Isakovyi Mazepi na vichnu pam'iat', no. 3 of *Nashe slovo* (Munich and London 1973)

M. Kurakh, A. Zhukovskiy

Mazepa, Ivan, b 20 March 1639 in Mazepyntsi, near Bila Tserkva, d 2 October 1709 in Bendery, Bessarabia. Hetman of Ukraine in 1687–1709; son of S.-A. *Mazepa and M. *Mazepa. He studied at the Kievan Mohyla College (Academy) and at the Jesuit college in Warsaw. While a page at the court of Jan II Casimir Vasa in Warsaw, he was sent by the king to study in Holland. In 1656–9 he learned gunnery in Deventer and visited Germany, Italy, France, and the Low Countries. After his return to Warsaw Mazepa continued his service as a royal courtier, and in 1659–63 he was sent on various diplomatic missions to Ukraine. The legend of his affair with Madame Falbowska and his subsequent punishment by being tied to the back of a wild horse was first popularized by the Polish memoirist J.C. Pasek. Although it has no basis in fact, it has in-

Hetman Ivan Mazepa (portrait, late 17th century)

spired a number of European Romantics, including F. Liszt, P. Tchaikovsky, G. Byron, V. Hugo, and A. Pushkin.

In 1663 Mazepa returned to Ukraine to help his ailing father. After his father's death in 1665 he succeeded him as hereditary cupbearer of Chernihiv. In 1669 Mazepa entered the service of Hetman P. *Doroshenko as a squadron commander in the Hetman's Guard, and later he served as Doroshenko's chancellor. He took part in Doroshenko's 1672 campaign against Poland in Galicia and served on diplomatic missions, including ones to the Crimea and Turkey (1673–4). During a mission in 1674 he was captured by the Zaporozhian otaman I. *Sirko, who was forced to hand him over to Doroshenko's rival in Left-Bank Ukraine, I. *Samoilovych. Mazepa quickly gained the confidence of Samoilovych and Tsar Peter I, was made a 'courtier of the hetman,' and was sent on numerous missions to Moscow. Mazepa participated in the *Chyhyryn campaigns of 1677–8. In 1682 he was appointed Samoilovych's general osaul. He was elected the new hetman on 25 July 1687 by the Cossack council that deposed Samoilovych and concluded the disadvantageous *Kolo-mak Articles with the tsar.

Mazepa's political program had become evident during his service to Doroshenko and Samoilovych. He was a firm supporter of a pan-Ukrainian Hetman state, and his main goal as hetman was to unite all Ukrainian territories in a unitary state that would be modeled on existing European states but would retain the features of the traditional Cossack order. Initially Mazepa believed that Ukraine could coexist with Russia on the basis of the *Pereiaslav Treaty of 1654. Mazepa actively supported Russia's wars with Turkey and the Crimean Khanate and sent his forces

to help those of Peter I. Although the Treaty of Constanti-nople of 3 July 1700 did not extend Ukrainian dominion to the Black Sea, it temporarily secured Ukrainian lands from Turkish encroachment and Crimean Tatar incursions. Until 1708 Mazepa also supported Peter in the first phase of his Great Northern War with Sweden, by provid-ing the Russians with troops, munitions, money, and sup-ples in their effort to capture the Baltic lands. Mazepa's participation in the war made it possible for him to take control of Right-Bank Ukraine in 1704, after S. *Palii's Cos-sack revolt effectively weakened Polish authority there. Mazepa's relations with Palii were not entirely positive, however. Mazepa did not share the Khvastiv colonel's radical social policies, and that difference gave rise to con-flicts between them.

Portal and fronton (1690–3) for the church of the Kiev Epiphany Brotherhood funded by Hetman Ivan Mazepa

Mazepa contributed to the development of Ukraine's economy, particularly its industry. He also supported Ukrainian scholarship (history in particular) and educa-tion (the transformation of the Kievan Mohyla College into the *Kievan Mohyla Academy, the establishment of *Chernihiv College). Under his hetmancy *literature flourished (see D. *Tuptalo, S. *Yavorsky, I. *Maksy-movych, T. *Prokopovych, and Y. *Krokovsky). Mazepa himself wrote some verse. He was a generous patron of painting and *architecture, who funded many churches built in the Cossack *baroque style in Kiev, Chernihiv, Pereiaslav, Baturyn, Pryluka, and other towns. Mazepa was also a patron of the Orthodox church outside Ukraine. He funded the publication of the New Testament in Arabic in Aleppo in 1708, and he donated an Easter shroud and a pure gold chalice for the Tomb of the Lord in Jerusalem.

Although Mazepa was able to establish a new and loyal senior *Cossack *starshyna*, he also faced considerable op-position from many members of the Cossack elite, and even open rebellion (see P. *Petryk, V. *Kochubei, and I. *Iskra). Mazepa's many attempts to secure the rights of the Cossacks as an estate (the universal of 1691), the burghers (a series of universals protecting their rights), and the peasantry (the universal of 28 November 1701 limiting corvée to two days a week) could not stem the growth of social discontent caused by endless wars, abuse

of the population by Russian troops stationed in Ukraine, destruction, and increasing exploitation by the landowning *starshyna*. Mazepa's alliance with Peter also caused onerous responsibilities and losses to be inflicted on the population, in particular as a result of the Northern War and Russian exploitation in Ukraine. Consequently Mazepa was deprived of the popular support he needed at a critical juncture in Ukrainian history.

Peter I not only interfered in the Hetmanate's internal affairs and mercilessly exploited the population in his beligerent pursuits, but embarked on a policy of annihilating Ukrainian autonomy and abolishing the Cossack order and privileges. When Peter's intentions became clear, Mazepa, supported by most of his senior officers, began secret negotiations in 1706 with King *Stanislaus I Leszczyński of Poland and then with Charles XII of Sweden, and forged with them an anti-Russian coalition in 1708. The actual terms of the alliance are unknown, but according to official Russian sources its chief goal was 'that the Little Russian Cossack people be a separate principality and not subjects of a Russian state.' Later the Zaporozhian Host joined the coalition, and on 28 March 1709 Mazepa, Otaman K. *Hordiienko, and Charles XII signed a treaty in which Charles agreed not to sign any peace with Moscow until Ukraine and the Zaporozhian lands were freed of Russian rule.

But the Russo-Swedish War of 1708–9, which was waged on Ukrainian territory, ended in defeat for the allies. Peter's forces captured Mazepa's capital, Baturyn, together with its large armaments depot and artillery, massacred its 6,000 inhabitants, and succeeded in splitting Mazepa's followers by engineering the election of I. *Skoropadsky as a new hetman in Hlukhiv in November 1708. Russian military terror descended on those who remained loyal to Mazepa. Captured Zaporozhian Cossacks were brutally executed, the Zaporozhian Sich was destroyed, and many of Mazepa's followers (eg, D. Maksymovych, Archimandrite H. Odorsky) were executed or exiled to northern Russia. Mazepa's efforts at organizing a broad anti-Russian front in Eastern Europe proved unsuccessful, and his and Charles's defeat at the Battle of *Poltava on 8 July 1709 sealed Ukraine's fate. Mazepa, Charles, and Hordiienko, together with 3,000 followers, fled to Turkish-held territory. Broken by his defeat, old and ill, Mazepa died in Bendery, Moldavia. He was buried at St George's Monastery in Galați, where his tomb was subsequently desecrated.

Peter initially sought Mazepa's extradition from Turkey. Having condemned Mazepa as a traitor he ordered the Russian and Ukrainian churches to anathematize him. Thereafter, imperial, both Russian and Soviet, propagandists and historians did their utmost to vilify the Ukrainian patriot and statesman. Although there have been controversial assessments of Mazepa, he has remained a symbol of Ukrainian independence. The period of his hetmancy has justifiably been known as the Mazepa renaissance.

O. Ohloblyn

Mazepa, Maryna (née Mokiievaska), b ca 1624 in the Bila Tserkva region, d 1707 in Kiev. Mother of Hetman I. Mazepa. After the death of her husband in 1665, she devoted herself to church and community work, joined the *Lutske Brotherhood of the Elevation of the Cross in 1666, and later entered a monastery, where she took the name Mariia Mahdalyna. As superior of the women's Kievan Cave Monastery of the Ascension (ca 1682–1707) and the Transfiguration Monastery in Hlukhiv (1688–1707) she did much to improve their material status and artistic embroidery work. She was a close adviser to her son and actively participated in church politics. In 1687–8 and 1692 she traveled to Moscow to receive alms and charters confirming her monasteries' properties and exemptions from the tsar. She was buried at the Monastery of the Ascension in Kiev.

Mazepa, Stepan-Adam, b ?, d after 12 March 1665. Cossack *starshyna*; father of Hetman I. *Mazepa. He fought in the Cossack-Polish War of 1648–57, from 1654 as otaman of Bila Tserkva regiment. In 1658 he was Hetman I. Vyhovsky's military envoy to King Jan II Casimir Vasa, who confirmed Mazepa's claim to the family estates of Mazepyntsi and Trylisy. In 1662 he was appointed cup-bearer of Chernihiv.

Mazlakh, Serhii [Mazlax, Serhij], b ? in Kobyliaiky, Poltava gubernia, d ? Journalist and Bolshevik leader of Jewish background. He helped organize the Ukrainian Social Democratic Workers' party in Poltava gubernia for the elections to the Ukrainian Constituent Assembly and took part in the Tahanrih Conference of the Bolsheviks in Ukraine on 18–20 April 1918. With V. *Shakhrai he wrote *Do khvyli! Shcho diiet'sia na Ukraini i z Ukrainoiu?* (1919; trans: *On the Current Situation in Ukraine*, 1970), which calls for an independent Ukrainian Bolshevik party and state and criticizes V. Lenin's opposition to both proposals. The authors were expelled from the Party in June 1919, and Mazlakh was reinstated on appeal. In 1920 he

became editor of the newspaper *Vserossiiskaia kochegarka* in Luhanske. In the 1920s he was director of the Central Statistical Bureau of the Ukrainian SSR. He disappeared in the terror of the 1930s.

Mazon, André, b 7 September 1881 in Paris, d 13 July 1967 in Paris. French Slavist; member of the Shevchenko Scientific Society from 1927, the USSR Academy of Sciences from 1928, the Académie des inscriptions et belles lettres from 1941, and the Polish Academy of Sciences from 1956. He studied at the Sorbonne and Prague University, taught French at Kharkiv University (1905–8), and was a professor of Slavic philology at the University of Strasbourg (1919–23) and the Collège de France (1924–52). He was the head of the Institute of Slavic Studies at the University of Paris from 1937 and the vice-president of the International Committee of Slavists (1958–67). Among his many works are articles on M. Vovchok in France, N. Gogol, and T. Shevchenko; a book about **Slovo o polku Ihorevi (Le Slovo d'Igor [1940]*, where he doubted its authenticity); surveys of publications in Ukrainian studies (1921–4) in *Revue des études slaves*, which he cofounded and later edited; and the introduction to A. Martel's book on the Polish language in Ukraine (1939). He cotranslated M. Uspensky's *Quelques données historiques sur 'Le Slovo d'Igor' et Tmutorokan* (1965).

Mazovia (Polish: Mazowsze). A Polish historical-geographic region in the Vistula Basin, of which the major city is Warsaw. Mazovia became part of Poland in the 10th century and a separate appanage in the mid-12th century. After the mid-13th century it was divided into a number of smaller principalities. By the mid-14th century it was a fiefdom of Poland, which finally absorbed it in 1526. In the east Mazovia bordered on Volodymyr-Volynskyyi appanage principality and then the Galician-Volhynian principality and maintained friendly relations with them. Prince Danylo Romanovych and his successors supported the Mazovian princes against Poland and acted to some extent as their protectors. The last prince of Galicia-Volhynia, Yurii II Boleslav, was the son of the Mazovian prince Trojden II and Maria, the daughter of King Yurii Lvovych.

Mazur, Oleksandr, b 30 August 1913 in Popivtsi, Mohyliv county, Podilia gubernia. Greco-Roman wrestler. He was the world champion in 1955 and the Ukrainian and USSR champion in 1944, 1945, 1947, and 1949.

Mazurenko, Halia, b 25 December 1901 in St Petersburg. Poet. Having served in the UNR Army under S. Petliura, she emigrated to Prague in 1920 and resettled in London in 1945. She coedited the journals *Vistnyk* and *Proboiem* and published several collections of poetry: *Akvarely* (Watercolors, 1926), *Stezhka* (The Footpath, 1939), *Vohni* (Fires, 1939), *Snihotsvity* (Snow Flowers, 1941), *Porohy* (The Rapids, 1960), and the larger *Kliuchi* (Keys, 1969), *Skyt poetiv* (Monastery of Poets, 1971), *Zelena iashchirka* (Green Lizard, 1971), *Try misiatsi v literi zhyttia* (Three Months in the Alphabet of Life, 1973), and *Pivnich na vulytsi* (Midnight on the Street, 1980).

Mazurenko, Oleksii, b 20 June 1917 in Yelysavethrad county, Kherson gubernia. Senior Soviet Naval Aviation officer. He joined the Red Army in 1938 and was commissioned in 1940. During the Second World War he com-

Halia Mazurenko

Semen Mazurenko

manded an escort unit of a regiment of the Baltic Fleet and flew more than 300 missions. He was twice decorated Hero of the Soviet Union. After the war he commanded an aviation division. He graduated from a military academy in 1952 and was promoted to brigadier general. He retired in 1972.

Mazurenko, Semen, b 1879, d ? Political activist; brother of V. and Yu. *Mazurenko. An activist of the 1905 Revolution, he helped organize the All-Russian Peasant Union. In 1906 he was arrested and sentenced to imprisonment and internal exile. He returned to Ukraine in 1917 and became active in the Ukrainian Social Democratic Workers' party. At the beginning of 1919 he headed a special diplomatic mission of the UNR to Moscow to normalize relations with Bolshevik-ruled Russia. He was arrested in Ukraine by the Soviets in 1925 and was probably executed.

Mazurenko, Vasyl, b 1877, d ? Engineer and political activist; brother of S. and Yu. *Mazurenko. He was active in the Revolutionary Ukrainian party from 1901 and, later, in the Ukrainian Social Democratic Workers' party. During the revolutionary period he was a member of the Central Rada. In 1917–19 he served as deputy to a number of finance ministers, general secretary of finance (November 1917), and minister of finance in V. Chekhivsky's cabinet (1919). He went to Italy as head of the UNR diplomatic mission. In 1920 he returned to Ukraine and was appointed director of the Chamber of Weights and Measures in Kharkiv. He was arrested by the GPU in the early 1930s, and disappeared. He wrote several works on silicates.

Mazurenko, Yurii, b 1 July 1885 in Kryvorizhia, Don Cossack province, d 3 November 1937. Political and civic leader and jurist; brother of S. and V. *Mazurenko. During the revolutionary period he was one of the leaders of the Ukrainian Social Democratic Workers' party (Independents), and in 1919 he commanded its insurgent forces against the Bolshevik government in Kiev. In the summer of 1920 he was elected to the CC of the Ukrainian Communist party. After its dissolution he joined the CP(B)U. In the 1920s he chaired the codification department of the People's Commissariat of Justice and taught at the Kharkiv Institute of the National Economy. He presided over the Juridical Society in Kharkiv. In the early 1930s he was president of the Kharkiv Scientific Society of the All-

Ukrainian Academy of Sciences. After being arrested in 1934, he was sentenced to 10 years in prison for belonging to a 'Ukrainian terrorist organization,' and most likely died in a camp or was executed. His publications dealt largely with family law.

St Joseph's Ukrainian Catholic Church in Chicago; architect Zenon Mazurkevich

Mazurkevich, Zenon [Mazurkevych], b 31 August 1939 in Rozhnitiv, Jaroslaw county, Galicia. Architect. A graduate of the University of Pennsylvania (1972), he has worked as an architect in Chicago and Philadelphia. Although he designs mostly hotels, he renovated St Nicholas's Ukrainian Catholic Cathedral in Chicago and designed St Joseph's Ukrainian Catholic Church in Chicago and St Michael's Ukrainian Catholic Church in Baltimore (1988).

Mazurkevych, Mykhailo. See Mazurki, Mike.

Mazurkevych, Yurii [Mazurkevych, Jurij], b 6 May 1941 in Lviv. Concert violinist and teacher. He began his musical training in Lviv and then studied (1960–7) with D. Oistrakh at the Moscow Conservatory, completing both graduate and postgraduate courses under him. In 1967–73 he taught at the Kiev Conservatory and recorded for the Melodiya label. Mazurkevych has won prizes at international violin competitions in Helsinki (1962), Munich (1966), and Montreal (1969) and has performed widely in Finland, Poland, Germany, Bulgaria, Czechoslovakia, Switzerland, Canada, and the United States. Mazurkevych emigrated from Ukraine in 1973, teaching at the University of Western Ontario in London, Canada (1975–85), and then Boston University (from 1985).

Mazurki, Mike (né Mazurkevych, Mykhailo; Mazur-ski), b 25 December 1909 in Ternopil, Galicia, d 9 Decem-

Mike Mazurki

ber 1990 in Glendale, California. Hollywood film actor. A resident of the United States from 1915, he graduated from Manhattan College and was a professional heavy-weight wrestler before making his screen debut in *The Shanghai Gesture* (1941). He acted mostly character roles in over 100 films, including *Murder, My Sweet* (1944), *Dick Tracy* (1945), *Samson and Delilah* (1949), *Some Like It Hot* (1959), and *Challenge to Be Free* (1975).

Mazurok, Yurii, b 18 July 1931 in Krasnyk, Poland. Ukrainian opera singer (baritone). In 1960 he graduated from the Moscow Conservatory in the class of S. Migai and A. Sveshnikova. In 1963 he finished postgraduate studies under A. Sveshnikova and began his career as a soloist in the Bolshoi Theater. His main roles include Count di Luna in G. Verdi's *Il Trovatore* and Rodrigo in his *Don Carlos*, and Tsarev in S. Prokofiev's *Simeon Kotko*. He also appears as a concert performer. Since 1962 Mazurok has toured abroad, throughout Europe and in Great Britain, Japan, Canada, and the United States.

Omelian Mazuryk: *Pieta*

Mazuryk, Omelian, b 2 February 1937 in Brezhava, Dobromyl county, Galicia. Painter and iconographer. A graduate of the Wroclaw Art School (1958) and the Cracow Academy of Fine Arts (1964), he came to Paris in 1967 to study at L'Ecole des beaux arts and remained in that

city. Since his solo exhibition in 1972 in Paris, he has had many others in France, Belgium, Germany, Italy, Holland, Canada, and the United States. Mazuryk is best known for his neo-Byzantine religious paintings, in which he has synthesized expressionism, Ukrainian-Byzantine traditions, and folk art. He is one of the few Ukrainian artists who have succeeded in creating icons that retain the spirituality of the ancient models but at the same time embody the experiences of the 20th century. Mazuryk's icons for the iconostasis in the St Volodymyr Ukrainian Catholic Church in Paris are a fine example of modern Ukrainian church art. He also painted the iconostases in the chapels of the Shevchenko Scientific Society in Sarcelles, France, and the Ukrainian Catholic Holy Spirit Seminary in Ottawa, Canada. An atmosphere of mystery and unrest often pervades his landscapes, which display a great sensitivity to color gradations and an expressionistic brush stroke. In 1990 he had a solo exhibition in Lviv and was invited to teach icon painting at the Lviv Institute of Applied and Decorative Arts.

D. Zelska-Darewych

Meadowland. A type of grassland consisting mostly of perennial mesophytes. Unlike the vegetation of the steppe, which becomes largely dormant in the dry summer heat, meadowland vegetation develops throughout the vegetative period. The most conducive conditions for the development of natural meadows are in the forest-steppe belt, where temperate, subhumid conditions prevail, and the soils are rich in nutrients. In the steppe zone upland meadows are rare, for the steppe vegetation is dominated by drought-resistant xerophytes and ephemerals. In the forest zone to the north, natural clearings are either dry soil zones or wetlands. Nearly all meadowlands in Ukraine (except those in nature preserves) are now used for agriculture. Where they have not been plowed, they are used as hayfields or pasture. Hayfields and pastures were also created from areas that were not natural meadows. In 1988, hayfields (both natural and cultivated) occupied 2.1 million ha, and pasture (both natural and improved), 4.8 million ha (respectively representing approx 3.5 and 8 percent of the total land area of the Ukrainian SSR). About 60 percent of Ukraine's hayfields are in Polisia and the Carpathian Mountains, where they occupy over 30 percent of the agricultural land. Pastures are found in the mountainous areas and the floodplains as well as on the steep slopes of ravines in the steppe belt of Ukraine.

Measures. See Weights and measures.

Meat-processing industry. A branch of the *food industry that processes fresh meat and various meat products, such as sausages and canned meats. Before the 1920s, meat processing in Ukraine was essentially a cottage industry. There were only four large abattoirs in the nine Ukrainian gubernias of the Russian Empire in 1912. As agriculture was collectivized and the economy centralized in the 1930s, some 40 large meat-packing and -processing facilities were built in cities such as Kiev, Poltava, Vinnytsia, Melitopil, Kremenchuk, Mykolaiv, Dnipropetrovske, Luhanske, and Odessa, and fowl-processing facilities in Koziatyn, Pervomaiske, and Bakhmach. After a sharp decline during the Second World War, the industry was rebuilt. The overall growth of the industry since the war is illustrated in the table.

Meat production in Ukraine, 1960-87 (in 1,000 metric t)

	1960	1970	1980	1987
Meat	911	1,565	2,074	2,615
Beef and veal	416	763	1,111	1,453
Mutton	40.4	24.8	12.9	18.6
Pork	330	563	547	625
Fowl	28.2	73.2	229	317
Other meats and by-products	96.5	141	174	201
Sausages	243.4	436.4	685.5	823.8
Lard	190	245.2	335.5	421.2
Canned meat (in million standard cans)	84.2	145.4	179.6	244.6

The largest meat-processing facilities are now in Kiev, Vinnytsia, Dnipropetrovske, Luhanske, Odessa, and Poltava. The oblasts with the largest meat output (in thousands of metric t, 1987 figures) are Dnipropetrovske (164.6), Donetske (164.5), Kharkiv (150.1), Crimea (132.6), Cherkasy (132.1), Poltava (131), and Vinnytsia (128.6). The smallest output was registered in Western Ukraine, in Transcarpathia (32.2), Chernivtsi (42.8), and Ivano-Frankivske oblasts (55.4). Between 1960 and 1979 Ukraine's share of the USSR meat output increased from 20.7 percent to 23.2 percent for all meat, including by-products but not fowl, and from 18 to 23.3 percent for sausages and smoked meat.

Despite considerable progress in the meat-processing industry, meat, especially good-quality meat, is still in short supply in Ukraine. Moreover, growth rates in the industry have slowed in recent years: meat output increased by 71 percent from 1960 to 1970, but by only 32.5 percent from 1970 to 1980 and 26 percent from 1980 to 1987.

Mechanics. Akin to machine science, a discipline encompassing general machine theory, the mathematical theory of mechanisms, problems of materials, strength and elasticity, friction and wear, manufacturing, reliability, efficiency, and automation. Early research in mechanics was conducted in Ukraine in the 19th century at the universities of Kiev, Kharkiv, and Odessa, where M. *Ostrohradsky, T. Osipovsky, V. Imshenetsky, V. *Steklov, G. Suslov, and P. Vorontsov worked in analytical mechanics. A. *Liapunov's fundamental studies in the theory of stability were published in Kharkiv in 1892. Research in general mechanics was also carried out at the Kiev Polytechnical Institute (V. Kirpichov, S. *Timoshenko, B. Delone, Ye. *Paton) and at the Katerynoslav Higher School of Mining (O. Dynnyk; today the Dnipropetrovske Mining Institute).

In the Soviet period the first scientific work in mathematical mechanics at the AN URSS (now ANU) was directed by D. *Grave, M. *Krylov, and K. *Siminsky in Kiev and Dynnyk in Dnipropetrovske. Advanced research was carried out in analytic and space mechanics, the theory of motion of absolute and deformed solids, and the general theory of motion stability. Dynnyk, M. *Kilchevsky, A. *Kovalenko, H. *Savin, and I. *Shtaierman studied the theory of elasticity; in the postwar period M. *Lavrentev, A. *Ishlinsky, M. Leonov, V. Maizel, and D. Vainberg made important contributions to that field. Today thermal elasticity is researched at the *Institute of Mechanics of the ANU by Kovalenko, A. Ulitko, V. Hrinchenko, I. Motovy-

lovetz, and Yu. *Shevchenko and at the *Institute of Applied Mathematics and Mechanics of the ANU by Ya. *Pidstryhach, Ya. Burak, Yu. Koliiano, and H. Kit. Mathematical methods for solving problems in the theory of elasticity were developed by scientists such as Savin, Kovalenko, H. *Polozhii, O. *Huz, O. Kosmodamiansky, and Ulitko. Problems in the analytic mechanics of the environment were researched by Shtaierman, V. *Chelomei, I. Rapoport, and Kilchevsky in Kiev in the 1930s. Fundamental data on the dynamics of solids were obtained after the war at the AN URSS Institute of Mathematics by Ishlinsky and V. Koshliakov. Shtaierman, Savin, Ishlinsky, Kilchevsky, Leonov, A. *Filipov, V. *Mossakovsky, and V. *Rvachov wrote on the mechanics of contact interaction between deformed bodies. At the Institute of Applied Mathematics and Mechanics P. Kharlamov solved various problems in the dynamics of solids and the stability of motion. The work of Huz and his students on general problems of the three-dimensional theory of the durability of deformed solids with different materials and structures has been widely applied; the physical and mechanical properties of such materials are studied at the Institute of Mechanics. Lavrentev's research in the mechanics of explosion was further developed in various institutes of the ANU, particularly by O. Vovk at the *Institute of Geophysics.

In the field of plasticity and thermal plasticity Ishlinsky and his students developed a theory of plasticity for materials with linear reinforcement, S. Malashenko devised equipment for measuring the plasticity of materials, and Shevchenko and his students developed a deformation theory of plasticity under variable nonisothermic loading processes. At the ANU *Institute for Problems of the Strength of Materials H. *Pysarenko and V. Kyselevsky studied creep and boundary conditions under complex stress applications within a wide temperature range, as well as problems of forecasting long-term strength and creep under high temperatures, particularly under irradiation. The new branch of fracture mechanics has been developed intensively in Ukraine by Savin, Leonov, V. *Panasiuk, Ulitko, Hrinchenko, and Kit.

The theory of mechanical oscillation is developing today as an independent branch of mechanics. In 1929 Krylov and N. *Bogoliubov founded a scientific school of nonlinear oscillations, later recognized throughout the world. Yu. Mytropolsky investigated nonstationary processes in nonlinear oscillations and developed asymptotic methods for the theory of nonlinear oscillations. Pysarenko developed methods of nonlinear mechanics for solving oscillation problems in machine building, with an energy dispersion factor in cyclically deformed material. The oscillation of tensile systems was also investigated by S. *Serensen, I. Tetelbaum, V. *Kononenko, M. Kornoukhov, P. Varnak, Vainberg, and Filipov. V. *Lazarian studied mechanical vibrations, particularly in reinforced columns. Kilchevsky and his students studied the oscillation of multiphase systems. The dissipation of energy that accompanies oscillation has been researched since the 1950s at the ANU Institute for Problems of Materials Science and since 1966 at the Institute for Problems of the Strength of Materials and the Kiev Polytechnical Institute. In the pre-war period Siminsky, Serensen, F. *Bieliankin, M. Afanasiev, and Pysarenko made important contributions to research on the strength of materials under cyclic loading. Research on the fatigue of materials and structures was

carried out after the war by Serensen, M. Harf, O. Kramarenko, and Ye. Buhlov; B. *Hrozin and D. Draihor researched contact strength. H. *Karpenko, Panasiuk, and H. *Maksymovych at the ANU Physical-Mechanical Institute researched the influence of corrosive environments on fatigue strength.

In the early 1960s a scientific school devoted to the strength of materials and structural elements in extreme conditions was set up at the Institute for Problems of the Strength of Materials. Among the problems connected with the requirements of new technologies, the strength of materials under high (Pysarenko, V. *Troshchenko, H. Tretiachenko, V. Rudenko) and low (A. *Lebedev, M. *Novykov, V. Stryzhalo) temperatures was studied, as well as fatigue limit and creep at high temperatures (M. Mozharovsky, V. Kovpak), strength of materials and structural elements under high-pressure gas flow (Tretiachenko, L. Kravchuk, R. Kuriat), the effect of neutron irradiation and of corrosive environments on the strength of materials (Kyselevsky, Kravchuk, B. Liashenko), the strength of materials in a wide temperature range (4 to 2,000°K) and under complex stress application (Lebedev, B. Kovalchuk), and impact resistance (H. Stepanov).

Other problems researched include fatigue and thermal fatigue (Troshchenko, V. Kuzmenko, B. Hriaznov), oscillations in *machine building (Pysarenko, V. Matveev, A. Yakovlev, M. Vasylenko, V. Khilchevsky), the structural strength of glass (Yu. Rodychev, K. Amelianovych), and physical aspects of strength (A. Krasovsky, V. Naumenko).

O. *Antonov and V. Kovtunencko contributed to the development of aero- and gas-dynamics; H. *Proskura, I. *Povkh, I. *Shvets, and O. *Shcherban, to industrial aero- and hydrodynamics; and O. Akhiezer, to magnetic hydrodynamics. Ukrainian scientists also had a major impact on the development of the mining sciences (M. Fedorov, M. *Poliakov, V. *Poturaev, F. *Abramov), construction sciences (Kornoukhov, Bieliankin, B. *Gorbunov), and hydrology and hydrotechnology (Lavrentev, P. Filchakov, I. *Liashko).

Research of mechanics scientists in Ukraine is co-ordinated by scientific councils of the Academy of Sciences of Ukraine. Problems of mechanics are discussed in the Russian-language journals *Prikladnaia mekhanika* and *Problemy prochnosti*.

S. Protsiuk

Mechnikov, Illia [Mečnikov, Illja] (Metchnikoff, Élie) b 15 May 1845 in Ivanivka, Kupianka county, Kharkiv gubernia, d 15 July 1916 in Paris. Biologist, comparative anatomist, and immunologist; Nobel laureate in 1908 for his discovery of phagocytosis. Mechnikov graduated from Kharkiv University (1864) and worked at Odessa (1867–8) and St Petersburg (1868–70) universities. In 1870–82 he held the chair of zoology and comparative anatomy at Odessa University. In 1886 he founded (with M. Hamaliia and Ya. Bardakh) and directed the first bacteriological station in the Russian Empire (today the Scientific Research Institute of Virology and Epidemiology), but he was harassed by the Russian medical fraternity and forced to resign in 1887 by the Odessa Medical Society. In 1888 he was invited to Paris by L. Pasteur, and he headed a laboratory at the Pasteur Institute until his death.

Contrary to then prevailing chemical immunological approaches (championed by P. Ehrlich), Mechnikov's

Illia Mechnikov

phagocytic theory of immunity (1883) emphasized the role of foraging white blood cells (phagocytes) in attacking and digesting pathogens that invade the body. Mechnikov also conducted zoological studies of infusoria and parasites, embryological studies on the origin and development of germinal layers (several undertaken jointly with A. Kovalevsky), and periodicity studies on sugar beet weevil infestations and other epidemics. He discovered antilymphocyte globulin (1889) and with V. *Vysokovych developed a concept of the reticuloendothelial system (1892–1903).

Mechnikov was elected to the American Academy of Arts and Science (1898), the St Petersburg Academy of Sciences (1902), and the Académie des Sciences in Paris (1904). He published two popular books that went through many editions in several languages – *Études sur la nature humaine* (1903) and *The Prolongation of Life* (1907) – in which he expressed the view that most people die prematurely, estimated an attainable longevity of 100 to 120 years, and advocated yogurt as a key to human rejuvenation.

M. Adams

Mechnyk, S. [Mečnyk] (real name: Mudryk, Stepan), b 1919 in Kryve, Radekhiv county, Galicia. Political activist and journalist. As a young man he belonged to the OUN and fought for Ukrainian independence in the Ukrainian Insurgent Army. He settled in West Germany after the war. He has written several volumes of memoirs, including *Pochatok nevidomoho* (The Beginning of the Unknown, 1984) and *Rozdumuiu, pryhaduiu* (I Reflect, I Recall, 1985), and several documentary novels, such as *Neskoreni* (The Undaunted, 1965), *Vid oprychchyny do KGB* (From Oprichnina to the KGB, 1981), and *V zatiazhni borot'bi* (In a Prolonged Struggle, 1983). He has contributed many articles to *Ukrains'kyi samostiinyk* and *Shliakh peremohy*.

Mechnyk. In Kievan Rus' an officer of the prince's junior **druzhyzna* who along with the *dit'skyi* was responsible for various legal functions. The name is derived from *mech* (sword) and means 'sword bearer.' The *mechnyk* was responsible for maintaining order in the courts and for carrying out court sentences. In the Lithuanian-Ruthenian state the *mechnyk* was second last in rank among land officials. In the Polish Commonwealth he was the sword bearer who walked at the head of the king's entourage,

and he also presided over a military court. Eventually the office was reduced to a ceremonial one.

Medals. See Orders, medals, and honorific titles of the Ukrainian SSR.

Medical education. Prior to the end of the 18th century Ukrainian students wishing to pursue a medical career traveled to universities elsewhere in Europe, mostly to Italy, Germany, and Poland. They could also study in the Russian Empire at the Academy of Medicine and Surgery in St Petersburg or at the medical faculty of Moscow University (est 1764).

The first medical school in Ukraine was the Collegium Medicum, founded in Lviv in 1773. It was incorporated into the medical faculty (est 1784) of *Lviv University in 1817; a medical faculty with a full complement of courses was established in 1894. With the installation of Soviet rule in 1939, this faculty was reorganized into the *Lviv Medical Institute. The second school of medicine and surgery in Ukraine existed in Yelysavethrad (now Kirovohrad) in 1787–97. In 1802–17 a two-year medical program was offered at the *Kievan Mohyla Academy; its first lecturer was O. *Maslovsky.

Systematic medical education in Ukraine began with the development of medical faculties at the universities of Kharkiv (1805), Kiev (1841), Lviv (1894), Odessa (1900), and Katerynoslav (now Dnipropetrovske, 1918). By the middle of the 19th century numerous institutions had also been established for the training of nurses and medical assistants. The first faculty of medicine to use Ukrainian as the language of instruction was the Ukrainian State University of Kiev in 1918, during the time of Hetman P. Skoropadsky. In 1921 a medical department with a two-year program was organized by M. *Panchyshyn and M. *Muzyka under the auspices of the *Lviv (Underground) Ukrainian University; it lasted until 1925.

During the Soviet period a system of medical institutions of higher education was established in the Ukrainian SSR under the direction of the Ministry of Health of the USSR. In 1985 there were 14 medical institutes – the Lviv, *Kharkiv, *Kiev, *Odessa, *Poltava, *Dnipropetrovske, *Zaporizhia (est 1921), Donetske (1930), Symferopil (1931), Vinnytsia (1932), Chernivtsi (1944), Ivano-Frankivske (1945), Luhanske (1956), and Ternopil (1957) medical institutes – as well as the Kharkiv Pharmaceutical Institute (1921), Kiev Scientific Research Institute of Pharmacology and Toxicology (1934), and the medical faculty at Uzhhorod University.

The Kiev, Lviv, Odessa, Kharkiv, Dnipropetrovske, and Donetske institutes also have faculties of general hygiene and pediatrics. The Symferopil institute has a faculty of pediatrics; the Kiev, Odessa, Poltava, and Lviv institutes have faculties of stomatology; and the Lviv institutes have faculties of pharmacology. Medical studies consist of a six-year program, and pharmacology and stomatology studies, a five-year program; postgraduate and specialization programs are also available. In the 1984–5 academic year over 56,000 students were enrolled at the various medical institutes. Degrees for the general practice of medicine are granted at all the medical institutes; specialization requires another two years, and candidacy for a degree in medical sciences may take another three years of study. Postgraduate medical education in Ukraine is ob-

tained at the Donetske, Kharkiv, Zaporizhia, and *Kiev institutes for the upgrading of physicians. There is also a department of continuing medical education at the Lviv Medical Institute.

Intermediary medical personnel, such as medical assistants, obstetricians, laboratory technicians, nurses, dental technicians, X-ray technicians, and opticians, are trained at medical *tekhnikums, where programs of study are two to three and a half years.

Medical journals. The first medical journals in Ukraine were published in eastern Ukrainian territories under the Russian Empire in Russian: *Sovremennaia meditsina* (1860–81) and *Vestnik oftalmologii* (1884–1902) in Kiev, *Meditsinskii vestnik* (1862–86) in Teodosiia, *Arkhiv psikhiiatrii, nevrologii i sudebnoi psiko-patologii* (1882–99) in Kharkiv, *Zemskii vrach* (1884–1902) in Chernihiv, and *Akusherka* (1890–1917) in Odessa. Nineteen medical journals were published in Russian-ruled Ukraine in 1890–9, 25 journals in 1900–9, and 50 journals in 1917. The first Ukrainian-language journal in there to treat medical issues was *Zhyttia i znannia* (Poltava 1913–14), edited by H. Kovalenko and geared toward a general public. In the period of the Ukrainian National Republic two medical journals came out in Kiev, *Ukrains'ki medychni visty*, edited by Ye. *Lukasevych, and *Vistnyk Ministerstva narodn'oho zdorovia i opikuvannia*, edited by Yu. Melenetsky. In the Soviet period (1920–39), 69 medical journals were published, 22 of them in Ukrainian, including *Kyïv's'kyi medychnyi zhurnal* (1928–30), *Ukrains'ki medychni visty* (1925–31, in Kiev), *Ukrains'kyi medychnyi arkhiv* (1927–32, in Kharkiv), *Dnipropetrovs'kyi medychnyi zhurnal* (1922–31, in Dnipropetrovske), and *Profilaktychna medytsyna* (1929, in Kharkiv). After the Second World War the bimonthlies **Pediatriia, akusherstvo i hinekologiiia, Farmatsevtichnyi zhurnal, Mikrobiolohichnyi zhurnal*, and *Fiziolohichnyi zhurnal*, as well as four Russian-language journals, have been published.

In Austrian-ruled Galicia scholarly medical journals and articles began to appear sporadically at the end of the 19th century. Among the research topics dealt with was the problem of Ukrainian medical terminology. In 1897 the Medical Commission of the Shevchenko Scientific Society began including medical articles in its *Zapysky Naukovoho tovarystva im. Shevchenka*. Eight issues, edited by Ye. Ozarkevych, had come out by 1901; they were later collected in two volumes. In 1902, articles began appearing in the annals of the mathematical and natural sciences section of the Shevchenko Scientific Society. On the initiative of Ozarkevych and I. Horbachevsky **Zdorovlie* was published in Lviv (20 issues, 1912–14). From 1920 to 1939 **Likars'kyi vistnyk* was published (62 issues). In 1928 S. *Parfanovych initiated the popular journal *Vidrodzhennia* in Lviv. Also published were **Ukrains'kyi medychnyi vistnyk* in Prague (6 issues, 1922–5) and *Narodne zdorovia* (1927–34, ed B. Matiushevsky).

In the United States the bilingual Ukrainian-English

medical journal **Likars'kyi vistnyk* began publication in 1954.

P. Dzul

Medical scientific societies. The Society of Kiev Physicians (est 1840) was the first of its kind in Russian-ruled Ukraine (see *Kiev Medical Society). Among its honorary members were I. Mechnikov, S. Botkin, N. Pirogov, I. Sechenov, and the French scholar L. Pasteur. The society paved the way for the future development of medical research, education, and practice. It was followed by the Odessa Medical Scientific Society (1849) and then by the more specialized Pharmacists' Association in Lviv (1871), the Association of Scientific Medicine and Hygiene in Kharkiv (1872), the Odessa Bacteriological Association (1876), the Gynecology and Obstetrics Association (1886) and the Physico-Medical Association (1896) in Kiev, and the Syphilis Research Association in Kharkiv (1900) and Kiev and Odessa (1902).

During the struggle for independence (1917–20) an All-Ukrainian Physicians' Association was active in Kiev and published *Ukrains'ki medychni visty*. With the onset of Soviet rule all existing medical scientific societies were abolished and re-established as the Unified Scientific Medical Society. It consisted of various specialized branches that eventually broke off into independent societies. In 1985 there were 38 republican medical scientific societies in the Ukrainian SSR, apart from oblast-level and municipal associations. Their congress sat on the scientific committee of the Ukrainian SSR Ministry of Health and was subordinated to the All-Union Medical Scientific Society.

In Galicia a medical commission, initiated by Ye. *Ozarkevych, was founded in 1897 under the auspices of the Shevchenko Scientific Society. In 1910 it became the *Ukrainian Physicians' Society. By 1937 its membership had reached 289, with branches in Kolomyia, Stanyslaviv, Ternopil, and Peremyshl.

In Prague the *Ukrainian Physicians' Association in Czechoslovakia was founded in 1922 as the central organization of émigré doctors, with a membership of approx 120. It disbanded in 1940. In Germany Ukrainian Medical (Physicians') Societies were established in Munich (1946), Augsburg (1946), Hannover (1946), and Regensburg (1946). They were reorganized in 1952 into the Ukrainian Medical Association in Germany, which ceased its activity in 1958. The Ukrainian Medical Association of West Germany was founded in 1975 (renewed in 1979). Similar societies were also organized in Austria: in Vorarlberg and Tirol (1946), Salzburg (1948), with a total membership of 80; they had ceased activity by 1950 and were revitalized in 1985 as the Ukrainian Austrian Medical Association.

In the United States the Ukrainian Medical Association was founded in 1950; it was later expanded to include Canadian doctors as the *Ukrainian Medical Association of North America. In Australia the Ukrainian Medical Association was founded in 1975. To unite Ukrainian medical societies from around the world, the World Federation of Ukrainian Medical Associations was founded in 1977. It has held world congresses in Munich (1984), Vienna (1988), and Kiev and Lviv (1990).

P. Pundii

Medical technology industry. A branch of light industry that manufactures medical instruments, supplies, and

equipment. In Ukraine the first simple medical instruments were made in the first half of the 19th century at the Kherson Instruments Factory. In 1853 a shop for making surgical instruments opened in Kharkiv, and in 1860 two shops for autoclaves and medical and prosthetic devices were set up in Kiev. Later a similar shop was founded in Odessa. These shops were small, and their production was rudimentary.

In Soviet Ukraine a surgical instruments factory was opened in Kharkiv and several factories were started in Kiev. Health care and medical research institutions designed and tested new instruments and equipment. Particular progress was made by V. Filatov and A. Martsynkovsky, who designed special machines used in eye surgery. Factories in Ukraine also produced Soviet-designed x-ray machines, electrocardiograph machines, inhalators, thermostats, and various other instruments and machines. In 1940 there were 16 factories and 18 small workshops, which produced some 300 separate items. But there was a shortage of almost all medical supplies during the interwar period, and the goods that were available were of inferior quality. Most specialized machinery and instrumentation was imported from abroad.

During the Second World War most medical supplies factories were evacuated from Ukraine. After the war the reconstruction of the industry was made a priority. By 1950 most of the prewar factories had been restored. In the 1960s the industry expanded rapidly: major factories were constructed in Iziuv (optical equipment), Odessa (laboratory apparatus), Lviv (radioelectric equipment), Kharkiv (medical machine-building equipment), and Mariupol (technical supplies). In 1970 there were 12 enterprises, producing over 560 separate items, and Ukraine accounted for 25 percent of all Soviet production. In the 1970s many of the plants were expanded, and several were linked in manufacturing associations. By 1980 production was up by 81 percent over 1970, and there were 3 manufacturing associations, 8 separate factories, 2 research factories, and 6 special design bureaus, producing over 700 separate items of medical instrumentation, equipment, and supplies. Research in medical technology is conducted at the former All-Union Scientific Research and Design Institute of Radioelectric Medical Instrumentation in Lviv.

Medicinal plants. A great number of plants have been used throughout the world from time immemorial for the prevention or cure of sickness in humans and animals alike. Using plants for scientific or *folk medicine is known as phytotherapy. The medicinal attributes of plants are owing to their constituent components, such as alkaloids, glycosides, saponins, vitamins, organic acids, mineral salts, volatile oils, and antibiotics. The roots, tubers, bulbs, leaves, flowers, seeds, and bark of medicinal plants are selectively used in making teas, infusions, tonics, juices, tinctures, powders, and poultices. About 80 percent of the ingredients in drugs for heart disease, gastrointestinal or nervous disorders, and other grave illnesses are taken from medicinal plants.

During the First World War and the postwar period the disruption of imports resulted in an acute shortage of drugs in Ukraine. Intensive research on medicinal plants was conducted at the Ukrainian Institute of Applied Botany (1927-33; see *Agricultural Scientific Committee of Ukraine), the Kharkiv Institute of Experimental Medicine

(1935-7), and the Kharkiv Pharmaceutical Institute (1937-41). A research station in Lubni (est 1916, reorganized in 1931 as a branch of the All-Union Institute of Medicinal and Aromatic Plants) and the Acclimatization Garden in Kiev (set up by M. *Kashchenko in 1914) were responsible for introducing, testing, and cultivating new plants that eventually saw wide application in medical practice.

Since the Second World War over 20 research institutions connected with medical and pharmaceutical institutes and universities have conducted research on medicinal plants in Ukraine. The Kharkiv Pharmaceutical Institute, which concentrates mainly on isolating glucosides and using them in the preparation of new medicines, plays a leading role in this field. The gathering of wild plants and the cultivation of medicinal plants have expanded, and the research on new plants has led to the introduction of many foreign species and the adoption of many plants by official medicine.

Of the approx 12,000 species of medicinal plants worldwide, approx 1,000 are officially recognized as medicinal by the *pharmacology field. In Ukraine there are approx 1,200 species of medicinal plants, including 68 wild and 52 cultivated officially recognized species. Medicinal plants are classified by (1) their chemical components, (2) their effect on the human organism, or (3) the pathogen or symptom of a specific illness. For cardiovascular disorders the medicinal plants commonly used are campion (*Adonis vernalis*; Ukrainian: *horytsvit vesniansyi*), lily of the valley (*Convallaria majalis*; Ukrainian: *konvaliia travneva*), periwinkle (*Vinca*; Ukrainian: *barvinok*), and *belladonna (*Atropa belladonna*; Ukrainian: *beladonna likarska*). Belladonna, *valerian (*Valeriana officinalis*; Ukrainian: *valeriana likarska*), wild *poppy (*Papaver rhoeas*; Ukrainian: *mak dykyi, samosii*), and *jimsonweed (*Datura stramonium*; Ukrainian: *durman*) are utilized as painkillers and sedatives. For skin disorders the medicinal plants applied are shrub aloe (*Aloe arborescens*; Ukrainian: *aloe, stolitnyk*), *juniper (*Juniperus communis*; Ukrainian: *yalivets*), *wormwood (*Artemisia absinthium*; Ukrainian: *polyn*), and *plantain (*Plantago major*; Ukrainian: *podorozhnyk*). Bronchial and lung diseases are treated with thyme (*Thymus vulgaris*; Ukrainian: *chebrets*), *linden (*Tilia cordata*; Ukrainian: *lypa sertseva*), *sage (*Salvia officinalis*; Ukrainian: *shavliia likarska*), *viburnum (*Viburnum opulus*; Ukrainian: *kalyna*), and mint (*Mentha piperita*; Ukrainian: *miata kholodna*). Hepatic and bilious disorders are treated with St-John's-wort (*Hypericum perforatum*; Ukrainian: *zvirobii*; also called 'the herb against 99 maladies'), *yarrow (*Achillea millefolium*; Ukrainian: *derevii*), chicory (*Cichorium intybus*; Ukrainian: *tsykori*), mint, and caraway (*Carum carvi*; Ukrainian: *kmyn*). *Parsley (*Petroselinum sativum*; Ukrainian: *petrushka*), caraway, and juniper are diuretics. Medicinal plants used in gastrointestinal disorders are mint, caraway, yarrow, wormwood, aloe, and rosemary (*Rosmarinus officinalis*; Ukrainian: *rozmaryn*). Viburnum, yarrow, and nettle (*Urtica dioica*; Ukrainian: *kropyva dvodomna*) are used as coagulants or to stop hemorrhaging.

Medicinal plants are mentioned in Ukrainian folk songs and folktales. Folklore conferred special status and power on the men and women who knew how to use such plants. In the 20th century, medicinal plant lore is available for public use in books such as M. and I. Nosal's *Likars'ki roslyny i sposoby ikh zastosovannia v narodi* (Medicinal

Plants and Methods of Their Popular Use, 1965) and V. Karkhyt's *Liky navkolo nas* (Medicines around Us, 1975).

Ukraine produced one-half of the medicinal plant harvest of the USSR in 1957, almost a half of which was grown in Khmelnytskyi oblast. Dnipropetrovske oblast and the Crimea were also big producers.

Many wild-growing medicinal plants have been placed on the endangered species list. Efforts are being made by specific agrarian institutions and farm collectives to protect, cultivate, and preserve these valuable plants for posterity.

Medicine. The science and the art of diagnosis, prevention, and treatment of diseases (see also *Public health, *Hygiene, and *Sanitation).

During the Scythian period (7th–3rd centuries BC), herbal medicine and some surgical procedures were in common use, including tooth-pulling, debridement, suturing with horsehair, the bandaging of wounds, phlebotomy, the reduction of fractures, amputation, trepanation, embalming, and mummification. The physicians Anakharsis Abaris and Toxaris used *medicinal plants to increase blood coagulability, to treat ulcers, and to induce anesthesia. The therapeutic use of bathhouses was widespread. The Scythian ruler Mithridates VI, King of Pontus, was an experimenter in mithridatism.

In Kievan Rus' the profession of physician was officially acknowledged by legal statutes of Grand Princes Volodymyr the Great and Yaroslav the Wise. *Hospitals were regulated by a statute of Volodymyr the Great. The monk-physician St Anthony of the Caves founded the Kievan Cave Monastery, where a hospital was organized in 1070 by St Theodosius of the Caves.

In general, medicine was practiced by folk healers, monk-physicians (Anthony of the Caves, Ahapii, Olimpïi, Pymen, and Kozma), and secular physicians (Ivan Smera, Petro Sirianyn, Fevronia, Maryna, Yevfrosyniia, and Danylo Zatochnyk). Princess Yevpraksiia Mstyslavna wrote a scholarly medical treatise on salves (*Allima*, Constantinople 1130; see also *Folk medicine). Kievan physicians were acquainted with many conditions, including itching, jaundice, dermatoses, eye disorders, pleurisy, arthritis, bronchial asthma, angina pectoris, meningocoele, epilepsy, stroke, brain contusion, tuberculosis, typhoid fever, malaria, plague, and anthrax. Treatment consisted of the application of medicinal herbs, the use of sedatives and narcotics, hypnosis, massage, hydrotherapy, hygiene, and isolation. Maternal and child care was in the hands of midwives. Barber-surgeons (*tsyrulnyky*, *rizalnyky*, or *rukodily*) performed bandaging, tooth extractions, cauterizations, removal of lymphatic gland tumors, amputations, and trepanations of the skull (10th–11th centuries).

Knowledge of the natural sciences and of medicine was accumulated in Kievan Rus' in translations of Byzantine medical books, such as Exarch John of Bulgaria's *Shestodnev* (Hexaameron, 1263) and *Fiziolog* (Physiologist), and

others, and in original local *zilnyky* or *travnyky* (herbaria) that contained descriptions of healing herbs, baths, the treatment of some diseases, and bloodletting. Possibly as early as the 11th to 13th centuries Kievan Rus' herbaria made the transition into *likarstvenni* or *lechebnyky* (medicinal compendiums) that contained both folk and scientific medicine. Segments of *Mefodiivskyi likarstvennyk* have survived.

During the 13th century Ukraine was overrun by the Mongols and Tatars, and progress was halted in all fields of endeavor, including medicine. Nevertheless, Vasylii Ruthenus of Kiev opened the first pharmacy in Lviv (1445), and Yu. *Drohobych wrote *Iudicum prognosticon* (Rome 1483) on astronomy and infectious diseases (plague). M. Bulev translated *Hortus sanitatus* (Lubek 1432) into Old Ukrainian (1534).

Hospitals were founded in Peremyshl (1461), Lviv (1591), Kiev (1629), Chernihiv, and Lutske, as well as homes for the aged, sick, and infirm, pharmacies in Kiev (military in 1715, civilian in 1728), and guilds for *tsyrulnyky* (see *Surgery and *Feldsher) in Kiev and Lviv.

Military medicine developed in the Zaporozhian Sich in the first half of the 16th century. During B. Khmelnytsky's hetmancy (1648–57) every regiment of his army had a physician, and each company had a *tsyrulnyk*. Treatment of wounded Cossacks was carried out in hospitals of the Mezhyhiria Transfiguration and Trakhtemyriv monasteries. With the creation of gubernias in the Russian Empire, the Prikaz of Public Charity (1775–1864) initiated organized medicine, including the establishment of medical schools, hospitals, infirmaries, pharmacies, and public health services.

During the 18th century notable medical scholars, researchers, and practitioners in Ukraine included I. *Poletyka; M. Terekhovskyy, whose thesis, *De chao infusorio Linnaei* (1775), concluded that liquorous animalcules represent living organisms which die on heating or cooling; the epidemiologist D. *Samoilovych; the obstetrician and encyclopedist N. *Ambodyk-Maksymovych, who wrote an anatomical-physiological dictionary (1783) and a medical-pathological-surgical dictionary (1785); the organizer of health care in Western Ukraine, A. Krupiński; the histologist O. *Shumliansky; M. Hamaliia, who wrote a monograph on the Siberian plague (1792); the veterinarian S. *Andriievskyy, who proved that human and animal anthrax were identical (1786); the anatomist P. *Zahorsky; the physiotherapist E. Mukhin, who pioneered 'nervism' in medicine (reflex theory, 1800) and prescribed resuscitation for victims of drowning, strangulation, and choking (1805); and the scholar I. *Orlai.

During the 19th century in the Russian Empire, medical education was managed by the Ministry of Education, health care by the Ministry of Internal Affairs, and military medicine by the Department of Land and Navy Forces. Zemstvo medicine served rural areas (1864–1917). Among the medical specialists in Ukraine were the anatomist I. Kamensky, who wrote a dissertation on 'squeezing the heart' (1802); the biologist P. *Peremezhko; the anatomist V. *Bets; the ophthalmologist O. *Ivanov, who studied the microanatomy of the eye; O. Kovalevskyy, who discovered the neuroenteric (Kovalevskyy's) canal; and M. Kulchytsky, who described argentaffine (Kulchytsky's) cells (1897). The physiologist O. Filomafitsky introduced the theory of the cyclical function of the nervous system

(1836–40), performed a gastrotomy (1842), and investigated intravascular administration of ether, chloroform, and benzine for anesthesia (1849); A. *Walter proved the vasoconstrictive effect of the sympathetic nerves on blood vessels (1842) and described the effect of cooling on the safety of an operation (1862) and thus defined hypothermia; I. Sechenov discovered the reflex inhibitory (Sechenov's) center in the medulla oblongata and spinal cord (1862); the physiologist V. *Danylevsky demonstrated the biochemical activity of the cerebral cortex (1876); and B. Veriho (1899) described displacement of the oxyhemoglobin dissociation curve by a change in partial pressure of carbon dioxide or in pH (Veriho-Bohr effect). In biochemistry, O. *Danylevsky isolated amylase and trypsin (1863), observed the hydrolysis of proteins by pancreatic juice, demonstrated the synthesis of proteins from peptones in the presence of ferments (1886), and formulated the theory of protein structure (1888–91); I. *Horbachevsky synthesized uric acid (1882) proving that it derived from cell nuclei (1889) and that it increases in neoplasms (1891–2), thereby introducing a biochemical screening to *oncology; O. *Bakh developed a theory of slow oxygenation and cellular respiration (1897); and F. Selivanov described a test for fructose in the urine (Selivanov's test, 1887). Among microbiologists and immunologists, were G. *Minkh, O. *Mochutkovsky, Nobel laureate I. *Mechnikov, V. Vysokovych, Hamaliia, who discovered bacteriophages (1898), Ya. *Bardakh, and the plague researchers I. *Savchenko and D. *Zabolotny. In *pathology D. *Vellansky approached diseases from a more rationalistic *Naturphilosophie*; the Kievan school of pathologists was organized by V. *Pidvysotsky; and the origin of radiology could be traced, perhaps, to the construction of the cathode ray lamp by I. *Puliui (1882).

In the field of internal medicine (Ukrainian: *terapiia*) a systematic description of clinical symptoms, complications, and treatment of ulcers of the stomach and duodenum was given by F. Uden (1809–22); V. Lambl discovered *Lamblia intestinalis* and lambliosis (1859); F. Loesh discovered *Entamoeba histolytica* and amoebic dysentery; and M. Tolochnikov reported on the interventricular septal defect of the heart (1874). The development of hygiene was promoted by V. *Subbotin; a sign of costovertebral angle tenderness was described by F. Pastenatsky; S. *Podolynsky wrote on protein ferments of the pancreatic glands (1876); and H. Shapiro noted bradycardia in the course of myocarditis (Shapiro sign). An early separation of the epidermis from the basal layer of the skin in pemphigus vulgaris was described by P. Nikolsky (Nikolsky sign, 1896); H. Rossolimo introduced a reflex of plantar flexion of toes (Rossolimo reflex, 1902); and D. Romanovsky developed the prototype of eosin–methylene blue (Romanovsky's stains for blood cells and parasites, 1890–1).

In *surgery I. *Buialsky introduced a method of sectional sawing of frozen cadavers for anatomical dissection (1836); T. *Vanzetti noted that in sciatica with scoliosis the pelvis is always horizontal, but that in other lesions with scoliosis the pelvis is inclined (Vanzetti sign); N. *Pirogov introduced rectal and intravenous anesthesia (1847), performed a mastectomy for breast carcinoma (1847), invented an osteoplastic amputation of the leg at the ankle in which a part of the calcaneus bone is left in the lower end of the stump (Pirogov's amputation, 1852), outlined a

venous (Pirogov's) angle formed by the junction of the internal jugular and subclavian veins and the angles of the teeth (Pirogov's point), and introduced an extraperitoneal approach to the external iliac artery (Pirogov's incision, 1881); O. Karavaiev performed pericardiocentesis (1840) and organized the Clinic of Eye Diseases in Kiev (1844); Yu. Shymanovsky designed a flap reconstruction of the cleft lip and palate, transplanted the cornea, and performed an amputation of the thigh through the knee using a patella as an osteoplastic flap over the end of the femur; O. *Yatsenko introduced blepharoplasty with full-thickness free skin graft (1871) and bouginage of a stenosed esophagus through gastrotomy. N. *Sklifosovsky introduced the compression lock for fixation of fractures complicated by delayed union or nonunion (Sklifosovsky lock, 1875), propagated metallo-osteosynthesis (1893), and resected a prolapsed rectum followed by mucomuscular anastomosis (Sklifosovsky operation); O. *Bohaievsky performed a gastrotomy and removal of echinococcal cysts of the liver, paracentesis, and gastric resection (1888); M. Subbotin designed an artificial urinary bladder and urethra using the anterior portion of the lower rectum (Subbotin operation) and a suction drainage for wounds and abscesses (1902–6); A. *Pidriz closed a bullet wound of the heart (1897); I. *Sabaneev designed an osteoplastic intercondyloid amputation of the thigh (Sabaneev operation, 1890) and a gastrotomy by pulling a cone of the stomach through an incision in the left rectus muscle (1890); M. *Volkovych founded modern surgery in Ukraine; and A. *Matveev introduced prophylaxis of neonatal blennorhea by the routine subconjunctival application of a 2 percent silver nitrate solution (1853). Child *psychology and psychopathology were developed by I. *Sikorsky.

In the 20th century, contributions to medicine continued to be made by specialists in Ukraine and Ukrainians throughout the world, including the anatomist V. *Vorobiov, who described the subepicardial nervous plexus of the heart; the physiologist V. *Pravdych-Nemynsky, who recorded the electroencephalogram (EEG) in a dog, using a stringed galvanometer (1913); the pathophysiological O. *Bohomolets, who did pioneering work on the theory of stress and developed the concept of the reticuloendothelial system; G. *Folbort, who established the principles of the physiology of exhaustion and recovery; D. Alpern, who proved the desensitizing and anti-inflammatory action of the hypophyseal cortex (1935); the pathophysiological M. *Syrotynin, who proposed practical recommendations regarding hypoxia in space medicine (1973); J. Walawski, who discovered enterogastrone in the small bowel (1928) and proposed a theory of the etiology of gastric ulcers based on the function of enterogastrone; and Y. Babsky, who improved ballistography (1956–63).

In biochemistry J. *Parnas discovered the pathway of glucose metabolism (Embden-Mayerhoff-Parnas pathway, 1935); A. *Palladin researched vitamin synthesis (1938), muscle function, and biochemical topography (1965–72); the geneticist S. *Hershenzon demonstrated the mutagenic activity of exogenic DNA (1939); I. Kochan introduced the concept of nutritional immunity (1973); and the pharmacist O. *Hornykiewicz noted the dopamine depletion of the striatum in Parkinson's disease (1960) and introduced L-dopa for its treatment. In microbiology and immunology M. Weinberg developed a complement fixa-

tion (Weinberg) test for hydatid disease, introduced culture (Weinberg media) for the growth of anaerobes, and discovered the bacteria causing gas gangrene (*Bacillus oedematis* and *histolyticus*, 1918); O. Bezredka discovered the Bezredka antiviral (1903), filtered and heated bacteria cultures for local immunity (1925), described a complement deviation test for tuberculosis (Bezredka reaction), and introduced a desensitization (Bezredka) method during immunization with tetanus toxoid or immune globulin (1930); V. *Drobotko formulated the bacterial dissociation theory; and Nobel laureate S. Waxman obtained streptomycin from *Streptomyces griseus* and proved its effectiveness against tuberculosis (1944).

In pathology, work was done by N. *Melnikov-Razvedenkov, who studied the fixation of anatomical preparations (1896), the pathology of alveolar echinococcus, tumors of the brain and stomach, and rhabdomyoma of the heart; P. *Kucherenko; R. *Kavetsky, who applied lasers to oncology (1969); and the immunologist and oncologist L. *Dmochowski. Evolutionary genetics was established by T. Dobzhansky, who applied Mendelian genetics to Darwinian evolution. In radiology E. Zavoisky did pioneering work in nuclear magnetic resonance (1944); and L. Bilaniuk was among the first (1982) to report diagnostic application of magnetic resonance imaging.

In internal medicine V. *Obraztsov and M. *Strazhesko clinically diagnosed acute myocardial infarction due to thrombosis of the coronary artery; the work of F. *Yanovsky centered on the diagnosis of kidney diseases (1927); L. Dmytrenko described a velvety sound in endocarditis; professional and ethical standards of medical practice were created by M. *Panchyshyn; disturbances of bronchial conductivity in bronchitis and bronchial emphysema were found by B. Votchal; V. Vasylenko reported metabolic alkalosis and (with M. Strazhesko) proposed a clinical classification of congestive heart failure (1939); V. *Ivanov contributed to the evaluation of gastric mobility and secretion (1926–8); D. *Panchenko constructed a barometric chamber for the treatment of essential hypertension and neuropsychiatric disorders (Panchenko biotrom, 1960); O. *Hrytsiuk demonstrated a transition of the subendocardial into the transmural myocardial infarction (1973); a Nobel laureate, Y. Chazov introduced intracoronary thrombolysis for acute myocardial infarction (1975). Anesthesia in Ukraine was developed by A. Treshchynsky and L. Chepky.

In surgery, surgical oncology was founded by H. Bykhovsky, who also described a test for albumin in the urine (Bychovsky test); M. Diederichs invented a transport splint (1932); the cofounder of neurosurgery, N. *Burdenko, advanced military field surgery; the ophthalmologist V. *Filatov coined the tubed or pedicle (Filatov-Gillies) flap (1917), advanced keratoplasty, and initiated the use of cadaver corneas (1931); Ya. *Halpern proposed to substitute the esophagus with a greater curvature of the stomach (1911); V. *Shamov employed electrocoagulation to destroy malignant tumors (1910–11) and initiated the transfusion of cadaver blood (1928); and O. Melnykov developed an anatomical basis for extrapleural approaches to the subphrenic spaces and abscesses (1929–3) and the concept of precancerous lesions of the stomach (1950–4). Neurosurgery was pioneered by I. *Ishchenko; T. Hryntschak introduced suprapubic transurethral prostatectomy with a primary closure of the prostatic bed and

urinary bladder (Hryntschak prostatectomy); Yu. *Voronny described the immunologic character of graft rejection (1929), performed the first human kidney allograft (1933), and introduced the mechanical suture in vascular surgery (1949); M. *Novachenko developed original operations for arthrodesis and for re-construction of the hip joint; V. Kolesov created internal thoracic–coronary artery grafting (1964–8); A. *Arutiunov and A. Romadonov contributed to the diagnosis and surgery of craniocerebral trauma, vascular abnormalities, and tumors of the brain and spinal cord; I. *Shevchenko recommended preoperative radiation for malignant tumors and combined intraoperative roentgen-radium therapy with the resection of lung cancer (1962); M. *Amosov introduced mechanical sutures in thoracic surgery (1957), advanced the use of computers in medicine (1960), simplified the heart-lung machine (1962), and constructed bileaflet and cuffed heart valve prostheses (1962–5); P. Dzul pioneered methods of microsurgery of the middle ear (1960) and introduced the intracavitary treatment of maxillary carcinoma (1967); K. Syvash developed endoprostheses for total hip (1959) and total knee (1978) replacement; W. Bobetchko designed the Toronto braces for Legg-Calve-Perthes disease (1968); H. Knyshov performed the first coronary artery bypass graft in Ukraine using a vein (1973); and L. Kuzmak designed stoma adjustable gastric banding for morbid obesity (1983).

Contributions to *pediatrics and *obstetrics were made by the psychoneurologist K. *Platonov; A. *Nikolaiev, who proposed administering oxygen, glucose, and cardiac stimulants (Nikolaiev's triad, 1952) to alleviate intrauterine asphyxia; and V. Hryshchenko, who applied hypothermia and cryosurgery and used echocardiography for the diagnosis of fetal heart abnormalities (1977–8). The work of O. Khokhol focused on nutritional diseases in infants.

The neurologist O. *Shcherbak developed a clinical classification of psychiatric disorders and introduced a segmental collar and lumbar reflex physiotherapy. The psychiatrist V. *Protopopov introduced physiology and biochemistry in the evaluation of patients. The neurologists V. Hakkebusch, T. Heier, and O. Heimanovych defined a senile dementia due to atherosclerosis of the cortical arteries of the brain (Hakkebusch-Heier-Heimanovych syndrome, 1912–15). The philosopher-pedagogue S. *Balei was a pioneer of childhood (1931), pedagogic (1938), and social (1959) psychology. One of the founders of forensic medicine, M. *Bokarius, proposed the classic sperm test and methods for examining a strangulation furrow (1925–30). Space medicine originated from the work of the aeronautical engineer S. *Korolov. Biological and medical computers for space technology were developed at the Division of Biological Cybernetics (organized by Amosov in 1960) of the AN URSR (now ANU) Institute of Cybernetics in Kiev (1957) and at the Kiev Scientific Research Institute of Tuberculosis, Pulmonology, and Thoracic Surgery.

The medical library of Ukraine (est 1930), located in a building formerly the property of the Tereshchenko family in Kiev, housed over one million volumes in 1980, and had 24,000 individual and 3,000 group subscribers. The Ukrainian Medical Museum (est 1973 by A. Grando) is located in the former Anatomy Theater of the Kiev Medical Institute.

Medobory Mountains. See Tovtry.

Medovar, Borys, b 29 March 1916 in Kiev. Metallurgist; full member of the AN URSR (now ANU) since 1973. He graduated in 1940 from the Kiev Polytechnical Institute, and from 1941 he worked at the AN URSR Institute of Electric Welding (from 1946 as department head). His main contributions were in the areas of the electric welding of steel and iron alloys, particularly pipe welding, steel corrosion, specialty steel compositions, the influence of gases on steel joints, and many other areas of ferrous metallurgy. A biography of him was published in Kiev in 1986.

Levko Medved

Medved, Levko [Medved'], b 18 June 1905 in Chorna Hrebliia, Olhopil county, Podilia gubernia, d 22 February 1982 in Kiev. Hygienist; full member of the USSR Academy of Medical Sciences from 1969. A graduate of the Vinnitsia Pharmaceutical Institute (1927) and the Kiev Medical Institute (1939), he served in the latter as director (1941–5) and head of the occupational hygiene department (1944–51). He was deputy health minister and health minister (1947–52) of the Ukrainian SSR, director of the Kiev Scientific Research Institute of Occupational Hygiene and Diseases (1952–64), and director of the All-Union Scientific Research Institute of the Hygiene and Toxicology of Pesticides, Polymers, and Plastics (from 1964). His publications, numbering over 250 works, dealt with agricultural and industrial hygiene, pesticide toxicology, and the history of Soviet health care.

Medvedeva, Nina, b 27 December 1899 in Saratov, Russia, d 26 May 1969 in Kiev. Pathophysiologist; correspond-

ing member of the AN URSR (now ANU) from 1939. A graduate of Saratov University (1921), from 1931 she taught and chaired a department at the Institute of Experimental Biology and Pathology in Kiev (from 1953 the AN URSR Institute of Physiology). She researched the biodynamics of proteins and the biological significance of sulfur, and isolated a corticoid hormone.

Medvediev, Fedir [Medvedjev] (Medvedev, Fedor), b 28 May 1912 in Semenovka, Bohuchar county, Voronezh gubernia. Linguist. After graduating from Kharkiv University (1936) he continued his graduate studies under L. Bulakhovsky. After the war he lectured in the department of Ukrainian language at Kharkiv University and served as its chairman (1947–75). He wrote over 450 works in Slavic, Russian, and Ukrainian linguistics, including a textbook of Ukrainian historical grammar (1950) and books on the grammar of Standard Ukrainian (1951), the historical grammar of Ukrainian (1955, 1964), and Ukrainian conjunctions (1962).

Medvediev, Yukhym [Medvedjev, Juxym] (Vedmediv), b 1886 in Bakhmut, Katerynoslav gubernia, d 1938 in Kharkiv. Head of the first Soviet government in Ukraine. A member of the strike committee in Katerynoslav in 1905, after the February Revolution in 1917 he joined the Ukrainian Social Democratic Workers' party. As a delegate of the Kharkiv Executive Committee to the All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies in Kiev, he walked out with the Bolshevik minority and attended the First All-Ukrainian Congress of Soviets in Kharkiv, which on 25 December 1917 elected him chairman of the Presidium of the Central Executive Committee in Ukraine. In March 1918 he attended the peace conference at Brest-Litovsk and the Second All-Ukrainian Congress of Soviets, which relieved him of his chairmanship. Later in 1918 he joined the *Borotbists and organized Borotbist partisan units in Katerynoslav gubernia. He joined the CP(B)U with other Borotbists in 1920 and resigned from it in the 1930s. In 1938 he was arrested, accused of organizing a counterrevolutionary terrorist organization, and shot. He was rehabilitated in 1957.

Medvedsky, Yulian [Medveds'kyj, Julijan] (Niedzwiędski, Julian), b 18 October 1845 in Peremyshl, Galicia, d 7 January 1918 in Lviv. Geologist; full member of the Shevchenko Scientific Society from 1914 and the Polish Academy of Sciences from 1893. He graduated from Vienna University in 1872. He then taught mineralogy and geology at the Lviv Technical Academy (later the Lviv Polytechnical Institute), and he served as its rector in 1879, 1884, and 1887. He was appointed a lecturer at Lviv University in 1887. A supporter of Ukrainian education, he was vice-president of the Prosvita society and left his estate to various educational institutions. His geological studies of mountain regions include several works on the geology of the Carpathian Mountains and the mineralogy of Subcarpathia, particularly the Kalush region. His scientific works were published in German or Polish.

Medvetska, Edita [Medvec'ka], b 22 October 1932 in Mukachiv, Transcarpathia oblast. Painter. A graduate of the Lviv Institute of Applied and Decorative Arts (1958), she has painted genre scenes, Transcarpathian landscapes

and folkways, and still lifes in a representational manner, often depicting workers and construction. She does not copy nature but transforms what she sees by means of a bright palette and simplified form.

Liubomyr Medvid: *New Street in the Village of Rudno* (tempera, 1972)

Medvid, Liubomyr [Medvid', Ljubomyr], b 10 July 1941 in Variazh (now Novoukrainka), Sokal raion, Lviv oblast. Painter. A graduate of the Lviv Institute of Applied and Decorative Arts (1965), he taught there until 1970. He experimented with elements of surrealism in the series 'Evacuation' (1965–7), painting distorted, floating figures and deep space. Later he developed a realist style (eg, *A New Street in Rudno* [1972] and *Boundary* [1974]) characterized by unusual points of view, a subdued palette sometimes bordering on the monochromatic, and an enigmatic atmosphere created by the positioning of figures and objects; at times the works echo those of the American realist A. Wyeth. Working mostly in tempera, he has painted interesting portraits of the writers T. Shevchenko (1985) and Lesia Ukrainka (1983), the composer S. Liudkevych (1978), and the violinist O. Krysa (1988). His triptych *Emigrants* (1981) is a powerful close-up image of forlorn figures. Medvid successfully uses the dramatic effects of light and dark to create tension and set up abstract patterns (eg, *Fluidity of Time* [1986] and *A Tone of Pure White*

[1988]). The figures in his most recent works, particularly the 'Yavoriv Region' series, are less structured; spatial dislocations add to the atmosphere of the mysterious. Medvid has had solo exhibitions in Lviv (1972) and Toronto (1990).

Medvid, Mykhailo [Medvid', Myxajlo] (aka Karpovych, Kremianetsky), b 1911? in Tysmenytsia, Tovmach county, Galicia, d 8 June 1945 in Deviatnyky, Novi Strilyshcha raion, Drohobych oblast. Senior UPA officer. After joining the OUN in 1933, he was imprisoned by the Poles for underground activities. In 1942 he became chief of the military department in the Dnipropetrovske Regional Leadership of the OUN (Bandera faction). He was transferred in 1943 to UPA headquarters in the northwestern region, and promoted on 26 January 1944 to captain and appointed chief of staff of the UPA-North. In the summer of 1944 he was reassigned to the UPA General Staff as its chief of communications, and wrote articles for the UPA journal *Povstanets'*. Facing capture by NKVD troops, Medvid shot himself. He was promoted posthumously to lieutenant colonel.

Medvid, Oleksandr [Medvid'] (Medved), b 16 September 1937 in Bila Tserkva, Kiev oblast. Wrestling champion. A graduate of the Minsk Institute of Physical Culture in Belarus, he won Olympic gold medals in freestyle wrestling in 1964 (light heavyweight), 1968 (heavyweight) and 1972 (super-heavyweight). He was also a five-time world champion and three-time European champion in various weight categories in the years 1962–72.

Medzhybizh castle (16th century)

Medzhybizh [Medzhybizh] (historical name: Mezhybizh). IV–8. A town smt (1990 pop 2,000) on the Boh River in Letychiv raion, Khmelnytskyi oblast. It was first mentioned in the Hypatian Chronicle under the year 1146. At the end of the 12th century Medzhybizh was an important center in the Principality of Galicia-Volhynia. It was captured by the Tatars in 1241 and was recovered by Prince Danylo Romanovych in 1255. In 1258 his troops crushed the Tatar army near Medzhybizh. The town came under Lithuanian rule in 1362 and was transferred to Poland under the Union of Lublin in 1569. Its wooden castle was rebuilt in stone in the 14th to 16th centuries to protect the town from frequent Tatar attacks. The town was granted the rights of

Magdeburg law in 1593, and became an important cultural center in the 17th century. During the Cossack-Polish War of 1648–57 some major battles (in 1648, 1649, and 1651) were fought near Medzhybizh. In 1666 the town was captured by the Turks, who held it for 27 years. It was involved in the popular revolts against the Polish nobles in 1702–4 and 1734. After being transferred to Russia in 1793, Medzhybizh declined. In 1917 the First Ukrainian Corps commanded by P. Skoropadsky was stationed in Medzhybizh. In the following year several battles between the UNR Army and the Red Army were fought in its vicinity.

Today Medzhybizh has several food-processing plants and a brick factory. Its architectural monuments include the stone castle, which was partly rebuilt in the 19th century, the 16th-century Dormition Church, which contains many old frescoes, the 16th-century Roman Catholic Church of the Holy Trinity, and a 16th-century palace.

Medzilaborce. IV-2. A town (1962 pop 3,000) in the Prešov region of Slovakia, inhabited mostly by Lemkos. In 1918 the town and the surrounding region voted to join Czechoslovakia rather than Poland.

Medzvietsky-Koval, Mykola [Medzviec'kyj-Koval'], b 1868, d 1929 in Warsaw. Senior officer, astronomer, and geodesist. During the First World War he rose to major general in the Russian army. As brigadier general in the Army of the UNR, he was chief of the Main Geodetic Service and a member of the Council of the UNR Ministry of Defense.

Megalithic culture. See Nordic culture.

Megas, Osyp (Joseph), b 1882 in Galicia, d 8 September 1955 in Edmonton. Physician, educator, journalist, and community leader. After emigrating to Canada in 1905, Megas was appointed 'supervisor of Ruthenian schools' by the government of Saskatchewan (1907–17), and helped organize the Training School for Teachers for Foreign Speaking Communities in Regina in 1909. He served as editor of *Kanadiis'kyi farmer* (1906–8) and helped establish the pro-Liberal party paper *Novyi krai* in Rosthern, Saskatchewan (1910–13). In 1916 he was among the founders of the Mohyla Ukrainian Institute in Saskatoon, and in 1919 he was a delegate from the Ukrainian Canadian Citizens' League to the *Paris Peace Conference. After visiting Galicia he published his impressions in *Tragedia halyts'koi Ukraïny* (The Tragedy of Galician Ukraine, 1920). Following studies at the universities of Manitoba and Alberta (MD, 1926) he established a medical practice in Edmonton (1926).

Mehedyniuk, Marko [Mehedynjuk], b 1842 in Richka, Kolomyia circle, Galicia, d 1912 in Richka, Kosiv county. Hutsul folk artist and master of wood inlay. His work, including crosses, plates, chests, candle holders, **tsymbaly*, and axes, was distinguished for its fine detail and the use of colored beads and metal. His works were exhibited in Cracow (1887), Lviv (1894, 1905), and Kolomyia (1912) and are preserved today at the Ukrainian State Museum of Ethnography and Crafts in Lviv, the National Museum in Lviv, and the Kosiv School of Applied Art.

Petro Mehyk: *Zinnias* (tempera)

Mehyk, Petro, b 24 June 1899 in Vashkivtsi, Bukovyna, d 26 August 1992 in Philadelphia. Painter and graphic artist. A graduate of the Warsaw Academy of Fine Arts (1928), he taught drawing at secondary technical schools in Warsaw (1928–44), worked as an artist at the medical faculty of Warsaw University (1925–39), was a founding member of the *Spokii art circle in Warsaw, and participated in Ukrainian art exhibitions in interwar Lviv, Warsaw, Prague, and Berlin. A postwar refugee, in 1949 he emigrated to Philadelphia, where he directed the *Ukrainian Art Studio, served on the executive of the Ukrainian Artists' Association in the USA, and edited **Notatky z mystetstva / Ukrainian Art Digest*. He has done portraits, landscapes, and still lifes in oil, tempera, and watercolor, but his favorite medium is pencil drawing. He compiled the album *Rysunky* (Drawings, 1962) and wrote studies of fresco painting technique (in Polish) and Ukrainian folk sculpture. A retrospective catalog of his works was published in 1979.

Meihesh, Yurii [Mejheš, Jurij], b 20 January 1925 in Velykyi Rakovets, Transcarpathia. Writer. A former teacher, he is secretary of the Writers' Union of Ukraine in Transcarpathia oblast. Since 1950 he has published 10 novels about life in Transcarpathia, notably *Verkhovyntsi* (Highlanders, 1961), *Kam'ianyï idol* (The Stone Idol, 1966), *Taka liubov* (Such Is Love, 1968), *S'ohodni i zavzhdy* (Today and Forever, 1969), *Nebezpečnyi vik* (A Dangerous Age, 1983), and *Stykhiia* (The Elemental Force, 1985). A volume of his selected works appeared in 1985.

Meitus, Yulii [Mejtus, Julij], b 28 January 1903 in Yelysavethrad (now Kirovohrad). Composer. A graduate of the Kharkiv Music and Drama Institute (1931) in the class of S. Bohatyrov, he has worked as a composer for his entire life. His works include 14 operas, most notably *Perekop* (1939–40) and *Haidamaky* (1940–1) (both composed with V. Rybalchenko and M. Tiits), *Abadan* (composed with A. Kuliev, 1942–3), *Star over the Dvina* (1951–5), *Stolen Happiness* (1958–9), and *Yaroslav the Wise* (1973); five orchestral suites; choral and choral-orchestral works on Ukrainian and Turkmen folk themes; songs to texts by T. Shevchenko, I. Franko, and others; and music for the the-

Teofil Melen

ater and films. Fairly modern in style, Meitus is a notable representative of contemporary Ukrainian music.

Mekhanizatsiia sil's'koho hospodarstva (Mechanization of Agriculture). A monthly scientific and technical magazine published in Kiev since 1950 by the Committee for the Technical and Production Needs of Agriculture of Ukraine. It contains articles on economic problems, farm management, the use of machines and tractors in farming, and the mechanization and electrification of the production processes on collective and state farms. Its circulation was approx 15,000 in the 1950s, 26,000 in 1970, 28,500 in 1976, and 25,000 in 1980.

Ukrainian Orthodox Church of the Dormition in Melbourne

Melbourne. The state capital (1989 pop 3,002,300) of Victoria, in southeastern Australia. The Ukrainian community in Melbourne, about 9,000 strong, consists of postwar emigrants and their descendants. Melbourne is the seat of a Ukrainian Catholic eparchy and its former exarchate (1958–82) as well as of the Australian eparchies of the Ukrainian Autocephalous Orthodox church and the Ukrainian Orthodox Church of Canada. The state branch of the Federation of Ukrainian Organizations in Australia

is centered there, and the local branch of the Shevchenko Scientific Society is the most active one in Australia. The city's cultural life is enriched by the Chaika male choir (and its affiliated Korali female quartet and Akord male quartet), the Kurbas theater (est 1950), the Soniashnyi Promin dance group, and the Vasyl Symonenko Literary-Artistic Club. In addition to Ukrainian Saturday schools, the youth organizations Plast Ukrainian Youth Association and Ukrainian Youth Association (SUM) are active there. The Levy Sports Association fields a soccer team. The semimonthly *Ukraïnets' v Avstralii* has been published there since 1956. The Catholic eparchy publishes *Tserkva i zhyttia* (1960–), and the Lastivka publishers have published *Novyi obrii*, an almanac devoted to literature, art, and culture (six issues by 1980). The economic strength of the community is illustrated by the Dnister credit union (est 1951), with 2,500 members and assets of five million pounds; the Odessa building co-operative, with 400 members and assets of two million pounds; and the Postup trade co-operative, with 370 members and assets of 800,000 pounds. In 1983 the first university-level Ukrainian courses in Australia were initiated at the city's Monash University, and in 1988 the M. Zerov Lectureship in Ukrainian Studies was established at the university through a permanent endowment. The current holder is M. *Pavlyshyn.

Melek-Chesmen kurhan. A large burial mound (8 m tall and 60 m in diameter) of a noble of the *Bosporan Kingdom from the 4th century BC in Kerch (ancient *Panticapaeum), Crimea. Excavated in 1858, the kurhan was found to contain a stone burial chamber with a preceding corridor (*dromos*). The grave was found looted, and contained only the skeletal remains of a child, pottery sherds, and a small bronze bracelet with gold ornamentation.

Melen, Teofil [Melen', Teofil'], b 1879, d 28 May 1915 in Yezupil, Stanyslaviv county, Galicia. Civic and political leader and publicist. As a university student in Lviv he was active in Ukrainian affairs and a contributor to *Moloda Ukraina*. Upon graduating he became a leading member of the Ukrainian Social Democratic party and editor of its semimonthly *Volia*. He helped organize the *peasant strikes in Galicia in 1902. In 1914–15 he represented his party on the Supreme Ukrainian Council and helped recruit soldiers for the Ukrainian Sich Riflemen. A supporter of the General Ukrainian Council, he contributed articles and reports from the battlefield to its *Vistnyk*. He served as a courier in the Ukrainian Sich Riflemen and was killed in action.

Melenevsky, Mariian [Melenevs'kyj, Marijan] (pseud: Basok, Ivan Hilka or Hylka, Samoilovych, and others), b 1878 in Fediukivka, Tarashcha county, Kiev gubernia, d ? Political activist; scion of a Polonized gentry family in central Ukraine. He graduated from a Kiev gymnasium (1896) and was expelled from the Agricultural and Forestry Institute in Nova Aleksandriia (Puławy), Lublin gubernia, the same year for participating in student protests. He was one of the first members of the Ukrainian intelligentsia to take an overt Marxist position. He cultivated a social-democratic workers' group on his father's estate, funded the *Ukrainian Socialist party and later the

*Revolutionary Ukrainian party (RUP), edited 12 issues of **Selianyn*, and spread revolutionary propaganda among rural homesteads and villages. In 1899 he was arrested in Kiev for participating in student demonstrations, and in 1901 he was exiled for two years to Vologda gubernia. He emigrated to Lviv and continued his activity in the Foreign Committee of the RUP.

After leaving the RUP in late 1904, Melenevsky founded and led the Ukrainian Social Democratic **Spilka*; following its collapse he joined the Ukrainian Social Democratic Workers' party and published the article 'Do roboty cherez iednannia' (To Work through Unification, *Nash holos*, 1911, nos 11–12). He was unable to reconcile his ideals of the 'unity of the international proletariat' with the idea of a free and independent Ukraine, and at the start of the First World War he joined the **Union for the Liberation of Ukraine* (SVU). He became a presidium member and represented the SVU in Turkey (1914–15) and on the **General Ukrainian Council* in Vienna (1915). In 1923, however, after the imposition of Soviet rule in Ukraine, Melenevsky supported the Bolsheviks; he accounted for his action in an article published in Vienna, 'Kudy ity?' (Where to Go? *Nova hromada*, vol 1 [1923]). He later moved to Soviet Ukraine; his further fate is unknown.

Melensky, Andrei [Melenskij, Andrej], b 1766 in Moscow, d 1833 in Kiev. Architect of the **Empire style*. He was trained in the drafting office of the Kremlin Building Expedition in Moscow (1786–7) and the palace design office run by G. Quarenghi in St Petersburg (1787–92). He worked for a time as gubernial architect for Volhynia and

Andrei Melensky: monument to Magdeburg law in Kiev (1802–8)

then as chief architect of Kiev (1799–1829) and director of the Kiev gubernial drafting office (1802–32). He helped prepare the general plan for Kiev (1808–9) and rebuilt the Podil district after it was destroyed by fire in 1811. Many government and church buildings in Kiev were designed by Melensky, including the governor's residence and building of the Nobles' Assembly in the Pecherske district (1806–10), the first theater building (1806), the Nativity Church (1814), the buildings of the contract fairs (1800–1, 1817), the rotunda church at Askoldova Mohyla (1810), the new building of the Kiev Theological Academy (1824), the Resurrection Church and hegumen's residence at St Flor's Monastery (1824), and the monument to the restoration of Magdeburg law (1802–8). He also designed buildings in other towns of Kiev gubernia and conducted a survey of architectural monuments in the region.

Meleshkin, Mikhail [Meleškin, Mixail], b 6 August 1918 in Davlekanovo, Bashkiria, d 29 May 1980 in Odessa. Economist; corresponding member of the AN URSR (now ANU) from 1976. A graduate of the Gorky Industrial Institute (1941), he worked in industry before becoming deputy director of the AN URSR Institute of Economics (1964) and director of its Lviv and Odessa sections. In 1975 he was appointed deputy director of the Southern Branch of the AN URSR. He wrote articles and monographs on ways of increasing efficiency in industry and, most notably, on marine economics and ecology, including *Ekonomiko-ekologicheskie problemy morskoi sredy* (Economic and Ecological Problems of the Maritime Environment, 1982) and *Ekonomika i okruzhaiushchaia sreda: Vzaimodeistvie i upravlenie* (The Economy and the Environment: Interaction and Management, 1979).

Meleshko, Fotii [Meleško, Fotij], b 25 August 1889 in Hlodosy, Yelysavethrad county, Kherson gubernia, d 6 December 1970 in New York. Political leader and writer. In 1917 Meleshko was one of the organizers of Ukrainian military units; subsequently he became a political activist for an independent Ukraine. In 1921 he emigrated to Prague, and after the Second World War, to the United States. He is the author of numerous sketches and stories. His best-known works are the dramas *Ponad Dniprom* (Along the Dnieper, 1921) and *Tr'oma shliakhamy* (By Three Roads, 1964) and the novel *Try pokolinnia* (Three Generations, vol 1, 1943; vol 2, 1959).

Meletios Pegas, b 1549 in Crete, d 14 September 1601 in Alexandria. Orthodox Patriarch of Alexandria. He entered the service of the patriarchal courts in Alexandria and Constantinople in 1575 and was consecrated patriarch in 1590. Meletios was well acquainted with church affairs in Ukraine. He opposed the Church Union of **Berestia* of 1596; corresponded with leaders of the Orthodox opposition (esp Prince K. Ostrozky); and dispatched his representative, C. Lucaris, to assist them. His letters to Sigismund III Vasa, in which he criticized the union and the notion of papal supremacy, have survived. Meletios also granted stauropegion rights to several church brotherhoods to help them resist conversion. I. Malyshovsky's monograph on Meletios and his relations with the Russian and Ukrainian churches appeared in 1872.

Melgunov, Aleksei, b 9 February 1722, d 2 July 1788. Russian military figure and administrator. After serving in the courts of Elizabeth I and Peter III Fedorovich (from 1756) he was made commander of New Serbia and governor of New Russia gubernia (1763–5) by Catherine II. In those capacities he organized the *lancer regiments, and he also started the first excavations of Scythian grave sites in Ukraine (including the 1763 unearthing of Lyta Mohyla, known also as the *Melgunov kurhan). From 1777 he was governor-general of Yaroslavl and Vologda gubernias in Russia.

Melgunov kurhan: gold sheath and fragment of sword hilt

Melgunov kurhan. An early 6th-century BC royal Scythian burial, found near the village of Kucherivka, now in Znamianka raion, Kirovohrad oblast. It takes its name from A. Melgunov, governor of New Russia gubernia, who commissioned the excavation of the site in 1763. Known also as Lyta Mohyla, this site contained the remains of a Scythian chieftain and his armor (bronze arrowheads, sword, sheath), a gold crown, and silver adornments. Assyrian and Persian designs on some of the artifacts testify to Scythian contacts with the Middle East. The collection is housed in the Hermitage in St Petersburg.

Melikhov, Heorhii [Melixov, Heorhij], b 24 May 1908 in Kharkiv, d 22 April 1985 in Kiev. Painter; corresponding member of the USSR Academy of Arts from 1979. He graduated from the Kiev State Art Institute (1941), where he studied under P. Volokydin and F. Krychevsky, and later taught there (1945–62). He painted and drew portraits, a series of German-Soviet War scenes (1943–5), still lifes, and landscapes and illustrated editions of literary works. His works include *Young Taras Shevchenko at the Home of the Artist K. Briullov* (1947), *Hutsul Woman from the Village of Yasynia* (1946), *Children* (1952), *In Our Native Ukraine* (1965), and *Mountain Road* (1971). Albums with reproductions of his works were published in 1962 and 1979.

Melitopil or Melitopol [Melitopil' or Melitopol']. VII-16. A city (1990 pop 175,800) on the Molochna River and raion center in Zaporizhia oblast. A frontier settlement was established at the site in 1784. In 1816 it was named Novooleksandrivka, and in 1841 renamed Melitopil. From 1841 to 1923 Melitopil was a county center in Tavriia and

Heorhii Melikhov: *Hutsul Woman* (oil, 1947)

then Zaporizhia gubernia. On 18 June 1918 the UNR Army defeated the Red Army near the town. During the Soviet period Melitopil developed into an industrial city. Its chief industries are machine building (automobile engines, refrigerators, tractor parts), metalworking, light industry, and the food industry. Its main educational institutions are the *Melitopil Institute of Agricultural Mechanization and the Melitopil Pedagogical Institute (est 1922). It has a regional museum.

Melitopil Institute of Agricultural Mechanization (Melitopil'skyi instytut mekhanizatsii silskoho hospodarstva). A technical school of higher education formed, in 1930, on the basis of an agricultural tekhnikum and until 1992 under the Ukrainian SSR Ministry of Agriculture. Originally known as Zavod-vuz, it was renamed the Institute of Engineers-Mechanics of Agriculture in 1936 and given its present name in 1944. It has departments of the mechanization of agriculture and electrification, graduate-level studies, a correspondence school and preparatory programs, and an experimental farm. In 1980 the institute had over 5,000 regular students and approx 2,600 correspondence students.

Melitopil kurhan. A Scythian royal burial mound from the 4th to 3rd century BC near Melitopil, Zaporizhia oblast.

Melitopil kurhan: gold combination quiver and bow-case decorated with scenes from Achilles' life

It was excavated in 1954. Archeologists uncovered two biers containing the remains of a noble Scythian couple and a slave, as well as approx 4,000 artifacts. Included among the latter were gold and silver ornaments and military gear decorated with animal (eagles, lions, wild boars) or mythological (Athena, Achilles) motifs. Eleven amphorae and a bronze kettle were also found. The collection is now housed at the Museum of Historical Treasures of Ukraine in Kiev.

Meller, Vadym, b 26 April 1884 in St Petersburg, d 4 May 1962 in Kiev. Theatrical designer and painter. While completing a law degree at Kiev University (1908) he took courses at the Kiev Art School (1903–5). In 1908–12 he studied at the Munich Academy of Arts. Then he moved to Paris, where he joined the *Société des Artistes Indépendants*, and in 1912–14 participated in the 'Free Workshops.' After returning to Kiev in 1917, he worked at easel and monumental painting, graphic design, and costume design. In 1920 Meller began working as a theatrical designer in the Shevchenko First Theater of the Ukrainian Soviet Republic; he soon became the leader of modernist constructivism in Ukrainian theater design. He achieved remarkable results in a synthesis of architecture, painting, and sculpture. He was the main stage designer in **Berezil* (1922–34), in the Kharkiv Ukrainian Drama Theater (from 1935), and in the Kiev Ukrainian Drama Theater (1953–61). At the Berezil Meller did his most interesting work in creating the designs for G. Kaiser's *Gas 1* (1923 production), an adaptation of U. Sinclair's *Jimmie Higgins* (1923), W. Shakespeare's *Macbeth* (1924), F. Crommelynck's *Tripes d'or* (1926), the revue *Hello on Wavelength 477* (1929), M. Kulish's *Myna Mazailo* (1929) and *Maklena Grassa* (1933), and I. Mykytenko's *Dyktatura* (Dictatorship, 1933). Meller's designs were singled out at the 1925 International Exposition of Decorative Arts in Paris and shown in the 1926 International Theater Exposition in New York. In the 1930s, however, he abandoned his avant-garde style and began to work in a conservative style more consistent with the tenets of socialist realism. Meller's later work included designs for O. Korniiuchuk's *Bohdan Khmel'nyts'kyi* (1939), O. Levada's *Faust and Death*, and W. Shakespeare's *King Lear*.

Vadym Meller: drawing of a costume for the production of J. Slowacki's *Mazepa* (1921) by the Shevchenko First Theater of the Ukrainian Soviet Republic (1921)

V. Revutsky

Melnikov, Leonid [Mel'nikov, Leonid], b 31 May 1906 in Degtiarovka, Briansk county, Orel gubernia, Russia. Soviet official and Party functionary. After graduating from the Donetsk Industrial Institute in 1936, he held Party posts in Staline and Karaganda. After the war he served as first secretary of the Donetsk Oblast Party Committee and then secretary (1947–9) and first secretary (1949–53) of the CC CP(B)U. After Stalin's death he was criticized for grave errors in his nationality policy, especially for his Russification of Lviv University, and demoted to the office of ambassador to Rumania. From 1955 he held a number of government appointments in Kazakhstan and, later, in Moscow.

Melnikov-Razvedenkov, Mykola [Mel'nikov], b 24 December 1866 in Ust-Medveditskaia, Don Cossack province, d 20 December 1937 in Kharkiv. Pathological anatomist; full member of the VUAN and AN URSR (now ANU) from 1927. A graduate of Moscow University (1889), he served as a professor at Kharkiv (1902–20) and Kuban (1920–2) universities and the Kuban Medical Institute (1922–5). He was director of the Ukrainian Institute of Pathological Anatomy (1925–30) and a department head at the Ukrainian Institute of Experimental Medicine (from 1930) in Kharkiv. His publications deal with anthrax, echinococcosis, periarteritis, the morphology of allergic processes, neuropathology, and the history of pathological anatomy. He proposed a method of fixing anatomical specimens (1896).

Melnychuk, Bohdan [Mel'nyčuk], b 8 December 1922 in Dauphin, Manitoba, d 17 August 1987 in Edmonton. Businessman and bookseller. After serving in the Canadian air force during the Second World War, he began to work for the Ukrainian Book Store in Edmonton. In 1961 he took over the business and developed it into one of the largest operations of its kind outside Ukraine. He was active in the Ukrainian Orthodox church and a founder of the *Ukrainian Canadian Archives and Museum of Alberta.

Melnychuk, Oleksander [Mel'nyčuk], b 12 July 1921 in Pysarivka, Balta county, Podilia gubernia. Linguist; corresponding member of the USSR Academy of Sciences since 1981 and full member of the AN URSR (now ANU) since 1985. A graduate of Kiev University (1947), he joined the staff of the ANU Institute of Linguistics in 1950 and has served as head of its division of general and Slavic linguistics (since 1961), academic secretary of the ANU Section of Literature, Language, and Art Scholarship (1971–8), and a member of the academy's presidium. He proposed an original classification of simple sentences in contemporary Ukrainian, and wrote a book on the development of Slavic sentence structure (1966) and articles on Ukrainian syntax, dialects, and toponyms. He edited the institute's collective monographs on the comparative historical study of Slavic languages (1966), the syntax of modern literary Ukrainian (1972), the historical typology of the Slavic languages (1986), the institute's Ukrainian dictionary of loanwords (1974), and its projected seven-volume Ukrainian etymological dictionary (vol 1, 1982; vol 2, 1985; vol 3, 1989).

Melnychuk, Taras [Mel'nyčuk], b 20 August 1938 in Utoropy, Kolomyia county, Galicia. Poet. He studied at the Gorky Institute of Literature in Moscow, from which he was expelled for 'political bad conduct.' In 1972–5 he was imprisoned in concentration camps in Perm oblast. He was rearrested in 1979 and sentenced to four years' imprisonment in the concentration camp in Vinnytsia. Melnychuk has written the poetry collections *Nesimo liubov planeti* (Let's Bring Love to Our Planet, 1967), *Chaha* (1971, unpublished), *Iz-za grat* (From Behind the Bars, 1982, published in the West), and *Kniaz' rosy* (Prince of Dew, 1990). His verse is terse and his metaphors of humanity and Soviet Ukraine are acerbic.

Melnychuk, Yurii [Mel'nyčuk, Jurij], b 7 May 1921 in Kamianky Mali, Kolomyia county, Galicia, d 12 August

1963 in Lviv. Communist propagandist. After the Second World War he studied at the CC CPU school and at Lviv University. After serving briefly as an editor at the Radianskyi Pysmennyk publishing house he was chief editor of the literary monthly *Zhovten'* from 1951 until his death. Melnychuk published several scurrilous attacks on Ukrainian 'bourgeois nationalists' and the Ukrainian Catholic church, including *Sluhy zhovtoho dyiavola* (Servants of the Yellow Devil, 1958), *Oblychchia bozhozho voinstva* (The Faces of God's Warriors, 1961), and *Pravdi sluzhyty* (To Serve the Truth, 1962). He also published literary biographies of Ya. Halan (1953) and O. Havryliuk (1955). Melnychuk is the subject of a 1980 biography by Y. Tsokh.

Andrii Melnyk

Melnyk, Andrii [Mel'nyk, Andriij], b 12 December 1890 in Volia Yakubova, Drohobych county, Galicia, d 1 November 1964 in Köln, Germany. Military figure and political activist. His studies at the Higher School of Agriculture in Vienna (1912–14) were interrupted by the outbreak of the First World War, when he volunteered for the Legion of the Ukrainian Sich Riflemen. A company commander, he fought in the battles of Makivka and Lysonia before being taken prisoner in September 1916 by Russian forces and interned in Tsaritsyn and other locations. In captivity Melnyk became a close confidant of Ye. *Konovalets. After escaping imprisonment toward the end of 1917, he was one of the organizers of the Galician-Bukovynian Battalion of Sich Riflemen (the original formation of the *Sich Riflemen) in Kiev and held senior positions in it (from battalion commander to second-in-command). From January 1919 he was chief of staff of the Army of the UNR. After a short period as a Polish prisoner of war, he became a military attaché for the UNR and lived in Prague and Vienna (1920–1), where he finished his forestry studies. From 1922 he lived in Galicia.

Melnyk assumed the home command of the *Ukrainian Military Organization (UVO) in Galicia in 1922, after Konovalets had left the country and set up its command center abroad. In the spring of 1924 Melnyk was arrested and sentenced to five years' imprisonment for his UVO activities. He was freed toward the end of 1928, partly as a result of the efforts of the president of the UNR Directory, A. Livytsky. He served as head of the Orly Catholic Association of Ukrainian Youth in 1933–8, was involved with the Moloda Hromada society, and maintained his underground nationalist connections and activity. After the assassination of Konovalets in 1938, Melnyk went abroad to

head the *Organization of Ukrainian Nationalists (OUN). His position was formally ratified in August 1939 at the OUN's Second Grand Assembly in Rome, but he could not retain the allegiance of the entire OUN membership. In 1940 a faction led by S. *Bandera broke from the OUN to pursue a more radical course of action. The respective groups became known as *Melnykites and *Banderites.

From 1941 Melnyk was kept under house arrest by the Germans until he was finally imprisoned in the Sachsenhausen concentration camp, in 1944. During this period Melnyk assigned the co-ordination of OUN activities on Ukrainian soil to his deputy, O. *Olzhych. Together with other leading Ukrainian activists (M. Velychkevsky, Metropolitan A. Sheptytsky, A. Livytsky, Gen M. Omelianovych-Pavlenko), Melnyk submitted a memorandum to A. Hitler in January 1942 demanding an end to German destructiveness in Ukraine. After the war he worked toward a consolidation of Ukrainian political and community life in the West. He was instrumental in the founding of the Ukrainian Co-ordinating Committee in 1946 and the *Ukrainian National Council in 1947. He proposed the idea of a world congress of Ukrainians in 1957; it was realized in 1967 with the founding of the World Congress of Free Ukrainians. Melnyk was also the author of historical articles on the Ukrainian independence struggle. From 1945 he lived in Luxembourg, where he is buried. A memorial book in his honor, edited by M. Antonovych, was published in 1966. A monograph on his life, edited by Z. Knysh, appeared in 1974, and a collection of memoirs about him appeared in 1991 in Lviv.

V. Yaniv

Melnyk, Lubomyr [Mel'nyk, Ljubomyr], b 22 December 1948 in Munich. Composer and pianist. He moved to Canada as a child and studied at the University of Manitoba (BA, 1969) and Queen's University in Kingston (MA, 1971). Melnyk is regarded as the creator of a new ('continuous') technique for playing piano based on incongruent patterns for each hand. He has composed a body of more than 90 works, mostly for piano, which include *KMH, Lund-St Petri Symphony, The Song of Galadriel, and Islands*. A number of his symphonic and chamber works are based on Ukrainian themes, including *Poslaniie* (lyrics by T. Shevchenko for soprano and chamber ensemble), *Concert-Requiem* for violin and piano (written in commemoration of the victims of the 1932-3 famine), and *A Portrait of Petlura* [sic] (for two violas and two pianos). Melnyk has concertized extensively throughout Canada and in Europe, given lecture-recitals, and recorded for national radio organizations in several countries. He is regarded as one of the fastest piano players in the world, being capable of sustaining arpeggios at over 19 notes per second on each hand. His musical approach is explained in his *Open Time: The Art of Continuous Music* (1981).

Melnyk, Mykhailo [Mel'nyk, Myxajlo], b 21 October 1903 in Sukha Volia, Liubachiv county, Galicia, d 9 October 1955 in Kiev. Church figure. After studying at the Peremyshl Seminary and obtaining his TH D at Innsbruck University, he was a professor of theology at the Peremyshl Seminary from 1932 and then vicar-general for Drohobych from 1944. One of the founders of the so-called Initiating Committee for the Reunification of the Ukrainian Catholic Church with the Russian Orthodox Church,

he was secretly ordained Orthodox bishop of Drohobych and Sambir by the Moscow patriarch Aleksei in February 1946. This initiating committee later convened the *Lviv Sobor of 1946, which disbanded the Ukrainian Catholic church in Western Ukraine.

Melnyk, Mykhailo [Mel'nyk, Myxajlo], b 1944 in Ordynsi, Pohrebyshe raion, Vinnytsia oblast, d ca 9 March 1979 in Pohreby, Brovary raion, Kiev oblast. Dissident. A graduate student at the AN URSR Institute of History, he was expelled after participating in the commemoration of T. Shevchenko at his monument in Kiev on 22 May 1971. Thereafter he was subjected to constant harassment by the KGB. He was expelled from the CPU and fired from his job as a teacher at a secondary school in 1973, after writing a letter to the authorities protesting the persecution of Ukrainian writers and intellectuals. In 1978 he established close ties with the *Ukrainian Helsinki Group. Unable to stand the persecution that ensued, he committed suicide.

Mykola Melnyk

Melnyk, Mykola [Mel'nyk], b 20 November 1875 in Dovzhanka, Ternopil county, Galicia, d 1956 in Lviv. Botanist and teacher; member of the Shevchenko Scientific Society (NTSh) from 1920. He graduated from Vienna University and then taught in Ternopil and at the Academic Gymnasium in Lviv (from 1907) and the Ukrainian Underground University. He headed the physiography section of the NTSh and edited its *Fiziografichnyi zbirnyk* (Physiographic Collection, 7 vols, 1925-39). Following the Soviet occupation of Galicia he taught botany and zoology at Lviv University and prepared secondary-school texts on mineralogy, geology, and botany.

Melnyk, Oksana [Mel'nyk], b 8 May 1932 in Kolodne, Transcarpathia. Ethnomusicologist. After graduating from Uzhhorod University (1957) she finished study at the Lviv Conservatory (1967) and completed a candidate's degree (1970). She has published a number of articles on the folk songs of Transcarpathia and a monograph, *Etnomuzykolohiia skhidnykh slovian* (The Ethnomusicology of the Eastern Slavs, 1991).

Melnyk, Oleksandr [Mel'nyk], b 9 May 1949 in Mala Ofirna, Fastiv raion, Kiev oblast. Painter. A graduate of the Kiev State Art Institute (1974), he paints large-scale canvases in a style reminiscent of Ukrainian-Byzantine art and the 1920s murals of M. Boichuk. In his triptych *We, the*

Idol Worshipers (1988) he portrays pre-Christian times as an allegory of contemporary life.

Melnyk, Serhii [Mel'nyk, Serhij], b 2 April 1898 in Odessa, d 23 July 1968 in Odessa. Viticulturist and wine maker; corresponding member of the All-Union Academy of Agricultural Sciences from 1956. A graduate of the Odessa Agricultural Institute (1920), he became a professor at the institute (1938) and then its director (1959–68). He wrote several works on the biology and agrotechnology of grape cultivation.

Melnyk, Vasyi [Mel'nyk, Vasyi'] (pseud: V. Limnychenko), b 31 December 1899 in Nebyliv, Kalush county, Galicia, d 8 March 1949 in Munich. Poet and Catholic priest. After finishing his studies in Lviv he was ordained in 1923, and served as a parish priest in Zarvanytsia and Zvenyhorod until 1944, when he emigrated to Germany. He first emerged as a poet during the early 1920s as a member of the Logos Catholic writers' group affiliated with the journal *Postup* (Lviv). He wrote a number of poetry collections, including *Klonius'* (I Bow Down, 1926) and the posthumous *Bilii Pani – Lysh ty odna potrapysh nas spasty* (To the White Lady [Mary] – You Alone Can Save Us, 1977). Melnyk's work is infused with religious themes, Ukrainian patriotism, and Boiko regionalism.

Melnyk, Yaroslav [Mel'nyk, Jaroslav] (nom de guerre: Robert), b 1917? in Kalush county, d 31 October 1944 in Stanyslaviv oblast. Senior OUN leader. He rose swiftly in the OUN leadership from raion leader (1938) to Stanyslaviv oblast leader (1942). After the reorganization of the OUN in 1945, he became OUN leader for the Carpathian region. He was one of the few recipients of the Gold Cross of Merit for extraordinary service in the UPA. To avoid capture by MVD troops, Melnyk shot himself.

Melnyk, Yurii [Mel'nyk, Juriij], b 7 August 1931 in Kiev. Geologist; corresponding member of the AN URSS (now ANU) since 1979. He graduated from Kiev University in 1954 and worked in the Institute of Geological Sciences of the ANU. He was appointed department head at the Institute of the Geochemistry and Physics of Minerals of the ANU in 1970. Melnyk has contributed to the theory of the genesis of ferrous and flint rocks and has worked out chemical-physical models of geological processes.

Melnyk, Zinowij [Mel'nyk, Zinovij], b 7 October 1928 in Yabluniv, Kolomyia county, Galicia. Economist; full member of the Ukrainian Academy of Arts and Sciences and the Shevchenko Scientific Society. A postwar refugee, he studied at the Ukrainian Technical and Husbandry Institute in Munich before emigrating to the United States, where he graduated from the University of Michigan (MBA, 1953) and Michigan State University (PHD, 1961). He worked briefly in industry and then taught industrial management at Purdue University (1961–4). He has taught finance at the University of Cincinnati since 1967. He has written several articles on Ukraine's economy and the monograph *Soviet Capital Formation: Ukraine, 1928/29–1932* (1965) and edited (with V. Bandera) *The Soviet Economy in Regional Perspective* (1973) and several collections in management and business finance.

Melnykites (Melnykivtsi). The colloquial name for those members of the *Organization of Ukrainian Nationalists who supported Col A. *Melnyk after the schism in the organization in 1940. They followed the political and ideological program of the Leadership of Ukrainian Nationalists (PUN) as established by the resolutions of the Second Grand Assembly of Ukrainian Nationalists in Rome in 1939. After Melnyk's death O. Shtul, D. Kvitkovsky, and M. Plaviuk assumed the leadership of the faction. Compared to their breakaway rivals, the *Banderites, the Melnykites adhered closely to the initial principles of the OUN and were therefore considered conservative. In 1946 they abandoned their preference for a single-party system and espoused a policy of 'national solidarity' and political pluralism. They subsequently cofounded and were active in the Ukrainian National Council. Major pro-Melnykite organizations include the *Ukrainian National Federation (UNO) in Canada, the *Organization for the Rebirth of Ukraine (ODVU) in the United States, the *Union for Agricultural Education in Brazil, the *Vidrodzhennia society in Argentina, the *Ukrainian National Alliance in France, and the *Federation of Ukrainians in Great Britain.

Melnykov, Heorhii [Mel'nykov, Heorhij], b 22 January 1904 in Chernava, Tambov gubernia, Russia, d 11 May 1973 in Dnipropetrovske. Hydrobiologist. He completed his studies at the Dnipropetrovske Institute of People's Education (1929) and taught at Dnipropetrovske University (from 1941), where he later served as rector (1956–64). He researched hydrobiological systems, zooplankton formation, and fish farm usage in the water reservoirs of southern Ukraine. He also maintained an interest in space biology.

Melnykova, Iryna [Mel'nykova], b 24 October 1918 in Mena, Sosnytsia county, Chernihiv gubernia. Soviet historian; AN URSS (now ANU) corresponding member since 1973. A graduate of Kiev University (1940), she lectured at postsecondary schools in Kazakhstan (1941–7) and worked at the Institute of Slavic Studies of the USSR Academy of Sciences in Moscow (1947–57). From 1957 to 1988 she worked at the ANU Institute of History, where from 1965 she directed the Department of the History of Socialist Countries and Ukraine's International Relations. She has written books on the class struggle in Czechoslovakia in 1924–9 (1962) and foreign participation in the Soviet cause in 1917–20 (1967), as well as articles about interwar Czechoslovakia and Transcarpathia and the communist movement there, and she has contributed to multiauthor monographs on the Ukrainian SSR and the Soviet bloc countries (1965) and Ukraine's co-operation with the European socialist countries in 1966–70 (1974).

Melon. See Muskmelon and Watermelon.

Melosky, Louis [Melovs'kyj, Lev], b 14 July 1930 in Oakburn, Manitoba. Orthodontist and community leader. After graduating from the University of Manitoba (B SC, 1955), University of Alberta (DDS, 1959), and University of Washington (MDS, 1966), he went into private practice and taught dentistry at the University of Manitoba. In 1977 he was appointed to the university's board of governors, and then served as its chairman (1980–3). He has held leading

positions in Ukrainian organizations, including the presidency of the *Ukrainian Cultural and Educational Centre, the Ukrainian Professional and Business Club of Winnipeg (1979), and the Canadian Foundation for Ukrainian Studies (1986) and the headship of the Prairie Region and Manitoba sections of the Ukrainian Community Development Committee. In 1984 he was appointed to chair the Canadian Multicultural Council.

Memoir literature (from French *mémoire* 'memory'). A body of recollections written, in a literary, publicistic, or chronicle style, simultaneously with the occurrence of events (as in diaries and notebooks) or subsequently in recollection (as in autobiographies and travelogues).

Ukrainian memoir literature can be divided into two groups, works written in Ukrainian or other languages by Ukrainians, and works written by foreigners about Ukraine. Among the oldest examples of the former group is the passage in *Povist' vremennykh lit* (The Tale of Bygone Years) by Nestor the Chronicler which concerns the transferral of the sacred remains of the founder of the Kievan Cave Monastery, St Theodosius of the Caves, entered into the chronicle in 1091. Early examples of the latter group are the autobiography of Prince Volodymyr Monomakh and a fragment of his *Pouchenie ditiam* (A Teaching for [My] Children), and a Chernihiv memoir, *Zhyt'ie i khodzheniie Danyla, rus'koi zemli ihumena* (The Life and Pilgrimage of Danylo, Abbot of Rus', ca 1100), of a pilgrimage to the Holy Land.

Memoir literature is particularly rich from the 16th and early 17th centuries. Among the most notable works to have been preserved are the autobiography of the Kievan hierodeacon Yoakym-Isaia, who sojourned in Muscovy in 1560–90; the notes of an unknown Galician of the late 16th or early 17th century concerning a pilgrimage to Jerusalem; the notes of B. Balyk-Bozhko of Kiev about his adventures during the 1612 campaign on Moscow and other events; the notes of Metropolitan P. Mohyla concerning events and meetings with various persons in the 1620s and 1630s; the memoirs of Hieromonk Ihnatii of Liubariv concerning the religious and cultural life of Galicia (*Zhyt'ie i zhizn' prepodobnogo ottsa nashoho Iova* [The Life and Times of Our Worthy Father Yov, 1621]); and the *Diiariiush* (Diary) of Hegumen A. Fylypovych of Brest concerning the struggle with the Poles over the Orthodox faith, written in 1637–48.

The Khmelnytsky era had a series of chroniclers, both Ukrainian and Polish. The most renowned among them was S. Zorka, whose *Diiariiush* S. Velychko purportedly draws on in his *Skazanie o voini kozatskoi z poliakamy* (Account of the Cossack War with the Poles), but which historians consider to be suspect. The memoirs of the Ukrainian nobleman J. Jerlicz about the events of 1620–73 mention the lost memoirs of the Jerlicz and Butovych families. Hegumen Teodosii Vaskovsky wrote about current events in Kiev of the same period. Other accounts of the late 17th century include the notes of the Lviv merchant P. Kunashchak (or Kunashovych) about the life of a burgher in 1663–96; the *Diiariiush* and *Keliini zapysky* (Notes from a Monastic Cell) of Metropolitan D. Tuptalo; the travelogues (journeys to Italy) of Hieromonk T. Kaplonovsky from the year 1697; and those of H. Skybynsky, who explored many Western European countries between 1686 and 1696.

Of the memoirs of the 18th century the more historically important are those of Cossack officers, such as the *Dnevniki* (Diaries) of Gen M. Khanenko, which cover the years 1719–21 and 1727–54; the *Diiariiush: Dnevnyia zapiski* (Diary: Daily Notes) of Ya. Markovych, covering the years 1717–67; the *Diiariiush* of Hetman P. Orlyk of the years 1720–32, which was written in Polish; and the *Dnevnik* (Diary) of Hetman P. Apostol, written in French, covering the period May 1725 to May 1727. The regimental osaul of Pryluka, M. Movchan, provides valuable descriptions of daily life and includes the register of 1727. Movchan's grandson, A. Mazaraki, continued the family chronicle for the period 1732 to 1787. Valuable information is found in the journal of the Pohar chamberlain S. Lashkevych, which covers the years 1768–82. More intimate is the autobiography of the colonel of Pryluka, H. Galagan. Also useful are the memoirs of church leaders, including the biographical notes of Bishop Y. Horlenko (1740–4); the autobiography of A. Matsiievych; the six-volume *Diarium Quotidianum* of M. Ryllo, the bishop of Kholm and Pere-myshl, which deals with religious events of 1759–1804; and the memoirs of the traveling priest I. Turchynovsky. Of the travelogues of the 18th century those of V. Hryhorovych-Barsky, of his travels through Europe, Asia, and Africa from 1723 to 1747, are among the most interesting. Daily and cultural life of the last quarter of the 18th century is described in H. Vynsky's *Moë vremia* (My Time) and in the memoirs of M. Hornovsky, V. Hettun, I. Tymkovsky, and others. Slobidska Ukraine is described by the architect V. Yaroslavsky, and Southern Ukraine appears in the memoirs of S. and O. Pyshevyeh. The 19th-century memoirs of the former Zaporozhian M. Korzh (*Ustnoe skazanie* [Oral Account]) describe the last days of the Zaporozhian Sich. Right-Bank Ukraine at that time is described in Polish memoirs, particularly those concerning the Koliivshchyna rebellion. The memoirs of the Ukrainian Freemasons M. Antonovsky and V. Lomykovsky are engaging and occasionally fantastic.

Among the many but as yet scantily published memoirs of the 19th century the *Zhurnal* (Journal) and autobiography of T. Shevchenko are particularly important. Also notable are those of M. Markevych (an unpublished diary kept in the Markevych archive in the St Petersburg Pushkin Museum), O. Martos (published in *Russkii arkhiv*, 1893, nos 7–8), A. Skalkovsky (unpublished), O. Kistiakovsky (unpublished), H. Galagan, and V. Hnylosyrov. The autobiographies of M. Kostomarov, M. Drahomanov, V. Antonovych, M. Hrushevsky (two), D. Bahalii, and other leading figures are noteworthy and interesting. Other sources include the notes of O. Mykhailovsky-Danylevsky (military historian), the memoirs of S. Skalon (daughter of V. Kapnist), the family chronicle of A. Kochubei, the notes of A. Storozhenko, M. Lazarevsky's *Pamiati moi* (My Memories), and the memoirs of Ya. Holovatsky, L. Zhemchuzhnikov, I. Sbytnev, M. Chaly, V. Debohorii-Mokriievych, B. Poznansky, K. Mykhalchuk, O. Lazarevsky, O. Barvinsky (*Spo-hady z mohu zhyt'ia* [Memories of My Life, 2 vols, 1912–13], about community and literary life in Galicia, 1860–88), Ye. Chykalenko (*Spo-hady, 1861–1907* [Memoirs, 1861–1907, 1955]), S. Rusova, O. Lototsky (*Storinky mynuloho* [Pages from the Past, 4 vols, 1932–4]), M. Slavynsky, V. Shcherbyna, M. Vasylenko (serialized in *Ukrains'kyi istoryk*), and M. Storozhenko (unpublished). An impressive number of memoirs were

published in *Kievskaia starina*, in *Ukraina*, in the collection **Za sto lit*, and elsewhere. V. Leontovych's *Khronika rodyiny Hrechok* (Chronicle of the Hrechka Family, 1932) and *Dy-tiachi i iunats'ki roky Volodi Hankevycha* (The Childhood and Youthful Years of Volodia Hankevych) are memoiristic. The memoir literature of the 19th and early 20th centuries focused on Right-Bank Ukraine.

The early 20th century and the struggles for Ukrainian statehood are reflected in the memoirs of D. Doroshenko (*Moi spomyny pro davnie-mynule, 1901-1914 roky* [My Memories of the Distant Past, 1901-14, 1949] and *Moi spomyny pro nedavnie mynule, 1914-20* [My Memories of the Recent Past, 1914-20, 1923-4, 1969]), Yu. Kollard, M. Halahan, O. Shulhyn, V. Doroshenko, V. Shcherbakivsky, M. Kovalevsky, A. Zhuk, I. Makukh, O. Stepaniv, A. Chernetsky, M. Tyshkevych, V. Ivanyts, O. Skoropys-Yol-tukhovskyy, F. Dudko, P. Bilon, P. Zaitsev (fragments), and others. For a knowledge of the community and cultural life of that time Chykalenko's *Shchodennyk* (Diary, covering 1901-17) and the diary of V. Modzalevsky (particularly of 1915-17, unpublished) are particularly important. The fate of the notes of H. Narbut's circle in Kiev (1918-20) and S. Yefremov's diary is unknown.

The memoirs of the days of national liberation form a separate group. Notable political accounts include V. Vynnychenko's *Vidrodzhennia natsii* (Rebirth of a Nation, 3 vols, 1920) and *Shchodennyk* (Diary, of which two volumes [1980, 1983], covering the years 1911 to 1925, have been published to date), I. Mazepa's *Ukraina v ohni i v buri revoliutsii* (Ukraine in the Flames and Storm of Revolution), O. Nazaruk's *Rik na Velykii Ukraini* (A Year in Central Ukraine, 1920), L. Tsehelsky's *Vid legendy do pravdy* (From Legend to Truth, 1960), V. Andriievsky's *Z mynulo-ho* (From the Past, 2 vols, 1921, 1923), M. Kovalevsky's *Pry dzherelakh borot'by* (At the Source of Struggle, 1961), D. Dontsov's *Rik 1918, Kyiv* (Year 1918, Kiev), and the memoirs of P. Skoropadsky (fragments published in *Khliborob-s'ka Ukraina*), Ye. Konovalets, M. Shapoval, O. Dotsenko, and A. Margolin. Military accounts of the period have been published in *Litopys Chervonoï kalyny, Kalendar Chervonoï kalyny, Za derzhavnist'*, and other anthologies and periodicals. The more notable ones are those of V. Petrov, V. Zelinsky, S. Shukhevych, A. Krezub (O. Dumyn), Yu. Tiutiunnyk (H. Yurtyk), V. Kedrovsky, O. Kobets (O. Varava), O. Levytsky, and N. Makhno. Of the Soviet memoirs of the early 1920s those of V. Zatonsky and O. Shlikhter are worthy of mention.

The events of the interwar period have not been well represented in memoir literature. Conditions in the Soviet Union, particularly in the 1930s, were not conducive to the keeping of such records, and those that have been published have largely been the recollections of émigrés. Soviet realities, such as the man-made famine and the terror, were depicted by S. Pidhainy in *Nedostriliani* (Those [Left] Unshot, 2 vols, 1949) and *Ukrains'ka inteligentsiia na Solovkakh* (The Ukrainian Intelligentsia on the Solovets Islands, 1947), V. Yurchenko, K. Turkalo in *Tortury* (Tortures, 1963), I. Nimchuk in *595 dnyv soviets'kym v'iaznem* (595 Days as a Soviet Prisoner, 1959), I. Shkvarka in *Proklynaiu* (I Curse), V. Dubrovsky (fragments), and others. Ukrainian life in Galicia and in the emigration were the subject of the writings of I. Herasymovych, I. Kedryn, I. Makukh, M. Ostroverkha, Ye. Onatsky, and S. Shakh. Since the Second World War the NTSh has produced a

series of Western Ukrainian regional histories that contain much memoiristic material. The experiences of Ukrainians in the Bereza Kartuzka concentration camp were outlined in the memoirs of V. Makar and I. Nahaievsky, among others. Z. Knysh has described the activities of the Ukrainian Military Organization and the Organization of Ukrainian Nationalists (OUN) in Western Ukraine.

K. Pankivsky provides an account of the political situation in Ukraine during the Second World War in *Vid derzhavy do komitetu* (From a State to a Committee, 1957), as do the memoirs of V. Kubijovyč, V. Martynets, Dubrovsky, Knysh, and many others. The life of Ukrainians in the Soviet Army is described by D. Chub and M. Serhienko. The struggle of the OUN and the UPA is depicted in the accounts of Z. Matla, L. Shankovsky, S. Khrin, and many others, most of which were published in periodicals, such as *Do zbroi*. The history of the Division Galizien of the Ukrainian National Army is the subject of the memoirs of P. Shandruk, Ye. Zahachevsky, and Yu. Krokhamliuk, most of which were published in *Visti kombatan-ta*. The role of North American Ukrainians in helping the displaced persons is presented in the memoirs of B. Panchuk and S. Frolick. The experiences of concentration camp survivors have been described by M. Bazhansky (*Mozaika koadriv v'iaznychnykh* [A Mosaic of Prison Quarters, 1946], O. Dansky (*Khochu zhyty* [I Want to Live]), P. Mirchuk (*V nimets'kykh mlynakh smerty* [In the German Mills of Death, 1957; published in English translation, 1976]), and others. Memoirs of life in Soviet prisons and camps include A. Kniazhynsky's *Na dni SSSR* (At the Bottom of the USSR, 1959), U. Liubovych's *Rozkazhu Vam pro Kazakhstan* (Let Me Tell You about Kazakhstan, 1969), and D. Shumuk's reminiscences. Numerous memoirs of Soviet partisan warfare have been published, such as those of P. Vershyhora and S. Kovpak.

Accounts depicting the 1920s and 1930s include I. Maistrenko's memoirs (1985), O. Semenenko's *Kharkiv, Kharkiv* (1976), Y. Hirniak's *Spohady* (Memoirs, 1982), I. Koshelivets's *Rozmovy v dorozhi do sebe* (Conversations on the Way to Myself, 1985), and H. Kostyuk's *Zustrichi i proshchannia* (Meetings and Partings, 1987). Descriptions of the interwar years include D. Shumuk's *Perezhyte iperedumane* (My Life and Thoughts in Retrospect, 1983; English trans: Life Sentence, 1984). The postwar years are described in L. Pliushch's *V karnavali istorii* (At the Carnival of History, 1977; published in English translation as *History's Carnival*).

For Ukrainian cultural history the memoirs of and about writers and artists serve as important documents. Some have been collected in anthologies, such as *Spohady pro Shevchenka* (Memories of Shevchenko, 1958), *Ivan Franko v spohadakh suchasnykh* (Ivan Franko in the Memoirs of His Contemporaries, 1956), and *Spohady pro Lesiu Ukrainku* (Memories of Lesia Ukrainka, 1963). Franko is discussed in individual accounts by S. Baran, T. Franko, and others. The more important literary memoirs include U. Kravchenko's *Spohady uchitel'ky* (Memoirs of a Teacher, 1935); P. Karmansky's *Ukrains'ka bohema* (Ukrainian Bohemians, 1935); B. Lepky's *Kazka moho zhyttia* (The Tale of My Life, 1936-41); M. Drai-Khmara's *Bezsmertni* (The Immortals, 1963); the memoirs of O. Vyshnia (fragments published); the diaries, notebooks, and autobiographical fiction (*Zacharovana Desna* [The Enchanted Desna]) of O. Dovzhenko; A. Liubchenko's diary; the memoirs of H.

Zhurba about literary life in Kiev during the civil war and the revolution; and V. Sokil's *Zdaleka do blyz'koho* (From Far Away to Close at Hand, 1987). Other works of autobiographical fiction include M. Rylsky's poem *Mandriuka v molodist'* (A Journey into Youth, 1943) and Zhurba's novelle *Dalekyi svit* (A Distant World, 1955). After a long interval caused by Soviet repressions the following memoirs were published: M. Rudnytsky's *Pys'mennyky zblyz'ka* (Writers at Close Range, 3 vols, 1958–64), Yu. Martych's *Iskry zhyvoho vohniu* (Sparks of Living Fire, 1959), H. Hryhoriev's *U staromu Kyievi* (In Old Kiev, 1961), Ye. Krotevych's *Kyivs'ki zustrichi* (Kievan Encounters, 1965), and those of Rylsky, V. Mynko, P. Kovalenko, and L. Bilotserkivsky. Particularly valuable are Yu. Smolych's accounts of the 1920s and 1930s, *Rospovid' pro nespokii* (A Tale of Unrest, 1968), *Rospovid' pro nespokii tryvaie* (The Tale of Unrest Continues, 1969), and *Rospovidi pro nespokii nemaie kintsia* (The Tale of Unrest Has No End, 1970).

Toward the end of the 1980s, memoirs of the years of Stalinist terror began to be published in Kiev. They include V. Sosiura's *Tretia rota* (The Third Platoon, 1988) and I. Ivanov's *Kolyma 1937–1939* (1988).

Among artists' and musical memoirs of the 19th and 20th centuries are M. Bashkirtseva's *Journal de Marie Bashkirtseff* (1887), O. Hryshchenko's *L'Ukraine de mes jours bleus* (1957; translated into Ukrainian in 1959), *Spohadamy* (Recalled by Memories, 2 vols, 1947–8, about Yu. Narbut), O. Koshyts's *Spohady* (2 vols, 1947–8) and *Z pisneiu cherez svit* (Across the World with a Song, 1952), and O. Lysenko's *Pro bat'ka Mykolu Lysenka* (About My Father, Mykola Lysenko, 1957).

Ukrainian theater memoirs include those of M. Kropyvnytsky, M. Sadovsky (*Moi teatral'ni zhadky* [My Theatrical Recollections, 1930; 2nd edn 1956]), P. Saksahansky (*Po shliakhu zhyttia* [On the Path of Life, 1935]), S. Tobilevych (*Moi stezhky i zustrichi* [My Paths and Encounters, 1957]), I. Marianenko (*Mynule ukrains'koho teatru* [The Past of the Ukrainian Theater, 1953]), M. Donets (*Teatral'ni spohady* [Theatrical Memoirs]), and the many accounts about L. Kurbas written by Hirniak, V. Revutsky, and others.

Memoir literature on émigré life includes the works of Karmansky (*Mizh ridnymy v Pivdennii Amerytsi* [Among Relatives in South America, 1923]), O. Prystai (*Z Truskavtsia u svit khmaroderiv* [From Truskavets to the World of Skyscrapers, 4 vols, 1933–5]), P. Stasiuk, A. Romaniuk, O. Bryk, I. Humeniuk, and S. Parfanovych. Memoirs about Ukrainian community life in North America have been written by numerous people, including V. Chumer, A. Hlynka, M. Luchkovich, M. Surmach, and P. Zvarych.

A large section of important memoir literature consists of foreign impressions of Ukraine. The more important ones, dating from the 16th and 17th centuries, were described by Antonovych in *Memuary, otnosiashchiesia k istorii Iuzhnoi Rusi* (Memoirs Pertaining to the History of Southern Rus') and in the surveys of F. Adelung, S.R. Mintsov, V. Kordt, D. Doroshenko, E. Borschak, and V. Sichynsky.

Memorial. A Ukrainian historical and public-education society established in Kiev on 4 March 1989. It is dedicated to combating neo-Stalinism and promoting democracy and human rights in Ukraine. The society initially functioned according to the statute and program of the USSR Memorial society, whose honorary president was A. Sakharov and on whose executive L. Taniuk was the Ukrainian representative. Memorial has spearheaded research and publications on Soviet terror, political repression, and the man-made famine of 1932–3; commemorated the victims of Stalinism; and aided former political prisoners and their families. The society has both collective (associations, enterprises, etc) and individual members. Its Co-ordinating Council is composed of representatives of branches throughout Ukraine. The society was initially collectively headed by the writers O. Deko and V. Maniak, the writer and theater director Taniuk, the screenplay writer V. Kuznetsov, the student V. Tsybaliuk, from Odessa, and the former political prisoners I. Dobroshtan, from Dnipropetrovske, and I. Riznychenko, from Kiev. It is funded by Ukraine's creative workers' unions, the Ukrainian Culture Fund, the ANU Institutes of Literature and History, and the journals *Filosofs'ka i sotsiologichna dumka* and *Pam'iatky Ukrainy*. The biggest branches of Memorial are in Lviv, Ternopil, Dnipropetrovske, Donetsk, Kharkiv, Lutske, Odessa, and Rivne. In July 1989 the North American Society for the Advancement of Ukrainian Memorial was formed in Washington.

L. Taniuk

Memorial museums. In Soviet Ukraine many *museums dedicated to the lives and contributions of prominent figures were created, usually in buildings where the persons so honored had lived or worked. Besides over 25 state-funded *literary memorial museums dedicated to prominent Ukrainian writers, other state-funded museums were established to commemorate (1) scholars and scientists, such as the Danylo Zabolotny Museum in Zabolotne, Kryzhopil raion, Vinnytsia oblast (est 1929), the Nikolai Pirogov Museum in Pyrohove, near Vinnytsia (est 1947), the Anton Makarenko Museum in Kremenchuk (est 1951), the Mykola Kybalchych Museum in Korop, Chernihiv oblast (est 1959), the Dmytro Yavornytsky Museum in Dnipropetrovske (est 1964), the Volodymyr Hnatiuk Museum in Velesniv, Monastyrська raion, Ternopil oblast (est 1969), the Serhii Korolov Museum in Zhytomyr (est 1970), the Volodymyr Zabolotny Museum in Pereiaslav-Khmelnytskyi, Kiev oblast, the Hryhorii Skovoroda museums in Skovorodynivka, Zolochiv raion, Kharkiv oblast, Chornukhy, Poltava oblast, and Pereiaslav-Khmelnytskyi, and the Vasyl Sukhomlynsky Museum in Pavlysh, Onufriivka raion, Kirovohrad oblast; (2) artists, such as the Hryhorii Svitlytsky Museum in Kiev (est 1958, supervised by the Museum of Kiev's History), the Iliia Repin Museum in Chuhuiv, Kharkiv oblast (est 1969), the Olena Kulchytska Museum in Lviv (est 1971), the Oleksa Novakivsky Museum in Lviv (est 1972), and the Ivan Trush Museum in Lviv; (3) composers, such as the Viktor Kosenko Museum in Kiev (est 1964) and the Mykola Lysenko Museum in Kiev (est 1980); (4) actors and performers, such as the Panas Saksahansky Museum in Kamiano-Kostuvate, Bratske raion, Mykolaiv oblast, and the Solomiia Krushelnytska Museum in Bila, Ternopil raion (est 1963) and the Les Kurbas Museum in Staryi Skalat, Ternopil

oblast (est 1988); (5) a pioneering Ukrainian printer, the Ivan Fedorov Museum in Lviv (est 1977); (6) Communist party figures, such as the Vladimir Lenin museums in Kiev (est 1938) and Lviv (est 1950), the Kliment Voroshilov Museum in Lysychanske, Luhanske oblast, the Oleksandr Tsiurupa Museum in Tsiurupynske, Kher-son oblast, the Maurice Thorez Museum in Torez, Do-netske oblast (est 1965), the Ulianov Family Museum in Kiev (est 1977), and the Andrei Zhdanov Museum in Mariupil (named Zhdanov from 1948 to 1989), Donetsk oblast; and (7) Soviet military figures, such as the Mykola Shchors Museum in Shchors, Chernihiv oblast (est 1943), the Mykola Kuznetsov Museum in Rivne, and the Mykhailo Kyrponos Museum in Vertiivka, Nizhen raion, Chernihiv oblast. The Kosyi Kaponir Museum (est 1971 on the grounds of a former tsarist prison) and the Hall No. 19 Memorial Complex of the History of the 1941–5 Great Patriotic War (est 1981) were established as branches of the *Historical Museum of the Ukrainian SSR in Kiev. A few museums were dedicated to prominent Russian cultural figures who were active in Ukraine, such as the Anton Chekhov Museum in Yalta (est 1904); the Vladimir *Koro-lenko museums in Poltava (est 1928) and Zhytomyr (est 1973); the Alexandr Pushkin and Peter Tchaikovsky Mu-seum in Kamianka, Cherkasy oblast (est 1937), containing a permanent exhibition dedicated to the Decembrists in Ukraine; and the Maksimilian Voloshin Museum in Pla-nerske, Crimea oblast. The Sholom Aleichem Museum in Pereiaslav-Khmelnyskyi was established in 1978. Hun-dreds of publicly funded 'people's museums' in Ukraine also had memorial rooms dedicated to cultural and Party figures and Soviet partisans.

R. Senkus

Mena. II-13. A town (1990 pop 13,300) on the Mena River and a raion center in Chernihiv oblast. It is mentioned in historical documents as early as 1066. In the 11th to 13th centuries it was an important trade center protected by a large fortress. In the 17th century it was a large fortified town. During B. Khmelnytsky's rule Mena was a com-pany center in Chernihiv regiment. In 1659 Hetman I. Vy-hovsky fought several battles against the Russian army near the town. Before the close of the century Mena re-ceived the rights of *Magdeburg law. In spite of its small size, in 1966 it attained city status. Most of Mena's enter-prises belong to the food industry. It has a regional muse-um and a zoological park. Archeologists have found several settlements from the Bronze Age, the Yukhnove culture, and the early Slavic period (8th–10th century) in the vicinity.

Menaion (Ukrainian: *minei*, from the Greek for 'moon'). The name for several *liturgical books used in the Ortho-dox and Eastern Catholic churches. They contain the ser-vices with special prayers and chants for the fixed *church holidays. The most comprehensive edition, the Monthly Menaion, consists of 12 volumes containing the services for each month. A smaller edition, the General Menaion, includes services honoring particular groups of saints (such as apostles and martyrs) and for particular holidays. The Abridged Menaion, which contains only services for the major holidays, is known as the Menaion of Holy Days. In Ukraine a special type of menaion, the *chet'* menaion or menaion for daily reading, gained great pop-

ularity. It contained the lives of saints, organized by the calendar, and was used extensively in the education of Or-thodox monks and clergy and for popular reading. The most famous was that written by Metropolitan D. *Tupta-lo in 1689–1705.

Menaion for Daily Reading of 1489 (Mineia chetiia). A collection of the lives of saints in a calendar order, with added sermons of St John Chrysostom, copied by two Ru-thenian scribes at Kamianets, near Berestia, in 1489 and soon thereafter from a Ukrainian model. It is an important example in the history of the Ukrainian language of how Church Slavonic evolved toward the Ruthenian vernacu-lar.

Menchyts, Volodymyr [Menčyc'], b 1837 in Vcho-raishe, Skvyra county, Kiev gubernia, d 1916 in Kiev. Civic activist and ethnographer. A student at the Kiev Theological Academy, he was active in the St Petersburg hromada (1860s) and later established bookstores in Kher-son, Mykolaiv, and Yelysavethrad. During his life he was an enthusiastic collector of folklore and ethnographic data. Some of his materials were published by M. Draho-manov in *Maloruskie narodnye predaniia i rasskazy* (Little Russian Folk Legends and Tales, 1876), but most remain in manuscript at the Central Scientific Library of the Acade-my of Sciences of Ukraine.

A Mennonite village on the Dnieper River that was later submerged after the construction of the dam of the Dnieper Hydroelectric Station

Mennonites. A religious-cultural group whose adher-ents represented a large portion of the settlers colonizing the southern Ukrainian steppe in the late 18th to early 19th century. Founded in the 16th century by Menno Simons as an outgrowth of the Anabaptists, the group was notable for certain social practices, particularly its refusal to swear oaths and its rejection of military service. Until the late 18th century the major concentrations of Mennonites were found in tightly knit rural agrarian communities in south-ern Germany, the Vistula River basin in Poland, and the Netherlands. The prospect of increased religious persecu-tion in Germany and Poland led the Mennonites to con-sider the possibilities of settling in the recently opened lands of *southern Ukraine. This prospect was made espe-cially attractive by Catherine II's decree of 1763–4 that guaranteed generous financial incentives, religious free-dom, and exemption from military service for foreign set-tlers in the area. In 1789 the first group of Mennonites in Ukraine settled near the former Cossack stronghold of

Khortytsia, in Katerynoslav gubernia. Subsequent Mennonite settlers established a second colony southeast of Khortytsia near the Molochna River. By 1835 there were approx 1,600 Mennonite families located in 72 colonies in Katerynoslav and Tavriia gubernias. By 1911 there were 104,000 Mennonites in Southern Ukraine, constituting 19.2 percent of the German population in that region. As well, a small number of Mennonite colonies were formed in Samara gubernia and Caucasia.

The Mennonites prospered in Ukraine. They acquired significant landholdings and worked them as model farmers. They also developed extensive milling interests in southern Ukraine as well as the manufacture of agricultural machinery. The Mennonites were not assimilated into Ukrainian society because of both their conscious attempts to maintain a cohesive society of their own and the desire of tsarist authorities to keep them isolated from other social groups. Their most extensive interaction with Ukrainians was as employers of farm laborers. In general Ukrainians regarded the Mennonites as being fair in their business dealings, and they benefited indirectly from the agricultural techniques learned from them.

The Mennonites' political fortunes took a turn for the worse during the 1870s, in part as a result of the souring of relations between the Russian Empire and Germany. In 1871 the codex under which they had colonized Ukraine was revoked. The Mennonites lost their administrative autonomy, were required to use Russian as the language of instruction in schools, and (from 1874) were expected to perform noncombatant military duty. A large portion of the Mennonite population of Ukraine then emigrated to North America; those from the Khortytsia region generally favored Canada, and those from the Molochna valley, the United States. Others moved to more remote regions of the Russian Empire. Mennonites, as other minorities, suffered greatly during the revolutionary upheavals of 1917–20. The major tribulations of the Mennonites, however, occurred after the establishment of the Soviet regime, which took over control of education and closed down Mennonite churches, the basis of their community life. A concerted effort by worldwide Mennonites allowed some of their coreligionists to emigrate from the Soviet Union in the 1920s, most notably a group of nearly 20,000 who settled in western Canada. The Mennonites suffered further losses during the Soviet collectivization campaign (when many were deported to Siberia as kulaks), the great man-made famine of 1932–3, and the Stalinist terror (when many of their religious leaders were imprisoned). The final blow to the community in Ukraine came during the Second World War, when Mennonites were evacuated eastward in 1941 before advancing German troops, and westward in 1943 before the advancing Soviet army. The Mennonite colonies in Ukraine were effectively dismembered in the process and never reconstituted. Some of the Mennonite refugees who found themselves in Germany after the war were resettled in North and South America. The majority, however, were repatriated and either imprisoned or resettled in Western Siberia and Central Asia. Those who survived were released in the mid-1950s but denied permission to return to Ukraine. Most Mennonites had emigrated from the Soviet Union by 1985.

Mensheviks. The moderate wing of the *Russian Social Democratic Workers' party (RSDRP), which first emerged at the party's second congress in London in August 1903. The Mensheviks, who emphasized historical gradualism, legal methods of struggle, and a broadly based party, were closer in outlook than the rest of the RSDRP to the European social democratic parties. Adhering to Marxist theory, they recognized the necessity for a bourgeois revolution in Russia and were willing to co-operate with liberal forces to promote such a revolution as a precondition for the proletarian revolution. Although the Mensheviks played an important role in the St Petersburg Soviet during the 1905 Revolution, their position in 1917 was confused. Their alliance with the Constitutional Democrats (until September 1917) in the Russian Provisional Government and their vacillation on the issue of Russia's participation in the First World War undercut their authority.

The Mensheviks had little appreciation of the nationality problem in the Russian Empire. In Ukraine they were urban-oriented, and most of them were Jewish (often from the Jewish Social Democratic Bund) or Russian. They had little or no contact with the Ukrainian peasantry or the Ukrainian intelligentsia. The Ukrainian language was not used in their party activities or their publications. The few Ukrainian Mensheviks included K. Kononenko and D. Chyzhevsky. Led by M. Balabanov, Mensheviks participated in the Central Rada in 1917 and supported demands for Ukrainian autonomy, but not independence, as expressed in the Rada's Third and Fourth universals. The Mensheviks favored the restoration of a unified Russian state. When the Bolsheviks came to power, the Menshevik position became untenable: in advocating reunification with Russia they were strengthening their opponents' regime. By November 1917 the Mensheviks in Ukraine could obtain only 1.3 percent of the popular vote in the Constituent Assembly elections.

Menshikov, Aleksandr, b 16 November 1673 in Moscow, d 23 November 1729 in Berezovo, Tobolsk gubernia, Russia. Russian military figure. After humble beginnings in Moscow he became one of the most powerful men in the Russian Empire and a personal favorite of Peter I. In 1708 he was put in charge of co-ordinating military operations in Ukraine with Hetman I. *Mazepa against Charles XII. When Mazepa's alliance with the Swedish king became known, Menshikov razed his stronghold at Baturyn (massacring almost all of its 6,000 men, women, and children) and then instituted a reign of terror in order to dis-

suaide the population from siding with the hetman. At the Battle of *Poltava in May 1709, he commanded a wing of the Russian army.

For his services and loyalty Menshikov was awarded huge tracts of land in Ukraine, as well as positions of power and privilege, including the governorship of St Petersburg province. He used those to amass a large fortune, particularly in Ukraine, where he illegally annexed lands, enserfed Cossacks, and built up his own exploitative economic infrastructure. Whereas in 1704 he had controlled 1,300 serfs, the number surged to 28,000 in 1709 and to over 55,000 in 1725. Menshikov was investigated several times for corruption, and in 1723–4 he was accused of concealing 30,000 serfs who had either hid from military service or fled from their landowners on Mazepa's former estate at Baturyn. After Peter's death in 1725, Menshikov maneuvered his widow onto the throne as Catherine I. Not only did he persuade the empress to drop all investigations against him, he received additional grants of land in Ukraine.

Menshikov changed his long-standing opposition to Ukrainian autonomy when the president of the Little Russian Collegium, S. Veliaminov, implemented a program of increased taxation in Ukraine that included Russian landowners. He suddenly became critical of the collegium and defensive of Ukrainian autonomy, and he used his influence to dismantle the imperial administrative body and to see through the election of a new hetman, D. Apostol.

Menshikov fell from power after the death of Catherine I in 1727 and the ascension of Peter II. In 1728 he was exiled with his family to Siberia, where he died.

Menshov, Dmytro [Men'shov], b 1855 in Slobidska Ukraine, d 1917. General officer and military historian. During the First World War he rose to lieutenant general in the Russian army and was deputy chief of artillery supply for the southwestern front. He joined the UNR Army in 1917 and served as chief of artillery. His articles on Ukraine's military history and the history of Kiev, particularly its fortifications, have appeared in the leading Russian historical journals.

Modest Menzinsky

Menzinsky, Modest [Mencins'kyj] (Mentsinsky, Mentzinsky), b 29 April 1875 in Novosilky, Galicia, d 11 December 1935 in Stockholm. Opera and concert singer (heroic tenor). He studied at the Lviv Conservatory under W. Wysocki and at the Frankfurt Conservatory under J. Stockhausen (1899–1903). He sang first tenor at the Stockholm Royal Opera (1904–10) and the Cologne Opera (1910–26) and toured widely in Western Ukraine, Austria,

Germany, Holland, Belgium, and England. A distinguished and versatile artist, Menzinsky performed leading roles in operas of varying style, from W. Mozart to G. Verdi, G. Bizet, and R. Wagner. He performed leading parts in the world premieres of F. Schreker's modern operas *Die Gezeichneten* (Frankfurt, 1918), *Der Schatzgräber* (Frankfurt, 1920), and *Irrelohe* (Cologne, 1924). He was also noted for his performances of lieder, including M. Lysenko's art songs and songs to texts by T. Shevchenko, and arrangements of Ukrainian folk songs by D. Sichynsky, S. Liudkevych, M. Verbytsky, Ya. Yaroslavenko, and A. Jedlicka. Menzinsky was the first to introduce this Ukrainian repertoire to the West, in recitals and numerous recordings for the Gramophone recording company.

MEOM. A Ukrainian acronym for *mala elektronna obchysliuvaiyna mashyna* 'small electronic computing machine.' The MEOM was the first electronic digital computer built in the USSR and anywhere outside the United States. It was designed and constructed in 1950 at the *Institute of Electrodynamics of the AN URSS (now ANU), under the directorship of S. *Lebedev. This general-purpose machine, though small in capacity, incorporated numerous advanced concepts which laid the foundations for many future developments in digital computers in the USSR.

Mercenary regiments (*kompaniiski polky, kompaniitsi*). In the Hetman state free men, including non-Ukrainians, were employed as mercenaries by the hetmans and regimental colonels to serve as their personal guard and to perform various policing duties. Peasants and town Cossacks were excluded from their ranks. Hetman B. Khmelnytsky personally commanded three mercenary cavalry regiments. The 1672 *Konotop Articles abolished such regiments, but in 1687 they were reinstated by Hetman I. Mazepa, who hired two cavalry (*kompaniitsi*) and four infantry regiments (see *Serdiuk regiments), each with approx 500 to 600 men. He placed them under his own direct command and used them to defend his person and his residence, to quell popular unrest, to prevent peasants from fleeing to Zaporizhia and Slobidska Ukraine, and to maintain security on the southern and western borders. The *kompaniitsi* wore distinctive green-and-red coats, tight trousers, low boots, and round hats. They were commanded by colonels appointed by the hetman and later by the Russian tsar. Unlike regular Cossack regiments, the *kompaniitsi* were transferred from place to place, according to need, and local inhabitants were obliged to quarter, feed, and supply them; they were known for their abuses and looting. In 1708 Mazepa had four regiments of *kompaniitsi*. In 1728 the Russian government limited their number to two regiments of 600 men each, and in 1776 it transformed them into the Kiev, Chernihiv, and Novhorod-Siverskyi regular light-cavalry regiments.

Merchants. A social class in precapitalist societies, involved in *trade. Under conditions of modern capitalism merchants are part of the capitalist or entrepreneurial classes.

Ukraine's merchant class first appeared in Kievan Rus',

where domestic trade played an important part in economic life. Merchants sold arms, jewelry, and other items of artisan production made in Kiev, Novgorod, and Chernihiv to all parts of the realm. The southern regions of Kievan Rus' supplied the northern parts with grain. Salt mined in Galicia was also a significant commodity of trade in the period. *Fairs, which existed in most of the larger towns of Kievan Rus', played an important role in the development of trade. Kiev was the most important center of trade, with (according to eyewitness accounts) eight fairs at the beginning of the 11th century. Rus' was also active in foreign trade with Byzantium, Central Europe, Central Asia, and the Far East. Merchants from Armenia, Poland, Moravia and Bohemia, Germany, Italy, France, and Arab lands established a presence in Kiev, and some settled there permanently. In the early 11th century Kiev had colonies of Venetian, German, and Far Eastern merchants.

Until the mid-11th century the Kievan princes and their retainers dominated foreign trade and often combined trade activity with plunder. From the second half of the 11th century, as Kievan society became more developed, professional merchants emerged whose services the princes would use. The largest contingent of merchants in Kievan Rus' in the period, however, consisted of townsmen involved in trade, primarily for the domestic market. Merchants, together with the nobility, dominated Rus' towns. Merchants were often unpopular with urban dwellers since they used their monopoly control of certain commodities to increase prices. In 1113, for example, Kiev's population revolted against the merchants to protest their unfair trade practices.

The Tatar-Mongol invasions in the mid-13th century dealt a serious blow to trade and to the development of Ukraine's merchant class. For a period of time most trade with the East ceased. The subsequent incursion of Ottoman forces and of the Crimean Tatars in the 14th and 15th centuries also served to limit trade. In the 15th and 16th centuries, under Lithuanian and Polish rule, the further development of distinctive social groups and the growth of the urban population (which expanded the domestic market) promoted the development of Ukraine's merchant class. The fact that Ukrainian towns served as intermediaries in trade between Western Europe and the East was also of great significance for the growth of the country's merchant class. Under Polish rule, however, Orthodox (Ukrainian) merchants were the objects of discriminatory policies that strengthened the position of Polish and German merchants in Ukrainian towns. Ukrainian merchants remained a significant force in Western Ukrainian towns, where they were closely interrelated with the region's nobility. The rise of the Cossacks as a social force in the early 16th century served to strengthen the Ukrainian merchant class since many Cossacks were involved in trade.

The last decades of the 17th and first decades of the 18th century were characterized by a large and intensive expansion of trade and Ukrainian merchant prosperity in Left-Bank Ukraine under the Hetmanate, an expansion owing to a number of factors. First, Western Europe had been starved of Ukrainian raw materials because of the disruption of commercial relations during the period of the *Ruina and was eager to resume trade. The Ukrainian market, hitherto denied access to Western European man-

ufactured goods for similar reasons, showed a high demand for imports. Second, because Russian merchants had not been granted a privileged position, Ukrainian merchants were the most active participants in the burgeoning trade with Western Europe. Finally, the development of a money economy, the accumulation of merchant capital, and the increase in the size of landholdings in Left-Bank Ukraine contributed to a growth in production which necessitated the search for new Western markets. Trade involved a significant portion of the population, as is indicated by the fact that approximately 46 percent of the Left-Bank population, that is, roughly 450,000 people, lived in towns. Almost one-third of the urban population was engaged in commerce, approx 10 percent as merchants. Initially the Cossacks, particularly the *starshyna*, were the most important merchants, but as trade developed, merchants arose from among the burghers of Ukrainian towns to play a dominant role.

Because Ukrainian trade was relatively lucrative, it came to the attention of Russian officials, especially when Russian state finances reached a state of crisis as a consequence of Peter I's reforms and wars. Although the tsar attempted to interfere with Ukrainian commerce before the Battle of *Poltava (1709), his efforts were largely unsuccessful because of the Hetmanate's autonomy. After the defeat of Hetman I. Mazepa at Poltava Ukraine's trade and its merchants came under the control of the Russian state and of a few Russian merchant houses which had a privileged relationship to that state. Ukrainian trade routes were ordered redirected to Russian ports; trade in a wide range of commodities was disallowed; and high export duties and new taxes were imposed. Russian commercial institutions and practices were extended into the territory of the Hetmanate, notably the Russian treasury's monopoly of trade in a series of goods and commodities, and the *gosti* ('guests') – privileged Russian merchants who acted as the state's agents in collecting state revenues (customs duties and excises), and through whom the treasury traded in prohibited goods. Those measures sounded the death knell for Ukrainian merchants. The number of merchant bankruptcies increased dramatically in the 1710s and 1720s. Equally fatal for Ukrainian merchants were the bans on imports imposed by Russia.

The new conditions resulted in a penetration of the Ukrainian market by Russians. To avoid paying double duties Ukrainian merchants started hiring Russians to transport their goods and also engaged Russian partners. Since Russian traders were not subjected to the same tax burdens and duties as Ukrainians, many Russian merchants migrated to Ukraine and started competing directly with the local population. Although Ukrainian merchants and hetmans protested against those conditions, they were unable to stop them or their consequences. By the end of the 18th century Russian merchants had conquered the Hetmanate. They also dominated the growing merchant class in Southern Ukraine. The 1832 census showed that of the 32,000 merchants who belonged to the merchants' guild, 22.2 percent were Ukrainians, 52.6 percent were Russians, and 20.9 percent were Jews. There were no Ukrainians in the upper or first guild (involved in foreign trade), only 15 percent in the second, and 26 percent in the third. The third guild largely operated locally, an indication of the thoroughness with which the internal Ukrainian market had been conquered.

In Right-Bank Ukraine, under Polish rule until the end of the 18th century, Ukrainian merchants suffered rapid decline because of Polish policies. The abolition of Cossackdom permanently undermined the juridical and economic position of an important sector of Ukraine's merchant group. The old feudal order was reimposed in Right-Bank Ukraine by Polish nobles, who began to take private ownership of towns and direct control of the most lucrative branches of trade. Discrimination against Orthodox Ukrainian townsmen further undermined the indigenous merchant class. Ukrainian merchants went bankrupt, some escaped to the Left Bank, Moldavia, or the Zaporozhian Sich, and many slipped back into the peasantry.

In Russian-ruled Ukraine merchants were formed into a separate estate and granted their own guild structure by tsarist decrees of 1775 and 1785. The 1897 general population census noted 30,456 members of the merchant estate in Ukraine, of whom only 11.7 percent were Ukrainians. Jews and Russians formed the majority among the merchants. After the abolition of serfdom in 1861 and with the growth of industry, some merchants transformed themselves into manufacturers and became part of the capitalist class. The economic backwardness of the Russian Empire was such, however, that merchant capital never played the leading role in industrialization there that it did in Western Europe. At the beginning of the 20th century merchants continued to dominate foreign trade, but their role in internal trade declined. In 1917, merchant guilds and estates were abolished.

In Western Ukraine under Austrian rule, Ukrainians played an insignificant role in the merchant class. That class was dominated by Jews, Poles, Germans, Hungarians, and Rumanians. In the 1920s and 1930s in Western Ukraine under Polish rule, there developed a small Ukrainian merchant class which had to face many discriminatory economic policies.

Mercury (Ukrainian: *rtut'* or *zhyve sriblo* 'live silver'). A chemical element and liquid metal. Mercury forms alloys with most metals. The *Mykytivka mercury deposit in Ukraine was one of the largest mercury sources in the USSR. Some mercury deposits in Transcarpathia have been exploited since the Second World War, and a processing facility was constructed there in 1971. Before the war Ukraine's mercury reserves were estimated at 4.3 million t, or about 8 percent of total world reserves. Recent statistics on reserves and production are not available, since mercury is considered to be a strategic resource.

Mercury has been known for millennia, and its unique properties as a liquid metal made it the subject of many popular beliefs. In the Carpathian foothills peasants believed that mercury poured into an unsuccessful well hole would produce a water supply. Hutsuls believed that mercury poured into a river would cause rain and end a

drought. Hutsul girls wore amulets of nutshells filled with mercury to prevent pregnancy. In the Nadvirna region peasants cut the tips off cows' horns and filled the cavity with mercury to protect the cows from sorcery.

Merefa. IV-17. A city (1990 pop 28,900) on the Merefa River in Kharkiv raion, Kharkiv oblast. It was founded in the 17th century as a Cossack settlement and was a company center in Kharkiv regiment and the probable birthplace of the Zaporozhian otaman I. *Sirko. Merefa played an important role in a popular uprising in 1670. In the early 18th century it was destroyed by the Crimean Tatars a number of times. Merefa attained city status in 1938. It is a railway junction and has several railway-related enterprises. It is the home of the Ukrainian Scientific Research Institute of Vegetable and Melon Cultivation. Archeologists have discovered several settlements from the Neolithic Period and the Bronze Age, a Scythian settlement (5th–3rd century BC), and a settlement of the *Saltiv culture (8th–9th century AD).

Meretyn, Bernard (Merderer, Merettini, Meretynych), b late 17th century, d 1758 in Lviv. Galician architect of German origin. His projects include *St George's Cathedral in Lviv (1745–70), the town hall in Buchach (1751), and a number of Polish churches. His buildings are in the rococo style, with some transitional classicist features and traditional Ukrainian adaptations. They are distinguished by their grace and elegance, attention to detail, and use of sculpture.

Mérimée, Prosper, b 28 September 1803 in Paris, d 23 September 1870 in Cannes, France. French writer, historian, and archeologist. Through the works of N. Gogol and a correspondence with I. Turgenev and S. Sobolevsky he became acquainted with Ukrainian history and developed a fascination with the Cossacks. Having read the works of G. Le Vasseur de Beauplan, P. Chevalier, C.-L. Lesur, J.-B. Scherer, Voltaire, and M. Kostomarov he wrote *Les Cosaques de l'Ukraine et leurs derniers atamans* (1854), a work commissioned by French officials during the Crimean War and focusing particularly on Hetmans B. Khmelnytsky and I. Mazepa. He also published a literary rendition of Kostomarov's monograph on Khmelnytsky in *Journal des savants* (1863); it was republished with an article about S. Razin as *Les Cosaques d'autrefois* (1865). The Cossacks are also mentioned in his *Faux Demetrius* (1852) and the unfinished *Histoire du règne de Pierre le Grand* (1864). Mérimée also translated M. Vovchok's story 'Kozachka' (Servant Girl) into French. He supported Ukrainian aspirations and warned French circles (Napoleon III and Empress Eugénie) about the danger of Polonophilism.

Some of Mérimée's works have been translated into Ukrainian by M. Rudnytsky (a collection of stories, 1925), V. Levytsky-Sofroniv (a collection of stories, 1932), V. Pidmohylny (his *Colomba*, 1927), M. Rylsky (his *La chronique du règne de Charles IX*), B. Tkachenko (his *Carmen*), S. Buda, M. Konstantynopolsky (his *La Jacquerie*, 1936), M. Terezhchenko (1957), Ye. Rzhhevutska (his *La carrosse du Saint-Sacrament*, 1958), M. Meshcheriak (1959), A. Yurkevych (1959), M. Lytvynets (his *Tamango*, 1959), and Ya. Kravets (1988). His *La Jacquerie* was staged by the Berezhil theater.

Mering, Friedrich, b 10 March 1822 in Dohna, Saxony, d 31 October 1887 in Kiev. Internal medicine specialist and hygienist. A graduate of Leipzig University (1845), he worked in Poltava and Chernihiv gubernias, directed a hospital in Buromka, Zolotonosha county, and lectured at Kiev University (from 1853). During the Crimean War he studied the typhus epidemic in the Southern Army, and later he combated the typhus epidemic in Kiev. In 1864 he was appointed director of the internal medicine clinic at Kiev University. His publications include courses on hygiene and clinical medicine.

Mering, Sergei, b 1862, d 1920. Industrialist and politician. An owner of sugar refineries in Ukraine, he opposed Ukrainian independence. A member of the Union of Industry, Trade, Finance, and Agriculture, he served as minister of trade and industry in F. Lyzohub's second cabinet and in S. Gerbel's cabinet in the Hetman government.

Merlia River

Merlia River [Merlja] (also Merla, Merlo). A left-bank tributary of the Vorsklo River. It is 116 km long and drains a basin area of 2,030 sq km. The Merlia has its source in the Central Upland in Belgorod oblast and flows through Kharkiv and Poltava oblasts. Its waters are used for domestic consumption and irrigation. The main city on the river is Bohodukhiv.

Mertvovid River (also Mertvi Vody, Mertvovod). A left-bank tributary of the Boh River, which it joins at Voznesenske. It is 114 km long and drains a basin area of 1,820 sq km. The Mertvi Vody flows through Kirovohrad and Mykolaiv oblasts. Its waters are used for irrigation.

Merzlykin, Mykola, b 1 September 1936 in Kiev. Stage director. In 1964 he completed study at the Kiev Institute of Theater Arts. He then worked in the Russian Drama

Theater in Mariupil (1964–5) and directed the Kiev Young Spectator's Theater (1967–83, from 1978 as artistic director). In 1970–4 he completed the actor's program at the Kiev Artistic Film Studio. Since 1985 he has been artistic director of the Kiev Children's Musical Theater.

Meshcherska, Hanna [Meščers'ka] (real surname: Pashchenko), b 1 June 1876 in Kiev, d 1 April 1951 in Odessa. Actress. She began her career in a Russian troupe in Cherkasy in 1895 and remained on the Russian stage until 1918, when she joined the State Drama Theater (later the Shevchenko First Theater of the Ukrainian Soviet Republic), with which she toured in 1919–27. In 1927–51 she was the leading actress in character and heroic roles at the Odessa Ukrainian Music and Drama Theater. Her extensive repertoire included Hanna in I. Karpenko-Kary's *Bez-talanna* (The Unfortunate), Shkandybykha in P. Myrny's *Lymeryvna* (The Saddler's Daughter), and Mrs Alving in H. Ibsen's *Gengangere*. She acted in the films *Hostra mohyla* (The Steep Grave, 1934) and *Karmeliuk* (1931).

Oksana Meshko

Meshko, Oksana [Meško], b 31 January 1905 in Stari Sanzhary (now Reshetnyky), Poltava county, d 22 January 1991 in Kiev. Teacher and dissident. A former Soviet political prisoner (1947–54), in 1970 she sent letters to the Supreme Soviet and Supreme Court protesting the imprisonment of V. Moroz. In 1972 she led a public campaign for the release of her dissident son, O. *Serhiienko. A founding member of the *Ukrainian Helsinki Group in 1976, she became its head in March 1979. For her activities she was persecuted, incarcerated in psychiatric prisons in 1980, and sentenced in January 1981 to six months in a labor camp and five years' exile in the Khabarovsk region of the Soviet Far East. After being allowed to return to Ukraine in 1985, she joined the revived Ukrainian Helsinki Union led by V. Chornovil. In 1987 she travelled to Australia for medical treatment. From there she visited the United States, Australia, and Canada, where she made many public appearances. In January 1989 she returned to Ukraine. Her memoirs, *Between Life and Death*, were published in English in 1981, and *The Oksana Meshko Story*, by N. Strokata and N. Pazuniak, appeared in 1985.

Mesolithic Period. A transitional period of the Stone Age, between the Paleolithic and Neolithic (ca 8th–5th millennium BC), also known as the Epipaleolithic. The start of this historic period coincided with the beginning of the current geological age, the Holocene. During this time the earth experienced warmer temperatures and the glaciers covering large portions of the northern hemi-

sphere retreated, leaving behind the basic geological and hydrological features of modern Ukraine.

Several significant social and technological advances took place during this period. Flint technology developed to the point where small, almost standardized, geometrically shaped pieces could be made. The basic tool and implement inventory of Upper Paleolithic man continued to be used, albeit with an increase in the manufacturing of bone and wood items. The introduction of the bow and arrow and the domestication of the dog led to changes in hunting practices, particularly the smaller size of hunting groups. Fishing expanded as an important sustenance activity, attempts at domesticating animals (pigs) for consumption were made, and there was even some rudimentary agricultural activity. Mesolithic sites have also revealed evidence of the earliest efforts to make pottery in Ukraine.

Three main settlement areas of this period have been identified: southern Ukraine (the steppe and Black Sea regions and Crimea), the forest steppe (particularly the middle Dnieper and Donets basins), and northern Ukraine. Research has also shown that the Mesolithic population of Ukraine was more migratory than its Upper Paleolithic counterparts. One explanation for this is that there was a need to look further afield for game because of the demise of the mammoth, the thinning out of traditional hunting grounds, and an increase in population. Mesolithic peoples commonly constructed winter shelters of a permanent or semipermanent nature and made extensive use of temporary summer shelters. Some sites have shown evidence of rectangular semi-pit winter dwellings with post construction. Presumably the walls would have been made of clay and the structure covered with skins or with locally available vegetation. Caves were also commonly used as winter dwellings.

Studies at Mesolithic sites reveal that full body burials were common. They also supply evidence for other practices, such as tying the hands of the deceased at the time of burial (perhaps to keep their spirit from 'wandering' the earth) and the ritual severance of finger segments.

The artistic activity of Mesolithic peoples was not at all as developed as that of Upper Paleolithic peoples and was limited largely to schematic drawings on rocks and the making of personal adornments from animal and fish teeth.

The earliest cultural-chronological schemes for the Mesolithic period in Ukraine were proposed in the 1920s by P. *Yefymenko and M. *Rudynsky. As research about this period continued, new schemes emerged. Despite considerable progress in this respect, a definite chronology will require more research.

Messianism. A historico-philosophical conception of a mission to redeem all of humanity. Ukrainian messianism found its fullest expression in the ideology of the *Cyril and Methodius Brotherhood (1845-7), particularly in the programmatic text **Knyhy bytiia ukrains'koho narodu* (Books of the Genesis of the Ukrainian People), written by M. *Kostomarov, as well as in writings by V. *Bilozersky. They felt that Ukraine alone had preserved true Christian-

ity, which in their view espoused a profound egalitarianism. They particularly idealized the Cossacks, whose deep devotion to Orthodoxy, defense of Christian Europe against Islam, democratic form of organization and self-rule, and opposition to landlords and serfdom heralded a future new order. Because of its very virtues Ukraine had been oppressed by rapacious neighbors, and seemed to be the least among the Slavic nations; in fact it was destined to lead a political and spiritual renewal that would culminate in the establishment of a Slavic federative republic.

Messianism in the strict sense of the term is connected with a religious worldview, but in its wider application it can also refer to conceptions of the nation's mission within a secular framework. In that sense elements of messianism can also be found in the writings of S. *Podolynsky, particularly in his *Parova mashyna* (Steam Engine) of 1875, in which Ukraine, because of its Cossack and haidamaka past, was assigned the mission of starting the socialist revolution and ushering in the socialist utopia throughout the Russian Empire. In the 1920s M. *Khvylovy and writers close to him also developed a variety of messianism. They predicted that Ukraine, long oppressed and on the boundary of East and West, would be the leader of an 'Asiatic renaissance' that would renew European and indeed world culture. Messianic ideas, placed once again within a religious context, have also been put forward by O. *Berdnyk, particularly in the late 1980s and early 1990s in connection with his Assembly of Spiritual (Holy) Ukraine (Sobor dukhovnoi sviatoi Ukraïny).

Mest' (vengeance). In medieval Ukraine, the punishment or vengeance exacted for a crime or offense. This legal institution, which was found among ancient tribes, survived in some regions to the beginning of the 20th century. Among the ancient Slavs it was not only the right but the obligation of clan members to avenge wrongs, particularly homicide, done to one of them. Later, *mest'* was replaced by *pokora*, ie, symbolic retribution. **Ruskaia Pravda* permitted *mest'* if it was approved by the court. If it was committed without court permission, it had to be justified before the court. In medieval Ukraine *mest'* was not very severe, and it could be carried out only by the victim's closest relatives, and only within a short period after the crime. The victim's family could substitute *vykup* (compensation) for *mest'*.

Meta (Goal). A monthly journal of culture and community affairs published in Lviv from September 1863 to January 1864 by a group of young Populists and edited by K. Klymkovych. One of the first, thick, journals in Ukraine, it contained poetry, prose, articles on historical and ethnographic subjects, a chronicle of current events, and reports on Ukrainian life in Kiev, Kharkiv, and elsewhere. Regular contributors included prominent writers from both Russian-ruled (eg, P. Kulish, D. Mordovets) and Western (Yu. Fedkovych) Ukraine. *Meta* was renewed in March 1865 and appeared semimonthly and then monthly until December (18 issues). It now devoted less attention to literature and more to politics, and reported on the activities of the *Halytsko-Ruska Matytsia society. Among the con-

Meta (Lviv, 1863-4)

tributors were S. Kachala, Ye. Zharsky, P. Pavlusevych, and M. Vovchok (two reports from Paris).

***Meta* (Goal).** The first Ukrainian socialist feminist journal, published semimonthly in Lviv from March to December 1908. It was edited by D. Starosolska and was closely associated with the *Circle of Ukrainian Women.

***Meta* (Goal).** A weekly organ of the *Ukrainian Catholic Union, published in Lviv from 1931 to 1939. It contained articles on political developments in Western and Soviet Ukraine and throughout the world, written mostly from a liberal Catholic perspective, as well as reports on the activities of the Ukrainian Catholic church. Considerable attention was paid to the role of young people and women in the church, and special sections dealt with culture and literature. The longtime managing editor was P. Kozitsky.

***Meta* (Goal).** A newspaper published by the Ukrainian Information Bureau in Munich (1952-82) and Philadelphia (since 1982). A monthly since the 1970s, it contains news and analyses of developments in Ukraine and in the Ukrainian émigré community, documents, memoirs, and articles on historical topics, particularly the struggle for Ukrainian independence. It was the organ of the *Ukrainian National-State Union, and from 1972 it was the semi-official organ of the *Ukrainian National Council. Among its editors have been M. Shramenko, L. Vasylyv, and V. Biliaiv.

Metallurgical industry. A branch of heavy industry dealing with the extraction of metals from their ores, the refining of them, and the combination of them into alloys. It is divided into ferrous and nonferrous metallurgy.

The *iron industry in Ukraine can be traced as far back as the 5th century BC. It was well developed in Kievan Rus'. The blast furnace was introduced in the mid-18th century, and by 1836 there were 153 small-scale smelting enterprises in Ukraine. In the early 19th century the Russian government built three large smelting plants in southern Ukraine. They were plagued with technical difficulties and high production costs. The first coke-fueled blast furnace was introduced in the Kerch region in the mid-19th century. Railway expansion in the second half of the century increased the demand for iron rails, equipment, and metal in general. When domestic production

could not meet the demand, the government decided to spur the development of private instead of state enterprises. With the construction of a railway link between the Kryvyi Rih Iron-ore Basin and the Donbas, the iron industry expanded rapidly. By the turn of the century there were 17 integrated metallurgical plants in Ukraine: 10 in the Donbas, 3 in the Dnieper, and 4 in the Azov region. All but three or four of them were owned, partially or wholly, by French, Belgian, English, or American investors.

Ukraine's output of ferrous metals and its share in the empire's output rose rapidly during the last two decades of the 19th century (see table 1). Several factors account for the growth, including (1) the industry's superior corporate organization, which provided a better capital base, (2) the relative newness and technical superiority of its fixed capital, (3) its foreign ownership and its use of Western European and American specialists, (4) the heavy demand for rails for the expanding railway system, and (5) state subsidies and protection from foreign competition. Plants in Ukraine were much more efficient than those in the Urals. In 1900, for example, the output of pig iron per worker was 5.8 times greater in Ukraine than in the Urals.

TABLE 1
Output of pig iron and rolled stock in Ukraine, 1880-1917 (in 1,000 metric t; percentage of empire's output in parentheses)

Year	Pig iron		Rolled stock	
1880	21.3	(5.0)	26	(4.5)
1890	219	(24.3)	141	(17.8)
1900	1,500	(51.8)	969	(44.0)
1903	1,367	(55.4)	1,130	(50.7)
1913	3,107	(67.0)	2,309	(57.3)
1917	2,194	(72.3*)	1,572	(61.7*)

NOTE: Figures are for 'southern Russia' and include a small amount of territory outside the current boundaries of Ukraine.
*Does not include Poland

The expansion of the iron and steel industry was interrupted by the worldwide economic depression in 1900-4. The Russo-Japanese War, however, stimulated demand. Ukraine's share of rolled stock remained steady, but its share in the manufacture of different types of rolled products varied. In 1912, for instance, Ukraine accounted for 79.3 percent of the rails produced in the Russian Empire (within the 1924 USSR boundaries), 88.8 percent of the beams and girders, 47 percent of the shaped steel, 55 percent of the wire rods, 24 percent of the roofing iron, and 57 percent of the sheet steel. In 1913 Ukraine had 21 metallurgical plants, employing some 90,000 workers. Almost 90 percent of the output was controlled by foreign firms. In 1902 the producers organized a cartel called *Prodamet to reduce competition and stabilize the market. Controlled by French banks, the cartel encompassed the 12 largest corporations, which in 1906 produced 80 percent of Ukraine's ferrous metal and 40-50 percent of the empire's output. By 1914 it controlled 90 percent of the empire's ferrous metal output.

During the First World War and the revolution, the Ukrainian iron industry suffered serious damage: of 63 blast furnaces only 1 was partly operational in 1919. Moreover, 9 of 15 large metallurgical plants, which in 1918 had accounted for 80 percent of the pig iron and steel output,

were nationalized in 1919, and by that year all metallurgical plants had come under Soviet control. By 1920 Ukraine's output of pig iron had fallen to a mere 0.5 percent of the 1917 output, its steel output to 1.5 percent, and its rolled-steel output to 1.8 percent. During the 1920s the metallurgical industry was reconstructed, and by 1928 Ukraine had almost returned to its prewar production figures.

In its First Five-Year Plan the Soviet regime emphasized the growth of the metallurgical industry as the foundation of all other branches of industry. In its investment policy the USSR State Planning Committee gave priority to the development of a new metallurgical industry in the Urals and Western Siberia (the Ural-Kuznetsk Industrial Complex) and reduced Ukraine's share of the total investment to less than 30 percent. The Ukrainian State Planning Committee and Ukrainian economists, such as Y. Dimenshtein, argued that on purely economic grounds Ukraine ought to be favored.

Between 1928 and 1940 pig iron production in Ukraine increased by a factor of 4.08, steel by 3.3, and rolled steel by 3.2 (see table 2). The large increases in output were achieved through higher investment. During the First and Second Five-Year Plans fixed capital in the Ukrainian iron industry increased from 415 million rubles in 1928 to 2,681 million rubles in 1938 (in constant prices). During the First Five-Year Plan large enterprises, such as Zaporizhstal in Zaporizhia and Azovstal in Mariupol, were built, and during the Second Five-Year Plan they went into operation. Some plants were reconstructed, and many new facilities were added, in 1928-40: 28 blast furnaces, 42 open hearth furnaces, 12 electric furnaces, 6 converters, 32 rolled steel and steel pipe mills, 11 iron-ore mines, and a number of auxiliary plants. The number of workers rose from 100,600 in 1929 to 153,000 in 1935. A great deal of capital was spent on foreign technology. There was much waste, a result of poor planning and incompetent management. The productivity of the metallurgical industry as well as the quality of its output was below Western standards.

The metallurgical industry in Ukraine was seriously damaged during the Second World War. Much equipment was evacuated to the east or destroyed so as not to fall into German hands. The retreating Germans systematically destroyed operating facilities. The industry was rebuilt rapidly after the war: by 1950 the output of pig iron, steel, and rolled stock had reached the prewar level. In 1950-70 Ukraine's ferrous metallurgical industry received some 30 percent of the capital invested in the industry throughout the USSR.

TABLE 2
Iron and steel production in Ukraine, 1928-89
(in 1,000 metric t; percentage of USSR total in parentheses)

Year	Pig iron	Steel	Rolled stock
1928	2,361 (71.5)	2,409 (56.7)	1,995 (58.1)
1932	4,243 (68.8)	3,301 (55.7)	2,668 (60.2)
1937	9,216 (63.6)	8,738 (49.3)	6,468 (49.9)
1940	9,642 (64.7)	8,938 (48.7)	6,520 (49.7)
1950	9,168 (47.8)	8,351 (30.6)	6,929 (33.2)
1960	24,163 (51.7)	26,155 (40.1)	21,105 (41.4)
1970	41,411 (48.2)	46,599 (40.1)	37,519 (46.5)
1987	47,400 (41.5)	56,300 (34.5)	39,300 (34.2)
1989	46,500 (40.8)	54,800 (34.2)	39,900 (34.5)

In 1971-86 capital investment in Ukraine's metallurgical industry totaled 23,400 million rubles. The production of steel pipes rose from 0.6 million t in 1940 and 2.2 million t in 1960 to 7.1 million t in 1988 and 6.9 in 1989. Ukraine accounted for approx one-third of the USSR steel-pipe output. In the 1970s efforts were made to improve the industry's productivity: new technology was introduced; the preconditioning of raw materials was improved; oxygen and economical fuels, such as natural gas, were used more widely; and the pressure and temperature of blast furnaces were increased for higher efficiency.

Although the Ukrainian metallurgical industry has grown, its share of what was the all-Union output declined. It has difficulty securing adequate supplies of energy and iron ore. Because of higher materials and fuel costs, its production costs were higher than those of the Magnitogorsk or Kuznetsk ferrous metallurgical industries. In addition the industry lagged behind in technology: the continuous process for casting steel, for example, and the method of coke processing were used in other countries more widely than in the former USSR, where they were first developed. With the introduction of self-accounting in 1988, the problems of Ukraine's ferrous metallurgical industry were compounded. Eighty percent of its expenditures in 1988 were on raw materials. Finally, the industry must deal with the extensive pollution it has caused.

Prior to the 1930s Ukraine had no nonferrous metallurgical industry to speak of. Metallic mercury was first obtained in 1887 from the *Mykytivka mercury deposits, and no other nonferrous metals were produced. This branch of industry was developed during the First Five-Year Plan. In 1933 the Dnieper Aluminum Plant in Zaporizhia was put into operation. It used electric power from the Dniprohes and bauxites imported from Russia (see *Aluminum industry). A zinc plant started operation in 1931, and the Dnieper Magnesium Plant was built in 1935 in Kostiantynivka (Donbas). Mercury production in the Donbas was expanded. During the war virtually all plants of the industry were destroyed, and their reconstruction after the war proceeded slowly. In 1950 the output of nonferrous metals was 75 percent of the 1940 output. From 1950 to 1966 the output increased by a factor of 21. In 1960 the value of fixed capital in the industry was 137.4 million rubles, or 1 percent of the total fixed capital in Ukrainian industry. From 1976 to 1980 the output of nonferrous metallurgy doubled.

Production data on nonferrous metallurgy are not published because of its military significance. Ukraine's limited deposits of nonferrous metals restrict the industry's potential for growth. Another important restriction is the shortage of electrical power. Bauxite deposits, which have yet to be exploited, are found near Smila (Cherkasy oblast) and in Vysokopillia (Kherson oblast). *Titanium ores in Ukraine are extracted by quarrying; hence, production costs are relatively low. In 1987 Ukraine produced 7.2 million t of magnesium ore and 2.2 million t of pure magnesium metal. (In 1960 the respective figures were 2.7 and 0.9.) Zirconium, which is important for many technological processes, is extracted in the Samotkan (Dnipropetrovske region) and Azov regions. In the 1930s a zirconium plant was constructed in Kostiantynivka (Donetske oblast). Small deposits of nickel, cobalt, lead, and zinc have been found in the Azov region. Uranium has been discovered near Zhovti Vody, in Dnipropetrovske oblast.

Metallurgy. The science and technology of obtaining metals from their ores and modifying them for use. Those processes use numerous technologies and include enriching the mined and crushed ores, reducing the separated minerals to metal, alloying, and subjecting the metal to various treatments to impart properties required by the end-use.

From about the 6th century BC the inhabitants of Ukrainian territories developed a practical knowledge of metallurgy; they utilized copper, silver, and gold in the manufacture of functional and ornamental objects and produced iron from bog iron ore. From the 9th century they started practicing ore enrichment, and from the 14th century they began producing steel in blacksmith foundries. That production continued up to the 18th century in

Galicia, Polisia, and the Kharkiv and Poltava regions. In industrial metallurgy, toward the end of the 19th century a center of ferrous metallurgy emerged, based on the *Donets Basin coal seams and the Kerch and Kryvyi Rih iron-ore deposits. The first industrial production of ferrous metals commenced in 1872 at the Yuzivka (now the Donetske) Metallurgical Plant; it was followed in 1887 by the Dnipropetrovske plant. By 1913 there were 21 metallurgical plants in Ukraine (including 42 blast furnaces, 72 Siemens-Martin furnaces, 28 converters, and about 70 rolling and pipe-forming lines) that produced over half of all pig iron, steel, and rolling stock in the Russian Empire. About 90 percent of the metallurgical industry was owned by Western corporations.

The only prewar nonferrous metallurgical industry in Ukraine was based on the mercury-ore deposits at Mykytivka, which were discovered in 1879. In 1930 a zinc plant (Ukrtsynk) started operating in Kostiantynivka; it was followed by the first aluminum plant, in Zaporizhia (powered by the Dniprohes), in 1933 and the first magnesium plant, in Zaporizhia, in 1935. After the Second World War new industries emerged, based on freshly discovered ore deposits of nonferrous and rare metals: the Irshanske Mining and Enrichment Complex, the *Verkhnodni-

provske Mining and Metallurgical Complex, the Pobuzke Nickel Plant, the Artemivske Plant for Processing Nonferrous Metals, the Zaporizhia Titanium-Magnesium Complex, and others. Ukraine became a large-scale producer of technologically important metals and materials, including aluminum, magnesium, silicon, and semiconductor components, as well as a reliable raw-material base for titanium and zirconium production. The nonferrous metals industry introduced new types of product lines including zirconium, hafnium, refined ferronickel, and other metals.

Scientific studies of metallurgy began in Ukraine toward the end of 19th century. They were carried out primarily at the Kharkiv Technological Institute (A. Moevius), the Kiev Polytechnical Institute (V. *Izhevsky), and the Katerynoslav Higher Mining School (P. Rubin, L. Fortunato, S. Tely, M. Pavlov, A. *Vynohradov). After the revolution departments of metallurgy were organized at the Donetske Industrial Institute, the Dniprodzerzhynske Evening Metallurgical Institute, and the *Mariupil Metallurgical Institute. The Dnipropetrovske Metallurgical Institute was formed out of part of the *Dnipropetrovske Mining Institute. Among the newly established scientific research institutes for metallurgy were those in Kharkiv (see *Ukrainian Scientific Research Institute of Metals), Dnipropetrovske (which later became the All-Union Pipe Institute), and the institutes of ferrous metallurgy in Kharkiv (1939–53), Dnipropetrovske (est 1953), and Donetske (est 1960).

Blast furnace metallurgy. Fundamental studies of blast-furnace technology commenced in Ukraine at the beginning of the 20th century (Moevius, I. Thieme, M. Kurako, I. Zelentsov, Izhevsky, Yu. and O. Horiainov). Pavlov, Rubin, and A. Pokhvysnev began their research at the only institution of higher learning at that time dealing with mining and metallurgy, the Katerynoslav Higher Mining School (now the Dnipropetrovske Metallurgical Institute). Since the 1940s, issues of blast furnace production have been researched mainly at the institutes of ferrous metallurgy in Kharkiv, Donetske, and Dnipropetrovske. New blast furnaces of up to 5,000 cu m were constructed. The use of natural gas along with oxygen-enriched blowing (up to 30–40 percent) was an innovation introduced by Z. Nekrasov and was adopted worldwide. Issues of the blast furnace industry are discussed in publications such as *Metallurgicheskaiia i gornorudnaia promyshlennost'* and *Metallurgiiia i koksokhimiia*, as well as in the internal publications of research institutes and academic institutions.

Steel smelting metallurgy. Research in steel smelting began in Ukraine at the beginning of the 20th century at the Kharkiv Technological (now Polytechnical) and Kiev Polytechnical institutes and the Katerynoslav Higher Mining School. The scientific issues of steel production were studied by Moevius, who wrote the first textbook on metallurgy in Ukraine, *Chugunoliteinoe proizvodstvo* (Cast-Iron Production, 1859); the brothers Horiainov, who introduced the ore-based Siemens-Martin process; and Fortunato, who introduced an original modification of the Thomas process. Acceleration of steel production took place in the 1920s and 1930s, and most of the efforts during the early 1940s went into the war effort (armor steel, etc), but major restructuring and modernization of the industry took place in the postwar years and involved extensive research and development at various scientific institutions.

Among the areas studied were the temperature and heat regimes and the physicochemical processes in Siemens-Martin furnaces (V. Lapytsky, S. Levin), oxygen injection into Siemens-Martin furnaces (Ya. Shneiderov), the use of natural gas, and the scaling up of processes (M. Medzhybozhsky). The fundamental studies undertaken in those areas pioneered the introduction of the oxygen-converter process into industry, and were applied for the first time at the Dnipropetrovske and Kryvyi Rih plants. Newer continuous processes were developed by V. Baptyzmansky and others, who studied microalloying and modifying the chemical composition of steels and also developed the theoretical and technical basis for its extensive desulfurization (I. Bornatsky). New technology of steel pouring under inert gas and rapid methods of transferring boiling steel were introduced (V. *Yefimov). Other developments included rapid electrothermal treatment of steel and its alloys (V. *Hridniev), new types of semipassivated and specialty steels (I. Uzlov et al), and studies of heat- and mass-exchange processes (Ye. Kapustin).

Currently, research on various problems of steel smelting is carried out at the ANU *Institute of Electric Welding, the ANU Institute for Problems of Casting (both in Kiev), the Institute of Ferrous Metallurgy in Dnipropetrovske, the Ukrainian Scientific Research Institute of Metals in Kharkiv, and the Dnipropetrovske and Mariupil Metallurgical, Donetske Polytechnical, and Dniprodzerzhynske Industrial institutes.

Casting metallurgy. Practical knowledge of metal casting accumulated over many centuries, beginning in Ukraine in the Bronze Age, but scientific studies in the area did not commence until the end of the 19th century (Moevius, V. Knabbe). Even then, no dedicated research centers for metal casting existed. Only in the early 1930s were institutes, laboratories, and university chairs of casting science established, at the Zaporizhia Machine-Building Institute (1931) and the Odessa Polytechnical Institute (1932). Casting specialists were trained mainly at the Kiev Polytechnical and Dnipropetrovske Metallurgical institutes. Ukrainian scientists studied problems in improving the quality of cast iron and cast-iron objects, specialty steels, tin-free bronzes, and aluminum castings.

After the Second World War the attention of Ukrainian scientists was directed at elaborating the theoretical foundations for casting processes, perfecting casting technology, and developing production methods for casting molds used in metallurgy (K. Vashchenko). The various achievements included the perfection of casting technology (N. Voronova), the improvement of rollers (A. Kryvosheiev), and the development of chemically resistant alloys (V. *Vasyliiev) and of new methods for producing superhard iron containing spherical graphite (A. *Vasylenko), including the necessary complex modifying additives (A. Horshkov, M. Voloshchenko). The introduction of the centrifugal casting of ingots from low-melting and exothermic mixtures (A. Shevchenko) increased production efficiency. Ukrainian scientists developed methods for casting steel, utilizing insulating and slag-forming mixtures, modifiers, microcoolers, improved casters, and crystallizers for continuous steel casting (Yefimov). Fundamental research was done in the area of the electromagnetic transport and dosimetry of molten metal (V. *Polishchuk, V. Zlobin). A magnetodynamic device for the casting and distribution of aluminum, zinc, and magnesium alloys was constructed at the ANU Institute of

Casting Production (later the Institute for Problems of Casting). The device was used in many Soviet plants and was patented and exported to most Western countries. Other developments included the casting of alloyed construction steels, corrosion-resistant steels, and thermally stable steels and alloys (M. Braun), a method of casting under controlled low pressure (H. Borysov), and the electro-slag casting method (B. *Medovar). The scientific basis for the use of plasma, induced plasma, and electron beams as heat sources for the melting of high-quality alloys was studied, as was the technology for producing bimetallic materials and reconditioning worn parts. The latter method for the mass production of bimetallic parts from worn ones was introduced throughout the USSR. Dosimetric devices were constructed for casting molten iron into centrifugal molds, with ancillary regulating equipment, digital regulators of casting, and control panels for monitoring the melting conditions in induction furnaces (O. Kryzhanivsky). Alloyed molten-iron thermodynamics was studied by L. Vladimirov. Ukrainian metallurgists also researched the complex mechanization and automation of casting procedures, the creation of advanced cast materials, and low-waste, streamlined casting processes.

Problems of the casting industry are researched primarily at the ANU Institute for Problems of Casting in Kiev, formed in 1958 on the basis of the AN USSR Institute of Machinery and Agricultural Mechanics. Headed by Yefimov, the institute has studied physicochemical phenomena involving the modification and alloying of cast ingots and developed high-productivity processes for the casting of steel, as well as new casting materials, and automated casting methods. More recent research has been directed at the theoretical foundations for casting processes, novel technologies and equipment for the improved production of castings, including studies of external effects on molten metal, metal in the process of crystallization, and novel cast materials that would improve the economy of metal utilization. Other research centers involved in casting research include the Scientific Research Institute of Special Casting Methods in Odessa and the institutes of design and construction. Issues of casting technology are covered in the journal *Tekhnologiya i organizatsiia proizvodstva*, as well as in the collected works of scientific research establishments and academic institutions.

Rolling metallurgy. Studies of rolling stock production commenced in Ukraine toward the end of the 19th century. Centered at the laboratories of the Kharkiv Technological and the Kiev Polytechnical institutes, as well as at the Katerynoslav Higher Mining School, they dealt primarily with making generalizations based on the experience of rolling-mill operators with roller calibration.

The work of A. Vynohradov formed the basis of further development of the calibration theory and became closely integrated with practical considerations. Later research took place at the Ukrainian Scientific Institute of Metals in Kharkiv and the Institute of Ferrous Metallurgy in Kharkiv (since 1953 in Dnipropetrovske). Specialists in rolling stock were trained at the Dnipropetrovske Metallurgical Institute. Ukrainian scientists studied theoretical problems of rolling, particularly the conditions for metal deformation during longitudinal rolling (A. Vynohradov), devised methods for precision rolling, and designed the supporting equipment. After the Second World War they articulated the theoretical foundations of rolling (O.

*Chekmarov, S. Filipov, V. Lykhansky, O. Smolianynov) and the theory and technology of continuous rolling (M. Safian, O. *Shevchenko). The mechanism of external friction was studied, as well as the effect of friction on the stress of rolling; effective technological lubricants were invented for cold and hot rolling (O. Grudev). Theories of roller calibration for solid rolled shapes (D. Starchenko) and precise rolling of thick sheets (V. Klymenko) were introduced. Other important research dealt with the technology of bent rolled sheets (I. Tryshevsky), the rolling of powdered materials (H. Vynohradov), sheet rolling directly from molten metal (Ye. Nykolaienko), and the formation of surface microgeometry in cold rolled sheet (V. Mazur). Also developed was the theory of the simultaneous rolling of two ingots (Chekmarov), which found wide industrial application. Numerous studies were done on pipe rolling production (S. Borysov) and on the hardening thermal treatment of rolling stock (K. *Starodubov).

The problems of rolling stock production are studied at the Donetsk Scientific Research Institute of Ferrous Metallurgy, the former All-Union Scientific Research and Design Technology Institute of the Pipe Industry (in Dnipropetrovske), the Ukrainian Scientific Research Institute of Metals (in Kharkiv), and the Dnipropetrovske Metallurgical, Donetsk Polytechnical, and Komunarske Mining and Metallurgical institutes, as well as at institutions of the Academy of Sciences. Issues of rolling stock production were discussed in the journals *DOMEZ* (1925–35), *Teoriia i praktika metallurgii* (1936–40), and *Stal'* (1931–40). Now, articles are published in the scientific and industrial journals *Metallurgicheskaia i gornorudnaia promyshlennost'* and *Metallurgii i koksokhimiia*, as well as in the internal publications of various academic and scientific research establishments.

Powder metallurgy. The first scientific endeavors in this field were pioneered by P. Sobolevsky and V. Liubarsky, who in 1826 used compression and firing techniques to process platinum powder into various products, and N. *Beketov, who prepared the theoretical basis for the manufacturing of powders from different metals (1865). Systematic research in powder metallurgy commenced in the 1920s and centered during the 1930 and 1940s at the AN USSR (now ANU) Institute of Chemistry in Kiev and the Institute of Ferrous Metallurgy in Kharkiv. Methods of obtaining various types of metallic powders were explored, and powders of bismuth and zirconium were obtained by electrolytic methods (V. *Izbekov, V. *Plotnikov, O. Kudra, I. *Sheka), as were those of beryllium, silver, zinc, cadmium, aluminum, and so forth (Yu. *Delimarsky, B. Markov). Initial studies on obtaining iron powder from ore concentrate were done in the 1930s by reduction with natural gas (M. *Luhovtsov, I. *Frantsevych) and in 1948–51 by the use of a blended reducing agent consisting of natural gas and carbon (this method became commercialized). From 1952, specialists in powder metallurgy were trained at the Kiev Polytechnical Institute.

Research in powder metallurgy was furthered by the establishment of a laboratory for special alloys within the ANU. The laboratory was reorganized in 1955 into the ANU Institute of Metal Ceramics and Special Alloys (now the *Institute for Problems of Materials Science). The institute was the main powder metallurgy research center for the whole USSR and the co-ordinating center for the COMECON countries in the area of powder metallurgy. One of the

more important developments at the institute involved the production of high-quality powders of ferrous and nonferrous metals through the atomization of their melts with the aid of gases or water. Jointly with the industrial sector, its scientists developed a commercial technology for the manufacture of frictional discs for buses and tractors. They pioneered the production of durable and slip-page-resistant bits for drilling rigs. The institute publishes the monthly *Poroshkovaia metallurgiiia* (which is translated into English in the United States) and the periodical compendiums *Adgeziia razplavov i paika materialov* and *Zashchitnye pokrytiia materialov*.

Special electrometallurgy. Research in the area of special electrometallurgy, which permits the production of improved-quality, highly efficient specialty steel alloys, was pioneered in the 1950s at the AN USSR Institute of Electric Welding (see *Welding). The institute is a research and development complex including not only departments of exploratory, theoretical, and experimental studies, but also a department of experimental technological design, an experimental electromechanical plant, an experimental plant of welding materials, and a pilot plant. Its staff has included B. *Paton, K. *Khrenov, D. *Dudko, V. *Lebedev, Medovar, B. Movchan, I. *Pokhodnia, B. Kasatkin, S. *Kuchuk-Yatsenko, V. *Makhnenko, and V. Trufiakov, and it represented the former USSR in the International Welding Institute. Among its significant achievements are fundamental studies of metallurgical and electrophysical processes occurring during arc welding, which became the basis for developing new and more effective welding wires and fluxes; studies of brittle failure in metallic structures, which led to the development of methods to increase resistance to brittle failure, and in particular to the breakthrough invention of very reliable multishell welded pipes for gas transmission mains; the invention of a new class of metallic materials, referred to as reinforced quasi-multilayered or quasi-monolithic, that exhibit high resistance to brittle failure; the establishment of the fundamentals of electro-slag smelting and the construction of the first electro-slag furnace in the world, which was put into operation at the Zaporizhia Dnipropetsstal Electrometallurgical Plant in 1958; the creation of the new field of electro-slag casting; studies of electrical and thermal processes taking place during the rapid electrical heating of contact points between metallic objects, which formed the theoretical basis for improved flash welding; and studies of the physicochemical behavior of electron-beam evaporation and the subsequent condensation of streams of metallic and nonmetallic materials.

The institute collaborates closely with industry, particularly in the areas of the manufacture of large-diameter (up to 1.42 m) multishell gas pipelines and electro-slag welding technology. Its scientists introduced the technology of repairing point defects in oil pipelines without interruption of product flow. More recent research areas include complex studies of physicochemical phenomena in metal welding and the development, on the basis of the studies, of new and improved methods of unbreakable bonding between metals and alloys; tensile strength studies of welded bonds under various types of external loads and the establishment of a scientific basis for designing welded constructions; and the invention of new technological processes of metal processing, including the action of superhard materials.

Problems of special electrometallurgy are also studied at the Ukrainian Scientific Research Institute of Special Steels, Alloys, and Ferroalloys (Zaporizhia), at the Dnipropetrovske and Mariiupil metallurgical institutes, and at the Donetsk Polytechnical Institute. The area of special electrometallurgy is covered in the journal *Problemy spetsial'noi electrometallurgii*.

Metalworking industry. A branch of *heavy industry that manufactures metal products and structures and repairs machinery and equipment for various branches of the economy. In Ukraine it is officially classified as a sub-branch of the *machine-building industry.

The industry makes products for industrial use, such as iron and cast-iron building fixtures, shoemaking tools, springs, mesh, chains, anchors, and farm implements, and for consumer use, such as cooking utensils, pots, kettles, razors, scissors, beds, carriages, lamps, and sports equipment. Its metal structures are used in the construction of buildings, bridges, power lines, and water conduits.

Metalworking in Ukraine dates back to ancient times. The craftsmen of Kievan Rus' supplied not only the home market but also the export market with weapons, metal tools, and metalware. In the 19th century metalworking was one of the largest industries in Ukraine. Under the Soviet regime the industry grew rapidly. From 1940 to 1968 its output increased by a factor of 13.7. By 1968 its share in Ukraine's industrial output was 3.7 percent. Of the 795 enterprises belonging to the industry in 1968, 233 made metal products, 47 built metal structures, and 515 repaired machines and equipment. Most of them were located in the Donets, Dnieper, and southwestern regions. The largest metalworking plants are the tableware plants in Kiev and Vilnianske and Metalopobut and Metaloshtamp in Dnipropetrovske, the metal structures plants in Dnipropetrovske, Mariiupil, Zhytomyr, and Donetsk, the boat repair docks in Kherson, and the automotive repair plant in Kiev. Research on various aspects of metalworking is conducted at the Ukrainian Steel Structures Design Institute and the Ukrainian Scientific Research Institute of Cultural and Consumer Products.

Metelytsia. A fast Ukrainian folk dance performed by many pairs of dancers formed in a circle with one couple in the center. The dance, accompanied by the folk song 'Metelytsia' in 2/4 time, conveys the impression of a *metelytsia* 'snow flurry.'

Meteorology. See Climatology and meteorology.

Methodius, Saint. See Saint Methodius.

Metiuk, Andrei [Metjuk, Andrej] (secular name: Hryhorii), b 3 January 1898 in Terebin, Hrubeshiv county, Lublin gubernia, d 2 February 1985 in Winnipeg. Orthodox bishop and metropolitan. After studies at the Vilnius Theological Seminary and the theology faculty of Warsaw University (M DIV, 1924), Metiuk was ordained in 1924 and

Metropolitan Andrei Metiuk

Amvrosii Metlynsky

held various church positions in the Kholm region until 1944, when he was forced to emigrate. He resided in Switzerland (1945–8) before coming to Canada (1948). In 1959 he was consecrated bishop of the Ukrainian Orthodox Church of Canada for the eparchy of Edmonton and Western Canada. He was elevated to archbishop in 1963 and designated metropolitan and head of the church in 1975. Among his publications are *Pravoslavna vira* (The Orthodox Faith, 1962, 1976), *Vid Ierusalymu pochynaiuchy* (Beginning in Jerusalem, 1980), and *Ryms'ka uniiia ne dlia ukraintsiu* (The Union with Rome Is Not for Ukrainians, 1984). His biography, by F. Onufriichuk, appeared in 1983.

Metlynsky, Amvrosii [Metlyns'kyj, Amvrosij] (pseud: A. Mohyla), b 1814 in Sary, Hadiache county, Poltava gubernia, d 29 July 1870 in Yalta. Poet, ethnographer, and publisher. He served as a professor at Kharkiv (1843–9, 1854–8) and Kiev (1849–54) universities. He published a collection of poetry, *Dumky i pisni ta shche deshcho* (Thoughts and Songs and Some Other Things, 1839), under his pseudonym. Some of his poetry was reprinted in the almanacs *Snip* and *Molodyk*. He also published an anthology of works by Kharkiv poets, *Iuzhnyi russkii sbornik* (Southern Russian Anthology, 1848), that included his works and those of S. Aleksandrov, M. Petrenko, and H. Kvitka-Osnovianenko. Metlynsky was a member of the so-called *Kharkiv Romantic School; his poetry is suffused with nostalgia for the glories of the Ukrainian past, which he thought were destined never to return. His disbelief in a Ukrainian renaissance led him to embrace ideas of Slavic unity and to place hope in Russia. His nostalgia prompted him to collect Ukrainian folk songs, which he published in *Narodnye iuzhnorusskie pesni* (Southern Russian Folk Songs, 1854), a collection that contained an abundance of previously unpublished material.

Metropolitan. The head of an ecclesiastical province in the Ukrainian Catholic and Orthodox churches. Originally a metropolitan was a bishop residing in the principal city, or a metropolis, of a civil province of the Roman Empire whose authority extended over all the eparchies of the province. This title continues to be used, both in Eastern and Western churches, but the authority of the office and the method of appointment have evolved over time.

From its beginnings the Ukrainian church was headed

by the metropolitan (*mytropolyt*) of Kiev, who was initially under the jurisdiction of the Patriarch of Constantinople (see *Kiev metropolity). Most early metropolitans were Greeks appointed and consecrated directly by the patriarch. In reality the early church in Ukraine enjoyed considerable autonomy, and Rus' princes often succeeded in nominating candidates to the office; this was especially true in the cases of the first two native metropolitans, *Ilarion and *Klym Smoliatych. The rights and authority of a metropolitan in the Ukrainian church were defined in apostolic regulations, *canon law, and decrees of the princes of Rus'. The metropolitan was residential bishop of Kiev eparchy, convened and headed synods of bishops of his metropolity (16 eparchies in Kiev metropolity before the Tatar invasions), ensured that synodal decisions were adhered to, and oversaw the appointment of bishops to vacant positions. The metropolitan had the patriarchal right to consecrate and distribute the Holy Myron; he could also confirm and ordain bishops, visit eparchies, sit in judgment in bishop's courts, and remove bishops from office. The metropolitan even had authority (which diminished over time) in certain secular affairs; he represented the church before the highest secular authorities and often influenced affairs of state as an adviser to the prince. During the Tatar occupation of Rus', metropolitans were the official appointees of the khan and would often intercede with him on behalf of the population.

The decline of the Kievan state and the destruction of Kiev by the Tatars led to the disintegration of Kiev metropolity. During the 14th and 15th centuries *Halych, *Lithuanian, and Moscow metropolities all claimed jurisdiction over Ukrainian territories (see church *Hierarchy and history of the Ukrainian *Church). In the mid-15th century Moscow metropolity broke its ties with Kiev before eventually constituting itself as a patriarchate in 1589. After the appointment of H. *Bolharyn as Kievan metropolitan in 1470, the metropolity included eight Ukrainian and two Belarusian eparchies. From then until the end of the 15th century the Kievan metropolitan was chosen by a sobor of Rus' bishops, often with the participation of lay leaders. In 1498, however, the Kievan metropolitan Y. Bolharynovych was appointed by the Lithuanian grand duke Alexander, and not elected by sobor. This was the first overt manifestation of *patronage that placed the church hierarchy in direct dependence on secular authorities. From then the independence of the metropolitan was compromised by Polish kings, Lithuanian princes, newly formed church *brotherhoods, and certain monasteries; the latter two often relied on the support of various patriarchs, who granted them *stauropigion* (exempt status) to guarantee their independence from local bishops and metropolitans.

At the Church Union of *Berestia in 1596, the Kievan metropolitanate established the Uniate church. In 1620, however, Y. Boretsky was consecrated Orthodox metropolitan of Kiev by the Jerusalem patriarch Theophanes. He had been elected by a sobor, with the participation of the clergy, Cossack officers, and the hetman. This practice continued for several years, although P. Mohyla was elected by Orthodox deputies of the Warsaw Diet in 1632 and confirmed by King Wladyslaw IV Vasa. In all cases the Patriarch of Constantinople ratified these elections.

As Muscovite influence over Ukrainian political and church life grew, Orthodox metropolitans of Kiev rapidly

lost their rights and privileges. In 1686 Kiev metropolity was placed under the Patriarch of Moscow, and in 1688 the metropolitan was deprived of the title 'of All Rus'. In 1721 the Russian Holy Synod began appointing Kievan hierarchs, who lost the formal rights of provincial metropolitans and became mere bishops of the Russian church. Although the title of metropolitan was revived in 1743, the authority of the Kievan metropolitan was limited to his own eparchy.

After the 1917 Revolution, eparchial sobors sought to remove Ukrainian eparchies from under Muscovite administration and revive the old authority of the metropolitan of Kiev. The Ukrainian government issued a proclamation in 1918 and a statute in 1919 stipulating that the Ukrainian church was autocephalous and headed by the metropolitan of Kiev, but the Bolshevik consolidation of power in Ukraine prevented the practical implementation of this autocephaly. In 1921 the Moscow patriarch created a Ukrainian exarchate headed by a metropolitan who had no specific rights. At the same time Ukrainian national church circles established a separate Ukrainian Autocephalous Orthodox church (UAOC). When church leaders, mostly members of the clergy, could not convince any bishops to consecrate a new hierarchy for the UAOC, they used a tradition of the church of Alexandria to elevate V. Lytkivsky to the rank of metropolitan; this ordination was denounced as noncanonical and invalid by the Russian Orthodox church and other churches. Neither the UAOC nor the Living church (another entity established after the revolution) survived the antireligious terror of the 1930s.

After the Second World War the Moscow patriarch again appointed an exarch for Ukraine with the title of 'Metropolitan of Kiev and Halych,' but he has the powers only of a bishop. The UAOC was revived during the Second World War under the spiritual authority of Metropolitan D. Valedinsky of the Polish Autocephalous Orthodox church. The UAOC survived in the West as a church with two metropolitanates (Western Europe and the United States with South America), both of which are headed by M. Skrypnyk. The various churches that split from the UAOC and the Ukrainian Orthodox Church of Canada are also headed by metropolitans. In all of these jurisdictions, church sobors elect the metropolitan. The metropolitan of the Ukrainian Orthodox Church of America (ecumenical patriarchate) is appointed by the ecumenical patriarch in Constantinople.

There have been other Orthodox metropolitans with eparchies in Ukrainian territories. In 1873 an autocephalous Bukovyna-Dalmatia metropolity was established, with its see in Chernivtsi. The metropolitans were chosen by the Austrian emperor. During the Rumanian occupation the metropolitan was placed under the authority of the Patriarch of Rumania. The Polish Autocephalous Orthodox church from 1922 had its own metropolitan, who was nominated by the Polish government and confirmed by the ecumenical patriarchate in Constantinople.

After the Union of Berestia, Pope Clement VIII's 1596 bull *Decret Romanum Pontificem* gave Ukrainian Catholic metropolitans of Kiev the same rights that Kievan metropolitans had under Constantinople. The candidate for metropolitan would be chosen by direct vote of the assembled bishops and Basilian protoarchimandrites. Then he would be nominated by the Polish king and confirmed by

the pope. Only I. Potii and A. Seliava were confirmed as metropolitans by the pope without having served as bishops. After Right-Bank Ukraine and Belarus came completely under Russian control following the partitions of Poland, the powers of the Uniate metropolitan were progressively restricted and then formally abolished in 1838. The partitions also led to the 1807 revival of Halych metropolity. The metropolitan's rights, however, were limited by the Austrian authorities. Soon the title became purely honorific. The archeparchy of Winnipeg and metropolitanate of Canada was erected by Pope Pius XII in 1956, and the archeparchy of Philadelphia in 1958. In 1963 the Halych metropolity was recognized as the major archbishop of Lviv.

Metropolitan Ilarion Theological Society (Bohoslovske tovarystvo im. Mytropolitya Ilariona). A Ukrainian theological society based at St Andrew's College in Winnipeg. Established as the Scholarly Theological Society in 1948, the society initially included such churchmen and scholars as Archbishop M. Skrypnyk, S. Sawchuk, D. Doroshenko, and I. Vlasovsky. In 1954 Metropolitan I. Ohiienko assumed leadership of the society and renamed it the Ukrainian Scholarly Theological Society. Under Ohiienko's direction the society published a regular journal, **Vira i kul'tura*, and a number of books on theology and church history, primarily by Ohiienko. After a period of inactivity, the society was revived in 1972, after Ohiienko's death, and renamed in his honor. Since then *Vira i kul'tura* has also been revived as an annual publication.

Mezentsev, Ihor [Mezencev], b 9 September 1915 in Zhytomyr, Volhynia gubernia, d 9 March 1984 in Kiev. Architect. A graduate of the Kiev State Art Institute (1946), he taught there from 1967. He helped design various buildings in Kiev and other cities, including the general plan, main entrance, gate, fountain, and pavilions of the Exhibition of the Economic Achievements of the Ukrainian SSR (1951-7), the Kiev Geophysical Observatory (1947-50), the memorial complex in honor of Soviet soldiers and partisans in Poltava (1968-71), the Ukrainian Museum of the Great Patriotic War (1973-81), and residential complexes in Kiev and Tashkent. He also wrote technical papers on architecture and city planning.

Mezhenko, Yurii [Mezenko, Jurij] (pseud of Yurii Ivanov-Mezhenko), b 18 June 1892 in Kharkiv, d 24 November 1969 in Kiev. Bibliographer, literary scholar, and

Yurii Mezhenko (portrait by Mykhailo Zhuk, ink and pencil, 1919)

collector. He graduated from Moscow University in 1917. Mezhenko was head of the Council of the National Library of Ukraine (1919–22), director of the Ukrainian Scientific Institute of Bibliology (1922–31), and editor of the journal *Bibliolohichni visti* (1923–30). After the liquidation of the institute he was accused of nationalism and forced to work outside of Ukraine as a supervisor in the bibliographic section of the State Public Library in Leningrad (1934–45). He subsequently returned to Ukraine and assumed the directorship of the library of the Academy of Sciences of the Ukrainian SSR (1945–8).

From 1911 to 1962 Mezhenko amassed a unique collection of Shevchenkiana, which he bequeathed to the Institute of Literature of the AN USSR (now ANU). He wrote over 150 works, of which most are concerned with library science (including reviews of the literature), and some deal with the history of literature and theater. Among them are *Bibliotekna tekhnika* (Library Science, 1922), *Pro perepyt*

bibliotek URSS (Concerning the Inventory of Libraries of the Ukrainian SSR, 1926), *Knyzhkova produktsiia na Ukraini v 1917–1921 rokakh* (Book Production in Ukraine in 1919–21, 1927), and *Materialy do Shevchenkiany za roky 1917–29* (Materials on Shevchenkiana in 1917–29, 1930). In the early days of the revolution he wrote philosophical essays, such as *Tvorchist' indyviduumu i kolektyvu* (Creativity of the Individual and the Collective, 1919), in which he proposed that the nation was 'permanent and lasting,' and that writers were the purveyors of 'national urges and demands.' Under Soviet rule he was unable to continue writing in that vein, but he managed to produce articles of interest, including 'Pro V. Kobylians'koho' (About V. Kobyliansky, 1920) and 'Tvorchist' M. Khvyl'ovoho' (The Works of M. Khvylovy, 1923).

I. Koshelivets

Mezhlauk, Valerii [Mežlauk, Valerij], b 19 February 1893 in Kharkiv, d 29 July 1938 in Moscow. Bolshevik party leader and Soviet government official. A graduate of Kharkiv University, he joined the Bolshevik party in July 1917 and was active in the Kharkiv Party Committee and Soviet. From February 1918 he was finance commissar of the *Donets–Kryvyi Rih Soviet Republic. In January 1919 he was appointed deputy people's commissar for military affairs in the Ukrainian Soviet government. At the Third All-Ukrainian Congress of Soviets on 6–10 March 1919, he was elected to the All-Ukrainian Central Executive Committee. From May 1919 to March 1920 he served on the revolutionary military soviets in the 2nd Ukrainian Red Army and the 5th, 10th, and 2nd Russian Red armies on the Ukrainian, Tula, and Caucasian fronts. After 1920 he worked in Moscow organizing the railway system, the metalworking industry, and heavy industry. He was a member of the Presidium of the Supreme Council of the National Economy (1924–6), deputy chairman of the council (1926–31), first deputy chairman of the State Planning Committee (1931–4), and deputy chairman of the USSR Council of People's Commissars (1934–7). In 1934 he was promoted to the status of full member of the CC of the All-Union Communist Party (Bolshevik). He was arrested in December 1937 and executed.

J. Koshiw

Mezhov, Vladimir [Mežov], b 29 May 1830 in Saratov, Russia, d 29 May 1894 in St Petersburg. Considered the first Russian bibliographer, from 1851 to 1866 he worked at the St Petersburg Public Library. The St Petersburg journal *Osnova* published his bibliographies of books and articles about Right-Bank Ukraine in 1858–60 (1861, nos 8, 11, 12) and Galician-Ruthenian literature in 1837–62 (1862, no. 6). His statistical and bibliographic overview of Russian literature in 1859–68 (9 vols, 1861–83) and his Russian historical bibliographies for the years 1800–54 (3 vols, 1892–3) and 1865–76 (8 vols, 1882–90) are valuable reference works for Ukrainian scholars.

Mezhova [Mežova]. v-17. A town smt (1990 pop 8,900) on the Kamianka River and a raion center in Dnipropetrovske oblast. The Mezhova railway station was built in 1884, and several settlements sprang up around it. In 1956 the villages of Hryhorivka, Kamianka, and Novoslovianka were amalgamated to form the town of Mezhova. There is a regional museum in the town.

Mezhyhiria Chronicle (Mezhyhirskiy litopys). A valuable source for events in Ukraine from 1608 to 1700. The manuscript was kept in the Mezhyhiria Transfiguration Monastery near Kiev, and initially belonged to its overseer, I. Koshchakivsky (d 1720). Some scholars (eg, M. Marchenko) consider him to be the compiler, but others ascribe authorship of the chronicle to one of the former Cossacks residing at the monastery. The chronicle consists of 41 narratives, including ones about the rebellions led by Ya. Ostrianyn and P. Pavliuk, the Cossack-Polish War of 1648–57, and Turkish-Tatar invasions of Ukraine. Seven describe natural disasters, such as a locust plague, a solar eclipse, and a fire and earthquake in Kiev. The chronicle was published in Kiev in *Sbornik letopisei, otnosiashchikhsia k istorii Iuzhnoi i Zapadnoi Rusi* (Collection of Chronicles Relating to the History of Southern and Western Rus', 1888), edited by V. Antonovych.

Products of the Mezhyhiria Faience Factory

Mezhyhiria Faience Factory (Mezhyhirska faiansova fabryka). One of the first factories in Ukraine. It was established in 1798 on land belonging to the Mezhyhiria Transfiguration Monastery, near a large deposit of high-quality faience clay. It was owned and administered by the Kiev *magistrat* until 1810, when it burned down. It was rebuilt by the Russian government and from 1822 was overseen by the imperial cabinet.

Initially the factory employed foreign artisans and craftsmen. Later on Ukrainians were trained, and in 1826 a school was established there to train artists and craftsmen. Most of the Ukrainian workers were state peasants from the villages of Novi Petrivtsi and Valky, in Kiev gubernia. The factory produced plates and dishes, church vessels, decorative vases and plates, porcelain Easter eggs and sculptures, and other objects. The early products followed Western classicist styles, but the factory soon developed a unique, Ukrainian style of porcelain design and decoration based on folk motifs. In the second half of the 19th century it also produced plates decorated with portraits of Ukrainian national figures, such as T. Shevchenko, P. Kulish, and M. Kostomarov; scenes of everyday Ukrainian life; landscapes; and historic buildings and monuments. Articles produced by the Mezhyhiria factory were popular throughout Ukraine, Belarus, and Russia. Some were exported and can be found in museums in Western Europe. In the 1850s the factory started to decline, and in 1874 it was closed.

Mezhyhiria Transfiguration Monastery (drawing by Taras Shevchenko)

Mezhyhiria Transfiguration Monastery (Mezhyhirskiy Spaso-Preobrazhenskyi manastyr). An orthodox men's monastery located in Novi Petrivtsi (formerly Mezhyhiria), near Vyshhorod, 20 km north of Kiev. According to some accounts, it was founded by Greek monks from Mount Athos who arrived in Kiev at the time of its Christianization in 988. Prince Andrei Bogoliubskii allegedly moved it to a more favorable location (hence its name, which means 'between the hills'). According to these accounts, it was destroyed during the Mongol invasion of 1240.

The first written records of the monastery date from 1523, when it was granted a royal charter. Soon after it ceased to exist, but it was renewed under the Greek monk Athanasius, with the backing of I. Kopynsky. It grew quickly and by the mid-17th century had 150 monks. In 1665 it was partially destroyed by a fire, but its growth resumed soon after. In 1687 it was granted **stauropegion*.

The Mezhyhiria monastery was long known as the 'Cossack military monastery' because of its close association with the Cossacks. They were important benefactors, and many of them retired to the monastery. From 1683 all clergymen assigned to the Zaporozhian Sich had to come from there. Supported generously by hetmans (esp I. Mazepa), magnates, metropolitans, and the Zaporozhian Sich (which funded a military hospital there), the monastery became one of the wealthiest in Ukraine. The Mezhyhiria Chronicle, a history of the Volhynia and Kiev regions in the 14th to 17th centuries, was probably written by a monk at the monastery. Monks from Mezhyhiria also assisted in the establishment of other monasteries, notably the **Mhar* Transfiguration Monastery and the **Hustynia* Trinity Monastery.

The main buildings of the complex were built in the late 17th to early 18th centuries. These included the Church of

the Transfiguration (1690), from which the monastery took its name; the Church of SS Peter and Paul (1768–74, funded by P. Kalnyshevsky); the bell tower; and the monks' cells (designed by I. Hryhorovych-Barsky, 1766, rebuilt 1816–17). In 1786 the Russian government closed the monastery and nationalized its extensive landholdings, and in 1787 a massive fire gutted the main buildings. In place of the monastery the *Mezhyhiria Faience Factory was opened in 1798. The monastery was reopened in 1886; in 1908 it housed 14 monks and 23 novices. In the early 1920s the Soviet authorities confiscated its valuables and dispersed its monks, and established an artistic-ceramic technical school in its place. In the 1930s, under the pretext of 'development of the Mezhyhiria area,' the main buildings of the monastery were destroyed, and dachas for Communist party leaders were built in their place.

I. Korovytsky

Mezhyrich Monastery (15th–16th centuries)

Mezhyrich [Mežyrič] (aka Mezhyrichchia). A village (1973 pop 1,700) at the junction of the Zbytynky and the Viliia rivers in Ostrih raion, Rivne oblast. It is first mentioned in a historical document in 1396. In the 15th century the Ostrozky family built a fortified monastery and the Church of the Holy Trinity there. By 1605 the town had the rights of *Magdeburg law. In 1609 Prince K. Ostrozky's grandson granted the church and monastery to the Franciscan order. The church and the towers of the monastery have been preserved. Archeologists have discovered a settlement from the Bronze Age and a fortified settlement from the time of Kievan Rus' near the village.

MGB (Ministerstvo gosudarstvennoi bezopasnosti; Ukrainian: MDB, or Ministerstvo derzhavnoi bezpeky [Ministry of State Security]). A Soviet political police agency formed in February 1941 from parts of the *NKVD and known first as the People's Commissariat of State Security. It was reintegrated into the NKVD in July 1941 and separated from it again from April 1943 to March 1953. In March 1946 it was renamed the MGB. After being merged with the *MVD by L. Beria (March 1953 to March 1954) it was set up as a distinct agency under the name *KGB.

The separation of the state security service from the internal affairs ministry marked a return to earlier Soviet practice, when the *GPU and the *Cheka were distinct organizations. As a Union-republic institution, the MGB was

subordinated to both the all-Union and the Ukrainian governments. This meant that in practice Moscow controlled state security in Ukraine. During the war the MGB organized civil defense, enforced the rationing system, rooted out spies, prevented soldiers from deserting, deported the Volga Germans and the Crimean Tatars, and gathered intelligence on anti-Soviet resistance movements in the Baltics and Western Ukraine. After the war its foreign department oversaw security in the Soviet puppet states in Eastern Europe, supervised Soviet trade missions and representatives abroad, and monitored the activities of Soviet émigrés. The operations department was responsible for all internal security and the espionage and anti-espionage department took over most of the functions of the wartime Smersh. Its Secret Political Office kept watch over the entire civilian population, and special departments oversaw industrial establishments, universities, schools, and religious affairs. In Ukraine the operations department co-operated with the NKVD and the Soviet armed forces in destroying the Ukrainian partisan and nationalist movement after the war. Besides secret police units the MGB maintained large military forces and border troops in Ukraine. Specially trained MGB agents infiltrated the Ukrainian Insurgent Army and similar partisan outfits in Lithuania, Belarus, Latvia, and Estonia. The ministers for state security were V. Merkulov (February–July 1941, April 1943 to October 1946), V. Abakumov (October 1946 to the beginning of 1952), and S. Ignatiev (1952 to March 1953).

B. Balan, O. Yurchenko

Mglin (Ukrainian: Mhlyn). 0-13. A town (1962 pop 6,000) and raion center in Briansk oblast, RF. It is first mentioned in historical documents in the 14th century. Under the Hetman state the town was a company center in Starodub regiment. In 1802 it became a county center in Chernihiv gubernia.

Mhar Transfiguration Monastery (Mharskyi Spaso-Preobrazhenskyi monastyr). A men's monastery located in Mhar, a village on the Sula River near Lubni, in the Poltava region. It was founded by I. Kopynsky in 1619 with the financial support of Princess R. Vyshnevetska. Later it enjoyed the patronage of hetmans B. Khmelnytsky, I. Mazepa, and others and became one of the wealthiest monasteries in Left-Bank Ukraine. The monastery was also active in political affairs. In the 1720s to 1730s, Hegumen V. *Zahorovsky advocated the unification of Left- and Right-Bank Ukraine under one hetman and opposed Muscovite rule in Ukraine; for this he was arrested in 1733 and taken to Muscovy. In 1737–48 the hegumen was Y. *Horlenko. There is evidence that the monks of the monastery supported I. Mazepa's revolt against Russia.

The central Transfiguration Cathedral was designed by J. Baptist and built in 1682–94 with the assistance of M. Tomashevsky and A. Pyriatynsky. The design combined elements of the traditional Ukrainian cruciform three-nave shrine and the Western European basilica, and stands as one of the finest examples of the Ukrainian baroque. Its construction was funded by Hetmans I. Samoilovych and I. Mazepa. It was rebuilt and expanded in the mid-18th century, and two of the original seven cupolas were removed. A unique feature is its stucco decor. The monastery complex included the archimandrite's residence

Iconostasis of the Mhar Transfiguration Monastery cathedral (artist Sysoi Shalmatov, 1762–5)

(1786), the monks' cells (which have not survived), a baroque bell tower (completed in 1844), a hospice (second half of the 19th century), and the Annunciation Church (built in a pseudo-Byzantine style in 1804). St Athanasius Patellarius, a former Patriarch of Constantinople who died in Mhar, is buried in the monastery. In 1908 the Mhar monastery housed 61 monks and novices. It was closed down in 1926 by the Soviet authorities, and the building and grounds were made into a state architectural preserve. Restoration of the complex was begun in the 1980s.

Miakotin, Venedikt [Mjakotin], b 1867 in Gatchina, St Petersburg county, d 1937 in Prague. Russian historian and political activist. He graduated from St Petersburg University (1891), taught in Kiev (1891–1901), studied the social and economic history of the Hetmanate under the guidance of I. Luchytsky, and worked for the journal *Kievskaja starina*. In 1918, after returning to St Petersburg, he emigrated and became a professor at Sofia University in Bulgaria. His historical writings included *Ocherki sotsial'noi istorii Ukrainy v XVII–XVIII vv.* (Studies of the Social History of Ukraine during the 17th–18th Centuries, 3 vols, 1924–6).

Miaskowski, Wojciech (Miastkowski), b ?, d 1650. Polish administrator and diplomat. As chamberlain of Lviv (from 1637) he accompanied A. Kysil to Pereiaslav in February 1649 to conduct negotiations with Hetman B. Khmelnytsky. The diary he kept of the discussions is a valuable historical source for the period. It was first pub-

lished by J. Nemcewicz (1822), and then in *Zbiorek pamiećników o dawnej Polsce* (Collection of Monuments of Ancient Poland, vol 4, 1839) and *Vossoedinenie Ukrainy s Rossiei: Dokumenty i materialy* (The Reunification of Ukraine with Russia: Documents and Materials, vol 2, 1954).

Miastkivsky, Andrii [M'jastkivs'kyj, Andrij], b 14 January 1924 in Sokolivka, now in Kryzhopil raion, Vinnytsia oblast. Poet, prose writer, and translator. He graduated from the Vinnytsia Pedagogical Institute (1962) and worked as a teacher and for various journals and publishing houses. Miastkivsky is the author of many collections of poetry, including *Nad Buhom-rikoiu* (By the River Buh, 1955), *Vid zemli* (From the Earth, 1957), *Taiemnytsia vohniu* (The Secret of Fire, 1976), *Ivaniv vohon'* (Ivan's Fire, 1983), and *Piznia raiduha* (The Late Rainbow, 1984), and he has written numerous books for children. Among his novels are *Vyrii* (South, 1965), *Khloptsi z Bubny* (The Boys from Bubna, 1967), and *Cherez vohon'* (Through the Fire, 1971). His plays include *Don'ka biloi berezy* (The Daughter of the White Birch, 1970) and *Benhal's'kyi kylym* (The Bengal Carpet, 1980). He has translated from Belarusian, Moldavian, Hebrew, and Rumanian.

Michał Korybut Wiśniowiecki (Vyshnevetsky, Mykhailo), b 31 July 1640, d 10 November 1673 in Lviv. King of Poland in 1669–73; son of J. *Wiśniowiecki. He was elected following the abdication of Jan II Casimir Vasa, and he faced considerable pressure to regain the Ukrainian territories lost by Poland in earlier struggles. For that reason he refused to consider Muscovite proposals to make the Treaty of *Andrusovo a lasting agreement. In 1672 he faced a joint Cossack-Turkish attack in Right-Bank Ukraine, which resulted in the further ceding of Ukrainian territory under Polish control by the terms of the (never-ratified) *Buchach Peace Treaty. He was succeeded by his rival, Jan III Sobieski. Wiśniowiecki's biography, by N. Baumgarten, was published in *Orientalia Christiana Periodica* (1935, no. 1).

Michalon Lithuanus (Mykhailo Lytvyn), b and d ? Lithuanian diplomat and memoirist. As an emissary to the Crimea in 1548–55, he compiled a somewhat impressionistic diary of the region and the traditions of its Tatar inhabitants, as well as an effusive account of the abundant natural resources in the Kiev region. They were first published in Basel as *De moribus Tartarorum, Lithuanorum, et Moschorum ...* (1615). They were reprinted in Russian translation in Kiev as *Memuary, otnosiaschiesia k istorii Iuzhnoi Rusi* (Memoirs Relating to the History of Southern Rus', 1890).

Michalovce (Ukrainian: Mykhailivtsi). A district center in Czechoslovakia (1970 pop 29,200), situated in the Eastern Slovak Lowland on the Laborets River. It is the former administrative and trading center of the Ruthenians in Zemplén komitat. Until the late 19th century Michalovce was largely an agricultural town owned by Hungarian and German landowners. In 1876 it became a circle center, and in 1919, a *zhupa* center. Its Orthodox inhabitants (Greek Catholic after 1646) belonged to Mukachiv eparchy. From 1951 the town was the seat of one of the four Orthodox eparchies in Czechoslovakia. The Church of the

Holy Trinity was built by V. Sichynsky in 1933–4, and served as the monastery church of the Redemptorist order until 1949. Most of the Ukrainian population has been Slovakized.

St Mary the Protectress Ukrainian Orthodox Church in Southfield, Michigan

Michigan. A north central state (1990 pop 9,328,784) of the United States, with an area of 251,000 sq km. About 44,000 Ukrainians live in the state (1990), most of them in metropolitan *Detroit, and smaller numbers in Grand Rapids, Flint, Saginaw, Lansing, and Muskegon. The first Ukrainian family settled in Detroit in 1895. The community grew rapidly as jobs in the automobile factories attracted new immigrants. By the mid-1930s there were about 25,000 Ukrainians in Detroit proper, 10,000 in Hamtramck, and 2,000 in Dearborn. In 1939 about 50 Ukrainian organizations in the area formed an umbrella body, the Federation of American Ukrainians in Michigan, which co-ordinated cultural and civic activities and represented Ukrainians in the larger community. During the war it helped raise funds for the American Red Cross and sold war savings bonds. To help Ukrainian refugees it set up the Ukrainian War Relief Committee (1944), which soon merged with the United Ukrainian American Relief Committee. The federation was also one of the founders of the Ukrainian Congress Committee of America. Courses in Ukrainian language and literature are offered at the University of Michigan and Wayne State University, and the University of Michigan developed into a center for graduate studies in Ukrainian history and literature.

Mickiewicz, Adam, b 24 December 1798 in Zavošse, Belarus, d 26 November 1855 in Constantinople. Polish poet. In 1823 he was implicated in the trial of an underground students' society in Vilnius and was exiled to St Petersburg (1824) and then Odessa (1825), whence he made brief trips to the Crimea. He traveled to Moscow in 1826 and there met P. Hulak-Artemovsky and M. Maksymovych. Mickiewicz's major works include *Ballady i romanse* (Ballads and Romances, 1822), *Grażyna* (1823), *Dziady* (The Old Men, 1822–3), *Konrad Wallenrod* (1828), *Księgi narodu polskiego i pielgrzymstwa polskiego* (Books of the Polish People and of the Polish Pilgrimage, 1832–3), and *Pan Tadeusz*

(Master Tadeusz, 1834). His works had a marked influence on Ukrainian literature of the 19th century, particularly on T. Shevchenko. His *Księgi* influenced the Cyril and Methodius Brotherhood (see **Knyhy byticia ukrains'ko-ho narodu*). His works have been translated into Ukrainian by L. Borovykovsky, P. Kulish, M. Starytsky, I. Franko, Lesia Ukrainka, P. Tychyna, M. Bazhan, A. Malyszko, M. Lukash, and M. Rylsky and are included in *A. Mitskievich: Vybrani tvory* (A. Mickiewicz: Selected Works, 2 vols, 1955).

I. Koshelivets

Mickiewicz, Mieczysław, b 1879 in Kamianets-Podil'skyi, Podilia gubernia, d ? Polish political leader. He practiced law in Kiev. Under the Central Rada he served as undersecretary of Polish affairs in the General Secretariat (1917) and, at the beginning of 1918, as minister of Polish affairs in V. Vynnychenko's cabinet.

Microbiological industry. A branch of industry that uses microbiological synthesis to produce various items from a wide variety of raw materials and agricultural by-products. The industry has emerged in recent years and is based on progress made in chemistry, biology, physics, and other sciences. Most of its products, such as animal antibiotics, feed supplements, vitamins, and protein supplements, are used in agriculture. Microbiologically derived substances are used extensively in food preservation and the manufacture of fertilizers, pesticides, and fungicides. Some products have applications in industry (in making molds for brewing, flavorings, extracts, dyes, etc) and in the making of medicinal products.

From 1966 the entire Soviet microbiological industry was under the control of a single body, the Chief Administration of Microbiology of the USSR Council of Ministers. In general the industry is not as developed as it is in Western Europe or North America. In Ukraine there were nine factories of the microbiological industry in 1980. They supplied some 30 percent of all feed antibiotics, 20 percent of all feed supplements, and 35 percent of all fermenting agents produced in the USSR. The largest factories are in Ladyzhyn, Vinnytsia oblast, and Nemishaieve, Kiev oblast. Aspects of the microbiological industry are studied at the ANURSR (now ANU) Institute of Microbiology and Virology and at scientific research institutes of the alcohol, meat, dairy, and food industries.

Microbiology. See Biology.

Middle Beskyd. That part of the *Beskyds lying between the Sian River in the west and Turka and Boryslav in the east and between the Low Beskyd in the northwest and the High Beskyd in the southeast. It has an area of approx 2,800 sq km and is one of the lower and more gently undulating parts of the Carpathians. It rises approx 200–300 m (rarely 400 m) above the surrounding Subcarpathian region. It has a lattice structure, with longitudinal sandstone ridges separated by parallel valleys and depressions carved out of soft schists and clays. The ridges reach elevations of over 1,000 m and are intersected by the Stryvivor, the Dniester, and the Stryi river valleys.

The Middle Beskyd is largely denuded, forests covering only 33 percent of the territory (47 percent is under cultivation, and 16 percent is hayfields and pastures). Before

Middle Beskyd: the Slavske tourist area

1940 it was one of the most settled parts of the Carpathians, with a population density of 80 people per sq km. Most of the inhabitants were *Boikos engaged in agriculture (rye, potatoes, and oats), animal husbandry (mostly sheep raising), forestry, or, in the vicinity of Boryslav, the petroleum industry. Towns and cities in the Middle Beskyd include Peremyshl, Nyzhankovychi, Dobromyl, Khyriv, Staryi Sambir, and Boryslav (on the edges of the Carpathians), and Turka and Ustryky Dolishni (in the mountains). Since 1945 the western part of the Middle Beskyd has been under Polish rule, and in the immediate postwar period the Ukrainian population was forcibly resettled during *Operation Wisła. In recent years, however, some Ukrainians have returned to their former homes.

V. Kubijovyč

Middle-Dnieper culture. A Bronze Age archeological culture of the late 3rd to mid-2nd millennium BC found along the tributaries of the middle and upper Dnieper and the Desna Rivers. It was first identified by V. Gorodtsov in the 1920s. An offshoot of the Corded Ware cultures in Western Ukraine and other parts of Europe, its trademark was pottery with imprints of rope or small etched lines forming horizontal layers of ornamentation. On the basis of changes in pottery style, scholars have divided the culture into early (24th–22nd century BC), middle (22nd–17th century BC), and late (17th–15th century BC) periods of development. Its major economic activities were agriculture and animal husbandry, although it also traded with tribes in the northern Caucasus, the Carpatho-Danube region, and the Baltic region. Houses consisted of surface dwellings with stone hearths. The culture practiced both full body and cremation burials in either dugout graves or kurhans. Material culture remains found at excavation sites included stone querns, flint chisels, arrowheads, copper and amber adornments, stone and bronze tools, and (corded-ware) pottery made from clay with an admixture of fine sand. Notable Middle Dnieper archeological sites

include Iskivshchyna (near Kaniv), *Pekari, and *Mys Ochkynskiyi.

Migrant workers. Workers who take part in seasonal *migration, usually for a period of from one month to half a year, in search of work elsewhere. Unlike migrant workers in other countries, those in the USSR could seek work only in other oblasts and Soviet republics and were not allowed to leave the USSR.

In Russian-ruled Ukraine prior to 1914, seasonal migration for purposes of work was widespread. Because of agrarian overpopulation peasants from the Right-Bank gubernias headed to the fertile regions of Southern Ukraine and northern Caucasia during the harvest and haymaking seasons. During the winter months masses of idle peasants throughout Ukraine moved to the city to earn money until the spring. The Donbas attracted seasonal migrant workers not only from Ukraine but also from other parts of the Russian Empire. After the abolition of serfdom in 1861, particularly during the period of intensive industrial development in the late 19th and early 20th centuries, the number of migrant workers increased rapidly. During the 1880s in the Russian Empire, an average of 5 million temporary internal passports were issued to peasants each year. In the 1890s, 7.2 million were issued, 1.2 million of them in Ukraine. From 1906 to 1910, 9.4 million passports were issued, 2 million of them in Ukraine (approx 1 million for work in agriculture and 1 million for work in industry). In that period seasonal work involved about 10 percent of Ukraine's total population and 20–25 percent of the working population. In regions of high rural overpopulation (the northern and western gubernias) the proportion of the working population was as high as 40–50 percent.

Migrant workers constituted about 80 percent of all those engaged in agricultural labor in Ukraine in the 1880s. After the introduction of farm machinery into Southern Ukraine and the increase in its population, seasonal migration there decreased. By the 1900s the share of seasonal workers in Ukraine's total agricultural labor force had declined to 70 percent. At that time about 20 percent of migrant workers were women, and over half were young people under the age of 20. The proportion of women and young people in the seasonal work force continued to rise. Approximately one-fifth of the migrant workers in Ukraine came from Russia and Belarus. The overall number of migrants changed markedly from year to year, according to the size of the harvest and the corresponding demand for labor. The principal employers were gentry landowners and, to a lesser degree, rich peasants and German colonists.

The migrants made their way to their place of work on foot or sailed down the Dnieper on ships; they rarely used the railroad. They set out in April or May in order to arrive at their destination before the beginning of the harvest season. The main centers for hiring laborers were Kakhivka, Odessa, Mykolaiv, Katerynoslav (now Dnipropetrov-

ske), Znamianka, Shpola, and Kherson, where workers gathered in the tens of thousands. The search for work required a great deal of effort, because the hiring system was badly organized. Only a minority were able to obtain work contracts in advance. The salary was only 40 to 110 rubles a season in agriculture and even less in industry. By the end of the 19th century, nonagricultural workers accounted for half of all seasonal migration. In 1900, for example, of 147,900 migrants from Kiev gubernia, 66,700 found employment as agricultural laborers, 49,500 in large and small factories, and 52,700 as domestic servants. In 1913, of 210,800 migrants from that gubernia, 71,900 found work in agriculture, 63,800 in factories, and 73,000 as servants.

The Stolypin agrarian reforms dealt a significant blow to seasonal work. Peasants received the right to leave the commune and sell the land they owned. It was therefore no longer necessary for them to return from temporary work in the city to the village, and many chose to live in urban centers on a permanent basis. In addition, after colonization of the virgin lands in the Russian Far East, southern Siberia, Kazakhstan, and Central Asia intensified, seasonal migration began to be displaced by emigration.

In Western Ukraine under Austria-Hungary, seasonal migration took place on a smaller scale. In the summer migrants sought agricultural work in Podilia, Transcarpathia, and the Hungarian lowlands, and in both the winter and the summer they took jobs in the lumber industry in the Carpathian Mountains. That industry provided approx 100,000 logging jobs in a given season; most of the labor came from the neighboring regions. A significant number of Ukrainian peasants from Galicia and Bukovyna (in 1907–12 approx 75,000 annually) sought agricultural employment in Germany (chiefly in Prussia), Bohemia, Moravia, and Denmark and in the sugar refineries of Russian-ruled Podilia. In the period between the two world wars seasonal migration declined. Only the Carpathian lumber industry continued hiring significant numbers of Western Ukrainian migrant workers.

There were also itinerant occupations in Ukraine, for the most part those of traveling merchants and tradesmen. Those travelers returned home only for important holidays, to rest, or to take part in agricultural work (if they were also peasants). Often they established their own professional organizations, shared work among themselves, and lived communally. The best-known and largest group of such migrants in central Ukraine were the *chumaks*. In Western Ukraine itinerant occupations were widespread in the Carpathian Lemko (pot menders), Boiko (fruit vendors), and Hutsul (building trades) regions. Traveling precentors and barbers were also common. With the development of modern transportation and industry in the second half of the 19th century, the role of traveling merchants greatly diminished.

After the Revolution of 1917 land was distributed equally, and the gentry and rich peasants disappeared. Consequently, seasonal employment in agriculture was sharply curtailed. Calculations based on the 1927 Soviet agricultural census show that only 1 percent of those working in the field were hired workers. The Soviet government tried to protect the rights of seasonal laborers by forcing their employers to conclude special contracts with each of them and, more important, by classifying employ-

ers as 'exploiters of labor.' As political pressure on the more prosperous villagers increased, the number of migrant workers in agriculture diminished. By 1929 they had virtually disappeared. Seasonal work in industry, however, continued to be widespread. The abolition of internal passport regulations restricting freedom of movement and the peasants' need for cash under the conditions of the New Economic Policy favored the development of seasonal work in the 1920s. In the mid-1920s in Kozelets county, Chernihiv gubernia, for example, 85 per cent of peasant households had a family member working in industry for at least half the year. Peasants found employment usually in light industry, especially food and raw-material processing

Collectivization gave rise to a complete re-examination of the concept of seasonal work. Peasants seeking employment were required to obtain permission from their collective-farm chairmen and a certificate from the rural soviet. Spontaneous seasonal migration was replaced by organized selection and control. In 1933 the USSR People's Commissariat of Labor issued a series of regulations on seasonal labor that limited it to a period of not longer than six months except in forestry, where the term was eight months.

In the postwar period migrant workers were hired through the official organized recruitment of labor. The largest number of seasonal workers were employed by state farms (eg, 160,000 in 1970). Many other seasonal workers were employed in construction, peat extraction, and various branches of the forest industry. In the second half of the 1950s hundreds of thousands of young people were recruited to work in the virgin lands of Kazakhstan and on major industrial projects in the RSFSR.

Seasonal migrant workers continue to play a significant role in Ukraine's economy. In the past, however, it was the peasants who traveled from region to region seeking work. Now urban dwellers make up a significant proportion of migrant workers. As before, the main cause of seasonal migration is the shortage of agricultural labor. In 1986, for example, collective and state farms in the USSR hired 1.4 million seasonal workers. In addition employees of enterprises tied to a particular collective farm (under the system of sponsorship or *sheftstvo*) participated in the harvesting of potatoes and beets and in other fieldwork. In 1986 every factory worker and white-collar employee in Ukraine performed one day of agricultural labor, and every employee of a research institute, two days. Postsecondary students have regularly assisted with the harvest and have been members of construction crews in various rural locales. In 1986 there were 2,823 such crews, with a total of 89,600 people. Aside from the organized dispatching of urban residents to the countryside, work not sanctioned by the government has also been performed by people in search of additional income. By working during the harvest or on construction projects, they have earned considerable sums of money. Such migrant workers have been popularly called *shabashnyky* (literally 'Sabbath violators'), and the attitude toward them of the local population and the supervisors has not always been positive.

Considerable seasonal migration has taken place within the rural population during the harvest period. When the migrant workers finished the harvest in northwestern Ukraine, they moved to the south and west and ultimately made their way to somewhere in the Altai region of

Central Asia or Kazakhstan. A large number of migrant workers also worked for traveling geological expeditions, on railroad and highway maintenance and construction projects, and in resorts throughout the USSR. Several hundred thousand people have continued working in the Carpathian lumber industry during the winter months.

Most of Ukraine's migrant workers have come from the southwestern oblasts, where almost 45 percent of the population is concentrated, but where industry is comparatively poorly developed, and there is a shortage of good agricultural land. Contemporary researchers have noted that seasonal migration is usually a preparatory stage to permanent relocation. Overall, such migration has been declining in Ukraine.

Migration. Permanent or temporary (including seasonal, weekly, and daily) intercontinental, international, or internal change of residence for economic, political, or ecological reasons. Migration has long been part of Ukraine's history. For centuries population groups migrated into previously unsettled territories there. The steppes of *Southern Ukraine were gradually colonized by settlers from the east and north. In the late 19th and early 20th centuries began the mass emigration of Ukrainians living in Russian-ruled Ukraine to other parts of the Russian Empire. A chain of Ukrainian villages stretched across ethnic Russia's Voronezh, Saratov, and Samara gubernias, crossed the Urals, and followed the Trans-Siberian Railway to the shores of the Pacific Ocean. In the years 1896–1914, 1.6 million Ukrainians resettled permanently in regions of the empire east of the Urals. The largest numbers were from Poltava (23 percent) and Chernihiv (17 percent) gubernias, followed by Kiev (12 percent), Kharkiv and Katerynoslav (11 percent), Kherson (9 percent), Tavriia (7 percent), Podilia (4.5 percent), and Volhynia (4 percent) gubernias.

In the late 19th century, mass emigration also began from Western Ukraine under Austria-Hungary. In the years 1895–1913, 413,000 Western Ukrainians emigrated to the New World. The exodus continued in the interwar period and peaked in 1927–9 before diminishing because of the Great Depression.

Under Soviet rule the forced collectivization of the Ukrainian peasantry in 1929–30 was accompanied by the mass deportation and resettlement of so-called *kulak families (approx 1 million people) to Soviet Asia. The enormous population losses caused by the man-made *famine of 1932–3 halted the growth of Soviet Ukraine's cities, exhausted the peasantry's demographic potential, and resulted in a significant decline in the migration of Soviet Ukrainians. During the Stalinist *terror of the late 1930s another wave of mass deportations of Ukrainians occurred.

Mass deportations and population losses and transfers also took place during the Second World War. The evacuation from Ukraine to Soviet Asia alone encompassed 1.9

million people, 1.8 million of them from central and eastern Ukraine. The largest numbers of evacuees (a total of 71 percent) were from Kiev (301,900), Kharkiv (270,100), Dnipropetrovske (209,900), Staline (now Donetsk, 182,700), Odessa (182,700), Zaporizhia (122,200), and Luhanske (106,300) oblasts. Between 1941 and 1946 the population of Ukraine's eastern oblasts declined by 19.4 percent, and that of its western oblasts (Lviv, Drohobych, Stanyslaviv [now Ivano-Frankivske], Volhynia, Rivne, and Ternopil) declined by 29 percent. The larger losses of Western Ukraine, from which only 114,700 people were evacuated by the Soviet regime during the German invasion, were the result of longer Nazi occupation and terror, during which the Jewish population was almost totally annihilated; the deportation to Siberia and Soviet Asia of nearly 1 million 'nationalist' Ukrainians and Poles; and the immediate postwar transfer of most of the region's Polish inhabitants to Poland.

In the postwar period migration from and into Ukraine was primarily 'internal,' that is, from and into the other Soviet republics. The principal partner in Ukraine's migration relations was the RSFSR, which supplied more immigrants than Ukraine did out-migrants. Since 1986, however, the number of permanent emigrants from Ukraine, primarily to Israel, Germany, the United States, Canada, and Greece, has grown considerably. In 1987–9 alone 74,400 inhabitants of Ukraine emigrated from the USSR.

From 1945 the migration of Ukrainians from Ukraine to other parts of the USSR significantly influenced Ukraine's population development. In the years 1961–89 Ukraine's urban population increased by 7.6 million people and the rural population decreased by 6.6 million (see table 1). In those years the principal source of formation of the urban population was migration, which accounted for 50 percent of the increase, and more during certain five-year periods. In 1988, 73.2 percent of the increase in Ukraine's urban population resulted from intrarepublican migration. Of that increase, 55.1 percent resulted from intra-oblast migration from rural to urban areas, and 18.1 percent resulted from interoblast migration. An additional 8 percent increase in Ukraine's urban population resulted from administrative-territorial changes that turned suburban regions into urban centers (see table 2).

Migration processes have played a determining role in the decline of Ukraine's rural population. In the 1960s and 1970s the natural increase in Ukraine's rural population partly compensated for rural out-migration. But since 1979 – a watershed year in the demographic development of the Ukrainian countryside – rural depopulation has been nationwide and has thereby aggravated the detrimental effect of rural out-migration. The average annual out-migration of Ukraine's rural inhabitants increased from 0.5 percent in 1959–69 to 1.2 percent in the 1970s and 1980s. The general decline in Ukraine's rural population in 1979–88 was 2.1 million people, of which 82.8 percent is attributable to out-migration. Since the mid-1980s, however, because of the exhaustion of Ukraine's human resources, the shortage of urban housing, and growing economic and social crises, there has been a discernible trend toward reduced levels of rural out-migration to the cities.

In-migration into rural areas in Ukraine has also become a widespread phenomenon. In recent decades more

people have migrated into rural areas than into urban centers. Of the total number of rural in-migrants in 1985, 42.3 percent had lived in rural areas for less than 10 years, and 27.7 percent had lived there for more than 25 years. For urban in-migrants, the corresponding figures were 34.8 percent and 30.6 percent (see table 3). Reflected in the disparity are the greater tendency of rural out-migrants to remain in urban centers, the growing migrational mobility within the rural population, and the relative 'youthfulness' of migration processes within rural areas.

Impact on national composition. The growth of Ukraine's urban population has occurred primarily through the in-migration of Ukrainian peasants (67.6 percent). The in-migration of *Russians has also been substantial, however; it has constituted 25.4 percent of the mechanical increase in the urban population. The in-migration of other non-Ukrainians has been insignificant (a total of approx 7 percent) and consists mostly of Belarussians (1.4 percent), Moldavians (1 percent), and Tatars (1.8 percent). Longtime Ukrainian-Russian migration relations have had a substantial impact on Ukraine's national composition. According to the 1989 Soviet census there were 11.4 million Russians, constituting 22.1 percent of the population. In the decade 1979–89 nearly a quarter of the Jews living in Ukraine emigrated. Nonetheless, in 1989 they still constituted the third-largest ethnic group –

486,000, or 0.9 percent of the population. Besides Russians and Jews 110 other ethnic minorities live in Ukraine, where in 1989 they constituted a total of 4.3 percent of the population. Of them the Hungarians, Gagauzy, Greeks, Moldavians, Rumanians, and Bulgarians live compactly. The population of Ukraine's Poles declined in 1979–89 by 15 percent; of Czechs, by 14 percent; of Slovaks, by 9 percent; of Greeks, by 5 percent; of Bulgarians, by 2 percent; and of Hungarians, by 1 percent.

In November 1989, after the Soviet government declared the forced deportation of peoples by the Stalinist regime to have been illegal and criminal in nature and guaranteed the rights of those peoples, the Crimean Tatars, who had been deported to Soviet Asia in May 1944, began returning en masse to their homeland in the Crimea. By 1991 approx 100,000 Crimean Tatars had resettled there.

In 1989 nearly 6.8 million Ukrainians – 15.3 percent of all Ukrainians in the USSR – were living in the USSR outside Ukraine: 4.4 million (9.9 percent) in the RSFSR, 897,000 (2 percent) in Kazakhstan, 600,000 (1.4 percent) in Moldavia, 291,000 (0.7 percent) in Belorussia, 153,000 (0.4 percent) in Uzbekistan, 108,000 (0.2 percent) in Kirgizia, 92,000 (0.2 percent) in Latvia, 52,000 (0.1 percent) in Georgia, 48,000 (0.1 percent) in Estonia, 45,000 (0.1 percent) in Lithuania, 41,000 (0.09 percent) in Tadzhikistan, 36,000 (0.08 percent)

in Turkmenistan, 32,000 (0.07 percent) in Azerbaidzhan, and 8,000 (0.02 percent) in Armenia.

Ecological factors. Soviet industrial and agricultural policies have resulted in the *pollution and degradation of Ukraine's natural environment. The degradation culminated in the 1986 accident at the Chernobyl Atomic Energy Station, which has had obvious, if not conclusive, negative effects on the population. The evacuation of the inhabitants in the 30-km zone around Chernobyl and their

resettlement in other regions of Ukraine were only the first stage of the 'ecological' migration from an imperiled region. Because of Chernobyl, plans were made to resettle 14,800 families in 1991 from several other raions in Kiev, Zhytomyr, and Rivne oblasts. It is likely that environmental degradation in other parts of Ukraine, particularly in Zaporizhia, Dnipropetrovske, Dniprodzerzhynske, Kryvyi Rih, Chernivtsi, and other over-polluted cities and surrounding raions, will make migration imperative in the future.

Migration and marginalization. One of the significant consequences of migration processes in Ukraine has been social marginalization. In the years 1960–90 half, and in certain subperiods over half, of urban population growth in Ukraine is attributable to in-migration. In that period 9 out of 10 new urban residents were children of peasants. It is they who have defined the specificity of existing urban social relations. Social marginalization has resulted from the interaction, or lack thereof, between recent in-migrants and established urban dwellers. A distance is constantly maintained between them and is manifested by their different social status and their divergent aspirations, abilities, and potential for realizing their goals. The inequality between the two social groups has frequently resulted in tension and conflict. The pattern is repeated with every new in-migration.

Adaptation by new residents in Ukraine's cities was average for the USSR as a whole and reached 150 per 1,000 new arrivals in 1988. As a rule most in-migrants are young. Pensioners constitute only 6.3 percent of them and 5.8 percent of those who leave the cities. In the urban population in 1988, in-migrants represented 30 per 1,000 persons younger than 16, 51 per 1,000 persons of official working age (women 16 to 54 and men 16 to 59), and 15 per 1,000 officially retired persons (women 55 and older and men 60 and older). The corresponding figures for out-migrants from cities in the three age-groups were 20, 43, and 11 per 1,000. Urban growth through in-migration is thus realized primarily because of young and working-age people. Ukraine's urban population is characterized by a relatively high migration turnover of well-educated people (postsecondary and special-secondary students from other places living in cities only for the duration of their studies and those leaving for employment elsewhere after graduation) and those called up for military service.

TABLE 3
Population of Ukraine changing their place of permanent residence (percentages)*

	Duration of stay in last place of residence						
	Less than 2 yr	2–5 yr	6–9 yr	10–14 yr	15–19 yr	20–4 yr	25+ yr
Total population	10.0	15.3	11.2	13.3	10.3	10.0	29.9
Males	10.5	15.9	11.7	13.7	10.5	10.3	27.4
Females	9.7	14.8	10.9	12.9	10.2	9.8	31.7
Urban population	9.3	14.5	11.0	13.5	10.7	10.4	30.6
Males	9.5	14.8	11.4	13.9	10.9	10.9	28.6
Females	9.3	14.2	10.7	13.2	10.5	10.1	32.0
Rural population	12.3	17.9	12.1	12.5	9.0	8.5	27.7
Males	13.9	19.6	12.8	12.9	9.1	8.1	23.6
Females	11.1	16.7	11.6	12.1	8.9	8.8	30.8

*Based on a selected demographic study of people who have moved since birth, conducted in 1985

Of the in-migrants contributing to urban population growth, 55.3 percent have obtained general secondary education diplomas, 21.4 percent have incomplete secondary educations, and 8.3 percent have only primary educations. Ukraine's cities have a great need for skilled workers. Lack of such workers is one of the economic reasons for the influx of unskilled and semiskilled labor into the cities.

Migratory birds (Ukrainian: *pereletni ptytsi*). Migration is a part of the life cycle of some birds. It is an annual phenomenon involving whole populations of birds in long-range displacements from their breeding grounds to wintering sites and back. Migration depends on a complex internal rhythm affecting the whole organism, particularly the endocrine glands. The geographical position of Ukraine and its climatic variations support several patterns of migratory behavior among the more than 150 species of migrating birds found there: seasonal translocation, overflights, mixed sedentary/migratory movements, and vertical movements. Most birds fly south or southwest for the winter, but some prefer eastern directions (finch, willow *warbler). Massive seasonal translocation is typical for *swallows, *storks, geese, glareoles, *sandpipers, *nightingales, and other birds. The birds arrive in April or May and depart in September or October. Hawks, *owls, ducks, Palla's sangrouse, Bohemian *waxwings, and willow ptarmigans arrive from the northern regions to winter in Ukraine. Stifftails (Ukrainian: *savky*), *swans, some golden-eye ducks, and eiders can be seen only in overflights to other areas. Redstarts and rock par-

migans move from higher mountain elevations to warmer valleys. Pointed snipes, stone curlews, water *rails, and plovers migrate south from moderate and cold climates but are sedentary in warmer southern Ukraine. Many water birds remain in their breeding areas as long as the lakes and rivers stay ice-free.

Mii pryiatel' (My Friend). A monthly illustrated children's magazine published in Winnipeg since 1949 by the Ukrainian Catholic church and edited by Rev S. Izhyk. Since 1968 it has appeared as a supplement to *Postup*.

Volodymyr Miiakovsky (portrait by Liuboslav Hutsaliuk)

Miiakovsky, Volodymyr [Mijakovs'kyj] (pseud: V. Porsky, B. Stokhid, V. Svitlytsky, V. Varlamov, B. Yanyivsky), b 18 July 1888 in Kovel, Volhynia gubernia, d 22 March 1972 in New York City. Literary scholar, historian, and archivist; full member of the Shevchenko Scientific Society from 1947 and the Ukrainian Academy of Arts and Sciences (UVAN) from 1948. He studied at Kiev (1906-7) and St Petersburg (1907-11, 1912-13) universities and then taught in gymnasiums in St Petersburg and did research in the state archive there. After the Revolution of 1917 he collected documents pertaining to Ukrainian studies in the archives of the tsarist censorship administration and published them in the Kievan journal *Nashe mynule*. Miiakovsky moved to Kiev in December 1917 and worked as chief cataloger in the archives and libraries division of the Ministry of Education. He succeeded V. Modzalevsky as director of archival administration and the Kiev Central Historical Archive in 1920. In the 1920s he was a member of the VUAN Commission for the Publication of Monuments of Modern Literature (headed by S. Yefremov), the Kiev branch of the Taras Shevchenko Scientific Research Institute, and the VUAN Archeographic and Archeological commissions. He was also an associate of the Ukrainian Scientific Institute of Bibliology, and from 1926 he administered the Shevchenko House and Museum in Kiev. Miiakovsky contributed to *Nashe mynule*, *Knyhar*, *Literaturno-naukovyi vistnyk*, *Ukraina*, *Bibliolichni visti*, *Za sto lit*, *Chervonyi shliakh*, *Zhyttia i revoliutsiia*, and other journals in the 1920s.

In 1929 Miiakovsky was arrested and sentenced in one of the show trials of the *Union for the Liberation of Ukraine to five years in a labor camp in Karelia, where he worked as a statistician. From 1934 to 1941 he worked in various medical research institutions in Kiev. During the wartime German occupation he attempted to renew the

work of the Kiev Central Historical Archive. A postwar refugee in Germany from 1945, he was a founding member of the UVAN and *MUR and was a professor at the Ukrainian Free University in Munich (1948–50). In 1950 he emigrated to New York, where he remained UVAN secretary-general and curator of the UVAN Archives and Museum, which he had founded.

Miiakovsky's research dealt with the history of social, intellectual, and political movements in 19th-century Ukraine (eg, the Decembrists, the Cyril and Methodius Brotherhood, the hromadas) and 19th-century Ukrainian and Russian literature, particularly T. Shevchenko. He was the author of numerous articles and reviews. His major contributions are a biography of A. Radishchev (1918); booklets on revolutionary appeals to the Ukrainian people in 1850–70 (1920), the correspondence of the members of the Cyril and Methodius Brotherhood (1928), the Shevchenko House and Museum (1929), *Bakunin and the Russian Jacobins and Blanquists as Evaluated by Soviet Historiography* (1955), and D. Antonovych (1967); and articles on P. Kulish's educational activity (1919), M. Hulak (1926, 1928), and O. Markovych (1927) and T. Shevchenko (1962) in the Cyril and Methodius Brotherhood. He coedited (with Yefremov) a collection of articles on the Decembrists in Ukraine (1926) and (with V. Bazylevych and L. Dobrovolsky) a collection of archival materials on the Decembrists in Ukraine (1926); wrote biographical notes for vols 3 and 4 of the complete collection of Shevchenko's works, edited by Yefremov (1927, 1929); edited a book on Shevchenko's 'Moskaleva krynytsia' (Soldier's Well, 1930) and *Kostomarov's Book of Genesis of the Ukrainian People* (Yanivsky, 1954); and coedited (with G.Y. Shevelov) *Taras Ševčenko, 1814–61: A Symposium* (1962). A book containing some of his articles and a bibliography of his works, edited by M. Antonovych, was published in New York in 1984.

A. Zhukovsky

Miius River [Mijus] (also Mius). A river that flows through Luhanske, Donetske, and Rostov oblasts. It is 258 km long and drains a basin area of 6,680 sq km. The Miius has its source in the Donets Ridge and empties into a liman at Tahanrih Bay, on the Sea of Azov. The river freezes over in December and thaws in March. Its main tributaries are the Krynkha Hlukha (right) and the Naholna Kripenka (left). Several water reservoirs have been built on the Miius. The river is used for water supply and irrigation.

Miiusynske [Mijusyns'ke]. V-19, DB III-5. A city (1989 pop 7,800) on the Miius River under the jurisdiction of the Krasnyi Luch city council in Luhanske oblast. It originated in 1923, when the Shterivka Hydroelectric Station was constructed, and was called Shterhres. In 1965 the settlement was renamed and promoted to city status. It has a workshop of the Donbasenerho machine repair plant and a reinforcement-products plant.

Mikeshin, Mikhail [Mikešin, Mixail], b 21 February 1835 in Platonovo, Smolensk gubernia, d 31 January 1896 in St Petersburg. Belarusian sculptor and graphic artist. A graduate of the St Petersburg Academy of Arts (1858), he created a number of monuments in the Russian Empire, including that of Hetman B. Khmelnytsky in Kiev (1879–

Mikhail Mikeshin: statue of Hetman Bohdan Khmelnytsky (bronze, 1888) in Kiev's Khmelnytsky Square

88), and illustrated editions of T. Shevchenko's *Iliustrovanyi Kobzar* (Illustrated Kobzar, 1896) and N. Gogol's novels (1869–72). In his journal, *Pchela* (1876–8), he published his own articles, recollections, and drawings. In his recollections he mentions Shevchenko, whom he knew personally. A. Savinov's book about Mikeshin appeared in Moscow in 1971.

Mikhnevych, Petro [Mixnevč], b 22 October 1901 in Berdychiv, Kiev gubernia. Stage and film actor. In 1925 he completed study at the Lysenko Music and Drama Institute in Kiev. Then he worked as an actor in the Kiev Ukrainian Drama Theater (1926–31), the Kharkiv Theater of the Revolution (1931–40; from 1935 the Kharkiv Lenin Komsomol Theater), and, from 1940, the Chernivtsi Oblast Ukrainian Music and Drama Theater. Mikhnevych also acted in many films, including *Kyianka* (The Kiev Girl, 1958).

Mikhnevych, Yosyf. See Mykhnevych, Osyp.

Mikhnov, Anatolii [Mixn'ov, Anatolij], b 1 July 1909 in Radul, Horodnia county, Chernihiv gubernia, d 3 October 1970 in Kiev. Internal medicine specialist. A graduate of the Kiev Medical Institute (1933), he served on its faculty (1944–50) and worked at the Ukrainian Scientific Research Institute of Clinical Medicine (now Cardiology), where he became director in 1952. His work dealt with the effects of

liver disorders on metabolism, with rheumatism, and with the approval of new drugs for clinical use.

Mykola Mikhnovsky

Archbishop Yurii Mikhnovsky

Mikhnovsky, Mykola [Mixnovs'kyj], b 1873 in Turivka, Pryluka country, Poltava gubernia, d 3 March 1924 in Kiev. Political and community activist, publicist and lawyer, and ideologue of Ukrainian nationalism. He studied law at Kiev University and during his student years was one of the initiators (1891) of the *Brotherhood of Taras. His speech at the T. Shevchenko anniversary celebrations in Poltava and Kharkiv in 1900, printed in Lviv as *Samostiina Ukraïna* (Independent Ukraine), became the program of the *Revolutionary Ukrainian party (RUP) in its early period. When most of RUP's membership abandoned an independentist platform, he left it to assist in organizing the *Ukrainian People's party (UNP, founded in 1902) and wrote the 'Ten Commandments' and the 'Program' to underscore its commitment to full Ukrainian statehood. A representative of the citizens of Kharkiv during the unveiling of the Kotliarevsky monument in Poltava in 1903, Mikhnovsky insisted in speaking in Ukrainian rather than in Russian and inspired the rest of the delegates at the gathering to follow suit. He popularized independentist ideas in various periodicals (short-lived because of a lack of funds) that he edited or published, including *Samostiina Ukraïna* (Lviv 1905), *Khliborob* (Lubni 1905), *Zaporizhzhia* (Katerynoslav 1906), and *Slobozhanshchyna* (Kharkiv 1906). A somewhat more durable publication was *Snip*, which he published in Kharkiv in 1912–13.

During the Revolution of 1917 Mikhnovsky was in Kiev propagating the idea of Ukrainian independence and the formation of a national army. He organized the *Ukrainian Military Club (which he represented in the Central Rada) as well as the *Khmelnysky Regiment. A member of the presidium of the First All-Ukrainian Military Congress (18–21 May 1917) and the Ukrainian General Military Committee, he became frustrated by the opposition to his independentist ideas. He was a key figure in the attempt by the *Polubotok Regiment to seize power on 18 July 1917. Early in 1918 he began working with the Ukrainian Democratic Agrarian party. After P. Skoropadsky pronounced the federation of Ukraine with Russia, Mikhnovsky joined the anti-hetman insurrection. With the Bolshevik occupation of Ukraine, Mikhnovsky was imprisoned, and upon his release he fled to the Kuban,

where he worked in co-operatives and as a teacher at the Pedagogical Technical School in Poltava Stanytsia. He returned to Kiev in the spring of 1924, but incessant persecution by the Soviet authorities led him to suicide.

Mikhnovsky was the ideologue of independent Ukrainian statehood. He formulated the principles of Ukrainian nationalism in the 'Ten Commandments' of the UNP and then developed them into a social program that foresaw an inevitable struggle with both capitalism and the internationalist tenets of socialism and communism. He favored 'a single united, free, and independent Ukraine ... from the Carpathians to the Caucasus.' Mikhnovsky ultimately proved intolerant of others and unable to unite a strong following to realize his ideas. Nevertheless, his ideas had a significant impact on the post-First World War generation of the 1920s and 1930s, particularly in Western Ukraine and in the emigration. The nationalist *Ukrainian Student Organization of Mikhnovsky is named in his honor.

V. Yaniv

Mikhnovsky, Yurii [Mixnovs'kyj, Jurij], b 6 May 1868 in Pishchany, Poltava gubernia, d 1937 in Kiev. Archbishop of the Ukrainian Autocephalous Orthodox church (UAOC). He studied at the Poltava Theological Seminary and was ordained in 1894; he then worked as a clergyman in Pereiaslav and Zolotonosha counties. At the first All-Ukrainian Orthodox Church Congress in October 1921, he was consecrated archbishop of Chernihiv, and in 1922 he was transferred to Zolotonosha. In 1923–31 he did not have an eparchial see, and served as a parish priest throughout the Poltava region. In 1931 he moved to Kiev, where he was vicar of the St Sophia Cathedral until the Soviet authorities forced him out, in 1934. In 1937 Mikhnovsky was arrested and shot by the NKVD.

Mikhnovsky Student Association. See Ukrainian Student Organization of Mikhnovsky.

Miklosich, Franz (Miklošič), b 20 November 1813 in Radomerščak, Slovenia, d 7 March 1891 in Vienna. Prominent Slovenian Slavist; member of the Austrian Academy of Sciences from 1851. A graduate of the universities of Graz (PH D, 1838) and Vienna (D JUR, 1841), he was a professor of Slavic philology and literature at Vienna (1850–86), where he established a comparative-historical school of Slavic grammar. Among his students were the Western Ukrainian linguists M. Osadtsa, O. Ohonovsky, and S. Smal-Stotsky. His works *Vergleichende Grammatik der slavischen Sprachen* (4 vols, 1852–75), *Die slavischen Ortsnamen aus Appellativen* (1872–4), *Die türkischen Elemente in den südost- und osteuropäischen Sprachen* (1884–90), *Etymologisches Wörterbuch der slavischen Sprachen* (1886), and *Über die Wanderungen der Rumänen in den Dalmatischen Alpen und den Karpaten* (1879) are rich in factual information, including information about the Ukrainian language. In his *Beiträge zur Kenntnis der Zigeunermundarten* (1872–80) he analyzed the Romani language in Ukraine. Miklosich was one of the first Western linguists to treat Ukrainian as a

distinct language. He supported the attempts by Galicia's Ukrainians to develop a literary language based on the vernacular and believed that their alphabet should be Latinized. Miklosich's methodology prevailed among Ukrainian linguists in Galicia and Bukovyna until the advent of structuralism. A book of letters to him from Ukrainian Slavists was published in Kiev in 1988.

O. Horbach

Miklukho-Maklai, Nikolai [Mikluxo-Maklaj, Nikolaj], b 17 July 1846 in Rozhdestvenskoe, Borovichi county, Novgorod gubernia, Russia, d 14 April 1888 in St Petersburg. Anthropologist, ethnographer, and geographer of Ukrainian descent. After studying at St Petersburg (1863), Heidelberg (1864), Leipzig (1865), and Jena (1866–8) universities he made 10 voyages to the Pacific Ocean and spent 15 years (1871–86) exploring the geography and observing the natives of New Guinea, the Philippines, Indonesia, Melanesia, Micronesia, and Australia. He argued for the unity and equality of all races and defended the rights of the native peoples. His travel diaries were published in 1923, and a five-volume collection of his works in 1950–4. E. Webster's *The Moon Man* (1984) is a biography of him and an assessment of his scientific contribution.

Mile. See Weights and measures.

Miliaieva, Liudmyla [Miljajeva, Ljudmyla], b 13 November 1925 in Kharkiv. Art historian. A graduate of Kiev University (1950), since 1962 she has lectured at the Kiev State Art Institute. She has written articles on Ukrainian art history and books on K. Trutovsky (1955), the murals of Potelych (1969), 14th- to 17th-century Ukrainian art (1963, with H. Lohvyn), and medieval Ukrainian painting (1976, with Lohvyn and V. Svientsitska).

Miliakh, Oleksander [Miljax], b 29 August 1906 in Symferopil, Tavriia gubernia, d 25 October 1985 in Kiev. Electrical engineer; corresponding member of the AN URSS (now ANU) from 1964. He graduated from the Kharkiv Electrotechnical (now Polytechnical) Institute (1931) and worked at the ANU Institute of Electrodynamics (from 1947, and as director in 1959–73). His main technical contributions were in the areas of complex circuit analysis, electrodynamics, and electromagnetism. He supervised the design of automatic machinery for spacecraft, stabilizers, inverters, energy converters, frequency converters, and other electric machinery.

Milanych, Atanas [Miljanyč], b 1902, d 30 April 1987 in New York. Economist and civic leader. A graduate in civil engineering at Danzig University, he organized the *Prombank in Lviv to raise capital for new Ukrainian industrial firms and served as one of its directors (1936–9). During the Second World War he worked for the Ukrainian Central Committee as its economic (1940–1) and financial (1944–5) manager, and for the Ukrainian Sugar Board in Kiev as its financial director (1942–3). He fled to Germany in 1944 and served as financial manager on the Central Representation of the Ukrainian Emigration in Germany. After settling in the United States, he was active in the Plast Ukrainian Youth Association and other Ukrainian groups. He was founder and director of the *Ukrainian Center for Social Research in New York and chief editor

Atanas Milanych

of *Ukrains'ki poselennia: Dovidnyk* (Ukrainian Settlements: A Handbook, 1980).

Military Board of the Division Galizien (Viiskova uprava Dyvizii Halychyna). A committee formed in Lviv in April 1943 to help organize the *Division Galizien. Later its activities included providing care and aid to soldiers' families and satisfying the cultural needs of the division. It published the weekly paper *Do peremohy* (1943–5). The board consisted primarily of former officers of the Ukrainian Galician Army; its chairman was Col A. Bizanz, and its secretary was Capt O. Navrotsky. Its head office moved from Lviv (1943–4) to Luben and finally to Vienna. Besides a head office, it had a representative in each county of Galicia. The board dissolved itself on 22 August 1947 in Munich. A book about the board, by R. Krokhamliuk, was published in Toronto in 1978.

Military Committee. See Ukrainian Military Committee.

Military congresses. See All-Ukrainian military congresses.

Military decorations. Ukrainian armies of the 1917–20 period did not award military decorations, although regulations governing such awards were approved by the Hetman government in 1918 and the Galician government in 1918–19. Neither the Central Rada nor the UNR Directory established any military decorations. Some Ukrainian officers wore decorations they had earned in the Russian or Austrian army.

The secretary of military affairs of the Western Ukrainian National Republic established a variety of decorations for soldiers of the Ukrainian Galician Army (UHA). In November 1918 the Defender of Lviv decoration, in the form of a cross, was established to be awarded to both military and civilians participating in the campaign of 1–21 November 1918. In April 1919 a more comprehensive regulation established decorations for bravery, meritorious service, and wounds. The Trident (4 classes: gold, silver, bronze, and iron) was the decoration for bravery in action and for exceptional service. These and other decorations, however, were never awarded because of the difficult circumstances in which the UHA found itself. Instead, UHA officers were recognized for bravery by promotion to a higher rank.

In the post-1920 period, the UNR government-in-exile

Military decorations. Clockwise, from top left: the UNR Symon Petliura Cross (est 1932), the UNR Directory Cross (est 1929), the Mazepa Cross of the Ukrainian Sich Riflemen (est 1940), the UNR Military Cross (est 1953), the UNR Order of the Iron Cross (est 1920), and the Cross of the Legion of Ukrainian Sich Riflemen (est 1918)

established and awarded the Iron Cross (1920), for participation in the First Winter Campaign, and the Symon Petliura Cross (1932), for participation in any battles or campaigns of the UNR Army. Commemorative medals or crosses were also issued by various veterans' associations, usually in conjunction with specific anniversaries, such as the Division Galizien's 10th anniversary of the Battle of Brody.

The only military decorations awarded to Ukrainian soldiers in active service were those of the Ukrainian Insurgent Army (UPA). General Order No. 3/44 on 27 January 1944 created seven degrees of recognition for bravery, the highest being the Gold Cross of Combat Merit First Class, followed by three degrees of the Cross of Merit (gold, silver, bronze) and stars for wounds received in action. On 6 June 1948 the Ukrainian Supreme Liberation Council introduced a medal for combat in particularly difficult circumstances. Awards of UPA decorations were regularly announced in military orders and sometimes in underground publications. The actual crosses and medals were not made available until 1951, when a limited number were produced from designs prepared by N. Khasevych. The last UPA awards were made in October 1952.

P. Sodol

Military district (*viiskova okruha*). An organizational unit consisting of the military institutions and bodies located within a specific geographic region. In the Russian Empire, military districts were established in 1862, and Ukraine was divided into the Kiev and Odessa military districts. The old districts remained intact under the Central Rada and were redrawn only in September 1918 by the Hetman government into the following military districts: Kiev, Volhynia, Odessa, Chernihiv, Poltava, Kharkiv, and Katerynoslav. The plan to set up one army corps in each *okruha* could not be implemented before the Hetman was overthrown. The Ukrainian Galician Army divided Galicia into 13 military districts.

Under the Soviet regime the entire Ukrainian SSR formed one military district. In 1935 it was divided into the Kiev, Odessa, and Kharkiv military districts, and in 1939 the Lviv (renamed the Carpathian in 1946) Military District was added. Later the Tavriia Military District was created. Since 1956, there have been three districts: Kiev, Odessa, and Subcarpathia.

In 1943 the Ukrainian Insurgent Army (UPA) divided its area of operations into military districts, which were about as large as oblasts. The UPA-North (in Volhynia and Polisia) consisted of four, the UPA-South (in central Ukraine) of at least two, and the UPA-West (Galicia) of six military districts. In 1945 the number of military districts was reduced to two in the north and four in the west ('Buh' [Lviv], 'Hoverlia' [Carpathians], 'Lysonia' [Podilia], and 'Sian' [Zakerzonnia]). The military units within a district constituted a group, which was equivalent to an infantry division. In 1949 the UPA military districts ceased to function.

P. Sodol

Military education. From the Middle Ages to the Cossack period young men in Ukraine received practical military training at the courts of princes and nobles or at the Zaporozhian Sich. A young Cossack served as a novice for three years before he received full status. In the late 18th century the nobility of the Russian Empire began to send its sons to military schools. In the 19th century, secondary military schools provided a specialized education for future officers. Admission was weighed in favor of young men who had completed a general secondary education in cadet schools, which were restricted largely to officers' sons. In 1862–82 these cadet schools were replaced by military gymnasiums. Naval officers began their education at the Naval Cadet School.

The first cadet schools in Ukraine were set up in Kiev and Poltava. Later, similar schools were opened in Odessa and Sumy. Infantry schools were established in Kiev, Odessa, and Chuhuiv; a cavalry school in Yelysavethrad; and an engineering school in Odessa. During the First World War, lieutenant schools with an accelerated course were opened. Many officers who later served in the UNR Army were graduates of these schools. Higher military education was provided by academies, such as the Mykolaiv General Staff Academy (est 1832) and the Artillery, Military Engineering, Military Law, Military Medicine, Naval, and Quartermaster academies. Noncommissioned officers (NCOs) were trained in teaching companies attached to army units.

In Austria higher military education was offered by the academy in Wiener-Neustadt, and in Hungary by the

academy in Budapest. Specialized secondary education was provided by cadet schools. Lower-ranking officers of the reserve were trained in what were known as one-year volunteer schools.

In the UNR, plans for a system of military education were never realized. The Hetman government, however, managed to set up an Officer Instruction School in Kiev. The UNR Army had its own unified military youth schools for training officers (see *Officer schools of the Army of the UNR). The Ukrainian Galician Army had altogether five schools with accelerated courses (see *Officer schools of the Ukrainian Galician Army). During the interwar period some Ukrainians graduated from military schools in Poland, Hungary, Rumania, and Czechoslovakia.

In the Soviet Ukraine, apart from the many Russian schools for the various branches of the military, Red officer schools were set up in Kharkiv (1921–34) and Sumy, to train professional officers for Ukraine's territorial divisions. Their language of instruction was Ukrainian. Several higher military schools operated in Ukraine, including the Cavalry and Communications academies in Kiev and the Academy of Military Economy in Kharkiv. Other academies were situated in Moscow and Leningrad. In 1943–4, closed secondary schools, known as *Suvorov army cadet schools and Nakhimov navy cadet schools, were introduced. The Soviet network of military schools was constantly reorganized.

During the Second World War young officers of the First Ukrainian Division of the Ukrainian National Army (Division Galizien) were trained at the Junker academies of the German SS. The Ukrainian Insurgent Army had an officer school, which graduated four classes, and several schools and courses for NCOs.

Military estates (*viiskovi maietnosti*). Fields, pastures, mines, buildings, mills, distilleries, and other properties in Left-Bank Ukraine that belonged to the Cossack army in the second half of the 17th and in the 18th century. They were confiscated from the Polish king, magnates, and nobles who were forced out of Ukraine during the Cossack-Polish War (1648–54). Some of these estates were immediately distributed among Cossack *starshyna* (see *rank estates), and the rest were transferred to the Cossack army. All the taxes collected from the *common peasants who lived on these lands were used for the needs of the Cossack army and administration. Eventually, many of these estates fell into the hands of the Cossack *starshyna* or the tsar, who then granted them to Russian nobles or Cossacks. In this manner, Cossack families such as the Apostol, Bezborodko, Galagan, Rozumovsky, and Khanenko families amassed huge estates and became important landowners. With the abolition of Ukrainian autonomy in the late 18th century, the remaining military estates were appropriated by the Russian state, and the peasants on them were reduced to state peasants.

Military formations. During periods of independence, armed forces have been an integral part of the Ukrainian state. In periods of foreign domination Ukrainians served in foreign armies, sometimes in separate ethnic detachments. At the restoration of independence, Ukrainian career soldiers from foreign armies played a leading role in organizing a national army.

Pre-Kievan Rus'. The peoples that inhabited Ukraine

before the arrival of the Slavic tribes possessed varying degrees of military skill and organization. Of these, the *Scythians were the most warlike and sophisticated. The Slavic tribes of Ukraine were less militant. In wartime they formed detachments based on tribal or clan structures, commanded by an elected chieftain. For defense they fortified their settlements with walls, stockades, and ditches. According to some estimates, there were 1,300 fortified settlements in northern and central Ukraine in the 5th to 8th centuries. Combatants were usually armed with spears, axes, bows and arrows, slings, and swords. Battle tactics were primitive.

Rus' to the 11th century. A more regular military force emerged during the process of state-building in Ukraine. The core of the army consisted of mercenary Varangian **druzhyiny*, ranging from 400 to 6,000 men and subdivided into detachments of 40 to 60 men. The typical Varangian fighter was armed with a coat of mail, helmet, sword, ax, spear, and large shield. The Varangians contributed to the development of a naval capacity in Rus', for use against the Byzantine Empire in the Black Sea and against Arab forces in the Caspian Sea. According to contemporary sources, 200 boats took part in the Byzantium campaign of 907, 500 in the campaign of 913, and 1,000 in that of 941.

Rus' in the 11th to 14th centuries. During this period the art of war was influenced not only by the Varangians, Greeks, and Turkic nomads, but also by developments in central Europe. A prince's army consisted of a heavily armed *druzhyina*, lightly armed levies, and subservient steppe hordes. The armed retinue was maintained by the prince from taxes and tributes. Summoned foreign troops were allowed to raise supplies in the towns and countryside. In an emergency a *levy en masse raised poorly equipped troops from among townsmen and peasants. Turkic tribesmen settled on the outskirts of Rus', and loyal to the prince, furnished him with another 15,000–30,000 troops. In a crisis the prince could raise an army of up to 50,000. Besides the arms inherited from the Varangians, the princes adopted the curved saber, light armor, and bow of the steppe horsemen. A heavily armed cavalry on the Byzantine model was added to the infantry-based army.

Polish-Lithuanian period. With the fall of Kievan Rus' and the Principality of Galicia-Volhynia, the security of Ukrainian territories became the responsibility of the occupying powers of Poland, Lithuania, and Hungary. The nucleus of the Lithuanian army consisted of *boyars, who were obliged to do military service. In wartime, recruits were conscripted from the general population.

In Ukrainian lands under Poland in the 14th to 16th centuries, military duty was required of boyars, village heads, and mayors of towns under Magdeburg law. In wartime each landowner provided one to four suitably armed mounted soldiers, and a levy en masse was called. In the mid-16th century a regular army (*kwarciane wojsko*) was established to defend the commonwealth's southeastern frontier (Ukrainian territory) from the Tatars.

Cossack period. In the 15th and 16th centuries a unique military caste, the *Cossacks, was formed on the southern steppe frontier of the Polish Commonwealth. In 1552–4 the Zaporozhian Cossacks established a permanent fortress known as the *Zaporozhian Sich. The Polish authorities tried to bring this force under their control and to use it for protecting the southeastern border of the common-

wealth from the Tatars. They engaged a limited number of *registered Cossacks on terms similar to those of the regular frontier army.

The *Cossack-Polish War of 1648–57 led to the rise of the *Hetman state, which was organized and governed according to the *regimental and *company systems. A similar administrative territorial structure was established in Slobidska Ukraine, although it was integrated more closely into the imperial Russian administration. The Cossack fighting units of the Hetman state participated increasingly in Russian campaigns and wars, such as the *Russo-Turkish War and the Northern War launched by Peter I. In the latter part of the 18th century, Ukrainian military units lost their distinctive character and became part of the imperial army.

Ukrainians in the Russian army. With the abolition of the Hetman state in 1764, its ten territorial regiments were reclassified as light-cavalry regiments; in 1784 they were re-formed into carabineer units of the imperial army. In 1765 the five Cossack regiments of Slobidska Ukraine were transformed into hussar regiments of the Russian army. Recruitment to the new regiments was widened to the free peasantry, and their Cossack members were demoted to the status of peasants.

After the destruction of the Zaporozhian Sich (1775) its Cossacks scattered throughout Ukraine or emigrated to Turkish territory, where they set up the *Danubian Sich. Those who stayed behind were eventually organized by the Russian authorities into the *Black Sea Cossacks and the *Boh Cossack Army to defend the empire's southern frontier. In the 19th century the *Azov Cossack Host and the *Kuban Cossack Host were formed from the descendants of the Zaporozhian Cossacks who settled on the Azov coast and the Kuban. The Kuban Host was the only Ukrainian Cossack formation to survive until the dissolution of the Russian Empire.

During the 19th century some territorial Ukrainian military units were formed by the Russian government in response to crises such as the Napoleonic invasion (see *Ukrainian regiments in 1812), the *Polish Insurrection of 1830–1, the *Crimean War, and the *Polish Insurrection of 1863–4. They were disbanded as soon as the crises passed. On the eve of the First World War, Ukraine was divided between 2 (Kiev and Odessa) of the empire's 12 military districts. Two rifle brigades, 8 cavalry divisions, 2 cavalry regiments, and 16 infantry divisions were stationed in Ukraine. Fewer than 40 percent of their soldiers were Ukrainian. In the *Black Sea Fleet, approx 80 percent of the sailors were Ukrainian. Approx 25 percent of the empire's 1.3 million soldiers (prior to the general mobilization) were Ukrainian. A number of high officers of the Russian army, including N. Repnin, M. Myloradovych, Y. Kukharenko, and M. Dragomirov, were of Ukrainian descent.

Austrian army. Before the Revolution of 1848 there were no attempts to set up special Ukrainian units within the Austrian army. Then a short-lived national guard was formed in several towns of eastern Galicia by the Supreme Ruthenian Council. In 1849 it was succeeded by the *Ruthenian Battalion of Mountain Riflemen, which was disbanded in early 1850. With the introduction of universal conscription in Austria-Hungary in 1868, the number of Ukrainians in the army rose sharply. Three of the empire's 12 military districts covered Ukrainian territory. Since military service was based on residency, military units of

the 6th (Košice), 10th (Peremyshl), and 11th (Lviv) districts had a high percentage of Ukrainians. Officers of Ukrainian origin, such as S. Kobylansky and Y.M. Vityshynsky-Dobrovolia, were rare exceptions. The *Ukrainian Sich Riflemen, formed in 1914, was the only national Ukrainian legion in the Austrian army.

1917–21 period. As the Russian and Austrian armies disintegrated toward the end of the First World War, large numbers of their Ukrainian soldiers and officers joined the new Ukrainian national armies: the *Army of the Ukrainian National Republic and the *Ukrainian Galician Army (UHA), which defended Ukrainian independence from Russia and Poland in the *Ukrainian-Soviet War (1917–21) and the *Ukrainian-Polish War in Galicia (1918–19). Besides the regular army, a citizens' militia known as the *Free Cossacks supported the newly created UNR. In southern Ukraine, independent insurgent groups led by figures such as N. *Hryhoriiv and N. *Makhno shifted their allegiance among the chief combatants (see *Partisan movement in Ukraine, 1918–22). The Bolshevik forces in Ukraine, commanded by V. *Antonov-Ovsienko, were largely Russian. Eventually the Poles took control of Western Ukraine, and the Red Army recaptured the Ukrainian territory previously ruled by Russia.

Interwar period. In Western Ukraine, Ukrainian citizens of Poland, Hungary, Rumania, and Czechoslovakia were compelled to serve in the armies of those countries and had no special units of their own. Some former officers of the UNR Army (57 in 1937) received special training and served under contract in the Polish army. Many officers and soldiers of the UHA and the Sich Riflemen joined the *Ukrainian Military Organization, which carried on the fight for independence in the underground. The only Ukrainian military force in this period was the short-lived *Carpathian Sich (1938–9), which defended the independence of *Carpatho-Ukraine.

Soviet Ukraine did not have its own army. As a result of the Ukrainization policy, Ukrainian was used as the language of instruction and command in Ukrainian territorial divisions (10 infantry and 4 cavalry divisions in 1928), which did not belong to the regular army but formed a militia (1922–34). In the unified Soviet military system, Ukraine and the Crimea formed one military district. Its commander sat on Ukraine's Council of People's Commissars, where he represented the Military-Naval People's Commissariat of the Russian SFSR. In 1935 Ukraine was divided into three military districts (Kiev, Odessa, and Kharkiv), and in 1939 the Lviv district was added.

Second World War. Ukrainians fought in the Second World War as members of a number of alien armies. About 4.5 million Ukrainians served in the Red Army. Others joined the ranks of *Soviet partisans in Ukraine. Inhabitants of Western Ukraine could be found in the Rumanian and Hungarian armies, as well as the *Polish Second Corps. Several Ukrainian units were established by the Germans, including the *Legion of Ukrainian Nationalists (the Nachtigall and Roland groups) and the *Division Galizien. Ukrainian leaders, who supported these projects, hoped these units would eventually become the nucleus of an independent Ukrainian army. Ukrainians from eastern Ukraine played a role in the *Russian Liberation Army and the *Ukrainian Liberation Army, which were formed from among Soviet war prisoners by the Germans. Only

the *Ukrainian Insurgent Army, which fought both Germans and Soviets, was fully independent and Ukrainian-controlled.

Postwar period. In 1946 the Red Army was renamed the *Soviet Army. Although a Ukrainian commissariat of defense was set up in 1944 (abolished in 1947), the army continues to be centralized and Russian in profile. Ukrainian conscripts serve alongside other nationals in various regions. In its Declaration of State Sovereignty (1990), Ukraine claimed the right to maintain its own armed forces and demanded that its citizens in the Soviet Army serve on Ukrainian territory. In 1991, after the dissolution of the USSR and the proclamation of Ukrainian independence, Soviet formations in Ukraine became part of the newly created Ukrainian armed forces.

A. Makuch

Military ranks. Titles conferred upon officers or soldiers to indicate their military qualifications and professional standing. In most modern armies there are five levels of rank: general officer, field grade officer (major to colonel), company grade officer (lieutenant and captain), noncommissioned officer (corporal and sergeant), and soldier (recruit, private, and private first class). Cadets, officer candidates, and warrant officers are usually ranked just below lieutenants.

During the struggle for Ukrainian independence (1917–20) the rank system of the Ukrainian armies changed several times. Under the Central Rada, in January 1918, instead of regular ranks a functional rank system was instituted, in which rank reflected the individual's position in the organizational structure. The ranks, in ascending order, were *kozak* (soldier), *roiiovyi* (squad leader), *chotovyi* (platoon sergeant), *bunchuzhnyi* (company first sergeant), *pidsothennyi* (platoon commander or lieutenant), *sotnyk* (company commander), *kurinnyi* (battalion commander), *polkovnyk* (regimental commander), and *otaman brygady, dyvizii, korpusu, or armii* (brigade, division, corps,

or army commander). Theoretically, upon reassignment an individual left his rank with the unit, and his future rank depended on his new position. In July 1918, Hetman P. Skoropadsky established permanent military ranks (see table). After his downfall the UNR Army returned to the functional rank system. It was not until March 1920 that the UNR Army instituted a regular rank system (see table), with rank insignia worn on the collar.

The Ukrainian Galician Army (UHA) had a military rank system from its very beginning. It was formally confirmed in a decree of the secretary of military affairs on 30 April 1919. The rank structure provided for 17 grades (see table), but the highest rank ever attained by an officer (O. Hrekov) was major general. The UHA had relatively strict promotion standards. Given the shortage of officers, it was not unusual for majors or captains to command brigades, and one corps commander started his assignment as a major. Promotions were generally based on merit and service, but in some cases officers were promoted for bravery in combat.

The Ukrainian Insurgent Army (UPA) had a dual rank system. In January 1944 it established a rank system based on functions. There were eight command positions (in descending order): supreme commander, *krai* commander, group commander, *zahir* commander, battalion commander, company commander, platoon commander, and squad commander. The appropriate insignia were worn on the right sleeve. At the same time, the UPA routinely appointed and promoted its officers and soldiers to traditional military ranks (see table), for which no insignias were provided. Promotions in the UPA usually followed a period of service as long as one or two years in a position that required a higher rank. R. Shukhevych, for example, was promoted to brigadier general only after serving as supreme commander for over two years. Officers and soldiers who had been killed in battle were often promoted to a higher rank posthumously.

P. Sodoł, Z. Stefaniv

Military ranks in Ukrainian armies (comparative outline)

English-language equivalents	Hetman government army July 1918	Ukrainian Galician Army April 1919	UNR Army March 1920	Ukrainian Insurgent Army January 1945	Ukrainian army 25 March 1992
General	–	–	Holovnyi otaman	(?)	Heneral armii Ukrainy
Lieutenant general	Heneral-bunchuzhnyi	Heneral-sotnyk	Heneral-polkovnyk	(?)	Heneral-polkovnyk
Major general	Heneral-znachkovyi	Heneral-poruchnyk	Heneral-poruchnyk	(?)	Heneral-leitenant
Brigadier general	Heneral-khorunzhyi	Heneral-chetar	Heneral-khorunzhyi	Heneral-khorunzhyi	Heneral-maior
Colonel	Polkovnyk	Polkovnyk	Polkovnyk	Polkovnyk	Polkovnyk

Private first class	–	Starshyi strilets	Mushtrovyi kozak	Starshyi strilets	Starshyi soldat
Private	Riadovyi	Strilets	Kozak	Strilets	Riadovyi

Military science. Also known as war doctrine. The study of warfare, including strategy, tactics, logistics, and technology, from a theoretical, historical, or biographical viewpoint.

In the medieval and the Cossack periods military knowledge was based largely on personal experience and was transmitted through personal contact. The princes of Rus' adopted the idea of border fortification from the Greeks and Romans, defensive retreat tactics with the use of wagons from steppe nomads, naval tactics from the Varangians, and the concept of guard towers from western neighbors. In the 13th century Danylo's tactics included the integrated use of different weaponry in battle. Cossack tactics were influenced by the tactics of Czech Taborites and by Western siege strategies. B. Khmelnytsky's tactics display a familiarity with the lessons of the Thirty Years' War and an ability to compensate for weaknesses (such as the lack of heavy cavalry) by other factors.

By the time military science began to flourish in the West, Ukraine had lost its military traditions. When military and paramilitary formations were revived (in 1848, 1914, and 1917), the military practices of other countries were adopted, from infantry drills to field operations (the Kuban Cossack Host was the only Ukrainian military formation with a continuous tradition). Ukrainian military leaders served other countries, particularly Russia, with their skills and knowledge. Some studies in Ukrainian military history by Ukrainian scholars appeared in *Vestnik Kievskogo otdela Voennno-istoricheskogo obshchestva* (1909–14). The officers of Ukrainian armies established in the period of Ukrainian statehood (1917–20) inevitably followed the thinking of the Russian (influenced by Prussian theories) or Austrian (in the case of the Ukrainian Galician Army) officer schools. This was most evident in the military statutes they adopted. The rapid development of events in 1917–21 left no time for studying the problems of military science.

Some early Ukrainian works in military science were analyses of the unsuccessful wars for Ukrainian independence written after the First World War by émigrés, mostly by prisoners in internment camps in Tarnów and Kalisz, and published in the quarterly *Tabor*. This work was continued by the *Ukrainian Military History Society in Warsaw, which published the serial *Za derzhavnist'* (1925–39). Particular military operations were analyzed in monographs, such as M. Kapustiansky's *Pokhid ukrains'kykh armii na Kyiv–Odesu v 1919 rotsi* (The March of the Ukrainian Army on Kiev–Odessa in 1919, 1922; 2nd edn 1946), M. Omelianovych-Pavlenko's *Zymovyi pokhid* (The Winter Campaign, 1934) and *Ukrains'ko-pol's'ka viina* (The Ukrainian-Polish War, 1929), Yu. Tiutiunnyk's *Zymovyi pokhid 1919–20* (The Winter Campaign of 1919–20, 1923), and A. Krezub's *Narys istorii ukrains'ko-pol's'koï viiny 1918–1919* (An Outline of the History of the Ukrainian-Polish War of 1918–19, 1923). Collections of documents were published by O. Dotsenko (*Zymovyi pokhid armii UNR* [The Winter Campaign of the UNR Army, 1932]) and by V. Salsky and P. Shandruk (*Ukrains'ko-moskovs'ka viina 1920 roku v dokumentakh* [The Ukrainian-Russian War of 1920 in Documents, 1933]). The principal military histories to come out at the time were *Istoriia ukrains'koho viis'ka* (History of the Ukrainian Armed Forces, 1936), edited by I. Krypiakievych and B. Hnatevych, and Z. Stefaniv's *Ukrain-*

s'ki zbroini syly 1917–21 rr. (Ukrainian Armed Forces of 1917–21, 1934–5). V. Petriv and M. Kolodzinsky wrote studies in military geography and V. Kurmanovych wrote a handbook for junior officers (1938). Military memoirs, including those of V. Petriv and S. Shukhevych, were published by the Chervona Kalyna publishing house in Lviv.

In Soviet Ukraine, military science was taught at the School for Red Officers in Kharkiv (1921–34). Y. Yakir's use of airborne troops in maneuvers of the Ukrainian Military Okruha near Kiev in 1928 shows that Ukrainians were not lagging in tactical doctrine. The newspaper *Chervona armiiia*, Ukrainian translations of Soviet military statutes, and the classics of European military science were published in Kharkiv. All this was brought to a halt when the Ukrainian units of the Red Army were suppressed.

Nationalist military circles became keenly interested in military science on the eve of the Second World War. Military statutes based on German models were used in Ukrainian formations during the war, particularly by the Ukrainian Insurgent Army (UPA). Subsequently, the UPA used translations of Soviet army manuals. UPA members published textbooks on insurgent tactics, the construction of hideouts, and related matters based on their practical experience. After 1945 some works on insurgent and infantry tactics and infantry training, based on Soviet, German, and US sources, appeared abroad. They also drew on the UPA experience. A number of military histories have been published, including V. Dovzhenok's *Viis'kova sprava v Kyivs'kii Rusi* (Military Affairs in Kievan Rus', 1950), O. Udovychenko's *Ukraina u viini za derzhavnist'* (Ukraine in the War for Statehood, 1954), and Yu. Khrokhmaliiuk's *Boi Khmel'nyts'koho* (Khmelnytsky's Battles, 1954). Ukrainian military science is now limited to military history.

O. Horbach

Military service. Active duty in a country's armed forces. Recruitment may be voluntary or compulsory. Voluntary recruitment relies either on individuals' perceptions of moral or social duty or on their desire for monetary reward. Compulsory recruitment is implemented through some form of conscription.

In medieval Ukraine there were three forms of military service: that of the warriors of the prince's *druzhyna*, who were landowners owing service in return for their lands; that of the Varangian retinues and steppe tribes, as hired mercenaries; and that of the *levies en masse, called in emergencies. Under Lithuanian and Polish rule military service was limited to landowners, boyars, and certain town officials. From 1578, crown peasants known as the elect (*vybrantsi*) served in the Polish king's army. Mercenaries were often hired. Registered Cossacks served the Polish crown in return for privileges and landholdings. In the Hetman state something like compulsory military service was imposed on certain segments of the population, such as the *Notable military fellows and the Cossacks. *Mercenary regiments of cavalry and infantry troops were also used. In Zaporizhia military service was essential to being a Cossack. In the Hetman state and later in Slobidska Ukraine, the Don region, and the Kuban, peasants bore no military obligations.

In Russian-ruled Ukraine from the end of the 18th century, common soldiers were recruited by force. At first the usual term of service was 20 to 25 years; after 1821 it was

reduced to 15 years, and after 1874 to 3 to 5 years. In 1874 universal conscription of all men between the ages of 21 and 43 was introduced. After active service one was assigned to the reserves until age 38, and then to the militia of the second category until age 43. Surplus conscripts were assigned to the militia of the first category.

In Austria-Hungary military recruitment was according to estate: common recruits were conscripted from among serfs and peasants, and members of the higher estates were attracted by the advantages of a professional career. In 1868 universal conscription of all men 20 to 42 years of age was introduced. After two to three years of active service, the conscripts were assigned to the reserves. Forty percent of the draftees served in the imperial army, 40 percent in the regional units, and 20 percent in the reserves.

The Ukrainian Galician Army (UHA) was organized on the basis of the compulsory service of the citizens of the Western Ukrainian National Republic, and the draftees served in the region of their origin. Service in the navy and army of the UNR was voluntary. The Hetman government adopted a law on compulsory service on 24 June 1918, which set a term of two years for infantrymen, three years for cavalry and artillerymen, and five years for sailors. The age limit for recruits was 38 for the reserves, and 45 for the militia. Hetman P. Skoropadsky's universal of 16 October 1918 provided for a semimilitary Cossack estate formed of wealthier peasants who would serve in special Cossack units. This idea was never implemented. When the Directory came to power, service in the UNR Army became voluntary again.

In the Ukrainian SSR and the USSR, military service for the 'working element' was compulsory until 1939; the 'nonworking element' served two years in labor battalions. Ukrainians in territorial divisions served at home, and those in the regular forces, largely outside Ukraine. Draftees were first given three to six months of training, and then spent one to two summer months on maneuvers during the next three to four years. Thereafter they were assigned to one of the two reserve categories. The term in the regular army was initially set at two to four years, and it was usually served outside Ukraine. After 1937 the term was two years for the infantry and cavalry, three years for artillery and tank units, four years for the air force, and five years for the navy. A new conscription law introduced in 1939 abolished the former social restrictions.

Since the Second World War the term of compulsory military service has ranged from two to five years. The draft age is 19. Recruits to the navy, border guard, and MVD army were selected according to special Party criteria. Upon completing their tour of duty, soldiers were assigned to reserves of the first category. Young men who were excused from active duty were placed in reserves of the second category. Each reserve category was divided into three age groups: up to 35, up to 45, and up to 50. Reservists underwent periodic training.

In the interwar period Ukrainians under Polish, Rumanian, and Czechoslovakian rule were subject to the same military obligations as the citizens of those countries. In Poland and Rumania they were barred from serving in special units, and in Poland from cadet schools as well. Service terms were one and one-half to four years, depending on the branch of the armed forces. Ukrainians usually served in units of mixed national composition lo-

cated outside Ukrainian ethnographic territories. In 1938 Poland introduced alternative service in labor battalions, to which many Ukrainians, particularly politically active ones, were assigned.

V. Markus

Military settlements (*viiskovi poselennia*). In 1817–25, to reduce military expenditures while maintaining a self-sufficient standing army, the tsarist regime settled 36 infantry battalions and 240 cavalry squadrons in state-owned villages in Slobidska Ukraine, Kherson, and Katerynoslav gubernias. The soldiers were allowed to live with their families in carefully planned and reconstructed villages. They supported themselves by farming allotted holdings and operating saw and flour mills, quarries, and stud farms. The peasants already living there were classified as military settlers and placed under a permanent martial law and discipline that combined the worst aspects of serfdom and the most brutal conditions of military life. Although they received better medical care, education, and material benefits than other peasants, they were forced to wear uniforms, to perform military drills and a weekly minimum of three days of *corvée* (farming and construction) for the state under military command, and to feed and shelter the active soldiers and their families. All aspects of their lives, including marriage and having children, were strictly regimented and monitored by local officers. Violators were severely punished, usually with the knout. From the age of 7 males attended schools and underwent military training, and from the age of 18 to 45 they were kept in military service. From 1831 the military settlers were called farming soldiers. In 1837 the same lot befell peasants living on lands in Kiev and Podilia gubernias confiscated from Polish nobles who had taken part in the Polish Insurrection of 1830–1. The military settlements in Ukraine at that time encompassed an area of 2.4 million *desiatins* with 554,000 inhabitants (including those of the towns of Yelysavethrad, Olviopil, and Uman). The military settlers repeatedly rebelled against the extraordinarily harsh regime imposed on them. Particularly large and violent were the 1817 rebellion of former Cossacks of the Boh Cossack Army; the 1819 rebellion of Chuhiiv and Tahanrih regiments, in Slobidska Ukraine gubernia, which resulted in the imprisonment of over 2,000 participants, the court-martial and brutal flogging of 273 (who each received 12,000 lashes), and the exile to Siberia of over 400; and the 1829 Shebelynka uprising in Slobidska Ukraine gubernia. Because the military settlements, which constituted one-third to one-half of the Russian military forces, failed to fulfill their political and economic objectives, they were abolished in 1857. The active soldiers were incorporated into regular units, and the farmers were reclassified as state peasants.

Military treasury (*viiskova skarbnytsia, heneralnyi skarb*). The treasury and finance department of the Hetman state. (The Zaporozhian Sich also had a military treasury.) Until 1728 it was part of the private assets of the hetman, who managed it with the help of trusted individuals. Hetman I. Briukhovetsky (1663–8) appointed R. *Rakushka 'supervisor of the military treasury.' Finally, in 1728, the position of *general treasurer was introduced, but the military treasury was ultimately under the control of the Russian government, which assigned three comptrollers to super-

vise the general treasurer and his chancellery and to watch for irregularities in collecting and spending revenues. The military treasury was abolished along with the Hetman state in 1764.

Military tribunals (*viiskovi sudy*). Courts for hearing criminal cases involving military personnel and, in areas under martial law, civilians as well. Military tribunals operate according to specific statutes of military justice or emergency laws. In the past there was no sharp distinction between military and common criminal law: in the Cossack state military personnel came under the jurisdiction of ordinary courts – regimental, general, or company. At the Zaporozhian Sich cases were heard by the military, palanka, or kurin judge. Graver charges such as treason were heard by the hetman court or at the Sich by the kish otaman or the Sich council.

In Ukrainian territories under Russian and Austrian rule military tribunals were used often before the First World War as instruments of repression against the civilian population. They were particularly active in suppressing peasant unrest in the Russian Empire in 1902–7. During the First World War the civilian population of Galicia was suspected of pro-Russian sympathies and was treated harshly by Austro-Hungarian tribunals.

During the period of Ukrainian independence (1917–20) the UNR Army had military courts in regiments and divisions. The staff of the Operational Army of the UNR had a staff military court. Under the Hetman government in 1918 the highest military court was the General Court and then the General Criminal Court of the State Senate, which assumed the powers of the former Russian Chief Military and Military-Naval Courts. The UNR Directory's law on extraordinary tribunals (26 January 1919) provided for an extraordinary military tribunal to deal with grave crimes. Its sentences had to be approved by the supreme otaman. The military justice system was administered by the Supreme Military Justice Board. The Ukrainian Galician Army adopted the Austrian military law. On 3 December 1918 the Ministry of Military Affairs ordered field military courts to be set up in each military district, and on 18 January 1919 it established the Field Court at Supreme Headquarters. Subsequently, military tribunals were organized in each corps and in subordinate units. They were authorized to try military and civilian personnel. Military judges belonged to a separate branch within the army and were promoted on separate lists. The highest ranking military judges were Lt-Col S. Tysovsky, Maj O. Pidliashhevsky, and Maj H. Tsatska.

The Red Army had revolutionary military tribunals at every level. They tried civilians as well as soldiers, and their verdicts were not subject to appeal or annulment. Many Ukrainian intelligentsia and peasants, accused of 'counterrevolutionary activity and banditry,' fell victim to these courts. After the Second World War, military tribunals tried members of the OUN and soldiers of the UPA. The system of Soviet military justice subsequently underwent many changes, and various units of the armed forces, garrisons, and districts had their own military tribunals. The highest court was the Military Collegium of the USSR Supreme Court.

In the UPA, commanders of each independent combat unit (company, battalion) had the authority to field courts

to try serious disciplinary cases. Their sentences were subject to review by the commander.

P. Sodol

Military-defense industry. In the narrower sense, a branch of heavy industry that manufactures weapons, ammunition, and military vehicles, tools, and equipment and, in the broader sense, a set of branches that manufacture goods for the military.

Handcrafted *arms and military equipment have been made in Ukraine since ancient times. It was not until the 18th century, however, that large ordnance factories were built: for example, a gunpowder factory in Shostenske, Chernihiv regiment (1736), a cannon foundry in Luhanske (1795), the Arsenal in Kiev (1782), and naval factories in Kherson and Mykolaiv. By the end of the 19th century there were almost 30 specialized ordnance factories in Ukraine, all run by the state. Most of them produced only gunpowder and light artillery and were technologically backward. Beginning in the 1880s, large warships were constructed by a Belgian company in Mykolaiv and by the state in Sevastopol. During the Russo-Japanese War and the succeeding period some privately owned ordnance factories were set up. The defense industry in Ukraine continued to concentrate on the manufacturing of artillery, warships, and explosives. In 1912 a French and Belgian banking cartel pushed out its German competitors and gained control of the artillery industry in the Russian Empire. The Russian military-defense industry flourished in the years preceding and including the First World War and contributed substantially to the industrialization of the country. In Ukraine, however, the industry was much less developed.

The First World War and the Revolution of 1917 disrupted the military-defense industry in Ukraine. Chronic shortages of ordnance greatly hampered the efforts of the Ukrainian national armies, and the Red Army relied on supplies from Russia. By the end of the Civil War military supplies had been exhausted throughout the USSR. In 1926 the Soviet regime announced a plan to rebuild the defense industry. Development was particularly rapid during the period of the Second Five-Year Plan (1933–7) and the years immediately preceding the Second World War. The character of the industry changed somewhat in that period: ordnance manufacture was transferred from specialized plants to civilian factories (eg, military aircraft were built in ordinary airplane factories, and tanks in tractor factories). Many civilian factories were designed for rapid conversion to military production. Kharkiv became an important center of the defense industry: tank engines were built at its locomotive factory, artillery movers at its tractor factory, and the T tank at another plant. Aircraft engines were assembled in Zaporizhia. In 1938–9 the defense industry in Ukraine expanded by 117 percent (the machine-tool industry as a whole expanded by only 54 percent). In 1939–41 many civilian factories were converted to munitions production, and the output of nonmilitary heavy machinery, such as combines, tractors, and excavators, fell sharply. By mid-1941 Ukraine was producing a third of the USSR munitions. At least 125 factories were involved in arms production: 9 of them belonged to the airplane industry, 14 to the defense industry, 10 to the machine-building industry, and 3 to the shipbuilding industry. On the eve of the war Ukraine's annual ordnance

output was approx 1,500 fighter planes, 3,000 tanks, 2,500 cannons, and 15 to 20 warships. In addition almost 150 plants produced ammunition (approx 8 million pieces monthly). Ukraine was also an important supplier of raw materials and semimanufactured products to munitions operations elsewhere in the USSR: over 50 percent of the USSR high-grade steel, pipes, aluminum, magnesium, and explosives.

After the Second World War the defense industry in Ukraine was rebuilt, but because of the rapid development of military production in central Russia and the Urals, Ukraine's share in the USSR's defense industry fell to approx 20–25 percent. The practice of manufacturing ordnance in ordinary metalworking and machine-building plants continued in the 1950s and 1960s. The Ministries of Medium Machine Building (est in 1953), of the Radio Industry (est 1954), and of General Machine Building (est 1965) belonged largely in the defense industry. Because so much of defense production is hidden under civilian manufacturing, accurate data on the defense industry in Ukraine are difficult to obtain. In the postwar period aircraft have been built in Kharkiv and Kiev, tanks in Kharkiv and the Donbas, artillery in the Dnieper region, warships in Mykolaiv and Kherson, and explosives in the Donbas and Dnieper region. In Kharkiv the first Soviet uranium-graphite reactor began producing plutonium for atomic bombs in 1946. Kharkiv is involved in atomic weapons production.

The defense industry in Ukraine and in the rest of the former USSR has grown substantially since the 1970s. Its growth has caused numerous problems in the rest of the economy. First, an unbearably high proportion of the budget – approx 25 percent of the Soviet GNP – was spent on defense. Second, the defense industry had first and, usually, exclusive claim to the most sophisticated technology and resources, desperately needed in the civilian economy to improve the standard of living. Third, the defense industry monopolized the USSR research and development potential. Furthermore, excessive secrecy and rigid compartmentalization prevented any technological spillover from the defense to the civilian sector of the economy. According to information released in 1990, about two-thirds of Ukraine's scientific and technical potential (research establishments, personnel, and funds) was concentrated in the defense sector and made virtually no contribution to the development of the civilian economy.

The USSR's economic crisis in the latter half of the 1980s led to a re-evaluation of the defense industry's place in the national economy. Defense expenditures were reduced, and sections of the defense industry were converted to civilian production. Ukraine's declaration of independence in August 1991 entailed a complete restructuring of the defense industry on Ukrainian territory.

Militia (*militsiia*). The name of the ordinary *police that has been used in Ukraine since 1917. The militia established throughout the Russian Empire in March 1917 differed from the tsarist police in being subject to local

government, not to the central Ministry of Internal Affairs. In the UNR the police was placed under the control of the Ministry of Internal Affairs in March 1918. Under the Hetman government it was reorganized into the *National Guard, and then under the UNR Directory it was called a militia and, from 1920, a civil guard.

In Soviet Ukraine the militia at first came under the control of the republic's People's Commissariat of Internal Affairs. For a few years (1930–4) the militia was controlled directly by the republic's Soviet of People's Commissars, and then by both the republic and the Union commissariats of internal affairs, which in 1946 were renamed ministries of internal affairs. Since 1960 it has been under the republic's Ministry of Internal Affairs.

The militia's role is to ensure public order, protect public and communal property, and suppress crime. It oversees the internal passport system and registers automotive vehicles. Its personnel consists of recruits with a two-year term and of career officers. They are assisted by special civilian volunteers, the *narodni druzhyny*, who help patrol neighborhoods, control crowds, and gather information on the activities of civilians. Historically, the militia has been an important part of the state security apparatus. In 1949–53 it was under the operational control of the *MGB. Up to the demise of the USSR in 1991, it co-operated closely with the *KGB in keeping individuals under surveillance and provided a cover of legality for political repression. Each militia station had a KGB staff assigned to it. With the rise of mass demonstrations under M. Gorbachev's regime, the militia set up special riot- and crowd-control units.

O. Skrypnyk

Miliukov, Pavel [Miljukov], b 15 January 1859 in Moscow, d 31 March 1943 in Aix-les-Bains, France. Russian historian, publicist, and politician. Miliukov was a founding member of the influential *Constitutional Democratic (Kadet) party, and in 1907 he became its leader and was elected a member of the State Duma. In 1912–13 he conferred secretly with the *Society of Ukrainian Progressives. In 1914 he condemned the actions of the tsarist occupational regime in Galicia; in 1915 he protested in the Duma against the tsarist persecution of Ukrainians and defended the right of the Ukrainian movement to exist; and throughout the First World War he was a vocal critic of tsarist military policies.

After the February Revolution of 1917 Miliukov was the first minister of foreign affairs in the Russian Provisional Government. He was a defender of the indivisibility of the Russian Empire and thus an opponent of the Ukrainian Central Rada and of Ukrainian political autonomy. In 1919 he fled to Istanbul, and in 1920 he lived in London. In 1921 he settled in Paris, where he headed the émigré Republican Democratic Alliance and edited its organ, *Poslednie novosti*.

Miliutenko, Dmytro [Miljutenko], b 21 February 1899 in Slovianske, Tahanrih county, Don Cossack province, d 25 January 1966 in Tashkent, Uzbekistan (buried in Kiev). Stage and film actor. He began his stage career in Slovianske (1920–3) and then worked in the Ivan Franko Theater in Kharkiv (1923–6), Berezhil (1926–34), the Kharkiv Ukrainian Drama Theater (1934–6), and the Kiev Ukrainian Drama Theater. Miliutenko's extensive repertoire of dra-

matic and comic characters included Taras Shevchenko in O. Ilchenko's *Peterburz'ka osin'* (Autumn in Petersburg) and I. Kocherha's *Prorok* (The Prophet) and the Fool in W. Shakespeare's *King Lear*. In films he portrayed V. Vynnychenko (*Shchors*, 1939), Hetman Potocki (*Bohdan Khmel'nyts'kyi*, 1941), and Commandant Uskov (*Taras Shevchenko*, 1951).

Milk production. See Dairy industry.

Miller, Dmytro, b 1 October 1862 in Kotelva, Okhtyrka county, Kharkiv gubernia, d 14 June 1913. Historian. He graduated from Kharkiv University (1888), where he studied under D. Bahalii. From 1887 he worked in Kharkiv, where he became a librarian at the university (1895) and an editor of the newspaper *Iuzhnyi krai* (1903). A specialist on the history of the Hetman state and Slobidska Ukraine, he wrote, in Russian, a monograph on the land, city, and *pidkomorskyi* courts in 18th-century Ukraine (2 vols, 1895, 1898), which contained many documentary materials; a book-length, four-part article on the transformation of the Cossack *starshyna* into Russian nobility (*Kievskaiia starina*, 1897, nos 1–4); and books on the archives of Kharkiv gubernia (1902) and the history of the first 250 years of Kharkiv (2 vols, 1905, 1912, cowritten with Bahalii).

Mykhailo Miller

Miller, Mykhailo, b 26 November 1883 in Millerovo, Kamenskaia county, Don Cossack province, d 15 February 1968 in Munich. Archeologist and émigré scholar. Born into a family of German settlers, Miller grew up in a predominantly Ukrainian section of the Don region. He studied history at Moscow University and then law at Kharkiv. After working as a judge (1913–20) then a high school teacher (1921–30) in Tahanrih, he was a lecturer at the Dnipropetrovske Pedagogical Institute (1931–4) then taught history and archeology at both the Rostov State Pedagogical Institute and Rostov State University (1934–43). Between 1900 and 1942 he led or took part in numerous archeological expeditions in the Volga-Don, Northern Caucasus, and Dnieper rapids regions and became a specialist in the prehistory of these areas. In 1943 Miller left for Munich, where he continued his scholarly work. After the war he was active in the Ukrainian Academy of Arts and Sciences, the Shevchenko Scientific Society (a full member from 1950), the Institute for the Study of the USSR, and the Ukrainian Free University. His émigré writings – particularly during the 1950s – frequently dealt with the

destruction of historical monuments in Ukraine and with the fate of Soviet archeology and archeologists during and after the Stalinist terror. His major work in this regard is *Arkheologiia v SSSR* (1954; translated and published in 1956 as *Archeology in the USSR*).

Miller, Oleksander, b 1875 in Millerovo, Kamenskaia county, Don Cossack province, d 1935. Archeologist; brother of M. Miller. A professor of archeology at St Petersburg (later Leningrad) University, he was in charge of the Caucasian section of the Russian Ethnographic Museum in 1907–33. He studied the Bronze Age in Ukraine as well as archeological sites in the lower Don region. He was responsible for locating the ancient Greek settlement of Tanais. Miller was renowned for his methodological teachings and wrote *Arkheologicheskie razvedki* (Archeological Explorations, 1934). He was arrested in the Stalinist terror and exiled to Siberia, where he died.

Miller, Vsevolod, b 19 April 1848 in Moscow, d 18 November 1913 in St Petersburg. Russian folklorist, linguist, and archeologist; member of the St Petersburg Academy of Sciences from 1911. In his works on the *Tale of Ihor's Campaign* (1877), *Bylyny* (1893), and the legend of Illia Muromets (1894) and in *Ocherki russkoi narodnoi slovesnosti* (Outlines of Russian Folk Literature, 3 vols, 1897, 1910, 1924) he dealt with Ukrainian literature and folklore. His work had a notable influence on other Ukrainian folklorists, such as I. Franko and A. Krymsky.

Millet (*Panicum*; Ukrainian: *proso*). A genus of grasses of the cereal family, cultivated in Asia and North Africa for over 4,000 years. The most widely grown species in Ukraine is the common millet (*P. miliaceum*), which grows to 45–200 cm high and, depending on the variety, ripens in 60–120 days. It is resistant to drought, heat, and salt. Its small edible seeds are used as livestock and bird feed in North America and as a food cereal in Eastern Europe and Asia. It cannot be made into leavened bread and is consumed as flatbread and grits. In the past millet was widely cultivated, but it has been largely replaced by wheat and rye. In 1913, 525,000 ha in Ukraine were devoted to millet. That area represented 15 percent of the total millet area in the Russian Empire but only 2.1 percent of the grain area in Ukraine. Millet became more important in the years following the Second World War, especially during droughts when the winter wheat crop failed. In 1960, 722,000 ha in Ukraine were seeded to millet, an area representing 5.6 percent of Ukraine's grain acreage and 19 percent of the total USSR millet acreage. Since then millet has declined in importance: in 1985 only 302,000 ha, or 1.9 percent of the grain area in Ukraine, was devoted to millet. Millet is grown throughout Ukraine, except in the western regions. The most widely used strains are Veseopodolianske 38, 312, and 367, Podolianske 24, Khar'kivske 436, and Myronivske 85.

In Ukrainian folklore millet symbolizes maidens' braids and fertility. Millet seeds were believed to have magical protective powers against evil spirits.

B. Somchynsky

Mills. See Flour milling.

Konstantin Milonadis: AC-II
(chromed steel, 1969)

Milonadis, Konstantin, b 5 June 1926 near Kremenchuk, Poltava oblast. Sculptor and art professor. A post-war refugee, he has lived in the United States since 1951 and studied at the School of the Art Institute of Chicago (1953–7) and Tulane University (MFA, 1959). Milonadis has been a professor and artist in residence at numerous universities in the United States and has been active in the Ukrainian Institute of Modern Art in Chicago. His bronze, wood, stone, and steel-wire-and-spring kinetic constructions can be considered sculptures of negative space, and invite contemplation by the viewer. Solo exhibitions of his works have been held in Chicago, Urbana, Binghamton, Valparaiso, and Fort Wayne.

Miloradovich. See Myloradovich.

Milove. IV-21. A town smt (1990 pop 6,000) and raion center in Luhanske oblast. It was founded at the end of the 19th century, and it attained smt status in 1938. It has a vegetable-oil and protein plant and a geological museum.

Mindaugas (Mindove, Mendog, Mindovh), b ?, d 1263. Lithuanian ruler, considered the founder of the Grand

Duchy of Lithuania. While consolidating his rule over Lithuanian lands in the 1230s and 1240s, he faced a major revolt by many of his leading nobles, including his brother and nephews. The uprising was supported by the Galician-Volhynian prince *Danylo Romanovych, who was married to a niece of Mindaugas, and who sought to include the *Chorna Rus' lands in his domains. Mindaugas eased his situation in 1251 by accepting Christianity, thereby gaining the backing of the Livonian and the Teutonic Knights. He arranged the marriage of Danylo's son to his own daughter and concluded a peace treaty in 1254 that made Roman Danylovych ruler of Chorna Rus', including the Navahrudak principality. In 1258 Mindaugas broke the treaty and invaded Slavic territories, and by 1260 he had reverted to paganism and routed the Livonian and Teutonic forces near Lake Durbe. He and two of his sons were murdered in 1263 by conspiring Lithuanian feudal lords. A period of internal unrest followed in Lithuania, until the *Gediminas dynasty came into power and ushered in an extended period of territorial expansion.

Mineral fertilizers. Synthesized chemical substances applied to the soil to increase its fertility. The most important elements in the compounds are nitrogen, phosphorus, and potassium, followed by sulfur, magnesium, calcium, and certain trace elements. Nitrogenous fertilizers are produced by treating synthetic ammonia with sulfuric acid, by converting ammonium salts, or by more modern methods of utilizing natural and coking gases. Phosphorus fertilizers most commonly include the soluble compounds of superphosphate and triple superphosphate, obtained by treating calcium phosphate with sulfuric and phosphoric acids respectively. Calcium phosphate is found in phosphorite and apatite ores and in the slag by-product of steel furnaces. Potassium fertilizers are obtained from potash deposits.

The production of mineral fertilizers is one of the older branches of the chemical industry. Potash began to be processed in 1913 in Stebnyk and Kalush, in Galicia. Since then potash has been the main source of potassium in Ukraine. In 1983 the Stebnyk plant was involved in an environmental disaster: the dam of a tailing pond collapsed, and salt brine severely polluted 500 km of the Dniester River. Before the First World War superphosphate plants were established in Odessa and Vinnytsia. After the war a

Mineral fertilizer production in Ukraine, 1928–85 (final processed product; in 1,000 t)

	1928	1940	1965	1970	1975	1980	1985
Total	11	212	1,582	2,498	3,856	4,124	5,073
Nitrogenous			801	1,396	2,222	2,403	3,220
Phosphoric			519	703	1,178	1,344	1,563
Potassic			262	399	456	377	290
Fertilizer application (kg/ha)			38.5	65.1	111.8	112.3	153.4
Ukraine's share in total Soviet production (percentage)		28.0	21.4	19.1	17.5	16.5	15.3

(For mineral fertilizer gross production see Chemical industry.)

new superphosphate plant was built in Kostiantynivka, and the older plants were greatly expanded. During the 1930s synthetic ammonia manufacturing complexes were constructed at Horlivka and Dniprodzerzhynske. In 1928 Ukraine's share of the Soviet gross output of mineral fertilizers was 42 percent. With the construction of large chemical plants outside Ukraine during the 1930s, its share of the output had declined to 26 percent by 1937. Ukraine had a monopoly on superphosphate production until 1940.

By the 1950s Ukraine's phosphorus reserves were inadequate to meet its needs, and fertilizers began to be imported from the Kola Peninsula and Kazakhstan. In recent years slag from the Mariupol Azovstal Metallurgical Plant has become a source of phosphate fertilizer. The older ammonia plants were reconstructed in the 1950s, and plants utilizing natural and coking gases were built in Rivne and Cherkasy. In the late 1970s mineral fertilizer output fell, with adverse effects on agricultural production. In 1985 nitrogenous fertilizers accounted for 63.5 percent of the fertilizer production, phosphorus fertilizers for 30.6 percent, and potassium fertilizers for 5.7 percent (see the table).

Before 1965 fertilizers did not play an important role in increasing agricultural productivity. In 1960 only 14.6 kg of fertilizer per ha was applied. By 1975 the rate of application had reached 111.8 kg per ha, approaching European and American standards. Much fertilizer was misapplied or wasted because of backward agrotechnology, lack of storage facilities, and a shortage of spreaders. Fertilizer is usually spread in solid form, although the liquid form is more effective. Fertilizer runoff has caused serious harm to rivers and lakes in Ukraine.

B. Somchynsky

Mineral resources. Inert substances, occurring naturally in the earth, which can be used for economic purposes either in their original form or after processing. From the standpoint of their utilization in a national economy, mineral resources are usually classified into three groups: fuels (coal, petroleum, natural gas, peat, oil shale, and uranium), metals (ferrous, nonferrous, and precious metals), and nonmetallic minerals (including raw materials for the chemical industry, precious stones, mineral waters for bathing or drinking, and building materials).

History. Mineral exploitation in Ukraine dates back to the Paleolithic Age, when flint was mined and shaped into tools. Mines (such as that at the Luka-Vrublivetska excavation, near Kamianets-Podilskyi) yielded flint that was traded over considerable distances. In the Bronze Age copper was mined in the present-day Donbas region, in the Kherson area, and in Transcarpathia. During the Iron Age sedimentary deposits of bog iron ore in the forest belt came under exploitation. In addition, use was made of building stone, flint, sandstone, and potter's clay. From ca 500 BC marble was quarried in the Crimea for the construction of the Hellenic cities of Chersonesus and Panticapaeum. Probably even in prehistoric times salt was mined in Subcarpathia, and gold in Transcarpathia. During the Princely era the principal mineral resources were bog iron ore, salt, potter's clay, building stone, and amber. Similar exploitation continued into the periods of the Polish-Lithuanian Commonwealth and the Hetmanate, with the extraction of salt, iron ore, and saltpeter gaining prominence.

Modern exploration and industrial exploitation of min-

eral resources in Ukraine began in the 19th century. Coking coal of the Donets Basin was first mined at the end of the 18th century, and the mining of that resource was widespread by the 1870s. The mining of iron ore in Kryvyi Rih began in 1881, and that of manganese ore in the Nykopol area in 1886. The extraction of petroleum in the Subcarpathian foothills began in the 1850s. By the 1890s the coal and iron-ore mining industries were developing rapidly. Iron ore, manganese, coal, and (since the Second World War) natural gas continued to be the outstanding mineral resources of Ukraine, accounting for nearly 90 percent of the mined resources by value. In addition the extraction of many other mineral resources (including potassium salts, phosphorites, mercury, titanium, and uranium) developed in Ukraine. At present Ukraine is endowed with over 80 kinds of mineral resources, concentrated in over 7,000 deposits, of which more than 4,000 were being exploited in 1984. Ukraine contained over 30 percent of the proven iron-ore reserves of the former USSR, approx 30 percent of the coking coal, some 80 percent of the manganese ores, over 50 percent of the graphite and ozocerite, and some 30 percent of the mineral pigments and kaolin. Ukraine is the world's fourth-largest producer (after China, the United States, and the RF) of bituminous coal, second-largest producer (after China) of iron ore, and largest producer of manganese.

Location. The mineral resources of Ukraine are favorably located with respect to both one another and the marketplace. The location of mineral deposits is closely related to the geological structure of Ukraine. The diversity and the proximity of the various minerals stem from three factors: (1) the presence of three basic structural zones of the earth's crust - the platform (underlain by the Ukrainian Crystalline Shield), the geosyncline (the Dnieper-Donets Trough and the Donets Basin), and the foredeeps (the Subcarpathian foothills and the Black Sea Depression); (2) an exceptional diversity of deposits with respect to origin and structure; and (3) a diversity of strata, representative of all stages of the geological development of the territory. The network of railways and waterways in Ukraine enhances the transportability of the resources to other regions and for export.

The diversity of mineral resources in Ukraine is apparent in each of the three major categories. Among the hydrocarbon-based fuels the most representative are coal (the anthracite and bituminous coal of the Donets Basin, the bituminous coal of the Lviv-Volhynia Coal Basin, and the lignite or soft coal of the Dnieper Lignite Coal Basin), natural gas and petroleum (the Dnieper-Donets Trough, the Subcarpathian foothills, and the Black Sea Depression), peat (mostly in Polisia), ozocerite (Subcarpathian foothills), and the as yet unexploited oil shale (the Podilia Platform). Uranium, though not abundant, is mined near Zhovti Vody, in the Ukrainian Crystalline Shield. Outstanding among the metals are the large, rich deposits of iron ore (concentrated mostly along several elongated structures in the Ukrainian Crystalline Shield, but also in the sedimentaries of the Kerch Peninsula) and manganese ore (in sedimentaries overlying the Shield near the iron-ore deposits). Deposits of titanium mineral (ilmenite) at Irshanske (south of Korosten) and Vilnohirske (west of Dnipropetrovske) have helped make Ukraine one of the world's largest producers of titanium metal. Other metallic ores, such as bauxite, copper, nickel, lead, zinc, and mercury, are scattered in a number of little deposits with

Production of extractable minerals, 1890–1987 (in million t)

	1890	1913	1930	1940	1950	1960	1970	1980	1987
Bituminous coal	1.3	22.5	30.5	83.3	76.4	160.1	196.2	188.2	182.7
Iron ore	0.1	6.9	7.8	20.2	21.0	59.1	111.2	125.5	117.9
Manganese ore	–	0.3	0.3	0.9	0.9	2.7	5.2	6.9	7.2
Natural gas (billion cu m)	–	–	0.4	0.5	1.5	14.3	60.9	56.7	35.6
Petroleum	0.1	1.0	0.5	0.4	0.3	2.2	13.9	7.5	5.6
Lignite	–	–	0.1	0.5	1.6	12.0	10.9	8.9	9.3
Peat	–	–	0.4	3.5	2.9	4.7	4.1	1.6	2.2

small reserves. Raw materials for the chemical industry include the abundant deposits of common salt, potassium salts, phosphorites, gypsum, and chalk. Other large and valuable mineral resources of Ukraine include kaolin, fire clay, graphite, and sulfur. Ukraine possesses rich building-material resources: crystalline rocks, such as granite, basalt, andesite, porphyry, and labradorite; noncrystalline rocks, such as sandstones, limestones, and marble; and various kinds of clays, sands, and gravels. Among the precious and fabricated stones are topaz, rock crystal, garnet, opal, amber, tourmaline, and chalcedony. Of considerable medicinal significance are the large reserves of mineral waters.

