collec-

tions of documents on such topics as the Koliivshchyna rebellion, the Decembrist movement in Ukraine, M. Drachomanov and V. Antonovych and Ukrainian historiography, and Ukrainian relations with the Don region in the 17th century, which appeared in the serials of the vUAN and Kiev University. He also edited the published records of the Polish investigation and trial of Koliivshchyna rebels in Kodnia (*Ukrains'kyi arkhiv*, vol 2, 1931) and wrote introductions to P. Kulish's *Chorna rada* (Black Council, 1925), V. Vynnychenko's selected works (1927), and M. Kostomarov's *Chernihivka* (Girl from Chernihiv, 1928).

**Hermaniuk, Maksym** [Hermanjuk], b 30 October 1911 in Nove Selo, Zhovkva county, Galicia. Archbishop and metropolitan of the Ukrainian Catholic church in Canada; full member of the Shevchenko Scientific Society. He joined the Redemptorist order in 1933 and was ordained in 1938. He studied at Louvain University (TH D 1943). In 1948 he came to Canada as supervisor of the Ukrainian Redemptorist Vice-Province of Canada and the United States and taught at the Ukrainian Redemptorist Seminary in Waterford, Ontario, where he founded and edited the theological journal *Lohos*. In 1951 he was appointed auxiliary bishop of Winnipeg and in 1956 archbishop and metropolitan of the Ukrainian Catholic church in Canada. He took part in the Second Vatican Council (1962–5) and is a member of the Presidium of the World Congress of Free Ukrainians, of the Secretariat for Promoting Christian Unity, and of the Joint Working Group of the World Council of Churches. His publications include *La Parabole évangélique* (Louvain, 1947), *Bibliini opysy svitu v svitli suchasnoi nauky* (The Biblical Descriptions of Our World in the Light of Contemporary Science, 1950), and *Nashi zavdannia* (Our Tasks, 1960).

**Hermitage** (Ukrainian: *skyt*). A number of cells inhabited by monks who lived in seclusion and practiced a more exacting regime than ordinary monks. Such habitations were located at some distance from the monasteries to which they were subordinate. Eventually the distinction in regime became blurred and hermitages became merely small monasteries attached to a larger one. In Ukraine a number of monasteries had hermitages, some of them more than one hermitage. The Pochaiiv Monastery, for example, had the Kozachi Mohyly and Rudnia-Pochaiivska *skyty*, and the St Michael's Golden-Domed Monastery had the Teofaniia *skyt*. A few hermitages, such as the \*Maniava Hermitage, were entirely independent.

**Hermonassa.** An ancient Greek city located on the Taman Peninsula near the present-day site of Taman, a village in Krasnodar krai, founded in the 6th century BC by Ionians and probably by Aeolians as well. After Phanagoria, it was the second most important economic center of the Asiatic side of the \*Bosporan Kingdom. Hermonassa's economy was based on agriculture, fishing, and trade. The Huns destroyed the city in the 4th century AD and in the 10th century AD the ancient Rus' city of \*Tmutorokan arose on the site. In the 12th century it was an Italian trading port, known as Tamatarxa, Matatarxa, or Matruga. Significant archeological excavations conducted since the 1950s have uncovered a frieze from the temple of Aphrodite and, from the 4th century BC,

a buried treasure of gold Bosporan coins and a necropolis containing a marble sarcophagus shaped in the form of a Greek temple.

**Herodotus**, b ca 485 BC in Halicarnassus, Asia Minor, d ca 425 BC in Athens or Thurii, southern Italy. Greek historian of the Greco-Persian wars, known as the father of history. He traveled widely throughout the Middle East, North Africa, and southern and eastern Europe, including the territories of present-day Ukraine. In the fourth volume of his *History* he describes the Dnieper River, judging it to be the most useful river in the world after the Nile, and the territory, customs, and life of the Cimmerians, Taurians, Scythians, and other peoples of the region. Archeological excavations have confirmed many of his observations.

**Herring** (*Clupea*; Ukrainian: *oseledets*). Small (10–50 cm) silvery fish of the family Clupeidae, widely distributed in northern waters, including the Black Sea and the Sea of Azov. There are five species of herring in Ukraine: Kerch herring, Black Sea herring, Caspian shad, Black Sea sprat, and common sprat. Herring have a great economic importance. They are eaten fresh, salted, smoked, or tinned. In the USSR they are an important part of the diet, particularly for prisoners in transport.

**Hershenson, Serhii** [Heršenzon, Serhij], b 11 February 1906 in Moscow. Geneticist, one of the founders of population genetics; since 1976 full member of the AN USSR. After graduating from Moscow University in 1927, he worked consecutively at the Institute of Experimental Biology, the Timiriazev Biological Institute, and the Institute of Genetics of the USSR Academy of Sciences. In 1937 he moved to Kiev to chair the department of genetics and Darwinism at Kiev University (1937–41, 1944–8) and a department of the Institute of Zoology of the AN USSR (1937–63). After serving as assistant director of the Institute of Microbiology and Virology, in 1968 he was appointed department chairman, and in 1973 acting director of the Institute of Molecular Biology and Genetics in Kiev. In 1924–6 Hershenson participated in the first genetic studies of natural *Drosophila* populations. In the 1930s he studied the causes of mutation and the mutagenic effect of exogenic DNA. After 1953 he did pioneering work in molecular genetics: he demonstrated that information is transcribed inversely from RNA to DNA and studied the mutagenic role of viruses in the host cell. He is the author of *Osnovy sovremennoi genetiki* (The Foundations of Contemporary Genetics, 1979) and the editor of *Tsitologija i genetika*.

M. Adams

**Hershtansky, Demian** [Herštans'kyj, Dem'jan], b 1 November 1865 in Tarazh, Kremianets county, Volhynia gubernia, d 1936 in Volodymyr-Volynskyi. Volhynian civic and church leader. He was an Orthodox priest with the rank of protopresbyter and a deputy to the Polish Senate (1922–8).

**Hertsza** [Herca]. v-7. Town (1966 pop 1,500) in Hlyboka raion, Chernivtsi oblast. First mentioned in 1408; before being annexed by Austria in 1774 it belonged to the Principality of Moldavia. In 1918 it was annexed by Rumania, and in 1940 by the Ukrainian SSR. Most of its inhabitants are Rumanian.

Demian Hershtansky

**Hertsyk, Hryhorii** [Hercyk, Hryhorij], b and d? Acting colonel of Poltava regiment in 1705 and a supporter of Hetman I. Mazepa. After the defeat at the Battle of Poltava in 1709, he accompanied Mazepa into exile in Bendery. Under Hetman P. Orlyk, he served as general osaul. In 1715 he went with Orlyk to Stockholm. He lived there until 1719, when he was sent by the hetman to Poland to enter into relations with the Zaporozhian Cossacks and the Crimean khan. In Warsaw he was seized by Russian agents and taken to St Petersburg where he was held in the ss Peter and Paul Fortress. In 1728 he was released and permitted to live in Moscow. Records of his interrogation in St Petersburg in 1721 were printed in *Kievskaja starina*, 1883, no. 3.

**Herzen, Aleksandr**, b 6 April 1812 in Moscow, d 21 January 1870 in Paris. Most prominent Russian publicist and political thinker of his generation. Having left Russia in 1847, he published *Poliarnaia zvezda* and *Kolokol* in London. As a proponent of a socialistically inclined populism, he supported Ukraine's right to independence, but his personal hope was for a pan-Slavic federation. He considered Ukrainian to be a separate Slavic language, then an unusual view among Russians, and admired the poetry of T. Shevchenko. Herzen, whose journal was widely disseminated in Ukraine, was respected by the leading Ukrainian activists of the time, including T. Shevchenko, M. Kostomarov (who in 1860 contributed an article to *Kolokol* on the Ukrainian question), M. Levchenko, and V. Antonovych.

**Hetman, Mykhailo** [Het'man, Myxajlo] (Hethman, Michael), b 14 September 1893 in Zalistsi Novi, Zboriv county, Galicia, d 2 February 1981 in Toronto. Community leader and journalist. In the First World War he served with the Ukrainian Sich Rifleman, and in the 1920s immigrated to Canada. Active in the Ukrainian monarchist movement, from 1927 he was on the supreme council of the \*Canadian Sich Organization and on the editorial board of *Kanadiis'ka Sich* (1928–30). During the 1930s he was head (*oboznyi*) of the \*United Hetman Organization. From 1937 to 1949 he edited its weekly *Ukrains'kyi robotnyk* in Toronto. Subsequently he edited *Nasha derzhava* (1952–5) and its successor *Bat'kivshchyna*, which he cofounded.

**Hetman** (from the German *Hauptmann* and the Polish *hetman*: 'leader'). In the Polish Kingdom in the 16th century, local military commanders and administrators were known as hetmans. The title was also used for the supreme military commander both in Poland and in the Grand Duchy of Lithuania (see \*Grand hetman). At the end of the 16th century the commander of the \*Cos-

sacks, originally known as the elder (*starshyi*), also became known as the hetman. The first Cossack hetmans included K. Kosynky, S. Nalyvaiko, P. Sahaidachny, and T. Fedorovich.

From 1648 the hetman was the head of the Cossack state (see \*Hetman state). In this capacity he had broad powers as the supreme commander of the Cossack army; the chief administrator and financial officer, presiding over the state's highest administrative body, the \*General Officer Staff; the top legislator; and from the end of the 17th century, the supreme judge as well. The first hetman who was also head of the state was B. \*Khmelnysky. The hetman issued administrative decrees, called \*Hetman manifestos, which were binding on the whole population. His powers extended to some degree even to church affairs: he confirmed the appointment of church hierarchs and endowed bishoprics, monasteries, and sometimes churches with lands. He also appointed many officials of the state and granted land for service. The hetman represented the state in its external relations, receiving and sending out envoys and concluding treaties. With the partition of Ukrainian territories between Poland and Muscovy in the 1660s there arose competing hetmans in Right- and Left-Bank Ukraine and a prolonged period of civil war began. Right-Bank hetmans soon lost their political power, becoming simply commanders of Cossack military formations under Polish or Ottoman control.

Hetmans were elected by the \*General Military Council for an unspecified term: in principle for life, but in practice for 'as long as it pleases the host.' Since their authority was not constitutionally defined, it varied greatly and depended on the personalities of the individuals involved. In general, their authority overlapped or was limited by the powers of other state institutions, such as the General Military Council and the \*Council of Officers, which included senior officers and colonels of the Cossack \*regiments. From the end of the 17th century the tsar of Muscovy, through his representatives at the military councils, greatly influenced the election of hetmans. In the 18th century the hetman's powers were reduced and he became more dependent on the tsar. In particular, the tsarist government deprived hetmans of the right to conduct their own foreign relations and steadily increased its control over Ukraine's internal administration. In Left-Bank Ukraine each new hetman swore an oath of allegiance to the tsar and concluded a new agreement with the tsarist government outlining his rights and responsibilities (see \*Hetman articles).

The more important hetmans of all Ukraine were B. Khmelnytsky (1648–57), I. Vyhovsky (1657–9), and Yu. Khmelnytsky (1659–63). Renowned Right-Bank hetmans included P. Teteria (1663–5), P. Doroshenko (1665–76), and Yu. Khmelnytsky (1667–81 and 1685), while Left-Bank hetmans included I. Briukhovetsky (1663–8), D. Mnohohrishny (1669–72), I. Samoilovych (1672–87), I. Mazepa (1687–1709), I. Skoropadsky (1709–22), P. Polubotok (acting hetman 1722–4), D. Apostol (1727–34), and K. Rozumovsky (1750–64). After several earlier attempts, the office of hetman was finally abolished by Catherine II in 1764, and its responsibilities were assumed by the \*Little Russian Collegium. Hetman rule displayed both monarchic and republican tendencies, but the former were dominant, particularly under B. Khmelnytsky, who hoped to establish a hereditary hetmancy, I. Samoilovych, and I. Mazepa. The hetman's

insignia included the \*bulava, standard, flag, and seal. An officer who carried out temporarily the duties of a hetman was known as the \*acting hetman. Many hetmans gained renown as patrons of Ukrainian culture by establishing monasteries and schools.

P. \*Skoropadsky, the head of the Ukrainian state from April to December 1918, revived the title of hetman. (See \*Hetman government.)

**Hetman articles** (*Hetmanski statyi*). Legal documents that defined the prerogatives of the Cossack Hetman state in the 17th and 18th centuries and its relations with Muscovy. The first such articles were compiled as a result of negotiations between Hetman B. Khmelnytsky's emissaries and representatives of the tsar in March 1654 in Moscow (see \*Pereiaslav Treaty of 1654). New articles were drawn up with the election of each new hetman. Although they were based in principle on those agreed to by Khmelnytsky, there tended to be a further erosion of the rights of the Hetman state with each new agreement. In addition to the agreement of 1654, there were the \*Pereiaslav Articles of 1659 and 1674, the \*Hlukhiv Articles of D. Mnohohrishny in 1669, the \*Konotop Articles of I. Samoilovych in 1672, and the \*Kolomak Articles of I. Mazepa in 1687. The last articles were those of D. Apostol in 1728. Thereafter Ukraine's status was determined by unilateral acts on the part of the Russian government, which increasingly diminished Ukrainian autonomy.

**Hetman government.** The antisocialist Ukrainian government formed after the coup d'état of Gen. P. \*Skoropadsky in Kiev on 29 April 1918, during which the congress of the conservative \*All-Ukrainian Union of Landowners proclaimed Skoropadsky hetman of Ukraine. This coup was backed by the generals of the German and Austrian armies that occupied Ukraine after the Peace Treaty of \*Brest-Litovsk and by former tsarist officers.

On the day of the coup Skoropadsky issued two edicts – Manifesto to the Entire Ukrainian Nation and Laws Concerning the Provisional State System of Ukraine – that together constituted a provisional constitution for the new regime. The \*Council of National Ministers and \*Central Rada of the UNR and their laws and land reforms were abolished, and the right of private land ownership was reinstated. All legislative and executive powers were transferred to the hetman, who at the same time was proclaimed commander in chief of the military. The edicts created a Council of Ministers with executive and legislative functions, to be appointed by the hetman and to be responsible solely to him. Although decrees and orders of the hetman were to be countersigned by the prime minister or another appropriate minister, the hetman was to ratify all decisions of the council, thus reinforcing his dictatorial power. Civil rights were to be guaranteed 'within the limits of the law' (ie, newspapers were strictly censored or shut down, and most public gatherings and strikes were banned), and a supreme court was to be created, with the hetman retaining the

The Great Seal of the Hetman government

authority to commute sentences. The name of the Ukrainian National Republic was changed to the Ukrainian State.

Skoropadsky appointed M. Ustymovych and, after he failed, M. Vasilenko to form a government from representatives of moderate Ukrainian parties, particularly the \*Ukrainian Party of Socialists-Federalists (UPS F). Neither succeeded because of a boycott of the undemocratic regime by the major Ukrainian political parties, including the UPS F. Nonetheless, a Council of Ministers was formed on 10 May with the following ministers (many of them Russophile): premier and minister of internal affairs, F. Lyzohub; external affairs, D. Doroshenko; army, A. Rogoza; finance, A. Rzhepetsky; trade, S. Gutnik; land affairs, V. Kolokoltsov; food provisions, Yu. Sokolovsky; cults, V. Zenkovsky; national health, V. Liubynsky; education, M. Vasilenko; communication, B. Butenko; justice, M. Chubynsky; labor, Yu. Vagner; state controller, Yu. Afanasev; and state secretary, I. Kistiakovsky. During the summer some changes were made in the Council of Ministers. S. Gerbel became minister of food provisions; A. Romanov, minister of justice; I. Kistiakovsky, minister of internal affairs; and S. Zavadsky, state secretary. The ministries that existed during the UNR were reorganized; most deputy ministers were replaced, although the majority of officials from the previous government remained. Local administration was entrusted to gubernial and county starostas (see \*Gubernial commissioners) appointed by the hetman.

Although its social and economic policies were a failure, the Hetman government did achieve certain successes in \*diplomacy in establishing a \*consular service and, particularly, in education and culture. It normalized diplomatic relations with the Central Powers and several neutral countries, strengthened relations with the \*Kuban, the \*Don region, and \*Crimea, and was even formally recognized by Soviet Russia, with which it signed a preliminary peace treaty on 12 June 1918. The govern-

ment established the Ukrainian state universities of \*Kiev and \*Kamianets-Podilskyi; chairs of Ukrainian philology and history at the other Ukrainian universities; the Ukrainian \*Academy of Sciences, a national library (today the Central Scientific Library of the AN URSR), a state archive, the \*State Drama Theater, a state museum, and a state music and drama institute in Kiev; it also opened or Ukrainianized over 150 gymnasiums and made the teaching of Ukrainian language, history, and geography compulsory in Russian schools. Despite German hindrances, it made strides in the organization of an effective military force (see \*Army of the UNR); many of its senior officers were, however, pro-White Russians and hostile to the Ukrainian cause.

From the very beginning, the Hetman regime was opposed by most Ukrainian organizations (see, eg, the \*All-Ukrainian Union of Zemstvos). Ukrainian nationalists criticized it for the following reasons: its pro-Russian orientation; its reliance on Russians, including individuals closely identified with the tsarist regime and members of the Constitutional Democratic and Octobrist parties, to staff important positions in the government and military; its indifference to Ukrainianization of the government and to Ukrainian autonomy; and its reliance on the German army (see \*Germany), which oppressed the population and exploited Ukraine economically. Socialists, meanwhile, criticized its reactionary policies, particularly its repressiveness, condoning of the landlords' terrorization of the peasantry, and unwillingness to effect comprehensive land reforms, as well as its support by the Russian capitalist \*Union of Industry, Trade, Finances, and Agriculture. The peasants reacted to the regime's excesses with numerous rebellions and guerrilla warfare (eg, that directed by N. \*Makhno and H. \*Tiu-tiunnyk), arson, and assassinations (eg, of H. \*Eichhorn). Soon after the coup, representatives of various Ukrainian parties, unions, and civic-cultural associations formed the Ukrainian National-State Union, later renamed the \*Ukrainian National Union (UNU), to coordinate opposition to the Hetman government and revive Ukrainian democracy and independence.

The imminent defeat of the Central Powers, the deteriorating domestic situation, and the Bolshevik consolidation of power in Russia led to a series of political crises in the fall of 1918. Six members of the cabinet, led by D. Doroshenko, increased their efforts to Ukrainianize the regime, which included terminating German overlordship and seeking international recognition of an independent Ukrainian state. This effort was opposed by the other 10 ministers, who published a memorandum advocating the federation of Ukraine with a non-Bolshevik Russia, and stating that Ukraine's most important role was as a base of operations against the Bolsheviks. The ministers also hoped that this policy would find favor among the \*Entente Powers, which supported the re-establishment of a united Russia.

At this time Skoropadsky began serious negotiations with the expanded UNU to broaden his base of support. The UNU demanded eight ministerial portfolios, the convocation of a diet, political amnesty, and the end of censorship and restrictions on freedom of speech. Although a consensus was not reached, five UPS F members of the UNU agreed to participate in the Council of Ministers. In the manifesto of 22 October, the hetman proclaimed his support of the principle of an independent Ukrainian

Kaiser Wilhelm II and Hetman Pavlo Skoropadsky

state and promised to accelerate agrarian reforms and the convocation of a diet. On 24 October a new cabinet, representing a compromise between Ukrainian nationalist and pro-Russian forces, was formed: F. Lyzohub, premier; D. Doroshenko, external affairs; A. Rogoza, military affairs; V. Reinbot, internal affairs (acting); A. Rzhpetsky, finance; O. Lototsky (UNU), religious affairs; P. Stebnytsky (UNU), education; V. Leontovych (UNU), agriculture; S. Gerbel, food provisions; A. Viazlov (UNU), justice; M. Slavinsky (UNU), labor; S. Mering, trade and industry; B. Butenko, communications; V. Liubynsky, health; S. Petrov, state controller; and S. Zavadsky, state secretary.

The final capitulation of the Central Powers (11 November 1918) and the withdrawal of their armies, the mainstay of the hetman's authority, led to a dramatic change of policy. Hoping to please the victorious Entente nations, Skoropadsky proclaimed, in his manifesto of 14 November, his intention to federate with a non-Bolshevik Russian state. At the same time he formed a new cabinet, composed mostly of Russian monarchists: premier and minister of agriculture, S. Gerbel; external affairs, Yu. Afanasev; army, D. Shchutsky; navy, A. Pokrovsky; internal affairs, I. Kistiakovsky; education,

V. Naumenko; religious affairs, M. Voronovich; finance, A. Rzhpetsky; communication, V. Liandeberg; trade, S. Mering; justice, V. Reinbot; health, V. Liubynsky; labor, V. Kosynsky; food provisions, G. Glinka; and state controller, S. Petrov.

These developments triggered the popular uprising co-ordinated by the UNU. It had been prepared long in advance with the support of the \*Sich Riflemen, who had defeated the hetman's forces at \*Motovylyvka on 18 October and had begun advancing on Kiev. On 14 December 1918, after German troops abandoned Kiev, Skoropadsky abdicated and fled to Germany, and the Council of Ministers surrendered power to the \*Directory of the UNR. Some of Skoropadsky's ministers were later arrested by the new republican government.

**Hetman manifestos** (*universaly*). Official decrees issued by the government of the Hetman state in the 17th and 18th centuries. The practice was adopted from the Polish kings, who declared their will in circular letters addressed to their subjects (*universales litterae*). Manifestos were addressed in the hetman's name to the entire population and often contained important directives or ordinances. Special manifestos were directed at specific institutions, estates, military units, settlements, or groups. Some were called instructions, particularly those that dealt with the court system: for example, the manifestos of P. Polubotok (1722), D. Apostol (1730), and K. Rozumovsky (1761-3). At times hetmans issued manifestos granting lands and peasants to Cossack officers and church institutions or confirming land ownership, as well as manifestos granting special protection or exempting certain individuals from the authority of administrative and judicial bodies. Manifestos were always confirmed by the seal of the Zaporozhian Host.

**Hetman state** or **Hetmanate** (*Hetmanshchyna*). The name of the Ukrainian Cossack state, which existed from 1648 to 1782. It came into existence as a result of the \*Cossack-Polish War and the alliance of the \*registered Cossacks with the Cossacks of the \*Zaporozhian Sich and other segments of the Ukrainian populace. The territory of the state at the time of its first \*hetman, B. \*Khmelnysky (1648-57), consisted of most of central Ukraine, ie, the territory of the former voivodeships of Kiev, Bratslav, Chernihiv, and part of Volhynia voivodeship, as well as part of Belorussia (see \*Belorussian

Regiment). In 1663 the Hetman state in Right-Bank Ukraine came under Polish domination, while the Left Bank came under Muscovite control. A period of civil war ensued as various Left- and Right-Bank hetmans (particularly P. \*Doroshenko, Yu. \*Khmelnysky, and I. \*Samoilovych), backed by their respective supporters, attempted to re-establish a unitary state. Despite these efforts, the partition of the hetmanate was confirmed by the Muscovite-Polish Treaty of \*Andrusovo (1667) and the \*Eternal Peace of 1686. When the Cossacks were abolished by Poland in 1700 on the Right Bank, the Hetmanate was left with only the lands of the Left Bank – Chernihiv voivodeship (together with the Starodub region) and the part of Kiev voivodship to the east of the Dnieper. The capitals of the Hetman state were Chyhyryn (1648–63), Hadiache (1663–8), Baturyn (1669–1708 and 1750–64), and Hlukhiv (1708–34). From 1654 the Hetman state was nominally a vassal of Muscovy (see Treaty of \*Pereiaslav). The political relationship between the two countries was renegotiated with the election of each new hetman (see \*Hetman articles), which led to the steady erosion of the Hetmanate's sovereignty.

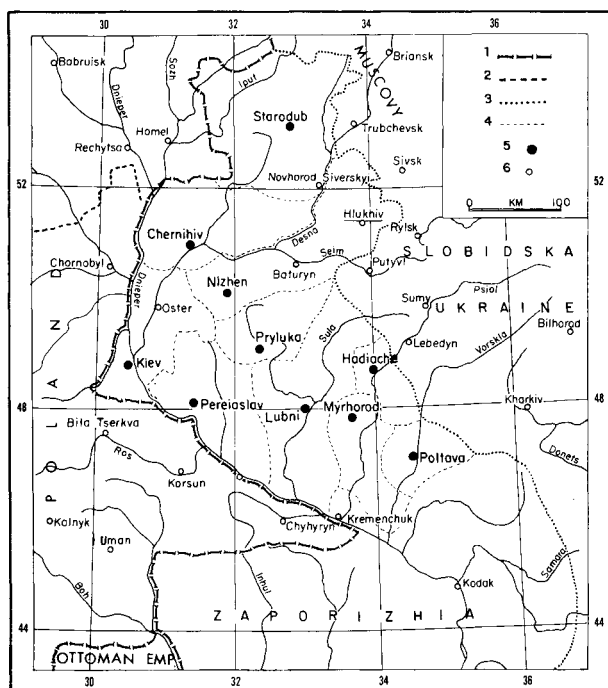

The Hetman state exhibited elements of both republican and monarchic types of government. Because it did not have a constitution that defined the powers and prerogatives of its various institutions, these changed over time as a result of internal conflicts and the encroachments of the Russian government. The highest ruling organs were three bodies with somewhat overlapping functions: the \*General Military Council, the hetman,

and the \*Council of Officers. The General Military Council was the institution of direct government in the 17th century and represented in theory the supreme will of the dominant group in society, the Cossacks. The hetman, meanwhile, was the head of state, commander in chief of the Cossack army, and head of the entire administrative, judicial, and military apparatus. Some hetmans recognized the ultimate authority of the military councils, while others, such as B. Khmelnytsky and particularly I. Samoilovych and I. \*Mazepa, opposed it. During the reign of these hetmans, the state most resembled a monarchy with the election for life of the monarch-hetman. The Council of Officers was a semiformal advisory body that met twice a year; with time it acquired the characteristics of an estate parliament for the \*Cossack *starshyna*. Other central institutions included the \*General Military Chancellery, which executed the hetman's orders, and the \*General Officer Staff, which functioned as the hetman's cabinet. At first this body was elected by the Council of Officers, but later it was appointed by the hetman himself, or, as the state lost its autonomy, by the Russian government. The \*General Military Court, presided over by the hetman, was the supreme court of appeal.

At the local level the state was organized, on the basis of the Cossack military organization, into regiments (see \*Regimental system) and companies (see \*Company system). In B. Khmelnytsky's time, there were 10 Right-Bank and 7 Left-Bank regiments; later there were 10 regiments in total. The regimental and company administrations mirrored that of the central government: each regiment had a military council, colonel, and regimental council of officers, and each company a captain and council of officers. At first most officers at the local as well as central levels of administration and the judiciary were elected. Later, however, this practice declined and individuals were appointed by higher authorities or the Russian government.

The Hetmanate, particularly in the 18th century, had a social hierarchy, where an individual's political power, legal rights, and social status were determined by his membership in a particular social group or \*estate. At the top of the pyramid were the senior Cossack officers (the Cossack *starshyna* and the \*notable military fellows), followed by the \*Cossacks, the \*burghers and other town dwellers, and the \*peasants. At first, after the Khmelnytsky uprising, the state was in principle composed of free citizens, although some of the peasantry (particularly the \*church peasants) remained in a state of servitude. With time, however, as their obligations grew heavier, the rest of the peasantry and the rank-and-file Cossacks became impoverished, and the Hetman state became an increasingly regimented class society in which only the officer class had special privileges. Town dwellers also began to lose their political autonomy, although large cities and towns continued to be ruled under \*Magdeburg law. At the same time class barriers were created: eg, it was forbidden for a peasant to become a Cossack. The legal system of the state was derived from a variety of sources, particularly the 1648 Polish edition of the Lithuanian Statute (see \*Code of Laws of 1743).

In the 18th century, the increasing political control of the Hetman state by Russia precluded the independent evolution of its administrative, financial, and judicial institutions. During the reign of \*Catherine II (1762–96)

### THE HETMAN STATE CA 1750

1. State boundaries (Polish, Russian, Ottoman)
2. Southern boundary of Lithuania within the Polish Commonwealth
3. Eastern limits of the Hetman state and of the lands of the Zaporozhian Cossacks
4. Territorial-administrative boundaries of the Hetman state's regiments
5. Regimental capitals
6. Other towns

Last capital of the Hetman state is underscored.

Ukrainian autonomy was progressively destroyed. After several earlier attempts, the office of hetman was finally abolished by the Russian government in 1764, and his functions were assumed by the \*Little Russian Collegium. In 1782 the regiments were replaced by \*vicegerencies, and Russian political and administrative institutions and practices replaced the unique institutions of the Hetmanate. At the same time the social structure of the state was recast: \*serfdom was introduced, the Cossacks lost what remained of their special status, and the *starshyna* was at least partially integrated into the Russian nobility.

**Hets, Mykola [Hec] (Hec, Nikolas)**, b 20 October 1910 in Liatsko, Dobromyl county, Galicia. Journalist and civic leader. Hets studied at Lviv University. He was a co-editor of the daily *Ukrains'ki visti* (1938–9). He immigrated to Brazil in 1947, where he edited the weekly *Khliborob* (1948–50) and the monthly *Boletim Informativo* (1950–4) in Curitiba, Paraná. He became in 1950 the secretary and in 1965 the head of the Society of Friends of Ukrainian Culture. He has done research on the history of Ukrainians in Brazil, and is the author of a monograph (1937) about the town of Dobromyl.

**Hewak, Benjamin**, b 12 November 1935 in Winnipeg. Jurist and community leader of Ukrainian descent. A graduate of the University of Manitoba Law School (LLB 1960), he served as crown attorney and defense counsel before being appointed in 1970 judge of the County Court, and in 1985 chief justice of the Queen's Bench in Manitoba. He has been active in the Ukrainian community as president of the Ukrainian National Youth Federation, director of the Rusalka Ukrainian Dance Ensemble, and honorary board member of the Ukrainian Cultural and Educational Centre.

**Hierarchy, church.** The higher orders of the \*clergy (bishop, archbishop, metropolitan, patriarch) and the highest level of church authority. In Ukraine the hierarchy has played a distinct and often crucial role in civic and national life.

The Ukrainian church since its establishment has been headed by a hierarch with the title of \*metropolitan, initially confirmed by and under the jurisdiction of the Patriarch of Constantinople. The metropolitan's see was Kiev, although it was at times located in other cities of Rus' (see \*Kiev metropolity). The early metropolitans were Greeks; in the 250 years before the Mongol invasion, only 2 of the 20 metropolitans were of local origin. The first \*bishops were also mostly Greeks, but they were gradually replaced by local people.

In Kievan Rus' hierarchs were generally recruited from among the monks of the Kievan Cave Monastery. In the 15th and 16th centuries the practice developed of appointing hierarchs from among the elite of Ukrainian society – the nobility. The method of appointment differed at various times. At first new bishops were elected by a council of bishops and then confirmed by the prince; later they were often nominated by the prince or other lay authorities – in the Polish Commonwealth the king and in the Hetmanate the hetman – or by church synods involving the participation of laymen. The Ukrainian

hierarchy enjoyed great autonomy and its dependence on the ecumenical Patriarch of Constantinople was limited. In recent times, most Ukrainian Orthodox churches have become autocephalous or completely independent.

With the Mongol invasion in the mid-13th century, Kiev lost its importance as a religious center when the hierarchy fled to the west and north of Kiev metropolity. The Rus' church disintegrated into three separate provinces – the Galician, Lithuanian, and Muscovite – each headed by a metropolitan. When the Muscovite church broke away from Kiev in the 15th century, the Ukrainian hierarchy became most closely identified with the western provinces. In these territories, however, a division occurred in the hierarchy when in 1595–6 part of the Orthodox hierarchy, with the Kievian metropolitan, M. Rahoza, entered into the Church Union of \*Berestia with Rome. Since that time, the two Ukrainian churches, the Orthodox and the Uniate Catholic, have each had their own hierarchies, with their own distinct histories.

With the defection of most bishops to the newly created Uniate church, the Orthodox hierarchy found itself in a minority. In 1620, however, the patriarch of Jerusalem, Theophanes, consecrated a new metropolitan and several new bishops for Ukraine. This event occurred against the wishes of the Polish authorities but was supported by the Cossack host. The succeeding several decades were marked by a remarkable revival of Orthodox Ukrainian religious and cultural life, led by the dynamic new hierarchy, particularly Metropolitan P. Mohyla. Toward the end of the 17th century, however, after the subjugation of the Kiev metropolity to the Moscow patriarch (1686), the Ukrainian Orthodox hierarchy lost its independence, and in the 19th century it essentially merged with the Russian hierarchy. From 1721 Orthodox bishops in Ukraine were nominated exclusively by the Russian \*Holy Synod.

With the renaissance of the Ukrainian state (1917–20), the need arose for a separate Ukrainian hierarchy. When the Russian hierarchs refused to consecrate Ukrainian candidates as bishops, the Ukrainian hierarchy was renewed in 1921 by a non-traditional rite of consecration that was not recognized by all the faithful or other churches. This hierarchy of the newly established Ukrainian Autocephalous Orthodox church fell prey to the national-religious policy of the USSR and was physically liquidated beginning in 1929. On the eve of the Second World War there was not a single Ukrainian bishop left in the Ukrainian SSR. It was only in 1942 that a new hierarchy was consecrated for central Ukraine by bishops from Western Ukraine (Volhynia, Polisia, and the Kholm region), which had not been under Soviet rule. This hierarchy continues to exist only outside the USSR, since the church in Ukraine is again under the jurisdiction of the Russian church. In the West the Ukrainian Orthodox church is not united under a single hierarchy, but, in addition to some smaller jurisdictions, consists of three metropolies, two of which are headed (in 1986) by M. \*Skrypnyk (in the United States, Europe, South America, Australia, and New Zealand) and one by V. Fedak (in Canada and Australia). Each metropolity has its own hierarchy.

The hierarchy of the Ukrainian Catholic church was created in 1595–6. After a period of rapid growth in the 17th and 18th centuries a decline began after the Russian acquisition of Right-Bank Ukraine, the major center of

Ukrainian Catholicism, in the Partitions of Poland. With the intention of destroying the Uniate church, the Russian army and bureaucracy persecuted the Catholic hierarchy, especially in the period 1773–96. Nevertheless, in 1825 the Ukrainian Catholic hierarchy still consisted of a metropolitan and five bishops. It was only after Metropolitan Y. \*Bulhak died that the abolition of the Union was proclaimed (1839) and the Uniate hierarchy was dissolved. Attempts to maintain the hierarchy in the western reaches of Russian-ruled Ukraine, in the Kholm region and Podlachia, were also unsuccessful, and in 1875 the Uniate church and its hierarchy were abolished there as well. The hierarchy continued to exist only beyond the borders of the Russian Empire, in Transcarpathia and Galicia, where, in 1806, the \*Halych metropolity was re-established under A. Anhelovych. After the Second World War the hierarchy of the Ukrainian Catholic church was arrested and almost completely destroyed. Today in the Ukrainian SSR, only secretly consecrated Uniate hierarchs (in 1986 they numbered five to seven) can continue some activity, mostly underground. Thus, the Ukrainian Catholic hierarchy exists openly only outside the borders of the USSR. Until 1984 it was headed by the Halych metropolitan Y. \*Slipy, who was succeeded by M. Liubachivsky; it consists of bishops and exarchs in the various countries in which Ukrainian emigrants have settled, as well as metropolitans who head the church provinces in Canada and the United States. (See also \*Church, history of the Ukrainian; \*Churches of Ukraine, structures of the; \*Ukrainian Orthodox church; \*Ukrainian Orthodox Church in the USA; \*Ukrainian Orthodox Church of America; \*Ukrainian Greek Orthodox Church in Canada; and \*Ukrainian Autocephalous Orthodox church.)

**High Beskyd.** Name of that part of the \*Beskyds – the outer flysch belt of the Ukrainian Carpathian Mountains – lying between the imaginary line joining Turka and Boryslav in the west and the Mizunka River valley in the east, and between the limits of the Carpathians in the north and the Middle-Carpathian Depression in the south.

The High Beskyd has an area of about 2,000 sq km and begins rising from an elevation of 300–400 m. It is lowest in its northern part – the highest peak there is Mt Tsukhovyi Dil (942 m) – where a banded structure has been created by longitudinal sandstone ridges and parallel valleys, wide depressions, and small hollows (Verkhnie Synovydne and Mizunka) carved out of soft schists and clays. The rounded and uniform mountains there are quite densely populated (60 inhabitants per sq km) and deforested (24 percent of the land area is cultivated, 38 percent is pasture and hayfields, and only 35 percent is forest).

South of the longitudinal Stryi River valley the High Beskyd attains elevations of 1,100 m and up. There the highest peaks are Mt Parashka (1,271 m), Mt Zelemianka (1,267 m), and Mt Magura (1,368 m). Narrow and deep transverse valleys (such as the Opir, Sukil, and Mizunka river valleys), which intersect the longitudinal valleys, predominate. The mountain tops have a sharper definition and are often denuded. Forests consisting mostly of spruce still cover 70 percent of the area, and the population density is lower (30 inhabitants per sq km).

The High Beskyd has long been inhabited by the ethnographic group of the \*Boikos. (Until 1941 Poles and Jews each constituted 10 percent of the population.) The main occupations are crop cultivation (rye, potatoes, and oats) and animal husbandry, logging and woodworking, and, in the Boryslav region, petroleum extraction. Cities (Boryslav, Bolekhiv) lie on the mountains' periphery. In the interior the main centers are Skole (woodworking), Skhidnytsia (petroleum), Verkhnie Synevdske (woodworking), and the resorts of the Opir Valley – Hrebeniv, Tukhlia, Slavske, and Zelemianka.

V. Kubijovč

**Higher Courses for Women.** See Education of women and Higher educational institution.

**Higher education.** The highest level of formal schooling in academic, professional, or technical fields, which is accessible only to students who have completed a secondary education. The origin of higher education in Ukraine can be traced back to the confessional colleges that arose in the period of religious strife (16th–17th century). The colleges organized by the Jesuits served as a model for similar Orthodox and later Uniate schools. According to their standard curriculum, which consisted of three lower grades (infima, grammar, and syntax) and two intermediate grades (poetics and rhetoric) and required six years to complete, these schools were institutions of secondary education. Yet some of them offered courses belonging to the higher grades (philosophy, requiring three years, and theology, requiring four years) that were typical of academies. The Jesuits established a number of such higher colleges in Ukrainian and Belorussian territories: in Vilnius (est 1570, academy from 1578), Lviv (1608), Orsha (beginning of 17th century), Berestia (first quarter of the 17th century), Pynske (1633), Ostrih (1624, added philosophy in 1636), Vitebsk (ca 1640), Dorohychyn (1661), Minsk (ca 1650, added philosophy and theology at the end of the 17th century), and Kamianets-Podilskyi (1611, added philosophy at the end of the 17th century). A full higher education could be obtained by Ukrainians only at the Jesuit-run academy in Lviv (1661–1763), Vilnius, Zamostia, or Cracow. Despite its name, the Ostrih Academy (est ca 1580 by the Orthodox Prince K. Ostrozky) did not offer a higher education. The only Orthodox college that provided a partial higher education was the Kievan Mohyla College (est 1632). In spite of a royal prohibition (1635), philosophy and theology courses were offered at the school on an irregular basis until philosophy and theology grades were permanently established as part of the curriculum in the 1680s. It was only in 1701 that the school was recognized officially as an academy (see \*Kievan Mohyla Academy). Among the numerous Uniate colleges run by the Basilian order only a few – in Zhyrovichy, Buchach,

and Volodymyr-Volynskyi – introduced some courses of the higher grades in the 18th century.

The first university in Ukraine – \*Lviv University – was founded in 1784 by Emperor Joseph II. The language of instruction was Latin, but literary Ukrainian (Ruthenian) of the period was used in the \*Studium Ruthenum, a special institute of the university for educating candidates for the Uniate priesthood. The German character of the university was underlined when German was adopted as the language of instruction in 1817. During the Revolutions of 1848–9 the Ukrainians won some concessions in university education: a Ukrainian chair in the Department of Theology was established in 1848 and the first Chair of Ukrainian (Ruthenian) Language and Literature was set up in the following year. In 1849 and 1860 the central authorities declared their intention to convert Lviv University gradually into a Ukrainian institution. Two Ukrainian chairs were set up in the law department in 1862. Under strong political pressure from the Poles, however, the central government eventually abandoned this policy: in 1871 it recognized the university as a bilingual institution by replacing German with Ukrainian and Polish as the languages of instruction, and in 1879 it approved the Polonization of the university, by accepting Polish as the language of the institution's internal administration. Although a few other Ukrainian chairs were established, the population's educational needs were not met and by the turn of the century the Ukrainians in Galicia demanded their own university. The broad campaign for a separate Ukrainian university persisted for many years and erupted occasionally into violence. Finally, in 1912 the Austrian authorities promised to establish a Ukrainian university, but were prevented from doing so by the First World War.

In Russian-ruled Ukraine a number of university projects were drawn up in the 18th century. Hetman K. Rozumovsky in 1760 proposed to establish a university in Baturyn. Under Catherine II Ukrainian deputies to the Legislative Commission of 1767–9 demanded that a university be founded in Kiev or Pereiaslav. The nobility of the Sumy and the Chernihiv regions collected funds to build universities in their respective capitals. Prince G. Potemkin fostered a plan to open a university in Katerynoslav. The first university in Russian-ruled Ukraine was finally established in Kharkiv in 1805 (see \*Kharkiv University). The project proposed by V. \*Karazyn became a reality as a result of his persistent efforts and the generosity of the local nobility. Although the language of instruction was Russian, as in all higher schools in Russian-ruled Ukraine, the university became the home of the \*Kharkiv Romantic School and played an important role in the Ukrainian cultural renaissance and national awakening in the 19th century.

In 1820 the Bezborodko Gymnasium of Higher Learning, later known as the \*Nizhen Lyceum, was opened in Nizhen. Its nine-year program was more demanding than that of a secondary level and compared favorably with that offered by Russian universities.

\*Kiev University was founded in 1834 in place of the abolished \*Kremianets Lyceum whose Polish student body had taken part in the Polish uprising of 1830. M. Maksymovych, a pioneer of Ukrainian ethnography, literary studies, and history, served as the university's first rector. The first generation of students was predominantly Polish. Eventually, Ukrainians and Russians formed a majority.

The origins of higher technical education in Ukraine date back to 1844 when the Technical Academy (now the \*Lviv Polytechnical Institute) was opened. The Farming Academy in Dubliany (est 1855) was the only higher agricultural school in Western Ukraine before the First World War. In Russian-ruled Ukraine the veterinary school of Kharkiv University (est 1839) was reorganized in 1851 into an independent, higher veterinary school, and then in 1873 into the Kharkiv Veterinary Institute. A number of higher technical schools were founded in the late 19th century: the Kharkiv Technological Institute (1885; see \*Kharkiv Polytechnical Institute), a commercial institute in Kiev (1896), the \*Kiev Polytechnical Institute (1898), and the Katerynoslav Higher Mining School (1899). In 1915 the agricultural institute in Novo-Aleksandriia (now Puławy, Poland) was evacuated to Kharkiv and reorganized into the Institute of Agriculture and Forestry.

In 1863, during the period of liberalization under Alexander II, the universities were granted limited autonomy (election of rectors and professors, reduction in administrative surveillance), concessions that were revoked in 1884. During this period another university was established in Ukraine: the New Russia University (later \*Odessa University), formed in 1865 out of the Richelieu Lyceum, which until 1837 was a secondary, rather than a higher, institution of learning. In Austrian-ruled Ukraine a German university with a Chair of Ukrainian Language and Literature was established in Chernivtsi in 1875 (see \*Chernivtsi University).

Higher education became accessible to women only in the second half of the 19th century (see \*Education of women). In 1870 the Russian Ministry of Public Education permitted women to attend public lectures, and special courses began to be organized for them. The Higher Courses for Women were set up at Kiev University in 1878, but were closed down by the authorities in 1885. The situation improved only after the Revolution of 1905: private higher schools for women were opened in Kiev; the Higher Courses for Women at the university were revived in 1906 and were renamed the St Olha's Women's Institute in 1914; and similar private schools appeared in Odessa in 1906 and in Kharkiv in 1907. Professional education for women was available at women's medical institutes in Kiev (1910), Kharkiv (1910), Odessa (1910), and Katerynoslav (1916), and at the Froebelian pedagogical courses in Kiev and Kharkiv. From 1906 to 1909 women were permitted to attend universities.

After 1905 the question of university courses in Ukrainian studies was raised, but the authorities, supported by Russian faculty, prohibited any instruction in this field. The Russian system of higher education in Ukraine was elitist. In 1914 there were only 27,000 students attending 19 institutions of higher learning, and most of them were from the nobility.

In 1917, after the February Revolution, new higher schools appeared in Ukraine: the Ukrainian People's University in Kiev, a commercial institute and a conservatory in Kharkiv, an agricultural institute in Odessa, the \*Ukrainian State Academy of Arts, and the Ukrainian Pedagogical Academy in Kiev. At the same time existing higher schools began to be Ukrainianized and chairs of Ukrainian language, literature, history, and legal history were set up at existing universities. In 1918 the Ukrainian People's University was transformed by the hetman's decree into the Ukrainian State University of Kiev (while

St Vladimir University remained Russian), and new universities were set up in Katerynoslav (see \*Dnipropetrovske University), Symferopil, and Kamianets-Podilskyi (see \*Kamianets-Podilskyi Ukrainian State University). At the same time the Ukrainian Historical-Philological Faculty in Poltava and the Ukrainian Teachers' Institute in Zhytomyr were opened.

When the Bolsheviks came to power Ukraine's commissar of education, H. \*Hrynko (1920-3), abolished the universities, transforming them into \*institutes of people's education (INO), to which a number of newly created teachers' institutes were added. Among the administrative changes were the reorganization of the medical faculties of universities into separate institutes and the absorption of the faculties of law by the new institutes of the national economy. \*Tekhnikums, which in Ukraine, unlike in Russia, were higher technical schools, trained narrow specialists in various technical fields. \*Institutes were devoted exclusively to teaching, while research and the preparation of scholars and scientists were the responsibility of autonomous research chairs. Many subjects were taught by the laboratory-brigade method, which precluded individual testing. This system of higher education, known as the Hrynko System, was unique to Ukraine.

In Soviet Ukraine, institutions of higher education lacked any autonomy. Rectors were appointed by the people's commissar of education, and often their political credentials, rather than academic qualifications, were decisive. Access to higher education was made difficult for people of 'non-labor origin'; nonetheless, 43 percent of the students attending institutes were offspring of white-collar workers. Candidates seeking admission to higher educational establishments had to produce references from Party, trade union, or Communist Youth League organizations. Workers' faculties (*robotfakyy*) were established to prepare students of worker or poor peasant origin for admission to higher education.

During the 1920s an effort was made to Ukrainianize higher education. The first step was to introduce courses with Ukrainian content: Ukrainian history, language, literature, and economic geography became compulsory for all students. The second step was to introduce Ukrainian as a language of instruction. By 1928, out of 38 institutes, 11 offered instruction only in Ukrainian and 24 in both Ukrainian and Russian, and out of 126 tekhnikums, 46 offered instruction only in Ukrainian and 34 in both Ukrainian and Russian. Beginning in 1925, a knowledge of Ukrainian became, in many regions, a condition for admission to higher education or for graduation. By 1927 these requirements applied to all higher educational establishments in Ukraine.

Ukrainians were underrepresented among students of higher education. In 1928 they accounted for 54 percent of the 33,400 students at institutes (Russians represented 16 percent, Jews 25 percent), 63 percent of the 26,900 students at tekhnikums, and 53 percent of the 9,800 students at workers' faculties. Women accounted for approximately a quarter of the enrollment at institutes. In 1925 only a third of the teaching staff in institutes and 43 percent at tekhnikums gave Ukrainian as their nationality. The lack of Ukrainian-speaking faculty and hostility to Ukrainian among Russian teachers stymied the \*Ukrainianization process. In addition to these difficulties, the Ukrainian system of higher education did not

receive the financial support that the Russian system did from the all-Union budget. In spite of this, by 1929 Ukraine had a higher per capita enrollment in higher education than Russia did, and its rate of growth was faster than in Russia.

Between 1929 and 1934 the system of higher education in Ukraine was reorganized to conform with that in the rest of the USSR. Most institutes (technical, economic, agricultural, medical) were transferred from the jurisdiction of the People's Commissariat of Education (NKO) to that of appropriate commissariats, leaving only pedagogical and artistic institutes under the NKO. Tekhnikums in 1928 were transformed into either institutes or specialized secondary schools. In 1934 the universities in Kiev, Kharkiv, Odessa, and Dnipropetrovske were restored. The institutes of social education, of vocational education, and of political education, into which INO's were divided in 1930, were transformed into pedagogical institutes. The laboratory-brigade method was abolished and traditional requirements and teaching methods were restored. Programs, textbooks, and examinations were standardized. University and institute chairs resumed research activities that had been confined to special research chairs.

With rapid industrialization in the 1930s, higher educational facilities were expanded greatly to meet the needs of industry. The number of institutions of higher learning increased sharply from 42 in 1929 to 173 in 1940 (including correspondence schools), and the student population expanded from 40,890 to 196,800. The preferential admission of working-class and poor peasant students to higher education was gradually abandoned as the quality of graduates was stressed. Even tuition fees, a prerevolutionary practice favoring the children of the elite, were instituted from 1940 to 1956. In 1936, 44 percent of university students were offspring of white-collar workers; 40 percent, of workers; and a mere 13 percent, of peasants. In 1933 Ukrainization was halted and the Ukrainian faculty and student body of higher educational institutions were purged. As a result the proportion of Ukrainian students dropped from 55 percent in 1933 to 53 percent in 1935. The proportion of Ukrainian research staff declined from 49 percent in 1929 to 31 percent in 1934, while the proportion of Russians increased from 30 to 50 percent. Many leading Ukrainian scholars perished during the 1930s. A concerted effort was made to promote Russian language and subjects in higher education.

After the First World War the Polish authorities in Galicia abolished the Ukrainian chairs at Lviv University (even Ukrainian philology had to be taught in Polish), and restricted the admission of Ukrainian students. As a result the \*Lviv (Underground) Ukrainian University was established in 1921. In 1922-3 the \*Lviv (Underground) Higher Polytechnical School with a one-year curriculum was opened at the underground university. Harassed by Polish authorities and refused recognition by the Polish government, the university dissolved in 1925. Talks on the establishment of a Ukrainian state university collapsed when the Polish authorities rejected Lviv as a possible location and the Ukrainians rejected Stanyslaviv or Cracow. The \*Greek Catholic Theological Academy in Lviv (est 1928) was the only officially recognized Ukrainian institution of higher learning in interwar Poland. Chairs of Ukrainian studies existed at

Polish universities in Cracow and Warsaw, in addition to one at Lviv University.

After the First World War a number of Ukrainian organizations abroad founded the \*Ukrainian Free University in Vienna in 1921. Having received recognition and financial support from the Czechoslovak government, it was transferred to Prague. Another higher school, the \*Ukrainian Husbandry Academy (est 1922), operated in Poděbrady until 1935, when it was transformed into a correspondence school – the \*Ukrainian Technical and Husbandry Institute. Both schools were evacuated to Munich just before the arrival of the Soviet Army in 1945. The \*Ukrainian Higher Pedagogical Institute in Prague was supported by the Czechoslovak government from 1923 to 1933.

After the Second World War Ukraine's system of higher education expanded, but its accessibility to Ukrainians has remained a problem. New universities were established in the Ukrainian SSR: \*Uzhhorod University (1945), \*Donetske University (1965), \*Symferopil University (1972, having been abolished in 1925), and \*Zaporizhia University (1985). The universities of Lviv and Chernivtsi, and the Lviv Polytechnic (see \*Lviv Polytechnical Institute), were incorporated into the Soviet system. Except for pedagogical, medical, and art schools, the institutions of higher education in Ukraine were under the direct control of the union Ministry of Higher and Specialized Secondary Education. A republican Ministry of Higher and Specialized Secondary Education, established in 1955 (only in the case of Ukraine), gave the republic a voice in the running of its higher educational system, but only until 1959, when the Union-Republic Ministry of Higher and Specialized Secondary Education was set up in Moscow. In 1965 only 50 of the 132 higher educational institutions in Ukraine were under the republic's jurisdiction. Postgraduate programs in Ukraine could only be established with Moscow's permission. It was not possible, for example, to obtain in Ukraine a doctorate in pedagogy.

At the same time pressures for the Russification of higher education in Ukraine have increased. In 1954 the compulsory entrance examination in Ukrainian, but not in Russian language and literature, was dropped. Proposals to Ukrainianize higher education put forward by Ukraine's Party leadership in 1965 were blocked by Moscow. Of the 75,027 students attending the republic's eight universities (1965), 61 percent were Ukrainian; 56 percent of the faculty were Ukrainian, but only 34 percent lectured in Ukrainian. Almost 70 percent of the subjects taught at the universities were not supplied with Ukrainian-language textbooks. The granting of degrees is under the supervision of the Supreme Attestation Commission in Moscow, which encourages postgraduate students to write their dissertations in Russian (from 1944 to 1960, 86 percent of the dissertations accepted at Lviv University were written in Russian). The preference for Russian in higher education means that Ukrainian-speaking students are disadvantaged in the competition with Russian-speaking students for admission to establishments of higher education. Furthermore, higher education in Ukraine, as throughout the Soviet Union, is biased in favor of the upper strata of society. In 1965, for example, 70 percent of first-year students at Kharkiv University were the offspring of white-collar workers; 23 percent, of workers; and only 7 percent, of collective farmers. Since Ukrainians are underrepresented in the upper strata

tum, this bias further restricts access to higher education for Ukrainians. As a result, although in 1956 Ukrainians accounted for 64 percent of the enrollment in higher educational institutions in Ukraine, in 1971 they accounted for only 60 percent. There is evidence of outright discrimination against Ukrainians: a secret instruction issued in 1974 restricted the admission of local students to institutions of higher learning in Western Ukraine to 25 percent of the freshman class. The percentage of women among students increased from 47 percent in 1970-1 to 54 percent in 1983-4. Under N. Khrushchev's regime (1955-64) institutions of higher education were consolidated and their number decreased. Higher education 'that did not lose contact with production,' ie, evening and extramural education, was promoted. This policy led to a decline in the quality of graduates and was reversed in 1964, after Krushchev's fall.

The territorial distribution of institutions of higher learning in Ukraine is very uneven. The major centers in 1983-4 were Kharkiv oblast (21 of 146 such institutions for all Ukraine and 15 percent of the enrollment), the city of Kiev (18 institutions and 17 percent of enrollment), Odessa oblast (15 and 10 percent), Dnipropetrovske oblast (12 and 9 percent), and Lviv oblast (12 and 8 percent). The specializations that attract the largest number of students are (in 1983-4): education and cultural studies, 15 percent; economics, 13 percent; and machine and tool building, 12 percent.

In 1984-5 Ukraine had 16 percent of all higher educational establishments and 16.6 percent of the total number of students in the USSR. At the same time Ukraine represented 18.5 percent of the USSR population.

There are two Ukrainian universities outside of Ukraine: the \*Ukrainian Catholic University in Rome (est 1963) and the Ukrainian Free University in Munich. The former, however, does not have the right to confer doctoral degrees. In Canada, the United States, Australia, and Europe courses in Ukrainian studies are offered by many universities. A number of Ukrainian research institutes exist as integral parts of national university systems.

**Higher educational institution** (*vyshchyi uchbovyi zaklad* or *vuz*). A calque of the Russian *vysshiee uchebnoe zavedenie*; in Soviet usage the term applies to post-secondary schools of various kinds - universities, polytechnics, institutes, academies, conservatories, and higher schools. In the 1920s such institutions were called *vyshchi shkoly*, 'higher schools'. Generally, they offer a four- to six-year program leading to a diploma and combine teaching with research. Some of them are devoted to upgrading the qualifications of specialists. (See also \*Higher education.)

**Hiliarov, Merkurii** [Hiljarov, Merkurij], b 6 March 1912 in Kiev, d 2 March 1985 in Moscow. Entomologist, sci-

entific administrator; from 1974 full member of the USSR Academy of Sciences. A graduate of Kiev University (1933), he headed a department of the All-Union Rubber Institute, and in 1944 joined his mentor I. Shmalhauzen at the Institute of Evolutionary Morphology of the USSR Academy of Sciences. From 1955 he directed the institute's laboratory of soil zoology. At the same time he taught at the Moscow Pedagogical Institute (1949-77) and then at Moscow University (1972-85). From 1959 he was president of the National Committee of Soviet Biologists, and from 1978 academic secretary of the academy's Division of General Biology. His major work in soil zoology includes the book *Zakonomernosti prispoblenii chlenistonogikh k zhizni na sushe* (Trends in the Adaptations of Arthropods to Life on Dry Land, 1970).

**Hiliarovsky, Mykhailo** [Hiljarovs'kyj, Myxajlo], b 14 August 1934 in Teliatyn, Lublin voivodeship, Poland. Stage director. After graduating from the Kiev Institute of Theater Arts in 1960, he worked as a stage director in various theaters in Chernihiv, Nizhen, Drohobych (1964), Lviv, and Kiev (1961-75). In 1976 he was appointed chief stage director at the Kirovohrad Ukrainian Music and Drama Theater.

**Himka, John-Paul** [Xymka], b 18 May 1949 in Detroit. Historian. Educated at the University of Michigan (PH D 1977), from 1977 to 1980 he was a research associate at the Canadian Institute of Ukrainian Studies. A specialist in the social and political history of 19th-century Galicia, he was appointed (1985) assistant professor at the University of Alberta. He wrote *Socialism in Galicia: The Emergence of Polish Social Democracy and Ukrainian Radicalism (1860-1890)* (1983).

**Himmler, Heinrich**, b 7 October 1900 in Munich, d 23 May 1945 in Lüneburg, Germany. Nazi politician, chief of the Gestapo and later of the entire German police, and from 1943 minister of the interior. More than any other Nazi leader, he was responsible for the atrocities perpetrated by the Nazi regime. A fanatic enemy of the Slavs, in 1939 he was appointed Reichskommissar to consolidate and extend German territory in the east. Denying the Ukrainian people any rights, he conceived the plan to resettle them in Asia near and beyond the Caspian Sea and to settle Germans in Ukraine after the war. When, towards the end of the war, the Ukrainian National Committee was being formed, he advocated that non-Russian anti-Soviet forces be placed under the command of A. Vlasov. In the final hour Himmler betrayed Hitler and, avoiding arrest, was captured by the Western allies. He committed suicide by taking poison.

**Hintsi settlement.** An Upper Paleolithic site on the right bank of the Udai River near Hintsi, Lubni raion, Poltava oblast. It was discovered in 1871 by F. Kaminsky and was excavated in 1873, 1914-15, and 1935. Remains of mammoth-bone dwellings, storage pits, fire pits, and flint and bone tools were uncovered, some with geometric ornamentation.

**Hirchak, Yevhen** [Hirčak, Jevhen], b and d ? Bolshevik publicist and literary critic. He was a member of the department for the nationalities problem at the Ukrainian Institute of Marxism-Leninism and of the All-Ukrain-

nian Association of Proletarian Writers. Two of his brochures – *Shums'kizm i rozlam v KPZU* (Shumskyism and the Split in the Communist Party of Western Ukraine, 1928) and *Khvyl'ovizm* (Khvylovyism, 1929) – attacked M. \*Khvylovy. As editor of the newspaper *Bil'shovyk Ukraïny*, he wrote several articles criticizing M. Volobuev. In *Na dva fronta v bor'be s natsionalizmom* (On Two Fronts in the Struggle with Nationalism, 1930), he exposed various ideological 'deviations.' In 1933 he was criticized for 'errors on the theoretical front' and in 1934 disappeared without trace.

**Hirmologion** (Ukrainian: *irmoloi, irmolohii, irmolohion*). One of the liturgical books used in the Eastern churches. It contains all the hirmoi and prayers that are to be sung during religious services and musical notations to them. The oldest extant hirmologion was preserved at the Basilian monastery in Supraśl, Poland. The first Ukrainian notated hirmologion was printed in Lviv in 1700 by the hieromonach at St George's Cathedral, Y. Horodetsky, and embellished by N. Zubrytsky and D. Sinkevych; the prolegomenon was written by Hegumen Y. Skolsky. Others were printed by the Lviv Dormition Brotherhood (1709, 1757), the Kievan Cave Monastery (1753, 1769, 1778, 1791), and in Chernihiv (1761) and Pochaiv (1766, 1775, 1792, 1794).

**Hirniak, Nykyfor** [Hirnjak], b 23 July 1885 in Strusiv, Terebovlia county, Galicia, d 4 March 1962 in Clifton, New Jersey. Ukrainian Galician Army officer. He commanded the replacement unit of the Legion of Ukrainian Sich Riflemen (1915–18). In 1919 he served as mobilization officer in the war ministry of the Western Ukrainian National Republic and then in the general staff of the Army of the UNR. On 1 March 1919 he was promoted to major. In 1920 he became chairman of the Revolutionary Committee of the Ukrainian Galician Army in Vinnytsia and was instrumental in concluding the temporary alliance between the remnants of the Ukrainian Galician Army and the Red Army. After 1921 he taught at the Ternopil gymnasium. He immigrated to the United States in 1949. There he wrote a number of works on the Ukrainian independence struggle, including the memoirs *Ostaniï akt trahediï Ukraïns'koi Halyts'koi Armii* (The Last Act of the Tragedy of the Ukrainian Galician Army, 1959).

**Hirniak, Olimpiia.** See Dobrovolska, Olimpiia.

**Hirniak, Yosyp** [Hirnjak, Josyp], b 14 April 1895 in Strusiv, Terebovlia county, Galicia. A leading Ukrainian stage actor and director. He began his career in 1914 in an amateur troupe of the Ukrainian Sich Riflemen and then worked in the professional companies of the Ukrainska Besida Theater in Lviv (1916–18), the New Lviv Theater (1919–20), the Franko Ukrainian Drama Theater and its studio (1920–2), and the \*Berezil theater in Kiev and Kharkiv (1922–33). A close associate of the influential director L. \*Kurbas, Hirniak was arrested during the Stalin terror in 1933 and exiled to Chibiu in the Soviet Arctic, where he performed in the Kosolapkin Theater (1934–40). In 1942–4 he acted in and directed plays, including the first Ukrainian production of Shakespeare's *Hamlet*, at the Lviv Opera Theater. As displaced persons after the Second World War, Hirniak and his wife O. \*Dobrovolska founded a Ukrainian theater studio

Yosyp Hirniak; portrait by S. Hruzbenko (1943)

in Landeck, Austria, in 1946, toured Austria and Bavaria, and continued to produce, direct, and act in many Ukrainian and West European plays after immigrating to the United States in 1949. From 1954 to 1964 he was the artistic director of the \*Ukrainian Theater in America, which he helped found. As an actor, Hirniak became famous for his roles in Berezil's productions of M. Kulish's *Myna Mazailo*, *Narodnii Malakhii* (The People's Malakhii), *Komuna v stepakh* (Commune in the Steppes), *Maklena Grasa*, and 97. As an actor and director he developed Kurbas's system of 'transformation' and attempted to combine the traditions of the Ukrainian \*intermede with the art of the modern theater. He is the author of articles on the history of Ukrainian theater, including 'Birth and Death of the Modern Ukrainian Theater' in *Soviet Theaters 1917–1941: A Collection of Articles* (ed M. Bradshaw, 1954), and memoirs (1982).

V. Revutsky

**Hirniak, Yuliiian** [Hirnjak, Julijan], b 8 September 1881 in Strusiv, Terebovlia county, Galicia, d 5 June 1970 in Passaic, New Jersey. Chemist, physicist, and educator; brother of Nykyfor and Yosyp \*Hirniak. Yuliiian taught at the branch of the \*Academic Gymnasium of Lviv before and after the First World War, and in 1921–3 was a professor at the Lviv (Underground) Ukrainian University. He immigrated to the United States after the Second World War. He was a member (from 1907) of the Shevchenko Scientific Society, which published his works on theoretical chemistry and physics, and is the author of several school textbooks.

**Hirny, Vasyl** [Hirnyj, Vasyl'], b 14 March 1902 in Zaliska Volia, Jaroslaw county, Galicia, d 5 July 1981 in Lębork, Poland. Writer, journalist, and community activist. Hirny lived and worked in France in 1926–7, studied at Lviv University in 1927–32, and worked as an editor for the Lviv newspaper *Novyi chas* (1932–9). His publicistic feuilletons and literary parodies (under the pseudonym Fed Tryndyk) were published in that paper and in other Lviv periodicals; his *Literaturni parodiï* (Literary Parodies) appeared in 1936. Hirny also wrote an

educational booklet for the peasantry, *Shcho diialosia v seli Molodivtsi* (What Happened in the Village of Molodivka, 1933), and a novel about Ukrainian migrant workers in France, *Rozhubleni syly* (Squandered Strengths, 1943). In 1948 he settled in Lębork near Gdańsk. From 1956 he wrote feuilletons for the Warsaw paper *Nashe slovo* and was active in the Ukrainian Social and Cultural Society in Poland.

**Hirnyk, Mykola**, b 7 June 1923 in Verbovets, Katerynopil raion, Cherkasy oblast. A poet and translator. He has worked as an editor for various periodicals and is the author of 15 poetry collections, including *Moia Zvenyhorodshchyna* (My Zvenyhorod Region, 1950), *Virnist'* (Fidelity, 1952), *Poezii* (Poems, 1968), *Kriz' vidstani* (Across Distances, 1969), *Odvichne, s'ohodenne* (Eternal, Today, 1973), and *Nevtoma* (Indefatigability, 1975).

Leonard Hirshman

**Hirshman, Leonard** [Hiršman], b 25 March 1839 in Tukums, Latvia, d 3 January 1921 in Kharkiv. Ophthalmologist. After graduating from Kharkiv University in 1860, he studied in France and Germany. In 1868 he began teaching at Kharkiv University. In 1885 he was promoted to full professor of the first ophthalmological department established at the university. Hirshman founded the first eye clinic at the university in 1870 and established and personally financed two eye hospitals, a clinic, and a school for the blind. From 1886 he served as president of the Kharkiv Medical Society. He resigned from the university in 1905 to protest repression of students by the authorities. From 1908 he directed the municipal eye hospital, which he had founded. His published works deal with the physiology of color perception, the embolism of retinal vessels, and the treatment of trachoma. The Ukrainian Scientific Research Institute for Eye Diseases in Kharkiv and an eye hospital in Leningrad have been named in his honor.

**Hirske** [Hirs'ke]. v-19, DB II-5. City (1970 pop 15,805) in Voroshylovhrad oblast, founded as a mining town in 1898. It is administered by the Pervomaiske city soviet. Its main industry is anthracite mining; it also has a mineral-enrichment plant and a shoe factory.

**Hist.** Name originating in Kievan Rus' for a certain category of merchant. In Ukraine the term was used as early as 945 and as late as the 15th century and referred to foreign merchants trading in Ukraine, to Ukrainian mer-

chants who went abroad to trade, and, by extension, to local merchants engaging in inter-town trade. A *hist* was a merchant of considerable means and influence, distinguished from ordinary traders by the greater extent of his business, the distances over which it was conducted, and his high social status. Such merchants were accorded a number of privileges: coastal (littoral) trade rights (*Strandrecht*); precedence in competition; and the right to be judged by their own peers and their own law. A foreign *hist* could not acquire immovables, although this right belonged to the self-administered companies of foreign merchants, which ran hospices for their members.

Historical Museum of the Ukrainian SSR

**Historical Museum of the Ukrainian SSR** (Derzhavnyi istorychnyi muzei Ukrainskoi RSR). One of the richest museums in Ukraine, which originated with the City Museum of Antiquities and Art, founded in 1899 by M. Biliashivsky, M. Khvoika, and D. Shcherbakivsky. In 1924 it was renamed the T.H. Shevchenko All-Ukrainian Historical Museum and in 1965 it assumed its present name. The original holdings were divided in 1936, and most of the art collection was removed to form the Kiev Museum of Ukrainian Art. The museum is located in the old city of Kiev near the ruins of the Church of the Tithes, in an area that has been declared a state reserve. It has over 600,000 exponents, including archeological, ethnographic, numismatic items, paintings, sculptures, and old manuscripts, many of which are unique. The museum is divided into the following departments: primitive society, Scythian period, Kievan Rus' era, 14th–18th century Ukraine, 19th–early 20th-century Ukraine, and three departments covering the Soviet period. It has two branches, the \*Museum of Historical Treasures of the Ukrainian SSR and the Kosyi Kaponir Museum, located on the site of the Kievan Cave Fortress and devoted to the revolutionary movement in the 19th and 20th centuries. The museum has published the journal *Pratsi* since 1958.

**Historical Society of Nestor the Chronicler** (*Istoričeskoe obščestvo Nestora-letopistsa*). Scholarly society founded in 1873 in Kiev. Named in honor of \*Nestor, the first Ukrainian chronicler (11th–12th century), it was affiliated from 1876 with Kiev University and from 1921 with the All-Ukrainian Academy of Sciences. The society's members researched the archeology and history of Ukraine, particularly the history of law, religion, and literature in Ukraine and Russia, and promoted the development of historical studies, including the auxiliary disciplines. The society organized scholarly colloquiums, and published its members' research in *Trudy* and in *\*Čteniiia v Istoricheskom obščestve Nestora-letopistsa*. The society also maintained a library (1,500 vols in 1892).

Among those who headed the society were such eminent scholars as V. Ikonnikov, V. Antonovych, M. Vladimírsky-Budanov, M. Dashkevych, O. Lazarevsky, and M. Vasylenko. In the decade after the 1917 Revolution the society (by then bearing the Ukrainian name *Istorične tovarystvo Nestora-litopystsia*) had 212 active members, and from 1920 to 1928 approximately 300 scholarly papers were presented at its meetings. In the early 1930s the society was abolished by the Soviet government.

**Historical songs.** A genre of folk songs that presents historical events and individuals in a generalized, artistic manner with details, names, and facts that may be inaccurate. Ukrainian historical songs appeared at the same time as the \*dumas, and perhaps even preceded them. They differ from the dumas in that they describe concrete historical events and figures; their story line is less developed, their emotive range is greater, and in them the lyrical element prevails over the epic element. Their strophe is rhythmically structured and consists usually of two or four lines. The melody is encompassed in one couplet and is repeated without modification in subsequent couplets.

The oldest cycle of historical songs dates back to the 16th century and depicts the Cossacks' struggle against the Tatars and Turks; the best known are the songs about Baida (D. Vyshnevetsky) of 1564, the capture of Varna of 1605, and the siege of the Pochaiv Monastery of 1675. A second cycle consists of songs about the Cossacks' struggle against Poland; the best known are the songs about B. \*Khmelnysky, the Battle of Zhovti Vody, the Battle of Berestechko, the curse on Khmelnytsky for the Tatar captivity of 1653, and about D. \*Nechai, M. \*Kryvonis, and S. \*Morozenko. A third cycle deals with Russian oppression and includes songs about construction work on the St Petersburg canals, the destruction of the Zaporozhian Sich, and the death of a Cossack in Russian captivity ('Stoit' iavir nad vodoiu'). A fourth cycle consists of songs about the \*Haidamaka uprising and includes songs such as the ballad about the cooper's daughter (Bondarivna) and the songs about S. Chaly, M. \*Zalizniak, and M. Shvachka. There is also a large corpus of songs describing Cossack daily life: the relations between a Cossack and the community, with his family, and particularly with his beloved ('Oi, pushchu ia konychen'ka'). Songs on social questions constitute a

special group: they deal with the struggle among different Cossack strata ('Oi, nastupaie ta chorna khmara'), with corvée and the oppression and resistance of the common people, and include songs about U. \*Karmaliuk, L. \*Kobylitsia, and O. \*Dovbush.

The oral tradition of Western Ukraine has preserved the memory of L. Kossuth and the Hungarian revolution of 1848, and Austria's occupation of Bosnia. There are Hutsul and Boiko songs about the First World War, sung in a \*kolomyika meter of 4 + 4 + 6 syllables, songs about emigrating to America, and songs about seasonal migrant work.

The Revolution of 1917–20 was widely reflected in new dumas and songs such as the дума about the destruction of Liutenka by the Bolsheviks ('U vivtorok vrantsirano ...'). The Second World War, in particular the UPA struggle, is also reflected in the oral tradition. Songs about recent events, however, are not circulated widely and are quickly forgotten.

The best-known annotated study of Ukrainian historical songs is the two-volume collection compiled by M. \*Drahomanov and V. Antonovych, *Istoričeskie pesni malorusskogo naroda* (Historical Songs of the Little-Russian People, 1874–5). Drahomanov's later compilations of and valuable commentaries to *Novi ukrains'ki pisni pro hromads'ki spravy* (New Ukrainian Songs on Social Topics, 1881) and *Politychni pisni ukrains'koho narodu 18–19 st.* (Political Songs of the Ukrainian People in the 18th and 19th Centuries, 2 vols, 1883, 1885) are other valuable contributions to the study of historical songs.

**Historiography.** The study of the principles, theory, and history of historical writing. Historical writing in Ukraine dates back to the earliest \*chronicles of the first half of the 11th century. In time the compiling of chronicles gave way to new forms of historical writing. Since the 19th century the history of Ukraine has been studied not only by Ukrainian but also by foreign – mostly Polish and Russian – scholars, research institutions, and learned societies. At the turn of the 20th century, M. \*Hrushevsky proposed the first modern scheme of Ukrainian history that traced the national historical continuity of the Ukrainian people throughout their ethnic territories and a new period in Ukrainian historiography arose, defined by the predominance of the study of Ukraine as a nation-state. Contemporary Ukrainian historical scholarship outside Soviet Ukraine consists of various currents of this approach.

**The Princely era (11th–13th centuries).** Chronicles were compiled in Ukraine beginning in the first half of the 11th century, mostly in Kiev – first at the Saint Sophia Cathedral and then at the Kievan Cave Monastery and the Vydubychi Monastery – but also in Chernihiv, Pereiaslav, Volhynia, and Galicia. The earliest chronicles were

chronological records of current events. Soon, however, compilations of chronicles appeared. Their authors' aims were closely connected with contemporary religious and political developments. The oldest chronicle collections are the Primary Chronicle or *Povist' vremennykh lit* (up to 1111), the \*Kiev Chronicle (up to 1200), and the \*Galician-Volhynian Chronicle (1201–92).

The Primary Chronicle is the outstanding work of Ukrainian medieval historiography. According to traditional belief and scholarly research, particularly that of A. Shakhmatov, its author was \*Nestor, a monk of the Kievan Cave Monastery. It has been preserved in numerous codices and redactions. The most important are the \*Laurentian (1377) and the \*Hypatian (1425) chronicles. In the latter the Kiev and the Galician-Volhynian chronicles appear as continuations of the Primary Chronicle. The first attempt at a Ukrainian translation of the Primary Chronicle with annotations for the general reader was made by V. Blyznets and published in 1982.

**The Lithuanian-Polish and early Cossack periods (14th–17th centuries).** Chronicle writing continued in the 14th and 15th centuries, but very few examples have survived. In the 15th century the so-called Lithuanian or western Ruthenian chronicles appeared. The oldest of these, such as the \*Suprasl Chronicle, are direct continuations of the compilations of the Kievan Rus' period and reflect the old Ukrainian historical tradition. The later ones, such as the \*Bykhovets Chronicle of the late 16th century, reveal the influence of new sociopolitical conditions in the Grand Duchy of Lithuania. The Ukrainian historical tradition is represented by new Ukrainian chronicles of the 16th–17th centuries, particularly by the \*Hustynia and the \*Lviv Chronicle.

Cultural and national developments in the 16th and 17th centuries produced a large number of polemical religious and political treatises whose authors frequently referred to historical sources to support their claims and to defend the national and religious rights of the Ukrainian people. A national-historical orientation is evident in the works of I. Vyshensky, Yu. Rohatynets, S. Zyzanii, Kh. Filalet, I. Potii, Z. Kopystensky, M. Smotrytsky, Y. Boretsky, K. Sakovych, and scholars at the \*Kievan Mohyla Academy, who tried to demonstrate a direct line of continuity in the historical process of the Ukrainian people.

In the 16th and 17th centuries foreign annalists and diplomats wrote memoirs and historico-geographic descriptions of Ukraine. Among them are G. Le Vasseur de \*Beauplan's *Description d'Ukraine* (1650), E. \*Lassota von Steblau's diary of 1573–94, and P. \*Chevalier's *Histoire de la guerre des Cosaques contre la Pologne* (1663).

**The Cossack-Hetman state (17th–18th centuries).** The Khmelnytsky rebellion and the formation of the Ukrainian Cossack state had a great influence on the development of Ukrainian historiography. Historical writing transcended earlier parameters of the chronicle and acquired the traits of pragmatic, synthetic history. In the second half of the 17th century such works as T. \*Safonovych's *Kroinika* (Chronicle, 1672), \**Sinopsis* (1674), whose author is thought to be I. \*Gizel, and L. \*Bobolynsky's *Litopisets sii iest' kronika ...* (This Chronicle Is a Chronology ..., 1699) appeared. A new category of chronicle – the so-called Cossack chronicles – was compiled in the late 17th and early 18th centuries. These surveyed the events from 1648 to ca 1700 and include the \*Samovydets (Eyewitness) Chronicle, written prob-

ably by R. Rakushka, and the chronicles of H. \*Hrabianka and S. \*Velychko.

Historical works viewing the Princely era as the ancestor of the Hetman state were written in the 18th century: the anonymous *Kratkoe opisanie Malorossii* (A Brief Description of Little Russia) in the 1730s; P. \*Symonovsky's *Kratkoe opisanie o kozatskom malorossiiskom narode i o voennykh ego delakh* (Brief Description of the Cossack Little Russian People and Their Military Exploits, 1765); S. \*Lukomsky's *Sobranie istoricheskoe* (Historical Compilation, 1770); A. \*Rigelman's *Letopisnoe povestvovanie o Maloi Rossii i ee narode i kazakakh voobshche* (Chronicle Narrative about Little Russia and Its People and the Cossacks in General, 1785–6); O. \*Shafonsky's *Chernigovskogo namestnichestva topograficheskoe opisanie* (Topographical Description of Chernihiv Vicegerency, 1788); M. \*Antonovsky's *Istoriia o Maloi Rossii* (History of Little Russia, 1799); and Ya. \*Markovych's survey of Rus' up to the 11th century, *Zapiski o Malorossii, ee zhiteliakh i proizvedeniakh* (Notes on Little Russia, Its Inhabitants, and Events, vol 1, 1798).

In the second half of the 18th century and the early 19th century Archbishop H. Konysky, H. Poletyka, F. Tumansky, A. Chepa, V. Lomykovsky, M. Bantysh-Kamensky, V. Poletyka, M. Markiv, M. Berlynsky, I. Kvitka, Metropolitan E. Bolkhovitinov, and others worked on the history of Ukraine as a whole or on specific aspects of it. In the late 18th century foreign historical works on Ukraine appeared: J.-B. \*Scherer's *Annales de la Petite Russie ou histoire des cosaques-zaporogues et des cosaques de l'Ukraine ou de la Petite Russie, depuis leur origine jusqu'à nos jours* (2 vols, 1788), K. Hammerdorfer's *Geschichte der ukrainischen und saporogischen Kosaken nebst einigen Nachrichten von der Verfassung und Sitten derselben* (1789), and J.-C. \*Engel's *Geschichte der Ukraine und der ukrainischen Kosaken* (1796). Towards the end of the 18th century \**Istoriia Rusov* (History of the Rus'es) was written by an anonymous author. This work exerted a considerable influence on the subsequent development of Ukrainian historiography.

**The 19th century.** Upholding the autonomist traditions of the Hetman period, Ukrainian historians in the first half of the 19th century continued producing synthetic, general works. D. \*Bantysh-Kamensky's *Istoriia Maloi Rossii ...* (History of Little Russia ..., 4 vols, 1822) and M. \*Markevych's *Istoriia Malorossii* (History of Little Russia, 5 vols, 1842–3) were systematic surveys of the history of Ukraine from ancient times to the end of the 18th century that concentrated on the Cossack-Hetman period. Under the influence of \*Romanticism, Ukrainian historians focused their attention on the history and life of the common people. This infatuation with the folk (*narodnist*) eventually developed into an identification with the socially and economically downtrodden masses. Studied at first as an object of history, the 'people' was eventually viewed as the principal agent of historical development. With some exceptions, Ukrainian historiography of the middle and second half of the 19th century is dominated by the populist school, whose influence extended into the early decades of the 20th century. It found its most vivid expression in the works of M. Maksymovych, M. Kostomarov, P. Kulish, O. Lazarevsky, and V. Antonovych.

M. \*Maksymovych, who wrote numerous studies in the history of Kievan Rus', the Cossack-Hetman period, and Cossack historiography, represented Romantic pop-

ulism in Ukrainian historiography. M. \*Kostomarov devoted himself mostly to research on the political history of Hetman Ukraine. His monographs on the Khmelnytsky period, the period of Ruin (1657–87), and the Mazepa period, as well as his studies of hetmans I. Vyhovskyy, Yu. Khmelnytsky, and P. Polubotok, and of P. Mohyla, were based on a wealth of source materials. In his distinctive, masterly style, he presented a colorful but one-sided picture of Ukraine's history in the second half of the 17th and the first quarter of the 18th century. While he vividly described various spontaneous popular movements, Kostomarov underestimated the role of the hetmans, including B. Khmelnytsky, as state-builders. His historicophilosophical studies, particularly 'Myсли o federativnom nachale v drevnei Rusi' (Thoughts on the Federative Principle in Ancient Rus') and 'Dve russkie narodnosti' (Two Rus' Peoples), had an enormous impact on the subsequent development of Ukrainian historical thought.

P. \*Kulish wrote mostly on the Cossack period; his distinctive works are *Istoriia vossoedineniia Rusi* (The History of the Reunification of Rus', 3 vols, 1873–7) and *Otpadenie Malorossii ot Pol'shi, 1340–1654* (The Secession of Little Russia from Poland, 3 vols, 1888–9). O. \*Lazarevsky studied the socioeconomic history of Left-Bank Ukraine in the 17th and 18th centuries. He focused on the peasantry, the Cossack *starshyna*, the nobility, land tenure and colonization, and the administrative and judicial system of the Hetman state in numerous articles and in *Opisanie Staroi Malorossii* (A Description of Old Little Russia, 3 vols, 1888, 1893, 1902).

V. \*Antonovych devoted most of his research to the socioeconomic history of Right-Bank Ukraine in the 16th–18th centuries and to the political history of the Lithuanian-Ruthenian state. He wrote a number of monographs on the history of the Cossacks and the Haidamakas, the peasantry, the nobility, cities and burghers, and the church. In his *Besidy pro chasy kozats'ki na Ukraini* (Discourses about Cossack Times in Ukraine, 1897), which was republished as *Kоротка istoriia Kozachchyny* (A Short History of the Cossack Period, 1912), he presented a general survey of Cossack history. His outstanding achievement was to found the Kiev school of history, which consisted of his former students at Kiev University: D. Bahalii, I. Lynnychenko, M. Dovnar-Zapolsky, M. Dashkevych, P. Holubovsky, V. Liaskoronsky, M. and O. Hrushevsky, V. Danylyevych, O. Andriiashev, P. Ivanov, N. Molchanovsky, and others.

The Kiev school laid the foundations of modern Ukrainian historiography. Antonovych was closely linked with three centers of Ukrainian historical research: the \*Kiev Archeographic Commission, the \*Historical Society of Nestor the Chronicler, and the learned circle that published the journal *\*Kievskaiia starina*. Historical research was also conducted at Kiev University and at the Kiev Theological Academy, where M. Petrov, S. Golubev, F. Titov, and other professors specialized in the history of the Ukrainian church, education, and culture and published their studies in *\*Trudy Kievskoi dukhovnoi akademii* (1860–1917).

In the second half of the 19th century historical research on Ukraine was conducted not only in Kiev, but also at Kharkiv University and by the Kharkiv Historical-Philological Society, at Odessa University and by the Odessa Society of History and Antiquities, and in Galicia

at the Stauropegion Institute in Lviv. In Odessa A. Skalkovsky studied the history of the Zaporozhian Sich and southern Ukraine. In Galicia the prominent historians were D. Zubrytsky, Rev A. Petrushevych, I. Sharanevych, Yu. Tselevych, K. Zaklynsky, A. Dobriansky, Bishop Yu. Pelesh, and Rev S. Kachala. The Halytsko-Ruska Matytsia society published several volumes of historical studies. From 1886 O. Barvinsky published a series, entitled *Rus'ka istorychna biblioteka*, of historical studies by various authors. Outside Ukraine M. \*Drahomanov did some historical research. His historicophilosophical works such as *'Propashchyyi chas – Ukraintsi pid Moskovs'kym tsarstvom, 1654–1876* (The Lost Epoch: Ukrainians under the Muscovite Tsardom, 1654–1876, 1909) had a great influence on the development of Ukrainian historical thought.

**M. Hrushevsky and the early 20th century.** By the end of the 19th century Ukrainian historians could boast of having produced a substantial number of monographs. The general growth of Ukrainian culture and the rise in national consciousness created a demand for a scholarly synthesis of Ukrainian history and for popular historical works. M. Hrushevsky introduced the first scholarly scheme of the history of the Ukrainian people on all its territories. The theoretical arguments for it were formulated in his article 'Zvychaina skhema "rus'koi" istorii i sprava ratsional'noho ukladu istorii skhidn'oho slov'ianstva' (The Traditional Scheme of 'Russian' History and the Problem of a Rational Ordering of the History of the Eastern Slavs) in *Sbornik stattei po slavianovedeniui*, vol 1 (1904). He applied it in his monumental work *Istoriia Ukrainy-Rusy* (The History of Ukraine-Rus', 10 vols, 1898–1937). His approach won acceptance not only among Ukrainian, but also among some foreign (particularly Russian and Polish), historians. Hrushevsky presented general surveys of Ukraine's history in his popular works, which were published in various editions and languages, beginning with *Ocherk istorii ukrainskogo naroda* (An Outline of the History of the Ukrainian People) in 1904. He wrote several hundred scholarly works on Ukrainian history, historiography, and the study of sources.

Hrushevsky's conception of history, which was based on the premise that social interests override state or political interests, was closely related to that of the populist school. However, the more he delved into history, and particularly into the Cossack and Khmelnytsky period, and the more he became involved in Ukrainian political life, the more weight he attributed to state and political factors.

One of Hrushevsky's important achievements was to found a school of history in Lviv consisting of such former students of his as S. Tomashivsky, M. Korduba, I. Krypiakievych, I. Dzhydzhora, I. Krevetsky, V. Herasymchuk, B. Barvinsky, and O. Terletsky. Most of their studies, which were primarily of the Lithuanian-Polish and Cossack-Hetman periods, were published by the \*Shevchenko Scientific Society (NTSh). The research promoted in Lviv was all-Ukrainian in scope and dealt with all regions of Ukraine. Consequently historians not only of Western Ukraine, but also from Russian-dominated Ukraine – O. Hrushevsky, V. Lypynsky, V. Domanysky, M. Vasylenko, V. Modzalevsky, O. Lototsky, M. Slabchenko, V. Barvinsky, and others – contributed to the publications of the society. After the 1905 Revolution, Hrushevsky established in Kiev a new important center

of historical research – the \*Ukrainian Scientific Society (UNT), which published the periodicals *Zapysky UNT*, *Ukraina*, and *Naukovyi zbirnyk*. Other scholars associated with this center were O. Levytsky, I. Kamanin, V. Shcherbyna, L. Dobrovolsky, V. Danylevych, A. Yakovliv, D. Doroshenko, M. Stadnyk, A. Berlo, Ye. Kivlitsky, and O. Shramchenko.

Historical research, mostly on Left-Bank and Slobidska Ukraine, was continued at Kharkiv University and by the Kharkiv Historical-Philological Society by D. Bahalii, D. Miller, M. Plokhynsky, V. Barvinsky, M. Maksymeiko, and others. In Odessa the university and the Odessa Society of History and Antiquities remained the main research centers. Their best-known scholars were I. Lynnychenko, M. Slabchenko, and P. Klepatsky. In Katerynoslav the Archival Commission focused on the history of the Zaporozhian Sich and southern Ukraine and published the works of such researchers as D. Yavornytsky, D. Doroshenko, and V. Bidnov. In Chernihiv the Archival Commission had such associates as V. Modzalevsky, P. Doroshenko, and A. Verzylov. I. Pavlovsky, L. Padalka, V. Parkhomenko, and others were associated with the Poltava Archival Commission. O. Fotynsky was active in Zhytomyr, and Rev Yu. Sitsynsky and P. Klymenko in Kamianets-Podilskyi. In Nizhen the local Historical Philological Society published studies by such scholars as M. Berezhkov and Yu. Maksymovych. P. Korolenko and F. Shcherbyna worked in the Kuban. The Tavriian Scholarly Archival Commission in the Crimea published studies by O. Markevych and others.

**The history of Ukraine in Russian and Polish historiography.** In the 19th and 20th centuries a number of foreign scholars contributed significantly to Ukrainian historiography. Most Russian and Polish historians, however, subsumed and fragmented the history of Ukraine within a scheme of history based on various concepts of the Russian or Polish states. In spite of their tendentiousness, however, Russian and Polish researchers brought forth a great deal of new documentary material, and some of them made a substantial contribution to Ukrainian historiography. Among Russian historians the most prominent investigators of Ukraine's past were S. Solovev, G. Karpov, A. Lappo-Danilevsky, A. Shakhmatov, E. Golubinsky, M. Liubavsky, A. Presniakov, M. Priselkov, V. Eingorn, P. Zhukovich, E. Shmurlo, B. Grekov, V. Picheta, and G. Vernadsky. The best Polish specialists were M. Grabowski, E. Rulikowski, J. Bartoszewicz, T. Stecki, K. Szajnocha, A. Jabłonowski, J. Rolle (Dr Antoni J.), M. Dubiecki, T. Korzon, K. Pułaski, J. Tretiak, L. Kubala, M. Handelsman, K. Chodyncki, W. Tomkiewicz, S. Kuczyński, O. Halecki, and H. Paszkiewicz.

**Modern Ukrainian historiography.** Building on the research of earlier periods, modern Ukrainian historians have demonstrated that there has been a historical continuity from the Princely Rus' state of the 10th–14th centuries through the Hetman state of the 17th–18th centuries to the national Ukrainian state revived in 1917–20. This tradition of national statehood has become the determining idea in modern Ukrainian historiography. Its founders were V. Lypynsky, S. Tomashivsky, and D. Doroshenko.

V. Lypynsky studied the history of the Ukrainian nobility and devoted much attention to Hetman B. Khmelnytsky's rule. His most important works are *Szlachta*

*ukraïnska i jej udział w życiu narodu ukraïnskigo* (The Ukrainian Nobility and Its Participation in the Life of the Ukrainian People, 1909), *Z dziejów Ukrainy* (On the History of Ukraine, 1912), and *Ukraina na perelomi, 1657–9* (Ukraine at the Turning Point, 1657–9, 1920). Lypynsky believed that the task of modern Ukrainian historiography was to revive the historical tradition of the Hetman state.

S. Tomashivsky wrote a number of important source studies of the Hetman period before turning his attention to medieval Ukraine. His *Ukrains'ka istoriia, 1: Starynni i seredni viky* (Ukrainian History, 1: The Ancient and Medieval Periods, 1919) is a synthetic interpretation of the period.

#### The interwar years

**Soviet Ukraine.** After the brief spell of Ukrainian independence from 1917 to 1920, Ukrainian historians in Galicia, Soviet Ukraine, and abroad continued their research in spite of various unfavorable circumstances. They refined and elaborated Hrushevsky's scheme of Ukrainian history by supplementing it with the modern principle of statehood. In the 1920s historical research flourished in the Ukrainian SSR owing mostly to the efforts of M. Hrushevsky, who in 1924 became a central figure at the All-Ukrainian Academy of Sciences (VUAN) in Kiev. He edited a number of periodicals that played a key role in Ukrainian historiography – *\*Ukraina* (1924–30), *\*Za sto lit* (1927–30), *\*Zapysky Istorychno-filolohichnoho viddilu VUAN* (1925–30), and *Naukovyi zbirnyk Istorychnoi seksii VUAN* (1924–9) – as well as the publications of the \*Archeographic Commission. Besides his own works the academy published the works of his associates, such as O. Hrushevsky, Y. Hermaize, P. Klymenko, V. Danylevych, V. Shcherbyna, L. Dobrovolsky, and K. Lazarevsky, and the works of his students S. Shamrai, O. Baranovych, M. Tkachenko, V. Yurkevych.

The second major centers of historical research in the 1920s were the institutions in Kiev and Kharkiv directed by D. Bahalii. Associates and fellows of these centers contributed important studies on 17th- and 18th-century Ukraine: the works of Bahalii himself and of O. Ohloblyn (economic and political history), N. Polonska-Vasylenko (the Zaporozhian Cossacks and southern Ukraine), V. Romanovsky, V. Barvinsky, N. Mirza-Avakiants, V. Dubrovsky, O. Bahalii-Tatarynova, V. Bazylevych, M. Horban, D. Solovii, A. Kozachenko, and others. M. Vasylenko and his associates – L. Okinshevych, I. Cherkasky, V. Novytsky, M. Tyshchenko, V. Hryshko – made significant contributions to the history of Ukrainian law and the state system, while such scholars as K. Vobly, A. Yaroshevych, and Ye. Stashevsky developed the field of economic history.

The Odessa historical center under the direction of M. Slabchenko also accomplished important work. Besides Slabchenko himself, a specialist in socioeconomic and legal history, scholars such as Ye. Zahorovsky and O. Riabinin-Skliarevsky were active there. Other, less important, centers of Ukrainian historiography were Dnipropetrovske, with such scholars as D. Yavornytsky and V. Parkhomenko; Poltava, with P. Klepatsky and others; Nizhen, with M. Petrovsky and A. Yershov; and Chernihiv, with P. Fedorenko and others. The Marxist historical school was centered mainly in Kharkiv and was led by M. Yavorsky and his associates and students M. Rubach, Z. Hurevych, and M. Svidzinsky. It was rather isolated from the mainstream of Ukrainian historiography in the 1920s and 1930s.

In the 1930s the Soviet authorities dissolved almost all the historical research centers. Many historians were arrested or dismissed from work and the normal development of historical studies in Soviet Ukraine was disrupted.

*Galicja and the emigration.* In the interwar years many historians worked in Galicia in spite of difficult material circumstances and political restrictions. Most of them, including S. Tomashivsky, I. \*Krypiakevych, M. \*Korduba, O. Terletsky, V. Herasymchuk, I. Krevetsky, B. Barvinsky, M. Chubaty, M. Andrusiak, Rev Y. Skruten, and Rev T. Kostruba, were associated with the NTSh. Their works were published in *ZNTSh*, *Stara Ukraïna*, *Analecta Ordinis S. Basilii Magni*, and *Bohosloviia*. In Transcarpathia Rev V. Hadzhega and A. Hodinka conducted research, and in Bukovyna, Ye. Kozak and M. Haras.

Outside Ukraine the main émigré institutions were the Ukrainian Free University, the Ukrainian Historical-Philological Society, and the Museum of Ukraine's Struggle for Independence in Prague; the Ukrainian Scientific Institute in Berlin; and the Ukrainian Scientific Institute and the Ukrainian Military History Society in Warsaw. Many prominent Ukrainian historians became émigrés: M. Hrushevsky (until 1924), V. Lypynsky, S. Tomashivsky (for a time), D. Doroshenko, A. Yakovliv, R. Lashchenko, V. Bidnov, V. Prokopovych, E. Borschak, O. Shulhyn, B. Krupnytsky, S. Narizhny, D. Olianchyn, Mykhailo Antonovych, and I. Losky. Some of them studied archival materials in Western Europe, which hitherto had been scarcely known in Ukrainian historiography. This research resulted in the publication of valuable studies including D. \*Doroshenko's synthetic works in Ukrainian history and historiography, A. \*Yakovliv's historiographic studies, B. \*Krupnytsky's works on I. Mazepa and P. Orlyk, E. \*Borschak's studies of H. and P. Orlyk and Franco-Ukrainian relations, and D. \*Olianchyn's investigations of Ukrainian-German relations in the 17th and 18th centuries.

#### The postwar period

*Soviet Ukraine.* After the war independent historical research in Ukraine was again restricted. Institutions such as the \*Institute of History of the Academy of Sciences of the Ukrainian SSR were staffed by such historians of the older and Soviet generations as I. Krypiakevych, M. Petrovsky, M. Rubach, O. Baranovych, K. Huslysty, F. Yastrebov, M. Suprunenko, P. Lavrov, V. Diadychenko, F. Los, K. Stetsiuk, V. Holobutsky, I. Hurzhii, and I. Boiko. Quite a number of works on Ukrainian history were published each year, and \**Ukraïns'kyi istorychnyi zhurnal* began appearing in 1957. Yet, Soviet Ukrainian historiography has been mostly subservient to the political goals and policies of the Soviet government. The interests of the Communist Russian state determine the ideology, methodology, subject-matter, and even the phraseology of the historians. The state dictates what the results of research should be and what conclusions should be drawn. Consequently the scholarly value of general historical surveys, such as *Istoriia Ukraïns'koï RSR* (History of the Ukrainian SSR, 2 vols, 1953, 1958, and in 8 vols [1977-9]), of monographs, such as I. Krypiakevych's *Bohdan Kmel'nyts'kyi* (1954), and even of collections of documents, such as *Vossoedinenie Ukraïny s Rossiei* (The Reunification of Ukraine with Russia, 3 vols, 1954), is diminished considerably.

In 1954 Hrushevsky's castigated scheme was formally

replaced by the CC CPSU-approved 'Theses on the 300th Anniversary of Ukraine's Reunification with Russia' as the normative framework of historical interpretation. This new scheme is based on the officially recognized concept of one Rus' people, out of which the Russian, Ukrainian, and Belorussian nations developed. The theses on reunification thus posit a unitary Russian state and thereby rule out the existence of the Hetman state and impute a common path of national development for Russians, Belorussians, and Ukrainians culminating in tsarist Russia and now in the USSR. The few Soviet historians – M. \*Braichevsky, for example – who have openly rejected this theory have been severely criticized and even repressed.

Since 1954 the only Soviet surveys of Ukrainian historiography that have appeared are M. Marchenko's *Ukraïns'ka istoriografii (z davnikh chasiv do seredyiny XIX st.)* (Ukrainian Historiography [from Ancient Times to the Mid-19th Century], 1959) and, a quarter of a century later, L. Kovalenko's *Istoriografii istorii URSR* (Historiography of the History of the Ukrainian SSR, 1983) and A. Santsevych's *Ukraïns'ka radians'ka istoriografii (1945-1982)* (Soviet Ukrainian Historiography [1945-82], 1984). The major source of general historical information that has appeared is *Radians'ka entsyklopediia istorii Ukraïny* (The Soviet Encyclopedia of the History of Ukraine, 4 vols, 1969-72). Several valuable annuals have been published: *Istorychni dzherela ta ikh vykorystannia* (1966-72), *Kyïvs'ka starovyna* (1973), *Istoriografichni doslidzhennia v Ukraïns'kii RSR* (1968-72), and *Istorychni doslidzhennia: Vitchyzniana istoriia* (1975-).

Some of the contemporary historians in Soviet Ukraine are O. Apanovych, Ya. Dashkevych, Yu. Hamretsky, H. Herbilsky, V. Hrabovetsky, Ya. Isaievych, P. Kalenychenko, O. Karpenko, L. Kovalenko, O. Kompan, S. Korolivsky, M. Kotliar, M. Kravets, M. Leshchenko, A. Lykholat, P. Mykhailyna, I. Rybalka, A. Santsevych, P. Tolochko, V. Sarbei, A. Shlepakov, H. Serhienko, S. Tymoshchuk, S. Vysotsky, and Ya. Zapasko.

*Scholarship in the West.* Among the older Ukrainian historians who found themselves in Western Europe or North America after the war were M. Andrusiak, E. Borschak, Rev A. Velyky, I. Vytanovych, M. Zhdan, P. Hrytsak, V. Hryshko, D. Doroshenko, V. Dubrovsky, B. Krupnytsky, Rev I. Nazarko, O. Ohloblyn, L. Okinshevych, D. Olianchyn, N. Polonska-Vasylenko, Rev Y. Skruten, M. Chubaty, O. Shulhyn, A. Yakovliv, K. Pankivsky, and M. Stakhiv. The chief publishers of works in history have been the Shevchenko Scientific Society, the Ukrainian Academy of Arts and Sciences, the Ukrainian Free University, and the Basilian scholarly center in Rome. Some of the outstanding publications of the immediate postwar period were E. Borschak's *La Légende historique de l'Ukraine. Istoriia Rusov* (1949), B. Krupnytsky's *Het'man Danylo Apostol i ioho doba* (Hetman Danylo Apostol and His Period, 1948), L. Okinshevych's *Znachne viis'kove tovarystvo v Ukraïni-Het'manshchyni XVII-XVIII st.* (Notable Military Fellows in Hetman Ukraine of the 17th-18th Century, *ZNTSh*, vol 157 [1948]), A. Yakovliv's *'Ukraïns'kyi kodeks 1743 roku'* (The Ukrainian Code of 1743, *ZNTSh*, vol 159 [1949]), and N. Polonska-Vasylenko's *Settlement of the Southern Ukraine, 1750-1775* (AUA, vols 4-5 [1955]). Ukrainian historians have collaborated on various compendiums and journals, as well as the encyclopedias published in the West.

Many postwar Ukrainian historians outside Ukraine have worked at various universities and other institutions, where they have specialized in different areas of Ukrainian and East-European history. Historians in the United States include J. Basarab, M. Bohachevsky-Chomiak, Y. Bilinsky, N. Chirovsky, B. Dmytryshyn, O. Dombrowsky, O. Fedyshyn, G. Gajecky, Š. Horak, T. Hunczak, I. Kamenetsky, R. Klymkevych, Z. Kohut, T. Mackiw, M. Palij, Ya. Pelensky, J. Reshetar, R. Solchanyk, O. Sonevytsky, P. Stercho, F. Sysyn, R. Szporluk, and L. Wynar. O. Pritsak holds the Hrushevsky Chair of Ukrainian History at Harvard University, where the Harvard Ukrainian Research Institute publishes *Harvard Ukrainian Studies*. In 1965 the Ukrainian Historical Society was founded in the United States; it publishes the journal *Ukrains'kyi istoryk*. In Canada specialists in Ukrainian history include M. Antonovych, A. Baran, O. Gerus, J.-P. Himka, O. Pidhainy, T. Prymak, I.L. Rudnytsky, R. Serbyn, O. Subtelny, and S. Velychenko. P. Magocsi holds the Chair of Ukrainian Studies at the University of Toronto, which specializes in history. The Canadian Institute of Ukrainian Studies has published historical monographs and conference proceedings, as well as articles in its *Journal of Ukrainian Studies*. In Europe the best-known Ukrainian historians include B. Kentrzhytsky, V. Kosyk, A. Zhukovsky, D. Zlepko, and O. Vintoniak. Non-Ukrainian historians who have published significant works on Ukrainian history include A. Adams, J. Armstrong, R. Conquest, L. Gordon, J. Mace, C. Manning, and R. Sullivant in the United States; W. Allen in England; and R. Portal and G. Luciani in France. Among Polish historians who have devoted their attention to Ukrainian history are W. Serczyk, L. Podchorodecki, A. Podraza, J. Radziejowski, J. Kozik, A. Poppe, R. Torzecki, and Z. Wójcik. Russian historians have also written on Ukrainian history; among them are E. Druzhinina, G. Marakhov, V. Mavrodin, V. Pashuto, B. Rybakov, and M. Tikhomirov. (See also \*Archeography and \*Church, historiography of the Ukrainian.)

**History, Institute of the Academy of Sciences of the Ukrainian SSR.** See Institute of History of the Academy of Sciences of the Ukrainian SSR.

**History Library of the Ukrainian SSR** (Istorychna biblioteka URSR). A library in Kiev specializing in historical literature. Founded in 1939 on the basis of several religious libraries in Kiev, the building was destroyed during the Second World War and most of its books (approx 500,000 volumes) were stolen or perished. The library reopened in 1952. In 1979 its collection consisted of approximately 639,400 volumes relating to the history of the Ukrainian SSR, Marxist-Leninist theory, the history of the CPSU and the USSR, archeology, numismatics, ethnography, philosophy, the history of art and literature, and the history of religion. The department of rare books contains some 67,000 books and manuscripts of Ukrainian and foreign origin.

**History of Ukraine.** Information on the earliest history of Ukraine is derived from archeological records and from general descriptions of the early Slavs by Greek, Roman, and Arabic historians. Beginning with the Middle Ages, the history of the Ukrainians can be divided into discernible periods: (1) the so-called Princely era of \*Kievan Rus' and the Principality of \*Galicia-Volhynia; (2) the period of the \*Lithuanian-Ruthenian state; (3) the period of the \*Cossacks and the \*Hetman state; (4) the national and cultural renaissance of the 19th century; (5) the Ukrainian nation-state of 1917–21; (6) the interwar occupation of Ukrainian territories by four foreign powers; and finally (7) the consolidation of most Ukrainian ethnic territory into a Soviet Ukrainian state. Because more than one political state often ruled Ukraine's territories simultaneously and, at times, several Ukrainian governments coexisted (eg, those of the Hetman state and of Right-Bank Ukraine), dealing with Ukraine's history presents many difficulties. Furthermore Western Ukraine experienced a historical development separate from that of central and eastern Ukraine, resulting in the evolution

of the historical-political entities of \*Galicia, \*Volhynia, \*Bukovyna, and \*Transcarpathia. The only denominator unifying all of Ukraine's lands and state formations has been the Ukrainian people and its linguistic, social, cultural, and religious specificities.

**The Stone Age.** The oldest traces of human existence in Ukraine, dating from the early \*Paleolithic Period (ca 300,000 BC) of the Stone Age, were discovered near the village of Luka-Vrublivetska on the Dniester River in 1946. Archeological evidence indicates that by the Upper Paleolithic Period (40,000–15,000 BC) almost all of Ukraine was inhabited by clans of hunters and gatherers. During the \*Mesolithic Period (10,000–7,000 BC) Ukraine's inhabitants engaged in fishing, had domesticated dogs, and used the bow and arrow; the first tribal units then appeared. During the \*Neolithic period (7,000–3,000 BC) primitive \*agriculture and \*animal husbandry arose, as did pottery and weaving. These activities developed further during the Copper and \*Bronze ages.

**The Copper and Bronze ages.** The \*Trypilian culture (first discovered in 1896), which existed from 4,000 to 2,000 BC in the Dnieper and Dniester basins of Right-Bank Ukraine, was the most advanced culture during this period on the territory of Ukraine. Many other synchronous cultures evolved from the late 4th to the early 1st millennium BC. The Left-Bank steppe and forest-steppe were inhabited by the agricultural-pastoral tribes of the \*Pit-Grave, \*Catacomb, \*Serednyi Stih, \*Marianivka, \*Timber-Grave, and \*Bondarykha cultures. Right-Bank Polissia and parts of the forest-steppe were the home of the \*Middle-Dnieper and \*Bilohrudivka cultures. The tribes of the Corded-Pottery, Funnel-Ware, \*Globular-Amphora, \*Trzcinec, and \*Lusatian cultures inhabited Volhynia and parts of Podilia. The \*Komariv, \*Vysotske, and \*Noua cultures evolved in the Dniester Basin, and the \*Stanove culture, in Transcarpathia.

**The Iron Age.** During the \*Iron Age, significant changes occurred in the material culture of Ukraine's inhabitants, particularly in agriculture, metallurgy, and commerce. In the early 1st millennium BC Iranian tribes – \*Cimmerians – appeared on the territory of the Dnieper and Boh basins in southern Ukraine. Archeological evidence shows that they, like the tribes of the indigenous Timber-Grave, Bilohrudivka, Bondarykha, and \*Chornyi Lis cultures, had iron implements. In the 8th century BC, the Cimmerians were displaced by the \*Scythians, tribes of nomadic horsemen from Central Asia that intermingled with and assimilated the indigenous peoples and founded an empire that lasted until the 2nd century AD. The Scythians' political and economic hegemony in the region was established after they repulsed the invasion of King Darius of Persia in 513 BC.

From the 7th century BC, Greek city-states founded trading colonies on the northern Pontic littoral. With time these towns became independent poleis (see \*Ancient states on the northern Black sea coast), which interacted and traded with the other peoples of the region, particularly the Scythians, \*Taurians, \*Maeotians, \*Sindians, and \*Getae. In the late 5th century BC, the Hellenic towns on the Kerch and Taman peninsulas of the Crimea united to form the \*Bosporan Kingdom. In the 1st century BC the Hellenic states were annexed by the Romans and remained under Roman rule until the invasions of new nomadic peoples: the \*Sarmatians, \*Alans, and \*Roxolani, Iranian-speaking tribes from Central Asia that

Wild Boar Hunt; detail from a wall painting in the Scythian tomb near Neapolis

had appeared in the Pontic steppes in the 4th century BC and had conquered most of the Scythians' territories by the 2nd century BC; and the \*Goths, Germanic tribes that arrived in the late 2nd century AD from the Baltic region and conquered the Sarmatians and other indigenous peoples. In the 3rd century the Goths waged war against the Romans and took most of their colonies on the Pontic littoral. Gothic rule collapsed in 375 under the onslaught of the \*Huns; most of the Goths fled west beyond the Danube, and only a small number remained in the Crimea.

The Hunnic invasion of Europe initiated what is known as the great migration of peoples from the East. After the Huns, the Ukrainian steppes were invaded by the Bulgars in the 5th century, the \*Avars in the 6th, the \*Khazars in the 7th, the Magyars in the 9th, the \*Pechenegs and \*Torks in the 10th and 11th, the \*Cumans in the 11th and 12th, and the \*Mongols in the 13th.

By the 2nd century BC, Ukraine's forest-steppe regions, Polissia, and part of the steppe were inhabited by the agricultural proto-Slavic tribes of the \*Zarubyntsi culture; Western Ukraine was populated by the tribes of the \*Przeworsk culture. By the 2nd century AD, the tribes of the \*Cherniakhiv culture populated large parts of the Ukrainian forest-steppe. Most scholars consider the territory bounded by the middle Dnieper River, the Prypiat River, the Carpathian Mountains, and the Vistula River to be the cradle of the ancient \*Slavs. By the 4th century AD, the Eastern Slavs of Ukraine had organized themselves into a tribal alliance called the \*Antes, whose domain stretched from the Dniester to the Don River. In the early 6th century the Antes established relations with the \*Byzantine Empire, against which they also waged war in the Balkans. Their state lasted until the 7th century, when it was destroyed by the Avars and most of the Antes fled north to resettle in the upper Dnieper Basin.

By the 6th century AD, the ancestors of the Ukrainians were divided into several tribal groups: the \*Polianians on the banks of the Dnieper River around Kiev; the \*Siverianians in the Desna, Seim, and Sula basins; the \*Drevlians in Polissia between the Teterev and Prypiat basins; the \*Dulibians, later called \*Buzhanians and \*Volhynians, in the Buh Basin; the \*White Croats in Subcarpathia; the \*Ulychians in the Boh Basin; and the \*Tivertsians in the Dniester Basin. These tribes had ties with the proto-Belorussian \*Drehovichians, the proto-Russian \*Radimichians, \*Viaticians, and \*Krivichians, and the Baltic tribes to the north; the Bulgarian Kingdom and the Byzantine Empire to the south; the Khazar Khaganate and the Volga Bulgars to the east; and the proto-

Polish Vistulans and Mazovians, Great Moravia, and the Magyars to the west. They also traded with more distant lands via international trade routes: the route 'from the Varangians to the Greeks' linking the Baltic and Black seas mostly via the Dnieper River and thus joining Scandinavia with Byzantium; the east-west route from the Caspian Sea to Kiev and then to Cracow, Prague, and Regensburg, thus joining the Arab world with central and western Europe; and the route linking the Caspian and Baltic seas and thus the Arab world with Scandinavia. Because they lived along or at the crossroads of these important trade routes, the proto-Ukrainian tribes played an important economic and political role in eastern Europe.

The tribes shared a common proto-Slavic language and pagan beliefs. They built their agricultural settlements around wooden fortified towns. \*Kiev was the capital of the Polianians; \*Chernihiv, of the Siverianians; Iskorosten (\*Korosten), of the Derevlians; Volyn (Horodok on the Buh), of the Dulibians; and \*Peresichen, of the Ulychians. The Polianians were the most developed of the tribes; according to the Rus' Primary Chronicle, their prince, \*Kyi, founded Kiev in the late 6th century. Kiev's strategic position at the crossroads of the trade routes contributed to its rapid development into a powerful economic, cultural, and political center. The tribal princes, however, were not able to transform their tribal alliances into viable states and thus protect their independence. In the early 8th century, the Polianians and Siverians were forced to recognize the supremacy of the Khazar Khaganate and to pay tribute. In the mid-9th century, the warlike \*Varangians from Scandinavia invaded and conquered the tribal territories, and established the foundations for \*Kievan Rus' state with its capital in Kiev.

**The Princely era.** The leading role in this state until its demise some five centuries later was played by the princes (whence the name of this period). The Primary Chronicle states that the Eastern Slavs had invited the Varangians to rule over them. This source was later used to substantiate the so-called \*Norman theory of the origins of Kievan Rus'. The \*Riurykids, the dynasty that ruled Rus' and other East European territories until 1596, originated with the Varangian prince \*Riuryk. The most outstanding Varangian ruler of Rus' was Prince \*Oleh (Oleg), who succeeded Riuryk in Novgorod ca 879. In 882 he killed \*Askold and Dyr and took power in Kiev, which became the capital of his realm. He then conquered most of the East Slavic tribes, thus becoming the undisputed ruler of a vast and mighty state. After consolidating his power and eliminating the influence of the Khazars on his territory, Oleh undertook an expedition against Constantinople, forcing it to sue for peace and to pay a large indemnity in 907. In 911 he concluded an advantageous trade agreement and laid the basis for permanent trade links between Rus' and the Byzantine Empire.

The efforts of Oleh's successor \*Ihor (Igor, 912–45) to gain control of the northern Pontic littoral led to war with Byzantium and to a new treaty with Constantinople: the trade privileges obtained by Oleh were significantly curtailed. Throughout his reign, Ihor tried to consolidate the central power of Kiev by pacifying the rebellious neighboring tribes. The Derevlians, who fiercely defended their autonomy, captured and killed Ihor during one of his attempts to extort tribute from them.

Ihor's widow \*Olha (Olga, 945–62), who was possibly a Slav, ruled Rus' until her son Sviatoslav I Ihorevych came of age. During her reign the Slavic members of her court gained ascendancy. Olha converted to Christianity by 957. She established direct contacts with Constantinople and links with West European rulers.

\*Sviatoslav (962–72), known as 'the Conqueror,' expanded the borders and might of Rus'. He waged a successful war against the Volga Bulgars and destroyed the Khazar Kaganate. The elimination of the Khazars had negative consequences, however: it opened the way for the invasion of Rus' by new Asiatic tribes. Sviatoslav expanded the frontiers of his realm to the Caucasus and then conquered the Bulgarians (967–8), establishing Pereiaslavets on the Danube. Threatened by his encroachments, Constantinople declared war on Sviatoslav. After initial victories in Macedonia, Sviatoslav was defeated and forced out of Bulgaria in 971. On his way back to Kiev with a small retinue, he was ambushed by Pecheneg mercenaries of the Byzantines near the Dnieper Rapids and died in battle.

\*Yaropolk I Sviatoslavych (972–80) ruled over Kiev after his father's death. He wanted to unite the entire kingdom under his rule and succeeded in killing Oleh, but his brother Volodymyr escaped and hired Varangian mercenaries, with whose help he killed Yaropolk.

Encolpion with St Boris, from the Church of the Tithes in Kiev

\*Volodymyr I the Great (980–1015) thus united under his rule the lands acquired by his predecessors and proceeded to extend his territory. He waged an ongoing struggle from 988 to 997 with the Pechenegs, who were constantly attacking Rus' towns and villages, and built a network of fortresses to protect Kiev.

After his conquests, Volodymyr ruled the largest kingdom in Europe, stretching from the Baltic Sea in the north to the Azov and Black seas in the south and the Volga River in the east to the Carpathian Mountains in the west. To administer his scattered lands, he created a dynastic seniority system of his clan and members of his retinue (\**druzhyna*), in which the role of the Varangians was diminished. To give his vast domain a unifying element Volodymyr adopted Byzantine Christianity as the state religion, was baptized, and married Anna, the sister of the Byzantine emperor Basil II.

The official \*Christianization of Ukraine in 988 had important consequences for the life of Kievan Rus' (see also \*Church, history of the Ukrainian). The unity of the state and the authority of the grand prince were strength-

ened. \*Byzantine art, architecture, literature, and teaching were introduced and adopted by the princes, boyars, and upper classes. Many churches and monasteries were built, and the \*clergy became a powerful cultural and political force.

Line of Bishops; mosaic in the lower apse of the St Sophia Cathedral in Kiev

During his reign, Volodymyr began minting coins stamped with the symbol of a trident. In 1918 the \*trident was chosen as Ukraine's national emblem.

Towards the end of his life, Volodymyr's sons Sviatopolk and Yaroslav (by then prince of Novgorod) rebelled against his authority. When Volodymyr died in 1015, a bitter struggle for hegemony ensued among his sons, which lasted till 1036 when Yaroslav established control over most of the Kievan state.

During the reign of \*Yaroslav the Wise (1019–54) the Kievan state attained the height of its cultural development.

Yaroslav paid much attention to the internal organization of his state. He built fortifications to defend his steppe frontier. He promoted Christianity, established schools, and founded a library at the St Sophia Cathedral (in 1036 to commemorate his victory over the Pechenegs). During Yaroslav's reign the \*Kievan Cave Monastery was founded in 1051; it became the pre-eminent center of monastic, literary, and cultural life in Rus'. Yaroslav had the customary law of Rus' codified in the \**Ruskaia Pravda* in order to regulate economic and social relations, which were becoming more complex. An important development that occurred during his rule was the rise of an indigenous, Slavic political elite in the Kievan state that included such figures as Yaroslav's adviser \*Dobrynia, Dobrynia's son Konstantyn (Yaroslav's lieutenant in Novgorod), and Vyshata Ostromyrych (the governor of Kiev). Thenceforth the role of the Varangians was limited, even as mercenaries. Yaroslav's influence spread far and wide because he arranged dynastic alliances with nearly all the reigning families of Europe.

Before his death in 1054, Yaroslav divided his realm among his five remaining sons. Yaroslav maintained the principle of seniority introduced by his father, according to which the eldest son inherited Kiev and the title of grand prince, while the other sons were to respect the eldest and help him administer Rus'. In the event of the death of the eldest son, his place was to be taken by the

Fragments of frescoes and floors and a cross found in the ruins of the Church of the Tithes in Kiev

next eldest, and so forth. The seniority principle did not survive the test of time, however. As the sons and their offspring prospered in the lands they inherited, their interests conflicted with one another and with the interests of state unity. Internecine strife developed, provoking the eventual collapse of the Kievan state.

The last of Yaroslav's sons on the Kievan throne, \*Vsevolod Yaroslavych (1078–93), directly ruled the principal lands of Rus': Kiev, Chernihiv, Pereiaslav, Smolensk, Rostov, and Suzdal. In the last years of his reign, Vsevolod's realm was administered by his son \*Volodymyr Monomakh of Pereiaslav.

Vsevolod was succeeded in Kiev by his nephew \*Sviatopolk II Iziaslavych (1093–1113), whose reign was distinguished by his continuous wars with the Cumans. With his cousin, Volodymyr Monomakh, Sviatopolk undertook successful expeditions against the invaders in 1103, 1109, and 1111.

The Cuman menace and ongoing wars among the princes were the subject of the 1097 \*Liubech congress of princes near Kiev. Called at the initiative of Monomakh, the princes altered the principle of patrimony. It was decided that sons had the right to inherit and rule the lands of their fathers, thus annulling the seniority system created by Yaroslav the Wise, and that Rus' would be subdivided into autonomous principalities, whose rulers would, nonetheless, obey the grand prince in Kiev.

The consensus reached at Liubech was short-lived. Conflicts among the princes once again began pitting the Rostyslavych, Monomakh, and Sviatoslavych branches of the dynasty against Davyd Ihorevych and Sviatopolk. To settle the conflicts and organize campaigns against the Cumans, congresses were held at \*Vytychiv (1100) and \*Dolobsk (1103).

The Kiev Uprising of 1068–9; miniature from the Radziwill Chronicle

When Sviatopolk died, the common people responded to the social and economic oppression of his regime with the \*Kiev Uprising of 1113. The alarmed boyars turned to Volodymyr Monomakh to restore order and to ascend the Kievan throne. The popular Monomakh (1113–25) began his reign by amending the *Ruskaia Pravda* (see the \*Statute of Volodymyr Monomakh). He was the last of the grand princes who strove to curtail the internecine wars among the princes in order to maintain the unity and might of Rus'. As before, Monomakh concentrated on combating the Cumans, whom he drove back to Caucasia and the Volga early in his reign, making the steppes safe again for Slavic colonization.

During Monomakh's reign, Rus' flourished culturally. Many churches were built, the \*Kievan Cave Patericon was begun, and the writing of chronicles, hagiography, and other literature thrived. Before his death Monomakh wrote his famous testament, *\*Pouchennia ditiam*, a work of literary value in which he instructed his sons how to be strong and just rulers.

*Skomorokhy*; fresco in the south tower of the St Sophia Cathedral in Kiev

Monomakh was succeeded by his eldest son \*Mstyslav I Volodymyrovych (1125–32), who inherited the lands of Kiev, Smolensk, and Novgorod; the remaining lands of Rus' were distributed among his brothers. Mstyslav's

authority stemmed from his ability to organize the princes in combating the Cumans' renewed invasions. Like his father, he maintained ties with the rulers of Europe.

*The political and social institutions of Kievan Rus'*. From the 10th to the 12th century the Kievan state underwent significant sociopolitical changes. Volodymyr the Great was the first ruler to give Rus' political unity, by way of organized religion. The church provided him with the concepts of territorial and hierarchical organization; Byzantine notions of autocracy were adopted by him and his successors. The grand prince maintained power by his military strength, particularly through his *\*druzhyna* or retinue. He ruled and dispensed justice with the help of his appointed viceroys and local administrators – the *\*tysiatskyi*, *\*sotskyi* and *\*desiatskyi*.

Members of the *druzhyna* had a dual role: they were the prince's closest counselors in addition to constituting the elite nucleus of his army. Its senior members, recruited from among the 'better people' or those who had distinguished themselves in combat, soon acquired the status of barons called \*boyars. The prince consulted on important state matters with the \*Boyar Council. The *\*viche* (assembly) resolved all matters on behalf of the population and it became particularly important during the internecine wars of the princes for the throne of Kiev.

The privileged elite in Rus' was not a closed estate; based as it was on merit, its membership was dependent on the will of the prince. The townsfolk consisted of \*burghers – mostly \*merchants and craftsmen – and paupers. Most freemen were yeomen, called \*smerds. A smaller category of half-free peasants were called *zakup*s. The lowest social strata in Rus' consisted of slaves (see \*slavery).

*The disintegration of the Kievan state*. During the reign of Mstyslav's successor and brother, Yaropolk Volodymyrovych (1132–9), widespread dynastic rivalry for the crown of the 'grand prince of Kiev and all of Rus'' arose between the \*Olhovych branch of Chernihiv and the Monomakhovych clans. These internecine wars continued for a century, during which time the throne of \*Kiev principality changed hands almost 50 times.

As a result of the wars, Kiev's primacy rapidly declined. In 1169 Prince Andrei Bogoliubskii of Vladimir, Rostov, and Suzdal sacked Kiev and left it in ruins. Thereafter the title of grand prince of Kiev became an empty one, and the autocratic rulers of Vladimir were a constant threat to the Ukrainian principalities of southern Rus', as were the Cumans. From the mid-12th century, \*Kiev, \*Polatsk, \*Turiv-Pynske, Volodymyr-Volynskyi (see \*Volhynia), Halych (see \*Galicia), \*Chernihiv, and \*Pereiaslav developed as politically and economically separate units. In 1136 \*Novgorod became a sovereign mercantile city-republic tied to the Baltic cities of the Hanseatic League and the Slavic hinterland and controlled by a boyar oligarchy.

Galicia assumed the leading role among the Ukrainian principalities during the reign of its prince \*Volodymyrko (1124–53). The reigns of his son \*Yaroslav Osmomysl (1153–87), who extended the territory of Halych principality to the Danube Delta, and grandson \*Volodymyr Yaroslavych (1187–99) were marked by frequent struggles with the powerful Galician boyar oligarchy.

Volhynia gained prominence under the reign of the Monomakhovychi beginning in the 1120s. After a half-century of individual, fragmented autonomy, the ap-

panage Volodymyr and Lutske (Lucheske) principalities and the \*Berestia land were reunited under the rule of Prince \*Roman Mstyslavych (1173–1205). In 1199 Roman was invited by the Galician boyars to become the ruler of Halych principality.

The historical fate of \*Transcarpathia, which until the late 10th century was ruled by the Kievan state, was different. After the death of Volodymyr the Great, the Hungarian king, Stephen I, took advantage of the internecine struggles that arose in Rus' to annex Transcarpathia; except for a few short periods, it remained part of Hungary until 1918. The other western borderlands, \*Bukovyna and \*Bessarabia, were part of Rus' from the 10th century, and it was only after the demise of the Galician-Volhynian state that they became part of \*Moldavia.

St Mark the Evangelist; miniature from the Ostromir Gospel (1056)

*The Galician-Volhynian state (1199–1340).* As the ruler of the newly created Principality of \*Galicia-Volhynia, and particularly after he conquered the lands of Kiev principality in 1202, Roman reigned over a large and powerful state, which he defended from the Yatvingians and Cumans. When he died the boyar oligarchy took control in Galicia.

Prince Leszek of Cracow and King Andrew II of Hungary exploited the succession crisis and civil strife: Leszek occupied most of Volhynia, and Andrew placed his son Koloman on the Halych throne in 1214 as 'King of Galicia and Lodomeria.' In 1221 \*Mstyslav of Novgorod, to whom the boyars had appealed for help, defeated the Hungarians, occupying the Galician throne until 1228. By 1230 \*Danylo Romanovych and \*Vasylo Romanovych were able to consolidate their rule in Volhynia, and in 1238 they drove the Hungarians, to whom Mstyslav had restored Galicia in 1228, from Galicia.

Yet the threat from the east continued. The Mongols entered Rus' and routed the united armies of the Rus' princes under the command of Mstyslav Mstyslavych

and Danylo at the Kalka River in 1223. A large army of Mongols led by \*Batu Khan invaded Rus' again in 1237, devastated the Pereiaslav and Chernihiv regions in 1239, sacked Kiev in 1240, and penetrated into Volhynia and Galicia, where it razed most of the towns, including Volodymyr and Halych in 1241.

Danylo, the outstanding ruler (1238–64) of Galicia-Volhynia, after defeating the Teutonic Knights at Dorohychyn in 1238, subduing the rebellious boyars in 1241–2, and defeating Rostyslav Mykhailovych of Chernihiv and his Polish-Hungarian allies at Yaroslav in 1245, prepared to overthrow the Mongol yoke. His attempts at forming a military coalition with the Papacy, Hungary, Poland, and Lithuania against the Mongols did not succeed, however, and in 1255 Danylo relied on his own forces to defeat the Mongols and their vassals between the Dniester and Boh rivers and in Volhynia. But the massive Mongol offensive of 1259, led by \*Burundai, forced him to submit to the authority of the \*Golden Horde.

The Galician-Volhynian state declined steadily under Danylo's successors \*Lev I Danylovych (1264–1301), \*Yurii Lvovych (1301–15), \*Lev II and Andrii Yuriiiovych (co-rulers 1315–23), and \*Yurii II Boleslav (1323–40). After the death of Yurii II, rivalry among the rulers of \*Poland, \*Hungary, \*Lithuania, and the Mongols for possession of Volhynia and Galicia ensued. The Lithuanian duke \*Liubartas became the ruler of Volhynia and the Kholm region. The Polish king \*Casimir III attacked Lviv in 1340, but it was not until 1349 that he was able to defeat the Galician boyars led by D. \*Dedko and to occupy Galicia. Casimir's successor, Louis I of both Hungary (1342–82) and Poland (1370–82), ruled Galicia through his vicegerents, among them \*Wladyslaw Opolczyk. In 1387, Louis's daughter Queen \*Jadwiga annexed Galicia and the Kholm region to Poland.

The Kievan state and the Galician-Volhynian states, referred to in Ukrainian historiography as the Princely era, lasted in Ukraine for nearly five centuries, from 860 to 1340. The Galician-Volhynian state, relatively unscathed by the Mongol onslaught, became the main repository of the traditions of the Kievan state, and the historical evolution of the Ukrainian lands remained incontrovertibly tied to that of Western civilization.

**Ukraine under Lithuanian and Polish rule.** While the Ukrainian principalities declined under onslaughts of the Asiatic nomads, the Grand Duchy of \*Lithuania rose to prominence in the Baltic region. \*Gediminas (1316–41) annexed the Belorussian and Ukrainian lands of \*Chorna Rus', Vitsebsk, Minsk, Berestia, Turiv-Pynske, Volhynia, and the northern Kiev region. In 1323 Gediminas assumed the title of 'Lithuanian, Samogitian, and Ruthenian (Rus') grand duke.' To consolidate his realm, he fostered dynastic ties by marrying his daughters to Ruthenian (Belorussian and Ukrainian) princes and promoting Ruthenian culture. \*Algirdas (1345–77) enlarged the grand duchy by conquering the Ukrainian lands of Chernihiv, Novhorod-Siverskyi, and, after defeating the Tatars at Syni Vody in 1363, Kiev, Pereiaslav, and Podilia.

