Preface to Volumes 3 to 5

These last three volumes of *Encyclopedia of Ukraine* are the culmination of a process that began in 1948 in Munich when the Shevchenko Scientific Society, the oldest Ukrainian learned association, directed its 'human and material resource ... toward preparing and publishing *Entsyklopediia Ukraïnoznavstva*.' In the preface to volume 1 of *Encyclopedia of Ukraine*, the late Volodymyr Kubijovyč outlined the historical process that began the transformation of the 10-volume *Entsyklopediia Ukraïnoznavstva* into a major English-language reference work on Ukraine. As editor in chief of volumes 1 and 2, Professor Kubijovyč anticipated that the completed *Encyclopedia of Ukraine* would be published in four consecutive volumes, appearing at intervals of two to three years. As is evident, that schedule proved unrealistic. Furthermore, a fifth volume was necessary to accommodate what was an almost overwhelming amount of information. It was deemed technically effective, moreover, to publish volumes 3–5 simultaneously. Simultaneous publication would have the additional advantage that a more thoroughly integrated reference work would be produced within a shorter time frame. In retrospect the decision was a prudent one because it allowed for at least some information about the rapid changes taking place in Ukraine after the collapse of the Soviet Union to be incorporated into all three remaining volumes.

Scholarly excellence, which guided the editors and staff of volumes 1 and 2, has remained a goal in the writing of the last three volumes. We feel confident that *Encyclopedia of Ukraine* fulfills the basic requirements of an encyclopedia in that it preserves the facts and presents information accurately and objectively. These requirements are particularly acute in the light of the inaccuracies, distortions, and gaps that have plagued scholarship concerning Ukraine both in Soviet-ruled Ukraine and throughout the world. The critical response to volumes 1 and 2 was encouraging, and it confirmed the need for such a reference work. Numerous positive, some even glowing, reviews appeared in both academic journals and local press. The first printing of 5,000 copies of volume 1 was sold out within three months, and orders came from around the world, including China, Japan, Europe, and Australia.

As might be expected, changes are inevitable over the course of a project with as long a history as that of the encyclopedia. The succession of a new editor in chief for volumes 3–5, following the death of Professor Kubijovyč in 1985, has resulted in the introduction of a new perspective to the encyclopedia. A number of things, however, have remained unchanged. Three styles of transliteration continue to be used; a bibliography continues to be included at the end of longer articles, with the simple aim of directing the reader looking for more in-depth analysis and greater detail to other sources; and articles continue to be written in a manner that addresses the needs of an English-speaking Western audience. In addition, every attempt has been made to maintain, if not improve upon, the features, scope, and quality of the first two volumes.

Since the publication of volume 2 in 1988, monumental changes have taken place in Ukraine. In its transition from a republic within the USSR to an independent sovereign state, Ukraine has undergone many economic, political, social, and cultural transformations. For the editorial staff of the encyclopedia it became of prime importance to keep abreast of the rapidly changing situation and to provide the most up-to-date and accurate information possible. Given that almost 90 percent of volumes 3–5 had been written and given final approval by the editorial board by early 1992, not all additions and revisions received after that date could be incorporated if the publication date was to be met. In some instances, even the revision may now appear to be outdated. Notable changes have been made in terminology and geographical names. For example, the Ukrainian-language acronym AN URSS used throughout volumes 1 and 2 for the

Academy of Sciences of the Ukrainian SSR has been changed whenever possible to ANU to reflect the renaming of that institution as the Academy of Sciences of Ukraine (Akademiia nauk Ukrainy). After the first appearance of AN URSSR in an entry, 'now ANU' has been inserted in parentheses, and ANU has been used thereafter regardless of the date to which reference is being made. 'The Ukrainian SSR' has been replaced by 'Ukraine,' except in specific cases where a distinction between Soviet-occupied Ukraine and Western Ukraine prior to and during the Second World War is intended. 'Belorussia' or 'the Belorussian SSR' has been changed in almost every instance to 'Belarus.' 'Moldavia' has been changed to 'Moldova,' however, only in post-1991 references. 'Russia' is used instead of 'the RSFSR' to refer to post-Soviet Russia, and the acronym RF is used to refer to the non-ethnic Russian or mixed-ethnic parts of the current Russian Federation. The acronym SSR has been dropped for all other former republics of the dissolved Soviet Union. With independence, the pre-Soviet names of some Ukrainian towns and cities have been restored (notably Luhanske and Mariiupil), and the encyclopedia reflects the changes in toponymy.

From the outset the initiators of *Encyclopedia of Ukraine* realized not only that technically the project would be a major undertaking, but that financially it would require millions of dollars. The Canadian Institute of Ukrainian Studies at the University of Alberta committed one-third of its yearly budget to the encyclopedia through the entire project. Other funding was provided by the Canadian Foundation for Ukrainian Studies, which focused its activities on fund-raising campaigns in support of the encyclopedia throughout the Ukrainian communities in Canada and the United States. There was support for the project outside of the Ukrainian community as well. All of Canada contributed, through a federal grant, toward the publication of volume 4, and the provinces of Saskatchewan, Manitoba, and British Columbia generously subsidized the publication of volumes 2, 3, and 5 respectively.

To say the least, the task was monumental. It never would have been completed without the strong commitment of a very dedicated team. For many, their involvement was a labor of love prompted by a strong belief in the encyclopedia. Special thanks and recognition are due not only to the subject editors, who fulfilled their responsibilities diligently and eagerly in exchange for a token honorarium, but also to the in-house staff, who often worked beyond the call of duty. We greatly appreciate the unremunerated dedication and assistance of Stefania Kucharyshyn in drawing many of the maps and co-ordinating the preparation of all the maps for the last three volumes. The scholarly quality of the encyclopedia is, to a great extent, attributable to the dedication, knowledge, and exactitude of the editorial board, and the appearance of the encyclopedia on schedule is a result of the unwavering support of the Canadian Institute of Ukrainian Studies and the consistent efforts of the successive executives and board members of the Canadian Foundation for Ukrainian Studies, who donated time and money to help us complete the five-volume set.

To ensure the validity, viability, and utility of *Encyclopedia of Ukraine* for many years to come, plans have been made for triennial updates. As a first step in improving the encyclopedia's usefulness, a comprehensive name index will be prepared and published in a separate volume within two years. We genuinely believe that the initial goals established for the encyclopedia by V. Kubijovyč have been upheld, and that *Encyclopedia of Ukraine* will be of value to all those interested in Ukraine, its people, and their descendants.

Danylo Husar Struk

L

Rev Vasyl Laba

Labá, Vasyl (Basil), b 1 September 1887 in Berteshiv, Bibrka county, Galicia, d 10 November 1976 in Edmonton. Priest and theologian; full member of the Shevchenko Scientific Society from 1947. After being educated at the universities of Lviv, Innsbruck, Fribourg, and Vienna (D TH, 1914), Laba was ordained in 1912 and served as field chaplain in the Austrian army (1914–18), chief chaplain in the Ukrainian Galician Army, and acting vicar-general of the Ukrainian Catholic archeparchy of Lviv in Kamianets-Podilskyi (1919–20). In the interwar period he taught at a gymnasium in Lviv and at the Greek Catholic Theological Seminary (from 1926) and the Greek Catholic Theological Academy (from 1930). He wrote a monograph on biblical hermeneutics (1928) and a three-volume survey of patristics (1930–2). During the Second World War he was chief chaplain in the *Division Galizien. As a postwar refugee he was the first rector of the Ukrainian Catholic seminaries in Hischberg, Germany (1945–8), and Kulemborg, Holland (1948–50). In Canada after 1950, Laba served as vicar-general of the Ukrainian Catholic eparchy of Edmonton; he was also prorector and professor at the Ukrainian Catholic University in Rome (1963–76).

Labá River. A left-bank tributary of the Kuban River. It is 214 km in length and drains a basin area of 12,500 sq km. The Laba begins at the confluence of the Velyka Laba (130 km in length) and the Mala Laba rivers, which arise from glaciers in the northern Caucasus. The Laba passes through a deep valley and then flows through Subcaucasia and the Kuban Lowland steppe. Floodplains are found at its mouth. The Laba is a potential source of hydroelectric power.

Labai, Yosafat [Labaj, Josafat], b 3 June 1895 in Yazenytsia, Kaminka-Strumylova county, Galicia, d 11 July 1962 in Argentina. Religious and educational figure. In 1912 he entered the Basilian St Nicholas's Monastery in Krekhiv. He was ordained in 1925 and served as the superior of St Onuphrius's Monastery in Dobromyl, the rector of St Josaphat's Ukrainian Pontifical College in Rome (1935–

55), and a missionary in Montevideo (1955–6) and Buenos Aires (from 1956).

Labor Alliance of Ukrainian Students (Obiednannia pratsi ukrainskykh studentiv). An umbrella body of Ukrainian student groups in Lviv which was active from June 1942 until the summer of 1944. The alliance united Ukrainian student groups organized at local faculties and institutions of higher education; the groups included 471 students in medicine, 402 in technical sciences, 212 in agronomy, 119 in veterinary sciences, 104 in pharmacology, 80 in forestry, the Ukrainian students' sports club (450), and the student banduryst choir (46). The alliance was led by B. *Lonchyna, and published the monthly **Students'kyi prapor*.

Labor alliances (Obiednannia pratsi; German: Arbeitsgemeinschaften). Professional and special interest organizations which operated in the Generalgouvernement in 1941–4 under the auspices of the *Ukrainian Central Committee (UTsK). These groups had their origins in the various branches (or 'sections') that were created under the umbrella of the UTsK to allow for the continuity of activity by Ukrainian associations that had been closed by the Nazi regime. They functioned largely with a nominal connection to the UTsK until May 1941, when they were linked directly to the appropriate departments of the UTsK (mainly the economics, cultural work, and social welfare sections), and their activities were directed by 'men of trust' appointed by the president of the UTsK.

The first and largest alliance was the *Ukrainian Teachers' Labor Alliance, with a membership of over 8,000. The second-largest association was the Labor Alliance of the Medical-Sanitation Service, headed by R. Osinchuk. It was subdivided into four groups, physicians, veterinarians, pharmacists, and nurses, and oversaw the work of the Abstiners' Alliance, headed by M. Nykyforchyn. Various student societies were represented by the *Labor Alliance of Ukrainian Students. Artists and writers had their own alliances: the Labor Association of Ukrainian Pictorial Artists was headed by I. Ivanets, the Labor Alliance of Writers, by H. Luzhnytsky, the Labor Alliance of Musicians, by S. Liudkevych, the Labor Alliance of Journalists, by O. Bodnarovych, and the Labor Alliance of Theater Artists, by V. Blavatsky. The Labor Alliance of Tradesmen was formed from the *Zoria trade association and headed by N. Kushyk. Labor alliances of scientists, jurists, engineers and technicians, businessmen, industrialists, workers, office workers, clergy, and home owners had a smaller membership.

K. Pankivsky

Labor armies. Units of the Red Army that were used partly in rebuilding industry in Soviet Russia and Ukraine during 1920–1. In January 1920 the Third All-Russian

LABOR CAMPS IN THE FORMER USSR

Congress of Soviets of the National Economy called for the militarization of workers through the army recruiting machinery and the transfer of labor. On 15 January 1920 the Soviet Third Army in the Urals was transformed into a labor army and was put to work in the civilian economy. On 21 January 1920 the Supreme Council of People's Commissars of the RSFSR and the All-Ukrainian Revolutionary Committee decided to form the Ukrainian Labor Armies out of troops on the southwestern front. Since fighting continued in Ukraine during the 1920s, the labor army was limited to Kharkiv and the Donbas. In Kharkiv the Communist party objected strongly to the use of army labor and called on the trade unions to provide the labor. Its position received the majority of votes at the Fourth Congress of the CP(B)U on 16 March 1920. Nonetheless, the Donbas coal mines were brought under military control on 14 April 1920. In January 1921 the Ukrainian Labor Army numbered only 31,000 workers, compared to over two million in Russia. It was dissolved in March 1921 at the 10th Congress of the Russian Communist Party (Bolshevik). With the introduction of the NEP the Council of Labor and Defense of the RSFSR dissolved all labor armies, on 30 December 1921.

Labor Association of Ukrainian Pictorial Artists (Spilka pratsi ukrainskykh obrazotvorchykh mysttsiv). An artists' organization established in 1941 in German-occupied Lviv under the aegis of the Ukrainian Central Committee. In 1942 its membership was about 100. Under its presidents, M. Osinchuk and I. Ivanets (1942-4), it organized public discussions and an exhibition of 48 artists (December 1941), a retrospective exhibition of the works of I. Trush, O. Novakivsky, P. Kholodny, Sr, and P. Kovzhun (June 1942), an exhibition of works by 69 artists on the 25th anniversary of the Kiev Academy of Arts (January 1943), a retrospective exhibition of the works of O. Kulchytska (May 1943), and an exhibition of 99 artists (December 1943). The association ceased its activities in 1944.

Labor camps (aka corrective-labor camps). The principal type of punitive institution in the former Soviet Union. There were five classes of labor camps (in order of increasing severity): exile colony, ordinary-regime camp, intensified-regime camp, strict-regime camp, and special-regime camp. Exile colonies were for prisoners who were deemed to be 'solidly on the path to reform.' Ordinary-regime camps held prisoners (male or female) serving sentences of less than three years for other than very serious crimes or serving the initial portion (not more than three years) of longer composite sentences for major offenses. Intensified-regime camps were for men sentenced to more than three years for serious offenses. Women and men convicted of serious state crimes (usually for political dissent) and 'especially dangerous recidivists' were incarcerated in strict-regime camps. The special-regime camps were for men with commuted death sentences and 'especially dangerous recidivists.' Prison officials had the power to change a prisoner's category depending on his or her behavior. A particularly uncooperative prisoner could be moved from a camp to a prison, where conditions were even harsher. Apart from the lack of freedom, the most punitive feature of labor camps was their semistarvation diet. Working men in the strict-regime camps should con-

sume 3,100 to 3,900 calories per day, and women, 2,400 to 2,700 calories, according to the World Health Organization (WHO). Their actual diet contained 2,100 calories and could be reduced to 1,300 calories on disciplinary grounds. Carbohydrate-to-protein ratios far exceeded maximums set by the WHO, and the quality of food was very poor: there were no fresh fruits or vegetables, fish (the main protein) was sometimes rotten, and food was often infested with maggots and cockroaches.

Honest labor, according to official theory, was an integral part of the prisoner's re-education. But the more evident purpose of camp labor was economic and punitive. The economic output of labor camps was large enough to figure as a separate factor in Soviet planning. But the punitive purpose of prison labor was the chief reason for the presence of police organs. The labor was strenuous, fatiguing, and often dangerous. Workplaces were under-ventilated and underheated in the winter. Clothing for outdoor workers was inadequate. Machinery was old and in ill repair. Failure to meet high production quotas was punished with lower food rations and the loss of correspondence or visiting rights. Injuries were common, particularly in three uranium-mining camps in Ukraine, where few prisoners survived their sentences. Poor diet and hard work often resulted in illness. Medical treatment in the labor camps was poor and often withheld altogether. Prisoners have also been known to have refused operations, because of the ineptness of the medical staff. Besides material hardships prisoners endured various restrictions of their rights, including censorship and mail limitations (they could send from one to three letters a month, depending on the type of camp). In some camps all prisoners were shaved bald on admission. In some

prisons, particularly in the RSFSR, only Russian could be used.

Over a hundred labor camps in the Ukrainian SSR were known in the West (see table). A number of them were designed for amputees and seriously ill prisoners, and 12 of them were for 14-to-18-year-olds. Political prisoners were sent usually to labor camps outside Ukraine. The prison population of the USSR was a state secret. According to Amnesty International estimates based on semiofficial sources, there were at least one million prisoners in the USSR in the 1970s, of whom more than 10,000 were political prisoners. Approx 40 percent of all political prisoners in the USSR were Ukrainians.

The principal legislation governing Ukrainian labor camps was the *Criminal Code of the Ukrainian SSR (1961), the *Corrective-Labor Code of the Ukrainian SSR (1971), which was based on the foundations of the Corrective-Labor Legislation of the USSR and the Union Republics (1969), and the Rules of Internal Order for Corrective-Labor Institutions, which gave prison administrators wide discretionary powers. Because the central procuracy was ineffective in monitoring the camps, the codes afforded the inmates hardly any protection from arbitrary and cruel treatment by the staff. (See also *Concentration camps, *Forced labor, and *Penitentiary system.)

Labor Congress (Trudovyi kongres, aka Kongres trudovoho narodu Ukrainy [Congress of the Working People of Ukraine]). An all-Ukrainian legislative assembly convened by the *Directory of the UNR in Kiev on 22 January 1919. To counteract more effectively the Bolshevik influence in the cities, the Directory and the representatives of Ukrainian political parties decided at their meeting in Vinnytsia at the beginning of 1918 to base their political support on the so-called labor principle. According to that principle political power in the counties and the gubernias was to belong to councils of workers, peasants, and the working intelligentsia, excluding landowners and capitalists, and the central government was to rest on a labor congress. Instructions on the election to the Congress of the Working People of Ukraine, issued on 26 December 1918, provided for 593 deputies, 528 of them from the UNR and 65 from the Western Ukrainian National Republic (ZUNR). Because the Directory did not control all Ukrainian territory, the elections could not be conducted throughout Ukraine. The first and only session of the Labor Congress lasted from 22 January to 28 January 1919; it was held in the Kiev Opera House. Almost 400 delegates, including a 36-member delegation from the Ukrainian National Rada (of the ZUNR) and representatives of the Polish, Russian, and Jewish minorities, attended the session. After failing to agree on a chairman of the presidium the congress elected three vice-chairmen – S. Vityk (a member of the Ukrainian Social Democratic party in Galicia), D. Odryna (a Ukrainian Socialist Revolutionary from the Peasant Association), and T. Starukh (from a block of Galician parties) – and five secretaries – S. Bachynsky (a Ukrainian Socialist Revolutionary from the Peasant Association), V.

Zlotchansky (from the Ukrainian Social Democratic Workers' party), I. Bisk (from the Russian Social Democratic Workers' party), L. Havryliuk (from the Russian Party of Socialist Revolutionaries), and M. Vorony (from the Ukrainian Social Democratic Workers' party [Independentists]). On the evening of 22 January the congress ratified the union of the UNR and ZUNR that had been proclaimed earlier in the day. On the last day of its session it approved the policies of the Directory and transferred its powers to the Directory until the next session. It also set up six parliamentary commissions – defense, agrarian affairs, budget, foreign affairs, food supply, and culture and education – but in the circumstances those could not perform their duties. Finally, the congress adopted the principle of universal suffrage for future parliamentary and local elections. Military setbacks forced the Labor Congress to end its session prematurely.

A. Zhukovskyy

Labor law. The body of laws that regulate matters such as terms of employment, wages, vacations and leave, conditions of work, labor organizations, collective bargaining, labor conflicts, and social security.

With the rapid development of industry in the 19th century, labor relations came to be governed by civil law. Labor was viewed as a commodity, sold by the worker to an employer for a certain remuneration. The employer's stronger position allowed him to exploit workers. In Western and Central Europe, including the Austro-Hungarian Empire, trade unions were recognized as legal representatives of workers only at the end of the 19th century. In the Russian Empire the trade-union movement grew very slowly and became a target of political repression after the Revolution of 1905. (For pre-Soviet labor law in the Russian Empire, see *Factory legislation.)

After the First World War, the belief that labor is not a commodity but a social asset, and hence should not be subject to civil law, became widespread. From that time, the slow disengagement of labor law from civil law began. In the 1920s, the 8-hour workday was introduced in Czechoslovakia, Rumania, and Poland. Government institutions such as the Labor Inspectorate under the Ministry of Labor and Social Security in Poland were established to regulate working conditions. Laws were passed in Poland to protect women and minors in the work force (1924), to guarantee vacations and holidays (1922), and to regulate collective labor agreements. In 1928 the Polish government set up labor courts with representatives from industry and workers. Laws on *social security were introduced. None of these measures had much of an effect in the Ukrainian territories under Poland, Czechoslovakia, or Rumania, since industry was poorly developed in those regions and only a few Ukrainians worked in industrial or commercial enterprises. Moreover, the mass of agricultural workers lacked any form of work protection.

In the USSR a different system of labor relations and labor law emerged. The state became the sole owner of the means of production, and relations between workers and

a private entrepreneur were replaced by relations between workers and the state, which was represented by the Party bureaucracy. According to Soviet ideology, state ownership was synonymous with national ownership, and every citizen was a co-owner of state property. Work in the socialist economy was the constitutional obligation of every able-bodied citizen. Anyone who refused to work and lived off an illegal income was a 'parasite' and subject to prosecution. The obligation to work was tied to the right to work, ie, to the right to a job commensurate with one's specialization and qualifications, and to an appropriate wage. Labor law was the body of norms that regulated the social relations of workers at their enterprises, organizations, and institutions.

In 1922 the Labor Code of the Ukrainian SSR, almost a literal translation of the RSFSR code, was introduced. This code covered only the general features of labor relations; the details were settled by various instructions of individual ministries. The new labor code, based on the Legislative Foundations of the USSR and Union Republics on Labor (1971), was passed in 1972. The code regulated labor relations of all manual and office workers, first 'to promote the growth of labor productivity, to increase the effectiveness of social production and to improve the material and cultural living standards of the workers, to strengthen labor discipline' (art 1, par 1). To regulate conditions of work and protect the rights of manual and office workers was only its second purpose. Every worker was required to maintain labor discipline, which was defined by the Rules of Internal Labor Order (latest edn, 1983).

The right of individuals to join trade unions was guaranteed in the constitutions of the Ukrainian SSR (art 106) and the USSR (art 126). The Party played the leading role in trade unions. The relationship between the state, which, too, was controlled by the Party, and the trade unions was characterized as 'socialist co-operation.'

Collective agreements in the USSR had little in common with agreements between companies and trade unions in a free-market system. Under Soviet labor law, a collective agreement was established between a trade-union committee that represents the workers and the management of an enterprise (art 11 of the Labor Code). It set forth the responsibilities of the workers and management in fulfilling the production plans, improving the technology, and organizing production, payment of bonuses, and the training of cadres. Since wages, hours of work, holidays, and other basic issues were settled by legislation, not by collective bargaining, they were not an essential part of the agreement. The form and content of collective agreements were regulated by separate instructions.

In principle, workers were free to choose their place of work. In accepting a job, the worker became a member of the enterprise collective; he automatically received the rights and assumed the responsibilities of the collective. The worker had the right to break the contract by providing two weeks' notice. He could be dismissed from work for reasons set forth in the law and with the formal consent of the trade-union committee at the enterprise. Because, officially, there was no unemployment in the USSR, there was no assistance for unemployed workers. A worker who quit or was dismissed received two weeks' severance pay (art 44 of the Labor Code).

The regulation of work was based on various normative documents. These regulations could apply to only

some or to all branches of the economy. By jurisdiction they could be all-Union, republican, or local. All these issues were addressed in the Statute on the Method for Developing Normative Documents for Regulating Labor, adopted in 1968 by the USSR State Committee of Labor and the Presidium of the All-Union Soviet of Trade Unions.

Wages depended largely on the fulfillment of production quotas. In the planned economy of the USSR, they were set centrally for the entire Union. Wages were also influenced by locality: in the Asiatic part of the Union or in the north, wages were higher than in Ukraine. Workers had no say in deciding the wage scales. Bonuses, which were awarded for fulfilling and overfulfilling production plans, were regulated by separate decrees. Workers' wages were treated separately from the wages of engineering and technical personnel. The remuneration of higher functionaries, particularly the privileged class (the so-called *nomenklatura* workers), was much higher than that of ordinary workers; their bonuses were also more substantial.

Conflicts between workers and management arising from the implementation of labor law (eg, regarding dismissals) were settled by (1) special commissions set up at enterprises or organizations and consisting of an equal number of trade union and management representatives, (2) trade union committees, and (3) people's courts. Disputes involving higher management were settled in higher-level courts. Disputes over labor quotas and wage rates were ruled out: these questions were the exclusive responsibility of the central organs. Strikes were seen as criminal acts.

Labor legislation for manual and office workers did not apply to collective farmers, who were considered to be co-owners of their farm. Neither the courts nor the procuracy had the right to interfere in internal labor relations on collective farms. Until the mid-1960s collective farmers were paid according to the *workday system.

Labor productivity. The relation of output to the labor necessary for its production. In the former USSR labor productivity was defined as the national income produced (NIP) at constant prices per average annual worker in material production. In industry labor productivity was the gross output per average industrial worker; in agriculture, the gross output of the socialized sector (collective and state farms and enterprises) per agricultural worker (the output of private plots was ignored); in transportation, the output (in ton-kilometers) per worker. Other production inputs, such as capital and land, were not taken into account. Since Soviet growth rates for national income and industrial production were measured differently than in the West (resulting in rates almost double those arrived at by Western methods), the growth rates of labor productivity were correspondingly higher, except in agriculture and transportation, where they can be compared with Western productivity growth rates virtually without adjustment.

Food	100	116	135

Until recently labor productivity was greatly emphasized in Soviet statistics, and Party programs called for surpassing the productivity of capitalist countries. In the 1980s Soviet labor productivity fell as NIP and industrial and agricultural output declined. According to official (optimistic) comparisons between the USSR (no such measurements were made for the Ukrainian SSR) and the United States, in the mid-1980s labor productivity in Soviet industry was 55 percent of that in American industry (in 1970 it was 53 percent, and in 1960, 44 percent). Since 1988-9 such comparisons have not been made.

The official growth rates of labor productivity in various branches of Ukraine's economy are given in the tables.

Labor reserve schools (*shkoly trudovoykh rezerviv*). Vocational training schools below the level of *tekhnikum which were subordinated to a highly centralized institution, the State Labor Reserves of the USSR. The State Labor Reserves was established as an all-Union institution by a decree of the Presidium of the Supreme Soviet on 2 October 1940 and had the task of increasing the number of

semiskilled workers for agriculture and industry. Labor reserve schools were filled by means of drafts of young men and women between the ages of 14 and 17. Every collective farm was obliged to send 2 youths per 100 adult members to these schools each year. In urban communities all secondary-school pupils of the appropriate age whose marks were below 'good' were subject to the draft. Training in labor reserve schools lasted from one-half to two years, depending on the type of school. Initially, three types of labor reserve schools were established, trade schools, railway schools, and factory-industrial schools. The student draftees were assigned to schools and state-funded residences scattered throughout the USSR (mainly in the Urals and Siberia). They received a narrow trade education of poor quality. There were 1,500 labor reserve schools established in 1940, with 800,000 drafted youths; 316 schools (with 130,000 draftees) were in Ukraine. During 1945-68, 15,380,000 pupils completed programs at labor reserve schools in the USSR; 27 percent of them were from Ukraine. Upon graduation students were obliged to work in places assigned by the Ministry of Labor Reserves in Moscow. The compulsory aspects of labor reserve schools lasted until 1950. In March 1955 the draft was abolished, and after July 1959 the 624 schools in existence were transformed into urban and rural *vocational-technical schools.

L. Szuch

Labor resources. The part of a country's population possessing the physical and mental ability and knowledge to work. A country's labor resources determine its potential work force.

The labor resources of Ukraine and the USSR as a whole consisted formally of men aged 16 to 59 and women aged 16 to 54, except for the handicapped and for early pensioners, such as officers of the armed forces and the KGB, miners, and chemical workers. Labor resources do not coincide with the actual work force, because (1) most young people are still secondary or postsecondary students, (2) many young and middle-aged women are at home managing households and raising children, (3) in agriculture the working age is much longer, from age 10 to 12 to advanced old age (this was true especially in the first half of the 20th century), and (4) many men and women continue working after having reached the age of retirement (60 and 55 respectively).

Only recently have economists begun to take a special interest in labor resources; therefore, no data exist for the 19th and early 20th centuries. But it is known that approx 60 percent of the rural population in the nine Ukrainian gubernias of the Russian Empire was 12 to 60 years old. That group can be viewed as constituting the labor resources of the period; the number of those over 60 who were still working was compensated for by that of the disabled in the younger age-groups. There were 5.3 million males and females aged 12 to 60 in the Ukrainian gubernias in 1811, 6.9 million in 1851, and 15 million at the beginning of the 20th century. The labor resources of the period in the contemporary sense of the term (men aged 16 to 59 and women aged 16 to 54) consisted of approx 49 percent of the population. Intensive emigration in 1891-1914 from the gubernias to Siberia and Turkestan (approx 1.6 million people, mostly peasants) and the United States (1 million people, mostly Jews) and the large population losses that

occurred during the First World War were reflected in a sharp decline in labor resources. By the February Revolution of 1917 the number of males and females aged 12 to 60 was 19 million (four times what it was a century earlier), and the labor resources by contemporary standards amounted to only 15.5 million. Large population losses also occurred during the struggle for Ukrainian independence (1917–20). Consequently, the 1926 Soviet census indicated that there were 15 million men and women aged 16 to 59 and 16 to 54 respectively in Soviet Ukraine, that is, fewer than before the 1917 Revolution. Border changes also played some role in the decline.

The forced *collectivization of agriculture and the ensuing repression of the so-called *kulaks, the man-made *famine of 1932–3, and the *terror resulted in massive population losses in all age-groups. The growth of Soviet Ukraine's labor resources was thus slowed down. It was not halted, however, because a large group born in the 1920s entered the labor force, and because in Ukraine in-migration exceeded out-migration in the 1930s. The 1939 Soviet census listed 8.7 million men aged 16 to 59 and 8.9 million women aged 16 to 54; for the first time the number of women exceeded that of men in the labor resources. The women's share of the total population had increased to 57 percent (from 50 percent at the turn of the century).

The Soviet Ukrainian population suffered huge losses during the Second World War, but the annexation of most of Western Ukraine resulted in an increase in Ukraine's labor resources. By 1959 they totaled 24.9 million people (11.3 million men and 13.6 million women), and their share within the total population had increased to 59.5 percent. In the 1960s, however, their growth slowed down. In the 1970 census there were 26.2 million: the number of men had grown to 12.7 million, but the number of women, 13.5 million, was basically unchanged, and their combined share within the total population had fallen to 55.6 percent. In the 1960s and 1970s there was a shortage of labor resources as the relatively small group

born during the Second World War entered the work force, and as the generation born during the 1910s left it. By the 1979 census, however, the situation had begun to improve: the labor resources consisted of 28.8 million people (14.3 million men and 14.5 million women), constituting 58 percent of the total population. By 1986 the labor resources had grown slightly to 29.5 million people, but their share within the population remained unchanged at 58 percent. It has been projected that by 2000 the number of people will increase slightly, to 29.9 million; their share within the population will be 55–56 percent.

The division of the labor resources by gender and age has great significance for a country's economic life. The 1897 imperial census indicated a predominance of males in almost every age category and a rapid decline in the numbers within each succeeding age group. In the years 1926–39, females predominated in all age categories, the population under 40 declined steadily, and that between 40 and 50 fell sharply (see table 1). After the Second World War a great discrepancy occurred in the number of men and women in the older age-groups; this discrepancy is moving with the older age-groups and by the end of the century will not have any impact on the gender structure of the labor resources.

Through the 20th century a gradual aging of the labor resources has occurred. The younger groups have gradually decreased in number, and the older groups increased. Several factors have simultaneously influenced this development: fluctuating birth rates, losses due to wars and mass repression, and an increase in life span. Consequently, the general pattern have been subject to complex fluctuations. The share of actual labor resources within the population has declined gradually, from 35.2 percent in 1897 to 31.5 percent in 1939; has grown, to 39.9 percent in 1959 and 48.9 percent in 1970; and has again declined, to a projected 45.5 percent in 2000 (see table 2).

Actual employment of the labor resources varies by age-group (see table 3). Only about half of those in young-

USSR	47.9 ^b	87.3	91.6	91.8	80.0	43.2	15.1 ^b	88.1 ^c

^aIncluding employed people under 16

^bIncluding all employed people over 60

^cMen aged 16 to 59, women aged 16 to 54, and all employed people regardless of age

er and older age-groups are employed, whereas nearly 90 percent of middle-aged people work. On the whole, approx 88 percent of the labor resources are employed. In Ukraine, as was the case in the USSR as a whole, the employment of male and female labor resources differed (see table 4). The share of Ukraine's labor resources within the entire population of the USSR gradually decreased from approx 20–22 percent before the Second World War to 20.8 percent in 1959, 19 percent in 1979, and about 18 percent when the USSR ceased to exist.

TABLE 4
Labor resources in Ukraine by gender and age in the 1979 USSR census (percentage employed in each gender group/age-group)

Age-group	Males	Females	Both genders
14	0.3	0.2	0.2
15	1.6	1.5	1.6
16–17	21.0	20.5	20.7
18–19	69.7	63.7	66.8
20–29	91.5	88.7	90.1
30–39	98.1	91.1	94.5
40–49	97.0	93.5	95.2
50–54	90.0	81.1	84.9
55–59	78.3	28.7	46.2
60–64	29.3	10.5	16.9
65–69	15.4	5.1	8.4
Over 70	5.3	1.4	2.5
Over 14	74.5	60.3	66.7

Ukraine's labor resources have been gradually redistributed. The number of self-employed people (at home or

on private plots) and agricultural workers has decreased, and the number of blue- and white-collar workers (especially in education, health care, communal and consumer services, and science) has increased. The redistribution has necessitated an increase in educational levels. Whereas there were 2,607,000 elementary-school children (only 29,000 in senior grades) in Ukraine in 1914–15, there were 6,830,000 (310,000 in senior grades) in 1940–1, 6,722,000 (604,000 in grades 9–11) in 1960–1, 8,414,000 (1,596,000 in senior grades) in 1970–1, and 7,500,000 (nearly 2,000,000 in senior grades) in the 1980s. Among all the employed in Ukraine in 1959, 9.9 percent had higher, incomplete higher, or specialized secondary educations; the figure rose to 17.5 in 1970 and 26 in 1979. With respect to the educational level of the work force, Ukraine lagged behind Armenia, Georgia, Lithuania, Latvia, Estonia, and the Russian SFSR. General and incomplete secondary educations had been attained by 33.9 percent in 1959, 49.3 percent in 1970, and 55.3 percent in 1979. In secondary education Ukraine was ahead of the Russian SFSR, Belorussia, Moldavia, Latvia, Lithuania, and Estonia, but not the Caucasian and Central Asian republics.

Labor school (*trudova shkola*). A school in which instruction is combined with practical experience and which prepares the student for a technical-scientific occupation. Though the idea of labor schools originated during the Renaissance, it found its fullest expression in the writings of the 19th-century British social reformer Robert Owen. In Ukraine the term labor schools originally referred to all schools which offered a general elementary and *incomplete secondary education for children between the ages of 8 and 15. (See *Seven-year schools.) Work on the curriculum of a *unified labor school was started late in 1917 by a special commission created by the Ministry of Education of the Ukrainian National Republic. (See *Elementary schools.) In 1925–8 some labor schools were transformed into *factory seven-year schools in the cities, and some village labor schools were reorganized into *schools for rural youth. In 1934, general elementary schools with grades one to seven were re-established and named seven-year schools. In 1958 all seven-year schools were reorganized into *eight-year schools. (See also *Education, *Secondary education.)

Laborets River [Laborec]. A right-bank tributary of the Liatorytsia River in eastern Slovakia. It is 135.5 km in length and drains a basin area of 4,523 sq km. Its source is near the Lupkiv Pass in the Lemko region, and it flows through the Low Beskyd and the Tysa Lowland. Its main tributaries (both left-bank) are the Chirokha and the Uzh rivers.

Labosh, Fedir [Laboš] (Fedor), b 24 January 1902 in Djurdjevo, Bačka region, Serbia, d 5 November 1977 in Zagreb. Economist and historian. After obtaining a PhD in Zagreb (1928) he worked as an economist for the city in the postwar period. At the same time he studied the history of Ukrainians in the Bačka region and wrote essays on this topic, as well as *Ystoriya rusynokh Bachkei, Sremu y Slavonyi, 1745–1918* (History of the Ruthenians of Bačka, Srem, and Slavonia, 1745–1918).