Exploitation. The exploitation of mineral resources has increased rapidly in the 20th century. The output of the most important minerals in Ukraine grew in most cases almost continuously until about 1970, after which the major fossil fuels began to indicate some decline (see the table).

Whereas the depressed values of mined output after 1913 or 1940 indicate an incomplete recovery after war-time devastation, the declines following 1970 or 1980 reflect an exhaustion of mineral resources. Only the declines in lignite and peat, by the 1970s, were indicative of their partial replacement for fuel by the cleaner and more efficient oil and natural gas. Oil and natural gas, however, were being withdrawn at a faster rate than new reserves could be found or developed, and their output began to decline in the 1970s. Deposits of bituminous coal, used for generating electricity and the production of coke for iron smelting, likewise have been depleted. Despite deeper mining (which is more difficult and involves a greater danger of methane gas explosions) and the employment of more sophisticated (and more costly) machinery, output has declined since the 1970s. The richest reserves of iron ore, too, have been exhausted, and even with increased concentration and pelletization, the total output has started to decline.

Besides depleting the reserves mining activity has had a negative environmental impact. The underground mining of coal in the Donets Basin has generated high conic mounds of rock wastes near the mine sites, from which toxic substances or acidic waters have seeped into nearby ponds and streams. Cave-ins have damaged surface structures. As well, open-pit surface mining of lignite, iron ore, manganese ore, bauxite, kaolin, sand, gravel, and rock – though lending itself to the use of large machinery and entailing lower labor costs, greater labor safety, and more complete removal of the mined mineral resources – increasingly has accelerated the pollution of water and the loss of agricultural land to mining. In an attempt to counteract the trend, a code concerning the extraction of mineral resources was adopted by Ukraine in 1976, but improvements to date have been minimal.

Mineral Resources Institute (Instytut mineralnykh resursiv). A technical research institute devoted to the study of solid mineral resources and underground waters in Ukraine. Formed in 1956 in Symferopil out of the Crimean branch of the AN URSR (now ANU), it was transferred to the Ministry of Geology of the Ukrainian SSR in 1964. It consists of 15 departments and a branch in Dnipropetrovske; its main areas of study are metallogenics, coal geology, hydrogeology, geological engineering, geophysics, and ore enrichment processes.

Mineral waters. Waters (usually underground) that contain a raised concentration of dissolved mineral components and gases. They possess physical and chemical properties that are considered beneficial to the human organism or of therapeutic value for rheumatism, arthritis, skin diseases, and other ailments.

The occurrence of mineral waters in Ukraine is uneven. The greatest concentrations are in the Carpathian Mountains and the Caucasus and their foothills. Smaller concentrations are found in the Ukrainian Crystalline Shield, the Dnieper-Donets Trough, the Lviv Trough and the Podilia Upland, and the Crimean Mountains. The remaining (mostly) lowland areas have few sources of mineral waters, and those that are found are of low mineral concentrations. Of the many mineral water sources in Ukraine, only a small number are used for therapeutic purposes. Naturally carbonated mineral waters are used as table beverages. A few mineral waters have industrial significance, as sources of salts, iodine, or bromine, or have the potential for use as sources of heat.

Radioactive (radon, radium) mineral waters are associated with the Ukrainian Crystalline Shield. Despite their reputed medicinal qualities, they are not widely used and have not been adequately studied. The major developed sources of such waters are located at Khmilnyk, Myroniv-

ka, and Polonne, although other sites, such as Zhytomyr, Znamianka, and Vladyslavivka, are also known.

Carbonated mineral waters are common in the Carpathian Mountains, mostly in Transcarpathia and the Lemko region. In the Lemko region, at Krynytsia and other locations, carbonated mineral waters have been used for a long time. In the Hutsul region, to the southwest of Kolomyia, they are known near Verkhovyna (formerly Zhabie). In Transcarpathia there are nearly 120 sources of mineral waters: soda-carbonated mineral waters, located mostly in western Transcarpathia in the vicinity of Svaliava; alkaline-carbonated mineral waters, located mostly in the central part of the region; carbonated mineral waters of the Narzan type, in the southeast; and carbonated saline mineral waters, in the Uzh River valley.

Hydrogen sulfide mineral waters, though also found in Transcarpathia, are concentrated along the Carpathian foothills and the Dniester River at Morshyn, Truskavets, Nemyriv, and other locations. Sulfur springs are also found, in the Crimea near Teodosiia and at the foot of the Western Caucasus at Matsesta (near Sochi).

Glauber's salt, saline, and alkaline mineral waters are found in the foothills of the Carpathians (at Truskavets, Morshyn, and other places), the Crimean Mountains, the Dnieper-Donets Trough (in Myrhorod and its vicinity and Luhanske), the Black Sea Depression (near Odessa, near Kyrylivka, south of Melitopil, near Berdianske, and across the Azov Sea at Yeiske), and the foothills of the Caucasus (at Horiachyi Kliuch, Khadyzhenske, Naftohorske, and Maikop). Thermal springs are found in the Crimea in two groupings, those rising naturally to the surface on the

Kerch Peninsula, and those fed by tube wells at Saky and Yevpatoriia.

As well as being used at resorts, mineral waters are being bottled in increasing quantities for consumption as table beverages. In 1961 more than 30 plants in Ukraine filled 190 million bottles of mineral water. Since then the output has increased fivefold, about one-half of it being lightly mineralized carbonated waters. The most widely distributed bottled carbonated mineral waters of Ukraine are from Zhytomyr, Myrhorod, Truskavets ('Naftusia'), Drahave, Ovidiopil (near Odessa), Berezivka (near Kharkiv), Teodosiia, and Shepetivka.

I. Stebelsky

Mineralogicheskii zhurnal (Mineralogy Journal). A bi-monthly scientific journal published since 1979 in Kiev by the AN URSR (now ANU) Division of Geology, Geophysics, and Geochemistry. It deals with theoretical, applied, regional, and genetic mineralogy, including topics such as problems of mineral crystallography, crystallochemistry, mineral physics, mineral genesis, and the history of mineralogy. It also includes articles on the methodology of mineralogical studies and on mineralogical methods of exploration and assessment of useful mineral deposits.

Mineralogy. The study of minerals, their formation and occurrence, their properties and composition, and their classification. The development of mineralogy in Ukraine was closely connected with that of geology. Until 1917 research in mineralogy was conducted mainly by the chairs of mineralogy associated with geology at the universities of Kharkiv, Kiev, Lviv, and Odessa, the institutes of technology at Kiev and Lviv, and the Katerynoslav Mining Institute. By the 1920s and 1930s, in addition to being conducted by the geological institutions in the All-Ukrainian Academy of Sciences (now ANU), research in mineralogy was being undertaken by the Ukrainian branches of various all-Union institutes (of the Mineralogy of Raw Materials, of Fertilizers, and others). At present most work in mineralogy in Ukraine is done at the Lviv Geological Society, which also publishes *Mineralogicheskii sbornik*, and at various ANU institutes (of the Geological Sciences, of the Geochemistry and Physics of Minerals). Since 1970 the Ukrainian Mineralogy Society has been active, and since 1979 the ANU has published *Mineralogicheskii zhurnal* in Russian. The most outstanding mineralogist of Ukraine was V. *Vernadsky. Other prominent mineralogists were M. Bezborodko, V. Luchytsky, Ye. Lazarenko, and M. Sydorenko. Current mineralogists of note include A. Povarennykh, M. Semenenko, and M. Shcherbak.

Miniature painting. A term used to describe a picture in an illuminated manuscript, and a classification for all small paintings, particularly portraits that can be mounted and worn as locket or cameos. The portrait miniature, which was meant for personal and household use, was preceded by the medieval illumination of manuscripts and the Renaissance portrait medal. In Ukraine portrait miniatures were not widespread and have not been studied adequately. Some of the earliest were of the *panagia* type worn as medallions by clerics. Medallion portraits of the tsar awarded on special occasions gained some currency. In the late 18th and early 19th centuries miniature portraits became popular, particularly among the aristocracy, and galleries of them were founded in the palaces of the Ivanenko, Kochubei, Rodzianko, Kapnist, and Iskrytsky families. These miniature portraits were painted on vellum, wood, metal, ivory, cloth, or porcelain in watercolor, oil, or gouache. They were usually square, oval, or round and were hung on walls, displayed on furniture, or used in rings, medallions, tobacco boxes, and brooches. In the late 18th and early 19th centuries miniature portraits were painted by H. Musiisky and V. Borovykovsky, who painted a miniature of V. Kapnist (1793) and portrait medallions in his large-scale portraits (eg, of H. Bezborodko and his daughters [1803]). Some other interesting ones were by the folk artists I. Pokorsky (portrait of Zhoravko, 1810s) and Ye. Krendovsky, who painted single (V. Martynova-Ostroggradskaia, 1840), double (Shyrynsky-Shakhmatov, 1847), and family portraits (the Mahdenko children, 1848). The self-taught artist S. Rymarenko also painted portraits (1936).

Miniature portraiture declined with the widespread use of photography in the 19th century. In the early 20th century, however, interest was revived in miniature silhouettes; they were created by H. Narbut (his self-portrait with his family, 1915), M. Zhuk, and S. Kononchuk. Although miniature portraits are rarely produced by con-

Miniature painting from the 1073 *Izbornik* of Sviatoslav

temporary artists, some have been done in ceramic, porcelain, and enamel (eg, by O. Borodai).

V. Ruban

Mining science (*hirnycha nauka*). Mining science in Ukraine dates back to the beginning of the 20th century, when mining schools were set up in Lysychanske and Horlivka, and the Higher Mining School was established in Katerynoslav (1899). In 1912 the latter was reorganized into a mining institute; it attracted scientists such as M. *Fedorov, O. Dynnyk, and A. Terpigorev. In the early years of the 20th century the Makiivka Mining Rescue Station was founded to study the technology of shaft reinforcement, ventilation, and fire fighting. In the 1930s the Institute of Mining Mechanics of the AN URSR was set up in Kiev. Mining faculties appeared in higher educational institutions. Today theoretical and experimental research is conducted at the ANU (formerly AN URSR) institutes of Mining Mechanics and Cybernetics in Donetsk, the institutes of Mine-Machine-Building, Automation, and Computing Technology in Kharkiv, the (until 1992 All-Union) Scientific Research Institute of Coal in Kharkiv (est 1928), and the Dnipropetrovske and Kryvyi Rih mining institutes.

An institute in Makiivka investigates work safety in the mining industry. These institutions developed the theoretical and practical principles for locating, preparing, and exploiting mineral seams, as well as the theory of cutting coal, the dynamics of cutting-machines, the mechanization of reinforcement, and new forms of shaft transport. Among the researchers were Fedorov (mining mechanics), Dynnyk (mining pressure, hoists, ventilation), O. *Shcherban, V. Cherniak (mining thermodynamics and ventilation in deep shafts), H. *Savin (the dynamics of hoists), V. *Pak (the construction of shaft ventilators), Terpigorev (the exploitation of coal fields and mechanization of mining), K. Borysenko (compressors and pneumatic engines for mining machines), M. *Poliakov and S. Volotkovsky (belt conveyers and underground electric transport), P. Nestorov (the construction of shaft hoists), K. *Tatomyr, B. Lokshyn, O. Naidysh, and D. Ohloblyn (shaft design, beam installation, ventilation), O. *Kukhtenko and O. Kryzhanivsky (automated control of cutting-machines and shaft hoists), M. Zaitsev (mining pressure and coal and gas blowouts), M. *Starykov (developing seams at great depths), M. Ivanov (productive capacity planning), and F. *Abramov and B. Hretingser (the theoretical foundations of the dynamics of air and gas in shaft ventilation). Ukrainian scientists, engineers, and builders designed coal-mining combines (the Donbas, Kirovets, and UKR), cutters (the USB), ore-loading machines (the EMP-1 and PLM-5), coal saws, equipment complexes (Don-VUHI and Dondniprovuhlemash), and mechanical hydraulic coal-crushing equipment (Ukrainian Scientific Research Institute of Hydraulic Coal Mining). The Ukrainian Ministry of the Coal Industry has published the monthly Russian-language journal *Ugol' Ukrainy* since 1957.

S. Protsiuk

Ministries of the Ukrainian SSR. The central administrative organs of Soviet Ukraine. Until March 1946 ministries were called *people's commissariats. Central agencies within Ukraine's Council of Ministers, such as the State Planning Committee, the CC CPU Committee for Party-State Control, the KGB, and the Central Statistical Administration, had nonadministrative (development, co-ordinating, and planning) functions. The ministers and heads of state committees and commissions made up the central government, the *Council of Ministers of the Ukrainian SSR.

Until August 1991 there were two types of ministries in Ukraine, Union-republican and republican. The Union-republican ministries were subordinated to both the Council of Ministers and the corresponding USSR Union-republican ministry in Moscow. The republican ministries were constitutionally subordinated directly to the Council of Ministers, although in practice USSR ministries and Union-republican ministries in Moscow interfered in the work of the republican ministries, and the division of responsibilities was unclear. In the 1960s the number of republican ministries was reduced, and some became Union-republican ministries. In 1981 Soviet Ukraine had Union-republican ministries of the construction of heavy-industry enterprises; higher and specialized secondary education; internal affairs; the coal industry; geology; energy and electrification; state purchases (of agricultural products); foreign affairs; communications; culture; light

industry; forest management; the lumber, paper, and woodworking industry; melioration and water management; assembled and special building works; the meat and dairy industry; education; health protection; fruit and vegetable farming; industrial construction; the building-materials industry; state farms; rural construction; the rural economy; trade; finances; the food industry; ferrous metallurgy; and justice. It had only six republican ministries: automobile transportation; auto-route construction and utilization; communal-housing management; local industry; public services; and social security.

Ministries were created, reorganized, and abolished, and their ministers appointed and removed, by Ukraine's Supreme Soviet or, between its sessions, by the Supreme Soviet's Presidium on the recommendation of the chairman of the Council of Ministers subject to subsequent approval by the Supreme Soviet. Ministers were answerable to the Supreme Soviet, its Presidium, and the Council of Ministers; they had to be CPSU members and perform their duties on the basis of the principle of 'one-man management.' A ministry's responsibilities and tasks were defined by the Council of Ministers, and a minister's instructions and decrees could be annulled by the Council of Ministers and, in the case of Union-republican ministries, by corresponding USSR ministers.

Ministry of Internal Affairs. See MVD.

Ministry of State Security. See MGB.

Grigori Minkh

Minkh, Grigori [Minx, Grigori], b 19 September 1836 in Griazi, Lipetsk county, Tambov gubernia, Russia, d 23 December 1896 in Kiev. Russian pathological anatomist and epidemiologist. After graduating from Moscow University (1861) he specialized in pathological anatomy in Germany and taught at Kiev University (1876-95). He presided over the Society of Kiev Physicians (1882-6) and participated in expeditions to Turkestan, Egypt, Palestine, and Southern Ukraine to study the plague, leprosy, and typhus.

Minkivsky, Oleksander [Min'kivs'kyj], b 25 December 1900 in Snizhna, Skvyra county, Kiev gubernia, d 25 April 1979 in Kiev. Conductor and teacher. He completed his studies at the Lysenko Music and Drama Institute in 1930 and taught music at the Kiev Pedagogical Institute and the Music and Drama Tekhnikum. In 1934 he became

artistic director and chief conductor of the Ukrainian Radio Committee Choir. Evacuated from Kiev in 1941, he was appointed director of the Verovka State Chorus upon his return and then transferred to the newly created State Banduryst Kapelle of Ukraine as artistic director and chief conductor (1946–72). He also held a position at the Kiev Conservatory (lecturer from 1951, professor from 1960).

Minkovych, Volodymyr [Minkovyč] (Minkowycz, Wolodymyr), b 21 October 1937 in Libukhova, Dobromyl county, Galicia. Mechanical engineer and educator; member of the American Society of Mechanical Engineers. He graduated from the University of Minnesota (PH.D., 1965) and worked at the Argonne National Laboratory and as an independent consultant. He also taught at the University of Minnesota and University of Illinois. He was editor of *International Journal of Heat and Mass Transfer*. He has published numerous technical papers and *A Laboratory Manual for Fluid Mechanics* (1973) and edited *Progress in Heat and Mass Transfer* (vol 5, 1972).

St Constantine Ukrainian Catholic Church in Minneapolis

Minneapolis. A midwestern American city, which forms part of the Twin Cities metropolitan area (together with St Paul). In 1980 the population of Minneapolis proper was 370,950, and that of the metropolitan area was 2,113,530, including 7,720 Ukrainians.

The first group of Ukrainians arrived there in the 1870s from the Transcarpathian region of Ukraine and were followed in the early 1900s by immigrants from Galicia. Upon arrival they settled on the land bordering the city in what is now northeast Minneapolis and worked in the forest, factory, sawmill, and railway industries. The largest influx of Ukrainian immigrants came after 1949. Today many Minneapolis Ukrainians are white-collar workers and professionals.

The first church for Ukrainian faithful was St Mary's Greek Catholic Church, built in 1888. A jurisdiction dispute with the local Roman Catholic bishop following the arrival of the church's first priest, Rev A. Toth, in 1889, led the parish to affiliate with the San Francisco-based Russian Orthodox church. Minneapolis subsequently became an important Russian Orthodox center in spite of the fact

that its local adherents were predominantly Ukrainian. The first specifically Ukrainian church in Minneapolis (St Constantine's) was built in 1913. In 1971 it was rebuilt, and a new rectory and gallery added. There are two Ukrainian Orthodox parishes in Minneapolis. A Ukrainian Protestant community has existed since the 1940s. There are two Ukrainian Baptist communities, one of which sponsors a Ukrainian-language radio broadcast in the Twin Cities on Sunday afternoons.

Minneapolis remains the center of Ukrainian social and cultural life in the Twin Cities. Among the earliest social and cultural organizations were the Zaporozhian Sich (1918) and an amateur theatrical group (1925), a branch (no. 32) of the Organization for the Rebirth of Ukraine, and a folk ballet and chorus (1934). The most important and prominent social, cultural, and political leader of the Ukrainian community in the Twin Cities was A. *Granovsky. Many new political organizations were founded by the postwar immigrants. In 1980 the Minnesota branch of the Ukrainian Congress Committee of America (UCCA) contained representatives from 29 local bodies, including churches and their allied organizations; independent youth groups; a veterans' association; political organizations, such as the Ukrainian Republican Club and the Ukrainian Democratic Club; the Ukrainian American Center; benevolent associations; and a credit union. The Ukrainian Gift Shop, founded by M. Procai, is well known throughout North America for its Ukrainian Easter eggs. The Immigration History Research Center (1964) at the University of Minnesota in Minneapolis houses the largest collection (founded by A. Granovsky) in the country of materials on Ukrainian immigration to the United States. The two main cultural organizations are the chorus Dniro and the women's vocal ensemble Yevshan Zillia. The music journal *Muzychni visti* was published in the Twin Cities in 1962–9 before moving to Jersey City. Three English-language publications are the Ukrainian Catholic quarterly *Trident* (1972–), the Ukrainian Orthodox League *Newsletter* (1972–), and *UKADET* (Ukrainian Kadet, 1941–65, 1971–2), published by the Ukrainian Folk Ballet at St Michael's Church.

H. Myroniuk

Minnesota. One of the western north central states of the United States (1990 pop 4,375,099; 10,691 Ukrainians). The 1980 census indicated a total of 4,075,970 inhabitants, with 9,558 Ukrainians identified as a single-ancestry group. In 1976 it was estimated that there were 10,000 Minnesotans of Ukrainian origin, with the largest concentration in the Twin Cities (Minneapolis–St Paul) area. The first immigrants arrived in the 1870s from Transcarpathia and settled on land which is now Northeast *Minneapolis. At the end of the 19th century, Ukrainians from Galicia and Subcarpathia settled in northern Minnesota to work in the iron mines of the Mesabi Range, especially in the Chisholm area. Some Ukrainians from Canada also settled in

the northern part of the state after remaining on homestead lands they thought were situated in southern Manitoba. Others settled in the towns of Virginia, Hibbing, and Eveleth. The third wave of immigration, after the Second World War, brought over 100 Ukrainian families to Minnesota.

St Josaphat's Ukrainian Pontifical Minor Seminary

Minor seminary (*Mala seminariia*). A secondary school that prepares students for further theological pursuits in the Catholic church, in addition to providing a basic course of studies. The first Ukrainian minor seminary, named after St Josaphat, was established in Lviv in 1919; in 1935 it had 172 students. A second, smaller minor seminary (42 students in 1935) was established in Rohatyn in 1931. These schools were closed after the Soviet occupation of Western Ukraine, although the Lviv seminary was briefly reopened under the subsequent German occupation.

Outside Ukraine the first Ukrainian minor seminary was St Basil's Academy in Philadelphia (est 1924), which was later moved to Stamford, Connecticut. In Canada, St Vladimir's College was established in Roblin, Manitoba, under the direction of the Redemptorist Fathers. In South America, minor seminaries are run by the Basilian order in Prudentópolis, Brazil (St Josaphat's), and Apóstoles, Argentina. The only minor seminary in Western Europe in which the language of instruction is Ukrainian is St Josaphat's Ukrainian Pontifical Minor Seminary, in Rome (est 1951 in France, moved to Castel Gandolfo in 1956 and to Rome in 1959).

Minorities. See National minorities.

Mykhailo Minsky

Ivan Mirchuk

Minsky, Mykhailo [Mins'kyj, Myxajlo] (Michael; real name: Spirin), b 20 August 1918 in Ukraine, d 9 October 1988 in Holland. Opera and concert singer (baritone). He studied geography at Kazan University. In a DP camp in Germany after the Second World War, he became one of the main soloists of the Ukrainian Bandurist Chorus. He arrived in the United States with the chorus in 1949 and soon launched a musical career of his own. He sang in operatic and concert appearances in Italy, Germany, Switzerland, France, England, Holland, Belgium, Canada, and the United States. He performed leading baritone parts in *I Pagliacci*, *Cavalleria rusticana*, *Il Trovatore*, *La Traviata*, *Tosca*, and *Carmen*, as well as songs by M. Mussorgsky and A. Khachaturian. His Ukrainian repertoire included songs by M. Lysenko, Ya. Stepovy, Yu. Meitus, M. Fomenko, V. Hrudyn, and A. Rudnytsky. Minsky's 11 LP recordings of Ukrainian songs have enjoyed considerable popularity since the 1950s.

Mint (*Mentha*, Ukrainian: *miata*). A fragrant, strong-scented perennial herb of the family Lamiaceae, with elongated elliptical leaves and small white, pink, or pale purple flowers arranged in clusters. There are many species, of which commercially the most valuable is the peppermint (*M. piperita*; Ukrainian: *miata kholodna*). Peppermint-541, with a high menthol content, was developed in Ukraine. Mint leaves and flowers contain essential oil which is used to improve the flavor of some medicines, in perfumery and the cosmetic industry as a fragrance, and in the food industry as a spice. Mint drops are used to treat nausea and vomiting. In Ukraine peppermint is planted in fertile lowlands, such as the forest-steppe region.

Mir. See *Obshchina*.

Mirchuk, Ivan [Mirčuk], b 18 June 1891 in Stryi, Galicia, d 2 May 1961 in Munich. Philosopher, cultural historian, and émigré community leader; full member of the Shevchenko Scientific Society from 1938 and the Ukrainian Academy of Arts and Sciences from 1946, and corresponding member of the Bavarian Academy of Sciences from 1949. A graduate of Vienna University (PHD, 1914), after the First World War he was a docent (1921–5), professor (1925–61), and rector (1947–8, 1950–5, 1956–61) at the *Ukrainian Free University in Prague and Munich and a research fellow (1926–30) and director (1931–45) of the *Ukrainian Scientific Institute in Berlin. From 1954 he was a research fellow of the Institute for the Study of the USSR in Munich and editor of its journal *Sowjetstudien*. A member of the émigré hetmanite movement, he was president of the *Ukrainska Hromada association in Berlin. At first he was interested in Greek ethics and epistemology, and published articles on the foundations of Greek ethics (1923), ethics and politics (1923), the implications of meta-geometry for the Kantian concept of space (1924), and the possibility of synthetic a priori judgment and edited a Ukrainian translation of I. Kant's *Prolegomena zu jeden künftigen Metaphysik* (1930). Turning to ethnopsychology, he attempted to describe the main features of Slavic philosophy (1927 and 1936) in order to isolate, eventually, the unique traits of the Ukrainian mind. He tackled this task in articles on L. Tolstoi and H. Skovoroda as two national types (1929), the Ukrainians' and Russians' different attitudes to the demonic (1936; later elaborated into *Das*

Dämonische bei den Russen und den Ukrainern, 1950), the worldview of the Ukrainian people (1942), and Ukraine as a mediator between the East and West (1941). Calling upon his extensive knowledge of Ukrainian thought and culture he prepared the encyclopedic *Handbuch der Ukraine* (1941; rev English trans: *Ukraine and Its People*, 1949) and *Geschichte der ukrainischen Kultur* (1957). He also wrote the textbook on esthetics (1926) used at the Ukrainian Studio of Plastic Arts in Prague. The festschrift *Symbolae in memoriam Ioannis Mirtschuk*, edited by O. Kulchytsky, appeared in 1974.

T. Zakydalsky

Petro Mirchuk

Zinaida Mirna

Mirchuk, Petro [Mirčuk], b 26 June 1913 in Dobrivliany, Galicia. Political activist, journalist, and historian. While studying law at Lviv University in the 1930s, he was active in the OUN. In 1939 he emigrated to Prague, where he completed his studies at the Ukrainian Free University (LL D, 1941). After the war he was elected president of the Central Union of Ukrainian Students (1945–7) and appointed to the leadership of the OUN (Bandera faction, 1948–52). After settling in the United States in 1950, he taught at a number of colleges and received a PH D in history from the Ukrainian Free University in Munich (1969). Besides numerous political and historical articles in the Ukrainian press, he wrote over 20 books, including *Ukrains'ka Povstans'ka Armiia, 1941–1952* (The Ukrainian Insurgent Army, 1941–1952, 1953), *Narys istorii Orhanizatsii ukrains'kykh natsionalistiv* (An Outline of the History of the Organization of Ukrainian Nationalists, 1968), and *U nimets'kykh mlynakh smerty* (1957; published in translation in 1976 as *In the German Mills of Death, 1941–1945*).

Mirmekion. An ancient Hellenic settlement 5 km north of present-day Kerch. Founded as an independent city-state in the 6th century BC, Mirmekion grew into a center for trade, manufacturing, agriculture, wine making, and fish preserving. Excavations in 1934 revealed wall fortifications and towers, living quarters, workshops, and fish processing facilities. The city also minted its own coin stamped with the city's symbol of ants ('mirmekion' being the Greek word for 'ant'). Mirmekion became part of the Bosporan Kingdom before collapsing in the 3rd century AD.

Mirna, Zinaida (née Khylychevska), b 1875, d 1 April 1950 in Prague. Civic and political leader; wife of I. *Mirny. After moving to Kiev in 1910, she was active in the Ukrainian women's and education movements. During the First World War she organized relief for deportees from Western Ukraine and played an important role in the independence movement as a member of the Central Rada and the Little Rada. In 1919 she helped found the *National Council of Ukrainian Women in Kamianets-Podilskyi, and she served as its vice-president. Later she headed its Berlin branch. After settling in Prague in 1924, she served as the longtime president of the *Ukrainian Women's Union in Czechoslovakia and gave much of her time to the Museum of Ukraine's Struggle for Independence. In 1937 she was elected to the presidium of the World Union of Ukrainian Women. She was a constant contributor to the Ukrainian press and a translator of French literature into Ukrainian.

Ivan Mirny

Yevheniia Miroshnychenko

Mirny, Ivan [Mirnyj], b 30 August 1872 in Kharkiv gubernia, d 17 March 1937 in Prague. Civic leader; husband of Z. *Mirna. After the February Revolution of 1917 he was a member of the Central Rada and acting commissioner of Kiev gubernia. In October he was appointed undersecretary in the UNR General Secretariat. Under the Hetman government and the UNR Directory he served as chancery director of the Ministry of Foreign Affairs. In 1919 he was a member of the UNR delegation at the Paris Peace Conference, and from 1920 he served in Berlin as the financial representative of the UNR government-in-exile. In 1924 he settled in Prague, where he was secretary of the Ukrainian Civic Committee, a member of the executives of several other émigré organizations, and office manager of the Ukrainian Higher Pedagogical Institute. He wrote a history of the institute (1934) and contributed to Ukrainian émigré periodicals.

Miroshnychenko, Yevheniia [Mirošnyčenko, Jevhenija], b 12 June 1931 in Radianske, now in Kharkiv oblast. Opera singer (lyric-coloratura soprano). She completed her studies at the Kiev Conservatory (1957, pupil of M. Donets-Tesseir), and then performed as a soloist with the Kiev Theater of Opera and Ballet. Her major roles were Violetta in G. Verdi's *La Traviata*, Rosina in G. Rossini's *The Barber of Seville*, Venus in M. Lysenko's *Aeneas*, Martha in N. Rimsky-Korsakov's *The Tsar's Bride*, Iolan in H. Mai-

boroda's *Mylana*, and the title role in G. Donizetti's *Lucia di Lammermoor*. She received an award at the International Vocal Competition in Toulouse, France (1958), and studied at Milan's La Scala. She has performed as a concert soloist in the Soviet Union and abroad, in Poland, Bulgaria, Yugoslavia, France, Canada, and Japan. She has recorded operatic arias, Ukrainian classical compositions, and folk songs on LPs and in films.

Mirtovsky, Mykola [Mirtovs'kyj], b 8 March 1894 in Saratov, Russia, d 16 April 1959 in Lviv. Neurologist. A graduate of Saratov University (1916), he was a professor at the Dnipropetrovske (1930–55) and Lviv medical institutes (1955–9). His research dealt with the treatment of epilepsy, botulism, and hyperkinesis, disorders of the autonomic nervous system, and circulatory disorders of the brain.

Mirylo pravednoie (Just Measure). A handbook for judges compiled in Kievan Rus' in the 12th to 13th centuries. The work contains instructions on just and unjust sentences in the first part, and on civil and church norms of Byzantine and Rus' law in the second part. The oldest extant redaction, known as the Troitskyi redaction, dates from the late 14th century. It was published in part during the 19th century and in full in 1961 in Moscow as *Merilo pravednoe*.

Natalia Mirza-Avakiants

Mykhailo Mishchenko

Mirza-Avakiants, Natalia [Mirza-Avak'janc, Natalja] (née Dvorianska), b 23 October 1889 in Boryspil, Pereiaslav county, Poltava gubernia, d ? Historian. She studied at Kharkiv University under D. Bahalii. In the 1920s and 1930s she was a professor of Ukrainian history at the Kharkiv and Poltava institutes of people's education and at Kiev University (1935–7). One of the founders of the Poltava Society for the Study and Preservation of Monuments and Antiquity and Art (1918–20) and a full member of the Scientific Research Department of the History of Ukrainian Culture in Kharkiv, she wrote articles on the Cossack *starshyna* in the late 17th century (1919), peasant movements in Poltava gubernia in 1902 (1924), and the legal system in Left-Bank Ukraine in the second half of the 17th century (1926); a book on peasant unrest in Ukraine in 1905–7 (1925); a pioneering monograph on the history of Ukraine in relation to the history of Western Europe (1928); and a reader in Ukrainian history. She was arrested in 1937 and sent to a Soviet concentration camp. Her further fate is unknown.

Mishalow, Victor [Mišalov, Viktor], b 4 April 1960 in Sydney, Australia. Banduryst, educator, and musicologist. A graduate in music from the University of Sydney (1985), he established himself as a banduryst of note in the West through concert tours in North America (1979, 1983, 1985), solo appearances with the Ukrainian Bandurist Chorus, and the release of several recordings featuring traditional, classical, and original works. He furthered his studies at the Kiev Conservatory (1979–82) under S. Bachtan and has published over 50 articles on aspects of the bandura's history.

Mishchenko, Dmytro [Miščenko], b 18 November 1921 in Zelene, Melitopol county, Tavriia gubernia. Writer and literary scholar. He completed postgraduate studies at Kiev University in 1954 and was appointed senior editor of the Radianskyi Pysmennyk publishing house and editor in chief in 1964. Several collections of his short stories have appeared: *Syny moria* (Sons of the Sea, 1955), *Bat'kivs'ka liniia* (Father's Line, 1960), *Vesniana povin'* (Spring Flood, 1960), *Dolia poeta* (The Poet's Fate, 1961), and *Ochi divochi* (Girl's Eyes, 1964). Mishchenko has written several novels, including *Siveriany* (The Siverianians, 1959), *Vitry prynosiat' hrozu* (The Winds Bring a Storm, 1968), *Chest' rodu* (The Clan's Honor, 1977), and *Naivshchyi zakon* (The Highest Law, 1978). His most important scholarly publication is *Rozvytok realizmu v tvorchosti M. Kotsiubyns'koho* (The Development of Realism in the Work of M. Kotsiubynsky, 1957).

Mishchenko, Mykhailo [Miščenko, Myxajlo], b 24 May 1896 in Kharkiv, d 20 May 1974 in Minneapolis. Psychiatrist and neurophysiologist; full member of the Ukrainian Academy of Arts and Sciences in the USA and the Shevchenko Scientific Society (from 1947). In 1917 he joined the Army of the UNR and served as a major at the front. After completing his medical studies in 1929, he taught at the Kharkiv Institute of People's Education and the Kharkiv Medical Institute and conducted research at the All-Ukrainian Psychoneurological Academy. A post-war refugee, he taught briefly at the Ukrainian Free University in Munich and then emigrated to the United States (1949), where he practiced psychiatry and continued his research. His scientific papers, most of them based on his own experiments, were published in Ukrainian, English, German, and Russian; they deal with topics such as the treatment of schizophrenia, the nature of hypnosis and sleep, and psychiatric aspects of heart diseases.

Misiia Ukraïny (Mission of Ukraine). An organ of the émigré Association for the Liberation of Ukraine (SVU), published in Toronto from 1957 to 1974 (a total of 32 issues). The magazine contained organizational documents and news, articles on the history of the struggle for Ukrainian independence and the evils of Russian communism and imperialism, polemics with other émigré political groups, and condemnations of the émigré sympathizers of 'national communism-Khvylovism.' The chief editors were S. Pidkova and V. Koval.

Misionar (Missionary). A religious journal published by the Basilian monastic order, with some interruptions, between 1897 and 1944. It began in Lviv, but soon moved to the Zhovkva monastery, the main center of Basilian activ-

Misionar (1897–1944)

ity. During the First World War it appeared in Zagreb, Croatia, and in 1940–1 it was published in Peremyshl. Initially the journal appeared semimonthly, but later it became a monthly. During 1921–39 it was called *Misionar presviatoho sertsia Isusovoho*. Several supplements to *Misionar* were published, including *Malyi misionarchyk* for children (1903–14, 1939). Among the editors of *Misionar* were P. Filias (1897–8 and 1921–6), L. Berezovsky (1898–1908 and 1916–20), and M. Marysiuk (1927–32 and 1940–1). *Misionar* was one of the most popular journals of its kind and was regularly published in a pressrun of 30,000 to 40,000 copies.

Misionar (Missionary). A monthly journal of the *Basilian order of nuns in the United States, published in Philadelphia from 1917 to June 1990. It contained popular articles on religious topics, prayers, and stories on religious themes. From the 1950s it appeared in a bilingual Ukrainian-English edition.

Misionar (Brazil). See *Ukrains'kyi misionar*.

Misiones. The northeastern province of Argentina, situated between the river Paraná and Paraguay, with its borders on the east with Brazil, on the northwest with Paraguay, and on the southeast with the province of Corrientes. Its area is 29,800 sq km, and it has 787,514 (1991) inhabitants.

Misiones was the first region of Argentina to be settled by Ukrainians and has the second-largest Ukrainian population in the country (after the Buenos Aires region). The first settlers arrived in 1897, and by 1914 the community had grown to more than 10,000. During the interwar period 20,000 Ukrainians from Volhynia and Polisia and 3,000 Bukovynians and Transcarpathians moved into the earlier-settled *Apóstoles region, in addition to establishing new settlement areas in L.N. Alem and Oberá. The majority of the settlers worked as agriculturists and adapted to local farming methods and crops quite readily. After the Second World War additional immigrants arrived in the province from the displaced persons' camps in Germany as well as from Paraguay. By the 1980s the 70,000 Ukrainians in Misiones constituted 10 percent of the province's total population and approx 25 percent of the country's Ukrainians.

Ukrainians are distributed in almost every place in the province of Misiones as follows: in the district of Apóstoles, Las Tunas, Tres Capones, Capon Bonito, San José, Sierra San José, Tuna; in the department of Posadas, Posadas, Parada Leis, and Fachinal; in the department of Candelaria, Campina; in the department of L.N. Alem, Gob, López, Picada San Javier, Bonpland, Picada Belgrano, Picada Galitsiana, Arroyo del Medio, Cerro Azul, Campi-

MISIONES

nas, and Gen Guemes; in the department of Concepción, Concepción de la Serra and Santa Maria; in the department of San Javier, San Javier, Florentino Ameghino, and Itacaruaré; in the department of Oberá, Panambi, Los Helechos, Campo Ramón, Guarani, San Martin, Chopa, Quinta Sección, Campo Viera, and Novena Sección; in the department of San Ignacio, Jardin America and Nacanguazú; and in the department of Cainguas, Campo Grande, Aristobulo del Valle, and Seguin.

Community development in the province began early in the century with the establishment of church parishes, choirs and amateur theater groups, and reading rooms. By 1922 there was a brick church, a school, and a Prosvita society in Apóstoles. In 1948 the Basilian order established a printing press in Apóstoles. The Basilian brothers operate the St Josafat seminary for boys and a junior high school for girls in Apóstoles and a high school in Posadas. During the 1970s monuments to T. Shevchenko were put up in Apóstoles and Oberá. Because of their large numbers and their continuing presence, Ukrainians have been recognized for their contribution to the development of the province. Likewise, the compact nature of their settlement has assisted them in maintaining a group identity. (See *Argentina.)

N. Kerechuk

Miskhor [Misxor]. IX-15. A resort area on the southern coast of the Crimea 13 km southwest of Yalta that is part of the town of *Koreiz. It has 14 sanatoriums and health resorts dealing with respiratory problems, heart and circulatory diseases, and nervous disorders. Its most famous architectural monument is the Swallow's Nest castle (built in 1912).

Misko, Stefan [Mis'ko], b 1912 in Lviv, Ukraine, d 1986. Painter. He was self-taught in landscape, figurative composition, and expressionist and neoimpressionist styles in watercolor and oil. He expressed his feelings in symbolism and abstraction. After arriving in Australia in 1949, he founded the Ukrainian Artists' Society in Australia (SUOMA). He held several one-man exhibitions and is widely represented in private collections in Australia and overseas.

Mitla (Broom; Spanish: La Escoba). An Argentinian-Ukrainian journal of humor and satire. Published monthly and edited from 1949 by Yu. Serediak, *Mitla* was a popular eight-page compilation of short pieces and cartoons that looked whimsically at émigré life, indulged in broad-ax humor, and occasionally attacked Soviet politics. The name was also used for Serediak's publishing house and for an almanac he published irregularly. *Mitla* did not appear after 1976, although the publishing house continued operating.

Mitrak, Aleksander. See Mytrak, Oleksander.

Ivan Mityrynga

Mityrynga, Ivan (Mityrynga; pen names: Serhii Oreluk and Polyn), b 1909 in Bibrka county, Galicia, d 6 September 1943 at Viliia, near Ostrih, Volhynia. Political leader and publicist. In the 1930s he studied history in Lviv and was active in the OUN, and also formed a group critical of the OUN's fascist tendencies and favoring a progressive ideology and a program with a wider popular appeal. In 1938 he edited the propagandist paper *Het' z bol'shevyz-mom*, which first issued the slogan Freedom for Peoples! Freedom for the Individual! After breaking with the OUN (Bandera faction) in 1941, he set up in Polisia the Ukrainian Revolutionary Party of Workers and Peasants, which joined in 1942 with a number of other groups to form the *Ukrainian People's Democratic party. Mityrynga edited the new party's organ *Zenlia i volia*. At the same time he served as chief of the political and propaganda staff in the *Polisian Sich under T. Borovets's command. He was killed in action against Soviet partisans. Besides articles in the nationalist press Mityrynga wrote a number of political pamphlets, including *Hitler i Ukraina* (Hitler and Ukraine, 1939) and *Nash shliakh borot'by* (Our Path of Struggle, 1940).

Mitsyk, Volodymyr [Micyk], b 25 May 1925 in Piatykatky (now in Dnipropetrovske oblast). Biologist. A

graduate of the Dagestan Agricultural Institute (1950), he worked at the Kiev Veterinary Institute and the Ukrainian Scientific Research institutes of the Physiology and Biochemistry of Farm Animals and of the Meat and Dairy Industry. In 1974 he became a professor at the Kiev Trade and Economics Institute. His main research is in the area of biochemical processes in meat.

Mittenwald. A health and vacation resort center (1970 pop, approx 9,000) on the Isar River near the Austrian border in Bavaria. After the war many Ukrainian DPs were housed at two camps in Mittenwald: 2,900 in Jäger-Kaserne (1946–51) and 1,200 in Pionier-Kaserne (1947–50). At the time a Ukrainian Autocephalous Orthodox and two Ukrainian Catholic parishes, Ukrainian nurseries, elementary schools and a secondary school, libraries, a teachers' college and vocational courses, choirs, Y. Hirniak and O. Dobrovol'ska's Theater Studio (1947–9), and the Plast Ukrainian Youth Organization were active there. The weekly bulletin *Taborovi budni* (1947), the religious weekly *Khrystyians'kyi shliakh* (1946–7), the Christian monthly *Khrystos nasha syl'a* (1946–7), and the sports weekly *Zmah* (1946) came out in Mittenwald.

Mixed-feed industry. An industry that produces high-protein livestock, poultry, and fish feed – roughages, concentrates, and protein-vitamin-antibiotic-mineral supplements – from cereal grains, grasses, and the by-products and surpluses of the food and chemical industries. Before 1914 it was only a cottage industry concentrated in Kiev, Poltava, Rybnysia, Berdychiv, Balta, and other cities of Ukraine.

Under Soviet rule the industry developed slowly before the Second World War. The first feed plant was built in 1930. In 1940 nine plants produced 511,000 t of mixed feed, or 42.5 percent of the USSR production. The industry began to grow rapidly in the 1950s. During the Eighth Five-Year Plan (1966–70) feed supplements were first produced. The industry produced 2.5 million t of mixed feed in 1965, 3.73 million t in 1969, and 15 million t (as well as 1.3 million t of supplements) in 1979. Mixed feeds are now produced by over 90 specialized feed plants and large bakeries, raion food-production complexes, and interfarm mixed-feed plants. The largest enterprises are located in Mykolaiv, Poltava, Kharkiv, Kiev, Rivne, Odessa, Kirovohrad, Lutske, Donetske, Luhanske, and Chernihiv.

Mixed-forest zone. A region of natural vegetation, characterized by a mixture of broad-leaved and needle-leaved forests, that forms a transitional zone between the broad-leaved, deciduous forests to the south and the needle-leaved taiga to the north.

The mixed-forest zone of Ukraine forms part of the mixed-forest zone of the East European Plain. It occupies the northern part of Ukraine and corresponds with the physical-geographical region of *Polisia. The southern border of the zone extends from Kholm in the west eastward to Korets, and then drops south to Shepetivka, whence it continues eastward past Zhytomyr, Kiev, Nizhen, Krolevets, and Hlukhiv before swinging northward toward Sevs'k. It also includes *Little Polisia as a narrow southwestern outlier. The southern border of the zone reaches the Central European broad-leaved forest in the west, and east of Ostrih it merges with the *forest-

steppe zone. Within Ukraine the mixed-forest zone incorporates most raions of Volhynia, Rivne, Zhytomyr, and Chernihiv oblasts and parts of Khmelnytskyi, Kiev, and Sumy oblasts. Its area exceeds 113,000 sq km and represents 19 percent of the territory of Ukraine.

Characteristic of the mixed-forest zone in Ukraine are (1) a temperate continental climate with an average annual precipitation slightly in excess of evaporation, (2) a predominantly lowland topography with periglacial or glacial sandy surface deposits underlying podzolic and organic soils, and (3) a vegetation cover consisting of mixed needle-leaved and broad-leaved forests, meadows, and swamps.

The environment of the mixed-forest zone has been modified by human activity. Today only 30 percent of the zone is forested. Nearly one-third of the zone's area is occupied by cultivated land, an amount which continues to increase with the expansion of wetland drainage. Careless drainage development has resulted in waterlogging and other damage in some areas. In response plans were formulated to meliorate the situation and to proceed with environmentally sensitive development, including improved hydrotechnical construction, agrotechnical measures, and the afforestation of loose sands. Meanwhile the Chernobyl nuclear accident (April 1986) and prolonged radioactive fallout from the ensuing fire contaminated the environment and the food system in much of the mixed-forest zone. The full extent and intensity of the contamination are not yet known.

With its relative abundance of forests the mixed-forest zone has become an important outdoor recreational region in Ukraine. So that the zone's natural landscapes and wildlife would be preserved and studied, there were established in Ukraine the Polisia Nature Reserve, the Dnieper-Teteriv and the Zaliske game preserves (both north of Kiev), and several wildlife refuges. The Shatsk National Park was established in 1983 for both nature preservation and recreation. (See also *Forest, *Flora, and *Vegetation regions.)

I. Stebelsky

Miz, Roman [Myz'], b 14 August 1932 in Drohobych, Galicia. Priest and civic leader. He studied at the Catholic theological faculty in Zagreb (1953–9) and then at the faculties of philosophy in Zagreb, Novi Sad, and the Ukrainian Free University in Munich. In 1958 he was ordained a priest, and he served in Lipovljani (Croatia) and Novi Sad. He headed the Council of Ukrainian Pastors and Catechists in Yugoslavia and was secretary of the Ecumenical Institute of the Catholic theological faculty in Zagreb. In 1978 he established the Center of Theological Culture for Laity in Zagreb. He organized and served as the director of the Ukrainian radio program in Banja Luka (1967–8) and was coeditor of the monthly *Nova dumka*. He has published numerous articles in Ukrainian periodicals on religion, church history, and Ukrainians in Yugoslavia.

Mizhhiria [Mižhirja]. v-4. A town smt (1990 pop 10,200) on the Rika River and a raion center in Transcarpathia oblast. It was founded in the 13th century and was first mentioned in historical documents in 1415. It attained smt status in 1947, and its name was changed from Volove to Mizhhiria in 1953. The town has a forest products complex, a sanatorium, and tourist centers.

Miziun, Hryhorii [Mizjun, Hryhorij], b 7 April 1903 in Kryvushi, Kremenchuk county, Poltava gubernia, d 15 December 1963 in Chernivtsi. Poet and playwright. He was one of the founders of the association of Komsomol writers, Molodniak. Miziun's poems were first published in 1920. He wrote dramas about Soviet life: *Syla na sylu* (Might against Might, 1926), *Novymy stezhkamy* (On New Paths, 1930), *Rekonstruktsiia* (Reconstruction, 1931), *Liubov i druzhba* (Love and Friendship, 1937), and *Tovaryshi* (Comrades, 1938). He was the author of a critical literary study of Yu. Fedkovych titled *Spivets' narodnykh spodivan'* (The Bard of the People's Hopes, 1959).

Mizko, Mykola, b 25 May 1818 in Katerynoslav, d 8 June 1881 in Voronezh, Russia. Ukrainophile journalist. He graduated from Kharkiv University and briefly edited the official semimonthly of Katerynoslav gubernia. He also wrote articles on Russian and Ukrainian literature, social issues, and folklore for prominent Russian journals. From 1868 he lived in Voronezh. In his 1861–2 articles and reviews of Ukrainian literature in the journal *Osnova*, Mizko wrote that Ukrainian literature and theater were distinct from their Russian counterparts, raised the need for a Ukrainian literary bibliography, and published his memoirs of the actor K. Solenyk. His translations into Russian of 12 poems by T. Shevchenko appeared in the Voronezh weekly *Don* in 1869–71.

Mizyn. An Upper Paleolithic site located on the right bank of the Desna River in Chernihiv oblast. Excavated intermittently from 1908 until 1961, the site is one of the better known examples of *Magdalenian culture in Ukraine. The site contained five circular dwellings, the largest being 6 m in diameter. The dwellings were constructed by using wooden poles which were covered with animal skins and reinforced by bones or tusks. The inhabitants hunted mammoths, deer, and other animals. Approximately 113,000 pieces of flint were uncovered, of which 4,500 could be identified as tools; spear tips and needles were also found in considerable quantities. Many artifacts were excavated, including stylized sculptures of women and animals (particularly mammoths). Geometric and meandering decorative motifs were found on the female sculptures as well as on bone bracelets found at the site. Some examples of shell jewelry were also excavated. The collection is now housed in Kiev at the ANU Archeological Museum and the Historical Museum of Ukraine.

Mlaka, Danylo. See Vorobkevych, Sydir.

Mliiv Orchard Research Station (Mliivska doslidna stantsiia sadivnytstva im. L. Symyrenka). A research station for fruit growing, established in 1921 in the village of Mliiv, now in Horodyshche raion, Cherkasy oblast. It was based on the private orchards and nursery established by L. *Symyrenko, after whom the station was named in 1958. It has a collection of 1,500 fruit and berry plants and over 250,000 hybrids and produced hundreds of thousands of seedlings for fruit farms throughout the USSR. The station has developed new strains of apple, pear, and cherry trees and of gooseberry, currant, and raspberry bushes. It is under the jurisdiction of the *Ukrainian Scientific Research Institute of Orchard Research. The station was directed until 1933 by V. *Symyrenko.

Mlotkovska, Liubov [Mlotkovs'ka, Ljubov] (né Kolosova; surname by first marriage: Ostriakova), b ca 1805 in Kursk, d 31 October 1866 in Kiev. Actress on the Ukrainian and Russian stage. She debuted in I. Stein's troupe in 1823 and remained in it until 1832. She was subsequently in her husband L. Mlotkovsky's troupe (1833–43), in the Kharkiv Theatrical Enterprise (1843–50), and in theaters in Odessa (1850–6) and Kiev (1856–66). Her repertoire spanned several genres – vaudeville, melodrama, comedy, and tragedy. She played leading roles in the premieres of the first Ukrainian plays, such as Tetiana in I. Kotliarevsky's *Moskal'-charivnyk* (The Muscovite [Soldier] Sorcerer) and Uliana in H. Kvitka-Osnovianenko's *Svatannia na Honcharivtsi* (Matchmaking at Honcharivka). A biography, by A. Klinchyn, was published in Kiev in 1958.

Mlotkovsky, Liudvig [Mlotkovs'kyj, Ljudvig] (Młotkowski, Molotkovsky), b ca 1795, d 27 March 1855 in Mykolaiv, Kherson gubernia. Stage actor and managing director of Polish origin. He worked in A. Zmiievsky's troupe in Kiev (1816–20) and in I. Stein's troupe (1820–32) and from 1833 had his own troupes in Kursk (until 1836), Kharkiv (until 1837), and Kiev (until 1840). He returned to Kharkiv, where in 1842 he built a new theater, organized a theater school, and staged I. Kotliarevsky's and H. Kvitka-Osnovianenko's plays. He also built a theater in Bobrynets.

Mlyniv. III-6. A town smt (1990 pop 8,700) on the Ikva River and a raion center in Rivne oblast. Mlyniv has been known since the beginning of the 16th century. In the 17th century D. *Bratkovsky sparked some popular uprisings in the town. The fortified settlement of Muravytsi (or Moravytsi), mentioned in a medieval chronicle under the year 1149, has been excavated in Mlyniv.

Mnohohrishny, Demian [Mnohohrišnyj, Dem'jan], b ca 1630 in Korop, Chernihiv region, d after 1701 in Selenginsk Staryi, Trans-Baikal province, Siberia. Hetman of Left-Bank Ukraine. As colonel of Chernihiv regiment (1665–9) he participated in the 1668 anti-Muscovite rebellion led by Hetman I. Briukhovetsky. In June 1668 Hetman P. *Doroshenko appointed Mnohohrishny acting hetman in *Left-Bank Ukraine. In the autumn Mnohohrishny pledged loyalty to the tsar and was recognized as 'Siversk hetman.' On 13 March 1669 he was elected full hetman of Left-Bank Ukraine. Soon thereafter Mnohohrishny signed the *Hlukhiv Articles with Moscow. A staunch supporter of Ukrainian independence, he spoke out against Muscovite encroachments and Muscovy's territorial concessions to Poland, and later he conducted secret negotiations with P. Doroshenko and sent him money and troops to fight the Poles. Mnohohrishny favored autocratic rule by a strong hetman. He did not trust the senior Cossack *starshyna*, and appointed many of his relatives colonels and captains and granted them estates. In 1671 he appointed, with the approval of the Council of Officers, his brother, V. *Mnohohrishny, as acting hetman, possibly to ensure his succession. The act generated much opposition among the already aggrieved *starshyna*, and they engineered a Moscow-supported coup.

Mnohohrishny was arrested in Baturyn on 23 March 1672 and secretly taken with his brother, Vasyl, and nephew, Mykhailo, in chains to Moscow. There he was charged with high treason, tortured, and sentenced to death. The

sentence was commuted to exile for life in Siberia. Mnohohrishny was released from the prison in Irkutsk in 1682 and accorded the status of a junior boyar. He was reimprisoned in 1684 at the request of Hetman I. Samoilovych. After being released in 1688, he became commander of the Russian garrison in Selenginsk. He entered a monastery in 1696 and was still alive in 1701. Mnohohrishny's popularity as hetman is reflected in the Cossack chronicles and in *Istoriia Rusov*.

A. Zhukovsky

Mnohohrishny, Vasyl [Mnohohrišnyj, Vasyl'], b and d ? Cossack leader; brother of Hetman D. *Mnohohrishny. He served as osaul of Nizhen regiment (1664–8), emissary to Moscow (1668), captain of Chernihiv regiment (1671–2), and acting hetman (1671). In 1672, after the deposition of his brother, he was tortured in Moscow and exiled to Siberia. He later regained official favor and became a junior boyar in Krasnoarsk and commander of local imperial troops (1682–94).

Mochemordy Society (Obshchestvo mochemordiiia; literally: 'society of wet mugs,' ie, boozers). A loose grouping of liberal petty gentry in Pyriatyn county, Poltava gubernia, in the 1840s, whose members (V. and P. Zakrevsky, M. Markevych, Ya. De Balmen, and others) engaged in carousing. T. *Shevchenko is known to have taken part in their revels. At one of T. Volkhovska's balls on her estate in Moisivka in August 1848, the Zakrevskys drunkenly proposed a toast to the French republic. Consequently they and De Balmen were arrested and interrogated by the tsarist police for possible sedition, but they were released. M. Drahomanov and V. Shchurat posited that the Mochemordy were antitsarist, autonomistic freethinkers, and that that is why Shevchenko was attracted to them. M. Novytsky showed, however, that there is inconclusive evidence to support that claim, in his article in *Zhyttia i revoliutsiia* (1930, no. 3).

Mochulsky, Mykhailo [Močul's'kyj, Myxajlo], b 13 November 1875 in Mykolaiv, Zhydachiv county, Galicia,

Mykhailo Mochulsky

d 14 February 1940 in Lviv. Literary scholar, literary critic, and translator. Among his works are studies in modern Ukrainian literature – *Goshchyns'kyi, Slovats'kyi i Shevchenko, iak spivtsi Koliivshchyny* ([S.] Goszczyński, [J.] Słowacki, and Shevchenko, the Bards of the Koliivshchyna Rebellion, 1936), *Pohruddia z bronzy: Mykola Tsertelev i Ivan Manzura* (Bust in Bronze: Mykola Tsertelev and Ivan Manzura, 1938), and *Ivan Franko* (1938) – and studies of the poets of the Ukrainian school in Polish literature. Mochulsky also translated works by V. Stefanyk into Polish and wrote articles on ethnography.

Mochulsky, Teoktyst [Močul's'kyj], b 1732 in Right-Bank Ukraine, d 30 April 1818 in Kursk, Russia. Orthodox churchman and scholar; member of the Russian Imperial Academy of Sciences. A graduate of the Kievan Mohyla Academy, he served as hegumen of the ss Peter and Paul Monastery in Hlukhiv, the St Michael's Golden-Domed Monastery in Kiev, and the Elevation of the Cross Monastery in Poltava (1776–84). In 1784 he was consecrated bishop and made vicar of Moscow eparchy. Later he served as bishop of Bilhorod (1787–99) and of Kursk (1799–1818). He was elevated to the rank of archbishop in 1801. He published sermons, several works on church organization and regulations, theological tracts, a textbook on logic and rhetoric (1789), a curriculum for elementary schools (1808), and advice on educating the children of the clergy. His biography, by F. Titov, appeared in *Trudy Kievskoi dukhovnoi akademii* (1894).

Mochulsky, Vasilii [Močul'skij, Vasilij], b 13 January 1856 in Striukove, Ananiv county, Kherson gubernia, d 21 January 1920 in Odessa. Russian literary historian. Among his works on the history of Russian literature are several studies that deal with the Ukrainian language or Ukrainian literature: *K istorii malorusskogo narechiia* (Toward a History of the Little Russian Dialect, 1894), *Malorossiskie i peterburgskie povesti N.V. Gogolia* (N.V. Gogol's Little Russian and Petersburg Stories, 1902), and *Otnoshenie iuzhno-russkoi skholestiki 17 v. k psevdoklassitsizmu 18 v.* (The Relation of the South Russian Scholasticism of the 17th Century to the Pseudoclassicism of the 18th Century, 1904).

Mochutkovsky, Yosyp [Močutkovs'kyj, Josyp], b 1845 in Kherson gubernia, d 5 June 1903. Infectious diseases specialist, neuropathologist, and balneologist. A graduate of Kiev University (1869), he worked at the Odessa Municipal Hospital (1870–93) and helped found the medical paper *Iuzhnorusskaia meditsinskaia gazeta* (1892–6) in Odessa. From 1893 he was a consultant and professor of neurology at the St Petersburg Clinical Institute for the Upgrading of Physicians. In a self-experiment he showed that relapsing and typhoid fevers are transmitted through the blood by bloodsucking insects (lice).

Modernism. A tendency in art which rejected traditional styles, primarily scholasticism (in painting and sculpture), and aimed to introduce innovations in form and idea and to use (particularly in architecture and sculpture) nontraditional materials, such as new metal alloys, glass, and synthetic plastics.

Since the 19th century, modernism has come to encompass *impressionism, *symbolism, *cubism, *futurism, *suprematism, *expressionism, *surrealism, *constructivism,

and abstractionism. All of those currents have had some impact on the Ukrainian arts, although to varying degrees. In the graphic arts, painting, and decorative art, the main Ukrainian exponents of modernism were P. *Kovzhun, V. *Krychevsky Sr, M. *Boichuk, M. *Andriienko-Nechytailo, O. *Hryshchenko, M. *Butovych, H. *Mazepa, P. *Kholodny Jr, A. *Petrytsky, and V. *Meller. In sculpture A. *Archipenko was a world leader in the formation of modernist art; his style evolved, from so-called sculpto-painting (*riz'bo-maliarstvo*), through cubism and constructivism, to abstractionism. In architecture the revival of the Ukrainian national style was modernist in the designs of Krychevsky, K. *Zhukov, O. *Tymoshenko, and I. *Levynsky and in the constructivism of V. *Horodetsky, S. Kravets, O. Lipetsky, P. Yurchenko, and others. After the Second World War modernism in Ukrainian émigré art proliferated in the United States and Canada in reaction to the state-sanctioned *socialist realism in Ukraine (eg, L. *Hutsaliuk, B. Bozhemsky, Myron *Levytsky, A. *Olenska-Petryshyn, Ju. *Solovij, *K. Milonadis, and the architect R. *Zuk).

Modernism was also manifested in theater (*Molodyi Teatr; the *Berezil theater, led by L. *Kurbas; the *Mykhailychenko Theater, led by M. *Tereshchenko; the *Zahrava Theater, led by V. *Blavatsky; and the *Theater-Studio of Y. Hirniak and O. Dobrovolska), in cinema, and in music.

In Ukrainian literature modernism made its appearance in the works of M. *Vorony and the members of *Moloda Muza, who propounded the cult of 'pure art.' Vorony was a theoretician of the movement. He believed that modernism consisted of a change in thematic focus from the social to the psychological, of the enrichment of forms of versification, and of greater sophistication of metaphor. Modernism became widely characteristic of Ukrainian poetry, after the publication of *Soniashni kliarnety* (Sunny Clarinets, 1918) by P. *Tychyna, and of prose after the appearance of *Syni etiudy* (Blue Etudes, 1923) by M. *Khvylovy. Modernism, including its most radical manifestations (such as M. Semenko's futurism and V. Polishchuk's Avanhard), rejuvenated Ukrainian literature and brought it closer to trends in world literature. In the early 1930s the Soviet political authorities repressed and eradicated modernism, substituted for it an artificial 'folk' literature, and so produced a general literary decline. Not until the 1960s did a movement (see *shestydesiatnyky) building on the gains of the 1920s re-emerge. In émigré literature modernism is most apparent in the works of the *New York Group of poets.

S. Hordynsky

Modylevsky, Yakiv [Modylevs'kyj, Jakiv], b 28 January 1883 in Kiev, d 8 March 1968 in Kiev. Cytologist and plant embryologist; corresponding member of the AN URSS (now ANU) from 1939. A graduate of Munich (1907) and Kiev (1908) universities, he worked for the ANU (from 1922) and taught at Kiev University and other institutions (1920–49). He joined the ANU Institute of Botany in 1931, and in 1935–41 served as its director.

Modzalevsky, Vadym [Modzalevs'kyj], b 9 April 1882 in Tbilisi, Georgia, d 3 August 1920 in Kiev. Historian, genealogist, and archivist. A descendant of Cossack *starshyna* in the Chernihiv region, he graduated from the Nicholas Engineering School in St Petersburg (1902),

Vadym Modzalevsky

worked as a military engineer in Kiev (1902–6), and then was a training officer of the First Cadet Corps in St Petersburg. From 1911 to 1917 he directed the V. Tarnovsky's Museum of Ukrainian Antiquities in Chernihiv and was administrator and editor of publications of the Chernihiv Gubernia Scholarly Archival Commission. From 1918 he lived in Kiev, where he headed the archives and libraries divisions of the UNR Ministry of Education and the Hetman government's Arts and National Culture Administration. He was also active in the Ukrainian Scientific Society in Kiev and was secretary of the Commission for the Development of a Draft Law on the Creation of the UAN. Under Soviet rule he headed the Archival Administration and the All-Ukrainian Main Archives, was a member of the VUAN Archeological Commission, and directed the VUAN Commission for the Compilation of a Biographical Dictionary of Ukrainian Personalities.

Modzalevsky's research was based extensively on documents he had collected in the archives of Ukraine, Moscow, and St Petersburg. A specialist on the Left-Bank Hetman state, he wrote books on the history of Lokhvytsia, Sencha, Chornukhy, Kurinka, and Varva companies (1906) and on glassworks in the Chernihiv region (1926). He wrote longer articles on Poltava regiment (*Trudy Poltavskoi uchenoi arkhivnoi komissii*, vols 1–2 [1905–6]), the general judge I. Chernysh and his family (*Kievskaiia starina*, 1904, nos 4–5), relations between the monks of the Mhar Transfiguration Monastery and the Cossacks of Lubni regiment in 1649–61 (*ibid*, 1906, nos 3–4), and R. Rakushka, the first military treasurer (1663–9) (*Zapysky Istorychno-filolohichnoho viddilu VUAN*, vols 1–3 [1919, 1923]). He also edited, with introductions, editions of the books of acts of the municipal governments in Poltava in the 17th century (1912) and in Starodub in 1693 (1914), and the 1735–40 diary of Ya. *Markovych (vol 2 of *Zherela do istorii Ukraïny-Rusy*, 1913).

Modzalevsky's best-known works are his *Malorossiiskii rodoslovník* (Little Russian Genealogy, 4 vols, 1908–14), the fifth and final volume of which was never published, and *Malorossiiskii gerbovník* (Little Russian Heraldry, 1914), which he cowrote with V. *Lukomsky, and which was illustrated by H. *Narbut. He also wrote a booklet on the fundamental traits of Ukrainian art (1917) and articles on artistic metalwork in Left-Bank Ukraine and the engraver H. Levytsky. Modzalevsky's diary of the years 1896–1917 and his correspondence are preserved at the Central State Historical Archive of Ukraine in Kiev. His valuable collec-

tion of archival documents pertaining to 17th- and 18th-century Left-Bank Ukraine is in the manuscript division of the State Library of Ukraine in Kiev, and his personal library is part of the Central Scientific Library of the Academy of Sciences of Ukraine. An incomplete bibliography of Modzalevsky's works was published in *Zapysky Istorychno-filolohichnoho viddilu VUAN* (vol 1, 1919).

O. Ohloblyn, A. Zhukovsky

Moeller, Johann-Wilhelm, b 1748, d 1806. German doctor and traveler. As personal physician to King Stanislaus II Augustus Poniatowski of Poland he traveled through Ukraine and recorded his observations in *Reise von Wolhynien nach Cherson in Russland im Jahre 1787* (1802) and *Reise von Warschau nach der Ukraine im Jahre 1780 und 1781* (1804).

Mohyla, Andrii (aka Mohylenko and Myhula), b ?, d 1689. Cossack leader from Left-Bank Ukraine. He was colonel of a Cossack infantry regiment during Hetman S. *Kunytsky's 1683 Moldavian campaign and succeeded Kunytsky as hetman in 1684. Mohyla resided in Nemyriv and was pro-Polish. He negotiated with the Vatican concerning Cossack participation in the anti-Turkish coalition (his letter to Pope Innocent XI of 8 May 1684 has been preserved). Mohyla was killed in a Cossack dispute over the division of pay.

Mohyla, Petro (Rumanian: Movilă, Petru), b 10 January 1597 in Moldavia, d 11 January 1647 in Kiev. Ukrainian metropolitan, noble, and cultural figure; son of Simeon, hospodar of Wallachia (1601–2) and Moldavia (1606–7), and the Hungarian princess Margareta; and brother of the Moldavian hospodars Michael (1611), Gabriel (1617–20), and Moses Movilă (1630–2). After his father's murder in 1607, Mohyla and his mother sought refuge with magnate relatives in Western Ukraine. He was tutored by teachers of the Lviv Dormition Brotherhood School, and pursued higher education in theology at the *Zamostia Academy and in Holland and France. After his return to Ukraine he entered the military service of the Polish crown hetman and chancellor S. Żółkiewski and fought as an officer against the Turks in the battles of Cecora (1620) and Khotyn (1621). In 1621–7 he received estates in the Kiev region and, through his friendship with Metropolitan Y. Boretsky, became interested in affairs of the Ukrainian Orthodox church.

In September 1627 a dietine in Zhytomyr chose Mohyla to succeed the late Z. Kopystensky as archimandrite of the influential *Kievan Cave Monastery. As archimandrite and a deputy in the Polish Sejm Mohyla successfully lobbied the Polish government to restore the legality of the Orthodox church in the Polish Commonwealth, which it did in its 1632 'articles of appeasement,' and King Władysław IV Vasa granted the church the right to have its own hierarchs as long as the candidates were ratified by the government. To act upon that right as quickly as possible, in November 1632 the Orthodox deputies in the Polish Sejm nominated Mohyla the metropolitan of Kiev in place of the more radical I. *Kopynsky. Mohyla was consecrated on 7 May 1633 in the Dormition Church in Lviv.

As metropolitan Mohyla improved the organizational structure of the Orthodox church in Ukraine, set strict

Petro Mohyla

dogmatic guidelines, reformed the monastic orders, and enriched the theological canon. He gathered together a circle of scholars and cultural leaders known as the Mohyla Atheneum (A. Kalnofoisky, Y. Kononovych-Horbatsky, S. Kosiv, I. Kozlovsky-Trofymovych, I. Oksenovych-Starushych, S. Pochasky, and Y. Tryzna), which produced an impressive corpus of theological scholarship. Under Mohyla's guidance the circle prepared new editions of the Bible and the Lives of the Saints; elaborated a new catechism, *Orthodoxa Confessio Fidei*, which was ratified by the Orthodox sobor in Kiev in 1640, by the sobor in Iași in 1642 (with emendations), and by all of the Greek Orthodox patriarchs in 1643; and issued an important work of dogma, the polemical treatise *Lithos, albo kamien ...* (Lithos, or Stone ..., 1644; repub in *Arkhiv Iugo-Zapadnoi Rossii*, vol 9, no. 1 [1893]), a reply to K. Sakovych in defense of the Orthodox faith and rite, possibly written by Mohyla himself. Mohyla wrote introductions to a nomocanon (1629), a liturgicon (1629), an anthology of prayers (1636), a didactic Gospel (1637), a triodion (1640), and *Evkhologion, al'bo molytvooslov yly trebnyk* (Euchologion, or a Sacramentary or *Trebnyk*, 1646), also known as the Great **Trebnyk* of Petro Mohyla; and he is the author of *Krest Khrysta Spasytelia i kazhdoho cheloveka ...* (The Cross of Christ the Savior and of Every Man, 1632), which contains an emblematic poem and the text of one of his sermons. Manuscripts from his archive (150 pp) were published in *Arkhiv Iugo-Zapadnoi Rossii* (vol 7, no. 1 [1887]).

In 1631 Mohyla established a school at the Kievan Cave Monastery. In 1632 it was merged with the Kiev Epiphany Brotherhood School to create a college, which eventually became the largest center of scholarship and education in Eastern Europe, the **Kievan Mohyla Academy*. Ukrainian printing flourished under Mohyla's guidance, particularly at the **Kievan Cave Monastery Press*. Mohyla himself edited several liturgical publications there, and he brought in the best scholars, master printers, and engravers to work at the press. Mohyla donated a substantial portion of his personal fortune to the uncovering and restoration of medieval churches and other religious landmarks in Kiev, including St Sophia Cathedral, the Church of the Tithes (the first archeological excavation in Ukraine), the churches at the Cave Monastery, the Trans-

figuration Church in the Berestove district, St Michael's Church at the Vydubychi Monastery, and the Church of the Three Saints.

Mohyla established close cultural and educational ties with other Orthodox countries, particularly with his native Moldavia and Wallachia. In 1641 he sent printers and a press to Iași, where they printed the first Rumanian book, *Cazania lui Varlaam* (The Sermons of [Metropolitan] Varlaam, 1643). Mohyla was instrumental in the founding of a college in Iași, to which he sent professors from the Mohyla College led by S. Pochasky. In 1635 he gave Wallachia a press, which was established with the help of Ukrainian printers in Câmpulung, and in 1637 he gave the Govora Monastery a press. They printed church books modeled on the Kievan editions.

Mohyla bequeathed most of his estate to various church institutions, mostly to the Mohyla College. He was buried in the Dormition Cathedral (destroyed in 1941) at the Kievan Cave Monastery.

Mohyla Scholarly Lectures Society (Tovarystvo naukovykh vykladiv im. Petra Mohyly). An organization established in Lviv in 1908 and abolished by the Soviet authorities in 1939. With branches in Lviv, Peremyshl, Rohatyn, Sambir, Sokal, Stanyslaviv, and Ternopil, the society was very active. During its first four years it organized over 400 academic and public lectures. It also helped various professional and tradesmen's societies (eg, Zoria, the burghers' brotherhood, Syla, Rus') to disseminate information and organized, in co-operation with the **Prosvita* society, general education courses for the public. The society's founding president was O. **Kolessa*; he was succeeded by V. Shchurat, V. Kucher, I. Svientsitsky, and D. Lukiianovych. Through the efforts of S. Okhrymovych the society's Lviv branch was also the legal arm of the **Union of Ukrainian Nationalist Youth* from 1929. Under the branch head A. Figol the society successfully promoted the cult of the Battle of **Kruty*, and under V. Yaniv it expanded cultural-educational activities in the *Prosvita* and tradesmen's societies. After Yaniv the Lviv branch was headed by B. Levytsky. Among the society's active female members were Z. Kravtsiv, S. Moiseiovych, and A. Chemerynska.

Mohyla Society (Tovarystvo im. Mytropolyta Petra Mohyly). A religious education society based in Lutske in 1931–9. Dedicated to studying traditional Ukrainian Or-

thodox religious practice and encouraging religious education, the society published the periodicals **Za sobornist'* (edited by I. *Vlasovsky) and *Shliakh* and organized lectures and seminars. It also published some *liturgical books that were being translated into Ukrainian by a special synodal commission of the Polish Autocephalous Orthodox church. The society was headed by S. *Tymoshenko and M. Khanenko. It was disbanded after the Soviet occupation of Western Ukraine in 1939.

Mohyla Ukrainian Institute

Mohyla Ukrainian Institute (Ukrainskyi instytut im. Petra Mohyla). A student residence and cultural center established in *Saskatoon in 1916. Initially a nonsectarian residence for Ukrainian students from rural areas attending educational institutions in Saskatoon, the institute became the center of a major controversy in 1917, when the Ukrainian Catholic bishop N. Budka demanded that it become a Catholic entity, and that its properties be incorporated with the Ruthenian Greek Catholic Episcopal Corporation. The desire to protect what was regarded as the national integrity of the institute provided a catalyst for the liberal intelligentsia in Canada to break ranks with the Catholics and establish the *Ukrainian Orthodox Church of Canada in Saskatoon in 1918. The institute then became an important symbol of and center for the fledgling church community. It sponsored courses in Ukrainian language, literature, history, choral singing, and folk arts; held concerts, lectures, and debates intermittently throughout Saskatchewan; and sought to develop a sense of Ukrainian patriotism in the students who lived there (approx 100 annually). These activities played an important role in shaping many future Ukrainian community leaders. The institute also provided the first home of the *Ukrainian Museum of Canada, from 1936 (to 1980), and operated a library, whose holdings currently number approx 10,000 volumes. In 1958 the institute began publishing a bilingual newsletter, *Holos instytutu/Voice of the Institute*, and in 1964 it moved to a new building situated closer to the University of Saskatchewan campus. Since 1975 the institute has conducted an annual Ukrainian-immersion summer school. The rectors of the institute include W. Swystun (1917–21), J. Stechishin (1921–9, 1931–3), V. Burianyk (1932–5, 1936–7), I. Syrnyk (1943–7), Rev V. Senyshyn (1956–62), and A. Kachkowski (1970–9). The early years of the institute are described in *Iuvileina knyha*

25-littia ukrains'koho institutu im. Petra Mohyly v Saskatuni (Twenty-Five Years of the Petro Mohyla Ukrainian Institute in Saskatoon, 1945).

Mohyla-Mechetna [Mohyla Mečeta]. v-19. The highest point (367 m) of the *Donets Ridge, situated on its main watershed between the Sea of Azov and the Donets River in Luhanske oblast.

Mohylianska, Ladia [Mohyljans'ka, Ladja], b 1902 in Chernihiv, d 1937. Neoromantic poet; daughter of M. *Mohyliansky and sister of D. *Tas. Her first poem was published in the Kharkiv monthly *Chervonyi shliakh* in 1923. Several others appeared between 1924 and 1927 in *Zhyttia i revoliutsiia*, *Nova hromada*, *Vsesvit*, *Zoria*, and *Literaturno-naukovyj vistnyk*. She was accused of belonging to the *Union for the Liberation of Ukraine and from 1930 she was imprisoned in labor camps in the Solovets Islands and near Moscow, where she was executed by the NKVD.

Mohyliansky, Arsenii [Mohyljans'kyj, Arsenij] (secular name: Oleksii), b 17 March 1704 in Reshetylivka, Poltava regiment, d 8 June 1770 in Kiev. Orthodox metropolitan. He studied at the Kievan Mohyla Academy (1721–7) and the Kharkiv College (1727), where he later taught. In 1741 he became a teacher of catechism and grammar at the Moscow Academy. In 1744 he was appointed archimandrite of the Trinity–St Sergius's Monastery, consecrated a bishop, and appointed to the Holy Synod. In 1748 he was made official court preacher. In 1757–70 he was metropolitan of Kiev. As metropolitan he introduced a number of reforms at the *Kievan Mohyla Academy, including the teaching of arithmetic and geometry and the choosing of professors and the rector by the faculty council. He also renewed the school's buildings and enriched its library. Mohyliansky actively defended the traditional rights of the Kievan metropolity against Russian centralism. He coauthored a petition to the Legislative Commission of 1767–8 that contained a program for Ukrainian church autonomy, including the retention of the title 'Metropolitan of Kiev, Halych, and Little Russia,' renewal of the custom of electing the metropolitan from among local candidates, transfer of control of the Ukrainian church from the Holy Synod to the College of Foreign Affairs, and the stipulation that the metropolitan (not the Synod) confirm the appointment of bishops and hegumens in Ukraine. Several of Mohyliansky's sermons were published in Moscow and St Petersburg. His biography, by N. Shpachynsky, appeared in Kiev in 1907.

A. Zhukovsky

Mohyliansky, Dmytro. See Tas, Dmytro.

Mohyliansky, Mykhailo [Mohyljans'kyj, Myxajlo], b 4 December 1873 in Chernihiv, d 22 March 1942 in Bolshaia Murda, Krasnoiarsk krai, RSFSR. Literary scholar, publicist, translator, and writer. In the late 1890s he published under cryptonyms in the Galician papers *Zhytie i slovo* and *Dilo*. After studying law at St Petersburg University he worked as a lawyer in Kiev and contributed regularly to the paper *Kievskiiia otkliki*. After the Revolution of 1905 he practiced law in St Petersburg, was an active member of the Constitutional Democratic party, and contributed articles on Ukrainian literature and the Ukrainian question to

Mykhailo Mohyliansky

Rev Antin Mohylnytsky

its organ *Rech'* and to the journals *Russkaia mysl'* and *Ukrainskaia zhizn'*. His Russian translations of the stories of his friend M. Kotsiubynsky were published in Russian journals and in three separate volumes (1910, 1911, and 1914) in St Petersburg. In 1911 he published his first of several stories in the Lviv journal *Literaturno-naukovyi vistnyk*.

After the Revolution of 1917 Mohyliansky lived in Kiev. Under Soviet rule he published articles in literary theory and on Ukrainian literature (particularly on the writers H. Skovoroda, P. Kulish, Kotsiubynsky, and T. Shevchenko) in VUAN serials and in *Knyhar*, *Zhyttia i revoliutsiia*, *Nova hromada*, and other Soviet periodicals. From 1923 he supervised the important VUAN Commission for the Compilation of a Biographical Dictionary of Ukraine (the first volume of the dictionary had been completed by 1930, but was never published). He was closely associated with the *Neoclassicists and took part in the famous *Literary Discussion of 1925. In 1926 his story 'Ubyvstvo' (The Murder) was published in *Chervonyi shliakh*; it was seen as condemning the former UNR president M. Hrushevsky's accommodation with the Soviet regime, and the Bolshevik authorities forbade the publication of his works. They continued to appear, however, under various pen names (including P. Chubsky) until the late 1920s. During the Stalinist terror of the 1930s Mohyliansky's daughter, L. *Mohylianska, and son, D. *Tas, were sent to labor camps, and he was purged from the VUAN. He voluntarily moved to northern Russia to be near his daughter, who was executed in 1937. During the Second World War he was evacuated to Krasnoarsk krai, where he died.

R. Senkus

Mohyliany. An archeological site from the Early Bronze Age located in Mohyliany, Rivne oblast. Excavated in 1955 by M. *Smishko, the site provided evidence of culture which cremated its dead and buried the remains in urns. The nature of this tribal grouping is unknown, although evidence suggests its existence in other areas of western Ukraine.

Mohyliv-Podilskyi [Mohyliv-Podil's'kyj]. v-8. A city (1990 pop 36,300) on the Dniester River and a raion center in Vinnytsia oblast. In 1595 S. *Potocki founded a town at the site of Ivankivtsi village and named it after his father-in-law, B. Mohyla (Movilă), a prince of Moldavia. A few years later a castle was built. In the 17th to 19th centuries

the town was known under various names, such as Mohyliv, Mohyliv-na-Dnistri, and Mohyliv-Dnistrovskiy. Located on the trade route from Ukraine to Moldavia, it grew rapidly into an important trading center and the largest town in Podilia. Its inhabitants took part in a number of popular uprisings – that of S. Nalyvaiko in 1595 and others in 1614 and 1637–8. In 1648 Mohyliv-Podilskyi became a regiment center in B. Khmelnytsky's Cossack state. It was destroyed during the Cossack-Polish War in 1649 and 1654. After participating in I. *Sirko's uprisings in 1664 and 1671, it was captured by the Turks (1672–99). The town gained the rights of *Magdeburg law in 1743 and developed into a flourishing economic and cultural center. In 1616 its Orthodox brotherhood set up a press, and in the 18th century printed books in Ukrainian, Russian, Greek, and Moldavian. In 1795 Mohyliv came under Russian rule and was turned into a county center of Podilia gubernia. In the second half of the 19th century it regained its commercial importance as a river port for the exporting of farm products. By 1897 its population had reached 32,440, much of it (17,000) Jewish. During the revolutionary period the town witnessed many battles. In June 1919 the UNR Army defeated the Red Army near Mohyliv. In 1923 the city was officially named Mohyliv-Podilskyi. Today the city's chief industries are machine building and food processing. Its finest architectural monuments are St Nicholas's Cathedral (1757) and St George's Church (1809–19).

Mohyliv-Podilskyi regiment (aka Mohyliv, Podilia, or Dniester regiment). An administrative territory and military formation of the Hetman state. It was formed in the summer of 1648 as soon as Podilia was liberated from Polish rule. The regiment's first commander was Col I. *Bohun, whose headquarters were in Vinnytsia. After the Battle of Zboriv in 1649, most of the regiment was absorbed by Bratslav regiment. In 1656 it was revived under the name of Podilia regiment, with headquarters in Mohyliv (now Mohyliv-Podilskyi). Its territory was ceded to Poland by the Treaty of Andrusovo (1667), but the regiment was not disbanded. It was resettled on the territory of Kiev regiment, and functioned as a separate military force until 1676. During the last period of its existence the regiment was commanded intermittently by Col O. *Hohol.

Mohylnytsky, Antin [Mohyl'nyc'kyj] (Liubych-Mohylnytsky), b 3 March 1811 in Pidhirtsi, near Kalush, Stryi circle, Galicia, d 13 August 1873 (buried in Yablinka, Nadvirna county, Galicia). Romantic poet and civic figure. He graduated from the Greek Catholic Theological Seminary in Lviv (1840), was ordained, and served from 1841 as a priest and teacher in the villages of Khitar, Zbora, Komariv (1845–59), and Babche (from 1859). Inspired by the *Ruthenian Triad, especially M. Shashkevych and his friend Ya. Holovatsky, Mohylnytsky published several poems in the Galician vernacular, including 'Ridna mova' (Native Language, 1839), 'Zhadka staryny' (Memory of Antiquity, 1939), 'Uchenym chlenam Rus'koï Matytsi' (To the Learned Members of [the] Ruska Matytsia [society], 1849), and other patriotic poems about the Ukrainian language; the ballad 'Rusyn-voiak' (Ruthenian Soldier, 1849), about the trials and tribulations of Ukrainian military recruits in the Austrian army on the Italian front; and

the first Western Ukrainian epic, the unfinished 'Skyt Maniavs'kyi' (Maniava Hermitage, 1854), based on folk legends. His 1839 seminary address titled 'Obligations of Subjects' appeared in *Vinok rusynam na obzhynky* (1847). During the Revolution of 1848–9 Mohylnytsky favored Ukrainian-Polish co-operation. In 1861 he was elected to the Galician Provincial Diet and was a delegate to the State Council in Vienna, where he spoke out for the equality of Ukrainians with the other Slavic peoples in Austria-Hungary. From 1864 he was persecuted by secular and church authorities, and in 1866 he left politics. Editions of his works were published in Lviv in 1885, 1906 (along with works by M. Shashkevych, Ya. Holovatsky, and M. Ustyianovych), and 1913 (with works by Ustyianovych). Mohylnytsky's biography, by K. Luchakivsky, appeared in 1887, and an analysis of his life and works by V. Lev was published in O. Horbatsch's festschrift in 1983.

Rev Ivan Mohylnytsky

Oleksander Mokh

Mohylnytsky, Ivan [Mohyl'nyc'kyj], b 1777, d 1831. Ukrainian Catholic priest and pedagogue. In 1808 he organized a model school in his village parish of Drozdovychi. Later, as the canon of Peremyshl eparchy responsible for education, he undertook (with the active support of the bishop, M. *Levytsky) a major campaign to establish a network of village schools providing instruction in vernacular Ukrainian. He also initiated the founding of a preceptors' school in Peremyshl in 1817 and served as its first rector. As a member of a special commission (1816–18) headed by Governor F. Hauer to study the contentious issue of language policy in Galician schools, he was instrumental in bringing about an improvement in the status of Ukrainian-language education. Mohylnytsky wrote a memorandum in 1821 that noted explicitly, for the first time, the distinctiveness of the Ukrainian language from Polish and Russian. He also initiated (1816) the establishment of the Societas Presbyterorum, a publisher of religious and educational materials, and wrote five school textbooks. Mohylnytsky was a leading figure in a Peremyshl group (including I. Snihursky, I. Lavrovsky, Y. Levytsky, and Y. Lozynsky) that greatly influenced the views of subsequent Ukrainian activists in Galicia, particularly the *Ruthenian Triad.

Moiseienko, Fedir [Mojszejenko] (aka Moiseenkov), b 22 November 1754 in Lebedyn, Sumy regiment, Slobidska Ukraine, d 24 November 1781. Mineralogist. After graduating from St Petersburg University in 1775, he studied at

the Freiberg Mining Academy in Saxony (1776–9) and then lectured at Berg College in St Petersburg. He proposed a classification of minerals containing lead and defined some characteristics of lead ores useful for prospecting. He first predicted the presence of deposits containing lead in the Ural Mountains and Siberia. Along with M. Lomonosov, Moiseienko is recognized as a founder of the dynamic approach in mineralogy.

Mokh, Oleksander [Mox], b 22 May 1900 in Hlyniany, Peremyshliany county, Galicia, d 15 November 1975 in Toronto. Catholic journalist and publisher. He studied philosophy and theology in Lviv and Innsbruck. In 1920 he established the Dobra Knyzhka publishing house in Lviv. As a postwar refugee in Germany and in Canada, he published (to 1955) 153 books in several series (eg, Historical Figures, Our Religion, For Light [popular brochures], Logos Library [belles lettres], and Library of Theatrical Works), primarily intended to foster a Catholic awareness and Ukrainian national consciousness among youths. He was the editor of *Svitlo i tin'* in Lviv (1932–9) and *Zhyttia i slovo* in Innsbruck (1948–9). He also helped edit and was a regular contributor to *Postup*, *Nova rada*, *Pravda*, *Nova zoria*, *Dzvony*, *Zapysky ChSVV*, *Nedil'ni visti*, *Ameryka*, *Shliakh*, and *Holos*. In Toronto he published the Christian quarterly *Pravda* (1969–75), which printed his memoirs in 1974–5.

Mokh, Rudolf [Mox, Rudol'f], 1816–91. Galician priest, writer, and community figure. He studied at the Greek Catholic Theological Seminary in Lviv and became involved in circles close to the *Ruthenian Triad. He is the author of *Motyl'* (The Butterfly, 1841), the second collection of poetry published in the Ukrainian vernacular in Western Ukraine, and of the first Ukrainian-language secular plays staged in Galicia, among them *Sprava v seli Klekotyni* (The Affair in the Village of Klekotyn, 1849), 'Terpen-spasen' ([He Who] Suffers [Is] Saved, 1849), and 'Opikunstvo' (Guardianship). In 1848 he was a spokesman of the Drohobych committee of the Supreme Ruthenian Council and participated in the *Congress of Ruthenian Scholars in Lviv, where he advocated the abandonment of *etymological spelling.

Mokiiievsky, Kostiantyn [Mokijevs'kyj, Kostjantyn], b ? in the Bila Tserkva region, d ca 1709. Cossack officer; relation (possibly cousin) of Hetman I. Mazepa. He was colonel of Kiev (1691–1708) and Chyhyryn (1708–9) regiments, a distinguished field commander in campaigns against Turkey and Sweden, and a patron of the Ukrainian church. He also undertook diplomatic missions for Mazepa to the Crimea and the Zaporizhia in 1708–9, which resulted in a coalition against Peter I.

Mokosh (aka Makosh). A goddess of fertility, water, and women in old Ukrainian mythology. According to folk belief she shears sheep and spins thread. The name itself is derived from the word combination *maty kota* 'mother of the cat,' that is, 'mother of good fortune.' She is related to Hecate and Aphrodite in classical mythology and to Zhyva and Morena in western Slavic mythology. Mokosh is mentioned in the Primary Chronicle as among the chief gods, which include Perun, Khors, Dazhboh, and Stryboh. Some scholars believe that Mokosh was Perun's wife. She is depicted with a cornucopia on the *Zbruch idol. In the

14th to 16th centuries her cult was transformed into that of St Parasceve, and 10 November (28 October OS) was assigned as her feast day.

Mokra Sura River. A right-bank tributary of the Dnieper River, which it joins south of Dnipropetrovske. It is 138 km long and drains a basin area of 2,830 sq km. It flows through Dnipropetrovske oblast. In the summer the upper reaches of the river dry out. A reservoir has been built on the river, the waters of which are used for irrigation and pisciculture.

Mokrenko, Anatolii, b 22 January 1933 in Terny, near Nedryhailiv (now in Sumy oblast). Opera singer (baritone). A graduate of the Kiev Polytechnical Institute (1956), he studied voice at the Kiev Conservatory and sang in its opera studio (1963–8). In 1968 he was appointed soloist at the Kiev Theater of Opera and Ballet; since then he has performed leading roles in M. Lysenko's *Natalka from Poltava* and *Taras Bulba*, S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, B. Liatoshynsky's *The Troop Commander*, H. Maiboroda's *Yaroslav the Wise*, V. Kyreiko's *The Forest Song*, P. Tchaikovsky's *Eugene Onegin*, G. Rossini's *The Barber of Seville*, and G. Bizet's *Carmen*. He starred in a television version of G. Donizetti's *Lucia di Lammermoor* (1980). His biography, by V. Kachkan, was published in 1989.

Mokri Yaly River [Mokri Jaly]. A left-bank tributary of the Vovcha River. It is 147 km long and drains a basin area of 2,660 sq km. The river has its source in the Azov Upland and flows through the western reaches of Donetsk oblast. A reservoir has been built on the river, the waters of which are used for irrigation.

Mokriev, Yurii [Mokrijev, Juriij], b 14 April 1901 in Novomyrhorod, Yelysavethrad county, Kherson gubernia. Playwright and prose writer. He became popular after his first satiric play, *Viddai partkvytok* (Turn in Your Party Membership Card, 1930), which was followed by many others, such as *Soiuz vidvazhnykh* (Union of the Brave, 1935), *Syhnaly z moria* (Signals from the Sea, 1939), *Zhuravli letiat'* (The Cranes Are Flying, 1943), *Veseli zaruchyny* (The Merry Betrothal, 1965), *A mymo prolitaiut' poizdy* (And the Trains Speed By, 1975), which were performed in theaters across Ukraine. Mokriev is also the author of collections of humorous stories, including *Usmishky Hordiia Smishky* (The Smiles of Hordii Smishka, 1943), *Veselyi saliiut* (The Merry Salute, 1945), and *Sto koliuchok v boky* (A Hundred Thorns in the Side, 1961); of the novels *Plavni palaiut'* (The Floodplains Are Aflame, 1959), *Chorna buria* (The Black Storm, 1961), and *Slid na zemli* (Tracks on the Ground, 1969); and several prose collections. He has also written memoirs, *Take blyz'ke ...* (So Close ..., 1974) and screenplays for films.

Mokrievych [Mokrijevych] (aka Debohorii-Mokrievych). A family of Cossack *starshyna* in the Chernihiv region. It originated with Karpo Mokrievych (d 1704), the chancellor (1660–1) and quartermaster (1688–90) of Chernihiv regiment and general chancellor of the Hetman state (1669–72). His son, Ivan (Ioannykii), was captain of Liubech company (1690–3). Ivan's son, Mykhailo (d 1738), was osaul of Chernihiv regiment (1723–38), signed the Kholmak Articles, and died while leading the Chernihiv Reg-

iment in battle against the Tatars near Haiman-Dolyna. The revolutionary populists Ivan and Volodymyr *Debohorii-Mokrievych were descendants of Mykhailo. Ivan founded the clandestine American Group in 1871 in the Chernihiv region. Its aim was to organize agrarian communes throughout the world to pave the way for socialism. A branch of the family emigrated to the United States in the second half of the 19th century.

Mokrievych, Samiilo [Mokrijevych, Samijlo], b?, d ca 1712. Cossack captain of Berezna in Chernihiv regiment (1689–90) and a notable military fellow (1704–9) under Hetman I. Mazepa; son of K. Mokrievych. In honor of Mazepa he wrote *Vynohrad, domovytom blahym nasazhdennyi ...* (Grapes by a Good Husbandman Grown, 1697), which contains a poetic rendering in Ukrainianized Church Slavonic of the Book of Genesis and the Gospel according to St Matthew, and other religious poems.

Volodymyr Mokry

Mokry, Volodymyr [Mokryj] [Włodzimierz], b 18 April 1949 in Drawia, Olsztyn voivodeship, Poland. Slavist, publicist, Ukrainian community leader, and politician in Poland. A graduate of Cracow University, he has taught Ukrainian language and conducted seminars on Ukrainian history and culture there. Mokry has published scholarly, political, and religious articles in Polish Catholic newspapers and journals, Polish scholarly periodicals, and the Ukrainian-language press in Poland. In 1989–91 he was the first Ukrainian elected to the postwar Polish Sejm. He served in the Sejm committee on national minorities and spearheaded a campaign for official condemnation of *Operation Wisła and for material compensation of its deported victims, their right to return to their ancestral homes, and restitution of their property. Mokry founded in 1989 in Cracow the Foundation of St Volodymyr the Baptizer of Kievan Rus'. He is chairman of this foundation, the aim of which is to promote Ukrainian studies and Ukrainian Christian culture in Poland, and understanding and rapprochement between Poles and Ukrainians.

Mokryi Yelanchyk River [Mokryj Jelančyk] (also Mokryi Yalančyk). A river that flows through Donetsk and Rostov oblasts. It is 105 km long and drains a basin area of 1,390 sq km. It empties into Tahanrih Bay on the Sea of Azov. The river is used for irrigation and water supply.

Mokrytsky, Apollon [Mokryc'kyj], b 12 August 1810 in Pyriatyn, Poltava gubernia, d 8 or 9 March 1870 in Mos-

Apollon Mokrytsky:
Self-Portrait (1840)

cow. Painter; full member of the St Petersburg Academy of Arts from 1849. He studied painting under K. Pavlov at the Nizhen Lyceum and under A. Venetsianov and K. Briullov in St Petersburg (1830–9). After working in Ukraine and visiting Italy he was appointed a professor at the Moscow School of Painting, Sculpture, and Architecture (1851–70). His paintings, including portraits of Ye. Hrebinka (1840) and N. Gogol, a self-portrait (1840), and Italian landscapes, are done in a lucid, realist style. He took part in the purchasing of T. *Shevchenko's freedom and mentioned the poet in his diary (pub 1975).

Mol, Leo. See Molodozhanyin, Leonid.

Molchanivsky, Teodosii [Molčanivs'kyj, Teodosij] (Movchanivsky), b 9 May 1899 in Berestivtsi, Uman county, Kiev guberniia, d ? Archeologist. Educated at the Kiev and Odessa theological seminaries, in 1925–32 he was the director of the Berdychiv Regional Museum. He then worked from 1932 to 1937 for the All-Ukrainian Archeological Committee and its successor, the Institute of the History of Material Culture. He developed a solid reputation for his excavation of the *Raiky fortified settlement as well as his study of archeological sites in and around Kiev; however, his later study stating that the St. Michael's Golden-Domed Monastery had no historical value was used to justify the monastery's destruction. In 1937 Molchanivsky was arrested during the Stalinist purges; his subsequent fate is unknown.

Molchanov, Igor [Molčanov], b 13 September 1929 in Tula, Russia. Mathematician. He completed his studies at the Mykolaiv Pedagogical Institute in 1957, and from 1959 he worked at the Computing Center (since 1962 the AN URSS [now ANU] Institute of Cybernetics) in Kiev. In 1964 he became head of one of the institute's departments. Molchanov's principal contributions are in computer sciences, particularly in the field of the theoretical investigation and development of numerical methods for handling computer translation problems.

Molchanov, Porfyrii [Molčanov, Porfyrij], b 24 February 1863 in Kharkiv, d 13 April 1945 in Odessa. Composer and pedagogue. A graduate of the St Petersburg Conservatory (1887), he studied composition with N. Rimsky-Korsakov and A. Liadov. From 1888 he taught theory at the Odessa Music School, and from 1926 he was professor at the Odessa Institute of Music and Drama (after 1934 the Odessa Conservatory). His works include two sympho-

nies, the orchestral *Scherzo*, a cantata, and a string sextet. In 1891 he edited and orchestrated the piano score of the opera *Kateryna* by M. Arkas.

Molchanovsky, Nykandr [Molčanovs'kyj], b 1858 in Lozuvata, Balta district, Podilia gubernia, d 17 December 1906 in Kiev. Historian and community activist. In 1879 he was expelled from Kiev University for his political activities and exiled for two and a half years to Viatka gubernia. In 1884, after his return to Kiev, he completed his studies under V. Antonovych, and in 1885 he wrote a study of the Podilia land to the year 1434. Because he was a member of the *Hromada of Kiev, he was deemed politically unreliable and barred from becoming a professor. The Kiev Archeographic Commission sent him to do research at archives in Stockholm (1898–9) and Budapest. The materials he collected in the Stockholm State Archive about Ukraine in the second half of the 17th century were published posthumously with his long introduction in *Arkhiv Iugo-Zapadnoi Rossii*, in 1908 (vol 6, no. 3), and in *Ukrain-s'kyi arkhieohrafichnyi zbirnyk*, in 1930 (vol 3, ed V. Kordt). From 1889 Molchanovsky contributed over 20 articles and archival documents and some 80 reviews (signed mostly 'N.M.') to *Kievskaja starina*. They include articles on the Kiev municipal administration in 1786 (1889, nos 5–7), women at the hetman's court in Chyhyryn (1894, nos 1–2), 15th- to 17th-century Left-Bank Ukraine (1896, nos 4–6), Kiev's budgets in the mid-18th century (1898, no. 1), reports of the Venetian envoy A. Vimina about Hetman B. Khmelnytsky and the Cossacks (1900, no. 1), the origin of the term *katsap (1901, no. 12), and Hetman I. Mazepa's death and his successors (1903, no. 1). From 1902 he directed the chancellery of the governor-general of Kiev, Podilia, and Volhynia gubernias.

Moldavia (Rumanian: Moldova; Ukrainian: Moldaviia, Voloshchyna, from *volokhy* 'Vlachs'). A region (approx area, 90,000 sq km) bordering on southwestern Ukraine. Its natural boundaries are the Carpathian Mountains to the west, the Dniester River to the east, and the Black Sea to the south. Named after the Moldova River, in the 14th century it became a Vlach principality, which ruled *Bukovyna until 1774 and *Bessarabia until 1812. Later the principality was reduced to the territory between the Carpathians and the Prut River, which is now part of *Rumania. In 1859 it was united with Wallachia to form the state of Rumania. After the Second World War Bessarabia became the *Moldavian SSR, and in 1991, Moldova.

In prehistoric times Moldavia was inhabited by *Scythians and Thracian tribes (*Getae, Dacians), who established an independent state there in the 1st century BC. From 106 to 273 AD southern Moldavia was part of the Roman Empire, which built *Trajan's Walls there. From the 3rd century on it was invaded by many nomadic peoples, including the Goths, Huns, Avars, Bulgars, Magyars, Pechenegs, Cumans, and Tatars. From the 4th century on, particularly from the 6th, the East Slavic *Antes settled there. In the 9th and 10th centuries Moldavia was colonized by the proto-Ukrainian *Tivertsians and *Ulychians, who founded the towns of *Peresichen, Tehyn (now *Bendery or Tiaghina), and *Bilhorod-Dnistrovskiy.

In the 10th century the territory of Moldavia came under the domination of Kievan Rus', and from 1200 to 1340 it was ruled by the Principality of *Galicia-Volhynia. Im-

Moldavia: church in Galați where Hetman I. Mazepa was buried

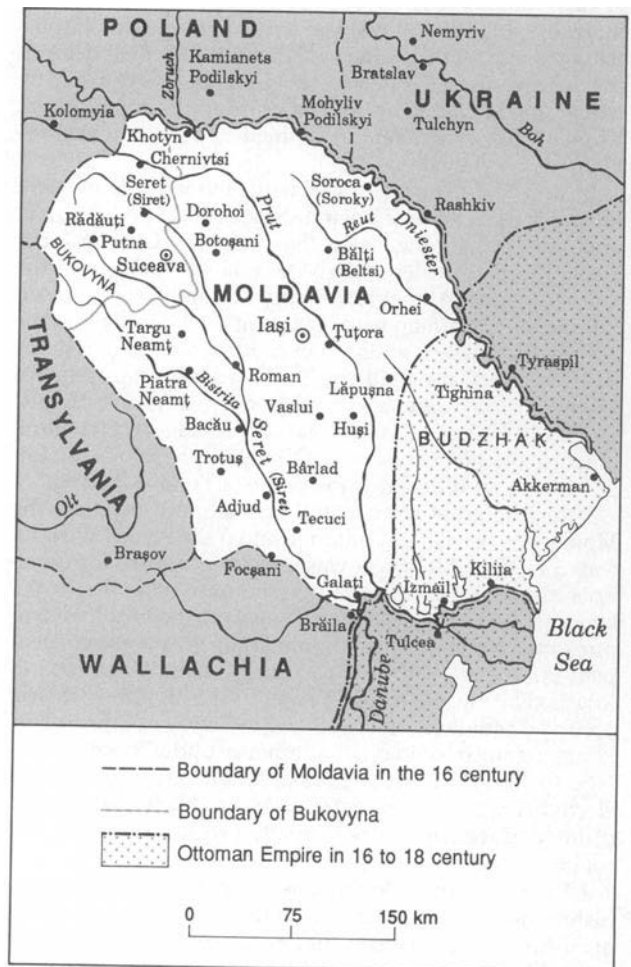

portant trade routes from Galicia to the Black Sea passed through Moldavia, and Galician merchants founded the town of Malyi Halych (now *Galați) there. In the 12th and early 13th centuries a separate principality populated by fugitives from Galicia-Volhynia called *Berladnyky (named after the Moldavian town of Berlad [Bîrlad]) existed in southern Moldavia. Its most notable ruler was Ivan Rostyslavych *Berladnyk.

After the Tatar invasion of 1241 Galician influence in Moldavia waned, contacts with the Eastern Slavs beyond the Carpathians diminished, and Vlachs from Wallachia began settling there. In 1352 King Louis I of Hungary expelled the Tatars from Moldavia and installed the Vlach Dragoș as its voivode (military governor). Under Dragoș the influx of Vlachs from Transylvania and the Maramureș region intensified. In 1359 the new voivode, Bogdan, overthrew Hungarian rule and founded an independent Moldavian principality dominated by boyars and the Orthodox church. The capital was Suceava. In that period the Lithuanian-Ruthenian prince Yurii Koriiovych, the nephew of the Lithuanian grand duke Algirdas, served briefly as a Moldavian voivode. In 1387 Moldavia became a Polish vassal state. In the late 14th century it extended its borders to the Carpathians, the

Dniester River, the Danube, and the Black Sea and occupied the northern part of *Shypyntsi land (Bukovyna). In 1456 it became an autonomous tribute-paying vassal state of the Ottoman Empire.

Moldavia prospered during the reigns of its voivodes Alexander the Good (1400–32) and Stephan III the Great (1457–1504). Under Alexander the Patriarch of Constantinople recognized the separate Moldavian metropolity in Suceava (1401), and commercial ties with Lviv were secured, whereby Moldavian merchants were granted privileges. Stephan married Yevdokia, the daughter of the Kievian prince Olelko Volodymyrovych. He repulsed the Hungarians in 1467, the Turks in 1475–6, and the Poles in 1497, after which Moldavia enjoyed full independence until 1538. Stephan and his successors Bogdan III and Peter Rareș (1527–46) often invaded Pokutia and sought to annex it. During the Polish-Moldavian wars in Pokutia, Ukrainian and Moldavian peasants took part in the *Mukha rebellion (1490–2), and many Galician Ukrainian fugitives settled in Moldavia.

After Moldavia was forced to accept Turkish suzerainty in 1538, the Zaporozhian Cossacks assisted the Moldavians in their struggle against Turkey and intervened in their internal power struggles. In 1541 a Zaporozhian force waged a campaign against Turkish-Tatar garrisons

MOLDAVIA IN THE 15TH–18TH CENTURIES

on the lower Dniester. In 1563 Prince D. *Vyshnevetsky led two Zaporozhian campaigns against the Turks in Moldavia. In 1574 a force of 1,200 Cossacks led by Otaman I. Svirchovsky took part in the anti-Turkish rebellion led by the hospodar John the Terrible. In 1577 Otaman I. *Pidkova briefly occupied the Moldavian throne. In 1583 the Cossacks attacked Turkish garrisons in Moldavia and destroyed the fortress in Bendery. In 1594–5 S. Nalyvaiko and H. Loboda led Cossack raids into Moldavia to help anti-Turkish insurgents. In 1600 a force of 7,000 Cossacks fought for Michael the Brave of Wallachia during his war against the Turks in Moldavia and Transylvania. During the Polish-Turkish War of 1620–1 Cossack units led by M. and B. Khmelnytsky were defeated by the Turks at the Battle of *Cecora in Moldavia, but the forces of Hetman P. Sahaidachny played a key role in the Polish victory at the Battle of *Khotyn. In 1635 Zaporozhians led by I. Sulyma plundered the Turkish-held Moldavian port of Kiliia.

Moldavia played an important part in Hetman B. Khmelnytsky's *Cossack-Polish War of 1648–57. Because the Moldavian hospodar V. *Lupu was an ally of Poland, Khmelnytsky led his army against Moldavia in 1650 and forced Lupu into an alliance. After the Cossack defeat at Berestechko in 1651, Lupu broke away, but he was forced back into the alliance by a second Cossack offensive against Moldavia, in 1652. The alliance was sealed by the marriage of Khmelnytsky's son, Tymish, to Lupu's daughter, Rozanda. In 1653 T. Khmelnytsky died defending Suceava from the Poles, and Lupu was overthrown by Gheorghe Ștefan, who signed a peace treaty with B. Khmelnytsky and later maintained good relations with Hetman I. Vyhovsky.

In 1672 Moldavia was allied with Hetman P. Doroshenko and Turkey against Poland. In 1681 the Turkish sultan appointed Gheorghe Duca 'hospodar of Ukraine,' but Gheorghe Duca ruled only Moldavia and only until the following year. At that time many Moldavians began settling in the Ukrainian lands between the Dniester and the Boh rivers. Cossack units led by S. Kunytsky fought in the Polish army that ended the Turkish-Moldavian siege of Vienna in 1683, and they continued the offensive against Turkey in Hungary, Wallachia, and Moldavia. Hetman I. Mazepa and his successor, P. Orlyk, sought refuge in Moldavia after their defeat at the Battle of Poltava in 1709.

After the anti-Ottoman military alliance between the Moldavian prince D. Cantemir and Tsar Peter I was defeated in 1711, Moldavia was governed by Greek Phanariots appointed by Constantinople until 1821. From the late 18th century the Russian, Austrian, and Ottoman empires vied for control of Moldavia. In 1774 Austria occupied Bukovyna, and in 1812 Turkey ceded Bessarabia to Russia. During the Russo-Turkish War of 1828–9 Russia occupied Moldavia, and in the 1829 Treaty of Edirne Turkey recognized Moldavia's autonomy under Russian tutelage. In 1859 the principalities of Moldavia and Wallachia elected A. Cuza as their joint ruler, and their union as the country of Rumania was formally proclaimed on 23 December 1861.

Ukrainians and Moldavians have shared a common history (to the 14th century) and the Byzantine wellspring of culture and Orthodox religion. Ukrainian villages have existed in Moldavia for centuries. The medieval Moldavian state and society were similar to those of Kievan Rus' and the Principality of Galicia-Volhynia, and Ukrainian

was the official language of the Moldavian church and state (see *Moldavian charters). Not until Iași became the new capital of Moldavia in 1564 did Rumanian begin supplanting Ukrainian as the official language. The process was completed in the mid-17th century.

Ties between the Moldavian and Ukrainian churches were close. Under Voivode Peter I (1373–7) a Moldavian episcopate subordinated to Halych metropolity was established. Metropolitan G. Tsamblak of Kiev contributed to the cultural development of Moldavia in the early 15th century. The Lviv Dormition Brotherhood and its school and press received ongoing assistance from Moldavian hospodars and boyars from the mid-16th to the late 17th century, and the Moldavian hospodars A. Lăpușneanu and I. and S. Movilă helped fund the construction of the Lviv Dormition Church. The Lviv Dormition Brotherhood School trained Moldavian leaders, including the chronicler G. Ureche and Metropolitan Dositheus.

The son of S. Movilă, P. *Mohyla, became the most outstanding metropolitan of Kiev, and the famous college he founded in Kiev (see *Kievan Mohyla Academy) was attended by Moldavian students. The college's teachers S. Pochasky and I. Yevlevych founded a similar Latin-Slavonic school in Iași in 1640, and Ukrainian printers founded a press there in 1641. Moldavian writers had their works printed in Lviv, Univ, Krekhiv, and Maniava. The Moldavian metropolitans Varlaam (1632–53) and Dositheus (1671–86, who was born in Lviv) translated church books from Ukrainian into Rumanian. The influence of Ukrainian writers, such as Z. Kopystensky, M. Smotrytsky, P. Mohyla, P. Berynda, I. Gizel, L. Baranovych, I. Galiatovsky, and P. Velychkovsky, on Moldavian culture was considerable, and the Ukrainian towns of Kiev, Lviv, Kamianets-Podilskyi, Univ, Zhovkva, and Bar had a cultural impact on Moldavia.

Because the trade route linking Western Ukraine with Constantinople and the Near East passed through Moldavia, Moldavia had close economic ties with Western Ukrainian cities. Those ties became stronger after Alexander the Good conferred special privileges on Lviv's merchants in 1408 but were weakened after Turkish control over Moldavia increased. In the 18th century Ukraine and Moldavia were close trading partners.

Valuable information about Ukrainian-Moldavian relations from 1359 to 1743 can be found in the Moldavian chronicles of G. Ureche, M. and N. Costin, and I. Neculce.

Moldavian charters (Moldavski hramoty). Documents composed from the mid-14th to the mid-17th centuries in Moldavian principality. Written in Middle Ukrainian, which shows the influence of Middle Bulgarian and Rumanian Slavonic spelling, they are important sources for the history of the Ukrainian language. Most of the materials used in *Slovnnyk staroukrains'koi movy XIV-XV st.* (Dictionary of Old Ukrainian of the 14th and 15th centuries, 1977) is drawn from them. From the mid-17th century, Ukrainian was replaced with Rumanian and Greek in Moldavian diplomacy. The language of the charters, particularly those of the 14th and 15th centuries, was studied by A. Yatsimirsky (1904) and O. Yaroshenko (1931).

Moldavian Soviet Socialist Republic. One of the 15 former Soviet republics, situated in the southwestern USSR between Rumania and Ukraine and bounded by the Prut River in the west and, roughly, by the Dniester River in the east. Its area is 33,700 sq km, and its 1989 population was 4,335,000, 47 percent of it urban. The Moldavian SSR was formed on 2 August 1940 out of the Moldavian ASSR and the larger part of Bessarabia, which was occupied by the Soviets on 28 June 1940. The republic is divided into 37 raions, 21 cities, and 44 towns. The capital is Kishinev. In 1991 Moldova declared its independence and assumed the name of Moldova.

The boundaries of Moldova and Ukraine coincide roughly with the boundaries of Rumanian and Ukrainian ethnic territories, although Moldova includes a few Ukrainian regions on the left bank of the Dniester. According to the 1989 census the national composition of Moldova was as follows: 2,794,700 Rumanians (64.5 percent), 600,400 Ukrainians (13.9 percent), 562,100 Russians (13 percent), 153,500 Gagauzy (3.5 percent), 88,400 Bulgarians (2 percent), and 65,700 Jews (1.5 percent). Most of the Ukrainians live in rural areas. They are concentrated in Lipcani, Edineți, Râșcani, Beltsi, Făleşti, Bendery, and Căușani raions. On the left bank of the Dniester, the Ukrainians are concentrated in Rybnysia and Tyraspil.

The Soviet authorities made strenuous efforts to Russify the Rumanian and Ukrainian population of the Moldavian SSR by encouraging the in-migration of Russians and the out-migration of the local population and by favoring the Russian language in education and public life. Most of the books and newspapers published in Moldavia were in Russian, not Rumanian, and none were in Ukrainian.

A. Zhukovsky

Moldavians (Rumanian: *Moldoveni*; Ukrainian: *moldavany*). The predominantly Vlach population of *Moldavia. After the principalities of Moldavia and Wallachia united in 1859 to form Rumania, the term Moldavian, like Wallachian and the southern Rumanian term Munten, became a regional designation. The Soviet regime created a fictional Moldavian nation, language, and literature to justify the existence of the Moldavian ASSR and *Moldavian SSR. In fact the language of the Moldavian SSR and its recent successor state, Moldova, is a Rumanian dialect the lexicon of which has many borrowings from Ukrainian and Russian, and which has been written in the Russian Cyrillic alphabet instead of the Rumanian Latin alphabet. In the Soviet era many Soviet Russian neologisms entered the dialect, and on the basis of those words Soviet scholars (eg, M. Sergievsky) tried unconvincingly to substantiate the idea that Moldavian was a separate language.

In 1989 there were 3,352,352 Moldavians in the USSR. Of those, 2,794,749 lived in the Moldavian SSR, where they made up 64 percent of the population; 324,525 lived in the Ukrainian SSR; and 172,671 lived in the RSFSR. Of the Moldavians in Ukraine in 1989, 44.5 percent lived in Odessa oblast; 26 percent, in Chernivtsi oblast; 5 percent, in Mykolaiv oblast; 4.1 percent, in Donetsk oblast; 3.3 percent, in Kirovohrad oblast; 2 percent, in Dnipropetrovske oblast; 2 percent, in Crimea oblast; 1.8 percent, in Luhansk oblast; and 1.7 percent, in Kherson oblast.

(See also *Rumanians.)

Moldova. See Moldavian Soviet Socialist Republic.

Moldova River (or Moldava). A right-bank tributary of the Seret River (which it meets just south of Roman, in Rumania). It is 205 km long and drains a basin area of 4,350 sq km. The river has its source in the Bukovynian Carpathians and runs its entire course in Rumania. It is used for floating logs to lumber mills.

Mole (*Talpa*; Ukrainian: *krit*, *slipets'*, *slipunets'*). A small (10–25 cm long), often blind, burrowing insectivorous mammal of the family Talpidae. Moles have a short, dense, yet velvet-soft fur. Their habitat in Ukraine is in forests, steppes, and forest-steppes as well as along water conduits and mountain meadows in the Carpathian Mountains and Caucasia. Moles are active during both the day and the night and consume more than their body weight in food daily. Their habit of burrowing just below the surface and feeding on young plants is an annoyance to gardeners. They stir and aerate the soil, however, and control noxious organisms. In Ukraine the common mole (*T. europaea*) is valued by the fur industry; about 2 million skins are processed annually.

Molecular biology. A branch of *biology dealing with the basic biological processes, such as heredity, mutability, growth, protein synthesis, and energy transformation, on a subcellular and molecular level. In Ukraine experiments in the field began in the first half of the 20th century. In 1939 S. *Hershenzon demonstrated the mutagenic activity of exogenic deoxyribonucleic acid (DNA). The discovery was important for practical medicine, which was faced with the task of obtaining vaccines free of nucleic acid. In the 1940s V. *Belitser theorized that the denaturation of proteins consists of the unwinding of the molecule and the rupture of numerous weak bonds (this theory was confirmed by research which established the general principle of conformational changes of protein). The field of molecular biology began to develop rapidly after J. Watson and F. Crick proposed a model of the DNA molecule (1953). The branches of molecular biology in Ukraine researched the relation between the structure and the functioning of proteins and nucleic acids. In the 1950s Belitser showed that the structure of fermenting protein could be viewed as the basic criterion for the catalytic activity and specificity of ferments. He also proved that supramolecular biological structures can be formed, and proposed a model for the transformation of fibrinogen into fibrin that helped to explain the occurrence of thrombosis and cardiovascular disorders.

In the 1960s at the AN URSS (now ANU) Institute of Radio Physics and Electronics, I. Todorov studied the molecular mechanisms of the biosynthesis of the adrenocorticotrophic hormone, and V. Maleev investigated the hydration of nucleic acids. In 1973 the molecular biology and genetics section (est 1968) at the ANU was reorganized into the Institute of Molecular Biology and Genetics. S. Serebrianyi did research on the primary protein structure of viruses. The institute's researchers determined the spectra of absorption and fluorescence of nucleic acids and their components, the nature of the hypochromic effect in the DNA molecule, the electronic mechanism of ultraviolet radiation activity on DNA, and the nature of the stability and hydration of biomolecular associates (V. Danilov). The functional adaptation of transfer ribonucleic acid (RNA) and aminoacyl-transfer RNA-synthetase to the biosynthesis of specific proteins was discovered there, as well as the structural grounds of the interaction of leucine transfer RNA with synthetases and ribosomes and the role of transfer RNA in insuring effective translation. The structure and function of the components of the translation mechanism in higher organisms is being investigated by H. *Matsuka and H. Yelska. Biologically inactive transport RNA has been discovered in animal tissue, and Matsuka has studied its structural traits and role in the biosynthesis of proteins. The interaction between components of nucleoprotein complexes is being investigated by Matsuka and M. Zheltovsky in relation to the problem of protein-nucleic identification. I. Todorov, K. Platonov, and O. Halkin determined the role of cytoplasmic protein synthesis in controlling the expression of nuclear and mitochondrial genomes in the cells of higher organisms. Research is also taking place in Ukraine in quantum biology, a new branch of molecular biology. The institute (through the experiments of V. Kordium) has participated in Soviet and international biological experiments in space.

Chemically modified anomalous nucleosides of various types and related bonds are being studied from differ-

ent aspects. Some of these substances, studied by V. Chernetsky, proved to be effective antismelling and antiviral agents. Problems of genetic engineering are also under investigation.

The fermentative synthesis of many structural genes, including the genes of human interferons, globins of various animals, oncornaviruses, plant viruses, and keto immunoglobulin, has been carried out under the international Reverse Transcriptase project. A laboratory was set up at the institute to prepare revertase ferments for many Soviet and foreign institutions. V. Kordium developed a genetic engineering system for supersynthesizing biologically active substances. Bacterial genes have been successfully transplanted into plant cells by S. Maliuta. I. Kok determined the molecular structure and the organizing principle of the genome of bacillo-viruses which affect a number of useful and harmful insects.

The primary structure of some individual transfer RNA of animal origin has been decoded by Matsuka and M. Tukalo. The results of research on the mutagenic action of exogenic DNA and artificially synthesized polynucleotides point to new approaches to one of the chief problems of genetics – directed mutagenesis (S. Hershenzon). The genetic foundations of plant selection have been worked out, and it is possible to design new varieties of agricultural plants.

At the ANU Institute of Biochemistry M. *Huly has studied the initial stages and the regulation of protein biosynthesis under certain extreme states of the organism. The institute's research was conducted in co-operation with branch institutes of the ANU and the academies of sciences of the USSR, Czechoslovakia, and Germany as well as departments within the All-Union Academy of Agricultural Sciences, the Health Ministry of the Ukrainian SSR, and the agriculture ministries of Ukraine and the USSR. Work in the physicochemical biology of membranes is conducted by the ANU at the Institute of Biochemistry under V. *Lishko and the *Institute of Physiology under V. Kostiuk. At the Institute of Botany K. *Sytnyk is overseeing research in genetic engineering. Methods of parasexual hybridization of cells to obtain whole plants are being widely used. An ultrastructural analysis of hybridization has been carried out. At the Institute for Problems of Oncology research is devoted to the molecular basis of carcinogenesis and leucogenesis and the transcription and translation of RNA in swollen cells (Z. Butenko, N. Berdysky, V. Shliakhonenko).

Molecular biology research is conducted at institutions outside of the ANU. At Kharkiv University V. *Nikitin oversees research on age-related changes in the genetic mechanism of vertebrates. At Kiev University M. Kucherenko and his colleagues are studying the translation processes under various types of radiation. At the Kiev Scientific Research Institute of Endocrinology and Metabolism V. *Komisarenko oversees research on the molecular mechanisms of the hormonal regulation of protein biosynthesis. Research results in molecular biology appear in the Russian-language periodical *Tsitologija i genetika*, published by the ANU.

M. Adams

Molenii Danyla Zatochnyka (Supplication of Danylo the Exile). A collection of political and practical personal advice addressed to an unidentified prince from Pereiaslav. In some redactions the addressee is Prince Yaroslav

Vsevolodovych of Pereiaslav (1201–6), in others, Prince Yaroslav Volodymyrovych of Novgorod (1182–99). The work was probably written in the 12th or 13th century; the original has not been preserved. The oldest copies date from the 16th century. At first it was thought that *Molenii* was a genuine petition from the exiled author to his prince, but later it was shown that the petition is merely a literary form. Many of the themes and ideas that appear in *Molenii* can be found in other monuments of Old Ukrainian literature. An outstanding edition of *Molenii* is N. Zarubin's *Slovo Daniila Zatochnyky po redaktsiiam XII i XIII vv. i ikh peredelkam* (Danylo Zatochnyky's Supplication in 12th- and 13th-Century Redactions and Their Revisions, 1932).

Molentsky, Antin [Molenc'kyj] (real name: Naibok), b 1843 in Zolochiv, Galicia, d 1874 in Lviv. Stage actor and director. He began his theatrical career in 1864 in K. Lobjiko's mixed Polish-Ukrainian troupe and then worked in the Ruska Besida Theater, as actor in 1864–7 and as artistic director in 1869–71.

Moliavko, Hryhorii [Moljavko, Hryhorij], b 23 January 1901 in Altynivka, Krolevets county, Chernihiv gubernia. Geologist. He graduated from the Kiev Institute of People's Education (1926) and worked as a teacher until joining the AN URSR (now ANU) Institute of Geological Sciences in 1932. He was a department head from 1955 to 1969. In 1951–4 and 1969–71 he also taught at Kiev University. His main scientific works were devoted to the stratigraphy of Neogene and Quaternary sediments in Ukraine, the paleogeography of Ukraine, and the history of geological scholarship.

Molnar, Larysa [Mol'nar] (née Nahorna), b 14 November 1928 in Plysky, Borzna county, Chernihiv okruha. Ukrainian writer and translator in the Prešov region of Slovakia; wife of M. *Molnar. A graduate of the Kiev Institute of Theater Arts (1952), she has worked as an editor at the Mystetstvo publishing house in Kiev and, since 1960, the Ukrainian literature department of the Slovak Pedagogical Publishing House. She has written a book containing two novelettes, *Voda v mori ochyshchajet'sia* (Water Is Purified in the Sea, 1969), the story collection *Khvylyny* (Minutes, 1972), and literary criticism, including literary portraits of O. Dovzhenko, Yu. Yanovsky, M. Valek, A. Plavka, Ya. Kostra, and others. Molnar has translated works of Russian, Czech, and Slovak writers into Ukrainian, and has also translated D. Stavrovský's book on the Slovak-Polish-Ukrainian borderland up to the 18th century (1967) and B. Kovačovičová-Puškárová and I. Puškár's book on Ukrainian wooden churches in eastern Slovakia (1971).

Molnar, Mykhailo [Mol'nar, Myxajlo] (Czech: Molnár, Michal), b 4 November 1930 in Velyka Chynhava (now Borzhavske), Transcarpathia. Literary scholar; husband of L. *Molnar. He studied at the Ukrainian gymnasium in Modržany, near Prague (1940–5), Prague University (1950–5), and Kiev University (graduate studies, 1956–60). Since 1960 he has worked at the Slovak Academy of Sciences in Bratislava, where he is director of the Institute of World Literature and Languages. An authority on 19th- and 20th-century Ukrainian-Czechoslovak literary relations, he has edited, with introductions, several books in

the field (including the first Soviet anthology of works by Ukrainian writers living in Slovakia's Prešov region, 1960), Slovak translations of Ukrainian literature, Ukrainian translations of Czech and Slovak literature, and editions of works by Ukrainian writers from the Prešov region. He has written books on T. Shevchenko's reception by the Czechs and Slovaks (1961) and on Slovak-Ukrainian literary relations (1965, with relevant documents) and hundreds of articles and reviews. An edition of his selected works (with a bibliography), *Zustrichi kul'tur* (The Meetings of Cultures), appeared in 1980.

Molochanske [Moločans'ke]. VI-16. A town (1990 pop 9,100) located on the Molochna River in Zaporizhia oblast and administered by the Tokmak municipal council. In 1803 a settlement called Halbstadt was founded at the site by German Mennonites. It was renamed Molochanske in 1915 and granted city status in 1938. The town has several food enterprises, a furniture factory, and a branch of the Prohres metallurgical plant. Archeologists have discovered many kurhans from the Bronze Age (3rd–1st millennium BC) and the Scythian (4th–3rd century BC) and Sarmatian (2nd century BC to 2nd century AD) periods in the vicinity.

Molochna River [Moločna] (also Tokmak). A river in Zaporizhia oblast that flows into Molochne Lake. It is 197 km long and drains a basin area of 3,450 sq km. Three reservoirs have been built on the river. Its waters are used for industrial consumption, irrigation, and pisciculture. The main cities located on the river are Tokmak, Molochanske, and Melitopil.

Molochne Lake

Molochne Lake [Moločne ozero] (Molochnyi lyman). VII-16. A saltwater lake located in the southwestern part of Zaporizhia oblast along the Sea of Azov coast. Molochne Lake was formed as a result of the flooding of the plain at the mouth of the Molochna River by the Sea of Azov. The lake is separated from the sea by a sandy strip of land up to 500 m in width. The lake is 32 km long and up to 8 km wide (168 sq km). Its average depth is 1.5 to 2 m, and the maximum depth is 9 m. The Tashchenak and the Dzhelkonia rivers also flow into the lake. The Kyrlyivka health resort is located on the lake and uses its mud and brine for curative applications.

Molod. The publishing house of the Communist Youth League of Ukraine. Established in 1923 in Kharkiv, it was called *Molodyi Robitnyk* (1923–30), *Molodyi Bilshovyk* (1930–41), and the State Publishing House of Children's and Young People's Literature (1945–8); it assumed its present name in 1948. Since 1934 it has been located in Kiev. Although Molod published works on social and political subjects, on art, and on other topics, primarily for a younger audience, it is especially known for its publications of prose and poetry by younger authors. Until 1992 each year it issued approx 130 titles with a total run of approx 4.5 million copies. Molod published O. Honchar's first major work, *Praporonosti* (The Standard Bearers, 1947–8), and, in the 1960s, many of the first books by the **shestydesiatnyky*. In 1988 the director of the press was A. Davydov.

Molod' Ukraïny (Youth of Ukraine). An organ of the Communist Youth League of Ukraine CC. It was first published in Kharkiv in June 1920 as a Russian-language weekly but with a Ukrainian title, *Visti TsK Komunistychnoi spilky molodi Ukraïny*. From July 1922 it appeared semi-weekly as *Molodoi rabochii*. Renamed *Molodoi leninets* in January 1924, it became a Ukrainian-language daily in December 1925 under the title *Komsomolets' Ukraïny*. From 1934 until the June 1941 German invasion it was published in Kiev. It was revived in Kharkiv in October 1943 under its present name and transferred to Kiev late that year. The paper appeared five times a week. In 1980 it had a circulation of 750,000; its Russian-language counterpart, *Komsomols'koe znamia* (est 1938), had one of 250,000.

Moloda Hromada (Young Community). An association of veterans of the Ukrainian Galician Army and the UNR Army, formed in 1925 in Lviv. Its activities included lectures and discussions on the recent liberation struggle, commemorations of 1 November and 22 January, and organized visits to soldiers' cemeteries. Besides promoting personal contacts among veterans, it provided financial aid to war invalids, veterans, and their families. In 1938 the society organized the funeral of Brig Gen M. *Tarnavsky. Its presidents were Yu. Sheparovych and A. Palii, and its long-term secretary was L. Makarushka. The society's activities ceased in 1939.

Moloda Muza (Young Muse). An informal modernist group of writers and artists in Western Ukraine, founded in 1906. The group's manifesto, as expressed by one of the founders (O. *Lutsky), was 'freedom and liberty in content and form' and an emphasis on the more subtle and gentle experiences of the human soul. To publicize its works the group established a publishing house with the same name, which during its brief existence (1906–9) brought out more than 10 works by the members of the group as well as the extremely ambitious but short-lived periodical **S'vit*. The members consisted of the writers B. Lepky, V. Pachovsky, P. Karmansky, M. Yatskiv, S. Charnetsky, Lutsky, S. Tverdokhlib, and V. Birchak, the painter M. Sosenko, the sculptor M. Parashchuk, and the composer S. Liudkevych. Sympathetic to the group were the writer V. Shchurat and the critic M. Yevshan.

Although as in all such loosely organized groups the style and quality of literary production is varied and uneven, there are some common traits which characterize

Some members of Moloda Muza. Sitting, from left: Volodymyr Birchak, Neonilia Pachovska, Ivan Kosynin; standing, Mykhailo Yatskiv, Vasyl Pachovsky, Mykhailo Strutynsky

the group as a whole: a predilection for the esthetic above the utilitarian in life and an affinity for the unease and pessimism of the Western European intelligentsia of the turn of the century. Some members of Moloda Muza were influenced by its Polish counterpart *Młoda Polska*. But though they were but a pale reflection of their Polish 'modernist' friends, to say nothing of the symbolists and decadents whose works they often translated, the members of Moloda Muza not only did not receive popular support (the newspaper *S'vit* had to give up its international profile and turn to more mundane matters after only nine months of publication), they had to contend with attacks from such notables as S. *Yefremov and I. *Franko. Franko's criticism, despite his sensitivity to their talent, centered on the absence of proper and meaningful purpose in their creativity. At a time when so much still had to be done in the social, national, and political spheres, there was little room for the luxury of esthetics. For Franko literature had more important aims. Their sensitive brooding was labeled destructive pessimism, their attention to form, needless formalism, and their striking imagery, decadence.

Such a climate put an end to the group's fragile attempt to free literature from social purpose. Moloda Muza produced some interesting works (Yatskiv's expressionistic miniatures, Pachovsky's erotic lyrics, and Karmansky's haunting and melancholy pieces) and had some influence on the writers of the 1920s (D. Zahul, V. Kobylansky, and even the early P. Tychna). But its elegant publications found little favor among the local intelligentsia. Moloda Muza marks only an interesting interlude in the development of Ukrainian literature in the 20th century since neither the interwar nationalist school of criticism nor the Soviet socialist-realist criticism could see any value in literary activity outside of social and political concerns.

Moloda Ukraina (Young Ukraine). A network of student circles in Galicia and Bukovyna in 1899–1903. The groups consisted of secondary-school and university students, who met to exchange ideas and foster intellectual development among themselves. The leading thinkers among them, including L. Tsehelsky, V. Starosolsky, Ye. Kosevych, and T. Melets, articulated an ideology in which the goal of national independence was based on the demand for the social emancipation of the Ukrainian people. The leading members of the organization published the journal *Moloda Ukraina* (1900–3) and collaborated closely with student hromadas in Kharkiv, Kiev, and Poltava. They helped smuggle revolutionary literature and even arms into Russian-ruled Ukraine. Many members of Moloda Ukraina became active in Ukrainian political parties in Galicia and Bukovyna.

Moloda Ukraina (Lviv, 1900–3)

Moloda Ukraina (Young Ukraine). A monthly student journal published, with interruptions, in Lviv from January 1900 to March 1903 (a total of 33 issues); the unofficial organ of the *Academic Hromada. Its editors and publishers included M. Zalitch, V. Starosolsky, Ye. Kosevych, A. Krushelnytsky, A. Hoshovsky, F. Tuziak, V. Tsebrovsky, and S. Baran. Among its contributors were the belletrists I. Martovych, S. Charnetsky, V. Shchurat, M. Yatskiv, and Lesia Ukrainka, and many other young activists who gained prominence in the revolutionary period and interwar years. *Moloda Ukraina* strongly supported the Ukrainian national movement and the concept of an independent unitary Ukraine. It published articles on Ukrainian history and culture and developments in the student movement – reporting extensively on Ukrainian student activities in Galicia, Bukovyna, Vienna, and Russian-ruled Ukraine – and advocated the establishment of a Ukrainian university in Lviv. The journal also contained commentaries on general political trends, usually from a populist or socialist perspective; book reviews; and a chronicle of current events. It was regularly subjected to censorship by the Austro-Hungarian government. Attempts at reviving the journal in 1905 (4 issues appeared, edited by V. Paneiko) and again in 1910 as the organ of the Ukrainian Students' Union (7 issues edited by M. Vitoshytsky and V. Lototsky) were short-lived.

Moloda Ukraina (Kiev, 1906–14)

Moloda Ukraina (Young Ukraine). The first and only Ukrainian-language children's magazine in Russian-ruled Ukraine before the First World War, published in Kiev (1906 [1 issue], 1908–12) and Hadiache (1914 [4 issues]) as a monthly supplement to **Ridnyi kraj*. Edited by O. Pchilka, it contained stories and poems by Kh. Alchevskaya, Lesia Ukrainka, M. Rylsky, T. Shevchenko, S. Rudansky, S. Vasylychenko, and others, and stories translated from Russian (N. Gogol, M. Lermontov, L. Tolstoi), English (J. Swift, C. Dickens, O. Wilde), and other languages. A total of 64 issues appeared.

Moloda Ukraina (Young Ukraine). A magazine for teenagers published and edited by M. Taranko in Lviv. A total of 66 semimonthly (1923–5) and monthly (1926) issues appeared.

Moloda Ukraina (Young Ukraine). A monthly organ of the Ukrainian Democratic Youth Association (ODUM), published since November 1951 in Toronto. It contains articles on historical and political subjects and on current developments in Ukraine, émigré and Soviet Ukrainian poetry and prose, cultural reviews, and reports on ODUM activities. It has been edited by an editorial committee, which has included B. Oleksandriv, O. Smoliansky, M. Dalny, I. Pyshkalo, M. Havrysh, Ya. Bilinsky, P. Hursky, Ye. Fedorenko, L. Lishchyna, L. Pavliuk, P. Rodak, O. Poshyvanyk, and O. Kharchenko.

Molode Zhyttia (Young Life). A publishing house established by the *Plast Ukrainian Youth Association in Munich in 1946 to publish the Plast magazines *Molode zhyttia*, *Novak*, and *Plastovyi shliakh* and various Plast books and brochures. It has also published several publications of the Shevchenko Scientific Society, over 25 monographs, and the *Entsyklopediia ukraïnoznavstva* (Encyclopedia of Ukraine, 2 + 10 vols, 1949–84). Its longtime director has been A. Figol.

Molode zhyttia (Young Life). A magazine of the *Plast Ukrainian Youth Association published in Lviv (1921–30) and, after the official suppression of Plast by the Polish government, in Prague (nos 77–80). After the Second World War the journal was renewed and published monthly in Munich (1946–50) and Detroit (1951–9). It contained reports on Plast activities, popular articles on Ukrainian history and culture, articles on scouting, prose, poetry, and directives from the Plast leadership. Its edi-

tors included S. Tysovsky (1921–4), B. Kravtsiv (1924–7, 1946–59), and P. Isaiv (1927–9). A total of 145 issues appeared.

Molodizhne [Molodizhne]. A town smt (1990 pop 4,700) in Symferopil raion, Crimea oblast. It was founded in 1929, and attained smt status in 1972. It is the home of an experimental farm of the Crimean Agricultural Institute.

Molodniak (Youth). A literary organization of Komsomol writers, established in 1926 by P. Usenko in Kharkiv and liquidated in 1932 by a decree of the Party's Central Committee, 'On the Reconstruction of Literary and Artistic Organizations.' Members of the Kharkiv branch included V. Kuzmych, D. Hordiienko, L. Pervomaisky, I. Momot, P. Holota, O. Kundzich, and Ya. Hrymailo. B. Kovalenko, M. Sheremet, O. Korniiichuk, A. Klochia, P. Kolesnyk, A. Shyian, and others belonged to the Kiev branch. There were also branches active in Dnipropetrovske, Donetske, Kherson, Kremenchuk, Mykolaiv, Zaporizhia, and Uman. Similar to the All-Ukrainian Association of Proletarian Writers, *Molodniak* contributed to the destruction of Ukrainian culture in the 1920s and early 1930s. B. Kovalenko was its chief ideologue. Pervomaisky and Korniiichuk were among those who began their activities within the organization and went on to prominence as leading Soviet writers. The organization's members published in an organ which bore the same name. (See also *Pluh.)

Molodniak (Youth). A literary, cultural, and political monthly journal of the Communist Youth League of Ukraine CC. Published in Kharkiv (1927–35) and Kiev (1935–7) and edited by O. Hromov, B. Daniman, P. Trublaievych, A. Khvyliya, and P. Usenko, it published poetry and prose by members of the Komsomol writers' group **Molodniak* (until 1932) and the Writers' Union of Ukraine (SPU, from 1932). From July 1936 the journal was also an SPU organ. In August 1937 it was superseded by *Molodyi bil'shovyk*, which appeared until May 1941.

Molodogvardiiske* or *Molodohvardiisk [Molodogvardiys'ke or Molodohvardiys'k]. V-20, DB III-7. A city (1990 pop 31,800) in Luhanske oblast, administered by the Krasnodon municipal council. It was founded in 1955 with the opening of several coal mines, and attained city status in 1961. Its economy rests mostly on four coal mines and an enrichment plant.

Molodove. A multi-occupational Paleolithic site on the right bank of the Dniester River near Molodove, Chernivtsi oblast. Discovered in the 1920s, the site was excavated from 1951 to 1980. While numerous occupational periods have been discovered at Molodove, the most important are Molodove I and Molodove V. Molodove I consists of nine distinct settlements spanning the period from the Middle Paleolithic (the *Mousterian culture) to the Mesolithic. Dwellings of Molodove I utilized mammoth bones to provide a building frame upon which skins were laid. At Molodove V twenty settlements spanning the Middle and Upper Paleolithic periods were uncovered. Many flint, bone, and horn artifacts were uncovered, including primitive flutes made from mammoth tusks.

Leonid Molodozhanyan and former Prime Minister John Diefenbaker admiring Molodozhanyan's work (1975)

Molodozhanyan, Leonid [Molodožanyan] (Mol, Leo), b 15 January 1915 in Volhynia. Sculptor and stained-glass artist. He studied at the art academies in Berlin and the Hague before emigrating to Winnipeg in 1948. He has created over 90 stained-glass windows, including 30 for the ss Volodymyr and Olha Ukrainian Catholic Cathedral in Winnipeg. Mol has earned an international reputation as one of Canada's leading sculptors. Working in the classical tradition, he has won numerous international competitions, including ones for monuments to T. Shevchenko in Washington, DC (1964), and Buenos Aires (1971), to Queen Elizabeth II in Winnipeg (1970), and to the former Canadian prime minister J. Diefenbaker in Ottawa (1985). He has executed numerous busts of well-known figures, including W. Churchill (1966), D.E. Eisenhower (1965), J.F. Kennedy (1969), Popes Paul VI (1967), John XXIII (1967), and John Paul II (1982), and Cardinal Y. Slipy (1971). To commemorate the millennium of Ukrainian Christianity in 1988, he created bronze monuments of St Volodymyr for the Ukrainian communities in London (England), Winnipeg, and Toronto. A past president of the Manitoba Society of Artists and the Sculptors' Society of Canada and a member of the Royal Canadian Academy of Arts and the Allied Artists of America, for his contribution to Canadian art he was awarded honorary doctorates by the Universities of Winnipeg and Alberta (1985) and was appointed to the Order of Canada (1989). In 1992 the Leo Mol park and museum was established in Winnipeg. A monograph about him has been written by the Canadian art historian P. Duval (1982).

D. Zelska-Darewych

Molodyi bil'shovyk. See *Dnipro* and *Molodniak*.

Molodyi Teatr (Young Theater). A theatre troupe in Kiev headed by L. Kurbas from 1917 to 1919. The core group of actors consisted of graduates of the Lysenko Music and Drama School. Most of the productions were directed by Kurbas, although H. Yura, V. Vasilev, and S. Semdor also directed shows. A. Petrytsky was the main stage designer. Kurbas's articles, such as the 'Manifesto' (in *Robitnycha hazeta*, 1917) and 'Molodyi Teatr' (Young Theatre, 1917), called for a new Ukrainian theatre and out-

The Molodyi Teatr troupe after the premiere of Volodymyr Vynnychenko's *Chorna pantera i bilyi vedmid'* (Black Panther and White Bear) in Kiev in 1917. First row, from left: Olha Horodyska (2nd), Sofiia Manuilovych (3rd), Antonina Smereka (4th); second row: Yona Shevchenko, Vasyl Vasylo, Polina Samiilenko, Les Kurbas, Vira Shchepanska, Petro Myloradovych, Halyna Ihrets, and, standing, Hnat Yura and Marko Tereshchenko; third row: Oleksander Yursky (1st), Volodymyr Kalyn (2nd), Valerii Vasyliiev (4th), Yakiv Savchenko (5th), Lev Piasetsky (7th), Borys Vasyliiev (8th), Olimpiia Dobrovolska (9th), Andrii Shchepansky (11th); last row: Stepan Bondarchuk (in white shirt)

lined the artistic goals of the group. Molodyi Teatr rejected the Ukrainian ethnographic repertoire and presented modern Ukrainian plays and world classics. Kurbas's search for a new form resulted in imaginative uses of rhythm, gesture, music, and design in his productions. The first season included Kurbas's productions of the realistic *Chorna pantera i bilyi vedmid'* (Black Panther and White Bear) by V. Vynnychenko, the naturalistic *Jugend* by M. Halbe, and *Doktor Kerzhentsev*, based on L. Andreev's *Mysl'* (Thought), directed by Yura. These were followed by a stylized presentation of four symbolic études by O. Oles, two of which were directed by Kurbas and one by Yura. Molodyi Teatr concluded its first season with a production of J. Żuławski's impressionistic verse play *Ijola*.

The second season (1918–19) opened with Kurbas's production of Sophocles' *Oedipus Rex*, the first Ukrainian production of a classical Greek play. Kurbas's subsequent productions included Lesia Ukrainka's *U pushchi* (In the Wilderness); F. Grillparzer's *Weh dem, der lügt!* in the commedia dell'arte style; a stylized *Vertep*, which used the conventions of the puppet theater; expressionistic stagings of T. Shevchenko's dramatic poems 'Ivan Hus' and 'Velykyi l'okh' (The Great Vault); and performances of several lyrical poems as choral movement pieces with music, which Kurbas would later see as his first attempt to create 'transformed gestures,' the central concern of his later work. During the season the other directors presented literal stagings of such plays as G. Shaw's *Candida* (directed by Yura), G. Hauptmann's *Die versunkene Glocke* (by Yura) V. Vynnychenko's *Hrikh* (Sin, by Yura), Moliere's *Tartuffe* (by Vasilev), and H. Ibsen's *En folkefiende* (by Semdor).

In the spring of 1919, as the internal artistic conflicts came to a head, Molodyi Teatr was nationalized by the Bolshevik government and forced to merge with the *State Drama Theatre to form the *Shevchenko First Theatre of the Ukrainian Soviet Republic. Although it lasted only

two seasons, Molodyi Teatr changed the direction of Ukrainian theatre, and from its ranks came the artistic directors of the major theaters of the 1920s, including Kurbas, Yura, M. Tereshchenko, and V. Vasylyko.

V. Revutsky

Molodyk (New Moon). A literary-art almanac published in 1843-4. Four issues in total appeared; three were printed in Kharkiv, and the fourth in St Petersburg. *Molodyk* was published by I. Betsky with the assistance of H. Kvitka-Osnovianenko, M. Kostomarov, and others. It published works by T. Shevchenko, Kvitka-Osnovianenko, Ye. Hrebinka, A. Metlynsky, M. Kostomarov, M. Petrenko, F. Glinka, and others, and articles on history and the history of literature (eg, Kharkiv College, H. Skovoroda). Russian literary critics (especially V. Belinsky) had a hostile attitude to *Molodyk*.

Molokans (Russian: *molokane*). A Russian religious sect formed in the 18th century in Tambov gubernia that later spread to other areas of the Russian Empire. Founded by S. Uklein, a former Doukhobor, the sect rejected a formal church, the ritual of worship, and the sacraments in favor of Bible readings and prayer meetings. Because of their pacifism, sect members frequently came into conflict with state authorities, and during the 19th century Molokan groups were exiled to Caucasia, Siberia, and the Volga and Amur regions. By the beginning of the 20th century there were approx 1.2 million Molokans in the Russian Empire. Some of them settled in Southern Ukraine, most notably a subgroup known as the Jumpers (*pryguny*) because of their practice of jumping during religious services. An undetermined number of Molokans remain in Ukraine today.

Molot (Sledgehammer). A radical literary and political miscellany published in the **drahomanivka* alphabet by M. Pavlyk in Lviv in 1878. Like its predecessors **Dzvin* and **Hromads'kyi druh*, it was confiscated by the Austrian authorities.

Molotov, Viacheslav (né Skriabin), b 9 March 1890 in Kukarka, Viatka gubernia, Russia, d 9 March 1986 near Moscow. Bolshevik party functionary and Soviet diplomat. As secretary of the CP(B)U Donetske Gubernia Committee in 1920, he supervised the suppression of the Workers' Opposition in the Donbas. After being promoted to the office of first secretary of the CP(B)U (November 1920 to March 1921) he implemented Moscow's policy of War Communism, purged the CP(B)U, and waged war on the anti-Soviet partisan movement. He was rewarded with appointments to the CC of the Russian Communist Party (Bolshevik) and its Politburo. A servile supporter of J. Stalin after V. Lenin's death, he became the secretary of the Moscow Party Committee and a full Politburo member in late 1925. After purging the Moscow organization of

Stalin's opponents in 1928-30, he was appointed chairman of the USSR Council of People's Commissars and held the post during the terror and purges until 1941. At the Third CP(B)U Conference in Kharkiv in 1932, he rejected Ukrainian entreaties to lower the excessive grain-delivery quotas which would lead to the man-made famine of 1932-3. In 1937 he played a key role in purging the CC CP(B)U. As commissar of foreign affairs in 1939-49, he negotiated the *Molotov-Ribbentrop Pact and then the Soviet alliances with the United States and Great Britain. At the 1945 Yalta Conference he proposed that Soviet Ukraine become a member of the United Nations. After Stalin's death he again served as foreign minister (1953-6) and as minister of state control until June 1957, when he was stripped of all offices for working with the 'anti-Party group' to depose N. Khrushchev. Later he served as ambassador to Mongolia and Soviet delegate to the International Atomic Energy Agency in Vienna (1960-1). In 1964 he was expelled from the CPSU, and retired from political life.

Molotov-Ribbentrop Pact. The popular name of the German-Soviet Nonaggression Pact signed in Moscow on 23 August 1939 by the foreign ministers of the USSR (V. Molotov) and Nazi Germany (J. von Ribbentrop). The pact was signed immediately after the agreement of 19 August, which granted the USSR 180 million marks for the purchase of German goods. It followed months of unsuccessful negotiations between the USSR on the one side and France and Great Britain on the other, and Soviet failure to organize an anti-Nazi diplomatic coalition.

The Molotov-Ribbentrop Pact was one of the most important diplomatic acts in Soviet history. Its formal section, consisting of seven articles, was made public. It specified that the signatories would refrain from aggression against each other, remain neutral in case of war with other states, exchange information, and resolve disputes peacefully. The pact was to remain in force for 10 years. A secret protocol of four articles which was appended to the formal part divided Poland between Germany and the USSR along the Sian-Buh-Narev rivers (roughly following the *Curzon Line) and thereby handed over most of the Polish-ruled Ukrainian and Belarussian territory to the USSR and assigned Latvia, Estonia, Finland, and Bessarabia to the Soviet sphere of influence and Lithuania to the German sphere. An adjustment on 28 September 1939 transferred Lithuania to the Soviet sphere of influence and redrew the border along the Sian-Buh-Narev rivers, to remove some ethnically Polish territory from the Soviet part.

This pact led directly to the Second World War. Fearing that Great Britain and France would honor their treaty obligations to Poland and come to its defense, Hitler needed a guarantee of Soviet neutrality before he could launch his assault on Poland, for he believed that Germany could not fight on two fronts simultaneously. On 1 September Germany attacked Poland, and on 3 September Britain and France declared war. The USSR invaded Poland from the east on 17 September and occupied the territory assigned to it in the secret protocol. J. Stalin justified the action by citing the need to guarantee the safety of the millions of Ukrainians and Belarussians in eastern Poland. Rigged elections were quickly held, and on 27 October 1939 the new National Assembly of Western Ukraine formally pro-

claimed Soviet rule and petitioned the USSR to incorporate the territory into Soviet Ukraine. The 'request' was granted on 1 November.

The Baltic states were forced to sign mutual assistance pacts with the USSR, which gradually expanded its influence in their affairs. The Red Army occupied the countries on 15–16 June 1940. As in Western Ukraine, the quickly 'elected' assemblies 'applied' in August 1940 to become Soviet republics. In June 1940 the USSR occupied Bessarabia and northern Bukovyna in the name of 'national liberation.'

The Ukrainian question was an important factor behind the Molotov-Ribbentrop Pact. Stalin was concerned about a possible alliance between Germany and Western Ukrainian nationalists, who wanted to liberate Ukraine from Soviet rule. He probably feared that the short-lived independent *Carpatho-Ukraine would serve as an inspiration to Ukrainians in the USSR. Hence, Stalin aimed to bring all Ukrainians under his rule in order to control them. He also knew that the man-made famine of 1932–3 and terror of the 1930s had alienated the Ukrainian people from his regime, and that they would welcome a German invasion. Hence, he needed Germany's friendship or, at least, its neutrality.

The Molotov-Ribbentrop Pact remained the foundation of Soviet-German relations throughout the first years of the war. Stalin continued to abide by its provisions for cooperation and mutual support. He provided the Germans with much-needed raw materials for their war effort, even as Germany prepared for its invasion of the USSR. The pact entailed a radical change in Soviet foreign policy: the USSR abandoned its criticism of the Nazis and forced the Comintern and its communist allies in Western Europe and elsewhere to do likewise. This about-face greatly undermined the popularity of many Communist parties outside the USSR. In Canada the government suppressed pro-Soviet organizations, such as the *Ukrainian Labour-Farmer Temple Association. It was only the German invasion in June 1941 that put an end to the pact.

For most of the postwar period the official Soviet justification for the Molotov-Ribbentrop Pact was that the USSR needed time to prepare for a war with Germany. Until the late 1980s the Soviet authorities never even admitted the existence of the secret protocol, but stubbornly maintained that the Red Army had occupied Western Ukraine, Belarus, and the Baltic states in response to calls for assistance and protection. A major re-evaluation of the entire Soviet diplomatic record and especially of the pact has begun.

Momot, Ivan, b 23 February 1905 in Valky, Kharkiv gubernia, d 27 May 1931 in Kharkiv. Literary critic; member of *Molodniak. Momot published a collection of his articles, *Literaturnyi komsomol* (Literary Komsomol, 1927), and numerous essays on the works of M. Kozhushny, I. Shevchenko, V. Chumak, and others, which appeared in

Komsomol newspapers and journals as well as the journal *Pluzhanyn*.

Monarchism. See Conservatism.

Monasteries. Communities and settlements of monks (see *Monasticism) with attendant buildings and estates. Depending on the monastic order that the particular monastery belonged to or the monastic typicon that was followed, life ranged from strictly anchoritic, to semi-communal (where monks lived in individual cells but ate and prayed together), to communal or idiorhythmic. Novices also lived in the monastery before being tonsured. Monasteries were generally formally headed by a council of all the monks or nuns, which chose an abbot or overseer (an *archimandrite or *hegumen). Historically, depending on various political, legal, and economic conditions, monasteries enjoyed differing degrees of autonomy. *Lavry (of which there were two in Ukraine, the *Kievan Cave and *Pochaiv monasteries) and *stauropigion monasteries were subject only to the highest church authority (initially the Patriarch of Constantinople, later the Patriarch of Moscow and the Holy Synod) and were independent of the local bishop. Cathedral monasteries were directly subordinate to the bishop of the eparchy to which they belonged. Other types included self-administering monasteries (the majority) and *hermitages (*skyty, skytyky, pustyni*) that were dependent on larger monasteries.

Larger monasteries had a main church and bell tower, as well as smaller chapels, baptismal alcoves, and separate refectories. Apart from the shrines and monks' residences (cells), monasteries typically had an array of administrative buildings and workshops and sometimes their own hospitals, schools, and printing presses. The monasteries were often surrounded by fortified walls or palisades, with defensive ramparts, towers, and trenches, and some monasteries even grew into large complexes that served as fortresses (especially in Slobidska Ukraine and in areas bordering the Tatar-controlled steppes).

Monastic life in Ukraine began before the official adoption of Christianity, but the first monasteries were not built until after the baptism of Kiev and its environs in the late 10th century. The first formal monasteries were established under Yaroslav the Wise – the men's St George's and the women's St Irene's monasteries in Kiev (both mentioned in 1037). Other early monasteries included St Demetrius's (later *St Michael's Golden-Domed) Monastery, the *Vydubychi Monastery, and *St Cyril's Monastery. In the 11th to 13th centuries the number of monasteries in the Kiev region rose to 20. Monasteries were founded in other parts of Ukraine, primarily in such princely capitals as Pereiaslav, Chernihiv (the *Yeletsnyi and *Trinity–St Elijah monasteries), Novhorod-Siverskyi, Volodymyr-Volynskyi, Halych, Kholm, and Lviv (St George's Monastery). Smaller monasteries were established throughout Ukraine. Although information about these is often incomplete, a partial list of smaller monasteries in the 11th to 13th centuries includes the Zarubskyi Monastery near Kaniv, the ss Borys and Hlib Monastery near Pereiaslav, the Zahoriv Monastery near Volodymyr-Volynskyi, the *Zhydychn St Nicholas's Monastery in Volhynia, St Daniel's Monastery in Uhrovske (Kholm region), the Synevidsko and Polonynskyi monasteries in the

Carpathians, and the Rata Monastery near Rava Ruska. Other monasteries that were probably established in the Princely era became known only in the late Middle Ages – the *Mezhyhiria Transfiguration Monastery near Kiev, the *Novhorod-Siverskyi Transfiguration Monastery, the Peresopnytsia and Dorohobuzh monasteries in Volhynia, the Byblo Monastery near Peremyshl, the Horodyshche Monastery near Sokal, St *Onuphrius's Monastery in Lviv, and the *Lavriv and Spas monasteries near Sambir.

Monasteries were established mainly by princes and boyars, although some were founded by spiritual leaders and churchmen. Noble patrons oversaw the monasteries: they cared for their growth and development and often donated estates, valuables, and money. They were thereby guaranteed certain rights over the organization and administration of the monasteries, extending to the approval of charters and the appointment of hegumens or hegumenissas. Patrons also maintained family crypts in their monasteries.

In the Princely era, monasteries became firmly established as important centers of religious, educational, scholarly, cultural, and artistic life. Their influence extended throughout Ukraine, and in some cases (eg, the Kievan Cave Monastery) throughout Eastern Europe. Their importance in the economic life of the country was also great, particularly as a result of their colonization of outlying territories. *Church peasants, essentially serfs, worked on the large monastery estates that were the basis of their wealth. Many monasteries owned mills and even workshops and small factories. In addition the defensive fortifications of monasteries made them important military installations, and they did much charitable work. The largest institutions came to exercise considerable authority in state affairs.

The Tatar invasions in the 13th and 14th centuries brought devastation to monasteries. Many were wiped out, and the monks forced to hide in cliff-side monasteries (eg, in Bakota and Bubnyshche). Only a small number (notably the Kievan Cave Monastery) managed to survive. After the annexation of Ukraine by the Grand Duchy of Lithuania and then by Poland, new monasteries began to emerge, particularly in Galicia, where by 1500 there were 44 of them.

The 16th and 17th centuries saw a revival of monastic life in Volhynia and central Ukraine. Through the efforts of metropolitans Y. Boretsky, I. Kopynsky, and P. Mohyla, and with support from the Cossacks, a series of monasteries founded in the Princely era were revived. New monasteries were also established, including the *Kiev Epiphany Brotherhood and *St Nicholas's monasteries in Kiev, the *Hustynia Trinity Monastery near Pryluka, the *Mhar Transfiguration Monastery near Lubni, the Krasnohiria Monastery near Zolotonosha, and the Moshnohiria Monastery near Cherkasy. In the Cossack era, monasteries again played an important role in the religious, cultural, and economic life of the country. The Cossack elite, especially under B. Khmelnytsky and I. Mazepa, assisted in the revival or the establishment of many monasteries, particularly in Left-Bank Ukraine. These included the Krupytskyi St Nicholas's Monastery near Baturyn, the *Maksaky Transfiguration Monastery, the ss Peter and Paul Monastery in Hlukhiv, the Elevation of the Cross Monastery in Poltava, the Ascension and St Michael's monasteries in Pereiaslav, the Annunciation Monastery in Nizhen, and the Nativity of the Mother of God Monastery

in Domnytsia near Mena. The St Mary the Protectress Monastery in Kharkiv and the *Sviati Hory Dormition Monastery on the Donets River were established in Slobidka Ukraine, and the Samara St Michael's Monastery was founded in Zaporizhia. Hetman Mazepa was a generous benefactor of monasteries: he donated much money, valuable religious objects, and estates with rights for industry and trade, and granted the monasteries exemptions from taxes. After the mid-18th century, however, centralist Russian imperial policies led to a decline in the economic position of monasteries, and in 1786 Catherine II issued a ukase confiscating all their assets. Only a few were selected for state support; the rest had to generate their own income. Many smaller monasteries were closed outright.

In the century of the Church Union of Berestia (1596), most monasteries in Right-Bank Ukraine and Belarus accepted the union and joined the *Basilian monastic order, which in the 17th and 18th centuries grew to encompass approx 150 monasteries in the Ukrainian territories under Polish rule. The exceptions were the *Maniava Hermitage and the so-called foreign monasteries of the Kievan Orthodox metropolity. After the partitions of Poland, however, *Joseph II introduced reforms in the Habsburg Empire that confiscated land and property from the orders and closed all but 14 of the Basilian monasteries. In Right-Bank Ukraine, which came under Russian rule, monasteries were either closed or given to the Russian Orthodox church. In 1908 there were 67 men's and 43 women's monasteries in the nine Ukrainian gubernias in the Russian Empire, plus several more in the Kuban and the ethnic Ukrainian territories in neighboring gubernias (see table).

Monasteries in Russian-ruled Ukraine, 1908

Gubernia	Men's	Monks and novices	Women's	Nuns and novices
Volhynia	10	344	4	387
Katerynoslav	3	80	4	640
Kiev	20	2,805	6	2,308
Podilia	5	125	6	518
Poltava	3	128	5	1,164
Tavriia	7	360	4	376
Kharkiv	8	1,033	5	1,021
Kherson	2	95	3	377
Chernihiv	9	322	6	659
Total	67	5,292	43	7,450

In Transcarpathian Ukraine the first monasteries date from the 14th century. *Hrusheve in the Maramureş region and the Chernecha Hora near Mukachiv were important centers, where more than 20 monastic communities of varying size were eventually established. After the Josephine reforms only seven of them remained, including the *Krasný Brod, *Máriapócs, and Imstycyche monasteries. These later joined the Roman Catholic church to form a separate Basilian province. In Bukovyna there were about 30 monastic settlements, including ones in Suceava, Putna, and Drahomirna. In the late 18th century the authorities confiscated all of their holdings and abolished many of them. In Right-Bank Ukraine and, until 1648, Left-Bank Ukraine there were also a number of Roman Catholic monasteries (Bernardine, Dominican, Jesuit, Carmelite, and others) established under Polish rule.

Throughout history monasteries exerted a great influence on Ukrainian culture. In the Middle Ages and Cossack era they were the principal centers of education and scholarship. The **Povist' vremennykh lit*, the **Mezhyhiria* and **Hustynia* chronicles, and important manuscripts, such as the **Horodyshche Apostol* and Gospel, the **Byblo Apostol*, the **Putna Gospel*, and the **Peresopnytsia Gospel*, were all compiled in monasteries. With the introduction of **printing*, many monasteries (especially in **Derman*, *Chernihiv*, *Pochaiv*, *Suprasl*, **Univ*, *Kiev*, and *Lviv*) became the earliest and most important **publishers* in Ukraine; they issued secular as well as religious works in a variety of languages. Many of the earliest schools were established at monasteries or in affiliation with them: the **Kiev Epiphany* and **Lviv Dormition* brotherhood schools; the **Chernihiv*, **Pereiaslav*, and **Kharkiv* colleges; and even the **Kievan Mohyla Academy*. Liturgical singing, icon painting (see **Kievan Cave Monastery Icon Painting Studio*), the **graphic arts* (esp engraving), **fresco painting*, embroidery (in women's monasteries), and other art forms flourished in monasteries, and many monasteries maintained important libraries and fostered the development of **historiography* and literature.

Churches, bell towers, and other monastery buildings are important examples of Ukrainian **architecture*. Shrines of the 11th to 12th centuries – eg, the Dormition and Trinity churches of the Kievan Cave Monastery, the cathedrals of the Vydubychi and St Michael's Golden-Domed monasteries, the Transfiguration Church in Berestove in Kiev, the Yelets'kyi Monastery Dormition Cathedral in Chernihiv, and St Panteleimon's Church in Halych – were generally three-nave buildings in the Byzantine style, although the last two show Romanesque influences. Monastery churches of the 12th century (eg, St Elijah's Church in Halych and St Basil's Church in Zymne, near Volodymyr-Volynskyi) often included rotundas; in the 15th to 16th centuries three-conch shrines of the Byzantine Renaissance were common (eg, churches of the Lavriv Monastery and the Trinity Monastery in Kamianets-Podil'skyi). Later monasteries were built in various styles: the late Gothic (eg, the Trinity Church in Mezhyrich, near Ostrih; the Dormition Church in Zymne; and the gate tower of the Derman Monastery), Renaissance (16th–17th century; eg, the monastic church in Zaluzhia, near Zbarazh; the reconstructions of monasteries of the Princely era in Kiev made under P. Mohyla; the Church of the Protectress in the Nyzkynychi Monastery), Cossack baroque (17th–18th centuries; eg, the Trinity and ss Peter and Paul churches of the Hustynia Trinity Monastery, the All Saints', Resurrection, and ss Peter and Paul churches of the Kievan Cave Monastery; and other five-domed monastic shrines), and rococo (18th century; eg, the bell tower of the Pochaiv Monastery). The wooden churches and bell towers of the Mezhyhiria Transfiguration Monastery (1611), the Krekhiv Monastery (1658), the Maniava Hermitage (1676), and the Moshnohiria and Medvediv monasteries also had a distinctive style. In the 19th and 20th centuries very few new monasteries were built in Russian-ruled Ukraine, and those were constructed according to local designs or in a Muscovite style (eg, the refectory of the Kievan Cave Monastery, 1900, and the Trinity Cathedral in Pochaiv, 1906) that stood in stark contrast to the style of the older structures. In Galicia and Transcarpathian Ukraine, notable monastery buildings included the Basilian churches in Hoshiv and Zhovkva, the churches of the Basilian wom-

en's monasteries in Lviv and Stanyslaviv, and the churches of the **Redemptorist* monasteries in Mykhailivtsi and the Prešov region. Generally, Ukrainian Catholic monasteries were smaller than Orthodox ones and much less ornate.

The Bolshevik occupation of Ukraine brought ruin to virtually all monasteries. On the basis of a decree issued in January 1918, all monastic holdings were nationalized, and the monasteries were abolished and liquidated. The artistic valuables they held, including liturgical objects, icons, decorations, and books, were confiscated, and most were destroyed. Many valuable **iconostases* were demolished. Even the monastery buildings, of immeasurable historical and artistic value, were razed, particularly in the early 1930s.

During the German occupation of Ukraine in 1941–3, a number of Orthodox monasteries were reopened. After the war, as a result of the new religious policy adopted by the Soviet government, some were allowed to stay open. All Ukrainian Catholic monasteries (over 150 of them) in the newly occupied territories, however, were closed. In 1954 there were approx 39 active monasteries and hermitages in the Ukrainian SSR, as compared with 69 in all of the USSR. Of these, 14 were in Transcarpathia. There were few in central and eastern Ukraine, among them the half-ruined Kievan Cave Monastery, two women's monasteries in Kiev, and the Dormition Monastery in Odessa. In 1954 the antireligious campaign resumed, and most of the remaining monasteries were closed. The Kievan Cave Monastery was closed in 1964, but part of it was returned to the Russian Orthodox church in 1988 on the occasion of the millennium of the Christianization of Ukraine. By 1970 there were only seven monasteries open (two men's and five women's), with a total of approx 800 (mostly elderly) monks and nuns. In the Ukrainian diaspora, there are now over 250 Ukrainian Catholic men's and women's monasteries and monks' communities. The Ukrainian Orthodox church has one in the United States.

M. Vavryk

Monasticism. A complex of religious institutions and rituals that regulates contemplative religious life. Monks and nuns, having renounced secular life, live in special residences, monasteries, or hermitages or in complete iso-

lation. They devote themselves to the service of God through prayer and penance; some also devote themselves to assisting others. A monk renounces family life and remains celibate (after taking a vow of chastity) and renounces property (after a vow of poverty; see *asceticism). Daily life, duties, and even dress are regulated by the monastic order or by the rules of the monastery. Tonsuring proceeds through three stages that culminate in the adoption of a monastic name, symbolizing a rejection of the former way of life (this is no longer compulsory in Catholic orders). Lay novices, known as *poslushnyky*, live in the monasteries and perform various duties and services (*posluhy*) during liturgies, assist in the upkeep and work of the monastery, and do various tasks. Some monks (in the Catholic church, the majority) remain in contact with the outside world by working actively in parishes, visiting hospitals, teaching in schools, running shelters and orphanages, or involving themselves in scholarship.

Monastic orders do not have ordained clerics, but some monks were ordained to conduct services in the monasteries and their churches (see *clergy). These monks were known as the regular or 'black' clergy. Generally, in monasteries the monks' basic needs are seen to, and they are thereby allowed to work for the good of the institution, although in some Eastern rite monasteries (but not Catholic ones) monks take care of their own daily needs and gather only for common prayers. All monks and nuns farm or work in crafts, schools, or hospitals, and all take an active part in liturgical life and pastoral work. In Ukraine there was always a small number of wandering monks who moved from one monastery to another, seeking either spiritual perfection or better living conditions.

The monastic community elected a *hegumen as head of the monastery. Larger monasteries were headed by an *archimandrite, who was initially chosen by the monks with the participation of the lay authorities; later, he was appointed by the state or by the higher church authorities. In the East, all monasteries were initially independent of one another and subject to the authority of local bishops; only later were some *stauropigion monasteries established.

In Ukraine, monasticism emerged soon after the adoption of Christianity and was modeled on Byzantine practices. Some sources suggest that a monastery had already been established at the Church of the Tithes in the 10th century, and a St Sophia's Monastery is said to have burned down in 1037. By 1062 there was a large community of monks in the Kievan Cave Monastery, and by the 12th century there were some 17 other monasteries in the Kiev region. During the Princely era, all metropolitans and bishops of the Ukrainian church were usually chosen from the monastic orders, and prominent monks had considerable influence in secular affairs. In the 16th and 17th centuries secular authorities began to interfere in monastic life and often appointed hegumens and archimandrites, thereby undermining the authority of the church hierarchy. In some cases monasteries were exploited financially by secular figures. In general, monastic life declined as feuds and conflicts undercut the religiosity and spirituality of many monasteries, although individual communities continued to be important centers of religious and cultural life.

Many outstanding theologians and writers (eg, M. *Smotrytsky) were monks, and Ukrainian monks also contributed to the cultural development in neighboring

countries, particularly in the early 18th century. In Russia, for example, S. *Yavorsky and T. *Prokopovych made important contributions to literature and theology. In Ukraine the most important monastic communities were the *Kievan Cave, *Pochaiv, *Derman, *Maniava Hermitage, *Hustynia Trinity, *Kiev Epiphany Brotherhood, and *Mhar Transfiguration monasteries. Members of prominent Ukrainian families, including (in the 16th century) D. Zubrovtsky, O. Sanguszko, and I. Tyshkevych, joined monastic orders. In the 18th century P. *Velychkovsky initiated a major reform in monastic life in Ukraine and throughout Eastern Europe.

In the 19th century, monasticism was Russified in Russian-ruled Ukraine, and Ukrainian monastic traditions were continued in Galicia and Transcarpathian Ukraine by Greek Catholic monasteries, such as the *Zhovkva and *Mukachiv St Nicholas's monasteries. The monasteries in *Lavriv, Drohobych, and Buchach ran schools, and *St Onuphrius's Monastery in Lviv maintained a large library, a collection of valuable manuscripts, the archive of the Basilian order, and a large gallery of paintings.

Monastic orders of the Ukrainian Catholic church acquired their own distinctive features, and a wide range of activities were initiated. Only the *Basilian monastic order and order of nuns, the *Studite Fathers and Sisters, and eastern branches of the Benedictines and Franciscans bear the official title *chyn* ('order'). All others that were established in the last hundred years are known as congregations and are modeled largely on Western orders. Congregations and orders are headed by protoarchimandrites, archimandrites, priors, or other church officials chosen by monastic councils for varying terms. All congregations and orders are divided into provinces overseen by protohegumens or other hierarchs. No archimandrite of a monastery has served for life since the 19th century.

Novices are accepted into monasteries at age 18 and undergo a two- to three-year initial probationary period. A second probationary period lasts three to six years, after which candidates take the so-called eternal vows. After this process they can be ordained. Until the 19th century, only monks could be chosen as bishops of the Ukrainian Catholic church.

Monastyryshche [Monastyryšče]. v-10. A city (1990 pop 16,500) on the Konelia River and a raion center in Cherkasy oblast. Its name begins to appear in historical chronicles in the mid-16th century. During the Cossack-

Polish War of 1648–57 I. Bohun defeated S. Czarniecki's troops near Monastyryshche, on 20–21 March 1653. In the 18th century the inhabitants took part in several haidamaka uprisings led by S. Palii and M. Zalizniak. Monastyryshche attained town status in 1811 and city status in 1985. Today the city has a machine-building factory and several food-processing plants. Archeologists have discovered a settlement from the Bronze Age near the city.

Monastyryshche. A Slavic fortified settlement of the 8th to 10th century on the Romen River at the Monastyryshche landmark in Romen, Sumy oblast. Uncovered in 1901 and excavated in 1906 and 1924, the site yielded five semi-pit dwellings with clay ovens. Artifacts recovered in the course of excavations include elaborately decorated pottery, iron knives, bones of domestic and wild animals, and amulets featuring the teeth of animals (particularly bears). Ethnically, the inhabitants of the site are identified as *Siverianians. Similar archeological sites have come to be known as 'Romen fortified settlements,' after the town in which Monastyryshche was found.

Monastyryska [Monastyrys'ka]. IV-6. A town (1990 pop 6,600) on the Koropets River and a raion center in Ternopil oblast. It is first mentioned in a historical document in 1454. By the 16th century it was an important manufacturing and trading center on the route from Podilia to Halych and Lviv. After its destruction by the Turks in 1672, the town declined. In July 1919 the Kolomyia Brigade of the Ukrainian Galician Army defeated the Polish army near Monastyryska. Today it has a tobacco-processing plant and a sewing factory. Archeologists have discovered several burial sites from the 2nd and 3rd centuries and a fortified settlement from the time of Kievan Rus' near the town.

Monde Slave, Le. A French Slavic-studies journal published in Paris in 1917–18 and 1924–38. Edited by J. Legras, L. Eisenmann, and E. Denis, it contained articles on Ukrainian language, scholarship, history, and political affairs by French scholars, such as R. Martel, P. Chasles, and A. Meillet, and by Ukrainians, such as F. Savchenko (among other contributions, a 1918 bibliography of French-language works on Ukraine), O. Shulhyn, M. Korduba, V. Kubijovyč, and especially E. Borschak, and by the Russian historian V. Miakotin. The journal also published some documents concerning Ukrainian affairs. An index to it appeared in 1935.

Mondok, Ivan, b 21 May 1883 in Ruskyi Hrabovets, Transcarpathia, d 8 December 1941. Communist activist in eastern Slovakia. After graduating from a teachers' college in Uzhhorod he taught in rural schools and was conscripted into the Austrian army. After being captured by the Russians in 1916, he participated in the revolution as a member of the Red Guard, the Red Army, and the Party. On his return home at the end of 1918, he became active in the communist movement in Transcarpathia and Hungary. In 1920 he was a founder of the International Socialist Party of Subcarpathian Ruthenia, its first secretary, and editor of its paper *Pravda*. He was a member of the Central Committee of the Communist Party of Czechoslovakia (1923–9) and the Party's deputy to the Czechoslovak parliament (1924–5). In 1930 he emigrated to Soviet Ukraine.

Ivan Mondok

He was arrested during the Stalinist purges, and probably died in a labor camp.

Money. See Currency and coins.

Mongols. A mixture of Asiatic tribes, known also as Tatars, who in the 13th century created an empire extending from China to eastern Europe. They first appeared on the outskirts of Rus' in 1223, and they invaded and conquered Rus' in 1239–41. Then they set up the state of the Golden Horde in the lower Volga region and for over a century exercised hegemony over Ukraine. (See also *Golden Horde and *Tatars.)

Monkevych, Borys [Monkevyc], b 1895, d 7 February 1971 in Montreal. Captain of the UNR Army. During the revolutionary period he fought at Kruty and then served in the Zaporozhian Corps and was active in the Hetman movement. In the 1920s he emigrated to Germany, where he headed the Col Bolbochan Zaporozhian Society. He wrote a number of books based on his recollections: *Sli-damy novitnykh zaporozhtsiv: Pokhid Bolbochana na Krym* (In the Footsteps of the New Zaporozhians: Bolbochan's Crimean Campaign, 1928; 2nd edn 1956), *Spomyny z 1918 roku* (Recollections from 1918, 1928), and *Chorni Zaporozhtsi: Zymovyi pokhid i ostannia kampaniia Chornnykh Zaporozhtsiv* (The Black Zaporozhians: The Winter March and the Last Campaign of the Black Zaporozhians, 1929).

Monks. See Monasteries and Monasticism.

Monopoly. Exclusive control or ownership of a commodity or service through legal privilege, command of supply, or concerted action, usually for the purpose of controlling prices and thus maximizing profit. A monopoly operates in a given market and can be held by a single private or state enterprise or by an association of enterprises. In the preindustrial period private monopolies were granted by rulers to stimulate trade or the development of some branch of manufacturing in order to guarantee supply, but also to increase state revenues.

In Kievan Rus', the Lithuanian-Ruthenian state, the Polish Commonwealth, and the Hetman state, the respective rulers granted monopolies, such as storage rights, to individual merchants, entrepreneurs, and craftsmen as well as to trading companies, guilds, and local magistrates. In the Polish state the gentry possessed a slew of

monopolies. In different periods state monopolies known as *regalii* operated in mining, hunting, and logging as well as in customs, collecting, minting, and the postal service. The *regalii* were an important source of state revenues at a time when there was no regular taxation system. As the state's expenses grew, new monopolies were introduced: a salt-trade *regaliia*, for example, was introduced in the mid-16th century, which survived in Western Ukraine until 1939. Russian state monopolies were extended to Ukraine by Peter I. In the first half of the 19th century, as trade expanded and competition increased, manufacturing and trading monopolies became obsolete. Nevertheless, a number of the larger cities in Russian-ruled Ukraine held a monopoly on the liquor trade within their limits until 1862.

In its first phase industrial capitalism in Ukraine was competitive, but in the last quarter of the 19th century large private industrial and financial monopolies appeared and grew rapidly. They were associations of companies in the same branch of the economy or in the same territory, known as **cartels* or *syndicates*, and they were controlled mainly by French, Belgian, or German capital. They sprang up, usually, in response to frequent economic crises, which they proposed to control by restraining competition, dividing markets, planning production and prices, consolidating small enterprises, and dissolving unprofitable companies. In some cases the intent was to lower costs and expand production. At first the Russian government encouraged the formation of cartels and syndicates and worked closely with them. After 1910, however, fearing that the syndicates in Ukraine would become foreign-controlled trusts, from which Russian capital would be squeezed out, the state took some measures against them. But such actions were unsuccessful, because French and Belgian banks, and even the French government, which had lent huge sums to the Russian government, interceded on behalf of their shareholders who owned the monopolies in Ukraine.

The first cartel in Ukraine was the **Syndicate of Sugar Manufacturers (1887–95)*, which was revived in 1897 as the All-Russian Society of Sugar Manufacturers. Its head office was in Kiev. In 1890 the government's Metallurgical Committee bought up virtually all the cast iron and rails produced in the Russian Empire. To counteract this monopoly the French bankers of the *Société Générale pour l'Industrie en Russie*, who controlled most of the coal and metallurgical companies in Ukraine, set up two syndicates, the **Prodamet* in 1902 and the **Produgol* in 1904. The first represented about 80 percent of the empire's metallurgical factories, but by 1908 its core membership consisted of plants in Ukraine. Defeating other cartels, it established its control of heavy industry in Ukraine. *Prodamet* was a key player in the **Council of the Conferences of Mining Industrialists in Southern Russia* and prompted it to consolidate and defend the interests of industries in Ukraine against competition from the coal and metallurgical centers in Russia and Poland. *Produgol* represented 60 percent of the mines in the Donbas, the mines owned by French and Belgian shareholders. By 1910 it controlled about 75 percent of the coal and coke production in the Donbas.

A number of local monopolies were established in Ukraine. The Locomotive Union of the Luhanske and Kharkiv plants was formed in 1907. The Urozhai syndi-

cate of farm-machine builders (est 1907) represented 18 companies, which accounted for 72 percent of the farm-machinery output in Ukraine. The Belgian-controlled **Prodarud* syndicate (1908–15) commanded at one time over 80 percent of the ore mined in Kryvyi Rih. Other cartels in Ukraine controlled the markets for tobacco (from 1912), salt (in Odessa and Crimea), and flour (in Odessa, Kherson, Mykolaiv). All shipping in the Black and Azov seas came under the Russian Steam Shipping and Trading Society. The *Med*, *Prodvagon*, *Trubprodazha*, *Gvozd*, *Provoloka*, and *Rockefeller's* petroleum syndicates had an all-Russian status.

The financial monopolies in Ukraine had some distinctive features but were less important than those in Russia, because the shares and obligations of the major industrial companies in Ukraine were usually held by foreigners and their banks, such as *Crédit Lyonnais*, *Banque de Paris et des Pays-Bas*, and the Northern Bank in St Petersburg (fully French-owned). The only large bank centered in Ukraine was the **Azov-Don Bank (est 1871)*, which, although financing grain exports from Ukraine, controlled virtually the entire Ukrainian sugar industry and was an important shareholder in *Prodamet* and *Produgol*. Most of the credit and commercial operations in Ukraine, however, apart from industrial financing, were in the hands of the large Russian banks in St Petersburg. The syndicate of insurance companies that operated in Ukraine was an all-Russian one.

It was characteristic of the development of capitalist monopoly in Ukraine that none of the empire's largest monopolies concentrated there were controlled by Russian capital, but by Western European investors. They competed fiercely with monopolies in Russia and the Kingdom of Poland, and opposed controls and interference in their affairs by the Russian government. Although multinational in origin, the bourgeoisie in Ukraine, which formed territorial conferences and local syndicates and cartels, became increasingly aware of its common territorial interests. Oriented primarily toward Paris and Brussels, it moved gradually closer to the idea of territorial separatism, although it had no direct ties to the Ukrainian national movement.

In the Russian Empire the state had a monopoly on the postal, telegraph, and telephone services and, from 1895, on the liquor trade. The profit margin on liquor sales until 1914 was 78.8 percent. In 1914–22 all trade in spirits was prohibited by law. In 1923 the Soviet government reimposed a state monopoly on liquor.

Although monopolies were far more extensive in Ukraine than in the rest of the Russian Empire, they did not reach the levels prevalent in Western Europe and the United States. No trusts or concerns arose in Ukraine. In 1914 the monopolies were subordinated to the state, because of the war. During 1914 the Russian government set up a number of special councils, state committees, and commissions to control industry. By 1916 all industry and the wholesale trade came under direct state control. The influence of *Prodamet* was reduced virtually to nil, and *Produgol* and *Prodarud* were dissolved completely. In late 1916 and early 1917, state monopolies in the grain trade and then the cloth, leather, sugar, and coal trades were introduced.

In 1918–21 the Bolsheviks extended state monopoly to almost all branches of the economy and nationalized pri-

vate property. During the NEP period most state monopolies, except the prewar ones and those involving foreign trade, were abolished. Even nationalized enterprises competed with one another on the market and geared their production to demand. That was monopolistic competition, however, because they were all bound together in branch and territorial trust syndicates. During the NEP 19 state trusts, representing about 800 large industrial concerns, including Donvuhillia, Pivdenstal, Trudtsukor, Sklosoda, and the Leather Trust, were set up. In December 1929 the trusts and syndicates were stripped of their planning and distribution powers, which were transferred to the central government. Competition between firms was halted. The introduction of central all-Union planning meant the restoration of state monopoly in all branches of production and distribution, although the phrase 'state monopoly' was never used by Soviet economists to refer to the Soviet economy. In contrast to previously known forms of monopoly the Soviet system created by J. Stalin can be called total state monopoly. In it the state planned everything from one center, and set all prices and wages without regard to market demand. There was no competition among enterprises, and they worked not to satisfy demand but to fulfill the state plan. The determination of profit margins and prices in the Soviet economy was also monopolistic.

In Western Ukraine monopolies developed relatively quickly, although industrial monopolies remained underdeveloped. Under the Austrian Empire the railway communications, the tobacco industry, and the salt and liquor trade were state monopolies. Under Poland match production was added as a state monopoly. The development of certain local industries, such as sugar refining, was restrained by Austrian cartels so that competition would be stifled. In the late 1880s most sawmills and the entire lumber export trade were in the hands of two German and one Austrian firm, which continued to dominate the industry under the Polish regime. The petroleum industry was controlled before the First World War by Austrian, British, French, and German concerns, and after the war by Austrian, British, American, and French companies. Under Poland all of the main branches of industry were controlled by cartels. The government made no attempt to restrict the monopolies because they were held by international cartels to which the Polish government was deeply in debt. That state of affairs complicated the industrialization of Western Ukraine, drove down the value of local agricultural output relative to that of the imported industrial products, and impoverished the Ukrainian population. Economic conditions in Transcarpathia were somewhat better.

Months of the year. The Ukrainian names of the months reflect a strong consciousness of natural phenomena. January (*sichen'*) is derived from the verb *sikty*, meaning to cut to pieces, to slash. In a similar vein, February (*liutyi*) can be understood to be 'the angry [or fierce] one.' The next three months derive their names from springlike phenomena: March (*berezen'*) from the sprouting of the birch tree (*bereza*), April (*kviten'*) from the emergence of flowers (*kvity*), and May (*traven'*) from the greening of the grass (*trava*). June (*cherven'*) takes its name from larva (*cherviak*), which commonly attacks trees and orchards at this time of year; July (*lypen'*), from the blossoming of the linden tree (*lypa*); and August (*serpen'*), from the sickle (*serp*) used to harvest grain. A type of fern (*veres*) lent its name to September (*veresen'*), and the yellowing of trees (*zhovtinnia*) and the dropping of leaves (*lystia*), to the names for October (*zhovten'*) and November (*lystopad*) respectively. The name for December (*hruden'*) alludes to the return of winter and frozen lumps of earth (*hrudky*). Many of these names for the months were already in use by Kievan Rus' times, although *cherven'* (June) was used for July and *hruden'* (December) for November. Different names were also given to January (*prosynets'*, derived from winter's rousing from sleep, or *prosynannia*, as the days grew longer), February (*snizhen'*, or 'snowy one'), June (*izok*, after a type of steppe horse), August (*zarev*, the time for hunting deer), and December (*studen'*, noting a period of 'cooling' off, from *studyty* 'to cool').

Montreal. The largest city (1981 pop 980,000; metropolitan pop 1,738,000) in Quebec, near the confluence of the St

St Sophia Ukrainian Orthodox Church in Montreal

Lawrence and Ottawa rivers. It is a major industrial, commercial, and financial center of North America. The Ukrainian population of Montreal numbers approx 13,700 (1981) and is the only significant Ukrainian community in a French-Canadian environment.

Ukrainian residence in Montreal dates from 1904. The community grew slowly before the arrival of the second (interwar) and third (post-Second World War) waves of immigrants. The interwar immigrants from Ukraine had been active in the struggle for independence in 1917–20 and were more politically and nationally conscious than the earlier immigrants. The most important organization formed by them was the Ukrainian National Federation. The postwar immigrants were mostly refugees from Galicia. They formed new Ukrainian institutions and organizations, such as credit unions, a Ukrainian section of Radio Canada, a Ukrainian radio program 'Ukrainskyi chas,' and university courses in Ukrainian literature and language. In 1950 an illustrated bimonthly, *Oko svitu*, and in 1979–86 a trilingual monthly, **Oko*, came out in Montreal.

About 65 percent of the Ukrainian population of Montreal is Ukrainian Catholic, 30 percent Ukrainian Orthodox, and 5 percent Protestant. The first Ukrainian church in Montreal was the Catholic St Michael's, built in 1916. Another six were built later, five of them in the late 1950s and early 1960s. There are also three Orthodox parishes. Most of the churches are located in the areas of highest Ukrainian concentration, such as Rosemont, St-Michel, Montreal North, and St-Leonard. In 1991, 5,580 inhabitants of Montreal claimed Ukrainian as their mother tongue.

Monumenta Ucrainae Historica. A collection of over 2,400 documents of the years 1035–1839 pertaining to the history of the Ukrainian church. The collection was conceived and financed by Metropolitan A. Sheptytsky. The documents were transcribed in the Vatican archives by Rev K. Korolevsky, who deposited a copy of his 15-volume typescript at the Oriental Institute in Rome. The typescript was given to Cardinal Y. Slipy after his release from exile, and the collection was edited by him and finally published in 11 volumes (1964–71, 1974) by the Ukrainian Catholic University. Excluded from the publication are documents that had already appeared in the 16 volumes of series 2, section 3 of *Analecta Ordinis S. Basilii Magni* (1953–4, 1956, 1959–65), edited by Rev A. Velyky. Vol 12 of *Monumenta* has yet to be published. Vols 13 and 14 (1973, 1977) consist of documents, compiled and edited by Rev A. Baran, pertaining to the Ukrainian Catholic church in Transcarpathia from 1771 to 1853 and the question of a Ukrainian patriarchate in the 19th century.

Morachevsky, Pylyp [Moračevs'kyj], b 26 December 1806 in Shestovytsia, Chernihiv county, Chernihiv gubernia, d 26 September 1879. Translator of the Bible into Ukrainian. After graduating in history and philology from Kharkiv University (1823) he worked as a teacher in various towns in Ukraine (Sumy, Lutske, Kamianets-Podilskyi) and then as an inspector for the Nizhen Lyceum (1849–59) in Nizhen; contributed to the first Ukrainian literary miscellany, *Ukrainskii al'manakh*; and translated various books of the Old and New Testaments. In 1860 the Holy Synod of the Russian Orthodox church denied him

permission to publish his first translations. In 1862, having completed the major books of the New Testament (the Gospels and the Acts of the Apostles), Morachevsky appealed to the Russian Imperial Academy of Sciences; it endorsed the quality of his work and agreed that such a translation was necessary, but again the Synod refused to allow him to publish his work. This refusal was followed by the P. *Valuev circular of 1863 and the *Ems Ukase of 1876, which prohibited the publication in Ukrainian of almost all works, including religious texts, in the Russian Empire. Morachevsky's translation remained unpublished until after restrictions on Ukrainian publications were eased following the 1905 revolution. An editorial commission under Bishop P. Levytsky prepared the first texts for publication in 1907–11, and subsequent editions appeared in 1914, 1917, and later. His translation of the Gospels (with minor linguistic corrections) was printed in the Church Slavonic alphabet in Warsaw in the interwar period, to be used as the great altar Gospel in Liturgies. It was republished in Canada (1948) and in the United States (1966). These editions are still used in liturgies by the Ukrainian Orthodox church in the diaspora.

I. Korovytsky

Moraczewski, Wacław, b 27 November 1867 in Warsaw, d 13 September 1950 in Lviv. Polish chemist, physician, and literary critic; husband of S. *Okunevska-Moraczewska. After the First World War he taught at the Veterinary Medicine Academy in Lviv and served as its rector (1926–8). He published over 180 papers on organic chemistry and animal physiology, and also popularized in Polish journals the works of T. Shevchenko, I. Franko, and particularly his friend V. *Stefanyk, 13 of whose stories he translated, and about whom he wrote several articles and memoirs.

Yakiv Moralevych

Moralevych, Yakiv [Moralevyč, Jakiv], b 30 April 1878 in eastern Podilia, d 1 November 1961 in Denver, Colorado. Economist and civic figure. A graduate of the Kamianets-Podilskyi Theological Seminary, he worked as a teacher and then studied at the Psychoneurological Institute in St Petersburg. From 1914 he worked for the Union of Zemstvos and Cities in Kiev and studied at the Kiev Commercial Institute. He was chief accountant for the UNR Ministry of Trade and Industry and, later, director of the ministry's finance department and the economic ministry's general department. An émigré from 1920, he taught commercial subjects in UNR Army internment camps in

Poland and Bohemia and at the Ukrainian Husbandry Academy (1922–35) and Ukrainian Technical and Husbandry Institute (UTHI, 1932–44) in Poděbrady. The academy published his commercial arithmetic (1924), finance (1924), and general accounting (1925) textbooks. He was also active in the League of Ukrainian Nationalists and the co-operative movement in Transcarpathia and became chief comptroller of the OUN in 1929. A postwar refugee in Bavaria, he continued teaching at the UTHI in Regensburg and then emigrated to the United States (1949), where he taught at the Ukrainian Technical Institute (1954–6) in New York.

Danylo Mordovets

Mordovets, Danylo [Mordovec'] (Mordovtsev, Daniil), b 19 December 1830 in Danylivka *sloboda*, now a town in Volgograd oblast, Russia, d 23 June 1905 in Kislovodsk, Stavropol region. Ukrainian and Russian writer, publicist, and historian. He began his literary career with a versified translation of the *Králové Dvůr* manuscript from Czech into Ukrainian. He wrote in Ukrainian the romantic poem 'Kozaky i more' (The Cossacks and the Sea, 1854, pub in *Malorusskii literaturnyi sbornik*, 1859); the historical narratives 'Dzvonar' (The Bell Ringer, 1859), 'Soldatka' (The Soldier's Wife, 1859), and 'Startsi' (The Beggars, 1855, pub 1886), the novels *Dvi doli* (Two Fates) and *Semen Palii* (1882); and other works. His novels in Russian on Ukrainian themes include *Sagaidachnyi* (Sahaidachny, 1882) and *Tsar' i getman* (The Tsar and the Hetman). Mordovets was greatly influenced by his two visits to Ukraine, in 1883 and 1886, and by his acquaintance with T. Shevchenko (he reviewed Shevchenko's *Kobzar* in 1860 and described their meetings in his memoirs *Iz proshlogo i perezhytogo* [From the Past and the Experienced, 1902]) and with M. Drahomanov and M. Kostomarov. The more important of Mordovets's historical works are *Haidamachchyna* (Haidamaka Uprisings, 1870) and a publicistic attack on P. Kulish's views on the historical past of Ukraine, *Za krashanku – pysanka: P.O. Kulishevi (A Pysanka in Exchange for a Krashanka: For P.O. Kulish, 1882)*. Mordovets did a great deal to help Ukrainian writers in St Petersburg publish their works, and he defended Ukrainian theater from the attacks of the Russian press. The fullest edition of Mordovets's works is *Tvory* (Works, 2 vols, 1958).

I. Koshelivets

Mordovia or Mordovian Autonomous Republic. A Finno-Ugric enclave in the RF, covering 26,000 sq km and surrounded by Russian ethnic territory except on the side bordering the Chuvash Autonomous Republic. Its popu-

lation (965,000 in 1989) is composed mostly of Russians (60 percent) and Mordvinians (34 percent).

Mordvinians, an ancient Finno-Ugric ethnic group, were first mentioned under the name 'Mordens' by the Gothic historian Jordanes in the 6th century AD. In the mid-13th century Mordovia fell to the Golden Horde, and in 1552 it was annexed by Ivan the Terrible along with the rest of the Kazan khanate. Under tsarist rule the Mordovians were deprived of political power and cultural self-expression. It was not until 1928 that the Mordovians as a nation received some degree of political recognition. The USSR government set up the Mordovian national okrug. In 1930 it was reorganized into the Mordovian autonomous oblast, and in 1934, into an ASSR. Formally, the Mordovian ASSR has all the attributes of national autonomy, but in reality the Russian majority determines the form and content of its culture. At the Mordovian State University, which has an enrollment of 4,480, most disciplines are taught in Russian. The dominant Soviet newspapers, *Sovetskaiia Mordovia* and *Molodoi leninets*, were published in Russian. Newspapers published in the two Mordovian languages have limited editions.

The first labor camps in the republic originated after the October Revolution. At least eight Gulag camps (Barashevo, Sosnovka, Saransk, Ruzaevka, Lesnoi, Potma, Yavas, and Zubova Polianka) and a prison (Saransk) were located there. Since the Second World War many political prisoners, particularly Ukrainians, have served time in these camps.

J. Borys

Morfill, William, b 17 November 1834 in Maidstone, Kent, d 9 November 1909 in Oxford, England. British Slavist. A graduate of Oxford University, he taught there from 1870 and became the first professor of the Slavic chair in 1900. He visited Lviv and Kiev and corresponded with M. Drahomanov from 1871 to 1895. He was the first British scholar to write about T. Shevchenko, in articles in the *Westminster Review* (1880) and *Macmillan's Magazine* (April 1886). He also reviewed the Ukrainian literary anthology *Vik* (3 vols, 1902) in *Athenaeum* (January 1903), translated several of Shevchenko's poems, and contributed information on Ukrainian literature and folklore to *Encyclopaedia Britannica*.

Morgilevsky, Ippolit [Morgilevskij], b 12 September 1889 in Radovka, Orenburg gubernia, Russia, d 7 December 1942 in Kiev. Architectural historian; corresponding member of the USSR Academy of Architecture from 1941. A graduate of the Kiev Polytechnical Institute (1917), in the 1920s he was a member of the All-Ukrainian Archeological Committee, studied the architectural monuments of medieval Rus' and Caucasia, and lectured at the Kiev Architectural, Civil-Engineering, and State Art institutes. His studies on the St Sophia Cathedral and Chernihiv's Transfiguration Cathedral and Dormition Church were published in VUAN collections on Kiev (1926) and Chernihiv and northern Left-Bank Ukraine (1928).

Morgulis, Naum, b 14 May 1904 in Liatychiv, Podilia gubernia, d 1 September 1976 in Kiev. Physicist; AN URSS (now ANU) corresponding member from 1939. A graduate of the Kiev Institute of People's Education (1926), from 1927 to 1961 he worked at the AN URSS Institute of Physics

in Kiev, and from 1934 he taught at Kiev University. Morgulis made substantial contributions to the understanding of electron emission from various metallic surfaces and investigated (together with P. Marchuk in 1949) the possibilities for direct conversion of thermal into electric energy. His book on the thermoelectronic energy converter (Moscow 1961) has been translated into French and Czech.

Morhun, Fedir, b 12 May 1924 in Novooleksandrivka, Donetske gubernia. Soviet official and Party functionary. After graduating from the Dnipropetrovske Agricultural Institute in 1949, he worked as an agronomist and state-farm director in Poltava oblast. From 1954 he served in oblast Party and state organs in Kazakhstan. In 1965 he moved into the CC CPSU apparat, and in 1969 he was appointed first deputy chairman of the Kirgizian Council of Ministers. In the following year he was elected to the USSR Supreme Soviet. As a member of the CC CPSU and CC CPU from 1976, he was a prominent supporter of M. Gorbachev's policies in Ukraine. He served as the chairman of the USSR State Committee for the Protection of Nature (1987–9). Morhun has written several books on Soviet agriculture.

Morhun, Oleksander, b 5 August 1874 in Velykyi Pereviz, Myrhorod county, Poltava gubernia, d 17 January 1961 in Dornstadt, West Germany. Economist; full member of the Ukrainian Academy of Arts and Sciences. As a law student at Kiev University he was persecuted by the authorities for his political activities. He completed his education in Heidelberg (1900) and returned to Ukraine to work in the Myrhorod county and Poltava gubernia zemstvos. He was particularly active in the co-operative movement, as a member of which he promoted handicraft and cottage industries among the peasantry. After the revolution he continued his involvement in the movement until it was suppressed by J. Stalin, and in the 1930s he taught at the Kharkiv Co-operative Institute. Morhun fled from Ukraine during the Second World War and settled in Germany, where he taught at the Ukrainian Higher School of Economics and the Ukrainian Technical and Husbandry Institute in Munich. He wrote economics articles in various journals, and *Narys istorii promyslovoi kooperatsii Ukrainy* (A Survey of the History of Manufacturing Co-operation in Ukraine, 1966).

Morokhovsky, Yoakym [Moroxovs'kyj, Joakym] (secular name: Illia), b ?, d 1632. Churchman. He studied at the Gregorian College in Rome and then served as secretary to the Polish king Sigismund III Vasa. In 1612 he joined the Basilian order, and in 1613 he was consecrated bishop of Volodymyr-Volynskyy. He worked with Metropolitans I. Potii and Y. Rutsky to extend the Uniate church. Morokhovsky wrote a number of polemical works directed against Orthodoxy, including *Paryhoria* (1612, a response to M. Smotrytsky) and *Dyskurs o poczātku rozerwania cerkwi greckiej od kościoła rzymskiego* (A Discussion on the Origins of the Separation of the Greek Church from the Roman Church, 1622). He also wrote biographies of Y. Kuntsevych and I. Potii.

Moroz, Anatolii, b 30 January 1928 in Zapsillia, Kremenchuk county, Poltava gubernia. Novelist and literary

critic. He graduated from the Faculty of Journalism of Kiev University in 1952. He has been director of the Radianskyi Pysmennyk publishing house and, since 1979, secretary of the board of the Writers' Union of Ukraine. Moroz has written the following novels: *25 storinok odnii liubovi* (25 Pages of One Love, 1960), *Troie i odna* (Three [Men] and One [Woman], 1963), *Chuzha kokhana* (Someone Else's Sweetheart, 1966), *Kioskerka na perekhresty* (The Kiosk Lady at the Crossroads, 1971), *Dovha-dovha khvylyna ...* (A Long, Long Minute, 1974), *Lehke zavdannia* (An Easy Task, 1976), *Tovaryshi* (Comrades, 1978), *Chetvero na shliakhu* (Four on the Road, 1980; awarded the Shevchenko State Prize in 1982), and *Vash poizd o dev'iatii* (Your Train Leaves at Nine, 1984). A three-volume edition of his works appeared in 1987, and V. Marko's book about him was published in 1988.

Moroz, Danylo (pseud: Danylo Kostiantynovych, D. Nedolia, Danylo), b 23 August 1841 in Sakhnivka, Chernihiv gubernia, d 15 January 1894 in Tbilisi, Georgia. Writer. He was a graduate of Kiev University and a member of the Old *Hromada of Kiev. Moroz published an arithmetic textbook for Ukrainian Sunday schools in 1862, the story 'Bezstalanna' (The Hapless Girl, *Osnova*, 1862, no. 10), written in the style of M. Vovchok, the comedy *Buv kin', ta z'izdyosia* (There Was a Horse, but He Was Worn Out by Riding, 1864), and the drama *Nesparavona para* (The Mismatched Pair, 1885). His memoirs appeared in *Kievskaiia starina* (1895, nos 5–6).

Mykhailo Moroz: Self-Portrait (oil)

Moroz, Mykhailo, b 7 July 1904 in Plikhiv, Berezhany county, Galicia, d 27 September 1992 in Staten Island, New York. Painter. He studied at the Novakivsky Art School in Lviv (1923–7) and, with a stipend from Metropolitan A. Sheptytsky, in Paris (1928–30), at the Académie Julien and the Conservatoire national des arts et métiers. After returning to Lviv he worked as O. Novakivsky's assistant and as a portraitist. From 1925 he participated in group exhibitions in Lviv, including those of the Association of Independent Ukrainian Artists. A postwar refugee in Germany, in 1949 he emigrated to New York. Solo exhibitions of his work were held there at the Panoramas Gallery (1959–63) and in Toronto (1964), and his works have been shown in other cities in the United States and Canada and in Munich and Paris. He has painted over 3,000 works – portraits (eg. of Metropolitan A. Sheptytsky and Cardinal Y. Slipy), icons, landscapes, and genre paintings – in a style that has evolved from a calm impressionism to expressionism.

Moroz, Myroslav, b 17 January 1923 in Lviv. Bibliographer and literary scholar. He graduated from Lviv University in 1950 and completed graduate studies in 1963. Moroz was a bibliographer at the Lviv Scientific Library of the AN URSR (now ANU) in 1957–73 and a scholarly associate of the ethnography department at the Lviv branch of the ANU Institute of Fine Arts, Folklore, and Ethnography in 1977–88. He is a specialist in 19th- and 20th-century Ukrainian literature and has written approx 300 works, including bibliographic guides to V. Šchurat (1963), M. Kotsiubynsky (1964), P. Hrabovsky (1964), I. Franko (1966, 1987), M. Vozniak (1968), I. Kotliarevsky (1969), Dante in Ukraine (1970), Lesia Ukrainka (1972), I. Franko's works in the languages of the Soviet peoples (1972), W. Shakespeare in Ukraine (1986), and I. Nechui-Levytsky (1988), and a postsecondary textbook on I. Kotliarevsky (1969). He has prepared chronicles of the life and work of Lesia Ukrainka and Franko, bibliographies of Ukrainian folklore, ethnography, and folk art, and a bibliography of M. Drahomanov.

Valentyn Moroz

Kostiantyn Morozov

Moroz, Valentyn, b 15 April 1936 in Kholoniv, Horokhiv county, Volhynia. Dissident. A graduate in history from Lviv University (1958), he taught in 1964–5 at the Lutske and then the Ivano-Frankivske pedagogical institutes. He was arrested in September 1965 for reading and disseminating samvydav and Western literature and was sentenced in January 1966 to four years in the Vladimir prison near Moscow and in labor camps in the Mordovian ASSR. After being released in September 1969, he was rearrested in June 1970 and sentenced to nine years' imprisonment and five years' exile. In July 1974, while in Vladimir prison, he began a five-month hunger strike to protest his maltreatment. The strike attracted international attention and protests and spawned a vigorous movement for his defense among Ukrainians in the West. In 1976 Moroz was transferred to a Mordovian camp and renounced his Soviet citizenship. As a result of an agreement between the US and USSR governments, he and four other Soviet dissidents were exchanged for two Soviet spies on 27 April 1979 and flown to the United States. Once in the West, Moroz came into conflict with a large part of the Ukrainian community, including his erstwhile nationalist supporters. He resides in Canada, where

he publishes his own magazine, *Anabazys*, and runs his own weekly radio program. In 1992 he was appointed professor and head of the Ukrainian studies department at the Ukrainian Printing Institute in Lviv.

While a prisoner, Moroz wrote a number of hard-hitting, widely disseminated samvydav essays about his persecution and official Soviet crimes, which were smuggled out and published in the West. They include *Reportazh iz zapovidnyka imeny Berii* (1968; trans: *Report from the Beria Reserve*, 1974), *Sered snihiv* (1968; trans: *Among the Snows*, 1971), *Bumerang* (1974; trans: *Boomerang*, 1974), *Esei, lysty i dokumenty* (Essays, Letters, and Documents, 1975), and *Moisei i Datan* (Moses and Dathan, 1978). In the West he published collections of his writings and speeches (1980) and lectures in Ukrainian history (1982).

O. Zinkevych

Moroz, Zakhar, b 12 November 1904 in Nemyriv, Bratslav county, Podilia gubernia, d 29 June 1958 in Kiev. Literary scholar and dramatist. He graduated from the Kharkiv Institute of Professional Education (1930) and the Institute of Red Professors in Moscow (1937). He taught in postsecondary schools in Kharkiv and Kiev and from 1947 to 1958 headed the Department of Pre-Soviet Ukrainian Literature at the Institute of Literature of the AN URSR (now ANU). Moroz published over 30 literary studies (particularly on 19th-century drama), including books on the positive hero in pre-Soviet Ukrainian literature and Lesia Ukrainka's plays (1952). An edition of his collected plays was published in 1959, and books of his selected literary studies appeared in 1961, 1966, and 1971 (2 vols).

Morozenko, Stanyslav (actual surname: Mrozowicki), b ? probably in Spas, Belz voivodeship, d 28 July 1649 in Zbarazh, Galicia. Cossack leader. He studied in Cracow and Padua, and served as a page in the court of Władysław IV Vasa and as a secretary for the Tarnowski, Osoliński (to 1634), and Leszczyński (to 1638) families. Despite his Roman Catholic faith Morozenko espoused a Ukrainian territorial patriotism, and after reportedly serving as colonel of Chyhyryn regiment (from 1638 or 1645) he joined the 1648 uprising led by Hetman B. Khmelnytsky. As colonel of Korsun regiment (August 1648 to April 1649), he (along with M. Kryvonis and I. Hanzha) played a key role in the liberation of Podilia and distinguished himself at the Battle of *Pyliavtsi. He also took part as a cavalry commander in the battle of Zboriv in July 1649, and was killed during the siege of Zbarazh. A historical song emerged about Morozenko and his heroic exploits; it was later embellished with details from the life of Cossack leader Nestor Morozenko (possibly his son; some Soviet sources confuse the two), who was brutally killed by Turkish janissaries after leading an unsuccessful uprising in Sharhorod in 1675.

Moroz-Khodorovsky, Hryhorii. See Khodorovsky, Hryhorii.

Morozov, Kostiantyn, b 3 June 1944 in Brianka, Luhanske oblast. Defense minister of Ukraine. He graduated from the Kharkiv Higher Military Aviation School in 1967 and then served in the Soviet air force. In 1975 he completed a three-year course at the Gagarin Air Force Academy, and in 1984 he graduated from the two-year General Staff Academy. His assignments have included command of an

air regiment, an air division, and an air army. He reached the rank of brigadier general in the Soviet air force. He was in command of the air force of the Kiev Military District when the parliament of Ukraine approved his nomination to be the country's defense minister. In November 1991 he was promoted to the rank of lieutenant general, currently the highest active military rank in the Ukrainian armed forces.

Morozov, Vladimir, b 4 March 1940 in Krasnovodsk, Turkmenia. Canoeist. A graduate of the Kiev Institute of Physical Culture (1971), he was a member of the USSR teams that won Olympic gold medals in the 1,000-m kayak fours (1964, 1972) and pairs (1968), the world championships in the 10,000-m (1966) and 1,000-m (1970–1) kayak fours, and the European championships in the 10,000-m kayak fours (1967) and 1,000-m kayak pairs (1969). He was also the USSR champion in the 500-m (1963, 1965, 1968) and 1,000-m (1964) kayak singles and a member of the teams that won the USSR championships in the 500-m (1967) and 1,000-m (1969) kayak pairs, the 1,000-m (1962, 1964, 1966, 1968–9, 1972) and 10,000-m (1962, 1966, 1971) kayak fours, and the 4 × 500-m relay (1967, 1970).

Liudmyla Morozova: *Portrait of a Girl*

Morozova, Liudmyla, b 6 July 1907 in Kiev. Painter. A graduate of the Kiev State Art Institute (1931), where she studied under M. Kozik and F. Krychevsky, she began exhibiting her works in 1935. A postwar refugee, in 1951 she emigrated to the United States, where she taught at the

Queensboro Art Society. She has painted portraits, landscapes, and still lifes. Solo exhibitions of her work were held in New York, Chicago, Cleveland, Philadelphia, and Washington. Her Hellas collection is on permanent display in her studio in Hunter, New York.

Morozovsky, Noi [Morozovs'kyj, Noj], b 1892 in Oleksandriia, Kherson gubernia, d 14 September 1953 in Kiev. Pulmonary specialist. A graduate of Kiev University (1919), he headed the tuberculosis department of the People's Commissariat of Public Health of the Ukrainian SSR (1920–5). In 1934–53 he worked at the Ukrainian Scientific Research Institute of Tuberculosis in Kiev and chaired a department at the Kiev Institute for the Upgrading of Physicians. In 1940 he was elected president of the Ukrainian Scientific Society of Physicians-Phthisiologists. His publications deal with tuberculosis statistics, epidemiology, and the organization of research on tuberculosis.

Morphology. The part of *grammar dealing with the internal structure of words and their elements (morphemes), inflection (person, tense, and case), and derivation (the formation of new words from existing ones). In the Ukrainian language, morphemes are divided into roots, prefixes, suffixes, and endings. The first three are used in word formation, and the last two are used with words in a sentence. Books on Ukrainian morphology have been written by V. Ilin (prefixes, 1953), M. Ivchenko (numerals, 1955), S. Bevzenko (inflection and word formation, 1960), A. Kolodiazhny (prepositions, 1960), I. Chaplia (adverbs, 1960), I. Kucherenko (1961), I. Matviias (1962), A. Medushevsky (1962), E. Sasynovych (gerunds, 1963), S. Samiilenko (2 vols, 1964, 1970), L. Kots (gerunds, 1964), I. Kernytsky (inflection, 1967), I. Bilodid (ed, 1969), C. Bidwell (1971), M. Zhovtobriukh (ed, 1975), S. Bevzenko, A. Hryshchenko, et al (historical morphology, 1978), H. Arpolenko (numerals, 1980), K. Horodenska (derivation, 1981), M. Hnatiuk (participles, 1982), M. Leonova (morphology textbook, 1983), and O. Bezpoiasko and K. Horodenska (morphemes, 1987).

Morshyn's resort park

Morshyn [Moršyn]. IV-4. A town smt (1990 pop 9,300) on the Berezhnytsia River in Lviv oblast and administered by the Stryi municipal council. It is first mentioned in historical documents in 1482. By the end of the 19th century it was known as a health resort, and in 1948 it was given smt

status. Morshyn has eight sanatoriums and a hospital, which treat diseases of the digestive system, liver, joints, and peripheral nervous system using local mineral waters and peat muds. A research group of the Lviv Geological Association is stationed in Morshyn.

Morska, Mariia [Mors'ka, Marija] (real surname: Pietkevych-Fessing), b 1895 in Ostropol, Novohrad-Volynskyi county, Volhynia gubernia, d 28 November 1932 in Warsaw. Stage actress; wife of O. *Zaharov. She worked in the State Drama Theater (1918–19), the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–20), the Ruska Besida Theater (1921–3), and the Ruthenian Theater of the Prosvita Society (1923–5). She retired from the stage in 1926.

Mortality. See Population.

Mosaic. A method of wall and floor decoration in which small pieces of cut stone, glass (tesserae), and, occasionally, ceramic or other imperishable materials are set into plaster, cement, or waterproof mastic.

The earliest existing examples of mosaics in Ukraine are fragments from the floor of a domestic bath found at the site of the Greek colony of Chersonese Taurica (ca 3rd–2nd century BC). Made of various colored pebbles, the floor depicts two nude figures and decorative motifs.

Mosaic was used to decorate various Rus' churches and palaces in the 10th to 12th centuries, including the Church of the Tithes (989–96), the St Sophia Cathedral (1037 to the late 1040s), the Dormition Cathedral (1078) of the Kievan Cave Monastery, and St Michael's Church (1108–13) of the St Michael's Golden-Domed Monastery. Only fragments of the mosaic floors in the Church of the Tithes have been preserved, and no mosaics from the Dormition Cathedral are extant. St Michael's Church was destroyed in 1934–6, but fragments of its mosaics have been preserved in the Tretyakov Gallery in Moscow or installed in the choir balcony of the *St Sophia Cathedral, which also contains the only in situ extant mosaics from the Kievan Rus' period (260 sq m of 640 sq m of wall space originally decorated). The St Sophia mosaics are made of tesserae of 18 hues in 143 tonal variations and of 25 colors of gold and silver. Because the mosaics show two manners, one strongly reminiscent of the Constantinople school and the other of a local Kievan style, it is likely that the work was carried out by a team of Greek craftsmen with the aid of local masters.

The mosaics of St Michael's Church show the development of a Kievan style that is more dynamic and compositionally less schematic than that of the St Sophia mosaics. In the rendering of the Eucharist in the St Sophia Cathedral the Apostles are uniformly posed and robed in subdued tones. In the St Michael's version of this subject the Apostles are depicted in a variety of more naturalistic poses and garbed in bright colors. The mosaics of St Michael's tend to be linear in style, whereas the St Sophia mosaics are modeled with subtle variations in tone and hue.

Because of high production costs and changing esthetics mosaic was rarely used in large-scale murals after the 13th century. In the 17th, 18th, and 19th centuries it was used as a decorative architectural element.

In 1937 the Mosaics Workshop was formed at the Kiev Art Institute. In keeping with the socialist-realist penchant

large-scale mosaics have been extensively used to adorn numerous public sights. Their style ranges from the pedantic realism of such artists as V. Ovchynnykov (*Mother Nursing Her Child*, on an apartment building in Kiev) and S. Kyrychenko and N. Klein (*Harvest*, 1957) to the stylized joint works of A. Rybachuk and V. Melnychenko (mosaic mural in the Kiev Palace of Pioneers and Schoolchildren, 1965) and E. Kotkov, V. Lamakh, and I. Lytovchenko (*Peace, Work, and Happiness*, in the Boryspil Airport, 1965). Many of the large mosaic murals, particularly on the exteriors of buildings, are made from a variety of materials, including ceramic tiles and pieces of sculpted colored cement.

Emigré artists, such as V. Balias, M. Dmytrenko, and P. Kholodny, Sr and Jr, have employed the mosaic medium on a limited scale. The most notable example of mosaic in Ukrainian émigré art is the neo-Byzantine mural in the St Sophia Cathedral in Rome designed by S. Hordynsky.

N. Mykytyn

The monument in Moscow to Taras Shevchenko (sculptors: Mykhailo Hrytsiuk, Yurii Synkevych, Anatolii Fuzhenko; bronze and granite, 1964)

Moscow (Russian: Moskva). The principal city and capital of Russia and the former USSR. It was founded as the center of a Rus' appanage principality in 1147 by Prince *Yurii Dolgorukii, of Suzdal, and by the 14th century it was the hub of the Great Muscovite Principality and the seat of the Russian Orthodox metropolitan. From 1478 to 1712 Moscow was the center of the unified Russian state. On 12 March 1918 it became the capital of the RSFSR, and on 30 December 1922, the capital of the USSR. Greater Moscow covers an area of 878.7 sq km and had a population of 8,967,000 in 1989. According to the Soviet censuses, 184,900 Ukrainians lived there in 1970, and 252,670 in 1989. In 1970 only 37.2 percent gave Ukrainian as their mother tongue. Unofficial sources estimate that 600,000 to 1 million Ukrainians live in Moscow today.

Ukrainian cultural, educational, religious, and political figures began appearing in Moscow almost immediately

after the dissolution of Kievan Rus' in the late 13th century. Metropolitan *Petro of Kiev and Halych lived and worked in Moscow, and in 1322 he transferred his seat there. In 1389 Metropolitan *Cyprian of Kiev also moved to Moscow and amended church rituals and texts there. In the 14th century Prince Dmytro Bobrok-Volynsky, the son of Koriat-Mykhailo, the Lithuanian prince of Volhynia, married Anna, the sister of Prince Dmitrii Donskoi of Moscow. He distinguished himself as a military leader at the Battle of Kulikovo Pole in 1380 but was killed in 1399 in a clash on the Vorskla River between Vytautas of Lithuania and the Tatar khan Edigei. In 1481 F. Belsky, one of the leaders of a rebellion of Ukrainian princes against Lithuania, fled to Moscow and entered the Muscovite tsar's military service; later he became an influential political figure there. I. *Fedorovych (Fedorov), the first printer in Ukraine, began his publishing activities in Moscow, and from 1586 O. Radyshevsky, a Volhynian printer and binder, worked the state press in Moscow.

In the early 17th century joint Polish and Ukrainian Cossack forces advanced on Moscow numerous times, and in 1610 they captured it and held it briefly. In 1618 Hetman P. Sahaidachny's 20,000-man Cossack army helped Wladyslaw IV Vasa defeat the Russian army near Moscow. In 1620, however, Sahaidachny sent envoys to Moscow to offer Mikhail Fedorovich his services.

In the Cossack Hetman state Moscow exerted political influence until the completion of the new Russian capital of St Petersburg in 1712. In the nonpolitical sphere, however, the reverse was true: the cultural invasion of Moscow by Ukrainians forever altered church life, literature, and education there.

After the *Pereiaslav Treaty of 1654 political relations between Ukraine and Muscovy changed. In 1653 Otaman K. Bulai had been sent to Moscow on a reconnaissance mission, and the treaty was signed there in March 1654. Col A. Zhdanovych of Kiev traveled to Moscow on a diplomatic mission in 1654, after the treaty was signed, and P. Zabala journeyed there several times in 1654-5 as Acting Hetman I. Zolotareno's envoy, and in 1665 with Hetman I. Briukhovetsky, the first head of the Cossack state to travel to Moscow to petition the tsar. General Quartermaster F. Korobka was sent to Moscow as envoy of Hetmans B. and Yu. Khmelnytsky and I. Vyhovsky. Later the tsars frequently summoned hetmans (eg, I. Mazepa) to Moscow.

As Ukraine's autonomy was eroded, Moscow became a place of exile and even imprisonment of its political leaders. I. Krekhovetsky, the general judge under Hetman P. Teteria, was captured in 1665 by Muscovite forces and exiled to Moscow. Hetman P. *Doroshenko was ordered deported from Ukraine by the tsar and was forced to live in Moscow in 1677-9. After the defeat of Hetman Mazepa many Cossack officers fell into disfavor and were forced to live in Moscow (eg, H. *Hertsyk, I. *Charnysh, I. *Maksymovych, and V. *Zhurakovsky). Others (eg, D. Horlenko) moved there of their own accord.

The *Kievan Mohyla College (later Academy) played a significant role in the development of Muscovite education and church life. In 1649 the college sent Ye. *Slavynetsky and A. *Koretsky-Satanovsky, and later, D. Pytsky, to Moscow. Slavynetsky worked there as a translator, pedagogue, and lexicographer for 26 years. He founded the first Greco-Latin school in Moscow in 1653

and served as its principal. After the Pereiaslav Treaty increasing numbers of Ukrainians visited or moved to Moscow. Usually they resided in the 'Little Russian quarter,' known as the Maloroseika, the main street of which is now named after B. Khmelnytsky.

In the late 17th century seven monasteries in Moscow were headed by Ukrainians and Belarusians. Ukrainians exerted considerable influence on the city's cultural development and were instrumental in implementing Patriarch Nikon's church reform. In 1665 S. *Polotsky, a graduate of the Mohyla College, initiated a Slavonic-Greco-Latin Academy in Moscow modeled on the Kievan college. H. *Dometsky, who was in constant theological conflict with the Russian church authorities, served as an archimandrite in Moscow.

Under Peter I Ukrainian cultural figures continued to be exiled to Moscow or were invited there or moved there to advance their careers. S. *Yavorsky and T. *Prokopovych moved there and helped Peter to attract other scholars and church figures to Moscow. In his capacity as exarch Yavorsky instructed Metropolitan V. Yasynsky of Kiev to have the Kievan academy send its professors A. Hoskevych, M. Kansky, R. Krasnopolsky, O. Sokolovsky, A. Stresovsky, and Y. Turoboisky to Moscow. Kievan scholars often took senior students along in order to provide a good example for Muscovite students. According to S. Smirnov, between 1701 and 1763, 95 professors of the Kievan academy (18 of 21 rectors and 23 of 25 prefects) transferred to the Moscow academy. Ukrainians who were prominent at the Moscow academy included T. Lopatynsky, I. *Kulchytsky, H. Buzhynsky, G. Vyshnevsky (rector in 1722-8), V. Liashchevsky (rector in 1752-4; author of a Greek grammar used in all theological seminaries in Russia), Ya. Blonytsky (author of a Greek-Slavonic and a Slavonic-Greek-Latin dictionary), A. *Mohyliansky, S. Kalynovsky, and H. *Shcherbatsky.

From the mid-18th century the number of Ukrainian professors in Moscow decreased because of the rise of native scholars and because Catherine II discouraged Ukrainians from traveling to Moscow. Ukrainian scholars who studied or worked in Moscow include the historians M. *Bantysh-Kamensky, Ya. *Markovych, and M. Zahorovsky (author of a topographic description of Khar'kov vicegerency, 1787); the jurist S. *Desnytsky; the philosopher S. *Hamaliia; the medical practitioners I. *Andriievsky, H. Mokrenets (lecturer at the Medical Surgical School from 1787 and chief surgeon at the Moscow hospital in 1790-1800), P. Pohoretsky (a graduate of the Kievan academy who taught at the Moscow Medical Surgical School and developed Russian medical terminology), I. *Rutsky, and Y. Tykhonovych; the architects A. *Melen'sky, M. Mostsepanov, and I. *Zarudny; the engraver M. *Karnovsky; the sculptor I. *Martos; the painter A. *Mokrytsky; and the conductors and composers Y. *Zahvoisky, M. *Dyletsky, A. *Vedel, and H. *Rachynsky.

Ukrainian cultural influence troubled Muscovite conservative circles, particularly the clergy, who suppressed Ukrainian publications imported by Ukrainian chumaks and sought to eliminate Ukrainian influences in church, music, rites, and homiletics. Extreme prejudice gave rise to the practice of forcing Ukrainian priests and monks in Muscovy to be rebaptized. Ukrainians were readily invited to work in Moscow, but any manifestation of Ukrainian influence was staunchly opposed. In the late 18th and

early 19th centuries attitudes changed, and Ukrainian folk songs, legends, and themes introduced by Ukrainian writers and artists (eg, V. Narezhny and N. Gogol) became popular among the Muscovite intelligentsia.

In the 19th century, after the decline of the Kiev academy, many Ukrainians studied at Moscow University and other Muscovite schools. Many later remained there as scholars, bureaucrats, economists, cultural figures, and administrators. In the early 19th century Ukrainians in the city created their own organizations, and Moscow became an important Ukrainian political center. From the 1820s Ukrainian works (eg, H. *Kvitka-Osnovianenko's *Malorossiiskie povesti* [Little Russian Novelettes]) were published there. Notable Ukrainians who worked in Moscow included the historians O. *Bodiansky, M. *Maksymovych, M. *Markevych, V. *Ploshchansky, Yu. *Venelin, and D. *Yavornytsky; the philologists V. *Maslov, A. *Krymsky, and M. *Storozhenko; the pedagogue I. *Derkachov; the journalist and archeologist O. *Hattsek; V. *Maslov; the economist I. *Myklashevsky; the scientists A. *Prokopovych-Antonsky and V. *Vernadsky; the folklorist M. *Yanchuk; the philosopher P. *Yurkevych; and the art historian O. *Novytsky.

Many Ukrainian actors and singers worked in Moscow's theaters and opera houses, and over 200 worked and performed with the Moscow philharmonic orchestra and at the conservatory. The more outstanding performers included I. Butenko (operatic bass, 1852–7), M. *Shchepkin, S. *Hulak-Artemovskyy, M. *Donets, M. *Deisha-Sionytska, P. *Tsesevych, I. *Alchevsky, O. Stepanova (a soloist at the Bolshoi Theater in 1912–44), and the composer P. *Senytsia.

Ukrainian organizational activity in Moscow was initiated by students (see *Students, postsecondary) at Moscow University. They were supported by the Ukrainian professors there. The number of Ukrainian students in the city grew steadily, and by 1908 the 250-member Ukrainian Student Hromada in Moscow was the largest student organization in the city. In the years 1810–60 an average of 15 to 20 Ukrainian students annually studied in Moscow; most had private stipends. In the 1860s the annual number of students rose, to reach 63 in 1865. In the late 1850s the first *zemliatstva*, associations uniting students from the same region, were organized with the aim of providing mutual assistance and promoting cultural activity. From 1859 to 1866 the Ukrainian Student Hromada operated clandestinely and had its own underground library. Its leaders included I. Derkach, P. Kapnist (grandson of V. Kapnist), M. Lazarevsky, I. Rohovych (a privatdocent at Moscow University from 1872), V. Rodzianko, M. Shuhurov, I. Sylych, and F. Volkhovskyy. The organization was uncovered and liquidated because of its 'separatist' tendencies, and its 52 members were blackballed as 'unreliable.' The hromada was re-established only in 1898 (by V. *Doroshenko, among others), and it continued to meet secretly until 1905, when it became a legal organization. In 1912 it was headed by M. *Kovalevsky. Each year Ukrainian students gathered to commemorate T. Shevchenko.

In the early 20th century, particularly after the Revolution of 1905, Ukrainian life in Moscow became more dynamic and political. During the period of the so-called Stolypin reaction many members of the Ukrainian intelligentsia avoided persecution in Ukraine by fleeing to Moscow. In the early 1910s there were 18,000 Ukrainians in the

city. In 1909 Alchevsky, Donets, S. Khvostov, H. Kozlovskyy, N. Nezhdanov, and others organized the Ukrainian Music and Drama Hromada, which was later registered as the Kobzar circle. It was headed by Khvostov and Alchevsky. During the First World War it was banned by the tsarist regime.

Ukrainian scholars in Moscow belonged to the Society of Slavic Culture, led by F. *Korsh, and constituted a Ukrainian section therein. Among its members were B. *Kistiakovskyy, V. Khvostov, S. *Petliura, V. *Picheta, O. *Salikovskyy, and M. Yanchuk.

The public commemoration of the 50th anniversary of Shevchenko's death in 1911, organized by a committee headed by S. Khvostov, was a major event for the Ukrainian community in Moscow. It was significant because such commemorations were prohibited in Kiev and elsewhere in Russian-ruled Ukraine. Events included an exhibition of Shevchenko's art organized by Novytsky at the Moscow School of Painting, Sculpture, and Architecture; an official gathering at Moscow University, at which F. Korsh, A. Krymsky, Novytsky, and V. Picheta spoke; a celebration at the literary and art club, with speeches by Korsh and L. Yanovska; and performances of excerpts from Shevchenko's play *Nazar Stodolia* and M. Arkas's opera *Kateryna*. Materials from and about the celebrations were published as a collection in Moscow in 1912. Preparations for the celebration of Shevchenko's centenary in 1914 were begun but were called off after such commemorations were banned in Ukraine.

During the revolutionary upheaval in Moscow in 1906, the first Ukrainian illustrated weekly in the Russian Empire, *Zoria, was established. Ukrainian journalists living in Moscow also contributed to the Russian press: K. Danylenko (*Russkoe slovo*), A. Bondarenko and H. Kozlovskyy (*Stolichnaia molva*), O. Salikovskyy (*Russkiiia vedomosti*), V. Hiliarovskyy, M. Levytsky, and V. Panchenko. In 1912–17 the monthly journal *Ukrainskaia zhizn' was published in Moscow in Russian to inform society in the Russian Empire about the Ukrainian question. Edited by Petliura and Salikovskyy, it was the unofficial organ of the Moscow branch (est 1907) of the clandestine *Society of Ukrainian Progressives. Two volumes of *Ukrains'kyi naukovi zbirnyk*, three collections of M. *Filiansky's poetry, and a collection of plays were also published in Moscow in that period. During the First World War L. Solohub and V. *Vynnychenko edited the weekly *Promin' (1916–7) in Moscow, and Ukrainian political life there revolved around *Ukrainskaia zhizn'* and *Promin'*.

During the February Revolution of 1917 Ukrainians in Moscow issued a joint declaration of the Union of Ukrainian Federalists, the Moscow Committee of Ukrainian Socialists, the editorial boards of *Ukrainskaia zhizn'* and *Promin'*, and the Ukrainian section of the Society of Slavic Culture. The declaration demanded the introduction of Ukrainian government institutions, courts, and schools in Ukraine and of the territorial organization of the armed forces. In late May 1917 a Ukrainian Council was founded in Moscow, consisting of Salikovskyy (chairman), A. Khrutskyy, A. *Pavliuk, and A. *Prykhodko. In the April 1917 elections to the Ukrainian Central Rada M. *Shrah and P. Sikora were elected as delegates from Moscow.

In March 1918 Moscow became the capital of Soviet Russia. That year the first two CP(B)U congresses were held there, and the Hetman government sent a delegation to

Moscow in an attempt to normalize relations with the Soviet state and appointed A. Kryvtsov its consul general there. In early 1919 the UNR Directory sent a diplomatic mission headed by S. Mazurenko to Moscow to negotiate, unsuccessfully, with the Soviet government.

Under Soviet rule Moscow once again became the center of an empire, where all political, economic, and cultural power was concentrated. Thereafter all essential decisions concerning Soviet Ukraine were made in Moscow, and the various official representations of the Ukrainian SSR in Moscow served the interests of Russian imperialism. Until the end of 1922 the Ukrainian SSR had a diplomatic mission in Moscow. Thereafter a Soviet Ukrainian permanent representation was based there.

In the 1920s the Ukrainian community in Moscow continued its cultural activity. The Ukrainian Shevchenko Club organized literary readings, debates, and Shevchenko jubilees in which thousands participated.

In 1924 an association of Ukrainian writers, *Selo i Mist* (SIM), with branches throughout the RSFSR, was established in Moscow. Headed by V. *Gadzinsky, K. *Burevii, and H. *Koliada, SIM also ran a publishing house that issued works by Gadzinsky, Koliada, and A. Harasevych, a two-volume edition of Shevchenko's works, and the journal *Neolif*. SIM was liquidated in 1927.

Under Soviet rule many Ukrainians continued to study and work in the 'imperial' capital. They included literary scholars, such as M. Alekseev (a member of the USSR Academy of Sciences who headed the council on Ukrainian literature of the USSR Writers' Union), S. Bohuslavsky (a professor at Moscow University), M. Gudzii, M. *Parkhomenko, M. *Zozulia, and O. Deich, who lived in Moscow from 1925 to 1972, published works there on I. Franko, M. Kulish, Lesia Ukrainka, and Shevchenko, and helped persecuted Ukrainian literary figures, such as M. Rylsky, I. Drach, and L. *Taniuk. Other scholars included the neuropathologist Ye. Benderovych, the soil scientist K. *Gedroits, the translator I. Karabutenko (secretary of the council on Ukrainian literature of the Writers' Union from 1950 to 1985), the metallurgist H. Kashchenko, the chemist V. *Kistiakovsky, the musicologist and ethnographer K. *Kvitka, the economist P. *Liashchenko, and the geologist V. *Luchytsky.

In 1924–34 the *Moscow Ukrainian Theater of the RSFSR was active in Moscow under the direction of H. Behicheva, a former assistant at the Berezhil theater in Kharkiv. In 1933 L. *Kurbas worked briefly at the Jewish Theater in Moscow before his arrest. Many graduates of Ukrainian conservatories and theater schools have worked at the Bolshoi Theater in Moscow. They include V. Borysenko, O. Byshevska (from 1934), O. Holoborodko, A. *Ivanov, S. Korkoshko, I. *Kozlovsky, I. and L. Maslennykov, M. *Mykysha, Ye. Nesterenko, B. *Rudenko, and A. Shpiller. The famous director A. Tairov was born in Roman, and studied at Kiev University. He founded the Chamber Theater in Moscow and staged plays there by Ukrainian playwrights, such as O. Korniiichuk, M. Kulish, L. Pervomaisky, and Yu. Yanovsky, including the premiere of Kulish's *Patetychna Sonata* (Sonata Pathétique) in 1931.

During the Stalinist period many Ukrainian community, cultural, scholarly, and artistic figures fled from repression in Ukraine or were exiled to Moscow. A few survived the terror, among them S. Buniak, A. Chuzhy (a futurist poet), and Yu. Illina, all of whom continue to write and are

published in Ukrainian in Moscow, and I. Stadniuk, the author of *Liudi ne angely* (People Are Not Angels, 1962), a Russian-language novel about the famine in Ukraine.

During the Second World War the writers O. *Dovzhenko, Korniiichuk, A. Malysko, Rylsky, Yu. Smolych, V. Sosiura, and P. Tychyna lived in Moscow, and Ukrvydav, a publisher of materials in Ukrainian destined for the front, functioned there. In 1940 the *Ukrainskaia Kniga* bookstore was opened in Moscow's Arbat district; many readings by Ukrainian writers have been held there.

From 1936 official 10-day festivals of Ukrainian art and literature were held in Moscow. Reduced to single-day events in the 1970s, they served as vehicles of propaganda promoting the fiction of the 'flowering' of Ukrainian literature and praising Russian-Ukrainian friendship. Standardized commemorations of Ukrainian writers, such as Franko, Lesia Ukrainka, Shevchenko, and H. Skovoroda, were also held.

The postwar Ukrainian theater directors Taniuk and R. Viktiuk have worked in Moscow. Forced to work there were the film directors Dovzhenko (he is buried in Moscow) and I. Savchenko. The Ukrainian-born director S. *Bondarchuk made his career in Moscow and still lives there. Postwar Ukrainian writers who have studied in Moscow include L. Kostenko, P. Movchan, H. Tiutiunnyk, I. Drach, M. Vinhranovsky, and L. Cherevatenko.

In the 1960s the Ukrainian community in Moscow became more active. Ukrainian students there began holding independent Shevchenko celebrations and gatherings, at which they sang Ukrainian songs and read proscribed literary works. They were aided in their efforts by the writer and former political prisoner M. Kutynsky (1890–1974), who compiled a 2,000-page biographical dictionary of 7,000 Ukrainian historical and cultural figures (serialized in the journal *Dnipro* since 1990).

In the last few years of Soviet rule under M. Gorbachev, the Ukrainian community was reactivated. Demonstrations supporting the lifting of the ban on the Ukrainian Catholic and Ukrainian Autocephalous Orthodox churches were held there. In 1988 the Ukrainian community leaders E. Deich, S. Hnidina, O. Ivanchenko, V. Liubun, I. Movchan, I. Shyshov, and A. Siry established the Slavutych Society of Friends of Ukrainian Culture, headed by the former cosmonaut P. *Popovych and L. Taniuk, and organized a Ukrainian library. A Ukrainian Youth Club was also established within the local Komsomol, led by V. Martyniuk and P. Zhovnerenko. In 1989 the Ukrainian Helsinki Association (now Ukrainian Republican party) established an active branch in Moscow, represented by A. Dotsenko, O. Horbatiuk, and M. Muratov; the Society for the Support of the Popular Movement of Ukraine (Rukh) was also founded, headed by Ye. Siary; and an independent journal, *Ukrainskii vopros*, edited by S. Matsko, began appearing. Throughout the Gorbachev period the Ukrainian poet V. *Korotych was editor of the popular Moscow magazine *Ogonëk* and in that capacity was instrumental in promoting glasnost and perestroika throughout the USSR.

Ukrainian landmarks in Moscow include a monument to Shevchenko erected in 1964 (sculptors, A. Fuzhenko, M. Hrytsiuk, and Yu. Synkevych), the Shevchenko Library, the Lesia Ukrainka Library, and the building of the Permanent Representation of the Ukrainian SSR.

Moscow Articles of 1665 (Moskovski statii). An agreement between Hetman I. Briukhovetsky and the Muscovite government signed in Moscow on 11 October 1665. It superseded the Baturyn Articles of 1663. Negotiations were conducted in conditions unfavorable to Briukhovetsky and his government. They were totally dependent on Muscovy because of a belligerent Poland, a discordant Cossack *starshyna*, and a restive population. Briukhovetsky was forced to accept Muscovite demands, which essentially obliterated the sovereignty of the Hetman state and handed all military, administrative, and fiscal power there over to the Muscovite military governors, with the exception that the Cossacks maintained their autonomy as a social estate. The articles increased the number of Muscovite troops stationed in Ukraine and obliged the people to feed and maintain them. Muscovite garrisons and military governors were to be stationed in all major Left-Bank Ukrainian towns (Chernihiv, Pereiaslav, Nizhen, Poltava, Kremenchuk, Novhorod-Siverskyi, Oster) and in Kiev, Kaniv, and even Kodak, in the Zaporizhia. Taxes were to be collected from the people (except Cossacks) by Muscovite administrators and deposited in the tsar's treasury. In accordance with the articles a property census of the non-Cossack population in Left-Bank Ukraine was conducted in 1666, and the Ukrainian Orthodox church was subordinated to the Patriarch of Moscow. The implementation of the agreement aroused widespread dissatisfaction in Ukraine and was one of the catalysts of the revolt against the Muscovite garrisons and the subsequent murder of Briukhovetsky.

O. Ohloblyn

Moscow Ukrainian Theater of the RSFSR (Ukrainskyi teatr RRFSSR). Established as the Ukrainian Theater of Musical Drama in Moscow in 1924, with L. Savinin, D. Oleksienko, and H. Brahin as the directors. In its repertoire were the works of Ukrainian classical and contemporary playwrights, including I. Kotliarevsky, S. Hulak-Artemovsky, M. Starytsky, M. Kropyvnytsky, and O. Korniiichuk. In 1932 it was united with the *Moscow Ukrainian Theater-Studio under its current name. It was active until 1934.

Moscow Ukrainian Theater-Studio (Ukrainska teatralna studiia im. L. Kurbasa). The studio was initiated in

1928 by K. *Burevii and the Society of Friends of Ukrainian Theater in Moscow. L. Kurbas sent V. Inkizhinov from Berezil to work with the studio. Its repertoire consisted of P. Mérimée's short plays from *Le Théâtre de Clara Gazul*, H. Kosynka's *Rodychi* (The Relatives, an adaptation of his story 'Polityka' [Politics]), and the pantomime *Do i pislia* (Before and After) to the music of F. Liszt. In 1932 it was incorporated into the *Moscow Ukrainian Theater of the RSFSR.

Leonid Mosendz

Kostiantyn Moshchenko

Mosendz, Leonid (pseud: Osyp Liaskovets, Rostyslav Berladnyk), b 20 September 1897 in Mohyliv-Podilskyi, Podilia gubernia, d 13 October 1948 in Blonay, Switzerland. Writer. He studied at the teachers' seminary in Vinnytsia (1911-15) and worked as a teacher in Hnivan (1918-20). A demobilized UNR Army soldier, he fled to Poland in 1920. He returned to Lutske in 1921, whereupon he was arrested by the Poles and sent to an internment camp in Kalisz. After his release he studied chemical engineering at the Ukrainian Husbandry Academy (1923-8) in Poděbrady. There he translated a Czech inorganic chemistry textbook (1924) with M. Vikul, contributed to the student periodicals *Podiebradka* and *Students'kyi visnyk*, worked as an assistant to V. Ivanys, and wrote a brochure in Czech about Ukraine. After two years of graduate studies in Brno he received a doctorate from the academy in 1931 and worked as a civil engineer in Bratislava. In 1937-9 he taught in a commercial school in Sevlush, Transcarpathia. From 1939 to 1945 he was a chemist in Bratislava, whence he fled to the British zone in Austria. He died in a Swiss tuberculosis sanatorium.

From the late 1920s Mosendz contributed poetry, prose, literary criticism, and book reviews to the journals *Literaturno-naukovyi vistnyk*, *Vistnyk*, *Samostiina Ukraïna*, and *Proboiem*. He wrote the drama in verse *Vichnyi korabel'* (The Eternal Ship, 1933); the narrative poems *Kaniflershtan* (from the German *Kann nicht verstehen*, 1945) and *Volyns'kyi rik* (A Volhynian Year, 1948); the poetry collections *Zodiak* (Zodiac, 1941) and *Dyabolichni paraboly* (Diabolic Parabolas, 1947, together with Yu. *Klen under the collective pseud Porfyrii Horotak); the autobiographical novellette *Zasiv* (The Sowing, 1936, 1941, 1946); the story collections *Liudyna pokirna* (*Homo lenis*, 1937, 1951), *Vidplata* (Retribution, 1939), and *Pomsta* (Revenge, 1941); and the posthumously published unfinished novel *Ostannii prorok* (The Last Prophet, 1960). He also translated English (eg, E.A. Poe), French, German, and other literary works into

Ukrainian. The principal themes of Mosendz's works, including his publicistic pamphlets about the Prussian statesman Baron K. Stein (1935) and M. Khvylovy (1948), derive from his well-developed sense of Ukrainian patriotism.

R. Senkus

Moshchenko, Kostiantyn [Moščenko, Kostjantyn], b 1876 in the Kharkiv region, d 16 September 1963 in Dornstadt, West Germany. Ethnographer and museologist. After graduating in architecture from the St Petersburg Academy of Arts (1903) he worked on the construction of V. Krychevsky's zemstvo building in Poltava and then turned to collecting applied folk art and studying folk architecture. He worked at the Kiev Historical Museum (1904–7) and then headed the historical-ethnographic section of the Poltava Museum (1907–25) and the painting department of the Kievan Cave Monastery Museum (1926–30). He was arrested and exiled in 1933–7. During the Second World War he emigrated to Germany. He designed house plans based on the folk architecture of the Poltava area and wrote studies of rural architecture in the Kamianets-Podilskyi region (1927) and of H. Galagan's building (1962).

Moshchych, Petro [Moščyč], b 27 April 1928 in Volosate, Lisko county, Galicia. Pediatrician. A graduate of the medical faculty of Uzhhorod University (1952), he joined the department of clinical pediatrics at the Kiev Medical Institute in 1956 and became department head in 1971. In 1973 he was appointed chief pediatrician of the Ministry of Health of the Ukrainian SSR. His works deal with rheumatism, tuberculosis, meningitis, chronic tonsillitis, dysentery, and viral hepatitis.

Mosienko, William (Bill) [Mosijenko], b 2 November 1921 in Winnipeg. Professional hockey player. During 14 seasons in the National Hockey League (NHL) with the Chicago Black Hawks (1941–55), Mosienko played in 711 regular season games, scored 259 goals, and earned 281 assists. In 22 play-off games he recorded 10 goals and 4 assists. He is best known for scoring 3 goals in 21 seconds against the New York Rangers on 21 March 1952, still an NHL record. In the 1944–5 season he won the Lady Byng Trophy as the most sportsmanlike player. He was voted into the NHL Hall of Fame in 1965.

Mosin, Oleksander, b 16 October 1871 in Shestirnia, Kherson county, d 9 September 1929 in Kiev. Opera singer (tenor). A graduate of the Moscow Conservatory (1897), he sang in St Petersburg (1903–5, 1910–16), in Kiev (1905–8), at the Bolshoi Theater in Moscow (1908–10), and in Tbilisi (1923–5). He was a soloist at the Kharkiv (1925–6) and Kiev (1926–9) theaters of opera and ballet and at the same time sang with the Odessa opera. His main roles were Hermann in P. Tchaikovsky's *Queen of Spades*, Vakula in N. Rimsky-Korsakov's *Christmas Eve*, Othello in G. Verdi's *Othello*, and Mykola in M. Lysenko's *Christmas Night*.

Moskal, Robert [Moskal'], b 24 October 1937 in Carnegie, Pennsylvania. Catholic bishop. He studied at St Basil's Seminary in Stamford, Connecticut, and the Catholic University of America in Washington (MA, 1963). He was ordained in 1963, and consecrated auxiliary bishop of

Bishop Robert Moskal

Philadelphia in 1981. In 1983 he was assigned to the newly created eparchy of Parma, Ohio. Moskal has been active in community life, and he heads the Providence Association of Ukrainian Catholics in America.

Moskalenko, Artem, b 2 November 1901 in Hryhorivka, Oleksandrivske county, Katerynoslav gubernia, d 23 October 1990 in Odessa. Linguist and pedagogue. A graduate of the Dnipropetrovske Institute of People's Education (1926), from 1939 he chaired Odessa University's department of Ukrainian language, served as dean of the Faculty of Philology, and also taught at the Odessa Pedagogical Institute and the Odessa Higher Party School. He published nearly 200 works, including a Ukrainian language course conspectus (1929); postsecondary textbooks on Ukrainian historical grammar (1941, 1951), modern phonetics (1947), sentence syntax (1959), historical phonetics (1960), orthography (1971), and historical lexicology (1972); histories of the Ukrainian language (1948), alphabet and orthography (1958), pre-Soviet dialectology (1961), Soviet dialectology (1962), and orthography in the Soviet period (1968); a chrestomathy in the history of the Ukrainian literary language (1954); a dialectal dictionary of Odessa oblast (1958); and a survey history of Ukrainian lexicography (1961). He also prepared several dialectological questionnaires, compiled two issues of a chrestomathy of Ukrainian dialects in Odessa oblast (1965–6), organized several dialectological conferences in Odessa and many dialectological field trips, and prepared bibliographies of Ukrainian dialectology (1966) and orthography (1971), the history of the standardization of the Ukrainian literary language (1974), and lexicology and lexicography (1973).

R. Senkus

Moskalenko, Kyrilo, b 11 May 1902 in Hryshyne, Bakhmut county, Katerynoslav gubernia. Marshal of the Soviet Union. He joined the Red Army in 1920. After graduating from the Dzerzhinsky Artillery Academy (1939) he fought in the Finnish-Soviet War. In the Second World War he commanded the 38th, 1st Tank, and 40th armies. After the war he was in charge of the Moscow Military District (1948–60) and then served as commander of strategic missile forces (1960–2), deputy defense minister, and chief inspector of the defense ministry (1962–83).

Moskalenko, Nadiia, b 20 June 1928 in Dnipropetrovske. Linguist; daughter of A. Moskalenko. After graduat-

ing from Odessa University in 1952, she continued her studies at the Kiev Pedagogical Institute (candidate's diss, 1956) and lectured there (1958–60). She taught Ukrainian language at Odessa (1960–85) and Bordeaux (1976–8) universities. She has written a monograph on the history of Ukrainian grammatical terminology (1959) and on the history of Ukrainian punctuation terminology (1959), and articles on stylistics and syntax.

Moskovets, Semen [Moskovec'], b 16 January 1900 in Sanzharivka (now Poltavka), Oleksandrivske county, Katerynoslav gubernia, d 24 September 1971 in Kiev. Virologist; corresponding member of the AN URSR (now ANU) from 1967. A graduate of Kiev University (1929), he worked in Azerbaidzhan (1934–52) and Kherson (1952–60) before becoming department head (1960–2) and director (1962–71) of the ANU Institute of Microbiology and Virology in Kiev. His major research was on viral diseases of agricultural plants (esp cottons), their antigens, and their cellular interaction.

Moskvofily. See Russophiles.

Mosler, Anselm, b ca 1871 in eastern Galicia, d 31 January 1917 in Zakopane, Nowy Targ county, western Galicia. Jewish socialist figure. As a gymnasium student in Stanyslaviv he established ties with the socialist underground in Kiev and helped to smuggle illegal propaganda from Galicia to Russian-ruled Ukraine. He was arrested by the tsarist authorities in 1896, imprisoned for two and a half years in Kiev, and then expelled from the country. After graduating from Vienna University (1900) he practiced law in Buchach and (from 1909) Monastyriska and became a leading member of the left wing of the Polish Social Democratic Party of Galicia (until 1905) and Jewish Social Democratic Party of Galicia (from 1905). He collaborated with members of the Ukrainian Social Democratic party and published the Polish-Ukrainian monthly *Stuzba Dworska* (1905) for agricultural workers in Galicia. He took part in the campaign for electoral reforms and for the election of Ukrainian representatives to the Austrian parliament in 1907, supported the *Bund and the Social Democracy of the Kingdom of Poland and Lithuania, and assisted in M. *Sichynsky's escape from prison in 1911.

Mospyne. VI-19, DB IV-4. A city (1990 pop 13,400) on the Hruzka River in Donetsk oblast. It was founded in 1800 and given city status in 1938, at which time its name was changed from Makhorivka. It is administered by the council of Proletaskyi raion of Donetsk. Its chief enterprises are a coal mine and an enrichment plant.

Mossakovsky, Volodymyr [Mossakovs'kyj], b 27 August 1919 in Melitopol, Tavriia gubernia. Mechanics scientist; full member of the AN URSR (now ANU) since 1972. He studied and taught at Dnipropetrovske University and served as rector there (1964–86). His main contributions are in the areas of elasticity theory and the mechanics of membranes.

Mossakovsky, Yevhen [Mossakovs'kyj, Jevhen], b 24 February 1839 in Borovychi, Lutske county, Volhynia gubernia, d ? Political activist. He graduated from the Volhynian Theological Seminary in 1859 and entered Kiev University. While in Kiev, he became involved in the con-

spiratorial *Kharkiv-Kiev Secret Society, helped organize Sunday schools, and disseminated the works of T. Shevchenko and other proscribed literature. In November 1861 he was arrested for his illegal activities at the Kiev Military School, where he resided and taught. In June 1861, after months of interrogation, he was tried and exiled to Kharkiv, where he was placed under strict police surveillance. He completed his studies at Kharkiv University in 1865 and prepared a full collection of Shevchenko's works, but its publication was not allowed. Nothing else is known about Mossakovsky, except that he wrote an unpublished comparative study of the works of Shevchenko, A. Pushkin, and A. Mickiewicz and worked as an assistant to a state comptroller in Zhytomyr (1865–7) and Kiev (1867–83).

Mostovshchyna. See *Sharvarok*.

Mostovych, Mykola [Mostovyč], b 1915 in Volhynia, d 19 January 1968 near Shelbyville, Kentucky. Physicist, metallurgist, and political activist. He studied at Lviv University. From 1934 he served as the OUN Home Executive's leader in Volhynia and, later, the Kholm region. After two years in Polish prisons (1937–9), he organized Ukrainian schools in the Kholm region and headed the Ukrainian Relief Committee in Kholm (1940–1). He was arrested by the Gestapo in 1941, and was imprisoned in concentration camps until 1945. As a postwar émigré he received a PH D at the Sorbonne and was a research associate of its institute of physics (1947–53) and a member of the Shevchenko Scientific Society. After emigrating to the United States in 1953 he worked as a metallurgist, developed several patents, and was a professor of physics at the University of Louisville (1958–68). He died in an automobile accident.

Mostva River. See Lva River.

Mostyska [Mostys'ka]. IV-4. A town (1990 pop 7,900) on the Sichna River and a raion center in Lviv oblast. It is first mentioned in a historical document in 1244. In 1404 it was granted the rights of *Magdeburg law, and in 1498 and 1524 it was destroyed by the Tatars and Turks. During the Cossack-Polish War of 1648–57 it was captured by the Cossacks, and its castle used as a Cossack stronghold. Under Austrian rule the town flourished as a county administrative and trade center. Today its chief enterprise is a plant of the Elektron Manufacturing Consortium.

Moszyński, Kazimierz, b 5 March 1887 in Warsaw, d 30 March 1959 in Cracow. Polish ethnographer and linguist; member of the Polish Academy of Sciences and the Shevchenko Scientific Society. After studying biology in Switzerland and Cracow, he served as a tutor and collected ethnographic material in the Bila Tserkva region. In 1913 he published a series of articles on Ukraine in *Ziemia*, and in 1914 a study of the folk rituals, beliefs, and stories in the Berezhany region. As a professor of Cracow (1926–34) and Vilnius (1935–9) universities, in 1932 he organized, with F. Kolessa, an expedition to collect folk songs. His chief work, *Kultura ludowa Słowian* (The Folk Culture of the Slavs, 2 vols, 1929, 1939), contains much Ukrainian material.

Motor vehicle transport. One of the basic modes of surface transportation of people or cargo, by means of buses or trucks. It is organized into intracity, intercity, subur-

Truck and bus transportation: basic indexes, 1940-86

ban, and international networks. Motor vehicles serve industrial enterprises, commercial organizations, and the general public.

Motor vehicle transport dates back to the turn of the century. Before 1913 the Russian Empire, including Ukraine, had approx 9,000 vehicles, most of which were personal cars or taxis. At the time, the empire had only 24,300 km of paved highways. Its tiny trucking sector carried approx 10 million metric t of freight, or 5 percent of the freight total. There was no bus service. Motor vehicle transportation as an industry developed during the Soviet period. Most of its growth occurred only after the Second World War.

By function, motor vehicle transport is divided into two branches: freight transport, to carry goods, and passenger transport, to carry people. Motor vehicles have significant advantages over trains: they are more accessible and flexible, and their service is cheaper and direct.

Trucks are able to transport almost all goods, but in the USSR their chief role was to transport farm products from the source to the processing plants, warehouses, and stores.

Ukraine is well suited for surface transportation. Most

of its territory consists of plains with gently rolling hills. The Carpathian and Crimean mountains are not particularly difficult to penetrate. The operational potential of the sector depends on the quantity and quality of highways, subsidiary lines, paved accesses to industrial enterprises, maintenance and repair shops, service stations, and personnel. Ukraine's highway network is underdeveloped in comparison with other parts of the USSR (see *Roads and highways).

The output of motor vehicles in Ukraine, in tonne kilometers (Tkm) and passenger kilometers (Pkm), is approx 15 percent and 19 percent of the all-Union output respectively. The share of motor freight in Ukrainian freight traffic is fairly low (9 percent), but the share of motor passenger traffic in passenger traffic is almost 52 percent (see the table). With the exception of beltways around major cities, all Ukrainian highways are two-lane. In the last two decades the growth of the highway network in Ukraine has been rapid but uneven.

The performance of freight and passenger transport would be much higher if the network were denser in certain regions, or if the distribution of activities and the mo-

bility of inhabitants were proportional to the level of economic development.

Three- and four-axle trucks equipped with heavy-duty tires are used widely. Recently the truck/bus productivity has increased significantly because of the greater mechanization of the operation and better servicing and maintenance of the vehicles. Loading and unloading have also become more mechanized with the introduction of powerful modern cranes. Workers are better trained to increase productivity, and more advanced techniques and computers are used in planning traffic flow and setting timetables.

The productivity of a truck (in Tkm) has increased by approx 17 percent from 1975 to 1990, and the cost of production per unit of time increased by only 3.2 percent. However, the coefficient of trucks in use relative to the whole fleet of trucks was still relatively low (67 percent), and the coefficient of an 'effective' use was even lower (approx 60 percent). That means that the rate of 'empty runs,' the number of breakdowns on the road, the time lost in repairs, and the number of other technical lapses, such as lack of fuel, were still much too high by European standards. Ukraine's truck productivity was well above the USSR average (approx 132 percent with respect to tonnage and 102 percent with respect to Tkm per year).

Between 1940 and 1986 the growth of passenger traffic was astronomical: output in Pkm grew by a factor of 313, whereas the volume of passengers grew by a factor of 280. Nevertheless, supply has lagged far behind demand in that sector.

By 1983, 449 Ukrainian cities had a regular bus service besides the older modes of public transport, such as by streetcar and trolley. From 1970 to 1983 passenger output grew by 6.9 percent annually, and volume grew by 4.8 percent annually (see the table). Although not high by Western standards, the growth was higher than the USSR averages. At the same time the average trip distance and mobility increased.

Compared with that of the Baltic republics Ukraine's intercity traffic was particularly low with respect to the finding of new opportunities and the more efficient use of existing potential. In 1975 Ukraine produced 59,900 Pkm per worker compared to Baltic region's 67,800 Pkm. The difference represents the magnitude of Ukraine's relative immobility. Capital investment in the sector in Ukraine was more in line with that in the Baltic region, but the use-coefficient of the physical plant was only 71.1 percent in 1983, close to the former Soviet Union average and much below the Baltic figure. The implication is that in Ukraine physical plant was more obsolete or tied up in repairs longer, since the labor component (6.3 percent of the total labor force) was similar to or even higher than the Union average.

Motor vehicle transport came under a special republican ministry. Such jurisdiction should have insured better traffic distribution and passenger flow, but since capital outlays were determined in Moscow, the effect of local autonomy was minimal.

The major shortcoming of Ukrainian truck/bus transportation lies not in the international branches but in the rural traffic. It lacks an adequate network, uses outdated buses and inept personnel, and provides too few runs.

Ukraine has its own truck-building industry: the KrAZ-256 is built in Kremenchuk, and the LuAZ-969M in Lutske. The bus-building factory in Lviv builds the

LAZ695, LAZ697E, and LAZ-699A. The Komunar factory in Zaporizhia and its subsidiary in Lutske build the ZAZ-968 car and the Tavriia. The Ukrainian motor fleet consists also of Russian-built trucks, buses, and personal cars, the Hungarian Icarus buses, and Czechoslovak and Polish trucks.

E. Bej

Motovylyvka. A village and railway station near Khvastiv, Kiev oblast, where on 18 October 1918 the Sich Riflemen defeated the Hetman forces. The decisive victory sparked a popular uprising against the *Hetman government and led to Hetman P. Skoropadsky's downfall.

Motronynskiy Trinity Monastery (Motronynskiy troitskiy manastyr; also St Matrona's Monastery). A monastery near Chyhyryn, in Motronynskiy forest, founded sometime before 1568. In the 17th and 18th centuries it was a center of Orthodox life in the southern Kiev region. During the tenure of Hegumen M. *Znachko-Yavorsky (1763-8), it was a center of preparations for the *Koliivshchyna rebellion; Maksym *Zalizniak lived there. The baroque stone Trinity Church (built in 1800-4; depicted in an 1845 watercolor by T. Shevchenko) is still standing. In 1910 the monastery housed 9 monks and 23 novices; it was closed by the Soviet authorities in the 1920s.

Motyl, Alexander [Motyl', Oleksander], b 21 October 1953 in New York. Political scientist. After graduating from Columbia University (PHD, 1984) he joined its political science department. As a student he was editor of the political journal *New Directions* (1972-5). In 1988-92 he served as director of the Nationality and Siberian Studies Program at the Harriman Institute and then as the institute's associate director. He is the author of *The Turn to the Right: The Ideological Origins and Development of Ukrainian Nationalism, 1919-1929* (1980), *Will the Non-Russians Rebel? State, Ethnicity, and Stability in the USSR* (1987), *Sovietology, Rationality, Nationality: Coming to Grips with Nationalism in the USSR* (1990), and *The Dilemmas of Independence: Ukraine and the Politics of Post-Totalitarianism* (1992) and the editor of *Thinking Theoretically about Soviet Nationalities: History and Comparison in the Study of the USSR* (1992) and *The Post-Soviet Nations: Perspectives on the Demise of the USSR* (1992).

Mountain ash (*Sorbus*; Ukrainian: *horobyna, riabyna*). A deciduous tree or shrub of the Rosaceae family. Ash grows wild in northern Ukrainian forests, and domesticated species are cultivated as ornamentals in the south and Transcarpathia. The European mountain ash (*S. aucuparia*) has smooth gray bark, white flowers, and tart red fruit that contains 4-18 percent sugar, carotene, vitamin C, and organic acids. The fruits are used in the preparation of marmalade, preserves, aperitifs, and vinegar. The Old World service tree (*S. torminalis*; Ukrainian: *bereka*) grows in the Carpathian Mountains. It has a hard, fine-grained wood excellent for the manufacturing of furniture. Suitable for planting as a protective antierosion measure, it is also used as an ornamental tree. In the Crimea another species named service tree (*S. domestica*) is cultivated in orchards.

Mountain Brigade of the Ukrainian Galician Army (Persha hirska brygada UHA). Formed out of the Saryi Sambir and Liutovyska groups in January 1919 by Maj V. Chersky, the brigade established its headquarters in Tur-

ka and became part of the Third Corps. During the Polish offensive in May 1919, it was cut off from other UHA units and retreated across the border into Czechoslovakia. The Czechs disarmed it and sent it to *Deutsch-Gabel for internment. The Galician government failed to win its release. The brigade remained in POW camps until 1926, when it was dissolved. Its commanders in the camps were Lt Col V. Fedorovych, Col A. Varyvoda, Brig Gen V. Kurmanovych, and Brig Gen A. Wolf.

Bohdan Yatsiv and the Ukrainian flag at the top of Mont Blanc, 1947

Mountaineering (*alpinizm*). Mountain climbing in Ukraine assumed an organized form only after the First World War. Before then, the peaks of the Caucasus and Pamir mountains were tackled by individual climbers. M. Pogrebetsky led several Ukrainian expeditions into the Tien Shan Mountains (1926–36) that conquered a number of peaks for the first time. In the latter half of the 1930s, Kiev, Dnipropetrovske, and Kharkiv mountaineers organized camps in the Caucasus, and in 1938 the Committee on Physical Culture and Sports of the Ukrainian SSR opened the first mountain-climbing school in Adir-Su. By the end of 1939 it had graduated 528 climbers, including 143 instructors. The USSR Mountaineering Federation (est 1936) has held Union-wide competitions since 1949. Ukrainian teams consisting of climbers such as A. Kustovsky, V. Monogarov, M. Oleksiuk, V. Cherevko, B. Syvtsov, and V. Svyrydenko placed first in various categories in 1961, 1965–9, 1972, and 1973. In the Western European Alps and the North American Rockies, mountain climbing has been practiced by members of the Plast Ukrainian Youth Association, especially the 'Burlaky' group, two members of which (B. Yatsiv and I. Sukhovskyy) were the first Ukrainians successfully to climb Mont Blanc (1 September 1947) and the Matterhorn (1948). In 1982 M. Turkevych and S. Bershov were the first Ukrainians to conquer Mount Everest and the first climbers ever to reach the summit at night. In May 1991 V. Pastukh, I. Sverhun, and S. Makarov hoisted the blue-yellow Ukrainian flag on Mount Manaslu, one of the highest Himalayan peaks.

Mousterian culture. The final phase of the Lower Paleolithic period, lasting from approx 100,000 BC to 40,000 BC.

Named after Le Moustier, a rock shelter discovered in France, it follows the *Acheulean culture and precedes the Upper Paleolithic Aurignacian culture. The use of stone tools, particularly primitive knives and scrapers, dominated this period. Major technological developments included the discovery of the means of starting fires and the use of bones and antlers for making tools. Food was obtained through hunting (mammoths, cave bears, rhinoceroses, aurochs, and other animals) and gathering. Mousterian man usually lived in caves or makeshift shelters in river valleys. Although archeological evidence is not conclusive, it appears that a matriarchal social order and a rudimentary religious consciousness may have been developing during this period. Mousterian culture sites in Ukraine include Molodove, Kiik-Koba, Starosilia, and Shaitan-Koba. (See also *Paleolithic Period.)

Mova, Denys (real surname: Petrov), b ? in Berdianske, Tavriia gubernia, d 1922 in Odessa. Stage actor, director, and singer (tenor). He completed study at the St Petersburg Conservatory and worked in the troupes of M. Starytsky and M. Kropyvnytsky (1885–9), M. Sadovsky (1889–90 and 1893–5), and P. Saksahansky (1890–3 and 1895–1909). He briefly led his own troupe in 1909 and then abandoned the stage because of illness.

Vasyl Mova

Mova, Vasyl (pseuds: Vasyl Lymansky, Myhutsky, Myhuchenko), b 13 January 1842 at a *khutir* near the Cossack village of Starodereviankiivska, Kuban, d 13 June 1891 in Katerynodar (now Krasnodar), Kuban. Writer. After graduating from Kharkiv University (1867) he worked in Katerynodar as a teacher, court investigator, and, later, justice of the peace. Because of the critical social content of his writings Mova suffered tsarist persecution. To avoid further harassment he chose to live in Ust-Labinsk and Yeisk in the years 1876–85. In 1886 he returned to Katerynodar.

One of Mova's earliest poems appeared in the St Petersburg Ukrainian journal *Osnova* (1861, no. 4). During his lifetime he published fewer than 15 poems on social themes, most of them after 1880 in the Lviv periodicals *Svit* and *Zoria* because publishing in Ukrainian was forbidden in the Russian Empire. His narrative poem 'Na stepy' (To the Steppes, 1883) is the first literary depiction of the plight of Ukrainian settlers in the Kuban. Mova's posthumously dramatized novel *Stare hnizdo i molodi ptakhy* (*Dramatychni obrazy*) (An Old Nest and Young Birds [Dramatic Images], 1907) masterfully portrays the tragedy of denationalization and social and moral degradation among the descendants of the Kuban Cossacks in the

1850s. Mova appears to have been influenced by T. Shevchenko and P. Kulish but is more than their epigone. At a time when ethnographic realism and Romantic idealizations of the Cossacks dominated in Ukrainian literature, he presented sober, critical (yet patriotic) views of the past and present in a unique style marked by macabre, grotesque exaggerations and a novel, expressive poetic lexicon combining folkloric and vernacular elements and daring neologisms. He can be considered the precursor of expressionism in Ukrainian literature. Mova left behind 50 manuscript notebooks of poetry, prose, and drama. The vast majority of his works were never published and have been lost. A bowdlerized edition of his poems appeared in Kiev in 1965. A complete edition of his previously published prose, poetry, and letters was edited by G.Y. Shevelov and published in Munich in 1967.

R. Senkus

Movchan, Borys [Movčan], b 9 January 1928 in Makiivka, Nizhen okruha. Scientist in the fields of metallurgy and the physics of metals; full member of the AN URSR (now ANU) since 1978. He graduated from Kiev University (1951) and worked at the AN URSR Institute of Electric Welding. His main contributions have been in the areas of crystal structure in alloys, the crystallinity of alloys, vacuum condensation, the electron-beam evaporation of metals and other materials, and the etching of metals.

Julian Movchan

Bishop Hryhorii Mozolevsky

Movchan, Julian [Movčan, Julijan], b 19 February 1913 in Zorokiv, Zhytomyr county, Volhynia gubernia. Physician and journalist. After working on several factory newspapers in Kharkiv, he studied medicine at the Kharkiv and Lviv medical institutes (MD, 1943). A postwar refugee in Germany, he emigrated to the United States and went into private practice there. He has contributed numerous articles on public and political issues and medical questions to the Ukrainian press in the United States and Canada and wrote a popular medical handbook (1946), the book of political commentary and recollections *Shcho varto b znaty* (Things Worth Knowing, 1966), the autobiographical collection *Zapysky likaria* (Doctor's Notes, 1970), and *Zbirka opovidan'* (A Collection of Short Stories, 1988).

Movchan, Pavlo [Movčan], b 13 July 1939 in Velyka Vilshanka, Vasylkiv raion, Kiev oblast. Poet, translator,

and screenwriter. He graduated from Moscow's Gorky Institute of Literature (1965) and the Higher Screenwriting and Directing Courses there (1970). In recent years he has been a leading member of the Ukrainian Language Society, and since 1990 he has been a member of the Ukrainian parliament. One of the most popular poets in Ukraine in the 1980s, Movchan is the author of the collections *Nate!* (Take It! 1963), *Kora* (Bark, 1968), *Letiuche derevo* (Flying Tree, 1972), *Zelo* (Herb, 1973), *Pam'iat'* (Memory, 1977), *Dosvid* (Experience, 1980), *Kruhovorot* (Whirl, 1981), *V den' molodoho sontsia* (On the Day of the Young Sun, 1981), *Zholud'* (Acorn, 1983), *Kalendar* (Calendar, 1985), *Svitlo* (Light, 1986), and *Porih* (Threshold, 1988). A large edition of his selected poems, *Sil'* (Salt), was published in 1989.

Movchan, Vasyi [Movčan, Vasyi'], b 14 January 1903 in Nemorozh, near Zvenyhorodka, Kiev gubernia, d 2 July 1964 in Kiev. Ichthyologist; corresponding member of the AN URSR (now ANU) from 1951 and the All-Union Academy of Agricultural Sciences from 1955. A graduate of the Kiev Veterinary-Zootechnical Institute (1929), he was director of the Scientific Research Institute of Pond Fisheries in Kiev (1930–41), a professor at Kiev University (from 1945), director of the ANU Institute of Zoology laboratory (1946–9), and a department head in the ANU Institute of Hydrobiology. He proposed an effective method of intensified inland fish-stocking.

Movchan, Yehor [Movčan, Jehor], b 1 May 1898 in Velyka Pysarivka, Bohodukhiv county, Kharkiv gubernia, d 22 March 1968 in Kiev. Kobzar. Blind at 10 months and orphaned by the age of five, he studied with the kobzar S. Pasiuha, and then set off on his own in 1913. His prerevolutionary repertoire included all major dumas and historical songs, notably 'Nevil'nyts'kyi plach' (The Captives' Lament), 'Duma about the Widow and Her Three Sons,' and 'Duma about the Three Brothers of Samara,' as well as songs to the words of T. Shevchenko. Under Soviet rule he began composing pseudo-folkloric dumas and songs in honor of contemporary leaders and Soviet holidays. He frequently performed on radio and television.

Movchun, Petro [Movčun], b 6 September 1925 in Bilychi (now part of Kiev). Sculptor. A graduate of the Kiev State Art Institute (1950), where he studied under M. Lyсенko, he has done sculptural portraits of T. Shevchenko (1962) and I. Franko (1964) and a number of monuments, including ones to T. Shevchenko in Nova Odessa (1967) and Zolotonosha (1976) and to Marko Vovchok in Nemyriv (1971). His favorite medium is marble.

Movoznavstvo (Linguistics). A nonperiodical journal published in Kiev from 1934 to 1939 (14 issues) by the AN URSR Institute of Linguistics. Its editors were N. *Kahanovych (until 1937) and M. Kalynovych. *Movoznavstvo* was an instrument of the Party: it published articles denouncing linguists-purists (S. Smerechynsky, O. Kurylo, D. Sheludko), rejecting the terminological dictionaries of the Institute of Ukrainian Scientific Language, and attacking I. Ohienko's *Ridna mova*. New terminological material appearing in the journal was edited to promote Russification, and M. Marr's Japhetic theories on language were applied to Ukrainian. Yet some articles on word formation, the dialects of the Chernihiv, Kiev, and eastern Podilia regions, and particularly L. *Bulakhovsky's studies on

accentology have made important contributions to linguistics.

From 1941 to 1963 a similar nonperiodical journal, *Movoznavstvo: Naukovi zapysky*, was published by the Institute of Linguistics. The editors were L. Bulakhovsky (until 1961, 16 issues) and I. *Bilodid (1962–3, nos 17–18). After Bulakhovsky's death the journal reverted to a predominantly political-propagandistic character.

Since January 1967, a new *Movoznavstvo* has been published bimonthly by the ANU Division of Literature, Languages, and Fine Arts in Kiev. Its editors have been I. Bilodid (1967–82), V. Rusanivsky (1982–8), and O. Melnychuk (1988–).

J. Hursky

Mozalevsky, Ivan [Mozalevs'kyj], b 24 September 1890 in Wroclaw, Poland, d ? Graphic artist. He graduated from the Kiev Art School (1912) and audited classes at the St Petersburg Academy of Arts (1914–15). From 1920 he lived abroad, in Vienna, Berlin, Prague, where he taught graphic art at the Ukrainian Studio of Plastic Arts (1923–9), and Paris. In 1947 he returned to Ukraine and settled in Symferopil. His specialty was book graphics, but he also engraved portraits (eg, of C. Baudelaire and I. Repin) and other subjects; designed bookplates, Ukrainian currency, stamps, and government documents; and carved miniatures in ivory. A catalog of one of his exhibitions was published in 1963.

Mozart, Franz Xaver, b 26 July 1791 in Vienna, d 29 July 1844 in Karlovy Vary, Bohemia. Austrian composer, pianist, and conductor; son of W.A. Mozart. He lived in Lviv in 1808–19 and 1822–38 as a private music instructor. His efforts in establishing the St Cecilia Society and Choir (1826) and an institute of singing contributed greatly to the quality of musical instruction in the city. He toured Kiev and Zhytomyr as a pianist in 1819, and composed a number of piano pieces based on Ukrainian folk songs.

Mozolevsky, Hryhorii [Mozolevs'kyj, Hryhorij], b 1876 in the Chernihiv region, d 1938? Orthodox bishop. Before 1917 he taught religion in various secondary schools in the Chernihiv region. In 1924 he was consecrated bishop of the Ukrainian Autocephalous Orthodox church for the Konotip region. In 1926–7 he was a parish priest in Radomyshl, and later in Spask. He was arrested by the NKVD in 1936, and his subsequent fate is unknown.

Mozyr. 1-10. A city (1989 pop 101,000) on the Prypiat River and a raion center in Homel oblast, Belarus. It is on the border of Ukrainian ethnic territory. In the 12th century Mozyr was part of Kievan Rus' and, later, of the Grand Duchy of Lithuania. In the 17th century it belonged to the Hetman state. In 1793 it became a county center in Minsk gubernia. In 1918–20 Mozyr was included in the territory claimed by the UNR.

Mozyra, Lukian (Mozyria, Mazurenko), b ?, d 1652. Cossack officer. As colonel of Korsun regiment he took part in battles at Korsun (1648), Zboriv (1649), and Berestechko (1651) and undertook diplomatic missions to Poland (1648) and Moscow (1651). His dissatisfaction with the Treaty of *Bila Tserkva (1651) led him to conspire with M. *Hladky against Hetman B. Khmelnytsky, for which he was executed.

Mriia (Dream). The largest transport plane in the world. Designed at the Antonov Design Bureau near Kiev, the six-engine model AN-225 has a maximum 600-tonne take-off payload and can carry 250 t of cargo over 4,000 km at an airspeed of 800 km/hr. The first large airplane to be given a Ukrainian name, the Mriia made its first test flight on 21 December 1988. It has since then been used to transport heavy cargo and in airlifts of food and medical aid from North America to victims of the explosion at the Chernobyl Atomic Power Station.

Mstyslav Danylovych, b ?, d ca 1290–1308. Volhynian prince; son of King *Danylo Romanovych. After Danylo's death he inherited Volodymyr-Volynskiy. In 1288 he succeeded his cousin, Volodymyr Vasylykovich, as prince of the Volodymyr-Volynskiy, Lutske, and Berestia lands. He took an active part in Polish conflicts and helped Konrad I of Mazovia to regain the Sandomierz land.

Mstyslav Gospel (Mstyslavove yevanheliie). One of the most important medieval paleographic monuments. The manuscript was written in Kiev, probably in 1115–17, at the request of Prince Mstyslav Volodymyrovych of Kiev, by Oleksa, the son of Presbyter Lazar of the Novgorod Church of the Annunciation. It is preserved at the State Historical Museum in Moscow. The text was published by P. Simoni in St Petersburg in 1905–10 and by L. Zhukovskaia in 1983. Its language was analyzed by E. Karsky in *Russkii filologicheskii vestnik*, 34 (1895).

Mstyslav Hlibovych, b ?, d ca 1239. Prince of Chernihiv. After his cousin, *Mykhail Vsevolodovych, became grand prince of Kiev in 1235, Mstyslav succeeded him in Chernihiv. Mstyslav was the first Ukrainian prince to confront directly the Mongol-Tatar army during Batu Khan's invasion. After the rout of Mstyslav's army in October 1239, Chernihiv was sacked by the Tatars, and Mstyslav fled to Hungary.

Mstyslav Iziaslavych, b ?, d 19 August 1170 in Volodymyr-Volynskiy. Grand prince of Kiev from 1167; son of *Iziaslav Mstyslavych and father of *Roman Mstyslavych. During his father's reign in Kiev, Mstyslav ruled Pereiaslav from 1151 and Volodymyr-Volynskiy from 1154. Together with his father he fought against the *Olhovych princes of Chernihiv and his granduncle, *Yurii Dolgorukii. Yurii's ally, Yaroslav Osmomysl, routed Mstyslav's army at Terebovlia in 1151. In 1152 Mstyslav twice defeated invading Cuman armies. In 1160 he gained control of Kiev and placed his uncle, *Rostyslav Mstyslavych of Smolensk, on the Kievan throne. After Rostyslav's death in 1167, Mstyslav succeeded him in Kiev. Like his great-grandfather, Volodymyr Monomakh, Mstyslav drew together the forces of all the Ukrainian princes against the Cumans, and defeated them at the Orel River in 1168. He struggled against the princes of Vladimir-Suzdal for supreme rule in Rus'. In 1169 he failed to repulse the attack on Kiev by Dolgorukii's son, *Andrei Bogoliubskii, and fled to Volhynia. Shortly before his death he briefly recaptured Kiev but was forced to retreat to Volhynia. Mstyslav was buried in Volodymyr-Volynskiy's Dormition Cathedral, which he had built in 1160.

Mstyslav Mstyslavych, known as the Successful (*Udatnyi*), b before 1176, d 1228 in Torcheske, in the Kiev land. Senior Rus' prince; grandson of *Rostyslav Mstyslavych. He ruled Trypilia (1193–1203), Torcheske (1203–7, 1227–8), Toropets (1207–8), and the lands of Novgorod (1208–15, 1216–18) and Halych (1219–27). In 1193 and 1203 he waged successful campaigns against the Cumans. In 1212 he and his cousin, *Mstyslav Romanovych, drove *Vsevolod Sviatoslavych Chermny from Kiev. From 1219 he battled Hungarian and Polish princes to gain control of the Halych land. In 1221, with the help of the Cuman khan *Kotian (his father-in-law) and Mstyslav Romanovych, he defeated a Polish-Hungarian army and finally captured Halych. Both Mstyslavs organized the large military expedition of the southern Rus' princes against the Tatars that ended in the debacle at the Kalka River and the death of nine princes in June 1223. Later, with the help of his son-in-law *Danylo Romanovych of Volhynia (husband of his daughter Anna), Mstyslav fought against Hungarian encroachments in Galicia and with various Galician boyars. Nevertheless he gave Peremyshl to his son-in-law Andrew, the son of Andrew II of Hungary, and bequeathed Halych to him.

Mstyslav Romanovych, known as the Good and the Old, b ?, d 6 June 1223. Grand prince of Kiev from 1212; grandson of *Rostyslav Mstyslavych and nephew of *Riuryk Rostyslavych. Until 1212 he was prince of Pskov, Drutske, Bilhorod, and the Smolensk land (1197–1212). In 1212 he and his cousin, *Mstyslav Mstyslavych, drove *Vsevolod Sviatoslavych Chermny from Kiev, and soon afterward Mstyslav Romanovych became prince of Kiev. Both Mstyslavs organized the large 1223 expedition of southern Rus' princes against the Tatars that ended in the debacle at the Kalka River. Mstyslav Romanovych and his two sons-in-law were captured and crushed to death beneath a platform on which the Tatars held their victory banquet.

Mstyslav Volodymyrovych (Christian name: Konstantyn), known as the Fair (*Krasnyi*) and the Brave, b ?, d 1034 or 1036 in Chernihiv. First prince of *Tmutorokan principality from 988 and prince of *Chernihiv principality from 1024; son of *Volodymyr the Great and half-brother of *Yaroslav the Wise, *Sviatopolk I, and *Saints Borys and Hlib. Mstyslav received Tmutorokan as a fiefdom from his father in 988. He waged successful wars against the *Khazars (1016) and the Kasogians (he killed the Kasogian khan Rededia in a duel in 1022). Mstyslav opposed the attempt of Yaroslav the Wise to gain supreme rule of Rus'. He tried to take Kiev in 1023, took Chernihiv, and defeated Yaroslav's army in the 1024 Battle of Lystven near Chernihiv. Thereafter Mstyslav ruled all of Left-Bank Ukraine except Pereiaslav principality, which remained in Yaroslav's hands, and from 1026 the two brothers lived in harmony. In 1029 Yaroslav's forces took part in Mstyslav's offensive against the *Yasians, and in 1031 Mstyslav helped Yaroslav to regain the *Cherven towns from Poland. During Mstyslav's reign a stone cathedral in Tmutorokan and the Cathedral of the *Transfiguration in Chernihiv, in which he was buried, were built.

Mstyslav I Volodymyrovych (Christian name: Havryil), known as the Great, b 5 June 1076 in Turiv, d 20 April

1132 in Kiev. Grand prince of Kiev from 1125; eldest son of *Volodymyr Monomakh and *Gytha, daughter of Harold II of England; brother of *Yaropolk II Volodymyrovych, *Viacheslav Volodymyrovych, and *Yurii Dolgorukii. As prince of Novgorod (1088–93, 1095–1117) and Rostov and Smolensk (1093–5) Mstyslav took part in the 1093, 1107, and 1111 Rus' campaigns against the Cumans. He drove his godfather, *Oleh Sviatoslavych, out of Murom, Rostov, and Suzdal in 1096 and forced him to attend the *Liubech congress of princes in 1097. From 1117 to 1125 Mstyslav was prince of Bilhorod, near Kiev, and coruled his father's realm. After Monomakh's death in May 1125, he ascended the Kievan throne. With the help of his six sons (among them *Iziaslav, *Rostyslav, and *Volodymyr Mstyslavych), his brothers, and his cousins he controlled virtually all of Kievan Rus'. He subdued the rebellious Polatsk princes in 1128 and gave Polatsk principality to Iziaslav, pushed the Cumans beyond the Volga and the Don rivers in 1129, defeated the Lithuanians in 1130 and 1131, and had his sons restore dominion over the Chud in 1131. Continuing the Riurykide tradition of dynastic ties he married as his first wife Kristina, the daughter of King Ingi of Sweden. He gave his daughter Malfrid in marriage to King Sigurd I of Norway, his daughter Ingeborg to the Danish duke Knud Lavard, and his daughter Iryna Dobrodeia to the Byzantine prince (later emperor) Andronicus Comnenus. After Mstyslav's death his daughter Yevfrosyniia married the Hungarian king Géza II.

Mud volcano. A cone-shaped or flattened mound of mud heaved up through overlying sediments with a funnel-shaped crater on its top through which mud, water, and gases are erupted. In Ukraine there are mud volcanoes on the Kerch Peninsula. The best known are the Bulhanak and the Tarkhan. They can also be found in the Taman Peninsula. In some cases (especially on the Kerch Peninsula) salt springs and iron-ore deposits are formed in the vicinity of mud volcanoes.

Mudrak, Myroslava (née Tsishkevych), b 19 July 1950 in Cleveland, Ohio. Art historian specializing in Ukrainian modernism. A graduate of the University of Texas at Austin (PHD, 1984) and an associate professor at Ohio State University in Columbus, she is the author of *The New Generation and Artistic Modernism in the Ukraine* (1986), a monograph on Soviet Ukrainian art of the 1920s.

Mudrak, Yuliian, b 18 April 1878 in Skopiv, Peremyshl county, Galicia, d 27 May 1950 in New York. Economist and civic leader. After completing his studies in mining engineering in Czechoslovakia and Austria, he worked as an engineer for the Post and Telegraph Directorate (1901–34), whose jurisdiction included much of Western Ukraine. He was one of the founders of the Plai hiking society, president of Silskyi Hospodar, member of the board of directors of the Dnister bank and Narodna Torhovlia, director of I. Levynsky's building company, a member of the Dilo publishing company, and an executive member of the Shevchenko Scientific Society, the Prosvita society, and the Ukrainian Technical Society. He was also publisher of the monthly *Polityka* (1926–8). In 1944 he left Ukraine for Germany, and in 1949 he emigrated to the United States.

Vasyl Mudry

Andrii Mudryk

Mudry, Vasyl [Mudryj, Vasyl'], b 19 March 1893 in Viko, Skalat county, Galicia, d 19 March 1966 in New York. Civic and political leader, and journalist; full member of the Shevchenko Scientific Society from 1958. As a student at Lviv University he was an executive member of the Ukrainian Student Union and the Academic Hromada. Having been elected to the Proskuriv zemstvo executive in 1918, he was in charge of education in the county and in the fall of 1920 was county head. After returning to Lviv in 1921, he helped organize the Lviv (Underground) Ukrainian University, of which he served as finance officer and secretary (1921–5). He joined the editorial board of the daily **Dilo* in 1926 and soon became its chief editor (1927–35). He was also active in the Prosvita society as a member of its central executive (from 1921), general secretary (1925–31), and first vice-president (1932–9). In 1931–3 he chaired the Franko Monument Committee and, in 1933, the Committee to Save Ukraine, which organized famine relief for Soviet Ukraine. As one of the founders of the **Ukrainian National Democratic Alliance (UNDO)* he drafted the party program that was adopted in 1926 and served as the party's first vice-president (1928–35) and president (1935–9). He was elected to the Polish Sejm in 1935 and 1938, and there he was the chief proponent of the policy of **Normalization* and served as leader of the **Ukrainian Parliamentary Representation* and vice-marshal of the Sejm. After leaving Ukraine in 1944, he served as a vice-president of the Ukrainian Supreme Liberation Council (1944–7), executive chairman of the **Ukrainian National Council*, and the first president (1945–9) of the **Central Representation of the Ukrainian Emigration in Germany*. In 1949 he emigrated to the United States, where he became executive director of the **Ukrainian Congress Committee of America* and an executive member of the Shevchenko Scientific Society and the United Ukrainian American Relief Committee. In addition to numerous articles on political and cultural topics in the press, he wrote several pamphlets, on the man-made famine of 1933, the Prosvita society, the UNDO, and the underground university in Lviv, and a book on the campaign to establish a Ukrainian university in Lviv titled *Borot'ba za ohnyshche ukrains'koi kul'tury v zakhidnykh zemliakh Ukrainy* (The Struggle for the Hearth of Ukrainian Culture in Ukraine's Western Lands, 1923). He also edited *Lviv: A Symposium on Its 700th Anniversary* (1962).

Mudryk, Andrii, b 12 August 1893 in Pavlokoma, Breziv (Brzożów) county, Galicia, d 8 January 1969 in Toronto. Co-operative and civic leader. He fought in the First World War as a lieutenant of the Ukrainian Galician Army. In 1923 he returned to Galicia from internment in Czechoslovakia and began working as an organizer of dairy co-operatives. He became organizational director for all Galicia of Maslosoiuz (1924–39, 1941–4), an instructor of dairying in the union's dairy schools in Stryi and Lviv, and a coeditor of the monthly *Kooperatyvne molocharstvo* (1926–39). He was also active in Tsentrobank, the Audit Union of Ukrainian Co-operatives, and Ridna Shkola. He left Ukraine in 1944 and eventually settled in Brazil, where he was vice-president of the Society of Friends of Ukrainian Culture in Curitiba. He later moved to Canada, where he remained active in credit union activities. In addition to numerous articles on co-operation, he wrote *Kooperatyvnyi katekhyzm* (The Co-operative Catechism, 1939).

Mukachiv castle

Mukachiv or **Mukacheve** [Mukačiv or Mukačeve]. V-3. A city (1990 pop 86,200) on the Liatorytsia River and a raion center in Transcarpathia oblast. The site has been settled since prehistoric times. Archeologists have discovered settlements in the vicinity from the Neolithic Period, the Bronze Age, the Iron Age, and the Slavic period (8th–9th century AD). In the 10th century Mukachiv belonged to Kievan Rus', and in the 11th century, to Hungary. The fortress, rising high above the town, was destroyed by the Cumans in 1086 and by the Tatars in 1241. It was rebuilt by F. **Koriatovych*, who also built St Nicholas's Monastery. By the end of the 14th century Mukachiv was an important manufacturing and trading center on a trade route between Hungary and Galicia. In 1445 it was granted the rights of **Magdeburg law*. Because of the monastery the town became a cultural and religious center in the 15th century, and until the end of the 18th century it was the seat of an eparchy. Owing to its strategic location Mukachiv was contested frequently by the Habsburg and Transylvanian dynasties in the 16th and 17th centuries. At the end of the 17th century the town was annexed by Austria. It flourished in the 18th century and became the chief

trade center in Transcarpathia. A gymnasium was established in 1746. Mukachiv played an important role in the revolutionary movement of 1848–9. After the First World War the city belonged to Czechoslovakia. Its importance diminished whereas that of Uzhhorod grew. In 1938 Mukachiv came under Hungarian rule. By a Soviet-Czechoslovak treaty of June 1945 Transcarpathia became part of Soviet Ukraine.

In 1921 Mukachiv had a population of 21,000, consisting mostly of Jews (48 percent), who began to settle there in the late 17th century, Ukrainians (24 percent), and Hungarians (22 percent). In 1925 the first Hebrew gymnasium on Ukrainian territory was established in Mukachiv. By 1966 the city's population had risen to 50,500. It consisted mostly of Ukrainians (60 percent), followed by Hungarians (18 percent), Russians (10 percent), and Jews (6 percent).

Mukachiv has several machine-building plants, a furniture factory, and a food industry. A branch of the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration is located in the city. Its chief architectural monuments are the castle (rebuilt in the 18th century), a Gothic chapel (14th century), the White Building (a baroque monument of the 17th century rebuilt in 1746), the arsenal (now the regional museum, built in 1624), St Nicholas's Monastery (Cathedral from 1806), and the wooden church moved there from Shelestove village (1777).

Mukachiv eparchy. A Ukrainian Catholic eparchy in Transcarpathia, with its see in Mukachiv (to 1780) and then Uzhhorod. The first mention of a bishop in Transcarpathia is from 1491, when the Hungarian king Ulászló (Władysław) II confirmed Ivan of St Nicholas's Monastery in Mukachiv as bishop. The first Uniate bishop of Mukachiv was P. Petrovych, who assumed the post in 1664. Previously, 63 priests in the eparchy had declared their union with Rome (1646), and Bishop V. *Tarasovych had personally converted to Catholicism, although he was not permitted to participate in the 1646 sobor. In 1725, Uniate territories were expanded, and the Maramureş region was added to the eparchy. Because there were no surviving documents concerning the founding of the eparchy or the establishment of the union there by the Vatican, the Hungarian Roman Catholic bishops of Eger in the 17th and 18th centuries claimed jurisdiction over the eparchy and attempted to annex it. In response Bishop M. Olshavsky worked, from 1749, to gain recognition of the eparchy's independence; it was finally granted by the pope in 1771. A. *Bachynsky reorganized the eparchy, established several institutions, and moved its see to Uzhhorod.

Initially all the Greek Catholic parishes of northeastern Hungary belonged to the Mukachiv eparchy. Later the *Prešov (1818), Gerlia (1853), and *Hajdúdorog (1912) eparchies were separated from it. When the eparchy was recognized by Rome, it was placed under the jurisdiction of the Esztergom Hungarian Catholic metropolitan. Bishop Bachynsky's attempts to place it under the Uniate metropolitan of Halych in the late 18th century were unsuccessful. In 1937 the Vatican announced its intention to establish a Mukachiv metropolity with eparchies in Prešov, Uzhhorod, and Khust, but the outbreak of the Second World War prevented the implementation of the plan.

Situated on the border separating Ukrainians, Slovaks, and Hungarians, Mukachiv eparchy was exposed to a variety of cultural and political influences. In the 17th century many Hungarian magnates adopted Protestantism and attempted to introduce it throughout the eparchy. Later, Roman Catholicism was espoused by the local elite and supported by the state. In response to these pressures confessional strife was common. In the interwar period many inhabitants returned to Orthodoxy, and the Mukachiv-Prešov Orthodox eparchy was established in 1929. This eparchy, with its see in Mukachiv, claimed 121,000 followers in 1930.

The Soviet occupation of Transcarpathia in 1944 resulted in the martyrdom of Mukachiv eparchy's Uniate bishop, T. *Romzha; the exile to Kazakhstan of his successor, O. *Khira; and the formal liquidation of the Greek Catholic eparchy in August 1949. From then until the late 1980s only the Orthodox Mukachiv-Uzhhorod eparchy under the Russian Orthodox church, with its see in Mukachiv, was officially sanctioned. The Greek Catholic church survived in the underground, however, and emerged again during the period of liberalization after 1985. (See also *Ukrainian Catholic church.)

Mukachiv Saint Nicholas's Monastery

Mukachiv Saint Nicholas's Monastery (Mukachivskiy Sviatomykolaivskiy manastyr). A men's monastery located on Chernencha Hora (literally 'monk's hill') near Mukachiv. Believed to have been founded in the late 11th century, the monastery was revived and expanded considerably in the late 14th century, when it enjoyed the patronage of F. *Koriatovych. In 1491 it became the residence of the bishop of Mukachiv, whose jurisdiction covered all of Transcarpathia. The monastery's monks led efforts to establish church union in 1646, when the monastery joined the Basilian order; from then the archimandrite also served as superior general of the order in Transcarpathia. The monastery's school and library played important roles in the cultural and religious life of the region; A. *Kralytsky, a hegumen of the monastery, was one of the most prominent Transcarpathian writers of the 19th century. The monk's cells and refectory were constructed in 1766–72 in place of an earlier wooden structure. The large

St Nicholas's Church was built in 1798–1804 in a classical style. It is rectangular and has a single apse and bell tower.

The bishop's residence was transferred to Mukachiv in 1751, but the monastery remained the administrative center for the Basilians. During the 1920s the order was thoroughly reformed. An active missionary program was begun, and a press was established at the monastery to publish religious books and journals. After the Soviet occupation of Transcarpathia the monastery was handed over to the Russian Orthodox church, and the monks, all of whom refused to convert, were exiled. At the same time the monastery's valuable collection of over 6,000 rare books and manuscripts and its archives were transferred to local museums and archives. It now houses a community of nuns.

Mukha rebellion. One of the first popular rebellions against the oppressive rule of Polish magnates. Named after its leader Petro Mukha, the revolt erupted in Pokutia in 1490 and soon spread throughout most of southeastern Galicia. It was supported by the Moldavian voivode Stephan. The 10,000-man rebel army (mostly Ukrainian and Moldavian peasants, but also burghers and Orthodox petty nobles from Pokutia) took the fortified towns of Sniatyn, Kolomyia, and Halych and killed many Polish nobles and burghers. Their advance on Lviv was halted by a combined force of the Galician magnates' levy en masse, a Polish royal army, and Prussian mercenaries. Many of the rebels died in battle near Rohatyn, and Mukha and the survivors fled to Moldavia. In 1492 Mukha returned to Galicia to revive the rebellion. He was captured near Kolomyia, and died, according to one account, in a Cracow prison. V. Hrabovetsky's book about the rebellion was published in Kiev in 1979.

Mukhavets River [Muxavec']. A right-bank tributary of the Buh River, which it joins near Brest. It is 130 km long and drains a basin area of 6,200 sq km. The river flows through Polisia, in Brest oblast. It is navigable and forms part of the Dnieper-Buh Canal–Pyna–Prypiat waterway. The city of Kobryn is situated on its banks.

Mykhailo Mukhyn

Mukhyn, Mykhailo [Muxyn, Myxajlo], b 1894 in Kiev, d 7 September 1974 in Altan, Germany. Literary scholar and publicist. After the First World War he emigrated to Prague, and after the Second World War, to Germany. He was a regular contributor to *Samostiina dumka* (Chernivtsi) and D. Dontsov's **Vistnyk*. Among his major works are

critiques of M. Drahomanov's ideas (eg, 'Drahomanov bez masky' [Drahomanov without a Mask], *Vistnyk*, 1934) and essays on Ukraine in contemporary Polish, Russian, and French literature (*Knyholiub*, 1927–32).

Mykola (Bohdan) Mukhyn: *Zaporozhian Cossack*

Mukhyn, Mykola (Bohdan) [Muxyn], b 24 May 1916 in Zaitseve, Bakhmut county, Katerynoslav gubernia, d 8 May 1962 in Philadelphia. Sculptor; brother of V. *Mukhyn. In the 1930s he studied at the Kharkiv, Odessa, and Kiev art institutes. During the 1941–4 German occupation he headed the department of sculpture at the Lviv Art School. A postwar refugee in Germany, in 1949 he emigrated to the United States. Mukhyn worked in various techniques and materials (wax, stone, plaster, silver, and bronze). In a Romantic impressionist style he depicted historical figures (eg, *Prince Ihor*, *Drinking Cossack*, *Otaman*, *Glory*, *Chumaks in the Steppe*) and female figures (*Nude*, *Praying Woman*, and *Night*). His works were exhibited in Moscow, Leningrad, Lviv, New York, and Philadelphia.

Mukhyn, Viktor [Muxyn], b 28 September 1914 in Zaitseve, Bakhmut county, Katerynoslav gubernia, d 9 February 1977 in Voroshylovhrad (Luhanske). Sculptor; brother of M.(B.) *Mukhyn. He began his studies at the Kharkiv Art Institute (1931–2) and completed them at the Kiev State Art Institute (1938). He sculpted many Soviet monuments, such as those to fallen Soviet soldiers in Voroshy-

lovhrad (1944) and Kadiivka (1946); portraits (eg, *P. Tchaikovsky*); and female figures (eg, *Woman with An Ear of Grain*). An exhibition catalog of his works was published in 1968.

Müller, Gerhard Friedrich, b 29 October 1705 in Herford, Westphalia, d 22 October 1783 in Moscow. German and Russian historian and archeographer. A graduate of Leipzig University, from 1725 he lived in St Petersburg, where he worked as a gymnasium teacher and adjunct of the Imperial Academy of Sciences, edited *Sankt-Peterburgskiiia vedomosti*, and was a history professor at the academy from 1731. After exploring Siberia (1733–43) he was appointed the imperial academy's historiographer (1748) and conference secretary (1754). From 1766 he directed the Moscow Archive of the Russian College of Foreign Affairs. Müller wrote many works on the history, archeology, and ethnography of Russia, Siberia, and Ukraine and compiled *Sammlung russischer Geschichte* (9 vols, 1732–65). Among his works are articles in *Ezhemesiachnyiia sochineniia, k pol'ze i vveseleniiu sluzhashchiiia* on the beginnings and origins of the Cossacks (1760) and what is known about the Zaporozhian Cossacks (1760) and the first detailed account of the Little Russian people and the Zaporizhia (1775–6). Some of his manuscripts were later published by O. Bodiansky in *Chteniia v Imperatorskom obshchestve istorii i drevnosti rossiiskikh* in 1846–8 and separately as *Istoricheskiia sochineniia o Malorossii i malorossianakh* (Historical Works about Little Russia and the Little Russians, 1847). In his 1749 doctoral lecture at the imperial academy on the origin of the Russian people and their name, Müller first advocated the 'Norman theory of the origin of Rus'. It met with indignation and harsh criticism and was banned from publication. It was eventually published abroad as 'Origines Rossicae' in *Allgemeine historische Bibliothek* (vol 4, 1768). J.L. Black's *G.F. Müller and the Imperial Russian Academy* was published in Montreal in 1986.

A. Zhukovsky

Multicylindrical-Pottery culture. A Bronze Age culture that existed primarily along the Dnieper and the major rivers of Left-Bank Ukraine in the 16th to 15th century BC. Although remains of this culture had been discovered by the turn of the century, it was considered a late phase of the *Catacomb culture until the 1950s, when excavations at Babyne III and Volyntseve led to the conclusion that it was actually a distinct successor culture. The culture's trademark was biconical pottery decorated with cylindrical strips of clay in rings or geometric patterns (usually treelike or triangular). Research at sites revealed semi-pit and surface dwellings and indications of cattle-raising, agriculture, and fishing. Remains of flints arrowheads, bronze knives, bone items, and querns were also found. Burials were commonly in kurhans, with the deceased placed in a flexed position. Common grave goods included pottery and flint and bronze implements.

Mumm von Schwarzenstein, Philip Alfons, b 19 March 1859 in Frankfurt, d 1924. German diplomat. Having been educated in law and previously posted in London, Tokyo, Washington, and other locations, he was sent to Ukraine in 1918 following its occupation by the Central Powers. Although immediately concerned with the orderly procurement of foodstuffs for Germany, he also contributed to the establishment of Ukraine as a viable client

state. He became involved in the overthrow of the *Central Rada by P. *Skoropadsky, attempted to persuade the *Hetman government to moderate its ultraconservative character and pro-Russian leadership by adopting more liberal policies and including more Ukrainophiles in the cabinet, and engineered diplomatic gestures, such as the visit by Skoropadsky to William II, to provide the fledgling Hetman government with a greater political profile. His closest associate in those undertakings was W. *Groener, the German military chief of staff in Ukraine.

MUN. See Young Ukrainian Nationalists.

SS Peter and Paul Ukrainian Catholic Church in Mundare

Mundare. A town in Alberta originally named Beaverlake, situated approx 70 km east of Edmonton. Most of its inhabitants are of Ukrainian origin. In 1902 the first Basilian missionary station, which included four Sisters Servants of Mary Immaculate, was established there under the leadership of Rev P. Filias. The present monastery was built by Rev N. Kryzhanovsky in 1923. It houses the Basilian novitiate, press, and school. Until 1948 Mundare was the seat of the Basilian protohegumen for Canada and the United States. The Sisters Servants likewise established a novitiate and operated a school, orphanage, and hospital. The town is the chief Ukrainian Catholic pilgrimage site in Canada. The monastery's library has over 20,000 volumes. Its museum and archive (est 1957) contains valuable collections of old Ukrainian manuscripts and incunabulae (much of it collected by Rev J. *Jean), such as the Ostrih Bible, old maps of Ukraine, rare stamps, old coins and bank notes, medals, pioneer implements, and samples of Ukrainian folk arts and crafts.

Munich (German: München). The capital of the German state of Bavaria (1989 pop 1,211,617). Prior to 1914 a number of Ukrainians studied at the arts academy, including D. Horniatkevych, M. Ivasiuk, E. Lipetsky, O. Murashko, Yu. Narbut, M. Parashchuk, M. Sosenko, and I. Trush. Parashchuk lived in the city in 1909–15 and founded the Ukrainian Art Society there. Metropolitan A. Sheptytsky studied at Munich University in 1889–90, as did R. Smal-Stotsky (PH D, 1914). V. Orenchuk headed the UNR consulate in 1918–23. After 1940 many Ukrainians arrived in Munich to study, and after June 1941 many were brought as forced laborers (**Ostarbeiter*) to work in heavy industry.

Munich. Clockwise, from top left: the residence of the apostolic exarch, the mosaic behind the altar in the Ukrainian Catholic cathedral, the parish center, the cathedral, the Ukrainian Free University, and the Ukrainian student residence

At that time a Ukrainian Catholic parish was established, as was the students' society Baturyn.

In the immediate postwar period Munich became the largest center of Ukrainian life in Western Europe. In 1945–9 there were approx 15,000 to 20,000 Ukrainians living in the city and its immediate environs, mainly in *displaced persons' camps. Over 2,000 were enrolled either in German schools or in Ukrainian educational institutions that had been moved to or established there, including the *Ukrainian Free University (UVU), the Ukrainian Technical and Husbandry Institute (UTHI), the *Ukrainian Higher School of Economics, and the Ukrainian Orthodox Theological Academy. The *Shevchenko Scientific Society (NTSh) and the *Ukrainian Academy of Arts and Sciences (UVAN) were re-established in the city during this time, and three Ukrainian gymnasiums and a teachers' college were active. The city also served as the major center of Ukrainian émigré political life in Western Europe (notably the external units of the OUN – OUN leaders S. Bandera and L. Rebet were assassinated there by a KGB agent) and the headquarters of the *Ukrainian National Council. Publishing activity was extensive, particularly in the immediate postwar period, when 74 newspaper and journal titles were issued there.

Munich also developed into a major center of Ukrainian academic and intellectual life. Its three major Ukrainian

scholarly institutions (UVU, UTHI, and NTSh) established the Society for the Advancement of Ukrainian Scholarship (in 1962), which has published the *Jahrbuch der Ukrainekunde* since 1965. Ukrainian language courses were taught briefly at the University of Munich in 1914 and 1920 by J. Berkener and have been part of the curriculum since 1945, taught by H. Nakonechna (1945–65), B. Mykytiuk (1965–73), M. Antokhii (1973–88), and N. Pliushch (since 1988). Yu. Boiko taught courses in the history of Ukrainian literature (1962–88). The *Institute for the Study of the USSR was active in 1950–72, and produced a variety of studies about Ukraine. The flagship publication of the Ukrainian émigrés in the West, **Suchasnist'*, was issued in the city in 1961–90. *Radio Liberty, established in 1953, transmits a daily Ukrainian program and prepares regular research reports about current events in Ukraine.

A mass exodus of Ukrainians from Munich began in 1948, and now (1988) only a community of approx 1,000 remains. Nevertheless, Munich continues to be an important Ukrainian organizational center. Groups found there include the *Central Representation of the Ukrainian Emigration in Germany, the Ukrainian Medical and Charitable Service, the Ukrainian Women's Alliance, societies of former Ukrainian political prisoners in Germany, the Ukrainian Christian Workers' Movement, the Ridna Shkola Society (which runs a students' residence), the

Union of Ukrainian Veterans, the Association of Ukrainian Combatants, the Union of Ukrainian War Invalids, the Union of Ukrainian Students in Germany, and branches of the Plast Ukrainian Youth Association and the Ukrainian Youth Association (SUM). The *Anti-Bolshevik Bloc of Nations is also centered there.

The current Ukrainian press includes the weeklies *Khrystyians'kyi holos* and *Shliakh peremohy* and the monthly *ABN-Korrespondenz*. Local publishing and printing houses include Suchasnist, Ukrainske Vydavnytstvo, Molode Zhyttia, Logos, Cicero, and P. Belei's academic publishing house.

Artists who have resided in Munich include S. Burachok, H. Kruk, M. Moroz, L. Kachurovska, V. Sazonov, and V. Strelnikov. Writers who have lived there include E. Andrievska, O. Hrytsai, and L. Semaka.

Munich Agreement. A settlement of the crisis over Czechoslovakia, signed by Britain, France, Germany, and Italy on 29 September 1938, commonly regarded as the culmination of the Western democracies' policy of appeasement of the Nazis. It ceded the Czechoslovak territory of the Sudetenland to Germany and provided for frontier adjustments for Poland and Hungary at the expense of Czechoslovakia. The four powers then guaranteed the rump of Czechoslovakia against unprovoked aggression. The agreement precipitated an internal crisis which enabled Slovakia to achieve autonomy within Czechoslovakia on 8 October 1938, a status demanded by and granted to Ukrainian Transcarpathia on 11 October. The frontier adjustments promised in the agreement were regulated by the *Vienna Arbitration of 2 November 1938.

Municipal government. A unit of local government that administers the affairs of an urban area. (For its history before the 19th century see *Cities and towns, *Magdeburg law, *Magistrat, *Burmister, *Viit, and *Ratusha.)

Russian-ruled Ukraine. With the abolition of Magdeburg law in 1831 (1835 in Kiev), the municipal self-government was severely limited in Ukraine. Although the most important city bodies continued to be elected, the interference of centrally appointed governors in city affairs increased sharply. Eventually city administration became totally subservient to the imperial government. In general the governors sought to replace traditional Ukrainian forms of municipal government with Russian ones. In the second half of the 19th century, thanks to the influence of liberal ideas from the West, municipal self-government was introduced in St Petersburg and then in Odessa (1864). A municipal code for the entire empire was adopted in 1870 and began to be introduced in Ukraine in 1875. It established the city council or *duma* as the highest organ of municipal government. Council members were elected for four years on the basis of a limited franchise: the vote was restricted to city residents, dwellers who owned real estate or a business in the city and paid municipal taxes. The voters were divided into three categories, and the wealthiest had the greatest voice. Jews had only a limited franchise, and in Kiev they were completely disen-

franchised. The executive arm of the council was the municipal board, which was composed of a chairman and two to six members, depending on the size of the city. The board's responsibilities included administering municipal properties, providing health care and public education, and regulating trade and industry in the city. State authorities only made sure that the municipal officials complied with the law. A new law in 1892 limited the number of voters (by excluding small tradesmen and merchants) and increased the state's review powers over the local administration.

During the revolutionary period (1917–20) municipal government in Ukraine was greatly democratized. City councils and boards were elected by all adult city residents. The Provisional Government and the Ukrainian national governments generally refrained from interfering in municipal affairs, although occasionally they dissolved city councils that were controlled by the enemy.

Western Ukraine. Before the introduction of the 1881 Constitution in Austria-Hungary, municipal self-government in Galicia and Bukovyna was limited. Only in 1862 was a unified system of municipal self-government established throughout the empire, and old local privileges abolished. Further improvements in the system were made by the Galician Diet in 1866, 1889, and 1896. The city council, elected under a curial electoral system, was the highest governing body. Its executive branch was the *magistrat*, which consisted of the *burmister*, his deputy, and delegates from the city council. The municipal government was responsible for municipal services, finances, police, and for responding to social problems. Some of these responsibilities belonged to the cities by law and came under their exclusive jurisdiction; others were assigned to them by the state. For carrying out the latter duties, city authorities were responsible to the county *starostas or county boards.

The Austrian system of municipal government was retained by the Polish state in the interwar period, except that universal suffrage was introduced by the decrees of 1918 and 1927. In territories that had been under Russian rule up to 1918 the law on cities of February 1919 established a municipal system similar to Galicia's. The administration of the larger cities came under the supervision of the voivodeship authorities; the smaller cities came under the county authorities. These authorities could intervene in municipal affairs, annul local decisions, change the composition of municipal organs, and even dissolve city councils. The law of 23 March 1933 established a uniform system of municipal government: city councils were enlarged to 12 to 72 members (depending on the size of the city) elected by an electoral college (not by direct voting), and the powers of the *burmister* were increased. Moreover, municipalities with fewer than 3,000 inhabitants lost their rights to self-government. Like the *curial system under the Habsburgs the electoral colleges severely restricted Ukrainian participation in municipal affairs.

In Transcarpathia under Hungarian rule the system of municipal government was similar to that in the Austrian-controlled territories, although major changes were introduced in 1886. In particular the central government exerted greater control over cities, and notaries public, who were civil servants, served as municipal secretaries. In general this system was retained in Czechoslovakia, except that general universal suffrage was introduced. The organs of municipal government were the city council

(elected for four years), the *magistrat*, city notaries, and the elected head of the city, known as the *starosta*. In Bukovyna under Rumanian rule cities lost much of their autonomy to the central government.

Ukrainian SSR. In the Soviet system municipal governments came under the authority of the state apparatus, which was organized according to the principle of democratic centralism. The structure of local governments was regulated by statutes on city councils, which, according to the constitution, were passed by the republican governments. The local soviet of people's deputies with its executive committee was the highest organ of municipal self-government. The deputies were elected through direct balloting for two and a half years. They were nominated by civic organizations, or more precisely, by the Party. The soviet held at least six sessions a year and was responsible for local affairs and for implementing the decisions of the oblast and republican soviets that pertain to the cities. In addition they were responsible for the activities of the lower soviets (eg, in specific city raions). The executive committee of each soviet had a large apparatus that functioned in tandem with the soviet's permanent commissions.

Municipal schools (*horozhanski shkoly*). Lower three-year and then four-year secondary schools in Transcarpathia. Graduates of municipal schools were admitted to teachers' colleges, to trade schools, and, after an admission examination, to gymnasiums. In 1938–9 there were 23 Ukrainian municipal schools, with an enrollment of 6,485, in Transcarpathia and 2 municipal schools in the Prešov region.

Municipal services. A set of services under the control of municipal councils that meet the material and social needs of residents of a given city or town, including public housing, public transit, road maintenance, garbage collection and sewage, street lighting, water, gas, and power supply, policing, and fire protection. In the West some of those services are provided by public utilities. In the former USSR many municipal services were run jointly by municipal departments and republican or Union ministries. In the smaller towns some of the services (eg, water supply) were not under local control. In 1991, 436 cities and 925 towns (smt) in Ukraine, with a total of 35 million residents (67.6 percent of the total population), provided such services, and about 806,000 people were employed in them.

Public housing is one of the main departments of municipal administration. Municipalities control about an eighth of Ukraine's housing fund. The total fund of urban housing for 1940–90 is given in the table. In 1991 only 36.7 percent (or 210.5 million sq m) of the urban housing fund was under the control of municipal councils. The rest belonged to enterprises and ministry organizations (25.6 percent), housing co-operatives (6.2 percent), and individuals (31.1 percent). Not all of the housing stock is equipped with standard utilities, but public housing is

better equipped than co-operative or private housing. In 1990, 95.1 percent of public housing had running water, 94.4 had sewage, 89.8 had central heating, 90.3 had a bath or shower, and 92.9 was supplied with gas. There is an acute housing shortage in Ukraine: about one-fifth of the urban residents are inadequately housed.

Urban housing fund in Ukraine (in million sq m), 1940–90

	1940	1960	1970	1980	1990
Residential units	97.0	203.7	313.1	440.7	574.3
Average sq m/person	6.7	9.9	12.1	14.2	16.5

Practically all cities and towns in Ukraine are supplied with natural gas. In 1990, 431 cities and 902 towns were supplied with natural gas either by pipeline or by tank (liquefied gas). In these municipalities 7,125,000 living units (apartments or houses) used piped-in gas, and 2,932,000 units used liquefied gas. In 1990 private consumption used 4 billion cu m of natural and 19,000 t of liquefied gas.

In 1990, 434 cities and 803 towns in Ukraine were equipped with a water-supply system. The total length of the network was 21,410 km, of which 20,438 km belonged to cities. About 54 percent of the network was controlled by municipal authorities; the rest came under republican or Union ministries. In 1989, 1,416 million cu m of water were consumed by urban residents. (See also *Water management.)

By 1990, 308 cities and 431 towns had sewage systems. The length of the sewage network in the cities and towns was 9,553,000 km. The total sewage-processing capacity of the network was 13,174,000 cu m per day.

For public transportation in cities and towns see *Urban transit and for power consumption see *Electric power.

A. Revenko

Münster, Sebastian, b 1489 in Ingelheim, Germany, d 23 May 1552 in Basel, Switzerland. Hebrew scholar, mathematician, cartographer, and cosmographer. His *Cosmographia* (1544) was the first German description of the world and a major contribution to the development of geography in Europe. In the fourth volume of the work he describes western Ukraine, including Galicia and Right-Bank Ukraine, which he calls Ruthenia, and clearly distinguishes it from Muscovy. He also compiled a Latin-Greek-Hebrew dictionary entitled *Dictionarium trilingue* (1530) and prepared *Mappa Europae* (1536).

MUR (Mystetskyi ukrainskyi rukh [The Artistic Ukrainian Movement]). An artistic-literary organization of Ukrainian émigrés in Europe. It was founded on 25 September 1945 in Fürth, Germany, on the initiative of a committee consisting of I. Bahriany, V. Domontovych (Petrov), Yu. Kosach, I. Kostetsky, I. Maistrenko, and Yu. Sherekh (Shevelov). MUR organized three writers' congresses (1945, 1947, and 1948) as well as three conferences devoted to various aspects of literary activity (28–29 January 1946, general theory; 4–5 October 1946, criticism; and 5–6 November 1947, drama). The head of the organization for its duration was U. *Samchuk, and its membership (both full and candidate members) numbered 61.

The objectives of MUR were to gather Ukrainian writers scattered by the Second World War, to organize the pub-

Title page of the MUR almanac

lication of their works, and to become a center, within a comprehensive national ideology, for creative dialogues among members representing various styles and literary aims. MUR played a positive role in that it managed to organize almost all of the noted émigré writers and provide them with a forum for discussion while it stimulated an interest in literature among the public at large. But despite various attempts during the difficult times in postwar Germany, MUR did not succeed at establishing its own printing house or a permanent journal, nor was it really successful in transforming into a united body the writers of various ideologies and disparate Ukrainian backgrounds. Although there were plans to continue the organization in the New World (see *Slovo Association of Ukrainian Writers in Exile), with Samchuk's departure for Canada in 1948 the organization, for all practical purposes, ceased to exist.

Despite its inability to establish a printing house, MUR published three miscellanies (MUR *Zbirnyk I*, April 1946; MUR *Zbirnyk II*, September 1946; MUR *Zbirnyk III*, early 1947), one almanac (MUR *Al'manakh*, late 1946), and several editions of the series Mala biblioteka MUR-u. It also formed its own publishing firm, Zolota Brama, whose name was used by many of the member authors to show sponsorship of MUR. Some books of Bahriany, V. Barka, Domontovych, D. Humenna, Yu. Klen, Kosach, Kostetsky, B. Kravtsiv, T. Osmachka, Samchuk, Ya. Slavutych, S. Parfanovych, and other writers appeared with that imprint.

Murafa River. A left-bank tributary of the Dniester River, which it joins at Yampil. It is 163 km long and drains a basin area of 2,410 sq km. The river flows through Vinnytsia oblast. Its largest tributaries are the Murashka and the Lozova rivers. It is used for water supply and irrigation.

Mural. A large-scale artistic work created as a permanent part of an architectural structure with the use of media

such as buon fresco or fresco secco, mosaic, egg tempera, or various glue, oil, or polymer paints.

The earliest existing examples of murals in Ukraine are fragments of *fresco paintings from the Greek colonies on the northern Black Sea coast. *Mosaics and frescoes were used in the mural decorations of churches in Kievan Rus'.

The most spectacular and complete extant mural cycles from that period are found in the *St Sophia Cathedral in Kiev. Most of the major mosaics there have been preserved, including the grand, 5.45-m *Orante*, in the apse, and the *Deesis*, in the main dome. Apart from the fine mosaic the *Eucharist* and fresco renderings of the sacrifice of Abraham, and of numerous saints, St Sophia also houses fresco portraits of the family of Grand Prince Yaroslav the Wise and numerous secular subjects (hunting scenes, court musicians, and jesters).

Though the murals of Kievan Rus' were strongly influenced by *Byzantine art, they chronicle the development of an indigenous style. By the 13th century frescoes had replaced mosaics as the preferred media in mural decoration. The preserved fresco cycles of the *Armenian Cathedral in Lviv (14th century) attest to stylistic changes in mural painting based on a synthesis of Byzantine and Western art.

By the 17th century the use of fresco in mural painting had markedly declined. Examples of frescoes from this period have been preserved in Kiev, in the Church of the Transfiguration in the Berestove district (1644–6). Many mural cycles from this period were painted with egg tempera on gesso, which was applied directly to the wooden structure of the church. The murals of the *Potelych Church of the Holy Ghost (1620) and the Church of the Elevation of the Cross in Drohobych (ca 1636) differ greatly in style from those in the Kievan Church of the Transfiguration. Whereas in the latter naturalistic renderings show Renaissance influences, in the Drohobych and Potelych churches the linear murals show the influence of indigenous folk-art styles.

From the late 17th century a new Kievan school of monumental painting flourished. By the third decade of the 18th century, when this school reached its apex, many churches in Kiev, Chernihiv, Poltava, and Pereiaslav had been decorated by its members. Of the Cossack baroque murals of this period only those in the Holy Trinity Church above the main gate of the Kievan Cave Monastery have survived in good condition. They were painted in the 1720s and 1730s by artists with a solid knowledge of illusionistic figurative methods, who adapted standard Western baroque methods of depicting space and modeling form to conform to more Byzantine standards, and depicted figures with fully modeled heads and hands who are clothed in heavily gilded, ornamented, and flattened robes.

This tension between foreign art and indigenous traditions became a central problem during the revival of large-scale fresco painting in the 20th century. In the 1900s and 1910s the prominent mural painters were S. *Vasylkivsky and M. *Samokysh in Russian-ruled Ukraine and M. *Sosenko in Galicia. In Soviet Ukraine in the 1920s, M. *Boichuk and his students (including O. *Pavlenko, I. *Padalka, V. *Sedliar, M. *Rokytsky, K. *Hvozdyk, and M. *Shekhtman) at the Workshop of Monumental Painting in the Kiev State Art Institute worked to revive traditional mural painting as well as to synthesize modern formalist ideas with indigenous folk and icon traditions. These art-

MURALS AND MOSAICS 1) V. Marchak: *Fairy Tales* (tempera, 1985; Palace of Young Pioneers, Lviv). 2) An Angel Rolling up Heaven (12th century; fresco, St Cyril's Church, Kiev). 3) O. Dubovyk: *Feast of Knowledge* (mosaic, 1984; Crystal Factory, Kiev). 4) M. Levitsky: *Holy Eucharist* (apse mural, 1979–80; St Andrew's Church, Lidcombe, Australia). 5) The Apostles (12th century; detail from the mosaic of the Holy Eucharist, St Michael's Golden-Domed Cathedral, Kiev). 6) The Pantocrator and Archangels (11th century; main cupola mosaic, St Sophia Cathedral, Kiev). 7) S. Kyrychenko and N. Klein: *Harvest* (mosaic, 1957). 8) O. Kyrychenko: *Folk Art* (mosaic, 1980; village of Lysianka). 9) V. Pasyvenko and V. Priadka: *Tryvoha (Alarm)*, detail from *Pain of the Earth* (cold encaustic, 1986–9).

This page intentionally left blank

ists composed numerous murals for various public buildings (see *Fresco painting). Apart from the 'Boichukists,' V. *Yermilov, L. *Kramarenko, M. *Pavliuk, and H. Dovzhenko extensively worked on murals combining indigenous and modernist styles. After the imposition of socialist-realist dicta in the 1930s, most of these works were destroyed.

The new stylistic imperatives of socialist realism encourage the creation of propagandistic forms of large-scale mural art. Works such as the ceiling in the vestibule of the Supreme Soviet in Kiev (1936–41, by V. and B. Shcherbakov), which drew on the grandiose decorative traditions of baroque painting, became popular. Apart from works apotheosizing the communist state, many monumental works with more mundane subjects, such as *Mother Nursing Her Child* (by V. Ovchynnykov) and *Harvest* (by S. *Kyrychenko and N. Klein, 1957), were commissioned for public buildings.

Outside Soviet Ukraine most mural painting has been done in churches. In interwar Galicia P. *Kholodny, Sr, M. *Osinchuk, P. *Kovzhun, and Yu. *Mahalevsky painted neo-Byzantine murals using traditional tempera techniques. In Transcarpathia, church murals were executed by Yu. *Virah, I. *Roshkovych, and Y. *Bokshai. Emigré artists who have worked in the large-scale format include P. *Kholodny, Jr, M. *Dmytrenko, G. *Kozak, M. *Levytsky, I. *Dyky, R. Kowal, and S. *Hordynsky. One of the best examples of mural decorations in Ukrainian émigré art is Hordynsky's mosaics in the St Sophia Cathedral in Rome.

Rev Mykola Muranii

Mykola Murashko: *Self-Portrait* (lithograph, 1868)

Muranii, Mykola [Murani], b 11 May 1911 in Berezhove, Transcarpathia, d 12 January 1979 in Uzhhorod. Catholic priest. He completed his studies in Strasbourg and returned to Uzhhorod to become the bishop's personal secretary. He was general vicar of Mukachiv eparchy when

the Soviets occupied Transcarpathia in 1945. In 1947, after Bishop T. Romzha was murdered, Muranii was elected as eparchial administrator. In 1949, after extensive interrogations, he was arrested and sentenced to 25 years in a labor camp. He was amnestied in 1956 after Stalin's death but rearrested early in 1957. After serving eight months of a new 10-year sentence, he was again released. He returned to Uzhhorod, where he continued as administrator of the underground Mukachiv eparchy until his death.

Murashko, Andrii [Muraško, Andrij], b ? in the Liubech region, d 1674. Cossack officer. In 1658 he became colonel of Chausy regiment in Belarus, and later, colonel of a volunteer regiment under Hetmans D. Mnohorishny and I. Samoilovych. He was captured and killed by the Turks after an unsuccessful defense of Ladyzhyn.

Murashko, Mykola [Muraško], b 20 May 1844 in Hlukhiv, Chernihiv gubernia, d 22 September 1909 in Bucha, near Kiev. Painter, graphic artist, and pedagogue. After graduating from the St Petersburg Academy of Arts (1868) he worked in Kiev as a secondary-school art teacher and in 1875 founded the influential *Kiev Drawing School, which he ran until 1901. As an art critic he defended the realist tradition of the *Peredvizhniki and rejected modernism. His paintings and drawings consist of landscapes (eg, *Autumn*, *Above the Dnieper*, *View of the Dnieper*) and portraits (*N. Ge*). He did a series of lithograph portraits, including ones of T. Shevchenko (1867) and P. Mohyla and a self-portrait (1868), and illustrated a Ukrainian edition of H.C. Andersen's tales (1873) and other books. At the end of his life he published his memoirs (3 vols, 1907–9; Ukrainian trans 1964). Yu. Turchenko's book about him was published in Kiev in 1956.

Mykola Murashko (1891–1949)

Murashko, Mykola [Muraško] (Muraszko, Nicholas), b 15 December 1891 in Sviate, Jaroslaw county, Galicia, d 3 August 1949 in New Brunswick, New Jersey. Community leader. He emigrated to the United States in 1907 and became active in Ukrainian organizations. For many years he served as president of the Ukrainian National Association (1929–49), and he was the first president of the Ukrainian Congress Committee of America (1940–4) in addition to working as a business manager for the newspapers *Svoboda* and *Ukrainian Weekly*. As vice-president of the United Ukrainian American Relief Committee (1947–9) he devoted much of his time to organizing relief for Ukrainian émigrés in Europe.

Oleksander Murashko: *Self-Portrait* (oil, 1918)

Murashko, Oleksander [Muraško], b 7 September 1875 in Kiev, d 14 June 1919 in Kiev. Painter. He studied at the Kiev Drawing School (1891–4), under I. *Repin at the St Petersburg Academy of Arts (1894–1900), and in Munich and Paris (1902–4). He belonged to the New Society of Artists in St Petersburg and participated in its annual exhibitions (1904–14). In 1907 he settled in Kiev, where he taught painting at the Kiev Art School (1909–12) and at his own studio (1912–17). In 1909 he exhibited his canvases in Paris, Munich, and Amsterdam, and in 1910 at the international exhibition in Venice and at one-man shows in Berlin, Köln, and Düsseldorf. From 1911 he exhibited with the Munich Sezession group. In 1916 he joined the *Peredvizhniki society and became a founding member of the Kiev Society of Artists. He was a cofounder of the *Ukrainian State Academy of Arts in 1917 and served there as a professor and rector. Murashko's style evolved from the realism of the Peredvizhniki school into a vivid, colorful impressionism. His paintings and portraits possess psychological depth. They include *Burial of a Kish Otaman* (1900), *Girl with a Red Hat* (1902–3), portraits of H. Tsyss (late 1890s), T. Yazera (1901–4), M. Murashko (1904), and J. Stanisławski (1906), *Day at Rest* (1911), *By the Pond* (1913), *Peasant Family* (1914), *Washerwoman* (1914), *Flower Sellers* (1917), and *Woman with Nasturtiums* (1918). Murashko established an international reputation and had a strong influence on the development of Ukrainian portrait painting in the 20th century. He was murdered in Kiev by unknown assailants.

Murashko, Pavlo [Muraško], b 22 October 1939 in Prague. Scholar. He studied Ukrainian language and literature at the universities of Prešov and Prague, and received a PhD for his work on the life and works of O. Oles. He taught at the Ukrainian gymnasium in Prešov and served as an editor of *Dukliia* (also in Prešov). He arranged the publication of a number of works of Ukrainian samvydav in the West, including *Ukraïns'kyi visnyk* and I. Dziuba's *Internatsionalizm chy rusyfikatsiia* (Internationalism or Russification), for which action he was arrested and imprisoned in 1972 for three years. After his release he remained in Czechoslovakia, working as a laborer and taking part in activities of the Charter 77 human-rights defense group. He compiled *Bibliohrafiia Ukraïns'koï ta*

slov'ians'koï periodyky u praz'kii slov'ians'kii bibliotetsi (Bibliography of Ukrainian and Slavic Periodicals in the Slavic Library of Prague, 1990) and has contributed to Ukrainian periodicals in Czechoslovakia.

Muratov, Ihor, b 29 July 1912 in Kharkiv, d 29 March 1973 in Kharkiv. Writer and playwright. His first published work appeared in 1925. In the 1950s he worked with the Return to the Homeland Committee in Berlin and was editor of its official propaganda organ, *Za povernennia na bat'kivshchynu*. He published a large number of collections of verse written in the official tone, including *Kosmohrafik* (Cosmographer, 1933), *Zahybel' syn'oi ptytsi* (Death of the Blue Bird, 1934), *Dvadtsiatyi polk* (The Twelfth Regiment, 1941), *Bytva za sontse* (The Struggle for the Sun, 1962), *Ochi* (The Eyes, 1962), and *Myt' i vichnist'* (A Moment and Eternity, 1973). Muratov's prose includes *Bukovyns'ka povist'* (Bukovynian Novelette, 1951), *Doroha do syna* (The Road to the Son, 1967), *Spovid' na vershyni* (Confession on the Summit, 1971), and the novel *Ū sorochtsi narodzhenni* (Born in a Shirt, 1964). He also wrote plays and publicistic articles. A compilation of his works, *Tvory* (Works, 4 vols, 1982–3), was published posthumously.

Murava Road (Muravskiy shliakh). A principal trade and military route in 16th- to 18th-century Southern and Left-Bank Ukraine. Originating in Perekop in northern Crimea, it passed northeastward through southern Left-Bank Ukraine between the sources of the Molochni Vody and the Kinski Vody rivers, crossed the Vovchi Vody, the Samara, and the Orel rivers, and traversed Slobidska Ukraine by way of Kolomak, Valky, and Okhtyrka before entering Muscovy and ending in Tula. In the upper reaches of the Donets, the Oskil, the Vorskla, the Psol, and the Seim rivers the road merged with the *Izium Road. Much of the trade between the Crimean Khanate and Slobidska Ukraine and Muscovy was conducted along the road, and until the early 18th century it was used by the Crimean Tatars during their raids on Ukraine and Muscovy.

Muraveinyk-Komashnia (Anthill). A weekly organ of the Kiev Association of Credit Unions, published in Kiev in 1913–19. Initially it appeared in both Ukrainian and Russian, but official pressure in 1914–16 forced the publishers to use Russian only. After the Revolution of 1917 it appeared only in Ukrainian (as *Komashnia* and then as *Kooperatyvnyi kredyt [Komashnia]*). The paper published articles on developments in the *co-operative movement in Ukraine and abroad. Its editors were Kh. Baranovsky (1913–16), V. Melnykov, and, later, F. Matushevsky.

Muravev, Mikhail, b 25 September 1880 in Burdokovo, Kostroma gubernia, Russia, d 11 July 1918 in Simbirsk (now Ulianovsk). Russian military commander during the revolutionary period. He was an experienced colonel in the tsarist army, and he joined the Russian Socialist Revolutionary party in 1917. He went on to serve the new Soviet regime and was chosen by V. *Antonov-Ovsienko to be field commander of the 1917–18 Bolshevik offensive into Ukraine. After quickly taking over Kharkiv and Poltava he advanced on Kiev with approx 4,000 men, most of them Russians. En route he encountered and destroyed a considerably smaller Ukrainian force at the Battle of *Krutyy (29 January 1918). His occupation of Kiev on 9 February

1918, after five days of fighting, was followed by orders for the mass execution of supporters of Ukrainian independence. Muravev was killed by Bolsheviks during an attempted Socialist Revolutionary coup d'état (some sources cite suicide).

Muravev-Apostol. A noble family in Poltava gubernia, descended on the female side from Hetman D. *Apostol. In 1801 the diplomat, senator, and writer Ivan Muravev (1765–1851), Apostol's grandson, was allowed to use the name Muravev-Apostol and to take over the Apostol estates in Myrhorod county. His sons, Matvei (1793–1886), Sergei (1796–1826), and Ippolit (1805–26), were involved in the *Decembrist movement. Matvei was exiled to Siberia, Sergei was hanged, and Ippolit shot himself during the revolt of the Chernihiv Regiment. The male side of the family disappeared at the end of the 19th century.