Thus, nine-tenths of the grand duchy became composed of autonomous Ukrainian and Belorussian territories. Until 1385 the intermarriage of Ruthenian and Lithuanian princely families strengthened the Ruthenian influence in the \*Lithuanian-Ruthenian state. As members of the grand duke's privy council, high-ranking military commanders, and administrators (vicegerents),

Ruthenian nobles became part of the ruling elite. Ruthenian became the official state language and Orthodoxy the prevailing religion (10 of Algirdas's 12 sons were Orthodox). Under Algirdas's son and successor Jogaila, the Lithuanian-Ruthenian state was threatened by the Teutonic Knights, Tatars, and Muscovy. To gain support Jogaila agreed to marry the Polish queen \*Jadwiga, share her throne, and unite Lithuania with Poland. After the Union of \*Krevo of 1385, Jogaila became King Władysław II \*Jagiello of Poland as well as remaining the grand duke of Lithuania. Although the grand duchy retained its independence, the Polish nobility made inroads there, resulting in a strong Lithuanian-Ruthenian backlash against Polonization and Catholicism.

Artifacts from the Princely era: 1) sword handle; 2) soldier's helmet; 3) prince's helmet; 4-5) silver coins of Volodymyr the Great, 10th-11th centuries; 6) coin of Prince Sviatopolk II, 11th century; 7) coin of Yaroslav the Wise, early 11th century; 8) detail from a prince's helmet; 9-11) gold and silver arm-bands; 12) chain from Chernihiv [from V. Sichynsky]

Opposition to this union was led by \*Vytautas, whose popularity and alliance with the Teutonic Knights forced Jagiello to recognize him in 1392 as grand duke of all Lithuanian-Ruthenian lands. Under his rule (1392-1430) the grand duchy incorporated all the lands between the Dniester and Dnieper rivers as far south as the Black Sea and reached the summit of its greatness. After his defeat by the Tatars in battle at the Vorskla River in 1399, however, Vytautas was forced to abandon his expansionist plans in the east and seek an accord with Jagiello. The Lithuanian-Polish Union of \*Horodlo of 1413 curtailed

the participation of the Orthodox (and thus the Ruthenians) in governing the state and allowed only Catholics to remain in the Lithuanian state council.

Towards the end of the 15th century a new external menace arose – the Crimean Tatar Khanate, which seceded from the Golden Horde and in 1478 became a vassal of Ottoman Turkey. As the ally of Grand Prince Ivan III of Muscovy, Lithuania's enemy, Khan Mengli Girei sacked Kiev in 1482. From then on the \*Tatars regularly raided and ravaged the Ukrainian lands. Lithuania was unable to prevent these raids, nor could it stop Muscovy from annexing a large part of its Ruthenian lands, including northern Chernihiv and Novhorod-Siverskyi principalities. With the support of Muscovy, certain Ruthenian princes, led by M. \*Hlynsky, who proclaimed himself grand duke, rebelled against Lithuanian Catholic rule in 1508. The rebellion was quelled, however, and the \*Hlynsky and other noble families fled to Muscovy. Thus ended the last attempt by the Ruthenian princes to secede from Lithuania.

Court Musicians; a miniature from the Kiev Psalter (1397)

Lithuania and Poland's ongoing wars with Muscovy and the Tatar threat during the reigns of \*Alexander Jagiellończyk (1492-1506), \*Sigismund I (1506-48), and \*Sigismund II Augustus (1548-72) created the need for close collaboration, mutual defense, and a movement for a real, and not just dynastic, union of the two states. The Lithuanian-Ruthenian lower nobility supported unification, for it would give them the privileges and freedoms enjoyed by the *szlachta* in the Polish parliamentary monarchy. The princes and magnates opposed it, however, for it would mean the loss of their authority (see \*Council of Lords). In January 1569 the Sejm in Lublin failed to reach an accord on the union, and Sigismund II annexed Podlachia, Volhynia, and the Kiev and Bratslav regions – over one-third of the grand duchy – to Poland. After further negotiations and conflicts the Union of \*Lublin was signed on 1 July 1569. Thereafter Poland and Lithuania constituted a single, federated state – the Commonwealth – ruled by a jointly elected monarch; the state was to have a common Diet, foreign policy, currency, and property law. Both partners were to retain separate administrations, law courts, treasuries, armies, and laws, however. Because Poland now possessed the larger territory, it had greater representation in the Diet and thus became the dominant partner. The only Ukrainian lands left in the grand duchy were parts of the Berestia and Pynske regions.

With the Union of Lublin, the Lithuanian-Ruthenian period – the only period of full-fledged \*feudalism in Ukrainian history – came to an end. Thereafter the Ukrai-

nian lands, for the most part, constituted the Rus', Belz, Podilia, Podlachia, Volhynia, Bratslav, Kiev, and, from 1635, Chernihiv \*voivodeships (palatinates) within the Polish crown. There the \*Lithuanian Statute – the legal code of the Lithuanian-Ruthenian state – remained in effect, but Ukrainian as the official language was supplanted by Polish and Latin. Nevertheless Ukrainian princes continued to own large estates and thus maintained their former privileged positions. On the territory of Volhynia, in particular, there remained a large number of influential Ukrainian nobles – eg, the \*Ostrozky, Vyshnevetsky, Koretsky, Kysil, Chartorysky, Chetvertynsky, Zbarazky, and Zaslavsky families. The Polish king, however, began distributing ownership charters to the 'empty' lands in Right-Bank Ukraine to a small number of Polish and Polonized Ukrainian magnates; thus arose the huge latifundia – virtually autonomous domains – of the \*Potocki, \*Zamoyski, \*Sieniawski, Kalinowski, Tyszkiewicz, \*Zbarazki (Zbarazky), Koniecpolski, and \*Wiśniowiecki (Vyshnevetsky) families in Ukraine.

Kievan Cave Patericon, frontispiece (1406 redaction)

The integration of the Ukrainian lands into Poland resulted in significant national and religious transformations. Part of the relatively small Ukrainian elite, particularly the magnates, became Polonized as a result of the influence of Polish \*education and of the large number of in-migrating Polish nobles and Catholic clergy (especially the \*Jesuits). Even many prominent Ukrainian families, including that of Prince K. Ostrozky, a leading defender of Orthodoxy, converted to Roman Catholicism and readily adopted Polish language and culture.

Under the new regime, the noble-dominated \*cities and towns grew in size and number and experienced an economic boom. It was, however, almost exclusively the Catholic German and Polish burghers who benefited from self-government by \*Magdeburg law. The Orthodox Ukrainian burghers were the victims of persecution and segregation; this incited them to organize \*brotherhoods in order to defend and promote their national, cultural, and corporate interests.

The \*peasants gained nothing from the union. Fully subjected to the nobles and their agents, they were forced to perform increasingly more corvée labor (see \*Serfdom) and were restricted in their right to move from one landlord to another. Conditions in the newly colonized lands of the Dnieper Basin were somewhat better, owing to their relative underpopulation. There, in order to attract peasant settlement, the nobles introduced the \*sloboda – an agricultural settlement whose inhabitants were exempt temporarily from feudal obligations.

The rule of the Polish 'nobles,' the Polonization, economic exploitation, and religious and national-social oppression provoked organized forms of protest: the growth of \*Protestantism, particularly of the \*Socinians, among the Ukrainian nobility; the above-mentioned Orthodox burgher brotherhoods and \*brotherhood schools; and attempts by the déclassé Orthodox hierarchy and clergy to gain parity with their Roman Catholic counterparts, culminating in the 1596 Church Union of \*Brestia and the creation of the Uniate or \*Greek Catholic church. The church union was not accepted by the majority of the Ukrainian population, however, and many Ukrainian nobles, led by K. Ostrozky, as well as the brotherhoods actively opposed it. The religious struggles that ensued found their written expression in \*polemical literature. (See also \*Church, history of the Ukrainian.)

The religious struggle was only one aspect of the Ukrainian-Polish conflict. The political opposition of the Ukrainian people was also manifested by the \*Cossacks – members of the various social groups (peasants, burghers, and nobles) – who escaped from their oppressors into the Commonwealth-Tatar steppe frontier.

*The Cossacks.* From the 15th century onward, thousands of fugitives from Polish rule and serfdom settled in this no-man's-land. To defend themselves from Tatar attacks, they organized armed groups and fortified settlements. With time they also began attacking the Tatar and Turkish settlements on the Black Sea. In 1552–4, Prince D. \*Vyshnevetsky united various Cossack groups and founded a Cossack fortress on Mala Khortytsia Island south of the Dnieper Rapids. This became the first of several Cossack centers called the \*Zaporozhian Sich, the nucleus of the quasi-democratic Cossack domain that became known as \*Zaporizhia ('land beyond the rapids').

Seal of the Zaporozhian Cossack Host, 1622

The Cossacks' expeditions against the Tatars and Turks made them famous throughout Europe. In 1577 they marched on Moldavia to help one of their own, I. \*Pidkova, become the hospodar there. In 1594, A. Komulovich and E. \*Lassota von Steblau, the envoys of Pope Clement VIII and Emperor Rudolph II, enlisted Cossack mercenaries under H. \*Loboda and S. \*Nalyvaiko in the war against the Turks. These and other manifestations of Cossack military and political autonomy were a threat

to the Polish regime, for they provoked Tatar and Turkish retaliation in Ukraine. As early as 1572, Sigismund II tried to circumscribe the Cossacks' growth and freebootery by creating a register of 300 royal Cossacks, who were granted privileges, liberties, land, and money in return for military service to the crown. The institution of these so-called \*registered Cossacks, whose number increased (at times to 6,000) during Poland's wars, provoked discontent among the magnates, who opposed any ennoblement of the Cossacks, as well as social divisions and discord among the Cossacks as a whole. Those not 'registered' were officially considered peasants and subject to feudal obligations. These and other measures precipitated rebellions led by K. \*Kosynsky (1591–3) and S. Nalyvaiko and H. Loboda (1594–6) (in which registered Cossacks participated) against the magnates in Ukraine. The latter rebellion in particular involved many burghers and peasants, and engulfed large parts of Right-Bank Ukraine and Belorussia; it was brutally suppressed by the crown army led by S. \*Żółkiewski, and Polish oppression in Ukraine intensified.

In the first quarter of the 17th century, Poland needed the Cossacks in its wars with Turkey (in Moldavia), Sweden (in Livonia), and Muscovy. The crown therefore restored the civil rights it had abolished after the Kosynsky rebellion and reinstated the register of Cossacks. At that time the Cossacks assumed a more political role as the defenders of outlawed Orthodoxy, which cemented their ties with the burghers and peasants; the unceasing defense of their corporate rights prepared them for their future role as the vanguard of a national revolution. Hetman P. \*Sahaidachny (1614–22), the renowned leader of Cossack sea expeditions against the Tatar towns in the Crimea (1606–17), succeeded in creating a disciplined, regular Cossack army. In 1618 his army took part in the campaign of Prince Władysław against Moscow, and in 1621 the united Polish-Cossack army halted the Turkish advance on central Europe at the Battle of \*Khotyn. A protector of Orthodoxy, in 1621 Sahaidachny played a key role in persuading the Patriarch of Jerusalem to renew the Ukrainian Orthodox hierarchy and consecrate Y. \*Boretsky as metropolitan of Kiev. Sahaidachny pursued a conciliatory policy vis-à-vis the Polish Crown. The king, however, would not recognize the new Orthodox hierarchs, and soon after Khotyn any privileges the Cossacks had been granted for their wartime role were abrogated.

Although in this period the Cossacks were cognizant of their strength, they were not united in their attitude to the Polish regime. One group, consisting of the registered Cossacks, sought a compromise with the Poles. The other, the unprivileged majority, led by O. Holub, ignored the Polish injunctions. They remained recalcitrant, and in 1624–5 even fought on land and sea against Turkey as the allies of the Crimean khan Mohamet-Girei III. The Polish king, seeing his relations with Turkey endangered, sent the crown army under S. \*Konięcpolski to subdue the Zaporozhians. Hetman M. \*Zhmailo and his successor M. \*Doroshenko were forced to sign the \*Kurukove Treaty, which limited the number of registered Cossacks to 6,000 and the Cossacks' freedom in general. But peace did not last long. The 1630 Zaporozhian rebellion, led by T. Fedorovych (Triasylo), forced the Poles to negotiate the \*Pereiaslav Treaty of 1630, which increased the register to 8,000 but failed, as before,

Crest of Metropolitan Petro Mohyla, 1646

to appease the Zaporozhians, who continued their raids against the Turks.

In 1632 the registered Cossacks, led by I. \*Petrazhysky-Kulaha, demanded that they, as a loyal, obedient, knightly estate, be allowed to take part in the election of the new king after the death of \*Sigismund III Vasa. The Diet in Warsaw that elected \*Władysław IV Vasa legalized the Orthodox church and recognized its hierarchy to mollify the Ukrainians and counter pro-Muscovite attitudes. Under P. \*Mohyla, the new metropolitan of Kiev (1633–47), the Orthodox church experienced a renaissance, as did Ukrainian education, scholarship, and culture in general (see \*Kievan Mohyla Academy).

King Władysław IV was much more liberal toward his Ukrainian subjects than Sigismund had been. But although the Cossacks helped him in his wars with Sweden, Muscovy (during which the Chernihiv region was annexed), and Turkey, he did not recognize their demands for increased privileges. Consequently, many Cossacks continued to flee to Zaporizhia. To stop this exodus the Polish government built a fort in \*Kodak in 1635, but the Cossacks, led by Hetman I. \*Sulyma, razed it. The general dissatisfaction with Polish rule resulted in a new popular uprising in 1637, led by P. \*Pavliuk. The rebels were defeated in the Battle of \*Kumeiky and forced to accept even greater restrictions. In the spring of 1638, a rebellion again erupted, this time on the Left Bank, under the leadership of D. \*Hunia, Y. \*Ostrianyin, and K. \*Skydan. Having fought several battles, the rebels finally surrendered at the Starets River. After this event the number of registered Cossacks was limited to 6,000, their senior officers were appointed by the Polish nobles, the hetman was replaced by a Polish commissioner, burghers and peasants were forbidden to marry Cossacks or join their ranks, Cossacks could reside only in Chyhyryn, Korsun, or Cherkasy districts, unregistered Cossacks were outlawed, the Kodak fortress was rebuilt, and Polish garrisons were stationed throughout Ukraine.

For a decade thereafter the Polish magnate kinglets kept the Cossacks in check and intensified their exploitation and oppression of Ukrainian Orthodox peasants and burghers. This 'golden tranquility' was broken by yet another uprising, this time on a much greater scale.

*The Khmelnytsky era.* The great uprising of 1648 was one of the most cataclysmic events in Ukrainian history. It is difficult to find an uprising of comparable magnitude, intensity, and impact in the history of early modern Europe.

A crucial element in the revolt was the leadership of Hetman B. \*Khmelnysky (1648–57), whose exceptional organizational, military, and political talents to a large

A Zaporozhian Cossack colonel; watercolor by T. Kalynsky (1778–82)

extent accounted for its success. The uprising engulfed all of Dnieper Ukraine. Polish nobles, officials, Uniates, and Jesuits were massacred or forced to flee. Jewish losses, estimated at over 50,000 during what became a decade-long \*Cossack-Polish War, were especially heavy, because the \*Jews, who were concentrated in Ukraine in large numbers, were seen as agents of the Polish *szlachta*. Great massacres were also perpetrated against the Ukrainian populace by the retreating Poles, led by the magnate J. \*Wiśniowiecki. The Poles were crushed at the Battle of \*Zhovti Vody on 16 May 1648 and again in September, at the Battle of \*Pyliavtsi in Volhynia where the Cossacks were joined by the peasants en masse. Poland proper was now defenseless, but Khmelnytsky, after briefly occupying western Ukraine and besieging Lviv and Zamoscia, decided, because of oncoming winter and doubts about the chances of success of a full-scale invasion of Poland, to return to Dnieper Ukraine. Upon his triumphant entry into Kiev, he declared that although he had begun the uprising for personal reasons he was now fighting for the sake of all Ukraine.

By April 1649, it was clear that Khmelnytsky was contemplating a separation of Ukraine from the Commonwealth, and the Commonwealth armies, led by the new king, \*Jan II Casimir Vasa, and Prince J. Radziwiłł, launched a counteroffensive. Defeated once again at the battle of \*Zboriv on 15 August, the Poles sued for peace and a treaty was signed on 18 September 1649. The Poles, however, broke the treaty in 1651 and with the help of the Tatars defeated the Cossacks at the battle of \*Berestechko; and Khmelnytsky was forced to conclude the Treaty of \*Bila Tserkva in September 1651. The treaty allowed the Poles to return to much of Ukraine.

Realizing that he could not defeat the Poles by military means alone and hoping to expand his political base, Khmelnytsky turned to diplomacy. In September 1650 he dispatched a large Cossack force to Moldavia in the hope of installing his son, T. \*Khmelnysky, there. The hetman envisaged the creation of a great coalition backed by the Ottomans, Tatars, and Danubian principalities and consisting of Ukraine, Transylvania, Brandenburg, Lithuania, and even Cromwell's England. His aim was

to restructure the Commonwealth into an equal union of Poland, Lithuania, and Ukraine with Prince György \*Rákóczi II of Transylvania as its new king. Khmelnytsky's plans suffered a great setback when the Moldavian boyars revolted and his son died in 1653. Another major setback occurred during the siege of \*Zhvanets in Podolia in December 1653: Khmelnytsky was about to annihilate the army of Jan Casimir when his Tatar allies signed a separate peace with the Poles. Khmelnytsky then abandoned his orientation on the Ottomans and Tatars and drew closer to Muscovy.

Tsar Aleksei Mikhailovich agreed to help Khmelnytsky 'for the sake of the Orthodox faith,' expecting also to regain some of the lands Muscovy had previously lost to Poland, to utilize Ukraine as a buffer zone against the Ottomans, and, in general, to expand his influence. The 1654 \*Pereiaslav Treaty established an alliance of Ukraine and Muscovy. The Poles responded to the new alliance by combining forces with the Tatars. A new expanded phase of conflict began. In 1654, while a combined Muscovite-Ukrainian army (see I. \*Zolotarenko) scored major successes in Belorussia, the Poles and, especially, the Tatars devastated Ukraine. A year later it was Poland that experienced devastation, when the Swedes, taking advantage of the war, invaded the country. Sensing the imminent demise of the Commonwealth, György Rákóczi of Transylvania concluded an alliance with Khmelnytsky, and in January 1657 a large Ukrainian-Transylvanian force was sent into Poland to expedite its partition.

A 17th-century city woman; watercolor by T. Kalynsky (1778–82)

Khmelnysky's foreign policy, especially his co-operation with the Swedes, who were also at war with Muscovy, raised the tsar's ire. But Khmelnytsky also had his grievances: he was bitter over the imposition of Muscovite rule in Belorussia, where the populace had expressed preference for a Cossack government; even more infuriating was the Vilnius Peace Treaty with the Poles in October 1656, which Moscow had concluded without consulting the hetman. Mutual recriminations followed, and there were signs that the hetman was reconsidering

the link with Moscow. Then the Ukrainian-Transylvanian offensive in Poland collapsed. Crushed by these setbacks and already ill, Khmelnytsky died on 6 August 1657.

**The Hetman state.** At the time of Khmelnytsky's death, the Cossacks controlled the former palatinates of Kiev, Bratslav, and Chernihiv, an area inhabited by about 1.5 million people. About 50 percent of the land, formerly owned by the Polish crown, became the property of the Zaporozhian Host, which, in return for taxes, allocated it to self-governing peasant villages. Cossacks and Ukrainian nobles retained approximately 33 percent of the land, and the church, 17 percent. The entire area was divided into 16 military and administrative regions corresponding to the territorially based \*regiments of the Cossack army (see \*Regimental system). Initially, the \*Cossack *starshyna* (senior officers) were elected by their units, but in time these posts often became hereditary.

At the pinnacle of the Cossack military-administrative system stood the \*hetman. Assisting the hetman was the \*General Officer Staff, which functioned as a general staff and a council of ministers. The formal name of the new political entity was the Zaporozhian Host; the Muscovites, however, referred to it as \*Little Russia, while the Poles continued calling it Ukraine.

Hoping to establish a dynasty, Khmelnytsky had arranged for his 16-year-old son Yurii to succeed him. It soon became apparent, however, that the young boy was incapable of ruling, and I. \*Vyhovsky was chosen hetman (1657–9). Vyhovsky hoped to establish an independent Ukrainian principality. His elitist and pro-Polish tendencies engendered a rebellion by the rank-and-file Cossacks and Zaporozhians, led by M. \*Pushkar and Ya. \*Barabash and covertly backed by Moscow. Vyhovsky emerged victorious but militarily and politically weakened. Realizing that a confrontation with Moscow was inevitable, Vyhovsky entered into negotiations with the Poles regarding the return of Ukraine to the Commonwealth. In September 1658 they concluded the Treaty of \*Hadiache. Viewing the treaty as an act of war, Moscow dispatched a large army into Ukraine. In July 1658, it was crushed near Konotip by a combined force of Poles, Ukrainians, and Tatars. But Vyhovsky's politics continued to elicit opposition, and several Cossack leaders (I. \*Bohun, I. \*Sirko, I. \*Bezpany) rose in revolt. Realizing that his base of support was crumbling, in September 1659 the hetman fled to Poland.

The *starshyna*, hoping that the appeal of his name would help to heal internal conflicts, elected Yu. \*Khmelnytsky hetman (1659–62). The Muscovites, who returned to Ukraine with another large army, forced the young hetman to renegotiate the Pereiaslav Treaty. The new pact was a major step forward in Moscow's attempts to tighten its hold on Ukraine: it increased the number of Muscovite governors and garrisons in Ukraine, forbade the hetman to maintain foreign contacts without the tsar's permission, and stipulated that election of Cossack leaders should be confirmed by Moscow. Disillusioned, Khmelnytsky went over to the Poles in 1660, helped them defeat the tsar's army at Chudniv, and signed the Treaty of \*Slobodshche. The Left-Bank regiments, led by Ya. \*Somko, refused to follow Khmelnytsky, however, and remained loyal to the tsar. Unable to cope with the strife and chaos, Khmelnytsky resigned in 1663. A period of constant war and devastation began.

*The Ruin.* During this period, called the Ruin by contemporaries, Ukraine was divided along the Dnieper River into two spheres of influence, the Polish in \*Right-Bank Ukraine and the Muscovite in \*Left-Bank Ukraine and Kiev. At times, the Ottoman presence was felt in the south. All Cossack hetmans during this period were dependent on these powers for support. The hetmans' weakness stemmed largely from internal conflicts, especially the ongoing social tensions between the Cossack *starshyna* and the rank and file and the peasants, who resented the attempts of the *starshyna* to monopolize political power and impose labor obligations upon them. Consequently, political factionalism, opportunism, and adventurism became prevalent among the Cossack leaders, who were easily manipulated by Ukraine's powerful neighbors.

A 17th-century peasant girl; watercolor by T. Kalynsky (1778–82)

Two typical hetmans of the period were P. \*Teteria (1663–5) on the Right Bank and I. \*Briukhovetsky (1663–8) on the Left Bank. Teteria, who adhered strictly to a pro-Polish line, invaded the Left Bank together with the Poles in 1664 and urged its Cossacks to march on Moscow. When the offensive failed, Teteria and the Poles (see S. \*Czarniecki) returned to the Right Bank (see I. \*Popovych, \*Varenytsia uprising); their brutality in quelling numerous anti-Polish uprisings aroused such animosity that Teteria was forced to abdicate and flee to Poland.

On the Left Bank, Briukhovetsky's policy toward Moscow was exceedingly conciliatory (see \*Baturyn Articles). The first Ukrainian hetman to pay homage to the tsar (for which he received the title of boyar, estates, and the daughter of Prince Dolgoruky in marriage), in 1665 he signed the \*Moscow Articles, which significantly increased Moscow's political, military, fiscal, and religious control. These concessions, the hetman's high-handedness, the behavior of the Muscovite governors and tax collectors, and the Treaty of \*Andrusovo (1667) – an armistice that ratified the partition of Ukraine between Poland and Muscovy – infuriated the populace and led to widespread revolts against Briukhovetsky and the Muscovite garrisons. Briukhovetsky's attempts at backing away from Moscow and heading the revolt against it failed to appease the rebels, and in 1668 he was killed by an angry mob.

Kozak-Mamai; 19th-century folk painting

An attempt to preserve Cossack Ukraine from chaos and to reassert Ukrainian self-government was made by the popular colonel of Cherkasy and hetman of the Right Bank, P. \*Doroshenko (1666–76). After the Poles signed the Treaty of Andrusovo, Doroshenko turned against them and resolved to unite all of Ukraine under his rule. To gain the support of the rank-and-file Cossacks, he agreed to hold frequent meetings of the General Military Council, and to free himself from overdependence on the powerful colonels, he established mercenary \*Serdiuk regiments under his direct command. In fall 1667, a combined Cossack-Ottoman force compelled King Jan Casimir to grant the hetman wide-ranging authority over the Right Bank. Doroshenko then invaded the Left Bank and, after Briukhovetsky's demise in 1668, was proclaimed hetman of all Ukraine. During his absence from the Right Bank, however, the Zaporozhians proclaimed P. \*Sukhovii hetman; soon after, the Poles returned and established Mykhailo \*Khanenko as yet another rival hetman. Returning to confront his adversaries, Doroshenko appointed D. \*Mnohohrishny acting hetman (1668–72) on the Left Bank. A Muscovite army invaded the Left Bank, however, and Mnohohrishny was forced to swear allegiance to the tsar (see \*Hlukhiv Articles) in 1669.

Ukraine was divided again. Weakened, Doroshenko was forced to rely increasingly on the Ottomans. In 1672 his forces joined the huge Turkish-Tatar army that wrested Podilia away from the Poles (see \*Buchach Peace Treaty of 1672), and in 1674–7 he found himself fighting on the side of the Turks against the Orthodox forces of the tsar and of the new Left Bank hetman I. Samoilovych. Compromised by his association with the Muslim occupation and the ravages of the civil war, the now unpopular Doroshenko surrendered to Samoilovych in 1676.

To replace Doroshenko in the ongoing struggle between the Porte and Moscow for the Right Bank during the \*Chyhyryn campaigns of 1677–8, the Ottomans resurrected Yu. Khmelnytsky as the 'Prince of Ukraine' (1677–8, 1685). The 1681 Peace Treaty of \*Bakhchesarai left much of southern Right-Bank Ukraine a deserted neutral zone between the two empires. No longer in need of Yu. Khmelnytsky, the Ottomans had him executed, and pashas governed the Right Bank from Kamianets-Podilskiy.

From 1669 the Left Bank remained under Muscovite control (see \*Little Russian Office) and was spared the recurrent Ottoman, Tatar, Polish, and Muscovite inva-

Election of an otaman at the Zaporozhian Sich; watercolor by T. Kalynsky (1778–82)

sions that devastated the once flourishing Right Bank. Although Mnohohrishny, like Briukhovetsky, was elected hetman there with Muscovite acquiescence, he did not intend to be a puppet of the tsar. This was evident from his demands that Moscow limit its military presence in the cities to Kiev, Nizhen, Pereiaslav, and Chernihiv. With the help of mercenary regiments, he managed to establish order on the Left Bank, but his constant conflicts with the increasingly entrenched *starshyna* brought about his downfall.

Mnohohrishny's successor I. \*Samoilovych (1672–87) made loyalty to Moscow and cordial relations with the *starshyna* the cornerstones of his policy. He thus managed to remain hetman for an unprecedented 15 years. To win over the *starshyna*, he awarded the members generous land grants and created the so-called \*fellows of the standard (a corps of junior officers), thereby encouraging the development of a hereditary elite on the Left Bank. Like all hetmans, Samoilovych attempted to extend his authority over all of Ukraine. He tightened his control over the unruly Zaporozhians, and from 1674 he fought alongside the Muscovites against Doroshenko and the Turks. Greatly disappointed by his and Muscovy's failure to conquer the devastated Right Bank, he organized the mass evacuation of its inhabitants to the Left Bank and \*Slobidska Ukraine. The 1686 Polish-Muscovite \*Eternal Peace and anti-Muslim coalition validated Poland's claims to the Right Bank and placed the Zaporozhian lands under the direct authority of the tsar instead of the hetman. Consequently, Samoilovych was not overly co-operative when Muscovy launched a huge invasion of the Crimea in 1687. Blamed by the Muscovite commander V. \*Golitsyn and the Cossack *starshyna* for its failure, Samoilovych was deposed and exiled to Siberia.

After Poland recovered the Right Bank from Turkey in 1699 and the Zaporozhians asserted their autonomy, only about a third of the territory of the \*Hetman state, or Hetmanate, that B. Khmelnytsky established remained under the authority of the hetmans. Situated now mostly on the Left Bank, the Hetmanate consisted of only 10 regiments. While the structure of Cossack self-government underwent only minor changes, major shifts occurred in the socioeconomic structure of the Left Bank. By the late 17th century, the *starshyna* had virtually excluded rank-and-file Cossacks from decision-making and higher offices, and the latter's political decline was closely

Coats of arms of Ukrainian hetmans: 1) P. Sahaidachny (1616–22); 2) B. Khmelnytsky (1648–57); 3) I. Vyhovsky (1657–9); 4) Yu. Khmelnytsky (1659–63); 5) P. Teteria (1663–5); 6) I. Briukhovetsky (1663–8); 7) P. Doroshenko (1665–76); 8) D. Mnohohrishny (1668–72); 9) M. Khanenko (1670–4); 10) I. Samoilovych (1672–87); 11) I. Mazepa (1687–1709); 12) P. Orlyk (1710–42); 13) I. Skoropadsky (1708–22); 14) P. Polubotok (1722–4); 15) D. Apostol (1727–34); 16) K. Rozumovskiy (1750–64) [from V. Sichynsky]

related to their mounting economic problems. Individual Cossacks took part in the almost endless wars of the 17th and early 18th centuries at their own expense. Consequently many of them were financially ruined, and this caused a decline in the number of battle-ready Cossacks and in the size of the Cossack army. In 1700 the Hetmanate's army numbered only about 20,000 men. Moreover, the equipment, military principles, and tactics on which the Cossacks relied had become increasingly outdated. Confronted by internal weaknesses, leading a depleted military force, and disillusioned by the behavior of the Poles and Ottomans during the Ruin, most Cossack leaders no longer questioned the need to maintain links with Moscow. But they were still committed to preserving what was left of the rights guaranteed to them by the Pereiaslav Treaty of 1654.

*The Mazepa era.* A decisive phase in the relationship of the Hetmanate to Moscow occurred during the hetmancy of Samoilovych's successor I. Mazepa (1687–1708/9), one of the most outstanding and controversial of all Ukrainian political leaders. For most of his years in office Mazepa pursued the traditional, pro-Muscovite policies of the Left-Bank hetmans. He continued to strengthen the

*starshyna*, issuing them over 1,000 land grants (see \*Kolomak Articles), but he also placed certain limits on their exploitation of the lower classes. The largess of the tsars made him one of the wealthiest landowners in Europe. Mazepa used much of his wealth to build, expand, and support many churches and religious, educational, and cultural institutions. His pro-*starshyna* policies, however, engendered discontent among the masses and the anti-elitist Zaporozhians and resulted in a dangerous but unsuccessful Tatar-supported Zaporozhian uprising led by P. Ivanenko (\*Petryk) in 1692–6.

Zaporozhian icon of the Holy Protectress depicting churches funded by Hetman I. Mazepa

A cardinal principle of Mazepa's policy was the maintenance of good relations with Moscow. He developed close relations with Tsar Peter I, energetically helping him in his 1695–6 Azov campaigns against the Tatars and Turks. He was also his adviser in Polish affairs. These close contacts helped him gain Muscovite backing for the occupation of the Right Bank in 1704 during the great anti-Polish Cossack revolt led by S. Palii. Once again Ukraine was united under the rule of one hetman. But as the Great Northern War (1700–21), in which Charles XII of Sweden and Peter were the main opponents, progressed, dissatisfaction with Muscovite rule spread in the Hetmanate. The Cossack regiments suffered huge losses during difficult campaigns in the Baltic region, Poland, and Saxony; the civilian populace had to support Muscovite troops and work on fortifications; and Peter's reforms threatened to eliminate Ukrainian autonomy and integrate the Cossacks into the Muscovite army. Pressured by the disgruntled *starshyna*, Mazepa began having doubts about Moscow's overlordship. In 1705 Stanislaus I Leszczyński, Charles's Polish ally, secretly proposed to him to bring Ukraine into the Polish-Lithuanian federation. In October 1708, after the tsar informed Mazepa that he could not count on Moscow's aid should the Swedes and Poles invade Ukraine, Mazepa decided to

Cossack weaponry and regalia: 1–3) maces of hetmans and colonels; 4) saber; 5) insignia on the banner of the Domontovsky Regiment, 1762; 6, 14) spears; 7) gunpowder flask; 8) the saber of Hetman I. Mazepa, 1662; 9) 40-mm mortar; 10–13) cannons; 15) Cossack seal from the early 17th century [from V. Sichynsky]

join the advancing Swedes. In July 1709, Charles and Mazepa were defeated in the decisive Battle of \*Poltava and fled to Ottoman Moldavia, where the aged and dejected hetman died.

About 50 leading members of the *starshyna*, almost 500 Cossacks from the Hetmanate, and over 4,000 Zaporozhians followed Mazepa to Bendery. These 'Mazepists' were the first Ukrainian émigrés. In the spring of 1710 they elected P. \*Orlyk, Mazepa's general chancellor, as their hetman-in-exile. Anxious to attract potential support, Orlyk drafted the Constitution of \*Bendery. With Charles's backing, he concluded anti-Muscovite alliances with the Tatars and the Porte and in January 1711 launched a combined Zaporozhian-Tatar offensive in Ukraine. After initial successes, the campaign failed.

#### The decline of Ukrainian autonomy

*Left-Bank Ukraine.* After the failure of Mazepa's plans, the absorption of the Hetmanate into the Russian Empire began in earnest. It was, however, a long, drawn-out process, which varied in tempo, because some Russian rulers were more dedicated centralizers than others and during certain times, especially in the course of war with the Ottomans, it was dangerous to antagonize the Ukrainians. To weaken Ukrainian resistance, the imperial government used a variety of divide-and-conquer techniques: it encouraged conflicts between the hetmans and the

*starshyna*, cowed the latter into submission by threatening to support the peasantry, and used complaints by commoners against the Ukrainian government as an excuse to introduce Russian administrative measures.

With the acquiescence of the tsar, I. \*Skoropadsky, was chosen hetman (1708–22). Several Russian innovations followed his election. In violation of tradition, no new treaty was negotiated, and the tsar confirmed Ukrainian rights only in general terms (see \*Reshetylivka Articles). Peter appointed a Russian resident, accompanied by two Russian regiments, to the hetman's court with supervisory rights over the hetman and his government. The hetman's residence was moved from Baturyn to Hlukhiv, closer to the Russian border. Peter began the practice of personally appointing colonels, bypassing the hetman, while the resident received the right to confirm other officers. Many of the new colonels were Russians or other foreigners, and for the first time Russians, particularly A. Menshikov, acquired large landholdings in Ukraine (many of them expropriated from the Mazepists). Even publishing was controlled by Peter's decree of 1720, which forbade publication of all books in Ukraine with the exception of liturgical texts, which, however, were to be published only in the Russian language.

In 1719 Ukrainians were forbidden to export their grain and other products directly to the West; instead, they had to ship through Russian-controlled Riga and Arkhangelsk, where the prices were dictated by the Russian government. Russian merchants, meanwhile, received preferential treatment in exporting their goods to the Hetmanate. Tens of thousands of Cossacks were sent north to build the Ladoga canal and the new capital of St Petersburg, where many of them died. As a final blow to the autonomy of the hetman, Peter instituted the \*Little Russian Collegium on 29 April 1722. Established supposedly to look after the tsar's interest by controlling finances and to hear appeals against any wrongdoings of the *starshyna*, it seriously undermined the position of the hetman. Skoropadsky protested vehemently but to no avail. Soon after its establishment he died.

While P. \*Polubotok was acting hetman (1722–4), a struggle for power developed between him and Gen S. Veliaminov, the head of the Collegium. Refusing to give ground to the Collegium, Polubotok improved several aspects of the hetman government, especially the judiciary, so as to deprive Russians of an excuse for interference. To reduce peasant grievances, he pressured the *starshyna* to be less blatant in exploiting the peasantry. Polubotok's and the *starshyna*'s repeated entreaties to restore their privileges, abolish the Collegium, and appoint a hetman (see \*Kolomak Petitions) angered Peter and he responded by increasing the authority of the Collegium. Soon afterward, Polubotok and his colleagues were ordered to St Petersburg and imprisoned there. Polubotok died in prison. His colleagues were pardoned after Peter's death in 1725.

With Polubotok incarcerated, the Collegium had free rein in the Hetmanate. In 1722 it introduced direct taxation of the Ukrainians. But, when Veliaminov demanded that Russians in Ukraine, and especially the influential Menshikov, also pay taxes, he lost support in St Petersburg. Moreover, the possibility of a new war with the Ottoman Empire raised the need to appease the Ukrainians. Therefore, in 1727, Emperor \*Peter II, influenced by Menshikov, abolished the Collegium and sanc-

Folk dress from various regions of Ukraine: 1) typical traditional; 2) Kiev region; 3) Poltava region; 4) Kharkiv region; 5) Southern Ukraine; 6) Galicia; 7) Bukovyna; 8) Hutsul region; 9) Transcarpathia

tioned the election of a new hetman, D. \*Apostol (1727–34).

The new hetman's diplomatic, military, and political prerogatives were limited. Aware that any attempt to restore the hetman's political rights was doomed, Apostol concentrated on improving the social and economic conditions. He regained, however, the right to appoint the General Officer Staff and colonels, greatly reduced the number of Russians and other foreigners in his administration, brought Kiev, long under the authority of Russian governors, under his sway, and had the number of Russian regiments in Ukraine limited to six. Thus, he slowed the process of the Hetmanate's absorption into the Russian Empire.

After Apostol's death, the new empress, \*Anna Ivanovna (1730–40), forbade the election of a new hetman and established a new board, the \*Governing Council of the Hetman's Office (1734–50), to rule the Ukrainians. Its first president, Prince A. Shakhovskoi, received secret instructions to spread rumors blaming the hetmans for taxes and mismanagement and to persuade Ukrainians that the abolition of the Hetmanate would be in their interest. Russian political practices, such as that of obligatory denunciation (*slovo i delo*), were introduced in Ukraine in this period. Because of the Russo-Turkish War

of 1735–9, during which Ukraine served as a base, the Cossacks and peasants suffered tremendous physical and economic losses. During the council's existence the \*Code of Laws of 1743, which had been begun under Apostol, was completed but never implemented.

During the reign of Empress \*Elizabeth I (1741–62), her consort and (from 1742) husband O. Rozumovsky, by birth a simple Cossack who rose to the title of count, influenced her to abolish the council and restore the hetmancy with his younger brother Count K. \*Rozumovsky as hetman (1750–64). The new hetman spent most of his time in St Petersburg, where he was president of the Imperial Academy of Sciences and deeply involved in court politics and governmental affairs. During his absences from Ukraine, the land was governed by the *starshyna*, thus hastening their transformation, begun in the late 17th century, into a typical hereditary, land-owning, nobility. The *starshyna* persuaded Rozumovsky to issue an edict in 1760 limiting the free movement of the peasantry. A major setback, however, was the Russian abolition in 1754 of Ukrainian import and export duties, a major source of income in the Hetmanate's budget. After helping \*Catherine II (1762–96) come to power, Rozumovsky returned to the Hetmanate. In October 1763 he and the *starshyna* met in council at Hlukhiv and petitioned the empress to renew the Hetmanate's lost prerogatives and to approve the creation of a noble diet modeled on the Polish Sejm. Rozumovsky also requested hereditary rights to the hetmancy for his family. Catherine, however, in line with her general policy of uniformity and centralization, and following G. \*Teplov's advice, decided to abolish the legal separation of Ukraine and Russia altogether, and in 1764 she compelled Rozumovsky to resign as hetman.

*The liquidation of the Hetmanate.* Catherine completed the policy of centralization and institutional Russification that Peter I began in Ukraine and in other autonomous lands of the empire. In 1763 she approved the creation of \*New Russia gubernia out of the lands of \*New Serbia and \*Slobidska Ukraine, and in 1764 she restored the Little Russian College (this time with four Russians and four Ukrainians). The task of its president, Count P. \*Rumiantsev, was to eliminate Ukrainian autonomy gradually and cautiously. He neutralized the Ukrainian elite by recruiting their members into Russian service and giving them rank and promotions. In order to introduce taxation and control peasant labor in Ukraine, Catherine ordered a thorough survey of the population and resources of the Hetmanate – the \*Rumiantsev census – to be carried out. An unexpected complication arose with the strong stand in defense of Ukrainian autonomy taken by the Ukrainian deputies, particularly H. \*Poletyka, at the Legislative Commission Assembly of 1767.

After the Russo-Turkish War of 1768–74 and the Treaty of \*Küçük Kaynarca, the liquidation of Ukrainian autonomy gained new impetus. The Zaporozhian \*New Sich was destroyed by Russian troops in 1775; many of the dispersed Zaporozhians fled and established the \*Danubian Sich, and the vast lands of \*Southern Ukraine were incorporated into the empire as part of New Russia and Azov gubernias and developed by their governor G. \*Potemkin. Catherine promoted the settlement of these largely unpopulated areas by \*Germans, \*Serbs, \*Mennonites, \*Bulgarians, and others, and the establishment of several new cities on the Black and Azov seas to attract foreign

trade. By 1782 all the traditional 10 Left-Bank regiments of the Hetmanate were abolished and reconstituted as the new Kiev, Chernihiv, and Novhorod-Siverskyi vicegerencies and part of New Russia gubernia. In 1780 most of Slobidska Ukraine became part of the new Kharkiv vicegerency. The imperial bureaucracy replaced Ukrainian administrative, judicial, and fiscal institutions and social and legal norms with Russian ones. In 1783 the Cossack regiments were transformed into 10 regular cavalry regiments and the Russian system of conscription and \*serfdom was extended into Ukraine. The Ukrainian elite acquiesced because they benefited from the changes: the 1785 charter gave them the privileges of Russian nobility (though less than half of those who registered as nobles were recognized as such). The Ukrainian church suffered a major setback under the new order: its lands and peasants were secularized, and many monasteries were closed down in 1786. The Hetmanate and the Cossack social order ceased to exist.

*Right-Bank Ukraine.* In 1714 Poland again regained control of the devastated and depopulated Right Bank, and a colonizing movement was organized by the Polish magnates who owned much of the land. Peasants from northwestern Ukraine, especially Volhynia, were attracted there by 15-to-20-year exemptions from corvée and other obligations. With them came Orthodox and Uniate clergy. Cossackdom, however, was not allowed to develop. The towns that were re-established were largely inhabited by Jews, who earned their living as innkeepers, artisans, and merchants. Polish gentry were largely attendants at the magnates' courts, and leaseholders or stewards managed their estates. At the peak of the social order were the few wealthy magnate families that owned huge latifundia. For much of the 18th century the Right Bank was a typical noble-dominated society, marked by lack of central authority, oligarchic politics, and extreme exploitation of the peasantry.

Without Cossacks, the peasantry was ineffective in resisting the nobility. Occasionally minor disturbances broke out, led by runaway peasants who congregated in forests and emerged to attack isolated noble estates. These so-called \*Haidamakas usually enjoyed the support of the peasants; gradually, they became a serious problem for the Polish nobles, especially after the corvée exemption expired, serfdom was imposed, and religious oppression was intensified. In 1734, when Poland was involved in a conflict with Russia, the first serious \*Haidamaka uprising broke out. Another major one occurred in 1750. The most widespread and bloodiest was the so-called \*Koliivshchyna Rebellion of 1768, when the Poles were engaged in another war with Russia (see Confederation of \*Bar). Thousands of Polish nobles, Jews, and Catholic clergy were massacred. Fearing that rebellion would spread into its possessions, the Russian government sent forces to quell it. Thus ended the last great uprising of the Ukrainian peasantry against the Polish nobles.

Russia's expansion was a dominant factor in the history of Ukraine. In the late 18th century its ruler, Catherine II, concentrated on a great drive southward to the Black Sea in order to gain access to the Mediterranean and world trade. Southern Ukraine was thus colonized and urban centers began to develop. While it was liquidating the autonomy of the Hetmanate and absorbing the lands of the Zaporozhian Sich, Russia also conquered

the Crimean Khanate in 1774 and, after annexing it in 1783, gained control of the entire northern Black Sea coast. Russia interfered in Poland and influenced political developments there throughout the 18th century, ostensibly to protect its Orthodox population. In 1772, 1793, and 1795 the Commonwealth was partitioned among Russia, Austria, and Prussia. Thus, by 1795 all of Right-Bank Ukraine had been incorporated into the Russian Empire, which now controlled about 80 percent of the Ukrainian lands. The remainder were part of the Habsburg monarchy. Transcarpathia became part of the Habsburg Empire along with Hungary in 1526; Galicia was taken in in the first partition of Poland in 1772; and Bukovyna was taken from the Turks in 1774 and formally incorporated into Austria in 1787.

*Social transformations.* In the 17th and 18th centuries there were extensive social changes in Ukraine. On the Left Bank, the Cossack *starshyna* evolved from elective officers into a hereditary nobility. By the end of the 18th century they numbered about 2,000 adult males. Constituting less than 1 percent of the population, they controlled about 50 percent of the land (see \*Rank estates). Meanwhile, the status of rank-and-file Cossacks declined drastically. Deprived of political prerogatives by the *starshyna*, they also encountered debilitating economic difficulties. Obligated to render extremely protracted, and therefore costly, military service throughout the 18th century, many of them fell into debt and lost or gave up their Cossack status and became state peasants. This downward mobility was reflected in the decline of their numbers in active military service: from 50,000 in 1650 to 30,000 in 1669 and 20,000 in 1730. Because the *starshyna* and Cossacks were not taxed, they often competed successfully with the burghers in local commerce and primitive, small-scale manufacturing and thereby undermined the prosperity of the relatively small urban stratum (about 4 percent of the population).

Even more drastic was the decline in the fortunes of the peasantry. After 1648 they became free peasants who lived in self-governing communities and owed relatively minor obligations for use of the land to the Zaporozhian Host. But as the *starshyna* accumulated more land, it constantly raised the labor obligations of the peasantry. In Mazepa's time peasants were forced to work, on the average, two days a week for local *starshyna* landowners. Within a generation the obligations rose to three days and more. The final step in the enserfment of the Left-Bank peasantry occurred in 1783, when Catherine II deprived them of the right to leave their landlords under any circumstances. With the introduction of serfdom most traces of the social upheaval and experimentation that began with the Khmelnytsky uprising disappeared, and Ukrainian society became much like the noble-dominated societies of its neighbors.

**Ukraine under imperial rule.** From the late 18th century to 1917–18, Ukrainians were subjected to imperial rule.

Throughout this period, the tsarist government consistently and systematically attempted to obliterate most traces of Ukrainian distinctiveness. During the reign of \*Alexander I (1801–25), the Russian presence in Ukraine consisted primarily of the imperial army and bureaucracy. By the 1830s, during the reign of \*Nicholas I (1825–55), the process of establishing a centralized administration throughout Ukraine was completed. The abolition

of Magdeburg law in 1831 and the Lithuanian Statute in 1840 put an end to non-Russian legal influences, elected officials, and municipal self-government in Ukraine. Even the name 'Ukraine' almost disappeared from usage: the Left Bank was generally referred to as Little Russia, while the Right Bank was officially called the Southwest Territory. Among the Ukrainian elite, especially the descendants of the old Cossack *starshyna*, a 'Little Russian mentality' – a tendency to view Ukraine as a distinct but organic part of the Russian Empire – became widespread.

Although the impact of the French Revolution and the Napoleonic invasion of 1812 was minimal in Ukraine secret societies nonetheless arose there as part of the \*Decembrist movement. Its members attempted unsuccessfully to stage the first revolution (1825) in the Russian Empire. In 1830 the Polish nobles on the Right Bank joined the anti-Russian rebellion that began in the Congress Kingdom of Poland. After suppressing it in 1831, the tsarist government instituted Russification policies on the Right Bank. Harshly implemented by Governor-General D. \*Bibikov, they had a major impact on both the Ukrainians and Poles. To curtail the influence of the Polish nobles in society and local government, the estates of about 3,000 nobles were confiscated, and some 340,000 were deprived of their status and deported to the east. To counter Polish influence in culture and \*education on the Right Bank, the Kremianets Lyceum was closed down, and a Russian University was opened in Kiev in 1834. In 1839 the numerous Uniates in the region were forced to adopt Orthodoxy (see \*Church, history of the Ukrainian). To win over the Ukrainian peasantry and further alienate them from the Polish nobles, in 1847 Bibikov introduced Inventory Regulations limiting the obligations a peasant owed his landlord.

The vast majority of the approximately 2.4 million Western Ukrainians in the Habsburg Empire in the early 19th century lived in eastern \*Galicia; the remainder lived in Bukovyna and Transcarpathia. Their social structure was relatively simple, for the population in eastern Galicia consisted mostly of impoverished peasantry (95 percent) and about 2,000 priestly families. The nobles in Galicia were almost all Poles or Polonized Ukrainians, and Jews made up the overwhelming majority of the small urban population. The socioeconomic development of Western Ukraine lagged behind that of Russian-ruled Ukraine. It was one of the poorest regions in all Europe. Galicia was incorporated into the Habsburg Empire during a time of major changes, and Emperor \*Joseph II developed a special interest in Galicia, viewing it as a kind of laboratory for his educational, social, and economic reforms. Most notable in this respect was the transformation of the clergy into a civil service, the limitation of *corvée* labor, the regulation of feudal units, and the abolition of the personal dependence of peasants on the seigneur. After Joseph's death (1790), many of his reforms, especially those pertaining to the peasants, were either subverted by the nobles or rescinded by his conservative successors.

*The rise of national consciousness.* In Ukraine, as elsewhere in Eastern Europe, the rise of national consciousness was primarily associated with the impact of Western ideas (especially those of J. \*Herder, the French Revolution, and \*Romanticism) and with the birth of an \*intelligentsia. The institutions of higher learning established to provide the imperial governments with well-trained

bureaucrats facilitated the development of the intelligentsia. \*Kharkiv University served as the intellectual center of Russian-ruled Ukraine until \*Kiev University assumed this role in the 1830s. Initially, the Ukrainian intelligentsia under Russia consisted primarily of nobles by background. A small minority were priests' sons, burghers, or Cossacks. The intelligentsia's numbers were small; eg, prior to 1861 Kharkiv and Kiev universities produced a total of only about 4,300 graduates. Later, noble representation in the intelligentsia declined and that of commoners, including peasants, rose.

Indicative of the first phase of nation-building was the interest shown by the intelligentsia in the late 18th and early 19th century in Ukrainian history, \*historiography, \*ethnography, and \*folklore. Given the central importance of the native language in the maintenance of national consciousness, the Ukrainian intelligentsia was anxious to raise its status. A significant event in this regard was the publication in 1798 of I. \*Kotliarevsky's *Eneida* (Aeneid). Despite their achievements in \*literature and \*scholarship, the Ukrainian intelligentsia of the early 19th century continued to view Ukraine and the Ukrainians in regionalist terms, convinced that in cultivating things Ukrainian it was also enriching the cultural heritage of Russia as a whole.

In the 1840s a new generation of Ukrainian intellectuals, now based in Kiev, emerged. Among its leaders were the historian M. \*Kostomarov, the author P. \*Kulish, and, most important, the poet T. \*Shevchenko, whose works have exerted an unparalleled influence on Ukrainians. In 1847 the above mentioned, together with a small group of other Ukrainian intellectuals, began the political phase of nation-building by founding in Kiev the secret \*Cyril and Methodius Brotherhood, which was quickly uncovered by the tsarist police. The trials and exile of its leaders marked the beginning of the long confrontation between the Ukrainian intelligentsia, which stood for national rights and social justice, and the Russian imperial authorities.

In Austrian-ruled Western Ukraine, in the early 19th century the intelligentsia was practically synonymous with the Greek Catholic \*clergy – the only social group that could avail itself of higher learning. Thus, of the 43 Ukrainian-language books that appeared there between 1837 and 1850, 40 were written by priests. The first signs of interest in the native language appeared in \*Pere-myshl, where, in 1816, Rev I. \*Mohylnytsky organized a clerical society for the purpose of disseminating culture and enlightenment and preparing simple religious texts. In the 1830s the center of nation-building activity shifted to \*Lviv, where young, idealistic seminarians captivated by romantic national ideas came to the fore (see \*Ruthenian Triad).

*Imperial change and reforms.* Nationhood became a major political issue in Western Ukraine during the \*Revolution of 1848–9, which shook the Habsburg Empire and much of Europe. Confronted by uprisings in Hungary, Italy, and Vienna itself, and threatened by a Polish revolt in Galicia, the Habsburgs sought to gain popular support by abolishing serfdom and establishing parliamentary representation. These developments provided the impetus for political self-organization of Ukrainians. Rejecting the claims of the Poles to represent the entire population of Galicia, the Ukrainians established the \*Supreme Ruthenian Council as their representative body

and clashed with the Poles at the \*Slavic Congress in Prague. Thus began a long period of Polish-Ukrainian political conflicts in Galicia. Demanding autonomy, the Ukrainians established the first Ukrainian-language newspaper (\**Zoria halyts'ka*) and the popular enlightenment and publishing society \*Halytsko-Ruska Matytsia, pressured the Habsburgs to establish a chair of Ukrainian philology at \*Lviv University, began the construction of the \*People's Home in Lviv, formed pro-Habsburg militias, and established contacts with compatriots in Bukovyna and Transcarpathia (see, eg, A. \*Dobriansky). Thus, the revolutionary climate of 1848 allowed the Western Ukrainians to express and organize themselves as a distinct nation for the first time in modern history.

Russia's defeat in the \*Crimean War of 1853–6 brought to the fore the empire's socioeconomic backwardness and impelled \*Alexander II to introduce major reforms. The most important of these was the abolition of \*serfdom in 1861. The impact of this emancipation on the Ukrainians was especially great because 42 percent of them (compared to an average of 35 percent in the Russian Empire) had been private serfs. Other reforms introduced by Alexander in the 1860s included the sale of land to state peasants; the introduction of local organs of self-government (\*zemstvos) to look after education, public health, the mail, and roads; expanded accessibility to higher education; and the modernization of the \*court system.

*Socioeconomic changes.* In the latter part of the 19th century, the economic situation in the Ukrainian countryside steadily worsened as heavy redemption payments, taxes, and lack of land impoverished the peasantry. Rapid population growth increased land hunger, and great numbers of peasants were forced to emigrate to the Asian regions of the Russian Empire (see \*Emigration, \*Far East, \*Siberia, \*Turkestan); by 1914 almost 2 million Ukrainians had settled permanently in these regions. Paradoxically, this stagnation did not prevent Ukraine from enlarging its role as the 'granary of Europe.' A small segment of the nobles, along with entrepreneurs from other classes, succeeded in transforming their estates into large, modern agribusinesses that supplied the imperial and foreign markets. In the steppe regions wheat was the main cash crop, and 90 percent of the empire's wheat exports – and 20 percent of world production – came from Ukraine. The Right Bank, where sugar beets were the chief cash crop, produced over 80 percent of the empire's sugar.

With the abolition of serfdom the way was finally cleared for industrialization and economic modernization. The first railway track was laid in 1866–71 between Odessa and Balta to facilitate the movement of grain. As the railway network grew, even more Ukrainian food and raw materials were sent northward to Russia in exchange for an unprecedented quantity of finished products. As a result, Ukraine's economy, which theretofore had been relatively distinct and self-sustaining, began to be integrated into the imperial economic system. The rapid growth of \*railway transportation stimulated the demands for coal and iron. Consequently, between 1870 and 1900, and especially during the 1890s, the southeastern Ukrainian \*Donets Basin, with its rich coal reserves, and \*Kryvyi Rih Iron-Ore Basin became the fastest-growing industrial regions in the empire. Developed by foreign capital, with the aid of state subsidies, by 1900 these regions produced almost 70 percent of the empire's coal and most of its iron ore. In 1914 over 320,000 workers

were employed here. During the 19th century Ukraine experienced much urban development. Between 1860 and 1897, the population of Odessa, the largest city, grew from 113,000 to 404,000; Kiev grew from 55,000 to 248,000 and Kharkiv from 50,000 to 174,000. In 1897, however, still only 13 percent of Ukraine's population lived in the 113 population centers officially designated as towns and cities. A crucial aspect of the industrial and urban change was that Ukrainians, who constituted 73 percent of the population in 1897, were little affected by them. They constituted 30 percent of the urban population, while Russians formed 34, Jews 27, and other national groups 9 percent of the urban total. Ukrainians were also a minority within the working class – 39 percent of the total. They were also very weakly represented in the intelligentsia: 16 percent of lawyers, 25 percent of teachers, and less than 10 percent of the writers and artists in Ukraine. Whereas at the turn of the 19th century there had been relatively few \*Russians in Ukraine, by 1897 they constituted 12 percent of its inhabitants and formed the vast majority of the workers in the coal and metallurgical industries, as well as of employees in state administration. Because of especially rapid population growth among the \*Jews, by the late 19th century they accounted for 8 percent of the population (compared to 4 percent for the empire as a whole) and they played a dominant role in trade and commerce in Ukraine. The Poles, who like the Jews were concentrated on the Right Bank, constituted about 6.5 percent of the population.

*The emergence of nationalism and socialism.* After the death of the archconservative \*Nicholas II in 1855, the nascent Ukrainian movement showed new signs of life. In St Petersburg and Kiev, a new generation of Ukrainian activists, composed mostly of students, formed civic and cultural groupings called \*hromadas. The St Petersburg hromada published an important journal, \**Osnova*. A significant feature of the Kiev hromada was that it attracted a small group of Polish and Polonized nobles from the Right Bank who, guilt-stricken by the age-old exploitation of the Ukrainian peasantry by their class, resolved to draw closer to the masses among whom they lived. Led by V. \*Antonovych and others, they called themselves \*Khlopomany (peasant lovers). In the early 1860s, hromadas also appeared in Poltava, Chernihiv, Kharkiv, and Odessa, as well as St Petersburg and Moscow. Because of their advocacy of \*populism and national traditions their members came to be called \*Ukrainophiles.

The cultural and scholarly activities of the Ukrainophiles aroused the ire of Russian conservatives and government officials, and they were accused of fostering Ukrainian separatism. Consequently, in July 1863 P. \*Valuev, the minister of the interior, banned the publication in Ukrainian of all scholarly, religious, and educational books. Soon after, the hromadas were dissolved and some Ukrainophiles were sent into internal exile. About a decade later, the Ukrainophiles, still led by V. Antonovych, surreptitiously renewed their activities. They formed the Old \*Hromada of Kiev, so named to differentiate it from the new hromadas formed by students, and in 1873 they expanded their cultural activities by gaining control of the semiofficial \*Southwestern Branch of the Imperial Russian Geographic Society. That same year they also convinced Countess Ye. Myloradovych and other wealthy philanthropists to fund the newly formed Shevchenko Society in Lviv.

As ties between the Ukrainian intelligentsia in the Rus-

Title page of M. Mikhnovsky's *Samostiina Ukraina*, 1900

sian and Austrian empires became stronger, \*Galicia increasingly served as the main center of Ukrainophile activities because it was beyond the reach of tsarist restrictions. In 1876, alarmed by the growth of the Ukrainophile movement, Alexander II banned the printing and importation of Ukrainian-language publications (see \*Ems Ukase). Several activists, most notably M. \*Drahomanov, were forced into exile abroad. From Geneva, Drahomanov and other émigrés addressed the socioeconomic plight of the peasantry and advocated socialist ideas in the journal \**Hromada*, which was smuggled into Ukraine. With the rise of radicalism among the intelligentsia in the Russian Empire in the 1870s, the question of the relationship between revolutionaries and Ukrainophiles and the 'Ukrainian question' came to the fore. Many revolutionaries in Ukraine, such as A. \*Zheliabov, D. \*Lyzohub, V. \*Osinsky, and M. \*Kybalchych, believed that it would be better for national distinctions to disappear so that a global socialist society might emerge. Consequently, a split between the socialist and more traditional Ukrainophiles occurred.

Early exponents of \*Marxism in Ukraine were the economist M. \*Ziber and S. \*Podolynsky, a close associate of Drahomanov. But it was only in 1891–2 that the first stable Marxist group – the Russian Social Democratic Group – appeared in Kiev. A reflection of the political activism that swept through the empire beginning in the 1890s was the appearance of illegal Ukrainian political organizations and parties: the \*Brotherhood of Taras (1891–8), the \*General Ukrainian Non-Party Democratic Organization (1897–1904), the \*Revolutionary Ukrainian party (1900–5), the \*Ukrainian Socialist party (1900–3), the \*Ukrainian People's party (1902–7), the \*Ukrainian Democratic party (1904–5), the Ukrainian Radical party (1904–5), the Ukrainian Democratic Radical party (1905–8), the Ukrainian Social Democratic \*Spilka (1904–13), the \*Ukrainian Social Democratic Workers' party (1905–20), and the \*Society of Ukrainian Progressives (1908–17).

The \*Revolution of 1905 had an important impact on the development of the Ukrainian movement because Ukrainian-language publishing was permitted, as was freedom of association. Consequently by 1906 the number of Ukrainian-language periodicals had increased from 2 to 18, and Ukrainian publishing houses, \*Prosvita cultural societies, co-operatives, and music and drama groups proliferated. These new initiatives were desperately needed to improve the cultural and educational levels of development of the Ukrainian population. In 1897 only

13 percent of Ukrainians were literate. In the wake of the revolution an imperial parliament – the State \*Duma – was established, and its Ukrainian members formed a caucus within it. By 1908, however, government restrictions against the rapidly spreading Ukrainian movement had mounted again.

Despite the repression that marked the 1876–1905 period, Ukrainian scholarship made great progress (see \*Historiography, \*Legal scholarship, \*Economic studies, \*Linguistics, \*Ethnography, \*Folklore, \*Literature studies, \*Archeology, \*Archeography, \*Church historiography, \*Geography). Ukrainian \*literature flourished, many \*scholarly societies were established, and by 1890 Ukrainian \*theater boasted five professional troupes, each with repertoires of 20 to 30 plays that were performed with great success throughout the empire.

*Developments in Western Ukraine.* In 1851 the population of Galicia was 4.6 million, of which Ukrainians constituted about 50 percent, Poles 41 percent, and Jews 7 percent. By 1910 the population had almost doubled, to 8 million (Ukrainians 42 percent; Poles [and other Roman Catholics], 47 percent; Jews, 11 percent). Over 90 percent of Ukrainians were peasants. Inhabiting the poorest regions in the Habsburg Empire and vulnerable to exploitation by Polish landlords, they were extremely impoverished. Most had landholdings of less than 5 ha. Many of them were heavily in debt, usually to Jewish usurers whose interest rates (generally 52–104 percent annually, and occasionally as high as 500 percent) forced thousands of peasants to auction their land. Because industry was practically non-existent (except in the \*Drohobych-Boryslav Industrial Region), there were few alternatives to rural poverty. Consequently, pressure to emigrate was great, and between 1890 and 1914 the \*emigration of over 500,000 Ukrainians from Western Ukraine to the New World took place.

After 1849, when Count A. \*Gołuchowski was appointed governor of the province, the political situation of the Ukrainians in Galicia deteriorated markedly. After the Austro-Hungarian compromise of 1867, the Polish nobility won total control over the recently formed (1861) Galician \*Diet, and Vienna promised not to interfere in the Polish conduct of Galician affairs. Discouraged by the Polish predominance, disenchanted with the Habsburgs, and lacking confidence in the Ukrainians' ability to stand on their own, in the 1860s a large part of the West Ukrainian clerical and conservative elite, which controlled most Ukrainian institutions, looked to Russia for support. The \*Russophiles' tendency to identify with the tsar and the Russian people and culture was opposed by most students, younger clergy, and members of the rising secular intelligentsia. Using Shevchenko and the Ukrainophiles in Russian-ruled Ukraine as well as the Ruthenian Triad as their models, the Galician \*Populists championed the use of the vernacular, sought closer ties with the Ukrainian peasantry and its culture, and stressed the national distinctiveness of the Ukrainians. By the 1880s, however, a small group of young intelligentsia, led by I. \*Franko and M. \*Pavlyk, concluded that neither the Populists nor the Russophiles addressed adequately the pressing socioeconomic needs of the West Ukrainian peasantry. Greatly influenced by M. \*Drahomanov, they adopted a program that combined socialism with Ukrainian national demands, and in 1890 they formed the \*Ukrainian Radical party.

Despite their political disadvantages vis-à-vis the Poles,

Galicia's Ukrainians lived in a constitutional monarchy that allowed much greater freedom of association and expression than was possible in the Russian Empire. This freedom, as well as examples set by the Czechs, Germans, and Poles, led to an upsurge of organizational activity in Western Ukraine in the late 19th and early 20th centuries. A harbinger of this tendency was the \*Prosvita society founded by the Populists in 1868 to spread literacy among the peasants. By 1914 it operated nearly 3,000 reading rooms and had close to 37,000 members. Later the gymnastic societies \*Sokil (1894) and \*Sich (1900) were founded; by 1914 they had well over 50,000 members. From the 1880s a Ukrainian \*co-operative movement flourished in Western Ukraine, as did the Ukrainian \*press, and by 1913 West Ukrainians could boast of having 80 periodicals, 66 of them in Galicia, 8 in Bukovyna, 4 in Transcarpathia, and 4 in Vienna and Budapest. All this activity not only addressed the cultural and socioeconomic needs of the Ukrainian masses, it also spread national consciousness and encouraged close ties between the intelligentsia (consisting usually of leaders of organizations) and the peasantry.

With the arrival in 1894 of M. \*Hrushevsky from Kiev to occupy the Chair of History at Lviv University a new era in Ukrainian scholarship began, and under his direction in 1893 the Shevchenko Society was transformed into the \*Shevchenko Scientific Society, a de facto academy of sciences. As various ideologies crystallized, the organizational infrastructure grew, and the need to function effectively in a parliamentary system became more pressing, the West Ukrainians formed political parties, notably the above-mentioned Ukrainian Radical party (1890–1939), the populist-independentist \*National Democratic party (1899–1919), the Marxist \*Ukrainian Social Democratic party (1899–1924), and the Catholic Ruthenian People's Union (1896).

As a result of the widespread educational, religious, civic, cultural, literary, and economic activity, Galicia became the bastion of the Ukrainian national movement. The Poles' increased efforts to limit it led to a rapid escalation of hostilities between the two communities, reflected in the fierce clashes between Ukrainian and Polish students at Lviv University and the assassination, in 1908, of Vicegerent A. \*Potocki by the Ukrainian student M. \*Sichynsky. \*Bukovyna's 300,000 Ukrainians experienced an upsurge in activity similar to that of their Galician counterparts. They succeeded in establishing an effective educational system and gaining significant representation in the Viennese parliament. By contrast, the 500,000 Ukrainians in Hungarian-dominated \*Transcarpathia had great difficulty in establishing their national identity because of the intense Magyarization policies of the government and strong Russophile tendencies among the tiny intelligentsia.

*Ukraine in the First World War.* The impact of the \*World War on the Ukrainians, who were caught between major adversaries in the conflict, was immediate and devastating. About 3 million of them fought in Russia's armies, and over 250,000 served in Austria's forces. Some of the biggest battles on the eastern front occurred in Galicia, and much of Western Ukraine suffered terribly from repeated offensives and occupations. On the eve of the war, the West Ukrainians declared their loyalty to the Habsburgs. When war broke out, they formed an umbrella organization – the \*Supreme Ukrainian Council in

A platoon of Ukrainian Sich Riflemen

Lviv – and organized a 2,500-man volunteer legion, the \*Ukrainian Sich Riflemen – the first Ukrainian military unit in modern times. In 1915 they created a co-ordinating body in Vienna – the \*General Ukrainian Council – consisting of 21 Galician and 7 Bukovynian representatives and 3 members of the \*Union for the Liberation of Ukraine (an organization of émigrés from Russian-ruled Ukraine who sought German and Austrian aid for the creation of an independent Ukrainian state).

As Russian armies occupied much of Galicia and Bukovyna in September 1914, the retreating Habsburg authorities, suspecting the Ukrainians of pro-Russian sympathies, arrested and executed hundreds without trial and deported over 30,000, including many Russophiles, to internment camps, such as the one near \*Talerhof in Austria. Under Russian occupation, the West Ukrainians were also subjected to exceedingly harsh treatment. Intent on Russifying the population, the tsarist authorities arrested and deported thousands of Ukrainian activists, shut down Ukrainian institutions, and banned the use of Ukrainian. They also launched a campaign to liquidate the Greek Catholic church, exiling Metropolitan A. \*Sheptytsky to Russia in the process. In 1915 Western Ukraine was reoccupied by Austria. In the rest of Ukraine, Ukrainian activities were almost totally suppressed until the outbreak of the Revolution of 1917.

**The rebirth of Ukrainian statehood (1917–20).** By the third year of the Great War, the multinational Russian, Austro-Hungarian, and Ottoman empires all showed signs of internal weakness and disintegration. In the Russian Empire, military defeats, disorganization, inflation, and serious food shortages provoked mass social discontent and unrest, which culminated in the \*February Revolution of 1917 and the collapse of the monarchy. Following the abdication of Nicholas II on 15 March 1917, most of the opposition parties in the Duma banded together to form the Russian \*Provisional Government. The Bolsheviks, however, who came to dominate the soviets of workers' and soldiers' deputies in Petrograd and elsewhere, refused to participate in the government. In this situation of social and economic chaos and dual political authority, the Provisional Government found it impossible to maintain control.

Taking advantage of the revolutionary situation, Ukraine's national leaders put forth not only social but also national and political demands. On 17 March 1917, the representatives of various Ukrainian political, com-

The Pedagogical Museum in Kiev, seat of the Central Rada in 1917–18

munity, cultural, and professional organizations gathered in Kiev and formed the Ukrainian \*Central Rada as an all-Ukrainian representative body. On 22 March, the Rada issued an appeal to the Ukrainian people to maintain peace, establish order, and form political, cultural, and economic associations. Almost immediately a Constituent Military Council and Central Ukrainian Co-operative Committee were established, and the Prosvita society (banned in 1910) and the newspaper *Rada* (banned in 1914), now renamed *Nova rada*, were revived. The congress of co-operatives held in Kiev on 27–28 March came out in support of Ukrainian autonomy, as did a mass rally of over 100,000 people in Kiev on 1 April.

Beginning in March, various political parties were reorganized or created. The liberal \*Society of Ukrainian Progressives was renamed the Union of Ukrainian Federalists-Autonomists and, in June 1917, the \*Ukrainian Party of Socialists-Federalists (UPSF); led from June by S. \*Yefremov, it favored autonomy within a federal Russian republic. The \*Ukrainian Social Democratic Workers' party (USDWP) was revived; led by V. \*Vynnychenko and S. \*Petliura, it propagated the idea of Ukrainian independence. The \*Ukrainian Party of Socialist Revolutionaries (UPSR) headed by M. \*Kovalevsky enjoyed mass peasant support; it pushed for territorial autonomy and the nationalization of land and dominated the \*Peasant Association, a mass organization that pursued the socialization of land. At the end of December 1917, the \*Ukrainian Party of Socialists-Independentists (UPSI) was founded by Ukrainian patriots who were military personnel or had army backgrounds; its members (who in March 1917 had formed the \*Ukrainian Military Club headed by M. \*Mikhnovsky) organized Ukrainian military formations (see \*Army of the UNR) and were the first to propagate the idea of an independent Ukrainian state. The small, conservative but separatist \*Ukrainian Democratic Agrarian party (UDAP) was founded in May 1917 by Ukrainian landowners; its ideologist V. \*Lypynsky promoted the idea of an independent monarchy ruled by a hetman and a Cossack elite. The USDRP and UPSR came to play leading

roles in the Rada; the UPSF provided many of its functionaries; but the UPSI and UDAP played minor roles. Other minor parties – the \*Ukrainian Labor party (ULP) and \*Ukrainian Federative Democratic party – also appeared.

In Petrograd itself, a rally of over 20,000 Ukrainians, mostly soldiers, came out in support of Ukraine's autonomy. A week later the \*Ukrainian National Council was established there with close links to the Rada. A similar Ukrainian Council was created in Moscow in late May.

An important event in the first phase of the Ukrainian revolution was the \*All-Ukrainian National Congress convoked by the Rada (Kiev, 19–21 April 1917) whose 900 delegates recognized the Rada as the 'supreme national authority' and demanded Ukraine's autonomy, minority rights, and the participation of Ukrainian representatives in a future peace conference. The congress reorganized the Rada and elected its president (M. Hrushevsky) and vice-presidents (V. Vynnychenko and S. Yefremov). After the congress, the Rada elected from among its members an executive committee, later called the Little Rada.

Soldier, peasant, and worker organizations were also born in this period. These groups convened to proclaim their support for the Rada and elect delegates to it. The first \*All-Ukrainian Military Congress (18–21 May 1917) created the Ukrainian General Military Committee headed by S. Petliura; the second congress (18–23 June 1917) organized the \*Free Cossacks (volunteer units) and elected the \*All-Ukrainian Council of Military Deputies to the Rada. The first \*All-Ukrainian Peasant Congress (10–16 June 1917) elected the Central Committee of the Peasant Association and the \*All-Ukrainian Council of Peasants' Deputies to the Rada, and the first \*All-Ukrainian Workers' Congress (24–26 July 1917) elected the \*All-Ukrainian Council of Workers' Deputies to the Rada.

With the revolution, all tsarist interdictions concerning the Ukrainian language were abolished and Ukrainian culture, education, and publishing flourished.

Ukraine's national minorities – the Russians, Jews, and Poles – also organized themselves. Russians continued to dominate in city elections. The Provisional Government appointed (mostly Russian) \*gubernial commissioners (usually the heads of gubernial zemstvo executives) in Ukraine. Thus, in the first months of the revolution in Ukraine, dual authority – that of the Rada and the Provisional Government – existed. The Rada was also confronted in the Russified cities by the soviets of workers' and soldiers' deputies, but these had little Ukrainian support. Most non-Ukrainian political and civic organizations were hostile to the idea of Ukrainian autonomy, let alone independence.

When the Rada's autonomist demands were presented by a delegation to the Provisional Government and the Petrograd Soviet in May 1917 and rejected, the Rada issued the first of its four \*universals on 23 June 1917 during the second All-Ukrainian Military Congress. It called for the creation of an elected people's assembly (diet) to ratify the laws determining the political and social order of an autonomous Ukraine. On 28 June the \*General Secretariat of the Rada was established as its executive body under V. Vynnychenko.

These important steps were accepted by the majority of Ukrainians. Consequently the Russian government

had to come to terms with the Rada and its demands. In its Second Universal (16 July 1917) the Rada informed the people that the final decision on Ukraine's autonomy would be made by the \*All-Russian Constituent Assembly. The legal basis for Ukraine's autonomy was elaborated in the Statute of the Higher Administration of Ukraine and approved by the Little Rada on 29 July 1917. The Provisional Government, now headed by A. \*Kerensky, refused to ratify the statute, however, and on 17 August it issued a 'Temporary Instruction to the General Secretariat' subordinating the General Secretariat to the Provisional Government instead of the Rada. The Rada reluctantly accepted the instruction as a temporary truce and the basis for obtaining further rights.

Ukrainian-Russian relations continued to deteriorate, as did economic conditions, military discipline, law and order, and the situation at the front. Interparty relations within the Rada and its control outside Kiev became even more unstable. Although the Rada did succeed in organizing the \*Congress of the Peoples of Russia (21–28 September) and a congress of 80 gubernial and county commissioners (16–17 October), the Provisional Government continued to oppose the General Secretariat's attempts at functioning as an autonomous government.

On 7 November 1917 (25 October os) the Bolsheviks in Petrograd overthrew the Provisional Government (see \*October Revolution). Under the leadership of V. \*Lenin and L. \*Trotsky, they soon took power throughout most of ethnic Russia. But they were unsuccessful in Ukraine, the \*Kuban, and the \*Don region. The Rada condemned the coup on 8 November, but tried to remain neutral. On 10–13 November, however, battles took place in Kiev between the units of Kiev Military District, still loyal to the Provisional Government, and local Bolshevik forces. The pro-Rada First Ukrainian Regiment for the Defense of the Revolution, formed out of the delegates at the third All-Ukrainian Military Congress, intervened on the side of the Bolsheviks, and the Provisional Government's troops retreated to the Don.

The Third All-Ukrainian Military Congress in Kiev, November 1917

On 12 November the Rada created a larger, more left-leaning General Secretariat. In its Third Universal (20 November 1917), it proclaimed the creation of the \*Ukrainian National Republic in federation with Russia (see \*Universals of the Central Rada). The new General Secretariat also guaranteed freedom of speech, press, religion, and assembly, announced a political amnesty, and

decreed that land was to be socialized without compensation. Workers were to be given control over their workplaces and production was to be state controlled. National minorities were granted \*national-personal autonomy.

The elections in Ukraine to the \*All-Russian Constituent Assembly (10–12 December 1917) gave majority support to the Ukrainian parties, particularly the uRSR (45.3 percent). The relations between the Rada and Bolshevik Russia deteriorated further. On 12 December, an attempted Bolshevik armed takeover in Kiev was suppressed, and Bolshevik attempts to turn the \*All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies' (17–19 December) against the Rada failed after the Council of People's Commissars in Petrograd sent an ultimatum on 17 December, demanding that the Rada allow Bolshevik forces to fight counterrevolutionaries on Ukrainian territory and that it prevent the passage of Don Cossacks leaving the southwestern front to join A. Kaledin's anti-Bolshevik army in the Don region.

The Rada rejected the Soviet Russian ultimatum and, soon after, the \*Ukrainian-Soviet War broke out. The Bolsheviks proclaimed a Ukrainian soviet republic at the first All-Ukrainian Congress of Soviets in Kharkiv (11–12 December) and appointed a workers' and peasants' government (the \*Peoples' Secretariat) on 30 December. A Russian Bolshevik army, aided by local rebellions, invaded Left-Bank Ukraine in January 1918 and, after the Battle of \*Kruty (29 January), began advancing on Kiev. Though the Army of the UNR suppressed the Bolshevik uprising at the \*Arsenal plant in Kiev (4 February), the Rada was forced to abandon Kiev and flee to Zhytomyr on 7 February.

St Sophia Square in Kiev during the proclamation of Independence, 25 January 1918

By December 1917 the Rada's leaders concluded that a separate peace treaty with the Central Powers and German military aid were the only way of saving the UNR. Since only a full-fledged independent state could conclude an international agreement, on 25 January 1918 the Rada issued its Fourth Universal (back-dated to 22 January) proclaiming Ukraine's independence. The General Secretariat was renamed the \*Council of National Ministers, and 2 February was announced as the date for the convention of the \*Constituent Assembly of Ukraine, elections to which had taken place on 9 January

The signing of the Peace Treaty of Brest-Litovsk, 9 February 1918

in regions not occupied by the Bolsheviks. A week later V. Vynnychenko resigned as prime minister, and on 30 January V. \*Holubovych formed a new, UPSR-dominated government.

On 9 February 1918 the Peace Treaty of \*Brest-Litovsk between the UNR and the Central Powers was signed, and on 19 February German-Austrian armies began their offensive against the Bolshevik-occupied lands. In early March Holubovych's government returned to Kiev, and by early April the last of the Red Army retreated from Ukraine. The German high command interfered in Ukrainian internal affairs as soon as its offensive began. Germany was interested mainly in exploiting Ukraine economically as part of its war effort, and the disorder, anti-German guerrillas, and policies of an uncooperative Ukrainian socialist government made the attainment of this goal difficult. To ensure the delivery of foodstuffs, the Germans took control of the railways. To force the recalcitrant peasants to sow their fields, Field Marshal H. von \*Eichhorn issued an order on 6 April reversing the Rada's land nationalization policies, and on 25 April he formally introduced martial law. Gen W. \*Groener began secret negotiations with Gen P. \*Skoropadsky, a representative of conservative and landowning circles in Ukraine, about forming a new government that would be favorably disposed to the Germans' aims and policies. On 26–27 April the Ukrainian \*Bluecoats divisions were disarmed and on 29 April, the day that the \*Constitution of the UNR was adopted and M. Hrushevsky was elected president of the republic, a German-supported coup d'état was staged, and the congress of the \*Union of Landowners proclaimed Skoropadsky 'Hetman of Ukraine.'

*The Hetman government.* Skoropadsky assumed all executive and legislative power and supreme command of the army and navy; only judiciary functions were left to a General Court. All laws promulgated by the Rada were abolished, and the UNR was renamed the Ukrainian State. The new regime, its legislation, and administration resembled those of tsarist times.

The first \*Hetman government under Premier F. \*Ly-zohub included such well-known Ukrainian figures as D. \*Doroshenko and M. \*Vasylenko. Many of the other members belonged to Russian parties, mainly to the Rus-

sian Constitutional Democratic party; some were even Russian monarchists. The repressive, pro-German, and reactionary social and economic policies of the new regime and its (mostly Russian) collaborators engendered opposition from most of the Ukrainian political parties and the zemstvos, and led to strikes, widespread peasant rebellions and peasant guerrillas (eg, N. \*Makhno and Yu. \*Tiutiunnyk), arson and bombings, assassinations (eg, that of Eichhorn), and even increased support for the Bolsheviks.

Organized Ukrainian political opposition to the Hetman regime originated in May 1918, when members of the UPSI, UDAF, UPSF, ULP, and the railwaymen's and postal-telegraph unions formed the \*Ukrainian National-State Union. In July this coalition was joined by the USDWP, UPSR, and various cultural, civic, labor, and professional organizations, and renamed the \*Ukrainian National Union (UNU). After Germany's surrender in November 1918 and the withdrawal of its troops, the danger of a renewed Bolshevik occupation led Skoropadsky to turn to the anti-Bolshevik, but also anti-Ukrainian and pro-White, Entente Powers. To appease them he proclaimed his intention to federate with a future non-Bolshevik Russia and appointed a new cabinet made up mostly of Russian monarchists. These developments triggered the popular uprising that the UNR had been planning. Commanded by the \*Directory of the UNR, the uprising was supported militarily by the \*Sich Riflemen, various guerrilla detachments, thousands of peasants, and, towards the end, Ukrainian soldiers in the hetman's army. In December 1918, his military and German support gone, Skoropadsky abdicated, and the UNR was re-established in Kiev.

*The period of the Directory of the UNR.* On 26 December 1918 the Directory restored the legislation of the UNR (landowners' and church estates were again socialized without compensation), and in January 1919 a new Council of National Ministers of the UNR was constituted. To counter widespread pro-Bolshevik propaganda, the socialist Directory built its authority on the basis of gubernia and county labor councils of workers, peasants, and toiling intelligentsia. The Labor Congress that took place on 23–28 January 1919 in Kiev ratified the unification of the UNR and the newly created \*Western Ukrainian National Republic (ZUNR) and recognized the supreme power of the Directory until the next session of the congress.

The proclamation of unification, Kiev, 22 January 1919

Upon assuming power, the Directory was faced with an extremely difficult internal and international situation. It was forced to deal with a renewed Bolshevik offensive and to continue fighting the \*Ukrainian-Soviet War; to aid the ZUNR in the ongoing \*Ukrainian-Polish War in Galicia; to circumvent Gen. A. \*Denikin's anti-Ukrainian as well as anti-Bolshevik Volunteer Army in the Don region and hostile Rumanian forces in \*Bessarabia and \*Bukovyna; to contain the Franco-Greek Entente expeditionary forces that had occupied the Crimea and Odessa and were helping Denikin; and to cope with an unruly \*partisan movement (eg, N. Makhno and N. \*Hryhoriiv), whose activities and excesses compromised and even endangered the new government.

The only solution was to come to an agreement with either Moscow or the Allies. The failure of Premier V. Chekhivsky and Directory chairman V. Vynnychenko to arrange peace with the Bolsheviks prompted the government to accept the pro-Entente orientation proposed by S. \*Petliura, the supreme military commander. On 10 February 1919, Vynnychenko and Chekhivsky resigned and Petliura became the new chairman. To facilitate negotiations with the Entente, the USDWP and UPSR withdrew from the government, and on 13 February a new cabinet, headed by S. \*Ostapenko and composed mainly of ministers belonging to the UPSF, was formed. The new government tried to negotiate a common strategy against the Bolsheviks with the French commander in Odessa, Col H. Freydenberg. The plan failed because of Denikin's opposition, the population's hostility to the policies of the 'bourgeois' cabinet and its accommodation with the French, and the Entente's insistence on Petliura's resignation and French control of the army, railroads, and finances.

Page from a UNR diplomatic passport

Beaten on several fronts, the government was no longer in control. Ukrainian army units became demoralized, increasingly more and more partisan otamans appeared, and the Bolshevik offensive forced the Directory to evacuate Vinnytsia. Meanwhile Otaman N. Hryhoriiv drove the Entente forces out of Kherson (10 March), Mykolaiv (15 March), and Odessa (6 April). With the Entente forces' retreat from Ukraine, Ostapenko's cabinet lost its *raison d'être*, and on 9 April a new cabinet, headed by B. \*Martos and made up of USDWP and UPSR members, was formed in Rivne, Volhynia. The new government appealed to the populace to continue resisting the Bolshevik aggres-

sors, reassured it that it would not turn for aid to foreign powers, and reiterated its adherence to democracy.

Between April and July, 328 anti-Bolshevik revolts took place in Ukraine. They were led by the left faction that had split from the USDWP in January and founded the \*Ukrainian Social Democratic Workers' party (Independent) and by part of the UPSR; together they formed the \*All-Ukrainian Revolutionary Committee, with a program of creating an independent socialist (non-Bolshevik) Ukrainian republic. The insurgent forces of otamans N. Hryhoriiv and D. \*Zeleny also fought the Bolsheviks. The initial successes of the Directory in the Ukrainian-Soviet War were undermined by opposition from the UPSR and the right-wing \*Ukrainian People's Republican party, which backed Otaman V. \*Oskilko's abortive coup in Rivne on 29 April.

In June the government moved to Kamianets-Podilskyi, and on 27 August a new USDWP/USPR-dominated cabinet, headed by I. \*Mazepa, was constituted there. In July a joint offensive of the Army of the UNR and the \*Ukrainian Galician Army (UHA) began against the Bolsheviks in Right-Bank Ukraine. Simultaneously but independently, Denikin's Volunteer Army began its offensive against the Bolsheviks in Left-Bank Ukraine. On 31 August both forces entered Kiev; to avoid armed conflict, the Ukrainian command withdrew from the city.

At this point, views among the Ukrainian leaders diverged. The Directory and the cabinet considered both the Whites and the Reds to be Ukraine's main foes; to get aid from the Entente they were prepared to form an alliance with Poland. The Ukrainians from Galicia, headed by Ye. \*Petrushevych, however, considered Poland the greater enemy; they were prepared to come to terms with Denikin and thus get the support of the Entente. Meanwhile, the Entente Powers, being hostile to Ukrainian independence, began an economic blockade of Ukraine, and the Volunteer Army pursued a reactionary policy of destroying everything Ukrainian, terrorizing the populace, and restoring land to the gentry in the occupied territories.

Massive jacqueries against the Whites, led by Makhno, Zeleny, and other partisan leaders, erupted, and Petliura, to whom the Directory yielded all power on 15 September, declared war on Denikin on 24 September. A typhus epidemic, exacerbated by the lack of medical supplies owing to the Entente's blockade, annihilated up to 70 percent of the Ukrainian army (90 percent of the UHA) and decimated the populace. Consequently the UHA commander, Gen M. \*Tarnavsky, signed an alliance with Denikin on 6 November, on the eve of the start of the third Soviet offensive in Ukraine. Petrushevych opposed this alliance, and on 16 November he and others in the government of the \*Dictatorship of the Western Province of the UNR left Kamianets for Vienna. A day earlier, F. Shvets and A. Makarenko, two of the three remaining members of the Directory, went abroad on state business and gave Petliura authority to act in the name of the Directory. Petliura and the government and army of the UNR left Kamianets for Volhynia, and on 17 November the Poles occupied Kamianets.

In late November the Army of the UNR found itself surrounded by the Bolshevik, Polish, and White forces in Volhynia. In December the UNR government and army commanders abandoned regular warfare for partisan tactics against the Bolshevik and Denikin forces and the

first \*Winter Campaign began. Petliura went to Warsaw to join the vice-premier, A. \*Livyt'sky, in trying to influence the attitude of the Entente Powers.

On 16 December the Bolsheviks occupied Kiev for the third time. By the middle of February 1920, they had forced Denikin's army out of Ukraine with the aid of UHA formations (the Red Ukrainian Galician Army), which had joined them in January. Thus, by early 1920 Volhynia and western Podilia were occupied by the Polish army, and the rest of Ukraine was under Bolshevik control.

Meanwhile, the Ukrainian emissaries in Warsaw had begun negotiations favorable to the Poles resulting in the Treaty of \*Warsaw of 22 April 1920 signed by Petliura and J. \*Piłsudski. The terms of the treaty, especially the surrender of the western Ukrainian territories to Poland, caused painful and profound discord among Ukrainians. As a result, Mazepa's government resigned, and a new UNR government – the last one on Ukrainian soil – was formed in May 1920 by V. \*Prokopovych.

A joint offensive of the Polish-Ukrainian armies against Soviet-occupied Ukraine and Belorussia began on 24 April. On 6 May they took Kiev, but in June they were forced to retreat to Galicia and Poland proper. On 15 August the Bolsheviks were routed near Warsaw, and the joint armies of a new Polish-Ukrainian counteroffensive occupied part of Podilia by mid-October.

On 12 October the Polish government signed an armistice with the Soviets, and the 30,000-man Army of the UNR was forced to retreat on 21 November into Poland, where its soldiers were placed in \*internment camps. Armed struggle against the Bolsheviks was continued by dozens of partisan groups in Podilia, Kiev, Katerynoslav, and Poltava gubernias. The insurgents, who numbered some 40,000 in late 1920, resisted Soviet rule until 1924. They were joined by UNR Army veterans from Poland under the command of Yu. \*Tiutiunyk, who operated in Volhynia and Podilia in November 1921 (the second \*Winter Campaign).

The 18 March 1921 Peace Treaty of \*Riga reaffirmed the Polish-Soviet armistice, established diplomatic relations between Poland and Soviet Ukraine, and legitimized Poland's annexation of Western Ukraine. The UNR parliament in exile – the \*Council of the Republic – functioned in Tarnów, Poland, from February to August 1921.

*The Western Ukrainian National Republic, 1918–23.* The rebirth of the Western Ukrainian state was influenced strongly by the Revolution of 1917 and its aftermath in the rest of Ukraine. On 18–19 October 1918, the Ukrainian members of the Austrian parliament and the Galician and Bukovynian diets and three delegates from each Ukrainian political party in Galicia and Bukovyna constituted the \*Ukrainian National Rada (UNRada) in Lviv as the representative council of the Ukrainians in Austria-Hungary and proclaimed the creation of a Ukrainian state on the territory of Galicia, northern Bukovyna, and Transcarpathia. A democratic constitution, granting proportional representation to all national minorities in the state organs, was adopted. Ye. Petrushevych was elected chairman of the UNRada, and a delegation for Galician affairs in Vienna under the direction of K. \*Levytsky was formed.

On 9 November the UNRada named the new state the \*Western Ukrainian National Republic (ZUNR) and the members of the Galician delegation became its first government – the \*State Secretariat.

The UNRada proclaimed personal autonomy for the national minorities. Nonetheless, the Poles in Galicia were hostile to the ZUNR from the outset and mounted armed opposition to it. The \*Ukrainian-Polish War began 1 November 1918. Polish forces occupied Lviv on 21 November, forcing the new government to move to Ternopil. While the Poles were backed by the might of the new Polish state, the ZUNR could only count on the military potential of Galicia's Ukrainians. Nonetheless, with the exception of Lviv, the corridor linking it with Peremyshl, and a few western counties, most of Galicia remained in Ukrainian hands. In late December, the UNRada and the government moved to Stanyslaviv. On 4 January 1919 a 10-member government executive, headed by S. \*Holubovych, was appointed.

From its inception the State Secretariat was charged with the task of unifying all the Ukrainian territories into one state. On 1 December 1918 an agreement to federate had been signed by representatives of the ZUNR and UNR governments in Khvastiv; on 4 January 1919, the UNRada ratified the law of union, and on 22 January the union was proclaimed and celebrated in Kiev. Thereafter, the ZUNR was officially called the \*Western Province of the UNR. Its political structure and ruling bodies were not changed, however, owing to the exigencies of the wars with Ukraine's enemies.

The UNRada promulgated various laws for the new state and sought international recognition of the ZUNR (see \*Diplomacy) and an end to the war with Poland. The government devoted much of its attention to the \*Paris Peace Conference and to lobbying the \*Entente Powers.

By June 1919, the tide in the Ukrainian-Polish War had turned against the ZUNR and the UHA. Holubovych's government resigned, and the UNRada empowered Ye. Petrushevych to head a \*Dictatorship of the Western Province of the UNR. The war continued to go badly despite the successes of the \*Chortkiv offensive, and on 16–18 July UHA and the government retreated into UNR territory, leaving Galicia under Polish occupation.

While in Kamianets-Podil'skyi, Ye. Petrushevych and Petliura failed to come to terms, and after the UHA was decimated by typhus and the third Soviet invasion of Ukraine began, Petrushevych left in November for Vienna, from where he and his government launched a diplomatic campaign against Poland until the \*Conference of Ambassadors sanctioned the Treaty of Riga (1921) and the annexation of Galicia and western Volhynia by Poland in March 1923.

(See \*Bukovyna and \*Transcarpathia for the history of these regions during the years 1918–20.)

#### Ukraine in the interwar years

*Soviet Ukraine.* During the Ukrainian-Soviet War the Bolsheviks formed several short-lived governments in Ukraine (see \*Communist Party of Ukraine, \*Council of People's Commissars, \*Donets–Kryvyi Rih Soviet Republic, \*People's Secretariat, and \*Provisional Workers' and Peasants' Government of Ukraine). Although, for factual reasons, they recognized the independence of Ukraine, and the Third All-Ukrainian Congress of Soviets (Kiev, – March ) adopted the first \*Constitution of the Ukrainian SSR as 'an independent and sovereign state,' in reality the military, state, and Party apparatuses were directed from Moscow and dominated by foreign and anti-Ukrainian elements, who terrorized the population

while imposing their rule (see \*Cheka), nationalizing all industry and commerce, and enforcing a ruthless requisitioning of farm produce. The excesses of \*War Communism led to the ruin of the agricultural economy and culminated in the 1921–3 \*famine in Ukraine.

As a result of widespread opposition, the Bolsheviks were forced to build an indigenous power base by seeking accommodation with and incorporating the 'national communists' – the influential \*Borotbists and \*Ukrainian Communist party (UCP). By 1921, the forces of the UNR and Gen P. \*Wrangel's White army had been defeated and the peace treaty with Poland had been signed. Soviet power was by and large secure, and Lenin introduced the \*New Economic Policy (NEP). On 30 December 1922 the USSR – a multinational federation of Soviet republics – was formally constituted (see \*Federalism). According to the Constitution of the USSR that was ratified by the Second Congress of Soviets on 31 January 1924, foreign relations, commerce, the military, transportation, and communications became prerogatives of the all-Union government, while the republican governments were given authority over internal and agrarian affairs, education, the judiciary, public health, and social security within their own borders. Nevertheless, the USSR remained in practice a centralized state, and directives continued to come from Moscow.

To appease the various nationalities and gain their support for Soviet rule, the Bolsheviks approved the principle of *korenizatsiia* (\*indigenization) and condemned Russian chauvinism at their 12th Congress in 1923. The new \*nationality policy emphasized the need for the economic development of various republics, the creation of indigenous national cadres, education in the mother tongue, de-Russification of the Party and state apparatus, and even the creation of territorial military units in the individual republics. As a result, \*Ukrainization was introduced in 1923 and its development had a profound impact on culture, education, and politics.

The positive changes that the NEP and Ukrainization brought about convinced certain Galician Ukrainian and émigré political figures and scholars (eg, M. Hrushevsky, A. Nikovsky, P. Khrystiuk, M. Chechel, M. Shrah, S. Rudnytsky) to return to Ukraine. These policies also generated a national \*literary discussion about the direction that Ukrainian literature should take; during it the influential and popular writer M. \*Khvylovy even advocated cultural (and ultimately political) independence from Moscow and an orientation toward Western civilization. Ukrainization also buttressed the position of the \*Ukrainian Autocephalous Orthodox church (UAOC), which was founded in Kiev in 1921 (see \*Church, history ...).

The success of Ukrainization and the national legitimacy it gave Ukraine soon threatened Moscow's hegemony and spawned a fierce struggle between its supporters and opponents in the CP(B)U. In May 1926 the People's Commissar of Education, O. \*Shumsky, protested against delays in Ukrainizing the proletariat, as well as Stalin's appointment of a non-Ukrainian, L. \*Kaganovich, as first secretary of the CP(B)U (1925–8). He also defended the views of Khvylovy and the \*Neoclassicists, and was condemned as a 'nationalist deviationist.' His removal provoked a schism in the \*Communist Party of Western Ukraine, resulting in the expulsion of its 'Shumskyist' majority from the Comintern in 1928. M. \*Volobuiev's analysis of Moscow's continuing colonialist exploitation

of Ukraine was also condemned as the 'economic foundation of Khvylovyism and Shumskyism.'

To undermine Ukrainization, between 1926 and 1928 over 36,000 'Shumskyists,' 'Khvylovyists,' and 'Trotskyists' were expelled from the CP(B)U. Khvylovy was forced to renounce his views, and \*Vaplite – the group of writers he led and influenced – was forced to dissolve in 1928. In 1928 a campaign against the 'nationalist deviations' of the Ukrainian Marxist school of history also began, led by M. \*Yavorsky. In 1930, 45 leading figures in Ukrainian scholarship, culture, and the UAOC were sentenced at the show trial of the \*Union for the Liberation of Ukraine and the Association of Ukrainian Youth, which were allegedly led by S. Yefremov, V. Durdukivsky, and V. Chekhivsky. Fifteen other alleged counterrevolutionary organizations were 'uncovered' during the Stalinist \*terror of the 1930s.

Towards the end of the 1920s, having defeated the various internal Party oppositions, J. \*Stalin consolidated his personal power. Under his rule the USSR became an increasingly Russocentric totalitarian state administered by an all-powerful, loyal, and ruthless bureaucracy and secret police – the \*GPU and \*NKVD. In December 1927, the 15th Party Congress approved the introduction of \*collectivization and the acceleration of industrialization and ushered in the First \*Five-Year Plan (1928–33). Private industry was abolished, all commerce was nationalized, the peasants were herded into \*collective farms, and impossible quotas for the delivery of grain and other foodstuffs to the state were imposed. Those who opposed these Draconian measures were deported to \*concentration camps if not killed outright, and hundreds of thousands of peasants were labeled \*kulaks and deported to Siberia or the Arctic.

During this undeclared but nonetheless real war against the Ukrainian nation, Moscow's henchmen V. Molotov and L. Kaganovich blamed the leaders of the CP(B)U for the collapse of agriculture and the failure of collectivization. After the harvest of 1932 was already in, armed Party brigades confiscated all peasant stock of food and grain. The resulting man-made \*famine and terror in the countryside caused the deaths of over 6 million people. The demographic and cultural consequences were colossal: the Ukrainian village, with its customs and traditions, ceased to exist.

This \*genocide succeeded in breaking the peasantry and thus the backbone of the Ukrainian nation and began an offensive to transform Ukrainian culture into a tool of the Russian-Soviet regime. To achieve this task, P. \*Postyshev was sent into Ukraine in January 1933 as the second CP(B)U secretary and de facto dictator of Ukraine. His arrival marked the beginning of the Great Terror in Ukraine, during which all Ukrainian cultural achievements were systematically destroyed. Ukrainization was officially abolished on 22 November 1933, and \*Russification in all sectors of Ukrainian life was pursued. In this war against the Ukrainian nation four-fifths of the Ukrainian cultural and intellectual elite perished. Seeing their nation ravaged by famine and terror, both Khvylovy and Mykola \*Skrypnyk, themselves persecuted, committed suicide in 1933.

Throughout the 1930s the CP(B)U was extensively purged of 'Ukrainizers' and hundreds of thousands of its members disappeared. Postyshev himself was removed in 1937 during the \*Yezhov terror, and in 1938 S. \*Kosior,

the CP(B)U first secretary (1928–38), was replaced: both were subsequently shot. In 1937, almost all the members of the CP(B)U Central Committee and Ukrainian government were liquidated, and the head of the government from 1934, P. \*Liubchenko, committed suicide. By the end of the 1930s the Ukrainian population was decimated and leaderless, its culture destroyed. In 1938, Stalin appointed two loyal servitors, N. \*Khrushchev and D. \*Korotchenko, to head the CP(B)U and the Ukrainian government.

*Western Ukraine under Poland.* In the years 1919–23 in \*Galicia, \*Podlachia, western \*Volhynia, western \*Polisia, and the \*Kholm, \*Lemko, and \*Sian regions, the Poles pursued a policy of denationalization, persecution, and repression. In 1919–20, 70,000 Ukrainians were imprisoned in concentration camps. The Galician Diet was abolished in 1920, as was Galician autonomy that had existed under Austrian rule since the late 1860s. The Ukrainian press was censored, and the Ukrainian chairs at Lviv University were closed down. The so-called \*Sokal border was created to prevent contact between the Galician organizations and institutions and their counterparts in the northwest regions (Volhynia, Polisia, Podlachia, and the Kholm region).

The founding meeting of the Ukrainian Military Organization in Prague, July 1920; sitting, from left: I. Andrukh, Ye. Konovalets, V. Kuchabsky; standing, from left: ?, M. Matchak, Ya. Chyzh

The Ukrainians in Galicia responded by creating the \*Lviv (Underground) Ukrainian University and a nationalist underground – the \*Ukrainian Military Organization (uvo) – and by boycotting the census of 1920 and the elections of 1922. The Ukrainians in the northwest regions did not boycott the elections, however, and sent 20 representatives to the Sejm and 5 to the Senate. In March 1923 the Conference of Ambassadors sanctioned Poland's annexation of Galicia and the ZUNR government in exile was dissolved. Consequently the Galician political parties changed their strategy and began seeking accommodation with and participation in the new regime.

In 1925 the centrist \*Ukrainian National Democratic Alliance (UNDO) was formed under D. Levytsky; until the Second World War it was the most popular and influential legal political party. After the Radical party was joined by Socialist Revolutionaries from Volhynia in 1926, it was renamed the Ukrainian Socialist Radical party (USRP).

The \*Ukrainian Social Democratic party (USDP), which was banned as communist in 1924, was revived in December 1929; neither it nor the \*Ukrainian Catholic People's party, formed in 1930, had much influence or support. Sovietophile tendencies were represented by the \*Ukrainian Party of Labor (1927–30) and the Ukrainian Peasants' and Workers' Socialist Alliance or \*Sel-Rob (1926–32), the front organization of the clandestine \*Communist Party of Western Ukraine (1923–38).

The uvo, led by Ye. \*Konovalets, engaged in acts of sabotage throughout the 1920s against the Polish government and landowners, as well as against Ukrainian 'collaborators' with the regime and Sovietophiles. From the mid-1920s, new, younger members, who were not veterans of the UHA or Ukrainian Sich Riflemen, were recruited into the thinning ranks, and in 1929 the conspiratorial \*Organization of Ukrainian Nationalists (OUN) was founded to take over its functions and to propagate a well-defined program and ideology of \*nationalism, much of it inspired by the writings of D. \*Dontsov. Konovalets became the leader of the OUN.

The Polish government maintained its anti-Ukrainian policies throughout the 1920s. In 1924 it banned the use of Ukrainian in state and self-government institutions and abolished unilingual Ukrainian schools (see \*Education). Throughout the 1920s it promoted the colonization of Western Ukraine by Poles. The influx of some 200,000 Poles into the villages and some 100,000 into the towns and cities heightened Ukrainian-Polish tensions.

During the 1928 Polish elections, 46 Ukrainians were elected to the Sejm and 13 to the Senate. The deputies and senators from the UNDO and USRP, in particular, defended Ukrainian interests, declaring that they stood for a pan-Ukrainian sovereign state. Despite the government's oppressive measures, Ukrainian cultural, scholarly, civic, and co-operative life continued to develop. In fall 1930 the Piłsudski government reacted to ongoing OUN activity with military and police \*pacification of Galicia. Ukrainian political, civic, and cultural figures were brutally beaten and tortured, Ukrainian institutional and private property was destroyed, and mass arrests occurred. This terror and intimidation affected the outcome of the 1930 elections: only 27 Ukrainians were elected to the Sejm and 5 to the Senate.

Polish oppression intensified in the 1930s. Municipal self-government was abolished in Galicia in 1933. Polisia and the Lemko and Kholm regions, in particular, were subjected to wholesale Polonization and forced conversion to Roman Catholicism. Hundreds of Ukrainian political prisoners were confined in the \*Bereza Kartuzka concentration camp established in 1934. In 1935 a new Polish constitution reduced the powers and composition of the Sejm and the Senate, and Poland became a virtual dictatorship. Attempts by the UNDO (led by V. Mudry) at seeking the \*normalization of Ukrainian-Polish relations proved unsuccessful because of Polish chauvinistic attitudes and discrimination, the regime's repressiveness, the revolutionary militancy of the OUN, and the uncompromising attitude of the \*Front of National Unity, the \*Union of Ukrainian Women, and other Ukrainian organizations and political parties.

*Ukrainian territories under Rumanian rule.* From November 1918, Ukrainians of Bukovyna, Bessarabia, and part of the Muramureş region came under Rumanian rule. Opposition to the regime was manifested by the \*Khotyn

uprising of 1919 and the Tatarbunary uprising of 1924. The greatest national persecution occurred in \*Bukovyna, where repressive military rule lasted until 1928. The Ukrainian chairs at Chernivtsi University and most Ukrainian organizations were abolished, the Ukrainian press was forbidden, and Rumanianization of the Ukrainian Orthodox church was systematically pursued. In 1922 instruction in Ukrainian was abolished in almost all schools. To facilitate the Rumanianization of education, a 1924 law proclaimed Ukrainians to be Rumanians who had forgotten their mother tongue.

Conditions improved somewhat in 1927, and the populist \*Ukrainian National party (UNP), headed by V. Zalizetsky-Sas, was founded to defend Ukrainian interests in parliament as best it could. Despite the regime's oppression, Ukrainian cultural, community, and student organizations in Bukovyna remained active and several periodicals were published, including the daily \**Chas* (1928–40). Teaching in Ukrainian was allowed from 1931 to 1933.

In the 1930s, the underground OUN gained a large following among Bukovyna's students and peasants. The Nationalists published the monthly \**Samostiina dumka* (1931–7) and the weekly \**Samostiinist*' (1934–7). In 1938 all Ukrainian political parties were outlawed, and thereafter all manifestations of Ukrainian organized life were persecuted by the royal dictatorship.

The League of Ukrainian Nationalists in Prague; sitting, from left: M. Stsiborsky, M. Tobilevych, T. Pasichnyk-Tarnavsky, L. Kostariv, M. Zahryvny; standing, from left: Yu. Rudenko, Yu. Artiushenko, D. Pasichnyk, R. Myniv, D. Demchuk, O. Chekhivsky, K. Dudariv

*Ukrainian territories under Czechoslovak rule.* In 1919 the Ukrainians of Transcarpathia elected to be part of the new Czechoslovak Republic (see \*Central Ruthenian People's Council and \*American National Council of Uhro-Rusins), and the official region of \*Subcarpathian Ruthenia was created, leaving the Prešov region as part of Slovakia. It was governed by J. Brejcha and a five-man \*Directory of Subcarpathian Ruthenia (1919–20). The central government approved the use of the local language in education and other official activities. Consequently the struggle between the Ukrainophile-Populist and Russophile camps over the unresolved language question

and national identity intensified. The Populists, led by Rev A. \*Voloshyn and M. and Yu. \*Brashchaiko, founded the \*Ruthenian Agrarian party and the \*Prosvita society, co-operatives, publishing houses, periodicals, and the \*Plast scouting organization. The Russophiles set up their own parties, the \*Dukhnovych Society, and other rival counterparts.

Seeing that the 'Ruthenians' were divided and mistrusting the Russophiles and Magyarophiles in particular, the central government did not move on the demands to create a local diet or institute autonomy in the region. Governor A. Beskyd, a Russophile, purged the administration of Ukrainians, and he and Vice-governor A. Rozsypal did much to discredit Ukrainians in the eyes of the central government.

In 1928 Subcarpathian Ruthenia became the fourth province of the Czechoslovak republic with its capital in Uzhhorod. In the 1930s many Ukrainians became Sovietophile Communists or radical nationalists in reaction to Prague's refusal to grant autonomy to the region and its support of the Russophiles, the policies of the chauvinistic Czech bureaucracy, and the effects of the depression (chronic unemployment, rural poverty, hunger).

Under the influence of the Ukrainian movement, demands for autonomy grew, but the Czech government, preoccupied with the Sudeten German crisis, deferred its implementation. After the Munich Agreement on 11 October 1938 Prague was forced to allow the creation of an autonomous Subcarpathian Ruthenian government headed by A. \*Brodii and, from 26 October, A. Voloshyn. The Ukrainian movement strove to form a Carpatho-Ukrainian state incorporating the Prešov region and federated with the Czechs and the Slovaks, while most of the Russophiles supported union with Hungary. On 2 November southern Transcarpathia (including Uzhhorod, Mukachiv, and Berehove) was ceded to Hungary. Despite this loss, the Ukrainians took to building an autonomous \*Carpatho-Ukraine with the aid of Galician and Bukovynian émigrés and material support from the overseas emigration. The school system was Ukrainianized, and a paramilitary force – the \*Carpathian Sich – was created with OUN assistance. Elections to the \*Diet of Carpatho-Ukraine were held on 12 February 1939 in which the \*Ukrainian National Alliance of political parties received 86.1 percent of the vote.

The new government had to contend with Polish and Hungarian border incursions and friction with Prague, culminating in a battle between the Carpathian Sich and Czech troops under Gen L. Prchala on 14 March. In Khust on 15 March the diet proclaimed Carpatho-Ukrainian independence, ratified a constitution, elected A. Voloshyn president of the state, and confirmed a new government under Premier Yu. Revai. At that very moment Hungarian forces invaded Carpatho-Ukraine and the president and part of the government fled to Rumania.

*The Ukrainian political émigrés in Europe.* After the demise of the UNR, most of its government and army and many political and cultural figures sought refuge in Central and Western Europe. \*Prague, \*Warsaw, \*Vienna, \*Berlin, and \*Paris became the major émigré centers, and small communities were established in \*Geneva, \*London, Louvain, \*Rome, \*Zagreb, \*Bucharest, \*Sofia, and Helsinki. Several political parties remained active in the emigration: the USDWP, the UPSR, the UPSF (renamed the Ukrainian Radical Democratic party), and the \*Ukrainian

Commander D. Klypush with soldiers of the Carpathian Sich

Union of Agrarians-Statists. By the late 1920s the socialists, liberals, and conservatives had been largely eclipsed in the emigration, as in Galicia, by the radical nationalists of the UVO and OUN.

The \*Government-in-exile of the UNR was active throughout the interwar years. The heads of its Directory were S. Petliura (1920–6), A. Livytsky (1926–39), and V. Prokopovych (1939–40). Until the early 1920s the Government-in-exile relied on the UNR diplomatic missions created in 1918–19 to lobby the Western governments.

**Ukraine during the Second World War.** The secret \*Molotov-Ribbentrop Pact of 23 August 1939 divided Eastern Europe between Nazi \*Germany and the USSR. On 1 September Germany invaded Poland, thereby beginning the Second World War, and soon it occupied Podlachia, the Kholm and Lemko regions, and Galicia west of the Sokal-Lviv-Stryi line. The Western Ukrainians offered a measured welcome to the Germans believing they would prove to be their liberators from Polish oppression. A 600-man unit consisting of OUN and Carpathian Sich members served as the intermediary between the population and the advancing German army until the end of September 1939.

In its occupied territories the Germans created the so-called \*Generalgouvernement (GG) of Poland. When the Soviet armies began occupying Western Ukraine east of the Sian and Buh rivers, some 20,000 refugees fled to the GG; in 1940 they were joined by refugees from Bukovyna. There, between November 1939 and April 1940, OUN leaders organized a civic umbrella organization, and in June 1940 this \*Ukrainian Central Committee (UCC), headed by V. \*Kubijovyč, was sanctioned by the German authorities.

Although most of the leaders of the Western Ukrainian parties had fled to the GG, conditions there prevented them from engaging openly in political activity. Only the OUN, headed by R. Sushko, was tolerated initially by the Germans because of its prewar anti-Polish activity. In February 1940 the OUN split into two factions – one supporting the strategy and tactics of the émigré leadership, headed since August 1939 by A. \*Melnik, and the other supporting the positions of those who had directed the revolutionary struggle against the Poles in Western Ukraine, headed by S. \*Bandera. In June 1941, on the eve of the German-Soviet War, both factions tried to consolidate the existing Ukrainian political forces in order to lead them in a war against the USSR and thereby establish an independent Ukraine.

Between 17 and 23 September 1939 the Soviets occu-

ried Western Volhynia and Galicia. Soviet-style elections to a \*People's Assembly of Western Ukraine were held on 22 October. After the assembly 'requested the reunification of Western Ukraine with the Ukrainian SSR,' a policy of wholesale Sovietization was introduced, accompanied by the mass arrests of Ukrainian leaders who had not managed to flee and the suppression of all Ukrainian national institutions and organizations. With the Soviet occupation, Polish domination of state and administrative institutions ceased, and Ukrainians flooded into the towns and began Ukrainianizing them. These changes, however, did not compensate for the general anti-Ukrainian Soviet oppression and terror that ensued. The Soviet authorities also deported many Polish colonists and Jews to the east.

The USSR occupied Rumanian-held northern Bukovyna and Bessarabia on 28 June 1940, and on 2 August they were officially incorporated into the USSR. The changes that ensued there were analogous to those in Western Ukraine, and Ukrainian replaced Rumanian as the official language.

The German invasion of the USSR on 22 June 1941 revealed Soviet weaknesses and the lack of popular support for the Soviet regime, especially in Ukraine. Many Soviet soldiers deserted, many more surrendered en masse, and the Germans rapidly advanced eastwards, occupying practically all of Ukraine by the end of 1941. Caught unprepared, the Soviets retreated in a disorganized fashion beyond the Urals. The NKVD executed about 15,000 Ukrainian political prisoners in Lviv, Zolochiv, Rivne, Lutske, Kiev, Kharkiv, and elsewhere. Taking advantage of the German halt on the Dnieper, Soviet authorities destroyed industrial and government buildings, food reserves, and railroads. Berdychiv, central Kiev (including Khreshchatyk), most of Kharkiv, and the Dnieper Hydroelectric Station were blown up, mines in the Donbas were flooded, and Ukraine generally suffered considerably as a result of this evacuation.

At the outset of the war, the government of the Ukrainian SSR and many institutes of the Academy of Sciences were evacuated to Ufa. For the next few years, in an attempt to gain popular support, some concessions were made to Ukrainian patriotism, including the publication of more objective accounts of Ukrainian history and more Ukrainian-language works in general.

Galicia became a GG district on 1 August 1941; most of Ukraine became part of the \*Reichskommissariat Ukraine on 20 August. Rumania reoccupied northern Bukovyna, part of Bessarabia, and \*Transnistria on 19 August; and Transcarpathia remained under Hungarian rule. Throughout Ukraine anti-German resistance grew when the Nazis began implementing their racial and economic policies. Before the invasion, the OUN Bandera faction had organized \*Legions of Ukrainian Nationalists (Nachtigal and Rolland) to fight against the Bolsheviks, and during the invasion both OUN factions sent expeditionary groups composed of Western Ukrainians and émigrés into central and eastern Ukraine to rebuild Ukrainian political and cultural life there.

On 30 June 1941, the Bandera faction issued the \*Proclamation of Ukrainian statehood in Lviv and formed the \*Ukrainian State Administration headed by Ya. \*Stetsko. In early July, however, the Germans arrested the administration's members and proceeded to suppress the Bandera faction and to send its members to concentration camps.

Another \*Ukrainian National Council had been created in Lviv in July 1941 under the aegis of Metropolitan A. \*Sheptytsky and headed by K. Levytsky; it represented the Ukrainians before the German authorities and strongly protested the incorporation of Galicia into the GG until it was banned in March 1942. In September 1941 the Germans allowed the \*Ukrainian Regional Committee, headed by K. Pankivsky, to function as an umbrella body; in March 1942 its functions were taken over by the UCC in Cracow and Pankivsky became V. Kubijovyč's right hand.

On 19 September the Germans occupied Kiev. In October O. Olzhych and other Melnyk faction members formed a \*Ukrainian National Council under M. Velychivsky there as the Ukrainian political-civic center. In December the Germans suppressed the council, arrested the leading nationalists (including O. and M. Teliha, I. Rohach, I. Irlivsky, and O. Chemyrsky), whom they executed in February 1942, and forced the Melnyk faction to go underground.

The larger part of Ukraine – the Reichskommissariat Ukraine – was under the tyrannous rule of E. \*Koch. Based in Rivne, he pursued a policy of terror and extreme exploitation of the population, which was deemed sub-human. The Germans retained the Soviet collective farm system there until 1943, forbade private trade (except for local markets and co-operatives), and generally took as much food and raw materials from Ukraine as they could. Most cultural institutions and organizations were soon suppressed, and only four-year primary schools were allowed to function. The press (about 115 periodicals) was German-run or strictly controlled. Although the UAC was tolerated, the Germans favored the Autonomous Orthodox church subordinated to the Moscow patriarch.

During the German occupation, 6.8 million people were killed in Ukraine, of whom 600,000 were Jews and 1.4 million were Soviet military personnel killed at the front or starved to death in prisoner-of-war camps. From February 1942, more than 2 million Ukrainians were deported as slave laborers to Germany (see \**Ostarbeiter*). Nazi destruction and terror in Ukraine provoked general hostility and gave rise to political and military resistance. National partisans in Volhynia had organized the so-called \*Polisian Sich, renamed the \*Ukrainian Insurgent Army (UPA), under the command of T. \*Borovets (Bulba) to fight the retreating Soviet army after the invasion. From the spring of 1942 they were fighting both the Germans and \*Soviet partisans in Ukraine. From the middle of 1942 both OUN factions also had functioning guerrilla units throughout Ukraine.

After the Germans' defeat at Stalingrad in January 1943, armed resistance in Ukraine increased significantly. The Bandera-faction partisans built up their forces, disarmed the partisans supporting Borovets and the Melnyk faction, and took the name of the UPA for their own partisan units, which were under the command of R. \*Shukhevych. Having forced the Germans to abandon the Volhynian countryside, in May 1943 the UPA expanded into Galicia to defeat the Soviet-partisan offensive under S. \*Kovpak and to continue fighting the Germans as well as the guerrillas of the \*Polish Home Army. In July 1944 the UPA commanders initiated the creation of the \*Ukrainian Supreme Liberation Council as the political leadership of the pan-Ukrainian national underground, which continued its struggle against Communist rule and

Volunteers for the Division Galizien leaving for training camps, Lviv 1943

oppression until the 1950s and propagated a democratic program adopted by the Bandera faction in 1943.

By mid-1943, the Soviet offensive forced the Germans to begin their retreat from Ukraine. In Left-Bank Ukraine the Germans engaged in wholesale destruction, ruining Dnipropetrovske, Poltava, Kremenchuk, Kiev, and other cities. By spring 1944 the front was in Western Ukraine, and in July the \*Division Galizien, a Ukrainian formation in the German armed forces created in 1943 and conceived by the Ukrainian organizers as the nucleus of the future army in an independent Ukraine, was largely destroyed at the Battle of \*Brody. By the end of October 1944, all Ukrainian territory was again in Soviet hands.

In autumn 1944, when almost all of Ukraine had been reoccupied by the USSR, the Germans began changing their attitude to the Ukrainian question and released political leaders, including Bandera, Melnyk, Stetsko, and Borovets, from concentration camps. In March 1945 they recognized the \*Ukrainian National Committee (UNC) under the leadership of Gen P. Shandruk, V. Kubijovyč, and O. Semenko as the representative body of the Ukrainians in the Third Reich. The UNC, however, was unable to do much apart from saving the remnants of the Division Galizien and uniting them with other Ukrainian formations in the German military (eg, the \*Ukrainian Liberation Army) to create a \*Ukrainian National Army, which surrendered to the British after Germany capitulated.

(See \*Bessarabia, \*Bukovyna, \*Transcarpathia, and \*Transnistria for an account of wartime Hungarian and Rumanian occupations.)

#### Postwar Ukraine

*The Stalin period.* Throughout the war, the Soviet propaganda machine used German excesses and atrocities to its advantage while propagating the idea of the 'Great Patriotic War against fascist aggression.' It also attracted sympathy for the Soviet cause among the Ukrainians by focusing on developments on the 'Ukrainian fronts' and fostered antipathy for the UPA and OUN by portraying them as Nazi collaborators. Pro-Soviet sympathy increased after the Soviet constitution was modified in February 1944, granting Ukraine the right to have direct relations with other countries and its own republican military formations; and again in April 1945 after the Western powers acceded to Moscow's demand that Soviet Ukraine be recognized as an independent state and a founding member of the United Nations at the San Francisco Conference. (See also \*International legal sta-

tus of Ukraine and \*International organizations.) Meanwhile Soviet terror mounted against the nationalist enemies of the USSR in Ukraine and in Soviet-occupied Europe, as well as against other 'traitors' – Soviet soldiers who had surrendered to the Germans and Soviet citizens who were *Ostarbeiter*.

After the war, major territorial and population changes occurred in Ukraine. On 29 June 1945, Czechoslovakia ceded Carpatho-Ukraine to the USSR. On 16 August the Polish-Soviet border was established, leaving some Ukrainian ethnic territories in Poland. The Rumanian-Soviet border was confirmed in the \*Paris peace treaties of 1947 as the one created in June 1940. As a result of the war, the population of Ukraine had declined by some 10.5 million (25 percent): 6.8 million had been killed or died of hunger or disease, and the remainder consisted of those who had been evacuated or deported as political prisoners to Soviet Asia and remained there and those who had been slave laborers and émigrés in the Third Reich and chose to remain in the West as \*displaced persons. The \*national composition of Ukraine's population changed radically during the war. Most Jews had been annihilated during the Nazi Holocaust, and most Germans who had lived in Ukraine retreated with the German army. After the war, in 1945–7 over 800,000 Poles living in Western Ukraine were resettled in Poland, and over 500,000 Ukrainians living in Poland's eastern borderlands were resettled in Ukraine (see \*Resettlement). There also occurred a large in-migration of Russians into Ukrainian towns and cities, including those of Western Ukraine, and a new period of \*Russification began. In the immediate postwar years thousands of Ukrainians, mainly in Western Ukraine, were tried for their political or religious activity and sent to \*concentration camps. About 1.3 million slave laborers in Germany were subjected to forcible \*repatriation to Ukraine; because they had had contact with the non-Soviet world, 300,000 of them were deported to Siberia, while the rest underwent political re-education.

The most pressing task faced by the Soviet regime was the reconstruction of the economy, which had been devastated during the war: 16,000 industrial enterprises, 2,000 railway stations, 28,000 collective farms, 872 state farms, 714 towns and cities, 28,000 villages, and 2 million buildings had been destroyed; 10 million people had been left homeless. More than 12 million t of agricultural products, over 14 million head of cattle and sheep, and a large amount of agricultural machinery had been taken to Germany. The Fourth Five-Year Plan (1946–50) allotted 20 percent of Soviet capital investment for the reconstruction of Ukraine; over 2,000 plants and the electric power system were rebuilt and expanded, and the natural gas industry was developed in Western Ukraine. Agriculture was revived more slowly, because of the opposition to \*collectivization in Western Ukraine, the lack of farm machinery, population dislocation, a drought in 1946, and a famine in 1946–7.

The \*Council of Ministers (CM) of the Ukrainian SSR replaced the Council of People's Commissars as the government in March 1946, and the CP(B)U first secretary from 1938, N. Khrushchev, also became its first chairman. Moscow replaced him as first secretary in March 1947 with L. Kaganovich, who proceeded to purge 'nationalists' from the ranks of the Ukrainian cultural intelligentsia. In December 1947, however, Khrushchev

was again appointed first secretary only to be replaced in December 1949 by L. \*Melnikov, who in 1949–52 had 22,175 members (3 percent) of the CP(B)U expelled for 'nationalism.' From 1947 to 1954 the CM chairman was D. \*Korotchenko.

During the years that A. \*Zhdanov and his ideas dominated Soviet cultural policy (1946–53), the few Ukrainian cultural and scholarly achievements of the Second World War were condemned as 'bourgeois nationalist' and suppressed. Members of various scholarly institutes and journal editorial boards were removed; works by prominent writers (eg, Yu. Yanovsky, V. Sosiura, A. Malysheko, O. Dovzhenko) who were praised for their national patriotism during the war were criticized; and books on Ukrainian history and literature published during the war were condemned and removed from circulation. Cultural and linguistic Russification was stepped up, particularly in newly annexed Western Ukraine.

An UPA detachment celebrating Easter in the forest, 1946

The greatest repression during the last years of the Stalin period took place in Western Ukraine and was directed against OUN, UPA, and Division Galizien members and the Ukrainian Catholic church (see \*Church, history ...). In 1946, at the \*Synod of Lviv, the Church Union of Berestia of 1596 was formally abolished against a background of terror directed at the Ukrainian Catholic hierarchy and clergy.

*The postwar émigrés.* After the war over 200,000 Ukrainian \*displaced persons in the Allied zones of Germany and Austria chose not to return to the USSR for political reasons. From 1947 to 1952 the vast majority immigrated to the \*United States, \*Canada, \*Australia, \*Great Britain, \*France, \*Belgium, \*Brazil, and \*Argentina (see also \*Emigration). Most prewar émigré and Western Ukrainian organizations, institutions, and parties were reactivated, and new parties were formed. Except for the Hetmanites, the parties co-operated from June 1948 in the new \*Ukrainian National Council of the Government-in-exile of the UNR. The Foreign Representation of the \*Ukrainian Supreme Liberation Council, founded in 1944, also promoted the Ukrainian national cause in the West. In 1967 a new body, the \*World Congress of Free Ukrainians, was established to co-ordinate the civic and cultural activities of the Ukrainian emigration.

*De-Stalinization in Ukraine, 1953–9.* After Stalin died on 5 March 1953, a slow liberalization and decentralization

process began in the USSR. The campaign against Ukrainian nationalism and Zionism subsided and in June 1953 Melnikov was accused of excessive Russification and replaced as CPU first secretary by O. \*Kyrychenko, the first Ukrainian to occupy the post since 1922.

To gain the Ukrainians' support, the new Soviet leadership under Khrushchev honored the tricentenary of the Pereiaslav Treaty and the 'reunification' of the Ukrainian and Russian peoples in 1954 by transferring the \*Crimea from the RSFSR to Ukraine.

Ukrainian representation in leading Party and government positions was increased; thus by 1 June 1954, 72 percent of the CPU Central Committee, 75 percent of the Supreme Council of the Ukrainian SSR, and 51 percent of the directors of large industrial enterprises were Ukrainian.

After the war, thousands of Western Ukrainian community leaders, OUN and UPA members, and Ukrainian Catholic clergy and faithful were sent to Soviet \*concentration camps, where they were subjected to arbitrarily harsh and inhumane treatment. They responded by organizing labor \*strikes, which were brutally and ruthlessly suppressed. Hundreds of Ukrainians were thus killed in the camps of Vorkuta and Norilsk in the Soviet Arctic in 1953 and Kingir, Kazakhstan, in 1954. The mass unrest, coupled with widespread expectations of change after Stalin's death, prompted the Soviet government to declare a political amnesty on 18 September 1955, and in 1956 many Ukrainians were released.

From 1955, descriptions of and protests against the excesses of the Soviet regime, concerning especially the oppression of the Ukrainian nation, were circulated by way of unofficial, uncensored documents and writings (\*samvydav). The first such document was the 'Open Letter to the UNR' from Ukrainian political prisoners in the Mordovian camps. The Ukrainian intelligentsia and students began demanding cultural and intellectual freedom and social change. At the same time the crimes of the Stalin 'personality cult' were officially condemned by Khrushchev at the 20th CPSU Congress in 1956, and the Party officially adopted a policy of de-Stalinization. During the cultural 'thaw' that followed and until 1959, the Ukrainian intelligentsia fought for and achieved a relaxation of censorship and educational, cultural, and \*language policy, and the \*'rehabilitation' of many Ukrainian cultural figures and intellectuals banned or destroyed during the Terror.

The regime made other concessions to the Ukrainians. It lowered taxes, allowed peasants more freedom in using their private plots of land, and improved food supplies in the cities. A republican Ministry of Higher Education, \*Academy of Construction and Architecture of the Ukrainian SSR, \*Ukrainian Academy of Agricultural Sciences, and Union of Journalists of Ukraine were established. Economic decentralization was carried out, and the Ukrainian government assumed control of 10,000 industrial enterprises. Official attitudes towards religion hardened, however, and by 1961 a renewed \*antireligious propaganda campaign had resulted in the liquidation of about half of all existing religious institutions: parishes, monasteries, seminaries.

Hopes that the liberalization would continue were dashed in 1958, when Khrushchev made the teaching of non-Russian languages optional in Russian schools in Ukraine and propaganda in favor of the Russian lan-

guage was stepped up. In 1957 M. \*Pidhorny had replaced Kyrychenko as first secretary. In 1959 A. \*Skaba was given the task of tightening Party control over ideological work in Ukraine, and a new campaign against 'bourgeois nationalism' and 'Zionism' began.

*Ukraine in the 1960s.* Despite the regime's efforts to the contrary, the 'thaw' radicalized an entire postwar generation and inspired it to continue demanding changes in cultural and nationality policy and criticizing Russification and the 'fusion of nations' concept in the 1961 CPSU program. The foremost representatives of this new generation of the 1960s – the \*Shestydesiatnyky writers, publicists, and artists – called for a return to truth, which brought them into conflict with the older generation of writers and officials who had risen under Stalin. In 1962 the Party decided that dissent had to be stopped, and in 1963 the Shestydesiatnyky and their ideas were publicly denounced. The intimidation and persecution silenced some of them, but others became more politicized and actively participated in the \*dissident movement that erupted and continued throughout the 1960s. It was expressed in the form of petitions, protests, demonstrations, samvydav literature, workers' strikes, and even illegal political groups with secessionist programs.