Labradorite. A mineral consisting of plagioclase feldspar of the albite-anorthite series that is usually gray to black in color. Its red, blue, or green iridescence makes labradorite a valued gemstone and ornamental and facing material. Anorthosite and igneous rock, composed mainly of coarse-grained labradorite crystals, are found in Ukraine. Deposits of high-grade anorthosite occur in Cherniakhiv raion (Holovyne, Horbuliv, Slipchytsi) and Volodarske-Volynske raion (Novyi Bobryk, Kamiani Brid, Poronivka, Turchynka), in Zhytomyr oblast; in Horodyshche raion, in Cherkasy oblast; and in Novomyrhorod raion, in Kirovohrad oblast. Labradorite facing can be seen on many of Kiev's buildings and in its subway stations.

Lada. A Slavic and Latvian-Lithuanian deity of fertility and marriage. Her cult was widespread in Ukraine and has left its mark on ritual songs. One of four deities depicted on the *Zbruch idol is a woman with a ring in her right hand. Some scholars, including B. Rybakov, claim that the female figure is Lada. The oldest written references to the Lada cult are found in 15th-century Polish church prohibitions of pagan rituals. In Ukraine the Lada cult is first mentioned in I. Gizel's *Sinopsis* (1674); she is referred to as a goddess from the time of Volodymyr the Great. Lada's

feast, which was celebrated with games in her honor, was part of the spring rituals. Some scholars, such as E. Anichkov and A. Brückner, denied Lada's existence in Slavic mythology and explained the frequent use of the word in folk songs as a mere refrain. But the pervasiveness of this refrain in all Slavic and even Baltic folklore casts doubt on that theory. Some colloquial expressions allude to the cult of Lada: in Volhynia *laduvaty* means to conduct a wedding, and in Transcarpathia and the Prešov region *ladkanky* are wedding songs, and *ladkaty* is to sing wedding songs.

Sophia Lada: *Prairie Fantasy III* (gouache, 1986)

Lada, Sophia, b 17 October 1941 in Cracow. Painter. She was a student at the Moore College of Art in Philadelphia and the Pennsylvania Academy of Fine Arts (1964) and studied iconography with S. Hordynsky (1976–7). In the early 1980s she was curator of the Oseredok Art Gallery and Museum in Winnipeg. Lada's works are influenced by symbolism, surrealism, and Ukrainian folk art. Her favorite subjects are female figures in the magic world of nature and fairy tales. In a cycle of eight paintings she portrayed the sun's course during the four seasons of the year and related changes in color. Solo exhibitions of her works have been held in Philadelphia (1972, 1973, 1979), St Paul (1973), Toronto (1974), Baltimore (1974), Warren, Michigan (1978), and Windham, New York (1980).

Ladan, Pavlo (pseud: Nedobyty, Netiaha), b 29 February 1892 in Ulashkivtsi, Chortkiv county, Galicia, d 27 April 1933. Communist activist. After emigrating to Canada (1910) and the United States (1915) he worked on the railway and in factories. He was active in immigrant socialist and communist organizations and served as secre-

tary and editor of the Ukrainian-American newspaper *Robotnyk*. To avoid a five-year prison term for political activities, he escaped to Europe, where he worked with the External Bureau for Aiding the Communist Party of Eastern Galicia in Prague, Vienna, and Berlin (1921–3). From 1924 he was a member of the Central Committee of the Communist Party of Western Ukraine (KPZU), a candidate of the Comintern's Executive Committee, and the KPZU representative in the Polish section of the Comintern. In 1926 he returned to the United States and served on the executive committee of the Ukrainian Federation of the Communist Party of America (later the United Ukrainian Toilers Organization). In 1930 he was recalled to the CC KPZU and appointed editor of its journal *Nasha pravda* in Berlin. In the final two years of his life he held an important position at the Secretariat of the Politburo of the CC KPZU. He died in the Stalinist terror.

Ladan (aka Ladyn). III-13. A town smt (1990 pop 7,600) on the Udai River in Pryluka raion, Chernihiv oblast. It is mentioned in documents as early as 1619, when its Monastery of the Holy Protectress was converted into a nunnery. Today the town has a fire-equipment plant, a secondary school, and a technical school.

Ladny, Vadym [Ladnyj], b 27 December 1918 in Kharkiv. Architect. A graduate of the Kharkiv Civil-Engineering Institute (1946), he has worked in Kiev, where together with other architects he designed the building of the AN URSR (now ANU) Section of Social Sciences (1954), the river port (1961), the Rusanivka Island housing complex (1964–71), the apartment buildings on Brest-Litovsk Prospect (1961–72), the Slavuta hotel (1972), the physics complex at Kiev University (1973), and the Obolon housing complex (1974–85).

Ladomyrova Gospel (Ladomyrivske uchytelne yevanheliie). A 17th-century manuscript of 242 folios written in the **pivustav* script that was discovered at the Ladomyrova Monastery in the Prešov region. It consists of didactics and Sunday Gospel readings. Its anti-Reformation teachings indicate that it was written during the spread of Lutheranism. Its language, which has local dialectal elements, was studied by I. *Pankevych (*Naukovyi zbirnyk Tovarystva Prosvita v Uzhhorodi*, 1923). The gospel was copied from the same original as the didactic gospel found in I. Kapyshovsky's eparchial library in Prešov, which had been composed in the vernacular of the Boiko-Sian dialectal boundary. There are textual parallels between the Ladomyrova and the **Peresopnytsia* gospels.

Ladyka, Dmytro, b 14 August 1889 in the Ternopil region, d 1945 in Dresden. Lawyer, civic figure, and politician. He was active in the Prosvita society, the Union of Ukrainian Progressive Youth (Kamieniari), and the Ukrainian Socialist Radical party, of which he sat on the executive council. An effective public speaker, he defended Ukrainian activists in political trials and was elected to the Polish Sejm from the Ternopil district in 1928 and 1930. In parliament he served as secretary of the Ukrainian socialists' caucus (1928–30). He died in the bombing of Dresden.

Ladyka, Vasyl (Basil; secular name: Volodymyr), b 2 August 1884 in Drohobych, Galicia, d 1 September 1956 in Winnipeg. Basilian missionary and Ukrainian Catholic

Dmytro Ladyka

Archbishop Vasyl Ladyka

archbishop of Canada. Ladyka entered the Basilian novitiate in 1903 and took monastic vows in 1909, the year he was sent to Canada. He graduated from the Grand Séminaire in Montreal and was ordained in 1912. He worked as a missionary in Manitoba (1912–13) and in Saskatchewan and Alberta (1913–22), and as rector of St Josaphat's Church in Edmonton (1922–9). He was consecrated bishop of Winnipeg and designated head of the Ukrainian Catholic church in Canada in May 1929, and was elevated to the rank of archbishop in 1948. He strengthened the church in Canada by promoting such lay organizations as the **Ukrainian Catholic Brotherhood*, the *Ukrainian Catholic Women's League*, and *Ukrainian Catholic Youth*, and by establishing **Ukrains'ki visti* as the church's weekly organ in 1929.

Ladyzhensky, Gennadii [Ladyženskij, Gennadij], b 4 February 1853 in Kologriv, Kostroma gubernia, Russia, d 15 September 1916 in Kologriv. Russian painter. He studied at the St Petersburg Academy of Arts (1870–9) and was elected a member in 1910. From 1882 to 1914 he lived in Odessa. There he taught painting at the Realschule and at the art school (Ye. Bukovetsky and P. Volokidin were his students), painted watercolor genre scenes, portraits, and landscapes, and was a founding member of the **Society of South Russian Artists*. His works include *Tiller* (1885), *Flock in the Steppe* (1885), *Road in the Kherson Steppes, Evening at a Khutir, The Sea* (1885), *Winter in the South* (1889), *Ukraine* (1889), *Banduryst* (1891), *Granite Unloading at the Odessa Port* (1898), and *Khadzhybei* (1899). A book about Ladyzhensky by V. Afanasiev was published in Kiev in 1966.

Ladyzhensky, Mykola [Ladyžens'kyj], b 28 March 1906 in Litynia, Drohobych county, Galicia, d 11 May 1975 in Lviv. Geologist; corresponding member of the AN URSR (now ANU) from 1972. He graduated from the Cracow Mining Academy in 1936 and worked as a geologist in the Pioner Oil Company in Lviv. After the war he was a lecturer at the Lviv Polytechnical Institute (1945–51) and a department head at the Institute of Geology and Geochemistry of Fossil Fuels of the AN URSR (1951–75). He researched the geological structure and the mineral deposits (mainly oil and natural gas) of the Carpathian Mountains and the Crimea. He was also interested in the industrial application of menilite schists found in the Carpathians.

Ladyzhets, Volodymyr [Ladyžec'], b 17 June 1924 in Kharkivtsi, Lityn county, Podilia gubernia. Writer and poet. In 1949 he was appointed culture editor of the oblast newspaper of Transcarpathia, and later, editor in chief of the oblast publishing house. As a poet he published several collections, including *Slavliu trud* (I Glorify Labor, 1950), *Liryka* (Lyrical Poetry, 1959), *Mizh berehamy* (Between the Banks, 1962), and *Vichne kolo* (The Eternal Circle, 1978). Among his prose works are short stories, published in numerous collections including *lasnovyd* (The Seer, 1974), and the novels *Perekhrestia* (The Crossroads, 1967) and *Za Brustverom – svitanok* (Beyond the Rampart It's Dawn, 1976). He has also written fables, stories, and poetry for children.

Ladyzhyn [Ladyžyn]. v-10. A city (1990 pop 20,000) on the Boh River in Trostianets raion, Vinnytsia oblast. In the 13th century it belonged to Galicia principality and had a fortress, which withstood the Tatar invasion of 1240. It is first mentioned in a historical document in 1362, when it was captured by Lithuania. During the Cossack-Polish War of 1648–57 it was a company center of Uman regiment. In 1648 M. Kryvonis defeated a Polish regiment near Ladyzhyn. By 1699 it was the scene of many battles among the Cossacks, Poles, and Turks. The town participated in the Cossack and popular uprising of 1702–4 and the haidamaka uprising of 1768. In October 1919 the Ukrainian Sich Riflemen fought A. Denikin's army near Ladyzhyn, and in August of the following year the UNR Army fought the Red Army in the area. Today the town has a thermoelectric station, a reinforced-concrete plant, a silicate bricks plant, a granite quarry, and an oil-pressing plant. Two settlements from the Neolithic period and two from the 6th to 7th centuries have been excavated near Ladyzhyn. The ruins of the Ladyzhyn fortress are visible today.

Lahoda. A noble family of the Poltava region, descended from Vasyl Lahoda (d 1702), who was captain of Khorol regiment (1685) and osaul of Myrhorod regiment (1691–1701). His son, Oleksander Lahodenko, was flag-bearer (*khорunzhyi*) of Myrhorod regiment (1723–32).

Lahoda, Alla, b 6 February 1937 in Kiev. Ballerina. Upon graduating from the Kiev Choreography School (1955) she joined the Kiev Theater of Opera and Ballet, with which she appeared as Kylyna in M. Skorulsky's *The Forest Song*, Zarema in B. Asafev's *Fountain of Bakhchesarai*, the Mistress of the Copper Mountain in S. Prokofiev's *Stone Flower*, Kitri in L. Minkus's *Don Quixote*, and the Golden Lady in *Symphonic Dances* (music by S. Rachmaninoff).

Lahoda, Valentyn (pseud of Valentyn Lahodzynsky), b 27 May 1913 in Stepantsi, Kaniv county, Kiev gubernia. Poet. Before the Second World War he worked as a correspondent for the Donbas newspaper *Molodyi robotnyk*, and later he became a radiobroadcast editor in Donetske and Dnipropetrovske. After the war he devoted himself to writing. He has published collections of lyric poetry, such as *Kviten'* (April, 1953) and *Natkhennia* (Inspiration, 1960), and collections of satirical and humorous poetry: *Shcho posiiesh, te i pozhnesh* (What You Sow, You Shall Reap, 1955), *Mokrym riadnom* (With a Wet Sheet, 1956), *Khoch krut', khoch vert'* (Though You Twist or Turn, 1962), *Hariacha zavyvoka* (Hot Wrap, 1968), and *Spasybi za uvahu*

(Thanks for Your Attention, 1976). He has also translated some Hungarian poetry into Ukrainian.

Mykola Lahodynsky

Lahodynsky, Mykola [Lahodyns'kyj], b 1866, d 1919. Lawyer and civic and political leader in Galicia. After opening a law office in Deliatyn (near Kolomyia) in 1900, he organized the Ruska Kasa credit union and branches of the Prosvita society, Silskyi Hospodar, and Ruska Besida in the town. An effective regional organizer for the Ukrainian Radical party, he was elected to its chief executive committee and, during the First World War, to its presidency. He was elected twice (1907 and 1911) to the Austrian parliament in Vienna, where he served as deputy leader of the Ukrainian Parliamentary Club. He was also a deputy to the Galician Diet from 1913, as well as a member of the General Ukrainian Council and the Ukrainian National Rada.

Lakes. Natural, nonflowing bodies of water that fill depressions on the earth's surface and lack direct exchange with the sea. In Ukraine lakes are numerous but small. The contiguous ethnographic territory of Ukraine contains some 4,000 lakes. Within the borders of Ukraine there are over 3,000 lakes with a combined surface area of more than 2,000 sq km, which constitutes nearly 3.5 percent of the country's total land area. The mean surface area of the lakes in Ukraine is 0.67 sq km. Only 30 lakes exceed 10 sq km in surface area, and 13 exceed 30 sq km.

The majority of lakes in Ukraine are of fluvial origin, commonly associated with the changing shapes and configurations of the river channels in the floodplains of large rivers. Such lakes tend to be small and shallow, are rich in fish, and contain fresh but sometimes muddy water. The largest number of such lakes are found in the floodplains of the Dnieper, the Kuban, the Prypiat, and the Desna, with smaller numbers along the Dniester, the Donets, the Orel, the Samara, and other rivers. The construction of the Dnieper Cascade resulted in the creation of a system of reservoirs in most of the little lakes of the Dnieper floodplain. Also of fluvial origin are the saline Lake Manych-Gudilo (Manych-Hudylo in Ukrainian; 300 sq km) and other lakes along the Manych River.

There are a large number of lakes in western Polisia. They can be divided into several groups. In northwestern Polisia (Brest oblast), notably in the drainage basin of the Yaselda River, there is a grouping of middle-sized lakes – Vyhonivske (surface area, 26.5 sq km; maximum depth, 2.7 m), Chorne (17.2 sq km; 2.2 m), Sporivske (13.2 sq km; 2.1 m) – and a number of smaller ones. Located in swampy

terrain, many of those lakes are joined either by slow-flowing streams or by canals, built mostly for the purpose of drainage. Along the upper reaches of the Prypiat River in western Polisia (mostly Volhynia oblast), there are shallow Lake Tur (13.5 sq km; 2.6 m), Lake Orikhove, Lake Volianske, Lake Bile, Lake Liubiazh, Lake Nobel, and other, smaller lakes. Like the lakes along the Yaselda River they are located in the midst of swamps, are often underlain by peat deposits, and thus belong to the dystrophic class. Some of those lakes are of fluvial origin; others are of glacial or even eolian origin, where the drainage was impeded by sand dunes. Another group of lakes, located between the headwaters of the Prypiat and the Buh rivers, includes Lake Svytiat (24.2 sq km; 58.4 m), Lake Pulemet (16.3 sq km; 19.2 m), and other, smaller lakes. Those lakes are deeper, obtain their clear water from springs in chalk formations, and are considered to be of karstic origin. In addition there are small, shallow lakes scattered through southwestern Polisia between the Turiia and the Styr rivers and in Volodava Polisia (in southern Podlachia, now part of Poland). All the lakes of western Polisia have a moderate or below-average level of mineralization.

The largest lakes of Ukraine are located along the coast of the Black and Azov seas. The combined surface area of those lakes makes up nearly 59 percent of the lake area in Ukraine. Some of them are former shallow marine bays (lagoon lakes), and others are enclosed flooded river estuaries (limans). Both are separated from the sea by narrow sandbars. Coastal lakes are large but shallow and have considerable (if not high) levels of salinity. Those with very high mineral content are significant for salt mining and the chemical industry and are used for medicinal purposes. In the southwest the largest coastal lakes also include the freshwater, liman-like lakes blocked off by the levees of the Danube: Lake Kahul (90 sq km; 6.0 m), Lake Yalpukh (149 sq km; 2.0 m), Lake Katlabukh (68 sq km; 4.0 m), and Lake Kytai (60 sq km; 5.0 m). There are small, fluvial lakes in the floodplain of the Danube as well. Between the mouths of the Danube and the Dniester are Lake Sasyk (also known as Lake Kunduk; 210 sq km; 3.0 m; in the process of being desalted), Lake Shahany (70 sq km; 2.0 m), Lake Alibei (72 sq km; 2.0 m), Lake Burnas (22.6 sq km; 1.9 m), and the Budatskyi Liman (30.0 sq km; 2.0 m). At the mouth of the Dniester River are the Kuchurhan Liman (20 sq km; 5.0 m) and the Dniester Liman (360 sq km; 2.5 m). Between the Dniester and the Boh limans are the Khadzhybei Liman (70 sq km; 13 m), the Kuialnyk Liman (61 sq km; 3 m), the Tylihul Liman (150–170 sq km; 21.0 m), and the Berezan Liman (60 sq km; 3.2 m). On the northern coast of the Azov Sea are Lake Molochne (170 sq km; 9.0 m) and the Miius Liman. Along the Kuban Lowland coast are Lake Khanske, the Hirkyi Liman, the Solodkyi Liman, and many other lakes in the delta of the Kuban River, including the Kirpili Liman, Lake Skeliuvate, the Boikiv Liman, the Ponura Liman, the Skhidnii Liman, the Kurchanskyi Liman, the Akhtanyzovskiyi Liman, the Tsokur Liman, the Kyzyltashskiyi Liman, and the Vytiazivskiyi Liman. Those numerous shallow (1 to 1.5 m) lakes are rich in fish life and occupy a combined surface area of 1,360 sq km. In the Crimea there are shallow, salty lakes south of the Perekop Isthmus, including Lake Chervone (Krasne; 34 sq km; 1.0 m), Lake Kyiatske (12.5 sq km; 0.4 m), Lake Kyrleutske (20.8 sq km; 0.6 m), and Lake Aihul'ske (37.5 sq km; 0.3 m), probably outlying remnants of the shallow Lake Syvash. Other coastal lakes in the Crimea in-

clude Lake Donuzlav (48 sq km; 27 m), Lake Sasyk (75 sq km; 1.2 m), and Lake Saky (8.1 sq km; 1.5 m) on the west side, and Lake Aktashske (27 sq km; 0.1 m), Lake Chokratske (8.5 sq km; 0.8 m), Lake Tobechytske (19 sq km; 0.5 m), and Lake Uzunlarske (21.1 sq km; 0.1 m) on the Kerch Peninsula.

Besides those in western Polisia and the coastal zone and along the floodplains, there are few lakes of appreciable size in Ukraine. There are karstic lakes in southwestern Polisia (formed as a result of the erosion of chalk), in Podilia and Pokutia (the erosion of gypsum), in the mountains and foothills of the Crimea (the erosion of limestone), and in the Donbas near Slovianske (the erosion of salt). To the karstic lakes may also be added the seasonal lakes, which occupy **pody* (depressions formed as a result of the compaction of waterlogged loess) in the spring.

The few lakes in the Carpathian Mountains have a variety of origins, including tectonic, postglacial (notably the tarns of the Chornohora Mountains), and volcanic (such as the Morske Oko in the Vyhorlat Mountains) origins. All those lakes are small (the largest being Lake Synevyr) and contain clear, fresh water. Lakes found in the Caucasus Mountains are of similar origin and have similar characteristics.

In addition to natural lakes there are many artificial ponds (about 18,000) and water reservoirs in Ukraine. The six large reservoirs on the Dnieper River alone occupy a combined surface area of over 7,000 sq km. The combined area for all ponds and reservoirs in Ukraine (January 1986) is 11,730 sq km; they retain 57.8 cu km of water.

I. Stebelsky

Bishop Hryhorii Lakota

Lakota, Hryhorii, b 31 January 1883 in Holodivka, Rudky county, Galicia, d 12 November 1950 in Abez, Komi ASSR. Ukrainian Catholic bishop and scholar. He was ordained in 1908, and completed his D TH at Vienna University in 1913. He then taught church history and canon law and served as rector (1918–26) at the Peremyshl Greek Catholic Theological Seminary. In 1924 he became assistant bishop of Peremyshl eparchy, a position he retained

until he was arrested in 1946 by the Polish authorities. He was handed over to the Soviet authorities and sentenced to eight years in a Vorkuta labor camp, where he died. While in Peremyshl, Lakota wrote a commentary on marriage law in the church codex of 1921 and *Try Synody Peremyshl'ki v XVI-XIX st.* (Three Synods of Peremyshl in the 16th–19th Centuries, 1939).

Laktionov-Stezenko, Mykola, b 15 February 1929 in Novovolodymyrivka (now in Kirovohrad oblast). Film director. In 1961 he completed studies at the Faculty of Screenwriters of the State Institute of Cinematography in Moscow; since then he has worked in Kiev at the Studio of Chronicle-Documentary Films. His first film was *Suchasni zaporozhtsi* (Contemporary Zaporozhian Cossacks, 1964).

Lakyza, Ivan, b 24 November 1895 in Starzyska, Radom gubernia, Poland, d 27 July 1938. Soviet literary critic. In the 1920s and 1930s his articles and reviews appeared in *Zhyttia i revoliutsiia*, *Hart*, and *Prolitfront*. He was also the author of popular critical biographies of M. Kotsiubynsky (1928) and T. Shevchenko (1929) and the collection of critical essays *Pys'mennyk i krytyk* (The Writer and the Critic, 1928). In 1937 he moved to Moscow, where he worked in the People's Commissariat of Education. His critiques of certain writers (eg, B. Antonenko-Davydovych, V. Pidmohylny) contributed to their persecution; subsequently he himself became a victim of the Stalinist terror.

Lam, Jan, b 16 January 1838 in Stanyslaviv, Galicia, d 3 August 1886 in Lviv. Polish writer and publicist. He studied law at Lviv University and worked as a provincial-school teacher. He took part in the Polish Insurrection of 1863–4. From 1866 he was a journalist in Lviv; there he became editor of the liberal daily *Dziennik Polski* (1869–86) and wrote several novels replete with Ukrainianisms and satirical depictions (à la C. Dickens) of Galician society. In his publicism he portrayed the Ukrainian Cossacks (eg, Hetman B. Khmelnytsky), T. Shevchenko, and the Galician Ukrainophiles sympathetically. In the introduction to his historical poem *Zawichost* (1862), about the battle between the forces of Princes Leszek of Cracow and Roman Mstyslavych of Galicia-Volhynia in 1205, Lam argued that medieval Rus' and the Ukrainian language were not Russian but separate and distinct entities. His literary works were republished in four volumes in Warsaw in 1956–7, and a selection of his publicism appeared in 1954.

Lamakh, Valerii [Lamax, Valerij], b 6 March 1925 in Lebedyn, Kharkiv gubernia, d 1978. Graphic artist, painter, and muralist. A graduate of the Kiev State Art Institute (1948), he designed posters, took part in the creation of the mosaic wall panels inside the Kiev River Station (1961) and Boryspil Airport (1965), and created the monumental wall panel inside the Palace of Culture of the Chemical Production Complex in Dniprodzerzhynske (1968–70). In the early 1960s he did paintings (only recently brought to public attention) that could be considered examples of abstract expressive in Ukrainian art.

Laments (*holosinnia*). Folk poetry connected with the traditional funeral rites. Their original function was to propitiate the deity for the soul of the departed and to secure its support for the living kin. With time their magical purpose was forgotten, but their ritual use was preserved.

The laments are usually performed by the deceased's closest female relative – the wife, mother, or sister. But there are also fine examples of children's laments for their parents and husbands' for wives or children. In some regions, if the relatives would not recite them, semiprofessional wailers were hired.

Laments have a traditional form – a recitative style punctuated frequently by exclamations. They have distinctive imagery, emotive epithets, metaphors, similes, and lyrical appeals to the departed. The wailer is free to improvise within certain limits. She expresses grief at the loss of a family member and at the same time recounts in vivid detail the life she shared with the departed. Laments were recited also over natural disasters, such as crop failure, fire, or famine; these songs are related to the wailings over recruits. Formally, laments are related to the dumas and are one of the oldest recorded folk genres. A fine example of the genre from the end of the 12th century is the lament of Anna Yaroslavna in **Slovo o polku Ihorevi*. Folklorists began studying and collecting laments in the 19th century. One of the largest collections (299 items) was gathered by I. *Svientsitsky. Laments in use by Ukrainians in Poland, Czechoslovakia, and Rumania were recorded only after the Second World War.

M. Mushynka

Lan, Oleksander (pseud of Kyrylo Korshak), b 1897 in Horodyshe, Cherkasy county, Kiev gubernia, d 1943. Poet and archeologist. He graduated from the Kiev Institute of People's Education in 1928. In 1924 his poetry began to appear in journals, such as *Nova hromada*, *Chervonyi shliakh*, and *Hlobus*. Only three collections of his poetry were published: *Otavny kosiat'* (They Are Cutting the Aftercrops, 1928), *Doloni ploshch* (The Palms of Plazas, 1930), and *Nazustrich sontsiu* (To Meet the Sun, 1930). His articles on archeology appeared in *Khronika arkeolohii ta mystets-tva* (1930–1), *Nauka i zhizn'* (1935), and *Naukovi zapysky Instytutu istorii material'noi kul'tury* (1934–5).

Lan. A publishing house established in Kiev in 1909 by O. Hrushevsky. Directed by Yu. *Tyshchenko, it published, using the **Zhelekhivka* script, books for children and teenagers by Tyshchenko (on the life of plants and the Crimea), M. Shapoval (on the forest), Yu. Budiak (on savage peoples), M. Hrushevsky (his historical story about Hetman B. Khmelnytsky), S. Rudnytsky (on the physical geography of Ukraine), and V. Koroliv-Stary (on healing domestic animals); a collection of L. Hlibov's fables; A. Hrushevsky's story *Nad morem* (At the Sea); and collections of stories by R. Kipling (trans Tyshchenko), E.T. Seton (trans Tyshchenko), W. Hauff (trans O. Oles), and others. The books' covers were designed by I. Buriachok. Lan ceased operating in 1913 after Tyshchenko was forced to emigrate.

Lancasterian schools (*liankasterski shkoly*). Inexpensive elementary schools in which older and better students lead the school activities in groups under the teacher's supervision. The Lancasterian school system was brought to Ukraine from France by Gen N. Raevsky and the Decembrist M. Orlov, who reformed the system and in 1818

founded a large military school for orphans in Kiev. Other Lancasterian schools in Ukraine were established in Horodyshe, Cherkasy county, through the initiative of Count M. Vorontsov, in the village of Babai, near Kharkiv (1832), and in many other locations. The Lancasterian school system failed to establish itself in Ukraine and soon disappeared.

Lancer regiments (*pikinerski polky*). Formations of military colonists created in 1764 by the Russian government to settle the newly created *New Russia gubernia and defend it from the Turks and Crimean Tatars. The lancers (*pikinery*), who were named after the pikes they used as one of their weapons, were recruited mostly from among the Cossacks of Poltava and Myrhorod regiments (Donets and Dnieper regiments), but also from among Ukrainian and Russian peasants; Serbian, Montenegrin, and Hungarian colonists (Yelysavethrad and Luhanske regiments); and in 1776 from former Zaporozhian Cossacks (Poltava and Kherson regiments). Lancers lost their Cossack privileges and were forced to remain in military service, pay taxes, and fulfill feudal obligations to the state. In 1767 the lancers in Kremenchuk and Vlasivka, in the Dnieper Regiment, sent a representative, P. Denysenko, to Moscow to protest their oppression, but the petition was in vain. Their condition worsened considerably after the outbreak of the Russo-Turkish War (1768–74). Influenced by the *Koliivshchyna rebellion in Right-Bank Ukraine, the Donets and Dnieper regiments mutinied in 1769. Several hundred lancers joined forces with Zaporozhian Cossack rebels to fight the tsar's punitive detachments. The revolt was suppressed brutally in 1770. Ya. Holovaty and other leaders, as well as many mutineers, were whipped and sentenced for life to hard labor in Siberia; many of them died in transit. The other members of the Donets Regiment were sent to fight the Crimean Tatars. They distinguished themselves in battle at Perekop (1770) and Kaf-fa and in the 1774 rout of the Tatar-Turkish forces in the Crimea. When Russia annexed the Crimean Khanate in 1783, the regiments lost their defensive importance and were transformed into three light-cavalry regiments.

Lanckoroński, Przeclaw, ?–1531. Ukrainianized Polish nobleman, starosta of Kholmilnyk, and military leader at the beginning of the 16th century. With O. *Dashkevych he organized Cossack forces to defend the population against Tatar incursions. He went on military campaigns with the Cossacks in 1516 to Akkerman, in Moldavia (then a Turkish-held territory), and in 1528 to Ochakiv, on the Black Sea. He figures in many folk legends and sayings.

Land charters (*zemski ustavni hramoty*). Legal documents of the Grand Duchy of Lithuania granted by the grand dukes to particular territories and their inhabitants to confirm their ancient rights and to define their relation to the central government. In contrast to charters of privilege, which sometimes introduced new rights, land charters confirmed traditional rights. Eight land charters deal with Ukrainian lands within the Grand Duchy and two Ukrainian lands within the Polish Commonwealth. The more important charters were Jagiello's charter to Lutske land (1424 or 1430), Casimir IV Jagiellonczyk's charter to Galicia (1456), the charter to Dorohychyn land (1516), two charters (1501 and 1509) to Volhynia, and one (1501) to Bielsk county in Podlachia. Many of them were based on earlier charters which have not been preserved. These

documents contain material on civil, criminal, private, and procedural law, and some information about the institutions and norms of old Ukrainian customary law. The later charters have a more distinct estate character.

Land community (*zemelna hromada*, aka land society [*zemelne tovarystvo*]). In early Soviet Ukraine an association of peasant households that collectively received from the state the right to use fields, meadows, and pastures. Resembling the Russian **obshchina*, the unit was established on 27 May 1922 and was confirmed by the USSR Land Code of 30 July 1930. Membership in a land community was compulsory. A general meeting of members had the right to decide on one of three forms of land use: (1) communal use, whereby cultivated land was redistributed periodically to each family household according to its size; (2) the distribution of land to each household on a permanent basis; or (3) common cultivation by an *artel*, whereby the *artel* could take on the function of the land community. Regulations permitted a household or group of households to choose forms of land use different from those prevalent in the land community; such households were allocated land for the purpose. In 1928 the Soviet government began restricting the rights of land communities, and in 1930, as a result of *collectivization policies, it abolished them.

Land courts (*zemski sudy*). Nobility courts which functioned in Poland (Polish: *sąd ziemski*) and the Grand Duchy of Lithuania from the mid-15th century. They were introduced in Right-Bank Ukraine in the 16th century. Each court served a voivodeship or land (*zemlia*) in handling civil litigation cases. The three-member court was elected by the nobles of the region and confirmed for life by the king. Its verdicts could be appealed to the dietine courts in Poland or to the grand prince in Lithuania.

In 1763 Hetman K. Rozumovsky reintroduced the land courts, as defined in the Lithuanian Statute, in Left-Bank Ukraine. Twenty courts were established, two per regiment and three in the Nizhen regiment. Each consisted of three officers, elected for life from among military fellows. They ruled on most civil matters, and their verdicts could be appealed to the general court in Chernihiv. As the gubernial system was extended to Ukraine, these courts were abolished, in 1782. They were restored in 1796 by Paul I as elected courts, one per county, and their authority was enlarged to cover criminal cases. The land courts were finally abolished in 1831.

Land law (*zemelne zakonodavstvo*). Legal norms that regulate land ownership, tenure, and use. In the USSR land law is a wide legal area embracing all land relations and various socialist forms of land use. In non-Soviet countries land ownership and use is regulated mostly by private law (property, contracts, and so on). Only some land legislation belongs to public law, particularly the legislative or administrative acts that limit the freedom of transfer, division, consolidation, and expropriation. (For earlier land acts under the Russian Empire and Austria-Hungary, see *Land tenure system and *Land reforms.)

During the period of Ukrainian statehood in 1917–20, land ownership and distribution was one of the most pressing problems. It was the subject of a series of proclamations and legislative acts. The First Universal of the Central Rada announced the expropriation of the estates

of the landowners, the state, the tsar, and the church, and reserved the right of the Ukrainian parliament to make land legislation. The Third Universal abolished the gentry's right to own estates and other lands not worked directly by them, and transferred, without compensation, this 'property of all the toiling people' to the people. The Constituent Assembly of Ukraine was to enact the law that would bring order to land tenure; until then, local land committees would administer expropriated lands. The Fourth Universal proclaimed the abolition of private land ownership and the socialization of land in the UNR.

On 31 January 1918 the Central Rada passed a special land law which restated the main points of the Third Universal and preserved the principle of socialization. Inspired by the land program of the Ukrainian Party of Socialist Revolutionaries, it allowed former owners to retain the use of tracts, whose size was to be determined, according to local conditions, by the land administration consisting of land committees (village, district, and gubernia) and a central government land agency. The law provided for land use by individuals, co-operatives, the state, and other public corporations. It was implemented after the Bolsheviks had been pushed out of Ukraine in March 1918.

By his decree of 29 April 1918, Hetman P. Skoropadsky abolished the Central Rada's land law and dissolved the land committees. This decree and the Hetman's provisional law proclaimed that the right of ownership was inalienable, and that private property could be expropriated only with compensation. A special commission drafted a land reform bill (known as Minister V. Leontovych's bill), which was enacted in November 1918. It required estates over 200 desiatins (218 ha) to be sold to the State Land Bank and to be distributed among peasant farmers in parcels of up to 25 desiatins.

Instead of reinstating the Central Rada's land law, the Directory of the UNR on 9 January 1919 enacted M. Shapoval's modified version of the law of 31 January 1918. It granted in perpetuity a maximum of 15 desiatins to individual farmers and socialized all other land without compensation. Thus, private farms worked by their owners were retained, while voluntary co-operative farming was encouraged. Shifting battlefronts, however, prevented this law from being implemented.

The Ukrainian National Rada of the Western Province of the Ukrainian National Republic on 14 April 1919 adopted a land law which preserved the principle of private ownership. At the same time it expropriated, for the purpose of redistributing land among landless peasants and small farmers, the following categories of land: (1) manorial tracts which had been excluded from village community jurisdiction by the law of 1866; (2) church and monastic lands; (3) estates that were not worked by the owners themselves; (4) lands acquired through speculation; and (5) all other lands in excess of a limit to be defined by a separate law, which would also determine compensation for expropriated land. The Polish occupation of Western Ukraine prevented the National Rada from implementing these reforms. (For Polish land legislation in the interwar period see *Land reforms.)

Soviet Ukraine. The land law of the Ukrainian SSR was inspired by the Russian government's decree of 21 November 1917 and nationalization law of 27 January 1918, and was adopted by the Second All-Ukrainian Congress of Soviets in March 1918. The new law abolished private

ownership of land and proclaimed all land to be the property of 'the entire toiling people.' Subsequently, the Provisional Workers' and Peasants' Government of Ukraine declared, on 28 January 1919, that all cultivated landowners' estates belonged to the state and would be converted by the People's Commissariat of Land Affairs into state farms and communes. On 22 January 1920 the Ukrainian Soviet government published the Basic Principles of Organizing Land Affairs in Ukraine, which took into account some of the peasantry's demands. The land law of 5 February 1920, which was based on these principles, echoed the first law on land nationalization. All land not worked directly was to be distributed without compensation to the peasants and controlled by land communities. The owners of the confiscated lands were to be expelled immediately from their farms. This law was approved by the Fourth All-Ukrainian Congress of Soviets in May 1920.