Muravev-Apostol, Sergei, b 9 October 1796 in St Petersburg, d 25 July 1826 in St Petersburg. Leader of the *Decembrist movement. A lieutenant colonel in the Russian army, he was one of the organizers of the clandestine *Union of Salvation and *Union of Welfare and headed the Vasytkiv council of the *Southern Society. He advocated centralizing the Decembrist forces, and in 1824–5 he conducted negotiations with the Polish Patriotic Society that led to the fusion of the Southern Society and the *Society of United Slavs. He was, however, hostile to the *Little Russian Secret Society. Muravev-Apostol compiled (together with M. Bestuzhev-Riumin) a revolutionary 'Orthodox catechism.' He led the revolt of the Chernihiv Regiment in January 1826 and was seriously wounded in a battle near Kovalivka, in Vasytkiv county, Kiev gubernia. He was imprisoned and hanged in the Peter and Paul Fortress in St Petersburg. A book about Muravev-Apostol by L. Medvedska was published in Kiev in 1961.

Muravin, Lev, b 5 November 1906 in Belgorod, Kursk gubernia, d 25 November 1974 in Moscow. Sculptor. A graduate of the Kharkiv Art Institute (1929), he later taught sculpture there (1940–3) and at the Kiev State Art Institute. From 1951 he worked in Moscow. He took part in creating the sculptures at the USSR pavilion at the 1939 New York World's Fair and did portraits of the academicians O. Bohomolets (1945) and A. Palladin (1946), a statue of Lesia Ukrainka (1947) in Lutske, and many statues of Soviet leaders.

Muraviov, Volodymyr [Muravjov], b 15 June 1885 in Kherson, d 23 May 1963 in Kiev. Plant pathologist; corresponding member of the AN URSR (now ANU) from 1951. A graduate of Kiev University (1910), he was director of the laboratories at the Myronivka Experimental Selection Station (1924–9) and the Ukrainian Scientific Research Institute of the Sugar Industry (1929–46) and then worked at the ANU Institute of Entomology and Phytopathology (as director in 1950–63). He was also a professor at the Masliivka Institute of Selection and Seed Cultivation (1925–31) and Kiev University (1932–5).

Muravsky, Pavlo [Muravs'kyj], b 30 July 1914 in Dmytrashkivka, Olhopil county, Podilia gubernia. Conductor and teacher. In 1941 he graduated from the Kiev Conservatory in the class of H. Taranov. He subsequently

conducted the Dumka chorus (1941, 1946–8, and 1964–9) and was artistic director and main conductor of the *Trembita chorus in Lviv (1948–64). In 1949–55 he taught at the Lviv Conservatory and since 1969 has been a lecturer and professor at the Kiev Conservatory.

Murovani Kurylivtsi [Murovani Kurylivci]. v-8. A town smt (1990 pop 6,700) on the Zhvan River and a raion center in Vinnytsia oblast. It is first mentioned in historical documents in 1493. It was recognized as a town in 1775 and as an smt in 1956. Its chief industry is food processing. Some architectural monuments, among them an 18th-century palace and park and several 19th-century mansions, have been preserved.

Volodymyr Mursky

Mursky, Volodymyr [Murs'kyj], b 10 November 1888 in Lviv, d 19 July 1935 in Istanbul. Civic and political activist and publicist. A teacher by profession, he was deported from Galicia by Russian forces during the First World War. In the revolutionary period he was an adviser to the UNR Ministry of Foreign Affairs and director of the press and propaganda department. In 1921 he became a member of the Council of the Republic in Poland. After emigrating to Austria he served the UNR government-in-exile as its envoy to Turkey. In addition to journalistic articles in Ukrainian, Polish, and Turkish, he wrote two books on Ukraine in Turkish, as well as several translations.

Murzak-Koba. A Mesolithic settlement of the *Tardenoisian culture on the left bank of the Chorna River, Crimea. Excavations in 1936 and 1938 revealed a number of stone tools (cutters, scrapers), bone and horn items (needles), and animal bones (deer, boar, bear). The site is best known for the recovery of a burial in which the women's skeletal remains indicated that her phalanges (little fingers) had been severed.

Murzakevich, Nikolai [Murzakevič, Nikolaj], b 3 May 1806 in Smolensk, d 28 October 1883 in Odessa. Historian and archeologist of Belarusian descent. He studied in Smolensk and Moscow before becoming a professor of Russian history and director of the Richelieu Lyceum in Odessa. He was a founding member of the *Odessa Society of History and Antiquities, and he edited and contributed numerous articles to its *Zapiski*. His area of specialization was the archeology of Southern Ukraine.

Murzakevich's autobiography was published posthumously in 1886 and in the serial *Russkaia starina* (1887–9).

Murzhenko, Oleksii [Murženko, Oleksij], b 23 November 1942 in Kharkiv oblast. Dissident. In March 1962, while studying at the Moscow Institute of Finance, he was arrested for founding the Freedom of Thought student organization and sentenced to six years in the Vladimir prison near Moscow, and in labor camps in the Mordovian ASSR. After his release he lived in Lozova, Kharkiv oblast, where he was subjected to constant KGB harassment. In June 1970 he, Yu. Fedorov, and 10 Jewish dissidents (E. Kuznetsov, M. Dimshits, and others) were arrested for attempting to hijack a plane in Leningrad to Sweden. Murzhenko was sentenced to 14 years in special-regime labor camps in the Mordovian ASSR and Perm oblast. He was rearrested in June 1985 and sentenced to two years' imprisonment. Upon his release in 1987 he was allowed to emigrate to the West with his family.

Muscovy. See Russia.

Museology. See Museums.

Museum of Anthropology and Ethnology (Muzei antropolohii i etnolohii im. F. Vovka). An ethnographic museum established in 1921 by the VUAN in Kiev as an extension of the *Cabinet of Anthropology and Ethnology. F. *Vovk's collection, archives, and library, brought from Leningrad according to Vovk's will, formed the museum's core. Later the collection of the museum of the Ukrainian Scientific Society was added to its holdings. O. Alesho served as the museum's first director and was succeeded by A. Onyshchuk. In 1934 both the cabinet and the museum were closed down, and many of the workers were persecuted by the state.

Museum of Ethnography and Handicrafts. See Ukrainian State Museum of Ethnography and Crafts.

Museum of Historical Treasures of Ukraine (Muzei istorychnykh koshtovnostei Ukrainy). A state museum established in Kiev in 1969 as a branch of the *Historical Museum of the Ukrainian SSR (custodian, V. Bondar). Located on the grounds of the Kievian Cave Historical-Cultural Preserve, the museum is the major Ukrainian repository (approx 130,000 objects) of artifacts made from precious metals and stones by the *Scythians (20,000 gold objects, exhibited in three halls), ancient Slavs (one hall), Kievan Rus' artisans (one hall), 14th- to 19th-century Ukrainian goldsmiths (one hall), 17th- to 19th-century Russian jewelers (one hall), and modern Ukrainian jewelers (two halls). It also has a numismatic collection dating as far back as the 6th century BC and a collection of Russian and European medals. Several photo albums of the museum's Scythian objects have been published.

Museum of Kiev's History (Muzei istorii Kyieva). A museum opened in Kiev in May 1982 during the celebrations of Kiev's 1,500th anniversary. It is housed in 19 halls in the upper two stories of the former Klov Palace (designed by J. Schädel and built in 1756 by P. Neelov and S. Kovnir). About 8,000 exhibits dealing with Kiev's archeology, history, and current life, based on holdings of over

100,000 items, are on display. The museum sponsors the Experts on Kiev club (Kyievoznavtsi) and public lectures, and supervises the rotunda in Kiev's Askoldova Mohyla Park, the Pecherske Gate in Independence Square (formerly October Revolution Square), a house in Kiev where Peter I stayed, and the Hryhorii Svitlytsky Memorial Museum. An illustrated guidebook to the museum was published in Russian in 1988, and the Experts on Kiev club has published numerous bibliographic guides to various aspects of the city's history and historiography.

Museum of Literature of Ukraine (Derzhavnyi muzei literaturny Ukrainy). The main museum of literature in Ukraine. It was opened in Kiev in July 1986 in the building which once housed Galagan College. Over 35,000 books (including old, rare, and first editions), manuscripts, photographs, posters, newspapers, and writers' personal items are in its inventory; 5,000 of them are displayed in 15 rooms. Memorial corners for the writers P. Tychna, M. Rylsky, Yu. Yanovsky, A. Malyshko, M. Bazhan, and Yu. Smolych have been created there.

Museum of Slobidska Ukraine (Muzei Slobidskoi Ukrainy im. H. Skovorody). A museum founded in Kharkiv in January 1920, on the premises of the former Kharkiv Museum of Art and Industry. With historical, fine art, and ethnographic divisions, as well as a library, the museum had an all-Ukrainian profile (despite its name) and was considered one of the finest in Ukraine. Its stated mandate was to study Ukrainian folkways, primarily of *Slobidska Ukraine, by collecting, restoring, and classifying its cultural artifacts. The museum focused particularly on Ukrainian architecture, tiled stoves, folk musical instruments, woodcraft, women's headdresses, embroidery, kilims, and guilds. After three years of difficult circumstances, including relocation, the confiscation of the artifacts in two of its divisions, and the death of its first director, M. *Sumtsov, the museum revived and began to renew its activity. The exhibits of its historical division were based on the collections of the former Museum of Fine Art and Antiquity at Kharkiv University, the Kharkiv Historical-Philological Society, and the Church Museum at the Kharkiv Eparchial Consistory, as well as on new acquisitions. They included maps, paintings, and photographs of 18th- and 19th-century Kharkiv, portraits of the hetmans and political activists of 18th-century Slobidska Ukraine, and memorabilia of Ukraine's literary giants. The fine art division received the estate of S. *Vasylykivsky, who originated the idea of a museum of Slobidska Ukraine in Kharkiv. Besides 500 of his own paintings, the collection included the works of I. Aivazovsky, M. Berkos, O. Kulchytska, S. Mako, L. Pozen, O. Sodomora, K. Trutovsky, M. Uvarov, and T. Shevchenko. The ethnographic division incorporated the holdings of the former Ethnographic Museum of the Kharkiv Historical-Philological Society, which had acquired the exhibits of the Twelfth Archeological Conference (Kharkiv, 1902). It was subdivided into seven groups, covering dwellings, dress, diet, measuring instruments, artisanship, art, and children's toys. The museum's most important collectors, researchers, and activists were M. Sumtsov, D. Zelenin, D. Bahalii, O. Nikolaiev, R. Dankovska, M. Riedin, Yu. Zelynsky, I. Yerofeiv, and M. Horban. The museum was closed down during the Stalinist terror of the 1930s. It was suc-

ceeded after the Second World War by the Kharkiv Historical Museum.

O. Maryniak

Museum of Sports Fame of Ukraine (Muzei sportyvnoi slavy Ukrainy). The first museum devoted solely to the history of physical education and sports in the Russian Empire and the USSR, opened in May 1970. Its exhibits (over 3,000) include photographs of the first USSR champions and record holders, of the opening of the Central Stadium in Kiev, and of the graduates of the first Institute of Physical Culture in Ukraine; portraits of all Soviet Olympic champions; the medals of the first All-Russian Olympiad in Kiev (1913); the first soccer Ukraine Cup; and prizes and medals won by Ukrainian athletes in Soviet, Olympic, and other international competitions.

Museum of the Book and Book Printing of Ukraine (Muzei knyhy i knyhodrukuvannia Ukrainy). A state museum established in Kiev in 1972 (International Year of the Book) and opened to the public in 1975. A precursor to the museum, the Museum of Ukrainian Writing and Printing, was founded in 1924 and shut down by the Stalinist authorities in 1934. It was housed in a former building of the Kievan Cave Monastery Press that was built in the early 17th century. The museum's 3,000 exhibits in five halls chronicle the development of book writing and printing in Ukraine. Facsimiles and original copies of rare medieval manuscripts, old printed books, and incunabula, examples of early and modern printing technology, first editions of 19th- and 20th-century Ukrainian books and other publications, and original book illustrations and bookplates are on display. An illustrated guidebook to the museum was published in 1981. A new exhibition of *bookplate art (over 1,000 works by more than 200 artists, including H. Narbut, O. Kulchytska, Ya. Muzyka, and S. Hebus-Baranetska) was opened in 1987.

Museum of Ukraine's Struggle for Independence: military exhibit, including pottery made by Ukrainian internees in the German POW camp in Rastatt

Museum of Ukraine's Struggle for Independence (Muzei vyzvolnoi borotby Ukrainy). A repository in Prague of books, artworks, artifacts, and archives of the 1917–21 struggle for Ukrainian independence voluntarily

deposited by Ukrainian émigré figures and organizations. The museum was founded in 1925 by a group of Ukrainian war veterans and professors at the Ukrainian Free University. It was funded solely by donations, mostly from the United States (particularly by K. *Lysiuk), Canada, and the Ukrainian Bureau in London. The museum was owned by a society (140 members in 1943) headed by I. Horbachevsky (1925–35), S. Smal-Stotsky (1935–8), A. Yakovliv (1939–?), and D. Doroshenko (?–1945). Until 1945 the museum's director was D. *Antonovych, and the assistant director was S. *Narizhny. The museum had about 1 million items. They were exhibited in three and then six rented rooms and kept in three garages. A building to house the museum was bought only after enough money had been raised, in 1938. It opened in 1939.

The museum had invaluable archival holdings, including the archives of various UNR diplomatic missions, the *Union for the Liberation of Ukraine, the Ukrainian Sich Rifleman, Ukrainian POW camps in Germany during the First World War, Ukrainian internment camps in Poland and Czechoslovakia after the war, and the Ukrainian Republican Kapelle, literary manuscripts, and the correspondence of figures such as O. Barvinsky, M. Yevshan, B. Lepky, Ya. Vesolovsky, and Metropolitan V. Lypkivsky. It had an impressive art collection (paintings and over 1,400 engravings donated by émigré artists and collectors); sets of approx 1,200 Ukrainian periodicals; a Ukrainian numismatic and currency collection; a collection of Ukrainian military uniforms, weapons, army photos, documents, and reports; and a large library consisting of over 70 book collections (including those of Antonovych, A. Artymovych, V. Bidnov, S. Cherkasenko, B. Lepky, K. Matsievych, I. Mirny, O. Kolessa, and Smal-Stotsky), antique maps of Ukraine, J.B. Homann's *Atlas Novus* (1716), and a collection of calendars. The museum published its own bulletin, *Visty*, irregularly in 1925–36 and then quarterly.

In February 1945 the museum was hit by an Allied bomb, and its offices and a large part of its holdings were destroyed. During the Soviet military occupation of Prague access to the remainder was restricted. From November 1945 the museum functioned minimally and was called the Ukrainian Museum. At that time its executive council was headed by Yu. Dobrylovsky and K. Zaklynsky, and its director was Narizhny. In March 1948 the Czechoslovak government closed down the museum and confiscated its remaining holdings. Part of the archive was taken to Moscow, and the rest was deposited in the state archive in Prague. The Slavonic Library in Prague received most of the museum's library holdings.

A. Zhukovsky

Museum of Ukrainian Culture in Svydnyk. See Svydnyk Museum of Ukrainian Culture.

Museums. Institutions for art objects, antiquities, and other cultural goods that have been divested of their sacred and functional qualities. In museums they serve the secondary purposes of preservation, classification, and education. Private collections are the most reliable sources for replenishing damaged or destroyed museum collections.

Ukraine before Soviet rule. In the period of Kievan Rus' valuable private collections belonged to the Kievan, Galician-Volhynian, and appanage princes. The only arti-

facts that could be seen by the general public were the artworks gracing cathedrals and monasteries and those held in sacristies. Many churches in Ukraine amassed large collections of artifacts. The sacristies of the St Sophia Cathedral, the Kievan Cave Monastery, the St Michael's Golden-Domed Monastery, and the Cathedral of the Transfiguration in Chernihiv are known to have contained priceless collections. Incursions by nomadic tribes and internecine fighting among the princes caused considerable damage to those holdings. Also, much was lost during the sacking of Kiev by Andrei Bogoliubskii in 1169. The greatest losses were sustained during the Mongol-Tatar invasions of the 13th century, which only individual artifacts survived. They are still being found in archeological excavations. Some are housed in Russian and other museums. The Lithuanian-Polish state-sponsored private collections suffered a similar fate. In the 14th to 17th centuries countless ornamented implements and artworks (probably similar to those of Western Europe) were assembled in the castles of magnates and on the estates of lords. Many of them were destroyed in the uprisings of the mid-17th century.

For subsequent times, lists of holdings in the collections of various palaces, including paintings, furniture, and decorative tableware, are extant. Diaries of Ukrainian Cossack officials also catalog their acquisition of jewelry and folk musical instruments. The renewed accumulation of artifacts was a reflection of the Ukrainian national and cultural revival in the 18th century. The most distinguished patron of the time was Hetman I. Mazepa.

Russian-ruled Ukraine. In the late 18th century a numismatic collection already existed at the Basilian school in Uman (eventually transferred to the Kremianets Lyceum). In 1809 an archeological collection was opened at the Hydrographic Bureau in Mykolaiv. Similar museums were opened in Teodosiia (1811), Odessa (1825), and Kerch (1826). Of them the Odessa Municipal Museum of Antiquities had the most valuable collection; it later became the first public museum in the Russian Empire. Formal schools of museology were established in the late 18th and early 19th century.

M. Berlynsky, K. Lokhvytsky, and M. Maksymovych were central figures in the development of museums in Kiev. The first to be established was the Archeological Museum at Kiev University (est 1835). Part of its exhibitions were formed from archeological digs conducted by Lokhvytsky, V. Antonovych, M. Ivanyshch, D. Samokvasov, O. Stavrovsky, and Ya. Voloshynsky; the collection of the archeological museum of the Higher Courses for Women was donated to it in 1916. The Numismatics Cabinet was opened in the university's library in 1835 (overseen by Antonovych in 1872–1908), with its exhibits drawn from the collections of the Kremianets and Vilnius lyceums.

The Kiev Society of Church Archeology at the Kiev Theological Academy organized a museum, headed by M. Petrov, with a large and valuable collection of artifacts (approx 20,000) in 1872. The collection included Palestinian and Cypriot treasures (gathered by Archimandrite A. Kapustin), Byzantine icons of the 4th to 15th centuries, particularly encaustic icons (Bishop P. Uspensky), eastern shrines (A. Muravev), and church relics (M. Leopardov). Similar societies in Chernihiv, Kamianets-Podilskyi, Poltava, and Zhytomyr founded treasuries of antiquities from the local eparchies.

Independent museums were organized in central Ukraine by various groups of enthusiasts, community institutions, and local administration officials. Among them were the Museum of the Odessa Society of History and Antiquities (founded in 1843, based on the municipal museum), the Yelysavethrad Museum at the Realschule (1883), the Historical Museum of the Chernihiv Scientific Archival Commission (1896), and the Volhynian Museum (1900, founded by the Volhynia Research Society). The Kiev Museum of Art and Industry was founded by the Kiev Society of Art and Antiquities in 1904, with the collections of O. Bobrynsky, K. Bolsunovsky, B. and V. Khanenko, S. Mazarka, M. Tarnovsky, and S. Znosko-Borovsky. The *Kiev Society for the Preservation of Ancient and Artistic Monuments (est 1910) was active throughout the central gubernias. As well, private collectors devoted considerable effort to establishing museums, including V. Tarnovsky in Chernihiv (the museum opened in 1901, with exhibits relating to the Cossack-Hetman state), O. Pol in Katerynoslav (1902, reorganized as a museum of Zaporozhian Cossack history by D. Yavornytsky), B. and V. Khanenko (1919, the *Kiev Museum of Western and Eastern Art), V. Babenko in Vovchanske (1911, artifacts from his archeological digs), and K. Skarzhynska in Lubni (folk art).

During that time many unique and valuable artifacts, including Scythian and ancient treasures, Cossack standards, and items from I. Zabelin's excavations, were transported en masse to imperial holdings in St Petersburg and Moscow.

Western Ukraine under Austrian rule. Exhibits were opened of the collections of the Lubomirski (1823) and Dzieduszycki (1871) families, and the first public archeological exhibition in Lviv was held in 1861. In the 1870s an endowment was established for the first Ukrainian museum at the *People's Home in Lviv, and it was formally opened in 1901. The Lviv Pharmacy Museum, located in the three-story premises of the original pharmacy (est 1735) on Rynok Square, is one of the city's oldest extant museums.

Priceless collections of icons, old manuscripts (see *Paleography), tapestries (see *Weaving), coins, archeological artifacts, and folk art were assembled by the Shevchenko Scientific Society (founded in 1873, its collection opened as an independent museum in 1914), the *Stauropigon Institute (founded in 1788, its collection opened as a museum in 1889), and the *National Museum in Lviv (reorganized in 1908 from the church museum of Metropolitan A. Sheptytsky). These collections were also displayed in museums in Peremyshl, Chernivtsi, and Ternopil.

Ukraine under Soviet rule. The Revolution of 1917 brought about vast changes in the way private and community cultural goods were preserved. It resulted in the massive destruction of countless ornamented implements from aristocratic estates, religious items, and peasants' tools. A considerable share of individual artifacts and collections held privately (eg, by M. Hrushevsky, V. Krychevsky) was lost. Ukraine also lost various items of Polish origin as a result of the Peace Treaty of Riga between the USSR and Poland. The Soviet Ukrainian government in Kharkiv created the All-Ukrainian Committee for the Preservation of Ancient and Artistic Monuments (1919), with sweeping powers at the county, raion, volost, and village levels, in order to nationalize all museums,

private historical and art collections, public monuments, and other cultural and scientific treasures. The stated purpose of 'systematizing cultural property and preventing its theft, destruction, or exportation' was in fact a pretext that allowed the committee itself to steal, destroy, and export: museum funds were plundered, campaigns of expropriation of church valuables were conducted (1922), public burnings of icons were held (1931), and priceless artifacts from museums were sold abroad for foreign currency. Many items also disappeared during the course of the transfer and reorganization of institutions.

The efforts of Ukrainian museum officials, such as F. Ernst, D. Shcherbakivsky, and S. Taranushenko, rescued many collections from destruction. The Tereshchenko and Hansen family collections were the foundation of the Kiev Picture Gallery (see *Kiev Museum of Russian Art, 1922), and the Branicki family holdings went into the Bila Tserkva Archeological and Ethnographic Museum. Other artifacts provided the basis for the *Sumy Art Museum (1920, drawn largely from O. Hansen's collection), the Konotop Regional Museum (1920, drawn from S. Ponomarev's collection), and other *regional studies museums.

Ukrainian museum development reached its zenith in the 1920s. The country's museums consolidated, organized, and exhibited perhaps the finest examples of Ukraine's cultural heritage. In 1923 the *Kiev Museum of Church Antiquities was transferred to the Kievan Cave Monastery, and the collection of the Numismatic Cabinet at Kiev University was used to establish the holdings of the All-Ukrainian Museum Quarter's numismatic department. A new category of museum came into being, the Museum of the Revolution, with the express purpose of explaining and propagandizing the history of communism and the revolutionary movement. In 1926 the All-Ukrainian Museum Quarter was established on the site of the Kievan Cave Monastery, and was later reorganized as the *Kievan Cave Historical-Cultural Preserve (director, P. Kurinny). The site housed the Lavra Museum of Religious Cults and Folkways, the Museum of Architecture, the Potocki Museum of Ukrainian Antiquity, the VUAN Theater Museum (see *Kiev Museum of Theater, Music, and Cinema Arts), the Museum of Archeology of the Cabinet of Anthropology and Ethnology of the VUAN, the All-Ukrainian Restoration Workshop, and the archives and library of the monastery. The monastery's shrines and churches were also opened as museums.

A Party commission oversaw the return of many artifacts which had been taken to Russia. In 1927 the academic journal *Ukrains'kyi muzei* began publication. The role of a national Ukrainian museum was assumed by the All-Ukrainian Museum of History, founded in 1925 with the collections of the Kiev Museum of Art and Industry (director M. Biliashivsky). Other prominent museums included the Kharkiv Museum of Ukrainian Art (see *Kharkiv Art Museum), founded on the basis of the collection of the Museum of Church History (director, S. Taranushenko), and the VUAN Museum of Ukraine's Figures in Scholarship and Art (custodian, Ye. Rudynska).

In the Stalinist terror of the 1930s all the aforementioned institutions, as well as a substantial number of lesser ones, were liquidated, and their employees were persecuted and arrested. On 25 September 1937 *Pravda* in Moscow reported that more than 20 museums had been looted, their holdings sold, and an untold number of

priceless artifacts destroyed. Among the institutions that perished was the Museum of the Myrhorod Ceramic School, which had been active for 35 years and had amassed an impressive collection of European and Asian ceramic works. The Museum of Agriculture in Kiev was despoiled, as was the Tarnovsky Collection in Chernihiv and the Potocki Museum at the Kievan Cave Monastery. The Museum of Archeology and History in Odessa (see *Odessa Archeological Museum) was closed. The fate of the collections of the museums in Cherkasy, Shepetivka, Zvenyhorod, Kupianka, and Nizhen is unknown.

During that period exhibitions in museums were created to illustrate basic Marxist-Leninist dogma and to serve as antireligious propaganda. Special 'antireligious museums' or 'museums of atheism' were established in churches and shrines, the largest of them in St Volodymyr's Cathedral in Kiev and in the Poltava Museum. Original artifacts were removed and were replaced primarily by displays of diagrams, quotations, and slogans written in huge letters. Virtually all of the museums in Ukraine lost their true character as depositories of valuable cultural and historical property. Of the 120 museums which existed during 1917-32, 95 remained: 13 museums of the Revolution, 6 historical museums, 46 regional museums, 16 art museums, 7 literary memorial museums, 3 antireligious museums, and 1 museum of Hebrew culture. Ukrainian materials were virtually excluded from exhibits, or (as in the case of art museums) they were displayed only alongside Russian materials, with a heavy preponderance of the latter. Among museum employees only a few were Ukrainian.

Ukrainian cultural property suffered incalculable and massive damage during the Second World War. Artifacts were evacuated into the depths of the USSR, or detonated in booby traps set by the retreating Soviet army and security organs, or confiscated or destroyed by the German occupational forces. Among the museums annihilated outright were the Archeological Museum and the *Museum of Slobidska Ukraine in Kharkiv and the Poltava Museum.

Interwar Western Ukraine and the émigré community. Ukrainian museums were maintained systematically and continued to develop in interwar Western Ukraine. Central to the effort was the work of I. *Svietsitsky, the director of the National Museum in Lviv. Western Ukrainian scholars established a network of regional museums, encompassing the Hutsul (in Kolomyia, est 1926 by V. Kobrynsky), Boiko (in Sambir, est 1927 by V. Kobilnyk), Lemko (est 1930, see *Lemkivshchyna Museum), and Sokal (in Sokal, est 1937 by B. Chaikovsky) regions. In Prague D. Antonovych was the director of the *Museum of Ukraine's Struggle for Independence, founded in 1925. Its holdings included diplomatic and military material, as well as material on the history of the Ukrainian emigration. The collection was transported into the USSR after the Second World War. In 1952, 1,743 exhibits of the National Museum (including paintings by H. Narbut, M. Boichuk, P. Kholodny, and P. Kovzhun) were destroyed at the *spetsfond of the *Lviv Scientific Library of the AN URSR.

Postwar Soviet Ukraine. Whereas in 1940 there was a total of 174 museums in Ukraine (counting the ones nationalized when the Soviets invaded Western Ukraine), only 119 museums survived the war. By 1950 their number had increased to 137 (compared to 542 in the RSFSR, 937

in the USSR). Newly established museums were for the most part named after events or figures of the 'Great Patriotic War.' As in the fields of history and historiography, exhibits concentrated on recent years and decades (eg, the *Exhibition of Economic Achievements of the Ukrainian SSR) and treated earlier periods in a cursory or distorted fashion. All museums came under the jurisdiction of the Administration of Museums and Preservation of Cultural Landmarks, an organ of the Ministry of Culture of the Ukrainian SSR. Among them were nearly 1,000 'people's museums,' supposedly maintained and staffed entirely by volunteers, which were supervised by local Party and Soviet organizations.

Museums in postwar Soviet Ukraine had several common characteristics: (1) they were headed by Party functionaries who knew little or nothing about the material they oversaw; (2) their budgets and salaries were miserly, the result being a scarcity of qualified workers (especially in art *restoration) and an extremely high rate of turnover; (3) their collections were housed in poorly maintained structures, often entirely unsuited for conservation and exhibition; (4) they contributed to the repression of Ukrainian culture by confiscating artifacts, rewriting history, and serving as propaganda vehicles for the state; and (5) their holdings (particularly the Lviv museums, the Kievan Cave Historical-Cultural Preserve, and the Lubni Regional Studies Museum) were often misappropriated by directors and employees out of various motives (for personal gain, or in the interest of preserving certain artifacts).

Nevertheless, a few notable museums emerged in Ukraine in the 1960s to 1980s, including the *Museum of Historical Treasures of Ukraine, the *Museum of Kiev's History, and the *Pereiaslav-Khmelnytskyi Historical Museum. In 1988 there were 201 museums in the Ukrainian SSR (compared to 1,130 in the RSFSR and 2,207 in the entire USSR). According to official attendance figures the most popular museums were in Kiev – the award-winning *St Sophia Museum, the Kievan Cave Historical-Cultural Preserve, the Central Scientific Natural History Museum, the Ukrainian State Museum of the History of the Great Patriotic War, and the branch of the Central Lenin Museum – and in Sevastopol – the Museum of the Heroic Defense and Salvation of Sevastopol and the Aquarium-Museum.

The number of objects (in millions) inventoried in Ukrainian museums increased from 3.6 in 1970 (30 in the RSFSR, 43 in the USSR) to 5.6 in 1980 (35, 56) and 8.1 in 1987 (41, 68). The number of employees working in Ukrainian museums increased from 3,950 in 1970 to 8,700 in 1980 and 10,750 in 1987. It is noteworthy, however, that the floor space officially allotted to museums in Ukraine decreased by over one-half (2.1 million sq m in 1985 to 1 million sq m in 1987), whereas it increased in every other Soviet republic during the same period. The proportion of floor space in Ukrainian museums allocated for exhibition space (25 percent vs 35–65 percent elsewhere in the USSR) and storage space (5 percent vs 8–18 percent) was lower than in all other Soviet republics (except the Tadzhik SSR).

The West. Ukrainian museums of various kinds, organized by scholarly, religious, and community groups, are to be found on every continent where Ukrainians live. Among the most notable are the *Ukrainian Cultural and Educational Centre 'Oseredok' (Winnipeg), the *Niagara Falls Art Gallery and Museum, the *Ukrainian Museum of

Canada, the *Ukrainian Museum (New York), the *Ukrainian Museum-Archives (Cleveland), the *Ukrainian National Museum (Chicago), the Ukrainian-American Archives, Museum, and Library (Detroit), the *Petliura Ukrainian Library (Paris), and the *Svydnyk Museum of Ukrainian Culture. An exhibition of Ukrainian ethnography was opened at the Canadian Museum of Civilization in Ottawa in 1991. Many Ukrainian exhibits are also to be found in Poland, in the Silesian Museum in Wrocław, the Poznań and Warsaw ethnographic museums, and the Polish Military Museum in Warsaw.

Museums of folk architecture and folkways. The name of skansens or open-air museums in Ukraine. Open-air museums were introduced in Sweden in 1891 as offering an effective way of preserving folk architecture. By 1982, they had spread from there, and numbered more than 2,000 in Europe alone. In Ukraine there are 5 central and over 20 local and regional open-air museums. Most of them were built in the 1970s and 1980s on the model of foreign museums. Considered an important educational source, they are state-supported. Ukrainian open-air museums are devoted mostly to peasant cottages, with their furnishings and farm buildings, from the 19th and early 20th century. The 'class' differentiation within the prerevolutionary village in Ukraine was stressed in the displays. Churches, bell towers, schools, artisans' workshops, mills, and related structures occupy an important place in the museums. Virtually all of the buildings are original; replicas or reconstructions are the exception. The farms are stocked with livestock and fowl, and fields are planted with the local grains and vegetables. Trees and wild plants typical of the region are maintained.

Women in regional folk costumes take care of the artifacts on display, and craftsmen, such as weavers, smiths, potters, and shingle makers, demonstrate old techniques in the workshops. These activities convey an impression

Buildings at the Museum of Folk Architecture and Folkways of Ukraine in Kiev

of daily life. The museums often host concerts, festivals, souvenir markets, and thematic exhibits. They also have designated rest and recreation areas.

The largest museum of folk architecture and folkways in the former USSR is in Kiev. When completed, it will be the largest such museum in the world. Its construction began in 1971 on a 150-ha site in a forest and park zone of the Pyrohiv district near the Exhibition of Economic Achievements of the Ukrainian SSR. By the summer of 1976 the first part had been opened to visitors. By 1985 the museum included 250 buildings and about 50,000 artifacts, such as costumes, woven products, implements, ceramic and wooden objects, and over 700 musical instruments. The museum site is divided into seven zones that correspond to the architectural-ethnographic regions of Ukraine at the beginning of the 20th century: the Middle-Dnieper region, the Poltava region, Slobidska Ukraine, Polisia, Podilia, the Carpathian region, and southern Ukraine. In each zone a typical village was reconstructed; the Middle Dnieper village, for example, is laid out along a main road with a central square, the Polisian village is scattered unevenly around a main road, and the Carpathian village is a set of unconnected farmsteads. The church is the dominant building in almost every zone. Some rare old churches have been moved here: St Michael's Church (built in 1612) from Dorohynka, Kiev region; one built in 1742 from Zarubynsi, Cherkasy region; a 17th-century church from Kysorychi, Volhynia; a Podilian church from Zelene (1817); and a Transcarpathian church from Ploske (1742). A group of windmills is assembled in a separate area.

In 1979 an eight-zone (12-ha) site was opened devoted to the socialist village. It exhibits the typical buildings of contemporary collective farms in Ukraine and is divided into six architectural-ethnographic regions: Polisia, the western forest-steppe, the eastern forest-steppe, the central forest-steppe, the steppe, and the Carpathians. Each subzone contains one or two farms and four or five buildings typical of the region. The farm cottages are furnished with contemporary, often factory-made, furniture, homemade articles, and folk handicrafts (embroidery, weavings, ceramics, engraved or embossed wooden articles, and painted artifacts). There are also religious items. In the future an archeological department, a prerevolution-

ary rural settlement, restoration and souvenir workshops, and an administrative and scientific building are to be added to the museum.

The Lviv Museum of Folk Architecture and Folkways occupies 67 ha of the Shevchenko Park. The idea of an open-air museum in Lviv was proposed first by I. *Svientsitsky in the 1930s, but only one wooden church (built in 1763) was moved to the site, from Kryvka near Turka. The church now serves as the museum's centerpiece. Construction of the skansen began in 1967, and the first part of its exhibition was opened in 1972. The original plan was to relocate 150 buildings, excluding minor structures, at the site. By 1980, 74 buildings had been moved and over 10,000 artifacts assembled at the museum. The Lviv open-air museum presents the folk architecture of Western Ukraine. Its territory is divided into eight historical-ethnographic zones: the Boiko, Hutsul, Lemko, and Lviv regions and Podilia, Polisia, Bukovyna, and Volhynia, and one area represents the old town. Each zone includes 15 to 20 buildings which constitute a distinctive miniature village. The Boiko zone has been completed; the others are still under construction.

The more outstanding structures in the Lviv open-air museum are a church (built in 1778) from Sokoliv, Ternopil region; St Michael's Church (1863), with a belfry from Tysovets, Lviv region; the Church of the Holy Trinity (1774), with a belfry from Chernivtsi; a chapel (1752) from Yalynkuvate; a belfry (1887) from Komarivka, near Brody; a school (1880) from Busovysko; a Lemko cottage from Zaricheve, in Transcarpathia; a Hutsul **grazhda* from Kryvorivnia; a chicken coop (1860) from Oriavchyk; an oil press (1811) from Holovetske, a water mill from Lybokhora; windmills from Shyryvtsi (Bukovyna) and Pidsynivka (Volhynia); a felt press from Pylypets, in Transcarpathia; smithies from Turie (1870) and Krasnoiliv; a Boiko sawmill from Velykosillia; Hutsul beehives from Kuzmynets and Zamahoriv; a shepherd's shed from Krynychna meadow; and a granary (1880s) from Pidlyssia.

Construction of the Pereiaslav-Khmelnyskyi Museum of Folk Architecture and Folkways began in 1965 on Tatar Hill, within the city. By 1980 it contained 140 structures from various oblasts, spread over a 30-ha site. The archeological department has preserved or reconstructed some ancient buildings, such as a house from the 11th century and the Cherniakhiv culture, a 10th-century pottery oven, wooden frame walls from 10th-century Kiev, a square and pagan altar from the Trypilian period, and an early-14th-century house. There is also a wooden Cossack church (built in the 17th century) from Ostriiky, Bila Tserkva raion, a church from Andrushy (1767), and one from Viunyshche (1833), in Pereiaslav-Khmelnyskyi raion.

The collection consists of several peasant cottages of the 19th century, representing the landless, middle, and wealthy peasantry, and the houses of rural artisans (potter, oil maker, carpenter, weaver, tanner, cooper, and miller). The museum also has a collection of 14 windmills, 2 water mills, a parish school, a rural tavern, a community granary, a drying house, a village council hall with a jail, a large (8-ton) oil press, a hunting lodge, an arbor, and the upper structures of wells. In late 1982 a beekeeping museum based on F. Khvostyk's apiary in Pomokli, near Pereiaslav-Khmelnyskyi, was added. It is the only museum of its kind in Ukraine.

The Transcarpathian Museum of Folk Architecture and

Folkways in Uzhhorod was established in 1965 and opened in 1970 on the slopes of Zamkova Hill. The relatively small site (3.5 ha) includes 13 rural houses, a *grazhda*, water mill, smithy, sawmill, felt press, lumbermen's cabin, shepherd's shed, tavern, schoolhouse, and beehives. St Michael's Church, from Shelestove (18th century), hovers over the village. One-half of the exhibition is devoted to the architecture of the Transcarpathian lowlands (Ukrainian, Rumanian, Hungarian), and the other half to the buildings of the Transcarpathian highlands (Boiko and Hutsul).

The Chernivtsi Museum of Folk Architecture and Folkways was opened in 1983 in the tourist area, not far from the city center. It contains monuments of Bukovynian folk architecture.

A network of smaller local museums based on the Uzhhorod open-air museum was established in Transcarpathia. They consist of houses, churches, belfries, and sometimes farm or industrial buildings which have been preserved in their original locations or have been moved to a different place within their villages. Ethnographic museums housed in single cottages were formed in Antonivka, Buklyve, Horyncheve, Neresnytsia, Osii, Ternove, Vilnytsia, and Zubivka. There is an interesting milling complex in Monastrets and a restored wooden dam (of the mid-19th century) and a log-driving, lumbering museum on the Chorna River, near Synevyr Lake. The wooden churches in Steblivka (built in 1780), Krainykovka (1688), Danylove (1709), Neresnytsia (1798), Oleksandrivka (17th century), and Sokyrnytsia (18th century) have been converted into museums. A few wooden churches from Ukrainian villages in Transcarpathia were transferred to Czechoslovakia in the interwar period. In Bronka and Dovhe peasant cottages have been reconstructed and turned into museums; in Petrove a whole complex of old rural buildings has been erected.

In the late 1970s or early 1980s regional museums of folk architecture and folkways were built in Kamianets-Podilskyi (representing Podilia), Kharkiv (Slobidska Ukraine), Lutske (western Polisia), Chernihiv (eastern Polisia), and Korosten (central Polisia).

Artifacts of Ukrainian folk architecture have been preserved in museums outside the country, in Czechoslovakia, Poland, Rumania, and Canada. In 1975 construction of an open-air exhibition at Svydnyk, the *Svydnyk Museum of Ukrainian Culture, was started. The first section (10 structures) was opened in 1981. The 7-ha site will include 45 buildings from Ukrainian villages in the Prešov region.

In 1963 an open-air museum was set up in Bardejovské Kúpele. It has over 30 buildings, virtually all of them from Ukrainian villages of the Prešov region. In 1977 construction of similar museums began in Stará L'ubovňa and Humenné. Most of the buildings in them are Ukrainian. A few Ukrainian peasant houses and farm buildings are part of the Slovak Village Museum in Martin. Some 27 wooden churches in the Prešov region were designated national monuments of Slovakia in 1968, and in 1979 the easternmost Ukrainian village, Osturňa, with its 236 houses and 1,100 inhabitants, was declared a state reservation of folk architecture.

The Sianik Museum of Folk Architecture contains the largest number of Ukrainian buildings in Poland. It was opened in 1968 and is now the largest Polish museum of

its kind (103 structures in 1979). It includes a church from Graziowa (1730), many Lemko and Boiko houses and farm buildings, and a large collection of Ukrainian icons and ethnographic materials. Much attention is devoted to the Ukrainian exhibits in the museum's official publications, *Materialy Muzeum budownictwa ludowego w Sanoku* and *Acta scansenologica*. Ukrainian folk architecture can be found also in the Ethnographic Park in Nowy Sącz, the Folk Building Center in Szembark, and other museums. A museum of Lemko culture was opened in Zyndranowa in the 1960s.

Rumanian open-air museums, such as the Muzeul Satului in Bucharest and similar museums in Suceava, Tulcea, and Sighetul Marmăției, have holdings from Ukrainian villages.

In 1975 the *Ukrainian Cultural Heritage Village near Edmonton was set up. Sponsored by the provincial government of Alberta, it includes pioneer artifacts and buildings and features re-enactments of daily life in rural Alberta before 1930.

M. Mushynka

Yurii Mushketyk

Mykola Mushynka

Mushketyk, Yurii [Mušketyk, Jurij], b 21 March 1929 in Vertiivka, Nizhen raion, now in Chernihiv oblast. Writer and community activist. He graduated from the philological faculty at Kiev University (1953) and received his candidate's degree there. For many years he was editor of the journal *Dnipro* and headed the Kiev oblast writers' organization and in 1986 he became the first secretary of the executive of the *Writers' Union of Ukraine. He is the author of numerous novels and novelettes, many of them on historical subjects, such as *Semen Palii* (1954), *Haidamaky* (Haidamakas, 1957), and *Iasa* (1987), and many about contemporary life, such as *Den' prolitaie nad nany* (The Day Flies above Us, 1967), *Bila tin'* (White Shadow, 1977), and *Vernysia v dim svii* (Return to Your Home, 1981). Of par-

ticular note is the finely written satirical novel *Obval* (The Crumbling Away, 1985). Mushketyk has also written novels for children, the documentary novel *Na kruti hory* (Onto Steep Mountains, 1976), the play *Ne kydai mene v dorozhi* (Don't Forsake Me on the Way, 1969), the critical biography *Anatolii Shyian* (1960), and other works. As first secretary of the Writers' Union of Ukraine Mushketyk has taken an active role in the struggle for the rebirth of the Ukrainian language and Ukrainian culture.

Mushrooms (Ukrainian: *hryby*). A popular name for nonflowering, fleshy fungi of the order Agaricales, mostly of the class Basidiomycetes, also Ascomycetes. Mushrooms have a spore-producing, umbrella-shaped fruiting body which emerges from an extensive underground network of threadlike mycelia. As long as nourishment is available and temperature and moisture are suitable, a mycelium will provide a new crop of mushrooms each year.

Composed of 90 percent water and less than 3 percent protein, mushrooms have low nutritional value but are prized for their taste. A few kinds are considered as choice edibles. Mushrooms have been an important component of the daily diet and traditional foods of Ukrainians from time immemorial, especially in the regions of Volhynia, Polisia, the Carpathian Mountains, and Subcaucasia. The harvesting and processing of mushrooms (drying, curing, marinating, or salting) represent an important segment of local commercial activity. Early commercial ventures in the Carpathian region, based in Lviv and managed by *Tsentrosoiuz, date from 1939.

By far the largest group of mushrooms found in Ukraine is the Boletaceae family (genus *Boletus*). They include the king bolete (*B. edulis*; Ukrainian: *bilyi hryb, pravdyvyi, borovyk*), edible bolete (*B. scaber*; Ukrainian: *berezovyk, pidbereznnyk, babka temna*), mossy mushroom (*B. variegatus*; Ukrainian: *mokhovyk zhovto-buryi*), butter mushroom (*B. elegans*; Ukrainian: *masliuk modrynovyi*), orange cup (*B. versipellis*; Ukrainian: *osykovyk, babka chervona*), *B. granulatus* (Ukrainian: *masliuk zernystyi*), slippery jack (*B. luteus*; Ukrainian: *masliuk, sosnak*), and *B. subtomentosus* (Ukrainian: *mokhovyk zelenyi, reshitka*). Found during summer and autumn months in both deciduous and coniferous forests, all these boletes are edible. Other species common in Ukraine are from the Agaricaceae family. Among them are the meadow/field mushroom (*Agaricus campestris/arvensis*; Ukrainian: *pecherytsia stepova/polova*), honey mushroom (*Armillaria mellea*; Ukrainian: *openok osinnii spravzhnii, pidpenok*), common milk cap (*Lactarius deliciosus*; Ukrainian: *ryzhyk smachnyi*), chanterelle (*Cantharellus cibarius*; Ukrainian: *lysyhka, kurka*), and russula (*Russula delica/xerampelina/vesca*; Ukrainian: *syroizhka bila/voniucha/istyvna, holubinka*). A favorite mushroom in North America, the morel (*Morchella esculenta/conica*; Ukrainian: *smorz, zmorshok*), is considered conditionally edible in Ukraine.

Among the most toxic mushrooms are representatives of the genus *Amanita* (Ukrainian: *mukhomory*), including the destroying angel (*A. virosa*; Ukrainian: *mukhomor bilyi voniuchy*), death cap (*A. phalloides*; Ukrainian: *mukhomor zelenyi, blida pohanka*), fly agaric (*A. muscaria*; Ukrainian: *mukhomor chervonyi*), and the panther and lemon *Amanitas*. Almost 90 percent of all mushroom poisonings are caused by the pale greenish death cap. These species grow

from June to mid-October. Among other poisonous mushrooms in Ukraine are the sulfur tuft (*Naematoloma fasciculare*; Ukrainian: *openok nespravzhnii*), lorchel or false morel (*Gyromitra/Helvella esculenta*; Ukrainian: *strochok zvychnyi*), and *Entoloma lividum* (Ukrainian: *rozhevoplastynyk otruinyi*).

Along with berries and herbs mushrooms are extremely susceptible to contamination by radiation (esp cesium-137). Even in 1991, five years after the nuclear explosion at the Chornobyl Atomic Energy Station, mushroom picking was forbidden in Kiev and Zhytomyr oblasts in the area above the Kiev-Korosten line.

I. Masnyk

Mushynka, Mykola [Mušynka] (Mušinka, Mikulaš; pseud: M. Hnatiukivsky), b 20 February 1936 in Kuriv, Bardejov county, Czechoslovakia. Ukrainian folklorist. After graduating from Prague University (1959) he completed his graduate studies in Kiev and Prague (1967) universities and worked in the department of Ukrainian studies at the Prešov campus of Košice University (1966–71). He founded and edited *Naukovyi zbirnyk Muzeiu ukrains'koï kul'tury u Svydnyku* (1965–70). Because of his contacts with Ukrainian dissidents and Ukrainian émigrés he was expelled from his job and forbidden to publish. He was not reinstated in a research position until 1990. Mushynka has written over 300 studies, articles, and reviews, mainly on folklore and the culture of Ukrainians in Czechoslovakia. He compiled two anthologies of Ukrainian folklore in eastern Slovakia (1963 and 1967) and a collection of the folk songs sung by A. Yabur (1970). Besides a study of the folklore of the Ruthenians of Vojvodina (1976) and a biography of O. Zilynsky (1983) he has published several monographs on V. *Hnatiuk: *Volodymyr Hnatiuk-doslidnyk folkl'oru Zakarpattia* (Volodymyr Hnatiuk: Researcher in the Folklore of Transcarpathia, 1975), *Volodymyr Hnatiuk: Bibliohrafiia drukovanykh prats'* (Volodymyr Hnatiuk: Bibliography of Printed Works, 1987), and *Volodymyr Hnatiuk: Zhyttia ta ioho diial'nist' v haluzi folkl'orystyky, literaturoznavstva ta movoznavstva* (Volodymyr Hnatiuk: His Life and His Work in the Field of Folklore Studies, Literary Scholarship, and Linguistics, 1987). Mushynka has contributed numerous articles to and served as subject editor of ethnography for the *Encyclopedia of Ukraine*.

D.H. Struk

Musianovych, Yaroslav [Musjanovyč, Jaroslav], b 31 January 1915 in Yavoriv, Galicia. Émigré community leader in France. He studied medicine in Grenoble and Lyon and then practiced in Lyon and Paris. He headed the Ukrainian National Alliance in France (1949–61) and the *Ukrainian Central Civic Committee in France (1979–87). After 1961 he headed the Ukrainian Movement for a Federated Europe (consisting of Ukrainian members of the federalist European Movement) for many years, as well as the Society of Former Combatants of the Ukrainian Republican Democratic Army in France (1979–82).

Music. Ukrainians are known popularly as a musical people with a remarkable legacy of folk songs and talented performers.

Medieval Ukraine. During the Middle Ages in Ukraine, three kinds of music developed. The first was music-making at the courts of the princes and boyars. Groups of musicians, local and foreign, resided at the princely courts and performed during festivals and banquets, praising the prince and entertaining the guests. Wandering musicians and actors, the **skomorokhy*, entertained their listeners with songs and acrobatic tricks. Many musical instruments were in use at that time in Ukraine, including stringed harps, metal and wooden trumpets and horns, wooden pipes, drums, and kettle-drums.

The first church music and its performers came from Byzantium and Bulgaria. These foreign musicians were the earliest conductors of local choirs and the first music teachers. Local influences began to be felt, however, with the increasing numbers of local musicians and performers of religious music. In the second half of the 11th century, the Kievan Cave Monastery became the center for the development of religious music in Ukraine. The chief characteristics of religious music at that time were a cappella singing and monophony. The melodies were recorded in a nonlinear notation, called *znamenna*, written in above the words of the liturgical services. Another type of nonlinear notation was the *kondakarna* notation, which was used to note down liturgical singing, specifically the *kontakia*.

The third major type of music consisted of folk songs. These accompanied all significant events in a person's life and reflected the spiritual characteristics and the worldview of the Ukrainian people. Songs which were connected with ritual calendar changes figured prominently: the New Year carols (*koliadky* and *shchedrivky*), the rich cycle of spring rusalica songs, songs of the midsummer Kupalo festival, and so on. A large part of the repertoire was made up of songs associated with family and everyday life, as well as love songs and historical songs.

14th to 17th centuries. Church brotherhoods had an influential role in the development of music in Ukraine during this period. The brotherhoods in Lviv, Peremyshl, Ostrih, Lutske, and Kiev were particularly active in their religious educational work and founded schools in which prime importance was given to the study of church music and music theory. A significant innovation was the introduction of polyphonic singing, leading to the development of the five-line notation called *kyivske znamia* that replaced the non-linear notation. The 'musical grammar' written by the musicologist and composer M. Dyletsky in 1675, was a complete description of the theory of polyphonic music. This work was rewritten and republished many times and in the 17th and 18th centuries became one of the basic texts of music theory throughout Eastern Europe. A favorite musical form of the time was the *partesnyi* concert, an a cappella composition for choir, consisting of one movement written to a religious text. Two music registers belonging to the Lviv Dormition Brotherhood in 1697 record 398 works by Ukrainian composers for 3 to 12 voices. Most of the works (120) are for 8 voices.

18th and 19th centuries. The 18th century witnessed a paradoxical situation in which Ukrainian music started to reach a higher level of maturity and sophistication that was ultimately absorbed by Russian musical develop-

ment. The bases for developing a talented core of Ukrainian musical talent were expanding at this time. The Kievan Mohyla Academy had an orchestra and choir comprising up to 100 musicians and 300 singers. The Hlukhiv Singing School, founded in 1738, provided thorough education for future musicians. Cossack *starshyna* families supported musical ensembles, if not whole orchestras, the most notable of which was found at the court of K. Rozumovsky.

But the musical talents of Ukraine usually did not remain in Ukraine; they were being drawn into the developing Russian musical life on an ever-increasing scale. The start of this trend could be seen already in the late 17th century, when Dyletsky was summoned to Moscow by the tsar to teach the rudiments of polyphonic singing, and in the early 18th century with the appointment of I. Popovsky as the preceptor of the imperial court choir (and his subsequent recruitment of singers from Ukraine). This tendency became particularly pronounced after the Rozumovsky family had established itself at the St Petersburg court in the 1740s and began seeking out talented musicians from Ukraine, such as M. Poltoratsky, for service in the imperial capital. Likewise, the most talented graduates of the Hlukhiv school were routinely brought to St Petersburg to further their musical education.

The outcome of these practices can be seen by the late 18th century, when a trio of the most talented Ukrainian musicians of the age – M. Berezovsky, D. Bortniansky, and A. Vedel – composed exceptional works that became commonly regarded as 'Russian' music in the West. By the 19th century, Ukrainians, while still providing a source of recruits for musicians in Russia, had lost the dominant position (outside the Italian opera) they had earlier held in the Russian musical life of the St Petersburg court. In Ukraine itself musical life failed to develop much further than the level of traveling theater companies performing operettas or operas with broad thematic appeals (most notably S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube* and M. Arkas's *Kateryna*). Another area of indistinction between the two musical cultures was evident in folk music. The first compilations of Russian folk music, undertaken in the later 18th century by V. Trutovsky and I. Prach, include Ukrainian songs. Over time these 'Little Russian' numbers were increasingly accepted as an integral part of the Russian musical heritage and employed by Russian composers (notably M. Mussorgsky and P. Tchaikovsky) in their works.

The provincial state of Ukrainian musical life began to change only in the late 19th and early 20th centuries. Ironically one of the main instruments of this renewed development of Ukrainian musical life was the Russian Music Society, which established music schools (that later became conservatories) in Kiev, Kharkiv, and Odessa. The society restored a certain level of music training in Ukraine and cultivated a taste for refined music at least among certain segment of the population, providing the rudiments of an institutional and social base for later Ukrainian musical development.

Western Ukraine to the mid-19th century. Ukrainian musical life in Galicia saw some significant developments in the early 19th century. The main focus of Ukrainian musical life was in Peremyshl, where a distinctive school of music was initiated by M. Verbytsky and I. Lavrivsky. The group had close connections with the Peremyshl

Choir (est 1829) and the Peremyshl Music School, and influenced the work of subsequent composers, such as V. *Matiuk, S. *Vorobkevych, and A. *Vakhnianyn. A second trend in Ukrainian musical life of this period was the development of an interest in Ukrainian folk music. In part this came about under the rubric of a general interest in the music of the peoples of the former Polish Commonwealth, which was studied by musicologists such as W. *Zaleski and K. *Lipiński. Folk music was also studied by Ukrainians (eg, the members of the *Ruthenian Triad). The general level of musical life in Western Ukraine was raised by the establishment of a singing school in Lviv, initially through the St Cecilia Society begun in 1826 through the efforts of F.X. Mozart, and then with the founding of the Lviv Conservatory in 1830. The latter school, however, functioned largely as a Polish institution and did not actively foster Ukrainian musical development.

Late 19th and early 20th centuries. Considerable efforts were made in this period to develop a Ukrainian national school of music comparable to those established among the Poles, Czechs, Russians, and Norwegians. The key figure in this process was M. *Lysenko, who collected and arranged a large number of Ukrainian folk songs and studied them in order to establish their cultural specificity. By 1904 Lysenko was able to found a school of music in Kiev that served as a major center for the fostering of Ukrainian music and musicians. He also toured through Ukraine with choruses under his baton in order to spread the sound of Ukrainian music.

Lysenko's work had a marked influence in Western Ukraine, where Ukrainians had not been subject to the same sort of state strictures as those under Russian rule. The study of Ukrainian folk music there had been able to develop at a considerable pace, Ukrainian music activists had been able to establish printing houses for the publication of music, and the *Boian music society had built an effective network throughout Galicia. In this milieu composers such as F. *Kolessa, O. *Nyzhankivsky, D. *Sichynsky, H. Topolnytsky, and (later) S. *Liudkevych were able to come to the fore and establish a degree of professionalism in all aspects of musical culture. As well, the *Lysenko Higher Institute of Music was established in Lviv in 1903 to foster further Ukrainian musical development.

A high-water mark for the development of a Ukrainian national school of music was reached in 1917–22, when the Lysenko Music and Drama School in Kiev was expanded into an institute, a state *Ukrainian Republican Kapelle was formed, and a group of composers (including M. *Leontovych, K. *Stetsenko, and Ya. *Stepovy) was recruited to come to Kiev to work for the new state institutions of Ukrainian musical life. These advances were short-lived, however. Leontovych, Stetsenko, and Stepovy all met early deaths (by 1922), the Republican Kapelle fled to the West, and the institutional base for Ukrainian musical development was unable to develop fully. The situation in Western Ukraine remained somewhat more promising, as musical life was allowed to develop without overt state interference, and the Lysenko Higher Institute of Music was able to establish a full network throughout Galicia before it was dismantled with the Soviet invasion of 1939.

Soviet Ukraine. The establishment of Soviet power in Ukraine has proved to be a mixed blessing for musical de-

velopment. State support for the art has strengthened the *music education system, underwritten the printing of musical journals and scores, and provided steady employment for musicians, composers, and music critics. The state, however, has often fostered mediocre work in its demand for ideological conformity and in its effort to maintain socialist realism as a cultural policy. Consequently, a large repertoire of lackluster works dedicated to Lenin, the glory of the Party, the memory of the Second World War, heroic women workers, and like themes has been commissioned over the years. In spite of these constrictions, composers such as L. *Revutsky, B. *Liatoshynsky, V. *Barvinsky, S. *Liudkevych, V. *Kosenko, V. *Kostenko, B. *Yanovsky, A. *Shtoharenko, K. *Dankevych, Yu. *Meitus, P. *Maiboroda, and A. *Kos-Anatolsky have produced interesting and challenging works.

Four Ukrainian composers in Lviv in 1927. From left: Antin Rudnytsky, Vasyl Barvinsky, Stanyslav Liudkevych, Pylyp Kozytsky

The most open period for musical composition in Soviet Ukraine was the 1920s, before the onset of Stalinism. A major body for the promotion of Ukrainian musical development at that time was the *Leontovych Music Society, which was formed in 1922 and sponsored the flagship music journal *Muzyka. The Lysenko society was dissolved in 1928 as a result of government pressure and restructured as a more pliable body, the All-Ukrainian Society of Revolutionary Musicians (Ukrainian acronym: VUTORM), which itself was renamed Proletmuz in 1931 and replaced by the *Union of Composers of Ukraine in 1932. In the 1930s the Soviet regime established the concept of socialist realism as a norm for artistic activity, and the result was a wholesale retreat from the sort of composing done in the 1920s.

The ideological pressure eased somewhat only in the 1960s. The relaxation allowed for a whole group of young composers to use the newest means of musical expression. The members of this group, who went by the name 'Kiev Avant-Garde,' were L. *Hrabovsky, V. *Sylvestrov, V. Hodziatsky, V. Zahortsev, and V. Huba. The appearance of this group created much interest abroad, especially in the United States, although in Kiev their achievements did not reach beyond a narrow circle of listeners. The composers M. *Skoryk, L. *Dychko, and, among the younger generation, Ye. *Stankovych, I. *Karabyts, and others have

created original syntheses of the traditional with the modern.

A lighter musical form that developed in 20th-century Ukraine was stage music (*estradsna muzyka*) or, in a more general sense, popular music. The art songs written by composers such as P. Maiboroda constituted an early form of this genre. Popular stage music, however, came into its own in Ukraine only in the late 1960s and early 1970s, with the development of a musical style based largely on North American rock and Europop models mixed with folk themes. The *estradsna* style was emulated by many Ukrainian youth bands outside Ukraine.

Outside Ukraine. A small number of Ukrainian composers have worked outside Ukraine, although financial constraints have usually rendered it impossible to develop a full career from the writing of Ukrainian scores. The most notable of these figures have worked in Canada and the United States; they include M. *Haivoronsky, R. *Prydatkevych, O. *Koshyts, and P. *Pecheniha-Uhlytsky before the Second World War and A. *Rudnytsky, V. *Hrudyn, M. *Fomenko, G. *Fiala, and I. *Sonevytsky after it. A number of Ukrainians within the general realm of the North American musical world, most notably L. *Melynk and V. *Baley, have also composed works.

Music criticism. A branch of musicology that provides readers of periodical publications with a professional opinion about musical events and phenomena. The first Ukrainian music critics appeared in the early decades of the 20th century; among them were S. Liudkevych, V. Barvinsky, P. Kozysky, and, later, A. Rudnytsky and N. Nyzhankivsky. The development of music criticism benefited from the founding of the music periodicals **Muzyka*, *Muzyka masam*, and, later, **Ukrains'ka muzyka* and the growth of musical institutions throughout Ukraine. Subsequently, new critics began to publish their work, among them I. Belza, M. Mykhailov, M. Hordiichuk, V. Hoshovsky, and M. Zahaikevych. In émigré publications, the most prominent critics are P. Matsenko, R. Prydatkevych, A. Rudnytsky, M. Fomenko, V. Hrudyn, A. Olkhovsky, W. Wytwycky, R. Savysky Jr, A. Vyrsta, and T. Yuskiv. Many articles of music criticism have appeared in *Visti* (Minneapolis, 1962–71), *Suchasnist'*, and other émigré periodicals.

Music education. Until the 19th century, music education in Ukraine was conducted largely in an ecclesiastical setting, in a small number of higher educational institutions, and through private teaching. Of major importance were the singing schools at various monasteries and cathedral churches in the 15th to 17th centuries. The musical training given at these was extended by the training offered in brotherhood schools as well as at the *Kievan Mohyla Academy. Music education in Ukraine was expanded further in the 18th and 19th centuries. The first professional music school in Ukraine, the *Hlukhiv Singing School, was established in 1738, although it actually functioned largely as a training center for musicians to be recruited into the imperial Russian service. Vocal and instrumental classes were taught at Kharkiv College from 1773, lectures in music theory took place at Kharkiv University from the time of its establishment in 1805, and music courses continued to be taught at the Kievan academy after it was turned into a theological institute. Music was also taught by members of music guilds, seminaries, teachers' colleges, and music schools attached to serf, army, and municipal orchestras (most notably in Kiev). Advanced music education was commonly obtained by travel abroad. Private music tuition, usually by foreign music teachers, was also widespread.

Civic music societies increasingly became concerned with music education during the late 19th century. The *Russian Music Society (RMS), which had branches in Kiev, Kharkiv, and Odessa, was particularly significant in this regard, although it functioned largely as an all-empire institution rather than one dedicated to specifically Ukrainian needs. The other most notable music associations of the period were centered in Kiev and included the Amateur Choir Society (conducted by M. Lysenko in the 1870s–1890s), the choir of the St Sophia Cathedral, the Kiev Society of Music Lovers, and the student choir of Kiev University. The *Boian music society also established branches in Kiev and Poltava. The *Lysenko Music and Drama School, established in 1904, operated as an institution primarily dedicated to developing Ukrainian music. Within the Russian Empire, however, the most advanced musical training was available at the Moscow and St Petersburg conservatories. This situation changed only in 1913, when the RMS music schools in Kiev and Odessa were converted into conservatories.

Music education increasingly became a state concern in Ukraine after 1917. The Lysenko school was combined with the Kiev Conservatory in 1918 to become the *Lysenko Music and Drama Institute (until it reverted to the *Kiev Conservatory in 1934); the *Kharkiv Conservatory was established in 1917; and the *Odessa Conservatory was maintained in various guises until it reverted to its original form in 1934. Music education was further expanded with the creation of seven-year elementary music schools, high schools specializing in music education, and the postsecondary Kharkiv Music Institute and Donetske Musical Pedagogy Institute.

Music education in Western Ukraine underwent a separate development. Until the 20th century it was closely tied to churches and preceptor schools. The most important of these was located in Peremyshl, with others situated in Lviv, Stanyslaviv, Uzhhorod, and Chernivtsi. A conservatory was located in Lviv, but it existed as a Polish rather than a Ukrainian institution. The first Ukrainian music school was established in 1903 by the Union of Song

and Music Societies and became in 1907 the *Lysenko Higher Institute of Music. The school developed a network of branches in several Galician towns and was active until 1939. The Prosvita Society was also active in music education by organizing courses for conductors. After the Soviet occupation of Western Ukraine, the Lysenko institute was replaced by the *Lviv Conservatory.

Ukrainian music education outside Ukraine first took the form of courses offered in Prague at the Ukrainian Free University and the Ukrainian Higher Pedagogical Institute during the interwar years. A short-lived attempt to establish a Ukrainian conservatory in New York was made in 1924 by M. Haivoronsky and R. Prydatkevych. Music courses were offered in Canada on an irregular basis through the 'higher education courses' for the training of cultural activists, sponsored by associations such as the Ukrainian Labor Farmer Temple Association and the Ukrainian National Federation. From 1953 to 1985 the Lysenko Music Institute, under the directorship of I. Kovaliv, was active in Toronto. The most developed organization for music education, however, remains the *Ukrainian Music Institute of America, which was founded in 1952 and has branches in several American cities. In more recent times the Ukrainian Choral Federation of Canada and other music associations have begun sponsoring advanced workshops for music specialists.

W. Wytwycky

Music journals. Periodical publications dedicated to Ukrainian music developed only in the 20th century. The earliest publications of this type were short-lived efforts that appeared in Galicia. The first was **Muzychnyi kalendar-al'manakh*, published in Lviv in 1904–7 by R. Zarytsky. The 10 issues of the Lviv-based *Artystychnyi vistnyk* that appeared in 1905–7 contained a music section edited by S. Liudkevych. Later attempts included *Muzychnyi lystok* (1925), *Boian* (1929–30), and *Muzychni visty* (1934). In 1937–9 the monthly **Ukrains'ka muzyka* was published as the official medium of the Union of Ukrainian Professional Musicians in Lviv.

In Soviet Ukraine, the monthly **Muzyka* started publication in Kiev in April 1923 and proved to be very influential. It continued to appear under various titles until 1941. *Muzyka* started publication once more in Kiev in 1970 as the bimonthly organ of the Ministry of Culture of the Ukrainian SSR, the Union of Composers of Ukraine, and the Music Society of the Ukrainian SSR. It is an important chronicle of Ukrainian musical scholarship and events (within the parameters afforded by state control), with M. Hordiichuk, A. Shtoharenko, and others on its editorial board.

A number of small or short-lived émigré Ukrainian musical journals were established after the Second World War. The Dnipro choir in Twin Cities, Minnesota, published *Visti* in 1962–71. Its editor-in-chief was O. Kostiuik, and some of its contributors were P. Matsenko, Z. Lysko, R. Prydatkevych, O. Zalesky, and O. Bryn. It was succeeded briefly in 1971 by **Muzychni visti*, published in Jersey City. Since 1981 the New York School of Bandura has published the bilingual (Ukrainian-English) journal *Bandura*. The journal is dedicated to the art, repertoire, history, and construction of the instrument, and to literary works featuring the bandura or bandurysts; its managing editor is N. Czorny. *Bandura* has printed or reprinted articles by H. Khotkevych, H. Kytasty, Z. Shtokalko, L. Maistrenko,

R. Levytsky, V. Lutsiv, A. Hornjatkevych, and V. Mishalov.

W. Wytwycky

Music societies. Associations whose purpose was to provide a strong civic base for musical performance and development began appearing in Ukraine in the 19th century. The first such formations were the St Cecilia Music Society (1826) and the Society for the Advancement of Music (1838) in Lviv, which were created through the efforts of F. *Mozart; and the *Torban society, which was active in Lviv and other Galician centers in 1869–71. In the 1890s a series of *Boian music and song societies were established in Western Ukraine, which created the *Union of Song and Music Societies in 1903. The union was renamed the *Lysenko Music Society in 1907. It played a vital role in Western Ukrainian musical life until it was dissolved in 1939. In Russian-ruled Ukraine the most active civic musical association was the *Russian Music Society, which formed branches in Kiev (1863), Kharkiv (1871), and Odessa (1884) and sponsored music schools. After the revolution the most active Ukrainian music association was the *Leontovych Music Society. Formed in 1922, the group was active until 1928, when it was supplanted by the All-Ukrainian Society of Revolutionary Musicians, which in turn became Proletmuz in 1931 and the *Union of Composers in Ukraine in 1932. It was not until 1959, with the formation of the *Music Society of Ukraine, that a music association with a significant civic base again existed in Ukraine.

W. Wytwycky

Music Society of the Ukrainian SSR (*Muzychne tovarystvo Ukrainy*). A voluntary association of professional musicians and amateurs. Founded in 1959 as the Choral Society of the Ukrainian SSR, it became the Music and Choral Society of the Ukrainian SSR in 1967, Music Society of the Ukrainian SSR in 1975, and was renamed in 1990 as the All-Ukrainian Musical Association. The society organizes music competitions, festivals, master classes, and training seminars for the conductors of amateur choirs and instrumental ensembles. In 1984, its membership included 3,584 groups with over 128,500 individuals. It has been headed by P. Kozytsky (1959–60), S. Kozak (1960–73), M. Kondratiuk (1973–85), and D. Hnatiuk (since 1985). In 1992 it had 500 members, and its president was A. Avdiievsky.

Musical instruments. See Folk musical instruments.

Musical instruments industry. A branch of industry that manufactures various string and wind instruments. In Ukraine some *folk musical instruments, such as *banduras and **tsymbaly*, are mass-produced in factories in Lviv and Chernihiv; others are made by hand in small numbers. Before the 1920s there was little manufacturing of musical instruments in Ukraine. By 1980 there were 12 instrument factories, located in Kiev (wind instruments), Odessa (pianos, bow instruments), Zhytomyr (accordions), Lviv (folk instruments), Poltava (accordions and electric accordions), Chernihiv (pianos, string instruments), and Izmail (guitars). The output of instruments in Ukraine has dropped considerably, from 32,000 pianos and 191,000 accordions in 1970 to 17,000 and 32,000 respectively in 1987.

Musicians' guilds (*muzykantski tsekhy* or *muzychni bratstva*). Professional associations of musicians existing in the larger cities of Ukraine in the 16th to 19th centuries. With the introduction of Magdeburg law in the 14th century, Ukrainian craftsmen and merchants began to organize themselves into *guilds. The earliest-known Ukrainian musicians' guilds appeared in Kamianets-Podilskyi (1578) and Lviv (1580). In 1652 Hetman B. Khmelnytsky organized all musicians of Left-Bank Ukraine into a regional guild with H. Illiashenko-Makushenko as guild master. Other musicians' guilds appeared in Poltava (1662), Kiev (1677), Pryluka (1686), Starodub (1705), Nizhen (1729), Chernihiv (1734), Kharkiv (1780), and other places. Guild members reserved the right to perform in towns, villages, market squares, and inns, at weddings, funerals, and other social occasions. In addition to providing services for their members and undertaking certain civic duties, they maintained equitable fee structures and offered musical training for young musicians. The most important guild was in Kiev, which formed the Kiev City Orchestra in the 17th century and provided the basis for the Kiev Music School (1768). Competition from the growing numbers of city orchestras and serf instrumental ensembles and the overall decline of the guild system caused the musicians' guilds to disappear by the end of the 19th century.

Musicology. Most of the early writings on Ukrainian musicological themes have dealt with the description or compilation of Ukrainian folk music. Later writings dealt with the history of Ukrainian musical development. Many primary texts and monographs have been published on these subjects, and several overview histories were undertaken.

The study of musical *folklore developed intensively during the 19th century. An important starting point was the publication of a large collection of Ukrainian folk song texts edited by M. *Maksymovych (1827), who, in a detailed introduction, emphasized the differences between Russian and Ukrainian folk songs. Further ethnomusicological studies were carried out in the second half of the 19th century by P. *Sokalsky, M. *Lysenko, and O. *Rubets, and in the early 20th century by F. *Kolessa, S. *Liudkevych, and V. *Shukhevych. Their work was later continued by K. *Kvitka, D. *Revutsky, M. *Hrinchenko, Z. *Lysko, and others. The musicological articles and reports resulting from this work commonly appeared in periodicals such as *Kievskaia starina*, *Literaturno-naukovyi vistnyk*, *Artystychnyi vistnyk*, and *Muzychnyi kalendar-al'manakh*.

The interwar period saw some significant undertakings in Ukrainian musicology. In 1922 M. Hrinchenko published the first significant history of Ukrainian musical development to the 20th century. The Lysenko Music Society enlivened the musicological field by publishing the journal *Muzyka* from 1923. In Western Ukraine a musicological commission headed by S. Liudkevych was formed in the 1930s, the journal *Ukrains'ka muzyka* (1937–9) provided some valuable articles on musicological themes, and B. *Kudryk published a survey of Ukrainian church music (1937). In Soviet Ukraine musicological work was severely

curtailed by the Stalinist repressions of the 1930s. Some research was still undertaken in the field, notably by A. Olkhovsky at the Kiev Conservatory. But the monograph resulting from his work, *Narys istorii ukrains'koi muzyky* (An Outline of the History of Ukrainian Music), was confiscated and destroyed shortly after its publication in 1941.

Since 1945 the conservatories and the AN URSR Institute of Fine Arts, Folklore, and Ethnography (IMFE) have been responsible for work in Ukrainian musicology. Some notable research has been undertaken by I. Belza, M. Hordiichuk, O. Dovzhenko, O. Shreier-Tkachenko, L. Arkhimovych, M. Zahaikevych, and others. Since 1964 the annual *Ukrains'ke muzykoznavstvo* has carried articles on the theory and history of music as well as on performance and folklore. The bimonthly periodical *Muzyka*, printed in Kiev since 1970, has also published musicological articles. Numerous brochures and monographs have been written on Ukrainian composers, among them M. Lysenko (by L. Arkhimovych and M. Hordiichuk), S. Hulak-Artemovskiy (L. Kaufman), K. Stetsenko (L. Parkhomenko), M. Leontovych (M. Hordiichuk), S. Liudkevych (M. Zahaikevych), F. Kolessa (S. Hrytsa), B. Liatoshynskiy (N. Zaporozhets), A. Shtoharenko (M. Borovyk), and H. Maiboroda (M. Hordiichuk). Monographs on great Ukrainian performers, such as S. Krushelnytska, O. Myshuha, M. Mentsynsky, and B. Hmyria, have also been published.

Some notable works on Ukrainian musicology have appeared in the West. They include O. Koshyts's *Spohady* (Memoirs, 1947–8) and *Z pisneiu cherez svit* (Around the World with Song, 3 vols, 1952–74). Monographs have been published about composers such as D. Bortniansky, M. Berezovsky, F. Yakymenko, A. Vedel, O. Koshyts, and M. Haivoronsky. Other noteworthy publications include P. *Matsenko's *Narysy do istorii ukrains'koi tserkovnoi muzyky* (Studies in the History of Ukrainian Church Music, 1968) and *Konspekt istorii ukrains'koi tserkovnoi muzyky* (A Synopsis of the History of Ukrainian Church Music, 1973); A. *Rudnytsky's *Ukrains'ka muzyka: Istorychno-krytychnyi ohliad* (Ukrainian Music: A Historical and Critical Survey, 1963) and *Pro muzyku i muzyk* (On Music and Musicians, 1980); and M. *Antonowycz's *Chants from Ukrainian Heimologia* (1974). Some musicological essays are found in *Zbirnyk na poshanu H. Kytastoho ...* (Anthology in Honor of H. Kytasty ..., 1980). In the field of musical folklore, *Ukrains'ki narodni melodii* (Ukrainian Folk Melodies), a projected 10-volume collection edited by Z. *Lysko, is of particular significance.

Starting in the 1950s there have been some attempts to write broader histories of Ukrainian music. Notable efforts include V. *Dovzhenko's two-volume *Narysy z istorii ukrains'koi radians'koi muzyky* (Essays on the History of Soviet Ukrainian Music, 1957, 1967), the collectively authored *Narysy z istorii ukrains'koi muzyky* (Essays on the History of Ukrainian Music, 1964), the collectively authored *Istoriia ukrains'koi dozhovtnevoi muzyky* (The History of Ukrainian Prerevolutionary Music, 1969), and O. Shreier-Tkachenko's *Istoriia ukrains'koi muzyky* (1980). While adding to the knowledge of Ukrainian musical development, these works are hampered by the shortcomings of Soviet Ukrainian scholarship, particularly in overstating Russian influences on Ukrainian culture (without acknowledging reciprocal Ukrainian influences on Russian cultural development) and in expounding

upon the benevolence and brilliance of the Soviet system and state. In addition, these works tend to be more narrative than analytical in style. Such shortcomings are also evident in the first volumes of the six-volume *Istoriia ukrains'koi muzyky* published by IMFE under the editorship of M. *Hordiichuk since 1989.

W. Wytwytycky

Musicus Bortnianskii. An independent professional Ukrainian-Canadian choral ensemble. Founded in Toronto in June 1981 by M. *Maksymiw, the group collects, researches, performs, and publishes classical Ukrainian choral music. Its repertoire includes baroque masterpieces, operatic selections, folk song arrangements, and new works by contemporary Ukrainian composers. The choir has issued the complete 35 sacred concertos of D. *Bortniansky and M. Fedoriv's *Jerusalem Matins* on its own recording label.

Musiichuk, Stepan [Musijčuk], b 1896 in Korshiv, Kolyomyia county, Galicia, d 2 October 1952 in Youngstown, Ohio. Community leader and clergyman. Having emigrated to the United States in 1911, he became active in the Sich movement and after the First World War edited the newspaper *Sich* (1920–3). Opposed to the hetmanite takeover of the movement, he joined the Organization of Democratic Siches. He was active also in the Ukrainian National Association, the United Ukrainian Organizations in America, and the Organization for the Rebirth of Ukraine. In the 1930s he was ordained in the Orthodox church. He was the author of the official songs of several Ukrainian organizations; his verses came out in two collections, *Na krylakh v Ukraïnu* (On Wings to Ukraine, 1946) and *Vichnym dukhom Ukraïny* (With Ukraine's Eternal Spirit, 1948).

Musiiko, Oleksander [Musijko], b 30 August 1903 in Musiiky, near Reshetylivka, Poltava county, d 30 November 1980 in Odessa. Plant breeder; corresponding member of the All-Union Academy of Agricultural Sciences from 1956. A graduate of the Poltava Agricultural Institute (1927), in 1939–71 he worked in the All-Union Selection and Genetics Institute in Odessa (as its director from 1958). His specialty was the selection and seed cultivation of agricultural plants. He produced new (Odessa) hybrids of corn, buckwheat, and rye.

Muskmelon (*Cucumis melo*; Ukrainian: *dynia*). A warm-climate, herbaceous annual plant of the gourd or squash family Cucurbitaceae, including the cantaloupe and the honeydew melon. The nutritious fruit is large and sweet, weighs 1–5 kg, and contains vitamin C, carotene, pectins, minerals, and 15–17 percent sugar. In Ukraine melons are grown in the steppes, the central chernozem zone, Transcarpathia, and even the north. Melons are picked selectively as they mature; late varieties may be picked green and allowed to ripen in storage. They are eaten fresh, baked, roasted, marinated, and candied; they are also

used to feed farm animals. Many Ukrainian varieties of melon have been developed and popularized.

Mussorgsky, Modest [Mussorgskij], b 21 March 1839 in Karevo, Pskov gubernia, Russia, d 28 March 1881 in St Petersburg. Russian composer and pianist. Regarded as one of the leading Russian musicians of the 19th century, he used Ukrainian themes and melodies in a number of his works. His symphonic picture *Night on Bald Mountain* (1867) was conceived on Kievan legends and displayed influences of the Ukrainian folk melos. Two of his songs for solo voice with piano, 'Hopak' and 'On the Dnieper' (Song of Yarema), were faithful Russian remakes of texts in T. Shevchenko's poem *Haidamaky* that reflected some modal characteristics of Ukrainian folk music. His comic opera *Sorochyntsi Fair* (based on Gogol's tale) utilized several Ukrainian folk songs and Ukrainian vocabulary, including Shevchenko's verse 'Utoptala stezhechku cherez iar' (I Trod a Path through the Gully). In this opera Mussorgsky used the jocose folk tune 'Na berezhku u stavka' (On the Pond's Bank), originally titled 'Hopak' and scored for mixed chorus and orchestra. In time this number became transcribed extensively for concert use, eg by F. Kreisler for violin and orchestra and by S. Rachmaninoff for piano solo and for symphony orchestra. Mussorgsky traveled through Ukraine in 1879 as an accompanist to a touring soloist.

Muzahet

Muzahet (from Greek, meaning 'leader of muses'). A symbolist literary and artistic group and journal founded in 1919. Some of the more important members and/or contributors to *Muzahet* were P. Tychyna, D. Zahul, K. Polishchuk, P. Fylypovych, Yu. Mezhenko, Ya. Savchenko, O. Slisarenko, V. Kobylansky, P. Kovzhun, and M. Zhuk. Although many of the works written by its members reflect more the modernism of *Moloda Muza or *Ukrains'ka khata than Western symbolism, they represent an attempt at Europeanization and a departure from the populist tendencies of the 19th century. The journal had only one issue (nos 1–3, 1919), which contained some im-

portant articles of literary theory and criticism by Zahul, Savchenko, and, especially, Mezhenko. It was primarily owing to Mezhenko's programmatic article ('Tvorchist' individuma i kolektyv' [The Creativity of the Individual and the Collective]), in which he argued for a nationally conscious artistic elite 'above the masses,' that *Muzahet* was outlawed by the authorities, and that both the journal and the organization ceased to exist. In pursuit of apolitical and artistic literary aims some of the members formed *Hrono, others joined *Aspys and then *Vaplite, and some (Savchenko) even joined the proletarian *Hart. Most, however, perished in the Soviet terror of the 1930s.

Muzhylovsky, Andrii [Mužylovs'kyj, Andrij], b and d ? Churchman and polemicist of the first half of the 17th century. He was an Orthodox priest in Slutsk, Belarus, and then a hieromonk of the Kievan Cave Monastery (1631). In 1631 he was the Cossack candidate for the office of metropolitan of Kiev, but he was opposed by King Sigismund III Vasa, who sent a letter to the voivode of Kiev to block the candidacy. He participated in the Kiev church council of 1628 that condemned M. *Smotrytsky's conversion to Catholicism, and he wrote the polemic *Antidot ...* (Antidote ..., 1629), in which he repudiated Smotrytsky's *Apologia* and defended the Orthodox leaders K. Ostrozky and S. Zyzanii.

Muzhylovsky, Syluiian [Mužylovs'kyj, Sylujan] (Samuil), b ?, d 1654. Cossack *starshyna* and diplomat; son of A. *Muzhylovsky. He was one of the students at the Kievan Cave Monastery School who delivered the panegyric 'Eucharisterion' to Metropolitan P. Mohyla on Easter Sunday in 1632. During the Cossack-Polish War he was Hetman B. Khmelnytsky's envoy in Moscow (with K. Burliai, 1649, 1653), Lithuania (1649), Turkey (1651), and the Crimean Khanate (1653). In 1649 he toured Ukraine as Khmelnytsky's representative with the Patriarch of Jerusalem, who greeted Khmelnytsky at the gates of Kiev. In 1654, as judge of Nizhen and Belarusian regiments, he participated in the Belarusian campaign of the acting hetman I. Zolotarenko, who killed him during a heated argument. While in Moscow in 1649, Muzhylovsky kept historically valuable notes; they were published in *Ukraina* (1914, no. 2).

Muzychenko, Oleksander [Muzyčenko], b 18 August 1875 in Stanyslav, Kherson county, d 1940. Pedagogue. After graduating from Odessa University he taught pedagogy at the *Nizhen Lyceum until 1917. After the Revolution of 1917 he was a leading member of the *All-Ukrainian Teachers' Association and campaigned actively for the establishment of *labor schools. Many of his ideas can be found in his monograph *Suchasni pedahohichni techii v Zakhidnii levropi i Amerytsi* (Contemporary Pedagogical Trends in Western Europe and America, 1919). Under the Central Rada he was the chief instructor of teachers for the Ministry of Education and a proponent of the Ukrainization of the educational system. He was also a member of the faculty of the Ukrainian Pedagogical Academy. In the 1920s he was a professor of pedagogy at the *Kiev Institute of People's Education and director of a local labor school. Renowned as an expert on elementary education, Muzychenko wrote several works about methodology in **Vil'na ukrains'ka shkola* and elsewhere, and the mono-

graphs *Chtenie i kul'tura slova v sovremennoi shkole* (Reading and the Culture of Language in Contemporary Schools, 1930) and *Chto takoe pedagogika i chemu ona uchiit?* (What Is Pedagogy and What Does It Teach? 1912).

Andrii Muzychka

Maksym Muzyka

Muzychka, Andrii [Muzyčka, Andrij], b 6 December 1886 in Dobrovody, Zbarazh county, Galicia, d 8 September 1966 in Semipalatinsk, Kazakhstan. Literary scholar. During the First World War he graduated from Lviv University and taught in gymnasiums in Zbarazh and Ternopil. In 1918–19 he was in the Ukrainian Galician Army. In the 1920s he taught at the Odessa Institute of People's Education and wrote books on the beginnings of modern Ukrainian literature (1925), Lesia Ukrainka (1925), I. Franko's poetry (1927), and M. Cheremshyna (1928), and articles on other writers in *VUAN* serials and in the journal *Chervonyi shliakh*. During the Stalinist terror of the mid-1930s Muzychka was deported to Kazakhstan. There he taught at the Semipalatinsk Pedagogical Institute. The AN URSR published his booklet on Lesia Ukrainka in Russian in 1956.

Muzychka, Ivan [Muzyčka], b 15 November 1921 in Pukiv, Rohatyn county, Galicia. Catholic priest and pedagogue; member of the Shevchenko Scientific Society since 1985. He graduated from St Josaphat's Ukrainian Pontifical College and the Urbanianum University (D TH, 1953) in Rome. He was ordained in 1951 and served as a priest in Great Britain in 1953–75. He became a professor of practical theology at the Ukrainian Catholic University in Rome in 1970 and served also as rector of the university (1980–5) and then rector of its St Sophia's College. Since 1975 he has been a member of the editorial board of the theological quarterly *Bohosloviia*, in which he has published several articles.

Muzychna Drama (Musical Drama). The first Ukrainian opera theater. It was established in Kiev in 1919 by the All-Ukrainian Music Committee (headed by L. Sobinov) and the All-Ukrainian Theater Committee (headed by K. Mardzhanishvili) with the active support of S. Bondarchuk, S. Butovsky, and L. Kurbas. Its chief conductor was Ya. Stepovy; chief opera director, M. Bonch-Tomashovsky; chief designer, A. Petrytsky; and chief ballet master, M. Mordkin. L. Kurbas and V. Haievsky worked at the theater as directors, O. Khvostenko-Khvostov as scenery designer, and L. Sobinov, M. Lytvynenko-Volge-

mut, O. Petliash-Bariotti, and P. Tseveych as soloists. The theater prepared M. Lysenko's *Utoplena* (The Drowned Maiden), Hutel's *Aziade*, S. Moniuszko's *Halka*, and M. Lysenko's *Taras Bulba*, but performed only the first two operas before Kiev was invaded by A. Denikin's army and the theater was dissolved.

Muzychna Ukraina (Musical Ukraine). A publishing house established in Kiev in 1966 which developed out of the music division of Mystetstvo publishers. The major producer of music editions in Ukraine, it has five editorial departments (musicology, Soviet songs and vocal music, instrumental music, textbook editions, and esthetic appreciation for children and youth). It publishes the series 'Ukrains'ka symfonichna muzyka' (Ukrainian Symphonic Music), 'Perlyny svitovoi muzyky' (Pearls of World Music), and 'Symfonichna muzyka XX stolittia' (Symphonic Music of the 20th Century), as well as the learner series 'Skrypka' (The Violin) and 'Fortepiano' (The Piano-forte). It also publishes the musicological series 'Tvorchi portrety ukrains'kykh kompozytoriv' (Portraits of Ukrainian Composers and Their Work), the annual *Ukrains'ke muzykoznavstvo*, the bimonthly periodical *Muzyka*, and *Muzychni vechory* (Musical Evenings), a monthly compilation of works for amateur ensembles.

Muzychni visti (Music News). A quarterly journal of music and the performing arts. Published by the Dnipro Choir in St Paul, Minnesota, under the name *Visti* from 1962, the journal was edited by O. Kostyuk. It contained articles on Ukrainian music and the performing arts and included P. Macenko, Z. Lysko, and R. Prydatkevych among its contributors. It moved briefly to Jersey City, New Jersey, in 1971–2, where it changed its name and was published and edited by M. Kots.

Muzychnyi kalendar-al'manakh (Musical Calendar-Almanac). A short-lived annual miscellany published in 1904–7 in Lviv by R. Zarytsky. Its premier issue was dedicated to M. Lysenko. It represents the first attempt by Ukrainians to publish a musical serial.

Muzyka, Maksym, b 15 July 1889 in Lviv, d 24 May 1972 in Lviv. Physician, bacteriologist, and civic leader; full member of the Shevchenko Scientific Society (NTSh) from 1933. A graduate of Lviv University (MD, 1913), he was president of the Medical Hromada (1911–12), founded and headed the Bacteriological-Chemical Institute of the NTSh, and taught at the Lviv (Underground) Ukrainian University (1921–5), which he helped organize. He was president of the Ukrainian Physicians' Society in 1925, 1927, and 1930, a member of the editorial board of *Likars'kyi vistnyk* (1922–39), and a member of the *Ukrainian Physicians' and *Narodnia Lichnytsia societies. He was deputy director of the Lviv Medical Institute (1939–41), head of its microbiology department (1940–1, 1949–69), and its director (1944–9). His publications include articles on bacteriology, epidemiology, and the history of medicine in Ukraine.

Muzyka, Yaroslava (née Stefanovych), b 10 January 1898 in Zalistsi, Zboriv county, Galicia, d 24 November 1973 in Lviv. Painter, graphic artist, and restorer; wife of M. *Muzyka and niece of S. *Krushelnyska. She studied

Yaroslava Muzyka: *Hetman Bohdan Khmelnytsky's Arrival in Kiev* (appliqué and embroidery, 1968)

painting under S. Batowski in Lviv, restoration under M. Kasperovych in Kiev and I. Hrabar in Moscow, and in Paris (1935). An icon restorer at the National Museum from 1928 and a founding member of the *Association of Independent Ukrainian Artists in interwar Lviv, she was best known for her book graphics, bookplates, and iconlike engravings. She painted still lifes, portraits, such as *Princess Olha* (1925), *Hutsul with a Pipe* (1928), *Portrait of a Woman* (1933), and *Beatrice* (1968), and paintings on glass, such as *Shepherdess* and *Anna Yaroslavna* (1965–8); produced over 350 prints, including the series 'Creatures' (1932–65), 'Nature' (1958–61), and 'H. Skovoroda's Symbols' (1972); and created glass bowls, enamel portraits of T. Shevchenko and Lesia Ukrainka, the enamel series 'Hutsul Folk Beliefs,' and the mosaic *Princess Olha* (1968). After the Second World War she was deported to Kazakhstan, and spent eight years there. Her works were exhibited in Lviv, Prague, Berlin, Chicago, Naples, and Los Angeles. A catalog of her last show in Lviv was published in 1968. Muzyka bequeathed her valuable collection of folk art and her own works to the Lviv Art Gallery.

Muzyka (Music). The foremost Ukrainian music periodical. Established as the official publication of the *Leontovych Music Society, it was published monthly in Kiev in 1923–6 and semimonthly in 1927 (the last three issues were published in Kharkiv). *Muzyka* contained articles on the history of Ukrainian music, and musical ethnography, reviews of the musical life, biographies, and bibliographical material. M. Hrinchenko, K. Kvitka, P. Klymko, M. Verykivsky, P. Kozytsky, and Ya. Yurmas worked on the periodical. *Muzyka* was renamed *Ukrains'ka muzychna hazeta* in 1926. In 1928, after the dissolution of the Leontovych society, the journal was replaced by the monthly *Muzyka masam*, renamed *Muzyka mas* in 1931. In 1933–4 and in 1936–41 it appeared bimonthly in Kiev under the title *Radians'ka muzyka*. In 1970 *Muzyka* was revived in Kiev as a bimonthly publication sponsored by the Ukrainian SSR Ministry of Culture, the Union of Composers of Ukraine, and the Music Society of the Ukrainian SSR.

Muzyka masam. See *Muzyka*.

MVD (Ministerstvo vnutrennikh del; Ukrainian: MVS, or Ministerstvo vnutrishnikh sprav [Ministry of Internal Affairs]). A ministry of the Soviet government established on 19 March 1946 as a successor to the *NKVD. The MVD was a Union-republican ministry, which included a number of central agencies, branches in the national republics, and local units. Its bodies were under dual subordination; that is, they were responsible to both higher-level MVD organs and corresponding local soviets. The MVD oversaw and administered the uniformed police (*militia); fire fighters; prisons and labor camps; internal troops (though the *KGB may actually have controlled these troops); the internal passport system; city residence permits; the licensing of firearms, motor vehicles, printing/copying facilities; and state archives. Structurally, it was divided into a number of main administrations and administrations organized along functional lines.

The institutional status and responsibilities of the MVD underwent numerous changes from 1946. At first the *MGB, which was responsible for state security, was separate from the MVD. Then, after J. Stalin's death, from March 1953 to March 1954, the two ministries were merged to form a powerful MVD under the control of L. Beria. He was arrested in June 1953 and executed in December. S. Kruglov was reinstated as minister of internal affairs, and Beria's supporters in the top positions were purged. To avoid another challenge to its authority the Party leadership reduced the might of the MVD by transferring some of its functions to other ministries and by setting up an independent agency, the KGB, to handle state security. In the course of N. Khrushchev's campaign for 'socialist legality' the economic power of the ministry was trimmed: it lost administrative control over various enterprises (ie, construction, coal mining, oil extraction, and gold mining and processing), and its captive labor force was cut drastically by amnesties to political prisoners. In 1957 control of the border guards was handed over to the KGB. The MVD was weakened further in 1960, when the Union or central ministry was abolished, and only republican ministries and their local branches remained. In 1962 the institutional name was changed from MVD to the Ministry for the Protection of Public Order (MOOP), a designation which symbolically severed the ministry's link with its past.

Under L. Brezhnev, however, the ministry's institutional status was upgraded: its Union status and its name were restored in 1966 and 1968 respectively. It received more funds and better training for its personnel. During Yu. Andropov's and M. Gorbachev's regimes charges of high-level corruption and inefficiency in the MVD became common. As a result Brezhnev's supporters in the ministry's higher levels were dismissed, including N. Shchelokov, long-term head of the MVD/MOOP, and I. Churbanov, former first deputy chairman of the Union MVD and Brezhnev's son-in-law. Shchelokov committed suicide, and Churbanov was sentenced in December 1988 to 12 years' imprisonment. During his tenure as minister of internal affairs (December 1982 to February 1986) V. *Fedorchuk conducted a major purge of the ministry. He was succeeded by A. Vlasov (from 26 January 1986), V. Bakatin (from 22 October 1988), and B. Pugo (1 December 1990 to 22 August 1991).

J. Bilocerowycz

My (We). A journal of literature and art published in Warsaw from 1933 to 1939 by the Variah publishing house. It was founded by supporters of the UNR Government-in-exile who were opposed to the ultranationalism of D. Dontsov's journal **Vistnyk*. Until 1938 it was a quarterly; then it became a bimonthly. *My* was edited by A. Kryzhanivsky, I. Dubytsky, and B. Olkhivsky (in 1939). Among its contributors were B.I. Antonych, I. Cherniava, Yu. Kosach, H. Lazarevsky, V. Lesych, N. and P. Kholodny, M. Rudnytsky, and P. Zaitsev.

My i svit (We and the World). An illustrated popular journal published irregularly in Mittenwald (1950) and Paris (1951–5), and then monthly (later bimonthly) in Toronto and Niagara Falls (to 1985). Modeled in style and format on *Reader's Digest*, the journal contained reprinted and original articles on cultural, political, historical, and other topics. It also published literary works by Soviet Ukrainian and émigré writers. The journal devoted considerable attention to contemporary developments in Ukraine and frequently criticized émigré Ukrainian institutions and political parties. For this it was denounced by many émigrés as pro-Soviet. The editor and publisher of *My i svit* was M. *Koliiankivsky.

Mycology. A branch of *botany dealing with the study of *mushrooms and fungi in general. Mycological research was undertaken in Ukraine before 1917 by individual botanists (A. Pitra, I. Borshchov, Ya. Walz, A. Yanovych) and emerged as a systematic study during the 1920s and 1930s, led by the VUAN, AN URSS (now ANU) *Institute of Botany and the ANU Institute of Microbiology and Epidemiology (later Virology). Much of the initial work of identifying, classifying, and studying the characteristics of fungi in Ukraine was undertaken by M. *Pidoplichko, V. *Bilal, S. Morokhovsky, and M. Zerova. One of the outstanding results of the efforts of Ukrainian mycologists is the five-volume *Vyznachnyk hrybiv Ukraïny* (Field Guide to Mushrooms of Ukraine, 1967–79). More recently mycological research in Ukraine has addressed experimental mycology and the commercial production of mushrooms.

Mydlovsky, Isydor [Mydlovs'kyj], b 4 February 1854 in Sadzhavka, Nadvirna county, Galicia, d 18 July 1916 in Lviv. Stage actor, playwright, and theatrical organizer. He played in the Ruska Besida Theater (1869–72) and was stage director of the Ternopil amateur theater (1890–1910). His populist dramas *Kapral Tymko* (Corporal Tymko, 1875) and *Invalid* (1881) were staged by the Ruska Besida Theater.

Myhal, Ivanna [Myhal'], b 6 July 1937 in Lviv, d 17 September 1983 in Toronto. Operatic mezzo-soprano. She emigrated as a refugee from Germany to Canada in 1949 and studied at the Royal Conservatory of Music in Toronto, the University of Toronto Faculty of Music's Opera School, the Summer Music School in Aspen, Colorado, and the New York Metropolitan Opera Studio. From 1969 she was a soloist at the Metropolitan Opera and also performed in operas and recitals in Miami, Newport (Rhode Island), and Toronto, on CBC Radio, and with 16 American and Canadian orchestras. A phonographic record of Ukrainian songs sung by Myhal was released in 1978.

Myhal, Taras [Myhal’], b 19 July 1920 in Rusiv, Sniatyn county, Galicia, d 13 August 1982 in Lviv. Prose writer and publicist. He contributed to many provincial newspapers in Lviv and was editor of publicistic literature in the journal *Zhovten’*. His collections of short stories and essays include *Na bystryni* (On the White Water, 1960), *Zustrich lita* (The Welcome of Summer, 1963), and *Bilyi hutsul* (The White Hutsul, 1964). His novels include *Shynok ‘Oseledets’ na lantsiuhu’* (The Herring on a Chain Tavern, 1966), *Vohon’ i chad* (Fire and Fumes, 1970), *Probudzhene misto* (The Awakened City, 1976), and *Ostannyi parol’* (The Last Password, 1979). He was acclaimed and given an award for his collections of pamphlets directed against the Ukrainian liberation movement, opposition activists, and political émigrés. The pamphlets included *Zhyvym i mertvym* (To the Living and to the Dead, 1967), *ABN* (1967), *Znaide vas kometa-meta* (A Comet-Goal Will Find You, 1973), *Z-pid hanebnoho stoopa* (From under the Shameful Post, 1974), and *Strakh pered pravdoiu* (Fear of Truth, 1978).

Myhulin, Oleksii, b 20 September 1893 in Dvorichnyi Kut, near Derhachi, Kharkiv gubernia, d ? Zoologist. A graduate of Moscow University (1917), he was a director at the Kharkiv Plant Conservation Station (1925–9), teacher at the Ukrainian Agricultural Academy (1940–3), and professor at the Kharkiv Agricultural Institute (1943–75). He initiated the movement to conserve indigenous plant species in Ukraine and wrote the first survey of the mammals of Ukraine (1938).

Myhulko, Viktor [Myhyl’ko], b 11 December 1924 in Hubnyk, Haisyn county, Podilia gubernia. Film and theatrical designer. In 1940–7 he completed study at the Odessa Art School, and in 1947–53 at the State Institute for Cinema Arts in Moscow. In 1953 he began working in the Kiev Artistic Film Studio as art director for films and telefilms, among them *Ivan Franko* (1956), *Oleksa Dovbush* (1959), and *Doshch u chuzhomu misti* (Rain in a Strange City, 1980). He has done theatrical scenery for the Kiev Russian Drama Theater.

Myhura, Ivan (Mihura; monastic name: Ilarion), b and d ? Early-18th-century engraver. He was educated at the Kievan Mohyla College and became an archdeacon at the Kievan Cave Monastery and hegumen of St Nicholas’s Monastery in Baturyn (1709–12). He made over 20 panegyric engravings, consisting of portraits and verses in honor of such notables as Hetmans I. Mazepa, P. Sahaidachny, I. Skoropadsky, and D. Apostol, Metropolitan S. Yavorsky, V. Kochubei, and I. Lomykovsky; prints of St John Chrysostom and St Nicholas; and printed portraits of A. Voinarovsky and Metropolitan V. Yasynsky and a self-portrait. A virtually complete collection of his printing blocks has been preserved at the Kievan Cave Monastery Museum.

Myketei, Hryhorii [Myketej, Hryhorij], b 1888, d 1945 in Austria. Educator and civic and political leader. In 1919 he was chief of the press bureau of the Supreme Command of the Ukrainian Galician Army and editor of *Strilets’*. After serving as envoy of the Western Ukrainian National Republic (ZUNR) to the kingdom of the Serbs, Croats, and Slovenes (later Yugoslavia) in 1919–20, he worked in the ZUNR Secretariat of Foreign Affairs in Vienna (1920–3).

Ivan Myhura: *Apotheosis of Hetman Ivan Mazepa* (engraving, 1700)

Upon his return to Lviv in 1924, he taught secondary school and edited the Lviv weekly **Rada* and the pedagogical journal **Ukrains’ka shkola*.

Hryhorii Myketei

Mykhail Vsevolodovych [Myxajil Vsevolodovyč], b August 1179, d 20 September 1246 in Sarai, near Astrakhan. Kievan Rus’ prince of Chernihiv; son of Vsevolod Sviatoslavych Chermny and an Olhovych by lineage. After the death of Volodymyr Sviatoslavych at the Battle of

Kalka in 1223, Mykhail assumed the throne of Chernihiv and began a campaign of territorial aggrandizement. He gained control of Novgorod and waged an ongoing struggle for Kiev and Halych, particularly against *Danylo Romanovych. With the help of Iziaslav Volodymyrovych, Mykhail succeeded in taking Kiev in 1236, but his tenure was short-lived. He fled to Hungary after the Mongols captured Chernihiv in 1239, thereby escaping the sack of Kiev in 1240. He returned to Rus' in 1241 in an attempt to regain his possessions, and went to Sarai in 1246 to obtain a patent to rule from *Batu Khan. The Mongol leader had Mykhail executed, probably for not surrendering Kiev and possibly (according to some chronicles) for ordering the death of Mongol envoys sent in 1239 to negotiate a peace with him. Popular perception attributed his execution to a refusal to participate in pagan rites, and a cult developed around Mykhail as a staunch defender of Orthodoxy. The veneration accorded him eventually brought about his canonization by the Russian Orthodox church and the transfer of his remains to Moscow during the 16th century, an act that was also motivated by the intention to propagandize the political and religious continuity between Kievan Rus' and Muscovy. A book about Mykhail, by M. Dimnik, was published in Toronto in 1981.

Mykhailiuk, Andrii [Myxajljuk, Andrij], b 30 November 1911 in Hermanivka, Kiev county, d 24 October 1937 in Kiev. Socialist-realist poet. He wrote three poetry collections, *Virshi* (Poems, 1932), *Kinets' idylii* (End of an Idyll, 1933), and *Sentiachnyi den'* (A Sunny Day, 1936). Mykhailiuk was sentenced to death by firing squad during the Stalinist terror. He was rehabilitated under N. Khrushchev, and a selection of his verse was published in 1959.

Mykhailiv, Leonyd [Myxajliv], b 1884, d ? Political leader. A member of the Ukrainian Social Democratic Workers' party, he served as UNR minister of labor in V. Holubovych's cabinet (February–April 1918). In 1919 he was appointed deputy chief of the UNR diplomatic mission to Poland. In 1921 he returned to Lutske, where he worked for Ukrainbank. In 1939 he was deported by the Soviets, and his later fate is unknown.

Mykhailiv, Yukhym [Myxajliv, Jukhym], b 27 October 1885 in Oleshky (now Tsiurupynske), Tavriia gubernia, d 15 July 1935 in Kotlas, Arkhangelsk oblast, RSFSR. Symbolist painter, graphic artist, and art scholar. He studied in Moscow at the Stroganov Applied Arts School (1902–6) and School of Painting, Sculpture, and Architecture (1906–10). In the 1910s he began contributing poetry to Ukrainian journals and designing book and magazine covers and illustrations. From 1917 he lived in Kiev, where he was active in the Ukrainian Scientific Society, directed an arts and crafts school (from 1923), and headed the All-Ukrainian Committee for the Preservation of Monuments of Antiquity and Art, the Leontovych Music Society (1921–4), and the Kiev branch of the Association of Artists of Red Ukraine. He contributed articles on Ukrainian art and artists to *Mystetstvo*, *Zhyttia i revoliutsiia*, and *Bibliolohichni visti* and wrote books on weaving (1919) and earthenware ceramics (1921) in Ukraine and on the artists M. Zhuk (1930) and H. Diadchenko (1931). Mykhailiv painted or drew over 300 works. Among them there are

Yukhym Mykhailiv: *Behind the Curtain of Life* (pastel, 1923)

three prominent themes: the Ukrainian national revival (*Music of the Stars* [1919], the triptych *Moonlight Sonata* [1925]), the Ukrainian past (*To the Goddess Lada* [1915], the triptych *God's Creator* [1916], *Stone Babas* [1919], *Yaroslava's Grief* [1925]), and death (*On the Edge of Eternity* [1926]). Mykhailiv was arrested in 1934 by the NKVD and exiled to the Soviet Arctic, where he died. A book about him (ed Yu. Chaplenko), with reproductions of his works, was published in New York in 1988.

Mykhailivka [Myxajlivka]. VI-16. A town smt (1990 pop 15,100) and a raion center in Zaporizhia oblast. It was founded at the beginning of the 19th century, and attained smt status in 1965. It has several enterprises of the food industry and a regional museum.

Mykhailivka settlement. A multi-occupational settlement of the 3rd to 2nd millennium BC, near the present-day village of Mykhailivka, Kherson oblast. Excavations in 1952–5 and 1960–3 identified the existence of an earlier copper age settlement and a later *Pit-Grave occupation.

Mykhailivka Virgin Soil Preserve. See Ukrainian Steppe Nature Reserve.

Mykhailo Oelkovych [Myxajlo Olel'kovyč], b ?, d 30 August 1481 in Vilnius. Lithuanian-Ruthenian appanage prince of Slutsk and Kopyl, in Belarus; son of Prince *Oelko of Kiev and Anastasiia, daughter of Grand Prince Vasiliï Dimitrovich of Moscow. In 1470–1 he served as King Casimir IV Jagiellończyk's viceroy in Novgorod the Great. When he did not succeed his late brother, *Semen Oelkovych, as appanage prince and voivode of Kiev, Mykhailo and Princes Fedir *Bilsky (his cousin) and Ivan Holshansky organized a conspiracy to assassinate Casimir IV. The conspiracy was uncovered, and Mykhailo was executed for treason.

Mykhailov, Kostiantyn [Myxajlov, Kostjantyn], b 29 December 1882 in Krolevets, Chernihiv gubernia, d 3 April 1961 in Kiev. Pedagogue and pianist. A graduate of the Kiev School of Music (1907) and the St Petersburg Conservatory (1913), he studied piano with V. Pukhalsky. He was a cofounder and professor of the *Kiev Conserva-

tory as well as its director (1922–6) and prorector (1934–53). He also headed the Kiev Opera College (1920–1), and the Lysenko Music and Drama Institute (1927–33) and co-founded the Kiev Philharmonic (1934). In 1939–40 he was sent to Western Ukraine as an organizer of music education. His pupils include the pianists L. Weintraub and I. Zettel.

Mykhailova Hora. An estate near Prokhorivka, Zolotonosha county, Poltava gubernia (now Kaniv raion, Cherkasy oblast). It was the location of the orchards of Mykhailo *Maksymovych, where he lived for nearly 30 years. His main residence has been preserved. It is of particular interest because of its famous visitors. T. *Shevchenko stayed there in June 1859 and there wrote the poem 'Mariia' and painted portraits of Maksymovych and his wife. N. *Gogol was another visitor; the local church, built by Zaporozhians in 1774, appears in his story *Vii*. Today the residence is a memorial museum dedicated to Maksymovych, and a rest resort has been built on the grounds.

Mykhailovsky, Oleksander [Myxajlovs'kyj], b 1882, d 1932 in Poděbrady, Czechoslovakia. Engineer and civic activist. As a young man he was active in the Revolutionary Ukrainian party. In 1918–19 he was vice-chairman of the Poltava gubernia zemstvo executive and then director of the UNR Department of Land Reform. After emigrating to Czechoslovakia he lectured at the Ukrainian Husbandry Academy in Poděbrady. His publications include a mathematics textbook (1922) and several works on milling in the Poltava region.

Mykhailovsky, Volodymyr [Myxajlovs'kyj], b 15 August 1914 in Konstiantynohrad (now Krasnohrad), Poltava gubernia, d 13 December 1978 in Lviv. Scientist in the fields of automation, telemechanics, and measurement technology; corresponding member of the AN URSS (now ANU) from 1961. He graduated from the Moscow Energy Institute (1939) and headed a department at the AN URSS Institute of Machinery and Automation from 1952. His main contributions were in designing measuring devices and the manipulation and transmission of information, particularly in mining and prospecting applications.

Mykhailychenko, Hnat [Myxajlyčenko] (pseud: Ihnati Mykhailych), b 27 September 1892 in Studenok, Kursk gubernia (now Myropillia, Krasnopillia raion, Sumy oblast), d 21 November 1919 in Kiev. Writer, revolutionary, and cultural activist. He was arrested in 1915 and sentenced to six years of hard labor for his Socialist Revolutionary activity. He served two years of his sentence and returned to Ukraine in 1917, during the February Revolution. A member of the *Borotbists, he became people's commissar of education of the new Communist government in Kiev in 1919. He remained in Kiev during A. Denikin's advance on the city, was captured by the White forces, and was executed.

The relatively small canon of Mykhailychenko's writings includes the symbolic and allegorical *Blakytnyi roman* (The Azure Novel, 1921), the short story 'Istoriia odnogo zamakhu' (The Story of One Assassination Attempt), and a number of lyrical, free-form prose miniatures published in the journal *Mystetstvo*, which he coedited with M. Semenko, and in the almanacs *Chervonyi vinok* and *Muzahet*

Hnat Mykhailychenko

Kostiantyn Mykhalchuk

and the journal *Shliakhy mystetstva*. Two collections of his works were published posthumously, *Noveli* (Novellas, 1922) and *Tvory* (Works, 1929).

The official criticism of the period, particularly that of V. Koriak, considered Mykhailychenko and other Borotbist writers to be the 'first wave of the brave,' that is, the originators of Ukrainian Soviet literature. After 1930, however, those writers were declared counterrevolutionary and were banned. There was no talk of rehabilitating Mykhailychenko until 1987.

I. Koshelivets

Mykhailychenko Theater (Teatr im. H. Mykhailychenka). A leftist experimental theater-studio founded in 1920 in Kiev as Tsentrostudiia under the leadership of Marko *Tereshchenko. A former member of *Molodyi Teatr, Tereshchenko denied the importance of the playwright, the director, and the actor as individuals and proclaimed Tsentrostudiia's creative platform of *mystetstvo diistva* 'the art of the performance.' Members of the theater worked out a so-called *zaduma* (conception), which essentially followed the ideals of the *Proletkult. In May 1921 Tsentrostudiia was renamed in honor of the writer H. Mykhailychenko. Its first production, *Pershyi budynok novoho svitu* (The First Building in the New World, 1921), portrayed a struggle between the proletariat and capitalists, and its second one, *Nebo horyt'* (The Sky Is Burning, 1922), portrayed a miners' uprising. Both performances were staged without scenery or dialogue and attempted to create a 'theater of the collective art.' The performance of *Carnival* (1923) included some episodes from contemporary life. Tereshchenko's attempts to adapt prose and drama works to the demands of the theater's cultural platform did not succeed, and early in 1926 the Mykhailychenko Theater ended its performances.

Mykhalchuk, Kostiantyn [Myxal'čuk, Kostiantyn], b 2 January 1841 in Zozulyntsi, Berdychiv county, Kiev gubernia, d 20 April 1914 in Kiev. Linguist; member of the Ukrainian Scientific Society in Kiev (UNTK), the Historical Society of Nestor the Chronicler, and the Shevchenko Scientific Society (from 1911). He studied at Kiev University (1859–61), was active in the university's Ukrainian hromada, and taught at the first Ukrainian Sunday school in Kiev. Persecuted by the authorities for his Ukrainophile activities, he was kept under house arrest on his mother's

homestead in 1863–6. From 1873 he worked as an office manager of the Kiev Brewing Company, was active in the Old Hromada of Kiev, and contributed publicistic articles under various pseudonyms (eg, Kh[okho]-l) to *Kievskii telegraf*, *Trud*, and *Zaria* in Kiev, and *Dilo* and *Pravda* in Lviv. In *Trudy etnograficheskoi-statisticheskoi ekspeditsii v Zapadno-russkii kraii*, edited by his friend P. *Chubynsky, he published an ethnographic study of the Poles in Right-Bank Ukraine and the first scholarly descriptive and genetic study of Ukrainian dialects (1872). In the latter monograph he conceptualized the still-accepted tripartite (northern, southwestern, and southeastern) division of the dialects and described subdialects within them. He also prepared the first Ukrainian dialectal map (1871). Although Mykhalchuk did not produce a systematic history of the Ukrainian language, in several articles and reviews published from 1893 on in *Kievskaiia starina*, *Zapysky UNTK* (of which he became a coeditor in 1909), and *Ukrainskaia zhizn'* he examined the main questions of the historical phonetics, morphology, and origins of Ukrainian. In some of his concepts he was a precursor of structuralism. With Ye. *Tymchenko he prepared a program for the collection of Ukrainian dialectal features (publ 1908) and was elected a corresponding member of the Russian Academy of Sciences. His 1886 open letter to A. Pypin in defense of the Ukrainian language was published as a brochure in 1909, and another defense, written in 1898 in reply to attacks in *Kievlianin*, was published only in 1929 in the *VUAN Ukrain-s'kyi diialektolohichnyi zbirnyk* (vol 2). A collection of philological articles dedicated to his memory was published in Kiev in 1915. His selected works appeared in 1991.

R. Senkus

Mykhalevych, Mykhailo [Myxalevyč, Myxajlo], b 22 July 1906 in Kiev, d 9 February 1984 in Philadelphia. Artist and political figure; grandson of O. *Mykhalevych. He studied at the Kiev State Art Institute (1924–8). After escaping from the USSR he continued his studies at the Art and Crafts School (1934–6) and State Academy of Arts (1937–8) in Prague. After joining the OUN he headed its art department (1934–42) and the art workshop of the Supreme Command of the Carpathian Sich in Carpatho-Ukraine (1939). After being released from a Hungarian concentration camp he went to Kiev with an OUN expeditionary group in 1941. From 1942 he worked in Lviv in the cultural department of the Ukrainian Central Committee and oversaw the art cabinet at the Institute of Folk Creativity there (1942–4). As a postwar refugee in Germany, he taught commercial art in a DP camp and painted iconostases. He was appointed cultural officer of the OUN Leadership (Melnyk faction) in 1947 and, after emigrating to the United States, head of the OUN there in 1950. His graphic art (mostly book graphics) was exhibited in Lviv, Naples, Canada, and the United States.

Mykhalevych, Opanas [Myxalevyč] (pseud: Panas Oberezhnyi), b 17 July 1848 in Skulyn, Kovel county, Volhynia gubernia, d 1 February 1925 in Zinovivske (now Kirovohrad). Community figure. A physician in the Kiev University clinic and a member of the *Hromada of Kiev from 1873, he was banished from Kiev by the tsarist authorities because of his Ukrainophile and socialist activism (he shared the ideas of M. *Drahomanov). He worked as a zemstvo physician in Myrhorod county, served in the

Russo-Turkish War of 1877, and worked at a Nizhen hospital before settling in Yelysavethrad (Kirovohrad) in 1878. There he practiced medicine and revived a clandestine Ukrainophile circle, which included Ye. Chykalenko, I. Karpenko-Kary, M. Kropyvnytsky, M. Levytsky, D. Markovych, O. Rusov, S. Rusova, and M. Sadovsky. In January 1885 he was arrested for circulating banned books, and in 1887, after two years in an Odessa prison, he was exiled to the village of Tunka, in Irkutsk gubernia, Siberia. In 1892 he was allowed to return with his family to Yelysavethrad, where he again practiced medicine. Mykhalevych collected folklore and translated into Ukrainian A. Smith's *Wealth of Nations*, which he paid to have published by the Prosvita society in Lviv in 1913.

Volodymyr Mykhalevych

Mykhalevych, Volodymyr [Myxalevyč], b 10 March 1930 in Chernihiv. Mathematician and cyberneticist; full member of the AN URSS (now ANU) since 1973 and of the USSR Academy of Sciences from 1984. He completed his studies at the University of Kiev in 1952, and since 1958 has worked at the Computing Center (later the ANU Institute of Cybernetics) in Kiev (serving as its director from 1982). He is known for his research in cybernetics, particularly in optimization theory and economic cybernetics. He invented the method of serial analysis for numerical solutions of problems of optimization.

Mykhalkiv hoard. A large hoard of gold artifacts, including a goblet, two crowns, bracelets, clasps, and decorative items believed to be Thracian-Cimmerian in origin. These items were recovered during the excavation of an 8th- to 7th-century BC settlement in Mykhalkiv, Ternopil oblast, in 1878 and 1897.

Mykhnevych, Osyp [Myxnevyč] (Mikhnevych, Yosyf), b 1809 in Lokachi, Volodymyr-Volynskiy county, Volhynia gubernia, d 2 November 1885 in Odessa. Philosopher. A graduate of the Kiev Theological Academy (1835), he lectured there (1836–9) and was a professor of philosophy (1839–49) at the Richelieu Lyceum in Odessa and an assistant curator of the Kiev (1859–67) and Warsaw (1867–71) school districts. In his philosophical outlook he was an idealist, influenced by F. Schelling and to some extent by G. Hegel, yet he stubbornly defended revelation as a source of philosophical knowledge about God and man. He wrote a biography of Duke A.E. du Plessis de Richelieu (1849), a history of the Richelieu Lyceum (1857),

articles on Greek philosophy (1839) and the nature of philosophy (1840, 1842), a logic textbook (1847; 2nd edn 1874), and a popular exposition of Schelling's philosophy (1850).

Myklashevsky [Myklaševs'kyj]. A family of Cossack *starshyna* and Russian nobility in the Chernihiv region. It originated most likely with Andrii (aka Andrushko Myklashechko), a registered Cossack of Chyhyryn company in Right-Bank Ukraine in 1649. His son, Mykhailo *Myklashevsky, was colonel of Starodub regiment in 1689–1706. Mykhailo's sons, Andrii (d 1752), Stepan (d 1750), and Ivan (1740), began the family's senior and junior Starodub lines and the Hlukhiv line. The senior Starodub line included the economists Ivan *Myklashevsky and Oleksander *Myklashevsky and their brother, Mykola (13 July 1860 to 9 June 1909), a member of the first Russian State Duma from Chernihiv gubernia. The Hlukhiv line included Andrii (19 July 1801 to 1895), the owner of a porcelain factory in Volokytyne, Hlukhiv county, that was famous for its artistic wares. Prominent members of the junior Starodub line were Gov Mykhailo *Myklashevsky and the musicologist Yosyp *Myklashevsky. Mykhailo's son Oleksander (1798–1831) was a lieutenant colonel of a Russian guard regiment who was exiled for his involvement in the Decembrist movement to the Caucasus, where he died in battle in Dagestan. Mykhailo's younger sons and their descendants owned large estates in Chernihiv and Katerynoslav gubernias in the 19th and early 20th centuries. They established a line of the family in Katerynoslav.

O. Ohloblyn

Myklashevsky, Ivan [Myklaševs'kyj], b 22 September 1858 in Bilyi Kolodiaz, Vovchanske county, Kharkiv gubernia, d 2 December 1901 in Kharkiv. Economist, historian, and statistician; brother of O. *Myklashevsky. A graduate of Odessa University (1882), he taught at Moscow University and then held the chair of political economy and statistics at Kharkiv University (1896–1901). He wrote some 30 works on agrarian history, especially that of Southern and Slobidska Ukraine, including *K istorii sel'skokhoziaistvennogo byta Moskovskogo gosudarstva: Zaselenie i sel'skoe khoziaistvo iuzhnoi okrainy XVII v.* (On the History of the Agricultural Life of the Muscovite State: The Settlement and Agriculture of the Southern Borderland in the 17th Century, 1894), which was one of the first works on agriculture in the Russian Empire based on archival documents, and 'Ocherki krest'ianskogo khoziaistva v Malorossii' (Essays on Peasant Agriculture in Little Russia, in *Izvestiia* of the Imperial Academy of Sciences, 1887).

Myklashevsky, Mykhailo [Myklaševs'kyj, Myxajlo], b in the 1640s, d 30 March 1706 in Niasvizh, Belarus. Cossack statesman. An adjutant (1671) and close adviser to Hetman D. Mnohohrishny (1672), after the 1672 Baturyn revolt against Mnohohrishny he served in the governments of Hetmans I. Samoilovych and I. Mazepa and became town otaman of Hlukhiv (1675) and osaul of Nizhen regiment (1679–82). He participated in the 1677–8 Chyhyryn campaigns and served on various diplomatic missions, particularly to Moscow. As general flag-bearer (1682) and general osaul of the Hetman state (1683–90) and colonel of Starodub regiment (1689–1706) he owned

Col Mykhailo Myklashevsky
(portrait) (1640s–1706)

Gov Mykhailo Myklashevsky
(ca 1756–1847)

large estates, glassworks, and iron-ore mines in Starodub and Nizhen regiments. A benefactor of Ukrainian art, churches, and monasteries, he funded the construction of St George's Cathedral at the Vydubychi Monastery in Kiev. Myklashevsky opposed the pro-Muscovite policy of Mazepa's government. In 1703 he conducted secret negotiations with Polish and Lithuanian magnates with the aim of uniting Ukraine with the Polish Commonwealth on the basis of the provisions of the 1658 Union of Hadiache and thereby creating a Great Ruthenian principality. He was killed during the Swedish siege of Niasvizh.

Myklashevsky, Mykhailo [Myklaševs'kyj, Myxajlo], b ca 1756 in Demenka, Topal company, Starodub regiment, d 26 August 1847 in Ponurivka, Starodub county, Chernihiv gubernia. Military figure and statesman; great-grandson of M. *Myklashevsky. He served in a guard regiment in St Petersburg (1775–89), was colonel of the Starodub Carabineer Regiment (1789–92), and commanded regiments along the Dnieper Line (1792–7), from 1795 as a brigadier. In 1797 Emperor Paul I appointed him governor of Volhynia and Little Russia gubernias, but in 1800 he removed him. Alexander I appointed him governor of *New Russia gubernia in 1801 and a senator in 1808.

Myklashevsky was a Ukrainian autonomist who defended Ukrainian interests in St Petersburg and kept contact with the *Novhorod-Siverskyi patriotic circle. In 1812 he submitted a controversial proposal for the reintroduction of Cossack regiments in Left-Bank Ukraine that would include state peasants in their ranks. He was forced to retire in 1818, and settled on his Ponurivka estate. There he created a center of Ukrainian culture, politics, and historical study (*Istoriia Rusov* was written there) and established a profitable woolens factory. Myklashevsky was opposed to serfdom and drafted a number of proposals aimed at bettering the lot of the peasantry.

Myklashevsky, Oleksander [Myklaševs'kyj], b 8 December 1864 in Bilyi Kolodiaz, Vovchanske county, Kharkiv gubernia, d 1917. Economist; brother of I. Myklashevsky. After completing his master's dissertation on the classical theory of money (pub 1895) at Moscow University, he taught political economy there and at Tartu University. He was one of the leading specialists in monetary

theory in the Russian Empire. Besides articles he wrote *Rabochyi vopros i sotsial'noe zakonodatel'stvo v Germanii* (The Labor Question and Social Legislation in Germany, 1896) and *Denezhnyi vopros v literature i v iavleniakh deistvitel'noi zhizni* (The Monetary Question in Literature and in the Phenomena of Real Life, 1896).

Myklashevsky, Yosyp [Myklaševs'kyj, Josyp], b 16 April 1882 in St Petersburg, d 21 September 1959 in Kharkiv. Musicologist, pianist, and educator. He graduated from the Kiev School of Music in the piano class of V. Pukhalsky and theory class of Ye. Ryb (1911) and from the St Petersburg Conservatory (1913). He became editor of the journal *V mire iskusstva* and then director of the St Petersburg Music Institute (1913–18). As a pianist he popularized the works of M. *Lysenko and authored one of the earliest attempts to analyze Lysenko's style. In 1919–47 he taught in a number of music schools in Kharkiv, including the Conservatory. Among his main writings are *Ocherk deiatel'nosti Kievskogo otdeleniia Imperatorskogo Russkogo muzykal'nogo obschestva za 50 let* (A Sketch of the Activity of the Kiev Branch of the Imperial Russian Music Society for the Last 50 Years, 1913) and *Muzychna i teatral'na kul'tura Kharkova kintsia xvii–pershoi polovyny xix st.* (Kharkiv's Musical Culture from the Late 17th to the Mid-19th Century, 1967).

Ivan Mykolaichuk (in *Shadows of Forgotten Ancestors*)

Mykolaichuk, Ivan [Mykolajčuk], b 15 June 1941 in Chortoryia, Bukovyna, d 3 August 1987 in Kiev. Film actor, screenwriter, and director. In 1957 he completed drama studies at the Chernivtsi Oblast Ukrainian Music and Drama Theater, and in 1965 he graduated from the Kiev Institute of Theater Arts. From 1965 he worked in the Kiev Artistic Film Studio. Following the esthetic traditions of O. Dovzhenko, he gave intense, realistic portrayals of archetypal and historical characters in films such as *Son* (The Dream, based on T. Shevchenko's poem, 1964), *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors, 1964), *Zakhar Berkut* (1972), *Bilyi ptakh z chornoju oznakoiu* (A White Bird with a Black Mark, 1972, written with Yu. Illienko), and *Vavilon–xx* (Babylon–XX, 1979), which he directed. On the basis of Mykolaichuk's script Illienko directed the film *Mriiaty i zhyty* (To Dream and Live, 1975). Mykolaichuk also directed the film *Taka piznia, taka, tepla osin'* (Such a Late, Such a Warm Autumn, 1982, written with V. Korotych). A book of memoirs about Mykolaichuk, interviews with him, and his scenarios was published in Kiev in 1991.

Mykolaiv

Mykolaiv [Mykolajiv]. VII-12. A city (1991 pop 513,000) at the confluence of the Boh and the Inhul rivers, oblast capital, raion center, sea and river port, and industrial center. Archeologists have found several settlements from the Neolithic Period, the Bronze Age, and the early Slavic period (3rd–5th century AD) in the vicinity of the city. The region was uninhabited until a fort (1784) and a shipbuilding wharf (1788) were built during the Russo-Turkish War of 1787–91. A settlement, which was named Mykolaiv, sprang up around them. In 1802 it became the capital of a gubernia, and in 1861, a county center of Khereson gubernia. Until 1862 it was an exclusively military port, where sailing ships and steamships (beginning in the 1820s) were built, and where the first iron ship on the Black Sea was constructed, in 1853. During the Crimean War and again in 1870–1900 the command of the Black Sea navy was located in Mykolaiv. In the second half of the 19th century Mykolaiv developed into the third-largest port in the Russian Empire and an important industrial center and railway junction. Its population grew from 3,300 in 1792 to 32,500 in 1860, 92,000 in 1897, and 104,000 in 1914. During the revolutionary period Mykolaiv changed hands frequently, and much of its industry was destroyed. The population decreased to 84,000 in 1923 and then rose steadily to 105,000 in 1926 and 169,000 in 1939. The city was designated an oblast capital in 1937. During the Second World War it was devastated. After the war it was rebuilt, and it expanded as its population grew, to 242,000 in 1961. The population has become ethnically more diverse. In 1926, Russians accounted for 44.5 percent of the population, Ukrainians for 29.9 percent, and Jews for 21 percent, but by 1959 the proportion of Ukrainians had risen to 60 percent.

Today Mykolaiv is an important industrial center. Its major industries are machine building, food processing, light industry, and building-materials manufacturing. Of its 250 enterprises, the largest are the *Black Sea Shipyard, the *Mykolaiv Okean Shipyard, the *Mykolaiv Shipyard, the Mykolaiv Reinforced-Concrete Plant, and the Mykolaiv Cotton Manufacturing Complex. It is the home of a number of research institutions, such as the *Mykolaiv Shipbuilding Institute and the *Mykolaiv Pedagogical Institute, three theaters (Ukrainian, Russian, and puppet), a regional museum, and an observatory. Mykolaiv boasts a number of architectural monuments, including the building of the Black Sea Naval Command (1793), the Black Sea Naval Observatory (1827), St Nicholas's Church (1817), and the Naval Officers' Building (1824).

Mykolaïv (Kiev 1981)

Mykolaiv [Mykolajiv]. IV-4. A city (1988 pop 13,600) and raion center in Lviv oblast. It was founded before 1570, and received the rights of *Magdeburg law in 1578. In 1917 Mykolaiv was a training center of the Ukrainian Sich Riflemen. In 1919 the Lviv Brigade of the Ukrainian Galician Army fought a battle with the Polish army nearby. The town's chief enterprises are a cement-mining complex and a building-materials factory.

Mykolaiv Art Museum (Mykolaivskiyi khudozhnii muzei im. V.V. Vereshchagina). An art museum established in Mykolaiv in 1914. Its collection contains over 6,000 works by Ukrainian, Russian, and Western European artists, among them I. Aivazovsky, V. Vereshchagin, V. Tropinin, L. Borovykovsky, K. Trutovsky, R. Sudkovsky, K. Briullov, L. Pozen, A. Kuindzhi, M. Yaroshenko, K. Kostandi, Z. Serebriakova, O. Murashko, S. Vasylykivsky, P. Nilus, Ye. Bukovetsky, M. Manizer, A. Kotska, V. Mykyta, and T. Yablonska. Branches of the museum are located in Voznesenske and Ochakiv. Since 1986 the museum has been housed in a new building with 10 exhibition halls. A guide to it was published in 1986.

Mykolaiv Astronomical Observatory. See Astronomy.

Mykolaiv gubernia. See Kherson gubernia.

Mykolaiv oblast. An administrative territory (1990 pop 1,336,200) in Southern Ukraine with an area of 24,600 sq km. It is divided into 19 raions, 253 rural councils, 9 cities, and 20 towns (smt). The capital is Mykolaiv. The oblast was formed on 22 September 1937.

Physical geography. Most of the oblast lies in the steppe of the Black Sea Lowland on both banks of the Boh River directly north of the Black Sea. The land is flat and slopes gently from the north toward the Black Sea. The northern part of the oblast covers the fringe of the Dnieper Upland and is dissected by ravines and river valleys. The jagged coastline is dotted with shallow saltwater lakes, limans, bays, spits, and sandy islands. In the north the soils are mostly low-humus chernozems; in the south, mostly chernozems and dark chestnut alkaline soils. In the floodplains of the river valleys the soils are alluvial. Virgin steppe flora and fauna have been preserved only in ravines and nature preserves. Some forests, consisting mostly of oak, maple, acacia, and elm, have survived in the south. The oblast is rich in granite, limestone, marl, kaolin, graphite, and gypsum deposits. Salt, mineral waters, and curative muds are extracted from the coastal lakes. The principal rivers in Mykolaiv oblast are the Boh and its tributaries – the Inhul, the Kodyma, the Chychykliia, and the Hnylyi Yelanets. In the northeast the main river is the Inhulets, a tributary of the Dnieper. The rivers are used mostly for irrigation. The climate is temperate-continental: the average January temperature is -5°C and the average July temperature is 23°C . The average annual precipitation is 300–350 mm in the south and 450 mm in the north. Winters are mild, and there is little snowfall. Summers are hot, dry, and windy. There are frequent dust storms and droughts.

History. According to archeological evidence the territory of the oblast has been inhabited since the Paleolithic period, as early as the 15th millennium BC. In the 8th to 3rd centuries BC the area was settled by Scythians and Sarmatians. The first Greek settlement on the northern Black Sea coast was established on Berezan Island in the 7th century BC. Later the territory belonged nominally to Kievan Rus', the Grand Duchy of Lithuania, and the Crimean Tatars. It was annexed by Turkey in 1475 and transferred to Russia after the Russo-Turkish War (1768–74). The territory of the present oblast was a part of New Russia gubernia (1774–95, 1796–1803), Voznesenske gubernia (1795–6), and Kherson gubernia (1803–1920). Mykolaiv gubernia, formed by the Soviet authorities in 1920, was incorporated into Odessa gubernia in 1922 and then divided among Mykolaiv, Odessa, Pervomaiske, and Kherson okruhas in 1925. The territory was reintegrated into Odessa oblast in 1932.

Population. The population of the oblast increased from 941,000 in 1940 to 1,148,000 in 1970 and 1,242,000 in 1979. The share of the urban population rose from 26 percent in 1940 to 66 percent in 1989. The average population density in 1990 was 54.3 inhabitants per sq km. The percentage of Ukrainians in the total population dropped from 81.2 percent in 1959 to 75.6 percent in 1989, and that of Russians rose from 13.8 to 19.4 percent. The oblast's largest cities are Mykolaiv, Pervomaiske, Voznesenske, and Ochakiv.

Industry. Industrial production accounts for 65.3 percent of the oblast's gross product. Its main industries are machine building and metalworking (42 percent of the industrial output in 1988), food processing, light industry (12 percent), and the building-materials industry. Mykolaiv's shipyards build and repair freighters, tankers, and other seacraft, and its giant plants build road-construction machines, cranes, food-processing machinery, and mining equipment. Irrigation equipment and diesel engines are built in Pervomaiske. The food industry consists of meat-packaging plants in Mykolaiv, Voznesenske, and Pervomaiske; dairies in Pervomaiske, Veselynov, and Nova Odessa; fruit- and vegetable-canning plants in Voznesenske and Snihurivka; a sugar refinery in Pervomaiske; a mineral-water bottling factory in Snihurivka, and a fish-processing plant in Ochakiv. The largest plants of the light industry are the sewing factories in Mykolaiv and Pervomaiske and the footwear and leather goods factories in Mykolaiv and Voznesenske. The building-materials industry is based on local resources. Cement is produced in Olshanske, and reinforced-concrete structures in Mykolaiv and Oleksandrivka. Power for the oblast's industries is provided by the Mykolaiv Thermo-electric Center, the Oleksandrivka, Pervomaiske, and Konstantynivka hydroelectric stations, and the Southern Ukraine nuclear power plant.

Agriculture. In 1989 there were 224 collective farms and 155 state farms in Mykolaiv oblast. The total area of agricultural land in the oblast was 2,003,300 ha, of which 1,715,600 ha were cultivated, 238,400 ha were pasture, and 5,800 ha were hayfields. Of the seeded area 52.6 percent was devoted to grains, 30.5 percent to feed crops, and 13.3 percent to industrial crops. The main crops were winter wheat (28.8 percent of the seeded area), spring barley (8.9 percent), corn (18.9 percent), sunflower (8.9 percent), and sugar beet (4.2 percent). In 1979, vineyards occupied 17,700 ha, and fruit orchards (apples, pears, cherries, apricots, and plums), 27,800 ha. Animal husbandry accounts

for 56 percent of the agricultural output and consists mostly of dairy- and beef-cattle farming. Some hog, sheep, poultry, rabbit, fish, and silkworm farming is practiced also. Fishing in the Black Sea and the limans contributes to the oblast's food production.

Transportation. In 1989 there were 753 km of railroad track in the oblast, 143 km of it electrified. The main lines crossing the oblast are the Mykolaiv–Znamiianka–Kiev–Moscow, Odessa–Voznesenske–Bakhmach–Moscow, Mykolaiv–Odessa, and Mykolaiv–Kherson lines. The main railway junctions are Mykolaiv, Voznesenske, Peremaiske, and Snihurivka. There were 5,300 km of highways, 4,700 km of which were paved. The main highways in the oblast are Mykolaiv–Odessa–Kishinev, Mykolaiv–Kherson–Symferopil, Mykolaiv–Kryvyi Rih, and Mykolaiv–Kirovohrad. Mykolaiv has an airport. Mykolaiv and Ochakiv are important seaports, and Oleksandrivka and Voznesenske are large river ports.

BIBLIOGRAPHY

Istoriia mist i sil Ukraïns'koi' RSR: Mykolaïvs'ka oblast' (Kiev 1971)

Mykolaiv Okean Shipyard (Mykolaivskiy sudnobudivnyi zavod Okean). A shipbuilding plant in Mykolaiv, built from 1946 to 1951. In 1951–6 it built barges and sea vessels. Then it built 5,500-t refrigerated transport ships, 6,400-t refrigerated processing ships, and lumber carriers. In 1970 the shipyard changed to building larger dry-goods carriers and multipurpose ships. In the 1970s several oil tankers (130,000 t), supertrawlers (8,850 t), and ore carriers (62,500 t) were assembled there.

Mykolaiv Pedagogical Institute (Mykolaivskiy pedahohichnyi instytut im. V. Bielinskoho). An institute of higher education under the jurisdiction of the Ministry of Education of Ukraine. Founded in 1913 as a *teachers' institute, in 1920 it became an institute of people's education. In 1930 it was transformed into one of the *institutes of social education, and in 1933 it became a pedagogical institute. In 1986–7 the institute consisted of five faculties: history, philology, physics-mathematics, the pedagogy and methodology of elementary education, and physical education. The institute also trained instructors in Russian language and literature for the Uzbek SSR. In 1987 the student enrollment was 4,800.

Mykolaiv Regional Studies Museum (Mykolaivskiy kraieznavchyi muzei). A museum established in Mykolaiv in 1950 on the basis of the Mykolaiv City Natural Science and Regional Museum (est 1913) and the Mykolaiv Historical-Archeological Museum, which had been destroyed during the Second World War. The museum's exhibitions, based on holdings of over 68,000 items, pertain to the natural environment, archeology, and history of Mykolaiv and Mykolaiv oblast. The museum also has a sizable collection of minerals, stuffed animals, and butterflies and moths from around the world. It administers two other museums, the Ochakiv Military History Museum (est 1966) and the Mykolaiv Shipbuilding and Naval Museum (est 1978). Guidebooks to the museum have been published in Ukrainian (1962) and Russian (1979, 1980).

Mykolaiv Shipbuilding Institute (Mykolaivskiy korablebudivnyi instytut). A technical school of higher education under the Ukrainian Ministry of Higher and

Specialized Secondary Education. Organized in 1920 as a polytechnical institution, in 1929 it was renamed the Mykolaiv Machine-Building Institute and in 1930 given its present name. It has departments of shipbuilding, machine building, and electrical instrumentation, two evening sections, postgraduate studies, and a branch in Kherson. In 1985 the institute had over 7,000 students.

Mykolaiv Shipyard (Mykolaivskiy sudnobudivnyi zavod im. 61 komunara). A shipbuilding plant in Mykolaiv. It was founded in 1788 as a dockyard of the Russian Admiralty. It built sailing and metal-hulled ships. In 1900 the famous battleship *Potemkin* was built there. Now the plant builds mainly refrigerated transport ships and self-propelled barges.

Mykolaiv Ukrainian Theater of Drama and Musical Comedy (Mykolaivskiy ukrainskyi teatr dramy i muzychnoi komedii). A theater established in 1959 as an oblast musical-drama theater on the basis of the oblast Shevchenko Ukrainian Drama Touring Theater and the local Young Spectator's Theater. Its repertoire has consisted of Ukrainian, Russian, and world classics, and contemporary plays, such as O. Korniiuchuk's *Storinka shchodennyka* (Page from a Diary) and V. Lukashov's musical comedy *Volodymyrs'ka hirka* (St Volodymyr's Hill). In 1979 its artistic director was V. Bezlepko.

Mykolaivka [Mykolajivka]. V-18, DB II-3. A town smt (1990 pop 16,300) on the Donets River in Donetske oblast. It is administered by the Slovianske municipal council. Mykolaivka was founded in the first half of the 18th century, and attained smt status in 1956. It is the home of the Slovianske Raion Electric Power Station.

Mykolaivka [Mykolajivka]. VII-11. A town smt (1990 pop 4,200) on the Chychykliia River and a raion center in Odessa oblast. It was founded in the late 18th century, and attained smt status in 1965. It has several food enterprises.

Mykulyntsi [Mykulynci]. IV-6. A town smt (1990 pop 3,800) on the Seret River in Terebovlia raion, Ternopil oblast. It was first mentioned in a historical document in 1096 under the name of Mykulyn. In the 12th and 13th centuries it belonged to Halych and Galicia-Volhynia principalities. It was annexed by Poland in 1387 and renamed Mykulyntsi in 1389. A castle was built in 1550 to protect the town from the Tatars. By 1595 Mykulyntsi had attained town status. After being destroyed by the Turks in 1672, the town never regained its prosperity. Today it has several food enterprises and a furniture and brick factory. Its architectural monuments include the ruins of the castle, a palace (18th–19th century), and a Roman Catholic church in the baroque style (18th century).

Mykysha, Mykhailo [Mykyša, Myxajlo], b 6 June 1885 in Myrhorod, Poltava gubernia, d 20 November 1971 in Kiev. Opera and concert singer (heroic tenor). He studied at the Lysenko Music and Drama School in the class of O. Myshuha. In 1910 he joined Sadovsky's Theater, and in subsequent years he was a soloist of the Kiev Opera (1914–22), the Bolshoi Theater, and the Kharkiv Opera (1932–4). He taught in the Kharkiv (from 1937) and the Kiev (from 1944) conservatories. His better-known opera roles include Vakula in P. Tchaikovsky's *Cherevichki* (Little Shoes)

and Hermann in his *The Queen of Spades*, Herod in R. Strauss's *Salome*, and Raoul de Nangis in G. Meyerbeer's *Les Huguenots*. He was also an outstanding performer of Ukrainian songs. He compiled the methodological study *Praktychni osnovy vokal'noho mystetstva* (Practical Bases of Vocal Art) as retold and edited by M. Holovashchenko (Kiev 1971). Mykysha's biography, by M. Sheliubsky, was published in Kiev in 1947.

Taras Mykysha

Mykysha, Taras [Mykyša], b 2 February 1913 in Pryimivka (now Pryimivshchyna), Lubni county, Poltava gubernia, d 15 March 1958 in Buenos Aires. Pianist, teacher, and composer; son of M. *Mykysha. He studied initially in Kiev and Moscow; his formative years of 1927–33, however, were spent in Vienna, where he studied at the Academy of Music with J. Marx (composition) and others (graduating in 1930), and at the Klavier Meisterschule under P. Weingarten (finishing both theory and piano classes in 1933). In 1932 he won the first of several prizes at international music competitions and in 1933 started appearing as a soloist. Renouncing his Soviet citizenship in 1935, he remained in the West and toured extensively (appearing also with orchestras) in Hungary, Rumania, Austria, Czechoslovakia, Yugoslavia, Holland, and Sweden. From 1947 he worked in Buenos Aires as a piano teacher. His Ukrainian concert repertoire included works by V. Barvinsky, V. Kosenko, L. Revutsky, and M. Kolessa. Mykysha also composed a number of piano works based on Ukrainian folk melodies. These include *Ukrainian Rhapsody*, six sonatas, seven fugues, variations, preludes, dances, and chamber music.

Mykyta, Irenei, b 11 October 1936 in Peremyshl, Galicia. Stage director and teacher. He arrived in Adelaide, South Australia, in 1949 and started professional theater activity in 1955. He has worked with local Ukrainian and Australian theater groups as stage manager, director, and set constructor. He was a founding member and the vice-president of Ethnic Broadcasters Inc (1975–8) and has taught drama and performing arts at the South Australian Institute of Technology (in Adelaide) since 1975.

Mykyta, Volodymyr, b 1 February 1931 in Rakoshyn, near Mukachiv, Transcarpathia. Painter. He studied under A. Erdeli, Y. Bokshai, and F. Manailo at the Uzhhorod School of Applied Art (1947–50). The influence of modernism is evident in his work, which consists of portraits, landscapes, still lifes, and genre paintings, such as *Collec-*

Volodymyr Mykyta: *Celebration in the Village Club* (1972)

tive-Farm Shepherd (1960), *Old Hutsul* (1966), *From Peak to Peak* (1973), *Good Morning* (1976), *Ivan Chendei* (1979), and *Apple Gathering* (1984). An album of his works was published in 1983.

Mykytas, Vasyl [Mykytas', Vasyl'], b 23 October 1924 in Zhovte, Verkhnodniprovske county, Katerynoslav gubernia. Literary critic and scholar. He graduated from Dnipropetrovske University in 1951. Among his numerous works are the critical survey *O.V. Dukhnovykh* (1959), the monograph *Ukrains'kyi pys'mennyk-polemist Mykhailo Andrella* (The Ukrainian Writer-Polemicist M. Andrella, 1960), *Pravda pro Vasylia Stefanyka* (The Truth about V. Stefanyk, 1975), *Davnia ukrains'ka literatura* (Old Ukrainian Literature, coauthor, 1978), and *Ivan Franko – Doslidnyk ukrains'koi polemichnoi literatury* (I. Franko, Researcher of Ukrainian Polemical Literature, 1983). Mykytas also coedited *Poety Zakarpattia: Antolohiia zakarpatoukrains'koi poezii XVI st.–1945* (Poets of Transcarpathia from the 16th Century to 1945, 1965).

Mykytchuk, Anastasiia [Mykytčuk, Anastasija] (née Pavliuk), b 19 September 1889 in Vyzhnytsia, Bukovyna, d 17 November 1977 in Hamilton, Ontario. Educator and political activist; wife of V. *Mykytchuk. A graduate of the Chernivtsi teachers' seminary, she was active in the radical movement in the Kolomyia district, where she organized rural women's groups and served as an executive member of the Ukrainian Radical party. In 1924 she helped to found the women's newspaper **Zhinocha dolia*, and in 1930–5 she assisted in the preparation of *Ukrains'ka zahal'na entsyklopediia* (The Ukrainian General Encyclopedia, 1930–5). She left Ukraine in 1944 for Austria and Italy, and then Argentina, where she took an active part in organized Ukrainian life. In 1957 she settled in Canada.

Mykytchuk, Vasyl [Mykytčuk, Vasyl'], b 26 January 1887 in Prykmyshche, Kolomyia county, Galicia, d 7 August 1986 in Toronto. Educator and publisher. He initiated, spearheaded, and largely financed (with great personal sacrifice) the publishing of *Ukrains'ka zahal'na entsyklopediia* (The Ukrainian General Encyclopedia,

1935), the first reference work of its kind (see *Encyclopedias of Ukraine). In 1936 he was a cofounder of the *Ukrainian Publishing Institute in Lviv. After the Second World War he emigrated, eventually to Canada.

Ivan Mykytenko

Dmytro Mykytiuk

Mykytenko, Ivan, b 6 October 1897 in Rivne, Yelysavethrad county, Kherson gubernia, d 18 October 1937. Writer, publicist, playwright, and Soviet activist. He was one of the leading organizers of Soviet literature in the 1920s and 1930s. Mykytenko headed the Odessa branch of *Hart while he was a student at the Odessa Medical Institute. In 1927 he moved to Kharkiv, where he finished his studies at the Kharkiv Medical Institute. From 1932 to 1934 he was an organizer of the founding committee of the Writers' Union of the USSR. In 1934 he became a member of the executive of the *Writers' Union of Ukraine. Mykytenko began writing poetry and publicistic works in 1922, while still a student in Odessa. His first published collection of stories was *Na soniashnykh honakh* (On Sunny Tilled Fields, 1926), and his first novel was *Braty* (Brothers, 1927). He also wrote humorous works for children, including 'Havryil Kyrychenko – Shkoliar' (Havryil Kyrychenko, the Schoolboy). His more notable works, such as *Vurkahamy* (1928) and *Ranok* (Morning, 1933), were about the homeless in Soviet society. Mykytenko's first plays, *Na rodiuchii zemli* (On Fertile Ground, 1925) and *Idu* (I Am Going, 1925), were unsuccessful. His play *Dyktatura* (Dictatorship, 1929) was on the collectivization of the Ukrainian village; its superficial symbolism, use of pathos, and occasionally deft humor endeared it to Party activists, and Mykytenko's plays became part of the repertoire of many Ukrainian and other Soviet theaters. The rest of his plays were written on commission, and served to illustrate the latest Party decisions. Among them were *Kadry* (or *Svitit' nam zori*) (Cadres [or Shine for Us, Stars], 1930), *Sprava chesty* (or *Vuhillia*) (A Matter of Honor [or Coal], 1931), and *Divchata nashoi kraïny* (The Girls of Our Country, 1932). His later plays *Bastyliia Bozhoï materi* (The Bastille of the Mother of God, 1933), *Dni iunosty* (Days of Youth, 1935–6), and *Marusia Churai* (1935) were less popular. His best play with respect to artistic quality was *Sol' o na fleiti* (Flute Solo, 1933–6), which was conceived as an official satire on a deposed grandee, but came to be staged as a satire on the entire Soviet system and was therefore banned. Despite the fact that Mykytenko never strayed from the Party line, in October 1937 he was removed from the executive of the Writ-

ers' Union of Ukraine, dismissed from his position as editor in chief of *Radians'ka literatura*, and expelled from the Party. Recent sources indicate that he committed suicide. After his death his works were proscribed. He was rehabilitated after 1956, and most of his works have been republished.

BIBLIOGRAPHY

Syrotiuk, M. *Ivan Mykytenko: Zhyttia i tvorchist'* (Kiev 1959)
Rod'ko, M. *Proza Ivana Mykytenka* (Kiev 1960)

I. Koshelivets

Mykytenko, Oleh, b 22 December 1928 in Kharkiv. Literary critic and translator; son of I. *Mykytenko. He graduated with a degree in philology from Kiev University in 1952 and completed a doctorate in 1957. He has written articles on Ukrainian and other Slavic literature. He has translated from Czech and Slovak. In 1986 he became chief editor of **Vsesvit*, after serving as its assistant editor for many years.

Mykytiuk, Dmytro [Mykytjuk], b 8 August 1899 in Rakivchyk, Kolomyia county, Galicia, d 8 March 1983 in Winnipeg. Publisher. In 1914–18 he served in the ranks of the Ukrainian Sich Riflemen and then in the Ukrainian Galician Army. After emigrating to Canada in 1930, he collected materials on the war of independence in Ukraine and published them at his own expense in a five-volume collection titled *Ukrains'ka Halych'ka Armiia* (The Ukrainian Galician Army, 1958–76). He also published other books on Ukrainian military topics and donated generous sums to Ukrainian scholarly institutions.

Mykytivka mercury deposit. The oldest and largest mercury deposit in Ukraine and one of the largest in the former USSR. It is located in the Donets Basin, near Horlivka (formerly the village of Mykytivka). Mercury was first discovered there in 1879 and began to be extracted in 1886. The mercury is found in dolomites, limestone, and quartziferous sandstone found under schistose rocks. Multiveined deposits extend to a depth of 2,000 m. The Mykytivka Mercury Refining Complex processes the mercury. The refinery constructed in 1886 was completely rebuilt after the Second World War. Because mercury was considered a strategic resource in the USSR, no precise data on the reserves and on the output of mercury were published.

Gen Osyp Mykytka

Count Hryhorii Mylorodovych

Mykytka, Osyp, b 21 February 1878 in Zeleniv, Rohatyn county, Galicia, d August 1920 in Moscow. General officer of the Ukrainian Galician Army (UHA). Commissioned in the Austrian army in 1902, by the start of the First World War he held the rank of captain. In January 1918 he served briefly as commander of the Legion of Ukrainian Sich Riflemen. After joining the UHA he took command of its Stare Selo Group, in December 1918, and then, at the rank of major, of the First Corps of the UHA (formerly the Northern Group), in January 1919. In May he was promoted to lieutenant colonel and in June to colonel. On 7 November 1919 he became brigadier general and replaced M. Tarnavsky as the commander in chief of the UHA. Arrested by the UHA Revolutionary Committee, he was turned over to the Bolsheviks on 6 February 1920 and held for several months in a concentration camp near Moscow. After repeatedly turning down posts in the Red Army, Mykytka was executed.

Mykytovych, Roman [Mykytovyč] (Mykytowycz), b 15 July 1921 in Lviv. Biologist; full member of the Shevchenko Scientific Society and its president in Australia since 1981. A graduate of Munich University (D Vet Med, 1948), he emigrated to Australia in 1949, where he worked (1950–86) with the Commonwealth Scientific and Industrial Research Organization in the Division of Wildlife Research. His publications deal largely with various aspects of the biology of Australian mammals and birds. He was also engaged in early studies of myxomatosis, a viral disease used to control populations of wild rabbits (*Oryctolagus cuniculus*) considered to be agricultural pests.

Myleshko, Yakiv [Myleško, Jakiv], b 16 January 1898 in Popivka (now Smyrnove), Berdianske county, Tavriia gubernia, d 23 June 1978 in Odessa. Operatic stage director. In 1934 he completed study at the Leningrad Theatrical Institute. In 1934–41 and 1945–7 Myleshko worked as stage director in the Kirov Opera and Ballet Theater in Leningrad, and from 1948 to 1962 as stage director (and since 1954 principal stage director) in the Odessa Opera and Ballet Theater.

Myletsky, Avram [Mylec'kyj], b 10 March 1918 in Kiev. Architect. He graduated from the Kiev Civil-Engineering Institute (1941), where he studied under Y. Karakis and V. Zabolotny. Since 1962 he has taught at the Civil-Engineering Institute and the Kiev State Art Institute. He has designed or helped design a number of war memorials, including the memorial to the meeting of American and Soviet armies in Torgau on the Elbe (1945) and the Slava park and memorial in Kiev (1957), the bus terminal in Kiev (1959–60), the Pioneer and Student Palace in Kiev (1964), the memorial and burial complex of the Kiev Crematorium (1968), and Red Square in Kiev (1972).

Mylohrad-Pidhirtsi culture. An *Iron Age culture that existed in northern Ukraine during the 5th to 3rd century BC and in southern Belarus during the 7th to late 2nd century BC. It was named after sites near Homel and Kiev where the culture was discovered in the 1950s. Settlements of this culture were built usually on raised floodlands. The inhabitants lived in semi-pit or surface dwellings with post construction. Pottery (some with convex sides), bronze pins, iron adzes and other tools, bronze arrowheads (both locally made and imported from the

Scythians), numerous horse trappings, personal adornments (including bronze pins, bracelets, pendants, clasps, and glass jewelry), molds for iron work, crucibles, and earthenware figurines of animals were found at excavation sites. The dead were buried in a supine position but not in kurhans. Some scholars believe the people of the Mylohrad-Pidhirtsi culture to be proto-Slavs, while others regard them as Balts.

Myloradovych [Myloradovyč] (Miloradovich). A family of Cossack *starshyna* and Russian nobility of Serbian origin. The progenitor was a 17th-century Herzegovinian, Rodion Miloradovich. His grandsons, Mihajlo, Gavrilo, and Aleksandar Miloradovich, went over to the Russian side during the Russo-Turkish War of 1711, and Peter I rewarded them with high posts and estates in Left-Bank Ukraine. Mihajlo (d 25 September 1726) served as colonel of Hadiache regiment (1715–26) and signed the Kolomak Petitions of 1723. Gavrilo (d 1730) succeeded him as colonel (1727–9) but was removed because of his excesses and rapacity. Several lines of the Myloradovych family stemmed from the three brothers and included many Ukrainian and Russian statesmen, military leaders, and cultural figures.

Aleksandar's son, Mykhailo, was colonel of Izium regiment in Slobidska Ukraine (1759–61), and Mykhailo's grandson, also Mykhailo, was a Ukrainian autonomist and marshal of the nobility in Poltava gubernia in 1807. Mihajlo's grandson Petro (1723 to 18 January 1799) studied at the Kievan Mohyla Academy and was the last colonel of Chernihiv regiment (1762–83). Petro's son, Hryhorii (19 January 1765 to 30 May 1828), was general judge of Chernihiv (1799) and governor of Tavriia gubernia (1802–3). Hryhorii's grandsons were the historian Hryhorii *Myloradovych and Leonid (1841–1908), who was a diplomat, secretary of the Russian embassy in Stuttgart (1862), deputy governor of Kiev gubernia (1878), and governor of Podilia gubernia (1879–82). Petro's brother Andrii (1726 to 13 June 1796) also studied at the Kievan Mohyla Academy, was a fellow of the standard (1747–9), and fought in the Seven Years' War and the Russo-Turkish War of 1769–74, from 1771 as lieutenant general. He served as governor of Little Russia (1779) and Chernihiv vicegerency (from 1781) and directed the writing of a description of Left-Bank Ukraine in 1779–81. Andrii's son, Mykhailo (Mikhail, 12 October 1771 to 27 December 1825), became a Russian general and count, the military governor of Kiev (1810–12), a member of the Russian State Council and the Committee of Ministers, and the military governor of St Petersburg (from 1818). He was killed during the Decembrist uprising in St Petersburg. The ethnographer Vasyl Myloradovych is descended from the family line begun by Gavrilo.

O. Ohloblyn

Myloradovych, Hryhorii [Myloradovyč, Hryhorij] (Miloradovich, Grigorii), b 6 October 1839 in Chernihiv, d 26 August 1905 in Chernihiv. Historian, genealogist, and

Russian count from 1873. A nobleman of Serbian descent, he was educated at the Page Corps in St Petersburg, served as an officer in a guard regiment, and fought in the Russo-Turkish War of 1877–8. In 1890 he was promoted to the rank of lieutenant general and was elected marshal of the nobility in Chernihiv gubernia (to 1896). In 1898 he became a member of the Council of the Ministry of Agriculture and State Property. He organized and was the first president of the Chernihiv Learned Archival Commission.

Myloradovych wrote many historical studies of Left-Bank Ukraine and Ukrainian genealogy and heraldry, which were published in *Kievskaiia starina*, *Chteniia Moskovskago obshchestva istorii i drevnostei rossiiskikh*, *Chernigovskii gubernskii vedomosti*, and other periodicals. His major works are a guide to sources for the study of Little Russia (1858); a book of materials on the history of 'Southern Russia' (1858); a guide to foreign sources on the history of Little Russia (1859); a biography of Gov A. Myloradovych (1877); a booklet on the Polubotok family's documents of 1669–1734 (1889); a description of the Chernihiv cathedrals of the Transfiguration and ss Borys and Hlib (1889); studies on the Little Russian nobility (1890) and the heraldic crests of Little Russian noble families (1892); a history of the town of Liubech (1898), which his family owned; and a genealogical guidebook to Chernihiv gubernia's nobility (2 vols, 1901). Documents from Myloradovych's family archive in Liubech were edited by O. Lazarevsky and published as supplements to *Kievskaiia starina* in 1896 and 1898 and separately in 1898. Myloradovych kept a diary from 1875 on. It is a valuable source for the study of Ukrainian conservatism in the second half of the 19th century.

O. Ohloblyn

Myloradovych, Vasyl [Myloradovyč, Vasyl'], b 1 January 1846 in Tokari, Lohvytsia county, Poltava gubernia, d 1911 in Lytvianky, Lubni county, Poltava gubernia. Ethnographer and folklorist. After graduating in law from Kharkiv University (1869) he served for many years as a justice of the peace in Lubni county. In his free time he studied the folklore and folkways of the local population. His more important articles, which were published in *Kievskaiia starina*, deal with workers' songs of Lubni county (1985), recruits' songs of Lubni county (1897), Sniatyn antiquities (1897–1900), folk medicine in Lubni county (1900), the daily life of a Lubni peasant (1902–4), the central Lubni region (1903), and the steppe Lubni region (1904). His unpublished manuscripts include collections of party and love songs, spring songs, and St Peter's Feast songs. He also translated H. Heine's, A. Maikov's, and A. Fet's poems.

Myloradovych, Yelysaveta [Myloradovyč, Jelysaveta], b 12 January 1832 in Trostianets, Pryluka county, Poltava gubernia, d 27 March 1890 in Poltava. Community leader and benefactor; aunt of P. *Skoropadsky. The daughter of I. Skoropadsky, a marshal of Poltava gubernia's nobility, she married H. Myloradovych's son, Lev, in 1856. In the 1860s she was active in the Poltava Hromada and contributed generously to Ukrainian publishing ventures and to local Sunday schools and the Poltava women's gymnasium. She personally funded the village school in Rybtsi, near Poltava. She also supported the Ukrainian move-

Yelysaveta Myloradovych

Dezyderii Myly: *Self-Portrait* (oil, 1934)

ment in Galicia, by giving generously to the Prosvita society and the journal *Pravda*. She donated 20,000 Austrian kronen for the founding of the Lviv Shevchenko Society in 1873; it became the *Shevchenko Scientific Society in 1893. From 1878 Myloradovych headed the Poltava Philanthropic Society. Her activities were investigated by the tsarist authorities, who suspected her of heading an organization whose aim was the restoration of the Hetmanate.

Mylost' Bozhiia Ukrainu ... svobodyvshaia (Divine Grace Which Has Liberated Ukraine ...). One of the masterpieces of Ukrainian baroque drama. The play was staged in 1728 at the Kievan Mohyla Academy. It was dedicated to Hetman D. *Apostol and was probably written by T. *Prokopovych. Its subject is Hetman B. Khmelnytsky and the Cossack-Polish War of 1648–57, and it abounds in lofty patriotic monologues. The language of the play is refined yet fresh and vivid. The text was first published by O. Bodiansky in Moscow University's *Chteniia v Imperatorskom obshchestve istorii i drevnostei rossiiskikh* (1858, vol 1). The play was analyzed by Ya. Hordynsky in *Zapysky NTSh* (vols 136–7, 146).

Myluvannia [Myluvannja] (aka Mylovanie). A village in Ivano-Frankivske raion, Ivano-Frankivske oblast. In 1911 the Prosvita society established the first Ukrainian agricultural school there. The school, which contributed to the improvement of farming methods and agricultural technology in Galicia, was dissolved by the Soviet occupational authorities in 1939.

Myly, Dezyderii [Mylyj, Dezyderij] (Dezider Milly), b 7 August 1906 in Kyjov, Sabinov county, Slovakia, d 1 September 1971 in Bratislava. Ukrainian artist. He studied at the Prešov Teachers' Seminary (1922–6) and the Prague Higher Applied Arts School (1926–33) and taught art at the village school in Orlov (1935–43), Slovak University in Bratislava (1947–9), and the Bratislava Higher School of Fine Arts (1949–71), where he served as rector in 1953–7. He produced lithographs, woodcuts, charcoals, watercolors, and oils. His works include genre paintings and landscapes of the Prešov region, such as *Peasants* (1934), *Without a Job* (1939), *Funeral* (1942), *Easter Monday* (1948), and *Rocks in the Country* (1969). An exhibition catalog of his works was published in Bratislava in 1971. A gallery of

his works was opened at the Museum of Ukrainian Culture in Svydnyk in 1983.

Oleh Mynko: *Portrait of My Daughter* (tempera, 1980)

Mynko, Oleh [Myn'ko], b 3 August 1938 in Makiivka, Donetske oblast. A graduate of the Lviv Institute of Applied and Decorative Arts (1965), in the 1960s he experimented with abstraction (eg, *Compositionii* [1959–65] and *Card Game* [1959–65]). His paintings, such as *Death of a Kish Otaman* (1969) and *Poem about the Old Steppe* (1969), combine amazing simplification of form with bold composition and make a statement about Ukrainian history. Since the 1970s he has painted portraits, still lifes, landscapes, and figural compositions characterized by hazy outlines and panoramic views over water (eg, *Village of Vytiaz* [1982] and *By the Lake* [1985]). Mynko participated in several group exhibitions with L. Medvid and O. Flinta in Lviv (1982), Kiev and Vilnius (1983), and Moscow (1986). His first solo exhibition was held in Lviv in 1988.

Mynko, Vasyl, b 14 January 1902 in Mynkivka, Valky county, Kharkiv gubernia, d 30 January 1989. Writer, journalist, and dramatist. His first published work was the 1924 play *Kupala*. From 1926 to 1932 he belonged to the peasant writers' group *Pluh. Mynko wrote several story collections, including *Belladonna* (1929) and *Na perepravii* (At the Crossing, 1933); the novels *Shturmiivtsi* (The Storm Troops, 1931), *Iaryna Cherkas* (1936), *Nad richkoiu Khorolom* (At the Khorol River, 1949), *Iasni zori* (Bright Stars, 1951); and the autobiographical novels *Moia Mynkivka* (My Mynkivka, 2 vols, 1962, 1970), *Cherovnyi Parnas* (Red Parnassus, 1972), and *Ikhav kozak na viinon'ku* (A Cossack Was Riding Off to War, 1979). He wrote many plays, notably

Ne nazyvaiuchy prizvyshch (Without Naming Names, 1953), *Komediia z dvoma infarktamy* (Comedy with Two Heart Attacks, 1967), and *Uvaha, kakadu!* (Attention, Cockatoo!, 1972). Editions of his travel sketches (1957, 1958), selected works (1962), comedies (1968), and plays (1959, 1977) have also been published. His memoirs, *Z perom, iak z bahnetom* (With a Pen, As If with a Bayonet), appeared in 1981.

Mynyk, Teodor, b 3 October 1896 in Tershiv, Staryi Sambir county, Galicia, d 10 July 1975 in Scranton, Pennsylvania. Ukrainian community activist in the United States. After emigrating to the United States in 1912, he joined the Ukrainian Workingmen's Association (1919) and served as its chief secretary (1927–74) and first vice-president (1959–74). He was also its representative in the Ukrainian Congress Committee of America, where he served as acting president in 1961–2.

Myr (World). A newspaper published in *yazychiie three times a week from March 1885 to mid-1887 (a total of 333 issues) in Lviv by Rev Y. Komarnytsky. Edited by him and I. Levytsky, it devoted considerable attention to church, political, economic, and cultural affairs (providing regular reports on the activities of the Galician and Viennese diets and reports from correspondents in various Galician towns) and published literary works by writers such as M. Vovchok, M. Kostomarov, and V. Masliak. In 1887 **Dush-pastyr* began appearing as a supplement to *Myr*.

Myrhorod. IV-14. A city (1990 pop 47,100) on the Khorol River and a raion center in Poltava oblast. It was founded in the mid-16th century, and in 1575 was granted town status and selected as a Cossack regimental center by King Stephen Báthory of Poland. Because of its role in the 1637–8 Cossack uprising the Myrhorod regiment was abolished. The town belonged to J. Wiśniowiecki until 1648, when it was captured by the Cossacks and restored as a regimental center. Myrhorod played an important role in the Cossack-Polish War of 1648–57. In 1650 Hetman B. Khmelnytsky conducted negotiations with Russian envoys there. In 1690–1 the Myrhorod regiment revolted against Hetman I. Mazepa. Under Russian rule Myrhorod became a county center of Poltava gubernia in 1802 and a prosperous trade center. Its economic development was strongly affected by the founding of a health resort in 1912–14 and the extraction of oil and natural gas in the 1950s. Today Myrhorod has several large enterprises of the building-materials industry and the food industry. Its mineral springs support seven balneological sanatoriums, which treat disorders of the digestive system, liver, and stomach. For centuries Myrhorod has been famous for its handicrafts, particularly its ceramics, embroideries, and folk dress. In 1896 the Gogol Handicrafts School and in 1912 the first Ukrainian ceramics manufacturing association were set up in Myrhorod. Today a ceramics tekhnikum and factory operate there. In its vicinity two settlements of the Cherniakhiv culture (2nd–4th century) have been excavated. N. *Gogol immortalized the town by naming his second volume of Ukrainian stories *Mirgorod* (Myrhorod, 1835).

Myrhorod regiment (Myrhorodskyi polk). An administrative territory and military formation of the Hetman

state. The regiment was first established in 1630 and was merged with Pereiaslav regiment in 1638. It was re-established in 1648 after the Cossacks overthrew Polish rule. With its administrative center in Myrhorod, the regiment consisted of 16 companies and 2,630 registered Cossacks. The territory was well populated: in 1657 it had 30,000 inhabitants. For supporting M. *Pushkar's rebellion the regiment was devastated by Hetman I. Vyhovsky in 1658. Most of its companies were transferred to Lubni regiment, and it was left with only four. In the 1670s six companies from Poltava and five from Chyhyryn regiments were added to it. By 1723 Myrhorod regiment's 15 companies had a population of 16,500, including 4,800 Cossacks. Its commanders included some prominent statesmen, such as Col M. *Hladky (1648–52) and D. *Apostol (1683–1727). The regiment was abolished by the Russian authorities in 1782, and its territory was incorporated into Kiev vicegerency.

Myrivske [Myrivs'ke]. VI-14. A town smt (1986 pop 7,600) under the administration of the Terny raion council of the city of Kryvyi Rih, Dnipropetrovske oblast. Myrivske was established in 1958. Several manufacturing enterprises related to the Kryvorizhzhalyzbeton manufacturing association as well as a manufacturing base of the Kryvyi Rih house-building complex and other enterprises are located in Myrivske.

Panas Myrny

Dmytro Myron

Myrny, Panas [Myrnyj] (pseud of Atanas Rudchenko), b 13 May 1849 in Myrhorod, d 28 January 1920 in Poltava. Writer. He worked in various government offices and eventually achieved the rank of full government councillor (1914). The works of T. Shevchenko had the greatest influence on the formation of Myrny's worldview, artistic preferences, and ideology. His early literary attempts included poems, dramas, and short stories. In 1872 the short story 'Lykhyi poputav' (The Evil One Did It), written in the style of M. *Vovchok, was printed in the Lviv journal *Pravda*. In 1877 appeared his novel *Lykhi liudy* (Evil People), about the life of the intelligentsia. His best-known work is the novel *Propashcha syla* (The Ruined Strength), also titled *Khiba revut' voly, iak iasla povni?* (Do the Oxen Bellow, When Their Mangers Are Full?, 1880),

which he coauthored with his brother, I. *Rudchenko (pseud: I. Bilyk). The work can be characterized as a sociopsychological novel-chronicle; it covers almost a hundred years in the history of a Ukrainian village, from serfdom to the postreform era. In it Myrny depicts social oppression, internal strife between different social groups, the tsarist legal system, the harsh life of a soldier during the time of Tsar Nicholas I, police violence, and spontaneous protests against lies and injustice. Myrny's second important sociopsychological novel, *Poviiia* (Loose Woman, 1884), describes new social processes brought about by the reforms of 1861. Myrny also portrayed the changed social dynamics of the village after the abolition of serfdom in the stories 'Lykho davnie i s'ohochasne' (Ancient and Contemporary Evil, 1903) and 'Sered stepiv' (Among the Steppes, 1903). Myrny also wrote some dramatic works, the comedies *Peremudryv* (He Outsmarted [Them], 1886) and *Zhuba* (Loss, 1896), and the dramas *U chernytsiakh* (Among the Nuns, 1884) and *Spokusa* (Temptation, 1901). The most popular drama was *Lymeryona* (The Daughter of the Harness Maker, 1883), which was first published in 1892 in the journal *Zoria* (Lviv). He is also known as the translator of H.W. Longfellow's poem *The Song of Hiawatha* and of W. Shakespeare's *King Lear*. Myrny markedly expanded the lexicon of the Ukrainian literary language and with his talent for rhythmic and melodious phrasing enriched Ukrainian syntax.

 P. Odarchenko

Myron, Dmytro (pseud: Orlyk), b 5 November 1911 in Rai, Berezhany county, Galicia, d 25 July 1942 in Kiev. Nationalist revolutionary leader. In the 1930s he studied law at Lviv University and was active in the OUN. As secretary of youth on the national executive of the OUN (1932–3) he was arrested by the Polish authorities and sentenced to five years in prison. In 1941 he led the Southeastern Expeditionary Group of the OUN (Bandera faction), and upon reaching Kiev in October of that year he became regional commander for central Ukraine. He was arrested by the Germans and killed during an escape attempt. He wrote a number of articles on ideological questions, including 'Ideia i chyn' (Idea and Deed, 1940).

Myronenko, Vasyl, b 9 January 1911 in Orikhivka, Lubni county, Poltava gubernia, d 10 April 1964 in Kharkiv. Graphic artist. After graduating from the Kharkiv Art Institute (1936) he taught there until his death. He did aquatint etchings, mostly of rural and industrial landscapes. His better-known print series are 'Ukrainian Landscapes' (1936–41), 'Ukraine' (1941–3), 'My Ukraine,' and 'The Azov Coast.'

Myroniuk, Lavro [Myronjuk], b 1887 in Rakhnivka, Haisyn county, Podilia gubernia, d ? Poet. In 1921 he stud-

ied at Charles University and at the Ukrainian Free University in Prague. From 1923 he lived in Vienna. He succumbed to a mental illness and was most likely murdered by the Nazis after their occupation of Austria. Myroniuk published a few dozen poems in émigré periodicals, such as *Veselka* and *Students'kyi visnyk*. He apparently wrote some 800 poems, 300 of which he gave to O. *Stefanovych. Only 61 have been preserved.

Myronivka. IV-11. A city (1990 pop 16,100) on the Rosava River and a raion center in Kiev oblast. It was founded in the first half of the 17th century and was annexed in 1793 by Russia. Its city status dates from 1968. It is the home of the famous *Myronivka Institute of Wheat Selection and Seed Cultivation.

Myronivka Institute of Wheat Selection and Seed Cultivation (Myronivskiyi naukovo-doslidnyi instytut selektsii i nasinnytstva pshenytsi). An important scientific research institute, subordinate to the formerly All-Union Academy of Agricultural Sciences, located in Myronivka raion, Kiev oblast. It was created in 1968 on the basis of the Myronivka Selection Research Station (est 1911 as the Central Research Station of Sugar Beet Cultivation, in 1956 renamed and subordinated to the Scientific Institute of Corn). Its divisions do scientific work on selection and seed development, the agrotechnology and mechanization of corn production, agriculture, and plant protection. It also has a laboratory of agrochemistry and a laboratory of flour-milling and bread-baking technologies. The research on selection and seed cultivation encompasses winter wheat, corn, peas, and fodder grasses. The institute has developed highly productive winter wheat varieties, including Ukrainka, Myronivka 264, Myronivka 808, and Illich.

Myronivskiyi [Myronivsk'kyj]. DB III-4. A town smt (1990 pop 9,800) on the Luhanka River, under the Debal'tseve city council in Donetsk oblast. Myronivskiyi was established in 1950 in conjunction with the building of the thermoelectric station there (see *Electric power).

Myronosytsi sisterhood. A women's society named in memory of the women who brought balsam to anoint Christ's dead body. The group was set up in 1886 at the Greek Catholic church in Chernivtsi to maintain the building and raise funds for the parish. It later extended its activity to charitable work, particularly among poor children. In 1896–7 the society organized the first Ukrainian kindergarten in Chernivtsi, which it maintained until 1940. In the 1920s it provided aid to refugees from Soviet Ukraine. Its leading members were E. Kaluzhniatska, K. Kostetska, M. Bilynevykh, and O. Siretska. The society was dissolved in 1940.

Myropil [Myropil']. III-8. A town smt (1986 pop 5,700) on the Sluch River in Dzerzhynske raion, Zhytomyr oblast. It is first mentioned in historical documents of the early 16th century. Today it has a paper factory, silicate, asphalt, and baking plants, a forestry industry, and a hydroelectric station.

Myrovych [Myrovych']. A family of Cossack *starshyna* in Pereiaslav regiment that was significant during the het-

mancies of I. *Mazepa and P. Orlyk. It was established by Ivan *Myrovych, the colonel of Pereiaslav regiment in 1692–1706. His son, Fedir *Myrovych, was Mazepa's general standard-bearer (1708–9) and fled abroad with Mazepa after the Russian victory at Poltava in 1708. All of the Myrovych estates were confiscated by the Russian government. Fedir's mother, Pelahiiia (née Holub, a relative of Hetman I. Samoilovych), was deported to Moscow with other members of the family. She was exiled to Tobolsk in 1716 and was not allowed to return to Ukraine until 1745, and then only on the condition that she not communicate with Fedir or her other renegade son, Ivan *Myrovych. Her third son, Vasyl (d 1736), who had also been deported to Moscow, was accused in 1715–16 of contacts with the Swedes and his brother Fedir and of attempting to escape abroad. After many tortures he was exiled to forced labor in Siberia, where he died. His sister, Anna, married A. *Voinarovsky and lived for a time in Bendery. After the Russians captured her husband, she and her children sought refuge in Sweden. Fedir's sons, Yakiv and Petro, were taken to St Petersburg for schooling. For contacting their father they were exiled in 1732 to Siberia, where they were both appointed military governors in 1742, Yakiv in Kuznetsk and Petro in Eniseisk. Yakiv's son, Vasyl (1740 to 26 September 1764), was a second lieutenant in the Russian army. He was executed for taking part in a foiled plot to liberate the former tsar Ivan VI from the Schlüsselburg Fortress.

O. Ohloblyn

Myrovych, Fedir [Myrovych'], b ?, d 1758 in the Crimea. Cossack leader; son of I. *Myrovych. A graduate of the Kievan Mohyla Academy, he became a fellow of the standard and served as general standard-bearer of the Hetman state in 1708–9. He fled abroad with Hetman I. Mazepa after the Russian victory at Poltava in 1709. In 1710–11 he was general osaul to the émigré hetman P. Orlyk. He lived abroad in the Crimean Khanate, the Ottoman Empire, Sweden (1715–19), and Poland (1719–54) before returning to the Crimea. He was entrusted with many political tasks by Orlyk, particularly that of maintaining a liaison with the Zaporozhian Sich. The tsarist regime responded to Myrovych's 'treasonous' activities by exiling his mother, brother, and children and confiscating all of their estates and assets (see *Myrovych). He remained an unrelenting enemy of Moscow and a defender of the Ukrainian right to statehood as set forth in the 1710 Constitution of *Bendery.

Myrovych, Ivan [Myrovych'], b ?, d 1709. Cossack leader. A notable military fellow from 1689, he was appointed colonel of Pereiaslav regiment (1691–1706) by Hetman I. Mazepa. He took part in numerous campaigns, particularly against the Tatars. During the Great Northern War he was acting hetman of a 10,000-man Cossack army in Volhynia. He was taken prisoner by the Swedes near Liakhavichy, in Belarus, in the spring of 1706, and died in Swedish captivity. He was a patron of Ukrainian church art and funded the construction (1704–9) of the Church of the Holy Protectress in Pereiaslav.

Myrovych, Ivan [Myrovych'], b ?, d 1753. Political prisoner and émigré figure. Because of the role his brother, F. *Myrovych, played in Hetman I. Mazepa's revolt against

Peter I, Ivan was exiled to Moscow in 1712 and to Siberia in 1716, where he served as a captain in mining factories from 1728 on. In 1730 he was sent to St Petersburg with a shipment of iron, but he escaped to the Crimea and served as an interpreter to the Crimean khan. He and his brother served as Hetman P. Orlyk's liaison officers with the Zaporozhian Cossacks (to 1734) and the Crimean Khanate. In 1735 he was Orlyk's envoy to the Polish king Stanislaus I Leszczyński in France, and in 1736 he served as Orlyk's representative at Turkish army headquarters.

Mys Ochkynskyi. A Neolithic settlement on the left bank of the Desna River near the village of Ochkyne, Sere-dyna-Buda raion, Sumy oblast. Excavation in 1947 uncovered a large number of flint tools (axes, wedges, knives, scrapers, awls, chisels) as well as pottery that had combed or pitted ornamentation. The burial practice of the settlement was typical of the *Middle-Dnieper culture.

Myshakov, Oleksandr [Myšakov], b 1913 in Kharkiv. Gymnastics coach. A graduate of the Kharkiv Institute of Physical Culture before the Second World War, after the war he taught at the Kiev Institute of Physical Culture and trained many Ukrainian world and Olympic champions in *gymnastics.

Myshanych, Oleksa [Myšanyč], b 1 April 1933 in Liahovets, near Mizhhiria, in Transcarpathia. Literary scholar. After graduating from Uzhhorod University (1956) he completed his graduate studies at the AN URSR (now ANU) Institute of Literature (1961) and joined its staff as a research associate. In 1985 he became head of the Department of Old Ukrainian Literature. He has written over 100 articles in the history of Ukrainian literature, folklore, Ukrainian literature in Transcarpathia and Yugoslavia, and inter-Slavic literary relations and has edited a number of anthologies and scholarly collections. His more important monographs are *Literatura Zakarpattia 17–18 st.* (The Literature of Transcarpathia of the 17th to 18th Century, 1964), *Hryhorii Skovoroda i usna narodna tvorčist'* (Hryhorii Skovoroda and the Oral Folk Tradition, 1976), and *Ukraïns'ka literatura druhoi polovyny 18-oho st. i usna narodna tvorčist'* (Ukrainian Literature of the Second Half of the 18th Century and the Oral Folk Tradition, 1980).

Myshchenko, Fedir [Myščenko] (Mishchenko, Fedor), b 29 February 1847 in Pryluka, Poltava gubernia, d 1906 in Kiev. Classical scholar. While a student (1866–70) and a docent (1872–84) at Kiev University, he was active in the Hromada of Kiev, was a member of the Historical Society of Nestor the Chronicler (from 1874), and served on the editorial board of *Kievskaiia starina*. His Ukrainophile sympathies, correspondence with M. Drahomanov, and critical articles in the press cost him his job at Kiev University and earned him administrative exile from Kiev. From 1889 to 1903 he was a professor of classics at Kazan University. His articles on Greek literature, writers, history, and historians and on the Scythian world were published in *Universitetskaia izvestiia* (Kiev), *Zhurnal Ministerstva narodnago prosveshcheniia*, and *Filologicheskoe obozrenie* and in the Brockhaus and Efron Russian encyclopedia. His biography, by A. Shorman, was published in Kazan in 1974.

Myshchenko, Fedir [Myščenko], b 11 August 1874 in Poltava gubernia, d ? Byzantologist; VUAN full member

from 1919. Before the Revolution of 1917 he was a professor at the Kiev Theological Academy. Under the 1918 Hetman government he was a professor at Kiev University and a member of the Learned Committee of the Ministry of Religious Denominations. From 1919 he headed the VUAN Commission for the Study of Byzantine Literature and Its Impact on Ukraine. He and K. Kharlampovych were dismissed in 1928 by order of the People's Commissariat of Education because of their earlier affiliation with the Theological Academy. Further details of his life are unknown. Among his works is a booklet on Byzantine marriage and kinship (1927).

Myshchenko, Mykola [Myščenko] (Mishchenko), b 1895 in Kharkiv, d 30 July 1960 in Kiev. Painter and graphic artist. A graduate of the Kharkiv Art School (1919), he was a member of the Union of Seven cubo-futurist artists' group in Kharkiv from 1915 and submitted works to their album *Sem' plus tri* (Seven Plus Three, 1918). His *Musical Window* (1917) and *Departure* (1918) illustrate the group's intuitive approach to dynamism. From the 1930s on he painted stylistically traditional figures and landscapes.

Myshetsky, Semen [Myšeckij], b 1716, d ? Russian nobleman and military engineer. After living at the *Sich from 1736 to 1740, he wrote *Istoriia o kazakakh zaporozhskikh ...* (A History of the Zaporozhian Cossacks ..., 1740). The work remained in manuscript form until it was published in the proceedings of the Moscow-based Imperial Society of History and Antiquities (1847) and then in a superior form in the proceedings of the Odessa Society of History and Antiquities (1852). Together with the writings of A. *Rigelman, Myshetsky's history remains one of the most valuable primary sources about the Zaporozhians in the 18th century, particularly in its portrayal of their social order and daily life.

Gen Yevhen Myshkivsky

Luka Myshuha

Myshkivsky, Yevhen [Myškivsk'kyj, Jevhen], b 12 April 1882 in Poltava gubernia, d 9 July 1920 in Ternopil, Galicia. Senior officer of the UNR Army. A graduate of the General Staff Academy in St Petersburg (1912), he served in the Russian army during the First World War and attained the rank of colonel. In 1918 he joined the UNR Army and was assigned to the operations branch of the General Staff. On 10 December 1918 he became chief of the General Staff of the Ukrainian Galician Army (UHA); he is credited with preparing its organizational scheme. From February 1919 he served as chief of staff of the Eastern Group of the UNR

Army, then of the Volhynian Group, and finally of the UNR Army itself. In 1920 he was appointed general quartermaster on the General Staff of the UNR Army. He was mortally wounded in action against the Bolsheviks. He was promoted posthumously to brigadier general.

Myshko, Dmytro [Myško], b 9 November 1907 in Karpylivka, Lubni county, Poltava gubernia, d after 1976. Historian. A graduate of the Kharkiv Pedagogical Institute (1937) and a senior associate of the AN URSR (now ANU) Institute of History from 1943, he wrote books about the Cossack leaders I. Bohun (1956) and S. Nalyvaiko (1962), Ukrainian-Russian relations in the 14th to 16th centuries (1959), and the peasantry and antifeudal movements in 15th- and 16th-century Ukraine (1963).

Myshkovsky, Tyt [Myškovs'kyj], b 4 October 1861 in Perehrymka, Sianik circle, Galicia, d 4 February 1939 in Lviv. Theologian, biblical scholar, and priest. He was ordained in Peremyshl in 1885, and he completed his THD in Vienna in 1889 and then became prefect of the Greek Catholic Theological Seminary (1889–94) in Lviv. He began lecturing at Lviv University in 1899 and became a full professor of biblical studies in 1908. When he refused to swear an oath of allegiance to the new Polish state in 1918, he was dismissed from the university. From 1920 he taught at the Greek Catholic Theological Seminary in Lviv, and in 1928 he became a full professor, and later dean and vice-rector, of the Lviv Greek Catholic Theological Academy. In 1923–39 he also served as president of the *Halytsko-Ruska Matytsia. In addition to several articles in Ukrainian for religious journals, Myshkovsky published the following works in Latin: *Chronologico-historica introductio in Novum Testamentum* (1892), *De ratione litterarum A.T. in Cantico Mariae conspicua* (1901), and *Isaiae liber in versionibus Graeca LXX et Latina Vulgata et Paleoslavica exhibitus et explicatur* (1909).

Myshuha, Luka [Myšuha], b 30 October 1887 in Novyi Vytktiv, Radekhiv county, Galicia, d 8 February 1955 in New York. Civic and political leader and journalist; nephew of O. *Myshuha. A graduate (1911) of the law faculty of Vienna University, he joined the Ukrainian Sich Riflemen in 1915 and served as a community organizer in Volodymyr-Volynskyi. With the collapse of the Austrian Empire he set up a Ukrainian local government in the town. Upon returning to Galicia he was assigned as a commissioner of the Western Ukrainian National Republic (ZUNR) to Radekhiv and then as a lieutenant to Otaman S. Petliura's general staff in Kamianets-Podilskyi. At the end of 1919 he moved to Vienna with the ZUNR government and thenceforth carried out special assignments for it: he was secretary of a mission to Riga (1921) and head of a mission in Washington, DC, which, besides maintaining diplomatic ties, raised loans for the ZUNR government-in-exile (1921–3). He organized the *United Ukrainian Organizations in America and served as its general secretary (1923–40), helped found the Ukrainian Congress Committee of America (1940) and sat on its political council, and helped organize the *United Ukrainian American Relief Committee (1944), which he headed (1953–5). He also worked as an editor (1926–33) and chief editor (1933–55) of **Svoboda*. He wrote many brochures on political, historical, and literary subjects, including *Iaki teper sudy na Ukraini?* (What Are the Courts Like Today in Ukraine?,

1919), *Ukraine and American Democracy* (1939), and *Shevchenko and Women* (1940), and edited *Propamiatna knyha Ukraïns'koho narodnoho soiuzu* (Jubilee Book of the Ukrainian National Association, 1936), *Ukraïntsi u vil'nomu sviti* (Ukrainians in the Free World, 1954), and the annual almanacs and calendars of *Svoboda* and the Ukrainian National Association. He encouraged scholarly publications on Ukraine and inspired the preparation of *Ukraine: A Concise Encyclopaedia* (1963).

Oleksander Myshuha

Myshuha, Oleksander [Myšuha] (stage name: Filippi), b 20 June 1853 in Novyi Vytktiv, Radekhiv county, Galicia, d 9 March 1922 in Freiburg, Germany (buried in Novyi Vytktiv). Opera and concert singer (lyric tenor), teacher, and benefactor. He studied in Nice and Milan and under W. Wysocki at the Lviv Conservatory and made his debut in Lviv (1880) in S. Moniuszko's *The Haunted Castle*. Myshuha was highly successful as first tenor of the Warsaw Grand Theater (1884–92), especially in operas by Moniuszko. In 1885 he appeared as a guest performer at the Vienna Imperial Opera. In addition he toured Lviv, Kiev, St Petersburg, Italy, France, Berlin, and London. His recordings of songs by F. Mendelssohn and F. Tosti and of arias from Moniuszko's and C. Gounod's operas executed for the Gramophone and Zonophone labels (ca 1911–12) are today extremely rare and highly valued collector's items. In later years Myshuha taught at the Lysenko Music and Drama School in Kiev (1904–11), the Chopin Higher Music School in Warsaw (1911–14), the Moniuszko Music Institute in Warsaw (1912–13), and in Stockholm (from 1919). His students included M. Mykysha, S. Myrovych, and M. Donets-Tesseir. A friend of I. Franko, Myshuha assisted in the publication of his collection *Ziviale lystia* (Withered Leaves). Myshuha funded the publication of *Ukraïns'ke mystetstvo* (Ukrainian Art) in Kiev, actively supported Sadovsky's Theater, and left his entire estate to the Lysenko Higher Institute of Music in Lviv.

R. Savytsky

Mysko, Emmanuil [Mys'ko, Emmanujil], b 21 May 1929 in Ustryky Dolishni, Lisko county, Galicia. Sculptor. A graduate of the Lviv Institute of Applied and Decorative Arts (1956), he has taught there since 1981 and became its rector in 1988. He has sculpted portraits of artists, such

as O. Kulchytska (1957–60), O. Novakivsky (1960), and L. Levytsky (1966), and of writers, such as V. Gzhytsky (1970), R. Ivanychuk (1970), and V. Stefanyk (1971), and collaborated on the monuments to I. Franko in Lviv (1964) and Drohobych (1967) and to the Soviet Armed Forces in Lviv (1970). An album of his works came out in 1978.

Myslavsky, Samuil [Myslavs'kyj, Samujil] (secular name: Semen), b 24 May 1731 in Poloshky, Hlukhiv region, d 5 January 1796 in Kiev. Orthodox churchman and scholar. After graduating from the *Kievan Mohyla Academy in 1754, he became a monk, and professor and rector (1761–8) of the academy. He also wrote a brief history of the academy (1766). He was consecrated bishop of Belgorod in 1768 and served as administrator of Moscow eparchy (1771–6) and bishop of Rostov and Yaroslavl (1776–83). He was appointed to the Holy Synod in 1775 and elected archbishop in 1777. In 1783–96 Myslavsky was metropolitan of Kiev. Although he attempted to preserve some of the prerogatives of the Kievan metropolitan, he soon became an influential proponent of Russian centralization and control over Ukrainian church affairs. He insisted on the introduction of literary Russian as the only language of instruction at the academy, which he reformed to emphasize its role as a seminary, and to which he limited the admission of lay students. He also oversaw the secularization of monasteries and church property in the Hetmanite under Catherine II, and he sought to end the Ukrainian tradition whereby each parish chose its own priest, and replaced it with the episcopal appointment of clergy. A member of the Russian Imperial Academy of Sciences, he oversaw the publication of T. Prokopovych's works and wrote a history of the Kievan Cave Monastery (published posthumously in 1817). His biography, by T. Rozhdestvensky, appeared in *Trudy Kievskoi dukhovnoi akademii* (1876–7).

A. Zhukovsky

Mystery plays (*misterii*). Medieval religious allegorical plays. They originated in France and then spread throughout Europe. In Ukraine Y. Boretsky began staging 'passions' (a form of liturgy with elements of mystery plays) in 1626. Later a multitude of allegorical baroque plays were written, among which were D. Tuptalo's *Komediiia na den' rozhdstva Khrystova* (A Comedy on the Day of Christ's Birth) and Yu. Konytsky's *Voskresenie mertvykh* (Resurrection of the Dead). During the Romantic period of the 19th century, mystery plays once again became fashionable. A typical example is T. Shevchenko's satiric poem 'Velykyi l'okh' (The Great Vault).

Mystets'ka trybuna (Art Tribune). A semimonthly illustrated art journal published by the All-Ukrainian Committee of Art Workers in Kharkiv in 1930–1 (a total of 33 issues). *Mystets'ka trybuna* published art and film criticism and theoretical articles. It devoted special attention to art education and the debates on the development of Soviet Ukrainian art. Its contributors included many prominent artists, critics, and writers, among them L. Kurbas, A. Petrytsky, O. Dovzhenko, M. Krushelnytsky, and D. Hrudyna.

Mystetskyi ukrainskyi rukh. See MUR.

Mystetstvo. A publishing house founded in Kharkiv in February 1932. Since 1935 (except in 1941–4) it has been located in Kiev, where from 1956 to 1963 it was called the Publishing House of the Pictorial Arts and Musical Literature. *Mystetstvo* has been the principal publisher in Ukraine of books in art theory, the fine arts, theater, and film and of art books, catalogs, posters, and calendars. Each year it publishes at least 100 titles with a total run of at least 2 million.

Mystetstvo (cover design by Heorhii Narbut)

Vasyl Mysyk

***Mystetstvo* (Art)**. A literature and art journal, of which only eight issues appeared in Kiev: six between May and July 1919, one later in 1919, and one in April 1920. The journal was edited by H. *Mykhailychenko and M. *Semenko and was the organ of the Ukrainian Section of the All-Ukrainian Literary Committee and, with issue no. 3, the Division of Arts of the People's Commissariat of Education. The direction that the new Soviet Ukrainian literature, art, and theater should take was discussed on its pages. Among its contributors were the editors and V. Blakytyn, M. Burachek, V. Chumak, V. Koriak, H. Kotsiuba, I. Kulyk, L. Kurbas, O. Murashko, H. Narbut, A. Petrytsky, K. Polishchuk, Ya. Savchenko, O. Slisarenko, M. Tereshchenko, P. Tychyna, V. Yaroshenko, and D. Zahul.

***Mystetstvo* (Art)**. An illustrated organ of the *Association of Independent Ukrainian Artists, five issues of which appeared in Lviv in 1932–6. The journal contained art reproductions, criticism, articles on the history of Ukrainian art, and reviews. It was edited by P. Kovzhun and S. Hordynsky.

***Mystetstvo* (Art)**. A bimonthly illustrated arts magazine published in Kiev from January 1959 to December 1969. The organ of Ukraine's Ministry of Culture and unions of composers and artists, it was edited by a board headed by I. Chabanenko (1954–8) and I. Kornienko (1958–69). The magazine published popular articles on Ukrainian, Soviet, and Soviet-bloc art, music, dance, opera, theater, and film. Among the contributors were prominent Soviet Ukrainian figures in the arts. In 1970 *Mystetstvo* was succeeded by three journals: **Obrazotvorche mystetstvo*, **Muzyka*, and **Ukrains'kyi teatr*.

Mystetstvo kino (Art of Cinema). An annual scholarly serial published since 1979 by the Kiev Institute of Theater Arts. It discusses problems and issues in cinema and profiles leading cinema personalities.

Mysyk, Vasyl, b 24 July 1907 in Novopavlivka, Katerynoslav gubernia, d 3 March 1983 in Kharkiv. Writer and translator. He debuted as a poet in *Chervonyi shliakh* in 1923. From 1924 he lived in Kharkiv, where he belonged to the writers' groups *Pluh and *Prolitfront, contributed to *Literaturnyi iarmarok*, studied English, German, and Persian, and published the poetry collections *Travy* (Grasses, 1927), *Blakytnyi mist* (The Azure Bridge, 1929), *Chotyry vitry* (The Four Winds, 1930), *Turksyb* (1932), and *Budivnyky* (Builders, 1933) and the story collection *Galaganiv son* (Galagan's Dream, 1930). After visiting Central Asia he wrote the essay collections *Tysiachi kilometriv* (Thousands of Kilometers, 1931) and *Kazakhstan's'ka magistral'* (The Kazakhstan Trunk Line, 1931). He was arrested during the Stalinist terror in December 1934 and was imprisoned in labor camps in the Soviet Arctic until 1940. From 1942 to 1945 he was in a German concentration camp for Soviet prisoners of war. After being rehabilitated in 1956, he published editions of his selected works (1958, 1967, 1977), the new collections *Borozny* (Furrows, 1962), *Verkhovittia* (Top Branches, 1963), *Chornotrop* (The Snow-free Way, 1966), *Lan* (The Farmland, 1970), and *Bereh* (The Shore, 1972), and the story collection *Brians'kyi lis* (Briansk Forest, 1978). He became a leading translator of English, American, German, and Persian literature. Published separately were his translations of the poetry of R. Burns (1932), Rudaki (1962), Omar Khayyam (1965), J. Keats (1968), Hafez (1971), and Firdousi (1975). A book of his articles and essays was published in 1982, and a collection of memoirs about him and V. Khytruk's literary biography appeared in 1987.

R. Senkus

Mythology. A body of myths or stories dealing with the gods, demigods, and heroes of a given people. The earliest historical record of pre-Christian religious beliefs in Ukrainian territory belongs to the 6th-century Byzantine historian Procopius of Caesarea. According to him the Sclaveni and *Antes were monotheist. They believed in a god of lightning and thunder and sacrificed cattle and other animals to him. Procopius does not give the god's name. M. Hrushevsky and other scholars assumed it was *Svaroh. These peoples also venerated rivers, water nymphs, and other spirits, offered sacrifices to them, and foretold the future from the offerings.

Two periods are distinguished in the evolution of eastern Slavic mythology: an earlier one, marked by Svaroh's supremacy, and a later one, dominated by *Perun. The legends about the *Scythians as having originated from one father and three sons and about the founding of Kiev by the three brothers Kyi, Shchek, and Khoryv, as well as 12th-century data on the pagan pantheon of Kievan Rus', suggest that the chief god of the Sclaveni and Antes was named Troian, which in Ukrainian suggests 'father of three sons.' A reference to the deity in **Slovo o polku Ihorevi* has led some scholars to the conclusion that Troian was at one time the ruling god of Rus'. In the 12th-century apocryphal work 'Khozhdeniie Bohorodytsi po mukakh' (The Mother of God's Journey through the Agony) Troian is

listed first among the deities and is followed by *Khors, *Veles, and Perun. The grouping of father and three sons was observed in the pantheon of Volodymyr the Great, in which Perun was elevated to first place and was followed by Khors, *Dazhboh, and *Stryboh. By function and importance Svaroh or Troian corresponds to *Sviatovyt (Svitovyt), the god of the sun and later of war and plenty in the western Slavic pantheon.

The main deities of the early period of Kievan Rus' were Perun, the god of rain, lightning, and thunder, and Veles (Volos), the god of livestock. As the tribal society evolved into a more organized state, the functions of both deities expanded: Perun became the god of war, and Veles, the god of prosperity and commerce, and they were adopted by the prince as the official gods of the state. At first Volodymyr the Great tried to create a unified state religion by incorporating all common and tribal deities of his realm into one pantheon. According to the Primary Chronicle (for 980 AD) Volodymyr set up idols of Perun, Khors, Dazhboh, Stryboh, Symarhl, and *Mokosh outside the palace at Berestove. The chief god in this pantheon was Perun. Khors, a sun god borrowed from the Persians, was second in rank. Dazhboh's functions were similar to Khors's. Some scholars held that the two names referred to the same god. Next in rank was Stryboh, the god of wind and water. The nature of Symarhl has been the subject of much speculation. Some scholars identify Mokosh with *Marena, the Slavic goddess of spring and water; others define her as a goddess of birth. Volodymyr's pantheon was short-lived; in 988 Christianity became the state religion.

The cults of *Kupalo, *Koliada, Tur, *Yarylo, Kostrub, *Lada, and Marena of the early Slavic and Princely periods survived for several centuries after the introduction of Christianity and then were absorbed into Christian ritual or folk customs. Their memory lingers in popular superstition and folklore. Mythological figures such as Lado, Lel, Polel, and Podaha, who appear in 16th- and 17th-century monuments and later literature, are mostly of literary origin.

The mythological figures of *Rod and the *rozhanytsi*, who are mentioned in many literary monuments, date back to prehistoric times. The *rozhanytsi* are similar in function to the Roman Parcae, whose name is derived from the Latin *parcere* 'to give birth.' The names Rod and Rozhanytsia are related to the Ukrainian (and Slavic) words *rid* 'clan,' *narod* 'people,' *rodyty* 'to give birth,' and *pryroda* 'nature.' The belief in Rod and the *rozhanytsi* influenced folk ideas of death, the dead, and the afterworld and folk wedding and birth rituals. The church struggled for many centuries against the cults of these deities.

During Christian times the ancient mythology of Ukraine's inhabitants survived to some extent in the folklore and *demonology of the Ukrainian people. Many elements of ancient religious belief were absorbed also by church rites and ritual.

Mytiukov, Kalenyk [Mytjukov] (aka Mytiuk), b 3 August 1823 in Kiev, d 1885. Scholar. After graduating from Kiev University (1845) he taught Roman law there (1846–81) and served as dean of the law faculty (1861–3, 1865–7) and rector of the university (1865–9). For many years he presided over the Kiev Juridical Society, which he helped found. His main work is *Kurs rimskogo prava* (A Course in Roman Law, 1883–4).

Rev Oleksander Mytrak

Yurii Mytropolsky

Mytrak, Oleksander (Mitrak, Alexander; pseud: Materyn), b 16 October 1837 in Ploske, Transcarpathia, d 17 March 1913 in Rosvyhove, near Mukachiv, Transcarpathia. Orthodox priest, writer, ethnographer, folklorist, and lexicologist of Russophile orientation. His ethnographic studies appeared in some Transcarpathian papers, such as *Slovo*, *Listok*, and *Karpaty*. He collected folk songs, some of which were published in Ya. Holovatsky's *Narodnye pesni Galitskoi i Ugorskoj Rusi* (Folk Songs of Galician and Hungarian Ruthenia, 1878). His elegies and patriotic verses appeared under his pseudonym. He compiled and published at his own expense a Russian-Hungarian dictionary of almost 70,000 words, including over a thousand middle-Transcarpathian dialectisms (1881). His Hungarian-Russian dictionary was published only in 1922.

Mytrofanov, Syl'a, b ?, d 1772. Physician. After being educated at the Kievian Mohyla Academy and the medical schools of the Moscow and St Petersburg general hospitals, he received a PHD from Leyden University in 1765. As chief physician of the Kiev Military Hospital, from 1770 he directed the fight against the plague in Podilia, and eventually became infected himself. His publications include a study of spontaneous pneumothorax.

Mytropolsky, Yurii [Mytropol's'kyj, Jurij], b 3 January 1917 in Shyshaky, Myrhorod county, Poltava gubernia. Mathematician; full member of the AN URSR (now ANU) since 1961 and of the USSR Academy of Sciences from 1984. After graduating from Kazakh University in Alma-Ata (1942), he worked at the Institute of Constructive Mechanics of the ANU (1946–50) and the Institute of Mathematics of the ANU (1951–88). He also taught at Kiev University from 1949. Under his directorship (1958–88) the institute expanded greatly and improved the quality of its work. Mytropolsky has made major contributions to the theory of oscillations and nonlinear mechanics as well as to the qualitative theory of differential equations. He further developed asymptotic methods and applied them to the so-

lution of practical problems. He extended the Krylov-Bogoliubov symbolical method to nonlinear systems and extended asymptotic methods in the theory of nonlinear oscillations, and later applied these to many equations of nonlinear mechanics. Using a method of successive substitutes, he constructed a general solution for a system of nonlinear equations and studied its behavior in the neighborhood of the quasi-periodic solution. He also successfully applied the averaging method to the study of oscillating systems with slowly varying parameters.

W. Petryshyn

Oleksander Mytsiuk

Mytsiuk, Oleksander [Mycjuk], b 21 June 1883 in Novooleksandrivka, Katerynoslav gubernia, d 30 December 1943 in Prague. Economist, sociologist, and political activist; full member of the Shevchenko Scientific Society. A supporter of the Revolutionary Ukrainian party in the early 1900s, he was arrested and exiled for organizing a peasant alliance. After his release he joined the Ukrainian Party of Socialist Revolutionaries. During the struggle for Ukrainian independence he served under the UNR Directory as minister of internal affairs and deputy minister of the national economy. After fleeing to Czechoslovakia he was a professor at the Ukrainian Husbandry Academy and then a professor and rector of the Ukrainian Free University in Prague (1938–9, 1940–1). Mytsiuk published articles and monographs in economics, including the textbooks *Istoriia politychnoi ekonomii* (A History of Political Economy, 2 vols, 1922, 1923) and *Agrarna polityka, 1800–1925* (Agrarian Politics, 1800–1925, 2 vols, 1925), *Agraryzatsiia zhydivstva Ukraïny na tli zahal'noi ekonomiky* (The Agrarianization of the Jews of Ukraine against the Background of the General Economy, 1933), *Narysy z sotsial'no-hospodars'koi istorii b. Uhors'koi, nyini Pidkarpats'koi, Rusy* (Essays in the Socioeconomic History of the Former Hungarian, Now Subcarpathian, Ruthenia, 2 vols, 1936, 1938), and biographies of T. Rylsky (1933) and S. Podolynsky (1933).

Mytsyk, Ivan [Mycyk] (nom de guerre: Askold), b 1913 in Synevysko Vyzhnie, Stryi county, Galicia, d spring 1941 near Yezupil, Stanyslaviv county, Galicia. Nationalist revolutionary. An OUN member, he was sentenced in 1931 by a special Polish court to 20 years in prison for killing a provocateur. When Poland fell in 1939, he was released from prison and appointed deputy chief of the OUN (Melnyk faction) for Western Ukraine (1940–1). He was allegedly killed by the rival Bandera faction.

Mytusa. A modernist monthly of literature and art edited by the poets V. *Bobytsky and R. *Kupchynsky and the artist P. *Kovzhun, four issues of which were published in Lviv from January to April 1922. The periodical was named after a medieval Galician bard and had a symbolist profile. Among its contributors (many of them Ukrainian Sich Riflemen veterans) were the writers O. Babii, Yu. Shkrumeliak, A. Pavliuk, M. Obidny, B. Homzyn, Yu. Lypa, and D. Zahul, the critic M. Rudnytsky, and the scholar V. Sichynsky. Works by H. Narbut, A. Archipenko, and Kovzhun were reproduced in the journal.

Myzin, Oleksandr, b 23 July 1900 in Kharkiv, d 26 July 1986 in Moscow. Decorative artist. He graduated from the Kiev State Art Institute (1928), where he studied under M. Boichuk, and from 1936 taught at the Moscow Art Institute. He has painted frescoes and designed mosaics, tapestries, and stained-glass windows. The Kiev Ring station of the Moscow metro is decorated with his mosaic panels (1952–4). He designed the stained-glass window *Friendship of Peoples* (1954) for the palace of culture in Nova Kakhivka, the tapestry *Soviet Ukraine* (1956), and the murals of the palace of culture at the Kremenchuk Hydroelectric Station (1959–60).

N

Na finansovomu fronti (On the Financial Front). A semimonthly magazine of the People's Commissariat of Finances, the USSR State Bank, and the Union of Financial and Banking Employees. Published in Kharkiv (1930–4) and Kiev (1935–41, 1945–6), it contained official decrees and information about the Ukrainian banking system. It was succeeded by *Na dopomohu finansovomu pratsivnyku* (1947–9).

Na Hori (On the Mountain). A publishing venture in West Germany established by I. *Kostetsky and his wife, E. Kottmeier. Unique in its devotion to the enrichment of Ukrainian literature through translations, it published editions in Ukrainian translation of T.S. Eliot's selected poems (1956, trans Kostetsky) and *Murder in the Cathedral* (1963, trans Z. Tarnavsky); O. Wilde's *Salome* (1957, trans B. Lepky); W. Shakespeare's *Romeo and Juliet* (1957, trans Kostetsky), sonnets (1958, trans Kostetsky), *Macbeth* and *Henry IV* (1961, trans T. Osmachka), and *King Lear* (1969, trans V. Barka); P. Claudel's *L'Annonce faite à Marie* (1962, trans M. Kalytovska); J. Anouilh's *Antigone* (1962, trans Zh. Vasylykivska); a collection of Japanese tankas compiled by Fujiwara no Sadaie in 1235 (1966, trans I. Shankovsky); and the selected poetry of F. Garcia Lorca (1958, various trans), E. Pound (1960, trans Kostetsky et al), S. George (1971, trans Kostetsky, O. Zuievsky, and M. Orest), R.M. Rilke (1971, trans Kostetsky), C. Beaudelaire (1979, trans V. Vovk), and P. Verlaine (1979, trans Kostetsky). It also published Kottmeier's German translations of V. Barka's *Troiandnyi roman* (*Trojanden-Roman*, 1956), the anthology *Weinstock der Wiedergeburt: Moderne ukrainische Lyrik* (1957), and V. Vovk's poetry collection *Liebesbriefe der Fürstin Veronika an den Kardinal Giovanni Battista* (1967); collections of poems and translations by O. Zuievsky (*Pid znakom feniksa* [Under the Sign of the Phoenix], 1958), M. Kalytovska (*Rymy i ne-rymy* [Rhymes and Non-Rhymes], 1959), and V. Lesych (*Kreidiane kolo* [Chalk Circle], 1960); and V. Vovk's poetry collection *Chorni akatsii* (Black Acacias, 1961) and novel *Vitrazhi* (Stained-Glass Windows, 1961).

R. Senkus

Na shakhti (At the Mine). A weekly newspaper for Ukrainians working in Germany's mines during the Second World War. It was published in Berlin in 1942–5 and edited by B. Kravtsiv.

Na slidi (On the Trail). A monthly magazine for teenagers, published in Lviv in 1936–9 and edited by R. Olesnytsky. It was renewed under the editorship of B. Kravtsiv in Bayreuth, Germany, and published in 1947–8 as a supplement to the émigré newspaper **Chas*.

Na varti (On Guard). A Ukrainian Orthodox religious journal published monthly and then semimonthly in Vo-

lodymyr-Volynskyi in 1925–6 and briefly in 1929. Financed and edited by A. *Richynsky, *Na varti* promoted the Ukrainianization of the Russified Orthodox church in Volhynia.

*Na vichnu pam'iat'
Kotliarevs'komu*

Na vichnu pam'iat' Kotliarevs'komu (In Eternal Memory of Kotliarevsky). A 510-page literary miscellany issued by the *Vik publishing house in Kiev in 1904 to commemorate the unveiling of a monument to I. *Kotliarevsky in Poltava. Among its contributors were T. Borduliak, V. Domanytsky, M. Cherniavsky, I. Franko, H. Barvinok, P. Hrabovsky, B. Hrinchenko, H. Hryhorenko, I. Karpenko-Kary, N. Kobrynska, O. Konysky, M. Kotsiubynsky, A. Krymsky, Lesia Ukrainka, M. Levytsky, O. Makovei, L. Martovych, D. Mordovets, P. Myrny, V. Prokopovych, P. Radchenko, V. Samiilenko, V. Stefanyk, P. Stebnytsky, M. Vorony, and L. Yanovska. A bibliography of works by and about Kotliarevsky was prepared by M. Komarov. The miscellany was illustrated by V. Kornienko, L. Pozen, and O. Slastion, and the cover was designed by F. Krasysky.

Naboikin, Yurii [Nabojkin, Jurij], b 24 November 1923 in Bohodukhiv, Kharkiv gubernia. Physicist. A graduate of the Kharkiv Polytechnical Institute (1952), since 1960 he has worked at the AN URSS (now ANU) Physical-Technical Institute of Low Temperatures in Kharkiv, where he has contributed to the development of tuned lasers and conducted research in quantum electronics and molecular spectroscopy, particularly on the properties of highly excited molecular crystals at low temperatures.

Naboka, Serhii, b 26 April 1955 in Tula, RSFSR. Journalist and dissident. In 1981 he was sentenced to three years' imprisonment in a labor camp in Khmelnytskyi oblast for distributing political leaflets. In 1987 he organized and headed the Ukrainian Culturological Club, an unofficial

organization in Kiev. In 1990 he became director of the Respublika information agency in Kiev of the newly founded Ukrainian Republican party, and the editor of the party's organ, *Holos vidrozhennia*.

Nachtigall. See Legion of Ukrainian Nationalists.

Nad, Havryil [Nad', Havryil], b 17 April 1913 in Stari Vrbas, Bačka, Serbia, d 16 October 1983 in Kočura, Bačka. Cultural and civic figure in the *Bačka region. He graduated from Belgrade University in 1936 and worked as a teacher in Subotica. After the Second World War he was a member of the Yugoslav Constituent Assembly and became the first director of the Ruthenian gymnasium in Ruski Krstur. From 1954 he lived in Kočura. He translated children's literature and wrote poetry, songs, and linguistic articles in the Bačka dialect of Ukrainian.

Naddniprians'ka pravda (Dnieper Truth). The chief daily organ of the CPU in Kherson oblast. It was published in Russian as *Soldat i rabochii* (1917–18), *Khersonskaia pravda* (1919), *Izvestiia* (1919–21), and *Khersonskii kommunar* (1922–5). It was first published in Ukrainian as *Khersons'kyi komunar* in May 1925, and later that year it became two separate newspapers – the Ukrainian-language semi-weekly *Chervonyi selianyn* and the Russian-language daily *Rabochii* – which were merged in March 1928 as *Naddniprians'ka pravda*. The paper was not published during the German occupation of 1941–4. In 1944 it became the principal oblast organ. It initially was published five days a week but from 1970 was published six days a week. In 1980 the paper had a daily circulation of 141,000.

Mykola Nademsky

Nademsky, Mykola [Nadems'kyj], b 27 September 1892 in Kiev, d 27 December 1937. Stage and film actor. After completing study at the Kiev Art School he worked in the Franko New Drama Theater in Kharkiv (1923–5) and was an actor in the Odessa Ukrainian Drama Theater (1925–6) and the Odessa Artistic Film Studio (1926–35). He is best known for his roles in O. Dovzhenko's films *Zvenyhora* (1928), *Arsenal* (1929), and *Ivan* (1932). He was arrested in 1935 and died in a concentration camp or was executed by the NKVD.

Nadenenko, Fedir, b 26 February 1902 in L'gov, Kursk gubernia, Russia, d 2 December 1963 in Kiev. Composer, pianist, and editor. A graduate of the Lysenko Music and Drama School (1914), Kiev Conservatory (1921), and University of Kiev (1924), he studied composition and piano

with B. Yavorsky. He was the concertmaster and choir-master of the Kiev Opera (1926–35) and the Leningrad Opera (1935–7) before becoming the artistic director of the Kiev Philharmonic (1938–40). He later headed the music department of the Mystetstvo publishing house and edited the complete works of M. Lysenko. His compositions include *My Homeland* (1950) for choir; nearly 80 piano pieces; folk song arrangements; and songs to words of T. Shevchenko, Lesia Ukrainka, and I. Franko.

Nadiin, Dmytro [Nadijin], b 1907 in Volodymyrivka, Kherson county, d January 1942. Poet. He graduated from the Mykolaiv Pedagogical Institute. From 1933 he was secretary of the Odessa journal *Literaturnyi Zhovten'* and taught at the Odessa Pedagogical Institute. He began publishing in 1927 and wrote three small collections of poetry (1929, 1931, 1933). Posthumous editions of his works appeared in 1958, 1960, 1966, and 1972.

Nadlymanske settlement. A Scythian fortified settlement of the 4th to 3rd century BC, on the Dniester estuary near Nadlymanske, Ovidiopil raion, Odessa oblast. Excavated intermittently from 1957 to 1966, the site revealed clay dwellings with stone foundations, grain storage pits, milling facilities, and artisans' wares. The inhabitants engaged primarily in agriculture and craftsmanship, and they also traded with Greek settlements in the region.

Nadruga, Oleksander, b 15 October 1885 in Berezhany, Galicia, d 3 April 1962 in Sambir, Galicia. Jurist; member of the Shevchenko Scientific Society. After graduating in law and political science from Lviv University (1911) he worked in the Austrian civil service in Stanyslaviv. During the period of Ukrainian independence he was a commissary of Stanyslaviv county. After the war he went into private practice in Lviv and taught Roman and civil law at the Lviv (Underground) Ukrainian University (1921–4), the Greek Catholic Theological Academy (1932–9), and Lviv University (1940–1). In 1944 he and his family were arrested and deported to Siberia by the Soviets. They returned to Galicia only in 1960.

Nadvirna. v-5. A city (1990 pop 20,500) on the Bystrytsia Nadvirnianska River and a raion center in Ivano-Frankivske oblast. It was first mentioned in historical documents in 1595. After the first partition of Poland in 1772 it was annexed by Austria. In 1939 it was occupied by the Soviets and granted city status. The Nadvirna region is rich in natural resources, such as oil, natural gas, potassium salts, and forests. Petroleum refining is a major source of the city's income.

Nadvirna Petroleum Refinery (Nadvirnianskyi naftopererobnyi zavod). A refinery located in Nadvirna, Ivano-Frankivske oblast. It was founded in 1897 as a seasonal operation. After the Second World War it was extensively modernized and automated. Now it produces some 20 petroleum products, including petroleum-coke, paraffin, and gasoline.

Nadvirni kozaky. See Manorial Cossacks.

Nagurski, Bronko [Nagurs'kyj, Bronislav], b 3 November 1908 in Rainy River, Ontario, d 7 January 1990 in International Falls, Minnesota. Professional American football

player of Ukrainian origin. Having moved to the United States with his parents in 1912, he began his career as a tackle and fullback with the University of Minnesota football team (1927–9). He was the only player to be selected to two positions on a single all-American team (1929). A versatile player, he distinguished himself as a fullback with the Chicago Bears (1930–8, 1943–4) and was renowned for his sheer physical strength. In 1932 he began to wrestle professionally, and he won the world heavy-weight title in 1937 and again in 1939. In 1951 he was inducted into the National Football Hall of Fame.

Nahaichynskiy kurhan. A *Sarmatian burial mound from the 1st century BC located near Nyzhnohirskiy, Crimea. Excavation in 1974 uncovered a Sarmatian noblewoman buried in a wooden sarcophagus. She wore a gold-link crown, bracelets adorned with human figures on her hands and legs, and a brooch on her chest. Other artifacts found in the grave included alabaster earthenware, a bronze mirror, 570 adornments made of gold and precious stones, and a case containing perfume, jewelry, silver spoons, and a rock-crystal dolphin figurine with gold inlay.

Nahaievsky, Isydor [Nahajevs'kyj] (Nahayewsky, Isidore), b 21 June 1908 in Polivtsi, Chortkiv county, Galicia, d 7 May 1989 in Parma, Ohio. Ukrainian Catholic priest and historian. In 1939 he was a political prisoner in the Polish concentration camp in Bereza Kartuzka. During the Second World War he was imprisoned by the NKVD and the Gestapo. From 1943 to 1945 he served as a chaplain with the Division Galizien, and from 1945–7, in a POW camp; subsequently he emigrated to the United States. Nahaievsky received his PH D from the Ukrainian Free University in 1953 and was a professor at the Ukrainian Catholic University in Rome. He wrote books in Ukrainian on the mission and impact of SS Cyril and Methodius in Rus'-Ukraine (1954), Rome and Byzantium (1956), Prince Iziaslav Yaroslavych and the papal see (1957), ancient Ukraine as reflected in historical monuments (1961), the history of the Roman Catholic pontiffs (3 vols, 1964, 1967, 1979), and the origin and significance of patriarchates (1973). He also wrote *History of Ukraine* (1962), *History of the Modern Ukrainian State, 1917–1923* (1966), and memoirs of Bereza Kartuzka (1957), the interwar years (1960), and the Division Galizien (1985).

Nahiriany settlement. An early Scythian settlement of the late 7th to early 6th century BC near Nahiriany, Kelmentsi raion, Chernivtsi oblast. Excavated by I. *Shovkoplias in 1950, the site yielded three triangular semi-pit dwellings with both open fireplaces and stone ovens. Also recovered were flint and bone tools, pottery, and bones of domestic animals.

Nahirna, Kateryna (née Kuryshko), b 12 April 1949 in Vepryk, Hadiache raion, Poltava oblast. Canoeist. She was a member of the USSR women's teams that won the 1971 world and European championships in the kayak fours and the 1972 Olympic gold medal in the 500-m kayak pairs. She was also a USSR champion in 1970–2 and 1975.

Nahirny, Vasyl [Nahirnyj, Vasyl'], b 11 January 1847 in Hirne, Stryi circle, Galicia, d 25 February 1921 in Lviv. Ar-

Vasyl Nahirny

chitect and populist civic figure. He studied architecture at the Zürich Institute of Technology (1871–5) and then worked in Zürich, where he became involved with Western European co-operative movements (which he described in articles sent to *Pravda* and *Dilo* in Lviv) and Russian and Ukrainian émigré circles. From 1882 he lived in Lviv. Nahirny designed and built (from 1906 with his son, Yevhen) many Galician churches and buildings. In 1883 he presented a program for the socioeconomic revival of Galicia's Ukrainians at the Second Public Assembly (*viche*) and initiated, with A. Nychai, the creation of the *Narodna Torhovlia wholesalers' co-operative. He served as its director for many years, and was also the founder and chief organizer of the Zoria artisans' association, the Dnister insurance company, the Sokil society (president, 1894–1900), the Trud women's manufacturing association, the Society for the Advancement of Ruthenian Art (chairman, 1898–1904), and the Narodna Hostynnytsia hotel. He was a member of the chief executive of the Prosvita society; editor and publisher of the humorous journal *Nove zerkalo* (1883–4), the weekly *Bat'kivshchyna* (1885–90), and the semimonthly *Hospodar i promyshlennyk* (1886–7); and a contributor on social and economic problems to *Dilo*. His memoirs were published posthumously, in 1935.

Nahirny, Volodymyr (Vladimir) [Nahirnyj], b 9 August 1927 in Halych, Galicia. Sociologist. A graduate of Marquette (1952) and Harvard (1954) universities and the University of Chicago (PH D, 1960), he became a professor of sociology at Hunter College in 1962. A specialist on the sociology of intellectuals and of ethnicity in the United States, he has written scholarly articles, *Language Loyalty in the United States* (coauthor, 1966), and *The Russian Intelligentsia: From Torment to Silence* (1983).

Nahirny, Yevhen [Nahirnyj, Jevhen], b 25 August 1885 in Rudno, Lviv county, Galicia, d 8 June 1951 in Lviv. Architect. After graduating from the Lviv Polytechnic (1912) he worked as an architect with his father, V. *Nahirny. After 1921, working independently, he designed over 300 residential, public, and church buildings in Western Ukraine. From 1946 he taught in higher educational institutions in Lviv. His church in Stebnyk (Drohobych county, 1935) is representative of his style, which is based on Ukrainian baroque and folk traditions. The influence of constructivism is evident in his later work.

Church in Stebnyk (architect: Yevhen Nahirny)

Nahnybida, Mykola, b 20 September 1911 in Popivka, now Smyrnove, Kuibysheve raion, Zaporizhia oblast, d 16 September 1985 in Kiev. Poet. He began his writing career in the early 1930s as a member of *Prolitfront. His first poetry collections, *Dniprovs'ka vesna* (Spring on the Dnieper, 1932), *Zerna* (Seed, 1933), and *Poezii* (Poems, 1934), were written mainly on the theme of the Komsomol. During the Second World War he worked at the radio station Radianska Ukraina and wrote for the front-line press. He has written the following collections on the theme of war: *Zdrastui, Kharkiv* (Hello, Kharkiv, 1943), *Lialia Ubyvivok* (1946), and *Nezabutnie* (The Unforgettable, 1946). A number of his books of postwar lyric poetry have been partially republished in the collected editions *Vybrani poezii* (Selected Poems, 2 vols, 1961) and *Vybrane* (A Selection, 2 vols, 1971).

Naholnyi Ridge. A section of the main plateau of the *Donets Ridge. Situated in the southeastern part of the ridge, it runs from the Miius River in the west to the Kundriucha River in the east at an average elevation of 290–320 m. Its highest point is Mechetna Mohyla (367 m).

Nahorny, Oleksander [Nahornyj], b 10 September 1887 in Kharkiv, d 11 May 1953 in Kharkiv. Physiologist; corresponding member of the AN URSR (now ANU) from 1948. He graduated from Kharkiv University (1912) and worked there (as a professor from 1924), researching insect respiration, the hysteresis of hydrophilic colloids, and the physiology of aging (esp the role of the nervous system).

Naidych, Yurii [Najdyč, Jurij], b 6 August 1929 in Kharkiv. Materials scientist; full member of the AN URSR (now ANU) since 1988. He graduated from the Kiev Polytechnical Institute (1953) and has worked at the ANU Institute for Problems of Materials Science (since 1954). He has made important contributions in the areas of metal alloys, solid state physics, welding technology, the metallization of materials, and composites.

Naive art. See Primitive art.

Nakhabin, Volodymyr [Naxabin], b 21 April 1910 in Sharivka, Bohodukhiv county, Kharkiv gubernia, d 20 October 1967 in Kharkiv. Composer, pedagogue, and conductor. A graduate of the Kharkiv Music and Drama Institute (1932), he studied composition with S. Bohatyrrov. From 1945 he was the conductor and artistic director of the Kharkiv Theater of Opera and Ballet, and from 1952 a lecturer at the Kharkiv Conservatory, where he also served as rector (1963–7) when it became the Kharkiv Institute of the Arts. He was a member of the committee of composers responsible for writing a national anthem for the Ukrainian SSR (1949). His works include the ballets *Mariika* (1939), *Danko* (1948), and *Tavriia* (1960); musical comedies; three symphonies (1932, 1945, and 1959); symphonic poems; a piano concerto; and numerous film scores.

Nakhman of Bratslav, b 1772 in Medzhybizh, d 1810 in Uman. Founder of the Breslover (Bratslavite) dynasty of Jewish Hasids. A great-grandson of the founder of *Hasidism, Nakhman of Bratslav developed a deeply mystical form of Hasidism which has thousands of followers to this day, mainly in Jerusalem. He was known for his disturbing allegorical tales, which he would improvise and recite to crowds of admirers. These stories, told exclusively in the Yiddish vernacular (rather than Hebrew, the language of the educated elite), freely borrowed motifs from Ukrainian folktales. With some interruptions enforced by the Soviet government, his grave at Uman has been the site of yearly pilgrimages for many Bratslavite Hasidim.

BIBLIOGRAPHY

Buber, M. *The Tales of Rabbi Nachman* (New York 1956)

Nakhodkin, Mykola [Naxodkin], b 25 January 1925 in Prokhorivka, Zolotonosha okruha, Poltava gubernia. Radio physicist; AN URSR (now ANU) corresponding member since 1973 and full member since 1990. A graduate of Kiev University (1950), he has taught there and was promoted to professor in 1972. He specializes in physical electronics and thermoplastic information storage; his major contributions are in the study of semiconductor surfaces by means of ionization spectroscopy.

Nakhymovsky, Fedir [Naxymovs'kyj], b ?, d 1758. Cossack diplomat of Jewish origin. He undertook numerous diplomatic missions for Hetmans I. Mazepa and P. *Orlyk, including representations to Stanislaus I Leszczyński (1708–9) and to the Zaporozhian Cossacks, the Crimean Tatars, and the Ottoman Porte (1720–1). Orlyk's son described Nakhymovsky as a valued and trustworthy assistant, particularly in Mazepa's negotiations with the Swedish king Charles XII. He followed Orlyk into exile in Bendery (under Turkish rule, 1709–14) and Sweden (1714–20) and then lived in Poland (from 1720) and the Crimea (from 1754), where he associated with F. Myrovych.

Nakonechna, Hanna [Nakonečna] (Nakonetschna), b 5 May 1896 in Pluhiv, Zolochiv county, Galicia, d ? Linguist. In the interwar period she was an associate of the Research Institute of Phonetics and the Ukrainian Scientific

Institute in Berlin. After the Second World War she taught Ukrainian at Munich University. She compiled a German-Ukrainian pocket dictionary (1939, 5th edn 1944), cowrote (with J. Rudnycky, 1940) *Ukrainische Mundarten: Südkarpatoukrainisch (Lemkisch, Bojkisch und Huzulisch)*, and wrote a short German grammar in Ukrainian (1941) and a few articles in German on the linguistic geography of Ukrainian dialects.

Nakonechny, Mykola [Nakonečnyj], b 6 September 1900 in Novyi Tahamlyk, Poltava gubernia, d 11 November 1981 in Kharkiv. Linguist and Slavist. After graduating from the Poltava Institute of People's Education (1923) he was a graduate student (1925–8) and a research associate (1928–32) at the Kharkiv Pedagogical Institute of Professional Education. Accused of nationalism, he was dismissed from his teaching position at Kharkiv University in 1934 (to 1939) and 1948 (to 1958). In 1943 he was head of the Ukrainian language department. Because of political persecution his scholarly output was limited to the practical Russian-Ukrainian dictionary (1926) which he coauthored with M. Yohansen, K. Nimchynov, and B. Tkachenko; the Russian-Ukrainian phraseological dictionary (published in *Prapor*, 1963–7) which he edited; a teacher's handbook on the Ukrainian language (1928); a university program in Ukrainian dialectology (1941, 1949); and a chapter on Ukrainian phonetics in *Kurs suchasnoi ukrains'koi literaturnoi movy* (A Course in Contemporary Literary Ukrainian, 1951).

Vasyl Nakonechny

Nakonechny, Vasyl (Basil) [Nakonečnyj, Vasyl'], b 22 August 1918 in Luka Voinylivska, Kalush county, Galicia. Naval architect and mechanical engineer; member of the American Society of Naval Engineers, the Royal Institute of Naval Architects, the Shevchenko Scientific Society, and the Ukrainian Engineers' Society of America. He studied in Lviv, Graz, Vienna, and Leuven and at the Catholic University of America (PhD, 1963). He worked in Belgium and Canada as a naval architect, and in the United States as director of research and technology applications at the David Taylor Research Center in Bethesda, Maryland. His research, published in numerous technical papers, centers on surface ship powering and maneuvering models, propellers, cavitation phenomena, and ship-systems studies.

Sofiia Nalepinska: illustration to Stepan Vasylychenko's novelette *Olyv'iany persten'* (wood engraving, 1930)

Nalepinska, Sofiia [Nalepins'ka] (Nalepińska, Zofia) b 30 July 1884 in Łódź, Poland, d 11 December 1937. Graphic artist and xylographer of Polish origin; wife of M. *Boichuk (from 1917) and sister of the Polish poet T. Nalepiński. She studied at the St Petersburg Academy of Arts, in Munich (1906–7), and in Paris (1909–11), where she first met Boichuk. She taught at the Myrhorod Art and Ceramics Tekhnikum (1918–21) and the Kiev Art and Industrial Tekhnikum (1921–2) and then headed the xylographic workshop at the Kiev Institute of Plastic Arts (1922–4), taught at the Kiev State Art Institute (1924–35), and belonged to the *Association of Revolutionary Art of Ukraine (1925–31). Nalepinska created many xylographs, which were used as book illustrations, covers, and posters. Her approach was influenced by Ukrainian folk art, icons, 17th- and 18th-century engraving, H. Narbut, and formalist theory, and in turn, she influenced I. *Padalka and O. *Sakhnovska. In 1928–32 her works were exhibited in over 35 group shows of Soviet art. She and Boichuk were arrested by the Soviet secret police in November 1936 and later executed. She was posthumously rehabilitated in 1958.

Nalotova, Kateryna [Nal'otova], b 1787, d 1869. Actress. In 1813 she began acting in an amateur group in Poltava with I. Kotliarevsky (from 1917 the Poltava Free Theater). In 1819 she played the title role in the premiere of his *Natalka Poltavka* (Natalka from Poltava). In 1821–2 Nalotova worked in M. Shchepkin's troupe in Kiev.

Yulian Nalysnyk

Vasyl Nalyvaiko

Nalysnyk, Yulian, b 1 July 1890 in Krasna, Krosno county, Galicia, d 22 April 1960 in New York. Lawyer and civic leader. Interrupting his law studies in 1914, he joined the Ukrainian Sich Riflemen, and in 1916 he was deported by the Russians as a POW to Siberia. In 1917 he escaped to Kiev, where he served in the Ministry of Foreign Affairs. On O. Shulhyn's invitation he joined the UNR mission to Bulgaria. After returning to Galicia in 1921, he completed his law studies in Cracow and in 1931 opened a law office in Dukla. He became a prominent activist in the Lemko region, where he organized the Ukrainian People's Home and Silskyi Hospodar in Krasna and was persecuted by both the Poles and the Germans. He fled to Austria in 1944 and then emigrated to the United States, where he revived the *Organization for the Defense of Lemkivshchyna and from 1958 served as its first president.

Nalyvaiko, Demian [Nalyvajko, Dem'jan], b in the 1550s in Husiatyn, Galicia, d 1627 in Ostrih, Volhynia. Orthodox priest and cultural figure. He studied at the Ostrih Academy and in Vilnius and was taught printing by I. *Fedorovych. He served as the private priest and confessor of Prince K. *Ostrozky from 1589 and taught at the *Ostrih Academy. In 1594–6 he took part in the rebellion led by his brother, S. *Nalyvaiko, and in 1596 he participated in the Orthodox synod that proclaimed the Church Union of Berestia to be illegal. Later he directed Ostrozky's presses at the Derman Monastery (1602–5) and in Ostrih (1607, 1612), wrote verses and prefaces in the Derman Octoechos (1604) and Ostrih Horologion (1612), and contributed the introduction, an emblematic verse dedicated to Ostrozky, and translations of St John Chrysostom's homilies to an Ostrih collection (1607).

Nalyvaiko, Severyn [Nalyvajko], b ca 1560 in Husiatyn, Galicia, d 21 April 1597 in Warsaw. Cossack leader; brother of D. *Nalyvaiko. He participated in Zaporozhian Cossack campaigns against Turkey and the Crimean Tatars and then served as a captain in Prince K. Ostrozky's private army. In 1594 he became otaman of an independent Cossack force in the Bratslav region and led it on a campaign into Moldavia, where it defeated the Crimean Tatars advancing against Hungary. In the spring of 1595, together with H. *Loboda and M. *Shaula, he successfully engaged the Turks in Moldavia and Transylvania, thereby halting their advance on Austria.

After Nalyvaiko returned to Ukraine, he led a popular rebellion against the Poles that spread from the Bratslav region throughout Right-Bank Ukraine and into Belarus. With the help of local burghers the rebels captured Bratslav, Husiatyn, Bar, Lutske, Kaniv, Cherkasy, and Slutsk, Babruisk, and Mahiliou in Belarus. In late 1595 the Polish government sent Hetman S. Żółkiewski and the royal army to suppress the rebellion. Having retreated from Belarus, in April 1596 Nalyvaiko's force united with Shaula's Zaporozhians and successfully engaged the Poles at Bila Tserkva before retreating to Pereiaslav. There Nalyvaiko was elected hetman in place of the wounded Shaula. On 26 May 1596 the rebels were surrounded by a superior Polish force near Lubni. After a two-week Polish siege a mutiny arose among the rebels. Loboda was lynched, and on 7 July 1596 Nalyvaiko and Shaula were handed over to the Poles. During peace negotiations Żółkiewski's army caught the rebels off guard and slaughtered several thousand Cossacks. Nalyvaiko was taken to Warsaw, where he was cruelly tortured before being beheaded, quartered, and put on public display. After the rebellion all Cossack lands and enterprises were legally confiscated and redistributed among Polish magnates. Nalyvaiko was portrayed as a hero in folk stories, songs, and legends. T. Shevchenko and K. Ryleev glorified him, and the Soviet writer I. Le wrote a novel about him.

Nalyvaiko, Vasyl [Nalyvajko, Vasyl'], b 14 January 1887 in Severynivka, Bratslav county, Podilia gubernia, d 24 August 1938 in Prague. Physician. He obtained his medical education at Tomsk and Odessa universities and served as a doctor in the UNR Army (1918–20). An émigré in Poland and then Czechoslovakia, he was active in the Ukrainian Physicians' Association in Czechoslovakia. Besides scientific articles on surgery he published *Po sviatii zemli* (Through the Holy Land, 1937) and helped compile and edit M. Halyn's *Medychnyi latyns'ko-ukraïns'kyi slovnyk* (Medical Latin-Ukrainian Dictionary, 1926).

Namoradze, Georgii, b 14 October 1882, d 12 February 1965. Georgian poet and translator. From 1907 to 1936 he lived in Ukraine. In the 1920s he became head of the periodicals division of the State Publishing House of Ukraine. He was repressed in the mid-1930s and later rehabilitated. He translated Georgian literature into Ukrainian and Ukrainian into Georgian, and contributed to Georgian periodicals articles about Ukrainian writers, such as T. Shevchenko, M. Kotsiubynsky, Lesia Ukrainka, and M. Lysenko.

Nanovsky, Yaroslav [Nanovs'kyi, Jaroslav], b 1 September 1908 in Pecheniia, Peremyshliany county, Galicia, d 5 October 1992 in Lviv. Art historian and critic. A graduate of Lviv University (1939), he worked as a curator at the Lviv Museum of Ukrainian Art from 1942 and taught at the Lviv Art School (1945–52) and Lviv Institute of Applied

and Decorative Arts (1947–52). He wrote many articles on Western Ukrainian art and books about K. Ustyianovych (1963), I. Trush (1967), and Yu. Pankevych (1986) and compiled albums of the paintings of A. Manastyrsky (1959) and the Lviv Museum of Ukrainian Art (1963).

Nansen, Fridtjof, b 10 October 1861 in Store-Froen, Norway, d 13 May 1930 in Lysaker, Norway. Explorer, oceanographer, statesman, and philanthropist; honorary member of the Russian (later USSR) Academy of Sciences from 1898. Nansen served as head of the Norwegian delegation to the League of Nations General Assembly (1920). In the league's assembly and its Political Commission he spoke out on behalf of national minorities. As the league's high commissioner (1920–2) he oversaw the repatriation of 500,000 prisoners of war from the USSR. In 1921–3 he served as high commissioner of the International Committee of the Red Cross which provided relief to famine-stricken Ukraine and Russia. In 1922 he initiated the international agreement that created a 'Nansen Office' to care for political refugees from the USSR, including thousands of Ukrainians, who were issued 'Nansen certificates' recognized by over 50 governments in lieu of passports. The Geneva-based Nansen International Office for Refugees aided refugees and issued certificates until 1951.

Naperedodni (On the Eve). A literary and art biweekly published in Lviv from October 1937 to December 1938. Its editor was B. *Kravtsiv.

Napoleon Bonaparte, b 15 August 1769 in Ajaccio, Corsica, d 5 May 1821 in St Helena Island. French statesman.

Napoleon's government (like those of the 18th-century French kings) took an interest in Ukraine's economic potential, particularly vis-à-vis commerce in the Black Sea ports, and it commissioned several studies on that subject (eg, *Essai historique sur le commerce et la navigation de la mer Noire* by A. de Saint-Joseph, 1805). Ukraine became a factor in Napoleon's political designs after his vassal state, the Grand Duchy of *Warsaw (est 1807), laid claim to the Ukrainian lands that had been a part of Poland before the partition. He did not immediately agree to the Polish claims, but he did not deny them. Ukraine acquired more political significance for Napoleon when he began planning his invasion of Russia. Having received frequent reports from his diplomats and spies in Eastern Europe about antiserarist sentiments in Ukraine and the growth of peasant unrest and pro-French, pro-Napoleon sympathies there, Napoleon requested from his foreign ministry detailed information about Ukraine and scenarios for the dismemberment of the Russian Empire. In 1812 Counts A.-M. Blanc de la Naulte d'Hauterive and J.-G.-M. de Montgaillard submitted memorandums proposing the return of Right-Bank Ukraine (without Volhynia, which Napoleon had promised to Austria for military support in his war against Russia) to Poland, and the creation of two French puppet states in Left-Bank and Southern Ukraine that would isolate Russia from Europe and block its access to the Black Sea. One state would have consisted of the territories of Chernihiv and Poltava gubernias and adjacent lands as far north as Orel, and the other, to have been called Napoléonida, the territories of Katerynoslav gubernia, the Donets valley, and Tavriia gubernia (including the Crimea).

Because Napoleon's 1812 invasion of Russia was directed at the conquest of Moscow, western Volhynia was the only Ukrainian region occupied by his Grande Armée. There Napoleon's Austrian, Saxon, and Polish allies engaged the Russian Third Army commanded by A. Tormasov. During the Napoleonic invasion Ukraine supplied to the Russian military much of its grain, fodder, and horses, and 22 Ukrainian Cossack cavalry regiments and a huge Ukrainian *levy en masse (nearly 75,000 men) fought in the Russian ranks. The Ukrainian gentry, however, organized the levy reluctantly. At their assemblies in Chernihiv and Poltava they resolved to lower the number of recruits from 4 to 1 per 100 inhabitants, and they unwillingly donated money to Russia's military cause. Other Ukrainian notables (eg, Archbishop V. *Shyshatsky) even openly supported Napoleon's invasion and were later punished as a result. During the ill-fated winter retreat of Napoleon's army, attempts to penetrate from Belarus into the gubernias of Left-Bank Ukraine were effectively thwarted by Ukrainian forces. The Ukrainian gentry became alarmed at Napoleon's Polish plans and in the end remained loyal to Russia. Napoleon's interest in Ukraine (which prompted the commissioning of C.-L. *Lesur's 1813 history of the Cossacks) and plans for a second invasion of Russia were laid to rest after the rout of his army by Russia, Prussia, Austria, and Britain in 1813–15 and his forced abdication and exile.

Naranovych, Pavlo [Naranovyč], b 1801 in Chapliivka, Krolevets county, Chernihiv gubernia, d 14 January 1874 in Tsarskoe Selo, near St Petersburg. Physician; brother of Petro *Naranovych. A graduate of the St Petersburg Medico-Surgical Academy (1824), he was a professor of anatomy at the academy (from 1839), chairman of descriptive anatomy (1844), and director of the academy (1867–9). He edited *Voenno-meditsinskii zhurnal* (1839–40), served as vice-president of the Society of Russian Physicians in St Petersburg (1852–66), and helped found the Society for the Care of Sick and Wounded Soldiers (1867), which eventually became the Russian Red Cross Society. He translated medical books from German and wrote articles on anatomy, surgery, and military sanitation.

Naranovych, Petro [Naranovyč], b 1805 in Chapliivka, Krolevets county, Chernihiv gubernia, d 20 May 1858 in Kharkiv. Physician; brother of Pavlo *Naranovych. A graduate of the St Petersburg Medico-Surgical Academy (1826), he worked at the St Petersburg Military Hospital, where he attained the rank of surgeon and obstetrician (1834). He was a professor of anatomy (from 1837) and of surgery (from 1843) at Kharkiv University. His work dealt with locomotion in humans, and new surgical procedures. He invented a number of surgical instruments.

Narbut, Danylo, b 22 January 1916 in Petrograd. Scenery painter; son of H. *Narbut. He completed the All-Union Courses for Theater Artists at the All-Russian Academy of Arts in 1935. He has worked for various theaters in Ukraine, including the Chernivtsi Oblast Ukrainian Music and Drama Theater in the 1940s, the Ivano-Frankivske Ukrainian Music and Drama Theater in the 1950s, and the Cherkasy Music and Drama Theater since the 1960s.

Heorhii Narbut: frontispiece for the journal *Mystetstvo* (1919)

Heorhii Narbut: illustration for the letters *y* and *i* of the Ukrainian alphabet (1917)

Narbut, Heorhii (Yurii), b 9 March 1886 in Narbutivka, Hlukhiv county, Chernihiv gubernia, d 23 May 1920 in Kiev. Painter and graphic artist. From 1906 he lived in St Petersburg, where he learned to draw from I. Bilibin and M. Dobuzhinsky. After studying art in Munich for several months in 1909, he returned to St Petersburg and became part of the Mir Iskusstva circle and gained prominence through his book covers and book illustrations (eg, for I. Krylov's fables [1912] and several stories by H.C. Andersen) and his neoclassical and symbolist watercolors. Having developed a keen interest in heraldry and the silhouette he illustrated and designed Russian-language editions of V. Lukomsky and V. Modzalevsky's book on 'Little Russian' heraldry (1914), the coats of arms of the Cossack hetmans of 'Little Russia' (1915), H. Lukomsky's book on ancient Galician architecture (1915), and a book on the old estates of Kharkiv gubernia (1917). After the February Revolution of 1917 Narbut returned to Ukraine. In September 1917 he was appointed a professor at the *Ukrainian State Academy of Arts in Kiev, and in February 1918 he became its rector. There he laid the foundations for advanced art education and fostered a pleiad of graphic artists, including L. Lozovsky, P. Kovzhun, and R. Lisovsky. Through his covers and graphics for postrevolutionary books and journals (*Nashe mynule*, *Zori*, *Solntse truda*, *Narodnoe khoziaistvo Ukrainy*, *Mystetstvo*); his graphic designs for UNR *currency, postage stamps, seals, and charters; and his bookplates and series of drawings and initials illustrating the Ukrainian alphabet (1917, 1919) with Cossack, Ukrainian baroque, and folk motifs, he initiated, with M. Boichuk and V. Krychevsky, the rebirth of Ukrainian art. His finest work after 1917 was his gouache frontispiece for a 1919 edition of I. Kotliarevsky's *Eneida* (Aeneid). Narbut died prematurely from typhus.

S. Bilokin

Narcissus (*Narcissus*; Ukrainian: *nartsyz*). A bulbous, often fragrant ornamental plant of the family Amaryllidaceae. The leaves are linear, the flowers generally white or yellow. Single-flowered species, including the daffodil (*N. pseudonarcissus*) and the poet's narcissus (*N. poeticus*), are cultivated as decorative flowers. Of its approx 40 species, only the narrow-leaved narcissus (*N. angustiformis*) grows wild in Ukraine, in the mountains of Transcarpathia. It is now so rare that it has been put on the list of endangered species (in the so-called red book). Narcissus bulbs are poisonous and contain a number of alkaloids, used in *folk medicine as emetics and cathartics.

Narcotics. Criminal law in the USSR and the Ukrainian SSR provided for punishment of the makers and suppliers of illicit narcotics and other toxic substances by imprisonment for up to 10 years, with or without the confiscation of their property. Criminal responsibility was also specified for planting opium poppy, Indian hemp, and southern Manchurian or southern Chu hemp without appropriate permits. Penalties existed for violating laws concerning the storage, distribution, registration, transportation, and sending of narcotics, and for involving minors in the use of narcotics.

Drug abuse in Ukraine emerged as a serious problem in the 1970s and 1980s, especially after the return of Soviet troops from Afghanistan, where many of them used opium, hashish, and other drugs and developed addictions. The main area in the former USSR where narcotic plants have been grown is Central Asia. There opium has served as a traditional medicine. Recent press reports indicate that a kilogram of opium costs 8,000 rubles on the black market in Turkmenia and tens of thousands in the large cities of Russia and Ukraine. The number of drug addicts in what was the USSR has risen in recent years. According to official data there were 52,000 registered drug addicts in 1988, but the real figure is much higher. In 1986 the first large-scale public information campaign against drug abuse was launched. In 1987 the Soviet government began limiting and controlling the areas where hemp and opium poppies were cultivated, and tried to find a means of destroying wild hemp. In the large cities special centers for the study of drug addiction registered addicts, and police-run rehabilitation centers treated addicts who were there either voluntarily or by court order. Studies indicate that most drug addicts are urban males under the age of 35. The majority have completed their secondary education, hold jobs, and are married and have children; half, however, admit to being from families where alcoholism, drug abuse, mental illness, or crime was present. Most abusers begin using drugs in their late teens or early twenties.

Narcotics and substance abuse is more widespread in Ukraine than in other former republics of the USSR, except Kirgizia and Turkmenistan in Central Asia. In 1988, 37.4 of every 100,000 persons in Ukraine were treated for narcotic or substance abuse, compared to 24.3 in the USSR as a

Persons receiving medical treatment for narcotic and substance abuse, 1984–8 (per 100,000 inhabitants)

	1984	1986	1987	1988
Ukraine	14.9	24.9	32.4	37.4
USSR	13.7	17.1	21.5	24.3
Russia	11.2	13.4	17.9	20.6
Belarus	1.4	3.2	4.8	5.9
Lithuania	5.9	7.2	10.1	11.2

whole and 20.6 in Russia. Moreover, there has been a significant increase in the number of people treated (see the table). In Ukraine the number of persons treated grew from 8.5 to 43.5 per 100,000 inhabitants between 1980 and 1990.

The abuse of various other substances has been common in the Soviet republics and their successor states. Novocaine, codeine, morphine, and other pain relievers are frequently stolen from medical pharmacies and hospitals and sold on the black market. The press has also reported the existence of a number of synthetic drugs prepared in secret chemical laboratories and other methods of inducing euphoria, such as glue sniffing.

Unlike in the West, drug addiction in the former Soviet republics has not yet become a mass phenomenon, and the social functions of escaping reality and finding relaxation are fulfilled primarily by alcohol in the youth subculture. Nonetheless, drug abuse has become a growing problem, especially since international contacts have increased, and greater freedom of movement has become possible.

A. Babyonyshev, D. Goshko, B. Krawchenko

Narezhny, Vasiliï [Narežnyj, Vasilij] (Narizhny, Vasył), b 1780 in Ustyvytsia, New Russia gubernia, d 3 July 1825 in St Petersburg. Russian writer of Ukrainian descent, and a representative of the Ukrainian school in Russian literature at the beginning of the 19th century. He first published his work in 1804 (the tragedy *Dimitrii Samozvanets* [Dimitrii the Impostor]). His most noteworthy work on a Russian theme was *Rossiiskii Zhil' Blaz* (The Russian Gil Blas, 1814). But Narezhny wrote mainly on Ukrainian themes: *Aristion* (1824), *Zaporozhets* (The Zaporozhian, 1824), *Bursak* (The Seminarist, 1824; Ukrainian translation by V. Doroshenko published in 1928), *Dva Ivana* (Two Ivans, 1825; Ukrainian translation by H. Bili, 1931), and *Garkusha* (1825; Ukrainian translation by P. Nimchenko, 1931). Narezhny's works, characterized by an interest in social problems and rich in Ukrainian folklore, inspired the work of N. *Gogol.

Narid (The People). A weekly newspaper published in Warsaw in 1926–8 and edited by V. Ostrovsky. It supported the newly founded Ukrainian National Democratic Alliance (UNDO) and was especially popular in Volhynia and the Kholm region.

Narizhny, Oleksander [Narižnyj] (pen name: Maksym Slyvka), b 1884 in Sokilka, Kobeliaky county, Poltava gubernia, d 6 January 1965 in Zurich. Civic and co-operative leader and journalist; brother of S. *Narizhny. In 1917 he was elected vice-president of the All-Ukrainian Council of Military Deputies. In 1921 he emigrated to Czechoslovakia, where he studied at the Czech Technical School in

Prague and presided over its Ukrainian students' club (1922). Subsequently, in Transcarpathia, he organized co-operative dairies and then his own private dairies. In 1931 he edited *Svoboda* in Uzhhorod. His humorous sketches and political satires appeared in the Ukrainian émigré press.

Narizhny, Symon [Narižnyj], b 30 January 1898 in Sokilka, Kobeliaky county, Poltava gubernia, d 23 July 1983 in Sydney, Australia. Emigré historian and community figure. He studied at the Poltava Historical and Philological Faculty (1918–21). As an émigré in Prague he studied at the Ukrainian Free University (UVU, 1922–7; PH D, 1927) under D. Doroshenko and taught medieval and modern world history at the Ukrainian Higher Pedagogical Institute (1928–32) before becoming a docent and professor (1933–45) of Ukrainian and Eastern European history at the UVU. Narizhny also served as deputy director (1925–45) and director (1945–8) of the *Museum of Ukraine's Struggle for Independence and secretary of the *Ukrainian Historical-Philological Society (1929–44). A postwar refugee in Germany, in 1951 he emigrated to Australia, where he taught at the University of Adelaide.

Narizhny wrote articles about Hetman I. Vyhovskiy (1929), the Treaty of Hadiache in Ukrainian historiography (1930), Poltava University (1930), V. Antonovych (1934), V. Bidnov (1934), justice and punishment in the Zaporizhia (1939), the Hrabianka Chronicle (1939), the Ukrainian Historical-Philological Society (1939), the Odessa Society of History and Antiquities (1941), and the Kharkiv Historical-Philological Society (1944). Most of them appeared in Ukrainian scholarly serials and collections published in Prague and Lviv. He also wrote a booklet about M. Vasylenko and his scholarly work (1936) and a book on the medieval Muslim world (1931), but he is best known for his pioneering survey, *Ukrains'ka emigratsiia: Kul'turna pratsia ukrains'koï emigratsii mizh dooma svitovymy viinamy* (Ukrainian Emigration: The Cultural Work of the Interwar Ukrainian Emigration, 1942). Later he wrote three booklets about the Museum of Ukraine's Struggle for Independence (1957–9) and an article about the Historical Society of Nestor the Chronicler (1975–6).

M. Antonovych

Narod (The People). A semimonthly socialist magazine published in Lviv (January 1890 to October 1892), Kolomyia (to August 1894), and again in Lviv (to August 1895). It was edited by I. Franko and M. Pavlyk (the main contributors) and supported by a group of young Ukrainian socialists (eg, V. Okhrymovych, M. Hankevych, and Ye. Levytsky). From October 1890 to August 1893 *Narod* was the organ of the Ruthenian-Ukrainian (later *Ukrainian) Radical party. At first it devoted some space to literature (eg, Franko's poems and stories), culture, and the arts, but from 1892 it was primarily a political journal. *Narod* strongly criticized the Galician status quo and extensively covered the socialist movement in Europe, the women's question in Ukraine, and oppression in the Russian Empire. Its politics were greatly influenced by M. *Drahomanov; it first published his 'Chudats'ki dumky pro ukrains'ku natsional'nu spravu' (Eccentric Thoughts on the Ukrainian National Problem, 1892), 'Lysty na Naddniprians'ku Ukrainu' (Letters to Dnieper Ukraine, 1893), and many of his other articles, and devoted a special issue to him in 1894. Other contributors included

Lesia Ukrainka, P. Hrabovsky, V. Budzynovsky, A. Krymsky, S. Danylovych, V. Stefanyk, N. Kobrynska, L. Martovych, O. Kobylanska, and Yu. Bachynsky (the first chapters of his *Ukraïna Irredenta*). A systematic index to *Narod* (comp P. Babiak) was published in Lviv in 1970.

Narod (The People). An organ of the Ukrainian Radical party published in Stanyslaviv (now Ivano-Frankivske) in 1919. It was edited by M. Balytsky. Among the contributors were M. Yevshan and Mykyta Shapoval. The paper appeared weekly (nos 1–8) and then daily (nos 9–33, 24 April–25 May).

Narod (The People). A weekly organ of the Subcarpathian Social Democratic party published in 1920–1 in Uzhhorod and edited by S. Klochurak and Ye. Puza. It was succeeded by *Vpered*.

Narodna chasopys' (People's Periodical). A Ukrainian-language supplement to *Gazeta Lwowska*, the Polish-language organ of the Austro-Hungarian government in Galicia, published daily except Sundays and holidays from December 1890 until the outbreak of the First World War and in 1918. It contained extensive reports on government activities, excerpts from speeches in the Viennese parliament and Galician Diet, reprints from Austrian and other newspapers, and numerous articles on international affairs. Some articles on historical and cultural topics and some poetry and prose were also published. Among its editors were A. Krechowiecki (who also edited *Gazeta Lwowska*), V. Berezovsky, and K. Kakhnyevych.

Narodna hazeta (People's Newspaper). A pro-Communist newspaper and organ of the *Ukrainian Labour-Farmer Temple Association, published daily in Winnipeg from September 1937 to July 1940 as the successor to **Ukrains'ki robitnychi visti*. The paper published articles on the labor movement and laudatory reports on developments in the USSR as well as especially strident attacks on Ukrainian 'bourgeois nationalists' in Canada. Editors of the paper included many of the most prominent Ukrainian-Canadian communists, among them P. Krawchuk, M. Hrynshyn, I. Navizivsky, M. Shatulsky, and A. Bilecki. *Narodna hazeta* was closed down by the Canadian government for its pro-Soviet positions. From December 1940 to April 1941 Ukrainian nationalists in Canada (M. Mandryka, O. Hykavy, V. Bosy, and others) published *Narodna gazeta*, an anti-Soviet weekly sent to former subscribers to *Narodna hazeta* in a bid to win their sympathies.

Narodna Hostynnytsia (People's Hotel). A co-operative in Lviv, established in 1899 by V. Nahirny. It owned a hotel and restaurant, which were popular centers of Ukrainian social life in the city. The co-operative's property was nationalized by the Soviet authorities in 1939.

Narodna Lichnytsia. See *Narodna Lichnytsia*.

Narodna shkola (Public School). A semimonthly newspaper for teachers and others interested in education, published in Kolomyia in 1875 (a total of 21 issues). It was edited by I. Shyshkovsky and then I. Levytsky, with the assistance of F. Miskevych.

Narodna Torhovlia (People's Trade). The first large Ukrainian consumer co-operative in Western Ukraine. It was established in 1883 on the initiative of V. Nahirny and A. Nychai, who headed the organization for many years. With its headquarters in Lviv, it served as a wholesaler to private and community-owned stores in villages and small towns throughout Galicia, as a training network for their workers, and as a retailer in the larger cities. In 1907 it changed its charter to become a central association of Rochdale-type consumer co-operatives, which were created for the better-organized community stores. By 1914 the organization had 19 of its own stores-warehouses and 1,244 members (including 93 co-operative members). Its share capital was 215,000 Austrian crowns, its reserve funds 61,000 crowns, and its annual turnover over 2.5 million crowns. A total of 831 small stores were associated with the organization.

The First World War caused great disruption in the *co-operative movement in Galicia. Much of *Narodna Torhovlia's* physical plant was destroyed, postwar inflation and currency reform by the new Polish regime wiped out much of the organization's capital, and many of its contacts were broken. As a result the entire co-operative structure was reorganized. Responsibility for rural consumer co-operatives was transferred to **Tsentrosoiuz* in 1926, and *Narodna Torhovlia* retained responsibility for consumer co-operatives in the cities. It also assumed the task of maintaining relations with co-operatives in Western Europe and individual producers, for importing goods to be sold in Ukrainian co-operative stores (particularly coffee, tea, and fruits), for selling goods produced by Ukrainian co-operatives and manufacturers, and for training co-operative workers. By 1937 *Narodna Torhovlia* owned 31 stores and warehouses (including 3 in Volhynia). It had a membership of 6,443, including 5,837 individuals and 86 urban consumer co-operatives, and a share capital of 224,000 zlotys, almost half of which was owed by county co-operative associations and *Tsentrosoiuz*. The total turnover of almost 5 million zlotys was considerably under the 16-million turnover in the peak years of 1929 and 1930. The decline was due primarily to the Great Depression, which caused a large drop in prices. Moreover, in 1934 the Polish government introduced new restrictions on the activities of the *Audit Union of Ukrainian Co-operatives, of which *Narodna Torhovlia* was a member. Over 60 percent of the goods handled by *Narodna Torhovlia* were sold through the organization's own stores. In the interwar period the leading figures in the co-operative included M. **Zaiachkivsky*, M. Lazorko, Yu. **Pavlykovsky*, and O. Baryliak.

In 1939 the Soviet authorities nationalized all of *Narodna Torhovlia's* assets and merged the organization with the state bodies responsible for retail and wholesale trade. During the German occupation of Galicia the organization was partially revived to handle the distribution of rationed consumer goods in the cities. When the Red Army returned in 1944, *Narodna Torhovlia* was finally dissolved.

I. Vytanovych

Narodna tvorchist' ta etnografiia (Folk Creativity and Ethnography). A scholarly journal of the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography and of the Ministry of Culture of Ukraine. It dates back to 1925, when it came out as **Etnografichnyi visnyk* (to 1932). Later it appeared under the names *Ukrains'kyi fol'k-*

Narodna tvorchist' ta etnografiiia

lor (1937–9), *Narodna tvorchist'* (1939–41), and *Naukovi zapysky* (1947–54). In 1957 it got its present name and appeared quarterly. In 1964 it became a bimonthly. Its main sections are the history of science, culture, everyday life, the criticism of 'bourgeois' and 'bourgeois-nationalist' ideological concepts, folklorists in the 'brotherly' republics, a young researchers' forum, surveys, reviews and annotations, and a chronicle of current events. Its main focus, until 1991, was political events, anniversaries, and the current 'Soviet way of life.' There are relatively few academic papers devoted to traditional ethnography and folklore. Its editors have been M. Rylsky (1957–66), O. Dei (1966–74), S. Zubkov (1974–88), and H. Kostiuk.

Narodna volia

Narodna volia (Popular Will). An organ of the *Ukrainian Fraternal Association (UFA), published since June 1911. Preceded by the newspaper *Shershen'* (est 1909), it appeared weekly until 1914 and then two or three times a week before again becoming a weekly in 1950. Until 1913, when the paper moved to Scranton, it was published in Olyphant, Pennsylvania. Initially *Narodna volia* had a strong socialist orientation and generally supported the positions of the *Ukrainian Radical party in Western Ukraine. Since the Second World War, however, the paper has moved, along with the UFA, toward the mainstream of Ukrainian national political life. It contains articles on political affairs, on cultural and historical topics, and on Ukrainian life in the United States and elsewhere, as well

as reports on the activities of the UFA. The first editor of *Narodna volia* was Ye. Hvozdyk. He was succeeded by O. Kosovy, I. Ardan, M. Stechyshyn, D. Borysko, M. Repen, Ya. Chyzh (1924–42, at times as head of an editorial board), M. Tsehlynsky, V. Lototsky, D. Korbutiak, I. Hundiak, M. Stakhiv (1949–71), V. Verhun, I. Smolii, R. Ry-chok, V. Polishchuk, and finally M. Dupliak (1987–). Since 1947 the paper has included an English-language section, *The Fraternal Voice*, which was edited for many years by J. Pronko. It also publishes an annual almanac.

Narodnaia shkola (Public School). A monthly journal for teachers, published by the Russophile *Teachers' Society of Subcarpathian Ruthenia in Mukachiv in 1921–38. It published articles on education and teaching methodology and pressed for the use of the Russian language and the teaching of Russian culture in Transcarpathian schools. The editors included D. Antalovsky and M. Vasylenkov. The journal was published irregularly during the Hungarian occupation of Transcarpathia in 1939–44, under the editorship of P. Fedor.

Narodnaia Volia (People's Will). A conspiratorial Russian revolutionary populist organization that was formed in the summer of 1879 following a split in the organization *Zemlia i Volia. Advocates of political struggle through the use of terror formed *Narodnaia Volia*, and those opposed to it formed Chernyi Peredel (Black Repartition). *Narodnaia Volia* never grew to be a large organization; it probably had no more than several dozen members at any given time. As its immediate aim the organization sought the destruction of autocracy, and the assassination of high-ranking government officials was chosen as a means of achieving that goal. The killing of the tsar soon became an *idée fixe* of the group, and on 1 March 1881, after numerous attempts, they succeeded.

Much of *Narodnaia Volia's* activities took place in Ukraine. Groups existed at one time or another in Kiev, Kharkiv, Odessa, Mykolaiv, Nizhen, Romny, Yelyzavethrad, and Kamianets-Podilskyi. Despite the heavy concentration of activities in Ukraine *Narodnaia Volia* was a Russian organization and did not consider the rights of non-Russian nations important (although some of its manifestos and declarations were written in Ukrainian). A number of Ukrainians belonged to *Narodnaia Volia*, among them A. *Zheliabov, O. *Bakh, and M. *Kybalchych, who made the bomb that killed Alexander II.

Representatives of the Ukrainian national populist movement did not generally support *Narodnaia Volia*, although in the early 1880s V. Malovany, M. Kotsiubynsky, and I. Karpenko-Kary (I. Tobilevych) maintained ties with or helped *Narodnaia Volia* groups. M. *Drahomanov wrote several articles and a major work, *Istorieskaia Pol'sha i velikoruskaia demokratiia* (Historical Poland and Great Russian Democracy, 1881–2), in which he strongly criticized the Russian revolutionaries' use of terror. He also disapproved of their centralist tendencies, accused them of Jacobinism, and condemned them for disregarding the national rights of non-Russian nations.

B. Klid

Narodne slovo (People's Word). An illustrated newspaper published three times a week in Lviv from December 1907 to late 1911 (a total of almost 600 issues). A popular publication intended for a broad readership, it published articles on political developments in Galicia and Russian-ruled Ukraine, international affairs, and historical and cultural topics. The chief editors were A. Shostak (1907–8), A. Veretelyk (1908, 1909), Ye. Turbatsky (1908), A. Kryshchalovych (1909), and M. Kurtseba (1909–11).

Narodne slovo. See *Ukrains'ke narodne slovo*.

Narodne zdorov'ia (Public Health). A popular illustrated monthly published by the *Ukrainian Hygienic Society and the Vidrozhennia society in Lviv from 1937 to 1939 as *Narodne zdorovlia*. It was founded and edited by R. *Osinchuk. The journal was revived in January 1991 as a weekly, edited by O. Kitsera and published by the Ukrainian Medical Association of Lviv.

The Metropolitan Sheptytsky Hospital of the Narodnia Lichnytsia society in Lviv

Narodnia Lichnytsia (People's Clinic). A society established in Lviv in 1902 to provide free medical care to residents of Lviv and all Galicia regardless of their religious or national affiliation. Its chief founder was Ye. *Ozarkevych, and its patron and main financial supporter was Metropolitan A. Sheptytsky. The society operated an outpatient clinic (est 1903) that consisted of four departments, internal medicine and pediatrics, surgery, ophthalmology, and gynecology. In 1905 a dermatology department was added; it was followed by dental, ear, and urology departments. The clinic's operation was disrupted by the First World War and revived by I. Kurovets. In 1937 its staff of 17 doctors treated 41,000 patients. During the 1930s the society built a 100-bed hospital, financed through public donations, with the assistance of the *Ukrainian Physicians' Society. Known as the Ukrainian

Hospital of the Narodnia Lichnytsia in Honor of Metropolitan Sheptytsky, the facility was opened officially in 1938. Besides providing medical care, it served as a research and specialization center for Ukrainian doctors, whose access to university clinics and state hospitals was severely restricted by the Polish government. The directors of the Narodnia Lichnytsia hospital were Ye. Ozarkevych (1903–14), B. Ovcharsky (1918–21), S. *Drymalyk (1921–3), I. Kurovets (1923–31), and T. Burachynsky (1931–9). In 1944 the society was dissolved by the Soviet authorities, and its hospital was integrated into the state health system.

Narodnia prosvita (Popular Enlightenment). A monthly organ of the Prosvita society in Lviv in 1923–7, edited by O. Terletsky and I. Bryk. A successor to **Pys'mo z Prosvity*, it promoted learning among the general population and extracurricular education.

Narodnia sprava (People's Cause). A weekly organ of the Kiev Gubernia People's Administration, published in Kiev in 1918–19 under the editorship of B. Doroshkevych. It published news; articles on political, economic, historical, and cultural topics; and translations. Among its many contributors were S. Petliura, V. Sadovsky, and N. Hryhoriiv.

Narodnia sprava (People's Cause). An illustrated weekly newspaper for peasants, published by I. Tyktor in Lviv in 1928–39 and edited by Yu. Shkrumeliak and then V. Bachynsky. It generally supported the Ukrainian National Democratic Alliance (UNDO) and was popular among the peasantry. By 1938 it had reached a circulation of 40,000, at least partly because of its policy of financially aiding subscribers whose properties had been destroyed by fire or whose cattle had died. The annual calendar-almanac *Zoloty kolos* (from 1929) and a series of 18 popular booklets (1929–34) were published by the newspaper.

Narodnia syla (People's Power). A semimonthly organ of the *Ukrainian Peasants' and Workers' Party of Subcarpathian Ruthenia, published in 1936–8 in Uzhhorod. It was edited by M. Tulek and I. Nevytska.

Narodnia Torhovlia. See *Narodna Torhovlia*.

Narodnia trybuna (People's Tribune). An organ of the Ukrainian Peasant Alliance, a legal front organization of *Sel-Rob, published from November 1930 to September 1932 in Sambir and Lviv (a total of 53 issues). The pro-Soviet newspaper strongly criticized both the Polish government and the Ukrainian nationalist movement. It was frequently censored and eventually closed down by the Polish authorities.

Narodnia volia (People's Will). A daily published by the Ukrainian Central Co-operative Committee in Kiev from May 1917 to February 1919. The chief editor was M. Kovalevsky and the secretary was P. Khrystiuk. It was the most widely read Ukrainian newspaper of the time (with a circulation of up to 200,000) and an important supporter of the Central Rada. A large group of correspondents submitted reports on developments throughout Ukraine, and contributors such as M. Hrushevsky, Kh. Baranovsky, M. Tuhan-Baranovsky, A. Stepanenko, and O. Shumsky pro-

vided political commentaries and analyses. Prose, poetry, and literary criticism by M. Zerov, H. Chuprynka, V. Samiilenko, M. Vorony, O. Oles, H. Zhurba, and others were also published in *Narodna volia*. The paper served as the national organ of the *Peasant Association and the mouthpiece of the majority in the Central Rada.

Narodniki. See Populism, Russian and Ukrainian.

Narodnyi dim. See People's Home in Lviv.

Narodnyi holos (People's Voice). A weekly newspaper published in Chernivtsi from December 1909 to 1915 and briefly in 1921 and 1923. The organ of the *Ruska Rada society and then the *National Democratic party, it covered political developments in the Austro-Hungarian Empire and abroad and devoted considerable attention to the activities of Ukrainian deputies in the Bukovynian Diet and Viennese parliament. In 1910 it published a literary supplement. It was edited by a committee headed by, among others, A. Veretelnyk (1909–11), O. Lutsky (1911), O. Dik (1912–13), and Yu. Dobrovolsky (1914–15).

Narodnyi uchytel' (Public School Teacher). A weekly newspaper of the All-Ukrainian Committee of the Union of Education Workers, published in Kharkiv in 1925–30. It was one of the best Ukrainian pedagogic newspapers of the time and one of the most popular, with a pressrun of 13,000. It contained articles on teaching methodology, sample curricula, book reviews, bibliographies, and discussions on contemporary issues, especially the Ukrainization of the education system. The paper supported the creation of a Ukrainian system of *labor schools. *Narodnyi uchytel'* was edited by N. Kaliuzhny, O. Mizernytsky, and others, and its contributors included M. Popiv, Ya. Chepiha, and O. Shumsky. Several supplements were published with the paper, including *Samonavchannia* (1928), *Literatura i pobut* (1928–9), and *Vyrobnycha dumka*. The newspaper was suppressed by the authorities; it was succeeded by *Za kul'turnu revoliutsiiu* (1931–5), which more closely toed the Stalinist line in education.

Narodovishchaniie (Folk Enlightenment). A collection of catechismal and literary instructions and teachings prepared by Basilian priests in the mid-18th century. Intended for distribution in the Kremianets region, the collection was first published at the Pochaiv Monastery Press in 1756. It was reprinted in 1768, 1778, and (in Lviv) 1886. The first section contained numerous short stories and legends taken from the collections written by D. *Tuptalo. The second portion consisted of an 'instruction about Christian rites,' in which papal decrees were cited in support of the prohibition of Ukrainian Catholics changing from the Byzantine or Eastern rite to the Latin rite.

Narodovtsi. See Populism, Western Ukrainian.

Narodychi [Narodyči]. II-10. A town smt (1990 pop 6,100) on the Uzh River and a raion center in Zhytomyr oblast. It is first mentioned in historical documents in 1545. After the Union of Lublin (1569) Narodychi belonged to Poland. With the partition of Poland in 1793, it became part of the Russian Empire. Narodychi attained smt status in 1958. It has a small textile industry. Lying only 80 km west of Chornobyl, it is polluted with radio-

active material from the 1986 explosion of a nuclear reactor at the Chornobyl power plant.

Nash holos (Our Voice). A monthly organ of the *Ukrainian Social Democratic party and *Ukrainian Social Democratic Workers' party, published in Lviv from November 1910 to the end of 1911 (a total of 12 issues). It was funded and edited by L. Yurkevych. Among its contributors were Yu. Bachynsky, V. Vynnychenko, D. Dontsov, V. Levynsky, V. Stepankivsky, O. Nazariiv, M. Melenevsky, and A. Chernetsky.

Nash holos (Our Voice). A monthly organ of the Ukrainian American Association, published since June 1968 in Trenton, then Irvington, and finally Union, New Jersey. Until 1972 it was called *Biuletyn' Asotsiiatsii ukrainsiv v Amerytsi*. The journal publishes book reviews, memoirs, and articles on political and historical affairs by a wide range of contributors from North America and Europe. It is especially noteworthy for its commentary on Ukrainian political affairs, in which it often criticizes leading émigré institutions and parties from a liberal-democratic perspective. The founder of *Nash holos* and editor until his death in 1982 was D. Kuzyk. Since then the journal has been edited by a board headed by E. Pereima. It has a circulation (1988) of approx 2,500.

Nash klych

Nash klych (Our Call). A pro-OUN weekly of political and community affairs, published in Lviv in 1933 and edited by V. Yaniv. In May 1933 it published a single issue of the supplement *Probiti* edited by D. Myron. *Nash klych* was banned by the Polish authorities and was succeeded by the monthly *Nash front* (1933), two issues of which appeared before it too was banned.

Nash klych (Our Call; Spanish: Nuestra Llamada). An Argentinian-Ukrainian newspaper published weekly in Buenos Aires since 1934. The publication was initially the organ of the Ukrainian Riflemen's Hromada, which reorganized into the Organization for the Rebirth of Ukraine (1938) and finally became the *Vidrodzhennia society (1939). The paper has an overtly nationalistic tone. It carries pages dedicated to women's issues, young people, and co-operatives, as well as a Spanish section. Its editors have included M. Prymak, N. Blavatny, N. Velechovsky, I. Kryvy, Ye. Onatsky, and M. Fesylovych.

Nash kontakt (Our Contact). A journal devoted to the Ukrainian co-operative and credit union movement in North America, published in Detroit in 1954–9. It appeared every two months under the editorship of V. Nestorovych. In 1959 it merged with *Novyi svit* to form **Nash svit*.

Nash lemko

Nash lemko (Our Lemko). A semimonthly paper of community and cultural affairs, established in Lviv by the *Ukrainska Presa* publishing house in January 1934. Distributed in the Lemko region, it promoted Ukrainian national consciousness there and countered the influence of the Russophile *Łemko* (Krynycia, 1934–9), which was subsidized by the Polish government, and *Karpatskii zvon* (1937–9), the semimonthly organ of the Polish-controlled Lemko Apostolic Administration. *Nash lemko* was edited by P. Smerekanych and then Yu. Tarnovych. From 1936 until the German invasion in 1939 it was published by the so-called Lemko Committee.

Nash postup (Our Progress). A weekly newspaper published in Edmonton from November 1922 to 1929 (with some interruptions). Published by T. Tomashevsky and edited by him and T. Datskiv, the paper was populist in orientation and dedicated to raising the cultural, economic, and political level of awareness of the Ukrainian population of Canada. It strongly supported the Canadian farmers' movement and was instrumental in the campaign to elect M. *Luchkovich as member of parliament for the Vegreville constituency district in 1926.

Nash prapor (Our Flag). A daily organ of the left, 'independent' faction in the *Ukrainian Labor party, which supported the government-in-exile of the Western Ukrainian National Republic led by Ye. Petrushevych. It was published in Lviv from December 1923 under the editorship of A. Maletsky; from May to November 1924 it was called *Prapor* and was edited by M. Strutynsky. It was succeeded in November 1924 by the weekly organ of the Ukrainian Party of Labor's *Ukrains'ka rada*, which in August 1925 was renamed **Rada*.

Nash prapor (Our Flag). A popular illustrated newspaper published in Lviv by the *Ukrainska Presa* publishing house as a semiweekly (December 1932 to 1935) and then three times a week (1936–9). The editors were H. Stetsiuk, V. Kachmar, and I. Kernytsky. In late 1938 it had a circulation of 12,000 copies. The newspaper also published the supplements *Amators'kyi teatr* (1935–9), edited by H.

Luzhnytsky, and *Muzhychna biblioteka* (1937–9). Its subscribers received free copies of the **Ukrainska biblioteka* book series. The paper was widely read in both Galicia and Transcarpathia.

Nash pryiatel' (Our Friend). A monthly Catholic children's magazine published by the Marian Youth Society in Lviv in 1922–39. It was edited by Basilian priests, among them Y. Markevych, T. Hornykevych, and I. Nazarko, and illustrated by J. Hnizdovsky, P. Andrusiv, and Yu. Kyryienko. In 1930 it had a circulation of 8,000 copies. The magazine also published a book series featuring works by Catholic writers.

Nash ridnyi kraj (Our Native Land). A children's magazine published monthly (except July and August) in 1922–38 in Tiachiv, Transcarpathia, by the *Pedagogical Society of Subcarpathian Ruthenia. Edited by O. Markush, it contained much local folklore and helped inculcate Ukrainian national consciousness among its readers. In 1924 **Vinochok dlia podkarpats'kykh ditochok* appeared as a supplement to the magazine.

Nash shliakh (Our Path). A daily newspaper published in Kamianets-Podilskyi in 1919–20. Edited by I. Kosenko, it was not aligned with any political party in the UNR.

Nash stiah (Our Banner). An organ of the pro-hetmanite *Sich society in the United States, published in Chicago in 1934–41. It succeeded **Sich* and continued its conservative line and support for P. Skoropadsky. It also reported on political developments and the affairs of the Sich movement. The editor of *Nash stiah* was O. *Shapoval.

Nash svit (Our World). An illustrated weekly journal of literature, culture, and popular science, published in Warsaw in 1924–5 by V. *Ostrovsky and distributed in Volhynia, the Kholm region, and Podlachia. Ostrovsky revived the journal as a monthly in Lutske in 1935 and published it there until 1936. Among the contributors were Ye. Lukasevych, V. Zaikin, I. Ohiienko, K. Polishchuk, S. Khrutsky, Ya. Voitiuk, H. Orlivna, S. Siropolko, and Ye. Malaniuk.

Nash svit (Our World). An organ of the *Self-Reliance Association of American Ukrainians, published monthly and then every two months in New York since 1959. It was established through the merger of two earlier journals, **Nash kontakt* and **Novyi svit*. It publishes articles on the co-operative and credit union movements and on political and economic affairs. Among its editors have been R. Il'nytsky, V. Nestorovych, and M. Ostroverkha. The journal's circulation was approx 2,650 in 1986.

Nasha bat'kivshchyna (Our Homeland). A monthly illustrated journal published by the *Plai society in Lviv in 1937–9. Edited by S. Shchurat, it contained articles on hiking, sports, and especially regional history and ethnography by I. Svientsitsky, Ya. Pasternak, and others. The journal also published a series of regional studies brochures.

Nasha bat'kivshchyna (Our Homeland). A magazine of political thought, literature, and scholarship, published

biweekly from 1962 to 1971, bimonthly in 1972, once in 1973, and three times in 1974 by S. Kravets in New York City and, from 1972, in Mountain Dale, New York.

Nasha derzhava (Our State). A semimonthly conservative newspaper published in Toronto from July 1952 to 1955. It was founded after a split in the *United Hetman Organization by M. Hetman, who earlier had edited *Ukrains'kyi robotnyk*, the organization's organ. *Nasha derzhava* was pro-hetmanite in orientation but also stressed its loyalty to Canada. It was succeeded by **Bat'kivshchyna*.

Nasha dolia (Our Fate). The title of three miscellanies published in Stryi in 1893 and in Lviv in 1895 and 1896 by N. *Kobrynska. They consisted of articles on issues relevant to the Ukrainian women's movement, Ukrainian and translated literary works, and reviews of Western European literature. Among the contributors were Kobrynska, O. Kobylianska, M. Damian (W. Moraczewski), H. Barvinok, H. Shukhevych, and I. Petryshyn.

Nasha Kooperatsiia (Our Co-operation). An organization of activists in the Ukrainian co-operative movement, established in Kiev in 1912. Although the organization was opposed by the Russian authorities, its membership grew quickly to 150 throughout Russian-ruled Ukraine. It emerged as the ideological center of the co-operative movement and an important base for the development of Ukrainian national consciousness. The society published the weekly journal *Nasha kooperatsiia* from January 1913 to December 1914 and popular booklets and pamphlets on the co-operative movement. It was banned by the authorities at the end of 1914. Attempts in 1913 to establish a similar organization with the same goals and name in Lviv were cut short by the outbreak of the First World War.

Nasha kul'tura (Our Culture). A monthly journal of scholarly, literary, and cultural affairs, published and edited by I. Ohienko in Warsaw from April 1935 to December 1937 (a total of 32 issues). It contained articles on Ukrainian cultural history, belles lettres, memoirs (primarily from the 1917–20 period of Ukrainian independence), book reviews, and surveys of cultural and scholarly developments in Soviet Ukraine and abroad.

Nasha kul'tura. See *Vira i kul'tura*.

Nasha meta (Our Goal). A women's journal in Lviv, published semimonthly and then weekly in February and March 1919. It was closed down by the Polish authorities, was revived as a semimonthly in August 1919, and continued (later as a monthly) to the end of 1920. In 1920 it served as an organ of the *Ukrainian Social Democratic party for working women. A total of 30 issues appeared before the journal folded because of a lack of support. It was edited by D. Starosolska.

Nasha meta (Our Goal). A Catholic newspaper published weekly in Toronto since October 1949 as the organ of the Eastern eparchy of the Ukrainian Catholic church in Canada. Besides articles on religious and cultural topics and church developments, it devotes regular sections to the Ukrainian Catholic Women's League and the Ukrainian Catholic Brotherhood of Canada. The chief editor from

1951 until 1983 was P. Khomyn. He was assisted at various times by Ya. Chumak, M. Koliankivsky, M. Syrotynsky, and others. Since the mid-1980s the chief editors have been M. Davosyr and M. Poriuniuk. In 1989 the paper's circulation was approx 2,000.

Nasha pravda (Our Truth). A weekly newspaper of the underground Communist Party of Eastern Galicia, published in Vienna from April 1921 to August 1923 (122 issues). Published under the same title was the principal theoretical journal of the *Communist Party of Western Ukraine; it was printed in Berlin and later Czechoslovakia from December 1923 to November 1935 (a total of 82 issues). Both periodicals were smuggled into Western Ukraine.

Nasha shkola (Our School). A pedagogical journal published in Lviv by the Galician *Teachers' Hromada society and the Bukovynian *Skovoroda Society of Higher School Teachers. It appeared quarterly in 1909–13 but then bimonthly in 1914 and 1916–18. *Nasha shkola* published articles on pedagogy and the history of Ukrainian education. It devoted particular attention to contemporary developments in Ukrainian education and remains an excellent source of information on 19th- and early 20th-century education in Western and Russian-ruled Ukraine. It also published book and journal reviews and reports on the activities of the Teachers' Hromada and Provincial School Union in Galicia and Bukovyna. It was edited by I. Krevetsky and M. Hrushevsky (1909–12), S. Tomashivsky, M. Chaikivsky, and Yu. Rudnytsky (1916–18). Among its contributors were V. Simovych, I. Krypiakivych, V. Shchurat, M. Vozniak, and V. Doroshenko.

Nasha shkola (Our School). A monthly pedagogical journal published in 1935–8 by the Teachers' Hromada of Subcarpathian Ruthenia in Mukachiv. It was edited by I. Vasko.

Nasha zahradka (Our Kindergarten). A children's magazine published in Ruski Krstur, Yugoslavia, in 1937–41. It appeared in the local Bačka dialect but was Ukrainophile in spirit. It was edited by M. *Kovach and illustrated by J. Hnizdovsky and published for a school-age audience. A total of 37 issues appeared. In 1947 it was succeeded by *Pyonerska zahradka*.

Nasha zemlia (Our Land). A pro-Soviet Ukrainophile political and literary monthly published in Uzhhorod from February 1927 to January 1929 (a total of 23 issues). Edited by V. *Grendzha-Donsky and published in standard Ukrainian, it did much to promote Ukrainian national consciousness in Transcarpathia before it was closed down by the Czechoslovak authorities.

Nasha zemlia (Our Land). An irregular unofficial organ of the Communist Party of Western Ukraine, published in Lviv from March 1930 to September 1932 (a total of 60 issues). Its editors included O. Yurkevych, A. Hoshovsky, and V. Ohonovsky. In 1930 it had a circulation of 1,000. The paper was closed down by the Polish authorities.

Nashchynsky, Davyd (Danylo) [Naščyns'kyj], b ca 1721 in the Poltava region, d 1793. Scholar and church-

man. A graduate of the Kievan Mohyla Academy, he served as professor of philosophy and theology, prefect (1752–8), and rector (1758–61) there. He revised the academy's philosophy curriculum, replacing its Aristotelian textbooks with C. Baumeister's textbook based on C. Wolff's system, and collected and published works by T. Prokopovych (1743, 1745). Later he served as archimandrite of several monasteries in Ukraine and Belarus. He was a friend of O. *Lobysevych and had close contacts with the *Novhorod-Siverskyi patriotic circle. Influenced by Wolff's views, he defended the use of the vernacular in literature and always stressed his national origin.

Nashe mynule (Our Past). A literary and scholarly journal published in Kiev in 1918 (three issues) and 1919 (a double issue). Edited by P. Zaitsev, it contained articles by prominent cultural figures of the time – eg, V. Modzalevsky, P. Fylypovych, S. Yefremov, and O. Slaktion – on the history of Ukrainian culture, art, the Ukrainian national movement, and literature (especially on T. Shevchenko); memoirs of community leaders of the 19th and early 20th centuries; and archival documents (eg, the first full publication of **Knyhy byt'ia ukrains'koho narodu*). H. Narbut designed the journal's cover.

Nashe selo (Our Village). A weekly newspaper for peasants, published in Odessa in 1918–19 by the Selianska Samoosvita society. The editor was Yu. Hryshchenko.

Nashe slovo (Our Word). The weekly and later irregular central organ of *Sel-Rob, the legal front organization of the Communist Party of Western Ukraine, published in Lviv in 1927–30 (a total of 103 issues) and edited by I. Kalynovych (1927), V. Pashnytsky (1928), and P. Kraikivsky, the secretary-general of Sel-Rob. After the split in the organization the journal was aligned with the Shumskyist 'right' faction. In 1930 its circulation was 3,750.

Nashe slovo (Our Word). A weekly organ of the *Ukrainian Social and Cultural Society (USKT; since 1990 the Alliance of Ukrainians in Poland [OUP]) in Poland, published since 1956 in Warsaw. It contains articles on developments in the Ukrainian community in Poland – focusing

Nashe slovo

on the activities of the OUP – and Ukraine, regular reviews of Ucrainica published in Poland, prose, poetry, and political commentary. Although its content was closely monitored by the Polish authorities, the newspaper enjoyed considerable autonomy in its coverage of cultural affairs. It devoted special attention to the folklore and ethnography of Ukrainians in Poland and included special sections devoted to the Lemko community, its history and culture in Poland, and women's issues. It also publishes the semi-monthly supplement *Svitanok* (Dawn) for children and the literary and scholarly supplement *Nasha kul'tura* (Our Culture), which appeared monthly until 1988 and, after an interruption, resumed publication on an irregular basis in March 1988. The editors of the newspaper have been M. Shchyrba, A. Hoshovsky, H. Boiarsky, and M. Verbovy, and its regular contributors have included most of the prominent Ukrainian cultural and community figures in Poland. In 1988 the circulation of *Nashe slovo* was approx 10,000.

Nashe zhyttia (Our Life). An irregular mimeographed organ of the Petrograd Committee of the clandestine Ukrainian Social Democratic Workers' party, published from 1915 to May 1917 in Petrograd (St Petersburg). Edited by P. Fedenko and L. Chykalenko, it became legal only in March 1917. The paper exhorted workers to oppose Russia's involvement in the First World War and to rebel against and overthrow tsarism.

Nashe zhyttia (Our Life). A socialist weekly newspaper of political, cultural, and community affairs in the Kholm region, published in 1920 and 1922–8 in Kholm. The newspaper was founded by the brothers A. and P. Vasynchuk, and its editors included M. Vavrysevych, V. Kozlovsky, S. Kozachuk, Ya. Voitiuk, and S. Makivka. It was the organ of *Sel-Soiuz in 1924–6 and then came under the control of the more radical faction that joined *Sel-Rob. The paper's editors were persecuted by the Polish authorities. In 1928 it was succeeded by **Nove zhyttia*.

Nashe zhyttia (Our Life). A weekly newspaper published in Bucharest in 1940–2. After the suppression of the Ukrainian press in Bukovyna, it was the only Ukrainian-language newspaper in Rumania. The newspaper was constantly harassed by the Rumanian authorities, and it was forced to change its name frequently; its titles included *Nove zhyttia* and *Ukrains'ke zhyttia*. It was edited by M. Kovalevsky and O. Turushanko.

Nashe zhyttia (Our Life). A weekly and later semi-monthly democratic-socialist newspaper for displaced persons, published by P. Kotovych in Augsburg, Germany, from September 1945 to March 1948. The editors were V. Chaplenko and P. Fedenko. Contributors included S. Dovhal, M. Dolnytsky, S. Drahomanov, and N. Kebaliuk. In 1947–8 it sublicensed the co-operative monthly *Hospodars'ko-kooperatyvne zhyttia*, the pedagogical paper *Ukrains'ka shkola na emigratsii*, the children's monthly *Mali druzy*, and the literary paper *S'ohodni* and published them as supplements. *Nashe zhyttia* folded after Kotovych's death.

Nashe zhyttia/Our Life. A monthly organ of the *Ukrainian National Women's League of America, published in Philadelphia and then New York since 1944. The

successor to an insert dealing with organizational issues in the newspaper *Ameryka*, the journal publishes articles on the women's movement, the league's activities, home economics, the arts, and other topics. It also contains belles lettres, children's stories, and poems. An English-language section has been included in the journal since its beginnings. It was launched in a newspaper format, but in 1951 it changed over to a 32-page journal format. Its circulation in the 1970s and 1980s was approx 4,600 to 5,000. Its editors have included K. Olesnytska (1944–6), O. Lototska (1946–51), L. Burachynska (1951–72), U. Starosolska (1972–84 and 1987–90), O. Liskivska (1985–6), and I. Chaban.

Nashi dni (Our Days). An illustrated monthly of literature, art, and culture, edited by M. *Strutynska with the help of S. *Hordynsky and M. *Shlemkevych. It was published in Lviv by the Ukrainske Vydavnytstvo publishers in 1941 (1 issue), 1942 (12), 1943 (12), and 1944 (1). Among the contributors were I. Bahriany, D. Humenna, P. Kovaliv, L. Kovalenko, E. Kozak, N. Koroleva, Yu. Kosach, Yu. Lypa, A. Liubchenko, V. Miiakovsky, O. Ohloblyn, T. Osmachka, O. Povstenko, O. Tarnavsky, and Yu. Sherekh (G.Y. Shevelov).

Nastup (Attack). A newspaper published semiweekly in 1938–9 in Uzhhorod and then Khust as the organ of the *Ukrainian National Defense and *Carpathian Sich. The editor was S. *Rosokha. After the occupation of Carpatho-Ukraine by the Hungarians, it was published weekly in Prague (1940 to January 1944), and supported the OUN (Melnyk faction). It had a pressrun of 5,700. It also published the separate biweekly supplements *Narodnia volia* (1938–9) and *Natsionalist* (1940–2). *Nastup* was closed down by the Gestapo, and Rosokha was sent to a concentration camp.

Nasturtium (*Tropaeolum*; Ukrainian: *nasturtsiia*). A perennial plant of the family Tropaeolaceae, with brilliant yellow, orange, and red funnel-shaped flowers. Only the medicinal nasturtium exists in Ukraine; its leaves contain vitamin C, carotene, and iodine.

Natiiv, O. [Natiiv], b ?, d 1919. Senior officer in UNR Army. An Ossetian by origin, he was a general officer in the Russian army during the First World War and joined the UNR Army in 1917. In March–April 1918 he commanded the Separate Zaporozhian Division, which cleared Left-Bank Ukraine and the Crimea of Bolshevik forces. In 1919 he organized the Transcaucasian Volunteer Battalion in Batumi. He was murdered by the Bolsheviks.

National Anthem. See Anthem.

National communism. A current within the Communist movement or Communist parties that attempted to reconcile national interests with Marxist-Leninist doctrine in order to sanction a national road to socialism. National communism emerged as a political phenomenon in Ukraine in 1918 and has had many counterparts elsewhere.

The first Bolshevik to state a national-communist position was V. *Shakhrai, a leader of the Poltava Bolshevik organization. In the latter half of 1918 he wrote a pamphlet under the pseudonym Skorovstansky, *Revoliutsiia na Ukraini* (Revolution in Ukraine), in which he argued that

the national question had to be solved in tandem with social problems. In January 1919 Shakhrai and S. *Mazlakh published *Do khvyli: Shcho dietsia na Ukraini i z Ukrainoiu* (Concerning the Moment: What Is Happening in and to Ukraine), in which they argued that the CP(B)U should be replaced by a separate Ukrainian Bolshevik party that would affirm Ukraine's language, culture, and rights as a state.

Shortly before the collapse of the second Soviet republic in Ukraine in July 1919, a group of disaffected Bolsheviks led by Yu. *Lapchynsky and P. Slynko formed in Kiev. Later known as the Federalist Opposition, it advocated an independent Soviet Ukraine led by a new Ukrainian party that would select its own leadership and control its own military and economic resources. In subsequent months the group modified its position, in calling for a Russo-Ukrainian federation but insisting on equal rights. It also believed local Bolsheviks should merge with local pro-Soviet parties, notably the *Borotbists, to form a new *Ukrainian Communist party (UKP). Founded in January 1920, the UKP held views that had much in common with those of later Third World Marxist thinkers. It held that whereas imperialism threatened oppressed peoples with the loss of their national culture, it also promoted their economic development and thereby stimulated them to economic consolidation and national liberation. In the early 1920s the UKP spokesmen were the most consistent critics of the economic exploitation of Soviet Ukraine by the rest of the USSR. Consequently the UKP was dissolved by the Comintern in 1925. Its members were allowed to join the CP(B)U, and helped carry out the *Ukrainization policy.

Not only disillusioned Bolsheviks became national communists; so did Ukrainian leftists who became disenchanted with the policies of the dominant Ukrainian socialist parties. The Borotbists favored federation with Soviet Russia but refused any subordination of Soviet Ukraine to Russia and believed Soviet Ukraine should be led by Ukrainians. In March 1919 they were admitted into the Soviet government in Ukraine led by Kh. Rakovsky, but had little authority. They then petitioned the Comintern to admit them as the legitimate representative of Ukrainian communism on the grounds that the CP(B)U was alien to the Ukrainian revolutionary process and, through hostility to everything rural and Ukrainian, had distorted and hindered the natural course of Ukraine's revolutionary development. Recognizing their usefulness, in November 1919 V. Lenin forced the Russian-dominated CP(B)U leadership to begin negotiations with the Borotbists on merging with the CP(B)U. At the same time Lenin and L. Trotsky issued statements promising to respect the Ukrainians' right to cultural self-assertion and promised Ukrainians 'the right to rule their own country,' albeit in a federation with Russia. The CP(B)U and the Borotbists merged in March 1920, and the Borotbist leaders O. *Shumsky and V. *Blakytyn were elected to the CP(B)U CC. Of about 5,000 Borotbists about 4,000 were admitted into the CP(B)U. All but 102 were purged during the following year.

The successes of Ukrainization fostered the myth that Ukrainians had achieved a measure of national liberation within the Soviet framework, and led a number of prominent Ukrainian Communists to believe their national-communist views had been legitimized. Thus, as Ukraine's commissar of education in 1925, Shumsky urged J. Stalin to replace the CP(B)U first secretary, L. Ka-

ganovich, with an ethnic Ukrainian, V. Chubar, and called for faster implementation of Ukrainization so as to de-Russify Ukraine's cities and proletariat. Shumsky also defended M. *Khvylovy, who argued that Ukrainian culture should take its models from Western Europe and reject Russian influence in order to liberate itself from the legacy of colonialism.

Stalin, however, condemned both 'Shumskyism' and 'Khvylovyism' in April 1926. Because Shumsky was supported by the majority of the leadership of the *Communist Party of Western Ukraine (KPZU), the Comintern 'deposed' that leadership, thereby splitting the KPZU and ending its role as an influential force in Western Ukrainian political life. In 1927 Shumsky was removed from his Ukrainian post and transferred to Moscow. He was arrested in 1933, and died in a labor camp in 1946.

Another casualty of Shumsky's downfall was the national-communist view of Ukrainian Party history, which portrayed the CP(B)U as an amalgam of Russian Bolshevism and Ukrainian socialism, culminating in the Borotbist-Bolshevik merger. That 'two roots' theory, which was first enunciated in 1923 by the historian M. Ravich-Cherkassky (Rabinovich), was condemned in 1927, and a new, Stalinist, official history of the CP(B)U, by N. *Popov, was published in 1928.

M. *Skrypnyk, who replaced Shumsky as commissar of education, was until 1933 the Soviet regime's and the Comintern's most authoritative spokesman on nationality policy and a defender of Soviet republican prerogatives as formulated in the 1923 Soviet Constitution. He consistently advocated policies that would make the Soviet system attractive to oppressed peoples living on the USSR's periphery. Skrypnyk also continued to lobby for Ukraine's economic interests with respect to both republican control over establishments located in the Ukrainian SSR and new construction. In February 1928 M. *Volobuiev, Skrypnyk's subordinate in charge of political education, popularized findings of the economist V. Dobrohaiev demonstrating that Ukraine was being exploited fiscally by the USSR just as it had been exploited by the tsarist government. Volobuiev also criticized the Russian chauvinism of economic decision-makers in Moscow, argued that their centralized control distorted Ukraine's economic development and had harmful consequences for Ukraine's national and cultural life, and called for the Ukrainian SSR to strive for economic self-sufficiency. He was condemned for providing Ukrainian 'bourgeois nationalism' with an economic basis.

In 1928-9 a campaign was initiated against the leading official Soviet Ukrainian historian, M. *Yavorsky, whose views reflected Skrypnyk's orthodox national communism. Although he was criticized for many alleged errors, the most significant charges leveled against him were his overemphasis on Ukrainian ideas and figures in the Ukrainian revolutionary process, his having adopted many ideas from the writings of M. Hrushevsky, and his portraying Ukrainian history as distinct from Russian history.

On 14 December 1932 Moscow ordered the CP(B)U to halt the 'mechanistic' implementation of Ukrainization and root out 'national deviations' from the Party line. The 1933 Party purge singled out 'national communists' as primary targets. Stalin appointed P. *Postyshev as CP(B)U second secretary on 12 January 1933, and over the course of several months Skrypnyk and his views were condemned,

and his followers were accused of spying and treason. The suicide of Khvylovy in May 1933 and that of Skrypnyk in July 1933 mark the end of openly expressed national-communist ideas in Ukraine.

Modest attempts to reconcile Ukrainian aspirations with communism, however, continued to arise. In 1965 the literary critic I. *Dziuba wrote a major restatement of national-communist ideas in his critique of Soviet nationality policy, *Internationalism or Russification*, and the Ukrainian dissident movement of the 1960s and 1970s had other national-communist thinkers (eg, Yu. *Badzo). Moscow's continuous opposition to national-communist ideas resulted in the 1972 removal of the CPU first secretary, P. *Shelest, on the grounds of 'bourgeois nationalism.' After the advent of glasnost in the mid-1980s, greater tolerance for national-communist ideas became evident, and the Party press published articles favorable to major national-communist figures of the past, including Shumsky, Khvylovy, and Shakhrai.

In the Soviet Union outside Ukraine, national communism was most often associated with Mir Said Sultan-Galiev (1880-193?), a prominent Volga Tatar Communist who became disillusioned with Lenin's nationality policy toward the Moslem peoples and evolved his own variant of national communism. From 1929 to 1939 thousands of Communists of Moslem origin were arrested for 'Sultan-Galievism.' In addition the Jewish Communist party, an offshoot of the Poale Zion party that upheld a fusion of communism and left-wing Zionism, was allowed to exist until 1924.

National communism had more success outside the Soviet Union. Under J. Tito Yugoslavia broke with Stalin on national grounds in 1947. In 1956 both Poland under W. Gomulka and Hungary under I. Nagy sought national roads to socialism. Hungary's attempt was crushed by Soviet military intervention, but Poland's achieved some successes before sinking into political stagnation. In breaking with the Soviet Union in the early 1960s, China was able to create a communist state relatively free from outside influence, the basic goal of national communism. Czechoslovakia under A. Dubček also sought its own national road to socialism, but its attempt too was aborted by Soviet military intervention in 1968.

National composition of Ukraine. Changes in the population share of Ukrainians and *national minorities in Ukraine have been effected by border changes, *emigration, *immigration, and natural increase. The lack of independent statehood has played a decisive role. Coupled with the persecution of the Ukrainian language and Ukrainian culture by the occupying powers of tsarist and Soviet Russia, Poland, Hungary, and Rumania, it resulted in the *Russification, Polonization, Magyarization, and Rumanianization of many Ukrainians and the extensive colonization of Ukraine by the ruling nations. The major sources for the study of the national composition of Ukraine have been the various *censuses conducted by the occupying regimes. They have, however, varied in degrees of accuracy.

The national composition of eastern and central Ukraine was dramatically altered as a result of their occupation by tsarist and Soviet Russia. An important factor contributing to Russia's capacity to hold on to Ukraine lay in colonization. Throughout the 18th century Russian nobles, bureaucrats, merchants, and peasants immigrated to Ukraine. In addition, under Catherine II, colonists from Central and Eastern Europe were granted tracts of land and allowed to establish colonies in *Southern Ukraine. The development of industry in the *Donets Basin in the second half of the 19th century spurred further immigration. The extent of colonization can be gauged by comparing the demographic data of the late 18th century with those of the late 19th century. According to the fifth tsarist enumeration of 1795, Ukrainians constituted 89 percent of the population of Russian-ruled Ukraine. By 1897 the Ukrainians' share of the population there had dropped to 77 percent.

By 1926, despite the loss of life during the First World War and the Ukrainian-Soviet War, the Ukrainians' share of the total population of Soviet Ukraine had increased, as a result of a high rate of natural population increase and of *Ukrainization policies, which partly reversed the trend of Russification. The 1926 Soviet census was much more precise than previous censuses in establishing the nationality of respondents. Some national minorities registered significant declines in their share of Ukraine's population as a result of emigration, out-migration, and population losses during recent wars (see table 1). The massive depor-

^bRumanians

tations of peasants (*kulaks) during collectivization, the man-made *famine of 1932-3, and large-scale repression during the Stalinist *terror resulted in a decline of the Ukrainians' share of the population of Soviet Ukraine. Between 1926 and 1937 their total number decreased. Meanwhile, because of intensive in-migration during the 1930s, the number of Russians in Ukraine increased by almost 40 percent. A number of minorities, particularly the Jews and Poles, also registered a drop in their number because of Soviet policies of the 1930s (see table 2).

Before its incorporation into Soviet Ukraine in 1939, Western Ukraine was characterized by a complex national composition. In the 1790s, Ukrainians made up 80 percent of the population of eastern Galicia, 74 percent of Bukovyna, and 31 percent of Transcarpathia. Polish, Hungarian, Rumanian, and German colonization, national oppression, and the ensuing assimilation of Ukrainians had resulted by the 1850s in the decline of the Ukrainians' share of the population to 66 percent in eastern Galicia, 41 percent in Bukovyna, and 24 percent in Transcarpathia. In 1900, Ukrainians constituted 60 percent of the population of that part of Western Ukraine within the latest boundaries of Ukraine. The partition of the region among Poland, Rumania, and Czechoslovakia after the First World War was followed by a sizable in-migration of civil servants and colonists from the ruling nations (see table 3).

The 1959 Soviet census was the first to provide data on the national composition of postwar Ukraine. It revealed a marked increase in the Russian population of Ukraine as a result of large-scale in-migration. The Nazi Holocaust, postwar border changes, and the postwar *resettlement of people also altered Ukraine's national composition. Between 1926 and 1959 a threefold decline in the number of Jews and a sixfold decline in the number of Poles occurred (see table 4).

Since 1959 the share of Russians in Ukraine's population has continued to increase as a result of the ongoing large-scale in-migration of Russians and the Russification of Ukrainians and other nationalities in the republic (see table 5).

The present distribution of national minorities in Ukraine is represented, by percentage composition, in

TABLE 6
National composition of Ukraine's oblasts, the city of Kiev, and the Crimea in 1989 (percentages)

Oblast	Ukrainians	Russians	Others
Ternopil	96.8	2.3	0.9
Ivano-Frankivske	95.0	4.0	1.0
Volhynia	94.7	4.3	1.0
Rivne	93.3	4.6	2.1
Vinnytzia	91.5	5.9	2.6
Chernihiv	91.5	6.8	1.7
Cherkasy	90.5	8.0	1.5
Lviv	90.4	7.2	2.4
Khmelnytskyi	90.3	5.8	3.9
Kiev (excluding the city of Kiev)	89.4	8.7	1.9
Poltava	87.9	10.2	1.9
Sumy	85.5	13.3	1.2
Kirovohrad	85.3	11.7	3.0
Zhytomyr	84.9	7.9	7.2
Transcarpathia	78.4	4.0	17.6
Kherson	75.7	20.2	4.1
Mykolaiv	75.6	19.4	5.0
Kiev (city only)	72.4	20.9	6.7
Dnipropetrovske	71.6	24.2	4.2
Chernivtsi	70.8	6.7	22.5
Zaporizhia	63.1	32.0	4.9
Kharkiv	62.8	33.2	4.0
Odessa	54.6	27.4	18.0
Luhanske	51.9	44.8	3.3
Donetske	50.7	43.6	5.7
Crimea	25.7	67.0	7.3

following the Second World War (and to which they are now returning), and where the numbers of Ukrainians have been consistently understated at each census. Some oblasts along the southwestern border of Ukraine contain significant non-Russian minorities: Hungarians (12.5 percent of the oblast population) in Transcarpathia, Rumanians (19.6 percent) in Chernivtsi, and a collage of Bulgarians (6.3 percent), (Rumanians (Moldavians, 5.5 percent), Jews (2.6 percent), and Gagauzy (1.0 percent) in Odessa oblast. Moreover, the Jews remain a significant minority in major urban areas throughout most of Ukraine, the Belarusians have recently become significant

in the Donets-Dnieper area, as have the Volga Tatars, and the Poles retain some significance in Zhytomyr, Khmelnytskyi, Lviv, and Kiev oblasts, and the Greeks in Donetske oblast near the Sea of Azov.

National Council of Ukrainian Women (Natsionalna rada ukrainskykh zhinok; also Ukrainska zhinocha natsionalna rada). A women's organization established in Kamianets-Podilskyi in 1919 to provide a focal point for Ukrainian women's groups in various parts of Europe and to inform international women's bodies about Ukraine's struggle for independence. It was admitted to the International Council of Women at that council's congress in Oslo in 1920, but as a representative of a stateless nation it lost its membership eight years later. Branches of the council were organized in Berlin, Bern, Vienna, Rome, Paris, and Prague, the location of its head office from 1924. The council participated in conferences of a number of international women's organizations and submitted memorandums to them on issues such as the *Pacification. The first executive of the council consisted of S. *Rusova as president, M. Hrushevska, K. Malyska, Z. Mirna, and L. Starytska-Cherniakhivska as vice-presidents, and H. Chykalenko-Keller and N. Surovtsova as secretaries. B. Baran, Kh. Kononenko, O. Lototska, N. Makarenko, and M. Rudnytska were among the most active members. In 1938 the council's executive resolved to dissolve the organization.

National Democratic party (Natsionalno-Demokratychna partiia, or NDP; also known as the Ruthenian National Democratic party, Ukrainian-Ruthenian National Democratic party, and [from 1914] Ukrainian National Democratic party). A centrist Galician political party founded on 26 December 1899 in Lviv by members of the right wing of the Ukrainian Radical party (V. *Okhrymovych, Ye. Levytsky, V. Budzynovsky, and I. *Franko) and the majority of the Galician populists (particularly members of the People's Council in Lviv), including Yu. Romanchuk, K. Levytsky, M. *Hrushevsky, Ye. Olesnytsky, and T. Okunevsky. The party was headed by the People's Committee, consisting of Hrushevsky, K. *Levytsky, Okhrymovych, D. *Savchak, and Franko. Its first congress, on 5 January 1900, adopted a platform of national unity and independence. The party quickly gained a dominant position in Ukrainian political life in Galicia; it relegated the Radical party largely to the role of a permanent opposition and substantially curtailed the influence of Galician Russophiles. In the first direct Galician elections to the Austrian parliament based on universal male suffrage, in 1907 and 1911, it won the support of most Ukrainian voters. In 1907, 17 of the 27 deputies elected by Ukrainian and Russophile Galicians were National Democrats. In 1918 the party played a leading role in setting up the Ukrainian state.

The presidents of the National Democratic party were

Yu. Romanchuk (1899–1907) and K. Levytsky. Its secretaries were K. Levytsky (1899–1907), V. Bachynsky (1907–13), and S. Baran. It published the weekly **Svoboda*, and its platform was supported by *Dilo* and *Bukovyna*.

At a party conference in Stanyslaviv in April 1919 the NDP changed its name to the *Ukrainian Labor party, and in 1923 the party split into two groups. On 11 July 1925 the two groups and the Ukrainian Party of National Work formed the *Ukrainian National Democratic Alliance, which dominated mainstream Ukrainian political life in the interwar Polish state.

V. Mudry

National emblem. See Coat of arms.

National flag. See Flag.

National Guard (Narodnia gvardiia; German: Nationalgarde). Territorial militias established in the Austrian Empire during the Revolution of 1848. Ferdinand I declared their creation on 14 March 1848, and his decree of 8 April empowered them to defend the constitutional monarchy and preserve law and order. The Poles of western Galicia formed a force of 20,000 men. In eastern Galicia the units were to include both Ukrainians and Poles, but such formations were never created. Ukrainian units were organized after appeals were issued by the Supreme Ruthenian Council in September, but only in Berezhany, Lviv, Stanyslaviv, Stryi, Ternopil, Yavoriv, and Zhovkva. They had their own Ukrainian commanders, distinct uniforms, and flags depicting a golden lion on an azure background. The first drill manual in Ukrainian was published at that time in Kolomyia. Because of government opposition the Ukrainian units never fully developed, except in Yavoriv, which had 300 uniformed members. The National Guard was abolished as an institution on 10 January 1849. National Guard units were re-established in 1991 after Ukraine declared its sovereignty.

National Guard (Derzhavna varta). The state security and intelligence services in Ukraine under the *Hetman government, formed under the law of 18 May 1918. Controlled by a separate department in the Ministry of Internal Affairs, the National Guard was subordinated on the local level to gubernial and county heads (starostas). In urban centers there was one guardsman for every 400 civilians; thus there were approx 2,000 guardsmen in each of Kiev and Odessa. In Kiev, Kharkiv, Odessa, and Mykolaiv there were additional reserve cavalry units of 260 men each, and in every county there was a reserve company (100 men). A separate corps guarded the national railways.

National income. A macroeconomic concept used as an indicator of the productive capacity of an economy. It is the net national product for a year, that is, the gross national product less the expenditure for a given year. Unlike the Western concept, the Soviet concept of national income was restricted to the material product (consumer goods and means of production). It excluded most services, such as government, education, defense, and health care. In Soviet statistics three variants of the concept were used: (1) the net material product (NMP), which is the sum of the differences between the gross output and the material expenditure in all the sectors of material production;

TABLE 1
Ukraine's national income (in billion rubles in real prices), 1923–24 to 1929–30

Year	Income	Year	Income
1923–24	2.4	1927–28	5.0
1924–25	3.1	1928–29	5.5
1925–26	4.7	1929–30	7.4
1926–27	4.6		

TABLE 2
Ukraine's national income in 1923–4 by sector and its share in the USSR income

Sector	Million rubles	Percentage of total	Percentage of USSR total
Agriculture	1,194.0	55.7	24.6
Industry	532.0	24.8	20.0
Transport (rail)	76.3	3.6	21.8
Commerce	340.5	15.9	22.9
Total	2,142.8	100.0	22.9

(2) the national income produced (NIP), which is the sum of the net outputs of the various sectors plus (a) the balance of the turnover tax and government subsidies and (b) payments from foreign countries; and (3) the national income utilized (NIU), which is the part of the NIP available for consumption and capital accumulation, that is, what remains of the income after losses, foreign aid, and balance-of-trade payments have been deducted. The first variant is close to the Western concept of national income.

In the former USSR national income began to be calculated in the mid-1920s. V. Myshkis calculated Ukraine's national income in the 1920s (see table 1). In 1923–6, on the average 84 percent of the national income was apportioned to consumption, 11 percent to capital accumulation, and 5 percent to the Union budget for general needs and the redistribution of national incomes, and so forth.

The republic's national income by sectors and its share in the USSR total in 1923–4, according to the People's Commissariat of Finance of the Ukrainian SSR, is shown in table 2. Although Ukraine had only 19.8 percent of the USSR population (1926), it accounted for almost 23 percent of the USSR income (in 1923–4). By 1928–30, according to Myshkis, Ukraine's share in the USSR income fell to 17.9 percent. After 1931 national income and other macroeconomic

indicators were no longer computed for Ukraine, only for the USSR.

The system of estimating the national income of the USSR and its constituent republics was put into place in 1956–8. Ukraine's NIP has been published since 1956, and its NIU since 1961. The system remained practically unchanged until the late 1980s. Before then, detailed information about national income, apart from general and, usually, indexed indicators (not absolute), was hardly ever published. In 1990 all restrictions were lifted, and Western methods of computing the gross national product (GNP) were adopted.

In 1988 national income began to be calculated also by oblast. In 1989 Ukraine's GNP was estimated at 154.9 billion rubles. Basic macroeconomic data on Ukraine are given in table 3. It should be noted that the official figures based on constant prices are exaggerated by a factor of two and can be used only to indicate the relative weight of the different indicators.

Ukraine was second only to the RSFSR in the Soviet Union in the absolute size of its national income. In 1989 Ukraine generated 16.2 percent and the RSFSR 59.5 percent of the USSR income. After 1970 Ukraine's share in the total social product and the NIP of the USSR declined steadily (see table 4). The decline was the result of many factors, but particularly of the redistribution of resources for the economic development of new regions of the USSR. The decline of Ukraine's share in the total population of the USSR from 20.1 percent in 1956 to 18.0 percent in 1989 must also be taken into account.

In these circumstances Ukraine's standing among the other republics in terms of national income per capita (in actual prices) was deteriorating. After 1970 Ukraine no longer belonged to the top five republics, although its position improved slightly in later years (see table 5).

Ukraine's position by per capita income is influenced particularly by its high share of heavy and extraction industries and lower share of light industry (which generates a significant turnover tax) as well as the large and growing subsidies for agriculture. In 1989 Ukraine was 9th among the 15 republics in regard to the average worker's and office worker's wage (90.6 percent of the Union average), and 11th in regard to the average collective farmer's wage (91.8 percent of the Union average). Of course, the cost of living and the cost of construction were lower in Ukraine than the Union average. Nevertheless, the relative decline in Ukraine's per capita income, from 96.9 percent of the Union average in 1970 to 94.1 percent in 1976, 89.0 percent in 1980, and 88.6 percent in 1985

TABLE 3
Basic macroeconomic indicators of Ukraine's development (real prices in billion rubles), 1956–89

Indicator	1956	1960	1970	1980	1985	1989
Total social product	39.89	55.70	122.06	191.08	241.55	275.90
Material expenditure	19.67	28.65	67.30	113.58	147.55	166.99

		Ukraine		

(though with a slight rise to 89.7 percent in 1989), is cause for concern. It is all the more disturbing when Ukraine's performance is compared with Belarus's: in 1970 Ukraine's average per capita income was 106.0 percent of Belarus's, but then it plummeted to 89.7 percent in 1975, to 81.2 percent in 1980, to 79.5 percent in 1985, and to 75.8 percent in 1989.

In the last 30 years the structural changes in the various sectors of the Ukrainian economy have been insignificant. Industry's share in the output has increased slightly, the construction industry's share has declined significantly, and the agricultural sector's contribution has decreased slightly. The share of other sectors has remained practically unchanged (see table 6). These figures are close to the shares of the various sectors in the USSR income. The structure and the growth rate of the total social product and the NIP are affected substantially by the turnover tax, state subsidies, and foreign payments. According to some indicators the turnover tax in Ukraine is much higher than in Western countries. In 1984 (ie, prior to the antialcoholism campaign) it stood at 17.5 percent of the NIP (or about 13 percent of the GNP, compared to 8 percent in the United States).

In 1970 the turnover tax in Ukraine constituted 16-17.5 percent of the NIP, and by 1984 it had declined to 14-14.5 percent. This indicator was about two points below the Union average. Both in the USSR as a whole and in Ukraine, the share of the turnover tax in retail prices was very high (before the price increases of April 1991): 94 percent of the price of alcohol, 64 percent of that of cars, 61 percent of that of carpets, 47 percent of that of synthetic fibers, and 39 percent of that of refrigerators. In the years before the dissolution of the Union subsidies increased

TABLE 6
The structure of Ukraine's national income produced in 1960-89 in real prices (percentages)

Sector	1960	1970	1980	1985	1989
Industry	47.9	50.0	50.0	44.3	42.6
Construction	10.2	9.2	8.9	10.1	10.4
Agriculture	26.0	25.3	18.2	24.0	28.1
Transport and communications	4.3	4.8	5.4	5.7	5.1
Commerce	6.4	5.9	7.3	6.6	6.9

sharply. Twenty-five to 30 years ago they accounted for only 5-7 percent of the turnover tax. Then, as state purchasing prices on animal products rose repeatedly, while state retail prices remained practically unchanged (before April 1991), the subsidies increased year by year. They grew to match the turnover tax, and in 1989 they even surpassed it, by 1.1 billion rubles. The major part of the subsidies was allocated for two products, milk and meat. Coal also had been subsidized, in the amount of three to five billion rubles.

Another peculiarity of Soviet macroeconomic statistics was that the total social product and the NIP included the trade balance. So far only the trade among the Union republics had been taken into account by the USSR State Statistical Committee. The weight of certain supplementary components in the national income and the connection between the NIP and the NMP are given in table 7. It should be noted that in 1980 and 1985 Ukraine's NIP increased

TABLE 7
The structural relation between the national income produced and the net material product in Ukraine in 1960-89 in real prices (percentages)

Indicator	1960	1970	1980	1985	1989
1. National income produced	100.00	100.00	100.00	100.00	100.00
2. Turnover tax	-	15.80	17.54	15.45	-
3. Subsidies	-	4.51	5.53	9.42	-
4. Balance (2 - 3)	18.88	11.29	12.01	6.03	-1.05
5. External trade balance	3.03	3.74	9.60	8.60	6.22
6. Deductions (4 + 5)	21.91	15.03	21.61	14.63	5.17
7. Net material product (1 - 6)	78.09	84.97	78.39	85.37	94.83

only because of the increase in the balance of external trade.

Until recently there was practically no significant information about the value structure of the national income. The classical relationship between the necessary and the surplus product is of social interest (see table 8). In Soviet statistics the outlays for social security and insurance as well as for wages in the nonproduction sector (education, health, etc) were included in the surplus product. In 22 years the surplus product has increased 0.94 percentage points relative to the necessary product (see table 9).

TABLE 8
The value structure of Ukraine's national income produced in 1966-88 in real prices (percentages)

Components of NIP	1966	1972	1977	1982	1988
Necessary product (labor cost of material production)	52.30	52.59	51.31	51.71	51.36
Wages & salaries	29.12	29.61	31.15	30.18	30.80
Bonuses (not incl in wages)	0.37	2.14	1.57	2.31	2.93
Other cash payments	1.00	1.19	1.19	1.25	1.33
Collective-farm wages	9.27	7.64	7.09	6.48	6.64
Net production of private plots	2.54	11.71	10.31	11.48	9.66
Surplus product	47.70	47.41	48.69	48.29	48.64
Sales profits	17.48	23.81	22.37	19.44	31.10
Turnover tax less subsidies	16.06	10.65	10.13	10.68	1.07
Social security & insurance	2.56	2.71	2.88	3.73	4.30
Net income of collective farms	6.46	3.36	3.28	1.25	4.20
External trade balance	2.80	4.30	6.92	10.49	6.41
Other elements of surplus product	2.34	2.88	3.11	2.70	2.12

The ratios were very low in agriculture (particularly in 1982, before the increases in purchase prices) and in construction. They were related to the relatively low share of profits, which could not ensure normal social reproduction and accumulation in the sectors. NIU had been calculated in the Ukrainian SSR since 1961. A breakdown of its principal components is given in table 10. The share of personal consumption in the total NIU increased from 65.2 percent in 1961 to 69.8 percent in 1989, and the share of ba-

Industry	1.655	1.743	1.556	1.434	1.291
Agriculture	0.402	0.223	0.344	0.097	0.403
Construction	0.194	0.223	0.263	0.154	0.447

TABLE 10
Ukraine's national income utilized in real prices, 1961-89
(in billion rubles)

	1961	1970	1980	1985	1989
Total	27.22	49.98	74.10	91.77	107.95
<i>including</i>					
Consumption	19.25	36.57	60.70	72.03	85.72
Personal	17.76	32.98	53.75	63.80	78.36
Material expenditures					
on consumer services	1.24	2.89	5.47	6.65	7.94
Material expenditures on research & management	0.25	0.70	1.48	1.58	2.42
Accumulation & other expenditures	7.97	13.41	13.40	19.74	22.23
Growth of reserves	4.70	8.37	7.94	9.42	12.15
Production	3.38	5.70	5.36	5.03	5.29
Nonproduction	1.32	2.67	2.58	4.39	6.86
Growth of material turnover costs & reserves	3.27	5.04	5.46	10.32	10.08

sic reserves growth decreased from 17.3 percent to 11.3 percent. In the basic reserves growth the share of nonproduction reserves growth doubled from 28 percent in 1961 to 56 percent in 1989.

Changes in the basic components of personal consumption are given in table 11. Since many services are excluded from personal consumption, food supplies account for the largest share of consumer spending. Although their share has decreased steadily, from 61.0 percent in 1966 to 50.42 percent in 1989, it remains high. The share of light-industry products also went down, but within that category the share of spending on clothing rose from 7.40 percent in 1966 to 8.38 percent in 1989, and on knitwear, from 3.68 percent to 4.47 percent.

National income began to be computed by oblast only

TABLE 12
National income in 1989 by oblast, the city of Kiev, and the Crimea in real prices (ranked by NIP;
personal consumption as % of total consumption in parentheses)

Oblast	National income produced		National income utilized (in %)	
	in billion rubles	rubles per capita	Total consumption	Savings and other expenditures
Ukrainian SSR	108.91	2,104	79.4 (69.8)	20.6
1. Zaporizhia	5.54	2,655	74.0 (65.4)	26.0
2. Kiev (city only)	6.46	2,471	90.0 (72.2)	10.0
3. Dnipropetrovske	9.45	2,428	85.2 (75.4)	14.8
4. Kharkiv	7.64	2,390	82.4 (72.0)	17.6
5. Poltava	4.14	2,357	78.8 (68.4)	21.2
6. Odessa	6.06	2,296	75.9 (65.5)	24.1
7. Sumy	3.27	2,287	77.9 (70.3)	22.1
8. Lviv	6.11	2,221	76.8 (68.5)	23.2
9. Chernihiv	3.07	2,171	73.9 (66.4)	26.1
10. Kiev	4.01	2,065	70.8 (62.0)	29.2
11. Kherson	2.57	2,064	69.7 (63.7)	30.3
12. Cherkasy	3.10	2,024	78.2 (70.6)	21.8
13. Kirovohrad	2.47	1,994	71.2 (64.3)	28.8
14. Donetsk	10.54	1,976	83.4 (73.6)	16.6
15. Luhanske	5.59	1,951	89.6 (78.9)	10.4
16. Mykolaiv	2.56	1,917	79.9 (71.2)	20.1
17. Zhytomyr	2.94	1,904	72.6 (65.1)	27.4
18. Vinnytsia	3.62	1,878	75.4 (67.7)	24.5
19. Volhynia	1.98	1,861	68.6 (62.5)	31.3
20. Chernivtsi	1.72	1,835	72.5 (65.2)	27.5
21. Ivano-Frankivske	2.59	1,816	83.1 (74.0)	16.9
22. Ternopil	2.12	1,815	73.2 (65.1)	26.8
23. Crimea	4.50	1,813	83.5 (71.9)	16.5
24. Khmelnytskyi	2.75	1,801	77.6 (70.3)	22.4
25. Rivne	2.11	1,801	75.8 (68.4)	24.2
26. Transcarpathia	2.00	1,597	83.5 (73.7)	16.5

in 1988 (see table 12). Analysis of the figures must take into account that the NIP has been influenced by uneven shares of the turnover tax and subsidies; the coal subsidies to Donetsk and Luhanske oblasts, for example, lowered their figures. In contrast, the NIU of the Crimea and Kiev City was exaggerated, because many people from other oblasts purchased goods there (see table 12).

Unfortunately, no comparative data on the gross internal product (GIP) are available. But use of the per capita comparative data for Hungary and the former USSR, and then for Hungary and other countries, gives rise to the inference that in 1985 the per capita GIP of Ukraine was one-quarter that of the United States and Canada, and that the per capita personal consumption was about one-fifth. Since then the figures have become even smaller.

National minorities. Distinct groups of the population in a state that differ from the dominant nation in their language and culture and express a desire to form a national community. The term 'national minority' is largely European in usage. It usually signifies a group that lives in compact settlements or has inhabited a territory for centuries. Numerous border changes connected with the growth of large European empires often produced national minorities. Their political and legal conceptualization emerged in the 19th century, although some earlier international accords guaranteed the rights of religious and ethnocultural groups. Because for several centuries Ukrainians did not have their own state, and Ukrainian ethnographic territories were part of large empires, Ukrainians were during that time treated as a national minority in their own homeland. Only with the establishment of a Ukrainian state in 1917 were Ukrainians recognized as a nation with a defined territory.

The tsarist regime did not consider Ukrainians in the Russian Empire a separate nation, and denied them the limited cultural and national rights granted to the Baltic, Polish, and Moslem nations in the empire. In the Austro-Hungarian Empire, in contrast, Ukrainians were recognized as a distinct nation, and shared in the rights established by the empire's multinational policies. Ukrainians living in territories in the Hungarian part of the empire were, however, discriminated against.

After the First World War Western Ukraine was divided among Poland, Rumania, and Czechoslovakia, and the

Western Ukrainians became national minorities in those states. In 1933 there were 6.2 million Ukrainians in Poland, 1.2 million in Rumania, and 600,000 in Czechoslovakia. Over 40,000 Ukrainians lived in Yugoslavia. Unlike the Ukrainian immigrants in Western Europe and the Americas, Ukrainians living in the Eastern European states formed compact settlements. Moreover, in Poland, Rumania, and Czechoslovakia they constituted majorities in the territories they inhabited, and considered those territories their ancestral lands.

Poland, Rumania, Czechoslovakia, and Yugoslavia were bound by international treaties to respect the linguistic, educational, religious, and political rights of their national minorities. The Treaty of *Versailles (1919) bound Poland in that respect, and the treaties of *St-Germain (1919), Neuilly (1919), and Sèvres (1920) bound Rumania. Czechoslovakia and Yugoslavia were committed to such policies by the Treaty of St-Germain. Poland had special obligations to protect the rights of its Ukrainians and Belarusians under the terms of the Peace Treaty of *Riga (1921), concluded with the RSFSR and Ukrainian SSR; it was also bound to grant Galicia regional autonomy and to recognize the political and cultural rights of the Ukrainians by decisions reached at the 1923 Conference of Ambassadors. Czechoslovakia, in addition to guaranteeing the rights of all national minorities, committed itself to granting territorial and administrative autonomy to the Ukrainian national territory of Transcarpathia (Subcarpathian Ruthenia). Both Poland and Czechoslovakia included the provision of minority rights in their legislation. Overall, however, only Czechoslovakia to some extent honored its obligations, by granting Ukrainians living on a limited territory distinctive administrative status. That was far short of the autonomy envisaged by the Treaty of St-Germain. Far worse violations of international accords were committed by Poland, which refused to respect its own legislation of 1922 granting Galicia provincial self-government, and in 1934 openly abrogated international provisions for the protection of national minorities, with the claim that such protection was an internal matter. Similarly, Rumania reneged on its commitment to protect its national minorities, and in a 1938 government decree it excluded national minorities from the protection and guarantees of the conventions of the League of Nations.

Protection of the rights of national minorities in the interwar period was a concern of the *League of Nations. It established its Minorities Commission to receive petitions from aggrieved minorities, and the Council of the league was empowered to create committees to investigate problems and work out a basis of settlement. Representatives of the Ukrainian minorities in Poland, Rumania, and Czechoslovakia filed petitions with the commission, but the league lacked the authority and the mechanisms to deal with them effectively. Apart from giving publicity to minority grievances, it produced no concrete results.

The treatment of Ukrainian national minorities varied in the interwar period. Under Polish rule the Ukrainians of Galicia had more rights than the Ukrainians of Volhynia, and the Ukrainians of Polisia, the Kholm region, and Podlachia had virtually no rights. The Czechoslovakian government separated the Prešov region from the province of Subcarpathian Ruthenia and incorporated it into Slovakia. Under Slovak rule the Ukrainians were subject to highly discriminatory policies. Under Rumanian

rule the Ukrainians of Bukovyna and Bessarabia were denied elementary rights. The Ukrainians often joined forces with Poland's, Czechoslovakia's, and Rumania's other national minorities to defend their interests. In Poland, for instance, Ukrainians formed electoral blocs in the 1922 and 1928 elections with the Jews, Germans, Lithuanians, and Belarusians.

Border changes after the Second World War radically altered the fate of the Western Ukrainians. Most of them now lived in territories annexed by the Ukrainian SSR. Significant Ukrainian minorities, however, remained in Czechoslovakia (the *Prešov region) and Rumania (the *Maramureş region), where they continued living in compact settlements in what were historically Ukrainian ethnographic territories. In Poland Ukrainians were deported from their traditional homelands in the Lemko and Sian regions (see *Operation Wisła) and were dispersed throughout parts of western and northern Poland annexed from Germany.

In the postwar period international agreements for the protection of national minorities lost the little force they had had. Only Rumania was obliged under the terms of the 1946 Paris Peace Conference to treat its national minorities fairly. Equitable treatment of national minorities was increasingly rooted in concepts of human rights, and the constitutions of the newly established socialist regimes in Eastern Europe included declarations on respecting the cultural and linguistic rights of their national minorities. In practice, however, those regimes paid scant attention to such rights and discriminated against their minorities. Communist Czechoslovakia and Yugoslavia had the most liberal policies toward their minorities and granted Ukrainians official minority status and attendant rights. Poland (especially until 1956) and Rumania pursued the most discriminatory policies. The new Eastern European governments that in 1989 and 1990 replaced the communist regimes have committed themselves to respecting minority rights.

With the establishment of Ukrainian statehood in 1917, the Central Rada and UNR and Hetman governments pursued liberal policies toward Ukraine's national minorities. In July 1917, 25 percent of the seats in the Central Rada were allocated to three of Ukraine's principal minorities, the Russians, Jews, and Poles. Those groups were also represented in the Rada's General Secretariat and all UNR ministries. All laws promulgated by the Central Rada were published in the languages of those minorities. The Rada's Third Universal recognized the rights of national minorities to free national and cultural development. A statute granting *national-personal autonomy was adopted on 22 January 1918 and later incorporated into the UNR Constitution. The turbulent revolutionary period and the wars of 1918–20 allowed for only a partial implementation of such rights. The Jewish and Polish national minorities managed to organize their own briefly functioning national conventions and secretariats. The Russians in Ukraine, however, refused to recognize Ukrainian independence and resisted the idea that they were a national minority. Under the Hetman government they tried to reassert their dominance. The chaos of 1919–20, which resulted in *pogroms against Jewish communities, did much to cloud the positive record of 1917–18.