In 1965 the first wave of arrests of Ukrainian dissidents (B. and M. Horyn, I. Hel, P. Zalyvakha, S. Karavansky, V. Moroz, M. Osadchy, A. Shevchuk, and others) took place, and the first major analytical dissident document – I. Dziuba's *Internationalism or Russification?* – was written. V. Chornovil distributed a commentary on the political trials of 20 dissidents, for which he himself was imprisoned in 1967–9.

From 1963 to 1972 P. \*Shelest was the CPU first secretary. He defended the economic interests of Ukraine, and sided with the critics of Russification and the defenders of Ukrainian culture and language who spoke out at the Fifth Congress of the Writers' Union of Ukraine in 1966. Under Shelest a new variant of 'Ukrainization' was promoted: teaching in Ukrainian in institutions of higher education was expanded; more books in Ukrainian (including \*encyclopedias) were published; the study of Ukrainian history was encouraged and new historical journals appeared; and the press published many articles of a patriotic nature.

*Ukraine in the 1970s and 1980s.* In 1964 L. \*Brezhnev replaced Khrushchev and reasserted Moscow's centralist and Russification policies. Under him the \*KGB resolutely persecuted the dissident movement throughout the USSR. In Ukraine this persecution culminated in a second wave of arrests in 1972. That same year Shelest was replaced by the more subservient V. \*Shcherbytsky. Since that time Shcherbytsky has remained firmly in control in Ukraine and has followed Moscow's directives, purging the AN URSR institutes of archeology, history, literature, and philosophy in 1973, suppressing the \*Ukrainian Helsinki Group and any other manifestations of political or religious dissent, and implementing Russification policies in education and scholarship. Leadership changes in Moscow since Brezhnev's death in 1982 have not fundamentally altered this course. (See \*Ukrainian SSR.)

O. Subtelny, A. Zhukovsky

**Hitler, Adolf**, b 20 April 1889 in Braunau am Inn, Austria, d 30 April 1945 in Berlin. German dictator, founder and leader of National Socialism. In his youth Hitler absorbed the anti-Semitic and anti-Slavic prejudices of such Viennese political extremists as G. von Schönerer, leader of the Pan-German Nationalist party, and K. Lügner, leader of the Christian Socialist party. These views hardened into fanatical nationalism after Germany's defeat in the First World War. In 1921 Hitler became leader of the Nazi party. Imprisoned after an abortive putsch in 1923, he wrote the programmatic *Mein Kampf* (1925-6), in which he proclaimed his fundamental goals: to establish the dominance of the Aryan race by destroying the 'Jewish enslavers' and building a powerful German state, and to transform Russia and its dependencies into *Lebensraum* for German colonists. The Slavs, whom Hitler considered subhuman, would be enserfed or exterminated. The political crisis resulting from the depression brought Hitler to power as chancellor in 1933. He soon consolidated his dictatorship and began planning for war. In 1939 he secured Hungary's support by allowing it to overrun Carpatho-Ukraine. After the German invasion of the USSR Hitler incorporated Galicia into the \*Generalgouvernement, allowed Romania to take over a large part of southwestern Ukraine (Transnistria), and called for the complete German colonization of Ukraine over a 20-year period. Rejecting A. Rosenberg's concept of a Ukrainian puppet regime, Hitler appointed E. \*Koch *Reichskommissar* of Ukraine and, at conferences held at Koch's field headquarters near Vinnytsia on 22 July 1942 and 19 May 1943, gave his full support to Koch's ruthless policies. Hitler insisted that the Ukrainian population be reduced by official encouragement of abortion and contraception, as well as by the denial of health care. Ukrainians were to be given only rudimentary education in order to make them obedient slaves. The prospect of defeat did not change Hitler's views: convinced that Ukrainians were unreliable, in late March 1945 he ordered the \*Division Galizien to be disarmed. As Soviet troops entered Berlin, he committed suicide.

**Hiunivka kurhans.** A burial site of the Bronze and early Iron ages near Hiunivka, Kamianka-Dniprovske raion, Zaporizhia oblast. Excavations carried out in 1976-7 uncovered 21 kurhans, 18 of which were built by the Scythians in the 4th-3rd century BC. The largest kurhan, known as Vyshneva Mohyla, contained many artifacts, including over 400 golden ornaments.

**Hladenko, Ivan**, b 3 October 1915 in Annivka, Lebedyn county, Kharkiv gubernia. Veterinarian; since 1975 member of the All-Ukraine Academy of Agricultural Sciences. A graduate of the Kharkiv Veterinary Institute (1938), he worked as a research associate at the Ukrainian Scientific Research Institute of Experimental Veterinary Medicine and in 1957 was appointed director of the institute. His publications deal with veterinary pharmacology and toxicology.

**Hladky, Hryts** [Hladkyj, Hryc'], b 19 January 1893 in Chernykhivtsi, Zbarazh county, Galicia, d 14 September 1936 in Lviv. Political leader and journalist. He participated in the wars for Ukraine's independence as a captain of the UNR Army and chief of the chancellery of the Sich Rifleman Corps. After the war he was active in politics as organizer for the Ukrainian Radical party in the Lviv region. In 1922 he moved to Lutske where he helped found the Ukrainian Bank, edited a local paper, *Ukrains'ke zhyttia*, and assisted M. Cherkavsky in publishing *Ukrains'ka hromada*. Rejecting his party's election strategy, he joined the Ukrainian National Democratic Alliance (UNDO) in 1928 and returned to Lviv where he became editor of UNDO's newspaper *Svoboda*, chief of its national office, and chairman of the party's Lviv regional organization. Hladky committed suicide.

**Hladky, Matvii** [Hladkyj, Matvij], b ?, d May 1652. Colonel of Myrhorod Regiment (1648 or 1649–April 1652) and military leader in Hetman B. Khmelnytsky's army during the Cossack-Polish War 1648–54. Hladky took part in the battles of Korsun and Pyliavtsi in 1648 and in the siege of Zbarazh in 1649. In autumn 1648 he assumed command of Cossack forces fighting the army of the Lithuanian nobility in Belorussia. When the Tatars temporarily captured Khmelnytsky during the Battle of Berestechko (1651), he fulfilled the duties of hetman and acquired the reputation of being an excellent commander. After the Treaty of Bila Tserkva (1651) restored the privileges of the Polish nobles, he opposed the advance of the Polish army into Left-Bank Ukraine. According to the Samovydet's Chronicle, Hladky aspired to become hetman and was executed on the orders of Khmelnytsky.

**Hladky, Yaroslav** [Hladkyj, Jaroslav], b 16 May 1908 in Rohatyn, Galicia. Community and scout leader. Hladky was an executive member of Plast, the Ukrainian Scouting organization, from 1928. From 1930 to 1939 he headed Plast during its illegal existence in interwar Galicia under Poland and edited its ideological journal *Vohni*. In Western Europe and then the United States after the Second World War, he was the supreme commander (1945–54) of the boy scouts in Plast, head of the Plast world executive (1954–8, 1962–6), and head of the organization's world council (1973–82).

**Hladky, Yosyp** [Hladkyj, Josyp], b 1789 in Melnyky, Zhytomyr voivodeship, d 17 July 1866 in Oleksandriivske (now Zaporozhia). The last otaman of the \*Danubian Sich, elected in 1827. During the Russo-Turkish War, he and a group of 1,500 Danube Cossacks joined the Russian side in May 1828 at Izmail. In revenge the Turks destroyed the Sich and scattered the remaining inhabitants. Hladky and his followers were settled between Berdianske and Mariupol, where they founded the \*Azov Cossack Host; Hladky was made acting otaman of the host in 1832. In 1853 he retired with the rank of major general.

**Hladylovych, Demian** [Hladylovyč, Dem'jan], b 1846, d 28 January 1892. Galician civic leader. He was head of the Shevchenko Society in Lviv and one of the founders of the \*Dnister society and the newspaper \**Dilo*. He administered *Dilo* for many years and was instrumental in turning it into the foremost Ukrainian daily in Galicia.

**Hladylovych, Ivan** [Hladylovyč], 1901–1945. Political leader and journalist in Galicia. In the 1920s Hladylovych was active in the Ukrainian Catholic student movement and one of the leaders of the Union of Hetmanists-Statists, serving as editor of their organ *Khliborobs'kyi shliakh* (1932–). From the mid-1930s he was a leader of the \*Front of National Unity, coediting its newspaper *Ukrains'ki visti* in Lviv.

**Hlaváček, František**, b 26 November 1876 in Slavkov, Moravia, d 1974. Czech journalist, political and civic leader. He was the first translator into Czech of such Ukrainian writers as I. Franko, B. Hrinchenko, D. Mordovets, M. Vovchok, Lesia Ukrainka, and V. Hnatiuk, and the author of the first Czech study of I. Franko. At the end of the 19th century he published in the Czech press dozens of articles on Ukrainian affairs. His large study of T. Shevchenko appeared in *Národní Listy* in 1939. After the war his articles in the field of Ukrainian studies and his memoirs and correspondence with Ukrainian cultural figures were printed in Ukrainian journals and scholarly collections published in Kiev, Lviv, Prešov, Novi Sad, and Toronto.

**Hlevakha** [Hlevaxa]. III-11. Town smt (1977 pop 9,400) southwest of Kiev in Vasylykiv raion, Kiev oblast. Hlevakha was founded as a village in the second half of the 16th century. Battles for the control of Kiev took place there between units of the UNR Army, the Ukrainian Galician Army (UHA), and Otaman D. Zeleny and those of the Bolshevik and White Russian forces. On 29 August 1919, after a three-day battle, the First and Third Corps of the UHA and the Zaporozhian Corps of the UNR Army broke through the Bolshevik front during their advance on Kiev. Today it contains an experimental biology station of the AN URSR, and several scientific-research institutes.

**Hlevakha kurhan**. A large burial mound of the 6th century BC near Hlevakha, Kiev oblast. Excavations of the 12-m-high kurhan in 1950 uncovered a large, wood-paneled burial chamber containing the remains of a Scythian warrior (possibly a tribal chieftain) and of a ritually executed woman. The most notable find was a large black-glazed vessel with gold appliqué.

**Hlianko, Fedir** [Hljan'ko], b 15 September 1879 in Slavhorodske, Vovchanske county, Kharkiv gubernia, d 21 April 1955 in Fort Wayne, Indiana. One of the pioneers of the Ukrainian movement among the workers of Kharkiv. Before the revolution he worked with H. \*Khotkevych in Kharkiv organizing Ukrainian workers and cofounding the Ukrainian workers' theater. He was elected to the Central Rada in 1917 and was a delegate to the Labor Congress in 1919. He was an active member of the Ukrainian Autocephalous Orthodox church and was imprisoned by Soviet authorities. He left the USSR during the Second World War, and in 1950 immigrated to the United States.

**Hlib Volodymyrovych** [Hlib Volodymyrovyč], ca 984–1015. Saint and prince. One of 12 sons of \*Volodymyr the Great, in 987–9 he received from his father the city of Murom. During the internecine struggle for the throne of the Kievan grand prince after Volodymyr's death (1015) Hlib and his brother Borys were killed in 1015 on the

orders of their older brother Sviatopolk – Hlib near Smolensk and Borys near Pereiaslav. In 1019, the bodies were ordered exhumed by their brother \*Yaroslav the Wise, brought to Vyshhorod, and buried there in St Basil's Church. Soon afterwards, both brothers were canonized by the Orthodox church. According to O. Pritsak (*The Origin of Rus'*, vol 1, 1981) the canonization was probably promoted by the new grand prince, Yaroslav, for the purpose of legitimizing his rule and investing his dynasty with prestige and honor. For centuries, ss Borys and Hlib were greatly revered by the common people.

**Hlib Yuriievych** [Hlib Jurijevyč], ?–1171. Prince of Pereiaslav (1155–69) and Kiev (1169–71); son of \*Yurii Dolgorukii of Suzdal and grandson of Volodymyr Monomakh. He took part in the campaigns of his father against Grand Prince \*Iziaslav Mstyslavych in 1147–8. After Yurii's defeat in 1151, Hlib was allowed to keep Pereiaslav, but soon after was given Horodets (now Oster) instead. He was returned Pereiaslav after Prince Iziaslav Davydovych of Chernihiv occupied the Kievan throne in 1155. After his brother Andrei Bogoliubskii of Suzdal took Kiev in 1169, Hlib was granted Kiev and gave Pereiaslav to his son Volodymyr. Mstyslav Iziaslavych of Volhynia and Yaroslav Osmomysl of Halych attacked Hlib in 1170 and he fled to Pereiaslav, but soon after he reoccupied Kiev and held it till his death. It was during Hlib's reign that Pereiaslav principality ceased being under the control of Kiev.

Leonyd Hlibov

Mykola Hlobenko

**Hlibov, Leonyd**, b 5 March 1827 in Veselyi Podil, Khorol county, Poltava gubernia, d 10 November 1893 in Chernihiv. Writer, teacher, and civic figure. After graduating from the Nizhen Lyceum in 1855, he taught at the Chornyi Ostriv gymnasium and Chernihiv gymnasium from 1858. He was active in the Chernihiv Hromada and the Sunday-school movement, published popular educational books, and contributed to the St Petersburg Ukrainian journal *Osnova*. In 1861 he founded and edited the weekly *\*Chernigovskii listok*, in which he published articles, poetry, and stories in Ukrainian. In 1863 the tsarist authorities closed down the paper and banned his works, and Hlibov lost his teaching job and was forced to live in Nizhen under police surveillance. From 1867 to his death he was the director of the Chernihiv Zemstvo printing house.

Hlibov wrote over 40 Romantic lyrical poems in Ukrainian (mostly elegies); one, 'Zhurba' (Sorrow), was put to music by M. Lysenko and became a popular folk song.

His most important works are his 107 fables, which appeared from 1853 in the press and have been published since 1863 in many editions. They are written in the vernacular and satirize contemporary life and conditions from a liberal perspective using Ukrainian motifs and folklore. Hlibov also wrote several dozen rhymed riddles for children and the farce *Do myrovoho* (To the Justice of the Peace, 1862). Studies of his life and works have been written by M. Zahirnia and B. Hrinchenko (1900) and B. Huriev (1965), among others.

I. Koshelivets

**Hlibovytsky, Ivan** [Hlibovyc'kyj], ?–1890. Pedagogue and Russophile civic leader in Bukovyna. As a teacher at the Chernivtsi gymnasium (1864–71) and Teachers' seminary (1872–90) he promoted *\*yazychie* and opposed the use of the vernacular in literature and learning. He edited *Bukovinskaia zoria* (1870–1), a liberal arts journal. Because of its artificial language and bookish style, it won little support and after the 16th issue ceased publication.

**Hlibovytsky, Vasyl** [Hlibovyc'kyj, Vasyl'], 1904–? Journalist, community leader in Galicia. Hlibovytsky was active in Ukrainian Catholic organizations. He was an editor of the journals *Ukrains'ke iunatstvo* and *Lytsarstvo Presviatoi Bohorodytsi*. An organizer of the religious event Ukrainian Youth for Christ, held in 1933, he was a founder and later head of \*Orly Catholic Association of Ukrainian Youth. During the Second World War he was the general secretary of the \*Ukrainian Central Committee in Cracow. In 1948 he disappeared without a trace in Germany.

**Hloba, Ivan**, b ?, d 1791. Last chancellor (1762–75) of the Zaporozhian Sich before its destruction by Catherine II in 1775. The following year Hloba was exiled by the Russian government to a monastery near Turukhansk in Tobolsk gubernia, where he died.

**Hlobenko, Mykola** (pen name of M. Ohloblyn), b 19 December 1902 in Novo-Heorhiivske, Kupianka county, Kharkiv gubernia, d 29 May 1957 in Mougins, France. A literary historian and pedagogue; full member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences. After graduating from the Kharkiv Institute of People's Education in 1928, he worked as a language editor for newspapers, journals, and publishing houses and taught Ukrainian at various schools. A displaced person in Germany after the Second World War, he became (in 1947) an editor of the Munich newspaper *Ukrains'ka trybuna* and (in 1948) a professor at the Ukrainian Free University. From 1951 he lived and worked in Sarcelles near Paris as the associate editor of the *Entsyklopediia ukrainoznavstva* (1949–52; published in English in 1963 as vol 1 of *Ukraine: A Concise Encyclopaedia*). He is the author of large parts of the section on literature in that encyclopedia. He also wrote articles on old Ukrainian literature, most notably a study of A. Kalnofoisky's *Teraturhima* (1956). His selected essays and a bibliography of his works were reprinted in two posthumous collections: *Istoryko-literaturni statti* (Articles on Literary History, 1958) and *Z literaturnoi spadshchyny* (From the Literary Legacy, 1961).

I. Koshelivets

**Hlobus.** A popular, illustrated semimonthly periodical published in Kiev from November 1923 to December 1935, as a supplement first to the newspaper *Bil'shovyk*, then (from 1925) to *Proletars'ka Pravda*. It was edited by S. Shchupak with the assistance of B. Antonenko-Davydovych. The journal published stories, novellas, poems, travel reports, translations of foreign literature, and art and theater reviews. It reported on international and national events, on cultural affairs, and on developments in science and technology. *Hlobus* published the works of such writers as M. Bazhan, O. Vlyzko, M. Ivchenko, Ya. Kachura, T. Osmachka, Ye. Pluzhnyk, I. Le, H. Kosynka, Ya. Savchenko, S. Skliarenko, M. Tere-shchenko, M. Rylsky, and Yu. Yanovsky, most of whom were members of the writers' group \*MARS.

**Hlobyne.** IV-14. Town (1965 pop 14,000) and raion center in Poltava oblast, founded in the early 18th century. It is an important food-industry center.

Hlodosiv hoard: woman's necklace

**Hlodosiv hoard.** A collection of gold and silver artifacts from the 7th century AD discovered in 1961 in an ancient chieftain's grave near Hlodosy, Novoukraina raion, Kirovohrad oblast. The hoard contained necklaces, bracelets, rings, belt buckles, earrings, medallions, weapon handles, and fragments of silver plates and other ware. The gold and silver articles together weighed over 3,600 kg. The remains of a cremated military leader, arrows, parts of a horse harness, and fragments of linen and silk were also found. A study about the hoard by A. Smilenko, *Hlodos'ki skarby*, was published in 1965.

**Hlovatsky, Yakiv** [Hlovac'kyj, Jakiv], b 1735 in Vinkivtsi, Podilia, d ? Icon painter; monk of the Basilian order. He painted the monastery churches in Pochaiv (1762), Buchach (1770, destroyed by fire in 1865), Zahora, and Pidhirtsi. He also did portraits of churchmen and benefactors of the Basilian order, including M. Potocki (1771).

**Hlukh, Yosyp** [Hlux, Josyp], b and d ? Colonel of Uman Regiment during the \*Cossack-Polish War of 1648-54. In March 1651 the Cossack army under the command of Hlukh (Hlukhy) and the colonel of Poltava Regiment, M. \*Pushkar, completely destroyed the advance forces of the Poles near Lypovets, forcing the Polish hetman M. \*Kalinowski to lift the siege of Vinnytsia. In summer 1651 the Uman Regiment under Hlukh struck a decisive

blow against the Crimean Tatars, who had betrayed their Cossack allies at the Battle of \*Berestechko and who were pillaging Left-Bank Ukraine. However, at the beginning of 1654 both Hlukh and the colonel of Bila Tserkva, S. Polovets, were removed by Hetman B. Khmelnytsky on charges of incompetence, stemming from an inadequate defense of Right-Bank Ukraine against the Poles. Hlukh was temporarily restored to his position and probably remained as colonel of Uman throughout 1655. His further fate is unknown.

Hlukhiv

**Hlukhiv** [Hluxiv]. II-14. City (1970 pop 27,100) on the Yesman River and a raion center in Sumy oblast. Mentioned in the Hypatian Chronicle under the year 1152 as a city in Chernihiv principality, in the 13th and 14th centuries it was the capital of an appanage principality. In the 1350s the region came under Lithuanian rule; it was annexed by Muscovy in 1503 and by Poland in 1618. Part of the Hetman state from 1648 on, it was an important trade center and a company town in the Nizhen regiment. The \*Hlukhiv Articles were signed here in 1669. After the destruction of \*Baturyn, Hlukhiv was (during the years 1708-22 and 1727-34) the capital of the Left-Bank hetmans. During the years 1722-7 and 1764-86 it was the seat of the \*Little Russian Collegium. The \*Hlukhiv Singing School was established there in 1738. From 1782 it was a county town in Novhorod-Siverskyi vicegerency, and from 1802, in Chernihiv gubernia. After the 1917 Revolution Hlukhiv became part of the UNR, and in January 1919 it was occupied by Soviet forces. Today the city has the 'Elektropanel' plant and produces food, flax fiber, machinery, building materials, and woolens. Its most important institutions are the All-Union Scientific Research Institute of Fiber Plants (est 1931), a pedagogical institute (est 1874), and an agricultural tekhnikum. Among its architectural monuments are the Triumphal Arch (or Kiev Gate, built in 1744), St Nicholas's Church (1696), the Transfiguration Church (1765), and St Anastasia's Church (1884-93).

**Hlukhiv Articles.** An agreement in 27 points signed on 16 March 1669 in Hlukhiv by the newly elected hetman of Left-Bank Ukraine, D. \*Mnohohrishny, and representatives of Muscovy, defining the political and legal relations between Left-Bank Ukraine and Muscovy. The accord, which replaced the \*Moscow Articles signed by

Hetman I. Briukhovetsky, was influenced by the serious unrest in Ukraine. The agreement began by guaranteeing the Ukrainian 'rights and liberties' spelled out in the \*Pereiaslav Treaty of 1654. It further specified that Muscovite voivodes were to be maintained in Kiev, Chernihiv, Nizhen, Pereiaslav, and Oster, although they could no longer interfere in local government, and it set the number of registered Cossacks at 30,000. The hetman was not given the right to maintain foreign relations, but was given some responsibility over financial affairs. The Hlukhiv Articles were published in 'Istochniki malorossiiskoi istorii,' no. 1, *Chteniiia v Imperatorskom obshchestve istorii i drevnostei rossiiskikh* (1858), edited by D. Bantysht-Kamensky.

**Hlukhiv Council of 1750.** A council of Cossack officers that took place at Hlukhiv in February 1750 and at which, on the recommendations of Empress Elizabeth I and the Russian government, K. \*Rozumovsky was elected hetman of Left-Bank Ukraine. The revival of the Hetmanate in Left-Bank Ukraine was welcomed by the Cossack *starshyna* and the population, which had suffered under the Russian officials during the rule of the \*Governing Council of the Hetman Office. With the election of a hetman by the Hlukhiv Council, the autonomy of the Hetman state was partially restored.

**Hlukhiv Singing School.** The first school of singing in the Russian Empire, established to train singers for the royal court. It was founded in 1738 in Hlukhiv, the capital of Hetman Ukraine, and operated almost 40 years. Its usual enrollment was 20. Students were trained for two years: reading musical scores, singing, and playing the violin, *husli*, and bandura. Each year the top 10 students were sent to the court chorus in St Petersburg. The school's first conductor was F. Yavorsky. Graduates of the school included many famous Ukrainian singers, instrumentalists, and composers of the 18th century; for example, M. Berezovsky, D. Bortniansky, and A. Losenko.

**Hlushchenko, Ivan** [Hluščenko], b 28 July 1907 in Lyssianka, Zvenyhorodka county, Kiev gubernia. Biologist; from 1956 full member of the All-Union Academy of Agricultural Sciences (VASKhNIL). A graduate of the Kharkiv Agro-economic Institute (1930), he became one of the most ideologically strident supporters of T. \*Lysenko. He joined the staff of the Institute of Genetics of the USSR Academy of Sciences in 1939 and replaced G. Karpechenko as head of its laboratory of plant genetics (1941–65). He was put in charge of a laboratory at VASKhNIL's Institute of Soil Science when Lysenko was removed from the directorship of the Institute of Genetics in 1965. Since 1976 Hlushchenko has headed the laboratory of plant development at VASKhNIL's Institute of Applied Molecular Biology and Genetics. His publications deal with vernalization, hybridization, and plant selection.

**Hlushchenko, Mykola** [Hluščenko] (Gloutchenko, Nicolas), b 17 September 1901 in Novomoskovske, Katerynoslav gubernia, d 31 October 1977 in Kiev. Artist. A graduate of the Academy of Art in Berlin (1924), from 1925 he worked in Paris where he immediately attracted the attention of French critics. From the *Neue Sachlichkeit* style of his Berlin period he changed to post-

Mykola Hlushchenko

impressionism. Besides numerous French, Italian, Dutch, and (later) Ukrainian landscapes, he also painted flowers, still life, nudes, and portraits (of O. Dovzhenko and V. Vynnychenko, as well as portraits commissioned by the Soviet government of the French writers H. Barbusse, R. Rolland, and V. Marguerite and the painter P. Signac). At the beginning of the 1930s, Hlushchenko belonged to the Association of Independent Ukrainian Artists and helped organize its large exhibition of Ukrainian, French, and Italian paintings at the Ukrainian National Museum in Lviv. In 1936 he moved to the USSR, but was allowed to live in Ukraine only after the war when his works began to reflect official approved socialist realism. In the 1960s, having come into close contact with new artistic trends on his trips abroad, he revitalized his paintings with expressive colors, and assumed a leading position among Ukrainian colorists. Hlushchenko's work was exhibited in Berlin (1924), Paris (five exhibits 1925–34), Milan (1927), Budapest (1930, 1932), Stockholm (1931), Rome (1933), Lviv (1934, 1935), Moscow (1943, 1959), Belgrade (1966, 1968), London (1966), Toronto (1967–9), and Kiev (over 10 exhibits).

S. Hordynsky

**Hlushkevych, Mariian** [Hluškevych, Marijan], b 31 March 1877 in Dydova, Turka county, Galicia, d 17 July 1935 in Lviv. Galician community leader and lawyer. Before the First World War Hlushkevych studied in Russia, where he became an active member of the Russophile movement among Galician Ukrainians. During the war he returned to Galicia with the Russian army, and was appointed mayor of Peremyshl. After the Revolution of 1917, while living in eastern Ukraine, he gradually left the Russophiles. He returned to Galicia in 1921 and became a professor of law at the Lviv (Underground) Ukrainian University. Later, he defended Ukrainians in political trials. He was a vice-president of the Union of Ukrainian Lawyers in Lviv and an active member of the Polish Bar Association.

**Hlushko, Sylvester** [Hluško, Syl'vester], ca 1896–1938. Member of M. \*Hrushevsky's school of Ukrainian history. He was affiliated with the Scientific Research Chair of Ukrainian History at the All-Ukrainian Academy of Sciences. Hlushko specialized in 19th- and 20th-century

Ukrainian history. He is the author of several articles and reviews on such topics as P. Kulish, M. Drahomanov, and the peasant movement in Ukraine (mostly published in *Ukraina*, 1924–9). In 1934 he was arrested and exiled to Siberia; he perished there during the Yezhov terror of 1936–8.

**Hlushko, Vasyl** [Hluško, Vasył'], b 28 August 1920 in Bohuchar, Voronezh gubernia, Russia. Geologist; corresponding member of the AN URSR since 1967. A graduate of Voronezh University (1942), from 1946 to 1953 he prospected for gas and petroleum in western Ukraine. From 1953 he served as research associate of the Ukrainian Branch of the All-Union Scientific Research Institute of the Geological Prospecting of Petroleum. In 1965 he became director of the Ukrainian Scientific Research Institute of Geological Prospecting of the Ministry of Geology of the Ukrainian SSR. His works deal with tectonics, and petroleum and gas reserves, particularly in the Carpathians.

**Hlushko, Yurii** [Hluško, Jurij] (pseud: Mova), b 1882? d spring 1942 in Kiev. Journalist; organizer of Ukrainian community and cultural life in the Far East. From 1918 to 1920 he was president of the Secretariat of the Far Eastern Ukrainian Territorial Council. He was arrested by the Bolsheviks in November 1922, and two years later was sentenced to three years' imprisonment. Eventually, he returned to Ukraine and lived in Kiev.

Viktor Hlushkov

Isydore Hlynka

**Hlushkov, Viktor** [Hluškov], b 24 August 1923 in Rostov-na-Donu, Russia, d 30 January 1982. Specialist in cybernetics, computer science, and control theory; full member of the AN URSR from 1961 and of the Academy of Sciences of the USSR from 1964. In 1957 he was appointed director of the Computing Center of the AN URSR, which in 1962 was reorganized into the Institute of Cybernetics. In 1962 he became vice-president of the AN URSR. He did seminal work in the fields of modern algebra, automata theory, digital computers, the application of cybernetics to economics, automatic control systems, and artificial intelligence. He solved the generalized 5th Gilbert Theorem. His influence on the development of computer sciences, computer manufacturing, and the automatization of production in the USSR was very im-

portant. Computer systems such as Dnepr and Mir were designed and constructed under his supervision. He is the author of a general theory of automata that has been utilized widely in computer and automatic-machine construction. Hlushkov was first to propose a radically new system of computer-assisted economic planning; many of his methods are used in the Soviet bloc today. He served as editor in chief of *Entsyklopediia kibernetiky* (Encyclopedia of Cybernetics, 2 vols, 1973), which was published in Ukrainian and Russian.

L.S. Onyshkevych

**Hlyboka.** v-6. Town smt (1977 pop 7,600) and raion center in Chernivtsi oblast. It was first mentioned in historical sources in 1438. From 1918 to 1940, under Rumanian rule, it was called Adincata. Today it is a railway junction and has a food and glass industry.

**Hlyniany** [Hlynjany]. iv-5. Town smt (1970 pop 4,000) in Zolochiv raion, Lviv oblast, situated in the Buh Depression. First mentioned in 1379, in 1397 it was granted the right of \*Magdeburg law. It has been known for its textiles and kilims since the mid-18th century. In 1919 the Ukrainian Galician Army fought several battles with the Polish army in its vicinity. Today the town has a kilim-weaving mill, a dairy, and a brick factory.

**Hlynka, Anthony**, b 28 May 1907 in Denysiv, Ternopil county, Galicia, d 25 April 1957 in Edmonton. Politician and community leader. In 1910 his family immigrated to Delph, Alberta. A founding member of the \*Ukrainian National Federation, in the 1930s he frequently contributed to its weekly, *Novyi shliakh*. From 1935 to 1937 he edited and published an irregular anti-communist tabloid, *Klych*. As a Social Credit candidate, in 1940 and 1945 he was elected to represent Vegreville in the House of Commons. In Ottawa he criticized discrimination against Canadians of foreign extraction, spoke about an independent Ukrainian state in postwar Europe, and championed the right of Ukrainian displaced persons to settle in Canada. In the federal elections of 1949 and 1953, he lost by narrow margins to J. Decore. A collection of his articles and parliamentary speeches was published in 1982.

**Hlynka, Isydore**, b 17 February 1909 in Ternopil, Galicia, d 18 May 1983 in Winnipeg. Biochemist and community leader. In 1910 his family immigrated to Delph, Alberta. After graduating from the University of Alberta and the California Institute of Technology (PH D 1940), he worked for the Canadian Department of Agriculture. An authority on cereal chemistry, Hlynka developed various laboratory instruments and edited *Wheat Chemistry and Technology* (1964). For many years he sat on the presidium of the Ukrainian Canadian Committee and served as president of the Taras Shevchenko Foundation. Hlynka is the author of *The Other Canadians* (1981), a collection of articles on Canadian multiculturalism originally published during the 1970s in *Ukrains'kyi holos* under the pseudonym of Ivan Harmata.

**Hlynsky** [Hlyn's'kyj]. Name of a Ukrainian noble family, descended from the Tatar noble Leksad (Oleksander), who was granted Poltava in 1430 by Grand Duke Vytautas. He was also granted Hlynke near Romen

(whence the family name). Prince Lev Hlynsky had four sons: Mykhailo \*Hlynsky; Bohdan, the vicegerent of Cherkasy and Putyvl who in 1493 destroyed the Turkish fortress of Ochakiv; Ivan (Mamai, d 1522), the palatine of Kiev (1505–8); and Vasyl (d before 1522), the governor of Slonim and Berestia. They attained prominence at the turn of the 16th century through the influence of Mykhailo, who was close to \*Alexander Jagiellończyk. The brothers led an unsuccessful rebellion (1507–8) of dissatisfied landowners against Alexander's successor, King Sigismund I, and fled to Moscow, where they received the title of boyar and large landholdings. There Vasyl's daughter Elena (Olena) married Grand Prince Vasiliï III Ivanovich in 1526 and was a regent (1533–8). Vasyl's sons Yurii and Mikhail played an important role at the court of Tsar Ivan IV the Terrible, Elena's son.

**Hlynsky, Mykhailo** [Hlyns'kyj, Myxajlo], b ca 1460, d 15 September 1534. A member of the Ukrainian nobility. He studied in Western Europe, where he served at the court of Emperor Maximilian I and entered the military service of Prince Albert of Saxony and converted to Catholicism. Upon his return to the Commonwealth in 1497, he rose rapidly in the service of \*Alexander Jagiellończyk. He was endowed with large estates in Ukraine and Belorussia and was appointed a marshal of the court (1499) and a member of the \*Council of Lords of the Grand Duchy of Lithuania. The closest adviser to the grand duke, he used his influence to obtain high offices for other Ukrainian nobles. After Alexander was elected king of Poland in 1501, Hlynsky ran the affairs of Lithuania in his absence. His Ukrainian orientation incurred the hostility of the Lithuanian nobles. With the death of Alexander, his influence waned. Although he supported the election of the new king, Sigismund I, he fell from favor and was even accused of poisoning Alexander. Together with his brothers Vasyl and Ivan he led an unsuccessful uprising (1507–8) of Ukrainian and Belorussian landowners against Sigismund and the Lithuanian nobles. Subsequently the brothers fled to Muscovy, where they became boyars. During the Lithuanian-Muscovite War of 1514, Hlynsky led a large Muscovite force against Smolensk. But feeling mistreated, he began secret negotiations to switch allegiances. He was found out, accused of treason, and imprisoned in Moscow. He was released only after his niece, Elena, married Grand Prince Vasiliï III Ivanovich in 1526. After Vasiliï's death in 1533, Elena became regent and Hlynsky became her principal counselor but was soon accused of trying to seize power; he was again imprisoned in 1534 and starved to death in that year.

**Hlynsky, Yakym** [Hlyns'kyj, Jakym], ?–1732. Eighteenth-century icon painter and gilder, representative of the Ukrainian baroque. His early works were done in Chernihiv (icon of the Holy Virgin [1716]). He is probably the painter of *Young Wife in a White Kerchief* (beginning of the 18th century). In 1723 he did the icons and gilded the iconostasis of the Dormition Cathedral of the Kievan Cave Monastery.

**Hmyria, Borys** [Hmyrja], b 5 August 1903 in Lebedyn, Kharkiv gubernia, d 1 August 1969 in Kiev. Opera singer (high bass). In 1939 he graduated from the Kharkiv Conservatory and became a soloist at the Kiev Theater of

Borys Hmyria

Dmytro Hnatiuk

Opera and Ballet. His more important roles were Miroshnik in A. Dragomyzhsky's *Rusalka* (The Nymph), Mephistopheles in Gounod's *Faust*, the title role in Musorgsky's *Boris Godunov*, and Kryvonis in K. Dankevych's *Bohdan Khmelnytsky*. He also performed chamber works. He toured Czechoslovakia, Bulgaria, Poland, China, and other countries. He is the subject of biographies by I. Stebun (1960), P. Golubev (1959), and B. Buriak (1975).

**Hnatiuk, Dmytro** [Hnatjuk], b 28 March 1925 in Maivtsi Stari (now Novosilka), Kitsman county, Bukovyna. Concert and opera singer (baritone). In 1951 he graduated from the Kiev Conservatory and became a soloist of the Kiev Theater of Opera and Ballet. His repertoire includes about 30 operatic roles, ranging from Ostap in *Taras Bulba* and Mykola in *Natalka Poltavka*, both by M. Lysenko, and Martyn in H. Maiboroda's *Mylana*, to the title roles in P. Tchaikovsky's *Mazepa* and *Eugen Onegin*, A. Borodin's *Prince Igor*, Verdi's *Rigoletto*, as well as Valentin in Gounod's *Faust*, Figaro in Rossini's *Barber of Seville*, and Papageno in Mozart's *The Magic Flute*. Hnatiuk has toured Australia, Africa, the United States, Canada, Japan, and other countries.

Volodymyr Hnatiuk

**Hnatiuk, Volodymyr** [Hnatjuk], b 9 May 1871 in Veslesniv, Buchach county, Galicia, d 6 October 1926 in Lviv. Noted Slavic ethnographer, literary scholar, translator, journalist, and community figure in Western Ukraine; member of the Shevchenko Scientific Society (NTSh) in Lviv from 1899, the Imperial Academy of Sciences in St Petersburg from 1902, the Czechoslovak Folklore Society in Prague from 1905, the Society for Austrian Folk Art

in Vienna, the Folklore Fellows in Helsinki, and the VUAN and the Ethnographic Society in Kiev from 1924. Hnatiuk began collecting folklore during his adolescence. He studied at Lviv University (1894–8), where he headed the Academic Hromada; his mentors there – M. \*Hrushevsky and I. \*Franko – became his close lifelong collaborators. From 1898 to his death he was the general secretary of NTSh. In 1898 he was elected secretary, and in 1913 chairman, of the \*Ethnographic Commission of the NTSh. From 1899 he was also the secretary of the NTSh Philological Section. Hnatiuk was also an editor of and contributor to several NTSh serials: *Khronika NTSh* (66 issues in Ukrainian, 59 in German), \**Etnohrafichnyi zbirnyk* (EZ, 22 vols), and \**Materiialy do ukrains'koi etnologii* (20 vols). While he was its general secretary, the NTSh reached the peak of its development, becoming the equivalent of an academy of sciences.

Hnatiuk also served two terms (1899–1906, 1922–6) on the editorial board of the journal *Literaturno-naukovyi vistnyk*, for which he solicited many contributions and wrote many articles and reviews on literary, political, and linguistic topics. He also contributed to *Zapysky NTSh*, *Kiev-skaia starina*, *Zhyttie i slovo*, *Dilo*, and other Ukrainian, as well as German, Polish, and Czech, periodicals. One of the founders (in 1899), the secretary (1899–1912), and a director of the Ukrainian-Ruthenian Publishing Association, he edited over 150 of its volumes of Ukrainian and European literature, translating many of the foreign works himself. He was also an active member of the Lviv Prosvita society.

Hnatiuk maintained extensive contacts with almost all important Ukrainian and many non-Ukrainian scholars and cultural figures. Together with I. Franko and F. Vovk, he was instrumental in turning folklore collecting in Western Ukraine into a scholarly discipline; he wrote many programs and methodological guidelines for collectors, and in his *Ukrains'ka narodna slovesnist'* (Ukrainian Folk Literature, 1916) he presented a system for recording, classifying, and publishing Ukrainian folklore.

Hnatiuk's research was focused initially on the Hungarian-ruled Ukrainians. He made five research trips (during 1895–6, 1899, 1903) to Transcarpathia and one each to Bačka (1897) and the Banat (1903), and wrote over 100 studies of their folklore, material culture, and dialects; the most important study is *Etnohrafichni materiialy z Uhors'koi Rusy* (Ethnographic Materials from Hungarian Ruthenia, vols 3, 4, 9, 25, 29, and 30 [1897–1911] of EZ). Between 1899 and 1914 he spent many summers in the Hutsul region, where he conducted ethnographic research among its inhabitants and collected many artifacts for the NTSh museum. After falling ill with tuberculosis in 1903, Hnatiuk could not engage in much fieldwork; instead he organized a correspondence network of about 800 folklorists, with whose help he compiled over two dozen unsurpassed volumes of materials that were published in the NTSh serials edited by him and in the collection *Das Geschlechtsleben des Ukrainischen Bauernvolkes* (2 vols, 1909, 1912).

Hnatiuk was an advocate of the comparative-historical approach, which he applied in his studies of folktales, fables, songs, legends, beliefs, and rituals. He also wrote valuable works about folk cookery, handicrafts, folk literature, folk architecture, demonology, and folkways. His writings on various Ukrainian dialects and argots and on normative grammar and orthography were im-

portant contributions in the field of Ukrainian linguistics. In the political sphere, Hnatiuk supported the Ukrainian Radical party and was an opponent of the Galician Russophiles and Populists.

In 1969 an ethnographic-memorial museum dedicated to Hnatiuk was opened in Velesniv; in 1971 a memorial sculpted by L. Bihanych was erected there. A monument to him was also raised at his grave at the Lychakiv Cemetery in Lviv.

M. Hnatiukivsky

**Hnatyshak, Mykola** [Hnatyśak], b 5 December 1902 in Peremyshl, d 8 November 1940 in Liebstadt, Germany. Literary scholar. He received his PH D in Slavic philology from the University of Prague in 1927 and then worked as an assistant in the Ukrainian Scientific Institute in Berlin (1927–30). In 1931 he moved to Lviv, where he became an editor of the Ukrainian Catholic weekly *Meta* and the journal *Khrystos – nasha syla*. He also contributed to the journal *Dzvoony*. He emigrated to Czechoslovakia in 1939. In 1940, shortly before he died, he became a lecturer at the University of Vienna. Hnatyshak is the author of numerous articles on literary topics in periodicals and of a history of Ukrainian literature, vol 1 of which was published in 1941. In his history he formulated a new periodization of Ukrainian literature: he divided it into five old and five new periods according to predominantly formal and aesthetic styles – the Old Ukrainian, Byzantine, Late Byzantine, Renaissance, and Cossack-Baroque periods in the old, and the Pseudo-Classical, Biedermaier, Romantic, Realistic, and Modern periods in the new. His literary theory is based on roughly three principles: O. Potebnia's notion of a structural relation between the text and the word, emphasis on literary form, and an ideological aestheticism derived from national, Christian ethics. Although he was somewhat influenced by the structuralist school in Prague, he departed from its tenets in stressing the importance of the influence of the environment on the author and hence on the literary work. He judged literature by applying not only formalistic principles but also socially acceptable aesthetic norms. Because for him these norms were colored by national and Christian ethics his approach can be referred to as 'national realism.'

D.H. Struk

**Hnatyshyn, Andrii** [Hnatyśyn, Andrij], b 26 December 1906 in Chyzykiv, Lviv county, Galicia. Composer and conductor. A graduate of the Lysenko Higher Institute of Music in Lviv and the Vienna Conservatory, in the 1930s he became the conductor of the choir at St Barbara's Church in Vienna. He has worked as a conductor in various theaters in Vienna and in motion pictures, and has often performed Ukrainian music on the Vienna Radio. His original compositions include over 100

Andrii Hnatyshyn

John Hnatyshyn

songs for chorus and solo written to poems by T. Shevchenko, I. Franko, and L. Ukrainka and to German poems, arrangements of folk songs for chorus, several divine liturgies and church services, an oratorio, several cantatas, an opera (*Olena*, 1980), and a number of instrumental pieces (quartet, trio, and *The Ukrainian Suite*). In recognition of his compositions the Austrian government awarded Hnatyshyn the title of professor and Pope John xxiii awarded him the Silver Cross.

**Hnatyshyn, John** [Hnatyšyn, Ivan], b 20 January 1907 in Vashkivtsi, Bukovyna, d 2 May 1967 in Saskatoon. Lawyer and senator. His family came to Canada in 1907 and settled near Canora, Saskatchewan. A graduate of the University of Saskatchewan, he was admitted to the bar in 1933 and was appointed Queen's Counsel in 1957. He served as president of the Saskatoon Conservative Association, provincial vice-president of the Saskatchewan Conservative party, president of the Saskatoon Bar Association, and chairman of the board of directors of the Mohyla Ukrainian Institute. In 1959 he was appointed senator.

Ray Hnatyshyn

Borys Hniedencko

**Hnatyshyn, Ramon (Ray)** [Hnatyšyn], b 16 March 1934 in Saskatoon. Lawyer and politician. Son of J. Hnatyshyn. A graduate of the University of Saskatchewan, he practiced law in Saskatoon and then lectured on law at the University of Saskatchewan (1966–74). In 1973 he was appointed Queen's Counsel. As a Progressive Con-

servative (PC), he was elected to the House of Commons for Saskatoon West in 1974, 1979, 1980, and 1984. In the PC government of 1979–80 he served as minister of energy, mines, and resources, and as minister of state for science and technology. An opponent of capital punishment, Hnatyshyn monitored the solicitor general's department while in the PC shadow cabinet in 1983. He has served as PC government House leader (1984–5), president of the Queen's Privy Council (1985–6), and minister of justice and attorney general (1986–).

**Hnidych, Mykola.** See Gnedich, Nikolai.

**Hnidyntsi Petroleum and Gas Field.** Located near Hnidyntsi, Varva raion, Chernihiv oblast, this oil and gas field began to be worked in the 1960s. Exploratory oil drilling was completed in 1959 and extraction began in 1965. The oil lies at a depth of 1,700–1,900 m in a stratum of Lower Permian and Upper-Carboniferous sandstone. It is low in sulfur (less than 0.5 percent) and paraffin (2 percent), but high in resin (up to 28 percent). Most of the oil is pumped to the Kremenchuk Petroleum Refinery, but some of it is refined at Nadvirna, Odessa, and Polatsk, Belorussia. Gas exploration was completed in 1967 and extraction began in the following year. The gas is found at a depth of 3,200–3,270 m in a stratum of Lower-Carboniferous sandstone. It consists predominantly of methane (80 percent), ethane (9 percent), propane (4.6 percent), butane (1.3 percent), and pentane (0.25 percent). The natural gas is pumped into the Shebelynka-Kiev gas system.

**Hniedencko, Borys** [Hnjedenko], b 1 January 1912 in Simbirsk (now Ulianovsk), Russia. Mathematician; full member of the AN URSR from 1948. A graduate of Saratov University (1930), he served as director of the AN URSR Institute of Mathematics (1955–8) and, from 1965, as head of the University of Moscow Department of Mathematics. He has written works on the theory of probability, mathematical analysis and statistics, and the history and methodology of mathematics. He has also worked in the fields of cybernetics and computer science.

**Hnivan** [Hnivan']. IV-9. Town smt (1977 pop 8,000) in Tyvriv raion, Vinnytsia oblast, situated on the Boh River. It was first mentioned in 1629. It has large granite quarries, a sugar refinery (est 1877), and concrete plants.

**Hnizdovsky, Jacques** [Hnizdovs'kyj, Jakiv], b 27 January 1915 in Pylypche, Borszhchiv county, Galicia, d 8 November 1985 in New York. Painter, engraver, and book designer. Having studied at the academies of art in Warsaw and Zagreb, he settled in the United States in 1949. In his paintings and prints he reduced objects to their primeval structure of lines and forms, and called this style 'simplified realism.' Among his oils are multifigural compositions such as *The Homeless* (1947), also known as *Displaced Persons*, portraits, landscapes, numerous still lifes, and entire series on the Paris metro, New York skyscrapers, and the Bronx brownstones. The same precision and devotion to detail is displayed in his woodcuts, which number close to 250. They include some extremely intricate works, eg, *Field* (1962), *Sunflower* (1965), and *Two Rams* (1969). Starting with a style close to Dürer's, he absorbed elements of old Ukrainian engravings,

Jacques Hnizdovsky: *Self-Portrait* (woodcut, 1971)

Chinese and Japanese woodcuts, and various modern tendencies, and molded them into a personal style that brought him international recognition. Hnizdovsky illustrated many books, including *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1950), M. Halun Bloch's *Ukrainian Folk Tales* (1964), *Poems of Samuel Taylor Coleridge* (1967), and the album *Flora Exotica* (1972). He also designed several hundred book covers (among them the *Encyclopedia of Ukraine*) and a large number of bookplates.

Hnizdovsky began to display his work at Ukrainian exhibitions in Germany immediately after the war. One-man exhibitions of his work have been held at leading galleries in New York, New Orleans, Paris, and London. Traveling exhibits of his works were organized in the United States in 1967 and in Canada in 1973. His woodcuts have been included in group exhibits of the Society of American Graphic Artists and a number of exhibits in Europe, Asia, South America, and Africa sponsored by the US Information Agency. His works are included in the permanent collections of art museums (Boston,

Cleveland, Philadelphia), museums, galleries (Winnipeg, Addison), universities (Duke, Delaware), and libraries (New York Public Library, Library of Congress), and in numerous private collections.

**Hnizna River.** A left-bank tributary of the Seret River in the Podilian Upland. It is 81 km long and has a basin area of 1,110 sq km. The town of Terebovlia is located on the Hnizna.

**Hnyla Lypa River.** A left-bank tributary of the Dniester River in Podilia. The Hnyla Lypa is 87 km long and has a basin area of 1,320 sq km. During the First World War pitched battles between the armies of the Central Powers and Russia, and between the Ukrainian Sich Riflemen and Russian forces, were fought along its banks. On 24-28 June 1919 the Second Corps of the Ukrainian Galician Army fought Polish forces along the river, which marked the Dusaniv-Vovkiv front.

**Hnyle more.** See Syvash Lake.

**Hnylopiat River** [Hnylop'jat']. A right-bank tributary of the Teteriv River in the Dnieper River basin. It is 99 km in length and has a basin area of 1,312 sq km.

**Hnylorybov, Tymofii**, b 1 May 1901 in Gusevo, Donets okrug, Don Cossack province. Surgeon. A graduate

Jacques Hnizdovsky: *Displaced Persons* (oil, 1948)

of Rostov University (1925), he was appointed professor at the Dnipropetrovske Medical Institute in 1945. Most of his published works deal with restorative and cardiovascular surgery and the surgical treatment of diseases of the peripheral nervous system and endocrinal glands.

**Hnylosyrov, Vasyl** (also Hnylosyr), b 21 March 1836 in Poltava, d 3 November 1901 in Kaniv. Ukrainian pedagogue, journalist, and writer. While studying at Kharkiv University in the 1860s, he organized \*Sunday schools and was in contact with other Ukrainian hromadas. From 1873 to 1893 he was the director of the county school in Kaniv and also looked after the grave of T. Shevchenko. He published his work under the pseudonym A. Havrysh in the journals *Osnova* and *Kievskaiia starina*.

**Hnylyi Tikych River** [Hnylyj Tikyč]. A left-bank tributary of the Syniukha River. It flows for 157 km through the Dnieper Upland and the Boh River basin. Its own basin covers an area of 3,150 sq km. Its waters are used for domestic and industrial consumption, irrigation, and fish breeding. Three small hydroelectric stations are located on the river.

**Hnylyi Yelanets River** [Hnylyj Jelanec']. A left-bank tributary of the Boh River. It flows for 103 km through the Dnieper Upland and the Black Sea Lowland and has a basin area of 1,235 sq km. Its waters are used mostly for irrigation.

**Hochemsky, Adam and Yosyf** [Hočems'kyj]. The two brothers, whose birth and death dates are unknown, were copper and wood engravers in Pochaiv in the 18th century. Adam, who was active in the 1770s and 1780s, produced over 60 engravings, including *The Reshniivka Mother of God* (1770, 1774), *The Pochaiv Mother of God* (1773),

Yosyf Hochemsky: *Joseph and His Brothers* (copper engraving, 1745)

*St Basil the Great* (1775), and *The Crucifixion* (1784) in Lahodyntsi, whose frame is decorated with interesting scenes of everyday life. He illustrated *Trefolohion* (1777) and a missal (1778). A view of Jerusalem and one of Constantinople (1778) were done by him. Yosyf was active from 1740 to the 1780s, producing nearly 130 copper etchings and woodcuts. They include illustrations to a pentecostarion (1747), a breviary (1741), a triodion (1767), and an *Apostol* (1768), scenes of the Lord's Passion, *The Sobor of the Kievan Cave Saints*, *The Siege of Pochaiv* (1675), and *Antimension* (1763). His personal style is particularly marked in the series of the Lord's Passion. Many of his engravings were copied and produced as popular prints.

**Hockey, ice.** Game played on ice by two teams, each trying to drive a rubber puck into the opponent's net. In Ukraine a form of hockey known as *bendi* (bandy), played with a ball, was played in Kharkiv as early as 1911–12. By 1922–3 the game had spread throughout the Donbas. In 1937 the first Ukrainian team (Kharkiv Sil-mash) took part in the competitions for the USSR cup.

The modern form of ice hockey developed first in Western Ukraine. The rules of the game were drawn up by I. Bobersky in 1906. In the early 1920s hockey teams were organized by sports associations such as Ukraine in Lviv and Dovbush in Chernivtsi. In central and eastern Ukraine modern ice hockey became popular only after the Second World War. In 1946 a republican hockey federation was established; it is a member of the all-Union Hockey Federation. Teams, which are located in most large Ukrainian cities, compete for the Soviet championship. Since 1954 Soviet teams have participated in the Olympic games, the world championships, and other international tournaments. The best Ukrainian players are attracted to Moscow to play on teams representing the USSR. Among them, E. Babych and V. Tretiak (goal-tender on the Soviet Olympic team) are well known.

In the early 1980s the Kiev Sokil team gained wide popularity in Ukraine and the Soviet Union. It scored many victories in international competitions and toured Canada and the United States.

After the Second World War the team Lev in Mittenwald, Bavaria, won wide support from Ukrainian refugees in Germany. It played against German, American, Austrian, and Italian teams.

The game is popular with youngsters of Ukrainian origin in Canada and the United States. They join amateur and professional teams and many have become well known: T. Sawchuk, D. Lewicki, W. Broda, E. Nesterenko, B. Barilko, B. Mosienko, and W. Tkaczuk. J. Bucyk, V. Stasiuk, and B. Horvath of the National Hockey League's Boston Bruins became known as the 'Uke line' in the late 1950s. In the 1985–6 season there were 41 players of Ukrainian descent in the National Hockey League, the most famous being M. Bossy, D. Hawerchuk, and M. Krushelnyski.

E. Zharsky

**Hodiak, John** (Hodiak, Ivan), b 16 April 1914 in Pittsburgh, d 19 October 1955 in Tarzana, California. American actor of Ukrainian descent. After working as a radio announcer and actor for several years, in 1943 he made his film debut in *A Stranger in Town*. He appeared in 34 Hollywood films, of which the most important were the A. Hitchcock thriller *Lifeboat* (1944), *Sunday Dinner for a*

*Soldier* (1944), *A Bell for Adano* (1945), and *The Harvey Girls* (1946). Turning to the stage, he won critical acclaim for his performance as Lt Maryk in *The Caine Mutiny Court Martial* (1953). His last film role was Lt Col Thomas in *On the Threshold of Space* (1956).

**Hodinka, Antonii (Antal)**, b 13 January 1864 in Lodomirov, Transcarpathia, d 15 July 1946 in Budapest. Historian. He was a professor of the Law Academy in Bratislava (1906–18); professor (1918–35), dean, and president at the University of Pécs; a member of the Hungarian Academy of Sciences (from 1933); and head of the Subcarpathian Learned Society in Uzhhorod (1940–4). He wrote several works, including *A Munkácsi Görög-Katholikus Püspökség Története* (History of the Mukachiv Greek-Catholic Eparchy, 1909), *A Munkácsi Görög-Szer-tartású Püspökség Okmánytára* (The Archives of the Mukachiv Greek-Rite Eparchy, vol 1, 1911), and *Az orosz évkönyvek magyar vonatkozásai* (The Hungarian-Related Sections of the Russian Annals, 1916). His compilation of documents pertaining to Prince F. \*Koriatovych and the founding of the Mukachiv Monastery was published posthumously in *АОБМ*, vols 1–2 (1950–4). He also wrote in the east Transcarpathian dialect, under the pseudonym Sokyrnytsky Syrokhman, such works as *Uttsiuz-nyna, gazduvstvo y proshlost' iuzhno-karpats'kykh rusynov* (The Heritage, Economy, and Past of the South-Carpathian Ruthenians, 1922).

**Hodlin, Mykhailo**, b 26 November 1886 in Novozybkov, Chernihiv gubernia, d 5 September 1973 in Kiev. Soil scientist. A graduate of the Kiev Polytechnical Institute (1914), he was a professor at the Kiev Agricultural Institute from 1930 and the Ukrainian Agricultural Academy from 1954. Hodlin created new methods of determining the composition of soil and its general acidity and salinity. He elaborated a soil classification system and developed a system of indicators characterizing various soil structures. He was a coauthor of *Pochvy USSR* (Soils of the Ukrainian SSR, 1951).

**Hoffmann, Max**, b 25 January 1869 in Homberg, d 8 July 1927 in Bad Reichenhall, Germany. German general. The chief of staff of the German eastern front from August 1916, he headed, with R. von Kühlmann, the German delegation that signed a separate treaty with the UNR at \*Brest-Litovsk in February 1918.

**Hog raising.** Branch of animal husbandry that raises hogs for meat, lard, leather, and other products. Until 1975 it was the most important source of meat in Ukraine. Now it is second only to cattle raising.

Historically, the number of hogs in Ukraine has been subject to great fluctuations; it has fallen drastically in times of economic difficulty or during war and at other times has risen more rapidly than the population of any other livestock. In eastern and central Ukraine before 1917 hog raising was widely practiced by small and land-hungry peasant households, particularly in the central regions such as Poltava and Chernihiv. Hogs were easy to rear – they could be fed on potatoes and corn. Some were exported to Germany. During the latter part of the First World War, the total hog population in central and eastern Ukraine fell from 4.6 million to less than half this figure. With the introduction of the New Economic Pol-

icy (1923–8) and more advantageous conditions for private farming, the number of hogs tripled to approximately 7 million. From the outset of the collectivization drive communal hog farms were organized in collective and, to a lesser extent, state farms. During this period, many peasants slaughtered their livestock, including hogs, rather than give them up to the collective farms. During the man-made \*famine of 1932–3, hogs were slaughtered for food or died from starvation. By 1933 there were only about 2 million hogs (28 percent of the pre-collectivization population) in Soviet Ukraine. The Model Collective-Farm Statute introduced in 1935 permitted collective-farm households to rear hogs. Hog raising on private plots soon became the leading branch of animal husbandry in Ukraine. By 1941 almost 60 percent of all hogs in the republic were raised on private plots, 31 percent on collective farms, 6 percent on state farms, and the remainder on auxiliary farms. In 1941 over 33 percent of all hogs in the USSR were bred in Ukraine. In 1940 pork accounted for over 50 percent of Ukraine's meat production. On state farms the percentage was much higher, because after 1930 pork production became their speciality. Outside Soviet Ukraine in Polish-ruled Galicia and Volhynia, there were about 1.6 million hogs in 1932. By 1936 the figure rose to 1.87 million. In northern Bukovyna and the Ukrainian parts of Bessarabia, which were under Rumanian rule, the total in 1932 stood at 204,700 hogs and in Transcarpathia it was 138,200. The most important hog-raising region before the Second World War was Polisia, with over 30 hogs per 100 ha of arable land. By 1941 the number of hogs in Soviet Ukraine had recovered from the collectivization drive and the famine; it was expanded by about 26 percent by the annexation of Western Ukraine in 1939–40. Thus at the outbreak of the German-Soviet War the total number of hogs in Ukraine exceeded 9 million. The destruction of farms and food requisitions during the war reduced the total to less than 3 million. In some oblasts – eg, Ternopil – the hog population fell by almost 90 percent. The drought and famine of 1946, which affected eastern Ukraine, reduced hog numbers even further. The prewar total was not equaled until the mid-1950s.

In the 1950s and 1960s hog raising became the most important branch of animal husbandry in Ukraine. It benefited from the enlargement of collective farms undertaken in 1950–1, and from the expansion of the sugar-refining industry, whose by-products were used as feed. Since the 1960s hog production has stagnated somewhat because of a number of factors, including adverse weather conditions in the late 1970s and early 1980s that reduced feed output. The importance of pork in Ukraine's meat production declined from 50.4 percent in 1940 to 47 percent in 1970 and to 35.4 percent in 1982. This decline mirrors closely the general situation in the USSR. In the same period the output of poultry meat and beef has increased significantly. Between 1971 and 1983 the total number of hogs on both collective farms and private plots fell, but on state farms it rose by about 4.4 percent. Even on state farms the specific weight of hog raising declined. Today pork production has retained its priority only on the private plots of collective farmers. Since 1971 the population in Ukraine has been quite stable. In 1983 it came to 21.2 million or 27 percent of the USSR total. The highest number of hogs per ha is to be found in the western and northwestern oblasts: Transcarpathia,

Chernivtsi, and Rivne; the lowest number in the steppe regions. Almost all hogs today are purebred. The main breeds are the Large White (over 80 percent), the Steppe White (over 10 percent), and the Myrhorod (over 5 percent).

Important scientific research on hog raising is conducted at the Poltava Scientific Research Institute of Hog Raising, the Scientific Research Institute of Animal Husbandry of the Forest-Steppe and Polisia of the Ukrainian SSR, the Scientific Research Institute of Land Cultivation and Animal Husbandry in the Western Regions of the Ukrainian SSR, and the Ukrainian Scientific Research Institute of Animal Husbandry of the Steppe Regions in Askaniia-Nova.

D. Marples

**Hohol, Albert** [Hohol'], b 27 December 1922 in Two Hills, Alberta. Educator and politician. Educated at the universities of Alberta and Oregon (PH D 1967), between 1947 and 1971 he was a teacher and superintendent of schools in Alberta. As the Progressive Conservative member of the Alberta legislature for Edmonton-Belmont (1971-9), he served as minister of manpower and labor (1971-5) and minister of advanced education and manpower (1975-9). Since 1979 he has been commissioner of the Alberta Workers' Compensation Board. He played a key role in establishing the Canadian Institute of Ukrainian Studies.

**Hohol, Mykola.** See Gogol, Nikolai.

**Hohol, Ostap** [Hohol'], ?-1679. Cossack military leader during the \*Cossack-Polish War of 1648-54. A member of the Volhynian nobility, he was intermittently the colonel of Podilia (Mohyliv) regiment from 1658 until 1676 (when the regiment was dissolved). He was briefly, in 1649 and 1674, colonel of the Kalnyk (Vinnytsia) regiment. From 1676 until his death he was acting hetman of Right-Bank Ukraine.

**Hohol-Yanovsky, Vasyl** [Hohol'-Janovs'kyj, Vasyl'] (Gogol, Vasiliij), b 1777 on the farmstead Kupchynskiy (today Hoholeve) near Myrhorod in the Poltava region, d March 1825 in nearby Kybyntsi. A landowner of Cossack *starshyna* descent and Ukrainian playwright; the father of N. \*Gogol. In the 1820s he directed the theater of the noble D. \*Troshchynsky on the latter's estate in the village of Kybyntsi and wrote and staged plays for it in Ukrainian. They include the *intermediia*-like comedy 'Sobaka-vivtsia' (The Dog-Sheep) and the farce 'Prostak, ili khitrost' zhenshchiny, perekhitrennaia soldatom' (The Simpleton, or the Cunning of a Woman Outwitted by a Soldier), which is similar to I. Kotliarevsky's *Moskal'-charivnyk* (The Muscovite-Sorcerer).

**Hohotsky, Sylvestr** [Hohots'kyj, Syl'vestr], b 17 January 1813 in Kamianets-Podilskiy, Podilia gubernia, d 11 July 1889 in Kiev. Philosopher and pedagogue. He graduated from the Kiev Theological Academy in 1837 and remained there to teach Polish and German languages and philosophy. In 1848 he was appointed professor of philosophy and in 1851 professor of pedagogy at Kiev University. Hohotsky was influenced mostly by Hegel and developed a vague theistic philosophy. His most important contribution to philosophy was *Filosofskii lek-*

*sikon* (Philosophical Lexicon, 4 vols, 1857-73). At first a Ukrainophile and a contributor to \**Osnova*, he later opposed the Ukrainian movement.

**Hoida, Yurii** [Hojda, Jurij], b 15 March 1919 in Zniatseve, Mukachiv county, Transcarpathia, d 2 June 1955 in Uzhhorod. Poet. In his many collections of poetry - *Liudy moiei zemli* (People of My Land, 1948), *Verkhovyns'ka poema* (Highland Poem, 1949), *Sontse nad Tysoiu* (Sun above the Tysa, 1950), *Vysoki dorohy* (High Roads, 1952), *Liryka* (Lyrical Poetry, 1954) - Hoida glorified the Soviet annexation of Transcarpathia.

**Hola Prystan** [Hola Prystan']. VII-13. Town (1983 pop 14,700) and raion center in Kherson oblast. A commercial port (since 1868) on the Konka River 20 km from the Dnieper Estuary, it was first mentioned in 1786, and fortified during the Crimean War. The site of the first state radio station in Ukraine, created in 1902 by A. Popov. The Komunar plant (boats, furniture), the Hopry mud-bath sanatorium and spa, and the museum, laboratories, and offices of the \*Black Sea Nature Reserve are located there.

**Holeho, Mykola**, b 15 June 1914 in Khrystynivka, Kiev gubernia. Specialist in mechanics and machine building; corresponding member of the AN URSR since 1967. Having graduated from the Kiev Institute of Civil Aviation Engineers in 1938, he worked as an engineer and manager at various aviation plants. From 1954 to 1975 he was rector of the institute. In 1976 he was appointed department chairman at the AN URSR Institute for Problems of the Strength of Materials. His main publications deal with methods of increasing machine reliability and durability.

**Holendry.** IV-9. Village in Kalynivka raion, Vinnytsia oblast in northeastern Podilia. In 1919 the Kolomyia Brigade of the Ukrainian Galician Army defeated units of the Red Army there.

**Holidays.** Today in the USSR there are six statutory holidays: 1 January (New Year's Day), 8 March (International Women's Day), 1 and 2 May (International Toilers' Solidarity Days), 9 May (Victory Day), 7 and 8 November (Anniversary of the October Revolution), and 5 December (Soviet Constitution Day). In addition most employees have 15 days of paid holidays per year (1978).

The concept of a statutory (paid) holiday is a recent one and coincides with the large-scale development of wage labor. Before 1917 in Russian-ruled Ukraine, besides religious and folk holidays (see \*Church holidays; \*Folk calendar), certain anniversaries in the royal family were celebrated as national holidays. Under Nicholas II these holidays were the empress's saint's day (23 April), the emperor's birthday (6 May), the anniversary of the emperor's coronation (14 May), the empress's birthday (25 May), the dowager empress's birthday (14 November), the crown prince's birthday (22 November), the emperor's saint's day (6 December). The total number of religious and national holidays amounted to over 50 days a year (excluding Sundays). Not all of them were paid, however, and the number of non-working days varied from industry to industry. Most peasants and other independent producers observed religious and folk holidays at their own expense.

In the Habsburg Empire, of which Western Ukraine was a part, there were no national holidays connected with anniversaries in the royal family, although the decennial jubilees of Francis Joseph's birth and accession to the throne were marked with great fanfare. The only holidays on which labor in industry was regulated (particularly by the laws of 1885, 1895, and 1905) were religious holidays. After 1848 Ukrainians in Galicia observed the anniversary of the abolition of serfdom (3 May, os) and, beginning in 1862, the anniversary of T. Shevchenko's death (26 February, os). Observance of these anniversaries was voluntary.

Ukrainians outside Ukraine commemorate annually two historical events: on 22 January the Independence of Ukraine, and on 1 November the 1918 November uprising in Lviv (*Lystopadovyi zryv*). In 1981 a citizen group in Kiev declared 12 January Ukrainian Political Prisoner's Day to commemorate the mass arrests of Ukrainian dissidents that took place on 12 January 1972. This anniversary is observed by some Ukrainian communities outside the USSR and Eastern Europe, and by some individuals within the Soviet Union and its satellites.

J.-P. Himka, B. Krawchenko

Olena Holitsynska

Yevhen Holitsynsky

**Holitsynska, Olena** [Holicyns'ka], b 29 December 1899 in Izium, Kharkiv gubernia, d 25 March 1978 in Irvington, New Jersey. Stage actress; daughter of H. Borysohlybska. After graduating from the Lysenko Music and Drama School in Kiev, she worked at the Molodyi Teatr theater in Kiev (1918), the Ukrainska Besida Theater in Lviv (1920–41), and the Lviv Theater of Opera and Ballet (1941–4). She made guest appearances with the Berezil theater (1927), the Tobilevych Ukrainian People's Theater, and the Kotliarevsky Theater in Lviv (1938). Her repertoire consisted of heroic roles, particularly in plays by V. Vynnychenko, H. Ibsen, and Molière. She also appeared in classical operettas by J. Strauss and F. Lehár.

**Holitsynsky, Yevhen** [Holicyns'kyj, Jevhen], b 20 October 1878 in Kishinev, d 17 March 1932 in Prague. Chemist and political leader. He studied chemistry in Kiev and Prague. A prominent member of the \*Revolutionary Ukrainian party, from 1902 he was a member of its central committee and from 1903 to 1904 he was the party's representative abroad. In 1905 he returned to Ukraine and joined the Ukrainian Social Democratic Labor party, and from 1915 to 1917 he served as liaison officer between Ukrainian activists in Kiev and the \*Union for the Lib-

eration of Ukraine. In 1917–18 Holitsynsky was a member of the Central Rada and director of the general department of the ministry of trade and industry. In 1919 he headed a special UNR mission to the United States, and later served as diplomatic envoy to Estonia. From 1923 he was docent of chemical technology at the Ukrainian Husbandry Academy in Poděbrady.

**Holland.** See Netherlands.

**Holoborodko, Vasyl** [Holoborod'ko, Vasyl'], b 1946 in Voroshylovhrad oblast. Poet. Details of his biography are skimpy. He was a miner in 1964, a student at Kiev University in 1966, and stationed as a soldier in the Far East in 1969. In 1964 several of his poems appeared in the literary periodicals *Literaturna Ukraina* and *Dnipro*, after which he fell into official disfavor and was no longer published in Ukraine despite accolades by I. Dziuba and other critics on the uniqueness and freshness of his imagery and poetic vision. Holoborodko's vision of the world is through the prism of innocence. His poetry draws its power from a metaphorical rendering of reality in images striking by their quality of child-like magic, wonder, and naïvete. Four manuscript collections of his poems were smuggled to the West and published together in Paris in 1970 under the title *Letiuche vikontse* (The Flying Window).

**Holobutsky, Volodymyr** [Holobuc'kyj], b 28 July 1903 in Velykyi Bir, Surazh county, Chernihiv gubernia. Historian. Since the mid-1930s he has worked at various Soviet higher educational institutions, including Chernivtsi University (1951–4), the AN USSR Institute of History (1947–61, 1974–), and the Kiev Institute of the National Economy (1955–). His major works devoted to Ukrainian history of the 16th–19th centuries, particularly of the Cossacks, include *Chernomorskoe kazachestvo* (The Black Sea Cossacks, 1956), *Zaporozhskoe kazachestvo* (The Zaporozhian Cossacks, 1957), *Zaporiz'ka Sich v ostanni chasy svoho isnuvannia, 1734–1775* (The Zaporozhian Sich in the Last Period of Its Existence, 1734–75, 1961), and *Diplomatischeia istoriia osvoboditel' noi voiny ukrainskogo naroda, 1648–1654 gg.* (The Diplomatic History of the Liberation War of the Ukrainian People, 1648–54, 1962).

**Holod, Roman**, b 17 August 1905 in Dmytrovychi, Lviv county, Galicia, d 26 December 1966 in Toronto. Community and co-operative leader; agricultural engineer. He organized and lectured in the agricultural training program \*Khliborobskyi Vyshkil Molodi and was the founder and director of the Rip, Vovna, and Shovk agricultural co-operatives in the 1930s in Lviv. During the Second World War he worked with the Ukrainian Central Committee in Cracow. After the war, first in Germany then after 1948 in Canada, he was a leader of Plast and a fund raiser for the Shevchenko Scientific Society in France.

**Holohory.** The western part of the northern edge of the Podolian Upland, which is known as the \*Holohory-Kremianets Ridge, extending 60 km from Lviv to Zolochiv. It is dissected by tributaries of the Buh River. The highest peaks are Chortivska Cliff near Lviv (414 m) and Kamula (471 m).

**Holohory-Kremianets Ridge.** The northwestern part of the \*Podolian Upland. The ridge falls steeply in ledges to the Buh Depression and Little Polisia. As a result of intensive erosion, it now consists of mesas dissected by river valleys, gullies, and ravines. The ridge is divided into the uplands of Holohory and Vroniaky and the Kremianets Hills.

**Holos** (Voice). A weekly newspaper that came out in Berlin from January 1940 to June 1945. It was edited by B. \*Kravtsiv and served as the principal organ for \**Osttarbeiter* and for other Ukrainians working in Germany under the Third Reich.

**Holos Khrysta Cholovikoliubtsia** (La Voix du Christ Ami des Hommes). A popular Catholic journal published in Louvain, Belgium, since June 1946. At first a monthly, then a bimonthly (1955–80), after a break it reappeared as a quarterly in 1984. The chief editors have been M. Hermaniuk (1946–8), S. Bozhyk (1948–69), and D. Dzvonyk (1969–80). In 1984 it became the official organ of the Ukrainian Catholic Exarchate for France and the Benelux countries.

**Holos molodi** (Youth Speaks). Illustrated bilingual (Ukrainian-English) monthly (later quarterly) organ of the Ukrainian National Youth Federation published in Winnipeg from 1947 to 1954. The journal, which originated in 1943 as a separate page of the newspaper \**Novyi shliakh*, was intended to reach a generation that no longer spoke Ukrainian. Among its editors were B. Bociurkiw, L. Kossar, T. Tsirka, and P. Yuzyk.

**Holos narodnyi** (The Voice of the People). A literary-political semimonthly periodical published and edited by I. Bilous in Kolomyia from 26 October 1865 to 1868. It was the first Ukrainian newspaper in Galicia published outside Lviv. It contained historical and church calendars as well as political and historical articles by such contributors as A. Shankovsky and M. Hnatevych. It also included articles on agriculture. Folklore, reviews, obituaries, and local news were also published. *Holos narodnyi* was published in both the \*hrazhdanka and Cyrillic alphabets.

**Holos natsii** (The Voice of the Nation). A weekly political periodical of a nationalistic character, edited by O. Boidunyk. It appeared in Lviv in 1936–7 in place of the suppressed journal *Visti* (News), edited by B. Kravtsiv. When *Holos natsii* was also banned, it was replaced by *Holos* (Voice, 1938–9), with B. Kravtsiv again as editor.

**Holos pratsi** (Voice of Labour). See *Robitnytsia*.

**Holos robitnytsi** (Working Woman's Voice). See *Robitnytsia*.

**Holos Spasytelia** (Redeemer's Voice). Religious monthly published in Ukrainian and English by the Redemptorist Fathers in Yorkton, Saskatchewan. From April 1923 to February 1928 it was called *Holos Izbavytelia*. In November 1933 it reappeared under its present name. It generally avoids controversial Ukrainian political and social issues. Among its editors have been Revs Y. Bala, I. Bala, K. Lototsky, Y. Korba, M. Shchudlo, and R. Khomiak.

**Holos zhyttia** (The Voice of Life). A left-wing political and literary semimonthly periodical published from 1929 to 1938 in Uzhhorod. The organ of the Union of Toiling Peasants from 1931, its editors included A. Mondok and I. Beleha.

**Holoskevych, Hryhorii** [Holoskevych, Hryhorij], b 4 November 1884 in Soprunkiivtsi, Nova Ushytsia county, Podilia gubernia, d autumn 1934 in Tobolsk, Siberia. Linguist. He graduated from the Kamianets-Podilskyi Theological Seminary in 1905 and studied linguistics under A. \*Shakhmatov at St Petersburg University (1906–11); he was active in the Ukrainian hromada there. In 1917 he moved to Kiev and organized, with P. Zaitsev and P. Stebnytsky, the Drukar publishing house (1917–20). He was a central figure in the \*Slovo publishing co-operative (1922–6). He became an associate of the VUAN in 1918 and was a coeditor of its Russian-Ukrainian dictionary (1924–8). He wrote studies on a Podilian dialect (1910) and the language of the \*Eusebius Gospel (1914), and compiled the first Ukrainian orthographic dictionary (1st edn 1914; 7th edn 1931, incorporating changes codified in the 1928 orthography, repr New York 1952). He was arrested in August 1929 and at the Stalinist show trial of the \*Union for the Liberation of Ukraine in 1930 he was sentenced to five years' imprisonment. After serving three years in the Yaroslavl prison he was exiled to Tobolsk, where he committed suicide.

**Holota, Illia**, b ?; d 27 July 1649 near Zahalle, Belorussia. Cossack leader. A colonel of the Registered Cossacks, he joined B. Khmelnytsky's rebellion in 1648. In spring 1649 he led a large Cossack detachment north of the Prypiat River, where they defeated a Lithuanian army commanded by J. Radziwiłł that had been sent to reinforce the Polish forces. For the next three months his forces participated in a series of battles with Lithuanian and Polish units. Surrounded and outnumbered by the enemy, he died in battle.

**Holota, Petro** (pen name of P. Melnyk), b 1902 in Balashivka (now part of Kirovohrad), d 8 November 1949 in Sniatyn, Stanyslaviv oblast. Writer. He belonged to the writers' groups \*Molodniak (1926–7) and \*Avanhard (1928–9). His first collections of poetry – *Ternystyi shliakh do voli i osvity* (The Thorny Path to Freedom and Education, 1921) – and of prose – *V dorozhi zmahan'* (On the Road of Struggles, 1925) – were followed by a few more collections of proletarian poetry, the prose collection *Brud* (Dirt, 1929), and two novellas: *Dni iunosti* (Days of Youth, 1930) and *Skhodylo sontse* (The Sun Was Rising, 1930). Holota was repressed in the 1930s. Subsequently rehabilitated, he settled down in Sniatyn in 1945 and worked there as an editor of the raion newspaper.

**Holota.** Stratum of landless peasants that appeared in Ukraine at the end of the 15th century as serfdom was introduced under Polish and Lithuanian rule. The term *holota* appears in documents dating back to the 16th century. Some of these impoverished peasants resettled in the free territories of the Bratslav, Kaniv, and Cherkasy regions, where they formed a significant part of the Cossack stratum. Later, in the 16th–18th centuries, many fled to the territories of the Zaporozhian Sich, where they constituted the majority of the population. Most

became poor Cossacks who worked as hired hands on the estates of wealthy Cossacks or in fishing, salt-making, or chumak enterprises. Some traveled to the Crimea, Moldavia, or Wallachia in search of work. The *holota* took part in the Cossack uprisings against the Poles and constituted a large part of B. Khmelnytsky's army in the war of 1648–57. In the 18th century it played an important role in the \*Haidamaka uprisings. It ceased to exist as a separate social stratum with the introduction of serfdom under Russian rule after the destruction of the Zaporozhian Sich. The *holota* is remembered in folk songs ('Oï nastupyla ta chorna khmara') and dumas; eg, 'Duma about Cossack Holota's Duel with a Tatar' and 'Duma about Handzha Andyber.'

**Holovanivske** [Holovanivs'ke]. v-11. Town smt (1978 pop 6,700) and raion center in Kirovohrad oblast. It was first mentioned in 1764. It has a food, lumber, consumer, and brick industry.

**Holovanivsky, Sava** [Holovanivs'kyj], b 29 May 1910 in Yelysavetahradka, Oleksandriia county, Kherson gubernia. A socialist realist poet, prosaist, and playwright. He is the author of over 30 poetry collections, beginning with *Kin' my zaliznymy* (With Iron Horses, 1927); the collections *Dramy* (Dramas, 1956) and *P'iesy* (Plays, 1973); the collections of publicistic and artistic prose *Skatertiu dorizhka* (Good Riddance, 1930), *Chobit Evropy* (The Boot of Europe, 1932), *Poiedynok* (The Duel, 1941), and *Kraplia krovi* (A Drop of Blood, 1945); the novels *Vasyl' Naida* (1930), *Topolia na tomu berezi* (The Poplar on the Other Bank, 1965), and *Korsun'* (1972); and two books of articles on current affairs.

**Holovashchuk, Serhii** [Holovaščuk, Serhij], 30 September 1922 in Sobolivka, Radomyshl county, Kiev gubernia. Lexicographer. An associate of the AN URSR Institute of Linguistics, he has coedited its Ukrainian-Russian dictionary (vol 6, 1963), Russian-Ukrainian dictionary (3 vols, 1968, 2nd edn 1980–1), dictionary of the Ukrainian language (vols 8–11, 1977–80), and Ukrainian orthographic dictionary (1975). A proponent of bringing Ukrainian closer to Russian, he presented his theoretical views in *Perekladni slovnyky i pryntsyipy ikh ukkladannia* (Bilingual Dictionaries and the Principles of Their Compilation, 1976).

**Holovatiuk, Yevhen** [Holovatjuk, Jevhen], b 28 September 1938 in Lozovata, Lypovets raion, Vinnytsia oblast. Stage director. A graduate of the Kiev Institute of Theater Arts (1961), he has worked at theaters in Mykolaiv, Alma-Ata, Dnipropetrovske, and Donetske. In 1976 he became chief stage director of the Donetske Ukrainian Music and Drama Theater.

**Holovatsky, Ivan** [Holovac'kyj], 1814–99. Civic leader and journalist; brother of Ya. \*Holovatsky. Holovatsky contributed to the government newspaper *Halycho-Ruskii vistnyk* in 1849–50 and then edited its successor *Vistnyk*, published in Vienna, in 1850–1. For many years he translated Austrian law into Ukrainian and taught Russian at the University of Vienna. He published the almanac *Vinok rusynam na obzhynky* (A Garland for Ruthenians after the Harvest, 1846–7).

**Holovatsky, Rodion** [Holovac'kyj], b 18 October 1917 in Lviv, d 22 July 1985 in Rome. Ukrainian Catholic priest. He studied at the Lviv Theological Academy and at the Urbaniana University in Rome. From 1951 he was a parish priest in the province of Misiones in Argentina. In 1959 he was appointed chaplain of Saint Josaphat's Ukrainian Pontifical College in Rome and director of the Ukrainian department of the Vatican radio.

Yakiv Holovatsky

**Holovatsky, Yakiv** [Holovac'kyj, Jakiv], b 17 October 1814 in Chepeli, Zolochiv circle, Galicia, d 13 May 1888 in Vilnius. Noted historian, literary scholar, ethnographer, linguist, bibliographer, lexicographer, and poet. As a student he traversed Galicia, Bukovyna, and Transcarpathia collecting folk songs. In 1832, at Lviv University he, M. Shashkevych, and I. Vahylevych formed the \*Ruthenian Triad, which published the first Galician almanac in the vernacular, \**Rusalka dnistrovaia* (The Dniester Nymph, 1837), and played an important role in the Galician cultural revival. He graduated from Lviv University in 1841, and in 1843 he became a Greek-Catholic village priest. In 1848 he participated in the Congress of Ruthenian Scholars in Lviv, and from 1848 to 1867 he was the first professor of Ruthenian (Ukrainian) philology at Lviv University. Influenced by M. Pogodin's Pan-Slavist ideas, he became a \*Russophile in the 1850s. Dismissed from the university for his views, in 1867 he moved to Russian-ruled Vilnius to head the archeographic commission there.

Holovatsky wrote many ethnographic and literary works; the most important are *Try vstupytel'nyie prepodavanyia o ruskoi slovesnosti* (Three Introductory Lectures on Ruthenian Literature, 1849), *Ocherk staroslavianskogo basnosloviia, ili mifologiiia* (A Study of Old Slavic Fables, or Mythology, 1860), *O pervom literaturno-umstvennom dovizhenii rusinov v Galitsii ...* (On the Ruthenian's First Literary-Intellectual Movement in Galicia ..., 1865), and the particularly valuable *Narodnye pesni Galitskoi i Ugor-skoi Rusi* (Folk Songs of Galician and Hungarian Ruthenia, 4 vols, 1878). His first poems, articles, and translations of Serbo-Croatian folk songs appeared in *Rusalka dnistrovaia* and in the almanac \**Vinok rusynam na obzhynky* (A Garland for Ruthenians after the Harvest, 1846–7). Most of his theological, literary, and historical studies, as well as his memoirs, were published in *Naukovyi sbornik* of the Halytsko-Ruska Matytsia society, *Halychanyin, Slovo*, and *Vremennyk Ynstituta Stavropyhiiskoho*.

Believing that folk vernacular is the truest expression

of a people's spirit, Holovatsky devoted much effort during his Romantic period (to 1848) to collecting and researching native linguistic data. His *Hramatyka ruskoho iazyka* (Grammar of the Ruthenian Language, 1849) was compiled from his university lectures and was modeled on A. \*Vostokov's Russian grammar. His *Rozprava o iazytsi iuzhnoruskim i ieho narichiiakh* (Treatise on the South Russian Language and Its Dialects, 1849) was the first attempt at a scientific classification of Ukrainian dialects. By the time he wrote his unpublished grammar of 1851, however, Holovatsky had rejected the Romantic-national perspective; the work is written from a Russophile orientation. Thereafter his writings, including *Geograficheskii slovar' zapadnoslavianskikh i iugoslavianskikh zemel' i prilozhashchikh stran* (Geographical Dictionary of West Slavic and South Slavic Lands and Adjacent Countries, 1884), reflected the influence of Russian Pan-Slavism.

V. Lev, G.Y. Shevelov

**Holovaty, Antin** [Holovatyj], b 1744, d 19 February 1797. Military leader. Educated at the Kievna Mohyla Academy, he served as chancellor of the Zaporozhian Host and as a colonel of the \*Boh Cossack Army. In 1787 he helped organize the Army of Loyal Cossacks, which was renamed \*Black Sea Cossacks. His assistance to the Russian army in the Russian-Turkish War of 1787-91, particularly in the capture of Berezan fortress, gained him the tsar's favor. After the war Holovaty conducted the resettlement of the Cossacks to the Kuban region. In 1796 he was elected otaman of the Black Sea Cossacks and participated with two regiments in the Russian campaign against Persia. According to tradition, Holovaty was the author of a number of popular songs.

**Holovaty, Pavlo** [Holovatyj], b ca 1715, d ca 1795. Last military judge of the Zaporozhian Sich. When the Sich was razed in 1775, he was arrested, tried in St Petersburg, and exiled for life to Znamenie Monastery in Tobolsk, Siberia.

**Holovchenko, Heorhii** [Holovchenko, Heorhij], b 5 July 1931 in Luhanske (now Voroshylovhrad). Architect. A graduate of the Kharkiv Civil Engineering Institute (1957), he has built the Philharmonia (1962), the monument to the heroes of the Soviet Union (1965), the Drama Theater (1970), and the Oblast Trade Union Soviet, all in Voroshylovhrad. He collaborated with several sculptors in building the memorial complex to the Young Guards (1965) in Krasnodar and other monuments in the Voroshylovhrad region.

**Holovchenko, Ivan** [Holovchenko], b 14 October 1918 in Lyman Druhyi, Kupianka county, Kharkiv gubernia. Soviet army general, political figure, and writer. After graduating from the CC CPSU Higher Party School in 1948, he held various Party posts before joining the KGB (1955-62). In 1962 he became a colonel-general and minister of

internal affairs of the Ukrainian SSR. As a prosaist he debuted in 1957 with a selection of short stories, *Zapysky chekista* (A Chekist's Notes). His other works include the novels *Tretia zustrich* (The Third Meeting, 1960), *Chorna stezhka* (Black Pathway, 1961), and *Militseis'ki buval'shchyny* (Experiences in the Militia, 1974), and several novels coauthored with O. Musiienko. Holovchenko's works conform to the official style of socialist realism and deal mainly with the events of the Second World War.

**Holovetsky, Dionisii** [Holovec'kyi, Dionisij], b 3 November 1885 in Staryi Sambir, Sambir county, Galicia, d 4 February 1961 in Glen Cove, New York. Priest of the Basilian monastic order, specialist in canon law. He served as rector of Saint Josaphat's Ukrainian Pontifical College in Rome (1926-32). He was a member of the Codification Commission for Eastern Canon Law and a consultator of the Sacred Congregation for the Oriental Churches. A collection of Ukrainian sources of eastern law, 'Jus Particulare Ruthenorum,' published in *Codificazione Canonica Orientale. Fonti XI* (1933), was compiled by Holovetsky. In 1946-53 he taught canon law at the Catholic University of America in Washington, DC.

**Holovianko, Zynovii** [Holov'janko, Zynovij], b 24 November 1876 in Talova Balka, Oleksandriia county, Khereson gubernia, d 23 September 1953 in Kiev. Silviculturist and entomologist. Holovianko graduated in 1901 from the St Petersburg Forestry Institute and worked in various forestry stations in Ukraine. From 1937 to 1953 he was a professor at the Kiev Forestry Institute and was associated with the AN URSR. He founded the Darnytsia Forestry Research Station near Kiev in 1924 and headed it until 1934. He is the author of works on ecology, the morphology of insect pests and methods of combating them, and the regeneration of tree crops.

Yulian Holovinsky

**Holovinsky, Yulian** [Holovins'kyj, Julijan], b 1 December 1894 in Radymno, Peremyshl county, Galicia, d 30 September 1930 in Bibrka, Lviv county. Political and military activist. A captain in the Ukrainian Galician Army, after the struggle for Ukrainian independence he was interned in the camps at Josefov and Brno in Czechoslovakia. In the 1920s he was a cofounder and leading member of the \*Ukrainian Military Organization. He organized the assassination attempt on Polish President S. Wojciechowski in 1924 and the assassination of S. So-

binski in 1926, the attack on the main Post Office in Lviv, and various other acts of sabotage. Imprisoned many times, he was finally captured and executed by the Polish police without a trial.

Andrii Holovko

**Holovko, Andrii**, b 3 December 1897 in Yurky, Kobeliaky county, Poltava gubernia, d 5 December 1972 in Kiev. A prominent first-generation Soviet-Ukrainian writer. Although he initially fought for Ukraine's independence as a soldier in the UNR Army, in 1920 he went over to the Red Army. Holovko began his literary career with the poetry collection *Samotsvity* (Gems, 1919), and joined the peasant writers' group \*Pluh. His early prose collections – *Divchynka z shliakhu* (The Little Girl from the Road, 1923), *Chervona khustyna* (The Red Kerchief, 1924), *Mozhu* (I Can, 1926), *Pylypko* (1928), and others – were imbued with revolutionary romanticism. His novel *Bur'ian* (Weeds, 1927) depicts the arbitrariness of rural Bolshevik leaders in the first years after the 1917 Revolution. Holovko's most important work is his novel *Maty* (Mother, 1932); dealing with events in the Ukrainian countryside during the 1905–7 revolution, it was censured by Party critics as nationalist, and its second edition (1934) was revised to conform to the dictates of socialist realism. His trilogy *Artem Harmash* (1951, 1960, and 1970), which depicts events in the countryside during the October Revolution in Ukraine, is a typical Soviet literary work. Holovko's other works include the plays *V chervonykh shumakh* (In the Red Din, 1924) and *Rais'ke iabluko* (The Crabapple, 1926), the film script *Lita molodii* (Youthful Years, 1956), and the cinenovella *Skyba Ivan* (1934). His works have been republished many times; a five-volume collection appeared in 1976–7 and a bibliography of his works was prepared by T. Maievska in 1964.

I. Koshelivets

**Holovko, Dmytro**, b 6 November 1905 in Uman, Kiev gubernia. Master craftsman in ceramics. He studied at the Shevchenko School of Folk Art in Uman (1920–2) and the Art-Ceramics Tekhnikum in Mezhyhiria (1924–8). His works include vases and figurines using traditional Ukrainian folk pottery motifs (rams, deers, lions, etc).

**Holovko, Hryhorii**, b 13 October 1900 in Dibrivka, Myrhorod county, Poltava gubernia. Architect; full member of the Academy of Construction and Architecture of the Ukrainian SSR (1958–63). He graduated from the Kiev Institute of Civil Engineering in 1935. His projects include the planning of the towns of Bila Tserkva

and Novohrad-Volynskyyi, the design of three stations of the Kiev subway, and the building of the Institute of Hydrology and Hydrotechnology of the AN USSR in Kiev, all of which were realized in collaboration with other architects. He was a member of the editorial board of *Istoriia ukrains'koho mystetstva* (A History of Ukrainian Art, 6 vols, 1966–70). From 1937 to 1974, he was the head of the Union of Architects of Ukraine.

**Holovshchyna** [holovščyna] (*poholovshchyna*, *holovnystvo*). A fine imposed on a murderer and paid to the victim's relatives. In the Princely era it supplemented the *\*vyra*, which was paid to the prince and amounted to half a *vyra* (20 *hryvni*). According to the laws of the Lithuanian-Ruthenian and Hetman states, the payment varied with the victim's status; the penalty for killing a noble was four or five times as high as that for killing a peasant. If the murderer was punished by death, the *holovshchyna* was paid by his guarantors or accomplices.

**Holovyne labradorite deposits.** Principal source of labradorite in the USSR, located in Cherniakhiv raion, Zhytomyr oblast. The deposits are worked by the Zhytomyrnerudprom, an enterprise under the ministry of the building-materials industry of the Ukrainian SSR. Labradorite is used for facing buildings and constructing monuments. These deposits were known in antiquity; published information about them dates back to 1835. Holovyne labradorite was used for the Lenin Mausoleum in Moscow and the Shevchenko monument in Kharkiv.

Ambrose Holowach

**Holowach, Ambrose** [Holovač, Amvrozij], b 22 July 1914 in Edmonton. Politician and businessman. He won a seat in the House of Commons in 1953 and again in 1957 as the Social Credit member for Edmonton East. Defeated in the federal election of 1958, from 1959 to 1971 he represented Edmonton Centre in the Alberta legislature. In 1962 he was appointed provincial secretary, becoming the first cabinet minister of Ukrainian origin in Alberta.

**Holowaty, Michael** [Holovatyj, Myxajlo], b 21 November 1922 in Stanyslaviv (now Ivano-Frankivske), Galicia. Research engineer in the fields of metallurgy and mining technology. After studying at Breslau University, in 1945 he was appointed research associate at Heidelberg University. Since 1951 he has worked for the Inland Steel Co in the United States; since 1972 he has directed its

research department. He is the author of numerous papers in the field of ferrous metallurgy and holds 21 US patents. He has received a number of awards for the development of tellurium steels.

**Holowinsky, Ivan** [Holovins'kyj], b 25 April 1927 in Zarvanytsia, Zolochiv county, Galicia. Psychologist and educator. A graduate of Salzburg University (1948), Holowinsky completed his ED D at Temple University in 1961. A professor at Rutgers University since 1966 and consultant at the Princeton Child Development Institute (1972-), Holowinsky has conducted research on comparative learning disabilities in Eastern Europe and the Soviet Union. He has written a number of articles on special education for the mentally retarded.

**Hołowko, Tadeusz**, b 15 September 1889 in Semipalatinsk, Turkestan, d 29 August 1931 in Truskavets, Drohobych county, Galicia. Polish socialist politician and publicist. He was a close collaborator of J. \*Piłsudski and a leading proponent of Ukrainian-Polish reconciliation. He actively supported the Institute for Nationalities Research and efforts to establish a Ukrainian university in Lviv. As a member of the Sejm and director of the Eastern Department at the Polish Ministry of Foreign Affairs (1927-30), he advocated co-operation with the government-in-exile of the UNR and the \*Promethean movement. He was killed by members of the OUN, which accused Hołowko of the 'spiritual disarmament' of Ukrainian society. He wrote many pamphlets and articles for the Polish press on the Ukrainian question and minorities in Poland. He is the subject of a biography by I. Werschler, *Z dziejów obozu belwederskiego: Tadeusz Hołowko, życie i działalność* (From the History of the Belvedere Camp: Tadeusz Hołowko, His Life and Work, 1984).

**Holub.** Cossack family line founded by Hryhorii at the beginning of the 17th century in the Chernihiv region. Its most important members were Zakhar, a military fellow (1667-90); Kost, a general standard-bearer (1678-87); and Hryhorii, a graduate of the Kievan Mohyla Academy (1699) and fellow of the standard (from 1727) who later entered a monastery on Mt Athos and assumed the name of Hurii.

**Holub, Olyfer**, ?-1628. Cossack hetman (1622-3). Elected after Sahaidachny's death, he failed to win the approval of the Polish king, although as a spokesman of the wealthier Cossacks he favored a moderate policy towards Poland. During his rule the Cossacks disregarded Polish policy and waged sea campaigns against Turkey. Failing to obtain guarantees of Cossack privileges from the Polish Sejm, he resigned from office. As a colonel he fought the Poles in 1625. He died in battle during a Cossack campaign against the Crimea.

**Holubenko, Petro** (pen name of P. Shatun), b 12 January 1907 in Derkachii, Kharkiv gubernia. Scholar, journalist, and writer. He completed his studies in the history of literature at Kharkiv University in 1941. As a displaced person after the Second World War in Germany and as a resident in the United States, he has produced studies of the Ukrainian revival of the 1920s; his book *Vaplyte* (1948) and numerous articles on the writer M. \*Khvylovy in the émigré press are important contributions to literary scholarship.

**Holubets, Mykhailo** [Holubec', Myxajlo], b 30 October 1930 in Velykyi Liubin, Horodok county, Galicia. Botanist; corresponding member of the AN URSR since 1978. Holubets graduated from the Lviv Agricultural Institute in 1953. He has worked at the Scientific Research Institute of Land Cultivation and Animal Husbandry of the Western Regions of the Ukrainian SSR (1957-62) and the AN URSR Institute of Botany (1963-70), and from 1970 to 1974 he was the director of the AN URSR Natural Science Museum in Lviv. Since 1974 he has directed the Lviv branch of the Institute of Botany. Holubets has done research in geobotany, ecology, and nature conservation.

Mykola Holubets

**Holubets, Mykola** [Holubec'], b 15 December 1891 in Lviv, d 22 May 1942 in Lviv. Art scholar, writer, and journalist. After studying at the Cracow Academy of Art and the universities of Vienna and Lviv, he joined the Ukrainian Sich Riflemen in 1914 and worked in its press bureau in Vienna. With V. Sichynsky, Holubets was one of the leading historians of Ukrainian art and commentators on artistic life in Galicia. In this field his main works are: *Ukrains'ke maliarstvo XVI-XVII v. pid pokrovom Stavropilii* (Ukrainian Painting in the 16th-17th Centuries under the Patronage of the Stauropegion Brotherhood, 1920), *Nacherk istorii ukrains'koho mystetstva* (An Outline of the History of Ukrainian Art, 1922), *Halyts'ke mystetstvo* (Galician Art, 1926), and the chapter on art in *Istoriia ukrains'koi kul'tury* (History of Ukrainian Culture, 1937). He wrote analytical and perceptive booklets and articles on Ukrainian artists such as A. Archipenko (1922), T. Shevchenko (1924), L. Dolynsky (1924), P. Kholodny Senior (1926), M. Havrylko, L. Gets (1934), T. Kopystiansky, O. Kulchytska, Yu. Narbut, O. Novakivsky, I. Trush, and P. Kovzhun (1939). He was also interested in regional studies and wrote articles and booklets on the history of towns such as Lviv (guide book, 1925), Lavriv (1926-7), Belz, Buzke, Zvenyhorod (1927), Pere-myshl (1928), Sokal (1929), Terebovlia (1928), Zhovkva, and medieval Halych (1937). His works appeared in various scholarly and literary-artistic journals. Holubets edited several journals: *Svit* (1917-18), *Zhyttia i mystetstvo* (1920), *Masky* (1923), *Ukrains'ke mystetstvo* (1926), *Nedilia* (1928-31), and the daily *Chas* (1931).

In literature he appeared first as a poet. His verses were published in various journals, and several short collections of his poems such as *Fragmenty* (Fragments, 1909), *Buvaiut' khvyli* (There Are Moments, 1910), and *Moisei bezumnyi* (Mad Moses, 1914) were published in Lviv or Vienna. Later he turned to prose, composing

novelettes such as *Liudy i blazni* (People and Clowns, 1927), sketches such as *Hei, vydno selo* (Hey, a Village Is in Sight, 1934), and historical novels such as *Zhovti Vody* (1937) and *Plem'ia Dzhingiskhana* (Genghis Khan's Tribe, 1938). He also translated G. Hauptmann's *Die versunkene Glocke*, H. Ibsen's *Peer Gynt*, and H. Heine's poetry.

S. Hordynsky

**Holubiev, Pavlo** [Holubjev], b 28 June 1883 in Bakhmut, Katerynoslav gubernia, d 3 March 1966 in Kharkiv. Teacher of vocal music. A graduate of the Kharkiv Music School (1906), from 1939 he served as professor at the Kharkiv Conservatory. Among his students was B. \*Hmyria, about whom he wrote a book.

Volodymyr Holubnychy

**Holubnychy, Volodymyr** [Holubnyčyj], b 2 June 1936 in Sumy. Olympic and world track and field champion. A graduate of the Kiev Institute of Physical Culture (1969), he took the gold medal in the 20-km walk at the Olympics in Rome (1960) and in Mexico City (1968), the silver medal at the Olympics in Munich (1972), and the bronze medal at the Olympics in Tokyo (1964). He established two world records (1955, 1958), three USSR records, and six Ukrainian records in the 20-km walk. In 1974 he was the European champion in this event. He now coaches and teaches.

**Holubnychy, Vsevolod** [Holubnyčyj], b 5 June 1928 in Bohodukhiv, Kharkiv okruha, d 10 April 1977 in New York City. Economist and political figure; member of the Ukrainian Academy of Arts and Sciences in the United States. He left Ukraine with his family in 1943 and immigrated to the United States in 1951. He studied economics at Columbia University (PH D 1971) and from 1962 taught at Hunter College, City University of New York. Holubnychy was a leading member of the Ukrainian Revolutionary Democratic party, particularly of its left-wing faction, and editor of its periodicals *Iunats'ka borot'ba* and *Vpered*. He published many works on Soviet regional economics, Ukrainian-Russian economic relations, Ukrainian economic and political history, and Marxist

Vsevolod Holubnychy

Vsevolod Holubovych

economic theory and philosophy. He contributed entries to *Entsyklopediia ukraïnoznavstva* and served as its economics editor. Some of his works have been published posthumously in *Soviet Regional Economics: Selected Works of Vsevolod Holubnychy*, ed I.S. Koropec'kyj (1982).

**Holubovskyy, Zakharii** [Holubovs'kyj, Zaxarij], b 1736 in Poltava, d 1810 in Kiev. Painter, graduate of the Kiev Theological Academy and the Kievan Cave Monastery Icon Painting Studio. As head of the studio (1772–6), he took part in painting and restoring the monastery's Dormition Cathedral and directed the painting of the underground churches of the Near Caves. Of his paintings only the *Holy Martyr with a Flower in Her Hand* (end of the 18th century), a fine example of the Ukrainian baroque style, has been preserved.

**Holubovych, Mykhailo** [Holubovyč, Myxajlo], b 21 November 1943 in Zolotonosha, Cherkasy oblast. Stage and screen actor. A graduate of the Kiev Institute of Theater Arts (1967), he has worked since then at the Voroshylovhrad Ukrainian Music and Drama Theater and has appeared in roles such as Kolesnyk in *Poviiia* (The Whore), based on P. Myrny's novel, Vasyl in M. Stravytsky's *Tsyhanka Aza* (Aza, the Gypsy Girl), Ferdinand in F. Schiller's *Kabale und Liebe*, and Terracini in O. Kornichuk's *Pam'iat' sertsia* (Memory of the Heart). He has also appeared in several Soviet films.

**Holubovych, Sydir** [Holubovyč], b 1875 in Tovstenke, Kopychyntsi county, Galicia, d 12 January 1938 in Lviv. Civic and political leader; lawyer. He was head of the student Academic Hromada in Lviv and later a civic activist in the Ternopil region. In 1911 he was elected to the Austrian parliament and in 1913 to the Galician Sejm, representing the National Democratic party. In 1915 he was a member of the \*General Ukrainian Council. He was secretary of justice in the first government of the Western Ukrainian National Republic (1918); later he became head of the secretariat and secretary of finance, trade, and industry. After 1919 he was a leading member of the \*Ukrainian Labor party, and in 1925 he participated in the founding of the Ukrainian National Democratic Alliance.

**Holubovych, Vsevolod** [Holubovyč], b 1885 in Poltavka, Balta county, Podilia gubernia, d ? Political figure, journalist, and engineer. A graduate of the Kiev Poly-

technical Institute, he represented the \*Ukrainian Party of Socialist Revolutionaries (UPSR) in the Little Rada and \*General Secretariat of the UNR. In January 1918 he led the first UNR delegation, which negotiated the Peace Treaty of \*Brest-Litovsk. From 30 January 1918 to Hetman P. Skoropadsky's coup of 29 April, he was the prime minister and minister of foreign affairs in the \*Council of National Ministers of the UNR. He was imprisoned by the Hetman government until its overthrow in December 1918. After the UPSR split in May 1918, Holubovych remained in its centrist current. In 1919–20, he published its daily *Trudova hromada* in Kamianets-Podilskyi and Vinnytsia. In 1921 a Bolshevik tribunal sentenced him in a show trial to five years in a concentration camp together with other members of the UPSR Central Committee, but he was soon amnestied and served as the chairman of the Supreme Economic Council of the Ukrainian SSR until 1931, when he was again arrested and sentenced in the show trial of the 'Ukrainian National Center' (M. \*Hrushevsky's followers) and never heard from again.

**Holy, Hnat** [Holyj], b and d ? Zaporozhian Cossack, haidamaka chieftain. In the 1730s and 1740s he led a detachment of haidamakas that raided the estates of Polish nobles, lessors, and merchants in the Vinnytsia and Cherkasy regions. In 1741 he executed the Polish ally S. \*Chaly and in 1743 captured Zvenyhorodka. His detachment was active until 1748. Holy became a popular hero and was remembered in folk songs.

**Holy Scriptures.** See Bible.

**Holy Synod** (Sviateishii Vserossiiskii Pravitelstvuiushchii Sinod). The highest ruling body of the Orthodox church in the Russian Empire, established by Peter I in 1721 to replace the Moscow patriarchate. It was created in order to subordinate the church to secular authority. The first statutes were laid down in the Spiritual Regulation written by T. \*Prokopovych in 1722. Under the Holy Synod the clergy became civil servants and the church was turned into a bureaucratic institution. While the Holy Synod was given responsibility for educational and benevolent work and certain ecclesiastical matters, its power was clearly limited; eg, it could only nominate candidates for bishop, whom the tsar then appointed. It was composed of representatives of the church hierarchy and the clergy appointed by the tsar, and was presided over by the tsar's representative, the *ober-prokuror*, whose rank from 1824 was equivalent to that of a minister. In 1764 the Holy Synod's large estates were confiscated, further undermining its independence. It continually limited any remnants of autonomy of the Kiev metropolis and opposed the use of the Ukrainian language in church schools in 1860 and 1912. When the Moscow patriarchate was re-established in 1917, the Holy Synod was abolished.

**Holynsky, Mykhailo** [Holyns'kyj, Myxajlo], b 2 January 1895 in Verbivtsi, Horodenka county, Galicia, d 1 December 1973 in Edmonton. Operatic tenor. In 1920 he began to study voice in Lviv and continued in Milan. After his successful debut at the Lviv opera in 1925, he appeared in Poznań, Toruń, and Warsaw. Apart from a brief trip to Berlin in 1927, Holynsky spent 1926–30 as a tenor soloist in the USSR – in Kiev, Kharkiv, Odessa, Moscow, Leningrad, and Tiflis. In the 1930s he sang in

Mykhailo Holynsky

Lviv, Warsaw, and the larger cities of Galicia. During a tour of the United States and Canada, the Second World War broke out and he decided to settle in Canada. In subsequent years he gave numerous recitals and made several recordings.

**Home industry.** See Cottage industry.

**Home rule.** See Local government.

**Homel oblast.** Oblast (1982 pop 1,636,000) in the southwestern part of the Belorussian SSR with an area of 40,400 sq km. Its southwestern part lies south of the Prypiat River in Polisia and within Ukrainian ethnic territory. According to the 1979 census, 0.03 percent of the oblast's population was Ukrainian. Only 48.7 percent of the Ukrainians gave Ukrainian as their mother tongue; 46 percent gave Russian and 5 percent gave Belorussian.

**Homestead.** See *Khutir* and Private plot.

**Homiletics.** The art of religious discourse and preaching of sermons, homilies, and catechetical instruction. It has been practiced in Ukraine since its \*Christianization in the late 10th century, when it was employed to propagate the new religion. Slavic homilies were initially introduced from Bulgaria; new ones were then locally created or translated from the Greek. The oldest extant Rus' sermon is the panegyric \*'Slovo o zakoni i blahodati' (Sermon on Law and Grace, 1051) by the eloquent Metropolitan Ilarion. Other famous Rus' preachers were Hegumen Moisei of the Vydubychi Monastery, the author of 'Pokhvalne slovo' (Sermon of Praise, 1198), and Bishop \*Cyril of Turiv (d 1182), who freely dramatized events from the Gospel and was called the 'new Chrysostom.' Alongside didactic sermons (eg, by \*St Theodosius of the Caves, d 1074), describing the duties of monks, condemning paganism and social inequality, and exhorting the faithful to observe the church's teachings, a genre of Byzantine rhetoric dealing with the fine points of theology was fostered.

Homiletics in Kievan Rus' evolved until the Mongol invasion and the sacking of Kiev in the mid-13th century, after which it was continued on a lesser scale in Galicia-Volhynia, which was less affected by the invasions from the east. Translations and newly composed collections of sermons such as the \*'Izmarahd (Emerald) and \*'Zlataia tsep' (Golden Chain) were used. The sermons of Bishop

\*Serapion of Vladimir (d 1275) dealt with the Mongol invasion and the fate of the church, and those of Metropolitan G. Tsamblak of Kiev (1415–19) elucidated the feast days. Metropolitan \*Cyprian of Kiev (1376–89) translated many well-known sermons by St John Chrysostom.

The decline of homiletics between the 13th and 15th centuries in the Ukrainian church was commented on by both Catholic (P. Skarga in 1577) and Orthodox (Prince K. Ostrozky in 1593) figures.

Homiletics revived in Ukraine in the 16th century because of the influence of the Reformation and the schism in the Ukrainian church (culminating in the Church Union of \*Berestia in 1596). In the religious polemics that arose between the Orthodox and the new Uniate Catholic churches, the sermons of the Orthodox hierarchs Z. \*Kopystensky and M. \*Smotrytsky and the Uniates I. \*Potii and Y. \*Kuntsevych played a central role in the development of this art.

Vade mecums in homiletics were the numerous \*didactic gospels of the 16th and 17th centuries that were used not only by clerics but also by preceptors and by lecturers and students at Orthodox brotherhood schools. Sermons were recited by heart by professional preachers called *kaznodii*; and among the most talented of these was the monk and teacher S. \*Zyzanii. Homiletics was taught in the rhetoric classes of brotherhood schools and at Catholic colleges, and bishops put much effort into acquiring the best preachers for their cathedrals. Hegumens, who were obliged to preach sermons to their monks, were known for being proficient preachers; Y. \*Zalizo was particularly famous for his homilies.

In the 17th century, sermons were delivered in bookish Belorussian-Ukrainian combined with vernacular elements, in Church Slavonic, or in Polish. Both the Orthodox and Uniate churches placed much emphasis on the clarity of sermons. Comprehensibility was recommended by the Vilnius congregation in 1636 and by I. \*Vyshensky in his teachings, and it was popularized in the *trebnyky* (books of rituals) of Metropolitan P. Mohyla and Bishop H. Balaban. Sermons were usually preached after the reading of the Gospel in Uniate churches, while Orthodox priests as a rule delivered their sermons at the end of the liturgy. By the turn of the 17th century, two tendencies in homiletics were discernible: (1) the Old Ruthenian or Conservative, which adhered to traditional Greek teachings; and (2) the new or Western, which touched on contemporary questions that were relevant to the audience. A combination of the two was recommended in the Didactic Gospel of 1616, which advised not to discuss the unfathomable mysteries of the faith but 'to teach the common and uneducated people God's will and commandments.' Both tendencies were apparent in collections of sermons such as L. Baranovych's *Truby sloves propovidnykh ...* (The Trumpets of Preaching Words, 1674) and A. Radyvylovsky's *Vinets Khrystov* (Christ's Wreath, 1688). With the development of literary baroque, homiletics revived. The best example of this trend is probably I. \*Galiatovsky's work on homiletics, published as part of his *Kliuch razuminiia* (Key to Understanding, 1659, 1663, 1665).

When in the late 17th century the Ukrainian Orthodox church came under the control of Moscow, the hitherto common homiletical practices of the Orthodox and Uniate churches began to diverge. Kiev's best Orthodox

preachers (including Metropolitan S. \*Yavorsky and Archbishop T. \*Prokopovych) were brought to Moscow and St Petersburg to modernize homiletics in Russia.

As a result of systematic Russification, homiletics in the Ukrainian language progressively declined in the 19th century. Nationally conscious preachers strove occasionally to save Ukrainian homiletics, but their efforts (eg, the publications of sermons in Ukrainian by Rev V. \*Hrechulevych and Rev I. Babchenko) were largely unsuccessful. In the 20th century, Archbishop P. Levytsky was punished for similar efforts, as was Bishop A. Hudko for preaching in Ukrainian in Volhynia in 1904–9.

In the Ukrainian Catholic church, the 18th century saw the continuation of developments of the previous century, and the Ukrainian bookish, and later the vernacular, language replaced Church Slavonic and Polish in homiletics. The first collections of sermons were published by the \*Basilian monastic order and used to teach oratory in their schools: *Narodovishchaniie ...* (Popular Preaching, 1756) and *Simia slova Bozhiiia prostym iazykom* (The Seed of God's Word in Simple Language, 1772). Of the enlightened Basilian preachers, I. Kostetsky, Hegumen K. \*Srochynsky, and Yu. Dobrylovsky were well known. After the partition of the Ukrainian lands in the Polish-Lithuanian Commonwealth between Russia and Austria (1772), the Russian authorities persecuted, and by 1830 abolished, the Ukrainian Catholic church in the territory under their control. That church continued its legal existence only in Austrian-ruled Western Ukraine. There, the clergy was educated in German and Polish schools and at first preached only in Polish, especially in the larger towns.

At the turn of the 19th century, under the influence of the nascent Ukrainian national movement, the clergy in Western Ukraine began using the vernacular in their sermons and publications – eg, *Nauky parokhyial'nyia z slaveneruskoho iazyka na prostyi iazyk ruskyi perelozhennyyia* (Teachings for Parishes Translated from the Slavonic-Ruthenian into the Common Ruthenian Tongue, 1794). Sermons were published in the vernacular by M. Luchkai (2 vols, 1831), T. Vytvytsky (2 vols, 1847), and A. Dobriansky (1850) and in supplements to such newspapers as *Zoria halytska* (1853–4). The theology department at Lviv University introduced Ukrainian lectures on homiletics in 1850. The level of preaching improved significantly when Yu. Pelesh's *Pastyrs'ke bohoslavia* (Pastoral Theology, 2 vols, 1876–7) was introduced as the study text. A popular lecturer on homiletics at the university and author of several collections of sermons was I. \*Bartoshevsky. In the 1930s, lectures on homiletics were given at the Greek Catholic Theological Academy in Lviv and other theological seminaries. Sermons were published in the religious journals *Nyva*, *Bozhe slovo*, *Dobryi pastyr*, *Sivach*, and *Dushpastyr*. Among the more eminent preachers were Metropolitan A. Sheptytsky and bishops H. Khomyshyn and S. Ortynsky.

The Ukrainian Orthodox church was restored under the Ukrainian National Republic in 1917 and survived in Soviet Ukraine until the early 1930s. During this time homiletics was fostered by the Ukrainian Autocephalous Orthodox church (UAOC); because of the lack of printing presses, sermons were produced in typescript or in hand-copied form using duplicating machines. The UAOC created groups of 'good messengers' (*blahovisnyky*) among the clergy and laity and introduced special homiletical

services. Metropolitans V. Lypkivsky and M. Boretsky were eminent UAOC preachers. Since the 1930s sermons in Soviet Ukraine have been delivered mostly in Russian (except in the Western Ukrainian regions annexed in 1944). Until 1944 the Orthodox theological seminaries in Western Ukraine taught homiletics; sermons were published in periodicals and separately in books such as Archbishop O. Hromadsky's *Slova* (Words).

Homiletics has always played a very important role in the Evangelical churches. The preachers among the \*Baptists in Russian-ruled Ukraine have only used Russian, however, and Ukrainian came to dominate in sermons in Western Ukraine only in the 20th century. Despite severe restrictions by the Soviet state, Baptist homiletics has survived in Ukraine. In the United States and Canada, the Ukrainian Evangelical Christians and Baptists have published sermons and have had experienced preachers, such as pastors V. Borovsky and O. Harbuziuk.

Homiletics has developed normally outside the Soviet bloc within all the Ukrainian churches, and they have published or republished a considerable number of collections of sermons – eg, Rev K. Lototsky's (1954), Archbishop V. Malets's (1963), Metropolitan V. Lypkivsky's (1969), Rev T. Minenko's (1980), Cardinal Y. Slipy's (1981), Rev I. Figol's (1981), and Cardinal M. Liubachivsky's (1984) – and radio sermons – eg, Rev S. Mudry's (1970), I. Barchuk's (1971), and Rev M. Dyrda's (1974) – and studies and textbooks on homiletics – eg, Rev F. Kulchynsky's (1971).

*Homin Ukrainy*

**Homin Ukrainy** (Echo of Ukraine). Political weekly published in Toronto since 15 December 1948; unofficial organ of the \*Canadian League for Ukraine's Liberation since August 1949. Established to publicize the resistance of the Ukrainian Insurgent Army to Soviet rule, in its political orientation it is militantly anti-communist and

pro-OUN (Bandera faction). Its editors have been M. Sosnovsky (1948–9, 1951–4), R. Rakhmanny (1949–51), V. Solonyuka (1954–79), A. Bedrii (1979–80), O. Matla (1980–1), and O. Romanyshyn (1981–). A monthly supplement on literature and art, edited by B. Stebelsky, has appeared since September 1955. An eight-page English-language monthly supplement, *Ukrainian Echo*, began in May 1977, edited by A. Bandera (1977–84) and I. Mytsak (1984–). In 1985 the paper's weekly circulation was 11,500.

Vadym Homoliaka

**Homoliaka, Vadym** [Homoljaka], b 30 October 1914 in Kiev. Composer. A student of L. Revutsky, he graduated from the Kiev Conservatory (1946) and then lectured there for two years. He has written many ballets including *The Zaporozhian Cossacks* (1954), *The Sorochyntsi Fair* (1954), *Black Gold* (1957, 2nd version 1960), *Puss in Boots* (1959), and *Oksana* (1964). He has also composed a number of symphonic poems, overtures, concertos, symphonies, and film scores.

**Homosexuality.** See Sexual life.

**Homzyn, Borys** (pseud: Newfryingpan), b 20 June 1887 on the family estate near Savran, Balta county, Podilia gubernia, d 15 November 1965 in Berlin. Writer, editor, and civic figure. After serving as an officer in the UNR Army in 1917–21, he emigrated to Prague in 1922, where he edited the student journal *Spudei* and the newspaper *Ukraina*. In 1938 he moved to Berlin, where he was active in the Hetmanite movement and edited the journal *Nastiiia v pokhodi*. Homzyn contributed articles, stories, and poems to the underground publications of OUN and later to many émigré periodicals. Only some of them have been published in separate collections, such as the collection of modernist poetry *Troizillia* (Clover, 1928) and, under his pseudonym, the book *Bol'shevizm – orhanichne moskovs'ke iavyshe* (Bolshevism – an Inherent Muscovite Phenomenon, 1957).

**Honchar, Ivan** [Hončar], b 27 January 1911 in Lypianka, Chyhyryn county, Kiev gubernia. Sculptor and ethnographer. He studied at the Kiev Industrial Arts School (1927–30) and the Kiev Institute of Agrochemistry and Soil Sciences (1931–6). In the 1930s he began sculpting; he has produced such works as the statues *Shevchenko at the Precentor's* (1939), *Young Taras Shevchenko* (1950), *Lesia Ukrainka*, and *Ustym Karmeliuk* (1965), and busts of the writers A. Malysenko and O. Honchar (1949).

Having collected historical and ethnographic materials throughout Ukraine, in 1960 he set up in his apartment a private museum of over 3,000 items (tools, clothing, ceramics, icons, embroideries, Easter eggs, and old books). His 16 volumes of ethnographic materials remain unpublished.

Oles Honchar

**Honchar, Oles** [Hončar, Oles’], b 3 April 1918 in Sukha, Kobeliaky county, Poltava gubernia. One of the most prominent Soviet Ukrainian writers of the postwar period; a full member of the AN URSR since 1978. A Second World War veteran and graduate of Dnipropetrovske University, he has been publishing since 1938. From 1959 to 1971 he headed the Writers’ Union of Ukraine. Honchar gained prominence with the novel-trilogy *Praporonosti* (The Standard Bearers, 1947–8, English trans 1948) about the Red Army in the Second World War. His other works include the novellas *Zemlia hude* (The Earth Drones, 1947), *Mykyta Bratus’* (1951), *Shchob svityvsia vohnyk* (Let the Fire Burn, 1955), and *Bryhantyna* (The Brigantine, 1973); the novels *Tavriia* (1952), *Perekop* (1957), *Liudyna i zbroia* (Man and Arms, 1960), *Tronka* (The Sheep’s Bell, 1963), *Tsyklon* (The Cyclone, 1970), *Bereh liubovi* (The Shore of Love, 1976), *Tvoia zoria* (Your Dawn, 1980), and *Sobor* (The Cathedral, 1968), which was officially censored and subsequently removed from circulation; the short-story collections *Modry kamen’* (The Modra’s Rock, 1948), *Pivden’* (The South, 1951), *Chary-komyshi* (Enchantments-Rushes, 1958), and *Masha z Verkhovynny* (Masha from the Highlands, 1959); and three collections of literary articles (1972, 1978, 1980). His works have been republished many times (eg, in 6 vols in 1978–9) and translated into over 40 languages, and have been the subject of a large body of Soviet literary criticism.

I. Koshelivets

**Honcharenko, Ahapii** [Hončarenko, Ahapij] (real name: Humnytsky, Andrii), b 31 August 1832 in Kryvyn, Skvyra county, Kiev gubernia, d 5 May 1916 in Hayward, Alameda county, California. Orthodox priest, publicist, and first Ukrainian political émigré to the United States. A descendant of a Cossack family, he graduated from the Kiev Theological Seminary and entered the Kievan Cave Monastery. Sent to Athens in 1857 to serve as deacon at the embassy’s church, he began to contribute articles to A. Herzen’s *Kolokol*. He was discovered and arrested in 1860, but escaped and traveled extensively before immigrating to the United States in 1865. A subsidy from

Ahapii Honcharenko

the federal government enabled Honcharenko to establish in San Francisco a semimonthly (eventually a semi-weekly) newspaper – the *Alaska Herald*, with a Russian and Ukrainian-language supplement *Svoboda* – aimed at the inhabitants of recently purchased Alaska. He published the paper single-handedly from 1868 to 1872, glorifying the Ukrainian Cossacks, popularizing T. Shevchenko’s poems, defending democracy, individual freedom, and private initiative, and attacking Russian autocracy and imperialism, the conservatism and corruption of the Russian church, and capitalist monopolies. He also prepared the *Russo-English Phrase Book* (1868) for American soldiers serving in Alaska. He retired to a farm in Hayward that he named ‘Ukraina ranch.’ There in the early 1900s a group of Ukrainian immigrants from Canada and Galicia organized a short-lived commune called the Ukrainian Brotherhood. M. \*Pavlyk corresponded with Honcharenko and published his *Spomynky* (Recollections, 1894) in Kolomyia.

V. Markus

**Honcharenko, Hnat** [Hončarenko], b ca 1837 in Ripky, Kharkiv county, d ca 1917. One of the most famous \*kobzars. Blind from childhood, he learned to play the kobza at 20–22 and wandered throughout the Kharkiv region, singing and playing \*dumas, psalms, and humorous songs in the traditional manner and teaching other kobzars. He spent the last part of his life mostly in Sevastopol. In 1908 Lesia Ukrainka took Honcharenko to Yalta and, with the help of her husband K. Kvitka and O. Slaktion, recorded his dumas on phonograph cylinders. F. Kolessa transcribed and published them in the collection *Melodii ukrains’kykh narodnykh dum* (The Melodies of Ukrainian Folk Dumas, 2 vols, 1910, 1913; repr 1969).

**Honcharenko, Nina** [Hončarenko], b 20 August 1919 in Pokrovtsi, Melitopil county, Tavriia gubernia. Opera singer (mezzo-soprano). A graduate of the Kiev Conservatory (1944), she was a soloist of the Kiev Theater of Opera and Ballet from 1944 to 1969. Her main roles included Amneris in Verdi’s *Aida*, Carmen in Bizet’s *Car-*

(from left) Hnat Honcharenko and Ostap Borodai

men, Nastia in M. Lysenko's *Taras Bulba*, Varvara and Solomiia in K. Dankevych's *Bohdan Khmelnytsky*, and the mother in H. Maiboroda's *Arsenal*.

**Honcharenko, Oleh** [Hončarenko], b 18 August 1931 in Kharkiv. World-class speedskater. He won the world skating championship three times (1953, 1956, 1958), the European championship (1957), and two bronze medals at the Winter Olympics in Cortina d'Ampezzo (1956).

**Hondius (de Hondt), Willem**, b ca 1597 at The Hague, d ca 1658 in Danzig (now Gdańsk). Renowned Dutch copper engraver, son and pupil of H. Hondius I. Working in Danzig (1634–53), he engraved – from G.-L. Beaulplan's sketches – maps of Ukraine (1640, 1648, 1650), which appeared in the latter's *Description of Ukraine*. Among his other works related to Ukraine are three portraits of Hetman B. Khmelnytsky (1651), a map of the marshes near Pynske with a dedication to Yu., V., and S. Nemyrych (1650), and the frontispiece to J. Pastorius's *Bellum Scythico-Cosacium ...* (1652).

**Honennia slidom** ('pursuing the trail'). One of the investigative methods practiced under Princely and Lithuanian-Ruthenian criminal law. It was applied in cases of murder or theft and was conducted by the victim or his relatives with the aid of the community. The person to whom the trail led was considered guilty unless he managed to 'divert the trail.' In the Hetman period *honennia slidom* was known as *shliakuvannia*.

**Honey plants.** The common name for a large group of wild and cultivated plants from whose flowers honeybees gather nectar and pollen.

Up to 1,000 different species of honey plants are known in the USSR, but only some 200 of these produce sufficient quantities of nectar and pollen to be useful in apiculture (see \*Beekeeping). Honey plants commonly cultivated in Ukraine include sunflower, buckwheat, clover, mustard plant, beans, vetch, sweet clover, rape, medic, radish, many garden crops such as cucumbers, melons, grapes, and citrus plants, and almost all fruit and berry plants. Cotton, kenaf, salvia, dandelion, anise, sage, valerian, coriander, mint, wild thyme, and cornflower also serve as good sources of nectar and pollen. Trees and shrubs form another important group of honey plants, the most common being linden, maple, acacia, caragana, willow, cranberry, apricot, pear, cherry, apple, and plum trees and raspberry, gooseberry, and black-currant bushes. While most honey plants have other uses, some are cultivated specifically for their nectar and pollen (eg, phacelia, viper's bugloss, ground ivy, white dead nettle, burnet, woundwort). Some plants are only a source of pollen: hazel, alder, birch, poppy, corn, sorrel, ripple grass, and others. The cultivation of honey plants in Ukraine was first researched and promoted by P. \*Prokopovych.

**Honorsky, Rozumnyk** [Honors'kyj], b 1790 in Tula, Russia, d 27 August 1819 in Kharkiv. Writer and publicist. Having studied at St Petersburg Pedagogical Institute, Honorsky became a lecturer of literature, statistics, and geography at Kharkiv University (1816). Along with E. Filomafitsky and H. Kvitka-Osnovianenko, he edited and published one of the first journals in Ukraine, \**Ukrainskii vestnik* (1816–18). He also wrote poetry and a number of works on literary theory.

**Hooliganism.** The Soviet term for acts of disorderly conduct or disrespect for social standards. At times various 'non-conformist' deeds are also referred to as hooliganism. The crime is defined in article 206 of the Criminal Code of the Ukrainian SSR; punishment for it is dispensed by the courts or administrative procedure; eg, by the head of the local militia. Acts of petty hooliganism by minors 16 years of age or younger are punishable by fines aimed at restitution and payable by the parents. Acts of petty hooliganism by adults are punishable by detention for 10 to 15 days, corrective labor for one to two months at a fifth of one's salary, or a fine of 10 to 30 rubles. Punishment for major acts varies from a fine of 30 to 50 rubles to imprisonment or corrective labor for six months to one year. Malicious hooliganism involving resisting the militia is punishable by imprisonment for one to five years. Malicious hooliganism involving dangerous weapons is punishable by imprisonment for three to seven years.

Manifestations of political or religious opposition, such as participating in an officially unsanctioned demonstration or gathering or publicly resisting the authorities, are often branded as hooliganism. Such was the case on 21

May 1972 in Kiev, when around 50 people who gathered at T. Shevchenko's monument to sing Ukrainian songs were accused of petty hooliganism and held for 15 days. Often the authorities set up their opponents by staging street fights and acts of assault and using false witnesses who are often police agents. Thus, in recent years many dissidents and human-rights activists have been tried for hooliganism and imprisoned.

Although Soviet propaganda insists that hooliganism is typical only of Western societies, this phenomenon is quite widespread in the USSR, particularly among young people, because of a low standard of social mores and the inadequacies of the social system. Thus in 1976 hooliganism accounted for 24 percent of the total number of criminal convictions (976,000) in the USSR.

V. Markus, S. Maksudov

**Hop growing.** The hop (*Humulus*) is a perennial climbing herb whose dried cones are used as medicine and as beer flavoring. In Ukraine hops began to be cultivated in the 1870s under the influence of Czech colonists in the climatically suited regions of Volhynia and Kiev gubernias. By 1913, 5,000 ha were devoted to hops and the harvest reached 6,000 t. During the First World War and the Revolution production fell: in 1922 only 280 ha were seeded with hops. By 1940, however, production approached the prewar level: 5,750 ha were seeded and the yield was 0.75 t per ha. Although the area devoted to hops has increased continuously to 6,100 ha in 1964 and 6,800 ha in 1970, yields have remained low – between 0.8 and 1 t per ha. Ukraine produces up to 70 percent of the hops grown in the USSR, and most of its production is exported to breweries in other Soviet republics. Zhytomyr oblast, which accounts for 60 percent of the area devoted to hops and 70 percent of the gross harvest, is the leading hop-growing region in Ukraine.