On 27 May 1922 the All-Ukrainian Central Executive Committee (VUTsVK) issued the Fundamental Law on the Toilers' Land Use and on 16 October 1922 approved the Land Code of the Ukrainian SSR. Modeled on the land law of the Russian SFSR, the new law permitted the limited use of hired labor and land leasing.

In the Union constitution of 1924 the USSR legislature received the power to define the general principles of the land law, while republican governments could determine, in harmony with the Union law, only the rules of land use. The last more or less autonomous land acts of the Ukrainian SSR were the government decrees of 1927, which introduced several changes in the Land Code of the Ukrainian SSR. By 15 December 1928 the Central Executive Committee of the USSR published the General Foundations of Land Use and Land Tenure, which applied to Ukraine as well as to other republics.

Radical changes in Ukraine's land law occurred when the All-Union Communist Party (Bolshevik) approved (5 January 1930) the resolution on speeding up the collectivization of agriculture, and the Union law depriving the kulaks of the right to use or lease land or to hire labor. The Presidium of the VUTsVK repeated this new law in its resolution of 23 August 1930, thus negating a large portion of Ukraine's Land Code of 1922. Land use by collective farms was regulated almost entirely by the Union law, primarily by the Model Statute for the Agricultural Artel of 1 September 1930 (modified on 17 February 1935). A 1930 Union law granted the collective farms 'perpetual use' of their land. Other important acts regulating land use in Ukraine included the decrees of the USSR government in 1939 on the size of private plots held by collective farmers, manual workers, and office workers, and on the abolition of the *khutir* homesteads. In the postwar period the USSR government proclaimed (7 June and 17 July 1950) the voluntary consolidation of collective farms. In practice, however, the process was not voluntary, but imposed by the Party and by the state machine.

The power of the Union republics in land affairs was a contentious issue between the advocates of Moscow centralism and of republican autonomy in the 1920s. It was settled at the time in Moscow's favor by *faits accomplis*. Thus, the theoretical question of land ownership was settled in 1929-30 in favor of the USSR by the almost complete replacement of Ukraine's land law by the Union law. In 1956-8 the issue of codifying the land laws of the Union republics was raised, and proposals were made to expand the rights of the republics in this area and to let the USSR government decide only basic questions of land use, ten-

ure, and cadastre. The issue was resolved in a manner similar to that of the 1924 arrangements. The Foundations of the Land Law of the USSR and the Union Republics (approved by the Supreme Soviet of the USSR on 13 December 1968) remained within the competency of the Union government, while the specific codes and other acts based on these foundations were determined by the republics. Thus, the Land Code of the Ukrainian SSR (1970) repeated and was built on the Foundations, as were the codes of the other republics. In practice the Union agencies retain the right to take the initiative even in matters that belong to the jurisdiction of the republics.

Other sources of land law are the Model Statute of the Collective Farm (in effect since 27 November 1969); resolutions of the Union and republican councils of ministers; orders and instructions of ministries and departments; and decisions of local soviets. In principle, the norms of civil law do not apply to land affairs.

The general changes which came about with 'perestroika' under M. Gorbachev also affected land use. On 6 March 1990 a new set of Fundamental Principles of Land Legislation was announced. Also being considered is a law establishing the right to private property. The privatization of land and property, however, is still a difficult issue.

Land melioration. Major improvement of the productivity of the soil by tillage, *crop rotation, irrigation, drainage, use of fertilizers, or chemical reclamation. Tillage changes the soil structure, kills weeds, and lays crop residues by physical means, such as plows, harrows, rollers, and pulverizers. Excessive tillage may result in crusting, impede water storage, and increase runoff. Crop residue, or mulch, prevents rain injury to the soil surface. Crop rotation helps preserve favorable soil structure, reduce erosion, and supply nitrogen to the soil. During N. Khrushchev's regime fallow-land area was greatly reduced in Ukraine, with increased soil erosion as a result. *Irrigation and *drainage transform arid or swampy land into arable land. In 1979, 2,478,000 ha in Ukraine were under irrigation, and 3,065,000 ha were under drainage. The largest area of reclaimed wetland is in Polisia. Excessive irrigation can cause soil salinization. The need for chemical fertilizers to maintain agriculture productivity has increased. The use of chemical fertilizers in Ukraine is lower than in the West, but it has increased rapidly in recent years, from 14.6 kg per ha in 1960 to 157.2 kg per ha in 1987. Chemical reclamation is the indirect use of minerals to improve soil conditions. Liming combats excessive acidity, and gypsum, excessive alkalinity. In Ukraine liming is used in the chernozem zones, such as Polisia.

LAND MELIORATION

Land Mortgage Bank (Zemelnyi bank hipotechnyi). A joint-stock bank established in Lviv in 1910 to provide peasants with loans for land purchases and farm improvement. It was the first Ukrainian bank in Galicia. It was set up with an equity fund of one million kronen, which was raised by selling 2,500 shares at 400 kronen each. By 1914 it had issued 1,850 long-term mortgage loans to peasants for a total sum of 7,356,000 kronen. The general devaluation after the First World War reduced the bank's equity sharply, but by the 1930s it had risen to 5 million zlotys, and assets amounted to 800,000 zlotys. A branch was set up in Stanyslaviv. The bank's directors were O. *Kulchyt'sky (1910–30) and V. Sinhalevych. When Soviet troops occupied Galicia in 1939, the bank was nationalized.

Land reforms. Legislative and administrative measures aimed at redistributing land among various social groups. They have been known in Ukraine since medieval times. Some, such as the **voloka* land reform of the mid-16th century, radically altered the relation of different social strata to the land. Great socioeconomic changes such as the limiting or abolition of serfdom (1783 and 1848 in Austria, 1861 in Russia) involved significant changes in land tenure and use (see *Serfdom). The modern concept of land reforms, which is tied to a political and economic struggle for a fairer distribution of land among groups of individual landowners or land users, is of recent origin.

The land reforms which followed the abolition of serfdom in the Russian Empire left Ukrainian peasants with less land at their disposal: 30.8 percent of the land formerly used by the peasantry was detached and retained by the landowners. Of a total land fund of 48.1 million ha in the nine Ukrainian gubernias, 21.9 million ha (45.7 percent) were transferred to the peasants, 22.5 million ha (46.6 percent) were retained by the large landowners, and the remaining 3.7 million ha (7.7 percent) belonged to the state or the church. The peasants had to pay the former owners for the land through a system of *redemption payments: the state bought the land from the landowners and sold it to the peasants on credit. This land reform failed to appease the peasant's land hunger. The small size of peasant holdings and, hence, the low productivity of most peasant farms, the land shortage, and rural overpopulation, which became acute in Ukraine by the end of the 19th century, had a marked influence on the Revolution of 1905. The *Stolypin agrarian reforms (1906) were an attempt to alleviate the crisis. These measures, however, benefited only the middle and wealthier peasantry. The poor peasants could not improve their lot and had to sell their remaining holdings, and thereby swelled the ranks of the rural proletariat.

The Revolution of 1917 also included land reforms. Ukraine's national governments worked out the principles of land reforms but were not able to carry them out (see *Land law). The reforms that were put into practice were either local or temporary. Bolshevik land policy amounted to land revolution rather than reform, in that it involved the expropriation and socialization of land (see *War communism, *New Economic Policy, *Collectivization, *Land tenure system, and *Land law).

After the abolition of serfdom on Ukrainian territories controlled by Austria, peasants could own the land they had used. At the time, landowners owned 2,461,000 ha (44.4 percent), and peasants owned 3,069,000 ha (55.6 percent). The landowners were reimbursed by the state, and the peasants were given 40 years to settle their debt to the

state. Despite the reduction of large estates by parcelation, the land crisis continued, just as it did in eastern Ukraine. In fact, there were no fundamental land reforms in Ukrainian territories under Austria-Hungary. The Galician Diet, which had the power to pass land laws, was controlled by Polish landowners who rejected reform. Some political parties in Galicia included land reform in their platforms.

In the interwar period the Polish, Czechoslovak, and Rumanian regimes in Western Ukraine introduced land reforms in the modern sense. In Poland a law was passed on 15 July 1920 by which large estates were expropriated at prices set by land administrations. Landowners were allowed to retain up to 180 ha (60 ha near the cities); on Ukrainian territories the maximum size of an estate was 400 ha. Excess land was parceled out among small farmers and landless peasants, primarily soldiers and invalids of the Polish army. In 1919–23 the Polish authorities conducted extensive land reforms: about 450,000 ha in Western Ukraine were parceled out to colonists, particularly veterans, from the Polish heartland. Ukrainian peasants received scarcely 6 percent of the distributed land. The parcelation was conducted, with the approval of the Polish Ministry of Agriculture, either by the owners themselves or by select Polish banks. The Ukrainian parcelation society in Lviv, Zemlia, did not get a concession to parcel land. The Polish law of 28 December 1925 restricted further access of Ukrainian peasants to parceled land. In 1934 state bodies (voivodeship governments) took over the implementation of land reforms from land administrations.

In Bukovyna and Bessarabia, land reform was based on the law of 30 July 1921, which limited the estates of non-Rumanians to 100 ha and of Rumanians to 250 ha, and expropriated all the lands of the Orthodox Religious Land Fund. Of the 144,000 ha designated for distribution, only 63,000 ha were distributed by the end of 1926. One-third of it went to Ukrainians. The state reimbursed the former landowners at a rate set by a special commission, while the peasants paid the state half the rate plus the costs of surveying and registration. A large part of the undistributed land was leased by the government or was reserved for settling Rumanian colonists among the Ukrainian population.

In Transcarpathia, the Czechoslovak government effected a partial land reform in 1922–8. Expropriated parts of estates were distributed among the small farmers and landless peasants, 86 percent of whom were Ukrainian. State lands consisting of forests, pasture, and meadows, however, were not subject to redistribution. Thus, this reform did little to alleviate the plight of the Transcarpathian peasantry.

With the Soviet occupation of Western Ukraine, the land tenure system was altered radically.

Land tenure system. The system of holding and using land that defines the rights and obligations of the owner, occupant, and cultivator of the land. In ancient Rus' clans settled and took possession of virgin lands. As extended families separated from the clan, they established with the

clan's consent their own **dvoryshche*, which usually consisted of several **dym* or farmsteads held by blood-related families. The *dvoryshche* collectively owned all the fields, forests, meadows, and water sources that had been occupied and worked in some way by the members of the family. Working members of the family (*potuzhnyky*) were allotted shares of the *dvoryshche*'s land for their use. Land that did not belong to any *dvoryshche* was used by the clan for its general needs.

The idea of private land ownership first arose in the Princely era. The concept took root when the population began to shift west and north to territories that were safer from the steppe nomads. Officials of the princes began to fence off free and communal lands, at first claiming only exclusive use of them in exchange for services. Eventually they claimed full ownership. In the 12th and 13th centuries the claims to the land of princes, boyars, *hromady*, and free peasants expanded. The larger estates owned by princes, boyars, or the church were surrounded by service villages or were worked by semifree **zakupy* and **izhoi*. Apart from the obligatory **tribute* to the prince, the peasants had free use of their property. There is no evidence that the princes of Rus', unlike the rulers in Western Europe, ever claimed title to all the land. Like any other individual the prince had a right to the land he used for the needs of his own court. References to princely grants of villages probably concern villages owned by the princes. Transfers of princely land to heirs and purchases of boyar estates are also mentioned in early documents. The reports of land grants in return for services, which appear in the chronicles, indicate that feudal relations were introduced in the Galician-Volhynian principality only when it began to decline.

A feudal system of land tenure similar to that in Western Europe was established in Ukraine in the 15th and 16th centuries under Lithuanian and Polish rule. In that period land tenure was tied to compulsory military service. The ultimate right to all the land belonged to the Lithuanian grand duke, who divided the land among his princes and boyars in exchange for services. They, in turn, gave others use of their land in return for military service or tribute. Even large economic units, such as the *dvoryshche*, are often referred to as 'services.' Free peasants worked land that was held directly by the grand duke or by princes, boyars, or the church. The peasants could freely dispose of their use of the land (buy, sell, and inherit), provided their obligations to the landholders were met.

The first two editions of the **Lithuanian Statute* (1529, 1566) indicate that there were attempts to introduce the kind of social and economic relations found in Poland: to set off the privileged and unprivileged estates, to separate military service from land tenure, and to limit the right to own land to the grand duke, the gentry, and the church. At the end of the 15th century the old *dvoryshcha* were broken up and divided into *voloky* (see **voloka* land reform).

During the 15th century Polish law was introduced in Galicia, the Kholm region, and Podlachia. Previous distinctions among free, semifree, and bonded peasants were gradually erased: all peasants became serfs bound to the land without the right of movement and, besides making payments in kind, increasingly forced to do *corvée*. The nobles became not merely the ruler's stewards but outright owners of the land.

These changes were hastened by the growth of the Polish grain trade. In 1466 Poland gained a Baltic port, which gave it access to western and northern European markets.

The magnates and wealthier gentry set up large grain farms, called **filvarok*, on the best land and increased *corvée*. By the end of the 16th century 78 percent of the land belonged to the nobility, 3 percent to churches and monasteries, and 19 percent to the crown.

After the Union of Lublin (1569) Polish law was extended to other parts of Ukraine. Polish magnates and gentry began to accumulate large landholdings in Ukraine, acquired parts of the crownlands for their services, and gradually enserfed the rural population. These processes met with resistance, however. It was difficult to establish *filvarok* in the steppes, and settlers rejected the expiry of their short-term leases with the landowners. The social unrest arising from such conditions finally exploded, in B. Khmelnytsky's social and political revolution.

In Transcarpathia the obligations of the peasants and the privileges of the gentry were codified in the *Tripantium* of 1546. In Bukovyna at that time, the Moldavian voivodes distributed latifundia among their gentry and boyars. The vulnerability of those regions to Turkish and Tatar raids made it impossible for the landowners to exploit the peasants as severely as in Galicia.

Under the Hetman state there were several forms of land tenure. The few members of the gentry who had supported B. Khmelnytsky retained their ownership rights. The emerging Cossack *starshyna* gained access to large landholdings, which were tied to certain offices in the state. The *starshyna* did not acquire the same rights as the gentry until the reign of D. Apostol, when its inheritance right was recognized. The Cossack estate secured the right of perpetual ownership and unrestricted enjoyment of its lands.

According to unwritten customary law, peasants could take possession (*zaimka*) of unoccupied lands. They also had the right to choose their master or to become **landless* peasants (*pidsusidky*). Thus, peasants had full disposal of the land they used. Also, peasants on gentry or monastery estates initially had the right to dispose of the land they cultivated, although they were indentured. The peasants who lived on the free military estates, which belonged to the state, retained the right to dispose of the land they used longest. When at the end of the 17th century the Russian tsar began to interfere in land affairs in Ukraine by granting estates to officers and monasteries without the hetman's approval, the land rights of the peasantry began to diminish as well.

From the mid-18th century more and more of the land and peasants in Ukraine fell into the hands of Russian nobles and officials. As Russian power in the hetmanate increased, the number of free peasants decreased: according to the **General Survey of Landholdings* conducted by Hetman D. Apostol in 1729–31, only a third of the peasants were free commoners. Under pressure from Russian authorities Hetman I. Skoropadsky enserfed even some Cossacks. Serfdom was established officially in Left-Bank Ukraine in 1783 by an edict of Catherine II, and in Southern Ukraine in 1796.

In the Russian Empire most land was owned by landowners, the state, and the church. Of the other estates only Cossacks retained the full right to own land. The peasants were serfs either of the landlords (2,493,000 in 1858) or of the state (1,682,000). Their legal tie with a certain plot was dissolved: the 1808 law prohibiting the sale of peasants without land was repealed in 1841. Henceforth, peasants and land could be sold separately. The development of

TABLE 1
Distribution of farms in Russian-ruled Ukraine in 1917 according to seeded area (percentages)

Type of farm (in desiatins [des])	Polisia	Right Bank	Left Bank	Steppe	Ukraine as a whole
No seeded land	9.7	13.5	18.6	19.1	16.0
Under 1 des	17.7	24.8	3.6	7.1	16.2
1-4 des	42.6	51.1	34.9	22.3	37.8
4-9 des	24.4	9.5	23.4	24.0	18.5
9-15 des	4.6	0.9	6.5	13.6	6.4
Over 15 des	1.0	0.2	3.0	13.9	5.1

TABLE 2
Distribution of land in Ukraine among different users, 1955-87
(in 1,000 ha)

Type of use	1955	1966	1974	1987
Collective farms	44,981	38,678	37,385	35,821
including private plots	(2,388)	(2,129)	(2,001)	(1,663)
State enterprises	4,949	9,938	10,932	11,917
including state farms	(3,991)	(8,675)	(9,521)	-
Wage and salary workers' (private) plots	287	483	597	753
State lands and forests	6,229	-	8,536	8,702
Other land users	3,193	-	2,921	3,069
Total land area	59,639	49,099	60,371	60,262

Figures in parentheses are not included in total land area.

commercial farming and of agricultural processing industries accelerated the separation of peasants from the land. A monthly payment for labor in foodstuffs became more common. In Ukraine serfs almost universally provided *corvée* rather than quitrent (see *Serfdom).

The emancipation of serfs in the Russian Empire in 1861 entailed basic changes in land tenure. Of 48.1 million ha of land in the nine Ukrainian gubernias the peasants received 21.9 million ha, the landowners retained 22.5 million ha, and the church and state held on to 3.7 million ha. The state compensated the landowners for the land transferred to the peasants and then collected redemption payments spread over 40 years from the peasants. *Servitudes, such as meadows and forests, were left intact until 1886 for use by the village and the landlord.

The amount of land allotted to each peasant household varied with the region, the size of the plot previously used by the peasant, and the type of farmer-owner. State serfs received on average 7.5 desiatins per household, landlords' serfs only 5 desiatins. Of the households that got land, 3 percent received less than 1 desiatin, 16 percent from 1 to 3 desiatins, 67 percent from 3 to 10 desiatins, and 14 percent over 10 desiatins. Only some of the transferred land went to individual households: in the steppe region of Ukraine the Russian **obshchina* system of land tenure prevailed. By the end of the 1870s, 45 percent of all farms in Ukraine had come under the *obshchina* system: 95 percent of the allotted land in Katerynoslav gubernia, 95.3 percent in Kharkiv gubernia, and 88.8 percent in Kherson gubernia, but only 5.4 percent in Podilia, 5.9 percent in Poltava gubernia, and 6.7 percent in Kiev gubernia. The inadequate parcels of land received by the peasants were reduced even further by division among heirs. As a result,

although the total land owned or rented by peasants grew somewhat, the average peasant holding declined from 12.3 ha in 1877 to 9.4 ha in 1905. The land shortage increased social tension in the countryside. In response to peasant unrest the *Stolypin agrarian reforms allowed peasants to leave the *obshchina* system with an allotment of their own land. They could also consolidate their parcels of land into one holding contiguous to (**khutir*) or at a distance from (*vidrub*) the farm buildings. Land banks and other credit institutions encouraged the spread of individual farmsteads of either type. Peasant unrest in 1902-6 aroused insecurity among landowners and accelerated the transfer of land to the peasants. At the outbreak of the First World War, peasant landholdings in the Ukrainian gubernias increased to 32 million ha, or 65 percent of the total land fund. More than half of all peasant households, however, lacked enough land to support themselves (see table 1).

The 1917 Revolution opened a new period in agrarian relations. The social and political demands of the Ukrainian people were rejected by the Provisional Government; hence, Ukraine began to develop its own agrarian legislation only after its proclamation of independence. The war with Russia and the rapidly changing political situation made it impossible for the government to implement *land laws.

In Soviet Ukraine a new land law was passed only in October 1922. Maintaining the principle of the nationalization of all land, it recognized the peasants' right to use the land in perpetuity. The land was not distributed directly to the peasants but was handed over to *land communities for distribution. The communities could decide the terms of tenure; they usually chose the traditional form of farming for Ukraine, the individual farmstead. The state retained use of the forests (3.7 million ha) and a small portion of arable land (1.4 million ha), on which it set up state farms and communes. In 1927, peasant farms had 36.8 million ha at their disposal. The number of peasant households increased, from 3.5 million in 1916 to 5.2 million in 1928. The *collectivization in 1930-1 made fundamental changes in the land tenure system of Soviet Ukraine. Individual farms were abolished, and use of the land was given to collective farms, state farms, and state enterprises (see table 2).

Western Ukraine. After Austria's annexation of Galicia and Bukovyna, some changes in the land tenure system were made by Maria Theresa and Joseph II in the spirit of enlightened absolutism and physiocratic doctrine. Cadastres were conducted, and *corvée* was regularized. In 1787 a legal distinction between the *demesne* or tabular land belonging to the landlord and rustical land belonging to the peasantry was introduced, and the latter category of land could no longer be appropriated by landowners and added to their *filvarky*. Under Joseph II a cadastre was prepared to serve as the basis of tax reform and urbanization standardization, which was to replace *corvée* with monetary rents. According to the preliminary cadastre of 1819, 61 percent of peasant farms could not be self-sufficient in the prevailing economic system. The Napoleonic Wars and the chaos in their wake put an end to reforms and strengthened the position of the *filvarok* owners, who provided the army with supplies. Ignoring the law of 1787, they managed to annex 1 million morgen (580,000 ha) of rustical land by 1848.

Although the land reform of 1848 gave peasants ownership of the land which previously they had had the use of,

it did not provide for the economic development of the peasant farms. Restrictions on the division of peasant holdings, their mortgaging, and their sale to nonpeasants were rarely observed. Consequently, in 1819–59 the number of peasant farms grew by 55 percent, and the number of small holdings under 5 morgens almost doubled. When the restrictions were removed in 1868, and new laws, such as the law on unrestricted credit, which legalized usury, were introduced, peasant land became subject to speculation. From 1875 to 1884 some 23,650 peasant farms were auctioned off. Some farmland was withdrawn from production, and many peasant holdings were subdivided to the point at which they could not support their owners. In 1902, 42.3 percent of farms consisted of less than 2 ha, 37.3 percent of 2–5 ha, 14.9 percent of 5–10 ha, and barely 5.5 percent of over 10 ha.

In 1852–60, large landholdings accounted for 44.8 percent of the land fund. By 1912 they accounted for 37.8 percent of the land, 16.3 percent of which belonged to latifundia of over 10,000 morgs. Thus, within 50 years 275,700 ha of the large estates were divided and sold to small holders, most of whom were Polish. Only 38,000 ha of that land was bought by Ukrainian peasants. The proletarianization of the Ukrainian peasantry grew rapidly, restrained only to some extent by immigration, spreading education, and rising national consciousness.

In Ukrainian territories under Polish control, the land reforms of 1920 and 1925 brought some changes in the land tenure system. Some large estates were broken up, and certain limitations were imposed on the sale of land. Ukrainian peasants gained hardly anything from the distribution of the parceled lands. Almost half of the farms (42 percent) in Western Ukraine were under 2 ha, 39 percent were 2–5 ha, 14 percent were 5–10 ha, and 5 percent were over 10 ha. Landholders of the last category owned 44 percent of the land. Ukrainian peasants were hit hardest by the land shortage.

Changes in the land tenure systems of Bukovyna and Transcarpathia paralleled those in Galicia. Most farms were very small: at the turn of the century in Bukovyna 56 percent of farms consisted of less than 2 ha, 29 percent of 2–5 ha, 10 percent of 5–10 ha, and only 5 percent of farms, occupying 61 percent of all the land, of over 10 ha. Rumanian agrarian reforms did little to alter the picture. In Transcarpathia under Czechoslovak rule, peasants owned only 36 percent of the land (but 88 percent of the arable land). Forty-five percent of the farms were under 2 ha, 30 percent were 2–5 ha, and 17 percent were 5–10 ha. The 8 percent of farms over 10 ha accounted for 77 percent of the land area.

During the first Soviet occupation of Western Ukraine in 1939–41, the property of the church and large landowners was nationalized. According to Soviet data 45 percent of the confiscated lands in Galicia and Volhynia was distributed among landless peasants and small landholders. Private ownership of up to 40 ha was permitted. In the summer of 1940 collectivization commenced in Western Ukraine, and by the outbreak of the German-Soviet War 14 percent of the farms had been collectivized. During the occupation in 1941–4 the Germans nationalized all Soviet government property and converted state farms and some of the collective farms into state farming enterprises. In 1944–5 the Soviets again distributed some of the confiscated land among peasants. In the summer of 1948 they launched a massive collectivization drive, which was

completed in 1951. From that time one tenure system prevailed throughout Soviet Ukraine.

Land use. Farmland is the most important category of land in Ukraine (see table 1). The high percentage of cultivated land in Ukraine at the beginning of the 20th century can be attributed only in part to geographical conditions. With little industrial development to alleviate the problems caused by high taxation and high population density, Ukrainian peasants were compelled to cultivate every patch of arable land. Even in hilly Western Ukraine, not to mention the fertile steppe and forest-steppe regions, the proportion of tilled land (49.1 percent) was higher than in either contemporary England (at 12.9 percent) or contemporary Italy (at 42.6 percent).

Intensive cultivation has led to the deterioration of the best agricultural areas in Ukraine. From 1933 to 1975 the amount of tilled land in the steppe region decreased from 80 percent to 72 percent, and in the forest-steppe region, from 77 percent to 70 percent. In spite of *land melioration in recent years, the earlier proportion of arable land has not been regained. Oddly enough, poorer soil types have fared better. Protected by bogs and mountains from too much cultivation in earlier centuries, Polisia and Transcarpathia have been subjected to extensive melioration in recent times. Between 1933 and 1975 the proportion of tilled land in Polisia increased from 30 percent to 36 percent, as a result of the draining of over 1.5 million ha of bog. In Transcarpathia the proportion of tilled land increased from 14 percent to 21 percent, at the expense of native forests. (See *Arable land.)

Technology has changed the character of hayfields and pastures. In the past, progress was measured by the conversion of hayfields and pastures into tilled land. Now hayfields and pastures themselves are being improved. Traditionally, hayfields and pastures were all either natural meadows or land left fallow in the crop rotation process. By 1979, however, one in six hayfields was cultivated; the figure for natural hayfields improved by surface and root cultivation methods would be much higher. In general the proportion of other fields varies inversely with the proportion of tilled land. Hence, in Polisia and Transcarpathia hayfields and pastures account for 25–30 percent of the territory, in the forest-steppe, for approximately 15 percent, and in the steppe, for less than 5 percent. (See *Hayfields and *Pasture.)

In comparison with those in other European countries Ukraine's forests cover a relatively small proportion of the country's area. They are concentrated mostly in Polisia and the Carpathian Mountains. Some attempts have been made to maintain forests: 159,000 ha of forest land were either regenerated or developed each year in the 1950s. But the pace of forestation declined steadily through the next two decades, so that only 73,300 ha were forested in 1980 (see *Forest management). Because they demand intensive farming techniques orchards and vineyards account for very little of the land use in the Ukrainian SSR. Nonetheless, their output figures prominently in the production of private plots and in the economy of the southern oblasts (see *Orcharding and fruit farming and *Viticulture).

Arable land use in Ukraine has been evolving in two main directions. First, the amount of land left fallow has declined to almost 5 percent. In the past the *long-fallow system, and various *short-fallow systems, served to avert soil erosion and exhaustion. Today those methods of conservation are uneconomical, but other methods of land conservation are often poorly applied in Ukraine. Fertilizer is usually in short supply. Ambitious irrigation and drainage schemes have resulted in the salinization of some regions, such as the Budzhak steppe, and have exacerbated water shortages in other regions.

The second trend in Ukrainian agriculture, increasing crop specialization, has also been poorly administered. Specialization was first officially encouraged during the collectivization period, but the ravages of the famine and insufficient funds doomed the policy to failure. It was replaced in 1933 by a policy of regional self-sufficiency, which led to wasteful practices, such as the cultivation of sugar beets in the hot steppes of Central Asia and of cotton in the cool Ukrainian steppes. When revived under N. Khrushchev, specialization was taken to extremes and resulted in economic and ecological imbalances.

C. Freeland, V. Kubijovych

Landau, Lev, b 22 January 1908 in Baku, Azerbaidzhan, d 1 April 1968 in Moscow. One of the leading theoretical physicists of the 20th century; full member of the USSR Academy of Sciences from 1946. A graduate of Leningrad University (1927), he studied at N. Bohr's Institute for Theoretical Physics in Copenhagen, headed the theoretical physics department at the Ukrainian Physical-Technical Institute in Kharkiv (1932–7), and held the chair of general physics at Kharkiv University (1935–7). In its time, Landau's school of theoretical physics in Kharkiv was the center of Soviet physics research. In 1937 Landau moved to Moscow to head the theoretical physics department at the USSR Institute for Physics Problems. Notwithstanding

his prominence, in 1938–9, during the Yezhov terror, Landau was imprisoned. Subsequently he taught at Moscow University (1943–7, 1955–68). Landau made important contributions to almost every area of physics. While in Kharkiv, he developed the theories of diamagnetism and antiferromagnetism; provided theoretical explanations of the domain structure of ferromagnets, ferromagnetic resonance, and photoelectric effects in semiconductors (with E. Lifshits); and did pioneering work on the kinetics of electron plasma. Among his later contributions, his theory of superfluidity, for which he received the Nobel Prize in 1962, and his theory of superconductivity deserve to be singled out.

Landforms (*heomorfolohiia*). Discrete features of the earth's land surface, the shape, form, and nature of which were studied in the past as part of the discipline of physiography. That discipline's modern derivative, which emphasizes the study of the origin of landforms, is known as geomorphology.

The origins of landforms. The present landforms of Ukraine, like those in other parts of the world, exist in a particular stage of their formation by the interaction of internal forces of the earth and external agents. The movement of the earth's crust and the resulting geological structure have had a profound influence on the shapes and sizes of landforms. Among the land-sculpting agents, running water and glaciers have had the greatest effect on the landforms of Ukraine; wave action and wind have had less impact.

Variation in the geological structure has resulted in a great range of types of bedrock in Ukraine that offers varying resistance to all agents of weathering and erosion. The same erosive forces affect hard crystalline rocks, soluble limestones, soft clays, and friable loess. The different types of bedrock and, in turn, of parent material were

formed in different ways in different geological periods. Tectonic processes have had a direct effect on the formation of major landforms. Mountains were formed in a southern belt of recent orogenic movement – the Carpathians, the Crimean Mountains, and the Caucasus (see map 1). In a middle belt some upland areas, such as the Ukrainian Crystalline Shield and, to a lesser degree, the Donets Ridge, have experienced prolonged periods of uplift. Other regions to the north and south include lowlands or basins that have experienced subsidence.

Areas of most intense uplift have been subjected to intensive erosion, mostly by running water, which has cut deep valleys into the landmasses. In the mountains the resulting local relief exceeds 500 m (see map 2). Uplands with local relief of 80–300 m are common. Areas of down-sinking, by contrast, have been characterized by aggradation by marine, lacustrine, fluvial, and even eolian deposition. The relief in such areas has been on the decline and seldom exceeds 40 m. Boundaries between areas of uplift and subsidence are expressed in elevational differences, as along the northern edge of Podilia and the high right bank of the Dnieper. Rivers often follow such boundaries – the Boh River along the southwestern edge of the Crystalline Shield, for example, or the Don along the northeastern edge of the Voronezh Massif.

Glaciation played an important part in the formation of the landforms of Ukraine. Except for a belt of folded mountains, most of the uplands and lowlands were covered by thick layers of Quaternary deposits that derived, in one way or another, from glaciation. Northern Ukraine either underwent glaciation or was located near the edge of the Pleistocene continental ice sheet and thereby gained either glacial or glacio-fluvial accumulations. Areas to the south, by contrast, were free of ice and ponding but accumulated thick loess deposits, possibly originating from periglacial dust carried by the wind. Running water

1 LANDFORM REGIONS

2 LOCAL VARIATIONS OF ELEVATION

carved gullies in the easily erodible loess, thereby creating a landscape of fluvial erosion.

After the ice sheets had receded, the entire territory of Ukraine was subjected to the external forces responsible for the shaping of the present landforms. They are essentially minor topographic changes associated with surface water erosion, riverbank erosion and fluvial deposition, wind erosion and deposition, shoreline and coastal erosion and deposition, and other processes.

Landform assemblages. There are four distinctive landform assemblages in Ukraine (see map 3), each associated with a different prevailing process: (1) mountain landforms, (2) landforms associated with glacial topography, (3) landforms associated with the fluvial erosion of loess, and (4) coastal landforms along the Black Sea and the Sea of Azov. Within each assemblage there are recognizable morphological variations.

Mountain landforms are associated with powerful endogenous mountain-building forces (orogeny) and intensive subsequent erosion. Young, folded mountains belonging to the Alpine mountain system are found in the southern fringes of Ukraine – the Carpathians, the Crimean Mountains, and the Caucasus.

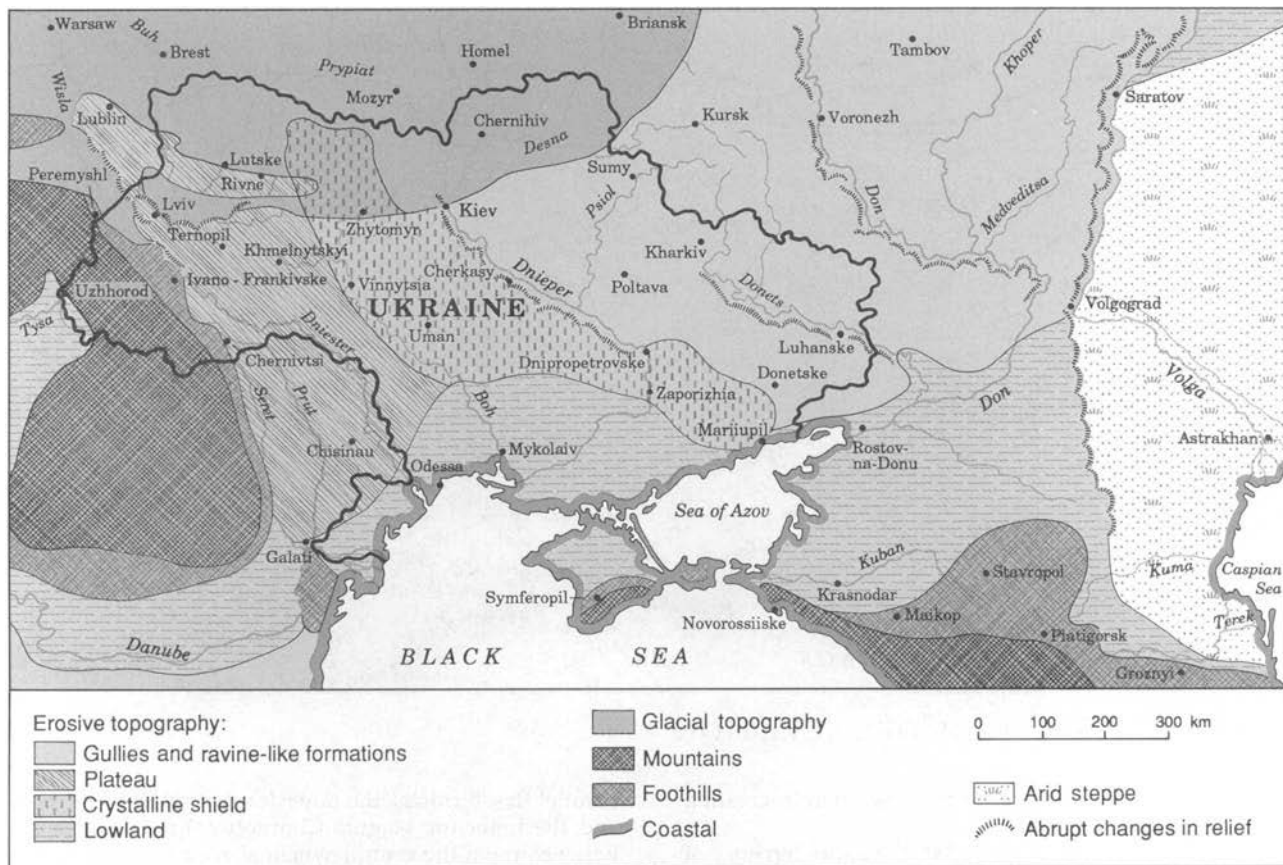

The Carpathians, at present of medium elevation, underwent a number of orogenic movements. The main phase of folding occurred in the Tertiary period, when the Carpathians rose out of the Paratethys Sea. Subjected to great lateral compression from the south, the upwarped flysch strata, consisting of interbedded coarse clastic materials, sandstones, and shales, buckled into large nappes and overthrust blocks that moved northeastward toward the foreland and covered the younger strata of Subcarpathia. Although the softer materials of the folded and faulted structures were subsequently eroded, those associated with the harder compressed rock remained as two

parallel flysch ridges: the outer (or overthrust) fold zone and the inner (or Magura-Chornohora) anticlinal zone. Between them the central synclinal zone (also known as the Middle Carpathian Depression) was further accentuated by the erosion of the soft underlying shales and sandstones. The extreme southern belt of the Ukrainian Carpathians (the Volcanic Carpathians, or the Vyhorlat-Tupyi group) was formed by effusives associated with Neogene faulting. That chain of mountains and conic peaks is separated from the inner anticlinal zone of the flysch belt by a long valley developed on soft shales.