The Western Ukrainian National Republic of 1918–19 also adopted legislation guaranteeing the free develop-

ment of its national minorities and the protection of their educational and cultural institutions.

With the consolidation of Soviet Ukraine in 1920, Ukrainians formally ceased to be a national minority there. In practice, however, until the mid-1920s they were treated as such in the Bolsheviks' *nationality policy. From the mid-1920s on, after the adoption of *Ukrainization policies, the designation of national minority in the Ukrainian SSR was applied to non-Ukrainians. According to the 1926 Soviet census the minorities numbered 5.4 million, or 19.2 percent of the total population of the republic. Russians constituted the largest group (2.3 million, or 8.4 percent of the population); they were followed by Jews (1.6 million, or 5.6 percent), Poles (461,000, or 1.6 percent), Germans (376,000, or 1.3 percent), and Rumanians (258,000, or 0.9 percent).

Soviet policies toward national minorities in Ukraine at first focused on propaganda and the organization of support for the regime among the groups. Bureaus or sections of the CC CP(B)U and gubernial Party committees were established to carry out propaganda in Yiddish, Polish, German, and Rumanian. The Central Commission on National Minorities of the All-Ukrainian Central Executive Committee was created and was charged with ensuring the economic, cultural, and educational development of the national minorities, and with publishing propaganda in the minority languages. The People's Commissariats of Internal Affairs and Education established national-minority sections or bureaus at the central and local level. Newspapers and journals were published in the minority languages. Areas where minorities lived in compact settlements and represented a sizable proportion of the population were designated national raions and allowed to have organs of local self-government that functioned in the minority languages. Prior to 1930 there were 9 Russian national raions, 7 German, 3 Bulgarian, 3 Greek, 3 Jewish, and 1 Polish. In addition, the Moldavian ASSR, where Moldavians (Rumanians) constituted 30.1 percent of the total population, was created within Soviet Ukraine's boundaries in 1924. Outside the territories of the national raions, 1,097 national-minority soviets were created: 450 Russian (41 urban), 254 German, 156 Jewish (68 urban), 151 Polish, 14 Moldavian (outside the Moldavian ASSR), 12 Czech, 4 Belarusian, and 3 Albanian. There were also 28 courts where proceedings were held in various minority languages. In 1927, 2,616 of 18,412 elementary schools in Soviet Ukraine were minority-language schools: 1,310 were Russian, 496 German, 393 Jewish (Yiddish), 281 Polish, 69 Moldavian, and 44 Bulgarian; 23 other schools taught in the languages of other minorities. Soviet Ukraine's publishing industry also serviced the needs of minorities: in 1928, for example, out of 5,695 books published, 2,216 were in Russian, 96 in Yiddish, 77 in German, 50 in Polish, 38 in Bulgarian, and 12 in other languages.

The 1929 Constitution of the Ukrainian SSR guaranteed national minorities their own raions and rural soviets, the right to use their native language, and protection against discrimination.

In the 1930s, after the liquidation of the achievements of Ukrainization and during the Stalinist terror and offensive against Ukrainian cultural development, the rights of national minorities, except the Russians, were also violated. Their raions and village soviets were abolished, restrictions were placed on the publication of newspapers

and books in minority languages and on the school network, and the staffs of cultural and educational institutions serving the needs of the national minorities were purged. Institutions serving the Russian minority, however, were greatly expanded, and the Russians in Ukraine ceased to be considered a national minority and became a privileged group vis-à-vis the Ukrainian majority.

As a consequence of the Second World War and the incorporation of Western Ukraine into the Ukrainian SSR, Ukraine's *national composition changed dramatically. Most of the Jewish population had been annihilated during the Nazi occupation, Germans and Crimean Tatars were deported to the east by the Soviets, and many Poles were repatriated to Poland after the war. At the same time new significant minorities (eg, the Hungarians) emerged. In the postwar period *Russification was accelerated, and Russian became the dominant language, in the bureaucracy, mass media, and education, especially in urban centers. National minorities were encouraged to assimilate into Russian culture and were, as a rule, denied their own schools, newspapers, and theaters. Only schools for Hungarians, Rumanians, and Poles living in areas bordering on their home country were maintained, for purposes of foreign policy. In 1962 there were 144 Rumanian (Moldavian) schools (with 31,700 pupils), 96 Hungarian schools (20,100 pupils), and 3 Polish schools (6,000 pupils) in those areas.

The growth of the Ukrainian national movement and democratization of Ukrainian society that began in the late 1980s has resulted in a new emphasis on minority rights. The Popular Movement of Ukraine (Rukh) and other democratic Ukrainian organizations have actively campaigned in their favor, and new freedoms have allowed national minorities to establish their own organizations, publications, schools, and theaters.

Sizable Ukrainian minorities lived in the Russian Empire and in the USSR outside the boundaries of Ukraine. In the 1920s, during Ukrainization, the authorities tried to serve the cultural and educational needs of those communities. Ukrainian schools and institutions were established in the Kuban, Slobidska Ukraine, and even the Soviet Far East, and national-communist leaders, such as O. Shumsky and M. Skrypnyk, demanded protection of the national and cultural rights of Ukrainians living outside the republic. The Stalinist offensive against Ukrainian culture begun in 1933 resulted in the total liquidation of all Ukrainian institutions in the USSR outside Soviet Ukraine. Consequently, until the late 1980s, Ukrainians living in the USSR outside Ukraine (5.1 million in 1959, 5.9 million in 1979, 6.8 million in 1989 [V. Kubijovyč estimated the figure to be 8 million]) had no community infrastructures of any kind. In 1988–9, however, in connection with the general changes occurring in the USSR, those Ukrainian minorities began organizing their own community organizations. Among the most active are those in Lithuania and Moscow. Moscow's Slavutych club has launched a campaign to organize the sizable Ukrainian minority living in the Russian republic. Throughout 1989 and 1990 many new Ukrainian periodicals were established by the organizations, and Ukrainian-language instruction was begun in several centers, including ones in the Far East. The organizations have campaigned, with little success to date, for public policies to protect the rights of national minorities.

National Museum (Natsionalnyi muzei). A museum in Lviv, founded as a church museum in 1905 by Metropolitan A. Sheptytsky at his consistory. It was expanded, named the National Museum in 1909, placed under the authority of independent curators, and moved in 1911 to the building (bought by Sheptytsky) where it is currently housed. In 1939 to 1990 it was called the Lviv Museum of Ukrainian Art. The National Museum had departments of archeology, folk art, church antiquities, modern Ukrainian art, monuments of cultural history, numismatics, and sphragistics; a major library; and an invaluable collection of over 1,600 manuscript books, 2,400 early printed books, and more than 5,000 archival documents pertaining to the cultural and church history of Galicia.

The folk-art department boasted a valuable collection of 17th- and 18th-century kilims, Easter eggs, tapestries, and embroidery. The church antiquities department housed the largest extant collection of 14th- to 18th-century Galician icons, wooden engraved crosses, vestments, candelabras, chalices, and iconostases. The modern Ukrainian art department possessed works of 19th- and early 20th-century painters, such as A. Archipenko, M. Boichuk, L. Gets, M. Hlushchenko, M. Ivasiuk, I. Izhakevych, O. Kulchytska, T. Kopystynsky, F. Krasyt'sky, V. Krychevsky, K. Kryzhytsky, O. Kurylas, P. Levchenko, A. and V. Manastyrsky, P. Martynovych, M. and O. Murashko, O. Novakivsky, Nykyfor, V. Orlovsky, Yu. Pankevych, Yu. Pihuliak, M. Pymonenko, M. Rokytsky, T. Romanchuk, O. Shatkivsky, O. Skrutok, M. Sosenko, S. Svitoslavsky, S. Tomasevych, I. Trush, K. Ustyianovych, S. Vasykivsky, and M. Yablonsky, and sculptors, such as H. Kuznevych, M. Parashchuk, I. Severa, and P. Viitovych. The cultural history department housed portraits of notable figures of the 16th to 18th centuries, a collection of Shevchenkiana (including a self-portrait), and artifacts from the 1917–20 Ukrainian revolution. The library held 30,000 titles on Ukraine and Ukrainians, with a particular emphasis on art and museology. The collection of 14th- to 18th-century incunabula, books, and manuscripts includes the first printed works issued by S. Fiol and F. Skoryna, I. Fedorovych's *Apostol*, the *Zabludiv Psalter* (1569), the Kievan Cave Patericon (1703), various early maps and engravings, and Ukrainian and other Slavic manuscripts. These exhibits showed the development of Ukrainian ornamentation and book miniatures (eg, by O. and L. Tarasevych and N. Zubrytsky). The National Museum possessed over 80,000 objects. Under the longtime curator and director (1905–52) I. *Svientsitsky the staff were engaged in research, which was published in 16 vols of *Zbirky Natsional'noho muzeiu*, containing various archival catalogs and icons, oil printed books, and church art

The National Museum

and architecture, and in the journal *Litopys Natsional'noho muzeiu* (1934–9). The museum held close to 70 exhibitions.

Under Soviet rule, until 1990, it was called the Lviv Museum of Ukrainian Art; it had seven departments, including a Soviet art department (est 1947). Today it contains nearly 100,000 objects, including paintings by Y. Bokshai, M. Burachek, A. Erdeli, Z. Flinta, M. Hlushchenko, S. Hryhoriev, V. Kostetsky, O. Lishchynsky, V. Manastyrsky, L. Medvid, V. Patyk, M. Selska, R. Selsky, H. Smolsky, O. Shovkunenko, and T. Yablonska; graphic works by M. Derehus, S. Gebus-Baranetska, S. Karaffa-Korbut, V. Kasiian, Z. Ketsalo, O. Kulchytska, V. Kutkin, L. Levytsky, P. Obal, I. Ostafiichuk, O. Sakhnovska, I. Selivanov and H. Yakutovych; and sculptures by V. Borysenko, M. Brynsky, Ya. Chaika, Ye. Dzyndra, H. Kalchenko, D. Krvavych, E. Mysko, and V. Odrekhytsky. In the 1940s, the National Museum's historical, numismatic, sphragistic, and archeological collections were transferred to the *Lviv Historical Museum; part of its folk-art collection was transferred to the *Ukrainian State Museum of Ethnography and Crafts; and the collection of paintings by Western European masters was transferred to the *Lviv Art Gallery. In 1952 over 2,100 artworks and 4,500 books were confiscated as 'ideologically harmful' by local Party officials. Part of them were placed in **spetsfondy*; most were unlawfully destroyed, sold abroad, or misappropriated. Separate branches of the museum include smaller museums devoted to the life and work of O. Kulchytska (est 1971), O. Novakivsky (est 1972), L. Levytsky, I. Trush, and A. Manastyrsky, and there is also a branch in Chervonohrad. Its current director is A. Novakivsky. Several albums of art reproductions from the museum have been published, the most recent in 1987.

Nationalism. In the Ukrainian political consciousness of the late 19th century nationalism was usually equated broadly with national consciousness and patriotism. Over time it developed a significantly narrower meaning. Prior to the First World War and during the Ukrainian Revolution it was equated with an independentist mind-set. Then, in the 1920s, an ideological current emerged that adopted the name 'nationalism' and developed a political and literary movement around the concept. Since that time the idea of Ukrainian nationalism has centered around readily identifiable groups or parties.

Nationalism is defined differently in different political systems. In the USSR it was commonly labeled 'bourgeois nationalism,' a term used indiscriminately to smear national groups opposed to Russian centralism. Continuous repressions by the communist regime in its struggle against 'nationalism' actually inspired varying degrees of popularity for the concept, albeit without specific ideological, social, or constitutional-political content. In the earliest years of the Ukrainian SSR *national communism emerged in part as an attempt at securing a degree of independence for Ukraine from Moscow's rule (within the parameters of a Soviet political system). In Anglo-American terminology nationalism is a very broad concept. It includes national consciousness, the principle of national sovereignty, and the principle of national self-determination or liberation. By and large English-language literature on Ukraine considers nationalism to be the province not only of the fervent few, but of all patriots regardless of party affiliation. The term, however, generally used to differentiate a specific ideology of nationalism that pertains to a political movement from the wider understanding of patriotism or independentism is 'integral nationalism.'

Genesis and early development. M. *Mikhnovsky is commonly referred to as the father of Ukrainian nationalism, although that designation is not entirely accurate. Mikhnovsky was one of the cofounders of modern Ukrainian independentist thought, but the historical and legal underpinnings of his ideology (such as a project for the restoration of the 'Pereiaslav Constitution') were foreign to the tenor of later integral nationalism, which cared little for constitutional or legal argumentation. The same is true for such prerevolutionary proponents of independentism as Yu. Bachynsky, I. Franko, V. *Lypynsky, and L. Tshelsky (and even D. *Dontsov in his early writings).

Integral nationalism emerged only later in reaction to the events of the Ukrainian struggle for *independence. It first appeared in the 1920s as the spiritual ferment of a young generation protesting the collapse of Ukrainian statehood and searching for direction in the postwar world. The first attempts at establishing nationalist organizations came out of student circles in Galicia and the emigration – the Group of Ukrainian National Youth

(Prague), the *League of Ukrainian Nationalists (Poděbrady), and the *Union of Ukrainian Nationalist Youth (Lviv). The *Ukrainian Party of National Work, led by Dontsov, D. *Paliiv, and V. *Kuzmovych, and its organ *Zahrava* (1923–4) had nationalist leanings. It was the publicist Dontsov who finally crystallized Ukrainian nationalist ideology, particularly with his widely influential work *Natsionalizm* (Nationalism, 1926). Other major ideologists of the movement, whose works commonly appeared in the Prague-based *Rozbudova natsii*, included D. *Andriievsky, V. *Martynets, M. *Stsiborsky, and Yu. *Vassyian.

The *Ukrainian Military Organization (UVO) was established in 1920 by a group of former officers of the Sich Riflemen (Ya. *Chyzh, Ye. *Konovalts, V. *Kuchabsky, M. *Matchak, A. *Melnyk, R. *Sushko, Ye. *Zyblivych, and others) and Ukrainian Galician Army (Yu. *Holovinsky, O. *Navrotsky, M. *Saievych, O. *Senyk, and others). In 1929 the UVO joined ranks with the rising generation of young nationalists to create the *Organization of Ukrainian Nationalists (OUN) under the leadership of Konovalts. From that time the OUN served as the vanguard of the nationalist movement, which now had a broader base and included a large number of supporters.

Ideology. Integral nationalists professed themselves to be the harbingers of an 'idealistic' worldview, which they understood not only as the antithesis to the materialist philosophy of Marxist-Leninism but also as a remedy for the positivism of leading figures of Ukrainian democratic thought (including V. Antonovych, M. Drahomanov, I. Franko, and M. Hrushevsky). In their search for causes of the failure of the Ukrainian revolution of 1917–21 nationalists became convinced that the masses had sought an independent state but had been frustrated and disillusioned by weak governmental leadership. Criticism of individual failings grew into a systematic rejection of the democratic and socialist principles that had been the hallmark of the Ukrainian national movement in the late 19th and early 20th centuries. The humanist traditions of the prerevolutionary Ukrainian leadership were characterized as naive and lacking in national conviction. Nationalists believed that their era demanded new forms of revolutionary action that could match the ruthlessness and determination shown by Ukraine's enemies.

The nationalists insisted on the primacy of will over reason, action over thought, and practice over theory. Their doctrine of nationalism was infused with aspects of the irrational, voluntaristic, and vitalistic theories popularized in Western Europe by such philosophers as H. Bergson, F. Nietzsche, G. Le Bon, G. Sorel, and O. Spengler. In the place of objective scientific discovery the nationalists propagated myths and favored an ideologically 'correct' image of the Ukrainian past. They promoted a cult of the struggle and reverence for national martyrs with the building of ceremonial grave mounds and commemoration of anniversaries, such as that of the Battle of *Kruty.

The nationalist worldview also embraced a form of ethical idealism that spurned individual happiness (in the eudaemonic sense) and celebrated the heroic virtues of courage, fidelity, and self-sacrifice. That idealism was in keeping with a pragmatic relativism in regard to traditional moral values, which were subject to the demands of political expediency – as, for example, in the end's justifying the means. Some publicists even openly advocated

Machiavellianism. The nationalists sought to develop a new type of Ukrainian – a ‘strong man’ of ‘unbending’ character, fanatically devoted to the ideals of the movement and ready to sacrifice self and others for the cause.

The nationalists regarded the nation as the ultimate ideal. One of the resolutions of the 1929 Congress of Ukrainian Nationalists stated: ‘The Ukrainian nation is the starting point for all activity and the end goal of every undertaking by a Ukrainian nationalist; the nation is the highest form of human society.’ Integral nationalism rejected political values that did not relate to the national interest. In contrast to the majority of those involved in creating the first modern Ukrainian state, who viewed national independence in the context of universal notions of liberty and justice, integral nationalists considered international relations as a ‘struggle for existence’ that was decided purely by force. They believed that a continual succession of sabotage and terrorist actions would prevent foreign powers from entrenching their control over Ukrainian lands and keep the masses in a constant state of revolutionary fervor. Such individual revolutionary deeds would eventually blossom into full-blown national revolution that would culminate in the rebirth of a Ukrainian state. They were vehemently opposed to the existing political order in Ukrainian lands under the USSR. Within the interwar Polish state they rejected any attempts at furthering the Ukrainian cause through so-called organic or evolutionary methods of political action and had a poor opinion of attempts at ‘realpolitik.’ Those efforts were judged as ‘opportunism’ or ‘minimalism,’ and were countered with statements of the need for ‘principalism.’

Ukrainian integral nationalism resembled a totalitarian movement. The all-encompassing character of the movement was reflected in the complete and unqualified submission of its followers to nationalist ideology and organizational discipline. The movement did not restrict itself to political affairs, but sought to control cultural matters also, particularly in regard to literature, which was considered an important means of shaping society’s worldview. The nationalist milieu produced a literary school known as the Visnykivtsi (around Dontsov’s **Vistnyk*) that included such writers as B. *Kravtsov, Ye. *Malaniuk, L. *Mosendz, O. *Olzhych, U. *Samchuk, O. *Teliha, and Yu. *Lypa. Nationalists rejected the concept of independent esthetic criteria and opposed ‘art for art’s sake’ with calls for an engaged literature. Nationalists also sought to extend their influence over the Ukrainian institutions and organizations outside the USSR – in effect, to bring all community activity under the control of their movement. They were ill disposed to other political parties, camps, and centers, and their occasional co-operation or agreements with them were commonly tactical in nature.

Nationalist doctrine devoted little attention to socio-economic problems, but certain tendencies were evident. Its hostility to socialism was clear and unequivocal. Moreover the nationalists did not differentiate between the totalitarian communist and democratic variants of socialism: they presented Ukrainian socialist democratic parties (such as the Galician radicals) as demi-communists. They rejected liberal capitalism but were markedly supportive of the co-operative movement (as reflected in Stsiborsky’s *Natsiokratia* [Natiocracy]). Some nationalist publicists propagated the doctrine of so-called national

solidarism, the exact formulation of which remained rather vague.

Political program. The political order of the future Ukrainian state was to consist of a one-party system and would be based on a principle of supreme leadership (*vozhdym*). There would be only one political organization (OUN), which would consist of a supraclass of ‘better people.’ The state structure would be formed from a hierarchy of leaders under the supreme leader (*vozhd*), who would function both as leader of the movement and head of state. Propaganda and educational materials for young cadres would consistently underline the role and authority of the leader. Konovalts and then Melnyk and S. *Bandera were accorded a kind of charismatic aura. A type of populist ‘demophilia,’ marked by the idea of ‘the will of the masses’ as the ultimate authority, also entered nationalist thinking.

The nationalists mastered successful methods of mass organization and inspired large numbers of people to action through emotional appeals. They gained influence in various segments of society, including the poorer peasantry and young tradespeople (notably in Lviv). The movement’s leading cadres in Galicia in the 1930s consisted largely of students.

The motivating factor of Ukrainian nationalism was the pathos of the Ukrainian liberation struggle. Its main success lay in its ability to arouse dynamism in postrevolutionary Ukrainian society and to secure the continuation of the independence struggle after the failure to maintain statehood. The closest relatives of Ukrainian nationalism were not German Nazism and Italian fascism, which were the product of industrialized and urbanized societies, but similar ideologies of parties among agrarian peoples in less-developed countries of Eastern Europe, including the Ustaše (Ustashi) of Croatia, the Rumanian Iron Guards, the Slovak L’udaks (supporters of A. Hlinka’s Slovak People’s party), and the Polish National-Radical Camp. Ukrainian nationalism was a uniquely generated phenomenon, although its development was decisively influenced by foreign models. The Ukrainian movement also adopted certain symbolic paraphernalia (such as forms of greeting). Racist theory, in particular anti-Semitism, was not an intrinsic part of Ukrainian integral nationalism, although in the 1930s some publicists touched on anti-Semitic themes, and others began to examine the issue of the ‘Ukrainian race.’

The origins and development of Ukrainian nationalism were particularly influenced by the dire political circumstances of the Ukrainian people in the 1920s and 1930s. Stalinist policies in the USSR threatened the very physical existence of the Ukrainian people, and under Polish domination the Ukrainian population was shut out from positions of authority and subject to arbitrary rule. That situation was compounded by the poor economic conditions prevalent in Western Ukraine – general economic stagnation, rural overpopulation, and high unemployment among the intelligentsia. The conditions undermined faith in legal efforts to produce change, radicalized the general population, and gave credence to extremist tendencies. The obvious crisis that beset many European parliamentary democracies at that time also undermined the prestige of democracy among the Ukrainian citizenry. Ukrainians obviously could not support the post-Versailles status quo, and they sympathized with revisionist

tendencies. In spite of their credo to rely on their 'own strengths,' Ukrainian nationalists looked to Germany for support in their cause; certain circles in the Reich, in turn, encouraged those expectations and calculations.

1929–39. From the founding of the OUN to the outbreak of the Second World War nationalism grew to become the most dynamic political force in the Ukrainian world outside the Soviet Union. It managed to transcend regional boundaries and extend its influence among Ukrainians in Poland, Rumania, and Czechoslovakia, among the political émigrés in Western Europe, and even among those in North America. It nevertheless remained centered in Galicia and, despite repeated efforts, did not manage to spread into Soviet Ukraine.

Nationalist doctrine stressed the need to wage a revolutionary struggle against all occupiers of Ukrainian lands, but until 1939 OUN-directed sabotage and terrorism was focused exclusively against Poland. Anti-Russian action largely took the form of combating *Sovietophilism (regarded by nationalists as a new form of Russophilism) and assassinating Soviet diplomats.

The nationalist dynamic proved so strong that other currents in Ukrainian political life were willingly or unwillingly influenced by it. The effect was most strongly felt among supporters of the former Hetman state, who, despite the warnings of Lypynsky, increasingly began to change their conception of the Hetman from one of a constitutional monarch to one of a dictator. Some members of the UNR government-in-exile also began to lean in that direction. Nationalism even attracted some supporters from the ranks of the Ukrainian National Democratic Alliance (UNDO). Nationalist ideology was not actively opposed by the Greek Catholic church. Some younger priests were even active members of the movement; a group of 'Christian nationalists' (K. *Chekhovych, V. *Hlibovytsky, and others) emerged from their ranks.

All the same, nationalism did not go unchallenged. In the 1930s Paliiv established a party known as the *Front of National Unity that espoused 'creative nationalism' (formulated by M. *Shlemkevych) and hoped to compete ideologically with the OUN. Others who opposed integral nationalism on ideological grounds included Galician radicals and social democrats (K. *Kobersky and V. *Starosolsky), some national-democrats (S. *Baran, M. *Rudnytska), some Catholic activists (O. *Nazaruk), and supporters of the democratic traditions of the UNR in Prague (I. Mazepa, P. Federenko). Moreover the revolutionary nature of integral nationalism made it, by definition, inimical to UNDO (the mainstream Galician Ukrainian political party) as a whole and brought it into conflict with the Ukrainian Catholic authorities, notably Metropolitan A. Sheptytsky.

Neither the criticisms of other Ukrainians nor the repressions of the Polish authorities could stem the growth of nationalism. Nevertheless the movement itself had begun to show signs of internal crisis by the 1930s. The OUN, simultaneously an underground army and a political movement (even an unofficial party), was hard-pressed to reconcile the imperative of strict organizational discipline and secrecy demanded by its revolutionary posture with the need to generate mass appeal as a political movement: mass participation rendered the organization vulnerable to penetration by informers and provocateurs. Many nationalists also found it difficult to discriminate between

the tactics and methods used to combat the 'occupational regime' and the way in which they dealt with their Ukrainian political opponents. The moral and political capital amassed in the struggle against an external enemy became the basis of efforts to establish their hegemony over Ukrainian civic life. Internal political motivations, conscious and unconscious, came to influence OUN strategies. A new social type now emerged in Western Ukraine, the 'professional revolutionaries,' who were usually motivated by the noblest ideals but commonly exhausted themselves and their potential contributions after several years of feverish activity.

The irrational underpinnings of integral nationalism confounded sober critical analysis and rendered perspective and appropriate decision-making, as well as the rectification of mistakes, very difficult. In the 1920s, nationalist groups were often centers of discussion and spiritual quest; by the 1930s the intellectual level of the nationalist environment had declined sharply. Young dilettante publicists self-confidently began tackling so-called global problems. Their writings were characterized by pathos, inflated rhetoric, and a penchant for poetic clichés drawn from the works of national bards or the articles of Dontsov. The aim of that kind of writing was to create an emotive atmosphere. Thus, while serving to strengthen the collective resolve of Ukrainians outside the Ukrainian SSR, nationalism lowered the level of Ukrainian political culture.

The Second World War. The war was the period of nationalism's greatest heights and most fundamental organizational and ideological crisis. With the Soviet occupation of Galicia and Volhynia in 1939 and the expansion of Nazi control over most of the European continent, the activity of other political parties and groupings in Western Ukraine ground to a complete halt. Only the nationalists continued to function. In Soviet-controlled territories they maintained their underground network, and under Germany they benefited (until 1941) from a semilegal status, even in Poland and Czechoslovakia. Three major developments influenced the subsequent development of Ukrainian nationalism: a schism in the OUN, the German occupation of Ukraine in 1941–4, and direct contact with eastern Ukraine and the Soviet system.

In 1940 the OUN broke into two hostile factions, the *Banderites and the *Melnykites. The conflict was the result of differences in personality and tactical preference. In many respects it was caused by a lack of understanding between émigré nationalist circles, who considered Melnyk to be the successor of Konovalets, and the more extremist elements on Ukrainian territory (headed by Bandera), who, motivated by their achievements in the armed struggle and by their personal suffering, sought the leadership of the organization. After their split into two factions in 1940, each continued to use the OUN name and claimed adherence to the same ideology. The schism not only weakened the capability of the nationalist movement to deal with external problems but also resulted in a bloody internecine struggle that compromised fundamentally nationalism's moral prestige.

The colonial policies of Nazi Germany's occupational authorities in Ukraine did not coincide with the foreign policy adopted by the nationalist movement. German unwillingness to enter into partnership with the Ukrainians, however, freed nationalists from roles comparable

to those played by the Croatian Ustaše or the Slovak L'udaks.

The Soviet annexation of Western Ukraine in the fall of 1939 meant a shift for the nationalists from an anti-Polish to an anti-Soviet orientation. It also opened the way to central and eastern Ukraine for the nationalist movement, which previously had been restricted to Galicia and Volhynia. The movement displayed extraordinary initiative and great daring in its dealings with a hitherto unknown Soviet reality, and the patriotism and self-sacrifice of its representatives attracted sympathy and trust as well as a desire by nationally conscious Ukrainians in those regions to participate in the cause. The movement's weakness in socioeconomic issues, however, and its streak of totalitarianism proved to be major stumbling blocks to greater popularity among a population whose experiences under the Soviet regime had given it a revulsion to any form of dictatorship.

Wartime proved to be the supreme test of the nationalist movement. Despite the movement's internal difficulties it was the strongest Ukrainian political force of the day, and it managed to lead a resistance movement against both a Hitlerite Germany and a Stalinist Soviet Union. In 1942–3 the resistance took concrete form in the *Ukrainian Insurgent Army, a body that kept alive Ukrainian aspirations to statehood in even the most adverse circumstances.

The forerunner of revisionist currents in OUN ideology was I. *Mityrynga, who had sought to make the nationalist movement deal with Soviet realities and turn its ideology more to the left. The process of ideological revisionism affected the various branches of the movement in different ways. Members of *OUN expeditionary groups that worked with the underground in central Ukraine were the most susceptible. The resolutions of the Third Great Congress of the OUN, held in 1943 (by the Bandera faction), and the platform of the Ukrainian Supreme Liberation Council (UHVR) of 1944 contained significant changes in ideology. Some of the fundamental revisions were the abandonment of compulsory idealism, and the toleration of pluralism both in the liberation movement and in the future Ukrainian state; the rejection of racism and ethnic exclusivity, and the recognition of the legal equality of all citizens of Ukraine regardless of ethnic background; and the adoption of a detailed socioeconomic program, which favored a mix of nationalized, co-operative, and private sectors. When it came to the question of the future political order, however, the changes offered were vague and inconclusive.

Postwar developments. The anticommunist underground in the Ukrainian SSR fought on until the early 1950s. Sources available in the West indicate that by that time the Ukrainian resistance movement, although tied to the earlier OUN, had completely purged itself of the characteristics of integral nationalism and had adopted democratic independentism. The writings of such publicists as P. *Poltava and O. *Hornovy in the late 1940s and early 1950s clearly illustrate such an evolution.

Emigré nationalism was still represented by the factions of the OUN, but there were now three of them. In the late 1940s a splinter group broke off from the Bandera faction because of the faction's apparent reversion to the old tenets of integral nationalism. The new group consisted of UHVR members and other OUN revisionists. The group,

which actually stepped outside the bounds of traditional nationalist organizations, was initially led by L. *Rebet and was known as the OUN (Abroad).

The Melnyk faction kept the OUN name after the war. By means of its work with other émigré parties in the Ukrainian National Council it proved that it had abandoned the old tenets of party exclusivity. The faction, right-wing and conservative but largely moderate in orientation, included most of the intellectuals of the nationalist movement. The traditional mentality and ideology of integral nationalism were best preserved in the emigration by the OUN Bandera faction.

Before the changes in Ukraine in 1991, as a political movement and an ideology Ukrainian nationalism could be active only in the emigration. Even in its splintered form it remained an explosive and vibrant force. It had great ideological difficulties, however, because of its confrontation with Western democracy, its inability to deal fully with the question of the political beliefs of Ukrainians in Ukraine, and its lack of contact with political processes there. Nevertheless it left an indelible mark on Ukrainian history, both as a sign of the people's life and as a revolutionary force in the struggle for self-determination.

Nationalist Organization of Ukrainian Students in Germany (Natsionalistychna orhanizatsiia ukrainskykh studentiv v Nimechchyni, or NOUS). A student umbrella organization centered in Berlin that co-ordinated the activities of Ukrainian émigré student societies and branches of NOUS in Central Europe in 1941–5. It succeeded the

*Union of Ukrainian Student Organizations in Germany and Danzig, which dissolved in the wake of the schism in the OUN in 1940. In 1944 NOUS had 662 members – 285 in Vienna, 46 in Graz, 135 in Prague, 83 in Berlin, 40 in Breslau, 23 in Danzig, 24 in Leipzig, and smaller numbers in Munich, Göttingen, Freiburg, Dresden, Innsbruck, and Leoben. Thirty percent of them were medical students, and 20 percent were technological students. In January 1945 NOUS changed its name from 'Nationalist' to 'National.' Its official organ was *Biuletyn NOUS-a* (15 issues, 1942–3). NOUS was headed by V. Rudko (1941–4) and Ye. Pyziur (1945–7). Notable members included A. Kozak, I. Lysiak-Rudnytsky, B. Plaskach, O. Pritsak, and B. Tsymbalysty.

Nationality policy. A government's treatment of nationalities in a multiethnic state. Soviet nationality policy determined Ukraine's national development and defined its relationship with the all-Union center in Moscow. The goal of the policy was to obliterate Ukrainian national identity and to subordinate Ukrainian to Russian interests.

The nationality policy of the USSR was referred to as the 'Leninist policy on the national question.' As recently as 1986 the CPSU Program claimed that 'the nationalities question, which was inherited from the past, has been successfully resolved in the Soviet Union,' implying that interethnic harmony and equality had been achieved, and that national allegiance had been subordinated to communist internationalism. In fact the Leninist approach was a strategy to suppress national consciousness. It has failed not only to eradicate national distinctions but even to overcome ethnic conflict.

Impressed by the revolutions of 1848, K. Marx and F. Engels realized the value of harnessing the growing aspirations of national groups in support of the proletarian socialist revolution. They advocated the 'self-determination' of nations but did not explain what would happen to nations after the revolution. Nor did they treat all nations as equals; nonhistoric nations, according to them, had no future. For F. Engels the question of national independence for the Ruthenians (Ukrainians) and other peoples was absurd.

V. Lenin inherited the Marxian conception of national consciousness as an epiphenomenon of the economic processes associated with the bourgeois period in history and as a propellant for the communist revolution. In addition he inherited a fundamental ambivalence toward nationalism: he spoke of it as secondary to the class struggle but treated it as a primary political force.

Lenin had little appreciation of the nationalism of the dominant nationality (the Russians), although from time to time he inveighed against its 'great-nation chauvinism.' He saw nationalism mainly as a response to prejudice and oppression. Once these were lifted, nationalism would disappear. Meanwhile it could be used to promote the revolution. His strategy for dealing with nationalism can be summarized in three rules: (1) before taking power, promise ethnic minorities self-determination and equality; (2) on assuming power, terminate the prospect of self-determination altogether and assimilate the minorities; and (3) the Party must be organizationally centralized and ethnically undifferentiated. This approach may appear opportunistic, but it is consistent with Lenin's understanding of nationalism.

Bolshevik promises of self-determination and the right

of secession for the various nationalities of the Russian Empire were critical to the outcome of the 1917 Revolution and the Civil War. But their implementation was conditional: if the interests of the proletarian revolution and the socialist state demanded it, self-determination for the national minorities would have to be set aside by the Party. Instead of appealing to the principle of voluntary association the Bolsheviks turned to military force to reassemble the Russian Empire, which they had sworn to dismantle. Having established their control of the former Russian Empire, Lenin and the Bolsheviks encouraged the 'flourishing' of national cultures, which they expected would then 'draw together.' It was assumed that important components of nationhood, such as language and statehood, were mere 'forms' that could be separated from the national content and filled with international and communist content. In 1925 J. Stalin introduced the concept 'national in form, socialist in content,' which has served as the cornerstone of Soviet cultural policy. Although equality of nationalities was enshrined in the Constitution of 1936, there was never any equality in real life. By its discriminatory nationality policy the Party imposed on Ukrainians and Belarusians the status of 'younger brothers' to the dominant Russians and promoted the assimilation of the various nationalities into the Russian culture.

In spite of considering language to be national in form, Stalin and his successors gradually reduced the language rights of minorities in the Soviet Union. Following the brief period of *indigenization or nativization of cadres and communications in the republics, the non-Russian languages were restricted first to their own territories. Then, in 1938, Russian was made a compulsory subject in the schools of the national republics. In 1958 N. Khrushchev permitted parents to decide whether their children would be instructed in their native language or in Russian. In L. *Brezhnev's Constitution of 1977 the right to education in one's native language was reduced to a mere 'opportunity.' As a practical consequence of this policy the percentage of Ukrainians in Ukraine claiming Ukrainian as their native language declined from 93.5 in 1959 to 89.1 in 1979 and 87.7 in 1989, whereas the use of Russian as the second language increased from 35.8 in 1970 to 51.8 percent in 1979. In 1988 one-half of Ukraine's schoolchildren were being taught in Russian. Increasing limitations on non-Russian languages resulted in a clear trend toward monolingualism.

The selection of the leadership of the national republics was left neither to chance nor to history. Appreciating the strategic value of nationalized cadres, Lenin believed that a national elite was essential to bring the masses of a given nationality into the socialist society, but that its power should be entirely cosmetic. Accordingly, in the 1920s and early 1930s the Party and government bureaucracy of the non-Russian republics was subjected to indigenization. In Ukraine the leading proponents of this policy (see *Ukrainization) were O. *Shumsky, M. *Khvylovy, and M. *Skrynyk. Beginning in 1928, however, Stalin reversed the policy and dispatched first L. Kaganovich, then P. Postyshev, and finally Khrushchev to Ukraine to destroy its national cadres. While all Union republics were affected, Ukraine was treated with special severity: its intellectual and cultural elite was wiped out in the terror, and its political cadres were decimated in the purges. Stalin's successors continued to distrust the native leadership of the national republics. To keep the native cadres under sur-

veillance the second secretary (in charge of cadres) in each republic was usually Russian. Members of national minorities in the armed forces were posted outside their homelands. The command of security and military formations was entrusted mostly to Russians. The 1961 CPSU Program endorsed the principle of 'exchange of cadres' between republics, thus discarding the facade of national leadership. In practice this exchange of administrative personnel was one-directional, and any murmur against its pro-Russian bias was treated as treasonous. From time to time the native cadres of the Party and state were purged for nationalism. In spite of these measures republican leaders, such as P. *Shelest, occasionally spoke up in defense of their native culture and language.

To obliterate national distinctions and create a homogeneous Soviet people the authorities manipulated national borders and resettled ethnic groups. Ethnically related peoples were split into separate nationalities. Boundaries of national republics were drawn to exclude significant irredenta as well as to include unrelated ethnic groups. Indigenes were deported, sometimes en masse (eg, the Volga Germans, Crimean Tatars, Chechens, Ingushi, Balkars, and Karachai), and nonindigenes, especially Russians, settled on their territories. According to Khrushchev, Stalin would have deported the entire population of Ukraine during the Second World War had he had enough boxcars. The so-called sovereign republics did not control their own immigration policies.

Given Lenin's flexibility and ambiguity on the issue, his successors might have pursued a subtle nationality policy varied in tempo and attuned to the state's needs. This was not the case. Except for the 1920s, when 'great-nation chauvinism' (ie, Russian nationalism) was identified as the chief danger, 'local nationalism' was held up as the gravest threat to the Soviet state. While pride and even interest in non-Russian traditions or history was branded as nationalism, the Great Russians were glorified for staging the revolution, building the USSR, and winning the war against A. Hitler. From the 1960s there was wide discussion on the 'growing together' (*sblizhenie*) and 'fusion' (*sliianie*) of nationalities and the development of a *Soviet people. The Russian language was singled out as the medium of inter-national communication and the key to scientific knowledge and higher culture. Rapid Russification was thus the order of the day under Khrushchev and, after a brief respite, under Brezhnev and his successors.

The failure of the Leninist nationality policy in the Soviet Union was not acknowledged officially until 1989. The policy had neither eradicated national distinctions nor established equality (political, economic, or social) or harmony among the nationalities of the USSR. In fact it had legitimized national identity by emphasizing language, symbols of statehood, borders, and institutions and had exacerbated ethnic resentments and hostilities by discriminating against the non-Russian nations and suppressing them. The various nationalities of the Union and their supreme soviets came to life in the wake of the 1989-90 elections, demanding sovereignty and then secession from the USSR. Adhering to the traditional centralist policy of the CPSU, M. Gorbachev offered the republics a new deal but resorted to small concessions to preserve the Union and the dominant position of the Russians. His efforts were superseded by the dissolution of the USSR in 1991.

Nationalization. A national government's act of assuming control or ownership over the means of production and other property. The terms of nationalization may vary from full compensation for the original owner to outright confiscation.

In the second half of the 19th century the socialist movement in Europe and in Ukraine demanded that the largest industries and banks be nationalized. There was little agreement within the movement on the extent of nationalization and on the degree of compensation to the former owners. During the 1917 Revolution the demand for nationalization as a means of asserting control over key sectors of the economy became widespread. The *Central Rada moved toward nationalizing certain sectors of the economy. In its Third Universal it abolished private land ownership by nonpeasants and empowered land committees to redistribute the lands concerned. The Fourth Universal and the Land Law of 31 January 1918 invested the Central Rada with supreme control over all land, abolished private ownership of land, and entrusted land committees with redistributing the land according to a consumption and labor formula. In their decrees the Central Rada and the Directory of the UNR proclaimed state and workers' control of production, trade, and banking but stopped short of full nationalization. Neither the Rada nor the Directory had the power to implement the acts, especially those dealing with industry and banking. In general, Ukrainian leaders accepted social democratic principles and intended to build a mixed economy.

Widespread nationalization without compensation was implemented by the Bolshevik regime in Ukraine. The policy was motivated in part by communist ideology, which rejected the market and money mechanism in deference to planning in terms of physical targets. It was also a response to the economic dislocation brought on by revolution and civil strife. The Provisional Government under A. Kerensky had established a centralized system headed by the Economic Council and its executive branch, the Supreme Executive Committee. After taking power the Bolsheviks transformed this committee into the Supreme Economic Council. V. Lenin toyed with schemes of a mixed economy and co-operatives until workers' control committees posed a political threat to the local Bolshevik-controlled soviets and compelled Lenin to nationalize industry, on 28 June 1918. Many of the measures taken by the Bolsheviks in Russia were applied automatically to Ukraine.

Industry in Ukraine began to be nationalized in Donetsk, in January 1918. Nationalization was carried out in stages and was not always orderly. In the first period *workers' control over many enterprises was asserted. Although encouraged at first by the Bolsheviks, that development was resisted later, and enterprises were placed under the control of regional soviets and organs of the state, such as the Supreme Council of the National Econo-

my of Ukraine. The various sectors of industry were not nationalized at the same time, and since Bolshevik power in Ukraine was unstable, not all areas were affected equally. By 1920, however, all the main branches of industry were owned by the state. The need for supplies during the struggle for Ukraine was a major factor in the Soviet government's decision to institute complete nationalization. By 1920, 11,000 enterprises, employing 82 percent of Ukraine's industrial workers, had become the property of the state. In 1939–40, when Western Ukraine came under Soviet occupation, all its industry was nationalized.

The first Soviet government of Ukraine, formed in December 1917, nationalized all land and allocated it for use by the peasantry. When collectivization was launched in 1929, the peasantry lost the right to individual use of the land. They retained the right to the use of small plots, which were the property of the state. The nationalization of land in Western Ukraine was implemented by the Soviet regime in 1939 and 1940.

Forests and all natural resources were nationalized in 1918 and, more extensively, in 1923. Similar measures were carried out in Western Ukraine in 1939–40. Banks and all other credit institutions were nationalized in Central Ukraine in 1919 and in Western Ukraine in 1939. All large retail and wholesale trade companies were nationalized as early as 1918.

During the period of the New Economic Policy small private enterprises (primarily in trade and commerce) were allowed to operate. In 1925–6 private capital in Ukraine accounted for only 6 percent of the total industrial output and 23 percent of trade. With the introduction of the First Five-Year Plan the drive to nationalization was resumed. Since the 1930s private ownership in the USSR has been restricted to housing and to articles of personal use.

In the few years before the dissolution of the USSR, the economic crisis spurred efforts to revive private property. In 1990 a law establishing the right to private property was under consideration, and private companies, called co-operatives, were encouraged by the government. The sale of nationalized industry to its employees, and of smaller retail concerns to private individuals, was being contemplated. But the denationalization of the economy failed to materialize before the USSR ceased to exist.

B. Krawchenko

National-personal autonomy. The right to self-government of national minorities in Ukraine, recognized in the legislation of the UNR and put into practice to some extent during the period of Ukrainian independence in 1917–20. This autonomy was based not on the territorial principle but on the nationwide association of all the members of a given minority. Minority members gained cultural national rights as a group, regardless of where they lived. These rights included primarily the right to have laws published in the minority's language (Yiddish and Polish), the right to enjoy state support for religious and educational institutions, limited veto rights with respect to all laws impacting on the minority, and the right to have the minority's language appear on the state currency. This solution of the nationality question in multinational states was developed by the Austrian socialists O. Bauer and K. Renner before the First World War and was generally favored by Jewish political parties (especially

the Folkspartey and Faraynigte) and Ukrainian socialist circles.

The All-Ukrainian National Congress on 19–21 April 1917 recognized the rights of national minorities in Ukraine. After representatives of the Russian, Polish, and Jewish communities joined the Central Rada in July 1917 and a general secretariat of nationalities, with undersecretaries for Jewish, Polish, and Russian affairs, was formed (see General Secretariat), work on an autonomy law was begun. The Third Universal (20 November 1917) of the Central Rada unequivocally endorsed the concept of national-personal autonomy and called for legislative proposals to define the concept. Finally, on 24 January 1918, the Little Rada passed, together with the Fourth Universal, the Law on National-Personal Autonomy. It granted all the minorities of Ukraine (referred to in the law as 'nations') the right to govern, through national unions, their own affairs in the spheres of culture and community organization. This right was granted to the Jewish, Russian, and Polish minorities. The Belarusians, Czechs, Rumanians, Germans, Tatars, Greeks, and Bulgarians could also gain this right by presenting a petition signed by at least 10,000 members of the given nationality to the General Court.

The law provided for the compilation, on a voluntary basis, of national registers listing the members of each national union. The national unions had the right to elect their own autonomous organs: a constituent national assembly, national councils, etc. All of these autonomous organs were to be state organs of the UNR. The national unions were to be funded by the state and by taxation of their members. This law eventually became an integral part (sec 7) of the Constitution of the UNR (28 April 1918).

According to the Law on National-Personal Autonomy, a hierarchy of institutions for minority self-government was to be established. Only the Jewish community undertook to organize the full system of self-government; the Russians and Poles merely established national ministries. Before a Jewish constituent assembly was called, an advisory 50-member Nationality Council, based on equal representation of major Jewish political parties (Bund, Poale-Zion, Zionists, Faraynigte, and Folkspartey), was created (10 October 1917) under the Department (later Ministry) of Jewish Affairs. When the Bolsheviks occupied Kiev (February 1918), all Jewish institutions were abolished. They were renewed when the UNR government returned to Kiev.

The Hetman government under P. Skoropadsky did not favor minority rights, and on 9 July 1918 it rescinded the Law on National-Personal Autonomy. But the Jewish minority set up its representative bodies and convened the Zionist-dominated Provisional Jewish Parliament in early November 1918. The UNR Directory restored the Law on National-Personal Autonomy (10 December 1918), but only for the Jewish minority; the Polish and Russian minorities were excluded. Jewish government organs were abolished again in Kiev when it was captured by the Bolsheviks in March 1919, but they continued to function until November 1920 in territories held by the UNR Army.

Because of shifting fronts and political instability, national-personal autonomy could not be fully implemented in Ukraine. Nonetheless, this was the first serious attempt to resolve the problem of international relations in a multinational state. In the 1920s a similar policy was followed by Latvia, Lithuania, and Estonia.

Natsionalist

Natsionalist (Nationalist). An organ of the *Organization for the Rebirth of Ukraine. It began to appear in June 1935 as the continuation of **Vistnyk ODVU*. It was published weekly in Philadelphia and then New York and edited by T. Svystun and V. Dushnyk. In 1939 its name was changed to *Ukraina*. The journal continued to come out weekly and then monthly in the early 1940s.

Natsional'na dumka (National Thought). A monthly organ of the *Group of Ukrainian National Youth, published in Prague from April 1924 to December 1927. Partly financed by the *Ukrainian Military Organization from 1926, it was the first periodical to espouse a radical nationalist ideology. Its editors were I. Gyzha, M. Konovalts, S. Nyzhankivsky, I. Olkhovy, O. Boidunyk, O. Babii, V. Martynets, and O. Boikiv. Contributors included Yu. Vassyian, V. Galan, O. Hrytsai, R. Sushko, M. Omelianovych-Pavlenko, A. Kravs, and D. Andriievsky. The journal was succeeded by **Rozbudova natsii*.

Natsional'na trybuna (National Tribune). A weekly newspaper published in New York since 1982; the unofficial organ of the *Ukrainian Congress Committee of America. It contains American and international news and articles about Ukrainian life in the United States, Ukraine, and elsewhere. The paper has a circulation of approx 5,000.

Natural gas deposits. In Ukraine natural gas deposits are located in three petroleum-and-natural-gas-bearing regions, the Carpathian, the Dnieper-Donets, and the Black Sea-Crimean-Caucasian. The Carpathian region, which has the longest history of gas extraction, extends along the northeastern flank of the Carpathian Mountains. Gas deposits located mostly along the northeastern (platform) side of the inner zone of the Subcarpathian Depression constitute what is known as the Subcarpathian Petroleum and Natural Gas Region. Overlain in places by the Stebnyk Nappe, the deposits are found in lenses and

layers of sandstone between impervious layers of Miocene clays (at depths of 100–1,200 m), in Upper Cretaceous sandstones (1,200–2,600 m), and in Upper Jurassic porous limestone (2,600–4,800 m). Gas deposits are concentrated in three zones of accumulation, the Rudky-Liubachiv zone (which includes the Rudky natural gas field), the Dashava zone, and the Kosiv zone. In 1986 there were 29 gas deposits, producing either dry gas or gas with small admixtures of heavier hydrocarbons. In addition there were eight deposits producing a mixture of petroleum and gas.

Recent exploration in the Volhynian-Podolian subregion of the Carpathian region has revealed the presence of petroleum and natural gas around the eastern perimeter of the Lviv-Volhynia Coal Basin, where natural gas was released from Paleozoic formations at depths ranging from 1,600 to 8,000 m. At present gas is being exploited from a small deposit east of Novovolynske.

The Dnieper-Donets region contains the largest and the most productive (since 1958) gas deposits in Ukraine. The fields were discovered in the early 1950s and had entered production by mid-decade. Gas deposits, as well as gas-petroleum deposits, are located within a graben about 150–200 km wide and 800 km long that extends northwest to southeast through the central part of the Dnieper-Donets Trough. It contains over 60 gas and gas condensate deposits in Jurassic, Triassic, Permian, and Carboniferous sandstones, at depths of 940 m to over 5,000 m. The petroleum deposits tend to be located in the northwestern half of the graben (mostly west of Poltava), whereas the gas deposits are concentrated in the eastern half, along the central axis of the graben. Gas-petroleum deposits (nearly 40) are commonly found in intermediate locations (around Poltava and westward toward Pyriatyn). The largest commercial natural gas deposit, Shebelynka (now virtually exhausted), is located in the central axis of the graben southwest of Kharkiv. Other major deposits along that axis include those at Radchenko Khutir and Sahaidak in the west (near the Sula River, both associated with petroleum), Runivshchyna, Kehychivka, Spivakivka, and Yefremivka in the middle (southwest and south of Kharkiv), and Khrestyshche (near Slovianske) and other deposits near Luhanske in the east.

The Black Sea-Crimean-Caucasian region is associated with the Black Sea Depression. A fragmented graben extends along the east-west axis of the depression from just north of the Danube Delta, under the northwest embayment of the Black Sea, through the northern part of the Crimea, and then under the Sea of Azov to the Kuban Lowland. It contains most of the deposits of natural gas in the region. Small quantities of natural gas were tapped on estates before the Revolution of 1917 near Melitopil and Pryozivske. Large-scale commercial developments occurred only after the Second World War (since 1954 in Krasnodar krai and since 1966 in the Crimea).

In the Crimea the main gas fields are concentrated on the Tarkhankut Peninsula (northwest of Yevpatoria) in the Lower Cretaceous deposits along the southern edge of the Tarkhankut Graben at depths of 100–4,600 m. Moreover, there are several small deposits to the east, along the graben at Dzhankoi and under the Arabat Spit south of Henicheske. Recent exploration has also uncovered offshore deposits west of Cape Tarkhankut in Tertiary and Cretaceous rocks. Small quantities of associated gas are

found with oil in the Miocene limestones of the Kerch Peninsula. In Krasnodar krai natural gas was first extracted at petroleum and gas fields along the southern edge of the Azov-Kuban Depression. Exploration and extraction then expanded into the Kuban Delta, with gas fields at Krasnoarmiiske and Hryvenska. Subsequent discoveries brought the development of gas fields in the platform (graben) zone. They consisted of about 20 fields in five groupings extending in a double arc from Maikop and Labinsk in the southeast toward Prymorsko-Akhtarske and Yeiske on the coast of the Sea of Azov.

I. Stebelsky

Natural gas industry. A branch of the *fuel industry dealing with the extraction and processing of natural gas. In Ukraine it developed first in the Subcarpathian region. The first gas well, drilled in Kalush in 1910, had a small yield and did not spur further development in the area. Commercial extraction of natural gas began in 1924 in the Dashava gas field in the Lviv region. This small-scale operation supplied the town of Stryi. Although Subcarpathia

had substantial reserves of natural gas, the industry remained underdeveloped: in 1938 its output was merely 150 million cu m. After the Soviet occupation of Western Ukraine Subcarpathia's gas industry expanded rapidly, and by 1940 it was producing 450 million cu m of gas. In 1940 the Opari gas field began commercial production, and the Dashava-Lviv gas pipeline was opened. In 1948 the Uhersko and other Subcarpathian gas fields began to be exploited commercially. That year the Dashava-Kiev pipeline was opened, and in 1951 it was extended to Moscow.

Intensive gas exploration in central and eastern Ukraine after the Second World War resulted in the discovery of the *Shebelynka gas field in Kharkiv oblast. With estimated reserves of 500,000 million cu m, it was the largest gas field in Europe. In 1965 the Shebelynka field accounted for 68 percent of Ukraine's gas output, and by the end of the 1960s, for 30 percent of the Soviet output. As more attention was given to the development of natural gas, new fields were discovered. In 1960-75 Ukraine was the backbone of Soviet gas production. Ukraine's natural gas output rose from 495 million cu m in 1940 to 14 billion in 1960 and 69 billion in 1975 (45 percent of the Soviet output; see table 1).

Gas pipelines from Shebelynka to Ukrainian urban centers and to the Russian cities of Kursk, Orel, Briansk, and Moscow were constructed in the 1960s. Gas from the Sub-

NATURAL GAS PIPELINES

TABLE 1
Ukraine's natural gas output, 1940-87

Year	Output in billion cu m	Percentage of former USSR output
1940	0.5	-
1950	1.5	26
1960	14.3	32
1970	60.9	31
1980	56.7	-
1987	35.6	-

carpathian fields was piped to cities in western Ukraine, to Kiev, and to urban centers in Belarus and Russia.

In the mid-1970s natural gas output in Ukraine began to decline, because of rising production costs, falling output per unit of capital, and the development of natural gas fields east of the Urals. By 1980 gas output had fallen to 56.7 billion cu m, and by 1988 to 32.4 billion cu m. In 1976 Ukraine's natural gas reserves were estimated at 950 billion cu m. That figure represented only 4 percent of the former USSR's known reserves. Current trends suggest that a rapid decline in production cannot be avoided in the future.

Natural gas represented 31 percent of Ukraine's fuel output in 1970. By 1988 that share had declined to 18 percent. Ukraine's household consumption of gas in 1984 was 10 billion cu m. By 1990 practically all cities and towns (smt) and most rural settlements were supplied with natural gas, whether it was brought in by pipeline or in tanks as liquefied gas. Most cities were connected to the pipeline network, but most towns and the vast majority of the villages were not, and had to use the more expensive liquefied gas (see table 2).

Natural resources. Those elements of the natural environment that are used to fill human needs and are valued for their potential to do so. Ukraine possesses a rich, diverse, functionally complementary, and conveniently located complex of natural resources. In the Soviet quantitative assessment by republics and economic regions, by T. Runova, Ukraine accounted for over 13 percent of the combined mineral, hydroelectric, forest, and agricultural land resources of the USSR. In that assessment another 5 percent of the USSR's natural resources were estimated for the North Caucasian economic region, which includes the Kuban, Subcaucasia, and Stavropol krai

(ethnically mixed territories). Soviet assessments used constant values for each unit of natural resource, such as standard coal-equivalent tons of fossil fuel, iron-equivalent tons of iron ore, hectares of nonirrigated cultivated land, and hectares of irrigated cultivated land. The location of a deposit with respect to the market or other complementary resources, the labor force or existing infrastructure, the degree of knowledge about a deposit, and the variation with respect to soil and climate for cultivated land were not considered in determining the value of each resource. Had they been considered, a significantly higher value for Ukraine's share would have been obtained.

Nevertheless, Soviet assessments of natural resources were indicative of approximate regional distribution and mix, especially within Ukraine (see tables 1 and 2). Nearly 60 percent of the republic's natural resources are concentrated in the Donets-Dnieper Basin, one of the three economic regions of Ukraine, mostly because nearly 90 percent of the republic's industrial resources are found there: the Donets coalfield, the Kryvyi Rih Iron-ore Basin, and the gas and oil fields of eastern Ukraine. Yet the agricultural base of the Donets-Dnieper economic region is also formidable, for it exceeds 40 percent of the republic's agricultural land resources. The Southwest economic region, although slightly larger than the Donets-Dnieper, accounts for only a little over one-quarter of the natural resources of the republic. It contains nearly 40 percent of the republic's agricultural resources, but a mere 8 percent of its industrial resources (a diverse mix consisting of oil and gas in Subcarpathia, the Lviv Basin coalfield, hydroelectric power, and forests). Smallest both in area and in its resource base is the South economic region, which accounts for nearly 13 percent of all the republic's resources. It consists largely of cultivated land, a significant proportion of which is under irrigation. The most important industrial resources in the region are deposits of ferrous ores along the Boh River and south of Kryvyi Rih, which represent slightly less than 3 percent of the republic's endowment.

A better perspective on the natural resources of Ukraine is obtained when their values are divided by the area of the territory in question. Such a calculation shows that the area concentration of natural resources in Ukraine exceeds those of the former USSR by 4.8 times. The position is attained mostly as a result of the enormous area concentration of natural resources within the Donets-Dnieper economic region, the value of which exceeds the mean of the former USSR 7.8 times.

A different picture emerges when the value of natural resources is divided by the population. The resulting quotient, representing the per capita supply of natural resources, places Ukraine below (or at 72 percent of) the mean of the former USSR and far below those of the West Siberia, the East Siberia, and the Far East economic regions and of Kazakhstan. Because of its high endowment of natural resources the Donets-Dnieper economic region retains a per capita supply equivalent to the mean of the former USSR. The South economic region has a level equivalent to 64 percent of the mean of the former USSR, but the more densely peopled Southwest economic region is equivalent to only 44 percent of the former USSR's mean.

Ukraine possesses considerable land-based (agricultural, forestry) natural resources. Those were appropriated by the government of the USSR after the Revolution of 1917 and then reallocated, through all-Union and Union-re-

TABLE 1
Natural resource endowment of Ukraine and its economic regions (former USSR total in parentheses)*

	Ukraine	Donets-Dnieper	South	Southwest
All resources	100.0 (13.0)	59.7 (7.7)	12.9 (1.7)	27.4 (3.6)
Agricultural resources	100.0 (18.2)	41.7 (7.6)	19.3 (3.5)	39.0 (7.1)
Industrial resources	100.0 (8.6)	89.5 (7.7)	2.3 (0.2)	8.2 (0.7)

*According to T. Runova (1986)

publican ministries, to government organizations, public bodies, groups, and individuals for a specified period of time or in perpetuity. Peasants were initially allowed to hold land individually, but they were later collectivized, and a state management system was imposed on their operations. Other natural resources, usually called common property resources, such as water and air, were not owned at all. Such common property resources attracted users, each of whom tried to maximize benefits from them and so contributed to their rapid degradation through pollution or exhaustion. Common property resources therefore raised special management problems that still remain to be solved by various levels of government or intergovernmental agencies.

TABLE 2
Resource composition of Ukraine and its regions*

Resource	Ukraine	Donets-Dnieper	South	Southwest
Coal	23.8	39.1	0.0	1.6
Oil and gas	3.2	3.1	0.7	4.8
Iron ore	8.0	12.3	5.9	0.0
Hydroelectric power	1.3	0.9	2.1	1.8
Forest	0.4	0.0	0.1	1.3
Plowland	61.2	43.3	89.1	86.7
Pastures and hayfields	2.1	1.3	2.1	3.8
Total	100.0	100.0	100.0	100.0

*According to A. Mints and T. Kakhanovskaia (1973)

Over time, stock or nonrenewable natural resources have been depleted. The most accessible and thickest coal seams of the Donbas have been mined out. The remaining seams are deep, thin, and steeply inclined and therefore difficult and hazardous to mine. The depletion of oil and natural gas has been even faster and more dramatic; it has converted Ukraine from a net exporter to a net importer of hydrocarbons. Only the large iron-ore reserves still represent a significant export base, although the richest ores have been removed, and the low-quality ores require concentration and beneficiation. Soils, too, have been depleted as a result of increased erosion, chemical and radioactive pollution, and their removal from agriculture for municipal, industrial, and other uses, or inundation by water reservoirs of the Dnieper Cascade.

Some depletion is an inevitable result of the decision to exploit a given natural resource. Depletion commonly increases in proportion to the growing demand for the products of that resource. In Ukraine, however, there has been

excessive depletion owing to careless or inefficient exploitation. Such wasteful use of natural resources was prompted mostly by ambitious Soviet 'five-year plans, which called for massive mobilization of labor and the acceleration of basic production processes for the sake of catching up with and surpassing industrialized 'capitalist' countries. Short-term results outweighed the long-term benefits of greater efficiency, slower overall depletion, less pollution, and, above all, lower human cost. For reasons of ideology natural resources, such as land, water, or minerals in the ground, were considered 'free,' an attitude that promoted disregard for their intrinsic value and made it more difficult for managers to arrive at economically rational decisions. The shortcomings of such an approach have increasingly been recognized since the mid-1980s, but the problems stemming from it have by no means been eliminated.

Natural Science Museum of the Academy of Sciences of Ukraine (Pryrodoznavchyi muzei ANU). A museum and study facility located in Lviv. Established in 1940 as the Lviv Scientific Natural Studies Museum of the AN USSR (now ANU) following the merger of the natural studies collections of the Dzieduszycki Museum of Prehistory, Ethnography, and Nature and the Shevchenko Scientific Society Museum, it became a separate division within the AN USSR in 1954. The museum holds over 300,000 items, of which approx 9,000 are on public display. It has a research department specializing in the study of western Ukrainian flora and fauna, a zoology and botany laboratory, and a scientific library. Its permanent galleries feature exhibits on the development of the natural world, the plants and animals of Ukraine, and the origins of man.

Naturalism. A literary and artistic style of the late 19th century. In literature it was a current that opposed idealism and romanticism, and that aimed to depict comprehensively and photographically life in all of its biological aspects. The tendency existed in Ukrainian prose toward

the end of the 19th and beginning of the 20th century, particularly in the works of V. *Vynnychenko and to a certain extent in those of V. *Pidmohylny. Soviet criticism considered naturalism an entirely bourgeois phenomenon, even though the officially sanctioned *socialist realism was strongly reminiscent of it, particularly in the so-called industrial novels. The tendencies of naturalism flow into those of realism, and it is difficult to distinguish between the two. For example, the early prose of Valerii *Shevchuk is marked by a kind of neorealism.

In the theater naturalism appeared in the coarse psychological portrayal of character. It was a feature of the productions of certain Ukrainian itinerant theaters (D. Haidamaka's, V. Sukhodolsky's, L. Sabinin's) as well as those of H. Yura's company, which aimed to counterbalance L. Kurbas's neoromantic theater.

In painting naturalism aimed at truth to nature and rebelled against idealization, stylization, and modernism in art. The works of P. *Levchenko, M. *Pymonenko, I. *Izhakevych, and M. *Bashkirtseva are typical of naturalism. Naturalism is also reflected strongly in the Soviet Ukrainian socialist-realist art of M. Bozhii, V. Ovchynnykov, S. Hryhoriev, M. Khmelko, and to a certain extent V. *Kasiian.

S. Hordynsky

Naturalists' societies. Learned societies active in the fostering of knowledge in the natural sciences. Societies of naturalists were first formed in Ukraine in the mid-19th century on a regional basis. The *Kiev Society of Naturalists and the *Kharkiv Society of Naturalists were formed in 1869; they were followed by a comparable group in Odessa in 1870. Regional naturalists groups were established at later dates in Podilia, Volhynia, the Crimea, and the Kuban. Commonly affiliated with a local university, the groups organized conferences, published scholarly collections, and established scientific research institutions. They were active until the late 1920s, when their functions were taken over by republican or all-Union institutions, such as the *Ukrainian Botanical Society, and placed under the jurisdiction of the Academy of Sciences. In Western Ukraine a Polish naturalist society (named after Copernicus) was active in Lviv from 1886, and the Shevchenko Scientific Society's mathematical-natural sciences-medical section engaged in natural studies until the Second World War.

Naturalization. The legal process of conferring citizenship upon an alien. The preconditions and procedures for naturalization are defined in law. The ease or difficulty of obtaining citizenship depends on the immigration policies of a given country. Naturalization is a voluntary, individual act, in contrast to the collective change in citizenship that occurs when a territory is annexed by another state. In Ukrainian territories the process of naturalization was defined at different times by the law of the Russian Empire, Austria-Hungary, Czechoslovakia, Poland, and Rumania, which ruled various parts of Ukraine. During the short-lived period of Ukrainian independence, the UNR and Hetman governments passed *citizenship acts. Until 1938 Soviet Ukraine had its own citizenship and naturalization laws (decree on aliens of 28 March 1922 and sec 7, arts 231-46 of the Administrative Code of 1927). Since then the acquisition of all-Union citizenship through

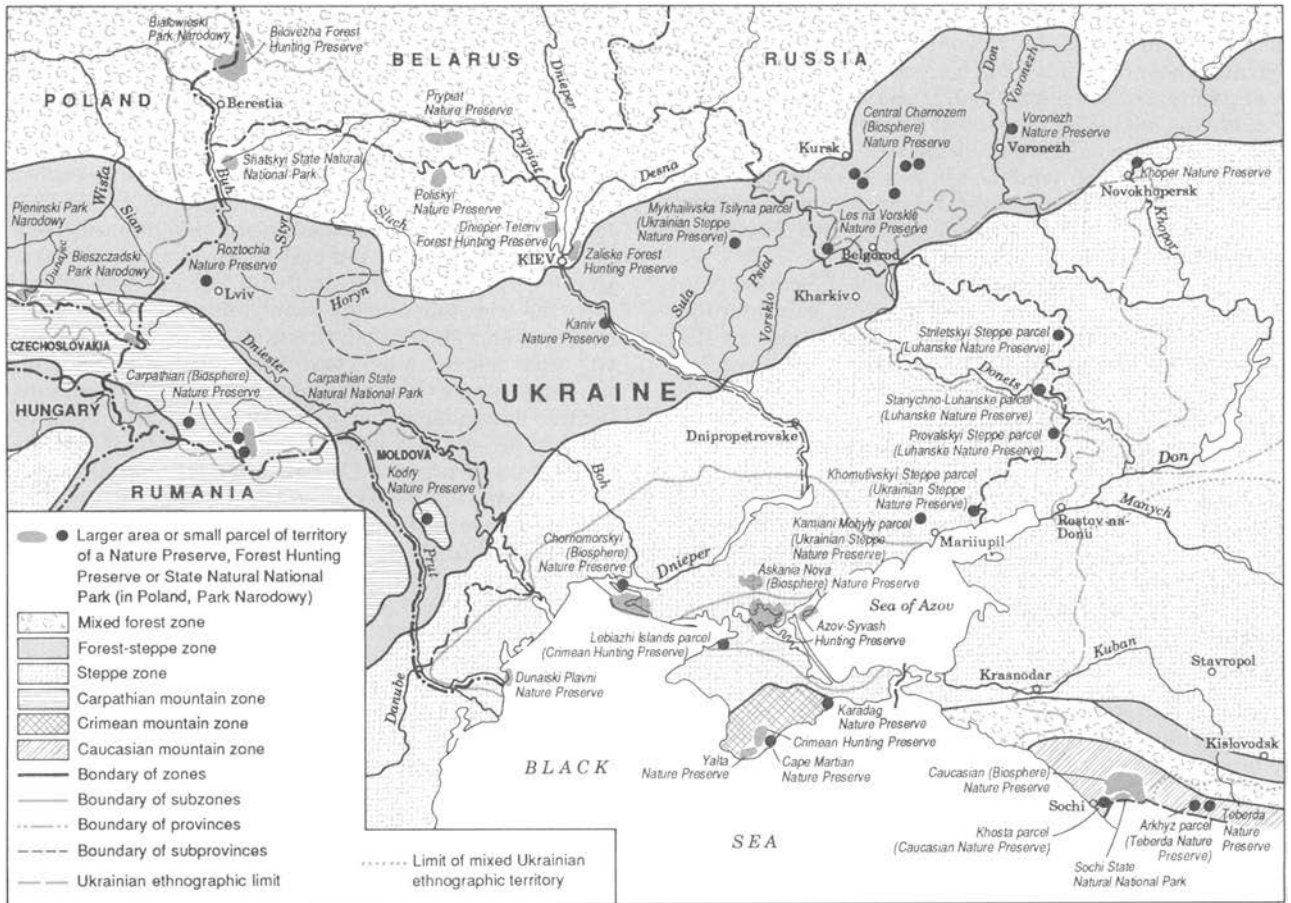

naturalization was followed automatically by the conferring of republican citizenship by the Supreme Soviet of the republic. Republican citizenship merely indicated one's place of residence. The number of people acquiring Soviet citizenship through naturalization was quite low.

Naturalization is an important means for integrating immigrants into the social and political structure of their adopted country. Before the First World War relatively few (20-25 percent) of the Ukrainian immigrants in Canada, the United States, and South America were naturalized. This changed dramatically during and immediately after the war, when many immigrants acquired citizenship to ensure their political, social, and economic security. After the Second World War most Ukrainian immigrants to the New World (see *displaced persons) became naturalized. The desire to participate fully in the political process was an important factor in their decision. In the United States most Ukrainians were naturalized under the terms of the McCarran-Walter Act of 1952, which was much more liberal than earlier policies. The immigrant was required to reside in the country for five years, to make a formal application for citizenship, and to demonstrate a knowledge of English and of the American political system. Illiterate, handicapped, criminal, and politically undesirable people (eg, Communists) were denied citizenship. The five-year residency requirement could be shortened for individuals serving in the armed forces: in the 1950s many young Ukrainians took advantage of this loophole. In the United States the naturalization process culminates in an oath of allegiance sworn before a judge. Canada's requirements for naturalization are similar: some knowledge of English or French and of Canadian history and political life is required. A judge administers the oath of allegiance. In the US, unlike in Canada, naturalized citizens do not have the same rights as native-born citizens: they are barred from the highest political offices and their citizenship can be revoked for treason, living outside the country for a long period, or lying during the naturalization process. In Canada, the extraordinary War Times Election Act of 1917 (rescinded in 1920) stripped thousands of naturalized Canadians, including many Ukrainians, of their right to vote.

European countries have more stringent requirements for naturalization. In the interwar period very few Ukrainian émigrés gained citizenship in Czechoslovakia, Poland, Germany, Austria, France, and the other countries in which they settled. Most remained 'stateless,' living on so-called Nansen Passports. Even today, many older Ukrainians have not been naturalized. Immigrants' children born in Great Britain are automatically citizens, while those born in France become citizens by taking an oath of allegiance upon reaching maturity. In Germany, Austria, and Belgium, in contrast, citizenship is difficult to attain for immigrants' children born there. (See also *Emigration.)

V. Markus

Nature preserves (*zapovidnyky*). Territories recognized as having intrinsic value that are designated for protection from commercial exploitation so that their natural characteristics will be maintained. In Ukraine a system of different kinds of nature preserves has evolved. The preserves differ in the scope of their protection activities, the jurisdiction under which they serve, the size of the territory

NATURE PRESERVES

they control, and the extent to which they are open to the public for popular education and outdoor recreation. The need for establishing a system of natural preserves and parks in Ukraine emerged as a result of the widespread and increasingly intensive use of land for agriculture, the growth of large-scale exploitation of forests and minerals, and rapid industrialization and urbanization. The total area of all kinds of nature preserves and parks is over 1 million ha, an area representing about 1.5 percent of the total land area of Ukraine, significantly smaller than the preserved area in countries such as the United Kingdom (4 percent) or Canada (5 percent). Green space for public outdoor recreation is also maintained in the form of parks and gardens (see *Park).

Nature preserves represent the principal focus of Ukraine's nature preservation effort. The system was initiated in the former Soviet Union shortly after the Revolution of 1917, and by 1988 it encompassed more than 150 nature preserves, of which 12 were in Ukraine. They were the *Askaniia-Nova Nature Reserve, *Black Sea Nature Reserve, Danube Shoals Nature Reserve, *Kaniv Nature and Historical Preserve, *Kara-Dag Nature Reserve, *Carpathian Nature Reserve, *Luhanske Nature Reserve, Cape Martian Nature Reserve, *Polisia Nature Reserve, Roztochia Nature Reserve, Ukrainian Steppe Nature Reserve, and *Yalta Mountain and Forest Nature Reserve. Their total area (1985) was approx 140,000 ha. Other nature re-

serves established on Ukrainian ethnographic territory beyond the borders of Ukraine were the Caucasian (in Krasnodar krai), the Les na Vorskile (in Belgorod oblast), and the Prypiat (in Homel oblast, Belarus).

Preserves were established primarily to function as scientific research facilities and to promote biosphere conservation activities. They also preserve representative portions of a particular type of landscape or biome, such as steppe, estuary, or forest ecosystems, and are sometimes called 'standards of nature' (*etalony*). Some nature preserves, such as Ukrainian Steppe, are made up of several discontinuous sections so that isolated remnant enclaves of biotic importance will be preserved. The nature preserves are not intended to have any significant tourist function; that role is assigned to the national parks.

A few nature reserves have been given a supplemental title, that of a biosphere reserve, under the United Nations' Man and the Biosphere program. In Ukraine the Askaniia-Nova and Black Sea preserves are so designated.

Game (hunting) preserves (*zapovidno-myslyvski hospodarstva*) are a companion category of partially preserved areas. In Ukraine there are four such units: the *Azov-Syvash (mostly for protecting migratory birds and providing wintering sites), the *Crimean (for protecting the forests and their fauna - the deer, the roe, and the mouflon), the Dnieper-Teteriv, and the Zaliske (both within short driving distance of Kiev). In addition the *Bilovezha

Nature preserves and parks in Ukraine, 1985

Type of preserve or park	Number	Total area (ha)
Nature preserves (<i>derzhavni zapovidnyky</i>)	12	139,800

Zoological gardens (<i>derzhavni zoolohichni parky</i>)	6	100
Monuments of garden-park art (<i>derzhavni parky-pamiatnyky sadovo-parkovoho mystetstva</i>)	497	13,800
Total	5,178	1,055,700

Forest hunting preserve (for protecting European bison, deer, wild boar, and elk) is located near the Ukrainian border in Brest oblast, Belarus.

*Wildlife refuges (*zakaznyky*) constitute a category of smaller parcels of land or bodies of water designated for the purpose of protecting some elements of nature (usually an endangered plant or animal species) but not the entire natural complex (as in the case of the nature preserves). The most common wildlife refuges are established for the purpose of protecting valuable animals and birds by disallowing hunting for 10 years or more. Fishing refuges are established for the protection of spawning grounds or young fish. A landscape *zakaznyk* may serve to protect a picturesque river valley or a lake with scenic shores. Small plots of forest, steppe, or wetlands may be designated *zakaznyky* for the protection of their unique complex of plants.

Regulations that govern human activities on wildlife refuge sites are determined by the government of Ukraine, the regional departments responsible for the protection of nature, and the local executive committees. Activities incompatible with the purpose of the refuge, such as hunting, fishing, logging, grazing, hay cutting, and mining, are usually forbidden on the territory of a *zakaznyk*.

Monuments of nature (*pamiatnyky pryrody*) are a subcategory of landscape preserve; the term is usually applied to a specific feature, such as a cave or a waterfall. They are more commonly of local rather than state significance. Either the broader regulations of the *zapovidnyk* or the narrower restrictions of the *zakaznyk* apply to a monument of nature, according to the requirements of the feature to be protected.

Preserved sites (*zapovidni urochyschcha*) are also a subcategory of landscape preserve; the term is applied to somewhat larger features, such as riverbanks and small lakes. Again, the restrictions of either the broader *zapovidnyk* or

the narrower *zakaznyk* type apply. (See also *Wildlife refuge.)

Nauka (Learning). A popular Russophile journal published in Kolomyia (December 1871 to 1876), Lviv (1877-86), Vienna (1886-1900, after it was banned in Galicia by Metropolitan S. Sembratovych), Chernivtsi (1902-6), and again in Lviv (1906-14, 1924-39). Founded by Rev I. *Naumovych, it was published and edited by him (1871-86), F. Drozdovsky (1872), and D. Kozaryshchuk (1886-1900). From 1873 *Nauka* was a monthly. In 1892 it appeared only until May, and from 1893 to 1900 it was published, with interruptions, in double and triple issues. *Nauka* published excerpts from the Scriptures, sermons, religious articles, news, commentaries on Galician affairs, prose and poetry, folklore, and articles on farming, medicine, science, other lands (eg, Africa), the 'Ruthenian' language, and historical subjects. It was initially published in the Galician vernacular, but Naumovych soon switched over to the use of the **yazychiie*. From 1924 it was an organ of the *Kachkovsky Society.

Nauka (Learning). A religious and educational Catholic newspaper published semimonthly (1897-1903), weekly (1904-12), monthly (1912-14), and again weekly (1918-22) in Uzhhorod. The organ of the *Society of St Basil the Great to 1902 and the only populist periodical in Transcarpathia before the First World War, it was printed in the Transcarpathian dialect using *etymological spelling. Its editors were the Greek Catholic priests and community figures Yu. Chuchka, V. Hadzhega, P. Gebei, Ye. Sabov, A. Voloshyn (1903-14, 1918-22), and V. Zheltvai. Much local folklore appeared in *Nauka*. The paper also published a bi-monthly supplement of Sunday sermons, *Slovo Bozhe* (1905-6); a monthly illustrated supplement for the peasantry, *Selo* (1911-12); and a series of monthly booklets containing didactic readings. *Nauka* appeared under the titles *Tserkov*, *Narod*, and *Eparkhiia* in 1918 and as *Rus'ka kraina* in 1919. In 1922 it was succeeded by the newspaper **Svoboda*.

Nauka i suspil'stvo (Science and Society). A popular journal published monthly in Kiev since April 1951 (until July 1965 under the title *Nauka i zhyttia*) by the *Znannia Society. Since 1970 the chief editor has been Yu. Romaniuk. The journal contains articles on scientific developments, nature, ecology, technology, historical and cultural topics, and the socioeconomic development of the USSR. It also publishes science fiction. Its monthly pressrun was increased from 22,000 in 1960 to 57,000 in 1970 and 72,000 in 1979, but then reduced to 57,000 in 1980.

Naukova Dumka (Scientific Thought). The publishing house of the AN URSR (now ANU) and State Publishing,

Printing, and Book Trade Committee in Kiev. Founded in 1922 as part of the VUAN Editorial-Publishing Commission, in 1927 it became the Publishing House of the VUAN (from 1936, AN URSR). In 1964 it assumed its present name. The most important scholarly and academic publishing house in Ukraine, each year it issues hundreds of monographs in the humanities and social, technical, and pure sciences; journals (52 in 1989); and serial publications (81 in 1989). It has released many important publications, including histories of the Ukrainian SSR (10 vols, 1977–9) and Ukrainian literature (8 vols, 1967–71); a major Ukrainian dictionary (11 vols, 1970–80); academic editions of the collected works of T. Shevchenko (10 vols, 1939–64; 12 vols, 1989–) and I. Franko (50 vols, 1976–86); **Fauna Ukrainy* (40 vols, 1956–); and **Flora URSR* (12 vols, 1936–65). Officially, as the publishing house of the AN URSR, Naukova Dumka was not subject to the usual Soviet censorship. In practice this meant little, and works issued by it generally conformed to the Party line and official dictates on scholarship. In the decades preceding the 1980s it was subject to increasing Russification, and most of its publications, especially in the natural and applied sciences, appeared in Russian. In the 1980s it published approx 700 titles each year, written by staff members of over 80 ANU institutes. Naukova Dumka had over 500 employees.

Naukovi zapysky Instytutu movoznavstva AN URSR. See *Movoznavstvo*.

Vsevolod Naulko

Volodymyr Naumenko

Naulko, Vsevolod, b 8 December 1933 in Tarashcha, Kiev oblast. Ethnographer. A graduate of Kiev University (1956), he received a candidate's degree from the USSR Institute of Ethnography in Moscow (1964) and worked as a research associate of the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography. He has taught at Kiev University since 1971; he received his doctorate there in 1977 and became a professor in 1978. In 1982 he was elected to the presidium of the European Association of Ethnography and Folklore. Naulko is the author of over 170 works, including a book on Ukraine's ethnic composition (1965), a map of Ukraine's ethnic groups with an accompanying text on their geographic distribution (1966), and books on the development of interethnic relations in Ukraine (1975) and Ukrainian culture and folkways (with

V. Mironov, 1977). He has contributed to many scholarly compendiums, including ones on the ethnography of the Eastern Slavs (1987) and Ukrainian-Moldavian ethnocultural relations (1987), and a new postsecondary textbook on Ukrainian folk culture and folkways (editor in chief, 1991).

Naum, Nataliia, b 14 January 1933 in Staryi Mizun, Dolyna county, Galicia. Film actress. She began acting in cinema in 1953. In 1958 she completed study at the Kiev Institute of Theater Arts; since then she has worked in the Kiev Artistic Film Studio, where she has played heroic and character roles in films and telefilms.

Naumenko, Ivan, b 1856, d 1913. Actor. He worked in M. Sadovsky's (1888–93), M. Kropyvnytsky's (1894–1900), and O. Suslov's (1902–7) troupes, in which he played character and comic roles. In 1907–11 he toured with his own troupe outside Ukraine, their tour including St Petersburg and Rostov. Naumenko wrote the play *Chervoni cherevychyky* (The Red Shoes), based on N. Gogol's story *Rizdvianianich* (Christmas Night).

Naumenko, Volodymyr, b 7 July 1852 in Novhorod-Siverskyi, Chernihiv gubernia, d 8 July 1919 in Kiev. Civic figure, educator, ethnographer, and philologist. He graduated from Kiev University in 1873 and taught in Kiev's secondary schools until 1903. From 1905 to 1914 he was director of a gymnasium in Kiev founded by him. Naumenko was a member of the Old *Hromada of Kiev; he was elected its treasurer in 1875, and maintained contact between it and M. Drahomanov in Geneva. He regularly contributed to **Kievskaia starina*, in which he published over 90 articles on Ukrainian history, literature and writers, education, and ethnography, and of which he served as the last editor (1893–1906). In addition to contributing to other Ukrainian periodicals he wrote a survey (in Russian) of the phonetic traits of 'Little Russian' (1889) and discovered a collection of folk songs compiled by Z. *Dolega-Chodakowski. From 1914 to 1917 he was president of the *Ukrainian Scientific Society in Kiev. After the February Revolution of 1917 he temporarily headed the newly created Central Rada in Kiev until M. Hrushevsky's arrival. In 1917 he quit the Russian Constitutional Democratic party and became a founding member of the conservative Ukrainian Federative Democratic party (est December 1917). He served as the last minister of education (November–December) of the 1918 Hetman government, and after its downfall he worked at the newly founded Ukrainian Academy of Sciences, where he collected new materials on the history of 19th-century Ukrainian literature (pub 1919, 1924). He was executed by the Bolsheviks and went unmentioned in Soviet publications.

R. Senkus

Naumets, Volodymyr [Naumec'], b 5 February 1945 in Lviv. Painter. Naumets studied at the Odessa Art School and graduated from the Moscow Higher Applied Art School (1970). In 1976 he participated in the Second Exhibition of Ukrainian Nonconformist Artists in a private apartment in Moscow. In his works he experimented with surrealism and abstraction before discovering Christian symbolism and religious themes, the result being semiabstract compositions, such as *Icon* (1979). More recently his paintings have become highly expressive (eg, the series

'Crucifixion'). Naumets's works have been exhibited in New York, Copenhagen, and Munich. In 1988 he was invited to work at Studio Central in Bern, Switzerland, and in 1989 he had solo exhibitions in Warsaw, Hamburg, and Köln.

Naumovets, Anton [Naumovec'], b 2 January 1936 in Rudka, Pinsk raion, Brest oblast, Belarus. Physicist. A graduate of Kiev University (1957), he joined the AN URSR (now ANU) Institute of Physics, where since 1981 he has headed the Division of Physical Electronics. Since 1984 he has also been a professor at Kiev University. Naumovets has made substantive contributions to the understanding of electronic phenomena involved in absorption and surface diffusion.

Rev Ivan Naumovych

Ivan Navizivsky

Naumovych, Ivan [Naumovyč] (pseuds: I.N. Buzhanenko, Reb-Chaim), b 26 January 1826 in Kizliv, Zolochiv circle, Galicia, d 16 August 1891 in Novorossiisk, Kuban oblast. Writer and cultural and political figure. He graduated from the Greek Catholic Theological Seminary in Lviv (1851) and was ordained. While serving as a priest in Galician villages he established reading clubs and temperance societies and promoted peasants' savings banks, communal stores, and rational husbandry. He was a prominent *Russophile spokesman (he saw Galicia's union with Russia as the only alternative to Polonization) and an active member of the *Halytsko-Ruska Matytsia society. He was elected to the Galician Provincial Diet (1861-6) and the State Council in Vienna (1873-9). In Kolomyia he founded the first Galician beekeepers' association (1868), the Russophile *Kachkovsky Society (1874), and the Russophile periodicals **Nauka* (editor, 1871-2, 1874-6) and **Ruskaia rada* (editor, 1871-80). For encouraging a parish in Hnylychky, Zbarazh county, to convert to Russian Orthodoxy he was imprisoned for eight months in 1883-4 and then excommunicated. After his release he emigrated to Russian-ruled Ukraine. From 1886 he served as an Orthodox missionary in Kiev, where he led a campaign against Stundism, and then as a parish priest in Borshchahivka, Skvyra county, Kiev gubernia.

Naumovych published articles, prose, and poems in Galician periodicals (eg, *Zoria halytska*, *Slovo*, *Lastivka*,

Nauka, *Ruskaia rada*, *Prolom*, *Novyi prolom*) from 1849. His didactic novelettes, stories, and plays, written in the vernacular, were popular, especially in Galicia. An edition of his complete works (3 vols, 1926-7) was published in Lviv. Biographies of him have been written by O. Monchalovsky (1899) and V. Vavrik (1926).

Navizivsky, Ivan [Naviziv's'kyj] (Navis, John), b 29 September 1888 in Vorvulyntsi, Zalishchyky county, Galicia, d 25 April 1954 at sea. Communist political organizer, press editor, and community leader. In 1908, after completing study at the teachers' seminary in Galicia, Navizivsky emigrated as a laborer to the United States and joined the Socialist Party of America. In 1911 he moved to Winnipeg and worked for *Robochyi narod*, the weekly organ of the Ukrainian Social Democratic party in Canada. He later espoused an openly communist position; he helped form the Communist Party of Canada (CPC) and served on its Central Committee for many years, attended the Sixth Congress of the Comintern in 1928 as a delegate, and served (from 1943) on the politburo of the Labor Progressive party. He was closely associated with the *Ukrainian Labour-Farmer Temple Association (ULFTA) and the Workers' Benevolent Association, both of which he helped to establish. Navizivsky was reprimanded by Party officials in 1930 for his defense of the autonomy of the ULFTA vis-à-vis the CPC. By 1931 he had submitted to Party discipline and remained loyal thereafter. In April 1931 he led a 'labor-farmer delegation' to the Ukrainian SSR that returned with glowing reports about conditions there. In 1940 he was arrested together with other prominent Communists and interned for two years. After the Second World War he oversaw the printing of *Ukrains'ke zhyttia* and *The Ukrainian Canadian*. He died at sea while returning from the USSR.

M. Lupul

Navrotsky, Borys [Navroc'kyj], b 8 May 1894 in Kiev, d 10 February 1943. Shevchenko scholar and literary theoretician. Using the methodology of O. *Potebnia's literary school, he wrote the study *Mova ta poeziia* (Language and Poetry, 1925) and many articles on T. *Shevchenko's poetics, prose, themes, and creative method; they appeared in journals, such as *Zhyttia i revoliutsiia*, *Chervonyi shliakh*, *Hlobus*, and *Literaturnyi arkhiv*, and in the annuals *Shevchenko* (1928, 1930). Seven articles made up the collection *Shevchenkova tvorchist'* (Shevchenko's Creativity, 1931). Navrotsky also wrote a monograph on the sources, style, and composition of Shevchenko's 'Haidamaky' (1928). He was critical of Western idealist and experimental esthetics. Navrotsky was arrested during the Yezhov terror, and most likely died in a labor camp.

Navrotsky, Oleksander [Navroc'kyj], b 9 August 1823 in Antypivka, Zolotonosha county, Poltava gubernia, d 22 October 1892 in Temir-Khan-Shura (now Buinaksk), Dagestan. Revolutionary figure, poet, and translator. He graduated from Kiev University in 1847. Through his cousin, M. Hulak, he joined the *Cyril and Methodius Brotherhood; he was arrested in Poltava in 1847, imprisoned for six months in Viatka, and then exiled to Elabuga, Viatka gubernia, and Kursk, Russia. From the time of his release in 1853 until the end of his life he worked as a tsarist functionary, mostly outside Ukraine, in St Petersburg, No-

vocherkassk, Mykolaiv, Yerevan, and Temir-Khan-Shura. Inspired by his friend T. Shevchenko, he began writing Romantic poems in 1847; a few were published in the journals *Osnova* (1861), *Russkii arkhiv* (1892), and *Kievskaiia starina* (1900, 1902) and in M.(N.) Petrov's history of 19th-century Ukrainian literature (1884); all 20 extant poems appeared in a Soviet anthology of poetry of the post-Shevchenko period (1961). Navrotsky translated into Ukrainian around 140 literary works, including Homer's *Iliad* and *Odysey* and the poetry of S. Rustaveli, H. Heine (the first Ukrainian translations), J.W. von Goethe, F. Schiller, G. Byron, J. Milton, P.B. Shelley, A. Mickiewicz, A. Pushkin, and M. Lermontov.

Osyp Navrotsky

Volodymyr Navrotsky

Navrotsky, Osyp [Navroc'kyj], b 24 March 1890 in Holhochi, Pidhaitsi county, Galicia, d 6 August 1972 in Winnipeg. Lawyer and military and civic leader. While studying law at Lviv University he was president of the Ukrainian Student Union (1912–13) and a member of the chief executive of the Ukrainian Radical party (1912–33). During the First World War he fought with the Ukrainian Sich Riflemen in the Carpathians and then served as quartermaster of the Kolomyia Brigade and assistant quartermaster of the Third Corps of the Ukrainian Galician Army and quartermaster of the Kherson Division of the UNR Army. In 1920 he helped found the *Ukrainian Military Organization (UVO) and served as chief (1920–1) and member (1920–6) of its supreme collegium. He was imprisoned in 1921–2 and 1922–3 in connection with UVO actions. He was an executive member of the Chervona Kalyna publishing house (1920–39), the Prosvita society, and the Ridna Shkola society (1923–6). During the Second World War he headed the Ukrainian Relief Committee in Krynytsia (1940–2) and was executive director of the *Military Board of the Division Galizien (1943–5). After arriving in Canada in 1948, he worked at the head office of the Ukrainian Canadian Committee until 1962. His recollections of the liberation struggle were published in the Ukrainian press.

Navrotsky, Stepan [Navroc'kyj], b 1895, d 1960. Lawyer and civic leader. He practiced law in Peremyshl and was elected as a candidate of the Ukrainian National Democratic Alliance to the Polish Sejm in 1938. He emigrated to Canada in 1949.

Navrotsky, Vasyl [Navroc'kyj, Vasył'], b 11 February 1897 in Dziednae, Babruisk county, Minsk gubernia, d 6 October 1975 in Kharkiv. Hygienist; full member of the USSR Academy of Medical Sciences from 1960. A graduate of the Kharkiv Medical Academy (1921), he was a sanitation inspector in the Donbas, worked at the Kharkiv Scientific Research Institute of Occupational Hygiene and Diseases (1927–53), and taught at the Ukrainian Institute for the Upgrading of Physicians (1944–72). His publications deal with safety and health problems in industry, experimental industrial toxicology, silicosis, and the effects of low-concentration pollutants on the body's immune system.

Navrotsky, Volodymyr [Navroc'kyj] (pseud: Onysym), b 18 November 1847 in Kotuziv, Berezhany circle, Galicia, d 16 March 1882 in Rzeszów, Poland. Economist, statistician, and publicist. As a gymnasium student in Stanyslaviv he led a Ukrainophile student hromada with O. Terletsky. While studying law at Lviv University (1866–71) he was active among Lviv Populists and in the Prosvita society (secretary of its chief executive, 1870–2) and contributed to *Pravda* in Lviv. The Polish authorities banished him to Rzeszów in 1871. From there he contributed to *Pravda* and *Dilo* in Lviv and to liberal Russian-language periodicals, such as *Kievskii telegraf*, *Odesskii vestnik*, and *Vestnik Evropy*. His largest work, on drunkenness and propination in Galicia, appeared in M. Drahomanov's *Hromada* (Geneva 1882). Navrotsky and his articles significantly influenced the decision of many young Ukrainians to devote themselves to 'organic work on behalf of the people.' Of a projected multivolume edition of his collected works, only the first volume, containing his satire, ethnographic studies, and poetry, was published (1884, ed I. Franko). Navrotsky's diary was published by Franko in *Zhyttie i slovo* (1894, no. 6), and I. Vytanovych's book about him appeared in Lviv in 1934.

Navy. See Black Sea Fleet.

Nazarenko, Ivan, b 16 August 1908 in Birky, Khorol county, Poltava gubernia, d 9 June 1985. Communist party functionary. In the 1930s, after graduating from the Kharkiv Institute of Red Professors, he lectured in philosophy. After the war he was chief of the propaganda department of the CC CP(B)U (1945), a secretary of the CC CP(B)U (1946–7, 1949–56), a member of its Politburo (1950–6), and director of its Institute of Party History (1956–74). He wrote some works on Party history and on T. Shevchenko's worldview (1959).

Nazarenko, Vasyl, b 24 August 1908 in Chyhyryn, Kiev gubernia. Analytical chemist; AN URSS (now ANU) corresponding member since 1972. A graduate of the Odessa Chemical-Pharmaceutical Institute (1931), he headed the laboratory divisions of the ANU Institute of General and Inorganic Chemistry (1957–77) and Institute of Physical Chemistry (from 1977). He researched the analytical chemistry of rare elements, ultrapure substances, and semiconductor materials; introduced new quality-control methods in the production of germanium, niobium, and tantalum; and developed methods to determine the mechanism in analytical reactions. His monograph *Analytical Chemistry of Germanium* (1974) was published in English translation.

Nazarevsky, Oleksander [Nazarevs'kyj], b 12 December 1887 in Zlatopil (now Novomyrhorod), Chyhyryn county, Kiev gubernia, d 30 September 1977 in Kiev. Literary scholar. He graduated from Kiev University in 1910 (where he studied under V. Peretts) and taught there from 1914. From 1928 to 1950 he was also a senior associate of the VUAN and AN URSS (now ANU). He wrote over 100 works on old and modern Ukrainian and Russian literatures. They include books on N. Gogol and art (1910), the historical course of Ukrainian literature (1930), the early 17th-century Russian historical narrative (1958), the literary aspects of early 17th-century Muscovite charters and other documents (1961), and Russian-Ukrainian literary relations (1963); a bibliography on the ancient Rus' narrative (1955); and many articles in Ukrainian and Russian serials. He was also involved in preparing the academic editions of the works of Gogol and T. Shevchenko.

Oleksa Nazariiv

Rev Irynei Nazarko

Nazariiv, Oleksa [Nazariijiv], b 1880, d 1918. Political activist. A native of the Poltava region, he was involved in the clandestine gymnasium in Pryluka and became active in student organizations (including the St Petersburg hromada), the Revolutionary Ukrainian party, and the Ukrainian Social Democratic Workers' party. In 1908 he moved to Lviv, where he worked as a librarian for the Shevchenko Scientific Society (1912–13) and contributed to the press. He was a member of the Union for the Liberation of Ukraine from 1914 until his return to eastern Ukraine.

Nazarko, Irynei, b 7 July 1905 in Tovstoluh, Ternopil county, Galicia, d 20 April 1976 in Ottawa. Basilian priest, church activist, and scholar; full member of the Shevchenko Scientific Society from 1956. He entered the Krekhiv Monastery in 1922 and was ordained in 1930 after completing his education in Basilian schools. In 1932–44 he headed the *Marian societies movement in Galicia and helped edit several of its publications. He was hegumen of St Onuphrius's Monastery in Lviv (1941–4) until he emigrated, first to Germany and then to Canada. There he edited the journal *Svitlo* (1946–8), obtained a doctoral degree in philosophy from Ottawa University (1951), and was a visiting professor at universities in Ottawa and Montreal (1949–53). He moved to Rome and in 1955 became general counselor for the Basilian order and rector of St Josaphat's Ukrainian Pontifical College. He returned to Canada in

the late 1960s and became a spiritual adviser to Basilian students at the University of Ottawa. Nazarko was a prolific writer; his publications include *Sviatyi Volodymyr Velykyi ...* (St Volodymyr the Great, 1954) and *Kyivs'ki i halyts'ki mytropolyty* (Kievan and Halych Metropolitans, 1962).

Nazarova, Tetiana, b 21 November 1933 in Kiev, d 18 April 1976 in Kiev. Linguist. A graduate of Kiev University (1956), from 1958 she was an associate of the AN URSS (now ANU) Institute of Linguistics. She specialized in Ukrainian and East Slavic dialectology, publishing about 60 scholarly articles on the Polisia dialects, Belarusian-Ukrainian dialectal contacts, and Ukrainian dialects in the Far East. She was instrumental in putting together the atlas of the Ukrainian language (1984–8).

Osyp Nazaruk

Nazaruk, Osyp, b 31 August 1883 in Nahiriianka, Buchach county, Galicia, d 31 March 1940 in Cracow. Lawyer, publicist, and civic and political leader. As a law student at Vienna and Lviv universities he was active in student organizations. He was an executive member of the Ukrainian Radical party (1905–19) and editor of its semimonthly *Hromads'kyi holos* (1916–18). At the outbreak of war he enlisted with the Ukrainian Sich Riflemen (USS). In 1915 he directed its press bureau, and in 1918 he presided over its commissariat in Podilia. A member of the Ukrainian National Rada, he was sent with a delegation to Hetman P. Skoropadsky in November 1918 to obtain military aid for the Western Ukrainian National Republic (ZUNR). He remained in central Ukraine and sat on the council of the Sich Riflemen, and later took part in the hetman's overthrow. His positions under the UNR Directory included those of minister of the press and propaganda in V. Chekhivsky's cabinet and director of the press and propaganda board during S. Ostapenko's premiership. From the middle of 1919 he collaborated closely with Ye. Petrushevych and edited the military magazine **Strilets**. After moving to Vienna with the ZUNR government he contributed to its organs *Ukrains'kyi prapor* and *Volia*. At the end of 1922 he was sent to Canada to raise loans for the government-in-exile. After undergoing a conversion from socialism to Catholicism and hetmanite conservatism he moved to the United States, where he edited the weekly **Sich* in Chicago, infused the Sich organization there with a hetmanite ideology, organized new Sich branches, and

coedited *Ameryka* in Philadelphia. In 1926 he returned to Lviv, where he was active in the Ukrainian Christian Organization and edited its organ **Nova zoria*. In 1937–9 he represented Bishop H. Khomyshyn on the Ukrainian Coordinating Committee.

Nazaruk wrote a great many articles on political and historical questions and many books in several genres: memoirs, such as *Slidamy USS* (In the Footsteps of the Ukrainian Sich Riflemen, 1916), *Nad Zolotoiu Lypoiu* (On the Banks of the Zolota Lypa, 1916), and *Rik na Velykii Ukraini* (A Year in Central Ukraine, 1920); historical novelles, such as *Kniaz' Iaroslav Osmomysl* (Prince Yaroslav Osmomysl, 1920; repr 1959) and *Roksoliana* (1930; repr 1955); brochures on topics such as the class struggle (1913), the student movement (1921), government corruption (1921), and the workers' movement and religion (1926); and accounts of his travels in Ukraine, Canada, the United States, and Scandinavia.

Nazaruk, Serhii, b 4 October 1896 in Volodymyr-Volynskyi, Volhynia gubernia, d ? After serving in the Russian army as an engineer and sapper, he established a Ukrainian sapper regiment, which was attached to the Army of the UNR. He returned after the revolution to Volodymyr-Volynskyi, where he became active in the Prosvita society. In 1923 he was sent to the Polish Sejm as a replacement for V. Komarevych. He moved his support from the Ukrainian Club to the **Sel-Soiuz* faction. He did not support the group's merger into *Sel-Rob*, however, and in 1926 he broke ranks with the latter, together with P. Vasynchuk, in order to re-establish *Sel-Soiuz*.

Nazi war crimes in Ukraine. The International Military Tribunal that tried 22 Nazi defendants in Nuremberg in 1945–6 defined war crimes in traditional fashion as 'violations of the laws or customs of war,' including murder, the ill-treatment or deportation of civilians to slave labor, the murder or ill-treatment of prisoners of war, the killing of hostages, and the plunder or destruction of property. It also introduced the unprecedented charge of 'crimes against humanity,' encompassing 'inhumane acts committed against any civilian population, before or during the war; or persecutions on political, racial, or religious grounds.'

On all those counts Nazi war crimes took a staggering toll during the occupation of Ukraine in 1941–4. A. *Hitler, who regarded Jews and Slavs as subhuman, considered Ukraine and its people as resources to be exploited ruthlessly in the interests of German eastward expansion and world domination. His views were enthusiastically supported by top Nazi officials, notably E. Koch, head of the **Reichskommissariat* Ukraine. Those officials overrode the objections of others, such as A. *Rosenberg, head of the Ministry for the Occupied Eastern Territories, who favored the establishment of German dominance by means of concessions to the non-Russian Slavs. Nazi racial theory, the ideological basis for the criminal mistreatment of the Eastern European peoples, was openly expressed in such publications as the SS pamphlet *Der Untermensch* (1942).

Following the invasion of the USSR in June 1941, the Germans took approximately 5.8 million prisoners of war, whom they held in open-air camps. Some 3.3 million perished as a result of deliberate starvation, neglect, physical

abuse, and lack of international protection. More than 1.3 million POWs died in approximately 160 concentration camps throughout Ukraine. Some escaped death by recruitment as concentration camp guards and, after the defeat at Stalingrad, in military and other formations.

In occupying Ukraine the Germans were particularly concerned to exploit the country's agriculture and raw materials for the war effort, to recruit slave labor, and to crush popular support for Soviet or Ukrainian nationalist partisans. Numerous war crimes were committed in the effort to achieve those goals. By the autumn of 1941, serious food shortages were being reported in Kiev and Lviv, but nothing was done to alleviate them: the provision of food to the army and the German population was seen as the overriding priority. General W. von Reichenau wrote in November 1941 that feeding locals and POWs was an 'unnecessary humanitarian gesture,' and a report of the German Economic Armament Staff dated 2 December 1941 advocated the 'elimination of superfluous eaters (Jews and inhabitants of large Ukrainian cities such as Kiev, which get no food rations at all).' Urban dwellers were forbidden to change their places of residence or buy food in villages on pain of arrest and fine. Kiev lost about 60 percent of its population, and Kharkiv lost about 80,000 persons to starvation. High-calorie foods were reserved for Germans. Ultimately more than 80 percent of the food that Germany took from the eastern territories came from Ukraine.

The Soviet collective-farm system was left virtually unchanged under Nazi rule, with work norms and delivery quotas rigorously enforced. Draconian penalties, including execution, were inflicted on those who failed to deliver food to the occupation authorities. Village officials were held responsible for prompt fulfillment. According to a decree issued in Lubni on 8 April 1943, the penalty for delivering watered milk was confiscation of all the offending peasant's property. When Hitler demanded 3 million t of Ukrainian grain in 1943, Koch ordered that the task be carried out 'without regard for losses,' since the feeding of the Ukrainian civilian population was 'of absolutely no concern.'

In late 1941, when it became clear that the conflict would be protracted, the Germans began to recruit workers (initially volunteers) from the local population for work in Germany. According to Rosenberg's decree of 17 July 1941 all inhabitants of the eastern territories aged 18 to 45 were obliged to work according to their abilities. By 20 October 1941 the Chernihiv city government was forcing men aged 16 to 60 and women aged 16 to 50 to register with the labor board on pain of being dealt with as saboteurs. By early 1942, concentration camps had been established for those avoiding labor, and the death penalty had been proclaimed for those refusing to work. As the war intensified, local officials were told to deliver specified numbers of workers, and the army was ordered to assist in roundups. In order to meet quotas policemen took to rounding up people at random on the streets as well as in workplaces and institutions. The standard punishment for those refusing to work was arrest and confiscation of property; by 1943, men and women aged 16 to 55 were being ordered to report to labor boards on pain of execution. Those transported to Germany were herded onto cattle cars with insufficient food and drink. Once there, they were underfed and exploited so mercilessly that, as a

Krupp official noted in 1942, they lacked the strength to do their jobs. Of the total 2.8 million **Ostarbeiter* from the eastern territories, more than 2 million came from Ukraine.

For those who assisted partisans (officially called 'bands' after August 1942 and so deprived of combatant status) the death penalty was proclaimed on 14 August 1941. In a circular of 16 September 1941 the commander in chief of the armed forces, Gen W. Keitel, ordered the 'immediate use of the most severe measures' to establish the authority of the occupation forces and prevent the spread of resistance. It became common practice for the Germans to take scores of civilian hostages, changed at intervals, in order to ensure the safety of their troops and prevent sabotage. Civilians were also shot in reprisal. In Dnipropetrovske in December 1941, for example, 100 were killed for the attempted assassination of a German officer, and in the same month the Zhytomyr *Generalkommissar* ordered the shooting of 100 men and women for every killing of a *Volksdeutsche*. During the winter of 1941–2 in Kharkiv, 40 to 70 citizens were hanged every few days because of sightings of Soviet partisans; the corpses hung from balconies for days at a time. When dealing with villages suspected of harboring or assisting partisans, whether voluntarily or not, the Germans showed no mercy. Eyewitness testimony on the fate of Ukrainian villages during the occupation relates hundreds of instances of depredations carried out by punishment details. Typically the Germans would surround a village, shoot the inhabitants indiscriminately, drive some of them into buildings to be burned alive, subject others to public torture, and then loot and burn the village.

As part of their systematic effort to exterminate the Jews of Europe the Nazis rounded up and killed Jews living in Ukraine. Since no extermination camps were built on Ukrainian territory (although 50 ghettos were established), the killings typically took place in the open. Among the sites in Ukraine where Jews were killed the most infamous was *Babyn Yar in Kiev. The city's Jewish population of almost 70,000 was machine-gunned there in the autumn of 1941, and the ravine was then used as a mass grave for two more years. In Lviv about 200,000 Jews perished in the Yaniv concentration camp during the occupation. The Germans' Rumanian allies, who occupied Transnistria, also committed war crimes: some 200,000 residents of Odessa and the surrounding region were murdered in December 1941.

In addition to human losses there was great destruction of Ukraine's cultural monuments and institutions during the German occupation. The losses suffered by the Academy of Sciences alone are estimated at 126 million rubles. The Germans destroyed 116 institutions of higher learning along with 8,104 schools (another 10,052 schools were partially destroyed). Many architectural monuments were leveled, as were 151 museums – museum exhibits commonly being either plundered or damaged beyond repair. More than 50 million books were burned or stolen; 634 print shops (77 percent of the Ukrainian SSR total) were ruined; and more than 200 theaters were destroyed. During their retreat from Ukraine the Germans followed a 'scorched earth' policy and destroyed everything useful to their enemies.

According to recent Soviet figures a total of more than 5,265,000 civilians and POWs were killed during the occu-

pation of Ukraine. The figure presumably includes the 900,000 Ukrainian Jews whom Western scholars estimate to have been murdered. The Germans destroyed 714 towns and urban areas and 28,000 villages and farmsteads, and left approximately 10,000,000 people homeless. Total material losses have been estimated at a value of some 1.2 trillion prewar rubles.

M. Yurkevich

Nazustrich (Rendezvous). A bimonthly journal of literature and the arts, published in Lviv in 1934–9. It published art reproductions, literary and art criticism, articles on the history of Ukrainian art, reviews, prose, and poetry. The contributors and editors included some of the most prominent young Galician cultural figures of the time, O. Bodnarovych, V. Simovych, M. Rudnytsky, S. Hordynsky, and B.I. Antonych.

Neapolis frescoes

Neapolis. A Scythian city located on the Salhyr River southeast of Symferopol, Crimea. Digging began as early as 1827, but systematic exploration began in 1945. Founded in the 3rd century BC, Neapolis quickly grew into a substantial trade and crafts center. The *Scythians established their capital there in the 3rd century BC after being forced south from the Pontic steppe by the Sarmatians. Neapolis reached the zenith of its influence in the 2nd century BC under kings Skhilouros and Palakhos. The Scythians' power was checked in the 2nd and 3rd centuries AD by the *Bosporan Kingdom and during the 3rd and 4th centuries

Neapolis fell under attacks by Goths and Huns, and the city was abandoned.

The city covered an area of approx 20 hectares. It was surrounded by thick walls (up to 12 m) with towers. Inside the walls were stone buildings (some covered with tiles and frescoes), warehouses, and private homes. Round semi-pit dwellings resembling nomads' tents were also found. Scythians formed a majority of the city's population, but there were also numerous Sarmatians, Taurians, and Greeks who in particular exerted a strong cultural influence on the city. The most striking remains of Neapolis are the mausoleums of the Scythian rulers and burial chambers dug into rock formations.

Nebaba, Martyn, b ? in Korostyshiv, d 1651. Cossack officer. He became colonel of Chernihiv regiment in 1648. He was killed in a battle near Loev against the Lithuanian army of J. Radziwiłł.

Nebeliuk, Myroslav [Nebeljuk] (pseud: Roman Nemyr, Nechypir Gava), b 30 September 1914 in Rosilna, Nadvirna county, Galicia. Journalist, civic leader, and veterinarian; full member of the Ukrainian Academy of Arts and Sciences. In 1937 he emigrated to France, where he joined the editorial board of *Ukrains'ke slovo* and completed his studies as a veterinarian in 1951. In 1952 he emigrated to Canada, where he served as president of the Ukrainian Veterinary Medical Association (1971–5) and edited the association's journal *Informatywnyi lystok OUVL* (1964–7). Since 1985 he has been editor of the journal *Hutsul'shchyna*. Nebeliuk is the author of several publicistic articles and translations of French authors into Ukrainian.

Nebera, Volodymyr, b 2 July 1924 in Kiev. Film director and pedagogue. He completed study at the Kiev Institute of Theater Arts (1949) and then worked as a director at the Ukrainian Studio of Chronicle-Documentary Films (1950–72) and taught at the Kiev Institute of Theater Arts (from 1966). He coauthored the screenplays *My z Ukraïny* (We Are from Ukraine, 1961) and *Polum'ia festyvaliu* (The Flames of the Festival, 1985).

Nebesnaia tsaritsa (Queen of Heaven). A semi-official monthly organ of the Byzantine Ruthenian Greek Catholic diocese of Pittsburgh, published in McKeesport, Pennsylvania, from January 1927 to August 1955. Intended for Eastern rite Catholic immigrants from Transcarpathia, it was published in a mixture of Transcarpathian dialect, Church Slavonic, and Russian. It contained articles on church affairs and on religious and historical topics. Editors of *Nebesnaia tsaritsa* included P. Dolynai and V. Sheregy (Shereghy).

Nečas, Jaromir, b 17 November 1888 in Nové Město na Moravě, Czechoslovakia, d 1944. Czech political leader and Ukrainianophile. In 1919 he was a secretary of the Directorate of Subcarpathian Ruthenia, and in 1924, a deputy (of the Social Democratic party) from Transcarpathia to the Czechoslovak parliament. Eventually he became minister of public health. He supported Ukrainian national aspirations in Transcarpathia and wrote popular works about the Ukrainian cause, such as *Východoevropská tragédie a Ukrajina* (The East European Tragedy and Ukraine, 1919).

Nechai, Danylo [Nečaj], b ?, d 21 February 1651 in Krasne, Podilia. Cossack leader during the Cossack-Polish War; brother of I. *Nechai. The first colonel of Bratslav regiment (1648–51), he came from a noble family and distinguished himself in the battles of Pyliavtsi in 1648 and Medzhybizh, Zbarazh, and Zboriv in 1649. After the Treaty of Zboriv he protected the peasantry from the Polish nobility. Together with T. Khmelnytsky he took part in the campaign against Moldavia, during which he captured Iași in September 1650. During the war of 1651 he defended the southwest sector of the front and died in battle against a numerically superior Polish force led by M. Kalinowski. Nechai was glorified in Ukrainian historical songs and dumas. Books about him by L. Polukhin (1954) and O. Lola (1956) have been published in Kiev.

Nechai, Ivan [Nečaj], b and d ? Cossack leader; brother of D. *Nechai and husband of Hetman B. Khmelnytsky's daughter, Stepanyda. He was Khmelnytsky's consul in the Crimean Khanate (1650–3) and was acting hetman of Belarus in command of the Belarusian regiment (1656–9) after I. Zolotareno's death. Continuous Muscovite attempts to annex southern Belarus resulted in conflict with his troops. Nechai supported the Treaty of *Hadiache. He was captured during the Ukrainian-Muscovite War of 1659 and exiled to Tobolsk until 1663. His subsequent fate is unknown.

Nechai, Mykhailo [Nečaj, Myxajlo], b 8 November 1919 in Volodymyrivka, Oleksandrivske county, Katerynoslav gubernia. Socialist-realist writer; former secretary responsible for the Dnipropetrovske branch of the Writers' Union of Ukraine. He has written several collections of literary sketches; the novels *Virnist'* (Fidelity, 1958), *Dity zemli* (Children of the Earth, 1960), *Liudyna zhyve liubov'iu* (A Person Lives by Love, 1961), *Nebo dushi tvoiei* (The Sky of Your Soul, 1963), *Bili lebedi* (White Swans, 1970), *Skhidnyi bastion* (The Eastern Bastion, 1972), *Liubov i pam'iat'* (Love and Memory, 1977, 1984), *Shumiv suvoro okean* (Grimly the Ocean Groaned, 1982), and *Tryvozheni nashi dni* (Troubling Are Our Days, 1987); and the novelette collection *Sotvory svoiu doliu* (Create Your Own Fate, 1981).

Nechai, Pavlo [Nečaj], b and d ? Writer. In the 1920s and early 1930s he was a member of the peasant writers' group Pluh. He wrote the humor collections *Safatova dolyna* (Safatova [Josaphat's] Valley, 1926) and *Zacharovane kolo* (The Enchanted Circle, 1929) and the trilogy *Kalynovi lyst* (The Viburnum Leaf, 1931). In 1933 he was condemned as a 'kulak' writer and repressed. His fate is unknown.

Necherda, Borys [Nečerda], b 11 July 1939 in Yaresky, Andrushivka raion, Zhytomyr oblast. Poet of the **shestydesiatnyky* generation; secretary responsible for the Odessa branch of the Writers' Union of Ukraine. His early seafaring poems are reminiscent of those of O. *Vlyzko written in the 1920s. He has written the collections *Materyk* (The Mainland, 1963), *Lada* (1965), *Barel'iefy* (Bas-reliefs, 1967), *Poezii* (Poems, 1970), *Litak u krapli burshtynu* (An Airplane in a Drop of Amber, 1972), *Tanets' pid doshchem* (A Dance in the Rain, 1978), *Vezha* (The Tower, 1980), *Udvokh iz matir'iu* (Alone with Mother, 1983), and *Poezii* (1984).

Ivan Nechui-Levytsky (portrait by Ivan Trush, 1909)

Nechui-Levytsky, Ivan [Nečuj-Levyc'kyj] (pseud of Ivan Levytsky; other pseuds: I. Nechui, I. Bashtovy, Hr. Hetmanets, O. Krynytsky), b 25 November 1838 in Stebliv, Kaniv county, Kiev gubernia, d 15 April 1918 in Kiev. Writer. Upon graduating from the Kiev Theological Academy (1865) he taught Russian language, history, and geography in the Poltava Theological Seminary (1865–6) and, later, in the gymnasiums in Kalisz, Siedlce (1867–72), and Kishinev (1873–4). He began writing in 1865, but because of Russian imperial censorship his works appeared only in Galician periodicals, such as *Dilo*, *Pravda*, and *Zoria*. The first to be published were two stories, 'Dvi moskovky' (Two Muscovite Women) and 'Horyslav'ska nich, abo Rybalka Panas Krut' (A Night in Horyslav, or Panas Krut the Fisherman), both of which appeared in *Pravda* in 1868. He mainly wrote stories, in which he combined the styles of the novel and the folkloric narrative. His works about the lives of peasants and laborers established him as a master of Ukrainian classical prose and as the creator of the Ukrainian realist narrative. They include *Mykola Dzheria* (1878), *Kaidasheva sim'ia* (Kaidash's Family, 1879), *Burlachka* (The Wandering Girl, 1880), *Ne toi stav* ([He] Changed, 1896), and the cycle of short stories *Baba Paraska ta baba Palazhka* (Granny Paraska and Granny Palazhka, 1874–1908). The Ukrainian clergy was described and satirized in *Starosviits'ki batiushky ta matushky* (Old-World Priests and Their Wives, 1888), *Pomizh vorohamy* (In the Midst of Enemies, 1893), and *Afons'kyi protidyvit* (The Vagabond from Athos, 1890). The Polish aristocracy and the Polonized Ukrainian middle class are portrayed in *Prychepa* (The Hanger-on, 1869) and *Zhyvtsem pokhovani* (Buried Alive, 1898). Nechui-Levytsky was the first to provide fictional characterizations of various classes of the Ukrainian intelligentsia, ranging from students and teachers to high-ranking members of the Russian civil service. Against a background of colonial repression and thoroughgoing Russification Nechui-Levytsky sought to depict the stirrings of national consciousness in the Ukrainian intelligentsia and their attempts to 'place first on the agenda the inevitability of national liberation' (O. Biletsky). Those attempts on the part of his protagonists usually bring about their downfall. Such is the theme of *Khmary* (Clouds, 1874), the first Ukrainian work of fiction to address the problem, of *Nad Chornym Morem* (On the Black Sea Coast, 1890), of *Navizhena* (The Madwoman, 1891), and of many other works. Nechui-Levytsky also wrote historical fiction (mainly under the influence of M. Kostomarov), including *Zaporozhtsi* (The Zaporozhians, 1873),

Kniaz' Ieremiia Vyshnevets'kyi (Prince Jeremi Wiśniowiecki, 1897, first pub 1932), and *Het'man Ivan Vyhovs'kyi* (1899). His plays included the historical dramas *Marusia Bohuslavka* (1875) and *V dymu ta polum'i* (In the Smoke and the Flames, 1911), the comedies *Na Kozhum'iakakh* (In Kozhumiaky; adapted by M. Starytsky in 1875 and published as *Za dvoma zaitsiamy* [Chasing After Two Hares]) and *Holodnomu i open'ky m'iaso* (For a Starving Man Even Mushrooms Are Meat, 1887), and children's interludes.

Nechui-Levytsky also wrote popular works on Ukrainian mythology, history, and ethnography, and numerous articles about Ukrainian theater and the various people active in it. In his articles on Ukrainian literature, such as 'S'ohochasne literaturne priamuvannia' (The Contemporary Literary Trend, 1878, 1884) and 'Ukrainstvo na literaturnykh pozvakh z Moskovshchynoiu' (The Ukrainian Community in Literary Litigation with Russia, 1891), he championed the idea of a national literature formed independently of outside influences, and asserted that 'Russian literature is useless [as a model] for Ukraine.'

In the field of linguistics Nechui-Levytsky was categorically opposed to the dissemination of the Galician variant of the literary language and to the orthography adopted in Galicia in the 1890s and 1900s. His polemical brochures *S'ohochasna chasopysna mova na Ukraini* (Contemporary Language of the Press in Ukraine, 1907) and *Kryve dzerkalo ukrains'koi movy* (The Distorted Mirror of the Ukrainian Language, 1912) were written in the spirit of conservative romanticism. He argued for a pure national lexicon and phraseology that was to be kept clean of all neologisms and foreign expressions. In his own works, however, he frequently used the grammatical and lexical dialectal forms of the nearby Russian territories, and he refused to allow any corrections. His inconsistency is most evident in his amateurish *Hramatyka ukrains'koho iazyka* (A Grammar of the Ukrainian Language, 1914).

Nechyporenko, Prokip [Nečyporenko], b and d ? Historian. In the 1920s he was a graduate student in the Kiev Scientific Research Department of the History of Ukraine. Several of his articles on the socioeconomic history of the 18th-century Hetmanate (particularly during the hetmanacy of K. Rozumovsky) were published in the VUAN serials *Ukraina* (1926–7), *Zapysky Istorychno-filolohichnogo viddil'u* (1927–8), *Naukovyi zbirnyk* (1927), *Istorychno-heohrafichni zbirnyk* (1927), and *Studii z istorii Ukrainy* (1929). He was repressed in the early 1930s, and his further fate is unknown.

Nechytailo-Andriienko, Mykhailo. See Andriienko-Nechytailo, Mykhailo.

Nedbailo, Petro [Nedbajlo], b 12 July 1907 in Novonovytske, Surazh county, Chernihiv gubernia, d 31 Oc-

tober 1974 in Kiev. Lawyer and jurist; corresponding member of the AN URSR (now ANU) from 1969. A graduate of the Kharkiv Juridical Institute (1930), he chaired the law department at Lviv (1940–1, 1946–59) and Kiev (from 1959) universities. He served on several delegations from the Ukrainian SSR to the United Nations before becoming, in 1958, a permanent representative to the UN Commission on Human Rights. A specialist in human rights, legal and state theory, and the theory of socialist law, he authored over 70 works, including *Osnovy teorii derzhavy i prava* (The Foundations of the Theory of the State and Law, 1959), *Sovetskie sotsialisticheskie pravovye normy* (Soviet Socialist Legal Norms, 1959), and *Primenenie sovetskikh pravovykh norm* (The Application of Soviet Legal Norms, 1960).

Nedilia (Sunday). A periodical published in Lviv, weekly in 1865 (50 issues) and semimonthly in 1866 (23 issues). It contained Gospel readings, catechism lessons, poetry, prose, folklore, and popular articles on religion, history, culture, farming, crafts, trade, and hygiene. The editor was M. Popel. Among the contributors were A. Dobriansky, V. Ilnytsky, H. Lehin, I. Naumovych, and S. Kachala.

Nedilia (Sunday). The name of three weekly papers for the 'Ruthenian' peasants of Transcarpathia. The first was funded by the Hungarian Ministry of Agriculture and published in Budapest from 1897 to 1918. Edited by K. Demko (1897–9) and M. Vrabel (1899–1918), it was published in the Transcarpathian dialect. From 1916 to 1918 it was forced to appear in the Hungarian alphabet. The second *Nedilia* was funded by Bishop O. Stoika of Mukachiv. Published in Uzhhorod from October 1935 to 1938 and edited by E. Bokshai, it appeared in an artificial language based on the Transcarpathian dialect and promoted a non-Russophile, non-Ukrainian, 'Ruthenian' identity, Greek Catholicism, and loyalty to the Czechoslovak Republic. The third *Nedilia* was published in Uzhhorod after the defeat and occupation of the Carpatho-Ukrainian state by Hungary. Edited by O. Ilnytsky under the title *Karpatska nedilia* (1939–41) and by A. Nemet as *Nedilia* (1941–4), it was the unofficial organ of Mukachiv eparchy and promoted a pro-Hungarian 'Ugro-Ruthenian' identity. It was closed down after the Soviet occupation of Transcarpathia.

Nedilia (Sunday). A popular illustrated weekly of culture and community affairs, published from January 1911 to the end of 1912 in Lviv as a supplement to the newspaper *Dilo*. It was edited by V. Shchurat and Ya. Vesolovsky (from the 18th issue). Its numerous contributors included I. Franko, I. Krypiakievych, M. Vozniak, S. Tomashivsky, Yu. Romanchuk, and V. Pachovsky. *Nedilia* did much to popularize Ukrainian history and culture and published many translations of Western European literature.

Nedilia (Sunday). A popular illustrated weekly published in Lviv from 1928 to 1939. It carried articles on cultural and literary topics and popular enlightenment. Initially published by M. Holubets and R. Holian, it was bought by the *Ukrainian Catholic Union in 1931. In 1930 its circulation was 8,000. *Nedilia* published a parallel edition for Ukrainians in Volhynia with coverage of events there, *Volyns'ka nedilia* (ed S. Vyshnivsky), in Lviv (1928–34) and Lutske (1935–9); a monthly supplement, *Svit*

(1931); books of new Ukrainian prose and poetry, translated literature, and regional studies; and the annual almanac *Krynytsia* (1934–9). A. *Kurdydyk contributed regularly to the paper.

Nedilia (Sunday). A weekly (with interruptions) newspaper for Ukrainian displaced persons, published from December 1945 to 1949 in Schweinfurt and Aschaffenburg, Germany, and edited by H. Kotorovych. During its first year it was printed in the Latin alphabet. Among its contributors were A. Kurdydyk, T. Lapychak, M. Livytsky, S. Pidhainy, S. Rosokha, M. Stakhiv, O. Shtul-Zhdanovych, and A. Zhyvotko. From 1950 to 1956 it was published irregularly in Augsburg.

Mykola Nedilko: *On the Dniester* (oil, 1942)

Nedilko, Mykola, b 23 November 1902 in Yushchenivka, Sumy county, Kharkiv gubernia, d 12 May 1979 in Glen Cove, New York. Artist. While studying at the Kiev State Art Institute (1922–8) under F. Krychevsky and M. Boichuk he joined the *Association of Revolutionary Art of Ukraine. In 1940 he came with M. Azovsky and M. Dmytrenko to Soviet-occupied Lviv. He remained there after the 1941 Soviet evacuation, joined the *Labor Association of Ukrainian Pictorial Artists, and exhibited at its shows. A postwar refugee in Germany, he emigrated in 1948 to Buenos Aires and in 1961 to New York. Solo exhibitions of his works were held in New York (1962, 1965, 1966, 1980), Paris (1965), Philadelphia (1966, 1982), and Edmonton (1983). He is best known for his landscapes, painted usually *en plein air*. They include *On the Dniester* (1942), *Bodensee* (1948), *The Andes* (1958), and *Lake George* (1966). His postimpressionist oils are built on strong contrasts of light and shadow, and color. A book about Nedilko (ed B. Pevny), with 60 color plates, was published in New York in 1983.

Nedilsky, Ivan [Nedil's'kyj], b 25 July 1895 in Potik Zoloty, Buchach county, Galicia, d 5 June 1970 in New York. Composer and teacher. He graduated from the Stern Conservatory in Berlin in 1924 and then worked for the Stanislaviv branch of the Lysenko Higher Music Institute as a teacher of cello and music theory and as director (1930–9). He continued to serve as the music school director in

Stanyslaviv under the Soviet and German occupations until 1944, subsequently emigrating to the United States via Germany. In 1952 he cofounded the *Ukrainian Music Institute of America and began teaching in its New York school. His works and arrangements are mainly for chorus and include the popular march 'Zasiato sontse zolote' (The Golden Sun Shone Forth) and a *Divine Liturgy* (1948). His collection *Selected Works for Mixed Chorus a Cappella* was published in 1982 by the Ukrainian Music Foundation. Nedilsky also wrote solo songs and theater, chamber, and piano music.

Sofron Nedilsky

Nedilsky, Sofron [Nedil's'kyj], b 10 January 1857, d 8 August 1917 in Bielsko-Biala, Poland. Galician lexicographer and educator. While teaching at the Ukrainian gymnasium in Stanyslaviv, he helped found the *Ruska Besida society and completed vol 2 of Ye. *Zhelekhivsky's Ukrainian-German dictionary (1886). Later he was the first principal of the Ukrainian gymnasium in Kolomyia (1894–1914). In 1914 he became a representative on the Provincial School Council and was evacuated to Poland.

Nedolia, Leonyd [Nedolja] (pseud of Lukian Honcharenko), b 19 September 1897 in Tsysarska Sloboda (now Chervona Sloboda), Cherkasy county, Kiev gubernia, d 5 July 1963 in Cherkasy. Writer, journalist, and political activist. He was exiled to Siberia for his revolutionary activities during the First World War, and returned to Ukraine after the establishment of Soviet rule there. After the Second World War he worked as a journalist in Cherkasy. Nedolia is the author of numerous collections of short stories and studies, including *Smert' pryvatnii kukhni* (Death to the Private Kitchen, 1925), *Zhyvi braty: Kriz' Khiny* (Real Brothers: Through China, 1929), *Ponevoleni khintsi* (The Oppressed Chinese, 1931), and *Na kytai's'kii zemli* (In Chinese Territory, 1934), and the poem 'Svoi prava' (One's Own Rights, 1931).

Nedoshytko, Oleh [Nedošytko], b 27 January 1950 in Odessa. Painter and teacher. After graduating from the Odessa Pedagogical Institute's Faculty of Art in 1977, he worked as an instructor there until 1985. His early work consists of landscapes of the environs of Odessa executed in an impressionist manner, full of sunlight and displaying a great sensitivity for color tonalities (eg, *Cossack Church*, 1980). Since the mid-1980s his paintings have been

more expressionistic, executed in a slashing brush stroke with a high-intensity palette (eg, *Forgotten Melody* and *Festival Evening*, 1988).

Nedrigailov, Viktor [Nedrigajlov], b 8 November 1865 in Kursk, Russia, d 27 April 1923 in Petrograd. Microbiologist. After graduating from Kharkiv University in 1893, he worked at the Kharkiv Bacteriological Institute, from 1908 as its director. He organized the large-scale production of antidiphtheria serum and edited *Kharkovskii meditsinskii zhurnal*. From 1914 he was a department head at the Institute of Experimental Medicine and lecturer at the Women's Medical Institute in Petrograd. He discovered a laboratory method of diagnosing cholera and a vaccination method against gas gangrene.

Nedryhailiv [Nedryhajliv]. III-14. A town smt (1990 pop 6,700) on the Sula River and a raion center in Sumy oblast. It was founded in the 1640s, and served as a fortress defending Slobidska Ukraine and as a company center in Sumy regiment. In 1780–96 it was a county center in Kharkiv vicegerency. It attained smt status in 1958. Its main enterprises are a dairy and a canning factory.

Nedzvedsky, Mykola [Nedzveds'kyj], b 12 December 1891 in Kiev, d 3 September 1977 in Washington, DC. Composer, musicologist, and pedagogue. A graduate of the Kiev Music and Drama Institute (1927), he studied composition with H. Liubomyrsky, R. Glière, and B. Liatoshynsky. He was a lecturer at the Kiev Workers' Conservatory (1929–31) and from 1936 a professor at the Kiev Conservatory. In 1943 he emigrated to the West. He continued teaching in Bavaria, Morocco, and the United States and became a professor at the Ukrainian Music Institute in Washington, DC. Among his pupils were the composers I. Bilohrud and G. Fiala. His works include the symphonic overture *Dorian Gray*, the orchestral suite *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors), the symphonies *Ashkhabad* and *Fez*, and the piano quintet *Testament*.

Nefelin, Vasyl (pseud of Vasyl Nahorsky), b 13 March 1907 in Svaromia, Kiev county, d 11 June 1968 in Oster, Chernihiv oblast. Writer and journalist. He graduated from the teachers' institute in Chernihiv and worked on the editorial board of the journal *Pluh and for the newspapers *Bil'shovyk* and *Kolhospne zhyttia*. He began his literary career in the 1920s. His first short stories and poems were published in *Pluh*. He published the short story collections *Iz hlybyny* (From the Depths, 1930, compiled by S. Pylypenko), *Sulons'ki opovidannia* (Sulon Stories, 1959), *Zolote vidertse* (The Golden Pail, 1962), and *Liubov* (Love, 1965), the novel *Budni* (Ordinary Days, 1930), and the autobiographical *Ranok ioho zhyttia* (The Morning of His Life, 1960). He was imprisoned in Stalinist labor camps (1937–44).

Neformaly. Groups, associations, and political organizations that emerged in the USSR during the M. Gorbachev period. Such groups were called informal (*neformalni*) or unofficial because they were not part of CPSU or state structures and had no juridical status under Soviet law. Of the hundreds of such organizations that came into being, only a few were officially registered in 1990 (with all the

attendant rights to nominate candidates in elections and have a bank account). Among the most significant are the *Memorial society, which is dedicated to chronicling and rehabilitating the millions of victims of Soviet repression, the Zelenyi Svit Ukrainian Ecological Association, the Ukrainian Language Society, and the Popular Movement of Ukraine (Rukh). Zelenyi Svit and the Ukrainian Language Society each have approximately three-quarters of a million members.

The amnesty of *political prisoners, many of whom were hardened political activists, in the early part of 1987 was the catalyst that launched the wide-scale growth of unofficial groups. The amnesty also coincided with the launching of the policy of glasnost, which led to a general liberalization and democratization of Soviet society. Under glasnost the number of people willing to participate in activities hitherto subject to severe repression increased dramatically.

The first large organization to be established was the Ukrainian Language Society, headed by D. *Pavlychko. Its founding congress was held on 11–12 February 1989 in Kiev. The society promotes the use and development of the Ukrainian language and actively campaigns against Russification. It publishes two newspapers, *Slovo* (Kiev) and *Prosvita* (Lviv). Soviet officialdom had hoped that the emerging Ukrainian national movement would confine itself to promoting the Ukrainian language and culture and not pursue more political goals. By granting the society official recognition, however, the state in fact created a legal framework for political opposition to the state. The society provided office space for Rukh and nominated its own oppositional candidates in elections.

The largest and most important organization in Ukraine in the early 1990s was Rukh. It was formed on the initiative of members of the ANU Institute of Literature and the large Kiev branch of the Writers' Union of Ukraine. Rukh's draft program was published in *Literaturna Ukraina* in mid-February 1989. Between February and September 1989 the CPU engaged in a counterproductive media campaign against Rukh. The campaign backfired: its effect was to attract many new members to Rukh and thereby increase its influence. Rukh is a coalition of all the main unofficial groups in Ukraine. Its founding congress in Kiev on 8–10 September 1989 was attended by 1,200 delegates, who elected I. *Drach their head. Rukh sponsored numerous initiatives designed to break the monopoly of the Party and state apparatus and campaigned for the adoption of a more democratic electoral law. On 21 January 1990 it held its most successful event – a human chain of some one million people holding hands from Ivano-Frankivske to Lviv and on to Kiev – to commemorate the 1919 proclamation of the union of the UNR with the Western Ukrainian National Republic. Rukh was not registered in time to field candidates for the 4 March 1990 elections to the Ukrainian Supreme Council. It was, however, the main force behind the Democratic Bloc that won almost a quarter of the seats in the Supreme Council. Immediately after the elections (which were marked by large-scale fraud and irregularities) prominent Rukh members, including Drach and Pavlychko, called for the transformation of Rukh into a political party that would advocate Ukraine's independence and a multiparty system. On 24 March 1990 the Great Council of Rukh meeting voted against the proposal, considering it inadvisable to trans-

form a large coalition of diverse forces into a political party.

The largest number of independent newspapers and bulletins in Ukraine has been published by Rukh (over 30 titles from every region of Ukraine). The CPU leadership, though tolerating Rukh's existence, did everything in its power to block Rukh's growth. Thus, Rukh was not registered by the Council of Ministers or allowed to publish its official organ, *Narodna hazeta*, until February 1990. Because supplies of newsprint were restricted, the circulation of the newspaper was limited to 10,000 copies.

Two of the first *neformaly* to be established in Ukraine were the *Ukrainian Helsinki Group (UHG) and the Ukrainian Association of Independent Creative Intelligentsia. In August 1987 V. Chornovil, the dissident and former political prisoner (who was elected in 1990 to Ukraine's Supreme Council, and who also held the chairmanship of the Lviv Oblast Council), signaled the launching of the Ukrainian unofficial movement with his open letter to Gorbachev. The open letter announced the re-establishment on 30 December 1987 of the journal **Ukrains'kyi visnyk*, which he had edited as a *samvydav publication in 1970–2. The UHG was renamed the Ukrainian Helsinki Association in 1988, and attracted approx 600 members. At its congress in Kiev on 29–30 April 1990 the association was dissolved and replaced by the new Ukrainian Republican party. Headed by L. *Lukianenko, the party was the first non-Communist party registered in Ukraine.

The Ukrainian Association of Independent Creative Intelligentsia was formed in October 1987 as an unofficial writers' and cultural-workers' union. It has published the journal *Kafedra*, edited by M. Osadchy in Lviv, and four other literary journals: *Ievshan zillia* (Lviv), *Skarby hir* (Ivano-Frankivske), *Porohy* (Dnipropetrovsk), and *Snip* (Kharkiv). One of the first *neformaly* formed in Kiev was the Ukrainian Culturological Club, in September 1987. With the increased politicization of the population, the club disbanded at the beginning of 1989, and its members joined the Helsinki Association and other groups. Among the most active cultural and educational groups in Ukraine has been Lviv's *Lev Society (est 1987).

The Memorial society held its founding congress on 4 March 1989 in Kiev. Its most active branches are in Lviv (which publishes *Poklyk sumlinnia*) and Ternopil (which publishes *Dzvin*) oblasts. The western branches of Memorial have undertaken to document the scope of repression carried out by Soviet occupational forces after the absorption of Western Ukraine into the Soviet Union.

Zelenyi Svit, which publishes a newspaper of the same name, held its founding congress in Kiev on 28–29 October 1989. It began as a purely ecological and anti-nuclear power group, but under the leadership of Yu. *Shcherbak it has become increasingly politicized. It joined the Democratic Bloc formed in November 1989 as an umbrella group of all *neformaly* during the Supreme Soviet election campaign, and a few days before the fourth anniversary of the Chernobyl nuclear accident on 22 April 1990, it launched the Green Party of Ukraine.

One of the first student *neformaly* was the Hromada society at Kiev University, formed in the spring of 1988. It represented the new generation of radical student activists brought to the fore under glasnost. Hromada published the uncensored journal *Dzvin* and organized numerous meetings in Kiev, including the first large stu-

dent demonstration in November 1988, and a boycott of military education classes. By the middle of 1989 Hromada had ceased to exist. Most of its members joined new, more overtly political organizations.

Other youth and student *neformaly* were created in most Ukrainian cities and postsecondary schools. In February 1990 the western Ukrainian Student Brotherhood (which published the newspaper *Bratstvo* and the journal *Vikno*) and the Ukrainian Student Association in central and eastern Ukraine (which published the newspaper *Svoboda*) joined together to form the Confederation of Ukrainian Students and organized political mass strikes at universities and polytechnical institutes. A 1989 survey published in the Soviet Ukrainian press showed that over 800 new sociopolitical clubs were operating in Ukraine's postsecondary institutions. Some of the more significant youth groups created in the late 1980s were the nationalist Association of Independent Ukrainian Youth (the youth wing of the Ukrainian Helsinki Union), which published *Moloda Ukraina* in Lviv and *Rada* in Kiev, and the revived scouting *Plast Ukrainian Youth Association. Over 20 new noncommunist political parties also emerged.

Ukrainians living in other Soviet republics also formed *neformaly*. The Moscow-based Slavutych Society, founded in 1988 and headed by the former cosmonaut P. Popovych, is among the most active. National minorities in Ukraine (Jews, Poles, Greeks, Hungarians, and Crimean Tatars) have also organized independent associations and published their own bulletins.

The *neformaly* and their publications attracted a mass following and readership and challenged the Communist monopoly of power. From the late 1980s they published some 200 independent, uncensored periodicals, with circulations ranging from 500 to 10,000. Although they were harassed by the authorities, the *neformaly* persevered and were the harbingers of a renewed civil society and national movement. The abolition of article 6 of the Constitution of the USSR (which enshrined the leading role of the CPSU in all spheres of life) allowed the possibility of a multiparty system and served to stimulate autonomous political activity and the articulation of bold political demands. The end result was the collapse of the Communist regime and the proclamation of Ukraine's independence in 1991.

T. Kuzio

Negrich, Ivan [Negryč] (Negrych), b 1876 in Berezhiv, Kolomyia county, Galicia, d 25 October 1946 in Winnipeg.

Ivan Negrich

Teacher, community leader, and journalist. Active in the Galician Ukrainian radical movement, Negrich emigrated to Canada in 1897, where he attended Manitoba College (Presbyterian) in Winnipeg in 1900 and taught school in rural Manitoba. One of the initiators of the *Independent Greek church in 1903, and briefly a priest in it, he embraced the Russian Orthodox faith in 1908. He was also the first editor (1903–5) of **Kanadiis'ky farmer*, the first Ukrainian newspaper in Canada. In 1916 he served as a member of the Ukrainian delegation that lobbied the government of Manitoba to retain the bilingual school system.

Nehalevsky Gospel (Nehalevskoho yevanheliie). A 16th-century literary monument, preserved at one time at St Michael's Monastery in Kiev. It is a translation of the four Gospels into vernacular Ukrainian made by V. Nehalevsky in 1581 in Khoroshiv, near Ostrih, on the basis of M. Czechowicz's Polish translation of the New Testament (1577). The language is almost free of Church Slavonicisms, and its syntax and lexicon are strongly influenced by Polish. In places the Polish version has been transcribed in the Cyrillic alphabet. The gospel's language was analyzed by O. Nazarevsky (*Kievskiiia universitetskiiia izvestiia*, 1911, nos 8, 11–12), O. Nazariiv (*Zapysky NTSh*, vol 110 [1912]), and I. Ohienko (1922).

Nehrebetsky, Ivan [Nehrebec'kyj], b 1853, d 25 May 1927 in Yasenytsia Silna, Drohobych county, Galicia. Greek Catholic priest and civic leader. He published and edited (1898–1905) the paper **Hospodar* in Peremyshl and wrote popular books on farming (published by the Prosvita society) as well as articles in the press.

Nehrovets Ridge [Nehrovec']. A mountain ridge of the Carpathian Mountains in Transcarpathia oblast. The ridge stretches along the left bank of the Tereblia River and is bordered by the Gorgany Mountains in the north and the Krasna Ridge of the Polonynian Beskyd in the south. It rises to a height of 1,707 m. Conifers and beech trees grow on the lower slopes of the ridge; higher up there are thickets of mountain pines, alders, and Siberian junipers as well as patches of meadowlands. The ridge sits in an avalanche zone.

Neimark, Izrail [Nejmark, Izrajil], b 21 August 1907 in Pidhorodne, Novomoskovske county, Katerynoslav gubernia. Chemist. A graduate of the Dnipropetrovske Institute (1931), from 1933 he worked at the AN URSR (now ANU) Institute of Physical Chemistry, where he became a department head (1957–75) and a scientific consultant (from 1975). He studied the synthesis, structure determination, and surface chemistry of mineral adsorbents and catalyst carriers, and worked on theories of gas and water adsorption. He was the first in the USSR to synthesize molecular sieves (zeolites).

Nejedlý, Zdeněk, b 10 February 1878 in Litomyšl, Moravia, d 9 March 1962 in Prague. Czechoslovak statesman, historian, and music and literary critic; member of the Czech Academy of Sciences and Arts from 1907, full member of the Shevchenko Scientific Society from 1923, and founder and president (from 1952) of the Czechoslovak Academy of Sciences. A graduate of Prague University, he was a professor there (1909–39, 1945–62) and at

Moscow University (1939–45). In the interwar period he published a book (1920) about the Ukrainian Republican Kapelle and articles about the plight of Transcarpathia's Ukrainians, the Ukrainian question, T. Shevchenko, and O. Korniihuk. During the Second World War his articles on Transcarpathian history, Shevchenko, and Czech-Ukrainian relations appeared in periodicals published in Moscow. His archive contains book-length manuscripts on Galicia's Ukrainians under Austrian rule and on the history of Western Ukraine.

Nekhoda, Ivan [Nexoda], b 24 June 1910 in Oleksiivka, Bohodukhiv county, Kharkiv gubernia, d 17 October 1963 in Kiev. Socialist-realist poet and screenwriter. He completed studies at the Kharkiv Institute of People's Education in 1932 and later worked as a teacher on the editorial staff of the newspaper *Na zminu*. He was chief editor of the Molod publishing house (1945–57) and headed the Crimean branch of the Writers' Union of Ukraine (1957–63). A prolific poet, from 1931 on Nekhoda published some three dozen collections, many of them for children. He also wrote a novel in verse about the Second World War, *Khto sie viter* (Who Sows the Wind, 1959). Editions of his selected works appeared in 1949, 1956, 1960, and 1980.

Nekrashevych, Ivan [Nekraševyč], b 1742 in Vyshenky, Chernihiv regiment, d after 1796 in Vyshenky. Writer. He graduated from the Kiev Academy (1763) and returned to his native village to serve as a priest. He wrote a number of works of epistolary verse, the theological poem 'Spor dushi i tila' (The Struggle of the Soul and the Flesh, 1773 [published in 1873]), the versified dialogue 'Ispovid' (Confession, 1789), and 'Iarmarok' (The Marketplace, 1790). Many scholars also attribute to him the dialogue 'Zamysl na popa' (A Design against the Priest). His humorous and satirical works were based on folk (mainly Chernihiv) dialect and were written in syllabo-tonic verse.

Nekrasov, Ihnat (Nekras), b ca 1660, d 1737. Don Cossack leader. He took over the Bulavin revolt in 1708 after the death of its leader and solicited the aid of the Zaporozhian Cossacks and other groups. The insurgency was suppressed, and Nekrasov led a group of followers into the Kuban, where he established and led a Cossack republic, continued to raid Russian-controlled territories, and maintained connections with figures such as Charles XII and P. Orlyk. In 1740 the so-called Nekrasovites resettled in Turkey, where they were granted a host of special privileges.

Nekrasov, Viktor, b 17 June 1911 in Kiev, d 3 September 1987 in Paris. Writer. After graduating from the Kiev Construction Institute (1936) and the actors' studio at the Kiev Russian Drama Theater (1937) he worked as an actor and set designer in Kiev. He wrote one of the best Russian-language novels about the war, *V okopakh Stalingrada* (In the Trenches of Stalingrad, 1946), for which he was awarded the 1947 Stalin Prize and was elected a member of the Presidium of the Writers' Union of Ukraine. His novel *V rodnom gorode* (In the Home Town, 1954) and various stories about the war and its social consequences were some of the earliest works of the post-Stalin thaw. His anti-Stalinist novel *Kira Georgievna* (1961) and collection of essays about his visit to Western Europe and the United States,

Po obe storony okeana (On Both Sides of the Ocean, 1962), were condemned by the Soviet authorities, including N. Khrushchev. In the late 1960s and 1970s he spoke out against the persecution of Russian and Ukrainian dissidents (eg, A. Solzhenitsyn, V. Chornovil). In 1973 he was expelled from the CPSU. He was granted permission to emigrate to France in 1974, where he worked as associate editor of the émigré-dissident journal *Kontinent*.

Nekrasov, Zot, b 8 January 1908 in Melitopil, Tavriia gubernia, d 1 December 1990 in Dnipropetrovske. Metallurgist; full member of the AN URSR (now ANU) from 1961. He graduated from the Dnipropetrovske Metallurgical Institute (1930), and in 1952–78 he headed the ANU Institute of Ferrous Metallurgy (until 1992 under the USSR Ministry of Ferrous Metallurgy). He made fundamental contributions in the fields of ferrous metallurgy, blast furnaces, and ores processing.

Nelepo, Boris, b 15 August 1932 in Moscow. Oceanographer; AN URSR (now ANU) corresponding member since 1976 and full member since 1978. A graduate of Moscow University (1955), since 1963 he has worked at the ANU *Marine Hydrophysical Institute in Sevastopol and served as its director (1974–85). In 1980 he was elected a member and an academic secretary of the ANU presidium. He has contributed to the fields of ocean dynamics and nuclear hydrophysics, studied hydrophysics via satellites and the automation of oceanographic measurements, invented devices for measuring oceanic radioactivity, and written a monograph on nuclear hydrophysics (1970).

Metropolitan Yosyf
Neliubovych-Tukalsky

Neliubovych-Tukalsky, Yosyf [Neljubovyč-Tukal's'kyj, Josyf], b ?, d 26 July 1675 in Chyhyryn. Orthodox churchman. He served as archimandrite of the Holy Ghost Monastery in Vilnius (1657–8) and participated in the 1657 church sobor in Kiev, where he was nominated as metropolitan. In 1661 he was consecrated bishop of Orsha and Mstsislau, and in 1663 a sobor of clergy, nobility, and Cossack officers in Korsun elected him metropolitan of Kiev. When this election was not confirmed by the Polish king (who supported the candidacy of Bishop A. *Vynnytsky), an administrative schism erupted in the church, and Tukalsky retained authority over only a part of the Ukrainian church province: Right-Bank Ukraine, Belarus, and Lithuania (but not Galicia, Volhynia, and Podilia). An op-

ponent of Hetman P. Teteria and the Polish government, he was arrested in 1664 and imprisoned in the Marienburg fortress for two years. After Hetman P. *Doroshenko secured his release, Tukalsky resumed the metropolitan's post and settled near the hetman's residence in Chyhyryn; the Patriarch of Constantinople confirmed his election as metropolitan and exarch in 1668. He served as Doroshenko's close adviser and supported his pro-Turkish and anti-Polish and -Russian policies. In church affairs he opposed any rapprochement with the Moscow patriarchate, which stance brought him in opposition to the representative of the Moscow patriarch in Kiev, M. *Fylymonovych. After Tukalsky's death his remains were moved to the Mhar Transfiguration Monastery, and his archives were stored at the Kievan Cave Monastery.

I. Korovytsky

Nemet, Myroslav, b 14 June 1943 in Malyi Bereznyi, Transcarpathia. Ukrainian writer in the Prešov region of Slovakia. He graduated from the Prešov division of Košice University in 1966 and since then has worked as an editor with the Ukrainian literature department of the Slovak Pedagogical Publishing House in Prešov. He is the author of three collections of lyrical, love, and didactic poetry – *Poliusy sertsia* (The Poles of the Heart, 1968), *Pryboi* (Breakers, 1975), and *Soit v zeleni* (The World in Verdure, 1978) – and of the story collections *Opovidannia z-pid hory* (Stories from beneath the Mountain, 1984) and *Ostannie vesillia* (The Last Wedding, 1989).

Nemoshkalenko, Volodymyr [Nemoškalkenko], b 26 March 1933 in Stalingrad (now Volgograd), Russia. Physicist; full AN URSR (now ANU) member since 1982. After graduating from the Kiev Polytechnical Institute (1956) he joined the ANU Institute of Metal Physics, where he became a department head in 1963 and deputy director in 1973. Using x-ray spectroscopy, he has investigated the electronic structure of real solids, particularly transition metals and their alloys, and contributed significantly to the understanding of the changes in electronic structure that occur in the transition of solids from a crystalline to an amorphous state.

Nemyriv. III-4. A town smt (1990 pop 2,100) in Yavoriv raion, Lviv oblast. In 1580 it was granted the rights of *Magdeburg law. Because of its hydrogen sulfide springs a balneological health resort was established there in 1815. The town is still known for its mineral baths, which are used to treat cardiovascular, skin, and nerve disorders.

Nemyriv. V-9. A city (1990 pop 11,400) and raion center in Vinnytsia oblast. It was founded at the end of the 14th century, and came under Polish rule after the Union of Lublin (1569), under Turkish rule (1672–99), and under Russian rule after the partition of Poland in 1793. It attained city status in 1985. Nemyriv has several enterprises of the food industry. Its architectural monuments include a 19th-century palace and park and two churches, built in 1801 and 1881.

Nemyriv fortified settlement. An Early Scythian (7th–6th century BC) fortified settlement on both banks of a tributary of the Boh River near Sazhky, Nemyriv raion, Vinnytsia oblast. Excavations from 1909 to 1948 identified

the remains of defensive earthen walls and trenches. It was found that the inhabitants lived in large (up to 6 m in diameter) pit dwellings. Clay ovens, earthenware, and bronze arrowheads were among the artifacts recovered at the site.

Nemyrovsky, Yevhen [Nemyrovskij, Jevhen], b 24 April 1925 in Zinovivske (now Kirovohrad). Library scientist. He graduated from the Moscow Correspondence Printing Institute (1950) and headed a department at the State Library of the USSR from 1974 (professor from 1979). His works deal with the history of Slavic book printing in Cyrillic; among them are three studies of I. Fedorovych (1964, 1974, 1979).

Nemyrovych, Ivan [Nemyrovč], b 20 February 1928 in Nyzhnodniprovske (now part of Dnipropetrovske), d 17 June 1986 in Kiev. Writer and banduryst. He played with the Dnipropetrovske Philharmonic after the Second World War and with the State Banduryst Kapelle of the Ukrainian SSR from 1953. From 1959 to 1964 he was assistant director and then director of the Republican Building of Litterateurs in Kiev. He graduated from the Faculty of Journalism of Kiev University in 1965 and later worked for the satirical magazine *Perets*. From 1956 on he published over 30 books of poetry and humor and satire. Nemyrovych also wrote a book about the composer O. Bilash (1979), the novel *Na bilomu koni* (On a White Horse, 1979), and a book of essays about contemporary Ukrainian kobzars and bandurysts (1986). Published posthumously were selections of his humorous novelettes (1987) and poetry (1988).

Nemyrych [Nemyryč] (Polish: Niemiryecz). Originally an Orthodox noble family in Right-Bank Ukraine, known from 1528. Yosyf was the judge of the Kiev land court (1580–90). His son Andrii (d 1610) replaced him and began a branch of the family in Cherniakhiv, north of Zhytomyr. Andrii's son, Stefan (d 1630), studied before 1610 at the Altdorf Academy and Basel University in Switzerland, converted to *Socinianism, and established a Socinian center in Cherniakhiv and other congregations in Volhynia. He served as chamberlain of Kiev (ca 1623–30) and was a member of the Polish commission that negotiated the 1625 Treaty of *Kurukove with the Cossacks. At the end of his life he owned 12 towns and 75 villages in Volhynia and the Kiev region. Yurii *Nemyrych and Stefan *Nemyrych were his sons. Stefan's heirs continued a Polonized line of the family into the 20th century. A second line of the family, in Olevske, was descended from Yosyf's son Matvii, the founder of the Lublin Orthodox Brotherhood. It became Polonized and Catholic in the second half of the 17th century and died out in the 18th.

Nemyrych, Stefan [Nemyryč] (Polish: Niemiryecz), b ca 1626–30, d 22 February 1684. Ukrainian magnate and religious and military leader; brother of Yu. *Nemyrych. He studied at the Socinian academy in Kyselyn, Volhynia, and abroad (1646–8), in Amsterdam, Orléans, and Geneva. During the Cossack-Polish War he was appointed standard-bearer of Kiev and, in 1656, a Polish cavalry commander. Under his brother's influence he switched to the Cossack side and was a delegate at the Sejm of 1659 that ratified the Treaty of Hadiache. Under Hetman I. Vy-

hovsky he was general of the artillery of the Grand Duchy of Ruthenia from 11 June 1659. In 1661 he was elected Polish chamberlain of Kiev. In 1663 he emigrated to Silesia because of Polish persecution of the Socinians and became a general of the artillery in the army of Frederick William of Brandenburg-Prussia. He returned to Poland in 1680, converted to Catholicism, and served as castellan (1680–2) and voivode (1682–4) of Kiev.

Nemyrych, Yurii [Nemyryč, Jurij] (Polish: Niemiryecz, Jerzy), b 1612, d August 1659. Ukrainian magnate and political and military leader. He studied at the Arian academy in Raków and, in 1630–4, at Leiden and Basel universities and in England, France, and Italy. He led a private army during Poland's wars with Muscovy and Sweden in the 1630s. In 1641 he was elected chamberlain of Kiev. As the recognized leader of the Ukrainian *Socinians he defended their rights at the 1636 Lublin Tribunal and the 1637–9 sejms. He took part in public debates with the Jesuits and was one of the founders of the Arian academy in Kyselyn, Volhynia. By 1648 Nemyrych owned an immense latifundium consisting of 14 towns and over 50 villages in Volhynia and the Kiev region and huge tracts of land in Left-Bank Ukraine between the Psol and the Orel rivers. During the Cossack-Polish War of 1648–57 and the Polish-Muscovite War of 1654 he was the Polish colonel general of Kiev voivodship.

From 1648 Nemyrych supported the candidacy of the Transylvanian prince György Rákóczi I for the Polish throne. In 1655 he joined the side of King Charles X Gustav of Sweden, received the rank of major general in the cavalry, and acted as a Swedish envoy to Transylvania, the Hetman state, and Poland. In the summer of 1657 he switched to the Ukrainian side, converted to Orthodoxy, was appointed a colonel, and reclaimed his Left-Bank holdings. Nemyrych represented Sweden at the Cossack *Korsun Council, which elected I. Vyhovsky hetman, and in October 1657 he signed the Swedish-Ukrainian military alliance against Poland. He conceived the idea of the creation of the autonomous Grand Duchy of Ruthenia within the Polish Commonwealth and wrote the expanded draft of the Treaty of *Hadiache and the Hetmanate government's 1658 manifesto to the European states. As chancellor of the grand duchy in 1659, he headed the Ukrainian delegation to the Sejm that ratified the Treaty of Hadiache, and he fought in the Battle of Konotip (1659). During the Cossack uprising against Hetman Vyhovsky he commanded a detachment loyal to Vyhovsky and was slain by insurgents near Kobyzhcha, in the Chernihiv region.

Nemyrych wrote the historical treatise *Discursus de bello Moscovitico anno 1632* (1632), a Polish poem on the duties of a Christian knight, *Panoplia ...* (Panoply, 1653), Arian prayers in Polish, and a famous speech, delivered in the Sejm on 23 April 1659.

O. Ohloblyn

Nenadkevych, Lidiia [Nenadkevych, Lidija] (née Huguenin), b 1892 in Geneva, d 25 June 1956 in Poughkeepsie, New York. Collector of and specialist in em-

broidery. She was raised in Zhytomyr, and studied applied art in Kiev and taught courses in embroidery. Her unique collection of 90 embroidered blouses, 48 ceremonial towels, kilims, wraparound skirts, belts, and over 300 transcriptions of embroidery designs, which she had amassed over many years, was destroyed in Berlin in 1945. As a postwar refugee in the United States, she contributed articles on Ukrainian embroidery to journals such as *Nashe zhyttia* and *Zhinochyi svit*.

Nenadkevych, Yevhen [Nenadkevych, Jevhen], b 29 December 1882 in Dovhalivka, Dubno county, Volhynia gubernia, d 30 September 1966 in Zhytomyr. Literary scholar and pedagogue. A professor at the Zhytomyr (1920–9) and Nizhen (1930–3) institutes of people's education, he was arrested in 1933 and exiled. He worked at the Mordovian and Perm pedagogical institutes until his return to Zhytomyr in 1947. He wrote studies of the works of V. Stefanyk, I. Franko, Lesia Ukrainka, and T. Shevchenko, including *Tvorchist' T. Shevchenka pislia zaslannia, 1857–8* (The Post-Exile Works of T. Shevchenko, 1857–8, 1956) and *Z tvorchoi laboratorii T. Shevchenka* (From the Creative Laboratory of T. Shevchenko, 1959).

Nenasytets Rapid [Nenasytet'kyj porih]. The fifth and largest of the *Dnieper Rapids before the construction of the Dnieper Hydroelectric Station. Also known as Did, Revuchyi, or Rozbiinyk, it was the most dangerous section of the waterway, with a drop of 5.8 m over its 1,750-m length and a water flow that reached up to 4.1 m/second. It was also the only one of the nine rapids that did not freeze over during the winter.

Neo-Byzantinism. A term for numerous modern variants of art which are influenced, to various degrees, by *Byzantine art. In 1910 G. Apollinaire applied the term to the art of M. *Boichuk. In the 1920s Boichuk and members of his school revived the use of ancient techniques, such as fresco and egg tempera, in their murals. The style prevailing in modern Ukrainian church art, particularly in the West, since the 1950s has been called neo-Byzantine. Among the first artists to work in this style in Western Ukraine were P. Kholodny, Sr, M. Sosenko, and V. Kryzhanivsky. Other artists whose work can be considered neo-Byzantine are S. Hordynsky, I. Dyky, Yu. Mokrytsky, V. Konash-Konashkevych, P. Kholodny, Jr, and S. Zarytska.

Neoclassicism. A term designating the revival of interest in classical art and architecture in the 20th century. (For earlier revivals see *Classicism.) It has been most visible in architecture, where an eclectic combination of classical styles has been used. Neoclassicism has been popular under totalitarian regimes, such as those of Nazi Germany, Fascist Italy, and the USSR, where the construction of massive public buildings with neoclassical colonnades, arches, and exaggerated decorations was characteristic of most architecture built in the Stalin era and became known as Stalinist architecture. Neoclassical buildings in Kiev include those of the Council of Ministers (architects, I. Fomin and P. Abrosimov, 1936–8), the Supreme Soviet (architect, V. Zabolotny, 1936–9), and the CC CPU (architect, J. Langbard, 1936–9) and the pavilions of the Exhibition of Economic Achievements (1951–7). Examples of

Stalinist architecture of the 1950s can be seen throughout Ukraine.

Members of the Neoclassicists. Sitting, from left: Oswald Burghardt, Pavlo Fylypovych, Borys Yakubsky, and Maksym Rylsky; standing: Viktor Petrov and Mykola Zerov

Neoclassicists (*neokliasyky*). A literary movement of the 1920s. The nucleus of the group consisted of M. *Zerov, M. *Rylsky, P. *Fylypovych, M. *Drai-Khmara, and O. Burghardt (Yu. *Klen) – the *piatirne grono* (cluster of five), as Drai-Khmara called them in his sonnet ‘Lebedi’ (The Swans). They never established a formal organization or program, but they shared cultural and esthetic interests. M. *Mohyliansky, V. *Petrov, and others are also included in this loose grouping. The group’s name is derived from their use of themes and images of antiquity and was given to them by their opponents in the *Literary Discussion of 1925–8. The Neoclassicists were self-consciously concerned with the production of high art and disdained ‘mass art,’ didactic writing, and propagandistic work. Their opponents, in contrast, organized themselves around writers who were supported by the Communist party, and viewed literature in a primarily utilitarian fashion, that is, as a means of strengthening Soviet rule in Ukraine.

The works of the Neoclassicists were anti-Romantic and antifolkloric. They sought universal themes and considered Ukrainian culture to be an organic part of Western European culture. The closest to what could be considered their program is clearly set out in Zerov’s *Do dzherel* (To the Sources, 1926). ‘We should,’ he wrote, ‘assimilate the highest culture of our times, not only in its latest manifestations, but also in its original forms.’ From that commitment stemmed the demands the Neoclassicists made of a writer: (1) a comprehensive knowledge of the best works of Ukrainian literature; (2) a comprehensive knowledge of the achievements of world literature; and (3) poetic craftsmanship of the highest level. High art, in their view, could be conveyed only through clarity of thought and mastery

of form. Their poetry, therefore, is characterized by balance, plasticity of image, and logical ordering of subject and composition. The main purpose of literature, as they perceived it, was esthetic; they rejected the tendentiousness, agitation, and moralizing of their contemporaries. In order to gain a knowledge of world literature most of them translated into Ukrainian selected works, ranging from those of antiquity to those of the Parnassians in France. Individual Neoclassicists gravitated toward particular styles: Rylsky and Fylypovych to symbolism, Klen (Burghardt) to neoromanticism.

In the 1930s Zerov, Fylypovych, and Drai-Khmara were sent to Soviet concentration camps and executed. Rylsky was forced to publish socialist-realist works, and Burghardt emigrated to the West, where he wrote under the pseudonym Yu. Klen. The tradition of the Neoclassicists was continued among émigré poets, most notably by M. *Orest.

In the 1960s the Neoclassicists were partially rehabilitated. After 20 years of stagnation, a slow movement to full rehabilitation began in the late 1980s.

Neolithic Period. The closing phase of the Stone Age, lasting in Ukraine from ca 5000 to 2500 BC. The Neolithic Period was characterized by the development of agriculture and pottery manufacturing, the establishment of sedentary agriculturally based settlements, the use of polishing techniques for stone tools, the emergence of increasingly complex systems of religious belief, and the growth of tribal social orders. This epoch was also marked by the existence of a greater diversity of cultures than in either the Paleolithic or Mesolithic periods. By far the most developed culture was the agrarian *Trypilian culture, which existed throughout most of Right-Bank Ukraine until the Bronze Age. Other groups that existed during this period include the *Pitted-Comb Pottery, *Serednii Stih, *Boh-Dniester, and *Tisza cultures. The Neolithic Period ended with the introduction of metal technology during the *Eneolithic Period or the *Bronze Age.

Neounion (*Neouniia*). The unofficial name for the campaign to spread Eastern rite Catholicism among the Ukrainian and Belarusian Orthodox population in territories occupied by Poland during the interwar period. Structured around a body known as the Parishes of the Eastern Slavic Rite Catholic Church (Polish: Parafje Kościoła Katolickiego Wschodnio-Słowiańskiego Obrzędu), neounionism was conceived to attract converts to the Catholic church in Eastern Europe. The action was focused on Volhynia, the Kholm region, and western Belarus, the areas of interwar

Poland with a significant Orthodox population. It did not involve the Ukrainian Catholic church, whose jurisdiction was limited by the *Concordat of 1925 to Galicia.

In spite of its promotion of the Eastern rite, the neounion campaign was infused with a strong Latin orientation. The movement was conceived and promoted by a group of Jesuit priests which included J. Urban, the editor of the journal *Oriens*. Neounion priests were trained almost exclusively in the Latin rite seminaries in Lublin, Pynske, and Vilnius, which offered supplementary courses in Eastern Christianity (the new church also attracted some Ukrainian Orthodox priests). Neounion parishes were placed directly under the jurisdiction of Roman Catholic bishops.

The neounion experiment received papal approval in 1924, and work commenced immediately thereafter to establish parishes. The effort was generally greeted with suspicion by the local Orthodox population, which derisively dubbed it 'the government union' (*zhondova uniiia*). Although it gained adherents, it failed to establish itself as a mass movement. Some attempts were made to strengthen the effort with the appointment in 1931 of an apostolic visitor for the fledgling church body, M. *Charnetsky, who was elevated to the position of bishop of Kovel (although never granted the full authority of a bishop), and the opening (1931) of an Eastern rite seminary in the Volhynian city of Dubno. These actions, however, brought little benefit. The neounion experiment lasted until the outbreak of the Second World War, at which time it had (according to official estimates) approx 25,000 adherents and 46 priests.

Nepmen. Private entrepreneurs during the period of the *New Economic Policy (NEP), introduced in 1921 in the USSR. The nepmen were not a large group in Soviet Ukraine. In late 1926, at the height of the NEP, they and their dependents constituted some 6 percent of the population. The largest contingent consisted of 325,000 self-employed persons in the cottage industry, construction, and transportation, and 99,000 self-employed in retail trade. A smaller number hired labor: 381 large and small factory owners (1,512 people if family members are included); 20,000 in the cottage industry, construction, and transportation; and 3,800 retailers. Nepmen who were employers represented 0.3 percent of the urban population. Farmers who hired labor were usually called *kulaks; they constituted about 1 percent of the population. (Those who employed hired labor were officially classified as exploiters, whereas people working alone or with members of their families were also often considered nepmen.)

Almost immediately after the introduction of the NEP the Soviet government began a struggle against the 'bourgeois' nepmen, which intensified after V. Lenin's death, particularly under J. Stalin's rule. The campaign classified them as social enemies, deprived them of the right to vote, and did not allow their children to enter institutions of higher learning. Nepmen were also subjected to a higher tax rate, which was often entirely arbitrary and in excess of their income. Finally, they were the first victims in the campaign to expropriate gold and valuables that was carried out in the late 1920s and early 1930s. All persons suspected of holding gold or foreign currency were arrested for an indefinite period, subjected to cruel interrogation, and occasionally tortured until they agreed to turn over

their valuables to the government for free.

After the industrialization policy was introduced, the tax rate imposed on nepmen grew rapidly, and they were effectively squeezed out of the economic life of the country, sometimes completely bankrupted, and exiled from the large cities as antisocial elements. Retailers and wholesalers of agricultural products were subjected to even greater persecution, and few of them escaped arrest and imprisonment. The only nepmen who survived industrialization were artisans, who were permitted to form *artels and continue their work on a co-operative basis.

Nepokhozhi peasants (*nepokhozhi seliany, nepokhozhi liudy*). A major category of manorial peasants in the 14th- to 16th-century Lithuanian-Ruthenian state. Unlike the *pokhozhi peasants, they did not have the right to move from one feudal lord to another. The lord owned the land they used, as well as their tools and domestic possessions, and had the right to judge, punish, sell, trade, or give them away. The peasants had to pay *quitrents and perform corvée and other obligations for the lord. Free peasants became *nepokhozhi* ('immobile') if the land they lived on belonged to the grand duke and he awarded or sold it to a lord, if they became personally indebted to a lord and could not repay their debts, or 10 years after they voluntarily settled on land owned by a lord. The *nepokhozhi* peasants' dependent status was ratified in a privilege issued by Casimir IV Jagiellończyk in 1447. Their sale and purchase with or without land was legalized by the 1529 Lithuanian Statute. After the 1569 Union of Lublin the term *nepokhozhi* fell out of use, but the institution of dependent manorial peasants (called *kholopy, otchychi, panski liudy*) remained, and in the 1588 Lithuanian Statute they were all enserfed.

Neporozhnii, Petro [Neporožnij], b 13 July 1910 in Tuzhylivka (now part of Yahotyń), Pyriatyn county, Poltava gubernia. Engineer and electrical power construction administrator; member of the Ukrainian SSR and USSR Academies of Construction and Architecture (1956–63) and corresponding member of the USSR Academy of Sciences from 1979. He graduated from the Leningrad Institute of Water Transport Engineers (1933) and worked on the construction of major hydroelectric stations in Svirsk and Kakhivka. He was deputy head of the Ukrainian SSR Council of Ministers, head of the State Building Committee (1954–9), and USSR minister of energy and electrification (1962–85).

Neprytsky-Hranovsky, Oleksander. See Granovsky, Alexander.

Nepyipyvo, Vasyi [Nepypivo, Vasyi'], b 10 January 1916 in Kamianka, Poltava county. Painter. A self-taught

Vasyl Nepyivpyvo: *The Nativity Church* (oil)

artist, he is known for his lyrical landscapes, such as *Koncha-Zaspa* (1959), *Vorskla River* (1960), *Wheat* (1967), and *Dnieper Slopes* (1968). An album of his paintings was published in 1986. He has created some 700 works.

Neronovych, Yevhen [Neronovyč, Jevhen], b 1888 in Sorochyntsi, Myrhorod county, Poltava gubernia, d April 1918 in Sorochyntsi. Political leader. Before the First World War he was a student activist in St Petersburg and an editor of *Ukrains'kyi student* (1913). After the February Revolution he was active in the Ukrainian Social Democratic Workers' party (USDRP) and was a member of the Central Rada and its Little Rada. He was a member of the organizing committee of the Third All-Ukrainian Military Congress, held in Kiev in November 1917. Soon after the congress he left the Rada and came to lead the *Ukrainian Social Democratic Workers' party (Independentists), which supported co-operation with the Bolsheviks. In March 1918 he briefly served as people's secretary of war in M. Skrypnyk's Bolshevik government in Poltava, but soon thereafter he left the government over political differences. He was captured and shot as a traitor by UNR soldiers. In 1925 Sorochyntsi (now Velyki Sorochyntsi) was renamed Neronovychi in his honor, but the name was rescinded in 1931.

Nerovetsky, Oleksander [Nerovec'kyj], b 17 March 1884 in Cherkasy, Kiev gubernia, d 31 December 1950 in Kiev. Construction technologist and organizer; member of the Academy of Architecture of the Ukrainian SSR from 1945 and corresponding member of the USSR Academy of Architecture from 1941. He graduated from the Kiev Polytechnical Institute (1907) and worked on major construction projects, including the Kharkiv Tractor Factory and the Kramatorske Machine-Building Plant. He was a professor at the Kharkiv (from 1934) and Kiev (from 1944) civil-engineering institutes and headed the Ukrainian Scientific Research Institute of Buildings in Kharkiv (1936–9), the Institute of Construction Technology in Kiev (1945–8), and the Department of Civil Engineering at the Ukrainian SSR Academy of Architecture (1947–50).

Nerunovych, Inokentii [Nerunovyč, Inokentij], b ? in Kiev, d 26 July 1747 in Irkutsk, Siberia. Churchman, mis-

sionary, and pedagogue. A graduate of the Kievan Mohyla Academy (1721), he taught rhetoric and poetics there before becoming a professor at (1728) and prefect of (1731–2) the Slavonic-Greek-Latin Academy in Moscow. From 1732 he served as bishop of Irkutsk, and he gained fame as one of the greatest missionaries of Siberia. Some scholars (M. Vozniak, L. Makhnovets) attribute to him the drama *Mylost' Bozhiia* (God's Mercy).

Neshchadymenko, Marko [Neščadymenko], b 15 May 1869 in Serdehivka, Zvenyhorodka county, Kiev gubernia, d 1 October 1942. Microbiologist. A graduate of Kiev University (1896), he worked at the Kiev Bacteriological Institute and chaired the microbiology department at the university (1919–41). His publications deal with problems in immunology and bacteriology, such as the action of the diphtheria toxin, the properties of streptococci, and the preventive role of tuberculosis vaccines.

Ryta Neshchadymenko

Neshchadymenko, Ryta [Neščadymenko] (Kharytyna), b 13 April 1890 in Serdehivka, Zvenyhorodka county, Kiev gubernia, d 25 April 1926 in Kiev. Actress. In 1914–15 she studied at F. Komissarzhevsky's studio in Moscow. In 1918 she joined Molodyi Teatr and became a supporter of L. *Kurbas's method. She worked with him in the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–20), in Kyidramte (1920–2), and in Berezil (1922–6).

Neshcheretove kurhans. Burial mounds located on the Bila River near Neshcheretove, Bilokurakynne raion, Luhanske oblast. Excavations in 1928–9 uncovered nine mounds, most of them from the Bronze Age. Two particularly interesting kurhans from the 2nd to 3rd century AD revealed Sarmatian corpses with deformed craniums. Earthenware, a section of an iron sword, and elaborate silver buckles were also found.

Neslukhiv settlement. A multi-occupational settlement on the Buh River near Neslukhiv, Kamianka-Buzka raion, Lviv oblast. Excavations in 1898–1903 and 1946 uncovered evidence of settlements from the *Bronze Age, the *Cherniakhiv culture, the 7th to 9th centuries, and the 12th to 13th centuries. Semi-pit or surface dwellings and storage pits from each era were uncovered. The site also contained remains of kilns, hand-built and thrown pottery, amphoras, and decorative glass, as well as bone, iron, and bronze items.

Nestaiko, Vsevolod [Nestajko], b 30 January 1930 in Berdychiv, Zhytomyr oblast. Children's writer. He has worked on the editorial staff of the journals *Dnipro* and *Barvinok* and the publishing houses Molod and Veselka (from 1956). He has written numerous books for children, including *Shurka i Shurko* (Shurka and Shurko, 1956), *Kosmo-Natka* (Cosmo-Nat, 1963), *Nadzvoychaini pryhody Robinzona Kukuruzo ...* (The Extraordinary Adventures of Robinson Cucurusoe ..., 1964), *Taiemnytsia tr'okh nevidomykh* (The Secret of the Three Strangers, 1970), *Pryhody zhuravlyka* (Adventures of a Little Crane, 1979), and *Zahadka staroho klouna* (The Enigma of the Old Clown, 1982). Nestaiko's TV film *Toreadory z Vasiukivky* (Toreadors from Vasiukivka) received the grand prize at an international festival in Munich in 1968, and his novelette of the same name (1973) was placed on the H.C. Andersen List of Distinction by the International Board on Books for Young People (Basel) in 1979. An edition of his selected novellettes appeared in 1986.

Nesterenko, Anatolii, b 6 April 1899 in Blahodatne, Yelysavethrad county, Kherson gubernia, d 30 May 1975 in Kiev. Electrical engineer; corresponding member of the AN URSR (now ANU) from 1951. He studied and taught at the Kiev Polytechnical Institute and worked in the field of electrical technology. He headed a laboratory at the Institute of Energetics of the USSR Academy of Sciences (1936–8) and managed the construction of an electrical instruments factory. He directed the ANU Institute of Electrodynamics (1951–9). His main technical contributions were in the field of electrical instrumentation and measurement.

Nesterenko, Dmytro, b ?, d November 1708 in Hlukhiv, Nizhen regiment. Captain of Baturyn company in Nizhen regiment (1691–1708). One of Hetman I. Mazepa's closest aides, he took part in peace negotiations with Turkey in Constantinople in 1699 and conducted talks on Mazepa's behalf at the Zaporozhian Sich concerning the Bulavin rebellion in 1708. Along with D. Chechel and F. von Königsek he commanded the defense of Baturyn during the Russian offensive in 1708. He was taken prisoner and executed.

Nesterenko, Ivan, b 18 May 1950 in Brovarky, Zolotonosha raion, Cherkasy oblast. Painter and sculptor. He studied at the Lviv Institute of Applied and Decorative Arts. He paints ornamental symmetrical designs and figurative compositions. Nesterenko's paintings on glass (eg, *My Brother Mykola*, 1970s) convey the charm of folk art through simplified shapes and the hieratic use of space. The sophisticated primitivistic figures in his oils and gouaches are rendered with little modeling (eg, *Cold Summer*, 1973–6). His sculptures, constructed of found objects, metal, and wood, are more in tune with the whimsical three-dimensional works of P. Klee and J. Miró than with socialist realism. A combination of folk-art motifs and often humorous cutout figural silhouettes adorns Nesterenko's weather vanes (eg, *Kozak*, 1980s). His first solo show was held in 1988 in Kiev.

Nesterenko, Maksym, b and d ? Cossack leader and diplomat. In 1637 he took part in the uprising led by P. Pavliuk and K. Skydan and became colonel of the Korsun Regiment of registered Cossacks (1637–8). In 1646, togeth-

Ivan Nesterenko: *Goat* (wood sculpture at the Pereiaslav-Khmelnytskyi Museum of Folk Architecture and Folkways)

er with B. Khmelnytsky, he took part in secret negotiations with King Władysław IV Vasa regarding a Cossack offensive against Turkey. From December 1649 to March 1650 he headed Hetman Khmelnytsky's mission in Warsaw that negotiated ratification of the Treaty of Zboriv. He served as colonel of Korsun regiment in 1653. In 1655 he and I. Bohun led a Cossack detachment that defended the Bratslav region from the Crimean Tatars

Nesterenko, Oleksii, b 4 March 1904 in Prystan, Okhtyrka county, Kharkiv gubernia. Economist; corresponding member of the AN URSR (now ANU) since 1958. After graduating from the Kharkiv Institute of Communist Education (1930) he worked for the Ministry of Education of the Ukrainian SSR. He chaired the department of political economy at Kiev University (1946–8), directed the ANU Institute of Social Sciences in Lviv (1951–3) and the Institute of Economics (1953–65), and then served as a professor of political economy at the Kiev Trade and Economics Institute. His works deal with the development of Ukrainian industry and the working class and include *Rozvytok promyslovosti na Ukraïni* (The Development of Industry in Ukraine, 3 vols, 1959–66), *Ocherki istorii promyshlennosti i polozheniia proletariata Ukraïny* (Outlines of the History of Industry and the Condition of the Proletariat of Ukraine, 1954), *Zakonomernosti sotsial'no-ekonomicheskogo razvitiia goroda i derevni* (The Patterns of the Socioeconomic Development of the City and Countryside, 1975), and *Vozvyshenie potrebnosti v usloviakh razvitoogo sotsializma* (Ris-

ing Expectations under the Conditions of Developed Socialism, 1981).

Nesterov, Pavel, b 23 February 1903 in Tula, Russia, d 17 October 1978 in Kharkiv. Mining mechanics specialist; corresponding member of the AN URSR (now ANU) from 1948. He graduated from the Moscow Mining Institute (1932), and from 1948 he worked in the Kharkiv Mining Institute (now the Kharkiv Institute of Radioelectronics). His main contributions were in the design and development of mining machinery and apparatus.

A 17th-century street arcade in Nesterov

Nesterov. III-4. A city (1990 pop 12,900) on the Svnia River and a raion center in Lviv oblast. In 1951 its name was changed from Zhovkva to Nesterov in honor of P. *Nesterov. According to archeological evidence the site was inhabited as early as the 3rd or 2nd century BC. A settlement at the location is first mentioned in historical documents in 1368. In 1603 the town was named Zhovkva and was granted the rights of *Magdeburg law. A castle was built to protect the town from Tatar raids, and King Jan III Sobieski established a residence there. Zhovkva developed into a trade and manufacturing center. It was noted for its talented craftsmen and artists, who at the beginning of the 18th century formed the *Zhovkva School of Artists. The town was also an important religious center, with many churches and monasteries. The *Zhovkva Monastery of the Basilian order, which was built in the 17th century, developed into an important publishing center at the end of the 19th century. Nesterov's architectural monuments include the large, well-preserved castle, a Dominican church and monastery from the 17th century, a synagogue, two wooden churches from the beginning of the 18th century, the Basilian church and monastery, which were restored in 1907, the remnants of the brick defensive walls and two city gates, and the old market square with some original buildings. The oldest and most important industry in Nesterov is glass-making, but there are also a canning and a brick factory.

Nestor the Chronicler (Nestor litopysets), b ca 1056, d ca 27 October 1114 in Kiev. Famous medieval hagiographer and chronicler; saint in the Ukrainian church. The

Nestor the Chronicler (engraving by Leontii Tarasevych, 1702)

date of his canonization is uncertain. He entered the Kievan Cave Monastery at 17 and was a hierodeacon under Hegumen Stefan (1074–8). He participated in the ceremonial disinterment of the relics of St Theodosius of the Caves in 1091. The earliest biography of Nestor appeared in the Kievan Cave Patericon (pub 1661). He was one of the most educated men in late 11th- and early 12th-century Rus', renowned for his knowledge of theology, history, literature, and Greek. Nestor wrote the lives of ss Borys and Hlib and St Theodosius of the Caves in the 1080s, and he supplemented and continued the text of the Rus' Primary Chronicle (written in 1093), and completed its redaction, known as **Povist' vremennykh lit* (The Tale of Bygone Years), ca 1111–13. The original has not been preserved. Most scholars (eg, D. Abramovych, M. Braichevsky, D. Chyzhevsky, M. Hrushevsky, D. Likhachev, M. Priselkov, O. Pritsak, A. Shakhmatov, M. Vozniak) consider Nestor the Hagiographer and Nestor the Chronicler to be one person. Some (eg, E. Golubinsky, P. Kazansky, A. Sobolevsky), however, believe they are different persons. Some Western scholars of the *Povist'* (eg, L. Leger, L. Müller) have referred to it as the Nestor Chronicle.

Volodymyr Nestorovych

Nestorovych, Volodymyr [Nestorovyč] (pseud: V. Sever), b 23 January 1895 in Lviv, d 5 February 1980 in Detroit. Economist, publicist, and civic leader. After being conscripted into the Austrian army in 1915, he was captured in battle and deported by the Russians to the Far East. In Nikolsk-Ussuriiskii he became a leading member of the Ukrainian hromada and the district council and edited *Nasha dolia* for Ukrainian POWs. At the end of 1920 he reached Vienna and enrolled in the Higher School of International Trade, from which he graduated in 1924. In the 1930s he taught economics and bookkeeping at the Ridna Shkola commerce school and the business gymnasium. He contributed economic and political articles to various Ukrainian papers and edited the economics section of *Dilo* (1932–9) and the semimonthly *Torhovia i promysl* (1934–9). He left Austria for Germany in 1944 and then moved to the United States, where he was active in Ukrainian credit unions in Detroit and edited their magazine *Nash kontakt* (1954–9). He was president of the Literary-Artistic Club (1952–9) and a member of the editorial board of *Nash svit* (1959–62). His novel *Sertsia i burevii* (Hearts and Storms, 1965) is based on his recollections of Siberia and the Far East. He also wrote *Ukrains'ki kuptsi i promyslovtsi v Zakhidnii Ukraini* (Ukrainian Merchants and Manufacturers in Western Ukraine, 1977).

Nesturkh, Fedir [Nesturx], b 22 June 1857 in Odessa, d 1 May 1936 in Odessa. Architect. After graduating from the St Petersburg Academy of Arts (1887) he worked as the chief architect of Odessa (1900–17) and was a professor at the Odessa Art Institute (1928–33). He designed many buildings in Odessa, including the emergency hospital (1903–5), the city library (1904–7), and the psychiatric hospital (1910–12).

Nesvitsky, Yakiv [Nesvits'kyj, Jakiv], b 10 May 1911 in Potapka, Kaniv county, Kiev gubernia, d 28 April 1974 in Kiev. Specialist in the field of automotive transport. He graduated from the Institute of Agricultural Mechanization in Kharkiv (1936) and worked in various institutes of the AN URSR (now ANU) in the Ukrainian SSR Ministry of Agriculture, and in the Kiev Automobiles and Roads Institute (from 1948). His main contributions were in the field of automobile reliability, and he wrote a widely used handbook on the technical applications of automobile transport.

Netherlands. A western European state (1990 pop 14,934,000) covering an area of 41,863 sq km. Its capital is Amsterdam. Up to the 17th century, Ukrainian relations with the Netherlands (as well as with Belgium, with which the Netherlands was united at the time) were primarily economic and were conducted mainly through Amsterdam. Ukrainian students attended Dutch institutions of higher learning, including Leiden University (Yu. Nemyrych), in the 17th century. In the same period Dutch cartographers (H. Gerritsz, W. Hondius, J. Blaeu) drew and published the first maps of Ukraine as plotted by T. Makovsky and G. Le Vasseur de Beauplan. C. Cruys, who later served as an admiral in the Russian navy, was the author of an atlas of the Don River and the Black Sea, published in Amsterdam in 1703. Dutch engravers took up Ukrainian subjects in their work. A. van Westerfeldt made a drawing of Kiev (published in 1653); views of many Ukrainian cities were published in atlases assembled by J. Jansson and others; and W. Hondius engraved a portrait of B. Khmelnytsky. Dutch scholars of the 17th and 18th centuries, such as A. Cellarius and T. Salmon, included descriptions of Ukraine in their works on geography and history.

Contacts between the Netherlands and Ukraine grew significantly after the First World War. In 1919–23 there was a UNR mission to the Netherlands and Belgium, headed by A. Yakovliv, in The Hague and then in Brussels. In 1920 O. Koshyts led the Ukrainian Republican Kapelle on a concert tour of the Netherlands. In 1921 Metropolitan A. Sheptytsky visited the country and set in motion the establishment of an apostolate for local Ukrainians. In 1948–50 the apostolate funded the establishment of a Ukrainian Catholic seminary in Culemborg, and in 1951 it contributed to the founding of the Byzantine Choir of Utrecht (whose members were all Dutch) under the direction of M. *Antonowycz. In the 1950s and 1960s Antonowycz taught music at the state university in Utrecht, and O. Kushpeta taught economics at the Catholic university in Tilburg.

After the Second World War there were about 800 Ukrainians living in Holland, mainly women who had worked as forced laborers in Germany and were then resettled in the Netherlands. For the most part they married Dutch men and were assimilated. Today there are about 460 Ukrainians in the Netherlands, who mainly live in Amsterdam, Utrecht, and the province of Overijssel, near the German border. In 1948 the Association of Ukrainians in Holland (Bond van Oekrainers in Nederland) was formed. It was headed successively by O. Kushpeta, M. Bryk, M. Skrypnyk, M. Berskers, and O. Berskers; it now has around 100 members. Colonel Ye. Konovalets is buried in Rotterdam, where he was assassinated on 23 May 1938.

A. Zhukovsky

Netishyn [Netišyn]. A city (1989 pop 26,500) on the Horyn River in Slavuta raion, Khmelnytskyi oblast. The village is first mentioned in a historical document in 1648. It expanded rapidly in the 1980s, when the Khmelnytskyi Nuclear Power Station was built there. In 1984 it was granted city status. Most of its residents work at the power station.

Nettle (*Urtica*; Ukrainian: *kropyva*). A coarse, prickly herb of the nettle family Urticaceae, armed with stinging hairs and green, tufted flowers. Of its 50 species, 6 grow in Ukraine. The most common are the annual weed *U. urens* (Ukrainian: *kropyva zhalka*), which grows to 60 cm in height, and the perennial weed *U. dioica* (Ukrainian: *kropyva dvodomna*), which grows to 150 cm. Nettles are rich in vitamins B, K, and C, carotene, and tannins; young plants are eaten in salads and are used to feed animals. The plant is medicinal: extracts and infusions are used to stem blood flow.

Neubauer, Ernst Rudolf, b 14 April 1822 in Iglau (now Jihlava), Moravia, d 4 or 5 May 1890 in Rădăuți, Bukovina. German writer and historian. He studied at Vienna University (1838–42). From 1850 to 1872 he was a gymnasium teacher in Chernivtsi. There he associated with Ukrainians and in 1862–9 published the newspapers *Bukowina* and *Czernowitzer Zeitung*, which printed articles on Ukrainian history and culture. From 1872 to 1883 he directed the gymnasium in Rădăuți. He wrote the poetry collection *Lieder aus der Bukowina* (1855); the historical and ethnographic studies *Illustrierte Bukowina* (1857) and *Grundzüge zur Geschichte von Serethland* (1874); the historical prose collection *Erzählungen aus der Bukowina* (1868); the drama *Mädchen aus Kaliczanka* (1865), set in Kalichanka, the Ukrainian district of Chernivtsi; and the epic *Nogaja oder die Steppenschlacht, ein Gedenklid aus Sereth* (1876). Yu. Fedkovych's poems 'Shypits'ki berezy' (The Birches of Shypit) and 'Yurii Hinda' were written on the basis of Neubauer's reworkings of Bukovynian legends. A. Klug's *Ernst Rudolf Neubauer: Der Mann und das Werk* (2 vols, 1931, 1939) was published in Chernivtsi.

Neurology. That medical specialty which deals with the structure, function, and diseases of the nervous system. In Ukraine neurologists are called neuropathologists. Historically, illness of the brain was considered to be the work of evil spirits, and its sufferers were subjected to magic, incantations, exorcising, and incarceration in dungeons or asylums for the insane. In Russian-ruled Ukraine, at the end of the 19th century neurology was practiced only at university centers. In Western Ukraine under Austro-Hungarian rule, neurology was taught at Lviv University. After the Second World War there was marked development in this branch of *medicine, particularly in general awareness of psychiatric disorders and better diagnostic and treatment facilities. Neurology centers in Ukraine include the departments of diseases of the nervous system at the institutes of *medical education, the institutes for the upgrading of physicians in Zaporizhia, Kiev, and Kharkiv, and the Scientific Research Institute of Neurology and Psychiatry in Kharkiv (est 1922) and the Scientific Research Institute of Neurosurgery in Kiev (est 1950).

Neurosurgery. That branch of medicine which deals with the surgical treatment of the nervous system, including brain surgery. As an independent branch of *medicine

related to *psychiatry and *neurology, neurosurgery emerged only at the beginning of the 20th century.

In Ukraine in the 1890s and early 1900s, several surgeons made progress in neurosurgery: K. *Sapiezhko and B. Kozlovsky established surgical methods to alleviate internal brain-swelling, O. *Shymanovsky worked on surgical techniques, and P. Volkovych, O. Tykhonovych, O. Rava, and others developed methods for the surgical treatment of trauma and prenatal nervous system disorders. Pioneering work in neurosurgery was done in Russia by N. *Burdenko, who was of Ukrainian descent.

The first centers of neurosurgery in Ukraine were established at clinics of the Scientific Research Institute of Psychoneurology in Kharkiv (1931, with Z. Heimanovych) and in Kiev (1935, with P. Babytsky). A neurosurgical clinic headed by V. *Shamov was established in 1935 at the *Kharkiv Medical Institute. O. *Krymov and I. *Ishchenko did research in Kiev, and F. Roze worked in Kharkiv. In 1950 the neurosurgical clinic at the Psychoneurology Institute in Kiev was reorganized as the Kiev Scientific Research Institute of Neurosurgery under the directorship of A. *Arutiunov, the founder of the school of neurosurgeons in Ukraine. Today there are neurosurgical sections in all oblast-level hospitals and neurotrauma centers in the larger cities. The organization of teaching, training, clinical work, research, and accreditation is headed by the Kiev Scientific Research Institute of Neurosurgery and carried out by the neurology departments of the *medical education institutes for the upgrading of physicians in Kiev, Donetske, Zaporizhia, and Kharkiv. The *Kiev Institute for the Upgrading of Physicians is particularly strong in this field. The journal *Neirokhirurgiiia* is published in Russian in Kiev. Neurosurgery in Ukraine is hampered by the chronic shortage of modern equipment and drugs, as well as by the poor *hygienic conditions that exist in medical institutions throughout the former USSR.

P. Dzul

Nevolin, Konstantin, b 1806 in Orlov (now Khalturin), Viatka gubernia, Russia, d 18 October 1855 in Bruck, Austria. Russian historian; corresponding member of the St Petersburg Academy of Sciences from 1853. He graduated from the theological seminary in Moscow (1827) and then served as a professor of law at (from 1833) and rector of (1837–43) Kiev University, and as prorector and dean of law at St Petersburg University. His *Entsiklopediia zakonovedeniia* (Encyclopedia of Jurisprudence, 2 vols, 1839–40), published in Kiev, was a ground-breaking work in its field and was instrumental in the subsequent development of legal studies in the Russian Empire.

Nevrlý, Mikuláš (Nevrli, Mykola), b 15 November 1916 in Rostov-na-Donu, Russia. Ukrainian literature specialist and literary critic in postwar Czechoslovakia. From the early 1920s he lived in Poltava, where his father taught at the Institute of People's Education. He emigrated to Czechoslovakia with his parents in 1933 and taught in a Transcarpathian village school (1936–9). He graduated from the teachers' seminary in Uzhhorod (1939), and subsequently studied in Prague at Charles University and the Ukrainian Free University (1940–5) and received two doctorates (1945 [Prague]; 1949 [Brno University]). Nevrlý has written over 575 works, mostly in Czech and Ukrainian: books on I. Franko (1952), T. Shevchenko (1954, 1960),

Mikuláš Nevrlý

and the history of Czechoslovak-Ukrainian literary relations (coeditor, 1957); a bibliography of Ukrainian studies in Slovakia in the years 1945–64 (1965); hundreds of articles published in Eastern European and Soviet Ukrainian periodicals and encyclopedias; and introductions to Czech translations of novels by Franko (1951), P. Myrny (1953), and V. Sobko (1953). He has also edited a Czech anthology of Ukrainian poetry (1951, with O. Zilynsky), Prešov editions of the poetry of B.I. Antonych (1966) and D. Falkivsky (1969), the Slovak edition of Shevchenko's works (2 vols, 1959, 1962, with M. Molnar), and P. Bunhanych's Slovak-Ukrainian dictionary (1986). His doctoral diss (1945) on O. Oles's poetry and his candidate's diss (1966) on Soviet Ukrainian poetry of the 1920s have not been published.

Nevytska, Iryna [Nevyc'ka] (née Buryk), b 10 December 1886 in Zbudská Belá, Zemplén komitat, Slovakia, d 21 November 1965 in Prešov, Slovakia. Ukrainophile writer and community figure in interwar Transcarpathia; wife of O. *Nevytsky. Her first poems, stories, and articles appeared under the pen names Anna Novak and Anna Horiak in Transcarpathian periodicals in 1905. In the interwar years she was the only writer in Ukrainian in the Prešov region. In 1922 she founded the Union of Ruthenian Women of the Prešov Region. In 1929 she moved to Uzhhorod, where she headed the women's section of the Prosvita society, chaired the organizing committee of the First Congress of Ukrainian Women in Transcarpathia (1934), and was a leading member of the Society of Ukrainian Writers and Journalists. She edited the biweekly *Slovo naroda* (Prešov 1931–2), the first periodical in the Prešov region published in modern literary Ukrainian. In 1936 she became leader of the new nationalist *Ukrainian Peasants' and Workers' Party of Subcarpathian Ruthenia and editor of its biweekly organ *Narodnia syla* (Uzhhorod 1936–8). In 1939 she was an active member of the Ukrainian National Alliance in Khust. After the Hungarian occupation of Transcarpathia in 1939, she moved to Prešov and thereafter was inactive. Among her works are the first Transcarpathian Ukrainian novel, *Pravda pobidyła* (The Truth Triumphed, 1924), the story collection *Darunok* (The Gift, 1929), several plays, and stories and poetry for children. A posthumous edition of her novelette *Matii Kukolka* was published in Prešov in 1968.

Nevytsky, Omelian [Nevyc'kyj, Omeljan], b 1878, d 30 January 1939 in Minersville, Pennsylvania. Greek Catholic priest and civic leader. After teaching at the Prešov Teachers' College he served as a parish priest at Ujak, in the Prešov region. In 1918 he and his wife, I. Nevytska, organized the Ruthenian National Council in Stará L'ubovňa. Under his chairmanship (1918–19) it became the first such council to declare itself in favor of Transcarpathia's union with Ukraine. In 1921 he emigrated to the United States, where he served as a priest in the Pittsburgh Ruthenian exarchy and was an active community organizer. In 1938 he founded and headed the Committee for the Defense of Carpatho-Ukraine.

New Economic Policy (NEP). A policy, announced by the 10th Congress of the Russian Communist Party (Bolshevik) in March 1921, aimed at reinstating a market system. It replaced the system of *War Communism, which had brought the economy to ruin. The Kronstadt rebellion, peasant uprisings in Ukraine, and other threats to Bolshevik dictatorship forced V. Lenin to reconsider his economic policy. The NEP established a mixed socialist market economy, in which industry was largely nationalized, but private enterprises with up to 25 workers were allowed; agriculture was predominantly private, but large estates were connected to state farms; and retail and wholesale trade was predominantly co-operative.

Economic and social rights and obligations were codified. In Ukraine the system accommodated geographic and national peculiarities. The Union government monopolized the 'commanding heights' of the economy – that is, heavy industry, transportation, banking and the allocation of capital, taxes, government spending, foreign trade, and natural resources. In Ukraine co-operatives under local control and private farming grew rapidly. The budgetary system and other policy instruments, however, were used by the center to exploit the republic. In 1928 the economist M. Volobuiev argued that Moscow's fiscal and other policies returned Ukraine to its former colonial status.

Consolidating its political control, the regime allowed socioeconomic and cultural innovation. The policy of *Ukrainization promoted the Ukrainian language in administration, education, and business. Overall the NEP elicited support from the peasantry and the technical and administrative cadres. Historians generally agree that the NEP period was favorable to the formation of modern Ukrainian nationhood.

In his quest for power J. Stalin aligned himself with the *Left Opposition in claiming that the NEP encouraged capitalist elements, and that it would impede rapid industrialization. Beginning in 1927 the legal guarantees of private ownership and enterprise were increasingly violated. A campaign was launched to eliminate private businessmen, known as *nepmen, and successful farmers, known as kulaks. Ukrainian Communist leaders, such as M. Khyvlyovy, O. Shumsky, and M. Skrypnyk, protested strongly against the violations of Ukraine's autonomy. Forced collectivization and grain requisitions resulted in the tragic man-made famine of 1932–3. The NEP market system was replaced by the Stalinist planned command economy.

Some Western economists regard the NEP system as a viable mixed economy, similar to that of Yugoslavia and Hungary in the 1980s. In official Soviet historiography the NEP period was treated as a tactical retreat from commu-

nist principles and a transitional phase in the establishment of a planned Soviet model.

V. Bandera

New Era (Nova era). An attempt to establish a rapprochement between Galician Ukrainians and Poles in Austria-Hungary in 1890–4. Spurred by growing tensions between the Austro-Hungarian and Russian empires, the Austrian minister of foreign affairs, Count G. Kálnoky, pressured his government to try to satisfy the Ukrainians' demands and secure their loyalty (the likely battleground for the seemingly imminent hostilities being Galicia). Since the government had come to an agreement concerning Galicia that gave the Poles effective administrative control over the crownland, Kálnoky was forced to hand the matter over to the governor of Galicia, K. Badeni. The marshal of the Galician Diet, E. Sanguszko, and A. Chamiiec assisted Badeni. The Ukrainian leaders associated with the effort included Metropolitan S. Sembratovych and several moderate populists, such as O. Barvinsky, Yu. Romanchuk, and K. Telishevsky. Representatives of the Hromada of Kiev, led by V. Antonovych, also took part in the ensuing negotiations. But the New Era had little chance of success. The Ukrainians hoped to ensure a better climate for Ukrainian social and cultural development in Galicia; Badeni was willing to try to appease Ukrainians only with limited concessions in education and language rights.

The Ruthenian-Ukrainian Radical party immediately came out against the policies of the New Era, but spokesmen of populist groups offered their support at the parliamentary sessions in November 1890. On behalf of the government Badeni promised that Ukrainians would be allowed free national development based on the principles of the Austrian constitution.

The positive consequences of the New Era for Ukrainians included the wider use of Ukrainian in administrative affairs and in the courts; the introduction of a phonetic orthography in Ukrainian textbooks; bilingualism in teachers' seminaries; the establishment of a state gymnasium in Kolomyia; the creation of chairs of Eastern European (essentially Ukrainian) history and Ukrainian literature at Lviv University; the setting up of Ukrainian financial institutions, such as Dnister in Lviv and the Ukrainian Savings Bank in Peremyshl; and the publication of a Ukrainian-language government daily, *Narodna chasopys*'. The broader political changes Ukrainians believed would be forthcoming, however, never materialized, and Ukrainian support for the New Era dwindled. In 1894, led by Romanchuk, the populists rejected the New Era and joined the ranks of its opponents. Sembratovych and a small number of populists, led by Barvinsky and A. Vakhnianyn, continued to support the policy and centered their activities on the daily *Ruslan* (est 1897).

The failure of the New Era sharpened the tone of Galician politics. The 1895 provincial election to the Diet and

the 1897 election to the national parliament were fraught with administrative abuses unusual even for Galicia. Far from cowering them, those assaults on their political work strengthened the resolve of Ukrainians to develop their political strengths and provided an impetus for a major restructuring of Ukrainian political parties in the late 1890s (notably with the establishment of the National Democratic party).

St Andrew's Memorial Church at the Ukrainian Orthodox Center in South Bound Brook, New Jersey

New Jersey. A middle Atlantic state (1990 pop 7,748,630) of the United States, covering an area of 20,300 sq km. Its capital is Trenton. In the 1960 census 13,000 inhabitants gave Ukrainian as their mother tongue, and in the 1980 census 80,800 declared Ukrainian origin. By 1990 their number had fallen to 74,000. The largest Ukrainian communities are in Jersey City, Elizabeth, *Newark, New Brunswick, *Passaic, Patterson, and *Trenton.

The first wave of Ukrainian immigrants to New Jersey (1870–1914) consisted mostly of poor peasants from Galicia, Bukovyna, and Transcarpathia, who worked as unskilled farm laborers or factory workers. After a few years some of them had raised enough capital to buy their land or to set up small businesses. In about 1908 the first Ukrainian rural settlement was established near Great Meadows. Later, Ukrainian farm colonies arose in Millville, Woodbine, Williamstown, New Market–Nova Ukraina,

Newton, and Blairsville in southern New Jersey. The earliest forms of community life were church parishes. The first Ukrainian Catholic parishes were organized in Jersey City (1888), Elizabeth (1905), Newark (1907), Perth Amboy (1908), and Passaic (1910). A Ukrainian Presbyterian church was founded in Newark in 1909. Reading groups were formed for adults and evening schools for children to pass on a basic knowledge of Ukrainian language, literature, and history. The earliest schools were organized in Jersey City (1894), Newark (1895), and Passaic (1899). In the absence of social welfare, mutual aid societies were organized: the first sisterhood, St Olha's, was established in Jersey City in 1897, and 35 branches of the Ruthenian (later Ukrainian) National Association (UNA) had been set up by 1914. Community halls were commonly built in the larger communities to stage concerts and plays and to hold meetings. By 1914 about 50,000 Ukrainians lived in New Jersey.

The second wave of Ukrainian immigration (1920–39) included more people with education. Some newcomers and American-educated children of earlier immigrants entered the professions and local politics. By 1935 there were about 60,000 Ukrainians in New Jersey.

The postwar immigration (1945–60) of political refugees and displaced persons included a high proportion of educated men and women, who strengthened existing Ukrainian institutions and formed some new ones. Rutgers University introduced courses in Ukrainian language, literature, and history. By 1975 the UNA had 59 branches with 12,000 members in New Jersey. The Ukrainian Catholic church has 19 parishes with about 22,000 members in the state, and the Ukrainian Orthodox Church in the USA, centered in South Bound Brook, has 8 parishes with about 10,000 members. National political organizations, such as the Ukrainian Congress Committee of America, the Organization for the Defense of Four Freedoms for Ukraine, and the Ukrainian National Women's League of America, have branches in many of the state's cities. Jersey City, the site of the UNA's head office, is a major publishing center for the daily *Svoboda*, the *Ukrainian Weekly*, and the children's monthly magazine *Veselka*. By 1976 there were six Ukrainian credit unions in New Jersey, all founded after the Second World War.

New Kramatorske Machine-Building Plant (Novokramatorskyi mashynobudivnyi zavod). A heavy-machine-building plant located in Kramatorske, Donetsk oblast. The plant was constructed in 1929–34. Before the Second World War it produced slab and strip mills, cranes, mining machinery, and other machines. The plant was evacuated at the outbreak of the war and completely rebuilt afterward. By 1948 production had reached the prewar level. Now the plant produces equipment for rolling mills, mining hoists, metalworking machines, and presses. It is one of the largest producers of specialized forges and casts for the electrotechnical and mill-building industries. In 1971 over 10,000 people worked at the plant.

New Kryvyi Rih Mineral Enrichment Complex (Novokryvorizkyi hirnycho-zbahachuvnyi kombinat). A concern of the mining industry, located in Kryvyi Rih, Dnipropetrovske oblast. It was constructed in 1956–9 to process the ferruginous quartzite iron ores found on the left bank of the Inhulets River. Agglomeration plants were

opened in 1961 and 1962. Its planned production capacity was 9,090,000 t of raw ore with an iron content of 36.2 percent, 4,540,000 t of concentrate with an iron content of 62 percent, and 8,050,000 t of agglomerates with a basicity of 1.1 percent and iron content of 52 percent per year. The complex includes three quarries and a pulverizing, enriching, and agglomerating plant.

New Lviv Theater (Novyi lvivskyi teatr). A society of actors under the artistic triumvirate of V. *Kalyn, A. *Buchma, and M. *Bentsal, established on the initiative of F. Lopatynsky and Kalyn in Ternopil in December 1918 by a union of the Ternopil Ukrainian Drama Theater (1918–19) and the actors from the Ruska Besida Theater. In 1919 it performed under the auspices of the Ukrainian Galician Army in Chortkiv, Kamianets-Podilskyi, Proskuriv, and Vinnytsia. That summer it split into two groups; one, led by M. Bentsal, continued touring and was interned by Polish authorities in May 1920, and the other joined with a faction of the former Molodyi Teatr under H. Yura to form the touring Franko New Drama Theater (see *Kiev Ukrainian Drama Theater).

New Russia (Novorosiia, Novorosiiskyi krai). The tsarist designation for the lands of *Southern Ukraine annexed from the Zaporozhian Cossacks, the Crimean Khanate, and Ottoman Turkey. From 1764 the lands constituted a large part of *New Russia gubernia, which in 1802 was divided to create *Katerynoslav, *Kherson, and *Tavriia gubernias. From 1812 the newly annexed province of *Bessarabia, and from the early 20th century to 1917 the *Stavropol region (gubernia) and the province of the *Don Cossacks, were also considered part of New Russia.

New Russia Cossack Army (Novorosiiske kozatske viisko). A tsarist military formation created in December 1806 from among Cossacks and Ukrainian and Russian fugitives from serfdom living along the Danubian frontier. Originally called the Ust-Danubian Budzhak Army, it was supposed to prevent the flight of peasants from Podilia and Kherson gubernias to the *Danubian Sich and Ottoman-held territory along the lower Danube. Its failure to do so and its absorption of many such fugitives into its ranks resulted in its demobilization by tsarist punitive forces in September 1807. Approx 500 Cossacks were transported to the Kuban, where they became part of the Black Sea Cossack Army, and the majority dispersed into the Danubian steppes. During the Russo-Turkish War of 1828–9 a similar Danubian Cossack Army was constituted from among former Cossacks and Balkan volunteers. During the Crimean War it fought in the Dobrudja and the Caucasus and took part in the 1854 defense of Odessa. The rank-and-file soldiers mutinied against the harsh treatment by their officers in 1843–5, 1849, 1855, and 1857. In 1857 the army was renamed the New Russia Cossack Army. In 1858 it consisted of 12,085 men, living in 10 military settlements. The army's 13,150 soldiers were demobilized in 1868.

New Russia gubernia (Russian: Novorosiiskaia guberniia). The administrative-territorial designation from 1764 for the region in *Southern Ukraine annexed by the Russian Empire from the Zaporozhian Cossacks, the Het-

man state, the Crimean Khanate, and the Ottoman Empire. The gubernia encompassed the frontier territories of *New Serbia, *Slobidskyi regiment, *Sloviano-Serbia, the *Ukrainian Line, and 39 companies of the abolished Hetman office's Poltava, Myrhorod, Lubni, and Pereiaslav regiments. From 1765 the gubernial center was Kremenchuk. The gubernia was governed according to the Russian Senate's 'Plan for the Colonization of New Russia Gubernia,' and the military colonists and Cossacks there were transformed against their will into regular hussar and lancer regiments. The gubernia was divided into the Elizabethan province, with five regiments west of the Dnieper River, and the Catherinian province and Bakhmut county, with four regiments east of the Dnieper. It was the first region in the Russian Empire in which Catherine II allowed foreign Jews to settle.

The gubernia bordered on the Zaporizhia, the 'free lands' of the Zaporozhian Cossacks, who opposed tsarist encroachments onto their lands and repeatedly attacked and destroyed new settlements. Consequently the gubernia's administration had a semimilitary character. It was governed consecutively by the 'supreme commanders' A. Melgunov, J. von Brandt, M. Leontev, F. Voieikov, and, from 1774, G. Potemkin. The regimental commanders under them had both military and civil authority.

Each settler in the gubernia received a subsidy and 26–30 desiatins of land. Those who also enlisted in the cavalry regiments received larger subsidies and did not have to pay taxes. Any military officer (including a member of the Cossack *starshyna*) who settled in the gubernia received noble status and a rank estate. Nobles and recruiting agents could establish and own a hereditary free village (*sloboda*) of no more than 48 households and recruit settlers, usually from among Ukrainian peasants who had fled Polish and Russian serfdom, but also from among Russian Old Believers and state peasants. If the village owner did not populate his land within three years, he forfeited it. Foreigners (mostly Moldavians and Wallachians, but also Germans, Serbs, Bulgarians, Armenians, Georgians, and Greeks) received the largest subsidies; those who brought 300 colonists with them received the rank of major, those who brought 150 became captains, and those who brought 30 became sergeant majors. In the northern part of the Catherinian province much of the land was already owned by the wealthy Cossack *starshyna*. Because most of the peasants there were enserfed, several thousand fled to the free villages and to the lands of the Zaporozhian Cossacks.

In the gubernia's towns Greeks and Old Believers controlled commerce. Unlike elsewhere in the Russian Empire merchants (65.1 percent Russian, 24.5 percent Ukrainian, and 10.4 percent foreign in the 1770s), not landed gentry, owned the factories. During the Russian-Turkish War of 1768–74 the gubernia's inhabitants bore the brunt of maintaining the Russian forces. In 1769–70 the gubernia's Donets, Dnieper, and Luhan *lancer regiments rebelled against tsarist rule and were brutally repressed. Also in 1769, Crimean Tatars invaded the Elizabethan province, destroyed over 50 villages, and took away the inhabitants and cattle.

In 1774 the gubernia absorbed new lands annexed from Turkey between the Dnieper and the Boh rivers and along the Black Sea littoral. In 1775 the free lands of the Zaporizhia were confiscated and divided between New Russia

gubernia and the newly created *Azov gubernia, and in 1776 Bakhmut county and the Catherinian province were transferred to Azov gubernia. Thereafter New Russia gubernia consisted of Kremenchuk county and the provinces of Yelysavethrad (3 counties), Poltava (2 counties), Slovianske (renamed Nykopol in 1781; 3 counties), and Kherston (3 counties). After the Russian annexation of the Crimea in 1783, New Russia and Azov gubernias were replaced by Katerynoslav vicegerency. In 1791 the vicegerency absorbed lands annexed from Turkey between the Boh and the Dniester. In 1797 most of the vicegerency's territory became part of a new New Russia gubernia, with its capital in Novorossiisk (Katerynoslav). In 1802 the gubernia's lands were divided among the new Mykolaiv (from 1803, *Kherson), *Katerynoslav, and *Tavriia gubernias.

R. Senkus

New Russia University. See Odessa University.

New Serbia (Nova Serbiia). A Russian administrative and military territorial unit in Southern Ukraine, created by Empress Elizabeth Petrovna in January 1752 out of the northwestern lands of the Zaporizhia (ie, the northern parts of Kodak and Boh-Hard palankas) between the Syniukha River to the west and the Dnieper to the east. Although the officially stated purpose of the new territory was defense of the Russian Empire from Turkish and Crimean Tatar attack, the territory also gave Russia a base from which it could control the Zaporozhian Cossacks, isolate the Zaporizhia from Right-Bank Ukraine and part of the Left Bank, and facilitate Russia's expansionist designs in the Ukrainian steppe frontier. New Serbia had an area of 1,421,000 desiatins. The Russian government evacuated all of its inhabitants (according to A. Schmidt, 4,008 Cossack and peasant households), despite the protests of Hetman K. *Rozumovsky and the Zaporozhian Sich. In their place it imported Serbian military colonists from Austrian-ruled Slavonia and Hungary led by Col I. Horvat and, later, similar Bulgarian, Vlach, Greek, and other Orthodox colonists who had fled from Turkish rule.

The colonists were subject to military rule and were divided between a hussar regiment based in Novomyrhorod and a pandour regiment based in Krylov, which together constituted the New Serbia Corps. A medal commemorating the creation of New Serbia was struck in 1754. That year the *Slobidskyi Regiment of Cossack colonists mostly from Left-Bank and Slobidska Ukraine was organized on the southern frontier of New Serbia, and the St Elizabeth Fortress was built to serve as the administrative center of the territory. (In 1775 the fortress became the center of the new town of Yelysavethrad [Kirovohrad].) Two-thirds of New Serbia's population was Ukrainian. The colonists clashed repeatedly with the neighboring Zaporozhian Cossacks and inhabitants of Polish-ruled Right-Bank Ukraine. The Serbian officers often abused their positions and their subordinates. In 1764 Horvat was removed from his post and exiled to Vologda. That year New Serbia was abolished, and its territory became part of the new *New Russia gubernia.

New Sich (Nova Sich, aka Pokrovska Sich). The last *Zaporozhian Sich. It was founded in 1734 by Cossacks who returned to Russian-ruled Ukraine from the *Oleshky Sich. The fortress was built 3–5 km from the earlier *Chortomyk Sich on land jutting into the Pidpilna River, a tributary of the Dnieper, near what is today the village of Pokrovske, in Nykopil raion, Dnipropetrovske oblast. The large territory of the *Zaporizhia belonging to the New Sich was divided among eight *palankas. A total of nearly 100,000 people (Cossacks, Cossack helpers, and peasants) lived in the Sich and over 100 free villages (*slobody*) and 4,000 **zymivnyky*. On 16 June 1775 a Russian army commanded by Gen P. Tekeli destroyed the Sich on the orders of Catherine II.

New Year. The first day of the yearly cycle, marked with religious and traditional festivities. Before its Christianization in 988 Rus' followed the ancient Roman calendar, which began the year on 1 March. With Christianity came the Byzantine calendar, which began the new year on 1 September and followed a chronology which set the date of creation at 5508 BC. The common people, however, continued to use the Roman calendar. In the 14th and 15th centuries, under Polish and Lithuanian influence, the Julian *calendar, which began the year on 1 January, was adopted in Ukraine. In Russia this change came only in 1700, under Peter I. The more accurate Gregorian calendar was adopted in Western Europe in 1582, but neither the Ukrainian people nor the church accepted this calendar. Today Ukrainians in and outside Ukraine celebrate the New Year twice: officially on 1 January, according to the Gregorian calendar, and unofficially on 14 January (1 January according to the Julian calendar).

The New Year, particularly New Year's Eve, was celebrated with a rich repertoire of folk rituals. Their primary purpose was to secure a bountiful harvest and the family's health and happiness. The key rituals were the eating of **kutia*, children's caroling, the *polaz* (bringing cattle into the house), walking *Malanka around the village, fortune-telling and forecasting the weather for the next year, and the symbolic sowing of wheat. According to popular superstition, on New Year's Eve domestic animals are able to speak in human language, and buried treasures burn with a blue flame. Garbage was to be burnt at sunrise in the garden or the orchard to ensure good crops, and people washed in river water with coins in it to guarantee good health. There were many other customs connected with the New Year.

The Soviet authorities banned the traditional rituals of the New Year, considering them to be part of a religious cult. Thereafter they became confined to the family circle. All public celebrations were arranged by the officials. In the early 1930s the New Year's tree was introduced in clubs, palaces of culture, schools, factories, and public places. At New Year meetings Party and government officials rewarded workers for their performance and delivered speeches, reports, pledges, and toasts. The meetings were followed usually with a dance, a carnival, a contest, or the appearance of Grandfather Frost and the Snow Nymph. In 1960 some students in Kiev made the first at-

tempt to revive the traditional New Year's celebrations by caroling. The practice began to spread through Ukraine and was prohibited by the authorities in the 1970s. Since the mid-1980s the traditional New Year's customs, however, have been revived by many voluntary groups.

M. Mushynka

St George's Ukrainian Catholic Church in Manhattan

New York City. A major city (1980 pop 7,071,000; metropolitan pop 9,119,700) situated at the mouth of the Hudson River on the eastern seaboard of the United States, with a Ukrainian population (the largest community in the country) of between 34,400 (according to the 1980 census) and 56,340 (estimated). In 1930, 7,200 identified themselves as Ukrainians, and in 1960, 13,000 New Yorkers listed Ukrainian as their mother tongue.

From the late 1870s Ukrainian emigrants landed at the port of New York on their way to the mining towns of Pennsylvania or the industrial cities of the interior. A few stayed in New York to work at unskilled jobs, but they did not form organizations. At the turn of the century Ukrainians began to settle there in large numbers; they were joined in the interwar period by immigrants moving to New York from other cities. After the Second World War a large number of political émigrés settled in New York.

The earliest immigrants usually took hard, low-paying jobs. Eventually the more enterprising among them set up their own small businesses, mostly grocery stores, and by the end of the 1930s there were several hundred Ukrainian businesses in New York. At first few immigrants had higher education. The number of intellectuals and professional people increased in the early 1920s and particularly after the Second World War.

Ukrainians settled in lower east-side Manhattan, where they replaced German, Czech, Hungarian, Irish, and Italian immigrants who had moved into other areas of the city at the beginning of the century. This section remains the main Ukrainian area of New York. Other areas of Ukrainian concentration include the Williamsburg, South Brooklyn, and Green Point districts in Brooklyn and the Astoria area of Queens. In recent years Ukrainians have moved into more upscale districts of the city or into the suburbs.

The first Ukrainian organizations in New York were mutual benefit societies founded by Transcarpathian immigrants. Their central association, the *Greek Catholic Union of the USA, moved its central office to New York in 1896 and published its biweekly *Amerikanskii russkii viestnik* there until 1901. Other fraternal societies organized under the Ruthenian National Association were established in New York at the beginning of the century. With the founding of a Greek Catholic parish and the calling of the first Ruthenian Popular Meeting in 1905, the Ukrainian community began to develop rapidly. By 1907 there were 14 Ukrainian societies and institutions in New York, including the socialist organization *Haidamaky, which had its own periodical, and the National Aid Association (est 1907). In 1908 the Prosvita society was founded. In 1912–14 the *Providence Association of Ukrainian Catholics in America maintained its head office in New York.

During and after the First World War various political organizations appeared in the city, including the Ukrainian Council (1914) and the Ukrainian Assembly of America, which founded the Federation of Ukrainians in the United States at its meeting in New York on 30–31 October 1915. The Ukrainian National Committee (1918–22) and the Sich Organization of Ukrainians (1919) were also formed in New York. By 1935 about 50 local and central organizations were active in the city. To co-ordinate their programs the Ukrainian Popular Hromada was established in 1917; it was followed by the Union of Ukrainian Popular Societies and the Central Committee of Ukrainian National Societies of New York City (est 1930).

During the Second World War New York became the home of the *Ukrainian Congress Committee of America (UKKA), the Ukrainian umbrella organization for the United States. The local UKKA branch, the Committee of United Ukrainian Organizations of New York City, had 73 member organizations by 1966. In addition, representations of the Ukrainian National Council and the Ukrainian Supreme Liberation Council and the head offices of social and political organizations, such as the Organization for the Defense of Four Freedoms for Ukraine, the Organization for the Rebirth of Ukraine, and the *Self-Reliance Association of American Ukrainians, located themselves in New York shortly after the war. The city also had a number of Ukrainian professional, student, and sports associations. The *Self-Reliance Federal Credit Union was organized in 1951, and by 1978 its membership had reached 5,300 and its assets 22,895,000 dollars.

The first Ukrainian evening or Saturday schools were set up at the beginning of the century at the Ukrainian People's Home and the parish churches. Today a regular elementary (est 1941) and high school (est 1946) are operated at St George's Catholic Church (enrollment over 800), and Ukrainian courses are offered by a number of Catholic and Orthodox parishes, the Self-Reliance Association, and other organizations (over 600 students in the 1960s).

The New York Ukrainian community has been entertained by a number of amateur and semiprofessional drama and music groups, such as the Ruthenian Popular Theater (est 1909), the Ukrainian Theater (1922–6), several drama groups organized by Jews from Ukraine, the American Boian singing society (1905), the choir of *Ukrainska Besida* (1911), and church choirs. A part of the Ukrainian Republican Kapelle stayed in New York in 1922 and formed the core of O. Koshyts's United Ukrainian Choir of New York in 1926. V. Avramenko set up a school

of Ukrainian dance in New York in 1929. After the Second World War the Dumka, the Boian, and various church choirs were active. Recently the Homin Stepiv Bandura Ensemble was founded. In the 1950s the *Theater-Studio of Y. Hirniak and O. Dobrovolska continued its career in New York, and the New Theater was founded in 1966. The *Ukrainian Music Institute of America, the *Ukrainian Artists' Association in the USA, and the Slovo Association of Ukrainian Writers in Exile have their head offices in New York. The *New York Group of poets is based there. The cultural needs of the local community are served by the Literary-Artistic Club, which owns its own building, the Ukrainian People's Home (est 1954), the Sonevytsky art gallery (est 1963), and the *Ukrainian Institute of America (est 1955). Since 1979 the Ukrainian community has staged a spring street fair, known as the Ukrainian Festival, on Seventh Street.

Two learned societies, the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences, with their own buildings, libraries, archives, and publishing houses, were established after the war. The *Ukrainian Museum, which has a large ethnographic and art collection, publishes books on Ukrainian art history.

Many periodicals came out briefly in New York, including *Svoboda* (1906–11), *Sichovi visty* (1918–23), *Ukrains'kyi visnyk* (1927–8), *Natsional'na trybuna* (1950–1), and *Prometei* (1959). *Visnyk OChSU*, *Holos Lemkivshchyny*, *Ukrainian Bulletin*, *Ukrainian Quarterly*, and the communist weekly *Ukrains'ki visti* and monthly *Hromads'kyi holos* have been published in the postwar period. The main Ukrainian publishers and bookstores have been Knyhospilka, Prolog, Chervona Kalyna, Surma, and Hoverlia.

Religious life is organized around parishes and religious societies. The largest Ukrainian Catholic parish is St George's in Manhattan (est 1905), which is run by the Basilian monastic order. There are two Catholic churches in Brooklyn (est 1912 and 1916), one in Astoria (est 1943), one in the Bronx (est 1943), one in Queens (est 1957), and one in Staten Island. Besides the Orthodox Cathedral of St Volodymyr, there are six Orthodox churches in Manhattan and Brooklyn. The Transcarpathian community has three churches, two Catholic and one Orthodox. There are also Evangelical, Baptist, and Pentecostal Ukrainian congregations. In 1935 Brooklyn became the seat of B. Shpylka, the bishop and, later, metropolitan of the Ukrainian Orthodox Church of America, and then the home of Bishop A. Kushchak and Archbishop P. Vydybida-Rudenko of the Ukrainian Autocephalous Orthodox Church in Exile.

B. Kravtsiv

New York Group (Niu-Iorkska hrupa). A group of poets and artists, which developed spontaneously in the mid-1950s from informal friendships and discussions around the *Students'ke slovo* (Student Word) supplement to the newspaper *Svoboda*. The initiating core consisted of B. *Boychuk, B. *Pevny, and G. *Tarnawsky. The group grew to include the writers E. Andiiivska, Zh. Vasylykivska, V. Vovk, B. Rubchak, and P. Kylyna (P. Warren) and the artists Ya. Gerulak and Ju. Solovij. The name, chosen because the majority of members lived in the New York

area, was applied to the group from 1959, when they decided to start a serial publication, **Novi poezii*. The name was also used for a publishing house, which published many of the collections of the individual members.

The New York Group was never united by any artistic credo or manifesto. More a grouping of friends than an organization, it embraced Ukrainians who began their period of creativity in North America, and who happened to be living in New York. In form their poetry ranged from the surrealism of Andrievska and the depoeiticized verse of Tarnawsky to the more traditional quatrains of Boychuk and Rubchak, although all the members had experienced similar influences (J.-P. Sartre, F.G. Lorca, A. Camus, F. Kafka, P. Neruda), had a common émigré heritage, which at times encouraged in them an excessive preoccupation with the purity of the Ukrainian language, and were united in a desire to distance themselves from the overly nationalistic poetry of the previous generation. Their creativity provided a much-needed revitalization of émigré Ukrainian literature after the Second World War and probably served also as an impetus for the **shestydesiatnyky* in Ukraine. The group has never officially ceased to exist, although since the dispersal of its members, who remain active individually, its activity has been limited to sporadic publications.

D.H. Struk

St John the Baptist Ukrainian Catholic Church in Hunter, New York

New York State. A northeastern state (1990 pop 18,044,505) of the United States, covering 128,400 sq km. Its capital is Albany. By 1930, 62,200 Ukrainian Americans lived in the state. In the 1960 census 26,800 inhabitants listed Ukrainian as their mother tongue, and in the 1980 census 127,700 declared Ukrainian origin. By 1990 their number had dropped to 121,100. The largest Ukrainian communities in the state are found in New York City, Buffalo, Rochester, Binghamton, and Syracuse. Popular

Ukrainian resort areas in the Catskill Mountains region include Hunter, Kerhonkson, and Glen Spey.

New Zealand. A country (1990 pop 3,389,000) in the southeastern Pacific, covering an area of 270,000 sq km on two main islands and a group of smaller ones. After the Second World War about 250 Ukrainian displaced persons went to New Zealand. Having fulfilled their two-year contracts at assigned jobs, they settled in the larger cities. There were over 400 Ukrainians in the country: 120 in Auckland, 75 in Wellington, 190 in Christchurch, and 45 in Dunedin. Ukrainian clubs in Wellington (est 1949) and Auckland (est 1951) organize cultural activities, such as choir concerts, dance performances, and national festivals. Ukrainian Saturday schools were set up in the 1960s in Wellington and Christchurch. Ukrainian Catholics are under the jurisdiction of the apostolic exarch in Australia but do not have their own priest. They are organized into church brotherhoods. The Orthodox belong to the Ukrainian Autocephalous Orthodox Church in Australia and have one parish and a priest in Wellington.

Newark. A port city (1989 pop 313,839) on the west bank of the Passaic River and Newark Bay in northeastern New Jersey. An important industrial, trading, and financial center, it is the largest city in the state. A large job market and its proximity to New York City made Newark attractive to Ukrainian immigrants: in 1930 there were about 1,400 Ukrainian residents, and by 1980 approx 13,600. Community organizations began in the city with the St Nicholas Brotherhood in 1900. In 1906 the first Ukrainian public meeting was held. A Ukrainian Catholic parish was set up in 1907 by Rev I. Dorozhynsky, and an Orthodox parish in 1918. The Ukrainian People's Home was incorporated in 1915, and bought its own building two years later. In 1921 the American-Ukrainian Building and Loan Association was formed; 10 years later its assets reached 750,000 dollars. Newark's Trident Savings and Loan Association (est 1921) survived the depression and had reached assets of 18 million dollars by the 1960s. In 1924 the Black Sea (Chornomorska) Sich sports club was founded, and over time it developed a reputation for its prowess in soccer. In the interwar period there were over 30 organizations in Newark. The Self-Reliance Credit Union was set up in 1959; by 1978 it had almost 3,000 members and assets of 7.2 million dollars. Among the various Ukrainian organizations in Newark, the Ukrainian Center and the Black Sea Sich sports club are the most active.

News from Ukraine. A weekly paper published in Kiev since June 1964 by the *Ukraina Society: Association for Cultural Relations with Ukrainians Abroad. A Ukrainian-language version, *Visti z Ukraïny*, has appeared since November 1960. Both papers published propagandistic articles promoting Soviet Ukrainian cultural, economic, and political achievements and Soviet foreign policy. They refuted charges of Russification and criticism of human rights abuses in Ukraine. They regularly published diatribes against Ukrainian 'bourgeois nationalists' in the West, including 'exposés' of alleged war criminals and of relations between leading figures in the émigré nationalist community and 'imperialist' intelligence agencies and fascism in the West. In the late 1980s, in the spirit of M. Gorbachev's policy of glasnost, the papers muted their at-

tacks and concentrated instead on presenting more objective reports on developments in Ukraine and on the 'blank spots' in Ukrainian history; in the early 1990s the papers supported the new political order in Ukraine and adopted pro-independence profiles. They have been widely distributed (often free of charge) among Ukrainians and pro-Soviet activists in the West, as well as in the developing world. Until very recently they were not available in Ukraine and were rarely mentioned in official sources. In 1990 the editor in chief of *News from Ukraine* was V. Kanash. The editorial board has included prominent writers (eg, I. Drach, D. Pavlychko, and V. Brovchenko), scholars (I. Khmil), and athletes (V. Borzov).

Newspapers. See Press.

Neyman, Czesław, b 1852, d 1906. Ukrainian folklorist and historian of Polish origin. While serving as a notary in Vinnytsia, he studied Ukrainian folklore and became friends with M. Kotsiubynsky (1880s). He contributed articles on Ukrainian songs (1883, 1884), dumas (1885), and the history of the Bratslav region (1889) to *Kievskaia starina* and wrote a study of dumas for the Polish journal *Atheneum* (1885).

Nezabytovsky, Vasyl [Nezabytovs'kyj, Vasyl'], b 1824 in Radomyshl, Kiev gubernia, d 26 June 1883. Jurist. After graduating from the law faculty of Kiev University in 1846, he taught at a gymnasium in Kiev and then held the law chair at Nizhen Lyceum (1850–3) and Kiev University (1853–83). He served as dean of the law faculty (1863–5, 1870–3, 1876–9) and prorector of the university (1865–7). His main interests were financial law, international law, and legal history. He developed an original theory that the state's authority is based not only on ownership or control of a territory, but also on certain legal and public elements. His collected works appeared in Kiev in 1884.

Nezalezhnyky. See Ukrainian Social Democratic Workers' party (Independentists).

Nezamoshnyky (poor peasants). A term used in the early years of Soviet rule to describe peasants who did not own livestock or agricultural equipment or who owned relatively small plots of land. *Nezamoshnyky* constituted one of the three categories introduced by the Soviet authorities in the 1920s to classify the rural population. (The other two were middle peasants [*seredniaky*] and *kulaks, or rich peasants.)

During War Communism Bolshevik rule in the Ukrainian countryside was based not on the soviets but on groups of *nezamoshnyky* organized into *Committees of Poor Peasants, which were easier to control than the soviets. With the introduction of the *New Economic Policy, the administrative powers of the committees were greatly reduced, and in 1925 they were completely removed.

After 1925 the term *nezamoshnyky* was more a political and social category than one indicating the size of property holding. It was usually applied to supporters of the Soviet regime who had comparatively little land, but who were by no means always poor. The budgets of the Committees of Poor Peasants for 1924–5 in Ukraine show that people without land under cultivation had an annual net income of 52 rubles per capita, which was only slightly

less than the average for the republic (60.3 rubles); and their per capita purchases even exceeded those of peasants who were cultivating 4–6 desiatins. *Nezamoshnyky* headed the entire agricultural administration and enjoyed many privileges, including the right to pay dues to their co-operatives in installments, a discount in renting agricultural equipment from the government, and relief from paying taxes.

The role of the *nezamoshnyky* grew sharply with the beginning of *collectivization. Meetings of *nezamoshnyky* carried out individual tax assessments and occasionally confirmed the list of kulaks to be dispossessed. Of course, only a minority became village activists. Any *nezamoshnyk* who refused to support Party policy was immediately reclassified as a 'kulak henchman.' With the completion of collectivization the concept of *nezamoshnyk* disappeared. Although millions of *nezamoshnyky* starved to death in the man-made *famine of 1932–3, they did not fall into the category of the population to which the government rendered economic and social aid.

A. Babyonyshev

Nezhdanova, Antonina [Neždanova], b 29 July 1873 in Kryva Balka, Akkerman county, Bessarabia gubernia, d 26 June 1950 in Moscow. Opera singer (soprano) of Russian, Ukrainian, and Polish descent. Equally successful as a lyric, dramatic, and coloratura singer, she knew M. Kropyvnytsky, P. Saksahansky, and M. Zankovetska from their appearances in Odessa. She popularized Ukrainian music in Moscow (from ca 1909), where she worked with the tenor I. Alchevsky in his Kobzar Association. Nezhdanova recorded for the Gramophone label some items of her Ukrainian repertoire. Her concert repertoire included songs by M. Lysenko, M. Kropyvnytsky, and K. Stetsenko; a number of Ukrainian folk songs; fragments from S. Hulak-Artemovsky's opera *Zaporozhian Cossack beyond the Danube*; and operas on Ukrainian themes by M. Mussorgsky, P. Tchaikovsky, and N. Rimsky-Korsakov. From the 1920s Nezhdanova appeared in Ukrainian opera theaters in Kharkiv, Kiev, and Odessa, where the conservatory now bears her name.

Nezhyvy, Semen [Nežyvyj] (actual surname: Musiienko), b 1744 in Melnyky, Chyhyryn region, d ? Haidamaka leader. He was a peasant hired hand and a potter by trade. After the outbreak of the *Koliivshchyna rebellion in the spring of 1768, he proclaimed himself the Zaporozhian otaman of Uman kurin. He banded local peasants into a rebel detachment and led raids of Polish estates in the Smila, Cherkasy, Krylov, Kaniv, and Medvedivka districts. Nezhyvy's rebel detachment was attacked by Russian troops while he consulted with the hussar colonel Chorba, and later in Kiev he was sentenced to the lash and to lifelong hard labor in Nerchinsk, Siberia. His subsequent fate is unknown.

Nezvysko settlement. A multi-occupational settlement of the 4th to 3rd millennium BC on the right bank of the Dniester River near Nezvysko, Horodenka raion, Ivano-Frankivske oblast. Excavated in 1926 and in the 1950s, the site yielded early agricultural implements and plates of the *Linear Spiral-Meander Pottery culture. The Trypilian component of the site produced numerous tool forms, small bronze items, and pottery with monochromatic or

polychromous ornamentation. The inhabitants of the various settlements at Nezvysko practiced agriculture and animal husbandry.

The Niagara Falls Art Gallery and Museum

Niagara Falls Art Gallery and Museum. A repository of Ukrainian art founded in 1971 by O. and M. *Koliankivsky, the previous owners of the W & W Galleries in Toronto (1958–70). The centerpiece of the new gallery is W. Kurelek's 'Passion of Christ,' a series of 160 panels purchased from the painter in March 1970. The other major part of its collection consists of 70 oils and watercolors by M. Krychevsky. Other valuable artworks include the Okhtyrka Icon (1739), landscapes by painters such as M. Hlushchenko, S. Shyshko, A. Kashshai, V. Manastyrsky, T. Yablonska, and V. Patyk, a *stone *baba*, and 20 sculptures by E. Koniuszy. The collection is housed in a five-level building designed by R. *Zuk especially for the 'Passion of Christ' series and completed in 1971. The gallery has published two Kurelek albums, *The Passion of Christ* (1974) and *The Ukrainian Pioneer* (1980).

Bishop Dionisii Niaradi

Polina Niatko

Niaradi, Dionisii [Njaradi, Dionisij], b 10 October 1874 in Ruski Krstur, Bačka region, Serbia, d 4 April 1940 in Mrzlo Polje, Bačka region. Ukrainian Catholic bishop in Yugoslavia. He was ordained in 1889 and was rector of the

Greek Catholic theological seminary in Zagreb in 1902–14. In 1915 he was consecrated as the first locally born bishop of *Križevci eparchy. Active in supporting Ukrainian causes, he ensured that his priests were trained as conscious Ukrainians, and he maintained close relations with Metropolitan A. Sheptytsky and church circles in Galicia. Niaradi also served the church in Transcarpathia during various crises: he acted as apostolic administrator for Prešov eparchy in 1922–7 and apostolic visitor for Mukachiv eparchy in 1938–9.

Niatko, Polina [Njatko] (real surname: Omelchenko), b 21 October 1900 in Karabachyn, Radomyshl county, Kiev gubernia, d ? Stage and film actress and pedagogue. After completing study at the Lysenko Music and Drama School in Kiev (1916–18) Niatko acted in Molodyi Teatr (1918–19), Berezil (1923–4), the Odessa Derzhdrama (1925–35, with interruptions), and the Kiev Ukrainian Drama Theater (1940–60) and taught at the Kiev Institute of Theater Arts (until 1960). Her notable roles in theater were Mavka in Lesia Ukrainka's *Lisova pisnia* (The Forest Song) and Diiana in V. Myanko's *Ne nazyvaiuchy pryzvyschch* (Without Naming Names), and in films, Oksana in *Koliivshchyna* (1933) and Kateryna in *Prometheus* (1936).

Nicephorus (Nykyfor), b ?, d 1121 in Kiev. Metropolitan of Kiev in 1104–21. A Greek by origin, he was assigned to the metropoly from Constantinople in 1104. He is best known for his writings, including epistles to *Volodymyr Monomakh and the Volhynian prince Yaroslav Sviatopolkovych, a sermon on fasting, and a letter to Volodymyr Monomakh on morality. All were originally written in Greek and later translated into Church Slavonic.

Nicephorus, b ?, d 1597. Greek envoy of the Patriarch of Constantinople to the sobor called to discuss the Church Union of *Berestia. He taught at Padua University and was a preacher in Venice before entering the service of the patriarch as a protosyncellus. In 1595 he conducted a mission in Moldavia. Because of his familiarity with the political situation in the region, Nicephorus was invited by Prince K. Ostrozky to participate in the sobor and to provide the Orthodox forces with a powerful symbolic ally. He was detained on the way by Polish authorities, but he arrived in time to participate in the October 1596 meeting of anti-union forces, where he spoke out openly against the union. Nicephorus was later detained again and charged with being a Turkish spy. He died in prison.

Nichlava River [Ničlava]. A left-bank tributary of the Dniester River. It is 83 km long and drains a basin area of 871 sq km. The river flows through the Podolian Upland in Ternopil oblast and the town of Kopychyntsi. It has a drop of 2.1 m/km.

Nicholas I (Nikolai Pavlovich Romanov), b 6 July 1796 in Tsarskoe Selo (now Pushkin), St Petersburg gubernia, d 2 March 1855 in St Petersburg. Russian emperor from 1825. Nicholas ruled as a consistently reactionary anti-Enlightenment and anti-Western autocrat. He suppressed all revolutionary manifestations (eg, the Decembrist movement), centralized the bureaucracy, introduced a secret police (the Third Section) and gendarmerie, and imposed strict censorship throughout the Russian Empire. Exter-

nally, his regime supported the status quo in Europe and participated in the suppression of the Polish Insurrection of 1830–1 and the Hungarian Revolution of 1848–9. Its policies vis-à-vis Ukraine (exemplified in the person of Governor-General D. Bibikov) were aimed at the obliteration of Ukrainian national particularities, rights, and traditions. *Magdeburg law in Kiev and the *Lithuanian Statute were abolished, the Uniate church in Right-Bank Ukraine was forcibly liquidated, Russification was intensified, and a full-fledged struggle was waged against any organized national-political activity (eg, the suppression of the *Cyril and Methodius Brotherhood and the exile of T. *Shevchenko). Ukraine's indigenous economic growth (especially in the sugar industry) and the penetration of Ukrainians into the large cities were hindered by a policy of intensive Russian colonization. Nicholas's curtailment of the influence of the Polish landed gentry in Right-Bank Ukraine did not attenuate the plight and oppression of the enserfed Ukrainian peasantry, and peasant unrest erupted in the 1840s and 1850s (eg, the peasant rebellions led by U. Karmaliuk in 1830–5 and the rebellion of the *Kiev Cossacks in 1855). The only positive developments in Ukraine during Nicholas's rule were in belles lettres (eg, by N. Gogol and Shevchenko) and higher education and scholarship (eg, the establishment of St Vladimir [Kiev] University, the Central Archive of Old Documents there, the Kiev Archeographic Commission, the Odessa Society of History and Antiquities, and the Nizhen Lyceum), but even they were undermined by his rigid policies. The defeat of the Russian Empire in the Crimean War exposed the social, economic, and moral bankruptcy of Nicholas's rule.

O. Ohloblyn

Nicholas II (Nikolai Aleksandrovich Romanov), b 18 May 1868 in Tsarskoe Selo (now Pushkin), St Petersburg gubernia, d 17 July 1918 in Ekaterinburg, Perm gubernia. The last Russian emperor (1894–1917). Nicholas continued the reactionary policies of his father, *Alexander III, which were aimed at the maintenance of autocratic order in the Russian Empire and the political status quo in Europe, imperialistic expansion in Asia (particularly in the Far East), and domination over the empire's non-Russian peoples. Police repression failed, however, to check the growth of peasant unrest, workers' strikes, revolutionary parties, terrorism, national-liberation movements (particularly in Ukraine), and political opposition by the intelligentsia and bourgeoisie (which increasingly took the form of mass petitions, protests, and demonstrations) throughout the empire. The civil strife, combined with Russia's defeat in the Russo-Japanese War of 1904–5, culminated in the *Revolution of 1905. Nicholas was forced to introduce constitutional reforms and a State *Duma with limited legislative powers and to guarantee basic civil liberties. The restrictions against the Ukrainian language lapsed; the language began to be used, and there occurred a rebirth of Ukrainian literary, scholarly, civic, and cultural

activity. The *Stolypin agrarian reforms introduced under Nicholas strengthened the economic influence of the wealthier strata of the Ukrainian peasantry.

But Nicholas subsequently reverted to his reactionary policies. He dissolved the first two dumas, restricted the rights of non-Russian peoples, and patronized the extreme-right *Black Hundreds. After Russia entered the First World War, all Ukrainian-language institutions, publications, and periodicals were banned, and many Ukrainian leaders, including M. *Hrushevsky, were arrested and sent into exile outside Ukraine. During the 1915 Russian occupation of Galicia and Bukovyna Ukrainian institutions there suffered the same repressions. Civic leaders and hundreds of Greek Catholic clergy, including Metropolitan A. Sheptytsky, were deported to Russia and Siberia; publishing in Ukrainian was forbidden; all Ukrainian institutions were closed down; and all manifestations of organized Ukrainian activity were suppressed. Popular dissatisfaction with the war and Nicholas's inept rule gave rise to the February Revolution of 1917 and his abdication, house arrest, and removal by the Provisional Government to Tobolsk, Siberia. He and his wife and five children were executed by the Bolsheviks to prevent their rescue by White forces.

Nichyk, Valeriia [Ničyk, Valerija], b 3 October 1928 in Antonivka, Varva raion, now in Chernihiv oblast. Philosopher. A graduate of Kiev University (1951), since 1952 she has worked at the AN URSR (now ANU) Institute of Philosophy. She has been a candidate of sciences since 1958 and a doctor of philosophy since 1979, and she has directed the institute's Sector of the History of Philosophy in Ukraine since 1984. Nichyk is the leading specialist on philosophy in 17th- and 18th-century Ukraine. She has written numerous articles in this field and books on T. Prokopovych (1977) and on the main themes of philosophy courses at the Kievna Mohyla Academy, titled *Iz istorii otechestvennoi filosofii kontsa XVII–nachala XVIII v.* (From the History of the Fatherland's Philosophy from the End of the 17th to the Beginning of the 18th Century, 1978); coedited the institute's edition of T. Prokopovych's philosophical works in (3 vols, 1979–81) and the writings of the brotherhood schools (1988); was chief editor of a collection of articles on philosophy from I. Vyshensky to H. Skovoroda (1972) and of the first volume of the ANU history of philosophy in Ukraine (1987); and cowrote a book on humanist and Reformation ideas in Ukraine (1990). She has also done some work in the philosophy of science: she has written books on the philosophical foundations of O. Bohomolet's scientific works (1958) and on causality as a category of dialectical materialism (1960).

Nickel ores. Unrefined mineral deposits of a ferromagnetic metal with varied domestic and industrial applications. The first nickel deposits in Ukraine were mined in 1937 in Dnipropetrovske oblast. Additional finds in the region of the Ukrainian Crystalline Shield have brought the number of known deposits to 10 – 6 in the Boh River region and 4 in the Middle Dnieper area. The nickel content of the ores varies from 0.3 to 2.5 percent, with an average of 0.9 to 1.0 percent.

Niederle, Lubor, b 20 September 1865 in Klatovy, Bohemia, d 14 June 1944 in Prague. Czech Slavist, archeologist, anthropologist, and ethnographer. A graduate of Prague

University (1887), he began lecturing there in 1891. He visited Ukraine in 1893. In 1898 he was promoted to the position of professor of archeology and ethnography. He was a member of the Shevchenko Scientific Society in Lviv and the Ukrainian Scientific Society in Kiev and maintained contacts with Ukrainian scholars, such as M. Hrushevsky and V. Hnatiuk. His chief works on the origin of the Slavs are *Slovanské starožitnosti* (Slavic Antiquities, 4 vols, 1902–25; Russian translation of vol 4, 1904), *Život starých Slovanů* (The Life of the Ancient Slavs, 1909; Russian translation 1909; French translation 1923–6), and *Rukověť slovanské archeologie* (Handbook in Slavic Archeology, 1931). He wrote extensively about Transcarpathia, which he considered to be the cradle of the Slavs.

Niedźwiedski, Julian. See Medvedsky, Yulian.

Oleh Niemets

Niemets, Oleh [Njemec'], b 13 February 1922 in Kiev. Physicist; member of the AN URSR (now ANU) since 1978. He graduated from the Kiev Polytechnical Institute in 1947 and from 1949 to 1970 was deputy director of the ANU Institute of Physics and from 1974 to 1982 director of the Institute for Nuclear Research. Since 1956 he has been a professor of physics at Kiev University. His main fields of research are nuclear structure, properties of nuclear forces, and mechanisms of nuclear reactions. He identified the irregular change of deuteron break-up cross section resulting from a decrease in diffuseness, the 'Nemets effect.' Among his monographs are *Polarizatsiini doslidzhennia v iadernii fizytsi* (Investigation of Polarization in Nuclear Physics, 1980), *Nuklonni asotsiatsii v atomnykh iadrakh ta iaderni reaktsii bahatonuklonnykh peredach* (Nucleon Associations in Atomic Nuclei and Many Particle Transfer Nuclear Reactions, 1988), and *Elektromahnitni momenty zbudzhenykh ta radioaktyvnykh iader* (Electromagnetic Moments of Excited and Radioactive Nuclei, 1989).

Nieuważny, Florian, b 30 April 1929 in Żywiec, Cracow voivodeship, Poland. Polish literary scholar and translator. He completed postgraduate studies at Kiev University (1959) and became a lecturer at and, later, head (1971) of the Department of Ukrainian Philology at Warsaw University. He coedited *Antologia poezji ukraińskiej* (Anthology of Ukrainian Poetry, 1977) and has edited collections of Polish translations of works of 20th-century Ukrainian poets, including P. Tychyna (1969), M. Rylsky (1965), and V. Korotych (1974). His articles on Ukrainian writers and lit-

erature have appeared in *Slavia Orientalis*, *Mały słownik pisarzy europejskich narodów ZSRR* (A Concise Dictionary of Writers of the European Nations of the USSR, 1966), *Ukrains'kyi kalendar*, and *Nasha kul'tura*.

Nightingale (*Luscinia*; Ukrainian: *soloveiko*). A small (approx 14–17 cm long) Eurasian bird of the thrush family Turdidae, renowned for its singing ability. In Ukraine the western or southern nightingale (*L. megarhynchos*) is found primarily in the Crimea but also in Transcarpathia, Polisia, and the western regions of the forest-steppe; the eastern or common nightingale (*L. luscinia*) is found throughout Ukraine; and the blue-throated nightingale (*L. svecica*) is found everywhere except the Crimea, the Carpathians, and the steppe. The nightingale is commonly invoked in Ukrainian *folk songs and *folklore in the image of a creator of sweet sounds, a builder of homes, and a harbinger of spring. The word *soloveiko* is a term of personal endearment.

Nightshade (*Solanum*; Ukrainian: *paslyna, paslin*). Annual and perennial creeping shrubs of the family Solanaceae. About 2,000 species of *Solanum* are known, 6 of which are found in Ukraine. The most common are the black nightshade (*S. nigrum*), with black, poisonous berries, and the bittersweet or woody nightshade (*S. dulcamara*), with foliage and egg-shaped red berries that are poisonous and capable of causing convulsions and death. The closely related deadly nightshade, or *belladonna (*Atropa belladonna*), is a tall, bushy herb, which is the source of a number of alkaloid drugs. Nightshades have been used in *folk medicine to treat rheumatism, respiratory disease, and skin ailments.

Entrance to the Nikita Botanical Garden

Nikita Botanical Garden (Nikitskyi botanichnyi sad). A scientific research complex located near Botanichne (formerly Nikita), a few kilometers east of Yalta, in the Crimea. Its founder and first director was C. Steven (1812–26), a Swedish botanist and the chief inspector of silk-worm farming in the southern Russian Empire. Under the sponsorship of Duke A-E. du Plessis de Richelieu, the governor of New Russia, he created the garden as an imperial repository of all useful and decorative Mediterranean and Asian plants, with the purpose of subsequently cultivating them throughout the region. The first Russian pomological collection (1817), a horticultural school (1823, closed down in 1921), vineyards and a wine-making school (1828), medicinal-plant and tobacco plantations, and a botanical cabinet and meteorological station (1908) were established there. In 1890 the garden began publishing its own collection, *Zapiski* (later renamed *Trudy*). In 1920 it had an area of approx 136 ha. In 1924 the garden was designated an all-Union scientific institution. It began publishing a research bulletin in 1929, and research in

plant selection and hybridization began there in the 1930s. Under the USSR Ministry of Agriculture and part of the All-Union Academy of Agricultural Sciences, it covered an area of nearly 1,000 ha, employed 1,300 people, and consisted of 15 research departments and laboratories, a museum, archives, printing press, 4 parks, 4 experimental farms (near Yalta, Frunzenske, Gvardiiske, and Medvedivka), and the Cape Martian Nature Preserve (est 1973). Over 15,000 plant species, varieties, sorts, and hybrids were cultivated there. Its library, the oldest and one of the best Ukrainian repositories of biological and agricultural literature, had holdings of over 207,700 books and periodicals; and its herbarium of Crimean flora had over 121,446 pages. The garden's scientists (approx 120) study the Earth's flora and introduce, acclimatize, and select decorative, fruit- and nut-bearing, medicinal, essential-oil, and industrial plants for widespread use and production in southern Ukraine, Moldova, Caucasia, and Central Asia. The garden has about 700,000 visitors annually. An illustrated Ukrainian-French book about it was published in 1987.

R. Senkus

Nikitin, Andrii, b 23 June 1927 in Bohuslav, Bila Tserkva okruha. Cyberneticist and computer scientist. He graduated from Kazan University (1957), and since 1958 he has worked at the AN URSS (now ANU) Institute of Cybernetics in Kiev. He made significant contributions in the areas of operating systems in computers, computer networking, and intercomputer protocols.

Nikitin, Volodymyr, b 7 August 1907 in Arkhangelsk, Russia. Physiologist; full member of the AN URSS (now ANU) from 1967. A graduate of the Kharkiv Institute of People's Education (1929), he worked at the Kharkiv Zootechnical Institute (1930–53) and at Kharkiv University as department head and director of its biology research institute. He wrote over 500 articles and 8 monographs dealing with the physiology and biochemistry of animals, ontogenesis, endocrinology, hematology, and gerontology. He introduced the concept of the endocrine formula of aging and proposed the theory of genome breakdown as the leading factor in cell aging.

Nikitska Yaila

Nikitska Yaila [Nikits'ka Jajla]. A massif in the southwestern part of the main range of the *Crimean Mountains that divides the Yalta and Hurzuf coastal regions. The peaks in the mountain cluster are approx 1,300–1,400 m high, with the tallest, Mount Avinda, reaching 1,473 m. They contain a variety of karst formations. Crimean pine forests are located on the mountains' limestone inclines. Nikitska Yaila forms part of the *Crimean Game Preserve.

Nikolaev, Lev, b 10 February 1898 in Tahanrih, Don Cossack province, d 10 December 1955 in Kharkiv. Anthropologist and orthopedist. A graduate of Paris University (1916) and the medical faculty of Kharkiv University (1920), he chaired the anatomy department at the Kharkiv Institute of People's Education (1924–30) and headed the anthropology subdepartment of the Ukrainian Scientific Research Institute of Orthopedics and Traumatology (1928–34). At the latter institute he organized and chaired (from 1934) the first department of biomechanics in the USSR. His papers appeared in *Materialy po antropologii Ukrainy* (vols 1–3, 1926–7), and he wrote *Antropometricheskie materialy dlia izgotovleniia standartnoi obuvi* (Anthropometric Materials for the Manufacture of Standard Footwear, 1931) and *Biomekhanicheskie osnovy protezirovaniia* (Biomechanical Foundations of Prosthetics, 1954).

Nikolaev, Vladimir, b 1847 in Tsarskoe Selo, Russia, d 11 November 1911 in Kiev. Architect. After graduating from the St Petersburg Academy of Arts (1870) he worked as an architect in Kiev. In 1892 he was elected a member of the Academy of Arts. He was a founder and director of the Kiev Art School (1901–11). He designed many residential and public buildings in Kiev, including the Bergonier Theater (now the Kiev Russian Drama Theater, 1873), the Merchants' Assembly building (now the Philharmonic building, 1882), the Refectory Church at the Kievan Cave Monastery (1893–5), and St Nicholas's Cathedral at the Holy Protectress Monastery (1902). He also took part in the construction of St Volodymyr's Cathedral (1862–96), the Opera Theater (1898–1901), and the City Museum (1897–1900) and designed the base of M. Mikeshin's monument to B. Khmelnytsky.

Nikolaevsk. III-26. A town smt (1959 pop 11,000) on the left bank of the Volgograd Reservoir and a raion center in Volgograd oblast, RF. It was founded as a *sloboda in 1794 and was the largest Ukrainian colony in the Volga Lowland. According to the Soviet census of 1926, Ukrainians represented 77.4 percent of the population in and around Nikolaevsk.

Nikolaiev, Anatolii [Nikolajev, Anatolij], b 5 February 1896 in Tarashcha, Kiev gubernia, d 6 July 1972 in Kiev. Obstetrician and gynecologist; full member of the USSR Academy of Medical Sciences from 1952. A graduate of Kiev University (1917), he practiced medicine in Kiev, Poltava, and Donetske (1922–41), held executive positions at the academy's institutes of obstetrics and gynecology (1944–54), and was assistant scientific director of the Institute of Maternity and Childhood Care in Kiev. He published over 165 papers on the birth process, the prevention of intrauterine asphyxiation, painless childbirth through psychological preparation, and toxicoses due to pregnancy.

Nikolenko, Dmytro, b 7 November 1899 in Zhabotyn, Cherkasy county, Kiev gubernia. Psychologist. He graduated from the Kiev Institute of People's Education (1924) and worked in his specialty in Kiev. In 1930 he began to teach at the Kiev Pedagogical Institute, where in 1952 he was appointed to the chair of psychology. His publications deal mostly with child psychology, educational psychology, occupational psychology, and the history of psychology.

Nikolsky, Oleksander [Nikol's'kyj], b 4 March 1858 in Astrakhan, d 8 July 1942 in Kharkiv. Zoologist; full member of the VUAN and AN URSR (now ANU) from 1919. He completed his studies at St Petersburg University in 1881, and then headed the fish, amphibian, and reptile department of the Zoological Museum of the Academy of Sciences in St Petersburg (from 1896), taught at Kharkiv University (1903–20), headed the zoology research division of the Kharkiv Institute of People's Education (1921–31), and taught at the Kharkiv Medical Institute (1921–6). He led numerous research expeditions in Russia, Ukraine, and particularly the Crimea, during which he identified 69 new species and 16 subspecies of vertebrates. His writings include *Pozvonochnye zhyvotnye Kryma* (Vertebrate Animals of the Crimea, 1891) and *Vyznachnyk ryb Ukraïny* (A Guide to the Fish of Ukraine, 1930).

Nikolsky, Volodymyr [Nikols'kyj], b 15 August 1906 in Kvashonki, Tver gubernia, Russia, d 4 April 1979 in Kiev. Microbiologist and virologist. A graduate of the Leningrad Veterinary Institute (1929), he was director of the microbiology and virology department of the Ukrainian Agricultural Academy in Kiev (1956–79).

Nikopol. See Nykopol.

Andrii Nikovsky

Ivan Nimchuk

Nikovsky, Andrii [Nikovs'kyj, Andrij], b 14 October 1885 in Malyi Buialyk (now Sverdlove), Odessa county, Kherson gubernia, d 1942. Political leader, literary scholar, and journalist. He edited the newspapers *Rada* (1913–14) and *Nova rada* (1917–19) in Kiev and the journal *Osnova* (1915) in Odessa. During the revolutionary period he served as the first president of the *Ukrainian National Union (1918) and as minister of foreign affairs in V. Prokopovych's cabinet (1920). After returning to Ukraine in 1924, he worked as a research associate of the Commis-

sion for the Compilation of a Dictionary of the Ukrainian Vernacular and of the historical-philological division at the All-Ukrainian Academy of Sciences. He was sentenced at the *Union for the Liberation of Ukraine show trial to a 10-year term in a prison camp, which he served in the Solovets Islands. He wrote a book of critical essays, *Vita Nuova* (1919), a Ukrainian-Russian dictionary (1927), introductions to works by Lesia Ukrainka, I. Nechui-Levytsky, O. Kobylinska, H. Kvitka-Osnovianenko, and T. Borduliak, and a translation of W. Shakespeare's *Hamlet* (1928–9). He also translated works by N. Gogol and J. London into Ukrainian.

Nilus, Petro (né Slovetsky), b 21 February 1869 on the Busheny estate, Podilia gubernia, d 23 May 1942 in Paris. Painter. He studied under K. Kostandi at the Odessa Painting School (1883–9) and the St Petersburg Academy of Arts and was active in the *Society of South Russian Artists and the *Peredvizhniki society. From 1920 he lived abroad. Although he did some landscapes, he is best known for his large genre paintings, such as *Doing the Rounds* (1891), *In the Tavern* (1894), *On the Boulevard* (1895), *At the Theater Box Office* (1901), and *In the Artist's Studio* (1903). After 1910 he diverged from his earlier realism and began using stronger colors and simpler lines, as in *Golden Dreams, A Paris Street* (1930), and *Metro Exit* (1942). V. Afanasiev's monograph about him was published in Kiev in 1963.

Nimchuk, Dmytro [Nimčuk], b 1897, d 1944. Political leader and publicist. He was active in the Social Democratic Party of Transcarpathia and edited its paper **Vpered* (1926–32). He was president of the Public Health Insurance Institution in Khust. In January 1939 he became a member of the executive of the Ukrainian National Alliance. In the following month he was elected in the Khust district to the Diet of Carpatho-Ukraine, where he served as sergeant at arms. After the occupation of Transcarpathia by the Hungarians, he fled to Bratislava, where he was arrested and murdered by the Gestapo.

Nimchuk, Ivan [Nimčuk], b 12 February 1891 in Dzhuryn, Chortkiv county, Galicia, d 1 May 1956 in Edmonton. Civic and political leader and journalist; member of the Shevchenko Scientific Society from 1948. While studying at Lviv University he helped edit the daily *Nove slovo* (1912–14). After recovering from wounds sustained on the Serbian front he moved to Vienna, where he edited *Vidrodzhennia Ukraïny* (1918) and *Ukraïns'kyi prapor* (1921–3) and completed his studies in history (PH D, 1924). In 1925 he joined the editorial board of *Dilo*, and in 1935 he became managing and technical editor of the paper. He also served as a member of the Central Committee of the Ukrainian National Democratic Alliance. After being held by the Soviets in the Lubianka prison in Moscow (1939–41) he returned to Lviv, where he worked as a correspondent and editor of *Krakivs'ki visti* (1942–4) and chief editor of **Nashi dni*. After leaving Ukraine he was chief editor of the weekly *Khrystyians'kyi shliakh* (1946–7) in Germany and **Ukraïns'ki visti* (1949–56) in Edmonton. During his career he edited many books and almanacs. His special interests were military history, the growth of populism, and the history of the Ukrainian press, and he wrote many articles on these subjects. His writings include *595 dнів soviets'kym v'iaznem* (595 Days as a Soviet Prisoner, 1950).

Nimchuk, Vasył [Nimčuk, Vasył'], b 6 July 1933 in Dovhe, Transcarpathia. Linguist; corresponding member of the ANU (formerly AN URSR) since 1990. Since graduating from Uzhhorod University in 1955 and completing graduate studies there in 1958, Nimchuk has been on the staff of the ANU Institute of Linguistics. His works deal with dialectology, the history of the Ukrainian language, language contacts, onomastics, and the Old Rus' and Old Church Slavonic languages. Among his major publications are *Slovoobrazovanie imennykh chastei rechi v zakarpatskikh verkhnenadborzhavskikh govorakh* (Word Formation of the Nominal Parts of Speech in the Transcarpathian Upper Borzhava Dialects, 1962), *Slovník hidronimiv Ukraïny* (Dictionary of the Hydronyms of Ukraine, 1979), *Staroukraïns'ka leksykohrafiia v ii'zov'iazkakh z rosiis'koiu ta bilorus'koiu* (Old Ukrainian Lexicography in Its Relations to Russian and Belarusian, 1980), *Kyïvs'ki hlaholychni lystyky* (Kiev Glagolitic Folia, 1983), and entries in *Etymolohichnyi slovník ukraïns'koi movy* (Etymological Dictionary of the Ukrainian Language, 1983–5) as well as *Movoznavstvo na Ukraïni v XIV–XVII st.* (Linguistics in Ukraine in the 14th–17th Centuries, 1985).

Nimchynov, Kostiantyn [Nimčynov, Kostjantyn], b 3 January 1899 in Andriivka, Zmiiiv county, Kharkiv gubernia, d ? Linguist. A professor at Kharkiv University in the 1920s and 1930s and a member of the State Commission for the Formulation of Rules for the Orthography of the Ukrainian Language (1925–6), he helped compile a Russian-Ukrainian dictionary (1926) and two advanced course books of Ukrainian (1929, 1931), and wrote a booklet on the Ukrainian language in the past and present (1925, 1926) and articles on Ukrainian historical morphology, syntax, and etymology. He agreed with S. Smal-Stotsky's rejection of the theory of one proto-Rus' nation. In 1934 he published a brochure attacking 'nationalist sabotage' in Ukrainian syntax, but this Stalinist diatribe did not forestall his arrest in 1937. His further fate is unknown.

Nimenko, Andrii, b 20 June 1925 in Inhulo-Kamiianka, Zinovivske okruha. Sculptor, graphic artist, art scholar, and poet. A graduate of the Kiev State Art Institute (1951), he has done portraits of P. Voronko (1951) and T. Shevchenko (1964) and the relief in the Enei café in the Kiev Building of Litterateurs, and collaborated on the reliefs in the Arsenal station of the Kiev metro (1960) and on monuments, such as that to D. Guramishvili in Myrhorod (1969). He has illustrated books and has written several, on M. Lysenko (1958), I. Kavaleridze (1967), Ukrainian sculpture from the mid-19th to the early 20th century (1963), and monuments to Shevchenko (1964). Since 1969 he has published several poetry collections and written documentary film scripts.

Niniowskyi, Wasył [Nin'ovs'kyj, Vasył'], b 9 February 1914 in Zhukotyn, Turka county, Galicia. Lexicographer, educator, and graphic artist. In the interwar period he was a community organizer in the Kolomyia region, and was persecuted by Polish and then Soviet and German authorities. Having emigrated to Canada from Western Europe in 1950, he completed his higher education at the universities of Alberta (MA, 1967) and Ottawa (PHD, 1973) and lectured in Slavic languages at the universities of Alberta (1967–9) and Saskatchewan (1972). He has written over

200 articles on historical, literary, artistic, and political topics and two books on the poetic form of Hutsul carols (1967, 1968), and has compiled a Ukrainian inverse dictionary (1969) and a Ukrainian-English and English-Ukrainian dictionary (1985). Several exhibits of his graphic works have been held.

Nirod, Fedir, b 31 April 1907 in St Petersburg. Theatrical designer. He completed study at the Kiev State Art Institute in 1930, and in 1934–45 he worked as stage designer in the Zankovetska Theater (from 1944 the Lviv Ukrainian Drama Theater). In 1950 he started working for the Lviv Opera Theater, and in 1961 he became principal designer of the Kiev Opera and Ballet Theater. In all, he created scenery for over 150 productions, combining elements of constructivism and productionism in his designs (as in K. Gutzkow's *Uriel Akosta* for the Zankovetska Theater). Later he became more conservative (as in P. Tchaikovsky's ballet *Swan Lake*). A biography, by M. Pamfilova, was published in Kiev in 1969.

Nis, Stepan (pseud: S. Voloshyn), b 6 May 1829 in Ponor, Konotip county, Chernihiv gubernia, d 19 December 1900 in Horodnia, Chernihiv gubernia. Ethnographer and writer. After graduating from Kiev University (1854) he served as a physician in Chernihiv and was exiled in 1863 to Novgorod gubernia for 'distributing Little Russian propaganda.' In 1871 he settled in Horodnia, where he practiced medicine and devoted himself to ethnographic studies. His folkloric materials were published in *Chernigovskie gubernskie vedomosti* and A. Metlyn'sky's, P. Chubyn'sky's, and M. Nomys's collections. Only some of his short stories, about serfs and Cossacks, appeared in his lifetime, in *Osnova*, *Chernigovskii listok*, and *Kievskaiia starina*. Nis also wrote several popular brochures on home medical care (1874) and folk remedies (1875).

Petro Nishchynsky

Nishchynsky, Petro [Niščyns'kyj] (pseud: P. Baida), b 21 September 1832 in Nemenka, Lypovets county, Kiev gubernia, d 16 March 1896 in Voroshylivka, Vinnytsia county, Podilia gubernia. Hellenist, composer, and translator. He studied music and theory at the Kiev Theological Academy and in 1850 moved to Athens to conduct the Russian embassy's church choir. While there he studied philology and theology at the University of Athens (MA 1856). Nishchynsky was the first to translate Sophocles' *Antigone* (1883) and Homer's *Odyssey* (1889, 1892) from the original Greek into modern Ukrainian. He also trans-

lated **Slovo o polku Ihorevi* into Greek, undertook a study of Greek music, and wrote a school text for Greek language study. His musical works include the dramatic scene *Vechornytsi* (Evening Pastimes, 1875) opening the second act of T. Shevchenko's drama *Nazar Stodolia*, which features the popular 'Zakuvala ta syva zozulia' (The Gray Cuckoo Began Cuckooing), and arrangements of historic Ukrainian folk songs.

W. Sydorenko

Nitsch, Kazimierz, b 1 February 1874 in Cracow, d 26 September 1958 in Cracow. Polish linguist. A graduate of Cracow University (PH D, 1898), he was a professor there (1911–17, 1920–39, 1945–52) and at Lviv University (1917–20), and a member of the Polish Academy of Science from 1911, its president from 1946, and secretary of its philological division in 1924–36. He was also a member of the Bulgarian, Serbian, Slovenian, and USSR academies of sciences, the Académie des inscriptions et belles-lettres, and, from 1937, the Shevchenko Scientific Society. In 1952 he became the vice-president of the Polish Academy of Sciences and chairman of its Linguistics Committee. He was a founding member of the Polish Linguistic Society (1925) and the initiator (1913) and chief editor (1919–58) of *Język Polski*. At Cracow University he established (in 1924) a Slavic studies center with chairs of Ukrainian language (held by I. Zilynsky) and literature (B. Lepky) and was the guardian of the Ukrainian Student Hromada. He laid the foundations of Polish historical dialectology, producing the first studies on the history of Polish dialectal lexicography and the first monographic syntheses of Polish dialects. He wrote over 700 works, including studies of the impact of Ukrainian on the Polish literary language and dialects and a linguistic atlas of Subcarpathia (with M. Małecky, 2 parts, 500 maps, 1934). An edition of his selected writings (4 vols, 1954–5, 1958), his memoirs (1960), and a book about him by A. Gruszecka-Nitschowa (1977) have appeared.

Nizhen or **Nizhyn** [Nižen or Nižyn]. II-12. A city (1990 pop 81,300) on the Oster River and a raion center in Chernihiv oblast. It is first mentioned as Unenezh or Unenizh under the year 1147 in the Hypatian Chronicle. The town was destroyed by the Tatars in 1239, and it recovered slowly. In the mid-14th century it came under Lithuanian rule, and in 1514 it was renamed Nizhen. In 1618 it was taken by Poland, and in 1625 it was granted the rights of **Magdeburg law*. In the Hetman state it was a regiment center of Nizhen regiment (1648–1782) and then a county center of Chernihiv vicegerency and Chernihiv gubernia (1802–1917). The **chorna rada* in Nizhen in 1663 elected I. Briukhovetsky hetman. By the Treaty of Andrusovo in 1667 Nizhen was handed over to Russia. Situated at the junction of several major trade routes, Nizhen developed into an important manufacturing and trade center in the 17th and 18th centuries. A large Greek merchant colony sprang up in the second half of the 17th century and received special privileges from Hetman B. Khmelnytsky. In 1785 a Greek brotherhood and a Greek municipal council were set up. In 1696 the Greeks organized their

Nizhen. Clockwise, from upper left: the Nizhen Pedagogical Institute (formerly Lyceum), Annunciation Cathedral (early 18th century), Church of the Holy Protectress (2nd half of the 18th century), monument to Nikolai Gogol (sculptor: Parmen Zabyla, 1881), and St Nicholas's Cathedral (2nd half of the 17th century)

own school. When Russia gained a foothold on the Black Sea, the trade routes shifted to the Black Sea and Azov Sea ports, and the Greek merchants moved to Odessa, Mariupol, and Tahanrih. The town's commercial importance declined, but its cultural influence grew. In 1820 a gymnasium was opened, which in 1832 was reorganized into the Nizhen Lyceum (now the Nizhen Pedagogical Institute). In the mid-19th century the town became a railway junction. Today Nizhen's plants build farm machinery, household chemicals, rubber products, clothes, and building materials. The city is known for its vegetable trade. Nizhen has three museums – the Gogol Memorial Museum, a rare books museum, and a regional museum – and an art gallery. There are over 20 architectural monuments in the city, including the cathedrals of St Nicholas (1668), the Annunciation (1702), and the Presentation at the Temple (1778), the churches of St John Chrysostom (1752), the Holy Trinity (1733), and the Transfiguration (1757), the Greek churches of All Saints (1780s) and St Michael (1731), the lyceum building (1807–20), and 18th-century residential buildings. Many architectural monuments were destroyed by the Soviet authorities in the 1930s.

Nizhen Lyceum (Nizhenskyi or Bezborodkivskyi litsei). One of the older institutions of higher learning in Ukraine, located in Nizhen. Founded as the Bezborodko Gymnasium of Higher Education in 1820 with an endowment of 210,000 rubles from Count I. Bezborodko, it emphasized

humanities and was initially a gymnasium for the sons of the gentry. Its nine-year program offered a classical education with instruction in religion, classical and modern languages, geography, history, physics and mathematics, political economy, military science, and the arts. The first director was V. *Kukolnyk. By 1832 the gymnasium had graduated over 100 students, including the writers N. Gogol and Ye. Hrebinka and the ethnographer V. Tarnovsky.

In 1832 the gymnasium was transformed into a technical (physico-mathematical) lyceum for the training of military officers, and in 1840 it became a law school preparing officials for the juridical bureaucracy. Its broad curriculum was replaced by a narrow one, and the general level of education fell. Nonetheless, in this period the lyceum graduated over 1,000 students, including O. Lazarevsky and L. Hlibov. The school returned to prominence after 1875, when it was reorganized as the Prince Oleksander Bezborodko Historico-Philological Institute, named after the brother of its founder. The institute taught classical languages, Russian language, and history and prepared teachers for the secondary-school system. The program also included courses in psychology and pedagogy. From 1876 to 1921 *Izvestiia Istoriko-filologicheskogo instituta*, which contained many original works on Ukrainian and general history by professors and students at the institute, was published there. The first rector of the institute was M. Lavrovsky. Professors at the lyceum or institute included M. Bunge, A. Lynnychenko, P. Morachevsky, M. Grot, and M. Sokolov.

After the revolution the institute was transformed into the Nizhen Institute of People's Education (1922) and then the Institute of Social Education (1930) before becoming the *Nizhen Pedagogical Institute in 1934.

O. Skrypnyk

Nizhen Pedagogical Institute (Nizhenskyi pedahohichnyi instytut im. M.V. Hoholia). An institution of higher learning in Nizhen, Chernihiv oblast. It was founded in 1934 in place of the Nizhen Institute of People's Education (1920–30) and Institute of Social Education (1930–4) as the successor to the *Nizhen Lyceum. In 1939 it was named after N. *Gogol, who had studied at the lyceum during the 1820s. The institute is under the jurisdiction of the Ukrainian Ministry of Education. It consists of five faculties: philology, natural sciences, physics-mathematics, instrumental and vocal music, and English and German. It has a library of over 500,000 volumes and a museum devoted to Gogol. The student enrollment in 1986–7 was 3,300. Among its alumni are many writers (eg, Ye. Hutsalo, Yu. Zbanatsky) and scholars (P. Bohach).

Nizhen regiment (Nizhenskyi polk). An administrative territory and military formation of the Hetman state. Formed in 1648, Nizhen was one of the largest and most important of the Cossack regiments. In 1653–4 the regiment's male population numbered over 20,000, almost 12,000 of whom were Cossacks. It consisted of about 40 companies. The regiment was reorganized in 1663: eight northern companies were separated into Starodub regiment, some companies were transferred to Kiev and Chernihiv regiments, and the eastern part was formed into Hlukhiv regiment. For the next 60 years Nizhen regiment consisted of 20 companies. From 1668 to 1782 the

capital of the Hetmanate, Baturyn and, later, Hlukhiv, was situated on Nizhen territory. Six of its companies formed the hetman guard and did not come under the regiment's command. In the early 1720s the male population of Nizhen regiment was approx 16,300, including 10,000 Cossacks. By 1764 the male population had increased to 141,800, including 21,700 *elect Cossacks and 42,800 Cossack helpers. Many of its officers came from powerful Cossack families, and some of its colonels, such as I. Zolotarenko (1652–5), H. Hulianytsky (1656–9), and I. Obydovsky (1695–1701), attained high office in the Hetmanate. The regiment was abolished by the Russian authorities in 1782, and its territory was absorbed into Chernihiv vicegerency.

Nizhen Ukrainian Drama Theater (Nizhenskyi ukrainskyi dramatychnyi teatr im. M. Kotsiubynskoho). Established in Kiev in 1927 as the Kotsiubynskyi Oblast Theater of the Council of Trade Unions under the artistic directorship of B. Luchytsky, and located in Nizhen since 1934. Although officially a resident theater, it has no permanent home and in practice continues to be a touring workers' and peasants' theater, with a repertoire of Ukrainian and Russian classics and contemporary Soviet plays. Its present director is O. Horbenko.

NKVD (Russian: Narodnyi komissariat vnutrennikh del; Ukrainian: NKVS, or Narodnyi komisariat vnutrishnikh sprav [People's Commissariat for Internal Affairs]). A ministry of the Soviet government responsible for security and law enforcement that was set up on 7 November 1917 and reorganized as the *MVD on 19 March 1946. During its history the NKVD underwent numerous organizational and functional changes: sometimes, as in 1922–3, 1934–41, and 1941–3, it encompassed not only the secret political police and foreign intelligence but also the regular police force, the border guards, and the prison system. At other times, as in 1917–22, 1923–34, 1941, and 1943–6, it was divided into two separate agencies, one responsible for state security and the other for law enforcement. These changes were due to political rather than administrative factors. The NKVD's notoriety as an instrument of terror belongs to the periods when the state security apparatus came under its jurisdiction (July 1934 to April 1943, except for February–July 1941).

At first the *Cheka and the NKVD were independent and often competing institutions. When F. Dzerzhinsky, the founder and chief of the Cheka, replaced H. *Petrovsky as head of the NKVD, in March 1919, the institutional friction between the two agencies subsided. Petrovsky's predecessor was A. Rykov, who headed the NKVD only briefly, in 1917. The new permanent state security organ, the *GPU, which replaced the ad hoc and temporary Cheka in February 1922, came under the NKVD. The Unified State Political Administration (OGPU), which succeeded the GPU in November 1923, was separated from the NKVD until July 1934, when it was renamed the Main Administration of State Security (GUGB) and subordinated to the NKVD. Republican commissariats of internal affairs had been abolished in 1930. After F. Dzerzhinsky's death (1926) the NKVD was headed by V. Menzhinsky until May 1934.

The unified NKVD (1934–41) consisted of numerous main administrations and departments of Union, republic, and lower levels. The main administrations were state

security (GUGB), the corrective labor camps (GULAG), the border and internal troops (GUPVO), the worker-peasant militia, and the fire service (GUPO), all of which were established in July 1934. Later the main administrations of state surveying and cartography, highways, and weights and measures were added to the NKVD. The commissariat also had an administrative-economic administration, a department of acts of civil status, and a department of colonization. It is evident from its structure that the NKVD was much more than an organ of state security. In fact in the 1930s and 1940s its economic role was most conspicuous. Because it ran a vast network of labor camps, prisons, and other economic enterprises, the NKVD has been called the USSR's largest employer. Its slave-labor reserves were used in numerous large-scale construction projects, lumbering, and gold mining, and its contribution to the Soviet economy was factored into the five-year plans.

In the 1930s the Main Administration of State Security constituted the central agency of the NKVD. The GUGB was subdivided into six major departments: special, economic, operative, foreign, transport, and political. The first kept the military under surveillance and was a key source of information on anti-Soviet groups. The economic department was responsible for combating economic sabotage in industry and agriculture. The operative department guarded the top leaders, including J. Stalin, and key installations. Foreign espionage and the use of terror abroad came under the foreign department. The transport department protected the transportation network and important shipments in transit. Finally, the political department dealt with political opposition groups and oversaw all organizations. Besides these departments, the GUGB included some technical sections.

The consolidated NKVD was directed by G. Yagoda (July 1934 to September 1936), N. Yezhov (to December 1938), and L. Beria (to February 1941, and July 1941 to April 1943). The NKVD played the dominant role in the terror of the 1930s, in which it carried out countless arrests, interrogations, and executions. Its special boards were empowered to sentence people for up to five years' imprisonment without judicial process. The secret police became the primary pillar of Stalin's personal dictatorship: it was deployed not only against the general population and the intelligentsia, but also against the Party, the military, and the government. The CP(B)U and Ukrainian government leaders, who had shown a reluctance to extend the purge, were decimated by arrests and executions in 1937–8. From September 1937 the republic was virtually governed by the NKVD. The NKVD played a central role in the show trials of old Bolsheviks, such as N. Bukharin, L. Kamenev, and G. Zinoviev, and in L. Trotsky's assassination. It was responsible for the massacre of over 9,000 people in Vinnytsia in 1937–8 and of some 4,000 Polish officers in Katyn Forest in 1940. Ironically, Stalin turned the NKVD upon itself: its last three chiefs along with thousands of their followers were destroyed in the great terror of the late 1930s or in the succession struggle after Stalin's death.

During the Second World War the NKVD and the People's Commissariat of State Security (NKGB) were involved separately in various phases of state security. They provided military assistance to the armed forces, organized Soviet partisans, and engaged in intelligence and counter-intelligence activities. At the start of the German offensive in 1941, they brutally executed thousands of political pris-

oners held in their prisons in Western Ukraine. After the war they administered mass deportations of Ukrainians, Balts, and other non-Russians from the newly annexed territories and suppressed anti-Soviet underground organizations and the Ukrainian Insurgent Army. In January 1946 L. Beria was replaced by S. Kruglov as head of the NKVD, and in March the NKVD was renamed the *MVD. The general substitution of 'ministry' for 'commissariat' was meant to de-emphasize the revolutionary character of the Soviet government.

Nobel [Nobel']. II-6. A village (1971 pop 500) on Nobel Lake in Zarichne raion, Rivne oblast. It is first mentioned under the year 1158 in the Hypatian Chronicle. Nobel is the site of a settlement dating back to the Mesolithic or early Neolithic Period, the oldest settlement in the Prypiat Polisia region.

Nobility (*shliakhta*; Polish: *szlachta*; derived from Old German *Slahta*, 'gender'). The privileged and titled elite class of society. The concept of a noble class (or aristocracy) is largely a European one that developed out of the feudal experience. In Eastern Europe the nobility as a social elite with inherent rights established itself most strongly in the Polish-Lithuanian Commonwealth. In Muscovy and then the Russian Empire the status of the nobility was more closely tied to state service. In Ukraine, after the Princely era, the existence of a distinctive elite class of native nobles was largely pre-empted by the country's domination first by Poland and then by the Russian Empire (which prompted the considerable assimilation of Ukraine's upper class by foreign aristocracies). The notable exceptions to that long-standing state of affairs could be found in the Lithuanian-Ruthenian state, where Orthodox Ukrainian nobles constituted a distinctive subgroup of the aristocracy, and in the Hetmanate, where the Cossack *starshyna* was developing into a noble class. As a result of the assimilation, the social structure of Ukraine was truncated for many years, and Ukrainian society was left without a leading element. Nevertheless, individual noblemen emerged at various times as key figures in the defence of Ukrainian social, religious, and political rights.

Polish and Lithuanian rule. The nobility in the Ukrainian and Belarusian territories originated with knights who established themselves as a class (*nobilis*) first through military service (*jus militare*) and then heredity (*jus hereditarium*). Initially that nobility had a lesser stature than magnates and lords and (in Ukrainian territories) the *prince and *boyars. The members of the nobility were obliged to perform military service, for which they were accorded various privileges, including exemption from taxation and autonomy from local authorities. It was not a closed caste, and it took in new members from the peasantry and clergy.

The nobility steadily expanded its influence in state affairs, by using changing political and social circumstances

to its advantage. Polish kings sought its assistance in their own struggle to establish a centralized state in opposition to the atomizing influence of the great landowners. In return the nobility was rewarded with a host of further privileges. King Louis of Anjou conferred the Koście privilege (1374) on those who served in his armies. It exempted noblemen from all duties other than the land tax of two *Groschen* per field (*lan*), extended immunity from arbitrary seizure of property and person, limited the terms of military service, and offered the right to state offices, such as voivode, castellan, justice, and chamberlain. The privilege proved a critical development in the transformation of the nobility from a warrior brotherhood into a social and economic class, consisting of lords and barons, knights (*rycerzy*, *milites*), and middle and small landowners, who set themselves apart from the rest of the population by their claim to a coat of arms. In time the nobility came to command considerable influence in parliamentary bodies. It extended its powers with the Cracow privilege (1433) and the Cerekwica privilege, which was later confirmed by the Nieszawa statute (1454). By then the nobility had gained legislative powers in matters of war and peace and exemption from the royal court. The Nieszawa statute also struck down the exclusive right of magnates to hold higher governmental positions and limited the rights of towns. King Jan Olbracht's Piotrków statute (1496) bound the peasantry to the land and exempted the nobility from paying duties on imported goods.

Galician boyars were granted equal status with the Polish nobility in 1430. Subsequently some of them were Polonized, and others moved to Volhynia and Podilia. By the 16th century there were no Ukrainian boyar families left in Galicia; only some petty gentry regarded themselves as Ukrainians.

Through the 16th to 18th centuries the nobility progressively increased its influence in the Polish Commonwealth, although its constitutional battles weakened the state. The *szlachta* disregarded that weakening in the defense of what it regarded as its 'golden freedoms.' It developed a corporate sense as the '*szlachta* nation.' It also established an ideology of sorts for itself, based on the belief that the *szlachta* had descended from the ancient *Sarmatians and was imbued with a purity of purpose that had been lost by the nobility of other European nations. In 1573 (under Henry of Valois) the nobles obtained the right to the election of the king by direct vote. That right effectively transformed the Polish state into an aristocratic republic and made the regal position an increasingly ineffectual one. The parliamentary body, the Sejm, was also rendered largely ineffectual after the invocation (from 1652) of the *liberum veto*, which allowed for the passage of legislation only by the complete unanimity of all of its delegates (a single veto could stop deliberations altogether). The resulting chaos initiated Poland's decline until its partition by other European powers in the late 18th century.

The nobility in Ukrainian territories in the Grand Duchy of Lithuania led a separate existence from that in Poland, but it was nevertheless influenced by sociopolitical developments there. A Polish-style aristocratic order was introduced by Polish kings or grand dukes through similar privileges or legal codes. Lithuania, however, contained two strata of nobility: the Lithuanian, which had rapidly been Catholicized, and the Belarusian-Ukrainian,

which remained Orthodox. Both Polish and Lithuanian rulers tended to favor the Lithuanian nobility and usually granted privileges to Belarusian and Ukrainian nobles only when their assistance was required or a rebellion was threatening. The titles used in those areas, such as prince and boyar, were carried over from Kievan Rus', although others (used mainly by Poles) were added, including *barones*, *nobiles*, *ziemiańie*, and *szlachta*.

After the Union of *Krevo in 1385, Grand Duke Jagiełło converted to Catholicism. In 1387 he officially made his realm Catholic and conferred privileges on those boyars who adopted that faith. The Union of *Horodlo between Poland and Lithuania in 1413 granted the Lithuanian Catholic boyars equal rights with their Polish counterparts and transformed them into a hereditary elite. At the same time it relegated the Orthodox (including Ukrainian) nobility to secondary status. Only in 1432, after civil strife between religious factions, were the rights of the Orthodox and Catholic nobility placed on an equal footing. That equality was legally affirmed in 1447 (*principibus et boiariis tam Lithuanis quam Ruthenis*). The rights of the Lithuanian-Ruthenian nobility were supplemented and expanded in 1492 and 1506. In 1501 and 1509, local privileges were conferred on the Volhynian nobility. Among that group were notable noble families, including the Ostrih, Sanguszko, Czartoryski, and Zbaraski, who possessed massive estates. Until the late 16th century the majority of the Volhynian magnates were Ukrainian; they were largely Polonized in the 17th and 18th centuries.

The rights and privileges of the nobility were codified in the *Lithuanian Statute and confirmed by its three editions. In 1529 the conditions for acceptance into the aristocracy (which favored magnates) were outlined; in 1566 the rights of the regular nobility were expanded, and their representatives were accepted into parliament; in 1588 the rights of the nobility were entrenched, and the peasantry was enserfed. The last edition of the statute underscored that the nobles' claims to estates were based not on the fact of settlement but on notable military service against the enemy.

The Union of *Lublin in 1569 brought Volhynia, Podlachia, the Kiev region, and the Bratslav region under direct Polish control. At the same time the rights of the local nobility were brought into line with those of Poland. The newly acquired territories soon saw an influx of Polish magnates, including the Żółkiewski, Potocki, Koniecpolski, and Kalinowski families. It also set in motion a long process of Polonization that became a feature of Right-Bank Ukraine: by the early 19th century little non-Polonized Ukrainian nobility remained.

Polonization began after the Lublin union and was particularly enforced under Jan Casimir, who in 1649 forbade non-Catholic representation in the Senate and starosta councils. In 1712 the Polish parliament outlawed the non-Catholic nobility altogether. Nevertheless there were Ukrainian nobles who continued to adhere to Orthodoxy, as borne out by the provisions of a treaty signed by Russia and Poland in 1775 that guaranteed to Orthodox nobles the same rights as Catholics. In Right-Bank Ukraine (Volhynia, Podilia, the Kiev region) Polonization of the Ukrainian gentry continued even after the partitions of Poland. After the Polish Insurrection of 1830-1, however, the tsarist authorities actively began trying to counter Polish influence in the region by Russifying its institutions and

inhabitants. According to a study of the Right-Bank nobility undertaken by the *Kiev Archeographic Commission only one-tenth of the Right-Bank nobility of the 1860s was of Polish origin. The rest consisted almost entirely of Ukrainian converts to Catholicism. The commission uncovered 711 Ukrainian noble family lines and supplied exact dates of conversion for 140 cases (1 before 1569, 10 in 1569–1600, 48 in 1600–50, 40 in 1650–1700, and 41 in 1700–67).

Galician families that maintained their Ukrainian identity included the Balaban, Cholhansky, Demydetsky, Drahomyretsky, Hoshovsky, Kulchyttsky, and Yavorsky lines. In the early 17th century there were 628 Ukrainian noblemen in the Lviv region and 1,000 in the Peremyshl region. Most of them were so impoverished that they did not have their own horses when they came to serve in the army. In the Kholm, Podilia, and Podlachia regions Polonization had set in during the 15th century, and it continued until the 20th century. The Ukrainian aristocracy of the Kiev and Bratslav regions was subject to a general process of Polonization.

After 1569 the significance of the nobility as a Ukrainian social elite diminished. Nevertheless it continued to play a role in judicial affairs (notably with the Lutske Tribunal) and in the defense of the Orthodox church. Ukrainian nobles spoke out for the Orthodox church in legislative councils and influenced the selection of the bishop of Lviv (5 April 1641) and of S. Kosiv as metropolitan of Kiev (25 February 1647). Among the defenders of the Ukrainian Orthodox church were L. Drevynsky, M. Kropyvnytsky, and A. Kysil; those who were otherwise active in cultural and church affairs included the Balaban line, A. Kalnofoisky, M. and Z. Kopystensky, and Ye. Pletenetsky.

The Cossack era. Ukrainian noblemen played a significant role in the emergence of the Cossack state. They were commonly found in the higher ranks of the registered Cossacks, and later provided the impetus and direction required to transform the Cossacks from an amorphous social class into the creators and administrators of a new polity, the Hetmanate. Some notable Cossack leaders drawn from the nobility were D. *Vyshnevetsky, K. *Kosynsky, M. *Khmelnysky, P. *Sahaidachny, and B. *Khmelnysky.

The profound changes effected in Ukraine by the Cossacks and the B. Khmelnytsky uprising in 1648 did not include the elimination of a landed social elite. In fact one of the key changes consisted of the replacement of the largely foreign *szlachta* with an indigenous ruling class, the Cossack *starshyna*. A portion of the nobility in Ukraine, although largely Polonized, supported Khmelnytsky's revolution and tied itself to the process of establishing a Cossack state. In the early stages of the Cossack-Polish War the aristocracy, both Ukrainian and non-Ukrainian, was forced off its lands in numerous local uprisings. But Khmelnytsky established instructions through universals for the restoration of property rights for those supporting the new order, namely 'noblemen who will eat bread with us ... and recognize the authority of the Zaporozhian army' (1649). The pro-Cossack nobility, which had had experience in matters of state under the Polish regime, now served the new Hetman state apparatus in the diplomatic corps, military posts, and administrative and judicial offices. The leaders of Khmelnytsky's state drawn from the nobility included H. *Hulianytsky, M. *Krychevsky,

S. *Morozenko, D. *Nechai, I. *Vyhovsky, and A. *Zhdanovych. The Cossack register, drawn up after the Treaty of Zboriv in 1649, included 750 aristocratic families and more than 1,500 individuals. Other accounts (V. Lypynsky, A. Rolle) estimate the number at 2,500, and the figure for nobles active in the Cossack army at between 6,000 and 7,000.

With the establishment of the Hetmanate in Left-Bank Ukraine and the return to relative peace and order in the wake of the Ruin, the Cossack *starshyna* emerged as a social elite that fulfilled many of the roles of a nobility. It was composed largely of members of old, registered Cossack families, but also incorporated Orthodox landowners who supported the Hetmanate as well as common Cossacks who had risen through the ranks. During the reigns of Hetmans I. Samoilovych (1672–87) and I. Mazepa (1687–1709) the *starshyna* began developing the attributes of a noble class. It managed to circumvent the Cossack principle of election to all offices by gradually turning the voting procedure into a pro-forma affair; although the members of the *starshyna* did not establish hereditary rights, they monopolized the offices of the Hetmanate. They also made room for a second tier of *starshyna* by establishing categories within a society of military fellows (fellows of the standard, military fellows, and fellows of the banner) that were tied to no specific military or administrative posts. With position also came privileges, and the members of the *starshyna* were able to demand services from the peasantry by virtue of their office. The higher *starshyna* also established the right to be tried by its peers, another common trait of nobility. Finally the *starshyna* collectively expanded its landholdings through land grants, purchase, and, occasionally, simple seizure.

In the 18th century, while the Cossack *starshyna* established itself as a gentry elite in Left-Bank Ukraine, the Right-Bank region saw the restoration of a Polish or Polonized nobility to a position of pre-eminence. At the same time, however, resentment against the nobility and landowners (often one and the same) in the region grew and gave rise to a series of *haidamaka uprisings.

As the status of the *starshyna* became entrenched, its aspiration to continue in the tradition of the *szlachta* grew. That aspiration was increased in 1743, when a legal compendium entitled *Prava, po kotorym suditsia malorossiiskii narod* (The Laws by Which the Little Russian People Are Judged) established that descendants of appointed or hereditary nobles registered under the former state were entitled to nobility within the Russian Empire. It was further augmented in 1763, when the **pidkomorskyi* court was re-introduced. That year a major gathering of *starshyna* representatives met at the hetman's residence in Hlukhiv and proposed, among other things, the transformation of the Cossack officers' council into a diet of the nobility. The most articulate argument for the establishment of *starshyna* rule in Ukraine as a type of *szlachta* democracy was made in 1767 by H. *Poletyka at Catherine II's Legislative Council.

Russian rule. In spite of the fact that Russia and then the Russian Empire had continually expanded its influence over the administration of Ukraine, the *starshyna* and regimental structure of the Hetmanate had been left intact. That state of affairs changed quickly and completely under *Catherine II. She abolished the office of the hetman

(1764), had the Zaporozhian Sich destroyed (1775), and dismantled the regimental system in favor of provincial administration (1782). Notwithstanding the fact that its autonomy and territorial base had been taken away, the Ukrainian elite did not protest the changes. Instead it moved quickly to adapt itself to the new circumstances. The smoothness of the transition was aided by several factors. The governor-general of Ukraine, P. *Rumiantsev, had made specific efforts to prevent overt dissent from manifesting itself and had opened numerous governmental positions to noblemen or their sons in Ukraine. The institution of provincial administration was followed in 1783 by a ukase that established the complete serfdom of the Ukrainian peasantry. Finally Catherine proclaimed a new Charter of the Nobility in 1785 that allowed for the incorporation of the *starshyna* into the Russian nobility. The *starshyna* had long sought legal recognition of its social status but had been hesitant to incorporate itself with the less privileged Russian nobility. The 1785 charter brought the privileges of Russian nobles (*dvorianstvo*) much in line with those of the *szlachta*. A wholesale quest for patents of nobility, sometimes with the aid of fabricated documentation, followed.

The *starshyna* gentry generally benefited materially from its integration into the *dvorianstvo* system, particularly the petty gentry, which found considerable opportunity for advancement in the imperial service. At the same time Ukrainians experienced some unique problems in defining themselves within the broader context of the empire. Some chose total assimilation to the implicitly Russian culture and language. In its extreme form that response took the form of oversubscribing to the values of the dominant culture, in effect becoming 'more Russian than the Russians' and sometimes developing an outright disdain for Ukrainian traditions. Less dramatically, some developed a sense that Ukraine was in fact culturally inferior to Russia, the so-called *Little Russian mentality, which implied deference to Great Russians. A more common response was a desire to integrate into the imperial system but to maintain certain institutional vestiges of the Hetmanate. That response was a sentiment rather than a structured movement, and it focused on matters such as Ukraine's distinct legal code and a desire to have separate Ukrainian Cossack military units. The nobility's reverence for Ukraine's Cossack heritage was challenged by the difficulties many experienced in obtaining their patents, in that the imperial Heraldic Office commonly questioned the validity of Ukrainian titles. The result was protests from the former *starshyna* gentry and a wide search for documents related to Ukraine's past, which ultimately served only to reinforce a sense of local patriotism.

In Right-Bank Ukraine, acquired by the Russian Empire through the partitioning of Poland, the rights of the local gentry were made equal with those of its Russian counterparts, although its *szlachta* privileges were limited. Initially the nobility retained its social status as a ruling class and contributed significantly to culture and education (eg, by establishing the Kremianets Lyceum). The Polish nobility consisted of a small number of magnates, independent landowners, and impoverished lessee aristocrats who were commonly employed as administrators or stewards on larger estates. In general the magnates integrated themselves quickly into the *dvorianstvo* system and were

loyal to the empire, whereas the lesser nobility maintained a sense of Polish patriotism and hoped to restore Poland to its status before the partitions.

After the Polish Insurrection of 1830–1 Russian policy toward the nobility changed significantly. Nearly 10,000 participants in the revolt were prosecuted and had their holdings confiscated. A campaign was begun to verify aristocratic status, aimed at destroying the *szlachta* nobility as a foreign element within the Russian system. Lasting approx 20 years under the direction of the governor-general, D. *Bibikov, the action stripped 340,000 individuals of their status as nobles: 72,000 in 1832–3, 93,000 in 1834–9, 160,000 in 1840–6, and 15,000 in 1846–53. The lesser, poor, and generally, landless nobility suffered. After the verification some 70,000 Poles (nearly 17,500 families) entrenched their claims to nobility. They were primarily large to middle landowners (*szlachta ziemiańska*), who controlled nearly three million serfs. The majority of the legally recognized nobility supported the Russian government, forsook its persecuted countrymen, and was indifferent to all revolutionary movements. Later it sought to integrate itself into Russian society. After the Polish Insurrection of 1863, in which a section of the nobility once again took part, further limitations on noble participation in political, community, and cultural life were imposed.

In spite of the Polish domination of the Right-Bank nobility several pro-Ukrainian movements developed. The **khlopoman* movement emerged in the late 1850s, and a Ukrainophile movement headed by V. *Lypynsky emerged among the Polonized Ukrainian gentry at the end of the 19th century. But the position of the nobility in Right-Bank Ukraine did not change until after the Revolution of 1917. At that time Polish efforts to guarantee special rights for Polish landowners in Ukraine resulted in special provisions in the Treaty of *Warsaw. Those provisions, however, were abrogated with the establishment of Soviet power in Ukraine and the end of the nobility as a class.

Western Ukraine. In Ukrainian territories under the Austrian Empire the nobility on Ukrainian territory enjoyed the same rights as its counterparts elsewhere in Austria. Initially, Joseph II's reforms limited the rights of the Polish aristocracy. After his death in 1790, however, the nobility gradually came to control large sectors of the empire's administrative structure and was able to influence highly placed Austrian officials. The Polish nobility's influence increased even more during the tenure of the Galician vicegerent, A. *Gołuchowski (1849–75, with interruptions). In the interwar Polish state (with Ukrainian territories in its eastern reaches) the nobility as a social class was legislated out of existence (1921). Nevertheless the landed aristocracy maintained its extensive political and economic influence.

In Bukovyna the Ukrainian nobility over time assimilated with the Moldavian-Rumanian elite of the region. Under Austria (from 1774) the administrative structure was controlled by Rumanian boyars, who later complained about Bukovyna's reconstitution into an administrative unit of Galicia (1787–1849). A government decree of 14 March 1787 gave the Bukovynian and Galician nobilities equal status. Even after the establishment of a constitutional monarchy in 1848, the Rumanian nobility continued to have great influence in Bukovyna as a result of the curial electoral system.

A feudal order started developing in Transcarpathia in the wake of the Tatar invasion of 1241 and the establishment of a network of stone fortresses. Most of the nobility in the region consisted of Hungarians. Prince F. *Koriatovych, a late 14th- to early 15th-century ruler of the Mukachiv region, was the most notable Ukrainian (or Ukrainianized) nobleman in the area. From the 16th century the aristocracy of Transcarpathia was largely without Ukrainians.

Nogata or **nohata** (from Arabic *nakd* 'small coin'). A type of Arab silver dirham that, together with the **kuna*, circulated in Kievan Rus' from the late 9th century on as a basic form of metal *currency. Valued at 1/20th of a marten collar, it originally weighed 3.41 g; the weight of 20 *nogaty* equaled 1 silver **hryvnia*. Later there were two types: a 2.56-g coin in northern Rus' and a 4.09-g coin in southern Rus', where the *nogata* remained a medium of exchange until the early 12th century.

Nogay Tatars. A formerly large horde of *Tatars who derived their name from Nogay (d 1300), a prominent military leader of the Golden Horde. Until the 16th century

they inhabited the steppe between northern Kazakhstan and southern Siberia. In the mid-16th century the Nogays split into the Great Horde, which came under Russian rule on the lower Volga, and the Little Horde, which migrated into the southern Ukrainian steppe and became a nominal vassal of the Crimean Khanate, constituting 40 percent of its population. The two hordes were reunited in the 1630s after the Great Horde fled from the Siberian Kalmyks. The Nogays pillaged Ukrainian settlements and were consequently in constant conflict with the Zaporozhian Cossacks. In the 18th century they consisted of four hordes: the *Bilhorod (Budzhak) Horde, between the Dniester and the Danube; the Yedisian Horde, between the Dniester and the Dnieper; and the Yedichkul and Dzhambuluk hordes, north of the Crimea between the Dnieper and the Sea of Azov. In the 1770s, after the Russian conquest of Southern Ukraine, approx 120,000 Nogays were forcibly resettled between the Don and the Kuban rivers and then in the Caspian steppe but were soon allowed to return to the Azov region. After the Crimean War some 180,000 Nogays emigrated to Ottoman-ruled southern Bessarabia, and a minority remained in Subcaucasia. According to the 1989 census there were 75,181 Nogays in the USSR. Most of them live in Stavropol krai, the Dagestan and Chechen-Ingush autonomous republics, and the Karachai-Cherkess autonomous oblast of the Russian Federation. B. Kochekaev's book about 16th- to 18th-century Nogay-Russian relations was published in Alma Ata in 1988.

Nohaiske. See Prymorske.

Nomenklatura. A Party-controlled political patronage system and crucial instrument of Soviet Communist rule. An essential feature of the Stalinist model of politics, it began to be challenged only in M. Gorbachev's perestroika. It was so entrenched bureaucratically that no frontal assault was able to dislodge it. The term *nomenklatura* referred to a list of positions and names of the people filling them. Every institution in the USSR had its *nomenklatura*, which consisted of all the positions of authority, no matter how petty, and all their holders. In 1985 there were 9.3 million such posts throughout the USSR, some 2 million of which belonged to the CPSU *nomenklatura*. Usually the term *nomenklatura* had a narrower sense: it referred only to the Party's list of positions and personnel. Having evolved from the personnel records introduced by the Uchraspred department (est 1919) of the CC of the Russian Communist Party (Bolshevik), the *nomenklatura* was established formally by 1923. Through it J. Stalin controlled the Party, and the Party controlled the country.

From the 1920s the *nomenklatura* was divided into three basic components. The basic list (*osnovna nomenklatura*) consisted of the most important positions, which could be filled only by the Party. The secondary list (*zvitno-kontrol'-na nomenklatura*) contained positions of lesser importance, the filling of which required merely Party approval. Many secondary positions were on the primary institutional list of non-Party organizations. In late 1989 the Party leadership considered abolishing the secondary *nomenklatura*. The Party's third list, called the 'reserve for promotion,' was a pool from which future appointments to the other two lists were made. The appointees-in-waiting were already in some lower-level *nomenklatura*, perhaps as members of elected bodies or as political activists, and were

being groomed for promotion into the elite. Outside these lists there was no other route to political power in the Soviet Union.

In 1988 the *nomenklatura* of the CC CPU contained some 35,000 positions. The *nomenklatura* of an oblast Party committee embraced not more than 2,000 positions; for example, the lists of Donetsk oblast had 1,203 positions (1973), of Lviv oblast, 1,719 (1981), of Vinnytsia oblast, 1,400 (1978), of Voroshylovhrad oblast, 1,684 (1950), and of Zhytomyr oblast, 572 (1989). A city or raion Party committee *nomenklatura* had from a few hundred to a thousand positions of the lowest level: secretaries of primary Party organizations, upper and middle management of local institutions and enterprises, and local government officials. The Balakliia Raion Party Committee, for example, had 464 positions in its *nomenklatura* in 1968.

Soviet published sources were reticent about these matters. Their silence reinforced suspicions that the political elite of the *nomenklatura* was highly unrepresentative of Soviet society. Some data for Ukraine support the suspicion. In 1950 only 122 of the 1,684 positions in Voroshylovhrad Oblast Party Committee *nomenklatura* were occupied by women. Nationality was one of the most politically sensitive features of the composition of the *nomenklatura*, and there was hardly any official information on the subject. We know only that in 1951, 71.4 percent of the 'leading cadres' (a Soviet euphemism for *nomenklatura* personnel) in the republic were Ukrainians. This figure was at least 5 percentage points lower than the proportion of Ukrainians in the population. By 1981 Ukrainians accounted for only 70.4 percent of the 'leading cadres,' still 3 points below the figure for the population. It is believed that the percentage of Ukrainians decreased as one ascended the hierarchy, and that it varied regionally: it was probably lowest (for demographic and historical reasons) in the western and eastern extremities of the republic. The *nomenklatura* had a definite and, probably, inhibiting effect on the formation of an indigenous Ukrainian political elite. It was an essential device for centralizing political power and maintaining Moscow's control over the national republics. By controlling appointments the CC CPSU extended its power through all the administrative levels of the republics and severely reduced their autonomy.

Nomocanon. See Canon law.

Nomys, Matvii (pseud of Matvii Symonov), b 17 November 1823 in Zarih, Lubni county, Poltava gubernia, d 26 December 1900 in Lubni, Poltava gubernia. Ethnographer, writer, and educator. Upon graduating from Kiev University in 1848, he taught in the Nizhen and Nemyriv gymnasiums and worked as a government auditor. In 1873 he became principal of the Lubni gymnasium, and in 1877 he was elected president of the Lubni zemstvo. Throughout his life Nomys collected Ukrainian folklore. His first publications were childhood recollections (1858) and short stories (1859), which later came out in a single volume, *Razskazy M.T. Simonova* (Stories by M.T. Symonov, 1900). His most important work is *Ukrains'ki prykazky, prysliv'ia i take inshe* (Ukrainian Sayings, Prov-

Matvii Nomys

erbs, and the Like, 1864; repr 1985; manuscript facsimile 1928), a collection of 14,339 proverbs and sayings (not including the variants) and 505 riddles. In spite of censor's excisions, the collection was the finest achievement in Slavic paroemiology of its time. It included proverbs collected not only by Nomys but also by M. Bilozersky, V. Bilozersky, P. Kulish, V. Lazarevsky, O. Markovych, S. Rudansky, and M. Vovchok. Nomys left his estate to charitable organizations of Lubni county and to the Shevchenko Scientific Society.

Nonconformist or unofficial art. A term for art created in the USSR that, until the period of glasnost and perestroika in the 1980s, did not meet official approval and recognition. The creators of this art did not adhere to the prescribed program of *socialist realism formulated at the First All-Union Congress of Soviet Writers in 1934. They did not, however, constitute a movement, nor did they represent one style, ideology, or worldview. In most cases their art was not an expression of political dissent. What unified them was their belief in and insistence on the freedom of creative individual expression. Strictly speaking, nonconformist art was not forbidden as long as it was kept private; when it was shown publicly, however, its creators were often subjected to reprisals and persecution. This state of affairs forced nonconformist artists to work in solitude and without official recognition.

Ukrainian nonconformist art had its beginnings in the Khrushchev 'thaw' of the mid-1950s. At that time the socialist-realist framework was widened, and Ukrainian ethnographic and folk-art themes became popular. Artists began exploring hitherto forbidden styles and trends in Western art and Eastern philosophy, as well as Ukrainian art of the 1920s, and developing their individual visions and means of expression. In the 1960s some artists became part of the growing *dissident movement, and O. *Zalyvka and S. *Shabatara were arrested for their involvement and imprisoned.

Unlike their colleagues in Kiev and in western Ukraine who signed petitions and attended political trials, the Odessa nonconformists pursued only artistic concerns. In 1967, long before the infamous bulldozing of the exhibition of nonconformist art in Moscow in September 1974, two Odessa artists, S. Sychov and V. Khrushch, displayed their art outside the Odessa Opera and Ballet Theater. Even though their exhibition lasted only a few hours before it was closed down by the police, it brought artists'

disenchantment with officially sanctioned art into the open and made public the distinction between official and nonconformist art.

During the crackdown on the dissident movement in Ukraine in 1965 and again in 1972, nonconformist art went underground. Thereafter, some artists led a double existence, earning a living by creating socialist-realist art while continuing to paint nonconformist works in private.

In 1975 the First Exhibition of Ukrainian Nonconformist Artists was held in Moscow in a private apartment. Of the five participants, F. *Humeniuk from Leningrad, V. *Makarenko from Tallinn, V. *Sazonov and N. Pavlenko from Moscow, and V. *Strelnikov from Odessa, four had been forced to live and work outside their homelands. In the Second Exhibition of Ukrainian Nonconformist Art, which was held in Moscow in March 1976, 16 artists participated. These exhibitions gave an opportunity for Ukrainian nonconformist artists living in different parts of the USSR to join forces. They could do so only in the Russian capital, however – the only place in the USSR where such a gathering was possible, and where their work would be seen by foreign diplomats and correspondents.

Works by some Ukrainian nonconformist artists eventually made their way to the West, as did three of the artists themselves (V. Strelnikov, V. Makarenko, V. Sazonov). The first traveling group exhibition of such art in the West was organized by the Ukrainian American I. Ciszkewych and mounted in Munich, London, New York, Cleveland, and Washington, DC, in 1979–80. A second exhibition was organized by D. Zelska-Darewych in Toronto in 1982, and traveled to Winnipeg, Chicago, Detroit, Cleveland, and New York. This show included works done by V. Makarenko, V. Sazonov, A. *Solomukha, and V. Strelnikov in the USSR and after their emigration to the West, and its opening was attended by three of the artists.

Ukrainian nonconformist artists who remained in the USSR were unable to exhibit their work publicly until the early 1980s. At that time shows by some more prominent nonconformists, such as I. *Marchuk, were sponsored by official organizations, such as the Writers' Union of Ukraine. By 1987 many unofficial artists had been invited to exhibit in alternative spaces. By 1988 many of them, including Humeniuk and Marchuk, had been accepted as members by the Union of Artists. Articles about O. Zalyvakh and V. *Loboda as well as others appeared in the official press. Because national exhibitions organized by the Union of Artists since the late 1980s have included artworks which formerly would have been labeled decadent, the distinction between official and nonconformist art became blurred and has ceased to exist.

D. Zelska-Darewych

Nonmetallic-ore industry. A branch of the *building-materials industry that extracts and processes natural minerals, such as graphite, kaolin, talcum, dolomite, and pegmatite, the chemical, metallurgical, and ceramics industries. Only small amounts of *kaolin and *graphite were mined in Ukraine in the past. Today they are Ukraine's chief nonmetallic ores. In the 1950s many nonmetallic-ore deposits began to be exploited. Feldspar began to be mined in 1958. Pegmatite and mica are extracted in Zhytomyr, Rivne, and Zaporizhia oblasts, and andesite in Transcarpathia.

Nordic culture. A Bronze Age culture of tribesmen who migrated into Ukrainian lands in the second half of the 3rd millennium BC, probably from the Baltic region near Denmark. It is commonly known as the Funnel Beaker culture. Two waves of migration are included in this culture. The first settled in northern Galicia and was notable for its funnel-shaped beakers. The second wave settled as far east in Ukraine as Kiev and as far south as Bukovyna. Its most distinctive trait was the construction of large stone structures as burial vaults. Nordic culture settlements were usually built on easily defended high terrain. Their inhabitants engaged in animal husbandry, fishing, hunting, and some agriculture. The Nordic culture people were part of a major migration from the Baltic region that dispersed widely across Europe. The culture has occasionally also been referred to as the Megalithic culture, after large stone burial structures discovered in Volhynia and Podilia; or as the Hrybovychi culture, in reference to the 1933–4 discovery of a settlement in Mali Hrybovychi near Lviv. In Ukraine, the members of the Nordic culture eventually were assimilated by the local population.

Normal school (*normalna shkola*). A training institution for primary-school teachers. The first six-grade school of this type in eastern Galicia was established in 1777 in Lviv; another followed shortly afterward in Chernivtsi. German was the principal language of instruction. The normal schools were reorganized into *teachers' seminaries by the school reform of 1869.

Normalization (*normalizatsiia*). A 1935 agreement between the *Ukrainian National Democratic Alliance (UNDO) and the Polish government, designed as a rapprochement between Ukrainians and the *Sanacja regime. The term is said to have been coined by O. *Lutsky. Normalization came about as a result of growing Ukrainian anxieties about the deterioration of international relations (anti-Ukrainian repression in the Soviet Union, the growing affinity between Poland and Germany), the weakening of UNDO's political position as a result of the *Pacification in 1930 and new electoral ordinances threatening the Ukrainians with fewer seats in the Polish parliament, growing dissatisfaction from the nationalist wing of UNDO and the secession of D. Paliiv's Front of National Unity group, and an increase in dealings with the Polish government. Discussions were held in July 1935 in Lviv between UNDO leaders and the minister of internal affairs, M. Zyndram-Kościałkowski. An electoral compromise reached at that time guaranteed the Ukrainians 14 seats in the Sejm and 5 in the Senate, the position of vice-marshal in both chambers, and the elimination of Russophile representation. The government made a proposal for an amnesty, which some OUN activists took advantage of; it also extended credit to several Ukrainian economic organizations in Galicia and made assurances to the Ukrainians for the maintenance of the status quo in schooling. In return the UNDO delegates in the Sejm supported government proposals for 'state necessities' (the budget, military matters, and the like). Normalization did not encompass Ukrainian territories north of the *Sokal border, which omission sparked D. Levytsky's protest and resignation as UNDO leader. The new leader and spokesman for normalization policies became V. Mudry, who was also vice-marshal of the Sejm.

UNDO began to press the government for more substan-

tial changes – the introduction of cultural autonomy for eastern Galicia, concessions in elementary and secondary schooling, a Ukrainian university, territorial self-government, an end to colonization, the introduction of the term 'Ukrainian' into the official language, access to administrative postings for Ukrainians, the regulation of rivers, and measures against starvation in the mountain regions. The government, apart from satisfying a few minor demands, ignored the overtures. The only positive effects were arrangements for material goods to be supplied to invalids of the former Ukrainian army, an increase in the enrollment of Ukrainian students at university, equal status for the terms 'Ukrainian' and 'Ruthenian' in bureaucratic usage, bilingual signs on public service buildings in eastern Galicia, and the acceptance of Ukrainian representatives into government committees. Demands for the elimination of bilingualism in schools, the dismantling of the Bereza Kartuzka concentration camp, higher numbers of Ukrainian teachers in the Galicia region, and the extending of credits to Ukrainian farmers were rejected.

At the same time that the Sanacja regime was backing away from any substantial measures to meet Ukrainian demands, an increasingly strident posture toward Ukrainians was being adopted by Polish politicians, local state administrative offices, and military circles. The accord lost almost all its credibility and support as a result. The fiasco, meanwhile, had led to a substantial split in the UNDO ranks as early as 1936, which included such critics of the policy as Levytsky, V. Kuzmowych, I. Kedryn, and Lutsy (who grouped around the newspaper *Dilo*).

A. Zięba

Norman (Normanist) theory. A historical theory about the origin of states in Eastern Europe, particularly of Kievan Rus', and of the name 'Rus'. Drawing on the last redaction of the Rus' Primary Chronicle (1118) and various linguistic data, the theory's adherents maintain that the creators of the Kievan state and its culture were Normans (ie, Norsemen or *Varangians) who arrived in Eastern Europe from Scandinavia in the 9th century, and that 'Rus' is a word of Norman origin. The theory's first proponents were 18th-century German historians of Russia – G. Bayer, G.F. *Müller, and A. Schlözer – and other German historians, such as F. Krug and J. Thunmann. Their views were elaborated in the 19th century by the Russian historians N. Karamzin and S. Solovev and in works dealing specifically with the theory by E. Kunik, M. *Pogodin, and the Danish Slavist V. Thomsen.

The first 'anti-Normanist' response was articulated by the 18th-century Russian scholar M. Lomonosov. Anti-Normanist views were expressed in the 19th century by the Decembrists and the Slavophiles, and a number of professional historians (eg, J. Ewers) posited theories about the Baltic-Slav, Lithuanian, and Gothic origin of Rus' and its name. Their theories received little recognition in historical circles, however. The first serious critiques of the Normanists came from late 19th-century Russian historians, such as S. Gedeonov, D. Ilovisky, and V. Vasilevsky, but they failed to present well-substantiated alternatives. Consequently the popularity of the Normanist theory was revived at the turn of the 20th century, as reflected in the works of F. Braun, S. Rożniecki, A. Shakhmatov, K. Tiander, and F. Westberg. Besides the traditional conception of Norman conquest, neo-Normanist theories of Norman commercial and ethnic-agrarian colo-

nization, of the social domination of the Slavs by Norman elites, and of continuous domination of the Slavs by foreigners (from the Scythians to the Normans) were presented.

In its various forms the Norman theory prevails to this day among Western historians, particularly those of Germany and the Scandinavian countries (eg, H. Arbmán, T. Arne, O. Höttsch, K. Rahbek Schmidt, A. Stender-Petersen, G. Stöckl), among Russian émigré historians (eg, N. Beliaev, V. Kiparsky, V. Moshin, P. Struve, M. Taube, A. Vasiliev, and G. Vernadsky), and among Polish historians (eg, H. Paszkiewicz). Most Western textbooks present the Normanist interpretation.

Soviet historiography, on the other hand, tended to be anti-Normanist. Although in the 1920s Normanist influences could still be found in the works of the prominent Soviet Russian historians M. Pokrovsky and A. Presniakov, from the 1930s anti-Normanist views were officially sanctioned. They were expressed in the works of Soviet historians of Rus' such as B. Grekov, V. Mavrodin, A. Nasonov, and M. Tikhomirov, the archeologists M. Artamonov and B. Rybakov, and the literary scholar D. Likhachev. All of them denounced the Normanist theory as unscientific, as did historians in other Soviet-bloc countries, particularly in Poland (eg, H. Łowmiański).

Since its inception the Norman theory has been unpopular among Ukrainian historians. In the late 18th century the anonymous author(s) of *Istoriia Rusov* contended that the Kievan state and the name 'Rus' were of local, Slavic origin. The leading 19th-century Ukrainian anti-Normanists were M. *Maksymovych, who polemicized with Pogodin; M. *Kostomarov, the author of the theory of the Lithuanian origin of Rus'; and V. *Antonovych and members of his historical school in Kiev, who either rejected the Norman legend of the Rus' chronicles outright or denied its historical significance. In the early 20th century M. *Hrushevsky contended that the Norman theory has no historical basis and is simply unnecessary for explicating the origin of the Ukrainian Rus' state. He did not, however, reject the fact that the Varangians contributed in some measure to the creation of the Kievan empire. The literary scholar M. *Vozniak held similar views, as did D. *Bahalii and other historians of Hrushevsky's generation.

The Norman theory had adherents among Ukrainian historians in interwar Galicia and the émigré community. Its influence is particularly evident in the works of S. *Tomashivsky, but also in those of M. *Chubatyy, M. *Korduba, and B. *Krupnytsky (a 'critical Normanist'). S. *Shelukhyn's attempt at supplanting the Norman theory with a Celtic one was not successful. Soviet Ukrainian historians by and large adhered to the anti-Normanist positions articulated by Hrushevsky, Bahalii, and V. *Parkhomenko. Most postwar Ukrainian émigré historians (eg, N. *Polonska-Vasilenko, O. *Pritsak) have rejected the classical Norman theory and its various neo-Normanist modifications. Like Hrushevsky, however, they have not denied the Varangian influence in the political and economic life of the Kievan state as it evolved into the Rus' empire of the 10th and 11th centuries.

Normans (*normany*). A term used by medieval chroniclers for the Germanic tribes inhabiting Scandinavia and Jutland; a common alternative name for the seafaring brigands, mercenaries, and traders known as Vikings in Western Europe and *Varangians in Rus' and the Byzantine Empire. The theory of the Varangian origin of Rus' is known as the *Norman theory.

North Crimean Canal. A long canal system in Kherson and Crimea oblasts, running from the Kakhivka Reservoir on the Dnieper River through the Perekop Isthmus to the Crimean city of Kerch. Its main sluice, near New Kakhivka, was built in 1956 at the same time as the reservoir. Construction of the canal bed began in 1957 and was accomplished in two stages, from Kakhivka to the Crimea by 1963 and through the Crimea by 1975. The length of the canal system is 400.5 km, the maximum width is 60 m, and the depth varies from 6 to 13 m. The main canal consists of an undivided 200-km stretch from Kakhivka to Dzhankoi and then four sections with locks that raise the water 103 m. The maximum water flow is 300 cu m/sec. There are 24 regulating stations along the length of the canal, including 5 reservoirs, and 118 escape gates and pumping stations. The canal supplies an irrigation network in the steppes of Kherson oblast and the Crimea covering an area of over 100,000 ha and projected to cover 540,000 ha. It also supplies fresh water to Kerch and Feodosiia and many settlements in the Crimea.

North Dakota. A western north central state of the United States (1990 pop 641,364). The 1980 census revealed 1,574 persons in North Dakota reporting a Ukrainian ancestry for both parents, and 1,638 persons who claimed Ukrainian ancestry of at least one parent. By 1990 their total number had risen to 3,643.

The first Ukrainian settlers to North Dakota arrived in 1896 and 1897 by way of Canada. Most were from the region southeast of Borshchiv in Galicia. From 1898 until 1912 a steady stream of immigrants settled in eastern Billings county; in the Snow, Gorham, and Ukraina areas; and in the Belfield region of Stark county. Ukrainian Protes-

tants from eastern Ukraine settled in McHenry and McLean counties in the communities of Max, Butte, and Kief. The majority of Ukrainian immigrants took up farming; others took up ranching, mining, railway work, or common laboring. By the 1930s an estimated 5,000 Ukrainians were living in North Dakota. During the depression a large out-migration of Ukrainians from the state occurred. A period of general social mobility and assimilation into mainstream American society followed, after the Second World War. At the same time the rural areas began to be depopulated, as people moved to nearby towns either to retire or to take up urban occupations. The results can be seen in eastern Billings county, which in 1930 had the greatest concentration of Ukrainians. In 1980 there were only 166 persons of sole Ukrainian ancestry, and another 125 persons with one Ukrainian parent. At the same time Stark county (including Dickinson) contained 360 persons of sole Ukrainian ancestry and 255 persons claiming Ukrainian ancestry of one parent. The postwar wave of Ukrainian immigrants did not have a major impact on the community, as many, dissatisfied with their jobs, left to find more suitable employment in other states. The mid-1960s saw a small but significant influx of medical professionals from Canada.

The first two Ukrainian Catholic churches were built in Belfield (1906) and Wilton (1907). A third church was built in Gorham (1911). From 1921 to 1953 the Wilton parish was a mission church served on an itinerant basis by priests from Belfield. Mission parishes were later established in both Bismarck (1979) and Minot (1981) to accommodate urban residents of Ukrainian background. In 1939 a residence for nuns was built near the Belfield church. The first Ukrainian Orthodox church was founded in 1913 after a split in the Catholic Wilton parish. A similar occurrence took place in Belfield, where in 1917 an Orthodox church was built across from the original Catholic St Demetrius church. In 1944 a new parish, the Ukrainian Catholic Church of St John the Baptist, was established in Belfield.

Ukrainian Stundists erected their first sanctuary, the Russian Baptist Church of Liberty, in the town of Kief in 1901 and a church near Max in 1908. They were largely served by unpaid community elders. The Ukrainian settlements in and around northern McLean county (consisting largely of Evangelical eastern Ukrainian immigrants)

SS Peter and Paul Ukrainian Orthodox Church and St Demetrius's Ukrainian Catholic Church in Belfield, North Dakota (1917)

The postmark of Ukraina,
North Dakota

continued to be Protestant in orientation through the generations. Baptist, Congregational, and Seventh Day Adventist congregations are still present.

Ukrainian fraternal and benevolent associations have had a small impact on the Ukrainian communities in North Dakota. In 1955 a North Dakota chapter of the Ukrainian Congress Committee of America was finally incorporated. In 1975 the Ukrainian community organized a Pioneer Days Celebration (commemorating the 75th anniversary of the arrival of the first immigrants), and in 1980 the Ukrainian Cultural Institute was established at Dickinson State College (under the leadership of A. Palanuk). The institute is dedicated to preserving and promoting the Ukrainian heritage through education and cultural events and publishes a quarterly newsletter titled *Ukrainian Cultural Institute* (1980–).

North Ossetian Autonomous Republic. An autonomous republic (1989 pop 632,000) within the Russian Federation, covering 8,000 sq km in northern Caucasia. It lies within the basin of the Terek River and its tributaries, the Uruk, Ardon, and Gizeldon. Its capital is Ordzhonikidze. According to the 1989 census there were 335,000 Ossetians, 189,000 Russians, 33,000 Chechens, 12,000 Armenians, and 10,000 Ukrainians in the republic. Since the Ukrainian statistic was deflated, the true figure, in fact, could be as high as 50,000. Only about half of the Ukrainian inhabitants listed Ukrainian as their mother tongue. Ukrainians and Russians inhabit the plain in the northern part of the republic.

North Ukrainian Trough. See Dnieper-Donets Trough.

Northern Caucasia (aka Northern Caucasian krai). A part of the RSFSR set up in 1924. It encompasses the northern slopes of the Caucasus Mountains, Subcaucasia, and the southern Don region. Specifically, it consists of Krasnodar and Stavropol kraia, Rostov oblast, and the autonomous republics of Dagestan, Kabardin-Balkar, North Ossetia, and Chechen-Ingush. Its area is 355,100 sq km, and its population is 16.9 million (1990). Thirty percent of the USSR's petroleum and natural gas was extracted there in the 1960s. The southwestern part of Northern Caucasia lies within Ukrainian ethnic territory.

Northern dialects. A group of dialects in the Ukrainian language. They are distributed north of the *southwestern and *southeastern dialects, with which they share a broad

zone of transitional dialects. With the Belarusian language to their north they share transitional (eastern and mixed) Ukrainian-Belarusian dialects as a result of the ancient, unequal northwestward diffusion of Ukrainian traits and the later southeastern expansion of Belarusian. The northern dialects consist of the *Podlachian and *Polisian dialects and have the following characteristics: (1) an archaic vocalism (diphthongs) in the stressed position, or monophthongs in place of the stressed *o* and *e* (which were once followed by a weak-*jer* syllable) *ě* that differ from *o*, *e*, and *ě*; eg, *pječ*, *duom*, *djed* (Standard Ukrainian [SU]: *pič*, *dim*, *did*) 'oven, home, grandfather'; and (2) the change of *a* (< *ę*) after a palatalized consonant into *e* in an unstressed position; eg, *děset*, *des'áty* (SU: *děsjat*, *desjátyj*) 'ten, tenth'. Except for some of the Podlachian dialects, in their lexicon and simplified morphology the northern dialects are similar to the southeastern dialects, in whose formation they, together with the Podilian and Volhynian dialects, played a decisive role in the 14th to 17th centuries. (See the map in *Dialects.)

Northern Group of the Ukrainian Galician Army (Pivnichna hrupa UHA). A grouping of *Ukrainian Galician Army (UHA) units located northwest of Lviv in December 1918. In January 1919 this group was reorganized into the First Corps of the UHA, which consisted of four brigades (Sokal, Rava, Belz, and Yaniv) and the First Cavalry Regiment. During 1919 the First Corps held the right wing of the front against the Polish army. Its commanders were Lt Col V. Kurmanovych, Col O. Mykytka, and Col A. Shamanek. When the UHA was incorporated into the Red Army, the First Corps was re-formed as the Second Brigade of the Red Ukrainian Galician Army. Its commanders were Maj O. Lesniak and Capt Yu. Holovinsky. On 23 April 1920 the unit deserted the Red Army and attempted to join the UNR Army, but it was disarmed and interned by the Poles.

Northern Mineral Enrichment Complex (Pivnichnyi hirnycchozbahachuvalnyi kombinat). A concern of the mining industry, located in Kryvyi Rih, Dnipropetrovska oblast. It processes ore from the *Kryvyi Rih Iron-ore Basin. The first plant, with an annual capacity of 13.5 million t of ore and 5.9 million t of concentrate, was opened in 1964. A second plant, with a capacity of 33 million t of ore and 14.2 million t of concentrate, was completed in 1970. The complex includes two quarries as well as pulverizing and enrichment plants.

Northwestern Ukrainian lands (Pivnichno-zakhidni ukrainski zemli). The common unofficial designation used by Ukrainians during the interwar period for the northwestern Ukrainian ethnic territories (outside Galicia) that had come under Polish control, including Volhynia, Polisia, Podlachia, and the Kholm region.

Noryn River. A left-bank tributary of the Uzh River, which it joins near Narodychi. It is 84 km long and drains a basin area of 832 sq km. It flows through Zhytomyr oblast, including the town of Ovruch. Its waters are used for irrigation.

Nosach, Pavlo [Nosáč], b 22 September 1890 in Bovkun, Tarashcha county, Kiev gubernia, d 20 October 1966 in Kiev. Kobzar. Orphaned as a child, he was wounded in

Pavlo Nosach

Oleksander Nosalevych

battle in 1915 and lost his sight. He learned to play the kobza in 1928 from O. Markevych. His repertoire included folk songs, songs set to the verses of T. Shevchenko, and his own compositions, such as 'A Duma about the Great Kobzar.' During the Second World War his itinerant minstreling helped to strengthen patriotic feelings in Ukraine as well as the resolve to resist the occupying Germans.

Nosachov, Andrii [Nosačov, Andrij], b 13 December 1913 in Hirzhove, Tyraspil county, Kherson gubernia, d January 1990 in Sumy. Actor. In 1933 he completed drama studies in Donetsk as a pupil of D. Kozachkivsky. He has worked in the Kryvbas Theater (1933–4), the Dnipropetrovske Oblast Workers' and Collective-Farm Theater (1934–8), the Uralsk Ukrainian Music and Drama Theater in Kazakhstan (1938–41), and the Sumy Ukrainian Music and Drama Theater (since 1941).