Hopak

**Hopak.** An original Ukrainian folk dance of an improvised nature. Its name is derived from *hopaty*: 'to leap and stamp one's feet.' The *hopak* arose as a male dance at the Zaporozhian Sich in the 16th century and gradually spread throughout Ukraine, particularly through the Kiev region. As it spread it became transformed into a group dance performed by couples with males retaining the lead role. It has several variants: a solo dance, a group and couple dance, and in Western Ukraine a circular dance (*hopak-kolo*). Its charm and attractiveness lie in the *hopak's* freedom of improvisation, which allows individual dancers to display their talents within a larger dance group. The basic male movements are leaps, squats,

stretches on the ground and in the air, and various turns; the female movements are quick steps, bends, and turns. Solo performances in the *hopak* often involve a competition in virtuosity. Complex acrobatic movements are common in stage arrangements of the dance. The tunes to which the dance is performed vary greatly. Some of them are songs, such as 'Od Kyieva do Luben' and 'Hop, moi hrechanyky.' Others are original compositions. The tempo is fast; the beat is 2/4. The *hopak* is the culminating dance in the repertoire of almost all Ukrainian dance ensembles. It is very popular among Ukrainians outside Ukraine. *Hopak* melodies often appear in classical music: in such operas as S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, M. Lysenko's *Taras Bulba*, P. Sokalsky's *The Defense of Dubno*, and B. Yanovsky's *Black Sea Duma*; in such ballets as A. Svechnikov's *Marusia Bohuslavka* and B. Libovyt'sky's *Marusia*; and in A. Shtoharenko's symphonic suite *In Memory of Lesia Ukrainka*.

M. Hnatiukivsky

**Hopko, Vasyl**, b 21 April 1904 in Hrabské, Prešov region, Czechoslovakia, d 23 July 1976 in Prešov. Ukrainian Catholic bishop of the Prešov eparchy. Hopko studied at the Theological Seminary in Prešov and at Charles University in Prague, where he obtained a D TH. In 1934 he organized a Ukrainian Catholic parish in Prague. From 1945 he edited the journal *Blahovisnyk*. In 1947, he was consecrated as auxiliary bishop of Prešov eparchy. Upon its liquidation in 1950, Hopko was arrested and sentenced to 15 years' imprisonment. He was released in 1964 and actively participated in the attempts to restore the Prešov eparchy in 1968–9, but was not permitted to serve as its bishop.

**Horák, Jiří**, b 4 December 1884 in Benešov, Bohemia, d 14 August 1975 in Martin, Slovakia. Prominent Czech Slavist; full member of the Czechoslovak Academy of Sciences from 1956. A professor at Prague (1919–22, 1927–44, 1949–51) and Brno (1922–6) universities, he specialized in Ukrainian literature and folklore, most of his studies appearing in Czech ethnographic and philological journals. As the general secretary of the First Congress of Slavic Philologists (Prague 1929), Horák was instrumental in representing Ukrainian studies as an independent discipline for the first time at an international forum.

**Horak, Stephan**, b 23 October 1920 in Horodok, Galicia, d 20 December 1986 in Charlston, Illinois. Historian and bibliographer. A graduate of the universities of Erlangen (FH D 1949), Bonn, and Michigan, and full member of the Shevchenko Scientific Society; from 1965 he was professor of Russian and modern European history at Eastern Illinois University. Among his monographs are *Ukraine in der internationalen Politik, 1917–1953* (1957), *Poland and Her National Minorities, 1919–1939: A Case Study* (1961), and *Poland's International Affairs, 1919–1960* (1964). Bibliographic guides that he has edited or compiled include *Russia, the USSR and Eastern Europe: A Bibliographic Guide to English-Language Publications* (2 vols, 1978, 1982), *Guide to the Study of the Soviet Nationalities: Non-Russian Peoples of the USSR* (1982), and *The Soviet Union and Eastern Europe: A Bibliographic Guide ...* (1985). He was editor of the journal *Nationalities Papers* (1972–85) and the president of the Association for the Study of the Nationalities of the USSR and Eastern Europe (1973–).

**Horbach, Anna Halyna** [Horbač] (Horbatsch) (née Lutsiak), b 2 March 1924 in Brodina, Bukovyna. Publicist and translator. Horbach works primarily as a translator and popularizer of Ukrainian literature and as an analyst of contemporary literary developments in Ukraine, especially the literature of dissent. Her translations into German include several prose works; two anthologies of modern Ukrainian prose, *Blauer November* (1959) and *Ein Brunnen für Durstige* (1970); and Ukrainian stories for children.

Oleksa Horbach

Ivan Horbachevsky

**Horbach, Oleksa** [Horbač, Olexa] (Horbatsch), b 5 February 1918 in Romaniv, Bibrka county, Galicia. Linguist and philologist. A graduate of the University of Lviv, where he studied with V. Simovych, J. Janów, and Z. Stieber, he lectured at West German universities (1952–65) and became professor of Slavic Studies at the University of Frankfurt (1966–79). He wrote a dissertation and articles on social dialects in Ukrainian, as well as studies on Ukrainian, Church Slavonic, and Polish texts of the 16th–19th centuries, the most important of these being his study of the grammar by M. Smotrytsky and the lexicon by P. Berynda. He has also published descriptions of Ukrainian dialects, especially in Rumania, Slovakia, and Yugoslavia. Likewise, he has published numerous previously unpublished or inaccessible middle-Ukrainian texts as well as studies in historical lexicology, focusing on problems of etymology.

**Horbachevsky, Antin** [Horbačevs'kyj], b 27 January 1856 in Zarubyntsi, Zbarazh county, d 26 April 1944 in Sianik, Galicia. Lawyer and civic and political figure in Galicia. He was an active member of the populist movement and later cofounder of the Ukrainian National Democratic Alliance, as well as editor of the newspaper *Dilo* (1883–4). From 1912 to 1918 he was a member of the Austrian State Tribunal in Vienna; in 1913 he was elected to the Galician Diet. During the Western Ukrainian National Republic he was a member of the Ukrainian National Council and, in 1919, of the Ukrainian diplomatic mission in Warsaw. From 1927 to 1939 he was a senator in the Polish Senate and chairman of the Ukrainian Parliamentary Club.

**Horbachevsky, Ivan** [Horbačevs'kyj], b 4 October 1800 in Nizhen, Chernihiv gubernia, d 21 January 1869 in

Petrovskii Zavod, Trans-Baikal province. Civic and political figure and a \*Decembrist. The descendant of an impoverished Ukrainian noble family, he was an officer in the 8th Artillery Brigade in Novohrad-Volynskyi. In 1823 he became a member of the \*Society of United Slavs and a representative to the Vasylykiv council of the \*Southern Society. For participating in the revolt of the Chernihiv regiment, he was arrested in February 1826 and sentenced to hard labor for life; the term was later reduced to 20 years. He served the sentence in the Trans-Baikal province, where he remained until his death. He is the author of *Zapiski, Pis'ma* (Notes, Letters, 1925, 1963).

**Horbachevsky, Ivan** [Horbačevs'kyj], b 15 May 1854 in Zarubyntsi, Zbarazh county, Galicia, d 24 May 1942 in Prague. Biochemist, epidemiologist, political figure; full member of the Czech Academy of Sciences and from 1925 of the All-Ukrainian Academy of Sciences; honorary member of the Shevchenko Scientific Society. A graduate of Vienna University (1875), from 1883 to 1917 he was a professor at Prague University, dean of its medical faculty for four years, and university rector (1902–3). He founded the Institute of Physiology in Prague. Horbachevsky served on the Supreme Health Council in Vienna and in 1908 was appointed to the Austrian upper chamber. In 1917–18 he was the first minister of health for Austria. In 1919 he helped found the \*Ukrainian Free University in Vienna. When it moved to Prague in 1922, he served as professor and rector (1923–4, 1931–5).

Horbachevsky's principal scientific contributions are in organic and physiological chemistry. He was one of the first chemists to isolate amino acids and to establish that they are protein components. His synthesis of uric acid from carbamide and glycine in 1882 marked an important breakthrough. He established how uric acid is formed in the body and studied uremia. In 1889–91 he discovered xanthineoxidase. Besides numerous scientific papers, Horbachevsky wrote a Czech textbook – *Lékařská chemie ve čtyřech dílech* (Medical Chemistry in Four Volumes, 1904–8) – and a Ukrainian textbook for advanced students – *Orhanichna khimiia* (Organic Chemistry, 1925). He devoted much thought to the development of Ukrainian chemical terminology, and also published in the areas of epidemiology, popular hygiene, and forensic medicine.

S. Trofimenko

**Horbak, Mykola** [Horbal'], b 6 May 1941 in Volovets, Gorlice county, Galicia. Musician, poet, and dissident.

Mykola Horbal

In 1970 he was arrested and sentenced to five years in a Soviet labor camp and two years of exile for writing the long poem 'Duma.' After his release he worked as a lift operator in Kiev. For joining the \*Ukrainian Helsinki Group, he was rearrested on 23 October 1979 and sentenced to another five years of hard labor. Rearrested while serving this sentence, he was condemned on 10 April 1985 to another eight years of imprisonment and three years of exile. Horbal's poetry, including *Detali pishchanoho hodynnyka* (Parts of an Hourglass, 1983), a collection of poetry and songs that are reflections upon prison life, has been published in the West.

**Horban, Mykola** [Horban'], b 1899 in the Poltava region, d ? Historian and writer. Among his scholarly works are *Narysy z istorii ukrains'koi istoriografii*, part 1: *Novyi spysok litopysu 'Kratkoe opisanie Malorossii'* (Essays on the History of Ukrainian Historiography, part 1: A New Redaction of the 'Short Description of Little Russia,' 1923) and articles in the periodicals and collections of the VUAN and in the journal *Chervonyi Shliakh*. His literary output consisted of the historical novelettes *Kozak i voievoda* (The Cossack and the Voivode, 1926) and *Slovo i dilo hosudareve* (The Word and Deed of the Ruler, 1930). Horban was arrested during the Stalinist terror in the early 1930s; deported to Kazakhstan, he worked there as an archivist and published several works on the history of that country and western Siberia.

**Horbatsch, Anna-Halja.** See Horbach, Anna Halyna.

**Horbatsch, Olexa.** See Horbach, Oleksa.

Volodymyr Horbovy

**Horbovy, Volodymyr** [Horbovyj], b 1898 in Dolyna, Galicia, d 21 May 1984 in Dolyna. Lawyer; political prisoner. Horbovy was an active member of the Ukrainian Military Organization and the OUN in the interwar period, for which he was imprisoned by the Poles in Brigdka prison in Lviv (1922) and in the Bereza Kartuzka concentration camp (1934). As a defense lawyer for Ukrainian political prisoners in Polish courts, he was best known for his defense of OUN members during the famous Warsaw trial in which 12 leading Ukrainian nationalists (including S. \*Bandera) were charged with the assassination of B. Pieracki, the Polish minister of internal affairs. In June 1941 Horbovy was elected head of the Ukrainian National Committee in Cracow, and issued a manifesto calling for an independent Ukraine. He

was arrested by the Germans but a year later was released on medical grounds. After the war he served as a legal adviser to the Czechoslovak Ministry of Agriculture. Horbovy was arrested by Czechoslovak authorities (1947) and in 1948 handed over to the Soviets, thereafter serving a sentence of 25 years in Soviet labor camps.

**Hordiichuk, Mykola** [Hordijčuk], b 9 May 1919 in Chornorudka, Skvyra county, Kiev gubernia. Ethnomusicologist. Hordiichuk is the chairman of the Department of Musicology at the AN URSR Institute of Fine Arts, Folklore, and Ethnography. He has written several monographs on prominent figures in Ukrainian music: M. Kolachevsky (1954), M. Leontovych (1956, 1974), H. Maiboroda (1963), P. Maiboroda (1964), and M. Leontovych (in Russian, 1977); as well as several surveys: *Derzhavnyi ukrains'kyi narodnyi khor* (The Ukrainian State Folk Choir, 1951), *Sovremennaia ukrainskaia narodnaia pesnia* (The Contemporary Ukrainian Folk Song, 1964), *Symfonichna muzyka* (Symphonic Music, 1960, 1962), and *Ukrains'ka radians'ka symfonichna muzyka* (Soviet Ukrainian Symphonic Music, 1969). Besides collecting and deciphering notations for many folk songs, he prepared a practical handbook, *lak zapysuvaty narodnu muzyku?* (How to Record Folk Music? 1960).

**Hordiienko, Dmytro** [Hordijenko], b 8 December 1901 in Pluzhnyky, Pyriatyn county, Poltava gubernia, d 1 January 1974 in Pluzhnyky. A writer and journalist. Hordiienko belonged to the literary organizations Molodniak (1926–30) and Prolitfront (1930). He is the author of the poetry collections *U put'* (On the Road, 1927) and *Arky* (The Arks, 1929); eight story collections, including *Zelenyi fligel'* (The Green Wing, 1928) and *Polamani liudy* (Broken People, 1929); the novels *Tynda* (1930), *Sribnyi kraj* (The Silver Land, 1931), and *Zavoioivnyky nadr* (Conquerors of the Earth's Depths, 1932); and several collections of essays. During the Stalin terror, in the mid-1930s, he was arrested and imprisoned in Siberia. He was rehabilitated after Stalin's death in 1956, and two volumes of his works were republished in 1965–6.

**Hordiienko, Kost** [Hordijenko, Kost'], b ? in the Poltava region, d 1733. Otaman of the Zaporozhian Sich from 1702. An enemy of Muscovy, he opposed Hetman I. Mazepa's acceptance of Russian domination. In March 1709 he arrived with 8,000 Zaporozhian Cossacks at the headquarters of the Swedish army and, with I. Mazepa's mediation, signed a treaty with Charles XII on 8 April at Velyki Budyshcha. After the Battle of Poltava he enabled Charles's and Mazepa's forces to cross the Dnieper near Perevolochna and to escape to Bendery. After Mazepa's death, Hordiienko supported P. Orlyk and in 1711 took part in Orlyk's unsuccessful campaign against Right-Bank Ukraine. After reaching an agreement with Turkey in 1712, he left Orlyk and until 1728 commanded the Oleshky Sich under the protectorate of the Crimean khan.

**Hordiienko, Kost** [Hordijenko, Kost'], b 3 October 1899 in Mykytyntsi, Proskuriv county, Podilia gubernia. Socialist realist writer and journalist. A member of the All-Ukrainian Association of Proletarian Writers, he wrote 21 story collections and 10 novellas, including *Automat* (The Automaton, 1928), *Povist' pro komunu* (Tale about a Commune, 1930), *Ataka* (The Attack, 1931), and *Skvar i*

Kost Hordiienko

Mykhailo Hordiievsky

syn (Skvar and His Son, 1935; rewritten as *Sim'ia Ostapa Tura* [Ostap Tur's Family, 1958]). His novels include *Dity zemli* (Children of the Earth, 1937; rewritten as *Zarobit-chany* [Migrant Workers, 1949]) and the trilogy *Buimyr* (1939–68). Many of his works are set in the countryside of the Lebedyn region (now in Sumy oblast). Hordiienko has also written a collection of articles about literary Ukrainian, *Slovo pro slovo* (A Word about the Word, 1964), and a collection of musings and reminiscences, *Riasne slovo* (The Abundant Word, 1978).

**Hordiienko, Yehor** [Hordijenko, Jehor], b 1812 in Okh-tyrka, Kharkiv gubernia, d 1897 in Kharkiv. Physician and civic leader. After graduating from Kharkiv University, he studied in Berlin and Paris and then taught chemistry at Kharkiv University. In the 1840s he made the first chemical analysis of the mineral waters in Slovianske. As a member of many organizations in Kharkiv and head of the city дума (1870–) and Kharkiv county zemstvo, he contributed to the development of education and the city's economy. He established the first plant for artificial mineral water in Kharkiv (1843) and wrote many articles about education, zemstvos, railroads, and peasants in the region. In his will he donated all his property to public education.

**Hordiienko Haidamaka Cavalry Regiment.** See Haidamaka Cavalry Regiment.

**Hordiievsky, Mykhailo** [Hordijevs'kyj, Myxajlo], b 5 June 1885 in the Kiev region, d ? Philosopher, Classical historian, and educator. Hordiievsky graduated from Odessa University in 1910 and became a professor there, teaching also at various schools in Odessa. He was a member of the Society of Ukrainian Progressives. During the Ukrainian Revolution of 1917–21 he was an active member of the Ukrainian Party of Socialist Revolutionaries. In the 1920s, as the head (1926–30) of the Odessa Scientific Society of the Ukrainian Academy of Sciences and of its pedagogical section, he was a leader in the implementation of the Ukrainization policy in the Odessa region. His main works include *Lesevych iako filosof* (Lesevych as a Philosopher, 1915), *Pedahohika prahmatyzmu* (The Pedagogy of Pragmatism, 1924), as well as numerous works on Pestalozzi and translations. His manuscript 'Rabstvo v starodavn'omu Rymi' (Slavery in Ancient Rome) was confiscated by the Soviet secret police before

it was published. He was arrested 27 March 1938 and was probably shot.

**Hordon, Volodymyr**, b 25 October 1871 in Lohvytsia, Poltava gubernia, d 3 January 1926 in Kharkiv. Specialist in civil law and procedure. In 1906 he was appointed professor of Kharkiv University, and in 1920 of the Kharkiv Institute of the National Economy. In 1925 he was elected full member of the Ukrainian Academy of Sciences. He directed the legal department of the People's Commissariat of Internal Trade of the Ukrainian SSR and took part in the preparation of the Ukrainian civil and civil-procedure codes. His chief works are *Status grazhdanskogo sudoproizvodstva* (The Status of Civil Court Procedure, 1914) and *Sistema sovetskogo torgovogo prava* (The System of Soviet Trade Law, 1924).

Sviatoslav Hordynsky: *Self-Portrait* (oil, 1960)

**Hordynsky, Sviatoslav** [Hordyns'kyj, Svjatoslav], b 30 December 1906 in Kolomyia, Galicia. Painter, graphic artist, poet, translator, art and literary scholar, son of Ya. \*Hordynsky; member of the Ukrainian Academy of Arts and Sciences and the Shevchenko Scientific Society. He studied art at O. Novakivsky's school in Lviv, then in Berlin (1928) and in Paris at the Académie Julien and the Académie de l'Art Moderne (with F. Léger, 1929–31). Returning to Lviv, he worked as a painter and book designer. He cofounded the Association of Independent Ukrainian Artists, edited its journal *Mystetstvo*, and organized its art exhibitions (1931, 1933). Immigrating to the United States in 1947, he helped found the Ukrainian Artists' Association there, serving as its president (1956–63) and participating in its exhibitions. Since 1950 he has painted about 50 churches in North America and Europe. His wall paintings and iconostases are a synthesis of the neo-Byzantine and modernist styles.

Several of Hordynsky's poetry collections have been published: eg, *Barvy i liniï* (Colors and Lines, 1933), *Viter nad poliamy* (The Wind above the Fields, 1938), *Vybrani poezii, 1933–1943* (Selected Poems, 1933–1943, 1944), and *Vohnem i smerchem* (By Fire and Whirlwind, Munich 1947). In its restraint and polish his poetry is close to that of the \*Neoclassicists. He is a versatile translator: his *Poety Zakhodu* (Poets of the Western World, 1961) contains 60 verses by Roman, Italian, French, English, German, and Polish poets. He has also translated the complete works of F. Villon (1973) and K. Ryleev's *Voinarovskii*. A jubilee edition of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1950), edited by Hordynsky, contains his rendering of the poem in contemporary Ukrainian. He has

also done a study of the poem's relation to Ukrainian folk poetry (1963).

Hordynsky has compiled and edited albums of such artists as T. Shevchenko (1942), P. Kovzhun (1944), H. Kruk, A. Pavlos, and M. Mukhyn (1947), V. Tsymbal (1972), P. Andrusiv (1980), and H. Mazepa (1983). His most important contributions to the history of Ukrainian art are *Ukraïns'ki tserkvy v Pol'shchi* (Ukrainian Churches in Poland, 1969) and *Ukraïns'ka ikona dvanadtsiatoho–vissnadsiatoho storichchia* (The Ukrainian Icon of the 12th–18th Centuries, in English and Ukrainian 1973, in German 1981). He is also the author of numerous articles on art in various journals and newspapers. An active member of the Ukrainian community, he is the vice-president of the Slovo Association of Ukrainian Writers in Exile.

V. Popovych

Yaroslav Hordynsky

**Hordynsky, Yaroslav** [Hordyns'kyj, Jaroslav], b 22 August 1882 in Shklo, Yavoriv county, Galicia, d 29 October 1939 in Lviv. Pedagogue and literary scholar. Hordynsky received his PH D from Lviv University and worked as a teacher of Ukrainian language and literature in Kolo-myia, and then at the Academic Gymnasium of Lviv and in the Lviv (Underground) Ukrainian University. In 1914 he became a full member of the Shevchenko Scientific Society; in 1918 he was elected deputy to the Ukrainian National Council of ZUNR. His numerous studies of such writers as V. Prokopovych, T. Shevchenko, I. Franko, and M. Khyvylovy appeared in the journals *Literaturno-naukovyi vistnyk*, *Dzvony*, *My*, *Nasha kul'tura*, and *Ukraïna* (1924–30). His most important work was the monograph *Literaturna krytyka pidsoviets'koi Ukraïny* (Literary Criticism in Soviet Ukraine, 1939), which remains the basic published work on the literary organizations and the \*Literary Discussion in Ukraine of the 1920s.

**Horetsky, Petro** [Horec'kyj], b 6 December 1888 in Mutyn, Krolevets county, Chernihiv gubernia, d 16 August 1972 in Kiev. Linguist. Horetsky was an associate of the Institute of the Ukrainian Scientific Language and later of the AN URSR Institute of Linguistics. He was active in Ukrainian lexicography in the 1920s (preparing a dictionary of pedagogic and psychological terms, 1928) and served as a compiler of volume four of the academy's Russian-Ukrainian dictionary (seized at the printer's before final publication). He coauthored (with I. Shalia) a grammar of the Ukrainian language (eight printings, 1926–9). Fol-

lowing his arrest (ca 1932) for alleged bourgeois nationalism, he was demoted to the status of a proofreader. Reinstated in the Institute of Linguistics, he took part in the preparation of the 6-volume Ukrainian-Russian dictionary (1953–63) and of the 11-volume Ukrainian dictionary (1970–80). He also wrote a survey of the history of Ukrainian lexicography (*Istoriia ukrains'koi leksykohrafiï*, 1963).

**Horiany** [Horjany]. v-3. Village (1969 pop 1,300) in Uzhhorod raion, Transcarpathia oblast. First mentioned in written sources in 1250, it has extensive orchards and vineyards. Its rotunda chapel, built at the turn of the 12th century, is a valuable historical monument. The chapel's annex is decorated with frescoes painted in the 15th century.

**Horiev, Mykola** [Horjev], b 21 June 1900 in Kazan, Russia. Pathophysiological; full member of the USSR Academy of Medical Sciences from 1953. A graduate of Irkutsk University (1926), for many years he headed a department of the AN URSR Institute of Physiology. He was a founder, the first director (1958–62), and then a department head at the Institute of Gerontology of the USSR Academy of Medical Sciences in Kiev. Horiev wrote close to 100 works on the physiology and pathology of blood circulation, shock, hypertrophy, myocardial infarction, arteriosclerosis, tuberculosis, kidney diseases, and gerontology.

**Horka, Lavrentii**, b 1671 in Lviv, d 10 April 1737 in Viatka, Russia. Writer and churchman. A graduate and then instructor at the Kiev Academy, in 1713 he was appointed hegumen of Vydubychi Monastery in Kiev and in 1722 of the Resurrection Monastery in Moscow. After consecration, he served as bishop of Astrakhan (1723–7), Ustiug (1727–31), Riazan (1731–3), and Viatka (1733–7). He wrote a treatise on poetics, *Idea artis poëseos* (1707–8), and a tragicomedy, *Iosif patriarkha* (Joseph, the Patriarch), which was staged at the Kiev Academy in 1708.

**Horkusha, Fylon** [Horkuša], b and d ? Cossack colonel. In the summer of 1648 he led the Cossack forces supporting the rebels in Belorussia against the Lithuanian nobility during the \*Cossack-Polish War. In the spring of 1651, as the colonel of Chornobyl regiment and together with the armies of M. Nebaba and A. Zhdanovych, he defended Ukraine's borders against the offensive of the Lithuanian army led by J. Radziwiłł. In March–April 1654 he was Hetman B. Khmelnytsky's envoy to the Muscovite government. He led a Cossack army in southern Volhynia in 1657. In June–November 1658 and in 1669–70 he was colonel of Poltava regiment. His subsequent fate is not known.

**Horlenko**. Line of Cossack officers descended from Lazar, colonel of the Pryluky regiment intermittently from 1658 to his death in 1687. The more distinguished members of the family were D. \*Horlenko, Lazar's son; Yakym (d before 1758), fellow of the standard from 1725, general flag-bearer from 1729, acting hetman in the Crimean campaign of 1737, and general judge from 1741; Y. \*Horlenko; and V. \*Horlenko.

**Horlenko, Dmytro**, b and d ? Colonel of Pryluky regiment (1692–1708) and a close associate of Hetman I. Mazepa. In 1708, with Mazepa, he switched allegiance from Tsar Peter I to King Charles XII of Sweden. After the Battle of Poltava in 1709, Horlenko fled with Mazepa to Bendery. He took part in the campaigns of Hetman P. Orlyk in Right-Bank Ukraine in 1711 and 1713. In 1715 he came into conflict with Orlyk and went to Russia, where he settled in Moscow. In 1731 he was allowed to return to Ukraine.

Nina Horlenko

**Horlenko, Nina**, b 1 March 1895 in Bilopillia, Kholm region, d 4 May 1964 in Philadelphia. Dramatic actress. She completed her studies at the Lysenko Music and Drama School in Kiev and began her career in M. Sadowsky's theater. In the 1920s she worked at the Kharkiv Chervonozavodskyyi Ukrainian Drama Theater, and in the 1930s at the Shevchenko Theater (formerly Berezhil). After the Second World War, she performed in Germany with the Ensemble of Ukrainian Actors (1946–8) and then moved to the United States. She appeared in plays by H. Sudermann, G. Hauptmann, V. Vynnychenko, and Lesia Ukrainka (*Boiarynia, Dol'ores*), and distinguished herself in the role of Ahapiia in M. Kulish's *Narodnyi Malakhii* (The People's Malakhii).

**Horlenko, Vasyl**, b 1 March 1853 in Yaroshivka, Roman county, Poltava gubernia, d 13 April 1907 in St Petersburg. Literary critic and art scholar. After graduating from the Sorbonne he returned to Ukraine in 1882 and maintained close ties with such Ukrainian cultural figures as M. Kostomarov, P. Myrny, P. Martynovych, M. Storozhenko, and M. Zankovetska. A frequent contributor to *Kievskaiia starina*, he wrote numerous surveys of Ukrainian literature, articles about dumas, book reviews, and literary portraits of such writers as T. Shevchenko, I. Kotliarevsky, H. Kvitka-Osnovianenko, I. Nechui-Levytsky, P. Myrny, I. Franko, and Ya. Shchoholev. In these portraits he combined, under the influence of C. Sainte-Beuve and H. Taine, esthetic judgment with historical description. He also wrote studies of such Classicist artists as D. Levytsky and V. Borovykovsky. Part of Horlenko's works were collected and published in *Iuzhmorusskie ocherki i portrety* (South-Russian Sketches and Portraits, 1898), *Ukrainskie byli* (The Ukrainian Past, 1899), and *Otbleski: Zametki po slovesnosti i iskusstvu* (Reflections: Comments about Literature and Art, 1905). His letters to P. Myrny were published in 1928. A monograph about him by D. Doroshenko was published in Paris in 1934.

Bishop Yoasaf Horlenko

**Horlenko, Yoasaf** (secular name: Yakym), b 19 September 1705 in Pryluka, Poltava region, d 21 December 1754 in Hraivoron, Slobidska Ukraine. Church leader and writer. He was a grandson of a Pryluka colonel and on his mother's side a grandson of Hetman D. Apostol. During his studies at the Kievan Mohyla Academy he took his monastic vows, and after graduating lectured at the academy (1729–31). In 1737 he became hegumen of the \*Mhar Transfiguration Monastery, and in 1748 bishop of Belgorod and Oboian (which included the later eparchies of Kharkiv, Kursk, and a part of Chernihiv). Horlenko rebuilt churches, raised the moral and educational level of the clergy, and supported Kharkiv College. He wrote a brief autobiography and a play, *Bran' chesnykh sedmi dobrodetelei z sedmi grekhami smertnimi* (The Struggle of the Seven Cardinal Virtues with the Seven Deadly Sins, 1737). He was venerated by the common people and in 1911 was canonized by the Orthodox church.

**Horlivka**. v-19, DB III-4. City (1984 pop 341,000) under oblast jurisdiction in Donetske oblast 40 km from Donetske, one of the most important anthracite-mining and industrial centers in the Donbas, and a railway and highway junction. Founded beginning in the mid-18th century as the villages of Hosudariv Bairak, Mykytivka, Zaitseve, and Zalizna, it is named after a Russian mining engineer who built the first coal mine there in 1867. By the early 20th century the mining settlement had developed into an important industrial center. From 10,000 inhabitants in 1898, its population grew to 30,000 in 1916, 23,100 in 1926, and 181,500 in 1939. Horlivka was devastated during the Second World War, but by 1959 its population had grown to 308,000 (46 percent of which was Ukrainian and 48 percent Russian). Since 1970 its coal industry has not expanded (until then over 10 million t of coal was produced annually); consequently its population has grown by only 6,000 since 1970. Of Horlivka's nine anthracite mines, several are among the largest in the Donbas: the Lenin, Kindrativka-Nova, Kocheharka, Komsomolets, and Gagarin mines. Also located there are five mineral-enrichment factories, the Styrol chemicals trust, a coke-chemicals plant, the Kirov machine-building plant (one of the largest coal-mining-machine manufacturers in the USSR), four mechanical repair plants, the Mykytivka mercury and dolomite plants, and the Panteleimonivka refractory-materials plant. Its food (meat, milk, wine), clothing, cloth furnishings, wood-working, and building-materials industries are all well developed. Among its educational institutions are a pe-

dagological institute of foreign languages (English and French), a branch of the Donetsk Polytechnical Institute, six special secondary schools, 12 vocational-technical schools, a city historical museum, a mining museum, and an art museum. The city is divided into three city raions.

V. Kubijovyč

**Horlivka Machine-Building Plant** (Horlivskiy mashynobudivelnyi zavod im. S.M. Kirova). One of the largest plants specializing in machine building for the coal industry in the USSR. It was established by a Belgian company in 1895 in Horlivka, now in Donetsk oblast. In 1928 the plant produced the first coal face-cutting machine in the USSR and in 1936, the smallest and shortest coal-cutting machine in the world, the HTK-3. By the end of the 1930s it was one of the principal producers of mining machinery for Ukraine and the USSR. Completely destroyed during the Second World War, it was reconstructed and now specializes in a wide range of shaft-mining machines. Coal combines produced there have been awarded gold medals at various international fairs. In the late 1960s the plant employed almost 2,500 workers.

**Horlytsi.** See Gorlice.

**Horlytsia** [Horlycja]. An old Ukrainian thematic dance performed by many couples, sometimes with a female (called the *horlytsia*) solo. It expresses liveliness, energy, and humor. The tempo is moderately quick; the beat is 2/4. The name of the dance is derived from the turtle-dove, which in Ukrainian folklore symbolizes faithful love.

**Hornbeam** (*Carpinus*; Ukrainian: *hrab*). Popular name for species of deciduous trees, less commonly bushes, belonging to the genus *Carpinus*, of the birch (*Betulaceae*) family. Hornbeams have smooth, gray bark, short trunks, and horizontally growing branches with ovate and double-toothed leaves. They are hardy, slow-growing trees that are used for loom shuttles, parquet floors, musical instruments, tools, fuel, and as an ornamental in parks and gardens. Two species of hornbeam occur in Ukraine: the European hornbeam (*C. betulus*), which is found predominantly in Right-Bank Ukraine, the Carpathians, and Crimea; and the eastern or little hornbeam (*C. orientalis*), also found in Crimea.

**Horniatkevych, Damian** [Hornjatkevych, Dam'jan], b 13 November 1892 in Lisko, Galicia, d 3 March 1980 in Kerhonkson, New York. Painter and art scholar. As a student at the Cracow Academy of Art, he researched works by medieval Ukrainian painters in Poland (among them frescoes from 1470 in the Wawel Cathedral in Cracow) and then published his results in *Postup* (1922-4) and *Notatky z mystetstva* (1965). After graduating in 1923, he studied portrait painting in Dresden and landscape painting in Munich (1925). Returning to Galicia, he painted mostly portraits and studied folk art. In the 1930s he painted four churches – in Nastasiv, Uhniv, Nemyriv, and Vorobliachyn. A displaced person after the war, he immigrated to the United States in 1949. He was vice-president of the Ukrainian Academy of Arts and Sciences in the US and head of its fine arts section (1951-70). He

Damian Horniatkevych

continued to paint in a realist style, concentrating on landscapes. Exhibitions of his work were held in New York in 1964, 1966, and posthumously in 1981. His publications include *Taras Schevtschenko als Maler* (1964) and numerous articles on Ukrainian artists, folk art, and the history of art.

**Horno** (The Forge). A communist literary group in Polish-occupied Western Ukraine that was founded in Lviv in May 1929 and took over publication of the journal *\*Vikna* (1927-32). Headed by V. Bobynsky, P. Kozlaniuk, and S. Tudor, it had 28 founding members, including O. Havryliuk, Ya. Halan, Ya. Kondra, and S. Masliak. From 1930 Horno belonged to the Moscow-sponsored International Bureau of Revolutionary Literature. In 1933 the group was officially dissolved under pressure from the Polish authorities. It continued functioning unofficially until 1939.

**Hornostavivka** [Hornostajivka]. VI-14. Town smt (1983 pop 5,830) on the Dnieper River and a raion center in Kherson oblast. Founded in the 18th century, the town serves as a port on the left bank of the Kakhivka Reservoir. Food production and local services are the mainstay of its economy.

**Hornovy, Osyp** [Hornovyj] (pseud of O. Diakiv), b 21 June 1921 in Olesyn, Berezhany county, Galicia, d 28 November 1950 in Velykopole, Yavoriv raion, Lviv oblast. Political activist and publicist. A member of the youth movement of the OUN from the late 1930s, in 1943-4 he served on the national executive of the youth wing of the OUN (Bandera faction) and was a member of the editorial board of *Iunak* and editor of the journal *Visti* (under the pseud Yuriiv). In 1945-8 he worked in the OUN leadership's central propaganda office. From 1948 he headed the OUN national executive in Lviv region. He became a member of the OUN leadership in 1949, and a member of the Ukrainian Supreme Liberation Council and vice-chairman of its General Secretariat in 1950. Hornovy died in a battle with MVD forces. His collected works, *Ideia i chyn* (Idea and Action), were published in London in 1968; an English-language edition of his writings appeared in New York as *The USSR Unmasked* (1976).

**Hornykiewicz, Oleh** [Hornykevych], b 17 November 1926 in Sychiv, Lviv county, Galicia. Biochemist and pharmacologist. A specialist in diseases of the central and peripheral nervous systems, Hornykiewicz received

his MD from the University of Vienna (1951) where he was a professor from 1953 to 1967. In 1956–8 he was a British Council Scholar at Oxford University. From 1967 to 1976 he was a professor at the University of Toronto, where he concurrently headed the Department of Psychopharmacology at the Clarke Institute of Psychiatry. Since 1977 he has been professor and chairman of the Department of Biochemical Pharmacology at the University of Vienna. Hornykiewicz has received international recognition for his research on Parkinson's disease and the palliative effects of the drug L-dopa, for which he and his colleagues received the prestigious Wolf Foundation Award in Medicine (1979). Hornykiewicz is coauthor of *The Pharmacology of Psychotherapeutic Drugs* (1969).

**Horod** or **Hrad**. A fortified settlement in Kievan Rus'; in later times the word described an administrative center for a larger region. The oldest Slavic fortified settlements in Ukraine were built by the Antes in the 6th century AD. A *horod* was usually located on an easily defensible site, in a forest, by adjoining lakes or marshes, or on a high riverbank. A moat and/or an earthen wall and wooden palisade surrounded the *horod* and provided further protection. A *horod* usually consisted of two parts: the inner or upper town (*\*ditynets*), located within the fortifications, and the outer or lower town (*okolnyi hrad, posad, pidhoroddia*, or *pryhoroddia*), outside the walls. The latter was inhabited mostly by merchants and artisans. *Horods* varied greatly in area and population, but in the early period of Kievan Rus' they were essentially rural settlements, or citadels, serving as places of refuge for the surrounding population in times of war. Those that were well situated (eg, near rivers or in mountain passes) became trade and manufacturing centers and acquired larger populations. Many old towns in Ukraine derive their names from a fortified settlement, such as Vyshhorod, Raihorod, Uzhhorod, and Bilhorod. In Kievan Rus' these settlements were so numerous that the Varangians called it the 'land of cities' (*Gardariki*). Volodymyr the Great, Yaroslav the Wise, and Danylo Romanovych built a great number of fortified settlements. (See also \*Cities and towns.)

**Horodenka**. v-6. City (1968 pop 9,400) and raion center in Ivano-Frankivske oblast. This Pokutia town was first mentioned in late 12th-century chronicles. By the 15th century, under Polish rule, it was a trade center. In 1668 it was granted the rights of Magdeburg law. Under Austrian (1772–1918) and Polish (1919–39) rule it was a county town. Today its largest plants are a sugar refinery and a liquor distillery.

**Horodetsky, Oleksii** [Horodec'kyj, Oleksij], b 30 March 1897 in Novokostychi, Samara gubernia, d 9 January 1967 in Kiev. Biophysicist, roentgenologist, and radiologist; corresponding member of the AN URSR from 1957. A graduate of Saratov University, he began his research in roentgenology in 1926, and from 1935 to 1941 taught at the Bashkir Medical Institute in Ufa. He served as head of the Department of Roentgenology and Radiology at the Kiev Institute of Postgraduate Medical Training (1944–67), and as chief roentgenologist of the Ministry of Health of the Ukrainian SSR (1945–50). In 1953–67 he headed the Biophysics Laboratory and the Roentgenological and Ra-

diological Department of the Kiev Institute of Experimental Biology and Pathology. In the course of his research into blood disorders, cancer, cardiac function, and irradiation of living tissue, he devised several new therapeutic irradiation techniques, as well as a complex treatment for the effects of radiation exposure.

**Horodetsky, Serhii-Volodymyr** [Horodec'kyj, Serhij-Volodymyr], b 1885 in Podilia, d 9 April 1956 in New York. Agronomist. From 1921 to 1941 he taught agronomy at agricultural institutes in Kamianets-Podilskyi, Kiev, and Zhytomyr and worked at the Agronomic Institute of the Belorussian Academy of Sciences, from which he received a doctorate. He was also an associate of the VUAN Scientific Research Chair of Botany. After the Second World War he lived in Germany and then in the United States. In 1946 he was appointed professor of the Ukrainian Technical and Husbandry Institute and a full member of the Shevchenko Scientific Society. He published numerous scientific and popular works, including *Sil's'ke gospodarstvo Podillia pered svitovoiu viinoiu* (Agriculture in Podilia before the World War, 1929).

**Horodetsky, Stepan** [Horodec'kyj], b 1853 in Mezhyhirs'ki, Stanyslaviv county, Galicia, d 26 November 1928 in Verbylivtsi, Rohatyn county, Galicia. Church and community leader; Greek Catholic priest. Having completed his studies in Lviv and Rome, he served as rector of the Lviv Theological Seminary, chaplain to Metropolitan S. Sembratovych, curate of Verbylivtsi, and dean of the Rohatyn chapter. In 1912 he was appointed papal chamberlain, and then vicar general and archpriest. A dedicated populist, he was an organizer of the National Democratic party, and later of the Ukrainian Labor party and of the Ukrainian National Democratic Alliance. He supported the local \*Prosvita society and the Ukrainian school movement in the county, and founded the first credit union in Rohatyn. In 1925 he was elected honorary member of Prosvita.

**Horodetsky, Vladyslav** [Horodec'kyj], b 4 June 1863 in Sholudky, Bratslav county, Podilia gubernia, d 3 January 1930 in Teheran. Architect. A graduate of the Academy of Arts in St Petersburg (1890), he worked for many years in Kiev, where he designed such buildings as the Art and History Museum (now the Kiev Museum of Ukrainian Art) in the classical style (1897–1900), a Karaite synagogue in a Moorish style (1899–1900), a Roman Catholic church in stylized Gothic (1899–1909), and a residential building on Bankova Street (now Ordzhonikidze no. 10) (1902–3). He designed numerous schools, churches, and industrial buildings in the Kiev region, Uman, Cherkasy, and Symferopil. In 1920 he moved to Warsaw and in 1928 to Iran, where he built the royal palace and other buildings.

**Horodlo, Union of**. An agreement concluded on 2 October 1413 between Duke Vytautas and the nobles of Lithuania and King Jagiello and the nobles of Poland in Horodlo, a town on the Buh River in the southern Kholm region. The agreement was intended to facilitate the complete union of Poland and Lithuania – a process begun by the Union of \*Krevo – by merging the administrations of the two states and by recognizing the noble claims of the Lithuanian boyars and magnates. The pres-

ervation of the distinct offices of Polish king and Lithuanian grand duke, however (although the latter was clearly subordinate), left the issue of the complete union unresolved. Under the terms of the agreement the Catholic nobles of Lithuania were granted equality with their Polish counterparts; Orthodox (mostly Ruthenian) nobles, however, were consigned to second-class status and prohibited from full participation in state affairs.

**Horodnia** [Horodnja]. II-12. City (1983 pop 12,400) and, since 1923, a raion center in northern Chernihiv oblast. First mentioned in 1552, from 1635 to 1654 it was a Polish county center, from 1705 to 1782 a Cossack company town, and from 1782 to 1917 a county town. In 1848, one of the first sugar refineries in Ukraine was built there. It received city status in 1957. The city produces flax fiber, bricks, and food, dairy, and wood products, and processes Labradorite.

**Horodnychyi.** In princely times an official who supervised the building and maintenance of towns, particularly their fortifications. During the Lithuanian-Ruthenian period the *horodnychyi* commanded the city and fortress and collected taxes from the *\*volost*; there were 15 such commanders in the Grand Duchy of Lithuania. From 1635 some *horodnychyi* were immediately subordinate to the grand princes and the Council of Lords. In Russia and Ukraine from 1775 to 1862 the term designated a county-seat administrator, who was also head of the local police.

**Horodnyk.** A category of indentured peasants in Ukraine in the 14th–19th centuries. *Horodnyky* were first mentioned in documents at the end of the 14th century, although their number grew most quickly beginning in the 16th century. They owned plots that were too small to support subsistence agriculture – usually up to 2 ha in area – and little livestock. They performed *corvée* without draft animals. *Horodnyky* also hired themselves out temporarily to wealthy peasants, merchants, chumaks, artisans, and others. They were especially numerous in more densely settled regions, constituting approximately 25–35 percent of the peasant population of Right-Bank Ukraine in the 16th and 17th centuries. *Horodnyky* took part in numerous peasant uprisings. After the peasant reforms of 1861, most received free land allotments.

**Horodok.** IV-4. Town (1970 pop 12,000) and raion center in Lviv oblast, situated 30 km from Lviv on the Verechchysia River. First mentioned in the Hypatian Chronicle as Soliany Horodok under the year 1213, in the 13th and 14th centuries it was an important fortified town in Galicia-Volhynia. In the early 15th century it received the rights of Magdeburg law. Destroyed by the Tatars in the 1530s, in the late 16th and early 17th centuries it flourished again as a center of trade (salt, cattle, and fish) and culture with a church brotherhood from 1591 and a school. During the Cossack-Polish War, Cossack and Muscovite troops routed S. Potocki's Polish army there in September 1655. The town was again destroyed by the Tatars in 1672. The Russian army defeated the Austrian army there in August 1914 after a six-day battle, and in February 1919 Western Ukrainian and Polish forces fought each other there for control of the Lviv-Peremyshl railway line. Today the town has clothing, food, and

construction industries. Among its architectural monuments are St Nicholas's Church (1510), the wooden Church of St John the Baptist (1670), and a Roman Catholic church (15th–18th century).

**Horodok.** v-7. Town (1970 pop 15,000) and raion center in Khmelnytskyi oblast, situated on the Smotrych River in eastern Podilia. It was first mentioned in historical documents under the year 1392. In 1793, after the second partition of Poland, the town came under Russian rule. In April 1919 the Volhynian Group of UNR Army units fought several battles there against Bolshevik forces. It was a raion center in Proskuriv okruha (1923–30), Vinnytsia oblast (1932–7), and Kamianets-Podilskyi oblast (1937–54). Machine tools and foodstuffs are produced there.

**Horodok.** III-7. Village 8 km from Rivne in Volhynia. Seven Paleolithic camp sites of the early Aurignacian culture, a large workshop of Neolithic flint implements, two Eneolithic cist graves, a settlement and burial ground with Silesian-type corded ware, a 7th–8th-century fortified settlement, and four settlements and two burial grounds of the Princely era were excavated there by L. Chykalenko in 1912–16, L. Sawicki in 1923–9, M. Drewko in 1927–8, and I. Sveshnikov in 1960–1. Altogether 25 archeological monuments have been discovered. First mentioned in 1463, from the early 16th century to 1794 Horodok was the site of a monastery and an episcopal seat. An 18th-century church and bell-tower gate have also been preserved.

**Horodok.** v-6. A village in Zalizhchyky raion, Ternopil oblast, at the junction of the Seret and Dniester rivers. Settlements of the Upper Paleolithic period, the Trypillian culture, and the 9th–7th centuries BC, as well as Scythian kurhans and a crypt of the Princely era under stone slabs, were excavated there by A. Kirkor in 1878, G. Ossowski in 1890, and T. Sulimirski in 1934.

**Horodok, Battle of.** A battle between the combined Cossack and Muscovite armies and the Polish army, which took place near Horodok west of Lviv on 29 September 1655. It was one of the major encounters of the *\*Cossack-Polish War*, when Cossack and Muscovite forces began to advance on Western Ukraine and to liberate Galicia from Polish rule in the spring of 1655. In September 1655, while the armies of Hetman B. Khmelnytsky and V. Buturlin besieged Lviv, Cossack and Muscovite detachments pursued the main body of the 40,000-strong Polish army commanded by S. Potocki. In the Battle of Horodok, the Cossacks under H. Lesnytsky and the Muscovite regiments under G. Romodanovsky routed the Poles.

**Horodovenko, Nestor,** b 27 October 1885 in Venslav, Lohvytsia county, Poltava gubernia, d 21 August 1964 in Montreal. Choir conductor and pedagogue. In 1917 he taught at the Second Ukrainian Gymnasium in Kiev and conducted the Kiev University choir. Later he directed the Dniprosioiuz Chorus, which subsequently became the chorus of the Kiev Department of People's Education and in 1919 *\*DUMKA*, and served as its principal conductor from 1919 to 1938. Under his direction the chorus completed several critically acclaimed tours of Ukraine, other Soviet republics, and Western Europe. From 1930 he was also a professor and director of the

Nestor Horodovenko

conducting department at the Kiev Music Institute (later Conservatory). In 1938 he was temporarily banned from conducting for political reasons and *DUMKA* was reorganized. During the Second World War he directed choirs in Kiev and Lviv. After the war he conducted in Germany, and from 1949 in Montreal, where he directed the choir *Ukraina*. In addition to numerous Ukrainian works, Horodovenko's repertoire included Beethoven, Mozart, Verdi, Haydn, Ravel, Grieg, and Debussy.

**Horodovi Cossacks.** See Town Cossacks.

**Horodsk or Horodesk** [Horods'k or Horodes'k]. An ancient Rus' town situated on the Teteriv River; today the village of Horodske in Korostyshiv raion, Zhytomyr oblast. Archeological surveys and excavations conducted in 1936–7, 1939–40, 1946–7, and 1955–8 revealed that from the 9th to the 13th century Horodsk was an iron-working center whose inhabitants were engaged in farming and in making iron implements and weapons, pottery, and jewelry. The town was destroyed by the Mongols in the mid-13th century. A late Trypilian settlement (early 2nd millennium BC) also existed there.

**Horodyshche** [Horodyšče]. IV-12. Town (1971 pop 16,300) and raion center in Cherkasy oblast, situated on the Vilshanka River. First mentioned in the 16th century, it has a memorial museum and monument dedicated to the singer and composer S. \*Hulak-Artemovsky (who was born there), a large sugar refinery (since 1848), a brewery, and a labradorite quarry. The 1771 Church of St Mary the Protectress is preserved there.

**Horodyshche** [Horodyšče]. III-8. Village in Shepetivka raion, Khmelnytskyi oblast. In 1957–63 the remains of an old fortified city, which some scholars believe to have been the Rus' city of Iziaslavl, were excavated there. Uncovered were burned ruins of dwellings, numerous agricultural and artisans' implements and weapons, pottery, hundreds of human skeletons, and several hoards of silver ornaments and jewelry. The city was probably founded in the late 12th century and was destroyed by the Mongols in 1241.

**Horodyshche Apostol** [Horodyšče] (aka *Khrystynopil Apostol*). A 12th-century manuscript (299 folios), copied from the original Church Slavonic in Galicia or in southern Volhynia. It represents a significant source for the study of the development of the Ukrainian language.

The bulk of the manuscript is kept in the Lviv Historical Museum, but the initial eight folios are in the Central Scientific Library of the AN URSR in Kiev. The above sections have been published respectively by O. Kaluzhniatsky (1896) and S. Maslov (1910). The language has been studied by O. Kolessa (1923).

**Horodyshche Gospel** [Horodyšče] (aka *Buchach Gospel*). A Church Slavonic text copied in Ukraine, probably in southern Volhynia, in the 12th or first half of the 13th century (160 folios), now kept in the Lviv Museum of Ukrainian Art. It was utilized by I. Svientsitsky (1911) and O. Kolessa (1925) as a source in the study of the historical development of the Ukrainian language. Fragments of it were subsequently published by the latter.

**Horodysky, Oleksander** [Horodys'kyj], b 1 May 1930 in Kiev. Electrochemist; since 1978 full member of the AN URSR. Upon graduating from the Kiev Polytechnical Institute in 1951 he joined the Institute of General and Inorganic Chemistry of the AN URSR, and in 1973 was appointed director of the institute. He discovered a number of laws of electrochemical kinetics, developed a theory of the non-stationary state of electrochemical systems and bifunctional electrochemical systems permitting electrolysis above the solvent potential, used quantum-mechanical methods to calculate electron transfer in condensed phases, devised methods and equipment for electrochemical research, and found electrochemical ways to synthesize many inorganic materials.

**Horokhiv** [Horoxiv]. III-5. Town (1970 pop 5,500) and raion center in Volhynia oblast, situated on the Buh-Styr watershed in the Volhynian Upland. It was first mentioned in the *Hypatian Chronicle* under the year 1240. The city's food and wine industry is based on the fertile lands of the vicinity; it has two brickyards and a tool-and-die-making plant.

**Horokhovatsky, Yaroslav** [Horoxovac'kyj, Jaroslav], b 17 September 1925 in Oleksandriia, Kremenchuk okruha, d 28 May 1976 in Kiev. Physical chemist; from 1972 corresponding member of the AN URSR. Upon graduating from Kiev University in 1951 he joined the AN URSR Institute of Physical Chemistry. His chief publications deal with heterogeneous catalysis.

Mariia Horokhovska

**Horokhovska, Mariia** [Horoxovs'ka, Marija], b 17 October 1921 in Yevpatoriia, Crimean ASSR. World-class gymnast. A graduate of the Kiev Institute of Physical Culture (1956), she won two gold and five silver medals

in various gymnastic individual and team events at the Olympic Games in Helsinki (1952). She won the gymnastics championship of Ukraine and the USSR several times before attaining the world championship in team events (1954). She competed as a member of the Budivelnik team from Kharkiv and now works as a coach and teacher.

**Horse breeding.** Horse breeding is an important branch of animal husbandry. Before agriculture was mechanized, the horse was the principal work animal. It also played an important role in transport and warfare, and was a significant source of meat and hide. Today horses on collective state farms are used for local transport, vegetable gardening, and livestock herding.

Horse breeding appeared in territories of the Trypilian culture as early as the Bronze Age. The horse served alongside the ox as a draft animal. For steppe nomads, particularly the Scythians, the horse was indispensable as a means of transportation and as a source of meat, milk, and hide. In the Princely era horses continued to be important in farming, and even more important in warfare (see Cavalry). Horses then were of local stock, but some were obtained by trade or capture from steppe tribes. The princes owned large horse herds. Several horse breeds were known and some selective breeding was practiced.

During the Cossack period horse breeding developed particularly in response to military needs. In the 17th–18th centuries the hetmans took an interest in horse breeding. During I. Samoilovych's and I. Mazepa's rule large stud farms in the steppe of Nizhen regiment and in Pryluka regiment supplied the hetman's army with horses. Later, the Russian government took over some of these farms. In the Hetman state, Slobidska Ukraine, and Zaporizhia, horses were also bred by Cossack officers on large estates. By the end of the 18th century, stud farms appeared in Right-Bank Ukraine on the estates of magnates such as Branicki, Potocki, and Rzewuski.

With Russia's conquest of the southern Ukrainian steppes in the second half of the 18th century, the new settlers began to raise large horse herds on these lands and horse breeding began to assume a commercial character. As more and more of the steppe came under cultivation and grazing land decreased, and as the army's demand for horses at the same time fell, horse raising in the steppes declined. At the time, the ox was the principal draft animal for plowing the virgin steppes. In Kherson gubernia, for example, the number of horses declined from 400,000 in 1808 to 120,000 in 1861. In the second half of the 19th century, when the steppes had been brought under the plow, the ox was replaced by the swifter-moving horse and horse breeding experienced a revival. Thus, in Kherson gubernia the horse population increased to 329,000 (1.4 horses to each ox) by 1881, and to 814,000 (8.17 horses to each ox) by 1913. In all the steppe gubernias the horse population increased from 360,000 in 1861 to 1,100,000 in 1882, and to 2,100,000 in 1912. In the forest-steppe belt this process took place sooner and the growth was less dramatic – from 2,300,000 in 1883 to 3,500,000 in 1912. Altogether in 1912 there were 6,600,000 horses in territories that are now part of the Ukrainian SSR.

Although every peasant farmer wanted to own a horse, most peasant farms were too small to support one. In

1891 in the nine Russian-ruled gubernias of Ukraine 42.4 percent of peasants farms had no horse, 13.4 percent had only one horse, 23.4 percent had two horses, and 20.8 percent had three or more horses. In 1916, 89.4 percent of all horses were owned by peasants but the average number of horses per household was only 1.1. Moreover, these horses were often underfed and overworked. In Western Ukraine a similar situation prevailed even after the First World War: in Galicia (1927) 70 percent of peasant farms had one or no horse, in Transcarpathia (1925) 87.7 percent, and in Bukovyna (1925) 19.8 percent. The most important local breeds were: in Southern Ukraine, the Black Sea and Ukrainian horse developed by the Zaporozhian and Kuban Cossacks; in the southeast, the Don horse; in the north, the Polisian horse; and in the Carpathian Mountains, the Hutsul pony. Relatively few horses were purebred. The chief stud farms in Ukraine were the Derkulske (1751), Striletske (1803), Novooleksandrivka (1810), and Lymarivka (1819) farms in Starobilske county, Kharkiv gubernia, the Yanov farm in Podlachia, and the Radivtsi (Rădăuți) farm in Bukovyna.

During the First World War and the Revolution the horse population of Ukraine (as defined by today's boundaries) declined to 4,700,000 or 71 percent of the prewar figure. A strong demand for horses led to a rapid recovery in their numbers: by 1929 there were 6,800,000 horses on Ukrainian ethnic territory, and 5,600,000 horses in the Ukrainian SSR of the time. Forced collectivization and the man-made famine of 1932–3 had a devastating impact on the horse population of Soviet Ukraine: by 1934 it dropped to 2,500,000. Since the tractor industry was in its infancy and could not replace animal power with machines, the horse shortage contributed to the agricultural crisis. Further decline in the horse population was brought about by the Second World War, the collectivization of Western Ukraine, and finally continued progress in farm mechanization. By 1951 it fell to 2,245,000, by 1970 to 1,322,000, and by 1983 to 807,000. State and collective farms owned 96 percent of the horses (1955). The highest concentration of horses was in Khmelnitskyi, Vinnytsia, Chernihiv, and Odessa oblasts.

Today, while the horse population continues to decline, horses are bred within a uniform system of state-controlled stud farms, breeding stables, stations, and hippodromes. New breeds have been developed and old ones have been improved. The main breeds in Ukraine are the Orlov and Russian trotters, the Soviet, Russian, and Percheron draft horses, and the Thoroughbred, Biddenny, and Don horses. Of the various Ukrainian breeds only the Hutsul pony and the Polisia horse continue to be raised.

C. Freeland

**Horseradish** (*Armoracia rusticana*; Ukrainian: *khryn*). A perennial herbaceous plant belonging to the mustard family (Brassicaceae or Cruciferae). Horseradish is grown throughout Ukraine. The plant has elongate or linear leaves, a long, straight, branched stem (maximum 1 m in height), and a large white root. The root and leaves are bactericidal and contain various constituents, most notably vitamin C. The root is eaten raw or cooked, and

may be dried, marinated, pickled, or salted. Horseradish is a traditional Ukrainian Easter condiment. In addition to its food value, the plant has historically had a wide variety of medicinal uses in the treatment of various nutritional and pathological disorders. Ukrainian folk literature contains many references to horseradish, often as a synonym for the devil.

Alla Horska

Mykhailo Horyn

**Horska, Alla** [Hors'ka], b 18 September 1929 in the Crimea, d 28 November 1970 in Vasylkiv, Vasylkiv raion, Kiev oblast. Monumentalist painter, graduate of the Kiev State Art Institute, and wife of V. \*Zaretsky. She was a founder and active member of the Club of Creative Youth (est 1962) in Kiev, which played an important role in the cultural movement of the 1960s. She designed the stage sets for M. Kulish's *Otak zahynuv Huska* (Thus Huska Died), whose premiere at the Lviv Ukrainian Drama Theater was banned. In 1964 she collaborated with H. Sevruk and L. Semykina on a stained-glass panel designed by P. Zalyvakha for Kiev University. Because of its unconventional style and patriotic message, the panel, which depicted an angry T. Shevchenko, was destroyed by the authorities, and Horska was expelled from the Union of Artists of the Ukrainian SSR. To find work she had to leave Kiev, but she continued to defy the authorities by protesting against their repressive measures. She was murdered in 1970. Although the crime remains officially unsolved, circumstantial evidence points to the KGB's involvement. Horska's main works are monumental internal and external paintings and mosaics decorating schools, museums, and restaurants, done in collaboration with other artists.

**Horticulture.** See Orcharding and fruit farming.

**Horyn, Bohdan** [Horyn'], b 10 February 1936 in Kniselo, Bibrka county, Galicia. Art and literary scholar, political dissident. A graduate of Lviv University (1959), he specialized in the psychology of artistic creativity and over a few years published more than 30 articles. In 1966 he was convicted of anti-Soviet agitation and propaganda and sentenced to four years in a strict-regime labor camp.

**Horyn, Mykhailo** [Horyn', Myxajlo], b 20 June 1930 in Kniselo, Bibrka county, Galicia. Educator, literary scholar, psychologist, and dissident. A graduate of Lviv

Horyn River

University (1953), he taught Ukrainian language and literature, logic, and psychology in secondary schools, and then did research in the psychology and work physiology of labor. In 1966 he was accused of anti-Soviet agitation and propaganda and sentenced to six years in a strict-regime labor camp. In 1981 he was sentenced to ten years in a strict-regime camp and five years of internal exile.

**Horyn River** [Horyn']. A right-bank tributary of the Prypiat River. It has a length of 659 km, a width of 20–80 m, and a depth of up to 16 m; its basin covers an area of 27,700 sq km. The Horyn's lower stretch is navigable. The upper Horyn dissects the Volhynian Upland and the Polisia Lowland. The \*Sluch River is the Horyn's largest tributary.

**Hoshcha** [Hošča]. III-7. Town smt (1978 pop 4,300) and raion center in Rivne oblast, situated on the Horyn River. First mentioned in the 14th century, in the late 16th century it became a center of the \*Socinians in Volhynia, who established a school there in the early 17th century. To combat their influence, an Orthodox monastery with a secondary school was founded there in 1638. In the 18th century the monastery and school were taken over by the Basilians, who maintained them until 1833. The miraculous icon of the Mother of God in the Pochaiv Monastery originated in Hoshcha. Today the town produces butter, cheese, and animal feed.

Hoshiv: Basilian church on Yasna Hora mountain

**Hoshiv** [Hošiv]. IV-4. Village (1971 pop 1,900) in Bolekhiv raion, Ivano-Frankivske oblast. It is known for its Basilian monastery, which was built in the 1570s. The latest monastery building was constructed on Yasna Hora in 1836-7 and the latest church in 1834-42. With its miracle-working icon of the Weeping Mother of God, which since the 18th century has been popularly known as the Queen of the Carpathians, the monastery used to attract thousands of pilgrims from Galicia and Bukovyna. In 1951 the Soviet authorities abolished the monastery and converted its buildings into a hostel for indigent children. A history of the monastery, *Iasna Hora v Hoshevi* (The Luminous Mount of Hoshiv) by Rev M. Dydra, was published in New York in 1972.

**Hoshkevych, Viktor** [Hoškevyč], b 21 March 1860 in Kiev, d 2 March 1928 in Kherson. Archeologist and museologist. While working for the Kherson gubernia statistical committee, he did archeological research in the Kherson region. In 1890 he established a museum in Kherson with a rich archeological collection consisting mostly of Greek, Scythian, and Sarmatian materials. He published a museum newsletter and the daily Kherson newspaper *Iug* (1898-1907). He is the author of *Klady i drevnosti Khersonskoi gubernii* (Hoards and Antiquities of Kherson Gubernia, 1903) and *Drevnie gorodishcha po beregam nizovogo Dnepra* (Ancient Fortified Settlements on the Banks of the Lower Dnieper, 1913).

**Hoshko, Yurii** [Hoško, Jurij], b 28 April 1917 in Starychi, Peremyshl county, Galicia. Ethnographer. From 1951 to 1958 he served as director of the Lviv Historical Museum, and thereafter as director of the Ukrainian State Museum of Ethnography and Crafts (now a branch of the Institute of Fine Arts, Folklore, and Ethnography in Kiev). His chief works are *Hromads'kyi pobut robotnykiv Zakhidnoi Ukraïny, 1920-1939* (The Community Life of the Workers in Western Ukraine, 1920-1939, 1967) and *Naseleennia ukrains'kykh Karpat xv-xvii st.: Zaseleennia, mihratsii, pobut* (The Population of the Ukrainian Carpathians in the 15th-18th Century: Settlement, Migrations, Customs, 1976).

Bohdan Hoshovsky

**Hoshovsky, Bohdan** [Hošovs'kyj] (pseud: Didus, B. Danylovych), b 21 August 1907 in Zolochiv, Galicia, d 21 July 1986 in Toronto. Civic figure, journalist, and writer, editor, and publisher of \*children's literature. He edited

the journals *Mali druzi* (1937-8, 1940-4, 1948) and *Doroĥa* (1937-8, 1940, 1942-4) and such book series as *Moia kny-zhechka* (My Book, 1940-4) and *Doroĥa* (The Road, 1940-2). During the Second World War he worked for the publisher *Ukrainske Vydavnytstvo*. After the war he immigrated to Toronto, where he founded two publishing houses for children's literature: *Nashym Ditiám* and *Yevshan Zillia*. He cofounded and headed the Association of Ukrainian Writers for Young People, and has coedited the journal *Veselka*. Hoshovsky is the author of children's stories and articles on various topics in the Ukrainian press.

**Hoshovsky, Volodymyr** [Hošovs'kyj], b 25 September 1922 in Uzhhorod. Folklorist, founder of cybernetic ethnomusicology. A graduate of the Lviv Conservatory (1953), where he lectured (1961-9). He founded and directed the folk-music cabinet at the conservatory. In 1975 he became a research associate of the Arts Institute of the Academy of Sciences of the Armenian SSR in Yerevan, and compiled a cybernetic universal structural-analytical catalogue of folk songs (UNSAKAT). His chief publications are *Ukrainskie pesni Zakarpat'ia* (Ukrainian Songs of Transcarpathia, 1968) and *U istokov narodnoi muzyki slavian* (At the Sources of the Slavs' Folk Music, 1971). He has edited a Russian collection of K. Kvitka's works and a collection of papers on the algorithmic analysis of musical texts.

**Hospital.** Institution at which sick people are given medical and surgical treatment. The earliest hospitals developed out of hostels for pilgrims and travelers to Jerusalem that provided care for their sick guests during frequent epidemics. There were hospitals in Ukraine by the end of the 10th century. Under Prince Volodymyr the Great, free shelters, attached to monasteries and churches, for orphans, the homeless, the aged, and the sick were built. These were supported by a tithe. Metropolitan Yefrem founded several hospitals in Pereiaslav and other towns at the end of the 11th century. In the 15th-17th centuries some hospitals were maintained by the brotherhoods.

From 1775 hospitals in Russian-ruled Ukraine came under the control of social-welfare boards, managed by local administrators elected by the gentry. Small hospitals for serfs were sometimes maintained on the estates of large landowners. In this period hospitals were charitable shelters rather than treatment facilities and they were few in number. The first hospital in the modern sense of the term was a 50-bed hospital for infectious diseases established in Kiev in 1787, and the first hospital for somatic illnesses was established in 1803. During the Russian-Turkish War, a teaching hospital for training physicians operated in Yelysavethrad (now Kirovohrad) from 1788 to 1793. In this period hospitals appeared in Kremenchuk (1800), Poltava (1804), Cherkasy (1822), and a number of other towns. Gradually the local shelters were also converted into true hospitals.

With the introduction of \*zemstvo medicine the number of hospitals and hospital beds throughout the Russian Empire increased rapidly after 1864. Legislation introduced in 1866 required factory owners to provide hospital facilities for employees. In 1915 in Russian-ruled Ukraine, there were 617 gubernia and county hospitals, 21 municipal hospitals, 202 factory hospitals, 47 Jewish hospitals, 4 church-run hospitals, 26 hospitals run by

Number of hospitals and beds in Ukraine, 1913-85

	1913	1932	1940	1950	1960	1970	1980	1983	1985
No. of hospitals	1,438	1,333	2,498	3,533	5,046	4,700	3,843	3,808	—
No. of beds (in thousands)	47.7	73.8	157.6	194.2	334.2	511.0	627.1	652.5	661.0
Beds per 10,000 inhabitants	13.6	17.5	37.7	52.2	80.4	107.6	125.4	129.1	130.0

volunteers, 4 run by the Red Cross, 66 private hospitals, 17 university hospitals, 16 hospitals run by the railroads, 68 prison hospitals, and 58 run by various other institutions and organizations. There were also 22 institutions for the mentally ill.

In Galicia and Bukovyna, which were under Austrian rule, hospitals were overseen until 1918 by the provincial authorities. In the 1920s and 1930s hospitals (including state, self-governing, community, and private hospitals) in Polish-ruled territories of Ukraine came under the jurisdiction of the voivodeship government.

In the Ukrainian SSR the typical hospital since 1947 consists of an inpatient and an outpatient department. Hospitals are classified as general or specialized (infectious diseases, tubercular, psychiatric, gynecological, oncological, etc), some of which are attached to institutions of higher education or scientific research institutes. General hospitals in Ukraine are officially classified in categories based on the range of services they offer and their administrative subordination. These categories include republic and oblast hospitals (offering the most comprehensive range of medical services), town and urban district hospitals, raion center hospitals, and rural district hospitals. In 1971, for the entire USSR, the average number of beds per hospital for each category was 613, 166, 156, and 31 respectively. Most hospitals in Ukraine are controlled by the republic's Ministry of Health, but some are under the jurisdiction of the USSR Ministry of Defense and such ministries as the Ministry of Transport, which retains considerable autonomy in providing health care to its employees.

The development of the hospital network in Ukraine is summarized in the accompanying table. In general, the eastern oblasts of Ukraine are best supplied with hospital beds. According to 1985 figures, Kirovohrad oblast had 143 beds per 10,000 inhabitants, the city of Kiev 138.9, Voroshylovhrad oblast 138.9, Donetsk oblast 135.9, and Dnipropetrovske oblast 133.7. The worst-supplied oblasts were in the south and west: Transcarpathia (114.9), Rivne (119.4), Lviv (120.4), Odessa (123.2), Ivano-Frankivske (120.3), Zhytomyr (123.6), Kherson (124.8), Chernivtsi (124.4), and Ternopil (125.0). The low figure of 115.0 beds per 10,000 inhabitants for Kiev oblast (excluding the city of Kiev) is explained by the practice of transporting patients from various parts of the oblast to Kiev for treatment. In 1985, Ukraine, on the average, had 130 beds per 10,000 inhabitants, the RSFSR 126, and the USSR 120.8.

In 1960 over 20 percent of hospital beds were occupied by medical patients, 13 percent by surgical patients, and 10 percent by mental patients. Less than 10 percent of the beds were used by the following groups of patients: pregnant women and women in childbirth, women with gynecological disorders, children, and people with infectious diseases.

Despite the recent increases in the number of hospitals

in Ukraine, especially in rural areas (by the mid-1970s almost every raion in the county had a hospital with some 250-300 beds), there are shortcomings in the system. Many hospitals are severely overcrowded - in fact, increases in the number of beds are often a result of simply placing more beds in existing facilities - and overall sanitary conditions are often primitive, with clean bedding and sterilized or disposable equipment being in short supply. In addition, claims that health care is equally accessible to everyone in society are somewhat unfounded. The best hospitals in the USSR are in Moscow, and high Party officials and employees of certain agencies (eg, the KGB and the Academy of Sciences) have access to special, and undoubtedly superior, hospital services.

**Hospodar** (The Farmer). The first Ukrainian educational periodical devoted to agriculture and industry. It was published semimonthly in Lviv from 10 July 1869 to 1872. The editor was S. Shekhovych, and contributors included Ye. Hlynsky and V. Ruzhytsky. It was first printed in the hrazhdanka, then in the Cyrillic, and from 1871 in the Latin alphabet.

**Hospodar** (The Farmer). A monthly magazine for farmers, published in Peremyshl from July 1898 to 1913. From 1902 it included the supplement *Ekonomist*. The publisher was I. Nehrebetsky and the editors I. Nehrebetsky (1898-1905) and T. Kormosh (1906-13).

**Hospodar i promyshlennyk** (The Farmer and Manufacturer). An illustrated semimonthly periodical devoted to agriculture, industry, and commerce, published in Stanyslaviv (now Ivano-Frankivske) from November 1879 to 1882 and then in Lviv (1883-7). A total of 163 issues appeared. Beginning with the 23rd issue in 1883 it included the supplement *Lystok hospodars'kyi*. The editor until 1885 was A. Nychai; he was succeeded by A. Hlodzynsky (1886) and V. Nahirny (1886-7). P. Bazhansky, L. Vitoshynsky, I. Horodysky, K. Kuzyk, I. Naumovych, and V. Ruzhytsky were among the main contributors.

**Hospodars'ka chasopys'** (The Farming Periodical). The semimonthly organ of the Silskyi Hospodar association. It appeared in Lviv from 25 January 1910 until 1918 and again in 1920. The managing editor was H. Velychko; other editors included K. Kakhnykevych (1910-18) and Yu. Pavlykovsky.

*Hospodars'ko-kooperatyvnyi chasopys* (The Farming-Co-operative Periodical). An official organ of the Provincial Audit Union (later the \*Audit Union of Ukrainian Co-operatives), which appeared in Lviv from 1921 to 1944, with a break in 1940–1. At first it was a monthly, published for the Committee for Organizing Co-operatives by the Silskyi Hospodar association. On 10 August 1922 it became a semimonthly, and in 1925, a weekly. Its chief editors were Yu. Pavlykovsky (1921), M. Korchynsky and A. Havrylko (1922–7), Z. Pelensky (1927–30), Ye. Khraplyvy (1930–3), and V. Sofroniv-Levytsky (1933–44). It printed articles of a theoretical nature as well as educational and instructional articles on agriculture and economics, especially concerning the co-operative movement. The journal was illustrated by E. Kozak from 1927.

*Hospodarstvo Ukrainy* (Economy of Ukraine). Monthly economic journal published in Kharkhiv from 1924 to 1934 by the State Planning Committee of the Ukrainian SSR. The first three issues (1924–5) were published in Russian under the title *Khoziaistvo Ukrainy* but all subsequent issues appeared in Ukrainian. In 1926 the journal absorbed the Russian-language *Finansovyi biulleten'*. With the March issue of 1934 it was renamed *Sotsialistychna Ukraina* and after the July–August issue it was discontinued. As a government publication, the journal reflected the Ukrainization policies of the 1920s. In its articles the Ukrainian economy was treated as a distinct unit whose interests did not always coincide with those of the USSR economy. With the introduction of the First Five-Year Plan in 1929 and the increased centralization of economic decision-making in Moscow, the nature of the journal changed and its quality deteriorated. In 1932 its editorial board was reprimanded for publishing articles that deviated from the Party line and several board members were persecuted. The editors were H. Hrynko, A. Dudnyk, M. Popov, and Ya. Tun. Among its contributors were well-known economists from Ukraine (such as P. Fomin, L. Yasnopolsky, and K. Vobly) and from Moscow (such as T. Khachaturov, A. Probst, and M. Volf).

Stepan Hostyniak

**Hostyniak, Stepan** [Hostynjak], b 20 September 1941 in the village of Zbudský Rokyto in eastern Slovakia. A leading Ukrainian poet in the Prešov region of Slovakia, he is the author of six poetry collections: *Proponuii vam svoiu dorohu* (I Propose My Way to You, 1965), *Lyshe dvoma ochyma* (With Only Two Eyes, 1967), *Virshi* (Poems, 1972), *Buket* (Bouquet, 1979), *Seismohraf* (Seismograph,

1982), and *Anatomiia druhoho oblychchia* (The Anatomy of a Second Face, 1986). He has also published several short stories in the journal *Duklia* and elsewhere. His poetry is characterized by an almost prosaic directness. Everyday situations, objects of daily use, and simple 'feelings' provide the subject of his poems, which are most often renderings in free verse.

*Hotuis'* (Be Prepared). Illustrated monthly magazine for the members of the youngest age group (6–12 years) of the \*Plast Ukrainian Youth Association. From January 1953 to December 1970 it was published in New York and since then in Toronto. *Hotuis'* succeeded *Novak*, which appeared after 1945 irregularly in Germany. Its editors have been L. Khraplyva (1953–70) and A. Horokhovych (1970–). Since the 1970s its circulation has declined from 1,500 to 900.

**Hotvald** [Hotval'd]. iv-17. Town (1976 pop 20,300), a raion center in Kharkhiv oblast. Called Zmiiv until 1976, it was renamed in honor of the Czech Communist leader K. Gottwald. Zmiiv was first mentioned in the 12th century as the Zmiiske fortified settlement. Used by Prince Ihor Sviatoslavych of Novhorod-Siverskyi in his struggle with the Cumans, it was later destroyed by the Mongols. In the mid-1500s an outpost was built there, and in the 1650s the Cossacks built a fort there to defend the vicinity against the Tatars. Zmiiv was a company town of the Kharkhiv regiment from 1669 to 1765. It was ravaged by the Tatars in 1688, 1689, and 1692. Its Cossacks took part in the uprisings led by I. Dzykovksy (1670) and K. Bulavin (1707–9). The St Nicholas monastery was located nearby from 1688 to 1788. Later Zmiiv was a county town in Slobidska Ukraine (1797–1835) and Kharkhiv (1836–1920) gubernias. It became a raion center in 1923. It has a food industry, and machines, containers, paper products, and building materials are manufactured there.

**Household tax** (*podvornoe oblozhenie*). A system of direct taxation introduced in Russia in 1679, in which the basic unit taxed was the household. It replaced the tax based on the \**sokha* (plough), and enlarged the tax base by including previously exempt categories of the population. The central government set the total tax to be collected from a community and the village or town administration apportioned the tax among the households according to their ability to pay. The household tax was introduced in Left-Bank Ukraine at the end of the 17th century and continued to be collected until the second half of the 18th century.

**Housing.** Shelter or dwellings provided for the population. In Soviet Ukraine, housing is either socialized property – ie, state (mostly urban) and collective-farm and co-operative (mostly rural) housing – or privately owned. Its ownership, use, size, and costs are governed by \*housing legislation, which recognizes four categories of housing: (1) communal buildings owned and rented out by local soviets; (2) buildings leased to state agencies and civic organizations; (3) buildings built by housing-construction co-operatives; and (4) privately owned buildings.

In Ukraine the shortage of housing has been a persistent problem. Destruction during the two world wars, the expropriation of private property by the Soviet state,

Soviet housing policies and inadequacies thereof, and rapid industrialization and urbanization since the 1920s have made this problem acute.

In 1917 there was only 46.1 million sq m of housing space in Ukraine. In the first few years of the Soviet period, seven-eighths of new housing was built using private capital, but this activity came to an end with the phasing-out of the New Economic Policy. During the First and Second Five-Year plans (1928-37) the construction of new housing fell by more than half (table 1). Although a 1928 law prescribed a minimum living space of 8.6 sq m per person, this minimum was not attained throughout the 1930s, when it was common for four individuals, and often two families, to share one room. The authorities were forced to rely on the private sector again, and during the Third Five-Year Plan the area of new housing tripled; 59.1 percent of it was built privately. In 1940 there was 97 million sq m of urban housing space, 48.1 million sq m of which was privately built and owned.

TABLE 1  
Housing construction in the socialized and private sectors in Soviet Ukraine, 1920-85 (in millions of sq m of general housing space)

	Socialized	Private		Total
		Urban	Rural	
1920-28	5.3 (12.6%)	5.0	31.7	42.0
1929-32 (1st)*	6.6 (57.9%)	1.2	3.6	11.4
1933-37 (2nd)	6.1 (50.0%)	1.2	4.9	12.2
1938-45 (3rd)	14.4 (40.9%)	4.3	16.5	35.2
1946-50 (4th)	14.8 (32.2%)	8.2	23.0	46.0
1951-55 (5th)	15.6 (37.1%)	11.8	14.7	42.1
1956-60 (6th)	32.7 (37.4%)	23.3	31.4	87.4
1961-65 (7th)	42.6 (44.8%)	24.9	27.5	95.0
1966-70 (8th)	50.3 (52.3%)	19.6	26.2	96.1
1971-75 (9th)	58.4 (59.8%)	19.3	20.0	97.7
1976-80 (10th)	60.4 (66.5%)	18.6	11.8	90.8
1981-85 (11th)	62.8 (68.1%)	18.2	11.2	92.2

\*Ordinals refer to the corresponding five-year plan.

During the Second World War almost 40 percent of Ukraine's housing was destroyed, leaving 10 million people homeless. In 1946-50 the private sector again built two-thirds of all new housing, while the state concentrated on industrial reconstruction and expansion. The continuing acute housing shortage, however, forced the state to adopt a resolution in 1957 on the development of housing construction and to implement a strategy for accelerating new housing construction. Consequently by the end of 1960 Ukraine's urban housing space increased to 203.7 million sq m, more than double the 1940 figure. In the 1960s the participation of both the socialized and private sectors in housing construction grew, and during each of the Seventh, Eighth, and Ninth Five-Year plans (1959-75) over 95 million sq m of new housing was built. In 1966-70, for the first time since the Second World War, the socialized sector produced more than half (52.3 percent) of new housing space.

During the Tenth and Eleventh Five-Year plans (1976-85) new housing construction fell to slightly over 90 million sq m per plan, of which only a third was privately built.

Capital investment in all housing has grown from 1,702 million rubles in 1960 to 2,746 million rubles in 1975 and 3,883 million rubles in 1985. Between 1961 and 1985, Ukraine's share of the total USSR \*capital investment in housing from all sources was 14.0 percent, but of the state's investment in housing, only 11.8 percent. Both figures are significantly lower than the percentage of Ukraine's population in the USSR as a whole (18.6-20 percent during this period). Yet, between 1961 and 1985, 17.9 percent of all new housing and 15.8 percent of new state-financed housing in the USSR was built in Ukraine, indicating that in Ukraine housing construction costs less than in other parts of the USSR because climatic conditions are better, or the construction is of poorer quality, or both.

In 1985 the per capita amount of living space available in Ukraine was above the USSR average by 7.5 percent in urban areas and 19.6 percent in rural areas. (In the USSR the corresponding figures were 1.2 and 5.7 percent above the average.) Ukraine ranks fifth among the Soviet republics in living space available per urban inhabitant and seventh in living space available per rural inhabitant. Table 2 indicates that in the early 1980s two-thirds of urban housing was built by the socialized sector, nine-tenths of rural housing was built privately, and over half of all housing was privately owned. In 1985 the average amount of living space per capita in Ukraine was 15.9 sq m (17 sq m in rural areas). The amount of living space in urban centers has grown progressively, from 97.0 million sq m (6.7 sq m per capita) in 1940 to 313.1 million sq m (12.1 sq m per capita) in 1970 and 505.1 million sq m (14.9 sq m per capita) in 1985. The average size of an apartment in Ukraine increased with each five-year plan: during the Fifth (1951-5) it was 42.9 sq m, during the Ninth (1971-5) it surpassed 51 sq m, and by 1983 it reached 54.2 sq m. In official Soviet usage, 'general housing space' includes kitchens, vestibules, utility rooms, bathrooms, closets, pantries, storage rooms, and interior corridors. Hence, effective living space amounts to only 53 percent of the general housing space in Ukraine.

TABLE 2  
Housing in Soviet Ukraine (in millions of sq m of general living space)

	Socialized		Private	
1980 total	756.3 (100.0%)	308.6 (40.8%)	447.7 (59.2%)	
Urban	440.7 (58.3%)	283.4 (64.3%)	157.3 (35.7%)	
Rural	315.6 (41.7%)	25.2 (8.0%)	290.4 (92.0%)	
1985 total	828.0 (100.0%)	374.5 (45.2%)	453.5 (54.8%)	
Urban	505.1 (61.0%)	342.5 (67.8%)	162.6 (32.2%)	
Rural	322.9 (39.0%)	32.0 (9.9%)	290.9 (90.1%)	

About 80 percent of urban housing in Ukraine consists of buildings with 5 to 12 stories. In the 1960s and 1970s attempts were made, particularly in southern Ukraine, to promote the construction of less massive, Mediterranean-style complexes based on Italian models, but the Party came out in favor of monolithic high-rise complexes constructed using reinforced-concrete building systems. To accelerate this type of construction, a number of industrial complexes were set up in Kiev, Donetsk, Kharkiv, Zaporizhia, Kryvyi Rih, and Voroshylovhrad. Today the basic types of housing in Ukraine are apart-

ment buildings (about 90 percent of the stock) in which families reside permanently; hotels in which small families and individuals reside both permanently and temporarily; dormitories for students and transient singles; and special buildings for the handicapped and seniors. In large cities most new buildings have 16 or more stories, and new apartments are better equipped and larger than before.

In rural areas, the most prevalent form of housing today is single-family cottages with three to five rooms and adjacent private plots. Built by private tradesmen from local materials, in appearance and architecture they vary regionally. In the last few years the rate of rural housing construction has slowed down because of the migration of young people to urban centers.

Today the major responsibility for new housing construction is borne by the socialized sector – the state, housing-construction co-operatives, and civic organizations. In 1958 the USSR Council of Ministers decreed that co-operative housing built by local soviets, enterprises, institutions, state farms, and organizations for the use of their members should be stepped up. Buildings put up by co-operatives that date from 1924 belong to their members and cannot be sold or transferred. When a co-operative raises funds among its members to cover at least 40 percent of a project's costs, it receives state credit to cover the rest and the project is included in the state's construction plan. Materials and fixtures are then allocated to the project at the same price as those sold to state building enterprises. The operations of housing-co-operative organizations in Ukraine are regulated by a statute based on the 1958 decree of the Ukrainian Council of Ministers.

Any citizen who can cover 30 percent of an apartment's construction costs can join a co-operative. It is unlikely, however, that co-operatives will prove successful in the future. When professional building organizations put up socialized housing, their workers receive 10 percent of the constructed living space for their own use. Co-operatives cannot offer this incentive. Furthermore, their members are usually more demanding than state inspectors when it comes to quality control and incomplete work. Hence both building organizations and raion executive committees have tended to regard co-operatives as an unnecessary burden, and today co-operatives build only about 6 percent of all housing in Ukraine.

In 1958 the Ukrainian Council of Ministers passed a regulation requiring individual builders in urban centers and construction collectives formed by groups of them to put up apartment buildings or groups of single-unit dwellings, financed with the aid of state credit. Raion soviet executive committees draft and approve the charters of these collectives and usually oversee their operations, using the 1972 Council of Ministers statute regulating housing-construction co-operatives as a model. The statute grants co-operative-housing members apartments calculated at 13.65 sq m of living space per person; if this figure is exceeded, an apartment cannot contain more than one room per family member. Housing construction co-operatives have the same status as legal persons, and the housing built by them is incorporated into the individual-private sector of the housing fund of the Ukrainian SSR.

Official Soviet sources state that today about 80 percent of the population have their own apartments. Much of

Ukraine's housing area, however, would be classified in the West as slums, and condemned. Several types of dwellings that are calculated into Ukraine's total housing stock can at best be described as temporary. They include (1) communal apartment buildings, in which several nuclear families that may not even be related and may be of different generations each occupy one room in an apartment and share a kitchen and bathroom; (2) dormitories and youth hostels with communal kitchens and other facilities, which are built and occupied mostly by workers and other young people who have yet to receive permanent housing, and where each resident is allotted not more (and often less) than 6 sq m of space by local authorities; and (3) makeshift barracks and shacks that are thrown up usually by shock workers at their building sites, are left standing after completion of their work, and often end up in the hands of private individuals who rebuild and sell them at inflated prices to young couples who want a modicum of privacy.

Housing construction in Ukraine is plagued with all the problems affecting Soviet industry: poor-quality and ill-fitting materials, shoddy workmanship, limited assortment, and excessive delays in completing construction. Long waiting periods as well as various forms of influence peddling add further aggravations. Even co-operatively built apartments are overpriced (costing the buyer about 15,000 rubles) and require extensive repairs before they can be occupied.

Despite the growth in housing construction in Ukraine, it has failed to keep up with the need for more housing caused by high marriage and divorce rates. That the housing problem remains acute is reflected in a recent CPU CC resolution that in the next 15 years housing construction should be increased so that each person would have approximately 18 sq m of living space, and every family of three to four members an apartment of 50–70 sq m. (See also \*Construction industry.)

B. Czajkowskyj

**Housing legislation.** A branch of civil and administrative law regulating the ownership, rental, and exchange of dwellings (including their sale and inheritance) and the conditions and rights of their use. Article 42 of the 1978 Constitution of the Ukrainian SSR guarantees every person the right to permanent housing, be it in a private or communal dwelling. The main sources of housing law were previously the Civil Code of the Ukrainian SSR (particularly chapter 26), various government resolutions, statutes, and directives, and the regulatory acts of local agencies. Today housing law is regulated by the 'Statute on the Procedure of Assigning Living Space in the Ukrainian SSR' adopted by the Council of Ministers of the Ukrainian SSR and the Ukrainian Republican Council of Trade Unions on 20 December 1974. Instructions and rules for the use of residential buildings are issued by the Ministry of Communal Housing. In January 1983 the Housing Code of the Ukrainian SSR came into effect and it was adopted by the Supreme Soviet of the Ukrainian SSR on 30 June 1983 on the basis of the 1981 'Principles of Housing Legislation' of the USSR and its constituent republics. The code (193 articles in 7 chapters) contains all the norms of housing legislation (state, administrative, and civil law and judicial procedure) that were already operative and scattered throughout various sources, as well as several new norms that supersede

outdated ones or fill in gaps in legislation; the latter regulate the use of privately owned housing in greater detail, as well as the exchange of living quarters, and give building owners relatively more leeway in leases (which are now not renewed automatically but must be consented to by both parties).

Privately owned buildings are limited in size to 60 sq m per family (except for very large families). Private owners have the right to private use of land that is part of the lot on which their building stands. Offices and apartments are rented out on the basis of five-year leases modeled on a lease approved by the Ministry of Communal Housing on 29 December 1962. The ministry supervises the entire housing fund (see \*Housing) and partly regulates its use within the framework of USSR and republican laws. Oblast, city, and raion housing administrations are subordinated to the ministry.

Municipal soviets' housing commissions keep track of citizens' housing needs, make appropriate recommendations to their executive bodies, and generally oversee local housing conditions. The lowest rung in the local administration of large communal, official, and co-operative housing is the so-called Housing Exploitation Office found in every building since 1968, when earlier building-maintenance administrations were organized. These offices act in accordance with the 'Standard Statute on the Administration of Buildings' set down by the Ministry of Communal Housing on 2 July 1966. Housing construction co-operatives are regulated as legal entities by the Council of Ministers' statute adopted on 30 June 1985, according to which each occupant is allotted not more than 13.65 m of living space.

**Hoverlia** [Hoverlja]. v-5. The highest mountain in Ukraine (2,061 m); part of the \*Chornohora mountain group in the Ukrainian Carpathians. The springs from which the Prut River originates are found here. Hoverlia is marked by postglacial depressions and a rocky peak that gives way to jagged slopes covered with brush and then beech and coniferous forests. Its southern slopes form part of the \*Carpathian Nature Reserve.

**Hoverlia (4th) Group of the Ukrainian Insurgent Army** (Karpatska Hrupa 4 – Hoverlia). Code name of UPA units located on the territory of the (4th) Military District of the UPA-West in Galicia. Until early 1945, this territory consisted only of the Stanyslaviv oblast and Bukovyna; later it included almost all Soviet territory south of the Dniester River – the Drohobych, Stanyslaviv, and Chernivtsi oblasts. It also conducted some operations in Transcarpathia.

From the beginning Hoverlia was the largest and most

active group in Galicia. Most of the UPA training camps in Galicia, including the 'Oleni' officer school, were situated in its mountainous territory. In 1945 Hoverlia was divided into so-called tactical sectors (*taktychni vidtynky*). The Kolomyia tactical sector (known as Hutsulshchyna), the mountainous territory of Kosiv, Kolomyia, Sniatyn, and Horodenka counties, formed a virtual UPA republic in early 1945. It reportedly contained 4 combat battalions and 12 training companies. Another 5 combat battalions were located in the Stanyslaviv tactical sector (also known as Chorni Lis), the most famous base of UPA operations. Altogether, in early 1945 the Hoverlia Group consisted of 14 combat battalions and an assortment of companies. By the fall of 1945 their estimated total strength was 4,200 men, 80 percent of whom were assigned to the Stanyslaviv oblast. Hoverlia units constituted the bulk of the troops involved in the First (September 1945) and the Second UPA Raid (April 1946) into Czechoslovakia. During 1947–9 UPA combat units continued to operate only on Hoverlia territory. The last two actions by Hoverlia units were a raid into Rumania in June–July 1949 and the ambushing of Soviet troops in Sambir county in July–August 1949. The Hoverlia Group was commanded by Lt I. Beileilovych (*nom de guerre*: Dzvinchuk; 1943), Lt I. Butkovsky (*nom de guerre*: Hutsul; to summer 1944), Kolchak (to summer 1945), and Maj M. Tverdokhlib (*nom de guerre*: Hrim; to 1949).

**Hoydysh, Walter** [Hojdyś, Volodymyr], b 28 May 1940 in Lublin, Poland. Aerodynamicist and research engineer who taught at New York University (1967–70) and then served as the director of Environmental Engineering Research Laboratories there. He has written numerous papers in the fields of environmental sciences and aerodynamics.

Ihor Hrabar

**Hrabar, Ihor** (Grabar, Igor), b 25 March 1871 in Budapest, d 16 May 1960 in Moscow. Painter and historian of art; from 1943 full member of the USSR Academy of Sciences and from 1947 of the USSR Academy of Arts. He came from a Russophile Transcarpathian family. His mother was O. \*Hrabar, and he was brought up by his grandfather, A. \*Dobriansky, in the village of Chertizhne, Prešov region. After graduating from the Acad-

emy of Arts in St Petersburg (1898), where he studied under I. Repin, he studied painting with A. Ažbé in Munich (1903–8). From 1910 he lived in Russia, first in St Petersburg and then in Moscow. From landscape painting in the impressionist style he turned in the 1920s to portrait painting in the official socialist-realist style. He edited and wrote some chapters of the six-volume *Istoriia russkogo iskusstva* (The History of Russian Art, 1909–16), which also contains information about Ukrainian art. In 1955 Hrabar visited Transcarpathia and donated 36 paintings to the Transcarpathian Painting Gallery in Uzhhorod. A detailed account of his work can be found in his autobiography *Moia zhizn'* (My Life, 1937).

**Hrabar, Konstantyn**, b 15 August 1877 and d 1938 in Uzhhorod. Transcarpathian civic and political leader; priest. From 1901 to 1921, Hrabar served in parishes in Transcarpathia. His political career began in 1919 with his election to the Diet of the Hungarian-organized autonomous province of Ruska Kraina. Disillusioned with Hungarian policies toward Transcarpathia, in May 1919 he became a member of the pro-Czech Uzhhorod Ruthenian National Council and of the delegation sent to Prague to pledge allegiance to the Czech Republic. Hrabar served as director of the Subcarpathian Bank (1921–8), and as mayor of Uzhhorod from 1928 to 1935. In 1935 he was appointed governor of Subcarpathian Ruthenia, a position he held until the establishment of autonomy in October 1938.

**Hrabar, Olha**, b 1846 in Transcarpathia, d ? The wife of Emanuil Hrabar, a lawyer and member of the Hungarian parliament. She was the chief defendant in the trial of Russophiles held in Lviv in 1881. Among the other defendants were her father A. \*Dobriansky, I. Naumovych, and V. Ploshchansky. They were indicted for treason, for maintaining contacts between the Russophiles in Austro-Hungary and St Petersburg circles. Hrabar was acquitted of the charges against her and emigrated to Russia.

**Hrabec, Stefan**, b 14 January 1912 in Stanyslaviv, Galicia, d 25 December 1972 in Łódź, Poland. Polish linguist, professor at Toruń and, from 1954, Łódź universities. His contributions included studies of Ukrainian influences on the Polish language and of the toponomy of the Hutsul region. He was coauthor of *Dzieje języka ukraińskiego w zarysie* (A Historical Survey of the Ukrainian Language, 1956) and, together with P. Zwoliński, compiled a Ukrainian-Polish dictionary (1957).

**Hrabets, Omelian** [Hrabec', Omeljan] (*nom de guerre*: Batko), b 1 August 1911 in Nove Selo near Liubachiv, Galicia, d 10 June 1944 in Vinnytsia oblast. Prominent OUN leader and UPA commander. He organized anti-Polish demonstrations in Lviv and was incarcerated in 1938–9. In 1941 Hrabets emerged as a top leader of the OUN (Bandera faction) for mid-central Ukraine and in 1943 became commander of the UPA-South. He was killed in action against NKVD troops.

**Hrabianka** [Hrabjanka] (aka Hrebinka). Noble family founded by Ivan Hrabianka in the second half of the 17th century. Its more prominent representatives were Ivan's son, Hryhorii \*Hrabianka, the writer Yevhen \*Hrebinka,

and his brother Mykola (1819–80), an architect and academician.

**Hrabiianka, Hryhorii** [Hrabjanka, Hryhorij], 1686–1737/1738. A Cossack officer and historian. He held various offices in Hadiache regiment: judge (1717–23), quartermaster (1726–30), and colonel (1730–8). For signing and delivering the \*Kolomak Petitions he was imprisoned from 1723 to 1725 in St Petersburg. He died in a campaign against the Crimean Tatars during the Russo-Turkish War. Hrabiianka is the author of *Diistviia prezil'noi i ot nachala poliakov kroavshoi nebyvaloi brani Bohdana Khmelnytskoho, hetmana Zaporozhskoho s poliaky ...* (The Events of the Most Bitter and the Most Bloody War since the Origin of the Poles between Bohdan Khmelnytsky, the Zaporozhian Hetman, and the Poles ..., 1710). This work presents the history of Ukraine from ancient times to 1709; almost half of it deals with the \*Cossack-Polish War of 1648–57. Hrabiianka used various official documents, eyewitness accounts, chronicles, the \**Smopsis* of 1674, the writings of M. Kromer, M. Bielski, M. Strykowski, A. Guanini, W. Kochowski, S. Puffendorf, and other works. His chronicle is inspired by the idea of Ukrainian Cossack autonomism. He condemns those Russian voivodes who restricted Ukraine's political rights. The work is known from numerous 18th-century transcriptions. It was published in 1793 in an abridged version by F. Tumansky in *Rossiiskii magazin* and in 1854, using six different copies, by the Kiev Archeographic Commission. The censored parts of the latter version were later published in *Kievskaiia starina*, vol 47 (1894). Some scholars – S. Narizhnyi, for example – expressed doubts about Hrabiianka's authorship of the chronicle.

**Hrabovetsky, Volodymyr** [Hrabovec'kyj], b 24 July 1928 in Pechenizhyn, Kolomyia county, Galicia. Historian. In 1960 he was appointed senior research associate at the Department of Ukrainian History of the AN URSR Institute of Social Sciences in Lviv. His works deal mainly with Ukrainian history of the 16th–18th centuries, particularly the Carpathian \*opryshoks. The more important are *Selians'kyi rukh na Prykarpatti u druhii polovyni xvii-pershii polovyni xviii st.* (The Peasant Movement in Subcarpathia in the Second Half of the 17th and the First Half of the 18th Century, 1962) and *Antyfeodal'na borot'ba karpats'koho opryshkivstva xvi–xix st.* (The Antifeudal Struggle of Carpathian Opryshoks in the 16th–19th Centuries, 1966).

**Hrabovsky, Emilian** [Hrabovs'kyj], b 20 November 1892 in Uzhhorod, d 20 October 1955 in Uzhhorod. Landscape painter and graphic artist. A graduate of the Budapest Painting Academy (1918), he produced such works as *A Mountain Landscape* (1914), *A Haystack* (1922), and *Drachynny Landscape* (1922), which depict Transcarpathian landscapes in a lyrical style. In the 1930s, when he lived

in Budapest, he stopped painting. Returning to Uzhhorod, he resumed painting in the 1940s and produced such works as *A Mountain Vale* (1942), *Hoverlia* (1946), and *Mountain Meadows* (1951–3). A monograph on Hrabovsky was written by L. Shandor in 1962.

**Hrabovsky, Ihor** [Hrabovs'kyj], b 1 July 1934 in Mohyliv-Podilskyi, Vinnytsia oblast. Film director and screenwriter. After graduating from the Kiev Institute of Theater Arts in 1958, he worked as a film director at the Odessa Artistic Film Studio and, from 1962, at the Ukrainian Studio of Documentary Films. He became well known when his film *Kermanychi* (Helmsmen, 1965) was acclaimed by critics in London and New York. He also directed such films as *Bukovyna. 28-e lito* (Bukovyna. The 28th Summer, 1968), *Lesia Ukraïnka* (1971), *Vohnennyi shliakh* (The Fiery Road, 1974), and the trilogy *Radians'ka Ukraïna* (Soviet Ukraine, 1978).

**Hrabovsky, Leonid** [Hrabovs'kyj], b 28 January 1935 in Kiev. Composer. A graduate (1959) of and teacher (1961–3, 1966–8) at the Kiev Conservatory. During the 1960s he became associated with the Kiev avant-garde, a group of young Ukrainian composers, most of whom had studied with B. \*Liatoshynsky. He combines elements of the folk tradition with new compositional techniques to produce original musical structures. Much of his work is inspired by Ukrainian, French, German, and Japanese poetry. It includes *Four Ukrainian Songs* (1959) for mixed chorus and orchestra; *Symphonic Frescoes* (1961) for orchestra; *The Sea* for commentator, chorus, organ, and orchestra (1970); a trio for piano, violin, and bass (1964); *Ornaments* (1969) for oboe, harp, and viola; as well as numerous pieces for voice with chamber ensembles, for piano, for violin, and for oboe.

Pavlo Hrabovsky

**Hrabovsky, Pavlo** [Hrabovs'kyj], b 11 September 1864 in Pushkarne, Okhtyrka county, Kharkiv gubernia, d 12 December 1902 in Tobolsk, Siberia. Poet, translator, journalist, and revolutionary. For his radical populist involvement, he was expelled from the Kharkiv Theological Seminary in 1882 and forced to live in Pushkarne under police surveillance. He was imprisoned and then exiled to Irkutsk gubernia in Siberia in 1886. In 1889, in Irkutsk, he was again imprisoned; released in 1893, he was forced to live in Viliusk, Yakutsk (from 1897), and Tobolsk (from 1899), where he died of a pulmonary illness. Hrabovsky corresponded from prison with Galicia's Ukrainians, who

published his poetry and literary criticism in the journals *Zoria*, *Dzvinok*, *Pravda*, *Narod*, *Zhytie i slovo*, and *Literaturno-naukovyi vistnyk*. As a poet, he rejected 'art for art's sake' and wrote mainly social, political, and patriotic verse; he sought out consonant motifs in the works of many Russian, European, and American poets he translated. His collections of original verse – *Prolisok* (The Glade, 1894) and *Z pivnochii* (From the North, 1896) – and of translations – *Tvory Ivana Suryka* (The Works of Ivan Suryk, 1894), *Z chuzhoho polia* (From a Foreign Field, 1895), and *Dolia* (Fate, 1897) – were all published in Lviv. The collection *Kobza* and the long poem *Khoma Bahlai*, a paraphrase of R. Burns, were published in Chernihiv in 1898. Hrabovsky's works have been republished numerous times in Soviet Ukraine; three volumes of his collected works appeared in Kiev in 1959–60. Studies of his life and work have been written by O. Kyselov (1951, 1959, 1972) and Yu. Bukhalov (1957), as have many articles; a bibliography by M. Moroz appeared in 1964.

#### I. Koshelivets

**Hradyzke** [Hradyz'ke]. iv-14. Town smt (1978 pop 9,500) in Hlobyne raion, Poltava oblast. Traces of a settlement of the \*Cherniakhiv culture (2nd–5th centuries AD) were found near the town. In medieval times the site was occupied by a fortified settlement (*horodyshche*), which was razed by the Tatars, and from which a later settlement derived its name – Horodyshche (changed to Hradyzke in 1789). At the turn of the 16th century the Pyvohorskyi Monastery was built nearby. In the 17th century the town's inhabitants supported Cossack uprisings against the Poles and the wars conducted by B. Khmelnytsky. A century later many of its inhabitants joined the \*haidamaka uprisings. At the end of the 18th century it was a county center of Katerynoslav vicegerency and in the 19th century it declined to a small, provincial town.

**Hramota.** A charter or a type of legal document or writ particularly common in the Princely era and in the Lithuanian-Ruthenian period. *Hramoty* can generally be divided into three categories: those issued by a ruler or government office, conferring privileges or guaranteeing historic rights; those issued by private parties (wills, testaments, contracts); and those issued by the church. Princes used *hramoty*, for example, to confer privileges on foreign traders (Prince Andrii Yuriiovych's *hramota* of 1320) or Magdeburg rights on cities (Sianik 1339). The oldest *hramoty* found in Ukraine date back to the 12th century (Prince Mstyslav Volodymyrovych's charter of 1130).

In the Grand Duchy of Lithuania *hramoty* granted certain rights to whole segments of the population (eg, nobles or Jews) or guaranteed existing customary-law rights of individuals or groups. In the so-called \*land charters grand dukes confirmed the historic rights of whole provinces, particularly Ukrainian and Belorussian, guaranteeing the traditional systems of law. Over 10 such charters from the 15th and 16th centuries, some containing references to even older writs pertaining to Volhynia, the Kiev region, Galicia, and Podlachia, have been preserved. Although these writs lost their legal force when state-wide codes such as the \*Lithuanian Statute were introduced, they are nevertheless important as sources for the history of Ukrainian law.

*Hramota* of Prince Mstyslav Volodymyrovych (ca 1130)

In the Cossack period the Russian tsars and their government offices (*prikazy*) issued various *hramoty*, particularly land deeds to Ukrainian officers loyal to the tsar and to Slobidska Ukraine regiments, often in competition with universals issued by hetmans and colonels. In 1785 Catherine II extended the Charter of the Nobility to Ukraine, thus endowing the Ukrainian upper class with the rights of the Russian gentry.

Individual documents used in church administration, particularly charters of privilege such as stauropegion granted to brotherhoods, also took the form of a *hramota*.

During the period of the Hetman government in 1918, important legal state documents such as the proclamation of a new government and a new provisional constitution, the agrarian reform act, the act of federation with Russia, and the hetman's renunciation of power were called *hramoty*.

*Hramoty* are important sources for the history of the Ukrainian language because of the greater similarity to the vernacular than is, for example, present in church texts. Their language has its own localized traditions characterized by variations in phraseology and orthography. No private legal *hramoty* from the period of Kievan Rus' have been preserved, except for Mstyslav's charter of 1130, which contains no striking Ukrainian linguistic features. Three charters from 1288–9 are included in the text of the Galician-Volhynian Chronicle. A more systematic collection of *hramoty* from Volhynia dating back to 1350, from Galicia dating back to 1359, and from the Kiev region dating back to 1427 has been preserved. About 100 of the earliest writs from the mid-14th to the mid-15th century were published in V. Rozov's *Ukrains'ki hramoty* (Ukrainian Charters, 1928). Their language was studied by V. Demianchuk in his *Morfologhiia ukrains'kykh hramot xiv i pershoi polovyny xv v.* (The Morphology of Ukrainian Charters of the 14th and the First Half of the 15th Century, 1928) and by W. Kuraszkiwicz in his *Gramoty halicko-wołyńskie xiv-xv w.* (Galician-Volhynian Charters of the 14th–15th Centuries, 1934). Newer editions – M. Peshchak's *Hramoty xiv st.* (Charters of the 14th Century, 1974) and V. Rusanivsky's *Ukrains'ki hramoty xv st.* (Ukrainian Charters of the 15th Century, 1965) – uncritically reproduce many texts from later copies or from unreliable publications. Later charters from these territories have been partially published with questionable accuracy in the series *Akty, otnosiashchiesia k istorii Iuzhnoi i Zapadnoi Rossii* (1863–92), *Akty, otnosiashchiesia k istorii Zapadnoi Rossii* (1846–53), *Akty izdavaemye Vilen-*

*skoiu arkeograficheskoiu komissiei* (1868–88), and *Zherela do istorii Ukraïny-Rusy* (1895–1900), and in the publications of gubernial archival commissions, especially in Chernihiv and Poltava.

Of some historical significance are the so-called Moldavian *hramoty* dating back to 1388 and covering the entire 15th century. They were written by Ukrainian and Rumanian scribes in the Ukrainian tradition of chancery language in Bessarabia and Moldavia. Besides being published in earlier, unreliable editions by V. Ulianitsky and O. Kaluzhniatsky, they appeared in scholarly editions by E. Hurmuzaki (1890–1), A. Yatsimirsky (1907), M. Costăchescu (1931–3), I. Bogdan (1913, 1938), Gh. Ghibănescu (1906–26), and others. They were studied from the linguistic standpoint by I. Bogdan (1908), A. Yatsimirsky (1910), V. Yaroshenko (1931), and I. Ohienko (1935). Extant charters from Transcarpathia date back to 1404 and have been published and studied by A. Petrov and G. Gerovsky.

G.Y. Shevelov

**Hranovsky, Oleksander.** See Granovsky, Alexander.

**Hrazhdanka** [Hrazhdanka]. Originally a script used for books of a non-religious nature. It consisted of Cyrillic characters somewhat modified to resemble Latin letters and reflecting a general tendency toward simplification. Although it was introduced for Russian in 1708 by order of Peter I, the *hrazhdanka* to some extent was influenced by the development of the Cyrillic script in Ukraine.

**Hrdyna, Yaroslav,** b 2 February 1871 in Plzeň, Bohemia, d 2 June 1931 in Dnipropetrovske. Specialist in applied mechanics. From 1902 to 1931 he was a professor at the Dnipropetrovske Mining Institute. He created a new branch of theoretical mechanics, the mechanics of living organisms, which later became the foundation of the mechanics of control mechanisms.

**Hreben, Leonid** [Hreben’], b 17 August 1888 in Krynyk, Belorussia, d 10 July 1980. Veterinarian, geneticist; full member of the AN URSR from 1948. A graduate of the Moscow Agricultural Academy (1924), he was a professor at the Omsk Veterinary Institute (1930–4), and from 1934 he worked at the All-Union Institute of Animal Hybridization and Acclimatization in Askaniia Nova (now the Ukrainian Scientific Research Institute of Animal Husbandry of the Steppe Regions). A specialist in animal husbandry, Hreben (along with M. Ivanov) succeeded in developing improved breeds of the Askaniia Nova fine-wooled sheep and the Ukrainian steppe white swine, as well as introducing a new breed – the Ukrainian steppe spotted swine. Hreben wrote a number of works on selective breeding and zootechnics.

**Hrebenetsky, Oleksander** [Hrebenec’kyj], b 1875, d ? Teacher, political activist. A member of the Ukrainian Party of Socialists-Federalists, he took part in the Ukrainian revolution and war of independence. After the war he taught geography at the First (Shevchenko) Labor School in Kiev and worked as research associate at the Institute of the Ukrainian Scientific Language of the All-Ukrainian Academy of Sciences. In 1929 he was arrested for having been a member until 1924 of the Brotherhood of Ukrainian Statehood and a cofounder of the \*Union

for the Liberation of Ukraine (svu). On 17–19 April 1930, at the show trial of svu members, he was sentenced to death, but the sentence was commuted to six years’ imprisonment. He was rearrested in the mid-1930s and his further fate is unknown.

**Hrebin, Avram** [Hrebin’] (also known as Hreben), b 8 September 1878 in Berezna, Chernihiv county, Chernihiv gubernia, d 21 December 1961 in Dmytrivka, Chernihiv oblast. Lira player. Having lost his sight at the age of 19, he learned the art of lira playing from the lirnyk, T. Parkhomenko. For the rest of his life he wandered throughout the Chernihiv region. He composed his own songs and set other poets’ works to music. Some of his repertoire – 6 dumas, 40 songs, and a few dozen dances – has been preserved on tape at the AN URSR Institute of Fine Arts, Folklore, and Ethnography in Kiev.

**Hrebinka** (family). See Hrabianka.

Yevhen Hrebinka

**Hrebinka, Yevhen,** b 2 February 1812 at Ubizhyshe khutir near Pyriatyn in Poltava gubernia, d 15 December 1848 in St Petersburg. Romantic writer. From 1834 he lived in St Petersburg, where he taught literature in military schools and in the Institute of Mining Engineers and maintained close ties with several literary circles. He took an active part in purchasing T. Shevchenko’s freedom and helped publish Shevchenko’s *Kobzar* in 1840. His works in Ukrainian and Russian first appeared in journals and almanacs in 1831. In 1834 he published *Malorossiiskie prikazki* (Little Russian Proverbs) in Moscow; because of its vivid and pure language, wit, laconic style, and attention to ethnographic detail, it ranks among the best collections of fables in Ukrainian literature. He composed a number of lyrical poems, including ‘Ukrainskaia melodiia’ (A Ukrainian Melody, 1839) and others that became folk songs. His 1836 translation of A. Pushkin’s *Poltava* is a burlesque rendition. Hrebinka also wrote prose and poems in Russian. Among them are some works with Ukrainian themes such as the Gogolesque *Rasskazy piriatintsa* (Stories of a Pyriatynian, 1837), the historical poems ‘Getman Svirgovskii’ (1839) and ‘Bogdan’ (1843), the novelette *Nezhinskii polkovnik Zolotarenko* (The Nizhen Colonel Zolotarenko, 1842), and the novel *Chaikovskii* (1843). Hrebinka is thus recognized as a leading representative of the so-called Ukrainian school in Russian literature. In 1841 he published one of the first Ukrainian almanacs, \**Lastivka*. His collected works were first published in 1862. His Ukrainian works appeared in 1906 with an introduction by S. Yefremov.

I. Koshelivets

**Hrebinka.** III-13. Town (1970 pop 12,000) and raion center in Poltava oblast, situated on the Orzhytsia River. It was founded in 1895 as a junction of the Kiev-Kharkiv railway and is named after Ye. \*Hrebinka. UNR and Bolshevik troops fought each other there several times, particularly in January 1919.

**Hrebinky.** IV-11. Town smt (1978 pop 8,100) in Vasykiv raion, Kiev oblast. It has a sugar refinery, a dairy, a mixed-feed plant, and an agricultural-machinery plant. An experimental farm of the All-Union Sugar Beet Institute is located there. The town was founded in the early 17th century.

Metropolitan Floriian Hrebnytsky

**Hrebnytsky, Floriian** [Hrebnyč'kyj, Florijan], b 1683 in the vicinity of Polatsk, Belorussia, d 1762 in Strun, near Polatsk. Leader of the Ukrainian-Belorussian Uniate church. Entering the Basilian monastic order in 1699, he completed his theological studies in Vilnius Collegium (TH D, 1710) and was appointed archbishop of Polatsk in 1717. He participated in the Synod of \*Zamostia in 1720 and vigorously implemented its reforms. Between 1746 and 1748 he administered the Kievan metropolitanate and in 1748 he became metropolitan. He protested Russian discrimination against Uniates and Polish attempts to subsume the Uniates under the Roman Catholic church. On his request Pope Benedict XIV issued *Allatae sunt* (1755), reaffirming papal opposition to the conversion of eastern-rite Catholics to the Latin rite. Hrebnytsky did much to improve the education of the Uniate clergy. Thanks to his efforts, the Pope gave the Uniate church control of the Vilnius Pontifical Seminary. Hrebnytsky summoned frequent episcopal councils to strengthen unity and discipline within the church.

**Hrechenko, Vasyl** [Hrečenko, Vasył'], b 30 January 1906 in Kobeliaky, Poltava gubernia, d 14 September 1967 in Kharkiv. Stage designer. A graduate of the Kharkiv Art Institute, from 1933 he worked at the Kharkiv Ukrainian Drama Theater (before 1934 the Berezil theater), where in 1944 he was appointed chief set designer. He designed sets for over 60 plays, including T. Shevchenko's *Nazar Stodolia* (1939), A. Dumas the Younger's *La Femme de Claude* (1938), *Eugénie Grandet*, based on H. de

Balzac's novel (1940), Shakespeare's *Othello* (1952) and *Hamlet* (1956), I. Tobilevych's *Sava Chalvi* (1958), and L. Ukrainka's *Kaminnyi hospodar* (The Stone Master, 1966).

**Hrechukha, Mykhailo** [Hrečuxa, Myxajlo], b 19 September 1902 in Moshny, Cherkasy county, Kiev gubernia, d 15 May 1976 in Kiev. State and party official. He served in the party as first secretary of the Zhytomyr city and oblast committees (1938–9), as member of the republican Politburo (1938–61), and as candidate member of the CC CPSU (1956–61). In the government of the Ukrainian SSR he was president of the Supreme Soviet (1939–54) and deputy-chairman (1954–61) of the Council of Ministers.

**Hrechulevych, Vasyl** [Hrečulevyč, Vasył'], b 1791 in Podilia, d 1875. Archpriest of the Kamianets-Podilskiy eparchy. He wrote a popular collection of sermons, *Pro-povedi na malorossiiskom iazyke* (Sermons in the Little Russian Language, 1849; 2nd edn, 1857), *Katekhizicheskiia besedy na simvol very i molitvu Gospodniu* (Catechismal Conversations on the Confession of Faith and the Lord's Prayer, 1858), *Besedy o semi tainstvakh* (Conversations on the Seven Sacraments, 1859), and two conversations *O dolzhnostiakh roditel'ei i detei* (On the Duties of Parents and Children, 1859). All these books, despite their titles, were written in Ukrainian and are among the few Ukrainian religious works that were approved by Russian censors.

**Hrechyna, Mykhailo** [Hrečyna, Myxajlo], b 11 April 1902 in Budyshche, Cherkasy county, Kiev gubernia, d 21 June 1979 in Kiev. Architect. A graduate of the Kiev State Art Institute (1930), he helped design a number of large buildings in Kiev: eg, the Dynamo Stadium (1937, reconstructed in 1956–8 and 1978–9), the Central Stadium (1937–41, reconstructed in 1967 and 1978), the Sports Palace (1960), the Chamber of Trade and Industry building (1964), and the Rus' hotel (1965–79). He also built the Tarasova Hora hotel (1961) in Kaniv. His publications include *Stadiony* (Stadiums, 1957) and articles on architecture and construction.

Oleksander Hrekov

Borys Hrinchenko

**Hrekov, Oleksander**, b 4 December 1875 in Sopych, Hlukhiv county, Chernihiv gubernia, d 2 December 1958 in Vienna. Ukrainian army general. In the Russian army from 1899, Hrekov graduated from the General Staff Academy in St Petersburg in 1905. During the First World War he commanded various units of the Russian army, and in 1915 was promoted to general. In the Ukrainian

army from 1917 to 1919, he held a number of important posts, including division commander, deputy then minister of military affairs of the UNR, and commander of the southern front. From 9 June to 5 July 1919 he was commander in chief of the Ukrainian Galician Army and conducted the successful Chortkiv offensive for which he was promoted to major general. From 1920 he lived in Vienna, where on 30 August 1948 he was arrested by the MVD and incarcerated in Siberia. He was released and returned to Vienna on 23 December 1956.

**Hrenivka settlement.** A settlement of the early \*Trypilian culture excavated in Hrenivka (now Lupolove), Ulianivka raion, Kirovohrad oblast in 1947–8. Uncovered were the remains of surface mud dwellings with stone doorsteps, pottery fragments, and various stone implements and weapons.

**Heze, Volodymyr**, b 9 December 1915 in Moscow. Hydrobiologist; corresponding member of the AN URSR since 1967. A graduate of Kharkiv University (1939), since 1959 he has worked as director and branch head at the AN URSR Institute of the Biology of Southern Seas. Heze specializes in saltwater and freshwater hydrobiology, including the biological activity of reservoirs, the pelagic biological structure of the Black, Mediterranean, and Caribbean seas and Atlantic Ocean, and the trophic structure of plankton in the Ionic Sea. His quantitative studies of plankton production have been used to calculate the renewal of the nutritional base of fish.

**Hridniev, Vitalii** [Hridnjev, Vitalij], b 7 August 1908 in Uvarovo, Tambov gubernia, Russia. Metallurgist; full member of the AN URSR since 1967. From 1930 to 1941 he worked at the Dnipropetrovske Metallurgical Institute and from 1945 to 1955 at the Kiev Polytechnical Institute. In 1955 he was appointed director of the AN URSR Institute of the Physics of Metals. He has contributed to various areas of the physics of metals: the theory of phase conversions in iron-, titanium-, and copper-based alloys; the low-temperature behavior of metals; and the theory of electro-tempering of steel.

**Hrinchenko, Borys** [Hrinčenko], b 9 December 1863 at Vilkhovy Yar khutir in Kharkiv county, d 6 May 1910 in Ospedaletti, Italy. Prominent public figure, educator, writer, folklorist, and linguist. The best known of his numerous pseudonyms are P. Vartovy, V. Chaichenko, B. Vilkhivsky, and L. Yavorenko. For 10 years he taught in elementary schools in Kharkiv and Katerynoslav gubernias. He made an effort to teach children their native language and also wrote some of the first Ukrainian-language school textbooks. He was one of the founders of the \*Brotherhood of Taras in 1891. In 1894 he settled in Chernihiv, where he worked at the gubernia zemstvo office and was active in the local hromada. With I. Cherevatenko's financial support, he organized there the largest publishing house in Russian-ruled Ukraine, which published 50 popular-educational books despite severe censorship. In 1902 he moved to Kiev, where the Kiev Hromada entrusted him with the task of compiling a dictionary of the Ukrainian language. In 1906 he became a coeditor of the newspaper *Hromads'ka dumka* and the journal *Nova hromada*. He founded and was first president (1906–9) of the Kiev Prosvita society. In 1904 he was

a cofounder of both the \*Ukrainian Radical party and the \*Ukrainian Democratic party, which merged in 1905 to form the \*Ukrainian Democratic Radical party (UDRP).

Hrinchenko's dedicated service to the populist cause began in the 1880s when the prospects of success appeared dimmest. It consisted mostly of journalistic and community work aimed at shaping, in Hrinchenko's words, 'out of the Ukrainian nation one nationally conscious, enlightened community' that would have access to all the achievements of culture and would overcome the gap between the common people and the intelligentsia. His later convictions were formulated in the program of the UDRP, of which he was the author. Among his publicistic works, 'Lysty z Ukraïny Naddnyprians'koi' (Letters from Dnieper Ukraine, published in the Chernivtsi weekly *Bukovyna* in 1892–3 and separately in Kiev 1917 under the pseudonym P. Vartovy) is particularly important. Hrinchenko expounded his ideas, based on years of pedagogical and community work, in the books *Na besprosvetnom puti (Ob ukrainskoi shkole)* (On the Darkling Path [On Ukrainian Schools], 1906) and *Pered shyrokym svitom* (Before the Wide World, 1907), as well as in numerous articles in the popular press. He died of tuberculosis and was buried in Kiev. His funeral was a day of national mourning.

Hrinchenko's literary work was directly linked with his journalistic work and was to a large extent subservient to it. In his 50 realistic short stories and tales and particularly in his four novelettes – *Soniashnyi promin'* (The Sun Ray, 1891), *Na rozputti* (At the Crossroads, 1892), *Sered temnoi nochi* (In the Dark Night, 1901), and *Pid tykhy my verbamy* (Under the Quiet Willows, 1902) – he depicted Ukrainian peasant life while raising urgent social questions, the attitude of the intelligentsia to the peasantry, the education and denationalization of the rural population, and the relation between nationalism and radicalism or socialism. 'Sad scenes' of peasant life, dedication to the cause of the people, and the pathos of public duty are the dominant themes of his poetry, which first appeared in 1891. Some of Hrinchenko's plays are historical – *Stepovyi hist'* (The Steppe Guest, 1898) and *Sered buri* (In the Midst of a Storm, 1899). Others deal with everyday, practical issues – for example, *Nakhmarylo* (It Has Become Cloudy, 1897), *Arsen Iavorenko* (1901), and *Na novyi shliakh* (Onto a New Road, 1906). Because of their relevant social content, Hrinchenko's works were very popular in their time, but have become dated. The author's practical motivation accounts for the schematic style of his works. Hrinchenko also translated a number of works by Western European writers including J. von Goethe, F. von Schiller, G. Hauptmann, H. Ibsen, A. Schnitzler, O. Mirbeau, and D. Defoe.

Hrinchenko was a noted Ukrainian ethnographer. His major contributions in this field are the large, well-annotated collection *Etnograficheskie materialy, sobrannye v Chernigovskoi i sosednikh s nei guberniakh* (Ethnographic Materials Collected in the Chernihiv and Neighboring Gubernias, 3 vols, 1895–9); a collection of Ukrainian folk tales and stories, *Iz ust naroda: Maloruskie rasskazy, skazki i prochee* (From the Mouths of the People: Little Russian Stories, Tales, Etc, 1900); and the first bibliographic guide, *Literatura ukrainskogo fol'klora (1777–1900)* (The Literature of Ukrainian Folklore [1777–1900], 1901).

His interest in ethnography led Hrinchenko to collect material for a dictionary. He incorporated much of this

material into the 68,000-word, four-volume *Slovar ukrains'koi movy* (Dictionary of the Ukrainian Language, 1907–9) that he edited, which contained also materials collected by P. Kulish from 1861 on, the Kiev Hromada, and the editorial board of *Kievskaia starina*. The dictionary is based on ethnographic records and excerpts from literary works published mostly between 1798 and 1870; almost all of it is documented. Until recently it was the fullest Ukrainian dictionary of its kind and one of the outstanding dictionaries in Slavic lexicology. It is prefaced by Hrinchenko's valuable survey of Ukrainian lexicography.

Hrinchenko was involved also in the development of the literary Ukrainian language. In such articles as 'Halys'ki virshi' (Galician Poems, 1891) and 'Kil'ka sliv pro nashu literaturnu movu' (A Few Words about Our Literary Language, 1892) in *Zoria*, he objected to an excessive infiltration of Western Ukrainian elements into the standard language based on the dialects of Dnieper Ukraine. In accordance with his populist orientation, Hrinchenko took the comprehensibility of an expression to the common people as the main criterion for its acceptability. His observations on the attitude of the peasants to literary Ukrainian as well as his arguments for the free development of the Ukrainian language were presented in the book *Tiazhkym shliakhom* (Along a Difficult Road, 1906; 2nd edn, 1912). In the 1900s Hrinchenko took a more moderate position on Western Ukrainian elements in literary Ukrainian.

The fullest collection of Hrinchenko's literary works is the 10-volume set published by Knyhospilka and Rukh publishers (1926–30).

M. Hlobenko

Mariia Hrinchenko

Mykola Hrinchenko

**Hrinchenko, Mariia** [Hrinčenko, Marija] (pseud: M. Zahirnia; née Gladilina), b 1863 in Bohodukhiv, Kharkiv gubernia, d 15 July 1928 in Kiev. Wife and active assistant of B. \*Hrinchenko in his civic, ethnographic, and lexicographic work; author of popular brochures and books; translator into Ukrainian of works by such writers as H. Ibsen, M. Maeterlinck, H. Sudermann, M. Twain, H. C. Anderson, E. De Amicis, H. Beecher Stowe, and C. Gol-

doni. From 1919 she worked as a member of the VUAN Commission of the Dictionary of Contemporary Ukrainian. The second volume of the dictionary was subsequently dedicated to her memory.

**Hrinchenko, Mykola** [Hrinčenko], b 4 May 1888 in Kiev, d 27 November 1942 in Ufa, Bashkir ASSR. Musicologist, historian of Ukrainian music, and folklorist. A graduate of the Kiev Music School (1912) and the Kamianets-Podilskyi Ukrainian State University (1920), he taught at the Lysenko Music and Drama Institute (1925–33) and the Kiev Conservatory (1934–7). At the same time he was a research assistant of the Chair of Art Studies at the All-Ukrainian Academy of Sciences, and in the 1930s of the Institute of Ukrainian Folklore. In 1933 he was arrested and forced to renounce his 'nationalist deviations.' His publications include several monographs and about 60 articles on musicology and folklore, some of which were republished in a collection of selected works in 1959. His most important work is *Istoriia ukrains'koi muzyky* (History of Ukrainian Music, 1922), which was republished in 1961 by the Ukrainian Music Institute in New York.

**Hrinchenko, Oleksander** [Hrinčenko], b 23 June 1904 in Dovhenke, Uman county, Kiev gubernia. Soil scientist. A graduate of Uman Agricultural Institute (1926), from 1929 he worked at the Kharkiv Agricultural Institute, serving as rector (1959–69) and then head of its Department of Soil Science (from 1969). Hrinchenko developed theories and practical methods of increasing the productivity of solonetz and podzol soils of the forest-steppe and the Polisia region of Ukraine.

**Hrodzinsky, Andrii** [Hrodzins'kyj, Andrij], b 3 December 1926 in Bila Tserkva. Botanist and plant physiologist; since 1979 full member of the AN URSS; brother of D. \*Hrodzinsky. A graduate of the Bila Tserkva Agricultural Institute (1954), he joined the staff of the Institute of Botany of the AN URSS in 1957. Since 1965 he has been director of the academy's Central Republican Botanical Garden, and since 1974 academic secretary of the Division of General Biology. His research has centered on the biochemical and physiological interaction of plants in cultivated and natural ecosystems.

**Hrodzinsky, Dmytro** [Hrodzins'kyj], b 5 August 1929 in Bila Tserkva. Plant physiologist and biophysicist; since 1976 corresponding member of the AN URSS; brother of A. \*Hrodzinsky. A graduate of the Bila Tserkva Agricultural Institute (1952) and Moscow University (1954), in 1955 he joined the staff of the Institute of Plant Physiology of the AN URSS. In 1963 he became head of its biophysics and radiobiology department and in 1974 director of the institute. His research deals with the effects of radiation on plant cells and tissues, and their mechanisms for repairing radiation damage.

**Hrodzinsky, Morits** [Hrodzysn'kyj, Moric], b 26 January 1887 near Berdianske, Tavriia gubernia, d 22 November 1962 in Kharkiv. Jurist, specialist in criminal law and procedure. In 1920 he began to lecture at the Kharkiv Juridical Institute. His chief works are *Obviniamemy, ego obiazannosti i prava v protsesse* (The Accused, His Obligations and Rights in the Legal Process, 1926), *Dokazy v*

*radians'komu kryminal'nomu protsesi* (Evidence in Soviet Criminal Trials, 1933), and *Kassatsionnoe i nadzornoe proivodstvo v sovetskom ugovnom protsesse* (Appeal and Review Procedure in Soviet Criminal Trials, 1949).

**Hromada.** The Ukrainian term for a commune or community – the most basic administrative-territorial unit in any one (rural) settlement. Historically the social and legal significance of the term has varied. It has also been used to refer to church-parish communities and to groups sharing property (to the exclusion of non-members). During the medieval Princely era a community was called a *\*verv*. Several *vervy* made up a *\*volost*. Other terms for communities at the time were the *desiatok* (clan), *sotnia* (larger clan), and *\*tysiacha* (tribe); with time these took on the same meaning as the *hromada*, *verv*, and *zemlia* ('land,' ie, 'domain') respectively, and in the end acquired additional military meanings (see *\*Desiatskyi* and *\*Tysiatskyi*).

In the 14th and 15th centuries, when *\*Rus'* law was still in effect in Galicia and the Lithuanian-Ruthenian state, many *volost hromady* existed and enjoyed wide-ranging self-rule. The head of each *\*dvoryshche* (an extended-family group) met with his peers (*muzhiie*, *liudy*) to elect the leader (*starets* or *\*starosta*) of a *volost*. The general assembly of a *volost* – the *\*kopa* – had judicial and enforcement functions (see *\*Community court*), and members of the *volost* were collectively responsible for tax collection and apprehending and handing over wrongdoers. In introducing serfdom (see *\*Voloka land reform*), the nobility of the 16th century broke up the *volost hromady* into individual village *hromady*. The latter retained vestiges of self-rule and fought to maintain their ancient rights, but they lost their autonomy with the advent of Polish-Lithuanian rule and the substitution of *Rus'* law with *\*Germanic law*. Thereafter the *hromada* was subject to the authority of a *\*viit* (reeve) designated by the local demesnal owner (a noble, the church, or the king).