Landforms of the flysch Carpathians are typical of folded mountains of medium elevation. Gently sloping, broad, and little-dissected parallel ridges and valleys contrast with the deeply incised (up to 1,000 m) transverse valleys that cut through the ridges. The transverse valleys, containing the main tributaries of the Dniester River in the north and those of the Tysa River in the south, are characterized by steep slopes, rocky bottoms, rapids, and even waterfalls. In turn the affluents of the aforementioned tributaries have carved out side valleys in soft shales parallel to the mountain ridges, thereby creating a trellised drainage pattern controlled by the folded strata. Only the highest parts of the Carpathians, mainly the Hutsul Alps and the Chornohora, possess traces of mountain glaciation, such as cirques, hanging troughs, moraines, several small moraine-dammed lakes, and talus cones below very steep slopes resulting from rock slides.

The Volcanic Carpathians are fragmented by the Tysa and its tributaries into a chain of discrete mountains: the Vyhorlat, Makovytsia, Syniak, Velykyi Dil, Tupyi, and Hutyn. They are characterized by massive, broad ridges and dormant volcanic cones topped with craters or calderas (in places filled with water).

Subcarpathia, abutting to the northeast of the Car-

3 LANDSCAPES

pathians, is an area of transition from mountains to lowlands. It consists of foothills interspersed with some basins and lowlands along the Dniester and the Prut rivers. Structurally the uplands are usually broad anticlines, and the basins depressions. The uplands (300–500 m above sea level, or asl) rise above the valleys of the Dniester tributaries that dissect them. Valleys often contain up to six or seven terraces and occasional stone pavements. The basins (the Stanyslaviv Depression and the Kolomyia-Chernivtsi Lowland) contain alluvial deposits which have been eroded by the present rivers to form two or three terraces. The Upper Dniester Lowland is an alluvial-outwash plain, containing deposits brought by streams from the Carpathians and glacial meltwaters from the northwest. The Sian Lowland contains moraine, glacio-fluvial, and alluvial deposits. There continental glaciation contributed to the washboardlike relief and the presence of surface boulders (erratics) and kame terraces.

The Crimean Mountains are remnants of a large folded system, part of which downfaulted below sea level. Repeated uplifting and subsiding during the Tertiary and the Quaternary periods caused active erosion to alternate with peneplanation.

The Crimean Mountains consist of three parallel ranges in the west and two in the east. The low northern ranges (300–500 m asl) are longitudinal monoclines of the northern wing of the Crimean anticline. Hence they have gentle northern slopes and steep southward-facing escarpments

(cuestas) which appear wherever their Tertiary limestone is exposed. The cuestas face insular, tablelike mountains that rise gradually to form the highest coastal range, the Yaila. It is the axis of the anticline and consists of hard, Jurassic limestone. The top of the range forms a high (1,000–1,500 m asl) plateau, which drops suddenly (300–800 m) to the southern coast. Toward the east the mountains break up into numerous ridges and peaks and decline to below 1,000 m asl.

The Yaila, notably its western part, is known for karst features of the Mediterranean type. Karoo fields prevail in areas devoid of topsoil. Funnel-like sinkholes, gullies, and precipitous ravines with year-round snow are some of the surface manifestations of rapid water seepage and its dissolving action on the limestone. Caves with stalactites and stalagmites (notably the Byndash-Koba and the Suuk-Koba, near Chatyr-Dag), together with underground lakes and rivers, constitute the subterranean karst manifestations. The southern slopes of the Yaila are dissected by deep canyons.

The northwestern section of the Caucasus Mountains lies in Ukrainian ethnographic territory. It consists of the western terminus of the Great Caucasus Range, which corresponds to a narrow, western end of the Caucasus anticline, and is bounded by the Kuban Lowland to the north and the Novorosiiske syncline (along the coast) to the south.

The extreme western end of the Great Caucasus, also

known as the Black Sea Caucasus, is composed of Eocene flysch as well as Cretaceous and Jurassic limestones. The main ridge (600–900 m asl), along with occasional lower parallel ridges, forms a gentle landscape characteristic of mountains of medium elevation. From the coast north of Anapa the ridge rises gradually eastward, to reach a peak of 2,867 m asl at Mt Fisht. East of Mt Fisht the Great Caucasus continues as the Western Caucasus and then joins the Central Caucasus.

North of the main ridge of the Western Caucasus, but south of the Eastern Kuban Lowland, is an uplifted and fragmented fringe of the Scythian Platform. From the north it forms a rising monocline. Capped with hard Jurassic and Cretaceous limestones, it reveals two parallel southward-facing high cuestas, the Chorni (Russian: Chernye) Mountains (1,000–1,500 m asl) and the Skeliastyi (Russian: Skalistyi) Ridge (1,500–2,000 m asl). Between the latter and the main ridge of the Western Caucasus is a long and narrow depression, which makes up the southernmost fringe of the Scythian Platform. The Kuban and its tributaries, originating from the Western Caucasus, carved parallel valleys across the depression and deep, narrow gaps through the cuestas, thereby fragmenting them into a number of separate ridges. The rivers and streams there form a typically trellised drainage pattern.

North of the Caucasus and east of the Kuban Lowland, landforms of pronounced relief associated with the foothills extend to the Stavropol Upland. That plateau (500–800 m asl in the west, but only 200–400 m asl in the east) is an uplifted, slightly tilted and eroded fragment of the Scythian Platform. Rivers and seasonal streams have cut deep (100–200 m) valleys into the Tertiary sandstones and limestones. In the south, between the Stavropol Upland and the Central Caucasus, stands a cluster of laccoliths – irregular formations of igneous rocks that were intruded between layers of sedimentary rocks. Now they remain exposed as high, individual hills or small mountains (1,000–1,400 m asl) in the vicinity of Piatigorsk.

Glacial landforms were shaped by the processes associated with continental ice sheets. Glacial landforms occur throughout the northern Ukrainian lowland, north of the line Lublin–Kholm–Volodymyr–Volynskiy–Zhytomyr–Kiev–Nizhen–Putyvl. They are also found in the Sian and upper Dniester lowlands.

Three types of glacial landform associations exist: (1) those associated with the ground moraine formed under an ice sheet, (2) those associated with the terminal moraine formed along an ice front, and (3) those associated with the outwash plains formed by braided streams of meltwater flowing out of the glacier. Glacial landforms do not coincide precisely with the area once covered by the ice sheet. Some formerly glaciated areas (such as the Dnieper ice lobe in the Dnieper Lowland) were subsequently covered with thick layers of loess. Meanwhile, outwash plains often reached southward beyond the greatest extent of the ice sheet.

Ground moraine landforms prevail in the basins of the upper Dnieper, the Desna, and the middle Buh, as well as in the margins of Polisia. In general they appear as occasional low hills rising gently over a predominantly flat to gently undulating plain. Fields of such hills, facing mostly in the same (northeast to southwest) direction, have been identified as eskers and kames or kamelike hills in an area 25–100 km to the north of Zhytomyr, near what was once

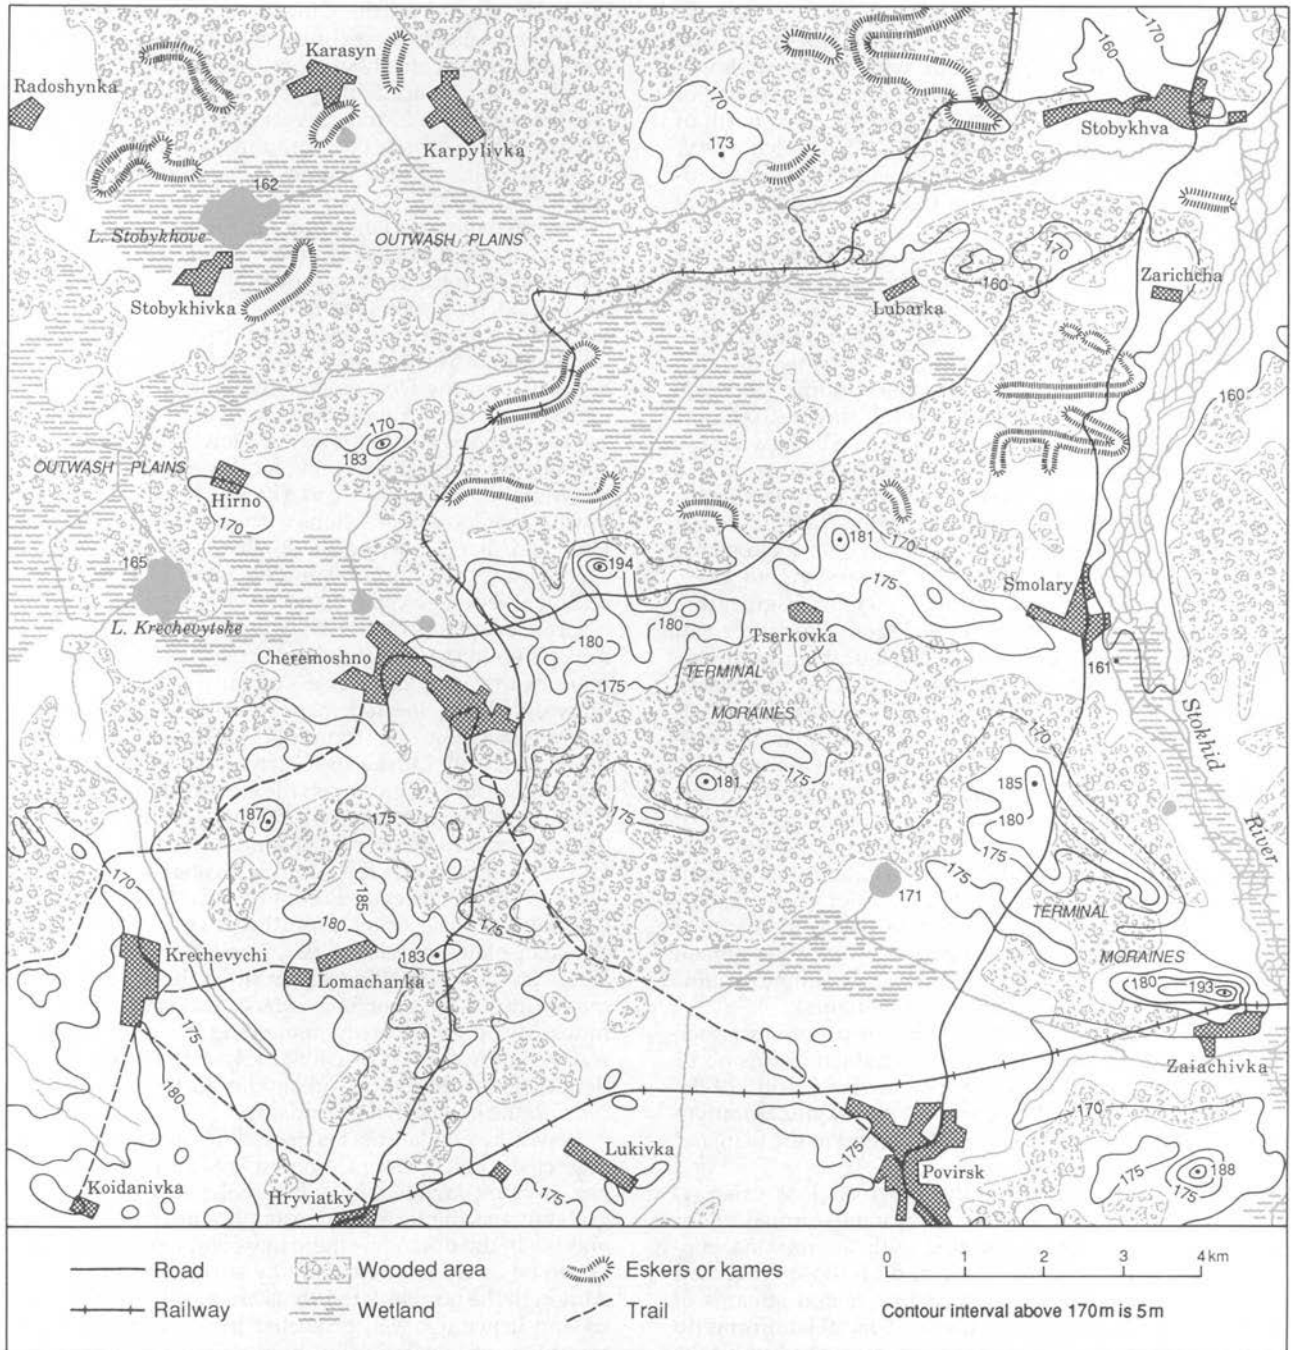

the western edge of the Dnieper ice lobe. Whereas the ground moraine consists of till composed mostly of clay and some interspersed boulders, the eskers and kames, as former beds of glacial and periglacial streams, consist of water-worked sands and gravels. After the ice sheet melted, the surface was exposed to the accumulation of outwash deposits, sedimentation in ponds, and wind and water erosion.

Terminal moraine landforms are found in the Volodava area, near Lake Svytiaz, Liuboml, and Kovel. They become more pronounced east of Kovel near Poverske (see map 4), on the western side of the Stokhid River, and then form a broad, crescent-shaped belt that extends eastward north of Manevychi through Volodymyrets and Dubrovytsia, on the west side of the Horyn River. Hills of varied composition (boulder, sandy and clayey till) rise 20–40 m above the flat, swampy lowland in successive curving rows, usually forming local watersheds. Between the morainic hills are broad river valleys and swampy lowlands or local depressions with occasional kettle lakes. Here and there, crossing the lowlands, are long, narrow eskers (map 4), which originated as bottom deposits of sediment-laden glacial streams.

Outwash plains mostly lie in front of the terminal moraine, though there are lowland areas behind the terminal moraine that may also possess an outwash surface. Major outwash plains, located in front of the Dnieper (maximum) glaciation, are found in southcentral Polisia (a broad area from Lutske and Sarny in the west to just west of Korosten and Zhytomyr in the east) and in Little Polisia (from Nesterov, north of Lviv, toward Slavuta in the east). Outwash plains interspersed among terminal moraines and ground moraines are found in western Polisia (northwest of Lutske), Kievan Polisia (northwest of Kiev), and Chernihiv Polisia (mostly northeast of Chernihiv). The outwash plains consist of flat, glacio-fluvial and glacio-lacustrine deposits. Wind action sifted the sandy surfaces into dunes, and poor subsurface drainage resulted in much of the lower areas' remaining in small bodies of water and swamps. Occasional low, flat-topped hills, or denudational remnants, add another form of topographic relief to the generally flat landscape.

Water erosion landforms prevail in areas that were not subjected to glaciation. Common landforms include gullies, ravines, landslides, and loess karst. Conditions for gullying and the formation of ravines are particularly favorable in the uplands, where loess and other friable strata can be easily washed away by surface running water. Although the nonglaciated areas are mostly lightly forested and hence not well protected from the elements, the trampling of vegetation by herd animals and especially the removal of natural vegetation by human activity have intensified both water and wind erosion.

Despite the presence of loess cover throughout the areas dominated by water erosion landforms, there are distinct regional variations associated with elevation and geology. Thus, after tectonic movements raised the Western Ukrainian uplands, a new erosion cycle initiated the sculpting of the Cretaceous-Tertiary limestones into a plateau landscape of scarps, gorges, ravines, and gullies. In central Ukraine, where the Ukrainian Crystalline Shield is close to the surface, a landscape of less deeply incised, rocky-bottomed river valleys developed. Farther east, in the Dnieper Lowland and the Central Upland, a landscape

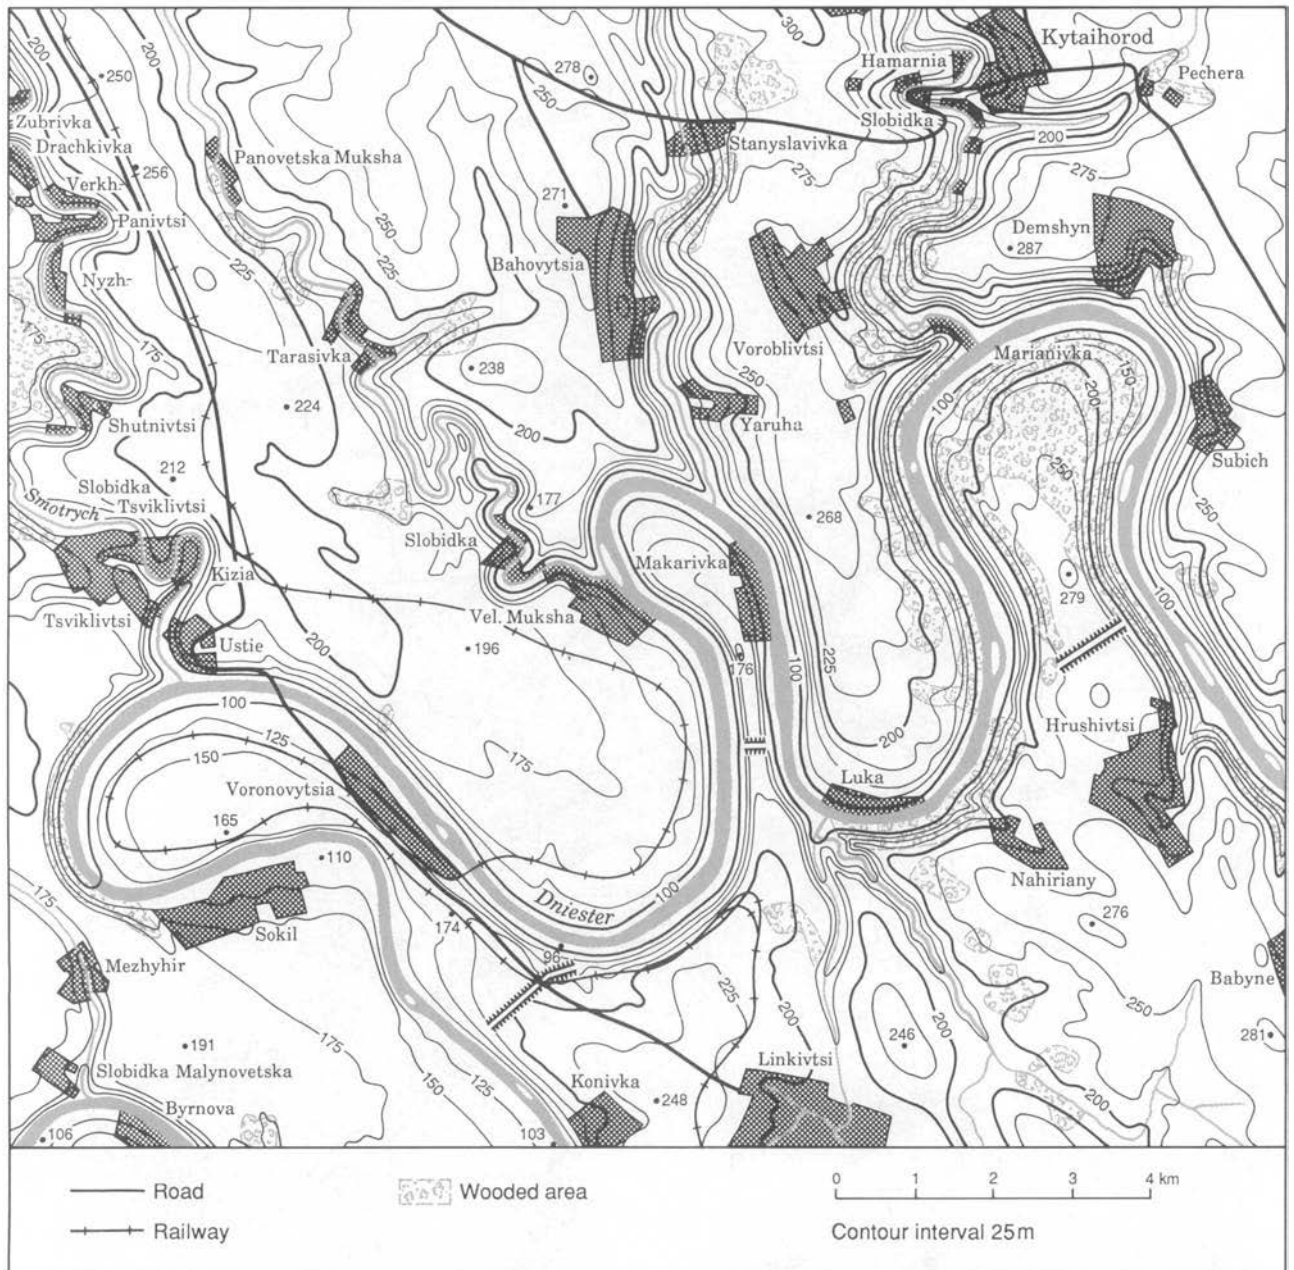

4 GLACIAL LANDSCAPE

of gullies and ravelike formations evolved. In the Black Sea Lowland the plains above the river valleys developed many small surface depressions known as *pody*.

Plateau landforms are found in the Roztochia Upland, Podolian Upland, Volhynia-Kholm Upland, and Pokutian-Bessarabian Upland. They all consist of plains dissected by deep valleys or gullies, although local variations occur in which a complex of specific landforms are prevalent. The most spectacular canyons are found along the southern side of the Podolian Upland. The Dniester River, which bounds the Podolian Upland in the south, occupies

the largest gorge. Both the Dniester River and its tributaries have deeply incised meanders (see map 5). Up river, along the northern side of the Pokutian Upland, surface karst features, such as sinkholes and caves, become prominent. Still farther to the northwest, on the northern side of the Dniester River, the chalk deposits of the Opilia Upland (in the western end of Podilia) are carved into wider, more gently sloping tributary river valleys, and form rolling terrain. Northwest of Lviv a chalk ridge forms the Roztochia water divide, which was subjected to deep gullying. Southeast of Lviv and then extending eastward, the north-

5 PLATEAU AND CANYON LANDSCAPE

ern side of the Podolian Upland is characterized by a severely gullied or ravined escarpment along which are a number of isolated plateau remnants, or mesas (see map 6). To the north the Volhynia-Kholm Upland, underlain by chalk, forms a gully-eroded landscape similar to that of the Roztochia.

The Crystalline Shield landforms represent another variation of the plains dissected by rivers, ravines, and gullies. Once river valleys cut through the surface loess and the thin, underlying Tertiary sediments, their characteristics change as they reach and begin to erode the Crystalline Shield. The river valleys narrow, their longitudinal profiles become irregular, and their stream channels become rocky and replete with rapids. Crystalline rocks form steep walls of gorges, as along the Dnieper River be-

tween the cities of Dnipropetrovske and Zaporizhia, along the Dniester River near Yampil, and along the middle segment of the Boh River and its tributaries. Fault lines in the Ukrainian Crystalline Shield have controlled the alignment of many rivers. Almost the entire Boh River follows the tectonic rim of the Ukrainian Crystalline Shield, as does the Dnieper River from Kiev to Dnipropetrovske. The high right bank of the Dnieper, which is underlain by the Ukrainian Crystalline Shield, rises 50–160 m above the Dnieper Lowland on the other side of the river. The loess-covered high right bank, notably at Kiev, is dissected by a number of gullies and ravines (see map 7). The sandy left bank, by contrast, is nearly flat and is poorly drained. It possesses characteristics of Pleistocene glacio-fluvial deposits associated with the Dnieper ice lobe that pushed

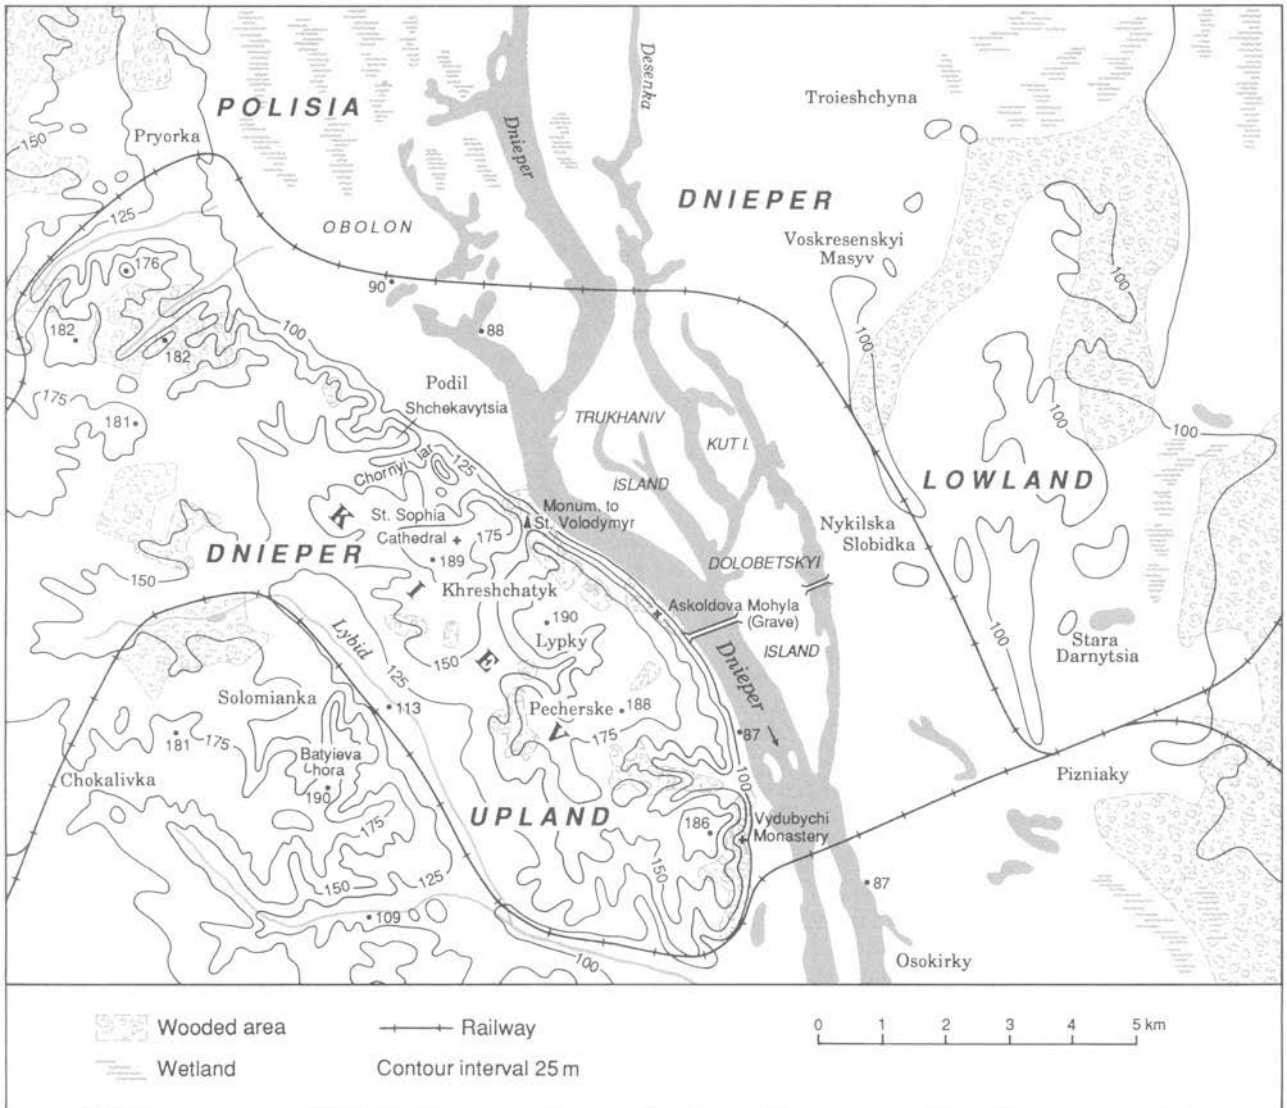

6 LVIV AND VICINITY

down the Dnieper Lowland and then melted. As the rising Crystalline Shield dammed the southward flow of the lobe's outwash water, the lowland accumulated large quantities of sand, which was subsequently wind-worked on the Dnieper terraces into dunes.

Gullies and ravelike formations not only dominate the southern reaches of the Central Upland and the Do-

nets Ridge but are an important component of the landscape in the higher elevations of the Dnieper Lowland. Contributing to their evolution are the presence of a thick loess cover underlain by unconsolidated sedimentary deposits, summer downpours typical of a continental climate, and the absence of forest cover. A distinct feature of the landscape is the partially trellised drainage pattern in-

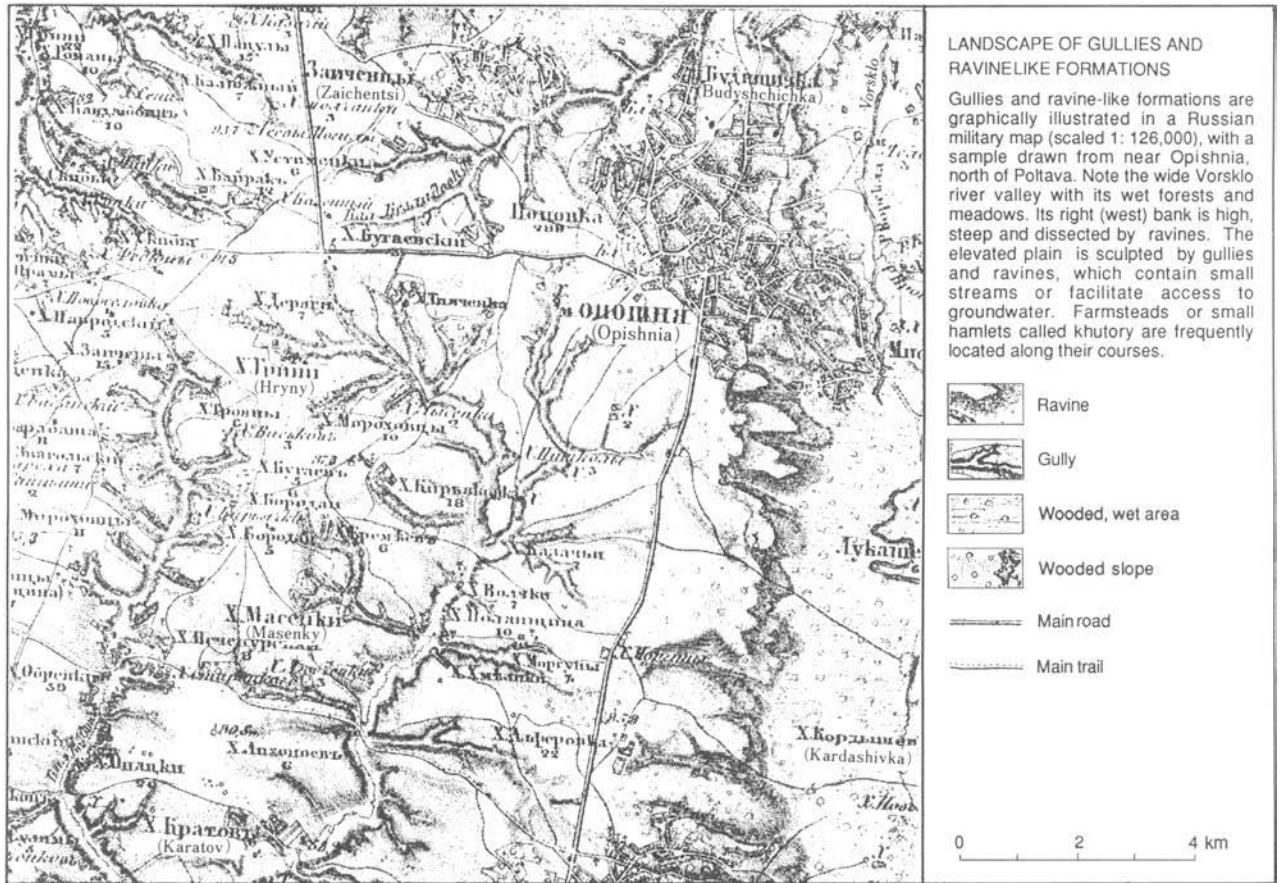

7 KIEV AREA

volving repeated asymmetrical valleys of the parallel-flowing rivers. Each river valley possesses a high right (western) bank, dissected by ravines and gullies, and a low left (eastern) bank with a wide floodplain containing marshes and oxbow lakes (see map 8). Above the floodplain the lower terraces of the left bank often possess sand dunes. Eastward the higher terraces merge with the gently rising, slightly undulating plain, toward the watershed with the next river. The surface, covered with thick layers of loess, is dissected by ravines and gullies.

The loess and alluvial landforms of the Black Sea and Sea of Azov regions as well as the Kuban Lowlands generally lack ravine and gully features, except where there is a marked variation in local relief. The flat plains above the river valleys, notably the Black Sea Lowland between the Boh and the Molochna rivers, contain many small, saucer-like depressions (*podly*). Ranging in length from several meters to several kilometers and in depth from several centimeters to five or six meters, they are filled with water

in the spring and support succulent grass in the summer. Higher water tables in the Kuban Lowland support many small lakes that fill the depressions throughout the year and a denser, year-round river network that connects them.

Proximity to the sea affected the geomorphology of the lower portions of the lowlands. In the early Tertiary period the Pontic Sea transgression left its mark in the form of relict low coastal bluffs and beaches between the Inhul and the Molochna rivers (approx 75–100 km inland from the present Black Sea coast). Also apparent are remnants of the old deltaic deposits of the Tertiary period in those places where the pre-Dnieper, the pre-Danube, and the pre-Kuban flowed into the sea. A decline of the sea level in the Pleistocene accelerated river erosion, but its subsequent rise to the present level and a gentle subsidence along the present coast contributed to river aggradation. The result was the formation of broad floodplains with braided streams and little lakes or floodplains containing

8 LANDSCAPE OF GULLIES AND RAVINELIKE FORMATIONS

streams with broad meanders and many oxbow lakes.

Coastal landforms are in an active state of development along the Black Sea and the Sea of Azov. They are shaped by water movement – wave action, longshore currents, and tides. Fluvial action – the sculpting of the land surface or the infusion of silt-laden water by rivers – also affects the formation of coastal landforms. Such interaction is particularly evident in the formation of deltas.

The Danube Delta is a flat and swampy alluvial plain with many lakes. Three principal estuaries of the Danube, the Kiliia, the Sulina, and the Sfăintu Gheorghe, flow into the sea, but there are more interconnected distributaries and small lakes. Offshore bars separate the delta from the sea and threaten navigation at low tide. Spring floods inundate the delta. Levees form the banks along the major channels and block off local tributaries, which usually form terminal lakes.