Nosalevych, Oleksander [Nosalevyč], b 21 March 1874 in Bylychi, Sambir county, Galicia, d 19 January 1959 in Wiesbaden, Germany. Opera and concert singer (bass-baritone). He graduated from the Vienna Conservatory with distinction (1898) and also studied in Milan under F. Guarino. He was a soloist in theaters in Lviv, Vienna (under G. Mahler), Czechoslovakia, France, England, and especially Germany. Nosalevych also toured in Galicia. His main roles included Rocco in L. van Beethoven's *Fidelio*, Figaro in G. Rossini's *Il Barbiere di Siviglia*, and Mephistopheles in C. Gounod's *Faust*. In concert he sang works by W. Mozart, F. Weber, B. Smetana, J. Brahms, and R. Strauss; art songs by D. Sichynsky and M. Lysenko to texts by T. Shevchenko and I. Franko; and Ukrainian folk songs. In 1930 the artist left the stage and organized his own vocal school in Wiesbaden. Nosalevych's art is preserved in rare recordings.

Nosenko, Ivan, b 26 September 1920 in Aleksandrovka, Orel gubernia, Russia. Sculptor. A graduate of the Dnipropetrovske Art School (1941), he has done a number of monuments, including one to marines in Berdianske (1972), and many smaller sculptures, such as *Zaporozhian Cossacks* (1961) and *Metallurgist* (1967).

Nosiv, Anatolii, b 23 July 1883 in Poltava, d 1941? Anthropologist and archeologist. A student of F. Vovk, he be-

came head of the anthropology and prehistory department of the VUAN Museum of Anthropology and Ethnology in Kiev and a member of the VUAN Archeological Committee. In the 1920s he published several articles in anthropology, coedited (with M. Rudynsky) the annual collection **Antropolohiia* (1927–30), and compiled *Slovnnyk antropoehografichoi terminolohii* (A Dictionary of Anthropogeographical Terminology, 1930). In the mid-1930s he was arrested by the NKVD and imprisoned, but was released and managed to find a position at the Yalta Regional Studies Museum. His subsequent fate is unknown.

Nosivka. III-12. A town (1990 pop 18,500) on the Nosivochka River and a raion center in Chernihiv oblast. It is first mentioned, as Nosiv, in the Hypatian Chronicle under the year 1147. An ancient burial ground dating back to Kievan Rus' has been discovered in the vicinity. Under the Hetman state Nosivka was a company center of Chernihiv regiment. Today the town has a food industry and an agricultural research station.

Notable military fellows (Znachne viiskove tovarystvo). The collective name of those Cossacks constituting the ruling estate in the 17th- and 18th-century Hetmanate. It was applied particularly to those members of the elite who had no permanent positions of authority and were therefore not members of the **Cossack starshyna*, but were former **registered Cossacks*, former Ukrainian noblemen who had fought on the Cossack side in the Cossack-Polish War, or Cossacks who had distinguished themselves in the field. In the late 17th century two categories of fellows were established: **fellows of the standard*, who were designated by the hetman's decree, and the lower-ranking **fellows of the banner*, who were appointed by the regimental colonels. In the early 18th century an intermediate category of military fellows designated by the **General Military Chancellery* was established.

A 1734 tsarist decree placed a limit on the number of notable military fellows in each regiment, thereby artificially arresting the growth of the Ukrainian elite. The restriction was circumvented by the creation of a new category of persons not under general Cossack jurisdiction, the 'appointees to the fellows of the banner' (*asygnovani u znachkovi tovaryshi*).

The notable military fellows' legal status was based on their obligation to perform special administrative or military duties and personal military service (or to provide several armed proxies therefor). Their privileges included the ownership of settled estates and the right to part of the labor of their inhabitants. From 1672, representatives of the fellows participated in the **councils of officers* and thus in legislative deliberations. They were exempt from prosecution by general courts. Fellows of the standard could be tried only by the Hetman's Court or, in the 18th century, the **General Military Court*. Fellows of the banner could be tried only by regimental courts. After the re-introduction of **land* and **pidkomorskyi* courts in 1763, they shared the nobles' and *starshyna's* privilege of being tried by them.

During the 18th century the notable military fellows became a kind of closed hereditary caste. In 1768 the Russian governor-general of the Hetmanate, P. Rumiantsev, decreed that only children of notable military fellows or of Cossack *starshyna* could become fellows of the banner. In 1785 the notable military fellows were abolished altogether.

er, and a group of them were inducted into the Russian imperial *nobility.

L. Okinshevych

Notary public. A public official who authenticates legal acts or documents, and thereby gives them a public status. In most countries notaries are not civil servants, but their activity and organizations are regulated by law. In the Russian Empire notaries were introduced in 1729, and by the late 19th century they had spread throughout the empire. In the Austro-Hungarian Empire notaries were under the jurisdiction of the provincial courts and were organized into professional chambers, one in Lviv and one in Chernivtsi. In the interwar period a similar system existed in Ukrainian territories under Polish and Rumanian rule. The term 'notary' was used in Transcarpathia under both Hungarian and Czechoslovak rule to refer to an administrative office of municipal self-government. Notaries were civil servants who worked for 'notarial districts,' which included several villages.

In the Ukrainian SSR notaries are civil servants. Notary offices are found in all raion centers and larger settlements. In oblast capitals they are headed by senior notaries. Their work is overseen by oblast courts. Appointees have some legal training or considerable legal experience. Their function is to authenticate certain contracts, wills, and trust agreements by affixing an appropriate seal and signature to the original documents.

Notatky z mystetstva / Ukrainian Art Digest. A Ukrainian-language illustrated art journal published by the Philadelphia branch of the Ukrainian Artists' Association in the USA since 1963. It contains theoretical articles, materials on the history of Ukrainian art, biographies of Ukrainian artists, reviews of book designs and exhibitions, and a chronicle of important events in the Ukrainian art world. Since its origin the journal has almost doubled in size and circulation (from 500 to 1,000). By 1990, 29 issues had been published. The managing editor until 1992 was P. Mehyk.

Noua culture. A Bronze Age archeological culture of the 13th to 11th century BC that existed in southwestern Ukraine, northern Rumania, and northern Moldavia. It was identified and named in the 1930s by I. Nestor, a Rumanian archeologist. The people of this culture lived in surface dwellings around which ash-pits and outbuildings were located. They engaged in agriculture, animal husbandry, and bronze working. Studies of their sites revealed earthenware pottery, bone arrowheads, leaflike bronze spearheads, mirrors, and pins. Burial grounds with up to 200 graves in which the deceased were placed in a flexed position have also been uncovered. Notable Noua culture sites in Ukraine include the *Mahala and *Ostrivets archeological sites.

Nova Borova. III-9. A town smt (1990 pop 6,200) on the Irsha River in Volodarske-Volynske raion, Zhytomyr oblast. It arose in the second half of the 17th century. The

town has a fruit-drying plant and a reinforced-concrete plant. Its water reservoir is surrounded by a resort area.

Nova Bukovyna. See *Bukovyna*.

Nova Dmytrivka lignite deposit. One of the largest lignite deposits in Ukraine, located near the village of Nova Dmytrivka, Barvinkove raion, Kharkiv oblast. It was discovered in 1950, and covers almost 12 sq km. In 1981 its total reserves were estimated at 536.7 million t, of which 390 million t were extractable. The deposit contains 25 seams of ore, 1-74 m in width, at depths of 86-404 m. The ore has an average ash content of 14.2-24.5 percent, a sulfur content of 1.04-5.5 percent, and a moisture content of 42-64 percent. Its heat value is 1,412-2,560 kcal/kg. The lignite is used for making fuel briquettes and mineral wax and for fuel.

Nova doba (New Era). A weekly journal of politics, economics, and culture, published in Vienna from February 1920 to October 1921 as the organ of the Foreign Group of the *Ukrainian Communist party. It was edited by V. Levynsky with the assistance of V. Vynnychenko.

Nova doba (New Era). A weekly newspaper for Ukrainian Red Army soldiers in German POW camps, published in Berlin from 1941 to 1945. It was edited by H. Kotorovych.

Nova dumka

Nova dumka (New Thought). The official press organ of the Union of Ruthenians and Ukrainians of Croatia, established in 1971 in Vukovar with V. Kostelyk as editor. It published four to six issues of 50 to 150 pages annually. By 1990, 84 issues had been published. The content is in Ukrainian, the *Bačka dialect, and Serbo-Croatian and deals with regional concerns as well as the history of Transcarpathian and Galician Ukrainians.

Nova Generatsiia (New Generation). A literary organization of futurists, established in Kharkiv in 1927 by former members of the *Association of Panfuturists, M. Semenko, G. Shkurupii, O. Poltoratsky, A. Chuzhy, M. Skuba, and others. Its program embraced the propagandistic slogans of internationalism and proletarian culture and was combined with an imperative to modernize Ukrainian literature by putting it in touch with contemporary literary currents in the West. The organization's official organ bore the same name. In 1929 the name was changed to the All-Ukrainian Association of Workers of

Communist Culture, and in 1930, to the Union of Proletarian Writers in Ukraine. In 1931 the organization was forced to disband. Most of its members were executed during the Stalinist terror, although some, such as O. Poltoratsky, succumbed to pressure and adopted the Party line.

Nova generatsiia (cover design by Pavlo Kovzhun)

Nova generatsiia (New Generation). A monthly journal issued by the organization of the same name, published in Kharkiv from October 1927 to December 1930, under the editorship of M. *Semenko. Much of its contents were devoted to contemporary literary polemics and to the popularization of currents in literature and art in the West (eg, G. Apollinaire, Le Corbusier, W. Baumeister). Among the more frequent contributors were A. Buchma, V. Ver, O. Vlyzko, H. Koliada, F. Lopatynsky, S. Skliarenko, E. Strikha (K. Burevii), and L. Chernov.

Nova hromada (New Community). A literary and scholarly monthly published in Kiev in 1906. A total of 12 issues appeared. It was funded by V. *Leontovych and Ye. *Chykalenko and edited by them and by B. *Hrinchenko and S. *Yefremov. Among the contributors were Kh. Alchevska, S. Cherkasenko, P. Kapelhorodsky, M. Kotsiubynsky, A. Krymsky, M. Kropyvnytsky, V. Kushnir, M. Lozynsky, F. Matushevsky, V. Samiilenko, A. Teslenko, I. Truba, Lesia Ukrainka, M. Vorony, V. Vynnychenko, L. Yanovska, and B.-V. Yaroshevsky. T. Shevchenko's poems 'Sova' (The Owl) and 'Try lita' (Three Years) were first published in the journal. Ukrainian translations of works by H. Heine, V. Hugo, P.-J. de Béranger, M. Maeterlinck, and A. France were also included. The monthly ceased publication with the transfer of **Literaturno-naukovyi vistnyk* from Lviv to Kiev.

Nova hromada (New Community). A weekly organ of the *Federation of Ukrainian Socialists in Canada after its split from the *Federation of Ukrainian Social Democrats in Canada (FUSD). It appeared in Edmonton from February 1911 to September 1912 (a total of 67 issues). It published articles on political affairs, especially concerning the workers' and socialist movements, and some works on Ukrainian history and culture. It strongly criticized *Robochyi narod*, the organ of the FUSD, which was more leftist in orientation. *Nova hromada* was edited by R. Kremar, T. Tomashevsky, I. Semotiuk, and I. Kiriak.

Nova hromada (New Community). A journal published by the *All-Ukrainian Association of Consumer Co-oper-

ative Organizations and Knyhospilka publishing house in Kiev and Kharkiv from 1922 to 1933. Originally called *Biuletyn' Kyïvs'koi filiï Vukoopsilky* (1922) and *Pravoberezhnyi kooperator* (1922-3), in 1932 it was renamed *Sotsialistychna hromada*. The journal was aimed primarily at a peasant readership and contained articles on the co-operative movement and scientific, literary, and cultural topics, and prose and poetry. It was edited by O. Kobets and N. Rudenko, and among its contributors were the prominent writers B. Antonenko-Davydovych, M. Zerov, M. Rylsky, S. Vasylchenko, O. Vyshnia, P. Tychyna, and H. Kosynka. The journal appeared 8 times in 1922, 16 times in 1923, 21 times in 1924, 24 times per year from 1925 to 1932, and once in January 1933.

Nova hromada (New Community). A pro-Soviet monthly journal of political and community affairs, published in Vienna from July 1923 to 1925. Edited by S. Vityk with the assistance of A. Krushelnytsky and M. Melezensky, it reprinted articles from major Soviet Ukrainian periodicals, such as *Visti VUTsVK* and *Chervonyi shliakh*.

Nova Kakhivka [Nova Kaxivka]. VII-14. A port city (1990 pop 57,700) on the left bank of the Dnieper River in Kherson oblast. It was founded in 1951, when the *Kakhivka Hydroelectric Station was built. The city was built on the site of Klisheve village (est 1891). Nova Kakhivka is a modern, planned city with wide streets laid out on a grid and lined with greenery. Its industries produce asphalt, reinforced-concrete structures, and hydroelectric machinery and equipment.

Nova khata (New Home). A monthly (1925-34) and semimonthly (1935-9) magazine for women, published in Lviv by the *Ukrainske Narodnie Mystetstvo co-operative. The chief editors were M. Furtak, M. Hromnytska, and, from 1930, L. Burachynska. *Nova khata* contained articles on folk art, co-operative and educational subjects, fashion, interior decorating, housekeeping, cultural history, and the women's movement; biographies and memoirs of prominent Ukrainian women; and prose and poetry. It was noted for its design and artwork, by artists such as O. Kulchytska, M. Butovych, and S. Hordynsky.

Nova knyha (New Book). A monthly journal of bibliography, library science, literary criticism, book reviews, publishing affairs, and book design, production, and trade, published in Kharkiv in late 1924 and in 1925. It succeeded the journal *Knyha* (five issues, 1923-4). Ten issues appeared under the editorship of S. Pylypenko and M. Hodkevych. Prominent contributors included I. Aizenshtok, D. Bahalii, O. Biletsky, M. Dolengo, V. Ihnatiienko, E. Kagarov, O. Korshakov, Yu. Mezhenko, M. Pakul, M. Plevako, P. Tutkovsky, and M. Yashek.

Nova kul'tura. See *Kul'tura*.

Nova Maiachka [Nova Majačka]. VII-14. A town smt (1990 pop 7,200) in Tsiurupynske raion, Kherson oblast. It was founded at the beginning of the 19th century by serfs who had fled from Kursk, Chernihiv, and Poltava gubernias, and it was given smt status in 1958. Archeologists have discovered artifacts from the 4th and 5th centuries in the town's territory.

Nova Odessa. VI-12. A city (1990 pop 14,900) on the left bank of the Buh River and a raion center in Mykolaiv oblast. The site has been settled since ancient times. Artifacts dating from the Bronze Age and the 1st century AD as well as Scythian kurhans have been discovered there. In 1776 Fedorivka village, named after the Zaporozhian Cossack Fedir Osadchy, was built by Cossacks of the Kherson Pikeman Regiment to defend the territory against Turkish and Tatar raids. When the regiment was abolished in 1783, the region was put under the administration of the Boh Cossack Army. The Odessa Cossack Regiment was stationed in Fedorivka; the village was renamed Nova Odessa in 1832. By 1859 Nova Odessa, which was then part of Kherson gubernia, had a population of 2,190. It attained city status in 1976. Today the town has a cheese factory and a building-materials plant.

Nova Praha. v-13. A town smt (1990 pop 8,100) on the Beshka River in Oleksandriia raion, Kirovohrad oblast. In 1730 the Zaporozhian Cossack P. Petryk established a settlement there, which in 1821 was named Nova Praha. By the middle of the 18th century it had become a prosperous trade and cultural center in Southern Ukraine. In the 1850s Serbs, Montenegrins, and Old Believers settled there. The population in the 1880s was over 9,000. Today the town's industries produce asphalt, bricks, milk products, and canned foods.

Nova rada (New Council). A 490-page literary miscellany published in 1908 by the Kiev Literary-Artistic Society. It was edited by O. Kosach (O. *Pchilka), L. *Starytska-Cherniakhivska, M. *Starytsky, and Ivan *Steshenko. Among the contributors were S. Charnetsky, M. Cherniavsky, R. Hordynsky, H. Hryhorenko, P. Karmansky, H. Khotkevych, B. Lepky, M. Levytsky, M. Lozynsky, P. Myrny, Pchilka, O. Romanova, Starytska-Cherniakhivska, Starytsky, M. Storozhenko, Lesia Ukrainka, V. O'Connor-Vilinska, and M. Vorony.

Nova rada (New Council). A daily newspaper that appeared in Kiev from March 1917 to January 1919 as the continuation of **Rada*. Published initially by the Society for the Support of Ukrainian Scholarship, Literature, and Art, it later became the organ of the *Ukrainian Party of Socialists-Federalists. In addition to detailed news reports and extensive reviews of the press, the newspaper published commentary on political and economic developments by prominent figures, such as M. Hrushevsky, Ye. Chykalenko, V. Prokopovych, F. Matushevsky, L. Starytska-Cherniakhivska, S. Shelukhyn, S. Rusova, M. Levytsky, and P. Khrystiuk. The editors of *Nova rada* were A. Nikovsky and S. Yefremov.

Nova rada (New Council). A conservative, Catholic daily published in Lviv in 1919–20. The paper was founded by Rev Y. Zastyrets; after the first few issues it was taken over by a public committee consisting of Rev T. Halushchynsky, Rev L. Kunytsky, Rev H. Kostelnyk, Rev O. Malytsky, M. Chubaty, and O. Makarushka. Among the contributors to *Nova rada* were V. Budzynovsky, I. Svientsitsky, M. Halushchynsky, and Revs Ya. Levytsky (the chief editor) and O. Stefanovych. In 1920 the public committee also published *Pravda*, a more popular weekly edited by M. Chubaty. Neither paper recognized the Polish

occupation of Galicia. Both were frequently censored, had issues confiscated, and were eventually closed down by the Polish authorities.

Nova Stsena (New Stage). A musical-drama theater in Transcarpathia, organized in 1934 by the brothers Ye. and Yu. *Sherehii, the first theater there led by local artists. At first a drama circle, from 1936 it was affiliated with the Prosvita society in Khust, and later with the Prosvita society in Uzhhorod. Mobilization in March 1938 interrupted its activities, and in November of that year it was reconstituted as the State Ukrainian Theater Nova Stsena, under which name it continued its work until March 1939. The artistic directors of the theater were Yu. Sherehii, M. Arkas, Jr, and V. Libovicki (also the choreographer), and the stage designer was M. Ruda-Tushytska. The repertoire of Nova Stsena consisted primarily of Yu. Sherehii's dramas (pseudonym: Yu. Hrom), based on the ethnographical material of Transcarpathia. The theater also staged M. Arkas Jr's operetta *Moon and Star* (libretto by M. Chyrsky), O. Oles's drama *At the Dnieper* (music by Ye. Sherehii), S. Hulak-Artemovsky's opera *Zaporozhian Cossack beyond the Danube*, and M. Starytsky's populist-ethnographical plays *Marusia Bohuslavka* and *Oi, ne khody, Hrytsiu ...* (Don't Go to Parties, Hryts ...).

Nova svoboda

Nova svoboda (New Freedom). The only daily newspaper in the Carpatho-Ukrainian state of 1938–9, published in Uzhhorod, Khust, and, briefly, Sevlush (now Vynohradiv). Edited by S. Dovhal and then V. Grendzha-Donsky, in 1939 it was the organ of the *Ukrainian National Alliance.

Nova Ukraïna (New Ukraine). A daily organ of the Press Office of Staff of the Army of the UNR, published in Kamianets-Podilskyi from August to November 1919.

Nova Ukraïna (New Ukraine). A monthly and later irregular journal of literature, politics, scholarship, and

Nova Ukraïna

community affairs, published in Prague in 1922–8. A major émigré journal of the 1920s, it contained a chronicle of developments in Soviet Ukraine, Galicia, and abroad, and extensive book reviews and notes. *Nova Ukraïna* was closely allied with the Ukrainian democratic socialist movement and was avowedly anti-Soviet and pro-Ukrainian independence. The founder and chief editor was M. Shapoval; he was assisted by P. Bohatsky (1922), V. Vynnychenko (1923–4), M. Halahan, N. Hryhoriiv (1925–6), S. Dovhal, B. Zalievsky, and M. Mandryka (1927–8).

Nova Ukraïna

Nova Ukraïna (New Ukraine). A daily Ukrainian paper published from November 1941 to February 1943 in Kharkiv, Poltava, and then, with interruptions, Vinnytsia. It was one of the best newspapers to appear in German-occupied Ukraine, at least partly because it was published so close to the German-Soviet front and was subject only to military censorship, which was not as restrictive as the Nazi censorship practiced elsewhere in the Reichskommissariat Ukraine. It was edited by P. Sahaidachny and V. Tsarynnyk. A total of 402 issues appeared, each with a circulation of 25,000 to 50,000 copies.

Nova Ushytsia [Nova Ušycja]. v-8. A town smt (1990 pop 4,900) on the Kalius River and a raion center in Khmelnytskyi oblast. Litnivtsi, the town's original name, is first mentioned in a charter of 1439. In the early 1700s the inhabitants revolted against their Polish overlords. In the mid-18th century Litnivtsi was granted the rights of *Magdeburg law, whereupon its economy flourished. In 1793 the town became a part of Podilia gubernia. In 1829 it was promoted to the status of a county center and renamed Nova Ushytsia. During the revolutionary period, in July 1919 and May–June 1920, the Third Iron Rifle Division of the UNR Army battled the Red Army near Nova Ushytsia. Today the town has a small food industry.

Nova Vodolaha. IV-16. A town smt (1990 pop 14,900) on the Vilkhovatka River and a raion center in Kharkiv oblast. Its name is derived from that of the Vodolaha River, which first appears in documents in 1572. Nova Vodolaha was founded ca 1675 on the *Murava Road by peasants and Cossacks of Kharkiv regiment. Its economy flourished, and by the 18th century Nova Vodolaha had become an important silk trading center in Slobidska Ukraine. Because of its vulnerability to Turkish and Tatar attacks, it served as a fortified outpost. Today the town produces asphalt and building materials.

Nova zoria (New Star). A newspaper of religious and social affairs published weekly in 1926–7 and then semi-weekly to 1938 in Lviv and to 1939 in Stanyslaviv. It was the organ of the Ukrainian Christian Organization and then of the Ukrainian Catholic People's party (from 1930).

Nova zoria

The journal supported the 'Westernizing' factions in the Greek Catholic church that advocated the Latinization of the rite. The editors of *Nova zoria* were T. Halushchynsky and O. *Nazaruk (from 1928). In 1930 the paper had a circulation of 2,000.

Nova zoria (New Star). A semimonthly (originally weekly) organ of the Ukrainian Catholic eparchy of St Nicholas, published in Chicago since 1965. It contains articles on religious topics, culture, and education, and it reports on the activities of the church. It is edited by a board headed by Rev Ya. Svyshchuk.

Novachenko, Mykola [Novačenko], b 17 December 1898 in Buryn, Putyvl county, Kursk gubernia, d 1966 in Kharkiv. Orthopedist and traumatologist; corresponding member of the USSR Academy of Medical Sciences from 1957. A graduate of the Kharkiv Medical Institute (1922), he worked at the Ukrainian Scientific Research Institute of Orthopedics and Traumatology and in 1940 became its director. He published over 90 papers on the regeneration of bone tissue, the treatment of bone fractures, and the use of prostheses, and invented a number of prosthetic devices.

Apolinarii Novak

Novak, Apolinarii, b 24 April 1885 in Serafyntsi, Horodenka county, Galicia, d 30 October 1955 in Winnipeg. Journalist and writer. After emigrating to Canada in 1901, Novak was editor of **Kanadiis'kyi farmer* (1909–13) and a longtime staff writer for *Ukrains'kyi holos* (1922–55). His short stories on Ukrainian pioneer themes were published in the latter journal and in *Khata* (Winnipeg, 1911–12), *Literaturno-naukovyi vistnyk* (Lviv), and *Svoboda* (Jersey City, New Jersey).

Novak, Hryhoriï, b 5 March 1919 in Chornobyl, Radomyshl county, Kiev gubernia, d 10 June 1980 in Moscow. Soviet Ukrainian weight lifter of Jewish origin. In

1946 he became the first Soviet athlete to win a world championship. He also won the 1947 European Cup in weight lifting and the 1952 Olympic silver medal in the middleweight class, and set 69 world records and over 100 Soviet records.

Novak, Vilen, b 3 January 1938 in Hlezne, Liubar raion, Zhytomyr oblast. Film director. In 1972 he completed study at the Kiev Institute of Theater Arts; since then he has worked in the Odessa Artistic Film Studio. He has staged films and telefilms, among them *Chervoni dypkuriery* (The Red Diplomatic Couriers, 1977) and *Kamerton* (A Tuning Fork, 1978).

Halyna Novakivska: *Streetcar Stop* (oil)

Novakivska, Halyna [Novakivs'ka] (née Molodetska), b 4 April 1923 in Peremyshl, Galicia. Painter. She studied at the Cracow Academy of Fine Arts and the Cracow Institute of Plastic Art (1939–43). In 1942–4 she worked as a scenery designer at the Theater of Small Forms at the Institute of Folk Creativity in Lviv and at the Ukrainian Theater in Stanyslaviv. A postwar refugee, she emigrated to Canada in 1949 and has lived in Toronto since then. Novakivska has explored textural effects and flattened spatial relationships. Her landscapes, still-life and figural compositions, close-up views of nature, and images of Ontario and Ukraine abound with rich textural surfaces, sophisticated tonal patterns, multiple overlays of several hues, and radiant areas of color, as in *Early Spring* (1985). A member of the Society of Canadian Artists and the Ukrainian Artists' Association, she has had solo exhibitions at

the University of Western Ontario in London (1963) and in Toronto (1964, 1971, 1972, 1980, 1991), Chicago (1974, 1981), Detroit (1976), Ottawa (1978), and Edmonton (1979). Her work was included in the Biennale of Ukrainian Art in Lviv (1991).

Oleksa Novakivsky: *Self-Portrait* (oil, 1911)

Novakivsky, Oleksa [Novakivs'kyj], b 14 March 1872 in Slobodo-Obodivka (now Nova Obodivka), Olhopil county, Podilia gubernia, d 29 August 1935 in Lviv. Painter and educator. He studied painting under F. Klymenko in Odessa (1888–92) and at the Cracow Academy of Fine Arts (1892–3, 1895–1900). After graduating with a gold medal he lived in Mogiła (now Nowa Huta), near Cracow, where he devoted himself to landscape painting. Having attracted Metropolitan A. *Sheptytsky as his patron he moved to Lviv in 1913 and founded the *Novakivsky Art School there in 1923. Solo exhibitions of his works were held in Cracow in 1911 and in Lviv in 1920 and 1921. Novakivsky also exhibited at shows of the Society of Friends of Ukrainian Art, the Association of Independent Ukrainian Artists, and his school. During his Cracow period he painted portraits, landscapes, still lifes, and genre scenes in a naturalistic, impressionist style (eg, *Spring* [1900], *Liberation* [1903], *Caroling* [1907], and *Awakening* [1912]) that resembled that of Polish contemporaries, such as J. Stanisławski, J. Malczewski, and S. Wyspiański. During his early Lviv period his style evolved under the impact of the First World War to become more symbolic and expressionist, as in works such as *The War Madonna* (1916), *St George's Cathedral* (1919), and *Self-Caricature* (1919). He did many portraits, including ones of Metropolitan Shep-

tytsky, Moses, Prince Yaroslav the Wise, Prince Yaroslav Osmomysl, O. Dovbush, and O. Barvinsky. In the 1920s his colors grew more vivid, and his lines more dynamic. Landscapes such as *St George's Cathedral* (1921–2) and *Fairy Tale about the Hutsul Region* (1926), the canvas *Moloch of War* (1923), his self-portraits, and portraits such as *Dovbush* (1931) and *O. Barvinsky* (1931) are fully expressionist in style. Novakivsky's oeuvre consists of over 500 oils, many of them unfinished. A museum dedicated to him and his works was opened in Lviv in 1972.

S. Hordynsky

Novakivsky, Yaroslav [Novakivs'kyj, Jaroslav], b 4 January 1920 in Lviv, d 21 May 1982 in Lviv. Architect; son of O. *Novakivsky. A graduate of the Lviv Polytechnical Institute (1950), he taught architecture in Lviv and designed the Dynamo Sports Complex (1953–6) and the telecenter complex (1956–7) there; planned suburban developments in Chernivtsi (1963–5), Uzhhorod, and Lviv (1964–6); and took part in the renovation of the historical center of Lviv and in projecting the general plans for the development of Lviv, Lutske, Chernivtski, Uzhhorod, Drohobych, Boryslav, Truskavets, and Morshyn. He wrote over 20 articles in the history of architecture.

Students of the Novakivsky Art School in 1926. Sitting, from left: Stefaniia Gebus-Baranetska, M. Karpiuk, Oleksa Novakivsky and sons, Olha Pleshkan, and Hryhorii Smolsky; standing: Stepan Lutsyk, Antin Maliutsa, V. Bulyk, Volodymyr Hodys, Sviatoslav Hordynsky, Mykhailo Moroz, V. Hrytsenko, O. Patsurkevych, and Leonyd Papara

Novakivsky Art School (Mystetska shkola O. Novakivskoho). A school of drawing and painting founded in February 1923 by O. *Novakivsky at his studio in Lviv. Although it lacked a formal curriculum and awarded no diplomas, the school's enrollment expanded rapidly. Besides practical training its students were offered lectures (1925–9) on artistic styles and color chemistry by V. Pe-

shchansky, Ukrainian art history by I. Svientsitsky, drawing by O. Kurylas, anatomy by S. Balei, cultural history by I. Rakovsky, and perspective by Ye. Nahirny. In 1926, 1928–9, 1930, 1932, and 1934 exhibitions of student work were held. Around 1932 the school was dissolved because of insufficient community support and declining student interest. About 60 young people attended the school for various periods of time. Among them were later distinguished artists, such as R. Selsky, L. Perfetsky, S. Zarytska, H. Smolsky, Mykhailo Moroz, V. Diadyniuk, A. Maliutsa, S. Hordynsky, S. Gebus-Baranetska, I. Vynnykiv, O. Pleshkan, S. Lutsyk, V. Lasovsky, E. Kozak, and Myron Levytsky.

Novakovsky, Mykhailo [Novakovs'kyj, Myxajlo], b 1872, d 1941. Lawyer and political and civic leader; brother of S. *Novakovsky. While practicing law in Bohorodchany (Galicia) before the First World War, he was active in the Ukrainian Radical party, then in the Ukrainian Social Democratic party, and finally in the National Democratic party. With the outbreak of the war he enlisted in the Ukrainian Sich Riflemen and collaborated with the Union for the Liberation of Ukraine. When the Western Ukrainian National Republic (ZUNR) was formed, he was appointed commissioner of Skalat county and a member of the executive of the Ukrainian National Rada. He went to Warsaw in 1919 as a member of a special diplomatic mission. With the defeat of the ZUNR he emigrated to Prague, and in 1920 he settled in Transcarpathia. In 1939 he moved to Slovakia.

Novakovsky, Stepan [Novakovs'kyj], b 1863, d 1936. Peasant and civic and political activist in Galicia; brother of M. *Novakovsky. He was a noted organizer of the Ukrainian Radical party in the Peremyshl region. In 1895–1901 he served as a deputy to the Galician Diet. Later he supported the Ukrainian Social Democratic party.

Nove Klynove settlement. A settlement and major iron manufacturing center of the late 1st century BC near Nove Klynove, Vynohradiv raion, Transcarpathia oblast. Excavations in 1962–6 revealed iron forges, as well as slag and other remnants of metal production. Located on a major trade route connecting central and eastern Europe, Nove Klynove supplied iron goods throughout the Carpathian region.

Nove Misto. IV-3. A village (1968 pop 709) on the Vyrva River in Staryi Sambir raion, Lviv oblast. It is first mentioned in a document in 1361. Archeologists have discovered stone tools, arrowheads, and Roman and Hungarian coins at the site of the village. On 4 February 1919 the Ukrainian Galician Army fought the Polish army near Nove Misto. The village's most valuable architectural monuments are the Church of St John the Baptist, built in 1529 and rebuilt in 1756, and a Roman Catholic church built in 1512.

Nove mystetstvo (New Art). An illustrated journal of the arts, published in Kharkiv in 1925–8 (a total of 89 issues). An organ of the Chief Ukrainian Administration of Political Education, it contained articles on literary and artistic developments in Ukraine and abroad, on political affairs (especially Ukrainization), criticism, and reviews and devoted considerable attention to the Ukrainian the-

Nove mystetstvo (cover design, with self-portrait, by Anatol Petrytsky)

ater. It was edited by M. Khrystovy and V. Khmury. O. Dovzhenko was one of its illustrators.

Nove selo (New Village). A weekly newspaper for peasants published in Lviv from 1930 to 1939. Founded by a small group of Sovietophile agronomists headed by V. Vorobets, who became chief editor, and published by a cooperative, in 1935 it became pro-OUN. Members of the editorial board in the latter period were Ya. Starukh and B. Levytsky. With the change in political orientation, *Nove selo* became one of the most popular papers in Galicia and reached a circulation of over 20,000.

Nove slovo (New Word). A daily newspaper published in Lviv from the autumn of 1912 to 3 September 1914. Subsidized by Rev T. Voinarovsky-Stolobut and edited by a committee headed by M. Kurtseba and including M. Nyskoklon, S. Biliak, V. Kozak, and I. Nimchuk, it contained articles on political developments and historical and cultural topics, belles lettres, and translations from foreign newspapers, and was one of the most widely read Ukrainian newspapers of its day (reaching a circulation of some 12,000). *Nove slovo* was closed down after the Russian occupation of Lviv, but was briefly revived in June–July 1915, after Lviv had been recaptured by Austro-Hungarian forces, and edited by F. Fedortsiv. It was succeeded by **Ukrains'ke slovo*.

Nove ukrains'ke slovo (New Ukrainian Word). A daily newspaper published in German-occupied Kiev from December 1941 to 1943 (a total of 531 issues). Edited by K. Shtepa, it replaced the suppressed **Ukrains'ke slovo* and was avowedly pro-Nazi and anti-OUN. Some articles on Ukrainian cultural and historical topics were published in it.

Nove zerkalo. See *Zerkalo*.

Nove zhytie (New Life). A weekly and then semimonthly organ of the **Covenant of Brotherhoods* fraternal organization, published in Olyphant, Pennsylvania, from 1912 to 1938. The paper's first editor was P. Kyryliuk.

Nove zhyttia (New Life). A daily newspaper published in Stanyslaviv (now Ivano-Frankivske) from November 1918 to April 1919 (a total of 89 issues) by Z. Kozlovsky. It was edited by I. Rybchyn and R. Zaklynsky. Its politics

were influenced by the views of the Ukrainian Party of Socialist Revolutionaries, and it openly criticized the policies of the Western Ukrainian National Republic's government.

Nove zhyttia (New Life). A semimonthly organ of **Sel-Rob*, published from April 1928 to February 1930 in Kholm as the successor to **Nashe zhyttia*. Edited by S. Makivka and P. Shcherbak, it published articles on political and economic developments written from a pro-Soviet, socialist perspective. The paper was closed down by the Polish authorities, and its editors were arrested.

Nove zhyttia

Nove zhyttia (New Life). A Ukrainian weekly newspaper published in Prešov, Slovakia, since August 1951. At first it was the organ of the Regional Committee of the Slovak Communist party and was largely a translation of the Slovak weekly *Nový život*. In January 1959 the paper became the organ of the **Cultural Association of Ukrainian Workers*. Its language, style, and content improved. In the late 1960s it published a series of articles criticizing the nationality policy in Czechoslovakia and Ukraine. As a result some of the paper's staff were dismissed. In the late 1980s the articles became much more interesting. Since mid-1989, 1,000 copies of the paper have been regularly sold in Ukraine. The editors have been V. Kopchak (1959–64), Yu. Datsko (1965–71), L. Halushka (1971–88), and O. Zozuliak (1989–). Today the paper is published by the Union of Ruthenian-Ukrainians of Slovakia.

Novel. See Prose.

November Uprising in Lviv, 1918 (*Lystopadovy zryv*). The first stage of armed conflict in the **Ukrainian-Polish War* of 1918–19. The proclamation of the **Ukrainian National Rada* (UNR) on 18 October 1918 concerning the founding of an independent Ukrainian state initiated preparations on the part of Ukrainians for taking power in eastern Galicia. The UNR originally hoped to establish a Ukrainian administration with the support of the Austrian authorities (Viceroy K. Huyn), but when those hopes were only partially fulfilled, it decided to act unilaterally. It then empowered the **Ukrainian Military Committee* under Capt D. Vitovsky to oversee the entire operation. The seizure of Lviv was planned originally for 3 November 1918. It was to be carried out by the Ukrainian soldiers who constituted the majority of the Austrian troops garrisoned in the city as well as by a brigade of the Ukrainian Sich Riflemen (USS) garrisoned in Bukovyna. The creation in Cracow of the **Polish Liquidation Committee* (28 Octo-

Proclamation of the November Uprising in Lviv

ber 1918), which announced that it would transfer to Lviv, compelled the Ukrainian politicians to move up the date of the operation.

On 1 November 1918 between 3:30 and 4:00 a.m. the Ukrainian soldiers occupied the public utility buildings and military objectives in Lviv without bloodshed. Ukrainian flags were raised, and proclamations issued announcing the emergence of a Ukrainian state. The Austrian authorities were interned, and Huyn handed power over to V. Detsykevych, the vice-director of the governor-generalship, who recognized the supreme authority of the UNR. The Austrian military commander of the city called on his subordinates to recognize the Rada. Col M. Marynovych now became commandant of Lviv, and the newly promoted Col Vitovsky became commander in chief of the Ukrainian force (numbering 60 officers and 1,200 soldiers).

The Ukrainian uprising met with armed resistance from the city's Polish residents, who constituted about 60 percent of its population. Polish activity before noon on 1 November 1918 was spontaneous and unorganized. Groups of young people assembled in various parts of the city and were directed by members of Polish paramilitary associations. In the afternoon Capt C. Maćzyński assumed control of the opposition forces. The Poles managed to obtain arms and ammunition from a police garrison in the Horodok suburb, and in the evening a Polish detachment over 100 strong captured part of the Novyi Svit district.

On the night of 2 November the Poles captured a large

ammunition depot in the railway station. At the same time the Ukrainian General Command (from 18 November known as the High Command) was unable to bring into the city detachments of the Sich Riflemen: the detachments encountered strong Polish resistance in the Klepariv suburb and only partly managed to break through into Lviv, on 3 November. The failure brought about a crisis in the Ukrainian command, and Vitovsky was replaced by Col Marynovych.

Until 4 November, battles were waged in different parts of the city, notably near the Sienkiewicz School, the Technician's Center, the Uhlan barracks in Vilka, Hora Strachennia, the post office, and St George's Cathedral, as well as in the Klepariv and Zamarstyniv suburbs. During that time the Poles (numbering approx 1,000) were able to consolidate gains in the western parts of the city and establish, by 5 November, a north-south dividing line.

The outbreak of combat in Lviv mobilized Ukrainian public opinion in Dnieper Ukraine under German occupation and the Hetman government of P. Skoropadsky. Local political organizations (the Ukrainian National Union, the Kiev-based *Batkivshchyna* society) issued appeals for rapid assistance for their Galician brethren. The first Dnieper detachments arrived in Lviv on 12 November 1918.

On 5 November the function of chief commander was taken over by H. Kossak, who initiated attacks to oust the Poles from the center of the city. The fiercest battles were conducted around the barracks in Vilka. On 9 November the Poles initiated their only offensive, in the area of St George's Cathedral. It was unsuccessful, and the Poles remained largely in defensive positions from that time.

On 9 November another change occurred within the Ukrainian high command, which was now entrusted to Col H. Stefaniv. He delivered a series of blows in the northern and southern parts of the city in order to break through the Polish front line. On 10 November the Ukrainian detachments attacked the building of the railway directory and then occupied the Ferdinand barracks. From 11 to 13 November a battle was waged for the village of Sokilnyky, and on 13 November the Ukrainian forces commenced an assault along the Vilka road. On 14 November an effective Ukrainian offensive on Zamarstyniv and Klepariv pressed hard on the Polish positions in the north. On 15 November another attack was launched against the Cadet School, and two days later the Polish front line in that region was temporarily broken.

In spite of local victories in such skirmishes the line of the front essentially did not change. On 18 November an armistice was signed, originally for two and then for three days. The Ukrainians tried to bring in auxiliary troops from Stanyslaviv, Ternopil, and Stryi, and the Polish authorities in Warsaw made final preparations for an operation intended to seize Lviv. That operation was entrusted to an assault group led by Major J. Stachiewicz, which on 11 November captured Peremyshl. On 20 November a Polish detachment commanded by Col M. Karaszewicz-Tokarzewski (consisting of 140 officers, 1,228 soldiers, and 8 artillery guns) reached Lviv. On 21 November it began an assault with the intention of encircling the Ukrainians. Though repelled, the assault persuaded Col Stefaniv to order a retreat, and most of the detachments left town at night. The next day Lviv was in Polish hands, although Ukrainians surrounded the city on three sides.

Novgorod the Great (Novgorod Velikii). A city-state in northern Rus' from the 12th to the 15th century. According to some scholars (most notably M. Kostomarov) the town of Novgorod was established by local Slavs (the Ilmen Slovenes) who had migrated to the north from the middle Dnieper Basin. According to the Primary Chronicle *Varangians led by *Riuryk arrived there in 862. Novgorod's location on the *Varangian route to Byzantium determined its political and economic importance vis-à-vis Kiev and its relationship with the capital of the Rus' state. Traders from Novgorod did extensive business in Kiev and had their own district and church there. Kiev's architecture was copied in Novgorod, as is most evident in the similarity of the St Sophia cathedrals in the two cities. The style of the Novgorod chronicles, distinctive in its own right, also displays obvious Kievan influences. Christianity was introduced in Novgorod via Kiev. In spite of initial resistance by the local population to the new religion Novgorod soon became an important religious center and eparchial see (the most notable bishop was Luka *Zhydiata) within Kiev metropolity. From 1156 it had its own archbishop.

For the first few centuries Novgorod was ruled by Prince *Ihor and his dynasty. Before they became grand princes of Kiev, both *Volodymyr the Great and his son *Yaroslav the Wise were princes of Novgorod. Yaroslav was succeeded in Novgorod by his son, Volodymyr. Eventually Novgorod principality came to be ruled by the descendants of Volodymyr Monomakh. Novgorod's political and economic interests, rapid growth, and distance from Kiev gradually brought about local opposition to Kievan rule. Such opposition was evident in the 11th century, when Yaroslav the Wise refused to pay tribute to his father in Kiev and Kosniatin (Kostiantin) Dobrynich (Yaroslav's cousin and the viceroy in Novgorod) pursued an obviously anti-Kievan course of action. Vsevolod Mstyslavych, Monomakh's grandson and the son of Mstyslav I Volodymyrovych the Great, was the last prince of the Kievan dynasty in Novgorod (1118–36) to interfere in Novgorod's affairs. The city revolted against his rule and achieved its political independence as a feudal republic in 1136. The supreme governing authority of the city became the *veche* (Ukrainian: **viche*), and the *posadnik* became an elected mayor rather than a viceroy appointed by the prince. In practice the city was run by the local boyars and wealthy merchants. The arrangement was formalized in the 14th century, when a council of representatives of the most powerful boyar families chaired by the archbishop was established to administer the city.

The Tatar invasion of Europe in 1239–40 did not reach Novgorod the Great, but the city was compelled to recognize the suzerainty of the Golden Horde and to pay tribute

to its khan. Relative independence from the Tatar yoke allowed the city to develop and prosper considerably by exploiting the neighboring satellites and colonies and engaging in European trade, particularly with the Hanseatic League. A greater threat to the republic in the long term emerged with the rise of Muscovy. Novgorod attempted to stem the growing Muscovite influence and encroachments by allying itself with the Grand Duchy of Lithuania and even electing a Lithuanian-Ruthenian appanage prince from Kiev, *Mykhailo Olelkovych, as its prince in 1470. Those efforts ultimately proved fruitless, as the Muscovite prince Ivan III annexed much of the republic's territory in 1471 and then forced the city, through sheer terror, to recognize Moscow's suzerainty.

Novhorodka. V-13. A town smt (1990 pop 7,100) and raion center on the Kamianka River in Kirovohrad oblast. A settlement known as Kutsivka *khutir* was founded in 1770 on the territory that belonged at that time to the Zaporozhian Sich. Most of its inhabitants were former serfs from the Poltava region. In 1822 Kutsivka was renamed Novhorodka. Today the town has a mineral-water bottling factory, a mixed-feed factory, and a granite quarry.

Novhorod-Siverskyi [Novhorod-Sivers'kyj]. I-14. A city (1990 pop 15,600) on the Desna River and a raion center in Chernihiv oblast. According to archeological evidence it was founded in the 980s. It is first mentioned in the chronicles under the year 1044, and the Laurentian Chronicle lists it as the center of the Siversk principality in Kievan Rus'. One of its rulers was *Ihor Sviatoslavych, the central figure of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign). In 1356 Novhorod-Siverskyi was annexed by Lithuania, and in 1503 by Russia. In 1620, while under Polish rule (1618–54), it obtained the rights of *Magdeburg law. Under the Hetman state it was a company center in Nizhen (until 1663) and then Starodub (until 1781) regiments. Within the Russian Empire it was the capital of Novhorod-Siverskyi vicegerency (1782–96) and then a county center in Little Russia and Chernihiv gubernias. In the 17th and 18th centuries the Novhorod-Siverskyi Transfiguration Monastery and the town's gymnasium played an influential role in Ukraine's religious and cultural life. Today the city is a railway junction and a river port. It produces asphalt, construction materials, dairy products, and cotton fabric. Its many architectural monuments include the Dormition Church (1671–1715) and its bell tower (1820), the wooden St Nicholas's Church (1760), the monastery complex (11th–17th centuries), and the Transfiguration Cathedral (1791–6), which stands on the ruins of the 12th- to 13th-century cathedral. There are also

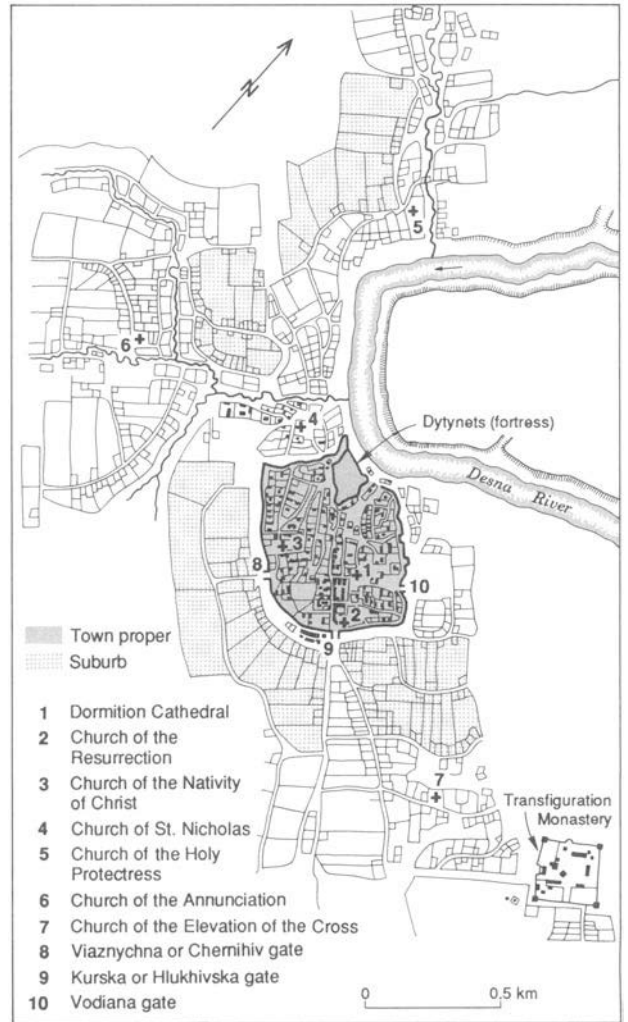

Novhorod-Siverskyi. Clockwise, from upper left: the Dormition Cathedral (late 17th to early 18th century), building of the former gymnasium for women, market stalls and warehouses (late 18th to early 19th century), 19th-century building, and St Nicholas's Church (mid-18th century)

several buildings in the classical style: the triumphal arch (1786), the gymnasium (1808), and an early 19th-century trading mall.

Novhorod-Siverskyi archeological site. An Upper Paleolithic rock shelter located on the banks of the Desna River in Novhorod-Siverskyi, Chernihiv oblast. Discovered in 1933 and excavated in 1935–8 and 1954, the site revealed a typical Upper Paleolithic flint tool assemblage. Three unusually large (33.9, 44, and 45.4 cm) pieces are believed to have been used to cut animal bones. Also recovered were a large mammoth rib (59.5 cm) decorated with linear inscriptions, skull fragments, and animal bones.

Novhorod-Siverskyi Gymnasium (Novhorod-Siverska himnaziia). One of the older institutions of secondary education in Ukraine, located in Novhorod-Siverskyi, now in Chernihiv oblast. It was founded in 1804 on the basis of the main public school, which had been opened in 1789. The gymnasium was opened on the initiative of the Novhorod-Siverskyi patriotic circle, a group of Ukrainian autonomists in Novhorod-Siverskyi in the late 18th century whose agenda highlighted education. The gymnasium was a center of advanced learning for Chernihiv gubernia for many years. Its first director, I. Khalansky, was succeeded by I. Tymkovsky. The gymnasium produced many important graduates, including M. Maksymovych,

NOVHOROD-SIVERSKYI

K. Ushinsky, P. Zabolotsky-Desiatovsky, P. Kulish, and M. Kybalchych. After the Revolution of 1917 the gymnasium was transformed into a regular secondary school.

Novhorod-Siverskyi patriotic circle. A network of Ukrainian noble autonomists in Novhorod-Siverskyi vicegerency in the late 18th century. Its members and associates included A. Hudovych, T. *Kalynsky, I. *Khalansky, A. *Khudorba, P. *Koropchevsky, O. *Lobysevych (one of the leaders), *M. Myklashevsky, H. *Poletyka, A. *Rachynsky, Bishop V. *Shyshatsky, F. *Tumansky, M. *Znachko-Yavorsky, H. Dolynsky, S. Shyrai, and A. Pryhara. Most were graduates of the Kievan Mohyla Academy and foreign universities. The circle's goals were the revival of an autonomous Ukrainian state and the rebirth of Ukrainian culture.

The activities of the members have not been thoroughly researched, but they were far-reaching. The members propagated the idea of Ukrainian independence, disseminated publicistic works (eg, the speeches of Hetmans P. Polubotok and I. Mazepa), and supplied foreign scholars (eg, N.-G. *Le Clerc and J.-B. *Scherer) with information about Ukrainian history and concerns. They championed

the rights of the Ukrainian nobility and Cossacks, engaged in foreign diplomacy (V. *Kapnist's secret mission in Berlin in 1791 was probably connected with their aims), and took an interest in organizing Ukrainian armed forces (involvement in the Ukrainian carabineer regiments and V. Kapnist's 1788 proposal for reviving the Cossack regiments) with the ultimate goal of fighting Russian domination.

The members also took an interest in education (plans to establish a gymnasium and a proposal for a university in Novhorod-Siverskyi) and scholarship (Tumansky's proposal for a Ukrainian academy of sciences – the 'Academic Convention') and collected and prepared for publication materials and writings on the Hetman state (by Poletyka, Tumansky, Khudorba, and Pryhara, and Ya. *Markovych's *Zapiski o Malorossii* [Notes on Little Russia]), the Ukrainian language (Tumansky's 1793 dictionary), and Ukrainian literature (Lobysevych's poetry and plans to publish Ukrainian baroque works).

Few of the circle's plans and projects were realized. Their ideas and activities, however, had an influence in Ukraine in the first quarter of the 19th century even beyond the Novhorod-Siverskyi region.

O. Ohloblyn

Novhorod-Siverskyi Press (Novhorod-Siverska drukarnia). An imprimery founded and funded by Archbishop L. Baranovych in 1674 at the Novhorod-Siverskyi Transfiguration Monastery. It published the polemic and moralizing works of L. Baranovych and I. Galiatovsky, the *Antolohion*, O. Buchynsky's poem 'Chyhyryn ...' (1677), about the heroic defense of the city from Turkish and Tatar armies, and primers and other educational texts. In 1679 it was moved to Chernihiv and was reorganized into the *Chernihiv printing press.

Novhorod-Siverskyi principality. See Siversk principality.

Novhorod-Siverskyi Transfiguration Monastery (Novhorod-Siverskyi Spaso-Preobrazhenskyi manastyr). A men's monastery on the bank of the Desna River in southeastern Novhorod-Siverskyi, believed to have been founded in 1033 by Prince Mstyslav Volodymyrovych of Tmutorokan. The first mention of the monastery is found in a 1552 charter of Ivan the Terrible, written when the city was under Muscovite rule. From the first half of the 17th century the monastery was headed by an archimandrite. In 1635, under Polish rule, it was given to the Jesuit order, but it reverted to Orthodoxy following the outbreak of the Cossack-Polish War in 1648. From 1657 to 1672, while serving as the archbishop of Chernihiv, L. Baranovych resided at the monastery. He had new buildings erected and established the *Novhorod-Siverskyi Press. Baranovych also acquired more properties for the monastery, so that in the 18th century it owned approx 6,000 serfs. From 1785 to 1799 I. Kondratkovsky, the bishop of Novhorod-Siverskyi and Hlukhiv, resided at the monastery. He closed down *Pereiaslav College and in its place created a theological seminary at the monastery. The seminary's first rector was V. *Shyshatsky. In 1908 the monastery housed 38 monks.

Under Soviet rule the monastery was secularized and transformed into a cultural-historical preserve. Its central attractions are the monastery's second Transfiguration

Entrance and campanile of the Novhorod-Siverskyi Transfiguration Monastery

Cathedral, designed in the classical style by G. Quarenghi and built with five cupolas in 1791–6; the 16th- to 17th-century cruciform, one-cupola St Peter and Paul Church; and the monastery's main gate, with three entrances, arches, and an octagonal belfry, built in the baroque style in the late 17th century. Many prominent 18th- and 19th-century statesmen and cultural figures (eg, Count O. Rozumovsky, Archbishop Shyshatsky) were buried at the monastery.

O. Ohloblyn

Novhorod-Siverskyi vicegerency (Novhorod-Siverske namisnytstvo). One of three Russian *vicegerencies created in Left-Bank Ukraine in 1782 after the abolition of the administrative-territorial regiments of the Hetman state. The vicegerency's capital was Novhorod-Siverskyi. Its territory replaced that of *Starodub regiment and parts of Chernihiv and *Nizhen regiments. It was divided into 11 counties: Hlukhiv, Konotip, Korop, Krolevets, Mglin, Novhorod-Siverskyi, Novoe Mesto, Pohar, Starodub, Sosnytsia, and Surazh. In 1782 the vicegerency had 11 cities, 22 towns, and 2,186 villages and other settlements, with a total male population of 371,046. In 1797 it was abolished, and its territory became part of *Little Russia gubernia. A detailed description of the vicegerency's population and settlements, prepared in 1779–81 by a commission headed by A. Myloradovych, was edited by P. Fedorenko and published by the VUAN Archeographic Commission in 1931.

Novhorodske [Novohorods'ke]. V-18, DB III-3. A town smt (1990 pop 13,200) on the Kryvyi Torets River in Donetsk oblast, under the administration of the Dzerzhynske municipal council. It arose at the end of the 18th century and was called Niu Iork (New York) until 1951. Novhorodske is the home of an erosion research station, a machine-building plant, and a brick factory.

Novi dni

Novi dni (New Days). A monthly magazine established in Toronto in 1950 by P. *Volyniak. It was edited by him until his death in 1969, and since that time it has been edited by an editorial board headed by D. Kyslytsia (1969–76), V. Svaroh (1977–8), and M. Dalny (since 1978). Prose, poetry, literary reviews, publicism, obituaries, memoirs, biographical notes, and news and analyses of developments in Ukraine and among Ukrainian émigrés have appeared in each issue. The magazine's polemical articles have been critical of both the USSR and undemocratic tendencies in the Ukrainian émigré community. Many prominent émigré writers living in Canada, the United States, and Australia have been contributors.

Novi poezii

Novi poezii (New Poetry). An annual publication of the *New York Group of writers which appeared from 1959 to 1979. It contained original and reprinted poetry, mostly by members of the group and other émigré writers (such as V. Lesych, Yu. Kolomyiets, V. Barka, and M. Carynnyk), which was illustrated by member artists. The journal also published translations from English, German, Italian, and especially Spanish, including poems by M. Hernandez, F.G. Lorca, L. Simpson, P. Neruda, J. Jiménez, and others.

Novi shliakhy

Novi Sad. The capital (1981 pop 170,000) of the autonomous region of Vojvodina in Serbia, and the leading cultural center (1971 Ukrainian pop over 6,000) for the Ukrainians in Bačka and Srem. Ukrainians began to settle in Novi Sad in 1765, many of them from Ruski Krstur and Ločura. In 1780 a Greek Catholic parish was established there, and in 1817 work began on the SS Peter and Paul Church. Novi Sad's Ukrainian cultural and enlightenment society has been active since 1919. Today it boasts a choir, a dance ensemble, and a nationally recognized drama group, Diadia. The weekly *Ruske slovo*, the literary and artistic quarterly *Shvetlosty*, and the children's monthly *Pyonerska zahradka* have been published in Novi Sad since 1967. A program in the Bačka-Ukrainian dialect has been broadcast by local radio since 1949. The library of the Serbian Matica has a Ukrainian-Bačka department. The Sisters Servants of Mary Immaculate founded a convent in Novi Sad in 1956, which was followed by one for the Basilian order of nuns in 1961. As the Ukrainian community expanded after the Second World War, the city replaced Ruski Krstur as the major Ukrainian cultural and educational center in the region.

Novi Sanzhary [Novi Sanžary]. IV-15. A town smt (1990 pop 9,200) on the Vorskla River and a raion center in Poltava oblast. Archeologists have uncovered the remains of a Scythian settlement from the 3rd to 4th centuries BC at the site of the town. The name Sanzhary is of Turkish origin. Novi Sanzhary was founded in the first half of the 17th century. It grew rapidly when B. Khmelnytsky allowed peasants from Right-Bank Ukraine to settle on the hetman's properties along the banks of the Psol, the Sula, and the Vorskla rivers. Novi Sanzhary witnessed many battles during the Cossack-Polish War. Historically the town was a center of the tanning industry. By 1699 a gunpowder factory had been built there. Today the town produces leather, furniture, and bricks.

Novi shliakhy (New Roads). A Sovietophile literary, cultural, and political monthly published in Lviv from 1929 to 1932 and edited by A. *Krushelnytsky. Among the contributors were the Western Ukrainian writers A. and I. Krushelnytsky, V. Bobynsky, P. Derkach, F. Fedortsiv, Ya. Halan, Ya. Kondra, Yu. Kosach, S. Levynsky, and I. Mykhailiuk and the Soviet Ukrainian writers M. Burachek, P. Kozytsky, Y. Shevchenko, and M. Smuzhka (A. Ryndiuh). The journal contained Soviet literary works, both Ukrainian and Russian (translated mostly by S. Shchurat). In 1930 it had a print run of 2,500 copies. It was subject to severe censorship, and issues were often confiscated by the Polish authorities. After the journal was closed down by them, Krushelnytsky published four issues of a journal called *Krytyka* (April–July 1933).

Novi vydannia URSSR (New Publications of the Ukrainian SSR). A bibliographic bulletin published three times a month in Kharkiv by the Book Chamber of the Ukrainian SSR from 1958. Until 1974 it was called *Novi knyhy URSSR*. It lists all new books, booklets, musical scores, posters, photo albums, and postcards published in Ukraine and provides separate indexes to them. In 1983 it had a circulation of approx 18,000.

Novikov, Mikhail, b 1777, d ca 1822–5. Participant in the *Decembrist movement. After a career of military ser-

vice he became (1816) chancery director for the governor-general of Little Russia, N. Repnin, in Poltava. He helped to establish a regional branch of the Union of Salvation and later headed its successor body, the Union of Welfare. He was the author of the first republican-minded constitution of the Decembrist movement. Novikov also established the Love of Truth Masonic lodge in Poltava in 1818.

Novikov, Mykola, b 17 May 1925 in Kiev. Ballet dancer, ballet master, and pedagogue. In 1948 he completed study in the ballet studio at the Kiev Theater of Opera and Ballet; he then worked there as a soloist and, from 1972, the ballet master. In 1967 he began teaching at the Kiev Institute of Theater Arts.

Novikov, Sergei, b 15 December 1949 in Moscow. Judo champion. A member of the Kiev Dynamo sports society, he won the 1976 Olympic gold medal in judo (heavy-weight class) and was the 1973 New York, 1976 European, and 1974–8 USSR champion.

Noviny (News). One of the first Ukrainian-language newspapers, published semiweekly in Lviv from January to April 1849. Edited by I. *Hushalevych, it devoted considerable attention to political developments in the Austrian Empire and abroad. Twenty-six issues appeared before Hushalevych closed the paper and began to publish **Pchola*.

Novoaidar [Novoajdar]. V-20, DB II-6. A town smt (1990 pop 8,400) on the Aidar River and a raion center in Luhanske oblast. It was founded in the second half of the 17th century by the Don Cossacks. Its inhabitants took part in K. Bulavin's popular revolt in the early 18th century. Today the town has a food industry.

Novoarkhanhelske [Novoarxanhel's'ke]. V-11. A town smt (1990 pop 8,300) on the Syniukha River and a raion center in Kirovohrad oblast. The settlement was founded in 1742 and was called Arkhanhel-horodok until 1764. Today the town has a cheese factory, a brick factory, and a hydroelectric station.

Novoazovsk. See Novoozivske.

Novocherkassk [Novočerassk]. VI-21. A city (1989 pop 187,000) on the Tuzliv River in Rostov oblast, RF. It was founded in 1805 as an administrative center of Don Cossack province. According to the census of 1926, Ukrainians represented 12 percent of the city's population.

Novodarivka [Novodarjivka]. A town smt (1990 pop 5,200) in Luhanske oblast, under the administration of the Rivenky municipal council. The town was founded ca 1877 and called Darivka until 1932. Today it has a gas compression station, an asphalt plant, and an aggregate factory.

Novodonetske [Novodonec'ke]. V-18, DB II-2. A town smt (1990 pop 6,800) in Dobropillia raion, Donetske oblast. It was founded in 1956 and granted smt status in 1960. Coal mining and furniture making are the major industries there.

Novodruzheske [Novodružes'ke]. V-19, DB II-4. A city (1990 pop 11,200) on the Donets River in Luhanske oblast, administered by the Lysychanske municipal council. It was founded in 1935 with the opening of a coal mine, and attained city status in 1963. Today two coal mines and a brewery are located there.

Novodvorsky, Ivan [Novodvors'kyj], b 1890, d 1942? Lawyer and civic and political leader. He practiced law in Kolomyia and was active in the Ukrainian Radical party, where he held executive positions (including that of vice-president) from 1924. He was arrested by the Soviets in 1939, and disappeared in prison.

Novoekonomichne. See Dymytrov.

Novoheorhiievskje. See Svitlovodske.

Novohrad-Volynskyi [Novohrad-Volyns'kyj]. III-8. A city (1990 pop 56,500) on the Sluch River and a raion center in Zhytomyr oblast. It is first mentioned in the Hypatian Chronicle under the year 1257 as the town of Zviahel (Vzviahl, Vozviahl). In 1340 it was annexed by Lithuania, and in 1569, transferred to Poland. In 1793 it was taken by Russia, and in 1795 it was given its present name. Today the city produces agricultural machinery, building materials, beer, and furniture. Lesia *Ukrainka was born and spent her childhood in Novhorad-Volynskyi. A memorial museum has been established there in her honor. Of the castle built by K. Ostrozky in 1507, only remnants of the walls and one tower are left.

Novohrodivka. V-18, DB III-2. A city (1990 pop 19,400) in Donetske oblast, under the administration of the Selydove municipal council. It was founded as a coal-mining settlement in 1939, and attained city status in 1958. It has four coal mines and an enrichment plant.

Novoiavorivske [Novojavorivs'ke]. IV-4. A city (1990 pop 25,200) in Yavoriv raion, Lviv oblast. It was founded in 1965, and attained city status in 1986. It produces reinforced-concrete structures. Nearby is the Sirka manufacturing consortium.

Novokhopersk [Novoxopersk]. II-22. A town and raion center (1959 pop 8,900) in Voronezh oblast, RF. A fortress was built at the site in 1710, and the town became a county center in Tambov vicegerency in 1779 and Voronezh gubernia in 1802. According to the census of 1926, Ukrainians accounted for 45 percent of the raion population.

Novokursnyky. See Russophiles.

Novolypivske settlement. A *Cherniakhiv culture settlement near Chapaivka, Zolotonosha raion, Cherkasy oblast. The site was excavated in 1957–8, then flooded by the Kremenchuk Reservoir in 1959. Eighteen surface structures (including both living quarters with clay ovens and storage facilities), four semi-pit storage structures, an iron-making workshop, and thrown pottery were found at this site. Remains of early Slavic storage pits were also unearthed.

Novomoskovskje [Novomoskovs'ke]. V-16. A city (1990 pop 76,200) on the Samara River and a raion center in Dni-

The Trinity Cathedral in Novomoskovske

propetrovske oblast. A Cossack settlement was established at the site in the second half of the 16th century, and eventually it became known as Novoselytsia (or Samarchyk). In 1784 the village was raised to city status and renamed Novomoskovske. From 1796 it was a county town in New Russia gubernia, and from 1802 it was part of Katerynoslav gubernia. Today it manufactures large pipes used for gas and oil pipelines, reinforced-concrete structures, and furniture. It is the home of the famous nine-domed Trinity Cathedral, constructed of wood by Ya. *Pohrebniak in 1773–81.

Novomoskovske Pipe Plant (Novomoskovskyyi trubnyi zavod). An enterprise of the metallurgical industry in Novomoskovske, Dnipropetrovske oblast. Built in 1932–5, it produced sheet tin and steel and galvanized plating before the Second World War. The machinery was evacuated at the outset of the war, and the plant was completely rebuilt afterward. Since 1961 it has specialized in the making of electroplated pipes and enameled and galvanized plates.

Novomykolaivka [Novomykolajivka]. VII-16. A town smt (1990 pop 6,100) on the Verkhnia Tersa River and a raion center in Zaporizhia oblast. It was founded in the last quarter of the 18th century and was called Kocherezhyky until 1813. Today it has several enterprises of the food industry.

Novomyrhorod. V-12. A city (1990 pop 16,200) on the Velyka Vys River and a raion center in Kirovohrad oblast. It was founded in 1740 by Zaporozhian Cossacks of the

Myrhorod Regiment at the site of an ancient settlement from the Bronze Age. Then it was settled by peasants, mostly from the Myrhorod region. In 1752–64 Novomyrhorod was a center of New Serbia, and from 1803 it was part of Kherson gubernia. In 1959 the town of Zlatopil and the villages of Vynohradivka and Katerynivka were amalgamated with Novomyrhorod. Today the city manufactures bricks, ceramics, leather, preserves, furniture, and construction materials. It has a coal mine. Its famous St Elijah's Church, built in 1786, is a tourist attraction.

Novooleksiivka [Novooleksijivka]. VII-15. A town smt (1990 pop 10,700) in Henicheske raion, Kherson oblast. It sprang up in the 1890s during the construction of the Lozova–Symferopil railway line and attained smt status in 1938. Today the town has a fruit-canning factory, bakery, and corn research station.

Novoozivske [Novoozivs'ke] (aka Novoazovske). VI-19. A city (1990 pop 13,000) at the mouth of the Hruzkyi Yelanchyk River and a raion center in Donetsk oblast. It was founded in 1849 as a Cossack outpost named Novomykolaivske. From 1923 to 1959 the town was called Budonnivka. In 1963, after being renamed, it was granted city status. Today Novoozivske produces dairy products, asphalt, concrete, and bricks.

Novopokrovka settlement and burial site. A *Cherniakhiv culture settlement and burial ground located near Novopokrovka, Chuhuiv raion, Kharkiv oblast. Excavations in 1936 and 1949 revealed approximately 20 cremated burials as well as the remains of wood-frame clay dwellings and a forge.

Novopskov. IV-20. A town smt (1990 pop 9,100) and raion center at the confluence of the Aidar and the Kamianka rivers in Luhanske oblast. Until 1829 it was called Zakamianka. It arose in the first half of the 17th century and was populated by Ukrainian and Russian serfs who had escaped from their landlords. In 1707 an army detachment was sent there to capture them and return them to their masters, and in 1708 Peter I ordered the town to be burned down. The town participated in K. Bulavin's rebellion, after which it became part of Ostrohozke regiment. From 1802 the town was part of Voronezh gubernia. Today Novopskov produces butter, bread, and animal feed.

Novopylypivka kurhans. A group of 13 burial mounds near Novopylypivka, Melitopol raion, Zaporizhia oblast. Excavations in 1934–5 and 1951–2 produced evidence of 70 burials. The majority of the burials were identified as *Pit-Grave culture but examples of Catacomb, *Timber-Grave, and Sarmatian burial practices, also were uncovered.

Novoraiske refractory-clay deposit. A clay field located in Kostiantynivka and Slovianske raions, in Donetsk oblast, covering an area of 32 sq km. With reserves of 60 million t, it is the largest such deposit in Ukraine. It was discovered in 1930 and has been exploited by open-pit mining since 1959. The clay seams are 0.1–6.5 m wide and 0.2–56 m deep and are composed primarily of kaolinite, quartz, and silicates. The clay is resistant to temperatures of 1,580–1,750°C. It is used in the metallurgical,

porcelain and white ware, glass, petroleum, and other industries.

Novorossiisk [Novorossiisk]. IX-18. A city (1989 pop 186,000) on Tsemeska Bay in the Black Sea, in Krasnodar krai, RF. It was founded in 1838 as a fortress, and with the development of a cement industry later in the century it gained economic importance. Until the revolution its port was second only to the one in Odessa; the main exports were grain and naphtha. According to the census of 1926, Ukrainians accounted for 22.8 percent of the city's population.

Novorozanivka kurhan. A Scythian burial ground from the 5th century BC near Novorozanivka, Novyi Buh raion, Mykolaiv oblast. Excavations in 1967 revealed the remains of a Scythian warrior in full armor with his sword, quiver, arrows, spear tips, and bone-handled knife present beside him. The remains of a horse were also recovered in the chamber.

Novoselivka glass-sand deposit. A major sand deposit, located near Novoselivka, Nova Vodolaha raion, Kharkiv oblast. It was surveyed in 1932 and has been exploited since 1936. The sand is 6.8 to 17.5 m deep. It is considered to be the best sand in Ukraine and is used in the glass industry in Ukraine and elsewhere in the former USSR.

Novoselytsia [Novoselycja]. V-7. A town (1990 pop 8,400) on the Prut River and a raion center in Chernivtsi oblast. It was first mentioned in historical documents in 1456, as Shyshkivtsi; it was renamed in 1617. Under the Peace Treaty of *Küçük Kaynarca, Novoselytsia was divided between Austria and Turkey. With the signing of the *Bucharest Peace Treaty of 1812 the Turkish (eastern) part of the town, along with Khotyn county, was acquired by Russia. As a border town Novoselytsia became an important trade and transportation center, especially after the construction of a railway line in 1884. By 1870 the town had steam mills, a distillery, and a leather and a paint factory. In the interwar period Novoselytsia was occupied by Rumania, and in 1940 it was annexed by the Ukrainian SSR. Today it produces liquor, canned food, furniture, and reinforced-concrete structures.

Novoselytsia kaolin deposit. A major kaolin deposit, located near Novoselytsia, Katerynopil raion, Cherkasy oblast. Kaolin has been mined there since the early 20th century. The deposit was surveyed in 1936. The kaolin is found at a depth of 25–63 m. It is used for making refractory products and in porcelain ware.

Novosiletsky, Roman [Novosilec'kyj], b 8 March 1926 in Potylych, Rava Ruska county, Galicia. Geologist. He graduated from the Lviv Polytechnical Institute in 1953. He then joined the Ukrainian Scientific Research Institute of Geological Prospecting and was appointed department head in 1971. His work deals with the genesis of natural gas and petroleum and the geological conditions under which they are formed.

Novosilka Kostiukova. A multi-occupational archeological site near Novosilka, Zalishchyky raion, Ternopil oblast. Excavated in 1925–31 by T. Sulimirski, Ya. Paster-

nak, and others, it revealed Upper Paleolithic, Trypilian, Bilohrudivka, Cherniakhiv, and early Slavic remains.

Novosivsky, Ivan [Novosivs'kyj], b 28 August 1902 in Ispas, Vyzhnytsia county, Bukovyna, d 12 February 1988 in New York. Jurist; member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences. After graduating in law from Chernivtsi University (1925) he served as a district judge in Rumanian-ruled Bessarabia and Bukovyna. Having left Ukraine after the Second World War, he received an LLD from the Ukrainian Free University in Munich (1949) and settled in New York, where he worked as a notary public. He was active in the Association of Ukrainian Lawyers and the Association of Ukrainian Bukovynians in America. In addition to legal articles he wrote two chapters for *Bukovyna: ŭi mynule i suchasne* (Bukovyna: Its Past and Present, 1956).

Novotroitske [Novotrojic'ke]. VI-18, DB IV-3. A town smt (1990 pop 9,900) on the Sukha Volnovakha River in Volnovakha raion, Donetsk oblast. It was founded in 1773 by settlers from the Don and Poltava regions and it was granted smt status in 1938. Today limestone and chalk are extracted and processed there. Fragments of Scythian sculptures have been found in the vicinity.

Novotroitske [Novotrojic'ke]. VII-15. A town smt (1990 pop 12,600) and raion center in Kherson oblast. The town was founded in the 1860s at the site of Sarabulat village. It was referred to by both names until the early 20th century. The town has a beautiful central quarter.

Novotroitske fortified settlement. An early Slavic fortified settlement of the 8th to 10th century AD along the Psol River near Novotroitske (now part of Prystailove), Lebedyn raion, Sumy oblast. Excavations by I. Liapushkin in 1952–4 uncovered the remains of a settlement which had been razed by the Pechenegs early in the 10th century. The remains of 50 semi-pit dwellings with clay exteriors were found at the site, along with approx 100 agricultural structures and workshops. Excavations also revealed a wide range of agricultural implements, forestry, fishing, and trapping equipment, pottery (mainly hand-thrown), bronze and silver jewelry, and a cache of Arab coins.

Novoukrainka [Novoukrajinka]. V-12. A city (1990 pop 20,500) on the Chorny Tashlyk River and a raion center in Kirovohrad oblast. In 1754 the Russian fortress of Pavlovsk (Novopavlovsk in 1764–73) was built on territory belonging to the Zaporozhian Sich. In 1769 the fortress and the settlement around it were destroyed by the Tatars. The rebuilt settlement was renamed Novoukrainka in 1830 and was granted city status in 1938. Today it has several large enterprises of the food and building-materials industries.

Novovolynske [Novovolyns'ke]. III-5. A city (1990 pop 55,800) of oblast subordination in Volhynia oblast. It was founded in 1950 as an industrial center of the *Lviv-Volhynia Coal Basin and was granted city status in 1957. It has six coal-processing plants, a specialized equipment-building factory, three construction-materials plants, several food-processing enterprises, and a cotton mill.

Novovorontsovka [Novovoroncovka]. VI-14. A town smt (1990 pop 7,300) on the right bank of the Kakhivka Reservoir and a raion center in Kherson oblast. It was founded ca 1895 by Zaporozhian Cossacks and was known first as Mykolaivka. In 1821 the village was acquired by Prince M. Vorontsov and renamed Vorontsovka. Because of its location on the Dnieper River it became a local trading center in the 19th century. Today there are several enterprises of the food industry in the town.

Novozybkov. I-12. A city (1959 pop 24,700) and raion center in Briansk oblast, RF. It was founded in 1701 as Zybkaia settlement in the territory of Starodub regiment. According to the census of 1926, 13.9 percent of the city's population was Ukrainian.

Leonid Novychenko

Novychenko, Leonid [Novyčenko], b 31 March 1914 in Rusanivka, Hadiache county, Poltava gubernia. Literary scholar and critic; full member of the AN URSR (now ANU). He graduated from Kiev University in 1939 and worked in an editorial capacity on various literary journals. He was secretary of the executive of the Writers' Union of the USSR (1959–86) and of the Writers' Union of Ukraine (elected in 1966). Since 1949 he has worked at the Institute of Literature of the ANU. He began publishing in his field in 1939. His works include *Pavlo Tychyna* (1941), *Povist' pro poeta: Liryka M. Ryl's'koho* (The Story of a Poet: The Lyric Poetry of M. Rylsky, 1942), *Tvorčist' Pavla Tychyny* (The Works of P. Tychyna, 1949), *Poeziia i revoliutsiia* (Poetry and Revolution, 1956), *Shevchenko i suchasnist'* (Shevchenko and the Present, 1964), *Poetychnyi svit Maksyma Ryl's'koho, 1910–1941* (The Poetical World of M. Rylsky, 1910–41, 1980), and *T. Shevchenko – poet, borets', liudyna* (T. Shevchenko, Poet, Fighter, Human Being, 1982). Novychenko also wrote studies of the work of M. Irchan, L. Pervomaisky, and others, assisted in the preparation of curricula for Ukrainian literary history, and wrote in the official vein a number of works on the theory of *socialist realism. They include *Pro riznomanitnist' khudozhnikh form i styliv u literaturi sotsialistychnoho realizmu* (On the Many Different Artistic Forms and Styles in Socialist-Realist Literature, 1959) and *Ne iliustratsiia – vidkryttia!* (Not Illustration, Revelation!, 1967). In the 1950s and 1960s he welcomed the works of the **shestydesiatnyky* but came out against the rehabilitation of victims of the Stalinist terror of the 1930s, particularly that of M. Khvylovy and M. Ze-

rov. Editions of his selected works have appeared in Ukrainian (1974; 1983; 2 vols, 1984) and Russian (1985).

I. Koshelivets

Novyi Buh [Novyj Buh]. VI-13. A city (1990 pop 17,600) and raion center in Mykolaiv oblast. In the second half of the 18th century a settlement arose known as Kutsa Balka, after the Cossack Ya. Kutsy. In the early 19th century it was merged with several other settlements to form a town called Semenivka, Novapavlivka, and finally (in 1832) Novyi Buh. Today the city's factories produce cheese, canned goods, bread, mixed feed, footwear, furniture, and clothes.

Novyi chas (New Time). A newspaper published from October 1923 to September 1939 in Lviv. It appeared twice a week to 1925, three times a week from 1926, and daily except Sundays from 1932. Initially funded by the underground Ukrainian Military Organization, from the mid-1920s it was aligned with the Ukrainian National Democratic Alliance. From 1934 it was published by the Ukrainska Presa publishing house, owned by the longtime manager of *Novyi chas*, I. Tyktor. The newspaper became the most widely read Ukrainian daily in Galicia; in 1938 it had a circulation of 16,000. It published several supplements, a library of popular books, and an annual almanac (from 1931) and conducted fund-raising campaigns on behalf of Ukrainian children, the Hutsuls, and community institutions. The editors were D. Paliiv, M. Matchak, M. Konovalets, O. Bodnarovych, P. Sahaidachny, and Z. Pelynsky. Its foreign correspondents included Yu. Strutynsky, L. Mydlovsky, D. Katamai, and V. Kysilevsky.

Novyi kraj

Novyi kraj (New Country). An organ of the *Association of Canadian Ruthenian Farmers, published three times a month and then weekly in Rosthern, Saskatchewan, from August 1910 to February 1913. The paper provided practical advice for farmers and encouraged Ukrainian-Canadian farmers to form co-operatives. It also published reports on developments in Canada and Ukraine, in which it paid particular attention to the plight of the peasantry in Western Ukraine, and encouraged Ukrainian farmers to participate in the Canadian political process and support the Liberal party. *Novyi kraj* was published by P. Shvydky and edited by O. *Megas.

Novyi litopys (New Chronicle). A quarterly journal published in Winnipeg in 1961–5. It was closely aligned with the Ukrainian Orthodox Church of Canada and carried articles on religious topics and church history. It also

published book reviews and articles on a wide variety of historical, political, and cultural topics by D. Solovei, R. Klymkevych, P. Macenko, P. Kovaliv, S. Paramonov, V. Ivanys, V. Trembitsky, P. Odarchenko, L. Bykovsky, S. Sawchuk, and others. The editor of *Novyi litopys* was Yu. Mulyk-Lutsyk.

Novyi Oskol [Novyj Oskol]. III-18. A town (1979 pop 17,700) on the Oskil River and a raion center in Belgorod oblast, RF. It was founded in 1637 as a defensive outpost against Tatar invasion. It was named Tsareve Alekseeve in 1647 and was renamed Novyi Oskol in 1655. In 1779 it became a county center in Kursk gubernia. According to the Soviet census of 1926, Ukrainians accounted for 51 percent of the population of Novyi Oskol raion.

Novyi prolom (New Breakthrough). A Russophile newspaper published in Lviv twice a week in 1883-7 (a total of 564 issues). It was edited by Y. Markov and O. Avdykovsky (1883-4) and I. Pelekh (1884-7). A successor to **Prolom*, it contained articles on political, community, religious, economic, and educational affairs in Galicia. Because of their political content, nearly 90 issues of the paper were confiscated by the Austrian authorities. A similar fate befell *Chervonaia Rus'*, a paper that Markov published instead of *Novyi prolom* three times a week in 1888-91 (a total of 794 issues) and edited with Pelekh. It folded in April 1891 after a ban was imposed on it by Metropolitan S. Sembratovych. Instead, Avdykovsky began publishing the daily **Halyskaia Rus'*.

Novyi Rozdil [Novyj Rozdil]. IV-5. A city (1990 pop 29,700) in Mykolaiv raion, Lviv oblast. It was founded in 1953, when sulfur began to be mined in the area, and was granted city status in 1965. The city is the home of the Sirka Manufacturing Consortium and was one of the largest sulfur-mining centers in the USSR.

Novyi shliakh (New Pathway). A daily newspaper published in Kamianets-Podilskiy in 1919. It was edited by L. Biletsky and S. Shyshkivsky.

Novyi shliakh (New Pathway). A newspaper published since October 1930 in Edmonton, Saskatoon (1933-42),

Novyi shliakh

Winnipeg, and then Toronto (since 1974); the organ of the *Ukrainian National Federation of Canada (UNF). The paper appears weekly, although it was published three times and then twice a week from 1941 to the early 1950s. It contains articles on political affairs and on cultural and historical topics, and reports on the activities of the UNF and Ukrainian affairs in Canada. Generally it supports the positions of the OUN (Melnyk faction). The founder and longtime editor of *Novyi shliakh* was M. *Pohoretsky. V. Martynets, O. Ivakh, D. Kyslytsia, S. Rosokha, R. Malanchuk, P. Matsenko, A. Kurdydyk, V. Levytsky, A. Dobriansky, V. Skorupsky, Yu. Karmanin, and others have also served as editors or been regular contributors. At various times the paper included supplements devoted to the various constituent organizations of the UNF – the Ukrainian War Veterans' Association, the Ukrainian Women's Organization of Canada, and the Ukrainian National Youth Federation – some of which later became separate publications (eg, **Holos molodi* and **Zhinochyi svit*). Since 1977 the paper has also included the English-language monthly supplement *New Perspectives*. Its circulation is approx 7,000 (1988).

Novyi Svit [Novyj Svit]. DB IV-4. A town smt (1990 pop 9,900) on the Starobesheve Reservoir of the Kalmiush River in Starobesheve raion, Donetsk oblast. The town arose in 1954 with the construction of the Starobesheve Raion Power Station. It attained smt status in 1956. The town has a small food industry and a building-materials plant.

Novyi svit (New World). A monthly organ of the Self-Reliance Association of Ukrainian Americans, published in New York in 1950-9. It published articles on the co-operative and credit union movements and reports on the activity of the association. Its editors included P. Sahaidachny, V. Mudry, and R. Ilnytsky. In 1959 it merged with *Nash kontakt* to form *Nash svit*.

Novyi vik (New Era). The only Ukrainian newspaper in postwar Rumania, published in Bucharest monthly and then semimonthly from 1949 to 1989. Initially a relatively objective paper with articles on Ukrainian history and ethnography and developments in the Ukrainian community in Rumania and in Ukraine, it was subjected to increasingly strict censorship. Its first editor was V. Bilivsky, who was removed from his post in 1959 and sentenced to seven years' imprisonment for 'Ukrainian nationalism'; he was succeeded by M. Bodnia and then I. Kolesnyk. From 1979 a monthly supplement featuring works by Ukrainian writers in Rumania was published. The paper's pressrun was decreased steadily, from approx 7,000 in the 1960s to about 4,000 in the 1980s. After the overthrow of the Ceausescu regime, *Novyi vik* was succeeded in January 1990 by *Vil'ne slovo*, the organ of the new Union of Ukrainians of Rumania, edited by I. Petretska-Kovach and Yu. Lazarchuk.

Novyk, Kateryna, b 14 December 1898 in Katerynoslav, d 1 November 1984 in Kiev. Geologist and paleobotanist; corresponding member of the AN URSR (now ANU) from 1951. She graduated from the Dnipropetrovske Institute of People's Education in 1923 and then worked as a teacher. She joined the geology department of the Dnipropetrovske Mining Institute in 1928, and from 1934 she

worked at the ANU Institute of Geological Sciences, where she chaired a department (1945–70). She wrote several monographs and numerous articles dealing mostly with the stratigraphy and paleobotany of coal deposits in the European part of the former Soviet Union and the history of the geological sciences.

Novykov, Mykola, b 10 April 1932 in Kiev. Scientist in the areas of mechanics and the strength of materials; full member of the AN URSR (now ANU) since 1985. He graduated from the Kiev Polytechnical Institute (1954) and was appointed to the position of director of the ANU Institute of Superhard Materials (1977). He has made contributions in the areas of the strength of materials in mechanical oscillations at low temperatures, crystallography, composites, and superhard materials.

Novynska, Vira [Novyns'ka], b 1 August 1900 in Kiev, d 15 January 1982 in Kiev. Operetta actress (soprano). She grew up in an acting family and appeared on stage at the age of eight in D. Haidamaka's troupe. After working in Russian operetta theaters outside Ukraine, she joined the first Ukrainian operetta troupe in Kharkiv (1929) and then the Kiev Theater of Musical Comedy (1935; since 1967 the Kiev Operetta Theater). Among her roles were Sofiia in O. Riabov's *Vesillia v Malynivtsi* (The Wedding in Malynivka) and Parasia in Yu. Miliutin's *Trembita*.

Novyny (News). A newspaper published in Edmonton in 1913–22. It began to appear in January 1913 as the weekly organ of the National Association of Alberta. It later appeared twice and then three times a week before folding in late 1915. The paper was renewed in December 1917 by the People's Home in Edmonton. It appeared weekly and then semiweekly before expiring in January 1922. Perhaps the most professional Ukrainian-Canadian paper of the time, *Novyny* reported on world-wide political developments, concentrating on Ukraine and Canada. It strongly supported the bilingual schools in the prairie provinces and devoted considerable attention to the practical problems facing Ukrainian-Canadian farmers. The paper did much to encourage the development of Ukrainian consciousness. It criticized Russophiles in Canada and very early stopped using the term 'Ruthenian' in favor of 'Ukrainian.' The publisher and editor of *Novyny* was R. *Kremer.

Novyny (News). A daily organ of the UNR Ministry of Press and Propaganda, published in Kamianets-Podilskiy in 1919.

Novyny (News). A daily organ of the Kolomyia branch of the Central Bureau of the Directory of the UNR, published in 1919 in Kolomyia.

Novyny kinoekranu (Film Screen News). A semimonthly magazine, published in 1925–31 in Kharkiv and edited by M. Bazhan, Yu. Yanovsky, D. Falkivsky, and O. Dovzhenko. It reappeared briefly in 1936–8. In 1961 it was revived as a monthly supplement to *Mystetstvo* in Kiev with a pressrun of 20,000 copies. By the end of the 1960s its pressrun had reached 700,000 copies, but the figure had declined to 410,000 by 1990. The magazine's editor is L. Cherevatenko. Until 1992 it was published by the USSR

State Cinema Committee and the Union of Cinematographers of Ukraine.

Novytsky, Hryhorii [Novyc'kyj, Hryhorij], b ?, d ca 1720–5 (some sources cite 1727) in Kondinskoe volost, Siberia. Cossack officer and ethnographer; son of I. *Novytsky. He was educated at the Kievian Mohyla Academy, and later became colonel of a volunteer cavalry regiment (1704–8) and a representative of Hetman I. Mazepa to the Polish voivode, A. Sieniawski. After abandoning the anti-Petrine coalition in 1709, he was restricted to Moscow by Peter I and then sent to Tobolsk, Siberia (1712), where he became active in missionary work. His observations of the Khante (Khanty) peoples were recorded in *Kratkoe opisanie o narode ostiatskom* (A Short Description of the Ostiak People, 1715), one of the world's first specialized ethnographic studies. It was published in German as *Das Leben und die Gewohnheiten der Ostaken* (in *Das veränderte Russland*, 1721), without accreditation to the author, and in Russian in 1884 (in *Kievskaiia starina*) and separately in 1941.

Novytsky, Illia [Novyc'kyj, Ilija], b ?, d 1704. Cossack leader; father of H. *Novytsky. He was colonel of volunteer cavalry regiments under Hetmans I. Samoilovych and I. Mazepa (1673–1700), and he distinguished himself in wars against the Ottoman Empire and the Crimean Porte. He assumed the post of acting hetman when Mazepa went to Moscow in 1689.

Novytsky, Ivan [Novyc'kyj], b 1844 in Tarashcha, Kiev gubernia, d 12 August 1890 in Kiev. Historian, ethnographer, and journalist. He graduated from Kiev University and was an associate of the Kiev Central Archive of Old Documents, the Kiev Archeographic Commission, the Kiev Statistical Committee, and the Southwestern Branch of the Imperial Russian Geographic Society. He contributed articles on the social and legal history of Ukraine under Lithuanian and Polish rule and on Ukrainian folk songs to *Kievskaiia starina*, *Trudy Kievskago iuridicheskago obshchestva*, and Kiev University's *Universitetskaia izvestiia*. His major contributions are the introduction on the history of the peasantry in 15th- to 18th-century Right-Bank Ukraine in pt 6, vol 1 of *Arkhiv Iugo-Zapadnoi Rossii* (1876), a 31-page reference dictionary of 465 legal terms in the Ukrainian chancery language under Lithuanian and Polish rule (1871), and indexes of personal names (1878) and place-names (1882) in the publications of the Kiev Archeographic Commission. Novytsky participated in P. Chubynsky's ethnographic expedition and wrote down nearly 5,000 Ukrainian folk songs, which were published in *Trudy Et-nograficheskoi-statisticheskoi ekspeditsii v Zapadno-Russkom krae* (vol 5, 1872). He also published ethnographic notes and texts of folk songs in *Kievlianin* and *Kievskaiia gubernskaiia vedomosti*.

Novytsky, Mykhailo [Novyc'kyj, Myxajlo], b 20 September 1892 in Nizhen, Chernihiv gubernia, d 29 March 1964 in Kiev. A scholar of T. *Shevchenko. He graduated from Petrograd University (1919) and in 1921 became director of the textual studies seminar and cabinet of Shevchenko's biography at the Kiev branch of the *Taras Shevchenko Scientific Research Institute. He took part in the editing and/or annotation of approx 30 Soviet editions of Shevchenko's works and discovered many of the poet's

manuscripts and letters and materials about him. Together with S. Yefremov and P. Fylypovych he coedited the collection *Shevchenko ta ioho doba* (Shevchenko and His Era, 2 vols, 1925–6). Novytsky wrote pioneering articles about Shevchenko's life, including Shevchenko's arrest in 1859 (1924), his trial in 1847 (1925), and his arrest in 1850 (1925). He also edited P. Kulish's memoirs about Shevchenko (1930). Novytsky was arrested in 1933 and sent to a labor camp in the Solovets Islands in 1937. He was released after J. Stalin's death in 1956 and rehabilitated. During his last years he worked at the Kiev Shevchenko Museum and helped to compile a book of memoirs about Shevchenko (1958).

Novytsky, Mykola [Novyc'kyj], b 1833, d 14 March 1906. Revolutionary figure. A Russian army lieutenant general, he befriended T. *Shevchenko in St Petersburg after Shevchenko's return from exile. In 1860 he negotiated, on behalf of the Society for the Relief of Impoverished Literateurs and Scholars, the redemption of Shevchenko's relatives from serfdom. He belonged to the revolutionary group *Zemlia i Volia* and had ties with the Old Hromada of Kiev. In 1889 he published his memoirs of Shevchenko in *Kievskaja starina*.

Novytsky, Mykola [Novyc'kyj], b 1884, d ? Communist journalist. He was exiled to Siberia for his activities during the Revolution of 1905. In 1915–25 he was involved in Party work in the Far East and then in Ukraine, where he served as assistant editor of *Visti VUTsVK* and contributed articles and feuilletons to *Komunist*, often under the pseudonym Iona Vochrevisushchy. He also edited the *Visti VUTsVK* supplement *Literatura i mystetstvo*. In 1938 Novytsky was arrested in the Stalinist terror; his further fate is unknown.

Novytsky, Oleksa [Novyc'kyj], b 20 April 1914 in Pii, Kaniv county, Kiev gubernia. Poet, songwriter, and translator. From 1933 he worked as a journalist for several newspapers and journals in Ukraine. He began publishing poetry in 1930 and has written poetry collections (1942, 1943, 1966, 1978), a collection of songs (1966), and many articles about literary relations between Ukraine and other nations in the former USSR. He has also translated many poems from Russian, Belarusian, Georgian, and other languages of the former USSR and has edited several Ukrainian anthologies of non-Ukrainian Soviet poetry.

Novytsky, Oleksander [Novyc'kyj], b 1905 in Volhynia gubernia, d 12 February 1970 in Chicago. Orthodox bishop; father of S. *Nowytski. After graduating from the theological faculty of Warsaw University, he was ordained and appointed to a parish in Volhynia (1934–40). During the Second World War he was a member of the consistory of the Polish Autocephalous Orthodox church and a chaplain in the *Division Galizien. He emigrated in 1945 and served as a parish priest in Landshut, Germany, and in Paris before arriving in Canada (1950) to take up parishes in Dauphin and Fort William, Manitoba. In 1965 he was appointed pastor of St Sophia's Church in Chicago, and then, being a widower (1966), he was consecrated a bishop of the Ukrainian Orthodox Church in the USA.

Oleksii Novytsky

Novytsky, Oleksii [Novyc'kyj, Oleksij], b 19 April 1862 in Simbirsk, Russia, d 24 September 1934 in Kiev. Art historian; full member of the Shevchenko Scientific Society from 1914 and full member of the VUAN from 1922. After graduating from Moscow University (1887) he worked as a librarian at the Moscow School of Painting, Sculpture, and Architecture (1898–1918) and was active in the Moscow Ukrainian Hromada. He organized the jubilee exhibition of T. Shevchenko's paintings and graphic works in Moscow (1911) and contributed to *Ukrainskaia zhizn'* (1912–17) and *Promin'* (1917). From 1922 he worked in Kiev, where he chaired the *All-Ukrainian Archeological Committee (1924–33) and headed the VUAN art section and Department of the History of Ukrainian Art. He wrote books on the art of the Peredvizhniki group (1897), the history of Russian art (2 vols, 1902–3), and wooden architecture in Ukraine (1927). He devoted himself to studying the art of Shevchenko, wrote many articles and a book about him as a painter (1914), and organized an exhibition of his works in Moscow in 1911. He was also editor and annotator of vol 8 of the VUAN edition of Shevchenko's works (his art), which was printed but destroyed by the censors before its release, in 1932.

Novytsky, Orest [Novyc'kyj], b 6 February 1806 in Pylpy, Zhytomyr county, Volhynia gubernia, d 16 June 1884 in Kiev. Philosopher. After graduating from the Kiev Theological Academy in 1831, he taught philosophy at the theological seminary in Pereiaslav and then at the Kiev Theological Academy (1834–5) and Kiev University (1834–50), where he became a full professor in 1837 and served as dean of the philosophy faculty (1838–9, 1840–1, 1845–6, 1846–50). At the same time he served as an official censor of Polish-language and, later, foreign publications (1837–69). He wrote, in Russian, a book on the Doukhobors (1832; rev edn 1892); textbooks for his courses on experimental psychology (1840) and logic (1841, 1844), all of them based largely on F. Fischer's German textbooks; and a monograph on the gradual development of philosophical doctrines in relation to the development of pagan beliefs (4 vols, 1860–1). His views on philosophy, expressed in several articles, owed much to those of G. Hegel.

Novytsky, Viktor [Novyc'kyj], b 15 February 1884 in Dvinsk, Vitsebsk gubernia (now Daugavpils, Latvia), d ? Legal historian and archivist; grandson of the philosopher Orest *Novytsky. An associate of the Kiev Central Archive

of Old Documents (1920–32) and the VUAN Commission for the Study of the History of Western-Ruthenian and Ukrainian Law, he contributed a few articles to VUAN serials, such as *Zapysky Istorychno-filolohichnoho viddilu, Ukraina*, and the commission's *Pratsi*. He was imprisoned during the Stalinist terror in 1933 and sent into internal exile in 1938. His subsequent fate is unknown.

Yakiv Novytsky

Slavko Nowytski

Novytsky, Yakiv [Novyc'kyj, Jakiv], b 14 October 1847 in Auly, Katerynoslav county, Katerynoslav gubernia, d 19 May 1929 in Zaporizhia. Ethnographer, historian, and educator. While teaching in rural schools in the Oleksandrivske region (1869–77) he collected Ukrainian folklore. He was dismissed for his Ukrainophile sympathies but a few years later was appointed school inspector. On the basis of the materials he gathered he published collections of Ukrainian historical songs (1894), of Zaporozhian traditions and stories (1907), of Ukrainian folk traditions, beliefs, and stories (1907), of Ukrainian historical songs gathered in the Katerynoslav region from 1874 to 1903 (1908), of popular recollections of Zaporozhian historical figures (1909) and Zaporizhia (1911), and of Ukrainian folk charms, spells, prayers, and remedies (1913). He also prepared a history of the city of Oleksandrivske (1905).

Nowosielski, Jerzy, b 7 January 1923 in Cracow, Poland. Polish painter of Ukrainian origin. A graduate of the Cracow Academy of Fine Arts (1947), he taught there in 1962. He studied icon painting under I. Svientsitsky in Lviv in 1942–3. His works have been exhibited in Poland since 1945. Most of his works are figural and abstract compositions displaying the influence of Byzantine and Ukrainian icons. He has painted murals in the Ukrainian Catholic Church in Lourdes, France, and in Polish churches and designed scenery for Polish theaters and the iconostasis (1972) in the Orthodox church in Cracow. Solo exhibitions of his works have been held in Berlin (1958), Paris (1963), London (1963), Vienna (1966), Karlskrona, Sweden (1978), and Stockholm (1978). J. Madeyski's book about him was published in Cracow in 1973.

Nowy Sącz. IV-1. A city (1989 pop 76,700) on the Dunajec River and a voivodeship center in Poland. In 1939 Ukrainians represented 71 percent of the county's population, and the Ukrainian community in Nowy Sącz provided

economic and cultural leadership for the western Lemko region. V. *Kubijovyč was born there. There was a Ukrainian Catholic church and a branch of the Prosvita society in the city. In 1946 the southern part of the county was transferred by the USSR to Poland. The museum in Nowy Sącz exhibits samples of Lemko church decoration and the works of the Lemko artist *Nykyfor.

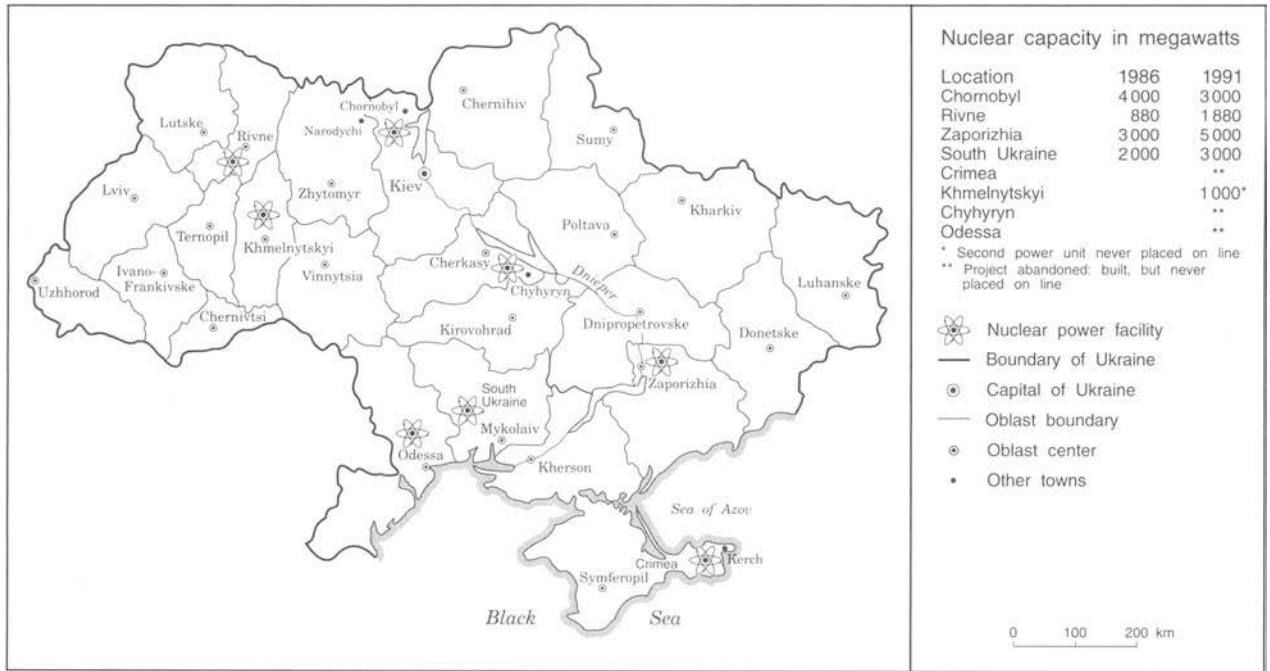

Nowy Targ. A town (1989 pop 32,200) on the Dunajec River in Nowy Sącz voivodeship, Poland. Before 1946, the eastern part of Nowy Targ county was part of Ukrainian ethnic territory of the Lemko region. Over 90 percent of the population was Ukrainian.

Nowytski, Slavko [Novyc'kyj], b 19 October 1935 in Torchyn, Lutske county, Volhynia. Film director, producer, actor, and cameraman. A resident of the United States since the end of the Second World War, he completed study at the Pasadena Playhouse College (1955–6) and Columbia University (MFA 1964) and then worked as an actor in theater and TV and as a cameraman. Since 1971 he has owned Filmart Productions. He has directed the award-winning films *Pysanka* (1977), *Kung-Fu Master: Gin Foo Mark* (1978), *Immortal Image* (about L. Mol), *Grass on the Roof* (1979), *The Helm of Destiny* (1987, documentary on Ukrainians in the United States), and *Harvest of Despair* (1984, documentary on the man-made famine in Ukraine in 1932–3).

Nuclear power industry. In the 1970s the Soviet Union embarked on an ambitious program of constructing nuclear power plants, particularly in its European part. Much of the development was concentrated in Ukraine. By 1985 the republic's total capacity was 8,880 MW. The ostensible goal was to use nuclear power to meet the increasing demand for power up to the end of the century. By then nuclear power was to have accounted for 60 percent of Ukraine's power output, or approx 50,000 MW. It was considered essential to provide Ukraine with a guaranteed source of electricity that was not subject to the whims of the transportation system or the slumps in the output of raw materials. Traditionally, Ukraine depended for its power on coal- and oil-based thermal power stations (accounting for 70 percent of the power output in 1985) and hydroelectric stations (17 percent of the output). The output in the Donetske coalfield, the largest supplier of Ukrainian energy, was declining.

By the end of 1985 Ukraine had four nuclear power plants, with capacity as follows: Chernobyl (opened in 1977 in Prypiat city), 4,000 MW; Rivne (opened in 1979 in Kuznetsovskoe), 880 MW; South Ukraine (opened in 1982 in Kostiantynivka), 2,000 MW; and Zaporizhia (opened in 1984 in Enerhodar), 2,000 MW. In 1985 new reactors were under construction or in the planning stage in Chernobyl, Chyhyryn, Khmelnytskyi, and the Crimea.

Apart from the first, all the new reactors were water-purpressurized and manufactured in Volgodonsk and Czechoslovakia (VVER). The capacity of a VVER reactor was raised from the initial 440 MW at Rivne to 1,000 MW. There were also plans to bring into operation reactors known from their Russian initials as ATETs that would provide both electricity and heating for the major Ukrainian cities. The project in Odessa was practically ready for operation by the spring of 1986. Construction work had begun on the Kharkiv ATETs; the Kiev station was only at the planning stage.

The disaster at the Chornobyl plant on 26 April 1986 brought into question the entire Soviet nuclear power program. In 10 days over 450 radionuclides were dispersed into the atmosphere, whence they contaminated a vast area inhabited by over 250 million people. Kiev, Zhytomyr, Rivne, and Chernihiv oblasts were badly contaminated with cesium, strontium, iodine, and other isotopic elements. More than 33 people died immediately after the explosion, and up to 250,000 were evacuated from the 30-km zone. By November 1986 the first two reactors at Chornobyl had been returned to service, and a year later the third reactor, which shared a control room with the damaged fourth reactor, had become operational.

But the construction of a fifth and a sixth graphite-moderated reactor (RBMK) at Chornobyl was suspended in April 1987, and by 1988 the two reactors had been abandoned permanently.

A growing anti-nuclear power movement, spearheaded by the Writers' Union of Ukraine, developed in Ukraine. By December 1987 Yu. Shcherbak and D. Hrodzynsky had founded the Zelenyi Svit ecological movement, whose aim is to stop the construction of environmentally damaging industrial plants.

Public concern was expressed over the building of plants in geologically or physically unsuited regions (Rivne, Crimea) or on historical landmarks (Chyhyryn). A vigorous protest was mounted against plans of the USSR Ministry of Nuclear Power to raise the capacity of the South Ukraine, Rivne, and Khmelnytskyi plants over the original 4,000-MW limit. There was wide public demand to close down the Chornobyl plant, immediately and permanently. At the 19th Party Conference in Moscow in June 1988, B. Oliinyk demanded a moratorium on the building of new reactors in Ukraine and a review of the entire Ukrainian nuclear energy program. In March 1989 a number of Ukrainian critics of the nuclear power program, such as Yu. Shcherbak and V. Yavorivsky, were elected along with Oliinyk to the USSR Congress of People's Deputies.

Because of the public opposition the Ukrainian nuclear power program, though never officially curtailed, has been thrown into disarray. By early 1988 all three cogenerational nuclear power and heating plants had been abandoned, because they would have been too close to large cities. In the summer of 1988 a team of scientists from the USSR Academy of Sciences concluded that because of its seismic activity the Crimea was unsuitable for a nuclear power plant. In May 1989 the USSR Council of Ministers announced that the Chyhyryn station would not be constructed. At the same time another review of the RBMK raised doubts about the future of the Chornobyl plant. Protests against the building of the South Ukraine and the Zaporizhia stations had grown to mass proportions. By June 1989 the target of the protests in Ukraine, the USSR Ministry of Nuclear Power, had itself finally fallen into question. The USSR Supreme Soviet discussed an alternative administration for the industry: it appeared likely that the responsibility for locating and operating nuclear plants would be shared between a central ministry and the local authorities. Ukraine's declaration of full independence in August 1991 calls for a new solution to the problem of control. In the long term the nuclear power program in Ukraine cannot reach its stated production goals; hence, there is likely to be an intense search for alternative sources of energy.

Nudha, Hryhorii [Nud'ha, Hryhorij], b 21 January 1913 in Artiukhivka, Romen county, Poltava gubernia. Literary scholar, critic, and researcher of folk literature. He graduated from the philological faculty of Kiev University (1938). He has written numerous studies, including *Ukrains'ka pisnia sered narodiv svitu* (Ukrainian Song among the World's Peoples, 1960), *Parodiia v ukrains'kii literaturi* (Parody in Ukrainian Literature, 1961), *Zapovit T.H. Shevchenka* (T.H. Shevchenko's Testament, 1962), *Lystuvannia zaporozhtsiv z turets'kym sultanom* (The Correspondence of the Zaporozhian Cossacks with the Turkish Sultan, 1963), *Teren' Masenko* (1965), *Ukrains'kyi poetychnyi epos: Dumy* (The Ukrainian Poetic Epos: Dumas, 1971), *Slovo i pisnia* (Word and Song, 1985), and *Na literaturnykh shliakhakh: Doslidzhennia, poshuky, znakhidky* (On Literary Paths: Explorations, Investigations, Findings, 1990). The collection of essays *Ukrains'ka pisnia v sviti* (Ukrainian Song and the World, 1989) is one of Nudha's more valuable publications. His work is important primarily for having pioneered the study of areas which had previously received inadequate scholarly attention.

Numismatics. An auxiliary historical discipline, and also a layperson's hobby, the object of which is the study of coins (see *Currency and coins) and medals (see *Orders and medals); it generally excludes the study of seals, which falls under the discipline of *sphragistics. A coin may be defined as a piece of metal stamped with a device, with or without an inscription, signifying its issue by an authority that guarantees its value. Paper money, which serves the same purpose, is considered a separate field of numismatics.

Recorded interest in numismatics first began on Ukrainian territories in the 18th century, in conjunction with the unearthing of coin hoards (eg, the discovery of Arab coins in Kiev during the reign of Hetman I. Mazepa) and the creation of numismatic collections at the estates of various nobles or at church institutes (eg, the Kievan Cave Monastery and the Basilian school in Uman).

At the beginning of the 19th century the collecting of coins became more popular, and numismatic discussions and investigations began to take on a scientific and systematic character, particularly in relation to the collections in Kharkiv and those at the Kremianets Lyceum, based on the collection of King Stanislaus II Augustus Poniatowski (described and researched by J. Albertrand). Kiev University received the Kremianets Lyceum collection in 1834 and assiduously added to it, so that by 1884 its holdings consisted of 34,520 coins and medals. Other large collections were established at the universities in Chernivtsi and Odessa, the latter becoming prominent for its collection and description of ancient coins of former Greek colonies on Ukrainian territories.

The late 19th and early 20th centuries saw the discovery of many large, spectacular hoards in Ukraine. Coins of Kievan Rus' from the 10th and 11th centuries were unearthed at Nizhen (1852) and Kiev (1876). Genoese-Tatar coins, used in the Crimea during the 14th and 15th centuries, were brought to light in Kerch and the Kuban (1909). A vast cache of coins of the 17th and early 18th centuries was found bricked up behind a wall in the Kievan Cave Monastery in 1898. Research on those finds in Ukraine was hindered by an 1866 imperial Russian decree which stated that all hoard materials found within the empire

Numismatic discoveries in Ukraine: a) bronze coin of the Scythian king Skhilouros minted in Olbia (2nd century BC); b) silver dirhem (9th century AD); c) silver Byzantine miliarensis (10th century); d) gold coin of Grand Prince Volodymyr the Great (10th century); e) silver coin of Grand Prince Volodymyr the Great (10th century); f) silver coin of Grand Prince Sviatopolk I (11th century); g) silver coin of Grand Prince Yaroslav the Wise (11th century); h) silver Genoese coin from Kaffa (now Teodosiia) in the Crimea (15th century)

were to be transferred to the Hermitage Museum in St Petersburg. That museum quickly became the premier center for numismatic research.

Many of the numismatic studies in Ukraine during that time focused on delineating through coins the extent of Roman and Arabic influence in Ukraine. With the unearthing of the coin hoards, pioneering classification schemes were compiled by I. Tolstoi (Kievan Rus' coins) and O. Retowski (Genoese-Tatar coins) that for the most part are still in use today. In the bulletin *Zapiski of Kharkiv University*, V. *Danylevych published an article on the significance of numismatics in the study of Ukrainian history (1903).

After the First World War numismatic studies broadened to include the topic of coinage during the Cossack-Hetman era of the 17th and 18th centuries. The leading researchers of the period were V. *Shuhaievsky, the director of the numismatic division at the Kievan Cave Monastery and the All-Ukrainian Institute of Museums in Kiev, and A. *Yershov, M. *Petrovsky, M. *Slabchenko, and I. *Krypiakevych. The main centers for the study of ancient coins found in Ukraine remained in Russia, at the Hermitage and the State Historical Museum (Moscow), where during the 1930s and 1940s various works were released. Only from the 1950s did Ukrainian researchers join Russian numismatists to contribute significantly to the field. Roman coins on Ukrainian territories were researched by M.

*Braichevsky and V. Kropotkin; coins of Kievan Rus' by the Russian scholars I. Spassky, M. Sotnikova, and V. Yanin (Ukrainian numismatists and historians were discouraged from researching and writing about the Kievan period); coins of Chervona Rus' and Lviv of the 14th and 15th centuries by M. Kotliar; and the history of Ukrainian coin terminology by Ye. Chernov.

Numismatic research in Ukraine was centered at the numismatic divisions of the historical museums in Kiev, Odessa, and Lviv. The collection of the Lviv Historical Museum contains some 70,000 specimens. Numismatics was also taught at the universities of Kiev and Odessa. Contributions of researchers were published in archeological journals and in the Russian journal *Numizmatika-Epigrafika*. An outline history of Ukrainian numismatics by I. Spassky was published in that journal in 1955. The only numismatic release in Ukraine was the irregular publication *Numizmatika-Sfragistika*, published in Russian by the AN URSS (now ANU) Institute of Archeology. Numismatic works also appeared in the short-lived historical journal *Istorychni dzherela ta ikh vykorystannia*. Occasional numismatic articles dealing with or touching upon Ukrainian themes appeared in the Russian collectors' journal *Sovetskii kollektsioner*.

In the diaspora the useful Ukrainian-language *Numismatychnyi slovnyk* (Numismatic Dictionary, 1972) was compiled by V. Zvarych. The international *Ukrainian Philatelic and Numismatic Society (with headquarters in the United States) covers Ukrainian numismatics in its journal **Ukrains'kyi filatelist/Ukrainian Philatelist*.

I. Kuzych-Berezovskyy

Nuns. See Monasticism.

Nuremberg trials. A series of trials of 24 former Nazi leaders, conducted in Nuremberg, Germany, from 18 October 1945 to 1 October 1946. Among the defendants tried by the International Military Tribunal were two who bore considerable responsibility for crimes against humanity perpetrated on Ukrainian territory: H. *Frank, the former governor-general of German-occupied Poland and Galicia, and A. *Rosenberg, the former Nazi minister for the occupied Eastern territories. Both were sentenced to death by hanging. The trial brought to light a great deal of information about *Nazi war crimes in Ukraine. The documents in evidence at the trial were subsequently published; many refer to Ukraine and depict plunder of the economy, forced labor, resettlements, collective punishment, and mass executions as commonplace under Nazi rule. A long memorandum (dated 23 February 1943) of V. *Kubijovyč, head of the Ukrainian Central Committee in Cracow, to Governor-General Frank, for example, provided a documented and detailed description of German outrages against the Ukrainian population in Galicia.

Nurseries. See Preschool education.

Nursery Teachers' Seminary (Zakhoronkarska seminariia sester Vasylianok u Lvovi). A school for the training of nursery-school teachers in Lviv, operated in 1935–9 by the Basilian nuns. Its director was N. Lytvynenko. The program lasted three years. Sixty teachers graduated before the school was closed following the Soviet occupation of Lviv.

Nurzec River (Nurets). A right-bank tributary of the Buh River. It is 100 km long and drains a basin area of 2,037 sq km. The Nurzec flows through eastern Poland in Podlachia and is thus situated within Ukrainian ethnic territory.

Nutria (*Myocastor coypus*; Ukrainian: *nutriia*). A semi-aquatic nocturnal rodent, also known as coypu or swamp beaver, belonging to the family Capromyidae. The nutria is a robust animal, weighing up to 8 kg, with a body 50–85 cm long and a tail 30–45 cm long. Its fur is reddish brown and consists of coarse guard hairs over a soft undercoat. Nutrias were introduced in Ukraine from South America in the 1930s. They live in shallow burrows along ponds or riverbanks, where they feed on reeds and other aquatic plants. Nutria fur is valued in the fur trade. Persistent hunting in the past has caused a decline in nutria populations. Hunting nutria is now forbidden in Ukraine. The animal is bred in semi-captivity for commercial purposes.

Nutrition (*kharchuvannia*). The study of the processes by which food materials taken in by living organisms maintain life and sustain activity. The functions of foods in nutrition may be considered in terms of energy, proteins, minerals, and vitamins. In the former USSR the recommended daily caloric intake was calculated at 2,200–2,800 Cal for sedentary adults, 3,000 Cal for mechanized industry and service workers, 3,200 Cal for physical laborers, and 3,700–4,300 Cal for steelworkers, foresters, and other workers at hard labor. The recommended proportion of proteins to fats to carbohydrates was (in percentages) approx 12:33:55. The accepted ideal norm for adults was to take food four times daily: breakfast (25 percent of the daily ration), lunch (35 percent), afternoon snack (15 percent), and supper (25 percent), with four-hour intervals in between and with supper no later than two to three hours prior to sleep.

In fact, the actual diet of the ordinary adult in the former USSR was simple, monotonous, and usually lacking in proteins, vitamins, and minerals. Although Ukraine is a rich producer of food materials, more than capable of sustaining its own population on a healthy, balanced diet, a woefully inadequate, mismanaged, and corrupt distribution system, as well as the forced export of its food products to other parts of the former USSR and former satellite countries, has resulted in a poorly nourished population. The staple food items are heavy 'black' rye bread, potatoes, various cereals (including buckwheat kasha), flour, and cabbage. Poultry, meat, and dairy products are expensive and scarce; vegetables and fruit are mostly seasonal. Coffee is considered a luxury. In many instances confectionery items are used to compensate for general undernourishment. The effects of malnourishment have had evident consequences on the physical (esp dental), mental, and social well-being of Ukrainians.

Nutrition education is provided by the public health system, and research is carried out at the Kiev Scientific Research Institute of the Hygiene of Nutrition, as well as in specific departments of the Kiev, Kharkiv, and Lviv medical institutes.

P. Dzul

Nychai, Appolon [Nyčaj], b 1846, d 1918. Co-operative activist in Galicia. A teacher by profession, he published the newspaper **Hospodar i promyshlennyk* in Stanyslaviv and Lviv in 1879–85. Together with V. Nahirny, in 1883 he initiated the founding of **Narodna Torhovia*, which he headed for many years.

Nataliia Nychka

Dmytro Nykolyshyn

Nychka, Nataliia [Nyčka, Natalija] (née Levytska), b 1 March 1893 in Stanyslaviv, Galicia, d 16 January 1964 in New York. Actress. In 1912 she began her theatrical career in the Ruska Besida Theater. Then she worked in the Theater of the Legion of the Ukrainian Sich Riflemen (1916–18), the Lviv Ukrainian Independent Theater (1920–1), the Ukrainska Besida Theater (1921–3), and V. Blavatsky's Ukrainskyi Liudovyi Teatr (1926–7). In 1927 Nychka abandoned her stage career for health reasons.

Nychyporenko, Ivan [Nyčyporenko], b 8 October 1842 in Mezhyhiria (now part of Vyshhorod, Kiev oblast), d 25 January 1910 in Kiev. Pedagogue; member of the **Hromada* of Kiev. He graduated from Kiev University in 1863. From 1879 to 1890 he was director of **Galagan College* in Kiev. An innovator in educational methodology, he encouraged independent study by students.

Nychyporenko, Serhii [Nyčyporenko, Serhij], b 8 October 1900 in Volodymyr-Volynskyyi. Colloid chemist. A graduate of the Volhynia Industrial Polytechnic (1928), from 1944 to 1955 he held managerial positions in the Ukrainian Ministry of the Building-Materials Industry and the Scientific Research Institute of Building Materials of the Academy of Construction and Architecture of the Ukrainian SSR. In 1959 he joined the AN URSR (now ANU) Institute of General and Inorganic Chemistry, and in 1968 he moved to the ANU Institute of Colloidal Chemistry and Hydrochemistry. He investigated the physical-chemical behavior of dispersed structures and applied it to industrial problems.

Nykolaichuk, Mykola [Nykolaïčuk], b 1890, d ? Lawyer and civic leader in Galicia. He was active in the com-

munity and co-operative organizations of the Nadvirna region. He was a member of the Central Committee of the Ukrainian National Democratic Alliance. He was arrested by the Soviets in 1939, and disappeared in a prison camp.

Nykolaichyk, Fedir [Nykolaïčyk], b 1857, d ? Historian and pedagogue. In *Kievskaia starina* (KS), *Zoria*, and other publications he wrote about the early history of the Cossacks and about the history of the Hetmanate, Siversk principality, and Left-Bank Ukraine. He also compiled a bibliography of the works of M. Kostomarov (KS, 1885).

Nykolyshyn, Dmytro [Nykolyšyn], b 1884 in Ivankiv, Borshchiv county, Galicia, d 1943. Writer, publisher, literary critic, and pedagogue. From 1914 to 1935 he owned and operated the **Zahalna Knyhozbirnia* publishing house in Kolomyia. He also taught at the Ukrainian gymnasium in Kolomyia and conducted the Boian choir there. He wrote a long introduction and notes to a book of T. Shevchenko's historical poems (1914); the plays *Rozladdie* (Disorder, 1911), *Taina* (The Secret, 1923), *Samson* (1928), *Maty* (Mother, 1929), and *Irod Velykyi* (Herod the Great, 1936); and poetry collections, such as *Svitannia i sutinky* (Dawns and Dusks, 1936) and *Lystopadova symfoniia* (November Symphony, 1937). He also translated Latin and German poetry into Ukrainian.

Nykon, b ?, d 1088. Monk and chronicler. He was ordained, and then entered the Kievan Cave Monastery (before 1058), where he became a close associate of St Anthony of the Caves. He was forced to leave for Tmutorokan (possibly because of a conflict with Prince Iziaslav Yaroslavych), where he established a monastery. He returned to Kiev in 1068, where he assisted St Theodosius of the Caves in compiling and binding manuscripts before the internecine struggle for power in Kiev again forced him to flee to Tmutorokan in 1073. After returning to Kiev in 1077, he served as hegumen of the Kievan Cave Monastery, from 1078 until his death. As hegumen he oversaw the completion of the ornamentation of the monastery's Dormition Cathedral and distinguished himself as a preacher. Nykon is believed to have continued the first Kievan chronicle of 1037 and edited the Kievan Cave Compilation of 1073, on which the **Povist' vremennykh lit* was based. These accomplishments earned him the title 'Great.' Some scholars believe that he and Ilarion, the first native metropolitan of Kiev, were the same person. The major source of information on Nykon's life is the Kievan Cave Patericon.

Nykonenko, Arkhyy, b ? in Orzhytsia, Lubni county, Poltava gubernia, d before 1856 in Orzhytsia. Lirnyk. His repertoire included six or seven dumas, of which P. Kulish transcribed and published five, along with some biographical information on Nykonenko, in the first volume of *Zapiski o Iuzhnoi Rusi* (Notes on Southern Rus', 1856). The most significant of these was an outstanding rendition of 'The Cossack Holota.'

Nykopil [Nykopil'] (aka Nikopol). VI-15. A city (1990 pop 158,000) on the right bank of the Kakhivka Reservoir and a raion center in Dnipropetrovske oblast. In the 16th century there was a portage named Mykytyn Rih at the site, and in the early 17th century the settlement of Myky-

tyne was established there. After the Russian army destroyed the Zaporozhian Sich in 1775, a fortified town called Sloviansk was built near Mykytyne. In 1782 it was renamed Nykopol. The *chumaks passed through Nykopol on their way to the Crimea. As the Nykopol Manganese Basin began to be developed at the end of the 19th century, Nykopol's metallurgical and machine-building industries grew rapidly. Besides cranes, pipes, and metal alloys the city manufactures building materials, clothes, and food. It is an important river port and railway junction.

Nykopol Crane Plant (Nykopil'skyi kranobudivnyi zavod). A major heavy-industry plant located in Nykopol, Dnipropetrovske oblast. It was built in 1885 as an agricultural machinery and implements factory. In the interwar period it began to produce various types of loaders, trucks, and transports. At the beginning of the Second World War the plant was evacuated beyond the Urals, and it returned to operation only in 1944. In 1950 it began producing tower cranes. Now it makes tower and self-propelled hydraulic cranes, machine parts, elevators, tractor treads, and other products.

Nykopol Ferroalloys Plant (Nykopil'skyi zavod ferosplaviv). A metallurgical factory in Nykopol, Dnipropetrovske oblast, built in 1962–6. Its products include manganese-silicon and ferromanganese alloys and fluxes for mechanized welding and electroscorification. The plant is equipped with special electric ovens and scrubbers.

Nykopol Manganese Basin. One of the world's largest formations of manganese ore. It is part of a larger manganese basin stretching from Bulgaria through southern Ukraine to Georgia and containing 70 percent of the world's continental reserves of manganese ore. The Nykopol Basin extends from the small deposits at Inhulets to two large deposits north of Nykopol and then southeast of the Dnieper River to Tokmak. The ore deposit is 1–20 km wide and on average 2–3.5 m thick. The total reserves amount to 2.3 billion t.

The ores consist of high-grade oxides, mixed, and lower-grade carbonates with an average manganese content of 23–26 percent, 11–35 percent, and 15–17 percent respectively. The mining of high-grade ores began at Marhanets, northeast of Nykopol, in 1886. Production was greatly expanded in the 1950s, when open-pit mining of carbonate ores began at Ordzhonikidze, northwest of Nykopol. In 1980 the basin included seven mines, two quarries, and five enrichment plants. As the Nykopol Basin proper becomes exhausted, the Tokmak Basin assumes greater economic importance.

(See also *Manganese industry.)

Nykopol Regional Studies Museum (Nykopil'skyi kraieznavchyi muzei). A museum established in Nykopol in 1919 as the Nykopol Museum of Art. In the 1920s the museum's staff excavated Hellenic barrows in Nykopol raion and participated in digs around the Dnieper Hydroelectric Station. The museum's holdings of over 20,000 items (of which 6,000 are on display) pertain to the natural environment, archeology, and history of Nykopol and its vicinity. The museum has a local archival collection and published a brochure on Nykopol under Soviet rule (1958). A guide to the museum's exhibits by M. Lytvyn appeared in 1968.

Nykopol Southern Pipe Plant (Nykopil'skyi pivdenno-trubnyi zavod). A factory of the metallurgical industry, located in Nykopol, Dnipropetrovske oblast. Built in 1931–5, it produced seamless pipes. The plant was evacuated at the outset of the war and then rebuilt in 1944–7. Today it produces hot-, cold-, and warm-rolled seamless pipes; arc-welded carbon steel, rustproof and stainless steel, and steel alloy pipes of 0.1–920 mm diameter; and other goods. Its pipes are exported widely.

Nykorovych, Sylvestr [Nykorovyč, Syl'vestr], b 15 January 1905 in Kostyntsi, Vashkivtsi county, Bukovyna. Civic and political leader, and journalist. The first OUN liaison officer for Bukovyna, he edited the monthly *Samostiina dumka* in 1931–7 in Chernivtsi. In 1942–5 he published *Zemlia*, a newspaper for Ukrainian workers in Germany. He emigrated to Canada in 1953 and was active in the Ukrainian National Federation.

Nykorovych-Hnidevych, Oleksandra [Nykorovyč-Hnidevyč], b 1913, d 1941 in Chernivtsi. Civic activist; wife of S. *Nykorovych. She was active as a leader in Plast (early 1930s) and then as OUN liaison officer for Bukovyna. She was executed by the Soviets on the eve of the German invasion in 1941.

Nykorovych-Hnidy, Sydoniia [Nykorovyč-Hnidyj, Sydonija], b 1888, d 1957 in Arad, Rumania. Bukovynian writer and publicist. In 1931–3 she edited two supplements of the journal *Samostiina dumka: Samostiina dumka ukrains'koi materi* and *Derzhavno-tvorcha trybuna Ukraïny*. Then she worked with the antinationalist paper *Khliborob's'ka pravda* as editor of its literary-scientific supplement and women's page (1935–7). Her articles on women's issues and short stories about the common people appeared in both periodicals.

Nykyfor: Architectural Landscape

Nykyfor (real name: Drovniak, Epifanii), b 21 May 1895 in Krynytsia, Nowy Sacz county, Galicia, d 10 October 1968 in Krynytsia. Lemko naive painter. A deaf son of a beggar woman, he supported himself from his teens by begging for food or a few coins in exchange for his small drawings and watercolors. He was discovered by Ukrainian and Polish artistic circles in the 1930s. With the help

of R. Turyn, one of his earliest discoverers, his works were exhibited in Paris in 1932. Over 100 of his works were included in an exhibition of self-taught artists held by the Association of Independent Ukrainian Artists in Lviv in 1938. Like other Lemkos, he was deported to northern Poland by the Polish authorities after the Second World War. He returned illegally twice to Krynytsia before he was allowed to stay. In the 1950s and 1960s his works were exhibited in London, Rome, Belgrade, Amsterdam, Paris, Brussels, Florence, Liège, Haifa, Vienna, Frankfurt am Main, Chicago, Basel, Rotterdam, Lviv, Kiev, and New York. In his lifetime Nykyfor produced over 30,000 small color drawings or watercolors depicting existing and imaginary Lemko buildings, churches, landscapes, saints, and individuals (often himself). In style some of his works belong to the Lemko tradition of folk icon painting on glass; others are typical of naive art in general.

Sava Nykyforiak

Dmytro Nytchenko

Nykyforiak, Sava [Nykyforjak], b 21 December 1886 in Rozhnevi Polia, Sniatyn county, Galicia, d 25 February 1973 in New York. Pedagogue and community activist. After completing university he taught at Ukrainian gymnasiums in Lviv, Chortkiv, and Stanyславiv (now Ivano-Frankivske), where he was director in 1921–4. Upon the outbreak of the First World War he joined the Sich Riflemen, with which he served until the end of the Ukrainian liberation struggle. After the Second World War he emigrated to Austria, and in 1949 to the United States. He was a leading member of various veterans' organizations and a director of the Chervona Kalyna publishing society.

Nymphaeum. An ancient Greek city in the Crimea, 17 km south of present-day Kerch. Nymphaeum was founded in the 6th century BC at the site of a Scythian settlement. It exported wheat to Greece and manufactured pottery. In the 5th century BC it was briefly a colony of Athens and then belonged to the Bosporan Kingdom. In the 3rd century AD it was destroyed by the Goths. Excavations carried out at the site since 1939 have uncovered the remains of fortifications, public and private buildings, pottery workshops, and a temple of Demeter.

Nytchenko, Dmytro [Nytčenko] (pseuds: D. Chub, Ostap Zirchasty), b 21 February 1905 in Zinkiv, Poltava gubernia. Writer and community figure; member of the Shevchenko Scientific Society. In the 1920s he worked as a journalist, and in the 1930s he graduated from the Kharkiv Pedagogical Institute and then taught in secondary schools. He was a member of the writers' groups Hart and Prolitfront and began publishing under the name Nitsenko in 1922. Nytchenko wrote the collections *Poezii industrii* (Poems of Industry, 1931) and *Sklepinnia* (The Vault, 1933) and the essay collection *Na prykordonnii* (In the Border Area, 1932). In 1942–3 he was literary editor of the Kharkiv daily *Nova Ukraina*. As a postwar émigré in Germany he worked for the newspaper *Ukrains'ki visti* and wrote the book *Shevchenko v zhytti* (1947; 2nd rev edn: *Zhyvyi Shevchenko*, 1963; English trans: *Shevchenko the Man*, 1985). He emigrated to Australia in 1949 and played a central role in Ukrainian life there. He founded the Lastivka publishing house in the early 1950s, taught in Ukrainian schools, and headed the Ukrainian Central School Council (1954–62), the Australian branches of the *Slovo Association of Ukrainian Writers in Exile and the Association of Ukrainian Writers for Young People, and the Ukrainian Literary and Arts Club in Melbourne. Under the pseudonym D. Chub he wrote stories for children, memoirs of the Second World War, *V lisakh pid Viaz'moiu* (In the Forests near Viazma, 1958; 2nd rev edn 1983; English trans: *West of Moscow*, 1983), and the story collection *Stezhkamy pryhod* (On the Paths of Adventures, 1975). He also compiled a Ukrainian orthographic dictionary (1968) and wrote a book on the elements of literary theory and stylistics (1975) for Ukrainian schools. He contributed many articles and humorous poems and sketches (under the pseudonym Ostap Zirchasty) to Ukrainian émigré periodicals and edited over 20 Ukrainian-Australian books, the almanacs *Novyi obrii* (New Horizon, 1954–88), and a book of 200 of B. Antonenko-Davydovych's letters (1986). Collections of his selected literary articles appeared in 1981 and 1982.

R. Senkus

Nyva (Sown Field). A populist scholarly and literary journal published three times a month in Lviv in 1865; 20 issues appeared under the editorship of K. Horbal. It published the works of Yu. Fedkovych, T. Shevchenko, M. Starytsky, O. Storozhenko, and M. Vovchok; translations of I. Krylov (by M. Starytsky), A. Mickiewicz (by O. Navrotsky), and W. Shakespeare (by P. Svietsitsky); folklore studies; theater reviews; and literary surveys.

Nyva (Sown Field). A 208-page literary miscellany published by M. Borovsky and D. Markovych in Odessa in 1885. Among its contributors were I. Nechui-Levytsky (the story 'Chortiacha spokusa' [The Devil's Temptation]), M. Starytsky (the operetta 'Utoplena' [The Drowned Maiden]), A. Bobenko, Dnirova Chaika, B. Hrinchenko, P. Nishchynsky (a translation of part of Homer's *Odyssey*), P. Panchenko, and K. Ukhach.

Nyva (Sown Field). A journal of religious and social affairs published semimonthly in 1904–14 and then monthly in 1916–39 in Lviv. The journal supported the traditional Eastern orientation of Ukrainian Catholicism. For a time it was published by the Society of St Paul the Apostle. *Nyva* was edited by Revs Ya. Levytsky (1904–7, 1910–18), O. Voliansky (1908–10), H. Kostelnyk (1920–9), and P. Khomyn.

The journal issued the supplements *Katekhytychnyi misiachnyk* and *Propovidi* and a separate series of books and pamphlets. In 1930 the journal had a circulation of 1,500.

Antin Nyvynsky

Bohdan Nyzhankivsky

Nyvynsky, Antin [Nyvyns'kyj] (pen name: Chekmanovsky), b 1890, d 1945? Volhynian civic leader, journalist, and writer; husband of H. *Zhurba. He helped found the Prosvita society in Rivne and served as its president. He was active in politics as a member of the executive of the Ukrainian Party of Socialist Revolutionaries in Volhynia (1922–6) and its successor, the Ukrainian Socialist Radical party (1926–7). Defrauded of victory in 1928, he won a by-election to the Polish Sejm ordered in the Rivne district by the Supreme Court of Poland in 1930. He edited the weekly *Hromada* in Lutske (1922–4), the monthly organ of the Union of Ukrainian Private Office Employees, *Sluzhbovyk*, and the literary supplement to *Hromads'kyi holos*, titled *Snip* (1937–8). Writing under his pen name, he contributed short stories to Ukrainian journals and published the novelette *Viky plyvut' nad Kyievom* (The Centuries Flow over Kiev, 1938; repr 1964).

Nyzhankivska, Lada-Ariana [Nyžankivs'ka] (Nyzankovsky), b 3 October 1962 in Geneva. Artist; daughter of Z. *Lisovska and Oleh *Nyzhankivsky. She completed her art studies at the University of Geneva and the Geneva Academy of Fine Art (1985). She works as an art teacher in Geneva and specializes in painting and graphic art. She has participated in group shows in Switzerland (1985–90) and since 1986 has had numerous personal shows: in Geneva in 1986, 1987, 1989, and 1990; in New York, Washington, and Philadelphia in 1989; and jointly with her mother in London and Lviv in 1990.

Nyzhankivska, Melaniia [Nyžankivs'ka, Melanija], b 7 March 1898 in Radivtsi, Bukovyna, d 1 June 1973 in Blaugies, Belgium. Writer; daughter of I. *Semaka. She lived in Prague and Lviv with her husband, N. *Nyzhankivsky, who put many of her poems to music. After being imprisoned for several months in Prague by the Soviets at the end of the Second World War, she managed to emigrate to Belgium. She wrote the biographical novel *Na zelenii Bukovyni* (In Green Bukovyna) and stories and articles on literature and music in the postwar émigré press.

Nyzhankivska-Snihurovych, Dariia [Nyžankivs'ka-Snihurovyč, Darija], b 18 August 1916 in Lviv, d 23 July 1980 in Winnipeg. Ballerina, choreographer, and pedagogue; daughter of A. Nyzhankivsky. A pupil of M. Slovenska (Prague) and V. Pereiaslavets (Lviv), in 1939–44 she was the soloist in the Lviv Theater of Opera and Ballet. In 1944–7 she led a ballet studio in Innsbruck, Austria. Then she emigrated to Winnipeg (1950), where she organized the ballet school of Ukrainian dance at the Royal Winnipeg Ballet.

Nyzhankivsky, Amvrosii [Nyžankivs'kyj, Amvrosij] (Bronyslav), b 8 April 1873 in Kolomyia, Galicia, d 7 February 1943 in Kolomyia. Actor and ballet master. He began his stage career in 1892 as a choir member in the Ruska Besida Theater, continued there as a leading actor until 1914 (with a hiatus in 1896–8), and then acted in V. Kossak's troupe (1916–22), the Ukrainska Besida Theater (1923–4), Y. Štadnyk's troupe (1924–8), and the Tobilevych Theater (1929–32). Nyzhankivsky's repertoire of Ukrainian and non-Ukrainian character roles varied from Khoma in M. Starytsky's *Oi ne khody, Hrytsiu ...* (Don't Go to Parties, Hryts ...) to Gesler in F. Schiller's *Wilhelm Tell*.

Nyzhankivsky, Andrii [Nyžankivs'kyj, Andrij] (Nižankowski, Andrzej), b 1592 in Galicia, d 3 April 1655 in Cracow. Organist. A Dominican, he studied the organ in Italy with G. Frescobaldi and then emerged as a virtuoso in his own right. He served as an organist at Santa Maria sopra Minerva Church in Rome and the Dominican church in Cracow, and he probably composed a number of works which have not survived.

Nyzhankivsky, Bohdan [Nyžankivs'kyj] (pseud: Babai), b 24 November 1909 in Zolochiv, Galicia, d 18 January 1986 in Detroit. Writer. After graduating from a commercial school (1929) he worked for the Tsentrosoiuz union of co-operatives and contributed to *Novyi chas*, *Dilo*, *Nedilia*, *Nazustrich*, *Ukrains'ki visti*, *Sluzhbovyk*, and other Lviv periodicals. He worked for Lviv Radio (1940–1) and then, until 1944, was an editor in the Lviv office of *Krakivs'ki visti* and wrote scripts for the *Veselyi Lviv theater. As a postwar refugee in Munich he was an editor of *Ukrains'ka trybuna* and *Arka*. After emigrating to Detroit he contributed regularly to the satirical magazine **Lys Mykyta*, under his pseudonym, and acquired a reputation as a master of satirical, ironic, and humorous poetry. He wrote a book of anecdotes about his father, A. Nyzhankivsky, called *Aktor hovoryt'* (The Actor Speaks, 1936); two story collections about urban life, *Vulytsia* (The Street, 1936, about Lviv's 'street people') and *Novely* (Novellas, 1941); three poetry collections, *Terpke vyno* (Bitter Wine, 1942), *Shchedrist'* (Generosity, 1947), and *Vahota* (Gravity, 1953); a humorous novelette about émigré life, *Sviato na oseli* (The Celebration at the Resort, 1975); and, under his pseudonym, the poetry collections *Virshii ironichni, satyrychni i komichni* (Verses Ironic, Satiric, and Comic, 1959), *Karuselia virshiv* (Carousel of Verses, 1976), and *Martsypany i vytreben'ky* (Marzipans and Caprices, 1983). Some of his stories and poems appeared in *Arka*, *Kyiv*, *Suchasnist'*, *Slovo*: *Zbirnyk*, and other émigré periodicals. An issue of **Terem* (4 [1971]) was devoted to Nyzhankivsky.

R. Senkus

Nyzhankivsky, Nestor [Nyžankivs'kyj], b 31 August 1893 in Berezhany, Galicia, d 2 April 1940 in Łódź, Poland.

Nestor Nyzhankivsky

Ostap Nyzhankivsky

Composer, pianist, teacher, and music critic. He received a PHD in history from Vienna University (1923) and graduated from the Prague State Conservatory (1927) in the master class of V. Novak. He returned to Galicia to teach piano and theory at the Lysenko Higher Institute of Music in Lviv (1931–9) and became one of the founders (and first chairman) of the *Union of Ukrainian Professional Musicians (SUPROM). He died after falling ill during his emigration from Soviet-occupied Galicia. His compositions include 'Piano Trio in E Minor'; for piano solo, 'Prelude and Fugue on a Ukrainian Theme in C Minor,' *Little Suite*, 'Intermezzo in D Minor,' and *Variations on a Ukrainian Theme in F Sharp Minor*; approx 20 art songs for voice and piano, among them 'Zasumui trembitu' (Trembita's Dirge, text by R. Kupchynsky), 'Zhyta' (Wheat Fields, text by O. Oles), and 'Ty liubchyku za horoiu' (My Beloved beyond the Mountain, text by U. Kravchenko); 13 compositions for chorus, including 'Naimyt' (The Hireling, text by I. Franko) and 'Halochka' (text by M. Obidny); and arrangements of folk songs for chorus, published in the 1937 Chervona Kalyna collection.

BIBLIOGRAPHY

Bulka, Iu. *Nestor Nyzhankivskyi* (Kiev 1972)

I. Sonevtsky

Nyzhankivsky, Oleh [Nyžankivs'kyj], b 25 July 1924 in Vienna. Opera and concert singer (baritone). Educated in Belgium and Milan (where in 1957 he studied voice under F. Carpi), he graduated from the Geneva Conservatory, and then began performing in Swiss opera theaters (from 1963 at the Grand Theater of Geneva; from 1966 at the Collegium Academicum) as well as on Geneva radio and television. He performed in the world premiere of F. Martin's opera *Monsieur de Pourceaugnac* (after Molière), staged in Geneva in April 1963 and broadcast live. His repertoire includes songs by his father, N. *Nyzhankivsky, and his uncle, Omelian *Nyzhankivsky, by S. *Turkevych-Lukianovych, and by A. Rudnytsky.

Nyzhankivsky, Omelian [Nyžankivs'kyj, Omeljan], b 20 August 1895 in Rohatyn, Galicia, d 18 July 1973 in Bern,

Switzerland. Pianist, organist, composer, musicologist, conductor, and pedagogue; cousin of N. *Nyzhankivsky. He was an officer in the Ukrainian Galician Army, and then studied music at Vienna University. Tuberculosis forced him to go to Egypt, where he began teaching at the conservatory in Cairo (1924–8). Later he moved to Switzerland, completed his musical training, and taught at the conservatory in Bern. His compositions include scores for three divine liturgies and numerous sacred works for organ, choir, and voice.

Nyzhankivsky, Ostap [Nyžankivs'kyj], b 24 January 1862 in Drohobych, Galicia, d 22 May 1919 near Stryi, Galicia. Priest, composer, conductor, and civic leader. He dedicated much of his energy to developing musical life in Galicia. He initiated and organized choral concert tours throughout Galicia in 1885, 1889, and 1892, organized and conducted the *Boian Society choir in Berezhany (1892), and conducted the Boian choir in Lviv (1895–6) and in Stryi (1900–14). He founded the music publishing house Muzykalna Biblioteka (1885) and compiled *Ukrains'korus'kyi spivanyk* (Ukrainian-Ruthenian Songbook, 1907). His works for choir 'Hulialy' (They Danced) and 'Z Okrushkiv' (From Crumbs, text by Yu. Fedkovych) became very popular. He also wrote songs for solo voice with piano accompaniment, including 'Mynuly lita molodii' (The Years of Youth Have Passed By); arrangements of folk songs for solo voice or choir; and *Vitrohony*, a cycle of *kolomyika* melodies for piano.

At the urging of Ye. *Olesnytsky, Nyzhankivsky brought comparable energies to bear in the economic field. He founded the first co-operative dairy (in Zavadiiv) and cofounded the Provincial Home and Dairy Union (later renamed *Maslosoiuz) in 1907 in Stryi. His work as the first director of the organization was critical during its initial expansion. Nyzhankivsky was also elected to the Galician Diet in 1908–13. In 1919 he was summarily shot by the Polish authorities.

W. Wytwycky

Nyzhni Sirohozy [Nyžni Sirohozy]. VII-15. A town smt (1990 pop 6,700) on the Velyki Sirohozy River and a raion center in Kherson oblast. It was founded at the beginning of the 19th century by settlers from Kharkiv gubernia. In 1833 the village became a county center in Kherson gubernia. Today food processing is the town's main industry.

Nyzhnia Krynka [Nyžnja Krynka]. V-19, DB III-4. A town smt (1990 pop 16,800) on the Krynka River near Makiivka, Donetsk oblast. The town is administered by the council of one of the city raions of Makiivka. Its origin goes back to 1788. The town is known for its coal mine.

Nyzhnohirskiyi [Nyžn'ohirs'kyj]. VIII-15. A town smt (1990 pop 10,700) on the Salhyr River and a raion center in Crimea oblast. It was first mentioned in historical documents in the 17th century, as Seitler (Sehydler, Salhyr). In 1783 it was annexed by Russia, and in 1945 it was renamed. The town has a canning plant, a winery, and a dairy.

O

O vospitani chad (On the Education of Children). One of the first handbooks for parents, 200 engraved copies of which were printed at the Lviv Dormition Brotherhood Press in 1609. Much of it consists of the teachings of St John Chrysostom. In his introduction the compiler (according to scholars, Y. Boretsky, the rector of the Lviv Dormition Brotherhood School at the time) stresses the value of formal education from an early age in shaping a child's character and morals. Two copies of the book have been preserved, one at the Lviv Museum of Ukrainian Art and the other at the National Library in Sofia, Bulgaria. The text is reprinted in *Pam'iatky brats'kykh shkyl na Ukraïni, kinets' XVI-pochatok XVII st.* (Monuments of Brotherhood Schools in Ukraine, from the End of the 16th to the Beginning of the 17th Century, 1988).

Oak (*Quercus*; Ukrainian: *dub*). A deciduous or evergreen tree of the family Fagaceae. Oaks grow slowly and have deep root systems, but live long and begin to produce seeds only after 15 to 60 years of growth. After 80 years they increase mainly in circumference. Oak wood is hard and durable and has a pleasing texture. It is used in building ships, underwater installations, railway cars and ties, furniture, and houses, and its tannin is used to tan hides and in the manufacture of ink. Acorns provide food for small game animals and are used to fatten pigs and poultry. In times of war imitation coffee was made from acorns.

Oak is the most common deciduous tree in Ukraine; 20 percent of all trees there are oak. The common oak (*Q. robur*) grows throughout Ukraine; the rock oak (*Q. petraeae*) grows in western regions of Ukraine, in Caucasia, and along the Dniester River. A 700-year-old oak with a trunk circumference of 6.3 m grows in the village of Verkhnia Khortytsia, near Zaporizhia. Oak groves are common in the forest-steppe region. Other trees often found with oak are *beech, *hornbeam, *pine, and *linden. Oak is often used in Ukrainian songs and proverbs to symbolize strength.

Oats (*Avena*; Ukrainian: *oves*). A cereal of the family Gramineae, which includes *A. euavena*, an annual species, and *A. avenastrum*, a perennial steppe and meadow grass. The plants have a fibrous root system, linear leaves, and a one-seeded fruit. Oats may be a spring or a winter crop. Perennial oats is used as fodder; annual oats includes the cultivated oat plant (*A. sativa*). Although oats is used chiefly as livestock feed, some is processed for human consumption (oatmeal). Oats is a source of calcium, iron, vitamin B, and nicotinic acid, and in Ukraine it is a basic grain food. Owing to the use of more productive feed plants in recent years (corn, peas, sugar beets), acreage planted with oats has gradually been diminishing in Ukraine.

Petro Obal: *Hutsul Fields* (oil on plywood, 1930s)

Obal, Petro [Obal'], b 19 April 1900 in Obodivka, Zbarazh county, Galicia, d 27 May 1987 in Stryi, Lviv oblast. Painter and graphic artist. A graduate of the Cracow Academy of Fine Arts (1926), he taught painting in secondary schools in Pomerania (until 1939), the Lemko region (1939–42), and Stryi (1942–56). He exhibited his work in Lviv at shows of the Circle of Contributors to Ukrainian Art (1923), the Association of Independent Ukrainian Artists (from 1934), and the Labor Association of Ukrainian Pictorial Artists (1942). In 1932–3 he took part in graphic art exhibitions in Berlin, Prague, and Chicago. Solo exhibitions of his works were held in Bromberg (1935), Sianik (1940), and Lviv (1966). Most of his paintings are impressionist landscapes; eg, *Golden Podillia* (1931), *Sunset*, and *Hutsul Fields* (1930s). He also did woodcuts and a woodcut album of Ukrainian writers (1930).

Oberuchev, Konstantin [Oberučev], b 1865 in Kiev, d November 1929 in the United States. Russian commander of the Kiev Military District (KMD). In 1905 he was relieved of his post as an artillery officer in the Russian army for revolutionary activity and was forced to emigrate. He returned to Ukraine from Switzerland on the eve of the revolution, was arrested in Kiev, and was freed after the outbreak of the revolution. In May 1917 he became commander of the KMD for the Provisional Government. He was a member of the Russian Social Revolutionary party. His views opposing separate Ukrainian military formations were published in *Kievskaiia mysl'*. After the demise of the Provisional Government Oberuchev emigrated to the United States, where he wrote *V dni revoliutsii* (In the Days of the Revolution, 1919) and *Vospominaniia* (Memoirs, 1930).

Mykhailo Obidny

Obidny, Mykhailo [Obidnyj, Myxajlo] (pseud: Mocharsky), b 24 June 1889 in Myrhorod, Poltava gubernia, d 7 January 1938 in Mukachiv, Transcarpathia. Ethnographer, museologist, and poet. Until 1910 he taught school in the Kuban region. Upon returning to central Ukraine he worked in a number of museums in Katerynoslav and Kiev, and he published three poetry collections in 1917–18. After the war he studied at the Ukrainian Higher Ped-

agogical Institute in Prague, and in 1933 he moved to Transcarpathia, where he helped found the *Ethnographic Society of Subcarpathian Ruthenia and directed the Ethnographic Museum of Transcarpathia. He wrote some articles on Ukrainian ethnography and several collections of poetry, including *Pid siaivom voli* (Under the Gleam of Freedom, 1917) and *Neroztsvili ranky* (Unblossomed Mornings, 1923)

Oblast (*oblast'*). An administrative territorial unit of the USSR, introduced in 1931–2 in place of *okruhas. The term was used earlier, in the Russian Empire, for some territorial units, such as the *Oblast of the Don Cossack Host, the oblast of the Kuban Cossack Host, and (briefly) Bessarabia oblast. In 1932 the Ukrainian SSR was divided into 5 oblasts. By early 1939 the number had increased to 15, and by the end of the year 6 more oblasts had been added, when Western Ukraine was incorporated into the Ukrainian SSR. Two more oblasts were set up in 1940, 1 in 1944, and 1 in 1946. In 1954 Cherkasy oblast was added, the Crimean ASSR was incorporated into Ukraine as an oblast, and 4 oblasts were merged into 2. Since then Ukraine has been divided into 25 oblasts.

The oblasts were under republican jurisdiction. The

most important political organ in each oblast was the oblast Party committee, which was under the CC CPU. The highest representative body was the oblast soviet (now council), and the highest administrative body was the soviet's executive committee. The administrative apparatus of the oblast executive committee was under the dual jurisdiction of the oblast soviet and the appropriate republican ministries. The only exception was the KGB: its oblast agents were controlled from the center, although formally there were committees of state security at the oblast soviets. Until 1956 this exception also applied to the militia and the oblast courts.

The powers of the oblast administrative organs have varied, depending on the state's overall policies on economic management. In the 1930s oblast soviets were elected according to a system of oblast congresses, at which raion- and city-soviet delegates nominated and voted for candidates. Since 1937, however, oblast-soviet members have been elected to a two-year term by direct election. Until 1934 the administrative apparatus was organized on a collegial principle. Since then the organs have been headed by a chairman and various deputies and secretaries. The legal foundations of the oblast soviets are specified in the 1980 Statute of the Ukrainian SSR on the Oblast Soviet of People's Deputies. (See also *Administrative territorial division.)

A. Bilynsky

Oblast court. A court of the middle level that deals in the first instance with more serious criminal and civil matters, such as treason, first-degree murder, and divorce; oversees the work of the lower *people's courts; and hears appeals against the decisions of the lower courts. In addition, oblast courts handle the administration of the lower courts and oblast notaries, which before 1962 was handled by the territorial organs of the Ministry of Justice of the Ukrainian SSR. The oblast court consists of a chairman, deputy chairman, court members, and *people's assessors, all of whom are elected for five years by the oblast soviets of people's deputies. Oblast courts are divided into civil and criminal collegia, a presidium, a secretariat, and the respective administrative bodies. The structure and functions of the oblast courts are defined by the Law Concerning the Judiciary (1960).

In the 1930s the oblast courts played a key role in Stalin's terror. In 1934 a collegium of three professional judges called a *troika* was set up under each oblast court to hear political cases investigated by the NKVD. The proceedings of these extrajudicial courts were secret, and the accused were denied any civil rights. The *troiki* sentenced hundreds of thousands of innocent people to long imprisonment, exile, and death. From 1940 to 1959 political crimes were tried mostly by military courts and then were re-assigned to the oblast courts. Conducting closed trials, these courts sentenced hundreds of Ukrainian dissidents, human rights activists, and defenders of Ukrainian culture to hard labor for up to 15 years and in some cases to death. The courts were tightly controlled by the KGB and the Party. (See also *Court system.)

A. Bilynsky

Oblast of the Don Cossack Host. An administrative-territorial unit in the Russian Empire, situated in the basin of the middle and lower reaches of the Don River and incorporating most of the *Don region. The area was settled

primarily by Don Cossacks, though Ukrainians were concentrated in its western and northern parts. In 1914 the territory encompassed an area of 164,000 sq km and contained a population of 3.9 million. The Oblast of the Don Cossack Host (until 1870 known as the Don Cossack Land) was formally constituted in 1792; in 1887 it was enlarged to include Rostov county (from Katerynoslav gubernia) and the city and district of Tahanrih. Its administrative capital was Novocherkassk. The oblast was dismantled under Soviet rule in 1924, and the area now forms part of Rostov and Volgograd oblasts in Russia and Donetsk and Luhanske oblasts in Ukraine.

Obmiński, Tadeusz, b 16 April 1874 in Lviv, d 18 July 1932 in Lviv. Architect. A graduate of the Lviv Polytechnic (1898), he later taught there. Until 1914 he worked periodically for the firm of I. *Levynsky. He designed residential and public buildings in Lviv, including the Narodnyi Hotel (1909), in which he blended elements of wooden folk architecture with the Moderne style, and the Scientific-Technical Library of the Lviv Polytechnic (1932).

Obninsky, Viktor [Obnins'kyj], b 1867, d 1916. Russian politician and journalist. He was a representative of Kaluga gubernia to the First State Duma and a leading figure in the autonomist-federalist parliamentary faction, which later became the Autonomists' Union. He was an associate of *Ukrainskaia zhizn' and maintained close contact with the Society of Ukrainian Progressives during his regular visits to Kiev.

Obnova Society of Ukrainian Catholic Students (Tovarystvo ukrainskykh studentiv-katolykiv Obnova). A religious student organization established in Lviv in 1930. It formed part of the larger *Catholic Action movement and derived its name (*obnova*, meaning renewal) from the movement's motto, To Renew All Things in Christ. In the 1930s its membership was close to 100. Its first president was P. *Isaiv. With the Soviet occupation of Galicia Obnova was dissolved; it was revived only in 1946 in Munich as the Obnova Federation of Societies of Ukrainian Catholic Students. The new president was Ye. Pereima. By 1949 the federation's membership had reached 427. Also in 1946 the Obnova Ukrainian Catholic Academic Alliance was established, by a group of senior Obnova members. The first president of the alliance was V. Hlibovytsky; he was followed in 1951 by R. Danylevych. Both organizations had branches in many cities in Europe, the United States, Canada, and Australia. Obnova is a member of the Pax Romana international Catholic student movement. Its activities have included public lectures and readings, workshops, and conferences. It has also published information bulletins, brochures, the journal *Obnova*, a special page in the Chicago newspaper *Nova zoria*, and several volumes of the collection *Obnov'ianyyn*.

Obodovska, Raisa [Obodovs'ka, Rajisa], b 6 August 1948 in Starovirivka, Kharkiv oblast. Cyclist. She won the 1968 and 1969 world championships in the 3,000-m women's individual pursuit and was the women's champion of Ukraine and the USSR in this event many times.

Obolonsky [Obolons'kyj]. A family of Cossack *starshyna* and Russian nobility in Left-Bank Ukraine. It was estab-

lished by the Cossack Ivan at the end of the 17th century. His son, Vasyl, was captain of Sosnytsia company in 1715–16. Vasyl's son, Demian, (d 1758), was general standard-bearer of the Hetman state in 1741–58. At the Hlukhiv Council of 1750 that elected Hetman K. Rozumovsky Demian was chosen to head the Cossack delegation that thanked Empress Elizabeth I for allowing the election of a hetman. Demian received many landed estates from Elizabeth, and his son, also named Demian, owned 7,330 serfs in the late 18th century. The younger Demian's son was Oleksander *Obolonsky, whose son, Mykola (1856–?), was a professor of forensic medicine at Kiev University from 1889.

Obolonsky, Oleksander [Obolons'kyj], b 1825, d 23 October 1877. Editor and publisher. He met T. Shevchenko (1858) and published his works (in both the original and in Russian translation), as well as those of other Ukrainian writers, such as P. Kulish, Ya. Shchoholiv, and M. Vovchok, in his journal *Narodnoe chtenie*. In 1860 he also printed a renowned autobiographical letter from Shevchenko. After the journal closed down, Obolonsky worked in Poltava gubernia as a county marshal and zemstvo official.

Oborona Ukrainy (Defense of Ukraine). A Ukrainian political organization of a radical socialist profile, established in 1920 in the United States to assist the political and military struggles for independence in Western Ukraine. Until 1923 it was a small, clandestine organization; then it became a wider, public one with individual branches and an official newspaper, **Ukrains'ka hromada*. Its members dominated the leadership of the Ukrainian Workingmen's Association and worked closely with the Ukrainian Socialist Radical party in Western Ukraine. The group also fought with Ukrainian-American Communists on ideological matters and their efforts to expand their influence by infiltrating other Ukrainian community groups. Its leading activists included M. Sichynsky, M. Tsehlynsky, and Ya. Chyzh. During the 1940s some of its leaders, most notably Sichynsky and V. Levytsky, rejected the organization's program and adopted a pro-Soviet policy. The resulting crisis led to the dissolution of the association after its 1947 convention. Tsehlynsky's group published the journals *Oborona Ukrainy* and *Oborona* for a brief period thereafter and gained the co-operation of new émigrés who belonged to the left wing of the Ukrainian Revolutionary Democratic party, thereby laying the groundwork for the establishment of the *Ukrainian Free Society of America in 1949. The faction led by Sichynsky and Levytsky soon dissipated.

Oboznyi. A high-ranking elected position in the administrative and military hierarchy of the Cossack army and the Hetman state. The general *oboznyi* (see *general quartermaster) and the regimental *obozni* were second in command in their respective officer staffs. They were in charge of supplies and commanded the artillery. In 1835 the imperial government granted those officers and their families the status of hereditary nobility.

Obrazotvorche mystetstvo (Pictorial Art). An illustrated fine arts journal published in Kiev in 1935–41 (a total of 61 issues). Until 1939 it was called *Maliarstvo i skul'ptura*

and was the organ of the Ukrainian Union of Soviet Artists and Sculptors. From 1939 it was called *Obrazotvorche mystetstvo* and was published by the Administration of Artistic Affairs of the Council of People's Commissars of the Ukrainian SSR and the Ukrainian Union of Soviet Artists. The journal propagated the official style of *socialist realism.

Obrazotvorche mystetstvo (Pictorial Art). An illustrated journal published six times a year in Kiev since 1970 by the Ministry of Culture of Ukraine and the Union of Artists of Ukraine. It contains articles on the history of Ukrainian and Russian art, Ukrainian and other artists, and developments in art, as well as art news, criticism, and reviews. The journal was initially published in a pressrun of 16,700, but by 1991 only 3,800 copies were being printed. Its chief editors have been P. Hovdia, O. Zhuravel, and since 1992 M. Marychevsky.

Vasilii Obratstov

Obratstov, Vasilii [Obratcov, Vasilij], b 13 January 1849 (or 1851) in Griazovets (or Vologda), Vologda gubernia, Russia, d 14 December 1920 in Kiev. Russian internal medicine specialist. A graduate of the St Petersburg Medico-Surgical Academy (1875), he was a professor at Kiev University, where he also directed the internal medicine clinic (1904–18), and president of the Kiev Physico-Medical Society and the Society of Kiev Physicians. In his doctoral dissertation (1880) he demonstrated the existence of intermediary stages in the development of red blood cells, which demonstration led to the unitarian theory of blood formation. He developed a method of testing the organs of the abdominal cavity and a technique of sounding the chest. Obratstov was the founder of the Kiev school of internal medicine, which had an important influence on the development of medicine in the Soviet Union.

Obrii (Horizons). A nationalist literature and art weekly published in Lviv in 1936–7. Its editor was B. *Kravtsiv.

Obriist, Johann Georg, b 26 May 1843 in Jenbach, Tirol, d 18 April 1901 in Innsbruck. Austrian literary scholar and journalist. From 1868 to 1873 he taught in Chernivtsi. He was one of the first ethnic Germans to write about and translate the poetry of T. Shevchenko. His critical biography *Taras Grigorievich Szewczenko, ein kleinrussischer Dichter* (1870) included his free translations of 14 poems. His translations also appeared in the collection *Taras Schewtschenko, der grösste Dichter der Ukraine* (Vienna 1914).

Observatories. Scientific research institutions in the field of astronomy. Their chief purpose is to observe light sources in outer space and to interpret the observations. The work of all observatories in the USSR was co-ordinated by the Astronomical Council of the USSR Academy of Sciences. In Ukraine the *Crimean Astrophysical Observatory belonged to the USSR Academy of Sciences until 1992; the Main *Astronomical Observatory and the *Poltava Gravimetric Observatory came under the AN URSR (now ANU). Other astronomical observatories are found in Kiev, Lviv, Kharkiv, Mykolaiv, and Odessa. (See also *Astronomy.)

Obshchina. The Russian word for an agricultural commune, the dominant institution of ethnic Russian peasant agriculture until the Revolution of 1917. Arable land, meadows, and pastures were held communally by the *obshchina*. Fields were divided into sections whose size varied with the quality of the soil and distance from the village. Each peasant household had the right in every section to cultivate one or more strips according to the number of its adult members. Since households grew or diminished over time, every 9 to 15 years the commune took its own census, on the basis of which it carried out an equalized reallocation of the strips.

In Ukraine there were various forms of agricultural associations (see **Hromada* and **Land tenure system*). The *obshchina* system began developing there only in the second half of the 18th century, after it was introduced by certain landowners during the settlement of Southern Ukraine. The *obshchina* became more widespread as a result of the agrarian reforms that accompanied the emancipation of the peasantry in 1861. The reforms granted village communes, but not individual peasants, the right to redeem land from the gentry landowners. Although the majority of peasant households received land as full-fledged owners, in the steppe gubernias of Katerynoslav, Kharkiv, and Kherson land awarded to the peasants was, for the most part, placed at the disposal of peasant communes on the pattern of the *obshchina*. In those gubernias 89–95 percent of all land was distributed through the communes. In contrast, in Chernihiv gubernia the figure was 52 percent, and in the Right-Bank gubernias and Poltava gubernia only 5–7 percent of land was distributed through the communes. The fiscal needs of the state, namely the tradition of holding all members of the *obshchina* collectively responsible for tax collection, were the main factor behind the introduction of the *obshchina* in Russian-ruled Ukraine. In the Ukrainian gubernias that were formally under the rule of communal land ownership, however, 80.2 percent of the communes did not periodically reallocate land, whereas the typical *obshchina* in Russia proper did. The movement to leave the *obshchina* and pursue private farming initiated in 1906 by the **Stolypin agrarian reforms* was particularly strong in Ukraine. There 42 percent of peasant households belonging to peasant communes in Southern Ukraine, 16.5 percent in Left-Bank Ukraine, and 48 percent in Right-Bank Ukraine seceded. That trend accelerated during the years 1906–17 and became almost universal in Ukraine after the February Revolution.

I. Vytanovych

Obstetrics (*akusherstvo*). The medical specialty that deals with pregnancy, labor, birth, and puerperium. Midwifery from time immemorial was almost exclusively a women's field. The Ukrainian N. **Ambodiyk-Maksymovych* was the founder of medical obstetrics in the Russian Empire. The level of maternal mortality is still significantly higher in the former USSR than in other European countries. In Ukraine maternal mortality due to complications of pregnancy, birth, or the postnatal period was (per 100,000 births) 68 in 1980, 54 in 1985, and 50 in 1988. The instances of perinatal mortality (per 1,000 births) in Ukraine in 1988 numbered 14.3, including 9 stillbirths.

At present the Institute of Pediatrics, Obstetrics, and Gynecology in Kiev is the most important scientific research center of this branch of medicine in Ukraine. Founded in 1929 as the Ukrainian Scientific Research Institute of Maternity and Childhood Care, it was renamed in 1965 and today is under the Ministry of Health. In 1981 the institute initiated the creation of the Ukrainian Republican Center for Mother and Child Health Care. In Lviv the Institute of Pediatrics, Obstetrics, and Gynecology, also under the Ministry of Health, was founded in 1940 as the Lviv Scientific Research Institute of Motherhood and Childhood Care and renamed in 1983. Scientific societies of obstetricians have held conferences and workshops to deal with the prophylaxis and treatment of complications stemming from pregnancy, labor, and puerperium, as well as the care of the newborn and other gynecological matters. The journal **Pediatriia, akusherstvo i hinekolohiia* is published bimonthly in Kiev by the Ministry of Health.

Obukhiv [Obuxiv]. III-11. A city (1990 pop 31,800) and raion center in Kiev oblast. It was first mentioned in historical documents of the 14th century under its original name of Lukavytsia. The town was the site of several battles during B. Khmelnytsky's uprising against the Poles. In the Hetman state it was a company center of Kiev regiment. By 1845 it was known for its textile and brick manufactures. In 1872 a distillery was built. Today Obukhiv produces paper and cardboard, bricks, and dairy products.

Obydovsky, Ivan [Obydovs'kyj], b 1676, d 1701. Cossack officer; nephew of Hetman I. **Mazepa*. He graduated from the Kiev Academy, served as colonel of Nizhen regiment (1695–1701), and participated as acting hetman in wars against Turkey (1695) and Sweden (1700–1). Obydovsky was Mazepa's heir presumptive; he received the high administrative rank of *stolnyk*, obtained substantial land grants in Russia and Slobidska Ukraine, and married

the daughter of V. *Kochubei. He died prematurely, however, and in 1701 Mazepa chose another nephew, A. Voinarovsky, as a potential successor.

Obytochna River [Obytočna]. A waterway in Zaporizhia oblast. It is 100 km long and drains a basin area of 1,430 sq km. The river flows into the Sea of Azov at Obytochna Bay. It has a reservoir, and its waters are used for industry, irrigation, and pisciculture.

Obytochna Spit

Obytochna Spit [Obytočna kosa]. VII-17. A crustose sand spit on the northern littoral of the Azov Sea. It extends approx 30 km into the sea between Obytochna and Berdianske bays. During the autumn and spring the narrowest stretch of the spit, which is approx 8 m wide, is flooded. It provides a large spawning area for ocean fish and a nesting ground for water birds. Obytochna Spit has been designated a wildlife refuge.

Oceanology or oceanography. The study of the oceans and seas in all their aspects, including their physical, geological, and biological properties. Before 1917 only marine biology and marine chemistry were developed in Ukraine, mostly under the auspices of the Imperial Russian Academy of Sciences (M. Andrusiv, N. Zelinsky, and S. Zernov). The research was concentrated at the Sevastopol Biological Station (SBS, est 1872) and was focused principally on the Black Sea.

In 1963 the SBS was reorganized into the *Institute of the Biology of Southern Seas of the AN URSS (now ANU). Later that year, two smaller biological research stations, at Kara-Dag, near Teodosiia (est 1914), and at Odessa (est 1954), were turned into branches of the institute. Field studies at the institute expanded in scope and diversity when two new research vessels, the *A. Kovalevsky* and the *N. Miklukho-Maklai*, were commissioned. The Marine Hydrophysical Institute was transferred in 1961 from the USSR Academy of Sciences in Moscow to the ANU and moved to Sevastopol. Its large research vessel, the *M. Lomonosov*, was capable of all-weather ocean research. The institute's branch at Katsiveli, west of Alupka, continued to serve as an experimental station for testing new equipment. A second branch was opened in Odessa in 1986 to study economic issues of ocean exploration and human-induced phenomena in the coastal seas. In 1973 the USSR Oceanographic Institute in Moscow, which came under the State Committee on Hydrometeorology and Environmental

Monitoring and had branches in Odessa and Sevastopol, launched a major program in marine geology, ocean dynamics, and pollution. The Azov-Black Sea Scientific Research Institute of Fishery and Oceanography in Kerch expanded its global explorations for ocean fisheries.

In its quest for rapid economic and military growth the Soviet government in the 1960s and 1970s increased funding for theoretical and field research in oceanography. By the end of the 1970s more than 20 large ocean-going research vessels were operating from Ukrainian ports. Highest priority was given to, and vast funds channeled into, programs that had some application to submarine warfare (acoustics, subtle ocean structures, sea-ocean connections), a rapid increase in food resources (marine biology), the assimilation of Western technology, and the spreading of propaganda abroad. As a result Soviet oceanographers made unprecedented progress in areas such as oceanic turbulence, vertical water structure, the interaction between inanimate and living matter, sedimentation, oxic-anoxic microbial processes, and underwater acoustics. In an effort to prevent the rapid degradation of the coastal waters and estuaries the effects of pollution in the regions concerned were studied at the Institute of the Biology of Southern Seas and the ANU *Institute of Hydrobiology in Kiev.

In the 1980s, however, Soviet oceanography fell behind the achievements in the West, because of the general technological gap between the two societies. Space oceanography, free suspended floats, completely automated instrumentation, new methods in chemistry and biology, and new drilling techniques in the West could not be matched by Soviet science. The economic restructuring in the late 1980s signified a virtual end to large-scale research in oceanography. The large fleet of research vessels has become obsolete. Funds for oceanographic research have been channeled into other programs. The emphasis has shifted to methods of improving coastal marine systems, conserving water, exploring the adjacent seas prudently, and halting the degradation of the landlocked seas.

Ochakiv [Očakiv]. VII-12. A city (1990 pop 19,400) at the mouth of the Dnieper Estuary and a raion center in Mykolaiv oblast. It is believed that a Greek colony existed at the site of present-day Ochakiv in the 7th and 6th centuries BC. In the 14th century the Lithuanian grand duke Vytautas built a fortress called Dashiv there. At the end of the 15th century the territory along the northern coast of the Black Sea came under Crimean Tatar control, and the Tatars erected a fortress on the site. Soon the Turks established their power over the Tatars and the Black Sea steppe. The name Ochakiv is derived from the Turkish name of the fortified settlement, Achi-Kale. In the 16th and 17th centuries the Zaporozhian Cossacks stormed Ochakiv many times. After Russia acquired the territory from Turkey in 1791, Ochakiv grew rapidly. As a port it

Ochakiv (1737 German engraving)

has always been an important trade and fishing center. Today it has a fish-canning complex, wineries, and sewing factories. There are several museums and many sanatoriums in the vicinity.

Ocher. An earthy iron ore, usually red or yellow; also any of the ferruginous clays. It is used extensively as a pigment in ceramics and paint-making. In Ukraine ocher is found in the Boh River valley, in the Donets Basin, and on the Kerch Peninsula. In prehistorical times ocher had an important cult function. In the Trypilian culture, corpses that were being buried were stained with ocher. The substance was also used as a pigment for the distinctive Trypilian earthenware.

Ochkove. A tax in kind on honey in 16th- and 17th-century Ukraine. Peasant beekeepers were taxed according to the number of hives they kept. The tax varied at different times from 25 to 50 percent of the honey harvest. Its name was derived from *ochko* (the entrance to a hive).

Ochrymovych, Ariadne [Oxrymovyč, Arijadna], b 21 June 1947 in Wels, Austria. Film director and producer of Ukrainian origin. Ochrymovych came with her parents to Canada in 1949. A graduate in literature of Carleton University (MA, 1974) and in motion picture production of Ryerson Polytechnical Institute (1976), she has produced and directed a number of CBC television dramas, such as *Billy Goat's Bluff* (1982) and *The Juggler* (1983), the National Film Board of Canada series *The Feminization of Poverty* (1986), and the documentary *Playing for Keeps* (1989), and directed a film production on drug abuse (1990). Her own company is called Black Sea Productions.

O'Connor-Vilinska, Valeriia [Vilins'ka, Valerija], b 21 December 1867 in Mykolaivka, Kremenchuk county, Poltava gubernia, d 19 December 1930 in Poděbrady, Bohemia. Writer and community figure; sister-in-law of M. *Lysenko and niece of M. *Starytsky. As a young woman she ran a Ukrainian school and folk theater in Mykolaivka. Later she taught at the Kharkiv eparchial school, was a member of the Publishing Committee of the Kharkiv Literacy Society, and wrote educational pamphlets and feuilletons in the local newspaper. After the Revolution of 1905

Valeriia O'Connor-Vilinska

she lived in Kiev, where she wrote the plays *Instytutka* (The Girls' School Pupil) and *Storinka mynuloho* (A Page from the Past). In 1917 she was in the first executive committee (later Little Rada) of the Ukrainian Central Rada and in the presidium of the Ukrainian National Theater society. In 1919 she emigrated with her husband, O. *Vilinsky, to Vienna and then Poděbrady, where she wrote the novelette *Skarb* (The Treasure, 1924), parts of a long novel-chronicle, *Na emigratsii* (In the Emigration), and memoirs of the Lysenko and Starytsky families (1936). Her works and translations of French literature appeared in *Literaturno-naukovyi vistnyk* (Kiev), *Siaivo* (Kiev), *Volia* (Vienna), *Nova Ukraïna* (Prague), and other periodicals. She committed suicide.

October Revolution of 1917 (Zhovtneva revoliutsiia). The Bolshevik coup staged on 25 October (7 November NS) 1917 in Petrograd (formerly St Petersburg) precipitated a full-scale revolution in Russia and the outlying territories that had formerly constituted parts of its empire. After the fall of the tsarist regime following the *February Revolution of 1917 the *Provisional Government assumed power. It was unable, however, to control the volatile social and political conditions in the former empire. As their immediate goal the majority of the population wanted Russia to pull out of the First World War. As a broader goal they demanded wide-ranging social reforms and the redistribution of land. The non-Russian peoples of the empire wanted national autonomy and equality. Meanwhile the Bolsheviks and other left-wing groups, whose power base consisted of workers' and soldiers' councils (soviets), pressed for a continuation of the revolution. The ineffectiveness and growing unpopularity of the Provisional Government made it feasible for them to consider continuing it through force of arms.

The principal organizer of the October Revolution was the *Russian Social Democratic Workers' party (Bolshevik), whose chief ideologue was V. *Lenin. On the eve of the revolution L. *Trotsky, the head of the Military Revolutionary Committee of Petrograd, had almost all of the locally stationed troops and a large part of the workers under his control. On the night of 7 November he mounted an armed insurrection and arrested the members of the Provisional Government. The Second All-Russian Congress of Workers' and Soldiers' Deputies, in which the Bolsheviks had a majority, then announced that the sovi-

ets had taken power. They formed the first Soviet government, the Council of People's Commissars (Sovnarkom). It was headed by Lenin, and included Trotsky, A. Lunacharsky, A. Rykov, and J. Stalin. The Sovnarkom issued a series of decrees concerning peace, land, the establishment of workers' control, and the nationalization of all heavy industry. It also issued the Declaration on the Rights of the Peoples of Russia on 15 November 1917, in which the equality of all peoples was proclaimed, and in which the 'right of self-determination, even unto separation' was formally recognized.

By early 1918 the Bolsheviks had managed to seize power fairly easily in most cities and gubernias of Russia. They attempted to stage a similar coup in Ukraine but found considerably stronger opposition. The support for the Bolsheviks was much weaker there, where there were only 5,000 members of Bolshevik organizations (almost exclusively located in the cities). They consisted primarily of Russian or Russified working-class elements in the Donbas region, Katerynoslav, and Kharkiv. Moreover the *Central Rada managed to consolidate its hold on power and on support among the Ukrainian masses through its national and socialist policies.

In the early stages of the October Revolution there was also a third force in Ukraine, the Russian administration of the Provisional Government and the Army Staff of the Kievan Military District, which supported the Russian administration. Under threat of Russian right-wing elements in Kiev, the Central Rada, together with socialist groups of national minorities, established the National Committee for the Defense of the Revolution, in which the Bolsheviks initially also participated. The Bolsheviks left to form their own revolutionary committee after the Rada refused to recognize the Soviet government in Petrograd. The initial round of fighting between the three forces resulted in a victory for the Central Rada and the proclamation of the *Ukrainian National Republic (UNR) on 20 November 1917.

Although the Bolsheviks' attempts to seize power in Ukraine as a whole failed at first, they managed to gain control of Kharkiv and some Russified cities in the Donbas region through their workers' and soldiers' soviets. They hoped to achieve a formal proclamation of soviet power at an *All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies, which they convened on 17–19 December in Kiev. The peasant-dominated congress failed to support the Bolsheviks (fewer than 100 of the more than 2,000 delegates were Bolshevik supporters), however, and even gave the Rada a vote of confidence. The pro-Bolshevik delegates reconvened a week later in Kharkiv at an All-Ukrainian Congress of Soviets that included a greater number of deputies from the Donets and Kryvyi Rih regions. On 25 December 1917 that congress proclaimed Soviet rule in Ukraine and elected a central executive committee of Ukraine and a government body, the *People's Secretariat. That body contended for legitimacy with the Central Rada and its General Secretariat.

The creation of a rival Soviet government in Ukraine made it possible for the subsequent armed intervention by Bolshevik troops from Russia during the *Ukrainian-Soviet War to be presented as a class rather than a national struggle. It also marked an important turning point in Ukraine's struggle for *independence, as the Bolsheviks demonstrated their willingness to force their state struc-

ture onto Ukraine in spite of the almost total absence of popular support.

Octoechos (Ukrainian: *oktoikh* or *os'mohlasnyk*), from the Greek for 'eight' and 'voice.' A *liturgical book used in the Eastern Catholic and Orthodox churches. It contains the texts and notes sung by precentors or the faithful for matins, vespers, and the Divine Liturgy. Each week in the liturgical cycle has a specific tone or mode, used to sing the troparion, kondakion or canticle, and other melodies. In total there are eight tones that alternate throughout the year. The first Octoechos was translated from Greek into Church Slavonic by ss Cyril and Methodius, and the first printed Eastern Slavic Octoechos was published in Cracow in 1491.

Serhii Odainyk: *Hutsul Wedding* (1970)

Odainyk, Serhii [Odajnyk, Serhij], b 16 November 1949 in Kiev. Painter. Odainyk graduated from the Kiev State Art Institute in 1973. His seemingly realistic depictions often suggest an atmosphere of mystery (eg, *Sounds of Summer*, 1980). Odainyk participated in the Young Artists from Ukraine exhibition held in Moscow in 1985. There his figural compositions, such as *Inspiration* (1980) and *Memory* (1983), conveyed a restlessness and sense of impending drama.

Petro Odarchenko

Odarchenko, Petro [Odarčenko], b 20 August 1903 in Rymarivka, Hadiache county, Poltava gubernia. Literary scholar and folklorist; full member of the Ukrainian Academy of Arts and Sciences since 1962 and the Shevchenko Scientific Society since 1975. He studied at the Nizhen Institute of People's Education (1923–6) and then taught there (1928–9), did graduate work at the Nizhen Research Department of the History of Culture and Language (1926–9), and collected materials for the VUAN Ethnographic Commission. In October 1929 he was imprisoned for six months as a counterrevolutionary and then exiled to Alma-Ata in Kazakhstan, and in December 1933 he was imprisoned for another six months and then exiled to Uralsk. From 1938 to 1941 he taught in Kursk, Russia. In 1943–4 he taught at the Orthodox Seminary in Warsaw. As a postwar émigré he taught at the Theological Academy of the Ukrainian Autocephalous Orthodox church in Munich and edited Ukrainian books and periodicals. He settled in the United States in 1950 and worked as a translator and editor for the Voice of America in Washington (1954–73). He has written numerous articles, encyclopedia entries, and reviews on Ukrainian literature (particularly on Lesia Ukrainka and T. Shevchenko), ethnography, language, and orthography, and publicistic articles about Soviet Ukraine. His biobibliography was published in 1973.

Odess. An ancient Greek settlement on the coast of the Black Sea somewhere between the Boh and the Dniester rivers. It is mentioned in the works of F. Arrian and, as Ordess, in Pliny and C. Ptolemy. Various sites have been proposed by modern scholars, among them the shore of Berezan Liman or Tylihul Estuary and Morske village in Berezanka raion, Mykolaiv oblast.

Odessa (Ukrainian: Odesa). VII-11. The fourth-largest city (1990 pop 1,106,000) in Ukraine and the capital of Odessa oblast. It is a major port on the Black Sea, a commercial, industrial, cultural, and administrative center, and a transportation terminal.

Geography. Odessa is situated on a large, virtually ice-free bay on the Black Sea, near the mouths of the Danube, Dniester, Boh, and Dnieper rivers, which link it with the interior of the country. Most of the city stands on a plateau built of Pleistocene strata of clay and chalk, which are covered with brown clays and loess. The plateau rises 50 m

Odessa's skyline

above the Black Sea Lowland and falls abruptly in the east to the sea. The edge of the plateau is pushed back by sea erosion, which causes massive landslides. The mining of local chalk for building purposes has produced a labyrinth of underground tunnels. The Odessa Plateau is divided by the Karantynna, Voienna, and Vodiana ravines, which connect the upper parts of the city with the low-lying port. The northern district of Odessa, known as Perysyp, is situated between the sea and the Kuialnyk and Khadzhybei estuaries, on a plain only a few meters above and in some places a meter below sea level. A sea wall has been built to protect that area from flooding.

Odessa lies in a zone with a steppe climate, which is moderated by the sea. The average annual temperature is 9.6°C, the average July temperature 22.1°C, and the average January temperature –2.8°C. The annual precipitation is 351 mm, most of which (236 mm) falls during the warm season. There are 285 sunny days per year. Odessa's port freezes over for only 15 days a year, but the thin ice does not impede shipping. Because of the absence of large sources of fresh water nearby, an aqueduct had to be built from the Dniester River to the city (1873).

History. In prehistoric and early historical times the site of present-day Odessa was settled by various peoples and tribes, among them the Cimmerians, Scythians, Sarmatians, and Greeks. During the time of Kievan Rus' the territory was inhabited by the Ulychians and Tivertsians. In the 14th century Kachybei (Haczbei) settlement and harbor arose. They were fortified at the beginning of the 15th century by the Lithuanian grand duke Vytautas. In 1480 the fortress was captured by the Turks and renamed Hadzhybei or Khadzhybei. In 1764 the Turks reinforced their position by building the Yeni-Dunya fortress nearby. In 1789, during the Russo-Turkish War, the Russian army and the Zaporozhian Cossacks led by A. Holovaty and Z. Chepiha took the fortress and settlement, and in 1792 the territory was transferred to Russia under the terms of the Treaty of Iași. In 1792–4 Hadzhybei was rebuilt under the supervision of Field Marshal A. Suvorov as a fortress and naval port. In 1795 it was renamed Odessa under the mistaken assumption that the Greek colony of Odess had occupied the site from the 4th century BC to the 4th century AD. In 1795 the population of Odessa was 2,300.

Because of Odessa's geographical location and the rapid colonization of the steppes, Catherine II decided to develop the town into a large port and trade center. In 1797–1802 Odessa belonged to New Russia gubernia. In 1803 the town and its vicinity were turned into an autonomous administrative unit, the Odessa *gradonachalstvo*, which with the rest of Odessa county formed part of Kherson gubernia. At the same time Odessa was the seat of the governor-general of New Russia krai (1805–74). The governor-generals of the krai, Duke A.E. de Richelieu (1803–14), Count L.-A. Langeron (1816–23), and Prince M. Vorontsov (1823–45), served as the first chiefs of the *gradonachalstvo*. By 1815 Odessa was already handling more than half of all the freight passing through the Black Sea and Azov Sea ports. Most of it consisted of wheat and, to a lesser extent, wool exports. Odessa's status as a duty-free port from 1819 to 1849 encouraged trade, especially imports. From the 1830s to the 1850s Odessa became the largest wheat exporter on the Black Sea and in the Russian Empire, and by 1874, in all Europe. Its trade volume increased dramatically, from 5.7 million rubles (3.7 export, 2 import) in 1822 to 10.1 million (6.4 and 3.7 respectively) in 1832, 26.4 million (19.3 and 7.1) in 1852, and 38.9 million (28.3 and 10.6) in 1862. At the same time the city's population grew, from 3,700 in 1800 to 12,500 in 1808, 35,000 in 1815, 53,000 in 1829, 73,000 in 1837, and 116,000 in 1861. In the 1830s Odessa was already the largest city in Ukraine, and it retained that position until 1918. Its ethnic composition was diverse: in 1861 fewer than 50 percent of its inhabitants were Ukrainian or Russian, about 25 percent were Jewish, and over 25 percent were Bulgarian, Greek, French, Italian, German, Polish, and Moldavian.

Regarding Odessa as the 'southern window to Europe,' the Russian authorities paid a great deal of attention to its appearance. Odessa is one of the few planned cities in Ukraine. F. de Voland's plan of 1794 was the basis of the general plan for development adopted in 1803. The streets were laid out in a grid. Prymorskyi Boulevard, built up in 1826–9, was the administrative district. The great staircase (1837–41) descended from it to the port. The building ensembles were constructed in the classical style by architects such as A. Melnikov, T. de Tomon, F. Boffo, and E. Kozlov. The city's development was interrupted briefly by the Crimean War (1853–6). In 1854 Odessa was bombarded by the British and the French, who attempted to land their troops there.

The quickened pace of development in the 1860s and 1870s was spurred by the construction of railways connecting Odessa with the hinterland. The first lines extended to Balta (1865) and Yelysavethrad (1869). The Suez Canal, constructed in 1869, linked Odessa by sea with India, eastern Asia, and the Far East. Before the Trans-Siberian Railway was built, the Odessa–Vladivostok shipping line was the primary means of communication between European Russia and the far eastern reaches of the empire. The volume of trade in Odessa climbed steeply, to reach 129 million rubles in 1893 and peak at 174 million rubles in 1903. After St Petersburg, Odessa became the second most important port in the Russian Empire. It handled 20–25 percent of the empire's exports and 8–10 percent of its imports. As in the previous period, Odessa exported mostly grain, followed by sugar and other agricultural products. The main imports were colonial commodities, such as tea, and in the years before the First World War,

Odessa's port

petroleum products, coal, and cement. The port was reconstructed and modernized to handle the increased volume of freight. In the 20th century Odessa's volume of freight decreased, because of competition from other Black Sea ports, such as Mykolaiv, Kherson, and Novorossiisk, particularly in the export of wheat. Yet Odessa retained its position as the largest port of the Black Sea–Azov Sea Basin and the most important trade center in Ukraine.

An increasing proportion of the city's economy consisted of processing agricultural products and imported raw materials. The food industry developed first and accounted (by the end of the 19th century) for 66 percent of the city's industrial output (by value). Its main branches were flour milling (by 1869, 12 steam mills were producing 3.6 million rubles' worth of flour), tobacco processing (by 1869, 15 factories were producing 1.9 million rubles' worth of goods), and sugar refining (a large refinery was built in 1879). By the beginning of the 20th century sugar refining was the chief branch of the food industry, followed by tea packing and flour milling. The metallurgical and metalworking industries developed later and by the late 1890s accounted for 12 percent of the value of industrial output and 24 percent of the labor force. The more important plants in that sector were the Restel Pig Iron Foundry (est 1844), the Ghen Agricultural Machinery Factory (est 1854), the Russian Steam Navigation and Trading Company (est 1858; 800 workers), the Bellino-Fenderikh Machine Works (est 1875), the railway repair yards (est 1864; 1,000 workers), the New Russia Machine-Building

An arch of the former quarantine building in Odessa, with cranes of the port in the background

Company (est 1884), and the Shpoliansky Metallurgical Plant (1885). In light industry the largest firms were the Novikov Cable Company, the jute factory (1,200 workers in 1908), and the Arps Cork Plant (1,000 workers in 1912). The other important industries in Odessa were the construction industry and the chemical industry (varnish, paint, and superphosphates). From 1859 to 1914 the number of factories in Odessa increased from 53 to 420, the number of factory workers, from 1,000 to 30,000, and the value of industrial output, from 4 million to 100 million rubles.

Odessa's economic development was accompanied by rapid population growth. In 1875 the city had 193,000 inhabitants, in 1897, 404,000, and in 1914, 669,000. Odessa was the fourth-largest city in the Russian Empire (after St Petersburg, Moscow, and Warsaw). The number of Jews rose sharply. Of the major cities in Ukraine Odessa had the smallest proportion of Ukrainian residents. In 1897 Ukrainians (by native language) accounted for only 5.7 percent of the city's population, compared to Russians at 50.8 percent, Jews (Yiddish speakers) at 32.5 percent, Poles at 4.5 percent, Germans at 2.6 percent, and Greeks at 1.3 percent.

The city grew rapidly in the second half of the 19th century. In the central district population density increased, and a number of imposing buildings were added – the opera house (burned down in 1873 and rebuilt in 1883–7), the stock exchange (1898), and the research library. A number of industrial and working-class suburbs arose – Peresyp in the north and Slobidka, Romanivka, and Moldavanka in the west. Along the coast south of the port some villas and cottages with much greenery sprang up. In 1873 an aqueduct carrying potable water from the Dniester River and in 1877 a sewage system (the first in the Russian Empire) were built. A horse-drawn tram (1880) and omnibus (1899) were not replaced by an electric streetcar system until 1910. Gas street lighting was introduced in 1866 and was supplemented with electric lighting in 1880. Almost all buildings were built of stone, and many (40 percent) were three or more stories high. The well-designed and maintained city center contrasted sharply with the slums of the industrial suburbs.

During the first few decades of its history Odessa be-

The Potemkin stairs in Odessa (1841)

came the leading cultural center of Southern Ukraine. The dominant culture and language of the city were Russian, but in the second half of the 19th century a Ukrainian cultural movement gathered momentum. The city's sizable Jewish and German communities developed their own distinctive cultural forms, which spread widely through Ukraine.

The *Richelieu Lyceum was founded in 1817 and was reorganized, eventually, into *Odessa University (est 1865). In 1825 the first municipal museum of antiquities in Ukraine (later the *Odessa Archeological Museum) was founded, and in 1839 the *Odessa Society of History and Antiquities was organized. The Odessa Public Library was opened in 1829. The Odessa Society of Naturalists became active in 1869. In 1871 an astronomical observatory and in 1886 the first bacteriological laboratory in the Russian Empire were set up. The City Museum of Fine Arts (now the *Odessa Art Museum) was founded in 1899. The *Odessa Bibliographic Society, the first of its kind in Ukraine, was active in 1911–22. The more noted scholars who lived and worked in Odessa were M. Andrusiv, M. Hamaliia, V. Hryhorovych, O. Zahorovsky, N. Kondakov, A. Kovalevsky, M. Komarov, A. Kochubinsky, I. Lynnychenko, O. Markevych, I. Mechnikov, D. Ovsianiko-Kulikovsky, M. Pirogov, L. Symyrenko, A. Skalkovsky, V. Filatov, and V. Jagić.

Odessa was an important musical center. Its opera house was built in 1810 (see *Odessa Opera and Ballet Theater). A philharmonic society, formed in 1839, organized concerts. In 1897 a school was set up by the Russian Music Society; it was later reorganized as the *Odessa

Building of the Odessa Oblast Philharmonic

Conservatory. In the late 19th and early 20th centuries the prominent musicians or composers P. Sokalsky, P. Nishchynsky, and M. Arkas lived and worked in Odessa. In 1803 the first amateur theatrical productions were staged. In 1827–43 the Ukrainian-Russian companies of I. Shtein, K. Zelinsky, and P. Rekanovsky, as well as Italian and French companies, performed there. In 1871 M. Kropyvnytsky made his theatrical debut in Odessa, and in 1883 his troupe established its base there. M. Starytsky's and P. Saksahansky's troupes also visited Odessa.

Odessa painters contributed to the development of painting in Ukraine. The Odessa Society of the Advancement of the Fine Arts set up a drawing school in 1865, which was converted in 1885 into a secondary school and in 1899 into an art school under the St Petersburg Academy of Arts. V. Pavlovsky, K. Kostandi, and G. Ladyzhensky were active in the society and the school. The *Society of South Russian Artists, which included P. Nilus and B. Edwards, was active in 1890–1922.

Odessa developed into an important publishing center. In 1828–60 about 700 books were published there, 530 of them in Russian and only one, *Marusia: Kazka* (Marusia: A Story, 1853), in Ukrainian. In 1864 the Russian-language newspaper *Odesskii vestnik* (1827–93) became the first daily to come out in Ukraine. Ukrainian publishing developed late in the 19th century. In 1883–7 some 44 Ukrainian titles were published in Odessa, including the almanac *Nyva* (1885). Some almanacs, such as *Z-nad khmar i dolyn* (edited by M. Vorony, 1903) and *Bahattia* (edited by I. *Lypa, 1905), came out before the war. The poetry anthology *Vinok T. Shevchenkovi* (A Wreath for T. Shevchenko) appeared in 1912. The *Literaturno-naukovyj vistnyk* in Kiev, which was banned by the Russian authorities, was replaced by the journal *Osnova* in Odessa (1915).

The development of publishing was closely connected with the development of Ukrainian cultural and educational life. The Odessa Hromada sprang up in the late 1860s and maintained strong links with the Hromada of Kiev and M. Drahomanov's circle in Geneva (see *Hromadas). Komarov headed the local Prosvita society (est 1906), whose executive council included Lypa, S. Shelukhyn, A. Nikovsky, and M. Slabchenko. It maintained a library and bookstore and published books and two newspapers, *Narodna sprava* and *Visti*. Thanks to its initiative the first

Ukrainian-language lectures at Odessa University were delivered, by O. Hrushevsky in Ukrainian history. After the Prosvita society was disbanded by the Russian authorities in 1910, its activities were continued by the Ukrainian Club, until 1914.

In the 1870s Odessa was one of the centers of the populist movement. In 1905 the crew of the battleship *Potemkin* staged a mutiny, and workers' demonstrations in Odessa were ruthlessly suppressed.

After the February Revolution of 1917 the Ukrainian Revolutionary Committee took control of Odessa, and Lypa was appointed the city's commissar. In November 1917 the Ukrainian Haidamaka Battalion clashed with the Bolsheviks. In January 1918 Bolshevized units from the Rumanian front took Odessa and were joined by M. Muravev's detachments. In March Odessa was occupied by the Germans and Austrians, who were allies of the UNR. The supreme command of the Austrian army made its headquarters in the city. In 1918, three Ukrainian dailies were published there, *Vil'ne slovo*, *Vistnyk Odesy*, and *Moloda Ukraina*. In December 1918 Odessa came under the UNR Directory's control, and the municipal government was headed by I. Lutsenko. By year's end the city had been captured by British, French, and Greek expeditionary forces, supported by local Whites. The Russians took over the municipal administration. In April 1919 the allies were expelled by N. Hryhoriiv, who had gone over from the Directory to the Bolsheviks. From August 1919 to February 1920 Odessa was held by A. Denikin, except for a brief interval at the end of 1919 and the beginning of 1920, when the rear guard of the Ukrainian Galician Army was stationed in the city. Having established their power in Odessa by February 1920, the Bolsheviks turned it into a gubernia capital. Odessa suffered heavier losses in 1917–20 than any other city in Ukraine. All foreign trade was suspended because of the war. The suburbs were scarred by the fighting, and many factories were completely destroyed. Many of the residents fled from the city, and some of them emigrated in order to escape from the Bolsheviks. By 1920 the city's population was only 428,000. The famine of 1921–2 caused further loss of life: in 1923 the population stood at 324,000, or half of the prewar figure.

Under the Soviet regime the structure of Odessa's economy changed: trade, particularly foreign trade, lost its importance, and metalworking and machine building assumed priority. Over 30 new factories were built, and many old ones were reconstructed. By 1940 Odessa's industrial output was eight times that of 1913. As the economy improved, the city's population rose: by 1926 it had reached 420,900. Only 17.4 percent of the population were Ukrainians. The majority were Russians (38.7 percent) or Jews (36.5 percent). Significant minorities of Poles (2.4 percent) and Germans (1.3 percent) remained in the city.

In the 1920s Odessa developed into a center of Ukrainian academic and cultural life. Apart from the university, which was reorganized into an institute of people's education, and other higher schools, there were a number of medical, technical, and agricultural research institutes, 13 research chairs, 3 observatories (geodesic, seismic, and astronomical), a branch of the Ukrainian Meteorological Service, and a hydrometeorological bureau. The city's largest research library, the Odessa Scientific Library, was formed out of the university library, the public library, and several other libraries. In 1932 it held 2.3 million vol-

umes. Some new museums were added to the prerevolutionary ones – the *Odessa Museum of Western and Oriental Art (1920), the Museum of Military History (1921), the All-Ukrainian Import-Export Museum (1927), and the Odessa Naval Museum (1928). New scientific associations, such as the *Odessa Scientific Society of the All-Ukrainian Academy of Sciences (1926) and the *Odessa Regional Studies Commission (1923–31), supplemented the established ones. M. Slabchenko headed a center of Ukrainian history, which attracted economists and historians, such as B. Varneke, I. Brover, M. Rubinshtein, T. Slabchenko, O. Pohrebynsky, S. Kovbasiuk, Ye. Zahorovsky, O. Riabinin-Skliarevsky, F. Petrun, and S. Borovy. The literary scholars K. Koperzhynsky, A. Muzychka, V. Lazursky, and V. Herasymenko, the linguists A. Tomson, P. Buzuk, and M. Semeniv (Markevych), and the archeologists S. Dlozhevsky and M. Boltenko worked in Odessa. During the period of Ukrainization Odessa's schools and research institutions were Ukrainized.

A naval school in Odessa

In the 1920s Odessa also became a vibrant artistic center. The *Odessa Artistic Film Studio (est 1919) made Odessa the leading filmmaking center in Ukraine. In 1920 the Physico-Technical Institute of the Film Industry was founded, under the directorship of E. Kurylov. The opera theater was turned into the Ukrainian Opera Theater in 1926 and, eventually, into the Odessa Opera and Ballet Theater. The three other chief theaters were the Odessa Ukrainian Music and Drama Theater (est 1925), the Odessa Russian Drama Theater (est 1927), and the Odessa Young Spectator's Theater (est 1930).

As the city became Ukrainized, its Ukrainian press and book publishing expanded. One of the largest newspapers in the USSR, *Odesskie izvestiia* (*Odesskii listok* before the revolution), was Ukrainized and renamed **Chornomors'ka komuna*. The Ukrainian-language newspaper for the rural population, *Chervonyi step*, the Ukrainized *Moloda gvardiia*, and the literary monthly *Metalevi dni* were published in Odessa. A number of factory bulletins with a sizable circulation were published in Ukrainian. The only remaining Russian newspaper was *Vechernie izvestiia*. The Ukrainian press played an important role in the Ukrainization of Odessa. The circulation of *Chornomors'ka komuna* reached 120,000 in 1931, thereby surpassing that of its Russian predecessor. The Odessa branch of the State Publishing House of Ukraine issued many titles.

After the show trial of the *Union for the Liberation of Ukraine in 1930, the Bolshevik authorities organized a terror campaign against the Ukrainian intelligentsia and an assault on Ukrainian culture. In the early 1930s the activities of the Ukrainian research center in Odessa ceased.

During the Second World War Odessa was besieged by German and Rumanian forces, from August to mid-October 1941. Upon being captured it was made the capital of *Transnistria and administered by the Rumanians. In April 1944 it was recaptured by the Soviet army. During the war Odessa suffered a heavy loss of life and property. Much of the port, industrial plant, and housing (over 1 million of 4 million sq m of living area) was destroyed. By 1948 most of the industrial and port facilities had been rebuilt, and later, new ones were added. The 1939 population figure of 604,000 was reached only in 1956. By 1967 it had increased to 776,000, and by 1979, to 1,115,000. After the war the national composition of the city's population shifted significantly in favor of Ukrainians, as the inhabitants of the surrounding rural regions flooded into Odessa in search of a better life. In 1959, 273,000 of the city residents were Ukrainian (41 percent), 254,000, Russian (38 percent), and 107,000, Jewish (16 percent). Although the Jews had suffered a disproportionate loss during the war, Odessa's Jewish community remains the largest in Ukraine.

Economy. During the Soviet period Odessa became an important industrial center. The leading industries are metalworking and machine building; they account for over one-third of the industrial output. The largest enterprises in those industries are the *Odessa Plow and Harrow Manufacturing Consortium, the *Odessa Radial-boring Lathe Plant, the *Odessa Presmash Manufacturing Consortium, the *Odessa Heavy-Crane Plant, the *Odessa Heavy-Scales Plant, the Odessa Agricultural-Machine-Building Plant, a ship repair yard, an autocrane assembly plant, a canning equipment plant, and a refrigerator plant. The KINAP factory specializes in building filming equipment for the film industry. The food industry accounts for about a quarter of the industrial output. Its main products are flour, dairy products, sugar, meat, confectionery, beer, wine, liquor, tobacco products, and packaged tea. The chemical industry produces superphosphates, paints and lacquers, petroleum products, plastics, and pharmaceuticals. Some large enterprises of light industry specialize in jute, clothing, footwear, leather goods, cork, and linoleum.

Odessa is an important junction for various modes of transportation. It is the largest port in Ukraine and in the Black Sea–Azov Sea Basin. It (together with Illichivske)

Odessa Sea Terminal

handles almost half of the freight moving through Ukrainian ports and a quarter of that handled by ports of the Black Sea–Azov Sea Basin. In the 1960s it handled 15 million t of freight annually. Of that, 74 percent was foreign trade (64 percent exports, 10 percent imports). The chief exports are petroleum and petroleum products, followed by metals, machines, grain, and sugar. Imports include petroleum (from Batumi and Tuapse), metals (from Kerch and Mariupil), building materials (from Novorossiisk), and agricultural products. Most of the exports from Odessa were destined for Cuba, Italy, Bulgaria, and Greece. Odessa also served as a base for the Antarctic whaling fleet. Despite some modernizations and expansion Odessa's port is technologically outdated and overused. To relieve Odessa, a new port was built at *Illichivske, 20 km to the southwest, in 1957–8.

Odessa is an important health resort center. The first resorts were opened there in the 1820s. In 1961 there were 12 resorts, 41 sanatoriums, 17 rest homes, and 3 health pensions. The resorts dot the coast for 70 km south from Fontanka. They include the Khadzhybei, Kuialnyk, and Malodolynske mud-bathing resorts, Arkadiia, Velykyi Fontan, Chornomorka, and Luzanivka.

Odessa continues to be one of the leading cultural and scientific centers in Ukraine. It is the home of the Southern Scientific Center of the Academy of Sciences of Ukraine. Some of the state's institutes, such as the Ukrainian Scientific Research Institute of Viticulture and Wine-Making, or branches are located in Odessa. The Odessa Scientific Research Institute of Health Resorts was founded in 1982. There are 14 higher educational institutions in the city, including the university, the polytechnical institute, the conservatory, the Medical Institute, the Institute of Naval Engineers, the Technological Institute of the Food Industry, the Hydrometeorological Institute, the Pedagogical Institute, and the Civil-Engineering Institute. There are also 25 secondary schools and 21 vocational schools in the city. Cultural life is organized around six major theaters, a film studio, a philharmonic orchestra, a circus, two art museums, and an archeological and regional museum. The almanac *Literaturna Odesa* was published at irregular intervals in 1948–58. Three oblast newspapers were published in the city, including *Chornomors'ka komuna*, which appeared in Russian and Ukrainian. The *Maiak publish-

ing house has been publishing Ukrainian and Russian books since 1945.

Layout and appearance. Odessa can be divided into four historical districts: the central core, the port, the coastal area, and the industrial area.

The oldest and most beautiful part of the city is elevated on a plateau, which drops steeply to the port in the east and to Peresyp district in the north. It is bounded in the south and southwest by Staro-Portofrankivska Street and the main railway station. The larger, eastern part of the core is laid out on a grid. The streets of the smaller, western part meet the former Soviet Army Street at a sharp angle. The wide avenues of the central district are paved with granite slabs and lined with acacia trees. The buildings are mostly two-story structures built of limestone. The more important scientific and cultural institutions, the municipal and oblast government offices, and the finest architectural monuments are found in the area. Prymorskyi Boulevard with the semicircular Karl Marx Square and the monumental staircase known as the Potemkin Stairs (built by Boffo, 1837–41) serves as a grand entrance to the city. At the top of the steps stand the monument to Richelieu by I. Martos (1828) and the Pioneers' Palace (formerly Prince M. Vorontsov's Palace, designed by Boffo, 1824–9). The boulevard is also graced by the Old Stock Exchange (1834, later the Municipal Duma and until 1991 the Oblast Committee of the CPU), the Seamen's Palace of Culture (formerly Naryshkina's Palace, built by

Zhukovsky Street in Odessa

Boffo, 1830), and the Literary Museum (former residence of Count Gagarin, built by L. Otton, 1842). All those buildings are in the classical style. Some of them were damaged in the Second World War and restored in 1946–9. Just off the boulevard stands the Odessa Opera and Ballet Theater, which was designed in the Viennese neo-Renaissance style by F. Fellner and H. Helmer (1883–7, restored 1926 and 1965–6). The main commercial artery is Schmidt *prospekt* (Oleksander *prospekt*), which cuts through Kirov Square (the Old Bazaar) and Martynovskiy Square (the Greek Bazaar). The other main streets are Derybasivska, Pushkin, and (formerly) Soviet Army. The more important architectural monuments are the Odessa Art Museum (formerly Count S. Potocki's Palace, 1805–10), the old hospital (built by de Tomon, 1806–8) on Pasteur Street, the Philharmonic Hall (formerly the New Stock Exchange, designed by A. Bernardazzi and G. Lonsky, 1899), the Odessa Scientific Library (designed by F. Nestrukh, 1905–7), the Odessa Archeological Museum (formerly the Municipal Public Library, built by F. Gonsiorovsky, 1882), the Odessa Museum of Western and Oriental Art (formerly Abaza's residence built by Otton, 1856), the university building (designed by M. Tolvynsky, restored 1908), and the main railway station (built in the late 19th century by V. Shreter, destroyed in 1944, and rebuilt in 1952 by L. Chuprin).

Monument to Taras Shevchenko in Odessa

ODESSA AND ENVIRONS

To the northeast lies the port district, which widens in the north into the Peresyp district. That 8-kilometer strip contains a dense network of railway and tram lines, repair yards, docks, factories, and warehouses.

North of Peresyp lie flat sandy beaches and, beyond them, Lyzanivka suburb, with the Ukrainskiy Artek children's resort. The Kuiuanyk and Khadzhybei resorts are further on. The plateau to the south and southwest of the port is covered with gardens and parks. Shevchenko Park (formerly Alexander Park) contains the poet's monument, a sports stadium, an open-air theater, and the observatory. Along Proletarskiy Boulevard stand sanatoriums, rest homes, hospitals, educational institutions, and the botanical gardens. On the coast south of the city lie the famous resorts of Malyi Fontan, Velykyi Fontan, Arkadiia, and Chornomorka.

The industrial district of Odessa lies west of the center along the railway line. It consists of the former workers' suburbs of Slobidka, Romanivka, Moldavanka, Buhaiivka, Daleki Mlyny, Blyzki Mlyny, and Vorontsivka, which were incorporated into Odessa in the postwar period. In the 1930s and particularly after 1944 the industrial district expanded to the southwest (Novoarkadiiskiy and Velykyi Fontan raions) and to the north (Zhevakhova Hora).

Odessa, containing (1964) 734 ha of greenery, is one of the greenest cities in Ukraine.

Odessa Agricultural Institute (Odeskyi silskohospodarskyi instytut). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Agriculture of the USSR. It was founded in 1918 on the basis of the natural sciences departments of Odessa University and the agricultural courses offered by the Agricultural Society of South Russia. The institute has six departments – agronomy, orcharding and viticulture, veterinary medicine, bioengineering, economics, and economic cybernetics – and an extension and correspondence school. It also has two experimental farms, encompassing a total of 5,780 ha, and a library of 300,000 volumes. In 1985–6 the student enrollment was 5,200. The institute publishes scholarly works.

Odessa Archeological Museum

Odessa Archeological Museum (Odeskyi arkhelohichnyi muzei). A major archeological museum administered by the ANU. Founded in 1825 by I. *Stempkovsky as the Odessa Municipal Museum of Antiquities, the museum was run from 1858 to 1922 by the *Odessa Society of History and Antiquities. In 1959 the *Odessa Archeological Society was formed as an extension body and in 1971 the museum came under the jurisdiction of the ANU. The museum's collection numbers more than 150,000 items, including findings from regional archeological expeditions, a large coin inventory, Egyptian, Greek, and Roman artifacts, and the private collections of D. Kniazhevich and N. Murzakevich. The approx 14,000 items on public display include Trypillian and late Bronze Age artifacts, sculptures from Black Sea Hellenic city-states, findings from Sarmatian-Scythian kurhans, and coins from a wide

variety of times and places. The museum sponsors annual field expeditions and since 1957 has published occasional collections of essays about regional archeological activity.

Odessa Archeological Society (Odeske arkhelohichne tovarystvo). A scholarly organization formed in 1959 as an extension of the *Odessa Archeological Museum. With a membership of approx 500 archeologists and regional studies specialists from Odessa, Kiev, St Petersburg, Symferopil, and Kishinev, the society was formed to help coordinate and popularize archeological work in the northern Black Sea region. To this end it has sponsored conferences, published proceedings and serials, and undertaken annual archeological expeditions.

Odessa Art Museum

Odessa Art Museum (Odeskyi khudozhnii muzei). A museum in Odessa, founded as the City Museum of Fine Arts in 1899 by teachers of the Odessa Drawing School and the *Society of South Russian Artists, among them A. Pavlovsky, K. Kostandi, A. Popov, P. Nilus, B. Edvards, and G. Ladyzhensky. Under Soviet rule it was called the People's Art Museum (until 1945), the Odessa Oblast Picture Gallery (1945–50), and the Odessa Picture Gallery (1950–65). In 1918–19 its collection was enriched with the acquisition of several private collections, including O. Rusov's and M. Braikevych's. The museum has departments of medieval art, prerevolutionary art (18th–20th centuries), Soviet art, and decorative and applied art. It contains works by Ukrainian and Russian prerevolutionary painters, such as H. Levytsky, D. Levytsky, V. Borovykovsky, I. Aivazovsky, I. Kramskoi, I. Repin, N. Ge, V. Makovsky, V. Tropinin, M. Yaroshenko, H. Svitlytsky, M. Vrubel, K. Kryzhytsky, S. Vasylykivsky, O. Murashko, I. Trush, and M. Pymonenko; the works of the Odessa painters K. Kostandi, G. Ladyzhensky, and P. Nilus and the Odessa sculptor B. Edvards; and works of So-

viet painters, such as Z. Serebriakova, V. Kasiian, Y. Bokshai, M. Zhuk, M. Bozhii, A. Deineka, O. Shovkunenko, A. Kotska, M. Derehus, O. Kulchytska, and V. Lytvynenko. Albums of works at the museum were published in 1980 and 1986.

Odessa Art School (Odeske khudozhnie uchylyshche im. M.B. Hrekova). An art school, until 1992 under the jurisdiction of the Ministry of Culture of the Ukrainian SSR. It was founded in 1865 as the Drawing School of the Odessa Society for the Advancement of the Fine Arts. In 1885 it became an official secondary school, and in 1899 an art school under the supervision of the St Petersburg Academy of Arts. Under Soviet rule it became a postsecondary school and then a state artistic handicrafts workshop, an academy of arts (1921), a polytechnic (1922–8), and an art institute (1928–34) before reverting to its present name. Its art-education, sculpture, and ceramics departments prepare professional artists and art instructors for secondary schools.

Odessa Artistic Film Studio (Odeska kinostudiia khudozhnikh filmiv). Established in 1919 on the basis of several private film ateliers. It became the Odessa Department of the All-Ukrainian Film Committee (1920), the Odessa Film Factory of the All-Ukrainian Photo-Cinema Administration (1922), and the Odessa Film Factory Ukrainfilm (1929) and has had its current name since 1938. It was evacuated to Central Asia in 1941 and then reappeared as the Black Sea Film Factory (actually a branch of Mosfilm), its name until 1955. In the 1920s it was the key center of development of Ukrainian cinema art and produced artistic films, newsreels, cinema journals, documentaries of historical events, and screen versions of literary works. In the 1930s its importance declined as the Ukrainian content was forcibly restricted, and since 1945 it has produced only a few Ukrainian films, such as *Bahriani berehy* (The Scarlet Shores, 1979). The Odessa Artistic Film Studio trained such notable Ukrainian film directors as O. Dovzhenko, H. Stabovyi, A. Kordium, and I. Kavaleridze and the cameramen D. Demutsky and Yo. Rona.

Odessa Astronomical Observatory (Odeska astronomichna observatoriia). A research institution of Odessa University, established in 1871. It has two observation stations, in Maiaky and Kryzhanivka, which are equipped with five reflectors, five refractors, a catadioptrical telescope, a Schmidt camera, two meteor patrols, and a seven-chamber astrograph. In 1981 the decameter radiotelescope URAN-4 was put into operation at Maiaky. The Odessa Observatory deals mainly with the determination of the celestial co-ordinates of stars and meteors, research into the nature of mutating stars and meteors, and the development of new telescoping and electronic systems. Scientists such as O. *Kononovych, A. *Orlov, and V. *Tsevych have been associated with the observatory.

Odessa Bibliographic Society (Odeske bibliofichne tovarystvo; Russian: Odesskoe bibliograficheskoe obshchestvo). A scholarly society established at Odessa University in 1911 to organize bibliographic research in Ukraine, especially in the field of regional studies. It held lectures and published the monthly (1911–15) and bi-

monthly (1916) journal *Izvestiia Odesskogo bibliograficheskogo obshchestva*, which contained bibliographies, book reviews, and reports on the society. The society ceased to exist in 1922. M. *Komarov was a leading member.

Odessa Biostymulator Chemical and Pharmaceutical Manufacturing Consortium (Odeske vyrobnyche khimiko-farmatsevytchne obiednannia 'Biostymulator'). A manufacturing consortium created in 1977 by a number of pharmaceutical enterprises. Its key members are a chemical and pharmaceutical factory founded in 1921 and a vitamin factory founded in 1944. It produces 52 different medicinal products, including vitamins and stimulants.

Odessa Civil-Engineering Institute (Odeskyi inzhenerno-budivelnyi instytut). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Higher and Specialized Secondary Education of the Ukrainian SSR. It was formed in 1930 from the civil engineering department of the Odessa Industrial Institute and the architecture department of the Odessa Art Institute. In 1951–7 it was known as the Odessa Institute of Hydraulic Engineering. The institute has seven departments – architecture, industrial and civil engineering construction, industrial and civil engineering design, energetics of engineering, construction technology, sanitation engineering, and general technology – and a graduate section. It also has a correspondence department, a branch in Mykolaiv, and a library of over 500,000 volumes. In 1985–6 the student enrollment was 7,000.

Odessa Clothing Manufacturing Consortium (Odeske vyrobnyche shveine obiednannia im. V.V. Vorovskoho). A consortium established in 1965 by the Odessa, Balta, Bolhrad, and Izmail clothing factories. It produces primarily overwear, children's clothing, and bedding. In 1969 it produced approx 1 million coats, 741,000 suits, 1.7 million dresses, 1.3 million pairs of trousers, 2.5 million shirts and blouses, and 2.3 million hats. In 1970 the consortium employed 5,700 workers.

Odessa Conservatory (Odeska derzhavna konservatoriia im. A.V. Nezhdanovoi). A school of advanced music education, until 1992 under the jurisdiction of the Ministry of Culture of the Ukrainian SSR. Founded in 1913 on the basis of the Russian Music Society's school (est 1897) in Odessa, it was divided in 1923 into the Odessa Institute of Music and the Odessa Music Tekhnikum. In 1928 the schools were combined as the Beethoven Music and Drama Institute, and in 1934 the Odessa Conservatory was re-established in its original form. Today the school has five faculties: piano performance, orchestral technique, vocal and choral training, opera, and musicology. Its graduates include the composer K. Dankevych, the singers M. Hryshko, O. Kryvchenia, H. Oliinychenko, B. Rudenko, and Ye. Chavdar, the violinist D. Oistrakh, and the pianist E. Gilels. Its notable teachers include K. Dankevych, P. Movchaniuk, J. Perlman, K. Pihrov, J. Pribik, P. Stoliarsky, M. Vilinsky, and V. Zolotarev.

Odessa Derzhdrama. See Odessa Ukrainian Music and Drama Theater.

Odessa Electrotechnical Institute of Communications (Odeskyi elektrotekhnichniy instytut zviazku im. O.S. Popova). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Communications of the USSR. Founded in 1930, it has departments of automated electronic communications, multichannel electronic communications, and radio communications and broadcasting, and evening and correspondence programs. The institute has a branch in Kiev and had a consulting office in Kishinev (Chişinău), Moldova. The library contains 748,000 volumes. In 1985–6 the student enrollment was over 8,000.

Odessa Factory of Industrial Textiles (Odeska fabryka tekhnichnykh tkanyn). A factory of the jute-hemp industry, built in 1887 and originally called the Odessa Jute Factory. Before 1917 it produced linen from Indian jute. In the interwar period hemp replaced jute as the factory's main raw material. The Odessa factory accounted for some 27 percent of all the production of the *jute-hemp industry in the USSR. It produces sacks for various industries and is the sole manufacturer of textiles used in linoleum production.

Odessa gubernia. See Kherson gubernia.

Odessa Heavy-Crane Plant (Odeskyi zavod vazhkoho kranobuduvannia im. Sichnevoho povstannia). A plant built in 1863 as a locomotive- and coach-repair shop. In 1930 it was converted to building steam-driven and self-propelled motorized cranes. In 1960 it began to specialize in the production of heavy (25–100-t) pneumatic cranes. Since 1975 the enterprise has been the key member of the Odessa Heavy-Crane-Building Consortium.

Odessa Heavy-Scales Plant (Odeskyi zavod vazhkoho vahobuduvannia im. P.I. Starostina). An enterprise of the heavy-machine-building industry. The factory was set up in 1882 to build wagon, cart, baggage, and other scales. In the interwar period it produced scales for weighing molds used in the metallurgical industry. In 1956 it was converted to the production of heavy scales used in the metallurgical, chemical, mining, and other industries. Its scales are also used to weigh vehicles, trains, and cranes.

Odessa Historical-Philological Society (Russian: Istoriko-filologicheskoe obshchestvo pri Novorossiiskom universitete). An influential research society founded in 1889 at Odessa University to study the history of the region. Among its members were the historians O. Kyrpichnikov, O. Kochubynsky, and F. Uspensky. The society published the serial *Letopis' Istoriko-filologicheskogo obshchestva pri Novorossiiskom universitete* (25 vols, 1890–1916). It ceased activity in 1917.

Odessa Hydrometeorological Institute (Odeskyi hidrometeorologichnyi instytut). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Higher and Specialized Secondary Education of the Ukrainian SSR. Founded in Kharkiv in 1932, in 1941 it was evacuated to Ashkhabad, Turkmenistan, and in 1944 relocated to Odessa. It trains engineer-meteorologists, hydrologists, oceanographers, and agrometeorologists. The institute has departments of meteorology, hydrology, and agrometeorology, and a correspondence section. The student enrollment in 1980–1 was 2,250. Research at the insti-

tute focuses on problems in hydrometeorology, especially ecological issues, the exploitation of natural resources, and meteorology.

Odessa Institute of Naval Engineers (Odeskyi instytut inzheneriv morskoho flotu). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of the Maritime Fleet of the USSR. Founded in 1930 on the basis of the shipbuilding department of the Odessa Polytechnical Institute as the Odessa Institute of Water Transportation Engineers, it received its present name in 1945. It has departments of shipping management, ship mechanics, economics, shipbuilding, port mechanization, and hydrological engineering, an evening study and correspondence section, and a program for the upgrading of qualifications of workers of the merchant marine. The institute had branches in Baku and Mariupol. In 1985–6 the student enrollment was 6,500.

Odessa Institute of the National Economy (Odeskyi instytut narodnoho hospodarstva). An institution of higher education, under the jurisdiction of the Ukrainian Ministry of Higher and Secondary Specialized Education. It was established in 1921 on the basis of the economics department of Odessa University. It was reorganized in 1931 into the Odessa Credit and Economics Institute and in 1966 into its present form. The institute is divided into faculties of economic planning, finance, credit, labor economics, and accounting. It offers preparatory, evening, and correspondence courses, upgrading programs for technical workers, and graduate courses. It also maintains a computing center. In 1980 a special upgrading faculty for workers of the Ukrainian Ministry of Finance was established. In 1985–6 the enrollment was almost 10,000.

Odessa Jute Factory. See Odessa Factory of Industrial Textiles.

Odessa Linoleum Plant (Odeskyi linoleumovyi zavod). A factory founded in Odessa in 1913 to produce cork for bottling. The by-products from the cork were used for manufacturing linoleum. In the interwar period the factory produced various types of linoleum. It was evacuated at the outset of the Second World War and rebuilt in 1944–53. It uses cork to produce various types of linoleum and other floor coverings, bottle corks, flotation devices, packaging materials, and other products.

Odessa Medical Institute (Odeskyi medychnyi instytut im. M. Pyrohova). Founded in 1900 as the medical department of Odessa University, it was restructured as an independent institute under the Ukrainian SSR Ministry of Health in 1920. Scientists who have worked at the institute include I. *Mechnikov (professor of zoology and comparative anatomy), V. *Filatov (director of the department for research on eye disease), and I. Sechenov (director of the department of physiology). There are four faculties at the institute, internal clinical medicine, pediatrics, stomatology, and postgraduate studies, as well as a library with 700,000 vols (1984). In the 1980s there were 5,000 students enrolled annually in studies and internships; by 1981 the institute had graduated over 27,000 physicians.

Odessa Museum of Western and Oriental Art (Odeskyi muzei zakhidnoho ta skhidnoho mystetstva). A museum founded in Odessa in 1920 on the basis of the na-

tionalized collections of the City Museum of Fine Arts, Odessa University, and private collectors. It was known as the Odessa Gallery of Old European Painting until 1945. It has departments of ancient art (est 1947; Greek and Roman sculpture, pottery, and glass), Western European art (works by L. van Leyden, F. Hals, Fra Filippo Lippi, F. Bartolomeo, P. Veronese, Tintoretto, M. da Caravaggio, Canaletto, G. Reni, B. Strozzi, F. Guardi, H. Holbein, P. Bruegel the Elder, P. Rubens, D. Teniers, and N. Poussin), Oriental art (est 1951; Chinese, Japanese, Persian, Tibetan, and Indian artists), and applied art (porcelain, glass, tapestries). Altogether its collection contains about 6,000 objects, many of them transferred to it from the Hermitage in Leningrad, the Museum of Oriental Cultures and the Pushkin Museum in Moscow, and the Kiev Museum of Russian Art. An album about the museum, with 150 plates, was published in English in Leningrad in 1985.

Odessa Musical Comedy Theater (Odeskyi teatr muzychnoi komedii). A theater established in Lviv in 1947 and located in Odessa since 1954. Its repertoire consists of the works of Soviet Ukrainian and Russian composers, including O. Riabov's *Vesillia v Malynivtsi* (The Wedding in Malynivka) and O. Sandler's *Na svitanku* (At Daybreak), as well as those of composers of other former Soviet republics, and Russian and classical operettas. In 1981 its artistic director was M. Vodianoï, its conductors, I. Kilberg and O. Vinnytsky, and its set designer, M. Ivnytsky.

Odessa oblast. An administrative-territorial unit (1990 pop 2,638,200) in southwestern Ukraine, formed on 27 February 1932. It covers an area of 33,300 sq km and is divided into 26 raions, 393 rural councils, 17 cities, and 33 towns (smt). Its capital is *Odessa.

Physical geography. Most of the oblast lies in the Black Sea Lowland along the north coast of the Black Sea. Its shoreline is marked by large estuaries, such as the Dniester, the Khadzhybei, the Kuialnyk, and the Tylihul. Spurs of the Podolian Upland, dissected by ravines and gorges, reach its northwestern corner, and the Dnieper Upland forms its northeastern part. Most of the oblast's landscape is a rolling plain sloping toward the Black Sea. The soils are mostly chernozems. The natural vegetation is mainly mixed-grass-fescue steppe. Small oak, beech, linden, and ash forests are found in river valleys and ravines, and cover an area of 204,000 ha. Shelterbelts are common. Although it lacks mineral resources, Odessa oblast is rich in granite, gneiss, limestone, and sand, which are used for building materials.

The major rivers in the oblast are the Danube (along the southern boundary), the Dniester, the Kodyma, and the Savranka (two tributaries of the Boh). Many of the oblast's 225 streams dry up during the summer season. There are several freshwater lakes and some saltwater lakes along the Black Sea coast. The moderate continental climate is characterized by hot summers and mild winters. The average January temperature is -2°C in the south and -5°C in the north. The respective July averages are 21°C and 23°C . The rainfall varies from 380 to 500 mm per year and occurs mostly in the warm season.

History. The territory of the oblast was inhabited as early as the Upper Paleolithic Period. In the 9th century AD it was the home of the Ulychians and the Tivertsians. In the 10th to 12th centuries the region was dominated by Kievan Rus', and in the 14th and 15th centuries by the

Grand Duchy of Lithuania. The Bilhorod (Budzhak) Horde, vassals of the Crimean Khanate, ruled the territory from the mid-15th century. Russian control was established in the second half of the 18th century and confirmed in 1791. The territory was part of New Russia gubernia in 1797–1802 and then of Kherson gubernia. In the 19th century it was colonized intensively, and developed into a major agricultural and industrial region. In 1919 Odessa gubernia was separated from the rest of Kherson gubernia, and in 1925 it was abolished with all the other gubernias. In 1932 Odessa oblast was created out of Odessa, Pervomaiske, Zinovivske, Mykolaiv, and Kherson okruhas. Later the oblast was divided among a smaller Odessa oblast and the new Mykolaiv (est 1937) and Korovohrad (1939) oblasts. In 1954 Odessa oblast absorbed Izmail oblast, which had been created in southern Bessarabia from lands annexed from Rumania in 1940 and again in 1944.

Population. According to the 1989 census Ukrainians constitute a majority (54.6 percent) in the oblast; they are followed by Russians (27.4 percent), Bulgarians (6.3 percent), Moldavians (5.5 percent), and Jews (over 4 percent). Most of the population (66 percent) is urban. The major cities are Odessa, *Izmail, *Bilhorod-Dnistrovskiy, *Illichivske, and *Kotovske.

Industry. Industry accounted for 51.5 percent of the oblast's domestic product in 1988. The main industries are machine building and metalworking (25 percent of the industrial output), food processing (38 percent), light industry (13 percent), and the chemical industry (5 percent). The machine-building industry is concentrated mostly in Odessa. Its major products are farm machinery, construction cranes, printing equipment, industrial scales, refrigerators, and filmmaking equipment. The food industry includes canning (Odessa, Izmail, Kodyma), flour milling (Odessa, Bilhorod-Dnistrovskiy), sugar refining (Odessa, Kotovske), fish processing (Odessa, Izmail, Bilhorod-Dnistrovskiy), meat packing (Odessa, Izmail, Kotovske, Bilhorod-Dnistrovskiy), and wine-making. Light industry manufactures textiles (Odessa, Tatarbunary), footwear (Odessa), clothes (Odessa, Balta, Bilhorod-Dnistrovskiy), and jute products (Odessa). The chemical industry uses imported raw materials to make superphosphates, linoleum, plastics, dyes, and polyethylene film. Building materials, such as reinforced concrete, bricks, facing tiles, roofing materials, and lime, are produced in Odessa, Illichivske, Bilhorod-Dnistrovskiy, Izmail, and Kodyma. Almost 60 percent of the industrial plant is concentrated in Odessa.

Agriculture. The oblast contributes over 5 percent of Ukraine's agricultural output. In 1988 there were 377 collective farms (16 engaged in fish farming) and 153 state farms in the oblast. Of the 2,562,700 ha of farmland 2,081,000 ha were cultivated and 361,800 ha were used for pasture and hayfields. The major crops of the oblast are grains (52.8 percent), including winter wheat (22.4 percent) and corn (11.8 percent), feed (30.4 percent), sunflowers and sugar beets (12 percent), and potatoes, vegetables, and melons (5 percent). A small part of the land is devoted to other fruits and berries. Grapes are grown in the southwestern part of the oblast. Only 10 percent of the farmland is irrigated. The largest irrigation works are at Tatarbunary, the lower Dniester, Kiliia, and Suvorove.

Transport. The oblast has 1,153 km of railroads (1988). The main lines are Odessa–Kiev, Odessa–Kharkiv, Odessa–Moscow, and Odessa–St Petersburg. There are 8,000

km of highway, of which 7,500 km are paved. The main highways are Odessa–Kiev–St Petersburg, Odessa–Kishinev, Reni–Odessa–Mykolaiv–Rostov-na-Donu, and Odessa–Izmail. There are eight major seaports, including Odessa, Illichivske, Kiliia, Reni, and Bilhorod-Dnistrovskiy. Odessa is a terminal of the gas pipeline from Shebelinka and of an ammonia pipeline from Togliatti. There are two airports in Odessa.

Odessa Opera and Ballet Theater

Odessa Opera and Ballet Theater (Odeskyi teatr opery ta baletu). A theater established in 1926 on the basis of an existing municipal opera theater that had been founded in 1810. Soon after its founding the Odessa Theater became one of the leading opera theaters in Ukraine, along with those in Kiev and Kharkiv. Its repertoire included operas, operettas, and ballets by Ukrainian, Russian, and Western European composers. Among the works of Ukrainian composers performed by the theater are V. Fel'meliidi's *Rozlom* (The Schism, 1929), B. Yanovsky's *Duma Chornomors'ka* (Black Sea Duma, 1929), B. Liatoshynsky's *Zoloty obruch* (The Golden Ring, 1930), B. Kostenko's *Karmeliuk* (1930), O. Chyshka's *Iablunevyi polon* (The Apple Tree Captivity, 1931), M. Verykivsky's *Sotnyk* (The Captain), E. Yutsevych's *Kyrylo Kozhumiaka*, and K. Dankevych's *Nazar Stodolia* and *Bohdan Khmelnytsky*. Dankevych's *Lileia* (The Lily) and V. Skorulsky's *Lisova pisnia* (The Forest Song) are among the ballets staged.

Odessa Pedagogical Institute (Odeskyi pedahohichnyi instytut im. K.D. Ushynskoho). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Education of the Ukrainian SSR. It was formed in 1920 as a faculty of social education at the Odessa Institute of People's Education. In 1932 it became a pedagogical institute, and in 1946 it was named after K. Ushinsky. The institute has departments of physics and mathematics, physical education, music education, art and graphics, and early childhood education, and correspondence and preparatory sections. It trains teachers for the elementary

and secondary school system. It has four experimental laboratories and a library of 364,000 volumes. The student enrollment in 1986–7 was 4,900.

Odessa Picture Gallery. The name of the *Odessa Art Museum from 1950 to 1965.

Odessa Plow and Harrow Manufacturing Consortium (Odeske vyrobnyche obiednannia po pluhakh i boronakh 'Odesahruntomash'). A consortium of farm-machine-building enterprises, established in 1973 in Odessa. Its main members are the Odessa Agricultural Machinery Plant (built in 1854) and similar factories in Mariiupil and Kamianets-Podilskiy. The consortium now produces general and special-purpose tractor plows, harrows, scarifiers, machinery used in orcharding, spare parts, and other products. It produced up to 70 percent of all general-purpose and almost all special-purpose plows in the USSR.

Odessa Polytechnical Institute (Odeskyi politekhnichnyi instytut). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Higher and Specialized Secondary Education of the Ukrainian SSR. Founded in 1918 as a workers' technical school, it was transformed in 1933 into an industrial institute. In 1945 it became a polytechnical institute. The institute's 13 departments include machine building, mechanical engineering, chemical engineering, thermal-power engineering, atomic energy, the automation and electrification of industry, radio technology and computing sciences, and economics. It also has evening and correspondence programs, a graduate program, and six special laboratories. The library has 1.5 million volumes. In 1985–6 the student enrollment was over 10,000.

Odessa Presmash Manufacturing Consortium (Odeske vyrobnyche obiednannia 'Presmash'). A consortium of seven enterprises in Odessa and Mykolaiv oblasts, formed in 1976. It produces heavy and specialized presses, casting machines for plastics and metals, stamping machines, paper and cardboard presses, and other products. In 1970 its main plant, established in Odessa in 1952, employed 1,300 workers.

Odessa Radial-boring Lathe Plant (Odeskyi zavod radialno-sverdlynykh verstativ). A factory of the machine-building industry, built in 1944–6. It produces honing, radial-boring, deep-drilling, and various specialized lathes. Many of the models are programmable and are used in automated production. The plant was the only one in the USSR to produce lathes on an automated production line. Since 1976 it has been the chief partner in the Odessa Lathe Manufacturing Consortium.

Odessa Railroad. See Railroad transportation.

Odessa Regional Studies Commission (Odeska komisiia kraieznavstva pry VUAN). A research institution affiliated with the VUAN that existed in Odessa from 1923 to 1931. Its president was S. Dlozhevsky, and its secretary was I. Faas. The society's 105 members were grouped into sections that studied southern Ukraine's natural resources, archeology, society and history, and ethnography and dialects; there was also a German section. The society pub-

lished P. Buzuk's brief history of the Ukrainian language (1924) and its own bulletin, *Visnyk* (5 vols [10 issues], 1924–6, 1929–30), edited by Dlozhevsky, Faas, G. Tanfilev, R. Volkov, E. Trifilev, I. Khmelnytsky, N. Lignau, R. Mickwitz, and V. Selinov.

Odessa Research Canning Plant (Odeskyi doslidnyi konservnyi zavod). One of the chief specialized plants of the former USSR food industry. It grew out of a small canning and sausage factory established in 1867. Since 1959 it has specialized in canned baby food. In 1980 it produced 50 different products, including canned meats, vegetables, and fruit.

Odessa Russian Drama Theater (Odeskyi rosiiskyi dramatychnyi teatr im. A. Ivanova). A theater established in 1927. It did not function during the Second World War, and renewed its activity in 1945. Its Ukrainian repertoire has been limited to I. Karpenko-Kary's *Zhyteiske more* (The Sea of Life) and O. Korniihuk's plays, including *Platon Krechet* and *Bohdan Khmel'nyts'ky*; it mainly stages Russian classical and Soviet works, as well as world classics. In 1987 its artistic director was V. Terentev.

Odessa Scientific Society (Odeske naukove tovarystvo pry VUAN). A scholarly association of the VUAN, founded in 1926. Until the early 1930s, when it was suppressed, the society was the center of scholarly life in Odessa. In 1928 it had 140 members grouped into socio-economic, historical-philological, natural science-mathematical, pedagogical, and medical sections, with M. Hordiiievsky as president and V. Herasymenko as secretary. The society published its own serial called *Zapysky* (18 issues, 1927–30), K. Koperzhynsky's study of harvest rituals (1926), an edition of M. Kropyvnytsky's letters (1927), V. Kysilov's Russian-Ukrainian medical dictionary (1928), a Ukrainian edition of J. Pestalozzi's selected works (1928), and O. Sikyrinsky's book on the correspondence of H. Barvinok (1928).

Odessa Society of History and Antiquities (Imperatorskoe odesckoe obshchestvo istorii i drevnostei). A scholarly society established in Odessa in 1839 to collect, describe, and protect all archeological monuments and historical documents pertaining to Southern Ukraine (including the Zaporozhian Cossacks), the Crimea, and Bessarabia; to prepare and publish historical studies of those regions; and to compile statistical and geographical data about them. The society conducted excavations at the sites of ancient Hellenic colonies and kurhans; created a large library, archive, and museum (est 1840, merged with the Odessa Municipal Museum of Antiquities [now the Odessa Archeological Museum] in 1858); supervised museums in Teodosiia (from 1850), Kerch, and Symferopil (today the Khersones Historical-Archeological Museum) and the Genoese fortresses at Sudak and Bilhorod-Dnistrovskyyi; and published its own scholarly *Zapyski* (33 vols, 1844–1919), monographs, catalogs, and indexes. In 1893 the society had 16 honorary members, 122 full members, and 40 corresponding members and associates. Prominent members included Oleksii Andriievsky, O. Berthier-Delagarde, F. Brun, A. Florovsky, D. Kniazhevich (the first president), V. Latyshev, N. Murzakevich (the first secretary), M. Popruzhenko, A. Skalkovsky, E. von Stern, V. Varneke, and V. Yurjevich. The society was

abolished under Soviet rule in 1922. Its traditions have been carried on by the *Odessa Archeological Society (est 1959).

Odessa Sugar Refinery (Odeskyi tsukrorafinadnyi zavod). A sugar refinery built in Odessa in 1896. Its initial capacity was 100 t of sugar a day. It was expanded in the interwar period, destroyed during the Second World War, and rebuilt in 1947–9. It produces granular, cube, and loose sugar, syrup, and other products. Since 1963 it has also refined sugar cane imported from Cuba. In 1980 the plant had a daily capacity of 920 t of unrefined and 866 t of refined sugar.

Odessa Technological Institute of the Food Industry (Odeskyi tekhnolohichnyi instytut kharchovoi promyslovosti im. M.V. Lomonosova). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Higher and Specialized Secondary Education of the Ukrainian SSR. Formed in 1922 on the basis of the Odessa School of Milling Technology (est 1902), the institute trains workers and specialists for the food-processing industry. It has departments of grain technology, biochemical and nutrient products, food-packaging and -preserving technology, meat and dairy products processing, mechanics, mechanical engineering and automation, and engineering economics, and evening and correspondence programs. The institute has a library of 550,000 volumes. The enrollment for 1985–6 was over 8,000.

Odessa Technological Institute of the Refrigeration Industry (Odeskyi tekhnolohichnyi instytut khodylnoi promyslovosti). An institution of higher learning, until 1992 under the jurisdiction of the Ministry of Higher and Specialized Secondary Education of the Ukrainian SSR. Founded in 1930 as the Odessa Food Institute, it was called the Odessa Technological Institute of the Canning Industry (1931–50) and then the Odessa Technological Institute of the Food and Refrigeration Industry (1950–70) before receiving its present name in 1970. It prepares specialists and works for the refrigeration industry and has departments of refrigeration engineering, cryogenic engineering, air-conditioning, heat sensing, and refrigeration machinery. It has evening-study and correspondence sections. In 1985–6 the student enrollment was 6,000.

Odessa Theater of the Revolution. See Odessa Ukrainian Music and Drama Theater.

Odessa Ukrainian Music and Drama Theater (Odeskyi ukrainskyi muzychno-dramatychnyi teatr). A theater established in 1925 from the cast of the Mykhailchenko Theater and the Odessa First Ukrainian Workers' and Peasants' Theater. Its founders were I. Zamychkovsky, M. Tinsky, Ye. Khutorna, N. Uzhvii, L. Matsiievskaya, P. Niatko, Yu. Shumsky, and M. *Tereshchenko, who was also its first director. Originally called the Odessa Derzhdrama, in 1930 it was renamed the Odessa Theater of the Revolution, and in 1940 it acquired its present name. Tereshchenko directed G. Kaufman and M. Connelly's *Merton of the Movies* as a experiment in bright stylization. His successor, V. Vasylo, repeated his *Berezil production *Za dvoma zaitsiamy* (After Two Hares, based on M. Starytsky). Also staged were I. Kocherha's *Feia hirkoho myhdaliu* (The Fairy of the Bitter Almond), V. Vynnychen-

ko's *Nad* (Nad[ia]), Ya. Mamontov's *Kniazhna Viktoriia* (The Princess Victoria), and W. Shakespeare's *The Taming of the Shrew*. In 1929 Tereshchenko directed I. Mykytenko's *Dyktatura* (Dictatorship), and I. Yukhymenko directed O. Kornichuk's *Zahybel' eskadry* (The Destruction of the Squadron), both premieres in Ukrainian theater. The theater has also staged productions based on the works of T. Shevchenko, O. Kobylanska, M. Kulish, O. Dovzhenko, V. Mynko, and B. Brecht. The directors since 1945 have been B. Tiahno, V. Vasylo, V. Miahky, B. Meshkis, and K. Pyvovarov (since 1986).

Odessa University (Odeskyi derzhavnyi universytet im. I. Mechnikova). A higher educational institution, under the jurisdiction of the Ministry of Higher and Specialized Secondary Education of Ukraine. It was opened in 1865 as New Russia University on the basis of the *Richelieu Lyceum, on the initiative of N. *Pirogov, the head of the Odessa school district. The tsarist officials initially opposed the founding of a university in Odessa, since they considered the city to be a hotbed of unrest, and offered instead Mykolaiv as a site. Under pressure from the local nobility and merchants, Tsar Alexander II granted the Lyceum university status on 10 June 1862.

New Russia University initially had three faculties, history and philology, physics and mathematics, and law. The initial enrollment was 175 students; by 1880 there were 346 students and 45 professors. Almost half of the students were children of the clergy; 70 percent of the students received either scholarships or bursaries. Most of the students came from Southern Ukraine, the Don region, or Caucasia, although the school also attracted students from the Slavic countries in the Balkans. A faculty of medicine was created in 1900. In 1908 the total student enrollment was 3,100. All instruction was in Russian, although in 1906 there was an attempt to initiate a Ukrainian history course to be offered in Ukrainian by O. Hrushevsky. The university published its *Zapiski* from 1867 to 1914.

During the 1917 Revolution attempts were made to Ukrainianize the university. Under Soviet rule New Russia University was dissolved, and the various faculties were separated from the university to form research institutes in 1920. Later that year most of these institutes were combined to form the Odessa Institute of People's Education. In 1925 the institute had 603 students, and Ukrainian was introduced as a language of instruction in many courses. In 1933 several other institutes were merged again, to form Odessa University, which in 1945 was named in honor of the biologist I. Mechnikov. The student enrollment rose from 8,180 in 1960–1 to 12,000 in 1980–1, but it has since then fallen to 10,230 (1988–9). The university has nine faculties (mechanics-mathematics, physics, chemistry, biology, geology-geography, history, law, philology, and Romance and Germanic philology). It also has evening and correspondence sections and a postgraduate program. Virtually all instruction has been in Russian. The university has a library of some 2 million volumes, a botanical garden (opened in 1867), and an astronomical observatory (built in 1817).

Odessa Young Spectator's Theater (Odeskyi teatr yunoho hliadacha im. M. Ostrovskoho). A theater established in 1931 as the Odessa Children's Theater. In 1941 it assumed its present name. The theater specializes in productions of colorful adventures in a heroic-romantic or lyric-comical style. They are planned according to the age-group of the spectators – preschool (Ye. Shvarts's *Snizhna koroleva* [The Snow Queen, adapted from H.C. Andersen]), primary school (L. Smiliansky's *Lastivka* [The Swallow]), secondary school (S. Larionov's *Vin ishov na Odesu* [He Advanced toward Odessa]), and so on. Its artistic directors have been S. Manuilovych, M. Zaitsiv, V. Miahky, and V. Tomanov (since 1980).

Odeskii vestnik (Odessa Herald). A Russian-language newspaper published from April 1827 to 1893 in Odessa, twice a week at first and daily from 1864. Until 1830 a French section, *Journal d'Odessa*, was also published. Among the editors were Ukrainians, such as M. Sokalsky (1857–71); his brother, P. *Sokalsky (1871–6), who also contributed theater and concert reviews and articles on culture to the newspaper for over 20 years, and defended the use of the Ukrainian language and popularized Ukrainian culture and literature; and P. Zeleny (1877–87). Many articles on the economy and regional history of Southern Ukraine were published in the paper.

Odnodvirtsy (Russian: *odnodvortsy*). A special group of *state peasants in the Russian Empire who came from the lesser service people (*deti boiarskie*). They originated in the 16th century as settlers and defenders of the southern and northeastern frontiers of Muscovy. Some later owned serfs, but the majority ran only one household (*odin dvorets*, hence their name). Military registers show that from 1662 to 1672 there were 28,325 male *odnodvirtsy* in Russian-ruled Slobidska Ukraine. Peter I changed their status: like Cossacks and other petty servitors, they were classified as free peasants and had to pay the *poll tax. In the 18th century, *odnodvirtsy* were settled in Kharkiv, Poltava, Katerynoslav, Kherson, and Tavriia gubernias, where by 1835 they numbered 50,430 males. In 1866 their legal status was made equivalent to that of the rest of the peasantry. Because the *odnodvirtsy* did not live in villages as a rule, they did not merge with the ordinary peasants, but instead constituted a group of more prosperous homesteaders (*khutoriany*).

Oдноosibnyk (individual farmer). The name given to a Soviet peasant who did not join a *collective farm and instead worked his landholding on an individual basis. In 1929 *odnoosibnyky* represented 94.4 percent of peasant households in Soviet Ukraine. During *collectivization repressive measures were applied to ensure that all peasants joined collective farms. Higher quotas for the requisition of grain and other foodstuffs were imposed on *odnoosibnyky* than on collective farmers. They were also taxed more than collective farmers, and all restrictions on the confiscation of their property were removed in cases

of nonpayment. Because the taxes and other payments were usually several times higher than their annual incomes, most *odnoosibnyky* joined collective farms or fled to the cities. Many of them were imprisoned or deported to Siberia during the terror. As a result, by 1937, *odnoosibnyky* represented only 3.9 percent of peasant households in Soviet Ukraine. Their farms tended to be located in isolated areas where it was not always practical to have collective farms (eg, in hilly, heavily wooded, or marshy regions). By 1939 only 3 percent of rural households were *odnoosibnyky*. That year the state took away their right to own land and allocated them small parcels of not more than 0.2 ha. They continued to pay high taxes, however, and had to fulfill other obligations, such as helping to build roads. When Western Ukraine was occupied by the Soviet regime, collectivization was also carried out there, and by 1950 only 9 percent of rural households were made up of *odnoosibnyky*. By 1969 they represented a mere 0.1 percent of rural households throughout Ukraine, farming a total of only 9,300 ha.

As a result of the serious agricultural crisis in the USSR attempts were made in the late 1980s to increase individual family farming by allowing individuals opting out of the collective farm or willing urban residents to establish individual farms. Such farmers are no longer called *odnoosibnyky*. As of January 1990 only 43 new private farms had been established. An important obstacle was the absence of legislation establishing the private ownership of land. The land law of 7 March 1990 granted the right of possession to those farming the land and the right of succession to their children. It did not, however, acknowledge inalienable property rights, and demands for legislation allowing for the private ownership of land continued to be voiced.

A. Babyonyshev, B. Krawchenko

Odorsky, Hedeon [Odors'kyj], b and d ? Orthodox churchman. He studied in Olomouc, Bohemia, and then became a preacher in Kiev in 1680 and served as a professor at and rector of the Kievan Mohyla Academy (1702–5). It was during his tenure that the academy was enlarged and a new complex built with the support of Hetman I. Mazepa. Odorsky served as archimandrite of the Baturyn Monastery in 1705–12. He was exiled to the Solovets Islands in 1712 for his support of Mazepa and P. Orlyk. He later served as rector of a seminary in Arkhangelsk (1715–16).

Odrach, Fedir [Odrač] (pseud of Fedir Sholomitsky), b 13 March 1912 in Misiatyn, Polisia, d 7 October 1964 in Toronto. Writer. During the Second World War he fought in the ranks of the Polisian Sich and the Ukrainian Insurgent Army. As a postwar émigré in Canada he wrote about interwar and wartime Polisia. Among his works are the novels *V dorozh* (On the Road, 1954), *Shchebetun* (The Chatterbox, 1957), and *Voshchad* (Incipient Dawn, 1972), the story collections *Pivstanok za selom* (The Whistle-Stop outside the Village, 1959) and *Pokynuta oselia* (The Abandoned Settlement, 1960), and the regional study *Nashe Polissia* (Our Polisia, 1955).

Odrekhivsky [Odrexiv'skyj]. A family of folk artists from Vilka, in the Sian region of Galicia (now in Poland). Pavlo (b 5 July 1899, d 31 March 1973 in Lviv) was a master

of decorative carving on wooden plates, boxes, and canes. His son Vasyi (b 18 February 1921), a graduate of the Lviv Institute of Applied and Decorative Arts (1957), specializes in thematic sculpture and portraits in wood, such as *To the Market* (1946), *Grape Harvesting* (1949), *Yurii Shkribliak* (1957), and *The Composer S. Liudkevych* (1967). He helped create the monuments to I. Franko in Lviv (1964) and Drohobych (1967). Pavlo's second son, Ivan (b 10 October 1923), is a master of thematic sculpture in wood. His works include *Woodcutter* (1949), *Shepherd* (1956), and *Dovbush* (1965). Vasyi's son Volodymyr does lyrical monumental sculptures, such as *Daydreamer* and *The Baiko Sisters*, and his other son, Roman, specializes in artistic glass. The works of these masters are preserved in art museums in Kiev and Lviv.

Dmytro Odryna

Odryna, Dmytro, b 1892 in Teleshivka, Vasyilkiv county, Kiev gubernia, d 16 November 1919 in Kamianets-Podilskiyi, Podilia gubernia. Physician and political leader. After graduating from Kiev University (1916) he was active in the Ukrainian Party of Socialist Revolutionaries. A member of the Central Rada, he was arrested by the Hetman government for protesting against German atrocities. In January 1919 he was elected vice-chairman of the Labor Congress. As a leading organizer of medical and sanitary services for the military and of the Ukrainian Red Cross, he was invited to join B. *Martos's cabinet as health minister and deputy premier on 9 June 1919. He directed a vigorous campaign against typhus, of which he himself became a victim.

Oduko, Tymish [Oduđ'ko, Tymiš], b 24 September 1912 in Khorovets, Iziaslav county, Volhynia gubernia, d 25 July 1982 in Lviv. Poet and songwriter. He completed studies at the Vinnytsia Pedagogical Institute (1939) and worked as a correspondent for various front-line newspapers during the Second World War. Later he settled in Lviv, where he became editor of the newspaper *L'vovskaia pravda*, director of the Kameniar publishing house in Lviv, and, finally, head of the Lviv Oblast Publishing, Printing, and Book Trade Administration. Between the years 1950 and 1982 he published 11 poetry collections.

ODUM. See Ukrainian Democratic Youth Association.

ODVU. See Organization for the Rebirth of Ukraine.

Odyntsi, Oleksander [Odynciv], b 1895 in Vypovziv, Oster county, Chernihiv gubernia, d 1930s. Bolshevik revolutionary and Soviet official. A law student at Kiev University, he joined the Bolshevik party in 1917 and served on the Revolutionary Military Committee. He held important government posts, such as deputy commissar of agriculture for Ukraine and the USSR, member of the Collegium of the USSR Agriculture Commissariat, people's commissar of agriculture for Ukraine, and from 1934, chief of the agricultural administration of the Azov-Black Sea region. From October 1932 he was a member of the CC CP(B)U. He perished in the Stalinist terror.

Officer schools of the Army of the Ukrainian National Republic (Starshynski shkoly Armii UNR). In the summer of 1917 the First Khmelnytsky Cadet School was formed by Ukrainianizing one of the two Russian army cadet schools in Kiev. Under Capt Nosenko's command, its 600 students were organized into a battalion of four companies. Its senior class, commanded by Capt A. Honcharenko, suffered heavy losses in the Battle of *Kruty, and its junior cadets participated in the fighting in Kiev in late January 1918. The surviving cadets were enlisted in the *Haidamaka Battalion of Slobidska Ukraine.

In the spring of 1918 the Officer Instruction School, under Gen O. Ostapura-Stepovy, was opened. It had several departments (infantry, machine gun, engineering, artillery, and cavalry) and produced a total of approx 1,400 officers. In September 1918 the Supreme School Board of the defense ministry, chaired by Gen M. Yunakiv, drew up a plan for a Ukrainian military education system: basic schools were to offer a one-year program, and professional schools a two-year program. Nine schools were to be set up, and admission was to be open to secondary-school graduates.

On 14 January 1919 a unified military youth school was opened in Zhytomyr, under the directorship of Col V. Petriv. From March to July its cadets participated in combat; then they resumed regular training in Kamianets-Podilskyi under the directorship of Col O. Puchkivsky. In October the school graduated its first 300 second lieutenants, and a month later it was again reorganized into a combat unit, which participated in the First Winter Campaign.

In January 1920 another unified military youth school was organized in Kamianets-Podilskyi, under the directorship of Col M. Shapoval. It carried on its work in Polish internment camps, and graduated several classes of officer candidates in different specialties.

Officer schools of the Ukrainian Galician Army. In January 1919 each corps (Zolochiv, Sambir, and Kolomyia) of the Ukrainian Galician Army set up its own infantry officer candidate school. An artillery officer candidate school and a signal officer candidate school were also organized in Stanyslaviv. Each school offered a three-month course patterned on Austrian army courses. Most of the students were veteran noncommissioned officers aged 18 to 24 years. The infantry schools had 78 to 95 students each, and the artillery and signal schools had 42 to 50 students. Besides the first class of officer candidates, two more classes (one infantry and one artillery) were graduated in the fall of 1919 in central Ukraine, for a total of approx 440 officer candidates. The commanders of the schools were Maj F. Rimal, Maj Y. Feshchuk, First Lieut D. Kulchytsky, Capt I. Sitnytsky, Capt L. Sheparovych, Capt O. Dragan, and S. Leshchii.

Ofinor. A press agency established by M. *Yeremiiv to supply the Western press with information on the Ukrainian question and the activities of the Government-in-exile of the UNR. Based in Geneva, it published French-, German-, and Ukrainian-language bulletins there during the years 1928-44. It also issued bulletins in French (1929-39) and Spanish (1932-6) in Paris, and in Italian in Rome (1929-43); the Italian-language bulletins were edited by B. Randone and Ye. Onatsky.

Oghuz (aka Oğuz, Ohuz, Ghuzz, Huz, Uz). A federation of nomadic Turkic tribes, which arose in the Aral Sea region in the first half of the 10th century and established a state on the lower Syr Darya River. Some of their detachments helped Volodymyr the Great in his campaign against the Volga Bulgars in 985. Pressed by the Kipchaks, in the mid-11th century some of the Oghuz moved into the Volga-Don region, thereby forcing the Pechenegs to move into the Black Sea steppes, and others, under the leadership of the Seljuks, conquered Byzantine Anatolia.

OGPU. See GPU.

Ohiihuk, Hryhorii [Ohijčuk, Hryhorij], b 25 January 1893 in Trubiivka, Skvyra county, Kiev gubernia, d 13 February 1985 in Chicago. Orthodox metropolitan. He was ordained in 1919 and joined the new Ukrainian Autocephalous Orthodox church (UAOC) in 1921. He served as a priest in the Kiev region until 1927, when he was made overseer of the Dormition Cathedral in Berdychiv. He was arrested in 1932 and served three years at hard labor in the Kuzbas. He returned to Ukraine but did not resume his pastoral work until the German occupation. In May 1942 he was consecrated bishop (later archbishop) of Zhytomyr of the renewed UAOC. From September 1942 to March 1943 he was imprisoned by the Germans. Upon his release he moved to Westphalia, Germany. After the split in the UAOC in October 1947, he became head of the *Ukrainian Autocephalous Orthodox Church (Conciliar), which rejected the leadership of Metropolitan P. Sikorsky and advocated authority of the church sobor over the episcopate in church affairs. Ohiihuk emigrated to the United States in 1950 and settled in Chicago. He organized a number of parishes in the United States and published the church's organ, **Pravoslavnyi ukrainets*'. In 1971 he was elevated to metropolitan.

Ohiienko, Ivan [Ohijenko] (monastic name: Ilarion), b 14 January 1882 in Brusyliv, Radomyshl county, Kiev gubernia, d 29 March 1972 in Winnipeg. Orthodox metropolitan, linguist, church historian, and cultural figure; full member of the Shevchenko Scientific Society from 1923. He studied Slavic philology and literature under V. Peretts at Kiev University and graduated in 1909 after completing a thesis on I. Galiatovsky's *Kliuch razumieniia*. In 1912 he completed the Higher Pedagogical Courses and began to teach at the Kiev Commercial Institute, and in 1915 at Kiev University.

Following the Revolution of 1917, Ohiienko played an important role in the Ukrainianization of higher education and scholarship. He became a professor of the history of Ukrainian culture at the new Ukrainian State University in Kiev in 1918. Forced to leave the city following the Bolshevik seizure of power there, he helped organize and became the first rector of the *Kamianets-Podilskyi Ukrai-

Metropolitan Ivan (Ilarion)
Ohiienko

nian State University. As a member of the Ukrainian Party of Socialists-Federalists he served as minister of education (early 1919) and then minister of religious affairs (from August 1919) in the Council of Ministers of the Ukrainian National Republic.

With the defeat of the UNR, Ohiienko settled in Tarnów (Poland) in 1920, where he participated in the *Council of the Republic and resumed his functions as minister of religion in the government-in-exile of the UNR (to 1924). He taught at a Lviv gymnasium (1924–6) before becoming professor of Church Slavonic and paleography at the Orthodox Faculty of Theology at Warsaw University (1926). After being removed from his post in 1932 in the anti-Ukrainian campaign initiated by the Polish authorities, he worked as a private scholar and published the journals **Ridna mova* and **Nasha kul'tura*. He also resumed work on the translation of the Bible into Ukrainian (which he had begun in the early 1920s). His translation of the Gospels appeared in 1937, followed by the New Testament, including the Psalms, in 1939. He finished most of the Bible in 1940 but was not able to publish it because of the war. After revisions and other changes, his complete translation appeared in 1962.

In October 1940 Ohiienko was tonsured and then consecrated bishop of Kholm and Podlachia by Metropolitan D. Valedinsky of the Polish Autocephalous Orthodox church in the wartime Generalgouvernement. He began to Ukrainianize the church in the Kholm region, by introducing Ukrainian practices in the church rite and the use of Ukrainian in services and ordaining several Ukrainian priests. After being elevated to the rank of metropolitan by Valedinsky in March 1944, he was soon forced to flee the advancing Soviet army to Austria and then Switzerland. In September 1947 he was invited to Canada by the parish of St Mary the Protectress in Winnipeg. In August 1951 he was elected metropolitan of Winnipeg and head of the *Ukrainian Orthodox Church of Canada (UOCC). He established the theological journal **Vira i kul'tura* and revived **Nasha kul'tura*, founded a theological society (now the Metropolitan Ilarion Theological Society), and lectured and served as dean of theology at *St Andrew's College.

A prolific writer, Ohiienko published scores of monographs and articles on a variety of topics. His first major publication, 'Ohliad ukrains'koho iazykoznavstva' (Sur-

vey of Ukrainian Linguistics, in *ZNTSh*, vols 79–80, 1907), was followed by several articles on I. Galiatovsky, the subject of his MA thesis. In 1918 he published *Ukrains'ka kul'tura* (Ukrainian Culture). Other works in cultural history included *Istoriia ukrains'koho druzarstva* (A History of Ukrainian Printing, 1925), *Dokhrystyians'ki viruvannia ukrains'koho narodu: Istorychno-relihiina monohrafiia* (Pre-Christian Beliefs of the Ukrainian Nation: A Historical-Religious Monograph, 1965), *Kniaz' Kostiantyn Ostroz'kyi i ioho kul'turna pratsia* (Prince Kostiantyn Ostrozky and his Cultural Work, 1958), and *Fortetsia pravoslaviia na Volyni: Sviata Pochaiv's'ka Lavra* (The Fortress of Orthodoxy in Volhynia: The Holy Pochaiv Monastery, 1961). In the 1920s he initiated a series of works on the history of the Slavic languages, beginning with *Kostiantyn i Mefodii: ikh zhyttia ta diial'nist'* (Constantine and Methodius: Their Lives and Activity, 2 vols, 1927–8), and continuing with monographs on the phonetics of Church Slavonic (1927), the origins of Slavic alphabets and literary languages (1928), Slavic documents of the 10th and 11th centuries (1929), and old Slavic paleography (1928). He also examined the history of Ukrainian and Russian accents (1914) and accents in historical and geographical names (1912). He devoted more attention to this problem in several articles and in many general surveys of Ukrainian linguistics and stylistics, eg, *Kurs ukrainskogo iazyka* (A Course in the Ukrainian Language, 1918), *Ukrains'kyi stylistychnyi slovnyk* (A Ukrainian Stylistics Dictionary, 1924), *Chystota i pravyl'nist' ukrains'koi movy* (The Purity and Correctness of the Ukrainian Language, 1925), and *Suchasna ukrains'ka literaturna mova* (The Contemporary Ukrainian Literary Language, 1935). A representative of the 'ethnographic' school in Ukrainian linguistics, he was particularly concerned with popularizing norms of literary Ukrainian and narrowing the gap between the literary and spoken language; many of his monographs were intended as textbooks, and his journal *Ridna mova* was almost exclusively devoted to this concern. He also made several contributions to Ukrainian etymology and lexicography, including dictionaries of little-used place-names (1934) and words (1973); *Skladnia ukrains'koi movy* (A Treasury of the Ukrainian Language, 1937–8); and *Etymologichnyi-semantnychnyi slovnyk ukrains'koi movy* (Etymological-Semantic Dictionary of the Ukrainian Language), three volumes of which have appeared posthumously. His translations were important in the development of modern Ukrainian religious terminology and *liturgical language.

Ohiienko's most important works on the history of Ukrainian were *Ukrains'ka mova XVI-ho stolittia i Krekhivs'kyi apostol 1560-ykh rokiv* (The Ukrainian Language of the 16th Century and the Krekhiv Apostol of the 1560s, 1930), *Narysy z istorii ukrains'koi movy* (Surveys of the History of the Ukrainian Language, 1927), and *Istoriia ukrains'koi literaturnoi movy* (History of the Ukrainian Literary Language, 1950). As a historian of the Ukrainian church, Ohiienko wrote such monographs as *Kanonizatsiia sviatykh v ukrains'kii Tserkvi* (The Canonization of Saints in the Ukrainian Church, 1965), *Ukrains'ka Tserkva za Bohdana Khmel'nyts'koho, 1647–1657* (The Ukrainian Church during the Period of Bohdan Khmelnytsky, 1647–57, 1955), and *Ukrains'ka Tserkva za chas ruiny* (The Ukrainian Church during the Period of the Ruin, 1956). His survey history of the Ukrainian church, originally published in 1942, appeared in English translation in 1986. A collection of his sermons appeared in 1973.

Ohiievsky, Anatolii [Ohijevs'kyj, Anatolij], b 31 August 1894 in Starodub, Chernihiv gubernia, d 3 April 1952 in Kiev. Hydrologist. He graduated from the Kiev Polytechnical Institute (1922), worked at the Dniprobud organization, and was director of the Kiev Scientific Research Hydrological Observatory (1944–7). He made significant contributions to the understanding of watersheds and water currents in rivers and developed quantitative methods of predicting runoff. A biography of him was published in Leningrad in 1973.

Ohiievsky, Vasyl [Ohijevs'kyj, Vasyl'], b 11 February 1861 in Krolevets, Chernihiv gubernia, d 1 June 1921 in Kiev. Forester and one of the founders of forest research in the Russian Empire. He graduated from the St Petersburg Forestry Institute (1886) and was appointed professor at that institute in 1912 and professor at the Kiev Polytechnical Institute in 1919. Most of his research, which dealt with the fertility and growth rate of pine trees and the seeding and planting methods for pine and oak trees, was done at the Sobyck and Mykilske forest stations in Chernihiv gubernia and the forest-cutting areas of the Tula region. In 1909 he set up in St Petersburg the first forest seed control and research station in Russia. Pines of various geographic origin planted by Ohiievsky can be found even today at Sobyck. The nest method of seeding oak introduced by Ohiievsky is still used.

Ohiievsky, Volodymyr [Ohijevs'kyj], b 10 May 1890 in Krapivna, Tula gubernia, Russia, d 26 February 1979 in Kiev. Radio technology scientist. Under his leadership the first regularly scheduled radio station was formed, and started operations in 1924 in Kiev. He also did experimental work on radio transmissions, electromagnetic measurements, and various theoretical questions of radio technology.

Ohiievsky-Okhotsky, Petro [Ohijevs'kyj-Oxoc'kyj], b ca 1814, d ca 1888. Ethnographer and writer. While serving as a priest in the Chernihiv region, he collected ethnographic material and folklore. Some of this material appeared in his article on folk customs (1873), and some was used by B. Hrinchenko in his publications. Ohiievsky-Okhotsky also wrote poems, which came out as the collection *Dumky na mohyli* (Thoughts at a Grave, 1854), and fables.

Ohilevich, Pakhomii [Ohilevič, Paxomij], b 12 June 1624 in Minsk, Belarus, d 1690. Basilian writer and liturgist. He entered the Basilian monastery in Byten, and completed a D TH in Rome in 1652. He returned to occupy several posts in the Basilian order in Belarus and Ukraine, including that of protoarchimandrite (1675–9). In 1671 he published a textbook on liturgies, which was reprinted several times.

Ohio. An eastern north central state (1990 pop 10,887,325) of the United States, covering an area of 108,800 sq km south of Lake Erie. Its capital is Columbus. Ukrainians began to settle in Ohio at the turn of the century. By 1930 over 10,000 Ukrainian immigrants had come to the state. According to the 1960 census, 8,500 inhabitants considered Ukrainian their mother tongue. In 1990, 43,600 Ohio residents were listed as Ukrainian by origin. The largest Ukrainian communities are in Cleveland, Parma, Akron, Youngstown, Lorain, Canton, and Toledo.

Ohloblyn, Mykola (Ogloblin, Nikolai), b 1814, d 1877. Orthodox archpriest and church historian; father of M. *Ohloblyn. He had a master's degree from the Kiev Theological Academy and taught at Kiev's theological seminary and institute for daughters of the nobility. His articles on Ukrainian church history and church archeology (particularly of the St Sophia Cathedral, where he was sacristan) were published mostly in *Trudy Kievskoi dukhovnoi akademii* and Kiev's *Eparkhial'nyia vedomosti*. Published separately was his textbook on church liturgy (1862).

Ohloblyn, Mykola (Ogloblin, Nikolai), b 1852 in Kiev, d 1906? Historian and archeographer; son of M. *Ohloblyn. He studied at the Kiev Theological Academy and St Petersburg Archeological Institute and then worked as an archivist at the Moscow Archive of the Ministry of Justice. A member of the Historical Society of Nestor the Chronicler in Kiev and an authority on the archives of Siberia, he produced a pioneering review of the rolls and books of the Russian government's Siberian Office (4 vols, 1895, 1900–1) and a review of historical and geographical materials of the 17th and early 18th centuries (1884). He also contributed several articles to *Kievskaja starina*, among them ones on 17th-century Russian military governors' reports on Ukraine (1885), the Kiev branch of the Russian Military Office (1886), the conversion of Uniates in Kiev (1889), life in late 17th-century Ukraine (1887), and the 1666 investigation of Muscovite soldiers' abuses in Ukraine (1895).

Ohloblyn, Mykola. See Hlobenko, Mykola.

Oleksander Ohloblyn

Ohloblyn, Oleksander, b 6 December 1899 in Kiev, d 16 February 1992 in Ludlow, Massachusetts. Historian, historiographer, and archeographer; member of the Shevchenko Scientific Society from 1947 (honorary member from 1988) and the *Ukrainian Academy of Arts and

Sciences (UVAN) from 1948. He graduated from Kiev University in 1919 and obtained doctorates in Ukrainian cultural history (Odessa, 1926) and historical sciences (Moscow, 1941). He was a professor of Ukrainian economic history at the Kiev Archeological Institute (1920–1), the Kiev Institute of People's Education (1921–33), the Kiev Institute of the National Economy (1927–30), Kiev University (1938–41), and Odessa University (1938–41); a full member of the Kharkiv-based Scientific Research Institute of the History of Ukrainian Culture (1926–31); a senior research associate at the VUAN (1926–33) and AN URSR (now ANU, 1935–41); deputy director of the All-Ukrainian Historical Museum in Kiev (1931–2); director of the Kiev Central Archive of Old Documents (1932–3); chairman of the department of capitalism at the ANU Institute of the History of Ukraine (1937–41); and chairman of the department of Ukrainian history at Odessa University (1939). He was imprisoned for several months in 1930–1 and forced to recant his 'bourgeois nationalist' scholarship. From 1933 to 1935 he was relieved of all academic positions and suffered persecution by the GPU. In the autumn of 1941, during the German occupation of Ukraine, he headed the Kiev municipal administration and was a member of the *Ukrainian National Council there. He lived in Lviv in 1943 and Prague in 1944.

A postwar émigré, Ohloblyn was a professor in Munich at the Ukrainian Free University and the Theological Academy of the Ukrainian Autocephalous Orthodox Church from 1946 to 1951. He emigrated to the United States in 1951. There he chaired the UVAN Historical Section (1951–84) and was a contributing editor of *Entsyklopediia ukraïnoznavstva* and *Encyclopedia of Ukraine*. He also contributed to *Ukraine: A Concise Encyclopaedia* and chaired the scholarly council of the *Lypynsky East European Research Institute (from 1964). He was president of the Ukrainian Genealogy and Heraldry Society (1963–74), the *Ukrainian Historical Association (1965–80), and the UVAN (1970–9, honorary president from 1988); was a visiting history professor (1968–70) and thesis adviser (1970–3) at Harvard University; and was elected an honorary member of the Harvard Ukrainian Research Institute in 1973.

Ohloblyn is the author of over 700 publications (monographs, articles, and reviews) on Ukrainian history, historiography, genealogy, and other historical disciplines. They include monographs on manufacturing in the Hetman state (1925), the precapitalist factory in Ukraine (1925), and the peasant factory in 18th- and 19th-century Ukraine (1931), all of which were reprinted in Munich in a volume titled *A History of Ukrainian Industry* (1971); a textbook on the history of the Ukrainian economy (1929); books of essays on P. Petryk's rebellion (1929) and the history of capitalism in Ukraine (1931); a book on the Muscovite theory of the Third Rome in the 16th and 17th centuries (1951), *The Treaty of Pereiaslav, 1654* (1954), and a book on Ukraine during the hetmancy of B. Khmelnytsky (1957); a book-length article, 'Ukrainian Historiography, 1917–1956,' in *The Annals of the Ukrainian Academy of Arts and Sciences in the US* (1957); monographs on the late 18th- and early 19th-century elite in the Novhorod-Siverskyi region (*Liudy staroi Ukraïny* [People of Old Ukraine], 1959) and Hetman I. Mazepa and his era (1960); and shorter books on O. Lobysevych (1966) and contemporary Soviet Ukrainian historiography (1963).

Ohloblyn's autobiography, articles about him, and a bibliography of his works appeared in a VUAN collection of essays in his honor published in 1977 (ed V. Omelchenko).

L. Wynar

Ohloblyn, Volodymyr, b 11 July 1915 in Vilshany, Kharkiv county. Stage director and actor. A pupil of the psychological-realistic school (of B. Nord, I. Chuzhoi, K. Khokhlov), he completed drama studies at the Kiev Russian Drama Theater in 1939 and then worked in various theaters (Odessa, Lviv, Mykolaiv, Drohobych, Sumy, Symferopil) as stage director until 1952. Nord and he were then assigned to replace M. Krushelnytsky at the Kharkiv Ukrainian Drama Theater; Ohloblyn worked there in 1952–8 and 1967–71 as artistic director. In 1958–67 and 1979–88 he was director of the Kiev Ukrainian Drama Theater. In 1988 he became artistic director of the Kiev Young Spectator's Theater.

Ohnievoi, Kostiantyn [Ohnjevoj, Kostjantyn], b 30 September 1926 in Dnipropetrovske. Opera singer (tenor). A graduate of the Moscow Conservatory (1955) studying with M. Gukova, he was a soloist of the Kiev Theater of Opera and Ballet (1955–73) and the Kiev Philharmonic (1973–8). His operatic roles include Lensky in P. Tchaikovsky's *Eugene Onegin*, Sinodal in A. Rubinstein's *Demon*, the Idiot in M. Mussorgsky's *Boris Godunov*, Alfredo in G. Verdi's *La Traviata*, and Tamino in W. Mozart's *Magic Flute*. He has appeared in concert in Europe, Canada, India, and Pakistan. Since 1965 he has taught at the Kiev Conservatory.

Ohnyshchanyyn. The chief administrator of a prince's court in Kievan Rus'. He oversaw the running of the household, the collection of fees, and the management of the prince's herds and stables. His relative importance is reflected in the high penalty of 80 *hryvni* for killing an *ohnyshchanyyn* (compared to 40 for killing a free man).

Ohonovsky, Ilarii [Ohonovs'kyj, Ilarij], b 6 December 1854 in Chahriv, Stanyslaviv circle, Galicia, d 10 July 1929 in Lviv. Classical philologist and educator; brother of Omelian, Oleksander, and Petro Ohonovsky. After graduating from Lviv University (1884) he was ordained a Greek Catholic priest, and taught at the Academic Gymnasium in Lviv (1884–1914). He compiled a Greek-Ukrainian dictionary of 13,000 words and names in Homer's *Odyssey* and *Iliad* (1900); wrote a Ukrainian grammar (with V. Kotsovsky, 1894), a Latin syntax and Latin exercise books for gymnasium students, and articles in classical philology (eg, on Virgil and Demosthenes); and translated classical Greek and Latin works into Ukrainian.

Ohonovsky, Oleksander [Ohonovs'kyj], b 17 March 1848 in Bukachivtsi, Rohatyn county, Galicia, d 10 February 1891 in Lviv. Lawyer, legal scholar, and civic leader; brother of Ilarii, Omelian, and Petro Ohonovsky. After graduating from Lviv University (LLD, 1871), he practiced law and, from 1878, taught law at Lviv University. He was the first law professor to lecture in Ukrainian at the university, and he made an important contribution to the development of Ukrainian legal terminology, even though he did not manage to publish the Ukrainian legal diction-

Oleksander Ohonovsky

Rev Omelian Ohonovsky

ary he compiled. In 1886 he was appointed dean of the law faculty. Ohonovsky was a specialist in Austrian civil law and wrote the monographs *Die Geschäftsführung ohne Auftrag nach dem österreichischen Rechte* (1877) and *Österreichisches Ehengüterrecht* (1880). He was active in Ukrainian civic organizations and helped to found a number of societies, such as Druzhnyi Lykhvar, Prosvita, the Shevchenko Scientific Society, and Ridna Shkola. He was editor of the political journal *Pravda* (1872–6) and cofounder and first president of the *People's Council.

Ohonovsky, Omelian [Ohonovs'kyj, Omeljan], b 3 August 1833 in Hryhoriv, Stanyslaviv circle, d 28 October 1894 in Lviv. Philologist and populist; brother of Ilarii, Oleksander, and Petro Ohonovsky. He was ordained after graduating from the Greek Catholic Theological Seminary in Lviv (1857), and he taught religion and (from 1863) Ukrainian language and literature at the *Academic Gymnasium in Lviv. Continuing his studies at Lviv (PHD, 1865) and Vienna (1869–70) universities, he replaced Ya. Holovatsky as docent (1867) and then professor (1870) of Ruthenian (Ukrainian) language and literature at Lviv University. In 1881 he was elected corresponding member of the Polish Academy of Sciences.

Ohonovsky was the compiler of a Church Slavonic (1871) and an Old Ruthenian (1881) anthology; a Ukrainian rendition, with commentary, of **Slovo o polku Ihorevi* (1876); Prosvita society booklets about T. Shevchenko (1876), ss Borys and Hlib (1876), St Panteleimon (1882), and M. Shashkevych (1886); *Studien auf dem Gebiete der ruthenischen Sprache* (1880) and a monograph using F. *Miklosich's approach on the etymology of Church Slavonic, Ukrainian, and Polish prepositions (both containing a great deal of material on Ukrainian historical grammar and dialects); a secondary-school Ruthenian grammar (1889) based on the Western Ukrainian vernacular and written according to the *etymological spelling; articles in *Pravda* on several of T. Shevchenko's narrative poems; a long biographical introduction to the two-volume 1893 Lviv edition of T. Shevchenko's **Kobzar*; Polish articles on the main traits of the Ukrainian language and on Church Slavonic, Ukrainian, and Polish prepositions; a German encyclopedia article on the Ruthenians; and German articles on Ruthenian literature and on the language of the

Queen Zofia Bible. He also wrote the narrative poem 'Krest' (The Cross, in the almanac *Zoria Halytskaia* [The Galician Star], 1860); the story 'Dolia-machukha' (Fate-Stepmother, *Otechestvennyi sbornik*, 1866, nos 20–27); the dramas *Fed'ko Ostrozhs'kyi* (1861), *Nastasia* (1872), and *Hal'shka Ostrozhs'ka* (1887); and a collection of stories for children (1876).

Ohonovsky's most famous work was his unfinished history of Ruthenian literature serialized in *Zoria* (1887–94) and published separately in four parts (6 vols, 1887, 1889, 1891, 1893–4). Although its approach was somewhat chaotic and uncritical, it contains a great deal of biographical and bibliographic information and was for many years a fundamental source on Ukrainian writers and ethnographers. Ohonovsky's consistently developed concept of the Ukrainian nation, language, and literature as separate from the Russian was vehemently rejected by Russian critics (eg, A. *Pypin in 1890). His reply to Pypin (1890) and other Russian critics elicited a passionate debate and much support for his views (eg, by I. Nechui-Levytsky and M. Kostomarov). He was a founding member of the *Prosvita society, serving as its pre-eminent president from 1877 to his death, of the Shevchenko Scientific Society, and of the populist *People's Council. He was an outspoken opponent of Polonization.

Petro Ohonovsky

Ohonovsky, Petro [Ohonovs'kyj], b 20 July 1853 in Rohatyn county, Galicia, d 9 February 1917 in Ukraine. Pedagogue and civic activist; full member of the Shevchenko Scientific Society (NTSh) from 1899; brother of Omelian, Oleksander, and Ilarii Ohonovsky. He graduated from Lviv University and then taught mathematics and physics at the Academic Gymnasium of Lviv (1885–1914). He was head of the Prosvita society (1906–10) and an active member of the NTSh. Ohonovsky also wrote mathematics and physics textbooks.

Volodymyr Ohonovsky

Ohonovsky, Volodymyr [Ohonovs'kyj], b 9 June 1895 in Nyzhnyv, Tovmach county, Galicia, d 16 March 1970 in Lviv. Geographer and political activist; full member of the Shevchenko Scientific Society from 1936. After graduating from Charles University in Prague in 1926, he returned to Galicia and headed the Knyzhka publishing house of the Communist Party of Western Ukraine. He was imprisoned by the Polish authorities for his political activities in 1931–4. After the war he worked at the AN URSS Institute of Social Sciences in Lviv and taught at the Lviv Trade and Economics Institute. He wrote *Skhidn'o-evropeis'kyi step* (The East European Steppe, 1935) and numerous works on the economic geography of Western Ukraine.

Ohrenych, Mykola [Ohrenyč], b 8 December 1937 in Ivanivka, Odessa oblast. Opera singer (tenor). A graduate of the Odessa Conservatory (1968), he played on stage with the Odessa Musical Comedy Theater (1962–5) and then joined the Odessa Opera and Ballet Theater as a soloist (1966). His main roles have included Petro in M. Lyсенko's *Natalka from Poltava*, Andrii in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, Lensky in P. Tchaikovsky's *Eugene Onegin*, José in G. Bizet's *Carmen*, and Ottavio in W. Mozart's *Don Giovanni*.

Ohrin Peninsula. A multi-occupational archeological site on the Dnieper Rapids, now flooded by the Dnieper Hydroelectric Station. Excavated during 1927–32 by M. *Miller, the site yielded Neolithic burials, Saltiv culture pottery, and the remains of early Slavic farmsteads.

Ohuz kurhan. A Royal Scythian burial mound from the 4th century BC near Nyzhni Sirohozy, Kherson oblast. The site was excavated in 1891–4, in 1902, and intermittently since 1972. The kurhan, surrounded by an earthen embankment and moat (125 m in diameter), contained three burial vaults. The main chamber, one of which is the largest Scythian burial room found to date, was built of stone. While the central chamber had been looted previously, in the corridors leading to it numerous gold and silver articles of horse equipment were found. A looted noblewoman's grave was located adjacent to the central chamber in which the remains of three horses were encountered. The third chamber was not looted and contained approx 6,000 decorative gold items, including earrings in the shape of a sphinx, pendants with animal forms, plates decorated with mythological figures (Athena, Achilles, Hercules)

and the remains of a decorated sarcophagus. The collection is now housed at the Hermitage in St Petersburg and the Museum of Historical Treasures of Ukraine in Kiev.

Oil plants. Plants used to produce edible and other oil products by pressing the plant's seeds or fruits. They are used in the *vegetable-oil industry. The crushed seeds and other by-products are used extensively as feed and fertilizer. The oldest oil plants in Ukraine are *flax and *hemp. *Sunflower and mustard were introduced in the 18th century, false flax and *rape in the 19th century, and *castor bean, *peanut, *perilla, and others in the 20th century. The most widespread oil plants in Ukraine today are sunflower, flax, hemp, castor bean, and rape; 1.75 million ha of land were devoted to the first three crops in 1987. Some peanuts, perilla, mustard, and mint are also cultivated, and some corn is used to produce oil. Attempts to cultivate *cotton, a good source of oil, in Ukraine were unsuccessful.

Oistrakh, David [Ojstrax], b 30 September 1908 in Odessa, d 24 October 1974 in Amsterdam, Holland (buried in Moscow). Jewish-Russian virtuoso violinist and teacher. He graduated from the Odessa Institute of Music (later Conservatory) in 1926 in the class of P. Stoliarsky. He went on to win numerous international music competitions and gain world renown as a talented musician. Besides his appearances in Paris, London, and the United States, he performed in Kiev, Kharkiv, Odessa, Dnipropetrovske, Kherson, Mykolaiv, Kirovohrad, and other cities of Ukraine, often as a soloist in symphonic concerts. From 1934 he taught at the Moscow Conservatory. His Ukrainian pupils included O. Krysa, O. Parkhomenko, and Yu. Mazurkevych.

OKA. A publishing house in Kolomyia. Directed by O. Kuzma, it issued popular books and literature from 1921 to 1939.

Okanenko, Arkadii, b 16 March 1894 in Smila, Kiev gubernia, d 27 September 1982 in Kiev. Plant physiologist and biochemist; corresponding member of the AN URSS (now ANU) from 1967. A graduate of the Kiev Agricultural Institute (1926), he worked in Kiev at the All-Union Scientific Research Institute of Sugar Beets until 1950 (from 1937 as laboratory director) and then became a department head at the ANU Institute of Plant Physiology. He researched the mechanisms of sugar accumulation and storage in sugar beets (particularly the role of the root system and leaves) and the role of potassium in photosynthesis.

Oke or **oka** (Ukrainian: *oko*). A Turkish measure of weight that was commonly used in the Middle East and the Balkans. It was usually equal to approx 1.3 kg. It was used also to measure fluid volumes (equivalent to 1.28 L). The *oke* was used in southwestern Ukraine, where Turkish influence was strong in the 16th and 17th centuries.

Okhmativ, Battle of. A battle during the *Cossack-Polish War. From 29 January to 1 February 1655, near the village of Okhmativ (now in Zhashkiv raion, Cherkasy oblast), an army of 60,000 Cossacks commanded by Hetman B. Khmelnytsky and 6,000 to 10,000 Russian troops under the command of V. Buturlin and V. Sheremetev en-

gaged a Polish-Tatar force commanded by S. Potocki, S. Lanckoroński, and S. Czarniecki. Although the battle was inconclusive, the Poles and Tatars halted their offensive and retreated from Right-Bank Ukraine. The Vinnytsia Regiment commanded by Col I. Bohun particularly distinguished itself during the conflict.

Okhrana or Okhranka. The popular name ('Protection') of the political police of the Russian Empire; it was formally subordinated to the minister of internal affairs and the chief of police. In 1881 Alexander III broadened police powers, restricted civil liberties, and introduced special police units to combat the revolutionary underground and political terrorism in the Russian Empire, and to investigate political crime in St Petersburg, Moscow, and Warsaw. The police units were named Sections for the Protection of Public Security and Order and, from 1903, Protective Sections (Okhrannye otdeleniia). The Okhrana operated an extensive network of secret agents, informants, spies, infiltrators, and provocateurs. Special bureaus at post offices intercepted and read and deciphered the correspondence of suspected revolutionaries. Arrests of suspects were made by the gendarmerie and regular municipal and county police. In Ukraine Okhrana branches were established in Kiev, Odessa, Kharkiv, Mykolaiv, and Katerynoslav in 1902. After the February Revolution of 1917 the Okhrana was abolished by the Provisional Government.

Okhrymovych, Ivan [Oxrymovyč], b 1894 in Veldizh, Dolyna county, Galicia, d ca 1943 in Lviv. Choir conductor. From his early years he organized and conducted student choirs in Lviv. In the 1920s and 1930s he conducted the male student choir Banduryst, the St George Cathedral choir, and the male choir Surma. With Surma he recorded approx 50 songs for the Syrena-Electro label during the 1930s.

Stepan Okhrymovych

Volodymyr Okhrymovych
(portrait by Ivan Trush)

Okhrymovych, Stepan [Oxrymovyč], b 18 September 1905 in Skolie, Stryi county, Galicia, d 10 April 1931 in Zavadiv, Stryi county. Student leader and political activist; nephew of Yu. *Okhrymovych. While studying at the Lviv (Underground) Ukrainian University he was active

in the Plast Ukrainian Youth Association, the Ukrainian Military Organization, and the Union of Ukrainian Nationalist Youth. He attended the Congress of Ukrainian Nationalists in Vienna at which the OUN was founded (1929), and in the following year he was appointed to the OUN leadership for Western Ukrainian territories as organizational chief and then propaganda chief and editor of the OUN bulletin. He helped edit *Iunatstvo* and *V dorohu*. His repeated incarceration by the Polish police worsened his already frail health and led to his death a few days after his release from prison.

Okhrymovych, Vasyl [Oxrymovyč, Vasyl'], b 1914, d 1954. Nationalist leader. An OUN activist and political prisoner in the 1930s, he was appointed regional chief of the Ternopil region in 1941 and OUN western regional leader in Ukraine in 1943. He helped organize the *Ukrainian Insurgent Army and in 1944 became a member of the Ukrainian Supreme Liberation Council. He left Ukraine in 1946 but returned in 1953 to take part in underground operations. He was captured by the Soviets and sentenced to death by a military tribunal in Kiev in May 1954.

Okhrymovych, Volodymyr [Oxrymovyč], b 27 May 1870 in Veldizh, Dolyna county, Galicia, d 6 November 1931 in Lviv. Political figure, ethnographer, and journalist; full member of the Shevchenko Scientific Society (NTSh) from 1899 and corresponding member of the Russian Academy of Sciences. He was active in the *Ukrainian Radical party and contributed to its organs *Narod* and *Zhytie i slovo*. He studied law at Lviv University (1889–93; doctorate, 1897) and headed the university's *Academic Brotherhood. He was a founding member of the *National Democratic party (1899) and edited its organ *Dilo* (1902, 1906–7, 1924–5), in which he introduced a phonetic orthography. He edited (1900) and published (1907) the Lviv weekly *Svoboda*. In 1907–8 he was a member of the Austrian parliament. After being deported by the tsarist occupational authorities to Siberia (1915–17) he underwent a change in his religious and philosophical views (described in his pamphlet *Iak ia navernuvsia do Boha: Pryliudna spovid'* [How I Turned to God: A Public Confession, 1920]). After his return to Lviv in 1918, he was a member of the *Ukrainian National Rada of the Western Ukrainian National Republic (1918–19) and a founding member of the *Ukrainian Labor party (1919–25, its leader in 1923) and *Ukrainian National Democratic Alliance (from 1925). He was also a vice-president of the NTSh and head of its Statistical Commission, and a professor and dean of law at the Lviv (Underground) Ukrainian University (1921–5).

Among Okhrymovych's works are a study of the importance of Ukrainian wedding rituals and songs in the historical development of the family (in *Etnograficheskoe obozrenie*, vols 11, 15 [1891–2]); an article on stress in literary Galician Ukrainian (in *Zapysky NTSh*, vol 33 [1900]); shorter articles on Boiko ethnography, folk rituals, and views of customary law (in *Zhytie i slovo*, 1895), on his impressions of Hungarian-ruled Transcarpathia (in *Narod*, 1985, no. 6), and on primitive communism among the Boikos (in *Zapysky NTSh*, vols 31–32 [1899]); a booklet on Ukrainian proverbs about justice with legal explications (1912); and statistical booklets on Galicia's national composition (1909), the Galician *latynnyky (1912), and factual and fictitious Ukrainian losses in Galicia's demographic

balance in the decade 1900–10 (1912). V. Malanchuk's book about Okhrymovych's ethnographic activity was published in Kiev in 1972.

Yuliiian Okhrymovych

Lev Okinshevych

Okhrymovych, Yuliiian [Oxrymovyč, Julijan], b 1893 in Stryi, Galicia, d 10 October 1921 in Kiev. Political and civic leader; brother of Volodymyr *Okhrymovych. A radical influenced by M. Drahomanov's ideas, he studied philosophy and the social sciences at Lviv University from 1911 and was active in the Ukrainian Student Union and editor of its monthly *Shliakhy* (1913–14). At the outbreak of the First World War he crossed the border into Russian-ruled Ukraine to propagate national revolutionary ideas among students. In 1917–18 he served as a secretary of the Central Committee of the Ukrainian Party of Socialist Revolutionaries and as a deputy of student organizations on the Central Rada. He was one of the leaders of the party's central faction and an influential contributor to its organ *Borot'ba*. He refused to leave Ukraine with the UNR government and found work at the Rukh publishing house in Kharkiv. He was executed by the Bolsheviks for his connection with the Central Insurgent Committee in Kiev. He completed only the first part (up to M. Drahomanov) of his *Rozvytok ukrains'koi natsional'no-politychnoi dumky* (The Development of Ukrainian National-Political Thought, 1918; repr 1922 and 1965).

Okhtyrka [Oxtyrka]. III-15. A city (1990 pop 51,400) at the junction of the Okhtyrka and Vorskla rivers and a raion center in Sumy oblast. The city was founded in 1641 and was an administrative center of Okhtyrka regiment in 1655–1765. Today it has a machine-building industry, a light industry, and a food industry. Its architectural monuments include the Church of the Holy Protectress (1753). It is the birthplace of Ya. *Shchoholev.

Okhtyrka regiment. An administrative territory and military formation established in 1655–8 in Slobidska Ukraine to protect Muscovy's southern frontier from raids by the Crimean and Nogay Tatars. Its first settlers were 456 peasant and Cossack families from Right-Bank Ukraine. By 1732 the regiment had 20 companies. Its male population was over 41,000, including 7,200 elected Cossacks and 17,100 Cossack helpers. In the administrative reform of Slobidska Ukraine in 1765, the Cossack regi-

The Church of the Holy Protectress in Okhtyrka

ment was replaced by a hussar regiment, and the lands of Okhtyrka regiment were incorporated into the gubernia of Slobidska Ukraine.

Okinshevych, Lev [Okinševyč] (Okinshevich, Leo; pseud: Leo Yares), b 6 February 1898 in St Petersburg, d 7 November 1980 in Hillcrest Heights, Maryland. Legal historian and bibliographer, of Belarusian and Czech descent. He graduated from Galagan College in Kiev (1916), studied law at Kiev University, and graduated from the Kiev Institute of the National Economy (1921). From 1921 to 1933 he was a research associate of the VUAN and the Kiev Scientific Research Department of the History of Ukraine and served as secretary of the VUAN Commission for the Study of Western Ruthenian and Ukrainian Law. In 1933 he was briefly a professor at the Nizhen Pedagogical Institute before being expelled as a 'class enemy' and forced to move to Kazakhstan. There and in Smolensk oblast (1937–41) he worked as a legal consultant. A post-war émigré, from 1945 to 1949 he was a professor and dean at the Ukrainian Free University (UVU) in Munich. He emigrated to the United States in 1949 and joined the staff of the Library of Congress in 1954.

Okinshevych published works in Ukrainian, Belarusian, and English. They include books in Ukrainian on the Hetman state's General Officer Staff in Left-Bank Ukraine (1926), General Council (1929), central institutions (2 vols, 1929–30; English trans: *Ukrainian Society and Government, 1648–1781* [1978]), and *notable military fellows (1948),

and UVU textbooks on the legal structure of the Hetman state (1947; 2nd edn 1954), the history of legal philosophy (1948), and scholarship about law and the state (1987). Okinshevych also compiled *The Law of the Grand Duchy of Lithuania: Background and Bibliography* (1953), *Latin America in Soviet Writings, 1945–1958* (with C. Gorokhoff, 1958), and *U.S. History and Historiography in Post-War Soviet Writings, 1945–1970: A Bibliography* (1976). He also contributed articles on legal history to *Encyclopedia of Ukraine*.

A. Zhukovsky

Oko (Eye). A trilingual (Ukrainian–English–French) monthly newspaper published in Montreal from January 1979 to January 1986 (a total of 68 issues). It reported extensively on Ukrainian life in Montreal. It also devoted attention to general Ukrainian-Canadian issues and affairs in Soviet Ukraine, particularly the dissident movement. The paper was not aligned with any Ukrainian political party or institution and did not refrain from criticizing official community leaders and organizations. The first editor, R. *Serbyn, was succeeded by V. Lewyckyj (April 1979 to December 1981). From January 1982 the paper was edited by a board. At the height of its popularity, *Oko* had a circulation of approx 2,000.

Okolitenko, Natalia, b 6 September 1939 in Kiev. Writer and journalist. She graduated from Kiev University in 1962. She is a former writer for the weekly magazine *Ukraina* and the author of the prose collections *Intehral Pifahora* (Pythagoras' Integral, 1967), *Snizhni iahody* (Snow Berries, 1970), *Velyka richka* (The Big River, 1973), *Misiats' aktyvnoho sontsia* (Month of the Active Sun, 1979), *Naikotrotsha nich roku* (The Shortest Night of the Year, 1983), *Kazka pro syn'oho ptakha* (Tale of the Blue Bird, 1985), and *Hodynnyk zhyttia* (The Clock of Life, 1985) and of the science fiction collection *Krok vikinha* (The Viking's Step, 1990). Many of her works depict the problems facing the modern Ukrainian woman.

Okolski, Szymon, b 1580 in Kamianets-Podilskyi, d 10 June 1653 in Lviv. Polish historian and heraldist. He was a Dominican monk, and in 1637–8 served as the chaplain for M. Potocki's Polish forces which suppressed the Cossack rebellion of P. Pavliuk, K. Skydan, Ya. Ostrianyn, and D. Hunia. Okolski's two diaries of this period provided a detailed record of the Polish campaign and of Cossack tactics. Published in Zamostia (a 1638 printing of the 1637 diary) and Cracow (a 1639 printing of the 1638 diary), they were translated into Ukrainian and used in works by S. *Velychko and S. *Lukomsky during the 18th century. Later they appeared in *Memuary, otnosiashchiesia k istorii luzhnoi Rusi* (Memoirs Relating to the History of Southern Rus', vol 2, 1896).

Okopenko, Andrii, b 1 May 1874 in Kharkiv, d 10 November 1965 in Moscow. Medical and military figure. Having studied medicine in Kharkiv and St Petersburg, he served as a physician in the Russo-Japanese War and in 1912 was put in charge of public health in the Don Cossack province. A senior army surgeon during the First World War, in May–October 1918 he was chief physician of the Hetman government's railway army. After being promoted to general he was appointed the Ukrainian Red Cross plenipotentiary for all Ukrainian POWs in foreign coun-

tries (April 1919) and chief of the UNR Military Mission for Central and Southern Europe (May 1919). From then to April 1922 he headed the official Ukrainian mission in Vienna that repatriated thousands of Ukrainian POWs, demobilized soldiers, and refugees in Central Europe. From 1922 he worked as a physician and cultural-educational organizer in Ust Chorna, Transcarpathia. After fleeing the Hungarian occupation of Carpatho-Ukraine, in March 1939 he settled in Vienna, where in February 1942 he founded, under the *Ukrainian Institution of Trust and the German Red Cross, the Ukrainian Committee for the Welfare of Prisoners of War in the Ostmark Lands. During the Soviet occupation of Vienna in 1945, he was persecuted and finally deported to the Borovsk labor camp in the Urals. After being amnestied in 1952 and rehabilitated in 1956, he moved to Moscow in 1958.

Okruha (Russian: okrug). An administrative-territorial unit formed in the Ukrainian SSR in 1923, when *counties were abolished and replaced with 53 okruhas. In 1925 a consolidation took place, and the number of okruhas was lowered to 41. In 1930–2 okruhas were abolished and, after a further consolidation, replaced by *oblasts. After the Second World War okruhas existed in Transcarpathia oblast until 1953. (See *Administrative-territorial division.)

Oksenovych-Starushych, Ihnatii [Oksenovyč-Staruśyč, Ihnatiij], b ?, d 30 October 1651 in Kiev. Orthodox theologian and churchman. He served as hegumen of the monastery and rector of the college in Hoshcha, Volhynia (1639–40); archimandrite of the Kievan Cave Monastery (1640); professor at and rector of the Kievan Mohyla College (later Academy); and hegumen of the Kiev Epiphany Brotherhood Monastery (1640–2). Together with I. Kozlovsky-Trofymovych and Y. Kononovych-Horbatsky, he represented the Ukrainian Orthodox church at the 1642 church council in Iași that ratified P. Mohyla's confession of the faith. He published a eulogy for Prince I. Sviatopolk-Chetvertynsky in 1641.

Oksiuk, Yosyf [Oksijuk, Josyfl], b 9 September 1894 in Lukovychi, Volodymyr-Volynsky county, Volhynia gubernia, d 24 April 1991 in Kiev. Orthodox bishop. He graduated from the Kholm Theological Seminary (1914) and the Kiev Theological Academy (1917), where he later taught patrology. During the brief period of Ukrainian statehood he was a member of the Brotherhood of Cyril and Methodius in Kiev. In 1919 he taught church history at Kamianets-Podilskyi Ukrainian State University and translated theological books into Ukrainian. In 1920–2 he was a lecturer in history at the Kamianets-Podilskyi Institute of People's Education. After being consecrated a bishop of the *Ukrainian Autocephalous Orthodox church (UAOC) in 1922, he served as bishop of Kamianets-Podilskyi and then, until 1929, archbishop of Lubni and Poltava and of Myrhorod. In October 1927 he was chosen as second deputy to the metropolitan of Kiev and a member of the presidium of the All-Ukrainian Orthodox Church Council. He was persecuted by the Soviet authorities, and in 1933 he was forced to withdraw from the church. He was arrested in 1935, imprisoned, and exiled. He returned to Ukraine in 1950 and acted as secretary to his brother Makarii, the archbishop of the Russian Orthodox church

Archbishop Yosyf Oksiuk

Sofiia Okunevska-Moraczewska

Teofil Okunevsky

Yaroslav Okunevsky

in Lviv, who later became metropolitan of the Polish Autocephalous Orthodox church.

Oksiutyntsi kurhans. Scythian burial mounds from the mid-1st century BC, on the Sula River near Oksiutyntsi (now Pustoviitvka), Sumy oblast. Excavated in the late 19th century, the site revealed several hundred kurhans, some up to 10–20 m high. Among the grave goods interred with the dead were armor, horse equipment, ceramic wares, and decorative items.

Oksner, Alfred, b 15 February 1898 in Yelysavethrad (now Kirovohrad), Kherson gubernia, d 20 November 1973 in Kiev. Botanist and lichenologist; corresponding member of the AN URSS (now ANU) from 1972. A graduate of the Kiev Institute of People's Education (1924), he worked in the ANU Institute of Botany in 1931–73 (as director in 1968–70), headed a department in the Kiev Institute of Hydromelioration, and taught at Kiev University. He carried out regular expeditions to study lichens in Ukraine (1926–40), founded a herbarium that became an experimental center for lichenology, and established the Ukrainian school of lichenologists. He is the author of *Vyznachnyk lyshainykv URSS* (Field Guide to Lichens of the Ukrainian SSR, 1937) and *Flora lyshainykv Ukrainy* (The Flora of Lichens of Ukraine, 2 vols, 1956, 1968).

Okunevska-Moraczewska, Sofiia [Okunevs'ka, Sofija], b 12 May 1865 in Storozhynets, Bukovyna, d 25 February 1926 in Lviv. Physician and writer; wife of W. *Moraczewski. After completing her medical studies in Zurich (1894) she became the first female physician in Austria-Hungary. In 1897 she opened a private practice in Lviv. A friend of O. Kobylanska, N. Kobrynska, and V. Stefanyk, she was active in the women's movement and contributed to **Pershyi vinok* under the pseudonym Yeryna.

Okunevsky, Teofil [Okunevs'kyj, Teofil'], b 7 December 1858 in Yavoriv, Kolomyia circle, Galicia, d 19 July 1937 in Horodenka, Galicia. Lawyer and civic and political leader of the Kolomyia-Horodenka region. After graduating in law from Vienna University (1885) he became active in Galician politics and helped found the Ukrainian Radical party (1890) and the National Democratic party

(1899). He was elected to the Galician Diet (1889–1900 and 1913–14) and to the Austrian parliament (1897–1900 and 1907–18). In 1890 he established a law office in Horodenka and helped organize and finance various economic, educational, and cultural organizations. For many years (until 1930) he was president of the Prosvita branch in Horodenka. He acted as defense counsel at many political trials, including that of M. *Sichynsky (1908). When the Western Ukrainian National Republic was established, he served as a member of the Ukrainian National Rada, commissioner of Horodenka county, and appeals court judge in Stanyslaviv. His correspondence with M. Drahomanov was published by M. Pavlyk in 1905.

Okunevsky, Yaroslav [Okunevs'kyj, Jaroslav], b 1860 in Radivtsi (Rădăuți), Bukovyna, d 24 October 1929 in Horodenka, Galicia. Physician and civic leader; brother of T. *Okunevsky. After graduating in medicine from Vienna University he served as general physician in the Austrian navy. When the Western Ukrainian National Republic was established, he founded and headed the Ukrainian sanitary mission to Vienna. After the war he settled in Horodenka and practiced medicine. He contributed articles to many papers and almanacs and published an account of his travels as a naval doctor as *Lysty z chuzhyny* (Letters from Abroad, 2 vols, 1898, 1902).

Olaf I Tryggvason, b ca 966–8, d 9 September 1000 or 1002. King of Norway; son of a chieftain and great-grandson of King Harald I Fairhair of Norway. According to medieval sources, after his father's murder he fled from Norway with his mother, Astrid. After six years' captivity in Estonia, he made his way to the court of Volodymyr the Great, then prince of Novgorod, and served as a leader of Volodymyr's Varangian forces there and in Kiev. Already a Christian at that time, he reportedly played a part in Volodymyr's conversion in 987 and was sent by him to negotiate the treaty with Constantinople. Returning to Norway in the early 990s, Olaf succeeded Haakon the Great as king (995) and imposed Christianity in Norway, the Shetland, Faeroe, and Orkney islands, Iceland, and Greenland. The Norse rune (saga) about Olaf remains a valuable historical resource about Kievan Rus'.

Olbia. A major ancient Greek settlement located on the Boh Estuary near Parutyne, Ochakiv raion, Mykolaiv oblast. The site was discovered in the late 18th century and researched intermittently throughout the 19th century. Extensive excavations beginning in the late 19th century were carried out under the direction of V. Latyshev, B. Farmakovskiy, L. Slavin, and others. Since 1920 Olbia has been under official protection and it is at present a state historical site administered by the ANU Institute of Archeology.

Excavated ruins of Olbia

Founded in the early 6th century BC by Greek settlers from Miletus and other Ionian cities, Olbia soon became a prominent trading center on the northern Black Sea coast. Its inhabitants engaged in agriculture, animal husbandry, fishing, viticulture, various trades (metalworking, pottery, woodworking, stone cutting, weaving), and trade with the Greek metropolis. Olbia imported wine, olive oil, fine dishes, cloth, art objects, and glassware both for itself and for trade (together with local goods and services) with Scythians, Sarmatians, and other tribes on the Pontic steppe in exchange for grain, cattle, wool, fish, and slaves. In order to facilitate trade, the city minted its own bronze, silver, and (occasionally) gold coins.

Olbia reached the height of its prosperity and importance in the 5th to 3rd centuries BC as a city-state covering an area of approx 50 ha. It was strong enough to withstand a major siege by one of Alexander the Great's armies in 331 BC. Subsequent attacks in the 2nd to 1st centuries BC by hostile tribesmen weakened the city, and it was forced to accept the suzerainty of Scythian chieftains and then of Mithridates VI Eupator, ruler of the Pontic Kingdom. In the mid-1st century BC, the city was sacked thoroughly by Getae invaders. Olbia was rebuilt in the 1st century AD as a thriving trade center, but it never regained its former size or prosperity. Its population now included a large and influential Scythian element. Olbia fell under Roman influence, and in the mid-2nd to mid-3rd century a Roman garrison was posted there. With the garrison's departure the city fell prey to Goths and other invaders and finally collapsed in the 4th century.

The remains of Olbia reflect a prosperous and well-planned city. It was built in a triangular shape along a north-south axis. The lower town, the area initially settled by the Greek colonists, was located along the estuary and was well suited for port facilities. With Olbia's rapid growth, the settlement expanded to an upper town on the adjacent bluffs. The main square, or *agora*, was situated precisely in the middle of the city, with the principal civic

structures, a gymnasium, a theater, a hippodrome, and a temple complex nearby. The city is laid out on an orthogonal grid typical of Greek (Miletian) colonial cities, with a main thoroughfare running the length of the upper town. Statues of gods, heroes, and prominent civic figures lined the main streets. Streets and a stairway connected the upper and lower towns. Aqueducts supplied the city with water, though cisterns finished with waterproof plaster were also numerous. The apogee of building technique came in the 5th to 4th century BC, with carefully laid masonry walls, often rusticated for effect. Stone basements and ground stories topped with one story (or sometimes two) in mud brick were common throughout all periods. Public buildings and wealthy homes were further enhanced with columns and capitals of the Ionic and Doric orders, and other architectural ornaments which developed a specific regional character.

Olbia was fortified by thick masonry walls with towers. Outside the walls stretched extensive (500 ha) burial grounds. Olbia's rural hinterland was thickly studded with hundreds of estates and settlements which remained unfortified until Roman times.

Artifacts from Olbia can be found in St Petersburg's Hermitage, Moscow's Museum of History, Kiev's Historical Museum of Ukraine, the Odessa Archeological Museum, the Mykolaiv and Kherson regional studies museums, and a number of Western European and North American museums.

A. Makuch

Olbracht, Ivan (pseud of Kamil Zeman), b 6 January 1882 in Semily, Bohemia, d 30 December 1952 in Prague. Czech writer and Communist figure. He spent the summers of 1931-3 in the Transcarpathian village of Kolochava. Life in Transcarpathia was the subject of his historical novel *Nikola Šuhaj loupežník* (Nikola Šuhaj, the Robber, 1933; Ukrainian trans 1934, 1960; English trans 1954), his essay collection *Hory a stáletí* (Mountains and Centuries, 1935), and the story collection *Golet v údolí* (Exile in the Valley, 1937).

Old Believers (Russian: *starovery* or *starobriadtsy* ['Old Ritualists']). A grass-roots religious movement that emerged in 17th-century Russia as a reaction against the centralist policies of the Russian Orthodox church under Patriarch Nikon (1652-67). Nikon reformed Russian religious rites, customs, and particularly liturgical books, which he had amended with the aid of the Ukrainian scholars A. Koretsky-Satanovsky, T. Safonovych, and Ye. Slavynetsky to conform to Greek texts. Many Russian parish priests and faithful defended the old rites and texts and rejected the new, despite the support the latter were given by Tsar Aleksei Mikhailovich and the Russian government. Led by A. Petrovich, I. Neronov, and other archpriests, the Old Believers grew into a mass movement even though the Orthodox sobor of 1666-7 anathematized them and the government and church officials persecuted them as schismatics and state criminals. In the 17th centu-

ry many Old Believers had chiliastic views, and over 20,000 committed suicide by self-immolation instead of waiting for the apocalypse.

The Old Believers took part in political and social movements directed against the tsarist regime, such as the 1668–76 rebellion at the monastery on the Solovets Island in the White Sea, the 1670–1 peasant uprising in southern Russia led by S. Razin, and the 1682 Khovanshchina rebellion around Moscow. Fleeing from brutal persecution, they founded communities in Russia's borderlands in the north, the Urals, and the Don and Volga regions, and beyond in the Left-Bank Hetman state, Polish-ruled Belarus (Vetka in the Homel region), Right-Bank Ukraine, Bukovyna, and Moldavia.

In 1683 the Old Believers split into a moderate majority called *popovtsy* ('Priestists'), who had priests (and, from the mid-19th century, bishops) and administered the Sacraments, and a radical minority called *bespopovtsy* ('Priestless'), who celebrated liturgies without priests and rejected all Sacraments except baptism. The latter group underwent further sectarian splits.

The *popovtsy* who settled in the Left-Bank Hetman state in the 1660s formed, with the approval of Hetman D. Mnohorishny, 'schismatic free settlements' (*rozkolnychi slobody*) in the territories of Starodub and Chernihiv regiments. Their colonization increased under hetmans I. Mazepa and I. Skoropadsky largely with the permission of local authorities (Cossack *starshyna* and monastic superiors, including the archimandrite of the Kievan Cave Monastery), who expected that they would be able to turn the *popovtsy* into vassals after their eight-year dispensation ended. The economic strength of the free settlements, however, and Russian centralist politics to 1709 helped the Old Believers avoid subjugation. Peter I's 1716 ukase legalized their status in the Hetmanate and confirmed their rights and landholdings. According to the enumeration of 1715–8 there were 586 households in the 17 schismatic free settlements in the northern Hetmanate. The settlements' autonomy, prosperity, and commercial and manufacturing successes resulted in further repressions, this time by the Hetmanate government. In 1716 and 1719 Hetman I. Skoropadsky forbade the Old Believers to trade in the Hetmanate, but this prohibition was not enforced and his petitions to the tsar to have the Old Believers deported from the Hetmanate were in vain. In the second half of the 18th century the free settlement of *Klintsy in the northern Chernihiv region became the Old Believers' cultural and publishing center; from the late 18th century it was an important woolen manufacturing center, which grew to be the largest in Ukraine by the turn of the 20th century.

The free settlements' economic and population growth and constant conflicts with local officials and the Ukrainian government (particularly over increased taxation) caused many Old Believers in the Chernihiv and neighboring Homel regions to move to the sparsely populated lands of Southern Ukraine. There they colonized *New Serbia and *Sloviano-Serbia, and later Kherson and Tavria gubernias, particularly Beryslav and Melitopil counties. By 1832 over 7,000 Old Believers lived in Southern Ukraine. The tsarist government supported their efforts to settle Ukraine's southern steppes and granted them various exemptions. In 1858, 10 percent of the registered Old Believers in the Russian Empire – 88,762 individuals –

lived in the nine Ukrainian gubernias; by far the largest concentration was in Chernihiv gubernia (51,643), followed by Podilia (9,913) and Kherson (7,105) gubernias. By 1904 their number in the nine gubernias had nearly doubled, to 166,648. In the mid-18th century Old Believers also settled in southern Bessarabia, where they were known as *lipovany*, and near the Danube Delta (eg, the village [now town] of Vylkove). Their in-migration increased after Bessarabia was annexed by the Russian Empire in 1812, and by the late 19th century nearly 30,000 Old Believers were living in southern and northern (Khotyn county) Bessarabia.

From the 1760s to the 1780s *lipovany* who had emigrated to Ottoman-ruled Moldavia, Wallachia, and Bessarabia resettled in Bukovyna and Podilia with the support of Austrian authorities. In 1783 Joseph II exempted them from taxes and guaranteed their religious freedom. In Bila Krynytsia (now in Hlyboka raion, Chernivtsi oblast) the Old Believers built a monastery and a cathedral with the financial support of their coreligionists in the Russian Empire. In 1844 the settlement became the Old Believers' episcopal see. Later a hierarchy headed by a metropolitan was established there and ordained priests and bishops for Old Believers throughout the Russian Empire. After the tsarist edict of toleration was proclaimed in 1905, the center of the *popovtsy* in the Russian Empire was established in Moscow at their church in the Rogozhskoe Cemetery. In 1784 there were 400 Old Believers in Bukovyna; in 1844, 2,000; in 1900, 3,110; and in 1930, 3,200. Most were *popovtsy*. In the 1880s and 1890s they published in Kolomyia the journals *Staroobriadets* and *Davniaia Rus'*, which were edited by N. Chernichev.

In Ukraine, as elsewhere, the Old Believers lived in separate settlements and ghettos. They considered outsiders to be unclean and thus kept contact with them to a minimum. They differed from their Ukrainian neighbors in virtually all aspects: in religion and rite, language (they spoke Russian), the construction and internal arrangement of their houses, and folkways. They wore traditional Russian clothing and did not shave, smoke, or drink alcohol, coffee, or tea. They had strict prohibitions against taverns in their settlements and rejected theater, music, and dance. Their refusal to serve in the military, to take oaths in court, and to register births, deaths, and marriages brought them into constant conflict with the authorities. The Old Believers were engaged primarily in grain and vegetable farming, orcharding, various trades, and manufacturing. Many of those living in towns were prosperous merchants and factory owners. The Old Believers facilitated the Russification of certain parts of Ukraine, particularly the northern Chernihiv region, which is now part of Briansk oblast in Russia.

Under tsarist rule in the 19th and 20th centuries, there was a special department of the history of the 'schism' at the Kiev Theological Academy; it was headed by S. Golubev.

Old Kramatorske Machine-Building Plant (Starokramatorskyi mashynobudivnyi zavod). A heavy-machine-building plant in Kramatorske, Donetsk oblast, founded in 1896 by a German firm. The plant produced steam engines, compressors, power hammers, and other mining tools and equipment. Its machinery was evacuated at the outset of the Second World War, and the plant was completely rebuilt after 1943. It continues to produce mining equipment and metalworking machinery, including ore transporters, cold-rolling mills, and assembly lines for sheet-metal works and pipe factories. In 1970 the plant employed over 2,700 workers.

Old Ruthenians (*starorusyny* or *sviatoiurtsi*.) Representatives of a clerical, anti-Polish, pro-Austrian social-political current dominant in Galicia in the mid-19th century. During the *Revolution of 1848–9 in the Habsburg monarchy the higher clergy of the Greek Catholic church in Galicia (Bishop H. *Yakhymovych, M. *Kuzemsky, M. Malynovsky) played a very important role in the Ukrainian movement, especially in the executive of its most representative organization, the *Supreme Ruthenian Council. They remained loyal to the emperor throughout the revolution, partly out of a traditional gratitude to the Habsburg dynasty for numerous improvements it had introduced in Greek Catholic ecclesiastical life, but also because in the imperial court they hoped to find protection against Polish pretensions to rule Galicia. After the defeat of the revolution in 1849, which inaugurated a decade of neoabsolutism in the Habsburg monarchy, the Supreme Ruthenian Council and other Ukrainian institutions either ceased or radically scaled down their activities. Such leadership of the Ukrainian movement as existed was concentrated almost entirely in the hands of the Greek Catholic hierarchy (including Metropolitan S. *Lytvynovych, Bishop and later Metropolitan Yakhymovych) and the canons of the Lviv cathedral chapter (including Kuzemsky and Malynovsky). Thus, during the 1850s the leadership of the Ukrainian movement was dubbed 'the St George party' (*sviatoiurtsi*), after St George's Greek Catholic cathedral in Lviv. The St George party and those who subscribed to its views were also known as Old Ruthenians, especially by the 1860s, when the political situation of Ukrainians in the monarchy changed markedly and younger activists became *Russophiles or embraced Western Ukrainian *populism.

Characteristic of the Old Ruthenians was strong pro-Austrian feeling, relative conservatism in social and political questions, and attachment to the Greek rite, the Cyrillic alphabet, and the etymological orthography (over which they engaged in the *alphabet war of 1859–61). They had no clear conception of national identity. During the revolution of 1848–9 they mainly identified themselves as part of the Ukrainian nation, although already by

then some considered themselves closely related to or even a part of the Russian nation. The Russian idea became more important in Old Ruthenian thinking as time passed. Many Old Ruthenians also thought of themselves as part of a separate Ruthenian or Rusyn nation, restricted to the Ukrainian population of the Habsburg monarchy.

In the 1860s Austria received a constitution and parliament and the crownland of Galicia became autonomous under the domination of the Polish gentry. The new situation called forth new political currents that were much more dynamic than those of the Old Ruthenians. Most Old Ruthenians then sided with the Russophile camp, which attracted them by its social and linguistic conservatism as well as by its Easternizing religious orientation; many of them, however, were never able to adopt Russophile views thoroughly, being unwilling to abandon their loyalty to either the Habsburg emperor or Catholic church. Some Old Ruthenians, such as S. *Kachala, entered the populist movement, bringing with them their conservative views. An incident in 1870 may be considered the last stand of Old Ruthenianism: Metropolitan Y. *Sembratovych and canon Malynovsky tried unsuccessfully to reconcile the Russophile and populist parties on the basis of recognizing a separate Ruthenian nation of three million. Some epigones of Old Ruthenianism survived into the late 19th century, an outstanding example being the bibliographer I. *Levytsky.

J.P. Himka, O. Sereda

Andrew Olearchyk

Olearchyk, Andrew [Olearchyk, Andrii], b 3 December 1935 in Peremyshl. Cardiothoracic and vascular surgeon. A graduate of the Medical Academy in Warsaw (1961). He practices in New Jersey and Philadelphia (since 1982). Olearchyk contributed to anesthesia, and to general, cardiac, and vascular surgery. His publications include the monographs *Subphrenic Abscesses* (1972), *Ulcers of the Stomach and Duodenum in Children* (1974), *Coronary Revascularization: Past, Present and Future* (1988), a 'Concise History of Medicine' (with R. Olearchyk) in *Likars'kyi visnyk* (1991), and medical articles in *Encyclopedia of Ukraine* (vols 3–5).

Oleh (Russian: Oleg; Norse: Helgi), b ?, d autumn 912 (according to the Laurentian Chronicle) or 922 (according to the Novgorod First Chronicle). Semilegendary Varangian prince of Rus'. A relative of *Riuryk, he was Prince *Ihor's guardian and regent in Novgorod. According to the Rus' chronicles, in 882 Oleh sailed down the Dnieper with a

force of Varangians, Slavs, and Finns and captured Smolensk, Liubech, and finally Kiev. He had Kiev's rulers *Askold and Dyr murdered, and proclaimed himself prince of Kiev. By 885 Oleh had extended his rule over the *Derevlianians, *Siverianians, *Radimichians, and *Polianians, but he did not succeed in turning the *Ulychians and *Tivertsians into tributaries. Oleh's campaigns against the Khazars were less successful, but they ended Khazar domination in the middle Dnieper region. The Primary Chronicle describes Oleh's successful land and sea campaign against Byzantium in 907, which resulted in the acquisition of extensive commercial privileges for Rus' merchants in the Byzantine Empire. A second treaty, signed in 911 by 15 of Oleh's envoys and the Byzantine emperors Leo VI, Alexander, and Constantine VII, regulated the noncommercial aspects of Rus'-Byzantine relations.

Some scholars (eg, R.H. Dolley, H. Grégoire, O. Pritsak) consider Oleh's Byzantine campaign and Oleh himself to be an invention of the chroniclers, but they concede the likelihood that a treaty was signed by a Kievan prince and Byzantium in 911. The reliability of the Primary Chronicle has been accepted by most scholars. Contemporary historiographers, however, differentiate between the legendary Oleh the Seer of the Primary Chronicle and the Oleh of Rus' who negotiated a favorable treaty with Byzantium. In oral folk literature the legend of Oleh as a ruler with supernatural powers (therefore 'the Seer') endured.

Oleh Sviatoslavych [Svjatoslavyč], b ?, d 977 in Ovruch, Volhynia. Appanage prince; son of Grand Prince *Sviatoslav I Ihorevych. He received the Derevlianian land from Sviatoslav. After Sviatoslav's death Oleh's half-brother, *Yaropolk I Sviatoslavych, sought to annex all Ukrainian territories and moved against him. Oleh died during a battle after falling off his horse into a moat. In 1044 Oleh's nephew, Yaroslav the Wise, had Oleh's remains exhumed, baptized, and reburied in the Church of the Tithes in Kiev.

Oleh Sviatoslavych [Svjatoslavyč], b ca 1050 [in Chernihiv?], d 6 or 24 August 1115 in Novhorod-Siverskyi. Son of *Sviatoslav II Yaroslavych and father of *Vsevolod and *Ihor Olhovych. After his father's death in 1076, Oleh inherited Chernihiv, but the new grand prince, Oleh's uncle *Iziaslav Yaroslavych, gave Chernihiv to another uncle, *Vsevolod Yaroslavych. Instead Oleh ruled Volodymyr-Volynskyi, but he was driven out in 1078 by Iziaslav and sought refuge with his brother, Roman (d 1079), in *Tmutorokan. In 1078 Oleh and his cousin Borys Viacheslavych tried, with Cuman help, to regain his patrimony in Chernihiv, but they were defeated by Iziaslav and Vsevolod's army at Nezhatyna Nyva. Oleh returned to Tmutorokan, where he was captured by the Khazars in

1079 and handed over to the Byzantines. He lived in exile on Rhodes until 1083, when he returned to Tmutorokan and regained it from his cousin Davyd Ihorevych.

In 1094 Oleh took Chernihiv, after his Cuman allies had ravaged it, from his cousin Volodymyr Monomakh. He was driven out by Monomakh in 1096, fled to Starodub, and then took Murom and Rostov from Monomakh's son Iziaslav. Oleh then attacked Iziaslav's brother, *Mstyslav I Volodymyrovych of Novgorod, but was defeated and forced to attend the *Liubech congress of princes in 1097. There Oleh forfeited Chernihiv, Murom, and Riazan but was given Novhorod-Siverskyi and the lands of Kursk, which he ruled until his death. Because of his enduring ties with the Cumans (he also married a Cuman princess) Oleh refused to join Rus' military expeditions against them. In the epic **Slovo o polku Ihorevi* and folk legends he is referred to as the Son of Grief (Horyslavych). Oleh's descendants, the *Olhovych house of Chernihiv, struggled for control of the Kievan state against the descendants of Monomakh.

A. Zhukovsky

Oleh Yaroslavych [Jaroslavyč], b ?, d 1188 in princely Halych. Son of Galician prince *Yaroslav Osmomysl and Nastasiia Charhova. In 1187 he succeeded Yaroslav on the Galician throne, but he was soon driven out by boyars, who installed his half-brother, *Volodymyr Yaroslavych, in his place. Oleh fled to Poland, whence he returned to regain Halych with the help of King Casimir II the Just. He died soon afterward, having been poisoned by boyars.

Oleksandriia [Oleksandrija]. v-14. A city (1990 pop 103,800) on the Inhulets River and a raion center in Kirovohrad oblast. It was founded in the early 18th century as the settlement Usivka, and it was renamed Becheiu (Becha, Bechka) in the 1750s. In 1784 it was renamed Oleksandriisk and later Oleksandriia and chosen as a county center of Kherson gubernia. The city is the center of the *Oleksandriia Lignite Coal Basin: it has three strip mines, two mine shafts, and two briquette factories. It also has a machine-building and a food industry.

Oleksandriia [Oleksandrija]. A dendrological park located in Bila Tserkva, Kiev oblast. At present under the auspices of the Academy of Sciences of Ukraine (ANU), the

Oleksandriia park

park is spread out over 201.5 ha on the bank of the Ros River. Work was started on the project in 1793–7 with a Western European landscaping plan, and continued until 1850. The park was named after O. Branicki, the initiator of the project and the owner of the property on which it was built. It features approx 1,800 species or varieties of local, regional, and imported flora in a setting with architectural features such as the Branicki mansion, pavilions, and quaint bridges. Oleksandriia was damaged during conflicts in 1918–20 and 1941–3. In 1922 it was nationalized, and in 1946 turned over to the AN URSR (now ANU), which restored the park to its former state. The site is now an important center for the academy's scientific research in plant introduction and acclimatization.

Oleksandriia Lignite Coal Region. The richest source in the *Dnieper Lignite Coal Basin. Located in the upper reaches of the Inhulets River near the city of Oleksandriia, in Kirovohrad oblast, it is noted for its wide seams (up to 25 m) of high-grade coal near the surface of the ground (depth of approx 40–45 m), readily extractable by open-pit mining. The coal is processed into briquettes at nearby factories. The region has been mined since 1915.

Oleksandriia settlement. A Copper Age settlement along the Oskil River near Oleksandriia, Borove raion, Kharkiv oblast. Excavation in 1956–7 revealed multiple occupations. The site is best known for the recovery of 33 burials which were sprinkled with red ochre.

Oleksandriv, Borys (pseud of B. Hrybivsky), b 21 July 1921 in Ruzhyn, Skvyra county, Kiev gubernia, d 21 December 1979 in Toronto. Writer. A postwar émigré, in 1948 he settled in Toronto. There he founded and headed the Toronto branch of the *Slovo Association of Ukrainian Writers in Exile and was chief editor of the youth magazine **Moloda Ukraïna* (1951–60). He wrote five collections of lyrical poetry: *Moi dni* (My Days, 1946), *Tuha za sontsem: Poezii 1945–1965* (Longing for the Sun: Poetry, 1945–65, 1967), *Kolokruh* (a neologism, literally 'Circle-Round,' 1972), *Kaminnyi bereh: Poezii pro liubov, pro zhyttia i pro smert'* 1972–1975 (The Rocky Shore: Poems about Love, Life, and Death, 1972–5, 1975), and *Povorot po slidu: Vybrani poezii 1939–1979* (Retracing the Path: Selected Poems, 1939–79, 1980). Under the pen name Svyryd Lomachka he also wrote humorous and satiric sketches and poems; they appeared in the émigré press and as the collections *Svyryd Lomachka v Kanadi* (Svyryd Lomachka in Canada, 1951) and *Liubov do blyzhn'oho* (Love for One's Neighbor, 1961). He also translated foreign poetry into Ukrainian; notable examples are his translations of A. Akhmatova's *Requiem* (1973) and of Quebec poetry in the anthology *Poeziia/Kvebek* (Poetry/Quebec, 1972).

Oleksandrivka. V-14. A town smt (1990 pop 12,400) on the Tiasmyn River and a raion center in Kirovohrad oblast. It was founded in the first half of the 17th century, and became part of the Russian Empire at the end of the 18th century. There is a sugar-refining complex and a gas-pipeline construction firm in the town.

Oleksandrivka. VI-12. A town smt (1990 pop 6,300) on the left bank of the Boh River in Voznesenske raion, Mykolaiv oblast. It was founded at the beginning of the

18th century, and attained smt status in 1968. Its factories produce building materials, such as silicate bricks, reinforced-concrete structures, and asphalt, and its two quarries produce granite. There is a bird and a fish sanctuary near the town.

Oleksandrivka. V-17, DB II-1. A town smt (1990 pop 4,900) on the Samara River and a raion center in Donetsk oblast. The town, which was first called Bakhmetieve, was founded in 1762 and granted smt status in 1965. It has a brick factory and an experimental fish farm.

Oleksandrivka. VI-18, DB IV-3. A town smt (1990 pop 4,800) in Marinka raion, Donetsk oblast. It was founded in 1841 and called Kremina until 1903. It attained smt status in 1938. Its economy since 1890 has depended on a nearby coal mine and on jobs in Donetsk.

Oleksandrivka settlement. A Trypilian settlement of the early 3rd millennium BC near Tymkove, Kodyma raion, Odessa oblast. Excavations in 1950–3 uncovered remains of clay dwellings, storage pits, large amounts of pottery (adorned with either paint or geometric incisions), and flint, stone, and bone tools. Of particular interest were approx 100 earthenware cult figurines of women sitting in chairs.

Oleksandrivske. V-20, DB II-6. A city (1990 pop 7,800) on the Luhan River in Luhanske oblast. It was founded in the 1770s. Its name was changed from Oleksandrivka and the town raised to city status in 1961. It is administered by the Artemivske city raion council of Luhanske. Oleksandrivske manufactures electrical appliances.

Oleksandrivske. See Zaporizhia.

Oleksandropil kurhan (engraving)

Oleksandropil kurhan. A Royal Scythian burial site of the 4th to 3rd century BC near Oleksandropil, Nykopil raion, Dnipropetrovske oblast. Excavated in 1852–6, this site, also known as Luhova mohyla, is one of the largest (some 20 m high) of the Royal Scythian burial mounds found in Ukraine. Although extensively looted, the main burial chamber produced the remains of a sarcophagus. In

a side chamber the remains of slaves, 15 horses (and their elaborately decorated equipment), and a funeral chariot were recovered.

Oleksandrovykh, Mytrofan. See Aleksandrovykh, Mytrofan.

Oleksandrovykh, Tykhon [Oleksandrovyč, Tyxon], b ?, d 1746. Pedagogue and author. From 1743 he was prefect and a professor of poetics and rhetoric at the Kievan Mohyla Academy. He wrote Latin textbooks on poetics, rhetoric, and Aristotelian philosophy used at the academy.

Oleksenko, Stepan, b 22 October 1941 in Mykhailivka, Volgograd oblast, Russia. Actor. After completing study at the Kiev Institute of Theater Arts in 1964, he worked in the Kiev Ukrainian Drama Theater and acted in the films *Hamlet* (1965) and *Platon meni druh* (Platon Is My Friend, 1980).

Oleksii [Oleksij], b and d ? Painter of the 16th century. He painted icons, some of which have been preserved: *Dormition of the Theotokos* (1547, National Museum in Lviv), *Theotokos*, the *Mandyllion*, and the large *Theotokos* from Roven.

Oleksiienko, Oleksa [Oleksijenko] (real surname: Alekseev), b 1876 in Kharkiv, d 31 January 1942. Film director and stage actor. He was an actor in D. Haidamaka's troupe (1897–1907) and then directed five Ukrainian romantic-populist vaudevilles in D. Kharitonov's private film studio in 1909–11, including I. Kotliarevsky's *Moskal'-charivnyk* (The Muscovite [Soldier]-Sorcerer) and V. Dmytrenko's *Kum-miroshnyk* (The Godfather-Miller). The films created a basis for theatrical productions in O. Sukhodolsky's troupe. Oleksiienko quit his cinema activities in the 1920s.

Oleksiievo-Druzhkivka [Oleksijevo-Družkivka]. v-18, DB II-3. A town smt (1990 pop 8,000) on the Kryvyi Torets River in Donetsk oblast. It was formed by the merging of two settlements, Oleksievo, founded in the 1830s, and Druzhkivka, a Cossack outpost founded over a century earlier. The town is administered by the Druzhkivka municipal council. There is a food-processing plant and a firebrick factory in the town.