In the Carpathian Mountains of Galicia the pastoral *hromady* were governed by *\*Wallachian law*; they elected their leader (*kniaz*) and enjoyed self-rule for a much longer time because of their isolation and non-agricultural economy.

In Left-Bank Ukraine, *hromady* existed well into the 19th century. They were either purely Cossack, mixed (ie, consisting of Cossacks and commoners sharing the same rights but headed by a Cossack otaman), or purely peasant-village *hromady* (headed by a *viit* or *starosta*). The otaman and *viit/starosta* were elected and were responsible for convening assemblies to resolve communal matters of administration, justice, and land use.

Because the *hromady* each owned some land, they came to be known as land communities. Allotments of arable land and their subdivision were designated by the *hromada* assembly. In Ukraine, land ownership by the *hromady* diminished during the 18th century; in Russia proper, land ownership by the peasant commune (*\*obshchina*) had deeper roots and continued up to the 1917 Revolution. The 1861 *\*land reform* and abolition of serfdom in the Russian Empire gave the land *hromady* new relevance: land ownership was granted not to individual peasants, but to the *hromada*, which then distributed the land and had collective responsibility for ensuring that its members paid their taxes and redemption payments.

This kind of *hromada* was prevalent in Left-Bank and Southern Ukraine. Not until the *\*Stolypin agrarian reforms* after the 1905 Revolution did private land ownership and use supersede that of the commune. This transformation occurred far more extensively in Ukraine than in Russia proper (see *\*Land tenure system*).

Under Russian rule, the *hromada* as an administrative unit existed in the form of a 'rural society,' and throughout the 19th century it was allowed a minimum of social organization and autonomy. Until 1861, only state peasants could belong to village *hromady*; afterwards, all emancipated serfs were included. The governing bodies of the village *hromada* were the *skhod* (assembly, consisting of the village elders and 2 adult male family heads for every 10 households) and the *starosta*. The *skhod* elected the *starosta* and other officials, set taxes, and resolved various husbandry problems. Nonetheless, the village *hromada* had extremely limited self-rule and was directly supervised by various *volost* authorities. On an informal and extra-legal level the *hromada* also acted to preserve community solidarity and interests through social control of behavior. Community action (*samosud*) was taken against fellow villagers or outsiders who broke the law or infringed upon local customs.

Under Austrian rule, the West Ukrainian village *hromada* had much more extensive autonomy. In addition to specific functions delineated by various laws, it performed others handed down by the civil administration. The governing organs of the *hromada* were the council and the *viit*. Only adult males who paid taxes or were enumerated in the census as part of a particular professional category could take part in its elections.

During the period of Ukrainian statehood in 1917–20, self-government of the *hromady* was restored and democratized but had little opportunity to develop. Under Soviet rule, the village and municipal *hromady* were replaced in the 1920s by *\*rural soviets* and *\*municipal governments*.

In Western Ukraine under interwar Polish rule the village *hromada* did not, in fact, have its own government but was, in most cases, administered by an appointed government commissioner. The traditional system, however, was not officially abolished until 1933, when a new law concerning territorial self-rule was introduced and several *hromady* came to constitute a *\*gmina*. The *hromada* was responsible for taking care of its village's communal property and roads, and co-operating with the *gmina* authorities in cultural, agricultural, and health matters affecting the village. The head of the *hromada* – the *\*soltys* – and its council were elected by all inhabitants of the *hromada* who were 24 years of age or older. The election of the *soltys* was confirmed by the county head (*starosta*), and the entire *hromada* was supervised by the county office and the *gmina* head (*viit*, Polish: *wójt*), who, despite the existence of this legal framework, was frequently appointed in many Ukrainian regions by the commissioner.

In Transcarpathia, each village had a self-governing *hromada*, which elected its *starosta*. Only in matters concerning the administration of the state as a whole (under Hungary and Czechoslovakia) were several *hromady* subordinated to a district notary office.

**Hromada** (Community). A weekly newspaper published in Lutske, Volhynia, from 1922 to 1926. At first, under the editorship of A. Novynsky (1922–4), it had a general democratic character. From 22 November 1925 it was the official organ of the Ukrainian National Democratic Alliance, edited by M. Cherkavsky. Following the 43rd issue, it was suppressed by the Polish regime. It reappeared as *Ukrains'ka hromada* and continued to be published until 1929.

*Hromada*

**Hromada.** Sociopolitical and literary collection published in Geneva from 1878 to 1882 by M. \*Drahomanov with the assistance of A. Liakhotsky, S. Podolynsky, F. Vovk, L. Drahomanov, and later M. Pavlyk. Altogether five volumes of the collection appeared: two in 1878 and one each in 1879, 1880, and 1882. They contained theoretical articles advocating a democratic, socialist program, surveys of socioeconomic conditions in Ukraine, literary works, and critical essays such as M. Drahomanov's important essay on T. Shevchenko.

In 1881 two issues of a political journal also entitled *Hromada* appeared in Geneva. Its editors were M. Drahomanov, S. Podolynsky, and M. Pavlyk. Its platform, which accepted the necessity of a revolution, was defined more clearly than that of the collection. Besides surveys of political developments in Europe and analyses of socioeconomic conditions in Ukraine, the journal published belles lettres. In 1886 the \*Hromada of Kiev, which considered Drahomanov's political commitment untimely and harmful to the Ukrainian national revival in Ukraine, broke off relations with him. Without the hromada's financial support he could no longer publish his collection or journal.

**Hromada of Kiev.** The most active and enduring hromada in Russian-ruled Ukraine (see \*Hromadas). It was not only the chief cultural, and to some extent political, society of Ukrainian intelligentsia in Kiev but also, through its contacts with similar societies in other cities, the most important catalyst of the Ukrainian national revival of the second half of the 19th century. Although accounts vary, it was founded probably in 1859 mostly by students who felt morally obligated to improve the condition of the people through education. The first period of the hromada's history (1859–63) was devoted primarily to \*Sunday-school teaching. The students who taught at the *Novoe Stroenie* School – O. Stoiarov, P. Chubynsky, V. Torsky, and the Syniehub brothers – were among the hromada's founders. At the end of 1860 or the beginning

of 1861 a \**khlopoman* group consisting of V. Antonovych, T. Rylsky, K. Mykhalchuk, B. Poznansky, F. Panchenko, and others joined the hromada. The society did not have a clearly defined program or structure. As stated in its public declaration, 'Otzyv iz Kiev' (A Reply from Kiev, published in *Russkii vestnik* [1862]) signed by 21 members, the hromada rejected revolutionary activity and supported education of the peasants, the development of the Ukrainian language and literature, and separatism. In 1862, at the height of its activity, the hromada's membership reached 200, and included representatives from various social strata – the peasantry, Cossack, clergy, civil servants, burghers, and landowners – and from different nationalities – Jews and Poles as well as Ukrainians. After closing down the Sunday schools in August 1862, the authorities officially banned the hromada at the beginning of 1863. Nevertheless for a whole year it continued some of its activities, such as studying ethnography, customary law, and geography and preparing books for the masses. At the end of 1863 and the beginning of 1864 its members published a handwritten satirical magazine *Pomyinytsia* that contained information about the hromada's membership and activities. When the use of Ukrainian in print became severely restricted by P. \*Valuev's circular, the hromada's level of activity declined.

Hromada of Kiev, August 1874; sitting on the floor, from left: fourth O. Rusov, fifth I. Zhytetsky; sitting on chairs, from left: M. Lysenko, M. Chubynsky, I. Nechui-Levytsky, M. Starytsky, O. Levytsky; standing, from left: second M. Drahomanov, fifth M. Kovalevsky, second from right P. Zhytetsky

The hromada renewed its activity in 1869. Its ranks were strengthened by the influx of new members, and included such cultural activists as V. Antonovych, P. Zhytetsky, M. Drahomanov, M. Lysenko, V. Berenshtam, M. Starytsky, F. Vovk, M. Ziber, P. Chubynsky, P. Kosach, V. Rubinstein, I. Rudchenko, Yu. Tsvitkovsky, and O. Rusov. The hromada met on Saturdays at the apartments of its members. It helped young peasants to get a secondary education, and then encouraged them to work as educators in the villages. Its greatest achievement was to establish the \*Southwestern Branch of the Imperial Russian Geographic Society, which between 1873 and 1876 completed an astonishing amount of research in the geography, ethnography, economy, and statistics of Ukraine. Most of the hromada's members worked in the branch, among whose nearly 200 associates the most

active were V. Antonovych, P. Chubynsky, and M. Drahomanov. Besides scholarly work, the hromada turned its attention to public affairs. It took over the newspaper *\*Kievskii telegraf*, which under the editorship of its members Yu. Tsvitkovsky and M. Drahomanov (1875–6) became the hromada's unofficial organ. In 1876 the secret *\*Ems Ukase* led to new repressions against the Kiev hromada: the Southwestern Branch and the *Kievskii telegraf* were closed down, some hromada members (M. Drahomanov and M. Ziber) were dismissed from their leading posts at Kiev University, and others (F. Vovk and S. Podolynsky) were forced to emigrate. Under the close surveillance of the authorities, the hromada reduced its activities and limited itself to strictly cultural, apolitical goals. As a result it failed to attract members from the younger generation, which began to form its own hromadas in the second half of the 1870s. To distinguish it from the new societies, the Hromada of Kiev began to be called the Old Hromada.

In the 1880s the hromada, led by V. Antonovych, again became more active in the cultural sphere. Its energies were focused on publishing a journal, *\*Kievskaiia starina* (1882–1906), devoted to Ukrainian studies. This unofficial organ of the Old Hromada was financed by V. Symyrenko, V. Tarnovsky, and Ye. Chykalenko. At the same time the Old Hromada built a new monument on T. Shevchenko's grave in Kaniv and republished his *Kobzar* (The Minstrel, 1884). To dissociate itself from M. Drahomanov's political ideas and activities in Geneva, the hromada, which 10 years before had entrusted him with the task of informing Western Europe about Ukraine and had provided the financial support for his publications, broke off relations with him in 1886.

At the end of the 19th and the beginning of the 20th centuries the Old Hromada admitted some younger members, such as Ye. Chykalenko, O. Cherniakhivsky, I. Steshenko, S. Yefremov, L. Zhebunov, Ye. Tymchenko, and M. Levytsky, and intensified its activities. It completed the compilation of a Ukrainian dictionary that had been carried on for many years under V. Naumenko's direction, and published it under the editorship of B. Hrinchenko in 1907–9. Thanks to the hromada's initiative the *\*General Ukrainian Non-Party Democratic Organization* was founded in 1897. Until 1917 it played an active role in organizing *\*Prosvita* societies and some Ukrainian organizations of a national scope such as the *\*Society of Ukrainian Progressives*.

**Hromadas.** Clandestine societies of Ukrainian intelligentsia that in the second half of the 19th century were the principal agents for the growth of Ukrainian national consciousness within the Russian Empire. They began to appear after the Crimean War, in the late 1850s, as part of the broad reform movement. Being illegal associations they lacked a definite organizational form, a well-defined structure and program, and a clearly delimited membership. Because of police persecution and the mobility of their members, most hromadas existed for only a few years. Even in the longer-lived ones the level of activity fluctuated considerably. Members differed in political conviction; what united them was a love for the Ukrainian language and traditions and the desire to serve the people. The general aims of the hromadas were to instill through self-education a sense of national identity in their members and to improve through popular education the living standard of the peasant masses. Members were encouraged to use Ukrainian and to study Ukrainian history, folklore, and language. They read T. Shevchenko's works and observed the anniversary of his death. Each hromada maintained a small library of illegal books and journals from abroad for the use of its members. The larger hromadas organized drama groups and choirs, and staged Ukrainian plays and concerts for the public. The hromadas were active in the *\*Sunday-school movement*: they financed and staffed schools and prepared textbooks. They also printed educational booklets for the peasants and distributed them in the villages. Avoiding contacts with revolutionary circles, the hromadas regarded their own activities as strictly cultural and educational. It was only at the turn of the century that they began to raise political issues and to become involved in political action. With time a generational difference emerged among the hromadas: societies consisting of young people (secondary-school and university students) became known as young (*molodi*) hromadas, and those with older members became known as old (*stari*) hromadas.

Since most of the information about the hromadas is derived from personal recollections and police records, it is spotty and often contradictory. Some hromadas have left no trace behind. The first hromada, established in St Petersburg, was already active by the fall of 1858. It consisted of some former members of the *\*Cyril and Methodius Brotherhood*, M. Kostomarov, P. Kulish, T. Shevchenko, and V. Bilozersky, V. Kokhovsky, O. Kistiakovsky, D. Kamenetsky, M. Storozhenko, M., F. and O. Lazarevsky, H. Chestakhivsky, V. Menchyts, and Ya. Kukharenko. With financial support from the landowners V. Tarnovsky and H. Galagan, works of Ukrainian writers began to be published and the journal *\*Osnova* appeared. St Petersburg became the center of the Ukrainian national movement at the time. Another hromada outside Ukraine sprang up at the University of Moscow in 1858–9. It maintained close ties with former members of the Cyril and Methodius Brotherhood. By the mid-1860s its membership, which included P. Kapnist and M. Rohovych, reached 60. It was uncovered by the police in 1866.

In Ukraine the most important hromada, the *\*Hromada of Kiev*, was organized in 1859 by students who were active in the Sunday-school movement. It maintained close contact with the St Petersburg hromada. In Kharkiv a student circle that collected ethnographic

material formed around O. Potebnia at the end of the 1850s, but the first hromada arose probably in 1861–2. In Poltava a hromada arose in 1858. Among its members were D. Pylchykiv, O. Konysky, M. Zhuchenko, Ye. Myloradovych, and V. Kulyk. Another hromada sprang up in Chernihiv probably at the end of 1858. Its most active members were O. Tyshchynsky, O. Markovych, L. Hlibov, and S. Nis, and its most important contribution to the development of national consciousness was the publication of *\*Chernigovskii listok*. The Polish Insurrection of 1863–4 led to a strong anti-Ukrainian campaign in the Russian press and to repressive measures by the government. P. \*Valuev's secret circular prohibited the publication of Ukrainian books for the peasants. Ukrainian Sunday schools were closed down, and leading hromada activists such as P. Chubynsky, O. Konysky, and S. Nis were subjected to administrative banishment. These measures disrupted the activities of the hromadas for a number of years.

At the beginning of the 1870s the Hromada of Kiev with about 70 members resumed its leading role in the Ukrainian cultural revival. Its activities were disrupted again by the authorities in 1875–6. By this time a strong hromada had emerged in Odessa. Among its founding members were L. Smolensky, M. Klymovych, M. Kovalovsky, V. Malovany, and O. Andriievsky. Most of its members shared M. \*Drahomanov's ideas, and some of them (Ye. Borysov, Ya. Shulhyn, D. Ovsianko-Kulykovsky) even contributed articles to his journal *\*Hromada*. The society aided Drahomanov and other Ukrainian activists financially, supported Ukrainian publications in Galicia, financially helped talented individuals to gain an education, and distributed illegal literature. By the time it was crippled with a wave of arrests in 1879, the hromada in Odessa had over 100 members. Besides the Hromada of Kiev this was the only hromada that lasted for several generations.

In the 1880s those members of the Odessa hromada who had avoided exile turned to purely cultural activities. They supported the development of Ukrainian theater in southern Ukraine, published collections of the best current works by Ukrainian writers, helped M. Komarov compile *Slovar' rosiis'ko-ukraïns'kyi* (The Russian-Ukrainian Dictionary, 4 vols, 1893–8), and made an unsuccessful attempt to publish a journal. Thanks to a more tolerant governor in the Kherson gubernia, the Odessa hromada was more active at the time than the Hromada of Kiev. In the 1890s a student hromada emerged in Odessa but it did not survive long. The old hromada, under pressure from younger members, gradually became involved in some political activity. In Kiev several student hromadas sprang up in the 1880s: a study circle inspired by Drahomanov's ideas was organized by O. Dobrohraieva at the Higher Courses for Women; a political group guided by M. Kovalevsky advocated a constitutional federation and spread propaganda among students; and several smaller circles were formed at particular schools. In the 1890s L. Skachkovsky organized a hromada of theology students, which consisted of about 30 members including O. Lototsky and P. Sikorsky. In 1895 a student hromada, which included H. Lazarevsky, D. Antonovych, V. Domanytsky, and P. Kholodny, arose at Kiev University. A number of other higher schools in Kiev had their own secret hromadas. There was little contact between the old hromada, which shied away from political involvement, and the young hromadas.

In Kharkiv there was a loosely organized, informal old hromada consisting of such scholars and writers as O. Potebnia, D. Pylchykov, V. Aleksandrov, P. Yefymenko, and his wife O. Yefymenko. A student hromada headed by O. Korchak-Chepurkivsky and including members such as M. Levytsky and Ye. Chykalenko took shape in 1882. Two years later a political hromada that embraced the principles of the Cyril and Methodius Brotherhood and of M. Drahomanov was organized by V. Malovany, M. Levytsky, I. Telychenko, and N. Sokolov. Another politically oriented student hromada was founded in 1897 by D. Antonovych, Yu. Kollard, M. Rusov, B. Martos, O. Kovalenko, B. Kaminsky, L. Matsiievych, and others. By 1899 it had over 100 members, and in 1904 it merged with the illegal \*Revolutionary Ukrainian party (RUP), which previously had been founded by the hromada. In Chernihiv a hromada with members such as I. Shrah, M. Kotsiubynsky, I. Konoval, and B. Hrinchenko was active at the end of the 1890s, and in Poltava a hromada was headed by M. Dmytriev.

Outside of Ukraine a large and active student hromada existed in the 1880s in St Petersburg, whose higher schools attracted many students from Ukraine. Hromada members smuggled illegal literature into Russia, studied Drahomanov's works, organized a choir, and celebrated Shevchenko's anniversary each year. In 1886 some of its members composed a political program and formed the Ukrainian Social Revolutionaries. Towards the end of the 1890s an old hromada was formed in St Petersburg by Ye. Chykalenko, V. Leontovych, O. Borodai, P. Stebnytsky, and others.

At the beginning of the 20th century as students became more nationally conscious and politically engaged, hromadas proliferated in gymnasiums, higher schools, and universities. The Revolution of 1905 drew attention to political issues and loosened restrictions on political activity. The student hromada in Kiev had evolved into a branch of the RUP by 1904 and in 1905 was decimated by arrests. It reorganized itself in the following year and fell under the influence of the Ukrainian Social Democratic party. In 1906 new hromadas arose at Kiev University, the Higher Courses for Women, and the Kiev Polytechnic. In order to gain official recognition these societies avoided political action. The student hromada of Kharkiv (est 1907), with a membership of about 150, was a legal, chartered society. In Odessa there was a short-lived (1903–6), illegal student hromada. Outside of Ukraine the St Petersburg student hromada in 1903 united over 300 Ukrainian students belonging to various school hromadas into one organization. Almost all members (about 60) of this hromada, which was headed by V. Pavlenko, H. Bokii, and then D. Doroshenko, were members of RUP. A small student hromada in Dorpat (Tartu) (est 1898) was headed by F. Matushevsky. In Moscow the Ukrainian student hromada (est 1898) staged concerts and plays and avoided political activities. A small student hromada was organized in Warsaw by V. Lashchenko in 1901.

At the end of the 19th century efforts were made to co-ordinate the activities of the widely dispersed old and young hromadas. At the initiative of V. Antonovych and O. Konysky, a conference of members of various hromadas was held in Kiev in 1897, and the \*General Ukrainian Non-Party Democratic Organization was established. In August 1898 the first Ukrainian student conference was held in Kiev and was attended by representatives

of young hromadas. A year later the second conference was held. The purpose of the third conference, held in Poltava in June 1901, was to draw the student hromadas into revolutionary activity under the leadership of RUP. A fourth student conference was called in St Petersburg in 1904.

As reaction set in and restrictions on political activity were tightened, hromada members continued to be active in various cultural societies, Prosvitas, and other organizations until the Revolution of 1917. The traditional name hromada was later used by Ukrainian émigrés, particularly students, for their organizations.

**Hromadianka** (The Citizeness). The semimonthly sociopolitical organ of the women's organization *Druzhyna Kniahyni Olhy*. It was published in Lviv from October 1938 to 1939 in place of *Zhinka* (Woman) and *Ukraïinka* (Ukrainian Woman), which had been closed down by the Polish government. The editor was M. \*Rudnytska.

**Hromadianyn** (The Citizen). The organ of the Ukrainian Radical party in Bukovyna, published in Chernivtsi from 10 January 1909 to 1911. It appeared three times a month. In total, 39 issues appeared. The publisher and chief editor was V. Budzinsky, and the editorial board included Yu. Serbyniuk, D. Makohon, I. Popovych, and I. Herasymovych.

**Hromads'ka dumka** (Community Thought). The first Ukrainian-language daily newspaper published in the Russian Empire. It was published in Kiev by Ye. Chykalenko, V. Symyrenko, and V. Leontovych and first appeared on 31 December 1905. The first day's run of 5,000 copies was confiscated by the authorities, but the newspaper was again allowed to continue. It was closed temporarily by the government in late January 1906 and repressed throughout its existence. The last issued appeared on 18 August 1906, following which it was finally banned by the tsarist government. It published articles on politics, economics, culture, and developments in science, as well as literary works. The chief editor was F. \*Matushevsky and the editorial secretary was V. Kozlovsky. Contributors included S. Yefremov, V. Durdukivsky, B. and M. Hrinchenko, and M. Levytsky. Articles by M. Hrushevsky (on Ukrainian political thought in the 19th century), B. Hrinchenko (on education), and V. Domanytsky (review of Ukrainian press in Russia) were published, as well as publicistic articles by O. Ma-

kovei and M. Lozynsky, poems and satire by V. Samilenko, Kh. Alchevska, M. Cherniavsky, and P. Kapelhorodsky, and belles-lettres by A. Teslenko, V. Vynnychenko, and M. Levytsky. In September 1906 the daily *Rada* succeeded *Hromads'ka dumka*.

S. Yaniv

**Hromads'ka dumka (Lviv)**. See *Dilo*.

Metropolitan  
Oleksii Hromadsky

**Hromadsky, Oleksii** [Hromads'kyj, Oleksij], b 1882 in Dokudova, northern Kholm region, d 7 May 1943 near Smyha, Volhynia. Orthodox church leader and metropolitan. A graduate of the Kiev Theological Academy (1908), he served as lecturer and rector of the Kremianets Theological Seminary (1918–22). In 1922 he became bishop of Lutske, Hrodna, and Novahrudak and in 1928 archbishop. Appointed archbishop of Kremianets and Volhynia in 1934, he supported the de-Russification of the local church and its independence from the Moscow patriarchate. Under German rule, on 18 August 1941 a sobor of bishops at Pochaiv proclaimed him metropolitan of the new \*Ukrainian Autonomous Orthodox church. He then reversed his previous policy and recognized the canonical jurisdiction of the Moscow patriarchy. On 8 October 1942 he met in Pochaiv with representatives of the Ukrainian Autocephalous Orthodox church and worked out the conditions for the union of the two churches. A few months later, he was killed unintentionally in an UPA ambush. His publications include theological studies, two volumes of sermons in Ukrainian, and a historical monograph *K istorii Pravoslavnoi Tserkvi v Pol'she ... (1922–1933)* (Toward the History of the Orthodox Church in Poland ... [1922–1933], 1937).

**Hromads'kyi druh** (Community Friend). A radical political and literary journal edited by M. \*Pavlyk with I. \*Franko and the assistance of M. Drahomanov. It was published in Lviv using the \*Drahomanivka alphabet. Only two issues of the journal were published (in 1878), and both were confiscated by the Austrian authorities. After its suppression, Franko and Pavlyk published the collections *Dzvin* and *Molot*.

**Hromads'kyi holos** (Community Voice). A popular monthly, then semimonthly (1906–9), and finally weekly (from 1910) magazine published in Lviv from 1892 to 1939, with breaks in 1914–16 and 1918–21. It was the organ of the \*Ukrainian Radical party in Galicia, and then (from 1926) of the Ukrainian Socialist Radical party. Its editors included V. Budzynovsky (1892–6), I. Franko (1896–7), M. Pavlyk (1898–1903), L. Martovych (1904), and I.

Makukh (1905). Under the title *Novyi hromads'kyi holos*, its editors were I. Yaremko, P. Dumka, M. Viniarsky, P. Volosenko (1906–8), D. Katamai (1911–14), O. Nazaruk (1916–18), O. Pavliv (1922–8), and M. Stakhiv (1929–39). The more eminent contributors were I. Franko, V. Stefanyk, M. Cheremshyna, M. Shapoval, and P. Fedenko. Monthly supplements included *Sichovi visti* (1912–14, 1922–4, ed D. Katamai), *Molodi kameniari* (1928–32), and *Snip* (1936–7, ed O. Pavliv).

*Hromads'kyi visnyk*. See *Dilo*.

**Hromashevsky, Lev** [Hromaševs'kyj], b 13 October 1887 in Mykolaiv, d 1 May 1980 in Kiev. Epidemiologist; full member of the USSR Academy of Medical Sciences from 1944. Hromashevsky graduated from New Russia (Odessa) University in 1912. He worked in the department of epidemiology of the Odessa Medical Institute from 1918 to 1928, gaining recognition for his work on typhus and cholera. He then directed the Dnipropetrovske Institute of Sanitation and Bacteriology (1928–31) and the Department of Epidemiology of the Central Institute for the Training of Physicians (1931–48). From 1951 to 1963 he headed the Department of Epidemiology at the Kiev Medical Institute; he served also as the institute's assistant director from 1960 to 1970. Most of his publications deal with public health policy and with insect transmission of infectious enteric diseases and seasonal variations in the occurrence of these diseases.

**Hromenko** (*nom de guerre* of Duda, Mykhailo), b 1921 in Galicia, d ? Prominent UPA officer. After serving in the Nachtigall and 201 Schutzmannschaft battalions, from March 1943 he was a military instructor in various schools and units of UPA-North. For three years he commanded the 95th Company of the Peremyshl Battalion. On 11 September 1947 his company completed a long march across Czechoslovakia and arrived in West Germany, the first UPA unit to accomplish this feat. His personal account of the march was published as *U velykomu reidi* (In the Great Raid, 1956). In 1949 he was promoted to captain. In May 1950 he was sent to Ukraine with dispatches for the Ukrainian Supreme Liberation Council. Three months later he was captured by MVD agents and sentenced to 25 years in a concentration camp. Hromenko was twice awarded the Gold Cross of Combat Merit for heroism and exemplary leadership (1946 and 1950).

**Hromnytsky, Pavlo** [Hromnyc'kyj], b 15 December 1889 in Hromnytsia, Katerynoslav gubernia, d 23 August 1977 in Prague. Postimpressionist painter. He was a student of I. Repin and N. Dubovskoi and lived in Paris in 1922–5, where he studied with H. Matisse. From 1928 he lived in Prague except for a brief period of imprisonment in the USSR (1945–7). His works include *Poisonous Flowers* (1925), a portrait of I. Horbachevsky (1935), two portraits of O. Oles (1941, 1944) that in 1967 were presented by the painter as a gift to the Writers' Union of Ukraine, *The Builders* (1948), and *Autumn Mood* (1958). Some of Hromnytsky's paintings are found in the collections of the Tretyakov Gallery in Moscow, the Luxembourg Museum in Paris, the Kiev Museum of Ukrainian Art, the National Gallery in Prague, and the Svydnyk Museum of Ukrainian Culture in Czechoslovakia.

**Hromnytsky, Sydir (Isyodor)** [Hromnyc'kyj], b 7 January 1850 in Zahirochko, Bibrka county, Galicia, d 17 December 1937 in Lviv. Classical philologist and civic leader in Galicia. Hromnytsky studied theology and philosophy at the University of Vienna. He taught Greek and Latin at the Ukrainian Academic Gymnasium of Lviv in 1873 and from 1878 to 1906, and in 1906–16, was the first principal of its branch in Lviv. He was a leading member of many Galician organizations, most notably \*Ridna Shkola, the \*Teachers' Hromada, \*Ukrainska Besida, \*Prosvita, the \*Stauropogion Institute in Lviv, and the Provincial School Council (1914–20). He was also a member of the Lviv city council (1916–27). He was a vice-president and long-time administrator of the \*Shevchenko Scientific Society (1884–1903), and an honorary member from 1886.

**Hromokliia River** [Hromoklija]. A right-bank tributary of the Inhul River, flowing for 102 km through the western part of the Black Sea Lowland and draining a basin of 1,545 sq km. Its waters are used for irrigation.

**Hromyka or Hromeka, Mykhailo**, b ?, d December 1651 in Korsun (now Korsun-Shevchenkivskyyi, Cherkasy oblast). Colonel of Bila Tserkva regiment (1649–51). A member of the Ukrainian petty nobility, Hromyka served in the ranks of the \*registered Cossacks. During the \*Cossack-Polish War of 1648–51, he took part in the battles of Korsun, Zboriv, and Berestechko. He supervised the compilation of new lists of registered Cossacks, resulting from a clause in the Cossack-Polish Treaty of \*Bila Tserkva signed in 1651, after the Cossacks' defeat by the Poles. The number of registered Cossacks was to be lowered to 20,000, and those excluded were to be reduced to the status of serfs. As a result the Cossacks in Korsun revolted and killed Hromyka.

**Hrono** (Cluster). A literary and artistic group, created in Kiev in October 1920, under the leadership of V. Polishchuk. It opposed the 'proletarian' ideology of other groups and called for a 'synthesis of existing trends' and the 'harmonious coexistence of the collective and the individual' ('Credo' in the collection *Hrono*, 1920). Other members of the group were P. Fylypovych, H. Kosynka, G. Shkurupii, V. Cherniakhivska, M. Tereshchenko, D. Zahul, K. Kotko, M. Stasenka, and the artists M. Burachek, M. Kyrnarsky, V. Levandovsky, S. Pozharsky, and H. Narbut. The group's activity was short-lived, lasting only until 1921.

**Hrozyn, Borys**, b 16 October 1898 in Kiev, d 22 October 1962 in Kiev. Metallurgist; corresponding member of the AN URSR from 1939. He worked in various metallurgical institutes in Ukraine developing methods of studying the mechanical properties of tempered steel and of prolonging the life of machine parts, and studying the surface properties of metals. He pioneered the use of radioactive isotopes in the study of wear of machine components.

**Hrubeshiv** [Hrubešiv] (Polish: Hrubieszów). III-4. Town (1974 pop 16,300) and county town in Lublin voivodeship, Poland, situated on the Huchva River in the Kholm region. First mentioned in the 14th century as a royal village, in 1400 it was granted the rights of Magdeburg

law. It was destroyed by the Tatars in 1498. For centuries it had been a center of Ukrainian life in the southeastern Kholm region. In 1893 it had a population of 9,600, of which 5,260 were Jews, 3,260 were Orthodox, and 1,070 were Catholic. In the interwar period Ukrainians constituted 38 percent, Ukrainian-speaking Roman Catholics 20 percent, and Poles 32 percent of the population. In May 1946 Hrubeshiv was the site of an encounter between UPA and Polish underground units and Soviet and Polish government forces. That same year most of the county's Ukrainians were forcibly resettled in the Ukrainian SSR.

Volodymyr Hrudyn

**Hrudyn, Volodymyr** (Groudine, Vladimir), b 1893 in Kiev, d 14 November 1980 in Philadelphia. Pianist, composer, and pedagogue. A graduate of the Kiev (R. Glière's class) and Odessa conservatories, he taught music at the Kiev Conservatory and the Lysenko Music and Drama Institute, then at the Lysenko Higher Institute of Music in Lviv, and after the Second World War in Prague, Paris, and New York. His compositions include a symphony, two orchestral and four piano suites, two concertos for piano and orchestra, two violin sonatas and one for piano, two trios, a string quartet, and some songs. Some of his piano works were published in 1962 by Paragon.

**Hrudyna, Dmytro**, 1898–1937. Soviet drama critic of the 1920s and 1930s. He worked briefly as an actor and later headed the theater department of the Committee for the Arts at the Council of People's Commissars of the Ukrainian SSR. In his articles, which appeared in *Krytyka*, *Nove mystetstvo*, and *Radians'kyi teatr*, he attacked any strivings for new artistic forms, and particularly the \*Berezil theater directed by L. Kurbas. With the introduction of the Russification policy, he was arrested. He died in exile.

**Hrun-Tashan River** [Hrun'-Tašan']. A left-bank tributary of the Psol River in Poltava oblast, created by the confluence of the Hrun and Tashan rivers. It is 91 km long, and its basin area is 1,870 sq km.

**Hrunsky, Mykola** [Hruns'skyj], b 10 October 1872 in Sumy, Kharkiv gubernia, d 13 August 1951 in Kiev. Linguist, Slavist. A graduate of Kharkiv University (1896), he was appointed professor at Kiev University (1915). He published *Ocherki po istorii razrabotki sintaksisa slavianskikh iazykov* (Outlines of the History of Development of the Syntax of Slavic Languages, 2 vols, 1910–11); a

number of studies of the Freising Fragments, the Kiev Glagolitic Folios, and the Glagolitic alphabet; a prose translation with commentary on *Slovo o polku Ihorevi* (1952); and a number of textbooks in Church Slavonic, the history of the Ukrainian language, and contemporary Ukrainian orthography.

**Hrushetsky, Antin** [Hrušec'kyj], b 1734 in Volhynia, d 1798 in Suprasl (now Poland). Painter. Trained in Kamianets-Podil'skyi and Lviv, he entered the Basilian monastery in Pochaiv in 1751 as an experienced painter and devoted himself to icon painting. In 1760 he moved to Cracow, and then to Warsaw, where he did some paintings for King Stanislaus II Augustus Poniatowski, and to Suprasl, where the iconostasis that he painted has become famous. Some of his works were well known in their time: eg, *The Penitent Mary Magdalene* (1754), *The Three Kings* (1783), and *The Golden Calf* (undated). His paintings *Madonna* and *The Dance of the Nymphs* were displayed in 1894 at an exhibition in Lviv. His painting technique shows that he was familiar with post-renaissance Italian painting.

**Hrushetsky, Ivan** [Hrušec'kyj], b 22 August 1904 in Komyshevakha, Verkhodniprovske county, Katerynoslav gubernia. Communist party official. After beginning his political career in the 1920s in Zaporizhia oblast, he became a deputy to the USSR Supreme Soviet in 1937 and to the Ukrainian SSR Supreme Soviet in 1938. From 1938 to 1961 he served as secretary of oblast CP(B)U executive committees in Dnipropetrovske, Stanyslaviv, Chernivtsi, Lviv, and Volhynia. He was made a member of the CC CPU in 1952 and again in 1960, and of the CC CPSU in 1961. In 1972 he became a member of the Politburo of the CPU, chairman of the Presidium of the Supreme Soviet of the Ukrainian SSR, and deputy chairman of the Presidium of the USSR Supreme Soviet. He retired from these positions in 1976.

**Hrusheve Monastery**. Orthodox monastery dedicated to St Michael in Hrusheve village in eastern Transcarpathia. Established in the 12th century, it obtained the right of stauropegion in 1391 and became an important religious and cultural center with a library, school, and printing press. In 1404 it was endowed with three villages: Hrusheve, Teresva, and Kryve. With the advancement of Catholicism in Transcarpathia the monastery lost its estates in 1660 and was razed during I. Thököly's uprising against the Habsburgs (ca 1680).

**Hrushevskia, Kateryna** [Hruševs'ka], b 1900 in Lviv, d 1953 in exile, probably in Siberia. Ethnographer and

Kateryna Hrushevskia

sociologist; daughter of M. Hrushevsky. In the 1920s she worked at the VUAN as head of the Commission of Historical Songs and of the Cabinet of Primitive Culture, and as secretary of the Cultural-Historical Commission. In the early 1930s she shared her father's exile in Moscow. After his death in 1934, she resumed her scholarly work as a research associate of the AN URSR Institute of Literature. Her best work was published in *Pervisne hromadianstvo ta ioho perezhytty na Ukraïni* (1926–30), a journal that she edited. She was the editor of two important collections: *Z prymityvnoi kul'tury: Rozvidky i dopovidi* (From Primitive Culture: Studies and Lectures, 1924), with a foreword by M. Hrushevsky, and *Z prymityvnoho hospodarstva* (From Primitive Economy, 1927). Her chief accomplishment was the collection *Ukraïns'ki narodni dumy: Korpus* (Ukrainian Folk Dumas: The Corpus, 2 vols, 1927, 1931); volume three of the planned six-volume set was ready for publication but was confiscated by the Soviet authorities. She also took an interest in non-Ukrainian folklore and wrote *Prymityvni opovidannia: Kazky i baiky Afryky ta Ameryky* (Primitive Stories: The Tales and Fables of Africa and America, 1923). After her father's death she prepared for publication his manuscripts, particularly the subsequent volumes of *Istoriia Ukraïny-Rusy* (The History of Ukraine-Rus') and *Istoriia Ukraïns'koi literatury* (The History of Ukrainian Literature). In August 1937 Hrushevskia was arrested and sent to a concentration camp in Nogaisk. Her manuscripts were destroyed. Although some of her works are approved in the Soviet Union, she has not been rehabilitated.

M. Hnatiukivsky

**Hrushevskia, Mariia** [Hrushevs'ka, Marija] (née Voikovska), b ca 1870, Bohdanivka, Skalat county, Galicia, d 1953. Civic leader and pedagogue in Lviv and Kiev; the wife of M. \*Hrushevsky. Hrushevskia was an associate of the journal *Literaturno-naukovyi vistnyk*, in which she also published her translations of French works. In 1917 she was a member of the Central Rada and of the Ukrainian National Theater Committee.

**Hrushevskia-Shamrai, Hanna.** See Shamrai, Hanna.

**Hrushevsky, Mykhailo** [Hrušev'kyj, Myxajlo], b 29 September 1866 in Kholm, d 25 November 1934 in Kislovodsk, North Caucasus krai, RSFSR. The most distinguished Ukrainian historian; principal organizer of Ukrainian scholarship, prominent civic and political leader, publicist, and writer; member of the \*Shevchenko Scientific Society (NTSh) from 1894, the VUAN from 1923, and the USSR Academy of Sciences from 1929. Hrushevsky's father, Serhii, was a Slavist and pedagogue. In 1869 the family moved to the Caucasus where Hrushevsky graduated from the classical gymnasium in Tiflis (1886). While still a gymnasium student he began to write belle lettres in Ukrainian; his first publication was a story that appeared in the newspaper *Dilo* in 1885. Hrushevsky graduated in 1890 from the Historical-Philological Faculty at Kiev University where he was a student of V. \*Antonovych. His first scholarly publications were 'Iuzhnorusskie gospodarskie zamki v polovine XVI v.' (South Ruthenian Feudal Castles in the Mid-16th Century), *Kievskie universitetskie izvestiia*, 1890; 'Volynskii vopros 1077–1102' (The Volhynian Question, 1077–1102), *Kievskaiia starina*, no. 33 (1891); and 'Hromads'kyi rukh na Ukraïni-

Mykhailo Hrushevsky

Rusi v XIII vitsi' (The Social Movement in Ukraine-Rus' in the 13th Century), *Zapysky NTSh*, 1 (1892). He remained at Kiev University to prepare his candidate's thesis, published as *Ocherk istorii kievskei zemli ot smerti Iaroslava do kontsa XIV veka* (A Survey of the History of the Kiev Land from the Death of Yaroslav to the End of the 14th Century, 1891), and then received a master's degree for the dissertation 'Barskoe starostvo: Istoricheskie ocherki' (The Bar County: Historical Survey), published in 1894. In 1894, on the recommendation of V. Antonovych, Hrushevsky was appointed professor of the newly created chair of Ukrainian history (officially it was called The Second Chair of Universal History, with special reference to the History of Eastern Europe) at Lviv University.

Upon arriving in Lviv Hrushevsky became active in the NTSh. He became the director of the Historical-Philosophical Section in 1894, and in 1897 he was elected president. With extraordinary energy he reorganized the NTSh, which under his leadership became akin to an academy of sciences. He collected funds, founded a library and museum, initiated scholarly contacts with a host of academic bodies, and gathered around him many scholars, including his close collaborator for many years, I. \*Franko. Under Hrushevsky's editorship (1895–1913) the major journal of the NTSh, *Zapysky NTSh*, was transformed from an annual to a quarterly and then a bi-monthly publication. In 1895 he established the Archeographic Commission of NTSh, which published documents and sources for Ukrainian history in its serials *\*Zherela do istorii Ukraïny-Rusy* and *\*Pam'iatky Ukraïns'korus'koi movy i literatury*. Much of Hrushevsky's own work was published in these journals and later republished in *Rozvidky i materialy do istorii Ukraïny-Rusy* (Research and

Materials toward a History of Ukraine-Rus', 5 vols, 1896–1905). In Lviv Hrushevsky developed a school of Ukrainian history with historians such as S. Tomashivsky, O. Terletsy, M. Korduba, I. Krypiakivych, V. Herasymchuk, I. Dzhydzhora, I. Krevetsky, D. Korenets, and O. Tselevych.

In 1898, together with I. Franko and V. Hnatiuk, he founded *\*Literaturno-naukovyi visnyk*, the most important forum for Ukrainian literature and political discussion of its time. Hrushevsky was also one of the organizers of the Ukrainian Publishing Association (1899) and the *\*Society of Friends of Ukrainian Scholarship, Literature, and Art* (1904). Hrushevsky's contribution to the development of Ukrainian education in Galicia deserves particular attention. From 1908 he headed the *\*Teachers' Hromada* and from 1910 the *\*Provincial School Union*. Soon after arriving in Lviv he began to work towards the creation of a Ukrainian university there, beginning with the organization of popular lecture series and a summer school.

In 1898 the first volume of his monumental *Istoriia Ukraïny-Rusy* (History of Ukraine-Rus') was published in Lviv; by 1937 another nine volumes, covering Ukrainian history to 1658, had appeared in Lviv and Kiev. This work was the first major synthesis of Ukrainian history ever written. In 1904 his *Ocherk istorii ukrainskogo naroda* (Survey of the History of the Ukrainian People) was published in St Petersburg (2nd edn, 1906; 3rd edn, 1911). A general overview of Ukrainian history, this work was based on the course he had taught at the Russian Higher School of Social Studies in Paris in the spring of 1903. It was republished with some changes in a more popular form as *Illustrovana istoriia Ukraïny* (Illustrated History of Ukraine; the first of several Ukrainian editions appeared in 1911, and a Russian version was published in 1912). Subsequently, versions of these popular histories appeared in German, French, English, Bulgarian, and Czech.

In 1904, in a collection of the Russian Imperial Academy of Sciences, *Sbornik statei po slavianovedeniiu*, vol 1, Hrushevsky published perhaps his most important essay, titled 'Zvychna skhema "ruskoï" istorii i sprava ratsional'noho ukladu istorii skhidn'oho slov'ianstva' (The Traditional Scheme of 'Russian' History and the Problem of a Rational Ordering of the History of the Eastern Slavs). In this article Hrushevsky traced the history of Ukraine and of the Ukrainian people to the period of Kievan Rus' and argued that the history of the Ukrainian nation is distinct from that of the Russian both in its origin and in its political, economic, and cultural development (the German translation of the article appeared in 1935, and the English in 1952). Although the argument was rejected by most Russian historians, who believed that the modern Russian state was the only direct descendant of Kievan Rus' and did not accept that the Ukrainian nation had developed as a result of a separate and unique history, Hrushevsky's scheme and periodization of Ukrainian history was accepted, with some changes, by most Ukrainian historians, including those in Soviet Ukraine (until 1929), and in the emigration as the basic scheme of Ukrainian national historiography.

As a student and during his first years in Lviv, Hrushevsky devoted most of his energy to organizing Ukrainian scholarly and cultural life. In Kiev he worked closely with V. Antonovych, O. \*Konysky, and other activists of the older generation associated with the Hromada of

Kiev. In Galicia he began to play a more active role in Ukrainian political life. In 1899 he was one of the founders of the *\*National Democratic party*, although he quit the party soon afterwards. Hrushevsky's real political activity, however, began only after the 1905 Revolution in Russia, which resulted in the easing of restrictions on Ukrainian life and the emergence of mass Ukrainian organizations and political parties. From then on Hrushevsky spent most of his time in Russian-ruled Ukraine, although he remained a professor of Lviv University until 1913.

Hrushevsky was a prolific publicist. In 1906 in St Petersburg he helped found and was a regular contributor to *\*Ukraïnskii vestnik*, the official organ of the Ukrainian club of the State Duma. His articles on Ukrainian and international political affairs appeared in various other Ukrainian and Russian publications (especially *Literaturno-naukovyi visnyk* and *Ukraïnskaia zhizn'*) and in several separate collections, including *Z bizhuchoï khvyli* (From the Current Wave, 1906), *Osvobozhdenie Rossii i ukrainskii vopros* (The Liberation of Russia and the Ukrainian Question, 1907), *Nasha polityka* (Our Politics, 1911), in which he sharply criticized the leaders of the National Democratic party in Galicia, and *Vil'na Ukraïna* (Free Ukraine, 1917).

After a brief stay in St Petersburg, Hrushevsky transferred his activities to Kiev, where in 1907 he began to publish *Literaturno-naukovyi visnyk*. In 1907 he also co-founded the *\*Ukrainian Scientific Society*, modeled on the NTS, serving as its first head and coeditor of its journals *\*Zapysky ukrains'koho naukovoï tovarystva v Kyievi* and *\*Ukraïna* (from 1914). In order to foster Ukrainian national consciousness among the peasantry, Hrushevsky founded and published the popular newspaper *\*Selo* (1909–11); when this was closed down by the Russian government, he established *\*Zasiv* (1911–12). In 1908 Hrushevsky was one of the founding members of the *\*Society of Ukrainian Progressives*, emerging as the universally acknowledged leader of the Ukrainian movement.

During the First World War, when the Russian government again clamped down on Ukrainian activities, Hrushevsky was arrested in the fall of 1914. After a two-month imprisonment in Kiev, he was exiled to Simbirsk, then to Kazan, and finally to Moscow, where he remained under police surveillance. Despite this repression he continued his scholarly work and even helped edit *Ukraïnskaia zhizn'* and the Ukrainian-language weekly *Promin'*.

Hrushevsky was released from exile after the February Revolution of 1917 and he quickly emerged as the leader of the Ukrainian national revolution. On 17 March, while still in Moscow, he was elected chairman of the *\*Central Rada*. Under his direction, this body soon became the revolutionary parliament of Ukraine. In 1917 Hrushevsky became a supporter of the newly formed *\*Ukrainian Party of Socialist Revolutionaries* (UPSR), the majority party in the Central Rada. On 29 April 1918, he was elected president of the UNR.

A coup d'état led by P. \*Skoropadsky overthrew the government of the UNR. This ended Hrushevsky's involvement in government, although he continued his political activities, especially in the UPSR, and his publicistic work (in 1918 he published the collection *Na porozzi novoi Ukraïny: Hadky i mrii* [On the Threshold of a New Ukraine: Thoughts and Dreams]). In 1919 he emigrated

and increased his political-publicistic activities as a member of the Foreign Delegation of the u.s.s.r. For the next few years he traveled widely in Western Europe trying to rally support for the Ukrainian independence movement and re-establishing scholarly contacts. In 1919 he founded the \*Ukrainian Sociological Institute in Vienna (later moved to Prague), which published, among others, his works *Pochatky hromadianstva (henetychna sotsiologiia)* (The Beginnings of Society [Genetic Sociology], 1921), *Z pochatkiv ukrains'koho sotsiialistychnoho rukhu: Mykhailo Drahomanov i zhenevs'kyi sotsiialistychnyi hurtok* (On the Beginnings of the Ukrainian Socialist Movement: Mykhailo Drahomanov and the Geneva Socialist Group, 1922), and *Z istorii relihinoi dumky na Ukraini* (On the History of Religious Thought in Ukraine, 1925). He also began his monumental *Istoriia ukrains'koi literatury* (The History of Ukrainian Literature) and edited the organ of the u.s.s.r. \**Boritiesia-Poborete* (1920–2). His political writings of this period show his increasing reconciliation with Communist rule in Ukraine and his desire to return to Ukraine to continue his scholarly and civic work; he was especially encouraged by the announcement of \*Ukrainization and the \*New Economic Policy.

In 1923 Hrushevsky was elected a full member of the v.u.a.n. and he left for Kiev in early 1924. This action was severely criticized by most of the Ukrainian political émigrés. At the v.u.a.n., Hrushevsky soon resumed his role as the central figure in Ukrainian scholarship. He assumed leadership of the v.u.a.n. archeographic commission, organized a series of academic commissions to research Ukrainian history and folklore, and directed the training of new historians as the holder of the Chair of Modern Ukrainian History. He revived and edited \**Ukraina* (1924–30), which became the main organ of Ukrainian studies. He was also the editor of *Naukovyi zbirnyk Istorychnoi sektsii v.u.a.n.* (1924–9) and the collections \**Za sto lit* (6 vols, 1927–30), *Studii z istorii Ukrainy* (3 vols, 1926–30), and *Ukrainskyi arkhiv* (3 vols, 1929–31). In Kiev, Hrushevsky continued work on his major syntheses of Ukrainian history and literature. In 1926 Ukraine solemnly celebrated Hrushevsky's 60th birthday and the 40th anniversary of his scholarly work. That same year, collaboration was renewed between the NTSh and v.u.a.n.

Despite Hrushevsky's great achievements in this period, opposition to him grew steadily in official circles and among Marxist scholars. Increasingly, his historical scheme was rejected as 'nationalistic,' and he was criticized for not adopting the official Soviet Marxist interpretation of Ukrainian history. In 1929 these attacks increased, and Hrushevsky was progressively forced to withdraw from his work in the v.u.a.n. In March 1931 he was exiled to Moscow. Subsequently, the institutions that he had founded at the v.u.a.n. were closed, the serials that he edited ceased publication, and most of his students and co-workers were arrested and deported. By 1934, the school of history he had founded in Soviet Ukraine was destroyed. Still, Hrushevsky remained a productive scholar in his last years, working mostly on Ukrainian historiography of the 17th and 18th centuries; his last two articles were published in periodicals of the u.s.s.r. Academy of Sciences in 1932 and 1934. Eventually, the difficult conditions of life in semi-freedom abroad and the further persecutions by the Soviet regime led to a deterioration of Hrushevsky's health. He died in Kislovodsk, where he had gone for medical treatment, and was buried in Kiev in the Baikove cemetery.

Hrushevsky's historical approach was formed under the influence of his professor, V. Antonovych, as well as M. \*Kostomarov, M. \*Drahomanov, and later E. Durkheim. He belonged to the populist school of Ukrainian historiography and stressed the primacy of social or popular interests over the interests of the state and the nation. Later in his career, perhaps as a result of his own political activities, Hrushevsky began to attach more importance to the state and the political development of the Ukrainian nation. He rejected the \*Normanist theory of early Ukrainian history, and considered the Antes the predecessors of the Ukrainian nation. Using a wide variety of sources, Hrushevsky outlined the ethnogenesis of the Ukrainian nation and established the continuity of Ukrainian historical processes, even throughout the periods of Ukrainian statelessness. His historical scheme was adopted by some non-Ukrainian historians (eg, O. Presniakov, M. Liubavsky, O. Halecki).

Hrushevsky also did considerable work in the history of literature. At first this entailed short digressions in *Istoriia Ukrainy-Rusy*; later he turned his full attention to this topic in the important *Istoriia ukrains'koi literatury* (History of Ukrainian Literature, 5 vols, 1922–7; vols 6 and 7 remained unpublished), which examined Ukrainian literature up to the beginning of the 17th century in relation to the development of culture. He also wrote numerous articles of literary criticism and reviews. In his *Istoriia Ukrainy-Rusy*, as well as in *Kul'turno-natsional'nyi rukh na Ukraini v xvi–xvii vitsi* (The Cultural-National Movement in Ukraine in the 16th–17th Centuries, 1912; 2nd edn, 1920) and a series of his lesser works, Hrushevsky examined the development of education, religious life, art, printing, and other facets of Ukrainian culture. A number of his works were devoted to ethnography, folklore, and sociology. Hrushevsky also worked in archeology, publishing a series of articles and attempting the first synthesis of the archeology of Ukraine in vols 1–3 of *Istoriia Ukrainy-Rusy*.

As a belletrist, Hrushevsky wrote tales, dramas, and short stories (many appeared in the collection *Pid zoriamy: Opovidannia, nacherky, zamitky, istorychni obrazy* [Under the Stars: Stories, Sketches, Notes, Historical Portraits, 1928]). In total, Hrushevsky wrote over 1,800 works. His bibliography to 1904, compiled by I. Levytsky, is given in *Naukovyi Zbirnyk prysviachenyi profesorovy Mykhailovy Hrushevs'komu uchenykamy i prykhyl'nykamy* (A Scholarly Collection Dedicated to Professor Mykhailo Hrushevsky by his Students and Friends, Lviv 1906), and a bibliography of his works from 1905 to 1928 is given in *Iuvileinyi zbirnyk na poshanu akademika Mykhaila Serhiievycha Hrushevs'koho* (A Jubilee Collection in Honor of the Academician Mykhailo Serhiievych Hrushevsky, Kiev 1929).

Hrushevsky's accomplishments, as the scholar who realized the principal task of Ukrainian historiography (ie, the synthesis of the entire Ukrainian historical process), as the organizer of Ukrainian national scholarship, and as a civic and political activist and one of the most prominent figures of the period of the liberation struggle, provoked the Bolsheviks to take a sharply negative attitude towards him, despite his return to Soviet Ukraine. The 1946 resolution of the cc of the cp(b)u, in particular, and later Soviet publications characterize him as a 'nationalist historian,' 'the ideologist of the Ukrainian counter-revolutionary bourgeoisie,' and 'the untamed enemy of Soviet rule.' The Soviet regime continues to combat

Hrushevsky's scheme and its followers in history, literature, linguistics, and other disciplines.

In 1966 Ukrainian scholarly institutions in the diaspora celebrated the centenary of Hrushevsky's birth and in 1984, the 50th anniversary of his death. On these occasions, special issues of *Ukraïns'kyi istoryk* devoted to Hrushevsky were published. In 1974 the Ukrainian Historical Society began a separate serial publication, *Hrushevskiana*, devoted to the study of the life and work of Hrushevsky. Hrushevsky wrote two short autobiographies: the first was published in Lviv in 1906 (repr, Toronto 1965) and the second in Kiev in 1926 (2nd edn with notes and intro by L. Wynar, New York 1981).

Oleksander Hrushevsky

Hryhorii Hrushka

**Hrushevsky, Oleksander** [Hruševs'kyj], b 1877, d ?. Historian; brother of M. \*Hrushevsky. He studied at Kiev University with V. Antonovych and was a privatdocent at the universities of Odessa, St Petersburg, and Kiev; he was one of the first to lecture in Ukrainian at Odessa University (1906). In 1918 he was appointed professor at Kiev University. He was a full member of the Ukrainian Scientific Society in Kiev and the Shevchenko Scientific Society. In the 1920s he served as director of the Historical-Geographical Commission of the vUAN and a member of the vUAN Archeographic Commission. He was exiled in 1937 during the Stalin terror and his subsequent fate is unknown. He wrote a number of historical

studies, including *Pinskoe Poles'e* (Pynske Polisia, 1901), *Ocherki istorii Turovskogo kniazhestva* (Essays on the History of Turiv Principality, 1902), and *Goroda Velikogo Kniazhestva Litovskogo v XIV-XVI vv.* (Cities of the Grand Duchy of Lithuania in the 14th-16th Centuries, 1918). His numerous articles on the political, socioeconomic, and regional history of 16th-19th-century Ukraine and on Ukrainian historiography appeared in various vUAN journals, especially in *Ukraïna*. He was also the author of studies of Ukrainian writers, which were published together in *Z suchasnoi Ukraïns'koi literatury* (On Contemporary Ukrainian Literature, 1909, 1918).

**Hrushevsky Institute.** See St John's Institute.

**Hrushka, Hryhorii** [Hruška, Hryhorij], b 10 September 1859 in Zarubyntsi, Ternopil circle, Galicia, d 16 April 1913 in Peniaky, Lviv county, Galicia. Greek Catholic priest and community leader. Hrushka studied theology in Rome and Lviv and immigrated to the United States in 1889, where he became a parish priest in Shenandoah, Pennsylvania, and Jersey City, New Jersey. With the intention of instilling a national consciousness among Ukrainian immigrants, he cofounded and edited (1893-5) \**Svoboda*. He was also one of the organizers of the \*Ukrainian National Association. In 1896 Hrushka temporarily converted to Russian Orthodoxy following a series of misunderstandings with the Latin-rite hierarchy, whose policies, in his opinion, threatened Ukrainian traditions. After leaving the United States (1900) and settling briefly in Eastern Ukraine, he returned to Galicia, disillusioned with the politics of the Russian Orthodox church. He entered a Uniate Basilian monastery, and then served as a priest in several parishes. Hrushka was the author of short stories and polemical poetry. His papers from the years 1883 to 1901, which represent a significant source on Ukrainian-American history, are held in the Manuscript Division of the Library of Congress in Washington, DC.

**Hrushkevych, Teofil** [Hruškevyč], b 4 August 1846 in Horozhanna Mala, Rudky county, Galicia, d 2 May 1915 at Schmidsdorf near Payerbach in Lower Austria. Galician civic leader. A gymnasium teacher, Hrushkevych organized education in the Kolomyia region (1879-89), and was director (1909-12) of the Ukrainian gymnasium in Yavoriv. He edited the journal *Uchytel'* (1890-2) and wrote several textbooks and popular brochures.

**Hruzkyi Yelanchyk River** [Hruz'kyj] [Jelančyk]. A river in Donets oblast that empties into Tahanrih Bay in the Sea of Azov. It is 91 km long, and its basin area is 1,250 sq km. The town of Novoazovske is located at its mouth.

**Hruzynsky, Oleksander** [Hruzyns'kyj], b 22 December 1881 in Nizhen, Chernihiv gubernia, d 11 January 1951. Philologist; member of the Ukrainian Scientific Society in Kiev. In the 1920s he was a professor at the Nizhen and the Kharkiv Institute of People's Education. Persecuted in the 1930s, he left Ukraine and taught in Leningrad and Mahiliou. Eventually he returned and lived in Kiev. He is the author of articles on the 16th-century Peresopnytsia and Litky Gospels and on the works of T. Prokopovych and H. Skovoroda.

**Hryd** (collective noun, also *hrydba*; singular – *hryden*). The junior retainers of a prince in the Kievan Rus' period. The *hryd* performed military service and participated in the administration of princely property. They lived in separate quarters at court. The word is used in the earliest chronicles and *\*bylyny* and is probably of Scandinavian origin.

Michael Hryhorczuk

Hrytsko Hryhorenko

**Hryhorczuk, Michael** [Hryhorčuk, Myxajlo], b 28 November 1905 in Gilbert Plains, Manitoba, d 11 July 1978 in Ethelbert, Manitoba. Lawyer and politician. Son of N. Hryhorczuk. After studying at the universities of Saskatchewan and Manitoba, he practiced law and served as reeve of Ethelbert and chairman of the Ethelbert School Board. A Liberal-Progressive member for Ethelbert in the Manitoba Legislature (1949–66), he was appointed attorney general (1955–8), becoming the second cabinet minister of Ukrainian origin in Manitoba. Hryhorczuk was an active member of the Ukrainian Greek Orthodox church.

**Hryhorczuk, Nicholas** [Hryhorčuk, Mykola], b 17 December 1888 in Buchachky, Kolomyia county, Galicia, d 23 November 1979 in Ethelbert, Manitoba. Merchant and politician. His family came to Canada in 1897 and settled north of Dauphin, Manitoba. A prosperous lumber and implement dealer, he served as reeve of Ethelbert and in 1920 was elected to the Manitoba Legislature as the Liberal-Progressive member for Ethelbert. He was re-elected in 1922, 1927, 1932, and 1941 and defeated in 1936 and 1945. For a brief period in 1936 he served as deputy speaker. He was an active member of the Ukrainian Greek Orthodox church in Canada from its inception in 1918.

**Hryhorenko, Hrytsko** (pen name of Oleksandra Sudovshchikova-Kosach), b March 1867 in Makarev, Kostroma gubernia, northern Russia, d 27 April 1924 in Kiev. Writer and social activist; the wife of M. \*Kosach and sister-in-law of Lesia \*Ukrainka. Together with Kosach and Ukrainka she was active in radical Ukrainophile student circles and the writers' circle Pleiada (1888–93). Her first collection of prose, *Nashi liudy na seli* (Our Rural People), was published in 1898. Hryhorenko's naturalistic stories depict the hardship, destitution, and moral decay of life in the Ukrainian village and in exile, and have been likened to V. Stefanyk's. She also wrote eight

plays (five for children) and a collection of children's stories and plays *Ditky* (Little Children, 1918), and translated French (J. Verne), English, and Swedish literature into Ukrainian. Her complete works (in two volumes) were published in Kharkiv in 1930, and selections appeared in Kiev in 1918, 1929, and 1959.

**Hryhorenko, Petro.** See Grigorenko, Petro.

**Hryhorenko, Yaroslav**, b 12 October 1927 in Kiev. Mechanical engineer and specialist in applied mathematics; corresponding member of the AN URSR since 1978. After graduating from Kiev University (1955), Hryhorenko began working at the AN URSR Institute of Mechanics, where he has been assistant director since 1977. Since 1971 he has also been a professor at Kiev University. Hryhorenko specializes in the mechanics of casings construction and the problem of their high-tension deformation.

**Hryhoriev, Serhii** [Hryhorjev, Serhij], b 5 July 1910 in Luhanske, Bakhmut county, Katerynoslav gubernia. Painter and graphic artist. A graduate of the Kiev State Art Institute (1932), where he studied under F. Krychevsky and F. Krasysky, his early works depicted children and young people: eg, *Children at the Beach* (1937), *Youth Festival* (1938), and *Portrait of a Girl* (1939). After the war he concentrated on family and school scenes such as *Young Naturalists* (1948), *Admission to the Komsomol* (1949), *Children Pouring over Books* (1969), and *Mother* (1970). He also did portraits of writers – A. Holovko (1966), A. Malyshko (1967), P. Panch (1967), and M. Bazhan (1976) – and of other cultural figures. He taught art at the Kharkiv Art Institute (1933–4) and, intermittently, at the Kiev State Art Institute (1934–60). T. Gureva (1957) and V. Afanasev (1967) have written monographs about Hryhoriev.

**Hryhorii** [Hryhorij], b and d ? Deacon, scribe, and illuminator of the 11th century. He copied and probably illuminated the \*Ostromir Gospel (1056–7), the oldest known manuscript produced in Kievan Rus'. The prevalent view is that he lived and worked in Kiev, not Novgorod.

**Hryhoriiv, Nykyfor** [Hryhorijiv], b 25 February 1883 in Burty, Kaniv county, Kiev gubernia, d 5 August 1953 in New York. Civic and political figure, publicist, and pedagogue. He was a member of the Society of Ukrainian Progressives and a contributor to the journals *Rada*, *Maiak*, and *Ridnyi kraj* (under the pseud H. Nash). In 1917 he became an activist of the Ukrainian Party of Socialist Revolutionaries (UPSR) and a member of the Central Rada. As president of the Council of Military Deputies for the Kiev Military Okruha, he headed the drive to Ukrainianize the army. In 1918 he served as minister of education in V. Holubovych's government and then joined the Ukrainian National Union to overthrow the Hetman government. In 1919 he was a deputy of the Labor Congress and the director of the UNR Army press service. As a member of the Central Committee of the UPSR, he headed the party's center faction and opposed the Borotbists. In 1921 Hryhoriiv immigrated to Prague, where he served as vice-president of the Ukrainian Civic Committee in Czechoslovakia and as director of the Ukrainian

Nykyfor Hryhoriiv

Sociological Institute, which he helped found. After he immigrated to the United States in 1938, he worked on *Narodna volia* and in 1949 became director of the Ukrainian service of the Voice of America. He wrote a number of journalistic works, including *Osnovy natsioznannia* (The Foundations of Nation Studies, 1940), *Ukraïns'ka natsional'na vdacha* (The Ukrainian National Character, 1941), *Derzhavoznavstvo* (State Studies, 1936), *Spohady ruinnyka* (A Destroyer's Memoirs, 1937), and *The War and Ukrainian Democracy* (1945).

V. Markus

**Hryhoriiv** or **Hryhoriv, Nykyfor (Matvii)** [Hryhoriiv or Hryhor'jiv, Matvij], b ca 1885 in Zastavia, Ushytsia county, Podilia gubernia, d 27 July 1919. A Ukrainian revolutionary leader in southern Right-Bank Ukraine. A former tsarist army captain, during the UNR Directory's rebellion against the German army and the Hetman government in 1918 he led an autonomous force of 6,000–8,000 Borotbist and anarchist partisans in the Oleksandriia and Mykolaiv regions. In January 1919 Hryhoriiv rebelled against the Directory after it forbade him to move against the Allied forces. He aligned himself with the Soviet government in Kharkiv, and from February to April his army of 15,000 played a central role in the successful Bolshevik offensive against the White and Allied forces in Mykolaiv, Kherson, and Odessa. In early May 1919, however, Hryhoriiv rejected the Bolshevik order to send his forces against the Rumanians to support B. Kun's revolution in Hungary. Instead, he proclaimed himself the otaman of Ukraine and organized an anti-Bolshevik jacquerie that spread throughout Kherson and Katerynoslav gubernias before being suppressed in late May by the Red Army. Hryhoriiv and the remnants of his army then allied themselves with the anarchist army of N. Makhno, who had Hryhoriiv shot when the latter proposed that their forces take part in A. Denikin's White offensive against the Bolsheviks.

**Hryhorivka fortified settlement.** An archeological site near Hryhorivka, Mohyliv-Podilskyi raion, Vinnytsia ob-

last, excavated in 1947–8 and 1952–3. A multi-period settlement was excavated there: from Scythian times (7th–6th centuries BC), pit and surface dwellings, pottery, and storage pits; from the period of the \*Lypytsia culture (1st–3rd centuries AD), the remains of dwellings; and from the 9th–10th centuries AD, pit dwellings with stone ovens and 25 iron-smelting furnaces.

**Hryhorovych, Dmytro** [Hryhorovyč], b 6 February 1883 in Kiev, d 26 July 1938 in Moscow. Airplane designer, aeronautical engineer. A graduate of the Kiev Polytechnical Institute (1909), he designed some of the earliest hydroplanes, such as the flying boats M-1 (1913), M-5 (1914), and M-9 (1915), and the first fighter seaplane in the world – the M-P. He was also the designer of the I-2 fighter, the M-24 flying boat, and the ROM-2 reconnaissance seaplane. Together with N. Polikarpov, he designed the advanced fighter planes I-5 (1930) and PI-1 (1930–3).

**Hryhorovych, Ivan** [Hryhorovyč], b 1876 in Hnylche, Ternopil county, Galicia, d 3 April 1937 in Lviv. Actor and singer (tenor). He was a member of the Ukrainian Ruska Besida theater and appeared in its productions between 1895 and 1900. He then joined the Polish theater of T. Pawlikowski (1900–5), while occasionally accepting roles in productions in Belgrade and Zagreb. In 1907 he returned to the Ruska Besida Theater, with which he remained until 1912. His major roles included Petro in M. Lysenko's *Natalka Poltava* and Ivan in the same composer's *Chornomortsi* (Black Sea Cossacks), Andrii in S. Hulak-Artemovsky's *Zaporozhets' za Dunaïem* (Zaporozhian Cossack beyond the Danube), Jontek in S. Moniuszko's *Halka*, and Mazaniello in D. Auber's *Muette de Portici*. He appeared in concert recitals of Ukrainian folk songs and of works by M. Lysenko, V. Matiuk, and O. Nyzhankivsky.

**Hryhorovych, Ivan** [Hryhorovyč], b 19 January 1911 in Chernivtsi, Bukovyna, d ? Civic and political leader in Bukovyna. As a founder of the Legion of Ukrainian Revolutionaries (1930) and of Mesnyk Ukrainy (1932), which joined the OUN, he was one of the first organizers of the nationalist movement in the region. He coedited the OUN weekly *Samostiinist'* (1934–7), and was active in the nationalist student association *Zalizniak* (1934–7). In 1937 he was sentenced for his political activity to three years' imprisonment by a Rumanian military tribunal. In 1941 he marched east with the \*OUN Expeditionary Groups. He disappeared after being arrested in 1944 in Bucharest by the Soviets.

**Hryhorovych, Vasyl** [Hryhorovyč, Vasyl'], b 1786 in Pyriatyn, Kiev vicegerency, d 15 March 1865 in St Petersburg. Art scholar. A graduate of the Kiev Academy (1803), he taught esthetics and served as conference secretary at the Academy of Arts in St Petersburg (1829–59). He befriended and supported Ukrainian art students in St Petersburg. It was with his permission that T. Shevchenko attended drawing classes of the Society for the Promotion of the Arts, and he took part in purchasing Shevchenko's freedom. To commemorate the day of his liberation, Shevchenko dedicated the poem 'Haidamaky' to Hryhorovych.

**Hryhorovych, Viktor** [Hryhorovyč], b 12 May 1815 in Balta, Podilia gubernia, d 31 December 1876 in Yelysavethrad, Kherson gubernia. Russian Slavist of Ukrainian descent. He taught Slavic languages at the universities in Kazan (1839–49, 1854–65), Moscow (1849–54), and Odessa (1865–76). In his works he defended the theory of the Pannonian origin of Old Church Slavonic. During his expedition through Slavic countries in 1844–6 he amassed an important collection of Old Slavic manuscripts, which he donated to the university in Odessa. After his death Hryhorovych's manuscripts, notebooks, and old books were deposited at the Rumiantsev Museum in Moscow.

**Hryhorovych, Yevheniia** [Hryhorovyč, Jevhenija], b 17 April 1905 in Dubno, Volhynia gubernia, d 15 July 1978 in Kiev. Film director. A graduate of the Odessa Film Tekhnikum, she began to work as a film director in 1930 at the Odessa Artistic Film Studio. From 1943 she worked at the Kiev Popular Science Film Studio. Her popular documentary films include *Berezhit' khlিব* (Save the Bread, 1945), *Po pivnichnii Bukovyni* (Through Northern Bukovyna, 1950), *Pam'iatnyky drevn'oi Rusy* (Monuments of Ancient Rus', 1969), and *Berezhit' ridnu pryrodu* (Preserve Our Natural Environment, 1974). She also directed the full-length movie *Oleksander Dovzhenko* (1964).

**Hryhorovych-Barsky, Ivan** [Hryhorovyč-Bars'kyj], b 1713 in Kiev, d 1785 in Kiev. Architect of the Ukrainian or Cossack baroque style; brother of V. \*Hryhorovych-Barsky. A graduate of the Kievan Mohyla Academy, he designed many buildings in Kiev: the church and belfry of St Cyril's Monastery Church (1750–60, destroyed by the Soviet regime), the Church of the Holy Protectress (1766), the Church of St Nicholas on the Bank (1772–5), the belfry of ss Peter and Paul Monastery (1761–3), the Old Bursa of the Kievan Mohyla Academy (1778), the Hostynyi Dvir warehouse (1760s), and the Magistrat grain warehouse (1760). His work was not confined to Kiev: in Lemeshi near Chernihiv he built the Church of the Three Saints (1761), and in Kozelets, the regimental chancellery (1757) and the Church of the Nativity of the Mother of God (1752–64, in collaboration with A. Kvasov). He adapted the architectural tradition of the Eastern church to the demands of his period and created new and original buildings.

**Hryhorovych-Barsky, Vasyl** [Hryhorovyč-Bars'kyj, Vasyl'] (pseud. Plaka, Albov), b 1701 in Kiev, d 7 October 1747 in Kiev. Traveler and writer. He studied at the Kievan Mohyla Academy in 1715–23, and from 1723 to 1747 traveled in countries of central, eastern, and southern Europe and the Near East. He compiled a Latin grammar for Greeks and left a detailed account of the economic condition, education, customs, history, and research on artistic monuments of the countries and places he visited; the work was accompanied by 150 drawings. At first his description was circulated widely in copied manuscript form in Ukraine and Russia. The first edition was published posthumously by V. Ruban in 1778. The eighth, most complete, edition, with letters to his brother I. Hryhorovych-Barsky, appeared in four parts in 1885–7 under the editorship of N. Barsukov as *Stranstvovaniia Vasil'ia Grigorovicha-Barskogo po sviatym mestam Vostoka s 1723 po 1747 g.* (The Travels of Vasyl Hryhorovych-Barsky to the

Belfry of St Cyril's Monastery in Kiev, designed by Ivan Hryhorovych-Barsky (1760) and demolished by the Soviet government in 1937

Holy Places of the East from 1723 to 1747). Hryhorovych-Barsky was buried at the Kievan Epiphany Brotherhood Monastery. Books about him have been published by V. Askochensky (1854) and I. Rodachenko (1967).

**Hryhoruk, Yevhen**, b 6 January 1899 in Troianka, Balta county, Kherson gubernia, d 24 October 1922 in Yalta. A revolutionary, journalist, and poet. In 1921 he became the director of the Kiev branch of the All-Ukrainian Publishing House and then the director of a department of the State Publishing House in Moscow. His propagandistic and symbolist poetry appeared in various periodicals. A volume of his collected works was published in Kharkiv in 1928. He was a persona non grata because of his \*Borotbist past during the Stalin period, but his works were posthumously rehabilitated after Stalin's death and a volume of his poems was published in Kiev in 1962.

**Hrymailo, Yaroslav** [Hrymajlo, Jaroslav], b 2 December 1906 in Rohyntsi, Khmilnyk county, Podilia gubernia, d 1984 in Kiev. Socialist realist writer and journalist. From 1926 to 1932 he was a member of the \*Molodniak writer's group and the All-Ukrainian Association of Proletarian Writers. His works, many of them for children,

include 16 poetry collections, the first of which was *Vitryla pidniato* (The Sails Are Hoisted, 1930); 14 prose collections, starting with *Iuni mandrivnyky, abo Podorozh na Dniprelstan* (Young Travelers, or a Trip to the Dnieper Dam, 1930); and the novels *Syn leitenenta* (The Lieutenant's Son, 1950), *Kavaler ordena Slavy* (The Knight of the Order of Glory, 1955), *Nezakinchenyi roman* (An Unfinished Romance, 1962), and *Zacharovanyi na Skhid* (Enchanted to the East, 1971).

**Hryn Ivanovych** [Hryn' Ivanovyč], b ? in Zabludau, Belorussia, d ? Engraver of the 16th century. As I. \*Fedorovych's helper, he was sent to learn engraving with L. \*Fylypovych-Pukhalsky (1577–8). Then he worked as an engraver and type founder in Ostrih (1579–81), Vilnius (1582), and Lviv (1583).

**Hrynchyshyn, Michael** [Hrynčyšyn, Myxajlo], b 18 February 1929 in Buchanan, Saskatchewan. Since 1983 bishop of the Ukrainian Catholic church and apostolic exarch for Ukrainian Catholics in France. Entering the Redemptorist novitiate in 1945, he was ordained in 1952. In 1955 he earned a doctorate at the Pontifical Institute for Oriental Studies in Rome. He served as rector, professor of theology, and prefect at Redemptorist seminaries in Meadowvale, Ontario, and Yorkton, Saskatchewan, and as priest in Saskatoon, Winnipeg, and Newark, New Jersey. He was president of the Canadian section of the Ukrainian Theological Scholarly Society, editor of *Lohos* (1960–5), and superior of the Yorkton Province of the Ukrainian Redemptorist Fathers (1972–81). As postulator of Metropolitan Sheptytsky's beatification and canonization, he collected 21 volumes of the metropolitan's writings. Since 1978 he has been secretary general of the Central Millennium Jubilee Committee of the Ukrainian Catholic church.

**Hrynchyshyn, Mykola** [Hrynčyšyn], b 1 December 1914 in Moose Jaw, Saskatchewan. Journalist, communist activist; since 1964 member of the Central Committee of the Communist Party of Canada. Since 1936 he has worked on the staff of Ukrainian communist newspapers such as *Ukrains'ki robotnychi visti* and *Narodna hazeta* (1937–41), and has edited *Ukrains'ke slovo* (1952–65) and then *Zhyttia i slovo*.

**Hrynevetsky, Ivan** [Hrynevec'kyj], b 24 June 1850 in Sianichok, Sianik county, Galicia, d 25 January 1889 in

Ivan Hrynevetsky

Katria Hrynevychева

Peremyshl. Actor, stage director. From 1869 to 1881 he appeared on the Polish stage, but at the same time worked for the Ruska Besida theater in Lviv as an actor (1874–80), stage director (from 1876), and theater director with I. Biberovych (1882–9). He improved the artistic quality of the Galician theater by combining the technical advancements of the West European theater with the principles of the ethnographic theater developed by M. Kropyvnytsky. He revitalized the repertoire of the Ruska Besida theater with current Ukrainian plays by H. Tsehlynsky, K. Ustyianovych, O. Ohonovsky, S. Vorobkevych, and Yu. Fedkovych, and with translations of such dramatists as C. Goldoni, Molière, H. Kleist, J. Schiller, and H. Sudermann. He also staged operettas by J.-R. Planquette, J. Strauss, J. Offenbach, and others. As an actor he appeared in such roles as the mayor in N. Gogol's *The Inspector General*, Tikhon in A. Ostrovsky's *Groza* (Thunderstorm), Karl Moor in J. Schiller's *Die Räuber*, and Bychok in M. Kropyvnytsky's *Hlytai, abozh pavuk* (The Profiteer, or the Spider).

**Hrynevetsky, Stepan** [Hrynevec'kyj], b 6 October 1877 in Buzke, Kamianka Strumyl'ova county, Galicia, d 6 November 1942 in Chicago. Physician and civic leader. After completing his medical degree at the University of Vienna, and working for over eight years as an assistant and lecturer at Vienna General Hospital, he immigrated to the United States (ca 1907). Settling in Chicago, he opened a private practice and joined the staffs of St Mary of Nazareth and Billings hospitals. He also lectured at the Rush Medical College in Chicago. He was an editor of the weekly *Ukraina* (1918–20), organizer and head of the monarchist Sich society, and editor of its journal, *Sich* (1920). He served as the Chief Otaman of the Sich movement in the United States (1920–5), but resigned after a conflict with the hetman, P. Skoropadsky. In the late 1930s Hrynevetsky organized a Ukrainian detachment in the Illinois National Guard.

**Hrynevych, Feodosii** [Hrynevyč, Feodosij], b 1 November 1922 in Ripna, Podilia region. Specialist in electrometry; since 1973 corresponding member of the AN URSR. After graduating from the Lviv Polytechnical Institute in 1953, he worked in various electrotechnical institutes in Ukraine and Siberia. He developed the theory and construction methods of several digital and analog measuring instruments.

**Hrynevychева, Katria** [Hrynevyčeva, Katrja] (née Banakh), b 19 November 1875 in Vynnyky, Lviv county, d 27 December 1947 in Berchtesgaden, Germany. Modernist, writer, and community leader. With encouragement from V. Stefanyk and I. Franko, she began writing poetry and prose in Ukrainian, which appeared in such journals as *Literaturno-naukovyi vistnyk* and *Bukovyna* from 1893 on. From 1909 to 1911 she edited the children's magazine *Dzvinok*. From 1915 to 1917 she taught at Ukrainian internment camps in Austria and contributed to *Vistnyk Soluzu vyzvolennia Ukrainy*. Starting in 1918 she worked for the newspaper *Ukrains'ke slovo*. In 1922 she was elected president of the \*Union of Ukrainian Women in Galicia. She is the author of short-story collections – *Legandy i opovidannia* (Legends and Short Stories, 1902), *Po dorozhi v Sykhem* (On the Way to Sychem, 1923), *Nepoborni* (The Invincible, 1926, about Galician internees)

– and a few years later she wrote several historical novelettes set in the Princely era – *Sholomy v sontsi* (Helmets in the Sun, 1924, 1929), and *Shestykrylets'* (The Six-Winged One, 1935, 1936). Her works, most of which appeared first in periodicals, have not been collected. Her masterly handling of the Ukrainian language, particularly her stylizing of the folk vernacular and her sophisticated use of Ukrainian archaisms in her historical novelettes, places her among the best Ukrainian modernist prose writers. Her biography, by her son Ya. Hrynevych, was published in Toronto in 1968.

M. Hlobenko

**Hryniv, Thomas** [Hryn'kiv, Toma], b 4 August 1941 in Wilkes-Barre, Pennsylvania. Pianist and teacher. A graduate of Wilkes College and the Manhattan School of Music (MA 1967), he won a competition to play P. Tchaikovsky's First Piano Concerto with L. Stokowski, and was awarded a gold medal at the Geneva Competition (1967). He has toured the major cities of Europe and North and South America, and has made several recordings. He taught music at the Fieldstorn School and is a member of the New American Trio, the Kalyna Piano Trio, and the Audubon Quartet. His Ukrainian repertoire includes works by L. Revutsky, V. Kosenko, S. Liudkevych, and N. Nyzhankivsky.

Hryhorii Hrynko

**Hrynko, Hryhorii** [Hryn'ko, Hryhorii], b 30 November 1890 in Shtepivka, Lebedyn county, Kharkiv gubernia, d 15 March 1938 in Moscow. Soviet Ukrainian political figure. A member of the \*Borotbists, Hrynko joined the CP(B)U in 1919 and soon became a member of the All-Ukrainian Central Executive Committee (CEC), the Council of People's Commissars, the CEC of the RSFSR, and the All-Ukrainian Military-Revolutionary Committee (1919–26). He took part in the 1919–20 Comintern-sponsored negotiations between the Borotbists and the CP(B)U concerning the merger of the two parties. During these talks, Hrynko insisted that the Ukrainian SSR should retain economic autonomy, an idea later reiterated by M. \*Vobuiev. After the merger, he became the Ukrainian people's commissar of education (1920–2), in which capacity he insisted on Ukrainian cultural distinctness and made his commissariat a central political institution during the \*Ukrainization period. The so-called Hrynko educational reform, which existed with some changes from 1920 to 1932, created a system of education that was radically different from that instituted in Russia by A. Lunachar-

sky. The Hrynko system focused on vocational-technical instruction in public education. Higher education was reorganized and geared to meet Ukraine's dire need for specialists.

Hrynko was also a member of the CP(B)U CEC (1924–7), the head of the Ukrainian State Planning Commission (1922–6), and deputy chairman of the Ukrainian Council of People's Commissars. As deputy chairman of the USSR State Planning Commission (1926–9), he insisted that Ukraine be treated as a national economic entity. In 1929 Hrynko served as USSR deputy people's commissar of agriculture, from 1930 to 1937 as USSR people's commissar of finances, and from 1934 to 1937 as a candidate member of the All-Soviet CP(B) CC and member of the Presidium of the CEC of the USSR. Arrested during the Yezhov terror in 1937, he was executed in 1938 as a 'fascist spy' after a show trial.

I. Myhul

**Hrynko, Mykola** [Hryn'ko], b 30 April 1920 in Khereson. Stage and film actor. From 1946 to 1955 he worked in the Zaporizhia Ukrainian Music and Drama Theater. He made his film debut in 1951. In 1963 he began working at the Kiev Artistic Film Studio. His best-known roles were Commissar Artem in *Zahybel' eskadry* (Destruction of a Squadron, 1966), Danilo Cherny in *Andrei Rublev* (1968), Anton Chekhov in *Siuzhet dlia nevelychkoho opovidannia* (A Plot for a Short Story, 1969), and Nikon in *Iaroslav Mudryi* (Yaroslav the Wise, 1982).

**Hrynky** [Hryn'ky]. Village formerly in Kremianets county, Volhynia, and now in Lanivtsi raion, Ternopil oblast. It became notorious in the winter of 1937–8, when the Polish Border Guard Corps and the Polish administration used force to convert its Orthodox inhabitants to the Roman Catholic faith. They succeeded in converting 116 Ukrainians. Similar incidents occurred in the neighboring villages of Lanivtsi, Bilozirka, and Yuskivtsi. This campaign had the unintended effect of strengthening national consciousness among Volhynia's Ukrainians. Polish Sejm members S. Baran and S. Tymoshenko intervened in the diet on behalf of the Orthodox population.

**Hrynokh, Ivan** [Hryn'ox], b 28 December 1907 in Pavliv, Radekhiv county, Galicia. Ukrainian Catholic priest, theologian, church and political leader; full member of

Rev Ivan Hrynokh

Oleksa Hryshchenko

the Shevchenko Scientific Society. A graduate of the Greek Catholic Theological Academy in Lviv (1930), he studied at Innsbruck University (1933), then at Munich University, and finally at l'Institut Catholique in Paris. Returning to Lviv in 1934, he lectured at the Theological Academy and served as spiritual adviser to Ukrainian students in Polish-ruled territories. Since 1941 Hrynokh has been active in the nationalist movement. He was a founding member and second vice-president of the Ukrainian Supreme Liberation Council in 1944, and then head of its External Representation (1946–80). In 1944–5, on behalf of the council and the UPA, he negotiated with Hungarian, Rumanian, and Polish military officials. After emigrating he served as professor at the Ukrainian Catholic Theological Seminary in Hirschberg and Culemborg, the Ukrainian Free University in Munich, and the Ukrainian Catholic University in Rome. Since 1963 he has sat on the Liturgical Commission of the Ukrainian Catholic church, and since 1969 has headed the Ukrainian Theological Scholarly Society. His publications include *Sluha Bozhyi Andrei – Blahovistnyk iednosti* (God's Servant Andrei – The Evangelist of Unity, 1961) and articles in theology and church history. A close collaborator of Cardinal Y. \*Slipy, Hrynokh was appointed to the Consistory of the Lviv Archeparchy in 1978 and elevated to patriarchal archimandrite in 1982. He is an advocate of the eastern orientation assumed by the Ukrainian Catholic church and particularly the concept of a Kiev-Halych patriarchate.

V. Markus

**Hryshchenko, Mykyta** [Hryščenko], b 27 September 1900 in Trushky, Vasylykiv county, Kiev gubernia. Scholar and pedagogue. A graduate of the Kiev Institute of the National Economy (1926), he held the Chair of Pedagogy at Kiev University from 1958 to 1975. His chief publications are *Rozvytok narodnoi osvity na Ukraïni za roky Radians'koi vlady* (The Development of Public Education in Ukraine under the Soviet Regime, 1957) and *Spadshchyna K.D. Ushyns'koho i pytanntia pedahohiky vyshchoi shkoly* (K.D. Ushynsky's Heritage and the Question of Pedagogy in Higher Schools, 1975).

**Hryshchenko, Oleksa** [Hryščenko] (Gritchenko, Alexis), b 2 April 1883 in Krolevets, Chernihiv gubernia, d 28 January 1977 in Vence, France. Painter and author. While specializing in biology at Kiev and Moscow universities, he studied painting with S. Sviatoslavsky in Kiev and K. Yuon in Moscow. He became involved in the modern art movement in Russia and developed close ties with two important art collectors – S. Shchukin and O. Morozov. During a brief stay in Paris in 1911 he met A. Lhote, A. Archipenko, and Le Fauconnier and became interested in cubism. From 1919 to 1921 he lived in Istanbul, where he painted hundreds of watercolors. In 1921 he moved to France. By this time he had changed his cubist style to a more dynamic expressionism, distinguished by cascades of exotic oriental colors. Hryshchenko exhibited his works in the leading art galleries of Paris (eg, Paul Guillaume, Bing, Granoff, Druet, de l'Elysée, Weil, and Bernheim-Jeune), and participated in exhibitions such as Salon des Tuileries and Salon d'Automne (member from 1930). In the 1930s his works were displayed in Lviv at exhibitions of the Association of Independent Ukrainian Artists and in a one-man show.

Oleksa Hryshchenko: *Puerto Audierne*

He became known in the United States in 1923, when the Barnes Foundation in Philadelphia acquired several of his works. After the war he had several one-man shows in New York and Philadelphia. In 1963 he established the Alexis Gritchenko Foundation, to which he donated over 70 works (now housed at the Ukrainian Institute of America in New York). His paintings are found in many museums, including the Musée National d'Art Moderne in Paris, the Royal Museum in Copenhagen, the Musée Royal in Brussels, the Museum of Modern Art in Madrid, the Museum of Montreal, and the Lviv Museum of Ukrainian Art. Many of his works are in private collections. Besides articles Hryshchenko wrote monographs on art: *O sviazakh russkoi zhivopisi s Vizantiei i Zapadom* (The Ties of Russian Painting with Byzantium and the West, 1913) and *Russkaia ikona kak iskusstvo zhivopisi* (The Russian Icon as Painting, 1917). Hryshchenko also wrote several volumes of memoirs: *Deux ans à Constantinople* (1930, with 40 reproductions of his watercolors; Ukrainian version 1961, without reproductions); *L'Ukraine de mes jours bleus* (1957, Ukrainian version 1958); *Moï zustrichi i rozmovy z frantsuz'kymy mysttsiamy* (My Encounters and Discussions with French Artists, 1962; English translation 1968); and *Roky buri i natysku* (The Years of Storm and Stress, 1967).

**Hryshko, Hryhorii** [Hryško, Hryhorij], b 25 January 1906 in Velykofedorivka, Oleksandriia county, Kherson gubernia, d 9 February 1959 in Kiev. Communist party official. From 1937 to 1951 he occupied several posts in the CP(B)U in Mykolaiv, Volhynia, Ternopil, and Kherson oblasts. He became a member of the CC CP(B)U in 1949, serving as secretary in 1951–2. In 1952–7 he was first secretary of the CP(B)U Kiev oblast executive committee and a candidate member of the Presidium of the CPU.

Mykhailo Hryshko

**Hryshko, Mykhailo** [Hryško, Myxajlo], b 27 February 1901 in Mariupol (now Zhdanov), Katerynoslav gubernia, d 3 June 1973 in Kiev. Opera singer (baritone). A graduate of the Odessa School of Music (1926), he was soloist at the opera and ballet theaters in Odessa (1924–7), Kharkiv (1927–36), and Kiev (1936–64). In 1934–5 and 1941–4 he sang at the opera in Tbilisi. His repertoire included the roles of Mykola in M. Lysenko's *Natalka Poltavka*, Ostap in the same composer's *Taras Bulba*, Figaro in Mozart's *The Marriage of Figaro*, and the title roles in K. Dankevych's *Bohdan Khmelnytsky*, A. Borodin's *Prince Igor*, and Verdi's *Rigoletto*. A biography of Hryshko, written by I. Stebun, was published in 1958.

**Hryshko, Mykola** [Hryško], b 6 January 1901 in Poltava, d 3 January 1964 in Kiev. Botanist, geneticist; from 1939 full member of the AN URSR. A graduate of the Poltava (1925) and Kiev (1926) agricultural institutes, he chaired the plant genetics and selection department of the All-Union Hemp Institute of the All-Union Academy of Agricultural Sciences (1932–9) and of the Hlukhiv (then Kiev) Agricultural Institute (1932–41). He wrote one of the first Ukrainian textbooks on general genetics, *Kurs zahal'noi henetyky* (A Course in General Genetics, 1933). During the war he headed the academy's Division of Biological Sciences (1940–3) and its Botanical Institute (1939–44), and then founded and directed the Central Republican Botanical Garden (1944–58). After T. Lysenko's triumph at the All-Union Academy of Agricultural Sciences in 1948, Hryshko lost his presidency of the Division of Agricultural Sciences at the AN URSR and his professorship at Kiev University. With the resurgence of Lysenkoism in 1958, he was demoted at the Botanical Garden to senior scientific worker. He died on the eve of Lysenko's fall from power.

**Hryshko, Vasyl** [Hryško, Vasył'], b 1897, d ? in Montreal. Specialist in the history of law in the Hetman state. From 1930 to 1933 Hryshko was an associate of the VUAN \*Commission for the Study of the History of Western-Ruthenian and Ukrainian Law in Kiev. He taught at the Ukrainian Free University in Munich from 1946 to 1949 and was a member of the Shevchenko Scientific Society from 1947. He is the author of articles on monastic properties in the Hetman state, the institution of elect Cossacks and Cossack helpers, and the second Lithuanian Statute. He was active in the Hetmanite movement in Canada and wrote for and edited several of its publications.

**Hryshko, Vasyl (Wasył)** [Hryško, Vasył'], b 15 January 1914 in Dubno, Volhynia. Emigré political figure, publicist, and literary scholar; member of the Slovo Ukrainian Writers' Association in Exile and a corresponding member of the Ukrainian Academy of Arts and Sciences in the United States. Imprisoned by the GPU in the 1930s, he immigrated to Germany after the war and to the United States in 1949.

Hryshko has been the ideologue of the \*Ukrainian Revolutionary Democratic party since 1948, its leader (1967–75), and honorary head. He is the author of memoirs, many political and literary articles in émigré periodicals, and over a dozen books, including the novella collection *Styk* (The Junction, 1933), *Anty-SSSR* (Anti-USSR, 1952), *Experience with Russia* (1956), *Moloda Ukraina porevoliutsiinoho sorokalittia pid Sovietamy* (1918–1958) (Young Ukraine of the Postrevolutionary Forty Years under the Soviets [1918–1958], 1958), *Tretia syla, tretii shliakh, tretia revoliutsiia* (The Third Power, Third Path, Third Revolution, 1970), and *The Ukrainian Holocaust of 1933* (1983).

**Hryts-Duda, Ivan** [Hryc'-Duda], b 5 June 1911 in Rudlova, Prešov region, Czechoslovakia. Actor, writer, collector of folklore, pedagogue. A graduate of the teachers' seminary in Uzhhorod (1935), he taught in rural schools in Transcarpathia. He was an actor with the Nova Stsena theater in Khust (1936–9) and then helped to organize the Ukrainian National Theater in Prešov (1946–61), where he also acted and served as director. His plays, poetry, and prose were published in the periodicals *Duklia*, *Nove zhyttia*, and *Druzhn'o vpered*, which he also edited. He has written a collection of short stories, *Nezhody* (Discords, 1967), an epic poem in two parts, and several dramas.

**Hrytsa, Sofiia** [Hryca], b 5 December 1932 in Lviv. Ethnomusicologist. A graduate of the Lviv conservatory, since 1957 she has worked at the AN URSR Institute of Fine Arts, Folklore, and Ethnography. Her areas of interest are the history of Ukrainian ethnomusicology, songs of the Carpathian region, and the melodies of Ukrainian epic songs. Among her chief publications are *Filaret Mykhailovych Kolessa* (1962) and *Melos ukrains'koi narodnoi epiky* (Melos of the Ukrainian Folk Epic, 1979). She has also compiled numerous collections, including *Naimyts'ki ta zarobitchans'ki pisni* (Servants' and Laborers' Songs, 1975).

**Hrytsai, Dmytro** [Hrycaj] (*nom de guerre*: Perebyinis), b 1 April 1907 in Dorozhiv, Sambir county, Galicia, d 19 December 1945 in Prague. Prominent OUN leader and UPA officer, in 1933–4 he served as chief of the military and organizational department of the national executive of the OUN in Galicia. In 1934 Hrytsai was imprisoned for two years in the Bereza Kartuzka Polish concentration camp. In 1940–2 he was chief of the military department of the OUN (Bandera faction). Arrested by the Germans in 1942, in May 1943 he was rescued from a Gestapo prison. Promoted from major to general in November 1945, he was appointed UPA chief of staff. At the end of 1945 he was entrusted with an important mission to the OUN Leadership abroad, and was captured by Czechoslovak guards while attempting to cross the border to West Germany. Hrytsai committed suicide in prison.

Dmytro Hrytsai

**Hrytsai, Mykhailo** [Hrycaj, Myxajlo], b 16 September 1925. Folklorist and literary scholar. For many years he held the Chair of Ukrainian Literature and was dean of the philological faculty of Kiev University. His main works are *Ukraïns'ka literatura XVI–XVIII st. i fol'klor* (Ukrainian Literature in the 16th–18th Centuries and Folklore, 1968), *Davnia ukraïns'ka poeziia ...* (Old Ukrainian Poetry ..., 1972), and *Davnia ukraïns'ka proza ...* (Old Ukrainian Prose ..., 1975).

**Hrytsai, Ostap** [Hrycaj], b 2 November 1881 in Kniazhpil, Dobromyl county, Galicia, d 7 May 1954 in Munich. Journalist, critic, writer, and translator. After receiving a PH D in German language and literature from the University of Vienna in 1910, he taught at the Academic Gymnasium in Lviv. He lived in Vienna from 1914 to 1945 and then in Bavaria. During the First World War he belonged to the \*Union for the Liberation of Ukraine. He was a full member of the Free Ukrainian Academy of Arts and Sciences and of the Shevchenko Scientific Society. His first literary works began to appear in *Sich* in 1908. His stories and articles appeared in such publications as *Dilo*, *Literaturno-naukovyj vistykn*, *Svoboda*, *Volia*, and *Ukraïns'ke slovo*. A series of his articles on Ukrainian literature and his German translations of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign), many of T. Shevchenko's poems, and poems by other Ukrainian poets were published in the Vienna newspaper *Ukrainische Nachrichten*.

**Hrytsai, Vasyl** [Hrycaj, Vasyl'] (stage name of Vasyl Koltanovsky), b 1856 in Kukovychi, Chernihiv county, Chernihiv gubernia, d 2 March 1910 in Kukovychi. Actor, singer, stage director. From 1883 to 1899 he acted in the troupes of M. Kropyvnytsky, M. Starytsky, P. Saksahansky, and D. Haidamaka. Then for the next seven years he managed his own troupe. He sang tenor and later baritone parts in S. Hulak-Artemovsky's *Zaporozhets' za Dunaiem* (Zaporozhian Cossack beyond the Danube), I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava), and M. Starytsky and M. Lysenko's *Nich pered Rizdvom* (Christmas Eve). His most successful roles were as Yurko Dovbush and Khoma in M. Starytsky's *Iurko Dovbush* and *Oi, ne khody, Hrytsiu* (Don't Go to the Party, Hryts), and Mykyta in M. Kropyvnytsky's *Dai sertsiu voliu – zavede v nevoliu* (Give the Heart Free Reign and It Will Lead You into Slavery).

**Hrytsak, Yevhen** [Hrycak, Jevhen], b 5 January 1890 in Peratyn, Radekhiv county, Galicia, d 23 October 1944 in Czechoslovakia. Pedagogue and linguist. A graduate of Cracow University (PH D 1913), he taught at a gymnasium in Kiev from 1917 and worked as an associate of the VUAN Terminological Commission. He returned to Galicia in 1923 and taught in Peremyshl and (from 1940) Jaroslav. While fleeing to the West in 1944 he was killed at the Orem-Laz refugee camp in Slovakia by Soviet partisans. Hrytsak's publications include studies of Ukrainian word formation, onomastics, and literature, dictionaries, and grammar textbooks. His chief works are: *Z istorii ukraïns'koho knyzhkovoho rukhu na Velykii Ukraïni, 1917–1922* (On the History of the Ukrainian Book Movement in Great Ukraine, 1917–22, 1923), *Pid chervonoiu vladoiu: Shkil'na sprava na radians'kii Ukraïni* (Under the Red Regime: Schooling in Soviet Ukraine, 1923), and a Ukrainian-Polish and Polish-Ukrainian dictionary compiled with K. Kysilevsky (1931).

**Hrytsiak, Yevhen** [Hrycjak, Jevhen], b 1926 in Stetseva, Sniatyn county, Galicia. Soviet political prisoner. A Red Army veteran, he was arrested in 1949 and sentenced for his wartime, nationalist student activities to 25 years in Soviet labor camps in Soviet Central Asia and Siberia. He was one of the organizers of the 1953 prisoners' revolt in the Norilsk Camp. His memoirs of the revolt were published in the West in Ukrainian in 1980 and in English in 1984 (*The Norilsk Uprising*). Hrytsiak was amnestied in 1956, rearrested in 1959, and released again in 1964. In 1977 he lost his job at a Stetseva collective farm for applying to emigrate to Israel.

**Hrytsiuk, Oleksander** [Hrycjuk], b 10 October 1923 in Kiev. Internist; from 1978 corresponding member of the Academy of Medical Sciences of the USSR. A graduate (1951) of, and then lecturer at the Kiev Medical Institute, he became director of the Kiev Scientific Research Institute of Clinical Medicine (1970–4), and in 1973 head of the department of hospital therapy at the Kiev Medical Institute. His publications deal with cardiology, rheumatology, and the organization of therapeutic services.

**Hryva, Matvii**, b and d? A Zaporozhian Cossack and one of the leaders of the \*Haidamaka uprisings in Right-Bank Ukraine in the 1730s. Hryva took part in the uprising led by \*Verlan. In 1734 he led a force of peasants and Zaporozhian Cossacks on Vinnytsia and laid waste to landlords' estates in the region. After the uprising was suppressed, he retreated with his men to the Zaporozhian Sich. In the fall of 1736 Hryva and his haidamakas captured Pavoloch (now in Popilnia raion, Zhytomyr oblast) and Pohrebysheche (now in Vinnytsia oblast). His subsequent fate is unknown.

**Hryvna, Andrii**, b 1898, d 13 February 1969 in Szczecin, Poland. Community and political leader. Hryvna was a member of the chief executive of the Ukrainian Socialist Radical party in Galicia and a representative to the Polish Sejm from 1933. He was also a Supreme Council member of the Union of Ukrainian Progressive Youth in Lviv and a Rohatyn county union organizer. With the Soviet invasion of Western Ukraine in 1939, Hryvna was elected head of a village soviet. Arrested by the

Soviets (1939) and sentenced to five years' hard labor, he was released into the Soviet army in 1944. In 1945 he was demobilized and settled in Szczecin.

**Hryvnia** [Hryvnja]. (1) An old monetary unit, originally silver in composition, which subsequently was defined as a unit of weight and a monetary unit, either real or for counting purposes. Frequently mentioned in *Ruskaia Pravda*, the *hryvnia* was divisible into smaller denominations (see \*Currency).

(2) A silver coinage meant for use as an exchange medium. In Kievan Rus' the following types of *hryvni* were known: (a) hexagonal 'Kievan' *hryvni* weighing about 160 g (11th to the mid-13th centuries); (b) hexagonal coins of a slightly different form weighing 196 g (mid-13th century); (c) rhombic coins with variations and elongated coins with flattened tongue-like ends known as 'Chernihiv' *hryvni*, weighing about 196 g (12th century); (d) stick-like coins similar to 'Novgorod' *hryvni* but weighing 155 g (mid-13th century); and (e) short, boat-like *hryvni* weighing about 196 g found in southern Ukraine, probably of Tatar origin (approx 14th century).

(3) A unit of weight (a *hryvnia* of gold or of silver approx equivalent to 409.5 g) used in the 9th and subsequent centuries, probably borrowed from the Arabic east by inhabitants of the Dnieper region.

(4) A unit of currency issued by the independent Ukrainian state (1917–20), which in 1918 legally became the primary monetary unit.

V. Shuhaievsky

**Hryvniak, Yurii** [Hryvnjak, Jurij], b 30 May 1912 in Velykyi Bereznyi, Transcarpathia. Ukrainian scholar, publicist, and civic leader in Czechoslovakia. His research deals mainly with prominent Ukrainians in Czechoslovakia and Ukrainian-Czech relations. He wrote a monograph on I. Puliui (1971) and articles for the Ukrainian and Czech press. He also translated some works of M. Lysenko and S. Hulak-Artemovsky into Czech.

**Huba, Ihor** (secular name: Ivan), b 21 June 1885 in Bandurivka, Oleksandriia county, Kherson gubernia, d 24 November 1966 in New York. Archbishop of the Ukrainian Autocephalous Orthodox church. Ordained in 1921, he served as a priest in Poland and then in Kovel, Volhynia. From 1932 he served on the Commission for Translating the Holy Scripture and Liturgical Books at the Ukrainian Scientific Institute in Warsaw. On 10 February 1942 he was consecrated bishop of Uman and then promoted to archbishop of Poltava and Kremenchuk. Emigrating in 1944, he lived in Augsburg, Germany, until 1949 when he moved to the United States, where he founded the Cathedral of the Holy Trinity in New York. In 1954, with Archbishop P. Vydybida-Rudenko he formed the Ukrainian Autocephalous Orthodox Church in Exile.

**Hubarenko, Vitalii**, b 13 June 1934 in Kharkiv. Composer. A graduate of the Kharkiv Conservatory (1960, D. Klebanov's class), he has taught theory and composition at the conservatory since 1961. He has composed several operas, including *The Destruction of a Squadron* (based on O. Korniiuk's play) and *Mamai*, two symphonies (1961, 1965), a symphonic poem *In Memory of*

*Taras Shevchenko* (1962), a symphonic picture *Kupalo* (1971), some concertos for cello and flute, chamber music, vocal cycles, and songs.

**Hubariev, Oleksander** [Hubarjev], b 1 September 1926 in Dnipropetrovske. Graphic artist. A graduate of the Kiev State Art Institute (1955), he produced a number of linocut series such as *Folk Ballads of Transcarpathia* (1966) and *Ukrainian Songs about Love* (1967); several watercolor series such as *Through Svanetiia* (1965), *Along the Yenisei* (1966), and *Through Tuva* (1970); book illustrations; and numerous bookplates. An album of his works was published by V. Shevchuk in 1967.

**Hubenko, Pavlo**. See Vyshnia, Ostop.

**Huberhrits, Maks** [Huberhric], b 19 January 1886 in Romen, Poltava gubernia, d 6 May 1951 in Kiev. Physician; from 1948 full member of the AN URSS. A graduate of Kiev University (1911), he worked in its clinic (1911–14) and in I. Pavlov's physiological laboratory (1915–17). He headed the department of diagnosis and special pathology (1920–8) and the department of internal medicine (1928–51) of the Kiev Medical Institute. From 1945 he was also scientific director of the Institute of Nutrition of the Ministry of Public Health of the Ukrainian SSR. His publications deal with the physiology and pathology of blood circulation and metabolism.

**Hubitsky, Taras** [Hubic'kyj], b 1908 in Drohobych, Galicia, d 1974 in Detroit. Musician and musical director. In 1910 his parents immigrated to Canada. He received his musical education in Winnipeg and at the Royal Academy of Music in London, England, and became a leader in Ukrainian musical circles in Canada. He was a contributor to and patron of the journal *Ukrains'ka muzyka* (1937–9), published by the Union of Ukrainian Professional Musicians in Lviv. He lived in Detroit from 1937, where he played with the symphony orchestra and founded the Detroit String Orchestra.

**Hubkiv**. Village in Berezne raion, Rivne oblast, situated on the Sluch River. The ruins of a 15th-century castle are found here. On 2 July 1943 German troops herded the villagers into the village church and set it on fire, killing several hundred adults and children, including the Rev Venedykt Kornysky and the psalmist Borys Petriv.

**Huchva River** [Hučva] (Polish: Huczwa). A left-bank tributary of the Buh River, located in Lublin voivodeship, Poland, on Ukrainian ethnographic territory in the southern Kholm region. The Huchva is 80 km long, and its basin area is 1,431 sq km. The town of Hrubeshiv is located on the Huchva.

**Huculak, Michael** [Huculjak, Myxajlo], b 15 July 1894 in Novoselytsia, Dolyna county, Galicia, d 28 August 1976 in Vancouver. Educator. After the war he attended the University of Vienna (PH D 1926) and then taught secondary school in Rivne, Kalush, Vienna, Karlsfeld, and Berchtesgaden. After the Second World War he immigrated to Canada and settled in Vancouver, where he founded the Ukrainian Teachers' Association of Canada.

He is the author of *When Russia Was in America: The Alaska Boundary Treaty Negotiations, 1824–5, and the Role of Pierre de Poletica* (1971).

**Hudovych** [Hudovyč]. Name of a Cossack *starshyna* family. Among its members was Vasyl Hudovych (d 1764), a fellow of the standard and a general treasurer (1764) in the Hetman state. He was a member of the delegation that went to the Russian government in 1745–9 with the request to restore the Hetmanate.

Vasyl's son Ivan (1741–1820) had an illustrious career in the Russian service. He was named a count in 1797 for his exploits during the Russo-Turkish wars and as governor-general of Caucasia was appointed the military governor of Kiev and, later, Kamianets-Podilsky, with jurisdiction in Volhynia and Minsk gubernias (1798–1800). In 1807 he became a field marshal for his role in annexing and subduing Caucasia in 1806–7. In 1804 he became commander of the Russian army in Moscow and a member of the State Council. He retired in 1812. He was married to the daughter of Hetman K. Rozumovsky, Praskoviia.

Another son, Andrii (b 1731, d 24 June 1808), studied, like his brother Ivan, at the universities of Königsberg, Halle, and Leipzig. He had close ties with Prussian governing circles. He was an adjutant general and adviser to Tsar Peter III (1761–2) and took part in the diplomatic negotiations ending the Seven Years' War. After Catherine II came to power, he went into retirement, traveled abroad, and lived on his large estates in Starodub and Chernihiv regiments. He maintained close ties with members of the \*Novhorod-Siverskyi patriotic circle and with V. Kapnist. For his loyalty to Peter III, his son, Tsar Paul I, made Hudovych a general and a knight in 1796. The Hudovych family had familial and social ties with most of the Ukrainian elite of the period.

O. Ohloblyn

**Huietsky, Semen** [Hujec'kyj], b 15 May 1902 in Zhytomyr, Volhynia gubernia, d 20 August 1974 in Kiev. Painter. A graduate of the Kiev State Art Institute (1929) and a student of F. Krychevsky and L. Kramarenko, he specialized in historic and revolutionary themes. His best-known works include *In the Last Underground* (1958–9), *On the Threshold of Life* (1962–3), and *The Return* (1970–1). He also did still lifes, landscapes, and portraits.

**Huiva River.** [Hujva]. A right-bank tributary of the upper Teteriv River. The Huiva flows for 97 km through the Dnieper River basin. Its own basin has an area of 1,505 sq km.

**Huklyvyi Chronicle.** A chronicle, begun in 1660 and continued until 1830, that was an addition to the register of the village of Huklyvyi, now in Transcarpathia oblast. It was written in the vernacular and described political and religious events and everyday life in Transcarpathia. Its main author was the village priest, M. Hryhashii.

**Hulak, Mykola,** b 1822 in a village of Zolotonosha county, Poltava gubernia, d 7 June 1899 in Yelizavetpol, Azerbaijan. Educator and scholar. A graduate of Dorpat (Tartu) University (1843), he was a founder and one of the radical members of the \*Cyril and Methodius Broth-

Mykola Hulak

Petro Hulak-Artemovsky

erhood. He was severely punished for this association by imprisonment in Schlüsselburg Fortress (1847–50) and exile in Perm (1850–5). Then he taught secondary school in southern Ukraine and Caucasia. Known for his encyclopedic knowledge, he wrote studies in history, philology, literature, and mathematics, and translated some Georgian and Azerbaijan literary works.

**Hulak-Artemovsky, Petro** [Hulak-Artemovs'kyj], b 27 January 1790 in Horodyshche, Kiev gubernia, d 13 October 1865 in Kharkiv. Poet, fabulist, scholar and translator of classical literature. After studying at the Kiev Theological Academy and Kharkiv University, in 1818 he was appointed lecturer of Polish at Kharkiv University, and in 1825, professor of Russian history and geography. From 1841 to 1849 he served as the university's rector. He began to publish in 1817. Familiar with the peasants' language and way of life, he wrote in the tradition of I. \*Kotliarevsky, using burlesque in his fables, supplications, poems, and travesties of Horace's odes. His best-known fable, 'Pan i sobaka' (The Master and His Dog, 1818), satirizes the arbitrary brutality of the serf-owning gentry. Some of his works, such as 'Do liubky' (To My Beloved), exhibit elements of sentimentalism. His Romantic ballads, 'Rybalka' (The Fisherman) and 'Tvardovs'kyi,' are thematic borrowings from J. von Goethe and A. Mickiewicz supplemented with Ukrainian elements. His works are collected in *Tvory* (Works, 1927, with an introduction by I. Aizenshtok) and *Baiky, balady, liryka* (Fables, Ballads, Lyric Poetry, 1958, with an introduction by I. Pilhuk).

**Hulak-Artemovsky, Semen** [Hulak-Artemovs'kyj], b 16 February 1813 in Horodyshche, Cherkasy county, Kiev gubernia, d 17 April 1873 in Moscow. Composer, opera singer, actor, and dramatist. He was the nephew of P. Hulak-Artemovsky and a close friend of T. Shevchenko. A graduate of the Kiev Theological Seminary, he studied voice in St Petersburg and Florence (1839–42). He was noted for his dramatic talent and his powerful, rich baritone voice. From 1842 Hulak-Artemovsky was the leading soloist at the Mariinskii Theater and the Italian Opera in St Petersburg. His repertoire included over 50 operatic roles, including Ruslan in M. Glinka's *Ruslan and Liudmila*, Masetto in Mozart's *Don Giovanni*, Antonio and Lord Ashton in G. Donizetti's *Linda di Chamounix* and

Semen Hulak-Artemovskyy

Oleksa Huliaiev

*Lucia di Lammermoor*. He wrote the comic opera *Zaporozhets' za Dunaiem* (Zaporozhian Cossack beyond the Danube, 1863), in which he sang the part of Karas; the divertissement *Ukrains'ke vesillia* (The Ukrainian Wedding, 1851), in which he sang the father-in-law; the vaudeville *Nich na Ivan Kupala* (St John's Eve, 1852); and several songs. As an actor he appeared in roles such as Vybornyi and Chupryna in I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava) and *Moskal'-charivnyk* (The Muscovite-Sorcerer).

W. Wytwycky

**Hulbyshe** [Hul'byšče]. A kurhan in Chernihiv from the 10th century AD. Excavations carried out in 1872 by D. Samokvasov uncovered a large burial containing the cremated remains of a warrior and a woman; animal bones; gold, silver, and bronze buttons and buckles; bronze tableware fragments; helmets; chain-link armor; weapons, some with silver ornamentation; and other artifacts.

**Hulevychivna, Yelyzaveta** [Hulevyčivna, Jelyzaveta], 1575–1642. Kievan noblewoman and benefactress; wife of the marshal of Mozyr, S. Lozka. In 1615 she donated to the \*Kiev Epiphany Brotherhood a building and land in the Podil district of Kiev for the establishment of an Orthodox monastery, school, hostel, and hospital. The latter part of her life was spent in Lutske, where she involved herself in the work of the Lutske Brotherhood.

**Huliai-Pole** [Hul'aj-Pole]. VI-17. Town (1970 pop 16,200) on the Haichur River and a raion center in Zaporizhia oblast. It was founded in 1785 as a military settlement. From 1917 to 1921 it was the center of N. \*Makhno's anarchist activity. The city has agricultural-machinery, automobile-repair, paint, consumer-products, food-processing, mixed-feed, and shoe plants and a historical museum.

**Huliaiev, Oleksa** [Hul'ajev], b 1 March 1863 in Kiev, d 27 November 1923 in Kiev. Jurist of civil law and specialist in Roman law; member of the All-Ukrainian Academy of Sciences. After graduating from Kiev University, he continued his studies in Berlin. He lectured at Dorpat

(Tartu), Kiev (1894–1908), St Petersburg, and Moscow universities. In 1920 he was appointed professor at the Kiev Institute of the National Economy. His chief works are *Naem uslug* (Hiring of Labor, 1893) and *Russkoe grazhdanskoe pravo* (Russian Civil Law, 1913).

**Hulianytsky, Hryhorii** [Hul'janyc'kyj, Hryhorij], b and d ? Cossack military figure and diplomat; Ukrainian nobleman from the Volhynia region. Hulianytsky was colonel of the Nizhen (1656–9) and Korsun regiments (1662). He accomplished several diplomatic missions to Russia for Hetman B. Khmelnytsky. Later he criticized Khmelnytsky's decision to seek alliances with the Ottoman Porte and Russia, becoming a leading proponent of a pro-Polish orientation by the Cossacks. He was a supporter of Hetman I. Vyhovsky, helped suppress the rebellion led by Ya. Barabash and M. Pushkar against the hetman in 1657–8, and participated in Vyhovsky's campaign to end Ukraine's alliance with Russia. Hulianytsky particularly distinguished himself in the Ukrainian victory over the Russian army at Konotip in 1659. After Vyhovsky's defeat and removal from office in 1659, Hulianytsky supported Hetman Yu. Khmelnytsky. In 1660 he helped conclude the Treaty of \*Slobodshche. In 1663–4 he took part in P. Teteria's campaign against the Russians in Left-Bank Ukraine, but was defeated in battle. Accused of treason by S. Czarniecki, he was imprisoned by the Poles in 1664. Released in 1667, he became a colonel of the Polish army in 1675.

**Hůlka, Rudolf**, b 15 November 1887 in Lasenice, Jindřichův Hradec county, Czechoslovakia, d 18 September 1961 in Prague. Czech economist, painter, translator, and popularizer of Ukrainian literature. In 1922 he published a postcard series of 16 sketches of wooden churches and belfries in Transcarpathia. Encouraged by V. \*Hnatiuk, in the early 1920s he began to translate Ukrainian works into Czech. Of his translations, 37 books have been published and about 20 remain in manuscript form. He translated almost the complete works of V. Stefanyk, L. Martovych, M. Kotsiubynsky, and M. Cheremshyna.

**Hultai, Vasyl** [Hul'taj, Vasyl'] (Hultay, William), b 10 August 1900 in Hlushkiv, Horodenka county, Galicia, d 18 June 1974 in Toronto. Community leader. After serving in the UHA Army, Hultai studied at Cracow University. A member of the Ukrainian Military Organization, in 1927 he immigrated to Canada to avoid harassment by Polish police. He was a founder and head of the Ukrainian War Veterans' Association of Canada, and a founding member of the \*Ukrainian National Federation, serving as chief organizer, deputy head (1938–46), head (1954–6), and first president (1956–7). He also founded the New Pathway Publishers and the Ukrainian Cultural and Educational Centre in Winnipeg.

**Huly, Maksym** [Hulyj], b 3 March 1905 in Nova Basan, Kozelets county, Chernihiv gubernia. Biochemist; since 1957 full member of the AN URSR. A graduate of the Kiev Veterinary-Zootechnical Institute (1929), in 1932 he became a research associate, in 1950 a department head, and in 1971 director of the Institute of Biochemistry of the AN URSR. At the same time (1944–76) he chaired the Department of Biochemistry of the Ukrainian Agricul-

tural Academy. A member of the Presidium of the Academy of Sciences since 1957, he was its vice-president from 1958 to 1962. His publications consist of over 170 papers on metabolism, physicochemical properties of proteins, and the biosynthesis of proteins. He developed methods of isolating, purifying, and crystallizing tissue proteins that proved useful in the production of fermentation preparations for industry and medicine, methods of combating diabetes and ketosis in human beings and animals, and methods of stimulating biosynthetic processes that help to increase productivity in animal husbandry.

**Huly-Hulenko, Andrii** [Huluj-Hulenko, Andrij], b 1886, d 1921? Senior officer of the UNR Army. He came to prominence as an insurgent commander supporting the \*Directory in southern Ukraine during 1918–19. In 1920 he commanded the 1st (Zaporozhian) Division of the UNR Army. In November 1921 he commanded the Bessarabian Group in the Second Winter Campaign, entering Ukraine from Rumania. He was captured by Bolshevik forces and probably executed.

**Human.** See Uman.

**Human geography.** The study of the spatial distribution of various human phenomena (social, cultural, economic, political, or historical), of their interrelationship, and of their relation to the physical environment. The main branches of human geography are social, cultural, political, economic, urban, population, transportation, and historical geography.

The human geography of Ukraine was founded as a scientific discipline by S. \*Rudnytsky. Calling his major study *Osnovy zemleznannia Ukraïny*, Knyha 2: *Antropoheohrafiia Ukraïny* (Foundations of the Earth Science of Ukraine, vol 2: Anthropogeography of Ukraine, 1926), he borrowed the title and organizing concepts from two outstanding German geographers, C. Ritter and F. Ratzel, and the French geographer E. Reclus, who in his *Nouvelle géographie universelle* (1876–94) singled out Ukraine as a major region. He also adopted some aspects of Ratzel's environmental determinism. Rudnytsky defined Ukraine as an anthropogeographic unit – a continuous territory inhabited by the Ukrainian nation – and justified his approach by observing that a nation's territory was more stable than the political borders. He defined a nation as a large group of people who identify themselves as members of a group, occupy a given territory for a long time, and share a common language, culture, tradition, and political aspirations.

Further contributions to the human geography of Ukraine were made by V. \*Kubijovyč and his associates, who accepted Rudnytsky's definition of Ukraine, updated the data, and published the first atlas of Ukraine (1937), covering 66 topics and containing over 200 maps and diagrams. This effort was followed by *Heohrafiia Ukraïns'kykh i sumezhnykh zemel'* (Geography of Ukrainian and Bordering Lands, 1943). The work not only updated Rudnytsky's data but provided more detailed discussion by specialists of the history of Ukrainian colonization of the land (I. Krypiakievych), contemporary distribution of population, population dynamics, nationalities in Ukraine and inter-ethnic relations (V. Kubijovyč), physical anthropology of Ukrainians (R. Yendyk), geography of

Ukrainian language and dialects (I. Zilynsky), and a study of settlements (Kuvijovyč, M. Kulytsky).

Soviet geographers, however, rejected not only environmental determinism but also anthropogeography. They divided geography into physical geography (where interrelations among phenomena are determined by laws of physical sciences) and economic geography (where interrelations are determined by laws of economics). Specialized fields such as population geography and urban geography were developed within \*economic geography. By 1982 the discipline was broadened to economic and social geography, which would incorporate all aspects of human activity in its spatial manifestations, including problems of social anthropology and human ecology.

**Human rights.** Fundamental claims which are, or should be, legally recognized and protected to secure the fullest development of each and every individual's personality. Usually such rights are regarded as inherent in humans, ie, not conferred by positive law, and hence inalienable. The theory of human rights, first conceived of as natural rights, originated with the Greek and Roman Stoics and was developed by the Fathers of the Church, the medieval theologians, and Protestant thinkers. They were asserted in the Petition of Right (1628), the Bill of Rights (1689), the American Declaration of Independence (1776), and the French Declaration of the Rights of Man and of the Citizen (1789), and played a decisive role in the English Civil War and the American and French revolutions. In the 19th and 20th centuries some basic rights have been enshrined in the constitutions of many states and have been translated to varying degrees into legal rights. Classical rights (to life, liberty, security of person, equality before the law, private property, freedom of thought, speech, and assembly, right to representation) tended to be negative – they placed restraints on the state for the sake of individual liberty and political equality. The new rights demanded in the 20th century (to work, rest and leisure, adequate standard of living, education, social security, and participation in culture) are positive – they require the state to provide certain goods and services to ensure social equality and economic security. Since individual rights can be realized only within a given people's culture and tradition, the concept of human rights must include the rights of peoples. The right of all peoples to equality and self-determination has been widely recognized in the 20th century. The mass terror inflicted by states on their own citizens and the two world wars in this century have made human

rights a leading concern of individuals, governments, and international organizations.

The League of Nations did not come forth with a comprehensive statement on human rights, but it did attempt to protect certain human rights through its Covenant and the mandate system. Some peace treaties after the First World War contained special provisions for the rights of racial, linguistic, and religious minorities (see \*national minorities). A more concerted approach to human rights was made by the United Nations (UN). Its charter demands respect for human rights and fundamental freedoms as a guarantee of international co-operation and peace. In 1946 the UN Commission on Human Rights was set up under the Economic and Social Council to prepare an international bill of rights. The first part of the bill – the Universal Declaration of Human Rights – was ratified by the General Assembly on 10 December 1948. This was, in a sense, a revolutionary document: although it lacked any legal force, it set a standard by which governments could be judged by the world public. Its moral and political significance is immense. The second part of the commission's work was to prepare the International Covenant on Civil and Political Rights (1966) and the International Covenant on Economic, Social, and Cultural Rights (1966). Signatories of these treaties, including the USSR, the Belorussian SSR, and the Ukrainian SSR (19 October 1973), undertake to respect the rights specified in the first document and make progress towards realizing the rights specified in the second. Besides these general treaties the UN has adopted a number of special conventions that deal with the rights of specific categories of people such as refugees, stateless persons, women, and children. Only some of these agreements have been signed by the Ukrainian SSR: the International Convention on Elimination of All Forms of Racial Discrimination (1980), the International Convention on the Suppression and Punishment of the Crime of Apartheid (1975), and the Convention on the Non-Applicability of Statutory Limitations to War Crimes and Crimes against Humanity (1969).

The Ukrainian SSR was a member of several UN agencies in the field of human rights: the Commission on Human Rights (1946–7, 1983–5), the Special Committee on the Policies of Apartheid (from 1970), the Committee on the Elimination of Racial Discrimination (1970–1), the Commission on the Status of Women (1981–4), and the Human Rights Committee. The last was formed in 1976 to examine the reports of signatories to the Covenant on Civil and Political Rights and to deal with petitions from signatories concerning the violations of human rights in other countries. Its recommendations have a certain moral and political influence, but no legal power. In 1968 Ukraine's representative on the committee, Prof P. \*Ned-bailo, was the first laureate of its annual prize for work on behalf of human rights. Soviet representatives at the UN often criticize human rights violations in other countries such as South Africa, Chile, and Israel.

Human rights provisions were part of the Final Act of the Conference on Security and Co-operation in Europe, which was signed on 1 August 1975 in Helsinki by 35 countries, including the USSR but not the Ukrainian SSR. The so-called Third Basket of the agreement guarantees the fundamental freedoms and such rights as freedom of movement across borders, free exchange of ideas, emigration, and family reunification. The Soviet Union has

failed to live up to its undertakings on human rights, and this has been pointed out to its representatives at the periodic review conferences on the Helsinki Accords. Besides official delegations, spokesmen of non-governmental organizations have attended these conferences in Belgrade, Madrid, and Vienna and have staged their own parallel forums. The most active Ukrainian human rights groups in the West are the Human Rights Commission of the World Congress of Free Ukrainians, the External Representation of the Ukrainian Helsinki Group, Americans for Human Rights in Ukraine, Prolog, and Smoloskyp associations. Independent organizations such as \*Amnesty International and Freedom House play an important role in the worldwide struggle for human rights, including the struggle in Ukraine.

The worldwide human rights movement spread to the USSR and Eastern Europe after J. Stalin's death (see \*dissident movement). Calling themselves *pravozakhystnyky* (rights defenders), Soviet dissidents exposed their government's violation of Soviet law, the Soviet constitution, and international commitments on human rights. The struggle for human rights in Ukraine entered a new phase after the mass arrests of dissidents in 1972–3 and the signing of the Helsinki Accords. In fall 1976 the \*Ukrainian Helsinki Group, consisting of 10 members, arose in Kiev. During its brief existence it prepared and disseminated about 20 documents concerning human rights violations in Ukraine, including several memoranda to the signatories of the Helsinki Accords who had gathered for a review conference in Belgrade. The group was repressed and its members were severely punished. In spite of heavy sacrifices the human rights movement in Ukraine has not been crushed. Although it is now largely invisible, it occasionally displays signs of vitality. At the beginning of the 1980s, for example, the Ukrainian Committee for the Defense of the Rights of the Ukrainian Catholic Church and the Rights of the Faithful was formed under the leadership of Y. Terelia.

**Humanism.** The broad program of cultural reform inspired by the ideal of *humanitas* – the harmonious synthesis of intellectual, moral, and political virtues in a fully active life – and implemented by redirecting inquiry and education to classical studies. In reacting against the scholasticism of the medieval period, the humanists went far beyond simply reviving classical Greek and Latin and emulating the ancient writers. They reoriented man's interest from God and the afterlife to the individual and the fullest realization of his potentialities in this life. They freed men's minds from dogmatism and servility, and encouraged criticism and creativity. They offered hope of a new golden age rivaling that of Pericles and Augustus. Thus, humanism was nothing less than a total

world view that constituted the intellectual underpinning of the Renaissance. Originating in the 14th century in the Italian city-states, in the 15th century it received a strong impetus from the influx of scholars and classical texts from Byzantium; towards the end of the 15th and the beginning of the 16th century it spread from Italy to the rest of Europe. Its chief patrons and supporters were the secular rulers of Europe – patricians, princes, and kings who often employed humanists as ministers and diplomats. Humanism also received some support from the Catholic church, which assimilated some of its ideas and used them in the service of faith. As a complete secular alternative to the religious culture of the medieval period, humanism has had a decisive influence on the development of Western culture.

Humanistic ideas began to enter Ukraine towards the end of the 15th century. Their main carriers were foreign visitors and Ukrainian graduates of foreign universities. Because of an active trade between Galicia and the Italian states of Genoa, Venice, and Florence, a sizable Italian colony consisting of merchants, manufacturers, bankers, technical experts, and legal advisers flourished in Lviv in the 15th and 16th centuries. One of its most influential families, the Tebaldis, had close ties with Florentine humanists. It was probably A. Tebaldi who invited the humanist F. Buonaccorsi (Callimachus Experience) to Lviv in 1470. After medieval Lviv was destroyed by fire in 1527, a new city was built largely by Italian architects in the Renaissance style.

It is evident from student registers that sons of Ukrainian (Ruthenian) nobles and burghers studied at such universities as the Sorbonne, Bologna, Padua, Prague, and Heidelberg from as early as the 14th century. In the 15th and 16th centuries Cracow University admitted about 800 Ukrainians. A number of Ukrainians educated abroad became humanist scholars and educators: Yu. \*Droho-bych, professor of Bologna and Cracow universities in the 1480s; Prince A. Svirsky, lecturer on Aristotle at Cracow University; Pavlo Rusyn (Paulus Ruthenus) from Krosno, teacher of Latin literature at Cracow University (1506–8) and then active among Hungarian humanists; and Lukash from Nove Misto, lecturer at Cracow University and author of a textbook in epistolography (1522).