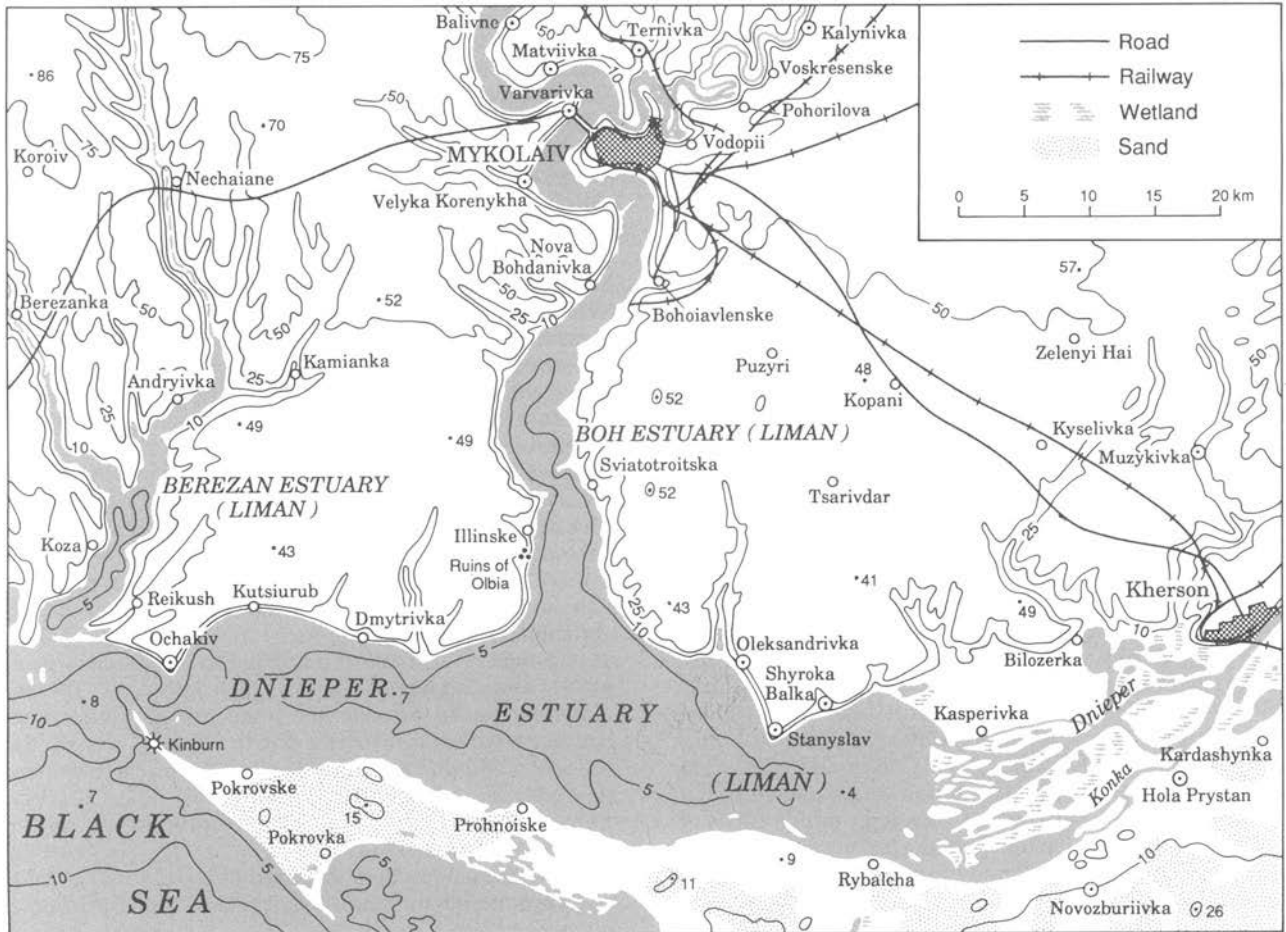

Liman-type estuaries and coastal bluffs extend from the Danube to the Dnieper River. Those features were formed in conjunction with coastal submergence. The headlands, made up of Tertiary limestone underlain by soft clays, were eroded back to produce a straightened, clifflike coast with a narrow beach at the bottom of the bluff. Coastal submergence and the resulting marine transgression into river valleys formed broad, flooded estuaries. The latter became either partly separated or completely cut off from the sea by barrier islands or barrier beaches (respectively) built up by longshore currents with material eroded from the headlands, and thus assumed the shape of the classical

limans. The larger rivers, such as the Dniester, the Boh, and the Dnieper, maintained a large enough discharge to clear the marine littoral deposits. The small rivers, however, did not generate enough power to break through the barrier beaches that sealed off their limans from the sea.

The limans and coastal bluffs were also formed at higher elevations, when a relatively brief but recent marine transgression occurred on the coast in earlier periods. The Dnieper Liman, for example, shows evidence of a relict coastal bluff of the Pleistocene epoch (Dnieper age), now found somewhat inland, which runs from the present coast at Shyroka Balka eastward to Kherson (note the respective 10- to 25-m contours in map 9).

Shallow bays and long, narrow spits dominate the coast south and east of the Dnieper-Boh Estuary. The configuration is related to the unconsolidated and easily erodible materials of the low, flat coastal plain that was formed as the pre-Dnieper delta of the Middle and Upper Pliocene and renewed in the Polisia age of the Pleistocene. Subsequently the longshore currents straightened out the old deltaic headland and carried the material both west and east to form, respectively, the Tendriv Spit and Dzharlyhach Island.

Another variation of coastal bluffs with limans and spits is found along the northern coast of the Sea of Azov. There spits occur alongside the mouths of rivers that discharge sediment-laden water into the sea. They consist of river-fed sediment which has been shaped by longshore currents into a series of southwestward-pointing hooks.

9 DNEIPER ESTUARY

The Arabat Spit, located on the western side of the Sea of Azov and enclosing the salty Syvash Lake of the Crimea, is the longest in Ukraine, at 113 km. On the eastern side of the Sea of Azov the coastal bluffs along Tahanrih Bay change in the south to low, accumulative sandy shorelines enclosing the lakes and bays of the Kuban Delta and the Taman Peninsula.

The western coast of the Crimea is a combination of rock platforms along the Tarkhankut Upland, an accumulative sandy plain along Kalamitska Bay, an abrasive bluff coastline just south of it, and another rock platform coast along the western terminus of the Crimean Mountains. Since the southwestern coast is perpendicular to the Crimean Mountains, the valleys in the mountains form deep bays which favor the building of ports. The southern coast of the Crimea, which parallels the Yaila Range, is an abrasive mountainous coast, with narrow, pebbly beaches in small local embayments. Landforms along the promontories include wave-cut cliffs, sea caves, stacks, and arches. A similar mountainous coast is found along the Black Sea Caucasus. The Kerch Peninsula, by contrast, is bounded by a combination of rock platforms, abrasive-accumulative coasts in open bays, and accumulative sandy plains in sheltered embayments.

Landless peasants (*pidsusidky* 'those under neighbors'). The collective name for various categories of impoverished peasants in 16th- to 18th-century Ukraine who did not have their own land but worked for neighbors who did – primarily Cossack captains, common Cossacks, and monasteries – in exchange for shelter and garden plots. Some *pidsusidky* had their own homes and even oxen and farm tools, but not arable land. Others were peasants and Cossacks who sold their land to neighbors to avoid taxation, military service, and other feudal obligations. Because many peasants chose to sell, in the 1690s the government of the Hetman state in Left-Bank Ukraine began restricting the possibilities and forcing *pidsusidky* to perform *corvée*. In the Hetman state in 1732, 7 percent of the peasant and Cossack households included *pidsusidky*. Most of the *pidsusidky* in Left-Bank and Slobidska Ukraine became serfs after Catherine II introduced serfdom there in 1783.

Landowners (*zemlevlasnyky, pomishchyky*). The owners of large and medium-sized estates, who constituted the leading social group in Ukraine before 1917 as a result of their economic strength, political influence, and (in the case of the nobility) estate privileges. Their Ukrainian designation was derived from the practice of *pomistia* or service tenure in the Russian Empire, which existed in the 15th to 18th centuries concurrently with the older *votchyny*, or patrimonial estates. By the 18th century *pomistia* holdings had virtually become hereditary. Consequently, in 1714 Peter I instituted a single system of land ownership that abolished the legal distinction between the two types of holding. From then the term *pomishchyk* was increasingly used in Ukraine, where landowners had previously been known as *didychi* (full and hereditary landowners) or *derzhavtsi* (service-tenure holders). Until the mid-19th century the right to own land and the peasants (serfs) bound to it (or to the person of the landowner) was exclusively in the hands of the *nobility. After the reforms in 1861 changed the *land tenure system, a substantial number of merchants became landowners, albeit without the estate privileges or political influence of the aristocracy.

The national composition of landowners in Ukraine was not homogeneous. In the central and eastern parts of the country the *didychi* and *derzhavtsi* were almost exclusively Ukrainian until the 16th century. In Western Ukraine the landowning class included Ukrainians, Poles, and (in Transcarpathia) Hungarians; on the borders of Ukraine and Belarus, Belarusian-Lithuanian landowners made their presence felt. After the Union of Lublin Polish magnates and nobility began settling in central Ukraine. Beginning with the 16th century, Russian *pomishchyky* began arriving on the northern reaches of Left-Bank Ukraine. During the tenure of Hetman B. Khmelnytsky and the subsequent Ruin Polish landowners disappeared completely from Left-Bank Ukraine and were largely absent from the Right Bank until the 18th century. Subsequently, they continued to be an influential force, right up to 1917, notwithstanding certain confiscations of property by the Russian government in the wake of the partitions of Poland and the Polish insurrections of 1830–1 and 1863–4. Among the owners of massive latifundia during that period were the *Potocki, Branicki, *Sanguszko, and Lubomirski families.

Starting in the late 18th century many lands formerly

controlled by Polish magnates fell into the hands of Russian landowners (such as G. Potemkin and the Samoilo, Bobrinsky, Engelhardt, Stroganov, Shuvalov, Vorontsov, Vorontsov-Dashkov, Lopukhin, Demidov, San-Donato, Naryshkin, Balashov, and Uvarov families) through government redistribution, sale (occasionally forced), or inheritance. Some Ukrainian families, including the *Hudovych and *Troshchynsky, also benefited from such shifts in ownership.

The Ukrainian landowners of Left-Bank and Slobidska Ukraine, largely the descendants of Cossack officers, constituted a majority of the large property owners in those areas until the Revolution of 1917. There emerged a number of Russian or other foreign holdings in the early 18th century, however, alongside the older estates of the Galagan, Hudovych, Kapnist, Khanenko, Kochubei, Lashkevych, Myloradovych, Sudiienko, Skoropadsky, Tarnovsky, and other families. They included, among others, the Rumiantsev, Golitsyn, Dolgorukov, Yusypov, and Meklenburg-Strelitz lines. A number of Ukrainian estates passed in the 19th century from Ukrainian to Russian control by way of marriage, such as those acquired by the Lamsdorf-Galagan, Musin-Pushkin, Repnin, and Zhemchuzhnikov families.

In Southern Ukraine the Ukrainian landowners were mostly descendants of Zaporozhian Cossacks. The region's numerous Russian and other foreign landowners had acquired estates by tsarist edict (mostly during the reign of Catherine II) or through purchase. The more important foreign landowners included the Potemkin, Viazemsky, Prozorovsky, Mordvinov, Vorontsov, Kankrin, Popov, and Romanov families.

Merchant landowners appeared in Ukraine in the mid-19th century, notably the Tereshchenko (from the Chernihiv region) and Kharytonenko (from the Kharkiv region) families. In the late 19th century a few wealthy Ukrainian landowners (Ye. *Chykalenko, V. *Leontovych, and others) became active in the Ukrainian national movement.

Western Ukraine. There were a substantial number of Ukrainian boyars in the Principality of Galicia-Volhynia until the mid-14th century. After the Polish annexation of Galicia most of them lost their estates. Many of them traveled eastward to Volhynia, where a number of Ukrainian princely and magnate families (Chetvertynsky, Czartoryski, Ostrozky, Sanguszko, Wiśniowiecki, Zbaraski, and others) consolidated themselves under Lithuanian rule. In addition new Ukrainian-Belarusian-Lithuanian landowning families (Koretsky, Zahorovsky, Zaslawski, and others) emerged. In Galicia, the Kholm region, and Podlachia wealthy Polish families, such as the Branicki, Dzieduszycki, Poniatowski, Potocki, Rzewuski, and Tarnowski, established huge latifundia. Only a few of the old Rus' boyar families continued to hold their estates, among them the Bybelsky, Danylovych, Melshtynsky, Shumliansky, and Tustanovsky lines.

In Bukovyna, which was part of the Galicia-Volhynia state in the 12th to 14th centuries and then under Moldavia, estates were granted to boyars for state and military service as well as to certain established families that later became assimilated.

In Transcarpathia, through the 13th to 17th centuries (particularly after the seizure of the crown by the Anjou dynasty in the early 14th century) the largest estates were given to Hungarian or Hungarianized Italian, French,

Wallachian, and German magnates. Among them were the Aba, Bokshai, Dovhai (a Ukrainian feudal line), Draha, Drugeth, Ilosvaj, Paloczi, Perényi, Petenko, and Ragali families.

Initially the estates were granted to foreigners in Western Ukraine as service tenure, but the lands soon became hereditary. Under the influence of a foreign elite the old Rus' families assimilated with foreign (especially Polish) landowners, often through conversion to the Latin rite upon marriage. Only a few families held to the traditional Rus' religion and nationality; most of them were petty gentry.

In 1785, not long after the annexation of Galicia by Austria, a register was made of 1,500 local *didychi* who controlled 5,300 *filwarki*, or manors. Among them were 40 magnates who controlled 2,800 manors. Some of that group (including the Jabłonowski, Lubomirski, Potocki, Rzewuski, Sanguszkó, and Zamoyski families) owned estates in Russian-controlled Ukraine. Owing to a curial electoral system Galician and Bukovynian *didychi* exercised a decisive influence in local affairs even after the adoption of the Austrian constitutions of 1860 and 1867 (in 1883, they constituted 70 percent of the parliamentary representatives in the Galician Diet). They also carried weight in the central Viennese government and parliament.

The owners of large estates in Galicia and Bukovyna usually did not administer them themselves; they preferred to hire managers or to rent them out. As a result, by the late 19th century many estates had gone into decline, and were changing hands frequently or being auctioned following bankruptcy. Ownership often passed to various repossessors and creditors. The estates could also be parceled out to the local peasantry. Many estates in Galicia were taken over by Jews and Austrian Germans. In the 1870s, Viennese and other financial institutions began buying up large tracts of the region's forest. Among the notable Ukrainian *didychi* of Western Ukraine were T. *Dembytsky, I. *Fedorovych, and the Sheptytsky and Tyshkevych families. In Bukovyna Rumanian boyar landowners gradually were joined by Armenians, Germans, and Jews.

Despite the introduction of land reforms and other political changes during the interwar period, Polish landowners in Galicia and northwestern Ukraine managed to maintain their grasp on their holdings to a greater extent than in Poland proper. Similarly, Rumanian landowners maintained their positions in Bukovyna. In Transcarpathia Ukrainians benefited only marginally from land reform. In all those areas the landowners remained influential, although they lost their estate privileges and entrenched political positions.

Landscape art. The depiction of natural scenery. In Ukrainian art highly conventionalized landscape elements were used in icons (eg, *The Transfiguration* [14th century] in the Church of the Mother of God in Busovysko, near Turka, Galicia). Architectural settings became part of the separately enclosed scenes in icons illustrating the lives of the saints (eg, in the icon of *SS Cosmas and Damian* [15th century] from Tylych in the Lemko region). During the Renaissance landscapes in icons became less schematized and began looking more like the surrounding Ukrainian countryside (eg, in *The Dream of Jacob* [1650] in the iconostasis of the Church of the Holy Ghost in Drohobych). Architecture and local scenery were important elements in the icons of I. Rutkovych (*Christ by the Well* [1697–9] in the iconostasis of the church in Skvariava Nova, near Zhovkva, Galicia) and Y. Kondzelevych (*The Dormition* in the Bialystok Monastery [17th century]). Landscapes also appeared as backgrounds to portraits (portrait of Yevdokiia Zhuravko [18th century]).

Some of the earliest landscapes were settings for religious engravings. At first they were variations on landscapes borrowed from Western European models, but later, local elements emerged. In 1669 Master Illia depicted the Dnieper River in his engraving *The Coming of Iconographers from Constantinople*. Similar engravings by L. Tarasevych showed an even greater preoccupation with local scenery. In 1674 N. Zubrytsky engraved the siege of the Pochaiv Lavra, and in 1699 D. Sinkevych engraved the architectural ensemble of the Krekhiv Monastery; both were from a bird's-eye view. Depictions of churches and secular buildings appeared in the engraved theses produced in the 17th and 18th centuries by the Kievan Cave Monastery Press. H. Levytsky engraved a realistic panorama of the land and architecture for the thesis dedicated to Metropolitan R. Zaborovsky (1739). *Ifika iieropolitika* (1712) contained N. Zubrytsky's engraving of a windmill on a river bank.

In the 18th century, landscapes gained greater prominence in religious pictures (eg, the depiction of Mt Sinai in the mural in the west wall of St George's Church in Drohobych). One of the earliest attempts to convey the local scenery was made by M. Terensky (the town of Dubets as seen through a window in his *Krasytsky Family Portrait* [1753]). V. Hryhorovych-Barsky popularized landscape art through his drawings of his travels (1723–47) in Europe and the Near East.

At the beginning of the 19th century landscapes became an integral part of icon compositions. In *Mary and Elizabeth* in the iconostasis of the church in Sulymivka, Poltava gubernia (ca 1830), the foliage and trees dominate the composition.

Landscape painting did not, however, become an independent genre in Ukrainian art until the 19th century. Ro-

manticism inspired artists to record faithfully the pastoral scenery of thatched-roof cottages and the surrounding countryside. Among them were I. *Soshenko (*The Ros River near Bila Tserkva*), T. *Shevchenko, and B. *Shternberg (*View of [the] Podil [District] in Kiev, 1837*). Shevchenko painted watercolor landscapes of interesting architecture when he worked for the Archeographic Commission of Kiev University. He did two landscapes (*Kiev* and *Vydubychi Monastery*) for his series of etchings on Ukrainian topics called *'Zhivopisnaia Ukraina' (1844). In exile he depicted the surrounding countryside in numerous drawings and watercolors; they included landscapes of the Aral Sea coast (1848–9), the Mangishlak Peninsula (1851), and the area around the Novopetrovsk Fortress (1853–7).

With time two types of landscape art developed, the poetic and the epic. Among the 19th-century artists who devoted much of their work to Ukrainian landscapes were two artists of non-Ukrainian origin, I. *Aivazovsky, who is famous for his marine paintings, and A. *Kuindzhi, who painted Romantic moonlit scenes. Other Ukrainian artists who devoted their efforts to landscape painting were S. *Vasylykivsky, I. *Pokhytonov, and S. *Svitoslavsky. In the early 20th century P. *Levchenko painted intimate lyrical views in impressionist colors capturing the fleeting effects of light in both urban and rural scenes (*Fountain near the Golden Gate and Cottage, Zmiiv, 1915*). V. *Krychevsky and A. *Manevich also worked in the impressionist manner. Symbolism was dominant in the fantasy landscapes of Yu. *Mykhailiv (*Music of the Stars, 1920s*).

Summer Day in Ukraine (late 19th century) by P. Levchenko

In Western Ukraine I. *Trush painted idyllic sunsets, ordinary fields, and panoramic views (*The Dnieper, 1910*) only slightly influenced by impressionist colors, and O. *Kulchytska depicted informal scenes using an impressionist palette (*Willows, 1907*). O. *Novakivsky became known for his expressionist views of the countryside (*Mount Grehit, 1931*) and urban scenes (numerous views of St George's Cathedral in Lviv). Landscape painting was also prominent in the work of the Transcarpathian artists Y. *Bokshai (*First Frost, 1927*), E. *Hrabovsky (*Thaw, 1921*), and Z. *Sholtes (*Wooden Church, 1939*).

In the 1930s, after *socialist realism was imposed as the only sanctioned artistic method in the USSR, landscape painting in Soviet Ukraine was limited to views of collective farms (eg, H. Svitlytsky's *Collective Farm in Blossom [1935]* and M. Burachek's *Collective-Farm Road [1937]*) and industrial sites. Pure landscape painting was revived in Ukraine after the Second World War through the influ-

ence of Western Ukrainian artists, such as Y. Bokshai, R. *Selsky, and V. *Manastyrsky. But landscapes were painted in a naturalistic manner in keeping with socialist realism. During the Khrushchev 'thaw' landscape painting regained some of its lost prominence largely as a result of efforts by O. *Shovkunenko (*Evening Rays, 1955*), M. *Hlushchenko (*Spring, 1959*), S. *Shyshko (*Mountain Pasture, 1951*), and D. *Shavykin (*Evening on the Dnieper River, 1957*) in Kiev; R. Selsky and his wife, M. *Selska, in Lviv; and Y. Bokshai, A. Kashai, and F. *Manailo in Uzhhorod.

In Lviv R. Selsky popularized Carpathian landscapes (eg, *Chornohora, 1968*), seascapes, and views of Crimea, often using natural scenery to create constructs of color and form (*Thicket, 1968*). V. Manastyrsky painted landscapes characterized by rhythmic patterns of flat pigment (eg, *Under the Mountain Sokil, 1962*). H. *Smolsky, O. *Shatkivsky, S. Koropchak, and D. Dovboshynsky have painted landscapes in a variety of figurative styles. Landscapes have been particularly prominent in the work of V. *Patyk, who paints with great spontaneity and expressive hues (*Summer, 1972*), and L. *Medvid, whose monochromatic, highly realistic views, with forms reduced to their essentials, are a departure from socialist realism (*Heat Wave, 1969*).

Chornohora (1968) by R. Selsky

In Kiev T. *Yablonska painted panoramic views of the land in the 1960s (*Nameless Heights, 1969*) and eventually turned to landscape studies in contrasts of light in the manner of the French impressionists (*Our Beautiful Kiev, 1986*). Realistic landscapes depicting the beauty of the Ukrainian countryside have dominated in the work of V. *Nepypyvo. The Kiev artists H. Havrylenko, Ya. Levych, A. Lymariiev, and M. *Vainshtein devoted considerable time to landscapes that did not conform to socialist realism, as did Y. *Yehorov, O. Voloshynov, V. Basanets, V. *Strelnikov, and V. *Tsiupko in Odessa. Both Strelnikov (*By the White House, 1979*) and Tsiupko (*Boats, 1978*) have painted landscapes bordering on abstraction and abstractions inspired by landscapes. There are folk-art elements in V. *Padun's landscapes of rural Ukraine around Dnipropetrovske (*Old Village, 1979*). Unusual but realistic landscapes, as well as nightmarish, surrealistic scenes of desolate places, have been created by I. *Marchuk, who works with a weblike technique (*Night in the Steppe, 1984*). Ye. Hordiits (*Pink Rocks, 1986*) paints meticulous photorealistic landscapes that often contain elements of the fantastic, as do the works of V. Pasyvenko and D. *Stetsko. Expressionism prevails in the landscapes of M. *Popov and Yu. *Lutskevych.

Of the Ukrainian landscape artists who worked outside their homeland, the most prominent was O. *Hryshchenko (A. Gritchenko), who achieved recognition in France for his landscapes and seascapes (*Morning in Provence*), painted mostly in an expressionist manner. M. *Krychevsky, who worked in Paris from 1929, specialized in sensitive watercolor views of the city. A. *Solohub has concentrated on watercolor landscapes of Paris and Istanbul, and Z. *Lisovska has specialized in gouaches of landscapes of the Swiss Alps. Expressionistic glimpses of France alongside those of his native Carpathian scenery constitute the major portion of the work of O. *Mazuryk, who has worked in Paris since 1968 (*Villaret, 1971; Carpathian Church, 1985*).

In the United States vibrant colors and expressive brush strokes have been typical of the work of M. *Moroz (*Bar Harbor, Maine*), M. *Nedilko (*Seascape*), and L. *Hutsaliuk (*Architectural Landscape*). Other artists who have painted landscapes there include V. *Krychevsky, Jr., M. *Radysh, K. Krychevska-Rosandych, and M. Harasovska-Dachyshyn. Of the artists who emigrated to Canada M. *Levytsky has painted numerous semiabstract landscapes (*Spanish Town, 1965*), H. *Novakivska has experimented with textural effects (*Along the Road*), and M. *Styranka has concentrated on delicate watercolor views (*Winter, 1988*). W. *Kurelek, the most famous Canadian artist of Ukrainian origin, depicted the Canadian landscape from coast to coast in a highly personal, realistic manner often bordering on the primitive (*Fields, 1976*). W. *Lobchuk, D. *Proch, P. *Shostak, and D. *Stryjek have also painted Canadian landscapes.

D. Zelska-Darewych

Landscaping. The conscious modification and shaping of outdoor environments for human use. In the past, landscaping was carried out by traditional farmers and builders and, later, by those trained in gardening, agriculture, horticulture, silviculture, hydraulics, and architecture. The field was generally regarded as horticultural, but by the mid-19th century the term landscape architecture was being used to suggest professionalism in landscape design. Today, landscape architects are involved in projects that are considered more part of *urban planning or urban design.

From the late Neolithic to the Copper Age the *Trypillian culture is represented by the remains of rectangular clay houses grouped into settlements laid out on terraces or hills in circular fashion. From the Bronze and Iron ages major landscape features include Cimmerian and Scythian burial mounds, walled settlements and long earthen defense walls, and megalithic structures (temples and stone idols). The ancient Greek colonization of the Black Sea coast (7th–6th centuries BC) brought with it the construction of cities (Chersonesus, Olbia, Tyras, and others) with a regular-grid street pattern, quarried stone buildings, and stone defense walls. In the Princely era (9th–14th centuries AD) cities in the forest-steppe and forest zones contained defense walls, tower gates (such as the Golden Gate of Kiev), palaces, and, above all, brick and stone churches in the Byzantine style (such as the *St Sophia Cathedral in Kiev). In time, church construction assumed local architectural styles (the Kiev, Chernihiv, and Volhynia schools of the 12th–13th centuries), which developed into the Ukrainian architectural style (14th–16th centuries).

Meanwhile a traditional folk architecture prevailed, as evidenced in the layout of villages as well as the construction of houses and the fencing and plantings around them. Even small, wooden churches, built using folk techniques, developed their own regional styles and were given pride of place on the highest points of land.

The Renaissance brought with it the baroque style, with its complex design and ornate decorations. That style, which was modified into the Ukrainian baroque, was applied (in the 18th century) to the hetman palaces, large urban structures, and churches. Even village churches were built in the style and were prominently sited on the highest elevations. Urban and palace gardens of the period were laid out by professional landscapers, who used the ornate geometric and highly structured French palace garden as a model. By the late 18th century, however, the baroque style was being replaced by imperial neoclassicism. With the accelerating growth of cities, elements of classical architecture were applied to municipal and large residential complexes in Kiev, Poltava, Odessa, and other cities. New settlements were laid out in regular-grid patterns in contrast to the irregular and somewhat concentric street patterns of old towns. At the same time the romanticism of the period was reflected in the establishment of English or landscape parks. Such professionally landscaped parks were usually established at locations with picturesque relief. The designers supplemented existing natural shrubs and trees with newly introduced exotics, natural bodies of water with ponds and fountains or waterfalls, and natural slopes with cliffs and incorporated other architectural elements or decorative objects. Parks of that type included Oleksandriia in Bila Tserkva (1793) and Trostianets in the Chernihiv region (1834).

From the late 19th century, industrialization propelled the growth of cities. Along the newly built railroad lines mushroomed industrial structures and, nearby, cramped residential apartments for workers. In the most attractive locations were erected elaborate homes for the elite, professionally landscaped in parklike settings. Commercial and civic buildings were designed in an eclectic style, which by the end of the 19th century turned to modern and Ukrainian moderne style (as exemplified by the Lviv Polytechnical Institute, 1873–7, and the gubernia zemstvo building in Poltava, 1905–9). Structures were built with new materials (glass, metal frame, reinforced concrete) and techniques (cantilevers).

In the countryside farmland was expanded to new limits by means of technology. The forest-steppe and the steppe were transformed into fields of crops, mostly grain. Forested swamplands were drained, and mountain forests were subjected to lumbering and drilling for oil. The transformation of the natural landscape was purely utilitarian. Professional landscaping was restricted to parks and the immediate surroundings of buildings, and the peasantry landscaped the small holdings around their houses in traditional ways, with fences, flower beds, orchards, and vegetable gardens.

In the Soviet period urban growth was guided by the principles of socialist state planning. In Ukraine most cities were already well established, and Zaporizhia was the only major city that developed on the basis of socialist urban planning. Elsewhere various new elements were simply added to existing patterns. A high priority was placed on the building of giant industrial objects and large insti-

tutional buildings for the promotion of socialist culture, including clubs, palaces of culture, and parks of culture and relaxation. Most churches were closed and then stripped and converted to other uses or destroyed. Only in the late 1980s and early 1990s, following a legal guarantee of religious freedom, were churches reopened.

During the reconstruction that followed the Second World War new residential areas were laid out, with apartment blocks forming integrated groupings or microneighborhoods, where residents theoretically would be able to obtain all the necessary basic services. They were characterized architecturally by large (if not daunting) scale, simplicity of form, and prefabricated mass production. Trees were planted to set off the buildings from the roads, but special professional landscaping was generally restricted to highly visible central districts and public buildings. The construction of gigantic war memorials was accompanied by matching bold, rampart-inspired landscaping. In the countryside priority was given to the construction of very large state- and collective-farm production buildings (livestock housing, concrete silos) and institutional buildings (administration offices, meeting halls, schools). Although a few villages were developed as socialist showcases with two-storied residential housing and sometimes even multistoried apartment buildings, the onus was on the peasantry to rebuild their homes using wood-frame or brick construction according to established designs. Housing was to be consolidated into larger settlements around the institutional buildings on the basis of a new grid street pattern. In that planned restructuring, devised by the Ukrainian Scientific Research and Planning Institute of Civil Rural Construction, the rich diversity of traditional house styles, fences, and garden-orchard landscaping was often abandoned for an orderly, suburban appearance.

Throughout Ukraine monuments to V. Lenin or the memory of the Second World War were erected in prominent places and landscaped with pavement and geometric flower beds. Other figures compatible with official Soviet ideology were also honored with monuments; T. Shevchenko was the Ukrainian figure most often honored in that way. The monuments to Lenin began being disassembled in 1990 and replaced by monuments to prominent Ukrainian persons or events, landscaped with appropriate flower beds and trees, such as **viburnum*.

I. Stebelsky

Lange, Nikolai, b 24 March 1858 in St Petersburg, d 15 February 1921 in Odessa. Russian psychologist; one of the founders of experimental psychology in the Russian Empire. He graduated from St Petersburg University (1882) and worked in W. Wundt's laboratory in Leipzig. As a

professor at Odessa University (1888–1921) he founded a psychology laboratory (1895) and organized the Higher Courses for Women in Odessa (1903). In his work *Psikhologiiia* (Psychology, 1922), influenced by Wundt, he proposed a philosophical basis for psychology and defended the dualistic theory of 'psychophysical reciprocal actions' while refuting social Darwinism. He also wrote *Dusha rebenka v pervye gody zhizni* (The Soul of a Child in the First Years of Life, 1891), *Psikhologicheskie issledovaniia* (Psychological Research, 1893), and *Teoriia Vundta o nachale mifa* (Wundt's Theory on the Origin of Myth, 1912).

Langeron, Louis-Alexandre Andrault, b 13 January 1763 in Paris, d 16 July 1831 in St Petersburg. A French nobleman, Russian general, count (from 1799), and political figure. In 1790, during the French Revolution, he emigrated to Russia and served as an officer in the Russian infantry. During the Russo-Turkish War of 1806–12 his adjutant was I. *Kotliarevsky. From November 1815 to May 1823 he was governor-general of *New Russia in Southern Ukraine and commander in chief of the Boh and Black Sea Cossack armies. While governor-general, until 1820 he was also chief of the Odessa autonomous administrative territory (*gradonachalstvo*). He promoted the growth of Odessa's port, established the first public utilities in Odessa, and was a major benefactor of the *Richelieu Lyceum, the girls' school, and the Greek commercial school there. He was also one of the founders of *Freemasonry in Ukraine.

Language, Ukrainian. The second most widely spoken language of the 12 surviving members of the Slavic group of the large Indo-European language family. Geographically, it is classified with Russian and Belarusian as an East Slavic language. Actually, like Slovak, it occupies a central position: it borders on some West Slavic languages, and it once bordered on Bulgarian, a South Slavic language, before being separated from it by Rumanian and Hungarian. Accordingly, Ukrainian shared in the historical development of all three branches of the *Slavic languages. Today Ukrainian borders on Russian in the east and northeast, on Belarusian in the north, and on Polish, Slovak, and two non-Slavic languages – Hungarian and Rumanian – in the west. Before the steppes of southern Ukraine were resettled by the Ukrainians, this was an area of contact with various Turkic languages, such as Crimean Tatar.

Within its geographic boundaries Ukrainian is represented basically by a set of *dialects, some of which differ significantly from the others. Generally, however, dialectal divisions in Ukrainian are not as strong as they are, for example, in British English or in German. Traditionally, scholars have divided Ukrainian dialects into three main groups, *northern, *southwestern, and *southeastern, and these have been subdivided further. Standard Ukrainian, which is accepted as such by the speakers of all the dialects and represents Ukrainian to outsiders, is a superstructure built on this dialectal foundation. It is the only form of Ukrainian taught in school and, except for clearly regional manifestations, used in literature. The standard language is based mainly on the Poltava-Kiev dialects of the southeastern group, but it also contains many features from other dialects, particularly the southwestern ones.

(For an account of its historical development, see *Standard Ukrainian.)

Phonetics and phonemics. Six vocalic phonemes – Four unrounded (low back /a/, mid-front /e/, high-front /i/, and central-high, mid-front /y/) and two rounded (mid-back /o/ and high-back /u/) – characterize the phonetics and phonemics of Modern Standard Ukrainian. All vowels may appear in the stressed or unstressed position, but in unstressed syllables the distinction between /e/ and /y/ is neutralized, and the phonetic environment determines whether the phonetic realization is closer to /e/ or to /y/; eg, in *nésenyj* 'carried' the /e/ in the first syllable is stressed, but in *nesé* (3rd pers sing) it is unstressed and is slightly shifted towards an *y*, while in *nesý* 2nd pers sing imp it is closer to *y*. No other vowels are subject to qualitative changes in the unstressed position. Stress in Ukrainian is weak in terms of expiratory energy and is marked primarily by lengthening. On the other hand there is no phonemic length outside of stress; ie, the length is a concomitant of the stress. In normal speech, vowels undergo no reduction. This combination of features does not occur in any adjacent Slavic language.

The inventory of consonants in Modern Standard Ukrainian consists of labials, dentals, postdentals, velars, and one pharyngeal. (1) The labials are represented by /b/, /v/, and /m/; /v/ is realized only as /w/ in word- and syllable-final position, while in the prevocalic position the choice of bilabial or labiodental articulation is optional. There is also a labial /f/, but only in foreign words; it is alien to most dialects, where, more often than not, it is replaced by the affricate /xv/. (2) The dentals are /t/, /d/, /s/, /z/, the lateral sonorant /l/, the trill /r/, and the affricates /c/ and /ʒ/ (spelled *dz*). All dentals (/r/ only in the word-final position) appear also in palatalized versions as /t'/, /d'/, /s'/, /z'/, /l'/, /r'/, /c'/, and /ʒ'/, so the number of dental phonemes is doubled. (3) The postdentals are /ʃ/, /ʒ/, and the affricates /č/ and /ʒ/ (spelled *dž*). Except for the extraphonemic (automatic) palatalization before *i*, they are not subject to palatalization. (4) The velars are /k/, /g/ (mostly in foreign words), and /x/. (5) Finally, there is the pharyngeal /h/. The velars and the pharyngeal are subject to nonphonemic palatalization before *i*.