Oleksiiv, Mykhailo [Oleksijiv, Myxajlo], b 1891, d 8 October 1952. Educator and civic and political activist. He took part in the struggle for Ukrainian independence in 1917–20 as a delegate to the First and the Third All-Ukrainian Military congresses and as a soldier in the Winter campaigns. In the interwar period he worked as a teacher in Dnipropetrovske. Under the German occupation he was a community organizer in that city. After emigrating to Germany he helped found the *Ukrainian National State Union and served as chairman of its Central Committee (1947–50). He later emigrated to the United States.

Oleksyn, Ivan, b 26 June 1922 in Verbylivtsi, Rohatyn county, Galicia. Community leader. After the Second World War he emigrated to the United States, where he settled in Rochester, New York, and completed his civil-engineering education. He was active in community af-

Ivan Oleksyn

Ivan Oleksyshyn

fairs and organized a Ukrainian student club and a sports club. Starting as secretary of the local branch (1957–69), he rose through the ranks of the Ukrainian Fraternal Association to become its president (1973). He was one of the founders of the *Ukrainian American Coordinating Council and has served as its vice-president since 1983.

Oleksyshyn, Ivan [Oleksyšyn], b 1 September 1901 in Khreniv, Kaminka-Strumyl'ova county, Galicia, d 19 December 1987 in Philadelphia. Geologist; member of the Shevchenko Scientific Society. He graduated from Lviv University and the University of Innsbruck (PHD, 1947). He taught in gymnasiums in Ternopil and Lviv (1929–39) and then lectured at Lviv University. He was a senior research associate in the geology division of the Lviv branch of the AN URSR (now ANU) and from 1942 a lecturer at the Lviv Polytechnical Institute. A postwar refugee in Austria, he emigrated to the United States (1949), where he taught at Boston University (1956–67). Oleksyshyn wrote several works on the geology of Western Ukraine, particularly on the Miocene period.

Olelko Volodymyrovych, b ?, d 1455. Prince of Kiev; grandson of Grand Duke *Algirdas of Lithuania. He married Anastasiia, the daughter of the Muscovite prince Vasiliï Dmitrievich. An appanage prince in the Lithuanian-Ruthenian state (ca 1443–55), Olelko sought to develop *Kiev principality into an autonomous entity. He fostered the development of the Ukrainian church and culture, and he strengthened the southern frontiers of his lands against Tatar attacks. He was succeeded by *Semen Olelkovych.

Olelkovych [Olel'kovyč] (Polish: Olelkowicz). A family of Orthodox appanage princes in the Lithuanian-Ruthenian state. They were descended from *Volodymyr, the son of Grand Duke Algirdas of Lithuania. His son, *Olelko Volodymyrovych, from whom the family name is derived, and grandson, *Semen Olelkovych, were the last Ruthenian princes of Kiev. Olelko's other son, *Mykhailo Olelkovych, became the prince of *Slutsk principality in Belarus and conspired to assassinate King Casimir IV. Mykhailo's son, Semen (d 14 November 1505), was an unsuccessful candidate for the Lithuanian throne after the death of Casimir IV in 1492. Semen's son, Yurii (b ca 1492,

d 17 April 1542), was a member of the *Council of Lords and supported Prince K. Ostrozky, who married his sister, Aleksandra, ca 1524. Yurii was close to King Sigismund II Augustus, married Princess Helena Radziwiłł in 1530, and owned enormous latifundia in Belarus, with over 40,000 peasants. Yurii's son, Yurii (b ca 1531, d 9 November 1578), was also a member of the Council of Lords and became a Polish senator in 1577. He transformed Slutsk into a center of Orthodox culture and was buried at the Kievan Cave Monastery. His son, also Yurii (b 17 August 1559, d 6 May 1586), was also buried there. His orphaned daughter, Sofiia (b 1 May 1585, d 9 March 1612), married Prince Janusz Radziwiłł in 1600, after which Slutsk principality was ruled by the Radziwiłłs.

Olelkovych, Mytro. See Aleksandrovych, Mytrofan.

Olenivka. VI-18, DB IV-3. A town smt (1990 pop 5,200) in Volnovakha raion, Donetske oblast. It was founded in 1840 and granted smt status in 1938. It has a truck and railway depot and a bakery.

Olenivka flux limestone deposit. A flux limestone deposit located near the village of Olenivka, Donetske oblast. It was discovered in 1930 and surveyed irregularly between 1932 and 1975. Covering a territory of some 30 sq km and with estimated reserves of 820 million t (1980), it was the largest such deposit in the USSR. The limestone is found in seams of 50–70 m width and at depths of 10–60 m. The high-quality limestone contains only a little sulfur and phosphorus and is used as flux in the metallurgical industry.

Olenska, Chrystya [Olens'ka, Xrystja], b 17 April 1941 in Rottenburg, Germany, d 29 September 1979 in New York. Painter and sculptor; sister of A. *Olenska-Petryshyn. A graduate of New York University (1965), in the early 1960s she attracted attention with her works in papier-mâché. Her colorful papier-mâché jewelry was exhibited at the Museum of Modern Art (1967–9), Expo '67 in Montreal, and the Museum of Contemporary Crafts in Philadelphia (1967). Olenska devoted the last years of her life to papier-mâché bas-reliefs (eg, *Dreams*) and life-size grotesque figures, such as *Old Woman* and *Flasher*. She also painted landscapes and still lifes, including *Still Life with Flowers*, *Still Life with Fruit*, and *Patio View*, which conveyed a peaceful, contemplative mood. A catalog of her retrospective exhibition at the Ukrainian Institute of Modern Art in Chicago in 1982 was published.

Olenska-Petryshyn, Arcadia [Olens'ka-Petryšyn, Arkadija], b 19 June 1934 in Zbarazh, Galicia. Painter and critic; sister of C. *Olenska and wife of W. *Petryshyn. An émigré in the United States since 1950, she completed her studies at Hunter College (1963) and the University of Chicago (MFA, 1967). Most of her work consists of lithographs, graphics, and oils. Her early works were abstract. Later she concentrated on depicting human figures with expressionless faces. In recent years she has produced paintings of cacti and prints of plants and trees. Her works have been displayed at many group shows and solo exhibitions, in New York (1963, 1964, 1968, 1974, 1978), Chicago (1975, 1980), Toronto (1972), Edmonton (1981, 1985), Antwerp and Brussels (1984), Shenyang, China (1990),

Arcadia Olenska-Petryshyn: *Two Girls* (etching)

Lviv (1990), Kiev (1991), and several cities in New Jersey (Woodbridge [1980], Highland Park [1981], Trenton [1982], Princeton [1983]). She has served as art editor of *Suchasnist'*.

Oleksander Oles

Oles, Oleksander [Oles'] (pseud of Oleksander Kandyba), b 5 December 1878 in Bilopillia, Sumy county, Kharkiv gubernia, d 22 July 1944 in Prague. Poet. He studied at the Kharkiv Institute of Veterinary Science and worked in the Kharkiv zemstvo as a veterinarian. From 1911 he worked on the editorial board of *Literaturno-naukovyi vistnyk* in Kiev and for the Lan publishing house. He emigrated in 1919, first to Budapest and then to Vienna, where in 1920

he was editor of the journal *Na perelomi* and headed the Union of Ukrainian Journalists and Writers Abroad. From 1924 he lived in Prague. He began to publish his work in 1903, and his first collection, *Z zhurboiu radist' obnialas'* (Joy and Sorrow Embraced, 1907), gained him enormous popularity. His second collection, *Poezii* (Poems, 1909), shared many of the themes and moods of the first. In the poems there is a duality of concern: hopes for national liberation and disappointment at the defeat of the Revolution of 1905. Those themes continue in his next collection, *Tvory* (Works, 1910), and in *Poezii* (Poems, 1917), a poetic cycle on the national revolution in Ukraine in 1917. Oles also wrote dramatic poems and études, among them 'Po dorozh' v kazku' (On the Way to a Fairy Tale, 1910) and 'Nad Dniprom' (By the Dnieper, 1911), which were published in the collections *Dramatychni etudy* (Dramatic Etudes, 1914) and *Khves'ko Andyber* (1917).

The collections that Oles wrote as an émigré resound with longing for his native land: *Chuzhynoiu* (In Foreign Lands, 1919), *Poezii* (Poems, 1931), and *Komu povim pechal' moiu* (Whom Can I Tell of My Sorrow, 1931). The collection of historical poems *Mynule Ukrainy v pisniakh: Kniazhi chasy* (Ukraine's Past in Song: The Era of Princes, 1930) holds a special place among his works. Oles's satirical poems on the subject of émigré life were written under the pseudo-nym V. Valentyn, and only the first part of the collection, *Perezva* (Postwedding Party, 1921), was published. Many of his works were not published during his lifetime, such as the satirical comedies 'Revizor z Kam'iansia' (The Inspector from Kamianets), 'Vlada za kordonom' (The Authority beyond the Border), and 'Narodnyi sud' (The People's Court).

In children's literature Oles translated into Ukrainian *Kazky* (Märchen, 1911), by W. Hauff and 'Arabs'ki kazky' (Arabian Tales, 1917). He also wrote original versified stories and plays, such as 'Zlydni' (Hard Times, 1927), 'Solom'iany bychok' (The Little Straw Bull, 1927), 'Mykita Kozhum'iaka' (1929), 'Myslyvets' Khirin ta ioho psy' (The Hunter Khirin and His Dogs, 1944), and 'Babusyna pryhoda' (Grandma's Adventure, 1959).

The poetry of Oles is characterized by its form, which often imitates the structure of the folk song, by its slogan-like lexicon, frequent repetition, and anaphora, and by its facile rhythm, masterfully captured images of nature, and subtle mood. Those qualities, as well as the poetry's deeply patriotic motifs and sincerity of expression, ensured its popularity and its inclusion in many anthologies. Composers such as M. Lysenko, Ya. Stepovy, and K. Stetsenko wrote music to the words of the poems. Oles was popular in the Ukrainian SSR until the 1930s, by which time there were three editions of his *Vybrani tvory* (Selected Works, 1925, 1929, 1930). His works were subsequently banned for over 20 years; although the ban was lifted in the late 1950s, until 1991 his works were interpreted according to the prevailing Party policy and published with restrictions, as *Vybrane* (Selections, 1958) and *Poezii* (Poems, 1964). Preliminary work on a more complete publication of Oles's works was started in the mid-1980s. A two-volume edition appeared in 1990.

I. Koshelivets, B. Kravtsiv

Oleshia [Oleššja]. A medieval port near the mouth of the Dnieper River, probably at the site of present-day Tsiurupynske. According to 11th- to 13th-century chronicles

Oleshia was a major trading center on the Kiev–Constantinople route. Fishing also played an important role in its economy. The town's population was mixed, but the largest group of merchants was Greek. Until the 10th century the town belonged to the Byzantine sphere of influence, and then it became a client of Kievan Rus'. Eventually Oleshia became a Genoese trading colony. In the mid-15th century it was destroyed by the Turks, who established Ochakiv to control access to the Dnieper River.

Oleshia Sands [Oleššja] (Oleshivski pisky). A sandy region on the left bank of the lower Dnieper south of Kherson, extending roughly from Kakhivka in the east to the Kinburn Spit in the west. Once the delta of the Dnieper, the area takes its name from its proximity to the town of Oleshky (now Tsiurupynske). The sandy soil was formed by alluvial deposits. The region is covered with sand dunes 8–15 m in height and small saltwater lakes and bogs (but no rivers). The surface vegetation of the sands is generally poor, and attempts to seed Crimean pines and other trees in the area have generally had disappointing results. Grape growing and fruit cultivation have met with greater success.

Oleshky. See Tsiurupynske.

Oleshky Sich. The second-last *Zaporozhian Sich. It was located above the Dnieper Estuary near what later became the town of Oleshky (now Tsiurupynske, in Kherson oblast). After Russian forces razed the *Chortomlyk Sich in May 1709, the Zaporozhian Cossacks, who had sided with Hetman I. Mazepa against Peter I, resettled along the Kamianka River. In 1711 a Russian offensive forced them to flee, and the Crimean khan permitted them to establish a Sich on the territory belonging to the khanate. Under the provisions of the Russian-Turkish Treaty of 1713 the rights of the Zaporozhian Cossacks and their commercial contacts with the Hetman state were restricted. Ukrainian peasants and other fugitives were prevented from fleeing to the Sich by the Nogay and Crimean Tatars. The Cossacks themselves were not allowed to build fortifications or have artillery, were frequently raided by the Nogays, and were forced to perform arduous construction labor for the khanate and to fight its enemies in the Kuban and Circassia. The Cossacks rebelled in 1728 and began returning to Russian-ruled territory, and in 1734 Empress Anna Ivanovna allowed them to establish the *New Sich there. The kish otamans of the Oleshky Sich were K. Hordiienko and I. Malashevych.

Olesiuk, Tymish [Olesijuk, Tymiš] (pseud: T. Olesevych), b 21 February 1895 in Dovholiska, near Volodava, Podlachia, d 14 September 1978 in Los Angeles. Physician and civic and political leader; member of the Shevchenko Scientific Society. He interrupted his university studies during the struggle for Ukraine's independence to serve as deputy of the Kholm and Podlachia regions to the Central Rada, secretary of the Kholm Gubernia Executive Committee (1917–18), officer of the UNR Army, deputy commissioner of education for the gubernia (1918–19), and attaché of the UNR diplomatic mission to Warsaw. He was sent in 1920 as a UNR observer to the Polish-Soviet peace negotiations in Riga. After the war he resumed his studies in Warsaw and Prague (MD, 1929). He

Tymish Olesiuk

Osyg Oleskiw

was active in the Union of Ukrainian Student Organizations under Poland and helped to establish the Central Union of Ukrainian Students. In 1932–44 he practiced medicine in Podlachia. After emigrating to Germany in 1944, he became a member of the UNR government-in-exile and a founder and first president (1946–7) of the *Ukrainian National State Union. In 1947 he settled in the United States, where he resumed medical practice and served on the executive of the Union of Ukrainian National Democrats (1950–2), which he helped found. Besides demographic studies in compendiums, articles on politics and education, and recollections, which were published in journals, he wrote five books, including *Statystychni tablytsi ukrains'koho naseleння SSSR* (Statistical Tables of the Ukrainian Population of the USSR, 1930) and *Sira Ukraїna* (Gray Ukraine [that is, Ukrainians in Central Asia], 1947).

Oleskiw, Osyp [Oles'kiv] (Oleskow or Oleskiw, Josef), b 28 September 1860 in Skvariava Nova, Zhovkva circle, Galicia, d 18 October 1903 in Sokal. Agronomist and civic figure. After graduating from Lviv University with a PhD in botany he continued his studies in Germany and then taught at a Realschule in Dubliany near Lviv and at the teachers' seminary in Lviv. A populist in orientation, he became concerned with what he considered to be the ruinous emigration of Ukrainians to Brazil. He published *Pro vil'ni zemli* (About Free Lands) in 1895 in an effort to stem emigration, if only briefly, while he traveled to Canada to assess its potential for Ukrainian settlement. He was favorably impressed and published his findings and advice as *O emigratsii* (About Emigration, 1895). In 1896 he helped to organize the first major wave of Ukrainian immigration to Canada and sought to establish an orderly means for guiding emigration to that country by creating an emigrant aid society and obtaining a commission as an agent. He was superseded by events, however, and received no commissions or financial assistance for his work. He withdrew from the entire process and became director of a teachers' seminary in Sokal. Oleskiw's pivotal role in directing emigration became obscured with time, but it was brought to light again with the publication of V. Kaye's *Early Ukrainian Settlements in Canada, 1895–1900: Dr. Josef Oleskow's Role in the Settlement of the Canadian Northwest* (1964).

M. Lupul

Oleskiw, Vasyi [Oles'kiv, Vasyi'], b 12 October 1924 in the Ternopil region. Emigré political leader. He studied at the University of London in 1946–51. In 1946 he became a member of the OUN (Bandera faction) in Great Britain (which he headed in 1955–63), and in 1952 a member of the faction's general executive. After the death of Ya. Stetsko in 1986, he served as acting head of the executive until formally elected leader in 1987–1991 at the Seventh Greater OUN Congress. Oleskiw has been active in Great Britain and throughout the Ukrainian diaspora in community politics; social, educational, religious, and economic affairs; and publishing. He has been among the leaders of various organizations, such as the Anti-Bolshevik Bloc of Nations, Ukrainian State Administration, Association of Ukrainians in Great Britain, Ukrainian Former Combatants in Great Britain, Ukrainian Publishers Limited, and Ukrainian Information Service.

Oleskiw, Josef. See Oleskiw, Osyp.

Olesko castle

Olesko [Oles'ko]. IV-5. A town smt (1990 pop 1,900) in Busk raion, Lviv oblast. Traces of settlements dating from the Bronze Age and the 12th and 13th centuries have been uncovered at the site. Olesko is first mentioned in historical documents in the mid-14th century, when it was under Polish rule. In 1370–7 it belonged to the Lithuanian prince Liubartas. The Poles occupied the castle in 1432 and granted the town the rights of *Magdeburg law in 1441. Located on the *Kuchmanskyi Route, Olesko was often attacked

by the Tatars. In 1507 and 1512 it was destroyed. The Cossacks took control of the town during B. Khmelnytsky's uprising in 1648. In 1711 it was occupied by Russian troops. The town's flourishing economy of the 14th century began to deteriorate around the end of the 15th century, as the trade routes changed. In the 1680s the Polish king Jan III Sobieski, who had been born in Olesko, rebuilt the castle and tried unsuccessfully to revive the town's economy. The town's architectural monuments include a Roman Catholic church from the 15th century, a castle from the 14th to 17th centuries, and a baroque monastery from the 18th century. In 1975 the castle was restored and turned into a historical preserve. It houses a fine collection of Ukrainian art.

Yaroslav Olesnytsky

Yevhen Olesnytsky

Olesnytsky, Yaroslav [Olesnyc'kyj, Jaroslav], b 1875, d 15 July 1933 in Zolochiv, Galicia. Lawyer and civic and political leader. A practicing lawyer in Drohobych and Lviv, he was the founder of the Zemlia society and a leading member of various civic organizations. When the Western Ukrainian National Republic was established, he became counsel of the State Secretariat of Foreign Affairs and a delegate of the Ukrainian National Rada to Kiev for the drafting of the legislation for unification (22 January 1919). In 1919–21 he served as chief counsel and then head of the UNR diplomatic mission to London. After returning to Lviv he taught at the Lviv (Underground) Ukrainian University and was active in the Union of Ukrainian Lawyers. In 1924 he opened a law office in Zolochiv. A member of the Ukrainian National Democratic Alliance, he was elected to the Polish Sejm in 1930. In the following year he submitted a memorandum on the *Pacification from the Ukrainian Parliamentary Representation to the League of Nations. In addition to articles on political and legal issues, he wrote a study of minority rights according to international law.

Olesnytsky, Yevhen [Olesnyc'kyj, Jevhen], b 5 March 1860 in Velykyi Hovylyv, Terebovlia circle, Galicia, d 26 October 1917 in Vienna. Lawyer, civic and political leader, economist, publicist, and translator; member of the Shevchenko Scientific Society from 1899; brother of Yu. *Olesnytsky. A graduate of Lviv University, he opened a law office in Stryi (1891) and set up various institutions in Stryi and branches in the surrounding villages, such as a branch of the Prosvita society (1892), a savings and loan association (1894), the Union of Ruthenian Dairy Associa-

tions (a predecessor of Maslosoiuz, 1905), and the People's Home. After moving to Lviv in 1909, he reorganized the *Silskyi Hospodar society into a strong province-wide institution and established the Provincial Union of Farming and Trading Associations, the paper *Hospodars'ka chasopys', and the Library of Silskyi Hospodar as adjuncts. He helped found important economic organizations, such as the Dnister insurance company, the Land Bank, and the Provincial Credit Society. He founded a number of magazines and papers, including *Chasopys' pravnycha. A strong opponent of the *New Era policy of accommodation with the Poles, he worked to consolidate Ukrainian political organizations and played an important role in the founding of the National Democratic party in 1899 and served on the party's Popular Committee until the end of his life. Having been elected to the Galician Diet in 1900–10 (where he headed the Ukrainian caucus) and the Austrian parliament in 1907–17, he fought for electoral reform, land reform, Ukrainian autonomy in eastern Galicia, and educational reform. In 1915 he became a member of the General Ukrainian Council. A lover of theater, he supported the Ruska Besida Theater and translated many plays for it. His memoirs, *Storinky z moho zhyttia* (Pages from My Life, 2 vols, 1935), were never completed, and end with the year 1897.

Yulii Olesnytsky

Olesnytsky, Yulii [Olesnyc'kyj, Julij], b 3 June 1878 in Stanyslaviv, Galicia, d ? Lawyer and civic and political leader of the Stanyslaviv region; brother of Ye. *Olesnytsky. A student of Lviv and Vienna (LLD, 1902) universities, he opened his own law office in Stanyslaviv in 1911. During the First World War he served as a lieutenant in the Austrian army and in the Ukrainian Galician Army. He was active in Ukrainian civic organizations in Stanyslaviv and served as president of the local branch of Prosvita and the Union of Ukrainian Lawyers. In politics he was a strong supporter of the Ukrainian National Democratic Alliance until it adopted the *Normalization policy. In September 1939 he was arrested by the Soviets. He was kept in Lubianka prison in Moscow until his deportation to Sama, Ivdel raion, Sverdlovsk oblast, and was last heard from in June 1941.

Olevske [Olevs'ke]. II-8. A town smt (1990 pop 12,200) on the Ubort River and a raion center in Zhytomyr oblast. The town is first mentioned in historical documents in 1488. After the Union of Lublin in 1569, Olevske was annexed by Poland and in 1641 it was granted the rights of *Magdeburg law. After the second partition of Poland in 1793, it was acquired by Russia. The town's industries in-

clude porcelain manufacturing, food processing, and flax processing. Its most valuable architectural monument is St Michael's Church, built in 1596. During the Second World War the town was a center of the activities of the *Polisian Sich of T. Bulba-Borovets.

Olha [Ol'ha] (Olga; Norse: Helga; Christian name: Elena [Helen]), b ca 890, d 11 July 969 in Kiev. Rus' princess and Orthodox saint; wife of Prince *Ihor and mother of *Sviatoslav I Ihorevych. Olha was Sviatoslav's regent during his minority (945–57) and his later military campaigns. After Ihor's death she subdued the rebellious *Derevlians and avenged his slaying. She expanded and strengthened the central power of Kiev, defined hunting areas, and replaced the annual journey (*poliudie*) to collect tribute (during one of which Ihor had been slain) by a system of local financial-administrative centers (*pogosti*) that collected uniform taxes for Kiev. In foreign affairs she was mainly concerned with political relations with Constantinople and with Rus'-Byzantine commercial relations.

Olha was the first Rus' ruler to become a Christian. Some scholars, relying on the Primary Chronicle, claim she was baptized in 955 in Constantinople. Others contend she was baptized in Kiev before her trip to Constantinople in 957, on which she was accompanied by the priest Hryhorii. Olha urged Sviatoslav to become a Christian, but he remained a pagan. He allowed a Christian community to develop in Kiev, however, thereby paving the way for the *Christianization of Ukraine by his son and Olha's grandson, Volodymyr the Great. In 959 Olha sent a mission to the German king Otto I requesting a bishop and priests to be sent to Rus'. Otto responded by sending the monk Adalbert to serve as bishop in Kiev, where he remained only briefly.

Volodymyr the Great had Olha's remains reburied in Kiev's Church of the Tithes. Metropolitan Ilarion initiated the Christian cult of Olha in the 11th century, and the church canonized her during the first half of the 13th century. In the Ukrainian church Olha is considered an equal of the Apostles. Her feast day is 24 July (11 July OS).

Olhopil [Ol'hopil']. v-10. A village (1972 pop 5,600) on the Sarvanka River in Chechelnyk raion, Vinnytsia oblast. In the 18th century it belonged to the estates of the Lubomirski family. Until 1795 the village was called Rohuzka-Chechelnytska. Under Russian rule it was assigned to Voznesenske vicegerency and was renamed in honor of Catherine II's granddaughter Olga. In 1798 Olhopil became a county center in Podilia gubernia. During the 19th century its population grew to 10,000.

Olhovych [Ol'hovyč]. A house of the *Riurykide dynasty in *Chernihiv principality, descended from Prince *Oleh Sviatoslavych (d 1115). It was noted for its family cohesiveness and political strength until the 1237–40 Mongol invasion. The Olhovychi were successful in maintaining control over Chernihiv principality and fought for

control of Kiev and primacy in Rus' with the princely house descended from Volodymyr Monomakh, often with the military backing of the Cumans. Olhovychi who became grand princes of Kiev included *Vsevolod Olhovych, *Ihor Olhovych, *Sviatoslav III Vsevolodych, *Vsevolod Sviatoslavych Chermny, and *Mykhail Vsevolodovych. Other notable Olhovychi were *Yaroslav Vsevolodovych; *Ihor Sviatoslavych and *Vsevolod Sviatoslavych, the heroes of the epic **Slovo o polku Ihorevi*; *Volodymyr Ihorevych and *Roman Ihorevych; *Iziaslav Volodymyrovych; and Roman Mykhailovych and *Rostyslav Mykhailovych.

Domet Olianchyn

Olianchyn, Domet [Oljančyn], b 6 August 1891 in Vii-tivtsi, Bratslav county, Podilia gubernia, d 25 June 1970 in Stuttgart. Historian; full member of the Ukrainian Historical-Philological Society in Prague and, from 1948, the Shevchenko Scientific Society. He studied at Kiev University (1918–20) and, as an émigré, at the universities of Berlin (1923–6; PHD, 1928) and Münster (1932–5). As an associate of the Ukrainian Scientific Institute in Berlin he collected documents pertaining to 17th- and 18th-century Ukrainian history in the archives of Berlin, Breslau, Dresden, Leipzig, Königsberg, Halle, Jena, and Göttingen. From 1937 he lived in Stuttgart and worked there at the Auslands-Institut and, from 1950, the Landesbibliothek. From 1961 he was a professor at the Ukrainian Free University in Munich. Olianchyn is the author of a German-language monograph about H. Skovoroda (1928, his PHD diss), of several articles about 17th- and 18th-century Ukrainian-German political and commercial relations, and of articles about Prince Iziaslav Yaroslavych, the symbols on the coins of Volodymyr the Great and his successors, and Ukrainian students at Western European universities, which were published in Ukrainian émigré and German periodicals.

Oliinychenko, Halyna [Olijnyčenko], b 23 February 1928 in Hradenytsi, now in Biliaivka raion, Odessa oblast. Opera singer (lyric-coloratura soprano). A graduate of the Odessa Conservatory (1953), she was a soloist of the Odessa Theater of Opera and Ballet (1952–5), the Kiev Theater of Opera and Ballet (1955–7), and the Bolshoi Theater in Moscow (from 1957). Her operatic roles include Marfa in N. Rimsky-Korsakov's *The Tsar's Bride*, Violetta in G. Verdi's *La Traviata*, and Titania in B. Britten's *A Midsummer Night's Dream*. She has appeared in concert in Western Europe and China.

Oliynchuk, Semen [Olijnyčuk], b 1798 in Antonopil, Vinnytsia county, Podilia gubernia, d 8 August 1852 in Schlüsselburg Fortress, St Petersburg gubernia. Antiserfdom activist. He was a serf of the landowner F. Sobieszkański. He surreptitiously obtained an education at the Vinnytsia gymnasium, and then fled and, living under an assumed name, taught in schools in Right-Bank Ukraine and Belarus (1834–9). After returning to Ukraine he was arrested and imprisoned until 1845, when he was freed from serfdom. In 1847 he wrote to Nicholas I in the name of the peasants of Ostrih county, Volhynia gubernia, proposing that the system of serfdom be changed to one of land rental. His strongly critical 'Istoricheskii rasskaz prirodnykh ili korennykh zhitel' Malorossii Zadneprovskoi, t.e. Kievskoi, Kamenets-Podol'skoi i Zhitomirsko-Volynskoi gubernii pro svoe zhit'e-byt'e' (A Historical Account by the Native or Indigenous Inhabitants of Little Russia beyond the Dnieper, ie, Kiev, Kamianets-Podilskyi, and Zhytomyr-Volhynia Gubernias, about Their Lives and Living Conditions) was never completed. He was arrested for his views again in 1849, and transferred from the Kiev to the Schlüsselburg Fortress, where he died.

Oliinyk, Borys [Olijnyk], b 22 October 1935 in Zacheplivka, Novi Sanzhary raion, Poltava oblast. Poet and former Soviet government official. He graduated from Kiev University in 1958 with a degree in journalism and worked on the editorial boards of the journals *Ranok*, *Dni-pro*, and *Vitchyzna* and the newspaper *Molod' Ukrainy*. He also became active in the administration of the Writers' Union of Ukraine and served as one of the secretaries of the Writers' Union of the USSR. As a result of his Party activities and the continued publication of his works he became one of the better-known poets in Ukraine. Collections of his work include *B'iut' u krytsiu kovali* (Smiths Hammer the Steel, 1962), *Dvadtsiatyi val* (The Twentieth Rampart, 1964), *Poezii* (Poems, 1966), *Vidlunnia* (The Echo, 1970), *Na linii tyshi* (On the Line of Silence, 1972), *Zaklynannia vohniu* (The Conjuring of Fire, 1978), *Poemy* (Poems, 1983), *Sim* (Seven, 1988), and a compilation, *Vybrani tvory* (Selected Works, 2 vols, 1985). He has also published a collection of essays in literary criticism, *Planeta Poeziia* (The Planet Poetry, 1983). In the Ukrainian cultural and linguistic revival of the late 1980s he adopted an ambiguous position. On the one hand he supported the new movement, and on the other he attempted to reconcile the Ukrainian revival with a Party line that was obviously inimical to it.

Oliinyk, Ivan [Olijnyk], b ca 1876, d 1933 in Chiklent, Soviet Central Asia. Agronomist. He was one of the founders of the Kamianets-Podilskyi Agricultural Institute and head of its agricultural economy department. During his term at the institute he published a number of studies in its *Naukovi zapysky*, on crop rotation in Podilia, on the economics of farming in Podilia, on the organizational problems of peasant farming in Right-Bank Ukraine, and on the differentiation of peasant farms in Ukraine. He was arrested by the GPU in the spring of 1931 and imprisoned in Kharkiv for a year before being sent to a labor camp, where he died or was executed.

Oliinyk, Leonid [Olijnyk], b 28 May 1913 in Velyki Derivychi, Novohrad-Volynskyi county, Volhynia gubernia. Stage director and pedagogue. In 1940 he completed study

at the Kiev Institute of Theater Arts, and in 1940–1 he worked in the Lutske Ukrainian Music and Drama Theater as stage director and actor. In 1946 he began teaching in the Kiev Institute of Theater Arts, from 1965 as professor.

Oliinyk, Mykola [Olijnyk], b 9 March 1923 in Byshiv, Kiev county. Writer. He has worked as a newspaper and journal editor in Lutske and Kiev. Oliinyk has written two novels about Lesia Ukrainka, *Lesia* (2 vols, 1957, 1960) and *Oderzhyma* (A Woman Possessed, 1962), both of which also appeared together as *Dochka Prometeia* (The Daughter of Prometheus, 1966); other novels, such as *Za zhyttia* (For Life, 1962), *Za krasoiu* (After Beauty, 1967), *Zerna* (Kernels, 1977), *Svitankovi rosy* (Dawn Dews, 1980), *Sudnyi den'* (Judgment Day, 1982), and *Vid svitu ts'oho* (From This World, 1987); the trilogies *Zhyliuky* (The Zhyliuks, 1965, 1968, 1982) and *Proloh* (Prologue, 1971, 1973); the story collections *Volyns'ki opovidannia* (Volhynian Tales, 1955), *Chuiesh, brate mii?* (Do You Hear, My Brother? 1959), *Snihotsvit* (Snow Blossoms, 1964), *Terpkyi zapakh zhyvytsi* (The Sharp Scent of Resin, 1980), and *Nezryma nyt'* (The Invisible Thread, 1983); and the play *Onovlennia* (Renewal, 1957).

Oliinyk, Oleksander [Olijnyk], b 25 November 1929 in Vyshhorod, Kiev okruha. Hydromechanics and hydraulics scientist, corresponding member of the AN URSS (now ANU) since 1973. He graduated from the Kiev Hydromelioration Institute (1953) and worked at the ANU Institutes of Hydrology and Hydrotechnology (1956–64), Mathematics (1964–71), and Hydromechanics (since 1972, and director in 1972–81). He specializes in such areas as groundwaters, water tables, the management of water resources, and hydrodynamics.

Oliinyk, Oleksii [Olijnyk, Oleksij], b 14 March 1914 in Ivanivka, Novomoskovske county, Katerynoslav gubernia, d 11 November 1977 in Kiev. Sculptor. After graduating from the Kiev State Art Institute (1947) he taught there for many years. He created the monuments to Shevchenko in Palermo, Ontario (1951), to S. Korolov in Zhytomyr (1970), and to Bolshevik leaders in several cities, all in the socialist realist manner.

Oliinyk, Petro [Olijnyk], b 15 April 1914 in Ternopil, Galicia, d February 1942 in Kiev. Journalist and community and political activist. He graduated from the Greek Catholic Theological Academy in Lviv in 1939 and studied philosophy at Berlin University in 1940–1. A member of OUN expeditionary groups and a coeditor of *Ukrains'ke slovo* in Kiev in 1941, he was shot by the Germans at Babyn Yar for his independentist activities. He wrote a number of publicistic works, including *Lystopadovyi zryv* (The November Uprising, 1941), *Den' 22 sichnia 1919 roku* (The Day of 22 January 1919, 1941), and *Za spravzhnie oblychchia stolytsi* (For the True Face of a Capital, 1941), and some historical studies, including *Iak pol'shchyl' Posiannia* (How the Sian Region Was Polonized, 1941) and *Lykholittia Kholmshchyny i Pidliashshia* (Years of Woe in the Kholm and Podlachia Regions, 1941).

Oliinyk, Roman. See Rakhmanny, Roman.

Oliinyk, Stepan [Olijnyk], b 3 April 1908 in Pasytsely, Ananiv county, Kherson gubernia, d 11 January 1982 in Kiev. Poet, humorist, and satirist. He graduated from the

Odessa Pedagogical Institute in 1934 and worked on the editorial boards of the newspapers *Moloda guardiia*, *Chornomors'ka komuna*, and *Stalingradskaia pravda* and the satirical journal *Perets*. His first collection of poetry was published in 1947. He received the Stalin Prize for his *Nashi znaiomi* (Our Acquaintances, 1948). Subsequently Oliinyk published many collections of humoristic verse, including *Oznaky vesny* (Signs of Spring, 1950), *Za prykladom starshoho brata* (By the Example of the Older Brother, 1954), *Hotov pochaty vse spochatku* (Ready to Begin All Over Again, 1974), *De Ivan?* (Where's Ivan?, 1982), and a compilation, *Tvory* (Works, 4 vols, 1978). He also published a collection of biographical stories, *Z knyhy zhyttia* (From the Book of Life, 1964). He wrote in accordance with the official line and frequently inveighed against 'bourgeois nationalism'; the Soviet literary establishment therefore created for his books a degree of 'popularity' not commensurate with their quality.

Oliinyk, Yurii [Olijnyk, Jurij], b 1 December 1931 in Ternopil, Galicia. Composer, pianist, and pedagogue. A post-war émigré, he graduated from the Cleveland Institute of Music (1956) and Case Western Reserve University (MA, 1959). He has taught piano, theory, and composition privately and at the Cleveland Music School Settlement (1956–9), the Sacramento Extension of the San Francisco Conservatory of Music (1960–7), and California State University in Sacramento (1985–7). His compositions include *Five Etudes for Piano* (1969), *Sonata for Piano* (1977), *Concerto for Bandura and Orchestra* (1987), *Sonata for Bandura* (1988), and *Concerto for Piano and Orchestra* (1988). He has given numerous piano recitals in the United States with a repertoire that includes his own works as well as those of V. Barvinsky, M. Kolessa, V. Kosenko, S. Liudkevych, L. Revtvsky, and R. Savvitsky.

Olimpii [Olimpij] (Alimpii), b ?, d 17 August 1114 in Kiev. Icon painter. From 1084 he worked under Constantinople masters on the mosaics of the Dormition Cathedral at the Kievan Cave Monastery and learned to paint from them. He is credited with painting the famous icon *Great Panagia* now in the Tretiakov Gallery in Moscow. Some scholars (O. Antonova and H. Lohvyn) attribute the mosaics of Kiev's St Michael's Golden-Domed Monastery to him. Olimpij's works mark the beginning of a distinctive Ukrainian tradition in icon painting. The Kievan Cave Patericon gives an account of his life and miracles.

Olive (*Olea*; Ukrainian: *olyva*, *maslyna*). A genus of *oil plants (family Oleaceae) of almost 60 species. Only one is commercially important, the cultured olive *O. europaea*. It is a subtropical evergreen tree, found in Ukraine only in the southern Crimea. It grows to up to 4–12 m and can live for hundreds of years (a 500-year-old olive tree grows in the Nikita Botanical Garden). Each tree yields 20–40 kg of olives, usually every other year. Olives are used fresh, pickled, or canned, and to produce oil (ripe olives contain 25–90 percent oil). The first extracted oil from a cold pressing is called virgin or provence oil; it is used in cooking, canning, and medicinal production. After cold pressing the residue is heated and then pressed again to yield technical oil. The residual olive cake is fed to livestock. (See *Vegetable-oil industry.)

Olizarenko, Nadiia (née Mushta), b 1953 in Briansk, Russia. Runner. While living in Zaporizhia she developed into a record-setting runner. At the 1980 Olympics she set a world and Olympic record in the women's 800-m race and took third place in the 1,500-m race.

Olizarowski, Tomasz August, b 1811 in Voislavychi, now Volynske, Sokal raion, Lviv oblast, d 3 May 1879 in Ivry-sur-Seine, France. Polish Romantic poet of the *Ukrainian school in Polish literature. He grew up in Volhynia and studied at the Kremianets Lyceum. After participating in the Polish Insurrection of 1830–1 he lived in Galicia. He was exiled for his political activity by the Austrian regime, and lived in London (1836–45), Paris (1845–8, 1858–79), Dresden (1848), Poznań (1848–50), and Belgium. His works on Ukrainian themes include the narrative poems 'Sonia' (1839), 'Zawerucha' ([The Cossack] Zaverukha, 1836) and 'Topir-góra' (Topir Mountain, 1852). His longing and love for Volhynia is expressed in many of his lyric poems. Certain of his other poems are reworkings of Ukrainian folk ballads. 'Kievan Rus' is also depicted in his poetic dramas 'Rognieda' (Rohnida, 1872) and 'Pomsta Rogniedy' (Rohnida's Revenge, 1874).

Olkhivka River [Ol'xivka] (aka Vilhivka). A right-bank tributary of the Luhanka River, which it joins at Luhanske. It is 83 km long and drains a basin area of 814 sq km. The river begins in the Donetsk Ridge and flows through the southern part of Luhanske oblast. A sluice has been constructed on the river, which is used for irrigation and water supply.

Olkhivsky, Borys [Ol'xivs'kyj], b 1908, d 1944. Journalist and writer from Polisia. From 1931 he lived in Warsaw. He coedited and contributed to several literary and cultural journals, including *Nazustrich*; *My*, which he edited in 1939; and *Nashi dni*. He also edited a page for young people in the Paris journal *Tryzub*. Olkhivsky wrote the book *Vol'nyi narid* (A Free People, 1937) and articles and essays about Polisia and the Kholm region.

Olkhovsky, Andrii [Ol'xovs'kyj, Andrij], b 28 August 1899 in Huty, Bohodukhiv county, Kharkiv gubernia, d 15 February 1969 in Washington, DC. Musicologist, composer, and pedagogue. He studied at the Kharkiv and Leningrad conservatories (graduating with a composer's diploma), then taught history and theory of music at the Kharkiv Conservatory (1929–34) and at the Kiev Conservatory (1934–41), where he headed the history and theory department. He fled from the USSR in 1943 and served as a professor at the Ukrainian Free University in Munich from 1947 until his departure for the United States in 1949. Olkhovsky's first major monograph, *Narys istorii ukrain-s'koi muzyky* (An Outline of the History of Ukrainian Music), was destroyed during a German bombing raid in 1941. He later wrote *Music under the Soviets: The Agony of an Art* (1955), which includes material on Ukrainian music. He also wrote a variety of articles on musical topics. His compositions include the oratorio *Garden of Gethsemane* (in English, after a poem by D. Prudhomme) for mixed chorus, orchestra, soloists, and narrator (1956), four symphonies, two symphonettes, and music to the dramatic poem *Orgy* by Lesia Ukrainka, as well as a cycle of songs for solo voice to texts by her.

Olkhovy, Ilarii [Ol'xovyj, Ilarij], b 1896, d 20 November 1953 in New York. Co-operative organizer in Galicia. He was a specialist on credit co-operation and was in charge of the audit department for credit co-operatives in the Audit Union of Ukrainian Co-operatives. Later he was director of *Tsentrobank (1937–44) in Lviv. After emigrating to the United States he worked at the head office of the Ukrainian National Association.

Olshanivsky, Ihor [Ol'shanivs'kyj] (Olshaniwsky), b 4 February 1930 in Halych, Stanyslaviv county, Galicia, d 8 May 1986 in Livingston, New Jersey. Human-rights activist and community organizer. After emigrating to the United States in 1950, he served with the US armed forces in Korea and then studied civil engineering at New York University. In the 1970s he became an active defender of Ukrainian political prisoners: he chaired the Committee for the Defense of Valentyn Moroz in New Jersey and coordinated the activities of Ukrainian human-rights committees in North America. He was the chief founder (1979) and president of Americans for Human Rights in Ukraine, which has lobbied the US Congress for support of the human-rights movement in Ukraine and for the establishment of the Congressional Commission on the Ukraine Famine.

Olshansky, Mykhailo [Ol'shans'kyj, Myxajlo] (Olszański), b ca 1863 in Lviv, d 25 May 1908 in Chernivtsi, Bukovyna. Actor, singer (tenor), and stage director of Polish origin. He debuted in A. Kattner's troupe in 1879 and worked in O. Bachynsky's Ukrainian-Polish troupe in 1892–4 and in the Ruska Besida Theater in 1889–92, 1894–1900, and 1905–8 (in 1897 as administrative director). Olshansky played character roles and sang heroic ones, notably Vakula in M. Lysenko's *Rizdvianna nich* (Christmas Night) and Gaspar in R. Planquette's *Les Cloches de Corneville*.

Olshavsky, Mykhailo [Ol'shavs'kyj, Myxajlo] (monastic name: Manuil), b ca 1700 in Olshavytsia, Szepes komitat, Transcarpathia, d 5 November 1767. Uniate bishop. He studied philosophy at Levice and completed a D TH in Tarnov, Czechoslovakia, before being ordained in 1725. In 1743 he was named apostolic vicar of Mukachiv and consecrated a bishop. He organized schools in Transcarpathia and founded a theological school in Mukachiv in 1744. In 1756 he oversaw the completion of the church in Máriapócs and the establishment of a Basilian monastery and school there. He also had a new episcopal residence built in Mukachiv. In 1769 he published in Pochaiv *Slovo o sviatom mezhdú vostochnoi i zapadnoi Tserkvi soiedinenii* (A Word on the Holy Union of the Eastern and Western Church), a polemical brochure on the church union. Written in Latin and Slavonic, it was later published in several other languages. He also published a textbook on teaching Latin (1746). Selections of Olshavsky's correspondence were published by A. Hodinka (in *Zapysky Chyna sv. Vasyliia Velykoho*, vol 6, 1935), and documents concerning his activities were published by M. Lacko (in *Extracta ex Orientalia Christiana Periodica*, vol 25). A monograph on him by B. Boysak appeared in English in 1967.

Olshavska, Halyna [Ol'shevs'ka], b 29 November 1898 in Budylivka, Radomyshl county, Kiev gubernia, d 7 No-

vember 1972 in Chernihiv. Stage actress. From 1915 she worked in various Ukrainian touring theaters, and then in the Chernihiv Ukrainian Drama Theater (1930–41 and 1946–72) and the Kharkiv Ukrainian Drama Theater (1944–6).

Olshesky, Martyn [Ol'shevs'kyj], b and d ? Foundry master in the 19th century. He was famous for designing and casting bells in Galicia, notably those in Zhukhiv (1824), Svilcha (1832), Korosno (1834, 1835), and Peredilnytsia (1851). On bells and other castings he used ornamental elements of the contemporary Empire style, as well as elements of Ukrainian folkloric ornamentation.

Olshesky, Volodymyr [Ol'shevs'kyj], b 1880? d 7 July 1933 in Poznań, Poland. Army officer. Having attained the rank of colonel in the Russian army, he joined the UNR Army in 1917 and was one of the organizers of the *Third Iron Rifle Division. During 1919 he commanded an infantry battalion of the division and then became deputy division commander. In 1920 he briefly commanded the Ninth Brigade in the reactivated Iron Division before again assuming the post of deputy division commander. He was promoted to brigadier general in the UNR Army.

Olsztyn (German: Allenstein). A city (1989 pop 161,200) in northern Poland on the Łyna river and a voivodeship center (1989 pop 741,300). There is an active branch of the Ukrainian Social and Cultural Society (since 1990 called Alliance of Ukrainians in Poland) with approx 100 members, and an active group of Ukrainian students. In 1958 local radio began broadcasting a half-hour Ukrainian program directed by S. Demchuk (pseud Maksym Zaporozhets) once or twice a month. The city also serves as the dissemination point for various imported publications in Ukrainian throughout Poland. The surrounding voivodeship has the highest number (estimated at 50,000–60,000) and concentration of Ukrainians in Poland, most of whom went there as a result of forced resettlement during *Operation Wisła in 1947. They live mainly in or around Bartoszyce, Biskupiec, Górowo, Ilawa, Kętrzyn, Lidzbark, and Morąg.

Olviopil. See Pervomaiske.

Olyka. III-6. A town smt (1990 pop 3,700) situated on the Putylyvka River in Kivertsi raion, Volhynia oblast. It was first mentioned in the Hypatian Chronicle under the year 1149. In the 13th and 14th centuries Olyka was part of the Principality of Galicia-Volhynia and the Grand Duchy of Lithuania. At the end of the 15th century the town was acquired by the Radziwiłł family. In 1564 a fortress was built, and the town was granted the rights of *Magdeburg law. During the Cossack-Polish War Olyka was the site of many battles. Its architectural monuments include the fortress, the Lutske gate, which was part of the town wall from 1630, a Roman Catholic church built in 1635, and the Church of the Presentation at the Temple, built in the late 18th century. Today Olyka has a branch of the Kivertsi Canning Factory and a regional museum.

Olympic Games. International sports and athletics competitions held since 1896 every four years (except in 1916, 1940, and 1944) in the summer, and since 1924 also

The Church of the Presentation at the Temple in Olyka (1784)

in the winter. The games are conducted in accordance with the Olympic charter. The charter, however, has been contravened since its inception with regard to the participation of particular countries. Ukraine has not been represented as an individual country at any Olympic Games, although efforts were made to secure Ukraine's membership in the International Olympic Committee and participation in the 1920 games in Antwerp. More recently, this cause has been championed by the *Ukrainian World Committee for Sport Affairs.

Prior to 1917, in 1908 and 1912, teams from the Russian Empire competed in the Olympic Games. In 1920–45 the USSR boycotted the games as 'capitalistic.' The first Soviet Olympic team was fielded for the 1952 games; it included 25 athletes from the Ukrainian SSR. Thirty-four athletes from the Ukrainian SSR were on the Soviet Olympic team in 1956, 35 in 1960, 34 in 1964, 51 in 1968, 71 in 1972, 94 in 1976, 93 in 1980, and 92 in 1988. Athletes from the Ukrainian SSR on Soviet teams first competed in Winter Olympic Games in 1976; from 1976 to 1988 only 11 in all competed in the Winter Games. The USSR boycotted the 1984 Olympic Games in Los Angeles.

In the Olympic Games from 1952 to 1980, Soviet teams won 340 gold medals, 80 of them at the 1980 games in Moscow. Of the 340 medals, 142 were won by athletes from the Ukrainian SSR, 38 of them at the 1980 games. Up to and including the 1988 Olympic Games, athletes from the Ukrainian SSR set 8 world records (WR) and 27 Olympic

records (OR), and many have participated in record-setting or medal-winning team events. The gymnast L. Latynina won 9 gold, 5 silver, and 4 bronze medals, more than any other athlete in Olympic history.

In individual track-and-field sports, Olympic gold medalists from the Ukrainian SSR are V. Kuts (1956, 5,000-m OR, 13:39.6; 10,000-m OR, 28:45.6), V. Holubnychy (1960 and 1968, 20,000-m walk, 1:34:07.2 and 1:33:58.4), V. Krepkina (1960, women's long jump OR, 6.37 m), L. Lysenko (1960, women's 800-m WR/OR, 2:04.3), I. Press (1960, 80-m hurdles, 10.8 [semifinals OR, 10.6]; 1964, pentathlon WR, 5,246 points), T. Press (1960, women's shot put, 17.32 m; 1964, shot put OR, 18.14 m; 1964, discus throw OR, 57.27 m), V. Tsybulenko (1960, men's javelin throw, 84.64 m), V. Brumel (1964, men's high jump OR, 2.18 m), M. Avilov (1972, decathlon WR/OR, 8,454 points), A. Bondarchuk (1972, hammer throw OR, 75.5 m), V. Borzov (1972, men's 100-m, 10.14; 200 m, 20.00), F. Melnyk (1972, women's discus throw OR, 66.62 m), Yu. Sedykh (1976, hammer throw, 77.52 m; 1980, hammer throw WR/OR, 81.80 m), V. Kyselov (1980, men's shot put OR, 21.35 m), N. Olizarenko (1980, women's 800-m WR/OR, 1:53.50), N. Tkachenko (1980, pentathlon WR/OR, 5,083 points), H. Avdiienko (1988, men's high jump OR, 2.38 m), O. Bryzhina (1988, women's 400-m OR, 48.65), S. Bubka (1988, pole vault OR, 5.90 m), and T. Samolenko (1988, 3,000-m OR, 8:26.53).

In individual gymnastics competition, gold medalists are N. Bocharova (1952, balance beam), V. Chukarin (1952, men's all-around, long horse vault, pommel horse; 1956, all-around, parallel bars), M. Horokhovska (1952, women's all-around), L. Latynina (1956, women's all-around, floor exercises, side horse vault; 1960, all-around, floor exercises; 1964, floor exercises), B. Shakhlin (1956, pommel horse; 1960, all-around, long horse vault, parallel bars, pommel horse; 1964, horizontal bar), P. Astakhova (1960 and 1964, uneven bars), M. Nikolaeva (1960, side horse vault), and V. Klymenko (1972, pommel horse).

In freestyle wrestling, gold medalists are O. Ivanytsky (1964, heavyweight), O. Medvid (1964, light heavyweight; 1968, heavyweight; 1972, super-heavyweight), B. Hurevych (1968, middleweight), P. Pinigin (1976, lightweight), A. Beloglazov (1980, flyweight), S. Beloglazov (1980 and 1988, bantamweight), and I. Mate (1980, heavyweight). In Greco-Roman wrestling, gold medalists are B. Hurevych (1952, flyweight), Ya. Punkin (1952, featherweight), I. Bohdan (1960, heavyweight), and O. Kolchynsky (1976 and 1980, super-heavyweight).

In weight lifting, gold medalists are I. Rybak (1956, lightweight OR, 380 kg), Yu. Vlasov (1960, super-heavyweight WR/OR, 537.5 kg), L. Zhabotynsky (1964 and 1968, super-heavyweight OR, 572.5 kg), P. Korol (1976, lightweight [disqualified]), and S. Rakhmanov (1980, super-heavyweight OR, 440 kg).

In swimming, gold medalists are G. Prozumenshchikova (1964, women's 200-m breaststroke OR, 2:46.4), Ye. Vaitsekhovska (1976, women's platform diving), S. Fesenko (1980, men's 200-m butterfly, 1:59.76), and O. Sydorenko (1980, men's 400-m individual medley OR, 4:22.89).

In canoeing, gold medalists are S. Makarenko (1960, Canadian pairs 1,000 m), A. Khymych (1964, Canadian pairs 1,000 m), L. Khvedosiuk (1964 and 1968, women's kayak singles 500 m; 1972, kayak pairs 500 m), V. Morozov (1964, 1972, and 1976, kayak fours 1,000 m; 1968, kayak pairs 1000 m), O. Shaparenko (1968, kayak pairs 1,000 m; 1972,

kayak singles 1,000 m), K. Kuryshko (1972, women's kayak pairs 500 m), Yu. Riabchynska (1972, women's kayak singles 500 m), Yu. Stetsenko (1972, kayak fours 1,000 m), Yu. Filatov (1972 and 1976, kayak fours 1,000 m), S. Nahorny (1976, kayak pairs 1,000 m), S. Petrenko (1976, Canadian pairs 500 m and 1,000 m), S. Chukhrai (1976, kayak fours 1,000 m; 1980, kayak pairs 500 m and 1,000 m), and S. Postriekhin (1980, Canadian singles 500 m). In yachting, gold medalists are V. Mankin (1968, Finn; 1972, Tempest; 1980, Star), V. Dyrdyra (1972, Tempest), and A. Muzychenko (1980, Star).

Athletes from the Ukrainian SSR on Soviet teams have also won Olympic gold medals in men's shooting – V. Borysov (1956, free rifle OR, 1,138 points [prone WR, 396 points]), V. Romanenko (1956, running-deer shooting OR, 441 points), Ya. Zheliezniak (1972, moving-target WR, 569 points), and D. Monakov (1988, trapshooting); in fencing – H. Kryss (1964, épée), V. Sydiak (1972, saber), and V. Smirnov (1980, foil); in cycling – V. Semenets and I. Tselovalnikov (1972, 2,000-m tandem), and O. Kyrychenko (1988, 1,000-m time trial, 1:04.499); and in judo – S. Novikov (1976, heavyweight). The Kiev men's volleyball team won the gold medal in 1968. The Kiev Spartak women's handball team won gold medals at the 1976 and 1980 Olympics.

After Ukraine regained its independence in 1991, Ukraine's athletes participated in the 1992 Winter and Summer Games as members of the 'Unified Team' of the former Soviet republics. At the Winter Games V. Petrenko won the gold medal in men's figure skating. At the Summer Games, for the first time in Olympic history, the Ukrainian contingent of the Unified Team marched under the blue-and-yellow Ukrainian national flag and the Ukrainian national anthem was played at the official presentations of gold medals to Ukrainian champions. Ukrainians won 40 medals at the Summer Games – 17 gold, 14 silver, and 9 bronze. Individual gold medalists were T. Gutsu (Hutsu, women's all-around gymnastics), T. Lysenko (women's balance beam), O. Tymoshenko (women's floor exercises), and O. Kucherenko (Greco-Roman wrestling).

O. Zinkevych

Olynyk, Roman. See Rakhmanny, Roman.

Olyzar (Polish: Olizar). A Ukrainian noble family in the Kiev region and Volhynia. The progenitor was Olyzar Volchkevych, the starosta of Chornobyl (1533–45) and one of the organizers of the 1569 Union of *Lublin. The family became Polonized in the late 16th century. Adam Olizar (ca 1572 to 1624), a Polish cavalry commander who converted from Orthodoxy to Roman Catholicism, owned large landholdings (7 towns and 33 villages) around Korostyshiv, near Zhytomyr. He and his son, Ludwik (d 1645), developed iron-ore mining there. Ludwik's son, Jan (d ca 1700), was elected marshal of Kiev voivodeship in

1665. Jan's son, Adam (ca 1657 to 1713), was a petty nobleman in Ovruch in Volhynia. One of Jan's descendants, Filip (ca 1750 to 1816), the son of the Kiev functionary Onufry (ca 1722 to 3 April 1753), was the Polish royal chamberlain from 1774 and cupbearer of Lithuania (1780–94). He increased the family's landholdings and built the first iron smelter in the Kiev region, in the early 1780s near Horodske, Zhytomyr county. Under Russian rule he became president of the chief court of Podilia gubernia and, in 1807, a member of the Educational Commission of Volhynia, Podilia, and Kiev gubernias. Filip's son Gustaw (1798–1868) served as marshal of the nobility in Kiev gubernia (1821–6), and was a Polish poet, translator, and publicist. He was imprisoned for participating in the Decembrist movement. Gustaw helped German colonists to establish a woolens factory in Korostyshiv. His memoirs were published under the pseudonym A. Filipowicz in Lviv in 1892. Gustaw's brother, Narcyz (1794–1862), was also a Polish poet, memoirist, and émigré publicist and was a Volhynian leader of the Polish Insurrection of 1830–1. In 1832 he fled abroad. A few other members of the Olizar family were marshals, starostas, and Sejm delegates.

Oleh Olzhych

Olzhych, Oleh [Ol'žyč] (pseud of Oleh Kandyba; other pseud: O. Leleka, M. Zapotochny, D. Kardash, K. Kostiantyn), b 8 July 1907 in Zhytomyr, Volhynia, d 9 June 1944 in the Sachsenhausen concentration camp. Archeologist, poet, and nationalist leader; son of O. *Oles. Olzhych emigrated from Ukraine in 1923 and lived in Prague, where he graduated with a degree in archeology from Charles University in 1929. Besides his doctoral dissertation on Neolithic painted ceramics in Galicia and numerous articles, his main scholarly work in archeology was *Schipenitz – Kunst und Geräte neolithischen Dorfes* (1937). After a brief lecture tour at Harvard University Olzhych helped found the short-lived Ukrainian Research Institute in America (St Paul, Minnesota) and edited its first collection of papers (1939). In 1929 Olzhych joined the OUN and headed its cultural and educational branch. After the split in the OUN in 1940, he sided with the *Melnykites. As second-in-command to A. Melnyk he represented the OUN leadership in Carpatho-Ukraine (1938–9) and took part in forming the *Ukrainian National Council in Kiev in 1941. Until his arrest and execution by the Gestapo in 1944, he directed Melnykite underground activities in Ukraine.

Often relying on historical themes to illustrate the inalienable right of Ukraine to independent statehood, Olzhych's verse typifies the nationalist poetry between the two world wars. Sparse, strict, and forceful, it is consciously devoid of sentimentality or lyrical weakness and exhorts to action and fulfillment of duty. Only two collections appeared during his lifetime, *Rin'* (Gravel, 1935) and *Vezhi* (Towers, 1940). *Pidzamche* (Near the Castle) appeared posthumously, in 1946, and was followed by *Poezii* (Poems, 1956) and *Velychnist'* (Majesty, 1969). The latter book includes the collections as well as extant poems published in various newspapers. In 1991 M. Nevrlý edited and published in Prešov a complete edition of Olzhych's works with a biobibliography.

D.H. Struk

Omelchenko, Fedir [Omel'chenko], b 21 February 1865 in Krolevets, Chernihiv gubernia, d 4 February 1924 in Kiev. Pathomorphologist and microbiologist; full member of the VUAN from 1921. A graduate in medicine from Kiev University (1890), he was an army doctor and taught pathological anatomy and bacteriology in Kiev, Warsaw, and St Petersburg. He donated his laboratory to the Ukrainian Scientific Society and helped establish the ANU Institute of Biology, where he served as director in 1921–2. He was also a professor and rector of the Kiev Veterinary Zootechnical Institute (from 1922). Omelchenko researched spermatogenesis, cytology, and the anthropological characteristics of Ukrainians.

Omelchenko, Mariia [Omel'chenko, Marija], b 1874, d 1946. Educator and civic leader. While working in the Kuban during the revolutionary period of 1917–19, she was active politically and was a member of the Kuban Territorial Council. In 1920 she settled in Prague, where she served as president of the Ukrainian Women's Union in Czechoslovakia (1926–7) and maintained contacts with southern Slavic women's organizations. In 1933 she was a coeditor of the journal *La femme slave*. She wrote books about her 1934 visit to Yugoslavia (1935) and T. Masaryk (1929) as well as a number of pamphlets.

Omelchenko, Petro [Omel'chenko], b 3 October 1894 in Khorol, Poltava gubernia, d 21 February 1952 in Villejuif, France. Artist; husband of S. *Zarytska. From 1920 an émigré in Poland and then Czechoslovakia, he studied painting at the Prague Academy of Arts (1923–8) and graphic art at the Ukrainian Studio of Plastic Arts in Prague. From 1928 he worked in Paris in various forms of printmaking and engraving on glass. His work was exhibited at the Salon des Artistes Indépendants, at a show of the Association of Independent Ukrainian Artists in Lviv (1932), and at a show of Ukrainian prints in Berlin (1933). While working as a laborer in France during the Second World War, he drew scenes of daily life. His graphic works are distinguished by precision and clear lines and often include Ukrainian themes. His monograph on paints, materials, and techniques was published in Kiev in 1930.

Omelchenko, Tymish [Omel'chenko, Tymiš], b 21 February 1893 in Verbky, Khorol county, Poltava gubernia, d 6 September 1955 in Toronto. Military and civic leader, journalist. In 1914 he was sent to the front from the Kiev military school and was captured by the Germans. He

Petro Omelchenko: *Woman* (color silk screen)

Tymish Omelchenko

helped organize the *Bluecoats in 1918 and served in various posts in the UNR Army, in which he eventually attained the rank of lieutenant colonel. After the war he emigrated to Germany, where for many years he headed the *Ukrainian National Alliance (1937–45) and published its *Ukrains'kyi visnyk*. In 1950 he resettled in Canada.

Omelchuk, Oleksii [Omel'čuk, Oleksij], b 25 March 1911 in Ustyluh, Volodymyr-Volynskyi county, Volhynia gubernia, d 22 January 1981 in Kiev. Stage actor. In 1935 he completed study at the Kiev Institute of Theater Arts. Then he worked in the Kiev Young Spectator's Theater (1936–41) and the Kiev Ukrainian Drama Theater (1946–81). Among his roles were Ivan Nepokryty in M. Kropyvnytsky's *Dai sertsiu voliu ...* (Give the Heart Freedom ...), Petr in M. Gorky's *Meshchane* (The Bourgeoisie), and Lenin in various Soviet plays.

Omelianovsky, Mykhailo [Omeljanovs'kyj, Myxajlo], b 19 January 1904 in Kiev, d 1 December 1979 in Moscow. Philosopher; full member of the AN URSR (now ANU) from 1948 and corresponding member of the USSR Academy of Sciences (now the Russian Academy of Sciences) from 1968. A Party activist and graduate of the Institute of Red Professorship in Moscow (1931), he headed the Department of Dialectical Materialism at the Voronezh Chemical-Technological Institute of the Food Industry (1931–44) and spent two years as a senior researcher at the USSR academy's Institute of Philosophy in Moscow before he was sent to Kiev to help set up the ANU Institute of Philosophy and serve as its first director (1946–52). He also headed the ANU Section of Social Sciences (1950–1) and chaired the institute's Department of Philosophical Problems of Science (1952–5). In 1955 he returned to Moscow to serve as deputy director of the Institute of Philosophy there (1955–65) and then headed its Department of Philosophical Problems of Science (1955–79). Omelianovsky published over 250 works in the philosophy of science; over 50 have been translated into various languages. His chief contributions are monographs in Russian on the philosophical questions of quantum mechanics (1956) and *Dialectics in Modern Physics* (1973; English trans 1979). A posthumous collection of his works was published in 1984 and a biobibliography in 1985.

Gen Ivan Omelianovych-Pavlenko

Gen Mykhailo Omelianovych-Pavlenko

Omelianovych-Pavlenko, Ivan [Omeljanovyč-Pavlenko], b 31 August 1881 in Baku, Transcaucasian krai, d 8 September 1962 in Chicago. Senior UNR Army field commander; brother of Mykhailo. From 1901 he was a regular officer in the Russian army. In 1917 he commanded the Russian Eighth Hussar Regiment, which he Ukrainianized as the Lubni 22nd Cavalry (Hetman Sahaidachny) Regiment. During 1918 he was commander of the Kharkiv Cossack Battalion and then of the Navariia Group of the Ukrainian Galician Army on the Polish front (December 1918–February 1919). After returning to the UNR Army he became chief cavalry staff officer, and in the spring of 1920 he took command of the *Separate Cavalry Division. In October 1920 he was promoted to brigadier general. In the interwar period he lived in Poland and Czechoslovakia. After the war he emigrated to the United States.

Omelianovych-Pavlenko, Mykhailo [Omeljanovyč-Pavlenko, Myxajlo], b 8 December 1878 in Tbilisi, d 29 May 1952 in Paris. Supreme commander of the *Ukrainian Galician Army (UHA) and the *Army of the UNR; brother of Ivan. Having commanded a company in the Russo-Japanese War and graduated from general staff school (1910), he served during the First World War as a regiment commander, corps chief of staff, and director of an officer candidate school in Odessa. From 1917 he commanded a Ukrainian brigade in Katerynoslav, the Third Rifle Division in Poltava (1918), the Zaporozhian Kish, and the UHA (10 December 1918 to 7 June 1919). After returning to the UNR Army he took command of the Zaporozhian Corps and then of the entire army (December 1919–November 1920) during and after the *Winter campaign. During the interwar years he lived in Prague, where he headed the Alliance of Ukrainian Veterans' Organizations. After the Second World War he served as defense minister in the UNR government-in-exile (1945–8), which promoted him from major general to lieutenant general, and continued to be active in veterans' affairs in West Germany and France. He is the author of *Ukrains'ko-pol's'ka viina 1918–1919 rr.* (The Ukrainian-Polish War of 1918–19, 1929), *Zymovyi pokhid* (The Winter Campaign, 1934), and two books of memoirs (1930, 1935).

Gen Mykola Omeliusik

Omeliusik, Mykola [Omeljusik], b 1889 in Polisia, d 6 August 1970 in Philadelphia. Senior army officer. An officer of the Russian army during the First World War, he joined the UNR Army in 1918 and commanded an artillery brigade. In 1919, as a lieutenant colonel, he served at the headquarters of the Volhynian Group. During the Second World War he was chief of operations in the UPA-North (1943–4). His memoirs of 1943 were published in *Litopys UPA*, vol 1. The government-in-exile promoted him to brigadier general.

Omsk. An oblast center (1989 pop 1,148,000) of the RF situated at the junction of the Irtysh and Om rivers in southwestern Siberia. Founded in 1716 as a fortress, it had developed into a city by 1782 and the capital of a general gubernia by 1939. With the construction of the Trans-Siberian Railway in the 1890s, it became an important trade center, and its population grew from 37,500 in 1897 to 161,700 in 1926, 288,900 in 1939, 581,100 in 1959, and 1,044,000 in 1981. The main industries are machine building, petrochemical and textile manufacturing, and food

processing. A Ukrainian colony has existed in Omsk for many generations. According to the 1926 census, there were 6,700 Ukrainians (3.7 percent of the residents) in the city, and according to the 1959 census, 31,000 (5.5 percent). The actual figures likely were higher.

OMUS. See Ukrainian Theater-Artists' Association.

Nina Onatska

Mykola Onatsky

Onatska, Nina [Onac'ka], b 1895 in Kiev gubernia, d 16 July 1983 in Buenos Aires. Civic and women's activist; wife of Ye. *Onatsky. She emigrated with her husband to Rome (1919) and Buenos Aires (1947). She belonged to the Ukrainian Women of the Vidrozhennia society and to the Chief Council of the Ukrainian Central Representation in Argentina (from 1948), and served as president of the Ukrainian Women's Association in Argentina and vice-president of the South American branch of the World Federation of Ukrainian Women's Organizations (1951–9). She chaired the Interorganizational Women's Committee (from 1961).

Onatsky, Mykola [Onac'kyj], b 1878, d ? Civic activist. A peasant deputy from the Poltava region to the First Russian State Duma, he emerged as a leading figure in the *Ukrainian caucus. He was a striking and charismatic figure and was instrumental in generating support for the caucus. He was also noted for addressing the Duma in Ukrainian.

Onatsky, Nykanor [Onac'kyj], b 9 January 1875 in Khomenkove, Hadiache county, Poltava gubernia, d 1 July 1940. Painter and poet. After studying at the Odessa Art School (1900–5) and under I. Repin at the Higher Art School of the St Petersburg Academy of Arts (1905) he taught painting in gymnasiums in Lebedyn (1906–13) and Sumy. He founded and directed the *Sumy Art Museum (1920–33) and ran the Poltava Regional Museum (1933–7). In 1929 he joined the Association of Artists of Red Ukraine. His colorful realist paintings consist mostly of landscapes (eg, *Moonlit Night* [1908], *Sunflowers* [1916], and *Haystacks* [1933]) and still lifes (eg, *Lilacs* [1935]). His poetry was published in the paper *Ridnyi kraj* and in miscellanies, such as *Ternovyi vinok* (Wreath of Thorns, 1908), *Z nevoli* (From Prison, 1908), and *Ukrains'ka muza* (Ukrainian Muse, 1908). He also wrote several plays and bro-

Nykanor Onatsky (self-portrait, 1909)

Yevhen Onatsky

chures on Mezhyhiria faience and Ukrainian art glass and porcelain. Onatsky was arrested by the NKVD in 1934 and again in 1935 and 1937. He perished in a prison camp.

Onatsky, Yevhen [Onac'kyj, Jevhen], b 13 January 1894 in Hlukhiv, Chernihiv gubernia, d 27 October 1979 in Buenos Aires. Civic leader, journalist, and scholar; full member of the Shevchenko Scientific Society from 1947 and of the Ukrainian Academy of Arts and Sciences from 1949. While studying at Kiev University (1912–17), he was active in clandestine student societies. After joining the Ukrainian Party of Socialist Revolutionaries in 1917, he was elected to the Central Rada and its presidium and took part in negotiations with the Don and Kuban Cossacks. Having resigned from the party and the Rada in March 1918, he worked in the library of the Kiev Municipal Museum of Antiquities and Art. In January 1919 he was sent as a journalist to the Paris Peace Conference, after which he ended up in Rome, where he directed the press bureau of the UNR diplomatic mission and edited its *La voce del Ucraina*. Eventually he became head of the mission and Italian representative of the Organization of Ukrainian Nationalists (1929–43). In the interwar period he worked as a correspondent for various Ukrainian papers, such as *Dilo*, *Svoboda*, *Novyi shliakh*, *Novyi klych*, and *Ukrains'ke slovo*, and lectured at the Higher Oriental Institute in Naples (1936–40) and Rome University (1940–3). He then spent a year in a German prison (1943–4). After settling in Buenos Aires in 1947, he helped to organize the Association of Ukrainian Scholars, Writers, and Artists and the Central Ukrainian Representation in Argentina, which he served as president (1953–60) and chairman of the Supreme Council (1960–3). He edited (1947–64) the Vidrozhennia society's weekly *Nash klych* as well as its almanacs and the monthly *Dzvin*.

Onatsky's publications include *Grammatica ucraina: teoretico-practica* (1937), *Studi di storia e di cultura Ucraina* (1939), a Ukrainian-Italian dictionary (1941; repr 1977) and an Italian-Ukrainian dictionary (1977), *Osnovy suspil'noho ladu* (The Foundations of Social Order, 1941; repr 1949), a collection of essays, *Zavziattia chy spokusa samovypravdannya* (Determination or the Temptation of Self-Justification, 1956), *Po pokhylii ploshchi: Zapysky ukrains'ko-ho zhurnalista i dyplomata* (On a Sloping Plane: Notes of a Ukrainian Journalist and Diplomat, 2 vols, 1964, 1969),

and *U vichnomu misti: Zapysky ukrains'koho zhurnalista* (In the Eternal City: Notes of a Ukrainian Journalist, 3 vols, 1954, 1981, 1985). He also prepared the four-volume *Ukrains'ka mala entsyklopediia* (The Little Ukrainian Encyclopedia, 1957, 1959, 1962–3). His life and work are summarized in L. Wynar's *Ievhen Onats'kyi – Chesnist' z natsiieiu* (Yevhen Onatsky: Honesty toward the Nation, 1981).

Onchul, Petro [Ončul], b 30 December 1936 in Korytnie, near Vyzhnytsia, Bukovyna. Opera singer (baritone). After graduating from the Lviv Conservatory in 1966, he joined the Donetske Opera and Ballet Theater as a soloist. His main roles include the Sultan in S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, Mykyta in Yu. Meitus's *Yaroslav the Wise*, Rigoletto in G. Verdi's *Rigoletto*, and Scarpia in G. Puccini's *Tosca*.

Oncology. A branch of medicine, dedicated to the study and treatment of neoplastic diseases. Malignant tumors with unlimited growth potential are called cancers (Ukrainian: *zloiakisni novoutvorennia, rak, pistriak*). Neoplasms are second only to cardiovascular diseases as the cause of death in most industrialized countries. Experimental oncology studies the etiology and characteristics of tumor growth and evaluates the methods of therapy. In the late 19th century important experimental contributions to the study of tumors were made by the Ukrainian scientists V. *Vysokovych, V. *Pidvysotsky, and M. *Rudniev.

Medical advances in the study of chemical substances, ionizing radiation, viruses, and hormonal imbalances during the second half of the 20th century have paved the way for a better understanding of the etiology of the neoplastic process. Other scientists that have advanced the development of experimental oncology include O. *Repriev, O. *Krontovsky, O. *Bohomolets, Ye. *Tatarynov, Z. Uspenska, and J. Neiman. The founder of the Ukrainian school of oncologists-pathologists was R. *Kavetsky. A number of Ukrainian surgeons, among them I. *Ishchenko, O. *Arutiunov, I. *Shevchenko, M. *Amosov, O. *Shalimov, and A. Romodanov, improved and perfected surgical procedures used in treating malignant tumors of the brain and internal organs. Oncological research in Ukraine has resulted in a line of preparations for the treatment of malignant tumors, new methods of immunotherapy, the autovaccination of patients to prevent relapse or metastases, and chemotherapy and radiotherapy methods using x-rays, cobalt guns, betatrons, and linear accelerators.

Second only to diseases of the circulatory system, neoplasms are the major cause of death for men in the former USSR (along with accidents, poisoning, and traumas). The rate is 50 percent higher than the composite rate of the United States, Germany, France, Great Britain, and Japan. Along with diseases of the circulatory system, neoplasms are the major cause of death for women in what was the USSR, a rate roughly in line with that of other countries (though in other countries it is by far the major cause of death for women). Whereas mortality rates in the former USSR are declining, the number of deaths due to neoplasms is steadily increasing. In Ukraine mortality in men due to neoplasms (per 100,000 age-standardized pop) was 223 in 1980, 268 in 1987, and 276 in 1988. Mortality in women due to neoplasms was 117 in 1980, 128 in 1987, and 131 in 1988.

The combined rate was 194 in 1989 and 197 in 1990. The proportion of patients suffering from cancer in Ukraine from 1980 has been 20–30 percent higher than the USSR average, and it is increasing every year.

The centers of oncological research in Ukraine are the AN URSS (now ANU) Institute for Problems of Oncology (est 1971 by Kavetsky on the basis of the Kiev Institute of Experimental and Clinical Oncology) and the Ministry of Health's Roentgenological and Oncological Scientific Research Institute (est 1920), both in Kiev. The latter institute published the journal *Voprosy onkologii* in Kharkiv in 1928–37. The ANU Council on Malignant Neoplasms coordinates oncological research and publishes the journal *Eksperimental'naia onkologiia* (since 1979). Since the nuclear explosion at the Chornobyl Atomic Energy Station much emphasis has been placed on greater attention to preserving the ecological balance in nature as well as eliminating carcinogenic substances in industry and food production.

Ondava River. A right-bank tributary of the Bodrog River in the Danube Basin. It is 112 km long and drains a basin area of 3,400 sq km. The river originates in the Low Beskyd area and flows south through the Prešov region of Czechoslovakia for almost its entire course.

Onion (*Allium*; Ukrainian: *tsybulia*). Biennial or perennial bulbous plants of the family Liliaceae. More than 400 species are known in the Northern Hemisphere, of which 40 are found in Ukraine. Onion has strong bactericidal and antiscurvy properties and is reported to protect against stomach cancer. The following species are cultivated on a wide scale in Ukraine: the common or garden onion (*A. fistulosum*; Ukrainian: *tsybulia*), chive (*A. schoenoprasum*; Ukrainian: *tsybulia siianka* or *tsybulynka*), leek (*A. porrum*; Ukrainian: *tsybulia-porei*), and *garlic (*A. sativum*; Ukrainian: *chasnyk*). The garden onion is the most common species; it is eaten raw, cooked, fried, or dried, and it represents a staple ingredient in Ukrainian traditional *foods. Onions have high nutritional value; they contain 2.4 to 14 percent sugar, 1.7 to 2.5 percent nitrogen, and 0.65 percent minerals as well as pungency-imparting essential oils. The leaves contain vitamin C, vitamin B₁, vitamin B₂, and carotene. Onions also contain a number of volatile compounds. Several Ukrainian varieties have been developed and popularized.

Oniongrass (*Melica*; Ukrainian: *perliivka*). A perennial grass of the family Gramineae that grows in forests and thickets and on mountain slopes in the temperate zones of both hemispheres. Eight species are found in Ukraine, of which the two most common are mountain or nodding oniongrass (*M. nutans*) and *M. picta*. *M. taurica* is found in the Crimean Mountains. *M. transsilvanica* is used as fodder.

Onomastics. The study of names. In Ukraine, the study of place-names (*toponymy) continues to be the most developed branch of onomastics. In the less developed branch dealing with Ukrainian personal and family

names (anthroponymy), the earliest contributions were articles by A. Stepovych (1882), M. Sumtsov (1885), and V. Yastrebov (1893) in Russian-ruled Ukraine; by V. Okhrymovych (1895), I. Franko (1906), I. Krypiakevych (1907), and M. Zubrytsky (1907) in Galicia; and by the Polish historian J. Rolle (1889–92). A 16-page dictionary of Ukrainian baptismal names was appended to B. Hrinchenko's Ukrainian-Russian dictionary (vol 4, 1909). In the interwar period only a few articles in anthroponymy appeared, notably by M. Kornilyovych (1926, 1930) in Kiev, V. Simovych (1929, 1930) in Prague, and I. Ohienko (1935) in Warsaw. In 1937 J. Rudnyckyj began publishing a bibliography of Ukrainian onomastics in *Zeitschrift für Namenforschung* (Berlin).

Postwar onomastic studies have been written by Ukrainian scholars in the West, such as J.B. Rudnyckyj (in *Onoma*, Louvain 1952–), E. Borschak, M. Borovsky, V. Hrabets, I. Gerus-Tarnawecky, J. Hursky, A. Bojcun, W. Zyla, Ya. Slavutych, J. Pauls, S. Holutiak-Hallick, J. Rozumnyj, and B. Struminsky. Many of them were published in the series *Onomastica* (50 issues, Winnipeg, 1951–75), begun and edited by J.B. Rudnyckyj. The series included Rudnyckyj's studies of the names 'Ukraine,' 'Galicia,' 'Volhynia,' and 'Slav,' I. Gerus-Tarnawecky's study of anthroponymy in the 1484 *Pomianyk* of Horodyshche, and F. Bohdan's dictionary of Ukrainian surnames in Canada (1974). V. Simovych's articles were reprinted in one volume in Ottawa in 1981. In Australia dictionaries appeared of Ukrainian Christian (R. Gauk, 1961) and family (S. Radion, 1981) names. Non-Ukrainian Western scholars who have done work in Ukrainian anthroponymy include B. Unbegaun, A. de Vincenz (*Traité d'anthroponymie houtzoule*, 1970), R. Weischedel (*Eine Untersuchung ukrainischer Personennamen des XVIII. Jahrhunderts: Kiever Regiment*, 1974), and S. Lubert (*Die Herkunft von Zaporoger Kosaken des 17. Jahrhunderts nach Personennamen* (1983). In postwar Poland, articles on Ukrainian anthroponymy have been written by S. Hrabec, W. Witkowski, E. Wolnicz-Pawłowska, and M. Łesiów (Lesiv); books on the names of rural people in the 15th-century Sianik and Peremyshl land, by J. Rieger (1977); and books on 18th-century Ukrainian names in Rus' voivodeship, by E. Wolnicz-Pawłowska (1978). At the International Committee of Onomastic Sciences in Louvain, Ukraine was represented in 1952–72 by J.B. Rudnyckyj and later by Yu. Karpenko and I. Tsiluiko.

Onomastics in Soviet Ukraine grew significantly under the influence of the work done by Ukrainian scholars abroad. This growth led to the establishment of the Ukrainian Onomastic Commission in 1959. Since that time many works in Ukrainian toponymy have appeared; and articles in Ukrainian anthroponymy by L. Humetska, I. Varchenko, Yu. Redko, I. Sukhomlyn, V. Vashchenko, O. Tkachenko, R. Kersta, M. Khudash, V. Nimchuk, A. Zalesky, O. Kupchynsky, O. Nedilko, N. Stets, V. Horpynych, I. Kovalyk, Z. Nikolaienko, P. Chuchka, S. Bevzenko, K. Lukianiuk, Yu. Karpenko, I. Zheliezniak, L. Krakaliia, L. Masenko, Yu. Tsybaliuk, O. Palamarchuk, Y. Dzendzelivsky, H. Pivtorak, V. Rusanivsky, and R. Ostash have appeared in linguistic, historical, ethnographic, and archeological journals, several collections of onomastic studies, and *Povidomlennia Ukraïns'koï onomastychnoi komisii* (15 issues, 1966–76). V. Petrov, B. Kobylansky, V. Pokalchuk, A. Hensiorsky, O. Seniuk, O. Stryzhak, M. Khudash, and A. Nepokupny have written on ethnonyms in Ukraine. Published separately (in addi-

tion to works in toponymy) have been a Ukrainian-Russian dictionary of personal names by S. Levchenko, L. Skrypnyk, and N. Dziatkivska (1954; rev edns 1961, 1967, 1972, 1976); L. Humetska's chapter on personal names in her book on the word-formation system of the language of 14th- and 15th-century Ukrainian charters (1958); V. Vynnyk's book on the Ukrainian names of units of measurement and weight (1966); Yu. Redko's study (1966) and handbook (1969) of Ukrainian surnames; I. Zheliezniak's book on 12th- to 15th-century suffixes in Serbo-Croatian surnames (1969); O. Dei's dictionary of Ukrainian pseudonyms and cryptonyms (1969); P. Chuchka's book on the anthroponyms of Transcarpathia (1970); I. Sukhomlyn's textbook on Ukrainian anthroponymy (1975); M. Khudash's history of 14th- to 18th-century Ukrainian anthroponyms (1977); V. Horpynych, V. Loboda, and L. Masenko's book on personal names and names formed from toponyms in the Inhul-Boh watershed (1977); R. Kersta's book on 16th-century Ukrainian male names (1984); and L. Skrypnyk and N. Dziatkivska's dictionary-handbook of personal names (1986).

R. Senkus

Ontario. The most populous (1990 pop 9,747,600) and the second-largest (1,069,000 sq km) province of Canada, situated between the Great Lakes and Hudson Bay. Its capital is Toronto.

According to the 1981 census, there were approx 203,000 Ukrainians in Ontario, representing 26.9 percent of the Ukrainian population in Canada. Ontario's Ukrainian community differs socially and culturally from the Ukrainian communities in the other provinces, particularly in the prairie provinces. Ontario Ukrainians are concentrated in the most populated industrial centers of the province: *Toronto, *Thunder Bay, *Hamilton, *St Catharines, *Windsor, *Oshawa, London, *Ottawa, *Sudbury, and Kitchener. This distribution can be explained by the history of Ukrainian settlement in Ontario.

During the first wave of immigration (1891–1914) most newcomers from Galicia and Bukovyna settled in the prairies. Some came as seasonal or migrant workers to Ontar-

The Ukrainian Catholic Church of the Holy Protectress in Thorold, Ontario (architect: Lonhyn Pencak)

io, many of them hoping to accumulate enough capital to buy land back in their homeland or in the prairies. They took jobs in the mines of Sudbury, Timmins, and Kirkland Lake; the lumber and paper mills of northwestern Ontario; the factories of Windsor and Oshawa; the foundries and plants of Hamilton; the railway yards and docks of Port Arthur and Fort William (later combined into Thunder Bay); and the food processing and manufacturing industries of Toronto. Some of them stayed in Ontario, where they set up cultural organizations and small parishes. The second wave of immigration in the interwar period was driven, again, by land hunger in Galicia and Volhynia. After fulfilling an obligatory stint at farm labor, most of the newcomers headed for industrial centers offering better job opportunities and participation in Ukrainian cultural life. Some prairie homesteaders moved to Ontario looking for better wages and educational opportunities for their children. Ukrainian communities in Ontario multiplied and expanded rapidly. The new immigrants, who frequently were more politically conscious than their predecessors, set up a multitude of political and cultural organizations with branches in local Ukrainian communities. The last wave of immigration (1947-52) consisted of displaced persons or refugees. About 75 percent of the Ukrainian newcomers to Canada, who were better educated than their predecessors and of an urban background, settled in Ontario. After fulfilling their one-year contracts on farms or in mines or forests, most moved to the cities and swelled the ranks of existing Ukrainian communities. With their experience of political persecution and war, their nationalist ideology, and their commitment to Ukrainian culture and language, they had a determining influence on the Ukrainian community in Ontario. They revitalized some of the old organizations, such as the Ukrainian National Federation, and founded many of the most influential ones, including the Canadian League for Ukraine's Liberation and the Plast Ukrainian Youth Association.

Ontario is a multicultural province: barely half of its population is of British origin. To preserve their culture and language, Ukrainians have maintained their own privately funded evening and Saturday schools and have taken advantage of the provincially funded heritage language programs in public and Catholic elementary schools. Courses in Ukrainian language and literature have been taught at the University of Toronto since the 1950s, and in the late 1970s the Ukrainian community raised money for a chair of Ukrainian studies at the university and courses in Ukrainian language, literature, and history at York University; courses in Ukrainian studies are also taught at universities in Hamilton and Ottawa. In 1981, 74,000 Ontario residents of Ukrainian origin listed Ukrainian as their mother tongue (language first learned and still understood), the highest proportion in any of the provinces. Of this group 41 percent used Ukrainian as a means of communication in the home, a higher percentage than in any other province. By 1991 the number of residents with Ukrainian as their mother tongue had fallen to 57,220; they represented 29.17 percent of the Canadian total.

Ontario constitutes the main part of the Canadian eastern eparchies of both the Ukrainian Catholic church and the Ukrainian Orthodox church, and Toronto is the seat of these eparchies. The two traditional Ukrainian churches have steadily lost ground to other denominations.

An umbrella organization for Ukrainian organizations in Ontario, the Ontario Council of the Ukrainian Canadian Committee (now Congress), was established in 1970. Its presidents have included B. Hlibovych and B. Maksymets.

BIBLIOGRAPHY

Luciuk, L; Wynnyckyj, I. (eds). *Ukrainians in Ontario*, vol 10 of *Polyphony* (Toronto 1988)

Onufriivka [Onufrijivka]. v-14. A town smt (1990 pop 5,000) on the Omelnyk River and a raion center in Kirovohrad oblast. It originated as a Cossack winter settlement, at the beginning of the 17th century. In the mid-18th century it was a military settlement in New Serbia. It was granted smt status in 1968. The town has a horse-breeding farm, a branch of the Svitlovodske Radio Plant, and a regional studies museum. Its fine dendrological park dates back to 1884.

Onut. A Bukovynian village near the Dniester River, now in Zastavna raion, Chernivtsi oblast. It was first mentioned in the Hypatian Chronicle under the year 1219. Archeological excavations have uncovered a settlement of the *Trypilian culture (3rd millennium BC) on Mt Turetska near the village; closer to the Dniester an early Slavic settlement of the *Cherniakhiv culture (2nd-5th centuries AD) and silver Roman coins have been discovered.

Onypko, Semen, b 31 January 1913 in Osmachky, Poltava county, d 1 March 1975 in Ternopil. Stage actor. He worked in the Poltava, Donetske, Vinnytsia, and Ternopil Ukrainian music and drama theaters. Among his roles were Zadorozhny in I. Franko's *Ukradene shchastia* (Stolen Happiness), Lopata in *Zemlia* (The Land, based on the novel by O. Kobylanska), and Lenin in various Soviet plays.

Antin Onyshchuk

Onyshchuk, Antin [Onyščuk], b 1885, d 1930s. Ethnographer. Before the First World War he was a research associate of the Ethnographic Commission of the Shevchenko Scientific Society in Lviv, where he specialized in the culture of the Hutsuls and in folk pottery. After the war he moved to Kiev, where he worked at the All-Ukrainian Historical Museum and served as director of the VUAN *Cabinet of Anthropology and Ethnology. He was arrested during the Stalinist terror in 1934, and died in a labor camp or was executed by the NKVD.

Onyshkevych, Hnat (Ihnatii) [Onyškevyč, Ihnatiij], b 1847 in Uhniv, Zhovkva circle, Galicia, d 26 March 1883 in Vienna. Slavist. After studying at the universities of Lviv and Vienna (under F. Miklosich), he was ordained in the Greek Catholic church. In 1877 he was appointed professor of Ukrainian language and literature at Chernivtsi University. He published the works of I. Kotliarevsky, H. Kvitka-Osnovianenko, M. Shashkevych, I. Vahylevych, and Ya. Holovatsky in the series *Rus'ka biblioteka* (The Ruthenian Library, 3 vols, 1877–8, 1884); edited with O. Lepky the third edition of M. Osadtsa's Ruthenian grammar for secondary schools (1876); and contributed several articles to periodicals, such as *Rodymyi listok*, *Archiv für slavische Philologie*, *S'vit*, and *Misiatseslov bukovyns'kyi*.

Onyshkevych, Larissa [Onyškevyč, Larysa] (née Zaleska), b 12 May 1935 in Stryi, Galicia. Literary scholar, pedagogue, and community figure in the United States; member of the Shevchenko Scientific Society (NTSh); wife of Lubomyr *Onyshkevych. She graduated from the University of Pennsylvania (PH D, 1973). She has taught Ukrainian literature at Rutgers University and engaged in research at the Institute of Advanced Study in Princeton. She has held executive positions in the NTSh and the Plast Ukrainian Youth Association and has edited a number of Plast periodicals. In 1988 she became literary editor of the monthly journal **Suchasnist'*. She has written articles and reviews on Ukrainian literature and drama.

Onyshkevych, Lubomyr [Onyškevyč, Ljubomyr], b 3 February 1933 in Lviv. Ukrainian-American scientist in the field of electronics and electronic materials; full member of the Shevchenko Scientific Society; husband of Larissa *Onyshkevych. He obtained two graduate degrees from the Massachusetts Institute of Technology and began working at the RCA Laboratories in Princeton, New Jersey, in 1957 (as a group leader in 1979). In 1987 he became a technical manager at SRI International. He has written numerous technical papers and holds about 15 US patents. His main contributions have been in the areas of thin and thick films, microelectronics, computer memory, electronic packaging, special electronic substrates, materials for electronic applications, and acoustic surface waves. An active member of the Plast Ukrainian Youth Association, he cofounded its magazine **Iunak* and edited many Plast publications. Onyshkevych has written numerous entries on technology for *Encyclopedia of Ukraine*.

Onyshkevych, Mykhailo [Onyškevyč, Myxajlo], b 25 March 1906 in Biskovychi, Sambir county, Galicia, d 13 March 1971 in Lviv. Slavic linguist. A graduate of Lviv University (MA, 1935), he taught Polish linguistics there (1940–1, 1945–71), chaired its department of Slavic philology (1956–68), and was an associate of the Lviv branch of the AN URSR (now ANU) Institute of Linguistics (from 1945). He developed the teaching program in Polish descriptive and historical grammar for Soviet universities, wrote many articles in Polish and Ukrainian linguistics (especially the Boiko dialect), and was a coeditor of the ANU Polish-Ukrainian dictionary (2 vols in 3 books, 1958–60). His most important work was a two-volume dictionary of the Boiko dialect, published posthumously in 1984.

Myroslav Onyshkevych

Onyshkevych, Myroslav [Onyškevyč] (nom de guerre: Orest, Bohdan), b 26 January 1911 in Uhniv, Rava Ruska county, Galicia, d 3 June 1950 in Warsaw. Senior UPA commander. In the 1930s he was a member of the OUN and was arrested several times by the Polish police. In the fall of 1943 he organized the Ukrainian People's Self-Defense in the Lviv region, and in 1944 he commanded a UPA battalion which fought the Germans, Poles, and Russians. In late 1944 he became deputy commander of the Second Military District, the territory of the Buh Group of UPA-West, and in October 1945, commander of Sian Group in the Sixth Military District. At this post he was promoted to major. When the Sian Group was demobilized in the fall of 1947, he moved to western Poland, where he was captured on 2 March 1948 by Polish security forces. After more than two years of incarceration and torture he was executed.

Onyshkevych, Stepan [Onyškevyč], b 1861 in Galicia, d 1945. Greek Catholic priest and civic and political leader. He was one of the founders of the National Democratic party and a member of its Popular Committee. He was elected to the Austrian parliament twice (1907 and 1911) and sat on the Ukrainian National Rada in 1918–19. He helped Ye. Olesnytsky reorganize **Silskyi Hospodar* (1909–17) and played an important role in other Galician economic institutions, such as the Dnister insurance company and the Karpatia life insurance company. In the interwar period he supported the Ukrainian National Democratic Alliance.

Onyshkevych, Zenowij [Onyškevyč, Zenovij], b 8 December 1929 in Lviv, Galicia. Painter. A postwar émigré in the United States, he studied at the Art Students' League of New York under R. Marsh (1949–51), the National Academy of Fine Arts, and the Pratt Institute (BFA, 1958). He has taught drawing from life at Fairfield University (1977–84) and has painted oil and watercolor portraits, including ones of Pope Paul VI (1967) and Cardinal Y. Slipy, and American, French, and Italian landscapes. Solo shows of his work have been held in New York, Washington, Chicago, Rome, Toronto, and Philadelphia. He has also done illustrations for the *New York Times*, *Reader's Digest*, and American publishing houses.

OOChSU. See Organization for the Defense of Four Freedoms for Ukraine.

Opara, Stepan, b ?, d ca 1665. Cossack leader. In 1661 he was captain of Medvedytsia company in Chyhyryn regi-

Zenowij Onyshkewych: *Portrait of Pope Paul VI* (1967) in the Vatican

ment and Hetman Yu. Khmelnytsky's envoy in Warsaw. With the support of the Crimean Tatar army, operating in Right-Bank Ukraine as Poland's ally, he proclaimed himself hetman of Right-Bank Ukraine in Uman in June 1665. He appointed P. Doroshenko as his general quartermaster. Opara proved incapable of mastering the complex political and military situation, however, and he quickly lost the support of his *starshyna* and the confidence of the Tatars, who arrested him in late August. Doroshenko, who succeeded Opara as hetman, handed him over to the Poles, who imprisoned him in the Malbork fortress and possibly executed him.

Opatovych, Stefan [Opatovyč], b 15 December 1831 in Horynhrad, Rivne county, Volhynia gubernia, d 12 April 1892. Orthodox priest and writer. He graduated from the theological seminary in Kremianets (1853) and from the St Petersburg Theological Academy (1857). From 1858 he was a priest in St Petersburg, where he was active in the Ukrainian community and assisted students from Ukraine. Opatovych wrote the Russian-language works *Sviatyni Kievā* (The Churches of Kiev, 1873) and *Pervye veka khristianstva i rasprostraneniye ego na Rusi* (The First Centuries of Christianity and Its Spread through Rus', 1873). He also published, in Ukrainian, *Opovidannia z soi-toho pysannia* (Stories from the Holy Scriptures), a book of religious instruction that appeared in 1863; planned subsequent volumes were not published owing to the ban in the Russian Empire on Ukrainian-language publications.

OPDL. See Association of Ukrainian Writers for Young People.

Opera. The earliest operatic works by Ukrainian composers were written in the 18th century. M. Berezovsky's *Demofonte* (1773) and D. Bortniansky's *Creonte* (1776), *Alcides* (1778), and *Quinto Fabio* (1779) were written to Italian librettos. Bortniansky also composed two French comic operas – *Le Faucon* (1786) and *Le Fils rival* (1787) – that were performed at the Russian imperial court. Notable Ukrainian opera singers of the 18th century include O. Rozumovsky, H. Holovnia, and M. Poltoratsky.

Among the notable Ukrainian operas of the 19th century is S. *Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, the music of which is strongly influenced by Ukrainian folk songs. This opera premiered in St Petersburg in 1863 with the composer himself performing the title role of Karas. Since then it has become one of the most popular Ukrainian operas and has been staged by theaters in Ukraine and in the diaspora. Its roles have been sung by some of the finest Ukrainian artists, including M. Sadovsky, P. Saksahansky, M. Kropyvnytsky, I. Patorzhynsky, M. Donets, M. Donets-Tesseir, M. Lytvynenko-Volgemut, M. Sadovska-Barilotti, and M. Zankovetska.

Other Ukrainian operas of the late 19th and early 20th centuries include P. Sokalsky's *Mazepa, Obloha Dubna* (The Siege of Dubno), and *May Night*; M. Arkas's *Kateryna* (1890); B. Pidhoretsky's *Kupal'na iskra* (The Spark of Kupalo); A. Vakhnianyn's *Kupalo* (1892); D. Sichynsky's *Roksoliana* (1909); and Heorhii Kozachenko's *Pan sotnyk* (The Noble Captain, 1902).

The most significant Ukrainian operatic works of this period were composed by M. *Lysenko: *Rizdviana nich* (Christmas Night, 1882), *Utoplēna* (The Drowned Maiden, 1884), *Chornomortsy* (The Black Sea Cossacks, 1872), the comic opera *Eneida* (Aeneid, 1910), the chamber opera *Nocturne* (1912), the operetta *Natalka from Poltava* (1889), and children's operas. Outstanding among Lysenko's repertoire is the opera *Taras Bulba* (1891; based on Gogol, libretto by M. Starytsky). It was premiered, after the composer's death, in the Kharkiv State Opera (1924).

In the late 1920s, opera in Ukraine developed rapidly. This was partially because of the significant performing talent centered at the Kiev, Kharkiv, and Odessa opera theaters. Among the works staged were V. Femelidi's *Rozlom* (The Schism), O. *Chyshko's *Iablunevyi polon* (The Apple Tree Captivity), B. *Liatozhynsky's *Zoloty obruch* (The Golden Ring, 1929; based on I. Franko's *Zakhar Berkut*), V. *Kostenko's *Karmeliuk*, P. *Kozytsky's *Nevidomi soldaty* (The Unknown Soldiers), and M. *Verykivsky's *Captain and Naimychka* (The Hired Girl, 1943). This growth did not last, however. With the Stalinist repression of Ukrainian culture, opera was forced to adhere to the principles of socialist realism. It was required that it appeal to a mass audience, reject the influences of Western European modernism, and become a medium for ideology and propaganda.

It was not until the 1960s that the Communist party's ideological pressure somewhat abated. The relaxation led to the creation of a number of works of musical theater, characterized by an increased range of expression and a greater diversity in theme and genre. These operas include Yu. Meitus's *Young Guard* and *Stolen Happiness*, V. Kyreiko's *Forest Song*, K. Dankevych's *Nazar Stodolia*, H.

Maiboroda's *Arsenal* and *Zahybel' eskadry* (The Destruction of the Squadron), H. Zhukovsky's *First Spring*, and others by I. Karabyts, V. Hubarenko, Ye. Stankovych, and V. Zahortsev.

Ukraine has six major opera and ballet theaters, in Kiev, Odessa, Lviv, Kharkiv, Donetsk, and Dnipropetrovske. Important conductors of these opera theaters have been V. Piradov, K. Symeonov, V. Tolba, Ya. Voshchak, S. Turchak, A. Pazovsky, S. Zak, V. Kolesnyk, B. Chystiakov, O. Klymov, Yu. Lutsiv, M. Malko, and M. Pokrovsky. The theaters have staged relatively few full-scale productions of Ukrainian operas, compared with those of Russian or European composers.

Acclaimed Ukrainian female opera singers of the 20th century include Ye. Miroshnychenko, O. Petrusenko, B. and L. Rudenko, Ye. Chavdar, Z. Haidai, M. Sokil, Ye. Zarytska, I. Malaniuk, C. Ordassy-Baransky, and S. *Krushelnytska, who premiered G. Puccini's *Madame Butterfly* in Italy in 1904. Notable Ukrainian male opera singers include D. Hnatiuk, O. Myshuha, M. Menzinsky, A. Didur, B. Hmyria, M. Hryshko, M. Romensky, P. Karmaliuk, S. Kozak, Yu. Kyporenko-Domansky, V. Kozeratsky, and M. Skala-Starytsky.

Active émigré Ukrainian composers of opera include A. Rudnytsky (*Dovbush* and *Anna Iaroslavna*), P. Pecheniha-Uhlytsky (*The Witch*), and M. Fomenko (*Marusia Bohuslavka*). The Canadian Ukrainian Opera Association (est 1974; see *Lysenko Chorus) has staged full and concert versions of Ukrainian operas in Canada and the United States.

Operation Wisła (Polish: Akcja 'Wisła' or Akcja 'W'). The code name of the military operation, by Polish military and security units (28 April to 31 July 1947), that resulted in the deportation of 150,000 Ukrainians from their autochthonous territories (the *Lemko, *Sian, and *Kholm regions) in southeastern Poland to Poland's 'regained territories' (Ziemie Odzyskane), newly acquired from Germany, in the north and northwest.

Officially the purpose of Operation Wisła was to destroy UPA units active in the *Lemko region as well as to deprive them of a base of support among the local population. On 17 April 1947 the Polish State Committee on Public Security issued an order for the implementation of Operation Wisła, and it was sanctioned by a decree of the Presidium of the Council of Ministers of Poland dated 24 April 1947.

Most Polish sources claim the decision was provoked by the death of Gen K. Świerczewski, the Polish deputy minister of defence, in a UPA ambush on 28 March 1947. In reality it probably had been prepared well in advance, and represented the last of several measures taken by the Soviet and Polish authorities during and after the Second World War to 'solve' Poland's 'Ukrainian problem.' Earlier, on the basis of a Soviet-Polish agreement, signed on 19 September 1944, to 'repatriate' Poles in the Ukrainian SSR and Ukrainians in Poland, almost half a million Ukrainians in Poland had been resettled in the Ukrainian SSR.

Gen S. Mossor headed Operational Group Wisła,

which included approx 20,000 regular Polish troops as well as internal security troops, members of the militia, and armed civilians. The principle of collective responsibility was applied, and all Ukrainians in the affected territories, regardless of their political views and affiliations, were deported. The deportation process was swift and brutal: deportees were often given only a few hours to prepare themselves, could take only limited belongings, and were transported to their destination in crowded box-cars. The food supply was irregular, sanitary conditions were poor, there were many delays en route, and the deportation process was accompanied by considerable violence. Some deportees died in transit; those who resisted deportation, or were suspected of aiding the UPA, were imprisoned in the Jaworzno prison camp in Silesia.

The deportees were dispersed over a wide area, primarily in the provinces of *Olsztyn, *Szczecin, Wrocław, and *Gdańsk. They were to constitute no more than 10 percent of the population in any one location, and the eventual goal of government policy was their assimilation into the Polish majority.

Living conditions were harsh, since the deportees were not properly compensated for their lost property, and the best land and buildings in the 'regained territories' were already occupied by Poles who had been 'repatriated' from Soviet-occupied Western Ukraine (Galicia and Volhynia).

Operation Wisła succeeded in atomizing the Ukrainian community in postwar *Poland, and the existence of the community was not recognized by the Polish government until 1956, when limited organizational activity was permitted. Before 1957, deportees who tried to return home were imprisoned in the Jaworzno prison camp, and after 1957 only a few thousand were allowed to resettle in their ancestral homeland. Attempts to attract Polish settlers to that area were largely unsuccessful. It continues to be underpopulated, and many distinctive Ukrainian wooden churches and other cultural monuments have been vandalized or destroyed or have fallen into disrepair.

A number of popular Polish novels dealing with Operation Wisła (notably J. Gerhard's *Luna w Bieszczadach* [The Glow in the Beskyds]), have contributed to a generally negative Polish stereotype of Ukrainians by depicting them in a crude and hostile fashion. Recently, however, a number of articles in Polish publications have discussed Operation Wisła in a more forthright and objective fashion. On 3 August 1990 the Polish Senate passed a resolution condemning Operation Wisła.

Operetta. Early Ukrainian operettas include M. *Verbytsky's *Pidhiriany* (The Foothill Dwellers, 1864) and M. *Lysenko's *Chornomortsi* (The Black Sea Cossacks, 1872). In the 20th century they were followed by K. *Stetsenko's *Svatannia na Honcharivtsi* (Matchmaking at Honcharivka, 1909), Y. Lopatynsky's *Enei na mandrivtsi* (Aeneas in His Wanderings, 1911), and Y. Barnych's *Hutsulka Ksenia*

(Ksenia the Hutsul Girl). The Stalinist crackdown which began in the 1930s stifled the development of Ukrainian culture, including *opera and operetta. Restrictions and the binding conformity to *socialist realism eased only after Stalin's death. Since then Ukrainian operettas have been written by O. Bilash, H. Finarsky, V. Homoliaka, A. Kos-Anatolsky, V. Lukashov, O. Riabov, O. Sandler, and Ya. Tsehliar. In Ukraine the leading operetta theaters are the *Kiev Operetta Theater and the *Odessa Musical Comedy Theater.

Ophthalmology. A branch of medicine that pertains to the structure, functions, diseases, and disorders of the eye. Ophthalmology began to be treated as a separate branch of medicine at the beginning of the 19th century. It was taught at Kharkiv University from 1811 and at Kiev University from 1841. Independent departments of ophthalmology were established at Kharkiv (1868), Kiev (1869), and Odessa (1903) universities. The Kiev surgeon V. *Karavaiv perfected the excision of eye cataracts; he performed about 3,000 operations in the mid-19th century. The first ophthalmological journal, *Vestnik oftal'mologii*, was published by A. Khodin in Kiev from 1884 (now published in Moscow). O. *Shymanovsky of Kiev pioneered the surgical method of transplanting the cornea of the eye. He advanced the teaching of ophthalmology by including compulsory practical courses in the curriculum. The noted Ukrainian ophthalmologist V. *Filatov founded the first glaucoma clinic in the USSR (1931) and established the Institute of Eye Diseases and Tissue Therapy in Odessa (1936), as well as its Russian-language journal *Oftal'mologicheskii zhurnal*. From 1956 the institute's director and the editor of the journal was N. *Puchkivska, a Ukrainian pioneer of cornea transplants and eye-burn treatment. There are departments of ophthalmology at all medical institutes as well as at the postgraduate institutes for the upgrading of physicians. Persistent shortages of instruments, drugs, and eyeglasses, however, as well as questionable hygienic practices in the polyclinics in Ukraine, detract from the ophthalmological services available to the average citizen.

P. Dzul

Opilia Upland [Opillja]. The western portion of the *Podolian Upland. Located to the west of the Upper Zolota Lypa River, Opilia has a general elevation of 350–400 m and a maximum elevation of 470 m. In contrast to that of Podilia in general, the landscape is smooth and gentle and notable for its underlying soft chalky rock. A number of left-bank tributaries of the Dniester, among them the Zubra, the Svirzh, and the Hnyla Lypa, run through Opilia. Their watersheds are cut by secondary valleys which provide the region with a hilly terrain. The slopes of the hills are covered with forests (generally beeches, oaks, and elms), and the watersheds with fields and meadows. Some of the larger towns in Opilia are Berezhany, Rohatyn, and Pidhaitsi.

Opilsky, Yuliiian [Opil's'kyj, Julijan] (pseud of Yurii Rudnytsky), b 8 December 1884 in Ternopil, Galicia, d 9 February 1937 in Lviv. Teacher and writer; brother of S.

Yuliiian Opilsky

*Rudnytsky. He studied at Lviv University and graduated from Graz University (1907). He taught at the Academic Gymnasium of Lviv, was on the district school council (from 1917), and edited the journal *Ukrains'ka shkola* and various German textbooks for schools. His first literary attempts in lyrical poetry remained unpublished. Opilsky's novels on Ukraine's historical past include *Idu na vas* (Beware! We Shall Attack! 1918), *V tsarstvi zolotoï svobody* (In the Kingdom of Golden Freedom, 1920), *Zoloty lev* (The Golden Lion, 1926), and *Idoly padut'* (The Idols Are Falling, 1928). Opilsky is also the author of novelettes dealing with various subjects from world history, among them *Tanechmytsia z Pibastu* (A Dancer from Pibast, 1921), *Potsilunok Ishtary* (The Kiss of Ishtar, 1923), and *Shkoliar z Memfis* (The Schoolboy from Memphis, 1927).

Opishnia [Opišnja]. IV-15. A town smt (1990 pop 7,100) on the Vorskla River in Zinkiv raion, Poltava oblast. Its history goes back to the 17th century. In the Hetman state it was a company town in Hadiache and then Poltava,

Opilia Upland

Yevhen Oppokiv

A glazed clay toy whistle from Opishnia (early 20th century)

Zinkiv, and again Hadiache regiments. Since the 18th century Opishnia has been known for its handicrafts, especially weaving, pottery, and ceramics. Today its ceramics factory makes animal figures, tableware with traditional decorations, and clay toys.

Opishnia fortified settlement. A *Romen-Borshcheve culture settlement of the late 8th to 9th century located in Opishnia, Poltava oblast. Excavations in 1940 and 1957 uncovered fourteen semi-pit dwellings with clay ovens, 20 agricultural buildings and workshops, tools, personal effects, and dishes.

Opolchenie. See Levy en masse.

Oppokiv, Yevhen (Oppokov, Evgenii), b 1 February 1869 in Ruda, Vasylkiv county, Kiev gubernia, d 1 November 1938. Hydrologist and hydrogeologist; full member of the AN URSR (now ANU) from 1929. He studied in Kiev and completed a course at the technology institute in St Petersburg. He went on hydrological expeditions through Belarus and Left-Bank Ukraine from 1894. In 1913 he began to research the wetlands of Polisia, and in 1915 he became a professor at the Kiev Polytechnical Institute. He organized the department of hydrology there (1926), which became the first scientific research institute in Ukraine dedicated specifically to hydrology. Oppokiv headed the new institute as well as the hydrometeorological branch of the *Ukrainian Meteorological Service. His main research interests included watersheds and methods for the drainage of wetlands.

Opryshoks (*opryshky*). Groups of social brigands active in the Ukrainian regions of the Carpathian Mountains from the 16th century to the early 19th century. Opryshoks were similar to the 'noble highwaymen' of other countries and have been idealized in Ukrainian folklore and romantic literature. They consisted mainly of former peasants, servants of noblemen, and (in a later period) resisters of conscription. They usually formed small groups with individual leaders and attacked estates, keeps, tax

farmers, tavern keepers, merchants, and wealthy peasants. They commonly kept most of their booty for themselves, but some of them distributed a portion among the poorer peasantry. Many peasants considered them heroes and avengers and often harbored them or gave them other assistance. During times of greater upheaval they also joined them to form insurrectionist forces (notably during the Cossack-Polish War). The opryshoks enjoyed particularly advantageous conditions, in that they worked in a mountainous borderland between three states (Poland, Hungary, and Moldavia).

The first documented reference to activity similar to that of the opryshoks dates from the mid-15th century. The term 'opryshoks' came into use in the early 16th century. The zenith of their activity was in 1738–59, when they were led by the legendary O. *Dovbush, V. Baiurak, and I. Boichuk and were active throughout the Hutsul and Boiko regions, Bukovyna, and Transcarpathia. In the late 18th and early 19th centuries their number increased dramatically because of rising taxes and forced conscription. A noted opryshok leader in the Hutsul region during that period was M. *Shtoliuk. The Austrian government sent out special punitive military detachments to combat the renegades. The disappearance of the opryshoks was due largely to such repressions and to the abolition of serfdom in the mid-19th century.

A wealth of folkloric material concerning the opryshoks was gathered and published by V. Hnatiuk, Ya. Holovatsky, V. Shukhevych, and others. Literature also derived considerable inspiration from the opryshoks, who appear in the works of Yu. Fedkovych, I. Franko, V. Gzhytsky, H. Khotkevych, M. Pavlyk, M. Shashkevych, and I. Vahylevych, as well as in those of the Polish writers J. Korzeniowski and S. Vincenz, the Austrian writer L. Sacher-Masoch, and the Czech writer I. Olbracht. In the Carpathians many mountains, lowlands, and rivers are named after prominent opryshoks, particularly Dovbush.

Option. The right to choose one's citizenship, conferred by either international or national law, especially when a territory is transferred from one state to another. Option is usually connected with resettlement in the country of one's chosen citizenship. Peace treaties and other international agreements that involve the transfer of territory contain provisions for option. The Peace Treaty of Riga and the 1921 agreements between the Ukrainian SSR and Estonia, Lithuania, and Latvia, for example, specified the option procedure for inhabitants of the Baltic countries who preferred to be Ukrainian citizens, and vice versa. There was some population exchange between Poland, Ukraine, and the Baltic states as a result.

The resettlement and exchange of populations between Nazi Germany and the USSR in 1939–40 and between Poland and the USSR in 1945–6 was not based on voluntary option, but on force. In 1946 an agreement between the USSR and Czechoslovakia allowed Czechs and Slovaks living mostly in Volhynia and Transcarpathia to opt for

Czechoslovakian citizenship and Ukrainians, Russians, and Belarusians in Czechoslovakia to choose USSR citizenship. As a result, almost 10,000 Ukrainians moved to Ukraine in 1946–7. By the late 1950s many of them wanted to return to Czechoslovakia, but they did not obtain Czechoslovak citizenship until 1968.

Oransky, George [Orans'kyj, Jurij], b 30 January 1917 in Kharkiv. Conductor, musicologist, and pedagogue. His musical education took place at the Kharkiv Conservatory (1935–43) in the class of opera and symphonic conducting and at the Hochschule für Musik in Freiburg, West Germany (1945–9). He began his conductorial activity while still a student at the conservatory and has led choirs in Kharkiv (1942–3), Kiev (1943), Kolomyia (1943–4), and Drohobych (1944), as well as the Philadelphia-based Opera Ensemble of the Ukrainian Music Institute of America (1964–74). Oransky has collaborated with M. Fomenko and V. Ovcharenko on a number of works and has edited, arranged, and orchestrated works by classical and contemporary Ukrainian composers. He has published articles and papers about Ukrainian composers and their music. He has also toured the United States with opera productions and chamber and symphonic groups, and given audiovisual presentations.

Oransky-Voina, Parkhomii [Orans'kyj-Vojna, Parxomij], b ?, d 23 June 1653. Uniate churchman. He studied in Rome and then served as archimandrite of the Basilian Zhydychn St Nicholas's Monastery before being consecrated bishop of Turiv-Pynske (1637–53). A writer and publicist, he is known for his 1645 rebuttal in Polish to views put forth by K. *Sakovyčh.

Orations of Gregory of Nazianzus (Slova Hryhoriia Bohoslova Naziianzyna). A collection of 13 sermons by an early Byzantine church father and bishop of Constantinople (379–81) which were translated into Church Slavonic, probably in Kiev. An 11th-century copy of the Orations offers valuable insights into the evolution of the Church Slavonic language and into contemporary Slavic religious practices. Scholars believe that local clergymen, particularly Cyril of Turiv, may have modeled their sermons on the Orations.

Orativ. IV-10. A town smt (1990 pop 3,200) and raion center in Vinnytsia oblast. It was first mentioned in historical documents in 1545. Orativ was involved in the haidamaka rebellion in 1768. In 1793 it was annexed by Russia. In 1919 it was the site of a battle between the UNR and Ukrainian Galician armies and the White forces. Today the town has a dairy.

Oratorio. A nontheatrical setting of a dramatic text on a sacred or semisacred theme for chorus, soloists, and orchestra. The earliest known oratorio in Ukraine was written by I. Vitkovsky and performed at the opening of Kharkiv University. The genre did not develop in Ukraine until the 20th century, when it was used as a monumental art form for the masses and a vehicle for Communist party propaganda. Notable titles include K. Dankevych's *October*, A. Shtoharenko's *Along the Paths of October*, and M. Skorulsky's *A Mother's Voice*. Some contemporary Ukrainian oratorios have managed to avoid blatant politicization, among them M. Verykivsky's *Duma pro divku-branku*

Marusiu Bohuslavku (Duma about the Captive-Girl Marusia Bohuslavka) and P. Kozytsky's *Spring Oratorio* for children's choir. Outside of Ukraine, S. Kouzan's *Neophytes* (to the words of T. Shevchenko) were written for the commemoration of the millennium of Christianity in Rus'-Ukraine (1988).

Orcharding and fruit farming. A major branch of agriculture, devoted to the cultivation of fruits and berries. As a source of many trace minerals, vitamins, acids, oils (up to 70 percent in nuts), and albumen (up to 22 percent in nuts), fruits and berries play an important nutritional role. Because these foods are relatively costly, their consumption is a good indicator of the economic well-being of a population. In Ukraine fruit growing is an important source of revenue for collective farms and private plots: in 1983, 48.1 percent of all orchards were on private plots, and 27.9 percent belonged to collective farms. Thanks to a favorable climate, orcharding has been practiced in Ukraine since ancient times, although prior to the 15th century fruit farming was subsidiary to wild fruit and berry gathering. The Greeks cultivated fruits and berries along the Black Sea coast, especially in the Crimea. In the Princely era horticulture was concentrated in Kiev and its outskirts. As early as the 9th century orchards were cultivated, and selection was used to improve varieties. Later, monasteries, such as the Kievan Cave Monastery, became important centers for the development of horticulture. Apples, pears, cherries, black cherries, plums, and walnuts were the principal crops grown in the medieval period.

In the 18th century orcharding developed rapidly and became widely practiced. Monasteries, the gentry, and the Cossack *starshyna* kept extensive orchards. New varieties and cultivation methods were introduced by German, Bulgarian, and Czech colonists. For the first time peasants became involved in horticulture, although most of their crops were not sold but consumed at home. Peasant fruit farming for commercial purposes began only in the 19th century.

The first significant contributions to scientific horticulture were made by the *Symyrenko family – Platon, Levko, and Volodymyr – and V. *Kashchenko. Horticultural schools and research institutions, such as the *Nikita Botanical Garden, arose in the 19th century. In 1887 there were 209,000 ha of orchards in the nine Ukrainian gubernias under Russian rule. By 1913 the figure had increased to 293,000, or 44.5 percent of all of the orchards in the Russian Empire. Ukraine produced 557,000 t of fruit (primarily apples, black cherries, cherries, plums, and pears; apricots and walnuts in the southern regions), and its average productivity was 24.8 centners per ha. About 60 percent of the orchards were owned by peasants: they were small and crudely cultivated, and produced a random assortment of fruits. The largest commercial orchards were in the Podilia-Bessarabia region and the Crimea.

In the early 20th century horticulture went through a cycle of destruction (during the First World War), recovery (by 1927 the prewar level had been reached), and destruction (during collectivization). By 1940, 612,000 ha in Ukraine were devoted to fruit farming, with private plots accounting for 52.3 percent of the total area. That figure represented 2 percent of the republic's arable land and 34.2 percent of the orchard area in the USSR.

In Western Ukraine horticulture was less developed

than in Soviet Ukraine. In Transcarpathia, for example, horticulture accounted for less than 1 per cent of the arable land in 1935. In the postwar period horticulture reached a peak in 1965, when 1.3 million ha were devoted to fruit farming. Since then the emphasis has been on intensifying rather than expanding horticulture.

In 1983 1.1 million ha were devoted to orchards, or 3.3 percent of the arable land in Ukraine. That area represented 35.1 percent of the orchard area of the former USSR. The main crops were apple (72.2 percent), plum (10.1 percent), pear (7.5 percent), and red and black cherries (5.8 percent). Polisia had 18.8 percent of the orchards, the forest-steppe region 40.1 percent, and the steppe region 41.1 percent. Private plots with a productivity of 47.9 centners per ha accounted for 48.1 percent of the horticultural land, or 524,000 ha; collective farms with a productivity of 23.4 centners per ha represented 27.9 percent, or 304,000 ha; and state farms with a productivity of 63.9 centners per ha represented 24.0 percent, or 231,000 ha. By 1990 the area of arable land taken up by orchards had decreased to 851,000 ha. Their total harvest amounted to 2.9 million t, and their productivity had risen to 42.3 centners per ha.

Because horticulture demands intensive labor and sophisticated techniques, it continues to experience serious difficulties in Ukraine. In 1970, 20 percent of the fruit was left to rot in the fields for lack of transportation. As a result horticultural produce is in short supply, especially outside the growing season. In 1976 the per capita fruit consumption in the USSR was 20 percent of that in the United States. Scientific research in horticulture is conducted at the *Ukrainian Scientific Research Institute of Orchardring and its research stations as well as in the departments of horticulture in agricultural institutes. Orchestra. A unified performing ensemble of musical instruments. Performing ensembles have been part of the Ukrainian musical tradition for at least a millennium. An 11th-century fresco in the St Sophia Cathedral in Kiev depicts a group of *skomorokhy (court musician-entertainers) playing contemporary instruments as an ensemble. Other records indicate that the Rus' armies went into battle with ensembles of drummers and trumpeters, as did those of the Zaporozhian Cossacks several centuries later. The development of the *vertep (puppet theater) and *school drama in the 16th and 17th centuries established a need for some more permanent form of instrumental ensembles, which grew out of the tradition of folk trio ensembles (*troisti muzyky). With the growth of *musicians' guilds from the 16th century and the gradual development of city orchestras, a stronger base was laid for more permanent forms of musical ensembles. At the same time, musical training became more common with the establishment of school orchestras at the Kievan Academy, the Hlukhiv Singing School, and Kharkiv College.

Chamber and symphonic orchestras dedicated specifically to classical music were established on the estates of

18th-century hetmans, such as I. Briukhovetsky, I. Skoropadsky, D. Apostol, and K. Rozumovsky. With the introduction of serfdom after 1785, wealthy landowners, such as the Lyzohub, Galagan, and Boliubash families, set up private serf orchestras. The 19th century saw the establishment of civic societies dedicated to musical performance and development in Ukraine. With them came a growing number of municipal orchestras, concert tours, and opera troupes, all contributing to the evolution of professional orchestras. This trend was extended in the 20th century after the formation of the Ukrainian SSR, when a host of state-sponsored instrumental ensembles were established for public performances and for use in radio broadcasts and movie productions.

At present in Ukraine there are nine symphony orchestras (including the *Symphony Orchestra of Ukraine), seven chamber orchestras, two pop orchestras, and numerous theater orchestras, army bands, and semiprofessional ensembles. In addition, the State Banduryst Kapelle of Ukraine and a number of folk music and dance ensembles that include folk instrument orchestras have been established in Ukraine during the 20th century (most notably the *Verovka State Chorus).

Important composers of orchestral music in Ukraine are S. Liudkevych, L. Revutsky, B. Liatoshynsky, A. Shtoharenko, R. Simovych, R. Prydatkevych, M. Skoryk, and V. Sylvestrov. Prominent conductors in Ukraine include M. Verykivsky, N. Rakhlin, O. Klymiv, A. Rudnytsky, L. Turkevych, M. Kolessa, I. Blazhkov, V. Kozhukhar, and S. Turchak.

W. Sydorenko

Orchis (Ukrainian: *zozulyntsi*). A genus of orchids (family Orchidaceae) containing about 100 species, some cultivated as ornamentals. The *Orchis* is a perennial herb with a straight, leafy stem; each plant bears a single flower-spike with many flowers. The root tubers of some species are used as food. Most widespread in Ukraine is *O. maculata*, which grows in boggy meadows and brushwood. Salep, prepared from dried orchid tubers, is taken orally or by enema to treat inflammations of the digestive tract.

Orchyk River [Orčyk]. A right-bank tributary of the Orel River. It is 108 km long and drains a basin area of 1,460 sq km. It flows through Kharkiv and Poltava oblasts and is fed mainly by meltwater. The town of Karlivka is situated on the river, the waters of which are used for irrigation.

Carlotta Ordassy-Baransky

Ordassy-Baransky, Carlotta, b 2 May 1921 in Budapest. Opera singer (soprano). She studied music at the Liszt Academy in Budapest and at the La Scala School for Young Artists in Milan (under G. Cigna). She debuted as Second Lady in W. Mozart's *Die Zauberflöte* at La Scala and continued singing there under W. Furtwängler. In 1950 she moved to New York, where she sang in the Metropolitan Opera as a soloist (1955–77) and as a guest soloist with the Dumka Chorus. She also performed in Salzburg under H. von Karajan and recorded R. Wagner's *Die Walküre* with him and *Das Rheingold* with L. Stokowski.

Order of Saint Basil the Great. See Basilian monastic order.

Orders, medals, and honorific titles of the Ukrainian SSR. Official awards or honors for outstanding service to the state, or exceptional achievement in the building of socialism or in military service. The awards used in the Ukrainian SSR lack a distinctive Ukrainian character. The first Soviet award was the Order of the Red Banner, instituted in 1918 by the Soviet Russia for distinguished service in the Red Army. In 1920 Soviet Russia introduced the Order of the Red Banner of Labor for outstanding workers, and this was adopted by the Ukrainian SSR in 1921. Several orders, including those of the Red Banner (1924), the Red Banner of Labor (1928), Lenin (1930), and the Red Star (1930), were established at an all-Union level. During this period the Ukrainian SSR could bestow its national awards, as well as all-Union orders, on its citizens. This changed in 1933, when Moscow assumed control over the awarding of all orders and medals.

A full system of orders and medals was developed in the Soviet Union during J. Stalin's regime. In 1935 the Order of the Mark of Honor was established, and in 1938 medals were awarded for valor, military service, prowess in work, and distinguished service in work. The honorific titles of Hero of the Soviet Union and Hero of Socialist Labor were established in 1934 and 1938, and were supplemented in 1939 with the medals of the Gold Star and the Gold Hammer and Sickle, respectively. The honorific titles of People's Artist (for both theater and fine arts), Merited Artist, Creator of Art, and Scientific Worker were established at both the republic and all-Union levels. Physicians and teachers were added to the list of potential winners in 1940. These developments reflected the penetration of the state structure into every walk of life and its constant striving for political legitimization among the people.

The Second World War led to a proliferation of orders and medals in the Soviet Union. New orders included the Great Fatherland War (2 classes), Suvorov (3 classes), Kutuzov (3 classes), Aleksandr Nevsky, Bohdan Khmelnytsky (3 classes), Victory, Glory (3 classes), Ushakov (2 classes), Nakhimov (2 classes), Mother Hero, and Maternal Glory (3 classes). Medals were issued for partisans (2 classes), motherhood (2 classes), the defense of cities (including Odessa, Sevastopol, and Kiev), the capture of strategic centers in Eastern and Central Europe (including Budapest, Prague, and Warsaw), and the eventual victories over Germany and Japan.

After the Second World War no new orders were created until the Brezhnev regime instituted the orders of the October Revolution (1967), the Friendship of Nations (1972), Worker's Glory (3 classes, 1974), and Service to the

Homeland in the Armed Forces of the USSR (3 classes, 1974). The orders of St Olga, St Daniel, and St Andrew were created in the 1980s. Medals were awarded for meritorious work in postwar reconstruction (ferrous metallurgy, Donbas coalfields), outstanding service in dangerous or essential professions (guarding borders, army service, maintenance of public order, fire fighting, and lifesaving), meritorious work performance, and participation in priority economic projects (such as the reclamation of virgin lands or the building of the Baikal-Amur trunkline). The honorific title 'merited' was extended to a wide variety of occupational categories, among them scientists (such as agronomists, amelioration specialists, geologists), technical personnel (pilots, engineers, agricultural machinery specialists, construction workers), and professionals (jurists, postsecondary teachers, architects. (See also *Prizes and awards.)

A. Makuch

Ordzhonikidze, Grigorii [Ordžonikidze, Grigorij] (pseud: Sergo), b 27 October 1886 in Goresha, Georgia, d 18 February 1937 in Moscow. Georgian Bolshevik and Soviet official. In December 1917 he was appointed extraordinary commissar for Ukraine, and during the first Bolshevik offensive in Ukraine he procured grain and coal for Russia and organized Bolshevik resistance against the German forces, including the flooding of the Donbas mines. In 1919 he helped organize A. Denikin's defeat in Left-Bank Ukraine, and in 1921–2 he took part in the reconstruction of the Donbas industry. As first secretary of the Party's Transcaucasian Krai Committee (1921–6) he established Soviet power in Georgia and brutally suppressed any national resistance. As chairman of the Party's Central Control Commission and commissar of the Workers' and Peasants' Inspectorate he carried out purges of Trotskyists and Ukrainian national communists in the Party. In the spring of 1930 he was sent to Ukraine to speed up collectivization and the antikulak campaign. As head of the USSR Supreme Council for the National Economy (1930) and the USSR commissar for heavy industry he directed the industrialization drive, especially the electrification of the Donbas and Dnieper regions of Ukraine. Opposed to the rapid pace of industrialization and the mass terror in the 1930s, he committed suicide.

K. Hohol

Ordzhonikidze [Ordžonikidze]. VI-15. A city (1990 pop 46,200) under oblast jurisdiction on the Bazavluk River in Dnipropetrovske oblast. It was founded as a mining town in 1934 and was amalgamated with the Kalinin and No. 1 settlements and Oleksandrivka village in 1956. A center of the Nykopil Manganese Basin, it has an enrichment complex and machinery-repair plants. The Krasnokutskyi kurhan is nearby.

Ordzhonikidze Mineral Enrichment Complex (Ordžonikidzevskiyi hirnnycho-zbahachuvalnyi kombinat). A complex of the manganese industry, founded in 1970 in Ordzhonikidze, Dnipropetrovske oblast. It con-

sists of six open quarries, a mine, and three enrichment and agglomeration factories and produces manganese concentrate. In 1970 it employed 3,500 workers.

Orel, Artem, b 2 November 1897 in Saksahan, Verkhnodniprovske county, Katerynoslav gubernia, d 19 July 1972 in Perth Amboy, New Jersey. Linguist. He studied at the Kharkiv Institute of People's Education (1926–30) and worked as a book editor and translator. In the 1930s he was persecuted and in 1938–9 imprisoned. During the German occupation of Ukraine he was literary editor of the Kharkiv paper *Nova Ukraïna* and an editor of the Division Galizien's paper *Do peremohy*. As a postwar refugee he worked for the journal *Pu-hu* in Augsburg and published an orthographic dictionary (1946). After emigrating to the United States in 1950, he compiled a Ukrainian dictionary of foreign loanwords (3 vols, 1963–6) and contributed articles to émigré periodicals, such as *Svoboda*, *Ukrains'ki visti*, *Nasha bat'kivshchyna*, and *Novi dni*.

Vasyl Orel

Vasyl Orenchuk

Orel, Vasyl, b 10 January 1928 in Vasiurynska Stanytsia, Plastunivska (now Dinska) county, Kuban, d 31 August 1987 in Mykolaiv. Community activist and specialist in regional studies. He graduated from the Krasnodar Pedagogical Institute with a degree in philology in 1950. In 1963, together with his wife, L. Orel, he established a regional museum in honor of T. Shevchenko in Malo-Tenhynske, in the Otrado-Olhynske region of Krasnodar krai. He also established the only Ukrainian library in the Kuban, but it was destroyed after he left the area for Mykolaiv in 1965. He studied the Ukrainian press in the Kuban and collected biographical data on M. Dykarenko, I. Kotliarevsky, V. Mova, V. Potapenko, M. Pymonenko, and M. Vorony. During his stay in the Kuban he wrote studies of the works of H. Dobroskok, P. Kapelhorodsky, V. Samiilenko, and Ya. Zharko. He has published more than 300 articles on literary topics.

Orel River [Orel'] (also Oril). A left-bank tributary of the Dnieper River, which it joins at Dnipropetrovske. It is 346 km long and drains a basin area of 9,800 sq km. The river originates in Kharkiv oblast, and part of its course runs along the border between Kharkiv and Dnipropetrovske oblasts and between Poltava and Dnipropetrovske oblasts. Its main tributaries are the Bahata, Berestova, Orchyk, and Orelka rivers. The Dnieper-Donbas Canal runs

along the Orel's floodplains. The river is fed mostly by rain and snow, and its waters are used for irrigation and water supply.

Oreletsky, Vasyl [Orelec'kyj, Vasyl'], b 30 January 1895 in Luzhany, Chernivtsi county, Bukovyna, d 9 January 1976 in Munich. Legal scholar. Interrupting his law studies at Chernivtsi University during the First World War, he served in the Austrian and then Ukrainian Galician armies. After the war he completed his studies at Charles University and the Ukrainian Free University (LLD, 1932). As a student he was president of the *Central Union of Ukrainian Students (1925–6, 1927–33). From 1939 he taught international law at the *Ukrainian Free University, in Prague and then in Munich, and served as dean of the law faculty and as rector of the university (1963–4, 1965–8). He wrote articles on international law, politics, and the student movement. As a leading member of the OUN (Bandera faction), Oreletsky edited or contributed to its publications *ABN Correspondence*, *The Ukrainian Review*, *Vyzvol'nyi shliakh*, and *Shliakh peremohy*. A festschrift in his honor was published by the Ukrainian Free University in 1982.

Orelka River [Orel'ka] (also Orilka). A left-bank tributary of the Orel River. It is 95 km long and drains a basin area of 805 sq km. The river runs through the southwestern part of Kharkiv oblast. It is fed mainly by meltwater and tends to dry out in the summer. Its waters are used in industry and agriculture. The Dnieper-Donbas Canal passes through its valley.

Orenchuk, Vasyl [Orenčuk, Vasyl'], b 13 January 1890 in Stoianiv, Radekhiv county, Galicia, d 9 March 1958 in Munich. Businessman, journalist, and political leader. After completing his law studies at Lviv and Vienna (LLD, 1913) universities he was drafted into the Austrian army and captured in action by the Russians. In 1917 he escaped from internment and took part in the political events in Kiev. He served as assistant director of the general department at the Ministry of Foreign Affairs and then as UNR consul in Germany (1919–22). In the interwar period he set up a successful import-export firm in Munich and devoted his free time to journalism.

Orenshtain, Yakiv [Orenštajn, Jakiv], b 1875, d? Jewish-Ukrainian owner of the *Ukrainska (originally Halytska) Nakladnia publishing house in Kolomyia (from 1903) and Berlin (1919–32), which published hundreds of Ukrainian books. In 1933 Orenshtain moved to Warsaw, where he ran a bookstore. He disappeared in 1939 after the Germans occupied Warsaw, and probably died in the Warsaw ghetto or a Nazi concentration camp.

Oreshkevych, Fedir [Oreškevyč], b 6 May 1872 in Odessa, Kherson gubernia, d 2 October 1932 in Kiev. Opera singer (tenor). He studied at the St Petersburg Conservatory under F. Gushchin (1897–1900) and then was a soloist at the Mariinsky Opera Theater (1901–4), the Warsaw Opera (1904–6), and the Kiev Opera (1906–25). In 1914–15 he also appeared at the Bolshoi Opera in Moscow. In the 1920s he was a professor at the Kiev Conservatory and the Kiev Institute of Music and Drama. His operatic roles included Hermann in P. Tchaikovsky's *The Queen of*

Fedir Oreshkevych

Mykhailo Orest

Spades and the name-part in J. Massenet's *Werther*. In recital he often performed Ukrainian folk songs.

Orest, Mykhailo (pseud of Mykhailo Zerov), b 27 November 1901 in Zinkiv, Poltava gubernia, d 12 March 1963 in Augsburg. Poet and translator; brother of M. *Zerov. He graduated from the Kiev Institute of People's Education. He began to publish his poetry after he emigrated to Germany in 1944. The published collections include *Luny lit* (Echoes of the Ages, 1944), *Dusha i dolia* (The Soul and Fate, 1946), *Derzhava slova* (The Dominion of Words, 1952), *Hist' i hospoda* (The Guest and the Inn, 1952), and the posthumously published *Pizni vruna* (Late Sprouts, 1965). His works are said to continue the work of the *Neoclassicist school of the 1920s. His translations too have classical qualities; most have been published as collections, including the translations of S. George (1952), M. Dauthenday (1953), R.M. Rilke, H. von Hofmannsthal, and C.-M.-R. Lecomte de Lisle (1956). Anthologies of translations Orest has published include *Antolohiia nimets'koi poezii* (Anthology of German Poetry, 1954), *Antolohiia frantsuz'koi poezii* (Anthology of French Poetry, 1954), *More i mushlia* (The Sea and the Shell, an anthology of European poetry, including Italian, English, Spanish, Portuguese, Russian, and Polish, 1959), and *Sim nimets'kykh novel'* (Seven German Novellas, 1962). He also printed unpublished or rare collections of his brother's works, including *Sonnetarium* (1948), *Catalepton* (1952), *Corollarium* (1958), and *Nove ukrains'ke pys'menstvo* (New Ukrainian Writing, 1960). Orest also edited a collection of memoirs, *Bezsmertni* (The Immortals, 1963), about M. Zerov, P. Fylypovych, and M. Drai-Khmara.

I. Koshelivets

Orfe (*Leuciscus idus*; Ukrainian: *viiaz*). An edible sport and commercial fish of the carp family Cyprinidae, growing up to 50 cm in length and 1.0–2.5 kg in weight. It is an elongated, rather fatty fish with a small mouth, dark back, and silvery sides and belly. In Ukraine it is commonly found in the Dnieper, Desna, and Dniester rivers and is bred on fish farms. Golden ide, a reddish brown variety, is kept in pools, park lakes, and aquariums as a decorative fish.

Organization for the Defense of Four Freedoms for Ukraine (Orhanizatsiia oborony chotyrok' svobod Ukrainy, or OOC'HSU). A sociopolitical organization in the United States, dedicated to defending Ukraine's right

to freedom of speech, freedom of religious worship, freedom from want, and freedom from fear. It is linked ideologically with the Bandera faction of the OUN and the *Canadian League for Ukraine's Liberation. The first two branches of the organization sprang up in Newark and New York in 1946, and by August 1947 the organization had been incorporated, with a head office in New York. In 1955 OOC'HSU had 29 branches and 2,280 members. By the end of 1967 it had 48 branches and 9 representations, and its membership had reached 8,400. Besides the sociopolitical monthly **Visnyk* (est 1947), the organization publishes information about Ukraine and its history in Ukrainian and English and the works of émigré writers. It also organizes lectures and courses. Its founder and first president was Ye. *Liakhovych (1946–8). His successors have included I. Bilynsky, I. Vovchuk, M. Chyrovsky, Ye. Lozynsky, and I. Vynnyk. In 1967 the Women's Association of the OOC'HSU was founded. It had 16 branches and 1,200 members. Its presidents have been U. Tselevych and D. Protsyk.

Organization for the Defense of Lemkivshchyna (Orhanizatsiia oborony Lemkivshchyny, or OOL). A national organization founded in June 1936 in Philadelphia to resist the Polish government's policy of Polonization and colonization of the Lemko region. The founding convention brought together 26 local Lemko defense committees, many of them formed a year or two earlier through the organizing efforts of M. Dudra. The OOL then started a monthly magazine named *Lemkivs'kyi dzoin* (1936–40). By 1937–9 the organization had reached a high of 53 branches, only to decline considerably during the Second World War. The group was revived in 1958 in Yonkers, New York, for the purpose of aiding Lemkos and other Ukrainians in Poland who had been uprooted from their homes by *Operation Wisła. It held demonstrations, appealed to government agencies, published historical materials, and provided financial help to compatriots who returned to the Lemko region. It published the annual *Lemkivs'kyi kalendar* and the monthly **Lemkivs'ki visti* (Yonkers, Toronto, Passaic 1958–79). Today it also welcomes and helps Ukrainian immigrants from Poland. The OOL has 17 branches and about 1,500 members in the United States and Canada. It maintains a museum in Stamford, Connecticut, and a research center, which publishes books as well as the illustrated magazine **Lemkivshchyna* (1979–). The presidents of the organization have included V. Karbovnyk, V. Levchyk, Yu. Nalysnyk, I. Skvirtniansky, Yu. Kotliar, I. Hvozda, M. Mytso, and M. Dupliak. In 1975 the Canadian branches formed their own national association, the Alliance of Lemkos in Canada (OLK).

Organization for the Rebirth of Ukraine (Orhanizatsiia derzhavnoho vidrodzhennia Ukrainy, or ODVU; acronym also commonly given in English as ODWU). A nationalist political organization established in the United States in 1931. Connected ideologically with the OUN, the group propagated Ukrainian nationalism and supported the liberation struggle in Ukraine. Its groundwork was established in 1930–1 by O. *Senyk, an OUN operative who helped found 35 ODVU branches. The group was particularly popular in the 1930s and developed 78 branches with young people's (*Young Ukrainian Nationalists) and women's (*Ukrainian Gold Cross) affiliates; its combined membership (1938) was approx 10,000. Investigations by

the (Congressional) Dies Committee and the FBI for perceived pro-Nazi sympathies after 1939 affected the group seriously (the number of branches had fallen to 27 by 1942), but it was cleared, and it recovered some of its former strength after the war. In the postwar period it has been affiliated with the Melnyk faction of the OUN. ODVU publications include the monthly *Vistnyk ODVU* (1932–4), *Natsionalist* (1935–7), *Ukraina* (1939–41), all published in New York, and **Samostiina Ukraina* (1948–). The first president of ODVU was H. Herman. He was followed by A. Granovsky (1935–63), V. Riznyk, B. Hnatiuk, and B. Shebunchak (1982–).

Organization of the Ukrainians of Lviv (Orhanyzatsiia ukraintsiv mista Lvova). A nonpartisan organization established at the beginning of the 1920s, mostly through the efforts of S. Biliak, for the purpose of promoting national consciousness among Ukrainian workers and uniting the city's Ukrainian residents in one structure. Its activities consisted mostly of demonstrations and campaigning for Ukrainian Sejm and Senate candidates. After Biliak it was headed by I. Lishchynsky and A. Berezovsky. For many years its secretary was A. Dobriansky. Some efforts were made to politicize the organization, especially by the Ukrainian National Democratic Alliance during the period of *Normalization to turn it into an affiliated group.

Participants at the OUN founding congress (1929)

Organization of Ukrainian Nationalists (Orhanyzatsiia ukrainskykh natsionalistiv, or OUN). A Ukrainian political movement dedicated to the establishment of an independent Ukrainian state. The OUN arose from the merger of the *Ukrainian Military Organization (UVO) and several nationalist student associations – the *Group of Ukrainian National Youth, the *League of Ukrainian Nationalists, and the *Union of Ukrainian Nationalist Youth. Two conferences of Ukrainian Nationalists – one on 3–7 November 1927 in Berlin and the other on 8–9 April 1928 in Prague – paved the way for the founding congress, which was held in Vienna from 28 January to 3 February 1929. It elected a nine-man Leadership of Ukrainian Nationalists (PUN) headed by Ye. *Konovalts and including M. *Stsiborsky, V. *Martynets, D. *Andriievsky, M. *Kapustiansky, and Yu. *Vassyan; adopted a statute; and set forth its basic policy. According to its initial declaration the OUN's goal was to establish an independent, unit-

ed national state on Ukrainian ethnic territory. This goal was to be achieved by a national revolution led by a dictatorship that would drive out the occupying powers and set up a government representing all regions and social groups. The economy was to be a mixture of private ownership, nationalization, and co-operation. The OUN rejected all party and class divisions and presented itself as the dominant force in Ukrainian life at home and abroad. Defining itself as a movement, not a party, it condemned the legal Ukrainian parties in Galicia as collaborationist. Blaming the socialist and liberal camps for the failure of the Ukrainian Revolution of 1917–20, the OUN stressed the importance of a strong political elite, national solidarity, and reliance on 'our own forces.' It was attracted to B. Mussolini's fascist regime, which appeared to have saved Italy from anarchy. By the 1930s differences in outlook had appeared in the OUN: Ye. Konovalts and most of the PUN were pragmatic realists who thought in terms of traditional militaristic authoritarianism, whereas the younger members were integral nationalists who espoused a romantic, irrational devotion to the nation. These ideological differences contributed ultimately to the split in the organization.

The OUN accepted violence as a political tool against foreign and home enemies of the cause. Most of its activity was directed against the Polish regime. Under the command of the Western Ukrainian Territorial Executive (est February 1929) the OUN carried out in Galicia and Volhynia hundreds of acts of sabotage, including an incendiary campaign against Polish landowners (which helped provoke the *Pacification of 1930), boycotts of state schools and of Polish tobacco and liquor monopolies, dozens of expropriation attacks on government institutions to obtain funds for its activities, and some 60 assassinations. Its most prominent victims included the Polish officials T. *Holówko and B. *Pieracki, the Soviet consular official A. Mailov (killed in retaliation for the man-made famine of 1932–3 in Soviet Ukraine), and I. *Babii, the director of the Ukrainian Academic Gymnasium in Lviv (a Ukrainian accused of collaboration with the Polish police).

The OUN's membership consisted overwhelmingly of students and young people. There are no reliable figures, but estimates range as high as 20,000 (1939). Yet the OUN's influence greatly exceeded its size. Its spirit of selfless, even fanatical dedication to the national cause proved tremendously attractive to young people. The OUN can be said to have shaped the political outlook of an entire generation of Western Ukrainians.

The OUN's major publications were the legal journal **Rozbudova natsii* and the illegal *Biuletyn' Kraiovoi' ekzekutyvy OUN na ZUZ*, **Surma, Iunak, Natsionalist*, and *Ukrains'kyi natsionalist*. A number of legal newspapers in Western Ukraine were under strong nationalist influence.

Many Galician and Volhynian OUN activists were sentenced by Polish courts in the 1930s, and there were two trials in Bukovyna in 1937. In 1934 the Polish police arrested the OUN's leading activists, including S. *Bandera, the head of the Western Ukrainian Territorial Executive, and kept them in prison until the outbreak of the Second World War. In spite of these setbacks, the OUN rebuilt its organizational network. It did not succeed in penetrating Soviet Ukraine, but J. Stalin's regime was concerned enough about the OUN's potential to order the assassination of Konovalts in Rotterdam in 1938.

Konovalts's death led to a succession crisis, which re-

vealed fundamental differences between the OUN members in Western Ukraine and members of PUN, who lived abroad. Underlying the power struggle were generational and ideological divisions. The home cadres, who bore the brunt of the underground struggle, were younger men with an aspiration to leadership and an uncritical acceptance of fascist ideas and methods. Their outlook was influenced strongly by D. *Dontsov, who propounded a cult of will and power and indiscriminately praised fascist and Nazi leaders. The older OUN leaders tended to be more conservative; Ye. *Onatsky and M. Stsiborsky, for example, stressed the positive features of Italian fascism but condemned Nazism.

The Second Grand Assembly of the OUN, held in Rome on 27 August 1939, elected A. *Melnyk to head the organization and adopted the title *vozhda* (equivalent to *Führer*) for its leader, declaring him responsible only to 'God, the Nation, and his own conscience.' By this abrupt departure from its conservative orientation PUN tried to head off any challenge to Melnyk's authority from the home cadres. The measure backfired: Bandera and his followers, who had emerged from prison after Poland's collapse in 1939, formed the Revolutionary Leadership on 10 February 1940 and claimed the right of succession. Melnyk tried in vain to resolve the crisis by negotiation. In April 1941 the Bandera faction held its own Second Extraordinary Congress in Cracow, which declared the Rome assembly illegal, elected Bandera leader, and adopted a program that reaffirmed the basic resolutions of 1929. Most of the home members accepted Bandera's authority, and the rift soon became irreversible. The two factions became known as the OUN(B), 'Banderites,' and OUN(M), 'Melnykites,' after their leaders. During the war the OUN(B) adopted the name Revolutionary OUN (OUNIRJ).

Both factions expected that in the impending conflict between Germany and the USSR they would establish an independent Ukrainian state. Hence, each sought a tactical alliance with the Germans. A. Hitler's abandonment of *Carpatho-Ukraine (where younger OUN members had helped create a defense force) to the Hungarians in 1939 aroused misgivings about the German alliance but did not discourage either faction. With German approval the OUN(B) formed two battalions of about 600 men, Nachtigall and Roland, which were intended as the nucleus of a future army (see *Legion of Ukrainian Nationalists). Following the German invasion of the USSR the OUN(B) proclaimed Ukrainian independence in Lviv on 30 June 1941, with Ya. *Stetsko as premier (see *Proclamation of Ukrainian Statehood, 1941). The Germans, needing Ukrainian assistance against Russia, were expected to acquiesce in the *fait accompli*. Although elements of the German military were inclined to do so, they were overruled by Hitler, whose racial prejudice against Ukrainians precluded co-operation. Bandera and some of his associates were arrested and imprisoned by the Gestapo. Many OUN(B) members were killed outright, or perished in jails and concentration camps. M. *Lebed assumed control of the organization and in May 1943 transferred his powers to R. *Shukhevych. Determined to build an independent state, both factions sent clandestine *OUN expeditionary groups into Ukraine to set up local administrations with nationally conscious Ukrainians. Estimated at 2,000 men (mostly OUN(B) members), the groups were active in the larger cities. An OUN(M) group, which reached Kiev in September 1941, published the newspaper *Ukrains'ke slovo* and

formed the *Ukrainian National Council, consisting mostly of eastern Ukrainians and headed by M. *Velychkivsky. Its members were arrested in December 1941, and over 40 of them, including O. *Teliha and their leader, O. *Olzhych, were killed immediately or later, some of them in Babyn Yar. Melnyk was kept under house arrest in Berlin until January 1944, when he and other principal OUN(M) figures were arrested and taken to the Sachsenhausen concentration camp.

Anti-German resistance began with the formation of the *Polisian Sich led by T. *Borovets, who co-operated with the OUN(M). In the autumn of 1942 both OUN factions organized armed detachments in Volhynia and Polisia to fight the Germans and Soviet partisans. The *Ukrainian Insurgent Army (UPA) under the control of the Bandera faction disarmed the Polisian Sich and the Melnyk detachments in 1943 and absorbed many of their members. Relations between the two nationalist factions were extremely hostile. Although the UPA was controlled by the OUN(B), it included people of various political and ideological convictions. Furthermore, it needed the support of the broad masses against both the Germans and the Soviets. Much of the nationalist ideology, including the concept of dictatorship, did not appeal to former Soviet citizens who had experienced the dictatorship of the Party. Hence, a revision of the OUN(B) ideology and political program was imperative. At its Third Extraordinary Grand Assembly on 21–25 August 1943, the OUN(B) condemned 'internationalist and fascist national-socialist programs and political concepts' as well as 'Russian-Bolshevik communism' and proposed a 'system of free peoples and independent states [as] the single best solution to the problem of world order.' Its social program did not differ essentially from earlier ones, but it emphasized a wide range of social services, worker participation in management, a mixed economy, choice of profession and workplace, and free trade unions. The OUN(B) affirmed that it was fighting for freedom of the press, speech, and thought. Its earlier nationality policy, encapsulated in the slogan 'Ukraine for Ukrainians,' was dropped in favor of the rights of national minorities. The OUN's command structure was modified: one-man rule was replaced by collegial leadership. A three-man Leadership Bureau consisting of R. Shukhevych, Z. *Matla, and D. *Maivsky was elected. After the congress an all-Ukrainian representative body, the Ukrainian *Supreme Liberation Council (UHVR), was formed, in July 1944. Most of its members were Banderites, and its General Secretariat was headed by Shukhevych. The OUN(M) conducted a similar policy and set up the All-Ukrainian National Council in Lviv in the spring of 1944.

In the autumn of 1944 the Germans released Bandera, Melnyk, and other nationalist leaders in a belated attempt to win support for their war effort. At the end of the war Melnyk resumed his leadership of the OUN(M); Bandera and Ya. *Stetsko were elected to the leadership in Ukraine. In February 1946 the External Units of the OUN (ZCh OUN) were formed in Munich under Bandera's leadership, and in April the *Anti-Bolshevik Bloc of Nations was set up by Stetsko to unify non-Russian nationalities opposed to the Soviet regime. A conflict over the ideological revisions of 1943 arose between a group of OUN(B) emissaries from Ukraine (M. Lebed et al) and Bandera's organization abroad. The latter was accused of resisting the changes and their necessary consequences – the democratization of the OUN(B), the autonomous status of the UPA and UHVR,

and the renunciation of dogmatism and elitism. The emissaries voiced their criticism in **Ukrains'ka trybuna*. In their principal organ, **Vyzvol'na polityka*, Bandera and his group argued that the revision brought the OUN too close to socialism and communism. The controversy culminated in the expulsion of the opposition at the ZCh OUN conference in Mittenwald on 28–31 August 1948. In 1953–4 the OUN(B) leadership in Ukraine reaffirmed the ideological revisions and instructed Bandera, Z. *Matla, and L. *Rebet to form a new ZCh OUN leadership. Negotiations proved fruitless, and in 1956 two of the triumvirate leadership, Matla and Rebet, set up a new organization known as the OUN (Abroad), or *dviikari* ('twosome' for the two leaders). Its activists established the **Prolog Research Corporation*, published **Ukrains'kyi samostiinyk*, and sponsored the monthly **Suchasnist'*. After Rebet's assassination in 1957, the organization was led by B. *Kordiuk and, later, by Rebet's widow, D. *Rebet.

The OUN(M) after the war developed a conservative corporatist ideology purged of fascist trappings. At its Third Grand Assembly on 30 August 1947, it limited the leader's power by making him responsible to a congress that had to be convoked every three years, and introduced into its program the principles of equality before the law, judicial independence, and freedom of conscience, speech, the press, and political opposition. O. *Boidunyk's *Natsional'nyi solidaryzm* (National Solidarism, 1945), which updated the organization's ideology, advocated a Ukrainian nation-state based on the solidarity of corporate social groups.

Strife between the two OUN factions continued in Germany immediately after the war: they fought for dominance in the DP camps and in the émigré *Ukrainian National Council. The OUN(M) and its allies won control of the council, and the ZCh OUN withdrew from it. The OUN factions have had a decisive impact on the Ukrainian émigré community. The community's identity and public image have been shaped largely by the nationalist commitment to Ukraine's liberation. Soviet propaganda aimed at discrediting the OUN as a Nazi collaborator and a hireling of Western intelligence agencies. Claiming to be the vanguard of the struggle against Russian imperialism, the OUN(B) has tried to dominate émigré life. Its umbrella organization, the World Ukrainian Liberation Front (est 1973), includes the *Organization for the Defense of Four Freedoms for Ukraine (United States), the *Canadian League for the Liberation of Ukraine, the *Association of Ukrainians in Great Britain, the *Union of Ukrainians of France, Prosvita (Argentina), the League for the Liberation of Ukraine in Australia and New Zealand, and their affiliated organizations. Its major publications are **Shliakh peremohy* (Munich), **Vyzvol'nyi shliakh*, **Ukrains'ka dumka*, and **Ukrainian Review* (all in London), *Visnyk OOChSU* and **Natsional'na trybuna* (both in New York), and **Homini Ukrainy* (Toronto). Bandera led the OUN(B) until his assassination in 1959; he was succeeded by S. *Lenkavsky, Stetsko (1968–86), V. *Oleskiv (1987–91), and S. Stetsko (Ya. Stetsko's widow; since 1991).

Nationalist émigré organizations founded in the 1930s, such as the *Organization for the Rebirth of Ukraine (United States), the *Ukrainian National Federation (Canada), and the *Ukrainian National Alliance in France, sided with the OUN(M) after 1940. The *Federation of Ukrainians in Great Britain was established in 1949 as a rival to the Association of Ukrainians in Great Britain. All these orga-

nizations belong to a co-ordinating body known as Ideologically Related Nationalist Organizations. The major OUN(M) publications have been **Ukrains'ke slovo* (Paris), **Samostiina Ukraïna* (Chicago), **Novyi shliakh* (Toronto), **Nash klych* (Buenos Aires), and **Khlitorob* (Curitiba). Since Melnyk's death in 1964 the OUN(M) has been led by O. *Shtul-Zhdanovych, D. *Kvitkovsky (1977–9), and M. *Plaviuk (since 1981). In the last two decades political groupings opposed to the OUN(B) have tended toward closer co-operation and consolidation and have formed broader associations, such as the *Ukrainian Democratic Alliance (1976) and the Conference of Ukrainian Political Parties and Organizations (1979).

Rivalry among the OUN factions has long divided and sapped the strength of émigré umbrella organizations. To accommodate the nationalist factions the *World Congress of Free Ukrainians has had to sacrifice the principle of majority vote and an efficient decision procedure. In 1980 the *Ukrainian Congress Committee of America was taken over by the OUN(B) and thus ceased to represent the Ukrainian community as a whole. The power and influence of the OUN factions have been declining steadily, because of assimilatory pressures, ideological incompatibility with the Western liberal-democratic ethos, and the increasing tendency of political groups in Ukraine to move away from integral *nationalism.

Organization of Ukrainian Socialists (Orhanizatsiia ukrainskykh sotsiialistiv, or OUS). An association of democratic socialists in the United States, established in 1950 by new émigrés who had an ideological affinity with the Ukrainian Socialist party. OUS co-operated with the

*Ukrainian Free Society of America (UFSA) and other organizations which supported the UNR government-in-exile. It also assisted the UFSA journal *Vil'na Ukraïna*. Among the main activists of OUS have been S. Ripetsky, V. Lysy, I. Palyvoda, Ya. Zozulia, V. Dibert, H. Nychka, M. Halii, and M. Kucher.

Organization of Ukrainian Women in Brazil (Orhanizatsiia ukrainskykh zhinok Braziliï). A women's civic society in Brazil. Women who had been active in the work of the *Union for Agricultural Education (KhOS) organized themselves in 1924 into women's sections of KhOS branches in Porto Union and Curitiba. Inspired by the example of the Union of Ukrainian Women in Galicia, they undertook cultural work, welfare activity, and Ukrainian Saturday school organization. After being closed down for several years in the 1940s by the Brazilian dictatorship, the group resumed activity. In 1948 they established a central organization which had four branches in 1952 when the organization became a charter member of the *World Federation of Ukrainian Women's Organizations. It also started publishing a page of organizational and other news in the KhOS newspaper, *Khliborob*. In 1959 the organization adopted its present name (while retaining the KhOS affiliation), and in 1964 it organized a 40th anniversary celebration of the Ukrainian women's movement in Brazil and published *Ukrains'ke zhinotstvo u Braziliï* (Ukrainian Women in Brazil). While maintaining its initial activities, the organization (450 members in 7 branches in 1987) recently has become particularly active in the promotion of Ukrainian folk arts. Presidents of the organization have included Z. Yashchynska, N. Felyk, O. Horachuk, T. Bashchyn, L. Yedyn, and O. Borushenko.

Organization of Ukrainian Youth in France (Orhanizatsiia ukrainskoi molodi u Frantsii; French: Jeunes Amis de l'Ukraine). An organization founded in 1956 through the efforts of the Ukrainian National Alliance in France and centered in Paris, it developed 10 branches. It runs Ukrainian courses, publishes the *Bulletin Franco-Ukrainien*, works with the Ukrainian National Union in France, and belongs to the Ukrainian Central Civic Committee in France. Its leading members have included V. Genyk, T. Horishny, K. Huzar-Uhryn, B. Kamianetsky, K. Lazovinska, A. Osnovych, O. Repetylo, and Kh. Sluzhyk.

Organization of Ukrainians of Revolutionary Democratic Convictions (Obiednannia ukrainsiv revoliutsiino-demokratychnykh perekonan). A social-political organization founded in the United States in 1950 with headquarters in New York. Its members were primarily émigrés from Soviet Ukraine. The organization was closely allied with the Ukrainian Revolutionary Democratic party and supported the Ukrainian National Council. Its founders and most prominent members included V. Hryshko, M. Stepanenko, and M. Voskobiinyk. The organization lapsed into inactivity in the 1980s.

Organized recruitment of workers (*organizovannyi nabor rabochikh* or *orgnabor*). A system of recruiting unskilled labor for industry, construction, transportation, and farming in the USSR. It was introduced by the decree On Migration of 30 June 1931 as a way of providing rapidly developing industry with labor from the collective farms. Industrial enterprises were authorized to conclude

manpower contracts with collective farms. For releasing their members for industrial employment collective farms received machines and special allocations of supplies from the state. The 'voluntary' recruits were rewarded with privileges for themselves and their families. Lacking any planning and central control, the system was inefficient and open to abuse. In 1938 special recruitment planning groups were set up in the Union, and republican state planning committees and commissions for organized recruitment were formed in the Union and republican economic councils to supervise the system. In 1953 the system was reorganized, and thereafter it was run by a hierarchy of chief administration for organized recruitment of labor attached to the Union and republican councils of ministers. The purpose of the system changed radically: instead of drafting labor from the farms into the urban centers, it resettled surplus urban labor from the western part of the USSR to the underdeveloped regions of the northern and eastern frontier. In 1957 the agencies running the system were renamed chief administrations for the resettlement and organized recruitment of labor. Although by law recruitment was to be voluntary, pressure and force were applied widely.

In the immediate postwar period some 50,000 workers annually were transferred to the Donets-Dnieper Industrial Region, and up to 10,000 families, mostly from Western Ukraine, were relocated in southern Ukraine under the organized recruitment system. In 1946–62 over 2.2 million workers were recruited in Ukraine, and 812,000 were placed in jobs outside their homeland. Of the 277,000 families resettled on collective and state farms, 88,000 were sent outside Ukraine. Massive propaganda for Ukrainian resettlement in the Far East was unsuccessful. By the mid-1960s the importance of the system in providing industrial labor had diminished greatly. It continued to supply seasonal labor, mostly to construction projects. In 1976–80 it placed only 100,000 workers in full-time jobs and 150,000 in seasonal jobs. Efforts to plan labor recruitment have not been successful.

B. Levytsky, B. Krawchenko

Oriekhov, Volodymyr [Orjexov], b 16 August 1904 in Kharkiv, d 17 November 1979 in Kiev. Architect. After graduating from the Kharkiv Art Institute (1929) he worked in architectural agencies in Kiev and taught at the Kharkiv Institute of Communal Building Engineers (1934–41, 1943–5), the Kiev State Art Institute (1945–50), and the Kiev Civil-Engineering Institute (1954–64). He codesigned the Building of Oblast Organizations in Kharkiv (1949–54), the town center of Moryntsi, Cherkasy oblast (1963), the Museum of Folk Architecture and Folkways of Ukraine in Kiev (1970–1), and the left bank districts of Dniprodzerzhynske (1970–1).

Oriental studies (*orientalistyka*). The study of the languages, history, and culture of the peoples of the East (Asia and Africa). Knowledge of Oriental languages and countries was applied in the Princely era to establish close political, dynastic, economic, and military relations with the Altaic peoples – Turkic (*Khazars, *Torks, *Cumans), Hunno-Bulgars (*Huns, *Pechenegs, Danube and *Volga Bulgars), and *Mongols – as well as the *Iranian peoples

(Sogdians, *Alans, *Yasians), *Caucasian mountain peoples (Georgians and Cherkess), *Armenians, *Jews, and other peoples. Merchants from Rus' traveled to Baghdad, and pilgrims visited Palestine (Hegumen *Danylo). A school for translating ancient Hebrew was active in the 11th century in Kiev. Cossack diplomats, as well as some hetmans (B. Khmelnytsky), had a command of the Tatar (Turkic Mongolian) and Ottoman (Turkish) languages. Ukrainian and Armenian merchants spoke fluent Turkish. One such merchant was Yu. *Kulchytsky, who worked as a translator for the Eastern Company in Vienna. V. *Hryhorovych-Barsky was fluent in Arabic and traveled to many countries of the Near East. Ukrainian Orthodox metropolitans and bishops in Siberia studied the Turkic, Mongol, and Tunguz languages (F. Leshchynsky, I. Kulchytsky, and I. Nerunovych).

Formal academic Oriental studies were initiated at the Kharkiv College, where a large library on the subject was assembled. In 1804 a chair in Oriental studies (Hebrew and other Semitic studies) was established at Kharkiv University and headed briefly by Y. Barendt. In 1829–32 B. Dorn, an authority on Arab and Iranian studies, worked at Kharkiv University. The chair was closed in 1855, after the Russian Empire established an Oriental studies center in St Petersburg; it was re-established in 1870 as the chair of Indology and comparative linguistics. It was headed initially by the Czech professor V. Schertzl, who published a Sanskrit grammar in 1873, and then by the Scot E. Dillon (from 1874), D. *Ovsianiko-Kulikovsky (from 1889), and P. Ritter (from 1905).

Kiev became another center for Oriental studies in Ukraine. S. Todorsky, a professor at the Kievan Mohyla Academy in the 18th century, studied under the German Semitist J.-H. Michaelis. A. and O. Olesnytsky and V. *Rybnytsky taught Hebrew language and culture at the Kiev Theological Academy from 1819. Kiev University had a chair in Sanskrit and comparative *linguistics. F. Knauer established the Kiev school of Indology and published a textbook on Sanskrit and a book of Vedic ritual texts. Among his students were O. *Barannykov and M. *Kalynovych.

A chair of Sanskrit and comparative linguistics was also established at Odessa University, where Schertzl (1884–96) and Ovsianiko-Kulikovsky also worked. A number of articles on relations between Ukraine and the East appeared in the *Zapiski* of the *Odessa Society of History and Antiquities (1844–1919).

The first Ukrainian-language Oriental studies textbook was written by Lesia Ukrainka. It was titled *Starodavnia istoriia skhidnikh narodiv* (Ancient History of the Eastern Peoples); the manuscript (dated 1890) is preserved at the ANU Institute of Literature. It was published by her sister, O. Kosach-Kryvnyuk, in Katerynoslav in 1918, and a second edition was published the same year.

In Western Ukraine Hebrew studies were established at Lviv University in the faculties of theology and of comparative linguistics in the late 19th century. In 1903 the biblical scholar T. *Myshkovsky taught there. In 1920–39 Polish Oriental studies were centered at the departments of Near and Far Eastern studies and Indology at Lviv University. Among the specialists working there were W. Kotwicz (Altaic and Mongol studies), J. Kuryłowicz (Iranian studies), A. Gawroński (Sanskrit), and S. Stasiak (Indology). The Polish Oriental Studies Society in Lviv (1922–39) published the journal *Rocznik Orientalistyczny*. In 1939–41

there was a chair of Indology at Lviv University, with Stasiak as director and Ye. Zavalynsky and V. Shaian as lecturers. Oriental studies in Lviv came to a halt after Kuryłowicz emigrated to Poland in 1946, except that M. Knorozov provided language instruction in Chinese and Sanskrit.

In 1918 the Near Eastern Institute was established in Kiev to train diplomats and trade officials of the Ukrainian state. Its directors were Ye. *Stashevsky and I. Babat. It was incorporated into the Institute of Foreign Affairs of the Ukrainian SSR in 1920.

A. *Krymsky and O. *Lazarevsky initiated the wider development of Oriental studies in Ukraine in 1920, particularly at the Chair of Arabic and Iranian Philology, the Turkic Studies Commission, and the Jewish Historical and Archeographic Commission of the VUAN Department of History and Philology. Krymsky's coworkers included I. Galant, T. Grunin (who published the first Turkic grammar in Ukrainian and studied the Cuman dialect of Armenians in Ukraine), V. Ivanytsky, T. Kezma (an Arab), and P. Lozeev. In 1931–2 all those institutions were liquidated, and many scholars were imprisoned or exiled. Krymsky was forbidden to publish his prepared monographs, among them *Istoriia khozariv* (History of the Khazars) and *Istoriia novo-arabs'koi literatury* (History of Modern Arabic Literature). He was partially rehabilitated in 1939 and allowed to teach graduate students, including O. *Pritsak (Turkic and Islamic studies), A. Robinson (Semitic studies), and G. Egris (Yakutian studies).

In 1924 a group of former students of the Near Eastern Institute (I. Falkovych, L. Levytsky, L. Velychko) formed the Seminar in Near Eastern Studies. In 1925 the seminar was combined with others conducted at the Kiev Institute of the National Economy and the Kiev Eastern Peoples' House to form the All-Ukrainian Center for Scientific Eastern Studies. In 1926 the center was joined with the Eastern Studies group of the Kharkiv Scientific Society (P. Ritter, A. Kovalivsky, P. Tychyna) to form the *All-Ukrainian Learned Association of Oriental Studies (VUNAS). By 1929 it had 193 full members (83 in Kiev, 60 in Kharkiv, and 50 in Odessa) and 158 supporting members. O. *Shlikhter was the president, with O. Hladstern (a specialist in Turkish law) and L. Velychko (Turkish economy) as deputies and L. Levytsky (natural resources) as scholarly secretary. Many researchers in Ukraine and the diaspora contributed to the association's work, including Turkic specialists O. Samoilovych (in Leningrad) and V. *Dubrovsky, the Iranologists M. Kostiantynopolsky and M. Levchenko, the Indologist O. Barannykov, and the Japanese specialist F. Pushchenko. Other collaborators included V. *Levytsky and Ye. Berliand (economy), V. *Buzeskul, M. *Horban, B. Kurts, O. Ohloblyn, V. *Parkhomenko, F. Petrun, and I. Tryhubov (history), and O. Fedorovsky, D. Hordiiv, T. Ivanovska, and V. Zummer (art history).

In 1926 VUNAS organized state courses in Oriental studies, with three departments in Kharkiv (Persian, Turkish, and Japanese; directed by P. Ritter), and three in Kiev (Arabic, Persian, and Turkish; directed by P. Lozeev). In 1930 the courses were reorganized into the Ukrainian Scientific Research Institute of Eastern Studies, under the deputy people's commissar of education of the Ukrainian SSR, A. Polotsky.

In 1927–8, VUNAS organized two All-Ukrainian Eastern Studies congresses in Kharkiv, in which scholars from

Turkey and Persia participated, and sent representatives to the 17th International Congress of Orientalists at Oxford and to Turkey. In 1929 it worked with the dean of Istanbul University to establish commissions on Ukrainian-Turkish relations.

VUNAS published *Biuletyn' VUNAS* (5 issues, 1926–8) and *Skhidnyi svit* (17 issues, 1927–31). It also prepared dictionaries for publication, including Azerbaidzhani-Ukrainian (ed V. Dubrovsky), Armenian-Ukrainian (ed P. Tychyna), and Georgian-Ukrainian (ed G. *Namoradze) dictionaries. In 1933 VUNAS and all of its affiliates were liquidated, and the dictionaries were never published. A textbook in Osman paleography prepared by O. Dubrovsky was also destroyed. The development of Oriental studies in Ukraine was repressed until the end of the 1960s, and apart from lectures on certain Eastern languages, there were no active chairs in Eastern studies.

The leading Ukrainian Orientalist at that time, A. Kovalivsky, returned from exile in 1944 and assumed the directorship of a chair of medieval history at Kharkiv University. He attracted a new generation of Oriental scholars, including A. Alekberli (Turkish history), S. Averbukh (ancient Eastern history), V. Badian (Indonesian studies), Yu. Lytvynenko (Indian history), Ya. Pobilenky (Japanese studies), H. Pohosivna Pinhirian (Armenian history), N. Rashba (Turkish history), B. Shramko (the archeology of Central Asia and China), V. Tychyna-Berest (the Ossetian and Armenian languages), and B. Vetrov (Chinese history). He also published an annotated Russian edition of A. *Ibn-Fadlān's works (1956) and *Antolohiia literatury Skhodu* (Anthology of Eastern Literatures, 1961). Oriental studies as a discipline was completely neglected by the AN URSR. The Department of Foreign Eastern Countries at its Institute of History (1964) was short-lived.

Individual scholars included Ya. Dashkevych (Armenian history and culture), I. Chernykov (Turkey), I. Chyrko (Chinese and Japanese literature), and Yu. Kochubei (Arabic literature), a member of the diplomatic corps. F. Danylenko (Sinology) and B. Vobly (Japanese studies) studied at the Oriental Institute in Vladivostok (est 1899). D. Varchenko (Sinology) studied at the Oriental Institute in Harbin, as did A. Dibrova (Japanese studies) and V. Odynets, who later taught Eastern European history at the university in Hsinking (capital of Manchukuo). S. *Levynsky, a writer and Japanese scholar, lived in Peking in 1935–46. In 1936 an anthology of Japanese and Chinese works in Ukrainian translation, *Dalekyi Skhid* (Far East), was published in Harbin. A. Dibrova and V. Odynets published the *Ukrains'ko-nipons'kyi slovnyk* (Ukrainian-Japanese Dictionary, 1944). A Ukrainian-Chinese dictionary was compiled by the Lexicography Institute of Heilongjiang University and published in Peking in 1990.

Ukrainian émigrés in Oriental studies include O. Baranovych (Indologist), O. Samoilovych (Turkish studies), S. Rudenko (Scythian and Hun burial grounds in Asia, the ethnographic study of Bashkiria), L. Symonivska (Chinese history), M. Fedorenko (diplomat; Chinese literary history), P. Topekha (Japanese history), V. Fylonenko (Turkish studies; in Piatagorsk), and A. Stanyshesky (a student of Krymsky; in Tashkent). D. *Doroshenko coauthored studies on Ukrainian relations with Turkey and Tatar Crimea with J. Rypka (published in 1933 and 1936). At Warsaw University D. *Valedinsky studied biblical and Christian archeology, and I. Ohienko translated the Bible from ancient Hebrew. In 1946–51 a Commission for Eastern Stud-

ies was active at the Ukrainian Academy of Arts and Sciences in Augsburg. Its members included two former members of VUNAS, V. *Derzhavyn (who studied ancient Egypt and Africa) and V. Dubrovsky (Crimean history), as well as P. *Kuriny (Eastern archeology), O. Pritsak (Turkish studies), and Marko *Antonovych (ancient Eastern history). M. Brynovsky (Turkic studies and Tatar languages) worked at Berlin University until 1945. In the United States, J. Stetkevych has worked at the University of Chicago (since 1962) as a specialist in Arabic literature, and O. Pritsak worked at Harvard University (from 1964 to 1989) as a specialist in Altaic and Turkic studies and Eurasian history. Pritsak was put in charge of the ANU Institute of Eastern Studies established in Kiev in 1991.

In the 1970s and 1980s a few North American Orientalists of Ukrainian origin completed their PhDs at Harvard University. They include R. Holod, an Islamic art historian now at the University of Pennsylvania; M. Subtelny, a specialist in medieval Iran and Central Asia, who has taught at the University of Toronto since 1984; and the Ottoman historians L. Hajda and V. Ostapchuk at Harvard.

Ukrainian translations of Eastern literary works influenced the development of Ukrainian Oriental studies. P. Hrabovsky translated poetry from Armenian and Georgian. Krymsky's translations of works from the classical canon of Near Eastern literature were published in his collections *Pal'move hilia* (Palm Fronds, 3 vols, 1901–22). Ritter and Barannykov translated modern Indian literature. H. Khotkevych made translations from Sanskrit. In the 1920s the number of translations of Eastern works increased substantially, particularly from the Semitic, Iranian, Caucasian, Turkic, and Far Eastern languages. Some of them were published, but most were not because of the wave of repressions in the 1930s. After the death of J. Stalin Ukrainian translations of Armenian, Chinese, Japanese, Jewish, Hungarian, Georgian, Kirghiz, Ossetian, Tatar, and Uzbek works began to be published again. The most notable postwar translators have been M. *Lukash (18 Western and Eastern languages), I. Chyrko (Chinese and Japanese), and M. *Bazhan (Georgian). Emigré translators in the field have included L. Holubnycha (Chinese), V. Shaian (Sanskrit and other Indian languages), and Ye. Zavalynsky (Turkic).

Orikhiv [Orixiv]. VI-16. A city (1990 pop 21,200) on the Konka River and a raion center in Zaporizhia oblast. It sprang up ca 1783 and attained city status in 1938. The city produces clothes, machinery, and building materials. It has a regional museum.

Orikhove Lake [Orixove]. II-5. A lake located in the northern part of Volhynia oblast. It has an area of 5.5 sq km, a length of 3.9 km, a width of 2.1 km, and a depth of up to 3.6 km. The lake is fed by rain and meltwater and is surrounded by bogs and marshes. It supports fishing.

Orkan, Władysław (pseud of Franciszek Smreczyński; other pseud: Smaczarz), b 27 November 1875 in Poręba Wielka, Poland, d 4 May 1930 in Cracow. Polish writer; member of the Polish modernist group *Młoda Polska*. Orkan wrote stories capturing the life of poor mountain folk in a naturalistic manner. He befriended the Ukrainian writers B. *Lepky and V. *Stefanyk and was instrumental in furthering good relations between Ukrainian and Polish writers. Together with Lepky and V. Yarosh he translated Ukrainian prose into Polish and published it in a collection entitled *Młoda Ukraina* (Young Ukraine, 1908). He helped to publish and wrote the introductions to an anthology of Ukrainian poetry translated into Polish by S. Tverdokhib, *Antologia współczesnych poetów ukraińskich* (An Anthology of Contemporary Ukrainian Poets, 1911), and M. Yatskiv's collection of short stories, *Wieczorne psoty* (Evening Pranks, 1910). Some of his works were also translated into Ukrainian. H. Verves wrote a monograph on Orkan, *Vladyslav Orkan i ukraiń'ska literatura* (Władysław Orkan and Ukrainian Literature, 1962).

Orlai, Ivan [Orlaj], b 1770 in Palad, Transcarpathia, d 11 March 1829 in Odessa. Medical scholar and educator. He studied in Lviv, Budapest, and Vienna, graduated from the St Petersburg Medico-Surgical Academy (1793), and then practiced medicine, served as scientific secretary of the academy (1808–17), and helped edit its *Pharmacopea castrensis Ruthenica*. He directed the Bezborodko (*Nizhen) Lyceum (1821–6) and the *Richelieu Lyceum (1826–9). A man of the Enlightenment, he believed in education as the key to social and moral progress and advocated a unified system of general education for all the estates in Russia. His biography, by T. Baitsura, was published in 1977.

Orlenko, Leonid, b 2 May 1925 in Tarasivka, Zaporizhia okruha. Muralist and mosaicist. He graduated from the Leningrad Higher Applied Arts School (1958). While living in Zaporizhia he painted the murals in the vestibule of the Pioneer Palace (1959), collaborated on the mosaic panel *Radioelectronics in the Service of Man* at the Radio Tekhnikum (1965), created three mosaic panels at the Regional Museum, and did the triptych *Union of Workers and Peasants* (1970) and the copper relief *Steelworker's Family* (1979).

Orlenko, Roman (né Prokopovych), b 11 October 1883 in Chyzykiv, Lviv county, Galicia, d 24 July 1962 in Lviv. Opera singer (bass-baritone) and educator. After graduating from Vienna University in 1907, he sang as soloist with the Vienna Opera 1907–15, the Ostrava Opera (1915–16), and the Ukrainka Besida Theater in Lviv (1918–20). After the war he taught at the Lysenko Higher Institute of Music (1920–5), gymnasiums in Lviv (1925–38), and the Lviv Conservatory (1939–48). His main roles included the Sultan in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, Taras in M. Lysenko's *Taras Bulba*, the Demon in A. Rubinstein's *Demon*, and Wotan in R. Wagner's *Rhinegold* and *Valkyrie*.

Orlivka hoard. A cache of ancient Greek coins found in 1967 in Orlivka, Reni raion, Odessa oblast. The coins, made from a silver-gold blend, were minted in Cyzicus, a Greek trading center on the Sea of Marmara. They date

from approx 500–330 BC and were probably hidden around the latter date by a person anxious about the turbulent military situation in Greece and the Pontic steppe. Forty-four types of coins were found, including two previously not known. They were hidden in a bronze vessel dated to the 5th century BC. The collection is now housed in the Odessa Archeological Museum.

Orlivna, Halyna, b 1895 in Lubni, Poltava gubernia, d 1955. Writer and actress; wife of K. *Polishchuk. In 1918–19 she acted with Molodyi Teatr. Her first collections of short stories, *Shliakhom chuttia* (The Path of Feeling, 1921) and *Pered bramoju* (Before the Gate, 1922), were published in Galicia. In 1925 she returned to the Ukrainian SSR, where she published her work in the journals *Chervonyi shliakh*, *Zhyttia i revoliutsiia*, *Hlobus*, and *Vsesvit* and was a member of the literary organization *Pluh. Her work was also published separately in Kharkiv, including the collection of novelettes *Emigranty* (The Emigrants, 1929) and the collections of short stories *Babs'kyi bunt* (The Women's Revolt, 1930) and *Zhaha* (Yearning, 1930). From 1931 Orlivna lived in exile in Kazakhstan. The circumstances of her death are unknown.

Aleksandr Orlov

Orlov, Aleksandr (Oleksandr), b 6 April 1880 in Smolensk, Russia, d 28 January 1954 in Moscow. Astronomer; full member of the AN URSS (now ANU) from 1939 and corresponding member of the Academy of Sciences of the USSR from 1927. A graduate of St Petersburg University, he served as director of the *Odessa Astronomical Observatory (1912–24), the *Poltava Gravimetric Observatory (1926–34, 1938–51), and the Main *Astronomical Observatory of the ANU near Kiev (1944–8, 1950–1). He made important scientific contributions in the areas of theoretical astronomy, the study of comets, geodesy, seismometry, and the study of the migration of magnetic poles, and directed wide-ranging gravimetric studies of Ukraine.

Orlov, Georgii, b 8 April 1901 in Kursk, Russia, d 16 April 1985 in Moscow. Russian architect; full member of the USSR Academy of Arts from 1979. A graduate of the Moscow Higher Technical School (1926), he taught at the Moscow Architectural Institute for many years (1933–8, 1966–70). In 1972 he was elected president of the International Association of Architects. Orlov helped to design and build the Dnieper (1927–32), Kakhivka (1951–4), and Kremenchuk hydroelectric stations as well as residential

districts (1930–6, 1938), a summer theater (1938), and residential apartments and cottages (1947–8) in Zaporizhia. After the Second World War he was in charge of the reconstruction of the Dnieper Hydroelectric Station (1944–52).

Orlov, Mykhailo, b 7 January 1900 in Kiev, d 17 October 1936 in Kiev. Mathematician; corresponding member of the VUAN from 1934. A graduate of the Kiev Institute of People's Education, he served as director of the Scientific Research Institute of Mathematics in 1931–4. In 1934–6 he was a professor at Kiev University. His major scholarly contributions were in the areas of equilibrium shapes of rotating fluids and approximate methods in the solution of differential and integral equations.

Orlov, Oleksander, b 1899, d 1960. Geographer; member of the Shevchenko Scientific Society. He was a specialist in geology and mineralogy. He taught in Prague at the Ukrainian Free University (1921–45) and at Charles University (1926–45). His main scholarly interest was the petrography of Czechoslovakia. He was also a contributor to the *Ukrains'ka zahal'na entsyklopediia* (The Ukrainian General Encyclopedia, 1935).

Orlov, Yakiv, b 17 May 1923 in Ternuvatka, Kryvyi Rih okruha, d 26 February 1981 in Kiev. Conductor. After graduating from the Kiev Conservatory in 1954, he directed and conducted the orchestra of the Verovka State Chorus (1955–67) and the orchestra of the army ensemble (1967–9). He established (1970) and then directed and conducted the Kiev Orchestra of Folk Instruments. In 1980–1 he lectured at the music education faculty of the Kiev Pedagogical Institute.

Orlovsky, Mykhailo [Orlovs'kyj, Myxajlo], b 1873, d February 1918 in Kiev. Physician and civic leader. During the revival of Ukrainian independence he served as a military sanitation inspector and was executed by the Bolsheviks.

Orlovsky, Mykola [Orlovs'kyj], b 15 May 1900 in Shapovalivka, Borzna county, Chernihiv gubernia, d 21 February 1974 in Kiev. Agriculturist. A graduate of the Kiev Institute of Agronomy (1924), he taught at the Kiev Agricultural Institute (1930–41) and worked at the All-Union Scientific Research Institute of Sugar Beets in Kiev. An expert in the selection of sugar beets, Orlovsky wrote *Osnovy biolohii tsukrovyykh buriakiv* (Principles of the Biology of Sugar Beets, 1937; 3rd edn 1961).

Orlovsky, Petro [Orlovs'kyj], b 1825, d 1913 in Kiev. Church historian and Orthodox priest. A graduate of the Kiev Theological Academy, he served as a priest in Warsaw and was later an archpriest at the St Sophia Cathedral in Kiev. His studies and documents of 17th- and 18th-century Ukrainian church history appeared in *Kievskaiia starina* (KS), *Trudy Kievskoi dukhovnoi akademii* (TKDA), and Kiev's *Eparkhial'nyia vedomosti*. They include articles in KS on Archbishop V. Sadkovsky (1897, no. 7) and the plague epidemic in Kiev in 1770–1 (1897, no. 6), and in TKDA on the participation of the Zaporozhian Cossacks in the creation of an Orthodox hierarchy in Ukraine by Patriarch Theophanes of Jerusalem in 1620 (1905), the Kiev synod

of 1629 (1905), and a legend about Metropolitan R. Zaborovsky (1908).

Volodymyr Orlovsky: *Village* (1879)

Orlovsky, Volodymyr [Orlovs'kyj], b 1 February 1842 in Kiev, d 19 February 1914 in Nervi, Italy. Landscape and genre painter. He studied under I. Soshenko in Kiev (1855–60) and on T. Shevchenko's recommendation was admitted to the St Petersburg Academy of Arts (1861–8). In 1869–72 he lived and painted in France, Italy, Switzerland, and Germany. He became a member of the academy in St Petersburg in 1874 and a professor there in 1878. In 1886 he returned to Ukraine, where he taught at the *Kiev Drawing School and helped found the Kiev Art School. As Orlovsky gradually freed himself from *academism, his works acquired a more natural composition, more confident lines, and a finer coloration. His famous depictions of the Ukrainian and Crimean countryside include *In Alush-ta* (1870), *In the Steppe* (1874), *The Sowing* (1874), *Hay Gathering* (1878), *Peasant Houses on a Summer Day* (late 1870s), *Village* (1879), *Harvest* (1882), *Birch Grove* (1884, 1886), *Sudak Coast* (1889), and *Haven* (1890). In the 1900s he painted seascapes almost exclusively. An album of his works was published in Kiev in 1968.

Orly Catholic Association of Ukrainian Youth (Katolytska asotsiatsiia ukrainskoi molodi 'Orly'). A Catholic youth association (whose name means 'eagles') that was active in 1933–9 in the Lviv archeparchy. Established in the wake of the 1933 Ukrainian Youth for Christ festival, the group functioned under the direct auspices of the Lviv archeparchy until 1937, when it was established as a separate entity. Centered in Lviv, Orly was headed by A. Melnyk in 1933–8 and then by V. Hlibovytsky. It had nearly 450 men's and women's branches with a combined membership of approx 30,000. Before 1937 the women's groups were separately organized and headed by K. Yanovych. The group resembled the Plast scouting organization in several ways and included beginner, junior, youth, and senior levels in its structure. It sponsored summer camps and published the monthly *Ukrains'ke iunatstvo*, which had a supplement called *Hotovs'* that provided activity materials for small groups.

Orlyhora, Lev. See Sylenko, Lev.

Orlyk, Hryhor (Hryhorii), b 16 November 1702 in Baturyn, Nizhen regiment, d 14 November 1759 near Minden, Germany. Political leader and French diplomat, count, and general; eldest son of Hetman P. *Orlyk and godson of Hetman I. Mazepa. Orlyk emigrated from Ukraine with his parents in 1709, studied at Lund University in Sweden (1716–18), and served as an officer in the Swedish (1715–16, 1718–20), Saxon (1721–6), and Polish (1726–9) armies before entering the French diplomatic corps in 1730. He became a mobile and effective representative of his father's interests and 'the cause of Cossack liberties' in royal courts throughout Europe, from Stockholm to Istanbul and from Paris to Bakhchesarai. In 1732 and 1734 the French government sent him on secret missions to convince the Crimean khan Kaplan-Girei to support the Cossacks against Russia. In 1733 he helped *Stanislaus I Leszczyński to get back to Poland and regain the throne. In 1734 he went on a secret mission to the Hetman state, where he deliberated in Nizhen with members of the Cossack *starshyna* opposed to Russian rule.

Orlyk was particularly active as a diplomat during the Russo-Turkish (1735–9) and Russo-Swedish (1741) wars, during which he sent many memorandums to the French and Swedish governments warning of the dangers of Russian expansionism and stressing that only Ukraine's liberation could halt it and ensure stability in Europe. He drew up a proposal for an anti-Russian coalition consisting of France, Sweden, Prussia, Poland, the Ottoman Empire, the Crimean Khanate, and the Zaporozhian Host. He passed on documents about Ukraine, obtained from his father, to Voltaire, who used them in *L'Histoire de Charles XII* (1731), where he writes that 'Ukraine a toujours aspiré à être libre.' Orlyk was the leader of the Ukrainian émigré community after his father's death. He was appointed a French general in 1748 and a count and member of Louis XV's privy council in 1750. In April 1759, during the Seven Years' War, he was severely wounded in the Battle of Bergen, and later died of complications.

T. Mackiw

Orlyk, Pylyp, b 11 October 1672 in Kosuta, Ashmiany county, Wilno (Vilnius) voivodeship, Lithuania, d 26 May 1742 in Iași, Moldavia. Cossack statesman and hetman-in-exile. A nobleman of Bohemian ancestry, he studied at the Jesuit college in Vilnius and until 1694 at the Kievan Mohyla College. In 1698 he was appointed secretary of the consistory of Kiev metropolity. In 1699, after marrying Anna, the daughter of Col P. Hertsyk of Poltava regiment, he became a senior member of the Hetman state's General Military Chancellery. In 1706 Hetman I. Mazepa appointed Orlyk general chancellor. In that capacity he was Mazepa's closest aide, facilitated Mazepa's secret correspondence with the Poles and Swedes, and assisted

Mazepa in his efforts to form an anti-Russian coalition in Eastern Europe. After the defeat at the Battle of *Poltava in June 1709, Orlyk fled abroad with Mazepa and became a leader of the first Ukrainian political emigration.

After Mazepa's death, on 16 April 1710, Orlyk was elected hetman, with the backing of Charles XII of Sweden, in Bendery. The chief author of the Constitution of *Bendery, he pursued policies aimed at liberating Ukraine from Russian rule. He gained the support of the Zaporozhian Host, concluded a treaty with Charles XII in May 1710, and sought to make the Ukrainian question a matter of international concern by continuing Mazepa's attempts at establishing an anti-Russian coalition. Orlyk signed a treaty with the Crimean khan Devlet-Girei in February 1711, negotiated with the Ottoman Porte, which formally recognized his authority over Right-Bank Ukraine and the Zaporizhia in 1712, conducted talks with the Don Cossack participants in the Bulavin revolt who had fled to the Kuban, and even contacted the Kazan Tatars and the Bashkirs. In 1711–14 he led Cossack campaigns against the Russians in Right-Bank Ukraine. Despite initial victories they ultimately failed, because of Turkish vacillation and because of the pillaging, raping, and taking of many civilian captives by Orlyk's Crimean Tatar allies resulted in the loss of public and military support on the Right Bank.

Orlyk and a part of his general officer staff emigrated in 1714 to Sweden, in 1720 to Silesia, and in 1721 to Poland. From 1722 until his death he was interned in Turkish-controlled territories – in Salonika until 1734, then in the Budzhak, and finally in Moldavia. During that period Orlyk sought, in vain, the support of Sweden, Poland, Saxony, Great Britain, Hannover, Holstein, the Vatican, and, through his son, H. *Orlyk, France. He also continued trying to organize, without success, a personal army and to incite the Zaporozhian Host to rise against Russian rule.

Orlyk wrote verses in Latin, the panegyrics *Alcides Rossyjski* (The Russian Alcides [Heracles], 1695) to Mazepa and *Hippomenes Sarmacki* (The Sarmatian Hippomenes, 1698) to Col I. Obidovsky, the political treatise 'Vyvid prav Ukrainy' (Devolution of Ukraine's Rights, 1712), a manifesto to European governments justifying his alliance with the Porte (1712), and numerous memorandums to European rulers and government leaders. His diary of 1720–32 (5 vols) is preserved at the Archives of the Ministry of Foreign Affairs in Paris.

T. Mackiw

Archbishop Stepan Orlyk

Orlyk, Stepan, b 9 January 1891 in Volhynia, d ca 1939 in Zhytomyr. Archbishop of the *Ukrainian Autocephalous Orthodox church (UAOC). He graduated from the theological academy in Paris, and was ordained in 1916 in Volhynia. He served as a priest in Tbilisi, Georgia (1917–21). He returned to Ukraine and was active in the rebirth of the Ukrainian church. At the first sobor of the UAOC (October 1921) he was consecrated bishop and appointed archbishop of Volhynia okruha (1921–3), with his see in Zhytomyr. Orlyk organized nearly 50 parishes of the UAOC in the region and then was appointed to Berdychiv okruha (Berdychiv and Shepetivka, 1925–7). In the course of his work he continually battled the Soviet regime and the clergy of the Moscow patriarchate. In 1927 the authorities demanded that he be removed, and in 1928 he was arrested and exiled for 10 years to the Solovets Islands. After completing his sentence he returned to Zhytomyr, where he was once again arrested. He became blind from maltreatment, and eventually died in prison in Zhytomyr.

Orlyk. A monthly journal of cultural and community affairs published in the displaced persons' camp in Berchtesgaden, Germany, from June 1946 to March 1948 (a total of 22 issues). One of only 10 Ukrainian periodicals granted licenses by the US military authorities, it was edited by T. Lapychak.

Ornament. A decorative design, which is usually symmetrical and rhythmical. It is based on a developed semantic system derived from the repetition of symbols or signs with or without a compositional center.

In Ukraine the oldest examples of ornament are found on Paleolithic bracelets and other artifacts made of mammoth bones discovered at the Mizyn archeological site in the Chernihiv region. Extant Neolithic artifacts reveal a greater variety of geometric ornament. The use of parallel and intersecting lines, spirals, waves, triangles, and comb shapes was characteristic of the Linear Spiral-Meander Pottery, Boh-Dniester, Dnieper-Donets, and Surskyi-Dnieper cultures. The creation of the last remaining principal elements of geometric ornament was attained in the Aeneolithic period, particularly by inhabitants of the Trypilian culture, who used zoo- and anthropomorphic motifs. Ancient ritual ornament was based on a series of geometric archetypes and generalized, stylized, or fragmentary depictions of flora and fauna. Generally they ex-

pressed the conceptualization of cosmic phenomena and concretized ritual semantic signs.

Isomorphic motifs became widespread during the Bronze and Iron ages in the ornament of the Scythians and Sarmatians and the Hellenic states on the northern Black Sea coast. The Greek artisans of the coastal colonies ornamented their creations in the style of their own metropolis but adapted them to indigenous tastes, and Scythian craftsmen borrowed Greek motifs in addition to making objects that were typical of their culture.

In Kievan Rus' the manuscripts, architecture, and implements produced for the higher classes were ornamented with Byzantine motifs and sophisticated drawings depicting mythical beasts (eg, griffins, centaurs, sirens, mermaids) and monograms of Jesus Christ. Ukrainian artisans of the late Middle Ages and early modern times often used motifs borrowed from the widespread European Gothic, Renaissance, baroque, and classicist styles. The kilims and church vestments manufactured in 17th- and 18th-century Stanyslaviv, Korets, and Buchach were at times ornamented with Oriental (especially Persian) floral motifs. Peasant artisans also creatively adapted European styles. Renaissance floral patterns in backgrounds and borders in particular became popular. The influence of baroque ornament can be seen in the *Petrykivka murals, the luxuriant embroidery of the Poltava region, and the lush floral motifs on the Easter eggs of the Chernihiv region. Heraldic eagles and Empire vase shapes were among the most popular motifs used in the woven textiles and embroidery of Left-Bank Ukraine.

Until the end of the 19th century Ukrainian peasant ornament preserved ancient geometric motifs reflecting pre-Christian beliefs and their abstract-associative and logico-symbolic polysemantic imagery. A rhomboid, for example, could symbolize the sun, or a goddess, fertility, ripe grain, a sowed field, or marriage; rhomboid rows on opposite ends of an embroidered towel, the rising and setting sun; and a rosette of eight rhomboids, virginity.

Ukrainian folk ornament has traditionally been associated with sacral and ritual objects. Like other components of the national folkloric universe (fairy tales, legends, carols, ritual folk songs, historical songs, folk painting), it has served as an expression of the ontological origins of human life, the earth, and the universe and has retained vestiges of the belief in its protective functions.

The folkways and spiritual life of the Ukrainian peasantry, which were organically tied to natural cycles (seasons) and rites of passage (marriage, birth, death), were reflected not only in ornament in general but also in its technique and the materials used. Folk ornament has had regional and local traits, which have been manifested through the use of varied motifs, rhythms, and colors. Carpathian (particularly Hutsul) textiles, Easter eggs, and works in metal and wood, for example, have been characterized by their complex geometric, polychromatic designs and multiple local variants. Textiles and embroidery from Polisia have been characterized by their age-old use of red and white. In the Middle Dnieper Basin blue was used in embroidery until the late 19th century, when, because of the noticeable deterioration in the quality of blue dyes, it was replaced by black. Embroidery in the Poltava region has been characterized by white geometric ornament on white or gray in shirts and the use of soft, muted colors. From the Dnieper River to Podilia the contrasts in

polychromatic embroidery, textiles, Easter eggs, and porcelain have been progressively more pronounced. Yellows and, less often, green highlights appear in addition to the usual red-black harmonies. The range of colors is supplemented with browns and blues in Galicia and becomes most varied in Bukovyna. In the ornament of Bessarabia and Southern and Slobidska Ukraine, which were settled relatively late and not only by Ukrainians, a complex interaction of various ethnic influences can be observed.

In Ukrainian ornament there are forms that have been particular to a specific locality and others that have been more common and even universal, in both form and name. The most widespread are spiral 'ram's horns,' 'periwinkle' leaves, infinity circles, square 'windows,' crosses, crosslike 'windmills,' rhomboidal 'wafers' and 'loaves,' various 'branches' and 'combs' with parallel teeth, 'roses,' 'oak leaves,' zigzagging 'snakes,' 'grape clusters,' 'laurels,' centrifugal 'spiders,' eight-faceted 'stars,' 'teeth,' and 'wedges.'

The basic universal cosmological image in Ukrainian folk ornament has been the pre-Christian 'Tree of Life' or 'Tree of the World' found in ancient legends and medieval apocrypha. It includes solar signs and symbols of natural phenomena, animals, and birds that appear on Easter eggs, wagons, sleighs, embroidered towels, and pottery as ideograms of the creation and ordering of the world. These ideograms convey the spatial and temporal simultaneity of the union of humans and nature and nature and the cosmos. As a rule they constitute a tripartite, symmetrical composition consisting of the *vazon* (flower pot) motif and 'branches,' 'paws,' 'laurel,' and 'shamrock.' Although their various semantic meanings have been largely forgotten, their traditional significance has been preserved as an esthetic criterion in the world of folk culture.

One of the traits of Ukrainian folk ornament has been its conceptualization of motifs, even the most geometric or abstract ones, in terms of the plant world. There have been few animal or architectural motifs, which appear mainly as associative names rather than isomorphic elements.

In the early 20th century, eclecticism in folk ornament became more pronounced. The mass distribution of printed, stylized embroidery patterns squeezed out ancient local techniques and designs. Traditional motifs in engraving, ceramics, and metalwork were continued, however. Ornament became more detailed, and its rhythms became more frequent and more uniform. The use of multiple colors and tonal dispersion increased.

The gradual turn of Ukrainian folk artisans to the urban and foreign markets gave rise to the appearance of professional instructors who taught how to cater to consumer tastes. Thenceforth ornament has evolved not as a result of internal development but under pressure from external conditions. At times this state of affairs has produced the retrostylization of new works through the copying of museum artifacts, or, conversely, examples of 'folkloric moderne' or 'folkloric academism.'

In the 19th and 20th centuries the creators of folk art that has not been mass-produced introduced designs from published sources, isomorphic depictions, migrating motifs, and polychromatics in ornament. Efforts to revive ornament in the early 20th century were often accompanied by the mechanical magnification (infrequently, diminu-

tion) of the dimensions of elements and motifs. When such innovations have exhausted their variational possibilities or lost their attractiveness as novelty, interest in local classical ornament has been revived, and ancient models have been reproduced.

Ornowski, Jan (Ornovsky, Yan). A late 17th-century poet from Chernihiv. He is the author of panegyrics, written in Polish, to the Cossack *starshyna*: *Niebeski Merkurjusz* (Heavenly Mercury, 1686), *Muza Roxolańska o tryumfalnej stawie i fortunie hetmana Mazepy* (Roxolanian Muse on the Triumphal Fame and Fortune of Hetman [I.] Mazepa, 1688), *Bogata drogich kamieniy speza ...* (A Rich Expenditure of Precious Stones, 1693), *Apollo Sauromacki przy weselnym akcie ... Simeona Lizohuba ... z Iriną corą ... Iana Szkoropackiego ...* (Sauromatian Apollo at the Wedding Ceremony ... of Symon Lyzohub ... with Iryna, the Daughter ... of Ivan Skoropadsky, 1703), and *Bogaty wirydarz* (The Lush Viridarium, 1705).

Orobko, Vasyl, b 1882 in Bukovyna, d 1932. Senior officer of the Ukrainian Galician Army (UHA). He commanded the Chortkiv Military District and then, at the rank of major, the 14th Brigade (June–October 1919). In November 1919 he was reassigned to command the UHA collection point in Odessa.

Orovetsky, Pavlo [Orovec'kyj], b 17 March 1905 in Yelyzavetivka, Novomoskovske county, Katerynoslav gubernia, d 20 February 1976 in Kiev. Socialist-realist writer. From 1930 he wrote over 12 collections of literary sketches and the novels *Sertse soldata* (A Soldier's Heart, 1958), *Druha zustrich* (The Second Encounter, 1960), *Hlyboka rozvidka* (A Penetrating Investigation, 1963), *Rubinovyj promin* (The Ruby Ray, 1965), *Zahybel' Polozza* (Poloz's Demise, 1969), *Berehy zhyttia* (The Shores of Life, 1971), and *Partyzans'ka povist* (A Partisan's Tale, 1972).

Orphan's court (*syrytskyi sud*). A special court that appeared in the Russian Empire in 1775 to care for the orphans and widows of city residents (merchants, burghers, and tradesmen). In 1781 orphan's courts began to spread through the cities of Russian-ruled Ukraine. They appointed wards for orphans, reviewed the reports of trustees, and handled other legal and financial matters involving orphans and widows. In 1818 they became responsible for the survivors of nobles as well. Attached to *magistraty* and, after 1864, to circuit courts, the orphan's courts consisted of the head of the municipal council, two members of the *magistrat*, and a city starosta. They were abolished in 1917.

Ort (Ukrainian: *vurt, urt, vert*). A silver coin that was used in several European countries in the 16th to 18th centuries. The origin of the word is German. The coin was initially used to designate one-quarter of a larger denomination, usually a **taler*. The coins were used in Gdańsk from 1608. At that time a *taler* was worth 40 *groszy*, and an *ort* 10 *groszy*. Its value later increased to 16 and then 18 *groszy*. In

ORNAMENT 1) Late Paleolithic zigzag ornament in red ochre on a mammoth shoulder bone (excavated in Mizyn, Chernihiv oblast). 2) Polychromatic meander pattern on a clay vessel of the Trypillian culture (Historical Museum of Ukraine, Kiev). 3) Stylized deer on Scythian gold plaques (6th century BC; Museum of Historical Treasures of Ukraine, Kiev). 4) Geometric and floral motifs (11th century) of the mosaic in the central apse of the St Sophia Cathedral in Kiev. 5) Stylized bird on a pendant earring (gold and enamel, 12th- to 13th-century Kiev). 6) Vine and grape motifs on the Royal Gates (gilded wood, 17th century) in the village church of Voinyliv, near Kalush, Galicia. 7) Silver cup with filigree (18th-century Kiev). 8) Tree of Life on embroidered *rushnyk* (early 20th century) from the Kirovohrad region. 9) Flower and vase motifs embroidered with silk and metallic thread on linen (18th-century Slobidska Ukraine).

This page intentionally left blank

the 17th century an *ort* was worth 12 kopecks. The *ort* was coined in the Polish Commonwealth until 1766.

Orthodox Academy (Pravoslavna akademiia). A scholarly society of theology students at Chernivtsi University established in 1907. It published D. Yermiichuk's lectures *Pastyr's'ke bohoslav'ia* (Pastoral Theology, 1920) and the almanac *Nazustrich voli* (Welcoming Freedom, 1922). Its presidents were P. Kateryniuk, M. Kopachuk, H. Revutsky, I. Vynnytsky, and I. Tsurkan. At the end of 1923 the society was dissolved by the Rumanian authorities.

Orthography. The system of rules regulating the written and printed representation of the sounds of a language, the spelling of words, and punctuation. The basis of modern Ukrainian orthography is phonemic and morphemic, although some historical forms unrelated to its phonemic or morphemic structure have been retained.

The first orthography in Ukraine was the Cyrillic Old Church Slavonic (CS) orthography adopted along with the Christian faith in the 10th century. Some of its features (eg, the written representation of nasal vowels that no longer existed in Ukrainian speech) had only an etymological basis. As the Ukrainian language developed, its orthography increasingly diverged from its phonetics. In the late 14th century Patriarch Euthymius of Tirnovo (or Tŭrnovo, Bulgaria) introduced a far-reaching CS orthographic reform for all Orthodox Slavs, which restored archaic CS features such as nasal vowel letters (Ѣ and Ѧ instead of *u* and *ja*), the absence of intervocal iotization (eg, *dobraa*, *-roe*, *ruu* 'good'), the etymological spelling of Greek words (eg, *ahhlb* instead of *janhol* 'angel'), and under Serbian influence the use of *-b* instead of *-v* (eg, *vŭkb*, *aminb* 'age, amen'). The reform was disseminated by Bulgarian, Serbian, and Byzantine monks, monasteries in Bukovyna and Moldavia, and even Metropolitan Cyprian of Kiev. Different chanceries from the 14th to 18th centuries introduced their own orthographic peculiarities.

The orthographic norms in M. Smotrytsky's Slavonic grammar (1619) had a determining impact on the printing of chronicles. His rules (eg, on using *e* or *ie*, *o* or *ω*, *y* or *i*, *kh* or *g*) were retained with certain modifications in the 1648 and 1721 Moscow editions of his grammar and are observed in CS church books to this day. Reinforced by Russian etymological norms based on the 1708 **hrashdanka* script this historical orthography influenced the use and theoretical justification of etymological orthography in Ukraine (eg, the **maksymovychivka* script, which was widely used in 19th-century Galicia, and the **pankevychivka* script, which dominated in interwar Transcarpathia). Etymological orthography was imprecise (ie, it did not draw a clear line between the vernacular and CS, Old Ukrainian, and Russian) and difficult to master; hence, several attempts, based on the Serbian example, were made to devise a Ukrainian phonetic orthography. They included O. Pavlovsky's grammar (1818); P. Kulish's **kulishivka* script, which was used in populist publications in the 1860s and 1870s; M. Drahomanov's **drahomanivka* script, used in his émigré publications from 1877 and by his Galician supporters; and Ye. Zhelekhivsky's **zhelekhivka* script, used officially in Galicia from 1893. The struggle for a phonetic orthography was linked to the demand for a new vernacular-based (not an archaic book-based) literary language and had important political im-

plications. In the 1880s the *kulishivka* script was banned in Russian-ruled Ukraine, and a modified version of the Russian alphabet, the **yaryzhka* alphabet, was imposed on Ukrainians. During the liberal period 1905–14 most Ukrainian publications in this territory adopted the *kulishivka* script.

It was only after the February Revolution of 1917 that the second tsarist ban (1914) on the *kulishivka* was lifted, and a modern Ukrainian orthography was developed, based on it, the *zhelekhivka* script, and Ye. *Zhelekhivsky's and B. *Hrinchenko's dictionaries. Since 1918 many orthographic dictionaries and handbooks have been published (see *Lexicography). In January 1919 the Orthographic Commission of the UNR Ministry of Education introduced official orthographic rules. Under Soviet rule, similar rules were confirmed by the VUAN in 1920 and the People's Commissariat of Education in 1921. In 1925 a State Commission for the Regulation of Orthography was created. The commission's proposals and the orthographic differences that existed between Soviet (formerly Russian-ruled) Ukraine and Western (formerly Austrian-ruled) Ukraine were debated and resolved at an All-Ukrainian Orthographic Conference held from 26 May to 6 June 1927 in Kharkiv. The new, standardized orthography was adopted in September 1928 by the Council of People's Commissars, in 1929 by the Shevchenko Scientific Society in Lviv, and subsequently by Ukrainians outside Ukraine.

By 1930, however, the Stalinist regime began to modify this orthography. It restricted the use of *g* and *l'*, and in 1933 it banned entirely the use of *g*, *l'o*, *lja*, and *lju* in foreign names and loanwords. It introduced etymological spelling forms (eg, *-ia-* instead of *-ija-*) to align Ukrainian orthography with the Russian. The new, so-called Kiev orthography (published in 1936 and revised in 1945 and again in 1960) was not accepted by most Ukrainians in interwar Western Ukraine or in the West. In 1987 an Orthographic Commission was created at the AN URSR (now ANU) Institute of Linguistics to prepare a new, more contemporary official orthography. The 1990 orthography once again restored the letter *g* in a restricted number of words.

In Austrian-ruled Western Ukraine, attempts in the 19th century to introduce a Ukrainian orthography based on the Polish Latin alphabet by Polonophile circles in Podilia and Volhynia and Polish governing circles (see *Alphabet war) did not succeed. The Latin alphabet was used only by semiliterate peasants in Galicia, Podlachia, and the Kholm region and in popular publications for them. The Latin alphabet in printed Ukrainian was imposed by the governments of Rumania (in Bukovyna, Bessarabia, and Dobrudja), Hungary (in Transcarpathia to 1918), and Slovakia (in church publications in the Prešov region from the 1920s) and was widespread at one time among certain groups of immigrants from these regions in the United States.

O. Horbach

Orthopedics. A specialty of medicine that deals with the diseases of the skeletal system (bones and joints). The development of orthopedics in Ukraine began with the publication of Ye. Mukhin's *Perovyie nachala kostopravnoi nauki* (The First Beginnings of Bone-Healing Science, 1806). The first orthopedic school in Ukraine was founded by M. *Sytenko at the Medical-Mechanical Institute in Kharkiv (1907). Today it is the Scientific Research Institute of Orthopedics and Traumatology, where prostheses, artificial limbs, and orthopedic equipment are made and tested; there are similar institutes in Kiev and Donetsk. The journal *Ortopediia, traumatologiia i protezirovaniie* was published in Kharkiv (from 1926), and a collection with the same title (both in Russian) was published in Kiev (from 1971). Orthopedics and traumatology departments exist at all medical institutes, and orthopedic assistance is given at special treatment clinics throughout Ukraine. The Ukrainian Scientific Association of Orthopedists co-ordinates and aids its members in their work.

Ternovoi, K.; Shumada, I. *Razvoitie travmatologo-ortopedicheskoi nauki v USSR* (Kiev 1978)

Ortynsky, Ilarion [Ortyns'kyj] (Hiliarii), b 29 August 1907 in Sambir, Galicia, d 20 June 1974 in Oviedo, Spain. He graduated from the Cracow Mining Academy (1930) and worked in the petroleum industry in Iraq (until 1939) and for a French geological exploration company in the Algerian Sahara Desert (1947–65). In 1949 he discovered a new oil field in Mesuda. From 1967 he helped organize and taught at a mining school in Oviedo, Spain, under the auspices of UNESCO. He published scientific articles on the geology of the northern Sahara Desert.

Ortynsky, Liubomyr [Ortyns'kyj, Ljubomyr], b 7 June 1919 in Mykhailevychi, Drohobych county, Galicia, d 22 July 1961 in Hunter, New York. Military and political activist and journalist. While studying at Warsaw University he was active in the OUN and was arrested twice by the Polish authorities. During the Second World War he served in the Legion of Ukrainian Nationalists and the Division Galizien. He was in Munich after the war, and emigrated to the United States in 1956 and took up work at the Prolog Research Corporation. He contributed to *Svoboda*, *Suchasna Ukraïna*, and other publications and took a particular interest in Ukraine's role at the United Nations.

Liubomyr Ortynsky

Bishop Soter Ortynsky

From 1958 he was a member of the External Representation of the Ukrainian Supreme Liberation Council. He was a founder and president of the Brotherhood of Former Soldiers of the First Ukrainian Division of the UNA and coeditor of *Visti kombatanta*.

Ortynsky, Soter [Ortyns'kyj], b 26 January 1866 in Ortynychi, Sambir county, Galicia, d 24 March 1916 in Philadelphia. Ukrainian Catholic bishop and church leader. He entered the Basilian order in 1884 and studied at various Basilian schools before completing his THD in Cracow. He was ordained in 1891. On the recommendation of Metropolitan A. Sheptytsky, Pope Pius X appointed him bishop of all Greek Catholics in the United States in March 1907. He was officially consecrated and arrived in the United States in August 1907. He was the first Uniate bishop in the country, and his jurisdiction was initially limited: he was under the authority of the Roman Catholic hierarchy until 1913, when the Vatican issued a decree (confirmed by the pope in 1914) naming him full exarch, responsible directly to the pope and with his see in Philadelphia. Ortynsky presided over the rapid growth of the Greek Catholic church in the United States. He founded an orphanage in Philadelphia in 1911, introduced the Basilian order of nuns, organized night schools for deacons, and set up and headed a branch of the Prosvita society. He also founded several church organs, including *Eparkhiial'ni visty*, *Dushpastyr*, *Misionar*, and **Ameryka*. Ortynsky's attempts to extend his episcopal authority over almost all aspects of Ukrainian life in the United States often led to conflicts. His desire to assert church control over the *Ukrainian National Association led to a split in the organization; when his efforts failed, he established the rival *Providence Association of Ukrainian Catholics in America, in 1912. Ortynsky was the only Greek Catholic bishop to include under his jurisdiction Ukrainian (Ruthenian) immigrants from Transcarpathia; later they became the faithful of *Pittsburgh metropolity.

W. Lencyk

Oryszowski, Jan (Oryszewski), b ca 1535 in Oryshiv Liatskyi, Belz voivodeship, d 1605, most likely in Haisyn. Polish nobleman. One of the organizers of the *registered Cossacks, in 1578 he was appointed an aide to Prince *Michał Korybut Wiśniowiecki, the starosta of Cherkasy and Kaniv, and commander of a detachment of registered Cossacks. From 1580 to 1591 he served as hetman of the

Zaporozhian Host. He led a Cossack force during the Starodub campaign in the 1580 Muscovite-Polish War and against the Crimean Tatars in 1585. In 1581 a Cossack register was compiled under his supervision. He represented the Zaporozhian Host in the Polish Sejm of 1587 that elected King Sigismund III Vasa, and in 1600 he mediated in negotiations between Poland and the Cossacks. The chapter on the Cossacks in M. Bielski's chronicle of Poland (1597) is based on Orszowski's oral account.

Orzeszkowa, Eliza, b 6 June 1841 in Milkoushchizna, near Hrodna, Belarus, d 18 May 1910 in Hrodna. Polish writer and feminist. In her novels and stories she depicted the life of Belarusian peasants, the Polish gentry, and small-town Jews in western Belarus and of poor artisans and the intelligentsia in Warsaw. Her novels *Niziny* (Lowlands, 1885), *Dziurdziowie* (The Dziurdzes, 1888), and *Cham* (The Boor, 1888) dealt with the problems of the Ukrainian peasantry in western Polisia. She corresponded with I. Franko, and translated some of his, T. Shevchenko's, M. Vovchok's, and M. Starytsky's works into Polish. Her feminist publicism influenced N. *Kobrynska and U. *Kravchenko. Ukrainian translations of her selected works were published in 1930, 1950, 1952, 1956, and 1966.

Roman Orzhentsky

Mykhailo Osadchy

Orzhentsky, Roman [Orženc'kyj], b 28 February 1863 in Zhytomyr, Volhynia gubernia, d 24 May 1923 in Warsaw. Economist and statistician; full member of the VUAN from 1919. After graduating from Odessa University in 1887, he worked in various institutions in Odessa and in the Yaroslavl gubernia zemstvo. In 1919 he returned to Ukraine, where he was appointed to the VUAN chair of theoretical economics and then made head of its social-economic division (1921–2). Orzhentsky specialized in the theory of value and prices and was the first Ukrainian mathematical economist. As a representative of the psychological school of marginal utility theory, he defended the subjective theory of value and the feasibility of measuring and comparing consumer preferences. He consistently criticized K. Marx's labor theory of value. In his statistical works he developed a new method for measuring sets of multifaceted phenomena with the help of relative variables and probability. He also studied the movement of market prices in Kiev under conditions of monetary inflation. Orzhentsky's major works are

Poleznost' i tsena (Utility and Price, 1895), his master's dissertation on the concept of economic phenomenon (1903), *Politicheskaiia ekonomika* (Political Economy, 1909), *Svodnye priznaki* (Summary Indicators, 1910), a textbook in mathematical statistics (1914), and *Elementarnaia teoriia statisticheskikh velichin i vycheslenii* (An Elementary Theory of Statistical Magnitudes and Computations, 1921).

Orzhytsia [Oržycja]. IV-13. A town smt (1990 pop 4,200) on the Orzhytsia River and a raion center in Poltava oblast. It is first mentioned in historical documents in the 16th century. In 1648–58 Orzhytsia was a company center in Kropyvna regiment, and in 1659–1781, in Lubni regiment. Today it has a mixed-feed factory and a peat-processing plant.

Orzhytsia River [Oržycja]. A right-bank tributary of the Sula River. It is 117 km long and drains a basin area of 2,190 sq km (much of it swampy). Its waters are used for consumption and irrigation. Resorts are situated along the river's middle reaches.

Osada, Yakiv, b 30 September 1920 in Zhovta Rika, Verkhnodniprovsk county, Katerynoslav gubernia, d 3 November 1979 in Moscow. Scientist in the field of ferrous metallurgy. He graduated from the Dnipropetrovske Metallurgical Institute (1941). He worked in Magnitogorsk and Pervouralsk, and in Dnipropetrovske at the All-Union Scientific Research and Construction Technology Institute of the Pipe Industry (1944–62, from 1950 as director). From 1962 he held industrial management positions in the State Planning Committee of the Ukrainian SSR and the USSR Ministry of Ferrous Metallurgy. His scientific contributions were in the areas of pipe manufacturing and stress analysis in steel pipes.

Osadca, Apollinare. See Osadtsa, Apolinarii.

Osadchuk, Bohdan [Osadčuk] (pseud: O. Korab, Yu. Chornomorsky), b 1 August 1920 in Kolomyia, Galicia. Journalist and Sovietologist; member of the Shevchenko Scientific Society since 1985. Osadchuk studied at Berlin University (1941–5) and the Ukrainian Free University (UVU). He has been a regular contributor to several Ukrainian (eg, *Ukrains'ki visti*) and non-Ukrainian newspapers in Western Europe, including the German *Die Neue Zeitung* and *Der Tagesspiegel* and the Swiss *Die Neue Zürcher Zeitung*, for which paper he served for many years as East European expert. His articles on the USSR and its satellite states gained him a reputation as a leading analyst of developments there, particularly the Polish crises of the 1970s and 1980s. Since 1958 he has taught Eastern European modern history at the Free University of Berlin, where he became a professor and director of its Institute of East European Studies in 1978. Osadchuk has also taught at the UVU and served as its dean of law and social sciences (1983–5) and prorector (since 1985). He is the author of *Die Entwicklung der Kommunistischen Parteien Ostmitteleuropas* (1962) and coeditor of *Der Sowjet-Kommunismus* (1964).

Osadchy, Mykhailo [Osadčyj, Myxajlo], b 22 March 1936 in Kurmany, now in Nedryhailiv raion, Sumy oblast. Poet, prose writer, and dissident; honorary member of the Swiss section of the PEN International Association of Poets,

Playwrights, Editors, Essayists, and Novelists since 1979. He graduated with a degree in journalism from Lviv University (1958), where he taught (1960–5) and then completed postgraduate studies (1965). He became active in the Ukrainian *dissident movement in the mid-1960s. Osadchy was arrested in 1965 for anti-Soviet activity and sentenced in 1966 to two years' imprisonment. In 1972 he was arrested again and sentenced to seven years of strict-regime labor camp and three years of exile. He served his term in camps in the Mordovian ASSR and was exiled to the Komi ASSR. His first collection of poetry, *Misiachne pole* (The Moonlit Field, 1965), was published before his arrest. His works were subsequently proscribed in the Ukrainian SSR, but his account of life in Soviet prisons, *Bil'mo* (Cataract, 1971), was published in the West and was translated into English (1976), French, and German. Other collections of his poetry include *Quos ego* (1979) and *Skyts'kyi oltar* (The Scythian Altar, 1990).

Tykhon Osadchy

Osadchy, Tykhon [Osadčyj, Tyxon], b 30 June 1866 in Budyshche, Żvenyhorodka county, Kiev gubernia, d 24 December 1945. Economist, statistician, and co-operative leader. Before the Revolution of 1917 he worked as a statistician with the Kherson and Simbirsk zemstvos (1890–7), served as secretary of an agricultural society in Kiev (1897–1904), and then taught school in the Kiev and Chernihiv regions. He was also active in community affairs, in organizing credit unions and co-operatives and teaching farming techniques. After 1917 he was a member of the central committee of the Peasant Association, a delegate to the Central Rada, and one of the organizers of the Tsentral union of agricultural co-operatives. His economic works included detailed studies of agriculture of the Shchyrbanivska volost in Kherson gubernia and the publicistic *Ukrains'ke selianstvo ta ioho istorychna dolia* (The Ukrainian Peasantry and Its Historical Fate, 1912). Osadchy also wrote fiction idealizing the populist Ukrainian intelligentsia.

Osadtsa, Apolinarii [Osadca, Apolinarij] (Apollinare), b 12 November 1916 in Voloshchyna, Pidhaitsi county, Galicia. Architect and community figure. He studied at the Lviv Polytechnical Institute (1935–41) and worked as an architect in Lviv (to 1944) and New York City (from 1950). He designed many buildings in the United States, including Ukrainian Catholic churches in New York City, Astoria, Glen Spey (New York), and Passaic (New Jersey); the Sacred Heart Convent in Astoria; the Ukrainian Na-

St Volodymyr's Ukrainian Catholic Church in Glen Spey, New York (architect: Apolinarii Osadtsa)

tional Association building in Jersey City; the Ukrainian National Home and St Joseph's Roman Catholic Cathedral in Hartford, Connecticut; and numerous buildings at the University of Indiana in Bloomington. He has been active in various Ukrainian organizations, including the World Congress of Free Ukrainians, the Ukrainian Engineers' Society of America (vice-president), and the Dumka Chorus in New York (president, 1952–8).

Irma Osadtsa: *Talisman* (oil)

Osadtsa, Irma [Osadca], b 17 January 1949 in Erlangen, Germany. Painter of Ukrainian origin. Since 1950 she has lived in the United States, where she graduated from the Cleveland Institute of Art (1972) and the Yale University School of Art and Architecture (MFA, 1974). Since 1975 she has lived in Canada. She specializes in oil, acrylic, and watercolor abstract paintings. In the 1970s her compositions were marked by complex interlocking shapes of color. For the 'Talisman' series she borrowed from the rich symbolic vocabulary of the Ukrainian Easter egg. Solo exhibitions

of her work have been held at Yale University (1974), the Ukrainian Institute of Modern Art in Chicago (1975), and in New York (1981) and Toronto (1981, 1983).

Rev Mykhailo Osadtsa

Gen Oleksander Osetsky

Osadtsa, Mykhailo [Osadca, Myxajlo], b 1836, d 1865. Greek Catholic priest and philologist. He studied under F. Miklosich at Vienna University and taught religion at the Academic Gymnasium in Lviv. He wrote in the *etymological spelling a Ruthenian (ie, Ukrainian) grammar for secondary schools (1862; 2nd edn 1864; 3rd 'Russophile' edn 1876, ed O. Lepky and H. Onyshkevych) based on the Galician vernacular.

Osaul or **osavul** (aide-de-camp). A military and administrative official in the *Hetman state. The hetman usually appointed two *general osauls as his closest military aides. Each Cossack regiment had two osauls who oversaw all regimental military matters (except the artillery), such as training, armaments, and supplies. In peacetime they took part in the civil administration of the regiment's territory. Company osauls had the same responsibilities on the company level. There were also osauls with special functions, such as the osaul of the state's General Artillery, who assisted the *general quartermaster, and the osauls of mercenary infantry regiments and companies. The *starshyna* of the Zaporozhian Host also included an osaul. After the abolition of the Hetman state and the Zaporozhian Sich the osauls of the Cossack regiments incorporated into the Russian imperial army were equal in rank to infantry captains and cavalry troop commanders.

Oselivka archeological site. A multi-occupational Stone Age settlement located on the Dniester River near Oselivka, Kelmentsi raion, Chernivtsi oblast. Excavations in the 1920s by Rumanian archeologists and in 1966–8 uncovered two Paleolithic settlements and a single Mesolithic occupation. In all three strata a wide variety of animal bones (mammoth, horses, deer) and flint pieces were found.

Osetsky, Oleksander [Osec'kyj], b 24 June 1873 in Kremianets, Volhynia gubernia, d 26 February 1937 in Paris. Senior UNR Army officer. In the First World War he commanded a regiment in the Russian army and reached the rank of brigadier general. In 1917 he joined the UNR Army, and he served as corps commander in the Poltava region,

commander of the Railroad Guard Corps under the Hetman regime, and commander of the Kholm Group on the Polish front in 1919. He was briefly (December 1918–January 1919) UNR minister of defense, and then acting UNR Army otaman. In 1920 he headed a UNR military-diplomatic mission to Belgium.

Oshawa. A city (1986 pop 204,000) on Lake Ontario 52 km east of Toronto. In 1986 there were 4,000 residents of Ukrainian origin in Oshawa. General Motors Corp has been the major employer there since 1918. Ukrainians were attracted to Oshawa by jobs in the automobile industry. A Prosvita reading society was established on the initiative of Yu. Kalynka in 1917, and by 1921 it had bought its own hall. In 1934 the society was reorganized into a branch of the Ukrainian National Federation (UNF). In the following year two affiliates of the federation were formed, the Ukrainian National Youth Federation, which set up a flying school (1937–9), and the Ukrainian Women's Organization. The UNF is still active in Oshawa and comes under the local branch of the Ukrainian Canadian Congress. There are two Ukrainian parishes, one Catholic and the other Orthodox, each with its own church.

Osherowitch, Mendl [Ošerovič] (Osherovitsch), b 1888 in Trostianets, Yampil county, Podilia gubernia, d 16 April 1965 in New York. Yiddish writer and journalist. He emigrated to the United States in 1909. From 1914 he was a staff member of the New York *Jewish Daily Forward*, in which he published many of his stories, articles, and criticism. A Ukrainophile, he headed the Association to Perpetuate the Memory of Ukrainian Jews and the Relief Committee for Jews in Ukraine. He wrote three novels in Yiddish, numerous plays, memoirs, and several works on Jewish history, including a book on the history of urban Jews in Ukraine (1948). He also edited a three-volume encyclopedic study of Jews in Ukraine (vol 1, 1961).

Osichny, Dmytro [Osičnyj], b 20 September 1885 in Kobaky, Kosiv county, Galicia, d 26 November 1962 in Kobaky. Writer. He began publishing in 1909. In the 1920s and early 1930s he contributed poetry to the Lviv Sovietophile journals *Vikna* and *Novi shliakhy*. Soviet editions of his poetry and prose were published in 1957, 1962, and 1973.

Osinchuk, Juliana [Osinčuk, Julijana], b 17 May 1953 in New York. Concert pianist, musicologist, and teacher; daughter of R. *Osinchuk. Her early musical training in-

Juliana Osinchuk

cluded instruction from R. Savytsky, N. Boulanger, and L. Talma. She later studied with R. Lhevinne and N. Reisenberg and completed a PhD in music from the Julliard School with a dissertation on V. *Kosenko. She has appeared as both soloist and chamber musician and on radio throughout Europe and the United States, notably at Lincoln Center's Alice Tully Hall (New York). She appears with symphony orchestras performing concertos by F. Liszt (no. 1), S. Rachmaninoff (no. 1), C. Saint-Saëns (no. 2), and G. Gershwin. Her Ukrainian repertoire consists of contemporary piano works, particularly by V. Kosenko. A number of these are featured on a phonodisc she released on the Orion label (1985).

Mykhailo Osinchuk: *Self-Portrait* (1958)

Roman Osinchuk

Osinchuk, Mykhailo [Osinčuk, Myxajlo], b 16 September 1890 in Holoshyntsi, Zbarazh county, Galicia, d 13 February 1969 in New York City. Painter and graphic artist; member of the Shevchenko Scientific Society; brother of R. *Osinchuk. A graduate of the Cracow Academy of Fine Arts and Cracow University (1914), he taught drawing at the Academic Gymnasium of Lviv (1921–6) and painted the murals in over 20 Galician churches (some with P. Kovzhun) and 10 iconostases in the neo-Byzantine style. He was a founding member and the first president of the *Association of Independent Ukrainian Artists and coedited its journal *Mystetstvo*. His book illustrations, woodcuts, and bookplates were similar in style to icons. During the Second World War he was a professor at the Academy of Arts in Lviv. A postwar émigré, from 1947 he lived in the United States, where he painted 4 Ukrainian churches and 10 iconostases. He also painted two churches in Toronto. He was an honorary member of the Ukrainian Artists' Association in the USA. He wrote several art monographs, including one on the icon.

Osinchuk, Roman [Osinčuk], b 5 July 1902 in Holoshyntsi, Zbarazh county, Galicia, d 11 February 1991 in New York. Physician and civic leader; brother of M. *Osinchuk; member of the Shevchenko Scientific Society and full member of the Ukrainian Academy of Arts and Sciences from 1942. A graduate of the Lviv (Underground) Ukrainian University and Lviv University (MD, 1931), he worked at the General Hospital, the Narodnia Lichnytsia hospital, and the Sheptytsky Ukrainian Hospi-

tal and ran an electrocardiograph station in Lviv. He was active in the Ukrainian Physicians' Society, a founding member of the Ukrainian Hygienic Society, and an editor of *Narodne zdorovia*. During the Soviet occupation he was a section chief at the oblast health department and lectured at the Lviv Medical Institute. Under the Germans he was a member of the Ukrainian National Council and director of the State Medical Institute in Lviv (1941–2). After leaving Ukraine in 1944, he worked as a physician in Germany, and in 1947 he emigrated to the United States. He established his own office in New York and became active in various Ukrainian organizations, particularly medical ones. He founded the *Ukrainian Medical Association of North America and served as its president (1950–5) and editor of its journal *Likars'kyi visnyk*, which he founded in 1954. He was the first president of the World Federation of Ukrainian Medical Associations, which he also helped organize. His publications consist of over 250 popular articles on health care, over 40 scientific articles in clinical medicine, and a dozen articles on the history of Ukrainian medicine.

Osinsky, Valerian [Osins'kij, Valerijan], b 10 November 1852 in Tahanrih, Don Cossack province, d 26 May 1879 in Kiev. Russian revolutionary. He studied at the St Petersburg Institute of Railway Engineers (1871–2) and worked as a zemstvo administrator. In 1875 he became active in the populist movement of P. Lavrov, but he was already an advocate of terrorism and soon became one of the leading members of Zemlia i Volia. He headed the (Southern) Executive Committee (a fictitious organization composed of himself and a few followers) of the Socialist Revolutionary party which directed terrorist attacks against tsarist officials in Kiev (including the procurator M. Kotliarevsky) and conducted the successful rescue of leading revolutionary activists (L. Deich, Ya. Stefanovych, and V. Bokhanovsky) from Lukianivka Prison in 1878. Osinsky was arrested in February 1879, sentenced by the court of the Kiev Military District, and hanged.

Osipovsky, Timofei [Osipovskij, Timofej], b 2 February 1765 in Osipovo, Vladimir gubernia, Russia, d 24 June 1832 in Moscow. Russian mathematician. After graduating from the St Petersburg Teachers' Seminary, he lectured at Kharkiv University (from 1805) and served as rector (1813–20). He was the author of a three-volume treatise *Kurs matematiki* (A Course in Mathematics, 1801–23), which covered function theory, differential equations, and variational calculus and was a basic university textbook for many years. He also worked in the fields of physics, astronomy, and philosophy. One of his students was M. *Ostrohradsky.

Oskil River (also Oskol). A left-bank tributary of the Donets River. It is 472 km long and drains a basin area of 14,800 sq km. The river flows through Kursk and Belgorod oblasts in the RF before running southward across the eastern end of Kharkiv oblast. It is generally 30–40 m wide and 2.5–3 m deep (maximum depth, approx 10 m). It is fed largely by meltwater and is frozen from November to March. A hydroelectric station is located on the lower course of the river together with the artificial lake, Chervonooskil Reservoir, created by the station. The largest Ukrainian center located along the river is the city of Kupianka.

Oskil River

Otaman Volodymyr Oskilko

Teodosii Osmachka

Oskilko, Volodymyr [Oskil'ko], b 1892 in Volhynia gubernia, d 26 May 1926 in Rivne, Volhynia. Civic leader and army officer. A school teacher by profession, he emerged in November 1918 as the chief organizer of anti-Hetman insurgency in Volhynia. At the beginning of 1919 he was appointed commander of the Northern Group of the UNR Army on the Bolshevik-Polish front. On 29 April 1919 he attempted an unsuccessful coup d'état against the UNR government in Rivne and fled to Poland. After returning to Rivne in the early 1920s, he edited the semiweekly *Dzvin* (1924–5), the organ of the Ukrainian People's party, which propagated a pro-Polish line, and wrote his memoirs, *Mizh dvoma svitamy* (Between Two Worlds, 1924). He was killed by unknown assassins.

Osmachka, Teodosii [Os'mačka, Teodosij], b 3 May 1895 in the village of Kutsivka, Cherkasy county, Kiev gubernia, d 7 September 1962 in Long Island, New York. Poet, novelist, and translator. Although his first poems were written in 1916, Osmachka began his literary career while he was a student at the Kiev Institute of People's Education from 1920 to 1923. He belonged to the literary organizations Aspys and Lanka (see *MARS), and published his first collection of poetry, *Krucha* (The Precipice), in 1922; it was followed by two more collections, *Skyts'ki vohni* (The Scythian Fires, 1925) and *Klekit* ([Crane's

Clacking, 1929). Like other members of MARS he was attacked and arrested for his 'unpolitical' literary works, but managed to save himself from execution by feigning insanity. During the 1930s he faced constant persecution by the authorities and was unable to publish any works. During the Second World War he fled to Western Ukraine, then to DP camps in Germany, and finally to the United States. Osmachka's personal ordeal had lasting effects on him, and until his death he suffered from a persecution complex. Nonetheless he resumed his literary career in 1943 in Lviv with the publication of his fourth collection of poetry, *Suchasnykam* (To My Contemporaries). In the DP camps he published his epic poem, written in octaves, *Poet* (Poet, 1946), as well as his first prose work, *Starshyi boiaryn* (The Best Man, 1946). *Kytytsi chasu* (Bouquets of Time, 1953) and selected poems published as *Iz-pid svitu: poetychni tvory* (From under the World: Poetic Works, 1954) completed his poetic oeuvre, which is characterized by expressionistic imagery, frequent dumalike rhythms, and a ponderous tone. In his later prose Osmachka devoted himself to the portrayal of the meticulously planned genocidal destruction of Ukraine by the Soviet regime. *Plan do dvoru* (Annihilation, 1951) deals with the liquidation of the independent Ukrainian farmer, and Osmachka's most famous and powerful autobiographical work, *Rotonda du-shohubtsiv* (The Rotunda of Assassins, 1956; published in English as *Red Assassins*, 1959), describes the destructive state – a machine for spiritual and physical annihilation – and shows that often the individual's only avenues of escape are death and madness. Besides some poems of G. Byron Osmachka translated O. Wilde's *The Ballad of Reading Gaol* (1958) and W. Shakespeare's *Macbeth* and *Henry IV* (1961). An edition of Osmachka's selected poetry appeared in Kiev in 1991.

D.H. Struk

Osmak, Vasyl [Os'mak, Vasyl'], b 1870 in Hoholiv, Oster county, Chernihiv gubernia, d 1942 in Kiev. Architect. A graduate of the St Petersburg Institute of Civil Engineering (1895), from 1899 he taught at the Kiev Polytechnical Institute. He codesigned important projects in Kiev, such as the Sadovsky Theater (1905, now the Kiev Operetta Theater), the buildings of the university library (1914–15, now the ANU Central Scientific Library), the humanities building at Kiev University (1932), the Dynamo Stadium (1934–5), and the landscaping of the Dnieper bank (1935–8).

Osmialovska, Kateryna [Osmjalovs'ka], b 26 November 1904 in Poltava. Stage and film actress. In 1921 she completed study at the Lysenko Music and Drama Institute in Kiev. Then she worked as an actress in the Shevchenko First Theater of the Ukrainian Soviet Republic (1920–5), the Donetske Ukrainian Drama Theater (1925–6), the Odessa Ukrainian Drama Theater (1926–30), and the Kiev Ukrainian Drama Theater (1930–63). She also acted in the films *Perekop* (1930) and *Natalka Poltavka* (Natalka from Poltava, 1936–45; voice by M. Lytvynenko-Volgemut).

Osnova (Foundation). A society of Ukrainian students attending the Lviv Polytechnic, organized by V. Dydynsky in 1897. Its presidents included Dydynsky, T. Melen, P. Durbak, and P. Volosenko. Its activities declined during the First World War and were restricted afterwards. From

1921 to 1925 the society operated without legal status at the Lviv (Underground) Ukrainian University and Lviv (Underground) Ukrainian Higher Polytechnical School. In 1926–7 it obtained legal status at the Lviv Polytechnic. In 1928 its membership exceeded 300. With the Soviet invasion of Galicia in 1939, its activities ceased. Under the German occupation the society functioned as a section of the Labor Alliance of Ukrainian Students.

Osnova (St Petersburg)

Osnova (Foundation). A Ukrainian journal published in St Petersburg from January 1861 to October 1862 (a total of 22 issues) by V. *Bilozersky. It had a major influence on the development of Ukrainian national consciousness and Ukrainian literature in the 1860s. Bilozersky, his brother-in-law, P. *Kulich, and M. *Kostomarov were the editors; O. Kistiakovsky was the assistant editor and secretary; and D. Kamenetsky (the director of P. Kulish's printery, which printed *Osnova*) and M. Shcherbak were the managers. *Osnova* united Ukrainophile writers and scholars in the common goal of substantiating the Ukrainians' right to develop fully and independently as a people. It published prose, poetry, folklore, and ethnographic studies in Ukrainian and historical, literary, polemical, economic, pedagogical, and musicological articles, memoirs, diaries, correspondence, news, bibliographies, and reviews mostly in Russian.

Works by over 40 belletrists appeared in *Osnova*, notably T. Shevchenko (over 70 poems, including the narratives 'Ivan Hus' [Jan Hus] and 'Neofity' [Neophytes], and the play 'Nazar Stodolia'), L. Hlibov, P. Hulak-Artemovsky, O. Storozhenko, S. Rudansky, O. Konysky, O. Afanasiev-Chuzhbynsky, S. Pysarevsky, D. Mordovets, H. Barvinok, M. Vovchok, Ya. Kukharensky, M. Aleksandrovych, V. Kokhovsky, O. Navrotsky, V. Kulyk, P. Kuzmenko, D. Moroz, B. Poznansky, and M. Verbytsky. M. Kostomarov, P. Kulish, A. Svydnytsky, M. Nomys, S. Nis, P. Yefymenko, and I. Rudchenko, besides their own work, provided ethnographic materials. M. Maksymovych, P. Lavrovsky, O. Kotliarevsky, and M. Hattsuk contributed essays on the Ukrainian language. The right to public education in Ukrainian and the need for a broad network of Ukrainian-language elementary schools and textbooks and educational literature in Ukrainian were advocated by P. Chubynsky, B. Poznansky, M. Levchenko, and particularly Kulish.

Kulich wrote most of the literary criticism and critically evaluated the Cossack era in an essay that was planned as the preface to a book on the history of Ukraine. He also wrote articles on the hetmanics of B. Khmelnytsky and I. Vyhovsky, and in five 'Letters from the *Khutir*' he condemned the culture of Ukraine's Russified towns and idealized the Ukrainian peasants' ways of life. In a historical essay on the traits of the 'South Russian' people, Kostomarov elaborated a new approach to Ukrainian historiography and a methodology for studying the history of the Ukrainian people. In essays entitled 'The Federative Principle in Ancient Rus'' and 'Two Rus' Peoples' he delineated the Ukrainians' independent historical and cultural development vis-à-vis that of the Russians and Poles.

Kulich, Kostomarov, O. Lazarevsky, T. Rylsky, P. Zhytetsky, and H. Ge contributed polemical articles in which they discussed concepts such as the family, kinship, the nation and the state, the social estates, the Ukrainian national psyche, Ukrainian-Russian and Ukrainian-Polish relations, the peasant emancipation and reforms, and other current issues. V. Antonovych contributed a 'confession' in which he elaborated the principles of the **khlopomany*. Articles on Ukrainian folk music were written by A. Serov. Kulish, V. Mezhev, and M. Mizko contributed to the bibliographic section. *Osnova* also published valuable historical documents and T. Shevchenko's diary, some of his correspondence, and memoirs of him. A news section provided information on attitudes among the peasantry and on economic matters. An album of L. Zhemchuzhnikov's engravings of Ukrainian scenes was published as a separate appendix.

The Russian press (except for *Otechestvennye zapiski* and *Sovremennik*) reacted antagonistically to *Osnova*, particularly to Kulish's and Kostomarov's claim that the Ukrainians have a distinct language and should have their own literature. Plagued by disagreements, denunciations for fomenting separatism, police harassment, censorship, a drop in subscriptions, and financial difficulties, the editors were forced to cease publication.

- Zhyvotko, A. *Zhurnal 'Osnova' 1861–1862* (Kiev 1938)
Bernshtein, M. *Zhurnal 'Osnova' i ukrain'kyi literaturnyi protses kintsia 50-kh–60-kh rokiv XIX st.* (Kiev 1959)

Osnova (Foundation). A populist newspaper published semiweekly in Lviv from October 1870 to December 1872 (a total of 90 issues). Founded by Yu. Lavrivsky and edited by T. Leontovych and then K. Klymkovych, it promoted political co-operation between the Poles and Ukrainians in Galicia. Regular contributors were S. Kachala, Yu. Lavrivsky, V. Shashkevych, O. Partytsky, and N. Vakhnianyn.

Osnova (Foundation). A semimonthly illustrated journal published in 1906–13 in Lviv. Until July 1908 it was a journal of politics, education, and economics intended for a broad peasant readership. The editors were Rev Ya. Levytsky and A. Veretelnyk. After a brief interruption it reappeared in January 1909 as a 'Christian periodical' devoting considerable attention to church affairs in addition to politics and popular education. Levytsky remained publisher and editor until 1913, when the Society of St Paul the Apostle became the publisher and Rev M. Hornykevych became editor.

Osnova (Foundation). A monthly journal of literature, scholarship, and community affairs, published in Odessa in August–October 1915 in place of *Literaturno-naukovyi vistnyk*, which was banned by the military authorities. Three issues appeared before it too was closed down. The managing editor was I. Havryliuk, and the journal's contributors were prominent Ukrainian cultural and scholarly figures.

Osnova Union of Ukrainian Students in Danzig

(Soiuz ukrainskykh studentiv 'Osnova' v Dantsigu). An organization founded in October 1922 by Ukrainians studying at the Polytechnical Institute in Danzig (see *Gdańsk). In 1924 *Osnova* had 123 members. It was soon eclipsed by new Ukrainian student fraternities (Halych, Zarevo, and Chornomore), and functioned largely as a loose federation of those groups and local political student groups. *Osnova* ran a student center and refectory and remained active until March 1945. It was affiliated with the *Central Union of Ukrainian Students (it hosted its first congress in 1923), the *Union of Ukrainian Student Organizations in Germany and Danzig, and the *Nationalist Organization of Ukrainian Students in Germany (from 1942). *Osnova's* presidents were, in chronological order, Yu. Yaremkevych, I. Trach, M. Yarymovych, M. Bukoiemsky, S. Pyndus, S. Shmatara, Ya. Mokhnatsky, T. Hrushkevych, M. Rakovsky, R. Zahaikevych, S. Genyk-Berezovsky, Ya. Yendyk, D. Borynets, R. Stakhiv, and M. Vykrykach.

Osnovianenko, Hrytsko. See Kvitka-Osnovianenko, Hryhori.

Ossetes (Osetyntsi). A nation numbering 598,000, according to the 1989 Soviet census. Most Ossetes live in the North Ossetian AR (335,000) of the RF and the South Ossetian Autonomous Oblast (65,000) in Georgia. Many live in Stavropol krai (especially the Karachai-Cherkess Autonomous Oblast), and a few live in Ukraine (6,300). The Ossetes are descended from a mixture of aboriginal peoples, Scythians, Sarmatians, and Alans. Their language belongs to the Iranian group of the Indo-European family and is descended from the Scythian and Alanian languages. The oldest record of the language is from 941. The Ossetes have a rich oral tradition, which encompasses heroic fables, stories, songs, proverbs, and anecdotes. Literary ties between the Ossetes and Ukrainians date from the 19th century. Ossetian works have been translated into Ukrainian; the works of T. Shevchenko, I. Franko, M. Kotsiubynsky, P. Tychna, and V. Sosiura have been published in Ossetian.

Ossolineum Institute. A library and publishing house situated in Lviv (1827–1940) and then (after 1946) Wrocław. It was established as a result of a bequest by J. Ossoliński (d 1817), who donated his private library and set aside funds for the creation of a public institution in Lviv. It served as a regional scholarly library for Galicia. In addition to Polish, German, and other collections it had valuable material on the history and culture of Ukraine (including antiquarian manuscripts, archival materials on the history of Ukrainian cities, and original copies of universals issued by Ukrainian hetmans). In 1940 the Ossolineum collection was incorporated into the library of the

Ossolineum Institute (lithograph by K. Auer, 1846–7)

ANURSR (now ANU) along with those of several other libraries. In 1946 the Ukrainian SSR handed over the main portion of the Ossolineum collection to Poland. It provided the basis for the creation of a new Ossolineum library in Wrocław, which collects books and manuscripts in the humanities that pertain to Poland, particularly Silesia. By an oversight, a mistake, or malicious intent the most valuable sources for Ukrainian history were also passed on to Wrocław. The publishing house has become a separate institution and is run by the Polish Academy of Sciences.

Ossoliński, Jerzy, b 15 December 1595 in Sandomierz, Poland, d 9 August 1650 in Warsaw. Polish statesman and diplomat. After completing his studies in France and Italy, he was a court functionary, adviser to Władysław IV Vasa, and vice-chancellor (1638) and chancellor (1643) of the Polish Commonwealth. Throughout the 1640s he maintained a relationship with the Ukrainian statesman A. *Kysil, whom he provided with access to his inner circles of power while benefiting from his knowledge of Ukrainian affairs and status as an acceptable mediator in disputes. Ossoliński was involved in negotiations to establish a new (Uniate) church union, as well as a scheme to create a broad-based coalition against the Turks and Tatars, in which the Ukrainian Cossacks were to play a vital role. In May 1648 Ossoliński assumed effective interregnum control of the Commonwealth and became a key figure in determining the Polish strategy in the *Cossack-Polish War. Although his efforts in obtaining a negotiated settlement initially failed, in the spring of 1649 he managed to sever the alliance between Hetman B. Khmelnytsky and the Tatar khan Girei and thus brought about the Treaty of *Zboriv.

Ossowski, Gotfryd, b 1835 in Kozarynivka, Kiev gubernia, d 1897 in Tomsk, Siberia. Polish geologist and archeologist. A founding member of the Volhynia Research Society, he worked in Volhynia gubernia and wrote a geological survey of it (1867) and a travel account of Zhytomyr and Ovruch counties (1868). He also prepared a geological (1880) and an archeological (1881) map of Volhynia. He identified the location of various useful minerals. After moving to Cracow he conducted a number of expeditions in western Podolia and wrote a geological and paleontological description of the caves in Volhynia and Galicia (1892). In 1892 he began to study Siberia, where he died during an expedition.

Ostafiichuk, Ivan [Ostafijčuk], b 28 July 1940 in Troshtianets, now in Sniatyn raion, Ivano-Frankivske oblast. Graphic artist and painter. A graduate of the Lviv Insti-

Ivan Ostafiichuk: *To Each His Own* (ink drawing, 1977)

tute of Applied and Decorative Arts (1966), he has worked in a variety of print techniques. Linearity and decorativeness predominate in his early linocuts (eg, his series inspired by the writings of V. Stefanyk, 1969). Partially modeled areas and images of the fantastic dominate in his lithograph series 'Hutsul Legends.' The Ukrainian roots of his art are seen in his themes and in the way he has transformed Ukrainian folk and artistic traditions and enriched them with elements of contemporary art. In 1979 his 'Ukrainian Folk Songs' monoprint series received the gold medal at the 9th Biennale of Graphic Art in Brno, Czechoslovakia. Since 1982 Ostafiichuk has worked in an expressionist manner (eg, his paintings *Summer* [1985] and *Self-Portrait* [1986]). He has illustrated poetry collections by D. Pavlychko (1987), L. Kostenko (1987), and I. Drach (1988). Since emigrating to Toronto in 1988, he has had solo exhibitions in Canada and the United States and has illustrated a poetry collection by S. Sapeliak (1989) and the story collection *The Parcel from Chicken Street* (1989) by L. Bereshko (pseud. of F. Ponomarenko).

D. Zelska-Darewych

Ostanni novyny (Latest News). A daily newspaper for Ukrainian displaced persons published in Salzburg, Austria, from September 1945 to 1949. It was edited by P. Sahaidachny with the assistance of Yu. Klen and L. Mosendz, and carried a weekly literary addition, *Novi dni*.

Ostapchuk, Emily [Ostapčuk, Emelija] (née Andrusiv), b 13 December 1919 in Radway, Alberta, d 16 November 1984 in St Catharines, Ontario. Community and civic leader; wife of P. Ostapchuk. A popular figure on the Ukrainian stages of Canada, she studied commerce at Ryerson College in Toronto in the 1950s and then moved to Vancouver. She organized community activities in that city, served as the longtime head of the provincial representation of the Ukrainian Canadian Committee (now Congress), and involved herself extensively in civic affairs. In 1976 she was awarded the Order of Canada.

Ostapchuk, Pylip [Ostapčuk] (pseud. P. Pylypenko), b 29 October 1899 in Vinnytsia, Podilia gubernia, d 1965 in Toronto. Stage actor, director, and playwright. From 1928 he lived in Winnipeg, where he worked as a stage director

Emily Ostapchuk

Yatsko Ostapchuk

at the Winnipeg Prosvita and toured (from 1952) with his troupe, performing Ukrainian plays. He is the author of several plays, among them *Smert' komisara Skrypnyka, abo Holod na Ukraini* (The Death of Commissar Skrypnyk, or Famine in Ukraine), *Halychyna v ohni* (*Patsyifikatsiia*) (Galicia in Flames [Pacification]), and *V pazurakh Cheka* (In the Claws of the Cheka). He also published a book, *Narodne mystetstvo Zakarpattia* (Folk Art of Transcarpathian Ukraine).

Ostapchuk, Yatsko [Ostapčuk, Jacko], b 4 January 1873 in Lubianky Nyzhchi, Zbarazh county, Galicia, d 30 January 1959 in Uzhhorod, Transcarpathia oblast. Civic and political leader. A member of the Ukrainian Radical party and then of the Ukrainian Social Democratic party, he was a deputy to the Austrian parliament (1907–11). In 1912 he moved to Transcarpathia. During the First World War he was active in the Union for the Liberation of Ukraine at the POW internment camp in Freistadt (Austria). In 1918–19 he was a member of the Ukrainian National Rada. In 1920 he helped found the Ukrainian Social Democratic party in Transcarpathia and served as its president. With the Hungarian invasion of the region he fled to Czechoslovakia.

Ostapenko, Petro, b 9 July 1922 in Myroliubivka, Skvyra county, Kiev gubernia. Sculptor. He studied under Yu. Bilostotsky and E. Fridman. His works include portraits of M. Rylsky (1936), K. Briullov (1960–1), and O. Shlikhter (1970); the monument to T. Shevchenko in Zvenyhorodka, Cherkasy oblast (1964, cocreator); and Rylsky's burial monument (1969, cocreator).

Ostapenko, Serhii, b and d ? Economist and political leader from Volhynia. Until 1917 he was a lecturer at the Kiev Commercial Institute. After the Revolution of 1917 he was a delegate to the Central Rada from the Ukrainian Party of Socialist Revolutionaries, an economic adviser to the UNR delegation at the negotiations of the Peace Treaty of Brest-Litovsk (1918), minister of trade and industry in the Council of National Ministers of the UNR under the Directory (December 1918 to February 1919), and prime minister of the UNR (February–April 1919). Under his leadership the UNR government was less partisan than under other prime ministers, and tried, albeit unsuccessfully,

Serhii Ostapenko

to negotiate with the Entente powers. After the victory of the Bolsheviks Ostapenko remained in Ukraine. He was probably arrested in 1931, but his fate is unknown. His economic writings deal mostly with foreign trade, especially trade in agricultural products. He wrote mostly popular and publicistic works, including textbooks on the economic geography of Ukraine and political economy.

Ostarbeiter (eastern workers). The German term for several million civilians from the 'conquered eastern territories' taken to Germany for forced labor during the Second World War. The recruitment of workers was not part of the Germans' preinvasion planning, but it began, in November 1941, when it had become apparent that there would be no quick victory on the eastern front. The head of the Nazi Four-Year Plan, H. Göring, issued instructions in that month to the effect that 'Russian' workers should be used for Germany's benefit. In the same month the labor office of the Distrikt Galizien reported that 60,709 workers had been sent to Germany. At the beginning of 1942 a campaign was instituted under the auspices of the Four-Year Plan to supply 380,000 laborers for German agriculture and 247,000 for German industry. On 21 March F. Sauckel was appointed plenipotentiary general for labor allocation (Generalbevollmächtigter für den Arbeits-einsatz, or GBA); he became Göring's subordinate in charge of recruiting 'all available manpower, including foreigners and prisoners of war,' to work in German industry and thereby allow the release of Germans for the war effort. Ukraine was by far the most important source of *Ostarbeiter*: of the approx 2.8 million civilians deported to Germany in 1941-4, about 2.2 million were from Ukraine.

Initially many Ukrainians greeted the Germans as liberators from Soviet rule, and 80 percent of the first labor quotas were filled by volunteers. But the brutal treatment of the volunteers, who were packed into freight cars without food or sanitary facilities, soon became known in Ukraine. By the summer of 1942 there were no more volunteers. With their increasing appetite for manpower, the Germans resorted to forcible means of recruitment. People were rounded up arbitrarily to make up the quotas imposed by the GBA. Towns and villages were ordered to register the able-bodied and to supply quotas of workers; those who failed to report for duty were subject to confiscation of grain and property, the burning down of their houses and villages, and incarceration in concentration camps. Official reports and German soldiers' letters to rel-

atives described the beatings and mistreatment of *Ostarbeiter* as everyday occurrences in Ukraine. Families were often separated, and relatives who tried to give departing workers food and clothing were brutally thrust aside. All that helped to turn popular sentiment decisively against the Germans and encouraged those who faced deportation to join the Soviet partisans or the Ukrainian Insurgent Army. The return of disabled *Ostarbeiter* to Ukraine – the seriously ill, injured, or undernourished, who could not usefully contribute to the war effort – intensified anti-German feelings. Throughout 1942 and 1943 the forced requisition of workers in Ukraine took a dreadful toll in manpower. In Kiev, for example, instructions were given in April 1942 to round up 20,000 workers aged 16 to 55. In September 1942 part of the city was cordoned off, and all unemployed able-bodied inhabitants were pressed into service. By the summer of 1943, 440,000 workers had been deported from the greater Kiev area, with the result that German security police protested there were not enough workers left to gather the harvest.

Irrational aspects of Nazi policy lessened the effectiveness of *Ostarbeiter* recruitment. Tens of thousands of workers were brought to Germany only to be sent back when they were found unsuitable for employment. A report from Kharkiv dated October 1942 pointed out that specialist workers were being forced to leave Ukraine without proper clothing and were being beaten so severely that they were unfit for work. A Hitler's scheme of recruiting half a million Ukrainian women 'capable of being Germanized' as domestic workers failed to yield the expected results: Sauckel was able to bring in only 15,000. In Germany *Ostarbeiter* were treated worse than forced laborers from other German-occupied countries. Ukrainians from the *Reichskommissariat Ukraine were not recognized as Ukrainian nationals, a status accorded only to those from the Distrikt Galizien. Every effort was made to isolate the *Ostarbeiter* from the German population and from workers of other nationalities by placing them in closed residences. So great was the fear of 'pollution' by the easterners, whom Nazi propaganda described as sub-human, that the death penalty was instituted for sexual intercourse with them, and for numerous other offenses. Every article of clothing *Ostarbeiter* wore had to be identified with an 'Ost' badge. Whereas the average German industrial worker earned 3.50 reichsmarks (RM) per day, an *Ostarbeiter* earned 2.30, 1.50 of which was deducted for room and board; *Ostarbeiter* working in agriculture averaged a net wage of 3 RM per week. *Ostarbeiter* received smaller food rations than other foreign workers. German maternity laws did not apply to female *Ostarbeiter*, and their children received half the rations allocated to German children. Most *Ostarbeiter* worked in private enterprises but were kept under close surveillance by the German police and the ss. Those caught trying to escape were sent to *concentration camps or killed. In the autumn of 1942, officials of the Ostministerium began to complain that the brutal treatment of *Ostarbeiter* was turning the population against the Germans, and military officers warned that it was leading to an increase in the number of anti-German partisans. The criticism resulted in a slight improvement in the status of the *Ostarbeiter*: their take-home wages were raised to 1.14 RM, a 20 percent rebate of taxes on wages was accorded for excellent work, and a central inspection agency was created to supervise working conditions.

Despite official rhetoric urging better treatment of *Ostarbeiter* and a growing tendency to equalize their status with that of other foreign workers, measures designed to assist them depended on the goodwill of German employers and were hampered by wartime conditions. The productivity of *Ostarbeiter* labor was strikingly high. According to a comprehensive survey conducted in 1944, the productivity of male workers was 60–80 percent of that of their German counterparts, and that of female workers attained a level of 90–100 percent. After the war most Ukrainian *Ostarbeiter* in occupied Germany were forcibly repatriated to the USSR, where many were victimized for having ‘betrayed the Fatherland’ by allowing themselves to be captured. (See also *Nazi war crimes in Ukraine and *Repatriation.)

Ostashchenko-Kudriavtsev, Borys [Ostaščenko-Kudrjavcev], b 9 January 1877 in St Petersburg, d 1 October 1956 in Kharkiv. Astronomer and geodesist. He graduated from St Petersburg University (1898) and worked as an astronomer at the Pulkovo Observatory until 1909, when he became a research associate at the Mykolaiv Observatory. From 1923 he worked at the Kharkiv Observatory and taught at institutes of higher learning in that city. His contributions were in the areas of astronomy and geodesy, particularly the application of projection methods in cartography.

Roman Ostashevsky

Yakiv Ostrianyn

Ostashevsky, Roman [Ostaševs'kyj], b 19 April 1924 in Kurnyky, Ternopil county, Galicia, d 26 February 1983 in Edmonton. Museum director and community leader. Ostashevsky was educated at the University of Rome (B PHIL, 1947; B TH, 1950), McGill University (BLS, 1963), and the University of Denver (Dip in Archival Adm, 1967). After emigrating to Canada in 1951, he worked in the Edmonton Public Library (1959–66) and was a senior archivist in the provincial archives of Alberta. In 1975 he

was appointed director of the *Ukrainian Cultural Heritage Village. He was on the national executive of the Ukrainian National Federation (UNO) after 1975, organized and participated in plays and literary readings, and produced and hosted the weekly Ukrainian television program ‘Kontakt’ in Edmonton. He was awarded the Order of Canada in 1979.

Ostaszewski, Spirydion, b 1797 in Antonivka, Ly-povets county, Kiev gubernia, d 25 April 1875 in Avratyn, Zhytomyr county, Volhynia gubernia. Polish Ukrainophile writer. He devoted himself to collecting and studying local folklore and folkways. Influenced by the burlesque writings of I. Kotliarevsky and P. Hulak-Artemovskyy, he wrote and published in the Polish alphabet a collection of 29 Ukrainian versified folk fables, *Piv kopy kazok ... dla wesetoho myra* (A Score and a Half Tales ... for a Merry World, 1850; pub in Cyrillic by V. Shchurat in 1910). Using the *hrazhdanka alphabet, he published a revised version, *Piv sotni kazok dlia veselykh liudei* (One Half-Hundred Tales for Merry People, 1869). A posthumous Ukrainian version, *Sto baiok ... dlia ruskoho myra ...* (One Hundred Fables ... for the Ruthenian World), appeared in Lviv in 1888. He also translated Polish poetry into Ukrainian and wrote on girls’ education and Polish history.

Oster. III-11. A town (1990 pop 8,400) on the Desna River in Kozelets raion, Chernihiv oblast. It is first mentioned in the chronicles under the year 1098 as a fortress belonging to Pereiaslav principality. It was built by Volodymyr Monomakh and called Horodets. In 1240 it was destroyed by the Tatars, and it remained in ruins for a century. In 1569 the town was transferred from Lithuanian to Polish rule. In 1648 it became a company center of Pereiaslav regiment. In 1662 Oster obtained the rights of *Magdeburg law, and in 1803 it became a county center of Chernihiv gubernia. Today Oster is a river port with a cotton-textile factory and a food industry. Some parts of the old fortress and St Michael’s Church (aka Yurii’s Temple), built in 1098, have been preserved.

Oster Drainage System. A canal system covering 34,200 ha of the Oster River floodplains in Chernihiv oblast. It was built in three stages in 1928–55 and was reconstructed in 1960–1 and 1964–8. The system consists of the regulated riverbed of the Oster River itself (207 km), 673 km of open canals, and 246 locks. Excess water is pumped into the Trubizh Drainage and Irrigation System. The drained lands are cultivated or used as pasture.

Oster River. A left-bank tributary of the Desna River. It is 199 km long and drains a basin area of 2,970 sq km. It flows westward through the south-central part of Chernihiv oblast. A drainage system has been built along the marshy waterway. The river, which is fed mainly by melt-water, freezes at the end of November and thaws in March. The settlements located along the Oster include Nizhen, Kozelets, and Oster.

Osteuropäische Korrespondenz. A German-language bulletin published semimonthly and weekly in Berlin in 1924–30. Edited by V. Kuchabsky and then Z. Kuzelia (1926–30), it informed the German public and media about Ukrainian affairs. The bulletin was funded by the

German government and the clandestine Ukrainian Military Organization.

Ostrenko, Viktor, b 10 April 1917 in Katerynoslav (now Dnipropetrovske). Metallurgist; corresponding member of the AN URSR (now ANU) since 1978. He graduated from the Dnipropetrovske Metallurgical Institute (1941), and since 1947 he has worked at the All-Union (until 1992) Scientific Research and Construction Technology Institute of the Pipe Industry in Dnipropetrovske. His main contributions are in the development of the theory and production of seamless pipes.

Ostriany, Danylo [Ostrjany], b 30 December 1906 in Bilske, Zinkiv county, Poltava gubernia, d 17 May 1988 in Kiev. Philosopher; corresponding member of the AN URSR (now ANU) from 1957. After graduating from the Ukrainian Institute of Communist Education in Kharkiv (1929) he lectured on Marxism-Leninism at postsecondary schools in Kharkiv. In 1952 he moved to Kiev to direct the ANU Institute of Philosophy (to 1962); he chaired its Department of the History of Ukrainian Philosophical and Sociological Thought (1955–63) and the departments of philosophy (1963–69) and the history of philosophy (1969–75) at Kiev University. He wrote numerous works in the history of philosophy in Ukraine, the history of science, and the philosophy of science; edited over 60 monographs and collections of essays; and produced books in Ukrainian on religion and its 'reactionary role' (1955), M. Maksymovych's worldview (1960), and materialist philosophy in Ukraine (1971), and books in Russian on I. Mechnikov (2 vols, 1953) and materialism and dialectics in Russian imperial natural science in the 18th and 19th centuries (1984). He oversimplified the development of philosophy as a struggle between idealism and materialism and exaggerated the materialistic elements in the thought of many thinkers. A biobibliography appeared in 1987.

Ostriany, Yakiv [Ostrjany, Jakiv], b ?, d ca 6 May 1641. Zaporozhian hetman and leader of the Cossack rebellion of 1638. During the Polish-Muscovite War of 1634 he took part in battles in the Novhorod-Siverskyi region as a colonel of registered Cossacks. He participated in the 1637 rebellion led by P. *Pavliuk, and after the Battle of *Kumeiky he fled to the Zaporozhian Sich, where he was elected hetman of the nonregistered Cossacks in the spring of 1638. Ostriany, K. *Skydan, and D. *Hunia renewed the anti-Polish rebellion in Right- and Left-Bank Ukraine. On 15 May 1638 Ostriany's forces routed S. Potocki's Polish army at Hovtva, between Kremenchuk and Poltava. The Poles retreated and then regrouped and attacked the encamped rebels on 13 June at Zhovnyne. Ostriany and some 1,000 of his followers fled to Slobidska Ukraine, and left Hunia to continue the battle for several weeks. Ostriany settled near Chuhuiv. He was murdered by former supporters.

Ostrih or **Ostroh**. III-7. A city (1990 pop 13,100) at the junction of the Viliia and the Horyn rivers and a raion center in Rivne oblast. It is first mentioned in the Hypatian Chronicle under the year 1100. In the second half of the 14th century it came under Lithuanian rule. From 1386 Ostrih belonged to the Ostrozky family, who built a castle and the Church of the Epiphany and established Ostrih as

Castle ruins and the Epiphany Church in Ostrih

an important cultural, religious, and economic center. In 1528 it was granted the rights of *Magdeburg law. Until 1630 the town was a leading center of Ukrainian Orthodoxy: in the 1570s an academy and a printing press were set up, and in 1581 an improved translation of the Bible was published there. As the Roman Catholic movement and the state's policy of Polonization increased in strength, Ostrih lost its cultural and religious role. It was captured by B. Khmelnytsky in 1648, and the castle and church were destroyed in the process. In the second half of the 17th century Ostrih became the property of the Zaslavski, the Wiśniowiecki (in 1673), and finally the Sanguszko (in 1700) families. In 1793, with the partition of Poland, it was transferred to Russia, and became a county center in Volhynia gubernia. Today the town has a dairy, a sugar refinery, a cannery, a brewery, an asphalt and brick factory, and a railway-track repair plant. Its architectural monuments include the remains of the castle (14th–16th century), the 15th-century Church of the Epiphany (rebuilt in the 16th and restored in the 19th century), a 17th-century synagogue, and a 19th-century academy complex.

Ostrih Academy (Ostrozka shkola or Ostrozka akademiia). A postsecondary institution founded in Ostrih, Volhynia, ca 1576 by Prince K. *Ostrozky. At a time when Catholicism was making inroads into Western Ukraine, the academy was a bastion of Orthodoxy and maintained the traditional orientation toward Constantinople. Though the Ostrih Academy did not develop into a Western European-style university, as Ostrozky had hoped, it was the foremost Orthodox academy of its time. The curriculum consisted of Church Slavonic, Greek, Latin, theology, philosophy, medicine, natural science, and the classical free studies (mathematics, astronomy, grammar, rhetoric, and logic). In addition the academy was renowned for choral singing, and developed the *ostrozkyi napiv*. The academy was closely affiliated with the *Ostrih Press. The first rector of the academy was the writer H. *Smotrytsky. The instructors, many of whom had been invited from Constantinople, included the pseudonymous *Ostrozkyi Kliryk, the Greek C. *Lucaris, J. Latos, a philosopher and mathematician from Cracow University, and Y. *Bo-

retsky, who later became rector of the Lviv Dormition Brotherhood School and then metropolitan of Kiev. Hetman P. Sahaidachny, the writer and scholar M. Smotrytsky, and several other prominent political and cultural leaders studied at the academy. With the founding of a rival Jesuit college in Ostrih in 1624, the academy went into decline, and by 1636 it had ceased to exist. The example set by the Ostrih Academy had an enduring influence on pedagogical thought and the organization of schools in Ukraine and provided a model for the *brotherhood schools that were later founded in Lviv, Lutske, Volodymyr-Volynskyi, Vilnius, and Brest.

Ostrih Bible (frontispiece)

Ostrih Bible (Ostrozka Bibliia). The first full Church Slavonic edition of the canonical Old and New Testaments and the first three books of the Maccabees, printed in Ostrih in 1580–1 by I. *Fedorovych (Fedorov) in 1,500–2,000 copies. The preparation of the text and the printing were funded by Prince K. *Ostrozky. With close to 1,400 headpieces, initials, and tailpieces, the 628-folio book is one of the finest examples of printing in late 16th-century Ukraine. The text was based on all the Church Slavonic and Greek sources of the Bible (including the complete 1499 Bible of Archbishop Gennadii of Novgorod) collected by Ostrozky. The Old Testament sources were verified against the Septuagint or translated sources (sometimes incorrectly) by scholars directed by H. *Smotrytsky at the Ostrih Academy. The Bible includes Ostrozky's and Smotrytsky's prefaces, Smotrytsky's heraldic verses dedicated to Ostrozky, and Fedorovych's postscript. Its orthography, phonetics, and morphology are a mixture of Middle Bulgarian and East Slavic. The Russian stresses in its vocabulary were most likely introduced by Fedorovych. The Bible was reprinted with minor revisions in a unified orthography in Moscow in 1663. The text was later corrected by a group of scholars under the direction of Ye. Slavynetsky and then by Ya. Blonnitsky and V. Liashchevsky, and served after the abolition of Vulgata textual elements as the basis of the Synodal (Elizabethan) Bible of 1751 and many subsequent Church Slavonic printings. P. Berynda

studied the text of the Ostrih Bible and used material from it for his lexicon (1627). Initial psalms from it were transliterated to the Latin alphabet as examples of Old Slavonic by the Czech M. Filonomos-Benešovský (1587) and the Pole L. Górnicki (1594). A photofacsimile of the Bible was published in Winnipeg in 1983.

Ostrih Chronicle (Ostroz'kyi litopysets'). A chronicle of the years 1500–1636 in Galicia and Volhynia, compiled in the late 1630s. Events up to 1598 were taken from M. *Biel'ski's Polish chronicle, but the events of 1599–1636 are based on the observations of an unknown author and other eyewitness accounts. The chronicle describes various Cossack wars, Turkish and Tatar attacks on Ukraine, and significant cultural and religious events during the period of struggle between the Orthodox and Uniate churches. Because much attention is devoted to the Ostrozky princely family and to events in Ostrih, the chronicle was dubbed the Ostrih Chronicle by M. Tikhomirov, who discovered it and published it in *Istoricheskii arkhiv* (vol 7, 1951). The chronicle was written in the Ukrainian vernacular of its time.

Ostrih Press. The second oldest printer in Ukraine, founded in 1578 by I. *Fedorovych with the financial backing of Prince K. *Ostrozky at the prince's castle in Ostrih, Volhynia. Its first publications were *Azbuka* (Alphabet, 1578), a collection of prayers in Greek and Church Slavonic; the second impression of Fedorovych's *Bukvar* (1578), the first Ukrainian primer; the first Ukrainian edition of the New Testament and an alphabetical index to it (1580); the *Ostrih Bible (1581); and the first poetic work printed in Cyrillic, A. Rymsha's *Khronolohiia* (Chronology, 1581). It also printed pro-Orthodox, anti-Uniate *polemical literature, including works by H. Smotrytsky, V. Surazky, Ostrozky, Kh. Filalet, and the pseudonymous Ostrozkyi Kliryk; a book (1598) containing eight epistles by M. Pigas and one by I. *Vyshensky (his only work published during his lifetime); several liturgical books; and works by ss Basil the Great and John Chrysostom in Church Slavonic translation. It issued some 30 titles, some of which were later reprinted in Moscow. The press functioned, with some interruptions, until 1612; from 1602 to 1605 it operated at the Derman Monastery.

Ostrivets archeological site. A multi-occupational archeological site located near Ostrivets, Horodenka raion, Ivano-Frankivske oblast. Excavations by M. *Smishko in 1958–60 revealed a settlement of the 13th to 11th century BC and a Sarmatian burial site of the 2nd to 3rd century AD. The site is best known for the recovery of a stone mold for pouring bronze axes and spear tips.

Ostrogoths. See Goths.

Ostrohozke [Ostrohoz'ke] (Russian: Ostrogozhsk). III-20. A city (1979 pop 34,000) on the Tikhaia Sosna River and a raion center in Voronezh oblast, RF. It was founded by Ukrainian Cossacks and fortified in 1652. In 1662 it became the center of Ostrohozke regiment in Slobidska Ukraine. A century later the Cossack regiment was reorganized into a hussar regiment, and in 1802 the town became as a county center in Voronezh gubernia. By the end of the 19th century its population was 7,000, most of whom were engaged in trade. According to the census of 1926, Ukrainians accounted for 74.1 percent of the town's and 69.6 percent of the county's inhabitants.

Ostrohozke regiment. An administrative territory and military formation established in 1652 in Slobidska Ukraine and originally known as Rybne regiment. It was settled by approx 2,000 peasant and Cossack families from Chernihiv and Nizhen regiments, led by Col I. Dzykovsky. Its purpose was to protect Muscovy's southern frontier from Tatar raids. By 1732 the regiment consisted of 18 companies, with 3,100 elect Cossacks and 16,300 Cossack helpers. It took part in Dzykovsky's revolt of 1670, the Azov campaigns of 1695–6, the Northern War (1700–21), and the Seven Years' War (1756–63). In 1765 it was abolished along with the other regiments of Slobidska Ukraine and reorganized into a hussar regiment. Its territory was incorporated into the gubernia of Slobidska Ukraine.

Ostrohradsky [Ostrohrads'kyj]. A family of Cossack *starshyna* and, later, Russian imperial nobility in the Poltava region. The progenitor was Ivan, a 17th-century fellow of the standard. His son, Matvii *Ostrohradsky, was judge of Myrhorod regiment (1715–34). Matvii's sons were Fedir, the captain of Hovtva company (1723–35) and judge (1735–52) and colonel (1752–68) of Myrhorod regiment; Hryhorii, the captain of Omelnyk company (1729–60); and Ivan, a fellow of the standard until ca 1760. The family produced many captains of Hovtva company, the last being Volodymyr (1770–83). Notable Ostrohrads'kyjs after the abolition of the Hetman state included Matvii (ca 1786 to 1849), a lieutenant colonel and marshal of the nobility in Kremenchuk (1838–41); the mathematician Mykhailo *Ostrohradsky (1801–62); Vsevolod (b 1843), a Russian cavalry colonel and inspector general; Vasyl (b 1857), the Russian deputy minister of trade and commerce in 1906–10; Vasyl (b 1865), a representative of Poltava gubernia in the Third Russian State Duma (1907–12); Oleksander (1852–1907), a pedagogue and director of the school for the deaf and mute in St Petersburg; Orest (b 1868), a professor of financial law from 1895 at Dorpat (Tartu) University; and Mykhailo *Ostrohradsky (1870–1921), a rear admiral of the Black Sea Fleet.

O. Ohloblyn

Ostrohradsky, Matvii [Ostrohrads'kyj, Matvij], b and d ? Cossack officer; patriarch of the *Ostrohradsky family. He was captain of the Hovtva company (1691–1715) and a judge in Myrhorod regiment (1715–34). He was arrested with P. Polubotok and other senior officers for signing the *Kolomak Petitions, and released in 1725. Ostrohradsky took part in numerous military campaigns, from the Chyhyryn campaigns (1677–8) to the Russo-Turkish War (1735–9).

Mykhailo Ostrohradsky
(1801–62)

Ostrohradsky, Mykhailo [Ostrohrads'kyj, Myxajlo] (Ostrogradsky, Mikhail), b 24 September 1801 in Pashenna (now Pashenivka), Kobeliaky county, Poltava gubernia, d 1 January 1862 in Poltava. Mathematician (student of T. Osipovskiy); member of the Academy of Sciences in St Petersburg (from 1831), New York (from 1834), Turin (from 1841), Rome (from 1853), and Paris (from 1856). He graduated from Kharkiv University (1820). He continued his studies in Paris at the Collège de France in 1822. From 1828 he taught mathematics in St Petersburg at the Naval Academy, the Institute of Roads and Communications, the Main Pedagogical Institute, the Main Engineering School, and the Main Artillery Academy. He wrote textbooks on analytical mechanics, algebra, differential and integral calculus, and analytical geometry. Most of his essays (written in French) appeared in the proceedings and annals of the St Petersburg Academy of Sciences. He contributed to diverse fields of applied mathematics, including ballistics, hydromechanics, hydrodynamics, potential theory, heat, elasticity, and astronomy.

His most famous theorem is on the reduction of an integral over an n -dimensional space to one over its boundary. A special case for this theorem for three-dimensional space is known as Gauss's theorem (aka *théorème d'Ostrogradsky* in French). He was also the first to prove a theorem in linear differential equations known as Abel's theorem. Ostrohradsky was a friend of T. Shevchenko, who mentioned him in his diary and in his novel *Khudozhnik* (The Artist, 1887), in which he called Ostrohradsky a mathematical genius. In 1952 B. Hnidenko wrote a monograph about Ostrohradsky.

R. Voronka

Ostrohradsky, Mykhailo [Ostrohrads'kyj, Myxajlo], b 1870, d 1921. Naval commander. He was a rear admiral in the Imperial Russian navy. Under the Hetman government (1918) he served as the Sevastopol commander of Black Sea Fleet. From 1919 he worked in the Ministry of Naval Affairs of the UNR.

Ostromir Gospel (Ostromirove yevanheliie). The oldest extant East Slavic manuscript and the most important Old Church Slavonic literary monument in the East Slavic redaction. It was transcribed by the precentor Grigorii in 1056–7 for Ostromir, the vicegerent of Novgorod. The monument is a copy of an Old Church Slavonic original of Bulgarian provenience, translated from Greek. Most of it (parchment folios 25–294) was preserved at the St Sophia

Ostromir Gospel: miniature painting of St Luke the Evangelist

Cathedral in Novgorod and was transferred in 1806 to the St Petersburg Public Library. The gospel was written in two columns using the Cyrillic **ustav* script and was embellished with headpieces, initials, and miniatures of the evangelists Mark, Luke, and John. Its generally pure Old Church Slavonic language has few East Slavic traits. An annotated parallel Slavonic-Greek edition was first published by A. Vostokov (1843; repr Wiesbaden 1964), and photofacsimiles of the original were published by I. Savinkov (1883, 1889). Its language and contents were studied by Vostokov (1843), M. Kozlovsky (1885), V. Shchepkin and A. Shakhmatov (1890), N. Volkov (1897), N. Karinsky (1903, 1920), F. Fortunatov (1908), and L. Zhukovskaia (1961). Some scholars (N. Karinsky, N. Volkov, P. Lavrov [1928]) have speculated that the text was prepared in Kiev, but most favor Novgorod.

Mykhailo Ostroverkha

Oleh Ostrowsky

Ostroverkha, Mykhailo [Ostroverxa, Myxajlo], b 7 October 1897 in Buchach, Galicia, d 17 April 1979 in Brooklyn, New York. Writer and journalist. In 1923 his poetry appeared under the pen name M. Osyka together with that of Ye. Malaniuk and M. Selehii in the collection *Ozymyna* (Winter Grain). In the years 1926–39 he contributed to various Lviv journals and newspapers. In 1934–9 he wrote books about Italy and its figures. During the Second World War he worked in the *Military Board (Division Galizien) in Lviv and was chief editor (1943–5) of its weekly, *Do peremohy*. As a postwar émigré (from 1948 in the United States) he contributed to the daily *Svoboda* and published several collections of essays on literature, art, and politics – *Z rymy's koho shchodennyka* (From a Roman Journal, 1946), *Nihil novi* (1946), *Bez dokoru* (Without Reproach, 1948), *Homin z daleka* (An Echo from Afar, 1953), *Chornoknyzhnyk iz Zubrivky: Khvoyl'ovyi i khvoyl'ovyzm* (The

Sorcerer from Zubrivka: Khvylovy and Khvylovism, 1955) – and the memoiristic essay collections *Obnizhkamy na bytyi shliakh* (Towards the Main Road, 1957), *Na zakruti: Osin' 1939 roku* (At the Turn: The Autumn of 1939, 1958), *Hrona kalyny uss* (Viburnum Clusters of the Ukrainian Sich Riflemen, 1962), and *Blysky i temriavy* (Flashes and Gloom, 1966). He also translated Italian literary works (G. Deledda, A. Negri, N. Machiavelli's *The Prince*) into Ukrainian. A selection of his works was published in 1989.

Ostroverkhivka settlement. An early *Iron Age settlement near Ostroverkhivka, Zmiiv raion, Kharkiv oblast. Excavation in 1951–3 by B. Shramko revealed 60 ash pits and the remains of earthenware cult figures of animals, Greek pottery, and bronze and iron tools. Six kurhans were found nearby.

Ostrovska, Lidiia [Ostrovsk'a, Lidija], b 18 March 1909 in Kiev. Film actress and director. She completed study at the Lysenko Music and Drama Institute in Kiev (1928) and played in the films *Dzhal'ma* (1929), *Mirabeau* (1930), and *Viter z porohiv* (Wind from the Rapids, 1931). In 1945–81 she worked as a director in the studio of popular science films at the Kiev Artistic Film Studio.

Ostrovska, Liudmyla [Ostrovsk'a, Ljudmyla], b 30 August 1913 in Kiev. Biochemist and plant physiologist. A graduate of Kiev University (1940), she became a professor there in 1966. She studied the biochemical problems of nitrogen assimilation, the biochemical role of trace elements, the structure of chloroplasts involved in photosynthesis, and the molecular organization of photosystem centers at the AN URSR (now ANU) Institute of Plant Physiology.

Ostrovsky, Dmytro [Ostrovsk'kyj], b 23 July 1911 in Yelysavethrad (now Kirovohrad), Kherson gubernia, d 20 July 1979 in Odessa. Stage actor. After studying at the State Institute of Theater Arts in Moscow, he worked in a Donetske touring theater (1928–32), the Kharkiv Workers' and Collective-Farm Theater (1932–8), the Sumy Theater of Drama and Musical Comedy (1939–43), the Chernivtsi Oblast Ukrainian Music and Drama Theater (1943–6), and the Odessa Musical Comedy Theater (1946–79).

Ostrovsky, Isaak [Ostrovsk'kyj], b 25 March 1909 in Kostiantynohrad (now Krasnohrad), Poltava gubernia. Radio physicist. He graduated from the Kharkiv Physics, Chemistry, and Mathematics Institute (1932, now part of Kharkiv University) and worked at the Kharkiv Chemical Technology Institute (1932–52, from 1950 a part of the Kharkiv Polytechnical Institute) and the Physical-Technical Institute of the AN URSR (now ANU) (1944–55). He headed a department at the Institute of Radio Physics and Electronics of the ANU. His main contributions were in the field of the propagation and dispersion of millimeter waves.

Ostrovsky, Nikolai [Ostrovsk'kyj], b 20 September 1904 in Viliia, Ostrih county, Volhynia gubernia, d 22 December 1936 in Sochi, Kuban. Russian writer who lived in Ukraine. In 1927, bedridden as a result of illness, he began his literary career. Ostrovsky's novels, *Kak zakalialas' stal'* (How the Steel Was Tempered, 1934) and *Rozhdennyye burei* (Born by a Storm, 1936), were based on the Bolshevik in-

terpretation of the events of the revolution and the period following the war in Ukraine. They were published many times in large editions, both in the Russian original and in Ukrainian translation, as models of heroic socialist-realist prose works and were propagandistically used in other art forms, such as film, opera, and ballet. Ostrovsky's hostile attitude to the Ukrainian liberation struggle of 1917–20 became the main reason for his official promotion to the status of a cult figure in the Ukrainian SSR: a museum was established in his honor in Shepetivka in 1946, and from 1958 the republic's literary prize of the Komsomol and the Writers' Union of Ukraine was named after him.

Ostrovsky, Olelko [Ostrov's'kyj, Olel'ko], b ca 1880, d 1920. Writer. In 1917–18 he published several historical stories – 'Ruinuvannia Baturyna' (The Destruction of Baturyn), 'Berestechko,' 'Atakuvannia Novoi Sichi' (The Attack on the New Sich), 'Ruinuvannia Chortomyts'koi Sichi' (The Destruction of the Chortomyk Sich), 'Zhovti Vody,' 'Ivan Bohun,' 'Petryk,' and 'Poltava' – and the historical plays *Het'man Ivan Mazepa*, *Nirvana*, and *Stril'tsi* (The Riflemen). He was executed by the Bolsheviks.

Ostrovsky, Volodymyr [Ostrov's'kyj], b 1881 in Reiovets, near Kholm, d 1944. Educator, journalist, and civic leader. After graduating from the Kholm Teachers' Seminary (1901) he taught elementary school in and around Kholm and in Warsaw. In 1917 he taught at a Ukrainian school in Vinnytsia and edited the daily *Shliakh* (1919). In 1921 he moved to Warsaw, where he published the daily *Ukrains'ka trybuna* and edited the biweekly *Dukhovna besida* and his own papers, *Nash svit*, *Nasha besida*, and *Narid*. After settling in Lutske in 1928, he was active in many Ukrainian organizations and was president of the local Prosvita and Silskyi Hospodar societies and the People's Home co-operative. He also edited *Ukrins'ka hromada*, *Nash svit*, and *Nova doba* and contributed to several Lviv papers. He was a member of the Central Committee of the Ukrainian National Democratic Alliance. His short stories about life in the Kholm region appeared in the press and in separate collections, such as *Kholms'ki opovidannia* (Kholm Short Stories, 1923) and *Blakytyni ochi* (Azure Eyes, 1936). He wrote many novelettes, historical and contemporary, including *Khrest ottsia Vasylia* (Father Vasyl's Cross, 1926) and *Kniaz' Syl-Tur* (Prince Syl-Tur, 1938). After the Soviet occupation of Volhynia in 1939, he fled to the Gorlice region in the Generalgouvernement.

Ostrovsky, Volodymyr [Ostrov's'kyj], b 15 April 1908 in Lviv, d 14 April 1980 in Australia. Civic leader. A teacher and an active member of Prosvita, he emigrated to Australia after the Second World War and settled in Sydney. There he took a leading part in Ukrainian civic, cultural, and educational life, including the building of the first Ukrainian school in Sydney. He was president of the Ukrainian Council of New South Wales in 1963–71.

Ostrovsky, Yosyp [Ostrov's'kyj, Josyp], b 6 April 1934 in Dnipropetrovske. Mathematician; corresponding member of the AN URSS (now ANU) since 1978. After graduating from Kharkiv University in 1956, he has taught there (professor since 1967) and worked at the Physical-Technical Institute of Low Temperatures in Kharkiv since 1969. Ostrovsky's basic research is in the theory of functions and the theory of probability. Among other results, he ex-

plained the connection between the asymptotic behavior of the menomorphic function and its distribution of values.

Ostrowsky, Oleh [Ostrov's'kyj], b 16 April 1925 in Chernyliv, Ternopil county, Galicia. Engineer, educator, and artist. After emigrating to England following the Second World War, he worked as an engineer and did advanced studies at Nottingham University (MSE, 1970) and North London Polytechnic (PG Dip Eng Design, 1975). He has lectured in engineering design at the People's College for Engineering and Science in Nottingham and at Nottingham Polytechnic, and has written two textbooks in the field, *Engineering Drawing for Technicians* (2 vols, 1979, 1981) and *Engineering Drawing with Computer-Aided Design Applications* (1989). In 1988 he received a special award from the Institution of Engineering Designers for his contribution to education. His artistic activities include oil painting, designing Ukrainian Christmas and Easter cards, graphics, and book designing.

Ostrozhs'ka narodnia hazeta (Ostrih Popular Gazette). A semiweekly newspaper published in Ostrih, Volhynia, by the local Prosvita society in 1919.

Ostrozky [Ostroz'kyj] (Polish: Ostrogski). A prominent family of Ukrainian Orthodox princes under Lithuanian and Polish rule. Most scholars believe it is descended from the Turiv-Pynske line of the Riurykide dynasty. The progenitor was Prince Danylo Dmytrovych (d after 1366), who fought against Casimir III the Great and built a castle in his town of Ostrih (whence the family name). His son, Fedir (1360–1446), was a supporter of King Jagiełło, who appointed him viceroy of Lutske in 1387. In addition to Ostrih Fedir became owner of Korets, Iziaslav, and other towns. In the 1430s he supported Grand Duke Švitrigaila and fought the Poles in Right-Bank Ukraine. He died as a monk at the Kievan Cave Monastery under the name Teodosii and was later canonized (his feast day is 24 August [11 August OS]). Fedir's son, Vasyl (d ca 1450), was loyal to Casimir IV Jagiellończyk, who appointed him viceroy of Turiv in 1448. He built churches in Ostrih and the *Derman Monastery. After Vasyl's death his son Yurii (d ca 1500) inherited Iziaslav and originated the *Zaslavski noble family. Vasyl's son Ivan (d 1465) inherited Ostrih.

Ivan's son, Kostiantyn (ca 1460 to 1530), was grand hetman of Lithuania and starosta of Bratslav, Zvenyhorod, and Vinnytsia from 1497, starosta of Lutske and marshal of Volhynia from 1507, castellan of Wilno (Vilnius) from 1511, and voivode of Troki (Trakai) from 1522. He fought many battles against the Crimean Tatars in Right-Bank Ukraine and defeated the Muscovites at the Battle of Orsha in 1514. One of the five wealthiest magnates in the Lithuanian-Ruthenian state, he was a defender and patron of the Orthodox church and generously supported the Kievan Cave Monastery, where he was buried.

Kostiantyn's son Illia (1510–39) was starosta of Bratslav and Vinnytsia from 1530. He was also a patron of the Orthodox church and was buried at the Kievan Cave Monastery. Illia's brother Kostiantyn *Ostrozky (ca 1526 to 1608) was the most notable member of the family. Kostiantyn's son Oleksander (1570–1603) was voivode of Volhynia from 1597 and, like his father, a defender of Orthodoxy. Another son, Yanush (Janusz, ca 1554 to 1620), converted to Catholicism in 1579. He became voivode of Volhynia in

1584 and castellan of Cracow in 1593, and was also starosta of Kaniv, Pereiaslav, Cherkasy, Bohuslav, and Bila Tserkva. With his death the family name disappeared, and the huge Ostrozky latifundia – 24 towns, 10 smaller towns, and several hundred villages, mostly in Right-Bank Ukraine – were inherited by the sons of his sister, Eufrozyna Zasławska, and subsequently by members of the *Sanguszko and other magnate families.

Prince Kostiantyn Ostrozky
(portrait by J. Kosiński, 1620)

Yaroslava Ostruk

Ostrozky, Kostiantyn [Ostroz'kyj, Kostjantyn] (Polish: Ostrogski, Konstantyn), b 1526 or 1527 in Dubno, Volhynia, d 23 February 1608 in Ostrih, Volhynia. Ukrainian nobleman and political and cultural figure; starosta of Volodymyr-Volynskyi and marshal of Volhynia from 1550, voivode of Kiev from 1559, and senator from 1569; the most powerful magnate in Volhynia and one of the most influential figures in the Lithuanian-Ruthenian state and Polish-Lithuanian Commonwealth. He was a candidate for the Polish throne after the death of Sigismund II Augustus (the last Jagiellon) in 1572, and for the Muscovite throne after the death of Tsar Fedor Ivanovich (the last Riurykide) in 1598. Ostrozky defended Ruthenian (Ukrainian and Belarusian) political rights and was the de facto leader of Ukraine in the negotiations leading up to the 1569 Union of *Lublin, during which he demanded that Ruthenia be treated as an equal partner of Poland and Lithuania. A generous patron of Ukrainian culture and an ardent defender of the Orthodox faith, he organized and led the resistance to the 1596 Church Union of *Berestia. Although he was not opposed in principle to Orthodox-Catholic unification, he felt that it had to be an open, ecumenical process involving secular church patrons, not just a secret clerical accord.

Ostrozky was an important figure in the 16th-century Ukrainian cultural and national rebirth. He established schools in Turiv (1572), Volodymyr-Volynskyi (1577), and Ostrih (1590), but is best known for founding the *Ostrih Academy (ca 1576), the *Ostrih Press (ca 1578), and the press at the *Derman Monastery (1602). The *Ostrih Bible (1580–1) was printed under his patronage by I. Fedo-

rovych. Ostrozky had close contacts and corresponded regularly with leading defenders of the Orthodox faith, such as the Lviv Dormition Brotherhood, Prince A. Kurbsky, and Bishop H. Balaban. Although he helped to suppress the popular uprising led by K. Kosynsky in 1593, he did little to contain the uprising led by S. Nalyvaiko in 1594–6, and he maintained relations with the Ukrainian Cossacks; for those reasons he was condemned by the Polish nobility.

L. Wynar

Ostrozkyi Kliryk (Ostrih Cleric). The pen name of an unidentified Orthodox polemicist. An opponent of the Church Union of *Berestia, in 1598 he published a tract criticizing the 1438–45 Council of Ferrara-Florence (1598) and a reply to Metropolitan I. Potii, *Otpys na lyst ... Potiia* (Reply to the Letter ... of Potii, 1598–9). The works exhibit the author's erudition and oratorical skills. Scholars have postulated that the author was M. Smotrytsky, Y. Boretsky, or H. Dorofeievych.

Ostrozky-Lokhvyytsky, Ivan [Ostroz'kyj-Loxvyc'kyj], b 1749, d 6 November 1845. Court official of Cossack descent. In the 1790s he was several times elected assessor of the Novyi Oskol land court. His memoirs of the period 1771–1825 were extended to 1846 by his son Petro and were published in *Kievskaia starina* (1886). They are an important source for the history of the Ukrainian gentry and the legal profession.

Ostruk, Yaroslava (pseud of Yaroslava Sosenko), b 1908 in Bosnia, d 5 April 1973 in Philadelphia. Writer. Her novels are set in interwar and wartime Galicia, where she lived. They include *Provallia* (The Abyss, 1961), *Olia* (1962), *Rodyna Gol'div* (The Gold Family, 1964), *Khurtovyna hriade* (The Impending Tempest, 1967), *Te, shcho roz'iednuie* (That Which Divides, 1969), and *Koly merknut' zori* (When the Stars Fade, 1972). Her short stories appeared in émigré periodicals.

Oświęcim, Stanisław, b after 1605, d September 1657. Polish memoirist. As marshal of the court of Grand Hetman S. Koniecpolski and an attendant at the court of King Władysław IV he took part in Polish diplomatic missions and military campaigns against the Crimean Tatars, Cossacks, and Swedes. He kept a daily diary, of which fragments for the years 1643–7 and 1650–1 have been preserved. Excerpts were published in *Kievskaia starina* (1882, nos 1–2, 5–6, 9, 11–12).

Oświęcim Concentration Camp (German: Auschwitz; aka Auschwitz-Birkenau). Nazi Germany's largest concentration and extermination camp, located approx 60 km west of Cracow near the Polish town of Oświęcim. The camp was established by order of the SS chief H. Himmler on 27 April 1940 and was operational by June 1940. It was later expanded and divided into three sections: Auschwitz 1, the original camp, reserved for political

prisoners; Auschwitz II (Birkenau), a huge extermination complex established in October 1941 approx 3 km from the original camp; and Auschwitz III, which in May 1942 became a slave labor camp.

The major focus of activity in Oświęcim was the mass extermination of Jews. It is estimated that up to a quarter (1.5 million) of the Jews who were murdered in the Nazi quest for a so-called Final Solution died there. Several gas chambers (each capable of killing up to 6,000 people daily) and crematoriums were set up in the Birkenau complex for that purpose. Many of the Jews in the camp originated in Ukraine. In addition to the Jews, Gypsies, Poles, Ukrainians, and other people were interned at the camp.

The first Ukrainians in Oświęcim came from the western regions of Ukraine, often brought in with Polish prisoners. From mid-1941 they were joined by Soviet Ukrainian POWs and political prisoners, including members of the Organization of Ukrainian Nationalists (OUN). A total of more than 15,000 Ukrainians were interned in the camp; most of them perished as a result of multiple privations, epidemics, ill treatment, or murder.

In spite of protests by inmates Ukrainians were generally registered not according to their nationality, but according to what the camp administration considered to be their citizenship. Those from the Soviet Union were given the letter 'R' to wear as a badge of identification, those from Poland the letter 'P,' from Czechoslovakia the letter 'C,' and from Rumania the letters 'Ru.' There were exceptions to the rule: some Ukrainian women were allowed to wear the letter 'U' in correspondence with their nationality, as was later a small group of males in one section of the camp.

Soviet nationals (including Ukrainians) and Jews were denied mail and parcels from home. The camp administration also forbade the Ukrainian Red Cross to come to the assistance of their compatriots in the camp.

Ukrainians, especially those from Soviet territories, were subjected to the crudest forms of humiliation and torture. According to the Nazi racial hierarchy they ranked above the Jews and Gypsies, who were ahead in the order of extermination, but below most other ethnic groups. Most of the Soviet Ukrainian POWs died shortly after their arrival. Between October 1941 and February 1942 approx 8,320 Soviet POWs were put to death by what is believed to have been phenol injections to the heart. Although plans to sterilize all inmates of Slavic origin were not realized, Ukrainians were used, along with other Slavs, in experiments to test sterilization methods. Ukrainians were also among those selected for other Nazi experiments, including the September 1941 tests on the Zyklon B gas that was later used for mass killings. Although most Ukrainians were used as slave labor, a small number served in auxiliary camp administration posts, as overseers and guards, for example. Ukrainian camp guards in Oświęcim staged an insurrection against their masters on the night of 3 July 1943. It proved unsuccessful, and all the rebels were killed. Ukrainians were also involved in other forms of sporadic resistance carried out during the course of 1944. A number of Ukrainians managed to escape from Oświęcim. In 1943-4 the harsh treatment of non-Jewish inmates eased somewhat when the Germans began considering them an invaluable source of slave labor for the war economy.

As the Red Army advanced into Poland, most of the inmates in Oświęcim were evacuated to other concentra-

tion camps in Nazi-occupied territory. When the Red Army arrived at the camp in January 1945, they found 7,650 prisoners remaining.

The background of Oświęcim's Ukrainian inmates was mixed. Most were POWs, especially from central and eastern Ukraine, or former political activists. Among the latter group were B. *Kordiuk and R. *Rozdolsky. V. and O. Bandera, brothers of the OUN leader S. *Bandera, were killed in the camp. Several former Ukrainian inmates have written or illustrated their memoirs of the camp. Ukrainian survivors of Oświęcim later joined other former concentration camp inmates to form the League of Former Ukrainian Political Prisoners.

S. Cipko

Leonid Osyka

Osyka, Leonid, b 8 March 1940 in Kiev. Film producer. He graduated from the State Institute of Cinema Arts in Moscow (1966). Among his films are a poetic cinema version of V. Stefanyk's novellas called *Kaminnyi khrest* (The Stone Cross, 1968) and the heroic epic cinema version of I. Franko's *Zakhar Berkut* (1972), as well as *Tryvozhnyi misiats' veresen'* (The Alarming Month of September, 1977) and *More* (The Sea, 1978).

Osypenko. See Berdianske.

Osyipiv, Mykola, b and d ? Linguist of the 1920s and 1930s in Kharkiv. He wrote a practical Russian-Ukrainian dictionary of words most often used in administrative circles (1926), a booklet of lexical and syntactic reminders for teachers (1928), a booklet about the main changes in the new Ukrainian orthography (1929), a small orthographic dictionary of loanwords in the Ukrainian language (1930), and a few lexicological articles. He disappeared during the terror of the 1930s.

Ospovycheva, Antonyna [Ospovyčeva] (née Skřivan; stage name: Tanska), b 5 May 1855 in Prague, Bohemia, d 22 November 1926 in Lviv. Actress and singer

(soprano) of Czech origin. She began her career in the Polish touring troupes of J. Piasecka (1877) and W. Antoniewski (1894–5) and then became a leading actress in the Ruska Besida Theater (1882–1914), the Theater of the Legion of Ukrainian Sich Riflemen (1915), Ternopilski Teatralni Vechory (1916–17), and the Chernivtsi Ukrainian Theater (1918–19). With an extensive repertoire of earlier heroic roles and later character roles, Osypovychyeva performed well in drama, comedy, and operettas. Her roles included Vustia in M. Starytsky's *Oi ne khody, Hrytsiu ...* (Don't Go to the Party, Hryts ...), Hetman Doroshenko's mother in V. Pachovsky's *Sontse Ruiny* (The Sun of Ruin), and Czypira in J. Strauss's *Der Zigeunerbaron*.

Otaman (from Turkic origin). The leader (usually elected) of all or parts of the Zaporozhian Host. In the Zaporozhia the *kish otaman was the chief executive officer, and each Cossack *kurin at the Sich was headed by a kurin (*kurinnyi*) otaman. If an otaman was not elected but appointed, for instance during a military campaign, he was called acting (*nakaznyi*) otaman. In the Hetman state the company (*sotennyi*) and regimental town (*horodovyi*) otaman was the captain's lieutenant. A village's kurin otaman commanded its military unit, and the village (*sil's'kyi*) otaman was the civil authority. There were also otamans of the Hetman state's general artillery, regimental artilleries, volunteer regiments and companies, and mercenary cavalry (*zholdak*) troops.

In the Army of the UNR of 1917–19 an otaman was a division, corps, or army group commander. The rank was replaced by that of general in 1920. In the Legion of Ukrainian Sich Riflemen and the Ukrainian Galician Army an otaman was equal in rank to a major. As commander in chief of the UNR Army the head of the UNR Directory (later the president of the UNR) was called the supreme otaman (*holovnyi otaman*). The commanders of the various partisan groups and units that operated during the Ukrainian-Soviet War were also called otamans, and their often arbitrary and even anarchic rule came to be known as *otaman-shchyna*.

Valentyn Otamanovsky

Polina Otava

Otamanovsky, Valentyn [Otamanovs'kyj], b 26 February 1893 in Zlatopil, Chyhyryn county, Kiev gubernia, d 1964 in Kharkiv. Historian, bibliographer, and community figure. In 1917 he was a member of the Central Rada representing the Ukrainian Party of Socialists-Independents. He was a cofounder of the *Vernyhora publishing house and wrote a popular novel for youth, *Syn*

Ukrainy (Son of Ukraine, 1919), under the pseudonym Zlotopolets. In the 1920s he was an associate of the VUAN, a member of its Commission for the Study of the History of Western Ruthenian and Ukrainian Law, and director of the Vinnytsia branch of the National Library of Ukraine and its Research Cabinet for the Study of Podilia. He was arrested and sentenced during the Union for the Liberation of Ukraine show trials of 1930. In the 1940s and 1950s, after his release from a labor camp, he worked in Leningrad. He edited a collection of articles about Vinnytsia okruha (1926) and wrote a brochure about the tasks and needs of regional studies in Podilia (1926), an article about S. Rudansky's roots (1929), and books in Russian about the towns of Right-Bank Ukraine under Polish noble rule from the mid-17th to the late 18th century (1954) and Vinnytsia as a Ukrainian city type in 14th- to 17th-century southern Right-Bank Ukraine (1964).

Otava, Polina, b 1899, d 1937? Stage and film actress; wife of K. Koshevsky. She worked in the Kiev Ukrainian Drama Theater (1924–37). In 1928 she acted in the films *Zvenyhora* and *Za stinoui* (Behind the Wall). In 1937 she fell victim to the Stalinist terror and disappeared.

Otchychi. A special category of peasants in 15th- and 16th-century Ukraine, Russia, and Lithuania. They were peasants who had lived on the same parcel of land for many generations. With the introduction of serfdom they were often the peasants who were enserfed first, by being deprived of the right to move from their land.

Otchyna. See *Seignory*.

Otechestvennye zapiski (Notes of the Fatherland). A Russian literary and intellectual journal established in St Petersburg from 1820 to 1884. With V. Belinsky as literary editor until 1846, it became the pre-eminent Russian 'thick' journal of its day. Ukrainian literary and scholarly works were reviewed on its pages. In April 1884 the tsarist police arrested some of its contributors as revolutionaries, and the journal was closed down. Among its Ukrainian contributors were Ye. Hrebinka, M. Kostomarov, H. Kvitka-Osnovianenko, M. Vovchok, D. Mordovets, and M. Ziber. V. Bograd's three-volume index of its contents appeared in Moscow in 1959, 1971, and 1985.

Otechestvennyi sbornik (Fatherland Collection). A weekly and later semimonthly supplement to the newspaper **Vistnyk*, published in Vienna in 1853–9, 1861–2, and 1866 (a total of almost 300 issues). Edited by V. Zborovsky (pseud of Yu. Vyslobotsky), it contained prose, poetry, and articles on historical and economic topics. Among the regular contributors were A. Metlynsky, M. Ustyianovych, B. Didytsky, I. Hushalevych, and M. Kozanovych. Initially it was published in the Cyrillic alphabet, but later the **hrazhdanka* script was frequently used, especially in literary pieces.

Otkalenko, Nina (née Pletneva), b 23 May 1928 in Kozhlia, Kursk oblast, RSFSR. Runner. From 1948 she represented Ukraine at USSR meets. She was the 1954 European women's champion in the 800-m run; set five world records in the 800-m and in the 880-yd run; achieved impressive results in the 500-m, 100-m, and 1,500-m runs; and won many Ukrainian and USSR championships.

Col Yuri Otmarshtain

Otmarshtain, Yurii [Otmarshtajn, Jurij], b 10 April 1890 in Tyraspil, Kherson gubernia, d 2 May 1922 in Szczepiórno, Poland. UNR Army officer. After graduating from the Nikolai Military Academy of the General Staff in St Petersburg (1916) he served in the Russian army. In 1918 he joined the Lubni Cavalry Regiment and soon assumed command of it. After taking part in the anti-Hetman coup, he was appointed chief of staff of the Siege Corps of Sich Riflemen in early 1919, and of the Second Division of Sich Riflemen in July 1919. In 1921, as a colonel, he was chief of staff of the Ukrainian army that conducted the Second Winter Campaign. He was killed by unknown assailants in a Polish internment camp.

Otolaryngology. A branch of clinical medicine dealing with ear, nose, and throat diseases. At the end of the 18th century in the Russian Empire, N. *Ambodyk-Maksymovych developed a fairly precise terminology for diseases of the ear, nose, and throat system. By the end of the 19th century Ukrainian scientists in the field included V. *Karavaiv, V. *Pokrovsky, L. Marovsky, M. Zhuk, and M. Lomykovsky. The first department of otolaryngology was established at Odessa University in 1895 (O. Heshelin, director); it was followed by similar departments at Kiev and Kharkiv universities. In 1907 a clinic was established at Kiev University. After 1922 otolaryngology was taught in all medical institutes as a compulsory subject. Ukrainian scientists who have contributed to the field include M. *Volkovych, M. Trofimov, S. Kompaniiets, O. *Puchkivsky, Ye. Kharshak, O. Skrypt, O. *Kolomiichenko, L. Zarytsky, and S. Mostovy. The Research Institute of Otolaryngology in Kiev was opened in 1960 to co-ordinate the research and development of this specialty. Regional scientific societies of otolaryngologists are co-ordinated by the Ukrainian Otolaryngological Association. The Russian-language journal *Zhurnal ushnykh, nosovykh i gorlovykh boleznei* has been published in Kiev since 1959.

Otolaringologiiia na Ukraine (Kiev 1967)

P. Dzul

Otrok, b and d ? 12th-century Cuman khan; son of Khan *Sharukan and father of Khan *Konchak. As a result of Sharukan's losses along the northern Donets River to a succession of Rus' princes (in 1109, 1111, and 1116) Otrok was forced to retreat with his federation to northern Caucasia, where he entered the service of Georgian rulers. The

Cumans reappeared in the steppe region of Ukraine toward the middle of the century. Otrok is portrayed as the hero of a popular Ukrainian tale about *yeвшan-zillia* (wormwood).

Otrok. A junior member of the prince's **druzhyna* in Kievan Rus'. The *otroky* served as the prince's bodyguard, took part in military campaigns, and performed personal services for the prince. By the 12th century they were serving as lower officials in the administration and the courts. They tried cases, collected duties and taxes, and performed ambassadorial functions. A prince could retain several hundred *otroky*. Boyars and metropolitans had their own guard of *otroky*.

Otrokovsky, Volodymyr [Otrokovs'kyj], b 25 October 1892 in Kudryntsi, Kamianets-Podilskiy county, Podilia gubernia, d 26 April 1918 in Kiev. Literary historian and poet. He graduated from Galagan College (1910) and worked in V. Peretts's philological seminar at Kiev University, where he studied Old Ukrainian literature and Ukrainian dialects. Seventeen of his symbolist poems appeared in Kiev's Russian periodicals (mostly in 1918–19). His study of T. Zemka appeared in 1921.

Otroshchenko, Serhii [Otroščenko, Serhij], b 2 April 1910 in Omsk, Siberia, d 6 September 1988 in Moscow. Painter and graphic artist. He studied at the Odessa (1930–5) and Kiev (1935–40) art institutes. Since 1969 he has worked in Moscow. He has painted socialist-realist industrial landscapes and genre paintings and decorative murals. His easel paintings include *Partisans* (1947), *Avengers* (1958), *Shepherd* (1961), *Hutsul Girl* (1972), and the series 'Kiev' (1976–7). He cocreated three wall panels in the lobby of the Ukraine pavilion at the Exhibition of the Economic Achievements of the USSR in Moscow (1951–3) and did the panel *Song from the Time of the Civil War* in the Noty music store on the Khreshchatyk in Kiev (1959). He has also designed scenery for the Odessa and Kiev opera and ballet theaters.

Ottawa. The capital (1986 pop 819,263) of Canada, located on the Ottawa River on Ontario's eastern border with

St John the Baptist Ukrainian Catholic National Shrine in Ottawa

Quebec. In the 1981 census approx 8,400 residents gave Ukrainian as their national origin.. The first Ukrainian immigrants settled in Ottawa in 1905. They were mostly single men who worked on the railways, on farms, and in the forests. The earliest community organizations were the Prosvita society (1908), a branch of the Ukrainian Social Democratic party (1912), and the SS Cyril and Methodius Ruthenian National Organization (1913). St John the Baptist Ukrainian Catholic parish was established in 1914, and the Bukovynian Orthodox Church of the Holy Trinity was consecrated in 1918. By 1914 there were over 200 Ukrainians in Ottawa. After the war a branch of the Ukrainian Labour-Farmer Temple Association was organized. Few newcomers were attracted to Ottawa in the interwar period, because there was little industry there. During the war the expanding federal government attracted educated and professional Ukrainian Canadians from across the country, and a local branch of the Ukrainian Canadian Committee (now Congress) was formed.

After the war the Ukrainian community grew (1,760 in 1951, 2,950 in 1961, 5,200 in 1971). Local branches of national organizations were established in Ottawa: the Plast Ukrainian Youth Association (1949), the Ukrainian Youth Association (1953), the Canadian League for the Liberation of Ukraine (1957), and the Ukrainian National Federation (1957). Another Orthodox parish was organized in 1949, and the Catholic parish built a new church, the Cathedral of St John the Baptist Ukrainian Catholic National Shrine (1987), as a project to commemorate the millennium of Christianity in Ukraine. A Basilian monastery was opened in Ottawa in 1962, and Holy Spirit Seminary was established at the monastery in 1982. The latter moved to its own building in 1984. The Sheptytsky Institute was established at St Paul University in 1990 as a center for scholarship related to Ukrainian Christianity. A Ukrainian language and literature program was introduced at the University of Ottawa in 1952 by C. Bida.

As the capital of Canada, Ottawa has been the home of numerous Ukrainian politicians and civil servants of note, including M. Starr, P. Yuzyk, V. Kaye-Kisilewsky, and Gov Gen R. Hnatyshyn. It also became the site of the Ukrainian Information Office, established by the national office of the Ukrainian Canadian Congress, in 1987. The city houses valuable archival collections pertaining to Ukrainian and Ukrainian-Canadian studies at the National Archives of Canada and Carleton University (the Batchinsky Collection). The Canadian Museum of Civilization contains a collection of Ukrainian-Canadian artifacts.

Otter, European (*Lutra lutra*; Ukrainian: *vydra*). A predatory mammal of the weasel family Mustelidae. The otter has a lithe, slender body, long neck, flattened head, small ears, and short, webbed paws. It grows to up to 70 cm in length and weighs up to 10 kg. Its waterproof fur is shiny, dense, and short, dark brown on the outside and grayish inside. Otters are intelligent, inquisitive, and playful animals. They swim easily and travel considerable distances under water without surfacing for air. They feed on small aquatic animals and live in burrows along riverbanks and lakeshores. They can be found throughout Ukraine, with the exception of the Crimea. The otter's valuable fur makes it a commercially important animal. Because of widespread extermination in the past, hunting for otters is licensed.

Ottoman Empire. See Turkey.

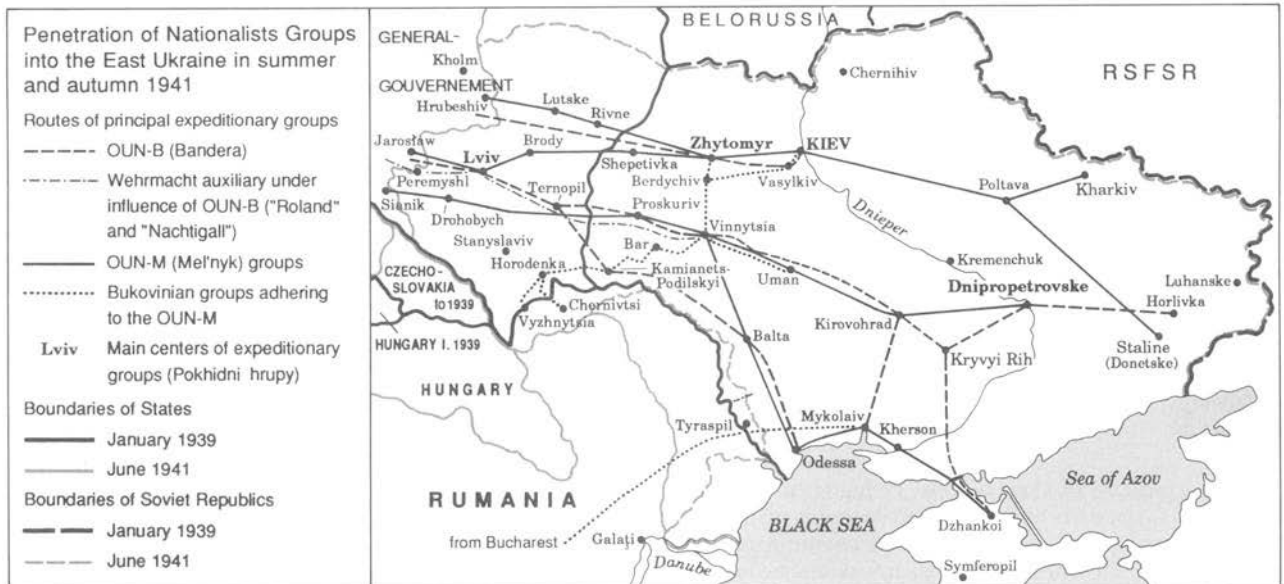

OUN. See Organization of Ukrainian Nationalists.

OUN expeditionary groups (Pokhidni hrupy OUN). Secret groups of organizers and propagandists formed by both the Bandera (OUN[B]) and Melnyk (OUN[M]) factions of the *Organization of Ukrainian Nationalists from among their members in German-occupied Galicia, Rumanian-occupied Bukovyna, and Central and Western Europe. They went into Soviet Ukraine after the outbreak of the Soviet-German War in June 1941 to organize local sovereign Ukrainian administrations that took power after the Bolshevik authorities had fled and before the Germans had established control. Plans to send in such groups were developed in early 1941, before the German invasion of the USSR, and were contingent upon a quick German victory.

The OUN(B) formed and trained three expeditionary groups in the Sian and Lemko regions. Group North, commanded by M. Klymyshyn and then D. Myron and P. Sak, penetrated into Right-Bank Ukraine toward Kiev; Group South, commanded by Z. Matla and T. Semchysyn, into southern Ukraine toward Dnipropetrovske and the Donbas; and Group East, commanded M. Lemyk and O. Mashchak, into Left-Bank Ukraine toward Kharkiv. A month after the German invasion began, those groups had reached (mostly by bicycle and wagon) as far east as the cities of Vinnytsia, Berdychiv, Zhytomyr, and Kryvyi Rih and had avoided contacts with German units. By that time, however, only a third remained of the approx 1,500 men who had set out on the campaign. They organized Ukrainian national activity on the local level, recruited new members, and spread integral-nationalist propaganda and news of the *proclamation of Ukrainian statehood made in Lviv on 30 June 1941.

In early September 1941 the Gestapo conducted mass arrests of the groups' members active in Zhytomyr, Vasylykiv, Berdychiv, Vinnytsia, Mykolaiv, and Kherson. Some were executed, and the remainder were sent to concentration camps. In mid-September, at the same time that the Gestapo conducted mass arrests of OUN(B) members in Western Ukraine (including S. Bandera and other leaders), SS Einsatzgruppen smashed Group East in Myrhorod and part of Group North. Members of Group South in Dnipropetrovske, Zaporizhia, Balta, Mykolaiv, Kherson, and Dzhankoi (in the Crimea) were arrested and executed. In response to the German oppressions, terror, and deportation and extermination policies the OUN(B) leadership still at large (headed by M. Lebed) ordered the remaining members of the expeditionary groups to develop an anti-Nazi and anti-Soviet partisan underground. The resistance was co-ordinated from two centers: from Kiev by Myron, with the assistance of D. Maivsky, M. Prokop, P. Sak, and Ya. Khomov; and from Dnipropetrovske by Matla and, from May 1942, V. Kuk, with the assistance of M. Richka, O. Logush, P. Duzhy, T. Semchysyn, and Ye. Stakhiv. The resistance attracted many local recruits (it totaled some 5,000 men and women) and remained active in the Dnipropetrovske, Kryvyi Rih, Zaporizhia, Mykolaiv, Vinnytsia, Odessa, Kirovohrad, Chernihiv, Poltava, Kharkiv, Donbas, Mariupol, and Crimea regions until the Germans' retreat. Most of its leaders and members did not survive, however.

The OUN(M) expeditionary groups were assembled in

OUN EXPEDITIONARY GROUPS

Hrubeshiv and Krystynopil (led by I. Nebolia), Jaroslav and Radymno (led by I. Maly), and Sianik (led by T. Bak-Boichuk). From there 500 of their members penetrated in July 1941 into Volhynia, Subcarpathia, and, from there, Bukovyna, as far east as Kiev, and as far south as Odessa and Mykolaiv. Their activity was concentrated in the Zhytomyr region and, from September 1941, Kiev, where they openly organized municipal administrations, civic and community institutions, schools, and newspapers and initiated the creation of the *Ukrainian National Council. During the first few weeks of the German occupation of Kiev the 200 OUN(M) members there were joined by 1,000 more, who arrived with the *Bukovynian Battalion. The supreme commanders of the OUN(M) groups were at first O. Senyk and M. Stsiborsky. After their assassination in Zhytomyr their duties were assumed in Kiev by O. Olzhych, Ya. Haivas, Ya. Shumelda, M. Antonovych, O. Boidunyk, and M. Kapustiansky. Other prominent members active in Kiev were P. Oliinyk, I. Rohach, O. Chemerynsky, B. Yakhno, R. Gordon-Bida, R. Zakhvalynsky, M. Kuzmyk, O. Zybachynsky, O. Zhdanovych, and Z. Domazar. Units of the expeditionary groups were sent from Kiev to Kharkiv (led there by B. Konyk), Poltava, Dnipropetrovske (B. Mykytchak), Zaporizhia and Mykolaiv (O. Masikeyvych), the Donbas, and the Crimea (B. Sukhoversky).

The OUN(M) expeditionary groups also suffered German repressions. In the Zhytomyr region several dozen members were arrested by the Gestapo in late November 1941 together with 700 other Ukrainians who had gathered to commemorate the 1921 Winter Campaign of the UNR Army and the massacre at Bazar. Many were subsequently shot. Further arrests took place in Kiev in December 1941 and February 1942, and dozens of leading OUN(M) members (eg, M. and O. Teliha, I. Rohach, I. Irlivsky, I. Koshyk, O. Chemerynsky, D. Huzar-Chemerynska) were executed. Others were shot in Mykolaiv (eg, B. Siretsky, V. Baranetsky, V. Antoniuk, V. Maliarchuk), Lubni, Kremenchuk, Kamianets-Podilskyi, Chernihiv, and Poltava. Part of the leadership and some members went underground, mostly in Western Ukraine and espe-

cially in Volhynia, where they joined the anti-German, anti-Soviet resistance headed by T. *Borovets.

O. Shtul, Ye. Stakhiv

Ovcharenko, Anatolii [Ovčarenko, Anatolij], b 10 April 1937 in Ihren, now within the city limits of Dnipropetrovske. Stage actor. His repertoire ranges from classics to contemporary Soviet plays. Since completing study at the Kiev Institute of Theater Arts in the 1960s he has worked in the Vinnytsia Ukrainian Music and Drama Theater. Among his roles have been Hryts in *V nedilii rano zillia kopala* (On Sunday Morn She Picked Herbs, based on O. Kobylianska's novelette) and Oleksii in V. Vyshnevsky's *Optymistychna trahediia* (Optimistic Tragedy).

Ovcharenko, Dmytro [Ovčarenko, Dmytro], b 1 November 1906 in Merefá, Kharkiv county, d 10 November 1976 in Kharkiv. Scenery designer. In 1929 he completed study at the Kharkiv Art Institute (pupil of O. Khvostenko-Khvostov and M. Burachek). He worked as a designer in the Kharkiv Ukrainian Drama Theater, in the Kharkiv Theater of Opera and Ballet, and in the Donetsk Ukrainian Music and Drama Theater. From 1931 he taught at the Kharkiv Art Institute.

Ovcharenko, Fedir [Ovčarenko, Fedir], b 8 February 1913 in Vasylivshchyna, Sumy county, Kharkiv gubernia. Chemist and CPU figure; AN URSR (now ANU) full member since

Fedir Ovcharenko

1961. A graduate of the Hlukhiv Pedagogical Institute (1934), he taught there and at the Kiev Veterinary Institute (1937–41, 1945–9) and worked at the ANU Institute of General and Inorganic Chemistry (1949–67), where he headed the Department of Chemical and Geological Sciences (1959–62), and Institute of Colloidal Chemistry and Hydrochemistry (1967–73), where he headed the Department of Colloidal Chemistry and served as the institute's director (1967–8). He also directed the CC CPU Secretariat's science and culture department (1956–8), was appointed by P. Shelest as CC CPU ideological secretary (1968–72), and was elected a CCCPU member and Politburo candidate member (1968–75). Ovcharenko researched the periodicity of sedimentation; the structure of mineral dispersions; and their adsorptive, ion-exchange, and electrokinetic properties. He pioneered new approaches to the study of the lyophilicity of dispersed minerals and established the interaction mechanism of polar and nonpolar substances with their surface. He wrote over 200 papers, coauthored several monographs, and edited over a dozen books and collections.

Ovcharenko, Mariia. See Pshepiurska-Ovcharenko, Mariia.

Ovcharenko, Vasyl [Ovčarenko, Vasył'], b 1 August 1889 in Nizhen, Chernihiv gubernia, d 4 October 1974 in Miami. Composer, French horn player, pedagogue, and conductor. After studying at the Kharkiv and Moscow conservatories, he conducted the St Sophia Cathedral Choir in Kiev and then worked in Kharkiv. He fled to Germany in 1944 and emigrated to the United States in 1950. His works include a symphony, a symphonic suite, the *Overture on Ukrainian Folk Themes* (1931), the march 'Western Ukraine' on folk themes (1929), a fantasy on themes from M. Lysenko's opera *Taras Bulba* (1929), 'Dumka' (Thought) in memory of M. Lysenko for string orchestra (1962), arrangements of folk songs, and art songs to texts by T. Shevchenko, O. Varavva, K. Perelisna, and L. Poltava. He also prepared new editions and orchestrations of scores by M. Lysenko (including the opera *Pan Kots'kyi* [Sir Catsky]), K. Stetsenko, M. Koliada, and M. Fomenko. His opera *Fox Mykyta* premiered in 1970 in Philadelphia.

Ovcharenko, Vasyl [Ovčarenko, Vasył'], b 1 December 1899 in Drabivtsi, Zolotonosha county, Poltava gubernia, d 14 April 1978 in Dnipropetrovske. Stage actor and direc-

tor. He began his theatrical career in 1923 in Ukrainian touring theaters and then completed study at the theatrical college in Dnipropetrovske in 1933. In 1933–74 he was a leading actor in the Dnipropetrovske Ukrainian Music and Drama Theater.

Ovcharov, Hryhorii [Ovčarov, Hryhorij], b 8 February 1904 in Mohyliv, Verkhnodniprovske county, Katerynoslav gubernia. Literary critic. He was a Komsomol activist (1921–6), was editor of the journal *Krytyka* (1929–32), and worked for the chair of literature of the All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes. After M. *Skrypnyk's suicide Ovcharov was persecuted because he had been Skrypnyk's protégé and personal secretary. Ovcharov's main works stress loyalty to Party ideology: *Narysy suchasnoi ukrains'koï literatury* (An Outline of Contemporary Ukrainian Literature, 1931), *Za bil'shovizatsiiu proletars'koï literatury* (For the Bolshevization of Proletarian Literature, 1931), *Bil'she neprymyrennosti do vorozhykh vystupiv* (More Implacability toward the Enemy's Appearances, 1932 [a critique of V. Vynnychenko's *Soniasna mashyna* [Solar Machine]), and *Mykola Skrypnyk i radians'ka literatura* (Mykola Skrypnyk and Soviet Literature, 1933). He was rehabilitated in 1956, and published *Volodymyr Maiakovs'kyi – spivets' druzhby narodiv* (Vladimir Maiakovsky, the Praiser of the Friendship of Nations, 1956).

Ovchynnyk, Mykhailo [Ovčynnyk, Myxajlo], b 19 September 1901 in Hlukhiv, Chernihiv gubernia, d 3 December 1970 in Detroit. Zoologist; member of the AN URSR (now ANU) from 1932 and of the Ukrainian Free Academy of Sciences. A graduate of Kiev University (1926), he worked at the Experimental Station for Pisciculture and the Ukrainian Scientific Research Institute of Fish Management, took part in numerous hydrobiological expeditions, and taught in Kiev and Zhytomyr. He was imprisoned in a Soviet concentration camp (1938–41). In 1943–8 he taught at the *Ukrainian Free University and in 1949 he moved to the United States, where he taught ichthyology at Michigan State University and was curator at its natural history museum. He researched the fishes of Ecuador in conjunction with the Latin American Studies Center.

Ovchynnykov, Vasyl [Ovčynnykov, Vasył'], b 25 December 1907 in Kamianske (now Dniprodzerzhynske), d 5 April 1978 in Kiev. Painter and muralist. In 1928–32 he studied at the Kharkiv Art Institute under V. Palmov, O. Bohomazov, and M. Rokytsky. Works such as *The Typist* (ca 1929) show his concern for depicting urban life in a thoroughly modern style. During the government repressions of the 1930s he abandoned his innovations and began working in a realist style (eg, *Love*, 1931).

Overtime work. Work in excess of the standard day or week and, usually, paid at a higher rate (see *work). In the 19th century long working hours were normal: the average industrial worker in the 1870s and 1880s worked 12 to 14 hours a day, not including lunch breaks, travel time, or overtime. In the Russian Empire the average overtime during that period was 20 to 30 minutes per day. The emerging trade-union and workers' movement demanded, among other things, restrictions on compulsory overtime and additional payment for overtime. In 1897 a law

on overtime restricted compulsory overtime to 120 hours per year and to cases where the existing technology made overtime necessary. Voluntary overtime was not regulated by law. The laws, however, were violated with impunity. In Kharkiv gubernia in 1899 and 1917, 19 percent of the industrial workers surveyed had worked 166 hours of compulsory overtime per year. The rate of pay was the same as for regular work.

After the revolution the 1922 Labor Code prohibited overtime as a general rule. Exceptions were for defense projects, public emergencies, essential social services (water supply, transport, telephone services), and pressing repair and maintenance work. Originally overtime had to be sanctioned by the Rates and Conflicts Commission; later, only by the factory trade union. The code prohibited anyone from working more than 120 overtime hours per year and for more than 4 overtime hours on two consecutive days, except in seasonal work. In practice, however, the law was widely ignored, especially after the five-year plans were introduced. The law made no provision for overtime as a means of meeting production plans on time, yet such became the most common reason for overtime, especially at the end of the month. With legislation in 1940, workers in most branches of industry received a bonus of 50 percent of the regular rate for the first two hours of overtime and a bonus of 100 percent for all subsequent hours. Piece-rate workers received in addition to their regular wage a bonus of 50 percent of the tariff-wage for time-rate workers in the same tariff class for the first two hours and a bonus of 100 percent for all subsequent hours. Compulsory overtime for young workers under 16, nursing mothers, and pregnant women was prohibited. Overtime was limited to 120 hours per annum and 4 hours in any 48-hour period. In practice the rules were widely ignored – a state of affairs that gave rise to workers' protests in the 1960s and 1970s, especially in the Donbas region, where miners protested against compulsory work on Sundays. The current labor legislation is largely the same as that of 1940. Since the rise of independent trade unions in 1988–9, violations of the labor code have become less frequent.

Ovidiopil or **Ovidiopol** [Ovidiopil' or Ovidiopol']. VII–11. A town smt (1990 pop 10,600) on the left bank of the Dniester Estuary and a raion center in Odessa oblast. At the beginning of the 18th century the Turkish fortress of Khadzhy-Dere stood at the site. It was seized by Russia in 1791, completely rebuilt in 1793, and renamed. Today Ovidiopil is a port and railway terminal. It has a canning and a brick factory and an automatic-press-building plant.

Ovruch [Ovruch]. II–9. A city (1990 pop 18,900) on the high left bank of the Noryn River and a raion center in Zhytomyr oblast. It is first mentioned in the chronicles under the year 946 as Vrchy, a *Derevlianian settlement. In 977 the princes Oleh and Yaropolk I Sviatoslavych fought there; *Oleh is purportedly buried in a large grave nearby. In the second half of the 12th century Ovruch was part of Riuryk

St Basil's Church (late 12th century) in Ovruch

Rostyslavych's principality. In 1362 it came under Lithuanian rule, and in 1569 it was transferred to Poland and made a center of Ovruch starostvo. After the partition of Poland in 1793, it was annexed by Russia and became a county town in Volhynia gubernia. Today the town has a dairy, a canning factory, and a winery, as well as railway enterprises. Its architectural monuments include St Basil's Church (12th–13th century, restored 1908–12) and monastery buildings (1907–9).

Ovruch Ridge. An upland in the central portion of Polisia in northern Zhytomyr oblast. Nearly 50 km in length and 5–12 km in width, it stretches in an east–west direction from the town of Ovruch, with elevations ranging from 185 to 316 m. It consists mainly of Proterozoic quartzites, shales, and sandstones covered by a loamy soil and, in some locations, loess. The ridge has forests (mainly pines and oaks), which cover about one-quarter of its total area, and is strongly dissected by ravines.

Ovrutska, Mariia [Ovruc'ka, Marija], b 9 April 1895 in Kiev, d 7 September 1986 in Kiev. Translator. She worked as an editor and manager of the foreign literature department at the Radianska Shkola publishing house. From 1930 on she translated works by M. Kotsiubynsky, I. Franko, Yu. Yanovsky, A. Holovko, O. Vyshnia, I. Le, O. Korniihuk, and S. Skliarenko into German, and works by G.B. Shaw, A.C. Doyle, R. Rolland, F. von Schiller, L. Feuchtwanger, H. de Balzac, and other British, French, and German writers into Ukrainian.