The curriculum and methodology of the \*brotherhood schools, colleges, and academies (see \*Higher education) founded in Ukrainian and Belorussian territories in the 16th–18th centuries were strongly influenced by humanistic pedagogical theory and practice. The trivium and quadrivium inherited from the medieval schools constituted merely a framework that became filled with a new content – the classical languages and literatures. Jesuit and, later, Piarist schools emphasized Latin. Orthodox schools, in contrast, at first gave primacy to Greek, without neglecting Church Slavonic and Latin, but eventually turned to Latin in order to compete more effectively in the religious arena. The program of Uniate schools, which were established in the 17th and 18th centuries, was similar to that of the Orthodox schools. Greek churchmen and scholars who had studied in Italy and were steeped in humanistic studies played an important role in the development of Orthodox schools in Ukraine; for example, \*Arsenii of Elasson served as rector of the Lviv Dormition Brotherhood School, and C. \*Lucaris served as lecturer at the \*Ostrih Academy (M. Smotrytsky referred to him as his teacher) and as rector of the brotherhood school in Vilnius.

The clearest evidence of humanistic influences in Ukrainian literature of the late 16th and 17th centuries is found in the \*polemical literature. Although the polemical tracts of such writers as Z. Kopystensky, Kh. Filatet, L. Zyzanii, H. and M. Smotrytsky, and I. Potii are devoid of the tolerant spirit that was typical of humanists, they display an intimate knowledge of classical literature, an acquaintance with recent humanistic writing, and a mastery of the rhetorical devices and dialectical techniques practiced by the humanists. I. Vyshensky, the most gifted and powerful writer among the Orthodox polemicists, employed a style closely resembling that of the humanists, while rejecting their learning and educational program. A few Western literary works of the Renaissance period were translated into Ukrainian. While literary production in the Ukrainian (Ruthenian) language was very limited at the time, some Ukrainian writers, who came to be classified as Polish humanists, wrote in Latin. Pavlo Rusyn from Krosno produced a collection of Latin poetry entitled *Carmina* (1509). S. Orikhovskyy (Orichovius Ruthenus) wrote a number of political treatises, including *Fidelis Subditus* (1543) and *Quincunxie* (1564), collections of historical studies such as *Origo Polonorum* (publ. posthumously 1611), and pamphlets warning against the Turkish threat. A professor of Cracow University, Tychynsky, signed his panegyrics Ticiensis Roxolanus, and Ch. Samborchyk used the pen name Vigilantius Gregorius Samboritanus Ruthenus. J. Herburt, the author of *Tabulae*, was known as Ioannis Ruthenus, and it is possible that J. Szczesny Herburt, a Polish writer who defended the Orthodox church and the Ukrainian people from the Polish Catholic offensive, was of Ukrainian origin.

The humanistic school in Polish literature, which was founded by J. Kochanowski, included some writers of Ukrainian origin and often dealt with Ukrainian themes. M. Sęp Szarzyński (1550–81), who was born in Galicia, quoted Ukrainian songs in his poetry. In his Latin poem *Roxolania* (1584), S. Klonowicz (1545–1602) depicted contemporary life in Ukraine, and Sz. Szymonowicz (1558–1629), who was born in Lviv, produced a collection of verses about peasant life in Ukraine – *Sielanki* (Peasant Idylls, 1614, 1628). The latter was imitated by Sz. (1608–29) and J. (1597–1677) Zimorowicz in their collections *Roksolanki – to jest ruskie panny* (Roxolanas – That Is, Ruthenian Girls, 1654) and *Nowe sielanki ruskie* (New Ruthenian Peasant Idylls, 1663). B. Głowacki (1543–1614), in his poem on Ivan Pidkova, praised the military prowess of the Cossacks.

Polish historical writing at the time had a humanistic inspiration. The works of Maciej z Miechowa (1457–1523), M. (1455–1575) and J. (1540–99) Bielski, M. Strykowski (1547–82), and S. Sarnicki (1532–97) contained much information about Ukraine (derived from extant Ukrainian chronicles) and influenced the development of Ukrainian historical writing in the 17th century.

The humanistic tradition remained a vital force in 17th- and 18th-century Ukrainian literature, which is commonly known as the Ukrainian \*baroque. Poetics and rhetoric textbooks (most of which were in Latin) written by Ukrainians were based on Italian or German models. Original Ukrainian poetry and drama were heavily influenced by classical and humanist authors. Much of this literature was written in Latin by such scholars as S. Yavorsky, T. Lopatynsky, T. Prokopovych, and S. Po-

lotsky. The centrality of the humanistic curriculum in higher education accounts for the enormous influence of humanistic studies and ideals in Ukrainian culture to the end of the 18th century.

**Humeniuk, Andrii** [Humenjuk, Andrij], b 1916. Folklorist; professor at the Kiev Institute of Culture, specializing in folk songs, dance, and instrumental music. Among his chief works are *Ukraïns'ki narodni muzychni instrumenty* (Ukrainian Folk Musical Instruments, 1967), *Ukraïns'kyi narodnyi khor* (The Ukrainian Folk Choir, 1969), *Narodne khoreografichne mystetstvo Ukraïny* (The Folk Choreographic Art of Ukraine, 1969), and *Instrumental'na muzyka* (Instrumental Music, 1972). He also compiled a number of collections, including *Ukraïns'ki narodni tantsi* (Ukrainian Folk Dances, 1972).

Feodosii Humeniuk

**Humeniuk, Feodosii** [Humenjuk, Feodosij], b 1941 in Rybchyntsi, Khmilnyk raion, Vinnytsia oblast. Non-conformist painter. A graduate of the Dnipropetrovske Art School and the Leningrad Institute of Sculpture, Architecture, and Painting (1965), in 1974 he took part in the first unofficial art exhibition in Leningrad and in 1975 he and V. Makarenko organized the first avant-garde art exhibition in a private apartment in Moscow. This led to Humeniuk's expulsion from the Union of Artists of the

USSR and banishment to Dnipropetrovske. His works, which tourists had managed to bring out of the USSR, were exhibited without his permission in Toronto in 1978, 1980, and 1984. Humeniuk deals with historical and religious themes through a rich system of symbols. Such canvases as *Banduryst*, *The Hetmans*, *Kozak Mamai*, *Christmas Eve Supper* (1977), *Shevchenko*, and *The Holy Family* (1976) express his deep love for Ukraine and her past. From a formal aspect, Humeniuk's work is closely related to M. Boichuk's monumentalist style, which combines old Byzantine traditions with folk art and modern Western styles, and remains a dominant influence in Ukraine's artistic processes.

Theodore Humeniuk

**Humeniuk, Theodore** [Humenjuk, Teodor], b 21 November 1891 in Potochyska, Horodenka county, Galicia, d 4 March 1978 in Toronto. Lawyer and community leader. Humeniuk went to Canada in 1908. Graduating from the Osgoode Hall Law School in 1923, he became the first Ukrainian to practice law in eastern Canada. He was one of the first Ukrainians to be appointed King's Counsel. Active in the Ukrainian Greek Orthodox church, Humeniuk was a founder and president of the Ukrainian Self-Reliance League and of its foundation. For many years he contributed articles and satirical poems to the newspaper *Ukraïns'kyi holos*. From 1941 to 1950 he served as president of the Toronto branch of the Ukrainian Canadian Committee.

Dokiia Humenna

**Humenna, Dokiia**, b 10 March 1904 in a suburb of Zhashkiv, Kiev gubernia. Writer. She studied literature at the Institute of People's Education in Kiev. Her first literary sketch, 'U stepu' (In the Steppe), was published in 1924, and thereafter her prose appeared in the major

Soviet Ukrainian literary journals. She belonged to the peasant writers' association \*Pluh. Her travel reports, 'Lysty z stepovoi Ukraïny' (Letters from Steppe Ukraine, *Pluh*, 1928) and *Ekh, Kuban', ty Kuban' khliborodnaia* (Eh, Kuban, Kuban, You Bountiful Land, (published in *Chervonyi shliakh*, 1930, and separately, in 1931), incurred party censure. Stalinist terror forced her to remain silent until 1939. Then several stories and the novelette *Virus* (*Virus*, 1940) appeared, which once again brought on official censure. Escaping to Lviv during the German occupation of the USSR, she contributed her prose to the periodic press there. Emigrating after the war, she lived in DP camps in Austria and Germany where she wrote a collection of stories *Kurkul's'ka viliia* (The Kulaks' Christmas Eve, 1946) and began her famous tetralogy *Dity chumats'koho shliakhu* (Children of the Milky Way, 1948–51), which she finished after moving to New York City. Since settling in the United States, Humenna has maintained a very active literary career, publishing more than 15 books and contributing to journals and collections. Her abiding interest in feminism, prehistoric life, mythology, and archeology is evident in most of her postwar works, such as *Mana* (Delusion, 1952), *Velyke Tsabe* (The Great Tsabe, 1952), *Zoloty pluh* (The Golden Plough, 1968). Notable also are her essays about travels in the New World, such as *Bahato neba* (A Lot of Sky, 1954), about the United States, and *Vichni vohni Alberty* (The Eternal Fires of Alberta, 1959), as well as her collection of stories *Sered khmarosiahiv* (Among the Skyscrapers, 1962).

D.H. Struk

**Humenne.** v-2. County center (1975 pop 23,400) of Východoslovenský kraj in eastern Slovakia. First mentioned in documents from the 14th century, today it is an administrative and cultural center. Twenty-one percent of the county's population is Ukrainian, although some Ukrainians speak only Slovak. In Humenne itself 10 percent of the inhabitants are Ukrainians. The city's gymnasium has a Ukrainian department.

**Humetska, Lukiia** [Humeč'ka, Lukija], b 18 January 1901 in Livcha, Liubachiv county, Galicia. Philologist. A graduate of Lviv University (1929), she received her doctorate in 1956 and was the director of the linguistics section of the AN USSR Institute of Social Sciences in Lviv. A well-trained philologist, Humetska has studied primarily the Ukrainian language of the 14th and 15th centuries, writing many articles about it and a book on word formation in the official documents of that time (1958). She was the chief editor of a Polish-Ukrainian dictionary (2 vols, 1958, 1960) and a dictionary of Old Ukrainian of the 14th and 15th centuries (2 vols, 1977, 1978), and a member of the editorial boards of the 11-volume dictionary of the Ukrainian language (1970–80) and the linguistic journal *Movoznavstvo* (1967–82).

**Humor.** Humor plays a prominent role in all genres of Ukrainian folklore, literature, music, and art.

Many genres of folk prose are based on humor, particularly anecdotes, fables, fairy tales, stories, legends, and narratives (see \*Folk oral literature). Humor is connected with ritual holidays and family customs, particularly various Easter, Kupalo, christening, and wedding rituals. \*Carols and prayers often become infused with

elements of parody. Humor is also manifested in proverbs, homilies, similes, and riddles.

A large component of Ukrainian \*folk songs consists of so-called joking songs (*zhartiivlyoi pisni*). These are songs on varying themes and subjects (especially family ties and customary relations), at the base of which lie an amusing thought, occurrence, or accident. They are always tailored to the audience. Joking songs are often intended to deride the character faults of individual family members or the community. Songs about youth are particularly common. These are often used in courtship or in acquaintance between the sexes. Songs depicting harmonious family life are very rare; rather, humorous songs focus on the 'typical' vices of men and women – tantrums, laziness, ineptitude, miserliness, inhospitality, inclination to drink, women's whims, and so on. Joking songs neither condemn nor condone unfaithfulness in marriage; particularly in songs about marriages between old men and young women and relationships between godparents, they adopt a fairly tolerant attitude. One of the largest subgroups of joking songs is the \**kolomyiky*. This is almost the only genre of Ukrainian folk song that is still being created, and thus is a clear reflection of contemporary life. Both *kolomyiky* and anecdotes are frequently colored with political satire. Closely related to *kolomyiky* are so-called *blatni* songs, which deal with antisocial elements such as prostitutes, thieves, and other types of criminals. Joking songs have a specific compositional form and melody. Many take the form of a dialogue. The comic effect is achieved through such devices as contrast, hyperbole, strings of humorous details or epithets, intonation, gestures, and improvisation.

Humor also occupies an important place in folk drama, particularly in the \**vertep* (puppet theater). Other mixed folklore-literary genres of the baroque period – eg, \*intermedes (interludes), burlesque schoolboy's rhymes, and Cossack folk poetry – are based entirely on humor. The Cossack environment produced parodic \**dumas* such as 'Duma about Cossack Holota,' rhyming narratives (eg, 'Pekelnyi Marko' [Hellish Marko] and 'Vakula Chmyr'), and numerous songs that humorously portray the free Cossack lifestyle. Another subgroup of Ukrainian folklore consists of *soromitski* songs, anecdotes, and folk tales. These are of a frivolous, indecent or vulgar, and erotic nature and serve to entertain in fairly narrow circles.

The creators and disseminators of humorous works in Kievan Rus' were wandering artists: psalter players, jesters, and gamesters. From the 16th to the 19th centuries the primary carriers of humorous works were the \**kobzars*, lira players, and wandering students. Examples of Ukrainian intermedes (to the plays of Ya. Havatovyč) have come down to us from the 1720s. The oldest recorded Ukrainian joking song is 'Chom, chom, chomu bosa khodysh' (Why, Why, Why Do You Go Barefoot), transcribed in 1620. Humorous stories, anecdotes, and joking songs can be found in virtually all folk anthologies from the 17th to the 20th centuries, which testifies to their great popularity. Elements of Ukrainian joking songs can be found in the works of Polish writers of the 16th and 17th centuries. Later this humor exerted a profound influence on the 'Ukrainian school' in Polish literature. Humorous works entered Ukrainian literature on a large scale through the *vertep*. Ukrainian theater of the 19th century was influenced by this genre. Humorous scenes of folk customs and rites, such as engage-

ments, weddings, and parties, were important components of most Ukrainian comedies of the first half of the 19th century. A more sophisticated conceptualization of folk humour was provided in the works of realist dramatists such as M. Kropyvnytsky, M. Starytsky, I. Tobilevych, and I. Franko. I. Kotliarevsky's travesty of the Aeneid (*Eneida*, 1798) and some works of N. Gogol are based entirely on Ukrainian folk humor. The *smikhomovky* (amusing sayings) of S. Rudansky and the *pobrekhenky* (little lies) of P. Hulak-Artemovsky occupy important places in the literature of Ukrainian humor. The classic exponent of humor in modern Ukrainian literature is O. Vyshnia. Humor as a device was often used by such composers as S. Hulak-Artemovsky, in *Zaporozhets za Dunaiem* (Zaporozhian Cossack beyond the Danube); M. Lysenko, in *Rizdviana nich* (Christmas Night), *Taras Bulba*, *Koza dereza* (Billy Goat's Bluff), *Eneida*; and S. Liudkevych, in *Dovbush*. Among contemporary composers who frequently use humor are O. Bilash, I. Vymer, K. Dankevych, and H. Maiboroda. In pictorial art, comic scenes can be found in paintings of as early as the 16th–18th centuries, while in the 19th and 20th centuries humor was one of the central themes of Ukrainian painting, particularly in the works of K. Trutovsky, K. Tymonenko, E. Bukovetsky, and A. Zhdakha. Among contemporary artists who use comic elements and themes are A. Bazylevych, M. Butovych, M. Samokysh, V. Chernukha, E. Kozak, T. Yablonska, F. Krychevsky, D. Far-kavec, Y. Bokshai, W. Kurelek, and N. Husar. (See also \*Humoristic and satiric press.)

**Humoristic and satiric press.** The humoristic press in Ukraine emerged almost at the same time as the general press. The first Ukrainian newspapers contained – in addition to chronicles of events – scholarly, literary, and satirical material. *Kharkovskii demokrit* (1816) had a humor section, while *\*Dnevnyk Ruskij* (1848) and the women's journal *Lada* (1853) of Lviv published humorous short stories. However, political censorship by the Russian and Austrian regimes and restrictions placed on the use of the Ukrainian language in the Russian Empire severely limited the early development of the humoristic press.

The first expressly humorous and satirical magazines appeared during the 1860s; these circulated only in manuscript form in very limited circles. *Pomyinytsia* (1863–4) was compiled by members of the Hromada of Kiev to poke fun at the opponents of the Hromada. At the Lviv Theological Seminary, A. Vakhnianyn's *Klepalo* circulated from 1860 to 1863; it was populist in orientation. More biting, and well illustrated by Yu. Dutkevych, was O. Partytsky's *Homin*. Issues of these magazines were frequently confiscated by the seminary's administration. Besides satirizing life in the seminary, they commented on community affairs and political events in contemporary Galicia. The first printed humor magazine was *Dulia*, one issue of which appeared in 1864, probably

under the editorship of A. Kobylansky. It was followed by Yu. Moroz's *Kropylo* in Kolomyia (1869) and the Russophile *Strakhopud*, first published in Vienna (1863–8) under the editorship of Y. Lyvchak, but subsequently revived in Lviv by I. Arsenych and V. Stebelsky (1872–3), S. Labash (1880–2), and O. Monchalovsky (1886–93). A. Ripai, V. Kimak, and K. Sabov's *Sova* was published in Uzhhorod and Budapest (1871), and I. Semaka's semi-monthly *Lopata*, in Chernivtsi (1876).

The political differentiation of 1880–1905 and the debates between Ukrainophiles and Russophiles in Galicia provided great impetus to the development of the humoristic press. In Lviv *Zerkalo* (1882–3) and *Nove Zerkalo* (1883–5) were edited by K. Ustyianovych. Journals called *Zerkalo* appeared again in Lviv in 1889–93 (published by V. Levytsky, K. Pankivsky, and I. Krylovsky) and in 1898–1909 (published by O. Dembytsky). The weekly *Antsykhryst* (1902) was published by S. Terletsky and O. Shpytko in Chernivtsi, and I. Kuntsevych's *Komar* appeared in Lviv (1900–5).

*Osa* (The Wasp)

The Revolution of 1905 brought some relaxation of controls in Russian-ruled Ukraine and, along with a revival in political and cultural life, a strong interest in humor magazines. Humorous feuilletons began to appear in general newspapers. In Kiev, V. Lozynsky published *Shershen'* (1906) and P. Bohatsky published *Khrin* (1908), but these were suppressed by new restrictions and censorship. The comparatively more liberal political climate in this period in Galicia gave rise to *Osa* (1912), published by P. Odynak and with caricatures by Ya. Pstrak, and S. Terletsky's *Zhalo* (1913–14).

Koliuchky (Thorns)

The First World War brought new proscriptions on publishing in Ukrainian. At the same time, a new kind of press emerged under the auspices of the Ukrainian Sich Riflemen on the fronts, in camps for Ukrainian prisoners of war, and later in internment camps in Poland and Czechoslovakia. These journals came out irregularly and were printed on very primitive hectographs or circulated in manuscript form. The Sich Riflemen's humor magazines included *Samokhotnyk* (1915–19), published by its press bureau and edited by A. Babiuk, K. Kuzmowych, A. Lototsky, and others, and well illustrated by O. Kurylas and L. Gets; *Samopal* (1916); *ususu* (1916–17), edited by Yu. Kalamar; *Smittia*; and *Tyfusna odnodniivka*. Magazines published in POW and internment camps included *Kharakternyk* (1920–1), edited by H. Hladky; *Promin'* (1921); *Okrip* (1921); *Polyn*; *Grymasa* (1921); *Komar* (1920); *Zhalo* and *Avans* published in Wadowice; *Oko* and *Sych* in Kalisz; *Lystok Ob' iav* in Pykulychi; *Blokha* and *Budiak* in Striliv; and *Vzad* (1919–21), illustrated by E. Kozak. Other magazines included *Lezhukh*, published in Tukholia (1921); *Koliuchky* in Czeŝtochowa and Warsaw (1926–9); and *Kamedula*, which appeared in Liberec, Czechoslovakia (1919–20).

Under the UNR and Hetman government independent humor magazines enjoyed a brief renaissance. *Gedz* (1917–18), the weekly *Budiak*, well edited by S. Panochini (1917), and *Rep' iakh* (1918) all appeared in Kiev. Numerous provincial newspapers also contained much humorous content. After 1920 these journals inspired similar magazines in cities with large communities of Ukrainian émigrés: in Vienna, *Ieretyk* and *Smikh*, edited by O. Oles; in Prague, *Vikhot'*, *Gedz*, *Liushnia*, *Oko*, *Rep' iakh*, *Satyrykon*, and *Ukrains'kyi kapitalist'*; and in Poděbrady, *Absurd*, *Enei*, *Kropyva*, *Metelyk*, *Podiebradka*, *Podiebrads'ka hlidka*, and others.

The partition of Ukraine among four states dictated the character of the humoristic press in the interwar period. In Soviet Ukraine during the early 1920s, humor was placed at the service of propaganda. During NEP, when censorship was eased somewhat, some satirization of everyday and literary-artistic themes was permitted, including even sharp criticism of opposition to Ukrainization by Russified city dwellers and the Soviet bureaucracy. In the 1920s and early 1930s, popular humor magazines included *Chervonyi perets'* (1922), *Zhuk* (1923–4), *Havrylo* (1925–6), the Russian-language *V chasy dosuga*, *Novyi bich*, *Struzhki* (1922), *Krasnaia osa*, *Krasnoe zhalo* (1924), and *Uzh* (1928–9) in Kharkiv; *Bumerang* (1927) and the Russian *Tiski* (1923) in Kiev; the Russian *Bomba*, *Burzhui*, *Shpil'ka* (1918), *Krasnyi smekh* (1919), *Oblava* (1920), and *Komsomol'skii Krokodilenok* (1923) in Odessa; *Ternytsia* in Bila Tserkva; and *Zhyttia i humor* (1928) in Zhytomyr.

Perets' (Pepper)

In addition, most general literary magazines and newspapers contained satire of political and everyday life – *Znannia* (1923–35), *Sil's'kohospodars'kyi proletar* (1921–7), *Selianka Ukraïny* (1924–31), *Vsesvit* (1925–34), *Uzh* (1928–9), and especially *Bezvirnyk* (1925–35), in which satirists turned their attention to the war on religion. The satirical semimonthly *\*Chervonyi perets'* resumed publication in Kiev in 1927. In 1933, however, many of its collaborators were persecuted, and humor magazines in general fell victim to Stalinist repression. *\*Perets'*, which succeeded *Chervonyi perets'*, benefited from a temporary relaxation of censorship in 1944–5 (in the 1940s a special edition of the magazine was published for Western Ukraine), only to be severely criticized in the following year. It was even the subject of special criticism by the CC CP(B)U. Since 1953, official directives have decreed that a 'critical' course be strengthened in the entire USSR. As a result the humorous sections of newspapers and some journals (eg, the illustrated *Ukraïna*) have been expanded. Most of this humor is intended to encourage labor discipline and to combat the adoption of Western styles and habits. Many caricatures and satirical feuilletons are published in factory newspapers, and placards and posters are displayed in special cases in city streets. The most noteworthy contemporary caricaturists include V. Lytvynenko, O. Koziiurenko, V. Hlyvenko, O. Dovhal, O. Dovzhenko, L. Kaplan, and A. Vasilenko. The style of their caricatures is so similar that it is often difficult to distinguish between these artists. By official decree, satire is now directed against the forces of reaction, manifestations of bourgeois and nationalist ideology, and all things that hinder the construction of communism.

In interwar Galicia, humor magazines contended with prohibitions, confiscations, and financial difficulties; only

Zyz (Cross-eyed)

by frequently changing publishers and names of publications were they able to maintain a continuity in publication before 1924. Early humor magazines of this period were *Budiak*, edited by S. Charnetsky (1921–2); *Gudz*, edited by D. Krenzhlovsky (1922); *Zhalo*, edited by P. Buniak; and *Masky* (1923), edited by M. Holubets. These were succeeded by *Zyz* (1924–33), edited by L. Lepky. The co-operation of E. Kozak ensured the high level of quality of this publication. R. Pashkivsky's *Zhorna* (1933–4) was displaced by E. Kozak's *Komar* (1933–9), which became the training ground for the humorists and caricaturists who worked with him in the emigration. Notable illustrators in the humoristic press of the period were P. Kovzhun (Īzhak), O. Sorokhtei, P. Kholodny Jr, R. Lisovsky, and R. Chornii. Since the Second World War caricaturists such as L. Semchyshyn, V. Tsymbal, M. Levytsky, B. Kriukov, A. Klymko, M. Butovych, M. Dmytrenko, and L. Hutsaliuk also deserve mention. The satire in Galician humor magazines was directed mostly at Bolshevik policies in Soviet Ukraine, although they also satirized Ukrainian cultural and political life under Poland. Humorous material naturally was also published in the general press. The contributors included Tyberii Horobets (S. Charnetsky), Halaktion Chipka (R. Kupchynsky), Lele (L. Lepky), Fed Tryndyk (V. Hirny), Iker (I. Kernytsky), Babai (B. Nyzhankivsky), Teok (T. Kurpita), Andronik (L. Senyshyn), I. Chornobryvy, V. Sofroniv-Levytsky, and Ivan Sorokaty (Yu. Shkrumeliak).

In Transcarpathia and Bukovyna, the following humor magazines were published: *Sova* (1922–3), edited by L. Shutka, in Uzhhorod; *Ku-Ku* (1931–3) in Mukachiv; and *Shchypravka*, *Zhalo* (1926), *Budiak* (1930–1), and *Chortopolokh* (1936–7) in Chernivtsi.

Īzhak (The Hedgehog)

The displaced persons camps of the post-Second World War period were fertile grounds for the development of the humoristic press. Dozens of journals and magazines appeared, although most were short-lived, irregular, and printed on primitive presses. The more important of these émigré publications were T. Kurpita's *Īzhak*, which changed to *Īzhak-Komar* and then *Komar* (Munich, 1946–8), and E. Kozak's *\*Lys Mykyta*, which is still published in the United States.

Lys Mykyta (Fox Mykyta)

In North America, the humoristic press consisted mostly of short-lived and irregular magazines that were often more popular than the daily political press. In the United States, these included *Osa* (1902–3) in Oliphant, Pennsylvania; *Molot* (1908–12, 1919–23), *Shershen'* (1908–11),

Tochylo (The Grindstone)

*Osa* (1912–13), *Iskra* (1917–20), *Lys Mykyta* (1920–3), *Perets'* (1923–5), *Puhach* (1925), *Smikh i pravda* (1926–8), *Boievi zharty* (1936), *Kol'ka* (1936–8), *Oko* (1939), *Mykyta* (1948–56), and E. Berezynsky's *Nove Tochylo*, all in New York; *Osa* (1918–29, 1931), *Batih* (1921), *Lys* (1950), all in Chicago; and E. Kozak's *Lys Mykyta*, published in Detroit since 1951. In Canada, P. Krat published the anti-clerical *Kadylo* (1913) and *Kropylo* (1913–18), and in Winnipeg Ya. Maidanyk published *Vuiko* (1918–27) and S. Doroshchuk published *Tochylo* (1930–47). T. Tomashivsky's *Harapnyk* (1930–5) appeared in Edmonton. Humorous almanacs such as *Humorystychnyi Kaliendar Veselyi druh* (1918–27) and *Humorystychnyi Kaliendar Vuika* (1925–32) also appeared.

In the 1930s in Buenos Aires *Shershen'* and *Batizhok* were published, and Yu. Serediak's *Mitla* appeared from

Mitla (The Broom)

1949 to 1976. In Curitiba, Brazil, *Batizhok* was published as a supplement to the newspaper *Khliborob* (1938–40). In Australia *Perets'* (1950), *Shmata* (1970–1), and *Osa* (1972) were all published, and in London, England, *Osa* appeared from 1961 to 1974.

**Hunczak, Taras** [Hunčak], b 13 March 1932 in Stare Misto, Pidhaisi county, Galicia. Historian. A graduate of Fordham University and the University of Vienna (PhD 1960), since 1960 he has taught history at Rutgers University. He has edited and contributed to *Russian Imperialism from Ivan the Great to the Revolution* (1974) and *The Ukraine, 1917–1922: A Study in Revolution* (1977), and edited or coedited several collections of documents on Ukrainian history and the struggle for Ukrainian independence, including *Symon Petliura: statti, lysty, dokumenty* (Symon Petliura: Articles, Letters, Documents, vol 2, 1979), *Ukrains'ka suspil'no-politychna dumka v 20 stolitti: Dokumenty i materiialy* (Ukrainian Social-Political Thought in the 20th Century: Documents and Materials, 3 vols, 1983), *Ukraina i Pol'shcha v dokumentakh, 1918–1922* (Ukraine and Poland in Documents: 1918–1922, 2 vols, 1984), *The Ukrainian Revolution: Documents, 1919–1921* (1984), and 'UPA v svitli nimetskykh dokumentiv' (The UPA in Light of German Documents, in *Litopys Ukrains'koï Povstans'koï Armii*, vols 6–7, 1983). Since 1984 he has been the editor of the monthly *Suchasnist'*.

**Hundiak, Marko** [Hundjak] (secular name: Ivan), b 7 July 1895 in Pluhiv, Zolochiv county, Galicia, d 5 August 1984 in Carteret, New Jersey. Archbishop of the Ukrainian Orthodox Church in the United States. In 1913 he emigrated to the United States and studied theology at the Catholic College in Chicago. Having been ordained by Bishop N. Budka in 1919 he served in several parishes. In 1930 he went over to the Orthodox church and two years later became pastor in Carteret. In 1970 he was consecrated bishop, and in 1973 promoted to archbishop and vicar to Metropolitan Mstyslav. Besides doing pastoral and missionary work in the church, he was active in local civic affairs and coedited *Narodna volia* (1947–8).

**Hunenکو, Alexander**, b 5 March 1937 in Romanivka, Poltava raion. Sculptor and educator. Immigrating to the United States in 1950 from Germany, he graduated from the Minneapolis College of Art and Design (BFA 1961) and the Yale University School of Art and Architecture (MFA 1963). In 1966–8 he attended the American Academy in Rome and taught at several universities, including Yale. Hunenko's early sculptures were massive and often shapeless abstract forms. Eventually, his art evolved

Alexander Hunenko: *Hadunca* (University of Colorado, Main Campus)

toward dynamic geometrized forms. The names of his works – *Hadunca*, *Bohunha*, *Taspor Alema*, *Poliksana*, etc – are his own fanciful inventions. He regards his art as 'public' and useful. His purpose is to humanize the barren cityscapes. His sculptures have been exhibited at numerous group and one-man shows, and have been acquired by the Walker Art Center in Minneapolis, the Minneapolis Institute of Arts, the Ukrainian Institute of Modern Art in Chicago, and numerous college and private collections.

**Hungarian loan words.** Terms borrowed by Ukrainian from the Hungarian language – a member of the Finno-Ugric linguistic group of the Uralic language family. The Hungarians appeared in east Slavic territories between 884 and 898, but no Hungarian loan words from this period have been preserved in Ukrainian. In the centuries succeeding the Hungarian settlement in the Carpathian Basin and its further expansion into Ukrainian lands south of the Carpathians, many Hungarian terms were absorbed into the language of Transcarpathian Ukrainians, particularly in the 16th century. Some of these loan words entered other, mostly western, dialects of the Ukrainian language, and a few made their way into standard Ukrainian, for example, *gazda* (master, Transcarpathian Ukrainian from the 13th century), *barda*, or *bartka*, or *balta* (axe, from the 13th–14th century), *legin'* (young man), *ganč* or *gandža* (flaw), *čyžmy* (boots), *puhar* (large cup, from the 16th century), and the Lviv term *batjar* (hooligan, from the 18th century) from the Hungarian *betyár*. Some Hungarian loan words may have come into literary Ukrainian recently and independently of Transcarpathian dialects; for example, *husar* (huszár, in Transcarpathian Ukrainian from the 15th century), *čardaš* (czardás), *papryka* (red pepper), *hajduk* (rebel, 19th century), and *guljaš* (goulash). However, most Hungarian loan words never spread beyond the Transcarpathian, mainly southwestern, dialects; for example, *marha* (property, livestock), *arsag* (state, state road), *varoš* (city), *katuna* (warrior), *bytjukh* (illness), *šuha* (never, adopted

not later than the 13th century), *baršun* (velvet, 14th century), *kelčyx* (food, expenses, 15th century), *papuči* (slippers), *garadyči* (steps, 16th century), *pryšš* (winepress, 17th century), *galyba* (disorder, scandal, 18th century), and *krumpli* (potatoes, 19th century). These terms are now gradually disappearing from the dialects.

**Hungarians** (Ukrainian: *madiary*, *uhortsy*). A Finno-Ugric people known ethnically as Magyars. They constitute the basic population of \*Hungary (96 percent of 10.7 million in 1985) and minority populations in Rumania (8 percent in 1983), Yugoslavia (2 percent in 1981), Czechoslovakia (4 percent in 1980), Ukraine, Austria, and other Western countries, for a total of 14.4 million worldwide. Most Hungarians are Catholic (68 percent, of which 3 percent are Byzantine Catholic) or Protestant (25 percent, mostly Calvinist).

The Magyars migrated to the steppe regions of contemporary Ukraine as vassals of the Khazars from their ancestral homeland between the Volga River and the Ural Mountains. In the late 9th century they briefly formed a federation of seven tribes (Etelköz) in the interstice of the Boh, Dniester, Prut, and Seret rivers before being driven westward by the Pechenegs and Volga Bulgars across the Carpathian Mountains. Led by Árpád, they destroyed the Moravian Empire in 906 and occupied Pannonia, where they subdued and assimilated the local Slavic population. Their first king, Stephen (997–1038), converted them to Christianity and laid the foundations for the strong, centralized state of Hungary, to which the Ukrainian lands of \*Transcarpathia belonged until the 20th century.

Of the Hungarians in Soviet Ukraine today (164,400 in 1979), most (158,400) live in \*Transcarpathia oblast, where they constitute a substantial minority (13.7 percent, down from 15.6 percent in 1970). They comprise most of the inhabitants of Berehove raion, half of the population of Vynohradiv raion, sizable groups in Uzhhorod and Mukachiv raions, and smaller groups in Tia-chiv, Khust, and Rakhiv raions. Most Hungarians in Ukraine (96.7 percent in 1979) have retained their mother tongue as their first language. In 1970 only 34 percent of Hungarians in Ukraine were urban dwellers.

Hungarian linguistic, social, and cultural influence in Transcarpathia spanned several centuries. Consequently many Ukrainians there, mainly urban dwellers and the intelligentsia, became Magyarized. The reverse process occurred only very rarely. Surprisingly, however, despite the forced Magyarization of names in the 19th and 20th centuries, many Hungarians have Ukrainian surnames, and Slavic loan words, including Ukrainian ones,

exist in the Hungarian language. The oldest borrowings are terms of social organization – eg, *király* (Ukrainian: *korol*, 'king'), *ispán* (*pan*, 'lord, leader'), *szabad* (*svobodnyi*, 'free'), *család* (*cheliad*, 'family'), *szolga* (*sluha*, 'servant'); and church words – eg, *barát* (*brat*, 'brother, friar'), *kereszt* (*khrest*, 'cross'), *szombat* (*subota*, 'Saturday'). \*Hungarian loan words have also entered the Ukrainian language. Both the Hungarians and Ukrainians in their common borderlands have influenced each other's folkways, folklore, and folk culture.

The Hungarians of Transcarpathia oblast benefit from fairly broad minority rights in education, the mass media, and publishing. Two Hungarian-language oblast newspapers – *Kárpáti igaz szó* and *Kárpátontuli Ifjúság* – and a raion newspaper in Berehove – *Vörös Zászló* – are published there. In the 1970s, there were 15 secondary and 125 elementary schools in the oblast with Hungarian as the language of instruction. Plays are performed in Hungarian in Berehove, and there is a Hungarian language section in the philological faculty of Uzhhorod University. The Karpaty publishing house issues books in Hungarian for local schools and exports calendars and translations of Ukrainian literature to Hungary.

V. Markus

**Hungary** (Magyarország). A landlocked country in the Danube Basin of Eastern Europe sharing a common border with Soviet Ukraine of 105 km. Its capital is Budapest. Until its partition in 1920 so-called greater Hungary had an area of 325,400 square km and a population of over 21 million consisting of \*Hungarians and several other nationalities, including the Ukrainians of \*Transcarpathia. The Hungarian People's Republic (est 1946) is a Soviet-bloc country with an area of 93,000 sq km. Its population in 1985 was over 10.6 million.

**Relations with Ukraine.** During their migration westward to the lands they now inhabit, the ancient Hungarians (Magyars) came into contact with the Ukrainian tribes of Kievan Rus' and even passed through Kiev in the late 9th century. Hungarian warriors are known to have served in the retinues of various Rus' princes. After Grand Prince Volodymyr the Great of Kiev died in 1015, King Stephen I of Hungary extended his realm to Transcarpathia. The generally amicable political and economic relations between mediæval Hungary and the Kievan state were strengthened by dynastic ties. Volodymyr the Great's daughter Premyslava married Stephen's cousin and rival, Duke Vászoly. From 1034 to 1046 two of Vászoly's sons lived in exile in Kiev; one of them, later King Andrew I, married Anastasiia-Agmunda, the daughter of Grand Prince Yaroslav the Wise. During the reigns of Andrew (1046–60) and his son Salomon (1063–74), Rus' influence at the Hungarian royal court and in Hungarian cultural and religious life (particularly in spreading Byzantine Christianity) grew. Grand Prince Sviatopolk Iziaslavych's daughter Predslava married Duke Álmos in 1104. Yevfimiia, the daughter of Grand Prince Volodymyr Monomakh, married King \*Kálmán I (1095–1116) in 1112. Suspecting her of adultery, Kálmán banished Yevfimiia to Kiev, where in 1113 she gave birth to a son, Borys, whom Kálmán refused to recognize as his. From 1131 until his death in battle in 1155, Borys was a pretender to the Hungarian throne. His last opponent, King Géza II, married Yevfrosyniia, the daughter of Grand Prince Mstyslav I Volodymyrovych, in 1145.

The Galician princes of Rus' initially had good relations with Hungary, but they were eventually forced to confront Hungary's intrusion into the internecine wars of Rus' and its encroachment into their lands. In 1099 the Rostyslavych princes defeated Kálmán's army at the Vihor River near Peremyshl, and in 1151 Prince Volodymyrko Volodarevych routed the Hungarian troops supporting his enemy, Grand Prince Iziaslav Mstyslavych, at Dorohobuzh. In 1188 King Béla III (1172–96) seized Halych and declared himself king of Galicia, but in the ensuing conflict he was forced to withdraw in 1190. Prince Roman Mstyslavych was supported by the future King Andrew II (1205–35) in his efforts to consolidate his rule in Halych and Volodymyr-Volynskiy principalities. In 1205 Roman's widow Anna turned to Andrew for help in securing the united principality for her young sons Danylo and Vasylo from the intervening Novhorod-Siverskyi princes. Andrew, however, proclaimed himself 'king of Galicia and Lodomeria,' although he did give Anna and Danylo refuge at his court. In 1211 Andrew's forces helped the Galician boyars defeat the Novhorod-Siverskyi princes Roman, Sviatoslav, and Volodymyr Ihorevych. In 1215 Andrew's son Kálmán II was crowned king of Galicia on the basis of an agreement to partition Galicia between Andrew and Prince Leszko of Cracow in Spiš in 1214; he ruled there with great opposition and difficulty until being driven out by Prince Mstyslav Mstyslavych in 1219 and again in 1221.

In 1225 Andrew's son Andrew married Mstyslav's daughter Maria and was given Peremyshl. From 1226 the Hungarians again tried to conquer Galicia with the help of pro-Hungarian Galician boyars. Danylo defeated them at Halych in 1230 and 1233, but even after his decisive victory in the Battle of Yaroslav in 1245, the Hungarian kings continued using the title of 'king of Galicia and Lodomeria.' In 1247 King Béla IV made peace with Danylo; his daughter Constance married Danylo's son Lev I, and Danylo helped Béla in his war with Austria. Lev extended his domain into Transcarpathia, and Ukrainian rule in the Mukachiv region lasted for 50 years. Lev's grandchildren Lev II and Andrii Yuriiovych were unsuccessful candidates for the Hungarian throne that Charles Robert ascended in 1308. King Louis the Great (1342–82) helped Poland contend with Lithuania over Galicia; after he became the Polish king in 1370, Galicia was governed by Władysław Opolczyk and Hungarian viceroys until 1387, when it was finally taken over by the Poles.

After the Galician-Volhynian state collapsed in the late 14th century, and particularly after most of Hungary came under Ottoman rule in the 16th century, Hungarian-Ukrainian relations were negligible. It was not until the 17th century that relations were revived between the Cossack Hetman state and the autonomous principality of \*Transylvania; in the latter the Ukrainians of Transcarpathia took part in a number of Hungarian uprisings and wars with Austria.

Hungary's earlier contention for Galicia, its occasional rule there, and its dynastic links with its Ukrainian rulers gave the Habsburgs of Austria, who ruled most of Hungary from 1699, the legal argument for claiming Galicia during the partition of Poland in 1772, and they assumed the title 'Rex Galiciae et Lodomeriae.' Under the Austrian Empire, Ukrainian-Hungarian relations were determined by the dominant and repressive role the Hungarians

played in governing Transcarpathia. The anti-Habsburg Hungarian national movement was also hostile to most other national minorities in the empire and to their aspirations (except those of the Poles), and thus did not arouse much sympathy among the Ukrainian masses. Consequently, during the \*Revolution of 1848–9, Ukrainians (whether as conscripts in the Russian army that intervened in Hungary or as members of the \*National Guard) found themselves in the antirevolutionary, pro-Habsburg camp. The empire's Ukrainians did not benefit from the 1867 Austro-Hungarian Compromise and the creation of the dual monarchy. As Hungarian chauvinistic policies in Transcarpathia and Hungarian-Polish amity grew, even more Ukrainians were drawn into the pro-Habsburg or pro-Russian (see \*Russophiles) camps.

In the 20th century, the presence of Hungarian military forces on Ukrainian soil during the two world wars left memories of severe repression amidst the populace. During the First World War, the anti-Russian, émigré Union for the Liberation of Ukraine propagated the idea of Ukrainian independence in Hungary and won the support of a small number of prominent Hungarians (who did not view Transcarpathia as part of Ukraine). A popular journal, *Ukránia*, was edited and published in Budapest in 1916–17 by H. Strypsky. After the war, in 1919 and 1920, the UNR and Western Ukrainian National Republic (ZUNR) had diplomatic missions in Budapest, headed by M. Halahan and Ya. Biberovych respectively. The ZUNR government had trade relations with Hungary, to which it mainly exported oil, and formally appeared neutral on the question of Transcarpathia while supporting the movement for its inclusion in the Ukrainian state.

During the Communist regime of B. Kun in Hungary (March–August 1919), a newspaper, *Chervona Ukraína*, was published for Ukrainian soldiers in prisoner-of-war and internment camps. The Soviet Russian government attempted to come to the aid of the Hungarian Communists, but its efforts were blocked by the Ukrainian Galician Army, UNR forces, and the anti-Bolshevik uprising led by N. Hryhoriiv. With the demise of the 'Soviet Republic' in Hungary, some of its supporters immigrated to the Soviet Ukraine.

Perhaps because of historical antipathy, very few Ukrainian political émigrés lived in interwar Hungary, despite the anti-Bolshevik sentiments prevailing there. Most Magyarized or pro-Hungarian Transcarpathian intellectuals did, however, and formed their own political organization opposed to Czechoslovak irredentism. Among the Transcarpathian intellectuals active in Hungary in the interwar period were the historian A. \*Hodinka and the Slavists S. \*Bonkáló and H. \*Strypsky.

Since the Second World War there has been a measure of co-operation between Hungarian and Ukrainian émigrés in the West. Gen F. Farkas headed the Council of the Anti-Bolshevik Bloc of Nations, and Hungarian publicists have had their articles published in the Ukrainian émigré press.

**Relations with Soviet Ukraine.** As Nazi Germany's ally, Hungary declared war on the USSR on 23 June 1941 and dispatched an expeditionary force to the Eastern front. A Hungarian occupational authority functioned briefly in southeast Galicia. The main Hungarian forces (two divisions) were annihilated during the Soviet Voronezh offensive in 1943. While retreating through ter-

ritory controlled by the Ukrainian Insurgent Army in April 1944, the Hungarian command entered into a neutrality and aid agreement with the latter.

Between September 1944 and April 1945 Hungary was completely occupied by Soviet armies and forced to surrender. Transcarpathia, which Hungary had taken from Czechoslovakia in 1938–9, was ceded to Soviet Ukraine. Hungary's defeat was sealed in the Paris peace treaties of 10 February 1947, which imposed on it 200 million dollars in reparations payable to the USSR.

Soviet-Hungarian agreements in 1945 and 1948 integrated Hungary's economy with the Soviet Union's, and in 1949 it became a member state of the \*Council for Mutual Economic Assistance. About 30 percent of Hungary's exports go to the USSR. Ukraine imports steam locomotives, communications and medical equipment, textiles, footwear, breeding livestock, and food products from Hungary. Of Soviet exports to Hungary, Ukraine provides almost 100 percent of the iron ore, coke, and coal, 81 percent of the hydroelectric power, 80 percent of the manganese, and 58 percent of the ferrous metals. Ukraine also exports lumber, heavy machinery, and industrial equipment to Hungary. Hydroelectric power is transmitted to Hungary by the Mir system through Mukachiv, and oil and natural gas are transferred via the Druzhba and Bratstvo pipelines. The main railway transit center for Hungarian-Soviet import/export trade is Chop on the Hungarian-Ukrainian-Czechoslovak border. The Danube also serves as a trade conduit.

Official ties of friendship and co-operation have been established between the Hungarian counties and Ukrainian oblasts of Csongrád-Odessa, Zala-Kherson, Baranya-Lviv, Szabolc-Szatmár-Transcarpathia, Bács-Kiskun-Crimea, and Fejer-Voroshylovhrad, and between the cities Szeged-Odessa and Pécs-Lviv.

**Ukrainian-Hungarian cultural relations.** The highlights of these relations outside Transcarpathia include H. Skovoroda's stay in Hungary in 1745–50 and the publication of the first Galician-Ukrainian almanac, *\*Rusalka Dnistrovaia*, in Buda in 1837. Otherwise, cultural contacts were minimal. The Transcarpathian figures Yu. \*Zhatkovych and H. Strypsky began translating Ukrainian literature into Hungarian in the early 20th century, and already before the First World War, works of Hungarian literature (by S. Petőfi, J. Arany, M. Jókai, K. Mikszáth) had been translated into Ukrainian by P. Hrabovsky, M. Cheremshyna, and I. Franko. Works by Hungarian Communist writers about life in Transcarpathia appeared in Soviet Ukraine in the 1920s, including those of M. Zalka, E. Madarász, and B. Illés. In the 1920s and 1930s V. Sosiura and L. Pervomaisky translated Hungarian literary works into Ukrainian; the latter also wrote a cycle of poetry entitled 'Uhors'ka rapsodiia' (Hungarian Rhapsody, 1936).

The creation of a chair of Ukrainian language at Budapest University in 1945 marked the beginning of systematic scholarly and scientific co-operation. Kiev University has established official relations with Debrecen University, and Uzhhorod University with Szeged University and the Nyíregyháza Pedagogical Institute. Academic exchanges and co-operation exist between the AN USSR and the Hungarian Academy of Sciences. G. Rado is a prominent Hungarian specialist in Ukrainian studies and translator of Ukrainian literature. V. Scher has written on Ukrainian literature, and J. Perényi has

written several studies on Transcarpathia's history. The writer S. Weöres has translated many of T. Shevchenko's poems for the 1953 Hungarian edition of the *Kobzar*; and A. Hidas has published several translations of Shevchenko's poems and a selection of M. Kotsiubynsky's stories. Other notable Hungarian translators of Ukrainian literature include E. Grigašsy, Zs. Ráb, and S. Karig. M. Bazhan, D. Pavlychko, I. Drach, V. Korotych, Yu. Shkrobynets, I. Chendei, M. Tomchani, S. Panko, M. Lukash, and others have translated Hungarian literature into Ukrainian. In 1972 the Debrecen journal *Alföld* devoted two of its issues to modern Ukrainian literature.

Since the 1950s Ukrainian and Hungarian singers, choirs, orchestras, bands, and dance, theater, and opera companies have toured each other's country. In 1960 the first Ukrainian Culture Week was celebrated in Budapest, and in 1965 the first Ukrainian culture days were celebrated throughout Hungary. The first Hungarian culture days were celebrated in Ukraine in 1959. A few hundred Hungarian students study each year at Ukrainian postsecondary schools (240 in 1968), but few Ukrainians study in Hungary. Exhibits of Hungarian art are mounted in Ukraine and vice versa, and the Transcarpathian Art Museum in Uzhhorod has a large collection of works by Hungarian painters, particularly M. Munkácsy and S. Hollosi (under whom Yu. Narbut studied).

The Hungarian composer F. Liszt used Ukrainian folk motifs in some of his works, particularly in the symphonic poem *Mazepa*. B. Bartok performed in Odessa and Kharkiv in 1929, collected and arranged Ukrainian folk melodies, and corresponded with F. Kolessa and K. Kvitka.

**Ukrainians in Hungary.** Only a few thousand Ukrainians live in Hungary today (about 3,000 in 1960). They are mainly Ukrainians from Transcarpathia who remained after 1945 and their offspring; they have no organized community life. Ethnographic islands with certain Ukrainian linguistic and cultural traits exist in certain regions of Hungary; they are remnants of now completely assimilated settlements that were still identifiable as ethnically Ukrainian in the 18th and 19th centuries. These settlements were populated by Ukrainians and Slovaks who had fled during the Turkish invasions into the Hungarian lowlands, and by a small number of Transcarpathian participants in the 1848 Revolution. Although they constituted majorities in certain villages, they never constituted more than 4 or 5 percent of the population of any particular county. In 1836–40 there were approx 35,000–40,000 Ukrainians living in Borsod, Abaúj, Zemplén, Szatmár, Bereg, and Makó counties in 21 wholly Ukrainian, 28 Ukrainian-Hungarian, 1 Ukrainian-Hungarian-German, 2 Ukrainian-Slovak, and 2 Ukrainian-Slovak-Hungarian villages. The number of Byzantine-Catholics in these counties was markedly greater than the number of Ukrainians; most likely many of them were assimilated Ukrainians in addition to Byzantine Catholic Hungarians, Serbs, Greeks, and Rumanians. The southernmost settlement of Ukrainians was the city of Makó close to the Rumanian border, which served as a transfer point for Transcarpathians migrating to the \*Bačka region in present-day Yugoslavia.

Hungarian assimilation pressures were intensified from the mid-19th century with the Magyarization of the Byzantine Catholic church after the founding of \*Hajdúdorog eparchy and after the Hungarian Republic was

created in 1918, when the population of the Ukrainian ethnographic islands was completely isolated from their compatriots in Czechoslovak-ruled Transcarpathia and an administration for the Byzantine Catholics of Borsod county was established in Miskolc. The introduction of the use of Hungarian in the liturgy resulted in the almost total assimilation of the remaining Ukrainians in Hungary. Today only the elderly in certain villages still understand Ukrainian. Extant traces of Ukrainian folkways and folklore and the existence of Ukrainian surnames and even certain religious traditions hint at the origin of these people. In the 1960s, E. Bálecki of Budapest University investigated the dialect of the village of Komloska in Abaúj county. In the mid-1970s, Bishop Y. Segedii of Zagreb visited various Ukrainian settlements in Hungary and documented a number of indicators of Ukrainian identity he found there.

V. Markus

**Hunia, Dmytro** [Hunja], b and d ? A leader of the Cossack peasant uprisings against the Polish nobility. In 1637 he took part in P. Pavliuk's rebellion. After its defeat at \*Kumeiky and Borovytsia near Chyhyryn, he and other rebels retreated to the Zaporozhian Sich, where the Cossacks elected Hunia hetman. At the beginning of 1638 his forces routed the Polish expedition of registered Cossacks sent to subdue the Sich. In the spring of 1638 Hunia joined the uprising led by K. Skydan and Ya. \*Ostriany. After its defeat at Zhovny, Ostriany's forces retreated to Slobidska Ukraine. The remaining Cossacks continued the fight under Hunia. In the spring of 1640 Hunia led a campaign of Zaporozhian and Don Cossacks against Turkey. His subsequent fate is unknown.

**Hunkevych, Dmytro** [Hun'kevych], b 30 September 1893 in Lysovychi, Dolyna county, Galicia, d 4 February 1953 in Toronto. Playwright. Hunkevych immigrated to North America in 1909 and eventually settled in Winnipeg, where in his spare time he wrote children's stories and over 20 plays. Most of his plays, especially *Zhertvy temnoty* (Victims of Darkness, 1924) and *Krovavi perly* (Bloodstained Pearls, 1926), deal with social disintegration and the exploitation of immigrants in North America.

**Huns** (also known as Hunni). A nomadic pastoral people renowned for their military prowess who originated in northern China and then migrated to Central Asia. In the 2nd century AD they appeared in the steppes on the northern coast of the Black Sea. In the second half of the 4th century they began a massive migration into Central Europe, initiating the period of the great migrations of peoples into Europe from Asia. In 375 they defeated the \*Goths and the \*Alans and sacked most of the Greek colonies on the Black Sea coast. In the 5th century they moved to Pannonia (an area west of the Danube, now Hungary and northern Yugoslavia), followed by some Goths, Alans, and \*Antes. There, under the leadership of Attila, the Huns reached the height of their power. Attila's domain stretched from the Volga to the Rhine and the northern shores of the Black Sea, known as Pontic Scythia. After Attila's death in 453, the Hun kingdom quickly disintegrated. Some of the tribes returned to the northern shores of the Azov Sea, where they were known by various names until the 6th century.

**Hunter, Alexander Jardine**, b 1868 in Leith, Ontario, d 25 August 1940 in Teulon, Manitoba. Medical doctor and missionary. Educated at the University of Toronto, in 1902 Hunter was sent as a medical missionary to Teulon, Manitoba, by the Presbyterian Board of Home Missions. Until his retirement in 1927, he served among Ukrainian immigrants in the Interlake district. Concerned with converting Ukrainians to Protestantism, Hunter grew to respect Ukrainian culture, acquired fluency in Ukrainian, and published a free translation of 23 poems by T. Shevchenko, *The Kobzar of the Ukraine* (1922). Coeditor of *\*Kanadiis'kyi ranok* from its inception in 1920 until his death, Hunter also wrote *A Friendly Adventure* (1929), a memoir of his missionary work.

**Hunting.** The taking of wild animals and birds for meat, skins, or fur. Hunting was prevalent in Ukraine from the Paleolithic era, and in prehistoric times constituted one of the chief sources, along with fishing, of livelihood for the population. With the development of agriculture, hunting lost much of its economic importance and gradually came to be considered a form of entertainment, acquiring the characteristics of a sport.

During the Princely era, the prince and his retinue hunted big game such as bison, auroch, moose, deer, bear, lynx, wild boar, and tarpan. Hunting was considered entertainment and a kind of military training, but it also had the function of gathering meat and skins. Scenes from the princes' hunts are depicted on the walls of St Sophia Cathedral in Kiev. Small-game hunting had great economic importance, particularly the hunting of martin, ermine, otter, sable, beaver, and other animals that yield expensive fur. Furs were a major export of Kievan Rus'. Hunting was practiced by large segments of the population, including monks. Except for the prince and his retinue, all hunters paid a special hunting tax or *lovche*. Princes and nobles usually hunted on horseback, killing a cornered animal with a bow, spear, sling, ax, or knife. Large animals were also caught in pits and traps (*doly* or *samolovky*), while small fur-bearing animals and birds were caught in snares and nets (*teneta* or *perevisy*), or with trained falcons and hawks. Sometimes dogs were used to corner the animals or chase them into the traps.

Hunting played a particularly important role in the

Bear Hunt; fresco in the north tower of the St Sophia Cathedral in Kiev

economic life of the Zaporozhian Cossacks. However, colonization, deforestation, the increased cultivation of land in central and eastern Ukraine, and the introduction of firearms in the 15th and 16th centuries contributed to a rapid depletion of game fauna. With the drastic reduction of large hoofed animals by the 16th century, hunting for the fur industry, particularly of beaver and otter, remained the only commercially significant form of hunting. The fauna of southern Ukraine, which had been marked by a rich diversity of species, was quickly depleted by the settlement of the steppes in the mid-18th century.

Hunting has been officially regulated from historical times, but early legislation (eg, in *Ruskaia Pravda* of the 11th century, the Lithuanian Statute of the 16th century, and the Code of Laws of 1743) was concerned only with trespassing on hunting property. Laws regulating the methods of hunting and the protection of certain species by the designation of specific hunting season were not enacted until the second half of the 19th century (1892 in Russian-ruled Ukraine and 1875, 1896, and 1909 in Galicia).

In the Ukrainian SSR hunting is under the jurisdiction of the Chief Administration of Game Management, the Ministry of Forest Management of the Ukrainian SSR, and several civic organizations (eg, the Ukrainian Association of Hunters and Fishermen). Before the Second World War, official policy encouraged commercial hunting. Since then, most emphasis has been placed on ensuring an adequate wildlife base for sport hunting. This has included the establishment of \*nature reserves and wildlife refuges, the setting of quotas, the designation of limited hunting seasons, and the destruction of harmful predators. Today, only the hunting of fur-bearing animals is commercially significant (see \*Fur industry). In 1969 the Council of Ministers of the Ukrainian SSR adopted the all-Union 'Decree on Hunting and the Hunting Industry in the Ukrainian SSR' as the basic legislation concerning hunting.

For the most part, hunting has remained the preserve of the privileged circles of Ukrainian society: the gentry and the bourgeoisie before the Revolution, government officials, military officers, and Party members under So-

viet rule. However, illegal hunting or poaching is widespread, perhaps even accounting for the deaths of more animals than legalized hunting. During the Revolution and both world wars, huntable fauna decreased dramatically in population. In Western Ukraine, despite harsh laws restricting hunting, the wildlife population has declined, mostly because of the destruction of forests. In the Carpathian Mountains in particular, the number of deer and wild boar has decreased catastrophically, while the number of predatory animals, such as wolves, has increased.

As a result of human activities, some species have become extinct or have emigrated from Ukraine, while others have become rare and their habitat severely restricted (see \*Fauna). Most of these species are protected by law, and an absolute ban has been imposed on the hunting of bears, beavers, and desmans. In total, 31 mammals are classified as huntable in the Ukrainian SSR, of which 13 have commercial significance. Close to 90 species of birds are also hunted.

The following mammals are hunted on a large scale (figures refer to the approximate annual kill): gray hare (in the 1960s 1 million, and in the 1970s 0.5 million), fox (in the 1960s 100,000, and in the 1970s 20,000–30,000), red deer (250–350), chamois (2,000), and wild boar (2,000). Fur-bearing animals hunted include the muskrat (in the 1960s 85,000, and in the 1970s 20,000–30,000), martin (4,000), and raccoon (until the 1970s 100,000, since then only a few thousand per year). Mink and otter are taken in small numbers. So-called second-class furs, obtained from the destruction of gophers, moles, wolves, and other pests and harmful animals, are also used commercially. Hunted fowl in Ukraine include ducks, snipes, coots, and corncrakes.

In order to increase the game population in Ukraine, several species have been acclimatized or reacclimatized (the muskrat, raccoon, spotted deer, mountain sheep, beaver, white hare, sable, pheasant, rock partridge). However, the breeding of exotic animals in the wild disrupts the biocenotic balance of endemic fauna, and in some instances raises the possibility of bastardization. In some cases, acclimatized species (eg, the raccoon and the muskrat) are pests.

The scientific aspects of hunting are studied at the AN USSR Institute of Zoology, the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration and its Carpathian branch, and at chairs of zoology at various institutes of higher education.

Until 1939 there existed a number of hunting associations in Galicia, including Vatra in Stanyslaviv and Tur in Lviv. In Soviet Ukraine, the All-Ukrainian Association of Hunters and Fishermen was established in 1923. It existed until the mid-1930s and published the journals *Ukraïns'kyi myslyvets' i rybalka* (1925–32) and *Radians'kyi myslyvets' ta rybalka* (1927–30). In 1947 the Ukrainian Association of Hunters and Fishermen was formed. It has branches at the oblast and raion levels and a membership of over 300,000. Currently, there are no Ukrainian-language hunting magazines. Large collections of hunting trophies, originally collected mainly by nobles, are today found in several museums (particularly the Natural Science Museum of the AN USSR in Lviv).

**Hurby, Battle of.** Engagement fought by the Ukrainian Insurgent Army (UPA) and special NKVD troops on 24 April 1944 near Hurby village, southeast of Dubno in Volhynia. This was the largest battle between the UPA and Soviet forces. In early 1944 the forested region between Dubno and Kremianets became the principal base of the UPA-South, which operated just behind the Soviet 1st Ukrainian Front commanded by Marshal G. Zhukov. On 21 April about 30,000 NKVD Internal Troops under the general command of Maj Gen S. Marchenkov encircled about 5,000 UPA fighters. As the circle tightened, UPA units attempted to break out. By 23 April, after several major skirmishes, the main body of insurgents was surrounded near Hurby. Led by Brig Comm Yasen, the UPA troops had well-prepared defensive positions and were armed with light infantry weapons, heavy machine guns, 120-mm mortars, and light artillery.

The Soviet attack began early on 24 April and continued until late at night. The NKVD rifle brigades were supported by artillery, tanks, and airplanes. During the night UPA units broke through the primary encirclement in several directions and during the next two days came into contact with NKVD blocking units. Wounded insurgents and civilians hiding in the forests were summarily executed by their Soviet captors.

According to NKVD reports the operation involved 26 battles or major skirmishes and captured arms included 1 airplane, 7 artillery pieces, 15 mortars, 47 machine guns, a printing press, 120 wagons with horses, ammunition, and food supplies. According to UPA estimates Soviet losses were over 800.

P. Sodal

**Hurevych, Borys** [Hurevyč], b 23 February 1937 in Kiev. Middleweight wrestler and Olympic champion. A graduate of the Kiev Institute of Physical Culture (1969), he won the gold medal at the Olympic Games in Mexico City (1968), the world championship (1967, 1969), and the European championship (1967, 1970) in freestyle wrestling. He was champion of Ukraine and the USSR a number of times. Now he trains other wrestlers. Known for his sportsmanship, he was chosen by Ye. Vuchetych as the model for the sculpture *We Shall Beat Our Swords into Ploughshares*, which stands beside the United Nations Building in New York.

**Hurevych, Hryhorii** [Hurevyč, Hryhorij], b 20 September 1898 in Homel, Belorussia, d 6 July 1969 in Kharkiv. Surgeon. A graduate of the Kiev Medical Academy (1920), he headed the surgery department of the Vinnytsia Medical Institute (1934–9) and then worked at the Kharkiv Medical and Stomatological Institute (1950–69). His published works deal with problems of surgical endocrinology, blood transfusion, and general and military field surgery.

**Hurevych, Zinovii** [Hurevyč, Zinovij], b 1898 in Hlukhiv, Sumy oblast. Specialist in social hygiene. A graduate of the Kharkiv Medical Institute (1924), he also taught there. He wrote over 100 works, among them *Koronarna khvoroba* (Coronary Disease, 1963), and coauthored several pioneering studies of sexual behavior, the most significant being *Stateve zhyttia selianky* (The Sexual Life of the Peasant Woman, 1931, with A. Vorozhbyt), *Problemy statevoho zhyttia* (Problems of Sexual Life, 1930, with F. Grosser), and *Suchasne stateve zhyttia* (Contemporary Sexual Life, 1928, with F. Grosser), the German translation of which was reprinted in *Zeitschrift für Sexualwissenschaft*, vol 15, no. 8, 1929.

**Hurhula, Iryna**, b 3 May 1904 in Bolekhiv, Dolyna county, Galicia, d 20 May 1967 in Lviv. Art scholar. A graduate of Lviv University, she joined the staff of the National Museum in Lviv in 1923 and of the Ukrainian State Museum of Crafts (now the Ukrainian State Museum of Ethnography and Crafts) in 1944. For a time she served as director of the latter museum. She is the author of *Narodne mystetstvo zakhidnykh oblastei Ukraïny* (Folk Art of the Western Oblasts of Ukraine, 1966) and the co-author of *Narodni maistry* (Folk Craftsmen, 1959) and *Vbrannia* (Dress, 1961). She did the annotations in O. Kulchytska's *Narodnyi odiah zakhidnykh oblastei URSR* (Folk Costumes of the Western Oblasts of the Ukrainian SSR, 1959) and wrote scholarly and popular articles on Ukrainian folk art, guide books, catalogues, and booklets.

**Hurkevych, Volodymyr** [Hurkevych], 1871–1937. Lawyer and political and cultural leader in the Sambir region. Hurkevych was a member of the chief executive of the Ukrainian Radical party. He was a founder and the first president of the \*Boikivshchyna ethnographic museum in Sambir and the author of articles on the history of the Boiko region.

**Hurko, Bohdan**, b 21 March 1916 in Krakovets, Yavoriv county, Galicia. Mechanical engineer and inventor. He studied engineering in Lviv, in Graz, Austria, and in Louisville, Kentucky. After immigrating to the United States he worked for several appliance companies and from 1957 to 1972 taught at the University of Louisville. He holds 33 us and foreign patents. His patent for a self-cleaning oven is licensed by most appliance manufacturers around the world.

**Hurmuzaki, Eudoxiu**, 1812–74. Rumanian baron, historian, and politician. A Ukrainophobic Rumanian chauvinist, he founded the anti-Ukrainian Party of Patriots in Bukovyna and developed a theory of 'Ukrainianized Rumanians.' He petitioned the Austrian government in 1848–9 to separate Bukovyna from Galicia and unite it with Transylvania. He published and edited the German- and Rumanian-language newspaper *Bucovina* (1848–52) and wrote historical works on Rumania and Bukovyna, including *Fragmente zur Geschichte der Rumänen* (5 vols, 1878–86) and *Slavisierung der Bukowina* (1900). He started the collection of historical documents on the Rumanians known as *Colecția Hurmuzaki* (44 vols, 1874–99), of which he collected 11 volumes. This collection contains some materials on the history of Ukraine.

**Hursky, Jacob** [Hurs'kyj, Jakiv], b 4 November 1923 in Zholdaky, Chernihiv gubernia. Linguist. After the

Second World War he immigrated to the United States and received his PH D from the University of Pennsylvania (1957). He is currently a professor at the University of Syracuse. He is noted for his studies in Ukrainian anthroponymics, specifically on peculiarities of Cossack family names in the 17th century and on the language of 16th-century texts.

**Hursky, Valerian** [Hurs'kyj], b 29 September 1874 in Kharkiv, d 24 November 1934 in Kharkiv. Silviculturist. A graduate of St Petersburg Forestry Institute (1898), he supervised amelioration work in forests in the Kharkiv and Poltava regions (1903–19) where, under his direction, pine stands of about 20,000 ha were planted. From 1921 he headed the Department of Amelioration of the Kharkiv Agricultural and Forestry Institute (now the Kharkiv Agricultural Institute). From 1931 he was an associate of the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration. He has written works on the reforestation of sandy regions and the creation of anti-erosion forestry belts.

**Hurtuimosia** (Let Us Gather). An irregular journal of military and civic affairs, published in Prague from 1929 to 1938. Twenty-four issues appeared, including a special issue dedicated to S. \*Petliura. The journal supported the \*Government-in-exile of the UNR. The editors were V. Fylonovych and M. Bytynsky. Articles and memoirs were contributed by D. Herodot, O. Dotsenko, P. Zlenko, V. Kushch, V. Petriv, V. Salsky, S. Siropolko, P. Shandruk, A. Yakovliv, and others.

**Hurvych, Iryna** [Hurvyč, Iryna], b 17 June 1911 in Letychiv, Podilia gubernia. Film director. After graduating from the Kiev Art Institute in 1934 she worked at the Kiev Artistic Film Studio. From 1940 she worked at the Kiev Popular Science Film Studio, where she began to direct films in 1959. Her films include *Iak zhinky cholovikiv prodavaly* (How Wives Sold Their Husbands, 1972) and *Teplyi khlib* (Warm Bread, 1973).

**Hurn, Ivan**, b 7 May 1905 in Bziv, Pereiaslav county, Poltava gubernia. Folklore collector. A secondary school teacher, he wrote down over 5,000 songs and riddles. He also collected materials on folk customs, handicrafts, dialects, and Czech folklore in the Rivne region. He is the author or compiler of numerous books and articles, including *Slovyk ukrains'kykh rym* (Dictionary of Ukrainian Rhymes, 1979), which he coauthored with A. Buriachok. Many of Hurn's collected materials are deposited at the AN URSR Institute of Fine Arts, Folklore, and Ethnography.

**Hurzhi, Ivan** [Hurzij], b 28 September 1915 in Khudiaky, Cherkasy county, Kiev gubernia, d 31 October 1971 in Kiev. Historian; corresponding member of the AN URSR from 1958. From 1948 he worked at the Institute of History of the AN URSR, as a senior research associate, professor and holder of the chairs of Feudal History (1955–8), and of Historiography and Source Studies (1969–71), and assistant director (1958–71). His works deal with the socioeconomic history of Ukraine in the 18th and 19th centuries. They include *Zarodzhennia robotnychoho klasu Ukraïny (Kinets XVIII-persha polovyna XIX st.)* (The Birth of Ukraine's Working Class [Late 18th–First Half of the 19th Century], 1958), *Rozvytok tovarnoho vyrobnytstva i torhivli*

*na Ukraïni (z kintsia XVIII st. do 1861 r.)* (The Development of Manufacturing and Trade in Ukraine [from the End of the 18th Century to 1861], 1962), and *Ukraïna v systemi vserosiis'koho rynku 60–90-kh rokiv XIX st.* (Ukraine in the All-Russian Market System in the 1860s–1890s, 1968). A bibliography of his works was published in 1965.

Hurzuf

**Hurzuf.** ix-15. Town smt (1978 pop 10,600) located 16 km from Yalta on the southeast coast of the Crimea and administered by the Yalta city soviet. Protected from the north and northeast by the Hurzuf Yaila Plateau, the town is a popular health and tourist resort and a grape-growing center. It was originally a Tatar village. A Byzantine fortress was built there in the 6th century; it was rebuilt in the 14th century by the Genoese (they called their colony Grasui and Gorzanium). The ruins of the fortress, a palace, and park have been preserved.

**Husar, Natalka**, b 22 July 1951 in Newark, New Jersey. Artist. Educated at Rutgers University, Husar has lived in Toronto since 1973. She has completed a number of corporate commissions and participated in several group and individual exhibits in Toronto and Edmonton, including 'The Golden Form' (1977), 'Faces-Facades' (1980), and 'Beyond the Irony Curtain' (1986). Husar works in a variety of mediums – porcelain and plexiglass, acrylics, and clay – and is noted for her satirical portrayals of Ukrainian Canadian life.

**Husaruk, Eugène**, b 2 March 1932 in Warsaw. Violinist, conductor. Coming to Canada in 1949, he studied music at the McGill Conservatory of Music in Montreal, the Vienna Academy, and the Accademia Chigiana of Siena. In 1957 he joined the Montreal Symphony Orchestra (MSO) and in 1968, as MSO soloist, he premiered G. Fiala's *Divertimento Concertanie*. During the 1977–8 and 1979–80 seasons he served as the MSO concertmaster. He played principal violin in the recording of S. Gellman's *Mythos II*, and has appeared as concertmaster with several radio and television orchestras and as a member of a number of prominent Canadian ensembles and chamber orchestras.

Natalka Husar: *Mama's Boy* (acrylic on canvas, 1985)

**Húsek, Jan**, b 17 October 1884 in Ostrožská Nová Ves, Uherske Hradiste county, Bohemia, d 6 December 1973 in Brno. Czech historian, linguist, and ethnographer; specialist on the nationality question in Transcarpathian Ukraine and the Prešov region. In his most important work, *Národopisná hranice mezi Slováky a Karpatorusy* (The Ethnic Boundary between the Slovaks and the Carpatho-Rusyns, 1925), Húsek proved that there were 278 Ukrainian villages and 94,000 Ukrainian inhabitants in the region. His ethnographic chart is still relevant.

**Hushalevych, Ivan** [Hušalevýč], b 4 December 1823, Paushivka, Chortkiv county, Galicia, d 2 June 1903 in Lviv. Priest, publicist, and writer. As a student at the

Ivan Hushalevych

Lviv Greek Catholic seminary, Hushalevych wrote the song 'Myr vam, brattia, vsim prynosym,' which was recognized in 1848 by the Supreme Ruthenian Council in Lviv as the anthem of Galician Ukrainians. After graduating (1849), Hushalevych taught Ukrainian and catechism at the Academic Gymnasium of Lviv, with the exception of a few brief intervals, until his retirement (1889). In 1849 he began publishing *Pchola*, the first Ukrainian literary-scholarly journal in Galicia. From 1850 to 1853 he edited the newspaper *Zoria Halytska*, and in 1863–4 he worked on the educational periodical *Dom i shkola*. By the 1850s he had begun to adopt a Russophile political orientation, which included a rejection of the written Ukrainian language in favor of \*yazychie. Hushalevych was a deputy to the Galician Diet (1861–70), serving as a delegate to the State Council in Vienna (1867–70). In addition to writing poetry, he also wrote dramas for the Ukrainian theater in Galicia, and his operetta *Pidhiriany* (1879), set to music by M. Verbytsky, was popular in Western Ukraine.

**Hushalevych, Yevhen** [Hušalevyč, Jevhen], b 28 November 1864 in Lviv, d 29 May 1907 in Cologne. Opera singer (tenor); the son of I. \*Hushalevych. He studied music at the Vienna Conservatory (1888–91) and performed in the opera theaters of Bratislava, Berlin, Brno, Prague, Budapest, Warsaw, Lviv, and other cities. He played the leading roles in Wagner's *Tannhäuser*, *Lohengrin*, and *The Flying Dutchman*; in G. Meyerbeer's *The Huguenots* and *The Prophet*; in Rossini's *Barber of Seville*; and in Verdi's *Troubadour*. He also gave recitals of works by M. Lysenko and arrangements of Ukrainian folk songs.

**Hushlak, Gerald** [Hušlak], b 15 February 1945 in Edmonton. Artist and educator. A graduate of the Royal College of Art in London, England (MFA), Hushlak has taught painting at the University of Calgary since 1975. His work is found in numerous galleries, including the San Francisco Museum of Modern Art and the Smithsonian Institute in Washington, DC. Winner of the Purchase Award at the 1977 World Print Competition, Hushlak has made major innovations in drawing and printmaking by using computer-controlled drafting machines that permit an exact determination of visual effects to construct drawings.

**Husiak, Dariia** [Husjak, Darija], b 1924. Political prisoner. Husiak was a liaison officer for the central executive of the Organization of Ukrainian Nationalists in the 1940s.

Arrested by the KGB in 1950, she received a 25-year sentence, serving 19 years of her sentence in prison and the remainder in a concentration camp. She was released in 1975.

**Husiatyn** [Husjatyn]. IV-7. Town smt (1978 pop 2,800) and raion center in Ternopil oblast, situated on the west bank of the Zbruch River. It was first mentioned in 1559, the year it was granted the rights of Magdeburg law. Under Austrian rule (1772–1918) a Galician county town, it grew because it was located on the Austrian-Russian border. Eventually it declined, and its population fell from 6,000 in 1910 to 3,000 by 1931. From April to June 1919 the Ukrainian Galician Army (UHA) fought several battles against Bolshevik forces there, and in July the UHA battled the Poles there before it retreated beyond the Zbruch. The architectural monuments include the ruins of a 17th-century castle, St Onuphrius's Church (16th century), a town hall and a synagogue built in the Renaissance style (17th century), and a Bernardine monastery and church (16th century).

**Husli** (aka *husli-psaltyr*). A stringed instrument very similar to a psaltery, widely known among the Slavic nations since ancient times. In Ukraine during the medieval period it consisted of a shallow, harp-shaped box strung with a variable number of strings. It was held horizontally on the lap and played by plucking the strings with bare fingers. Later, it assumed a trapezoidal form, and in the 18th century it was enlarged into an instrument resembling a clavichord. It is still used as a folk instrument.

**Huslysty, Kost** [Huslystyj, Kost'], b 18 September 1902 in Zaporizhia, d 21 February 1973 in Kiev. Historian and ethnographer; from 1969 a corresponding member of the AN URSR. He worked in research institutions in Kharkiv and Kiev (1928–36), at the AN URSR Institute of History, and from 1954 at the Institute of Fine Arts, Folklore, and Ethnography. In the 1960s he played an important role in the revival of Ukrainian ethnography and history. The more important of his works are *Koltyvshchyna* (1947), *Voprosy istorii Ukrainy i etnicheskogo razvitiia ukrainskogo naroda* (Problems in the History of Ukraine and the Ethnic Development of the Ukrainian People, 1963), and *Do pytannia utvorennia ukrains'koi natsii* (On the Question of the Formation of the Ukrainian Nation, 1967).

**Hustynia Chronicle**. A 17th-century chronicle compiled at the \*Hustynia Trinity Monastery. The original is no longer extant, but a copy has been preserved, transcribed in the vernacular by the monk-priest M. Losytsky, at the monastery. Its author and date of compilation have not been established. The historian A. Yershov thought that the work was written between 1623 and 1627 by Z. \*Kopystensky.

The main text of the chronicle is an account of Ukrainian history from the times of Kievan Rus' to 1597. Although much of the information given is based on Polish, Lithuanian, Byzantine, old Rus', and other chronicles, it is also an original history of contemporary conditions in Ukraine, its ties with Russia, the politics of the Lithuanian grand princes, the nobility of Poland and Turkey, and the depredations of the Turks and Tatars. The chronicle ends with chapters on the origin of the Cossacks, the introduction of the Gregorian Calendar, and the

Church Union of \*Berestia. An outstanding monument of 17th-century Ukrainian historiography, its text was published in *Polnoe sobranie russkikh letopisei* (The Complete Collection of Rus' Chronicles, vol 2, 1845). A modern Ukrainian version was published in Kiev in 1985.

Hustynia Trinity Monastery

**Hustynia Trinity Monastery.** A men's monastery founded by the monk Ioasaf before 1612 on the domains of Prince M. Korybut-Vyshnevetsky in Hustynia village in the Poltava region. Its construction was completed by Metropolitan I. Kopynsky and financed by Princess R. Vyshnevetska. In 1636 the monastery burned down and was abandoned. It was rebuilt in 1639 by Hegumen I. Torsky on Metropolitan P. Mohyla's orders. During the rebellion in 1648 it was abandoned by the monks. Hetman B. Khmelnytsky took it under his protection and patronage. Its land endowment was confirmed by his wife's decree of 1655. After another fire in 1671, Hetman I. Samoilovych built a new Trinity Church. Another stone church – the Dormition Church – was added later by Hetman I. Mazepa. In the 17th century the \*Hustynia Chronicle was written at the monastery. Towards the end of the 18th century Hustynia Monastery was one of the richest monasteries in Ukraine. In 1786, however, the Russian government secularized its land, and in 1793 closed it down. It was reopened in 1844. Princess V. Repnina renovated the Dormition Church and buried her father in it. In 1845 T. Shevchenko visited the monastery and painted three watercolors of it. The monastery was closed by Soviet authorities.

**Hutsa, Yurii.** See Venelin, Yurii.

**Hutsailo, Yevhen** [Hucajlo, Jevhen], 1880–1928. Pedagogue, political activist in Bukovyna, a founder of the regional branch of the Ukrainian Social Democratic party. During the First World War he was an active member of the Union for the Liberation of Ukraine and helped organize educational and cultural programs for Ukrainian prisoners of war in Germany. In 1918 he was a coeditor of the Social Democratic paper *Vpered* in Lviv. After the war he immigrated to the Ukrainian SSR and worked in the field of education in Kharkiv.

Liuboslav Hutsaliuk: *City in the Sun* (oil, 1957)

**Hutsaliuk, Liuboslav** [Hucaljuk, Ljuboslav], b 2 April 1923 in Lviv. Painter and graphic artist. He studied art at E. Kozak's studio in Berchtesgaden (1946–9), at the Cooper Union Art School in New York (1949–54), and at the Campanella Academy in Rome. His first important exhibition took place in 1959 in Paris, and was followed by exhibitions in Milan (1959), New York (1962, 1966, 1968), Paris (1963, 1976), and Boston (1973). He is a member of the Audubon Artists, La Société des Artistes Indépendants de Paris, and the Ukrainian Artists' Association in the United States. Hutsaliuk enjoys experimenting with colors. He uses a spatula as well as a brush, and his paintings often look like multicolored mosaics. His style is expressionist, but often contains elements of other styles. Its power is derived chiefly from a rich and well-disciplined palette that combines Ukrainian Eastern dynamism with the mannerism of French painting. Hutsaliuk also does graphic art, mainly book illustrations. His satirical cartoons and caricatures have appeared in the journal *Lys Mykyta* since 1954.

**Hutsalo, Yevhen** [Hucalo, Jevhen], b 14 January 1937 in Staryi Zhyvotiv (today Novozhyvotiv), Illintsi raion, Vinnytsia oblast. A prominent Soviet Ukrainian writer since the 1960s. A graduate of the Nizhen Pedagogical

Yevhen Hutsalo

Institute (1959), he was first published in 1960 and is the author of over 25 novella and short-story collections, several of them for children. They include *Liudy sered liudei* (People among People, 1962), *labluka z osinnoho sadu* (Apples from an Autumn Orchard, 1964), *Olen' Avhust* (The Stag Avhust, 1965), *Proletily koni* (The Horses Flew By, 1966), *Rodynne vohnyshche* (The Family Hearth, 1968), *Poliuvannia z honchym psom* (Hunting with a Hound, 1980), and *Opovidannia z Ternivky* (Stories from Ternivka, 1982). Considered in the 1960s one of the *Shestydesiatnyky* – the postwar generation of writers and cultural activists who rejected Stalinist methods and ideology and pushed for cultural and political liberalization – he subsequently chose the safe life of an official writer over one of opposition to the regime. Hutsalo's works are noted for their detail, lyrical descriptions of nature, psychological portraits, and abundant use of the rural vernacular. He is also the author of a trilogy of novels – *Pozychenyi cholovik* (The Borrowed Man, 1982), *Pryvatne zhyttia fenomena* (The Private Life of a Phenomenon, 1982), and *Parad planet* (Parade of Planets, 1984) – and, since 1981, three poetry collections.

I. Koshelivets

**Hutsul Alps** (Ukrainian: Hutsulski Alpy). A mountain group, also called the Rakhiv Mountains, composing the westernmost part of the \*Maramureş-Bukovynian Upland; it is situated between the Bila Tysa River valley in the north and the Ruskova River valley in the south. Because of their considerable height (over 1,900 m), geological structure (gneiss, crystalline schists, limestones, and pyroclastic deposits), deep valleys, and distinct glacial forms, the Hutsul Alps are the most variegated and picturesque of the Ukrainian Carpathians. Their peaks are pointed and their slopes are steep and rocky. The ridge consists of two mountain groups: (1) Mt Pip Ivan (1,946 m), a massive gneiss pyramid, and (2) Mt Farcau (1,961 m), a conical basalt mountain, and the limestone Mt Mykhailyk (1,920 m). Above the spruce forests covering the mountain slopes lie extensive meadows, scrubs of pine, and rock fields. The population is concentrated in the valleys of the Bila Tysa (Bohdan), Tysa (Rakhiv), and Ruskova (Ruska Poliana and Ruske Kryve) rivers.

**Hutsul Beskyd** (Ukrainian: Hutsulskyi Beskyd). A part of the mountain system of the \*Beskyds situated between the Prut River valley in the west, the Suceava River valley in the southeast, the outer limits of the Carpathians in the northeast, and the Zhabie-Selietyh Depression in the

southwest. It rises steeply from its base (300–400 m) above Subcarpathia, and its peaks attain heights of 800 m at its periphery to 1,500 m in its interior. The Hutsul Beskyd is highest in the southwest, where such peaks as Mt Luchyna (1,464 m), Mt Hordii (1,478 m), Mt Kamenystyi (1,369 m), and Mt Ihrets (1,313 m) are located. Its topography, with its well-defined crests, is similar to that of the neighboring \*Gorgany. As in the other Beskyds, a latticed structure is formed there by longitudinal ridges, which alternate with parallel valleys, and the transverse valleys of the Prut, Cheremosh, Suceava, Pistynka, and Seret rivers. As in other parts of the Carpathians inhabited by the \*Hutsuls, settlements there are scattered and can be found at the highest altitudes. Towns, such as Diliatyn, Pechenizhyn, Pystyn, Kosiv, Kutu, and Vyzhnytsia, are situated in the foothills. Many of the forests have been cleared and replaced by extensive pastures and hayfields, and animal husbandry is the main form of agriculture. Historically the western, Galician, part of the Hutsul Beskyd has been more densely settled and more deforested; in the eastern, Bukovynian, part the erstwhile prevalence of large estates obstructed free colonization. In the Galician part cultivated land constitutes 9 percent, hayfields and pastures 54 percent, and forest 34 percent of the total land area; the population density is 72 per sq km. In the Bukovynian part the respective figures are 8 percent, 26 percent, and 64 percent, and the density is 47 per sq km.

V. Kubijovyč

**Hutsul dialect.** One of the southwestern dialects of the Ukrainian language, related to the \*Boiko dialect, the Middle-Transcarpathian dialects, and particularly the \*Bukovyna-Pokutia dialects. From the 17th century the most archaic dialects found along the Cheremosh River have spread to the upper Tysa River and to Bukovyna, resulting in a narrow belt of Hutsul to Middle-Transcarpathian transitional dialects found along the Ruskova River. The interaction of Hutsul and Dniester dialects in Pokutia gave rise to the Pokutian dialect. According to the chronicles, the Tivertsians (and Ulychians) left their Black Sea settlements in search of lands that were free of nomad raids. They migrated westward into Transylvania and northwestward into Pokutia. On the basis of this statement historians and linguists such as A. Shakhmatov, T. Lehr-Splawiński, and J. Janów claimed that the Hutsuls were the descendants of the above-mentioned Tivertsians who had absorbed a large influx of Rumanians in the 13th–14th centuries. The strong linguistic, particularly lexical, influence of Rumanian on the Hutsul dialect is attributable to the fact that the Ukrainian Slavs inhabited the valleys while the Wallachian herdsman held the mountain meadows of the same region. No scientific evidence exists to support N. Iorga's hypothesis that the Hutsuls are Ukrainianized Rumanians.

The characteristic features of the Hutsul dialect are: (1) *i* from *ē*, *ō* (*n'is*: *nesty*, *nosa* [to carry, nose]); but, along the Cheremosh River also *u*, *ü* from *ō* (*vyn*, *vijn* for *vin* [he]), particularly after labials; (2) the palatalized hushing sibilants (*č'ort* [devil], *š'um* [noise]) and the transformation of the groups *šč*, *ždž* into *š's'*, *ž'ž'* (*š's'o* for *ščo* [what], *dož'ž'ú* for *došču* [rain, gen sing]); (3) the retention of the 'Central European' or semi-soft *l* (*molbokó* [milk]) and of the soft syllable-final *r'* (*pýsar'* [scribe]) or in place of the proto-Slavic *ř* (*ver'x* [top]); (4) the soft articulation

of the groups: *k'y*, *g'y*, *x'y*, *k'e*, *g'e*, *x'e* (*rúk'y* [hands], *sux'é* [dry]); (5) the transformation of 'a (and less frequently the old *ja*) into 'é (*jê*) (*ž'él'* for *žal'* [pity], *pjêk'* for *p'iat'* [five], *jêvir* for *javir* [maple], *bojêty sy*, *bojáty sy* for *bojatysja* [to fear]); (6) the absence of the epenthetic 'l' after labials (*rôbju*, but: *roblbényj* [made]); (7) dorsal articulation of palatized *t'*, *d'* as *k'*, *g'* (*k'ilo* for *tilo* [body], *g'id* for *did* [grandfather]); (8) the coronal (Poltavian) articulation of palatalized dentals *sb*, *zb*, *cb*, *dzb*; (9) the dispalatalization of the word-final *s'*, *z'* (*ces* for *cej* [this], *kriz* for *kriz'* [throughout]) and *c'*, *s'* in suffixes: *-ec*, *-yca*, *-ck'yj*, *-sk'yj* (*xlbópec* [boy]; *mol'bodyca* [young wife]; *pánc-k'yj* [master's]; *xlbópsk'yj* [peasant's]) but in the southwest *-cbk'yj*, *-sbk'yj*; (10) the lowered articulation of the stressed *y* close to *e* (*syen* [son]); the articulation of *e* next to *r* approaches *a* (*trê<sup>a</sup>ba* for *treba* [need]); (11) the absence of lengthened consonants in combinations of the type: *z'pí'e* for *zillja* [herbs]), (12) the articulation of the prefix *vy-* as *vi-* (*vibrau* for *vybrau* [chose]); (13) the clear distinction between the case endings of hard and soft nouns (*zeml'béu* [earth, inst sing] – *rukóu* [hand, inst sing]; *na koný* [horse, loc sing] – *na stol'í* [table, loc sing]; *cého* [this, gen sing] – *tóho* [that, gen sing]; *sýneho* [blue, gen sing] – *dóbroho* [good, gen sing]); (14) the extensive use of *-iü* (*-yü*) in the genitive plural of feminine nouns (*bdž'ól'iü* [of bees], *cér'kviü* [of churches]); (15) the enclitic forms of pronouns: *my*, *ty*, *sy* for *meni* [I, dat sing], *tobi* [you, dat sing], *sobi* [reflexive, dat sing]; *mn'y*, *n'y*, *mjy*, *mi* for *mene* [I, gen sing]; *k'y* for *tebe* [you, gen sing]; *sy* for *sebe* [reflexive, dat sing]; (16) verb forms of the type: *berét* [takes] – *berút* [they take]; *pytájet*, *pytat* [asks] (along the Cheremosh River), *pytájut* [they ask]; *xódyt* [walks] – *xóg'e* for *xodjat'* [they walk]; *berémo*, *berém* (in the east), *beréme* [we take] (in the northwest); the past tense: *xodýü sme*, *-jes*; *xodýlby smo* (in the east: *xodýlbym*), *-ste* [I, you walked]; conditional: *xodýü byx* [I would walk]; future tense: *mu xodýty* [I will walk] (less frequently: *búdu xodyty*); *xóg'u* [I walk], *nós'u* [I carry], *výž'u* [I see], *xóz'u* [I walk]; (17) omission of syllables after the stress in the vocative of proper names: *Jul'* for *Jurku*, *Pará!* for *Parasko*. Rumanian loan words are common in the southeast and Hungarian loan words in the west.

O. Horbach

**Hutsul region** (Hutsulshchyna). A region in the southeasternmost part of the Carpathian Mountains of Galicia, Bukovyna, and Transcarpathia (the basins of the upper Prut, upper Suceava, upper Bystrytsia Nadvirnianska, and upper Tysa valleys), inhabited by Ukrainian highlanders called \*Hutsuls. Except for eight settlements in Rumania, the Hutsul region lies within the present-day borders of the Ukrainian SSR.

The earliest studies of the region and its inhabitants were written in the 1790s by B. Hacquet, professor of

Lviv University, and in the first half of the 19th century by I. Vahylevych, Ya. Holovatsky, and such Polish scholars as K. Milewski, K. Wójcicki, A. Bielowski, I. Czerwiński, S. Staszic, and W. Pol. Since the second half of the 19th century much research on the history, dialect, folklore, and ethnography of the region has been produced by Ukrainian (Ya. Holovatsky, I. Franko, V. Hnatiuk, S. Vytvytsky, O. Ohonovsky, F. Vovk, A. Onyshchuk, F. Kolessa, I. Verkhratsky, V. Kobrynsky, I. Krypiakevych, R. Harasymchuk, V. Shukhevych, V. Kubiiovych, O. and A.-H. Horbach, and others), Polish (J. Turczyński, O. Kolberg, A. Kirkor, I. Kopernicki, K. Kosiński, and others), Czech (J. Král, D. Krandžalov, J. Podolák), Russian (P. Bogatyrev), German (R. Kaindl), Rumanian (I. Pătruț), and Hungarian (B. Gunda) scholars. The region has also served as the subject or setting of many literary works, notably those by Yu. Fedkovych, H. Khotkevych, Lesia Ukrainka, V. Stefanyk, M. Chermshyna, M. Kotsiubynsky, O. Kobylianska, P. Shekeryk-Donykiv, M. Lomatsky, U. Samchuk, V. Grendzhdonsky, J. Korzeniowski, S. Vincenz, and Z. Kudejar.

In the southeast the Hutsul region borders on ethnic Rumanian lands; in the west, on the region of the \*Boikos; in the north, on the region of the Subcarpathian \*Pidhiriany; and in the southwest, on long-cultivated Transcarpathian Ukrainian lands. The inhabitants of the villages of Ruska Poliana, Kryve, and Ruskova in the Ruskova Valley of the Maramureș region in Rumania and Kobyletska Poliana, Velykyi Bychkiv, Rosishka, Luh, and Verkhnie Vodiane (formerly Vyshnia Apsa) in Transcarpathia oblast display some Hutsul linguistic and ethnographic features. The accompanying table shows the area and population of the region in 1939 excluding these villages.

The region is located in the most elevated and picturesque part of the Ukrainian Carpathians: (from the northeast to the southwest) (1) the \*Hutsul Beskyd and part of the adjacent \*Gorgany; (2) the \*Zhabie-Selietyń Depression; (3) the high \*Svydivets and \*Chornohora and lower Kukul, Krynta, and Liudova Baba mountain groups of the \*Polonynian Beskyd; and (4) the \*Maramureș-Bukovynian Upland, which includes the \*Hutsul Alps and the \*Chyvchyn Mountains. The gently sloping mountains are densely populated, and the land there is cultivated to a considerable height owing to the moderating climatic influence of the Black Sea and the massiveness of the ranges, which make summers in the region warmer than in other parts of the Carpathians. Highland pastures (*polonyny*) are widespread, and herding, particularly of sheep, has traditionally been widely practiced.

In 1939 the population of the Hutsul region consisted of Ukrainians (89 percent), Jews (7.5 percent), Poles (in Galicia, 2 percent), Rumanians (in Bukovyna, 0.5 percent), and Czechs (in Transcarpathia, 1 percent). Ar-

The Hutsul region in 1939

	No. of communities	Area (sq km)	Population	No. of Ukrainians
In Galicia	44	2,900	94,000	87,000
In Bukovyna	28	2,200	45,000	37,000
In Transcarpathia	8	1,400	36,000	32,000
Total	80	6,500	175,000	156,000

menians, who at one time played an important economic role in the region, Germans, Hungarians, and Gypsies accounted for a tiny fraction of the population; the latter concentrated in the small towns and the resort centers of the Prut Valley and disappeared almost completely by the end of the Second World War. Ninety-five percent of the population is rural, and only the small towns of Verkhovyna (formerly Zhabie), Rakhiv, Yasinia, Putylyv, Vorokhta, and Yaremche lie within the region proper; the last two are important resort centers in the Prut Valley. The average population density is 27 per sq km. The most densely populated (70 per sq km) are the Zhabie-Selietyyn Depression and most of the Hutsul Beskyd, where lumbering has left only a third of the area forested. The Galician part of the region is more densely populated than the Bukovynian or Transcarpathian parts, where the earlier existence of large latifundia impeded free settlement.

Herding and animal husbandry, traditionally the chief occupations in the Hutsul region, have determined the forms and uniqueness of the settlements that have existed there. These have been characterized by their dispersal, high altitude (1,100–1,600 m and, in the case of Hostovets, 1,700 m), transhumant (groups of remote herdsman's huts [*stai*] and corrals in the *polonyny*) and seasonal (*zymivoky*, *litovyshcha*) nature, and ongoing trans-

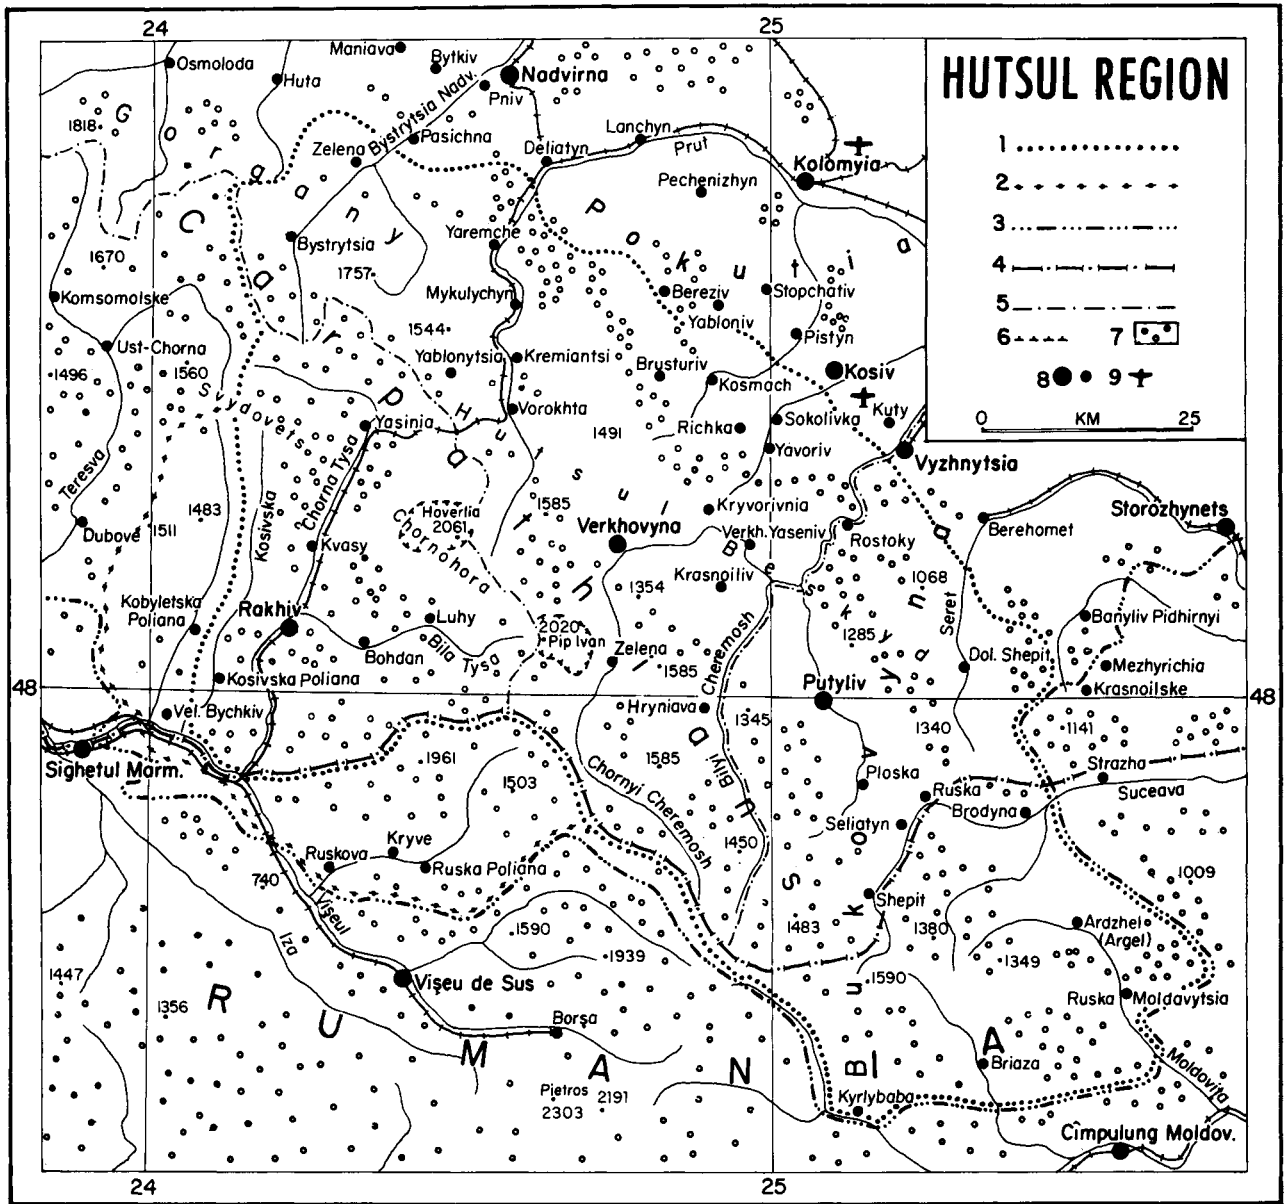

Hutsul ceramic oven

formation from temporary pastoral colonies into permanent settlements (particularly in the Galician part).

Crop cultivation has been practically non-existent in the region: farmland accounts for barely 4 percent of the total area (it constitutes 25 percent in the Boiko region and 35 percent in the Lemko region), while mountain meadows and hayfields account for 33 percent and forest for 59 percent. For centuries the inhabitants exchanged meat, dairy products, and wool for grain from Pokutia and the Maramureş region. Beekeeping, hunting, trap-

ping, fishing, salt mining, and domestic crafts – wood-working, weaving, furriery, tanning, and handicrafts – were auxiliary occupations. Commerce was conducted primarily by Armenians and Jews in the piedmont towns. In the second half of the 19th century the region’s economy declined because of its remoteness from railway lines, the redistribution of land and impoverishment of the peasantry, and the latter’s inability to compete with factories in producing and selling goods. Eventually, seasonal logging work, often outside the region, became the chief occupation of most Hutsuls. Crop cultivation, primarily of potatoes, corn, barley, and flax but also of oats

and rye, remained primitive. The development of resorts, mostly in the Prut Valley but also in the Tysa Valley, was of little benefit to the indigenous population. Large-scale handicraft enterprises, such as the Hutsulske Mystetstvo co-operative in Kosiv, only began developing in the interwar period. The Transcarpathian part of the region enjoyed the quickest rate of economic development under the Czechoslovak Republic, while the Bukovynian part completely stagnated under interwar Rumania. Since the Second World War the primary industries of the Hutsul region have continued to be animal husbandry, lumbering, and wood processing, and health-

resort services and artistic-handicrafts manufacturing have remained the main secondary industries.

V. Kubijovyč, N. Pavliuc

**Hutsul Song and Dance Ensemble** (Hutsul'skyi ansambl pisni i tantsiv). An ensemble founded in 1940 in Stanyslaviv (now Ivano-Frankivske) consisting of a choir, dance troupe, and an orchestra of folk instruments. The ensemble performs and promotes the study of folk songs and dances of the Hutsul region. It also performs works by various Ukrainian and foreign composers. The ensemble's directors have included M. Hrynyshyn and V. Derevianko (1970-).

Hutsul Theater; H. Khotkevych is in the center.

**Hutsul Theater** (Hutsul'skyi teatr). Amateur drama group of Hutsul peasants, organized in 1910 by H. \*Khotkevych at the Sich Home in Krasnoilia, Kosiv county. In 1911-12 the group, which had 40 members (including L. \*Kurbas) and an orchestra of Hutsul folk musicians, toured the villages and towns of Galicia and Bukovyna. It also performed in Lviv, Cracow, and Chernivtsi. Its repertoire included ethnographic plays written by Khotkevych: *Hutsul's'kyi rik* (The Hutsul Year) and *Neproste* (Non-Simple); *Dobush*, a dramatization of the legend about the folk hero; *Praktykovanyi zhovnir* (The Experienced Soldier); and *Antin Revizorchuk*, a reworking of J. Korzeniowski's *Karpaccy górals* (Carpathian Highlanders). In 1913-14 Khotkevych tried to organize a tour of Russian-ruled Ukraine for the group but military events stopped it and the ensemble dissolved. For most of its existence the Hutsul Theater was directed by O. Remez.

**Hutsuls** (Ukrainian: *hutsuly*). An ethnographic group of Ukrainian pastoral highlanders inhabiting the \*Hutsul region in the Carpathian Mountains. According to K. Milewski and J. Korzeniowski, the name *hutsul* was originally *kochul* ('nomad,' cf literary Ukrainian *kochovyk*), which became *kotsul* and then *hotsul*, and referred to inhabitants of Rus' who fled from the Mongol invasion

into the Carpathians. Other scholars (eg, I. Vahylevych) believed that the name derives from a subtribe of the Cumans or Pechenegs – the ancient Turkic Utsians or Uzians – who fled from the Mongols into the mountains. S. Vytvytsky proposed that the name derives from Hetslyo, the brother of Prince Rostislav of Moravia, or from the name of a tribe allied with the Ostrogoths – the Horulians-Hutsians. Since the 19th century the most widely accepted view (held by Ya. Holovatsky, O. Kaluzhniatsky, I. Ohonovsky, I. Krypiakevych, V. Hnatiuk, I. Pătruș, and others) has been that the name comes from the Rumanian word for brigand, *hoțul/hoț*. The Soviet scholar B. Kobylansky claimed that the Hutsuls are descended from the Slavic tribe of the Ulychians who resettled in the Carpathians. Based on the first written mention of the name (1816), S. Hrabec and V. Hrabovetsky believe the name is of recent origin and that it was originally a nickname given to the region's inhabitants by the neighboring Boikos.

Hutsuls on the way to a market in town

Archeological evidence of human existence in the region dates back 100,000 years. Certain localities (eg, Kosiv) were settled as early as the Neolithic Period (6,000-4,000 BC), and the so-called Carpathian kurhans excavated in the late 19th and early 20th centuries in river valleys around Kolomyia and Kosiv revealed distinct evidence of the Dacian and Cherniakhiv cultures. The Slavic \*White Croats inhabited the region in the first millennium AD; with the rise of Kievan Rus', they became vassals of the new state. Place-names in the region's valleys – eg, Kniazhdvir on the Prut River, Kniazhe on the Cheremosh River, Kniazhyi Forest near Bereziv Vyzhnii, and Boiarske Pasture in Zelena – indicate that the region was settled during the period of Kievan Rus' and the Principality of Galicia-Volhynia (9th-13th centuries). References to salt mines in the region ('Kolomyia salt') are found in the Galician-Volhynian Chronicle, and the earliest recorded mention of a settlement there (1367) is that of the salt-mining center of Utoropy. Many other Hutsul settlements and monasteries are mentioned in charters and municipal and land documents beginning in the 15th century: eg, Bereziv (1412), Pystyn (1416), Kosiv (1424), Luh (1439), Pechenizhyn (1443), Kutu (1449),

Hutsul wedding party

Vyzhnytsia (1450), and Pniv (1454). The population grew as increasingly more peasants fled into the mountains to escape serfdom, and by the mid-19th century there were over 100 Hutsul villages and 10 noble-owned towns in the region.

Although the overwhelmingly peasant Hutsuls came to be dominated and oppressed by Polish magnates and Hungarian nobles, a Ukrainian petty nobility arose in Berezhiv. They and their peasant brethren took part in the \*Mukha rebellion against Poland (1490–2), and in 1509 and the 1530s they aided the Moldavians in their wars with the Poles. Local, spontaneous Hutsul peasant rebellions against noble oppression became recurring phenomena. Hutsuls are known to have participated in the Cossack-peasant rebellion led by S. Nalyvaiko, and Hutsul names have been found on the lists of registered Cossacks. Hutsuls also took part in the Cossack-Polish War of 1648–54, most notably in the uprising against the Poles in Pokutia led by S. \*Vysochan in 1654 and the siege of the Polish castle in Pniv. From the mid-16th century to the 1870s bands of brigands called \*opryshoks, which came to play the role of avengers of the wrongs inflicted on the common people by the magnates and their agents, operated freely throughout the Hutsul region.

Under Austrian rule, numerous local Hutsul uprisings against the oppressive landowners continued; the most significant were those led or inspired by L. \*Kobylitsia throughout the 1840s. Since the 19th century, the national awakening of the Hutsuls, like their history in general, has been conditioned by developments in \*Galicia, \*Bukovyna, and \*Transcarpathia, of which the Hutsul region is a part.

Literacy among the Hutsuls remained low until the 20th century; the first elementary school in the region was established only in 1816, in Pechenizhyn. The most significant growth of national consciousness among the Hutsuls occurred after the rise of the popular Ukrainian Radical party in Galicia and Bukovyna in the 1890s and the establishment of branches of the Sich physical-culture society in the Hutsul centers by Yu. Solomiichuk-Yuzenchuk in the 1900s. Many Hutsuls filled the ranks of the Ukrainian Sich Riflemen in 1914–15 and took part in the wars for Ukrainian independence of 1918–20. On 7 January 1919 a Hutsul force drove the Hungarian garrison from Yasinia. With the aid of a company of Sich Riflemen, it occupied Sighet on 14–16 January, and on 5 February a Hutsul Republic was proclaimed in Trans-

Hutsul pottery

carpathia. Its 4-man Ukrainian government and 42-member Hutsul Council were headed by S. \*Klochurak. The republic lasted until 11 June, when Rumanian troops occupied the area.

The Hutsuls are distinguished from other ethnographic groups in the Carpathians by their colorful, richly ornamented folk dress, which today is worn only on festive occasions. Outer garments of both sexes consist of a black or dark red coat (*serdak*), a linen blouse or shirt with multicolored embroidery or glass beads, and a short, sleeveless white sheepskin jacket (*kozhuslyna* or *kyptar*) often ornamented with appliques of leather, embroidery, and string, and mirror inlays. Men wear a broad-rimmed hat (*krysanja*) decorated with colored string and plumes, a sheepskin hat in winter, a long shirt over narrow linen trousers, and a wide (*remin*) or narrow (*cheres*) belt with purses and brass ornamentation over the shirt. Women wear a wraparound skirt (*zapaska* or *horbotka*) and a headband (*namitka*) or colorful kerchief (*khustka*). Footwear consists of leather moccasins laced above the ankle.

The Hutsuls are renowned for their artistic \*wood carving and inlaying of wooden objects with contrasting wood, brass, silver, bone, mother-of-pearl, and glass beads; their ceramics; their handmade jewelry, ornaments, and implements of brass, leather, and bone; their vibrant handwoven textiles and \*kilim weaving; and particularly their embroidery, \*Easter eggs, and distinctive wooden \*folk architecture. The churches in Vorokhta, Kniazhdvir, Kryvorivnia, Yasinia, Zelena, and Verbovets are fine examples of the Hutsul style. The Hutsul farmstead (\*grazhda) is also notable for its features.

There are rich collections of Hutsul handicrafts and folk art in the Ukrainian State Museum of Ethnography and Crafts in Lviv, the Chernivtsi Regional Museum, ethnographic museums in Uzhhorod, Vienna, and Budapest, and particularly the \*Kolomyia Museum of Hutsul Folk Art.

The Hutsuls' rich folklore and folkways and the \*Hutsul dialect have been preserved to this century. They are not only recorded and described in scholarly studies,

Hutsul musicians

but are also depicted in the literary works of Yu. Fedkovych, I. Franko, M. Kotsiubynsky, M. Cheremshyna, H. Khotkevych, O. Kobylanska, and many other writers. The Hutsul folk tradition is rich in songs, many of which valorize the deeds of the opryshoks, particularly O. \*Dovbush, and the Rumanian popular rebel, G. Pinte. The Hutsuls also have distinctive folk music and dances. Their \*kolomyiky and \*troisti muzyky have gained popularity far beyond the Hutsul region. Since parts of the Hutsul region have a mixed Ukrainian-Rumanian population, certain cultural features of the Rumanian and other Balkan peoples are discernible among the Hutsuls. Their instrumental music, for example, is very rhythmic, like that of the Balkan region. The most popular Hutsul folk dances are the fast-paced *hutsulka* and, around Rakhiv, the *trybushanka*.

Hutsul immigrants in the West have established societies in Great Britain, Chicago, Philadelphia, Buffalo, Cleveland, Toronto, Oshawa, and Hamilton, which have occasionally held joint conferences and congresses and in 1985 federated in the Ukrainian World Alliance of Hutsuls. The Chicago Chornohora society has published the journal *Hutsuliia*, edited by M. Domashevsky, who

also directs the Hutsul Research Institute and has published two volumes of a history of the Hutsul region.

**Hutyn Mountains** (Hutynski hory). The southern part of the \*Volcanic Ukrainian Carpathians. Lying south of the Tysa River on the Ukrainian-Rumanian border in Transcarpathia, they close off the Maramureş Basin in the southwest. The mountains constitute a gently sloping, densely forested ridge about 50 km long. Their peaks range from 900 to 1,100 m in altitude.

**Hutyria, Viktor** [Hutyryja], b 11 September 1910 in Syniavske, Don Cossack Province, d 21 October 1983. Petrochemist; full member of the AN URSR from 1961, member of its presidium (1961–3, 1974–), and vice-president (1963–74). After graduating from the Azerbaijan Petroleum Institute in 1932, he worked for 25 years in various capacities at the Azerbaijan Petroleum Research Institute. From 1959 to 1963 he chaired the department of petrochemistry at the academy's Institute of Macromolecular Chemistry, and from 1974 he was in charge of the department of petrochemistry at the academy's Institute of Physical-Organic and Carbon Chemistry. He published much on the petroleum deposits in Azerbaijan and Ukraine, and on the catalytic processes of hydrocarbon transformation. He did research on catalytic petroleum cracking, the synthesis of aluminosilicate catalysts, the synthesis of ethanol from ethylene on an industrial scale, and the composition of the oil from the Baku fields.

**Huz, Oleksander** [Huz'], b 29 January 1939 in Ichnia, Chernihiv oblast. Materials scientist; since 1978 full member of the AN URSR. A graduate of Kiev University (1961), in 1976 he was appointed director of the AN URSR Institute of Mechanics. As a specialist in the mechanics of hard deformative bodies, he has contributed to the theory of stability of composite materials and structural

elements and developed new methods of non-destructive testing of composite materials.

**Huz, Petro** [Huz'], b 7 October 1898 in Liutenka, Hadiache county, Poltava gubernia, d 2 May 1959 in Liutenka. Kobzar. Having lost his sight in early childhood, he learned to play the bandura from M. \*Kravchenko and became an active kobzar after the Revolution, giving concerts in villages and cities throughout Ukraine. In 1940 he joined the State Ethnographic Ensemble of Bandurysts. Besides the traditional kobzar songs, his repertoire included Soviet 'folk' songs, some of which were of his own composition.

**Huzar, Liubomyr**, b 26 February 1933 in Lviv. Hieromonach of the Studite order. Emigrating in 1944, he eventually settled in the United States. After completing his studies at the Catholic University of America in Washington and at the Pontifical Urban University in Rome (1972), he lectured on eastern theology at the latter. A close collaborator of Cardinal Y. Slipy, in 1978 he was appointed archimandrite of St Theodore Monastery in Castelgandolfo, and in 1985 protosyncellus of the Lviv archeparchy.

**Huzar, Olha** (née Pavliukh), b 1885 in Vienna, d ? Feminist leader and journalist in Bukovyna. She was vice-president (1921–3) and president (1930–2) of the Womens' Hromada society and president of the Myronosytsi social-aid society. In the 1930s she contributed to journals such as *Ridnyi kraj* and *Literaturno-naukovyi vistnyk*, and edited a women's page in *Chas* (1934–6). She also translated German and French literature. In 1942 she was sentenced by a Rumanian court to five years' imprisonment for her community activities. In 1945 she was imprisoned in Chernivtsi by the Soviets and disappeared without trace.

**Huzar, Yevhen**, 1854–1918. Galician church and community leader, writer. Huzar was a catechist and educator who organized Ukrainian domestic workers in Lviv. He wrote textbooks on such topics as hagiography and church history.

**Huzhova, Vira** [Hužova], b 18 January 1898 in Kiev, d 6 December 1974 in Kiev. Opera and concert singer (soprano). A graduate of the Kiev Conservatory (1919), from 1924 to 1950 she was a soloist with Kiev, Kharkiv, Baku, Tbilisi, and Odessa operas. Her repertoire of nearly 40 roles included Odarka in S. Hulak-Artemovskyy's *Zaporozhets za Dunaiem* (Zaporozhian Cossack beyond the Danube), Yaroslavna in A. Borodin's *Prince Igor*, Tatiana in P. Tchaikovsky's *Eugene Onegin*, Hanna in H. Zhukovsky's *Mest*, and the title roles in Verdi's *Aida* and Puccini's *Tosca*. From 1950 to 1961 she also taught at the Kiev Conservatory. Her memoirs were published in 1971.

**Hvozdyk, Kyrylo**, b 22 June 1895 in Rebedailivka, Chyhyryn county, Kiev gubernia. Easel painter and monumentalist. In the 1920s he studied under M. \*Boichuk at the Kiev State Art Institute and belonged to the Association of Revolutionary Art of Ukraine. He took part in painting the murals of the Peasant Sanatorium in Odessa (1928). He also depicted some scenes of peasant life such as *The Shepherd* (1928), *Radio in the Village* (1929), *Harvest*

*Festival*, and *The Police Search*. In the 1930s he was arrested and exiled.

**Hydrobiology, Institute of the Academy of Sciences of the Ukrainian SSR.** See Institute of Hydrobiology of the Academy of Sciences of the Ukrainian SSR.

**Hydrology.** Study of the distribution, properties, and circulation of the earth's waters. In practice it is limited to inland waters – rivers and streams, lakes, marshes, groundwater, and snow. The discovery, use, management, and conservation of water resources are all in the province of hydrology. Because of their economic importance, a substantial amount of government-sponsored research on Ukraine's inland waters was done in the 19th century. This work resulted in a number of significant publications such as *Gidrografia Rossii* (Hydrography of Russia, 6 vols, 1844–9), which contains much material on Ukraine, and M. Maksymovych's *Dnepr i ego bassein* (The Dnieper and Its Basin, 1901).

In the 1920s, as the hydroelectric potential and the economic importance of water resources increased sharply, hydrologic research in Ukraine expanded. In 1922 a chair of hydrology was established at the Kiev Polytechnical Institute, which in 1926 was reorganized into the Scientific Research Institute of Water Resources of Ukraine. The institute was directed by Ye. Oppokiv and published its *Visti* in Ukrainian. In 1934 it was incorporated into the All-Ukrainian Academy of Sciences and subjected to several reorganizations: in 1938 it became the Institute of Hydrology, in 1944 the Institute of Hydrology and Hydrotechnology (with a Russian-language *Izvestiia*), and in 1963 the Institute of Hydromechanics. The institute's journal, *Hidromekhanika*, appeared in Ukrainian in the 1960s, and now appears in Russian as *Gidromekhanika*. The institute has made significant contributions to the theory and application of hydrology in developing, controlling, and preserving the water resources of Ukraine. Other institutions where significant hydrologic research is carried out are the Marine Hydrophysical Institute of the AN URSR, the Institute of Hydrobiology of the AN URSR, the Ukrainian Hydrometeorological Scientific Research Institute (established in 1953 on the basis of the Kiev Hydrological Observatory and the Kiev Hydrophysical Observatory) and its field stations, the Ukrainian Scientific Research Institute of Hydrotechnology and Soil Melioration (established in 1929 in Kiev by the People's Commissariat of Agriculture) with its several field stations, and a number of research groups at higher educational institutions.

O. Bilaniuk

**Hydrometeorology.** See Hydrology.

**Hygiene.** A branch of medicine that deals with the diverse influences of the environment on the health of humans, their life span, and capabilities for work. Hygiene aims to develop methods for preventing and combatting disease. It is especially concerned with the prevention of epidemics and communicable diseases and,

more recently, with health conditions in the workplace and home. It is closely related to other scientific disciplines, particularly physiology, pathology, bacteriology, \*epidemiology, clinical medicine, toxicology, ecology, and demography. The practical application of knowledge gained by the study of hygiene is called \*sanitation. Hygienic research constitutes an important basis for preventive medicine and has important implications for public policy. It can be divided into several categories: communal (dealing with housing conditions), alimentary, personal, social, pediatric, labor, military, and others.

Hygiene is one of the most ancient sciences. During the period of Kievan Rus', the chronicles and other early texts, such as the *Izbornik* of Sviatoslav (11th century), contained many tips for hygiene based on folk knowledge. The level of sanitary culture was quite advanced for those times. Various herbals and self-healing manuals (*lichebnyky, zilnyky, travnyky*), which were common in the Middle Ages, contained advice with regard to drinking water, personal cleanliness, preparation of meals, cleanliness of cooking and eating utensils, care of clothing and bedding, etc. The writings of Princess Yevpraksiia-Zoia (12th century) contain advice on the treatment of various diseases, the airing of rooms, bathing, nutrition, hygienic measures for children, and sexual hygiene. By the 16th and 17th centuries, a number of medical guides with instructions on hygiene were popular. From the 16th century, isolation of the infectious ill was practiced. The first quarantine was established in 1740 near Kiev.

In the 18th century, Ukrainian physicians such as D. Samoilovych, N. Ambodyk-Maksymovych, Ye. Mukhin, and Kh. Barsuk-Moisieiev, as well as Russian physicians such as S. Zybelyn and M. Mudrov, made important contributions to hygiene and to the containment of epidemics in Ukraine. They also popularized the practice of disinfection and vaccination.

The development of the science of hygiene was accompanied by the introduction of legislation concerning sanitary practices. In Russian-ruled Ukraine these included decrees concerning the paving of city streets, the appointment of city controllers of sanitation, and the regulation of sanitary practices in the sale of food. In the 19th century, the frequent cholera outbreaks and other epidemics had a major influence on the development of hygiene. They prompted the reorganization of large cities and considerable advancement in the scientific study of hygiene. By the late 19th century, questions of personal hygiene and preventive medicine became secondary to general societal protection of health. Aspects of hygiene were researched and taught in the medical faculties of Kharkiv and Kiev universities from their establishment in 1805 and 1834 respectively, while separate chairs of hygiene, among the first in all of Europe, were founded at Kiev in 1871 and at Kharkiv in 1873. A major contribution to experimental hygiene was made by V. \*Subbotin, the first professor of hygiene at Kiev University. He also authored a popular textbook on hygiene for students and medical doctors, and established a hygienic laboratory (1875). The first professor of hygiene at Kharkiv was A. Yakoby; he was succeeded by I. Skvortsov.

Beginning in the 1860s many zemstvo physicians did important work in the fields of sanitation and preventive medicine (see \*zemstvo medicine). In the 19th and early 20th centuries hygiene and sanitation were not yet clearly

differentiated. Individual physicians and associations often combined scientific study of hygiene with the development and enforcement of sanitary norms and considerable community involvement in the popularization of health care. In fact, most of the early chairs of hygiene at the universities were officially called chairs of hygiene and medical police or chairs of public health. This facilitated the definition of practical indicators and regulations for public health in the areas of communal health, labor, nutrition, and the like. Hygienists worked in close contact with epidemiologists, bacteriologists, and pathologists such as I. Mechnikov, O. Bezredka, M. Hamalia, D. Zabolotny, T. Minkh, V. Vysokovych, and V. Podvysotsky. Several important contributions to hygiene in this period were made by O. Korchak-Chepurkivsky, a former zemstvo physician who taught hygiene in the medical faculty of Kiev University (after 1921 the Kiev Medical Institute) from 1903 to 1934, and who held leading positions in hygiene at the VUAN from 1921.

The Revolution of 1917 and the succeeding struggle for Ukrainian independence caused a drastic decline in sanitary and hygienic conditions. After the consolidation of Soviet rule in Ukraine, hygiene, along with all other branches of medicine, came under the jurisdiction of the state. The reorganization of existing medical schools in the 1920s, and the establishment of new ones in several cities in the 1930s, greatly furthered the development of hygiene. In 1934-6 entire faculties of sanitation and hygiene were established in a number of medical institutes, with several chairs where various aspects of hygiene were studied and taught. Special attention was given to problems of labor and alimentary hygiene. In this period, important contributions to hygiene were made by O. \*Marzieiev, head of the sanitary-epidemiological administration of the Ukrainian SSR Commissariat of Public Health (1922-35) and professor of hygiene at Kharkiv and Kiev universities. He founded and headed (1931-56) the Ukrainian Institute of Communal Hygiene, which was primarily concerned with problems of housing and living conditions. This institute is now located in Kiev and is called the Scientific Research Institute of General and Communal Hygiene. Research in hygiene is also conducted at a scientific research institute of alimentary hygiene in Kiev and at four scientific research institutes of the hygiene of labor and prophylactic medicine (in Kiev, Kharkiv, Donetsk, and Kryvyi Rih). In the 1920s and 1930s several institutions of the AN URSR conducted research in hygiene, including the chair of hygiene and sanitation held by O. Korchak-Chepurkivsky. Much attention was given to medical statistics, prophylactic medicine, and epidemiology.

In Western Ukraine, the research and teaching of hygiene was limited before 1939. Organizations such as the Prosvita and Vidrozhennia societies did much to encourage hygienic measures, as did numerous physicians. In interwar Galicia, a branch of the Polish State Institute of Hygiene was established in Lviv. Research at this institute focused primarily on problems of bacteriology and epidemiology, as well as issues in communal hygiene.

H. Schultz

**Hykavy, Onufrii** [Hykavyj], b 1885 in Peremyliv, Husiatyn county, Galicia, d 4 May 1945 in Winnipeg. Teacher, journalist, and community leader. Hykavy immigrated to Canada in 1902 and became a Ukrainian bilingual teacher in rural Manitoba (1907–13). In 1910 he published *Zbirnyk baiok* (Collection of Tales), one of the first collections of Ukrainian children's literature in Canada. An editor of the newspaper *\*Kandiis'kyi farmer* (1913–32, 1944–5), his editorials in 1917 were instrumental in the formation of the \*Ukrainian Greek Orthodox Church in Canada.

**Hynylevych, Hryhorii** [Hynylevyč, Hryhorij], b 5 February 1809 in Yavoriv, Galicia, d 30 November 1871 in Peremyshl. Clergyman, writer, and leader of the Greek Catholic church. A member of the church consistory, he was in charge of schools in the Peremyshl eparchy and rector of the Peremyshl Greek Catholic Theological Seminary. In 1848 he headed the Ukrainian delegation to the Slavic Congress in Prague, at which he defended the distinctiveness of the Ukrainian people from the Poles and the Russians. As a deputy to the Galician Diet, he demanded the division of Galicia into Ukrainian and Polish parts and obtained the first government subsidy for a Ukrainian cultural institution – the Ruska Besida theater. The graduates of the Peremyshl seminary dedicated their first almanac, titled *Lirvak z nad Siana* (The Lira Player from the Sian, 1852), to Hynylevych.

**Hynylevych, Yaroslav** [Hynylevyč, Jaroslav], b 9 April 1891 in Shumiach, Turka county, Galicia, d 14 October 1980 in Munich. Physician and civic leader. A graduate of Lviv University (1916), he served as a physician in the Austrian and then in the Ukrainian Galician Army (1918–20). He was Metropolitan A. Sheptytsky's private physician. In 1939 he became professor of medicine at Lviv University and two years later at the Lviv Medical Institute. Emigrating in 1944, he settled in Munich. From 1951 he was president of the Ukrainian Medical-Charitable Service. In 1964 Hynylevych received the title of Knight-Commander of the Order of St Sylvester from Pope Paul VI.

**Hypanis.** The name of both the Boh and the Kuban rivers in the works of such classical authors as Herodotus, Strabo, Dionysius, Ptolemy, Stephanus Byzantinus, and Ovid.

**Hypatian Chronicle.** Compendium of three \*chronicles: Nestor's *\*Povist' vremmenykh lit* (Tale of Bygone Years, ca 1110) with some alterations, particularly at the end of the text, the \*Kiev Chronicle of the 12th century, and the \*Galician-Volhynian Chronicle. The oldest redaction of the compendium, dating back to the early 15th century, was discovered by N. Karamzin at the Hypatian Monastery in Kostroma, Russia. There are two more redactions from the 16th century, the first of which was probably written in Belorussia. The best sources of information about the Hypatian Chronicle are M. \*Hrushevsky's works *Istoriia Ukraïny-Rusy* (The History of Ukraine-Rus', vol 3) and *Istoriia Ukraïns'koi literatury* (History of Ukrainian Literature), and works by A. Shakhmatov, V. Pashuto, D. Chyzhevsky, M. Priselkov, I. Eremin, and N. Bezrehkov. It was published by the Imperial Archeographic Commission as *Ipat'evskaia letopis'* (The Hypatian Chronicle) in *Polnoe sobranie russkikh letopisei* (The Full Collection of Rus' Chronicles, vol 2, 1843), republished in a second edition as *Letopis' po Ipat'skomu spisku* (The Chronicle According to the Hypatian Redaction, 1871), and again republished as part of the second edition of the complete collection under the title *Ipat'evskaia letopis'* (The Hypatian Chronicle, 1908). It was republished incomplete again by A. Shakhmatov in his third edition of the *Polnoe sobranie russkikh letopisei* (vol 2, 1923). After the removal of several north Russian features such as the spelling of *ě* in place of the strong *ь*, the Hypatian Chronicle displays, though unsystematically, several features of Old Ukrainian. Consequently, of all chronicles it is the most important source for studies of Old Ukrainian. Variations between Church Slavonic and Old Ukrainian components in the text were generally motivated by stylistic considerations.

**Hzytsky, Stepan** [Hžyc'kyj], b 14 January 1900 in Ostrivets, Ternopil county, Galicia, d 19 August 1976 in Lviv. Biochemist; from 1951 corresponding member of the AN URSS. A graduate of the Lviv Academy of Veterinary Medicine (1929), he became lecturer in biochemistry at the academy, and in 1951 chairman of the biochemistry department at the Scientific Research Institute of Land Cultivation and Animal Husbandry of the Western Regions of the Ukrainian SSR. In 1960 he was the supervisor of the metabolism laboratory of the Ukrainian Scientific Research Institute of the Physiology and Biochemistry of Farm Animals. He specialized in the treatment of metabolic disorders in farm animals, and proposed a hypothesis on the etiology and pathogenesis of chronic hematuria in cattle.

# I

**Iași** (Jassy). vi-8. The principal city (1977 pop 269,500) in northeastern Rumania and a county center. It was first mentioned in the 11th century as Yaskyi Torh on the Rus' trade route between Kamianets-Podilskiyi and Bilhorod-Dnistrovskiyi. From 1434 Iași was the residence of the Moldavian prince-regent. From 1565 to 1862 it was the capital of Moldavia.