Thus, the total number of consonantal phonemes is 31 or, if the glide /j/ (alternating in some positions with /i/) is counted as a consonant, 32. Furthermore, 18 consonants may also appear in a lengthened version, 8 of them – /b/, /v/, /m/, /d/, /z/, /s/, /n/, and /j/ – only on morphemic boundaries (ie, where two identical consonants occur, one at the end of one morpheme and the second at the beginning of the next morpheme), eg, *viddaty* = *vid* + *daty* 'to give away'; 10 others – /t'/, /d'/, /s'/, /z'/, /c'/, /n'/, /l'/, /ʃ/, /ʒ/, and /č/ (if lengthened, the last also undergo palatalization, which is otherwise alien to them) – also appear on morphemic boundaries, but not as a result of the occurrence of two identical consonants, eg, *volossja* 'hair'. If the latter 10 are considered as having phonemic value, the number of consonant phonemes rises to 42. This excess of consonants (42) over vowels (6) does not mean, however, that Ukrainian is a 'consonantal' language, because it has a large number of open syllables and relatively few consonant clusters.

While oppositions in palatalization and length are limited to certain groups of consonants, the opposition in

voicing is much more pervasive and encompasses all consonants except the resonants (/l/, /n/, /r/, /m/, and /j/). In a few cases it applies even to consonant pairs whose members differ in articulation: /x/ and /h/, and, inasmuch as /f/ belongs to the phonemic system of the language, /v/ and /f/.

Both vowels and consonants undergo alternations, most of which are unproductive and are applied traditionally. The only productive ones are the alternations (1) of distinctive /e/ and /y/ with their nondistinctive alternant, depending on stress; (2) of voiceless consonants with corresponding voiced ones before another voiced consonant – eg, *borótysja* 'to fight': *borot' bá* 'fight', pronounced [*borod' bá*] – but not vice versa; and (3) of dental spirants and affricates with corresponding postdentals before postdentals and vice versa; eg, *brjázkaty* 'to clang': *brjažčá-ty*, *nesés* 'carry' 2nd pers sing: *nesésšja* 'being carried' 2nd pers sing, pronounced [*nesés's'a*].

All other alternations, although they may be frequent, are unproductive and purely traditional or morphologized; for example, the alternation of nonpalatalized consonants susceptible to palatalization with their palatalized counterparts occurs before the ending *-i* in substantives, but not in adjectives; eg, *krajina* 'country': *krajin'li* dat-loc sing, but *zelenyj* 'green' nom sing and *zeleni* nom pl with no palatalization of *n*. The most frequent nonproductive alternations of vowels are *i* : *o* or *e* and *o*, *e* (nonalternating with *i* as a rule) : # (zero). The former is an earmark of Ukrainian; the latter is shared by most Slavic languages (with variation in the phonetic character of the vowels involved). Both are partially morphologized; eg, *i* typically replaces *o* or *e* in the final syllables ending in a consonant in the nominative singular form vs other cases (*pit* 'sweat', *pič* 'stove': *potu*, *peči* gen sing), in the genitive plural with the zero ending in feminine and neuter substantives (eg, *noha* 'foot': *nih* gen pl), before the suffix *-n-* in adjectives (eg, *ničnyj* 'nightly': *noči* gen sing), and in other instances. The same set of morphological conditions determines the alternation of *o* and *e* with #. But in both cases there is no absolute predictability as to the choice of the alternants.

In consonants the most frequent alternations are those of velars and the pharyngeal with postdentals and with palatalized dentals: *k* : *č* : *c'*, *x* : *š* : *s'*, *h* : *ž* : *z'*. Postdentals typically occur before *-e* in the vocative, before the endings in verb forms of the present tense (all or in the 1st pers sing), in the imperative (eg, *pekty* 'to bake': *peču* 1st pers sing, *pečy* 2nd pers sing imp), and before certain suffixes (eg, *ruka* 'hand': *ručka* 'little hand'), while dentals are found in the dative and locative cases ending in *-i* of nouns (eg, *rux* 'motion': *u rusi* 'in motion') as well as before some suffixes (eg, *kozak* 'Cossack': *kozac'kyj* attrib), but not in words that were introduced relatively recently (eg, *N'ju-Jork* 'New York': *n'ju-jorks'kyj* attrib).

Word structure. All words consist of morphemes. Uninflected words consist of one or more morphemes (eg, *na* 'on', *na-v-kol-o* 'around'). Inflected words contain two or more morphemes, although the last morpheme may be a phonetic zero (eg, *kit*-# 'cat', *vesn-a* 'spring', *vy-kon-av-ec*-# 'executor'). Morphemes are subject to morphemic alternations and, consequently, may appear in several manifestations (eg, *kit*-# vs *kot-a* gen sing, *vykonav-ec* vs *vykonav-[c'-a]* gen sing).

All morphemes are meaningful in principle. Roots, suffixes, and prefixes carry referential meanings, endings

carry grammatical meanings. In individual cases, however, the referential meaning may be blurred, and the separateness of a morpheme is conveyed only by its not belonging to the adjacent morphemes (eg, *pys'-m-o* 'writing', with a referentially desemantized suffix, *krematorij-#* 'crematorium', with only the suffix carrying a referential meaning).

The root can be monosyllabic or polysyllabic (eg, *sel-o* 'village', *molok-o* 'milk', *skovorod-a* 'frying pan'). As a rule, in nouns it ends in a consonant. The verb also admits roots ending in a vowel. Prefixes can consist of a single consonant or one or two syllables (eg, *s-kazaty* 'to say', *do-vesty* 'to prove', *pere-nesty* 'to transfer'). Suffixes are consonantal, monosyllabic, or disyllabic (eg, *kin-s'-k-yj* 'horse' adj, *robotnyk* 'worker', *nacional-izacij-a* 'nationalization'). Endings can consist of a vowel, a vowel plus a consonant, or two vowels separated by a consonant (eg, *holov-a* 'head', *holov-oju* instr sing, *holov-am* dat pl). Prefixes precede and suffixes follow roots, and endings follow all the other morphemes listed so far (eg, *za-mov-lennj-a* 'order').

As in other Slavic languages, endings typically carry several grammatical meanings simultaneously (*-a* in *zamovlennj-a* conveys at the same time gender, number, and case). In the derivation process a limited number of what could be suffixes follow endings. These so-called postfixes characterize some verbs and pronouns (eg, *smij-a-ty-sja* 'to laugh' cf *smij-u-sja* 1st pers sing, *jak-yj-nebud'* 'any one' cf *jak-oho-nebud'* gen sing).

The part played by suffixes is not limited to derivation: more often than not, the suffix determines where the stress occurs and its movement; in the case of the last suffix, it also determines the choice of ending in the basic word form and, by the same token, the paradigmatic type of the word. The suffix *-ar*, for example, identifies the word as a masculine noun with a zero ending in the nominative singular having the so-called soft type of declension (eg, *lik-ar* [gen *likar'a*] 'physician'). Typically, only affective suffixes may be used in various parts of speech and, within this framework, in various paradigmatic types; eg, *kozak: kochač-en'k-o* 'Cossack', *molodyj: molod-en'k-yj* 'young', *pizno: pizn-en'k-o* 'late', *jisty: jist-on'k-y* 'to eat'.

Quite a few suffixes require certain phonetic changes in the preceding phoneme, most often in the root. Particularly affected is the final velar/pharyngeal of the preceding morpheme, most often with the suffix *-n-* in the derivation of adjectives from other parts of speech (eg, *muzyk-a* 'music': *muzyč-n-yj* 'musical'). There are also cases of fusion of consonants on the boundary of a morpheme with the succeeding suffix (eg, *rob-it-nyk* 'worker' + the collective suffix *-stv(o)* – *robotny-ctv-o*, where *c* cannot be assigned entirely to either the preceding or succeeding morpheme). As a result of these peculiarities, morphemes in Ukrainian appear not only in their 'regular' form, but also as a set of relationships based on that form.

The primary function of prefixes is to point to spatial relations, while other modifications in the meaning of a word are conveyed mostly by suffixes. Hence, prefixes are especially typical of verbs, and suffixes appear mostly in nouns. But since words are derived as a rule not from roots alone, but from entire stems, prefixes occur widely in nouns, and nominal suffixes enter some verbs. But in such cases they usually occur together with other affixes characterizing the derived part of speech. The prefix *po-*, for example, is basically verbal (eg, *xodyty* 'to walk':

poxodyty 'to walk for a while'), but it is transferred to substantives (eg, *poxodžennja* 'origin' along with the suffix *-en'-*) and adjectives (eg, *poxidnyj* 'derivative' along with the suffix *-n-*); the suffix *[-en']* belongs basically to substantives (eg, *značennja* 'meaning'), although it is transferred to adjectives (*značennevyj*, along with the suffix *-ev-*).

As a rule, neither suffixes nor prefixes have completely definite meanings; they have a variety of connotations. Thus, the same affix in different words may have different meanings (eg, *kerivnyk* 'leader' [a person], *ličyl'nyk* 'meter' [an instrument]) and sometimes even contrary meanings (eg, *zlyzty na derevo* 'to climb up a tree', *zlyzty z dereva* 'to climb down [off] a tree'). There are only a few suffixes with narrow and precisely defined meanings, but these are usually not very productive (eg, the suffix *-yzn(a)* meaning an inheritance: *didyzna* 'ancestral inheritance', *materyzna* 'maternal inheritance').

Word compounds are fairly frequent in Ukrainian, but they play a subordinate part in word formation. In substantives, adjectives, adverbs, and verbs, compounds are usually formed by connecting two stems with so-called linking vowels: *-o-*, *-e-* (in substantives), and *-y-* (in cases where the first part is a numeral); eg, *syn'-o-zelenyj* 'blue-green', *zempl-e-trus* 'earthquake', *šest-y-kutnyk* 'hexagon'. Word juxtaposition, in which the first component becomes part of the compound without undergoing any change (if there is an ending, it also becomes part of the compound; eg, *žalju-hidnyj* 'pitiful', *kil'ka-poverxovyj* 'several-storied'), is not very productive in the inflectional parts of speech, except in the derivation of compound numerals (eg, *dvisti sorok p'jat'* '245', *dvisti sorok p'jat'ox* '245' gen), but it is normal in the derivation of prepositions (eg, *ponad* 'above', *z-pid* 'from under'), particles (*xiba ž bo* 'unless'), and interjections (*tap-talap* 'plop'). The derivation of substantives, especially of the names of states, institutions, organizations, and positions, allows for several types of abbreviation.

Parts of speech and inflection. Each word belongs to a certain part of speech, which is characterized by its function and its inflection or lack thereof. The substantive, adjective, numeral, pronoun, and verb can be inflected. There are three chief types of inflection: (1) nominal, (2) adjectival and pronominal, and (3) verbal. Some numerals have a special type of inflection.

Substantives are inflected (declined) by number and case. (For gender in substantives, see *Gender.) Number (singular vs plural) is basically a semantic category, but it is also used for the grammatical agreement of adjectives in the broad sense, and of verbs with substantives. The cases reflect the syntactic role of the substantive in the utterance. The nominative case usually indicates the syntactic independence of the substantive and is the form in which it functions as the subject of a sentence. The other cases indicate syntactic dependence on a verb or other part of speech. The accusative and dative cases mostly show objective relations. The genitive and instrumental cases express temporal, spatial, and causative relations, although in special instances they indicate the substantive as an object. All of the dependent cases are used with and without prepositions. The last dependent case, the locative, is used only with prepositions and shows almost exclusively temporal and spatial relations. In addition, masculine and feminine substantives in the singular have a special voca-

tive case, which is occasionally replaced by the nominative case in informal speech.

Each case is characterized by its ending or endings. Often the same endings occur in the dative and the locative sing (eg, *knyzi* from *knyha* 'book'), in the nominative and accusative (*lyst, lysty* 'letter' sing and pl), and in the genitive and accusative (*xlopcja*, from *xlopec* 'boy', *duba* from *dub* 'oak'). In certain declensions the endings are the same in the genitive, dative, and locative singular, in the nominative and accusative plural (eg, *jabluni* from *jablunja* 'apple tree', *tini* from *tin* 'shade'), and in the genitive singular and nominative and accusative plural (*xaty* from *xata* 'cottage'). Cases with the same ending are sometimes distinguished by the accent (gen sing *xáty*, nom and acc pl *xatý*), but more often by the type of inflection that the substantive belongs to and by the place and role of the given form in the sentence.

The inflectional type of each substantive has no direct semantic or syntactic connotations. It is assigned to each substantive on the basis of the latter's gender and ending. Substantives with *-a* endings are usually feminine; those with zero endings are either masculine or feminine; those with *-o* endings are either neuter or masculine; and those with *-e*, and *-a* endings are neuter (a residual type of neuter ending in *-a* uses the insertions *-at-* and *-en-* in the oblique cases).

Some cases have two endings for the same inflectional type. Sometimes the second endings are relics of old usage and are employed in certain particular words (especially in the nom pl: eg, *vuxa* from *vuxo* 'ear', but *oči* from *oko* 'eye'), or are determined by certain suffixes (eg, the vocative *konju* from *kin* 'horse', but *xlopče* from *xlopec* 'boy'; the loc sing *na jazyci* from *jazyk* 'tongue', but *na dubku* from *dubok* 'oaklet'), or by accent (the gen sing *do stolá* and *do stólu* from *stíl* 'table'). Sometimes their use depends on semantic categories. The chief of these, although they do not affect the endings consistently, are the personal category (eg, acc sing *baču komyn* 'I see a chimney' vs *baču xlopcja* 'I see a boy', but also *baču duba* 'I see an oak'; the loc sing *na xlopcevi* from *xlopec* 'boy' vs *na kinci* from *kinec* 'end'), and the category of 'having form' (wholeness) as opposed to 'lack of form' (eg, gen sing *učnja, metra, cvjaxa* from *učen* 'pupil', *metr* 'meter', *cvjax* 'nail', but *nastupu, jačmenju* from *nastup* 'advance', *jačmin* 'barley').

In the adjectival-pronominal declension the number and gender, as well as the case, have a purely formal function, as a means of agreement. This declension has only one type for all words, except for a few variations in certain forms of the pronoun (eg, fem gen sing *čornoji, syn'oji, jakoji* from *čornyj* 'black', *synij* 'blue', *jakyj* 'which', but *cijeji, tijeji, čyjeji* from *cej* 'this', *toj* 'that', *čyj* 'whose'), and always keeps the accent in the same place throughout the entire paradigm (with a few exceptions in some pronouns). The pronouns *ja* 'I', *ty* 'thou', *my* 'we', *vy* 'you', and *sebe* 'oneself' do not belong to this type; they have a suppletive declension (eg, *ja* 'I', gen *mene*, instr *mnoju*). The pronouns *vin* 'he', *xto* 'who', and *ščo* 'what' belong to the adjective declension in indirect cases but have another root in the nominative (*vin – joho, xto – koho, ščo – čoho*).

In Ukrainian the moods of the verb are relatively underdeveloped and undifferentiated. They include the indicative, which expresses real and often unreal actions; the conditional, which expresses both potential and unreal actions; and the imperative. The tenses are even less

developed and distinct. Neither the conditional, the infinitive, nor the participle has tense forms, and in the indicative the present is often used to denote also the future and the past. Conjugation is limited practically to the present tense, and persons are indicated chiefly by endings containing consonants: *-š* in the second person singular, *-t'* (or the simple stem) in the third person singular, *-mo* in the first person plural, and *-te* in the second person plural; these consonants are usually preceded by the vowels *-e-* or *-y-*, which are distinguished only if stressed. The third person plural is marked by *-t'* preceded by *-u-* or *-a-* (eg, *berut'*, *kryčat'* from *braty* 'to take', *kryčaty* 'to shout'). The first person singular has the ending *-u*. Only three verbs have a different conjugation: *jisty* 'to eat', *daty* 'to give', and (*rozpo*)*visty* 'to tell' (*jim, jisy, jist'*, *jimo, jiste, jidjat'*). The verb *buty* 'to be' has no personal forms in the present: *je(st')* is used for all persons.

The personal form is used chiefly in agreement with the subject. The past tense and the more rarely used pluperfect (which actually shows an impeded action), however, lack personal forms and agree (in the singular) with the gender of the subject (eg, *vin upav* 'he fell', *vona upala* 'she fell', *vono upalo* 'it fell'). The future tense of imperfective verbs is formed from the infinitive + the future tense of the verb *buty* 'to be' or by the consonant *-m-* with the usual personal endings added to the infinitive (eg, *budu braty* or *bratymu* 'I shall take', *budeš braty* or *bratymeš* 'thou shall take'). The conditional mood is formed from the past indicative + the particle *b(y)*. The second person singular and first and second person plural of the imperative are used as a rule without a subject. In the singular the imperative has the ending *-y* when the ending is accented, and a zero ending when the accent is on the root; similarly, in the plural the endings are *-im(o)* and *-it'* or *-mo* and *-te* (eg, *berij, berim, berit'* from *braty* 'to take', *stan'*, *stán'mo, stán'te* from *staty* 'to stand').

The typical system of the Slavic verb with its two stems – the infinitive stem (the infinitive, the past, and the conditional mood, originally aorist-stem) and the present-tense stem (the present tense, the future of perfective verbs, the imperative) – has been retained in Ukrainian but is greatly simplified in many verbs. The infinitive ends in *-ty* (eg, *braty* 'to take', *mohty* 'to be able to', *pekty* 'to bake'). The only widely used participles are passive ones in *-nyj, -tyj*, and non-passive *-lyj* (eg, *vzjatyj* from *vzjaty* 'to take', *davanyj* from *davaty* 'to give', *rozkvitlyj* from *rozkvitnuty* 'to bloom'). There are also indeclinable gerunds in *-čy* and *-šy* (eg, *beručy, bravšy* from *braty* 'to take') and an indeclinable impersonal form in *-no* or *-to* (eg, *prošeno*, from *prosyty* 'to ask', *vzjato*, from *vzjaty* 'to take').

The only really productive category running through all forms of the verb is the aspect – perfective and imperfective. In principle every verb is found in these two aspects, which are formed by the use of different suffixes and prefixes or, less frequently, by accent changes. The iterative meaning is usually not expressed independently and is not distinguished from the usual durative form.

Structure of utterance. All utterances are characterized by an intonation appropriate to the character of the message. The organization of utterances consisting of more than one word relies on grammatical ties and word order. The more obvious these principles of organization, the weaker the intonation, whose role is essentially facultative. There are two kinds of grammatical ties, agreement

and government. Agreement takes place between adjectives, including adjectival pronouns and some numerals, and substantives, and between verbs and the nouns that serve as sentence subjects. It is manifested in the categories of case, number, gender (where applicable), and person (when the verb applies to a personal pronoun); eg, *mala rička* 'small river', *maloji ričky* gen sing, *male misto* 'small city', *mali mista* nom pl, *dytyna plače* 'the child cries', *dity plačut* 'the children cry', *ty plačeš* 'thou art crying'. Government is based on the fact that to convey a certain meaning words may have an inherent requirement for a certain case, or for a certain preposition and the case form, of the dependent noun; eg, *braty* + acc, *xotity* + gen; ie, *beru čaj* 'I take (some) tea', *xoču čaj* 'I want (some) tea'. Government can also require the infinitive, but since the infinitive is not declined, one can speak here of zero-government; eg, *xoču pyty* 'I am thirsty', literally 'I want to drink'. Likewise, if adjectives are replaced with adverbs, which cannot be inflected, one can speak of zero-agreement; eg, *micne koxannja* 'strong love' – *micno koxaje* 'he/she loves strongly'. Agreement and government run through all constituent words in an utterance and make it a syntactic unity, often to a redundant degree.

As a rule, endings bear the grammatical ties between words. Except in formal expressions, therefore, a fixed word order in utterances did not develop in Ukrainian. It is mandatory only for prepositions to precede nominal phrases (eg, *na stoli* 'on the table'); for conjunctions to stand between the phrases they connect (*bat'ko j syn* 'father and son'); and for some particles to stand initially (*xaj skaže* 'let him say'), others to succeed the first word in an utterance (*Otake to stalosja* 'That is what happened'), and still others to precede the word to which they refer (*til'ky ty* 'only thou'). Otherwise one can order words in an utterance with relative freedom. In the neutral word order the subject precedes the predicate (eg, *vin ide* 'he goes'), governing words precede governed words (*beru kartu* 'I take the map'), and adjectives precede their substantives (*bilyj budynok* 'white building'). Statistically, however, this is not the prevalent order, particularly in the case of the subject-predicate order. Often it is replaced by the emphatic word order, in which the most important word appears at the end of the utterance (eg, *Ne znaju, jak dovoho tam lyšatymet'sja nadija*, literally 'I do not know how long there will remain hope'). In narrations of parallel events it is replaced by the narrative word order, in which the predicate is at the beginning of the sentence (eg, *Svitylo sonce, kryčaly ptaxy, vijav viterec*, literally 'Shone the sun, called the birds, blew the wind').

The use of passive and possessive types of sentences is limited in Ukrainian. Impersonal sentences of various types, however, are extensively used. While as a rule the subject is in the nominative case, in impersonal sentences it is in the dative (eg, *Meni sumno* 'I am sad') or the instrumental; the latter occurs in such subjectless sentences as *Napysano stattju* 'The article is written', which may be, but is usually not, supplemented by the agent in the instr: *Petrom* 'by Peter'). Certain unproductive impersonal sentences do not admit any mention of an agent (eg, *Smerkaje* 'Dusk is falling').

Vocabulary. The circumstances in which Standard Ukrainian evolved have largely determined the peculiarities of its vocabulary. It did not develop in an urban environment; hence, it is based mostly on the peasant

vernacular. In the second half of the 19th century many writers modeled their language as a matter of principle on rural folk speech. This 'populist' trend accounts for the highly developed vocabulary in Standard Ukrainian of rural life and labor, in which synonyms abound. A great number of locutions are obviously of peasant origin: eg, *u kopy vklady* 'to make up into sheaves = to beat [mercilessly]', *mov korova zlyzala jazykom* 'as if a cow had licked it up with her tongue = disappeared without a trace'.

In the absence of a single urban center whose spoken Ukrainian could serve as a model for the literary language, the intelligentsia relatively frequently absorbed expressions of local and foreign origin into their vernacular. As a result many words with the same meaning as already accepted words passed into the literary language (eg, *čoven* and *lodka* 'boat', *misto* and *hórod* 'city', *pojzd* and *potjah* 'train'). Many such words are considered localisms and are used only to provide local color (eg, western Ukrainian *gazda* for the standard *hospodar* 'master of the house', and *kryminal* for *vjaznycja* 'prison'); many others are accepted as having equal stylistic status (eg, southeastern Ukrainian *leleka*, northeastern *čornohuz*, and western *busol* and *buz'ko* 'stork').

Many words, including synonyms connected with concepts of urban life, entered Ukrainian standard vocabulary not via peasant dialects but from the languages of nations bordering on or ruling various Ukrainian territories. Thus Ukrainian, which originally showed little social differentiation, has gradually evolved into a language based on the speech of (1) the peasantry, (2) the intelligentsia and professionals, (3) neighboring colonizing nations, and (4) various urban social groups (*jargon and *slang).

After the 1917 Revolution, concerted efforts to develop a scientific and technical *terminology based on the popular language were made, particularly by special terminological institutes affiliated with the All-Ukrainian Academy of Sciences. Since the onset of Stalinism, however, the application of this terminology has been hampered and even paralyzed by the Soviet policy of linguistic *Russification. Nonetheless, the vocabulary and phraseology of modern literary Ukrainian have developed far beyond their rural origins and constitute a rich and complex system derived from various linguistic sources.

Today the vocabulary of Standard Ukrainian has two characteristic features. (1) It is relatively close to the speech of the people without being confined to the language spoken in any one locality. At first Standard Ukrainian developed mainly from the dialects of the Poltava and southern Kiev regions. Soon, however, quite a few words from other dialects, particularly those of Galicia via the Galician intelligentsia, were absorbed into it. Hence, its vocabulary ceased to be connected with any one dialect or dialectal group, although Kiev-Poltava elements still undoubtedly predominate. The Galician dialects have contributed a particularly large number of abstract terms, names of objects, and words associated with urban life (eg, *zasada* 'principle', *vlastyvist* 'peculiarity', *zarozumilist* 'arrogance', *vidčuvaty* 'to feel', *rozpuka* 'despair'). As a result, certain homonyms arose (eg, *aby* 'if only' and 'in order'; *vidčyt* 'account' and 'lecture'). (2) Ukrainian includes many loan words, particularly from German, Turkish, Tatar, and Polish, and in more recent times many Europeanisms, especially with Latin or Greek components (eg, *konto* 'account', *kolit* 'colitis', *akcija* 'action', *demokratija* 'democ-

racy', *pilot* 'pilot', and *generator* 'generator'). (In general, the number of borrowings has far exceeded the number of loan translations and neologisms replacing foreign words, a point on which Ukrainian differs significantly from Czech, for example.) These words have usually had a nominative function and have gradually undergone the normal course of phonetic, morphological, and other forms of naturalization; hence they, do not have a special stylistic function that would cause them to stand out, even when they have autochthonous synonyms (eg, *evoljucija* – *rozvytok* 'evolution', *avijacija* – *litunstvo* 'aviation'). In this respect Ukrainian is fundamentally different from such double-layered languages as Russian, with its Church Slavonic elements, and English, with its Latin and French elements. For stylistic expression, it has drawn more on its own resources than on a blend with another literary language. Certain 20th-century poets have introduced Church Slavonicisms into their poetic language (eg, M. Bazhan: *brennyj* 'perishable', *susčyj* 'real', *lža* 'lie', *lanyta* 'cheek', and M. Orest: *rekty* 'to speak', *diva* 'virgin', and *stokrat* 'a hundred times'), but few of these have been incorporated into the vernacular. Church Slavonicisms, like other foreign elements, in Ukrainian have had for the most part specifically nominative functions and have been used mainly to express church or religious concepts (eg, *vladyka* 'bishop', *xram* 'temple', *svjaščennyj* 'sacred'). By and large the poetic genres in Modern Standard Ukrainian are distinguished by semantics and imagery rather than by peculiarities of vocabulary. The total number of words in contemporary Ukrainian is about 150,000.

Historical development

Proto-Ukrainian (6th to mid-11th century AD). The formative period of Proto-Ukrainian began with the appearance of distinctive features in the dialects of *Common Slavic spoken in and west of the middle Dnieper Basin that were not shared entirely with adjacent Slavic dialects. Ukrainian arose as a separate language through the accumulation of such features. Phonological changes during the disintegration of Common Slavic resulted in a reduction of the number of vowels from 20 in late Common Slavic to 9 in Proto-Ukrainian and an increase of consonants from 15 to 30 or 31. Most of these changes also occurred in other Slavic dialects, but they differed in essential details, which delimited the Proto-Ukrainian dialects from all adjacent ones; for example, the labialized character of *ʋ* distinguished the Proto-Ukrainian dialects from Proto-Polish ones; the preservation of *i* and the rise of *y* (from *ī*, *ū*) before *j* distinguished them from Proto-Russian dialects; the differentiation of *o* and *a* in unstressed syllables distinguished them from Proto-Belarusian dialects; and the reflexion of *ě* as *je* (later *è*) in the southwest Proto-Ukrainian dialects distinguished them from all adjacent dialects, as well as from the northern Proto-Ukrainian dialects.

The most important phonetic changes in the Proto-Ukrainian dialects (many of which, but not all, were shared with some adjacent Slavic dialects) were (1) the rise of *y* from *ū*, (2) the rise of *jers (*ʋ* and *ʋ̆*) from *u* and *i* respectively, (3) the rise of an only short *o* and only long *a* and the subsequent loss of phonemic length and pitch, (4) the palatalization of consonants before *ʋ* and *ě*, and (5) the rise of so-called pleophony.

The roots of the oldest dialectal features can be traced back to the Proto-Ukrainian period. The Rus' Primary

Chronicle mentions seven Slavic tribes that inhabited Ukraine's territory: the Siverianians, Polianians, Dulibians, Derevlians, Ulychians, Tivertsians, and White Croats. It is not known whether or not each tribe had its own dialectal peculiarities; there is, however, a clear difference between the dialects of Polisia as far south as Kiev on the one hand, and those of Galicia and Podilia on the other. The northern dialects preserved *kv* before *ě* (from Indo-European *oi*; eg, *kvit* vs the southern dialectal *cvit* 'flower'), preserved or restored *sk* before *ě* (eg, *po dšskě* vs the southern *dšscě* 'on board'), and went farther than the southern dialects in replacing *š* by *ž* (*meža* vs the southern *meša* 'boundary'). The northern dialects depalatalized soft *r*; conditioned several changes in vowels by stress (eg, *e* > *a* if stressed but *e* if unstressed: *p'atb* 'five', but *petj* gen); and modified *e* before a weak *ʋ*, which change later resulted in a diphthong under stress (eg, *neslō* > *neslʋ* > *n'os* 'he carried', but *metlā* 'broom', Standard Ukrainian = *nis*, *mitla*). Presumably, the opposition between the northern and southern dialects arose before they were united in what is now Ukrainian. A process of integration (not of differentiation, as with later Ukrainian dialects) occurred, probably for historical reasons – the political dominance of Kiev and, later, mass migrations caused by the invasions of various Turkic tribes.

In morphology, the Proto-Ukrainian dialects inherited fairly complicated systems of declension and conjugation from Common Slavic. In declension, substantives had several types of inflection with seven cases (nominative, genitive, dative, accusative, instrumental, locative, and vocative) and three numbers (singular, dual, plural). Each substantive was assigned to a gender (masculine, feminine, and neuter), but the choice of ending was based not on gender but, as inherited from Indo-European, on stems, originally shown by the component that stood between the ending proper and the preceding part of the word, be it the root or a suffix. There were several basic types of stems: *o*, *jo*, *u*, *i*, *a*, *ja*, and consonantal *r*, *s*, *n*, *nt*, and *ū*. Because of morphological levelings and, especially, phonetic changes, however, the distinction between stems had already become obscure in Common Slavic and was later obliterated, so it was only by tradition that the distinction was maintained. Thus, the shift of nouns from one group of stems to another and of specific case endings from one stem-type to another began. Since confusions in stem are quite frequent in the oldest extant manuscripts, it can be assumed that the shifts began well into the Proto-Ukrainian period; eg, the original *u*-stem *synb* 'son' (cf Lithuanian and Old Indian *sūn-u-s*), which in the genitive singular should have the ending *-u*, appears in the *Izbornik* of Sviatoslav (1073) in two forms, the old *synu* and the new *syna*, transferred from the *o*-stems. Such switches were particularly frequent in nouns of the same gender, and the result was an extensive rearrangement of the declensional types on the basis of gender, a process that even now is not quite complete. The fastest reshuffling occurred in consonantal stems.

The adjective had two types of declension: (1) the nominal, that is, the same as in the substantive, most often of masculine and neuter *o*-stems and of feminine *a*-stems; and (2) the pronominal, in which the demonstrative pronoun *i* (*jb*) was added to the nominal form in the same case as the latter, with subsequent simplifications. For example, the nominal *malb* 'small' became the pronominal *malb*

+ *jb* 'that small [child, etc]', in the genitive singular masculine *mala* + *jego*, hence *malajego*, *malaago*, and, under the influence of the 'hard' pronominal declension (*togo*), later *malogo/maloho*.

The verb had five tenses – present, perfect, imperfect, aorist, and pluperfect – but no single form for the future tense, which was conveyed periphrastically by means of such auxiliary verbs as *imu* 'take', *xoču* 'wish', and *načьnu* 'begin' + the infinitive. There was also a well-developed system of participles: present active (eg, *moga* masc, *moguči* fem), past active (*nesь* masc, *nesьši* fem), and passive in *-mь*, *-tь*, and *-nь*. The moods were the indicative, conditional (*byxь nesь* 'I would carry'), and imperative. Besides the infinitive (*nesti* 'to carry') there was the supine, which was used after verbs of motion in space (*nestь*). This rather complicated system, which had arisen in Common Slavic and differed essentially from Indo-European, was fairly well preserved in the Proto-Ukrainian dialects and carried over into the 12th century.

Old Ukrainian (mid-11th to late 14th century). The period of Old Ukrainian dates from the same time as the oldest extant Rus' texts and coincides with the rise and fall of Kievan Rus'. The year 1387, when Polish supremacy over Galicia and Lithuanian supremacy over most of Ukraine were firmly established, can be considered a conventional cutoff date.

The phonetic changes during this period were (1) the transformation (ca 1125) of *y* into *i* after the velars *g*, *k*, and *x* (eg, *ruky* > *ruki* 'hands'), a change limited at the time to northern Ukraine; (2) the spirantization (ca 1200) of *g* (*g* > *h*), which occurred on all of Ukrainian territory (eg, *noga* > *noha* 'foot'); (3) the dispalatalization in the 13th century of labials in the syllable- and word-final position (eg, *holub*' > *holub* 'pigeon'); and (4) the change (ca 1260 in the territory stretching from Bukovyna to western Volhynia) of *i* into a vowel intermediate between *i* and *y* (denoted in the modern Ukrainian alphabet by the letter *и*).

The most consequential sound change in the Old Ukrainian period was the loss of the jers. This loss had occurred in some positions earlier, but it reached its culmination between 1144 (the year of the *Halych Gospel, which reflects the old situation) and 1161 (the year of the inscriptions on the Cross of Princess Eufrosiniia of Polatsk, which reflects the new situation). The jers were treated in two ways and accordingly are labeled weak or strong: the former were lost without replacement, and the latter coalesced with either *e* (*ь*) or *o* (*ѣ*). The jers were strong before *r* and *l* between consonants (eg, *vьrxa* 'top' gen sing, *tьrga* 'market' gen sing > *verxa*, *torga*) and before a syllable containing a weak jer (eg, *sьnь* 'sleep', *dьnь* 'day' > *son*, *den*'). All other jers were weak.

Among the many consequences of the loss of the jers, the most important were (1) the introduction of closed syllables and zero morphemes; (2) the alternation of *e* and *o* with \emptyset ; (3) the appearance of numerous consonant clusters, many of which were gradually simplified in the course of development; (4) a growth in the functional load of the opposition of nonpalatalized and palatalized consonants; (5) the alternation of *v-* with *u-* (eg, *vnuk* : *unuk* 'grandson'); (6) the change *-e* > *-a* in the sequence *-ьje* (eg, *zельje* 'grass' > *zilja*, Standard Ukrainian *zillja*); and (7) the change of *o* and *e* before a syllable in which a jer was lost (eg, *stolь* 'table' and *pečь* 'stove'). The last change proceeded differently in southern and northern Ukrainian. In the

south, *e* and *o* in the given position were narrowed (marked sometimes in linguistic studies as \acute{e} and \acute{o}), and so began an evolution that resulted in *i* in modern Ukrainian and gave rise to the alternation of *i* with *e* and *o* (eg, *stil* : *stola* gen sing, *picь* : *peči*). In the north, *e* and *o* in the given position, but only under stress, diphthongized into *je* and *uo* respectively and later were further modified; *e* changed before *ь* only if *ь* was originally stressed (eg, *nesьь* 'carried' vs *médьь* 'honey', modern northern Ukrainian *n'uos*, *med*).

In Old Ukrainian manuscripts the changes in *e* and *o* are reflected differently. The new reflexes of *e* coalesced with the pronunciation of \acute{e} (*jat*'), and from 1161 they were often spelled as \acute{e} (*ѣ*). This so-called new *jat*' was henceforth the most typical earmark of Ukrainian manuscripts. There was no way of marking directly the new reflexes of *o* in the traditional alphabet, and this change remained unmarked until the 14th century, when some scribes began using the letter omega (ω) for that purpose (it first appeared in the Hankenstein Codex).