Ovsianiko-Kulikovskiy, Dmitrii [Ovsjaniko-Kulikovskij, Dmitrij], b 4 February 1853 in Kakhivka, Tavriia gubernia, d 9 October 1920 in Odessa. Russian literary scholar and theorist, linguist, and Sanskritologist; honorary member of the Russian Imperial Academy of Sciences from 1907. He studied comparative Indo-European gram-

Dmitrii Ovsianiko-Kulikovskiy Vasyl Ovsienko

mar, Greek, and Sanskrit at the Universities of St Petersburg (1870–3, 1876–7) and Odessa (1873–6; PH D, 1887). In Odessa he became a Ukrainophile and joined the local Hromada. From 1877 to 1882 he lived abroad. In Geneva he became a disciple of M. Drahomanov, who published anonymously his pamphlet *Zapiski iuzhno-russkago sotsialista* (Notes of a South Russian Socialist, 1877). After his return he was a privatdocent in Odessa (1883–7) and wrote for *Odesskiiia novosti*. He became a professor at the Universities of Kazan (1887–8) and Kharkiv (1888–1905) and at the St Petersburg Higher Courses for Women (1905–18). From 1894 to 1904 he edited Kharkiv University's *Zapiski*, and from 1912 to 1918, the influential Russian journal *Vestnik Evropy*. In 1911 he delivered a lecture (pub Kiev 1914) on T. Shevchenko's poetry at a session of the Academy of Sciences in St Petersburg.

From 1890 on Ovsianiko-Kulikovskiy was an adherent of O. *Potebnia's psychological school in linguistics and literature. He wrote many newspaper articles and scholarly studies and books in the fields of Sanskrit, Vedic mythology and religion, philosophy, psychopathology, linguistics, and Russian literature. In his memoirs (1923) there are chapters on M. Drahomanov, M. Ziber, M. Kovalevsky, and O. Potebnia. A book about him by N. Osmakov was published in Moscow in 1981.

R. Senkus

Ovsiiichuk, Volodymyr [Ovsijčuk], b 28 July 1924 in Malyi Sknyt, Shepetivka okruha. Art historian at the Lviv branch of the ANU Institute of Fine Arts, Folklore, and Ethnography. A graduate of Lviv University (1952), he did postgraduate work at the Hermitage in Leningrad. A specialist in Renaissance and Baroque art and the artists of Lviv, he has published many articles and a book on Ukrainian art of the 14th to mid-17th centuries and is a coauthor of a book on the postwar art of the western Ukrainian oblasts (1979) and *Maistry ukrains'koho barokko* (Masters of Ukrainian Baroque, 1991).

Ovsienko, Vasyl [Ovsijenko, Vasyl'], b 8 May 1949 in Lenine, Radomyshl raion, Zhytomyr oblast. Dissident. A high school teacher of Ukrainian language and literature in Kiev oblast, he was arrested in March 1973 for allegedly having coedited the samvydav periodical **Ukrains'kyi visnyk*, and sentenced to four years in labor camps in the Mordovian ASSR. After his release he lived in Lenine,

where he was denied work and was subjected to administrative surveillance and KGB harassment. He joined the *Ukrainian Helsinki Group in March 1977. Consequently in February 1979 he was rearrested on fabricated charges and sentenced in Radomyshl to three years in a camp in Zaporizhia oblast. Before his scheduled release in 1981, his term was extended to 10 years in severe-regime labor camps in Perm oblast and 5 years' exile. He was amnestied in 1988.

Ovyd (Horizon). An illustrated journal of culture, politics, and the arts, published in Buenos Aires (1949–55) and Chicago (1957–76), monthly to 1961 and then quarterly, by M. Denysiuk. It included a section devoted to the Ukrainian Librarians' Association of America.

Owl (Ukrainian: *sova*, *puhach*, *spliuska*, *supukha*, *sych*, *sira*). A nocturnal bird belonging to the order Strigiformes, including the families Strigidae (typical owls), Tytonidae (barn and grass owls), and Phodilidae (bay owls). Its body length ranges from 17 to 74 cm, its weight, from 50 g to 3.25 kg, and its wingspan, from 40 cm to 1.8 m. In Ukraine there are 13 known species, including both local and migratory. Sedentary owls include the long-eared owl (*Asio otus*), the short-eared owl (*A. flammens*), which lives in open areas and avoids forests, the barn owl (*Tyto alba*), which inhabits abandoned structures, and the little owl (*Athene noctua*), which settles near empty dwellings and in dry steppe areas in burrows or rock piles. Irregular winter flights into Ukraine from the north and northwest are made by the migratory tawny owl (*Strix aluco*), the Ural or long-tailed owl (*S. uralensis*), and the great or Lapp owl, also known as the bearded owl (*S. nebulosa*). Because owls are beneficial to agriculture and forestry, they are now a protected species in Ukraine. The owl features prominently as a wise character in Ukrainian *folklore and *children's literature; it has also been known as a harbinger of doom.

Rev Ivan Ozarkevych
(1794–1854)

Rev Ivan Ozarkevych
(1826–1903)

Ozarkevych, Ivan [Ozarkevych], b 1794, d 1854 in Kolomyia, Galicia. Ukrainian Catholic priest, community figure, and writer in Galicia. He contributed to *Zoria halytska*. In 1848 he was the first to stage Ukrainian plays in Kolomyia and Lviv – *Divka na viddanniu*, *abo Na myluvannia nema syluvannia* (A Nubile Maiden, or Affection Cannot Be Forced, his adaptation of I. Kotliarevsky's *Natalka Pol-*

tavka [Natalka from Poltava] in the Pokutian dialect) and *Zhovniar-charivnyk* (his adaptation of I. Kotliarevsky's *Moskal'-charivnyk* [The Soldier-Sorcerer]). In 1850 he staged *Svatannia, abo Zhenykh navizhenyi* (Matchmaking, or the Crazy Bridegroom, his adaptation of H. Kvitka-Osnovianenko's *Svatannia na Honcharivtsi* [Matchmaking at Honcharivka]) and *Vesillia, abo Nad tsyhana Shmahaila nema rozumnishoho* (The Wedding, or There's No One Smarter Than the Gypsy Shmahailo, his adaptation of S. Pysarevsky's *Kupala na Ivana* [On St John's Eve]). He also translated a book of Aesop's fables into Ukrainian (1852) and wrote the historical plays *Dary predkiv* (The Ancestors' Gifts) and *Rozvida* (Reconnaissance) and a collection of poetry.

Ozarkevych, Ivan [Ozarkevych], b 1826, d 8 February 1903 in Bolekhiv, Dolyna county, Galicia. Priest and civic leader; son of I. *Ozarkevych and father of N. *Kobrynska. A moderate populist, he was a deputy to the Galician Diet (1867–76) and the Austrian parliament (1873–91). He was opposed to the New Era policy and in 1895 headed a large Ukrainian delegation to Vienna to protest before the emperor the widespread abuse of power in the recent election in Galicia. He wrote occasional sermons and poems.

Yevhen Ozarkevych

Ozarkevych, Yevhen [Ozarkevych, Jevhen], b 8 June 1861 in Beleluia, Sniatyn county, Galicia, d 21 September 1916 in Vienna. Physician and civic leader; full member of the Shevchenko Scientific Society (NTSh) and head of its Medical Commission from 1899. A graduate of Vienna University (1891), he worked as a county doctor in Bosnia, Rozhnitiv, Stryi, and Lviv and was an activist of burgher brotherhoods. In Stryi he organized the Mishchanska Besida society, and in Lviv the *Narodnia Lichnytsia society, whose clinic he directed (1903–14), and the Ukrainian Physicians' Society (1910). He edited the short-lived NTSh scientific collection *Likars'kyi zbirnyk* (1898–1901), in which he published his articles and reviews, particularly of Ukrainian medical terminology, and *Zdorovlie* (1912–14). He was vice-president of the Prosvita society and president of its Lviv branch. During the First World War he served as a doctor in a Ukrainian internment camp in Wolfsberg.

Ozaryntsi settlement. A *Trypilian settlement of the late 4th to early 3rd millennium BC near Ozaryntsi, Mohyliv-Podilskyi raion, Vinnytsia oblast. Excavations in 1927 by M. Rudynsky unearthed dwellings, pottery, flint

tools, a sculpture of a human head, and earthenware figurines of animals.

Ozeriany Ridge. A distinctive ridge near Ozeriany, in the northwestern corner of Zhytomyr oblast. Nearly 8.5 km in length, between 0.5 and 1 km in width, and up to 190 m in height, the ridge is situated at the edge of the Ukrainian Shield. It runs like a thread in an east-west direction and consists of quartz and sandstones covered mainly by sandy or claylike soils. Pine forests constitute much of its vegetation.

Ozersky, Yurii [Ozers'kyi, Jurij] (pseud of Zebnytsky, Y.), b ca 1886, d after 1933. Pedagogue and political activist. A member of the Ukrainian Party of Socialist Revolutionaries–Borotbists (Communists), he headed the political education section of the People's Commissariat of Education of the Ukrainian SSR under M. Skrypnyk. He was also deputy chief of the agitation and propaganda section of the CC CP(B)U. He taught and wrote articles on pedagogical topics, especially on political education. After the fall of Skrypnyk in 1933, Ozersky was a victim of the Stalinist terror.

Oziv or Azov. VI-20. A city (1985 pop 76,000) and port on the Don River and a raion center in Rostov oblast, RF. Founded on the site of the Greek colony of Tanais, Oziv is one of the oldest settlements on the Sea of Azov. In the 10th and 11th centuries it was part of the Tmutorokan principality of Kievan Rus'. In 1067 it was captured by the Cumans, who renamed it Azak and brought it under the control of the Golden Horde. During the 13th to 15th centuries an Italian (Genoaesen) settlement called Tana stood at the site. Azov was captured by Turkey in 1471, and a fortress was built there. During 1637–42 it was held by the Don and the Zaporozhian Cossacks. In the late 17th century the Russians fought the Turks for possession of Azov. It was captured by Russia in 1774 and turned into the capital of Azov gubernia (1775–82). From 1810 it was part of Katerynoslav gubernia, and from 1888, of Don Cossack province. According to the census of 1926, Ukrainians accounted for 83.6 percent of the Azov raion population.

Ozokerite. A naturally occurring, light yellow to dark brown waxy mineral composed primarily of solid paraffinic hydrocarbons. It usually occurs as thin veins in rock fractures in mountain-building areas, where it probably separates from paraffin-base petroleum. It is purified by boiling in water and used widely in the manufacture of carbon paper, leather polishes, cosmetics, electrical insulators, waxes, and candles.

Ukraine's ozokerite deposits are among the largest in the world. They are located in the *Drohobych-Boryslav Industrial Region. Ozokerite has been mined there since the 1860s. By 1873 there were 4,000 operating mines, producing some 20,000 t of the mineral. The mining technology was primitive and inefficient. When the most accessible deposits were depleted, output dropped to 10,000 t in 1880, 1,000 t in 1914, and 300 t in 1938. For many purposes ozokerite has been replaced by paraffin wax. After the Second World War, mining techniques improved, and ozokerite output rose to its current level of 800–1,000 t annually.

P

Pachovsky, Borys [Pačovs'kyj] (Patchowsky), b 28 March 1931 in Peremyshl, Galicia. Graphic artist; son of V. *Pachovsky. A postwar émigré in the United States since 1950, he graduated from City College in New York in 1956. He is a member of the Ukrainian Artists Association in the USA. Pachovsky has taken part in group exhibitions in New York, Detroit, and Chicago. In 1966 he had a solo exhibition at the Ukrainian Institute of America in New York.

Pachovsky, Mykhailo [Pačovs'kyj, Myxajlo] (pseud: Mykhan Lopach), b 20 September 1861 in Dobrostanty, Horodok county, Galicia, d 13 March 1933. Pedagogue. He graduated from Vienna University (1887) and worked as a teacher, primarily at the Academic Gymnasium of Lviv. He received his PH D from Chernivtsi University in 1895 and was director of the private Ukrainian gymnasium in Dolyna (1911–22). In 1918–19 he was a member of the Ukrainian National Rada of the Western Ukrainian National Republic. His first story, 'Vechnytsi' (The Evening Party), appeared in *Zerna*, the 1888 literary supplement to the Chernivtsi newspaper *Bukovyna*. He wrote schoolbooks on Ukrainian literature (1909, 1911), several songs, books on Ukrainian *bylyny* and *dumas* (1893) and Ukrainian burial rites (1903), and articles on Ukrainian folklore and writers in such periodicals as *Uchytel'* and *Pravda*.

Pachovsky, Roman [Pačovs'kyj], b 11 November 1911 in Rava Ruska, Galicia, d 6 February 1968 in New York. Painter; son of V. *Pachovsky. A postwar émigré in the United States from 1950, he studied art at the National Academy and the Art Students' League School and was active in the Ukrainian Artists' Association in the USA. He did landscapes, portraits (eg, *Marusia Bohuslavka* and *Baida Vyshnevetsky*), and historical paintings (eg, *The Escape of the Three Brothers from Azov* and *Duma about a Storm on the Black Sea*). Seven solo exhibitions of his works were held in New York. He wrote articles on art and compiled a collection of his father's literary works.

Pachovsky, Teoktyst [Pačovs'kyj], b 18 February 1907 in Strutyn Vyzhni, Dolyna county, Galicia, d 30 December 1984 in Lviv. Slavist. He graduated from Lviv University (PH D, 1938), where he taught from 1933. He wrote articles on Old Ukrainian literature and on Ukrainian-Polish literary relations (particularly vis-à-vis T. Shevchenko and I. Franko).

Pachovsky, Vasyl [Pačovs'kyj, Vasył'], b 12 January 1878 in Zhulychi, Zolochiv county, Galicia, d 5 April 1942 in Lviv. Poet, dramatist, publicist, and teacher. Pachovsky studied at Lviv University (medicine) and Vienna University (history) and completed his studies with a teacher's certificate in 1909. He taught in the high schools of Trans-

Vasyl Pachovsky

carpathian Ukraine (Uzhhorod) and in Galicia (Lviv and Peremyshl). Pachovsky worked as a cultural representative of the *Union for the Liberation of Ukraine in the internment camp at Knittelfeld, Austria (1914–15), edited *Strilets'* (1918–19) while serving in the Ukrainian Galician Army, edited the weekly *Narod* in Uzhhorod in the 1920s, and contributed to various journals throughout his life.

Pachkovsky was a prominent member of *Moloda Muza and made his literary debut in 1901 with a collection of lyrical poetry, *Rozsypani perly* (Scattered Pearls). It was followed by *Na stotsi hir* (On the Mountain Slopes, 1907) and *Ladi i Mareni ternovy ohon' mii* (To Lada and Marena My Thorny Fire, 1912). His lyrical poetry is marked by a highly melodic line and folk-song stylizations. His dramas, written more in the modernist manner as highly lyrical allegories, at times too publicistic, are stylized patriotic visions of Ukraine in its quest for freedom: *Son ukrains'koi nochi* (A Dream of a Ukrainian Night, 1903), *Sontse ruiny* (Sun of the Ruin, 1911), *Sfinks Evropy* (The Sphinx of Europe, 1914), *Roman Velykyi* (Prince Roman the Great, 1918), and *Het'man Mazepa* (1933). Similar in style to his plays is Pachovsky's epic poem, *Zoloti vorota* (The Golden Gates), of which only two of the projected four volumes were finished, *Peklo Ukraïny* (Ukraine's Hell, 1937) and *Preispodnia* (The Underworld, pub in 1985 as *Chystylshche Ukraïny* [Ukraine's Purgatory]). *Zoloti vorota* forms vol 2 of the two-volume collection *Zibrani tvory* (Collected [Poetic] Works, 1984, 1985), of which vol 1 consists of Pachovsky's lyrical poetry, including previously unpublished poems and collections. Pachovsky's historical studies, as well as his *Narys istorii miniatury po rukopysiam* (A Survey of the History of Illuminations, 1913), were devoted primarily to Transcarpathia, and consist of *Istoriia Podkarpatskoi Rusy* (History of Subcarpathian Rus', 1921), *Sribna zemlia: Tysiacholitnia Karpats'koi Ukraïny* (The Silver Land: A Millennium of Carpathian Ukraine, 1938), and the posthumous *Istoriia Zakarpattia* (History of Transcarpathia, 1946).

D.H. Struk

A co-operative in Kadovbyshchi, Brody county, after the Pacification

Pacification. A campaign of repressions conducted by the Polish authorities against the Ukrainian population of Galicia in the summer and autumn of 1930. They were part of an operation intended to break up and intimidate opposition to the *Sanacja regime on the eve of the parliamentary elections planned for November 1930. The ostensible rationale for the Pacification was the sabotage being carried out by the Ukrainian Military Organization (UVO), which began in July and reached a peak in September and October 1930. The scope of the operations and the manner in which they were carried out, however, made it clear that the Polish government was responding to more than just the UVO threat. In effect the Pacification was comparable to a pogrom against Ukrainians initiated, sanctioned, and executed by the Polish state authorities.

On 1 September Prime Minister J. Piłsudski ordered the minister of the interior to send the police and army into the region affected by the actions. The security forces were supervised by B. *Pieracki (deputy minister), H. Suchenek-Sucheki (head of the nationalities department), and the voivode of Lviv, B. Nakonieczników-Klukowski. In the first week of September intensified control was introduced in Galicia, together with the checking of documents and searches and arrests among people suspected of UVO membership. About 20 leaders of the organization were detained at that time, including Ya. Nestor, B. *Kravtsiv, and Z. *Knysh. On the night of 9 September the authorities imprisoned up to 20 leading members of the parliamentary opposition in an army fort in Brest, together with 5 Ukrainian deputies: V. Tselevych, D. Paliiv, I. Lishchynsky, O. Kohut, and O. Vyslotsky. On 20 September the regional commander of the UVO, Yu. Holovinsky, was arrested outside the Ukrainian National Democratic Alliance (UNDO) offices in Lviv; he was shot on 30 September by the police, purportedly while attempting to escape.

On 21 September the Pacification proper was inaugurated. It lasted until 16 October and encompassed 28 counties of Galicia, where it focused on those villages regarded as sympathetic to the UVO. Security forces commonly surrounded a given village and carried out a detailed search of all its buildings. In the course of many of their actions they devastated the interiors as well as entire houses, removed Ukrainian signs, and indiscriminately destroyed

Ukrainian cultural objects (including books, stage wardrobes, folk dress, native needlework, and the like). The army engaged in what it referred to as heavy quartering (compulsory requisitions for food and grain). The population was often forced to sign declarations of loyalty to Poland and to renounce their affiliation to the Ukrainian nation; prominent local leaders were publicly ridiculed. Whippings were widely administered, and seven people died as a result of beatings (Polish sources claimed two victims).

Polish Ministry of the Interior files note that 144 rifles, 156 pistols, 40 kg of dynamite, and 39 kg of gunpowder, as well as other explosives and UVO propaganda literature, were found during the searches. By the end of 1930, 970 persons had been arrested, of whom 538 were released and 432 turned over to the courts. The courts set free 330 persons and proved UVO membership in the case of 42 persons. The detainees included peasants (550), secondary school pupils (135), and students (124). Official Polish reports at that time claimed a larger amount of arms and a greater number of arrests.

The Pacification campaign also affected mainstream Ukrainian political groups and institutions. After the discovery of contacts between the UVO and the UNDO leadership the offices of the UNDO in Lviv were searched, and on 30 September several UNDO members were arrested – D. Levytsky, L. Makarushka, and V. Mudry. On 24 September the authorities closed the Ukrainian secondary schools in Ternopil, Drohobych, and Rohatyn and delegatized the organization *Plast. In village raids Ukrainian reading rooms and co-operative stores were among the buildings specifically targeted for searches (and damage).

The Pacification met with public condemnation in many countries (including Great Britain, France, and Germany). A protest was voiced by Metropolitan A. Sheptytsky, who came to Warsaw on 3 October in an unsuccessful attempt to meet with Piłsudski; his pastoral letter on the matter was subsequently confiscated. Ukrainian émigré groups published accounts of the Polish action in several languages. In December 1930 the Ukrainian Parliamentary Representation in the Sejm moved for examination of the events surrounding the Pacification and the punishment of those guilty of the acts of terror. It was rejected by the Polish majority. Ukrainian representations to the League of Nations on the issue of the Pacification began in November 1930. Although sympathetic hearing was given to various memorandums submitted and circulated among committees and state missions, the Council of the league issued a statement as late as January 1932 in which it stated that the Polish actions could be justified because of Ukrainian sabotage activities.

Paczoski, Józef, b 8 December 1864 in Bilohorodka, Iziaslav county, Volhynia gubernia, d 14 February 1942 near Poznań, Poland. Botanist of Polish descent. After studying and working as a laboratory assistant at Kiev

University (1888–94) he was director of the Kherson Museum of Natural History (1897–1920) and a professor at the Kherson Polytechnical Institute (1918–22). He worked as an associate of the Askaniia-Nova Nature Reserve (1922–3) and then became a professor at Poznań University (1925). A specialist in the flora and fauna of Ukraine (particularly Polisia and the southern steppe regions) and eastern Poland, he wrote *Flora Poles'ia i prilezhashchikh mestnostei* (The Flora of Polisia and Its Adjacent Areas, 3 parts, 1897–1900) and *Opisanie rastitel'nosti Khersonskoi gubernii* (A Description of the Vegetation of Kherson Gubernia, 3 parts, 1915–27), and, in Ukrainian, *Osnovy fitosotsiologii* (Fundamentals of Phytosociology, 1921).

Ivan Padalka: *Cossacks* (woodcut)

Padalka, Ivan, b 27 October 1894 in Zhornoklovy, Zolotonosha county, Poltava gubernia, d 13 July 1937. Painter, muralist, and graphic artist. He studied at the Myrhorod Applied Arts School (1909–12), the Kiev Art School (1913–17), and under M. *Boichuk and V. Krychevsky at the Ukrainian State Academy of Arts (1917–20). A member of the *Association of Revolutionary Art of Ukraine in the 1920s, he taught at the Myrhorod (1920–1) and Mezhyhiria (1921–5) ceramics tekhnikum, the Kharkiv Art Institute (1925–34), and the Kiev State Art Institute (1934–6). Under M. Boichuk's direction he took part in creating the 14 murals at the Lutske army barracks in Kiev (1919) and the fresco *Rest* at the Chervonozavodskiy Theater in Kharkiv (1933–5). He also did woodcuts, portraits of P. Panch and O. Pavlenko, and genre paintings, such as *Miners*, *Gather-*

ing Eggplants (early 1930s), *Hay Gathering*, *Attack of the Red Cavalry* (1927), and *Photographer in the Village* (1927). His prints include *Apple* (1926), *Insurgents*, and the series 'Dnieper Hydroelectric Station' (1928). He illustrated many children's books, including the collection *Barvinok* (Periwinkle, with T. Boichuk, 1919), O. Donchenko's *Ha-la-hal*, and *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1928), and designed posters, bookplates, and covers for editions of works by T. Shevchenko, I. Franko, O. Dosvitnii, I. Kotliarevsky, M. Yohansen, V. Polishchuk, and S. Taranushenko. His paintings and prints were influenced by the icon and *lubok traditions. Padalka was arrested by the NKVD in September 1936 and later executed.

S. Hordynsky

Padalka, Lev, b 1859 in Chornukhy, Lohvytsia county, Poltava gubernia, d 1922? Historian and statistician. He graduated from Kiev University (1884) and worked as a statistician for the Poltava and Kherson gubernial zemstvos, the city of Kharkiv, and the government of Poltava gubernia. A member of the Poltava Learned Archival Commission, he wrote, in Russian, studies on the Poltava region's past and colonization (1914), on the maps of Cossack regiments in the Poltava region (1914), on G. Le Vasseur de Beauplan's map of the colonization of the Poltava region in the second quarter of the 17th century (1914), and on the history of Poltava eparchy (1916). He also contributed several articles to *Kievskaiia starina* on the history of the Zaporozhian Sich and wrote statistical studies on the lands of Romen county, Poltava gubernia (1904), and the application of the territorial principle in zemstvo statistics (1900). In 1918 he participated in a special commission of the Hetman government that defined the Ukrainian ethnic territories on Ukraine's border with the Don region.

Yaroslav Padokh

Omelian Paduchak

Padokh, Yaroslav [Padox, Jaroslav], b 14 December 1908 in Buchach, Galicia. Lawyer, legal scholar, and civic leader; since 1949 full member of the Shevchenko Scientific Society (NTSh) and the Ukrainian Academy of Arts and Sciences. A graduate of Cracow University (LLM, 1931), he began to practice law in 1937. Upon obtaining an LLD degree from the Ukrainian Free University (UVU) in Prague (1940) he taught law there until 1948, when he emigrated to the United States. He returned to law school at St John's University (LLB, 1956) and opened his own law office. He

has been a leading member of many Ukrainian organizations, such as Plast, the Ukrainian National Association, the Ukrainian Congress Committee of America, and the Association of Ukrainian Lawyers. Since 1977 he has headed the US branch of the NTSh, and since 1983 he has been the president of the Executive Council of the NTSh in the diaspora. Padokh has written several books on legal history, including textbooks on the history of Western European law (1947) and of old Ukrainian procedural law (1949), an outline of the history of Ukrainian criminal law (1951), *Mis'ki sudy na Ukraïni pislia 1648 r.* (City Courts in Ukraine after 1648, 1948), and *Sudy i sudovyi protses staroi Ukraïny* (Courts and Legal Procedure of Old Ukraine, 1990).

Paduchak, Omelian Illia [Padučak, Omeljan Illja], b 15 August 1885 in Lypytisia Horishnia, Rohatyn county, Galicia, d 3 May 1961 in Asunción, Paraguay. Civic leader. To avoid arrest for participating in strikes, he emigrated to Germany (1904) and then South America. He was the first Ukrainian known to settle in Paraguay (1910), and preceded the start of regular Ukrainian immigration by 12 years. In 1937 he helped found the Prosvita society in Encarnación and served as its president. Immediately after the Second World War he organized the Ukrainian Relief Committee for War Victims, which became affiliated with the Paraguayan Red Cross in 1946. Paduchak's extensive lobbying efforts, organizing, and legal work helped settle hundreds of Ukrainian *displaced persons in Paraguay. From its inception he served as president of the Ukrainian Center in Paraguay (1949–61) and as an executive member of the Pan-American Ukrainian Conference. He left a valuable archive on the history of Ukrainian settlement in South America.

Padun, Volodymyr, b 25 June 1942 in Plavni, Vasylivka raion, Zaporizhia oblast. Painter. He is a graduate of the Dnipropetrovske Art School (1968). His work has been influenced by Ukrainian folk art, particularly *Petrykivka painting. Using tempera, Padun paints highly ornamental flowers and landscapes in intense, bright colors (eg, *On the River Kilchen* [1978] and *Sunflowers* [1983]).

Padura, Tymko (Tomasz), b 21 December 1801 in Illintsi, Radomyshl county, Kiev gubernia, d 20 September 1871 in Koziatyn, Berdychiv county, Kiev gubernia. Poet and musician of Polish descent; member of the *Ukrainian school in Polish literature. He graduated from the Kremianets Lyceum (1825). He maintained contact with the Decembrists and for that reason was imprisoned by the Russian authorities (1830–2). Padura was influenced by Ukrainian folklore and by J. Niemcewicz, G. Byron, and Ossian. He wrote (in Ukrainian using the Latin script) lyrical poems and songs with a Slavophile and Polonophile interpretation of Ukrainian history ('Lirnyk' [The Lyrist], 'Zaporozhets' [The Zaporozhian], 'Het'mantsi' [The Hetman's Men], 'Pisniar' [The Songmaker], 'Do Dnipra' [To the Dnieper]) and set some of them to music. His poems were also set to music by composers such as M. Lysenko ('Lirnyk') and K. Lipiński. Padura also wrote poems in Polish.

Paganism (from the Latin *paganus* 'country dweller'; Ukrainian: *pohanstvo*). A general designation for pre-

Christian polytheistic religions, the term came into common use in Europe after Constantine adopted Christianity as the state religion of the Roman Empire in 313. In the medieval period even non-Christian monotheistic religions, such as Judaism and Islam, were considered pagan. The earliest reference to paganism in Ukraine appears in Procopius (6th century AD). Paganism survived long after the official Christianization of Rus' in 988. Traces of it can be found even in the 20th century.

Paganism in Ukraine constantly evolved and changed. The oldest form was animism, which accepted the existence of good (*berehyni*) and evil (*upyry, demony*) spirits. Later, fertility gods (*Rod and the *rozhanyci*) and ancestral spirits were worshiped, and then a supreme deity, Svaroh, the god of heaven and fire. At the start of the rule of *Volodymyr the Great the idols of the chief gods – *Perun, *Khors, *Dazhboh, *Stryboh, Symarhl, and Mokosh – stood on a hill near his palace. Plant, animal, and occasionally human sacrifices were brought before them. Upon adopting Christianity he destroyed the idols and built St Basil's Church at the site. Most of the common people continued to worship the pagan deities (see *Mythology) and nature and household spirits (see *Demonology in Ukraine).

The pagans did not build special shrines but worshiped in the open at altars on sacred sites. According to a Greek chronicler of the 10th century an altar was built under a great oak on Khortytisia Island, and Kiev merchants sailing down the Dnieper stopped to offer sacrifice there. V. *Khvoika excavated a site with a large sacrificial altar in Kiev. Sacred sites of the first few centuries AD were found on vestal hills on the Dnieper, near the village of Trypilia, and on the Ros, near Sakhnivka. There were also several such sites on so-called Bald hills in Ukraine. In the Christian era these locales were believed to be the gathering places of witches and sorceresses. The pagans did not have a separate priestly caste, only soothsayers, known as *volkhvy*. Sacrifices on behalf of particular persons were brought by the persons themselves or their relatives; those for the benefit of a family, by the family head; and those for the country's sake, by the prince.

Pagans in Ukraine believed in the afterlife and viewed it as an extension of this life. According to foreign writers they preferred death to captivity out of the fear of remaining slaves after death. They were buried with their favorite objects and with symbols of their social status. The dead were usually buried, but some were cremated. Funerals involved various rituals and songs. (See *Burial rites and *Laments.) A year after a funeral a commemorative banquet was held. Weddings also were highly ritualized. Paganism tolerated polygamy, although most people, particularly the lower classes, practiced monogamy.

The Christian church actively opposed paganism. It supplanted the more popular cults with Christian ones: Perun with St Elijah, Veles with St George, Kupalo with John the Baptist. The seasonal agricultural festivals were also modified and associated with Christian holidays: the winter equinox became Christmas, the 'Great Day' (*Velykden*) became Easter, and the *Rosalia became the Descent of the Holy Spirit. Each of these festivals retains to this day elements of pagan rites. Gradually the church introduced its sacraments into everyday life – first into baptism and burial, then, finally, into marriage. Some pagan customs (caroling, the blessing of wells and fields) that

could not be suppressed were simply adopted by the church. The expected result, however, was not always achieved: in most cases, Christian and pagan rituals with the same function were practiced side by side. Other pagan customs, such as the *harvest rituals, were converted from religious into folkloric practices. Soothsaying was incorporated into the games of *St Andrew's Eve.

The people often interpreted church festivals in pagan terms; the Virgin Mary's Presentation at the Temple, for example, was viewed as a festival of the dead in Ukraine (the dead were said to 'see' their bodies on this day), and Christ's Presentation at the Temple celebrated the encounter between winter and spring.

Traces of paganism were preserved longest in various seasonal *folk customs and rites, such as the Christmas Eve dinner, caroling, the Easter **vesnianky-hahilky*, the transfer of livestock to the pasture in the springtime, the *Kupalo festival, the harvest rituals, and **pomyanky* (see *Calendric ritual folk poetry). A number of pagan rites have been retained in the wedding ceremonies. The oldest forms of the Ukrainian oral tradition, including tales, legends, and aphorisms, originated in the pagan era.

M. Mushynka

Painting. The portrayal or rendering of pictures on a flat surface with a variety of pigments in such media as tempera, oils, watercolors, and acrylics. In Ukraine the oldest surviving paintings are frescoes and murals found at archaeological sites of ancient Hellenic colonies on the northern Black Sea coast, where they were preserved on the walls of tombs. One of the earliest portraits is a head of a young man (4th century AD) on a stone slab in the encaustic technique found at the ruins of Chersonese Taurica. Some early (3rd century) Christian frescoes have been preserved in the Crimea.

Fragments of frescoes from the medieval Rus' period have been found in the Church of the Tithes in Kiev (late 10th century), the Cathedral of the Transfiguration in Chernihiv (11th century), and the St Sophia Cathedral in Kiev (early 11th century). Some of the frescoes of St Michael's Golden-Domed Monastery in Kiev, which was demolished by the Soviet authorities in 1934–5, are preserved at the St Sophia Museum in Kiev. In style these 11th-century frescoes are similar to those of the middle period of Byzantine art. The frescoes in the Church of St Cyril's Monastery in Kiev (mid-12th century) are more realistic and display Balkan influences.

According to the Primary Chronicle portable icons were already being painted in the 10th and 11th centuries, but none so old have survived to our time. The oldest extant icon from Kiev, *The Vyshhorod (Vladimir) Mother of God* (12th century), which was of Greek origin, is now in the Tretyakov Gallery in Moscow, as are three other icons once in Kiev, the *Great Panagia*, *St Demetrius of Thessalonica*, and *The Mother of God of the Caves* (ca 1288), which also depicts ss Anthony and Theodosius of the Caves. Examples of me-

dieval Ukrainian painting can also be found in illuminated manuscripts (see *Illumination).

With the decline of Kievan Rus' the center of political power and culture shifted to the Principality of Galicia-Volhynia, and only a few paintings (mostly in Western Ukraine) survived the turbulent years of the 13th-century Mongol invasion – the frescoes in the rotunda chapel in Horiany, in Transcarpathia, and in the Armenian Cathedral in Lviv, built in 1363. Two of the better-known surviving icons are *St George* from Stanylia and *The Mother of God from Lutske* (late 13th to early 14th century), both rendered in the Byzantine-Ukrainian tradition of icon painting. Ukrainian iconographers were commissioned by Kings Casimír III and Władysław II Jagiełło to decorate churches in the Wawel royal castle in Cracow and the Holy Cross Church in Łysa Góra (1393–4).

In the 15th and 16th centuries there emerged a Galician school of icon painting, in which adherence to Byzantine iconography was tempered by personal interpretations, individual variations, and Western influences. In *The Mother of God Hodegetria* from Krasiv (second half of the 15th century), for example, Mary's face is considerably rounder and more in keeping with those of local models, and Jesus wears an embroidered shirt. Gothic influences may be seen in the architecture of some icons, such as *ss George and Parasceve* from Korchyn (late 15th century). During the Renaissance icons gradually lost their rigidity and became more realistic. The development was first apparent in the modeling of facial features, as in *Christ Pantocrator* (late 15th century) from Starychi, in the Lviv region, and in the use of local landscapes, as in *Transfiguration* (1575) from Yabluniv. It was not until the 17th century, however, that Byzantine traditions began giving way to the *baroque, which introduced secular themes, three-dimensional forms, and movement in icons (eg, the iconostases in Velyki Hrybovychi [1638], near Zhovkva in Galicia, and in Velyki Sorochyntsi, near Myrhorod [early 18th century]). Two of the better-known icon painters at the time were I. *Rutkovych and Y. *Kondzelevych, whose work was influenced by Western religious painting and iconography. The influence is evident in the theme, composition, and realistic rendering of *Christ by the Well* (1696–9) in the iconostasis painted by Rutkovych in the Church of the Nativity in Skvariava Nova, near Zhovkva.

In Ukraine portrait painting as a separate genre emerged during the Renaissance (16th century) and was strongly influenced by the icon tradition. The first portraits were those of benefactors (Jan Herburt, ca 1578), which were hung in churches, and memorial likenesses painted on wood or metal panels for coffins (Varvara Larbysh, 1635). Portraits not used for religious purposes did not emerge until the 17th century. They included official portrayals of nobles and Cossack hetmans and officers, known as 'parsunnyi' (personal) portraits, as well as more intimate portraits of nobles and burghers.

The secular themes, illusionistic space, local colors, and realistic representations that the baroque brought from Western Europe remained strong in Ukrainian art until the imposition of socialist realism in the 1930s. Painting expanded thematically to include a variety of portraits, battle scenes, genre depictions, and presentations of historical compositions.

As Ukrainian Cossack autonomy was eroded by the tsars in the 18th century, opportunities for Ukrainian

PAINTING 1) M. Petrakhnovych: *Resurrection of Lazarus* (1638) in the Dormition Church of Velyki Hrybovychi, near Nesterov, Lviv oblast. 2) Anonymous folk painting of *Kozak-Mamai* (oil, 18th century; Chernihiv Historical Museum). 3) A. Mokrytsky: *Portrait of the Artist's Wife* (oil, 1853; Kiev Museum of Ukrainian Art; photo courtesy of the Winnipeg Art Gallery). 4) S. Vasylykivsky: *A Cossack Picket* (oil, 1888; Kharkiv Art Museum). 5) M. Pymonenko: *Going Off to Battle* (oil, 1902). 6) A. Ekster: *Bridge* (oil, 1912; Kiev Museum of Ukrainian Art). 7) V. Yermilov: *Composition* (oil, 1923). 8) V. Kostetsky: *Return Home* (oil, 1947; Kiev Museum of Ukrainian Art). 9) O. Hryshchenko: *Landscape* (oil, 1960s; courtesy of I. Moroz).

This page intentionally left blank

painters to have their talents recognized locally became increasingly limited. Consequently, many were attracted to the newly established Academy of Arts in St Petersburg (est 1757), which cultivated the classicist style of painting then popular in Europe. Better-known Ukrainian artists who pursued their careers at the academy and contributed significantly to the development of art in Russia were A. *Losenko, K. Holovachevsky, I. *Sablukov (Sabluchok), D. *Levytsky (one of the greatest portraitists in the Russian Empire), and V. *Borovykovsky.

The emigration of Ukrainian artists to St Petersburg deprived Ukrainian painting of its most creative talents. The exception was T. *Shevchenko, who devoted most of his painting (like his writing) to Ukrainian interests and has been considered the father of modern Ukrainian painting. Shevchenko painted numerous portraits, self-portraits, and landscapes which recorded the architectural monuments of Ukraine. While in exile he depicted Kirgiz folkways and the surrounding countryside, as well as the degradation of tsarist prisons and the first pictorial indictments of the horrors of Russian army life and punishment. Shevchenko was also concerned with formal problems of the effects of light and dark.

During the 19th century landscape painting appeared as a separate genre, and not only in the work of Shevchenko. Inspired by romanticism, I. *Soshenko recorded the pastoral settings of rural scenery, and A. *Kuindzhi, I. *Aivazovsky, S. *Vasylykivsky, I. *Pokhytonov, and S. *Svitoslavsky devoted their efforts to depicting rural scenery at its most beautiful.

A Romantic idealism was reflected in the portraits of A. *Mokrytsky, particularly in that of his wife (1853), as well as in H. *Vasko's *Youth from the Tomariv Family* (1847) and P. *Shleifer's portrait of his wife (1853).

In the last few decades of the 19th century Ukrainian painters studying art in Russia were influenced by the *Peredvizhniki society, formed in 1870 in St Petersburg by artists who were opposed to the classicist traditions of the Academy of Arts. Artists of Ukrainian origin who became active in the society were I. *Repin, N. *Ge, I. *Kramskoi, A. Kuindzhi, M. *Kuznetsov, K. *Kostandi, P. *Levchenko, P. *Martynovych, O. *Murashko, P. *Nilus, L. *Pozen, M. *Pymonenko, and S. Svitoslavsky. Not all of them remained committed to it. Many other artists were influenced by its ideas to paint realistic genre pictures, including F. *Krasytsky, S. *Kyshynivsky, and S. *Vasylykivsky. M. *Samokysh was primarily known for his Cossack and battle scenes, and I. *Izhakevych depicted peasant life.

In Austrian-ruled Western Ukraine artists adapted to European trends, particularly those prevalent in Vienna and Cracow, where some of them had studied. Among them were L. *Dolynsky, K. *Ustyianovych, and T. *Kopystynsky, all of whom depicted rural life through a romanticized ethnographic prism and were active in decorating churches. Both M. *Ivasiuk, who was known for his panoramic historical canvases, and A. *Manastyrsky remained dedicated realists.

*Impressionism made itself felt in the work of several Kiev artists who had worked in Paris, including P. *Levchenko, A. *Manevich, M. *Burachek, O. Murashko, and the exceptionally versatile V. Krychevsky. The new style stimulated an interest in intimate glimpses of ordinary events and urban scenery (eg, Levchenko's *Reading a*

Letter and Murashko's *Flower Vendors*). Above all else it altered the palette of most artists for many years to come. In Western Ukraine impressionism influenced the work of I. *Trush (although for the most part he remained a realist), O. *Kurylas, and O. *Kulchytska. Artists who worked in the impressionist style included M. *Sosenko and Ya. *Pstrak.

Whereas the artists in Western Ukraine for the most part remained under the influence of Western European art movements, those working in Kiev, Kharkiv, and Odessa developed close ties with Moscow and Leningrad. Thus P. *Volokidin was influenced by the World of Art movement, and P. *Kholodny and M. Sapozhnikov created symbolist paintings. The early 20th-century avant-garde movement had a direct impact on Ukrainian painting. Artists born in Ukraine, as well as those who considered themselves Ukrainian by nationality, were in its vanguard. The most prominent of them were K. *Malevich, D. and V. Burliuik, A. Ekster, L. Baranoff-Rossiné, and V. *Tatlin. Ekster introduced *futurism to Kiev and helped bring avant-garde exhibitions to Ukraine.

During the brief period of Ukrainian independence the *Ukrainian State Academy of Arts (1917–22) was established in Kiev. It and its successor, the Kiev State Art Institute, made it possible for Ukrainian painters to pursue advanced art training in their homeland. V. Krychevsky was its first rector, and one of the most influential teachers was M. *Boichuk, who revived fresco painting and aspired to develop an art for the masses based on a combination of Ukrainian traditions and Western models instead of the Peredvizhniki. Subsequently Boichuk and his followers (the 'Boichukists') – his brother, T. *Boichuk, his wife, S. *Nalepinska, O. *Pavlenko, V. *Sedliar, I. *Padalka, I. *Lypkivsky, P. Ivanchenko, A. Ivanova, S. Kolos, K. *Hvozdyk, E. *Shekhtman, and M. *Rokytsky – were victims of the Stalinist terror of the 1930s.

F. *Krychevsky, who also taught at the academy and the Kiev State Art Institute, was influenced by impressionist colors, but remained a realist in his modeling of form and space (eg, *Self-Portrait in a Sheepskin Coat*, 1926). Others who adhered to realism included M. *Kozyk, H. *Svitlytsky, S. *Kyshynivsky, S. *Prokhorov, M. *Sharonov, and I. *Shulha.

During the relatively liberal period of the 1920s in Soviet Ukraine, a variety of styles flourished. Cubo-futurist paintings were produced by V. *Yermilov in Kharkiv and O. *Bohomazov, V. *Palmov, and A. *Petrytsky in Kiev. Petrytsky painted over a hundred portraits of Ukrainian personalities, most of which disappeared or were destroyed during the terror. V. *Meller and K. Sikorsky experimented with abstraction; Yu. *Mykhailiv, who was fascinated with mythology, continued the traditions of the symbolists.

In interwar Western Ukraine under Polish rule, the most prominent Lviv painter was O. *Novakivsky, who began as an impressionist and was attracted by French postimpressionism and expressionism. He painted portraits and landscapes, and through his art school he influenced an entire generation of future artists, including I. *Vynnykiv, S. *Hordynsky, and Myron *Levytsky, who went on to explore modern trends in art. R. *Selsky experimented with surrealism; M. *Butovych, P. *Kovzhun, and R. *Lisovsky explored cubism and abstraction. The revival of the Byzantine style of church mural painting and deco-

ration in Western Ukraine was encouraged by Metropolitan A. Sheptytsky, a great patron of the arts. It was practiced by O. *Kurylas, M. *Osinchuk, V. *Diadnyiuk, and Yu. *Butsmaniuk.

Artists working in Transcarpathia under interwar Czechoslovak rule, including Yu. *Virah, Y. *Bokshai, A. *Erdeli, and E. *Hrabovsky, had ties with Central and Western European art movements and used bold, vibrant colors. Later A. *Kotska, Z. *Sholtes, F. *Manailo, E. Konratovych, and H. Hliuk continued the coloristic traditions.

In the 1930s all avant-garde activities in Soviet Ukraine came to a halt with the introduction of *socialist realism as the only literary and artistic method permitted by the communist regime. Painting was limited to naturalistically rendered thematic canvases of the Bolshevik Revolution and its champions, glorification of the Soviet state and its leaders, portraits and genre scenes of happy workers and peasants, and romanticized depictions of war and its heroes. Landscapes and still-life compositions were discouraged and all departures from the socialist-realist canon were condemned as 'formalist,' and their creators were discriminated against and sometimes persecuted. Among the more prominent socialist-realist artists were V. *Kostetsky, M. *Bozhii, S. *Hryhoriev, D. *Shavykin, O. *Shovkunencko, O. *Lopukhov, and O. Khmelnytsky.

The narrow confines of socialist realism were widened somewhat after the death of J. Stalin, particularly during N. Khrushchev's cultural thaw. Artists such as R. *Selsky, M. *Selska, V. *Manastyrsky, T. *Yablonska, and V. *Zaretsky turned to Ukrainian folk themes, more vibrant colors, and a flattened rendering. Younger artists, such as K. *Zvirynsky, V. Basanets, V. Sumar, and V. Lamakh, experimented with abstraction; L. *Medvid, I. *Zavadovsky, P. *Markovych, and I. *Marchuk, with surrealism; and V. *Patyk and V. *Loboda, with expressionism.

The curtailing of artistic freedom in 1965 and again in 1972, as well as the arrest and sentencing of prominent Ukrainian writers and artists, including O. *Zalyvakha and S. *Shabatura, gave rise to nonconformism. In the 1970s Ukrainian artists participating in the exhibitions of nonconformist art in Moscow and Leningrad included N. Haiduk, F. *Humeniuk, V. *Makarenko, V. *Naumets, V. *Sazonov, V. *Strelnikov, and L. *Yastrebo. Other artists, such as K. Zvirynsky in Lviv and O. Dubovyk, I. Marchuk, and Ye. *Petrenko in Kiev, stopped exhibiting.

After the failure of the Ukrainian revolution in 1919–20, a good number of Ukrainian painters became émigrés. Among those working in Warsaw were P. Kholodny, Jr, P. Mehyk, and P. *Andrusiv. In Prague I. *Kulets and H. *Mazepa explored cubism and abstraction, and K. *Antonovych was inspired by Boichuk and impressionism. Of the more prominent painters who settled in France S. Levytska worked in a postimpressionist manner and later took part in cubist exhibitions, and O. Hryshchenko (A. Gritchenko) and V. *Khmeliuk painted in an expressionist manner. M. *Andriienko-Nechytailo used constructivist elements in his abstractions. Others who worked in Paris in a variety of figurative styles included S. *Borachok, M. *Hlushchenko, S. *Zarytska, M. *Krychevsky, P. *Omelchenko, V. *Perebyinis, V. Palisadiv, and O. Savchenko-Bilsky. After the Second World War they were joined by I. *Vynnykiv, Yu. *Kulchytsky, A. *Solohub, A. *Yablonsky, and T. *Vyrsta. O. *Mazuryk, who works in an expression-

ist manner inspired by Byzantine-Ukrainian icons, came to Paris from Poland in 1968; A. *Solomukha from Kiev, who has taken a postmodern approach to painting, came in 1978; and V. *Makarenko, whose work is stylized and often symbolic, arrived there in 1980.

After the Second World War many Ukrainian artists fled from communist rule and settled in the West: R. *Lisovsky and R. Hlulko in Great Britain, B. *Kriukov and V. *Lasovsky in Argentina, V. *Krychevsky, Jr, and H. Mazepa in Venezuela, and M. *Kmit in Australia. Of the artists who settled in Canada K. Antonovych, I. Belsky-Stetsenko, and Yu. Butsmaniuk painted in a realist manner, and M. Levytsky and H. *Novakivska pursued a variety of semiabstract styles. Of those who settled in the United States, including M. Butovych, M. *Dmytrenko, S. Hordynsky, L. *Hutsaliuk, P. Kholodny, E. *Kozak, P. Mehyk, Mykhailo *Moroz, M. *Nedilko, M. *Radysh, Ju. *Solovij, and V. *Tymbal, most worked in a variety of figurative styles and usually exhibited within the Ukrainian community. J. *Hnizdovsky, who is known internationally for his wood engravings, was also an accomplished neorealist painter.

Some Ukrainian artists working in the United States were born in Ukraine, but matured and received their training mostly in America (R. Baranyk, B. Borzemsky, A. *Kolomyiets, S. *Lada, C. *Olenska, and A. *Olenska-Petryshyn). American-born artists of Ukrainian origin who have participated in exhibitions of Ukrainian art include Ya. *Surmach-Mills, J. Gaboda, and L. Bodnar-Balahunak.

Of the artists born in Canada W. *Kurelek gained international prominence for his convincing depictions of Ukrainian pioneers and other ethnic groups in Canada. Other more prominent artists on the Canadian art scene include L. *Luhovy, A. *Lysak, L. Sarafinchan, M. *Styranka, K. Kulyk, P. *Shostak, N. *Husar, and A. *Prychodko.

Changes brought about by glasnost and perestroika in the USSR resulted in greater creative freedom and a proliferation of styles and manners of depiction in Soviet Ukrainian art of the late 1980s and early 1990s. Artists whose work had been suppressed (eg, O. Zalyvakha, A. Antoniuk, O. Dubovyk, I. Marchuk, and F. Humeniuk) have had solo exhibitions. Many painters have shown great inventiveness, including P. Hulyn from Uzhhorod, R. *Romanyshyn and R. Zhuk from Lviv, M. *Popov from Kharkiv, O. *Tkachenko from Dnipropetrovske, O. *Nedoshytko and L. Diulfan from Odessa, and F. Tetianyeh, T. Silvashi, V. Budnykov, Ye. Hordiits, M. Heiko, B. Plaksii, and O. Babak from Kiev. After decades of restraint and isolation artists in Ukraine are now free to continue the development of various artistic traditions and have prospects of rejoining the international artistic mainstream.

D. Zelska-Darewych

Pak, Vitold, b 22 August 1888 near Kazlu-Ruda, Lithuania, d 30 May 1965 in Donetsk. Mining mechanics scientist; full member of the AN URSR (now ANU) from 1951. He studied in Tomsk and from 1934 worked and taught at the Artem Mining (now Donetsk Polytechnical) Institute. He also worked (from 1951) at the ANU Mining Institute (now the Institute of Mining Mechanics). His main contributions were in the areas of ventilation, drainage, and ore transport in mines.

Pakharevsky, Leonyd [Paxarevs'kyi], b 16 September 1883 in Shcherbasyntsi, Kaniv county, Kiev gubernia, d ? Writer, actor, director, and translator. He graduated from Kiev University and the Lysenko Music and Drama School. He began to publish his work in 1905; the short story collections *Budenni opovidannia* (Everyday Stories, 1910) and *Opovidannia* (Stories, 1913) and the plays *Nekhai zhyve zhyttia!* (Long Live Life! 1907) and *Todi, iak lypy tsvily* (When the Linden Trees Blossomed, 1914) were published. Pakharevsky translated from G. Hauptmann and A. Schnitzler. He did not take part in the literary life of the Soviet period, and the details of his own life at that time are unknown. He likely fell victim to the Soviet terror of the 1930s.

Pakhlovsk, Oksana [Paxl'ovs'ka], b 18 September 1956 in Kiev. Literary scholar, poet, and translator; daughter of L. *Kostenko. She graduated with a degree in Italian literature from Moscow State University and works at the ANU Institute of Literature. She has published a collection of poetry, *Dolyna khramiv* (The Valley of Shrines, 1988); a monograph, *Italiis'ko-ukrains'ki literaturni zv'iazky xv–xx st.* (Italian-Ukrainian Literary Relations in the 15th to 20th Centuries, 1990); a book of translations of M. Grasso's poetry, *Holos antychnoho moria* (Voice of the Ancient Sea, 1989); translations of individual works by F.G. Lorca, A. Gatto, J.R. Jiménez, M. Luzi, E. Montale, S. Quasimodo, V. Sereni, and other Romance poets; and numerous articles on the history of Italian classical and modern poetry and on contemporary problems of Ukrainian culture.

Pakhomov, Yurii [Paxomov, Jurij], b 15 July 1928 in Kungur, Perm oblast, RSFSR. Economist; full member of the AN URSR (now ANU) since 1988. After graduating from Kiev University (1953) he lectured at the Slovianske Peda-

gogical Institute (1955–60) and the Kiev Institute of the National Economy (1964–6, 1975–9), where he became rector in 1980. He headed a department of the ANU Institute of Economics (1970–5). His works deal with relations of production and the relationship between economic interest and the law in a socialist context. His monographs include *Proizvodstvennye otnosheniia razvitogo sotsializma* (Relations of Production in Developed Socialism, 1976) and *Gumanizatsiia sotsialisticheskoi ekonomiki* (The Humanization of the Socialist Economy, 1987).

Paklonski, Konstantin (Poklonsky), b and d ? Belarusian Cossack leader from the Mahiliou region. He lived in Ukraine and knew B. Khmelnytsky and I. Vyhovsky well. In the 1650s he aspired to create a Belarusian state comparable to the Hetmanate. In 1654 he fought against Polish-Lithuanian forces, at first allied with I. Zolotarenko and then with Muscovy (which granted him the rank of colonel). Having lost the support of the Hetmanate and been provoked by the Russian exploitation of Belarusians, Paklonski joined the Lithuanian forces in 1655 (with the backing of the higher Belarusian Orthodox clergy) in a campaign against Muscovy.

Pakul, Mykola [Pakul'], b 28 February 1880 in Belarus, d 27 May 1953. Soviet Ukrainian historian. He graduated from Kharkiv University (1910) and then taught medieval history and chaired the history faculty there from 1920. He researched the origins of feudalism and wrote *Niderland-skaia revoliutsiia* (The Netherlands Revolution, 1929) and *Lektsii po istorii srednikh vekov* (Lectures in the History of the Middle Ages, 2 vols, 1939).

Palace. An elaborate residence built by a monarch or noble. Palaces of the Kievan Rus' period have not survived. Remains of one built near the Church of the Tithes in Kiev were excavated in the 1930s. During the 13th to 16th centuries many castles but few palaces were built. It was only in the 17th century that members of the Cossack *starshyna*, particularly hetmans, began commissioning them. Most of the palaces built during the Hetman era have not survived. All that remains of Hetman B. Khmelnytsky's palaces in Chyhyryn and Subotiv are written descriptions and drawings of the ruins. Only one drawing of Hetman P. Doroshenko's Chyhyryn palace has survived. All traces of Hetman I. Mazepa's imposing baroque palace in Baturyn were destroyed on the orders of Peter I in 1708, and Hetman D. Apostol's palace in Hlukhiv was destroyed by fire. The palaces built by Polish nobles in Right-Bank Ukraine fared much better, including the Renaissance-baroque one in Pidhirtsi (1654) and others in Zbarazh, Berezhany, and Bar.

Most of the surviving palaces in Ukraine date from the late 18th and early 19th centuries. They were constructed in the classical style then popular in the Russian Empire. The most elaborate was the Zavadovsky palace in Lialychi (1794), built by G. *Quarenghi with a Palladian rotunda, a cupola, and a complex semicircular structure of 100 rooms. Two of the finest palaces were Hetman K. Rozumovsky's in Pochep (1796) and Baturyn (1799). Designed by the Scottish architect C. Cameron, the Baturyn palace was built in the Palladian style with Louis XVI interior decoration and some Ukrainian ornamental detailing. It was partially destroyed in 1923 by the Bolshevik regime

and is now being rebuilt. Other examples in the classical style include the Galagan palace in Sokyryntsi (1829), designed by P. Dubrovsky, and the Vorontsov palace and park (1826) near Odessa, designed by F. Boffo, an Odessa architect originally from Sardinia. Because most of the architects were foreigners, and all buildings had to be approved by the authorities in St Petersburg, Ukrainian traditions were not incorporated in their architecture.

D. Zelska-Darewych

Palaces and houses of culture. Cultural centers located throughout the former USSR and Ukraine. In big cities and commercial centers they are funded and administered mostly by enterprises and trade unions; in rural areas they are operated by the government. The palaces and buildings of culture house various group activities, such as sports and games, recreational activities, and courses of instruction for professional qualification. They also host lessons, lectures, theatrical productions, concerts, film screenings, exhibitions of amateur art, and receptions in honor of political and cultural figures. Most have libraries, reading rooms, and laboratories. Some are intended for use by specific groups, such as scholars, teachers, writers, or railway workers. The first palaces and houses of culture in Ukraine were built in the 1920s.

Roman Paladiichuk

Maksym Palamarchuk

Paladiichuk, Roman [Paladijčuk], b 22 April 1911 in Bilche Zolote, Borshchiv county, Galicia. Journalist, publisher, and political activist. Before completing secondary school he became active in the nationalist movement. By 1928 he was regional leader for Ternopil in the Union of Ukrainian Nationalist Youth. In the OUN he belonged to the oppositionist group headed by I. *Mityrynga and edited its journals *Nash front* (1932–3) and *Proboiem* (1933). He organized the Desheva Knyzhka publishing house in Lviv (1935–9) and edited its popular monthlies *Samoosvitnyk* (1937–9) and *Molodniak* (1937–9). Having left for Germany in 1944, he established the Prometei publishing house in Neu Ulm and joined I. Maistrenko's left-faction of the *Ukrainian Revolutionary Democratic party. In 1949 he settled in Toronto. He is the author of *Vil'ne kozatstvo* (The Free Cossacks, 1936).

Palamarchuk, Hlafira [Palamarčuk], b 16 March 1908 in Fedorivka, now in Vinnytsia oblast. Art historian. A

graduate of Kiev University (1937), she has specialized in the art of T. Shevchenko and edited albums of his watercolors (1963) and self-portraits (1963), written a monograph about him as an artist (1968), and participated in the preparation of several editions of his works.

Palamarchuk, Leonid [Palamarčuk], b 9 August 1922 in Musiivka, Skvyra county, Kiev gubernia. Linguist. After graduating from the Kiev Pedagogical Institute (1949) he joined the research staff of the AN URSR (now ANU) Institute of Linguistics and eventually chaired its Department of Lexicology and Lexicography. In 1978 he became the institute's deputy director. He is the author of numerous articles and of books on synonyms in M. Kotsiubynsky's works (1957) and on Soviet Ukrainian lexicography (1978), coauthor of two orthographic handbooks (1964, 1973), coeditor of the ANU Ukrainian-Russian dictionary (vols 3–6, 1961–3) and dictionary of the Ukrainian language (11 vols, 1970–80), and editor of several collections of articles on lexicology and lexicography (1965, 1966, 1969, 1985).

Palamarchuk, Luka [Palamarčuk], b 19 September 1906 in Troshcha, Lypovets county, Kiev gubernia. Soviet journalist and official. The former head of the Soviet Ukrainian Radio Committee (1941–2) and editor in chief of **Radian-s'ka Ukraina* (1943–52), he graduated from Kiev University (1949) and the CC CPU Higher Party School (1950). As Ukrainian deputy minister (1952–4) and minister (1954–65) of foreign affairs he headed the Soviet Ukrainian delegations at the United Nations and then served as Soviet ambassador to Morocco (1965–72). During this time he was a candidate member of the CC CPU (1956–9, 1960–6).

Palamarchuk, Maksym [Palamarčuk], b 22 October 1916 in Vorobiiivka, Novohrad-Volynskyi county, Volhynia gubernia. Economist and geographer; full member of the AN URSR (now ANU) from 1973. He graduated from Kiev University (1939). He lectured and headed a department at the Lviv Trade and Economics Institute (1946–62) and then returned to Kiev to work at the ANU Institute of Geological Sciences, the Council for the Study of the Productive Resources of Ukraine, and the geography division of the ANU. In 1975 he was appointed a professor at Kiev University. Palamarchuk's works deal with the distribution of economic resources and development in Ukraine and include *Ekonomichna heohrafiia Ukraïns'koi RSR* (The Economic Geography of the Ukrainian SSR, 1975).

Palamarenko, Anatolii, b 12 July 1939 in Makariv, Kiev oblast. Reciter and actor. In 1961 he completed study at the Kiev Institute of Theater Arts. In 1961–2 he worked as an actor in the Khmelnytskyi Ukrainian Music and Drama Theater, and since 1962 he has been a reciter in the Kiev Philharmonic Society. In his repertoire are works of Ukrainian classical and contemporary writers. He wrote *Kobzareva дума* (The Kobzar's Duma, 1980).

Palace, Jack (né Palahniuk, Walter [Volodymyr]), b 18 February 1920 in Lattimer, Pennsylvania. Hollywood film actor of Ukrainian descent. After studying at the University of North Carolina and Stanford University he was a professional boxer before appearing on Broadway in 1948. He was invited to perform in the film *Panic in the Streets*

Jack Palance

(1950) by E. Kazan. Palance was nominated for Academy awards for his supporting roles in *Sudden Fear* (1952) and *Shane* (1953) and was awarded an Oscar for his supporting role in *City Slickers* (1991). He has appeared in over 50 films, among them *House of Numbers* (1957), *Barrabas* (1962), *Baghdad Café* (where he speaks some Ukrainian, 1988), and *Batman* (1989), and on television in the series *The Greatest Show on Earth* (1963) and *Bronk* (1975–6).

Seals of the Zaporozhian Cossack palankas

Palanka (from Italian *palanca* and Latin *phalanx*). An administrative territorial unit in the *Zaporizhia, corresponding to the *regiment in the Hetman state. A large fortified settlement defended by a Cossack garrison served as its center. In the 1770s there were eight palankas: Kodak (named after a frontier fort), Boh-Hard (named after the Boh River and a frontier town), and Inhul (named

after a river) in Right-Bank Ukraine; and Protovch, Orel, Samara, Kalmiius, and Prohnii (all named after rivers) in Left-Bank Ukraine. The full palanka system was introduced during the period of the *New Sich (1734–75), when the increase in the Zaporizhia's population made it necessary to introduce local administrations.

A Cossack colonel had supreme judicial, administrative, financial, and military authority over all Cossacks and peasants living on the territory of each palanka. With the aid of his *starshyna* he supervised the local administration, made up of the otamans and secretaries of the free settlements (*slobody*). The colonel and other palanka officials were not elected, but appointed by the *kish otaman of the Zaporozhian Sich.

Palashchuk, Fedir [Palaščuk] (pseud: Bohdan Konar), b 1895 in Rohatyn county, Galicia, d ca 1933. Revolutionary figure and Soviet official. A Ukrainian Sich Rifleman during the First World War, in 1918 he worked for the Ukrainian administration in Podlachia. In early 1920 he was a member of the Revolutionary Committee of the Red Ukrainian Galician Army in Vinnytsia and the commissar of finance in the *Galician Revolutionary Committee. In the 1920s he held various official posts in Moscow, including deputy director of state publishing and the USSR Industrial Bank and USSR deputy people's commissar of agriculture. About 75 senior agriculture officials in Moscow and Kharkiv, including Palashchuk, were arrested in March 1933 and accused of spying and agricultural sabotage causing the famine in Ukraine, the Kuban, and Belarus. He and 34 others were executed without trial by the Unified State Political Administration (OGPU); the remaining were sent to concentration camps.

Palatinate. See Voivodeship.

Palatine. See Voivode.

Pale of Settlement (*smuha osilosti*; Russian: *cherta osedlosti*; derived from the Latin *palus*, or stake, indicating a fixed territory or district under a particular jurisdiction). The term applied to the area within the Russian Empire to which Jewish settlement was restricted. The region was established as part of the imperial Russian structure after the introduction of a large number of Jews into the realm as a result of territorial acquisitions following the three partitions of Poland (1772, 1793, 1795). Earlier attempts to regulate Jewish settlements in Ukrainian territories included the Treaty of Zboriv (1649), which barred Jews and Jesuits from Kiev, Bratslav, and Chernihiv voievodeships, and a series of early 18th-century ukases (1721, 1727, 1738, 1740, 1742) that prohibited Jews from living in Left-Bank Ukraine.

The Pale covered an area from the Baltic Sea to the Black Sea and included much of Ukraine, Bessarabia, Belarus, and Lithuania. According to the census of 1897 it encompassed 4,899,300 Jews (94 percent of the total Jewish population of the Russian Empire), representing 11.6 percent of the general population of that area. Although they were a minority in every province, 82 percent of Jews lived in the towns and hamlets (*shtetls*) of the Pale and made up 36.9 percent of the urban population of the region. Just prior to the First World War the Pale included 15 gubernias: Bessarabia, Chernihiv, Hrodna, Kateryno-

slav, Kaunas, Kherson, Kiev, Mahiliou, Minsk, Podilia, Poltava, Tavriia, Vilnius, Vitsebsk, and Volhynia.

In 1764 and 1783 commercial rights were granted the Jews in the territories of New Russia gubernia, which had been annexed from Turkey. In 1785 the Jews were granted equal rights with other inhabitants of the region. Subsequently those areas were included in the Pale.

In 1791 it was decided to permit the presence of the Jews in their former regions of residence. In 1794 the earlier decree was also applied to the regions which had been annexed with the second partition of Poland, namely, Minsk, Volhynia, and Podilia, as well as lands east of the Dnieper in the Chernihiv and Poltava regions. In 1795, with the third partition of Poland, the law was extended to the provinces of Vilnius and Hrodna.

Occasionally, various territories or districts were closed to Jews, including Courland (1829), Astrakhan and northern Caucasia, Sevastopol, Mykolaiv, and Kiev (1835), some villages in Mahiliou and Vitsebsk gubernias, and crown lands and Cossack villages in Chernihiv and Poltava gubernias (1835). As a result of further restriction ('Temporary Laws' in 1881, of Aleksander III), Rostov and Tahanrih (1887), the city and province of Moscow (from which thousands of Jewish craftsmen and their families were expelled in 1891–2), and Yalta (1893) were closed to Jews. The laws of 1881 also prohibited any new settlement by Jews outside towns and shtetls in the Pale, with the exception of the 10 Polish provinces (the Vistula region). Those Jews who lived in villages prior to 1881 were allowed to reside in them, although the local peasantry was granted the right of demanding expulsion of the Jews who lived among them. At the end of the 19th and the beginning of the 20th centuries the Jews of the Pale experienced widespread and bloody pogroms.

The Pale of Settlement was abolished by the Provisional Government by the law of 2 April 1917, 'On the Abolition of Religious and National Restrictions.'

Paleobotany. The study of plant life of the past, covering the description, classification, occurrence, and distribution of fossil plants, their origins, and their evolutionary trends through geological time. In Eastern Europe Ya. *Zembnytsky was the first to describe fossil plants. One of the foremost researchers of paleobotany in Ukraine was I. *Schmalhausen. Research on the evolution of morphological structures, which led to various generalizations in plant morphology and phylogeny, began in the early 20th century. A. *Kryshtofovych elaborated a number of important theoretical problems while studying the paleoflora from the Devonian to the Quaternary period. The first paleobotanical laboratory in Ukraine was at the AN URSR (now ANU) *Institute of Geological Sciences. Other Ukrainian paleobotanists include D. *Zerov, I. *Shmalhausen, V. Prynada, O. Karpinsky (paleontology and paleogeography), and O. *Rohovych.

Paleography. The study of writing, writing materials, and manuscript ornamentation and illustration. An ancillary discipline of philology and history, Ukrainian paleography focuses on the study of ancient documents and manuscripts written in Ukrainian; in a wider sense it includes all written artifacts created in Ukraine. The related disciplines of *epigraphy, *sphragistics, and *numismatics focus on ancient inscriptions on materials or buildings (graffiti). Ukrainian paleography is concerned with various aspects of the evolution of the graphic form of the letters of the Ukrainian alphabet and other written symbols, including their constituent elements, systems of abbreviation, and graphic delineation. It also concerns the materials and instruments used in writing. Scholars of practical paleography examine manuscripts and establish the time and place of their composition. They are sometimes able to establish the authorship of a document.

Paleographic study of manuscripts also involves charting the history of *orthography (abbreviations, punctuation, diacritical marks, the use of particular letters). Slavic paleography is divided into the study of Glagolitic and Cyrillic (and Latinized for Catholic Slavs) texts. Successive forms of the *Cyrillic alphabet were the *ustav script (uncial, 11th–16th centuries), large and small *pivoustav script (14th–18th centuries), and *skoropys* (shorthand, 16th–18th centuries), as well as ornamental *viaz*i (ligatures) and relatively rare cryptograms. Since the 1950s the writing of recent decades has also become an object of paleographic research.

The oldest manuscripts were written on parchment. When paper was introduced in the 14th century (initially a cotton rag, *bombitsyna*), each paper factory imprinted its products with distinguishing watermarks (*filigrany*); the study of these made the dating of manuscripts easier. In the 11th to 15th centuries confidential memorandums were written (particularly in Novgorod and Belarus) on birch bark. Ornamented and illuminated manuscripts can be dated according to the designs they bear. Depictions of fantastic or monstrous beasts, for example, were in vogue in the 13th century, geometric designs and more naturalistic images of flora and fauna in the late 14th century, and woven and plaited floral designs in the 15th century.

Slavic paleographic scholarship began to develop in the late 18th century and emerged in institutions devoted to archeography and the collection and description of manuscripts. In the late 19th and early 20th centuries descriptions of collections of Ukrainian manuscripts were published, including outlines by M. Petrov (1875–9) and A. Lebedev (1916) on the collection of the Kiev Theological Academy; by M. Lileev on that of the Chernihiv Theological Academy; V. Berezin, that of the Pochaiv Monastery (1881); M. Popruzhenko, that of the Odessa Municipal Library (1890); H. Kryzhanivsky, that of the Volhynia eparchial depository of ancient manuscripts (1896) and V. Trypilsky, that of the Poltava eparchial depository (1909); M. *Speransky, that of the Nizhen Lyceum (1900, 1905); I. *Sviantsitsky, those of the People's Home (1904) and Stauropogion Institute in Lviv (1908); S. *Maslov, that of Kiev University (1910); O. Rystencko, that of the Odessa Association of History and Antiquities (1910); S. Shchekhlova (1916) and D. *Shcherbakivsky (1923), that of the Kiev Municipal Museum; M. Heppener, that of the Central Scientific Library of the AN URSR (now ANU; 1969); and Ya. Dashkevych, that of the Lviv branch of the Central State Historical Archive (1972).

V. *Mochulsky (1890) and F. *Petrun (1927) researched the collections of V. Hryhorovych, and I. Svientsitsky, those of A. Petrushevych (1906–11); O. *Bodiansky (1838) and O. *Hruzynsky (1911–12) studied the Peresopnytsia Gospel.

D. *Zubrytsky, one of the founders of Ukrainian paleography, published an album of autographs of Ukrainian historical figures. I. *Kamanin was the first to apply the decimal system of classification, particularly for dating manuscripts (1905). P. Vladimirov and I. Ohienko published studies of Ukrainian manuscripts from the 11th to 17th centuries (1890). V. *Peretts established a school of archeography and collected materials for a catalog of Ukrainian manuscripts. Scholars of regional script included K. *Lazarevska (Kiev, 1926), P. Bohdan (Bukovyna, 1956), P. Zakharchyshyna (Lviv, 1964), Z. Khomutetska and V. Chuntulova (Kremianets, 1964), and I. Ivanytska (Slobidska Ukraine, 1965, 1968).

General studies of the development of the graphics of Ukrainian writing were published by F. Tytov (1911), O. Maslova (1925), Ye. *Tymchenko (1927), V. *Diadychenko (1963), V. Panashenko (1974), and M. *Boiko (1982). Monographs on the ornamentation and *illumination of Ukrainian manuscripts were published by I. Svientsitsky (1922–3, 1933), D. Shcherbakivsky (1926), Ya. *Zapasko (1960), V. Siverska (1966), and H. *Lohvyn (1974). Watermarks on Ukrainian manuscripts were researched by I. Kamanin and O. Vytvytska (1923), O. Heraklitov (1963), and O. Matsiuk (1974).

Paleolithic Period. The earliest period of human development, lasting until approx 8000 BC. In Western archeology the Paleolithic Period (or Old Stone Age) is divided into two epochs: the Lower Paleolithic (to 40,000 BC) and the Upper Paleolithic (40,000–8000 BC). These, in turn, consist of several eras or cultures. Notwithstanding some significant differences between Ukrainian and (Western) European Paleolithic cultures, Ukrainian archeological studies follow this basic scheme.

The Paleolithic period coincides with the geological age known as the Pleistocene, which is marked by a general cooling of the earth's temperature and the corresponding expansion and retreat of glaciers. The three successive waves of glaciations (known as the Mindel, Riss, and Würm glaciations in Western European nomenclature and by other names in Central and Northern European and Soviet classification schemata) that occurred in Europe from approx 600,000 BC are of particular interest to

the study of human development. The Pleistocene epoch ends at the same time as the historical Paleolithic period (ca 10,000–8000 BC) with the final retreat of glaciation over most of Europe and the coming of a new, warmer geological age, the Holocene.

The oldest evidence of human presence in Ukraine (found in *Luka-Vrublivetska) has been dated to as early as 300,000 BC. A small number of other *Acheulean culture (ca 300,000–100,000 BC) sites have been excavated in Ukraine, providing evidence that early humans lived there in hunter-gatherer bands. However, evidence of substantial settlement in Ukraine begins only with the onset of the *Mousterian culture (100,000–40,000 BC), occasionally referred to as the Middle Paleolithic. This period began with the mild temperatures of the Riss-Würm interglacial and then continued with the Würm glaciation, which caused temperatures to fluctuate as it moved back and forth in three phases lasting to 10,000–8000 BC. The population growth experienced in such a glacial period resulted partly from the early humans' increasing ability to adapt to cold conditions. More important was the large number of game animals that could be hunted and the abundant vegetation cover which could be gathered in spite of the colder climate.

Mousterian sites have been discovered in Ukraine mainly in the middle-Dniester and Dnieper-rapids regions and in the hills of southern Crimea. Such locations offered the shelter of river terraces or caves. Evidence indicates that surface dwellings were constructed somewhat similar in appearance to igloos, using animal skins and some form of posts on a foundation of animal bones (particularly mammoths). Remains of cave dwellings, temporary camping grounds, flint extraction locations, and flint workshops have also been found. The ubiquity of hearths in all forms of Mousterian shelters indicates that the ability to make fire had become widespread. A variety of locally made flint tools (particularly side-scrapers and points) have been unearthed at Mousterian sites, indicating a varied usage. Nevertheless, flint technology was not particularly well-developed in this period.

Mousterian humans lived by hunting and gathering. The game during this period included mammoths, the woolly rhinoceros, bison, deer, wolves, and bears. Foods gathered included fruits, leaves, roots, bird eggs, and mollusks.

The Mousterian inhabitants of Ukraine were Neanderthals who lived in small groups that scholars believe may have been matriarchal and matrilineal. The fact that they buried their dead in a ritualized manner on their sides in a flexed position indicated that these people had probably developed at least a rudimentary religious consciousness.

A major change took place ca 40,000 BC when the Mousterian culture was supplanted by a series of Upper Paleolithic cultures. Although a direct causal link cannot be established, this was probably owing to the appearance of the (modern) Cro-Magnons and the demise of the Neanderthals. The genesis of Cro-Magnons in Ukraine is a subject of debate, with some (mainly Soviet) scholars viewing this as an indigenous evolutionary process and others deducing that they migrated into Ukrainian lands. Origins notwithstanding, significant developments took place during this period.

One of the most obvious changes during the Upper Paleolithic was a remarkable increase in the variety of imple-

ments used and the quality of their manufacture. Endscrapers and burins became particularly widespread at this time. The manner in which flint was worked from cores was improved. Different types of raw materials, including bone, antler, and ivory, were commonly used. High-quality flint was actively sought and transported over long distances (possibly as a barter item).

Upper Paleolithic settlements tended to be more permanent than their Mousterian counterparts. They became also more widespread throughout Ukraine (with a concentration in the previously settled Dniester and Dnieper areas) as the population increased during this period. Hunting and gathering remained primary occupations, with evidence indicating considerable improvements in hunting technology and organization. Fishing became common during this time.

A fundamental change occurred in the Upper Paleolithic with the emergence of an esthetic consciousness. Whereas the remains of art objects are unknown at Mousterian sites, Upper Paleolithic discoveries include decorated bone, ivory, and antler objects, shell pendants, ivory bracelets, and ivory figurines of women, mammoths, and birds. Remains of flutes and bone percussion instruments indicate that Upper Paleolithic man also created music.

Paleontology. The scientific study of all aspects of life in the geological past, based on examination of fossil materials. It is commonly divided into paleozoology and paleobotany, but also includes subareas, such as micropaleontology, paleoecology, paleobiogeography, biostratigraphy, and paleoichnology. Although some paleontological activity took place in Ukraine in the second half of the 17th century (eg, the unearthing of the remains of a mammoth in the Kharkiv area), systematic paleontological research commenced only in the early 19th century. I. *Kalenychenko, who explored the Sumy region, erected a unique structure depicting a mammoth in the village of Kulishivka. O. *Rohovych studied fish fossils.

The mid-19th-century treatises on the paleontology of Russia (E. Eichwald), Poland (G. Pusch), and southern Russia (A. von Nordmann) included all data known at that time on paleontological finds from deposits in Ukraine. The theories of Darwin resulted in intensified paleontological exploration in Ukraine during the late 19th and early 20th centuries. The intensification of geological prospecting and exploration for useful geological deposits underscored the need for research in applied paleontology, particularly in stratigraphy. Early paleobotanical research in Ukraine was done by I. *Shmalhauzen, M. Zalesky, and A. *Kryshchovych, who studied coal deposits as well as Paleogene and Neogene flora. Paleozoological studies done by M. *Andrusiv, G. Sintsov (paleomalacology), and P. *Tutkovsky (micropaleontology) were of importance for biostratigraphy and paleogeography. The work of O. Alekseev, O. *Borysiak, N. Sokolov, and I. *Khomenko laid the foundation for the studies of Neogene vertebrate fauna. E. Niezabitowski-

Lubicz and M. *Łomnicki studied the Pleistocene vertebrate fauna of Western Ukraine. Paleontological research centers arose at Kiev and Odessa universities, and the first paleontological museums in Ukraine were established in Odessa and Lviv.

From the 1920s, paleontological studies were based at academic institutions, in particular at the zoological and geological museums, and later within newly created departments at the AN URSR (now ANU) institutes of Geological Sciences, Zoology, and Botany. In 1935 the separate Paleontological Museum evolved from the Zoological Museum. Besides the paleontology departments at Kiev and Odessa universities, new centers of paleontological studies emerged at Kharkiv (D. *Soboliev) and Dnipropetrovske (B. *Chernyshov) universities. At that time paleobotanical studies, which included floras of the Neogene, Paleogene, and Mesozoic (N. Pimenova), and Paleozoic (K. *Novyk) periods, laid the foundations for spore-pollen studies of anthropogenic flora (D. *Zerov). Paleozoological studies included invertebrate families, especially the simplest ones, cephalopods, and mollusks (P. Tutkovsky, B. Chernyshov, V. *Bondarchuk, L. Lunsger-shauzen, V. Pchelintsev). There was an intensification in the studies of Neogene and anthropogenic vertebrate fauna, mainly mammals and birds (I. Khomenko, I. *Pidoplichko, V. *Krokos, M. Pavlova, M. Burchak-Abramovych). In 1931 a paleozoological textbook was published by Krokos.

After the Second World War more scientists joined the research centers of the ANU, and new paleontology departments were founded at Lviv, Donetsk, and Dnipropetrovske universities. There was an increase in studies dealing with biostratigraphy, paleogeography, and evolutionary paleontology, as well as paleofloristics (K. Novyk, F. Stanislawski, O. Shchogolev), especially in conjunction with spore-pollen analysis (D. Zerov, O. Artiushenko, A. Ishchenko, N. Shchekina). Extensive paleozoological studies of almost all invertebrates were carried out, including the simplest ones (O. *Kaptarenko-Chornousova, I. Vetlinsky), cephalopods (O. Rotai, V. Makrydin), mollusks (B. Chernyshov, V. Sobetsky, D. Makarenko, B. Zhyzhchenko, H. *Moliavko, A. Eberzin, L. Neverska, I. Yatsko), crustaceans (S. Horak, V. Sheremeta), insects (Ye. Savchenko, Pidoplichko), and graptolites (O. *Vialov, O. Obut). A series of paleontological reference books was published, containing data on the fauna of Cenozoic and Mesozoic fossils. Vialov's 1966 monograph on life-activity traces of organisms and their paleontological significance clarified points of the nomenclature and classification of fossils with problematic origin. Substantial accomplishments were achieved in studies of Neogene anthropogenic mammals (Pidoplichko, V. *Topachevsky, O. Korotkevych), Paleozoic agnates and fishes (B. Balabai), and Neogene anthropogenic birds (M. Voinstvensky). The Ukrainian Paleontological Society was founded in 1977 in Kiev by Vialov, with six chapters throughout Ukraine.

Palfii, Fedir [Palfij], b 3 March 1925 in Koroleve, Transcarpathia. Biochemist; corresponding member of the USSR Academy of Agricultural Sciences since 1970. A graduate of the Lviv Zootechnical-Veterinary Institute (1950), in 1954 he joined the AN URSR (now ANU) Institute of Agrobiology, which in 1956 became the Scientific Research Institute of Land Cultivation and Animal Husbandry in the Western Regions of the Ukrainian SSR. He became a professor in 1966 and the institute's director in 1969. He has researched feed biochemistry and fodder storage techniques.

Andrii Palii

Palii, Andrii [Palij, Andrij], b 1 December 1893 in Kryvotuly, Tovmach county, Galicia, d 10 May 1961 in Edmonton. Co-operative and civic leader. He served as a lieutenant in the Austrian army and then in the Ukrainian Galician Army. After the First World War he graduated in agronomy from the Prague Polytechnic (1922) and returned to Stanyslaviv, where he helped revive the *Maslosoiuz dairy union. By 1924 he had been elected to the union's board of directors; he was then appointed executive and trade director (1925–44) and coeditor of its monthly *Kooperatyvne molocharstvo* (1926–39). Under his management Maslosoiuz developed into one of the largest co-operatives in Western Ukraine. He also served on the board of directors of the Audit Union of Ukrainian Co-operatives and of Silskyi Hospodar and was president of the Moloda Hromada veterans' association and vice-president of Sokil-Batko. Under the German occupation he continued to manage Maslosoiuz and became a member of the Military Board of the Division Galizien in charge of family welfare. After leaving Ukraine in 1944, he settled in Toronto in 1948, where he managed the M-C Dairy (1952–7).

Palii, Lida [Palij], b 11 April 1926 in Stryi, Galicia. Graphic artist, literary activist, and writer; daughter of A. *Palii. After moving to Canada (1948) she graduated from the Ontario College of Art (1953) and from the University of Toronto (1967). She has designed posters, books, and bookplates. Palii is engaged in promoting Ukrainian literature in the PEN International Association and has authored a collection of verse, *Dyvovyzhni ptytsi* (Strange Birds, 1989), and two collections of travel reminiscences, *Mandrivky v chasi i prostori* (Trips in Time and Space, 1973) and *Svitla na vodi* (Lights on Water, 1985). In 1988 some of

her poems appeared with those of two other poets in an English translation, *Land of Silent Sundays* (1988).

Palii, Mykola [Palij] (Paley, Nicholas) (pseud: Mykola Hurko, Tibursio), b 7 December 1911 in Bohdanivka, Skalat county, Galicia. Writer, literary scholar, and translator. In the 1930s he contributed feuilletons and articles on Italian literature and Ukrainian ethnography to Lviv periodicals and wrote the brochure *Moloda Italiia* (Young Italy, 1937). After completing medical studies in Rome (1940) he emigrated to the United States. He studied Romance languages at Ohio State University (MA, 1944). From 1944 he was an assistant professor at that university, and from 1950 to 1977 he was a professor at Beloit College in Wisconsin. He contributed humorous and satirical sketches and publicistic articles to *Mitla* (Buenos Aires) and *Ukrains'ke zhyttia* (Chicago) and published separately the story collections *Nadiini dni* (Hopeful Days, 1949) and *Dud'o i ia* (Dudo and I, 1980), the poetry collection *Etcetera* (1970), the humor and satire collections *Sentymental'na Ukraina* (Sentimental Ukraine, 1974) and *Romantychna Ukraina* (Romantic Ukraine, 1980), a novelette, *Mari, Mari* (1975), the scholarly works *Tesis profesionale* (1969) and *Dos novellas de la tierra* (1972), and Ukrainian translations of *La vida de Lazarillo de Tormes* (1970), M. Tamayo y Baus's *Un drama nuevo* (1972), and a selection of Spanish short stories, *Palkoiu liubov'iu* (With Ardent Love, 1978).

Palii, Semen [Palij] (actual surname: Hurko), b early 1640s in Borzna, Chernihiv region, d between 24 January and 13 May 1710 in Kiev. Cossack leader. He studied at the Kievan Mohyla College and became a registered Cossack of Nizhen regiment. In the 1670s he joined the Zaporozhian Host and distinguished himself as a soldier and administrator. He served as a volunteer colonel in King Jan III Sobieski's army and, according to some sources, took part in the rout of the Turks and Crimean Tatars at Vienna in 1683. In 1685 the Polish Sejm adopted a constitution confirming the rights and freedoms given to the Cossacks by the Polish kings, and Cossack regiments were established in Khvastiv and Bohuslav and revived in Korsun and Bratslav. In 1684–5 Palii lived with his regiment around Khvastiv and soon became the de facto ruler of the Bila Tserkva region. In the 1680s and 1690s Palii led successful campaigns against the Turks and Tatars as an ally of Poland and of Hetman I. Mazepa. He concentrated his efforts, however, on recolonizing the Right-Bank territories that had been devastated by the Tatars, liberating them from Polish rule, and uniting them with the Left-Bank Hetmanate. In 1689 his forces attacked Nemyriv, where he was captured by the Poles and imprisoned. He was freed after the intervention of Jan Sobieski in 1690.

Palii's relations with Poland deteriorated after the Sejm ordered the liquidation of all Right-Bank Cossack regiments by force in 1699. In 1702 he and other Right-Bank Cossack leaders under Hetman S. *Samus led an uprising against Polish rule that quickly spread throughout Kiev, Bratslav, and Podilia voivodeships and even affected Galicia. The rebels did not manage, however, to gain the support of the Left-Bank Hetmanate and Russia, which did not want to annex the Right Bank. In 1703 the rebellion was crushed by a large Polish army, and its participants were brutally punished (10,000 were executed). Palii then turned for support to pro-Swedish Polish magnates.

Mazepa, who opposed Palii's radical social policies and feared his popularity among the Zaporozhian Cossacks, sent troops into Right-Bank Ukraine to help the Poles suppress the uprising and had Palii arrested. Palii was deported to Moscow and exiled in 1705 to Siberia. After Mazepa broke with Moscow, Palii was allowed to return to Ukraine. After the Battle of Poltava he resumed command of Bila Tserkva regiment. He was buried at the Mezhyhiria Transfiguration Monastery in Kiev.

Mykola Paliienko (1869–1937)

Mykola Paliienko (1896–1944)

Paliienko, Mykola [Palijenko], b 7 December 1869 in Kiev, d 11 November 1937. Jurist and legal scholar; full member of the AN USSR (now ANU) from 1930. After graduating in law from Kiev University (1892) he studied for two years at the universities of Paris, Heidelberg, and Strasbourg, and then taught at the Demidov Lyceum in Yaroslavl (1903–6) and Kharkiv University (1906–30). In 1930 he was appointed to the chair of state law at the ANU. Paliienko wrote many books, including a monograph on his own psychological theory of law (1900) and monographs on normative positivism (1902) and the law-governed state and constitutionalism (1906). Later he became interested in the issue of federalism and wrote *Konfederatsii, federatsii i Soiuz Sotsialisticheskikh Sovetskikh Respublik* (Confederations, Federations, and the USSR, 1923), *Pravo hromadianstva v suchasnykh federatsiiakh i v Soiuzi RSR* (The Right of Citizenship in Contemporary Federations and in the USSR, 1926), and *Problema suverenitetu suchasnoi derzhavy* (The Problem of the Sovereignty of the Contemporary State, 1929).

Paliienko, Mykola [Palijenko], b 30 September 1896 in Skvyra, Kiev gubernia, d 21 July 1944 near Khylychychi,

Zolochiv county, Galicia. Army officer. During the First World War he completed training at an artillery officer school and served in Russian artillery units on the Austrian front. In 1918–21 he commanded artillery units of the UNR Army. In 1928 he was selected to serve under contract with the Polish army, and in 1932–4 he attended the Polish Higher Military School in Warsaw. A major in the Polish 26th Artillery Regiment, he fought in the German-Polish War in September 1939. After joining the Division Galizien in July 1943, he commanded a noncommissioned officer school and eventually a heavy artillery battalion. He was killed in the Battle of Brody.

Dmytro Paliiv

Kekyliia Paliiv

Paliiv, Dmytro [Palijiv], b 17 May 1896 in Perevozets, Kalush county, Galicia, d 19 or 20 July 1944 in Brody, Galicia. Political and military leader and journalist. During the First World War he was an officer in the Ukrainian Sich Riflemen. As organizational officer of the Ukrainian Military Committee he was largely responsible for the success of the *November Uprising in Lviv in 1918. After the war he was a founding member of the clandestine *Ukrainian Military Organization (UVO) and became a member of its supreme command (1921–6). He was one of the founding members of the *Ukrainian Party of National Work (UPNR), an UVO front organization, and coedited its journal **Zahrava*. He was also chief editor of **Novyi chas* (1923–33, with some interruptions). After breaking with the UVO he led the UPNR into the new *Ukrainian National Democratic Alliance (UNDO). He sat on the CC of the UNDO (1925–33) and was elected as a candidate of the Bloc of National Minorities to the Polish Sejm in 1928. When the Sejm was dissolved in 1930, Paliiv was arrested along with other Ukrainian deputies, and spent three years in prison. A leading opponent of the *Normalization policy, he was expelled from the UNDO in 1933 and founded the *Front of National Unity. Paliiv edited its newspapers *Bat'kivshchyna* (1934–9) and *Ukrains'ki visty* (1935–9). During the 1939 Soviet invasion of Galicia he escaped to Krynytsia in the German-occupied Lemko region and remained aloof from political life until 1943, when he helped organize the *Division Galizien. He served as captain and political adjutant to the division's commander and was killed in the Battle of Brody.

Paliiv, Kekyliia [Palijiv, Kekylija] (nickname: Tsiopa), b 6 January 1906 in Perevozets, Kalush county, Galicia, d 11

November 1969 in Toronto. Educator and civic leader; sister of D. *Paliiv. A leading organizer of the *Plast Ukrainian Youth Association in Galicia, she served on its national executive (1926–30) and, after its dissolution by the Polish authorities, worked with the Vohni co-operative publishing house and the Commission for Youth Camps and Excursions, which carried on Plast's work. In 1942–4 she served as youth secretary on the Ukrainian Central Committee and chief organizer of Ukrainian educational societies for youth. After the war she was commandant of Plast girls' units in Germany (1947–9), chief of the Plast movement in Britain (1949–52), and head of the national executive of Plast in Canada (1953–9, 1962–5). She was president of the Ukrainian Teachers' Federation of Canada (1965–9), a founder and vice-president of the Ukrainian Educational Council of the World Congress of Free Ukrainians (1967–9), and the initiator of the patrons' network of the émigré *Entsyklopediia ukraïnoznavstva* (Encyclopedia of Ukraine) being prepared by the Shevchenko Scientific Society in Sarcelles, France.

Paliij, Michael [Paliij, Myxajlo], b 22 December 1913 in Khorostkiv, Husiatyn county, Galicia. Historian and librarian; corresponding member of the Shevchenko Scientific Society. A postwar refugee, he studied at the universities of Göttingen, Minnesota, Denver (library science), and Kansas (PH D, 1971). He worked as a librarian at the universities of Oklahoma and Kansas and developed their Ukrainian collections. He is the author of *The Anarchism of Nestor Makhno, 1918–1921: An Aspect of the Ukrainian Revolution* (1976) and articles on modern Ukrainian history.

Wasyl Palijczuk: *Contemplation* (mezzotint dry point)

Palijczuk, Wasyl [Paliččuk, Vasył'], b 10 July 1934 in Tuchapy, Galicia. Painter, sculptor, and educator. A postwar refugee in the United States since 1950, he studied at the University of Maryland and the Maryland Institute of Art MFA, 1965). Since 1967 he has taught art at Western Maryland College, where he has also served as gallery director. He is a member of the Ukrainian Artists' Associa-

tion in the USA and former president of the Maryland Artists' Equity Association (1982–3). His modernist oils, watercolors, and wood, stone, bronze, and plastic sculptures have been displayed at over 25 solo exhibitions.

Palinodiia ... (Palinode ...). An important Orthodox polemical work written by Z. *Kopystensky in 1619–21. Subtitled 'A Book in Defense of the Catholic Holy Apostolic Eastern Church and the Holy Patriarchs, and about the Greeks, and about the Ruthenian Christians [*rossokh khristianekhi*],' it is a defense of the Orthodox faith written in response to a 1617 Polish book by L. Krevza, the archimandrite of the Uniate monastery in Vilnius. The erudite author cited over 100 works in his theological tract and embellished it with baroque pathos, satire, witticisms, proverbs, panegyrics (to Prince K. Ostrozky), and J. Heribert's speech to the Polish Sejm. *Palinodiia* circulated in manuscript form among Orthodox polemicists until 1876, when it was finally published in vol 1 of the series *Pamiatniki polemicheskoi literatury v Zapadnoi Rusi*. It has been the subject of a book in Russian by V. Zavitnevych (Warsaw 1883) and of an article in Latin by A. Ishchak in *Bohosloviia* (1930–2).

Aleksandr Palladin

Palladin, Aleksandr (Oleksandr), b 10 September 1885 in Moscow, d 6 December 1972 in Kiev. Biochemist; corresponding member of the VUAN/AN URSS (now ANU) from 1926 and full member from 1929; full member of the Belarusian Academy of Sciences from 1934, the USSR Academy of Sciences from 1942, and the USSR Academy of Medical Sciences from 1944. A graduate of St Petersburg (later Petrograd) University (1908; MSc, 1917), he was a professor at the Kharkiv Institute of Agriculture and Forestry (1916–21), taught at Kharkiv University (1917–21), and was a professor in and chairman of the biochemistry departments at the Kharkiv Medical Institute (1921–31) and Kiev University (1934–54). He founded and directed the Ukrainian Biochemical Institute in Kharkiv (1925–31) and the ANU Institute of Biochemistry in Kiev (1931–69); founded (1926) and edited **Ukrains'kyi biokhimichnyi zhurnal*; founded and headed the Ukrainian Physiological Society (1928–58); was a member of the VUAN/AN URSS presidium (from 1930), its secretary (1934–8), first vice-president (1939–46), and president (1946–62); served as a member of the Ukrainian Supreme Soviet's Presidium

(1947–63) and the CC CPU (1954–66); and headed the Ukrainian (1958–72) and USSR (1964–72) Biochemical societies.

The main subjects of Palladin's research were the biochemistry of vitamins, of muscle activity, and of the nervous system in general. He pioneered Soviet biochemical research of vitamins and of metabolic disorders during avitaminosis; synthesized the K vitamin analog Vicasol; developed the concept of functional biochemistry relating to fatigue, rest, and muscle training; established the biochemical topography of nerve tissue; did radioactive tracer studies on the metabolism of proteins, nucleic acids, and phosphocarbohydrates in nerve tissue; and studied ionic transport processes in the nervous system. Palladin published over 240 works, including monographs on the biochemistry of the nervous system (1965) and on albumins of the brain and their exchange (1972), and textbooks on nutrition (1919, 1922, 1926) and biochemistry (1924; 12th edn 1946). His biobibliography by A. Utevsky was published in Kiev in 1959, 1961, and 1979. The ANU Palladin Biochemistry Prize was established in 1974.

S. Trofimenko

Pallas, Peter, b 22 September 1741 in Berlin, d 8 September 1811 in Berlin. German naturalist and explorer. In 1766, after being educated in Germany, Holland, and England, he was elected an inaugurate member of the St Petersburg Academy of Sciences. In 1793–4 he traveled in the Volga region, northern Caucasia, and the Crimea. On his travels he collected geological, paleontological, geographical, botanical, zoological, and ethnographic data, which he later published. Pallas's major works include the three-volume *Reise durch verschiedene Provinzen des Russischen Reichs in den Jahren 1768–73* (1771–6), which was translated into Russian (1773–88), *Flora Rossica* (2 vols, 1774, 1788), and a comparative dictionary of all languages and dialects (2 vols, 1787, 1789). His works contained the best information at that time on Ukraine's flora and fauna.

Palmetto (*Sabal*; Ukrainian: *sabal*). A palm tree of the family Palmae that grows to a height of 30 m and trunk thickness of 60 cm. In Ukraine the common palmetto (*S. palmetto*) and the short-stemmed bush palmetto (*S. minor* or *S. adansonii*) grow on the Black Sea shores in the Crimea and Caucasia. Their wood serves as a strong, nonrotting building material especially suitable for underwater construction. The leaf fiber is used in the manufacturing of mats, coarse fabrics, and brushes.

Palmov, Viktor [Pal'mov], b 10 October 1888 in Samara, Russia, d 7 July 1929 in Kiev. Painter. A graduate of the Moscow School of Painting, Sculpture, and Architecture (1914), from 1925 he lived in Ukraine and taught at the Kiev State Art Institute and belonged to the Association of Revolutionary Art of Ukraine. In 1927 he founded the left-wing *Union of Contemporary Artists of Ukraine. He contributed articles on art theory to the futurist journal *Nova generatsiia*. In his oils the subject and objects were subordinated to color and its associative effect. Inspired by folk and children's art, they included works such as *Amour* (1926), *For Power of the Soviets* (1927), *Kiev Beach* (1927), *Mother* (1927), *Breaking the Horse* (1927), *Night* (1928), *Fisherman* (1928), and *May 1* (1929). In the 1930s most of his canvases were destroyed by the Stalinist authorities. A retrospective exhibition of his extant works was held at the Kiev Museum of Ukrainian Art in 1988.

Viktor Palmov: *Mother* (oil, 1927)

Palytsyn, Oleksander, b 1741, d 1816 on the Popivka *khutir* (now part of Zalizniak), near Sumy, Slobidska Ukraine. Poet, architect, and patron of the arts. After serving in the army in St Petersburg he settled on his estate, where he drew together a circle of literati (dubbed the Popivka Academy), including the writers V. Kapnist, I. Bohdanovych, and S. Hlynka, the artist M. Alferov, and the architect V. Yaroslavsky. The 'Academy' was also visited by H. Skovoroda and V. Karazyn. Palytsyn donated his collection of paintings to Kharkiv University (it later formed the basis of the Kharkiv Art Museum), and in 1810 he became an honorary member of the university's presidium. He designed several buildings and churches in the Sumy region and published a poetic translation of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1807), as well as translations of French authors, such as Voltaire, J.-J. Rousseau, and J. Delisle.

Ivan Palyvoda

Palyvoda, Ivan, b 1885 in Poltava gubernia, d 30 January 1985 in Somerset, New Jersey. Educator, political leader, and painter. A member of the Ukrainian Party of Socialist Revolutionaries, he was a delegate to the Labor Congress and served as UNR minister of postal and telegraph services in B. Martos's cabinet in 1919. After the First World War he emigrated to Czechoslovakia. After the Second World War he was a refugee in Germany and then emigrated to the United States. He served as president of the Ukrainian Free Society of America and of the Society of Friends of the Ukrainian National Council (1958–66). For many years he managed the library of the Ukrainian Orthodox Center in South Bound Brook, New Jersey. He participated in exhibitions of the Ukrainian Artists' Association in the United States.

Pam'iatky ukrains'ko-rus'koï movy i literatury (Monuments of Ukrainian-Ruthenian Language and Literature). The title of a series published by the Archeographic Commission of the Shevchenko Scientific Society. Eight volumes appeared: vols 1–4 and 6 (1896–1910) consisted of I. Franko's study and annotated collection of apocrypha and legends from Ukrainian manuscripts; vol 5 (1906), of K. Studynsky's study of monuments of late 16th- and early 17th-century polemical literature; vol 7 (1912), of V. Peretts's introduction to and collection of the poems of Klymentii, Zynovii's son; and vol 8 (1930), of Ya. Hordynsky's annotated texts and study of 17th- and 18th-century Ukrainian dramatic literature.

Pam'iatky Ukraïny (Monuments of Ukraine). A quarterly magazine of the *Ukrainian Society for the Protection of Historical and Cultural Monuments, published in Kiev since 1969. Until 1988 it was called *Pam'iatnyky Ukraïny* and edited by P. Tronko. After the name change in 1989, under the editorship of A. Sierykov it began to champion openly for the preservation of Ukraine's historical and cultural achievements. In the late 1980s *Pam'iatky Ukraïny* became one of the most popular and influential organs of the Ukrainian cultural revival. It publishes popular articles by historians, archeologists, museum workers, ethnographers, and architects on Ukrainian history and culture and architectural and historical monuments. From 1984 to 1988 its pressrun was increased from 35,000 to 80,000 copies. In 1989 it became a founding member of the *Memorial society.

Pamiatniki, izdannye Vremennoi komisiei dlia razbora drevnikh aktov (Monuments Published by the Temporary Commission for the Analysis of Ancient Acts), aka *Pamiatniki, izdannye Kievskoiu komissiei dlia razbora drevnikh aktov*. A collection of archival documents, acts, and materials pertaining to the history of 16th- and 17th-century Ukraine, published by the *Kiev Archeographic Commission. The collection was compiled using church and monastery archives, the *Lithuanian Register, books of city and land acts, the private archives of the Sanguszko princely family, the manuscript library of the Chreptowicz family, and the collections of the Matsiievych and Świdziński families.

Vols 1–4 of *Pamiatniki* were compiled by M. Maksymovych and M. Iviatyshev and published in 1845, 1846, 1852, and 1859 (vol 1 was republished in 1848). Each volume has three sections. The first contains the records of various Orthodox church brotherhoods and monasteries,

such as the Lutske Brotherhood of the Elevation of the Cross (vol 1), the Kiev Epiphany Brotherhood (vol 2), the Lviv Dormition Brotherhood (vol 3), and the Derman and Pochaiv monasteries (vol 4). The second section contains acts describing landholdings and the rights and obligations of landowners vis-à-vis the peasantry in 1490–1596 (vol 1), the 1557 *voloka land reform of King Sigismund II Augustus (vol 2), a description of properties and inventory of various estates in 1566–98 (vol 3), and descriptions of the Kremianets, Volodymyr-Volynskyi, and Lutske castles (vol 4). The third section contains documents of the Cossack-Polish War of 1648–9 (vol 1), 1650–1 (vol 2), and 1652–60 (vol 3), and historical documents of 1660–4 (vol 4).

A revised edition of *Pamiatniki* was edited by O. Levytsky and published in 1897–8. The Church Slavonic alphabet of the original edition was replaced by the Russian; translations of documents in Latin and Polish were omitted (they were provided in the first edition); and the illustrations in the first edition were left out, except for two panoramas of Kiev done in 1651. Eighteen new documents were added to vol 1, 11 to vol 2, and 49 to vol 3. An index of personal and place-names to all three volumes appeared at the end of vol 3.

A. Zhukovsky

The Presidium of the Pan-American Ukrainian Conference, 4th Session (Winnipeg, 1951)

Pan-American Ukrainian Conference (Pan-amerykanska ukrainska konferentsiia, or PAUK). A political umbrella organization representing Ukrainians in North and South America. It was founded on 18–22 November 1947 in New York by delegates of the Ukrainian Congress Committee of America, the Ukrainian Canadian Committee (now Congress, which initiated the gathering), the Society of Friends of Ukrainian Culture in Brazil, and the United Ukrainian Committee in Argentina, Paraguay, and Uruguay. Its purpose was to encourage and co-ordinate support for Ukraine's struggle for independence and to resist the spread of communism. Eventually the Ukrainian organizations in Venezuela and Chile joined PAUK. The presidium of the conference sat initially in Winnipeg and then in New York. PAUK organized the founding conference of the *World Congress of Free Ukrainians in 1967 and then transferred its functions to the congress. Rev V. *Kushnir was repeatedly elected president of PAUK.

Volodymyr Panasiuk

Petro Panch

Panasiuk, Volodymyr [Panasjuk], b 27 February 1926 in Krasne, Lublin voivodeship, Poland. Scientist in the fields of mechanics and strength of materials; full member of the AN URSR (now ANU) since 1978. He graduated from Lviv University (1951), and has worked at the ANU Physical-Mechanical Institute, as its director since 1971. He has made significant contributions in the areas of elasticity theory, brittle fracture theory, and the strength of materials. His mathematical models for calculating equilibrium conditions of stresses in solids with microcracks are now widely applied in calculations of the load-bearing capacity of various structures.

Panch, Petro [Panč] (pseud of Petro Panchenko), b 4 July 1891 in Valky, Kharkiv gubernia, d 1 December 1978 in Kiev. Writer. He was a soldier during the First World War and during the revolutionary period in Ukraine, first in the UNR Army and then with the Bolshevik forces. In the 1920s he was a member of the literary organizations Pluh, Vaplite, and the All-Ukrainian Alliance of Proletarian Writers. From 1923 he worked in Kharkiv as an editor (1923–32 at the journal *Chervonyi shliakh*), and from 1934, in Kiev. During the Second World War Panch worked in the AN URSR (now ANU) and at the radio station Radianska Ukraina. His first collections of novelettes and short stories, *Tam, de verby nad stavom* (Where the Willows Grow by the Pond, 1923), *Solom'iany dym* (Straw Fire, 1925), and *Myshachi nory* (Mouse Holes, 1926), dealt with the events of the civil war and the early years of the NEP in Ukraine. The cycle of novellettes consisting of *Z moria* (From the Sea), *Bez kozyria* (Without a Trump), *Holubi eshelony* (The Sky Blue Echelons, 1926), and *Povist' nashykh dni* (A Tale of Our Days, 1927) describes events in Ukraine from the Revolution of 1905 to the rebuilding of the economy after the war and the Revolution of 1917. *Povist' nashykh dni* was one of the first works in Ukrainian Soviet literature on the 'industrial' theme. From 1930 the main subject in Panch's works was collectivization, such as in the cycle *Mukha Makar* (1930–4). Panch is also the author of novels on the history of the revolutionary period, such as *Obloha nochi* (The Siege of Night, 1935) and *Oleksander Parkhomenko* (1939), the historical novel *Homonila Ukraina* (Ukraine Was Humming, 1954), the memoirs *Na kalynovim mosti* (On the Viburnum Bridge [ie, In Old Age], 1965), a large number of stories and novels for children, and other works. His works have been published in collected edi-

tions of 5 vols (1971), 4 vols (1973), and 6 vols (1981). Panch's realistic style, free of any leaning toward formalism, and his loyalty to the Soviet regime earned him a place among those who had contributed nothing new to literature, but who were nevertheless hailed as the founding creators of Ukrainian Soviet prose.

I. Koshelivets

Panchenko, Dmytro [Pančenko], b 24 February 1906 in Novhorodka, Oleksandriia county, Kherson gubernia. Neurologist. A graduate of the Military Medical Academy (1932), he served as a professor (1946–51, director from 1949) at the Lviv Medical Institute and the Kiev Institute for the Upgrading of Physicians (1951–78). From 1960 he was also editor in chief of the Kiev medical journal *Vrachebnoe delo*. His publications deal with ischemic nerve disorders, nerve regeneration, and vascular diseases of the nervous system. At his initiative the first biotron laboratory was constructed in Kiev.

Panchenko, Mykhailo [Pančenko, Myxajlo], b ca 1884 in Poltava, d 1930s. Revolutionary figure and writer. After the February Revolution he was a member of the CC of the *Ukrainian Party of Socialist Revolutionaries, a member of the Presidium of the All-Ukrainian Council of Military Deputies, and a delegate to the Central Rada. In December 1917 he sat in the Presidium of the All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies in Kiev. In 1919 he served briefly as people's commissar of education in the Bolshevik government in Kharkiv. As a *Borotbist from 1918, he opposed the party's merger with the CP(B)U and did not join the latter. In the 1920s he worked as an editor, wrote the script for P. Chardynin's films *Taras Shevchenko* and *Malyi Taras* (Little Taras, 1926, with D. Buzko) and the play *Koliivshchyna* (1927), and headed the Ukrainian Collective of Directors, Writers, and Scenarists. He was arrested with other former Borotbists during the Stalinist terror of the 1930s, and perished in a concentration camp.

Panchenko, Mykola [Pančenko], b 6 November 1924 in Oleksandrivka, Kostiantynohrad okruha, Poltava gubernia. Economist. A graduate of the Lviv Trade and Economics Institute (1948), he has been a professor at Kiev University since 1954. A specialist on consumption and economic management, he has cowritten *Proizvodstvo i lichnoe potreblenie: Vzaimosviat' i tselevaia napravlennost'* (Production and Personal Consumption: Their Interrelation and Purposive Direction, 1985) and written *Ekonomicheskaia otvetstvennost' v sisteme sotsialisticheskogo khoziaistvovaniia* (Economic Responsibility in the System of Socialist Management, 1977).

Panchenko, Platon [Pančenko] (pseud: P. Taisych), b 28 February 1856 in Kamenka, Orel gubernia, Russia, d 1911 in Rostov, Russia. Poet. He studied at Riga University and worked as a tutor in Astrakhan and Katerynodar. From the 1880s he contributed poetry to *Zoria*, *Literaturno-naukovyi vistnyk*, and various Ukrainian literary miscellanies and anthologies. A separate collection, *Z vil'nykh chasiv* (From Free Times), was published in 1910.

Panchenko-Yurevych, Volodymyr [Pančenko-Jurevyč], b 1907, d 1942. Chemist, journalist, and civic leader.

In 1925 he settled in Berlin, from where he contributed articles to *Novyi chas*, *Meta*, and *Vistnyk* and for a time edited *Ukrains'kyi vistnyk*. His articles on topics such as Ukrainian nationalism and the problem of Western Ukraine appeared in the German press in the 1930s. He also published articles in organic chemistry. He was a founder and general secretary of the Committee of Foreign Students in Berlin.

Bohdan Gordon Panchuk

John Panchuk

Panchuk, Bohdan Gordon [Pančuk], b 8 February 1915 near Peterson, Saskatchewan, d 20 June 1987 in Montreal. Community leader. In 1940 he enlisted in the Royal Canadian Air Force and was posted in the United Kingdom, where he founded the *Ukrainian Canadian Servicemen's Association (UCSA) in 1943. Panchuk became aware of the dimensions of the Ukrainian *displaced persons and refugee problem in Europe while serving on the Continent, and mobilized the UCSA's resources for their assistance. To this end he helped establish the *Central Ukrainian Relief Bureau in 1945 and secured Ukrainian support in North America for refugee relief. After serving in the Ukrainian-language section of the Canadian Broadcasting Corporation's foreign service (1952–5) he taught high school in Montreal (1955–80). His memoirs appeared in 1983 as *Heroes of Their Day*.

Panchuk, John [Pančuk, Ivan], b 4 April 1904 in Gardenon, Manitoba, d 4 November 1981 in Battle Creek, Michigan. Lawyer and community leader. After moving to the United States with his parents (1916) he graduated from the University of Michigan law school (1928) and went into private practice. He served as assistant attorney general for Michigan (1937–40) and then as legal counsel for the Federal Home Life Insurance Co (1941–69). He devoted much of his time to the Ukrainian community: he was a founder and president (1936–7) of the *Ukrainian Youth League of North America, chairman of the committee for reorganizing the Ukrainian Congress Committee of America in 1943, and president of the Ukrainian Graduates Club of Detroit and Windsor (1951). A leading figure in the *United Ukrainian American Relief Committee (president in 1947–53), he played a key role in helping Ukrainian war refugees and resettling displaced persons in the United States. He was also active in American political life for many years as a prominent state member of the Democratic party. Panchuk wrote several books on Ukrai-

nian subjects, including *Shevchenko's Testament: Annotated Commentaries* (1965), *Bukovinian Settlements in Canada* (1971), *Persha ukrains'ka tserkva v Kanadi* (The First Ukrainian Church in Canada, 1974), and *Descendants of Michelo Panchuk* (1975).

Mariian Panchyshyn

Panchyshyn, Mariian [Pančyšyn, Marijan], b 6 September 1882 in Lviv, d 9 October 1943 in Lviv. Physician specializing in internal medicine and roentgenology, and civic leader; full member of the Shevchenko Scientific Society from 1920. After graduating from Lviv University in 1909, he worked at its clinic of internal medicine and by 1912 had become head of the roentgenology department. During the First World War he organized field hospitals in the Austrian army. In 1918–21 he was a leading member of the Ukrainian Citizens' Committee in Lviv and an organizer of medical care for wounded and captured soldiers. After the war he helped organize the *Lviv (Underground) Ukrainian University, at which he served as a professor of anatomy (1920–5), dean of the medical faculty, and rector (1922–5). He was president of the *Ukrainian Physicians' Society for many years and a coeditor of *Likars'kyi vistnyk*. He donated his services to the *Narodnia Lichnytsia society and helped found its hospital. He founded the *Ukrainian Hygienic Society in 1929, organized its outpatient clinics and tuberculosis dispensaries, built a sanatorium in Pidliute, and financed popular pamphlets on hygiene. He was active in various civic organizations in Lviv, such as the Ridna Shkola society. During the Soviet occupation of Galicia (1939–41) Panchyshyn was elected deputy to the People's Congress of Western Ukraine and to the Supreme Soviet of the USSR. He was the first director of the Lviv oblast public health department. As head of clinical therapy at the Lviv Medical Institute, he promoted the Ukrainization of medical studies. He was a member of the Ukrainian National Council in Lviv (1941–2). He published about 25 scientific works, dealing particularly with stomach, intestinal, and kidney disorders.

Pandects of Antiochus. A collection of teachings on Christian morality written ca 620 by the Byzantine monk Antiochus at St Sava's Monastery, near Jerusalem. The earliest extant East Slavic translation, based on three 10th-century South Slavic translations, was made in the *ustav* script in Rus' in the 11th century. The 308-folio parchment manuscript (held at one time in the Stauropegion Monas-

tery of the Resurrection in Moscow gubernia and now at the Moscow Historical Museum) was first studied by Archimandrite Amphilochius and I. Sreznevsky (1858). The longest excerpts were published by O. Bodiansky (1912). Most scholars (including A. Krymsky) believed that the translation was done in Novgorod the Great; A. Sobolevsky held it was done in Kiev. Another translation from the South Slavic (306 folios) was transcribed in the *ustav* script by the monk Marko at the Monastery of the Mother of God, probably in Volodymyr-Volynskyyi, in 1307. The southwestern Rus' linguistic traits of the manuscript (preserved at the time at the National Museum in Lviv) were analyzed by I. Pankevych in *ZNTSh* (vols 123–124 [1917]). The *Pandects* were very popular in Rus', and many of the teachings were included in the **Prolog*.

Oleksander Paneiko

Paneiko, Oleksander [Panejko], b 31 May 1891 in Zolochiv, Galicia, d 4 February 1950 in Munich. Galician pedagogue; brother of V. and Yu. Paneiko. He taught Ukrainian language and shorthand at the Academic Gymnasium and Ukrainian trade schools in Lviv (1912–14, 1916–25, 1928–39, 1941–2) and at gymnasiums in Kolomyia (1925) and Ternopil (1925–8). During the Soviet occupation of Western Ukraine he taught at Lviv University (1940–1), and during the German occupation he edited a column about language in the paper *L'vivs'ki visti* (1943). A member of the Shevchenko Scientific Society's Language Commission, he wrote the first Ukrainian stenography textbook (1922; based on the Gabelberger shorthand system), edited Ukrainian textbooks, and prepared a revised edition of O. Iziumov's Ukrainian orthographic dictionary (1941) that included Western Ukrainian dialectal words. His Ukrainian grammar textbook (1950) was based on O. *Syniavsky's language norms and Polish grammatical traditions.

Paneiko, Vasyl [Panejko, Vasyl'], b 1883 in Zolochiv county, Galicia, d 29 May 1956 in Caracas, Venezuela. Journalist and civic and political leader; brother of O. and Yu. Paneiko. An active supporter of the National Democratic party, he attempted unsuccessfully to revive the monthly *Moloda Ukraïna* in 1905. He contributed to **Dilo* (1907–12) and *Literaturno-naukovyi vistnyk* (1908–14) and then served as chief editor of *Dilo* (1912–18). He was also one of the editors of *Ukrainische Korrespondenz*. In 1919 he was appointed state secretary of foreign affairs of the Western Ukrainian National Republic (ZUNR). He attended the Paris Peace Conference, first as vice-chairman of the UNR delegation and then (1920) as chairman of the

Vasyl Paneiko

Yurii Paneiko

ZUNR delegation. To gain Entente support for Ukrainian independence he advocated an eastern European federation encompassing Ukraine (with Galicia) and Russia. The idea, which he presented in the brochure *Z'iedyneni derzhavy Skhidn'oi Evropy* (The United States of Eastern Europe, 1922), failed to gain support in Ukrainian political circles. After a brief stay in Lviv, where he edited *Dilo* and *Polityka* (1925), Paneiko returned to Paris and worked as a correspondent for *Dilo*. In the 1930s he was no longer active in Ukrainian political life. After the war he emigrated to the United States (1945) and then to Venezuela.

Paneiko, Yurii [Panejko, Jurij], b 3 April 1886 in Zolochiv, Galicia, d 18 August 1973 in Munich. Jurist and legal scholar; full member of the Shevchenko Scientific Society (from 1942) and the Ukrainian Academy of Arts and Sciences; brother of O. and V. Paneiko. While working as a civil servant he completed his law studies at Lviv University (LLD, 1910) and then conducted research at Halle, Vienna, and St Petersburg universities. After the First World War he lectured at Jagiellońian University in Cracow (1926–8) and Vilnius University (1928–39), and served on the Competency Tribunal in Warsaw (1934–9), settling disputes between the Polish judiciary and government. After the Second World War he emigrated to Vienna and then Germany, where he served as professor and rector of the Ukrainian Free University in Munich (1948–73). He wrote many articles in Polish, Ukrainian, and German on various legal subjects, but his specialty was administrative law. In this area he wrote *Geneza i podstawy samorządu europejskiego* (The Genesis and Foundations of European Self-Government, 1926), a major survey of Polish administrative law (coauthor, 1929), and *Teoretychni osnovy samovriaduvannia* (The Theoretical Foundations of Self-Government, 1963). A list of his works is given in *Studien zu Nationalitätenfragen* (no. 4, 1988).

Panfuturism. See Futurism and Association of Panfuturists.

Paniutyn, Vasyl [Panjutyn, Vasyl'], b 1788 in the Chernihiv region, d 31 December 1855 in Katerynivka, Pavlohrad county, Katerynoslav gubernia. Philanthropist and major general. After enlisting in the Russian army in 1812, he fought against the French and then made his career in the military. He founded hospitals for the poor in

Romen, Novoheorhiivske (Kherson gubernia), and Slovianske (Kharkiv gubernia) by raising money through public subscription. As a member of the prison committee for Kherson gubernia he worked to improve penal conditions. He devoted the income from his estates to charity.

Paniutnye [Panjutyne]. v-17. A town smt (1986 pop 8,300) in Lozova raion, Kharkiv oblast. It arose in 1869 during the construction of the Kursk–Kharkiv–Sevastopol railway line and was first called Lozova-Azovska. Its main employer has been the railway-car repair yard.

Andrii Paniv

Ivan Pankevych

Paniv, Andrii, b 30 September 1899 in Prorub, Kharkiv gubernia, now in Sumy oblast, d 9 October 1937. Poet, prose writer, and teacher; research associate with the Institute of Literature of the AN URSR (now ANU). In 1925 he graduated from the Kharkiv Institute of People's Education, and subsequently he worked at the institute as a lecturer in Ukrainian literature. Paniv was cofounder of the literary organization *Pluh, its executive secretary, and a member of the editorial board of the journal *Pluh*. He began to publish his work in 1921. The main subject of Paniv's writings is village life. His works include the short story collections *Selo* (The Village, 1925), *Iak zvir'i khatu buduvaly* (How the Animals Built a House, 1925), and *Khrystia* (1928) and the poetry collections *Vechirni tini* (Evening Shadows, 1927) and *Bez mezh* (Without Bounds, 1933). Paniv was arrested on 5 December 1934 and sentenced in 1935 to 10 years in labor camps. In 1937 he was retried again by a special NKVD tribunal and sentenced to be shot.

Pankevych, Ivan [Pan'kevych], b 6 October 1887 in Tseperiv, Lviv county, d 25 February 1958 in Prague. Linguist, pedagogue, ethnographer, and community figure in Transcarpathia; member of the Shevchenko Scientific Society from 1924. While studying at Lviv University (1907–9), he taught at the boarding school of the *Ridna Shkola society and was secretary of the *Prosvita society in Lviv. He organized 120 Prosvita reading houses in Lviv county. After graduating from Vienna University (PhD, 1912) he taught Russian at the Theresian Consular Academy in Vienna (1912–19). Assuming Czechoslovak citizenship, he was sent to Uzhhorod as the Czechoslovak official responsible for regulating the use of Ukrainian in Transcarpathia's schools and public institutions (1920–4). There he edited the educational journal **Uchytel'* (1920–2), the

children's magazine **Vinochok dlia podkarpats'kykh ditochok* (1920–4), and the regional studies monthly **Pidkarpats'ka Rus'* (1924–36) and taught at the Uzhhorod Gymnasium (1920–38). He was also a founding member of the Uzhhorod Prosvita society, its first secretary (1920–5), a member of its presidium (to 1938), head of its scholarly section, and managing editor of its annual, *Naukovyi zbornyk* (13 vols). He played a key role in the creation and development of the society's publications, library, museum, theater, and network of village reading houses. From 1939 he lived in Prague, where he served as docent at the *Ukrainian Free University (1939–45) and taught Ukrainian language and literature at Charles University (1947–51, 1954–8). From 1951 to 1954 he was persecuted as a 'Ukrainian bourgeois nationalist,' and from 1952 to 1963 his name was not mentioned in Ukrainian periodicals of the Prešov region.

Pankevych studied the phonetics and morphology of the 1307 translation of the **Pandects of Antiochus*, the 17th-century **Ladomyrova* and *Kapishovsky* gospels, the 18th-century Tyshiv 'Aleksandriia' and A. Kotsak's Slavonic grammar, notes in the margins of Transcarpathian church books, and other Transcarpathian 16th- to 19th-century manuscripts and charters. His 'Ruthenian' grammar (1922; rev edns 1927, 1936), which used an etymological orthography (**pankevychivka*), was a standard secondary-school textbook in interwar Transcarpathia. His extensive research on the Transcarpathian dialects and experimental analysis of their phonetics culminated in the monograph *Ukraïns'ki hovory Pidkarpats'koi Rusy i sumezhnykh oblastei* (The Ukrainian Dialects of Subcarpathian Ruthenia and Adjacent Regions, 1938) and in his study of the history of Ukrainian Transcarpathian dialects in *Acta Universitatis Carolinae: Philologica* (vol 1, 1958). He also wrote on the Lemko dialects (proposing his own hypothesis of their origin, 1958); Galician dialects, literature, and folklore; and Transcarpathian folk rituals and songs, material culture, history, literature, onomastics, and pedagogical concerns. He published a booklet of Ukrainian orthographic rules for use in the Prešov region (1952) and a large anthology of Ukrainian literary texts (1954). Pankevych's activities and publications played a major role in spreading the vernacular-based Ukrainian literary language in Transcarpathia and in overcoming Russophile tendencies there. His massive compilation of Transcarpathian carols and his Transcarpathian dialectal dictionary (approx 130,000 words) have not been published. His autobiography and correspondence with V. Hnatiuk and F. Kolessa, a bibliography of his works, and a selection of articles by and about him were published in *Naukovyi zbirnyk Muzeiu ukraïns'koi kul'tury v Svydnyku* (vols 3 [1967] and 4 [2 books, 1969–70]).

R. Senkus

Pankevych, Yuliiian [Pan'kevych, Julijan] (pseud: Prosten Dobromysl), b 4 July 1863 in Ustia Zelene, Stanyslaviv district, Galicia, d 1933 in Kharkiv. Painter, graphic artist, and writer. He studied at the Cracow and Vienna academies of art and was a founding member of the *Society for the Advancement of Ruthenian Art in Lviv and one of the pioneers of the Ukrainian 'native' style in Galicia. He painted Christ, the Mother of God, and saints in Ukrainian folk costume; portraits of M. Kostomarov, T. Shevchenko (1904), and I. Franko (1910); landscapes, such as *Waterfall* and *The Dniester*; and genre and historical

Yuliiian Pankevych: *Peasant Madonna* (oil, 1900s)

paintings, such as *Groups of People by a Fence*, *The Defense of Zvenyhorod*, and *Dovbush's Rock*. He also illustrated editions of S. Rudansky's and Ya. Shchoholev's poetry, ornamented the poetry anthology *Akordy* (Chords, 1903), and contributed poems, fables, stories, articles, and translations to Galician periodicals. Just before his death he moved to Kharkiv, where he worked at the Skovoroda Museum and painted the canvases *In the Carpathians* and *Road into the Mountains*. A book about Pankevych by Ya. Nanovsky was published in Kiev in 1986.

Pankevychivka. An etymological orthography created by I. *Pankevych in 1922 for use in Transcarpathian schools. It was based on the **maksymovychivka* orthography and O. *Ohonovsky's 1885 Galician school grammar. Its rules, which were approved at the 1923 Transcarpathian Teachers' Conference after H. *Strypsky forbade the use of his own orthography, were elaborated in Pankevych's 1922 school grammar and remained in official use in Transcarpathia until 1945. The orthography reflected the local spelling traditions and the pronunciation of the Boiko (Verkhovynets) and Maramureş dialects. It rendered *i* as *ô* in closed syllables and retained the etymological *y* and *ъ* ('jat'), but did not use the hard sign (*ѣ*) or *ѐ*.

Pankiv, Mykola [Pan'kiv], b 26 August 1894 in Bilche Zolote, Borshchiv county, Galicia, d 17 October 1967 in Dufrost, Manitoba. Agronomist, beekeeper, and pomologist. After emigrating to Canada in 1912, he completed his education and began farming. He developed several frost-resistant varieties of apple, plum, and gooseberry and a variety of feed millet. He kept a large apiary and improved some nectar-bearing plants. At one time (1924) he edited and published a beekeeping monthly in Winnipeg called *Pasika*. He received many awards for his research and served as president of the Manitoba Beekeepers Association (1946).

Pankivska, Yosypa [Pan'kivs'ka, Josypa] (née Fedak), b 1866 in Yavoriv, Galicia, d 10 December 1934 in Lviv. Educator and civic activist; wife of K. *Pankivsky. For many years she worked as a teacher in Lviv. She was a founder of the Vacation Resort Society and was active in the Ukrainian Citizens' Committee and the Ukrainian Society of Aid to Emigrants from Eastern Ukraine.

Kost Pankivsky (1855-1915)

Kost Pankivsky (1897-1973)

Pankivsky, Kost [Pan'kivs'kyj, Kost'], b 15 April 1855 in Ryshkova Volia, Jarosław county, Galicia, d 16 November 1915 in Kiev. Economist, co-operative leader, publisher, and civic leader; founding member of the Shevchenko Scientific Society. A graduate of the Higher Agricultural School in Vienna, he was active in populist student circles. In the 1880s he worked as business manager and news editor of *Dilo* and as director of St Nicholas's Institute (1888-1906). He sat on the board of directors of many leading Ukrainian societies, such as Prosvita, Ruska Besida, and the Ruthenian Pedagogical Society. He edited Prosvita's calendars, books, and journal *Chytal'nia-Pys'mo z Prosvity* (1894-6) as well as the humor magazine *Zerkalo* (1891-3), and helped edit the newspaper *Bat'kivshchyna* (1896), the children's magazine *Dzvinok* (1899-1900), and the literary and scholarly journal *Zoria*. His publishing firm, Dribna Biblioteka (1893-7), published popular works of literature. Pankivsky was a pioneer of the Galician co-operative movement, as a director (1898-1904) of the Provincial Credit Union and a member of the board of directors (1904-14) and managing director (1912-14) of the Provincial Audit Union (KSR). He was chief editor of *Ekonomist*, the official magazine of the KSR (1905-8), and its *Ekonomichna Biblioteka* (Economic Library) series. He maintained close contacts with leading Ukrainian intellectuals and activists in Russian-ruled Ukraine and with the Prosvita society in Kiev. In his numerous articles he formulated the ideological principles of the Ukrainian co-operative movement. In June 1915 he was deported to Kiev by the occupational Russian authorities.

Pankivsky, Kost [Pan'kivs'kyj, Kost'], b 6 December 1897 in Lviv, d 20 January 1973 in Livingstone, New Jersey. Lawyer and civic and political leader; son of K. and Y. Pankivsky. While studying law in Prague (LLD, 1924) he was president of the Group of Ukrainian Progressive Youth. After opening his own law office in Lviv (1924) he often served as defense counsel at political trials and was active in charitable societies, such as the Ukrainian Invalids' Aid Society and the Child Protection and Youth Care

Society, and served as president of the Plai hiking society. In 1941 he was general secretary of the Ukrainian National Council in Lviv and president of the *Ukrainian Regional Committee. He served as vice-president of the *Ukrainian Central Committee (1942–5). After the war he engaged in émigré politics. In Germany (1945–9) he belonged to the *Ukrainian National State Union and served as vice-president of the UNR government-in-exile. After emigrating to the United States in 1949, he became president of the Union of Ukrainian National Democrats, chairman of the Representation of the Executive Organ of the Ukrainian National Council, and president of the American branch of the League of the Captive Peoples of Russia. He wrote three books of memoirs: *Vid derzhavy do komitetu* (From State to Committee, 1957; 2nd edn 1970), *Roky nimets'koï okupatsii* (The Years of the German Occupation, 1965; 2nd edn 1983), and *Vid komitetu do derzhavnoho tsentru* (From Committee to State Center, 1968).

Severyn Pankivsky

Pankivsky, Severyn [Pan'kivs'kyj], b 24 April 1872 in Ryshkova Volia, Jarosław county, Galicia, d 10 January 1943 in Lviv. Stage actor, director, and translator. He acted in the troupes of M. Kropyvnytsky (1897–8, 1900–3), M. Starytsky (1898), and P. Saksahansky (1903–5) and in the Ruthenian People's Theater in Lviv (1905–6). He directed and acted in Sadovsky's Theater (1906–17), the State Drama Theater (1918–19), the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–21), and the Romen Ukrainian Theater (1921–3). He acted in the films *Koliishchyna* (1933) and *Prometheus* (1936). He translated plays by H. Heijermans, G. Zapolska, E. Rostand, and W. Shakespeare and in the 1930s wrote the memoir *Shliakhamy zaviiianymy za synioiu ptashkoiu* (Following Snowed-over Paths in Pursuit of a Blue Bird).

Pankovych, Stepan [Pankovyč], b 29 October 1820 in Veliatyn, near Khust, Transcarpathia, d 29 August 1874. Greek Catholic bishop of Mukachiv (1867–74). He studied at Tarnov in Czechoslovakia and in Uzhhorod and then served as a tutor of children of the nobility. As bishop he actively Latinized and Magyarized the eparchy. In 1873 he made a section of the eparchy into a separate Hungarian Greek Catholic vicariate, which later became *Hajdúdorog eparchy.

Pankratiev, Oleksii [Pankrat'jev, Oleksij], b 26 November 1903 in Kiev, d 8 August 1983 in Kiev. Cameraman. He completed study at the Odessa College of Cinema Art (1927) and then worked in the Odessa (1925–7) and Kiev

(from 1928) Artistic Film studios, in the latter of which he led the Scientific Research Laboratory and Department of Combined Filming (1934–40). He taught at the Kiev Institute of Cinematography (1931–2 and 1935–7).

Panshchyna. See Serfdom.

Panske Lake [Pans'ke ozero]. A saltwater lake in the Crimea. Located on the Tarkhankut Peninsula, the lake is separated from the sea by sandbars. It is fed by groundwater and the seepage of seawater. Its salinity ranges from 12 to 28 per cent. The muds on its bottom are noted for their medicinal qualities.

Pan-Slavism. A cultural and political movement among Slavic peoples, prevalent in the 19th century, whose adherents believed that their lineal and linguistic ties should bring about a union of all Slavs. Pan-Slavism was formulated as a theory in the early 19th century, the term itself being established by the Slovak J. Herkel in a linguistic treatise in 1826. The initial stages of the movement were devoted to praising a common Slavic past and studying Slavic languages. Pan-Slavism was pursued in particular by western Slavs as an offshoot of their national awakening. The political subjugation of the majority of Slavic peoples, the ideas of the French Revolution and German romanticism, and concurrent national awakenings resulted in the adoption of a historical and philosophical doctrine of Pan-Slavism, which not only sought the unity and federation of Slavic peoples, but envisioned the establishment of an ideal balance of power in Europe and a rejuvenation of European civilization as a result of their efforts. In the second half of the 19th century the concept was adopted by Russian circles, who quickly came to dominate the movement and developed it as a means of extending Russian influence over other Slavic peoples.

The ideas and writings of German Romantics, such as F. Schelling, H. Hegel, and particularly J. Herder (who praised the Slavic *Volksgeist*), had a great influence on the Slavic cultural milieu in the early 19th century, notably on Czechs, such as J. Dobrovský and V. Durič. P. *Šafařík (a Slovak, 1795–1861) was among the first to publish statistics on Slavs with his *Geschichte der slavischen Sprache und Literatur nach allen Mundarten* (1826), which also mentioned Ukrainians (Little Russians) as a distinct people. Another Slovak, J. Kollár (1793–1852), wrote the epic poem *Slávy dcera* (Slava's Daughter), in which he idealized the past of the 'Slavic people' (believing the many Slavic tribes constituted a single race). Pan-Slavic ideas also promoted the establishment of Slavic studies centers in Prague, Zagreb, Moscow, Berlin, Paris, Vienna, and other cities (both Slavic and not), which later played a central role in many national revivals.

Slavic cultural figures, such as F. *Čelakovský, Dobrovský, L. Gaj, and J. Jungmann, believed that Russia would assist other Slavic peoples in their struggles against pan-Germanism and Turkish domination and dreamed of a political and linguistic union under Russia. Some later came to change their views (including Gaj, L. Štúr, and K. Havlíček-Borovský). Other Pan-Slavists had an Austro-philic orientation. The father of Austro-Slavism (as that variant of Pan-Slavism was known) was the Slovene philologist J. Kopitar. The concept was further developed by the Czech F. Palacký (1785–1876), who during the Revolution of 1848–9 supported the preservation of the Austrian

Empire in the form of a federation of Slavs, Austrians, and Hungarians. Palacký, however, did not foresee any granting of rights to Galician Ukrainians, whom he considered Poles. After the transformation of the Austrian Empire into the Austro-Hungarian Empire he shifted his orientation to Russia and participated in the Moscow Slavic Congress of 1867.

Pan-Slavism did not command much support among the Poles, who were swayed more by Romantic patriotism and dreams of renewing the Polish state in its pre-1772 boundaries. At the same time the so-called Polish Question provided a vexing dilemma for Russian Pan-Slavists, who could easily condone the acquisition of Ukrainian lands (the 'western provinces') by the empire but were troubled by the implication that Polish ethnic lands could be incorporated. Nevertheless, within Poland pro-Russian and anti-Russian camps developed, the latter camp believing that the leading role in any Slavic union should be Poland's. Like their Russian counterparts the Polish proponents of Pan-Slavism did not recognize any right of the Ukrainian people to self-determination or to a separate existence.

In the late 19th century Russians came to dominate the debate over the goals and the rationale of Pan-Slavism. Even though one of the earliest proponents of Pan-Slavism, the Croatian priest J. Križanić (1618–83), had formulated the idea of a political union of Slavs under the Muscovite tsar as a form of protection from the perceived German and Turkish menace, the idea of pan-Slavism remained at first weakly developed in Muscovy. With the rise of the *Slavophiles in the 1840s a growing interest began to be shown in Pan-Slavism together with the idea that Russia should be the most prominent figure in any Slavic union. It was the Crimean War, however, in particular the shock of the empire's diplomatic isolation, that raised the profile of Pan-Slavism: a Slavic union was seen as a guarantee that Russia would never again stand alone. The Slavic Benevolent Committee was established in Moscow in 1858, and in 1859 Križanić's manuscript was unearthed and published. Benevolent committees were also established later in St Petersburg (1868), Kiev (1869), and Odessa (1870). The most identifiable figures in the movement included M. Pogodin and M. Katkov. The tone of the Russian Pan-Slavists became increasingly political as Russia moved from a fraternal role to a political one, particularly after the Polish Insurrection of 1863–4. The heyday of Pan-Slavism in Russia lasted from the staging of the Second Slavic Congress in Moscow in 1867 (in which no Poles or Ukrainians, other than two Russophile Bukovynians, took part) until shortly after the Russo-Turkish War of 1877–8. Its most broadly formulated program was prepared by N. Danilevsky in a work serialized in 1869 as *Rossiiia i Evropa* (Russia and Europe), which foresaw the future addition of Galicia, Transcarpathia, and Bukovyna to the Russian Empire. Changed political circumstances in the 1880s undercut the tacit political support Pan-Slavism had enjoyed as a semiofficial policy, and it declined in popularity. Nevertheless Russian Pan-Slavism continued in a muted form with state subsidies for Russophiles outside the borders of the empire.

In Ukraine certain notions of Pan-Slavism were evident relatively early in the 19th century. Such ideas were disseminated mainly by Freemasons (notably the United Slavs Lodge in Kiev, 1818–19) and by Decembrists (the So-

ciety of United Slavs, 1823–5). The political program of the *Cyril and Methodius Brotherhood (1845–7) was deeply influenced by Pan-Slavism, which was also popular among Ukrainian scholars (O. Bodiansky, M. Maksymovych, and others) and the liberal nobility (H. Galagan, M. Rigelman, and others). Many of the liberal nobility joined the benevolent committees active in Kiev and Odessa.

In Western Ukraine the idea of Pan-Slavism initially fostered but later impeded the development of a Ukrainian national consciousness. In the first half of the 19th century people such as Šafařík and Kollár inspired key representatives of the Ukrainian national revival (notably the *Ruthenian Triad) to search out their Slavic heritage. The *Slavic Congress in Prague of 1848 provided the setting for an unprecedented demand by Ukrainians for national recognition and political rights. That year the *Halytsko-Ruska Matytsia was established as an institution of national 'enlightenment' along the lines of Czech and Serbian institutions. In the later part of the century, following a political reconciliation between Austria and Hungary at the expense of most of the Slavic peoples in the empire, the Ukrainian intelligentsia increasingly consisted of *Russophiles, who were supported morally and financially by Pan-Slavist circles in Russia. They increasingly became a minority party as they were superseded in the 1880s and 1890s by Ukrainophile national populists.

In the early part of the 20th century Pan-Slavism saw a limited revival. Slavic congresses were held in Prague (1908) and Sofia (1910), and a new face was put on the movement by its being dubbed 'Neo-Slavism.' As war became increasingly more likely, patriotic circles in Russia again began to make claims of kinship with other Slavic peoples. One of their activities was the establishment of groups to provide help in laying the groundwork for possible territorial acquisitions in Western Ukraine. The groups included the Galician Russian Committee in St Petersburg and the Committee for the Liberation of Carpathian Ruthenia in Kiev, both of which provided support for regional Russophile activity.

Pan-Slavism largely lost its appeal after the First World War. A concerted effort was made by the Soviet authorities in the 1940s to revive Pan-Slavic sentiments, and in 1941 they backed the creation of the All-Slavic Committee and staged the All-Slavic Congress in Moscow. Similarly, All-Slavic Committees were established in the West as CP front organizations. Those efforts were more an extension of Soviet foreign policy than reflections of popular sentiment. The Pan-Slavic thrust was dropped by the Soviets after their rupture with J. Tito's Yugoslavia in 1948.

Panteleimonivka [Pantelejmonivka]. DB III-3. A town smt (1986 pop 8,700) in Yasynuvata raion, Donetsk oblast. It arose around the railway station built there in 1876 and attained smt status in 1938. The town produces refractory products, bricks, and reinforced concrete.

Panticapaeum. An ancient Greek colony founded in the early 6th century BC at the site of present-day Kerch, in the Crimea. Strategically located on the western shore of Kerch Strait, the city grew quickly; before the end of the century it was minting its own coins. As the leading trade, manufacturing, and cultural center on the northern coast of the Black Sea it became the capital of the *Bosporan Kingdom, which arose in the 5th century. It was heavily damaged in Saumacus' revolt and Diophantus' capture of the city at the end of the 2nd century BC and by an earthquake ca 70 BC. Panticapaeum was rebuilt under Roman rule, and by the 1st century AD had regained its commercial importance. It began to decline in the 3rd century as tribal raids disrupted the trade in the Black Sea and the Mediterranean Basin. Panticapaeum was destroyed by the Huns ca 370. Later a small town arose at the site, which in the Middle Ages became known as Bosphorus.

The city was dominated by Mt Mithridates, on which the temples and civic buildings were placed. The slopes were terraced and covered with private villas. The large bay provided an excellent port. At its apogee the city occupied approx 100 ha. Beyond the city walls was a large necropolis, which has been excavated since the end of the 19th century. It included a number of famous kurhans, such as Melek-Chesmen, Tsarskyi, Zolota Mohyla, and

Panticapaeum: mural painting of Persephone being carried off by Hades (1st century AD)

Yuz Oba. The city itself has been excavated systematically since the Second World War.

Pantiukhov, Ivan [Pantjuxov], b 31 July 1836 in Novhorod-Siverskyi, Chernihiv gubernia, d 28 June 1911 in Kiev. Physician. A graduate of Kiev University (1862), from 1872 he worked at the Kiev Military Hospital. He wrote about anthropological questions, the history of medicine, and sanitation statistics. He compiled *Statisticheskie i sanitarnye ocherki Kieva* (Statistical and Sanitary Studies of Kiev, 1875) and wrote popular brochures on medicine, such as *Besedy o zdorove* (Conversations on Health, 1876).

Pantsyrni boyars. Impoverished nobles, free peasants, and liberated slaves in the 15th- and 16th-century Lithuanian-Ruthenian state who served in the grand duke's cavalry in heavy armor (*pantsyr*, from the German *panzer*). They lived on ducal lands and were exempted from taxes and other feudal obligations. Their status was between that of the petty nobility and that of the peasantry. In 1528 both the *pantsyrni* and the **putni* boyars were officially abolished. Some were promoted to the status of petty nobles; others were demoted to that of *state peasants. Both categories of boyars continued to exist unofficially until the end of the 16th century. At that time some of those stationed in Ukraine became *registered Cossacks.

Pap, Michael, b 24 July 1920 in Transcarpathia. Ukrainian-American historian. After graduating from Mukachiv-Bratislava State College, Vienna, and Heidelberg University (PH D, 1948) he moved to the United States, where he taught at Notre Dame College and John Carroll University (JCU) in Cleveland. A specialist in Soviet-American relations and the nationalities problem in the USSR, he directed the Institute for Soviet and East European Studies at JCU (from 1961) and edited the book *The Russian Empire: Some Aspects of Tsarist and Soviet Colonial Practices* (1985).

Pap, Oleksandr, b 2 July 1910 in Dashynka, Zhytomyr county, Volhynia gubernia, d 14 September 1979 in Kiev. Obstetrician and gynecologist. A graduate of the Kiev Medical Institute (1937), he served as director of the Kiev Scientific Research Institute of Pediatrics, Obstetrics, and Gynecology (1945-79) and president of the Society of Obstetricians and Gynecologists of the Ukrainian SSR (1979). His work dealt with the particulars of pregnancy, childbirth, and postnatality in women with diseases of the internal organs, the nutrition of pregnant women, and the organization of medical care for pregnant women.

Paper industry. A branch of industry that produces cardboard, paper, various fiber products, and semifinished products such as cellulose. The main raw material used by the cellulose and paper industry is pine and deciduous trees, the straw of grain cereals, hemp, recycled waste paper, and rags. The development of the chemical industry made possible the manufacture of paper and cardboard out of cellulose and wood pulp.

The first paper mills appeared at the beginning of the

Output of the paper industry in Ukraine, 1913–87
(in 1,000 tonnes)

Production	1913	1940	1965	1970	1980	1987
Paper	26.9	27.9	134.3	187.4	209.0	320.4
Cardboard	–	20.6	227.0	326.0	347.5	549.0
Cellulose	2.0	2.8	14.4	131.2	105.7	108.6

16th century in Galicia and Volhynia. The production of paper expanded considerably in the Hetman state of the 18th century. At the beginning of the 19th century the first large paper manufactories were built, and in the second half of the century machines were introduced into the manufacturing process. At the beginning of the 20th century there were 43 paper factories in Ukrainian territories, producing 38,000 t of paper and cardboard. The rate of production growth for cellulose products was even higher under the Soviet regime (see the table). The largest paper and cellulose factories in Ukraine are the Zhydachiv Cellulose and Cardboard Plant, the Poninka Cellulose and Paper Industrial Complex, the Kherson Cellulose Plant, the Malyn Paper Factory, and the Koriukivka Industrial Paper Factory. Ukraine produced scarcely 4 percent of the paper produced by the former USSR and only half the paper and cardboard used in Ukraine. The rest of the paper and some of the raw material for the paper plants were imported from Russia. Paper was one of the so-called subsidized products; hence, its distribution in Ukraine was controlled centrally in Moscow. Through its distribution policy the government in Moscow controlled printing and publishing in Ukraine (see *Printing industry and *Publishers and publishing).

V. Holubnychy

Paprocki, Bartłomiej [Bartosz], b ca 1543 in Paprocka Wola (now Płock), Mazovia region, Poland, d 27 December 1614 in Lviv. Polish writer and heraldist. He studied at Cracow Academy and traveled widely. His *Herby rycerstwa polskiego* (Coats of Arms of the Polish Knighthood, 1584) included portrayals of contemporary Ukrainian gentry families, Tatar and Turkish attacks on Ukraine, and the life and ways of the Cossacks. He described in detail the Moldavian campaign of the early 1580s, which was led by one of his friends, S. *Zborowski.

Paproski, Steve [Paproc'kyj, Stefan], b 23 September 1928 in Lviv. Business manager and politician. At an early age Paproski emigrated to Canada and settled in Edmonton. After attending the University of North Dakota, University of Arizona, and Banff School of Advanced Management, he was elected to the Canadian House of Commons in 1968 as the Progressive Conservative member for Edmonton Centre constituency (now Edmonton North). He was re-elected in 1972, 1974, 1979, 1980, 1984, and 1988. He served as chief Opposition whip in 1976–9 and then minister of state for fitness and amateur sports with responsibility for multiculturalism in the short-lived Clark government of 1979–80.

Parachuting (*parashutnyi sport*). Parachuting was introduced in Soviet Ukraine in the early 1930s. The sport was supervised from 1933 to 1947 by the Society for the Advancement of Defense and Aviation and Chemical Construction. Soviet parachutists had their own organization

from 1948 and their own federation from 1966. From 1954 they took part in biennial world championships sponsored by the International Aeronautic Federation and placed first in the team events many times. Since that year several Ukrainians have been individual world champions: I. Fedchyshyn (1954), P. Ostrovsky (1958), Ye. Tkachenko (1968), H. Surabko (1976), and I. Terlo (1978) among the men, and V. Zakoretska (1976) and L. Koricheva (1982) among the women.

Paradysky, Oleksa [Paradys'kyj], b 1891 in Ananiv, Kherson gubernia, d 1949 in Aschaffenburg, West Germany. Literary scholar. In the interwar years he taught courses in Ukrainian literature at several postsecondary institutions in Kharkiv. In the mid-1930s he became head of the chair of the history of Ukrainian literature at Kharkiv University. He wrote articles on 17th- to 19th-century Ukrainian literature and introductions to many interwar editions of Ukrainian literary classics. He also edited the last volume (the diary) of the 1939 Soviet edition of T. Shevchenko's complete works (5 vols). He survived the Stalinist terror and managed to emigrate during the Second World War.

Serhii Paradzhanov

Paradzhanov, Serhii [Paradžanov, Serhij] (Paradžanian, Sarkis), b 9 January 1924 in Georgia, d 21 July 1990 in Yerevan. Armenian film director of Ukrainian films. He graduated from the State Institute of Cinema Arts in Moscow (1951, pupil of I. Savchenko) and began working at the Kiev Artistic Film Studio, where he created several short films and musicals, including *Nataliia Uzhvii* (1957), *Ukrains'ka rapsodiia* (Ukrainian Rhapsody, 1961), and *Duma* (1964). International acclaim came to Paradzhanov in 1964 after the screening of *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors, based on M. *Kotsiubynsky's novella of the same title). It was awarded 16 prizes in all at international film festivals for its magnificent combination of camera work with atonal music and bright colors. In 1965–8 Paradzhanov was harassed for writing letters of protest against the unlawful arrests of intellectuals and for demanding free expression in the press. He moved to Armenia and experimented in a new cinema technique of superimposition of different colors (*The Color of Pomegranates*, 1969). In 1971 he returned to Kiev and began working on the film *Kyïvs'ki fresky* (Kievan Frescoes), but the filming was stopped, and he was arrested in 1973 on spurious charges of currency speculation and homosexuality and sentenced to 15 years' imprisonment. In 1977, after international pressure was applied (petition signed by F. Truffaut, J.-L. Godard, L. Malle, F. Fellini, L. Visconti, R.

Rossellini, and M. Antonioni), Paradzhanov was released from prison, only to be arrested again in Tbilisi in 1982 (charged with 'associating with undesirable persons'). His work was restricted as a result of the arrest; nevertheless, in 1984 he produced the film *Legend of Surami Fortress* and coauthored the screenplay *Swan Lake: The Zone*, which was directed by Yu. *Illienko (1989). His plan to produce a film version of T. Shevchenko's *Mariia* was not realized.

V. Revutsky

St George's Ukrainian Orthodox Church in Encarnación, Paraguay

Paraguay. A country in South America (1990 pop 4,279,500) with an area of 406,752 sq km. Asunción is its capital city. Ukrainian immigration into Paraguay can be traced back to 1922, when a group from neighboring Argentina established itself in Urú Sapucaí (now Colonia Carlos A. López), in the department of Itapúa. They were joined in 1926–32 by more Ukrainians, chiefly from Argentina, who were encouraged by the availability of land. From 1927 the lumber company of P. Christophersen had made available approx 71,000 ha of land for sale. The immigrants established settlements in Fram (colonies nos 2, 4, and 12, and later nos 5, 7, and 9) and nearby in Santo Domingo, Capitan Miranda, and Carlos A. López, and bought lots of up to 10 ha. Between 1935 and 1939 a special contract between the Paraguayan and Polish governments brought approximately 3,000 Ukrainian families from Polish-ruled Ukraine to Paraguay. A further influx occurred in 1946–50, when several hundred Ukrainians arrived from displaced persons' camps in Europe or in the Philippines (accommodating Ukrainian refugees from the Far East). The Ukrainian immigrants in Paraguay emanated from all regions in Ukraine, from Transcarpathia to the Kuban, with Volhynians forming the largest single regional group.

No accurate figures exist regarding the number of Ukrainians in Paraguay. It has been estimated that up to 35,000 Slavic immigrants came into the country in 1928–39, including many Ukrainians. The community probably numbered approx 15,000 at this time. Subsequent political instability in the late 1940s and the 1950s impelled a large out-migration, mainly to Argentina, which has left the

number of Ukrainians in Paraguay today at between 8,000 and 10,000. The majority continue to reside in the department of Itapúa (a region located in the southeast of the republic, which adjoins the Argentine province of *Misiones), especially in or around the cities of Encarnación and Carmen del Paraná. Some of the colonies, particularly those in the Fram district, are distinguished by their Ukrainian names: Bohdanivka, Polkovnyk Bohun, Nova Volyn, Nova Ukraina, Tarasivka, Perevertivka, and Morozenka. The same is true of colonies around Coronel Bogado (Zelenyi Klyn, Sybir, Persha Sotnia, Kavkaz), Alborada (Symon Petliura), Itangva (Bohdan Khmelnytsky), and Capitan Miranda (Taras Shevchenko). This Ukrainian nomenclature may be credited in large measure to the efforts of Rev T. Hnatiuk. In addition a small number of Ukrainians have settled in Asunción.

The majority of Ukrainians in Paraguay, originally peasants or artisans, are agriculturists who cultivate cotton, rice, corn, yerba maté (Paraguayan tea), and wheat for export, as well as garden vegetables for personal consumption. Other Ukrainians are engaged in the livestock economy (particularly those living around Coronel Bogado), in the lumber industry, or as apiarists. Those who have settled in the cities are employed as artisans and workers, or in commerce, the civil service, and the liberal arts.

Organized Ukrainian community life began when a Ukrainian Orthodox missionary priest from Argentina, Rev T. Hnatiuk, visited Encarnación in 1925 and established a church parish. In 1929 he initiated Paraguay's first Ukrainian People's Home in Urú Sapucaí, which later provided the premises for a daily Ukrainian school and an amateur drama troupe. Another Ukrainian People's Home was founded in the colony of Sandova.

These early efforts were soon consolidated with the 1937 founding of a Prosvita society in Encarnación. Between 1937 and 1945 some 10 branches were founded. Today, Prosvita has its headquarters in Encarnación and maintains five branches. In 1948 the Prosvita society formed a youth section (with seven branches) that was later transformed into the *Ukrainian Youth Association (SUM). In 1945 the Ukrainian community founded the Ukrainian Relief Committee as an auxiliary of the Paraguayan Red Cross to lobby for and assist in the resettlement of refugees in Paraguay. The Relief Committee and Prosvita established the Ukrainian Center in Paraguay (Ukrainskyi osередok v Paragvaiu) in 1949 as a representative umbrella organization. A member of the *Pan-American Conference, the association was headed by O. *Paduchak, A. Kushchynsky, and I. Lytvynovych until it became largely moribund in the 1960s. In the early 1980s its archives were transferred to the central Prosvita. Since 1961 an hour-long Ukrainian program, hosted until 1987 by S. Khudyk, has been broadcast from the local Encarnación radio station.

Some Ukrainians joined organizations which were pro-Soviet, Russophile, or Pan-Slavic in character. They founded the Ukrainian-Belarusian Reading Club in Domingo Bado and, in 1941, the Ukrainian-Belarusian Committee to Aid the Fatherland in Carmen del Paraná. As a result of the strong anticommunist attitude of the Stroessner regime, the pro-Soviet influence has been negligible since the 1950s, and today there is no pro-Soviet organization. The Russophile contingent is organized around the Russian Orthodox church; those of a quasi-Pan-Slavic ori-

entation can be found in the Christian Orthodox church and the Slavic Evangelical-Baptist church. The Baptists conduct services in Ukrainian and Russian and have their own hour-long radio program.

Paraguay is the only country of Ukrainian settlement in the West where the majority (over 60 percent) of Ukrainians are of Orthodox background. The *Ukrainian Autocephalous Orthodox church today has six parishes, which are administered by Archpriest M. Shcherbak. The Ukrainian Orthodox community in Paraguay experiences a chronic shortage of priests. The Ukrainian Catholic church has six parishes served by a priest of German origin, J. Reisinger. The remainder of Ukrainians in Paraguay are largely of Baptist, Stundist, or Mennonite faith.

Partly because of their fairly compact settlement pattern, Ukrainians in Paraguay have not been assimilated to the degree of their counterparts in Argentina and especially Uruguay. The community, however, has not developed an infrastructure comparable to that of its counterparts in North America, Australia, and Europe. It has no press of its own, for instance, and publishing activity from the inception of settlement in 1922 has been negligible.

S. Cipko

Parakhoniak, Oleksandra. See Liubych-Parakhoniak, Oleksandra.

Parakoniev, Kostiantyn [Parakon'jev, Kostjantyn], b 8 September 1920 in Volodymyrivka, Kherson county, d March 1987 in Zaporizhia. Heroic and character stage and film actor and director. In 1945 he completed study at the Kiev Institute of Theater Arts. Then he worked at the Kirovohrad Ukrainian Theater of Music and Drama and, from 1967, the Zaporizhia Ukrainian Music and Drama Theater. He also acted in the film *Son* (The Dream, 1964).

Ukrainians in Paraná: 1, national border; 2, border to Paraná; 3, areas with a Ukrainian majority; 4, areas with a Ukrainian minority

Paraná. One of the three southern states of Brazil, with an area of 199,324 sq km and an estimated population of 9,137,700 (1990). The climate is subtropical. The state capital is Curitiba. Paraná is an ethnocultural and ethnolinguistic mosaic in consequence of the colonization policy

started by Z. de Goes e Vasconcelos, the first president of the province. Faced with the task of developing a huge territory of 200,000 sq km with only 60,626 inhabitants, he initiated a policy of colonization with foreign immigrants in 1855. The subsequent recruiting efforts provided Ukrainians in Galicia and Bukovyna with specific information about settlement in Brazil and stimulated emigration to that country. Three waves of Ukrainian immigration followed, the first starting in earnest in 1895–7 and lasting until 1914.

The earliest areas of settlement included Água Amarela (Antonio Olinto today), União da Vitória and district, Iracema, Mallet, Dorizon, and Prudentópolis district. By 1914 an estimated 45,000 Ukrainians were living in Paraná. Their numbers had increased to at least 61,000 by the end of the Second World War as a result of an interwar wave of immigration from Western Ukraine. They were joined in the post-Second World War period by a numerically small but influential third wave of immigration, a significant portion of which subsequently resettled in North America.

Relatively recent estimates put the number of Ukrainians in the state at 130,000 to 150,000, or approx 80 to 85 percent of the country's total Ukrainian population. Within the state itself Ukrainians represent slightly less than 2 percent of the population. They are concentrated in several regions where they are numerically significant, however. The most notable of these is the so-called Brazilian Ukraine area in and around the city of *Prudentópolis, where Ukrainians constitute approx 75 per cent of the local population. Other small bloc-settlement regions are scattered throughout the state.

Ukrainians played a key role in introducing crops unknown in that part of Brazil, such as wheat, rye, buckwheat, and European potatoes. They also introduced and spread apiculture as well as milling and co-operative economic enterprises. Individual Ukrainians have occupied important government posts and academic positions, and Ukrainian writers and artists have helped shape the cultural profile of the state.

Paraná occupies a central place in the political, educational, organizational, and religious affairs of Ukrainians in Brazil. The country's earliest community structures began to appear there in the early 1900s, and many of the central community institutions of Brazil's Ukrainians are located in either Curitiba or Prudentópolis. In recent times some of the more significant developments affecting Brazilian Ukrainians have taken place in the state. The *Ukrainian Brazilian Central Representation was established in 1985 as an umbrella body for community interests. That same year the Brazilian Center for Ukrainian Studies was revived, and subsequently it has promoted Ukrainian education in the state. Notable developments include efforts to extend the Ukrainian studies program at the Federal University of Paraná in Curitiba from its extension status into the regular program of the department of foreign languages, and the adoption in 1989 of legislation allowing for the introduction of minority-language (including Ukrainian-language) instruction in the state's school curriculum in 1991. A student residence was opened in 1987 in Curitiba under the auspices of the Ukrainian Catholic eparchy. The Community Committee of the Land Fund of ZUADAK (Comitê Social de Ajudas do Fundo Agrário de UARC) was set up in 1986 in Pru-

dentópolis by a coalition of churches and community groups as a self-help association to assist the landless in purchasing farmsteads. (See *Brazil.)

N. Kerechuk

Parashchuk, Mykhailo [Paraščuk, Myxajlo], b 16 November 1878 in Varvaryntsi, Terebovlia county, Galicia, d 24 December 1963 in Bania, Plovdiv province, Bulgaria. Sculptor and political figure. He studied at the Cracow and Vienna academies of art, the Lviv Polytechnic, and R. Julien's academy and A. Rodin's studio in Paris. In 1908–11 he taught sculpture at the Munich Institute of Applied Arts. In 1911–13 he lived in Kiev and took part in a competition to design a monument in honor of T. Shevchenko. While crossing the border between the Russian and Austro-Hungarian empires in 1913, he was detained on suspicion of espionage and imprisoned by the Austrians in the *Thalerhof concentration camp in Styria. He escaped in 1914 and during the First World War was active in the *Union for the Liberation of Ukraine in Vienna and organized wood-carving, sculpture, and pottery courses for Ukrainians in the Russian army interned in the German POW camps in Rastatt and Wetzlar. In 1918 he returned to Ukraine. In 1920 he was appointed secretary and then head of the UNR diplomatic mission in Tallinn, Estonia, and an adviser to the UNR mission in Latvia. He was sent to the Balkans as a member of an International Red Cross mission, and from 1923 until the end of his life he lived in Bulgaria. There he was an active member of the Ukrainian Hromada in Sofia and the founder and first president of the Ukrainian-Bulgarian Society (1930s to early 1940s).

Mykhailo Parashchuk: *Portrait of Symon Petliura* (plaster, 1936)

Parashchuk created several commemorative monuments: to A. Mickiewicz in Lviv (1905, with A. *Popel); to the Ukrainians who died in the Wetzlar camp; to L. Kalcheva and to M. Drahomanov in Sofia; to Jews killed by the Nazis in Sofia and Plovdiv; and to A. Konstantinov in Pazardzhik. He also sculpted busts of Shevchenko, I. Franko, V. Stefanyk, S. Liudkevych, M. Lysenko, Drahomanov, M. Yatskiv, V. Pachovsky, M. Hrushevsky, S. Petliura, Metropolitan S. Sheptytsky, O. Oles, B. Lepky, S. Cherkasenko, Ye. Petrushevych, M. Livytsky, and many Bulgarian figures; created decorations for over 100 buildings in Ukraine, and for many in Poland and Bulgaria; and created many figure sculptures. In many of his works he gave new expression to the Ukrainian baroque style of the 17th and 18th centuries. Some of his works show the influence of Rodin (eg, the portrait *Old Man* and series 'The Enslaved') and symbolism (eg, the series 'Love'). Parashchuk is buried next to Drahomanov in a cemetery in Sofia.

D. Stepovyk

Parashka, Mount [Paraška]. v-4. A mountain (elevation, 1,268 m) in the High Beskyd region of the Carpathians. Situated in Lviv oblast, the mountain is formed from layered sandstones and shales. Pine and beech forests cover its slopes. It is a popular site for tourists.

Parasitology. The study of animal and plant parasitism, including medical, veterinary, and agricultural parasitology, with the aim of controlling or eradicating the parasites most harmful to human life and well-being. In Ukraine departments of parasitology are active at some of the medical institutes and universities, as well as at the AN URSS (now ANU) institutes of Zoology, Hydrobiology, and the Biology of Southern Seas and the Scientific Research Institute of Epidemiology, Microbiology, and Parasitology in Kiev. There are also many institutions of applied science which treat the veterinary and agricultural aspects of the parasitology question, stressing also the importance of ecology. Scientists who have contributed to the field in Ukraine include I. *Andriievsky, D. Lambl, who discovered the pathogen *Giardia lamblia* (causative agent of lambliaosis), V. Danylevsky, who was the first to study hemoparasites in birds, M. Melnikov-Razvedenkov, and O. *Markevych, who wrote the first textbook in Ukrainian, *Osnovy parazytolohii* (Basics of Parasitology, 1950). The Ukrainian Republican Scientific Society of Parasitologists was founded in 1945 in Kiev.

Parasiuk, Ostap [Parasjuk], b 20 December 1921 in Bilka, Peremyshliany county, Galicia. Mathematician and theoretical physicist; full member of the AN URSS (now ANU) since 1964. He graduated from Lviv University (1947) and in 1949–66 worked at the ANU Institute of Mathematics (1956–66 as deputy director). Since 1966 he has worked at the ANU Institute of Theoretical Physics, where he heads the section of mathematical methods in theoretical physics. Since 1956 he has taught at Kiev University, and in 1966–9 he was a member of the Presidium of the ANU and academic secretary of the physics division.

Parasiuk's main work deals with quantum field theory, although he has also made significant contributions to the theories of elasticity and plasticity, the theory of probability, the theory of dynamical systems, functional analysis, function theory, and other fields. He developed a rigorous

Ostap Parasiuk

Sofiia Parfanovych

theory for calculating infinities in quantum field theory and solved completely the problem of regularization of divergent integrals in the theory. Jointly with N. Bogoliubov he worked out the theory of multiplication of special generalized functions in quantum field theory. Parasiuk proposed a new method for the study of Feynman diagrams, generalized the methods of analytical regularization (now known as the Bogoliubov-Parasiuk-Hepp method), and deduced a general theorem about analytic and asymptotic properties of the amplitude of dissipation from the classical theorems of power series. In the theory of analytic continuation of generalized functions he obtained a theorem analogous to that of E. Titchmarsh and applied it to the solvability of coupled integral equations in the class of generalized functions.

W. Petryshyn

Parasiuk, Wilson, b 6 May 1943 in Stenen, Saskatchewan. Politician. Parasiuk was educated at the University of Manitoba (1965) and St John's College, Oxford (MA, 1968), on a Rhodes scholarship. A civil servant, he was elected to the provincial legislature of Manitoba in 1977 as the New Democratic party member for Transcona. He was re-elected in 1981 and 1986, and he served as minister of crown investments in 1982-3, minister of energy and mines responsible for Manitoba Hydro in 1981-7, and minister of health in 1988.

Parasunko, Onufrii [Parasun'ko, Onufrij], b 12 June 1913 in Ozaryntsi, Mohyliv-Podilskyi county, Podilia gubernia. Historian. A graduate of Kiev University (1940), he was vice-rector of Chernivtsi University (1940-1), lectured at Kiev University (1946-9), and was an associate of the AN URSR (now ANU) Institute of History (1949-71), a department chairman there (1963-7), and a department chairman at Kiev University (1971-?). He wrote books on the political mass strike in Kiev in 1903 (1953) and Ukraine's working class from the 1860s to the 1890s (doctoral diss, 1963). He also contributed to ANU multiauthor histories of the Ukrainian SSR (vol 1, 1953, 1967), of Kiev (vol 1, 1959), and of the working class of the Ukrainian SSR (vol 1, 1967) and coedited a collection of documents and materials about Ukraine's workers' movement of 1885-94 (1990).

Parfanovych, Sofiia [Parfanovyč, Sofija] (married name: Volchuk), b 1898 in Lviv, d 26 December 1968 in

Detroit. Gynecologist and writer; full member of the Shevchenko Scientific Society from 1942. A graduate of Lviv University (1926), she worked at the Lviv General Hospital and the Narodnia Lichnytsia clinic. She was active in the Ukrainian Hygienic Society and the Vidrozhennia society and wrote a number of books on hygiene, proper nourishment, and temperance, including the popular *Hihiena zhinky* (Hygiene of a Woman, 1939). In 1949 she emigrated to the United States. Her short stories, based on her experiences as a doctor, appeared in the collections *Tsina zhyttia* (The Price of Life, 1936) and *Inshi dni* (Other Days, 1948). She also wrote the collections of short stories *U lisnychivtsi* (At the Forest Reserve, 1954), *Liubliu Dibrovu* (I Love Dibrova [a holiday resort near Detroit], 1959), and *Charivna Dibrova* (Enchanting Dibrova, 1964) and the novels *Virnyi pryiatel'* (Faithful Friend, 1961) and *Takyi vin buv* (The Way He Was, 1964).

Paris. The capital of France and one of the world's political, cultural, and economic centers (1990 pop 2,152,000; metropolitan area, 10,200,000). Paris is one of the destinations of migrants of all countries, and small groups of Ukrainians have resided there since the Middle Ages. It is estimated that in the 20th century between 600 and 1,200 have lived in Paris at any given time.

The first mention of Ukrainians in Paris dates from the mid-11th century, with the marriage of Anna Yaroslavna to Henry I. In the 14th and, increasingly, through the 15th to 17th centuries Ukrainians began arriving in the city to study at the Sorbonne. Some manuscripts written by these students have survived, including the *Hrammatyka slovenskaia / Grammatica sclavonica* (Slavonic Grammar, 1643, 1645) of I. Uzhevych.

The first Ukrainian political émigrés in Paris were H. *Orlyk and the supporters of Hetman I. Mazepa who followed him. In 1765 Hetman K. Rozumovsky visited Paris and was received at the royal court. In 1761-5 the painter A. Losenko studied in Paris. In the late 19th century a number of Ukrainian cultural figures lived in the city, including M. *Vovchok (1860-7), M. *Bashkirtseva (1860-4), and F. *Vovk (who studied and worked in the School of Anthropology in Paris in 1887-1900). M. Drahomanov visited Paris in the 1870s and 1890s and took part in an international literary congress in Paris in 1878. In 1903 M. Hrushevsky stayed in Paris and taught at the Russian higher school of social sciences.

There was no organized Ukrainian presence in Paris until the 20th century, when the *Circle of Ukrainians in Paris became active in 1908-14. Its membership (120) consisted largely of post-1905 emigrants from Russian-ruled Ukraine and Galician students, and it issued a number of French-language publications about Ukraine. The initiator and head of the circle was Ya. Fedorchuk.

After the First World War, Ukrainian members of the expeditionary corps of the Russian army as well as a number of diplomatic delegations of the UNR and the Western Ukrainian National Republic (ZUNR) arrived to take part in the *Paris Peace Conference. The Ukrainian delegations established a press bureau and published the *Bulletin d'informations* (edited by F. Savchenko).

Paris became an important Ukrainian center in the interwar period, as its community grew with an influx of economic immigrants from Western Ukraine (particularly Galicia) in 1923. The following year political émigrés started arriving, among them I. Kosenko, S. Petliura, V.

Prokopovych, O. Shulhyn, M. Shumytsky, former officers and soldiers of the UNR army (M. Kapustiansky, Mykola Shapoval, O. Udovchenko, and others), and members of O. Koshyts's Ukrainian Republican Kapelle (O. Chekhivsky, K. Mykolaichuk). V. *Vynnychenko lived in Paris for a time, in the 1930s, as did M. Stsiborsky and V. Martynets. The major Ukrainian organizations of the period were centered in Paris and included the *Ukrainian Hromada in France (1924–76), the *Ukrainian National Union (1932–44), the *Union of Ukrainian Emigré Organizations in France (1925–40), the Society of Former Combatants of the UNR Army in France (est 1927), the *Union of Ukrainian Citizens in France (1925–32), the Ukrainian Students' Hromada (est 1924), and the *Petliura Ukrainian Library (est 1929). Paris was also the site of S. *Petliura's assassination in 1926 and the subsequent *Schwartzbard Trial.

Eight Ukrainian periodicals were published in Paris during the interwar period, including *Tryzub* (1925–40), **Ukrains'ke slovo* (est 1933), *Vistnyk Ukrains'koï Hromady u Frantsii* (1929–38), *Ukrains'ki visty* (1926–9), *Prométhée* (1926–38, in French), and *La Revue de Prométhée* (1938–40, in French).

During the German occupation, most Ukrainian organizations halted their activities. Only the Ukrainian Institution of Trust (headed by I. Stasiv), which oversaw the general social and cultural welfare of Ukrainian émigrés and refugees in 1942–4, was officially sanctioned. The Kobzar publishing house was also active. Some Ukrainians in Paris were arrested, including O. Boikiv, E. *Borschak, M. Shapoval, and O. Shulhyn.

Symon Petliura's grave monument at the Montparnasse Cemetery in Paris

More Ukrainian immigrants in Paris arrived at the end of the Second World War from the displaced persons' camps in Germany and Austria. A number of prewar organizations resumed their activities during this period, including the Ukrainian National Union (reconstituted as the Ukrainian National Alliance in France in 1949), the UNR Army Veterans' Society, and the Ukrainian Students'

Hromada. New organizations were also established, including the Union of Ukrainian Workers in France (1945), the Union of Ukrainians of France (1948), Ukrainian Community Aid in France (est 1946), the Ukrainian Academic Society in Paris (1946), the Ukrainian Christian Movement (1954), the Ukrainian Women's Association of France (1945), the Ukrainian Youth Association (1949), and the Organization of Ukrainian Youth in France (1956). In 1951–4 the headquarters of the Central Union of Ukrainian Students was located in Paris. The Ukrainian Central Civic Committee, an umbrella organization established in 1948, co-ordinated the activities of all of these groups. In 1985 the *Ukrainian Central Representation in France was formed as a rival umbrella group.

Postwar periodicals included *Ukrains'ke slovo* (re-established in 1948), *Ukrainets'-Chas* (1945–60), *Hromada* (1948–9), *Soborna Ukraina* (1950–1), and *Ukraina* (1949–53). Six journals were published in French: *ABN Correspondance* (1952–4), *L'Ukraine libre* (1953–4), *Bulletin franco-ukrainien* (1958–70), *L'Est européen* (est 1962 as a monthly), *Echos d'Ukraine* (1962–9), and *Echanges* (est 1971). Only the weekly *Ukrains'ke slovo* has continued publishing to this day.

There are two Ukrainian churches in Paris. The Orthodox one was consecrated in 1925; it was presided over by Metropolitan P. *Sikorsky in 1949–53. The Catholic church was consecrated in 1937; it served as the seat for Bishop V. *Malanchuk in 1961–83 and has been the seat of Bishop M. *Hrynchyshyn since then.

Paris is an important center of Ukrainian academic life. The Shevchenko Scientific Society (NTSh) in Europe has its headquarters and a major library in the nearby suburb of *Sarcelles. The Petliura Ukrainian Library contains a valuable library, museum, and archives. Interest in Ukrainian scholarship was fostered by the Franco-Ukrainian Cercle des Etudes Ukrainiennes (est 1930). The Institut National des Langues et Civilisations Orientales has had Ukrainian language and culture as part of its curriculum since 1939. E. Borschak (1939–59), M. Scherrer (1959–72), and E. Kruba (since 1972) have been language instructors; A. Zhukovsky has taught Ukrainian cultural history since 1960. The Institut d'Etudes Slaves, the Institut National des Langues et Civilisations Orientales, the Bibliothèque de Documentation Internationale Contemporaine à Nanterre, the Bibliothèque Nationale, and the Bibliothèque Slave also have substantial collections of Ukrainian materials.

The following are some of the artists who have been active in Paris: M. Andriienko-Nechytailo, A. Archipenko, M. Bashkirtseva, M. Boichuk, S. Borachok, S. Hordynsky, O. Hryshchenko, L. Hutsaliuk, V. Khmeliuk, M. Krychevsky, P. Levchenko, S. Levytska, A. Losenko, V. Makarenko, O. Mazuryk, O. Murashko, P. Omelchenko, V. Perebyinis, O. Savchenko-Bilsky, A. Solohub, A. Solomukha, T. Vyrsta, and S. Zarytska. Among the many Ukrainian composers and musicians who resided in Paris have been D. Drohomiretska, V. Hrudyna, M. Kouzan, Yu. Ponomarenko, I. Vovk, A. Vyrsta, F. Yakymenko, and the singers U. Chaikivska, M. Skala-Starytsky, and Ye. Zarytska. Theater productions were staged in the city by amateur groups sponsored by the Ukrainian Hromada in France in 1925–32 and in the 1950s under the direction of N. Pylypenko.

Paris is an important international political center.

Parisian Ukrainians have been active in the Friendship Committee of Peoples of the Caucasus, Turkestan, and Ukraine; the Anti-Bolshevik Bloc of Nations; the Paris Bloc; and the International Free Academy. The dissident mathematician and thinker L. *Pliushch has resided near Paris since his release from the Soviet Union in 1975 and has frequently championed human rights and Ukraine's cause in the international arena. UNESCO, which has its headquarters in Paris, has occasionally been the site of international exhibitions sponsored by the Ukrainian SSR.

A bust of T. Shevchenko (donated by Soviet authorities) stands in Taras Shevchenko Square near the Ukrainian Catholic church. In the church of St-Germain-des-Prés there is a bas-relief depiction of the Battle of Berestechko between the Ukrainians and the Poles. S. Petliura lies buried in the Montparnasse cemetery, and the graves of Metropolitan Sikorsky, Gen M. Omelianovych-Pavlenko, and N. Makhno are in the Père Lachaise cemetery. (See also *France.)

A. Zhukovsky

Paris Bloc. The popular name of the League for the Liberation of the Peoples of the USSR, an organization of the captive nations of the Soviet Union. Founded in Paris in March 1953 through the initiative of Ukrainian National Council supporters, the group functioned as a coalition of anti-Soviet forces and included national organizations representing Armenia, Azerbaidzhan, Belarus, the Crimea, Georgia, Idel-Ural, Caucasian peoples, Turkestan, and Ukraine. Its most active Ukrainian members were D. Andriievsky, S. Dovhal, and M. Livytsky. Its purpose was to co-ordinate the independence struggle of the captive nations against Soviet occupation. It sought contacts with international organizations sympathetic to those political aspirations, organized press conferences and demonstrations, published declarations, and submitted memorandums to Western governments. It had branches in Munich, Paris, New York, and Istanbul. In 1958–67 it published the journal **Problems of the Peoples of the USSR*, which was edited by S. Dovhal. By the 1970s the coalition was a spent force and had become inactive.

Paris Peace Conference. The meeting that arranged the international settlement after the First World War. It opened on 18 January 1919 and was dominated by the victorious *Entente powers of the United States, France, the British Empire, and Italy and presided over by Premier M. Clemenceau. The new republics of Poland, Czechoslovakia, and Rumania were each allowed two representatives, but Soviet Russia was not recognized and was excluded. The government of the UNR Directory sent a delegation headed by H. *Sydorenko (replaced in August by M. *Tyshkevych) to lobby for admission to the conference, recognition of Ukraine's independence, the withdrawal of Polish, Rumanian, and Allied forces from Ukraine, and support for its war against Soviet Russia. The delegation, which included V. Paneiko, A. Margolin, O. Shulhyn, S. Shelukhyn, B. Matiushenko, A. Halip, M. Kushnir, S. Tomashivsky, S. Zarkhii, A. Petrushevych, O. Kulchytsky, D. Isaievych, P. Didushok, S. Tymoshenko, V. Kolosovsky,

Members of the UNR delegation at the Paris Peace Conference. From left: Oleksander Shulhyn, Arnold Margolin, and Vasyl Paneiko

M. Levytsky, O. Sevriuk, and F. Savchenko, submitted memorandums to the conference's General Secretariat. The delegation's extraordinary members, M. Lozynsky and D. Vitovsky, lobbied for a Ukrainian-Polish armistice on behalf of the Western Province of the UNR. Ukrainian representatives from Canada and the United States (O. Megas, I. Petrushevych, K. Bilyk, J. Hamil) aided the delegation. From December a separate Western Ukrainian National Republic delegation headed by Paneiko lobbied for Western Ukrainian independence. It submitted memorandums and documents, and protests against the Polish occupation written by Lozynsky, Vitovsky, Ye. Levytsky, Tomashivsky, V. Temnytsky, and O. Burachynsky. Transcarpathian leaders (eg, A. Beskyd, H. Zhatkovych) submitted memorandums to the conference supporting the incorporation of Transcarpathia into Czechoslovakia.

The conference produced the Covenant of the League of Nations and the treaties of *Versailles (with Germany), *Saint-Germain (with Austria), and Neuilly (with Bulgaria). Before it was brought to an end with the formal inauguration of the *League of Nations on 16 January 1920, it also designated the *Curzon Line as Poland's eastern border and laid the groundwork for the 1920 treaties of *Trianon (with Hungary) and *Sèvres (with Turkey) and the work of the *Conference of Ambassadors. Although national self-determination was one of its basic principles, the conference did not officially recognize the Ukrainian delegations or Ukraine's independence, but favored instead (under Russian anti-Bolshevik and American influence) the preservation of the territorial integrity of the Russian Empire. It did not undo the occupation of the Western Ukrainian lands by Poland, Czechoslovakia, and

Rumania, although it tried to put an end to the Ukrainian-Polish, Ukrainian-Soviet, and Russian civil wars (see *Berthélemy Mission, L. *Botha). Under pressure from the pro-Polish French and American delegates (including Clemenceau and Pres W. Wilson), the conference sanctioned the Polish occupation of Galicia.

Paris Peace Treaties of 1947. Treaties defining boundaries and war reparations of the European states that had supported Nazi Germany and been defeated in the Second World War. A preliminary peace conference was held in Paris between 29 July and 15 October 1946 to discuss the draft treaties for peace with Italy, Rumania, Hungary, Bulgaria, and Finland that had been prepared by the foreign ministries of the Four Powers (Great Britain, France, the United States, and the USSR). Delegates attended from 21 states, including the Ukrainian SSR (represented by D. *Manuilsky, O. Voina, M. Petrovsky, V. Koretsky, M. Ptukha, A. Baranovsky, O. Kasymenko, and others). The Ukrainian SSR was among the signatories to the five treaties signed in Paris on 10 February 1947. Among matters settled were the Ukrainian SSR's boundaries with Rumania and Hungary. Rumania recognized the 1940 cession of Bessarabia and northern Bukovyna to the USSR, and Hungary accepted its 1938 boundaries, except for a minor frontier rectification in favor of Czechoslovakia. Italy and Finland were required to pay reparations valued at 100 million US dollars and 300 million US dollars respectively to the USSR; Bulgaria, Hungary, and Rumania were also required to compensate the USSR for losses incurred during the war. The Ukrainian SSR, however, was not awarded any direct reparation payments. The treaties also made provisions to guarantee the cultural rights of national minorities and general civil rights, but Bulgaria, Rumania, and Hungary subsequently ignored the provisions. Ukrainian émigré organizations used the opportunity of the peace talks in Paris to raise their concern with the delegates as to whether or not the delegates for the Ukrainian SSR were truly representing the interests of the republic's citizens.

S. Cipko, J.-P. Himka

Parish (*parafiiia*). The lowest administrative unit in the church that has its own church and priest, and which, as a constituent part of an eparchy, directly serves the faithful. Although most serve a specific locality, some parishes are extraterritorial (eg, for soldiers or a group of émigrés). The term *parafiiia* came into use in the 16th century and became entrenched in the 18th and 19th centuries. At the same time *parokh* became an accepted term for a pastor or parish priest (sometimes even for an administrator).

The ways in which parishes were established, churches

and parish buildings were built, and parish priests and precentors were supported have changed over time. In the Princely era and in the Hetmanate, churches were funded by princes, hetmans, magnates, nobles, and Cossack officers. They donated land, easements, and sometimes even part of their incomes (eg, for the Church of the *Tithes in Kiev) to parishes. This material support, together with donations from private individuals and the government, enabled the parish *clergy (priests, deacons, precentors, sextons, etc) to minister to the needs of the parishioners, and gave the clergy security as a class. At the Synod of *Zamostia in 1720, Ukrainian and Belarusian Catholics were forbidden to establish parishes without such *patronage. In the Orthodox church under Russian rule, the sole criterion for the opening of a parish was the number of faithful to be served. According to a church regulation of 1841, parishes with small congregations were to be assigned only one priest and one precentor. In an 1869 reform, small church communities were consolidated into larger parishes, and many churches were closed or subordinated to a single parish.

Land was owned by the parish and worked for the benefit of the local church throughout Ukraine until the consolidation of Soviet power (1917–20 in Russian-ruled Ukraine and 1939–46 in Western Ukraine), when all church property was nationalized. Earlier some church lands had been confiscated by the Austro-Hungarian, Russian, or Polish authorities in Ukraine, but in these instances the parishes were compensated for their loss. Now the parishes pay their clergy with contributions from the congregation, such as membership dues, Sunday and other collections, and bequests. Parish clergymen are also paid for special church services (*treby*), including the performance of sacraments and rites (baptism, marriage, funerals, blessing of water, blessing of homes, etc). Clergymen are responsible for pastoral affairs in the parish and for keeping a *church register of vital statistics (*metrykal'na knyha*), a record formerly considered to be an official government document. They teach religion in parish schools or in the church and care for the church's liquid and fixed assets.

Initially parishes chose their own priests (most often from the family of the previous pastor) and the priest's position was confirmed by a bishop. As a centralized church system emerged, this tradition faded, although the recommendation of the parishioners is still important in the Orthodox church. For a time the church patrons who supported the parish financially also had the authority to choose priests; in periods of church decline this authority resulted in abuses by individual clergymen, who held their office with the support of patrons but without the consent of local bishops. Later the right to appoint parish priests came to belong exclusively to bishops and their consistories. In the Russian Empire this had the effect of accelerating the Russification of the Ukrainian church.

Parishes are usually headed by one priest, but larger parishes may include more clerics. Traditionally a priest is permanently assigned to a parish, which he cannot leave of his own volition; neither can a bishop remove a priest from a parish without the approval of the parish. In the Catholic church a canonical process was necessary to make such a change.

Precentors (who usually conducted the church choir) and sextons played an important role in parish life, as did various parish leaders: the sacristan (*tytar*), the church el-

der (*tserkovnyi starosta*), and the head of the parish council. Church elders, who were confirmed by the bishop, were particularly influential in the Orthodox church. In general, lay influence in parish affairs was more pronounced in the Orthodox church than in the Catholic church, where episcopal authority was supreme. In the Catholic church nuns were often responsible for the upkeep of the church and the teaching of catechism.

Administratively, several proximate parishes were often organized as a deanery or protopresbytery, headed by a dean or protopresbyter. Above these was an *eparchy; the number of parishes or deaneries in an eparchy was never standardized.

In the Ukrainian churches, parishes were always the main center of spiritual and educational life in the community. Before the establishment of similar government institutions, parishes had their own schools, asylums, orphanages, hospitals and clinics, and, in some cases, printing presses. Thus they played an important role in the preservation of national and religious consciousness in the people. Among Ukrainian immigrants, particularly in North and South America, Orthodox and Catholic parishes were for many years the main centers of Ukrainian secular community life as well, and they remain among the best organized and strongest institutions in the diaspora.

I. Korovytsky, I. Patrylo

Park. A tract of wild or cultivated ground set aside for recreation. Larger parks, such as *nature preserves, *wildlife refuges, and national parks, are set aside by the state for the purpose of conservation and scientific research. Smaller parks or gardens are maintained by municipalities for decorative and recreational purposes. Specialized *botanical and *zoological gardens usually belong to scientific institutions and serve scientific ends.

The earliest parks in Ukraine, dating back to the Princely era, were either royal hunting preserves or gardens cultivated by monasteries and princes. Private parks with a decorative purpose appeared only in the first half of the 18th century. They were designed in the Italian baroque or the French style, with a regular geometric plan, symmetrical composition, and a clearly defined center. The most outstanding example of a French garden is Pershohravnyi Park (formerly Tsarskyi Sad and Municipal Park) in Kiev, which was designed by B. Rastrelli in 1743. A large number of parks were established in the second half of the 18th and at the beginning of the 19th century. Almost all of them were of the landscape or English type, based on the principle of free planning with the fullest utilization of natural conditions. They were usually in picturesque settings, although occasionally, as in Trostianets, natural relief was altered. The natural vegetation was supplemented with trees and shrubs from other biogeographic regions and with decorative structures, such as fountains, grottoes, greenhouses, pavilions, bowers, columns, and obelisks. Most of the parks were established by wealthy landowners and designed by foreign architects. The most famous landscape parks are Oleksandriia Park in Bila Tserkva (est 1793), *Sofiivka Park in Uman (est 1796–1800), the *Trostianets Dendrological Park (est 1834), the *Veseli Bokovenky dendrological park (est 1893), and Sokyryntsi Park (est 1763). One of the first public parks in Ukraine was Stryi Park in Lviv (est 1877). In the second half of the 19th and at the beginning of the 20th

century many urban and resort parks were established. They were usually small, and their plant composition was not original. Until 1914, except for the industrial cities of the Donbas, Ukrainian cities were adequately supplied with parks and greenery.

Parks and gardens suffered considerable damage during the First World War and neglect during the early years of Soviet rule. Conditions improved somewhat, after Ukraine adopted a law on the preservation of the cultural and natural heritage (16 June 1926). The larger parks were turned into nature preserves or wildlife refuges. In the second half of the 20th century existing parks have been enlarged, and a wide variety of new ones have been established, especially in cities and industrial regions.

National parks are large, mostly forested tracts that are set aside for both conservation and outdoor recreation. Nature preserves, which date back to the 1920s, were not accessible to large numbers of visitors. As the urban population increased and its living standard rose, the need for outdoor recreation in a natural environment became acute. Two parks were set up in Ukraine, the *Carpathian National Park (est 1980, 47,300 ha) and the *Shatsk National Park (est 1983, 32,500 ha). More were proposed as part of a comprehensive national park system.

Forest parks are large, protected forested areas on the outskirts of large cities. Set up in the Soviet period, the parks serve the urban population by offering sites for recreational activities, such as picnicking, swimming, mushroom picking, hiking, and cross-country skiing. The largest forest parks are the Komsomol Forest Park, near Kharkiv (2,383 ha), Holosiiv Park, south of Kiev (1,463 ha), and Briukhovychi Park, northwest of Lviv. Hydroparks on natural or artificial bodies of water provide the public with beaches and boating facilities. The largest hydropark (2,000 ha, including 500 ha of water) is in Kiev, on the left bank of the Dnieper River.

In 1985 there were 16 *dendrological parks, with a combined area of 1,200 ha, 13 *botanical gardens, with an area of 1,500 ha, and 6 *zoological gardens and parks, with an area of 100 ha. Natural monuments, such as waterfalls, rock formations, exposed geological layers, and old trees, have a special status and number close to 500 (total area, 14,000 ha). Special *parks of culture and recreation were developed in the Soviet period to provide urban residents with recreational facilities.

Park of culture and recreation (*park kultury i vidpochynku*). A Soviet designation for an urban park with gardens, wooded areas, and a cultural, educational, and recreational program. The largest have theaters (some outdoors), lecture halls, reading rooms, amusement areas, dance halls, sporting and other equipment rental shops, skating rinks, playing fields, one-day houses of rest, and children's playgrounds. The number of parks of culture and recreation in Ukraine grew from 107 in 1980 to 124 in 1985 and 184 in 1988. The largest are located in Kiev (on the right bank of the Dnieper), Kharkiv, and Lviv.

Parkhomchuk, Stanislav [Parxomčuk], b 30 November 1925 in Chornova, Volodarske-Volynske raion, Zhytomyr okruha, d 2 July 1975 in Kiev. Soviet historian and bureaucrat. A graduate in international relations of Kiev University (1949) and the Higher Diplomatic School of the USSR Ministry of Foreign Affairs (1953), he worked as a senior associate of the AN URSS (now ANU) Institute of History (1958–62, 1966–70) and from 1970 headed its Department of the History of Foreign Oriental Countries. He assumed various functions in the Council of Ministers of the Ukrainian SSR and was a counsel at the European headquarters of the United Nations in Geneva (1963–5). He is the author of books on the birth of modern Rumania (1961) and the October Revolution and revolutionary upheaval in Rumania in 1917–21 (1967).

Parkhomenko, Mykhailo [Parxomenko, Myxajlo], b 22 September 1910 in Shkurativka, Sumy county, Kharkiv gubernia. Literary scholar. He graduated from the Moscow Pedagogical Institute, and in 1960 he became a professor at the CC CPSU Academy of Social Sciences in Moscow. Among his many works are articles on Ukrainian-Russian literary relations, books in Ukrainian on M. Gorky and Western Ukraine (1946) and I. Franko (1956), and books in Russian on O. Korniiichuk (1952), I. Franko (1954, 1957, 1966), T. Shevchenko (1964), the image of the positive hero (1962), the national and international in literature and art (1964), the multinational Soviet novel (1966), socialist realism (1975, 1977), and the new literatures of the peoples of the Soviet Arctic and Far East (1982). A selection of his articles on Ukrainian and other Soviet writers, *Gorizonty realizma* (The Horizons of Realism), was published in 1982.

Parkhomenko, Mykola [Parxomenko], b 23 July 1902 in Karavan, Katerynoslav gubernia, d 3 June 1964 in Elista, Kalmyk ASSR. Composer, violinist, and pedagogue. After graduating from the Rostov Conservatory (1924) he taught in a variety of music schools, including the Lviv Conservatory (1946–9). Among his works are the children's operettas *Tale about the Fisherman and the Fish* (1936) and *Alladin's Lamp* (1941), the ballet *Scheherezade* (1925), four symphonies (1930, 1933, 1943, 1947), short violin pieces, and songs.

Parkhomenko, Oleksander [Parxomenko], b 24 December 1886 in Makariv Yar, Slovianoserbske county, Katerynoslav gubernia, d 3 January 1921 in Buzivka, Uman county, Kiev gubernia. Bolshevik revolutionary and military figure. From 1904 he was active in the Bolshevik party in the Donbas. After the February Revolution he helped organize the Red Guard in Luhanske. As commander of the Luhanske Red Army detachment (1918–19) he fought White, UNR, and German forces in eastern Ukraine and the Don region. In January 1919 he was appointed military commissar of Kharkiv gubernia; in December 1919, special official of the Revolutionary Military Soviet of the First Cavalry Army; and in April 1920, commander of its 14th Division in Volhynia, Galicia, and southern Ukraine. He was killed in combat with N. Makhno's forces. P. Panch and V. Ivanov have written novels, and L. Lukov has made a film, about him. D. Myshko (1957), V. Sheludchenko (1956), and G. Tolokolnikov (1962) have published biographies of him.

Parkhomenko, Olha [Parxomenko, Ol'ha], b 7 April 1928 in Kiev. Violinist. She graduated from the Moscow Conservatory (1953) in the class of D. Oistrakh, and since 1954 she has been the soloist with the Kiev Philharmonic. In 1956 she won first prize at the International Mozart Competition in Salzburg, and since 1963 she has taught at the Kiev Conservatory (from 1977 as a professor). Her repertoire includes pieces by B. Liatoshytsky, M. Verykivsky, and A. Shtoharenko.

Terentii Parkhomenko

Parkhomenko, Terentii [Parxomenko, Terentij], b 28 October 1872 in Voloskivtsi, Sosnytsia county, Chernihiv gubernia, d 23 March 1910 in Voloskivtsi. Kobzar. Having lost his sight at 10 he studied the kobza under A. Hoidenko and others and then for five years wandered with Hoidenko through Ukraine. At 30 he began to teach the kobza. Some of his students (P. Tkachenko, Serdiuk-Pere-liub, and O. Hrebin) became noted folk singers. He corresponded with M. Lysenko, O. Slastion, A. Malynka, M. Serpansky, Lesia Ukrainka, I. Franko, and V. Hnatiuk. In 1902 he performed for the 12th Archeological Congress in Kharkiv and was invited to appear in Lviv and Dro-hobych. He gave concerts in Kiev, Poltava, Nizhyn, Mohyliv-Podilskyi, Uman, Vinnytsia, Yelysavethrad, and Warsaw. His repertoire included dumas, historical songs, psalms, lyrical songs, and satires. Because his songs awakened national consciousness among the peasants, he was harassed by the authorities. He died as a result of a police beating.

Parkhomenko, Volodymyr [Parxomenko], b 21 September 1880 in Smile, Romen county, Poltava gubernia, d 1942 in Leningrad. Historian. After graduating from the St Petersburg Theological Academy in 1905, he taught church history at the Poltava Theological Seminary and was the first chairman of the Poltava Church-Archeological Committee. Later he was a privatdocent and, from 1918, docent at Kiev University and the Kiev Institute of People's Education. In the 1920s he was a professor at the Dnipropetrovske Institute of People's Education, director of a department at the Dnipropetrovske Regional Historical and Archeological Museum, a research associate of the VUAN (from 1926), president of the Dnipropetrovske Scientific Society of the VUAN, and a member of the VUAN Commission of Ukraine's Ancient History. He was swept up in 1929 during the arrests of members of the fictitious *Union for the Liberation of Ukraine and exiled from Ukraine. From the late 1930s he was a professor at Leningrad University.

Parkhomenko initially studied Ukrainian church history. He contributed some 20 articles on 18th-century Ukrainian church and secular history to *Kievskaiia starina* and wrote a book on the history of the Pereiaslav-Boryspil eparchy in 1733–85 (1910), a booklet on the question of when Princess Olga of Rus' was baptized (1911), and books on the beginnings of Christianity in Rus' in the 9th and 10th centuries (1913) and the origin of the Rus' state (1916). A supporter of the theory of the southeastern (ie, Ukrainian) origins of Rus', in the Soviet period he wrote a book on the 8th- to 11th-century Rus' state (1924) and some dozen articles, including ones on Rus' and the Khazars (1927) and Pechenegs (1929), Princes Oleh and Ihor (1923), the politics of Hetman I. Samoilovych (1928), Rus', the steppe, and the Varangians (1929), and the character and significance of the reign of Prince Volodymyr the Great (1941).

A. Zhukovsky

Parliament. A term commonly used for legislative councils or assemblies. The name parliament and its development are linked with medieval England, where it began its evolution in the 13th century. Whereas at first the parliament fulfilled an advisory or co-operative function, it gradually acquired the independent prerogatives of a legislative entity.

The Ukrainian experience with a parliamentary system was curtailed by several factors. First, the extended periods of Ukrainian statelessness resulted in a scarcity of national institutions. Accordingly, Ukrainians could participate only in foreign councils or assemblies, in which they had no controlling role. They commonly formed a separate caucus or club in those bodies. Second, the legislative assemblies which held jurisdiction over Ukrainian territories usually consisted (until the later 19th century) almost exclusively of representatives of the ruling elite. The nobility of Ukraine took part in the dealings of those bodies, but because in most cases they had assimilated to the norms of the dominant foreign power, they usually did not represent broad Ukrainian interests. Finally, the establishment of Soviet power in Ukraine in the 20th century wholly subverted the principles upon which parliamentary systems are based.

During the Princely era of Ukraine the *Boyar Council fulfilled to a certain extent the functions of a parliament. It was a particularly influential body in the Principality of Galicia-Volhynia. Under the Grand Duchy of Lithuania the main legislative bodies were the *Council of Lords and the *Diet (Sejm); the former constituted an upper chamber, and the latter incorporated a wider-ranging representation, albeit by estate. Among its participants were Ukrainian princes, magnates, members of the nobility, and the higher clergy, and burghers. After the Union of Lublin in 1569 a single diet served the entire Commonwealth. It had two houses, a senate that consisted of the highest-ranking civic and ecclesiastical figures and a chamber of deputies made up of representatives of the nobility. *Dietines acted as agencies of territorial self-government in the voivodeships. They also elected representatives to the Diet.

During the Hetmanate certain parliamentary functions were fulfilled by the *Council of Officers, although the *General Military Council rendered the extent of its jurisdiction somewhat unclear. P. Orlyk drafted a plan for a

Cossack parliament – essentially an expanded Council of Officers with regular sittings – in the Constitution of *Bendery in 1710. The plan was never realized. Similarly a late 18th-century plan by H. Poletyka to restore dietines was not realized.

A parliamentary institution was established in the Russian Empire only after the Revolution of 1905. Elected through a curial system, the State *Duma possessed limited legislative power. A *Ukrainian caucus in the Russian State Duma was active from the sitting of the First Duma in 1906.

In the Austro-Hungarian Empire a parliamentary system was created only in 1867 (in spite of earlier efforts, during the Revolution of 1848–9). The Reichsrat consisted of an upper house (Herrenhaus) and a lower house (Abgeordnetenhause). The Herrenhaus was made up of hereditary nobles, social notables, and appointees of the emperor. The Greek Catholic metropolity was assured of a seat in the upper house, filled for a period by O. Barvinsky and I. Horbachevsky. The chamber of deputies was initially a forum for the provincial diets; then, from 1873, it was elected on a curial basis and, from 1907, on the basis of universal male suffrage. Single-chamber provincial diets were also elected on a curial system in Galicia and Bukovyna.

During the period of Ukrainian independence (1917–20) a parliamentary role was played by the *Central Rada, the *Labor Congress, and the *Ukrainian National Rada in Galicia. Plans were established for elections to a representative *Constituent Assembly of Ukraine, but they were only partially realized because of the precarious military situation. The constitution of the Ukrainian National Republic foresaw a one-house parliament. The Labor Congress, although modeled on labor-class principles, expressed approval of a national, democratically elected Ukrainian parliament. Some of the pronouncements of Hetman P. Skoropadsky indicate that he foresaw the creation of a Ukrainian Diet as the parliament of the Hetman State.

During the interwar period in Poland the two legislative bodies were the Senate and the Sejm, both chosen through open elections. After an initial boycott by Galician politicians of elections under Poland (1922) Ukrainian members established the *Ukrainian Parliamentary Representation. Not all Ukrainians, however, joined the caucus.

Until 1918, Transcarpathian Ukrainians (such as A. Dobriansky, A. Beskyd, K. Hrabar) were elected from time to time, by the curial system, to the Hungarian Diet (Országgyűlés). In the years between the two world wars Ukrainians were also represented in the parliamentary institutions of Czechoslovakia and Rumania. In 1939–44 Transcarpathian representatives were appointed to the Hungarian legislature. The diet of the short-lived Carpatho-Ukrainian state had one chamber and sat in session only once.

The main legislative body of the Ukrainian SSR was the *All-Ukrainian Congress of Soviets (1917–37). Ukrainians were also elected to the corresponding all-Union structure. From 1937 the role of a parliament was played by the *Supreme Soviet of the Ukrainian SSR and its USSR counterpart. In spite of their formal structures the Soviet assemblies functioned not as independent entities that debated and enacted legislation, but as a formal means of approv-

ing state plans for the country. They were completely dominated by the Communist party, which determined nominations for (uncontested) elections and controlled their proceedings. Changes in electoral law in 1989 paved the way for establishing an opposition bloc in the Supreme Soviet (renamed the Supreme Council) and making it a more representative parliamentary forum. Since the declaration of Ukrainian independence in 1991 it has remained the highest legislative body in Ukraine.

The Ukrainian minority in the socialist countries of Eastern Europe since 1945 has had fair representation in regional and federal legislative institutions, especially in Czechoslovakia and Yugoslavia. The Ukrainian National Council, created in exile in 1947 as a representative body of the political parties of the Ukrainian National Republic, was based on parliamentary principles. (See also *Elections, *Legislation, *Constitution.)

V. Markus

Parnas, Jakob (Yakov), b 28 January 1884 in Mokriany, Sambir county, Galicia, d 29 January 1949 in Moscow. Biochemist; full member of the Polish Academy of Learning from 1931, the USSR Academy of Sciences from 1942, and the USSR Academy of Medical Sciences from 1944. A graduate of the Berlin Technological Institute (1904), he also studied at Strasbourg (1905) and Zurich (1906–7) universities, was a professor at Warsaw University (1916–19), directed the Medical Chemistry Institute at Lviv University (1920–41) and the Biochemistry Institute of the USSR Academy of Medical Sciences in Moscow (1944–8), and organized and directed the Laboratory of Physiological Chemistry of the USSR Academy of Sciences (1943–9). Parnas studied carbohydrate metabolism and enzymic reactions as key factors in muscle contraction, established the pathway of glycogen formation from glyceraldehyde in the liver, and investigated ammonia formation in blood. In 1935 he codiscovered glycogen cleavage by phosphoric acid. In 1937 he proposed, jointly with Danish physicists, the use of the phosphorus-32 isotope as a marker in biological research; this advance led biochemists to a detailed understanding of carbohydrate metabolism in muscle – the Embden-Meyerhof-Parnas or EMP scheme. Parnas wrote 120 works, including a Polish physiological chemistry textbook (1922). He was arrested by the MVD in 1949, and died in prison.

Parniuk, Mykhailo [Parnjuk, Myxajlo], b 2 October 1921 in Musiivka, Khorol county, Kremenchuk gubernia.

Mykhailo Parniuk

Philosopher. A graduate of Kiev University (1951), since 1955 he has taught in the AN URSS (now ANU) Department of Philosophy. He received a doctorate in 1970 and became chairman of the department in 1973. He has written a book, in Russian, on the principle of determinism in the system of the materialist dialectic (1973) and contributed to and edited multi-author books on gnoseological, social, and methodological problems and on materialist-dialectical categories.

Parochial schools (*parafialni shkoly*). Elementary schools that existed in Ukraine in various forms from the 11th century until the 1917 Revolution. They were founded and operated by the church at the parish level.

The instructors at these schools were usually *precentors. The enrollment was made up of children of peasant and other lower classes. The curriculum was rudimentary, with emphasis placed on catechism, Church Slavonic reading and works, and church music.

Parochial schools were the principal educational institutions in Ukraine in the 15th to 18th centuries. In Left-Bank Ukraine in the first half of the 18th century, they existed in almost every parish and educated adults as well as children. In 1740–7 a total of 766 schools (most of them parochial) existed in seven Hetmanate regions, which consisted of 1,099 villages, towns, and cities. In 1738, 129 schools existed in *Slobidska Ukraine. In Polish-controlled Right-Bank Ukraine there were fewer of the so-called Ruthenian church schools than in the Hetmanate.

Toward the end of the 18th and the beginning of the 19th century centralization and Russification resulted in a decrease in the number of parochial schools in eastern and central Ukraine. With Alexander I's 1804 school reform they came under official supervision and were formally designated *parafialni shkoly*. A number of one-class parochial schools were opened. In 1828 a second statute called for the foundation of two-class parochial schools in larger cities. The system was thus a three-tiered one: there were basic parochial grammar schools, with 1 year of instruction; one-class schools, with 2–3 years of instruction; and two-class schools, with 4–5 years of instruction. The system of centrally administered parochial schools was ineffective. By 1835 the number of formal parochial schools in Russian-ruled Ukraine was down to 100. Children were more likely to be educated through private, informal arrangements made with local clerics.

The number of parochial schools increased considerably with the emancipation of the serfs and following an 1864 statute which made parochial schools an official type of elementary education. In 1884 and 1896, parochial schools were granted additional rights and were redesignated parochial schools (*tserkovno-parafialni shkoly* or *tserkovno-prykhodski shkoly*). Nevertheless parochial schools were not particularly successful in comparison with other schools, especially in zemstvo gubernias, where the local authorities organized the popular *zemstvo schools. In 1893, in six zemstvo gubernias in Ukraine, parochial schools accounted for only 25 percent of all elementary schools and taught only 14.6 percent of the children in the region. In contrast, in Volhynia, Kiev, and Podilia (non-zemstvo gubernias), 69 percent of elementary schools were parochial, and 64 percent of students attended them. In 1897, parochial schools accounted for 55 percent of all elementary schools in Russian-ruled

Ukraine. Almost half of the school day was devoted to religious instruction at the schools. In 1908, as part of the progressive educational policies adopted after the *Revolution of 1905, general education schools were opened, and the number of parochial schools declined. In 1911 the Kiev school district, which contained five gubernias, had 6,628 parochial schools, or 59.6 percent of the total number of schools in the region. In 1917, parochial schools were reorganized into secular elementary schools.

In Austrian-ruled Galicia and Bukovyna the number of parochial schools began to increase with the introduction of Joseph II's educational reforms. In 1821 there were 1,226 schools in Western Ukraine, of which 834 (68 percent) were parochial. In 1863, parochial schools were reorganized into secular elementary public schools.

In Transcarpathia there were many parochial schools in the late 18th and early 19th centuries: in 1793 there were almost 300 in the region. Later, Hungarian educational policy resulted in a steady decrease in the number of parochial schools: by 1907, 107 of them remained, and by 1918, only 34 were still operating. The language of instruction was Hungarian, Ukrainian being taught only as a subject. In Carpathian Ukraine under Czechoslovakia, very few parochial schools existed. There were more parochial schools in the Prešov region, and they continued to operate until 1948.

Since 19 January 1919, in accordance with article 7 of the Constitution of the USSR, all education in Soviet Ukraine was secular. (See *Secular schools.)

N. Freeland

Parody (from Greek *para* 'against' and *ode* 'song'; hence, a 'song in reverse'). A literary genre based on a humorous-satiric imitation of the content or style of a given literary work, or works, of one author or of a whole literary school, usually with the intention of emphasizing the most negative features in form or content of the work thus parodied. Parody was known in ancient Greece (Hippoxanax, Aristophanes) and reappeared in European literature during the Middle Ages (various parodies of church liturgies, the poetry of the troubadours). The oldest examples of parody in Ukrainian literature can be found in folk literature (the first mention of it occurs in the manuscript compilation of a certain Kondratsky, ca 1684). In Ukrainian literature parody was codified by H. Konytsky in his *Praecepta de arte poetica* (1746) as a literary mode for serious replication of a given work (the model being T. Prokopovych's 'Elegia Alexii' [1698]), although in practice it already had its present-day meaning in the works of the wandering *precentors, especially in the parodying of church services and folk songs and dumas.

In modern Ukrainian literature parody appears in I. Kotliarevsky's *Eneida* (Aeneid), although the work as a whole belongs to the *burlesque tradition, and in *Natalka Poltavka* (Natalka from Poltava, 1819), especially in the masterful parody of 'learned' speech in the part of the character Vozny. Of the numerous epigones of Kotliarevsky mention must be made of K. Dumytrashko's *Zhabomyshodrakivka* (Frog Mouse Fight, 1847-59), itself a parody-travesty of the ancient Greek parody *Batrachomyomachia*. Owing to the various prohibitions on the development of Ukrainian literature, however, parody could not develop fully during the 19th century. It appeared again toward the end of the 19th and in the early 20th cen-

tury in works of authors such as I. Franko (parodies of I. Hushalevych, M. Ustyianovych), V. Samiilenko, M. Cherniavsky, I. Nechui-Levytsky, and O. Lutsky (parodies of Franko), and in parodies of the works of such modernist poets as P. Karmansky, M. Vorony, and V. Pachovsky (in the journals *Komar* and *Zerkalo*). Parody developed markedly in the 1920s, during which there was a general escalation of literary activity. It was found especially useful in the intensified struggle for hegemony among various literary groups. K. *Burevii was probably the most outstanding parodist of the day. Others who deserve note were V. Blakytyni (*Vybrani satyry i baiky* [Selected Satires and Tales, 1930]), O. Vyshnia (various parodies of M. Khvylovy, H. Kosynka, V. Koriak, and others in *Chervonyi shliakh*), V. Chechviansky (*Parodii* [Parodies, 1930]), Yu. Vukhnal, V. Yaroshenko, and O. Slisarenko.

Parody declined during the terror of the 1930s and became more a forum for publicist indictments than a genre based on artistic caricature, as evidenced in such works as T. Orysiio's *Literaturni parodii, sharzhi, epihramy* (Literary Parodies, Caricatures, and Epigrams, 1932) and O. Khazin's *Literaturni parodii* (Literary Parodies, 1934). Parody became popular again in the 1950s through the works of S. Voskrekasenko, P. Slipchuk, Yu. Kruhliak, B. Chaly, O. Zholdak, M. Bilkun, and many others, but their parodies on the whole are lackluster. Notable exceptions are the parodies of Yu. Shcherbak and Yu. Ivakin. Sporadic attempts at parody have also occurred among the émigrés. Although most parodies appear in newspapers or journals, some separate collections have been published, namely T. Kurpita's *Karykatyry z literatury* (Caricatures from Literature, 1947) and Porfyrii Horotak's (joint pseudonym of Yu. Klen and L. Mosendz) *Dyabolichni parabolyy* (Diabolic Parables, 1947).

Parpura, Maksym, b ca 1763 in Konotip company, Nizhen regiment, d 23 June 1828 in Kharkiv gubernia. Cultural and educational activist. He was educated in medicine at the Kiev Academy and in St Petersburg, and he worked as a translator for the St Petersburg Medical College. From 1793 (or 1803) he was director of the college's print shop. In 1798 he published I. Kotliarevsky's *Eneida* (Aeneid) at his own cost; it was the first book printed in modern literary Ukrainian. Parpura bequeathed considerable sums to hospitals and schools and to Kharkiv University.

Parsehov, Valerii, b 23 March 1936 in Kiev. Ballet dancer and pedagogue. In 1955 he completed study at the Kiev Choreography School. In 1956 he became a soloist in the Kiev Theater of Opera and Ballet. He was the first performer of Ivan in V. Kyreiko's ballet *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors, 1961). From 1965 he taught at the Kiev Choreography School. He received the V. Nijinsky Prize (Paris, 1964).

Parsley (*Petroselinum crispum* or *P. sativum*; Ukrainian: *petrushka*). A hardy biennial herb of the carrot family Umbelliferae, forming a rosette of leaves and a root in the first year and a flower stalk and seeds in the second. Both root (var. *tuberosum*) and leaf (var. *latifolium*) parsley are used in fresh or dried form to garnish and flavor foods. All parts of parsley contain a pungent essential oil consisting primarily of apiol and pinene. The root and leaves are rich in vitamins C and A and in mineral salts. In Ukraine root or Hamburg parsley is planted preferentially over leaf parsley, and it is a staple ingredient in Ukrainian traditional *foods. In *folk medicine parsley extracts and powders were used as diuretics and carminatives.

Parsnip, garden (*Pastinaca sativa*; Ukrainian: *pasternak*). A member of the carrot family Umbelliferae, cultivated in Ukraine and throughout the world for its distinct-flavored edible root. At the end of the summer, the root consists primarily of starch. Parsnip also contains vitamins A, B, and C. It tastes sweetish and is usually served as a cooked vegetable; it is also used to flavor soups and meat and is canned for distribution. Two varieties of *P. sativa* are cultivated in Ukraine. Two wild species of parsnip are found growing in pastures, along roads, and in gardens as weeds.

Partenit. A medieval Greek town on the southern coast of the Crimea at the site of present-day Frunzenske, 16 km from Alushta. The settlement is mentioned in Gothic, Khazar, and Arabic documents of the 8th to 12th centuries. In the 8th century a large three-nave stone basilica was built there. It was destroyed by fire in the 10th century, and it was rebuilt in 1427 and destroyed by the Turks in 1479. Its ruins were excavated in 1871 and 1907.

Parties, political. Political parties in Ukraine have reflected the complexity of the country's social and ethnic stratification. Major nationalities, such as the Ukrainians, Russians, Poles, and Jews, have organized their own political parties. The influence of the national idea was strong enough to fragment even the proletarian movement along national lines.

The basic difference between Ukrainian and national-minority parties in Ukraine lay in their attitude toward self-determination. Whereas Ukrainian parties emphasized national liberation as the first step toward the solution of other problems, the minority parties tended to oppose it or to ignore the issue. Russian parties acted in unison as custodians of Russian imperial interests and opposed Ukraine's separation from Russia. Polish political parties recognized in principle the demand for an independent Ukraine. Almost all Jewish political parties supported the idea of an autonomous Ukraine within the Russian Empire but categorically rejected demands for independence. The Russian Communist Party (Bolshevik) and its instrument, the CP(B)U, recognized the 'abstract right of the Ukrainian people to self-determination' but did everything to prevent its realization.

Modern Ukrainian political parties sprang from the national movement that developed in the late 19th century in reaction to national oppression. After centuries of Russification the Ukrainian national movement was preoccupied mostly with cultural renaissance and national awareness. In a sense this so-called Ukrainophile move-

ment was apolitical: beyond protesting against Russification, it raised no objection to the tsarist regime. The Old *Hromada of Kiev attracted mostly moderate intellectuals who cherished the country's romantic past but did not advocate separatism. At most they demanded autonomy for Ukraine. Yet the Hromada's contribution to the education and national awakening of the common people had a profound influence on the future political development of Ukraine.

In Russian-ruled Ukraine the first political parties sprang up only at the turn of the century. In February 1900 a clandestine political organization known as the *Revolutionary Ukrainian party (RUP) was founded in Kharkiv. That year a small *Ukrainian Socialist party (USP) emerged in Kiev, and in 1903 it merged for a brief while with the RUP. In 1902 M. Mikhnovsky formed the *Ukrainian People's party (UNP), which was the most nationalistic of the early Ukrainian parties. The leftist elements of the RUP broke away in 1904 and formed the Ukrainian Social Democratic Association, generally known as *Spilka, which accepted the position of the Russian Social Democratic Workers' party (RSDWP) vis-à-vis the nationalities and party unity. In 1905 the remaining members of the RUP renamed the party the *Ukrainian Social Democratic Workers' party (USDRP). Ideologically, the USDRP was close to the Russian Mensheviks and other social democratic parties in Western Europe. It was not a popular mass party: its social base consisted of Ukrainian workers and radical intelligentsia. It elected only two deputies in the election to the All-Russian Constituent Assembly in 1917. At the beginning of 1919 it split on the issue of independence from the RSDWP, and its leftist faction set up the USDRP (Independents), which a year later became the *Ukrainian Communist party (UKP).

At the end of 1905 the *Ukrainian Democratic Radical party (UDRP) came into being in Kiev. This was a nonsocialist, liberal party, resembling in many respects the Russian Constitutional Democrats (Kadets). It demanded constitutional monarchy, a federal system instead of an empire, and autonomy for Ukraine. Over 30 of the 40 Ukrainian deputies in the Second State Duma were Democratic Radicals. When the party disintegrated early in 1908, its moderate elements formed a clandestine nonparty organization, the *Society of Ukrainian Progressives (TUP), to combat Russian chauvinism.

Although cells of Ukrainian Socialist Revolutionaries had been active in many Ukrainian gubernias since 1905, they did not form the national party known as the *Ukrainian Party of Socialist Revolutionaries (UPSR) until April 1917. This was an agrarian party that advocated the socialization of land and autonomy for Ukraine. In the 1917 election to the All-Russian Constituent Assembly the UPSR won over 45 percent of the votes in Ukraine. It had the largest caucus in the Central Rada and played a leading role in the General Secretariat and the Council of Ministers of the UNR. At its secret congress in May 1918, the party split, and it was dissolved soon afterward. Its left wing formed the *Borotbists in March 1919; its right and center wings restored the UPSR. The small *Ukrainian Labor party (est October 1917) was close to the UPSR ideologically.

The *Ukrainian Party of Socialists-Federalists (UPSF) was founded in April 1917 by members of the TUP, and built on the program of the earlier UDRP. Its members held important portfolios in the General Secretariat and the

UNR Council of Ministers. The *Ukrainian Party of Socialists-Independentists (UPSS), established in Kiev in December 1917, was composed mainly of Ukrainian military officers and former members of the Ukrainian People's party. The *Ukrainian People's Republican party (est 1918) was antisocialist and a major supporter of V. Oskilko's attempted coup in Rivne on 29 April 1919. On the conservative side the former members of the Old Hromada of Kiev organized the *Ukrainian Federative Democratic party at the end of 1917. The *Ukrainian Democratic Agrarian party (UDKhP), established in Lubni in June 1917, was perhaps the most conservative of all Ukrainian parties. It supported the Hetman coup against the Central Rada but later became critical of P. Skoropadsky's regime.

The chief Russian political parties active in Ukraine in the early part of the 20th century were the Russian Party of *Socialist Revolutionaries, which ideologically resembled its mother party in Russia and differed from it only administratively; the *Russian Social Democratic Workers' party (or Mensheviks), which was the Ukrainian section of the all-Russian Menshevik party and shared its ideological position; the Russian People's Socialists, which represented petit-bourgeois groups with a liberal democratic ideology but had very little influence; the *Constitutional Democratic party (or Kadets), whose ideology and social base were the same as those of P. Miliukov's All-Russian party; and the Bloc of the Nonpartisan Russians, which was a coalition of Russian monarchists and reactionary chauvinists. The Communist Party (Bolshevik) of Ukraine (est 1918) was not an independent political entity but a branch of the single Russian Communist Party (Bolshevik).

The UNR was the first state in modern times to recognize and implement *national-personal autonomy. Hence, representatives of Jewish and Polish parties were admitted to the Central Rada and the General Secretariat. The General Jewish Workers' Union, or *Bund, which had 175 local organizations in Ukraine, supported Ukrainian autonomy but not independence. The United Jewish Socialist party belonged to the socialist revolutionary bloc but disagreed with the Russian Party of Socialist Revolutionaries on the nationality question and supported Ukrainian autonomy. After a split in 1918, its left wing joined the Bund in forming the Jewish Communist Union. The Jewish Social Democratic Workers' party, or *Poale Zion, was the smallest and most conservative socialist group. The most conservative and nationalistic Jewish party, the Zionist party, which promoted the idea of a separate autonomous Jewish territory, co-operated with the Central Rada.

The Polish minority resembled the Russian. Conservative elements of the landed aristocracy could not accept the idea that the Ukrainian 'peasants' were an independent nation. Polish moderates regarded Ukrainians as natural allies against Russian imperialism. The Polish Socialist Party (Center) was the equivalent of the Russian Mensheviks and the Ukrainian Social Democrats. It supported an independent Ukrainian republic. The Polish Socialist Party (Left) differed from the Russian Social Democratic Workers' party only on the national question. It supported independent Polish and Ukrainian republics. The Polish Democratic Center party represented Polish landowners in Ukraine and opposed the agrarian policy of the Rada. Favoring an independent Poland, it wavered on Ukrainian self-determination.

In Russia political parties ceased to exist with V. Lenin's dispersal of the Constituent Assembly on 5 January 1918. In Ukraine they disappeared in the early 1920s with the final victory of the Red Army.

In Austrian-held Ukrainian territories – Galicia and Bukovyna – Ukrainians began to organize their own political parties at the end of 19th century. The first political party in the full sense of the term was the *Ukrainian Radical party (URP), founded in Lviv in 1890. By 1895 three political trends had emerged in the party: a socialist-populist, a Marxist-socialist, and a radical-populist trend. When the groups associated with the latter two trends broke away in 1899 and formed their own parties, the *Ukrainian Social Democratic party (USDP) and the *National Democratic party (NDP), the URP became a peasants' party. At first the USDP was merely a branch of the Austrian Social Democratic party and won little support among Ukrainian voters. The NDP, with its emphasis on national unity and independence, quickly became the dominant party in Galician and Bukovynian political life. In 1918 it played the leading role in building an independent Ukrainian state. At its congress in Stanyslaviv in April 1919, the NDP changed its name to the *Ukrainian Labor party. The URP was the second-strongest Ukrainian party in Galicia before the war. In 1918 it took part in the Ukrainian National Rada.

After the downfall of the Western Ukrainian National Republic, the Ukrainians in Galicia continued the struggle for independence by political means. Their political parties played an important role in raising political consciousness and defending the constitutional rights of Ukrainians against the Polish authorities. The URP refused to co-operate with the USDP because of its pro-Soviet policy, and condemned the imperialist attitude of the Bolshevik party toward Ukraine. In 1926 a group of Socialist Revolutionaries from Volhynia joined the URP, and the party changed its name to the Ukrainian Socialist Radical party. The Ukrainian Labor party split into three factions in 1923, one of which formed the *Ukrainian Party of National Work. The three reached an agreement in 1925 and together set up the *Ukrainian National Democratic Alliance (UNDO), which continued the program of the NDP. It assumed the leading position in Galician political life and expanded its network into Volhynia. A group of Sovietophiles resigned from the alliance and formed the *Ukrainian Party of Labor in 1927. When UNDO's policy of *Normalization was discredited by the behavior of the Polish authorities, some of its members left, and in 1933 they set up the *Front of National Unity, which rejected Normalization on the one hand and the revolutionary terror of the OUN on the other. The *Ukrainian Agrarian party (est 1922) lost popular support because of its appeasement policy, and soon disappeared. Another party that advocated loyalty to the Polish state was the *Ukrainian Catholic People's party. Its constituency was limited to Stanyslaviv eparchy, and its political influence was insignificant. The socialist end of the Ukrainian political spectrum was represented by *Sel-Soiuz (est 1924), which was active in Volhynia and the Kholm region, and the Marxist *People's Will party (est 1923), which was active in Galicia. In 1926 the two parties merged to form the *Sel-Rob, which acted as the legal front of the *Communist Party of Western Ukraine (KPZU). Because of its close ties with the CP(B)U, the KPZU enjoyed an autonomous status within the

Communist Party of Poland. In 1927 the party split, and the majority faction defending O. Shumsky was expelled from the Comintern. The KPZU leadership was subjected to several purges in the 1930s, and the party was dissolved in 1938. In its struggle for independence the OUN rejected lawful political methods as ineffectual and regarded itself as a movement above the ordinary political parties. As extremism and political violence rose throughout Europe and particularly in Poland, its renunciation of parliamentary democracy and law-governed political competition seemed justified.

The non-Ukrainian parties with a significant constituency in Galicia during the interwar period were the Polish Socialist party, the Polish Popular Party–Liberation, the Radical Peasant party, the Peasant Alliance, the Polish Popular Party–Piast, the Christian Democrats, the Popular National Union, the Jewish Bund, and the Jewish Popular Union.

Some of the parties active in Ukraine during the liberation struggle (1917–20) resumed their activities abroad. The Ukrainian Radical Democratic party was the main supporter of the UNR *Government-in-exile during the interwar period. The USDRP recognized the government but refused to participate in it; the UPSR and the *Ukrainian Union of Agrarians-Statists, which was founded in Vienna in 1920, withheld recognition. After the Second World War the government-in-exile set up the *Ukrainian National Council, a quasi-parliament, in which the older émigré parties, such as the UPSR and USDRP, were joined by parties that had been active in Ukraine during the interwar and the war period, such as the UNDO and the two OUN factions, or had sprung up recently outside Ukraine (the *Ukrainian National-State Union, the *Ukrainian Revolutionary Democratic party, the *Union of Lands of United Ukraine, the Ukrainian Peasant party, the *Ukrainian Socialist party, and the OUN [Abroad]).

In Soviet Ukraine political parties other than the CPSU were banned by the constitution and severely suppressed. A few small clandestine groups, such as the *Ukrainian Workers' and Peasants' Union, tried to form alternative political parties but managed at most to draft a party program before they were uncovered and arrested. It was only after the election of a number of former dissidents to the Supreme Soviet of the Ukrainian SSR (March 1990) and the lifting of the CPSU's monopoly on political power (early 1990) that new parties began to proliferate in Ukraine. Within a year over a dozen parties had held their founding conventions: the Ukrainian Republican party (UREP), the Republican Party of Ukraine, the Ukrainian National party, the Democratic Party of Ukraine (DPU), the Social Democratic Party of Ukraine, the United Social Democratic Party of Ukraine, the Ukrainian Christian Democratic party, the Party of the Democratic Rebirth of Ukraine, the Ukrainian Popular Democratic party, the Ukrainian Party of Democratic Consensus, the Ukrainian Peasant Association, the Ukrainian Peasant Democratic party (UPDP), the Popular Party of Ukraine, the Green Party of Ukraine (PZU), the Liberal Democratic Party of Ukraine, and the Party of Slavic Rebirth. By the end of June 1991 only four of them – the UREP, DPU, UPDP, and PZU – had been legally registered.

Partisan movement in Ukraine, 1918–22. As government and public order in the Russian Empire dissolved after the February Revolution, a host of partisan groups sprang up in Ukraine. Differing in size and political orientation, they never formed a unified force behind a single leader or program and often switched their support from one to another of the major contenders for control of Ukraine. Formed mostly from among the Ukrainian peasantry, the movement defended the broad social and political goals of the revolution and sided increasingly with the national aspirations of the Ukrainian people. After the defeat of the UNR Army, the partisan movement became the chief opponent of Bolshevik power in Ukraine.

The first partisan groups were formed in 1917 in the Kiev region to defend the local population from roving bands of soldiers returning from the front. The peasant brigades that arose from some of these groups, such as the Tarashcha, Zvenyhorod, and Uman brigades, took part in resisting the Bolshevik offensive on Kiev in January–February 1918. Maintaining contact with army units loyal to the Central Rada, these brigades operated in the rear of the Bolshevik forces until April.

During 1918 numerous peasant revolts broke out against the German occupational authorities and the Hetman government in Ukraine. The peasants reacted with violence to forced food requisitions and the return of estates to their former owners. The largest rebellion flared up in the summer in the southern part of Kiev gubernia (Tarashcha, Zvenyhorod, Skvyra, Uman, and Kaniv counties) and was put down only with the help of a German corps (see *Tarashcha uprising). Some partisan operations against the Hetman were instigated by Bolshevik agitators, but they failed to attract wide peasant support. In November–December over 100,000 peasant partisans took part in the overthrow of the Hetman government, which was organized by the *Ukrainian National Union.

The partisan movement in Ukraine grew rapidly in 1919. Some partisan units reached sufficient strength to have a decisive influence on the struggle for power among the main protagonists. N. *Hryhoriiv's support of the Red Army in February–April was a key factor in its successful offensive against the Whites and the Allies in southern Ukraine. D. *Zeleny's revolt against the Directory of the UNR impaired its control of the Kiev, Chernihiv, and Poltava regions. N. *Makhno, who established a brief and uneasy alliance with the Bolsheviks in March, inflicted six months later a harsh defeat on A. Denikin's army, which forced the Whites to abandon their planned offensive on Moscow and to retreat before the Red Army. At the height of his power Makhno commanded a force of 40,000 men and controlled about a third of Ukraine's present territory.

The Bolshevik occupation of Ukraine met with considerable popular resistance in March–June 1919. Heavy

requisition of food destined for Russia, Cheka terror, and the Bolshevik land policy provoked widespread revolts. Later, Bolshevik leaders admitted the extent of partisan opposition: according to Kh. Rakovsky, between 1 April and 15 June there were 328 anti-Bolshevik revolts in Ukraine, and according to V. Antonov-Ovsienko, in April and May peasant unrest in Kiev, Chernihiv, Podilia, and Volhynia gubernias tied down 21,000 Red Army troops. Large anti-Bolshevik detachments were led by otamans, such as A. *Volynets, I. Romashko, and P. Sokolovsky. Many of the instigators of the peasant unrest were Socialist Revolutionaries (SRs) and Social Democrats (Independentists), who wanted an independent socialist Ukrainian republic. In April these parties established in Skvyra the *All-Ukrainian Revolutionary Committee, the Supreme Insurgent Council, and the Supreme Insurgent Staff to co-ordinate the anti-Bolshevik insurrection. The committee was dissolved in July to allow the Bolsheviks to concentrate their forces against Denikin's offensive. Many of the committee's insurgent groups transferred their support to the UNR Army. A regiment of Hryhoriiv's partisans (3,600 men) after his death broke through the Bolshevik front and under Yu. Tiutiunnyk's command formed the Kiev Group of the UNR Army. In September, Otaman Zeleny recognized the authority of the Directory. At the beginning of the month the UNR government set up in Kamianets-Podilskyi the Central Ukrainian Insurgent Committee to co-ordinate partisan activity. The committee was chaired by N. *Petrenko and supported by the SRs, the Ukrainian Social Democratic Workers' party, and the Peasant Association.

In the summer and fall of 1919, as Bolshevik power in Ukraine declined, the partisan movement turned against Denikin's forces, which occupied the territories abandoned by the Bolsheviks. The reactionary social policies of the Whites, their exploitation of the peasants, and their repression of Ukrainian activists provoked spontaneous and uncoordinated mass insurrection. Some of the partisan bands were organized by the Bolsheviks or their sympathizers. The larger and more powerful groups were led by Zeleny, A. *Huly-Hulenko, and Makhno. Partisan activity in his rear undermined Denikin's offensive and enabled the Red Army to score a decisive blow against him at the end of 1919.

The re-established Bolshevik regime was regarded as foreign by most of the population and encountered strong resistance. Generally, the countryside was controlled by partisan bands, and Soviet power remained confined to the towns. During its First Winter Campaign (December 1919–May 1920) the UNR Army tried to unite the various partisan groups in a common uprising against the Bolsheviks. It made contact with Otaman Chuchupaka's forces in Kholodnyi Yar, Otaman Zabolotny's detachments at Balta, and the larger, well-disciplined units of Huly-Hulenko in the Yelysavethrad region. There were many other sizable bands besides these, including A. Bondarenko's in the Zvenyhorodka region, Kuzmenko-Tytarenko's around Tarashcha, F. Meleshko's around Yelysavethrad, and I. Sokil's near Cherkasy. In the summer of 1920 the Cheka chief F. Dzerzhinsky was sent from Moscow with 6,000 special Cheka troops to deal with the partisan problem. In Kiev gubernia there were 11 peasant revolts in June, 51 in July, and 106 in August, and in Poltava gubernia there were 76, 99, and 98, respectively. V. Lenin admitted as late as October 1920 that Soviet control of Ukraine was formal rather than real.

At the beginning of 1921 there were about 40,000 partisans in Ukraine. The largest force was Makhno's in southern Ukraine, but several bands numbered 500 or more men: those under Struk, Sirko, and Mordalevych (in Kiev gubernia), Loshyn (Chernihiv gubernia), Tiutiunnyk (Volhynia gubernia), Holub (Podilia), Shuba (Poltava gubernia), and Burlaka and Siroshapka (Kharkiv gubernia). In March 1921 the Bolshevik regime offered amnesty to insurgents who surrendered voluntarily. By September 1922, 200 otamans and 10,000 men had surrendered. With the suspension of Soviet-Polish hostilities and the defeat of P. Wrangel's army, the Bolsheviks redirected their forces in early 1921 against the partisan movement. Using M. Frunze's tactics of ruthless executions, they launched a wide clearing campaign. In 87 operations during April and May they reportedly killed 5,000 and captured 4,200 partisans, and destroyed 28 bands. In June they eliminated the All-Ukrainian Insurgent Committee headed by Bondarenko in the Bratslav region and the Ukrainian Central Insurgent Committee headed by I. Andruk in Kiev. By the end of the summer the main partisan groups were crushed, although small, sporadic revolts continued to break out. The UNR government's last attempt to spark a general insurrection against the Bolshevik regime – the Second Winter Campaign, led by Yu. Tiutiunnyk in October and November 1921 – ended tragically, with the execution of 359 soldiers at Bazar.

The partisan movement in Ukraine demonstrated the deep hostility of the Ukrainian peasantry to any foreign invader and particularly to the Bolshevik regime. It also made the Soviet rulers permanently suspicious about Ukraine's loyalty.

Party and state control. A set of institutions and organs in the USSR that oversaw the work of institutions, enterprises, and collective and state farms to ensure compliance with Party and state directives. Generally they were all-Union bodies directed by the central Party and state authorities in Moscow.

The first control agency for enforcing Party discipline and fighting bureaucratism and administrative wrongdoing was established in 1920. Initially called the Worker-Peasant Inspectorate, it was set up as a government body under the All-Russian Congress of Soviets. Its Ukrainian section was created in February 1920. Both were reorganized into people's commissariats later that year. In 1921 the Central Control Commission of the Russian Commu-

nist Party (Bolshevik) was set up, and two years later the state and Party agencies were merged into one people's commissariat, which came under the joint control of the Ukrainian and All-Union councils of people's commissars. In 1934 the commissariat was again split into two bodies: the first became the Commission of Party Control under the CC of the All-Union Communist Party (Bolshevik), and the second became the Commission of Soviet Control under the Council of People's Commissars, then a people's commissariat, and finally the Ministry of State Control. In 1952 the Commission of Party Control was renamed the Committee of Party Control. All of these organs played an important role in the periodic purges of the Party and government under J. Stalin's regime.

In the major reforms of 1962 a single body – the Committee of Party-State Control under the CC CPSU and the USSR Council of Ministers – was formed again to monitor both Party and state activities. It was short-lived, however, for in 1965 the two functions were split up between the Committee of People's Control under the Council of Ministers and the Committee of Party Control under the CC CPSU. The division of roles continued to 1991. The Committee of People's Control, which had bureaus in every republic, oblast, raion, and city and in most villages, was supposed to promote popular participation in government and the accountability of the state bureaucracy; in practice, however, its work had the opposite result.

Omelian Partytsky

Partytsky, Omelian [Partyc'kyj, Omeljan], b 1840 in Teisariv, Stryi circle, Galicia, d 20 January 1895 in Lviv. Linguist, ethnographer, historian, educator, and civic figure. After graduating from Lviv University (1864) he taught at the Ternopil gymnasium (1864–8), the Academic Gymnasium of Lviv (1868–71), and the Lviv Teachers' Seminary (1871–95). An ardent supporter of the national populist movement, Partytsky was an executive member of the Prosvita society, editor of its calendars and books, a writer of textbooks in language and literature, and an editor of newspapers, including *Hazeta shkol'na* (1875–9) and *Zoria* (1880–5). He compiled a substantive German-Ruthe-

nian dictionary (1867), translated **Slovo o polku Ihorevi* (1884), and wrote *Starynna istoriia Halychyny* (The Ancient History of Galicia, 1894).

Pashchenko, Dmytro [Paščenko], b 1759, d 1809. Administrator and historian. He worked as a chancellor in Hadiache regiment (from 1774) and for the Little Russian Collegium (from 1777) and became a member of the commission conducting an imperial survey and census of the Hetmanate. He wrote *Opisanie Chernigovskogo namestnichestva* (A Description of Chernihiv Viceregency, 1779–81; parts of it were published by A. Lazarevsky in 1868). Pashchenko later served as a regimental scribe (1783) and as a court chamberlain in Horodnia county, Chernihiv gubernia (from 1802).

Oleksandr Pashchenko: *Flood on the Dnieper: Trukhaniv Island* (color linocut, 1937)

Pashchenko, Oleksandr [Paščenko], b 14 September 1906 in Luka, Bratslav county, Podilia gubernia, d 13 June 1963 in Kiev. Printmaker; corresponding member of the USSR Academy of Art from 1954. As an art student he belonged to the Union of Young Artists of Ukraine. A graduate of the Kiev State Art Institute (1932), he later served as professor (1947–63) and rector (1955–63) there. He worked mostly in color linocut, etching, and watercolor and produced print series such as 'Kiev Suite' (1936–60), 'Kiev' (1944–5), 'Kievan Cave Monastery' (1944–5), 'Reconstruction of the Dnieper Hydroelectric Station' (1945–6), and 'Kiev-Dnieper' (1951) and *With Metallurgists of the Dnieper Region* (1952). Monographs about him have been written by L. Vladych (1957) and P. Hovdia (1964).

Pashchenko, Oleksandr [Paščenko], b 12 April 1929 in Lohvytsia, Romen okruha, d 1990. Technological chemist; AN URSS (now ANU) corresponding member from 1976. After graduating from the Kiev Technological Institute of Silicates (1954) he joined the Kiev Polytechnical Institute and served there as a department chairman (from 1970) and as prorector (1971–4). His research dealt with the theoretical and practical aspects of the synthesis and curing of cements and with problems of formation and stability in organic element-based coatings. He developed many high-performance adhesives derived from organosilicon and other resins.

Pashchenko-Shulminska, Olimpiia [Paščenko-Šul'mins'ka, Olimpija], b 1879 in Serby, Mohyliv county, Podilia gubernia, d 10 September 1972 in Lviv. Educator and civic leader. She completed her pedagogical training in Tbilisi. She worked there as a teacher, volunteered as a nurse in Manchuria during the Russo-Japanese War, and in 1909 returned to Kamianets-Podilskyi, where she gained a reputation as an educator. During the period 1917–18 she headed the city's school council, and in April 1917 she was delegated to the All-Ukrainian National Congress in Kiev, where she was elected to the Central Rada. In 1919 she was one of the founders of the Kamianets-Podilskyi Ukrainian State University. In the interwar period she lived in western Volhynia, and after the Second World War she moved to Lviv.

Andrii Pashchuk

Pashchuk, Andrii [Paščuk, Andrij], b 1891, d ? Civic and political leader in western Volhynia. In 1918 he served as the first president of the Prosvita branch in Lutske. A member of the Ukrainian Social Democratic party, he was elected to the Polish Sejm in 1922. Two years later he left the Ukrainian caucus to join the communist one, and in 1928 he moved to Soviet Ukraine. There he was arrested in 1933. He disappeared in a prison camp.

Stefaniia Pashkevych

Mytrofan Pasichnyk

Pashkevych, Stefaniia [Paškevyč, Stefanija], b 3 November 1889 in Sambir, Galicia, d 11 October 1953 in Lviv. Educator and geographer. She graduated from Lviv University in 1913 and then taught geography at a teachers' seminary and a primary school in Lviv. She was also an organizer of the Plast Ukrainian Youth Association and a

coeditor of the daily *Vpered* (1918–22) and the magazine *Nasha meta* (1919–22). An associate of the mathematics and science section of the Shevchenko Scientific Society, she contributed a chapter on Ukraine's landscapes to V. Kubijovyč's *Heohrafiia Ukraïny i sumezhnykh zemel'* (A Geography of Ukraine and Adjacent Lands, 1938). When the Soviets occupied Galicia in 1939, Pashkevych was deported to Siberia (1941–5). Upon returning to Lviv she lectured at the university and wrote a number of morphological studies of Western Ukraine.

Pashkivsky, Roman [Paškivs'kyj], b 1898 in Borshchiv county, Galicia, d 17 August 1971 in Montreal, Canada. Journalist. A former officer in the UNR Army in interwar Lviv, he coedited *Svoboda*, the organ of the Ukrainian National Democratic Alliance (1922–39), *Zyz* (1923–33), and *Komar* (1935–9), and edited the humor magazine *Zhorna* (1933–4). He also organized the first Ukrainian-language radio broadcasts in Lviv.

Pashkovsky, Ivan [Paškovs'kyj], b and d ? A middle to late 18th-century poet and priest in the Ternopil region. He wrote Christmas carols ('Kheruvymy sviat' [Cherubims Holy] was particularly popular in Galicia at one time), religious songs (published in the collection **Bohohlasnyk*), and acrostics and secular songs in which rural poverty and the peasants' plight are commented upon.

Pashuk, Andrii [Pašuk, Andrij], b 30 May 1927 in Skoryky, Zbarazh county, Galicia. Philosopher. Since graduating from Lviv University (1950) he has taught philosophy there; he became a candidate of sciences in 1954 and a doctor of philosophy in 1967. A specialist in the history of philosophy, particularly in Ukraine, he is the author of books on S. Podolynsky (1965), the problems of social development in the ideology of the revolutionary democrats in Ukraine (1982), and I. Vyshensky (1990).

Pasichnyk, Mytrofan [Pasičnyk], b 17 June 1912 in Zhyrkivka, Kostiantynohrad county, Poltava gubernia. Physicist; full member of the AN URSR (now ANU) since 1961. He graduated from the Poltava Institute of Social Education (1931) and studied at the ANU Institute of Physics (1932–5), where he worked during 1935–40 and 1946–70 (1949–65 as director). He was head of the physics chair at the Kiev Medical Institute (1938–40) and Chernivtsi University (1940–1), and the chair of nuclear physics at Kiev University (1947–61). He was the founder and first director (1970–3) of the ANU Institute for Nuclear Research, where he is working at present. His fields of research are physics of metals, nuclear physics, and atomic reactors. He discovered the shell effects in nuclei under intermediate- and high-energy excitation. His publications include the monographs *Pytannia neitronnoi fizyky sere-dnikh enerhii* (Problems of Middle-Energy Neutron Physics, 1962), *Neitronna fizyka* (Neutron Physics, 1969), and *Iadra i radiatsiina stiikist' konstruktsiinykh materialiv* (Nuclei and Radiation Resistance of Structural Materials, 1973).

Pasichnyk, Trokhym [Pasičnyk, Troxym], b 1896 in Podilia, d 29 June 1968 in Woonsocket, Rhode Island. Poet and teacher. As an interwar émigré (from 1921) he taught at the Ukrainian Gymnasium in Czechoslovakia. In 1951 he settled in the United States. He wrote *Po vsii Ukraïni* (Throughout All of Ukraine, 1944; 2nd edn 1957), a narra-

tive poem about the revolutionary period in Ukraine, and 'Petro Hordiienko,' an epopee in seven parts about the Ukrainian nation (only pts 1–2, *V dorozhi* [On the Road, 1944; 2nd edn 1964] and *Ridnyi homin* [A Native Echo, 1957], were published).

Pasichynsky, Sydir [Pasičyns'kyj] (Isydor), b 1853 in Krasne, Sambir circle, d 1930 in Zadilsko, Turka county, Galicia. Writer. From 1870 his articles on ethnography and many of his poems appeared in Western Ukrainian papers and journals (eg, *Lastivka*, *Uchytel'*, *Bukovyna*, *Rus'ke slovo*). His poem *Beztalannyi* (The Hapless One) was published separately in 1872.

Pasichynsky, Teodor [Pasičyns'kyj] (Pasiczynskij, Theodore), b 14 October 1916 in Nahachiv, Yavoriv county, Galicia. Civic leader. He arrived in Australia in 1949 and settled in Adelaide. In 1951 he organized the Ukrainian Community School in Adelaide. He served as head of the Australian-Ukrainian Association in South Australia (1967–77); as chairperson of the Ethnic Schools Association in South Australia, the Homin choir, and the Captive Nations Council; and as an executive member of the Ethnic Communities Council of South Australia and the Ukrainian Educational Council of Australia. He became a justice of the peace (1973) and was awarded the Order of Australia Medal in 1981.

Pasiuha, Stepan [Pasjuha], b 11 December 1862 in Velyka Pysarivka, Bohodukhiv county, Kharkiv gubernia, d 1933 in Velyka Pysarivka. Kobzar. His repertoire included the dumas about the widow and her three sons, the captives' lament, and the flight of the three brothers from Azov. In 1911–12 he gave concerts in Kiev, Poltava, Myrhorod, and other towns. His repertoire was written down by F. Kolessa. Pasiuha's students included I. Kucherenko-Kuchuhura and Ye. Movchan.

Paskevych [Paskevych] (Russian: Paskevich). A family of nobility from the Poltava region. The first to use the name was the Cossack Ivan Paskevych, the grandson of Fedir Tsalenko, a notable military fellow (1698) in Poltava regiment. In the second half of the 18th century some members of the family studied at German universities. One of them, Petro (1738–91), became a fellow of the standard in 1787 and founded the first bookstore in Poltava. Several family members attained high Russian imperial ranks. Ivan's grandson, Fedir (d 26 April 1832 in Kharkiv), was chairman of the Supreme Land Court of Voznesensk gubernia and a collegial adviser. Fedir's son Ivan (b 20 May 1782 in Poltava, d 13 February 1856 in Warsaw) was a brigadier from 1811, a division commander from 1814, commander of the First Army Corps from 1821, and adjutant general from 1825. Appointed commander in chief of the Russian forces in Poland in 1831, for his role in suppressing the Polish Insurrection of 1830–1 he received the title of prince of Warsaw and until the 1850s served as vicegerent of the Congress Kingdom of Poland, where he governed by martial law and imposed Russification. He commanded the Russian army that suppressed the 1849 revolution in Hungary. Ivan's brother Stepan (b 1785, d 21 April 1840) was a colonel from 1816 and served as vice-governor of Slobidska Ukraine (1827–31), governor of Tambov (1831–2), Kursk (1834–5), and Vladimir (1835–6) gubernias, and a member of the Council of the Ministry of

Internal Affairs (1837–40). Their brother, Yosyf (1784–1844), attained the rank of major general. Ivan's son, Fedir (1823–1903), was a lieutenant general from 1854. Another Paskevych, Kostiantyn (1790–1836), was a colonel from 1828.

A. Zhukovsky

Paskhaver, Yosyp [Pasxaver, Josyp], b 14 December 1907 in Kryve Ozero, Balta county, Podilia gubernia, d 1981 in Kiev. Statistician and economist. A graduate of the Kharkiv Institute of the National Economy (1930), he taught at the Kiev Institute of the National Economy from 1930 and was appointed to the chair of statistics in 1945. He wrote several works in statistics, including *Zakon bol'shikh chisel i zakonmernosti massovogo protsessa* (The Law of Larger Numbers and the Regularities of Mass Processes, 1966), *Balans trudovykh resursov kolkhozov* (The Balance of Collective-Farm Labor Resources, 1972), and *Serednie velichyny v statistike* (Mean Values in Statistics, 1979), and several articles on agriculture in Ukraine.

Passaic. A city (1980 pop 52,000) on the Passaic River in northern New Jersey, with a Ukrainian population (1980) of 600. Its textile industry attracted many immigrants in the 19th century, including Ukrainians from Transcarpathia and the Lemko region (from 1885) and Galicia (from 1895). The first Ukrainian organization, the St Nicholas Mutual Aid Society, was formed there in 1900. Catholic (1910) and Orthodox (1925) churches were built in the city, as well as a Ukrainian People's Home (est 1913). By 1925 approx 20 Ukrainian organizations, including branches of the four major fraternal societies, could be found in the city. In the 1930s its Ukrainian population reached 2,000. Passaic is the seat of a 'Carpatho-Ruthenian' Catholic eparchy and the site of the head office of the *Organization for the Defense of Lemkivshchyna. One of the parks in the city was named after T. Shevchenko in 1964.

Passek. A Belarusian noble family of Czech origin. The Passeks were related to Cossack *starshyna* families of the Hetman state. Bogdan Passek (d ca 1758) was a Russian member of the Hetmanate's General Military Court until 1734 and served as adviser to the governor of Belgorod gubernia (1739–42) and as its vice-governor (1742). His son, Vasyl (d 1778), served as a lieutenant colonel in Slobidska Ukraine, and his descendants lived there. One of them was Vadim *Passek. Vadim's brother Vasili (b 26 July 1816, d May 1864) lived on his estate in Izium county and in Kharkiv; he is the author of a posthumously published collection of studies on Kievan Rus' history (1870). Another brother, Diomid (b 1808, d 23 July 1845), died fighting the forces of Shamil in Dagestan with the rank of major general. The first part of his study comparing Charles XII and Peter I as military leaders was published by Vadim in his *Ocherki Rossii* (Studies of Russia, vol 4 [1840]). The archeologist Tatiana *Passek is descended from the same branch of the family.

Passek, Tatiana, b 15 August 1903 in St Petersburg, d 4 August 1968 in Moscow. Russian archeologist. Passek studied at Leningrad University, then worked at the State Academy for the History of Art and the USSR Academy of Sciences' Institute of Archeology. From 1934 she took part in or led archeological expeditions in Ukraine and Molda-

Tatiana Passek

via on sites from the Trypilian era, most notably *Kolo-myishchyna. Passek put forth a scheme for the periodization of *Trypilian culture that gained and has retained broad acceptance. Her major works include *Periodizatsiia tripol'skikh poselenii* (A Periodization of Trypilian Settlements, 1949) and *Rannezemledel'cheskie (tripol'skie) plemena Podnestrov'ia* (Early Agricultural [Trypilian] Tribes of the Dniester Region, 1961). She also published *Trypil's'ka kul'tura: Naukovo-populiarnyi narys* (Trypilian Culture: A Scholarly-Popular Survey, 1941).

Passek, Vadim, b 2 July 1808 in Tobolsk, Siberia, d 6 November 1842 in Moscow. Historian, ethnographer, and archeologist. He grew up in Siberia, where his father had been exiled. While studying at Moscow University (1826–30) he became involved with A. Herzen and N. Ogarev's revolutionary circle. He was prevented from occupying the chair of Russian history at Kharkiv University because of his links with Herzen. He settled on his family's estate in Kharkiv gubernia and did ethnographic fieldwork, as well as statistical research for the Ministry of Internal Affairs. He is the author of historical and statistical descriptions of Kharkiv gubernia and its towns (with maps, plans, and coats of arms), which were published in *Materialy dlia statistiki Rossiiskoi imperii* (vol 1, 1839), of descriptions of excavated ancient fortified settlements and kurhans in Valky and Izium counties, and of articles on Ukrainian folk songs, marriage customs, folk beliefs, and locales. In his *Putevyia zametki Vadima* (Vadim's Travel Notes, 1834) Passek expressed his Romantic attachment to Ukraine (Little Russia) and its past. He compiled and published *Ocherki Rossii* (Studies of Russia, 1838–42), which includes valuable Ukrainian ethnographic and historical contributions by I. *Sreznevsky and others. In 1839 he returned to Moscow, where he was active in Slavophile circles. Passek died prematurely of tuberculosis.

Passport system. In most democratic countries a passport is a document used for identification outside the home country. It identifies the holder by name, photograph, and date and place of birth, and sometimes also by height and color of eyes and hair. For identification within one's country a birth certificate or driver's license is sufficient. In the Soviet Union, however, there were two types of passport: one for internal use and the other for external use. The external or 'international' (*zagranichnyi*) passport was of three kinds: diplomatic, official (*sluzhebnyi*), and normal (*obshchegrazhdanskii*). The third type, which was equivalent to an ordinary passport in other countries, was

especially difficult to obtain, since Soviet authorities treated travel abroad as a privilege rather than a right. The international passport had to be handed in to the authorities on one's return from abroad.

The internal passport was issued to every Soviet citizen who had attained 16 years of age. It was uniform throughout the USSR. Printed in two languages, Russian and the language of the republic where it was issued, it listed the holder's surname, given name along with the Russian form of the patronymic, place and date of birth, nationality, children, family status, military service, and place of residence. Social status was dropped in 1974 on the pretense that the USSR had achieved social unity. Three pages of the passport were reserved for photographs taken at the ages of 16, 25, and 45.

Such passports were issued at one's place of residence by the militia (police), which maintained strict control over the system. When citizens traveled outside their area of residence, they had to register with the police in the locality they were visiting within 3 days if in a border city or area (7 days in a city elsewhere) and 30 days in a village. There were various other restrictions on free movement in the passport system. To move permanently one required a special residence permit (*propiska*) from the police. Violations of the passport system were punished by various penalties, depending on the infraction. In addition employees in state enterprises were required to carry a special work passbook or 'booklet,' which contained a complete record of one's positions, awards, dismissals, and transfers. Upon taking a job employees submitted their passbooks at the plant office and picked them up when they moved to another plant. It was a criminal offense to make false entries in the passports of employees or tenants.

Some items in the passport were not entirely accurate. Nationality, for example, was determined by that of one's parents. Children of mixed marriages could choose between the nationalities of their parents. The nationality first entered in the passport was final; no changes were allowed later. Census statistics on the national composition of the Soviet population differed from passport data. The former were based on self-identification and could vary in the course of one's life; the latter were permanent.

The internal passport system that had been in force under the tsarist regime was abolished in 1917. The Soviet system had been introduced in December 1932, at the peak of collectivization. The official justification was that it would 'protect public order and state security,' but the real purpose had been to stop peasants, particularly those on collective farms, from moving freely into the cities and towns. Peasants were not issued passports until August 1974; hence, their movement was restricted even more severely than that of passport holders. Introduced at the time of the man-made famine in Ukraine (1932–3), the passport system contributed to the destruction of the Ukrainian peasantry by reducing the peasants' chances of finding relief in the urban areas.

J. Borys

Pasta industry. A branch of the food industry that produces various forms of pasta. The first pasta factory in Ukraine and the entire Russian Empire was established in 1797 in Odessa. With a large supply of high-quality wheat in Ukraine, the industry grew quickly in the 19th century, although production methods were primitive. In the inter-

war period the Soviet government gave priority to raising the output of inexpensive, nutritious food. The output of pasta in the Ukrainian SSR increased from 79.4 million t in 1940 to 185.2 million t in 1960, 219.5 million t in 1970, 308.6 million t in 1980, and 343.5 million t in 1987. In 1979 Ukraine accounted for over 20 percent of the pasta produced in the USSR.

Pastelii, Ivan [Pastelij] (secular name: Ivan Kovach), b 27 January 1741 in Transcarpathia, d 1799 in Uzhhorod. Ukrainian Catholic priest, scholar, and writer. After being educated in Uzhhorod, Budapest, and Eger he became (1765) a professor of ethics at the Mukachiv Theological Seminary and later a parish priest in several locations throughout Transcarpathia. In 1787 he became a canon of Mukachiv eparchy and then vicar-general of the newly established Košice vicariate (later Prešov eparchy). Pastelii left a number of poems and a history of Mukachiv eparchy in manuscript.

Ivan Pasternak

Mariia Pasternak

Pasternak, Ivan, b 1876 in Pavliv, Podlachia, d 25 May 1943 in Biała Podlaska, Podlachia. Educator, civic leader, and a pioneer of the Ukrainian revival in Podlachia. He worked as a public school teacher and in 1922 was elected to the Polish Senate. He was president of the Ridna Khata society in Kholm (1923–7). During the Second World War he served as the first president of the Ukrainian Relief Committee and as chairman of the auditing committee of the Podlachian Union of Ukrainian Co-operatives in Biała Podlaska. He was murdered by Polish partisans.

Pasternak, Mariia, b 1897 in Lviv, d 26 August 1983 in Toronto. Pedagogue and expert on folk and artistic dance; wife of Ya. *Pasternak. In the 1930s she taught at the Ridna Shkola school in Lviv, was in charge of preschool education for the Ukrainianska Zakhoronka Society (1934–9), and coedited the journal *Ukrains'ke doshkilia* (1937–9). In 1941–4 she was responsible for preschool education in the Ukrainian Central Committee in Lviv. After the war she emigrated to Germany and then to Canada. She is the author of the textbook *Zainiattia v dytiachomu sadku* (Activities in the Nursery School, 1959) and of *Ukrains'ka zhinka v khoreohrafi* (The Ukrainian Woman in Choreography, 1963), as well as numerous articles on preschool education and dance.

Pasternak, Severyn, b 1899 in the Drohobych region, d ? Geologist; full member of the Shevchenko Scientific Society (NTSh) from 1934; brother of Ya. *Pasternak. He was a research associate of the NTSh's Museum of Natural History in Lviv (1927–39). Under the Soviet regime he served as director (1954–6 and 1958–60) of the paleontology department of the Natural Science Museum of the AN URSR (now ANU) in Lviv. His major research interests included the minerals of Western Ukraine and the chalk deposits of the Podilia and Volhynia regions.

Yaroslav Pasternak

Pasternak, Yaroslav, b 2 January 1892 in Khyriv, Staryi Sambir county, Galicia, d 30 November 1969 in Toronto. Archeologist; full member of the Shevchenko Scientific Society (NTSh) from 1929. He studied archeology at Lviv University (1910–14). He continued his studies and obtained a doctorate at Charles University in Prague (1922–6). He worked at the National Museum in Lviv (1913–14) and the State Archeological Institute in Prague before becoming the director of the NTSh Cultural-Historical Museum in Lviv (1928–39). He also lectured at the Lviv Theological Academy (1932–9 and 1942–4). During the first Soviet occupation of Western Ukraine (1939–41) he was a professor at Lviv University and a member of the AN URSR (now ANU) Institute of Archeology. He emigrated to Germany in 1944 before the second Soviet occupation.

While in Ukraine and Czechoslovakia Pasternak took part in over 60 archeological expeditions, the most important being in princely *Halych (1939–41). He published three studies about the prehistory of Western Ukraine – *Ruské Karpaty v archeologii* (The Archeology of the Ruthenian Carpathians, 1928, based on his diss [in Czech]), *Korotka arkheolohiia zakhidno-ukrains'kykh zemel'* (A Brief Survey of Western Ukrainian Archeology, 1932), and *Staryi Halych: arkheolohichno-istorychni doslidy u 1850–1943 rr.* (Old Halych: Archeological-Historical Studies in 1850–1943, 1944) – and numerous scholarly and popular articles in Ukrainian, Czech, German, and Polish.

In Germany he lectured at Friedrich Wilhelm University in Bonn (1946–9) and the Ukrainian Free University in Munich. He emigrated to Canada in 1950, where he remained active in scholarship and publishing. His major undertaking there was a survey, *Arkheolohiia Ukrainy* (The Archeology of Ukraine, 1961), in which he wished to provide a synthesis of the archeology of Ukraine to date and to challenge Soviet (and Western) interpretations in the field. A complete bibliography of his works by I. Luchkiv, listing 290 titles in archeology, regional studies, history, ethnography, and museum studies, appeared in *Iuvileinyi zbirnyk*

naukovykh prats' z nahody storichchia NTSh i dvadtsiatypiatyrychchia NTSh u Kanadi (Jubilee Collection of Scholarly Works on the Occasion of the 100th Anniversary of NTSh and the 25th Anniversary of NTSh in Canada, 1977).

Pasternak, Yevhen, b 24 January 1907 in Vyhnanka, Biła Podlaska county, Podlachia, d 22 November 1980 in Toronto. Community leader and historian; son of I. *Pasternak and husband of Ye. *Pasternak. He graduated from the Danzig Polytechnic (1937) and worked as a civil engineer in Lviv and Lublin. During the Second World War he headed the Union of Ukrainian Co-operatives in Podlachia and the Ukrainian Relief Committee in Biła Podlaska. In 1948 Pasternak emigrated as a refugee from Germany to Toronto. He was a founding member of the Society of Ukrainian Engineers and Associates in Canada and served as its president, cofounded and built the Ivan Franko Ukrainian Home for the Aged in Toronto, contributed to the Ukrainian émigré press, and wrote a history of the Kholm region and Podlachia (1969) and a book on Ukraine under Bolshevik rule (1980).

Yevheniia Pasternak

Pasternak, Yevheniia (née Novakivska), b 8 January 1919 in Fashchivka, Skalat county, Galicia. Administrator. After obtaining a teacher's degree in Lviv (1938) she taught art and music and obtained an administration degree at McMaster University (1971; she had emigrated to Canada in 1948). Since 1964 she has served as director of the Ivan Franko Ukrainian Home for the Aged in Toronto. In 1984 she received the Order of Canada, and in 1987 she was appointed deputy director general of the International Biographical Centre in Cambridge, England.

Pasteur station. The common name for a bacteriological station for the prevention of rabies. Pasteur stations inoculate patients who have been bitten by rabid animals, and undertake measures to reduce rabies among animals, improve sanitary conditions, and educate the public about rabies. The first Pasteur station in Ukraine, second in the world only to the one in Paris, was set up by I. Mechnikov and M. *Hamaliia in Odessa in 1886. It was the only facility that prepared the antirabies vaccine. By the First World War there was a Pasteur station in every gubernia capital in Ukraine. Today there is a network of Pasteur stations and Pasteur depots at therapeutic-prophylactic and sanitary institutions in the cities and raion centers of Ukraine. Some *sanitary-epidemiological stations have special Pasteur departments.

Pastrnek, František, b 4 October 1853 in Kelč, Moravia, d 17 February 1940 in Prague. Czech Slavic philologist; member of the Shevchenko and Bohemian scientific societies and corresponding member of the Russian and Bulgarian academies of sciences. He studied at Vienna University (1873–8; PH.D., 1886) under F. Miklosich and V. Jagić and taught there (1888–1902) and at Prague University (from 1902). In Czech scholarly periodicals he published articles in the fields of Church Slavonic and Slovak linguistic history and dialectology. He wrote a history of SS Cyril and Methodius (1902) and a monograph on Church Slavonic (2 vols, 1909, 1912) and engaged in a polemic with V. *Hnatiuk regarding the nationality of the 'Ruthenians' of the Prešov and Bačka regions.

Pastur, Leonid, b 21 August 1937 in Udych, in Teplyk raion, Vinnytsia oblast. Mathematician; full member of the ANU (formerly AN URSR) since 1991. Since graduating from the Kharkiv Polytechnical Institute (1961) he has worked at the ANU Physical-Technical Institute of Low Temperatures in Kharkiv and taught at Kharkiv University. Pastur's major work is in the spectral theory of operators. He is one of the founders of the spectral theory of differential and finite-difference operators with random and almost periodic coefficients. His abstract results have been applied in optics, radiophysics, and solid-state theory. Pastur has written seminal papers on eigenvalue distributions of random matrices with independent entries. He has studied the spectral properties of almost periodic operators and has solved completely the inverse problem of spectral analysis for the one-dimensional Schrödinger operator with limit periodic potential. He has also made substantial contributions to mathematical physics, especially to the study of disordered spin systems.

Pasture. Land covered with various grasses and used for livestock grazing. The grasses, predominantly cereal grasses, can be natural or sown, and the soil is usually poor. Pastures are an important part of the *feed base in Ukraine, although their importance has diminished as more feed crops have been introduced. Most pastures are now found in marginal farming areas, such as the Carpathian Mountains, and in the steppe, especially in the Crimea. In the forest-steppe, pastures account for less than 4 percent of all arable land. In the late 18th century pastures accounted for as much as one-third of all arable land, but as the steppe was brought under cultivation, the figure decreased drastically. In 1965 pastures covered some 4.7 million ha, or 10 percent of all arable land, in Ukraine.

Pastyrské fortified settlement. A multi-occupational site near Pastyrské, Smila raion, Cherkasy oblast. Excavations in 1892–1901 and 1949–55 by V. Khvoika and M. Braichevsky, among others, produced the remains of two settlements, one from the 6th to 4th century BC and the other from the 7th to 8th century AD.

Paszkowski, Marcin, b ? in the Cracow region, d 1620. Polish writer. He wrote several anti-Turkish brochures. On the basis of various documents, he described in verse the Poles' and Cossacks' wars with the Turks and Crimean Tatars during the reign of King Sigismund III Vasa. His works include *Ukraina od Tatarów trapiona o ratunek prosí*

(Ukraine Afflicted by the Tatars Begs for Deliverance, 1608), *Dzieje tureckie i utarczki Tatarów z Kozakami* (History of the Turks and the Conflicts of the Tatars with the Cossacks, 1615), and *Rozmowa Kozaka Zaporoskiego z Perskim gońcem* (Conversation of a Zaporozhian Cossack with a Persian Messenger, 1617).

Tetiana Pata: *Cuckoo on a Viburnum* (gouache and watercolor, 1950)

Pata, Tetiana, b 4 March 1884 in Petrykivka, Novomoskivske county, Katerynoslav gubernia, d 7 July 1976 in Petrykivka. Master of *Petrykivka painting. She decorated houses and chests with plant patterns, painted murals for commercial buildings, and designed kilims, books, and postcards. Among her best-known decorative panels are *Red Viburnum* (1919), *Rushnyk* (1930), *Pepper* (1937), *Peacocks among Flowers* (1949), *Cuckoo on a Viburnum* (1950), and *Bird and Grapes* (1958). She also taught at the Petrykivka School of Decorative Art and trained many Petrykivka painters. An album of her work was published in 1973.

Patent law. The set of legal norms regulating the production, use, and sale of new and useful products or processes. Inventors in Ukraine can obtain either an 'author's certificate' or a patent for their inventions. A certificate, which is valid for the entire USSR, is granted by the USSR Council of Ministers upon proof of novelty to the state patent office. The state reserves control over the invention and its use, and the inventor is eligible for a royalty based on the savings that can be realized through the invention. Extra incentives include better housing or a partial tax exemption on the royalty earnings. The more conventional form of inventor protection, the patent, gives the inventor or his descendants control over the use of the invention, usually for a period of 15 years. In the USSR, however, restrictions on free enterprise made a patent less desirable than an author's certificate. Moreover, patents of inventions that proved to be particularly important could simply be taken over by the state. Patents and author's certificates were regulated by section 6 of the Civil Code of the Ukrainian SSR and by the Statute on Discoveries, Inventions, and Innovational Proposals (1973).

Patericon (Ukrainian: *pateryk*). A collection of edifying tales, anecdotes, and apothegms about saints, the Church

Fathers, and prominent monks. Patericons originated in the Byzantine Empire in the 4th century. In the 11th and 12th centuries Church Slavonic translations of the so-called Egyptian, Sinaitic, Roman, Jerusalem, and Skete patericons spread from Bulgaria and Moravia into Kievan Rus'. The *Kievan Cave Patericon was modeled on the translations.

Pathological anatomy. A branch of *pathology that determines the cause of death by observing the effects of disease on the body and its organs; it can also establish the sequences of changes and thus the mechanism and evolution of disease. In Ukraine pathological anatomy began in the early 18th century, after Peter I legalized the dissection of dead bodies (1704). In the 19th century chairs of pathological anatomy were established at Kharkiv (1867) and Kiev (1876) universities and continued to develop in two distinct directions. A clinical-anatomical branch of pathological anatomy was founded by G. Minkh, and an experimental-physiological branch was started by V. *Vysokovych. Other notable scientists in the field included M. *Melnikov-Razvedenkov, P. *Kucherenko, and Ye. *Chaika. The first textbook of pathological anatomy in Ukrainian was written by Kucherenko in 1936. At present, chairs of pathological anatomy are found at all the medical research and education institutes in Ukraine. Autopsies must be performed on all persons who die in hospitals.

Pathology. A medical specialty concerned with the essential nature of disease, especially the structural and functional changes produced in cells, tissues, and organs by disease. Some of the first notable pathologists in the Russian Empire were the Ukrainians H. Bazylevych, O. *Shumliansky, M. Terekhovskiy, O. Zviriyaka, Ye. Mukhin, D. *Samoilovych, and S. Andriievskiy; they lectured at the medical schools and universities of St Petersburg, Moscow, and Yelysavethrad in the late 18th and early 19th centuries. More recent Ukrainian pathologists include I. *Mechnikov, V. *Vysokovych, V. *Pidvysotsky, G. *Minkh, D. *Zabolotny, O. *Bohomolets, and M. *Melnikov-Razvedenkov. The Ukrainian Scientific Society of Pathologists was founded in Kharkiv in 1926. The Institute of Experimental Biology and Pathology in Kiev was founded by Bohomolets in 1930 (see *Institute of Physiology of the AN URSR).

Pathophysiology. The *physiology of abnormal states, specifically the study of the functional changes that accompany a particular disease. Pathophysiology existed under the general name *pathology and began to be differentiated in the middle of the 19th century. At that time a school of pathophysiology was founded in Kiev by N. *Khrzhonshchevskiy. By 1925 pathophysiology had become an independent science in Ukraine, where it developed in Kharkiv under O. Repriev and in Kiev and Odessa under V. *Pidvysotsky along with D. *Zabolotny, Lev *Tarasevych, Ivan *Savchenko, and O. *Bohomolets. At the AN URSR (now ANU) *Institute of Physiology (est 1930), Bohomolets and his students researched the development of tumors (R. *Kavetsky), endocrinology (V. *Komisarenko), blood circulation (M. *Horiev), and immunology and allergy (M. *Syrotynin). There are a number of scientific societies of pathophysiology in Ukraine.

Borys Paton

Yevhen (Evgenii) Paton

Paton, Borys, b 27 November 1918 in Kiev. Metallurgist; son of Ye. *Paton, full member (since 1958) and president (since 1962) of the AN URSR (now ANU). He graduated from the Kiev Industrial Institute (1940) and since 1942 has worked at the ANU Institute of Electric Welding, where in 1953 he became director. His scientific contributions are in modern welding methods, including electric-arc, electron-beam, and plasma welding, welding in space, and seamless pipes. He was active politically, particularly in the 'politics' of science and technology in the USSR, and was a deputy to republican and all-Union CP congresses and supreme soviets. A biography of him was published in Moscow in 1979.

Paton, Yevhen (Evgenii), b 4 March 1870 in Nice, France, d 12 August 1953 in Kiev. Welding scientist and construction technologist; full member of the AN URSR (now ANU) from 1929. He graduated from the Dresden Polytechnical Institute (1894) and the St Petersburg Institute of Civil Engineers (1896) and was a professor at the Kiev Polytechnical Institute (1904–39, with interruptions). While heading the Kiev Bridge-Testing Laboratory (1921–31) he formulated fundamental scientific principles of bridge design and developed a scientific bridge-testing methodology. He published basic textbooks and monographs in the field and designed over 35 bridges and viaducts in 1896–1929, including a major bridge across the Dnieper River (1924). Paton is also considered to be the father of electric *welding in the USSR. In 1929 he organized at the VUAN a laboratory of electric welding technology, which in 1934 became the ANU Institute of Electric Welding. He served as director of the laboratory and institute until his death; today the institute bears his name. His contributions in the field of electric welding include arc welding and automation, welding apparatus design, and strength calculations of welded joints. He helped introduce electric welding technology into Soviet industry and founded the journal *Avtomaticheskaiia svarka*, which has appeared in Kiev since 1948.

Paton served as vice-president of the ANU from 1945 to 1952. He served on numerous scientific and political committees and published many books and technical articles on bridge building and welding. His selected works were published in Kiev in 1970, and a biography of him was published there in 1961. In 1964 the ANU established the

Paton Prize for outstanding contributions in the field of materials science, particularly welding technology.

L. Onyshkevych

Ivan Patorzhynsky

Patorzhynsky, Ivan [Patoržyns'kyj], b 3 March 1896 in Petro-Svystunove, Oleksandrivske county, Katerynoslav gubernia, d 22 February 1960 in Kiev. Opera singer (bass) and voice teacher. A graduate of the Katerynoslav Conservatory (1922), he studied singing under Z. Maliutina and was the soloist at the Kharkiv (1925–35) and Kiev (from 1935) opera and ballet theaters. His singing style was representative of the contemporary Ukrainian vocal school. His operatic roles included Karas in S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, Vyboryni and Taras Bulba in M. Lysenko's *Natalka from Poltava* and *Taras Bulba*, Deacon Havrylo in K. Dankevych's *Bohdan Khmelnytsky*, Kochubei in P. Tchaikovsky's *Mazepa*, the Miller in A. Dargomyzhsky's *Rusalka*, and Mephistopheles in C. Gounod's *Faust*. In concert he performed Ukrainian folk songs and romances by M. Lysenko, Ya. Stepovy, and M. Verykivsky. He toured in Italy, Germany, and North America. From 1946 he was a professor at the Kiev Conservatory; his pupils included D. *Hnatiuk, A. *Kikot, and Ye. Chervoniuk. In 1945–54 he was the first director of the *Ukrainian Theatrical Society. Biographies of him were written by V. Chahovets (1946) and E. Grosheva (1976).

Patraeus. A Bosphoran city that existed from the 6th century BC to the early Middle Ages on the north shore of Taman Bay near Kerch Strait. Archeological excavations at the site revealed extensive fortifications (brick walls surrounded by moats), large buildings, several large wineries, and two caches of coins of the 1st to 3rd centuries (the period of the city's greatest prosperity).

Patriarch. Initially an honorific title in the early church for distinguished bishops of any rank. By the 6th century it was accorded to the bishops of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. Traditionally the pope or patriarch of Rome was recognized as the first or highest patriarch, and the patriarch in Constantinople as the 'ecumenical' patriarch, or patriarch of the entire Eastern Roman Empire. The term patriarch was later applied also to the chief bishops of churches which did not concur with the Council of Chalcedon (451), that is, the Nestorian and Monophysite. Since the Middle Ages various Eastern Christian churches have become patriarchates, and their head bishops patriarchs.

The church of Kiev enjoyed quasi-patriarchal autonomy under a metropolitan, but was dependent on the ecumenical patriarch of Constantinople until 1686, when he transferred this authority to the patriarch of Moscow.

In 1583, while traveling to Moscow, the papal representative A. Possevino met with Ukrainian princes in Cracow to discuss the possibility of the establishment of a patriarchate in Kiev by Pope Gregory XIII. Even though it was supported by Roman and Polish forces, nothing came of this initiative. After the Church Union of *Berestia a plan to establish a patriarchate in Kiev was prepared in 1635–6 by the Uniate metropolitan Y. *Rutsky. The patriarch of Kiev would accept the dogmatic teaching of the Roman Catholic church, which it was agreed would be identical with that of the Orthodox church, but would be free to govern according to Eastern canon law, which gave recognition to the pope and the patriarch in Constantinople in accordance with the ecumenical councils and the Council of Florence (1439). Rutsky proposed the Orthodox metropolitan of Kiev, P. *Mohyla, as candidate.

In the 19th century, after the suppression of the Ruthenian (Ukrainian-Belarusian) Catholic church in the Russian Empire and the flourishing of the same church under Austria, Popes Gregory XVI, Pius IX, and Leo XIII considered the possibility of establishing a patriarchate for all the Slavic 'Greek Catholic' dioceses of Austria-Hungary. The combined opposition of the Hungarians and Poles, however, doomed these proposals from the outset.

When a Ukrainian state was formed in 1918, the idea of creating a Ukrainian patriarchate under the Greek Catholic metropolitan A. Sheptytsky was proposed. Sheptytsky's condition – that he could accept only if the church would unite itself with the Catholic church – was unacceptable to most Orthodox Ukrainians.

In 1963, at the Second Vatican Council, Metropolitan Y. *Slipy, as major archbishop of Lviv and head of the Ukrainian Catholic church, proposed the creation of a Ukrainian patriarchate under Rome. Although supported by most Ukrainian and some Latin church bishops, this proposal was not realized. Later Slipy approached Popes Paul VI and John Paul II with the same request, but it was rejected as untimely. Nonetheless, in 1975 Slipy declared the Ukrainian Catholic church a patriarchate with himself as its patriarch. In this action he was supported by only a minority of his bishops; others followed the instruction of the Vatican, based on the Decree for Eastern Catholic Churches of the Second Vatican Council, that only an ecumenical council or the pope can establish a patriarchate. The Ukrainian Major Archiepiscopate of Lviv-Halych is now recognized by the Vatican as an autonomous (*sui juris*) church, and is administered as a patriarchal church (can. 152).

The *Ukrainian Patriarchal Society in the United States and the *Ukrainian Patriarchal World Federation for Unity of Church and People were formed to work toward the creation of a Ukrainian Catholic patriarchate. The Vatican Council did make efforts to restore the dignity of the Eastern Catholic patriarchs within the framework of the Catholic church. Still, the codification of the Eastern Catholic canon law, the *Codex Canonum Ecclesiarum Orientalium*, promulgated on 18 October 1990, has not re-established the patriarchates in their full ancient role. It has also denied all Eastern Catholic churches direct jurisdiction over their own faithful outside the historical boundaries of their churches.

The revival of the *Ukrainian Autocephalous Orthodox church (UAOC) in Ukraine in the late 1980s raised the issue of an Orthodox Ukrainian patriarchate. At a sobor held in Kiev in 1990, Metropolitan M. *Skrypnyk, head of the UAOC in the West, was elected Patriarch of Kiev and all Ukraine; he was formally installed in Kiev in November 1990.

Patriarkhat (Patriarchate). An organ of the Ukrainian Patriarchal Society in the United States (formerly Society for the Promotion of the Patriarchal System in the Ukrainian Catholic Church) and, since 1977, the Ukrainian Patriarchal World Federation for Unity of Church and People. It was published in Philadelphia and New York as a quarterly from May 1967 to April 1973; since then it has appeared monthly. Until May 1978 it was called *Za patriarkhat*. The magazine has been edited by S. Protsyk (1967–74), V. Pasichnyk (1974–7), and M. Haliv (since 1977). Members of the editorial board have included Z. Gil, B. Yasinsky, M. Toporovych, L. Rudnytsky, P. Zeleny, V. Kachmar, B. Klymovsky, V. Markus, L. Shankovsky, Ya. Klym, D. Kuzyk, B. Lonchyna, and M. Marunchak. The magazine promotes the creation of a Ukrainian Catholic patriarchate and contains articles on religious and theological issues and on the persecution and state of the church in Ukraine, documents, a chronicle of events, organizational news and information, and biographies of religious figures.

Patriot Bat'kivshchyny (Patriot of the Fatherland). A weekly organ of the *Voluntary Society for Assistance to the Army, Air Force, and Navy of the Ukrainian SSR (DT-SAAF), published in Kiev from January 1959. It reported on the Ukrainian and all-Union activities of the DT-SAAF, promoted knowledge of military affairs and developments, and devoted special attention to promoting Soviet patriotism and communist ideology.

Patronage (*patronat*). The right or practice that allows the founder (*ktytor*) or overseer of a church, monastery, or other religious institution to nominate a clergyman to fill a vacant position. In the Byzantine church it included the right of the founder to use church property, and this form

of patronage was adopted by the early Ukrainian church. In the Polish-Lithuanian Commonwealth, patronage developed parallel to changes in the Roman Catholic church and became, under Casimir Jagiellończyk, a system for passing on 'church wealth.' Magnates and civil officials began interfering in the spiritual as well as the legal and administrative affairs of churches and monasteries. The appointment of Yosyf I *Bolharynovych as metropolitan of Kiev by Grand Duke Alexander in 1498 was a particularly blatant example of patronage. Subsequently Polish kings reserved the right to appoint metropolitans, bishops, archimandrites, and other church officials in crown territories; magnates and landowners had the same right on their own estates. The practice often led to abuses, as individuals not suited to the vocation were appointed to prominent positions, and members of the aristocracy monopolized almost all the higher positions in the church. Magnates in some areas (eg, Peremyshl) even forbade the appointment of anyone from outside their voivodeship or territory. The various forms of patronage were of some benefit to the church as long as the patrons were of 'Rus' faith,' but with the Polonization of much of the aristocracy and their conversion to Roman Catholicism or Protestantism, their activities frequently came into conflict with the interests of the Orthodox or Uniate churches and the people. Throughout the 16th century patronage degenerated to the point that it involved the virtual sale of bishoprics and other important posts, the acquisition of church estates and churches themselves by the aristocracy, the purchase of priesthoods and churches for various priestly families, and the trade and leasing of shrines and cemeteries. The church struggled against the abuse of patronage through various decrees issued at synods and through edicts issued by the king, but these measures (particularly in the 17th and 18th centuries) proved to be in vain. The Vatican protested against the abuses in the Catholic church, and the Orthodox church in Right-Bank Ukraine appointed *tytari* (sextons) who oversaw the use of church property (but only in free communities). Under Catherine II all church property in the Russian Empire was confiscated, and the clergy was considered to be in the state service. In the Austro-Hungarian Empire, Joseph II nationalized the monasteries in 1782 and transformed the clergy into state employees, paid out of the *religious fund. Patronage was limited to the appointment of parish priests from a list approved by the church administration, and to the conferring of places of honor at services. In more recent times the right of patronage has, for all practical purposes, ceased to exist.

I. Patrylo

Patrons of Agricultural Associations (Patronat khliborobskykh spilok). A body created in 1899 to organize and oversee *Raiffeisen credit co-operatives in Galicia. The body was established by the Galician Diet, which provided credit from government funds. The main organizer of the association was a Pole, F. Stefczyk. Ukrainian leaders, such as D. Savchak, K. Levytsky, and K. Pankivsky, initially supported it. Under Stefczyk, however, the Patrons favored the development of credit co-operatives in Polish localities and encouraged Polish control of co-operatives in Ukrainian localities. Ukrainians reacted to that policy by establishing the *Audit Union of Ukrainian Co-operatives to promote an independent Ukrainian co-operative movement. In 1912 there were 1,575 Raiffeisen co-

operatives in Galicia, some 400 of which were Ukrainian. The Patrons published *Chasopys dlia spilok ril'nychkykh* (1904–21) for Ukrainians. The Raiffeisen co-operatives continued to operate through the interwar period, but their role was limited to offering long-term farm credit.

Patronymic. A secondary name derived from the name of a father or ancestor usually by the addition of a suffix or prefix indicating descent. In Ukrainian the suffix is *-Ovych* for men and *-ivna* for women: Ivan Ivanovych is Ivan, the son of Ivan; and Lesia Petrivna is Lesia, the daughter of Petro. The patronymic appears in Rus' chronicles and in *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign). Later, in 16th- and 17th-century documents and incunabula, it stands alongside the surname. In the Cossack period it was often used; according to V. Lypynsky its use without the surname during B. Khmelnytsky's reign had a conspiratorial purpose. The use of the patronymic has been preserved by Ukrainians within the Russian Empire and Soviet Ukraine as a result of Russification. In Western Ukraine, which was more accessible to Western influences, the practice had disappeared by the 19th century.

Patrus-Karpatsky, Andrii [Patrus-Karpats'kyj, Andrii] (pseud of Andrii Patrus), b 29 March 1917 in Tereblia, near Tiachiv, Transcarpathia, d 29 April 1980 in Kiev. Transcarpathian poet. He debuted as a poet in 1934 in Sovietophile Russian-language periodicals in Transcarpathia. In the Carpatho-Ukrainian state of 1938–9 he published his first Ukrainian collection, *Ridnyi kraj klyche* (The Native Land Calls, 1938), contributed to the nationalist paper *Nova svoboda*, and belonged to the writers' and artists' group *Hoverlia*. He fled from Hungarian rule to the USSR in 1939 and returned to Transcarpathia after the Second World War, where he wrote many collections of socialist-realist verse in Ukrainian.

Protoarchimandrite Isydor Patrylo

Patrylo, Isydor, b 30 November 1919 in Zahorody, Mostyska county, Galicia. Catholic priest, Basilian monk, and church historian; a full member of the Shevchenko Scientific Society since 1979 and of the Ukrainian Theological Scholarly Society. He entered the Basilian order in 1933 and studied at Basilian schools in Lavriv, Dobromyl, and Krystynopil (now Chervonohrad, 1935–41). He then studied at Charles University and the Ukrainian Free University in Prague (1942–4), where he completed a PhD dissertation on pedagogy in the Kievan Mohyla Academy. He later obtained doctorates in theology from the Pontifi-

cal Angelicum University (1953) and in canon law from the Pontifical Lateran University (1961) in Rome.

He was ordained in 1943 and he served in parishes in Peremyshl (1944), Münster (1944–8), Leeds (1948–9), and various places in Argentina (1949–52, 1953–5). He was summoned to Rome and became director of the Ukrainian section of Vatican Radio (1952–3). He then joined the central administration of the Basilian order in Rome (1955), where he has served as treasurer (1955–62), general secretary (1962–76), and protoarchimandrite of the order (since 1976) and director of its publishing house (since 1962). He was a member of the editorial commission that prepared a Ukrainian translation of the Bible (1957–63); a consultant to the Congregation for Eastern Churches; and head of its Liturgical Commission, which is preparing translations of several liturgical books.

Patrylo is the author of a number of works in Ukrainian church history, including *Dzherela i bibliohrafiia istorii Ukraïns'koi Tserkvy* (Sources and Bibliography on the History of the Ukrainian Church, 1975–88), *Archiepiscopi-Metropolitani Kievo-Halicenses* (1962), 'Narys istorii Halych'koi Provintsiï Vasyliians'koho Chynu' (An Outline History of the Galician Province of the Basilian Order, *ZChVV*, 1982), and 'Narys istorii Vasyliian vid 1743 do 1839 r.' (An Outline History of the Basilians from 1743 to 1839, *ZChVV*, 1988).

W. Lencyk

Patslavsky, Viktor [Paclavs'kyj], b 1884 in Brody, Galicia, d 31 December 1974 in Yonkers, New York. Lawyer and civic activist. A graduate of Lviv University (LLD, 1909), he established a law office in Drohobych in 1919 and was active in many local organizations, including the Ridna Shkola society, the Lysenko Music Society, and the Boian choir. He was counsel of the wealthy Christian Hromada in Boryslav and an adviser to the Pidmoïna society of oil-well owners. In politics he was a supporter of the Ukrainian National Democratic Alliance. After emigrating to the United States he taught at a Ukrainian school and ran a music studio of the Ukrainian Music Institute of America.

Patyk, Volodymyr, b 9 October 1929 in Chornyi Ostriv, Bibrka county, Galicia. Painter and muralist. A graduate

Volodymyr Patyk: *Autumn in the Hutsul Region* (oil, 1984)

of the Lviv Institute of Applied and Decorative Arts (1953), he has worked in Lviv. In the 1960s he incorporated ethnographic themes and elements into paintings such as *Korovai* (1964) and *Girl from Bukovyna* (1966). Although most of his work is figurative, he has painted several canvases using Easter egg symbols as the basis of the compositions. Patyk is best known for his expressionist landscapes painted energetically in brilliant, high-intensity colors that convey his emotional response to nature and love of his homeland. *The Green Carpathians* (1970) and *Autumn in the Carpathians* (1986) are examples of the many paintings of the Carpathian Mountains created by the artist. Patyk has also painted thematic canvases, such as *Dovbush – Our Glory* (1967) and the funereal *The Last Journey* (1987), in which he used a dark, brooding palette in keeping with the subject.

Paul I (Pavel Petrovich), b 1 October 1754 in St Petersburg, d 23 March 1801 in St Petersburg. Russian emperor from 1796 to 1801; son of *Peter III and *Catherine II and father of *Alexander I. During his reign Paul facilitated the expansion of gentry landownership in Ukraine, where he gave hundreds of thousands of desiatins and some 150,000 state peasants to the gentry and, in December 1796, enserfed the hitherto free peasantry in Southern Ukraine. At the same time he limited corvée to three days a week and forbade the sale of household serfs and the breakup of peasant families. Paul reversed many of Catherine's reforms. In Ukraine he replaced the vicegerencies with gubernias, partially restored the *court system that had existed in the Hetmanate in 1760–70, and put an end to the persecution of the Uniate church. He also, however, increased bureaucratic control in local government, restricted the political and taxation privileges of the nobility, and introduced a brutal police regime, harsh discipline in the army, strict censorship, and the persecution of all and any free thinkers. As a result there was widespread popular discontent. Many peasant rebellions erupted, which were especially violent in the Ukrainian and neighboring Russian gubernias in 1798, and army officers and members of the nobility organized a number of conspiracies, notably the 'Smolensk conspiracy' of 1798, in which Ukrainians took part, and the guard regiments' conspiracy of 1800–1. During Paul's reign highly placed Ukrainians, such as Prince O. *Bezborodko, D. Troshchynsky, V. Kochubei, and A. and I. Hudovych, were influential in government. Paul was assassinated by disgruntled nobles.

O. Ohloblyn

Paul of Aleppo, b ca 1627 in Aleppo, Syria, d ca 1669. Syrian archdeacon, traveler, and writer. He accompanied his father, Patriarch *Makarios III of Antioch, on a journey from Aleppo to Istanbul, Wallachia, Moldavia, Ukraine, and Muscovy in 1652–9. Paul's journal of the journey provides valuable eyewitness details about the history, geography, culture, folkways, architecture, and religious life of the indigenous population. In Ukraine their route went from Rashkiv on the Dniester (10 June 1654) to Zhabokrychi, Uman, Lysianka, Bohuslav (where they met with Hetman B. Khmelnytsky on 21 June 1654), Trypilia, Vasyliiv,

Kiev (26 June to 10 July; there Paul visited the Kievan Cave Monastery and St Sophia Cathedral), Pryluka, and Putyvl (20 July 1654). The journey home is described in less detail. On their way back from their long stay in Muscovy (July 1654 to 28 May 1656) the travelers passed through Putyvl, Kiev, Boryspil, Pereiaslav, Cherkasy, Chyhyryn (where Khmelnytsky visited Makarios on 2 August 1656), Medvedivka, Zhabotyn, and Smila before arriving in Iași on 21 August 1656. Paul described Ukraine as a highly cultured land: 'In the entire land of the Ruthenians, that is, the Cossacks [Paul referred to the Russians as Muscovites], we noticed something strange but wonderful: all of them, with minor exceptions, even the majority of wives and daughters, know how to read and know the order of the church services and church songs.'

The original text of Paul's account is not extant, but several partial and complete Arabic manuscript copies have survived. The most complete copy is preserved at the National Library in Paris. Extracts from the account were freely condensed and translated into English by F.C. Belfour as *The Travels of Macarius, Patriarch of Antioch, Written by His Attendant Archdeacon, Paul of Aleppo* (2 vols, 1829, 1836; a selected version was published in 1936 and reprinted in 1971). A fuller Russian translation was done by G. Murkos and published in Moscow (4 vols, 1896–1900). B. Radu's French translation of the account was published in *Patrologia Orientalis* (vols 22 [1930], 24–5 [1933–4], 26 [1949]).

A. Zhukovsky

Pauli, Żegota, b 1 July 1814 in Nowy Sącz, Galicia, d 21 October 1895 in Cracow. Polish ethnographer and historian. As a student at Lviv University in the 1830s he was acquainted with members of the Ruthenian Triad and collected folk songs. In 1838 he published a collection of Polish folk songs and then the two-volume *Pieśni ludu ruskiego w Galicji* (Songs of the Ruthenian People in Galicia, 1839–40). The Ukrainian song collection contained ritual and historical songs in the first volume and lyrical songs, dance songs, and *kolomyiky* in the second. From 1844 he worked at the Jagiellonian Library in Cracow.

Pauls, John (pseuds: Ivan Sydoruk, John Sydoruk), b 28 April 1916 in Pavlopol, Kobryn county, Polisia. Emigré Slavist; member of the Shevchenko Scientific Society. He graduated from Warsaw University (1939) and the Ukrainian Free University (PHD, 1947) and taught at the University of Cincinnati (1959–81). He wrote the booklets *Ideology of Cyrillo-Methodians and Its Origin* (1954) and *Pushkin's 'Poltava'* (1962), and articles on I. Mazepa in literature and art, I. Franko, J. Herder and the Slavs, Polisian folk songs and wedding rituals, the Ukrainian-Belarusian linguistic boundary, and Russian-Ukrainian literary relations, in serials such as *Slavistyka*, *Zapysky NTSh*, *Ukrainian Review*, and *Ukrainian Quarterly*.

Paventsky, Antin [Pavenc'kyj], b 24 November 1818 in Nyzhnyv, Tovmach county, Stanyslaviv circle, Galicia, d 6 April 1889 in Lviv. Journalist. He graduated from Lviv University and became a member of the Stauropegion Institute. He was the first editor of *Zoria halytska* (1848–50). Frustrated with the Austrian authorities and the Supreme Ruthenian Council, he resigned and worked as a court official and a notary public (1858). In 1861 he was elected to the Galician provincial diet as a representative of Rava Ruska county.

Pavlenko, Nina, b 29 April 1932 in Cherevky, Yahotyn raion, Kiev oblast. Banduryst. After graduating from the Kiev Conservatory in 1958, she joined the Kiev Philharmonic. In 1961 she formed a banduryst trio with V. Tretiakov and N. Moskvyn, which performs Ukrainian folk songs, works by Ukrainian and foreign composers, and folk music of various nations.

Oksana Pavlenko: *Self-Portrait* (oil, 1968)

Gen Viktor Pavlenko

Pavlenko, Oksana, b 30 January 1895 in Valiava, Cherkasy county, Kiev gubernia, d 25 April 1991 in Moscow. Painter. She studied at the Ukrainian State Academy of Arts under F. *Krychevsky (1917) and in M. *Boichuk's Workshop of Monumental Painting at the Kiev Institute of Plastic Arts (1918–22). In 1919 she was part of M. Boichuk's team that decorated the Lutske regimental army barracks in Kiev. While teaching painting, drawing, and ceramics at the Mezhyhiria Tekhnikum (1923–9) she painted the frescoes there, titled *Consultation in the Village* (1925). She taught in the ceramics faculty of the Moscow Higher State Artistic and Technical Institute (1929–31) and, with M. Boichuk, V. Sedliar, and I. Padalka, painted the frescoes, later destroyed, in the Chervonozavodskiy Theater in Kharkiv (1933–5). Although Pavlenko continued painting her style became more naturalistic and lost the attributes typical of the Boichuk school.

Pavlenko, Paraskeviia, b 19 January 1881 in Petrykivka, Novomoskovske county, Katerynoslav gubernia, d 30 May 1983 in Kiev. Master of *Petrykivka painting; mother of H. *Pavlenko-Chernychenko. She painted decorative designs on paper and walls, including works such as *Decorative Motif* (1964), *Frieze* (1964), and *Flower Bouquet in a Vase* (1980).

Pavlenko, Viktor, b 1888, d 1932 in the Kuban. Senior aviation officer. During the First World War he served as a regular aviation officer in the Russian army. In 1917 he was a member of the Central Rada and the Ukrainian General Military Committee, and a delegate to the First All-Ukrainian Military Congress. In November–December 1917 he commanded the Kiev Military District, and in 1918 he served in staff positions. For almost two years (December 1918–November 1920) he was chief of aviation in the UNR Army, during which time he was promoted to brigadier general. In 1926 he returned to the USSR. He died during the famine.

Pavlenko, Yurii (Heorhii), b 25 March 1898 in Lebiazhe, Zmiiv county, Kharkiv gubernia, d 4 March 1970 in Kiev. Scientist in the fields of hydromechanics and the mechanics of ships; full member of the AN URSS (now ANU) from 1961. He graduated from the Leningrad Polytechnical Institute (1924) and served as a scientific adviser during the siege of Leningrad in the Second World War. He worked at the Odessa Institute of Naval Engineers (1944–58) and the ANU Institute of Hydromechanics (1958–62) and as a shipbuilding consultant in the Odessa region. His main contributions were in the fields of hydrostatics and hydrodynamics, particularly water friction on hulls, marine power plants, naval automation, and ship safety.

Pavlenko-Chernychenko, Hanna [Pavlenko-Černyčenko], b 8 December 1919 in Petrykivka, Novomoskovske county, Katerynoslav gubernia. Master of *Petrykivka painting; daughter of P. *Pavlenko. She was trained by T. *Pata and studied at the Kiev School of Folk Masters (1937–9). Since 1944 she has worked at the Kiev Experimental Ceramics and Art Plant, where she has created decorative designs for tableware, vases, and bowls. She has also painted wall panels (eg, *Blue Bird* [1970]), designed postcards and books, and made decorative prints.

Pavliuchenko, Serhii [Pavljučenko, Serhij], b 18 October 1902 in Kursk, Russia. Composer, musicologist, and pedagogue. He graduated from (1931) and then taught at (1932–47) the Leningrad Conservatory before becoming the director of the Lviv Conservatory (1947–53) and a professor at the Kiev Conservatory (1954–74). His musical works include *Preludes and Fugues* (1959) for piano, *Etudes* (1972) for chorus, and *Variations and Etudes* (1974) for voice. His musicological works include *Elementarnaia teoriia muzyki* (Elementary Music Theory, 1938), *Kratkii muzykal'nyi slovar'-spravochnik* (A Concise Music Reference Dictionary, 1950), and the reference dictionary *Muzykantu-liubiteliu* (For the Amateur Musician, 1965).

Pavliuk, Antin [Pavljuk], b 1875 in Plavanychi, Kholm county, Lublin gubernia, d 1945 in Germany. Lawyer and political leader. In 1917–18 he was a member of the Central Rada and the Kholm Gubernia Executive Committee. He served as a representative of the UNR Ministry of Justice in the Kholm, Podlachia, Polisia, and western Volhynia regions. During the Second World War he was the first chairman of the Central Kholm Committee (later known as the Kholm Relief Committee).

Pavliuk, Antin [Pavljuk], b 1899 in Volhynia, d ? Writer. From 1922 he lived in Prague, where he edited the literary

Antin Pavliuk (1875–1945)

Ilarion Pavliuk

miscellany *Sterni* (The Stubble Fields), headed the left-wing writers' group Zhovtneve Kolo, and contributed to Western Ukrainian and Soviet Ukrainian literary periodicals. Having emigrated to the USSR in 1932 as a member of the Zakhidnia Ukraina writers' group, he disappeared in the Soviet terror. He wrote several poetry collections: *Sumna radist'* (Sad Joy, 1919), *Zhyttia* (Life, 1925), *Osinni vyry* (Autumn Vortices, 1926), *Bil'* (Pain, 1926), *Pustelia liubovy* (The Wasteland of Love, 1928), *Polyn* (Wormwood, 1930), *Reliquaire* (1931), and *Vatra* (The Bonfire, 1931). He also wrote *Neznaioma* (*Uryoky iz zapysnyka*) (The Unknown Woman [Excerpts from a Notebook], 1922; dedicated to K. *Polishchuk) and translated the poetry of G. Apollinaire into Ukrainian and Ukrainian poetry into Russian.

Pavliuk, Ilarion [Pavljuk], b 27 May 1887 in Kolesnyky, Ostrih county, Volhynia gubernia, d ? Agronomist and political activist. After 1917, having studied and worked in Moscow, he served in several UNR administrative posts in Ostrih. He was interned by the Poles, and returned to Volhynia, where he worked as an agronomist. In 1922 he was elected to the Polish Sejm. He sat with the Ukrainian caucus but resigned in 1924 and went on to support the Ukrainian National Democratic Alliance. He was also a supporter of the Ukrainian Free Cossacks.

Pavliuk, Mykola [Pavljuk], b 19 December 1901 in Haisyn, Podilia gubernia, d 8 March 1984 in Odessa. Painter. A graduate of the Odessa Art Institute (1930), in the 1920s he was a member of the *Association of Revolutionary Art of Ukraine and a follower of M. *Boichuk. He participated in painting the murals at the Peasant Sanatorium (1929) and the Press Building (1929–30; the mural *The Tsar's Will: 1905* and fresco *Under the Tsarist Yoke*) in Odessa. In the 1930s he painted themes from Soviet history, such as in *End of the Imperialist War* (1935) and *Kotovskiy at the Head of a Partisan Detachment* (1937). After the Second World War he created genre paintings, such as *Collective-Farm Agronomist* (1952) and *Family* (1970).

Pavliuk, Mykola [Pavljuk] (Pavliuc, Nicolae), b 11 December 1927 in Lunca la Tisa, Maramureş region, Rumania. Linguist and educator. After graduating from Kharkiv University (PH D, 1958) he taught Ukrainian language and literature at the University of Bucharest. In 1975 he emigrated to Canada, where he has taught Ukrainian at the University of Toronto since 1976. Author of *Limba Ucraineana: Curs practic* (Ukrainian Language:

A Practical Course, 1963) and *Curs de gramatică istorică a limbii ucrainene* (A Historical Grammar of the Ukrainian Language, 1964), he has also written over 50 articles on Ukrainian dialects, language, literature, and pedagogy, as well as other grammars and textbooks.

Pavliuk, Pavlo [Pavljuk] (Pavlo But and Pavlo Mikhnovych), b ?, d 19 April 1638 in Warsaw. Zaporozhian Cossack leader. In 1635 he participated in the Cossack rebellion led by I. *Sulyma that destroyed the Polish fortress of Kodak. In early 1637 Pavliuk led several thousand Cossacks who fought on the side of the Crimean khan Inayet-Girei against the Ottoman appointee. In the summer of 1637 he led an anti-Polish revolt of Zaporozhian Cossacks. After capturing Korsun in August, Pavliuk issued a universal exhorting the Ukrainian people to rise up, and the rebels were soon joined by large numbers of peasants from both banks of Ukraine. In December 1637 his army was routed by the Polish army at the Battle of *Kumeiky. Pavliuk was handed over to the Poles, who took him to Warsaw and had him executed despite A. *Kysyl's promise to the contrary.

Ostap Pavliv-Bilozersky

Pavliv-Bilozersky, Ostap [Pavliv-Bilozers'kyj], b 1892, d 7 October 1955 in Scranton, Pennsylvania. Political and civic leader, journalist, and writer. He was a noted member of the Ukrainian Radical party and from 1922 was repeatedly elected to its secretariat. In 1925 he became secretary of the Central Council of the Union of Peasant Associations in Lviv. He was active in the Sich movement and the Union of Ukrainian Progressive Youth. From 1922 to 1928 he edited the Radical party's weekly *Hromads'kyi holos* and then a number of the magazine's monthly supplements – *Molodi kameniari* (1928–32), *Pluh i hart* (1928–9), and *Snip* (1936–7). He served several terms in Polish prisons for his political activities. After the Second World War he coedited the newspaper *Ukrains'ke slovo* in Germany (1948–9) before emigrating to the United States in 1949. There he contributed to *Narodna volia* and *Vil'na Ukraïna*. As a writer he is known for his short stories and historical novels, including *Naperedodni* (On the Eve, 1935), *Komakha* (Insect, 1939), and *Dyiavol pohnohlenyi* (The Devil Oppressed, 2 vols, 1948). He also translated Polish, German, and Russian literature into Ukrainian.

Pavlivsky, Borys [Pavlivs'kyj], b 21 September 1906 at Podobriivka *khutir*, near Iskryskivshchyna, Sumy county, Kharkiv gubernia. Poet and journalist. From 1925 he worked as an accountant in Artemivske and began to publish verses in the paper *Kocheharka* and the journal *Zaboi*. In 1929 his poem 'Makhnovtsi' (Makhno's Men) appeared in *Novyi shliakh* in Lviv. After enrolling at the Kharkiv Institute of People's Education (1930), he came under political persecution: in 1933 he was sentenced to 5 years of hard labor, in 1939, again to 5 years, and in 1946, to 13 years of imprisonment and 5 years of exile. He returned to Ukraine in 1957, but his articles began to appear in the press only in 1991.

Pavlohrad. v-16. A city (1989 pop 131,000) on the Vovcha River and a raion center in Dnipropetrovske oblast. A settlement called Matviivka arose at the site in the 18th century. In 1779 it was renamed Luhanske, and in 1780 a fortified settlement called Pavlohrad was set up nearby. With their merger Pavlohrad became a county center of Katerynoslav vicegerency (1783–96), New Russia gubernia (1797–1802), and Katerynoslav gubernia (1802–1923). By 1896 the town had a population of 19,000. Today Pavlohrad is an important industrial center in the western Donbas. Its factories produce casting machines, bituminous concrete, food products, building materials, light fittings, leather goods, furniture, and textiles. There are 10 mines and an enrichment factory nearby.

Antin Pavlos: *Evening* (terracotta)

Pavlos, Antin [Pavlos'], b 1905 in Hostynne, Hrubeshiv county, Lublin gubernia, d 4 September 1954 in St Paul, Minnesota. Sculptor. A graduate of the Lviv Applied Arts School (1935), he began exhibiting his work in 1933 at shows organized by the Ukrainian Society of Friends of Art. In the 1930s he created small terra-cotta busts, nudes, and animal figures (mostly horses) and worked on monuments; in that genre he prepared several projects (B. Khmelnytsky, King Danylo, Prince Roman, and Hetman I. Mazepa) but completed only the gravestone of V. Matiuk.

His small nudes are among his better works. A postwar refugee in Germany, in 1949 he emigrated to the United States. In Minneapolis he created sculptures now found in Roman Catholic churches in the United States and a bas-relief of T. Shevchenko. Pavlos also painted impressionist landscapes.

Pavlov, Kapiton, b 1792 in Revel (now Tallinn), Estonia, d 1 February 1852 in Kiev. Russian painter. After studying at the St Petersburg Academy of Arts (1800–15) he settled in Ukraine and taught at the Nizhen Lyceum (1820–39) and Kiev University (1839–46). In Nizhen he taught N. Gogol, Ya. de Balmen, Ye. Hrebinka, and A. Mokrytsky. He was acquainted with T. Shevchenko and is mentioned in Shevchenko's novel *Bliznetsy* (The Twins). His work consists of portraits, such as *B. Lyzohub* (1835) and *Self-Portrait* (1830s); genre paintings, such as *Children Building a House of Cards* (1837); and landscapes, such as *The Transfiguration Church in Poltava* (1830s).

Pavlovsk (Pavlovske). III-21. A town (1979 pop 20,100) on the Don River and a raion center in Voronezh oblast, RF. It was founded by Zaporozhian Cossacks ca 1685, and belonged to Ostrohozke regiment. At the beginning of the 18th century Peter I fortified the town and added a shipyard. In 1779 Pavlovsk became a county center of Voronezh vicegerency, and subsequently, of Voronezh gubernia. By 1896 its population was 6,600. According to the Soviet census of 1926, Ukrainians accounted for 36.6 percent of the town's and 71.1 percent of the raion's population.

Pavlovska, Oleksandra [Pavlovs'ka], b 11 December 1928 in Kiev. Graphic artist. A graduate of the Kiev State Art Institute (1954), where she studied under V. Kasiian, I. Pleshchynsky, and S. Hryhoriev, she has designed posters and illustrated many children's books, using mostly watercolor and ink. The latter include *Koza-dereza* (Billy Goat's Bluff, 1957) and *Kyrylo Kozhumiaka* (1958). Her illustrations are reminiscent of the engravings of old Kiev masters.

Pavlovsky, Aleksandr [Pavlovskij], b 13 October 1857 in Chufarovo, Yaroslavl gubernia, Russia, d 18 October 1944 in Bessarabia. Russian bacteriologist and surgeon. A graduate of the Military Medical Academy (1881), he was a professor at Kiev University (1889–1912) and helped organize the Kiev Bacteriological Institute, where he headed the serum department (to 1909). In 1893 he advocated the preparation of anticholera serum, and in 1895 he set up the facilities to prepare and apply an antidiphtheria serum. He founded the Kiev Society for Infectious Diseases and the Kiev Pasteur Station (1894). His publications dealt with atmospheric microbiology, infectious diseases, surgical infections, and tissue cytology.

Pavlovsky, Andrii [Pavlovs'kyj, Andrij], b 19 November 1789 in Valky, Kharkiv vicegerency, d 24 January 1857 in Kharkiv. Mathematician. A graduate of Kharkiv University (1809), he taught there from 1810, was a full professor from 1826, and served as rector in 1837–8. He was noted for his work in partial differential equations, algebra, and probability theory. His most famous student was M. *Ostrohradsky.

Pavlovsky, Hryhorii [Pavlovs'kyj, Hryhorij], b 1884 in Kiev, d 1967 in the United States. Singer (bass), composer, priest, and teacher. He appeared on stage with the Sadvovsky theater in Kiev and the Kiev Opera in 1910–18, and then became a member of the Ukrainian Republican Kapelle under O. Koshyts. In 1922 he moved to the United States, where he became a cofounder of and professor of singing at the short-lived Ukrainian Conservatory of Music in New York (1924–9). He had his own music school in the 1930s. A supporter of the Ukrainian Orthodox church in the USA, he edited the Philadelphia-based journal *Dni-pro* during the 1940s. His compositions include a liturgical score, sacred songs, carols, and folk-song arrangements.

Pavlovsky, Ivan [Pavlovs'kyj], b 21 January 1851 in Bobrova, Kaluga gubernia, Russia, d 27 May 1922 in Poltava. Historian and archivist. A graduate of Kiev University (1874), he taught history at the Poltava Cadet Corps (1874–1913), was secretary of the Poltava Learned Archival Commission (PUAK, 1903–7), and organized and directed the Museum of the Battle of Poltava (1909–18). Over 90 of Pavlovsky's contributions were published in *Trudy Poltavskoi uchenoi arkhivnoi komissii* and *Kievskaiia starina*. He wrote pioneering works on the history and culture of the Poltava region, including a biographical dictionary of scholars and writers of Poltava gubernia from the mid-18th century on (1912) and a supplement (1913); a compilation of statistical data about Poltava gubernia 100 years earlier (1906); books about the nobility of Poltava gubernia (2 vols, 1907), the 1709 Battle of Poltava and its monuments (1908), Poltava gubernia and its environs (1910), Poltava's hierarchs, statesmen, and public figures (1914), A. Kurakin as governor-general of Little Russia gubernia (1914), and Poltava's past (1918); a description of Poltava gubernia and its environs in 1810 (1917); and articles about Poltava in the 19th century (1902, 1905), the Masonic lodge in Poltava (1909), and the Decembrist movement in the Poltava region (1918). Among his many other articles are ones on the Little Russian Cossack levy en masse during the Crimean War (1910) and the Cyril and Methodius Brotherhood (1911), a biography of V. Kapnist (1915), and a description of the archives of Poltava gubernia (1915). Pavlovsky was one of the compilers of the systematic bibliographic guide and index to *Kievskaiia starina* (1911) published by the PUAK.

A. Zhukovsky

Pavlovsky, Ivan [Pavlovs'kyj], b 20 May 1890 in Chernihiv county, d ca 1938. Metropolitan of the *Ukrainian Autocephalous Orthodox church (UAOC). He graduated from the Chernihiv Theological Academy in 1914 and was ordained; he then organized Ukrainian parishes in Chernihiv county (1920–1). In November 1921 he was consecrated bishop of the UAOC for Cherkasy-Chyhyryn. From December 1926 he was archbishop of Kharkiv, where he also edited the UAOC organ **Tserkva i zhyttia*. He participated in the extraordinary council of January 1930, at which the Soviet authorities dissolved the UAOC, and in the second extraordinary council of December 1930, at which the Ukrainian Orthodox Church was founded as the successor to the UAOC. At this council he was also made 'metropolitan of Kharkiv and of all Ukraine' (1930–6). When the capital of Ukraine was transferred to Kiev, he moved there. In 1936 he was arrested by the NKVD and de-

Metropolitan Ivan Pavlovsky

Metodii Pavlovsky

ported, at first to Voronezh and then to Kazakhstan, where he died.

Pavlovsky, Metodii [Pavlovs'kyj, Metodij], b 1877 in the Kiev region, d 1957. Journalist and co-operative and civic leader; brother of H. *Pavlovsky. He was secretary (1906) of the newspaper *Hromads'ka dumka* and editor (1907–13) of the daily *Rada* in Kiev, to which he contributed theater and music reviews under various pseudonyms. He compiled and published a collection of Ukrainian folk songs under the pseudonym M. Lisovytsky.

Pavlovsky, Oleksander [Pavlovs'kyj], b 27 June 1927 in Zaporizhia. Experimental physicist; corresponding member of the AN URSR (now ANU) since 1979. A graduate of Kharkiv University (1950), he is a specialist in physics of high energy densities and has major achievements in the development of high-intensity neutron sources, high-current accelerators, and hyperstrong impulsive magnetic fields.

Pavlovsky, Oleksii [Pavlovs'kyj, Oleksij], b 1773 in Shutivka (now Sosnivka), near Hlukhiv, Nizhen regiment, d after 1822. Ukrainian philologist. A graduate of the Kievan Mohyla Academy (1789) and the St Petersburg Teachers' Seminary (1793), he had ties with the *Novhorod-Siverskyi patriotic circle and probably worked in the civil service under Prince O. Bezborodko in St Petersburg. In the 1790s he began writing a survey of the Ukrainian language. Completed in 1805 and published in St Petersburg in 1818 as a 114-page 'grammar' of the 'Little Russian dialect,' it was the first work describing the basic phonetics and morphology of vernacular Ukrainian based on the northern Left-Bank dialects. It was also the first work to render the voiced *i* in a phonetic orthography as the letter 'i', and provided a valuable dictionary of 1,130 words and phrases taken from proverbs, maxims, and poetic works. Its description of the Ukrainian people and their history, language, and literature linked the ideas in *Istoriia Rusov* with those of Ukrainian pre-Romanticism. In 1822 Pavlovsky published a brochure in reply to N. Tsertelev's review of his book.

Pavlovsky, Teoktyst [Pavlovs'kyj], b 1706 in Liutenka, Hadiache regiment, d 28 November 1744. Painter. A graduate of the Kievan Mohyla Academy, he worked from 1730 under I. Maksymovych at the *Kievan Cave Monastery Icon Painting Studio. Eventually he took monastic vows and was appointed director of the studio. He took part in painting the icons in the monastery's Dormition Cathedral and St Nicholas's Cathedral (eg, the portrait of V. Vatanovych). He also painted landscapes and portraits and designed the poetic thesis of S. Kuliabka (1744, engraved in Berlin). His paintings and icon sketches have been preserved in the studio's albums.

Pavlovsky, Vadym [Pavlovs'kyj], b 4 October 1907 in Kiev, d 10 February 1986 in New York. Historian and art scholar. A chemist by profession, he emigrated to the United States after the Second World War. He contributed to *Ukraine: A Concise Encyclopaedia* (vol 2, 1971) and *Encyclopedia of Ukraine* (vols 1–2, 1984, 1988), wrote a monograph on the artist V. Krychevsky (1974), compiled a book about monuments to T. Shevchenko (1966), and coedited (with K. Tserkevych) a reference book on the Ukrainian language (1982) and a Russian-Ukrainian dictionary of legal terms (1984).

Pavlovsky, Viktor [Pavlovs'kyi], b 23 November 1893 in Ananiv, Kherson gubernia, d ? Pedagogue. A professor at the Kharkiv Institute of People's Education and a research associate at the Kharkiv Pedagogical Institute, he wrote on the planning, methodology, and organization of systematic teaching in schools. He disappeared during the terror of the mid-1930s.

Pavlovych, Oleksander [Pavlovyč] (pseud: Chernian Makovytsky) b 19 September 1819 in Šarišské Čierné (Sharyske Chorne), d 25 December 1900 in Svydnyk, in the Prešov region. Writer and cultural figure. He studied at gymnasiums in Bardejov, in the Prešov region, and Miskolc and Eger, in Hungary, and at the Trnava Catholic Seminary (1843–7). He was ordained a Uniate priest in 1848, and worked as secretary of the episcopal chancery in Prešov, where he became a close associate of O. *Dukhnovych and the *Prešov Literary Society. He then ministered in the village of Beloveža (1851–63). From 1864 until the end of his life he lived in Svydnyk. Greatly influenced by the Czech national revival and the Galician Russophiles, from the 1850s on he wrote, in the *yazychiie* and later in the Transcarpathian dialect, social, patriotic, historical, and didactic poetry, which appeared in Viennese, Prešov, Uzhhorod, and Lviv miscellanies and periodicals and as the collection *Pesnik dlia makovitskoi russkoi detvy* (Songbook for Ruthenian Children in the Makovytsia [Prešov] Region, 1860). He also wrote fables and collected and published ethnographic and historical materials on the Prešov region. His collected works were published in Uzhhorod in 1942 and in Prešov in 1955. Books about him have been written by S. Voskresensky (1947) and A. Shlepetsky (1982).

Pavlovych, Petro. See Trembovetsky, Apollon.

Pavlovych, Yurii [Pavlovyč, Jurij], b 1906, d ? Scenery designer. He completed study at the Kiev State Art Institute and from 1925 worked in the Odessa Ukrainian Drama Theater, where he created scenery for I. Kocerha's

Feia hirkoho myhdaliu (The Fairy of the Bitter Almond, 1927), and the Odessa Opera and Ballet Theater. A constructivist, he was criticized for formalism, and disappeared during the Stalinist terror of the early 1930s.

Pavlusevych, Volodymyr [Pavlusevyč], b 1887, d 18 May 1958 in Cleveland, Ohio. Writer. He taught in gymnasiums in Galicia (1912–44) and in Germany (1945–50). He wrote a collection of lyrical poems, *Z pisen' kokhannia* (From Songs of Love, 1921), the plays *Amerykanka* (The American Girl, 1928) and *Dobrodii liudstva* (The Benefactor of Mankind, 1934), and the librettos to the operettas *Divcha z Maslosoiuzu* (Girl from the Maslosoiuz, 1936) and *Sviat Vechir* (Christmas Eve, 1958), among other works.

Mykola Pavlushkov

Hryhorii Pavlutsky (portrait by Fedir Krychevsky, 1922)

Pavlushkov, Mykola [Pavluškov], b 1904 in Tula, Russia, d 3 November 1937. Student activist; nephew of S. *Yefremov. In the 1920s he studied at the Kiev Institute of People's Education. At the show trial of the Union for the Liberation of Ukraine (SVU) in 1930 he was accused of organizing a Ukrainian Youth Association in 1925 and sentenced to 10 years of imprisonment. Broken during his incarceration, he offered testimony which was used to support the fabricated accusations in the SVU trial. He was subsequently shot by order of a tribunal.

Pavlutsky, Hryhorii [Pavluč'kyj, Hryhorij], b 1861 in Kiev, d 15 March 1924 in Kiev. Art scholar. A graduate of Kiev University (1886), he lectured there on the history of art (from 1888). He headed the Ukrainian Scientific Society's art history section and in the 1920s was a professor at the Ukrainian State Academy of Arts. He wrote monographs on the Corinthian order in classical architecture (1891), genre subjects in Hellenic art (1897), and the history of Ukrainian ornamentation (1927); studies on medieval churches in Ukraine in *Drevnosti Ukraïny* (Antiquities of Ukraine, 1905) and *Trudy XIV arkeologicheskogo s"ezda v Chernigove* (Works of the XIV Archeological Conference in Chernihiv, 1911); and articles on Ukrainian book decoration.

Pavlychenko, Tymish [Pavlyčenko], b 7 March 1892 in Vinnytsia county, Podilia gubernia, d 5 August 1958 in Saskatoon. Botanical engineer and community leader. Pavlychenko was educated at the Ukrainian State University in Kamianets-Podilskyi (1918–19), the Husbandry

Tymish Pavlychenko

Dmytro Pavlychko

Academy in Cracow (1920–1), Prague University (1927), the University of Saskatchewan (MSc, 1932), and the University of Nebraska (PhD, 1937). In 1917–18 he was a member of the Central Rada and the Ukrainian Constituent Assembly. He left Ukraine in 1920 and emigrated to Canada in 1927; there he worked for the National Research Council of Canada (1932–8). His studies of plant root systems resulted in his appointment in 1938 as chairman of Canada's first department of plant ecology, at the University of Saskatchewan. He was the first professor of Ukrainian origin in Canada and taught the first course on the Ukrainian language in Canada, at the University of Saskatchewan in 1943. In 1948 he left the academy for private industry. An initiator and national executive member of the *Ukrainian National Federation (UNO), he served as one of that association's major ideologues. He also helped establish the *Ukrainian Cultural and Educational Centre (Oseredok) in Winnipeg and served as its president (1950–8). He headed the Representative Committee of Ukrainian Canadians from 1939 until it merged into the Ukrainian Canadian Committee (now Congress) in 1940.

Pavlychko, Dmytro [Pavlyčko], b 28 September 1929 in Stopchativ, now in Ivano-Frankivske oblast. Poet and activist of the Ukrainian renaissance in the 1980s. He graduated from the philological faculty at Lviv University (1953) and worked for the journal *Zhovten'*. From 1971 to 1978 he was editor in chief of the journal *Vsesvit*, and since 1986 he has been secretary of the *Writers' Union of the USSR and the Writers' Union of Ukraine. Since 1989 he has also been head of the Shevchenko Ukrainian Language Society. He was elected to the Supreme Soviet and in 1990 he became chairman of the Foreign Affairs Commission of the Supreme Soviet of the Ukrainian SSR. Pavlychko has published many poetry collections, including *Liubov i nenavyst'* (Love and Hate, 1953), *Pal'mova vit'* (Palm Branch, 1962), *Hranoslov* (The Edge of Words, 1968), *Sonety podil's'koï oseni* (Sonnets of a Podilia Autumn, 1973), *Poemy i prytychi* (Poems and Parables, 1986), *Vybrani virshi* (Selected Verse, 1986), and *Rubai'* (Lumberjacks, 1987). He has also published a collection of articles on literary criticism, *Magistraliamy slova* (On the Highways of the Word, 1977); scenarios for (art) film; and literature for children, such as *Zolotorohyi Olen'* (The Golden-Horned Deer, 1970), *Smerichka* (The Fir Tree, 1982), and *Pleso* (The Water Surface, 1984). He has translated from J. Martí, Kh. Botev, Hviezdoslav, and other writers. Pavlychko's po-

ems are notable for their adherence to form, richness of vocabulary, and finely honed language, especially the sonnets (eg, 'Svitovyi sonet' [The World Sonnet, 1983]). Since the late 1980s, as an activist and publicist, Pavlychko has aided the rebirth of Ukrainian culture and the Ukrainian language and has opposed Russification.

I. Koshelivets

Pavlychko, Solomiia [Pavlyčko, Solomija], b 15 December 1958 in Lviv. Literary scholar and translator; daughter of D. *Pavlychko. Pavlychko completed her studies at Kiev University in American and Western European literature (1984). In addition to articles on American and English literature and feminism in Ukrainian scholarship and culture, she has written monographs on transcendental American poetry (1988) and on G. Byron (1989) and introductions to translations of T.S. Eliot (1989) and E. Dickinson (1991). She has translated into Ukrainian W. Golding's *Lord of the Flies* (1988), D.H. Lawrence's *Lady Chatterley's Lover* (1989), and G. *Grabowicz's study of T. Shevchenko, *The Poet as Mythmaker* (1991).

Anna Pavlyk

Mykhailo Pavlyk

Pavlyk, Anna, b 26 January 1855 in Monastyrsk, Kosiv county, Galicia, d 13 October 1928 in Lviv. Civic leader and pioneer of the women's movement; sister of M. *Pavlyk. Her brother's constant helpmate, she propagated socialist ideas among the peasants of Kosiv county and was arrested for her activity several times. She also demanded equality for women. Her articles began to appear in 1881 in *Hromada*.

Pavlyk, Mykhailo (pseud.: M. Halytsky, M. Ivaniv, Khmara, M. Kolomyichuk, Maksym, Mykhailo, M. Pokutsky, M. Tkachenko), b 17 September 1853 in Monastyrsk (now part of Kosiv), Kolomyia circle, Galicia, d 26 January 1915 in Lviv. Galician socialist figure and publicist; full member of the Shevchenko Scientific Society (NTSh) from 1900. He and I. *Franko became close friends as students at Lviv University. Both of them contributed to the Academic Circle's organ, *Druh* (1874–7), and both became Ukrainophile socialists under the influence of M. *Drahomanov's letters to *Druh* and the Polish-language *Praca*. Through his writings Pavlyk remained the principal Galician propagator of Drahomanov's ideas, which brought about his persecution (he was tried in court nearly 30 times), imprisonment (in 1877, 1878, 1882, 1885–6, and 1889), and ostracism. In 1876 he played a key role in

the Academic Circle's change in orientation from a Russophile to a Ukrainophile body and in the creation of an unofficial student ethnographic society in Lviv. He became involved in smuggling proscribed Ukrainian literature into the Russian Empire. With Franko he edited (1878) the socialist journal *Hromads'kyi druh* and miscellanies *Dzvin* and *Molot*, all of which outraged the conservative Galician public and were confiscated by the police. In them he published his story 'Rebenshchukova Tetiana' (Rebenshchuk's Tetiana), portraying the evils of forced marriage and peasant brutality; the antiwar, anticonscription story 'Turko Kulykiv'; and the anticlerical, anti-Russophile novelle 'Propashchyi cholovik' (A Doomed Man).

In 1879 Pavlyk avoided a six-month prison term, which he received for writing 'Rebenshchukova Tetiana,' by fleeing to Geneva, where he worked with Drahomanov and S. Podolynsky on the journal **Hromada*. In 1882 he returned to Lviv and served his sentence. In 1887–8 he lived in Cracow, where he cataloged the library of the Polish writer J. Kraszewski. In 1889 he was the editor of the Lviv paper *Bat'kivshchyna*, but he was forced to resign over political differences. Pavlyk and Franko founded the *Ukrainian Radical party (URP) in 1890 and edited its organs *Narod* (1890–5; in 1892–4 in Kolomyia) and *Khliborob* (1891–5). Pavlyk then worked in Lviv as the first NTSh librarian (1897–1904), headed the URP (1898–1914), and edited its newspaper *Hromads'kyi holos* (1898–1903). In 1914 he was elected vice-chairman of the *Supreme Ukrainian Council in Lviv and served briefly as editor of *Dilo*.

Pavlyk devoted most of his time to editing periodicals and books and to political journalism. Most of his articles and critiques appeared in *Narod* and *Hromads'kyi holos*. He advocated humane anarcho-socialism, the separation of church and state, and national and sexual freedom and equality; and he condemned Polish domination of the Western Ukrainians, capitalist exploitation, and the reactionary Russophiles and Galician clergy, and criticized orthodox Marxists (especially their views on the national question) and the Galician populists. He wrote a book on the development of Western Ukrainian community organizations (1887); translated into Ukrainian works by G. Uspensky, N. Leskov, A. Tolstoi, and H. Ibsen, J.W. Draper's *History of the Conflict between Religion and Science*, G. Hauptmann's *Die Weber* (1898), A. Ostrovsky's *Groza* (The Storm, 1900), and W. Reymont's novel *Chłopi* (Peasants, 1909); and edited and published a jubilee compendium on Drahomanov (1896) and, in *Zhytie i slovo* (1896–7), Drahomanov's correspondence with various Galician figures. He compiled a bibliography of Franko's writings (1898); wrote scholarly articles on J. Gawatowicz (the author of the first Ukrainian intermede, 1900), and Drahomanov's study of incest (1907), a booklet on the Galician Russophiles and Ukrainophiles (1906), and two books about Drahomanov (1907, 1911); and edited publications of his own correspondence with Drahomanov (vols 2–8, 1910–12), Drahomanov's folkloristic studies (1907), and Drahomanov's correspondence with T. Okunevsky (1905) and M. Buchynsky (1910).

An edition of Pavlyk's stories was published in 1909. Soviet editions of his selected works were published in 1955, 1959 (including the first full version of his novelette about Hutsul life, 'Vykhora' [The Whirlwind]), and 1985. A book commemorating 30 years of his public activity appeared in 1905; an edition of folk songs he collected and transcribed appeared in 1974; and P. Babiak and V. Po-

liek's bibliography of works by and about him was published in 1986 by the Lviv Scientific Library of the AN URSS (now ANU). Books about Pavlyk have also been written by P. Yashchuk (1959), M. Denysiuk (1960), M. Manzenko (1962), and V. Kachkan (1986).

R. Senkus

Pavlyk, Mykola, b 13 April 1896 in Bushkovychi, Pere-myshl county, Galicia, d 12 July 1977 in Lviv. Political activist. While working in railway shops in Peremyshl he joined the Communist Party of Western Ukraine and advanced through its ranks to the positions of secretary of its Peremyshl and Stryi district committees, member of its CC, and, finally (1930), general secretary. He was arrested in 1930 by the Polish authorities and sentenced in 1934 at the so-called Lutske Trial of 57 to an eight-year term. After the Second World War he held senior administrative positions in Lviv.

Pavlykiv, Mariia, b 1 June 1865 in Lviv, d ca 1930 in Lviv. Opera singer (dramatic soprano). After graduating from a singing school in Lviv in 1888, she performed at the Lviv Opera until 1897 (and irregularly thereafter). At the same time she appeared in Ukrainian and Polish concerts in Lviv and Cracow. Her main roles were Odarka in A. Vakhnianyn's *Kupalo*, Halka in S. Moniuszko's *Halka*, Aida in G. Verdi's *Aida*, and Marguerite in C. Gounod's *Faust*. In 1909–10 she taught voice at the Lysenko Higher Institute of Music in Lviv.

Pavlykiv, Teofil, b 1821, d 1905. Galician civic leader and Greek Catholic priest. He served as curate of the Dormition Church in Lviv and honorary canon of the metropolitan chapter. A Russophile, he was one of the leaders of the Ruthenian Council in Lviv. He was elected to the Galician Diet in 1861, 1868, and 1873.

Iryna Pavlykovska

Yuliiian Pavlykovsky

Pavlykovska, Iryna [Pavlykovs'ka], b 26 February 1901 in Lviv, d 25 September 1975 in Edmonton. Civic leader; daughter of I. *Makukh and wife of Yu. *Pavlykovsky. A music teacher by vocation, she was active in various women's and educational organizations in Lviv: she was a member of the national executive of the Union of Ukrainian Women (1923–8), a founder and director of the Ukrainske Narodne Mystetstvo co-operative (1925–39), a member of the board of directors of the Ukrainska Zakhoronka society (1926–39), and a member of the national

executive of the women's section of Silskyi Hospodar (1935–9). Having left Ukraine after the Second World War, she organized and headed the Ukrainian Women's Alliance in Germany (1945–50) and served on the executive of the World Federation of Ukrainian Women's Organizations, which she helped found. After settling in Canada in 1950, she held various offices on the executive of the Ukrainian Catholic Women's League of Canada, including the presidency (1964–8).

Pavlykovsky, Yuliiian [Pavlykovs'kyj, Julijan], b 20 July 1888 in Senkiv, Radekhiv county, Galicia, d 28 December 1949 in Munich. Agronomist, economist, co-operative and political leader, and journalist; full member of the Shevchenko Scientific Society from 1935; husband of I. *Pavlykovska. From 1915, after graduating in law from Lviv University and in agronomy from the Higher Agricultural School in Vienna, he worked in the Silskyi Hospodar society in Lviv as inspector, chief of economic reconstruction, organizer, president (1924–9), and vice-president. He served as chairman of the Provincial Committee for Organizing Co-operatives (1920–1), president of the Provincial Co-operative Union and the Audit Union of Ukrainian Co-operatives (1922–44), and chief director of Narodna Torhovlia (1923–39). He was also a member of the board of directors of various Ukrainian institutions, including Maslosoiuz (1926–39). As the leading organizer and ideologist of the co-operative movement in Galicia he represented Ukrainian co-operatives at international conferences and on Polish national bodies, such as the State Agricultural Council, the State Co-operative Council in Warsaw, and the Council of the Agricultural Chamber in Lviv. He was active in the National Democratic party and a member of its Popular Committee from 1917. He was also deputy leader of the Ukrainian National Democratic Alliance (1930–9), which he helped found, and as its candidate was elected to the Polish Senate in 1930 and 1935. In 1944 he emigrated to Germany, where he headed the Alliance of Ukrainian Co-operatives and taught at the Ukrainian Technical and Husbandry Institute and the Ukrainian Free University. He wrote numerous articles on agronomy, economic conditions in Galicia, the history and ideology of co-operation, and Polish agrarian policy, as well as a number of important monographs, such as *Zemel'na sprava u Skhidnii Halychyni* (The Land Issue in Eastern Galicia, 1922), *V oboroni ridnoi zemli* (In Defense of the Native Land, 1925), and *Narodnia Torhovlia na porozzi druho-ho stolittia* (Narodna Torhovlia at the Threshold of Its Second Century, 1936).

Pavlysh [Pavlyš]. v-14. A town smt (1986 pop 5,800) in the Omelnyk River valley in Onufriivka raion, Kirovohrad oblast. The town, which was founded at the beginning of the 17th century by peasants from Right-Bank Ukraine, was called Butivka until the 1770s. Pavlysh has a food and a building-materials industry.