In November 1577, the Cossack otaman I. Pidkova occupied Iași and proclaimed himself hospodar of Moldavia. In 1594, Iași was captured by the Cossack forces of S. Nalyvaiko and H. Loboda. The Battle of \*Cecora in 1620 took place near Iași. Under Moldavia's ruler V. Lupu (1634-53), Iași had close ties with Ukraine. In 1640 professors S. Pochatsky and I. Yevlevych of Kiev College founded an orthodox college there, at which Metropolitan P. Mohyla of Kiev had a complete printing press installed in 1641. In September 1642 a council of Ukrainian, Greek, and Moldavian Orthodox theologians was held in Iași; it ratified Metropolitan Mohyla's confession of the faith. During the Cossack-Polish War, in 1650 the Cossack forces under T. Khmelnytsky and Col D. Nechai occupied Iași. In 1652 Khmelnytsky married Lupu's daughter there and in May 1653, he defeated a Polish-Wallachian-Transylvanian army there. Hetman P. Orlyk lived in Iași towards the end of his life and died there in 1742. A Russian-Turkish peace, confirming Russia's annexation of the lands between the Boh and Dniester rivers and of the Crimea, was signed in Iași in 1791. In November 1918 representatives of the Entente Powers met in Iași to plan a military intervention with the Volunteer Army in Ukraine. The Hetman government sent a delegation headed by I. Korostovets to the talks. From 1928 to 1936 Ukrainian students from Bukovyna and Bessarabia at Iași University had their own club, Hromada. In January 1942, a Rumanian court martial in Iași tried 12 Bukovynians (among them O. Huzar, M. Zybachynsky, and Yu. Furman) for Ukrainian irredentism and sentenced them to terms of hard labor.

A. Zhukovsky

**Ibn-Baṭṭūṭah (Batutah)**, b 24 February 1304 in Tangier, d 1368 in Fès. Arab traveler and merchant. From 1325 to 1353 he visited many countries of Europe, Asia, and Africa, including the southern regions of present-day Ukraine. He left a valuable account of his travels, an English translation of which was published in 1958.

**Ibn-Faḍlān, Ahmad**, b and d ? Arab writer and traveler of the first half of the 10th century. In 921-2, as secretary of the Bagdad caliph's legation, he completed a trip from Bagdad through Bukhara and Khorezm to the Volga Bulgars. Portions of his report on the trip are extant; in them he gives valuable information about the life and beliefs of various tribes then living on the territory of Ukraine and in the Black Sea and Caucasus regions. A.

Kovalivsky's study of Ibn-Faḍlān's account was published in 1956.

**Ibn-Hawqal**, b and d ? Arab geographer, merchant, and traveler of the 10th century. He is the author of a narrative (977), in which he retells the story of the three kinds of Rus' people and gives a description of Kiev. He mentions the rout of the Volga Bulgars and the Khazars by the people of Rus' ca 969, possibly by the Kievan prince, Sviatoslav I Ihorevych.

**Ibn-Khordādhbih**, b ca 820, d ca 912. Geographer and writer of Persian origin. He was the first Arab writer known to have written about the eastern Slavs. He is the author of a narrative (847) in which he mentions the trade routes and the visits of Rus' merchants to Bagdad.

**Ichnia** [Ičnja]. III-13. City (1983 pop 18,000) in the Dnieper Lowland and a raion center in Chernihiv oblast. First mentioned in the early 13th century, in 1648-9 it was a regiment center, and from 1649 to 1781 a company town of Pryluka regiment. Under tsarist rule it played no administrative role. Since the 18th century it has been known for its artistic ceramics. From the 1830s on, a textile industry developed there, and after 1861 it became an important grain-trading center. Today its main industry is food production. A branch of the Pryluka Artistic Wares Factory and a historical museum are located there.

**Ichniansky, Myroslav** [Ičnjans'kyj] (pen name of Ivan Kmeta), b 23 August 1901 in Ichnia, Chernihiv gubernia. Poet, writer, and pastor. His first two collections of poetry, *Arfa* (The Harp, 1925) and *Narodni melodii* (Folk Melodies, 1927), were published in Ukraine. Since emigrating to Canada in 1929 (he moved to the United States in 1940), he has produced several more collections: *Fragmenty* (Fragments, 1929), *Lira emigranta* (An Emigrant's Lyre, 1936), *Chasha zolota* (The Golden Chalice, 1964), *Kryla nad morem* (Wings over the Sea, 1970), *Zahravy ve-chirni* (Evening Sunsets, 1976), and the long poem *Rik dvotysiachnyi* (The Year 2000, 1979). He has also translated British poetry into Ukrainian. One of his prose works, *Huragan* (1936), has been translated into English as *The Hurricane: A Tale of Evangelism in the USSR*, 1939).

**Icon**. An image depicting a holy personage or scene in the stylized Byzantine manner, and venerated in the Eastern Christian churches. The image can be executed in different media; hence, the term 'icon' can be applied to mural paintings, frescoes, or mosaics, tapestries or embroideries, enamels, and low reliefs carved in marble, ivory, or stone or cast in metal. The typical icon, however, is a portable painting on a wooden panel, and it is this form of icon that is discussed here (for other forms see \*Fresco painting, \*Mosaic, and \*Enamel).

**Technique.** The earliest technique of icon painting was encaustic, but the traditional and most common technique is tempera. The paint – an emulsion of mineral pigments (ochers, siennas, umbers, or green earth), egg yolk, and water – is applied with a brush to a panel prepared in a special way. The panel of well-dried linden, birch, poplar, alder, pine, or cypress is 3–4 cm thick. To prevent warping it is reinforced with two hardwood slats inserted in grooves on the reverse side. The face side is slightly hollowed to obtain a concave surface surrounded by a protective border, usually 3 cm wide and scored to provide a better gluing base. It is then covered with canvas, to which several layers of gesso (plaster or powdered alabaster mixed with fish glue) are applied. When an even, smooth surface has been produced, an outline of the painting is traced on it with charcoal or scratched into it with a needle. Gold leaf is fixed to designated areas before painting begins. The paint is applied in successive layers from dark to light tones; then the figures are outlined and, finally, certain areas are highlighted with whitener. After drying, the painting is covered with a special varnish consisting of linseed oil and crystalline resins to protect it from dust and humidity. The varnish imparts depth and richness to the pale tones of tempera but, eventually, becomes dark with dirt. Traditionally cleaned with a vinegar and ammonia solution, the varnish is now treated with chemical solutions that are capable of restoring the original brilliance and depth to the colors.

**History.** With the introduction of Christianity in the 10th century, Byzantine icons and icon painters began to be imported into Ukraine. According to the Primary Chronicle, Volodymyr the Great ordered icons for the Church of the Tithes from Chersonesus. In the following century an indigenous school of icon painting developed in Kiev. By the turn of the century the \*Kievan Cave Monastery Icon Painting Studio could boast of such renowned painters as \*Hryhorii and \*Olimpii, who are mentioned in the monastery's Patericon. In the 12th century the studio's influence was felt throughout Rus' – in Galicia, Volhynia, Novgorod, Suzdal, and Yaroslavl. Its distinctive style of painting resembled closely the style of contemporary mosaics in Kiev. Because of their destructibility by fire and desirability as war booty, many icons perished. No Kievan icons from the 11th century, and only a few from the 12th, have survived to our day. The oldest surviving masterpieces of the Kiev school include *The Mother of God Great Panagia*, a large icon done probably by Olimpiii and donated by Volodymyr Monomakh to a church in Rostov; *St Demetrius of Thessalonica*, a 12th-century icon that belonged to the Dormition Church in Dmitrov; *St Nicholas with Saints on the Borders* (turn of the 12th century); *The Mother of God of the Caves* or *The Svensk Mother of God*, a late 13th-century copy of an earlier Kievan icon done for Prince Roman; and *Ihor's Mother of God*, a 13th-century work that disappeared from the Kievan Cave Monastery during the Second World War. There are also a number of icons that belong to the Kiev tradition of icon painting, but may have been produced in centers other than Kiev. The most important of these are works that were probably produced by the Novgorod school according to Kievan models: *The Ustiug Annunciation* (12th century), *The Archangel Gabriel* or *The Angel with Golden Hair* (12th), and *ss Borys and Hlib* (12th–13th). The famous *Vyshhorod Mother of God*, later known as *The*

*Vladimir Mother of God*, is not a Kievan but a Greek icon that was brought in 1134 from Constantinople to Vyshhorod, and taken to Vladimir by Andrei Bogoliubskii in 1155.

With the rise of the Galician-Volhynian state in the 13th century, a Galician tradition of icon painting arose. The earliest Galician icons that have survived are from the 14th century. We can assume that earlier icons were painted in a style similar to that of Kievan icons. The chief icon painting schools in Galicia were those of Peremyshl and Lviv. Each of them had many branches scattered throughout the Carpathian region as far east as Transcarpathia. Numerous samples of their work dating back to the early 15th century have been preserved. Although works of this period are unsigned and undated, some of them are distinctive enough to be attributed to particular studios and masters. Some icons were painted by monks, but most were done by highly trained secular craftsmen or self-taught folk artists. Municipal archives in Peremyshl contain references to icon painters such as Vladyka (1393–4), Matvii (1431–51), T. Drobysh (1443–50), and Yakiv (1443–51), and those in Lviv refer to Stanyслав (1404–12), Ivan and Luka (1406–25), and Andrii (1443–8). Galician icons of the 15th century are characterized by their pure, almost classical, style. The figures are balanced perfectly with the background. The drawing is delicate and refined, and its lines are rhythmic. The forms tend to be rounded. Full-bodied reds, greens, and blues contrast strongly with the prevalent muted colors. The background is monotonic and peaceful, usually light ocher or bluish gray. Gold is used only for the halo. Designs are carved on the halo and, towards the end of the century, in the background. The finest surviving examples of this style are *The Nativity of the Mother of God* from Vanivka, *The Passion of Christ* from Zdvyzhennia, *The Archangel Michael* and *The Archangel Gabriel* from Dalova, *ss Cosmas and Damian* from Tylych, *Christ the Teacher* from Mylyk, *The Mother of God with the Prophets* from Pidhorodtsi, *The Last Judgment* from Mshanets, *St Nicholas with Scenes from His Life* from Radruzh, and *The Mother of God Hodegetria* from Krasiv. Fourteenth-century icons such as *St George the Dragon-Slayer* from Stanylia and *The Dormition of the Mother of God* from Zhukotyn are quite distinct in style. Their simplified figures are flat and have a clear outline. Little is known about icon painting in Volhynia, but the early 14th-century *Mother of God from Lutsk* shows that Volhynian icons were similar to contemporary Galician ones.

In the 16th century Lviv became the main center of icon painting. The names of many masters whose works have not been identified have come down to us in the municipal archives: M. Vorobii (1524–75), Khoma (1536–49), Fedir (1539–64), V. Vorobii (1575), and L. Pukhala (1575–1611) and his sons Ivanko and Oleksander. A number of towns near Lviv (Staryi Sambir, Stryi, Yavoriv, and Rohatyn) developed their own schools. The style evolved towards a greater emphasis of the graphic element, which became typical of Ukrainian icons: figures began to be circumscribed with a distinct line. With a heavier application of whitener, forms became more plastic and rounded. The colors became livelier. The background was colored solid gold or silver and was ornamented with engraved or impressed geometric designs. Among the numerous icons that survive from this period, the finest samples of the Peremyshl school are

ICONS 1) Prince Ihor's icon of the Theotokos (13th century; formerly at the Kievan Cave Monastery Museum). 2) St Nicholas (16th century, from Transcarpathia; Bardejov Museum, Slovakia). 3) The Last Judgment (16th century, Peremyshl school; Lviv Museum of Ukrainian Art). 4) ss Luke and Simon (16th century, from Rohatyn; Lviv Museum of Ukrainian Art). 5) The Dormition of the Virgin Mary (1705, by Y. Kondzelevych; Lviv Museum of Ukrainian Art). 6) The Holy Protectress with portraits of Metropolitan D. Balaban and Hetman B. Khmelnytsky (17th century; Kiev Museum of Ukrainian Art). 7) Detail from the Pidhorodtsi Theotokos (15th century; Lviv Museum of Ukrainian Art). 8) The Vyshhorod (Vladimir) Theotokos (12th century; Tretyakov Gallery, Moscow). 9) The Máriapócs Theotokos (ascribed to Pylypenko, 1731; Kiev Museum of Ukrainian Art). 10) Belzebub: detail from the Last Judgment (17th century; Museum of Ukrainian Culture, Svidník, Slovakia).

ICONS 1) The Vyshhorod (Vladimir) Theotokos (early 12th century; Tretyakov Gallery, Moscow). 2) Orant (Kiev school, early 12th century; Tretyakov Gallery, Moscow). 3) The Last Judgment (16th century, from Rivne [Sernie], Transcarpathia; Museum of Ukrainian Culture, Svidnik, Slovakia). 4) Christ in Glory (early 16th century, from Dolyna, Galicia; Lviv Museum of Ukrainian Art). 5) The Virgin Odigitria with the Apostles (15th century, from Novosiltsi, Galicia; Sanok Museum, Poland). 6) The Mandylion (14th–15th century, from Krempna, Lemko region; Sanok Museum, Poland). 7) Destruction of Sodom: detail from an icon of St Michael Archangel (16th century; Bardejov Museum, Slovakia). 8) ss Juliana and Anastasia (18th-century baroque icon from Konotip). 9) The Theotokos with Christ (18th century; Kiev Museum of Ukrainian Art). 10) The Holy Protectress (19th-century folk painting on glass; Ukrainian Museum, Stamford, Conn).

*This page intentionally left blank*

*The Nativity of Christ* and *The Passion of Christ* from Trushyevychi, *The Annunciation* from Dalova, *The Adoration of the Magi* from Busovovsko, *The Archangel Michael* from Ilyk, *The Dormition of the Mother of God* (signed by Oleksii) from Smilnyk, *Christ with the Twelve Apostles* and *The Nativity of the Mother of God* (both by Dmytrii) from Dolyzna, and *The Mother of God* from Florynka. The Lviv school produced such masterpieces as *The Crucifixion with Attending Women* from Borshchovychi, *The Transfiguration* and *The Archangel Michael* from Yabloniv, *St Parasceve* from Krushelnytsia, *The Nativity of the Mother of God* and *The Descent into Hell* from Vyshenka, *The Last Judgment* and *St Mark* from Kamianka-Buzka, and *ss Borys and Hlib* and *The Crucifixion* from Potelych. Galician artists kept abreast of developments in the Balkans, Novgorod and Moscow in the north, and Western Europe, but it is difficult to pinpoint any concrete borrowings.

The first painters' guild in Lviv was organized in 1596 and its membership was restricted at first to Catholics. By the mid-17th century, however, Ukrainian (Orthodox) artists made their way to the top offices in the guild. Specializing in portrait and icon painting, masters were highly skilled artists who had spent several years abroad. The leading Ukrainian painters in Lviv were F. Senkovych, M. Petrakhnovych, and S. Korunka. A number of provincial schools of icon painting achieved a wide reputation. There were several studios in Rybotychi that combined elements of the traditional icon with elements of Western engraving and left such works as *The Last Judgment* and *The Nativity of Christ*. The town of Sudova Vyshnia produced several outstanding painters: I. Brodlakovich, Yatsko Vyshensky, and Ivan the Painter. I. Rutkovych worked in Zhovkva, and Y. Kondzelevych (b in Zhovkva) worked at the Maniava Hermitage. A strong tendency towards realism in Galician icon painting can be attributed to the influence of Western Europe. The personages in the icons became individualized and the background became filled with natural landscapes. Color contrasts were toned down to obtain gentle transitions. Oil paints were introduced in the second half of the century, usually in combination with tempera. Elements of realism are clearly marked in such icons as *The Last Supper* (1638) from the Dormition Cathedral in Lviv and *The Nativity of the Mother of God* (mid-17th century) from the Church of Good Friday in Lviv, and the icons of the Church of the Holy Spirit in Rohatyn.

At the beginning of the 17th century icon painting began to revive in eastern Ukraine. Its patrons were not only the church but also the rising Cossack elite. The new baroque churches in Kiev, Chernihiv, and other centers of the Cossack state were decorated with elaborate iconostases. The Kievan Cave Monastery became the leading center of icon painting. In the new icons the severe Byzantine style gave way to the dynamic, luxurious, and expressive style of the baroque. The icon of the Mother of God as the Protectress is typical of this period. It depicts the Mother of God covering with her mantle the patrons of the church and other dignitaries of the time. Some examples of this icon portray such hetmans as B. Khmelnytsky, D. Apostol, and P. Polubotok with their wives and families. *The Zaporozhian Protectress*, which was executed in a simple, primitive style, presents the Mother of God with the leaders of the Zaporozhian Host.

By the second half of the 18th century the icon evolved

into an ordinary painting on a biblical theme and disappeared as a distinctive art form. This evolution is apparent in the work of V. \*Borovykovsky and L. \*Dolynsky. At the beginning of the 20th century, Ukrainian icon painting was revived in a neo-Byzantine form, represented by M. \*Boichuk and his 'monumentalist' school, as well as by M. Sosenko, P. Kholodny Sr, M. Osinchuk, V. Diadyniuk, and others. Since 1948, in the United States, Canada, Europe, and Australia, many churches and iconostases have been decorated in this style by painters such as M. Osinchuk, P. Andrusiv, P. Kholodny Jr, S. Hordynsky, M. Dmytrenko, I. Denysenko, M. Bilynsky, M. Levytsky, Ya. Hnizdovsky, and M. Bidniak. Among the contemporary painters of icons are A. Solohub, M. Mor, the Studite monk Yu. Mokrytsky, and O. Mazuryk.

**Research.** The systematic study of icons began only in the mid-19th century. At first icons were viewed simply as archeological objects or a form of handicraft. It was only in the 20th century that they have been approached as artistic objects. This is largely attributable to new restoration techniques, which for the first time uncovered the rich colors and complex composition of old icons, and to improvements in reproduction technology, which made comparative studies possible. The first centers of icon research were Kiev, with its small but valuable icon collections at the City Museum and the Museum of the Theological Academy, and Lviv, with its rich collections at the National Museum and the Stauropegeion Museum. Comparative analysis has shown that old Ukrainian icons, while based on Byzantine models in theme and style, possessed distinctive national traits and were organically rooted in Ukrainian spirituality.

**Iconography.** A study that identifies, describes, classifies, and interprets symbols, themes, and subject matter in the visual arts. It originated in Europe in the 16th century, when it concentrated on collecting emblems and symbols from classical literature. Viewed as a handmaid of archeology, in the 18th century it consisted of the classification of subjects in ancient monuments. In the next century it became independent of archeology and concentrated mostly on the use and meaning of symbols in Christian art. In Ukraine, iconographical studies of saints venerated by Ukrainians were published by M. Batih, F. Bilous, M. Dragan, M. Holubets, S. Hordynsky, D. Horniatkevych, P. Kholodny, N. Kondakov, Ya. Konstantynovych, L. Miliaieva, Rev Yu. Mokrytsky, M. Osinchuk, H. Pavlutsky, V. Peshchansky, Rev I. Pavlyk, K. Shyrotsky, M. Sokolowski, M. Sumtsov, I. Svientsitsky, V. Svientsitska, and P. Zholtovsky.

**Iconostasis.** A solid wooden, stone, or metal screen separating the sanctuary from the nave in Eastern Chris-

ICONOSTASES 1) The Good Friday Church in Lviv (1644). 2) St Nicholas's Military Cathedral in Kiev (1696). 3) St George's Cathedral at the Vydubychi Monastery in Kiev (late 17th century). 4) The Dormition Cathedral at the Yeletskyi Monastery in Chernihiv (1670). 5) St Barbara's Ukrainian Catholic Church in Vienna (late 18th century). 6) St Nicholas's Cathedral in Nizhen (1730s). 7) The Holy Protectress Church in Novhorod-Siverskyi (1766). 8) St John the Baptist Ukrainian Catholic Church in Newark, New Jersey (modern transparent iconostasis by S. Hordynskyi). [Note: numbers 2, 3, 4, 6, and 7 have all been destroyed.]

tian churches. Of varying height, it consists of rows of columns and icons. It extends the width of the sanctuary and has three entrances: the large Royal Gates at the center and the smaller Deacon Doors on each side. The Royal Gates are hung with a curtain. Western churches, whether Catholic or Protestant, have a low barrier instead of an iconostasis. The iconostasis evolved in Byzantium in the 9th–11th centuries.

The icons of the iconostasis are separated by columns and are arranged in several rows. The number of icons and ranges can vary. Usually, a full iconostasis contains over 50 icons set in four to six rows, but simpler (one- or two-story) and more elaborate (seven-story) iconostases are known. The lowest range consists of the icons on the Royal Gates depicting the Annunciation and the four evangelists, and of the full-length icons of the Savior (right of the gates) and the Mother of God (left of the gates), of the church's patron saint, and of the more venerated saints. In the second row immediately above the Royal Gates, the Last Supper is depicted, flanked by icons of the 12 main holy days of the church year. The third row consists of the Supplication or Deesis at the center and icons of the apostles. In the fourth tier the prophets are displayed, with the patriarchs or Christ's Passion above. The iconostasis is topped by a cross with an image of Christ on it. The icons are set in a structure of finely carved and gilded columns and beams. The ornamental motif consists usually of interwoven grapevines.

In Ukraine the earliest iconostases were low, consisting of only two tiers. Their further development was conditioned by the development of wooden architecture and the decline of the art of mosaics. By the 14th–15th centuries the typical structure of the two- and three-tiered iconostasis was established. From a simple support for icons the iconostasis evolved by the 17th–18th centuries into an elaborate product of several arts: architecture, sculpture, and painting. It grew in both size and complexity as a fifth and even sixth tier was added. The earliest surviving iconostases date back to the beginning of the 17th century. They include M. Petrakhnovych's iconostasis (1637) of the Dormition Church in Lviv, the iconostases of the Church of Good Friday (1644) in Lviv and the Church of the Holy Spirit (1650) in Rohatyn, the Bohorodchany iconostasis, which was painted by Y. Kondzelevych for the Maniava Hermitage in 1705 and was later transferred to a church in Bohorodchany, and I. Rutkovych's iconostases in Volytsia-Derevlianska (1680–2), Volia-Vysotska, and the Church of Christ's Nativity in Zhovkva (1697–9). Very little remains of the rich iconostases in central Ukraine. Many of the older iconostases, including those admired in 1665 by Paul of Aleppo (in the Dormition Church of the Kievan Cave Monastery and in the churches in Vasylkiv, Trypilia, and Pryluka), were replaced by more modern baroque structures, which were eventually destroyed by the Soviets. The only surviving example of the grand baroque iconostases financed by the hetmans and Cossack officers is the iconostasis of the Transfiguration Church in Sorochyntsi (1732), which measures 17 m in height and 20 m in width. The most important monuments of Ukrainian art destroyed in the 1930s by the Soviet regime are the iconostases of the following churches: the Dormition Cathedral of the Yeletskiy Monastery (1670) in Chernihiv, one of the largest iconostases in Ukraine; the Church of the

Nativity of the Mother of God (1684) of the Molchany Monastery near Putyvl; the Transfiguration Cathedral (1684) in Izium; \*St Nicholas's Military Cathedral (1696) in Kiev (seven tiers, 15.5 m high and 22 m wide); St George's Cathedral of the Vydubychi Monastery (1700s) in Kiev; the Cathedral of the Elevation of the Cross (1709) in Poltava; St Michael's Golden-Domed Cathedral (1719) in Kiev; St Nicholas's Cathedral (1734) in Nizhen; St Nicholas's Church (1730s), the Church of the Holy Spirit (1746), and the Church of the Holy Protectress (1760s), all in Romen; the Trinity Cathedral (1740) of the \*Trinity-St Elijah Monastery in Chernihiv; the Trinity Cathedral (18th century) of the \*Hustynia Trinity Monastery; the Church of Christ's Ascension (1761) in Berezna; St Nicholas's Cathedral (1765) in Mhar Monastery; the Church of the Holy Protectress (1766) in Novhorod-Siverskyi; and the Dormition Cathedral (1775) in Mezhyrich. Other than a few icons from the Novhorod-Siverskyi, Berezna, and Mezhyrich churches, all that remains of the destroyed iconostases are old, prerevolutionary sketches or photographs, often of poor quality. Any reference to the destruction of these masterpieces in Soviet publications is prohibited. Today the art of the iconostasis is cultivated only outside Ukraine. Such artists as S. Hordynsky, P. Kholodny Jr, M. Osinchuk, and M. Levytsky have adorned many Ukrainian churches in the United States, Canada, South America, Western Europe, and Australia with iconostases of various styles from the strictly traditional to the modern.

*Ideia i chyn* (Idea and Deed). Underground organ of the Leadership of the Organization of Ukrainian Nationalists (Bandera faction) in Western Ukraine. It was published from 1942 to 1946 and edited by D. Maivsky.

**Idyll.** A poetic work depicting the tranquil, happy life of simple folk – usually peasants or shepherds – in an idealized natural setting. Often this kind of poetry is called pastoral or bucolic. As a definite literary form, the idyll survived until the classicist period, but idyllic motifs were frequently used in later periods. In Ukrainian literature the idyll as a definite literary form has few examples. O. Lobysevych's 18th-century burlesque imitations of Virgil's *Eclogues* have not survived. Given the predominance of national and social themes, instances of idyllic motifs in modern Ukrainian literature are infrequent. They appear in L. Borovykovsky's 'Podrazhanni Horatsiui' (Imitation of Horace); in T. Shevchenko's 'Sadok vyshnevyyi kolo khaty' ('The Cherry Orchard by the House') and in certain depictions in some of his other poems; in P. Kulish's 'Orysia'; from time to time in Ukrainian prose and drama beginning with the works of H. Kvitka-Osnovianenko; and in certain works of the \*Neoclassicists, particularly the early poetry of M. Rylsky. They are also found in the works of poets and writers of the 'Ukrainian schools' in Polish and Russian literature and in particular foreign works with Ukrainian themes:

Polish idylls (especially those by S. Szymonowicz), N. Gogol's short stories, Russian literary depictions of travels through Ukraine, and B. Zaleski's and A. Tolstoi's poetry.

D. Chyzhevsky, D.H. Struk

**Iednist'** (Unity). A weekly newspaper published in Adelaide (Australia) from 1949 to 1956. It supported the politics of the UNR Government-in-exile. Its founder and chief editor was Ya. Lohyn.

**Ievanhel's'ka pravda** (Evangelical Truth). Religious monthly published from 1940 to 1979 in Toronto by the Ukrainian Evangelical Alliance of North America. Its editor was M. Fesenko. Besides religious articles it published articles on social and political issues and works by Ukrainian poets and writers. Some articles appeared in English.

**Ievanhel's'kyi ranok** (Evangelical Morning). An evangelical Christian monthly journal published since 1961 by the Ukrainian Evangelical Alliance of North America in Toronto and Detroit. It also has an English-language supplement, *The Ukrainian Christian Herald*. Its predecessors were the weekly \**Ranok* (from 1905) and the monthly \**Kanadiiskyi ranok* in Edmonton (1920–61). The editor in chief from 1961 to 1987 was V. Borovsky.

*Ifika iieropolitika*: copper etching by I. Fylypovych (1760)

**Ifika iieropolitika**. An illustrated philosophical-moralistic work on 67 subjects pertaining to ethics, morality, philosophy, and educational foundations, published by the Kievan Cave Monastery Press in 1712 and the Lviv Dormition Brotherhood Press in 1760. Illustrations were executed by N. Zubrytsky in the Kiev edition and by I. Fylypovych in the Lviv edition. Under each allegorical illustration (Truth, Shame, Humility, Gentleness, etc) there was a verse of four or (less often) six lines. The book's author is unknown; he was probably a monk at the Kievan Cave Monastery.

**Ihnatiienko, Varfolomii** [Ihnatijenko, Varfolomij], b 25 August 1892 in Ozeriany, Lohvitysia county, Poltava gubernia, d 7 December 1943. Bibliographer. He worked at the Ukrainian Scientific Research Institute of Bibliology and directed the bibliographic department in 1923–31. He wrote *Ukraïns'ka presa 1916–23* (The Ukrainian

Press 1916–23, 1926) and *Bibliohrafiia Ukraïns'koi presy za sto lit, 1816–1916* (Bibliography of the Ukrainian Press, 1816–1916, 1930). He also contributed many articles to the journals *Bibliohrafichni visti*, *Knyha*, and *Zhyttia i revoliutsiia*.

**Ihnatovych, Hnat** [Ihnatovyč] (stage name of H. Balinsky), b 17 November 1898 in Nemyriv, Bratslav county, Podilia gubernia, d 16 January 1978 in Uzhhorod. Stage director, actor, and teacher. He studied with L. \*Kurbas at the Molodyi Teatr theater (1918–19) and appeared in the productions of the Kiev Drama (1920–2) and Berezil (1922–5) theaters. He also directed the 1924 Berezil production of E. Toller's *Masse-Mensch*. Thereafter he taught at the Kiev (1924–8) and Kharkiv (1928–34) music and drama institutes and at the acting school of the Kiev Artistic Film Studio (1934–46). From 1946 to 1963 he served, with breaks, as the artistic director of the Transcarpathian Ukrainian Music and Drama Theater in Uzhhorod. There he directed many plays by Ukrainian, Russian, and European playwrights. Ihnatovych appeared in such roles as Yarema in *Haidamaky* (based on T. Shevchenko's poem), the millionaire's son in G. Kaiser's *Gas I*, and Macduff in Shakespeare's *Macbeth*.

**Ihnatovych, Volodymyr** [Ihnatovyč], 1883–1928. Cultural and political figure of the early 20th century. A member of the \*Hromada of Kiev, in December 1917 he helped found the \*Ukrainian Federative Democratic party, which advocated an autonomous Ukraine within a federated state. Under the Hetman government he was director of the Ukrainian State Bank, and sat on the financial commission of the Ukrainian delegation that negotiated peace with Soviet Russia. In November 1918 he concluded an agreement with the Kuban government on financial transactions.

**Ihor**, b ca 877, d 945. Grand prince of Kievan Rus' from 912. According to the Rus' Primary Chronicle, Ihor was the son of \*Riuryk, but he could have been his grandson. During his rule the Turkic Pechenegs attacked Rus' in 915 and 920, Slavic tribes still separate from the Kievan state were subjugated, and Byzantine influence in Rus' increased. In 913–14 he led an expedition to the Caspian Sea, which ended in a rout by the Khazars. He attacked Byzantium in 941 but his fleet was repulsed by 'Greek fire'; his forces then ravaged the coast of Asia Minor during their retreat. In 943–5 Ihor waged a successful campaign in Caucasian Albania against the Caliphate and occupied the capital of Berdaa before his army was forced to retreat because of an epidemic of dysentery. In 945 he concluded a trade agreement with Byzantium, promising not to attack Byzantine towns in the Crimea and to help them to repel Black Bulgars. During his reign he waged war on the 'rebellious' Slavic tribes of the Derevljanians and Ulychians and took the city of Peregichien. He was killed by the Derevljanians of Korosten while attempting to extort excessive tribute. His death was avenged by his wife \*Olha, whom he had married in 904. At Ihor's death, 20 Rus' princes recognized the supremacy of Kiev.

**Ihor Olhovych** [Ihor Ol'hovyč], b ?, d 1147. Prince of Novhorod-Siverskyi and, after the death of his brother \*Vsevolod Olhovych, grand prince of Kiev from 1146.

The son of Oleh Sviatoslavych, founder of the Olhovych dynasty, he took part in the internecine princely struggles on the side of the rulers of Chernihiv. Only days after he inherited Kiev the commoners, unhappy with the oppressive reign of the Olhovyches begun under Vsevolod, rebelled. The Kievan boyars offered Kiev to \*Iziaslav Mstyslavych of Pereiaslav, who came and defeated Ihor's army in battle. Ihor was imprisoned in St John's Monastery in Pereiaslav. Falling ill, he took monastic vows and was allowed to live in St Theodore's Monastery in Kiev. He was beaten to death by a mob incited by news of Iziaslav's intentions to declare war on the Chernihiv princes. He was buried in Chernihiv and later canonized as a martyr.

**Ihor Sviatoslavych** [Ihor Svjatoslavyč], 1151–1202. Prince of Novhorod-Siverskyi (1178–98) and Chernihiv (1198–1202). The son of Sviatoslav Olhovych of Chernihiv, he took part in the war of Andrei Bogoliubskii against Grand Prince Mstyslav Iziaslavych of Kiev in 1169. The \*Cumans' marauding attacks in southern Rus' forced him to join other princes in fighting the nomads. In 1185 he organized a campaign without the knowledge of the grand prince of Kiev; his army, after an initial victory, was surrounded on the Kaiala River and routed. Ihor was captured but managed to escape. This event is the subject of the epic tale \**Slovo o polku Ihorevi* (The Lay of Ihor's Campaign). After Ihor's defeat the Cumans ravaged the Pereiaslav region.

**Ihren camp sites.** Several Neolithic camp sites dating from the late 5th to the early 4th century BC discovered in the southern part of Dnipropetrovske on a peninsula at the mouth of the Samara River. Excavations carried out in the 1930s revealed flint and bone tools, fragments of clay and stone pottery, remnants of dwellings, burials, and other artifacts attributed to the Dnieper-Donets, \*Surskyi-Dnieper, and \*Serednii Stih cultures.

**Ikonnikov, Vladimir**, b 21 December 1841 in Kiev, d 26 November 1923 in Kiev. Historian and academician of the Russian Academy of Sciences from 1914 and VUAN from 1920. Ikonnikov finished his studies at Kiev University in 1865. From 1866 to 1871 he taught at Kharkiv University, various gymnasiums in Odessa, and Odessa University, and from 1871 at Kiev University. He received his doctorate in 1869 for his dissertation on the cultural influence of Byzantium in Rus'. Ikonnikov was one of the founders and the president (1874–7 and 1893–5) of the \*Historical Society of Nestor the Chronicler. From 1873 to 1913 he was the chief editor of *Universitetskie izvestiia* at Kiev University; in 1904 he was made head of the \*Kiev Archeographic Commission. He is the author of a number of scholarly works, many of which appeared in *Kievskaiia starina*. His most important work is the encyclopedic two-volume *Opyt russkoi istoriografii i ee protivniki* (Study of Russian Historiography and Its Opponents, 1891, 1908; the manuscript of the third volume is in the Central Library of the Academy of Sciences of the Ukrainian SSR). His major work on Ukrainian history is *Kiev v 1654–1855 gg: Istoricheskii ocherk* (Kiev in 1654–1855: A Historical Survey, 1904).

**Ikva River.** A right-bank tributary of the Styr River. The Ikva flows for 155 km through Podilia and the Vol-

hynian Upland and has a basin area of 2,250 sq km. Its upper stretch near Kremianets and Dubno lies in a picturesque valley.

**Ilarion**, b ? , d before 1054 in Kiev. Eminent church and literary figure of the 11th century; the first non-Greek metropolitan of Kiev. Ilarion was a priest in Berestove near Kiev when in 1051, according to the wish of Yaroslav the Wise, an episcopal sobor elected him metropolitan. He codified the laws governing church life and defended the independence of the Rus' church from the Byzantine hierarchy. A brilliant preacher and talented writer, Ilarion is credited with four works: *Slovo o zakoni i blahodatii* (Sermon on Law and Grace, before 1052), a prayer, a confession of faith, and a short collection of instructions for priests. The first work has been preserved in more than 50 redactions of the 15th and 16th centuries, and had an important influence on Ukrainian and other Slavic literatures.

Moldovan, A. *'Slovo o zakone i blagodati' Ilariona* (Kiev 1984)

**Ilarion.** See Ohienko, Ivan.

**Ilchenko, Oleksander** [Il'chenko], b 4 June 1909 in Kharkiv. Writer and wartime journalist. Beginning with *Dniprel'stan* (The Dnieper Dam, 1932), he has written 10 prose collections, 3 plays, and the novels *Peterburz'ka osin'* (Autumn in St Petersburg, 1941), about T. Shevchenko, *Zvychainyi khlopets'* (An Ordinary Boy, 1947), *Neapolitanka* (The Girl from Naples, 1963), and the folkloric *Kozatskomu rodu nema perevodu, abo zh Mamai i chuzha molodytsia* (Cossack Kind Will Never Die, or Mamai and Another's Young Wife, 1958). His works in two volumes were published in 1979.

**Ilin, Vasyi** [Il'jin, Vasyi'], b 14 January 1901 in Kiev, d 13 July 1963 in Kiev. Ukrainian linguist and lexicographer. He served as senior research associate and scientific secretary of the Institute of Linguistics of the AN URSR, and as editor of vols 3 and 4 of the Ukrainian-Russian dictionary (in 6 vols; 1961) and of *Leksykohrafiichnyi biuletten* (1958–63). He is the author of studies in the morphology of modern standard Ukrainian and in the history of standard Ukrainian, as well as of numerous articles on the language of T. Shevchenko, all in the spirit of bringing Ukrainian closer to Russian. In editing the language in the six-volume edition of T. Shevchenko's works Ilin falsified the original by introducing the Russian pronunciation of Church Slavonicisms.

**Ilinsky, Grigorii** [Il'inskij, Grigorij], b 23 March 1876 in St Petersburg, d 1937? Russian linguist of Ukrainian descent. A graduate of St Petersburg and Kiev universities (1911), he served as docent of Kharkiv University (1907–9) and then as professor at the Nizhen Historical-Philological Institute (1909–18), Saratov University (1920–7), and Moscow University (from 1927). He wrote works on comparative Slavic phonology and morphology, summarized in his *Praslavianskaia grammatika* (Grammar of Common Slavic, 1916), on Slavic etymology, and on problems in the historical development of individual Slavic

languages, including Ukrainian (the assimilation of vowels in Ukrainian, lengthening of consonants in words such as *zillia* [herbs], the imperative, and Ukrainian etymologies). Many of his studies of Ukrainian were published in periodicals of the Ukrainian Academy of Sciences and in *Ridna mova* (Warsaw). His work is characterized by an excessive emphasis on sound alternation with little attention to the historical background of linguistic developments or linguistic geography; it also tends to underrate foreign influences. A victim of Stalinist repression in the 1930s, Ilinsky died in prison.

**Илюстрована Україна** (Illustrated Ukraine). A literary, art, and popular scientific journal published semi-monthly in Lviv in 1913–14. Its chief editor was I. Krypiakivych; he was assisted by D. Katamai. The journal embraced authors and readers from all parts of Ukraine. Poetry and prose contributors included Kh. Alchevska, M. Vorony, O. Zhurlyva, B. Lepky, Ya. Mamontov, V. Masliak, V. Pachovsky, Ya. Savchenko, and H. Chuprynka. Historical and scholarly works and literary and art reviews were published by M. Vozniak, O. Hrytsai, M. Yevshan, R. Zaklynsky, O. Nazariiv, F. Riznychenko, M. Shumytsky, Ya. Strukhmanchuk, and others. Community and political events were reported, and the journal contained theater and music reviews as well as translations of world literature; supplements serialized V. Hugo's *Quatre-vingt treize* and H.G. Wells's *The Time Machine*. Thirty-four issues appeared before publication ceased because of the war.

**Ilkevych, Hryhorii** [Il'kevyč, Hryhorij], b 13 October 1803 in Nove Selo, Zhovkva circle, Galicia, d 1841 in Horodenka, Kolomyia circle, Galicia. Folklorist and ethnographer. A gymnasium teacher in Kolomyia (1824–35) and Horodenka (1835–41), he published a collection of 2,715 Western Ukrainian folk sayings and riddles, *Halyskii pryypovidky i zahadky zibrani Hryhorijem Il'kevychom* (Galician Proverbs and Riddles Collected by Hryhorii Ilkevych, 1841). From 1836 to 1840 he also wrote a number of articles on ethnography. Parts of his major work, *Zbirnyk ukrains'kykh istorychnykh pisen'* (Collection of Ukrainian Historical Songs), were published in *Rusalka dnistrovaia* (1837) and in anthologies edited by Ya. Holovatsky and W. Zaleski, but most of it remains unpublished.

**Illia** [Illja] (aka Iliia), b and d ? A 17th-century wood engraver. A monk at St Onuphrius Monastery, in the 1630s he worked as an engraver in Lviv. From 1640 to about 1680 he worked at the Kievan Cave Monastery Press. During his career he produced about 600 woodcuts for illustrations, title pages, headpieces, and prints. His work decorated such books as the *Anthologion* (Lviv 1638, 1643); the *Apostol* (Lviv 1639, 1654); the *Octoechos* (Lviv 1640); the *Triodion* (Kiev 1640, 1648); the *Pentecostarion* (Lviv 1642); the *Psalter* (Kiev 1644); the *Octoechos* (Lviv 1644); the *Euchologion* of P. Mohyla (Kiev 1646), one of the finest examples of Ukrainian book design of the time; the *Nomocanon* (Lviv 1646); the *Kievan Cave Patericon* (Kiev 1661, 1678); and L. Baranovych's *Mech dukhovnyi* (The Spiritual Sword, 1666) and A. Radvylovsky's *Ohorodok Marii Bohorodytsi* (The Garden of Mary, the Mother of God, 1676). Two albums of his woodcuts were published in Kiev in the 1640s, and a

Woodcut from the Kievan Cave Patericon by Illia

collection of 132 of his biblical illustrations appeared at the end of the 17th century. Illia was a master of the thematic woodcut. His illustrations depict daily life, landscapes, buildings, and famous monks of the Kievan Cave Monastery.

**Illiashevych** [Illjaševyč] (Eliiashevych). Name of a family of Lviv burghers that in the 18th and 19th centuries played an important role in the \*Stauropogion Brotherhood. The more prominent members of the family were Yurii (d 1735), elder of the brotherhood in 1722–35; Vasyli, elder and in 1756 mayor of Lviv; and Oleksander (d 1825), vice-elder and author of one of the first histories of the brotherhood (1825).

**Illichivske** [Illichivs'ke]. VII-11. City in Odessa oblast, situated on the right shore of Sukhyi Liman about 30 km south of Odessa. Having one of the largest ports on the Black Sea, it has been under direct oblast jurisdiction since 1973, when it became a city. Established as a settlement called Buhovi Khutory in the late 18th century, it was renamed Illichivka in 1929 and acquired its present name in 1952, when it became a town (smt). It is a rapidly growing city with a young population (average age in the late 1970s was 24) consisting of longshoremen, shipbuilders, and merchant marines. The city has container ports, shipyards, and a reinforced-concrete plant. Its docks became a port separate from Odessa's in 1961.

**Illienko, Vadym** [Illjenko], b 3 July 1932 in Novomoskvske, Dnipropetrovske oblast. Cinematographer; the

brother of Yu. \*Illienko. After graduating from the All-Union Institute of Cinematography in 1955, he shot his first films at the Kiev Artistic Film Studio: *Hory klychut'* (The Mountains Are Calling, 1956) and *Zvychnaia rich* (An Ordinary Thing, 1958). From 1958 to 1961 he worked at the Yalta Artistic Film Studio. After returning to the Kiev studio he has filmed, among other movies, *Oleksa Dovbush* (1961), *Za dvoma zaitiamy* (After Two Hares, 1962), *Vechir na Ivana Kupala* (The Eve of Ivan Kupala, 1967), *Sviato pechenoi kartopli* (Feast of Baked Potatoes, 1977), and *Try hil'zy anhliis'koho karabinu* (Three Cartridges for an English Carbine, 1983).

**Illienko, Yurii** [Illjenko, Jurij], b 18 July 1936 in Cherkasy. Cinematographer and screen director; the brother of V. \*Illienko. A graduate of the All-Union Institute of Cinematography (1960), he has worked at the Yalta Artistic Film Studio and, since 1965, at the Kiev Artistic Film Studio. He also teaches at the Kiev Institute of Theater Arts. His camera work in S. Paradzhanov's *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors, 1964) earned him an award at the 1965 international film festival in Mar del Plata, Argentina. His *Proshchajte holuby* (Goodbye, Pigeons, 1960), made in fulfillment of degree requirements, was approved for general distribution in the USSR. He made his debut as a director with his adaptation of N. Gogol's stories *Vechir na Ivana Kupala* (The Eve of Ivan Kupala, 1967). Then he scripted and directed such films as *Bilyi ptakh z chornoiu oznakoiu* (White Bird with a Black Mark, 1972), which won a gold medal at the Moscow International Film Festival; *Vsuperech vs'omu* (Contrary to Everything, 1973); *Lisova pisnia – Mavka* (The Forest Song – Mavka, 1981), an adaptation of Lesia Ukrainka's play; and *Lehenda pro kniahyniu Ol'hu* (The Legend of Princess Olha, 1983), the first part of a planned trilogy on Kievan Rus'. Illienko's highly personal cinema is deeply rooted in Ukrainian history and folklore. His original cinematographic style uses subjective camera and explores the potentialities of color.

**Illinska, Varvara** [Illins'ka], b 19 November 1920 in Izhevsk, Udmurt ASSR. Archeologist. A specialist on the Scythian period, since 1945 she has worked at the Institute of Archeology of the AN USSR. She is the author of numerous articles and several books, including *Skify dneprovskogo lesostepnogo Levoberezh'ia* (The Scythians in the Forest-Steppe on the Dnieper's Left Bank, 1968) and *Ranneskifskie kurgany basseina r. Tiasmyn (VII–VI vv do n.e.)* (Early Scythian Kurhans of the Tiasmyn River Basin [7th–6th Century BC], 1975), and a coauthor of the chapter on the Scythian period in vol 2 of *Arkheolohiia Ukraïns'koi RSR* (The Archeology of the Ukrainian SSR, 1971).

**Illintsi** [Illinci]. 1v-10. Town smt (1978 pop 4,100) on the Sob River and a raion center in Vinnytsia oblast. Until the late 19th century it was called Lintsi. A castle was located there from the 14th to 17th centuries. The town has a sugar refinery and a local museum.

**Illiteracy.** See Literacy.

**Illumination.** Colored illustration and decoration of early manuscripts. The illuminations contained in imported Greek and Bulgarian manuscripts served as models for the illuminators of the first books written in Ukraine.

Sample initial

The three illuminations (of the Evangelists John, Luke, and Mark) in the Ostromir Gospel (1056–7) and the eight (including an image of Christ and a portrait of Prince Sviatoslav and his family) in the *Izbornik* of Sviatoslav (1073) are painted in vivid colors and gold in the Byzantine style and are embellished with a geometric and plant ornament that shows traces of local influence. The five illuminations in Princess Gertrude's Psalter (1078–87), including a portrait of her son Yaropolk with his wife Irena and depictions of the Mother of God enthroned, of Christ's Nativity, and of the Crucifixion with the Evangelists, are done in a Byzantine-Romanesque style that suggests they originated in Western Ukraine. Besides illustrations these manuscripts contained purely decorative artwork: the headpieces, tailpieces, and initials consisted of interlacing flowers, leaves, and geometric figures.

The illuminations produced in the 12th and 13th centuries, mostly in the western regions of Ukraine, are more modest in form. They are found in such manu-

Headpiece from the *Apostol* printed by I. Fedorovych (Lviv, 1574)

Initials from a Pochaiv missal (1775)

scripts as the Dobryla Gospel (1164), the Khrystynopil *Apostol* (12th–13th centuries), the Halych Gospel (1266), the Peremyshl Gospel (beginning of the 13th century), the Buchach Gospel (13th century), the Instructions of St Ephraem of Syria (1492), and the Kiev (or Spiridon) Psalter (1397). Their themes vary: they depict saints, battles, landscapes, and allegories. The Discourses of St Gregory the Theologian have a remarkable miniature of Christ.

The crowning work of the 14th century is the Kiev Psalter of 1397 with 226 sheets adorned with 293 masterful miniatures. The decorative interlace is influenced by neo-Byzantine and Balkan styles and incorporates teratological motifs. To the 15th century belong the Radziwiłł Chronicles, with 618 miniatures that are copies of a massive Kievan historical work from the 12th–13th centuries. Also remaining from the 15th century are fine Gospels from Halych, Serniv, and Mukachiv.

Initials from the St George Monastery Gospel (12th century)

Renaissance influences are detectable in the illuminations of later manuscripts such as the Gospel of the Kievan Cave Monastery (1538), the Khyshyevych Gospel (1546), the Kholm Gospel (mid-16th century), the Zahoriv *Apostol* (1554), a mid-16th-century missal illuminated by Master Andrii, the Peresopnytsia Gospel (1556–61) illuminated by Mykhailo Vasylovych from Sianik, the Stryi Gospel (1594), and the Kermanych Gospel (1596). Besides Renaissance elements, folk designs appear in the headpieces and tailpieces of 16th- and 17th-century manuscripts.

Baroque motifs appeared in the illuminations done in the second half of the 17th and the beginning of the 18th century. Fine examples of this type are found in the Kievan Cave Patericon (copied in Hadiache in 1658), L. Baranovych's Missal (1665), A. Radyvylovsky's *Ohorodok Marii Bohoroditsy* (The Garden of Mary, the Mother of God, 1676), Y. Shumliansky's *Zertsalo* (Mirror, 1686), several hirmologions (1679, 1721, 1747, 1777), a missal (1718), and an *Apostol* (1727). Headpieces, initials, and tailpieces

Miniature from the Peresopnytsia Gospel (1556–61)

became more elaborate, and were dominated by fantastic plant motifs.

**Illustration.** Pictorial representation that elucidates or adorns the text of a book or magazine. Besides illustrations in the strict sense, also included are purely ornamental devices such as the headpiece, initial, and tailpiece.

In the 11th–16th centuries, before the introduction of printing, manuscripts produced in Ukraine were adorned with illuminations. With the invention of printing, the various forms of printmaking were used first for the reproduction of illustrations in books. The earliest books

printed in Ukraine were illustrated with \*woodcuts, a technique that continued to be employed by printers into the 18th century. I. Fedorovych's *Apostol* (Lviv 1574), the first book to be printed in Ukraine, contains a fine frontispiece of St Luke the Evangelist. The ornamental headpieces, initials, and tailpieces that appear in his books were influenced by the illuminations in Ukrainian manuscripts and the designs in Cyrillic books printed earlier in Prague and Venice, and in turn had an influence on the ornamentation of Ukrainian books. Some of the artists employed by I. Fedorovych were I. Fylypovych-Pukhalsky, Hryn Ivanovych, and an unidentified 'W.S.' (the signature on the frontispiece in the *Apostol*). In the 17th century many printing presses were established in Ukraine and the demand for illustrators increased. Among the best-known woodcut illustrators of the time were P. Berynda, Illia, A. Klyryk, T. Petrovych, Prokopii, I. Reklinsky, M. Semeniv, D. Sinkevych, T. Zemka, Ye. Zavadovsky, and N. Zubrytsky. The thematic range of illustrations expanded from religious to historical, genre, and portrait. Their style was influenced by the Renaissance and then the baroque.

Copper engraving began to be used in book printing at the end of the 17th century and, thanks to its flexibility and precision, became the dominant illustration medium in the 18th century. Among the first engravers in Ukraine were L. Tarasevych and O. Tarasevych (who also introduced etching into Ukraine), Z. Samoilovych, I. Strelbytsky, I. Shchyrsky, and N. Zubrytsky, the illustrator of *\*Ifika iieropolitika*. In the 18th century the foremost Ukrainian engravers were A. and Y. Hochemsky, M. Karnovsky, A. Kozachkovsky, H. Levytsky (the greatest master of the century), Makarii, I. Myhura, T. Rakovetsky, F. Strelbytsky, and H. Tepchehorskyy. Some of them excelled not only in engraving, but also in etching and mezzotint. The baroque introduced new allegorical and symbolic themes into illustrations. At the turn of the 17th century landscape illustrations (by D. Sinkevych) and battle scenes (by N. Zubrytsky) began to appear. Spiraling branches and acanthus leaves as well as elements of folk art were employed in the elaborate ornamentation that embellished the printed page. The engraving shop at the Kievan Cave Monastery Printing House was the leading center for book illustration in Ukraine. Ukrainian illustrators were in great demand in Poland, Lithuania, Belorussia, Moldavia, and Muscovy in this period.

Towards the end of the 18th century the art of illustration was influenced by \*classicism. Although engraving and etching continued to be widely used (eg, by F. Strelbytsky), a new technique of illustration – \*lithography – was introduced in the early 19th century. Because it was less expensive, easier to use, and more flexible than other techniques, it quickly became the favorite medium among illustrators. Masters of the technique included K. Trutovsky, M. Mikeshin, Y. Svoboda, O. Slastion, and V. Timm.

At the end of the 19th and the beginning of the 20th century photomechanical methods of reproduction were perfected, making it possible to base illustrations not only on prints but also on pen drawings and watercolors. Some of the leading Ukrainian illustrators of the 20th century are I. Izhakevych, M. Samokys, O. Kulchytska, Yu. Narbut, V. Krychevsky Sr, E. Kozak, V. Kasiian, O. Sodomora, B. Kriukov, M. Derehus, M. Dmytrenko, and

P. Andrusiv. Many of them have illustrated classics of Ukrainian literature. Some others who have contributed to this field are O. Dovhal, I. Ostafiichuk, H. Pustoviit, V. Sedliar, and O. Sakhnovska. B. Kriukov, S. Levytska, and V. Masiutyn have illustrated some classics of world literature. Among the most recognized modern designers of headpieces and tailpieces are Yu. Narbut, A. Sereda, P. Kovzhun, M. Butovych, V. Kasiian, V. Krychevsky Sr, J. Hnizdovsky, P. Andrusiv, M. Aleksii, and H. Yakutovych.

The most extensively illustrated literature is children's books and magazines. Some of the best-known artists in this area are E. Kozak, O. Kulchytska, O. Kurylas, O. Sodomora, P. Andrusiv, M. Levytsky, H. Mazepa, P. Kholodny, V. Lytvynenko, L. Dzholos, Ye. Soloviov, A. Rieznychenko, and T. Yablonska.

S. Hordynsky

**Ilnytsia** [Il'nycja]. v-4. Town smt (1978 pop 7,900) in Irshava raion, Transcarpathia oblast. It was first mentioned in 1450. Its lignite deposits have been mined since 1865. Existing mines were built mostly after 1945. Machine parts are also produced there.

**Ilnytsky, Luka** [Il'nyc'kyj], b and d? Community leader. In the 1870s he was a member of the Kiev Hromada and of the Southwestern Branch of the Imperial Russian Geographic Society, for which he collected ethnographic data. Ilnytsky had a bookstore and publishing house in Kiev. He published a number of Ukrainian works for the Hromada during a brief period of liberalization in the 1880s.

**Ilnytsky, Oleksander** [Il'nyc'kyj], b 1889 in Chornyy Ardiv, Ugocsa county, Transcarpathia, d 1947. Canon of the Greek Catholic church and political leader in Transcarpathia. Ordained in 1914, he served in the administration of the Mukachiv eparchy and by 1930 rose to the rank of canon. He edited several church journals: *Dushpastyr* (1924–33), *Myssiinyi vistnyk* (1931–8), and *Dobryi pastyr* (1932–42). Ilnytsky defended a separate Rusyn nationality, distinct from Ukrainian and Russian. Welcoming the Hungarian regime in 1939, he was appointed chief adviser to the commissioner for Subcarpathia (1939–44), chairman of the Subcarpathian Academy of Sciences (1942–4), and member of the upper house of the Hungarian parliament (1939–44). After Bishop O. Stoika's death in 1943, Ilnytsky became capitular vicar of the Mukachiv eparchy. In 1946 he was tried by the Soviets for collaborating with the Hungarians and found guilty of treason. He died in prison.

**Ilnytsky, Roman** [Il'nyc'kyj], b 18 June 1915 in Kryvche, Borshchiv county, Galicia. A journalist and political activist. He studied at Lviv and Columbia universities. In July 1941 he was a member of the Provisional Ukrainian Government in Lviv; he was then arrested by the Gestapo and deported to Sachsenhausen concentration camp, where he was interned from 1942 to 1944. In 1945–7 he

was the general secretary of the Central Representation of the Ukrainian Emigration in Germany and published the weekly *Chas* (1945–9) in Fürth. He was also the head of the Association of the Free Press of Central and Eastern Europe and the general secretary of the International Committee of Displaced Persons and Political Refugees. He contributed to the paper *Ukraïns'kyi samostiinyk* and was its chief editor in 1955–6. From 1954 he was active in the OUN (Abroad) (OUN[Z]) and in 1957–8 the head of its political council. In 1957 Ilynytsky immigrated to the United States. He was the cofounder of the Ukrainian Democratic Movement and its president in 1976–82. Since 1982 he has been vice-chairman of the Ukrainian Supreme Liberation Council. His major works are *The Free Press of the Suppressed Nations* (1950), *Deutschland und die Ukraine, 1934–1945* (2 vols, 1955–6), *Orhanizatsiia Ukraïns'kykh Natsionalistiv v Ukraïni, OUN(Z) i ZCh OUN* (The Organization of Ukrainian Nationalists in Ukraine, OUN[Z] and ZCh OUN, 1962), and *Pryznachennia ukraïntsiiv v Amerytsi* (The Destiny of Ukrainians in America, 1965).

S. Yaniv

Rev Vasyl Ilynytsky

**Ilynytsky, Vasyl** [Il'nyc'kyj, Vasył'], b 22 April 1823 in Pidpechary, Stanyslaviv county, Galicia, d 15 April 1895 in Pidpechary. Ukrainian Catholic priest, pedagogue, historian, and writer. A graduate of Lviv and Vienna universities, he was consecrated in 1848. That same year he became a member of the Supreme Ruthenian Council. From 1868 to 1892 he was principal of the Academic Gymnasium of Lviv. Using pseudonyms, such as Denys, Denys iz-nad Sereta, and Podolianyn, Ilynytsky published many popular articles on the history of Rus' and Cossack Ukraine, and several monographs such as *Starodavnyi Zvenihorod* (Ancient Zvenyhorod, 1861), *Starodavna Trebovlia* (Ancient Terebovlia, 1862), and *Perehliad iuzhnoruskoi istorii od r. 1337–1450* (A Survey of South-Ruthenian History from 1337 to 1450, 1875). He also wrote popular accounts of his travels and novelettes such as *Rohnida-Horyslava: Povist' istoricheska s x stolitiia* (979–986) (Rohnida-Horyslava: A Historical Novelette from the 10th Century [979–986], 1860), *Horbatyi: Povist' nachertana na pidstavi znaidenoho pamiatnyka* (The Hunchback: A Novelette Based on a Discovered Monument, 1877), and *Svaty* (The In-Laws).

**Ilynytsky, Volodymyr** [Il'nyc'kyj], b 1887 in Pidhaisi, Galicia, d 12 May 1942. Lawyer and community leader in the Drohobych region. He was the founder and head of \*Pidoima (1923–39), an association that represented

Ukrainians on whose land petroleum had been discovered. He organized private education and was an activist in the \*Front of National Unity from 1933. In 1939 he was arrested by the Bolsheviks. Sentenced to 10 years' imprisonment, he died en route to a labor camp in Central Asia.

**Ilovaiske** [Ilovajs'ke]. VI-19, DB IV-4. City (1970 pop 19,700) in Donetske oblast administered by the Khar'tskyzke city soviet. It was founded as a railway station in 1869 and is an important railway junction in the southern Donbas.

**Ilyrat.** A city of the \*Bosporan Kingdom founded in the 1st century AD. Its ruins still stand near Ivanivka in Lenine raion, Crimea oblast, 17 km southwest of Kerch. Excavations conducted since 1948 have revealed that the city was fortified with strong triple walls and towers. The remains of stone buildings and straight, paved streets have been uncovered. The city's inhabitants were mostly Hellenized Scythian and Sarmatian military settlers. Its ruins provide a vivid picture of the Greco-Scythian culture of the Bosporan Kingdom. The city was destroyed by the Goths in the 260s.

**Iman** (since 1973, called Dalnerechensk). A city in Primore krai in the Soviet Far East. Iman and its vicinity were settled by Ukrainians (42 percent of the population in 1926). In 1917–22 it was one of the centers of the Ukrainian movement in the Far East, with a local Ukrainian council (1918) and a Ukrainian National Committee (1920–2).

**Immigration.** During the Princely era, immigrants in Rus'-Ukraine were few; they were mostly Armenian, Greek, Polish, and Jewish merchants who settled in the larger towns. In the Principality of Galicia-Volhynia, the immigrants were mostly Poles and German artisans. Other immigrants included prisoners of war who were occasionally freed and allowed to settle in Ukraine (ie, Peche-negs, Torks, Cumans, and Yotvingians). During the periods of Lithuanian and Polish rule in the 14th and 15th centuries, in Western Ukraine immigration of Armenians and Germans increased, and Italian and Greek merchants began settling in the larger towns. In the 15th and 16th centuries a large immigration of Jews occurred. It was not as massive or as significant as that of the Poles, however, who colonized Galicia and, after the Union of Lublin in 1569, the fertile lands of Podilia, Right-Bank Ukraine, and, in the first half of the 17th century, Left-Bank Ukraine. Thereafter the Jews and the Poles were the principal national minorities in Ukraine until the early 19th century.

During the period of the \*Cossack-Polish War and the Hetman state of the mid-17th to the mid-18th century, immigration in Ukraine was minimal because of political turmoil. As the domination of Ukraine by Muscovy and its successor the Russian Empire grew from the late 17th century, so did the immigration of Russians. From the mid-18th century the tsarist government promoted the colonization of \*Southern Ukraine by Serbs (in so-called \*New Serbia and \*Sloviano-Serbia), Germans, Greeks, Bulgarians, and Moldavians. After Ukraine was partitioned between the Russian and Austrian empires in the late 18th century, the immigration of Poles and Jews into

its central and eastern lands ceased. The influx of Russians increased constantly throughout the 19th century, particularly in the cities and in the industrial centers of the Donets Basin. In the latter half of the 19th century, some 200,000 German, Czech, and Polish farmers settled on the parceled lands of the former Polish latifundia in Volhynia. In central and eastern Ukraine during the period 1890–1930, some two million immigrants, mostly Russians, arrived. According to the 1926 census, 23 percent of Soviet Ukraine's population consisted of immigrants, most of them Russians; 941,000 other foreigners were in Ukraine at the time of the census (70 percent of them were residing in urban centers).

In Western Ukraine under Austrian-Hungarian rule, small numbers of Germans arrived in the late 18th and early 19th centuries. Throughout the 19th century large numbers of Poles settled in Galicia and Bukovyna, mainly in the cities, in the Drohobych-Boryslav Industrial Region, and on the lands of the former Polish latifundia. This influx coincided with the mass emigration of Western Ukrainians, who were forced to leave because of rural overpopulation. More Poles (some 300,000) immigrated to Western Ukraine under interwar Polish rule. In the interwar period, some 30,000 Czechs settled in Transcarpathia, and a sizable number of Rumanians moved to northern Bukovyna and northern Bessarabia.

Since the 1930s, the mass immigration of Russians to the urban centers and industrial regions of Soviet Ukraine has intensified. It has been encouraged by the Soviet authorities, who have pursued a policy of Russification while destroying millions of Ukrainians during the famine, political repression, and deportations of the Stalinist terror. Since the Second World War the number of immigrants other than Russians in Ukraine has declined considerably. The number of Russians who have immigrated to Ukraine in the past half-century has been estimated at eight million.

(For details about Ukraine's national minorities, see \*Armenians, \*Belorussians, \*Bulgarians, \*Czechs, \*Germans, \*Greeks, \*Gypsies, \*Hungarians, \*Jews, \*Moldavians, \*Poles, \*Rumanians, \*Russians, \*Serbia, \*Slovaks, and \*Tatars.)

**Imperialism.** The process of territorial expansion by a state and its establishment of formal sovereignty or domination over subordinate political entities and societies that differ culturally and ethnically from it. The term

frequently connotes oppression and exploitation and the fusion of militarism and colonialism.

Ukraine has been the victim of imperialism on the part of its neighbors. Poland, for example, took the western and central Ukrainian lands and all of Belorussia as a result of the union of Poland and Lithuania (1385) when the Lithuanian ruler Jagiełło married the Polish queen Jadwiga. The most persistent form of imperialism from which Ukraine has suffered has been practiced by the Russian Empire and the Soviet Union, beginning with the policy of expansion and aggrandizement adopted by the Muscovite State in annexing neighboring principalities, especially Novgorod in 1478, and continuing with the subjugation of the Kazan Tatar Khanate in 1552 and the penetration and annexation of Siberia in 1649. Muscovy obtained the opportunity to penetrate eastern and central Ukraine with the Treaty of Pereiaslav (1654), under the guise of aiding the Ukrainian Hetman state that proclaimed its independence from Polish rule in 1648. The renaming of the Muscovite State as the Russian Empire (1721) reflected growing imperial ambitions that included the Russian annexation of Belorussia and the Right-Bank Ukrainian territories and Volhynia in the last quarter of the 18th century, with the partitioning of the Commonwealth of Poland. The Crimea was annexed in 1783 and Bessarabia in 1812.

Other forms of imperialism undertaken at the expense of Ukraine included that of the Habsburg dynasty's acquisition of Galicia in 1772 and Bukovyna in 1774. Hungarian claims to non-Magyar 'lands of the crown of St Steven' included Carpatho-Ukraine and Slovakia. In the Second World War Ukraine was an object of Nazi Germany's eastward drive for empire and suffered for three years as a battleground for the competing Nazi and Soviet imperialisms.

Imperialism is the outgrowth of various domestic and external circumstances. Muscovite and Russian imperialism was facilitated by the development of autocratic rule and an absolutist political order in the Muscovite State that its rulers acquired while collecting tribute from other principalities on behalf of the Mongol-Tatar authorities. Marx and Engels developed the concept of 'Oriental despotism' and used it to characterize the Muscovite State and Russia. The subjugation of alien peoples meant that the Muscovite State acquired a diverse population that prevented its future development into a conventional nation-state and impelled it on the course of an empire. Empire-building was also facilitated by taking advantage of opportunities, filling power vacuums, and selecting weakened victims whose subjugation involved little risk. Thus, in the 19th and 20th centuries the Russian Empire expanded in East Asia at the expense of a weakened China that could not defend itself, but this expansion also provoked the ire of Japan and led to Russia's military defeat in 1905. Russian imperialism also sought to take advantage of the balance of power when it participated in the partition of Poland, when it proposed to Great Britain the partition of the Ottoman Empire, and when it annexed Western Ukraine and Belorussia under the 1939 Nazi-Soviet Pact. The Russian quest for empire was sustained by a seemingly unending and obsessive search for 'security' by means of annexing contiguous territories and then penetrating into adjacent territories in order to ensure the security of the most recent acquisition.

Russian imperialism has relied heavily on Russian nationalist historiography that had its origins in the imperial designs of Peter I. The official political doctrine of autocracy promoted Russian imperialism. Russian historians have sought to justify expansionism, wars, and colonization as a natural and 'legitimate' process of development. The Russian claim to the history of Kievan Rus' was designed to broaden the historical and geographical claim of Muscovy and St Petersburg, which would have been reduced if Novgorod rather than Kiev were deemed the precursor of 'Russia.' The principal exception in Russian historiography was M. Pokrovsky, a Russian Marxist historian who criticized Russia's depredations against subject peoples and regarded Russian expansionism as a consequence of the state's failure to deal with domestic problems. Pokrovsky's writings were banned as part of Stalin's revival of Russian nationalism and subsequently remained in official disfavor.

Rationalization of empire has been provided by the adoption of a messianic role and civilizing mission as evidenced by the idea of Moscow being the 'Third Rome, and in the views of such Russian Slavophiles as F. Dostoevsky, N. Danilevsky, A. Khomiakov, and F. Tiutchev. Slavophilism depicted Russia as 'truth-possessing' and morally superior, as historically destined to redeem humankind. It claimed universality and easily developed into Pan-Slavism, which advocated Russian subjugation of other Slavic (and non-Slavic) peoples, even when they possessed older cultures that were more highly developed than that of the Russians. Justification was also sought in the obsession with obtaining Constantinople and in reviving a reduced Byzantine Empire as part of the Russian imperial plan by delivering the Balkan Christian peoples from Ottoman rule.

Russian expansionism also sought justification in the view that its purpose was the acquisition of 'warmwater ports.' This rationale does not explain Muscovy's acquisition of Siberia, and it ignores the fact that Russia had acquired an ice-free port at Murmansk as early as the 13th century but did not develop it until 1915. The theory was used to rationalize the Soviet claim to Dairen and Port Arthur in Manchuria at the 1945 Yalta Conference.

Ukraine has played a vital role in Russian imperialism. It has served as a *place d'armes* for the acquisition of Russian naval power in the Black Sea, and it has enabled the Soviet Union to exert political and military pressure against Poland, Czechoslovakia, Hungary, the Balkans, and Turkey. Ukraine's strategic position and its economic and human resources have been used to enhance Soviet Russian military capabilities.

**Impressionism.** An important movement in painting that arose in France in the late 1860s and is linked with artists such as C. Monet, C. Pissarro, A. Renoir, and A. Sisley, who sought to capture with short strokes of unmixed pigment the play of sunlight on objects. The

name of the movement was derived from C. Monet's *Impressions: Sunrise* (1872). Impressionism had a strong influence on Ukrainian painting. The first Ukrainian impressionists appeared at the end of the 19th century and were graduates of the Cracow Academy of Fine Arts, where they had studied under J. Stanisławski, L. Wyczółkowski, and J. Fałat. O. Novakivsky, who later embraced a symbolic expressionism reminiscent of V. van Gogh and F. Hodler, was one of the first Ukrainian impressionists. I. Trush, who preferred to work with grayed colors, adopted impressionism only partly. M. Burachek captured the sunbathed colors of the Ukrainian steppe. M. Zhuk and I. Severyn introduced decorative elements into their impressionist works. Impressionism was a major trend in Ukrainian painting until the early 1930s. Its leading exponents were O. Murashko, V. and F. Krychevsky, P. Kholodny Sr (landscapes and portraits), M. Hlushchenko, and O. Shovkunenko. Then M. Dmytrenko, M. Nediiko, M. Krychevsky, and M. Moroz continued the tradition of Ukrainian impressionism.

Impressionism gave rise to Neo-impressionism, which attempted to base painting on scientific theory; Post-impressionism, which cultivated the esthetics of color; and Pointillism, which broke down colors into their elementary hues and distributed them in mosaic-like patterns. S. Borachok, M. Radysh, and V. Khmeliuk may be included among the Neo-impressionists and Post-impressionists. With the imposition of socialist realism in the 1930s, impressionism in Soviet Ukraine was condemned as decadent and proscribed, although its influence in the better Ukrainian painters is evident.

Impressionist sculptors such as A. Rodin avoided sharp outlines and excessive detail in order to convey a general impression of the object. The leading Ukrainian exponents of this trend were M. Parashchuk, M. Havrylo, B. Kratko, S. Lytvynenko, and A. Pavlos.

Impressionism left its imprint also on music and literature. In music it strove to convey intimate and subtle moods. V. Barvinsky was a typical representative of this trend in music. Impressionism in literature is a manner of writing whereby the author does not try to represent reality objectively but to capture the impressions derived from it. The writer frequently centers his attention on the mental life of a character by simply registering his impressions or sensations instead of interpreting experience. The representative impressionist writers in Ukrainian prose are M. Kotsiubynsky, V. Stefanyk, H. Kosynka, and M. Khvylovy (although he shows traces of expressionism), and in poetry O. Oles. Impressionism often was linked with other literary trends such as Symbolism (D. Zahul) and Neoromanticism (V. Sosiura).

S. Hordynsky

**Imstycheve** [Imstyčeve]. Village (1980 pop 2,800) in Irshava raion, Transcarpathia oblast. It was first mentioned in the 15th century. The village was famous for its monastery, founded in 1661 by Bishop I. Zeikan of Mukachiv and visited by many pilgrims. In the 18th century it became a Basilian monastery. It was closed by the Soviets in 1946.

**Incantation** (Ukrainian: *zaklynnannia*). The use of chanted, spoken, or written formulas to bind spiritual powers to certain actions that will accomplish a desired goal. Incantations in Ukrainian folklore can be classified into

several groups according to their purpose. (1) Productive incantations to bring success in mushroom picking, hunting, fishing, beekeeping, and crop harvesting, ensure rainfall, clear away clouds, and destroy pests. (2) Defensive incantations to ward off or combat evil spirits that cause illnesses. (3) Family incantations to ensure personal and family happiness and prosperity, and success in love, marriage, and in giving birth. (4) Social or communal incantations to secure a superior's favor or success in litigation, and ward off fines, wounds or death in war, and epidemics in the community. (5) Malevolent incantations to inflict psychological suffering, illness, or death on an enemy in revenge for such wrongdoings as jilting, libel, robbery, and slaughter of livestock.

Incantations are one of the oldest genres of folklore. They originated in pre-Christian societies and reflect an anthropomorphic and magical world view. Later, they absorbed elements of the Christian religion such as petitions to Jesus Christ, the Virgin Mary, and various saints. Although folklorists deny this, incantations are still used in Ukraine today. It is interesting to note that there is no mention of incantations in the latest (1983) Soviet textbook on Ukrainian folklore for post-secondary schools, although a separate chapter was devoted to this topic in all previous editions.

**Incomplete secondary school** (*nepovna serednia shkola*). In Soviet Ukraine an incomplete general secondary education was provided by \*seven-year schools until 1959, and then by \*eight-year schools.

**Incunabula** (from the Latin: 'cradles'). The first books produced after the invention of typography in 1440 to 1500. Most incunabulas dealt with religious subjects and were printed in Latin. The text did not have spacing between paragraphs or between words. Initials and decorative frames were hand painted and there were no title pages or page numbers. Information about the book was given in the epilogue.

The first publications of a secular nature appeared in 1470. The first book in Old Slavonic was *Mysal*, printed in 1483 in \*Glagolitic and \*Cyrillic by the printers S. Fiol (1491) and Makarii (1494-5). During the 15th century about 35,000-40,000 editions (excluding broadsides) were printed. It is estimated that some 500,000 copies have been preserved. The largest collections can be found in the British Library in London, the National Library in Paris, the Bavarian State Library in Munich, and the Vatican Library in Rome. In the USSR there are approximately 10,000. Of this number about 750 editions are to be found in the Ukrainian SSR: 516 are in the Central Scientific Library of the AN URSR, 46 in the Library of Lviv University, 42 in the Lviv Scientific Library of the AN URSR, 24 in the libraries of Uzhhorod University, 18 in Kharkiv University, and 15 in the Lviv Museum of Ukrainian Art.

Since 1904 an international commission in Berlin has been keeping a register of incunabulas and, since 1924, it has published *A Catalogue of Incunabulas*, of which eight

volumes have appeared. As of 1985, the following catalogs of incunabulas have been published in Ukraine: F. Maksymenko's *Pershodruky (inkunabuly) Naukovoï Biblioteky L'vivskoho Universytetu* (First Prints [Incunabulas] of the Scientific Library of Lviv University, 1958), E. Aleksandrovich's *Inkunabuly Tsentralnoi biblioteki Khar'kovskogo universiteta: Katalog* (Incunabulas at the Central Library of Kharkiv University: A Catalogue, 1962), B. Zdanevych's *Kataloh inkunabul (A Catalogue of Incunabulas, Kiev, 1974)*, P. Lutsyk's *Inkunabuly L'vivskoi Naukovoï biblioteky im. V. Stefanyka AN URSR* (The Incunabulas at the V. Stefanyk Lviv Scientific Library of the AN URSR, 1974), and Yu. Sak's *Inkunabuly biblioteky Uzhhorodskoho derzhaunoho universytetu* (The Incunabulas of the Library of the Uzhhorod State University, 1974).

Y. Boshyk, S. Yaniv

**Independence, Struggle for (1917-20)**. The term used to describe the political, military, and diplomatic activities to achieve Ukrainian statehood in all Ukrainian territories. At first this struggle concerned the central Ukrainian territories, which, until 1917, were part of the Russian Empire. Following the \*February Revolution of 1917, three Ukrainian state formations were established in central Ukraine. On 17 March the \*Central Rada, headed by M. \*Hrushevsky, was created in Kiev. The state-founding proclamations of the Central Rada were the four \*universals: the First (23 June 1917) proclaimed Ukrainian autonomy; the Second (16 July) stated the agreement and the reciprocal recognition between the Central Rada and the \*Provisional Government; the Third (20 November) created the \*Ukrainian National Republic (UNR); and the Fourth, dated 22 January 1918, declared the independence and sovereignty of the UNR on 25 January 1918. The session of the Central Rada on 29 April 1918 ratified the constitution of the UNR and elected M. Hrushevsky president. That same day, however, a coup d'état was staged with the support of the Germans by conservative circles at the congress of the \*All-Ukrainian Union of Landowners of Ukraine. Gen P. \*Skoropadsky was proclaimed hetman of the \*Ukrainian State, which replaced the UNR. The hetman decreed the 'Laws for the Provisional Regime in Ukraine,' which annulled the previous legal status and all laws of the UNR, and formed the \*Hetman government.

The Ukrainian political formations that opposed the hetman formed the \*Ukrainian National Union at the beginning of August 1918 and on 13 November they appointed the \*Directory of the UNR, headed by V. Vynnychenko. Following P. Skoropadsky's 14 November 1918 proclamation of the federation of Ukraine with Russia, the Directory began an anti-hetman uprising that culminated on 14 December in the restoration of the republican rule of the UNR.

The Directory introduced the labor principle of rule with the \*Labor Congress as the highest legislative body and with the \*Council of National Ministers of the UNR as the executive organ. On 11 February 1919 V. Vynnychenko stepped down as head of the Directory and his post was taken over by S. \*Petliura, who also became \*supreme otaman of the \*Army of the UNR. He occupied these positions until his death on 25 May 1926.

In the western Ukrainian lands that formed part of the Austro-Hungarian Empire, the \*Ukrainian National Rada (UNRada) was formed in Lviv on 18-19 October 1918

and proclaimed a Ukrainian state on the territory of Galicia, northern Bukovyna, and Transcarpathia. It assumed power in Galicia on 1 November 1918 and in the Ukrainian part of Bukovyna on 6 November. On 9 November the UNRada announced the establishment of the \*Western Ukrainian National Republic (ZUNR) and formed a government, the \*State Secretariat of the ZUNR, headed by K. \*Levytsky. On 22 January 1919 the union of the ZUNR with the UNR was solemnly proclaimed in Kiev; following this event, the ZUNR officially became the \*Western Province of the UNR. On 9 June 1919 the UNRada appointed Ye. \*Petrushevych plenipotentiary dictator of the ZUNR.

The essential military forces in Central Ukraine were volunteer army formations, among which the best were the regular units of the \*Sich Riflemen. These units formed the Army of the Ukrainian National Republic, which defended the Ukrainian state against the Bolshevik Red Guards units, which came from Russia or were formed in Ukraine, as well as against the White armies of A. \*Denikin and P. \*Wrangel. Alongside the regular Ukrainian army formations, the \*Partisan movement in Ukraine (1918–22), consisting of spontaneously formed, uncoordinated, often anarchic (see N. \*Makhno) units led by local otamans, fought for the national and social goals of the revolution, although they did not share the ambitions of Ukrainian statehood.

In Western Ukraine the struggle for Ukraine's liberation was led by the \*Ukrainian Sich Riflemen, who were first part of the Austro-Hungarian army and later incorporated into the \*Ukrainian Galician Army (UHA), which was the regular army of the ZUNR. It defended the Western Ukrainian state from invasion by Poland (see \*Ukrainian-Polish War). Later, together with the Army of the UNR, UHA fought against the Bolsheviks and the Whites.

The UNR and the Ukrainian state were intensely active in \*diplomacy and were recognized by several states. A delegation from the UNR signed the Peace Treaty of \*Brest-Litovsk with the Central Powers.

Under the pressure of unfavorable conditions at the front, the Directory signed the Treaty of \*Warsaw with Poland in April 1920, and the two began a joint advance against the Soviet army in Ukraine (see \*Ukrainian-Soviet War). Under Bolshevik pressure the Army of the UNR retreated from Ukraine on 21 November to Poland. The last organized military encounter of the struggle for Ukrainian independence was the second \*Winter Campaign led by Yu. \*Tiutiunnyk, although the partisan struggle continued for some time. The \*Government-in-exile of the UNR continued the political battle for independence throughout the interwar period.

A. Zhukovsky

The first consistory of the Independent Greek church; Bishop Seraphim is in the center.

**Independent Greek church.** A church established in Winnipeg in 1903–4 through the efforts of K. \*Genik, I. \*Bodrug, and I. Negrich. Adherents of the anticlerical tradition of the Ukrainian Radical party, Genik and Bodrug opposed Russian Orthodox and Roman Catholic missionaries, whom they accused of favoring ritual and tradition over moral and ethical principles in religious life. Influenced by Presbyterian theologians at Manitoba College, they established the new church to act as a bridge to Protestantism. The Byzantine rite was retained, but the administration of the church was to be democratic with its ministry espousing evangelical principles. In 1905 a weekly, \**Ranok*, was established, and classes for ministers were organized at Manitoba College. By 1907 the church had 24 Ukrainian ministers and missionaries, some gymnasium or university graduates from Galicia, but mostly poorly educated men, formerly associated with the eccentric Bishop \*Seraphim (Ustvol'sky). Subsidized by the Presbyterians, the new clergy served some 3,500 families, mainly in rural Manitoba and Saskatchewan. In Alberta the Edmonton congregation was the most reformed. After 1910 popular support waned as Protestant reforms were introduced into the liturgy. Growth was also checked by the traditionalism of most Ukrainian peasant immigrants, divisions within the ranks of the clergy, the revitalization of Ukrainian Catholic forces after Metropolitan A. \*Sheptytsky's 1910 visit to Canada, and deteriorating relations with the Presbyterian sponsors.

To the Presbyterians, the conversion to Protestantism was the first step toward absorption into a culturally homogeneous English-speaking Canadian nation. When the mass of Ukrainian converts failed to appear, the Presbyterians abandoned the project in 1912. Nineteen ministers and missionaries, but not Bodrug, converted to Presbyterianism, although only a few remained within the Presbyterian (and later the United Church) fold permanently.

O. Martynovych

**Independent Social Democratic Youth Association** (Nezalezha sotsial-demokratychna spilka molodi). Youth

organization of the Independent Social Democratic Party of Ukraine. It was active in Soviet Ukraine in 1919–20 and opposed the \*Communist Youth League of Ukraine. In 1920 it merged with the \*Communist Youth Association. Its members later joined the \*Ukrainian Communist party.

**Independentists.** See Ukrainian Social Democratic Workers' Party (Independentists).

**Indigenization** (*korenizatsiia*). A policy adopted by the Twelfth Congress of the Russian Communist party (17–25 April 1923) but only partially and briefly implemented. Acknowledging that the tsarist Russian government had oppressed and exploited its non-Russian subjects and caused their inequality, and that vestiges of these practices remained in the USSR, the congress resolved to rectify this condition by encouraging the economic and cultural development of the non-Russian Soviet republics with the aim of making them equals of the Russian RSFSR. Accordingly, leading political, economic, and cultural cadres in each republic were to be recruited from among the local, indigenous population. The policy involved wide-ranging reforms: the strengthening of local cadres, the use of national languages in education and government, the de-Russification of the state apparatus, the fostering of national cultures, and even the creation of national-republican armies. The congress condemned not only local nationalism but also Russian chauvinism, which was deemed to be more pernicious.

Indigenization was bitterly opposed by the 'imperialist' elements in the party and Soviet government. Consequently, it did not persist and public mention of it has been avoided.

The implementation of indigenization was different in each republic. In Ukraine it was called \*Ukrainization, which was quite successful, despite the opposition of Russian chauvinist functionaries, until its abolition in 1933.

**Industrial crops.** A term applied to agricultural crops that serve as basic raw materials for various industries. Sometimes also called technical crops, they require extensive off-farm processing in order to be efficiently utilized. Industrial crops grown in Ukraine include oil-bearing crops (sunflower, castor bean, seed flax [for linseed oil], soybean), sugar crops (beet), volatile-oil-bearing crops (coriander, mint, rose, salvia), fiber crops (flax [for linen], hemp), and others (hops, tobacco). Some of these have been cultivated in Ukraine for many centuries (flax, hemp), others since the 19th century (sunflower, sugar beet, hops), and some only in more recent years.

Under Soviet rule, cotton, caoutchouc, and kenaf were introduced, but natural conditions in Ukraine proved unfavorable and these crops are no longer raised. In 1940, for example, cotton was grown on 238,000 ha (8.5 percent of the industrial crop area), but within a decade it had been phased out.

A rapid expansion of areas allocated to industrial-crop production, particularly sugar beets and sunflowers, occurred in the 1950s and 1960s (see table 2). The areas were stabilized during the 1970s, but since 1980 they have declined slightly because of unfavorable economic conditions and shortfalls in agrotechnology and labor.

Industrial-crop production has generally mirrored hectareage expansion and, to a lesser extent, higher yields. During the 1970s and 1980s, however, the output of industrial crops fluctuated widely (see table 1). This was particularly true of sugar beets. In 1976, for example, the sugar-beet harvest set a new record of 61.8 million t, 23.5 million t (62 percent) more than in 1975. Relative to leading producer countries, Ukraine's rank in sugar-beet production in 1981–4 was as follows: Ukraine (at annual average of 43.9 million t) = 100.0, the USSR = 170.3, France = 62.1, the United States = 47.0, and West Germany = 44.1. In sunflower-seed production: Ukraine (at 2.3 million t) = 100.0, the USSR = 214.2, Argentina =

TABLE 1  
Soviet Ukraine's industrial-crop production, in million t

	1913	1940	1950	1960	1970	1980	1985
Sugar beets	9.337	13.052	14.624	31.761	46.309	48.841	43.569
Sunflowers	0.071	0.946	0.727	1.664	2.654	2.257	2.287
Fiber flax	0.004	0.019	0.012	0.074	0.089	0.092	0.118
Hemp	—	0.047	0.027	0.019	0.023	0.008	0.009

TABLE 2  
Soviet Ukraine's industrial crops (in million ha with % of all crops in parentheses)

	1913	1940	1950	1960	1970	1980	1985
Total area	0.904 (3.2)	2.699 (8.6)	2.890 (9.4)	3.574 (10.7)	3.939 (12.0)	4.071 (12.1)	3.669 (11.2)
Sugar beets	0.558 (2.0)	0.820 (2.6)	0.828 (2.7)	1.457 (4.3)	1.659 (5.1)	1.775 (5.3)	1.641 (5.0)
Sunflowers	0.076 (0.3)	0.720 (2.3)	0.894 (2.9)	1.505 (4.5)	1.710 (5.2)	1.683 (5.0)	1.480 (4.5)
Fiber flax	0.016 (0.1)	0.118 (0.4)	0.126 (0.4)	0.223 (0.7)	0.230 (0.7)	0.226 (0.7)	0.211 (0.6)
Hemp	0.127 (0.5)	0.200 (0.6)	0.183 (0.6)	0.098 (0.3)	0.063 (0.2)	0.031 (0.1)	0.022 (0.1)

82.1, the United States = 65.6, and China = 44.7. In fiber-flax production: Ukraine (at 103,000 t) = 100.0, the USSR = 376.7, China = 86.4, France = 60.2, and Poland = 32.0.

Industrial crops are grown in all of Ukraine's geoclimatic zones. The forest-steppe zone, with favorable soils and moisture, produces the greatest quantity, particularly of sugar beets, but also of sunflowers, tobacco, and hemp. Oil crops, especially sunflowers, are raised primarily in the relatively dry steppe zone. Fiber flax, hops, and hemp are produced in the more humid Polisia region, while roses and some tobacco are grown in the sunny Crimea.

I. Kuzych-Berezovsky

**Industry.** An important economic sector, subdivided into branches including \*electric power; \*fuel; ferrous \*metallurgical; non-ferrous metallurgical; chemical and \*petrochemical; \*machine building and metalworking; \*lumber, \*woodworking, and \*paper; \*building-materials; \*construction; \*glass and china; \*light; \*food; microbiological; medical; \*flour milling and \*mixed-feed; and \*printing industries.

**History to the mid-19th century.** As human civilization developed on the territory of Ukraine, so did various non-agricultural economic activities (see \*Crafts). Small-scale manufacture in Ukraine began developing in the 17th century. The Polish-ruled regions of Western and Right-Bank Ukraine remained economically backward agricultural lands, where the population (four-fifths serfs) eked out a subsistence form of living; their meager demand for non-agricultural goods was satisfied by a widespread \*cottage industry. The needs of the nobility, their retainers, and the burghers were met primarily by goods imported from abroad and by products crafted by domestic artisans, many of them \*Germans, \*Jews, and \*Armenians.

In Left-Bank and \*Slobidska Ukraine, however, conditions for industrial development were relatively favorable. Low population density, greater personal freedoms, and fertile land there fostered a higher standard of living and a concomitant increase in the demand for manufactured products, particularly in the growing towns and cities. This demand was met less by imports and increasingly by local production stimulated by the mercantilist policies of the hetmans. Such policies, especially by I. Mazepa and, after the demise of the Hetman state, by certain Russian tsars, led to a growth in the manufacture of saltpeter, salt, window glass, crude iron, distilled liquor, and woolen textiles. These products not only were sold on the domestic market, but were also exported to Russia and other countries. Several large enterprises were founded in the early 18th century: a textile factory in Putyvl, a tobacco plant in Okhtyrka, sail-and-linen plants in Pochep and Sheptaky, a gunpowder plant in Shostka, and silk plants in Kiev and Nizhen.

After southern Ukraine was incorporated into the Russian Empire in the second half of the 18th century, the tsarist government promoted its settlement by granting land to both nobles and peasants. The rapid agricultural development was not accompanied by any immediate industrial growth, although some industry was developed in a few of the new port cities, such as Odessa, Kherson, and Azov.

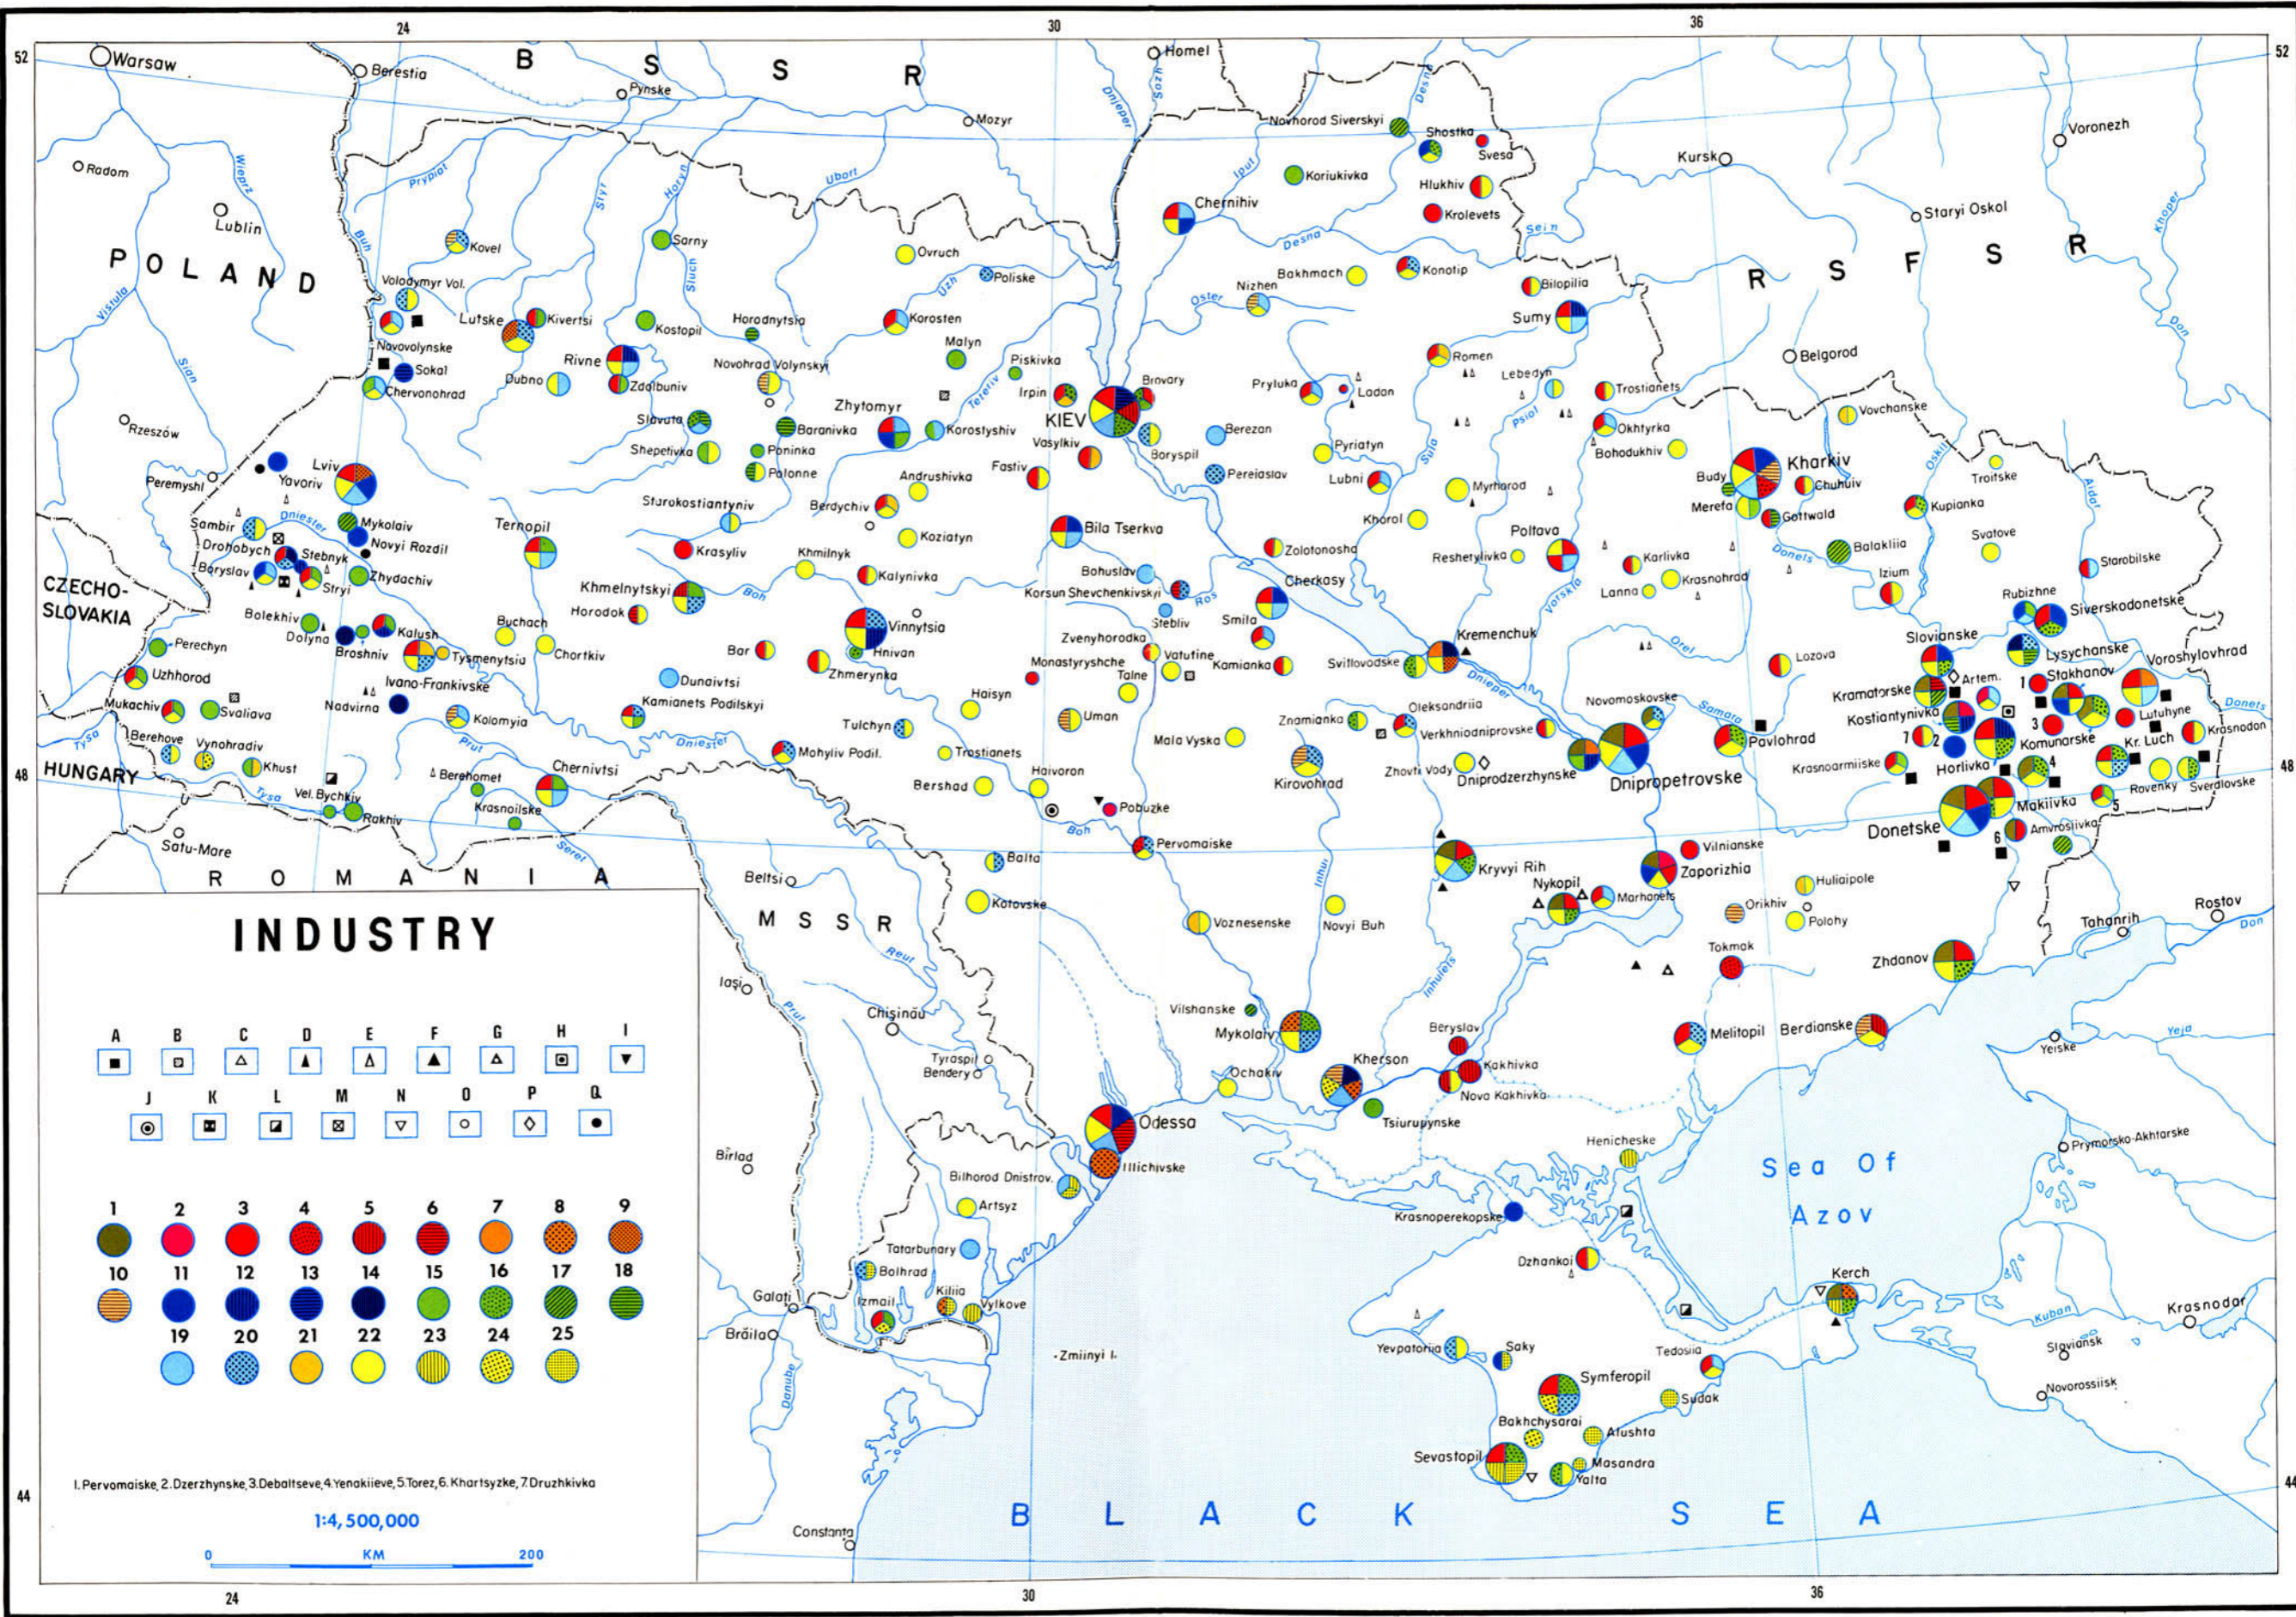

## INDUSTRY

### *Mining and extraction*

- A. Anthracite
- B. Lignite
- C. Peat
- D. Petroleum
- E. Natural gas
- F. Iron ores
- G. Manganese ores
- H. Mercury ores
- I. Graphite
- J. Nickel and chromite ores
- K. Ozokerite
- L. Salt
- M. Potassium salt
- N. Flux limestones
- O. Kaolinities
- P. Refractories
- Q. Sulfur

### *Manufacturing and processing*

1. Ferrous metals
2. Non-ferrous metals
3. Machine building and metalworking
4. Energy-generating machinery
5. Electrical machinery
6. Machine tools and instruments
7. Railroad machinery
8. Ships (including repairs)
9. Automobiles
10. Tractors and agricultural machinery
11. Chemicals
12. Mineral fertilizers

Modern industrial development in Ukraine began at the end of the 18th century. The tsarist government in St Petersburg established new factories and managed them or leased them to private entrepreneurs. Industrial enterprises were also founded by the landowning nobles, especially on the Right Bank, to process agricultural raw material – sugar refineries, distilleries, and flour mills. Between 1825 and 1860, the number of mechanized plants in the nine Ukrainian gubernias of the Russian Empire increased from 674 to 2,709, the number of industrial workers grew from 15,200 to 85,800, and the value of output rose from 15.7 to 34.4 million rubles. In 1860, Ukraine accounted for 17.6 percent of the empire's plants, 15.1 percent of its workers, and 11.8 percent of the value of its output. Kiev gubernia, with its various consumer-goods industries in Kiev and sugar refineries in the countryside, was the most developed and accounted for 38 percent of Ukraine's workers and 42 percent of its output. Kharkiv and Chernihiv gubernias were second and third in terms of industrial development.

**The mid-19th century to 1914.** The turning point in the economic modernization of Ukraine and of the Russian Empire as a whole was the abolition of serfdom in 1861. This measure was motivated by the need for a solid economic foundation for the empire's political aspirations, ie, a modernized agricultural system, greater labor mobility and industrial growth, and increased financial liquidity. Of particular importance for Ukraine's economy was the construction of railroads during the 1870s and 1880s. The railroads brought many benefits through low-cost transportation. Cheaper coal from the Donbas and iron ore from the Kryvyi Rih Basin led to phenomenal growth in ferrous metallurgy and related industries. Cheaper transport stimulated exports of grain, other agricultural products, and various industrial products (sugar, spirits, coal, rails). Railroad expansion gave impetus to industries ancillary to railroad construction. Finally the linking of Right- and Left-Bank Ukraine with southern Ukraine integrated the various Ukrainian regions into an economic entity, a national economy, and gave rise to common economic interests that were occasionally different from those of other parts of the Russian Empire.

To ensure the attainment of the emancipation reform's objectives, the central government intensified its intervention in economic life by introducing tariffs on certain products and thus facilitating their production at home, subsidizing certain enterprises, reducing taxes on others, and introducing the gold standard. The last measure in part increased foreign investment in the empire, while the convenient location of rich mineral resources attracted it into Ukraine. Thus, by 1913, Ukraine – which accounted for less than one-fifth of the empire's industrial output – was the recipient of about one-third of all foreign investment in the empire. Prior to the First World War, foreign-owned (mainly French, British, and Belgian) companies produced 70 percent of Ukraine's coal, 67 percent of its pig iron, 58 percent of its steel, and 100 percent of its machinery (see \*Capitalism). The sugar industry was a notable exception: it was overwhelmingly owned by local producers, many of them Ukrainian (such as the Yakhnenko, Symyrenko, Kharytonenko, Tere-shchenko, Kandyba, and Arandarenko families).

Ukraine's industry expanded particularly rapidly during the last third of the 19th century. Between 1860 and 1895, the number of enterprises increased from 2,147 to

30,310, the number of workers from 85,800 to 205,300, and output from 47.2 to 260.9 million rubles. Table 1 shows the growth in output of some important products during this period. This remarkable growth was interrupted by the European economic crisis of 1900–3. Growth resumed soon after, however, with a noticeable shift in emphasis from the production of producer goods to that of consumer goods. The recovery is reflected in the increase in the number of industrial workers, from 354,700 in 1902 to 631,400 in 1914.

TABLE 1  
Growth of some important products in the nine Ukrainian gubernias of the Russian Empire

Coal	1860–90	12.36 %
Iron ore	1870–90	18.4 %
Pig iron	1880–90	23.7 %
Rolled steel	1880–90	19.8 %

Granulated sugar	1881/2–89/90	6.1 %
Bricks	1865–95	6.0 %
Woolen textiles	1865–95	9.0 % decrease

One of the characteristics of Ukraine's industrial development was its skewed structure. The extractive, industrial-materials, and food-products branches were generally better developed than the branches producing finished goods (see table 2). The tsarist government's policies and Ukraine's resource endowment explain the unbalanced structure of Ukraine's industry. The railroad network and transportation tariffs facilitated the export of Ukraine's rich mineral, industrial, and agricultural raw materials resources to manufacturing centers in central Russia, mainly those of Moscow and St Petersburg, and customs duties favored the export of similar products abroad. This retarded the production of capital equipment and consumer goods in Ukraine.

The weight of the extractive and industrial-materials branches determined the regional distribution of Ukraine's industry; the regions that experienced growth were those with the necessary resources for the development of these branches. Table 2 illustrates the distribution of industrial output in 1910 within the present borders of Soviet Ukraine. The most developed was Katerynoslav gubernia in the southeast, mainly as a result of the rich mineral resources and ferrous metallurgy of the Donbas and the Katerynoslav and Kryvyi Rih regions. Mining, metallurgy, and some machine building in the southeast were supplemented by flour milling and some machine building on the Black Sea littoral. In the southwest (the Right Bank) and the northeast (the northern Left Bank), food processing (predominantly of beet sugar, but also of flour and liquor) was the leading industry.

Austrian-ruled Galicia, Transcarpathia, and Bukovyna were industrially less advanced than Russian-ruled Ukraine. Petroleum extraction was of great importance in Galicia at the turn of the century, while woodworking predominated in Transcarpathia and Bukovyna.

**The interwar period.** Ukraine's industry was severely damaged during the First World War and the 1917–20 struggle for Ukrainian independence. After the consolidation of Soviet rule, reconstruction during the period of the \*New Economic Policy proceeded swiftly, and Ukraine's industry regained its prewar output level by

TABLE 2  
Structure of industrial output in Ukraine in 1910 (within the present boundaries of the Ukrainian SSR)

Industrial region*	Branch distribution (% of region)

Ukraine as a whole	100.0	22.3	13.6	4.8	49.5	19.5	2.3	1.3	6.2

\*Including the smaller territorial subdivisions of Yuzivka, Luhanske, Mariupil, and Katerynoslav in the southeast; Kiev, Zhytomyr, Rivne, Berdychiv, Kamianets-Podilskyi, Vinnytsia in the southwest; Kharkiv, Chernihiv, Sumy, and Poltava in the northeast; Odessa, Kherson, Mykolaiv, Sevastopol, Teodosiia, Symferopol on the Black Sea; and Lviv, Boryslav, Drohobych, Chernivtsi, and Mukachiv in Western Ukraine.

1928. The first two \*five-year plans (1928–32 and 1933–7) were crucial for Ukraine's future industrial development: the planning and management system and industrialization objectives introduced at that time have largely remained in force to this day. According to official Soviet statistics, which tend to bias indexes upwards, the output of Ukraine's large-scale industry (the bulk of all industry) increased 5.5 times between 1928 and 1937. According to revised Western estimates, Ukraine's total industrial output between the two benchmark years increased 3.4 times; the output of machine building and metalworking increased 6.1 times; of other producer-goods branches, 3.1 times; of the food industry, 1.4 times; and of light industry, 3.0 times.

Table 3 reflects the remarkable growth of Soviet Ukrainian industry during the years 1928–40. It also illustrates the general Soviet approach toward industrialization: the emphasis on the production of producer goods over consumer goods and the shift in importance of producer-goods production from Ukraine to some Russian regions, mainly in the Urals and western Siberia, during this period. Ukraine's share of the USSR total declined chiefly in producer-goods production between the two benchmark years, while its shares in production of certain consumer goods increased.

The rapid increases in industrial output took place mainly because of increases in inputs. The growth of resource productivity was negligible. The number of workers increased between 1929 and 1940 from 855,000 to 2,213,000, or 2.6 times. The increase in fixed assets was also considerable, because 47.9 percent of Ukraine's total investment was allocated to industry during the First Five-Year Plan, 46.7 percent during the Second Five-Year Plan, and 42.6 percent during the first three and one-half years of the Third Five-Year Plan. As a result, several important heavy-industry enterprises were constructed during this period, including the Kharkiv Tractor Plant, the Dnieper Hydroelectric Station, the Zuivka, Siverskodonetske, and Kryvyi Rih state regional power stations, the metallurgical plants Azovstal in Mariupil (now Zhdanov) and Zaporizhstal in Zaporizhia, and machine-building plants in Kiev and Kramatorske. As their locations indicate, industrialization efforts were concentrated in the regions with abundant raw materials – the Donbas and Dnipropetrovske oblast – and the de-

industry of the USSR did not change noticeably between the benchmark years (see table 4). But its share of investment declined steadily, reflecting the determination of the Soviet leadership to develop the Asian parts of the RSFSR, primarily because of the availability of the rich resources there and defense considerations. While this policy - which is still in force - may be justified in terms of long-term development and for reasons of defense, it was economically inefficient during the interwar period. Capital productivity was higher in practically all of the

industrial branches in Ukraine than in the favored Asian regions. The industrial development of Galicia under Poland, Transcarpathia under Czechoslovakia, and Bukovyna under Rumania stagnated during this period.

**The postwar period.** Because of Ukraine's geographical location, its industry was severely damaged during the Second World War. At the beginning of the hostilities, the Soviet authorities dismantled and evacuated 544 complete plants eastward, primarily to western Siberia, with the intention of reassembling them for use in the war effort against the Germans. Because of poor organization and the lack of supplementary inputs, only a small portion of these enterprises were actually put into operation. The remaining equipment and machinery were either included in the existing enterprises or remained unutilized, while unevacuated enterprises were systematically destroyed by the retreating Soviet authorities. The Germans were both unable and unwilling to revive industrial activity during their occupation of Ukraine, and whatever was still usable they destroyed prior to the return of the Red Army. According to Soviet statistics, the damage incurred by Ukraine's industry during the war amounted to 44 billion rubles (in 1941 prices); 16,150 industrial enterprises were completely destroyed or extensively damaged. It is difficult to apportion exactly the responsibility for this destruction, but it is safe to assume that the Soviet authorities were no less culpable than the Germans.

The main Soviet objective during the early postwar years was the speedy reconstruction of industry, even at the expense of other economic sectors. Because of great sacrifices by the population, the prewar level of output was already exceeded by 1950 (see table 5). Reconstruction was facilitated by installing machinery and equipment taken by the USSR as reparations from its former enemies. There is no indication that any of the assets of Ukraine's industry that were evacuated at the beginning of the war were ever returned.

A trend of constantly declining growth rates can be observed in Ukraine during the postwar period, as in all of industry in the USSR. The decline has been particularly sharp since the mid-1970s (see table 6). The growth rates of individual industrial branches during the years 1950-65 and 1965-85 are presented in table 7. The growth of the traditional branches of Ukraine's industry - fuels (especially coal mining), ferrous metallurgy, and food processing - slowed down relatively more than that of other branches. Soviet statistics have tended to bias growth rates upwards, especially during the early postwar years, and give a growth rate for Ukraine's industry of almost 13 percent between 1950 and 1958. Although revised Western estimates show it was closer to 9 percent, even this lesser figure can be considered robust by world standards. Industry's share in Ukraine's net material product varied between 48.1 percent in 1960 and 50.5 percent in 1975. According to a Western estimate, its share in the gross national product was 39.3 percent in 1970. Ukraine has not regained its prewar position within the entire industry of the USSR, however, even though the growth rates of its industry and that of the USSR as a whole have been almost identical during the 1950-85 period (8.0 percent), because Ukraine suffered much more from the war than the rest of the USSR.

The development of Ukraine's industry during the postwar period can be summarized by using the indicators in table 8. The growth of output in the years 1965-

TABLE 8  
Growth of output and input and Ukraine's shares in USSR industry during the postwar period

	Growth rates (%)			Ukraine as % of Soviet economy		
	1950	1950-65	1965-85	1950	1965	1985
Output (in billion rubles)	135.9	11.1	5.7	17.8	18.7	18.6
Employment (in thousands)	2,509.0	4.8	1.9	16.4	18.4	19.4
Fixed capital (in billion rubles)	32.0 (1965)	NA	7.2	NA	18.4	16.7

NOTE: The total Soviet investment in Ukraine was 16.1% in 1951-60, 15.5% in 1961-70, 14.5% in 1971-80, and 15.1% in 1981-5.

85 was almost half that of the years 1950-65, although Ukraine's shares in the USSR for the three benchmark years did not change appreciably. The slowdown in output growth in Ukraine could be attributed largely to a slowdown in the expansion of inputs (labor and capital) rather than to the productivity. Employment growth fell sharply from 4.8 percent per annum over 1950-85 to only 1.9 percent over 1965-85. Also, the share of Soviet investment in Ukraine diminished steadily after 1960 (table 8). Since Soviet fixed-capital growth declined after 1960, the declining Ukrainian share of investment means Ukrainian fixed-capital growth fell even more than the Soviet total.

Some reasons for the slowdown of industry during the last two decades are applicable to the entire USSR, including Ukraine. First, in view of the declining rate of entrants into the labor force and the continued high rate of capital formation, diminishing returns to capital are being experienced. Second, a decline in resource productivity - the result of inefficient and centralized planning and management, including a defective incentive structure - is often suggested as a cause of slowdown. There are also factors that are specific to Ukraine: depleted fuel (coal, oil, gas) reserves and the rising cost of their extraction, exhausted hydro energy sources, a water shortage, and an imbalance between the supply of agricultural raw materials and the necessary processing facilities. Perhaps of greatest importance is the relatively declining allocation by the central planners of investment in the economy of Ukraine, including its industry (table 8). As a result, new technological processes and the modernization of the industrial structure cannot be fully introduced in Ukraine. Instead, the allocation of investment to develop the Asian parts of the RSFSR, which began in the early 1930s, has been intensified since the mid-1960s (eg, the construction of several territorial production complexes in Siberia and the Baikal-Amur Railway Trunk Line). From the standpoint of the entire Soviet economy, such investment distribution may be inefficient. According to various Western studies, the productivity of capital and of total resources has been higher for most of the postwar period in Ukraine than in the RSFSR, although a reversal in this trend seems to have been taking place since the mid-1960s.

Several changes in the planning, management, and incentive structure of industry were introduced in the USSR during the postwar period. The system established under Stalin in the late 1920s and early 1930s was characterized by a strict centralization of decision-making powers in the hands of planners and union ministries in Moscow. The resulting stifling of local initiative proved

to be detrimental to economic growth during the 1950s. The economic reforms of 1957 shifted the locus of decision-making from Moscow to regional authorities (see \*Regional economic councils) and, in some measure, the republics. But this relatively decentralized system was replaced in 1965 by one that revived the ministerial structure and, at the same time, allocated greater powers to individual enterprises. Because the subsequent performance of industry was unsatisfactory, the prerogatives of enterprises were gradually abrogated. A so-called economic experiment was introduced in 1983, according to which some planning and managerial powers, primarily with respect to the wage bill and incentive funds, were allocated to five ministries in Moscow and some republics (the Ministry of the Food Industry in Ukraine). What the outcome of this experiment will be is as yet unclear. It is safe to say that all these reforms have not exerted a differential effect on Ukraine's industrial performance. The 1957-65 period of regional economic councils was, however, somewhat conducive to a limited widening of the Soviet Ukrainian government's autonomy.

In view of present-day conditions in Ukraine, Soviet leaders have formulated a specific approach toward Ukraine's industrial development in recent official documents, which state that Ukraine should specialize in energy-, investment-, and water-saving branches and processes. The decline in coal production should be arrested, nuclear-energy generation should be expanded, and various energy-saving measures should be undertaken; new investment should be allocated to prominent branches such as coal and ferrous metallurgy only for reconstruction and not for the construction of new facilities; Ukraine's industry should become specialized in (1) machine building (electricity-generating equipment, metal lathes, and livestock- and animal-feeds machinery), (2) certain skilled, labor-intensive industries (automobiles, computers, electrical and radio technology, and ball bearings), and (3) the output of certain raw and industrial materials (iron and manganese ores, electric

TABLE 9

power, gas, superphosphate) for export, primarily to the European Comecon countries; and new facilities for processing export products and imports should be constructed near the Black Sea ports. It appears that such an investment policy has been followed in the past, especially since 1970 (see table 9). Of all branches, only

machine building has received more investment, while the decline of investment in fuels and food processing has been quite pronounced.

Table 10 presents the growth in output of individual products between 1940 and 1985 and their shares in the USSR for the benchmark years. The data by and large

confirm previous findings in value and aggregate terms: the recent slowdown in the growth rate of all industry, a change in the structure of Ukraine's industry with an emphasis on machine building, and the decreasing share of Ukraine's output in the overwhelming majority of products in the USSR. Ukraine is an important world producer of various industrial products. For example, in 1983 Ukraine ranked 1st in the world in the output of manganese ore, 2nd in iron ore, 3rd in tractors, 4th in sugar and crude steel, 5th in TV sets, 6th in butter, and (in 1975) 8th in cement. It lagged behind, however, in the output of other commodities, particularly of consumer goods; eg, it ranked 17th in automobile production, and its output of chemical fibers and paper was surpassed by virtually all the industrialized countries.

Ukraine's industrial growth during the postwar period has been low in comparison with that of other Soviet republics: it was 11.1 percent per year between 1950 and 1965 and 5.7 percent between 1965 and 1985 (9.8 and 5.8 percent respectively in the case of the RSFSR), thereby ranking Ukraine 9th and 11th among the 15 republics during the respective periods. At the same time, Ukraine's population increase – of 21.4 percent – was the lowest among the republics between 1959 and 1985. As a result, Ukraine's industrial output per capita has slipped from 4th place in 1960 to 6th place in 1985 among the 15 republics.

Ukraine's oblasts differ substantially in terms of the index of industrial output per capita (see table 11). They can be classified into four groups: (1) five highly industrialized oblasts (an index above 115) located in the Donets-Dnieper Region (see also \*Donets Basin and \*Dnieper Industrial Region); (2) eight oblasts with an average level of industrialization (an index between 80 and 115); (3) six oblasts with a below-average level of industrialization (an index between 65 and 79); and (4) six poorly industrialized oblasts (an index below 65). The least industrially developed region in Ukraine is the southwest. The data in table 11 reflect a tendency toward a decrease in interoblast inequality. For example, the ratio between the indexes of the most and least developed oblasts decreased from 5.1 to 3.4 between 1965 and 1978, primarily as a result of the relatively greater allocation of industrial investment to the western oblasts. Investment in Chernivtsi, Rivne, Ternopil, and Khmelnytskyi oblasts was 2.2 times, and in Volhynia oblast 7.5 times, larger in 1978 than in 1965, while investment in the Donets-Dnieper region's oblasts increased by only 68 percent during the same period. In spite of this progress, 63 percent of Ukraine's industrial assets and 54 percent of its workers were still located in the Donets-Dnieper region in 1979, while the corresponding percentages were 27 and 35 for the southwestern region and 10 and 11 for the southern region. The respective population shares were 42, 44, and 14 percent.

The uneven distribution of Ukraine's industry continues to result from its unbalanced structure, ie, the favoring of heavy industry before and even more after the 1917 Revolution. Since the necessary raw materials and subsequently industrial materials were readily available in the Donets-Dnieper region, heavy industry grew there. The necessary raw materials for the development of other industrial branches were distributed less unevenly throughout Ukraine; as a result, the distribution of these branches is also less uneven than that of heavy industry.

TABLE 11  
Levels of development of Ukrainian SSR economic regions

	1965	1978
UKRAINIAN SSR	100.0	100.0
DONETS-DNIEPER REGION	141.5	128.8

I.S. Koropec'kyj

**Indyshevsky, Stepan** [Indyševs'kyj], b 1892 in Stany-slaviv, Galicia, d 1938. Engineer and military leader. Until 1914 he was an organizer of the Sich movement. During the war for Ukraine's independence he served on the General Staff of the Sich Riflemen Corps and organized the army's technical units. After the war he spent two years in Transcarpathia and in 1925 moved to Kharkiv. He was killed during the Yezhov purges.

**Indyshevsky, Yaroslav** [Indyševs'kyj, Jaroslav], b 1895, d 31 May 1937 in Prague. Captain in the Legion of Ukrainian Sich Riflemen. In 1919 he served in Vienna as military attaché of the legation of the Western Ukrainian National Republic. After the war he joined the Ukrainian Military Organization and served as its regional commander for Western Ukraine (1924-6).

**Infantry** (*pikhota*). The oldest and proportionally the largest branch of the army; it conducts combat operations on its own or with the support of other branches. During the Middle Ages in Ukraine the small princely retinue was usually mounted, but in wartime the bulk of the troops consisted of footmen armed with bows and pikes. In the 17th century the Cossacks were known as the best infantry in Europe. In the 20th century, the Ukrainian armies consisted mostly of infantry, and the UPA (1943-9) was basically a light infantry.

**Inheritance law.** A division of civil law dealing with the transfer of possessions of deceased individuals to their heirs. During the Kievan Rus' period, inheritance was strictly determined by family ties, and only family members could be heirs. The person leaving an inheritance could have some influence over how it was to be divided, but could not assign it to non-family members. If an individual left no offspring, the inheritance went to the principality, by default. The form of a will (see \**Dukhivnytsia*) was usually oral, delivered in the presence of family members. The detailed laws of inheritance encoded in the *Ruskaia Pravda* distinguished between the rights of inheritance of *smerydy* (slaves or commoners) and boyars (nobles or barons), and outlined the rights of the widow.

Under the Lithuanian Statute, inheritance continued to be determined by family ties. However, both fluid and static assets acquired during a lifetime could be assigned to non-family members. Some classes of individuals were forbidden to compose wills, and only legally empowered individuals could receive inherited goods or assets. There were also restrictions imposed on inheritances by women, servants, and some classes of peasantry.

The reforms brought about during the Cossack era were later modified by the Code of 1743, which allowed for inheritance by illegitimate offspring of assets acquired during the bequeathers' lifetime.

After the abolition of the Hetmanate, Russian authorities in 1835 established the primacy of the *Svod zakonov Rossiiskoi Imperii*, with some adjustments in the Poltava and Chernihiv gubernias to ensure congruence with earlier civil law. This system of laws was based on sequential order of inheritance of offspring, widow, parents, followed by brothers and sisters. In Galicia under Austria and then Poland the Austrian civil code of 1811 was enforced. Under this code, the bequeather was empowered to distribute assets to mainly one individual or to

many, as long as the bequeather respected the rights of all legally entitled members of the family. This law ensured universality of distribution by automatically legally entitling certain members of the family to certain portions of the estate, irrespective of the will of the bequeather or primary heir.

During the years of Ukrainian statehood, previous laws (Russian and Austrian) concerning inheritance remained in force. After the Bolshevik Revolution all such laws were annulled by decree of the Council of Peoples' Commissars of the Ukrainian SSR on 3 November 1919. However, agriculturally based assets not exceeding 10,000 rubles could remain as family possessions and were not confiscated by the state. This system continued through the NEP period in various modified forms.

Under the Civil Code of the Ukrainian SSR of 16 December 1922, rights of inheritance were limited to direct descendants (children, grandchildren, and great-grandchildren), the widow, relatives who were unable to work, and the impoverished who were dependants of the deceased one year prior to his death. The inheritance was to be divided equally among all beneficiaries named above. The testator had the right to rearrange the distribution of assets in a will, or to specifically exclude a particular individual, but not to assign them to legally unentitled persons.

In 1928 all offspring 18 years of age or under were entitled to three-fourths of the assets of the deceased. An individual had the right to leave his possessions to the state, to the Party, and to community (but not religious) organizations. In 1945 the circle of inheritors was expanded to include siblings.

The legislation currently operative in matters of inheritance consists of the general foundations for civil law of the USSR and the Civil Code of the Ukrainian SSR, enacted on 18 July 1963 (chapter VII, articles 524-564). The first rank of inheritors legally entitled to equal parts of the inheritance are children, spouses, and parents of the deceased. Grandchildren can be inheritors if the parents of the deceased are not alive. In the event of the absence of inheritors of the first rank, siblings are entitled to equal portions, as are the grandparents. Every citizen is entitled to leave his assets divided among any number of individuals. The compulsory portion of assets to be given to children who have not reached the age of majority or are not able to work (this includes adopted children), spouse, parents, and dependants is two-thirds. In the event of the lack of these primary inheritors, all assets become the property of the state. Inheritors also become responsible for debts incurred by the testator. In the event of the death of a member of a collective farm, the assets pass to the legally defined inheritors. Specific regulations apply to division of assets deposited in various state savings treasuries and funds. Inheritance fees in the Ukrainian SSR are now fixed at 10 percent of the value of the inherited assets.

If the testator and the inheritors live in different countries, then inheritance is divided according to the laws of the country of residence of the deceased. Purportedly, the inherited assets pass untouched to the inheritors in the USSR or vice versa. According to this principle of international private law, the Soviet legal organs assiduously search for possible inheritances coming to their citizens and, to this end, have established broad legal contacts with the countries of destination of emigrants from the Soviet Union.

J. Fedynskyj

**Inhul River.** A left-bank tributary of the Boh River, which it joins at Mykolaiv. The Inhul is 354 km long (30 km of which are floodplains) and has a basin area of 9,890 sq km. The upper Inhul flows through the Dnieper Upland and forms a narrow river bed in the granite base. In its middle stretch the river enters the Black Sea Lowland. The Inhul freezes in December and thaws in March. Its waters are used for domestic consumption and irrigation.

**Inhulets** [Inhulec']. VI-14. City (1970 pop 32,000) in Dnipropetrovske oblast, situated on the Inhulets River in the \*Kryvyi Rih Iron-ore Basin and administered by a raion soviet of the city of \*Kryvyi Rih. Inhulets was founded in the early 20th century as a mining town. In 1956 it received city status. The largest plant in the city is the Inhulets Mining and Enrichment Complex. The city also produces food and road-construction materials.

**Inhulets Irrigation System.** Built in 1951–63, this is one of the first irrigation systems in Ukraine. It is located on the right bank of the Dnieper River and in the basin of the Inhulets River, a tributary of the Dnieper. The system covers an area of 175,000 ha and supplies 62,700 ha of agricultural land in Mykolaiv and Kherson oblasts. The water from the Dnieper is diverted for 83 km upstream along the Inhulets by means of a pumping station that raises the water 60 m through two pipelines to a reservoir. From there it flows into the main canal, which conducts it 53 km along the northern limits of the irrigation system. Then it is fed into distribution canals (465 km total length), which transfer it to irrigation ditches (1,263 km total length). The drainage and waste-water disposal network consists of 600 km of conduits. About 4,000 hydrotechnical installations are used to distribute the water to the fields. Of the supply and irrigation canals, 1,100 km are concrete-lined. The October Reservoir (capacity 31.5 million cu m), which supplies Mykolaiv with drinking water, is an integral part of the Inhulets Irrigation System.

**Inhulets River** [Inhulec']. A right-bank tributary of the lower Dnieper River, with a length of 550 km and a basin area of 14,460 sq km. Its upper stretch lies in the Dnieper Upland, its lower stretch in the Black Sea Lowland. The river freezes in December and thaws in March. Its water volume varies. The Inhulets is accessible to small craft for 110 km upstream. The river supplies the \*Inhulets Irrigation System. Its flow is regulated by nine reservoirs.

**Iniatsyivnyky** (Initiators). An action group of Baptists in the USSR that organized the dissident Council of Churches of Evangelical Christians-Baptists (CCECB). The Iniatsyivnyky date from 1960 when, in the course of N. Krushchev's antireligious campaign, the officially rec-

ognized and controlled All-Union Council of Evangelical Christians-Baptists (AUECB) acceded to illegal Soviet demands for further restrictions on its proselytizing and baptism, including the exclusion of children from religious services. Led at the time by A. Prokofev (hence one of the early Soviet designations for the group was the Prokofevtsy) and G. Kriuchkov (the present head of the CCECB, in hiding), the Iniatsyivnyky unsuccessfully demanded the convocation of an extraordinary congress of the AUECB. Known in 1962 as the 'Organizing Committee,' the group's members were subjected to public slander, police harassment, and numerous arrests and trials on trumped-up charges; nevertheless, in 1963 their protests compelled the AUECB to withdraw some of the most objectionable 'self-restrictions' on Evangelical Christian-Baptist activities. By 1965, however, the unregistered Iniatsyivnyky congregations broke completely from the AUECB and formed the CCECB, a decentralized and very successful underground religious organization with its own clandestine facilities for mass publication (it runs the Christian Press) and for the distribution of periodicals such as *Bratskii listok* and *Vestnik istiny*, Bibles, hymnbooks, and other religious literature. Although Soviet authorities prohibited the AUECB from publishing in Ukrainian, since 1975 the CCECB has published the New Testament and two hymnbooks in Ukrainian.

In 1964 the mounting Soviet arrests of Iniatsyivnyky led to the formation of the Council of Relatives of Imprisoned Evangelical Christians-Baptists. This group publishes the *Buletin Soveta rodstvennikov uznikov EkhB* (130 issues by 1985), which regularly reports on the persecution of Evangelical Christians-Baptists. According to its report for 1985, 143 dissident Baptists were held in prison, labor camps, psychiatric prisons, or internal exile; during the year, 52 followers of the CCECB were sentenced by Soviet courts. In 1985, the CCECB following was estimated at 2,000 congregations with some 100,000 baptized members. Among the members and the persecuted of the CCECB, Ukrainians constitute the largest national group.

In 1979, the imprisoned general secretary of the CCECB, Pastor G. Vins of Kiev, was expelled to the United States in an exchange for Soviet spies. Since 1980, he has headed the International Representation of the CCECB, headquartered in the United States.