No changes as sweeping as this occurred in Old Ukrainian morphology. In the nominal declension the adaptation of the excess of inherited endings to genders continued. The zero ending in the genitive plural was preserved in feminines in *-a*, but tended to be eliminated in masculines (eg, *zimь* 'winters' vs *běsovь* 'devils'). In the genitive singular differentiation on the basis of semantic categories took place: the *o*-stem ending *-a* gradually became reserved for substantives denoting concrete and shaped objects, while the *u*-stem *-u* was applied to abstract and shapeless objects. The category of person became clear in the accusative singular (but not plural) where the genitive was introduced in names of human beings (eg, *jesi slěpilь brata* 'you blinded your brother', the older form being *bratь* as in the nom). Use of the dual remained strong in substantives, but by the end of the Old Ukrainian period its use had declined in verbs and virtually disappeared in pronouns.

In conjugation two uniquely Ukrainian features emerged. (1) In the 12th century the generalization of \acute{e} in plural endings of the imperative began (eg, *xvalěte* 'praise'; originally \acute{e} characterized only class 1 and 2 verbs, while class 3 and 4 verbs had *i*). (2) The verb 'to be' took the ending *-mo* in the first person plural (*jesmo*), and this ending later spread to all verbs. In the 13th century use of the imperfect and aorist began declining, and probably by or in the 14th century they were no longer used in the spoken language. In the 14th century the supine was lost; the ending *-š* in the second person singular of the present tense spread at the expense of the older ending *-ši* (eg, *meteš* instead of *meteši* 'you sweep'); and in the future tense the forms using the auxiliary first person *budu* ('will be' + *l*-participle) and *imu* ('take' + infinitive) crowded out the constructions using *xoču* ('want') and *počьnu* ('will begin'). These developments reflected the tendency of speakers to simplify the morphological system while preserving its essentially conservative character.

Syntax also remained rather conservative, although the use of prepositional phrases, hypotactic constructions, and the instrumental of predication instead of cases in agreement increased. Judging by the extant texts, however, older constructions prevailed.

Owing to extensive contacts with Central Europe and the Turkic peoples of the steppe, many loanwords were

added to the vocabulary of Old Ukrainian. The political and religious influence of the Byzantine Empire in Rus', in particular, resulted in the mass borrowing of Greek words and phrases through direct absorption, loan translations (eg, *blahoslovyyty* 'to bless' based on the Greek *eulogēō*), and semantic adaptation. Most of these borrowings, however, did not penetrate into the spoken language of the uneducated masses; others were lost later, after the fall of Constantinople and the reorientation of Ukrainian culture toward Western Europe. Yet their general impact on the flexibility of Ukrainian cannot be denied.

Internecine strife among the princes of Rus' and the Mongol invasions of the 13th and 14th centuries gave rise to the westward migration of much of the population of central and northern Ukraine, a general decentralization of national life, and, consequently, the formation of western and northwestern Ukrainian dialects, for example, the *Dniester, *Sian, *Boiko, and *Lemko dialects in the 13th century, and the western *Polisian, *Bukovyna-Pokutia, and *Hutsul dialects in the 14th century.

Early Middle Ukrainian. The period from the late 14th to the third quarter of the 16th century (conventional cutoff dates, 1387 and 1575) coincided with the consolidation of the Lithuanian-Ruthenian state in most of Ukraine, except in Polish-ruled Galicia and Hungarian-ruled Transcarpathia, and with the rise of the Cossacks. Regular incursions by the Crimean Tatars again forced the Ukrainian population to migrate west and northwest, and by the beginning of the 16th century Zhytomyr, Kiev, and Oster marked the eastern and southern boundary of Ukraine. The influx of most of the Ukrainian-speaking population into a relatively small territory and their subsequent return as Cossack settlers to central Ukraine and expansion into the formerly uncolonized southern and eastern regions left a lasting imprint on the Ukrainian language and assured the relative uniformity of Ukrainian throughout a vast territory, except in the most western and northern parts of Ukraine. The *South Volhynian, *Podilian, and central *Transcarpathian dialects can be traced back to this period, as can the split of most of the Polisian dialects into eastern and central variants (in the 16th century).

Most of the sound changes in this period arose in and were limited to the southern part of the reduced Ukrainian populated territory; they did not spread to the north or the Carpathian region. The most important consonant changes were (1) the alteration *l > w* before a consonant after an *o* that originated from *ъ* (eg, *vьlkъ > vo[w]k*, now spelled *vovk* 'wolf'); (2) the absorption of *j* by the preceding dental or postdental, resulting in long palatalized dentals and postdentals (eg, [zil'ja] > [zill'a] 'herb', [zbižž'a] 'grain'); and (3) the beginning of dispalatalization of (short) postdentals, which had been soft since their appearance in Common Slavic. The first of these changes arose in northern Ukraine and spread south and west only in the 17th century. The second originated in Bukovyna and gradually spread north. The third spread independently out from many centers.

The important vowel changes were (1) the complete merging of the older *i* and *y* in a middle sound, a change that did not affect the westernmost dialects apart from the Hutsul dialect; (2) the change of the reflex of *ě* into *i*, which stopped short of the borders of the eastern and central Polisian dialects; and (3) the change of *ô* (the reflex of *o* before a syllable with a weak jer) into *u* and further into *ü*

(eg, *kotъ > kôt > kut > küt*, now *kit* 'cat'). (Since this *u* never coalesced with the original *u*, it may be denoted as *u₂*; it is a phenomenon of the southern dialects.) For the first time in the history of the southern dialects changes arose that were motivated by the stress or lack of it on a given syllable: (1) the assimilative change *o > a* before a syllable with a stressed *a* (eg, *bohátyj > bahátyj* 'rich'), which originated in the north and stopped short at the then Lithuanian-Polish border; (2) the change of unstressed *o* into *u* before a stressed *u* or (depending on the dialect) in all unstressed syllables (eg, *zozúlja* 'cuckoo', pronounced [zuzúl'a]); and (3) the merging of unstressed *e* and *y*, which today characterizes the standard language and all dialects except the eastern and central Polisian.

The most important morphological changes took place in declension. Because of the coalescence of *y* and *i*, masculine substantives, originally of *o*-stems, lost the distinction between the nominative and the accusative plural, except those with stems ending in *k*, *x*, and *h*: for example, previously the nominative plural of *sad* 'garden' and *dux* 'spirit' was *sadi* and *dusi*, and the accusative plural was *sady* and *duxy*; now the distinction was lost entirely between *sadi* and *sady*, and limited to the consonant alternation in *dusi* ~ *duxy*: *sady*, *dusy*, *duxy*. Subsequently, the alternation of consonants in the nominative plural was eliminated, and the two case forms merged. Since feminines in *-a* also had the ending *-y* in both cases, this change in the masculines was tantamount to the obliteration of masculine-feminine gender distinctions in the plural. Accordingly, a trend toward uniform endings, mostly in *o*- and *a*-stems and occasionally in *i*-stems, in the dative, instrumental, and locative plural arose; for example, instead of *sadom*, *sady*, and *saděx* use of the forms *sadam*, *sadamy*, and *sadax* started expanding. Gender unification among plurals extended also to adjectives.

These processes did not reach completion in the Early Middle Ukrainian period, but the trends were clearly discernible. Other significant developments included the spread, except in the northern dialects, of the ending *-ovy* in the dative singular of masculines (eg, *sadovy* 'orchard'); the replacement of the accusative plural by genitive plural forms in nouns denoting persons (eg, *znaju bratenyky* by *znaju bratenykvu* 'I know the brothers'); and the elimination of *-y* in monovocalic endings of soft substantives (eg, *na zemly* was replaced by *na zemli* 'on the ground').

In syntax the notable changes were (1) the transformation of active participles into indeclinable gerunds, (2) the expansion of the instrumental predicative, and (3) the rise of the impersonal sentence with the predicate ending in *-no* or *-to* based on the passive participle but capable of taking a direct object in the accusative case (eg, *prystavnyka oskarženo* 'the doorman was accused', 1556).

In the vocabulary of this period, the influences of Lithuanian (mostly via Belarusian) were insignificant, and Belarusian influences themselves were not strong, even though most of Ukraine and Belarus were part of the Grand Duchy of Lithuania. Military and peaceful encounters with the Crimean Tatars, however, particularly after an organized Cossack military had been established, resulted in the absorption of quite a few Turkic words, especially military and commercial terms, into the common language. The most significant development was the expansion of borrowing from Polish, and from Latin, German, and Czech, often via Polish. Loanwords from these

languages influenced much more than just Ukrainian administrative, commercial, and cultural terminology: they often replaced established words in the basic vocabulary. As a result of this trend, which continued with undiminished strength for a century and a half, the vocabulary of Ukrainian became closer to that of West Slavic than to that of Russian or Church Slavonic.

Middle Ukrainian. This period began with the consolidation of Polish rule throughout Ukraine after the Union of Lublin (1569), except in Transcarpathia and a small Muscovite-ruled northeastern region, and included the Cossack rebellions, the Cossack-Polish War of 1648–57, the rise and decline of the Cossack Hetman state, and the curtailment of Ukrainian autonomy under Russian rule (conventional cutoff dates, 1575 and 1720). The most significant linguistic development in this period was the formation, on a vast territory, of the southeastern dialect, which later served as the foundation of Modern Standard Ukrainian. This dialect arose in the middle Dnieper Basin and gradually spread southward to the Azov and Black seas as the steppes were settled by speakers of the southwestern and northern dialects. Political turmoil and population mobility created conditions that were conducive to the intermingling of new settlers and to the creation of a relatively uniform new 'synthetic' dialect.

In phonology the major development was the change of *ü* into *i*, which introduced the alternation *o* : *i* (eg, Old Ukrainian *kotъ > ku₂t > küt > kit* : *kota* gen sing 'cat'), one of the most striking features of modern Ukrainian (the earliest documentation of it dates from 1653). The consonants /*g*/, /*ʒ*/, and /*ʒ̣*/ were introduced and/or stabilized to a certain degree during this period. With these two developments the formation of the phonemic and morpho-phonemic systems of modern Ukrainian was basically completed, and thereafter only minor changes and adjustments took place: (1) the partial dispalatalization of *c*'; (2) the change *e* > *o* after palatalized dentals before a non-palatalized consonant (eg, *len* > *l'on* 'flax', *semyj* > *s'omyj* 'seventh') typical of the southeastern dialects; (3) the dispalatalization of *r*' in the southwestern dialects (except for some Carpathian dialects); (4) the reintroduction ca 1640 of *k* and *h* in the infinitives of verbs of the modern type (eg, *stryhty* from the older *stryčy* 'to cut hair'; and (5) the generalization ca 1720 of *č* and *ž* in the present tense of these verbs (*stryžu* 1st pers sing from the older *stryhu* 1st pers sing, *stryžeš* 2nd pers sing).

In morphology several earlier developments became stabilized, and in some cases of competition one competing variant was eliminated. Although they were not limited to the southeastern dialects, these processes were typical of them: (1) the consistent elimination of the ending *y* in the dative-locative of substantives of the soft declension (eg, *na zemli* instead of *na zemly* 'on the ground') and the expansion of this *-i* to the *-ovy* ending of masculine substantives (eg, *bratovy* > *bratovi* 'brother'); (2) the acceptance of the form *ščo* 'what' in place of the older *što*; (3) the stabilization of the verbal ending *-mo* in the first person plural of the present tense (eg, *nesemo* 'we carry'); (4) the replacement of *-te* after a vowel in the second plural imperative by *-t*' (eg, *nesit* 'carry'); (5) the stabilization of past tense forms (original perfect) without an auxiliary verb (eg, *ja brav* instead of the older *bral jesmь* 'I took'); and (6) in the interaction of the adjectival and pronominal declensions, the replacement of disyllabic by monosyllabic

and trisyllabic by disyllabic endings (eg, *malaja* > *mala* 'small' nom sing fem, *malajeho* > *maloho* gen sing masc), which except for a few relics led to the decline of nominal forms of adjectives of the type *mal* (nom sing masc).

By the end of the Middle Ukrainian period the morphological system of the southeastern dialects was almost identical to that of Modern Standard Ukrainian, while the peripheral northern and southwestern dialects to a large extent still preserved the old forms. The syntactic norms of the spoken language did not differ any more substantially from modern Ukrainian either. In vocabulary the language of the Middle Ukrainian period continued to be open to Western, particularly Polish and Latin, influences, even at the height of Ukrainian-Polish political conflicts. In fact, Polish lexical and phraseological influences persisted, although in attenuated form, until the first quarter of the 20th century.

(For developments in the Ukrainian language after 1720, see *Standard Ukrainian.)

Language legislation. The body of laws, decrees, instructions, and other administrative acts that define the status of the official language and the minority languages within a society, and particularly in the administration, the courts, and education. Language legislation in the modern sense has developed since the 19th century, mostly in multinational states, and has been involved in the cultural and political rebirth of stateless nations.

The status of the Ukrainian language on Ukrainian territories was defined, except during Ukraine's brief period of independence, by foreign powers. In the Russian Empire there was no special legislation on language; Russian was the only language of government. The languages of the so-called *inorodtsi* (Poles, Finns, and Transcaucasian peoples) were admitted to some extent in the church, the courts, and the schools. Ukrainian did not have even these limited rights: it was prohibited by P. *Valuev's circular (1863) and by the *Ems Ukase (1876). When censorship was abolished in 1905, the ban on Ukrainian publications

was lifted for a brief period. Subsequently, administrative measures were used to restrict the role of the Ukrainian language in the press and at public meetings. Russian continued to be the language of instruction in schools for the Ukrainian population. Representations to the State Duma and the administration in defense of Ukrainian proved fruitless (see *Language policy.)

Under Austrian rule the legal status of Ukrainian remained undefined for a long time. Although Ukrainian was recognized as a regional language in 1786, German and Polish predominated in government and in the school system in Galicia, and German and Rumanian in Bukovyna. After the 1848 Revolution laws and decrees were published in Ukrainian in the two provinces. The 1867 Constitution recognized the equality of all the peoples of Austria and their 'right to preserve and cultivate their national traditions and language,' but this recognition was not followed up with practical legislation. In practice, Polish was recognized as the official language of government and the courts in Galicia, and German remained the official language in Bukovyna. Ukrainian was admitted as a second regional language in the administration and the courts. On the local level, communities could choose the language in which they conducted their affairs, and Ukrainian communities usually chose Ukrainian. But the county administration in Galicia was conducted in Polish, and in Bukovyna in German. Ukrainian deputies to the Galician and Bukovynian diets had the right to address the assemblies and to make submissions in Ukrainian. The Galician Diet had the power to legislate the language of instruction in secondary schools, while local communities chose the language to be used in elementary schools.

In Transcarpathia under Hungarian rule, Hungarian was the official language of government, and local languages were tolerated, grudgingly, only in the lower courts. In 1848–9 Ukrainian was accepted to some extent as the official language in the so-called Ruthenian district. The school system, too, was subjected to Magyarization, which was officially approved in A. *Apponyi's law (1907).

In January 1919, Ukrainian was recognized by the Directory as the official language of the UNR, but the national minorities were guaranteed, by the law on *national-personal autonomy, broad linguistic rights (25 January 1918). The laws were published usually in Ukrainian and Russian, but the languages of other nationalities were acceptable in communications with government institutions. During the Hetman regime the government, in principle, was to have been run in Ukrainian, but many departments operated in Russian or in both Ukrainian and Russian. In the Western Province of the Ukrainian National Republic (ZO UNR), the official language law of 15 February 1919 recognized the right of national minorities (Poles, Jews, and Germans) to communicate with the government in their own languages. The education law of the ZO UNR (13 February 1919) granted minorities the right to conduct schools in their own languages.

In the interwar period different laws governed minority languages in the three parts of Western Ukraine – under Poland, Rumania, and Czechoslovakia. All three states were bound by international agreements to respect the rights of the Ukrainian language: Poland was bound by a treaty with the Entente (28 June 1919), the Peace Treaty of Riga (18 March 1921), and the decision of the Conference

of Ambassadors (14 March 1923) approving Poland's annexation of eastern Galicia; Rumania, by the Treaty of Sèvres (10 August 1920); and Czechoslovakia, by the Treaty of Saint-Germain (10 September 1919).

In Poland the use of Ukrainian by administrative bodies was regulated by three special laws passed on 31 July 1924. Polish was to be used internally in government agencies, and Ukrainian was permitted only in oral or written representations to the county or voivodeship authorities in Lviv, Volhynia, Ternopil, Stanyslaviv, and Polisia voivodeships. The authorities had to answer such petitions in Polish and Ukrainian. Municipal councils were allowed to make their own decisions on the use of Ukrainian, and rural communities were to use the language of the petitioner and could keep records in two languages. Proclamations of local and higher government bodies were published in Ukrainian as well as in Polish. The law permitted the use of Ukrainian in the courts, the prosecutor's office, and notary offices for positions, testimonies, and lawyers' speeches. Judgments and other court documents could be prepared in Ukrainian as well as Polish, at the demand of the parties. The language of instruction in the schools was governed by a separate law (*Lex Grabski*): instruction could be in Ukrainian if the Ukrainian population of the community was at least 25 percent, or if the parents of 40 elementary-school or 150 secondary-school students demanded it. Ukrainian private schools were permitted. The details of language use were settled by executive order from the government or particular ministries. The actual use of Ukrainian in government was very different from what the law might lead one to expect. Only Polish was admitted in municipal and county government: positions were accessible only to Polish-speaking individuals. In Polisia, the Kholm region, and Podlachia, Ukrainian had, in fact, no rights. The Polish authorities did not respect the school legislation; hence, almost all Ukrainian schools became Polish or bilingual.

In Czechoslovakia the legislation with respect to Ukrainian was more liberal than anywhere else. In eastern Slovakia the law of 29 February 1920 granted Ukrainian the same rights as the languages of other national minorities, and in Subcarpathian Ruthenia (Transcarpathia), Ukrainian was the second official language. It was used consistently along with Czech in government communications with the public. Within the government it was used only at the lower, local, levels. Transcarpathia's autonomous diet was to define the official status of the Ukrainian language and decide which version of 'Ruthenian' – Ukrainian, Russian, or the artificial local language (**yazychiie*) – was to be the official language. All three versions were tolerated in practice. In 1938–9 the autonomous government of Carpatho-Ukraine adopted literary Ukrainian as the official language. During the Hungarian occupation (1939–44) the rights of the local 'Ruthenian language' were restricted: it was used by officials only to communicate with the public (law of June 1939).

In territories under Rumania, Ukrainian was banned from government, the courts, and even the Orthodox church. The law of 26 July 1924, in particular, denied Ukrainians the status of a national minority and defined them as Rumanians who had forgotten their native tongue. In 1925 compulsory Rumanianization was introduced in the schools.

Until 1989 the Ukrainian SSR did not have a special law on language, only some general declarations about the equality of the different languages in the USSR, and the right of all citizens of Soviet Ukraine to use their native tongue (art 20 of the 1925 Constitution). Ukraine's Constitution of 1937 (art 101) guaranteed the use of Ukrainian in the schools. In fact, the use of Ukrainian, Russian, and other languages in Ukraine was governed by internal Party resolutions and instructions. Although Ukrainian was formally considered the official language, from the very beginning the laws have been published in both Ukrainian and Russian. Government business is conducted in either language, depending on what ministry a given agency comes under – a republican or a Union ministry. But even this criterion is not applied consistently. At the beginning of the Soviet period Russian was dominant. Starting in 1924, the government, the higher schools, and to some extent even the military were Ukrainized (see *Ukrainization). After 1933 Russian was reintroduced widely into the schools, the courts, local and oblast government, and republican ministries. Minority languages were widely used in local government and in the cultural life of national regions and rural soviets only until 1933 (see *Russification and *Language policy).

On 28 October 1989 the Supreme Soviet of the Ukrainian SSR passed the law 'On Languages in the Ukrainian SSR,' which gives official status to Ukrainian and provides for the gradual introduction of Ukrainian in legislation (along with Russian); in ministry and local-government decrees (in 3 to 5 years); in the internal work of government agencies, Party organs, and civic organizations and enterprises (in 3 to 5 years); in the court system along with minority languages (in 3 to 5 years); in international treaties and agreements, in the school system from kindergarten to higher educational institutions (according to parental choice, in 5 to 10 years); in scientific publications (alongside Russian); and in the mass media (alongside other languages). The bill guarantees the use of minority languages in the schools and local government of regions settled by national minorities. Russian is recognized as the language of international communication within and beyond Ukraine. The law is probably too weak to reverse the results of half a century of official Russification and discrimination against the Ukrainian language.

V. Markus

Language policy. Historically, rulers of multinational states have pursued policies aimed either at preserving the languages of all their constituent nations or, as in most cases, at raising the language of the dominant national group to a privileged and even exclusive status by restricting and sometimes forbidding the use of the other languages. In the latter case the stateless nations have tended to defend their languages as necessary factors in their collective survival.

Under Lithuanian and Polish rule. The language of government in the Grand Duchy of Lithuania, which after the disintegration of Kievan Rus' absorbed most of its lands, was Belarusian with a substantial infusion of Ukrainian. In Galicia and the Kholm region, which after the demise of the Principality of Galicia-Volhynia came under the rule of Poland, the language of government was Latin and, later, Polish. Thus in the 15th century Ukrainian was excluded almost entirely from the courts and government

in these regions. Despite Polish guarantees set forth as preconditions to the Union of Lublin (1569) and reaffirmed several times (eg, in 1591 and, finally, in 1681), Polish authorities flouted the rights of Ukrainian and imposed Polish in the lands ceded by Lithuania to Poland under the union, in Volhynia, Podlachia, and the Kiev, Bratslav, and Chernihiv regions. For over a century Ukrainians actively defended their language. In 1569 and 1577, for example, the Ukrainian nobility of Volhynia and the Bratslav land sent protests to the Polish king. The so-called Constitutional Sejm finally passed a law in 1696 abolishing the use of Ukrainian in government administration. The language continued to be used only in the church.

Under Russian rule. Russian authorities adopted a restrictive policy toward Ukrainian even before the Pereiaslav Treaty of 1654: the ukases of 1627 and 1628 ordered books printed in Lithuania in the Ukrainian variant of Church Slavonic to be confiscated and burned. When the Kiev metropolite lost its autonomy in 1684, Ukrainian publications became subject to Russian censorship. In 1721 the Kievan Cave Monastery and the Chernihiv printing press were forbidden to print anything but church books, and these had to conform to Russian standards. Similar ukases were issued in 1727 and 1728. In 1735 books printed in Ukraine were banned from the churches, and the Russian pronunciation of Church Slavonic was imposed in the services. In the latter half of the 18th century Russian was introduced as the language of instruction at the Mohyla Academy and then other schools in Ukraine.

Starting with P. *Valuev's secret circular (1863), the Russian government tried to suppress the new Ukrainian literary language based on the vernacular. Declaring that 'there was not, is not, and can be no distinctive Little Russian language,' the minister forbade the printing of religious, scientific, and educational works in Ukrainian. The *Ems Ukase (1876) prohibited Ukrainian publications from being imported, held in school libraries, and printed, and Ukrainian plays and readings from being staged. Only belles lettres (but not translations of foreign literature) and historical documents could be published in Ukrainian, and then only in a modified Russian alphabet known as *yaryzhka. Although toward the end of the century censorship became less strict, Ukrainian was regarded as a dialect of Russian and was excluded from education and civic life. The church, the schools, and the army were the chief instruments of Russification. Also, the tsarist government encouraged Ukrainians to emigrate to other parts of the empire for seasonal or permanent jobs, and Russians to work in Ukraine. The laws of 1869 and 1886, which were in effect to 1917, introduced premiums for all civil servants of non-local origin in Right-Bank Ukraine. Officially, the purpose was to de-Polonize the region. A similar policy was conducted by the Russian Orthodox church. The measures attracted many Russians.

During the brief period of liberalization after the Revolution of 1905, Ukrainian periodicals, books, grammars, and dictionaries and P. Morachevsky's translation of the Bible (submitted to the censors back in 1863) were permitted to appear. Yet various administrative obstacles and censorship restrictions made it difficult to publish Ukrainian periodicals and books. Russian remained the only official language, and in spite of liberals in the Third and

Fourth State dumas, Ukrainian continued to be banned from education, the courts, the church, and public life. With the outbreak of the First World War, the Ukrainian press and publishing houses, including those in Russian-occupied Galicia and Bukovyna, were shut down by the authorities.

Under Austrian and Hungarian rule. The status of the Ukrainian language in Galicia and Bukovyna improved considerably when they became part of the Austrian Empire in the 1770s. The government allowed Ukrainian to be used in the schools and civil service in the crownlands. In 1787 Ukrainian was introduced as the language of instruction at the *Studium Ruthenum of Lviv University, and in 1818 in the elementary schools. In Galicia opposition to Ukrainian came not so much from the Austrian authorities as from the Polish community. At the demand of the Supreme Ruthenian Council, Ukrainian was introduced during the Revolution of 1848–9 in the school and administrative system of Galicia, but in a short while German was reinstated as the official language and the language of instruction in secondary schools and Lviv University. The government's attempt to impose the Latin alphabet on Ukrainians provoked the so-called *Alphabet war, in which the government eventually conceded defeat.

The Austrian constitution of 1867 declared the equality of the empire's nations and their languages, but owing to Polish political influence Polish became in effect the official language in Galicia, and Ukrainian was relegated to a secondary and regional status. Although elementary schools for Ukrainian children were usually run in Ukrainian, secondary and higher education in Ukrainian received little public funding and depended mostly on individual patrons or community organizations such as Prosvita.

In Bukovyna the official language was German; Ukrainian had an auxiliary role. But in the second half of the 19th century, Ukrainian elementary and secondary education enjoyed more favorable conditions there than in any other region of Ukraine. In Transcarpathia, from 1844 Hungarian was the only official language, and after the Compromise of 1867 Magyarization pressures increased. The number of Ukrainian elementary public schools fell from 353 in 1881 to 88 in 1899 and 23 in 1906. A. *Apponyi's law (1907) led to the elimination of the remaining Ukrainian schools.

The period of Ukrainian statehood. After the February Revolution of 1917, the status of the Ukrainian language changed dramatically. For the first time in recent history it acquired an official function in government, the courts, the military, and public life. Some progress in Ukrainianizing educational and academic institutions, the press and book publishing, and civic and cultural organizations was made. The language issue, however, was not mentioned in any of the Central Rada's four universals, and it was only in January 1919 that the UNR Directory proclaimed Ukrainian as the official language. The Ukrainian governments were too weak and short-lived to overcome the social and cultural effects of centuries of Russification, particularly in the cities and towns. In the Western Ukrainian National Republic (1918–19) Ukrainian was given official status, but linguistic rights were granted also to national minorities.

Interwar Western Ukraine. Although Poland was

bound by international agreements to respect the linguistic and cultural rights of Ukrainians, the Polish authorities tried to remove Ukrainian from government and education. In 1923 it was excluded from the Sejm and Senate, and in 1924 Polish was recognized as the only official language of the republic. In the predominantly Ukrainian voivodeships of Lviv, Stanyslaviv, Ternopil, Polisia, and Volhynia, Polish was to be used internally, in government institutions, but Ukrainian could be used externally, in dealing with the public. In education the authorities discriminated against Ukrainian-language schools and promoted bilingual or Polish-language schools. This policy was more successful in Volhynia, Podlachia, Polisia, and in the Kholm and Lemko regions than in Galicia, where Ukrainians were better organized politically and economically.

In Transcarpathia the Czechoslovak government allowed Ukrainian and the local Transcarpathian dialect to be used in schools, the press, the courts, and the civil service. In the 1930s, however, the government became more sympathetic to the Russophile tendency. The Hungarian occupational regime of 1939–44 prohibited the use of Standard Ukrainian, but allowed the Transcarpathian dialect to be used by the government in communicating with the public and as a language of instruction in primary and secondary schools.

In Bukovyna and Bessarabia, the chauvinist Rumanian regime pursued a policy of total Rumanianization. The 1923 Constitution proclaimed Rumanian as the only official language and did not mention the linguistic rights of national minorities. Ukrainian was banned from the civil service, education, and even the church. Briefly, in 1929–33, elementary schools with a majority of Ukrainian pupils were allowed to teach six to eight hours per week in Ukrainian.

Soviet Ukraine. Soviet language policy, based on the Communist party's *nationality policy, was inconsistent. Although V. Lenin declared his support for the free development of the national languages of the Russian Empire, the Party's behavior in the first few years of the Bolshevik regime in Ukraine contradicted this principle. Russian was the dominant language in the government, the Party, and postelementary education. Demands for the equality of Ukrainian met with opposition from Russian Bolsheviks. In 1921, for example, Kh. Rakovsky wrote that recognition of Ukrainian as the official language could lead to rule by Ukrainian bourgeoisie and kulaks. Yet pressure from the people, the Ukrainian intelligentsia, and influential Ukrainian Bolsheviks such as M. Skrypnyk, O. Shumsky, V. Blakytny, and H. Hrynko persuaded the 12th Party Congress in 1923 to launch the indigenization policy, which in Ukraine became the *Ukrainization policy. As a result, Ukrainian became widely used in government, public life, education, the arts, and scholarship. Much was done to develop and standardize the language. By 1933, however, the policy was abandoned, though not officially revoked, and a full-scale attack on Ukrainian culture was begun. The gains Ukrainian had made were quickly reversed: as a medium of communication it was virtually eliminated from all spheres except village life and elementary education. Russification in the urban and industrial centers was intensified. Ukrainian linguists were accused of separating Ukrainian from Russian and were prosecuted as 'nationalist saboteurs.' The publication of Ukrainian

dictionaries and linguistic studies was halted, and the old language textbooks were removed from the schools. A commission was set up at the People's Commissariat of Education to review Ukrainian terminology and orthography. With the official adoption of the theory of the convergence of Russian, Ukrainian, and Belarusian, Ukrainian orthography, terminology, and syntax were revised to bring them closer to Russian. The 14th Congress of the CPBU in 1938 resolved 'to liquidate the effects of enemy wrecking in the teaching of Russian in schools.' Lacking any legal guarantees, Ukrainian quickly lost ground in regions of Ukrainian settlement outside Ukraine. During the Soviet occupation of Western Ukraine (1939–41) some local concessions to Ukrainian were made in order to gain popular support for Soviet rule.

After the Second World War the Stalinist language policy remained virtually intact. The Russian language was deemed superior to the other national languages, as 'the language of a higher culture, of the October Revolution, of Lenin and Stalin.' It was propagated as the 'second native language' of all non-Russians in the USSR. The education law adopted by Ukraine's Supreme Soviet in 1959 gave parents the 'democratic' right to choose their child's language of instruction – Ukrainian or Russian. The CPSU Program (1961) even spoke of the creation of a homogeneous 'Soviet people and the gradual disappearance of national distinctions, particularly in language. Translated into practice, this meant the official promotion of Russian in all spheres of life and the discouragement of the use of other languages. In the cities and industrial centers Ukrainian regressed to its position in tsarist times.

The courageous struggle of a handful of intellectuals against Russification was brutally suppressed in the 1960s and 1970s. The discriminatory resolution 'On the Further Improvement [ie, intensification] of the Learning and Teaching of the Russian Language in the Union Republics' adopted by the USSR Council of Ministers in 1978 further increased the incentives for studying Russian at all levels of the educational system. As M. Gorbachev's political reforms took hold in the late 1980s, Soviet language policy came under increasing criticism. In October 1989 the Supreme Soviet of the Ukrainian SSR recognized Ukrainian as the official language of the republic and set forth a schedule for the gradual Ukrainianization of all public institutions in Ukraine. Yet on 24 April 1990 Russian was decreed the official language of the Soviet Union by the Supreme Soviet of the USSR.

Postwar Eastern Europe. In the Polish People's Republic, the indigenous Ukrainians were subjected to a policy of linguistic assimilation, although from 1956 Ukrainian periodicals were published and a modicum of Ukrainian-language education was allowed. The Ukrainians in the Prešov region of eastern Slovakia have enjoyed relatively broader linguistic rights since 1945, while those in Rumania have had relatively fewer rights. In Yugoslavia, Ukrainians in the Bačka region of Serbia and in Banja Luka in Bosnia have published periodicals in Ukrainian and the Bačka dialect and have run elementary and secondary schools in the Bačka dialect.

Laniuk, Yurii [Lanjuk, Jurij], b 7 June 1957 in Lviv. Composer and cellist. Laniuk studied under the Polish composer A. Nikodemowicz and completed the Lviv Conservatory course in 1980. In 1975 he received first prize in the Lysenko Competition in Kiev and in 1990 he was the recipient of the L. Revutsky Prize for his chamber quartet 'Dva ruchai' (Two Brooks). His compositions include works for cello ('Diptych,' 1988) as well as *Chant pour un Equinoxe* for baritone, soprano, and chamber orchestra (1991). While active as a composer, Laniuk also teaches cello and composition at the conservatory.

Lanivtsi [Lanivci]. IV-7. A town smt (1990 pop 9,100) and raion center in Ternopil oblast, situated on the Zherdia River. It was first mentioned in documents as early as 1444. It has a reinforced-concrete structures plant, a sugar refinery, a dairy, and a regional museum.

Lanka. See MARS.

Yurii Lapchynsky

Lapchynsky, Yurii [Lapčyns'kyi, Jurij], b 1887, d 1938. Bolshevik party leader and government official. As a leading Bolshevik in Kremenchuk, he chaired the local soviet of workers' and soldiers' deputies in 1917. By December

1917 he was head of the People's Secretariat and a member of the Central Executive Committee of the Soviets of Ukraine. During the Hetman regime he was plenipotentiary of the Provisional Workers' and Peasants' Government of Ukraine in Chernihiv, and in 1919, chairman of the Chernihiv Gubernia Revolutionary Committee and a member of the All-Ukrainian Central Executive Committee and the Kiev Gubernia Revolutionary Committee. An early advocate of Ukrainian autonomy within a federated party and state, he headed the so-called Federalist Opposition within the CP(B)U in 1919. Along with P. Popov and P. Slynko he demanded at the Homel Party Conference in November 1919 an independent Communist party for Ukraine and a Soviet Ukrainian state equal to and federated with the RSFSR. He accused the Russian Communist Party (Bolshevik) of subjugating Ukraine and treating it as a colony. In 1920 Lapchynsky resigned in protest from the CPBU and joined the Ukrainian Communist party, which, however, merged in 1925 with the CP(B)U. In 1928–30 he served as Soviet consul in Lviv. In the early 1930s he was attacked for Ukrainian nationalism and purged from the party. Eventually he perished in the Stalinist terror.

I. Myhul

Laponohov, Oleh, b 15 September 1930 in Kiev. Neurosurgeon. A graduate of the Kiev Medical Institute (1954), he worked in the Kiev Scientific Research Institute of Neurosurgery, from 1969 as director of the functional neurosurgery division. His work concerned the application of operational intervention to functional disorders of the brain and spinal medulla, and cryosurgery for diseases of the central nervous system.

Lappo, Ivan, b 29 August 1869 in Tsarskoe Selo, Russia, d 23 December 1944 in Dresden. Russian historian and specialist in Lithuanian-Ruthenian law. A graduate of St Petersburg University (1892), he lectured at Tartu University (1905–19), the Russian University in Prague (1921–33), and Kaunas University (1933–40). His major publications were *Velikoe kniazhestvo litovskoe za vremia ot zakliucheniia Liublinskoi unii do smerti Stefana Batoriia* (The Grand Duchy of Lithuania in the Period from the Union of Lublin to the Death of Stephen Báthory, 1901), *Velikoe kniazhestvo litovskoe vo vtoroi polovine XVI stoletiiia* (The Grand Duchy of Lithuania in the Second Half of the 16th Century, 1911), *Litovskaia metrika* (The Lithuanian Register, 3 vols, 1910–14), and *Litovskii statut 1588 goda* (The Lithuanian Statute of 1588, 2 vols, 1934, 1938).