Pavlyshyn, Marko [Pavlyšyn], b 7 July 1955 in Brisbane, Australia. Ukrainian literary scholar and community figure; son of R. *Pavlyshyn. He graduated from Monash University (PHD, 1983), where he has been the Mykola Zerov lecturer in Ukrainian since 1983. His articles on German and Ukrainian literature (eg, H. Hesse, E.T.A. Hoffman, A. von Chamisso, I. Kotliarevsky, T. Shevchenko, V. Vynnychenko, O. Berdnyk, P. Zahrebelny, Valerii

Marko Pavlyshyn

Bohdan Pazdrii

Shevchuk, and Ukrainian writers in Australia) have been published in Western scholarly serials and collections. Pavlyshyn is the editor of *Ukrainian Settlement in Australia* (1986), *Glasnost in Context: On the Recurrence of Liberalizations in Central and East European Literatures and Cultures* (1990), *Ukraine in the 1990s: Proceedings of the First Conference of the Association of Ukrainian Studies in Australia* (1992), and *Stus iak tekst* ([Vasyl] Stus as Text, 1992).

Pavlyshyn, Roman [Pavlyšyn], b 3 October 1922 in Chernykhiv, Ternopil county, Galicia. Architect and civic leader. In 1948, after studies in Vienna and Darmstadt, he emigrated to Australia. As director of building for the Queensland government (1969–85) he was responsible for the construction of major public buildings in Brisbane, including the Supreme Court, Parliament House, and the Queensland Cultural Centre. A cofounder (1949) and president (1951–67, 1980–2) of the Ukrainian Association of Queensland, he was also active in the Plast Ukrainian Youth Association and the Ukrainian co-operative movement.

Pavlyshyn, Stefaniia [Pavlyšyn, Stefaniija], b 20 May 1930 in Kolomyia, Galicia. Musicologist. She studied at the Lviv and Kiev conservatories (doctorate in musicology, 1955) and has taught at the Lviv Conservatory since 1955 (full professor, 1983). In addition to major works about C. Ives (1979) and 20th-century music in the West (1980), she has published studies on Ukrainian composers, such as D. Sichynsky (1956), S. Liudkevych (1974), V. Sylvestrov (1989), and V. Barvinsky (1990). She has contributed to several journals in the Soviet Union and abroad and has written for radio and television.

Pavoloch [Pavoloč]. IV-10. A village (1973 pop 3,000) on the Rostavytsia River in Popilnia raion, Zhytomyr oblast. In the early 16th century it was part of O. Dashkevych's estate. By the mid-17th century it was a well-fortified stronghold and a regimental center in the Hetman state. In 1663 I. Popovych, the Pavoloch colonel, rebelled against the Poles. After the partition of Poland in 1793, Pavoloch came under Russian rule and was made part of Skvyra county in Kiev gubernia.

Pavoloch regiment. An administrative territory and military formation established in 1648 in Right-Bank Ukraine. In 1649 it became part of Bila Tserkva regiment, and in 1651 it was separated again. Its territory included

14 towns. Its most famous commander was I. Bohun. In 1674, after Right-Bank Ukraine was returned to Poland by the Treaty of Andrusovo (1667), the regiment was abolished. Many of its inhabitants resettled in Left-Bank Ukraine.

Pazdrii, Bohdan [Pazdrij], b 8 February 1904 in Nove Selo, Zbarazh county, Galicia, d 30 March 1975 in Philadelphia. Actor and stage director. He began acting in the Stanyславiv Ukrainian Touring Theater (1926–8) and the Tobilevych Theater (1929–33) and then directed and acted in the Zahrava and Kotliarevsky theaters (1933–39), the Lesia Ukrainka Theater (1939–41), the Lviv Opera Theater (1941–4), the Ensemble of Ukrainian Actors in West Germany (1945–9), and Teatr u Piatnytsiu in Philadelphia (1950–70). His repertoire spanned over 130 roles in drama, comedy, and operetta.

Nataliia Pazuniak

Olena Pchilka

Pazuniak, Nataliia [Pazunjak, Natalija] (née Ishchuk-Shulhyn), b 24 February 1922 in Kiev. Educator and civic activist; full member of the Ukrainian Academy of Arts and Sciences since 1989. Displaced by the Second World War, she graduated in Slavic studies from the Ukrainian Free University (1949) and the University of Pennsylvania (PHD, 1956) and then taught at Manor Junior College (1956–68), the University of Pennsylvania (1963–83), and Macquarie University in Sydney, Australia. She has been active in the *World Federation of Ukrainian Women's Organizations, and in 1971–3 she served as its vice-president.

Pchela (The Bee). The Slavic title for books of quotations and parables from Christian and classical literature. Its prototypes were the *Theological Chapters* of St Maximus the Confessor and the *Sacred Parallels* of St John of Damascus, which made up a large part of the didactic anthology *Melissa* (The Bee), compiled by the Byzantine monk Anthony Melissa in the 11th century. *Melissa* was translated from Greek into Old Ukrainian at the beginning of the 13th century. *Pchely* were an abundant source of ancient aphorisms and anecdotes, many of which were incorporated into Ukrainian folklore. Later, revised copies replaced many ancient sections with original Rus' parables, proverbs, and maxims. In 1599, scholars of the Ostrih circle produced a new translation, the so-called Derman *Pchola*. The oldest extant manuscript (15th century) was pub-

lished by V. Semenov in 1893, and several later Ukrainian transcriptions were published by S. Shcheglova in 1910. I. Franko used *pchela* motifs in his literary works.

Pchilka, Olena [Pčilka] (pseud of Olha Kosach), b 29 June 1849 in Hadiache, Poltava gubernia, d 4 October 1930 in Kiev. Writer, community leader, and ethnographer; mother of Lesia *Ukrainka and sister of M. Drahomanov; corresponding member of the All-Ukrainian Academy of Sciences from 1925. She recorded songs, folk rituals, and customs and collected folk embroideries in Volhynia. She published her research as *Ukrains'kyi ornament* (Ukrainian Ornamentation, 1876). She also funded the publication of S. Rudansky's *Spivomovky* (Singing Rhymes, 1880). In 1883 Pchilka began to publish her own verse and short stories in the Lviv journal *Zoria*. Her first collection was titled *Dumky – merezhanky* (Thoughts – Embroideries, 1886). Pchilka was also an active participant in the women's movement, who edited and published, with N. Kobrynska, the first feminist almanac, **Pershyi vinok* (The First Wreath, 1887). In the 1890s Pchilka lived in Kiev, and from 1906 to 1914 she was editor and publisher of the journal **Ridnyi kraj* and the **Moloda Ukraïna* supplement (1908–14). Besides her many poems, tales, and stories for children Pchilka wrote numerous plays: *Vesnianyi ranok Tarasovi* (Taras's Spring Morning, 1914), *Kazka zelenoho haiu* (The Tale of the Green Wood, 1914), *Shchaslyvyi den' Tarasyka Kravchenka* (Little Taras Kravchenko's Lucky Day, 1920), *Skarb* (The Treasure, 1921), *Myr myrom* (Peace through Peace, 1921), *Kobzarevi dity* (The Kobzar's Children), and others. Pchilka translated and reworked many classics of world literature, by Ovid, A. Mickiewicz, A. Pushkin, J.W. von Goethe, N. Gogol, H.C. Andersen, and V. Hugo. She also wrote publicistic prose, essays of literary criticism, biographies, and an autobiography: *M.P. Savvits'kyi* (1904), *Marko Kropyvnyts'kyi iako artyst i avtor* (Marko Kropyvnytsky as Actor and Author, 1910), *Ievhen Hrebinka i ioho chas* (Yevhen Hrebinka and His Times, 1912), *Mykola Lysenko* (1913), *Spohady pro Mykhaila Drahomanova* (Recollections about Mykhailo Drahomanov, 1926), and *Avtobiohrafia* (Autobiography, 1930). Pchilka's most significant works in ethnography and folklore are *Ukrains'ki uzory* (Ukrainian Ornamental Designs, 1912, 1927), *Pro legendy i pisni* (About Legends and Songs), and *Ukrains'ki selians'ki maliwannia na stinakh* (Ukrainian Peasant Wall Paintings). Her collected works have been published as *Opovidannia* (Stories, 3 vols, 1907, 1909, 1911) and *Opovidannia* (Stories, including her autobiography, 1930).

P. Odarchenko

Pchilka (Little Bee). A popular children's magazine in interwar Transcarpathia. It was published and edited by P. Kukuruza in Uzhhorod as a supplement to the beekeeping magazine *Podkarpats'ke pcholiarstvo* from July 1922 to August 1923, and independently from September 1923 to June 1932. Its circulation grew from 1,000 in 1922 to 2,500 in 1925 and 5,000 in 1930. The Provincial School Board paid for subscriptions for all schools in Transcarpathia. Among the contributors were prominent Transcarpathian and émigré writers and figures. Illustrations were provided by well-known artists, such as Y. Bokshai, M. Butovych, M. Krychevsky, V. Tsymbal, and Yu. Vovk. *Pchilka* also published a library of children's books by authors such as S. Cherkasenko, M. Levytsky, and V. O'Connor-Vilinska.

Pchola (Bee). The first Ukrainian literary and scholarly journal published in Galicia. Nineteen weekly issues appeared in the Galician dialect and in the **yazychiie* in Lviv between 7 May and 3 September 1849. The editor and publisher was I. Hushalevych. Among the contributors were Ya. Holovatsky, B. Didytsky, Y. Lozynsky, I. Naumovych, A. Petrushevych, and A. Mohylnytsky.

Pea (Ukrainian: *horokh*). A number of herbaceous annuals of the Fabaceae family, grown for their edible seeds. The favorite market pea in Ukraine is a variety of the *Pisum sativum*. Peas contain starch (20–48 percent), sugar (4–10 percent), fat, cellulose, carotene, vitamins B₁, B₂, C, and other nutrients. They are consumed fresh, cooked, and canned, dried and used in soup, and sometimes ground into flour. In Ukraine they are also used extensively as feed. Average yields are 18–25 centners per ha, but in some regions yields reach 30–40 centners per ha. The area devoted to peas in the Ukrainian SSR rose from 358,000 ha in 1940 to 419,000 in 1960, had more than doubled (975,000 ha) by 1970, and then increased slowly to 1,033,000 ha in 1980 and 1,438,000 ha in 1987.

Peace movement. The peace movement before and during the First World War was led by the social democratic workers' movement. Prior to 1914 it was confined largely to declarations opposing war by international socialist congresses, in which the main workers' parties active in Ukraine took part. When the war broke out, however, and patriotic fervor swept the cities of the Russian Empire, the Menshevik wing of the Russian Social Democratic Workers' party and a majority of the Jewish General Workers' Bund backed the imperial war effort and took a leading role in the government's war production committees. For their declaration in the Russian State Duma opposing Russia's entry into the war, five Bolshevik deputies were arrested and exiled to Siberia.

A majority of the Ukrainian Social Democratic Workers' party (USDRP) opposed the war. The newspaper *Borot'ba*, published in Geneva by L. Yurkevych, declared that 'the main task facing Ukrainian Social Democracy is anti-war propaganda.' At the end of 1916, members of the party active in Katerynoslav attempted unsuccessfully to mount a general strike against the government's war effort. S. Petliura was the only notable USDRP leader to declare support for the war effort, which he did in the Moscow newspaper *Ukrainskaia zhizn'*.

Following widespread initial enthusiasm for the war, pacifist sentiments emerged in 1915, when the Russian army invaded Galicia, and grew stronger in 1916, as the death toll at the front mounted. Such sentiments were most evident in the army, where Ukrainian soldiers voiced demands for an end to the war and their reorganization into separate Ukrainian regiments committed solely to the defense of their national territory.

All the soldiers', peasants', and workers' congresses in 1917 that supported the Central Rada called for an end to the war without indemnities or annexations. The more the Rada acquired authority as a provisional government in the Ukrainian gubernias of the former Russian Empire, the more it faced demands from its supporters to sue for a separate peace with the Central Powers. The Rada's failure to do so immediately upon seizing power in Kiev in October explains in part its subsequent failure to with-

stand the first Bolshevik military offensive from Russia in January 1918.

There was no peace movement during the interwar period, either in Soviet Ukraine or the Ukrainian territories under Polish rule. The widespread economic ruin and war weariness across Europe that resulted from the First World War temporarily removed the prospect of new international hostilities. In the 1930s, however, when Germany rearmed under the Nazis, the Soviet Union's leaders sought to avert war by mobilizing an antifascist movement through the Comintern, by diplomatic means in the League of Nations, and eventually by concluding the *Molotov-Ribbentrop Pact with Nazi Germany.

The Stalinist terror of the 1930s prevented any independent peace movement from emerging in Soviet Ukraine. The evidence of the terror, the purges, and the 1932–3 man-made famine destroyed practically all desire on the part of Western Ukrainians under Polish rule to support the Soviet government's diplomatic efforts at averting war. And given the failure of the League of Nations to defend Ukrainian cultural autonomy in Poland, in the late 1930s a significant proportion of Western Ukrainian young people viewed the prospect of another war favorably, as an opportunity to throw off their national oppression.

Only since the end of the Second World War has a movement dedicated solely to the preservation of peace emerged in Ukraine. The years 1945–90 were dominated by sustained periods of cold war between the superpowers, a rapid buildup of nuclear arsenals on both sides, and the maintenance of peace through a balance of terror based on parity in destructive military capabilities.

An important part of the Soviet government's strategy with respect to the threat of renewed international conflict was to sponsor a peace movement in the Soviet Union and abroad that supported its policy on disarmament. In August 1949 a Soviet Peace Committee was founded in Moscow to co-ordinate all government-approved peace actions across the Soviet Union. Its Ukrainian branch, the Ukrainian Republican Peace Committee (URPC), was founded in September 1951. The URPC built up a sizable membership, raised funds (often through direct deductions from workers' pay packets), staged demonstrations to support the government's diplomatic initiatives, and hosted visits to the republic by member organizations of the World Peace Council, the umbrella organization of the international pro-Soviet peace movement. It did not, however, express criticism of the postwar Soviet military buildup, which was particularly rapid during the years under L. Brezhnev, or of the military interventions in Hungary in 1956, Czechoslovakia in 1968, and Afghanistan in 1979.

Several independent peace initiatives and actions occurred in Ukraine during the 1980s. They included the establishment in Odessa, Lviv, and Rivne of the Groups to Establish Trust between the USA and USSR. Formed in 1982, the Odessa Trust Group called for the Black Sea to be turned into a sea of trust and for Odessa oblast to be declared a nuclear-free zone jointly with the US state of Maryland. The Lviv Trust Group, established by young workers and students, organized demonstrations and issued declarations in support of disarmament by the USSR and the United States, against the war in Afghanistan, and against US military intervention in Central America. The independent Ukrainian Peace Committee, which was

founded in 1987 in London, England, and campaigned throughout Europe for a nuclear-free Ukraine, was designated the external representative of the Lviv Trust Group. In May 1988 a Trust Group was formed in Rivne.

Independent peace initiatives came also from the unregistered Christian congregations. The proscribed Ukrainian Catholic church declared its opposition to the war in Afghanistan in 1984. Young Pentecostals, Baptists, and Jehovah's Witnesses refused conscription on the grounds of conscientious objection. Widespread discontent over the deaths of Soviet soldiers in Afghanistan strengthened the general sentiment in favor of peace in Ukraine throughout the 1980s.

M. Bojunc

Peach (*Prunus persica*; Ukrainian: *persyk, broskvyna*). A fruit tree of the family Rosaceae, native to China. The most widely cultivated variety is the common peach (*P. persica vulgaris*), which grows to about 8 m high. The fruit contains 6–14 percent sugar, 0.5–1.2 percent pectins, and 0.08–1.02 percent acids such as malic, tartaric, and citric acid, as well as vitamin C and carotene. In Ukraine peaches are grown primarily in the south, although several northern varieties were developed – Kiev Early, Kiev Earliest, and Kiev Famous. The average peach tree grown in Ukraine yields 40 kg of fruit; in the Crimea some trees produce up to 100 kg. Fuzzy peaches are considered to be true peaches; peaches with smooth skin are properly nectarines, almost unknown in Ukraine.

Peanut (*Arachis hypogaea*; Ukrainian: *zemlianyi horikh, arakhis*). An annual *oil plant of the family Fabaceae. Native to South America, peanuts were first grown in Ukraine at the Odessa Botanical Garden in 1792. They were introduced for wide-scale cultivation in the 1920s in Zaporizhia, Dnipropetrovske, Odessa, and Kherson oblasts. Recently peanut production in Ukraine has declined (see *Vegetable-oil industry) and given way to imported peanuts from Africa and Asia.

Pear (*Pyrus communis*; Ukrainian: *hrusha*). A fruit tree of the family Rosaceae. In Ukraine it grows wild and in cultivation. Pear fruit contains 6–15 percent sugars, 0.6 percent organic acids, and vitamins A, B, and C. It is consumed fresh, dried, canned, and in marmalades, preserves, and liqueurs. In Ukraine 200–400 kg of pears can be obtained from a single tree. Several Ukrainian varieties have been developed and popularized. Pear wood is hard and strong; it is used in the manufacture of furniture, musical instruments, and milled-wood articles.

Peasant Association (Selianska spilka or Ukrainka selianska spilka). An economic-professional organization of the nationally conscious Ukrainian peasantry, established in Ukraine in April 1917 through the efforts of the *Ukrainian Party of Socialist Revolutionaries (UPSR) and politically dominated by it. The association was initially led by M. *Stasiuk. Organized democratically into village, rural district, county, gubernia, and all-Ukrainian committees, it acted as the mouthpiece of the Ukrainian peasantry and officially supported the Central Rada. The cooperative daily **Narodnia volia* served as its national organ, and regional papers were published by it in Kiev, Poltava, Podilia, Chernihiv, and Katerynoslav gubernias. The association was particularly strong in Kiev and Pol-

tava gubernias. The April 1917 congress of its members in Poltava gubernia was the first manifestation by peasants demanding that the Russian Provisional Government recognize Ukraine's national rights. The May 1917 congress of its members in Kiev gubernia called for Ukrainian autonomy, the creation of a national parliament, and Ukrainianization of the army. The association organized and conducted the First (June 1917) and the secret Second (May 1918) *All-Ukrainian peasant congresses, controlled the *All-Ukrainian Council of Peasants' Deputies, and through the latter influenced the actions and decisions of the Central Rada and its cabinet, the General Secretariat (renamed the UNR Council of Ministers). Its representatives in the Rada pushed for the nationalization of land privately owned by the state, church, and gentry and its public distribution among individual farmers. The association advanced its own candidates in the November–December 1917 elections to the Constituent Assembly of Ukraine, often jointly with the UPSR. It did not recognize the authority of the Hetman government after April 1918. After the May 1918 split in the UPSR the association sided with the centrist faction led by N. Hryhoriv against the left faction of the Borotbists. It had three representatives in the Ukrainian National Union that co-ordinated opposition to the Hetman government and the November 1918 uprising against it. In the Directory of the UNR that subsequently took power it was represented by F. Shvets. At that time the association was headed by O. Yanko, who was also in charge of the UPSR Organizational Bureau.

Peasant community. See *Hromada*, *Obshchina*, and *Vero*.

Peasant house. See Folk architecture.

Peasant Land Bank (*Selianskyi pozemelnyi bank*). A state mortgage bank in the Russian Empire, established in 1882 with capital from the State Bank to provide peasants with loans for purchasing land from the gentry. Branches had been established in every Ukrainian gubernia by the end of 1885. Initially almost all loans were made to peasant communes or co-operatives, which purchased the land jointly. Annual repayments of principal and interest varied from 7.5 to 8.5 percent of the original loan (by comparison, annual repayments by nobles to the analogous Noble Land Bank averaged 4.5 percent). The Peasant Land Bank could finance only 75 percent of the purchase price for land; thus, the commune or co-operative had to provide a large down payment. Those conditions limited the effectiveness of the bank, which helped buy only one-quarter of all the land bought by peasants. From 1883 to the end of 1894 it lent a total of 76 million rubles, which purchased 2.42 million ha of land. The bank's activity in Ukraine in the early period is summarized in the table.

Eventually several changes in the bank's operation in-

creased its effectiveness. In 1895 the bank was permitted to buy land on its own account and resell it later to peasants. At the same time, the maximum repayment term for loans was extended from 36.5 to 55.5 years. In 1895–1905 the bank acquired over 1 million ha itself and financed the purchase of another 5.7 million ha by the peasantry.

After the Revolution of 1905 the bank was reformed even further. Its capital was increased, the average annual repayment price was reduced to 4.5 percent of the original loan, and the bank was permitted to finance 90 percent and even 100 percent of the purchase price of the land. Other major changes followed the introduction of the *Stolypin agrarian reforms, which stressed the development of private farming in the Russian Empire. The bank was encouraged to make loans to individual peasants and peasant households. In 1906 the state also began to sell off much of its own land, and the bank lowered its interest rates. In 1906 to 1915, 11.3 million ha of land were purchased from or through the bank. Much of that land was purchased by peasants who had previously owned little or no land. By the end of 1914 the bank was owed nearly 1.25 billion rubles, and arrears amounted to some 18.5 million rubles.

After the Revolution of 1917 the new Soviet authorities liquidated the Peasant Land Bank and abolished the outstanding loans.

Peasant strikes in Galicia and Bukovyna. In the first years of the 20th century Ukrainian peasants in Galicia and Bukovyna who hired themselves out as agricultural laborers on landlords' estates participated in a series of mass strikes accompanied by other forms of agrarian unrest. Members of the *Ukrainian Radical party, particularly I. *Franko and V. *Budzynovsky, had begun to propagate the idea of agrarian strikes, which they took from the example of Irish populists in the mid-1890s. Sporadic strikes of agricultural laborers broke out in Bukovyna and Galicia in 1897 and 1898, but the first large-scale strike occurred in Borshchiv county, in Galicia, in 1900. In 1902 a wave of agrarian strikes of unprecedented magnitude encompassed some 400 villages in eastern Galicia. In Husiatyn and Terebovlia counties over two-thirds of the landlords' estates faced work stoppages. Another strike wave of roughly equal magnitude broke out in eastern Galicia in 1906; in 1905–7 over 20 agrarian strikes took

Land purchases in Ukraine financed by the Peasant Land Bank, 1883–94

	No. of loans	No. of ha	No. of individual purchases	No. of ha purchased	
				per loan	per individual
Left-Bank gubernias	2,374	234,800	130,300	98.9	1.8
Right-Bank gubernias	1,020	156,100	94,800	153.0	1.6
Steppe gubernias	635	325,800	130,600	224.1	2.5

place in Bukovyna. The outbreak of the *Revolution of 1905 across the border in the Russian Empire helped to motivate the latter wave of strikes, especially since neighboring Right-Bank Ukraine was also the scene of massive agrarian unrest.

The strikes were precipitated by low wages, the maltreatment of laborers, and disputes over access to forests and pastures. In the course of the strikes the peasants sometimes engaged in violent confrontations with strike-breakers and occupied seignorial land, especially pastures. County authorities called in the military to quell strikes and related unrest and made the village communities quarter the soldiers at their own expense. Hundreds of peasants were arrested in 1902, and dozens in 1906. The backbone of the strike movement tended to be small-holding peasants; landless agricultural laborers, who were traditionally excluded from collective decision-making in the village, and who were also much more dependent on their daily wages, tended to stay in the background. As a result of the strikes agricultural wages rose throughout almost all of Ukrainian Galicia and Bukovyna.

Although the strikes arose primarily in response to socioeconomic conditions, they were not without political and national dimensions. The major strike waves broke out spontaneously, without prior organization. But once under way the strikes were supported by activists of the major Ukrainian political parties. Among the most prominent activists in the strike movement was the social democrat S. *Vityk. Members of the Ukrainian Radical and *Ukrainian Social Democratic parties emphasized the social aspects of the strikes, but the *National Democratic party pointed out that they had a strong national component as well, since, in the main, Ukrainian peasants were using the strikes against Polish landlords. Most Polish political parties in Galicia, with the prominent exception of the Polish Social Democratic party, condemned the strikes as a threat to Polish hegemony in the region. The strikes contributed to the exacerbation of Polish-Ukrainian tension in Galicia. They also demonstrated that the Ukrainian village was capable of co-ordinating effective actions in pursuit of its interests.

Peasant Union. See Sel-Soiuz.

Peasants. A social class engaged largely in subsistence agriculture. Peasants have played an unusually important part in Ukrainian history. Not only did they make up the overwhelming majority of the Ukrainian population until the 1930s, but they also contributed much to the preservation and development of Ukrainian culture. One of the peculiarities of the peasants as a social stratum is the stability of their way of life and a conservative attitude toward traditions, language, and faith – in short, their fostering of national and ethnic characteristics, some of which extend back to pre-Christian times and even to Indo-European

roots. That peculiarity of the peasants and their cultural life was particularly important for the Ukrainian nation, which had been subdued by powerful neighbors and, particularly in the case of the upper classes and the urban strata, exposed to assimilatory influences. The peasants served as a major source for regeneration in the 19th century, when the Ukrainian literary language was reconstructed on the basis of the peasant vernacular, and the traditions of village life were mined for the components of a national culture.

The peasants of Kievan Rus' arose in conjunction with the new state system that replaced the disintegrating ancestral social structure of the Slavic tribes. The peasants of Rus' were grouped in relatively autonomous settlements, where they worked together to cultivate land using slash-and-burn techniques. The vast majority of peasants fell into the category of *smerds. The smerds were of two types, either entirely free or dependent. The free peasants formed the largest group and enjoyed the rights of free persons. The dependent smerds, whose numbers grew with princely gifts of land to servitors, lived on princely and boyar lands, paying rents primarily in kind (see *quit-rent), but money and labor rents (corvée) were also known. The smerds were not, however, serfs or slaves. A smerd could become a *zakup, that is, an indentured laborer to a lord. That status was temporary, however; once the zakupy had paid off their debts, they were free again.

After the Mongol invasion (1240) and the passage of Ukrainian lands under Polish and Lithuanian rule (mid-14th century) the peasants' rights were further restricted and their rents increased, until they lost their personal freedom and became serfs wholly dependent on the *landowners. That enserfment was part of the so-called second *serfdom that characterized the economy of Eastern Europe beginning in the late 15th century, precisely when serfdom was dying out in Western Europe. Surveyors divided up the arable land and established demesne estates (see *Fillovarok) on which the peasants had to labor as a form of rent to the landlords; peasants also had their own, much smaller plots, from which they eked out their sustenance. Ukrainian peasants resisted enserfment (eg, the *Mukha rebellion in 1490–2), but they were forced to submit. After the Union of Lublin (1569), when all Ukrainian lands formerly under Lithuanian rule passed to the jurisdiction of the Polish Crown, the Ukrainian peasants were encouraged to colonize the relatively empty southwestern and eastern territories of Ukraine. Oppression in Ukraine's heavily populated west led to a great eastward movement of population. The burdens of serfdom were much reduced in eastern Ukraine, both as a natural result of the population (and hence labor) shortage and as part of a deliberate policy to attract colonists. At the end of the 16th century, for example, peasants with one *lan* of land in Red Rus' (Galicia) owed four or five days' labor on the *fillovarok*; in Volhynia and the region west of Kiev they owed two or three days; and in Left-Bank Ukraine and the Bratslav region they paid money rent only. Peasant obligations were steadily increased, however, and by the 1640s, peasants in Volhynia and the Kiev region worked five days on the lord's estate, and peasants in Left-Bank Ukraine and in the Bratslav region worked one or two days.

Ukrainian serfs sometimes ran away illegally from their owners' estates and headed for the steppe of *Southern

and *Slobidska Ukraine, which were in immediate danger of Tatar raids. There they became *Cossacks. Cossack uprisings in the early 17th century often expressed opposition to serfdom. The *Cossack-Polish War of 1648–57, in which peasants joined the Cossack forces, resulted in the abolition of serfdom in the emergent Hetman state. But the *Cossack *starshyna* began appropriating freeholders' land and reimposing labor and other rents on the rank-and-file Cossacks. Around 1700 about a quarter of the population of Left-Bank and Slobidska Ukraine, and by the 1730s about half, consisted of peasant serfs. The reintroduction of serfdom, albeit in mitigated form, engendered conflicts between the *starshyna* and rank-and-file Cossacks and contributed to the instability in Ukraine in the late 17th and early 18th centuries and to the ability of the Muscovite authorities to intervene in the internal affairs of the Hetman state.

In Right-Bank Ukraine, where the Cossack movement had been entirely suppressed by the early 18th century, serfdom was fully reinstated. But because war and civil strife had depopulated that territory, the obligations of the serfs were not onerous in the first two decades of the 18th century. By the 1760s, however, the position of the Right-Bank peasantry had declined to perhaps its lowest point in history. The great discontent in the countryside fueled the *haidamaka rebellions of the mid-18th century.

The Russian empress Catherine II formally reinstated serfdom in Left-Bank and Slobidska Ukraine in 1783. The conquest of the northern Black Sea littoral allowed her to extend serfdom to Southern Ukraine as well. Almost simultaneously with the reinstatement of serfdom Catherine dismantled the vestiges of Cossack autonomy, destroyed the Zaporozhian Sich, and resettled part of the Slobidska Cossack population in the *Kuban. Her government also attracted foreign colonists, for the most part Germans and Serbs, to Southern Ukraine, where they formed a free and prosperous peasantry of the Western European type.

In the first half of the 19th century the serfs were the most abject, most oppressed class in the Russian Empire. Although the peasant commune elected its own elders, who dealt with the bailiff and landowner, the gentry landowner had the right to try serfs, exile them to Siberia, send them to the army, and subject them to corporal punishment. Serfs could not marry without his permission, he could sell an entire family of serfs or individual family members, and he set the amount of work that the serf was obligated to perform. Laws limited his exercise of the last two powers. Paul I limited *corvée* obligations to three days a week and prohibited the sale of serfs without land in Ukraine. Naturally, abuses occurred, but only when he was exceptionally cruel or committed murder could a landowner be deprived of the right to his human property. The land was also considered to be entirely his property, and he had the right to decide all agricultural questions. The burdens of serfdom were greatest in Right-Bank Ukraine, where the majority of peasants were owned by landlords and *corvée* prevailed. In Left-Bank and Slobidska Ukraine *state peasants, who were mainly descendants of Cossacks, predominated; they paid taxes, generally in money or in kind, to the state (see *Poll tax). Serfdom was weakest in Southern Ukraine, which was newly conquered from the Crimean Tatars and relatively uncultivated; because of a labor shortage rents were less burdensome than elsewhere in Ukraine, and landlords of-

ten leased out land to tenant farmers. The prolonged existence of serfdom in the Russian Empire retarded its economic and social development, a situation that became obvious even to the ruling class after Russia's defeat in the Crimean War in 1856. Against the background of massive social unrest in the Russian and Ukrainian countryside, serfdom was abolished in the Russian Empire in 1861.

In Galicia, which passed under Austrian rule in 1772, the position of the peasantry improved as a result of the reforms of Empress Maria Theresa and Emperor Joseph II. The imperial authorities formally limited *corvée* to three days a week (although landlords found ways to circumvent the restriction), prohibited some particularly onerous forms of rent, took steps to make the peasants legal owners of the so-called *rustical lands from which they supported themselves, restricted the traditional right of the noble landowner to inflict corporal punishment, permitted the peasants to lodge formal complaints against abuses by the landlords, and abolished personal servitude (*Leibeigenschaft*). The impact of those far-reaching reforms was undermined, however, by the entrenched power of the local Polish nobility and by the conservative reaction that gripped Austria after the outbreak of the French Revolution and the defeat of Napoleon. Peasant resistance to serfdom, often taking the form of refusal to perform labor obligations, mounted in the first half of the 19th century, and soon after the *Revolution of 1848–9 broke out, serfdom was abolished.

Serfdom was also abolished in Habsburg-ruled Bukovina and Transcarpathia in 1848. Peasant discontent in those regions had been great in the early 19th century, because the position of the serfs had declined tremendously in spite of the reforms of Joseph II. The reason for the decline was Austria's annexation of Galicia; the intense exploitation of the peasantry, characteristic of the Polish nobility there, proved an attractive model for the Magyar and Rumanian gentry of Transcarpathia and Bukovina. Bukovina, which was administratively part of Galicia, had been the scene of mass peasant rebellion in the 1840s.

As a result of emancipation in Russian-ruled Ukraine, the peasants received their personal freedom, and part of the land was sold to the village communes (see **Hromada*), to be paid in installments over the course of 49.5 years at a rate of 5 percent a year. The reform was undoubtedly favorable to the peasantry, but because the peasants still did not become landowners, and because of antiquated farming techniques, agricultural production was retarded. Peasant holdings were small. The average size of a peasant household's landholding in Ukraine in 1905 was 7.3 ha. Holdings were largest in the less populated south (8.6 ha in Kherson gubernia, 10.2 in Katerynoslav gubernia, 16.2 in Tavriia gubernia), small in Left-Bank and Slobidska Ukraine (5.4 ha in Poltava gubernia, 6.9 ha in Chernihiv gubernia, 8.0 in Kharkiv gubernia), and smallest in Right-Bank Ukraine (3.6 ha in Podilia gubernia, 4.2 in Kiev gubernia, 3.6 in Volhynia gubernia). To satisfy their hunger for land about 1.6 million Ukrainian peasants emigrated to the Russian *Far East between 1896 and 1914. Because of such a land shortage the villagers who remained in Ukraine started eyeing the disproportionate holdings of the gentry. Peasants cut wood from the landlords' forests without permission, allowed their livestock to graze on the meadows of the gentry, burned estates, and occasionally carried out attacks on the gentry and

their representatives. The number of peasant riots recorded in the late 19th and early 20th century was greater than under serfdom. Populist revolutionaries supported the peasantry's acts of defiance and demanded the nationalization of land and its transfer to those who worked it. The idea found favor even among the prosperous elements of the peasantry, who could not buy land because of its high price. It was clear that the peasantry was being impoverished as a result of landlessness, direct and indirect taxes, and the *redemption payments for land that remained from the time of emancipation. The *Revolution of 1905 demonstrated that it was impossible to continue without radical changes.

The changes came in the form of the *Stolypin agrarian reforms, which were introduced by the decree of 9 November 1906 and became law on 14 June 1910. The reforms gave great impetus to peasant migration to *Siberia and Kazakhstan, where settlers were offered financial assistance, land, and exemption from taxes. At the same time remnants of serfdom were abolished in the village, including collective responsibility for repairing roads and billeting troops and the restrictions on the right of peasants to receive passports. The Stolypin reforms led to differentiation by economic status in the peasant population. The more active, prosperous segment of the population, some 10 to 15 percent, received the opportunity to improve their farms, consolidate their landholdings, use modern equipment, and broaden their market. Ukraine, which did not have a tradition of the repartitional commune (see **Obshchina*), adapted relatively well to the reforms, and individual peasant farms independent of the communes proliferated.

As a result of the emancipation in Austrian-ruled Ukraine, the peasants became free and owners of their rustical plots. They paid an indemnity to the landowners for the loss of labor and other rents until 1898. The decade following emancipation was marked by the struggle over *servitudes, or rights to forests and pastures, but by the 1860s most of Galicia's and Bukovyna's forests and pastures had been awarded to the gentry. Throughout Habsburg-ruled Ukraine the peasantry faced land hunger. The size of the rustical plots had been reduced by the nobility in the decades preceding and during the abolition of serfdom, and because Ukrainian peasants customarily divided their land among all children, the average size of peasant landholdings declined inexorably. According to official statistics, at the beginning of the 20th century almost half the peasant holdings in Galicia and over half in Bukovyna were 2 ha or smaller. The land shortage was one of the factors motivating the large-scale *emigration of peasants from Transcarpathia, Galicia, and Bukovyna to North America and elsewhere in the decades before the First World War. In the 1860s and 1870s the Austrian government introduced compulsory education in Galicia and Bukovyna; that measure, combined with the efforts of the Ukrainian national movement (particularly organizations such as **Prosvita*), raised the cultural level of the West Ukrainian peasantry. In Transcarpathia, however, the Magyar gentry restricted educational opportunities, in particular education in Ukrainian, and prevented the formation of a Ukrainian national movement with its own voluntary associations.

During the years of revolutionary upheaval, 1917–21, armed peasants on the former territory of tsarist-ruled

Ukraine liquidated gentry estates, and those lands, as well as land owned by the government and sugar refineries, were redistributed among the peasantry. Peasants refurbished and improved their farms and increased their livestock. For the first time in many years Ukraine did not export huge quantities of grain. As a result, from 1916 to the spring of 1921 the number of livestock in Ukraine increased from 23.9 million to 31.1 million. Raids by Soviet *surplus appropriation detachments disturbed peasant agriculture as soldiers confiscated, without payment, grain and other produce that fell into their hands to feed the urban populations and the Red Army. In such circumstances the peasants did not rush to expand production, and in 1921 a catastrophe struck: the now stronger Soviet regime announced a higher demand for grain, and at the same time a drought hit southern Ukraine and destroyed the harvest. Much of Soviet Ukraine (and Soviet Russia) suffered from *famine. In the same year the government recognized the need to change its agrarian policy and instituted the *New Economic Policy, which amounted to a truce with the peasantry. The main point of the accord was the cessation of unpaid expropriations and the establishment of taxes, after the payment of which peasants could sell the products of their labor. The taxes were substantial, exceeding prerevolutionary ones, and they were supplemented by an indirect tax created by the price gap between industrial and agricultural goods. Nonetheless, the peasantry soon raised agricultural production to prewar levels. In that period peasants were permitted to lease land or equipment and to hire labor for productive purposes. The co-operative movement, especially consumer co-operatives, proliferated. The government put tax and political pressure only on the more prosperous peasants and on people connected with groups that had opposed the Soviets, such as the Ukrainian Party of Socialist Revolutionaries, the partisan movement, the Army of the UNR, and the anarchist forces of N. Makhno. Those people paid higher taxes and could not take part in the management of co-operatives, vote in elections, or be elected to village soviets. Many supplementary responsibilities also fell to their lot.

The social position of the peasantry changed fundamentally from what it had been in prerevolutionary times. Large farms virtually disappeared, and the number of landless peasants decreased. The peasantry became a uniform mass of agricultural producers and, to a degree, landowners. Their independence inspired a certain discomfort in the Bolshevik rulers. The Soviet government laid claim to absolute control over both production and ideology and distrusted the peasants both as petty independent producers and as keepers of national traditions. Its hostility to the peasants was manifested in the cruel manner in which *collectivization was imposed in Ukraine in the late 1920s and early 1930s.

The goal of collectivization was the complete transformation of the economic and social circumstances of the peasantry. The peasants were deprived of the right to own land and the instruments of production; for a while they were also deprived of freedom of movement and were obliged to work in the fields without pay for fear of punishment. The most active and wealthy peasants were arrested and deported with their families to the north, and their property was confiscated. Collectivization took the form of unexpected attacks on the prosperous portion of

the peasantry by detachments of workers, Komsomol members, Party members, and activists of the *committees of poor peasants. Everyone else was forced to enter the collective farms under threat of being repressed as *kulaks. Collective farming turned out to be extremely inefficient; the inefficiency was exacerbated by the peasants' passive mass resistance to collectivization, a resistance that included slaughtering their own animals. In 1932-3 the Soviet government created a famine in Ukraine to quell resistance. All grain and most remaining livestock were taken from the peasants, and the confiscation was accompanied by a law proclaiming the death penalty for any theft of food from a collective or government farm. By the summer of 1934, 54 percent of the villagers of Ukraine were without livestock, 64.7 percent had no cows, and 95.4 percent had no pigs. Several million peasants died, and the rest were forced to submit.

Collectivization and the famine destroyed the peasantry as a social stratum. The peasants lost not only their land but their personal freedom and were forced to labor out of fear of punishment and death by starvation. Material incentives were eliminated, and the productivity of labor naturally fell. As a result of collectivization not only the means of agricultural production but also the social position and psychology of the rural inhabitants changed. To a significant degree they lost their love for the land and their habit of working on it.

The peasants in interwar Western Ukraine, divided among Poland, Czechoslovakia, and Rumania, escaped collectivization in the 1930s and the accompanying famine. Under Polish and Rumanian rule their position seems to have declined relatively from the late Austrian period. The Polish and Rumanian regimes undertook *land reforms that did nothing to improve the peasants' position. Estates that were divided in Ukrainian-inhabited areas were generally distributed among ethnic Polish and Rumanian colonists. Because of immigration quotas in the United States and Canada, the traditional solution to rural overpopulation, emigration to North America, virtually ceased to play a role. The Great Depression of the 1930s increased the misery of the peasantry. The only positive development was the rapid growth of the *co-operative movement, which provided increased and better opportunities for the peasantry to market surplus agricultural produce, particularly dairy products and eggs. In Transcarpathia the Ukrainian peasantry remained very poor, but the reformist Czechoslovak regime introduced elementary education in the local language for peasant children and implemented a land reform that, although slow and modest, benefited Ukrainian peasants rather than non-Ukrainian colonists. As a result of the Second World War Western Ukraine passed under Soviet rule, and by the mid-1950s the peasant farms there were completely collectivized.

In the postwar period the production of grain and non-food crops (eg, cotton and flax) and, to some extent, animal husbandry were the responsibility of the collective farms. A portion of the animals, however, remained the personal property of the collective farmers. In addition each village household had a minute *private plot around its house, which fed its members and provided potatoes and vegetables not only for the villagers but for the city as well. From that plot the peasant was supposed to supply the government with milk and meat and pay taxes. For a

while it seemed that the system was producing foodstuffs successfully. N. Khrushchev improved the collective farmers' lot by substantially raising their pay, by gradually restoring their right to move about the country, and by introducing at least a small level of retirement benefits for collective farmers. At the same time huge expanses of virgin lands were colonized, and agricultural production actually rose somewhat. In the 1970s and 1980s, however, the food supply worsened noticeably, because the collective farms could no longer feed the population. One of the main causes of that circumstance was the fall in labor productivity on the private plots. The new generation of peasants raised solely in the collective-farm system turned out to be incapable of productive labor. Young people went off to study or moved away after their military service to work in the cities. The collective-farm peasantry has even taken on the characteristics of an age cohort, consisting more and more of the elderly.

Peat industry. A branch of the *fuel industry that extracts and processes peat, mainly for home-heating but also for use in the chemical, construction, and other industries. Peat was first used in Ukraine in the 17th century. The major peat deposits are in Irdyn (Cherkasy oblast), Bucha (Kiev oblast), Zamhlai (Chernihiv oblast), Shostka (Sumy oblast), and Radekhiv (Lviv oblast). The peat is dried and pressed into briquettes in plants in Zhytomyr, Sumy, Chernihiv, and Lviv oblasts. The briquettes output rose from 75,000 in 1958 to approx 800,000 in 1975. Their use increased dramatically during the industrialization drive of the 1920s and 1930s. Peat output has declined, from 4.7 million t in 1960 to 4.1 million t in 1970, 1.6 million t in 1980, and 2.2 million t in 1987. The industry's share in the fuel industry has also diminished. The industry was not a priority in Soviet economic planning.

Peat moss (*Sphagnum*; Ukrainian: *sfagnum*). A perennial plant of the family Sphagnaceae, including 300 species of the single genus. The plants grow to up to 30 m from their roots and form dense hydrosopic thickets in ponds and swamps and on lakeshores. Every year the lower stems die off and form peat, while other branches continue to grow and develop. In Ukraine peat moss is used as fuel and stable litter, in the production of heat insulation sheets, and as packaging material for the protection of fruit and flowers during shipping. Dried sphagnum has also been used for surgical dressings, bedding, diapers, and wicks.

Pechenegs (*pechenihy*). The name of a Turkic tribal federation that dominated the southern steppe region of what is today Ukraine from the late 9th to the mid-11th century. The Turkic appellation *be-ča-nag* ('brother-in-law') was first used in the 8th century to refer to members of the Pecheneg ruling clan. The Pechenegs (Patzinaks in Byzantine sources) originated beyond the Aral Sea near the mid-stream of the Syr Darya River in Central Asia. Their center was near present-day Tashkent. The sedentary ruling stratum (the Kangar) was of Iranian origin. In the early 9th century the Pechenegs were defeated by the Oghuz (*Torks) and forced to migrate from Central Asia to the lands between the Ural and the Volga rivers, where they warred continuously with the Khazars. In the 880s the Khazars and Oghuz jointly defeated the Pechenegs and again forced them to flee westward. In 889 the Pechenegs attacked the nomadic Magyars living between the Don and the Dnieper and forced them west of the Dnieper. Later they drove the Magyars across the Danube and themselves occupied the steppe between the Don and the Danube.

The Pecheneg domain was divided into two wings separated by the Dnieper River and ruled by the two highest-ranking leaders. The ruler of the western wing was the senior of the two and bore the imperial title of kagan. Each wing had four provinces subdivided into five districts. Each of the 40 districts provided a division of 10,000 mounted warriors. They were masters of lightning mounted maneuvers and were renowned for their art of

fighting from fortified wagon encampments. The Pecheneg regime was a kind of military democracy, in which all important decisions were made by a general council. The kagan's seat and the council's meeting place were probably located in the Ros Valley.

Until 1036 the Pechenegs had an estimated population of 2.8 to 3 million. By 1048, when their domain was left with only 11 districts west of the Dnieper, their population had been reduced to approx 800,000. Like all nomadic societies the Pechenegs were not ethnically homogeneous or unilingual. The ruling elite spoke Iranian, whereas most of the population spoke Turkic with a significant admixture of Hunno-Bulgar elements. By the time the Pechenegs had arrived in Ukraine, they were familiar with various religions, including Christianity, Buddhism, and Islam. They were most attracted to Manicheism, and Archbishop Bruno of Querfurt's mission to convert them (ca 1007), which was aided by Grand Prince Volodymyr the Great of Kiev, was unsuccessful. Islamic missionaries, however, had managed to convert most of the Pechenegs by 1010.

The Pechenegs' economy was based on trade and livestock. Their main trading partners were Rus', which bought their cattle, sheep, and horses, and the Byzantine colony of Chersonese Taurica in the Crimea, which bought their hides and wax. The Pechenegs also served as intermediaries in trade with Asia and ensured the safety of the international trade routes. They did not practice slavery.

To retain their mediating role among their neighbors the Pechenegs entered into coalitions with Byzantium (in 914, 968, and 972), Rus' (in 944), and other states, usually against former allies. They often invaded Rus' with the encouragement of Byzantium. In 968 they attacked Kiev, thereby forcing Grand Prince *Sviatoslav I Ihorevych to cut short his campaign against Bulgaria. In 972 a Pecheneg force led by Kagan Kuria routed Sviatoslav's army at the Dnieper Rapids and killed the prince. During Volodymyr the Great's reign the Pechenegs attacked Pereiaslav in 988 and 993, Vasylkiv in 996, and Bilhorod in 997. To defend his realm Volodymyr had lines of fortifications built along the Stuhna River in Right-Bank Ukraine and along the Desna, the Oster, the Trubizh, and the Sula rivers in the Left Bank. He also hired Turk and Oghuz mercenaries and began recruiting the Torks as military settlers (later known as *Chorni Klobuky) to defend his frontier against the Pechenegs. The Pechenegs were often used by the Rus' princes in internecine conflicts, until 1036, when the army of Grand Prince Yaroslav the Wise crushed them near Kiev.

From the early 1040s the Pechenegs were constantly confronted by the Torks, who themselves had been forced to migrate by the Cumans. In the late 1050s the Pechenegs lost control of the entire Left-Bank steppe and later the Right Bank and were forced by the Cumans to migrate west into the Danubian Byzantine territories or across the Carpathians into Hungary. In 1091 Byzantium was saved from the Pecheneg threat by the unexpected arrival and support of the Cumans, which enabled Emperor Alexius I Comnenus to rout the Pechenegs. After another defeat in 1122, the Pechenegs disappeared as an independent force and were assimilated among the Cumans and Bulgars. Some of them entered the service of Rus' princes (documented for the years 1097–1169); most of those later migrated to Hungary, where they managed to remain autonomous until the 14th century, when they were as-

simulated. Geographic traces of their presence in Ukraine include Pechenihiy, in Chuhuiv raion, Kharkiv oblast, where archeologists discovered a 9th-century fortified settlement (possibly a political center); Pecheniuihy, in Novhorod-Siverskyi raion, Chernihiv oblast; and Pechenizhyn, in Kolomyia raion, Ivano-Frankivske oblast.

Pavlo Pecheniha-Uhlytsky

Pecheniha-Uhlytsky, Pavlo [Pečeniha-Uhlyts'kyj] (Pecheniha-Ouglytzky, Paul), b 20 June 1892 in Pechenihiy, Vovchanske county, Kharkiv gubernia, d 2 July 1948 in New York. Composer, conductor, double-bass player, and teacher. He attended the Russian Musical Society school in Kharkiv, studied (1912–14) at the St Petersburg Conservatory under F. Yakymenko, A. Glazunov, and A. Tche-repnin, and then taught theory and composition (1914–20) at the conservatories in St Petersburg, Rostov, and Yalta. He settled in New York in 1922 and worked for the National Broadcasting Corporation as a composer, orchestrator, and conductor. From the mid-1930s he was an important organizer of Ukrainian musical life in New York City. On 8 January 1939 his compositions were performed by the NBC Radio Chorus and Philharmonic Symphony Society Orchestra at Carnegie Hall in the first Ukrainian symphonic concert in North America. His major works include the opera *The Witch* (after Ye. Hrebinka, libretto by S. Charnetsky, 1936–40), the ballet *Legin'* (Young Lad; libretto by D. Chutro, 1938), the tone poem *Ukraina* (after T. Shevchenko's *Haidamaky*), three string quartets, and the cantata *Biut' porohy* (The Rapids Roar; text by T. Shevchenko) for mixed chorus and orchestra. He also wrote a score for the *Liturgy of St John Chrysostom* and other works for chorus, solo songs to texts by T. Shevchenko and others, and arrangements of Ukrainian folk songs for chorus and solo voice.

R. Savytsky

Pechenihiy [Pečenihiy]. IV-17. A town smt (1986 pop 6,700) on the Donets River in Chuhuiv raion, Kharkiv oblast. In the mid-17th century the town was fortified, and became a company center in Izium regiment. In the 19th century it was part of Vovchanske county in Kharkiv gubernia. By 1896 its population had reached 6,600. Today it has a food-processing plant and a fishery. The Pechenihiy Reservoir is located nearby.

Pechenihiy Reservoir. A body of water created in 1962 on the Dinets River in Kharkiv oblast. It covers 86.2 sq km and has a length of 65 km and a maximum width of 3 km. Its capacity is 384 million cu m. The reservoir supplies Kharkiv with potable water and the surrounding area with water for irrigation and fish farming.

Pechenizhyn [Pečenižyn]. V-5. A town smt (1986 pop 5,400) in the Carpathian foothills of Kolomyia raion, Ivano-Frankivske oblast. It was first mentioned in historical documents in 1443. It has a furniture manufacturing complex and a building-materials factory. Its regional museum is dedicated to O. *Dovbush, who was born in the town.

Pecherska Lavra. See Kievan Cave Monastery.

Pedagogical education. A system for acquiring the theoretical and practical knowledge and skills required to teach others in an educational institution. Until the end of the 18th century there were no schools in Ukraine that provided a systematic course of pedagogical studies. Elementary-school teachers of the day usually received a general education in monasteries or in parish and *brotherhood schools; some were even self-taught preceptors or *itinerant tutors. Most teachers in secondary schools or institutions of higher learning were (from the late 16th century) graduates of the *Lviv Dormition Brotherhood School, the *Ostrih Academy, the *Zamostia Academy, the *Kievan Mohyla Academy, and similar institutions, in which many of the instructors had been trained in other Slavic countries or Western Europe.

Central and eastern Ukraine to 1921. A new development in the early 19th century was the establishment of pedagogical institutes for training teachers of *schools for children of the clergy, *county schools, and *gymnasiums at Kharkiv University (1811) and Kiev University (1834); some instruction in the field of pedagogy was also provided by the Kiev Theological Academy. Institutions for training teachers of general education schools were formed only in the latter 19th century, starting with the Provisional Pedagogical School in Kiev (1862). Four-year *teachers' seminaries were formed later in Korostyshiv (1869), Kherson (1872), Pereiaslav (1878), and other locations; by 1917 there were 26 such institutions in Ukraine (out of a total of 171 in the Russian Empire).

These seminaries prepared only a small portion of the total number of teachers in Ukraine. A more significant number received their training through supplementary pedagogical classes, which were added on as an eighth year of study at women's gymnasiums in 1870 (in 1892 some schools expanded the classes to a two-year term); pedagogical classes were also added to the curriculum of *eparchial schools in 1900 as a supplementary seventh year of study. Students graduated from the pedagogical

classes with the right to teach in primary schools or in the junior levels of women's gymnasiums. Teachers of *parochial schools received training at teachers' schools under the jurisdiction of the Holy Synod, which also oversaw a two-year school program for teachers of literacy schools. Teachers could upgrade their skills at four-to-six-week summer pedagogical courses organized (from the 1860s) by zemstvos, town councils, and literacy societies.

The training of teachers for *municipal schools (established in 1872 and reorganized as upper elementary schools in 1912) took place in *teachers' institutes under the jurisdiction of the Ministry of Education. These schools, with a three-year course of studies, had a higher educational standard than the teachers' seminaries. The first such institute was established in 1874 in Hlukhiv, and by 1917 there were 11 of them in Ukraine (out of 47 in the Russian Empire). Advanced training for female teachers at kindergartens and the junior levels of gymnasiums was available (from 1908) at the Froebel Institute in Kiev and through Froebel courses offered in Kharkiv. Secondary-school teachers were trained at Kiev, Kharkiv, and Odessa universities, the Kiev Theological Academy, the *Nizhen Lyceum, and advanced pedagogical courses offered in Kiev, Kharkiv, and Odessa.

During the revolutionary period (1917–21) the efforts of pedagogical institutions were supplemented by the founding of the Ukrainian Pedagogical Academy in Kiev (1917), the establishment of new universities (with pedagogical faculties), and the organization of private and public pedagogical courses (the Ministry of Education alone sponsored 64 such courses during the summer of 1918).

Western Ukraine to 1945. Educational reform in the Austrian Empire in 1877 demanded that teachers in lower-level state (trivium) schools be graduates of six-grade *normal schools (located in Lviv and Chernivtsi). The teachers of state primary schools received their training at two-year courses in teacher preparatory schools (five of these were established in Galicia). Precentors normally taught at parish schools. Only a small number, mainly those who had attended a precentors' institute established in Peremyshl in 1823, had any formal pedagogical education. A major overhaul of the education system in 1869 centralized pedagogical education into four-year teachers' seminaries, including some in which the language of instruction was Ukrainian and Polish. The first such institution in eastern Galicia was established in Lviv in 1871, and by the end of the 19th century there were eight of them in the region (six for men, two for women). In addition four private Ukrainian seminaries were established in 1903–12. In Bukovyna a state-run teachers' seminary was established in Chernivtsi in 1871 (a separate division for teaching women was added in 1872). The instruction there was almost totally in German until 1909, when separate instruction in Ukrainian was made available for men. Plans for Ukrainian instruction for women did not materialize, and consequently the *Ukrainska Shkola society established a private Ukrainian teacher training seminary for women in 1910 (Ukrainian instruction for women subsequently was made available at the state teachers' seminary). Three teachers' seminaries were located in Transcarpathia. Secondary-school teachers could obtain their training at universities in Lviv, Chernivtsi, Vienna, Budapest, or elsewhere.

During the interwar period a number of formerly bilin-

gual Polish-Ukrainian teachers' seminaries in eastern Galicia were totally Polonized. In the Lviv school district in 1930, a total of 10 Ukrainian-Polish teachers' seminaries existed (of which 8 were privately run), in comparison with 43 in which the language of instruction was exclusively Polish. In Bukovyna, state policy aggressively pushed for the total Rumanization of education and brought about the close of the private Ukrainian teachers' seminary and the end of Ukrainian-language instruction at the state school (1923–4). During the Second World War nine teachers' seminaries (each with a separate section for early childhood education training) were operating in the Western Ukrainian lands under German occupation.

Ukrainian SSR. With the establishment of Soviet rule the system of pedagogical education was overhauled, starting with the formation of *institutes of people's education in 1920. These institutes were formed from a combination of university-level pedagogical courses, advanced courses for women studying education, and teachers' institutes. They prepared teachers for the upper levels of seven-year schools as well as vocational schools. Three-year *pedagogical tekhnikumums were also established in 1920, mainly on the basis of teachers' seminaries. They prepared teachers for primary classes and early childhood education. Underlying these efforts was the desire on the part of the Ukrainian authorities to broaden the base of literacy in the Ukrainian SSR quickly, extensively, and in the Ukrainian language, despite a chronic shortage of teachers (in 1923 approx 45,000 teachers were available to fill an estimated 100,000 positions needed).

The Ukrainian educational structure was brought under the control of a uniform USSR-wide model starting in 1930. The institutes of people's education were reorganized that same year into specialized components, such as *institutes of professional education and *institutes of social education; further changes in 1933 placed the former within the structure of the university system and saw the latter reorganized into *pedagogical institutes. With the advent of compulsory education measures in 1935, two-year teachers' institutes were added to the pedagogical education structure. In 1937 the pedagogical tekhnikumums were restructured as *pedagogical schools, with a two-year program for secondary-school graduates and four-year programs for others. By 1940 there were 20 pedagogical institutes (with 15,860 students), 47 teachers' institutes (15,430 students), and 56 pedagogical schools (20,120 students); in 1950 the numbers of these institutions stood at 25, 33, and 82 respectively. Administrative changes in the early 1950s redistributed students from the teachers' institutes to the pedagogical institutes and schools. Since that time the structure has not seen major changes, although pedagogical faculties have been established in conjunction with specialized institutions (eg, polytechnical institutes, conservatories, physical culture institutes, the Kiev Art Institute). Correspondence courses, first initiated in 1927, have also become a common feature of pedagogical education. Statistics for 1989 indicate that there were 29 pedagogical institutes, with an enrollment of approx 146,700, and 50 pedagogical schools, with an enrollment of approx 77,600.

Outside Ukraine. In the interwar period the number of Ukrainian schools in Transcarpathia (then under Czechoslovak rule) greatly increased, and the number of teacher training facilities grew from three to four. In addition Prague emerged as an important center of Ukrainian edu-

cation, including pedagogy. A chair of Ukrainian language and literature was established at Charles University in Prague to instruct high-school teachers, and the *Ukrainian Free University (UVU) in Prague offered courses in pedagogical history and methodology. Transcarpathia was annexed by the USSR after the Second World War, and its educational institutions were brought into line with Soviet ones; UVU transferred its operations to Munich, where it continued its courses in pedagogical education.

In the absence of Ukrainian school systems or an extensive network of Ukrainian general education schools in the West, Ukrainian pedagogical education there has by and large focused on developing materials and language-instruction methodologies (together with some teacher training) for community-based *ridna shkola* (native school [self-run]) programs, which frequently supplement the education of Ukrainian children in state-run or regulated school systems. In 1967 an attempt was made to co-ordinate such efforts under the World Social-Educational Coordinating Council of the World Congress of Free Ukrainians. In those countries in which Ukrainian has been integrated into the public school system or where private Ukrainian schools have been established, more systematic and substantial activity in the area of Ukrainian pedagogical education has taken place.

Pedagogical institutes (*pedahohichni instytuty*). Institutions of higher learning which train teachers for all types of schools and specialized secondary or professional-technical institutions. In the first half of the 19th century in Russian-ruled Ukraine, there were pedagogical institutes located at the universities of Kharkiv (founded in 1811) and Kiev (founded in 1834). The four-year course of study at these institutes prepared teachers for the gymnasiums and district schools. In 1858 the pedagogical institutes were abolished, and in 1860 pedagogical courses were introduced at universities. These courses were liquidated by the university reform of 1863, the result being a shortage of qualified teachers for secondary schools. The need for pedagogical training in the empire was fulfilled by two historico-philological institutes, one of them the *Nizhen Lyceum in Ukraine.

After the Revolution of 1917 only a few higher-level schools were designated as pedagogical institutes. It was not until 1933 that pedagogical institutes, formed on the basis of the *institutes of social education, became the main type of higher-level pedagogical institution. In 1940 there were 20 such institutes in the Ukrainian SSR, with a total of 15,860 students. The number of institutes in Ukraine increased in the 1950s, when the *teachers' institutes were closed, and a number of them were converted into pedagogical institutes. In 1968 there were 32 pedagogical institutes in Ukraine. In 1989 there were 29, including 2 foreign-language institutes, with a total enrollment of 146,700 and 24,600 students respectively.

Pedagogical institutes are under the jurisdiction of the Ukrainian Ministry of Education. Their program of study lasts 5 years for the training of teachers with 2 or more areas of specialization, and 4 years for students with only 1

area of specialization. Some institutes have graduate research departments for the training of instructors for higher institutions of learning in pedagogical and other specialized disciplines. Institutes prepare textbooks and other educational materials for schools. In Ukraine pedagogical institutes train teachers in 38 specializations.

I. Bakalo, N. Freeland

Pedagogical periodicals. Publications addressing questions and issues of upbringing and education. Because of the political, social, and national implications of education, pedagogical periodicals have often played a role in the larger historical struggles of Ukraine and have always been affected by their outcome.

The first Ukrainian-language pedagogical journal to be published was the quarterly *Dom i shkola*, edited by I. Hushalevych. Published in Lviv in 1864–5, the journal advocated co-operation between school and church and discussed contemporary social, cultural, and economic issues in addition to purely pedagogical and religious topics. The same range of subjects was covered in the Lviv weekly *Uchytel'*, edited by M. Klemertovych (1869–74, 1880). Educational topics were covered extensively in the newspaper **Pys'mo do hromady*. Other fortnightly pedagogical journals in Galicia included *Hazeta shkol'na* (Lviv 1875–9), which advocated the use of Ukrainian in schools and was edited by O. Partytsky, **Shkol'na chasopys'* (Lviv 1880–9), edited by H. Vretsona, and **Narodna shkola* (Kolomyia 1875).

The first Ukrainian pedagogical periodical in Transcarpathia was the weekly **Uchytel'* (Uzhhorod 1867), edited by A. Ripai. From 1868 to 1873 the Hungarian Ministry of Education published the weekly **Hazeta dlia narodnykh uchytel'ei*. Both newspapers addressed national, political, economic, and cultural questions as well as strictly educational issues.

Two issues of a pedagogical journal edited by S. Smal-Stotsky and published by the Ruska Shkola society appeared in Chernivtsi in 1888 and 1891.

The fortnightly journal **Uchytel'*, which succeeded *Shkol'na chasopys'*, was published by the Ruthenian Pedagogical Society (later *Ridna Shkola*) in Lviv in 1889–1914. It became the leading journal of its kind and played an important role in the later development of the pedagogical press. The Ukrainian Teachers' Mutual Aid Society published the journal *Uchytel'ske slovo* in 1912–39. Other pedagogical journals published in the first two decades of the 20th century included the following: in Bukovyna, the fortnightlies **Promin'* (1904–7) and **Kamieniari* (1908–14); in Lviv, two short-lived periodicals, *Luna*, a semi-official organ of the Ukrainian Teachers' Mutual Aid Society, edited by Yu. Lovytsky in the first half of 1907, and *Nashe slovo*, which appeared in the latter half of 1907, edited by P. Kyrchiv and O. Vlasichuk; **Prapor* (1908–12), published in Lviv and then Kolomyia; and *Ukraïns'kyi uchytel'* with the insert *Ridna shkola*, published in 1911 in Stanyslaviv, under the editorship of I. Butsmaniuk. **Nasha shkola* was a scholarly journal published quarterly in Lviv by the *Teachers' Hromada, an organization of elementary-school teachers in Galicia and Bukovyna.

The first pedagogical journals in Russian-ruled Ukraine – *Pedagogicheskii vestnik* (Yelysavethrad [now Kirovohrad] 1881–3) and *Shkolnoe obrazovanie* (Odessa 1889–92) – appeared in Russian. The first Ukrainian-language pedagogical journal was **Svitlo*, published in Kiev (1910–14) by the

Ukrainskyi Uchytel Publishing House under the editorship of H. Sherstiuik and then V. Prokopovych. The nationally conscious teachers who gravitated toward *Svitlo*, which advocated the use of Ukrainian in schools, formed the All-Ukrainian Teachers' Union in 1917. This group published **Vil'na ukrains'ka shkola* in 1917–19. Other pedagogical journals in eastern Ukraine were *Nova shkola* (Poltava, 1917–18) and *Osvita* (Kamianets-Podilskiy, 1919).

In Western Ukraine two journals were published irregularly by teachers' societies in 1919, *Nova shkola*, in Drohobych, and *Uchytel's'kyi holos*, in Kolomyia. *Uchytel's'ke slovo* remained the most influential journal of its kind in the interwar period and published the supplements **Shliakh vykhovannia i nauchannia* and *Metodyka i shkil'na praktyka* (1930–9). The Teachers' Hromada society published the monthly *Svitlo* (1920–1), edited by M. Halushchynsky, and **Ukrains'ka shkola* (1925–39). Both journals were in effect continuations of *Nasha shkola*. **Ridna shkola*, published in 1927 and 1932–9, was the organ of the private Ukrainian school society of the same name. In 1938–9 the **Ukrainska Zakhoronka* society published a journal devoted to preschool education, *Ukrains'ke doskillia*.

Four monthly pedagogical journals were published in Uzhhorod and Mukachiv in Transcarpathia in the interwar period: *Uchytel'* (1920–36), the organ of the School Administration of Subcarpathian Ruthenia, the Russophile **Narodnaia shkola* (1921–38), and **Uchytel's'kyi holos* (1930–9) and *Nasha shkola* (1935–8), both organs of the Teachers' Hromada of Subcarpathian Ruthenia.

Pedagogical periodicals in Soviet Ukraine in the 1920s reflected the polemical battle being waged among three pedagogical camps. The first camp advocated the creation of labor schools with a national basis but adapted to Soviet conditions. Journals that supported this policy included *Osvita* (1920), published in Kiev; the newspaper *Narodnyi uchytel'* (1925–30), published in Kharkiv; the Kharkiv journal *Narodnyi uchytel'* (1926–7); and *Kuznia osvity* (1928–9), published in Kiev. Numerous bulletins also expressed the positions of this group. The second camp espoused modern Western pedagogical theories. Its approach was championed by **Ukrains'kyi visnyk eksperymental'noi pedahohiky ta refleksolohii* (1925–30).

The positions of the third camp, represented in the educational policy of the Ukrainian SSR Commissariat of Education, faithful to Marxist-Leninist precepts but independent of the policy of the RSFSR, were advanced in several journals: *Narodna osvita* (1919), published in Ukrainian and Russian in Kiev; *Proletars'ka osvita* (1920–1), published in Kiev; and the official organs of the People's Commissariat of Education of the Ukrainian SSR, **Shliakh osvity* (1922–30) and **Radians'ka osvita* (1923–31), both published in Kharkiv.

With the onset of Stalinism and the official condemnation of all three of these approaches to education, most of the pedagogical press of the 1920s and early 1930s was suppressed and replaced by orthodox Stalinist publications – *Za markso-lenins'ku pedahohiku* (1931–2) and *Za masovu komunistychnu osvitu* (1931–3). In this period the Commissariat of Education also established three new organs: *Komunistychna osvita* (in place of *Shliakh osvity*) and *Za komunistychnu vykhovannia doshkil'nyka*, both published in 1931–41, initially in Kharkiv and later in Kiev, and *Pedahohika i metodychna literatura* (Pedagogy and Methodological Literature), published in 1938–41 in Kiev.

During the Second World War pedagogical periodicals in Soviet Ukraine ceased publication, and after the war they were replaced by new journals. The Ministry of Education of the Ukrainian SSR published three monthlies: the scholarly journal **Radians'ka shkola*; (now *Ridna shkola*) since 1945; the methodological journal **Doshkil'ne vykhovannia* (founded in 1951); and the methodological journal **Ukrains'ka mova i literatura v shkoli*, established in 1963 through the merger of the monthly *Ukrains'ka mova v shkoli* and the bimonthly *Literatura v shkoli*. **Radians'ka osvita* (now *Osvita*), a newspaper for teachers, has been published since 1940. In addition, since 1962, nine specialized serials dealing with problems of pedagogical methodology have been founded.

Ukrainian pedagogical periodicals have also been published by émigré Ukrainians. The Ukrainian Teachers' Labor Alliance published *Ukrains'ka shkola* in 1942–3 in Cracow, under the editorship of P. Isaiv. Isaiv also edited a journal of the same name in Augsburg, Germany (1947–8). In New York **Ridna shkola* (1918) and *Uchytel'ski visty* (1928–9) were both intended primarily for preceptors-teachers. In Toronto and later in the United States V. Lutsiv edited and published *Zhyttia i shkola*, a journal for parents and teachers, and *Uchytel's'ke slovo* (1955–8), a methodological journal. In 1969 the Saskatchewan Teachers of Ukrainian started publishing **Tema*, a quarterly magazine devoted to problems of Ukrainian language education. In 1979 the School Council of the Ukrainian Canadian Committee launched the magazine *Ukrains'kyi uchytel' v Kanadi*. The school boards of the provinces of Alberta, Saskatchewan, and Manitoba all have publications related to their Ukrainian-English bilingual school programs, and parents' organizations in those provinces publish various bulletins and newsletters in support of bilingual education. In 1976 *Informatyvno-metodychnyi lystok* was founded in Melbourne by the Ukrainian Central School Council of Australia.

C. Freeland, S. Yaniv, B. Krawchenko

Pedagogical schools (*pedahohichni shkoly* or *uchylyshcha*). Specialized secondary schools for the training of general elementary-school and preschool teachers. They were established in 1937 on the basis of the pedagogical *tekhnikums* (est 1920).

These institutions train general teachers for grades one to four of elementary schools, senior Pioneer leaders (until 1991), art, music and singing, preschool, and physical education teachers, and industrial arts and drafting instructors for grades four to eight. Students who have completed only the first 8 years of education before entering the schools enroll for a 3- or 4-year program, which completes their general education; those with a complete secondary education enroll for 2 years. Much time is devoted to training in practical teaching and work experience. The program of instruction revolves around three cycles of learning, social-political, pedagogical, and specialization. Study of at least one musical instrument is compulsory.

In 1966–7 there were 38 pedagogical schools in Ukraine, with a total enrollment of 33,000. In 1988–9 the number of such schools stood at 50, with a total enrollment of 77,600.

Pedagogical societies (*pedahohichni tovarystva*). Volunteer community organizations of teachers, public education activists, and pedagogical scholars that aim to

broaden pedagogical knowledge and understanding, foster the development of solutions to existing problems, and address questions and issues in the theory and practice of education and upbringing.

These societies first appeared in Western Ukraine in the 19th century: the Ukrainian Pedagogical Society (est 1881 and renamed the *Ridna Shkola society in 1926), the Ruska Shkola society in Chernivtsi (est 1887 and renamed *Ukrainska Shkola in 1908), the Ukrainian Teachers' Mutual Aid Society in Lviv (est 1905), and the *Skovoroda Society of Higher School Teachers (est 1908). The *Pedagogical Society of Subcarpathian Ruthenia existed in Transcarpathia in 1923–34. In 1941–4 the *Ukrainian Teachers' Labor Alliance operated under the auspices of the Ukrainian Central Committee in Cracow and Lviv.

In Russian-ruled Ukraine the earliest societies were the Ushinsky Kiev Pedagogical Society (est 1899), the Froebel Kiev Pedagogical Society (est 1908), and the Kiev District Pedagogical Society (est 1916).

A number of new pedagogical societies were formed in Ukraine in the wake of the 1917 Revolution. In 1917–20 the *Society of School Education functioned in Kiev. Also in Kiev a Pedagogical Society functioned as a part of the All-Ukrainian Academy of Sciences from 1925; it had a branch in Kharkiv. This society was liquidated in the early 1930s. From 1929 to 1935 the Society of Marxist Pedagogues had a branch in Kharkiv. In 1960 the Pedagogical Society of the Ukrainian SSR was organized. In 1962 it had some 40,000 members. In addition the *Znannia Society of the Ukrainian SSR has a pedagogical division. Before the disintegration of the USSR in 1991, several independent organizations were established that include pedagogical activity in their programs. Among the most important is the Taras Shevchenko Ukrainian Language Society, founded in 1988.

Of the Ukrainian pedagogical societies outside Ukraine, the most active have been the *Ukrainian Pedagogical Society in Prague (1923–45), the *Ukrainian Teachers' Federation of Canada (since 1949), the Ukrainian Educational Council in the United States, and the Union of Ukrainian Teachers and Educators in Great Britain. In the 1980s the Manitoba Parents for Ukrainian Education group and the Alberta Parents for Ukrainian Education group were formed to promote Ukrainian-language education.

N. Freeland, B. Krawchenko

Pedagogical Society of Subcarpathian Ruthenia (Pedahohichne tovarystvo Pidkarpatskoi Rusy). A pedagogical society with a Ukrainophile orientation, established in Uzhhorod in 1924 and transferred to Khust in 1938. It published a series of elementary- and secondary-school textbooks, by educators such as O. Markush, Yu. Revai, F. Ahii, and A. Voloshyn, as well as the children's magazine *Nash ridnyi kraj* (1922–38) and a journal of regional studies, *Pidkarpats'ka Rus'* (1923–36). The president of the society was A. Voloshyn. It was suppressed when the Hungarians annexed Carpatho-Ukraine in 1939.

Pedagogical tekhnikums (*pedahohichni tekhnikumy*). Institutions of secondary learning in Ukraine, established in 1920. They trained teachers for grades one to four of the general elementary-school system, preschool teachers, and instructors in political education institutions, such as clubs and libraries. Tekhnikum students were graduates

of seven-year elementary schools. Social, general educational, and pedagogical courses were taught at the tekhnikums. The three-year program of the tekhnikums also included some practical pedagogical training. In 1927 there were 61 pedagogical tekhnikums in Ukraine, with 8,990 students (of which 7,620 were Ukrainian) and 920 staff. In over two-thirds of the tekhnikums, Ukrainian was the language of instruction. In 1937 the tekhnikums were reorganized into *pedagogical schools.

Pedagogy. The discipline which studies education, learning, and child-rearing.

The earliest expression of pedagogical ideas is found in the oral folklore (epic folk songs, folktales, proverbs) of Kievan Rus'. Some pedagogical notions were subsequently expressed in the Testament of Prince Volodymyr Monomakh, *Poucheniie ditiam* (An Instruction for [My] Children, ca 1117). In the 11th and 12th centuries several collections appeared featuring native Kievan Rus' writing, as well as translations of classical and Byzantine authors on the moral and religious rearing of children.

After the collapse of Kievan Rus', centers of education and culture shifted to the *brotherhood schools in Lviv, Lutske, Ostrih, and later, Kiev. The emergence of printing in the mid-16th century was a powerful impetus to the development of educational and didactic literature. The need to defend the Ukrainian Orthodox brotherhood schools and the values they upheld from encroachments from Polish Catholic institutions served as a further stimulus to pedagogical thought in this period. Major figures of the brotherhood schools, such as Y. *Boretsky, M. *Smotrytsky, K. *Stavrovetsky-Tranquillon, I. *Vyshensky, and L. *Zyzanii, published works which dealt with the principles, form, and methods of instruction, and which extolled the benefits of education.

The Kievan Mohyla College (transformed into an academy in 1701) was the center of pedagogical study in Ukraine, beginning in the second half of the 17th and continuing through the 18th century. Its professors and graduates played an important role in the development of pedagogical thought in Ukraine. Noteworthy among them were I. *Galiovsky, I. *Gizel, whose work *Sinopsis* (1674) was the first textbook to be published in Ukraine, and S. *Polotsky, who emphasized the importance of learning and supported the principle of visual methods of instruction.

The educational ideas of H. *Skovoroda had a considerable influence on the development of pedagogical thought in the second half of the 18th century. He defended the principle of the development of a person's natural abilities and demanded that education be made available to all classes of society, including women.

The rise of *populism, a movement which stressed popular enlightenment, brought the question of education to the forefront. But, the development of pedagogy as a discipline and research on the history of education began on a significant scale in Russian-ruled Ukraine only in the 19th century. A chair of pedagogy was created at Kiev University in 1850 and was occupied in 1851 by S. *Hohotsky, a philosopher and the author of works on the theory and history of education. Important figures in the development of pedagogical thought in the second half of the 19th century were F. Bemmer, an advocate of humanist and purposeful instruction; M. *Levytsky, who developed

a methodology for elementary education; and most important, K. *Ushinsky, who wrote prolifically on the theory of education and instruction and played a leading role in the establishment of pedagogy as a separate discipline. Notable contributions were also made by the Russian physician and educator N. Pirogov, who was active in Ukraine and advocated the idea of a uniform system of general education; Baron N. Korf, an organizer of *zemstvo schools in Ukraine; and I. Derkachov (Derkach), a Ukrainian follower of Ushinsky and the author of over 50 school textbooks. Toward the end of the 19th century Khrystyna *Alchevska developed ideas on adult education, T. *Lubenets wrote on elementary education, and S. *Rusova wrote on public education.

Important questions of pedagogy, such as the organization of schools, instruction in the native language, improvement of the content and method of instruction, the education of women, and professional and technical training, were discussed in various periodicals which appeared in the second half of the 19th century, such as **Osnova*, the weekly **Chernigovskii listok*, the journal **Pedagogicheskii vestnik* (published in 1881–3 in Yelysavethrad), the newspaper **Shkolnoe obrazovanie* (Odessa 1889–92), and the journal **Kievskaiia starina*. (See also *Pedagogical periodicals.)

Research on the history of education and schools in Ukraine also began in the second half of the 19th century. Significant contributions were made by N. Lavrovsky, O. Lazarevsky, M. Drahomanov, and B. Hrinchenko.

The chairs of pedagogy at Kiev, Kharkiv, and Odessa universities became increasingly active in the early 20th century under the influence of modern trends and methods of education initiated in Western Europe. S. Ananin, a professor of pedagogy at Kiev University and the author of numerous treatises on education, was the chief exponent of these trends and methods. The Pedagogical Museum in Kiev (1901–17) became an important center of educational research.

Pedagogical thought in Russian-ruled Ukraine from the beginning of the 20th century until the 1917 Revolution focused primarily on problems of public education, in particular on the use of Ukrainian in the elementary schools. Works on this subject were written by Hrinchenko, V. Prokopovych, S. Siropolko, M. Chaly, Ya. Chepiha-Zelenkevych, S. Cherkasenko, and H. Sherstiuk. After 1910 the Ukrainyskyi Uchytel society became the leading center of educational research; it published **Svitlo*, the first Ukrainian-language pedagogical journal in Russian-ruled Ukraine.

In that period there appeared important works on the history of education. An account of education from the earliest times was written by M. *Hrushevsky in the first volumes of his *Istoriia Ukraïny-Rusy* (History of Ukraine-Rus'). K. *Kharlampovych wrote a broad analytical study of the history of education from its beginnings to the mid-18th century.

In Western Ukraine (under Austrian rule) questions of education and child-rearing occupied an important place in the work of the *Ruthenian Triad in the 1820s and 1830s. The first major work in Western Ukrainian educational literature was O.*Dukhnovych's *Narodnaia pedahohiia v pol'zu uchylshch i uchytel'ei sel'skikh* (Public Pedagogy for the Use of Village Schools and Teachers, 1857). Toward the end of the 19th and in the early 20th century, research

on the theory and history of education was pursued by O. Makarushka, V. Biletsky, I. Demianchuk, K. Malyska, I. Yushchysyn, and others. The development of educational theory and practice was spurred by the founding of the Ruthenian (subsequently, Ukrainian) Pedagogical Society in 1881 (see **Ridna Shkola* society) and the publication of its semimonthly periodical **Uchytel'*. Other organizations, such as the *Ukrainian Teachers' Mutual Aid Society, established in 1905, as well as the society's journal **Uchytel's'ke slovo*, also contributed to the development of pedagogical thought. The Ukrainiska Shkola society was the principal educational center in Bukovyna, and in Transcarpathia the journal *Uchytel'*, founded in 1867, was the venue of pedagogical thought.

In the wake of the collapse of the tsarist regime in March 1917, Ukraine witnessed the large-scale development of *elementary and *secondary schools, as well as of institutions of *higher education. Because much of the growth occurred spontaneously at the local level, it also highlighted the need for a more systematic approach to educational reform. Consequently, practical considerations, notably the drafting of plans and programs for a uniform system of education (the *unified labor school), spurred the development of pedagogical thought. The *Society of School Education, committees of the General Secretariat of Education of the Central Rada and later of the Ministry of Education of the Ukrainian National Republic, as well as individuals such as Rusova, V. Durdukivsky, H. Ivanytsia, Siropolko, and O. Muzychenko, played major roles in the elaboration of new models of education. The journal **Vil'na ukrains'ka shkola* was an important forum for discussion, as were congresses of the *All-Ukrainian Teachers' Association. The Ukrainian Pedagogical Academy, founded in 1917, became a center for research in education and teacher training.

In the first years of Soviet rule in Ukraine, the elaboration of the model of a unified labor school was continued by a group of pedagogues centered in the pedagogical section of the Ukrainian Scientific Society in Kiev, and from 1921 in the Scientific-Pedagogical Commission of the historical-philosophical section of the All-Ukrainian Academy of Sciences (O. Korchak-Chepurkivsky, O. Doroshkevych, and others).

The first half of the 1920s in Soviet Ukraine was characterized by the rise of several competing schools of pedagogical thought, many of which borrowed freely from advanced Western educational theory. Chepiha-Zelenkevych advocated the principles of a liberal education; Ya. Mamontov was a prominent theorist of esthetic education; O. Muzychenko developed an approach which emphasized the comprehensive development of individuals; A. Volodymyrsky and his group stressed the natural development of children and adapted the principles of reflexology to pedagogy; O. Skovoroda-Zachyniaiev, as director of the Laboratory of Reflexology and Experimental Pedagogy at the physico-mathematical division of the All-Ukrainian Academy of Sciences, also played a major part in advancing new educational ideas.

Authorities, however, chose a different course in the development of education. A unified system of education was implemented, which stressed social education and professional training. The theorists of this system (which was unique to Ukraine) were H. *Hrynko and Ya. *Riappo. An important center of pedagogical thought in the pe-

riod was the *Scientific Research Institute of Pedagogy of the Ukrainian SSR founded in 1926. Among the leading journals were **Shliakh osvity* and **Radians'ka osvita*. During the 1920s important research was done on the history of education by scholars such as A. Savych, T. Titov, A. Gotalov-Gotlib, and D. Krakhovetsky.

The pluralism which characterized pedagogical thought throughout much of the 1920s came to an abrupt halt with the consolidation of Stalinism in the 1930s. Most of the individuals, research centers, and journals active in the 1920s were silenced in the early 1930s. The unified system of social education was radically reorganized. Theories of labor and collective education as advanced by A. *Makarenko, N. Dadenkov, and S. *Chavdarov became the established orthodoxy in pedagogy. The development of pedagogical thought in Ukraine in the 1930s was also stymied by the centralization of educational decision-making. Soviet Ukraine's distinctive system of education was abolished, and a unified model was imposed by Moscow. School curricula, textbooks, and programs were now decided upon centrally. Emblematic of this development was the establishment in 1943 of the Academy of Pedagogical Sciences of the RSFSR. During the 1920s Ukrainian educationalists attempted to establish an academy of pedagogical sciences in Ukraine but were denied permission. The Russian Academy of Pedagogical Sciences became a fundamental formulator of Soviet educational plans and pedagogical methods for the entire USSR.

In Polish-ruled Western Ukraine in the interwar period, the most important center of pedagogical thought was the *Ridna Shkola* society, which also published a journal by that name. Among those who addressed questions of methodology were P. Bilaniuk, Ya. Bilenky, I. Levytsky, N. Matviichuk, and B. Zaklynsky. Contributions to the history of education were made by I. Krypiakievych, A. Androkhovych, I. Fylypchak, and Ye. Hrytsak.

In the immediate post-Second World War period pedagogy in Ukraine focused on the ideological and political education of pupils. N. Khrushchev's educational reform of 1959 unleashed a debate on pedagogy in Ukraine, and the science was criticized for its lack of innovative thinking. In the 1960s and early 1970s significant research was done by V. *Sukhomlynsky, I. Fusenko, M. *Marchenko, and M. *Hryshchenko.

In Soviet Ukraine pedagogical research was carried out by the Scientific Research Institute of Pedagogy of Ukraine, *pedagogical institutes, and at 10 universities. Several pedagogical periodicals were published in Ukraine. A large-scale debate on questions of pedagogy was opened in Ukraine in 1987, as a result of the political changes taking place. Since then there has been growing public pressure for less authoritarian, more innovative approaches to education.

An important center of pedagogical research outside Ukraine in the interwar period was the *Ukrainian Higher Pedagogical Institute and the *Ukrainian Pedagogical Society in Prague. The leading scholars there were Rusova, V. *Simovych, and Siropolko. After the Second World War a chair of pedagogy was established at the *Ukrainian Free University in Munich, and the post was held by H. *Vashchenko. Questions of methodology have been addressed by various *pedagogical societies in Canada, the United States, and Australia. In Canada, with the development of the *Ukrainian bilingual program, innovative re-

search into second-language acquisition and language instruction methodology has been conducted at the University of Alberta by O. Bilash, and by the curriculum branch of the province of Alberta's Ministry of Education. A Ukrainian Language Education Centre exists at the Canadian Institute of Ukrainian Studies, University of Alberta.

Pediatrics. A branch of medicine dealing with the organic singularities of the child and the prevention and cure of childhood diseases. The Ukrainian obstetrician N. *Ambodyk-Maksymovych, the author of *Iskustvo spovivanniia, ili nauka o babich'em dele* (The Art of Swaddling, or the Science of Women's Matters, 1781), made an important contribution to the development of pediatrics in the Russian Empire. S. *Khotovytsky was the first professor of pediatrics at the Academy of Medicine and Surgery in St Petersburg (1836), as well as the author of the empire's first textbook on childhood diseases (1847). A. Matveev began lecturing on childhood diseases at Kiev University in 1844. The first department of pediatrics was established at Kiev University in 1889; it was followed by one at Kharkiv University in 1892. The first society of pediatricians in Ukraine was founded in 1900 in Kiev.

With the onset of Soviet rule the People's Commissariat of Public Health created a state system of 'maternity and childhood care' in 1920, which was incorporated in 1924 into the system of *medical education (called pediatrics faculties from 1932). Within the pediatrics field there developed several subspecializations, including pediatric surgery, neurology, physiology, cardiology, allergy, as well as age-specific anatomy and neonatal pediatrics. Infant mortality (death of infants under the age of one year) is one of the most important indicators of the health of a nation. The lowest infant mortality rates in the world - fewer than 6 infant deaths per 1,000 live births - are reported from Japan, Sweden, and Finland. In Ukraine the rate was 19.7 (30.6 in the USSR) in 1975, 15.7 (26.0) in 1985, 14.2 (24.7) in 1988, and 12.8 in 1990. The lowest infant mortality rates in Ukraine are in Chernihiv, Vinnytsia, and Cherkasy oblasts, and the highest are in Ivano-Frankivske, Chernivtsi, Luhanske, Kherson, and Zhytomyr oblasts. The rate in Kiev oblast showed a leap from 9.7 in 1989 to 13.0 in 1990, a clear indication of the disastrous medium-term health consequences of the nuclear explosion at the Chernobyl Atomic Energy Station in 1986. Investigations by the state statistical service in 1989 attested to the practice of concealing infant deaths by classifying them as miscarriages and other nonviable pregnancies, in up to 50 percent of the cases in the RSFSR and up to 20 percent of those in Ukraine.

The development of pediatrics strongly influenced *public health in the USSR. Besides the departments of pediatrics at medical institutes in Ukraine, two scientific research institutes of pediatrics, *obstetrics, and *gynecology operate in Kiev and Lviv, and the Scientific Research

Institute for the Health Care of Children and Teenagers (est 1922 as the All-Ukrainian Institute of Maternity and Childhood Care, renamed in 1965) operates in Kharkiv. The journal **Pediatriia, akusherstvo i hinekolohiia* is published bimonthly in Kiev.

P. Dzul

Pediatriia, akusherstvo i hinekolohiia (Pediatrics, Obstetrics, and Gynecology). A scientific bimonthly; founded in 1936 in Kiev and published by the Ukrainian Ministry of Health. It contains papers on clinical problems, improved diagnostic methods, new ways of treating childhood diseases and gynecological disorders, and organizational questions of providing health care for children and women. Its circulation was approx 8,200 in 1980.

Pekalytsky, Semen [Pekalyc'kyj], b ca 1630, d ? Singer, choirmaster, and composer. He was a precentor in the kapelle of Archbishop L. Baranovsky in Chernihiv (1660s), the kapelle of Bishop Y. Shumliansky in Lviv (1667–73), and then the court kapelle in Moscow. In the 1680s he served as a priest in Novhorod-Siverskyi and directed the local choir. His Liturgy in A Minor is a masterpiece of 17th-century Ukrainian church music.

Rev Atanasii Pekar

Pekar, Atanasii (secular name: Vasyly), b 1 March 1922 in Perechyn, Transcarpathia. Basilian priest and church historian; full member of the Shevchenko Scientific Society. After obtaining a PhD at the Pontifical Urbaniana University in Rome (1942) and being ordained (1946), he moved to the United States (1948). He has taught at various theological seminaries and novitiates and has written various works on the history of the Ukrainian Catholic church, including *Narysy istorii tserkovy Zakarpattia* (Surveys of the History of the Church in Transcarpathia, 1967); *Our Past and Present: Historical Outlines of the Byzantine Ruthenian Metropolitan Province* (1974); *The Bishops of the Eparchy of Mukachevo* (1979); and *You Shall Be Witness to Me* (1985), a martyrology of the church in Transcarpathia.

Pekar, Solomon, b 16 March 1917 in Kiev, d 8 July 1985 in Kiev. Theoretical physicist; full AN URSR (now ANU) member from 1961. After graduating from Kiev University (1938) he worked at the ANU Institute of Physics, where he created the Department of Theoretical Physics. From 1960 he headed the same department at the ANU **Institute of Semiconductors*, which was formed on his and V. **Lashkarov's* initiative. From 1944 he was also a professor

at Kiev University, where he organized the chair of theoretical physics. A highly productive researcher, Pekar made major contributions to applied solid-state physics by elaborating a quantitative theory of semiconductor rectification (1939) and introducing and developing the concepts of polarons (1946–9) and deformation potential (1951). As a result of his investigations of excitons, Pekar proposed and developed a new quantum mechanical theory of the optical properties of crystals (1957–60).

Pekari. A multi-occupational site in Kaniv raion, Cherkasy oblast. Excavations in 1891–2, 1947–8, and 1958–65 uncovered the remains of **Trypilian* and **Catacomb* culture settlements, as well as a 9th- to 10th-century Rus' occupation. Among the artifacts recovered was a plate bearing a gold-encrusted image of three warriors in front of a fortress.

Pelahiivka [Pelahijivka]. V-19, DB III-5. A town smt (1986 pop 16,600) in Donetsk oblast. It was founded as a mining settlement in 1915 and granted smt status in 1938. It has three coal mines and an enrichment plant. The town is run by the Torez city council.

Pelchytsky, Leontii [Pelčyc'kyj, Leontij] (secular name: Levko Zenkovich or Zakhariievych), b ?, d 1595. Bishop of Kholm (1577–85) and Turiv–Pynske (1585–95). The son of a bishop and a nobleman, he was installed as bishop in 1577 and ordained as a priest only in 1580. He is best known for taking part in the initial planning, in 1590, of the Church Union of **Berestia*. He died before the realization of church union.

Pelekh, Ivan [Pelex], b 8 February 1859 in Pomoriany, Zboriv county, Galicia, d 23 July 1914 in Lviv. Russophile journalist. Upon graduating from Lviv University in 1881, he worked for the biweekly paper *Prolom*. Then he was a coeditor of the paper *Chervonaia Rus'* (1888–91) and editor of *Russkoe slovo* and *Halychanyn* (1909–13). He contributed to *Strakhopud* and published the *Russkaia Biblioteka* (Russian Library) series (1887–1905), which included masterpieces of Russian literature. Active in a number of Russophile groups, he served for 25 years on the executive of the Kachkovsky Society.

Pelekh, Petro [Pelex], b 12 March 1887 in Dobrochyn, Sokal county, Galicia, d 15 October 1961 in Kiev. Psychologist. He graduated from Lviv University (1913) and taught secondary school in Ternopil. From 1917 he worked in Kiev teaching Latin, Ukrainian, philosophy, and psychology at the university and other institutions of higher learning. After the Second World War, as a research associate of the Scientific Research Institute of Psychology of the Ukrainian SSR, (1945–59), he did research in occupational psychology, personality development, and the history of psychology. He wrote a number of articles on the lectures in philosophical psychology at the Kievian Mohyla Academy in the 17th and 18th centuries.

Pelekhaty, Demian [Pelexatyj, Demjan], b 1 July 1926 in Lviv. Conductor and pedagogue. He studied conducting and composition at the Lviv Conservatory (graduating in 1951) and taught there in 1952–7 and 1966–71. Since 1951 he has been conductor of the Lviv Symphony Orchestra,

and since 1964 its principal conductor. He has premiered numerous works of 20th-century Ukrainian composers, including S. Liudkevych and R. Simovych. He is a well-known interpreter of D. Shostakovich, S. Prokofiev, D. Kabalevsky, and R. Shchedrin.

Pelekhaty, Kuzma [Pelexatyj, Kuz'ma], b 11 November 1886 in Opor, Drohobych county, Galicia, d 28 March 1952 in Lviv. Journalist and political activist. After graduating from the Higher Institute of Journalism in Vienna he worked for the Galician Russophile newspapers *Halychany* (1910–13) and *Prikarpataskaia Rus'* (1913–15) and the Russian-language journal *Novaia zhizn'*. After the First World War he was the managing editor of the Sovietophile newspapers *Volia naroda* (1921–7) and *Sel'-Rob* (1927–8), to which he contributed feuilletons under the pen names Kuzma Bezrodny and Maksym Strikha. He adhered faithfully to Comintern policies and attacked the national-communist opposition in the Communist Party of Western Ukraine. Under the Soviet regime, in 1939–41 he worked on the staff of *Vil'na Ukraina* in Lviv, and in 1949 he was appointed chairman of the Lviv Oblast Executive Committee. A collection of his articles was published in 1959.

Pelekhnin, Pavlo [Pelexin], b 1842 in St Petersburg, d 1917. Surgeon; son of Petro *Pelekhnin. He taught at the Military Medical Academy in St Petersburg (1868–89, as full professor from 1877). His publications dealt with the treatment of wounds, the resection of joints, ovariectomy, and pyemia. He was a pioneer in the use of antiseptics in the Russian Empire. In 1898 he made a significant donation of 90,000 Austrian kronen to the Shevchenko Scientific Society (NTSh) in Lviv for the foundation of a medical section, for surgical scholarships, and for the purchase of an NTSh building.

Pelekhnin, Petro [Pelexin], b 1789 in Makiivka, Cherkasy county, Kiev gubernia, d 3 October 1871 in Kiev. Physician. A graduate of the Kievan Mohyla Academy (1811) and the St Petersburg Medico-Surgical Academy (1824), he taught physiology and pathology at the academy and presented a doctoral thesis on neurosis at Edinburgh University (1829). He did research on cholera in Astrakhan and taught medicine at the Kiev Theological Academy (from 1849).

Pelenska, Iryna [Pelens'ka] (pseud: Iryna Vynnytska), b 6 November 1906 in Hrabovets, Stryi county, Galicia, d 4 January 1990 in Detroit. Writer and community figure; wife of Ye. *Pelensky. She studied at Lviv University (1933). In the years 1925–39 she was active in the Plast Ukrainian Youth Association, student organizations, and the Prosvita society in Galicia. She contributed prose, literary essays, and articles to periodicals there and wrote the novelettes *Khrystyna* (1940) and *Muzyka* (Music, 1944; 2nd edn 1954). As a postwar émigré in Germany she published the novelette *Kam'iana sokyra* (The Stone Ax, 1947; rev edn 1967) and the story collection *Horikhove lushpynnia* (Nutshells, 1948). After emigrating to Sydney in the late 1940s, she became a founding member and the president of the *Ukrainian Women's Association in Australia (1949–56, 1959–62), a member of the executive of the Federation of Ukrainians in Australia (1951–62), and vice-

Iryna Pelenska

Yevhen Yulii Pelensky

president of the Australian chapter of the Shevchenko Scientific Society (1956–62). She also owned and ran a publishing company (1956–62) and contributed prose to Ukrainian-Australian periodicals. After moving to the United States in 1962, she was secretary of the Ukrainian National Women's League of America, a member of the executive of the World Federation of Ukrainian Women's Organizations (SFUZhO), and, until 1982, editor of the SFUZhO organ **Ukrainka v sviti*. From 1970 she headed the World Preschool Council of the World Congress of Free Ukrainians.

R. Senkus

Pelenski, Jaroslaw [Pelens'kyj, Jaroslav], b 12 April 1929 in Warsaw. Ukrainian historian; foreign member of the Academy of Sciences of Ukraine since 1992. He studied at Würzburg (1948–9), Munich (PHD, 1957), and Columbia (PHD, 1968) universities and has taught Russian, Soviet, Eastern European, and Ukrainian political and intellectual history at the American University (Washington, DC, 1964–7), and, since 1967, the University of Iowa. He is the author of *Russia and Kazan: Conquest and Imperial Ideology, 1438–1560s* (1974) and many scholarly articles. He has edited several books and a special issue of *Harvard Ukrainian Studies* titled *The Political and Social Ideas of Vjačeslav Lypyns'kyj* (1985) and was the editor in chief of the Ukrainian sociopolitical journal *Vidnova* (est 1984). In 1987 he was elected president of the *Lypynsky East European Research Institute in Philadelphia.

Pelensky, Yevhen Yulii [Pelens'kyj, Jevhen Julij], b 3 January 1908 in Koniukhiv, Stryi county, Galicia, d 29 September 1956 in Sydney, Australia. Literary scholar, bibliographer, teacher, and publisher; full member of the Shevchenko Scientific Society (NTSh) from 1937; husband of I. *Pelenska. He received his PHD in Ukrainian literature and Slavic ethnology from Lviv University in 1930. He cofounded and later headed the Society of Ukrainian Bibliophiles, and in the 1930s he was secretary and vice-chairman of the NTSh Ethnological Commission. He was also editor of the literary journal **Dazhboh* (1932–4) and the bibliographic monthly **Ukrains'ka knyha*. During the Second World War he was executive director of the *Ukrainske Vydavnytstvo (1939–40) and Bystrytsia publishing companies in Cracow. He became a docent at the Ukrainian Free University in Prague (1943–5) and Munich (1946–9). After emigrating to Australia in 1949, he founded and

then headed the NTSh branch there and established the Slovo publishing house in Sydney.

Pelensky wrote over 250 works, including books on B. Lepky (1932, 1943), the development of Ukrainian literary parody (1935), R.M. Rilke and Ukraine (1935), Western Ukrainian literature in the years 1930–5 (1935), Ovid in Ukrainian literature (1937, 1943), the period of *Rusalka Dnistrovaia* (1938), M. Cheremshyna (1938), T. Shevchenko (1942), and a history of the NTSh (1949). As a bibliographer he compiled *Bibliohrafiia ukrains'koi bibliohrafiï* (Bibliography of Ukrainian Bibliography, 1934) and *Ucrainica: Ausgewählte Bibliographie über die Ukraine in west-europäischen Sprachen* (1948). He wrote several dozen Ukrainian language textbooks and primers for Galician schools, published many editions of Ukrainian classics with his own scholarly introductions, and edited an anthology of contemporary Ukrainian poetry (1936). His articles appeared in NTSh serials and various Galician periodicals, including *Literaturno-naukovyi vistnyk* and *Bohosloviia*.

R. Senkus

Pelensky, Yosyp [Pelens'kyj, Josyp], b 31 December 1879 in Komarno, Rudky county, Galicia, d 29 November 1957 in Lviv. Art scholar and conservator; full member of the Shevchenko Scientific Society from 1917. A graduate of Cracow University (PHD, 1914), he specialized in Byzantine art, Ukrainian wooden architecture, and Halych's antiquities. He wrote a Polish-language book on medieval art in Halych (1914) and was a professor at the Kamianets-Podilskiy Ukrainian State University (1918–20).

Zenon Pelensky

Zynovii Pelensky

Pelensky, Zenon [Pelens'kyj], b 26 July 1902 in Tulyholovy, Rudky county, Galicia, d 30 October 1979 in Munich. Journalist and political activist. In interwar Galicia he was a founding member of the OUN and an active member of the Ukrainian National Democratic Alliance (UNDO). He served as the Berlin correspondent of the Lviv daily *Dilo* (1926–8) and was a regular contributor to *Rozbudova natsii* (1928–35), the OUN journal published in Prague. He also served as chief editor of *Ukrains'kyi holos* in Peremyshl (1929–32), the UNDO organ *Svoboda* (1936–8), and the Lviv daily *Novyi chas* (1938–9). As a postwar refugee in Munich, he edited the weekly *Ukrains'ka trybuna* (1946–7) and *Ukrains'kyi samostiinyk* (1950) and worked for the Ukrainian broadcast section at Radio Liberty (1955–67).

Pelensky, Zynovii [Pelens'kyj, Zynovij], b 1890 in Lysiatychi, Stryi county, Galicia, d October 1943 in Lviv.

Co-operative and political leader. After graduating from the Export Trade Academy in Vienna he worked in the Audit Union of Ukrainian Co-operatives in Lviv, first as editor of its paper *Hospodars'ko-koooperatyvnyi chasopys* (1927–30) and then as head of its co-operative propaganda department. He often represented the union at international co-operative conferences. He helped organize the Vlasna Khata building co-operative in Lviv. In 1929 he became a member of the Central Committee of the Ukrainian National Democratic Alliance. A deputy to the Polish Sejm (1930–8), he was sent by the Ukrainian Parliamentary Representation as its delegate to congresses of national minorities and served on the presidium of the Council of National Minorities in Geneva. During the Soviet occupation of Western Ukraine he lived in Lublin, where he was a commissioner of the Agrarian Bank (1940–1). He then returned to Lviv to become director of the same institution.

Bishop Yuliiian Pelesh

Sergei Peletminsky

Pelesh, Yuliiian [Peleš, Julijan], b 15 January 1843 in Smerekovets, Jasło circle, Galicia, d 22 April 1896 in Lypovets, Sianik county, Galicia. Uniate bishop and church historian. After graduating from the Vienna Theological Seminary and being ordained (1867) he completed a THD in Vienna and was appointed prefect of the Greek Catholic Theological Seminary in Lviv (1870). He was a professor at the Peremyshl seminary (1872) and then curate of St Barbara's Church in Vienna and rector of the Ruthenian boarding school there (1874–83). In 1885 he was consecrated as the first bishop of Stanyslaviv eparchy, and in 1891 he became bishop of Peremyshl. Pelesh was one of the initiators of the Lviv Synod of 1891. In addition to textbooks on pastoral theology and catechism, he published *Geschichte der Union der ruthenischen Kirche mit Rom von den ältesten Zeiten bis auf die Gegenwart* (2 vols, 1878, 1880).

Peleshok, Kateryna [Pelešok] (née Shumeiko), b 26 August 1898 in Birky Velyki, Ternopil county, Galicia, d 20 July 1981 in New York. Community activist. After emigrating to the United States in 1921, she settled in New York. During the war she joined the *Ukrainian National Women's League of America and served as president of its New York branch (1945–66) and vice-president on the national executive (1950–9). She collected funds for the United Ukrainian American Relief Committee and was a member of its board of directors (1949–72). At the same time she served on the board of directors of the Ukrainian Congress Committee of America (1946–58) and on its political council (1963–9).

Peletminsky, Sergei (Peletminskij, Sergej), b 14 February 1931 in Tetkino, Glushkovo raion, Kursk oblast, Russia. Theoretical physicist; AN URSS (now ANU) corresponding member since 1978 and full member since 1990. A graduate of Kharkiv University (1953), since 1957 he has worked at the ANU Institute of Physics. Peletminsky has made substantial contributions to statistical mechanics and the quantum theory of fields, particularly by developing a theory of high-frequency relaxation processes in magnetic materials. In 1956, together with O. Akhiezer and V. Bariakhtar, he discovered the magnetoacoustic resonance phenomenon.

Pellikh, Volodymyr [Pellix], b 17 October 1886 in Lysovychi, Stryi county, Galicia, d 28 December 1981 in Philadelphia. Greek Catholic priest and civic leader. A graduate of Lviv and Vienna (PHD, 1913) universities, he served as pastor at St Barbara's Church in Vienna (1912–16) before becoming a parish priest in Radekhiv (1918–32). There he was active in educational and cultural organizations, such as Prosvita, and was elected to the Polish Sejm in 1928. In 1944 he left for Germany, and three years later, for the United States, where he continued his pastoral work.

PEN. An acronym for the International Association of Poets, Playwrights, Editors, Essayists, and Novelists. The Ukrainian PEN, with headquarters in Kiev, was accepted as a member of the International Association at its 54th World Congress in Canada in 1989. M. *Vynhranovsky was elected president of the Ukrainian PEN, and Ye. *Sverstiuk and P. Movchan became vice-presidents. In the first two years the membership of the Ukrainian PEN grew to 85, including 11 members from the United States, 5 from Canada, 3 from Rumania, and 1 each from Germany, Belgium, Brazil, Poland, Czechoslovakia, Australia, and Israel. Several members in Ukraine who were former Soviet prisoners of conscience and *dissidents have been made honorary members of the International PEN.

Penck, Albrecht, b 1858, d 1945. German geographer and geologist; member of the Shevchenko Scientific Society. He was a professor at Vienna and Berlin universities and one of the first geographers to treat Ukraine as a geographic and sociopolitical entity distinct from Russia. His article on Ukraine, which appeared in *Zeitschrift der Gesellschaft für Erdkunde* (1916), was reprinted separately and distributed during the negotiations leading to the Peace Treaty of Brest-Litovsk.

Penitentiary system. A set of institutions for punishing criminal behavior by means of imprisonment and corrective labor. Imprisonment has been used as a form of punishment in the past; what distinguishes the modern penitentiary system is its scale and its declared purpose to reform the criminal. Modern penitentiaries emerged only in the early 19th century in the United States and Western Europe.

There is little information about the use of imprisonment in Kievan Rus'. Princes or boyars were imprisoned for political reasons in so-called *poruby*, and church people and offenders against the faith were locked up in special cells in monasteries. Other offenders were held under guard in various places. Eventually, towers became the preferred place of incarceration. Prisoners were called

kolodnyky, because they were usually in chains (*kolodky*). During the Cossack period the regimental towns of the Hetman state had prisons for detaining suspects who were under investigation. The main forms of punishment were fines, infliction of pain, and death. Incarceration was rarely used as punishment: only offenses such as harboring thieves, betraying a lover, refusing to return a stolen object, and making a false legal appeal were punishable by imprisonment from 12 weeks to two years, depending on the offense.

In the Russian Empire imprisonment was used only during investigation, until the mid-17th century, when it became accepted as a form of punishment. Even in the 18th century the government did not feed prisoners: sometimes they were allowed to go begging, and sometimes they starved to death. In the 19th century the use of imprisonment increased until it became the chief form of punishment, although *exile and hard labor continued to be used widely. One of the first jurists to espouse the modern concept of penitentiary was M. *Chubynsky. Prison reforms were introduced only in the second half of the century: a law on prison administration was adopted in 1879, and prisons were reorganized into various categories. The prison system was developed in a planned manner. By the turn of the century every town in Russia had a prison building and often more than one. In Kiev, besides the large *Lukianivka Prison, there was a smaller jail on Bibikov Boulevard. In Kharkiv the main prison was on Kholodna Hora. In the 18th and the first half of the 19th century political prisoners were held in the cells of the Kievan Cave Monastery and, later, in the Kievan Cave Fortress.

After the Revolution of 1917 the Bolsheviks tried to develop their own corrective-labor system, different from the conventional penitentiary system. Assuming that honest labor would reform criminals and turn them into constructive, law-abiding citizens, the authorities established *labor camps or colonies, whose inmates worked in state enterprises and received regular wages. The first *Corrective Labor Code was adopted in 1925. The corrective-labor camps quickly developed into a vast system of *concentration camps, which provided the state with *forced labor.

Prisons inherited from the tsarist regime were used to hold suspects under investigation before they were shipped off to concentration camps or executed. As the dimensions of political terror grew, the prisons became terribly overcrowded. Many prisoners died under torture during investigation or were executed in the prisons. Mass executions took place in the prisons of Vinnytsia (1937–8), Lviv, Kiev, Drohobych, Ternopil, Dubno, and other towns in June 1941.

In Western Ukraine under Austrian rule, the penitentiary system evolved to a relatively humane system as the brutal law of Joseph II (1787) was replaced by the more liberal decree of 1790, the criminal code of 1810, and the criminal code of 1852, which remained in force in Galicia until 1932. That code provided for detention for 24 hours to six months for minor offenses, and for imprisonment for six months to 20 years or even life for serious crimes.

Under Polish rule (1918–39) Austrian penal practices were continued until new Polish laws were passed – a prison statute in 1931 and a criminal code in 1932. Petty crimes were punishable with detention for seven days to five years, and serious crimes with imprisonment for six months to 15 years. A 'progressive system' was applied to

inmates sentenced to over three years: they were segregated in special prisons according to several factors, such as age, motive of their crime, and criminal record, and were grouped further into classes with different regimes according to their readiness to reform. All prisoners had to work. There were no special jails for political prisoners. Ukrainians convicted of crimes against the state served time in prisons within Poland proper, not in Galicia. The largest prison of a general type was in Lviv and was called Brygidky. In 1934 a concentration camp was set up in *Berza Kartuzka.

Gernet, M. *Istoriia tsarskoi tiurmy*, 5 vols (Moscow 1961)

Penkivka settlements. A group of 6th- to 8th-century early Slavic settlements near Penkivka, Kirovohrad oblast. Excavations in 1955–60, previous to flooding by the Kremenchuk Reservoir, uncovered extensive dwelling remains. Pottery recovered from the 7th- and 8th-century occupation was very similar to that found at the neighboring *Pastyrskye fortified settlement.

Penkov, Oleksander [Pen'kov], b 11 April 1906 in Katerynoslav, d 24 September 1968 in Kiev. Mechanics scientist; corresponding member of the AN URSR (now ANU) from 1951. He studied at the Dnipropetrovske Mining Institute. He worked at various institutes of the ANU and taught at universities in Kiev and Dnipropetrovske. His main contributions were in various areas of theoretical and applied mechanics: the theory of oscillations, the stability and reliability of structures, the design of machines and structures. His models and equations are widely used by design engineers.

Pennsylvania. A middle Atlantic state (1990 pop 11,924,710) of the United States, covering an area of 177,000 sq km. Its capital is Harrisburg. In 1990, 129,753 of its inhabitants were of Ukrainian origin.

Pennsylvania was the initial focal point of the mass immigration of Ukrainians to the United States, which began in 1877–8 when Pennsylvania mining companies began to recruit workers in Transcarpathia. The first recruits were joined soon by volunteers from the neighboring Lemko region and in the 1890s by peasants from eastern Galicia and Bukovyna. Before the First World War Pennsylvania attracted about 75 percent of the Ukrainian immigrants to the United States. Most of them settled in the coal region, in towns such as Shenandoah, Shamokin, Mount Carmel, Hazleton, Lansford, Freeland, Olyphant, and Mayfield. The first organized Ukrainian community in the United States arose in Shenandoah. By 1884 it had acquired the services of a priest, Rev I. Voliansky, and then it built the first church (1886). Before returning to Ukraine Voliansky established another five churches in the region as well as the first Ukrainian-American newspaper, **Ameryka*; the Little Russian Drama Club; a library and reading room; Saturday and Sunday schools; and co-operative stores. The Ruthenian (now Ukrainian) National Association was founded in Shamokin in 1894 and adopted *Svoboda* as its organ. To counteract the influence of the Russian Orthodox church among the predominantly Catholic immigrants, the Association of Ruthenian Church Communities in the United States and Canada was organized in 1901. In 1907 S. Ortynsky was consecrated bishop and

St Michael's, the first Ukrainian Catholic church in the United States, founded in Shenandoah, Pennsylvania, in 1886

apostolic visitor for the Ukrainians and Ruthenians in the United States, and in 1913 was made exarch. His seat was Philadelphia, where the Providence Association of Ukrainian Catholics in America and the weekly *Ameryka* were set up. Just before the war a large number of Ukrainian immigrants joined the work force in the industrial and mining towns of western Pennsylvania. To help the newcomers adjust and establish themselves in the new land, the Ukrainian Workingmen's Association was founded in Scranton in 1910, and the Ukrainian National Aid Association in Pittsburgh in 1913.

During the war Ukrainians in Pennsylvania supported the struggle for independence in Ukraine. In 1916 the Ukrainian National Alliance was formed to publicize Ukrainian political demands, gain official support for them in Washington, and provide relief to war victims.

In the interwar period restrictive laws reduced immigration from Eastern Europe, but the Ukrainian community grew and developed. In 1924 the Ukrainian Catholic exarchy was reorganized into two separate exarchies, a Ukrainian one with its seat in Philadelphia and a Ruthenian (Carpatho-Rusyn) one with its seat in Pittsburgh. At the same time Archbishop I. Teodorovych moved the seat of the Ukrainian Orthodox church to Philadelphia. The Basilian order of nuns built their motherhouse in Fox Chase (1931) and set up the first Ukrainian academy for girls there. The Ukrainian Catholic Youth League, formed in 1933, had its head office in Philadelphia. The first Ukrainian state representative, I. Malena, was elected in Philadelphia.

After the Second World War a large number of new Ukrainian immigrants, including many professionals and others with higher education, came to Pennsylvania. Having settled mostly in Philadelphia, they strengthened the existing Ukrainian institutions and founded new ones: political organizations such as the Organization for the Defense of Four Freedoms for Ukraine; youth organizations, such as the Plast Ukrainian Youth Association and the Ukrainian Youth Association (SUM); and regional associations, such as the Lemkivshchyna and Boikivshchyna societies. Ukrainian language and literature courses were introduced at the University of Pennsylvania in 1959.

Eventually its relative share of the Ukrainian-American population fell, to only 17.5 percent in 1990, but Pennsylvania remains the state most heavily populated by Ukrainians. Its largest Ukrainian communities are found in *Philadelphia, *Pittsburgh, *Scranton, Chester, and Allentown.

M. Kuropas

Pension. A regular monetary payment from state, social, or private insurance funds to elderly or disabled people and their dependents or offspring. In the USSR some high officials and distinguished individuals received special pensions also.

Voluntary mutual insurance programs that provided pensions to blue- and white-collar workers were established in Ukrainian territories under Austro-Hungarian rule in the 1890s. Similar schemes were introduced in the Russian Empire in the early 20th century. In 1912 the Russian government introduced a pension plan covering workers disabled by industrial accidents. Complete invalids received a maximum of two-thirds of the regular wage.

The Ukrainian SSR adopted a state pension plan in 1922. It covered disabled people and their dependents or orphans. Later, pensions were granted to persons who had attained a certain age and had worked a specified number of years. In 1925 the pensions were extended to teachers and doctors, in 1929 to workers in heavy industry and transport, in 1932 to all blue-collar workers, and in 1937 to all white-collar workers and students. Until 1937, pensions were paid from funds raised by mandatory deductions from workers' wages, and in 1931-7 almost all pensions were run by the trade unions. When the state assumed responsibility for the pension system (through the USSR Ministry of Social Security) in 1937, it accepted the entire cost of the program, which it covered from tax revenues. Pensions in that period were very low, and rapid inflation diminished their buying power even further.

A major reform of the pension system was introduced in 1956, and its basic statutes are still in force. Partial pensions were granted to elderly people who had not attained retirement age. In 1964 a pension system was finally established for collective farmers: heads of collective farms, agronomists, and mechanics became eligible for state pensions, and collective farmers were paid pensions from a fund created by the state and supported by the collective farms.

In the 1980s persons qualified for a full pension after reaching 60 years of age (55 for women) and working for

25 years (20 for women). The value of a pension was based upon the worker's earnings in the last 12 months of employment. For workers with a low base pay upon retirement, the pension was equal to the monthly wage or a minimum of 50 rubles a month. The ratio of pension to earnings fell in stages to 55 percent for workers who earned from 100 to 120 rubles a month. Once a pension was granted, the rate remained fixed until the pensioner's death; only small adjustments were made to keep pensions above the escalating minimum. In the early 1990s, however, pensions were raised to ease the devastation caused by spiraling inflation. Pensioners received supplements of 10-15 percent for dependents and 3-5 percent for uninterrupted service at a single job. The pension was reduced by 15 percent if the pensioner lived in a rural area. Because of the low pension levels in the USSR, many people continued to work after they reached retirement age. They were permitted to do so, and in most cases pensions were not affected by other income. Workers in mining, some heavy industries, and other hard and dangerous jobs could retire earlier at full pension.

Pensions for people disabled on the job or suffering from occupational diseases depended on the degree of incapacity, the length of service, and the pensioner's age at the time of injury. In general the levels were slightly lower than for old age pensions. Since 1970 collective-farm workers have also been eligible for disability pensions. Disabled army veterans were paid a pension directly by the state. Supplements for dependents were available to disabled pensioners. Orphans (to age 16 or 18 if they were students) and widows over 55 (widowers over 60) with children of pensioners continued to receive the pension, but the pension was paid to the family as a whole, not to individuals. Some categories of workers, such as teachers, academicians, and health care workers, were eligible for a pension only after a specific length of service (usually 25 years), regardless of age. The maximum pension for those people was higher than for others, up to 240 rubles a month. Army veterans qualified for pensions after age 40 and 20 years of service. Their pensions were even higher and were paid directly from the budgets of the Ministry of Defense, KGB, or Ministry of Internal Affairs.

From 1928 there had been a special category of 'personal pensioners.' Those were individuals who were rewarded for special services to the state or 'revolution.' The special pensions were usually reserved for leading members of the Party. They were given only to men over 55 or women over 50, but without regard for length of service. Personal pensions were all-Union, republican, or local depending on the government awarding them. The first carried a value of 200 or more rubles a month and included such perquisites as free housing and a car.

The lowest pensions were received by collective-farm workers. They bore most of the pension costs through payments by the collective farms. Their pensions ranged from a minimum of 40 rubles a month to a maximum of 120 rubles. Initially, pensions were restricted to men from age 65 and after 25 years of work and to women from age 60 and after 20 years of work. Since 1967, however, farm workers have been treated on a par with workers in other branches of the economy. For many years farmers in Western Ukraine, which was annexed by the USSR after the Second World War, had been eligible for a pension only if they had been original members of a collective farm.

The number of pensioners in Ukraine has been increasing in recent years both in absolute numbers and as a proportion of the entire population. The number of people receiving pensions increased from 3.52 million in 1959 to 6.87 million in 1967 (of these, 1.08 million were veterans, and 2.51 million were collective farmers). There were 8.88 million pensioners in 1971, 10.72 million in 1981, and 13.08 million in 1990 (over 25 percent of the total population), including old age, disability, and long-service pensioners. In 1987, 3.39 million pensioners were collective farmers. During the recent period average pensions have risen, from 30.4 rubles in 1970 to 53.3 in 1980 and 103.6 in 1990. The average pension for state pensioners was 81.7 rubles, and the average old age pension was 90.8 rubles (1987). By contrast, the average pension for collective farmers was 51.3 rubles. Only 3.6 percent of all blue- and white-collar workers received the minimum pension, whereas 59.7 percent of all collective farmers received the minimum. On 1 October 1990 the 1.4 million war veterans and invalids had their average pension raised to 145 rubles.

Pentecost. A church calendar feast day, celebrated fifty days after Good Friday; the first major event of the summer cycle in the Ukrainian ritual calendar. The feast of Pentecost (*piatedesiatnytsia*), known in Ukraine as *Zeleni sviata* (Green Holidays), consisted of several days of ritual observances. Before the main day of the celebration (Sunday), houses were whitewashed and cleaned, and their earthen floors were worked over with an aromatic grass or herb. In addition, houses and churches were decorated both inside and out with tree branches sporting greenery. On Pentecost Sunday young people entertained themselves with song-games, the decorating and ritual undressing a day later of a small birch tree, the plaiting of wreaths that were later floated in water, and the playing of games. In some parts of Ukraine it was also common for farmyards, outbuildings, and fields to be blessed by a priest leading a procession.

The commemoration of the dead had an important role in Pentecost celebrations. Graveyards were decorated with tree boughs and in some cases with lit candles. In some parts of Ukraine a feast would take place in the cemetery in honor of the ancestor there. Among Ukrainians in the West, the blessing of graves commonly takes place on this day.

People's Assembly of Western Ukraine (*Narodni zbory Zakhidnoi Ukrainy*). A purportedly representative body established in October 1939 by the Soviet occupational authorities to provide a legal basis for the USSR's annexation of Western Ukrainian territories formerly ruled by Poland. Its close to 1,500 deputies were elected on 22

October 1939 in fixed, strictly controlled elections. The assembly convened in Lviv on 26–28 October and formally approved the proclamation of Soviet rule and the 're-union' of Western Ukraine with the Ukrainian SSR and the USSR. A special commission of 66 deputies presented the decision to the supreme soviets of the USSR and of the Ukrainian SSR. Having served its purpose, the assembly was dissolved.

People's assessor (*narodnyi zasidatel*). A lay judge elected to serve alongside a professional judge at every level of the USSR justice system. Introduced in 1917 by the Soviets in place of juries, assessors (usually two per court) represented a form of popular participation in the judicial process. They had all the rights of judges: they participated in forming the verdict and selecting the punishment. They were elected for two and a half years by people's assemblies at their workplaces or residences. Assessors of military tribunals were elected by soldiers at their military units. An assessor had to be at least 25 years of age but did not need to have any legal training or experience. Each court district kept a list of several hundred assessors, who were rotated to serve about one day a month in court.

People's Commissariat for Nationality Affairs (*Narodnyi komissariat po delam natsionalnostei RSFSR*, or *Narkomnats*). A central government department set up on 26 October 1917 by decree of the Central Executive Committee of the RSFSR. Officially its purpose was to implement V. Lenin's nationality policy, as it was outlined in the Declaration of the Rights of the Nations of Russia. In fact its main task was to restore Russian rule over the various nations that had come under the Russian Empire. Its sole chief was J. *Stalin, who had written a theoretical treatise on the nationality question. His aim was to unite the different nations under one centralized, Soviet government and to prevent the outlying countries from separating from Russia. The central *Narkomnats* worked through 18 national *narkomnats* or departments, which together formed a collegium and then (19 May 1920) a Council of Nationalities consisting of the chiefs of the national departments and chaired by Stalin. The Ukrainian *Narkomnats* was created in May 1918 'to assist the Ukrainian people in its liberation from German occupation.' In reality it assisted the Russian Red Army to overthrow the UNR *Directory and to install the Soviet regime, and later on it eradicated vestiges of nationalism within the Communist party and the Soviet government in Ukraine. The *Narkomnats* was also responsible for invading Georgia and crushing its independent government in early 1921. The *Narkomnats* played a key role in setting up Soviet national republics and integrating them into the USSR. Having fulfilled its mission the *Narkomnats* was dismantled in May 1924.

J. Borys

People's commissariats of the Ukrainian SSR (*narodni komisariiaty*). The central and executive organs in Soviet Ukraine, modeled after the commissariats (initially called commissions) established in the RSFSR at the end of 1917. Until January 1919 they were called people's secretariats in Ukraine. The people's commissars had powers analogous to those of government ministers in a parliamentary system. They were invariably members of the

Communist party and were appointed by, and responsible to, the *All-Ukrainian Central Executive Committee. The commissars and heads of various state committees and councils constituted the central government of the republic – the *Council of People's Commissars.

Initially there were 12 commissariats in Ukraine: foreign affairs, defense, Soviet propaganda, internal affairs, education, agriculture, justice, supplies, labor, finance, transportation, and public health. Most of them were subordinated to their Russian counterparts under the terms of special treaties, and the Russian commissars were represented by deputies in Ukraine. After the USSR was formed, the 1924 Constitution defined three types of commissariats in Ukraine: unified (renamed 'Union-republic' in 1936), republican, and Union. Those in the first category, which included the commissariats of finance, labor, worker-peasant inspection, and supplies, were formally under the joint control of the Ukrainian and the USSR governments. Another six commissariats – justice, internal affairs, education, social security, land affairs, and public health – were under republican control. The Union commissariats – foreign affairs, military and naval affairs, foreign trade, roads and highways, and postal and telegraph services – were under the sole authority of the central Soviet authorities in Moscow. This basic system remained in place after the Constitution of 1936 was adopted. The people's commissariats were replaced by *ministries of the Ukrainian SSR in 1946.

People's Council (Narodna rada). A Galician populist political organization founded on 24 October 1885 in Lviv under the leadership of Yu. *Romanchuk with the goal of continuing the traditions of the *Supreme Ruthenian Council of 1848. The council was formed as a counterpoise to the Ruthenian Council, which had been taken over by Russophiles. The People's Council issued a proclamation to 'Ruthenians of the Galician lands' and had its first general meeting on 2 February 1888. The unofficial organs of the People's Council included *Bat'kivshchyna* and *Dilo*. A creation of the populist intelligentsia, the council took a position for the unity of Galician Ukrainians with Ukrainians under Russian rule and separation from the Polish and Russian nations. Its goals included defending the constitutional rights of Galician Ukrainians and establishing their equality with the other peoples in Austria-Hungary as well as the division of Galicia into Ukrainian and Polish territories. The People's Council was not a party, and it had no (formal) branches. In 1899 it joined with the right wing of the Ukrainian Radical party to form the *National Democratic party.

People's Council of Transcarpathian Ukraine (Narodna rada Zakarpatskoi Ukrainy). A representative body in Transcarpathia that assumed certain state functions in the transition period between Czechoslovak and Soviet rule. The group was formed in Mukachiv on 26 November 1944 as the co-ordinating body for the 'people's committees' (at the okruha and municipal levels) in the region and was conceived of and controlled by the Communist party and the Soviet occupational forces. The council, consisting of 17 members, appropriated legislative and executive power in Transcarpathian Ukraine from the outgoing Czechoslovak government. It also introduced the first Sovietization measures in the region and spear-

headed the campaign to unite Transcarpathia with the Ukrainian SSR. The council was based in Uzhhorod and headed by a local Communist, I. *Turianytsia. After the creation of Transcarpathia oblast within the Ukrainian SSR the council continued functioning before being replaced by oblast administrative organizations.

People's court (*narodnyi sud*). The lowest level of the Soviet court system and the court of first instance for a raion or city. Such courts tried almost all civil and criminal cases, except for very complex civil matters or grave crimes, and some administrative cases. They consisted of one people's judge and two people's assessors. Their decisions could be appealed to an oblast court.

People's Guard. See National Guard.

The People's Home in Lviv

People's Home in Lviv (Ruskyi narodnyi instytut Narodnyi dim u Lvovi). The oldest and wealthiest Ukrainian cultural-educational institution in Galicia. The People's Home was established in 1849 by the *Supreme Ruthenian Council (at the initiative of L. *Treshchakivsky) with the express purpose of developing Ukrainian national and cultural life throughout Galicia. The institution was based on a Czech model. The Austrian government granted it land near Lviv University, on which a building (financed through private donations) was erected in 1851–64. Over time it amassed a substantial number of assets, including several buildings and a church in Lviv, two villages in the Peremyshl region, a museum, a library, and a publishing house.

The People's Home provided a spiritual haven and organizational center for various organizations and causes, most notably the *Halytsko-Ruska Matytsia society (which undertook cultural-educational work and published school textbooks). Until the 1860s its work was conducted in the conservative and clerical-minded spirit of the *Old Ruthenians, and the body was run by a commis-

sion set up by the Supreme Ruthenian Council before it disbanded in 1851. The leadership of the People's Home then fell into the hands of *Russophiles, who took it over completely in 1872 with the enactment of a new constitution. Ukrainophile cultural and political activists were excluded from membership in the People's Home, and the institution virtually ceased to be active in promoting Ukrainian national interests. Following the outbreak of the First World War the Austrian government banned the activity of the People's Home and, in 1917, liquidated it and placed its assets under the control of a group of trustees. Under Polish occupation the trustees were replaced by a commissioner, M. Bachynsky, who turned the People's Home over to a group of conservative Russophiles loyal to the Polish state.

Much of the activity of the People's Home from approx 1900 consisted of maintaining a museum and archives. By 1924 it had amassed a library of approx 120,000 items (including 5,000 manuscripts and documents as well as the personal library of A. *Petrushevych) and established archeological-historical and natural science museums. Part of the library was transported to Russia during the First World War and never returned. In 1918 the numismatic collection was lost. The official publication of the People's Home was **Vistnyk Narodnoho doma*, printed in 1882–1914 as a monthly publication and from 1921 irregularly. Written initially in the **yazychiie* and later in Russian, the publication printed scholarly articles and essays (from a Russophile point of view) in addition to internal organizational news. The People's Home was liquidated in 1939 after the Soviet occupation of Western Ukraine, and its collections were transferred to the Lviv Scientific Library of the Academy of Sciences of Ukraine and various museums in Lviv.

People's homes were established in cities and towns throughout Galicia (as well as in other Ukrainian areas) with the People's Home in Lviv as an institutional model.

B. Kravtsiv

People's homes (*narodni domy* or *narodni budynky*). Community centers that provide a venue for cultural, educational, and sometimes political activities. People's homes, called people's buildings in Russian-ruled Ukraine, housed everything from libraries, theaters, and tearooms to rudimentary collections of newspapers and books. Plays, lecture series, and social events were often held in urban people's homes. In the villages people's homes housed reading rooms and provided space for social and political activities. Collectively people's homes provided an infrastructure for Ukrainian community life independent of church and state.

People's homes were built first in Western Ukraine. The *People's Home in Lviv (1849–1939), founded by the Supreme Ruthenian Council, with its 120,000-volume library and natural science, historical, archeological, and fine art museums, was one of the most ambitious people's homes and the model for homes throughout Ukraine. In Bukovyna people's homes were established later. The most important people's home in that region was founded in 1887 in Chernivtsi. In Transcarpathia people's homes were not established until the 1920s. Alongside those community centers formally called people's homes, similar facilities were often organized spontaneously by local groups. By 1939 the *Prosvita society had built 1,475 community cen-

ters in Galicia. Even more numerous were the rudimentary *public libraries and reading rooms.

In Russian-ruled Ukraine people's buildings were established at the beginning of the 20th century. Often constructed by zemstvo authorities, people's buildings were more closely tied to the state than were the people's homes in Western Ukraine. Even so, they provided an important social infrastructure for populist and social-democratic activists, sometimes to the dismay of the buildings' founders, who usually limited their agenda to educational and cultural issues. The Kiev Trinity People's Building, today the Kiev Operetta Theater, was built in 1902 through the efforts of the Kiev Literacy Society. Staging theater productions for the enlightenment of workers, who were offered free tickets, was a central function of this people's building. Between October 1903 and March 1904, 13,100 workers attended plays at the Kiev People's Building. Another people's building was built in the Kiev suburb of Lukianivka in 1904.

Founded in 1903 by the Kharkiv Literacy Society, the Kharkiv People's Building was reputedly one of the best in the Russian Empire. In 1903 alone 54 plays (attended by 42,126 people), 7 concerts (attended by 2,590 people), and 4 literary-musical evenings, 3 of which were organized by workers (attended by 2,927 people), were held there. In 1901 a people's building was founded in Poltava by the local literacy society, whose ranks included such luminaries as M. Kotsiubynsky and P. Myrny. There were also people's buildings in Odessa, Zhytomyr, Lohvytsia, Pryluka, and other cities in central and eastern Ukraine.

In the initial period of Soviet rule people's homes were actively supported and constructed by the regime. In June 1921 in Ukraine there were 4,322 people's buildings and Prosvitas, 5,620 reading rooms and *selbudy* (village buildings), and 1,298 workers' clubs. In 1924, people's buildings were reorganized into workers' and village clubs and *palaces and houses of culture. A similar reorganization took place in Western Ukraine after 1945.

Numerous people's homes have been built by Ukrainians in the diaspora. The oldest and most active people's home in Canada is the Winnipeg Ukrainian National Home, built in 1916. Ukrainian-Canadian people's homes co-ordinated their activities through the Union of People's Homes. Ukrainian-American people's homes are found in all major US cities. The first American people's home was founded in New York. Ukrainian people's homes exist in all other areas of Ukrainian emigration, throughout Latin America, Australia, and Europe. In the interwar period a people's home was even established in Harbin, Manchuria.

B. Kravtsiv, C. Freeland

People's judge (*narodnyi suddia*). The presiding official in a people's court, the lowest court of the USSR justice system. Judges were elected to five-year terms by residents of a raion or city, usually on the nomination of the Communist party, although, in theory, other community and professional groups had the right to nominate candidates. Candidates had to be at least 25 years of age but were not formally required to have any legal training. Immediately after the revolution few people's judges had any legal education. Later most had a higher law degree. The people's judge presided over a court that included two *people's assessors, but could hear some cases (eg, administrative

wrongdoings) alone. The people's judge could also initiate charges and legal proceedings. People's judges were supposed to be independent of any external pressures and could not be charged with crimes, arrested, or dismissed except on the approval of the presidium of their republic's Supreme Soviet. In reality, however, their decisions, particularly in political cases, were influenced strongly by Party and state authorities.

People's Militia (Narodna samooborona; German: Landsturm). A peasant levy en masse organized by the Austrian government in November 1848 in the Subcarpathian Galician districts of Kolomyia, Sambir, Sianik, Stanyslaviv, and Stryi to protect the population from raids by Hungarian revolutionaries. All Ukrainian men aged 18 to 50 were conscripted. The militia was divided into districts made up of 10 to 14 villages. A district was under the control of a commander and each village had its own commander as well as captains and sergeants if the number of armed men was large enough, and it maintained a continuous armed watch and an armed communication team. Effigies surrounding the village were set on fire to signal the approach of the enemy. Some districts had their own cavalry. Stanyslaviv district also had an artillery unit, whose men wore blue jackets with yellow epaulets and sheepskin hats with yellow tops. The unit forced the Polish National Guard to leave Stanyslaviv in November 1848. Altogether there were some 50,000 militiamen. Stanyslaviv district had the largest number, over 17,000. After the Hungarian revolution was suppressed at the end of 1849, the Austrian government disbanded the militia.

People's Secretariat (Narodnyi sekretariat). The executive body of the Provisional Central Executive Committee of the Soviets of Workers' and Soldiers' Deputies of Ukraine, established in Kharkiv on 30 December 1917 by Russian and local Bolsheviks. It was set up as a rival (Soviet) government in opposition to the Central Rada and its General Secretariat in Kiev. The first People's Secretariat consisted of S. Bakinsky (a representative of the Soviet of People's Commissars of Russia) as secretary of nationalities, V. Shakhrai (military affairs), Ye. Bosh (internal affairs), F. Artem-Sergeev (industry and trade), E. Luganovsky (food supplies), V. Aussem (finance), V. Liuksemburg (justice), Ye. Terletsky (agrarian affairs), and V. Zatonsky (education). Terletsky was a left-wing Russian Social Revolutionary; all other members were Bolsheviks. Only Shakhrai and Zatonsky were nationally conscious Ukrainians. At first Yu. Medvediev (a Ukrainian Social Democrat who became a Bolshevik), as chairman of the Provisional Central Executive Committee, headed the secretariat. Later the secretariat was joined by M. Skrypnyk (labor, and then industry and trade), Ya. Martianov, and I. Kulyk and Yu. Kotsiubynsky (military affairs). At first the People's Secretariat was located in Kharkiv. On 12 February 1918 it moved to Kiev, on 27 Feb-

ruary to Poltava, and in March-April to Katerynoslav and Tahanrih.

The secretariat had little power: representatives of the Petrograd Soviet and the Party watched its activities and even ignored the authority of the Ukrainian Soviet government (notably the Supreme Soviet of the National Economy and the departments of certain industrial oblasts of Ukraine) in a number of areas. The commander of all Soviet armed forces, V. Antonov-Ovsienko, as member of the Soviet of the People's Commissars of Russia at that time, was responsible only to the Russian center. Shakhrai protested strongly against that state of affairs. But the secretariat was in crisis: its governmental role and powers were unclear, and there were personal conflicts. Those difficulties resulted in its disintegration by the end of February. Then Skrypnyk, who became its chairman, reorganized it and brought in more Ukrainians, such as Ye. Neronovych, a left-wing Ukrainian Social Democrat (military affairs), H. Lapchynsky, a Ukrainian Communist, I. Klymenko, a Ukrainian Social Democrat, and I. Kulyk. Zatonsky, the representative of the secretariat to the Russian Soviet government, assumed the provisional portfolio of foreign affairs. On 7 March 1918 Antonov-Ovsienko was appointed secretary of military affairs and 'supreme chief commander of the Ukrainian Soviet armed forces.'

The signing of the Peace Treaty of Brest-Litovsk by the Russian Soviet government resulted in the proclamation of the 'independence' of Soviet Ukraine from Soviet Russia by the Second All-Ukrainian Congress of Soviets in Katerynoslav on 17-19 March 1918. At the same time the People's Secretariat was reorganized: Skrypnyk remained chairman, but two new members, A. Bubnov and S. Kosior, both so-called left Communists, were added. The new secretariat could not resist the advancement of Ukrainian, German, and Austrian troops into eastern Ukraine; Russia, in turn, respected the terms of the peace treaty and could offer it no assistance. Hence, on instructions from the Russian authorities the Central Executive Committee and the People's Secretariat were dissolved on 18 April 1918 in Tahanrih. They were replaced by the Bureau for Directing the Partisan Resistance in Ukraine.

The primary purpose of maintaining the secretariat as a separate Soviet government in Ukraine was to cover up the direct aggression of the Russian Bolshevik forces against the UNR and to create a diversion at the peace negotiations in Brest-Litovsk. For that reason a name similar to that of the General Secretariat of the Central Rada was chosen for the executive body, and the Soviet regime also called itself the Ukrainian National Republic. Its organ was titled *Vestnik UNR*.

V. Holubnychy

People's Theater (Narodnyi teatr). A theater established in Kiev in August 1918 as the State People's Theater under the artistic directorship of P. *Saksahansky. The People's Theater concentrated on moving away from the

traditional ethnographic to the Western European repertoire. It also staged I. Karpenko-Kary's historical plays, F. Schiller's *Die Räuber*, and K. Gutzkow's *Uriel Acosta*. In early 1919 Soviet authorities ordered the theater to cease its activities. Its main cast continued to work as the touring People's Theater with Saksahansky. Other members joined the *Shevchenko First Theater of the USSR; some of them eventually became the nucleus of the Zankovetska Theater.

People's Ukrainian Council (*Narodnia ukrainska rada*). An émigré political center founded in January 1929 in Prague by representatives of the *Ukrainian Party of Socialist Revolutionaries, Ukrainian Peasant Association, Ukrainian Workers' Union in the Czechoslovak Republic, and Ukrainian Socialist Radical party and by nonpartisan scholars. Mykyta *Shapoval was elected its president, S. Shelukhyn vice-president, and N. Hryhoriiv general secretary. The Council of Elders consisted of P. Bohatsky, S. Dovhal, L. Kononenko, V. Petriv, S. Rusova, and A. Zhyvotko. The council set itself the task of co-ordinating émigré efforts to renew Ukrainian statehood in all the Ukrainian ethnic territories. It viewed the 1920 Treaty of Warsaw between the UNR and Poland as illegal because it was unsanctioned by the Ukrainian people, and it regarded the Polish military occupation of Western Ukraine as a blatant violation and conquest. The council was also opposed to the *Government-in-exile of the UNR. In 1929 it began publishing *Vistnyk Narodn'oi ukrains'koi rady*. After Shapoval's death in 1932, the council's activities were insignificant; it ceased to exist in 1939.

People's universities (*narodni universytety*). Community adult-education centers offering anything from technical training to popular lectures on history, literature, the arts, science, and other subjects. In Russian-ruled Ukraine various forms of *extramural education developed from the mid-19th century. They were usually organized by the liberal intelligentsia, often through such groups as *literacy societies, and without the support of the state or official agencies (in fact, these initiatives were usually opposed by reactionary bureaucrats, who feared the centers would become hotbeds of national consciousness or political opposition). Although they were not formally called such, these various *Sunday schools, *public readings, and *zemstvo schools filled a function similar to that of a people's university, in providing broad access to higher education for the masses.

A more formal system of people's universities, modeled on the system of university extension schools that emerged in Western Europe and the United States in the late 19th century, began to develop in the Russian Empire after the 1890s, especially after the Revolution of 1905. Prominent intellectuals and professors (eg, M. Tuhan-Baranovsky and M. Kovalevsky) often taught at these schools, each of which attracted thousands of students to hundreds of lectures over the course of the year. By 1917 they had been established in some 40 cities in the empire, including Kiev, Poltava, Yalta, Kherson, and Odessa in Ukraine. Curricula varied greatly but usually included a broad range of courses in the arts and sciences as well as in vocational skills such as bookkeeping, stenography, and machine operating. Graduates, who received formal degrees, were often eagerly recruited by businesses. Every

university was totally autonomous and relied on local sources for funding. In the revolutionary period between 1917 and 1920, people's universities flourished, and some, notably those in Kiev, Kherson, and Zhytomyr, effectively became schools of higher learning.

In Western Ukraine mass organizations, such as the *Prosvita society, the Mohyla Scholarly Lectures Society, and various *pedagogical societies, provided the services that people's universities offered in Russian-ruled Ukraine. The People's Self-Education University, founded in 1930 in Lviv, offered correspondence courses until 1939. In some respects the *Lviv (Underground) Ukrainian University also operated as a people's university.

After the consolidation of Soviet rule people's universities no longer existed in their original form. In part they were replaced by evening *workers' universities and other institutions for adult education. Some local universities of culture were established in Ukrainian cities in the 1920s and 1930s mostly on the initiative of local Party committees. They offered instruction in culture and the arts, as well as political indoctrination. A more formal system was established after 1958 under the control of the USSR Ministry of Culture and especially the *Znannia Society. After concentrating initially on culture, the system soon expanded to include universities of pedagogy, medicine, science and technology, agriculture, Soviet trade, philosophy, history, and other disciplines. Intended at first to provide a broad education with much emphasis on communist ideology, in the late 1960s the universities changed their emphasis, to focus on developing practical skills and job-related knowledge. People's universities do not charge tuition. Courses, taught during a seven- or eight-month academic year, are scheduled to allow students to work fulltime. In Soviet Ukraine the universities were administered by the Znannia Society, the All-Union Central Council of Trade Unions, the Communist Youth League, and the ministries of education, health, and culture. In 1968, people's universities throughout the USSR were placed under the control of the Moscow-based Central Soviet of People's Universities. In 1964 there were 438,000 students, studying at 2,049 people's universities in Ukraine; 88 percent of all students were urban residents. By 1987 there were 4,354,000 students, studying at 8,868 people's universities (8,014 were located in cities). Universities offering social and political studies accounted for 18 percent of the total number of universities; medical and health studies, 16 percent; culture, 15 percent; pedagogy, 14 percent; law, 9 percent; science and technology, 7 percent; administration, 5 percent; theoretical sciences, 5 percent; and general studies, 2 percent. The highest concentration of people's universities was in the industrial eastern regions of Ukraine, with 10 percent of all Ukrainian people's universities located in Donetsk oblast.

People's Will party (*Partiia Narodnoi Voli*, or PNV). A pro-communist Russophile political party in interwar Galicia. The origins of the party go back to 1908, when left-leaning Russophiles in Lviv began to publish the newspaper *Volia naroda* (Will of the People). The leaders of the group then as later were K. Valnytsky, K. Pelekhaty, and

M. Zaiats. On 1 May 1924 the group formally took the name People's Will party and drafted a program that was adopted in essentials at the party's first congress, on 25 April 1926. Under the influence of the *Communist Party of Western Ukraine the PNV renounced its Russophile past, took up a Ukrainian orientation, and merged with the Volhynian *Sel-Soiuz to form the pro-Soviet *Sel-Rob party (10 October 1926). When Sel-Rob split in September 1927, the former People's Will party became Sel-Rob Left.

Pepper (*Capsicum*; Ukrainian: *perets struchkovyi*). A plant genus of the family Solanaceae that grows in subtropical areas as a perennial shrub and is cultivated as an annual vegetable plant. In Ukraine, the principal producer of pepper in the former USSR, the *C. annuum* species is grown. There are sweet and sharp varieties, the sharpness being caused by the alkaloid capsaicin. Sweet peppers are used in cooking and canning; sharp peppers are used as a spice. Mature pepper fruit contains 2–8.5 percent sugar (sharp peppers are more sweet), about 1.5 percent proteins, up to 14 mg per 100 g carotene, and 125–300 mg per 100 g vitamins. Pepper extracts are used as a skin irritant and medicinally to improve appetite and digestion. Aqueous extracts also have insecticidal properties.

Perebyinis, Petro [Perebyjnis], b 6 June 1937 in Sloboda-Sharhorodska, Sharhorod raion, Vinnytsia oblast. Poet. He began publishing in 1955, but his first collection, *Chervonyi akord* (The Red Chord), appeared only in 1971. His other collections are *Vysoki raiduhy* (High Rainbows, 1973), *Peredchuttia dorohy* (Premonition of the Road, 1975), *Rankovi surmy* (Morning Trumpets, 1976), *Hrono vohniu* (Cluster of Fire, 1977), *Chervonyi kolir* (Red Color, 1977), *Nebo tvoie i zemlia* (Thy Heaven and Earth, 1979), *Maidan revoliutsii* (Square of the Revolution, 1980), *Svitlovyi rik* (Light Year, 1982), *Tretia sprob*a (Third Attempt, 1983), *Pisnia pam'iaty* (Song of Memory, 1984), and *Prysiahaiu Dni-prom!* (I Swear by the Dnieper!, 1985).

Perebyinis, Vasył [Perebyjnis, Vasył'], b 1 January 1898 in Mali Puzyrky, Iziaslav county, Volhynia gubernia, d 13 November 1966 in London. Artist. He studied at the St Petersburg and Cracow academies of art. An interwar émigré, from 1926 he lived in Paris, where he designed stage scenery and costumes and took part in many exhibitions. In 1931 he participated in the show of the Association of Independent Ukrainian Artists in Lviv. He illustrated many interwar books and almanacs published in Lviv and painted landscapes (many of Normandy), Paris street scenes, portraits, and still lifes, in which postimpressionist influences competed with realist and surrealist ones. From 1946 he lived in London.

Perehyn [Perečyn]. v-3. A town smt (1986 pop 6,900) on the Uzh River and a raion center in Transcarpathia oblast. It was first mentioned in historical documents in 1427, when it was under Hungarian rule. The town has a wood-chemistry and a woodworking complex. In 1925 Ya. Pasternak excavated an Eneolithic burial ground nearby.

Perederii, Vitalii [Perederij, Vitalij], b 24 March 1928 in Artemivka, Staline okruha. Philosopher. A graduate of the Kiev Pedagogical Institute (1948), he worked at the Kiev Institute of National Economy. In 1961 he became a lectur-

er at the Kiev Conservatory and eventually the chairman of its Marxism-Leninism department. He has written over 80 works in the history of esthetics in Ukraine and on problems in Marxist-Leninist esthetics, including books on Ukrainian revolutionary-democratic esthetics in the late 19th and early 20th centuries (1964) and Soviet artistic culture (1985).

Pre dove. A village near Sevastopil in the Crimea near which a Taurian grave site of the 4th to 3rd century BC was found. Excavations in 1956–7 uncovered two grave grounds, each containing a number of stone burial vaults. Silver jewelry, bronze arrowheads, and pottery fragments were recovered from inside the vaults.

Peredvizhniki (Itinerants). A name applied to members of the Russian Society of Itinerant Art Exhibitions. It was founded in 1870 by I. *Kramskoi, N. *Ge, and 13 other artists who had left the St Petersburg Academy of Arts in protest against its rigid neoclassical dicta. In order to reach the widest audience possible, the society organized regular traveling exhibitions throughout the Russian Empire, including Kiev, Kharkiv, and Odessa in their tours. Over the years the society attracted artists from various parts of Russia, Belarus, and Ukraine. Among the Ukrainians who joined it were K. *Kostandi, A. *Kuindzhi, M. *Kuznetsov, O. *Murashko, L. *Pozen, M. *Pymonenko, P. *Nilus, I. *Repin, S. *Svitoslavsky, and M. *Yaroshenko. Ukrainians who took part in the society's exhibitions but were not members were P. *Levchenko, S. *Kyshynivsky, and Ye. *Bukovetsky. The Peredvizhniki worked in realistic and naturalistic styles and concentrated on landscapes, portraits, and genre themes. Typical of the society's Ukrainian offshoot are works such as Kostandi's *Among the People* (1885) and *Early Spring* (1892) and Pymonenko's *Wedding (The Kiev Gubernia)* (1891) and *Young Men (At the Well)* (1909). The Peredvizhniki were more concerned with realistic portrayals than with stylistic innovation. Consequently, in the wake of formalist experimentation the society, originally radical in nature, became a bastion of conservatism. In 1923 the society amalgamated with the Association of Artists of Revolutionary Russia. The naturalistic styles advocated by its members were later used as the basis of *socialist realism.

N. Mykytyn

Perehinets, Mykola [Perehinec'], b 1897, d 1947. Linguist. In the 1920s and 1930s he taught in postsecondary schools in Kharkiv. He published a few articles on Ukrainian word order and syntactic forms using F. de Saussure's and K. Vossler's approaches and was the coauthor of two course books on the Ukrainian language (1929, 1930). He spent many years in Soviet concentration camps (1938–45). After his release he taught at the Lviv Pedagogical Institute.

Perehinsko or **Perehinske** [Perehins'ko or Perehins'ke]. V-5. A town smt (1986 pop 11,700) on the Limnytsia River in Rozhniativ raion, Ivano-Frankivske oblast. The town was founded in the first half of the 13th century. It has a furniture factory and a forest industry.

Pereiaslav. See Pereiaslav-Khmelnyskyi.

Pereiaslav Articles of 1659 (Pereiaslavski staty). An agreement between the Hetman state and Muscovy concluded in Pereiaslav in October 1659 by Hetman Yu. *Khmelnysky and the Muscovite representative, A. Trubetskoi. After Khmelnysky's election as hetman his government drafted a modified version of the *Pereiaslav Treaty of 1654 that was more advantageous to Ukraine (the Zherdev Articles). Taking advantage of the hetman's difficult position (Pereiaslav was surrounded by a 40,000-man Muscovite army), the Muscovite government rejected the new version and imposed a falsified version of the 1654 treaty and 14 'New Articles' that considerably restricted Ukraine's sovereignty.

The articles forbade Ukraine to conduct an independent foreign policy, to enter into international accords (particularly military alliances), and to declare war on neighboring states without the prior consent of the Muscovite government. Muscovite military governors and garrisons thenceforth had the right to be not only in Kiev (where they had been since the 1654 treaty), but also in Bratslav, Chernihiv, Nizhen, Pereiaslav, and Uman. Cossack forces were to be withdrawn from Belarus, and the Zaporozhian Host was deprived of the right to depose and elect hetmans. The hetman himself was forbidden to appoint or remove members of the General Officer Staff and regimental colonels, and that authority was given exclusively to the Cossacks' General Military Council. Cossack leaders thenceforth who attempted to break Ukraine away from Muscovy were to be executed, and the Ukrainian Orthodox church was subordinated to the Moscow patriarch.

The text of the articles was printed by the Kievan Cave Monastery Press by order of Trubetskoi and sent to all of the regiments in the Hetman state. The articles provoked popular indignation in Ukraine and influenced Khmelnysky's decision to turn to Poland in 1660. The text was published in *Istochniki malorossiiskoi istorii* (Sources for Little Russian History, pt 1, 1858).

A. Zhukovsky

Pereiaslav College (Pereiaslavskiy kolehium). A secondary school founded in 1738 by Bishop A. Berlo. It was located on the territory of the Resurrection Monastery in Pereiaslav, now Pereiaslav-Khmelnyskyi, Kiev oblast. It was founded to prepare Orthodox clergy. The program of study lasted six years and closely followed that of the Kievan Mohyla Academy. The students at the college were mainly children of the clergy and of Cossack officers, although some were the children of burghers and villagers. The college also boarded students. The courses of instruction included Polish, Russian, Greek, Latin, poetics, dialectics, rhetoric, history, vocal music, geometry, and arithmetic. Courses in philosophy (1774) and theology (in the late 1770s) were introduced, and in 1785 a branch of the college was transferred to Novhorod-Siverskyi and reorganized into a seminary. The Pereiaslav College subse-

quently curtailed all secular instruction and became a theological seminary. In 1862 this seminary was transferred to Poltava. In 1972 a memorial museum dedicated to H. Skorovoda, who taught poetics at the college in 1753, was opened on the grounds of the college. Other prominent teachers at the college included I. Kozlovych, I. Levanda, and V. Shyshatsky.

Pereiaslav eparchy. One of the oldest eparchies of the Orthodox church in Ukraine. Established soon after the Christianization of Ukraine, it was one of only three original eparchies in Left-Bank Ukraine. After the city of Pereiaslav was razed during the Mongol invasion and went into decline, the eparchy ceased to exist. In 1702 a vicar bishop to the Kiev metropolitan was established in Pereiaslav, but in 1733 the Pereiaslav eparchy was transferred to the jurisdiction of the Holy Synod. From 1701 to 1795 twelve hierarchs occupied the see, including A. Mohyliansky. After the abolition of the Hetmanate and the creation of gubernias in Ukraine, the territory of the eparchy was included in *Poltava gubernia and the new Poltava eparchy.

Pereiaslav principality. In Ukraine's early history the territory of northern Left-Bank Ukraine was inhabited by the Slavic tribes of the *Siverianians and, closer to the Dnieper, *Polianians and was ruled by the grand princes of Kiev. In his will Prince Yaroslav the Wise designated an appanage principality with its capital in Pereiaslav (now *Pereiaslav-Khmelnyskyi) and bequeathed it to his son, *Vsevolod Yaroslavych, who ruled it from 1054. When Vsevolod ascended the Kievan throne in 1078, he continued ruling Pereiaslav principality as well.

While it was independent, the principality bordered on Kiev principality along the Dnieper and the Desna rivers to the west, and was separated from Chernihiv principality to the north and northeast by the Oster River, the inaccessible marshes of the Smolynka, a tributary of the Seim River, and the Romen and the Sula rivers. Until the first half of the 12th century the principality also controlled the Seim Basin (the Poseimia) as far east as Kursk. Its southern and eastern borders reached at times as far as the Sosna, a right tributary of the Don, and the upper reaches of the Oskil and the Orel rivers, but fluctuated because of constant Pecheneg, Turk, and Cuman incursions. In favorable times Ukrainian colonization of that frontier moved along the Vorskla and the Sula rivers. Apart from Pereiaslav the principality's important fortified towns were Lukoml, Osterskyi Horodets (now Oster), Pryluka, Pyriatyn, and *Voin.

The principality bore the brunt of repeated Cuman attacks on Kievan Rus', and its princes, notably Vsevolod and his son *Volodymyr Monomakh, who ruled the principality from 1094 to 1113, waged war against the *Cumans, often together with other princes. Subsequent partitions of the Ukrainian lands among the princely dynasties reduced the principality to a second-rate appanage that was repeatedly annexed by the more powerful princes. To relieve that unfavorable situation the principality's inhabitants tried to find a dynasty who would help them fight the marauding nomads but not interfere too much in their internal affairs. In the end they chose the northern Rus' Monomakhovych princes of Suzdal, who ruled from the late 12th century on. The rulers of the principality in-

cluded Monomakh's brother, Rostyslav; Monomakh's sons, Sviatoslav, *Yaropolk II Volodymyrovych, *Yurii Dolgorukii, Andrii, and *Viacheslav Volodymyrovych; Vsevolod and *Iziaslav Mstyslavych, and Iziaslav's son, *Mstyslav Iziaslavych; Dolgorukii's sons, *Rostyslav Yuriievych, *Hlib Yuriievych, and Vsevolod Velyke Hnizdo; Hlib's son, Volodymyr; the Olhovych prince *Sviatoslav III Vsevolodovych and his grandson, *Mykhail Vsevolodovych; Mstyslav Iziaslavych's cousin, *Riuryk Rostyslavych, and Riuryk's son, Volodymyr; and Vsevolod Velyke Hnizdo's sons, Konstantyn, Yaroslav, Volodymyr, and Sviatoslav.

During and after the Mongol-Tatar invasion of 1239–40 the principality suffered greatly at the hands of the invaders. It lost its political independence and was reduced to being a vassal of the Golden Horde. Ca 1360 the region came under Lithuanian rule, and in 1569 it became part of the Polish state. Hostilities between Poland and the Crimean Khanate exposed the region to ongoing Tatar raids, which halted Ukrainian colonization southeastward until the emergence of the Zaporozhian Cossacks.

A company flag of Pereiaslav regiment (1762)

Pereiaslav regiment. An administrative territory and military formation in the Hetman state. Mentioned in historical documents from the 1570s, Pereiaslav was one of the oldest regiments in Ukraine. In 1649 it consisted of 19 companies, numbering 2,900 Cossacks. In 1654 it had 11 companies, and in 1665 it had 13. After the Treaty of Andrusovo (1667) it was reorganized: seven companies from the Right-Bank regiments of Cherkasy and Kaniv, two from Kropyvna regiment, and two new companies were added, and five were transferred to Kiev regiment. The regiment took part in the Khmelnytsky uprising, the Chyhyryn campaigns (1667–8), the Northern War (1700–21),

the Russo-Turkish Wars (1735–9 and 1768–74), and the Seven Years' War (1756–63). Two of its commanders, P. Teteria (1653–8) and Ya. Somko (1660–2), became hetmans, and several others – F. Loboda (1649–53), V. Serbyn (1675–7, 1679–83), I. Lysenko (1677–9, 1690–2), and L. Polubotok (1683–7, 1689–90) – served on the General Staff of the Hetmanate. The regiment was abolished in 1781, and its territory was incorporated into Kiev vicegerency.

Pereiaslav Treaty of 1630 (Pereiaslavska uhoda). An agreement between the Cossacks and Poland, signed on 8 June 1630 by the Polish hetman S. *Koniecpolski after a successful Cossack and peasant uprising led by T. *Fedorovych routed the Polish army at Pereiaslav on 25 May. The treaty amended the *Kurukove Treaty of 1625 by increasing the allowable number of *registered Cossacks from 6,000 to 8,000. The additional 2,000 were to be chosen by a commission made up of existing registered Cossacks and participants in the uprising, and the Cossacks were granted the right to elect their own hetman. Nonregistered Cossacks were granted amnesty but had to return to their homes on the nobles' estates. The Cossacks refused the Poles' request to hand over Fedorovych and elected T. Orendarenko as their hetman. The treaty was no more than a temporary compromise, for soon new Cossack-Polish conflicts erupted that resulted in the revolts led by P. *Pavliuk in 1637 and Ya. *Ostrianyn in 1638. Fedorovych's uprising and the treaty are described in a study by Mykhailo Antonovych (1944).

Pereiaslav Treaty of 1654 (Pereiaslavska uhoda). A fateful alliance the Hetman state under B. *Khmelnysky concluded with Tsar Aleksei Mikhailovich during the *Cossack-Polish War. After the Crimean Tatar army betrayed the Cossacks for the third time during the siege of Zhvanets in 1653, and Khmelnytsky realized he could no longer rely on Ottoman support against Poland, the hetman was forced to turn to Muscovy for help. Moscow responded favorably to an alliance with Ukraine because it would prevent closer Ukrainian-Turkish ties. Negotiations began in January 1654 in Pereiaslav between Khmelnytsky and his General Military Council on one side and Muscovite envoys led by V. *Buturlin on the other. They were concluded in April in Moscow by the Ukrainians S. Bohdanovych-Zarudny (general judge of the Hetman state) and P. Teteria (then colonel of Pereiaslav regiment) and by A. Trubetskoi, V. Buturlin, and other Muscovite boyars.

The treaty consisted of two main documents modeled on the 1649 Treaty of *Zboriv: the tsar's patent to the Zaporozhian Host of 6 April (patents were also granted to other Ukrainian estates), and 11 articles concerning military, political, and technical details. The original documents have not been preserved, but translations and drafts of the tsar's patents have survived. The treaty's form and character were imperfect; some articles were not formulated systematically, and their content was rather vague. (English translations of the treaty appear in Ohloblyn's and Basarab's books [see bibliography].)

As a result of the treaty Ukraine became a protectorate of the Muscovite tsar, thenceforth also the 'tsar of Little Russia,' who in turn recognized the hetman and the Zaporozhian Host as the only representatives of the Hetman state and its government. Ukraine, headed by a freely

elected hetman, retained its independence and autonomy in both foreign and internal policy. The rights and freedoms of the Cossacks, nobility, burghers, and clergy were guaranteed. Muscovy was obligated to defend Ukraine militarily, to launch immediately an offensive against Poland, and to send troops and a military governor to defend Kiev. The *registered Cossacks of Khmelnytsky's army were to be paid by the tsar from taxes gathered by local governments in Ukraine, and their number was fixed at 60,000. In view of the state of war the Ukrainian government agreed not to conduct negotiations with either Poland or Turkey without the tsar's permission. (That last provision and the one about collecting taxes in Ukraine for the tsar's treasury were never enforced.)

The treaty's limitations and formal character led to differing interpretations of it on both sides. The Ukrainian government, particularly under Khmelnytsky, considered it to be a temporary political and military alliance. Muscovy, however, particularly after Khmelnytsky's death, used it to justify its increasing interference in Ukraine's internal affairs, whereby it limited Ukraine's sovereignty and eventually nullified the treaty's provisions. Soon after the treaty was concluded, Muscovite officials visited 117 Ukrainian towns, and over 127,300 Ukrainian men swore an oath of loyalty to the tsar.

Historians and legal specialists have not been unanimous in their evaluation of the treaty, particularly its legal aspects and the relations it established between Ukraine and Russia. Some (mostly Russian) scholars believe that it formalized the voluntary incorporation of Ukraine into Russia, either in full or in part (D. Odinet, I. Rozenfeld, V. Miakotin) or Ukraine's autonomy within the Muscovite tsardom and later the Russian Empire (B. Nolde and others). Other historians, both Russian and Ukrainian, considered it to be an act of real union of the two states (N. Diakonov, A. Filippov, A. Popov); or a personal union with the tsar as sovereign of both countries (R. Lashchenko, V. Sergeevich); or the formalization of Ukraine's vassalage (M. Hrushevsky, N. Korkunov, I. Krypiakievych, Miakotin, L. Okinshevych, M. Pokrovsky, M. Slabchenko, A. Yakovliv in his early works) or its status as a protectorate (Hrushevsky, D. Doroshenko, B. Krupnytsky, Krypiakievych, Yakovliv in his later works) or pseudo- or quasi-protectorate (B. Halaichuk); or a temporary military alliance, solidified by the tsar's protection (V. Lypynsky, E. Borschak, Yakovliv in his later works, S. Ivanytsky). Modern Ukrainian historians have been divided: a minority have interpreted the treaty as the formalization of Ukraine's status as a vassal state or protectorate (Okinshevych, Yakovliv), whereas others have viewed it as a military and political alliance (Lypynsky, O. Ohloblyn). Soviet historians generally disputed that it was a treaty at all, and described it as the culmination of the desire of two 'fraternal peoples' to unite in a unitary Russian state.

Valentyna Pereiaslavets

Pereiaslavets, Valentyna [Perejaslavets'], b 10 February 1907. Ballet dancer, choreographer, and pedagogue. After completing study at the Kharkiv Choreography School (1926) she performed as a soloist in the Kharkiv, Kiev, and Sverdlovsk theaters of opera and ballet and in the Leningrad Choreography School under A. Vaganova. In 1940-4 she was the first soloist dancer in the Lviv Theater of Opera and Ballet. In 1945-8 she led a ballet school in West Germany. In 1949 she moved to New York and worked in T. Semenova's studio at Carnegie Hall. From 1951 she taught in the American Ballet Theater. Among her students were R. Nureyev, E. Bruhn, M. Fonteyn, and C. Fracci.

Pereiaslavets [Perejaslavets'] (aka Malyi Pereiaslavets). The name in the Rus' Primary Chronicle of the medieval Bulgarian town of Malyi Preslav, on the right bank of the lower Danube River. In the 10th century it was situated at the intersection of the trade routes between Rus' and the Danubian lands and Rus' and Byzantium. In 967 Grand Prince *Sviatoslav I Ihorevych captured the town during his first Bulgarian campaign and planned to move his capital there. In 971 the town was taken by the Byzantine troops of John Tzimiscus, who slaughtered the Rus' garrison and put an end to Sviatoslav's plans.

Pereiaslav-Khmelnytskyi [Perejaslav-Xmel'nyc'kyi]. III-12. A city (1989 pop 30,000) on the Trubezh River and a raion center in Kiev oblast. In the medieval period it was known as Pereiaslav, and then as Pereiaslav until 1943. It is one of the oldest cities of Ukraine: it is first mentioned in 907, in a treaty between Prince Oleh and the Greeks, where it is ranked third in importance after Kiev and Chernihiv. Pereiaslav was a strategically important fortress that defended Kievan Rus' against the steppe nomads. According to the chronicles, Volodymyr the Great built up its fortifications in 992, after his victory over the Pechenegs. The city also played an important political, religious, and economic role. From the mid-11th to the early

Pereiaslav-Khmelnyskyi in the 19th century

13th century it was the center of *Pereiaslav principality and the seat of Pereiaslav eparchy. A number of monumental buildings were erected in the period – the five-nave St Michael's Church (built in 1090 under Bishop Yefrem), the Dormition Church (built in 1098 by Volodymyr Monomakh), a three-nave shrine outside the fortress, St Theodore's Church, and St Andrew's Church. The citadel was encircled with walls and a stone gate surmounted by a chapel. In 1239 Pereiaslav was destroyed by the Tatars, and none of the medieval architecture survived.

Pereiaslav began to revive only in the mid-16th century, as a Cossack center in Kiev voivodeship. In 1630 T. Fedorovych's Cossack army defeated the Poles near the town. Ya. Ostrianyn's rebellion in 1638 was centered in Pereiaslav. In 1648 the town became a regimental center in the Cossack state established by B. Khmelnytsky (see *Pereiaslav regiment). It was the site of the negotiations culminating in the *Pereiaslav Treaty of 1654. A number of fine buildings erected in the 17th and 18th centuries have been preserved. Although Pereiaslav lost its political significance, it retained its religious and educational role, as the home of a college (1738–85) and then of a theological seminary (until 1862). H. *Skovoroda taught at the college in 1753. After the abolition of the Hetman state Pereiaslav again entered a period of decline. It became a county center of Kiev vicegerency (1781–96) and then of Little Russia (1797–1802) and Poltava (1802–1922) gubernias. By 1896 its population had reached 15,600. In 1923 it became a raion center.

Today Pereiaslav-Khmelnyskyi is a museum town, with little industry (a clothing, a footwear, and a handicrafts factory) but with 17 museums and many architectural monuments. The most important buildings of the baroque period are St Michael's Church (built in 1646–66 on the site of the medieval church, restored in 1711–19, and painted in 1715), the Ascension Cathedral (built by I. Mazepa in 1695–1700) and its bell tower (1760–70), the college building (1753–7), and the Church of the Holy Protectress (1704–9, financed by Col I. Myrovych). Remnants of the 10th-century fortifications and the foundations of the Church of the Transfiguration (11th century) have been uncovered. Most of the city's museums, including the open-air museum of architecture and folkways, the H. Skovoroda Museum (est 1972), the Archeological Museum, the V. Zabolotny Museum, the Folk-Art Museum of

the Kiev Region, the Museum of Kobza Playing, the Sholom Aleichem Museum, the Beekeeping Museum, and the Bread Museum, were founded by M. *Sikorsky. The A. Kozachkovsky Museum contains memorabilia of T. Shevchenko, who visited the town in 1845 and 1859. In the last few years the local branch of the Kiev Pedagogical Institute has been expanded greatly.

Pereiaslav-Khmelnyskyi burial site. A *Cherniakhiv culture burial ground in the northwestern part of Pereiaslav-Khmelnyskyi, Kiev oblast. Uncovered in 1951 and excavated in 1952–4, the site yielded 42 graves of which 23 were cremations. Pottery shards, glass cubes, bronze clasps, and jewelry were the most frequently recovered grave goods. The wealthiest of the graves contained arrowheads, spurs, and glass game pieces.

Pereiaslav-Khmelnyskyi Historical Museum (Pereiaslav-Khmelnyskyi istorychnyi muzei). A museum founded in Pereiaslav-Khmelnyskyi in 1946 as a historical and regional studies museum; it was given its present name in 1954. The Pereiaslav-Khmelnyskyi Archeological Museum, the Hryhorii Skovoroda and Volodymyr Zabolotny memorial museums, and the diorama of the Battles for the Dnieper in the Pereiaslav-Khmelnyskyi Region in 1943 are its branches. Since 1979 the museum has been part of the Pereiaslav-Khmelnyskyi Historical-Cultural Preserve. In 1988 it had 150,000 archeological, historical, ethnographic, artistic, printed, and numismatic objects in its collections, including items such as a 2nd- to 4th-century chess set, the world's only extant 11th-century candelabra with more than 12 candlesticks, and Hetman B. Khmelnytsky's sword. In the 1960s the museum published two scholarly collections called *Naukovi zapysky*. Since 1951 the museum's (and since 1979 the preserve's) director has been M. Sikorsky. A guidebook was published in Russian and German in 1972.

Pereiaslav-Khmelnyskyi Museum of Folk Architecture and Folkways. See Museums of folk architecture and folkways.

Perekop. VII-14. A village on the Perekop Isthmus in Krasnoperekopske raion, Crimea oblast. In the past it was the departure point for Tatar raids into Ukraine. At the end of the 15th century Mengli-Girei built the fortress of Or-Khap at the site. P. Sahaidachny defeated the Tatars there in 1620. In 1736 and 1738 the Russians captured and destroyed the fortress, but it was rebuilt by the Tatars in 1754. In 1783 Russia annexed the territory and turned Perekop into a county center of Tavriia gubernia. After the Crimean War many Tatars emigrated from the region to Turkey, and Ukrainian settlers moved in. With the building of the Lozova-Sevastopol railway line the town lost its commercial importance. By 1896 its population was only 7,400. According to the census of 1926, Ukrainians accounted for 43.6 percent of the region's population.

Perekop Isthmus. A thin tract of land connecting the Crimean Peninsula with the Ukrainian mainland. Located between Karkinit'ska Bay, in the Black Sea, and Syvash Lake, toward the Sea of Azov, the isthmus is approx 30 km long and 8–23 km wide, with elevations reaching up to 20 m. It consists of poor, saline soils, some steppe, and a desertlike vegetation cover. Several natural salt lakes (see

*Perekop lakes) are located on its southern reaches. Because it provided the only land link between the Ukrainian mainland and the Crimea, the isthmus has long had great economic importance. It was used as a trade route by Greek and Genoese colonies and from the late 18th century by salt-trading chumaks. The building of the Kharkiv–Symferopil train line over Syvash Lake in the 1870s diminished the importance of the isthmus considerably, although the construction of the Kherson–Dzhankoi line and the North Crimean Canal once more raised its fortunes. Because of its strategic significance the isthmus has been protected by fortified towns with defensive walls and moats (*perekopani rovy*, hence the name Perekop). The ancient Greeks built the town of Tafros there, and the Crimean Tatars had the fortress-town Or-Khap and later Ferk-Ferech-Kermen. In the 15th and 16th centuries the Turks built fortifications (known as the Turkish Wall) across the entire isthmus, which was the scene of major battles during the Russo-Turkish wars of the 18th century. Soviet forces fought their way through the isthmus's fortifications in 1920 during the Perekop-Chouhar Operation to take control of the Crimea. Fighting erupted in the isthmus during the Second World War, in 1941 and 1943.

Perekop lakes. A group of nine saltwater lakes located in the southern portion of the Perekop Isthmus. They are divided into chloric and sulfate-chloric categories. They range in area from 0.7 to 2.8 sq km, the largest lakes being Aihulske, Chervone (Krasne), Kyrleutske, Kyiatske, and Stare. Their banks are generally quite high (reaching 8–13 m), although the water in the lakes is actually 0.1 to 4.5 m below sea level. Some of the lakes have a salinity level of 21–28 per cent during the summer. Their shorelines often recede at that time and leave behind a dense layer of salt; salt extraction was a key economic activity around the lakes until the 20th century. A plant for extracting bromide, magnesium oxide, and magnesium chloride from the brine of the Perekop lakes is now located at Krasno-perekopske.

Perelesnyk (aka *litavets*). A figure in Ukrainian folk mythology akin to an incubus. He was believed to fly in the shape of a fiery dragon or young man, to enter homes through chimneys, doors, or windows, and to seduce women by assuming the appearance of a deceased spouse or lover. The *perelesnyk* has a female counterpart, *perelesnytsia*, but she rarely appears in Ukrainian folk mythology.

Perelisna, Kateryna (pseud of K. Hlianko), b 2 December 1902 in Kharkiv. Children's writer and pedagogue. From 1919 to 1931 she published poems, stories, articles, and reviews in the Kharkiv press and worked for publishers of children's folklore and literature. In 1931 her husband, O. Popov, the director of the Ukrainian Scientific Institute of Pedagogy and editor of *Radians'ka osvita*, was arrested and imprisoned, and she lost her job as a teacher and was harassed. She stopped publishing until 1941, when she fled to Lviv during the German occupation and contributed there to several children's magazines. In 1943 her poems won first prize in a children's literature competition sponsored by the Ukrainian Central Committee and the Ukrainske Vydavnytstvo publishers. After the war she was a displaced person in Germany and then emigrated to

Kateryna Perelisna

Petro Peremezhko

the United States. She is the author of the children's books *Odarka* (1927), *Ievshan zillia* (Homesickness, 1946), *Dlia maliat pro zviriat* (For Youngsters about Animals, 1952), *Oi, khto tam?* (Hey, Who's There?, 1954), *Try pravdy* (Three Truths, 1967), *Moïi matusi* (For My Mommy, 1967), and *Kotykova pryhoda* (The Kitten's Adventure, 1973). Many of her works have appeared in émigré periodicals and miscellanies for children, and some of her poems and stories have been put to music as songs and miniature children's operas by composers such as O. Zalesky, M. Fomenko, H. Kytasty, and I. Nedilsky.

Peremezhko, Petro [Peremežko], b 24 July 1833 in Rybotyn, Krolevets county, Chernihiv gubernia, d 8 January 1894 in Kiev. Histologist. A graduate of Kiev University (1859), he worked in Kazan, was a professor of histology, embryology, and comparative anatomy at Kiev University (1868–91), and served as dean of the medical faculty (1872–5) and president of the Society of Kiev Physicians (1882–3). He set up the first histology department in Ukraine and discovered the process of karyokinesis in animal cells (1878), thereby becoming one of the founders of karyology. He first described the nerves which later came to be called proprioceptors. His publications also dealt with the development and regeneration of striated muscles, the structure of the hypophysis, gerontological changes in the thyroid gland, and the development and structure of the spleen. He built the first microtome in Russia and contributed to the first Russian textbook in microscopic anatomy.

Peremoha. An Argentinian-Ukrainian publishing house and bookshop in Buenos Aires, owned by S. Kravets and M. Pareniuk (1947–57). It was founded on the basis of the Promin Publishing House of 1942 and published approx 50 books and 79 issues of the literary journal *Porohy*.

Peremoha (Victory). An ideological organ of the *Front of National Unity, published in Lviv by the Batkivshchyna publishing house, semimonthly from February 1933 to 1936 and then quarterly to 1939. It was edited by M. Shlemkevych, and regular contributors included D. Paliv, I. Hladylovych, and S. Volynets.

Peremyshl [Peremyśl'] (Polish: Przemysł). IV-3. A city (1989 pop 68,100) on the Sian River between the Car-

Peremyshl's coat of arms

pathian foothills and the Sian Lowland. It has been a county center and, since the mid-1970s, a voivodeship center in Poland. One of the oldest cities in Galicia, it has been throughout its history a major Ukrainian political, cultural, and religious center.

History. Peremyshl is first mentioned in the chronicles under the year 981, but the area has been inhabited almost continuously since the Paleolithic Period. The numerous Roman coins found in the vicinity show that by the 1st century AD Peremyshl was a significant trading post on the route between the Dniester and the Vistula. The discovery of a large hoard of medieval Arab coins from the 9th and 10th centuries confirmed the town's continued commercial importance. Excavations conducted in 1958–60 on Zamkova Hill support the hypothesis that as early as the 9th century Peremyshl was a capital of White Croatian princes and Slavonic-rite bishops: the uncovered foundations of a round chapel and a palace were built of cut stone according to the Galician-Volhynian practice, not of brick (according to the Cracow practice). Because of its border location Kievan Rus' and Poland, and sometimes Hungary, fought over Peremyshl. In 981 Volodymyr the Great annexed it to the Kievan state. In 1018–31 and 1071–9 it was held by the Poles. In the late 11th century it became the seat of a separate principality ruled by *Riuryk Rostyslavych (1087–92), *Volodar Rostyslavych (1094–1124), and Volodar's sons, Rostyslav (1124–30) and *Volodymyrko (1131–52). Volodymyrko brought all the Galician lands under his rule and in 1141 moved the capital to Halych. In the early 13th century some rulers of Peremyshl, such as Sviatoslav Ihorevych (1206–11) and Oleksii Vsevolodovych (1231), claimed independence, until Danylo Romanovych finally incorporated the whole Peremyshl territory into Galicia. During Danylo's and Lev's reigns, German merchants and tradesmen settled in the town and received the right to municipal self-government. At that time the town lay between Zamkova Hill and the Sian River.

Polish period, 1349–1772. In 1349 Peremyshl was captured by the Polish king Casimir III the Great, who built a new castle there. Under Władysław Opolczyk, the viceroy of Louis the Great of Hungary, a Roman Catholic diocese was established in Peremyshl (1375). In 1387 the town returned to Polish rule, and in 1389 King Jagiełło granted it the rights of *Magdeburg law. When Polish law and administration were introduced and Rus' voivodeship was set up in 1434, Peremyshl became a starostvo center in the new province. In 1458 it gained all the rights of a crown city.

In the late 14th century the core of the town shifted east

Peremyshl in 1618 (engraving by F. Hogenberg)

of the old town. A large new market square and a grid of eight streets were enclosed by walls and a moat. In the early 16th century the town's area was 50 ha (similar to Lviv's). Beyond the walls lay the suburbs and, farther on, the gentry estates. Peremyshl prospered from the mid-15th to the mid-17th century. Its residents were engaged mostly in trades, such as leather-working, brewing, and weaving. Some made their living in local and transit trade. By the mid-17th century the town's population had reached 4,000. Apart from Ukrainians and Poles there were Germans (who were quickly Polonized), Armenians, and Jews, who in 1559 were given special privileges by the king. Each ethnic group lived in a different area of the town. Ukrainians lived mostly in Vladyche district and the suburbs. Ukrainian burghers had to struggle for equal rights with the Poles and organized themselves into a brotherhood. In 1592 they founded a school, and later, a hospital. The brotherhood eventually expanded from the Orthodox cathedral to the Church of the Holy Trinity, and in 1633 it set up a printing press, which it sold in the late 17th century to the Lviv Dormition Brotherhood. By the end of the 17th century the Ukrainian community in Peremyshl was in decline, owing partly to Polish discrimination and oppression and partly to religious strife between the Orthodox and the Uniates. The strife lasted throughout the 17th century and ended in the Uniates' victory in 1691 (see *Peremyshl eparchy). The city became an important Polish cultural center, in which the Polish diocese, the cathedral school (later the Jesuit College), and the educated magnates played the leading role. In the 16th and early 17th centuries the Peremyshl region played a prominent role in the Polish renaissance and reformation. The town was also an important Jewish religious and cultural center.

In the late 17th and the 18th centuries Peremyshl declined. At the beginning of the 18th century its population fell to 1,700. Changing trade routes were partly responsible, but the chief cause was Poland's incessant warfare and social conflicts.

Austrian period, 1772–1918. At the first partition of Poland in 1772, Peremyshl was transferred to Austria, which sold it to Count I. Zetner in 1778. At the request of the burghers, however, Joseph II restored all the town's rights and privileges in 1789, and the town became a county center. Civil servants and tradesmen, mostly German and

Main entrance of the former Ukrainian Catholic cathedral (1630; now a Polish Catholic church) in Peremyshl

Czech, settled in Peremyshl. The old ramparts were leveled, and the town was allowed to expand. It grew at a slow pace: in 1860 the population reached only 10,000 (compared to 70,000 in Lviv). The rate of growth increased in the later part of the 19th century as new railway lines linked Peremyshl with Cracow (1859), Lviv (1861), and Hungary (1872); railway yards and agricultural machinery factories were set up in the town, and the local fortress and garrison were expanded after 1876. In 1880 the population reached 20,700, in 1900, 46,300, and in 1910, 54,700 (including 7,500 military personnel).

Under Austrian rule new opportunities opened before the Ukrainian community in Peremyshl. Thanks to the efforts of I. *Mohylnytsky and the support of Bishops M. *Levytsky and I. *Snihursky the city became, in the first half of the 19th century, an important Ukrainian educational center. The Societas Presbyterorum, a clerical association for publishing educational materials (est 1816), a preceptors' school (est 1817), and the chapter library (later also an archive and museum) took the initiative in the educational movement. A number of Ukrainian textbooks and two grammars were published in Peremyshl. By the 1880s Peremyshl had become, after Lviv, the second-largest center for Ukrainian secondary education in Galicia. It was the home of the Peremyshl Greek Catholic Theological Seminary (revived in 1845), a bilingual women teachers' seminary (est 1870), the *Ukrainian Girls' Institute (est 1881), the *Peremyshl State Gymnasium (est 1888), and a number of vocational schools, elementary schools, and boarding schools. Peremyshl was less important as a publishing center, yet an impressive list of periodicals as well as some religious books and school texts appeared there: the first calendars in Galicia, **Peremyslianyn* and *Peremyslianka*, the monthly *Vistnyk Peremys'koi eparkhii* (1889–

Members of the Ukrainian girls' team Spartanky in Peremyshl (1927)

1918), the literary journal *Novyi halychanyn* (1889), the religious monthly *Poslannyk* (1895–1907), the monthly **Prapor* (1897–1900), the farmers' monthly **Hospodar* (1898–1913), the weekly *Selians'ka rada* (1907–9), and the biweekly **Peremys'kyi vistnyk* (1909–14). The influence of its successful Ukrainian economic institutions, such as the Vira co-operative bank (est 1894), the Narodnyi Dim credit union (est 1906), the Ruthenian Savings Bank, and the Burghers' Bank, was felt far beyond the town. The noted community leaders of the period were Bishops H. Yakhymovych, T. Poliansky, I. Stupnytsky, Yu. Pelesh, and K. Chekhovych, the lawyers T. Kormosh and V. Zahaikevych, the businessman I. Borys, and the writer H. Tsehlynsky.

During the First World War the city surrendered after the second siege to the Russian army and was recaptured two months later, in June 1915, by Austrian and German forces.

Interwar period. After the dissolution of Austria-Hungary in 1918, Peremyshl became an arena of the Ukrainian-Polish War. It was controlled briefly (3–12 November 1918) by the Ukrainian authorities. In 1919–21 a Polish internment camp for soldiers of the UNR Army and the Ukrainian Galician Army was located nearby, in *Pykulychi. After the war Peremyshl did not grow: from 1921 to 1931 its population increased only from 48,100 to 51,000. The garrison stationed there was a burden rather than an economic advantage. The city's metallurgical and forest industries developed slowly. It remained a Ukrainian religious center: it was the seat of Bishop Y. Kotsylovsky and the home of the revived Greek Catholic Theological Seminary and of the Peremyshl Eparchy Aid Association.

The population of Peremyshl, 1880–1931 (thousands; percentage of total in parentheses)

	1880	1900	1910	1921	1931
Total	22.0	46.3	54.7	48.0	51.0
Greek Catholics	4.7 (21.4)	10.4 (22.5)	12.3 (22.5)	7.5 (15.6)	8.3 (16.3)
Roman Catholics	9.6 (43.6)	21.3 (46.0)	25.5 (46.6)	21.9 (45.6)	25.1 (49.2)
Jews	7.6 (34.5)	14.1 (30.5)	16.1 (29.4)	18.4 (38.3)	17.3 (33.9)
Others	0.1 (0.5)	0.5 (1.1)	0.8 (1.5)	0.2 (0.4)	0.3 (0.6)

The Peremyshl Greek Catholic Theological Seminary

A Basilian monastery was built in the vicinity. A number of new cultural institutions, such as the *Stryvior Museum, and young people's and sporting organizations, such as Berkut (1922) and Sian (1929), were set up. Some new co-operatives and private enterprises were organized. The weeklies **Ukrains'kyi holos* (1919–32) and **Beskyd* (1928–33, later *Ukrains'kyi Beskyd*) appeared.

After 1939. With the Polish military collapse in the summer of 1939, the Sian River became the dividing line between the German-occupied and the Soviet-occupied territories. The city was cut into two parts. Many Ukrainians and Poles fled from the Soviet side of the river to the German side. Of those who stayed behind many were deported or shot by the Bolsheviks. Toward the end of June 1941 the whole city came under German rule.

In 1939, of 54,200 residents in Peremyshl, 8,600 (15.8 percent) were Ukrainians (2,000 of whom spoke only Polish), 27,100 (50 percent) were Poles, and 18,400 (34 percent) were Jews. According to the German census of 1942, of 34,000 city residents, 8,100 (23.9 percent) were Ukrainians, 20,200 (59.5 percent) were Poles, 3,800 (11.2 percent) were Jews, and 1,800 (5.3 percent) were Germans.

Peremyshl was recaptured by Soviet forces on 27 July 1944, and 40 percent of it was destroyed in the process. According to the Polish-Soviet agreement of 1945 Poland retained Peremyshl, and its Ukrainian population was resettled either in the Ukrainian SSR or the newly acquired territories in western Poland. All Ukrainian schools and organizations were dissolved. Bishops Kotsylovsky and H. Lakota, along with a group of Ukrainian priests, were arrested by the Poles and handed over to the Soviets. The Ukrainian cathedral and chapter buildings were confiscated by the state. The residence of the Ukrainian bishop was converted into the People's Museum of the Przemysl Land, and most of the holdings of the Stryvior Museum and the eparchy archives were transferred to it. During the brief political thaw in 1956–60 some Ukrainian cultural activity was permitted. The Ukrainian Social and Cultural Society was formed, parallel Ukrainian-language instruction was introduced in the Polish lyceum, and a Ukrainian boarding school was opened. The last two measures were soon revoked. Peremyshl entered the 1990s with a Ukrainian Orthodox parish. Ukrainian Catholics, however, attend services in a Polish church.

Cut off by the new border from its natural hinterland to the east and south, Peremyshl stagnated for a decade after the war. From 1946 to 1953 its population increased only from 36,800 to 38,000. Then it began to grow, mostly because of industrial investment. It has a well-developed food industry, a building-materials industry, a metallurgical industry, a woodworking industry, and a confectionery industry. Standing at the junction of the main highways and railways, it has been an important center of Polish-Soviet trade.

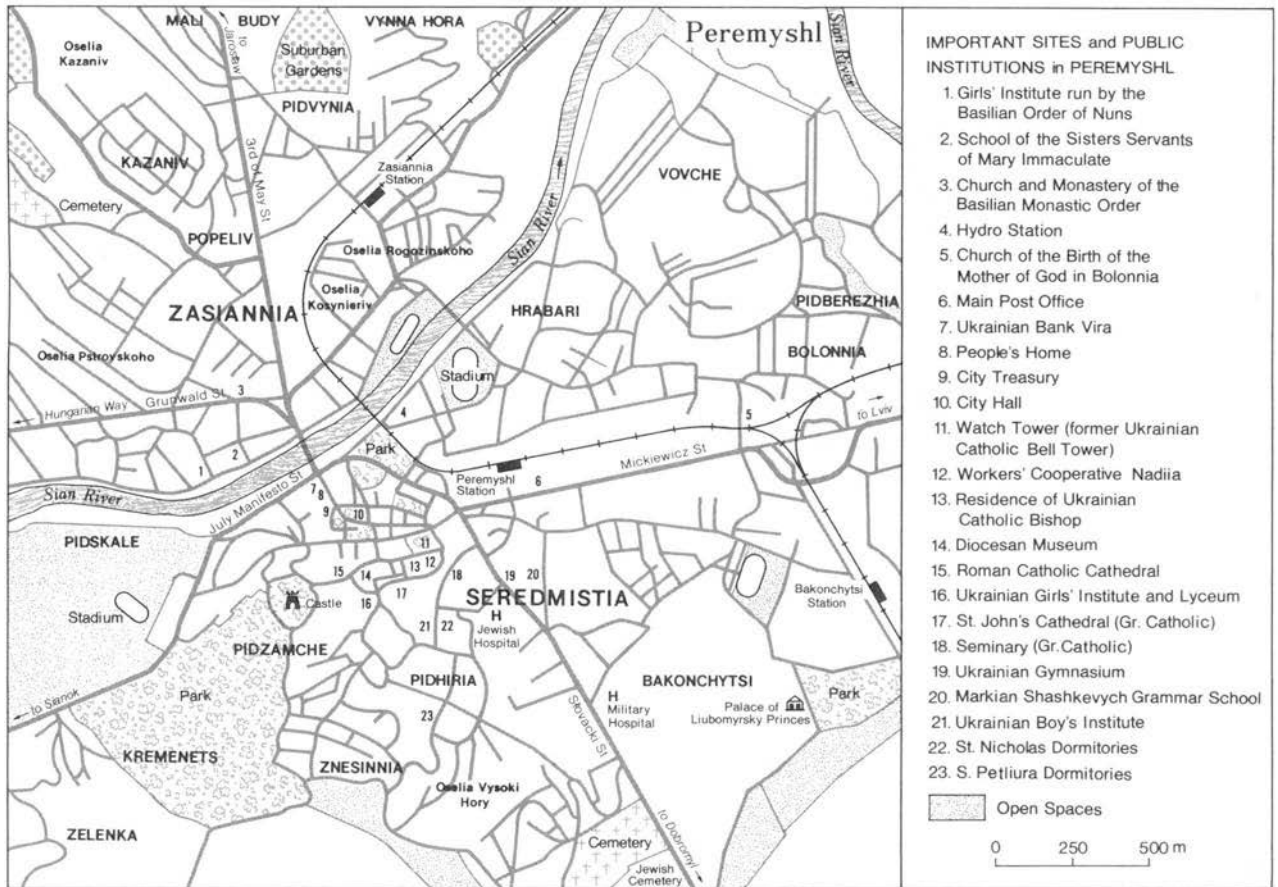

Culture. The city's contribution to Ukrainian culture was largely connected with the Ukrainian Catholic eparchy of Peremyshl. In the early 19th century most of the scholars who worked in Peremyshl, including A. Dobriansky, H. Hynylevych, Yu. Zhelekhivsky, Y. Levytsky, and I. Mohylnytsky, were priests. In more recent times researchers, such as I. Bryk, Ye. Hrytsak, I. Zilynsky, Bishop Lakota, S. Shakh, and V. Shchurat, worked there. Writers such as O. Avdykovych, P. Karmansky, U. Kravchenko, P. Leontovych, D. Lukianovych, V. Masliak, V. Pachovsky, O. Turiansky, Tsehlynsky, and S. Yarychevsky lived and worked in the city. Its regional and diocesan museums contain many monuments of Ukrainian culture.

Peremyshl is known for its artistic traditions. The German painter Heil, who decorated Wawel Castle in Cracow in the 15th century, received an estate in Peremyshl from King Jagiełło. During Bishop A. Brylynsky's tenure (1581–91) an icon painting school was established in nearby Rybotychi (Rybotycze). In recent times the painters T. Kopystynsky, A. Pylykhovsky, O. Skrutok, Olena and Olha Kulchytska, and S. Chekhovych worked in Peremyshl.

Ukrainian music was cultivated in Peremyshl. The Galician-Volhynian Chronicle under the year 1241 mentions the poet-singer Mytusa, who served at the bishop's court. In the 18th century, a musicians' guild was active in the town. In 1829 Rev Y. Levytsky organized a choir at the Greek Catholic Cathedral, which influenced the development of choral music in the 19th century. It was conducted by the Czech composers A. Nanke, V. Sersavý, and L. Sedláč. The Ukrainian composers I. Lavrivsky and M. Verbytsky lived and worked in the city. The Boian society (est 1891) and the local branch (est 1924) of the Lysenko Music Society fostered Ukrainian musical culture.

Layout and appearance. Old Peremyshl – now the city center with the Market Square – lies on the right bank of the Sian River. It has preserved some of its original character. The northern part of the old town served as the Jewish district until 1942. Today the old town is the administrative and commercial district of Peremyshl. In the 19th and early 20th centuries the city spread eastward toward Lviv along the railway line and Mickiewicz Street. It also expanded, though not as much, southeastward along Słowacki Street. Northeast of the center lies Harbari district. Today most of the industrial buildings and factories are located on the eastern outskirts of the city, in the former villages of Bakonchytsi (Bakończyce), Perekopana (Przekopana), and Korovnyky (Krówniki). A large district arose on the left bank of the Sian, known as Zasiannia (Zasanie). In the southwestern section, on the slopes of the Carpathian foothills, lies a large municipal park.

Most of the noted architectural monuments in Peremyshl are churches. The Ukrainian Cathedral of St John the Baptist (a Carmelite church until 1784), which was built in the baroque style (1625–30) and restored in 1876–

PEREMYSHL

84, is now a Polish Catholic church. The Roman Catholic Cathedral, built in 1460–1571 in the Gothic style at the site of St Nicholas's Church (11th–13th century), was reconstructed in 1724–44 in the baroque style. The oldest Roman Catholic churches include the baroque Jesuit Church (1622–37), the late baroque Franciscan Church (built in the gothic style in 1379, rebuilt in 1754–78 with classical elements, renovated in 1848 and 1875), and the Reformers' Church (1627, rebuilt in 1657), which contains remnants of the town wall. The Old Synagogue, built in 1579 in the Renaissance style and renovated in 1910, was active until 1942. Other architectural landmarks include the Old (or Clock) Tower (1775–7), which was to have served as the bell tower of the planned Greek Catholic Cathedral, the remains of the ramparts in Władycze district, several Renaissance and baroque buildings in the Market Square (partly destroyed in 1944 and restored), and the remnants of the 14th-century castle, which was rebuilt in the Renaissance style in 1612–30, torn down by the Austrian authorities, and then partly rebuilt in 1867, 1887, and 1912. The churches of more recent construction include the Church of the Birth of the Theotokos (1880s), painted by O. Skrutko in 1906, the Church of John the Theologian (1901) in Perekopana, and the church of the Basilian monastery (1935) in Zasiannia.

P. Isaiv, V. Kubijovych

Peremyshl eparchy. One of the oldest church administrative districts in Ukraine. The eparchy was established at the latest in the 11th century, and possibly as early as the late 9th or early 10th century. The earliest known bishop was A. Dobrynia Yadreikovych (1218–25). The eparchy initially included all of Galicia and Transcarpathia, until the formation of the separate eparchies of Halych (mid-12th century) and Mukachiv (1491). Occasionally the bishops of Peremyshl have also been known as the bishops of Sambir (from 1422) or Sianik (from the latter half of the 17th century). For this reason the eparchy in the Ukrainian Catholic church is officially known as the 'unified eparchies of Peremyshl, Sambir, and Sianik.'

Prominent bishops in the 15th and 16th centuries included Y. Biretsky (1467–76), A. Onykii (1498–1521), and A. Radylovsky (1549–81). In 1596 Bishop M. *Kopystensky did not support the Church Union of *Berestia and remained Orthodox. This action initiated nearly a century of rivalry in the region, with Orthodox and Catholic bishops competing for control over the eparchy. In this period the more prominent Orthodox hierarchs included I. *Kopynsky and A. *Vynnytsky; Uniate hierarchs included A. *Krupetsky, P. *Khmilevsky (who was never allowed to occupy his see), and I. Malakhovsky. The matter was resolved in 1692, when the Orthodox bishop I. *Vynnytsky adopted Catholicism, and the eparchy joined the Uniate church. The eparchy then remained Catholic until 1946. Bishops during that time included Yu. Vynnytsky, O. Shumliansky, A. Sheptytsky, A. Anhelovych, M. Ryllo, M. Levysky, I. Snihursky, and Y. Kotsylovsky. An eparchial seminary functioned briefly in 1780–3 and regularly from 1845; it published an eparchial organ (called *Vistnyk Peremys'koi eparkhii* [1889–1914] and then *Peremys'ki eparkhial'ni vidomosti* [to 1939]), which featured church news, sermons, a church calendar, and articles on church history, and copublished the quarterly **Dobryi pastyr*.

In 1934 a portion of Peremysl eparchy became part of the separate *Lemko Apostolic Administration. This left the eparchy (in 1936) with 578 parishes, 45 deaneries, 695 priests, 8 Basilian men's (with 48 monks) and 8 women's monasteries, 34 residences of the Sisters Servants of Mary Immaculate and 8 of the Sisters of St Joseph, and approx 1,131,000 faithful. During the Soviet occupation of Western Ukraine (1939–41) the western part of the eparchy fell under German control and was administered by the auxiliary bishop, H. Lakota.

After the Second World War the eparchy again was divided, this time between the Ukrainian SSR and Poland. In the eastern portion the Soviet authorities suppressed the Catholic church, and the sham *Lviv Sobor of 1946 announced the formal incorporation of the eparchy into the Russian Orthodox church. At the same time Bishops Kotsylovsky and Lakota were exiled to Central Asia, where they died in labor camps. Meanwhile, most Ukrainians in the western portion were forcibly resettled by the Polish authorities in the north and west of Poland. The few remaining Ukrainians in the region were forced to switch to either Roman Catholicism or Orthodoxy. After 1957 Ukrainians were again permitted to practice the Eastern rite, and in 1989 the Polish cardinal J. Glemp consecrated I. Martyniak as bishop for Ukrainians, but he was not appointed until January 1991 to the eparchy of Peremysl (see *Ukrainian Catholic church).

In 1983 the Polish Autocephalous Orthodox church revived an Orthodox eparchy of Peremysl–Nowy Sącz, with its see in Sianik, under the Ukrainian bishop A. Dubets. In the late 1980s the Ukrainian Catholic church emerged from the underground in Soviet Ukraine; the territories of the former Peremysl eparchy within present-day Ukraine have been incorporated into the revived Lviv archeparchy.

Peremysl Greek Catholic Theological Seminary (Peremyska hreko-katolytska dukhovna seminariia). The training center for priests in Peremysl eparchy. After a brief existence in 1780–3, the seminary was closed by Joseph II, and theology students forced once again to go to Lviv to study. It was partially reopened in 1845 to accommodate theology students completing their fourth year of study. Only in 1921–39 and 1942–4 was the seminary again fully operational. During this time a fifth year of study was added to the curriculum; the student enrollment grew to over 150, and the staff to 12 (1937); and the students organized religious societies, a co-operative, and an academic society, which in 1937 published a jubilee almanac for theology students in the eparchy. For the last decade of the seminary's existence, I. Kuzych served as rector, and V. Holynsky as assistant rector.

Peremysl State Gymnasium (Peremyska derzhavna himnaziia). The second Ukrainian-language gymnasium to be opened in Galicia, preceded only by the *Academic Gymnasium in Lviv. Founded in 1888 as a Ukrainian-language division of a Polish gymnasium, in 1895 it became an independent classical gymnasium, called the Second Imperial Gymnasium in Peremysl, with a full eight classes. After the First World War, under Polish rule, the gymnasium was renamed the State Gymnasium in Peremysl with the Ruthenian (Ukrainian) Language of Instruction. After the school reforms of 1932 the gymnasium was reorganized into a four-year general education gymnasium and a two-year lyceum with two faculties, of humanities and of natural sciences and mathematics. The gymnasium was closed shortly after the Soviet occupation of Western Ukraine.

The gymnasium's students came mostly from the Ukrainian-Polish borderlands and from the Lemko region. Some students were also from Poland proper, although (in the interwar period) they were usually the children of refugees from Soviet-occupied Ukraine. Throughout its history the institution was one of the largest and most important Ukrainian-language gymnasiums in Galicia. The gymnasium opened with 329 students in 1895; by 1912 its 1,013 students were being taught by 41 teachers. By the First World War the gymnasium had graduated 912 students. In its first 40 years of operation (1896–1936), 2,452 students, including 114 Jews, graduated from the school, almost all of them men.

The gymnasium's directors included H. Tsehlynsky (1888–1910), A. Alyskevych (1910–17), R. Hamchykevych (1919–24), and S. Shakh (1932–9); instructors included prominent scientists, authors, artists, and community and political activists.

Peremysliany [Peremysl'jany]. IV-5. A city (1989 pop 7,600) on the Hnyla Lypa River and a raion center in Lviv oblast. According to archeological evidence the site was settled as early as the 2nd century BC. The town is first mentioned in historical documents in 1473. It was granted

the rights of *Magdeburg law in 1623. After the partition of Poland in 1772, Peremyshliany was acquired by Austria, and in 1918 it belonged briefly to the Western Ukrainian National Republic. In June 1919 the Ukrainian Galician Army defeated the Polish forces in the vicinity. In 1939 Peremyshliany was occupied by Soviet troops and was granted city status. Today its main industries are food processing and furniture-making. Its architectural monuments include a Roman Catholic church from 1645 and the remnants of a 16th- to 17th-century Dominican monastery in the baroque style.

Peremyshlianyyn (The Peremyshlian). An annual church and literary almanac published in Peremyshl in 1850–63. It contained a chronology of holy days, prose, poetry, and historical articles, especially on the history of the Peremyshl region and the Greek Catholic church. It was edited by Rev A. Dobriansky and, from 1857, Ya. Velychko; frequent contributors included I. Ozarkevych, O. Zavadsky, and D. Petrytsky.

Peremys'kyi vistnyk (Peremyshl Herald). A semi-monthly newspaper of the Peremyshl People's Organization, published from January 1909 to 1914. It succeeded the weekly *Selians'ka rada* (1907–8) and published popular articles on politics, economics, and culture. Its chief editors included V. Kitsyla, V. Zahaikevych, and S. Hubchak.

Perepeliuk, Volodymyr [Perepeljuk], b 21 November 1910 in Boryshkivtsi, Kamianets-Podilskyi county, Podilia gubernia. Kobza and bandura player. He learned the art from the bandura trio of the Vinnytsia Philharmonic. In 1941 he joined the new Ukrainian Ethnographic Ensemble of Folk Singers and Kobza Players at the Kiev Philharmonic and composed for it a number of dumas about Semen Palii and about the war with the Poles. In 1944 he became a kobza soloist with the *Verovka State Chorus, with which he traveled his own as well as folk dumas. He described his travels abroad in *Povist' pro narodnyi khor* (The Story of the [Verovka] State Chorus, 1970).

Perepelytsia, Stepan [Perepelycja], b 1884, d 1932. Economist and political leader. A specialist in finance co-operation and a sympathizer of the Ukrainian Party of Socialist Revolutionaries, he served as UNR finance minister in V. Holubovych's cabinet (February–March 1918).

Perepiatykha and Perepiat kurhans. A forest-steppe settlement and burial ground of the 6th century BC near Marianivka, Vasylkiv raion, Kiev oblast. Excavations by M. Ivanyshchyn in 1845 revealed that the mounds of earth covered wooden burial vaults. Artifacts recovered included tulip-shaped pottery (for storing cremated remains), earthenware ladles, jewelry, an iron ax, a bronze mirror, and 24 gold plates decorated with griffin motifs. M. Maksymovych participated in the excavations and T. Shevchenko worked as a draftsman on the project.

Peresada-Sukhodolsky, Mykhailo [Peresada-Suxodol's'kyj, Myxajlo], b 1883 in the Kharkiv region, d 1938 in Galicia. Senior staff officer. A general staff officer in the Russian army, in 1917 he joined the UNR Army as a colonel. During 1918–20 he served as chief of staff of the Fourth Reserve Brigade and the Third Iron Rifle Division,

Gen Mykhailo Peresada-Sukhodolsky

and chief of the quartermaster department of the General Staff. In 1921 he was a deputy chief of staff of the Ukrainian forces in the Second Winter Campaign, and was promoted to brigadier general.

A silver plate, gold sword handle, and gold buckle from the Pereshchepyna hoard

Pereshchepyna hoard. One of the richest finds in Ukraine, discovered near Mala Pereshchepyna, now in Novi Sanzhary raion, Poltava oblast, in 1912. Nearly 25 kg of gold and 50 kg of silver artifacts – including 5th- to 7th-century Byzantine and Iranian art objects, gold and silver dishes, 7th-century Byzantine coins, jewelry, a plate bearing the emblem of the bishop of the Greek colony Tomis, now Constanța in Rumania, and a Sasanian plate with a portrait of Shapur II – were found. Scholars believe the hoard to be booty from raids into Byzantine territory. The collection is now housed at the Hermitage in St Petersburg.

Pereshchepyne [Pereščepyne]. IV-16. A town smt (1986 pop 10,500) on the Orel River in Novomoskovske raion, Dnipropetrovske oblast. By 1764 it was an important frontier settlement in Orel palanka of the territory held by the Zaporozhian Sich. Today the Dnieper-Donbas Canal runs through the town. The oil and natural gas discovered at

Pereshchypyne began to be extracted in the mid-1960s. A kurhan nearby dates back to the Bronze Age.

Peresichen [Peresičēn'] (aka Peresichyn, Peresichna). The main town of the Slavic tribe of the *Ulychians. It was first mentioned in the Novgorod First Chronicle, in connection with the attempt of the Kievan prince Oleh to conquer the Ulychians. Ca 940, after a three-year siege, Peresichen was captured by Prince Ihor's military commander, Sveneld, and was annexed by Kievan Rus'. The exact location of the town has not been determined. Most scholars place it between the Dniester and the Prut rivers, and some point to the present-day town of Peresecina, in Orhei raion, Moldova.

Peresichna [Peresična]. III-16. A town smt (1986 pop 8,400) on the Udy River in Derkach raion, Kharkiv oblast. The town was founded in 1650. In 1926 a health resort was built around local mineral springs. Poultry farming and feed production contribute to the town's economy. A Scythian settlement of the 5th to 3rd century BC and a burial ground of the Cherniakhiv culture (2nd–4th century AD) have been discovered nearby.

Peresopnytsia [Peresopnycja]. III-7. A medieval Volhynian town on the Stubla River. Now a village in Rivne raion, Peresopnytsia was first mentioned in a Rus' chronicle under the year 1147, as a town in Turiv-Pynske principality belonging to Prince Iziaslav Mstyslavych. In the 12th and 13th centuries it and Dorohobuzh were the chief towns in the so-called Pohoryna domain along the Horyn River. Prince Yurii Dolgorukii captured the Pohoryna in 1149 and installed his sons, Hlib and Andrii, in Dorohobuzh and Peresopnytsia. Prince Yaroslav Mstyslavych of Lutske gained control of the Pohoryna in 1171 and gave part of it, along with Peresopnytsia, to his son, Mstyslav the Mute. Mstyslav's son, Ivan, ceded the town to Danylo Romanovych of Galicia. From 1227 it belonged to the Lutske appanage principality, and its previous significance was lost. Control over it was consolidated by Danylo's brother, Vasylo Romanovych. In the early 14th century the town came under Lithuanian rule. From the late 15th century to 1773 it belonged to the Czartoryski princely family. The town had the Monastery of the Mother of God (built by Mstyslav the Mute), where the translation of the *Peresopnytsia Gospel was completed in 1561.

Archeological excavations have revealed that Peresopnytsia's fortified inner town and castle were built in the Stubla valley amid marshes in the 10th century. A nearby cemetery across the river dates from the 11th and 12th centuries. Twenty medieval earthen dwellings have been excavated near the village. On the village outskirts 170 medieval kurhans, a Neolithic flint-fashioning workshop, a late Neolithic Nordic settlement, and a Bronze Age burial site have been uncovered. K. Antonovych-Melnyk (1898) and O. Tsynkalovsky (1936–8) conducted archeological excavations in the area.

A. Zhukovsky

Peresopnytsia Gospel (Peresopnytske yevanheliie). An ornamented manuscript of the four books of the New Testament translated ca 1556–61, partly in the Monastery of the Holy Trinity in Dvirts, Lviv region, and partly in the Monastery of the Mother of God in Peresopnytsia, Vol-

The Peresopnytsia Gospel

hynia. The scribe was probably Mykhailo Vasylovych from Sianik, and the translator was Hryhorii, the archimandrite of the Peresopnytsia monastery. The gospel was discovered in 1837 by O. *Bodiansky and is preserved at the ANU Central Scientific Library in Kiev. It is an interesting example of a vernacular Ukrainian translation of the Scriptures from the Polish and Czech (the names of chapters are translated from the Czech) using the Bulgarian-Serbian orthography. Its language has western Boiko and, to a lesser extent, southern Volhynian dialectal traits, and many lexical Church Slavonicisms, Polishisms, and lexical synonyms from various dialects (eg, *kolodjaz'/studnja/krynytsja* 'well', *žytnycja/klunja/stodola* 'barn'). P. Zhytetsky studied its language and published from it the Gospel according to St Luke (*Trudy III arkheologicheskogo s"ezda*, vol 2 [1878]). Its paleographic and Renaissance artistic features were analyzed by O. Hruzynsky (1911, 1912) and H. Pavlutsky (*Iskusstvo*, 1911, no. 2).

Perestoroha (A Warning). An anonymously written anti-Uniate polemical tract. It was written in 1605 or 1606 in Lviv, and contained a cultural and educational program that influenced M. Smotrytsky. Authorship has been attributed to the Lviv priest A. Voznesensky (by D. Zubrytsky, A. Popov, and P. Yaremenko), to Yu. *Rohatynets (by I. Franko, K. Studynsky, M. Vasylenko, and H. Koliada), and to Y. *Boretsky (by M. Vozniak, O. Biletsky, and P. Zahaiko). The tract was first published in 1851 in *Akty, otnosiashchiesia k istorii Zapadnoi Rossii* (Documents on the History of Western Russia, vol 4) from a manuscript found by Zubrytsky in the library of the Stauropogion Institute in Lviv. It was republished by Vozniak in 1954. P. Yaremenko's book about it appeared in 1963. The tract is of interest to historians and literary scholars.

Peretiatkovych, Heorhii [Peretjatkovyč, Heorhij], b 8 December 1840 in Odessa, d 20 August 1908 in Odessa. Historian. After graduating from Moscow University (1877) he lectured at New Russia University in Odessa, where he became a professor in 1886. He is the author of monographs on the colonization of the Volga region in the 15th and 16th centuries (1877) and 17th and early 18th centuries (1882) and of a study of the Little Russians in Orenburg krai at the beginning of its colonization (*Trudy VI arkheologicheskogo s"ezda*, vol 2 [1888]).

Perets' (Pepper). An illustrated humor magazine published in Kiev in 1941 (nine issues) and semimonthly since 1944 as the successor to **Chervonyi perets'*. During the Second World War it was published in Kharkiv and Moscow. In 1944–50 a separate edition (monthly in 1946–50, with a pressrun of 20,000 copies) was published for newly annexed Western Ukraine. *Perets'* has been noted for its attacks on capitalism, religion, and 'Western imperialism'; its anti-Zionism; and its criticism of Ukrainian 'bourgeois nationalism' and the Ukrainian émigré community. It has also satirized Soviet social and economic ills and the Soviet bureaucracy, but without overstepping the Party line. The editors have been F. Makivchuk (1946–86), O. Chornohuz (1986), and Yu. Prokopenko (1987–). *Perets'* was the most popular magazine of its day in Soviet Ukraine. In 1984 it had a pressrun of 2.3 million copies.

Volodymyr Peretts

Peretts, Volodymyr [Peretc], b 31 January 1870 in St Petersburg, d 24 September 1935 in Saratov, Russia. Philologist and historian of Ukrainian and Russian literature; member of the Shevchenko Scientific Society (NTSh) from 1914, honorary member of the Russian Bibliographical Society from 1915, and full member of the VUAN from 1919. After completing his studies at St Petersburg University and lecturing there (1896–1903) he moved to Kiev, and until 1914 he was a professor at Kiev University, head of the philological section of the Ukrainian Scientific Society in Kiev, and editor of its publication, *Zapysky Ukraïns'koho naukovoï tovarystva v Kyievi*. Peretts was the founder and director of the Seminar of Russian Philology, in 1907–14 at Kiev University and from 1914 at St Petersburg University. The seminar produced many eminent scholars of early and modern Ukrainian and Russian literatures: V. Adrianova-Peretts (Peretts's wife), O. Bahrii, S. Balukhaty, L. Biletsky, S. Bohuslavsky, O. Doroshkevych, M. Draikhmara, P. Fylypovych, M. Gudzii, S. Haievsky, O. Hruzynsky, B. Yakubsky, S. and V. Maslov, O. Nazarevsky, I. Ohienko, V. Otrokovsky, P. Popov, S. Shcheglova, S. Shevchenko, and I. Eremin. In Kiev Peretts held the chair and headed the commission of Old Ukrainian literature of the historical-philological division of the VUAN. The *Leningrad Society of Researchers of Ukrainian History, Literature, and Language was active under his leadership between 1921 and 1933. His opposition to Party intervention in scholarship as well as his defense of his thesis on the Ukrainian character of the early literature and traditions of princely Kiev resulted in repressions. Eventually he was exiled to Saratov, where he died.

In his scholarly research Peretts adhered to the princi-

ples of the philological school, which concentrated on the form and structure of early literature and insisted upon a solid knowledge and interpretation of the texts. He published over 300 scholarly works; over 100 of them were published in Kiev in Ukrainian. Worthy of note are his publications and research on early Ukrainian literature in verse, early Ukrainian drama, and the early Ukrainian tale: *Kukol'nyi teatr na Rusi* (Puppet Theater in Rus', 1895), *Materialy k istorii apokryfa i legendy* (Sources for the History of Apocrypha and Legends, 2 vols, 1899, 1901), *Malorussskie vershi i pesni v zapisiakh XVI–XVIII vv.* (Little Russian Poems and Songs in Records of the 16th to 18th Centuries, 1899), *Ocherki starinnoi malorussoï poezii* (Outlines of Ancient Little Russian Poetry, 1903), *Iz istorii starinnoi russoï povesti* (From the History of the Ancient Rus' Narrative, 1907), *Novye dannye dlia istorii starinnoi ukrainskoï liriki* (New Data toward the History of Ancient Ukrainian Lyric Poetry, 1907), *Virshi iieromonakha Klymentiia Zinov'ieva syna* (The Poems of the Priest-Monk Klymentii, Zynovii's Son, 1912), and *Issledovaniia i materialy po istorii starinnoi ukrainskoï literatury XVI–XVIII vekov* (Research and Sources on the History of Ancient Ukrainian Literature in the 16th to 18th Centuries, 4 vols, 1926–9, 1962). Of special note are Peretts's synthetic works, *Iz lektsii po istorii drevnerusskoï literatury* (From Lectures on the History of the Literature of Ancient Rus', 1912–13) and the monograph *Slovo o polku Ihorevim: Pam'iatka feodal'noi Ukraïny-Rusy XII viku* (The Tale of Ihor's Campaign: A Monument of Feudal Rus'-Ukraine of the 12th Century, 1926). In his scholarly studies, publications, and lectures Peretts viewed the Princely era in Ukrainian literature and the period of the 14th to 18th centuries as an organic whole. Peretts was also the author of studies of modern Ukrainian literature, bibliography, paleography, textology, and archeology.

B. Kravtsiv

Perevalske [Pereval's'ke]. V19, DB III-5. A city (1989 pop 33,500) and raion center in Luhanske oblast. It arose at the end of the 19th century as the Seleznivka mining settlement. In 1964 several mining settlements were amalgamated into one city, which was named Perevalske. The city's main industry is coal mining.

Perevalsky, Vasyl [Pereval's'kyj, Vasyl'], b 13 June 1938 in Bubnivska Slobidka, Zolotonosha raion, Poltava oblast. Graphic artist. He studied under V. Kasiiian at the Kiev State Art Institute (to 1965) and under M. Derehus in the workshops of the USSR Academy of Arts (1965–7). He has engraved many bookplates and illustrations for books, such as *Ukraïns'ki narodni pisni pro kokhannia* (Ukrainian Folk Songs about Love, 1971), *Ukraïns'ki narodni pisni v zapysakh V. Hnatiuka* (Ukrainian Folk Songs Transcribed by V. Hnatiuk, 1971), *Vesnianky* (1984), and editions of works by Lesia Ukrainka, I. Franko, P. Hrabovskyy, I. Netchui-Levytsky, M. Rylsky, P. Tychna, V. Sosiura, O. Honchar, B. Oliinyk, P. Zahrebelny, V. Zemliak, and other writers. His larger wood engravings include *Two Poplars in the Field* (1967) and *What Use Are My Black Brows?* (1968). He also designed a large stained-glass window at Kiev University with V. Zadorozhny and F. Hlushchuk depicting T. Shevchenko. His graphic works continue the 'national' traditions of H. Narbut and V. Krychevsky.

Vasyl Perevalsky: a woodcut illustration for a collection of Ukrainian folk songs about love (1971)

Pereverziv, Dmytro, b 1868, d 1928. UNR Army colonel. A regular officer in the Russian Army, in 1917 he commanded the Fifth Grenadier Regiment in Kiev. In December 1917, as an officer of the UNR, he distinguished himself defending Chernihiv against Bolshevik forces. During 1918–20 he served in the Zaporozhian Corps as chief logistics officer in the First Zaporozhian Rifle Division and as a brigade commander.

Perevod River. A right-bank tributary of the Udai River. It is 65 km long and drains a basin area of 1,260 sq km. It flows through Kiev, Chernihiv, and Poltava oblasts and is regulated by a series of dams.

Perevolochna [Perevoločna]. A village on the left bank of the Dnieper River near the Vorskla River in Kobeliaky raion, Poltava oblast. From the 1660s to 1764 it was a company center of Poltava regiment, which defended the southern borders of the Hetman state against the Crimean Tatars. After the Battle of Poltava was concluded there on 30 June 1709, Hetman I. Mazepa crossed the Dnieper River and fled with his Swedish allies to Turkish territory. In 1802 Perevolochna became a part of Kobeliaky county in Poltava gubernia. When the Dniprodzerzhynske Hydroelectric Station was built in 1962, Perevolochna was inundated, and its residents were moved to the new village of Svitlohirske.

Perevuznyk, Yurii, b 1903 in Serednie, near Uzhhorod, d 17 September 1966 in Prague. Transcarpathian civic and

political leader. After graduating in law from Charles University in Prague, he practiced law in Mukachiv. A supporter of Ukrainian culture, he organized Prosvita reading rooms. He became active in politics and set up the Ukrainian section of the Czechoslovak Agrarian party. In 1939 he was appointed state secretary and minister of internal affairs for the newly established Carpatho-Ukraine. Having been arrested by the Hungarians, he was forced to emigrate to Prague, where he served as a judge. In 1945 he was arrested and imprisoned by the Soviets, but later he returned to Prague.

Aka Pereyma: *Stag* (watercolor, 1989)

Pereyma, Aka [Perejma] (née Klym), b 30 September 1927 in Siedlce, Poland. Ukrainian sculptor and painter. A postwar refugee in the United States since 1949, she completed her studies at the Chicago (1963–4) and the Dayton (1966) institutes of art. A versatile artist, she has won recognition for her metal and wood sculptures, ceramics, oils, watercolors, Easter eggs, and ink drawings. She has created abstract geometric sculptures (eg, *Hetman* and *Slave*) and abstract 'birds' (eg, *Omega*). The forms and ornamentation of her ceramic creations are influenced strongly by Ukrainian folk art. Much of her painting is inspired by folk motifs (eg, the watercolor series 'Songs'), and the egg form frequently plays a prominent role (eg, *Windmill*). Solo shows of her works have been held in various cities of Ohio, as well as in Chicago, New York, Buffalo, Toronto, Kiev, and Lviv. A 25-year retrospective exhibition was held in Oxford, Ohio, in 1986.

Perezva. An archaic wedding ritual by which the relatives of a bridegroom, often accompanied by the bridegroom, informed the bride's parents the day after the wedding night (*komora*) of her virginity. After carrying a blood-stained shirt through the village, they greeted the bride's relatives with ritual songs and red liquor with viburnum berries, and invite (*perezvyvaty*) them over to the groom's house to continue the celebrations. The parents were thanked in song for bringing up their daughter, were seated in places of honor, and were served the best food and drink. The bride's hair was arranged ceremonially into the form reserved for married women. The ritual was accompanied with erotic songs and tests of the bride's domestic skills. If a bride could not provide evidence of virginity, both she and her parents were ridiculed. In some

locales the ritual was known as *propii*, from *propyty* 'to drink away' (the bride's virginity). The oldest description of this ritual appears in G. Le Vasseur de Beauplan's *Description des contrées du Royaume de Pologne* (1650). (See also *Wedding.)

Perfecy, George [Perfec'kyj, Jurij], b 27 May 1940 in Piotrów, Poland. Slavic linguist; member of the Shevchenko Scientific Society. A graduate of Columbia University (PH D, 1970), he has taught Russian since 1965 at La Salle University in Philadelphia. He is the author of an annotated translation (1973) of the Galician-Volhynian Chronicle, of articles on the chronicle and on linguistic Russification and the status of the Ukrainian language in Soviet Ukraine, and of reviews of Soviet Ukrainian dictionaries.

Leonid Perfetsky: *Defense of the Kruty Station in 1918* (watercolor)

Perfetsky, Leonid [Perfec'kyj] (Perfecy), b 23 February 1901 in Ladyzhyntsi, Galicia, d 25 October 1977 in Montreal. Painter. He studied at the Novakivsky Art School in Lviv, the Cracow Academy of Fine Arts, and A. Lhote's school in Paris. From 1922 on he took part in group exhibitions in Lviv and Paris. Perfetsky specialized in historical battle scenes, such as *The Cossacks at Trabizond*, *Cossack Surprise Attack*, *Black Zaporozhians*, *Attack*, and *Battery in Danger*, and depictions of the 1918–21 Ukrainian-Soviet and Ukrainian-Polish wars (eg, *Kruty*). In Paris he did portraits of prominent Frenchmen and began painting in a constructivist style. A postwar émigré in Canada from 1950, he painted murals in the Holy Ghost Ukrainian Catholic Church, St Elezar's Catholic Church, and St Joseph's Oratory in Montreal. A book about Perfetsky (ed S. Hordynsky) was published in New York City in 1990.

Perfetsky, Roman [Perfec'kyj], b 1880, d 1944. Lawyer and political leader in Galicia. While practicing law in Bibrka he was active in various Ukrainian organizations in the region, and in 1913 he was elected to the Galician Diet. He represented the Union for the Liberation of Ukraine in the POW camp at Wetzlar. In 1918–19 he was a member of the Ukrainian National Rada and deputy state secretary of internal affairs of the Western Ukrainian National Republic (ZUNR). In 1920 he headed a delegation of the Ukrainian National Rada in Lviv and then joined the ZUNR government-in-exile and became president of the Western Ukrainian League of Nations Society (1921–4). After returning

Roman Perfetsky

Yevhen Perfetsky

to Western Ukraine he became active in politics as a member of the Ukrainian National Democratic Alliance and in 1935 was elected to the Polish Sejm. In 1939 he fled from the Soviets to the Zamość region in the Generalgouvernement, where he worked as a notary public.

Perfetsky, Yevhen [Perfec'kyj, Jevhen] (Perfecy, Jevgenij), b 11 April 1888 in Nosiv, Kostiantyniv county, Siedlce gubernia, d 18 August 1947 in Bardejov, Slovakia. Historian; cousin of R. *Perfetsky. As a young man he took part in the Ukrainian national revival in Podlachia and founded a branch of the Prosvita society in Kobyliany, Bielsk Podlaski county. He graduated from St Petersburg University (1912). In 1919–21 he was a privatdocent at Kiev University. An émigré from August 1921, from 1922 he taught Eastern European (especially Transcarpathian) history at Bratislava University, where he became a professor in 1935 and a dean in 1946–7, and continued his archival and ethnographic research in Transcarpathia.

Perfetsky's works written in Russian include a survey of 'Ugro-Russian' (Transcarpathian) historiography (1914), a book on the Rus' chronicle compilations and their interrelationship (1922), and a long article on the 17th- and 18th-century religious movement in Transcarpathia (1915). He also wrote articles in Ukrainian about Transcarpathia in the 17th century (1917), Nestor the Chronicler (1918), Y. Bazylovych and his *Brevis Notitia ...* (1918, 1919), Bishop V. Tarasevych of Mukachiv (1923), the Novgorod Chronicle and its relation to the 12th-century Ukrainian chronicles (1924), and the Peremyshl codex as part of J. Długosz's chronicle (1927, 1928, 1931). In Czech he wrote on Prince Fedir Koriatovych (1922), Transcarpathian and Galician tales and legends about King Mathias Corvinus (1926), Transcarpathian church history, and Russian Slavophilism. Also published in Czech were his pioneering monograph on socioeconomic conditions in 13th- to 15th-century Transcarpathia (1924) and a book on Długosz's history of Poland and the Rus' chronicles (1932).

A. Zhukovsky

Perfume and cosmetics industry. A branch of industry that uses natural and artificial oils, fragrances, animal products, and alcohol to manufacture beauty aids and hygienic preparations, such as makeup, perfume, bath oil, powder, skin cream, toothpaste, and shaving cream. Perfumes and cosmetics began to be imported into the Russian Empire and Ukraine in the 19th century, mostly from

France. The modern industry emerged in Ukraine only in the early 20th century, when the first cosmetic factories were built in Kharkiv and Mykolaiv. Among the former Soviet republics Ukraine is second only to Russia in the manufacture of cosmetics. It accounted for 50 percent of the former USSR essence of rose output, 90 percent of its mint oil output, and 70 percent of its lavender oil output. The main plants are the Mykolaiv Perfume and Cosmetics Manufacturing Complex, the Kharkiv and Lviv perfume and cosmetics factories, and the Symferopil and Zolotonosha ethereal oil plants. Another 15 plants produce ethereal oils; the largest of them are in Bakhchesarai and Zuiia, in the Crimea, and in Pryluka. Problems of the industry are studied at the former All-Union Scientific Research Institute of Ethereal Oil Cultures in Symferopil and at the Ukrainian Scientific Research Institute of the Oils and Fats Industry in Kharkiv.

Perilla (Ukrainian: *Peryla vasylykovydna*). An Asiatic mint plant of the family Labiatae. Perilla was introduced in Ukraine in the 1930s. It is cultivated for its oil in the Kuban and as an ornamental herbaceous plant in the forest-steppe region. Perilla seeds contain 35–52 percent of a light yellow oil that is used in the production of varnishes, paints, printing ink, and water-repellent fabrics. Perilla oil dries more quickly than linseed oil and forms harder films; it also has bactericidal properties.

Periodicals. See Press.

Periwinkle (*Vinca*; Ukrainian: *barvinok*). A trailing or woody evergreen herb of the dogbane family Apocynaceae, with shiny, dark green leaves and serrated lavender-blue or white flowers. Of its seven species, native to Europe and the Near and Far East, three grow in Ukraine – grassy periwinkle (*V. herbacea*; Ukrainian: *barvinok travianystyi*), in meadows and shrubbery of the forest-steppe and steppe zones and especially in Crimean forests, widely used as a cut flower; myrtle (*V. minor*) in Right-Bank regions, a long-standing favorite decorative creeper among Ukrainians that also plays an important role in folklore and Easter and *wedding rituals; and a cultivated garden species (*V. major*) that also grows wild in the Crimea. Periwinkle is a medicinal plant; in folk medicine it was believed to increase potency.

Perlo mnohotsinnoie (A Priceless Pearl). An important 17th-century literary monument by K. *Stavrovetsky-Tranquillon. It was published in Chernihiv in 1646 and again in Mohyliv in 1699. *Perlo ...* is a collection of edifying prose and 21 didactic religious poems written in the bookish language of the period but with many elements of folk poetics, particularly of the dumas. Much of it was reprinted in a 1978 anthology of late 16th- and early 17th-century Ukrainian poetry compiled by V. Kolosova and V. Krekoten.

Perlyk, Ivan, b 1880? d January 1919 in the Poltava region. Lieutenant colonel of the UNR Army. In March 1918 he organized the *Graycoats, which he commanded until August. During the anti-Hetman revolt he organized an insurgent unit that operated in the Poltava area. He was killed in battle with Bolshevik forces.

Permanent Representation of the Council of Ministers of the Ukrainian SSR at the Council of Ministers of the USSR (Postiine predstavnytstvo Rady Ministriv URSR pry Radi Ministriv SRSR). An institution created in 1924 to maintain direct contact between the governments of the Ukrainian SSR and the USSR. It was headed by a permanent representative appointed by the Council of Ministers of the Ukrainian SSR. Its legal status was defined in the decrees of the All-Ukrainian Central Executive Committee and Ukraine's Council of People's Commissars issued on 2 January 1924, 2 December 1925, and 11 January 1926 and in the special decrees of the USSR Council of People's Commissars issued on 4 February 1931 and 20 November 1940. By its decree of 29 December 1976 the Council of Ministers of the Ukrainian SSR empowered the Permanent Representation to establish direct contacts not only with the USSR Council of Ministers but also with individual ministries and committees and other federal institutions. The Permanent Representation participated in the sessions of the USSR Council of Ministers and advised it on all matters pertaining to the Ukrainian SSR, particularly when new laws, economic plans, and the budget were discussed. It also carried out special assignments of the Ukrainian government, delivered questions and interpellations from its government to the USSR government, and served as a channel of information. Prior to the dissolution of the USSR, proposals had been made to extend its role to international trade, interrepublic liaison, and cultural relations with the large Ukrainian colony in Moscow. The Permanent Representation had a staff of 50 in 1991. Its heads included M. Pidhirny, Yu. Dubin, and M. Pichuzhkin.

P. Potichnyj

Pernach (aka *pirnach*, *shestoper*). A mace used by Cossacks as a symbol of authority. Like the **bulava*, the *pernach* was of Eastern origin. It consisted of a silver or gilded shaft and a pear-shaped gold-plated head divided into six or eight sharp-edged flanges (*pera*). Eventually the *pernach* became the special symbol of the colonel's office.

Perogies. See *Varenyky* and Foods, traditional.

Perohovsky, Vasyl [Perohovs'kyj, Vasyl'], b 1824, d 1881. Historian and ethnographer. A county court judge in Volhynia, he contributed articles on the local ethnography and history to *Volynskie gubernskie vedomosti* and *Kievskaja starina*.

Perovsky. An aristocratic family consisting of the illegitimate offspring (five sons and four daughters) of Oleksii, the son of Hetman K. *Rozumovsky, and their descendants. The surname was taken from Perovo village, in the Moscow region. The oldest son, Nikolai (d 1858), was governor of the Crimea and city governor of Teodosiia during the reign of Alexander I. Aleksei (1787–1836) was a botanist, member of the Imperial Academy of Sciences (from 1829), and successful author of novels (pseud: Antonii Pogorelsky). He was also a curator of Kharkiv University. Lev (1792–1856) was a senator and high official in St Petersburg. In 1841 he was appointed minister for internal affairs, and in 1852, minister of appanages and head of the cabinet. Vasilii (1794–1857) was a cavalry general. After being wounded in the Russo-Turkish War (1828) he be-

came military governor in Orenburg (1833–42, 1851–6). Boris (1814–81) was a cavalry general. Aleksei's son, Lev (d 1890), was governor of St Petersburg in 1865–6 and then an official in the Ministry of Internal Affairs. His daughter, Sofiia (1853–81), renounced her family and joined the revolutionary movement in the 1870s. She married A. *Zheliabov and was involved in several attempts on the emperor's life. The first woman in Russia to be put to death for a political crime she, was executed for her role in the assassination of Alexander II.

Pavel Pershin

Pershin, Pavel [Peršin], b 4 January 1891 in Bubinskoe, Perm gubernia, Russia, d 11 November 1970 in Kiev. Economist and agronomist; full member of the AN URSR (now ANU) from 1948. A graduate of St Petersburg University (1916), in the interwar period he worked for several government institutions and taught economics and statistics at higher schools in Moscow, Voronezh, and Kharkiv. After the war he was director of the ANU Institute of Economics (1948–50) and head of its agrarian department (1951–7). He led the academy's expeditions for improving the performance of collective farms in the southern steppe (1950–4) and headed the Council for the Study of the Productive Resources of the Ukrainian SSR (1957–64). Pershin wrote or coauthored many articles and monographs on the history and the economics of agriculture in Russia, including *Narysy ahrarnoi revoliutsii v Rosii* (Outlines of the Agrarian Revolution in Russia, 1959), *Ahrarni peretvorennia Velykoi Zhovtnevoi sotsialistychnoi revoliutsii* (Agrarian Transformations of the Great October Socialist Revolution, 1962), and *Narysy ahrarnykh problem budivnytstva sotsializmu* (Outlines of Agrarian Problems in the Construction of Socialism, 1973). A biography and bibliography of his works appeared in 1971 in Kiev.

Pershomaiske. See Pervomaiske (Mykolaiv oblast).

Pershotravenske [Peršotravens'ke]. v-17. A city (1989 pop 26,200) in Petropavlivka raion, Dnipropetrovske oblast, subordinated to the Pavlohrad city council. It was founded in 1954 as the coal-mining town of Shakhtarske and was renamed in 1960. In 1966 it received city status. Its economy depends on four coal mines and a metal-working plant.

Pershotravneve [Peršotravneve]. vi-18. A town smt (1986 pop 7,200) and raion center in Donetsk oblast. The

town developed out of a settlement called Manhush, founded by Greek settlers from the Crimea in 1779. It was renamed in 1946 and granted smt status in 1969. Its economy rests on agriculture.

Pershyy vinok (title page)

Pershyy vinok (The First Wreath). A pioneering miscellany by and about women. It was collected, subsidized, and published in Lviv in 1887 by N. Kobrynska and O. Pchilka with the editorial help of I. Franko. Its contents consisted of an introduction and feminist articles by N. Kobrynska; stories and poetry by H. Barvinok, O. Bazhanska-Ozarkevych, Dniprova Chaika, O. Pohoretska-Hrytsai, Kobrynska, U. Kravchenko, O. Huzar-Levytska, S. Navrotska-Paliiv, S. Okunevska-Moraczewska, A. Pavlyk, Pchilka, K. Popovych, M. Roshkevych, L. Starytska-Cherniakhivska, and Lesia Ukrainka; and ethnographic articles by K. Pavlyk-Dovbenchuk, Okunevska-Moraczewska, and O. Franko. The miscellany was reprinted in New York in 1984 with L. Onyshkevych's introduction and notes to commemorate the centenary of the Ukrainian women's movement.

Perun. One of the principal deities in eastern and northern Slavic mythology. In pre-Christian Kievan Rus' this was the chief god – the god of thunder, lightning, and rain, the ruler of the heavens, and, later, the god of war. According to the Primary Chronicle, when the pagans of Rus' entered into an agreement with Byzantium, they swore an oath to Perun. In 980 a wooden statue of Perun with a silver head and golden moustache stood on Perun Hill in Kiev. Perun's feast, celebrated with sacrifices, took place in July. On a clay calendar from the Cherniakhiv culture in the Kiev region Perun's Day (20 July OS) is marked with the sign of thunder – a six-spoked wheel. Human sacrifices to Perun (one boy and girl) were chosen by lot. After adopting Christianity Prince Volodymyr the Great ordered Perun's statue to be cast into the Dnieper and on its site built St Basil's Church. The cult of Perun, however, survived among the common people for many centuries. In Western Ukraine traces of the cult could be detected in the 20th century. The Lemkos still consider the expression 'May Perun strike you dead' as the most terrible curse. The Christian church replaced the cult of Perun with the cult of the prophet Elijah (feast day: 2 September, or 20 August OS), to whom all of Perun's qualities were transferred.

Pervisne hromadianstvo ta ioho perezhytky na Ukraini (Primitive Society and Its Vestiges in Ukraine). A scholarly serial published in Kiev in 1926–9 (8 vols) by the VUAN Cultural-Historical Commission and again in 1928–9 by the Scientific Research Department of the History of Ukraine. It was edited by K. *Hrushevska, and contained anthropological and sociological studies on prehistoric society in Ukraine and on Ukrainian folk culture. The contributors included Hrushevska, M. Hrushevsky, F. Kolessa, K. Koperzhynsky, V. Kozlovska, K. Kvitka, F. Savchenko, L. Shevchenko, K. Shtepa, A. Stepovych, M. Vozniak, and D. Zelenin.

Pervomaiske [Pervomajs'ke]. VIII-14. A town smt (1986 pop 7,600) and raion center in Crimea oblast. The town, which is first mentioned in 1798, was called Dzhurchi until 1944. It has a food industry.

Pervomaiske or **Pervomaisk** [Pervomajs'ke or Pervomajs'k]. V-19, DB II-5. A city (1989 pop 49,800) on the Luhanka River in Luhanske oblast. From 1765 the settlement was known as Petromarivka; in 1920 it was renamed. A mine was opened there in 1872. The city is now a major coal-mining center, with eight coal mines and two enrichment plants. It also produces electric machines, building materials, reinforced-concrete goods, and footwear.

Pervomaiske or **Pervomaisk** [Pervomajs'ke or Pervomajs'k]. V-11. A city (1989 pop 82,000) at the confluence of the Syniukha and the Boh rivers and a raion center in Mykolaiv oblast. It was formed in 1919 through the amalgamation of three separate settlements, Olviopil, Bohopil, and Holta, each of which was founded by a different state. In 1420 the Lithuanian grand duke Vytautas constructed a bridge ~for merchants and traders near the present site of the city. Later a Zaporozhian fortress called Orlyka was built on the left bank of the Syniukha River, and by 1774 a village called Orlyk had arisen there. Eventually the settlement was renamed Yekaterynyshanets, and in 1782, Olviopil. Nearby, on the right bank of the Boh River, Cossacks and Ukrainian peasants founded Holta, which was under Turkish rule until 1791, when it was acquired by Russia. The third settlement, Bohopil, arose after the Poles built a fortress and a frontier post on the left bank of the Boh River. In the mid-18th century the frontiers of three states, the Russian (Zaporizhia), Ottoman, and Polish, met at that point. Today Pervomaiske is a major industrial center. Its plants produce sugar, beer, furniture, textiles, plastic goods, construction materials, and machines.

Pervomaiske Machine-Building Plant (Pervomaiskyi mashynobudivnyi zavod). A factory in Pervomaiske, Mykolaiv oblast, built in 1875 to produce agricultural and other machinery, including drive shafts, gears, pulleys, and equipment for mills and threshers. In 1927 it began to build diesel motors, and in 1934, gas motors. The factory was evacuated at the outset of the Second World War and rebuilt in 1945–6. Now the plant specializes in the production of diesel generators, diesel engines for ships, and spare parts.

Pervomaiske Milk-Canning Complex (Pervomaiskyi molochnokonservnyi kombinat). An enterprise of the canning industry, founded in 1952 in Pervomaiske,

Mykolaiv oblast. It consists of a canning factory in Pervomaiske and creameries in Kostiantynivka, Kryve Ozero, and Vradiivka. It produces 15 types of dairy products, including concentrated milk, kefir, and ice cream. In 1980 the enterprise had an annual capacity of 67.4 million standard cans.

Leonid Pervomaisky

Pervomaisky, Leonid [Pervomajs'kyj] (pseud of Illia Hurevych), b 17 May 1908 in Kostiantynohrad, now Krasnohrad in Kharkiv oblast, d 9 December 1973 in Kiev. Writer. He began his literary career with the short story 'A nad polem postril' (And There Was a Shot over the Field, 1924). He moved to Kharkiv in 1926 and worked there as an editor for newspapers, journals, and various publishing houses. He also worked for the All-Ukrainian Photocinema Administration. His writing of the Kharkiv period is characterized by a romantic perception of the civil war and the postwar years, and the Komsomol is frequently chosen as a theme. Pervomaisky was one of the founders of the literary organization *Molodniak. From 1934 to 1941 he lived in Kiev. During that period he published *Komsomol's'ki povisti* (Komsomol Novelettes, 1935) and the poetry collections *Nova liryka* (New Lyric Poetry, 1937) and *Barvinkovyi svit* (A Periwinkle World, 1940). His prose of the period of the Second World War is collected in *Ataka na Vorskli* (The Attack on the Vorskla, 1946), and some poetry, in *Soldats'ki pisni* (Soldiers' Songs, 1946). Pervomaisky wrote his best poetry and prose in the post-Stalinist years. The collection of short stories *Materyn solodkyi khlib* (Mother's Sweet Bread, 1960) contains examples of masterful psychological prose that re-creates the 'unquiet poetry' of unfathomable incidents (eg, 'Chuzhe shchastia' [Other People's Happiness]). In places those short stories are of a completely modern style (eg 'Zamist' virshiv pro kokhannia' [Instead of Poems about Love]). The novel *Dykyi med* (Wild Honey, 1963), complex in its unexpected layering of events in the dimensions of time and space, is among the best novels of Soviet literature. The collection *Uroky poezii* (Lessons of Poetry, 1966), which is characterized by maximum clarity of image and economy of expression, differentiates Pervomaisky from poets of his generation and places his writings closer in style to that of Western poets. Such characteristics also appear in his last collections, *Drevo piznannia* (The Tree of Knowledge, 1971) and the posthumous *Vchora i zavtra* (Yesterday and Tomorrow, 1974). The most complete edition of Pervomaisky's works is *Tvory v semy tomakh* (Works in Seven Volumes, 1968–70). Pervomaisky is the

author of masterful translations of S. Petőfi, H. Heine, F. Viona, F.G. Lorca, and other writers.

I. Koshelivets

Pervomaiskyi [Pervomajs'kyj]. IV-17. A town smt (1986 pop 36,300) and raion center in Kharkiv oblast. It was founded in 1924 and was called Lykhacheve until 1952. It produces reinforced-concrete structures, knitwear, and food products.

Volodymyr Peshchansky

Peshchansky, Volodymyr [Peščans'kyj], b 10 November 1873 in Pereiaslav, Poltava gubernia, d 26 August 1926 in Lviv. Architect, art restorer, and art historian. A graduate of the St Petersburg Engineering and Architecture Institute, in 1913 he supervised the restoration of Kiev's St Nicholas's Military Cathedral and the Transfiguration Church in the Berestove district. An interwar émigré in Lviv from 1920, from 1922 he worked at the National Museum as the head restorer of its collection of medieval icons and supervisor of its folk-art collection. He wrote studies on Ukraine's ancient kilims (1925), Ukrainian and Russian icons (1926), and the Maniava Hermitage and Bohorodchany Iconostasis (1926, with M. Drahan and I. Svientsitsky).

Pestel, Pavel [Pestel'], b 5 July 1793 in Moscow, d 25 July 1826 in St Petersburg. Leader of the *Decembrist movement in Ukraine; son of a Russian senator and governor-general of Siberia (a Russified German). With other Russian officers who believed that Russia should become a democratic republic, he founded the clandestine *Union of Salvation (1816) and *Union of Welfare (1818) and headed the Tulchyn council of the latter group. In 1821 the council's members founded the revolutionary *Southern Society, and Pestel wrote its constitutional program, *Russkaia pravda* (Russian Justice), which was adopted at a secret meeting in Kiev in 1823. The society called for the overthrow of tsarism, the abolition of serfdom and oppressive *military settlements, and the establishment of a republic similar to that of the United States. Pestel did not, however, recognize the right to self-determination for the empire's non-Russians (except for the Poles), opposed the idea of a federal structure, and was consequently hostile to the separatist *Little Russian Secret Society. He was arrested on the way to Tulchyn on 25 December 1825 (the eve of the Decembrist revolt) and was tried and hanged

with four other Decembrist leaders in the Peter and Paul Fortress. L. Medvedska's book about him was published in Kiev in 1964.

Peter I (Russian: Petr), b 9 June 1672 in Moscow, d 8 February 1725 in Petersburg. Russian tsar from 1682 and first Russian emperor from 1721; son of Tsar Aleksei Mikhailovich. In 1696, after deposing the Muscovite regent, his half-sister *Sofia Alekseevna, Peter conducted an aggressive, expansionist foreign policy that affected the *Hetman state, *Slobidksa Ukraine, and the *Zaporizhia throughout his reign. He exploited Ukraine economically and militarily as part of Russia's participation in the Holy League against the Ottoman Empire; the expansionist *Russo-Turkish wars of 1695–6 and 1710–13; the Northern War with *Sweden (1700–21), by which Russia gained a foothold on the Baltic coast; and the war with Persia (1722–3), which fortified Russia's hold in Transcaucasia and the Caspian littoral. Those wars exacted a heavy human and economic toll in Ukraine.

Peter's internal reforms had as their goal the modernization and Europeanization of Russia. His cultural revolution provided a sound basis for the further expansion of Russian absolutism and imperialism. In Russian-dominated Ukraine Peter's policies until 1708 continued the Muscovite tradition of the gradual erosion of Ukraine's sovereignty. In 1708, after Hetman I. *Mazepa and Otaman K. *Hordiienko sided with Charles XII of Sweden, and particularly after the Battle of Poltava (1709), he initiated a reign of terror in Ukraine. The Zaporozhian Sich and Mazepa's capital, Baturyn, were completely destroyed, and Baturyn's inhabitants were massacred; captured Cossacks were executed; and most of Mazepa's senior supporters were imprisoned in the *Solovets Islands. Thereafter the Russian military and civil authorities were brutally intrusive in all aspects of Ukrainian life. The powers of Mazepa's successor, I. *Skoropadsky, were strictly limited, and his actions were monitored by Peter's resident functionary, A. Izmailov. After Skoropadsky's death in 1722 Peter forbade the election of a successor, and the Hetmanate was controlled and virtually ruled by his *Little Russian Collegium. Opposition on the part of the Ukrainian government, led by the acting hetman P. *Po-

The Peter and Paul Fortress (engraving)

lubotok (1722–4), brought on further repressions. Polubotok and his General Officer Staff were imprisoned in St Petersburg's *Peter and Paul Fortress, where the hetman died. Peter's policies intensified serfdom, and the monetary taxes levied on the people increased from 45,500 rubles in 1722 to 241,300 in 1724. Peter forbade the publication of books in Ukrainian and ordered Ukrainian redactions of Old Church Slavonic texts to be made to correspond with Russian redactions. Thousands of Ukrainian conscripts died during the construction of Peter's new capital, *Saint Petersburg, and the Don-Volga and Ladoga canals.

Peter II (Russian: Petr Alekseevich), b 23 October 1715 in St Petersburg, d 29 January 1730 in Moscow. Russian emperor in 1727–30; grandson of Peter I and son of Tsarevich Aleksei, who was executed on his father's order. During the first year of his reign the de facto ruler was Prince A. *Menshikov.

Peter III (Karl-Peter Ulrich; Russian: Petr Fedorovich), b 21 February 1728 in Kiel, Holstein-Gottorp (now in Germany), d 17 July 1762 in Ropsha, near St Petersburg. Russian emperor in 1761–2; grandson of Peter I and husband of *Catherine II from 1745. Under the influence of his father, Duke Charles Frederick of Holstein-Gottorp, who had been a friend of the *Orlyk family and had defended Ukrainian causes at the imperial court, Peter III surrounded himself with Ukrainians, among them A. Hudovych (whom Peter appointed adjutant general and, it was rumored, planned to appoint hetman in place of K. Rozumovsky), V. Khanenko, and S. Karnovych. After he succeeded his aunt, Elizabeth I, as emperor, Peter abolished the Secret Chancery and compulsory military service for the gentry and ordered the secularization of monastic properties. Being pro-Prussian, he ended the *Seven Years' War and forged an alliance with Prussia in preparation for a new war with Denmark on behalf of Holstein. Peter's policies aroused opposition from his wife and other members of the imperial elite. In June 1762 Catherine staged a coup d'état, was recognized as empress by the imperial guard, senate, and Holy Synod, and had Peter arrested. After abdicating Peter was killed in a brawl by one of his captors.

Peter and Paul Fortress (Petropavlovskaiia krepost). A stronghold on Zaiachii Island, near the mouth of the Neva River in St Petersburg. Its construction in 1703 marks the founding of the city. The fortress is infamous as a prison for political opponents of the tsarist regime, including many Ukrainians. In 1924 it was converted into a historical museum.

Peters, Ihor, b 21 September 1923 in Kremenchuk, Poltava gubernia. Soviet historian. A graduate of Kiev University (1949), he has worked since 1952 at the AN URSS (now ANU) Institute of History, where he received a candidate's degree in 1954 and a doctorate in 1968. He is the author of books on interwar Czechoslovak-Soviet relations, Czechoslovakia and European politics on the eve of the Munich Agreement (1971), and Czechoslovak foreign policy in 1945–60 (1976). He is also the coauthor of books on Soviet Ukraine and foreign socialist countries (1965), foreign internationalists who fought on the Bolshevik side in Ukraine in 1917–20 (1967), and Soviet Ukraine's economic co-operation with the socialist countries (1962).

Petipa, Tamara, b 18 September 1927 in Saratov, Russia. Hydrobiologist; corresponding member of the AN URSS (now ANU) since 1972. She completed study at Rostov University (1952) and worked at the Sevastopol Biological Station, from 1965 as laboratory director and from 1972 as departmental director. Her major research interest is the biology and nourishment of zooplankton.

Petiukh, Antin [Petjux] (real surname: Mytai), b 1884 in Medvyn, Kiev gubernia, d ca 1920 in the Zvenyhorod region. Banduryst. He studied the bandura in Kiev under I. Kucherenko-Kuchuhura. His repertoire consisted of dumas and historical and humorous songs. He died in a skirmish between partisans and Bolshevik troops.

Petliash-Barilotti, Olena [Petljaš-Barilotti], b 11 July 1890 in Kharkiv, d 4 October 1971 in Kiev. Opera singer (dramatic soprano); daughter of M. *Sadovsky. She studied singing under O. Muraviova in Kiev (1910–13) and A. Cotogni in Rome (1913–16). Her theatrical debut was with Sadovsky's Theater in 1907. She appeared on the opera stages of Odessa (1916–18, 1923–4), Kiev (1926–7), Saratov, Erevan, Tbilisi, and Kazan. She sang leading roles in M. Arkas's *Kateryna*, S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube* (Odarka), M. Lysenko's *Aeneid* (Didona), D. Sichynsky's *Roksoliana*, P. Tchaikovsky's *Mazepa* (Maria), G. Puccini's *Tosca*, and G. Verdi's *Aida*. In recital she often performed Ukrainian folk songs and romances.

Petlishenko, Marko [Petlišenko], b 30 December 1880 at Sochevaniv *khutir*, near Marianivka, Yelysavethrad county, Kherson gubernia, d 20 April 1938. Actor; brother of I. *Marianenko. He began his career as a chorister in the troupe of his uncle, M. Kropyvnytsky (1895–1900), and then worked in Saksahansky's Troupe (1900–7), Sadovsky's Theater (1907–14), the Society of Ukrainian Actors (1916), the Ukrainian National Theater (1917–18), the Poltava Rukh Theater (1919–22), the Kharkiv People's Theater (1924–8), the Kharkiv Chervonozavodskyyi Ukrainian Drama Theater (1928–33), and the Kharkiv Theater of Working Youth (1934–7). His repertoire was extensive – from the ethnographically interesting Voznyi in I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava) to the psychologically conceived Makar in V. Vynnychenko's *Moloda krov* (Young Blood). Petlishenko was arrested in 1937, and died in prison.

Petliura, Symon [Petljura] (pseuds: V. Marchenko, V. Salevsky, I. Rokytny, S. Prosvitnianyn, O. Riast), b 10 May

Symon Petliura

1879 in Poltava, d 25 May 1926 in Paris. Statesman and publicist; supreme commander of the UNR Army and president of the Directory of the Ukrainian National Republic. He entered the Poltava Theological Seminary in 1895 but was expelled in 1901 for belonging to a clandestine Ukrainian hromada, which he had joined in 1898. From 1900 he was also active in a political cell in Poltava that became the nucleus of the Revolutionary Ukrainian party (RUP). To avoid arrest he moved in the autumn of 1902 to Katerynodar, in the Kuban, where he worked as a teacher and then, under the supervision of F. Shcherbyna, cataloged the archives of the Kuban Cossack Army. For his involvement in Katerynodar in the local RUP branch (the Black Sea Free Hromada) and in RUP periodicals (notably *Dobra novyna*) published in Austrian-ruled Lviv, he was arrested in December 1903. After being released on bail in March 1904, he went to Kiev and from there, in the autumn, to Lviv to do RUP work and to edit its organ *Selianyn*. In 1905, after the general amnesty, he returned to Kiev. In January 1906 he left for St Petersburg to edit, with P. Poniatenko and M. Porsh, the social democratic monthly **Vil'na Ukraïna*. After returning to Kiev in July 1906, he worked as secretary of the newspaper **Rada*, coedited (in 1907–8) **Slovo*, the organ of the Ukrainian Social Democratic Workers' party (USDRP), and contributed to the monthly *Ukraïna*. In 1909 he moved to Moscow and worked there as a bookkeeper until 1912, when he became coeditor, with O. Salikovskiy, of the Russian-language monthly **Ukrainskaïa zhizn'*

(1912–17). In 1916 and until the beginning of 1917 he was deputy plenipotentiary of the All-Russian Union of Zemstvos aid committee on the Russian western front.

After the February Revolution of 1917 Petliura was elected head of the Ukrainian Military Committee of the Western Front. He was sent as a delegate to the First *All-Ukrainian Military Congress (18–21 May 1917) in Kiev, where he was elected chairman of the Ukrainian General Military Committee. In June 1917 he was appointed general secretary of military affairs in the first *General Secretariat of the Central Rada, and directed all his energies to organizing and building up the Ukrainian armed forces, while facing opposition from certain members of the Central Rada as well as open and active hostility from Russian circles. In late 1917, disagreeing with the policies of V. Vynnychenko, the chairman of the General Secretariat, Petliura resigned and went to Left-Bank Ukraine. There he organized and commanded the *Haidamaka Battalion of Slobidska Ukraine, a military formation that played a decisive role in the January–February 1918 battles for Kiev and suppression of the Bolshevik Arsenal uprising there.

After Hetman P. Skoropadsky's coup in April 1918, Petliura headed the Kiev Gubernial Zemstvo and *All-Ukrainian Union of Zemstvos. He was arrested by the Hetman government in July 1918 but was released after four months, and went to Bila Tserkva. There he took part in the popular uprising against Skoropadsky's regime and was then elected a member of the UNR *Directory and supreme otaman of the UNR Army. On 11 February 1919, after the army's retreat from Kiev and Vynnychenko's flight abroad, Petliura succeeded him as president of the Directory and resigned from the USDRP. In the difficult conditions of the next 10 months he commanded the UNR and later joint UNR–Ukrainian Galician (UHA) armies against the Red and Russian Volunteer armies (see *Ukrainian-Soviet War). On 5 December 1919, surrounded by the enemy and faced with certain defeat after the UHA established a separate alliance with the Volunteer Army, Petliura and some members of his government fled Ukraine and made for Warsaw in the hope of finding support and allies there. In the meantime Petliura ordered the UNR Army to begin its first *winter campaign.

After the signing of the UNR–Polish Treaty of *Warsaw in April 1920, the UNR Army under Petliura's command and its Polish military ally mounted an offensive against the Bolshevik occupation in Ukraine. The joint forces took Kiev on 7 May 1920 but were forced to retreat in June. Thereafter Petliura continued the war against the Bolsheviks without Polish involvement. Poland and Soviet Russia concluded an armistice in October 1920, and in November the major UNR Army formations were forced to retreat across the Zbruch into Polish-held territory and to submit to internment. Petliura and his government resided temporarily in Tarnów. Later, under an assumed name, Petliura moved to Warsaw. In late 1923, faced with increased Soviet demands that Poland hand him over, he was forced to leave for Budapest. From there he went to Vienna and Geneva, and in late 1924 he settled in Paris. In Paris he founded the weekly **Tryzub*, and from there he oversaw the activities of the UNR *government-in-exile until his assassination by a Bessarabian Jew claiming vengeance for Petliura's purported responsibility for the pogroms in Ukraine (see *Schwartzbard Trial). He was buried in Montparnasse Cemetery.

Petliura debuted as a publicist in 1902 in *Literaturno-naukovyi vistnyk*. There and in the periodicals he edited he published many articles on political, civic, and cultural affairs, particularly on the question of Ukraine's national liberation. His articles had a discernible impact on the formation of Ukrainian national consciousness before the Revolution of 1917. As an émigré in Poland Petliura wrote a brochure on contemporary Ukrainian émigrés and their responsibility (1923). In *Tryzub* he wrote mainly about the 1917–21 attempts at Ukrainian nation building, the responsibility of émigrés, and Ukraine under Bolshevik rule.

The entire 1917–21 period of struggle for Ukrainian statehood is indissolubly linked with Petliura. As a publicist, politician, and military leader he was uncompromising on the issue of Ukrainian independence. Petliura's broad outlook was particularly evident in his definition of the tasks of Ukrainian émigrés and their role in the struggle for Ukrainian statehood. Despite the initially negative, if not openly hostile, attitudes of certain émigré (particularly Western Ukrainian) circles to Petliura because of his central role in the Treaty of *Warsaw and the Ukrainian-Polish alliance, since the mid-1920s he has personified, perhaps more than any other person, the struggle for Ukrainian independence. The personification seemingly also extends to the issue of the *pogroms that took place in Ukraine during the revolutionary period of 1918–20, and Petliura has frequently been invested with the responsibility for those acts. Petliura's own personal convictions render such responsibility highly unlikely, and all the documentary evidence indicates that he consistently made efforts to stem pogrom activity by UNR troops. The Russian and Soviet authorities also made Petliura a symbol of Ukrainian efforts at independence, although in their rendition he was a traitor to the Ukrainian people, and his followers (Petliurites) were unprincipled opportunists.

Petliura Ukrainian Library (Ukrainska biblioteka im. Symona Petliury; French: Bibliothèque Ukrainienne Symon Petlura à Paris). Established in Paris in 1926 and officially opened in 1929. By 1940 it had approx 15,000 books, documents, and museum exhibits. In January 1941 the Germans confiscated its holdings and took them to the environs of Leipzig (which became a Soviet zone at the end of the Second World War), from which location they were

never recovered. In 1946 the library reopened, and in 1958 it began an active campaign of renovation and acquisition. The number of books in its collection increased from 3,000 in the early 1950s to 10,000 in 1958, 12,000 in 1971, 18,000 in 1979 (not including 6,000 duplicates, 105 periodicals, and 30 newspapers), and over 30,000 in 1984. The library also contains documents on the struggle for independence in 1917–21 and some of the archives of the diplomatic missions of the UNR. It has published an informative bulletin, biannually from 1959 and annually from 1980 (53 issues by 1990). A museum of S. *Petliura's personal effects and of military insignia from 1917–20 is also housed on the premises of the library. The presidents of the library council have been V. Prokopovych (1926–42), I. Kosenko (1942–50), O. Udovychenko (1950–7), Ye. Prokopovych (1957–64), P. Plevako (1964–8), P. Shumovsky (1968–81), Yu. Yermiiv (1981–3), and A. Zhukovsky (since 1983). The library's directors and the editors of its *Informatsiynyi biuleten'* have been I. Rudychiv, H. Dovzhenko, P. Yosypshyn (1958–89), and V. Mykhalchuk (since 1989).

Petlovany, Vitalii [Petl'ovanyj, Vitalij], b 16 December 1914 in Vinnytsia, d 4 January 1990. Writer. He began publishing in 1935 and was the author of 10 short-prose collections and of numerous novels, such as *Khotyntsi* (1949), *Divchyna z peredmistia* (The Girl from the Suburb, 1955), *Pleche druha* (A Friend's Shoulder, 1961), *Ta tse zh vesna!* (But This Is Spring!, 2 vols, 1962, 1965), *Antoniv vohon'* (Antin's Fire, 1963), *Bakeny na bystryni* (Buoys on the Current, 1967), *Kremliv's'kyi patrol'* (The Kremlin Patrol, 1969), *Syrena z mechem* (A Siren with a Sword, 2 vols, 1972, 1975), *Vohon' dlia Prometeia* (Fire for Prometheus, 1979), *Spomyn ratnoho polia* (Memoir of the Warring Field, 1981), and *Huliai-Hora* (1987).

Petlychny, Ivan [Petlyčnyj], b 1900 in Kobeliaky, Poltava gubernia, d ? Linguist. A graduate of the Kharkiv Institute of People's Education, he taught at the Kharkiv Linguistic and Pedagogical institutes (1930–41) and in the department of Ukrainian language at Lviv University (from 1945). He wrote over 40 articles on subjects such as the language of the *Samovydets Chronicle, the Hutsul dialect in M. Cheremshyna's works (candidate's diss, 1949), syntax and apposition in I. Franko's works, and the sentence in Ukrainian.

Petrakhnovych, Mykola [Petraxnovyč] (Morokhovsky), b ca 1600, d after 1666 in Lviv. Painter. He was a student and then successor of the Lviv painter F. *Senkovich and a leading member of the Lviv painters' guild. His works include the iconostasis in the Dormition Cathedral in Lviv (1637, now in Hrybovychi, near Lviv) and the *Theotokos* (1635) above the entrance to the cathedral, seven passion scenes, and six angels (1664, now lost). He is believed to have painted the portraits of K. Korniyak and his sons.

Petrakivska, Yuliia [Petrakiv's'ka, Julija], b 29 November 1900 in Kiev, d 25 June 1969 in Kiev. Pedagogue. A graduate of the Kiev Institute of People's Education

(1929), she directed (1924–67) the renowned day-care facility of the Arsenal factory in Kiev and wrote extensively about early childhood education.

Petranovskyy, Yarema [Petranovs'kyj, Jarema], b and d ? Cossack officer from Podilia. He was Uman regimental judge under Hetman B. Khmelnytsky, envoy to Turkey under I. Vyhovsky, and colonel of Lysianka (1648–9) and Chyhyryn (1671–6) regiments and general judge under D. Doroshenko (1669), as well as his ambassador to Poland.

Petranovych, Vasyl [Petranovyč, Vasyl'], b ca 1680 in Zhovkva, Galicia, d 12 August 1759 in Zhovkva. Painter. He painted icons for the Basilian monasteries in Krasno-pushcha, Vitsyn, Krekhiv, Zhovkva, and Pidhirtsi; the iconostasis of the church in Vitsyn (fragments of the *Theotokos* and *John the Baptist* have been preserved); and the royal gate with a depiction of the Annunciation in the Good Friday Church in Krekhiv. A number of works now in the Lviv Art Gallery have been attributed to him, including the icons *Theotokos* and *Christ's Childhood*, portraits of W. and S. Rzewuski, *F. Rákóczi* and *I. Zriny before the Mother of God*, and *Crown Prince James with His Patron Saint, James*.

Halyna Petrashevych: *My Child* (marble, 1957)

Petrashevych, Halyna [Petrashėvyč], b 23 March 1903 in Dubova, Uman county, Kiev gubernia. Sculptor. She studied at the Uman Art and Decoration Studio (1920–3) and the Kiev State Art Institute (1925–9). She sculpted over 300 works in the socialist realist manner, mostly portraits such as *Oksana* (1932), *Self-Portrait* (1936), *Dream* (1946), *Woman*

Serf (1959); *Lesia Ukrainka* (1937), T. Shevchenko (1939, 1959), O. Korniiuchuk (1945, 1949, 1957), and Soviet war heroes and leaders; and the Victory monument in Chernivtsi (1946). I. Verba's book about her was published in Kiev in 1965.

Petrashiv, Petro [Petrashiv], b 1738 in Rybtsi, Poltava regiment, d 19 March 1772. Cossack painter. He painted icons, portraits, and landscapes at the Zaporozhian Sich. His known works include the iconostases of the Dormition Church in Kremenchuk (1767) and those in the military cathedral in Lokhvytsia commissioned by Otaman P. Kalnyshevsky (1770), icons and portraits in Dykanka commissioned by Col V. Kochubei (1768), an icon of the Holy Protectress depicting Cossacks and clergy (1772), and landscapes commissioned by Gen Isakov in Kremenchuk (1768). In composition his works are close to folk paintings.

Petrashytsky-Kulaha, Ivan [Petrashyts'kyj], b ?, d 1632 in Kaniv. Hetman of the "registered Cossacks in 1631–2. He petitioned the Polish Sejm to grant privileges to the Cossacks, demanded that it allow them to participate in the election of the Polish king after the death of Sigismund III Vasa, and defended the rights of the Orthodox church. Together with the Zaporozhian Host he petitioned Metropolitan P. Mohyla to fund a new school at the Kiev Epiphany Brotherhood. His attempts to prevent Zaporozhian sea campaigns against Turkey and his pro-Polish policies antagonized the Zaporozhians, and at the Cossack council in Maslovyyi Stav in September 1632 he was deposed. Soon thereafter he was executed.

Andrii Petrenko

Petrenko, Andrii, b 1881 in the Poltava region, d July 1957 in Lviv. Civic leader. After the outbreak of the Revolution of 1917 he moved from Siberia, where he had worked as a bookkeeper for the Chief Railway Construction Administration, to Kiev, from which he was posted to Georgia as a member of a UNR diplomatic mission. In the early 1920s he settled in Lviv and worked at the head office of the Prosvita society. At the same time he was active in the Ukrainian Society of Aid to Emigrants from Eastern Ukraine and a director of the Khortytsia publishing house. During the Soviet and German occupations of Galicia (1939–44) he served as executive director of the Lviv Opera Theater. After the war he was seized by the Soviet secret police in Vienna. He was released from a labor camp shortly before his death.

Petrenko, Mykhailo, b 1817 in Slovianske, Izium county, Kharkiv gubernia, d ? Poet of the *Kharkiv Romantic School. After graduating from Kharkiv University in 1841, he worked as a civil servant. He wrote lyrical and elegiac poetry, genres uncommon at that time. Nineteen of his poems appeared in three literary miscellanies, O. Korsun's *Snip* (The Sheaf, 1841), I. Betsky's *Molodyk* (The New Moon, 1843), and A. Metlynsky's *Iuzhno-russkii sbornik* (South Russian Collection, 1848). Some of them became folk songs (eg, 'Dyvlius' ia na nebo' [I Gaze at the Sky]). Petrenko's poetry was published in an edition with V. Zabala's in 1960.

Petrenko, Nazar, b 1893, d ? Political activist. From 1918 he was a member of the CC of the centrist *Ukrainian Party of Socialist Revolutionaries (UPSR), and later he joined the Central Ukrainian Insurgent Committee in Kamianets-Podilskyi that was assisting the UNR in its struggle against A. Denikin. In 1921 Petrenko was convicted, together with V. Holubovych and other UPSR figures, in a Bolshevik show trial. His further fate is unknown.

Petrenko, Pavlo, b 15 November 1903, d 2 September 1982. Literary scholar. In the 1930s he was an associate of the Institute of Literature of the AN URSR (now ANU) and taught Ukrainian literature at various postsecondary schools in Kharkiv. He wrote books on the Marxist method in literary scholarship (1928), H. Kvitka-Osnovianenko (1931), I. Kotliarevsky (1931), and M. Vovchok (1932) and was one of the authors of a general course on the history of Ukrainian literature edited by O. Biletsky. After the Second World War he was a refugee in Germany and then emigrated to the United States. He contributed articles on Ukrainian literature to émigré periodicals and wrote a short biography of D. *Solovei (1968).

Petrenko, Serhii, b 8 December 1956 in Khmelnytskyi. Canoeist. He and A. Vinogradov won the 1976 Olympic gold medals in the 500-m and 1,000-m Canadian pairs. He was also a world and European champion in the 1974 and 1975 500-m Canadian singles and the 1977 10,000-m Canadian pairs, and a USSR champion in the 1975 4 × 500-m relay, the 1976 500-m Canadian pairs, and the 1979 10,000-m Canadian pairs.

Petrenko, Yevhen, b 1946 in Luhanske oblast. Painter. Petrenko studied in Kiev and at the Moscow Higher Art and Design School, from which he was expelled for attempting to organize a Ukrainian students' group. He creates fantastic, nonrepresentational compositions echoing abstract expressionism. His pictures are evocative of cataclysmic explosions and flights of fancy into unknown galaxies and black holes. Petrenko uses highly saturated colors in myriad tonalities of swirling pigment. His work was not exhibited in Ukraine until 1988.

Petrenko-Krytchenko, Pavlo [Krytchenko], b 9 July 1866 in Kherson, d 21 January 1944. Organic chemist; VUAN/AN URSR (now ANU) corresponding member from 1932. A graduate of the university in Odessa (1888), he taught there, and became a professor in 1903. In the 1920s he chaired the Scientific Council of the Odessa Chemical-Radiological Institute and the chemistry department at the Odessa Tekhnikum of Applied Chemistry. He studied

heterocyclic compounds, the substituent effect on the reactivity of organic compounds (esp ketones), and general structure-property relationships. He introduced the concept of steric hindrance on the basis of his esterification studies on aromatic carboxylic acids.

Ivanna Petriv

Gen Vsevolod Petriv

Petriv, Ivanna, b 20 January 1892 in Lviv, d 6 November 1971 in Toronto. A teacher at Ukrainian schools in Lviv (1918–44), she wrote handbooks and textbooks on teaching methodology and was active in the *Prosvita society and the *Ukrainian Teachers' Mutual Aid Society. In 1954, after spending several years in Germany and Belgium following the Second World War, she emigrated to Canada. She remained active in Ukrainian community affairs, particularly as a member of the *Ukrainian Catholic Women's League of Canada.

Petriv, Vsevolod, b 2 January 1883 in Kiev, d 10 July 1948 in Augsburg. Senior UNR Army officer; full member of the Shevchenko Scientific Society from 1948. A colonel of the general staff in the Russian army during the First World War, in early 1917 he was chief of staff in the Turkestan Division. He organized the Ukrainian troops of the division into the *Haidamaka Cavalry Regiment, and commanded it in battles for Kiev during January and March–April 1918 and then in the Crimean campaign. Under the Hetman government he served on the General Staff in the Department of Military Education, and during 1919 he organized and commanded the unified military youth school in Zhytomyr and then the Volhynian Group. Later, he served as defense minister in the government of I. Mazepa (1919), UNR Army inspector of infantry, and chief of general staff, and was promoted to brigadier general. In the interwar period he lived in Prague, where he lectured and wrote articles on military topics. His major work is *Spomyny z chasiv ukrains'koi revoliutsii* (1917–1921) (Memoirs from the Times of the Ukrainian Revolution [1917–21], 4 vols, 1927–9).

Petrivka. v-20, DB II-6. A town smt (1986 pop 6,500) near the confluence of the Yevsuh and the Kovsiuh rivers in Stanychno-Luhanske raion, Luhanske oblast. It was founded in the second half of the 17th century by Don Cossacks and runaway serfs. The settlement was called Karaiaashnyk until 1771 and Petropavlivka until 1923. The

town produces concrete and sand for the building industry.

Petrivske [Petrivs'ke] (Petrovs'ke). V-19, DB III-5. A city (1989 pop 17,800) in Luhanske oblast. It was founded in 1896 and called Shterivske until 1920. In 1963 it was granted city status and placed under the jurisdiction of the Krasnyi Luch municipal council. It has a building-materials and a food industry.

Petrivske fortified settlement. A Romen-Borsheve culture fortified settlement of the 9th to 12th century on the Vorsklo River near Petrivske, Velyka Pysarivka raion, Sumy oblast. Excavations in 1938 uncovered the remains of semi-pit dwellings and agricultural structures, work implements, and the bones of domesticated animals. Further occupation during the 11th and 12th century testified that Petrivske sheltered the inhabitants of surrounding settlements during onslaughts by steppe nomads.

Petrivske graphite region (Petrivskiy hraitonosnyi raion). A number of graphite deposits in southeastern Kirovohrad and western Dnipropetrovske oblasts. The largest deposits are in Petrivske, Velyko Vodianske, and Babenkivske. Total reserves of graphite are estimated at 7.5 million t (1980). The graphite is found in seams that are 40–50 m in depth and extend to 2.5 km in width. The graphite concentration in the ore is 2–15 percent. Graphite was discovered in the area in 1872.

Petrivsky, Mykhailo [Petrivs'kyj, Myxajlo] (Petrowsky, Michael), b 15 November 1897 in Rozhubovychi, Peremyshl county, Galicia, d 7 April 1982 in Toronto. Writer and translator. After emigrating to Canada with his parents in 1912, he completed his education at the University of Ottawa and worked as a translator and investigator for the Royal Canadian Mounted Police. In this capacity he prepared a report in October 1939 on Ukrainians in Canada that strongly influenced government policy toward Ukrainian Canadians during the Second World War. He contributed articles to the Ukrainian and Canadian press and wrote plays, such as *Kanadiis'kyi zhenykh* (The Canadian Bridegroom, 1921) and *Katy biloho orla* (Executioners of the White Eagle, 1922), as well as the novel *Magichne misto* (The Magical City, 1929). His short stories were published in the collections *Mrii sl'ozamy oblyti* (Dreams Drenched in Tears, 1973) and *Oi, Kanado Kanadon'ko* (Oh, Canada, Dear Canada, 1974). Some of his works have been translated into English.

Petro, b and d ? Metropolitan of Kiev. He was born in Volhynia, and entered a monastery at the age of 12. He founded his own monastery in Ratna, near Lviv. In 1305 Prince Yurii Lvovych of Galicia-Volhynia sent him to Constantinople to be consecrated metropolitan of Halych. Since Maximos, the metropolitan of Kiev, had recently died, Patriarch Athanasios named Petro metropolitan of Kiev and Halych (1308–26), on the condition that he transfer his see to Moscow to satisfy the demands of the Muscovite princes. The transfer led to the development of a separate Muscovite church jurisdiction and strengthened the authority of the Moscow princes. Petro was canonized in 1340.

Petrochemical industry. A branch of the *chemical industry that processes products of the *petroleum and *natural gas industries. The major products of the industry are polymers (synthetic rubber, plastics, synthetic fibers, etc), olefins, and various other organic and inorganic chemicals. Those products have important industrial and domestic uses. The petrochemical industry emerged in the USSR in the early 1930s, following the introduction of modern petroleum refining. In Ukraine, however, the industry began to develop only after the Second World War. In the 1960s its output increased by more than a factor of 3.5, yet overall production remained low. Recently, considerable emphasis has been placed on increasing the production of plastics, synthetic tar, and synthetic fibers. The main centers of the industry are the petroleum-producing regions of western Ukraine (near Drohobych and Boryslav) and the Donets Basin.

Petrograd. See Saint Petersburg.

Petrograd Ukrainian Drama Theater. See Zhovten Theater in Petrograd-Leningrad.

Petroleum deposits. There are three petroleum-bearing regions in Ukraine, the Carpathian, the Dnieper-Donets, and the Crimean-Caucasian. The Carpathian region, which has had the longest history of petroleum extraction, extends along the northeastern flank of the Carpathian Mountains. Petroleum deposits are located along the southwestern edge of the inner zone of the Subcarpathian Depression in Jurassic, Upper Cretaceous, Paleogene, and Neogene strata. Overlain in places by the Berehove Nappe, the deposits lie anywhere from 100 to 4,800 m, but mostly from 2,000 to 3,500 m, below the surface. Petroleum or crude oil from the Carpathian region is of the paraffin-petrogenic type. It contains up to 10 percent paraffin, has little sulfur, is rich in light fractions (35–60 percent, of benzene and gas), has a specific gravity ranging from 0.835 to 0.975, and can generate about 10,000 kcal/kg. Historically the most important petroleum deposit is the Boryslav field, which provided the longest period of exploitation and contributed up to 90 percent of petroleum production in the Carpathian region before the Second World War. Today the most important fields in the region are the Dolyna (discovered in 1949) and the Bytkiv (near Nadvirna; commercial extraction started in 1962). A number of small deposits, worked since the late 19th century, have been abandoned.

The Dnieper-Donets region contains (since 1965) the largest and most productive petroleum deposits in Ukraine. Exploration for petroleum began there in 1936 and commercial extraction started in 1952. By the time Ukrainian petroleum production peaked in 1972, the fields in the region accounted for about 85 percent of the republic's output. Petroleum deposits are located within a graben that extends from the northwest to the southeast through the central part of the Dnieper-Donets Trough. The graben, about 150–200 km wide and 800 km long, contains proven petroleum and gas-bearing strata of the mid-Jurassic, Permian-Triassic, and lower Permian-Carboniferous periods at depths of 940–2,600 m. There are prospects that petroleum might be discovered even deeper, in the Devonian deposits. The petroleum from the region is light to medium (specific gravity, 0.783–0.875), is low in

paraffin (1–4 percent, seldom 4–7 percent), and contains less than 1 percent sulfur. The major commercial petroleum deposits of the region include Radchenky, Sahaidak, Rozbyshivka, Mykhailivka, and Zachepylivka, in Poltava oblast; Kachanivka and Rybalske, in Sumy oblast; and Pryluka, Hnidyntsi, and (the largest) Leliaky, in Chernihiv oblast.

The Crimean-Caucasian region extends along the northern flank of the western end of the Caucasus Mountains and crosses the Kerch Strait to the Kerch Peninsula, in the Crimea. Petroleum deposits are located in Tertiary sandstones at depths of 500–2,300 m and partially in the Cretaceous and Jurassic porous sedimentary rocks at even greater depths. The petroleum from the region is of high quality. It is both light and sulfur-free. In the Crimea oil fields were discovered in the Kerch Peninsula before the First World War, but most of them have been exhausted and only partly replaced. In the Kuban region the earliest oil fields were located near Maikop and to the southwest (at Apsheronse, Naftohorske, and Khadyzhenske). After the Second World War more oil fields were discovered southwest of Krasnodar (at Ilskyi, Akhtyrskyi, Krymske, and elsewhere) and in the Kuban Delta (centered on Anastasiivska). The last two areas are major producers at present.

Petroleum reserves for Ukraine have not been reported for nearly two decades. It is obvious that discoveries of new deposits have not kept up with the rates of extraction, and production since 1975 has fallen. There are prospects for new discoveries in the deeper strata of all three regions, especially in the lower Carboniferous and Devonian of the Dnieper-Donets region, and in the Cretaceous and Jurassic of the Crimean-Caucasian region, which have not yet been explored.

I. Stebelsky

Petroleum industry. A branch of heavy industry that involves the extraction and refinement of petroleum resources. The petroleum industry in Ukraine is concentrated in three geographic regions: Galicia (in the foothills of the Carpathian Mountains), the Dnieper-Donets area, and the Black Sea coast. Petroleum output in Ukraine peaked in the mid-1970s.

In Galicia petroleum extracting began as early as 1617. Until the end of the 19th century petroleum was extracted manually with buckets and hand-pumps from oil springs (4–6 m below the surface) and, later, from wells (35–40 m deep). The petroleum was used in its natural state as lubricating material, lamp oil, and ointment. By 1836 Galicia's oil output had reached some 350 t per year. The discovery of a distillation process for naphtha and the invention of the naphtha lamp in 1851 spurred the development of the petroleum industry that was concentrated in the *Drohobych-Boryslav Industrial Region. By 1870 annual out-

put had reached 20,000 t. The extracted oil was not refined locally, but shipped outside Galicia. The first significant oil refinery was established in Drohobych only in 1909. New technology had made it possible to drill deeper wells by the end of the 19th century. In 1908 the Oil City Company drilled a 1,015-m well that opened up the deeper, sandstone layers for exploitation. Small-scale entrepreneurs were displaced by large Austrian, British, German, and French companies. At the beginning of the 20th century British-Austrian interests controlled 78 percent of oil output and 73 percent of its processing. Ukrainian peasants who owned the oil-bearing land benefited little from the rapid development of the industry; many of them sold their land at very low prices. Petroleum production in Galicia peaked at 2.1 million t (5 percent of world output) in 1909 and then declined quickly to 877,000 t in 1914, as easily accessible resources were exhausted, and little was spent on exploration. Eighty percent of Galicia's oil and oil products were exported.

In the interwar period petroleum output in Galicia continued to decline. The industry was controlled by large foreign cartels (British, Belgian, French, and American), which accounted for 84 percent of its capital investment in 1933. The economic depression, competition from cheap Middle Eastern oil, and technological obsolescence contributed to the decline of Galicia's oil industry. Its output dropped from 700,000 t in 1928 to 370,000 t in 1938 (or 0.1 percent of world output). That quantity was enough to supply all of Poland's demand and even to export some surplus to other countries.

In central and eastern Ukraine petroleum was not extracted until the 1950s. Before then imported Caucasian oil was refined in Odessa, Kherson, and Berdianske. By the mid-1930s Ukraine was importing almost 2 million t of petroleum annually. In that period a pipeline was constructed from Armavir in the Caucasus to Trudove in the Donets Basin. In the 1930s, oil exploration was begun in the Dnieper-Donets Trough, and several productive wells were drilled. The Second World War, however, interrupted the development of that region's petroleum resources. In 1940 Ukraine's entire output of 400,000 t came from Galicia, which had been annexed by the Ukrainian SSR (see the table). During the war Galicia's oil industry was severely damaged. In 1946, therefore, Ukraine extracted only 213,000 t of petroleum.

Ukraine's oil production expanded after the war. By 1960 Ukraine was producing 2.2 million t of petroleum (including gas condensate), and by 1972, 14.5 million t (or about 4 percent of the USSR output). The increase was brought about partly by improvements in oil recovery technology. In the second half of the 1950s deep-drilling efforts were intensified, and secondary recovery methods were put to use. Furthermore, in 1950 a number of new oil fields were brought into production in Western Ukraine, including the Dolyna and Northern Dolyna oil fields in Ivano-Frankivsk oblast and the Olkhivske oil field in Transcarpathia. By 1960 the oil output in western Ukraine accounted for 70–80 percent of Ukraine's output. Since then production has declined: the reserves seem to be largely depleted, although drilling for small traps is continuing. In 1974 the estimated reserves of the Carpathian region were 426 million barrels of oil and condensate.

In the 1950s oil exploration of the large Dnieper-Donets

PETROLEUM INDUSTRY

graben system was intensified, and oil fields were developed in Poltava, Sumy, and Chernihiv oblasts. By 1965 over 60 percent of Ukraine's oil production came from that region. Predictions of large Devonian oil resources were confirmed partly in 1978 by deep drilling to 5,000 m. Such depths were inaccessible to Soviet technology. In 1974 the estimated reserves of the area, excluding the Devonian reserves, were 1,029 million barrels of oil and condensate.

The Black Sea region contains Ukraine's newest oil fields. The first oil field was discovered only in 1959. Exploration there has been fragmentary, because most of the potential is offshore. (See *Petroleum deposits.)

Ukraine's output of petroleum (including gas condensate), 1940-87

Year	Output (in million t)
1940	0.4
1950	0.3
1960	2.2
1970	13.9
1980	7.5
1987	5.6

In the 1970s, Ukrainian petroleum production began a gradual decline as a result of the depletion of old reserves, and a lack of capital necessary for exploiting new sources - the Soviet government concentrated resources on the development of oil in Siberia and the north. Oil production (including gas condensate) declined from 14.5 million t in 1974 to 5.4 million t in 1988. The latter figure represented a mere 0.9 percent of total USSR production. Ukraine relies heavily on oil imported from Russia. In 1988 it paid almost 40 billion rubles for imported work oil and natural gas.

Historically the oil refining industry in Ukraine has lagged behind the extraction industry. In the 1950s and 1960s new refineries were built, and existing facilities were expanded. Today there are eight large refinery complexes in Ukraine: Boryslav, Drohobych, Lviv, Odessa, Kherson, Berdianske, Kremenchuk, and Lysychanske. Relatively outdated equipment and an irregular oil supply from Russia hindered the growth of Ukraine's refining industry in the second half of the 1980s.

Petropavlivka. v-17. A town smt (1986 pop 10,200) on the Byk River and a raion center in Dnipropetrovske oblast. A settlement of former members of the Luhanske Pike Regiment was established at the site in 1775. By 1846 it had become a volost center with a population of about 4,700. In 1923 it became a raion center. Today the town has a creamery and a hemp-processing plant.

Petrov, Aleksei, b 16 March 1859 in St Petersburg, d 5 January 1932 in Prague. Russian historian and Slavist; full member of the Shevchenko Scientific Society from 1925. A graduate of St Petersburg University (1880), he taught in St Petersburg secondary schools in 1880–7, the school of Higher Courses for Women from 1887, and the university from 1911. From 1922 he lived as an émigré in Prague. He wrote many studies on the history and ethnography of Transcarpathia. Among his works published separately were studies, in Russian, of the ethnographic border of the Ruthenian (ie, Ukrainian) people in Austria-Hungary (1915), Magyar hegemony in Hungary and Hungarian Rus' (ie, Transcarpathia, 1915), monuments of 16th- and 17th-century Transcarpathian Ruthenian church life (1921), the issue of the Slovak-Ruthenian ethnographic border (1923), and Carpatho-Ruthenian place-names from the mid-19th to the early 20th century (1927). Many of his studies appeared or were reprinted in *Materialy dlia istorii Ugorskoï Rusi* (Materials on the History of Hungarian Rus', 9 vols, 1905–14, 1923, 1932), which he edited. Petrov also contributed to the *Naukovyi zbirnyk* of the Uzhhorod Prosvita Society, *Karpatorusskii sbornik*, *Česká revue*, and other Czech scholarly publications.

Petrov, Aleksei, b 28 October 1910 in Koshki, Samara gubernia, Russia, d 9 May 1972 in Kiev. Theoretical physicist; AN URSS (now ANU) full member from 1969. He graduated from Kazan University in 1937 and worked there in 1943–69. He became head of a section of the ANU Institute of Theoretical Physics in 1970. His research dealt primarily with the theory of gravitational fields and gravitational radiation.

Petrov, Artem, b 31 October 1779 in Khomutets, Hadiach county, Poltava region, d 15 October 1849 in Moscow. Veterinarian. One of the founders of veterinary education in the Russian Empire, he graduated from the Kievan Mohyla Academy (1799) and the St Petersburg Medico-Surgical Academy (1807) and taught at the veterinary school of the Moscow Medico-Surgical Academy (1809–42). His work was mostly with horses.

Petrov, Mykola (Nikolai), b 6 May 1840 in Voznesenskoe, Makarev county, Kostroma gubernia, Russia, d 20 June 1921 in Kiev. Literary scholar, historian, ethnographer, archeologist, and pedagogue; full member of the Historical Society of Nestor the Chronicler, the Ukrainian Scientific Society from 1907, the Shevchenko Scientific Society from 1911, and the VUAN from 1918; corresponding member of the Russian Academy of Sciences from 1916. He graduated from the Kiev Theological Academy (1865) and taught at the Volhynian Theological Seminary in Kremianets (1865–70) and at the Kiev Theological Academy (1870–1911), where he organized and directed its Church History and Archeological Museum from 1872 and became a full professor in 1876. He received doctorates in

Mykola (Nikolai) Petrov
(1840–1921)

theology (1875) and Russian language and literature (1907). Many of his articles appeared in *Trudy Kievskoi dukhovnoi akademii* and *Kievskaiia starina*.

Petrov was one of the first scholars in the Russian Empire to write about Ukrainian literature. His studies, which he wrote using the comparative-historical method, are valuable for the facts they provide. Some of his earliest works were six articles on literary scholarship and activity at the Kievan Mohyla Academy (1866–8). In his studies of 17th- and 18th-century Ukrainian literature (1880, 1911) he described and analyzed Ukrainian *school drama. In his pioneering book on the history of 19th-century Ukrainian literature (1884) he examined Ukrainian literature as a 'self-sufficient branch,' but emphasized the influence of Russian literature; his eclectic approach, which did not take into account Western Ukrainian literature, was critiqued by M. *Dashkevych. He also wrote articles on H. Skovoroda, H. Konysky, M. Dovhalevsky, O. Lobysevych, I. Kotliarevsky, V. Hohol-Yanovsky and N. Gogol, and Ukrainian polemical literature.

As a church historian Petrov wrote books on the Kievan Mohyla Academy in the second half of the 17th century (1895) and its importance in the development of religious schools in Russia in the 18th century (1904), and nine articles on the history of the Basilian order in Poland (1870–2). He wrote authoritative descriptions of the manuscript collections at the Kiev Theological Academy's museum (1875, 1877, 1879) and elsewhere in Kiev (1891, 1897, 1904) and compiled the collection *Akty i dokumenty, otnosiashchiesia k istorii Kievskoi akademii* (Acts and Documents Pertaining to the History of the Kievan Academy, 5 vols, 1904–7). His works in archeology, museum studies, and art include a book of essays on the history and topography of ancient Kiev (1897), a study of building construction in Chernihiv in the 11th and 12th centuries (1919), and an album of Kiev's temples and monuments (1896). His contributions to ethnography include articles on Ukrainian folkloric elements in N. Gogol's early works, Ukrainian historical songs and legends, the influence of Russian *byliny* on Ukrainian oral literature, Ukrainian folk celebrations, old Ukrainian theater and the *vertep*, and intermedes. His historical monographs on the Kholm region (1887), Volhynia (1888), Belarus and Lithuania (1890), Podilia (1891), and Bessarabia (1892) form a distinct group of works within his scholarship.

R. Senkus

Petrov, Mykola, b 1875 in Elets, Orel gubernia, Russia, d 9 April 1940 in Kiev. Photographer and photography scholar. After graduating from the Riga Polytechnical Institute (1900) he founded (1901) and presided over (1906–12) the Daguerre Society, one of the earliest photographic societies in the world. Petrov taught photography at the Kiev Polytechnical Institute (1905–20), the Kiev State Art Institute (1924–30), and the Kiev Institute of Cinematography (1930–40), and also chaired the photography department of the Kiev Institute of Forensic Medicine. His photographs were published in various Soviet magazines and were shown at international exhibitions. He made technical improvements in the printing process and wrote numerous works on photography.

Viktor Petrov

Petrov, Viktor (pseud: V. Domontovych, V. Ber), b 22 October 1894 in Katerynoslav (now Dnipropetrovske), d 8 June 1969 in Kiev. Writer, literary scholar, archeologist, and ethnographer; member of the Shevchenko Scientific Society. A graduate of Kiev University (1918), from 1920 he worked for the VUAN Ethnographic Commission. He became coeditor (with A. Loboda) of its *Etnohrafichnyi visnyk* (1925–9) and head of the commission (1927–33). During that time he also worked as a literary scholar and writer and was close to the *Neoclassicists. In 1941 he was briefly director of the AN URSR (now ANU) Institute of Ukrainian Folklore. In 1942–3 he edited the literary journal *Ukrains'kyi zasiv* in Kharkiv and Kirovohrad under German rule. In 1944 he fled to the West and became an associate of the Ukrainian Scientific Institute in Berlin (1944–5). As a refugee in postwar Munich he was a professor at the Ukrainian Free University and at the Theological Academy of the Ukrainian Autocephalous Orthodox Church and a member of the editorial boards of the literary and art monthly *Arka* and the MUR collections. In 1949 he 'reappeared' in the USSR and worked at the Institute of the History of Material Culture of the USSR Academy of Sciences in Moscow. From 1956 he was a senior associate of the ANU Institute of Archeology in Kiev and the custodian of its scientific archive.

Petrov wrote the biographical novel *Alina i Kostomarov* (Alina and [P.] Kostomarov, 1929) and, under the pen name V. Domontovych, the novels *Divchyna z vedmedykom* (Girl with a Teddy Bear, 1928), *Doktor Serafikus* (Doctor Seraficus, 1947), and *Bez gruntu* (Without Foundation, 1948). He also wrote stories, some of them under the pen name Viktor Ber. His literary works were republished in three volumes (1988–9). As a literary scholar he wrote books on

P. Kulish in the 1850s (1929) and Kulish's romances (1929), and articles on Kulish, T. Shevchenko, H. Skovoroda, and contemporary literature in VUAN serials and collections and the journal *Zhyttia i revoliutsiia*. As an émigré he published philosophical and critical articles in several periodicals and a brochure on the principal stages in the development of Shevchenko studies (1946). A pamphlet he wrote in the early 1940s on Ukrainian cultural figures destroyed by the Bolsheviks in 1920–40 was published in the West in 1959.

As an ethnographer Petrov wrote several dozen articles on such topics as the place of folklore in regional studies, the sun in Ukrainian folk beliefs, the legend of the origin of evil women, and the agrarian cult of fire, and entries on Slavic mythology in the Soviet Ukrainian encyclopedia. He also wrote a collection of articles on preclass society (1933). With Loboda he coedited a book of materials on the Dnieper boatmen (1929) and Ye. Markovsky's book on the Ukrainian *vertep* (1929). As an archeologist he was involved in excavations of late Trypilian and early Slavic settlements. He studied Scythian monuments and the Burial Fields culture of the Antes. He wrote books on the origin of the Ukrainian people (1947), the Scythians' language and ethnoses (1968), slash-and-burn tillage (1968), and the ethnogenesis of the Slavs (1972). He also wrote articles on the Trypilian, Zarubyntsi, and Cherniakhiv cultures, on the ancient Slavs, and on Scythian and ancient East Slavic names, hydronyms, and toponyms, and published V. Khvoika's diary of excavations at Zarubyntsi.

R. Senkus

Petrov, Yosyp, b 15 November 1807 in Yelysavethrad (now Kirovohrad), d 11 March 1878 in St Petersburg. Opera singer (bass). In the years 1830–78 he appeared at the St Petersburg Theater. With a remarkable acting proficiency as well as a singing range of almost four octaves, Petrov is known as the founder of the vocal school in Russia. He premiered the leading parts (usually created for him) in notable Russian operas: M. Glinka's *Ruslan and Liudmila* and *Ivan Susanin*, A. Dargomyzhsky's *Rusalka* and *The Stone Guest*, A. Rubinstein's *The Demon*, P. Tchaikovsky's *Vakula the Smith* and *Mazepa*, N. Rimsky-Korsakov's *The Maid of Pskov*, and M. Mussorgsky's *Boris Godunov*. Mussorgsky was composing the comic opera *The Fair at Sorochyntsi* with the intention of casting Petrov in a leading part, but left the opera unfinished when Petrov died. A biography, by Ye. Lostochkina, appeared in 1950 and another, by V. Stasov, in 1952.

Petrova, Yevheniia, b 6 January 1903 in Kiev, d 12 January 1989 in Kiev. Stage actress; wife of M. Krushelnytsky. She began her theatrical career in an amateur theater of Kievan railway workers (1919) and in the Kameniar Theater under V. Vasylyko (1922–3) and worked in Berezhil (1923–33), the Kharkiv Ukrainian Drama Theater (from 1935), and the Kiev Ukrainian Drama Theater (1952–9).

Petrove. v-14. A town smt (1986 pop 8,700) on the Inhulets River and a raion center in Kirovohrad oblast. The town was founded as a Cossack settlement at the end of the 17th century. In 1923 it became a raion center of Kryvvi Rih okruha, and in 1963 it attained smt status. A water reservoir was built there in 1956. The town has a food industry and an iron-ore mine nearby.

Petrovske. See Petrivske.

Petrovsky, Heorhii [Petrovs'kyj, Heorhij], b 7 December 1901 in Velyki Sorochyntsi, Myrhorod county, Poltava gubernia, d 15 August 1957 in Lviv. Pharmacologist and internal medicine specialist. A graduate of the Kharkiv Medical Institute (1926), he was a professor at the Dnipropetrovske (1932–41) and the Lviv (1945–57) medical institutes. He proposed a classification system of choleric drugs.

Hryhorii Petrovsky (portrait by Mykhailo Zhuk, 1928)

Mykola Petrovsky

Petrovsky, Hryhorii [Petrovs'kyi, Hryhorij], b 4 February 1878 in Kharkiv, d 9 January 1958 in Moscow. Soviet state official and Party leader. During the revolution he served as people's commissar of internal affairs of the RSFSR and then chaired the All-Ukrainian Central Executive Committee (1919–38) and the All-Ukrainian Committee of Poor Peasants (1920–33). He was a long-term member of the Politburo of the CP(B)U (1920–38). Petrovsky belonged to the Bolshevik majority that opposed the Ukrainian national-communist orientation represented by Yu. *Lapchynsky and O. *Shumsky, although in the 1920s he supported Ukrainization and defended Ukraine's economic, cultural, and political rights against growing centralization. After the purge of the Politburo of the CP(B)U he was removed from Ukraine (1938) and appointed deputy director of the USSR Museum of the Revolution in Moscow. In 1926 the city of Katerynoslav was renamed Dnipropetrovske in his honour.

Petrovsky, Mykola [Petrovs'kyj], b 26 November 1894 in Kudrivka, Sosnytsia county, Chernihiv gubernia, d 20 July 1951 in Kiev. Historian; AN URSR (now ANU) corresponding member from 1945. He studied at the Nizhen Historical-Philological Institute (1915–19). In 1924–33 he was a history professor at the Nizhen Institute of People's Education and edited its *Zapysky* (12 vols). From 1934 he chaired the department of Ukraine's history at Kiev University. He was also an associate of the ANU Institute of History from 1937, received a doctorate in 1939, and served as the institute's director in 1942–7. He was a member of the Ukrainian SSR delegations at the UN assemblies in San Francisco (1945) and London (1946) and at the Paris Peace Conference of 1946.

Petrovsky is the author of many works on 17th-century Ukrainian history. He wrote books about the Samovydet's Chronicle (1930) and the Cossack-Polish War of 1648–57 (1939) and articles about Yu. Dunin-Borkovsky (1927), S. Zorka's pseudo-diary (1928), the Ruin (1929), the Hetmanate's regimental system (1929), T. Tsiutsiura (1929), the last years of Hetman P. Doroshenko (1930), I. Bohun (1930), R. Rakushka (1931), and the state structure of 17th-century Ukraine (1931). He is also a coauthor of two ANU histories of Ukraine (1942, 1943) and a collection of articles on the Cossack-Polish War (1940), and he compiled a collection of documents and materials pertaining to the history of Kievan Rus' (1939, 1946) and Ukraine in 1569–1654 (1941, with V. Putilov). His articles of the 1940s have propagandistic rather than scholarly value.

Petrovsky, Oleksander [Petrovs'kyj], b 12 September 1908 in Katerynoslav, d 21 October 1983 in Kiev. Conductor and educator. In 1941 he graduated from the Moscow Conservatory and in 1951 completed his graduate studies at the Kiev Conservatory. He served as artistic director and conductor of the All-Union Radio Committee choir (1938–4), artistic director of the DUMKA kapelle (1944–6), chief choirmaster and conductor of the opera studio of the Kiev Conservatory (1947–57), and chief conductor of the Kiev Theater of Opera and Ballet (1952–4). He lectured at the Kiev Pedagogical Institute from 1956. His works include a monograph on the Bilshovyk Plant kapelle (1956) and several collections, among them *Khrestomatiia z khorovoho dyryhuvannia* (The Choir Conducting Anthology, 1973).

Petrovych, Liudmyla [Petrovyč, Ljudmyla] (real name: Kravchukivna-Smaleva, Vanda), b 5 November 1882 in Chernivtsi, Bukovyna, d 27 December 1971 in Borshchiv, Ternopil oblast, Galicia. Singer (mezzo-soprano); sister of F. *Lopatynska and wife of V. *Petrovych. She studied voice under V. Vysotsky and M. Kossak in Lviv and sang as a soloist with the Chernivtsi City Choir (1897–9), the opera group of the Ruska Besida Theater (1899–1914), and V. Kossak's troupe (1920–1). Her main roles were Nataalka in M. Lysenko's *Nataalka from Poltava* and Kulyna in his *The Black Sea Cossacks*, Oksana and Odarka in S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, Hanna in M. Arkas's *Kateryna*, Olga in P. Tchaikovsky's *Eugene Onegin*, Siebel in C. Gounod's *Faust*, and Carmen in G. Bizet's *Carmen*. After the Second World War she directed the Borshchiv People's Theater.

Petrovych, Vasyl [Petrovyč, Vasyl'] (real surname: Senyk), b 1 January 1880 in Ivankivtsi, Zhydachiv county, Galicia, d 31 October 1914 in Lviv. Actor and singer (tenor). He joined the Ruska Besida Theater in 1897. He played roles in melodramas, operas, and operettas from the Ukrainian and non-Ukrainian repertoire. Petrovych died prematurely following a nervous breakdown.

Petrowska, Christina [Petrovs'ka, Khrystyna] (married name: Brégent), b 30 December 1948 in Ottawa. Ukrainian-Canadian concert pianist, teacher, poet, and graphic artist. She studied at the Toronto Conservatory, graduated in 1969 from the Juilliard School of Music, continued her studies with K. Stockhausen and G. Ligeti in Europe, and subsequently obtained a PhD in musicology from the

Sorbonne. At present she teaches music at York University in Toronto. She has appeared throughout North America and Europe, including Ukraine, in solo recitals, as a soloist with orchestra, and on radio and television. Her main interest and forte is contemporary music, including that of A. Schönberg, P. Boulez, M. Brégent, M. Kouzan, and V. Sylvestrov. She has several recordings. Her graphic art has been exhibited in Canada, the United States, and France, and her poetry has appeared in several journals.

Petrowsky, Michael. See Petrivsky, Mykhailo.

Petruk, Roman, b 17 October 1940 in Rudnyky, Sniatyn county, Galicia. Ceramist and printmaker. After graduating from the Lviv Institute of Applied and Decorative Arts (1964) he worked in the monument workshop of the Lviv Art Manufacturing Complex. He does ceramic sculptures and household ceramics. He has produced several series of relief dishes, such as 'Work,' 'Assemblers,' and 'The Tree of Peace' (1968), and large decorative panels, such as *Amateur Art* for the foyer of the culture building of the sugar refinery in Dubno (1969). He has also done ink drawings; monotypes such as *Icarus*, *The Muse*, *The Last Supper*, and *Dobush's Death* (1968–70); and illustrations for an edition of V. Stefanyk's short stories (1971) and I. Kalynets's *Pidsumovuiuchy movchannia* (The Summing up of Silence, 1971), a proscribed collection of verses published in the West.

Roman Petruk: *The Kiss of Judas* (illustration to a poem by Ihor Kalynets)

Petrun, Fedir [Petrun'], b 1 March 1894 in Ustie, Kamianets-Podilskyi county, Podilia gubernia, d ? Historical geographer and bibliographer. In the 1920s he taught at the Odessa Institute of People's Education, headed a department at the Odessa Central Scientific Library, and was learned secretary of the Odessa branch of the All-Ukrainian Association of Oriental Studies. He is the author of articles in VUAN and other serials on the eastern boundary of the Grand Duchy of Lithuania in the 1630s (1928), Kachybei on old maps (1928), a map of roads in Ukraine in the first half of the 19th century (1928), ancient roads in the Odessa region (1929), and the pre-Odessa period of V. Hryhorovych's activity and its relation to Ukraine (1929). He was arrested during the Stalinist terror of the early 1930s, and most likely perished in a labor camp.

Petrunkevych [Petrunkevyč]. A family of Cossack *starshyna* and civic figures in the Chernihiv region. Stepan Petrunkevych was chancellor of Starodub regiment (1741–54) and acting general chancellor of the Hetman state (1750). Opanas (d 1766 in Sosnytsia) was acting captain of Sosnytsia company (1724) and a fellow of the banner (from 1740) in Chernihiv regiment. Opanas's descendant Illia was a lawyer and chairman of the Chernihiv Criminal Court from 1860. Illia's son Ivan (b 22 November 1843 in Plysky, Borzna county, Chernihiv gubernia, d 14 June 1928 in Prague) was a leading member of the zemstvo assembly in Chernihiv gubernia (1868–79) and a justice of the peace there. After administrative exile in Varnava, Smolensk, and Tver (1879–86) he was a zemstvo leader in Tver gubernia (1890–1905). He was a founding member of the Union of Liberation (1903) and its chairman (1905), a founding member of the *Constitutional Democratic (Kadet) party (1905) and chairman of its CC (1909–15), a member of the First Russian State Duma, and editor of the Kadet newspaper, *Rech'* (1908–17). From 1919 he lived as an émigré in Greece, France, the United States, Switzerland, and Czechoslovakia. His memoirs were published as vol 21 of *Arkhiv russkoi revoliutsii* (Berlin 1934). Ivan's brother, Mykhailo (Mikhail, b 1845 in Plysky, d 1912 in Yalta), was a doctor, a member of the First Duma, a civic activist, and an industrialist. Ivan's son, Alexander Petrunkevitch (b 22 December 1875 in Plysky, d 9 March 1964 in New Haven, Connecticut), was a zoology professor at Yale University (1910–44) and a renowned arachnologist who wrote numerous monographs.

Petrus Italus (Peter the Italian), b ? in Lugano, Switzerland, d ? Sixteenth-century builder. He built the Dormition Church (1547–59, destroyed in 1571) and a residential building (now on Virmenska St) in Lviv. His style is typical of the Italian Renaissance.

Petrusenko, Oksana (real surname: Borodavkina), b 18 February 1900 in Balakliia, Kupianske county, Kharkiv gubernia, d 15 July 1940 in Kiev. Opera and concert singer (lyric and dramatic soprano). A student of P. Saksahansky, from 1916 she appeared with traveling troupes of I. Sahatovsky, V. Krasenko, and Saksahansky, and subsequently (1927–33) sang in the opera theaters of Kazan, Samara, and Sverdlovsk. From 1934 she was a soloist of the Kiev Opera, with which she appeared as Gilda in G. Verdi's *Rigoletto*, Natasha in A. Dargomyzhsky's *Rusalka*, Koupava in N. Rimsky-Korsakov's *The Snow Maiden*,

Oksana Petrusenko

Rev Antin Petrushevych

Yaroslavna in A. Borodin's *Prince Igor*, Oksana and Odarka in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, and Natalka in M. Lysenko's *Natalka from Poltava*. She was also noted for her performances of Ukrainian folk song arrangements. Biographies of Petrusenko were written by Yu. Martych (1961), H. Filipenko (1964), and M. Kaharlytsky (1973).

Petrushevych, Antin (Antonii) [Petruševyč] (pseud: Antonii iz Dobrian, Halychany, A. Halytsky, Rusyn Halychany, A. Rusoliubovych, A. Totsamovych), b 18 January 1821 in Dobriany, Stryi circle, Galicia, d 23 September 1913 in Lviv. Galician church and cultural figure, politician, and scholar; son of S. *Petrushevych. He graduated from Lviv University and the Greek Catholic Theological Seminary in Lviv (1845). He was ordained in 1847 and was appointed chaplain and personal secretary to Cardinal M. Levytsky in Lviv. In 1848 he was a founding member of the *Supreme Ruthenian Council and the *Halytsko-Ruska Matytsia society, and he participated in the *Congress of Ruthenian Scholars. Under the tutelage of D. Zubrytsky Petrushevych became a Russophile sympathizer in the early 1850s. Thereafter he wrote in the artificial *yazychiie, which he deemed to be the proto-Rus' language. In 1857 he was elevated to the position of honorary canon of the metropolitan's chapter in Lviv, and from 1861 he served as canon of St George's Cathedral in Lviv and administrator of the metropolitan's chancery. From 1873 he was also custodian and librarian of the metropolitan chapter. As an elected member of the Galician Diet (1861–77) and the Austrian parliament (1873–8) he was a spokesman for the introduction of Ukrainian as an official language in Galicia's schools, courts, and administration.

Petrushevych was a pioneer of the Galician national revival. In an 1848 polemical brochure defending the Ruthenians and the use of their language in the schools and government, he argued that they were historically, culturally, and linguistically distinct from the Poles and Russians. He was the first to collect unstudied and unpublished sources for the history of the Western Ukrainian lands from the archives of Galicia, Bukovyna, Rumania, Vienna, and Prague, which he excerpted in his valuable Galician-Ruthenian chronicles for the years 1600–1700 (2 vols, 1874, 1891), 1700–72 (3 vols, 1887, 1896–

7), and 1772–1800 (1889). He published many historical documents and charters, including the 17th-century Lviv Chronicle (1868), the medieval Galician-Volhynian Chronicle (1871–2), and collections of official documents pertaining to the history of southern and western Rus' (1869, 1877) and the Lviv Dormition Brotherhood (1879). He wrote books on the medieval Galician bishops (1854), the history of Kholm eparchy (1867), the medieval St Panteleimon's Church near Halych (1881), the introduction of Christianity in the Carpathian lands (1882), the first printer in Ukraine, I. Fedorovych (1883), and the origins of Lviv and its environs (1893); a collection of linguistic history studies (1887); and articles on medieval and early modern Galician church and secular history and ethnography and on Slavic literature (eg, on translations of the Bible). He was one of the first scholars of Galician archeology; he wrote a book (1888) and articles about medieval Halych and other archeological studies (eg, on the Zbruch idol). He also compiled materials for a million-word comparative Slavic-Indo-European etymological dictionary; they were donated to the Russian Academy of Sciences and never published.

For his scholarly contributions Petrushevych was appointed a consistorial councillor by Cardinal Levytsky (1851) and elected a member of the Cracow Academy of Sciences (1874), the Bohemian Academy of Sciences and Arts, and the Odessa Society of History and Antiquities (1888); he was also granted honorary memberships in the Historical Society of Nestor the Chronicler (1881) in Kiev, the Rumanian (1890) and Russian (1904) academies of sciences, and the Moscow Archeological Society (1894). His large collection (15,000 items) of books, manuscripts, maps, documents, portraits, artworks, and archeological objects was deposited in the People's Home in Lviv (Petrushevych was one of its councillors from 1863), where it later became the Petrushevych Museum.

R. Senkus

Ivan Petrushevych

Petrushevych, Ivan [Petruševyč], b 29 April 1875 in Yezupil, Stanyslaviv county, Galicia, d 28 July 1950 in San Mateo, California. Co-operative leader. After studying the co-operative movement in England in 1905, he returned to organize Rochdale consumer co-operatives in Yezupil and other Galician towns. As secretary of Narodna Torhovia he prepared a plan to reorganize it into a union of

consumer co-operatives. He wrote articles on the theory and practice of co-operation for the weekly *Ekonomist* and on Ukrainian issues for the London journal *East European Review*. His translations of French, English, and American literary works appeared in *Literaturno-naukovyi vistnyk* or were published separately by the Ukrainian-Ruthenian Publishing Association. After emigrating to Canada in 1913 he organized the Ruthenian Farmers' Elevator Company and edited the paper *Kanadiis'kyi rusyn*. He was sent by Ukrainian Canadians to the Paris Peace Conference in 1918 and became a member of L. Botha's commission in 1919. Then he served in London as secretary of the delegation from the Government-in-exile of the Western Ukrainian National Republic (1920–3). In the mid-1920s he moved to California, where using the pseudonym Pedro Savidge he wrote film scripts for Hollywood and the novel *Flying Submarine*. In 1945 he was invited to act as adviser to the delegation of Ukrainian Canadians and Americans to the United Nations Conference in San Francisco.

Petrushevych, Lev [Petruševyč], b ca 1880, d 1940. Lawyer and political activist in Galicia; son of S. *Petrushevych. In November 1918, while working as an attorney in Berezhany, he was delegated to the Ukrainian National Rada of the Western Ukrainian National Republic (ZUNR). He then served in Kamianets-Podilskyyi as senior legal consultant to the UNR Ministry of Internal Affairs and in Vienna as chief of the presidium chancery of the ZUNR dictator. Upon returning to Galicia he practiced law and was legal adviser to the Dnister insurance company in Lviv.

Petrushevych, Mykhailo [Petruševyč, Myxajlo], b 1803 in Stryi circle, Galicia, d 1876. Greek Catholic priest and pomologist; son of S. and brother of A. *Petrushevych. He collected Galician vernacular plant names and worked on an etymological dictionary of the 'Ruthenian' language (Church Slavonic words with Greek, Latin, and German equivalents), of which only the first fascicle was published (80 pp, Kolomyia 1865).

Petrushevych, Stepan [Petruševyč], b 1772, d 1860. Priest, writer, and civic figure; father of A. and M. *Petrushevych. A school inspector in the Stryi district of Galicia, he collected fables, anecdotes, and folk sayings. Some of the sayings were published in a Polish newspaper (1857). He also wrote poetry and plays, such as *Muzh staryi, zhinka moloda* (Old Husband, Young Wife).

Petrushevych, Stepan [Petruševyč], b 1855, d 1920. Greek Catholic priest and political and economic organizer in Galicia; brother of Ye. *Petrushevych and father of L. *Petrushevych. A co-operative organizer in Radekhiv county, he was sent in 1918 as a delegate from the county to the Ukrainian National Rada of the Western Ukrainian National Republic. During the subsequent war for independence he served as field chaplain of the Ukrainian Galician Army. He died of typhus while in the field.

Petrushevych, Yevhen [Petruševyč, Jevhen], b 3 June 1863 in Buzke, Kaminka-Strumyl'ova county, Galicia, d 29 August 1940 in Berlin. Lawyer, political leader, and president of the Western Ukrainian National Republic (ZUNR). As a law student at Lviv University he was president of the Academic Brotherhood. While practicing law in Sokal

Yevhen Petrushevych

(1896–1910) and then in Skole, he organized and led various local societies. An executive member of the National Democratic party, he was elected to the Austrian parliament (1907, 1911) and to the Galician Diet (1910, 1913) and served as vice-chairman of the Ukrainian Parliamentary Representation in Vienna (1910–16) and the Ukrainian caucus in the Diet (1910–14). He rejected political compromises with the Austrian government and led a determined struggle in both assemblies for the rights of the Ukrainian people; in particular he played a key role in the Galician Diet's electoral reforms of 1913, which gave Ukrainians a greater voice in the Diet. After becoming vice-president of the General Ukrainian Council (1915) Petrushevych resigned from that body because of what he regarded as its naive trust in the Austrian government. At the end of 1916 he was elected chairman of the Ukrainian Parliamentary Representation in the Austrian parliament and was recognized as the leading Ukrainian politician of his day. With a number of other Slavic leaders he proposed transforming Austria-Hungary into a federation of national states, including a Ukrainian one composed of eastern Galicia, northern Bukovyna, and Transcarpathia.

While the emperor vacillated, Petrushevych summoned a Ukrainian constituent assembly to Lviv to decide the future of those territories. At its first session on 18 October 1918, the assembly named itself the *Ukrainian National Rada, chose Petrushevych as its president, and proclaimed an independent Ukrainian state. Petrushevych was re-elected president of the Rada on 3 January 1919 in Stanyslaviv and proved himself a capable leader and mediator. With the merging of the ZUNR with the UNR in January 1919, Petrushevych became the sixth member of the UNR Directory. By mid-1919 the National Rada and the State Secretariat had recognized that military and political setbacks made it impossible for them to govern, and on 9 June they transferred their powers to Petrushevych, whom they nominated as dictator (see *Dictatorship of the Western Province of the UNR). Under his regime the Chortkiv offensive was conducted, the Ukrainian Galician Army (UHA) crossed the Zbruch River, and the combined forces of the UNR Army and the UHA liberated Kiev. The divergencies between S. Petliura's and Petrushevych's governments in domestic and foreign policy increased during their stay in Kamianets-Podilskyyi and finally led to a break, in November 1919. Petrushevych left Ukraine to pursue the fight for independence abroad by diplomatic means.

On 25 July 1920 Petrushevych formed a government-in-exile in Vienna and lobbied for international recognition of Western Ukrainian statehood. Having gained a certain measure of support for his quest, he rejected Polish overtures for a degree of Ukrainian autonomy in exchange for recognition of their control over Galicia. His campaign collapsed after March 1923, however, when the Conference of Ambassadors recognized Galicia as part of the new Polish state. Petrushevych, then in Berlin, began to look for Soviet assistance in his aspirations. This tack also proved unfruitful, and support for him soon withered away.

I. Sokhotsky

Petryk, Petro (Ivanenko), b and d ? Cossack figure at the end of the 17th century, descended from a Cossack officer family in Poltava regiment. In 1691 he abandoned his post of senior scribe at Hetman I. Mazepa's General Military Chancellery and fled to the Zaporozhian Sich, where he was elected military chancellor. In 1692 he concluded a treaty with the Crimean Tatars against Muscovy and began a long struggle against the Cossack *starshyna* and Muscovite 'landlords.' With his 500 Zaporozhian followers and Tatar allies he tried to instigate popular revolts in Ukraine in 1692, 1693, 1694, and 1696. Having failed in those attempts he settled in Tatar territory between the Boh and the Dnieper rivers and served until 1712 as 'hetman' of so-called Khan Ukraine.

Petrykivka. v-15. A town smt (1986 pop 5,300) on the Chaplynka River in Tsarychanka raion, Dnipropetrovske oblast. In the mid-18th century a Cossack and peasant settlement sprang up around Petryk's homestead. It soon became known for its distinctive pattern of decorative *Petrykivka painting. In the late 1940s a painting school was set up. The town is also known for its embroidery, kilims, and fabrics.

Petrykivka painting. The name given to folk painting on the whitewashed walls of peasant houses. Petrykivka painting is now an independent decorative art form. Its name derives from the village of *Petrykivka, near Dnipropetrovske, which in the 19th century became the center of this type of painting and produced several of the better-known folk artists. The artists create stylized floral and plant motifs arranged in two basic types of compositions, *kvity* (flowers) of bouquets and *bihuntsi* (runners) of friezes. Originally these designs were used to decorate traditional stoves, the main wall of the house, and the frames of windows and doors. Chalk, local clays, soot, and paints produced from plants and bound with egg yolk, milk, or cherry glue were used to execute the decorations. As the demand for such decorations increased, village artists started producing *malovky*. Sold at local farm markets, these designs were painted on transparent or semitransparent paper that could be attached to walls. Eventually the decorations became independent pictures created on paper with tempera pigments. In 1936 a special art school was established in Petrykivka.

The four brush strokes traditional in the Petrykivka designs are: (1) *hrebinyk* (comb), which begins with pressure and ends in a wisp and is used for flowers, leaves, and grasses with rounded shapes; (2) *zerniatko* (seed), which begins with a light touch and ends with full pressure of the brush and is used for leaves with jagged edges;

Petrykivka painting: *Bird of Happiness, Bird of Life* by Uliana Sklia

(3) *horishok* (nut), a variant of *hrebinyk*, which is used to depict the flower pistils and buds; and (4) a transitional stroke in which the brush is dipped in several pigments, which is used for painting flower petals and leaves requiring tonal shading. Traditionally the painting is done with a cat's-hair brush directly on paper without any preliminary drawing.

Some of the better-known artists of the Petrykivka school of painting are T. *Pata, M. *Tymchenko, N. Bilokin, I. Pylypenko, H. Isaieva, V. Klymenko, V. and H. Pavlenko, V. Kucherenko, M. Shyshatska, F. Panko, P. Hlushchenko, N. Shulyk, and Z. Kudish.

D. Zelska-Darevych

Petryna, Dmytro, b 23 March 1934 in Torhanovychi, Sambir county, Galicia. Mathematician and theoretical physicist; corresponding member of the AN URSR (now ANU) since 1988. A graduate of Lviv University (1956), he has worked at the Institute of Theoretical Physics and the Institute of Mathematics of the ANU in Kiev, where he heads the section of mathematical methods in statistical mechanics. In 1979 he became a professor at Kiev University. Petryna is a specialist in contemporary mathematical physics, statistical mechanics, and quantum field theory. His scientific articles and three research monographs (some published jointly with other specialists) have made significant contributions to each of these areas.

Petrynenko, Diana, b 8 February 1930 in Bilousivka, Cherkasy okruha. Singer (lyric soprano). After graduating from (1955) and completing graduate studies at the Kiev Conservatory (1961), she began to lecture there (assistant

professor in 1981). She also sang as soloist with the DUMKA kapelle (1955–8) and the Kiev Philharmonic Orchestra (from 1962). Her repertoire includes works by Ukrainian composers such as L. Revutsky, A. Kos-Anatolsky, H. and P. Maiboroda, and O. Bilash; Ukrainian folk songs; and opera arias by Soviet and Western composers.

Petryshyn, Arcadia. See Olenska-Petryshyn, Arcadia.

Petryshyn, Ivan [Petryšyn] (pseud: Liubomyr Seliansky), 1850–1913. Elementary school teacher in Galicia, journalist, and writer. He edited the journal *Prapor* (Kolomyia 1908–12) and worked on the satirical and political magazines *Komar*, *Zerkalo* (Lviv), *Khlops'ka pravda*, and *Zoria* (Kolomyia) and the almanac-calendar *Zaporozhets*. He was the author of several works, among them *U 50-u richnytsiu znesennia panshchyny i vidrodzhennia Halyts'koï Rusy* (On the 50th Anniversary of the Repeal of Serfdom and the Rebirth of Galician Rus', 1898), *Hostynets' z Ameryky, abo nauka pro se, iak u sviti zhyty* (Gift from America, or a Lesson on How to Live in the World, 1906), and the historical stories 'Iasne sonychko Rusy-Ukrainy' (The Bright Sun of Rus'-Ukraine, 1911) and 'Orleans'ka divchyna' (The Maid of Orleans, 1912).

Petryshyn, Roman [Petryšyn], b 28 July 1946 in Neumarkt, Germany. Social activist and community figure. He was educated at Lakehead University in Thunder Bay, Ontario, the University of Birmingham, and the University of Bristol (PH D, 1981) and was active in the Ukrainian-Canadian students' movement of the late 1960s and early 1970s. He became a research associate of the Canadian Institute of Ukrainian Studies (1976–80) and then northern director of multicultural (cultural heritage) programming at Alberta Culture; he founded and since 1986 has directed the *Ukrainian Resource and Development Center at Grant MacEwan College in Edmonton. He has been a member and head of the *Ukrainian Community Development Committee, a strong supporter of Ukrainian Canadian Social Services, and editor of *Changing Realities: Social Trends among Ukrainian Canadians* (1980). He has made particularly valuable contributions in the development of the concept of multiculturalism in Canada and its incorporation into societal structures.

Petryshyn, Wolodymyr [Petryšyn, Volodymyr], b 22 January 1929 in Liashky Murovani, Lviv county, Galicia. Mathematician; full member of the Shevchenko Scientific

Wolodymyr Petryshyn

Society since 1980 and foreign member of the Academy of Sciences of Ukraine since March 1992. A postwar displaced person, he emigrated from Germany to the United States in 1950, completed his education at Columbia University (PH D, 1961), and taught at the University of Chicago (1964–7) and Rutgers University (since 1967). He has lectured in Europe (including Ukraine), China, and Israel.

Petryshyn's main achievements are in nonlinear functional analysis. His major results include the development of the theory of iterative and projective methods for the constructive solution of linear and nonlinear abstract and differential equations with K -positive operators; new fixed-point theorems for $P(\gamma)$ -compact and 1 -set-contractive maps, and the development with (P. Fitzpatrick) of topological degree and index theories for multivalued condensing maps. Petryshyn is a founder and principal developer of the theory of approximation-proper (A -proper) maps, a new class of maps which attracted considerable attention in the mathematical community. He has shown that the theory of A -proper type maps not only extends and unifies the classical theory of compact maps with some recent theories of condensing and monotone-accretive maps, but also provides a new approach to the constructive solution of nonlinear abstract and differential equations. The topological degree for A -proper maps was constructed with F. Browder and the index theory with Fitzpatrick. The theory has been applied to ordinary and partial differential equations. Petryshyn was the mathematics subject editor for the *Encyclopedia of Ukraine*. In 1989 he was elected honorary member of the newly revived Kiev Mathematics Society.

R. Andrushkiv

Anatol Petrytsky: Portrait of Mykhailo Semenko (watercolor, 1929)

Petrytsky, Anatol [Petryc'kyj, Anatol'], b 31 January 1895 in Kiev, d 6 March 1964 in Kiev. Ukrainian painter and stage designer. He studied at the Kiev Art School (1912–17) and the Advanced Artistic Theatrical Workshop in Moscow (1922–4) and worked as stage designer in the Molodyi Teatr (1916–19) and the Shevchenko First Theater of the Ukrainian Soviet Republic. In 1925–41 he continued to design in Ukrainian operatic and drama theaters in Kharkiv, Kiev, and Odessa. He also designed sets for performances in the Moscow Bolshoi and Malyyi theaters, in 1942–3 in the Opera Theater in Alma-Ata, and in 1945–59 (with interruptions) in the Kiev Theater of Opera and Ballet.

Petrytsky's early work, particularly his painting, was influenced by cubism and futurism. As a stage designer he was an adherent of theatrical conventionality and readily employed Ukrainian popular print and ornamentation. In *Vertep* he created stylized costumes for actors who appeared in the puppet show; in O. Vyshnia's *Vii* he united screens with stylized costumes. From 1930 he specialized mostly in design for opera and ballet (M. Lysenko's *Taras Bulba*, K. Dankevych's *Lileia* [The Lily], and M. Mussorgsky's *Sorochyntsi Fair*). Even under pressure to adhere to norms of socialist realism he preserved a national coloring in his theater and dance (State Dance Ensemble of the Ukrainian SSR) work. Petrytsky was also a renowned portraitist, painter, and graphic artist. Albums of his art works were published in Kiev in 1968 and 1991.

V. Revutsky

Petrytsky, Mykhailo [Petryc'kyj, Myxajlo], b 1865 in Kopychyntsi, Husiatyn county, Galicia, d February 1921 in Kharkiv. Civic activist, publisher, and teacher; brother of P. Petrytsky. A former teacher who had gone into business selling silverware, he published and edited the Lviv nationalist weekly *Haidamaky* (1902–7) and published a number of Ukrainian literary works. He organized the 1902 agrarian strike in his home county and helped found local branches of the Ukrainian Pedagogical Society and Silskyi Hospodar. A candidate of the National Democratic party, he was elected to the Austrian parliament in 1907 and 1911. In 1918 he served as deputy to the Ukrainian National Rada and then as propaganda officer in the Ukrainian Galician Army. In 1920 he remained in Soviet-occupied Ukraine, where he was arrested and tortured to death by the Bolsheviks.

Petsukh, Hryhorii [Pecux, Hryhorij], b 23 January 1923 in Florynka, Nowy Sącz county, Galicia. Ukrainian-Polish sculptor. A graduate of the Zakopane Lyceum of Plastic Techniques (1950) and the Warsaw Academy of Arts (1955), he has taught sculpting in Zakopane. His animal and human figures, such as *Mother with Child*, *Banduryst*, *Lemko*, *I. Franko*, *Orchard*, *Tree of Life*, and *Girl*, are done mostly in wood and are closely associated with Lemko traditions. His work has been exhibited not only in Poland but also in New York, Washington, Prague, Vienna, Budapest, and Stockholm.

Petty gentry. Members of the nobility (mainly in Western Ukraine) who had the legal rights of that estate but did not own serfs, and worked their relatively small landholdings by themselves. They tended to live in compact groups, in whole villages or parts of villages. The greatest

Hryhorii Petsukh: *Mother and Child* (wood sculpture)

number of such villages were in Subcarpathia (particularly Sambir and Skole counties), Podilia (Bar county), and central and eastern Polisia (the Ovruch and Liubech areas). The petty gentry became a distinct social class in Galicia in the 14th century; it consisted mainly of impoverished boyars, the retainers of princes, and the free peasantry of the Galician-Volhynian principality. The families of petty nobility often adopted the name of the village they resided in as their own (Bereziv-Berezovsky, Chaikovychi-Chaikivsky, Terlo-Terletsy, Krushelnytsia-Krushelnytsky, Hordynia-Hordynsky, Kulchytsi-Kulchytsky). The Polish coats of arms most often used were the Sas (an arrow above a crescent moon with stars at each end) and Korczak (three horizontal rivers of unequal length). The petty nobility participated in anti-Polish uprisings, particularly those led by Mukha and B. Khmelnytsky. Hetman P. Sahaidachny and a number of Greek Catholic leaders and educators came from that class. After the abolition of serfdom they lost their social privileges but still differed from former serfs in their everyday habits and specific traditions. In the 1920s and 1930s, attempts made to Polonize them were largely unsuccessful.

Ya. Isaievych

Pevny, Bohdan [Pevnyj], b 4 June 1931 in Lutske, Volhynia. Artist and art critic; son of P. *Pevny; full member of the Ukrainian Academy of Arts and Sciences in the US. A postwar émigré, he studied art at the Art Students' League, the National Academy of Design, New York University, and Columbia University in New York. He became head of the Society of Young Painters of New York in 1955 and vice-president of the Ukrainian Artists' Asso-

ciation in the USA in 1963. He has taken part in many group exhibitions, illustrated books and journals, contributed articles on art to the émigré press, and edited a book about M. Nedilko (1983). He became art editor of the monthly *Suchasnist'* in 1984. Since 1989 he has published articles on art in journals in Ukraine, such as *Dzvin*, *Pam'iatky Ukrainy*, and *Ukraina*.

Pevny, Petro [Pevnyj], b 18 August 1888 in Poltava, d 8 August 1957 in New York. Civic and political leader and journalist. He helped edit the daily *Vidrodzhennia* in Kiev (1918) and *Ukraina* in Kamianets-Podilskyi (1919). With the collapse of the UNR he emigrated to Poland, and in 1929 he moved to Volhynia. He was president of the Volhynian Ukrainian Alliance (1928–35) and editor of its weekly **Ukrains'ka nyva* in Warsaw and Lutske (1926–35). He was also president of the Ridna Khata society in Lutske. He was elected to the Polish Sejm as an Alliance candidate (1930, 1935) and pursued a policy of accommodation with the Poles. After the Second World War he fled to Germany and then emigrated to the United States.

Hryhorii Pezhansky

Heorhii Pfeiffer

Pezhansky, Hryhorii [Pežans'kyj, Hryhorij], b 1860 in Pchany, Zhydachy county, Galicia, d 16 January 1925 in Lviv. Architectural engineer and civic activist. A graduate of the Lviv and Vienna polytechnics, he worked as an engineer in the public service. He took part in the construction of many public buildings in Lviv, including the Trade School, pavilions for the 1894 Provincial Exhibition, the buildings of the university's physics and chemistry institutes and library, and the Women Teachers' Seminary. His works can also be seen in other Galician towns. A consultant on building projects for Ukrainian institutions, he was

a founder and president of the Ukrainian Technical Society as well as an executive member of the Dnister insurance company, the Shevchenko Scientific Society, the Ukrainian Pedagogical Society, the People's Home in Lviv, and the Stauropegon Institute.

Pezhansky, Mykhailo [Pežans'kyj, Myxajlo], b 29 September 1900 in Lviv, d 16 June 1987 in New York. Civil engineer and educator; son of H. Pezhansky; member of the Shevchenko Scientific Society (NTSh) from 1936. After graduating from the Vienna Technische Hochschule in 1927, he worked as a civil engineer in Lviv. After the Second World War he lectured in Munich at the United Nations Relief and Rehabilitation Administration University and then (1949) settled in the United States, where he worked as an engineer in a number of construction firms. He was a founder of the *Ukrainian Engineers' Society of America (TUIA) and the *Ukrainian Terminological Center of America and served on the terminological commissions of TUIA and NTSh. He was a member of the US executive and the chief executive of the *Plast Ukrainian Youth Association.

Pfeiffer, Heorhii [Pfejffer, Heorhij] (Georgii, Yurii), b 23 December 1872 in Sokiryntsi, Pryluka county, Poltava gubernia, d 10 October 1946 in Kiev. Mathematician; full member of the AN URSR (now ANU) from 1920. After graduating from Kiev University in 1896, he taught at the Kiev Polytechnical Institute (1899–1909) and at Kiev University (1900–46). He served as chairman of the VUAN Commission on Pure Mathematics (from 1920), research associate of the ANU Institute of Mathematics in Kiev (1934–41, 1944–6), and director of the (combined) Institute of Mathematics and Physics in Ufa (1941–4). Pfeiffer made significant contributions to the theory of partial differential equations (PDEs) and to the theory of Lie and Lagrange integrals. Among his many contributions is a general method for the formal integration of nonlinear equations and complete systems of nonlinear PDEs of the first order.

Pfister, Jan, b 1573 in Wrocław, Poland, d 1642 in Berezhany, Galicia. Polish sculptor of German origin. Ca 1611 he settled in Lviv and then in Berezhany. He took part in carving the decorative sculptures in the dome of the Boim Chapel in Lviv (1609–11) and engraved the side altar and the epitaphs of J. and J. Boim there. He also sculpted the burial monuments of Archbishop J. Zamoycki in the Roman Catholic cathedral (1610), J. Śwoszewski in the old Dominican church (ca 1614) in Lviv, the Ostrozycki family in the cathedral in Tarnów (1620), and A. Sieniawski in the castle chapel in Berezhany (after 1627).