B.R. Bociurkiw

**Inkerman.** A cliff in the Crimea near Sevastopol on the Chorna River. A Taurian settlement of the 9th century BC and a late Scythian burial ground of the 4th century AD were excavated there in the late 1940s. From the 6th to the 15th centuries the stronghold of Kalamita existed there; many of its dwellings and churches were built inside caves. In 1427 it became a port of the southwest-Crimean principality of Theodoro (Mangup). In 1475, Kalamita was captured by the Turks and renamed Inkerman. On 5 November 1854, a Russian army was routed there by the British-French forces besieging Sevastopol during the Crimean War.

Inkerman

**Inkizhinov, Valerii** [Inkižinov, Valerij], b 25 March 1895 in Irkutsk, Russia, d 27 September 1973 in Brunoy (Essonne), France. Actor and director. A Kirghiz by birth, he studied acting at the V. Meyerhold theater school. In 1919 he began to direct plays and to appear in films. During the 1926–7 season in Kharkiv he directed two productions of the \*Berezil theater: *Sadie*, a dramatization of S. Maugham's 'Rain' by J. Colton and C. Randolph, and W. Gilbert and A. Sullivan's *The Mikado*, which included a number of skits on Kharkiv life by M. Khvylovy, M. Yohansen, and O. Vyshnia. As a film actor he is best known for his lead roles in *Potomok Chingis-Khana* (known in English as *Storm over Asia*, 1928) and *Kometa* (The Comet, 1930). Immigrating in 1930 to Germany and then to France, he continued to act in films, but played secondary roles.

Inlay: round wooden box by I. Semeniuk

**Inlay.** Ornamentation produced by embedding pieces of material such as bone, wood, straw, mother-of-pearl, glass, or metal in a surface of a different color or type. In Ukraine, inlay techniques have been used for many

centuries. In 17th-century Hutsul wood carvings, crushed coal was rubbed into the incisions to enhance the contrast between the design and the background. In the 19th century, other types of inlay were developed in the Hutsul region; eg, M. \*Mehedyniuk introduced colored-bead inlay, and V. \*Devdiuk introduced intarsia, and metal and mother-of-pearl inlays. These techniques were used also by such master craftsmen as M. and V. Shkribliak and Yu., S., and P. \*Korpaniuk. In the 1920s O. \*Saienko introduced pure and dyed straw inlay.

Inlay: wooden plate by Yu. Korpaniuk

**Inner Carpathian Valley.** A wide, longitudinal valley in the eastern Carpathian Mountains stretching for 150 km between the \*Polonyinian Beskyd and the \*Volcanic Ukrainian Carpathians. For the most part the valley follows the course of the small tributaries of the main transverse rivers of Transcarpathia, starting in the northwest in Slovakia at the Chirocha River, a tributary of the Laborets, and ending in the southeast at the Rika River. From there it broadens out into the wide \*Maramureş Basin. Most of the valley lies at an altitude of 150–300 m. It rises to 450 m only at the valley passes. Because of suitable natural conditions, much of the valley is farmland and densely settled. Towns and raion centers – Snyrna, Velykyi Bereznyi, Perechyn, and Svaliava – are located where the valley meets the main transverse river valleys.

**Innitzer, Theodor**, b 25 December 1875 in Vejprty, Bohemia, d 9 October 1955 in Vienna. Archbishop of Vienna (from 1932) and cardinal (from 1933). Ordained in 1902, he taught the New Testament at Vienna University (1913–32) and served as Austrian minister of social welfare (1929–30). A sympathetic supporter of Ukrainians, in the 1920s he helped Ukrainian émigrés in Austria through the Ukrainian Religious Committee in Vienna, and in 1933 he organized international relief for the starving population of Soviet Ukraine. As ordinary

for the Greek Catholic congregations in Austria, in 1945 he appointed M. Hornykevych as their vicar-general.

**Innocent IV, Pope** (secular name: Sinibaldo Fieschi), b ca 1200 in Genoa, d 7 December 1254 in Naples. He was elected pope in 1243, and in 1245 at the General Council of Lyons called for a crusade to defend eastern Europe against the Tatar invasion, and for negotiations with the Eastern church to end the schism. Archbishop P. \*Akerovych from Rus' took part in the council. To establish his influence in eastern Europe the pope made contacts with princes Danylo and Vasylo, the rulers of Galicia-Volhynia, through G. da Pian del Carpini, his emissary to the Mongols. In 1246–7 he corresponded with Danylo about an anti-Tatar coalition and church union. In 1253 Archimandrite Opizo brought Danylo a royal crown from the pope. Although Innocent IV issued a bull calling for a crusade against the Tatars, the campaign did not take place. The pope's letters to the Galician-Volhynian princes have been published in *Documenta Pontificum Romanorum Historiam Ucrainae Illustrantia (1075–1700)*, vol 1 (1953).

**Innsbruck.** City (1984 pop 117,000) on the Inn River in western Austria and capital of the Tirol federal state. In the summer of 1945, 4,000 Ukrainian displaced persons lived there, but most of them fled to Bavaria, whence they immigrated to North America. Innsbruck was the first center of the \*Ukrainian Central Relief Alliance in Austria. Until 1951 Innsbruck had a Ukrainian Catholic and a Ukrainian Orthodox parish, a Ukrainian gymnasium, an Association of Ukrainians in the Tirol and Vorarlberg, and the Brotherhood of St Andrew. Some 450 Ukrainians studied at its university; they formed a Ukrainian student club (headed by M. Denysiuk) and published the irregular journals *Students'kyi shliakh*, *Zveno*, *Stezhi*, and *Na varti*. Before the Second World War the future Cardinal Y. Slipy and Archbishop I. Buchko were among the Ukrainians who studied at the Jesuit Theological Academy in Innsbruck. Today some 100 Ukrainians live in Innsbruck and its vicinity.

**INO.** See Institutes of people's education.

**Inozemtsev, Aleksandr**, b 1889 in Siberia, d 1948 in Munich. Russian Orthodox churchman. As bishop (from 1922) and later archbishop of Pynske and Podilia, he worked for more than 25 years with Ukrainians. In 1941, together with Bishop P. Sikorsky, he asked Metropolitan D. Valedinsky to assume spiritual responsibility over the Orthodox church in Ukraine. He participated in the consecration of bishops for the Ukrainian Autocephalous Orthodox church in February 1942 and served as the first chairman of the church's Synod of Bishops. In 1944 he immigrated to Germany.

**Insabato, Enrico**, b 21 September 1878 in Bologna, d 6 March 1963. Italian political activist and publicist, expert on Arabian and Ukrainian affairs, and supporter of Ukrainian independence. As a result of Insabato's efforts, the Italian premier, V. Orlando, agreed to send 80,000 Ukrainian prisoners of war to combat the Bolshevik invasion of 1917–18, but this was blocked by the French premier, G. Clemenceau, who feared the Ukrainians would be used against the Poles. Elected by the Italian Peasant's party to Parliament, Insabato vigorously

opposed Mussolini's recognition of the Bolshevik regime. He was an executive member of the Ukrainian-Italian Friendship Association and an active member of the Shevchenko Scientific Society (from 1955). He was the author of many publicistic essays, including *Ucraina e la Chiesa Cattolica* (1933) and *Ucraina: Popolazione e economia* (1938).

**Inscriptions.** Written matter carved, scratched, or painted on hard or durable materials. The study of inscriptions (\*epigraphy) provides linguists with data on linguistic phenomena of a given period. Inscriptions appear in great numbers in Ukraine. The earliest date back to the 7th century BC when Greek colonies sprang up on the Black Sea coast, but these are irrelevant to the history of the Ukrainian language. The oldest inscriptions pertaining to the history of Ukraine appeared with the introduction of Christianity and of the Cyrillic alphabet in Ukraine. They include the name and the title of Queen Anna Yaroslavna of France written on a charter (1063), an invocatory text on a Chernihiv \*hryvnia of the 11th century, an inscription on the goblet of Prince Volodymyr of Chernihiv (before 1151), and an inscription on the cross of Princess Yevfrosyniia of Polatsk made by a Kievan artisan in 1161. Inscriptions on coins are known from the time of Volodymyr the Great (ca 980–1015) and Prince Sviatopolk (1015–19). Inscriptions on seals are known from the late 10th century on (see \*Sphragistics). In later periods the number of inscriptions on various objects increased substantially. (See also \*Graffiti.)

**Insignia.** See Regalia.

**Institut zur Erforschung der UdSSR.** See Institute for the Study of the USSR.

**Institute, Physical-Technical, of the Academy of Sciences of the Ukrainian SSR.** See Physical-Technical Institute of the Academy of Sciences of the Ukrainian SSR.

**Institute for Demography and Sanitation Statistics of the Academy of Sciences of the Ukrainian SSR.** See Demography.

**Institute for Nationalities Research** (Polish: Instytut Badań Spraw Narodowościowych; Ukrainian: Instytut doslidiv natsional'nykh sprav). A research institute in Warsaw that existed from 1921 to 1939. It sponsored research, organized public lectures and seminars, and published numerous research reports, primarily on the national minorities in interwar Poland (Ukrainians, Belorussians, etc), but also on the general problem of minorities in Europe and on Polish communities outside Poland. The institute was headed by several associates of J. Piłsudski: L. Wasilewski, T. Hołowko, S. Thugutt, and S. Paprocki. Its organ from 1927 was \**Sprawy narodowościowe*. Major contributions to the study of Ukrainians in Galicia were made by prominent Ukrainian co-workers of the institute such as M. Kovalevsky and B. Rzhepetsky.

**Institute for Nuclear Research of the Academy of Sciences of the Ukrainian SSR** (Instytut yadernykh doslidzhen AN URSR). An institute established in 1970 as

an outgrowth of six nuclear-research departments at the AN URSR \*Institute of Physics. Its scientists (217 in 1980) are involved in research and development in theoretical and experimental low- and medium-energy nuclear physics, nuclear spectroscopy, nuclear-power technology, radiation physics, materials science, and plasma physics. The institute has a staff of close to 700 in 21 departments (1 in Uzhhorod); it operates two cyclotrons, an experimental nuclear reactor, several advanced computers, a design section, and a graduate program. Its directors have been M. Pasichnyk (1970–3) and O. Niemets (1974–).

**Institute for Problems of Machine Building of the Academy of Sciences of the Ukrainian SSR** (Instytut problem mashynobuduvannia AN URSR). A technological institute established in Kharkiv in 1972 to replace a branch of the AN URSR \*Institute of Technical Thermophysics. It has 16 departments, 4 laboratories, a computer center, a technological-design bureau, and a developmental production center. Its scientists (167 in 1980) conduct research in the fields of mechanical engineering, solid-state and fluid mechanics, applied and theoretical mathematics and computer science, hydroelectric and nuclear energy, machine reliability, internal-combustion machines, and various aspects of machine building. The institute publishes the periodical *Problemy mashinostroeniia*. Its director is A. Pidhorny.

**Institute for Problems of Materials Science of the Academy of Sciences of the Ukrainian SSR** (Instytut problem materialoznavstva AN URSR). A technological institute in Kiev, formed in 1955 from the AN URSR special alloys laboratory under I. Frantsevych. Until 1964 it was called the Institute of Metal Ceramics and Special Alloys. The institute has 28 departments, 5 laboratories, a design office, a pilot plant, and a graduate program. Its scientists (668 in 1980) are engaged in x-ray and electromagnetic analysis, solid-state physics and chemistry, structural studies and materials design, and technology. The institute is the world's leading research center of powder metallurgy; it co-ordinates the work of 432 concerns and 39 government agencies in this field throughout the USSR, and publishes the journal *Poroshkovaia metallurgiiia / Powder Metallurgy* (1961–). It has designed and supervised the construction of over 100 metallurgical concerns, including the largest powder-metallurgy factory in the world in Brovary, and plants in Zaporizhia, Donetsk, Poltava, and Yerevan. It is also the leading Soviet research center for electric heating appliances, and the center of Ukraine's solar-energy research. The institute's directors have been I. \*Frantsevych (1955–73) and V. Trefilov (1973–).

**Institute for Problems of Modeling in Energetics.** See Institute of Electrodynamics.

**Institute for Problems of the Strength of Materials of the Academy of Sciences of the Ukrainian SSR** (Instytut problem mitsnosti materialiv AN URSR). A unique Soviet technological institute, directed by H. Pysarenko. It was established in Kiev in 1966 out of the Strength of Materials Section (formed in 1951) of the AN URSR Institute for Problems of Materials Sciences. It has 13 departments, a laboratory, a design office, a pilot plant, and a graduate program. Its scientists (164 in 1980) focus

on investigating failure of mechanisms, experimental and theoretical reliability prediction, and calculation and evaluation of the strength of various structural materials under extreme conditions. The results of this research are applied in the nuclear industry, cryogenics, gas pipelines, and machine building. Research results are published in the institute's journal *Problems of Strength / Problemy prochnosti* (1969–).

**Institute for the Study of the USSR** (Instytut dlia vyvchennia sssr; German: Institute zur Erforschung der UdSSR). An American-sponsored research institute founded in Munich in July 1950 by a group of émigré scholars from the Soviet Union. Originally called the Institute for the Study of the Culture and History of the USSR, the institute's aim was to conduct research on various aspects of the state and society of the USSR, especially the nationalities question. The first president of its Learned Council was B. Martos. Other prominent members were A. Yakovliv, I. Bakalo, M. Miller, P. Kurinny, and B. Krupnytsky. The institute had a varied publication program of periodicals, monographs, and conference proceedings in several languages, including the journals *Ukrains'kyi zbirnyk* (17 issues, 1954–60) and *Ukrainian Review* (9 issues, 1955–60). Among its publications were works by P. Fedenko, V. Holubnychy, H. Kostyuk, N. Polonska-Vasylenko, D. Solovei, and other Ukrainian scholars. By 1960 it had 45 full and 29 corresponding members. The institute was dissolved in June 1972.

**Institute of Applied Mathematics and Mechanics of the Academy of Sciences of the Ukrainian SSR** (Instytut prykladnoi matematyky i mekhaniky AN URSR). A scientific research institute established in 1970 in Donetsk, succeeding the academy's Donetsk Computing Center (est 1965). It has a staff of over 120 in nine departments, where mathematical physics, solid-state dynamics, multivariable differential equations, function theory, probability theory, mathematical statistics, applied mechanics, elasticity theory, and other technical subjects are studied. Much of the research is focused on computer applications in industrial programs and automation systems. The directors of the institute have been I. Danyliuk (1965–74), A. Bogomolov (1974–7), and I. Skrypnyk. The institute publishes the periodic compendiums *Mekhanika tverdogo tela* and *Teoriia sluchainykh protsessov* and has a graduate program and a control-system design center.

**Institute of Archeology of the Academy of Sciences of the Ukrainian SSR** (Instytut arkeolohii AN URSR). A research institute established in 1938 in Kiev. Its forerunners include the Kiev Archeological Institute (1917–24), the \*All-Ukrainian Archeological Committee (1923–34), and the Institute of the History of Material Culture of the Academy of Sciences of the Ukrainian SSR (1934–8). The institute co-ordinates all written and field research in archeology and ancient history in Ukraine. In 1970 a separate branch for the study of Kiev's archeology was created. At the present time the institute has 12 departments and 4 sectors. Two preserve areas – Olviia (est 1952) near Parutyne, Ochakiv raion, Mykolaiv oblast, and Kamiana Mohyla (est 1954) near Terpinia, Melitopil raion, Zaporizhia oblast – are maintained by

the institute. The institute has published specialized monographs and collections and several serials: *Arkheolohiia* (1st series, 24 vols, 1947–70; 2nd series, 48 vols, 1971–84), *Arkheolohichni pam'iatky URSR* (13 vols, 1949–63), *Kratkie soobshchennia Instituta arkheologii AN URSR* (12 issues, 1952–62), and *Arkheologicheskii issledovaniia na Ukrainie* (4 issues, 1967–72). In 1985 it had a staff of 130 scholars. In 1984 a history of the institute was published in Kiev. (See also \*Archeology.)

**Institute of Biochemistry of the Academy of Sciences of the Ukrainian SSR** (Instytut biokhīmii im. O.V. Palladina AN URSR). Research institute founded in Kharkiv in 1925 on the basis of the Chair of Physiology at the Kharkiv Agricultural Institute. Originally it was called the Ukrainian Biochemical Institute. Since 1931 it has been part of the AN URSR in Kiev. The institute primarily conducts and publishes research in molecular biology and animal and human biochemistry. In 1969 a branch was established in Lviv. In 1980 it had 10 departments, 8 laboratories, and a staff of 502 (125 scholars). A number of prominent biochemists have worked or are working at the institute: O. Palladin, who founded one of the largest Soviet schools of biochemistry and whose name the institute now carries, D. Ferdman, M. Huly, V. Belitser, and R. Chahovets. Its current director is V. Lishko. The institute published the journal *Naukovi zapysky Ukraїns'koho biokhīmichnoho instytutu* beginning in 1926. In 1934 it was replaced by *Ukraїns'kyi biokhīmichnyi zhurnal*, which was published until 1978. A bimonthly journal – *Ukraїnskii biokhīmicheskii zhurnal* – and a periodical collection – *Biokhīmiiia zhivotnykh i cheloveka* – are now published in Russian by the institute.

**Institute of Botany of the Academy of Sciences of the Ukrainian SSR** (Instytut botaniky im. M.H. Kholodnoho AN URSR). Research institute founded in 1921 as the Botanical Cabinet and Herbarium of the Ukrainian Academy of Sciences in Kiev. In 1931 it was merged with the Scientific Research Institute of Botany of the People's Commissariat of Education of the Ukrainian SSR, and in 1971 it was given its present name, to honor the prominent botanist M. Kholodny. The institute conducts and publishes research on the vegetation of Ukraine and its protection and use in agriculture and medicine, and on plant physiology and biochemistry, geobotany, systematics, and ecology. Directed by K. Sytnyk, in 1980 it had a staff of over 400 (172 scholars) in 14 departments, 4 of which are part of a branch of the institute in Lviv (founded in 1973), 2 laboratories, and an experimental field laboratory. It manages the \*Ukrainian Steppe Nature Reserve and since 1921 has published a bimonthly journal – *Ukraїns'kyi botanichnyi zhurnal* – and monographs, of which the most valuable have been *Vyznachnyk roslin URSR* (Field Guide to the Plants of the Ukrainian SSR, 1950), *\*Flora URSR* (The Flora of the Ukrainian SSR, 12 vols, 1936–65), *Roslynnist' URSR* (The Vegetation of the Ukrainian SSR, 4 vols, 1968–73), and *Vyznachnyk hrybiv Ukraїny* (Field Guide to the Fungi of Ukraine, 5 vols, 1967–79). (See also \*Botany.)

**Institute of Colloidal Chemistry and Hydrochemistry of the Academy of Sciences of the Ukrainian SSR.** See Chemistry.

**Institute of Cybernetics of the Academy of Sciences of the Ukrainian SSR** (Instytut kibernetiky AN URSR im. V.M. Hlushkova). A major scientific research institute established in Kiev in 1962, succeeding the AN URSR Computing Center (est 1957). It has a staff of over 2,000 in 52 departments, 27 laboratories, and its own powerful computing center. It also has a design center with a staff of 2,000 and its own pilot plant. Research is focused on computer programming and design, automation and systems theory and design, economic, technical, biological, and medical cybernetics, control systems, robotics, and mathematical economics. The institute's associates have designed and constructed the MIR, Promin, Dnepr, Kiev, Iskra, Ros, and other computers, including the first Soviet microcomputers. The institute publishes the semimonthly journals *\*Kibernetika* (1965–), *Avtomatika* (1963–), and *Upravliaiushchie sistemy i mashyny* (1972–), and the periodic compendiums *Kibernetika i vychislitel'naia tekhnika* and *Naukovedenie i informatika*. It also prepared and published the first Soviet encyclopedia of cybernetics (2 vols, 1973–4), in Ukrainian. Its directors have been V. \*Hlushkov (1962–82) and V. Mykhalevych.

**Institute of Economics of the Academy of Sciences of the Ukrainian SSR** (Instytut ekonomiky AN URSR). Research institute founded in Kiev in 1936 on the basis of the Agroecology Institute of the All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes (VUAMLIN). In 1938 the Institute of Demography and Health Statistics of the academy was incorporated into it. The institute conducts and publishes research in political economy, planning and economic management, Ukraine's economic growth and development, industrial economics, statistics and demography, Ukraine's economic history, and economic thought in Ukraine. With its branches in Lviv, Kharkiv, and Odessa (established in 1964, 1965, and 1970 respectively), in 1980 it consisted of 30 departments with a staff of 1,080 (287 scholars). The institute operates three computer centers and trains graduate economists. Its current director is (since 1976) I. Lukinov. It publishes monographs and collections, two interagency serials – *Istoriia narodnoho hospodarstva ta ekonomichnoi dumky Ukraїns'koi RSR* (1965–) and *Demohrafichni doslidzhennia* (1969–) – and, since 1958, the journal *\*Ekonomika Radians'koi Ukraїny*. (See also \*Demography, \*Economic geography, \*Economic press, and \*Economic studies.)

**Institute of Electric Welding of the Academy of Sciences of the Ukrainian SSR** (Instytut elektrosvarivannia AN URSR im. Ye.O. Patona). A major Soviet scientific research institute established in Kiev in 1934. Probably the world's most important center of research in electric-arc welding and special electrometallurgy, it has attracted some of the foremost scientists in these fields, including I. Pokhodnia and V. Lebedev. The institute has pioneered many applications in welding technology, many of which are used worldwide; it has granted over 30 major foreign licenses; and it participated in the world's first experiments in cutting and welding metal in outer space, on the Soiuz 6 space station (1969). The institute publishes the monthly journal *Avtomaticheskaiia svarka* and the compendium *Problemy spetsial'noi elektrometallurgii*, and has a graduate program and a permanent

UN seminar for engineers from the developing countries. Its directors have been Ye. \*Paton (1934–53) and his son B. \*Paton. It has a staff of over 2,000 in 43 departments and laboratories, and over 4,700 employees in its experimental technological design center and two experimental plants (electromachine building and welded materials).

**Institute of Electrodynamics of the Academy of Sciences of the Ukrainian SSR** (Instytut elektrody-namiki AN URSR). A research institute founded in Kiev in 1947, succeeding the electrotechnical branch of the Institute of Energetics. Until 1963 it was called the Institute of Electrotechnology. Research at the institute is focused on electromagnetic energy generation, conversion, and transmission, energy systems, energy measuring devices and generators, electronics, and computing systems. The institute has a staff of over 750 in 15 departments and an experimental production center with over 200 employees. During the years 1949–51 its staff constructed the МЕОМ, the first digital computer outside the United States. In 1957 the computer-design section became the AN URSR Computing Center, and in 1962 the \*Institute of Cybernetics. The institute has been directed by S. Lebedev (1947–52), A. Nesterenko (1952–9), O. Miliakh (1959–73), and A. Shydlovsky. It has a graduate program and publishes the periodic compendium *Problemy tekhnicheskoi elektrodinamiki*.

The Sector of Electronics and Modeling was created within the institute in 1971. In 1981 it became the new Institute for Problems of Modeling in Energetics. Its staff, in 14 departments directed by G. Pukhov, studies mainly analog and digital control systems and automatization and their application in energetics, electronics, and the aviation industry. The new institute publishes the periodic compendium *Gibridnye vychislitel'nye mashiny i komplekсы*. It has a branch devoted to electric-energy magnetohydrodynamic generators.

L. Onyshkevych

**Institute of Fine Arts, Folklore, and Ethnography of the Academy of Sciences of the Ukrainian SSR** (Instytut mystetstvoznavstva, folkloru ta etnohrafii im. M.T. Rylskoho AN URSR). A leading research institute. Founded in 1936 as the Institute of Ukrainian Folklore, it replaced the abolished VUAN \*Ethnographic Commission, \*Cabinet of Anthropology and Ethnology, Cabinet of Musical Ethnography, Cabinet of Primitive Culture, Chair of Ukraine's History, and Commission for Historical Songs. Some of these had been incorporated into the new Institute of the History of Material Culture (1934–8), which had its own folkloristic-ethnographic section with a museum and cabinet of musical ethnography (headed by V. Kharkiv).

The Institute of Ukrainian Folklore had three sectors: oral folklore, headed by M. Nahorny (1937–9) and M. Pavlii (1939–41); musical folklore, headed by M. Haidai (1936–7), P. Kozytsky (1937–8), and M. Hrinchenko (1938–41); and financial resources. Its first director was the former deputy commissar of education, A. Khvyliia. He was replaced in 1939 by Yu. Sokolov, who was brought in from Moscow University and elected a full member of the AN URSR. In the prewar Stalinist period its main focus was the collection and study of new 'Soviet' folklore and providing assistance to those who created it.

Folk tales, legends, myths, and other traditional folk genres were deemed 'vestiges of capitalism.'

After the Soviet occupation of Galicia, in November 1939 a branch of the institute was created out of the abolished ethnographic section of the Shevchenko Scientific Society and headed by F. \*Kolesa. After the outbreak of the German-Soviet War, in July 1941 the institute was evacuated to Ufa, Bashkiria, where it was reduced to a department of the AN URSR Institute of Social Sciences with a staff of two. In June 1942 the Institute of Folk Creativity and Art was formed there under the directorship of M. Hrinchenko and, after his death in November, M. \*Rylsky.

From August 1943 to March 1944 the institute operated from Moscow, and in March 1944 it was substantially reorganized and re-established in Kiev under its current name. M. Rylsky remained its director until his death in 1964, when the institute was named in his honor. His successors have been M. Syvachenko (1964–73) and S. Zubkov (1974–). In 1982 a branch of the institute was created in Lviv out of the Ukrainian State Museum of Ethnography and Crafts; it is directed by Yu. Hoshko.

The institute's policies and research have largely been subject to non-scholarly, Soviet political considerations; this bias has been reflected in many of its publications.

Today the institute has 10 research departments: musicology, theater studies, cinema studies, visual art, art theory, the theoretical problems of the artistic development of the masses, folkloristics, Slavic folkloristics, ethnography, and Soviet holidays and rituals. In accordance with Soviet nationality policy, it promotes and publishes research on the Ukrainian arts and ethnography in the context of contemporary interethnic relations in the USSR and the Soviet bloc and their mutual 'enrichment' and 'internationalization.' Emphasis has been placed on the study of working-class culture, historical ethnography, the culture and folkways of the inhabitants of the Carpathian Mountains, and museology. The institute has published the periodicals \**Ukrains'kyi fol'klor* (1937–9), *Narodna tvorchist'* (1939–41), and \**Narodna tvorchist' ta etnohrafia* (1957–). Its most important project, however, has been a 35-volume series *Ukrains'ka narodna tvorchist'* (Ukrainian Folk Creativity), of which 23 volumes have been published. Multiple-author, three-volume histories of Ukrainian decorative and applied folk art, Ukrainian classical music, and Ukrainian cinema will be published in the near future. In 1986 the institute had a staff of 151 of which 97 were scholarly associates.

(See also \*Art studies and research, \*Ethnography, \*Musicology, and \*Theater studies.)

M. Hnatiukivsky

**Institute of Gas of the Academy of Sciences of the Ukrainian SSR.** See Chemistry.

**Institute of General and Inorganic Chemistry of the Academy of Sciences of the Ukrainian SSR.** See Chemistry.

**Institute of Geological Sciences of the Academy of Sciences of the Ukrainian SSR** (Instytut heolohichnykh nauk AN URSR). An institute formed in Kiev in 1926 from the merger of several geological sections of the VUAN and of the People's Commissariat of Education.

Until 1934 it was called the Geological Institute, and then, until 1939, the Institute of Geology. The institute has 16 departments, 3 laboratories, a geological museum (est 1927), a library, a branch in Kryvyi Rih (est 1972), a research drilling ship, and an experimental pilot plant (est 1980). Its Lviv branch (1939–41, 1944–50) became the \*Institute of the Geology and Geochemistry of Fossil Fuels. The Ukrainian Paleontological Society, the Ukrainian Stratigraphic Committee, and the republican scientific councils on hydrology and engineering geology and on the geology of seas and oceans are affiliated with the institute.

The institute's scientists (144 in 1980) conduct research in general, Precambrian, marine, and petroleum geology, geotectonics, lithology, stratigraphy, hydrogeology, and paleontology. They systematically study Ukraine's territory and seas with the aim of locating new mineral deposits and have written theoretical studies on the volcanic formation of islands, comparative planetology, and the mathematical modeling of shock-wave effect on mineral transformations. Much theoretical and applied work has been done in hydrogeology (the location and tapping of underground water resources near major Ukrainian urban centers, the rational use of water, and soil amelioration). The institute's members also participate in international studies of oceans. Research areas that have recently been developed include coal and marine geology, the modeling of geological heat- and mass-transfer processes, and the application of aerogeology and cosmic geology as a prospecting tool.

Research results have been published as monographs and in the journal \**Geologicheskii zhurnal* (1934–). The institute's directors have all been prominent geologists: P. Tutkovsky (1926–30), V. Riznychenko (1930–2), M. Svitalsky (1934–7), Ye. Burkser (1938–9), B. Chernyshov (1939–46), V. Luchytsky (1947–9), A. Babynets (1949–53), V. Bondarchuk (1953–63), V. Porfirev (1963–8), Ye. Lazarenko (1969–71), V. Didkovsky (1971–7), and E. Shniukov (1977–).

S. Trofimenko

**Institute of Geophysics of the Academy of Sciences of the Ukrainian SSR** (Instytut heofizyky im. S.I. Subbotina AN URSR). A scientific institute established in Kiev in 1960 as an outgrowth of the work of the AN URSR Institute of Geological Sciences. The institute has 9 departments, a technological design office, 8 laboratories, 10 seismic stations, 2 magnetometric stations, 2 magnetic observatories, and an astrophysical observatory. Since 1964 the \*Poltava Gravimetric Observatory has been subordinate to it. In the USSR it leads the way in the interpretation of geological-geophysical data and in the development of a gravitational model of the earth's crust. Its scientists (129 in 1980) study the structure, composition, formation, tectonic movements, and changes in the earth's crust and mantle, using seismic, gravimetric, magnetometric, radiation, and satellite survey methods; detailed mapping of the earth's gravitational, thermal, electric, and magnetic fields; radioactive dating and paleomagnetism; and theoretical geophysics (including mathematical modeling). The development and improvement of research methodology, technology, and instrumentation and the computerization of data collection and processing are important components of the institute's work. The institute publishes the bimonthly

journal *Geofizicheskii sbornik*. Its directors have been S. Subbotin (1960–76) and A. Chekunov (1976–).

**Institute of Geotechnical Mechanics of the Academy of Sciences of the Ukrainian SSR** (Instytut heotekhnichnoi mekhaniky AN URSR). An institute in Dnipropetrovske formed in 1967 out of a branch (est 1962) of the AN URSR \*Institute of Mechanics. It has 13 departments, a laboratory, a special construction-technology bureau, and a pilot plant. Its scientists (136 in 1982) study geological processes related to mining and develop the technological basis for the mining industry in Ukraine. The institute's directors have been M. Poliakov (1967–75) and V. Poturaev (1975–).

**Institute of Gerontology of the Academy of Medical Sciences of the USSR** (Instytut herontologii AMN SRSR). A scientific research institute established in Kiev in the fall of 1958 for the purpose of studying medical, pathological, and social aspects of aging. Its chief founder and first director was M. \*Horiev, who in 1962 was succeeded by D. \*Chebotarov. As the only such institution in the USSR, it is responsible for co-ordinating and overseeing all gerontological and geriatric research and clinical work in the Soviet Union and the socialist countries. It is the largest center for gerontological research in Europe and a member of the World Health Organization network. The institute administers major studies and surveys of aging in the USSR, and regularly sponsors all-Union and international conferences, symposia, and courses. The institute has 5 departments, 12 laboratories, 4 clinical divisions, and a polyclinic. Its staff numbers 600. The monthly journal *Gerontologiya i geriatriia* is published by the institute.

**Institute of History of the Academy of Sciences of the Ukrainian SSR** (Instytut istorii AN URSR). Research institute established in 1936 out of various liquidated institutions of the VUAN and the Ukrainian Institute of Marxism-Leninism (UIML). Both the institute and its predecessors have played a seminal role in historical scholarship in Ukraine.

The antecedents of the institute were the Historical Section and its chairs and commissions, and the \*Historical Society of Nestor the Chronicler in the VUAN historical-philological division. By 1924 the section had a Chair of Ukrainian History (directed by M. \*Hrushevsky) in Kiev and another (directed by D. \*Bahalii) in Kharkiv, and several other chairs. The activity of the first was most diverse, and it became the central institution of historical research, co-ordinating the work of almost all the other historical institutions and historians affiliated with the VUAN; it also published *Studii z istorii Ukraïny* (3 vols, 1926–30). The Historical Section published the journal \**Ukraïna* (1924–32) and six issues of *Kul'turno-istorychnyi zbirnyk* (1924–9). Its Cultural History Commission published *Pervisne hromadianstvo ta ioho perezhytky na Ukraïni* (6 vols, 1926–9) under the editorship of K. \*Hrushevsky. The Commission for Compiling a Historical-Geographical Dictionary of Ukraine published *Istorychno-heohrafichni zbirnyk* (4 vols, 1927–31) under the editorship of O. Hrushevsky. Four commissions were engaged in regional history. The first (headed by V. \*Shcherbyna) conducted research on Kiev and Right-Bank Ukraine; the second (headed by O. \*Hermaize), on Left-

Bank Ukraine; the third (headed by M. \*Tkachenko), on Southern Ukraine; and the fourth (headed by F. \*Savchenko), on Western Ukraine. Each of them published or had prepared collections of research. The Archeographic Commission (directed by O. Hermaize) published *Ukrains'kyi arkhiv* (3 vols, 1926–30) and a volume of *Ukrains'kyi arkhiv* (1929).

Volumes 6, 11, 17, 20, and 24 of the *Zapysky Istorychno-filolohichnoho viddilu VUAN* were solely devoted to history and were subtitled *Pratsi* of the Historical Section. Besides serials, most of them edited by M. Hrushevsky, the section published collections of articles on the Decembrist movement in Ukraine (2 vols, 1926, 1930) and Ukraine's socioeconomic history (1932), festschrifts for D. Bahalii (1927) and M. Hrushevsky (1928–9), and books by Bahalii, Hrushevsky, P. Klymenko, O. Baranovych, I. Dzhydzhora, V. Levynsky, F. Savchenko, and O. Hermaize.

From 1922 the institute's antecedents at the UIML in Kharkiv were the department, chair, and cabinet of Ukrainian history headed by M. \*Skrypnyk and M. \*Yavorsky. In 1931 the UIML became part of the new \*All-Ukrainian Association of Marxist-Leninist Institutes (VUAMLIN), and an Institute of History was established there; the latter published a one-volume history of Ukraine in 1932.

The invaluable work of all these institutions was cut short during the Stalinist terror of the early 1930s. Many historians were killed or sent to the GULAG; the historical-philological division was closed down; and virtually all research and publishing were halted. A Historical-Archeological Institute, headed by F. Kozubovsky and then I. \*Kravchenko, was established in 1934 to fight 'Ukrainian bourgeois historiography.' In 1936 it was merged with the VUAMLIN Institute of History to form the Institute of History of Ukraine in the Division of Social Sciences of the newly created AN URSR. Thenceforth the institute propagated a Stalinist, Russian chauvinist historiography. It was headed briefly by A. Saradzhev and then S. Belousov (1936–41). In 1940, a branch of the institute was opened in Lviv in newly annexed Galicia on the foundation of the liquidated historicophilosophical section of the Shevchenko Scientific Society; the branch was headed by I. Krypiakivych until 1941. Between 1936 and 1941 the institute had only 16 scholarly associates.

After Germany invaded Soviet Ukraine in 1941, the institute was evacuated to Ufa, Bashkiria, and merged with the Institute of Archeology to form the Institute of History and Archeology under M. Petrovsky (1942–7). From 1943 to 1944 the institute was based in Moscow. Upon its return to Kiev it was reorganized in 1944 and again in 1952. The activities of the Lviv branch were revived as part of the AN URSR \*Institute of Social Sciences there. In 1947 the institute was condemned for fostering Ukrainian nationalism, and the little work that was done diminished even further under the new director, O. \*Kasymenko (1947–64). Little of lasting value was published in the years 1934–54.

During the post-Stalin thaw, however, the institute became one of the focal points of the Soviet Ukrainian cultural revival; a great deal of new research on Ukrainian history was conducted, and many fundamental Stalinist historiographic concepts were criticized and modified. In the 1960s a non-official historiography

evolved (see, eg, M. \*Braichevsky), which even rejected these concepts. At the time K. Dubyna was the institute's director (1964–7). The institute was again condemned for fostering nationalism in the early 1970s. During the KGB clampdown against the Ukrainian \*dissident movement in 1972, some historians at the institute were fired (eg, Ya. Dzyra); others were blacklisted and even arrested; and even the CPU watchdog at the institute, A. Skaba (1968–73), was replaced by A. Shevelev (1973–8), under whom the topics that could be researched were severely limited. Since 1979, however, under the current director, Yu. Kondufor, some relaxation has been discernible.

In 1978 a section of the institute and subdivisions of the AN URSR Institute of Economics formed the new \*Institute of Social and Economic Problems of Foreign Countries. Today the Institute of History consists of 17 departments, whose approx 100 scholars study the history of Ukraine, historiography, sources, ancillary historical disciplines, Ukraine's relations with foreign countries, regional history, the history of the socialist countries, the history of science, the history of technology, the Ukrainian diaspora, and the international-workers and national-liberation movements. Between 1936 and 1986 it published nearly 8,500 monographs, collections of articles and documents, textbooks, and brochures; many of them, however, are devoid of real scholarly value. The institute's major periodicals have been *Naukovi zapysky Instytutu istorii* (13 vols, 1943–60) and *Ukrains'kyi istorychnyi zhurnal* (bimonthly from 1956, monthly since 1965). A history of the institute (1936–86) by A. Santsevych and N. Komarenko was published in Russian in Kiev in 1986. (See also \*Archeography and \*Historiography.)

I. Myhul, R. Senkus

**Institute of Hydrobiology of the Academy Sciences of the Ukrainian SSR** (Instytut hidrobiolohii AN URSR). A research institute in Kiev established in 1939 on the basis of the AN URSR Dnieper Biological Station (est 1909). It has 13 departments, 3 laboratories, 4 experimental bases and stations, 2 large research ships, and a small fleet of vessels. Its scientists (over 100 in 1985) conduct research in hydrobiology, limnology, ichthyology, hydrochemistry, water management and ecology, algology, toxicology, and parasitology; they study the biological resources and industrial pollution of Ukraine's water bodies and canals and develop methods for improving or correcting them. The institute publishes the bimonthly journal *Gidrobiologicheskii zhurnal* (1965–). Its directors have been Ya. Roll (1939–59), O. Topachevsky (1959–73), L. Sirenko (1974–5), V. Maliuk (1975–9), and V. Romanenko (1979–).

**Institute of Hydromechanics of the Academy of Sciences of the Ukrainian SSR** (Instytut hidromekhaniky AN URSR). A research institute founded in Kiev in 1926 on the basis of the Chair of Hydrology of the Kiev Polytechnical Institute as the Institute of Water Management of the Council of People's Commissars of the Ukrainian SSR. It became part of the AN URSR in 1934 and was restructured and renamed the Institute of Hydrology in 1938 and the Institute of Hydrology and Hydrotechnology in 1944. It received its present name in 1963. The institute has a staff of around 400 in 10 departments, devoted to various aspects of hydraulics, hydromechanics, water filtration, water conservation,

hydraulic structures, and hydrodynamics. It also has an experimental production center with 100 employees, and a computer center. Research performed at the institute has been widely used throughout the USSR (eg, in the construction of hydroelectric stations and irrigation and drainage systems, in long-distance water transport in the polar regions, and in fighting erosion). The institute has been directed by Ye. Opokov (1926–37), A. Ohievsky (1937–9), H. Sukhomel (1940–58), M. Didkovsky (1958–65), G. Logvinovich (1966–71), O. Oliinyk (1972–81), and A. Fedorovsky. It publishes the republican interagency compendiums *Gidromekhanika* and *Bionika*.

**Institute of Jewish Culture of the All-Ukrainian Academy of Sciences** (Instytut ievreiskoi kultury pry VUAN). An institution founded in Kiev in November 1926 to co-ordinate and promote Yiddish pedagogy and scholarship and Jewish studies in Soviet Ukraine. It was originally a Chair of Jewish Culture. Its first director was the philologist and Jewish civic figure N. Shtif. In 1919 a Hebraist Historical-Archeographic Commission had been established at the VUAN under A. Krymsky; its real leader, however, was I. Galant. The commission published articles in Ukrainian learned journals and collections and its own *Zbirnyk prats'* (2 vols, 1928–9) before being abolished in 1929. It was then that the Chair of Jewish Culture, under the direction of Y. Liberberg, was upgraded into an institute.

The institute had a sizable staff (30 in 1929, over 100 in 1934) and consisted of eight sections: philology (headed by N. Shtif and then E. Spivak), history (Y. Liberberg and then A. Margolis), literature (N. Oyslender and then M. Wiener), pedagogy-pedology (Y. Yakhinson), socio-economic (I. Weizblit, from 1930), bibliography (A. Kvitny); ethnography (M. Wiener), and Birobidzhan studies (from 1934). It had a large library (based on that of the former Jewish Historical-Ethnographic Society, est 1908), an archive (including that of the Society for the Spread of Enlightenment among the Jews of Russia, est 1863), a bibliographic center, a press archive, and a graduate program. A branch in Odessa, with the historian S. Borovoi as head, was short-lived (1928–9). The institute worked closely with official Jewish scholarly institutions in Moscow and Minsk.

With the demise of the policy of \*Ukrainization and the onslaught of Stalinism, the institute suffered persecution (eg, the harassment of Shtif [d 1933] and the removal of Weizblit in 1931 and Oystender in 1932). Nonetheless, from 1931 to 1936 it was the leading Jewish scholarly institution in the USSR. In 1934 Liberberg and many other members of the institute immigrated to the new Jewish Autonomous oblast in Birobidzhan, and G. Gorokhov became the new director. In 1936 the institute was suddenly closed down, and Gorokhov and most of its other staff were arrested as 'Trotskyists' and 'Zionists.' In late 1936 the institute was replaced by a downgraded Cabinet for the Study of Soviet Jewish Literature, Language, and Folklore under E. Spivak. In 1949, during the Zhdanov purge of Jewish culture, the cabinet was liquidated and its members were arrested.

Important publications of the institute and the cabinet are the journals *Di Yidische Shprach* (24 issues, 1927–30), *Shriftn* (1 vol, 1928), and the quarterly *Visnshaft un revoliutsye* (1934–6); a bibliographical collection (1930); I. Weizblit's study of Jewish population dynamics in Ukraine in

1897–1926 (1930); A. Yuditsky's history of the Jewish bourgeoisie in Russia in the first half of the 19th century (1931); M. Berehovsky's book on Yiddish musical folklore (1934); and M. Wiener's history of 19th-century Yiddish literature (1940). The institute also published several Yiddish dictionaries and sponsored all-Union conferences on Jewish socioeconomic research (1931) and the Hebrew language (1934).

R. Senkus

**Institute of Linguistics of the Academy of Sciences of the Ukrainian SSR** (Instytut movoznavstva AN URSR im. O.O. Potebni). An institute established in Kiev in 1930 to co-ordinate all linguistic research in Soviet Ukraine after the liquidation of the various linguistic departments of the VUAN. It was created to give scholarly legitimacy to the Stalinist policy of linguistic \*Russification at a time when Ukrainian studies and the social sciences and humanities in general were being muzzled, nationally conscious Ukrainian academics were being persecuted, and strict controls were being imposed on all research and publications. Under the directorship of N. \*Kahanovych (1933–7), the institute issued unmitigated attacks on the previous directors and authors of linguistic research, many of whom were repressed, and began publishing terminological bulletins and dictionaries adapted to Russian terminology to supplant those prepared by the abolished \*Institute of the Ukrainian Scientific Language of the VUAN (see \*Terminology). From 1934 to 1939 it published 16 issues of the serial *Movoznavstvo*, made up chiefly of unscholarly, defamatory articles. Upon Kahanovych's arrest, the new director became M. \*Kalynovych (1937–41), who initiated the publication of the irregular *Naukovi zapysky: Movoznavstvo* (18 vols, 1941, 1946–63), in which some articles were published in Russian. After the Soviet occupation of Galicia, a branch of the institute was created in Lviv in 1940.

During the Soviet-German War, the institute's staff was evacuated to Ufa (1941–4), where it constituted the language section of a unified Institute of Language and Literature that published two volumes of its own *Naukovi zapysky* up to 1946. After the war the institute's Lviv branch became a department of the (Lviv) \*Institute of Social Sciences of the AN URSR under the supervision of I. \*Svientsitsky (1945–56). The institute itself was reinstated and acquired a new director – L. \*Bulakhovsky (1944–61) – under whom its publishing program expanded in the 1950s. Since that time the institute has published the serials *Dialektolohichniyi biuleten'* (9 issues, 1949–62) and *Leksykohrafichniyi biuleten'* (9 issues, 1951–63); an official bimonthly journal, \**Movoznavstvo* (since 1967); and numerous monographs, textbooks, and collections of articles in the various branches of \*linguistics, including \*dialectology, \*etymology, \*grammar, \*lexicology, \*lexicography, \*linguistic geography, \*onomastics, \*stylistics, and \*syntax. Recently two very important multivolume publications were undertaken by the institute: the three-volume *Atlas ukrains'koi movy* (Atlas of the Ukrainian Language, vol 1, 1984) and the seven-volume *Etymolohichniyi slovnyk ukrains'koi movy* (Etymological Dictionary of the Ukrainian Language, vol 1, 1982; vol 2, 1985). It has also continued to publish the requisite amount of propaganda about the linguistic affinity and interaction of the Ukrainian and Russian languages, mirroring Soviet \*nationality policy.

From 1962 to 1981 the institute's director was I. \*Bilodid, under whom a Russian department was created in 1971 to propagate linguistic Russification. Since 1981 the director has been V. \*Rusanivsky.

Currently the institute consists of 110 scholars in 7 departments: theory and history of Ukrainian, general and Slavic linguistics, comparative and Romance and Germanic linguistics, Russian, lexicology and lexicography, culture of speech, and structural-mathematical linguistics. It also has a dialectology and onomastics group and a working group of the Committee on Scientific Terminology. An Onomastic Commission studies the origin and function of proper names and works on transcription, the orthography of proper names, and renaming. Other Soviet commissions of the International Committee of Slavists (eg, the commissions on Lexicography and Lexicology and on Linguistic Terminology) use it as a base. A book about the institute appeared in Kiev in 1975.

O. Horbach

### **Institute of Literature of the Academy of Sciences of the Ukrainian SSR** (Instytut literatury im. T.H. Shevchenka AN URSR).

A research institute where research on the history of Ukrainian literature, particularly on the works of T. \*Shevchenko, is conducted and published. It was founded in Kharkiv in 1926 as the Taras Shevchenko Scientific Research Institute. A proposal to create this type of an institute at the Academy of Sciences in Kiev was made originally by S. Yefremov, but the institute was initially attached to the People's Commissariat of Education and placed under the direction of party writers – S. Pylyp'enko, V. Koriak, and A. Rychivsky. Prominent literary specialists such as S. Yefremov, O. Doroshkevych, B. Yakubsky, P. Fylypovych, V. Miiakovsky, V. Derzhavyn, V. Petrov, and M. Plevako took part in the institute's projects and publications until the late 1920s. The first director was D. \*Bahalii (1926–32). During the first few years of the institute's existence, significant research on Shevchenko was carried out, but in the early 1930s his works began to be falsified to fit preconceived interpretations, as exemplified by the writings of Ye. \*Shabliovsky, who was appointed director of the institute in 1934. This practice culminated in the tendentious doctrine that T. Shevchenko was a 'revolutionary democrat' and a disciple of V. Belinsky, N. Chernyshevsky, and other Russian thinkers. In 1936 the institute was transferred from the Commissariat of Education to the Academy of Sciences in Kiev and called the Shevchenko Institute of Ukrainian Literature. The poet P. Tychyna was appointed director. In 1944 he was replaced by the scholar O. Biletsky. In 1941, after the German invasion, the institute was evacuated to Ufa, where it was part of the Institute of Language and Literature of the Academy of Sciences until it was moved back to Kiev in 1944. In 1952 it received its present name.

Since 1944 the institute has been the co-ordinating center for all literary studies in Soviet Ukraine. Besides the 1939 five-volume and the 1949 ten-volume collection of Shevchenko's works, the institute has published numerous monographs and collections on Shevchenko by D. Kosaryk, I. Pilhuk, Ye. Nenadkevych, Ye. Kyryliuk, Ye. Shabliovsky, O. Biletsky, O. Deich, and others. The political bias of many of these studies diminishes considerably their scholarly value. The same is true of the studies that were published on the centenary of I. Fran-

ko's birth in 1955 by M. Vozniak and in 1956 by O. Biletsky, I. Bass, O. Kyselov, and others.

Possessing a huge collection of manuscripts (over 100,000), after the war the institute published a series of 'collected' works by Ukraine's classical writers: V. Stefanyk (3 vols, 1949–54), Lesia Ukrainka (5 vols, 1951–6 and 12 vols, 1975–9), I. Kotliarevsky (2 vols, 1952–3), P. Myrny (5 vols, 1954–6), Marko Vovchok (6 vols, 1955–6), and I. Franko (20 vols, 1950–6). Unfortunately, the selection of materials is at times falsified or bowdlerized and the introductions and commentaries in these collections are often incomplete and tendentious in their approach.

While O. \*Biletsky was the director (1944–61), one could perceive in the institute's publications an obvious attempt to view the history of Ukrainian literature in relation to the development of world literature. Under the directors M. \*Shamota (1961–78) and I. \*Dzeverin (1978–), however, the party line has been reaffirmed and, in general, research of a propagandistic, rather than scholarly, nature has been published, focusing on the theory of socialist realism, the guiding influence of Russian literature on Ukrainian literature, and the like.

The preparation of surveys and textbooks of Ukrainian literature has been a central function of the institute. A Chrestomathy of Old Ukrainian Literature (pub in 1949, 1952, and 1967) and a two-volume history of Ukrainian literature (ed O. Biletsky and others, pub in 1950) were ready for publication in 1941, but did not appear because of the war. S. Maslov and Ye. Kyryliuk's *Narys istorii ukrains'koi literatury* (Outline History of Ukrainian Literature, 1945) was criticized harshly in 1946 for being 'nationalistic' and was withdrawn from circulation. In 1954 a new outline history in Ukrainian and Russian appeared. Adhering to the Stalinist conception of Ukrainian culture, it gave a completely distorted account of the development of Ukrainian literature. The first volume of *Istoriia ukrains'koi literatury* (A History of Ukrainian Literature, eds O. Biletsky, M. Bernshtein, and M. Gudzii, 1954) was written in the same spirit. The second volume, dealing with the Soviet period, avoided mentioning many banned and repressed writers; its account of the early Soviet period was so poor and incomplete that the volume was withdrawn from circulation and extensively revised before being republished in 1957. An eight-volume (nine-book) history of Ukrainian literature was published between 1967 and 1971, and a two-volume history is to appear in the 1980s. One of the largest projects planned by the institute, in collaboration with the publishers of the Ukrainian Soviet Encyclopedia, is the publication of a five-volume Ukrainian literature encyclopedia. The publication of 50 vols of I. Franko's works (vol 1, 1976) is to be completed in this decade.

Since becoming the co-ordinating center for literary research in Soviet Ukraine, the institute has expanded significantly. Today it consists of eight sections: old Ukrainian literature, prerevolutionary Ukrainian literature, Soviet Ukrainian literature, Russian literature, literature of the Slavic peoples in the people's democracies and other foreign literatures, Shevchenko studies, literary theory (primarily socialist realism), and manuscripts and textual criticisms. The institute has a staff of 133, 90 of them scholars. Twenty have doctoral degrees (7 are corresponding members of the Academy of Sciences) and 63 are candidates of sciences. Since 1938 the

institute has published *\*Radians'ke literaturoznavstvo* as its official periodical (since 1957 as a monthly journal). Since the war a branch of the institute has been located in Lviv, where such scholars as M. Vozniak, F. Kolessa, K. Studynsky, and V. Shchurat were affiliated during its early years. From 1948 to 1965 it published twelve collections of articles and materials on I. Franko. (See also *\*Literature studies*.)

I. Koshelivets

**Institute of Macromolecular Chemistry of the Academy of Sciences of the Ukrainian SSR.** See Chemistry.

**Institute of Marx-Engels-Lenin.** See Institute of Party History.

**Institute of Mathematics of the Academy of Sciences of the Ukrainian SSR** (Instytut matematyky AN URSR). An institute established in 1934 out of three VUAN mathematical commissions chaired by D. Grave, Yu. Pfeiffer, and M. Kravchuk. Since that time it has been the main center of mathematical research in Ukraine.

Under its first director, D. *\*Grave* (1934–9), the institute was the center of Soviet algebraic studies. Under its second director, M. *\*Lavrentev* (1939–41), several distinguished Polish mathematicians of the well-known Lviv school (eg, S. Banach and his students, S. Mazur, V. Orlicz, and J. Schauder) became affiliated with the institute after the Soviet occupation of Western Ukraine. During the Second World War the institute was directed by Yu. Pfeiffer (1941–4) and was evacuated to Ufa and then Moscow. It was re-established in Kiev under its former director M. Lavrentev (1944–9). M. *\*Krylov's* and N. *\*Bogoliubov's* earlier joint work in non-linear mechanics was further developed after the war by Bogoliubov, his students O. Parasiuk and D. Shirkov, and Yu. Mytropolsky and Y. Shtokalo. Under the directors A. Ishlinsky (1949–55), B. Hniedenko (1955–8), and Yu. Mytropolsky (1958–), research has concentrated on the theory of asymptotic methods in non-linear mechanics, asymptotic and operational methods for special classes of linear and non-linear equations, mathematical methods in quantum field theory, functional analysis, differential equations, complex variables, the theory of conformal maps, the application of analysis methods, approximation methods, mechanics theory, and elasticity theory. Some work has been done in such areas of pure mathematics as algebraic and differential topology, differential geometry, and contemporary abstract algebra.

The institute has 13 departments and over 200 mathematicians. It has published the journals *Zhurnal Instytutu matematyky AN URSR* (1934–8), *Zbirnyk prats' Instytutu matematyky AN URSR* (1938–48), and *Ukrainskii matematicheskii zhurnal* (1949–). (See also *\*Mathematics*.)

W.V. Petryshyn

**Institute of Mechanics of the Academy of Sciences of the Ukrainian SSR** (Instytut mekhaniky AN URSR). A research institute founded in Kiev in 1919. It was called the Institute of Technical Mechanics until 1929 and the Institute of Construction Mechanics until 1959. Research by its staff of 600 in 16 departments is focused on statics and dynamics, the theory of elasticity, physics of membranes, construction and thermal mechanics, fatigue of

materials, theory of machines, composite materials, theory of non-linear vibrations, and related areas. The results of the institute's research have been widely utilized in the USSR. The institute publishes the monthly journal of applied mechanics *Prikladnaia mekhanika* and the periodic compendium *Teplovyie napriazheniia v elementakh konstruktsii* and has a graduate program. It has been directed by S. Tymoshenko (1919–20), D. Grave (1921), K. Siminsky (1921–32), S. Serensen (1932–40), M. Kornoukhov (1940–4), F. Bieliiankin (1944–58), G. Savin (1958–9), A. Kovalenko (1959–65), V. Kononenko (1965–75), and O. Huz.

In 1968 a section of the institute was established in Dnipropetrovske. In 1979 it became the new Institute of Technical Mechanics, directed by V. Pylypenko. Research by its staff of over 450 in 11 departments and a special technological design office is focused on the dynamics of complex mechanical systems, particularly in rail and air transport. The new institute also has an experimental manufacturing enterprise and a computer center.

L. Onyshkevych

**Institute of Metal Physics of the Academy of Sciences of the Ukrainian SSR** (Instytut metalofizyky AN URSR). A scientific-technological institute founded in Kiev in 1955 from the AN URSR Laboratory of Metal Physics (est 1945). It has 15 departments, 8 laboratories, a computer center, a technological-design office, and a pilot plant. Its scientists (217 in 1980) carry out studies in theoretical and experimental solid-state physics, particularly the physics of metals and alloys. It has been headed by G. Kurdiumov (1945–51), V. Danylov (1951–4), A. Smirnov (1955), V. Hridniev (1955–85), and V. Bariakhtar (1985–).

**Institute of Organic Chemistry of the Academy of Sciences of the Ukrainian SSR.** See Chemistry.

**Institute of Party History of the Central Committee of the Communist Party of Ukraine** (Instytut istorii partii TsK KPU). A branch of the Institute of Marxism-Leninism of the CC CPSU located in Kiev. It conducts and publishes research on the history of the CPU; prepares and publishes translations of the classics of Marxism-Leninism; maintains the Party archives and a specialized library in Party history; and oversees oblast Party committee archives and the Kiev and Lviv branches of the Central Lenin Museum.

The institute is the offspring mainly of the All-Ukrainian Commission for [the Study of] the History of the October Revolution and the Communist Party (Bolshevik) of Ukraine and, to some extent, the Ukrainian Institute of Marxism-Leninism (UIML), which were established originally to provide Marxist counterparts to the traditional historical scholarship of the All-Ukrainian Academy of Sciences.

The commission was founded in Kharkiv in 1921 and subordinated to the Central Executive Committee of the CP(B)U in 1922. Its organ, *\*Litopys revoliutsii* (1922–33), was published in Russian until 1927. In 1929 the commission was restructured and renamed the Institute of Party History and the October Revolution in Ukraine. In 1934 this institute was moved to Kiev.

The UIML was established in Kharkiv in 1922–3; until

1924 it was known as the Ukrainian Institute of Marxism and Marxist Studies. Proclaimed officially in 1925 to be the center of Marxist thought and scholarship in Ukraine, it aspired to become the republican counterpart of the Communist Academy in Moscow. M. \*Skrypyk was its main Party patron and director of its chair on the nationality question. M. Yavorsky was the head of its historical section. The institute published the journal *\*Prapor Marksyzmu* (1927–31). In 1931 the CP(B)U accused the UIML of nationalist deviationism. It was broken up into autonomous units that together formed the \*All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes (VUAMLIN). In 1936 some sections of VUAMLIN were incorporated into what is now known as the \*Institute of History of the AN URSR, and in 1939 the remaining departments were merged with the Institute of Party History and the October Revolution in Ukraine to form the Ukrainian Branch of the Institute of Marx-Engels-Lenin of the CC of the All-Russian Communist Party (Bolshevik). This body assumed the new name, Institute of Party History of the CC CPU, in 1956.

Among the institute's numerous recent publications are *Komunistychna partiia Ukraïny v rezoliutsiakh z'izdiv, konferentsii i plenumiv TsK* (The Communist Party of Ukraine in the Resolutions of Congresses, Conferences, and Plenums of the CC, 1976–7) and *Narysy istorii komunistychnoi partiï Ukraïny* (Outlines of the History of the Communist Party of Ukraine, 4 edns). It also publishes the journal *\*Ukraïns'kyi istorychnyi zhurnal* in collaboration with the Institute of History. Since 1956 its directors have been P. Pavliuk and V. Yurchuk (1974–).

I. Myhul

**Institute of Philosophy of the Academy of Sciences of the Ukrainian SSR** (Instytut filosofii AN URSR). Principal center for philosophical studies in Ukraine, founded in November 1946 to conduct and co-ordinate research in philosophy and to prepare specialists in the field. In the 1920s and 1930s some work in philosophy was done at the AN URSR by the Historical-Literary Society of the historical-philological division, the Chair of the History of Philosophy and Law in the social-economic division, the Chair of Marxism-Leninism, and the Commission of Philosophy. Staffed by over 120 researchers, the institute has 15 departments, some of which have little to do with philosophy: dialectical materialism, historical materialism, philosophical questions of scientific communism, history of philosophical and social thought in Ukraine, logic of scientific knowledge, philosophical questions of the natural sciences, esthetics, scientific atheism, contemporary philosophy abroad, theoretical problems of ethnic relations and proletarian internationalism, philosophical problems of social psychology, sociological research on labor and on social and professional guidance, and sociopsychological problems of management. Since the 1960s there has been a strong emphasis on research with an immediate practical application in education, the economy, or the building of a communist society. Its most important and interesting philosophical contributions have been in the fields of philosophy of science and the history of philosophy in Ukraine. Among the leading specialists in the first area are M. Omelianovsky, P. Kopnin, P. Dyshlevy, and M. Popovych, and in the second area, D. Ostrianyn, V. Nychyk, and I. Tabachnikov. The institute's publication of scholarly edi-

tions of the collected works of H. Skovoroda (1961, 2nd edn 1973) and the translated works of T. Prokopovych (1979–81), and some textbooks from philosophy courses given at the Kievan Mohyla Academy in the 17th and 18th centuries, have a lasting significance for the history of philosophy. In 1973 it published the first Ukrainian *Filosofs'kyi slovnyk* (Philosophical Dictionary). Besides monographs, collections of essays, and pamphlets, the institute published annually *Naukovi zapysky Instytutu filosofii* (7 vols, 1951–61) and continues to publish the Ukrainian-language bimonthly *Filosofs'ka dumka* (since 1969). The institute's directors have been M. Omelianovsky (1946–52), D. Ostrianyn (1952–62), P. Kopnin (1962–8), and V. Shynkaruk (since 1968).

T. Zakydalsky

**Institute of Physical Chemistry of the Academy of Sciences of the Ukrainian SSR.** See Chemistry.

**Institute of Physical-Organic Chemistry and Coal Chemistry of the Academy of Sciences of the Ukrainian SSR** (Instytut fizyko-orhanichnoi khimii ta vuhlekhimii AN URSR). A scientific institute established in Donetsk in 1975 out of the Donetsk branch of physical-organic chemistry of the AN URSR Institute of Physical Chemistry. It has 13 departments, a petrochemical branch in Kiev, and a pilot plant. Its scientists (110 in 1980) study kinetics and the mechanism of organic reactions, coal-based and organic synthesis, and catalysis by organometallic and organic compounds; they develop new physicochemical methods for the study of coal and oil and their components, and for converting them into chemical intermediates and fuels. The institute has been directed by L. Lytvynenko (1975–83) and A. Popov (1983–).

**Institute of Physics of the Academy of Sciences of the Ukrainian SSR** (Instytut fizyky AN URSR). A scientific institute established in Kiev in 1929 as the Kiev Research Institute of Physics out of the physics chair of the Kiev Polytechnical Institute. Incorporated into the VUAN in 1932, it was renamed in 1936. It has 12 departments, 2 laboratories, a graduate program, a technological-design office, and a production enterprise. Its scientists (216 in 1980) conduct research in solid-state physics, surface physics, plasma physics, quantum electronics, quantum optics, new types of tunable lasers and lasers of extreme-narrow spectral lines, and the development of new research instrumentation. Some of the research previously conducted at the institute is now done at the AN URSR institutes for Nuclear Research, of Semiconductors, of Metal Physics, and of Theoretical Physics. The institute has been directed by O. Goldman (1929–38), Ye. Myseliuk (1938–41), G. Pfeiffer (1941–4), O. Leipunsky (1944–9), M. Pasichnyk (1949–65), A. Prykhotko (1965–70), and M. Shpak (1970–). (See also \*Physics.)

**Institute of Physiology of the Academy of Sciences of the Ukrainian SSR** (Instytut fiziologii im. O.O. Bohomoltsia AN URSR). A research institute established in Kiev in 1953 out of the Institute of Experimental Biology and Physiology of the Ministry of Health Protection (est 1930) and the AN URSR Institute of Clinical Physiology (est 1934). It has 14 departments, 9 laboratories, and a research-production enterprise. Its scientists (159 in 1980)

do research on the \*physiology and pathophysiology of higher nervous activity, cellular processes, and the blood-vascular system, and develop drugs and methods for curing nervous, mental, heart, and digestive disorders and diseases. The institute publishes the journals *Fiziologicheskii zhurnal* (1955–) and *Neirofiziologiya* (1969–). Its directors have been A. Vorobiov (1953–5), O. Markarchenko (1955–66), and P. Kostiuik (1966–).

**Institute of Radio Physics and Electronics of the Academy of Sciences of the Ukrainian SSR** (Instytut radiofizyki i elektroniki AN URSSR). A scientific institute founded in Kharkiv in 1955 out of a division of the AN URSSR \*Physical-Technical Institute. It has 16 departments, 2 laboratories, an experimental-production enterprise, and a research-design office. Its scientists (209 in 1980) study millimeter and submillimeter radio waves, electromagnetic transmission, wave refraction, diffraction, and absorption, radio astronomy, high-frequency properties of solid materials, biophysics, and semiconductor physics; they have made significant contributions in the fields of radiometry, quantum electronics, acoustic lasers, plasma physics, and radio propagation. The institute's radio astronomy division built the electronically controlled UTR-2 radio telescope; at the time of its construction (1970), it was the most powerful instrument of its type in the northern hemisphere. With the aid of this and other radio telescopes, fundamental research has been performed on pulsars and the sun's corona. The institute has designed and manufactured various radio and electric apparatuses and measuring instruments that are used throughout the USSR. It has been directed by O. Usykov (1955–73) and V. Shestopalov (1973–).

L. Onyshkevych

**Institute of Semiconductors of the Academy of Sciences of the Ukrainian SSR** (Instytut napivprovodnykiv AN URSSR). A scientific institute established in Kiev in 1960 out of two departments and a laboratory of the AN URSSR Institute of Physics. It has 17 departments, several laboratories, a technological-design office, a graduate program, and a pilot plant. Its scientists (380 in 1980) study interaction of electromagnetic radiation with semiconductors (eg, photoelectric and optical instruments and solid-state lasers), radiospectroscopy, surface phenomena, and crystal structure and defects, and design semiconductor devices. Their contributions have been applied to electron microscopy, transducers for petrochemical studies, cryogenics, and optoelectronics. The institute publishes the serial collections *Kvantovaia elektronika* and *Poluprovodnikovaia tekhnika i mikroelektronika*. It has been directed by V. Lashkarov (1960–70) and O. Snitko (1970–).

**Institute of Social and Economic Problems of Foreign Countries of the Academy of Sciences of the Ukrainian SSR** (Instytut sotsialnykh i ekonomichnykh problem zarubizhnykh krain AN URSSR). An institute established in 1978 within the AN URSSR Social Sciences Section as the principal republican policy-oriented research center in the field of international affairs. It forms a part of the academy's Department of Economics and is divided into three sections with 11 departments (one in Uzhhorod and one in Chernivtsi). The institute's main areas of research include national problems in foreign countries and questions of ideology; migration processes

abroad and the situation of the Ukrainian emigration; and the struggle against 'foreign organizations of Ukrainian bourgeois nationalists and Zionist centers.' It is responsible for co-ordinating the work of Ukrainian social scientists in the area of counterpropaganda. In recent years, its efforts in this regard have been subjected to serious criticism. The institute has published over 40 monographs and collections of articles and publishes (since 1981) a quarterly, *Zarubezhnyi mir: sotsial'no-politicheskie i ekonomicheskie problemy*. It has a research staff of approximately 50 individuals and since 1978 its director has been A. Shlepakov.

**Institute of Social Sciences of the Academy of Sciences of the Ukrainian SSR** (Instytut suspilnykh nauk AN URSSR). The institute was organized in 1951 out of the Lviv branches of the academy's institutes of economics, history, archeology, literature, and linguistics. These branches had been established in 1940–1 in place of the dissolved Shevchenko Scientific Society and were restored in 1945. From 1963 to 1969 the institute came under the jurisdiction of the Ukrainian SSR Ministry of Higher and Secondary Special Education. Then it became part of the Social Sciences Section of the Academy of Sciences. Its directors have been O. Nesterenko, I. Krypiakievych, M. Oleksiuk, V. Chuhaiev, and M. Bryk. During the cultural revival of the 1960s the institute became one of the main centers of interdisciplinary studies in Western Ukraine, particularly in history, archeology, folklore, ethnography, and economics. It published a number of collections, including *Materialy i doslidzhennia z arkeolohii Prykarpattia i Volyni* (Materials and Research in the Archeology of Subcarpathia and Volhynia, 5 vols, 1954–64) and *Z istorii zakhidnoukraïns'kykh zemel'* (From the History of Western Ukrainian Lands, 5 vols, 1957–60), which was continued as *Z istorii Ukraïns'koï RSR* (From the History of the Ukrainian SSR, 3 vols, 1962–3). The institute also publishes monographs and collective works on the history of material culture, on ancient populations of Subcarpathia and Volhynia, on Ukrainian historical lexicology and lexicography (including an important two-volume dictionary of Old Ukrainian, 1977–8), on paleolithic monuments of the Dniester region, and on the archeology of Galicia. After suffering a decline during the repressions of the 1970s, the institute recently has experienced a revival. It is organized in seven departments and has an academic staff of over 70 individuals.

I. Myhal

**Institute of State and Law of the Academy of Sciences of the Ukrainian SSR** (Instytut derzhavy i prava AN URSSR). Research institution of the Academy of Sciences formed in 1969 out of the Sector of State and Law (est 1949). It comes under the Division of History, Philosophy, and Law. The institute is organized into six departments: theory and history of the state and law, Soviet construction, the management of the state and economy, socialist legality and criminology, problems of Ukraine's involvement in international law, and comparative state studies. There are also several councils devoted to specific problems. The institute has the task of co-ordinating research in the field of juridical sciences in Ukraine. It also provides graduate studies in its various departments. During the cultural revival of the 1960s an attempt was made to develop the history of the Soviet

Ukrainian state and law. Since the early 1970s the institute has concentrated on problems of economic management, socialist construction, and Soviet procuratorial and investigative practice. Its most important publications include *Narysy z istorii derzhavy i prava Ukrain's'koi RSR* (A Survey of the History of State and Law of the Ukrainian SSR, 1957), *Istoriia derzhavy i prava Ukrain's'koi RSR (1917–1967)* (The History of the State and Law of the Ukrainian SSR [1917–1967], 2 vols, 1967), and several collections of documents on the history of the international relations of the Ukrainian SSR. Since 1958 the institute has published the journal *Radians'ke pravo* in collaboration with the Ministry of Justice of the Ukrainian SSR, the Supreme Court, and the republican procurator's office. The institute's directors have been V. Koretsky and B. Babii, and currently it has an academic staff of over 60 individuals.

I. Myhal

**Institute of Superhard Materials of the Academy of Sciences of the Ukrainian SSR** (Instytut nadtverdnykh materialiv AN URSR). A scientific institute established in Kiev in 1961; in 1972 it became part of the academy. It has 20 departments and laboratories, a technological-design office, a pilot plant, and a graduate program. Its scientists (270 in 1980) study the formation of diamonds and other superhard crystals, their properties and synthesis, and their various industrial and scientific applications. They have developed a technology for synthesizing artificial industrial diamonds; supervised the construction of production facilities for superhard materials, machines, and instruments in Poltava, Yerevan, Lviv, and elsewhere; invented new superhard materials (eg, Slavutych); pioneered the CVD method of growing thin films of diamond; and synthesized a new industrial diamond (AV) using explosive methods. Use of the institute's inventions has been licensed to various foreign countries. The institute publishes the journal *Sverkhtverdye materialy* (1979–) and the periodical collection *Sinteticheskie almazy*. It has been directed by V. Bakul (1961–77) and M. Novykov (1977–).

L. Onyshkevych

**Institute of Technical Thermophysics of the Academy of Sciences of the Ukrainian SSR** (Instytut tekhnichnoi teplofizyky AN URSR). A technological institute established in Kiev in 1947 out of several departments of the AN URSR Institute of Energetics (est 1939); until 1963 it was called the Institute of Thermoenergetics. It has 5 sections, 18 departments, 2 research-and-design technological offices, 2 research-production enterprises, and a pilot plant. Its scientists (268 in 1980) study the practical problems of thermodynamics, the development of new energy sources, air pollution, thermal problems in nuclear-power and mining technology, and thermal exchange. The research results are used at over 500 Soviet concerns. The institute publishes the bimonthly journal *Promyshlennaia teplotekhnika* (1979–) and the periodical collections *Teplofizika i teplotekhnika* and *Problemy kontroliia i zashchita atmosfery ot zagriaznennia*. It has been directed by I. Shvets (1947–52, 1954–5), V. Tolubynsky (1953–4, 1963–72), G. Shchegolev (1955–63), H. Babukha (1972–3), O. Herashchenko (1974–83), and A. Dolinsky (1983–).

**Institute of the Biology of Southern Seas of the Academy of Sciences of the Ukrainian SSR** (Instytut biolohii pivdennykh moriv im. O.O. Kovalevskoho AN URSR). Research institute founded in 1963 in Sevastopol on the basis of the Sevastopol, Karadag (Teodosiia), and (in 1964) Odessa biological stations. With its branches in Odessa and Teodosiia (the Karadag branch), it consisted in 1980 of 586 employees (159 scholars) in 11 departments, 21 laboratories, and it operated 3 exploration ships (in 1976). It conducts and publishes research in marine biology and ecology, the development and protection of marine resources, marine pollution, and the economic exploitation of the marine environment. Since 1977 the director of the institute has been V. Zaika.

**Institute of the Economics of Industry of the Academy of Sciences of the Ukrainian SSR** (Instytut ekonomiky promyslovosti AN URSR). Research institute in Donetsk founded in 1969 on the basis of the Donetsk industrial-economics branch of the Institute of Economics. Research in the institute's 11 departments (1 is located in Zaporizhia) focuses on computer technology and econometrics and their application in industry, and on problems in production management and planning. The institute has branches in Dnipropetrovske, where research concentrates on the metallurgical industry, and Voroshylovhrad, and operates a computer center in Donetsk. In 1985 the staff numbered approximately 350. The institute has been headed by O. Alymov (1969–73) and M. Chumachenko (1973–).

**Institute of the Geochemistry and Physics of Minerals of the Academy of Sciences of the Ukrainian SSR** (Instytut heokhimii i fizyky mineraliv AN URSR). A scientific institute founded in Kiev in 1969 from the Geochemistry, Mineralogy, Petrography, and Ore Deposits Sector and the Metallogenesis Sector of the AN URSR Institute of Geological Sciences. It has 16 departments, a metallogenesis sector, several laboratories, and a research pilot plant. Its scientists (200 in 1980) conduct fundamental research in geochemistry, mineralogy, petrology, and metallogenesis. They study the nature and properties of minerals (using crystallochemistry and mineral physics) and the geology and geochemistry of Ukraine's ore and mineral deposits; establish criteria for prospecting; and scientifically predict deposit locations. The institute is a leading Soviet institution in geochronology; it has produced a catalogue and map of the isotopic dates and strata in the Ukrainian Shield. Its scientists' research in metallogenesis and ore formation has resulted in discoveries of significant titanium deposits. The institute publishes four research annuals. Its directors have been M. Semenko (1969–77) and M. Shcherbak (1977–).

S. Trofimenko

**Institute of the Geology and Geochemistry of Fossil Fuels of the Academy of Sciences of the Ukrainian SSR** (Instytut heolohii i heokhimii horiuchykh kopalyn AN URSR). A scientific institute established in 1951 in Lviv, replacing a branch of the AN URSR Institute of Geological Sciences. Until 1962 it was called the Institute of the Geology of Useful Minerals. The institute has 10 departments and 7 laboratories. Its scientists (123 in 1980) study the theoretical and practical problems of

geology, geochemistry, and geophysics relating to the genesis and structure of fossil fuels and their migration and accumulation in deep and shallow strata; and assess the potential of Ukraine's coal, gas, and oil, and sulfur deposits, develop new technology in relation to these, and make recommendations for their rational industrial exploitation. The institute leads the way in Soviet studies of endogenous mineral formation, based on inclusions; its scientists have created an evolutionary model of physicochemical conditions of mineralogenesis in pegmatite and metasomatite granite inclusions, which forms the basis for locating valuable minerals. Since 1965 the institute has published the serial *Geologiya i geokhimiya goruchikh iskopaemykh*. Its directors have been V. Porfirev (1951–63), H. Dolenko (1963–82), and R. Kucher (1982–).

S. Trofimenko

**Institute of the History of Material Culture.** See Institute of Archeology of the Academy of Sciences of the Ukrainian SSR.

**Institute of the History of Ukrainian Culture.** See Scientific Research Institute of the History of Ukrainian Culture.

**Institute of the Ukrainian Scientific Language** (Instytut ukrainskoi naukovoï movy or IUNM). An institute of the VUAN formed in 1921 after the consolidation of the Terminological Commission of the Ukrainian Scientific Society in Kiev and the Orthographic-Terminological Commission of the Historical-Philological Division of the VUAN. It consisted of departments of law (chaired by I. Cherkasky), natural science (P. Tutkovsky, Kh. Polonsky), technology (K. Turkalo), agriculture (K. Osmak), and economics (H. Kryvchenko). Its first director was A. Krymsky; its secretaries were M. Liubynsky (until 1925) and H. Kholodny, who later became its second director. The IUNM flourished from 1925 to 1928, when it employed up to 25 scholars. From 1923 to 1930 it published over 20 terminological dictionaries in the fields of chemistry, geology, mathematics, administrative language, anatomy, zoology, botany, pedagogy, natural science, communal economy, construction, technology, and military affairs (see \*Terminology). It also published two issues of *Visnyk IUNM* (1928–30) and a manual (1928) for collecting natural-science terminological materials. In 1930 Kholodny and seven IUNM associates were defendants in the show trial of the \*Union for the Liberation of Ukraine and imprisoned; the work of IUNM was condemned as nationalistic wrecking and the IUNM was abolished and replaced by the \*Institute of Linguistics of the AN URSR.

K. Turkalo

**Institute of Theoretical Physics of the Academy of Sciences of the Ukrainian SSR** (Instytut teoretychnoi fizyky AN URSR). A research institute established in Kiev in 1966 out of the theoretical division of the AN URSR Institute of Physics. It has 14 departments, a graduate program, and a branch in Lviv. Its scientists (120 in 1980) conduct fundamental research in the fields of solid-state physics, nuclear and particle theory, statistical physics, chaos dynamics, plasma physics, and quantum biophysics. The institute publishes in Russian the periodical collection *Fizika molekul*. It has been directed by N. Bogoliubov (1966–72) and O. Davydov (1973–). The insti-

tute's halls are decorated with I. Marchuk's ceramic bas-reliefs and mosaics depicting motifs from Ukrainian cultural history.

**Institute of Zoology of the Academy of Sciences of the Ukrainian SSR** (Instytut zoolohii AN URSR). The co-ordinating center of zoological research in Ukraine, established in Kiev in 1930 out of the VUAN zoology museum (est 1919) and the F.Z. Omelchenko Biology Institute (est 1919 as a laboratory); until 1938 it was called the Institute of Zoology and Biology. The institute has 12 departments and 3 laboratories and experimental bases; it runs the \*Black Sea Nature Reserve. Its scientists (144 in 1980) do research on the systematics and evolution of animal and plant organisms, parasitology, ecology, and the problems of utilization and conservation of the animal world. The institute publishes the serial *Zbirnyk prats' zoolohichnoho muzeiu* (1926–), the multivolume reference work \**Fauna Ukrainy* (The Fauna of Ukraine, 1956–), and the bimonthly journal *Vestnik zoologii* (1967–). Its directors have been I. Shmalhauzen (1930–41), D. Tretiakov (1944–8), O. Markevych (1948–50), V. Kasianenko (1950–63), P. Mazhuha (1963–5), I. Pidoplichko (1965–73), and V. Topachevsky (1973–). (See also \*Zoology.)

**Institutes.** In Imperial Russia the term was applied to certain research institutions and to boarding schools for children of the nobility. Before 1918 there were 12 institutes in Ukraine. From 1920, when universities were abolished, to 1933, when they were restored, institutes were the principal type of higher educational institution in Soviet Ukraine. Since then most \*higher educational institutions other than universities have been called institutes. In 1982 there were 45 technological, 15 medical, 13 agricultural, 8 pedagogical, 7 economic and law, 3 art, and 1 physical education institutes in Ukraine. Similar educational institutions are known also as academies and higher schools. Scientific research institutes not only conduct basic research in the natural and social sciences but also prepare specialists in the different fields. Some of them (58 in 1977) belong to the system of the \*Academy of Sciences of the Ukrainian SSR, while others come under various ministries. Details about the latter are kept secret. Regional scientific centers of the Academy of Sciences (Dnipropetrovske, Donetsk, Western, Northwestern, Northeastern, and Southern) co-ordinate the work of the various research institutes and bring it into closer relation with industry.

**Institutes for daughters of the nobility** (*instytuty blahorodnykh divyts*). Boarding schools for noble girls between the ages of 12 and 17 in prerevolutionary Russia. They were loosely patterned on the Smolnyi Institute in St Petersburg (est 1764), the first school of this type in Russia. Such schools were introduced in Russian-ruled Ukraine, partly as an alternative to Roman Catholic convent schools, which were Polish in spirit. The first institute for noble girls in Ukraine was established in Kharkiv in 1812. It was followed by similar ones in Poltava (1817), Odessa (1828), Kerch (1835), and Kiev (1838). Their purpose was moral, rather than academic, education: to prepare young women for their role as wives and mothers. Emphasis was placed on the social graces, French language, music, drawing, dancing, and handicrafts. Some

instruction in literature, history, and religion was also included. An optional one-year course in pedagogy was sometimes offered. The girls were supervised and watched closely under an oppressive regime. Ukrainian teachers, who were usually men, sometimes managed to introduce local Ukrainian flavor into the curriculum. By the end of the 19th century the program of the institutes was updated to reflect the standards of secondary education.

M. Bohachevska-Chomiak

**Institutes of culture** (*instytutu kultury*). Higher educational institutions in the USSR that train librarians, bibliographers, and cultural-educational workers such as club managers and amateur choir, orchestra, and drama-group directors. They were organized out of former library science institutes. Their program for full-time students requires four years, and for part-time students five years of study. In 1979 there were 17 institutes of culture in the USSR, three of which were in Ukraine: in Kiev (with a branch in Mykolaiv), Kharkiv, and Rivne.

**Institutes of foreign languages** (*instytutu inozemnykh mov*). Pedagogical institutes that train teachers of foreign languages for higher educational institutions and upgrade the qualifications of language teachers. Today there are two such institutes in Ukraine: the Kiev Pedagogical Institute of Foreign Languages (est 1948) and the Horlivka Pedagogical Institute of Foreign Languages (est 1949 in Bila Tserkva and moved to Horlivka in 1954). The former has six departments: English, French, German, Spanish, Russian (for foreign students), and professional development. The latter has two: English and French.

**Institutes of people's education** (*instytutu narodnoi osvity*, INO). Higher pedagogical schools introduced in 1920 by H. \*Hrynko in place of universities as part of his general reform of the educational system of the Ukrainian SSR. They were formed out of the physical-mathematical-scientific and the historical-philological faculties of abolished universities and from teachers' institutes. INOs were divided into two faculties: the faculty of social education with a three-year program to prepare teachers for the upper grades of seven-year schools, and the faculty of professional education with a four-year program to prepare teachers for vocational schools. The faculties were subdivided into various departments. In 1929 there were 12 INOs: in Kiev, Kharkiv, Odessa, Dnipropetrovske, Nizhen, Poltava, Kamianets-Podilskyi, Zhytomyr, Mykolaiv, Kherson, Chernihiv, and Luhanske. Their total enrollment was 6,200, Ukrainians accounting for 65 percent. Most of the institutes published their own journals. In 1930 they were split up into more specialized institutions – \*institutes of social education, \*institutes of professional education, and institutes of political education.

**Institutes of professional education** (*instytutu profesinnoi osvity*). Higher educational establishments with three faculties (social sciences, physics-mathematics, agriculture-biology) that existed in the Ukrainian SSR from 1930 to 1933. Based on the faculties of professional education of the former \*institutes of people's education, their four-year program trained lecturers for \*tekhnikums, \*workers' faculties, and other technical schools. In 1933 they were incorporated into the reorganized university system.

**Institutes of social education** (*instytutu sotsialnoho vykhovannia*). Post-secondary pedagogical institutions organized in 1930 in the Ukrainian SSR out of the faculties of social education of the \*institutes of people's education. They offered three-year programs that qualified graduates to teach in seven-year schools or pedagogical *tekhnikums*, or to supervise children's clubs. The Kharkiv Institute of Social Education was the first institute to obtain a department for the protection of minors and a department for instructors of people's education. In 1933 the institutes of social education were reorganized into \*pedagogical institutes.

**Instructional literature.** A genre of oratorical, didactic prose that was popular in ancient and medieval times in Europe. There are many translated and original works of this genre in Old Ukrainian literature – speeches, discourses, and homilies. Among translated works the oldest are the instructions of Xenophon and Theodora in the \**Izbornik* of Sviatoslav (1076). Of the original works the most important are Prince Volodymyr Monomakh's \**Pouchennia ditiam* (Instructions to My Children), Ilarion's \**Slovo o zakoni i blahodati* (Sermon on Law and Grace), the sermons and instructions of Cyril of Turiv, the \**Pouchennia o liubvi* (Instructions on Love) attributed to Klym Smoliatykh, and the instructions of Luka Zhydiata and of Serapion of Vladimir. Some anonymous works were also widely known: \**Slovo o pravdi i nepravdi* (A Sermon on Truth and Falsehood), \**Slovo o linyvim i sonlyvim* (A Sermon on a Lazy and Sleepy Man), a sermon on parental respect, and others. The nature of poetry in \**Ifika ieropolitika* (1712) was also instructional. Works of instructional literature typically consist of an appeal to children or the faithful to live righteously, learn, work hard, be merciful toward others, and live humbly and simply.

**Instrumental music.** In Ukraine, as in Western Europe, instrumental music developed considerably later than vocal music. The earliest works of instrumental music date back to the second half of the 18th century with the sonata for violin and harpsichord by M. Berezovsky and numerous compositions by D. Bortniansky: several piano sonatas, three violin sonatas, a quartet, a quintet, and the *Symphony in B-flat major*. A major contribution to Ukrainian instrumental music was made by M. \*Lysenko, who wrote a number of piano compositions (*Ukrainian Suite* [1869]), two rhapsodies based on themes from Ukrainian folk songs, a sonata, and the *Heroic Scherzo*, works for piano and violin, a trio, and a quartet. A contemporary of Lysenko, M. Kolachevsky, composed works for the piano and a symphony in four movements. At the beginning of the 20th century many instrumental works, especially for piano, were composed by Ya. Stepovy, S. Liudkevych, V. Barvinsky, L. Revutsky, and V. Kosenko. Since then, instrumental music in all its forms (solo, \*chamber, and orchestra music) has been the most popular style of music among Ukrainian composers.

**Insurance.** A form of risk sharing. In return for paying premiums to an insurance fund, insured individuals or legal persons are guaranteed compensation for specific types of damage to their material or personal interests. Obligatory social-insurance coverage is administered in much the same manner in both Soviet-type and capitalist economies. The organization of optional forms of insurance differs in two principal ways. First, the financial power of Western insurance firms is incompatible with the Soviet bloc's economic structure. Hence, all forms of insurance in Ukraine are administered by the state, which is not obliged to keep a minimum percentage of insurance funds on hand and uses premiums to finance a variety of social and economic programs. The second difference is the absence of Western civil-damage laws and the attendant need for liability insurance. Consequently a greater burden is placed on compensatory forms of insurance. Some groups, however, are shortchanged in the interplay between the state as the employer, the state as the producer, and the welfare state. Collective farmers, for example, can neither receive benefits for which disabled state employees qualify nor sue for damages if, for instance, a state-manufactured auger malfunctions.

The earliest form of indemnity in Ukraine, as set down in the *Ruskaia Pravda*, was the payment of damages or *\*vyra* in cases of manslaughter of a member of a community or of his or her murder by an unknown assailant. Three characteristics of the *vyra* evoke modern forms of insurance: it was linked to a citizen's death; liability was shared by all of the community's members; and it was paid out in installments over a number of years.

Modern forms of insurance did not develop in Ukraine until the late 18th century, when Russian- and foreign-owned joint-stock associations and mutual-insurance companies arose in the Russian Empire. The tsarist government tried to oust the foreign companies and to control the insurance (especially property insurance) business. In 1827 it gave the newly formed private First Russian Insurance Company a monopoly on fire insurance in some of the empire's cities, including Odessa. The Second Russian Fire Insurance Company (est 1835) was given an insurance monopoly in the 9 Ukrainian gubernias and 31 others, excluding the cities there.

In cities such as Poltava, Kharkiv, Kherson, Kiev, and Odessa, mutual fire-insurance companies became very successful. The Kiev Mutual Fire Insurance Company for Beet-Sugar Factories and Refineries was established in 1872. In 1864 legislation gave the newly formed zemstvos responsibility for farm insurance in the Left-Bank and steppe gubernias. Where there were no zemstvos (eg, in Kiev, Volhynia, and Podilia gubernias), state-run insurance institutions operated. A minimum level of insurance coverage was compulsory for everyone. Life insurance was organized by railway workers' pension funds and state-run savings banks.

Similar types of insurance companies developed in Western Ukraine on the basis of the Austrian imperial patent of 1852. Initially all insurance companies there

were foreign owned. In 1892 the first Ukrainian fire-and-theft insurance company, \*Dnister, was founded in Lviv. From 1911, with the establishment of the \*Karpatiiia mutual-insurance company, Ukrainians could buy life insurance from a Ukrainian company as well. From 1935 to 1939 the business of these two companies was hindered by the granting of a monopoly on fire insurance to a Polish company.

After the Revolution of 1917, co-operative insurance companies – which had been almost non-existent under tsarism – flourished in Ukraine. In 1918 the \*Strakhsoiuz All-Ukrainian Insurance Union was formed; one of the chief functions it performed was conducting a vote at its general meetings on how many insurance payments each member co-operative should be obliged to make. During the period of War Communism (1919–21) the state took control of insurance. In 1921 it provided coverage for workers and employees (and extended it to all citizens in 1922), liquidated the Strakhsoiuz and all other insurance companies, and nationalized their assets. This extreme measure was softened in 1922, when co-operatives were allowed to provide mutual insurance of movable property and goods under the auspices of the All-Ukrainian Co-operative Insurance Union (Koopstrakh). The Koopstrakh prospered (from 1926–7 its guarantees totaled 672.2 million rubles) until it, too, was liquidated in 1930. From 1925 a central agency in Moscow – the Chief Administration of State Insurance (Gosstrakh) of the Ministry of Finance of the USSR – administered all insurance matters. All farmers were obliged to purchase fire, livestock, disease, hail damage, and transportation-accident insurance from the state. During collectivization, however, the Gosstrakh refused to indemnify peasant households on the grounds that livestock, buildings, and machines were being intentionally destroyed to keep them from falling into the hands of the collective farms.

In 1956 the Soviet insurance system was reformed. On the premise that insurance was basically a way for small bodies to share risks that they could not afford to take alone, the state opted out of all insurance schemes. In 1958 the insurance system was decentralized, and the Gosstrakh became a separate department whose functions were restricted to co-ordinating its branches in each of the republics. The Gosstrakh of the Ukrainian SSR, or Derzhstrakh, which is responsible to the republican Ministry of Finance, became the body that oversees insurance in Ukraine. In 1958 it spent 401.1 million rubles on insurance (41.2 percent on temporary disability, 15.3 percent on maternity and childcare, 9.2 percent on sanatoriums and other medical expenses, 2.6 percent on children's services, and 1.0 percent on other expenses).

In Soviet Ukraine today two types of insurance exist: property and personal. The property of collective and state farms and other agricultural enterprises and privately owned buildings and cattle must be insured. \*Social insurance and travel insurance (except when using municipal transit and intraoblast buses) are also obligatory. Collective farms can purchase optional insurance on their livestock, crops, and equipment. The main forms of optional insurance for individuals are household, property, livestock, life, disability, accident, and child insurance. Soviet citizens and foreign-trade bodies functioning abroad are insured by the Administration of Foreign Insurance (Inderzhstrakh) of the Ministry of Finance of the USSR.

Intarsia: wooden plate depicting Hetman B. Khmelnytsky

**Intarsia.** A pictorial or ornamental mosaic consisting of wood pieces of various colors and textures inlaid in a wood surface. Developed in Italy in the 15th century, in the latter half of the 18th century intarsia became a popular method for decorating furniture, tableware, musical instruments, and religious objects in the western parts of Ukraine. Since the 19th century it has been used mostly in Hutsul handicrafts. Intarsia was used first in Hutsul wood carving by V. \*Devdiuk. Besides traditional geometric ornamentation, since 1945 various propagandistic Soviet themes and portraits of a few Ukrainian historical figures have been done with intarsia.

**Intelligentsia.** A collective name for those who play a leading role in the cultural, social, and intellectual life in a society, from the Latin word *intelligentia* ('intelligence') from *intellegere* ('to perceive, understand, comprehend'). In Ukrainian and Russian the term (*inteligentsiia*, *intelligentsiia*) is a general abstract noun based on the noun *inteligent*, *intelligent* ('intellectual'). Contemporary sociological usage, however, often distinguishes between the intelligentsia – a broad social group consisting of professionally trained specialists – and intellectuals – a subcategory of the former that includes only those who serve as culture-bearers and the custodians of the tradition of creative and critical thinking about society's problems.

The word 'intelligentsia' is widely thought to be of mid-19th-century Russian origin, when it referred to a small educated minority whose members came from all sections of society, but mainly from the \*nobility and urban bourgeoisie (\*burghers). During the 19th century the term was also often used to describe only those educated individuals who aspired to independent thinking, questioned traditional values and the status quo, and sought radical social and political changes (eg, the Slavophiles and Westernizers, and later the Populists, socialists, and Marxists).

In Soviet Ukraine the intelligentsia is defined as 'a social group comprising individuals professionally involved in creative mental work, in the development and dissemination of culture, or in fulfilling specific administrative functions in production or other spheres of social life.' This broad definition includes almost all individuals employed in occupations requiring some post-secondary education, ie, professional scientists, engineers, teachers, physicians, librarians, academics, writers, artists, and supervisory personnel in industry and the state administration. Unlike the workers and collective farmers, who are said to constitute a class, the intelligentsia is considered to be a social group. However, some Western analysts and unofficial Soviet theorists have argued that part of the intelligentsia – ie, those in the political, military, and police hierarchy – do, in fact, constitute a new ruling class.

In modern times the intelligentsia has played a prominent role in anticolonial and national movements, particularly of nations that have lost their traditional ruling class (eg, the nobility) and whose economic development has been so weak that it has failed to produce significant indigenous bourgeois, petit-bourgeois, merchant, or artisan groups. In other national movements the petite bourgeoisie (eg, the Czech) or the gentry (eg, the Polish or Hungarian) played a leadership role, but in Ukraine leadership of the national movement went by default to the intelligentsia, because the other groups were missing in the social structure of the Ukrainian nation. The fact that until recently the Ukrainian intelligentsia was a small group hindered the development of national consciousness and the national movement.

The intelligentsia emerged as a separate social stratum in Russian-ruled Ukraine in the first half of the 19th century. Its ranks were initially filled by the sons of the minor gentry, who, finding no outlet in agriculture and commerce, sought positions in the service of the empire as petty officials and clerks, junior military and naval officers, or educators. Every modest modernizing step, eg, the growth of industry or the educational system, increased the size of the indigenous intelligentsia. The emancipation of the peasantry in 1861, which hastened its differentiation, provided an additional stimulus for the growth of its cadres. In the 1870s, the richer peasants, like their gentry predecessors, began pushing their sons to acquire some education.

Because of the preponderance of impoverished peasants in Ukraine's social structure and an educational system that was elitist and linguistically Russian, the nationally conscious Ukrainian intelligentsia represented but a tiny layer of the population. According to the 1897 census, out of a total population of 23.4 million in the nine Ukrainian gubernias, only 24,000 individuals had some form of tertiary education, and only 17,000 had

specialized secondary training. The vast majority of this intelligentsia was not Ukrainian, but Russian, Jewish, or Polish. Moreover, because of socioeconomic and political pressures, many members of the intelligentsia with Ukrainian backgrounds had become Russified. For example, only 16 percent of the lawyers, less than a quarter of the teachers, and only 10 percent of the writers and artists in Ukraine claimed Ukrainian nationality in 1897. Of the 127,000 people enumerated in the census as having occupations involving intellectual labor, less than a third were Ukrainian.

The first formal sociopolitical organization of the nationally conscious Ukrainian intelligentsia – the secret \*Cyril and Methodius Brotherhood – existed briefly (1846–7) before being suppressed. From the late 1850s to the 1890s, the clandestine \*hromadas were its main organizations. In the late 19th century, the Ukrainian intelligentsia turned to organizing \*Prosvita societies, a \*co-operative movement, and revolutionary political \*parties. From the 1917 Revolution to 1921 the national movement and the struggle for Ukrainian \*autonomy and independence were headed largely by the intelligentsia.

In Western Ukraine the emergence of an intelligentsia was the result of the educational reforms of the Habsburg enlightened absolutists \*Maria Theresa (1740–80) and her coruler and successor \*Joseph II (1765–90). They established theological seminaries in Vienna, Lviv, Uzhhorod, and Chernivtsi to provide the Ukrainian clergy with a higher education; they also founded Lviv University and gymnasia in Lviv and Uzhhorod (a gymnasium was founded in Chernivtsi in 1808). In both Galicia and Transcarpathia these institutions very rapidly produced a Ukrainian intelligentsia. In the case of Transcarpathia there was even an overproduction of intelligentsia relative to the needs of the region, and a number of Ukrainian intellectuals immigrated to the Russian Empire, where they enjoyed considerable success (eg. P. Lodi, I. Orlai, and Yu. Venelyn). Although this new intelligentsia was primarily clerical, it included a secular component from the start, especially in Transcarpathia; a Ukrainian secular intelligentsia was unambiguously in evidence in Galicia by the 1840s. The development of a Ukrainian intelligentsia proceeded much more slowly in Bukovyna, since the Habsburgs did not take as much care to educate the Orthodox clergy there as they did to educate the Greek Catholic clergy in the rest of Western Ukraine.

During the Revolution of 1848 it was primarily the Galician clergy that assumed leadership of the \*Supreme Ruthenian Council, the representative political body of Western Ukraine. Nonetheless, the secular intelligentsia (often of clerical social backgrounds) played a considerable role: Ukrainians employed in the civil service made up 32 percent of the council's membership; university and gymnasium students, 10 percent; and educators and writers, each 5 percent.

The constitutional restructuring of the Habsburg Empire in the late 1860s had a major impact on the west-Ukrainian intelligentsia. The Compromise of 1867 between Austria and Hungary led to the forcible Magyarization of the church, bureaucracy, and educational institutions in Transcarpathia, decimating and weakening the local Ukrainian intelligentsia. In 1910 only 0.8 percent of Transcarpathia's Ukrainians were employed as teachers, notaries, lawyers, priests, journalists, or in the military.

Although the Ukrainian intelligentsia in Galicia was subject to pressures of Polonization after the Austro-Hungarian Compromise, these pressures were more than counterbalanced by the civil rights guaranteed under the Austrian constitution of 1867. As in Transcarpathia, only 0.7 to 0.8 percent of the Ukrainian population was employed in the bureaucracy and liberal professions in 1900, yet there were several crucial differences. First, the Galician Ukrainian intelligentsia achieved a relatively high aggregate number (over 6,000 by the early 1870s, and over 20,000 by the turn of the century), which enabled it to undertake ambitious projects (such as the establishment of an academy – the \*Shevchenko Scientific Society – in 1893 and the publication of 43 periodicals, including several daily newspapers, by 1910). Second, as a result of the liberties constitutionally guaranteed in Austria but absent in the Russian Empire and Hungary, members of the intelligentsia were able to work almost exclusively in the Ukrainian language, whether as clergymen, journalists, lawyers, or professors. Thus, although the Galician intelligentsia was smaller in absolute numbers than the Ukrainian intelligentsia in the Russian Empire and roughly equal in proportionate size to the Transcarpathian, it had a freedom of national intellectual action that made a significant qualitative difference. Finally, unlike its counterpart in Russian-ruled Ukraine and Transcarpathia, it had the opportunity to link up with the masses of the Ukrainian population, the peasantry, in a well-organized national movement. The intelligentsia discovered very early on that the leadership of a mass national movement produced tangible benefits for itself, such as the expansion of the Ukrainian-language educational system at all levels and entrance into government and parliamentary careers for its members. It established manifold institutions to link up with the masses, the first and most important of which was the popular educational \*Prosvita society (during the first seven years of its existence, 1868–74, Prosvita had a membership consisting primarily of clergy [33 percent], lawyers and civil servants [25 percent], educators [20 percent], and students [10 percent]). The connections forged between the intelligentsia and the peasantry during the half-century preceding the 1917 Revolution made the revolutionary movement in Galicia more disciplined and unified than that in Russian-ruled Ukraine.

The growth of a Ukrainian intelligentsia in Bukovyna was a phenomenon of the late 19th and early 20th centuries. Key moments in its development were the establishment of Chernivtsi University in 1875 (a quarter of its students were Ukrainian in 1914) and the rapid expansion of the elementary educational system in the early 20th century. The emerging Bukovynian intelligentsia worked very closely with its Galician counterpart, many of whose methods and institutions it copied.

In the wake of the defeat of the Ukrainian national forces in the Ukrainian-Soviet War of 1917–21, many members of the Ukrainian intelligentsia immigrated to \*Poland, \*Czechoslovakia, \*Germany, and \*France. Those who remained in Soviet Ukraine had their activity and employment opportunities circumscribed by the Bolshevik authorities. After the \*New Economic Policy and the introduction of \*Ukrainization in the 1920s, the Bolsheviks were forced to pursue a policy of detente with the Ukrainian intelligentsia. Remaining suspicious of it, the Bolsheviks were nonetheless forced to enlist its support

to hasten the economic, social, and educational development of the republic. During the relatively liberal period of 1923–9 the Ukrainian intelligentsia seized whatever opportunities were available and spearheaded the cultural and national renaissance of that period.

The growth of the state apparatus, the Ukrainization of public institutions, and the expansion of the educational system greatly contributed towards expanding the size of the indigenous intelligentsia. Thus the number of employees in the educational system grew from 70,131 in 1926 to 111,135 in 1929, and the percentage of Ukrainians in it increased from 65 to 72. Between 1926 and 1929 the number of individuals engaged in other forms of intellectual work expanded from 255,223 in 1926 to 397,701 in 1929, and the representation of Ukrainians from 52 to 58 percent. In 1923 only 23 percent of civil servants in the republic were Ukrainian, but by 1926 the figure had risen to 54 percent.

In 1928, as Ukrainization was drawing to a close with the rise of Stalinist totalitarianism, the intelligentsia received its first major blow with the show trial of 'bourgeois specialists' in the Shakhty region. This was followed by arrests and the show trial of members of the intelligentsia accused of belonging to a so-called 'Union for the Liberation of Ukraine'. The purpose of these campaigns was to intimidate and silence the members of the intelligentsia who had led the intellectual, cultural, and national revival of the 1920s.

During the Soviet industrialization drive of the 1930s the intelligentsia of Ukraine, especially technical personnel, experienced rapid growth. Thus, the number of engineers and technical staff increased from 25,000 in 1926 to 123,000 in 1936. The majority of the members of this new scientific and technical intelligentsia were former workers and peasants who had been given an education and promoted to positions of responsibility. Very little information on changes in the national composition of the intelligentsia during the 1930s has come to light. Data that are available suggest that although in absolute numbers Ukrainians registered an increase, their percentage in the intelligentsia remained static or declined. A comparison of 1929 and 1939 data shows that the Ukrainians' share of intellectual occupations declined from 58 percent to 56 percent.

The Stalinist terror of the 1930s took a heavy toll of the Ukrainian intelligentsia. It is estimated that 80 percent of Ukraine's writers and creative intelligentsia were eliminated. As a result of the 1933–4 purge, for instance, the proportion of Ukrainians among the staff of research institutes in Soviet Ukraine dropped from 50 percent of the total in 1929 to 31 percent in 1934, whereas the share of Russians increased from 30 to 50 percent in the same period.

In the interwar period the situations of the Ukrainian intelligentsia in the three regions of Western Ukraine were almost the reverse of what they had been in the late 19th and early 20th centuries. Now the development of the intelligentsia was retarded in both Galicia and Bukovyna, while in Transcarpathia a Ukrainian intelligentsia flourished. In both Poland and Rumania, to which Galicia and Bukovyna were annexed after the defeat of the Ukrainian national revolution, chauvinistic government policies excluded Ukrainians from employment in the civil service, discriminated against them at all educational levels (but particularly at the university level),

drastically reduced or abolished state subsidies for Ukrainian intellectual and cultural institutions, and reduced the status of the Ukrainian language. As a result of these policies, exacerbated later by the effects of the Depression, most of the Ukrainian intelligentsia found its talents underutilized. Outstanding scholars ended up teaching in secondary schools or made ends meet by writing for the popular press. Many ambitious young intellectuals were fortunate to find employment as bookkeepers with the co-operative movement. This frustration of the Ukrainian intelligentsia in interwar Galicia and Bukovyna was a prime factor inclining it to political extremism in the 1930s.

By contrast, the situation in Transcarpathia was quite favorable. The new Czechoslovak regime expanded the educational system dramatically, deliberately recruited Ukrainians to the lower levels of the civil service, and did not discriminate against the Ukrainian language. Thus, by 1930 in Transcarpathia 13,670 Ukrainians (2.5 percent of the total Ukrainian population) were employed in the bureaucracy and liberal professions.

During the Second World War, many members of the Soviet Ukrainian intelligentsia were evacuated to Central Asia in the face of the advancing German army. The Nazis unleashed a wave of terror against the remaining intelligentsia, in keeping with H. Himmler's orders that 'the entire Ukrainian intelligentsia must be decimated ... Do away with it and the leaderless mass would become obedient.'

In the postwar period, the demands of scientific and technological development have necessitated the rapid numerical growth of the intelligentsia. Thus, the gainfully employed intelligentsia in Soviet Ukraine has grown from 513,000 in 1941 to 3,269,000 in 1970 and 5,958,000 in 1983. (The totals for the USSR are 2,401,000, 16,841,000, and 31,628,000 in the respective years.) Included in these figures are individuals who have only completed specialized secondary educations (3,430,000 in Ukraine and 18,141,000 in the USSR in 1983). Some sociologists argue that, properly speaking, the intelligentsia consists only of persons with a tertiary education. Using this criterion, the gainfully employed intelligentsia in 1983 numbered 13,487,000 in the USSR and 2,528,000 in Ukraine (53 percent of it women). In Ukraine engineers are the single largest group within the intelligentsia with tertiary educations – 1,085,000 in 1983.

It is possible to ascertain the Ukrainians' share of the intelligentsia as a whole (those gainfully employed, students, and pensioners) for 1970: the 1.1 million Ukrainians who belonged to the intelligentsia (with tertiary educations) represented 54.7 percent of the total group in the republic. In the case of the intelligentsia as a whole (including those with specialized secondary educations), 63.1 percent, or 2.6 million, were Ukrainian. Data on the national composition of specialists – defined as all those with higher or specialized secondary educations gainfully employed in the national economy – show that the Ukrainians' share in this occupational group dropped slightly, from 63.5 percent in 1960 to 63.2 percent in 1970. Since in 1970 Ukrainians represented 75 percent of the republic's total population, these figures indicate a serious underrepresentation of Ukrainians in the intelligentsia of Soviet Ukraine. This problem is itself tied to difficulties in the 'social mobility of Ukrainians.

In the contemporary period the intelligentsia has re-

mained the most active element in society promoting Ukrainian national demands. Indicative of this is the fact that the large majority of dissidents in Soviet Ukraine are members of the intelligentsia.

**Inter-Allied Commission.** See Ukrainian-Polish War in Galicia, 1918-19.

**Intermarriage.** See Marriage.

**Intermede** (Ukrainian: *intermediia*). A short comic or satiric sketch that was performed between acts of serious plays. The first known intermede was performed in 15th-century England during a play by H. Medwall.

The first two intermedes in Ukraine are found in the publication of J. \*Gawatowicz's Polish tragedy about the death of John the Baptist (1619). The plots of intermedes were not related to the subject of the plays in which they occurred and were often written by different authors. Reflecting the social, political, and religious relations of their time, they were mostly anecdotes with one-dimensional, stereotyped characters: Cossacks, peasants, Gypsies, Poles, Jews, Russian soldiers, and Belorussians. The characters often spoke a mixture of various languages, although the Ukrainian ones spoke in the pure vernacular. M. Dovhalevsky was a master of Ukrainian intermedes; he wrote up to five versified intermedes for each of his Christmas and Easter dramas (1736-7). Five intermedes were performed during H. Konysky's tragic comedy *Voskresenie mertvykh* (Resurrection of the Dead, 1747), and seven or eight during the anonymous Ukrainian play *Stefanotokos* staged in Novgorod in 1742. References to other non-extant intermedes exist. The influence of intermedes is seen in the works of I. Nekrashchevych, in Christmas puppet plays (the *\*vertep*), in humorous verses of the 18th century, and in 19th-century Ukrainian comedies. An analysis and a selection of texts is found in M. Vozniak's *Pochatky ukraïns'koï komediï* (Beginnings of Ukrainian Comedy, 1919, repr 1955).

D. Chyzhevsky

**Internal passport.** See Passport system.

**International Commission for the Study of the Folk Culture of the Carpathians and Balkans** (Mizhnarodna komisiia po vvychenniu narodnoi kultury Karpat i Balkanu). An international organization founded in 1959

and called until 1976 the International Commission for the Study of the Folk Culture of the Carpathians. Initiated by Czech and Polish ethnographers, it has coordinated ethnographic and other research on the Carpathian and (later) northern Balkan regions by Bulgarian, Czechoslovak, Polish, Rumanian, Soviet, and Yugoslavian scholars. The nucleus of the commission's Soviet section (headed by Yu. Bromlei from Moscow) is made up of Ukrainian scholars from Kiev, Lviv, Uzhhorod, and Chernivtsi. The commission's administrative center (until 1990) is located in Bratislava; its general secretary is V. Frolec from Brno. The commission publishes the periodical *Carpatobalcanica* (*Carpatica* until 1977); 15 issues, with articles in Russian, German, English, and French, appeared by 1985. Every national section has its own serial; the Soviet one is *Karpatkii sbornik*, published by the USSR Institute of Ethnography, of which 3 issues have appeared since 1972.

In the 1960s the commission's main focus was the preparation of comprehensive bibliographic tools. This work culminated in the three-volume *Bibliographia ethnographica carpatobalcanica* (Brno 1981-5). A Ukrainian bibliography, Ya. Prylypko's *Ukraïns'ke radians'ke karpatoznavstvo* (Soviet Ukrainian Carpathology), was published in Kiev in 1972.

Every national section publishes monographs. Soviet Ukrainian works include those by Yu. \*Hoshko (1976), R. \*Kyrchiv (1978), M. Mandybura (1978; see bibliography in \*Hutsuls), T. Hontar (*Narodne kharchuvannia ukraïntsviv Karpat* [The Folk Diet of the Carpathians' Ukrainians, 1979]), Z. Boltarovych (*Narodne likuvannia ukraïntsviv Karpat kintsia XIX-pochatku XX st.* [Folk Medicine of the Carpathians' Ukrainians at the End of the 19th-Beginning of the 20th Century, 1980]), V. \*Hrabovetsky (1982), and M. Sopolyha (*Narodne zhytlo ukraïntsviv Skhidnoi Slovačchyny* [The Folk Dwelling of the Ukrainians of Eastern Slovakia, 1983]); and many historical-ethnographic collections, such as the 23-author *Boikovshchyna* (The Boiko Region, 1983) edited by Yu. Hoshko et al.

The commission regularly holds conferences, seminars, and deliberations. Some have taken place in Ukraine; the most noteworthy are the conference on the Culture and Folkways of the Population of the Ukrainian Carpathians (Uzhhorod 1972) and on the 25th anniversary of the commission (Lviv 1984).

**International economic relations.** Ukraine has been involved extensively in \*foreign trade in addition to internal trade with other Soviet republics. Moreover, except for the brief reconstruction period after the Second World War, it has been a net supplier of capital and human resources for the development of the vast Asian regions of the USSR. The outflow of capital funds is reflected in Ukraine's annual \*budgets and corresponds to the net export surpluses in its \*balance of payments.

Ukraine's interaction with the rest of the world has also included the exchange of technological knowledge

and the transfer of voluntary and, at times, forced skilled and unskilled labor. During the 1950s, it contributed capital equipment, technical know-how, and human resources for the construction of Nowa Huta and other industrial projects in Poland. It has played a similar role in Soviet aid to India, Cuba, and countries in Africa and Asia. Some 10,000 foreign students and trainees are educated in Ukraine annually.

During the early years of collectivization and during the 1940s in Western Ukraine, the Soviet authorities deported hundreds of thousands of Ukrainians in order both to destroy opposition to the Soviet regime and to provide a source of forced labor for the planned development of Kazakhstan's 'virgin lands,' Siberia's gold mines, and other natural resources in Soviet Asia. Subsequently, the Soviet system of education and job placement has encouraged the out-migration of Ukrainians to other parts of the USSR and the influx of non-native personnel into Ukraine. Consequently there has been a steady rise in the number of non-Ukrainians in Ukraine's urban and industrial centers.

As a founding member of the United Nations, Ukraine has participated in such UN bodies as the International Labour Organisation, the UN Conference on Trade and Development, the UN Industrial Development Organization, the Economic Commission for Europe, the Statistical Commission, and the Natural Resources Committee. It has been a signatory of over 120 international agreements and conventions; those dealing with economic matters include the Convention Concerning the Protection of Wages, the International Constitution of the Universal Postal Union, the Statute of the International Atomic Energy Commission, and the Agreement on the Danube Commission. But while Soviet Ukraine partakes formally in the above international institutions and contributes technical personnel and funds for their operation, it does not have the autonomy to represent its own socioeconomic interests. Ukraine lacks a voice even in the Soviet-bloc \*Council for Mutual Economic Assistance (Comecon), although its production plans, transportation network, natural-gas pipelines, and electricity grids are more integrated with the neighboring socialist countries than are those of the rest of the USSR.

Most East European countries have consulates in Kiev, and several countries have them in Odessa. The United States is in the process of establishing a consulate in Kiev for the protection of American tourists and commercial interests.

During the \*New Economic Policy system of the 1920s, Ukraine was allowed some autonomy in external trade. But the subsequent Soviet centralized system of planning, Moscow's monopoly in foreign trade and banking, and a lack of its own diplomatic network have obscured Ukraine's international identity in spite of its continued substantial interaction with the world economy.

Economic historians have documented the involvement of Ukraine – with its rich human and natural resources and important geopolitical location – in international commerce. Hoards of ancient Greek, Roman, Arab, and Persian coins unearthed in Ukraine confirm that international transit and direct trade existed there already in pre-Christian times. The Rus' chronicles provide extensive evidence about Ukraine's foreign trade and describe the laws, treaties, and political conditions of commerce under the rulers of Kievan Rus' and the

Principality of Galicia-Volhynia. Domestic and international trade declined during the Mongol invasions from the mid-13th through the 14th centuries, but revived under Lithuanian and Polish rule. Ukraine was drawn into the international grain trade through the Baltic port of \*Gdańsk and continued to supply the growing European markets with agricultural staples also under the Hetman state of the mid-17th to mid-18th century. When Ukraine progressively lost its autonomy under Russian domination, its foreign trade became increasingly constrained by tsarist mercantilist policies.

During the millennium prior to Soviet rule, a special role in Ukraine's international commerce and finance was played by its \*cities. They were often self-governed, and they usually welcomed and protected the \*Armenians, \*Germans, \*Jews, \*Greeks, and other foreign merchants and their permanent settlements. Foreign artisans (see \*Crafts) and artists also provided vital links with the countries to the west. Thus Greek architects introduced stone construction in Ukraine (eg, the St Sophia Cathedral in Kiev, 1037–54), Italian masters enhanced the Renaissance architecture of Lviv during the 16th and 17th centuries, and foreign engineers (eg, the Frenchman G. Le Vasseur de \*Beauplan) supervised the construction of many castles and fortifications during the 17th century. During the 19th century, Belgian, French, and other foreign capital (see \*Capitalism and \*Industry) contributed greatly to the industrialization of Ukraine, while Ukraine's balance of trade generated substantial surpluses that were used to service the external debts of the Russian Empire. Meanwhile, Western Ukraine under Austro-Hungarian (1772–1918) and Polish (1921–39) rule was a peripheral region in relation to the pertinent ruling metropolis and hence at a disadvantage in international trade and finance.

Several political-economic theories can be applied in interpreting the subordinate status of Ukraine and the other subjugated nations in the Russian Empire and in its successor the Soviet Union. Lenin argued that Russian \*imperialism before the October Revolution was a manifestation of monopoly capitalism, and he condemned the persistence of 'Great Russian chauvinism' even after the Bolsheviks gained power. H. Seton-Watson and V. Holubnychy regarded Ukraine as the victim of an imperialism driven by Russia's sociopolitical and economic objectives. W. Kolarz, D. Solovei, and B. Wymar interpreted Ukraine's status as that of a colony. The economists M. Volobuiev and Z. Melnyk have analyzed Ukraine's financial exploitation through Moscow's control of taxation and expenditures that involve unrequited requisitions of huge budgetary surpluses by the central government. Finally, V.N. Bandera has adapted and elaborated J. Galtung's structuralist theory of imperialism to explain the institutionalized mechanisms of control and exploitation of Ukraine as a weak periphery by Russia as a dominant metropolis. By not allowing Ukraine to engage directly in trade and other international transactions, the central authorities have deprived it of the profits and other benefits it could derive from international specialization and related activities.

### International Free Academy of Arts and Sciences

(Académie internationale libre des sciences et des lettres). An academy of émigré scholars from central and eastern European countries (excluding Russia) under Communist control. Established in Paris in 1951 at O. \*Shulhyn's initiative, in 1970 the academy had 330 members. Fifty-two of the members were Ukrainian. Its presidents have been C. Antoniade and C. Marinescu, and its vice-presidents, O. Shulhyn and O. Kulchytsky. Accounts of the academy's scholarly conferences and assemblies have been published in its French-language *Bulletin* (5 issues have appeared). Since 1970 the academy has not been very active.

**International legal status of Ukraine.** International law is the body of laws and principles that governs relations between states and other entities that carry an international personality. It arose toward the end of the Middle Ages with the emergence of modern nation-states. Since the 17th century it has developed as a separate branch of law and an important discipline in the study of international relations.

The question of a state's international status may be examined within the framework of current theories of international law, or in the light of whatever fragmentary norms of international law existed at a given time. The central issues that need to be addressed are the extent to which a state is sovereign (see \*Sovereignty) and whether that state or entity is recognized by the world community as a subject of international law (ie, does it have an international personality?). A state's international personality is measured by its recognized international legal liability and by its legal capacity to engage in international relations – including the negotiation of treaties, legation (the sending and receiving of diplomatic missions), membership in international organiza-

tions, and legitimate waging of war and concluding of peace.

The international status of Ukraine in the modern period is the subject of considerable controversy from the viewpoint of international law. This controversy has arisen because of Ukraine's dependence on other states, and because of the long intervals of Ukrainian statelessness in this period. At first, the \*Hetman state, and to a certain degree before that the Zaporozhian Sich (see \*Zaporizhia), had a distinct international personality – they engaged in diplomatic relations and entered into mutually binding treaties with foreign powers. The nature of Ukraine's later dependence on Muscovy, or the dependence of separate regions of Ukraine on the Polish Commonwealth or the Ottoman Empire, is difficult to describe using classical definitions of international law. Historical and legal interpretations of the Muscovite-Ukrainian Treaty of \*Pereiaslav (1654) and the subsequent agreements between the hetman and the tsar (see \*Hetman articles), and the nature of the resulting relationship between the two countries, have varied. Some scholars see in them the complete incorporation of the Hetman state into Muscovy, although the former may have retained some internal autonomy. Others have variously described the relationship as a 'personal union' or a 'real union' between the two states, or simply a military alliance, while still others have characterized the Hetmanate from the second half of the 17th century as a vassal or protectorate of Muscovy. In any case, whatever independence the Hetman state enjoyed at first was gradually lost, and with that its international personality declined until it disappeared completely after I. Mazepa's defeat by Peter I at the Battle of \*Poltava.

The question of Ukraine's international status became an issue again only in the 20th century with the re-establishment of a Ukrainian state in the form of the \*Ukrainian National Republic. The subsequent de jure or de facto recognition of the various governments of the UNR and the \*Hetman government by a total of 23 states and the establishment of diplomatic relations with a number of these governments (see \*Diplomacy and \*Consular service), their status as signatories to international \*treaties (esp the Treaty of \*Brest-Litovsk and the Treaty of \*Warsaw), and their acknowledged right as a sovereign state to wage war against foreign aggressors, all confirm these governments' international personality.

The early international status of the Ukrainian SSR is more problematic. Its independent international status was affirmed by the fact that it was recognized by countries such as Poland, Czechoslovakia, Turkey, Austria, and Germany; that it maintained a foreign affairs commissariat and diplomatic service; and that it negotiated treaties, including the Peace Treaty of \*Riga. Attempts were also made in a series of diplomatic notes to make the Ukrainian SSR appear as a separate belligerent in the Soviet-Polish War of 1920–1 and in the conflict with the Western Allies and Rumania during their intervention in the Russian Civil War. A major obstacle to its full recognition by the international community, however, was the issue of its sovereignty. The legal relationship between Russia and Ukraine before 1923 is difficult to characterize. Although formally the Ukrainian SSR was an independent Soviet republic, in reality its relationship to the RSFSR was based on a unique sort of federal system

(see \*Federalism), predicated mostly on the resolution of the All-Ukrainian Central Executive Committee of 1 June 1919 establishing a military and economic alliance between the two Soviet republics, and the so-called workers'-peasants' treaty between the Ukrainian SSR and the RSFSR of 28 December 1920. Unlike the governments of the UNR and the \*Hetman government, which asserted their sovereignty in their official proclamations (see \*Universals of the Central Rada) and were clearly accorded international legitimacy, the government of the Ukrainian SSR did little to reinforce its image as an autonomous state and hence its international personality. Moreover, the existence of the \*Government-in-exile of the UNR served to undermine the international legitimacy of the Ukrainian SSR.

The incorporation of Ukraine into the USSR in 1922 ended its competency in defense and foreign affairs and formally united all the Soviet republics into a single 'federal state.' The subsequent Soviet constitutions of 1924 and 1936 (see \*Constitution of the Ukrainian SSR) introduced a centralized political system and made foreign affairs the exclusive prerogative of the Union government, although in the 1936 and 1977 constitutions the Ukrainian SSR was simultaneously guaranteed the legal right to \*secession.

Constitutional reforms introduced in February 1944 had a fundamental impact on the international status of the Ukrainian SSR. It formally reacquired the right to legation, although it has not as yet established diplomatic relations with any country. A foreign affairs commissariat was re-established (since 1946 the Ministry of Foreign Affairs), and Ukraine began to participate in the negotiation of foreign treaties, specifically the peace talks that ended the Second World War (see \*Paris Peace Treaty of 1947), where the Ukrainian SSR was granted the status of an Allied state and even claimed war damages. In theory Ukraine was also guaranteed the right to its own military formations, but none were ever organized and this prerogative was eventually abrogated by the 1977 constitution. At the same time, however, the constitutional amendments specified that the Union government reserved for itself the right to 'regulate the general order of the relations of union republics with foreign states.' This condition has made it difficult to characterize the status of the republics even within the context of Soviet law.

Two major unresolved questions in international legal theory are: can the constituent parts of a federal state possess an international personality, and can they be considered the subjects of international law? The implications of the debate over these issues for the international status of the Ukrainian SSR are obvious. While most Soviet (eg, S. Krylov and V. Koretsky) and even some Western scholars believe that the Ukrainian SSR enjoys sovereignty, even within the federal Soviet state, and therefore can be considered the subject of international law, their arguments are rejected by other jurists and scholars.

Another measure of a country's international personality is its membership in \*international organizations. The government of the UNR did not belong to any official international organizations, with the brief exception of a commission that regulated shipping on the Black Sea in 1918; its application in 1920 to join the League of Nations could not be considered before Ukraine was

overrun by the Bolsheviks. The Ukrainian SSR did not begin to participate formally in international organizations until 1945, when it joined the United Nations (UN) as one of its founding members. According to the theory of 'collective recognition' advanced by some scholars, Soviet Ukraine's membership in the UN implies its recognition by all of the organization's founding members and, therefore, its general recognition by the world community. Most countries, however, including the United States, reject this interpretation and argue that their acceptance of the Ukrainian and Belorussian SSR as members of the UN does not imply a general and full recognition, but only a limited 'functional recognition' extended specifically to their role in the organization. With the exception of the UN and its various agencies, the Ukrainian SSR does not belong to any major international organizations. It does not even belong as a separate state to the various associations of socialist states, such as the \*Council for Mutual Economic Assistance or the Warsaw Pact. (See also \*International economic relations and \*Ukrainian Soviet Socialist Republic.)

**International organizations.** Non-profit organizations that draw their membership from at least three countries and conduct operations in at least three countries. The main types of international organizations are intergovernmental organizations (IGO) established by governments through multilateral treaties, and non-governmental organizations (NGO) composed of either national associations in various fields (political, professional, trade, religious, cultural, or sport) or individuals from different countries who seek to improve co-operation and understanding among peoples. Ukrainian world organizations, which represent only Ukrainian associations or individuals from different countries, are not discussed here. There has been a proliferation of international organizations in the 20th century, which, for this reason, has been called the century of international association. Ukrainians as a stateless people took part and continue to take part in some NGO. The Ukrainian SSR is a member of several IGO.

In 1905 the leaders of non-Russian nationalities within the Russian Empire founded the \*Autonomists' Union in St Petersburg, the first international organization of its kind in Russia. The \*Congress of the Peoples of Russia, which on M. \*Hrushevsky's initiative was convened in Kiev in September 1917, elected a committee to co-

ordinate the struggle of non-Russian nations for a federation, but did not give rise to a permanent organization. Ukrainian organizations abroad sought contacts with other national groups to promote the cause of Ukrainian independence. As early as 1918 Ukrainians in North America helped found the Central European Democratic Union, headed by T. Masaryk. The Federation of Ukrainians in the United States, as well as a separate representation of Carpatho-Ukrainian immigrants, joined the union. In 1919 the Ukrainian National Committee together with Lithuanian, Latvian, and Estonian organizations formed the League of Four Nations in the United States.

In 1920, under very difficult conditions, the UNR government applied for membership in the \*League of Nations, but before the application could be approved the government was forced into exile. However, two émigré organizations – the Ukrainian Association for the League of Nations and the Western Ukrainian Association of the League of Nations – worked closely with the International Federation of League of Nations Societies. In 1934 the USSR joined the League of Nations and was seated on some of its subordinate agencies. The Ukrainian SSR, however, because of its complete subservience to Moscow, did not belong to any IGO during the interwar period.

The situation changed in 1945 when the Ukrainian SSR was permitted to play a limited role in the field of foreign relations. To strengthen the position of the Soviet bloc in the new intergovernmental organizations that arose after the war and, partly, to satisfy the national aspirations of Ukrainians, the USSR demanded that Ukraine and Belorussia be reorganized as founding members of the United Nations (UN).

As a UN member, Ukraine has the right to nominate and elect judges of the International Court of Justice in The Hague. The Ukrainian jurist V. Koretsky served on the court as a judge (1961–70) and vice-chairman (1967–70). In 1962 Soviet Ukraine joined the Permanent Court of Arbitration, founded in 1899 in The Hague, and gained the right to nominate four members to a permanent panel of arbitrators from which parties to a dispute select a tribunal to settle their dispute. Among the UN agencies

(see accompanying table) to which it belongs, Ukraine has been most active in the United Nations Educational, Scientific, and Cultural Organization (UNESCO) and in the International Labour Organisation (ILO). Although the Ukrainian SSR is not a member of some specialized agencies of the UN such as the International Civil Aviation Organization and the International Maritime Organization, Ukraine has taken part in some of their conferences and has signed the conventions prepared by the conferences. The Ministry of Foreign Affairs in Kiev, which has a separate department for international organizations, keeps in touch with the international organizations to which Ukraine belongs or with which it co-operates. Ukraine maintains permanent missions at the UN in New York, at the UN European headquarters in Geneva, at UNESCO in Paris, and at the UN agencies in Vienna (See also \*International economic relations). Ukraine's position on various issues taken up by these agencies is determined entirely by the USSR government. Ukraine is a signatory of a number of conventions prepared by these organizations, particularly by the International Labour Organisation (see \*Treaties).

The Ukrainian SSR does not belong as a separate entity to the Soviet-bloc intergovernmental organizations of which the USSR is a member, although these organizations are sponsored by the USSR; eg, the Warsaw Treaty Organization, the Comecon, the International Investment Bank, and the International Centre for Scientific and Technical Information. Ukraine is not a separate member of the Danube Commission set up in 1948 by the Belgrade Convention, although Ukraine signed the original convention. The Ukrainian SSR is not even represented in pro-Soviet political NGO such as the World Peace Council, on whose presidium O. Korniiichuk served as representative of the USSR, not of Ukraine. Ukraine's application to the Inter-Parliamentary Union (est in 1888) was rejected, although a Soviet parliamentary group was admitted in 1955.

After the First World War, in spite of their non-governmental status, Ukrainian émigré organizations, particularly political ones, were very active on the international stage. UNR circles in Warsaw, for example,

#### Ukraine in UN agencies

Organization	Founding date	Admission date	Headquarters
<b>COUNCILS</b>			
UN Economic and Social Council	1946	1946, 1977	Geneva, New York

organized the \*Promethean movement, which embraced the nations subjugated by the Soviet Union. Besides a Promethean club, the Friendship Committee of the Peoples of Caucasia, Turkestan, and Ukraine was active in Paris and published *La Revue de Prométhée* (1938–9). As members of Polish, Rumanian, or Czechoslovak delegations, Ukrainian parliamentarians took part in the work and the congresses of the Inter-Parliamentary Union. Ukrainian political leaders in Poland and Rumania attended the \*Congress of National Minorities.

After the Second World War, Ukrainian political organizations were active members, and often cofounders, of several organizations representing Central and East European and Asian nations in a common struggle against Soviet domination; eg, the \*Anti-Bolshevik Bloc of Nations, the \*Freedom International, and the League for the Liberation of Nations of the USSR (the so-called \*Paris Bloc). The Ukrainian Movement for a Federated Europe (est 1961 in Paris) was a member of the European Center for Federalist Action.