Lappo-Danilevsky, Aleksandr [Lappo-Danilevskij], b 27 January 1863 in Udachne, Katerynoslav county, d 7 February 1919 in Petrograd. Russian historian, archeologist, and professor in St Petersburg. Most relevant for Ukrainian studies are his publication *Skifskie drevnosti* (Scythian Antiquity, 1887; 2nd edn 1897) and his study of 14th-century wax seals from the Principality of Galicia-Volhynia.

Lapsky, Ostap [Laps'kyj], b 7 July 1926 in Hutsky, near Kobryn, in Polisia voivodeship (now in Belarus). Ukrainian philologist, poet, newspaper and radio journalist, translator, and community figure in postwar Poland. A graduate of Warsaw University (1955), since 1957 he has taught Ukrainian literature and held the university's chair

of Ukrainian philology. He helped prepare the Warsaw edition of the Ukrainian-Polish dictionary (1957), has contributed articles on Ukrainian writers to *Mały słownik pisarzy europejskich narodów ZSRR* (A Concise Dictionary of Writers of the European Nations of the USSR, 1966) and the journal *Slavia Orientalis*, and has written textbooks and edited anthologies for Ukrainian-language elementary schools. He has been an active member of the Ukrainian Social and Cultural Society and a contributor to its paper, *Nashe slovo*, and its yearbook, and has served as an adviser to Ukrainian-language teachers in Poland. His poems have appeared in Ukrainian-language periodicals in Poland and Ukraine. He has translated some of the poetry of T. Shevchenko, P. Tychna, and V. Korotych into Polish, and some of the poetry of J. Słowacki, J. Tuwim, and J. Harasymowicz into Ukrainian.

Toma Lapychak

Lapychak, Toma [Lapyčak], b 17 October 1914 in Nyzhankovychi, Peremyshl county, Galicia, d 2 April 1975 in Houston, Texas. Physician, political activist, and publicist. He studied medicine in Cracow and took part in the work of the OUN (Melnyk faction). In 1941–2 he became a member and then chairman of the Regional Executive of the OUN before being imprisoned by the Nazis in a concentration camp. After the war, in 1945, in Germany, he joined the Leadership of the Ukrainian Nationalists (PUN) and edited the monthly *Orlyk* (1945–9) in Berchtesgaden. Later he edited *Samostiina Ukraïna* in Chicago (1950–5) and *Likars'kyi visnyk* (1962–6) and **Ukraïns'ke zhyttia*. Together with M. Shlemkevych he founded the Ukrainian Research and Information Institute in Chicago. He is the author of *Ukraïns'kyi natsionalizm* (Ukrainian Nationalism, 1962), in which he criticizes all the factions of the OUN. A book on his life's work was published by A. Bilynsky in 1986.

Larin, Borys, b 17 January 1893 in Poltava, d 26 March 1964 in Leningrad. Linguist; corresponding member of the AN URSS from 1945; member of the Lithuanian Academy of Sciences from 1949. A graduate of Kiev University (1914) and from 1931 a professor at Leningrad University, Larin authored several major works on the history of the Russian and Lithuanian languages and on comparative linguistics. As a lexicographer he published a number of 16th- and 17th-century Western European dictionaries and grammars of Russian, which contain materials showing Ukrainian influences on Russian. He wrote critical articles on literature, including the poetry of P. Tychna (1920), and designed a program for collecting informa-

tion for a dialectal atlas of the Ukrainian language (1948, 1949).

Rostyslav Lashchenko

Lashchenko, Rostyslav [Laščenko], b 1 September 1878 in Yelysavethrad, Kherson gubernia, d 30 October 1929 in Prague. Historian of law. After graduating in law from Kiev University (1905) he worked as a court official and judge (1909–17). He was elected president of the Kiev county justices of the peace (1917), chairman of the first department of the Kiev Court of Appeal (1918), and president of the appeals court (1919). At the same time he was a member of the Ukrainian Scientific Society in Kiev, the Commission for the Study of Ukraine's Customary Law at the Ukrainian Academy of Sciences, and the faculty of the Ukrainian State University. In 1920 he emigrated, first to Lviv and then to Prague, where he founded and presided over the Ukrainian Law Society and lectured on the history of Ukrainian law at the Ukrainian Free University and the Ukrainian Husbandry Academy in Poděbrady. Besides important articles on the Lithuanian Statute and the Pereiaslav Treaty, he wrote several monographs: *Lektsii po istorii ukraïns'koho prava* (Lectures on the History of Ukrainian Law, 2 pts, 1923–4), *Tsyvil'ne pravo* (Civil Law, 1925), and *Kopni sudy na Ukraïni* (Community Courts in Ukraine, 1926–7).

Lashchevsky, Varlaam [Laščevs'kyj], b ca 1710, d 28 July 1774 in Moscow. Classical philologist, churchman, and dramatist. After completing his studies at the Kiev Academy (1726–37), he took monastic vows and was appointed a lecturer at the academy (1739–47). He taught courses in Greek, for which he wrote a grammar in Latin (1746) that was later revised by H. *Shcherbatsky and republished several times in Leipzig and Moscow. It was used for most of the 19th century in Orthodox seminaries. In 1747 Lashchevsky revised and wrote the preface to a translation of the Old Testament (1751). In 1752 he was appointed rector of the Slavic-Greek-Latin Academy and archimandrite of the Don Monastery in Moscow. His morality play *Tragedokomediia ...* (Tragicomedy ...) was published by N. Tikhonravov in his *Letopisi russkoi literatury i drevnostei* (Chronicles of Russian Literature and Antiquities, vol 1, 1859) and by V. Riezanov in his anthology of Ukrainian drama. H. Skovoroda, who was Lashchevsky's student at the Kiev Academy, quoted from Lashchevsky's tragicomedy *Peresliduvana tserkva* (Persecuted Church).

Lashchuk, Yurii [Laščuk, Jurij], b 2 March 1922 in Lypky, Rivne county, Volhynia. Art scholar. A graduate of the Lviv Institute of Applied and Decorative Arts (1953), he lectured there (1962–75) and obtained a doctorate in 1974. A specialist in folk pottery, he has written books on Hutsul (1950), Transcarpathian (1960), and Kosiv (1966) ceramics and on Ukrainian potters (1968) and is a co-author of a history of Ukrainian decorative art (1969) and vols 2 and 4 of the ANU history of Ukrainian art (1967, 1969–70).

Lashkarev, Petr [Laškarev, Pjotr], b 1833 in Kursk gubernia, d 28 August 1899 in Kiev. Church historian. He graduated from the Kiev Theological Academy and then taught canon law and church history there (from 1866) and at Kiev University (from 1885). He published articles on canon law and other topics in *Trudy Kievskoi dukhovnoi akademii* and other journals, and six of his articles on early churches and church architecture in Kiev were collected in *Tserkovno-arkheologicheskie ocherki, issledovaniia i referaty* (Church Archeology Outlines, Research, and Essays, 1898).

Lashkarov, Vadym [Laškar'ov] (Lashkarev, Vadim), b 7 October 1903 in Kiev, d 1 December 1974 in Kiev. Physicist; AN URSS (now ANU) full member from 1945. A graduate of the Kiev Institute of People's Education (1924), he conducted research at the Kiev Polytechnical Institute (1925–30). From 1939 he headed the semiconductor department at the ANU Institute of Physics in Kiev and taught physics at Kiev University. In 1951–6 Lashkarov contributed significantly to the development and theory of germanium semiconductor devices. In 1960 the semiconductor department at the Institute of Physics became the core of the newly formed ANU *Institute of Semiconductors, which Lashkarov directed until 1970. In 1956 Lashkarov initiated **Ukraïns'kyi fizychnyi zhurnal*. As its chief editor until his death, he was primarily responsible for its high professional level. After his death the journal succumbed to Russification pressures, and during 1978–89 it was published exclusively in Russian.

Oleksander Lashkevych

Lashkevych, Oleksander [Laškevyč], b 1842 in Starodub, Chernihiv gubernia, d 1889. Historian and civic leader. He studied at Kiev University and became involved in peasant reforms in the Kiev and Podilia regions (1860s) and in zemstvo and legal reforms in the Chernihiv region (1870s and 1880s). He was a member of the Old Hromada in Kiev and an editor and publisher of **Kievskaiia*

starina (1888–9). His works on the history of 18th-century Left-Bank Ukraine were published in journals such as *Kievskaia starina* (where his recollections were also published, posthumously, in 1899, no. 67) and *Russkii arkhiv*.

Laskarev, Vladimir, b 9 July 1868 in Biriuchi, Voronezh gubernia, Russia, d 10 April 1954 in Belgrade, Yugoslavia. Russian geologist. After graduating from Odessa University in 1892, he taught there until 1920. He subsequently emigrated and was appointed a professor at Belgrade University. In 1901–7 he conducted geological research in Podilia and Volhynia, and in 1915 he published his major work, on the structure of river valleys in Ukraine. He also wrote many geological studies of the Balkan countries.

Laskarzhevsky, Valerii [Laskarževs'kyj, Valerij], b 24 March 1947 in Kiev. Painter. He studied at the Kiev State Art Institute and the Moscow Higher Applied Art School. His work is figurative and realistic but with elements of the unusual. Laskarzhevsky was one of eight Kiev artists chosen for the Exhibition of Young Ukrainian Artists in Moscow in 1985.

Laskavy, Mykhailo [Laskavyj, Myxajlo], b 1862, d 1954 in Shanghai. Actor and stage director. In 1890 he began his theatrical career in Saksahansky's troupe; then he worked in P. Prokhorovych's and T. Kolesnychenko's troupes in Ukraine. In 1912–16 he toured with K. Kameliuk-Kamensky's troupe in Siberia, Japan, and China. From 1926 he was a theatrical director at the Ukrainian National Home in Harbin, Manchuria.

Laslo-Kutsiuk, Mahdalyna [Laslo-Kucjuk] (Laszlo-Kuțiuk, Magdalena), b 30 August 1928 in Timișoara, Rumania. Literary scholar. She studied at Cluj, Bucharest, and Kharkiv universities and taught Ukrainian language and literature at Bucharest University (1954–83). Her perceptive comparative and structuralist studies of modern Ukrainian literature have been published in Soviet Ukrainian and Rumanian journals and as the collections *Velyka tradytsiia* (The Great Tradition, 1979) and *Shukannia formy* (The Search for a Form, 1980). She has also produced a doctoral monograph on Rumanian-Ukrainian literary relations (1974, in Rumanian) and textbooks on Ukrainian poetics (1974) and Soviet Ukrainian literature (2nd edn 1976). She has compiled anthologies of 19th-century Ukrainian stories (1973) and 20th-century Ukrainian poetry (1976) and edited the complete works of S. Yarychevsky (2 vols, 1977, 1979).

Lasovska-Kruk, Myroslava [Lasovs'ka-Kruk], b 11 March 1919 in Galicia. Painter, graphic artist, and writer; wife of V. Lasovsky. She studied graphic art with S. Zhuravsky in Sokal, sculpting with O. Stovbuniak in Landeck, and painting with V. Lasovsky. Having left Ukraine at the end of the war, she settled in Argentina and, in 1959, the United States. She exhibited her work with the Ukrainian Artists' Association in the USA. She has written several novels, such as *Pid chornym nebom* (Under a Black Sky, 1966) and *Dzvinka molodist'* (Reverberating Youth, 1982–3), and plays, such as *L'odolom* (Icebreaker, 1974) and *Volodymyr Velykyi* (Volodymyr the Great, 1988). She has been a leading member of the Association for the Advancement of Ukrainian Culture, the Women's Alliance of the *Organization for the Defense of Four Freedoms for Ukraine,

and the World Federation of Ukrainian Women's Organizations.

Volodymyr Lasovsky: *Self-Portrait* (oil, 1961)

Lasovsky, Volodymyr [Lasovs'kyj], b 3 July 1907 in Sorokey, Buchach county, Galicia, d 11 November 1975 in New York. Painter and art essayist and theoretician. He studied at the Novakivsky Art School in Lviv (1928–33) and F. Léger's Académie Grand Chaumier in Paris (1934) and was a key member of *RUB and the *Association of Independent Ukrainian Artists in Lviv. A postwar émigré in Austria and Paris, he lived in Argentina from 1948 and moved to New York in 1959. Lasovsky painted portraits in a classical manner and Légeresque semiabstract compositions with geometric figures. In Buenos Aires he taught art history at a Ukrainian theater studio, and in New York he headed the branch of the Ukrainian Artists' Association in the USA, directed Ukrainian plays, and was chairman of the Council on Cultural Affairs of the World Congress of Free Ukrainians. A book about him was published in 1980 in Toronto.

Lassota von Steblau, Erich, b 1550, probably in Bleischwitz (Błażejowice), Silesia, d 1616 in Košice, Slovakia. Silesian nobleman, soldier of fortune (in Spain and Portugal), and Austrian diplomat. He studied at Leipzig and Padua universities. From 1585 he was a courier of Emperor Rudolph II and an adviser (from 1589, lord high steward) to Archduke Maximilian. In 1594, as Rudolph's envoy, Lassota traveled to the Zaporozhian Sich to enlist the Zaporozhian Host as allies in Austria's war with Tur-

key. The diary of his mission is a valuable source for the history and geography of late 16th-century Ukraine, particularly of the Zaporizhia. It describes in detail his stay at the Sich, the life of the Cossacks, and his stay in Kiev, Lviv, and other towns in Galicia and Right-Bank Ukraine. Lassota's diary of 1573–94 was published in German in Halle in 1866. His diary of the year 1594 has been translated into Russian (1873, 1890 [trans K. Antonovych-Melnyk, ed V. Antonovych]), Polish (1972), and English (1975). Excerpts from it have been translated into Ukrainian by D. Yavornytsky, V. Domanytsky, M. Hrushevsky, and V. Sichynsky.

Lassowsky, Jaropolk [Lasovs'kyj], b 17 October 1941 in Lviv. Composer, conductor, violinist, and pedagogue. Educated in music education at New York University (MA, 1969) and music theory at Ohio State University (1981), he is professor of music and conductor of the University Symphony at Clarion University of Pennsylvania as well as concertmaster of the Montreux Festival Symphony and the OPUSI Chamber Orchestra of Cleveland. He is also a member of the New Jersey Symphony, the New Hampshire Music Festival Orchestra, and the Columbus Symphony. His compositions include 'Symphonic Etude,' 'Tocatta for Piano,' 'Rhapsody for Flute Solo,' 'Triptych for Violin and Piano,' 'Trio Brevis,' *Daisy* (a musical comedy), and numerous vocal settings of Ukrainian poets. Lassowsky also translated and annotated *Selected Works* by V. *Stus (1987).

Lastivka, Petro, b 5 July 1922 in Savyntsi, Vasylykiv county, Kiev region. Stage and film actor. In 1949 he completed study in the cinema school at the Kiev Artistic Film Studio. He worked as an actor in Ukrainian theaters in Uzhhorod and Chernihiv in 1945–60, joined the Ternopil Ukrainian Music and Drama Theater in 1960, and has been its artistic director since 1988. He acted in the film *Duma pro Kovpaka* (The Ballad about Kovpak, 1976) and wrote the plays *Divchyna z Desny* (The Girl from the Desna River, 1959) and *Oblychchiam do sontsia* (Facing the Sun, 1968).

Lastivka. A Russophile magazine for children, published in Lviv from 1869 to 1881. A supplement to **Uchytel*' until 1875, it appeared weekly until 1874, and then twice a week. The editor and publisher was M. Klemertovych. *Lastivka* published articles on religion and history by I. Halka, A. Dobriansky, D. Vintskovsky, and Y. Markov, and on economic and agricultural subjects by H. Vretsona, I. Naumovych, and others.

Lastôvka. An almanac compiled and published by Ye. Hrebinka in St Petersburg in 1841. It had 382 pages and contained works by L. Borovykovsky, Ye. Hrebinka, H. Kvitka-Osnovianenko, V. Zabala, I. Kotliarevsky, P. Korynytsky, P. Kulish, P. Pysarevsky, O. Chuzhbynsky, and

Lastôvka (title page)

T. Shevchenko. It also included folk songs, popular proverbs, and folktales.

Latin alphabet. The oldest extant literary monuments in Ukraine written in the Latin alphabet (LA) date from the 16th ('The Song of Shtefan the Voivode' in a Czech version of the alphabet) and 17th centuries ('The Song about the Massacre of the Jews of Berestechko,' J. Gawatowicz's *intermedii*, and Kondracki's song collection in a Polish version). In the 19th century conscious efforts at popularizing the use of the LA in Ukraine were made by Y. *Lozynsky and the writers of the Ukrainian school in Polish literature. The first system for a LA for Ukrainian was proposed by F. Miklosich in vol 1 of his *Vergleichende Grammatik der slavischen Sprachen* (1852). Based on the Czech (č, š, ž, dž) and Croatian and Polish (t', d', s, z, c, dz, l', n) versions of the LA, it was widely used for some time in transcribing Ukrainian words in scholarly bibliographies; in 1859 J. Jíreček relied on it in his proposal for an official LA for Galicia's Ukrainians, which provoked the so-called *Alphabet war. Later attempts at popularizing a combined Latin-**hrashhdanka* alphabet (eg, by M. Drahomanov) and a mixture of the versions of the LA used in various Slavic, Germanic, and Romance languages did not take root in Ukraine; and in 1927 a proposal for Latinizing the Ukrainian script by M. Yohansen, B. Tkachenko, M. Nakonechny, and others was rejected by Ukraine's linguistic authorities, though V. Simovych supported it in principle.

Latinisms. Words and expressions borrowed from the Latin. Proto-Slavic was practically devoid of Latinisms, because of the relative lateness of Slavic-Roman contacts. A few Latin words entered it, partly via the Germanic languages, only in the period of its disintegration. These words referred to cultivated plants, eg, *čerešnja* 'cherry' from *cerasus*, *red'ka* 'radish' from *rādīcem*, *ljača* 'lentil' from *lens*; items of trade, eg, *ocet* 'vinegar' from *acetum*, *vyjno* 'wine' from *vinum*; and rites and beliefs, eg, *koljada* 'carol' from *calendae*, *rusalka* < *rusaliya*, an ancient spring ritual, from *rosālia*, and *pohanyn* 'pagan' from *pāgānus*. After the Christianization of Rus', Latinisms entered Old Ukrainian through Church Slavonic and Greek: eg, *oltar* 'altar' from *altare*; *ruha* 'church land' from *rogāre*; *tjablo*, a row of icons above the 'royal doors' of the iconostasis, from *templum* or *tabula*. Latin was the official language of government and law in the Polish Commonwealth; hence, the number of Latinisms entering Ukrainian increased sharply from the mid-16th century on. At the beginning of the 17th century,

the teaching and use of Latin became widespread in Ukraine's schools, and many new Latinisms, referring mostly to cultural concepts, entered Ukrainian: eg, *avtor* 'author' from *auctor*, *apeljacija* 'appeal' from *appellatio*, *lekcija* 'lesson' from *lēctiō*, *instrument* 'instrument' from *instrumentum*, *minuta* 'minute' from *minuta*, *posesija* 'leased land' from *possessus*, *sēkrēt* 'secret' from *secretus*. Most Latinisms that entered Ukrainian during the period of Polish rule existed in and were introduced via Polish.

Since the 18th century, Latinisms already existing in various Western European lexicons, particularly scientific terms, have entered Ukrainian in increasing numbers, mostly via German, Polish, or Russian. In addition, the use of several, often modified, Latin suffixes (*-al'nyj* from *-al*, *-abel'nyj* from *-abelis*, *-izm* from *-ismus*, *-acija* from *-atio*, *-ura* from *-ura*) and a few borrowings from Latin syntax (the predicate verb at the end of a sentence, used in the literary language of the 17th and 18th centuries) have become common in Ukrainian.

O. Horbach

Latorytsia River. See Liatorytsia River.

Latsis, Martin (real name: Sudrabs, Jan), b 28 December 1888 in Latvia, d 20 March 1938. He was active in Riga in the 1905 Revolution and in Petrograd in the 1917 Revolution. After the Bolshevik coup he served on the colleges of the People's Commissariat of Internal Affairs and of the All-Russian *Cheka. As chairman of the All-Russian (July–November 1918) and the All-Ukrainian (1919–21) Cheka, he waged a campaign of terror against the Party's political opponents, Ukrainian insurgents, peasants, and the intelligentsia. After 1921 he held high posts in the administration of the economy and in the Party. He perished in the Stalinist terror and was rehabilitated in the 1950s.

Latsky, Vol'f [Lac'kyj, Vol'f] (pseud: Bertoldi), b 1881 in Kiev, d 1940 in Tel Aviv. Jewish-Ukrainian political figure and journalist in Kiev. The founder and leader of the Jewish People's party in Ukraine, in April 1919 he served as minister for Jewish affairs in the UNR government. Some of his works deal with the Denikin army's Jewish pogroms in Ukraine.

Latta, Vasył, b 29 December 1921 in Pčoliné, Humenné district, Czechoslovakia, d 27 June 1965 in Bratislava. Linguist. A graduate of Bratislava (1947) and Leningrad (1949) universities, Latta taught at Bratislava University beginning in 1954 and became a professor there in 1962. He prepared a three-volume atlas of Ukrainian dialects in Slovakia (1991) based on his extensive field research on the Ukrainian dialects of Eastern Slovakia, and published several articles on the phonology of these dialects and an important article on the Slovak-Ukrainian linguistic border (1962).

Latvia. A Baltic state (1991 pop 2,694,000) with an area of 64,500 sq km. Its capital is *Riga. In 1989 the population of Latvia stood at 2,666,600, including 1,387,800 Latvians, 906,000 Russians, 120,000 Belarusians, and 92,100 (3.45 percent) Ukrainians. There were some 71,000 Latvians living elsewhere in the former USSR (7,200 in the Ukrainian SSR, and 46,800 in the RSFSR). Latvians have settled in other European countries, Australia, the United States, Canada, and Argentina.

In the 10th to 12th centuries the southeastern part of Latvia formed part of Kievan Rus' (the Polatsk and Pskov lands). In the 13th century Latvia was ruled by the Teutonic knights, and from the mid-16th century it was part of the Polish-Lithuanian Commonwealth. Northern Latvia was annexed by Sweden in 1629 and then by Russia in 1721. The entire country came under Russian control in 1772 and remained so until 1918. A Latvian national renaissance began in the latter half of the 19th century, and paved the way for the establishment of an independent Latvian republic at the end of 1918. In June 1940 Latvia was occupied by the Bolsheviks, who transformed it into the Latvian SSR. After a reoccupation by the Germans in 1941–5, Latvia again came under Soviet control.

Ukrainian-Latvian relations began toward the end of the 19th century. In Riga there was a small Ukrainian community of civil servants, workers, and students of the local polytechnical institute. In the early 1900s the Ukrainians established the cultural association Hromada, which organized the commemoration of the centenary of the birth of T. Shevchenko in 1914. In the state Duma, Ukrainians and Latvians collaborated within the Union of Autonomists. The Ukrainian activists I. Shrah and P. Chyzhevsky in particular had close connections with Y. Chakste, a Duma member who later became the first president of the Latvian republic. During the time of the Directory there was a Ukrainian diplomatic mission in Riga headed by V. Kedrovsky. On 18 March 1921 the peace treaty between Poland, the USSR, and the Ukrainian SSR was signed in Riga. In the interwar period there was a small Ukrainian colony in Riga, which in 1933 founded the Latvian-Ukrainian Association.

After the Second World War a major influx of non-Balts including many Ukrainians moved into Latvia from other parts of the Soviet Union. According to the 1959 census, 1.4 percent (29,000) of the population consisted of Ukrainians and 26.6 percent of Russians. Twenty years later the percentage of Ukrainians had more than doubled.

Ukrainian-Latvian cultural ties began in the 1890s with the translations into Latvian of Ye. Hrebinka, T. Shevchenko, M. Vovchok, I. Franko, M. Kotsiubynsky, V. Stefanyk, and O. Kobyljanska. The translations of Shevchenko's works were especially publicized on the occasion of the 50th anniversary of his death and the centenary of his birth (1911 and 1914). After the Soviet occupation of Latvia in 1940, these ties were promoted not in their own right but as part of the USSR's 'friendship of nations' propaganda. Ukrainian classics by authors such as Shevchenko were translated into Latvian, as were works of contemporary authors, such as P. Tychyna, M. Rylsky, M. Bazhan, O. Korniiichuk, Yu. Yanovsky, M. Stelmakh, and O. Honchar. Ukrainian plays and movies were staged or screened in Latvia, and Ukrainian Festival Weeks were held annually in June. At the same time many works of Latvian writers, notably Ya. Rainis, L. Laitsens, and A. Upit, were translated into Ukrainian, and Latvian plays were a regular part of the repertoire of theaters in the Ukrainian SSR.

The liberalization policy toward the end of the 1980s led to a renewed effort on the part of Latvians to free themselves from the Soviet Union. Popular support for independence manifested itself in the Popular Front of Latvia (LTF) and the National Independence Movement of Latvia (LNNK). After the LTF and the LNNK won a majority

Title page of *Storozha*, a Ukrainian journal recently published in Latvia

Larysa Latynina

in the elections to the republic's legislature, the restoration of the 'Republic of Lithuania' was declared by the Supreme Council on 4 May 1990. Nearly 74 percent of those who voted supported this declaration of independence.

Since 1988 a Ukrainian youth club has been active in Riga. The newspaper *Trybuna* has appeared there also since 1988; in its early days it published materials which at that time were still forbidden in Ukraine. The printing presses of Riga were often used to print Ukrainian newspapers (eg, *Holos vidrozhennia*), which were then smuggled into Ukraine. There has existed mutual support and co-operation between the LTF and the Ukrainian movement for democratization, Rukh. Riga was the site of the founding meetings of several democratic organizations from other republics of the Soviet Union and of the Ukrainian National Democratic League (now the Ukrainian National Democratic party). In 1991 V. Strutynsky began to edit in Riga the journal *Storozha*, devoted to politics, culture, and history.

A. Zhukovsky

Latynina, Larysa (née Dyrii), b 27 December 1934 in Kherson. World-class gymnast. A graduate of the Kiev Institute of Physical Culture (1959), she won a record number of Olympic medals (nine gold, five silver, and four bronze) and was the all-round women's gymnastics champion at the 1956, 1960, and 1964 Olympic Games; she was also the women's gymnastics world champion in 1958 and 1962, the European champion in 1957 and 1961, and a USSR champion 11 times (1956–64). In the history of individual and team events in gymnastics and sports in general, she won the largest number of competitions. In 1966 she moved to Moscow, where until 1977 she coached the USSR women's gymnastics team and served as an international-class judge. From 1977 she was a member of the Organizing Committee of the 1980 Olympic Games. Latynina wrote the books *Soniachna molodist'* (Sunny Youth, 1958) and, in Russian, *Ravnovesie* (Equilibrium, 1975) and *Gimnastika skvoz' roky* (Gymnastics through the Years, 1977).

Latynnyky. The name given to Ukrainian-speaking Roman Catholics in Polish-ruled Western Ukraine, who

were either Ukrainian converts to Roman Catholicism or the descendants of Polish colonists who had partially assimilated to the Ukrainian culture. They arose in the late 19th to early 20th century, and by 1939 their number was estimated at 700,000 (515,000 in Galicia and the rest in Volhynia and Podilia). Most *latynnyky* were peasants. When the new frontiers between Poland and the Ukrainian SSR were established after the Second World War, some *latynnyky* emigrated to Poland, but the majority remained and mostly became Ukrainianized. (See also *Poles in Ukraine.)

Latyshev, Georgii [Latyšev, Georgij], b 4 February 1907 in Bezhitsa (now part of Bryansk), Russia, d 3 April 1973 in Kiev. Nuclear physicist; AN URSS (now ANU) corresponding member from 1945 and full member of the Kazakh SSR Academy of Sciences from 1958. A graduate of the Leningrad Polytechnical Institute (1929), from 1930 to 1941 he worked at the Ukrainian Physical-Technical Institute in Kharkiv. In 1932 Latyshev, K. *Synelnikov, A. *Walter, and A. *Leipunsky became the first in the USSR to induce nuclear disintegration by artificially accelerated particles. In 1958 he organized the Institute of Nuclear Physics of the Kazakh Academy of Sciences in Alma Ata, which he served as director. In 1965 he moved to Kiev. There he worked at the ANU Institute of Physics and, from 1970, at the Institute for Nuclear Research.

Latysheva, Klavdiia [Latyševa, Klavdija], b 14 March 1897 in Kiev, d 11 May 1956 in Kiev. Mathematician. She studied at the Kiev Institute of People's Education (later Kiev University) in 1920–8, where she remained as a faculty member until her death. In the late 1920s and early 1930s, she worked closely with M. Krylov and M. Kravchuk. She was the first woman in Ukraine to attain a doctorate and then a full professorship in the field of mathematics. Her most famous work is a theorem on the necessary and sufficient conditions for the existence of closed-form solutions of differential equations with polynomial coefficients.

Laurentian Chronicle (Lavrentiivskyy litopys). One of the oldest compendiums of Rus' *chronicles. It is named after the monk Lavrentii, who copied it in 1377 for Prince Dmitrii Konstantinovich of Suzdal. The original is preserved at the St Petersburg Public Library. It contains the chronicle **Povist' vremennykh lit* (second redaction, 1116) and the chronicle compiled for Prince Mikhail Yaroslavich of Vladimir, which describes events until 1305. The pages for the years 898–922, 1203–5, 1263–83, and 1288–94 are missing. The text of Prince Volodymyr Monomakh's testament, **Poucheniie ditiam*, appears in the middle of a narrative about people imprisoned by Alexander the Great of Macedonia and Monomakh's epistle to Prince Oleh Sviatoslavych. The chronicle was discovered in 1792 at the Vladimir Monastery of Christ's Nativity by A. Musin-Pushkin and was published in its entirety in 1846 as the first volume of the full collection of the Rus' chronicles. A second edition, edited by E. Karsky, was published in 1926–8 and reprinted in 1962.

Lausitz culture. See Lusatian culture.

Lava courts (literally, bench courts). Courts introduced in the 17th century in cities of Poland and Ukraine that enjoyed the rights of Magdeburg law. They consisted usually of three to seven assessors (*lavnyky*) and were headed by the mayor. According to the law, the members were elected by the free residents, but in practice new members were often appointed by sitting members. The courts had jurisdiction over the residents of the city and the suburban villages in civil and criminal matters. In the 18th century their authority was restricted to petty disputes over property. They were abolished in the mid-19th century after the abolition of Magdeburg law. Later, the name was applied to jury courts in Ukrainian territories under Austrian rule.

Lavra (from the Greek word meaning 'walled part of a city'). Originally a term applied to fortified monasteries in Palestine, it was later used to designate any large or important monastery that came under the direct jurisdiction of the highest church body (eg, the metropolitanate or patriarchate) in a country. In Ukraine, the title *lavra* was conferred on only two Orthodox monasteries, the *Kievan Cave Monastery in 1688 and the *Pochaiv Monastery in 1833, although unofficially it had been used for the latter as early as the 18th century. In the 19th and 20th centuries the local bishop bore the title 'priestly archimandrite' of the given *lavra*, and it was directly administered by his appointee, who had the title 'archimandrite.'

Lavrenko, Yevhen, b 23 February 1900 in Chuhuiv, Kharkiv gubernia, d 18 July 1987 in Leningrad. Geobotanist and phytogeographer; full member of the USSR Academy of Sciences from 1968. He graduated from the Kharkiv Institute of People's Education (1922) and worked at the Kharkiv Botanical Gardens (1921–8) and the Kharkiv Institute for the Protection of Nature (1926–9). He taught at the Kharkiv Agricultural Institute in 1929–34 and then moved from Kharkiv to work in the Leningrad Botanical Institute. Lavrenko's scientific research was devoted mainly to steppe vegetation in the USSR, a field in which he introduced new classifications, as well as to the regionalization and mapping of vegetation. He wrote numerous works on the geobotany of Ukraine, particularly its steppes and marshlands. Lavrenko also worked on the history of flora and vegetation and introduced a concept of the phytogeosphere as a part of the biosphere.

Lavrentev, Mikhail, b 19 November 1900 in Kazan, d 15 October 1980 in Moscow. Mathematician; full member of the AN URSS (now ANU) from 1939 and of the USSR Academy of Sciences from 1946. Lavrentev graduated from Moscow University in 1922 and received his doctoral degree there in 1933. From 1939 to 1941 and 1944 to 1949 he was director of the ANU Institute of Mathematics. From 1945 he was vice-president of the ANU. He became director of the Institute of Mechanics and Computational Technology of the USSR Academy of Sciences (1950–3) and in 1957–75 was vice-president of the USSR Academy of Sciences and head of its Siberian division. From 1975 he worked at the Moscow Institute of Physics and Technology. Lavrentev's fundamental works in mathematics are devoted mostly to the theory of sets, the general theory of functions, the theory of conformal and quasi-conformal

mappings, and the theory of differential equations. In each of these areas he developed new directions. He also obtained new results and initiated new areas of research in mechanics and applied physics.

Yurii Lavrinenko

Lavrinenko, Yurii (Lawrynenko, Jurij; pseud: Yu. Dyvnych), b 3 May 1905 in Khyzhyntsi, Zvenyhorod county, Kiev gubernia, d 14 December 1987 in New York. Literary scholar, critic, and publicist. He graduated from the Kharkiv Institute of People's Education in 1930 and then obtained a PHD from the Institute of Literature of the AN URSS (now ANU). He was arrested several times between 1933 and 1935, and from 1935 to 1939 he was imprisoned in the concentration camp in Norilsk. He was exiled after his release, and in 1950 he emigrated to the United States. He began publishing his works while he was still a student. His historical-literary works are devoted mainly to research on the Ukrainian renaissance of the 1920s. The bibliography of his literary-critical and publicistic works contains more than 300 entries. His books include the literary portraits *Blakytynyi-Ellan* (1929), *Vasyl' Chumak* (1930), *Tvorchist' Pavla Tychyny* (The Works of Pavlo Tychyna, 1930), *V maskakh epokhy* (In the Masks of an Era, coauthor, 1948), the anthology *Rozstriliane vidrozhennia* (The Executed Renaissance, 1959), the collection of his literary-critical articles *Zrub i parosty* (The Stump and Its Offshoots, 1971), and the monograph *Vasyl' Karazyn* (1975). His essays include *Na shliakhakh syntezy kliarnetizmu* (On the Roads of the Synthesis of [the Poetic Style] Clarinetism, 1977) and *Pavlo Tychyna i ioho poema 'Skovoroda' na ili epokhy* (Pavlo Tychyna and His Poem 'Skovoroda' in the Context of the Era, 1980). His historical-publicistic works include *Sotsiializm i ukrains'ka revoliutsiia* (Socialism and the Ukrainian Revolution, 1949) and *Na ispyti velykoi revoliutsii* (At the Test of the Great Revolution, 1949). He also wrote *Ukrainian Communism and Soviet-Russian Policy toward the Ukraine: An Annotated Bibliography, 1917–1953* (1953) and his memoirs, *Chorna purha* (The Black Blizzard, 1985).

I. Koshelivets

Lavriv folios (Lavrivski lystky). Five folios copied in the 12th century from an Old Church Slavonic text of the Gospels and some sermons. The language of the manuscript bears some faint traces of Ukrainian. The fragment was published and analyzed by O. Kolessa in *ZNTSh*, vol 53, 1903.

Lavriv St Onuphrius's Monastery

Lavriv Saint Onuphrius's Monastery (Lavrivskiyi Manastyr sv. Onufriia). A monastery in Lavriv, Lviv oblast. According to legend, the monastery was built in 1278 over the burial site of Prince Lev Danylovych. It became a notable monastic center in the Peremyshl eparchy and later an important Basilian educational center. The (contemporary) Lavriv church, erected in the 15th century in a Byzantine-Athos style, was rebuilt in the 17th century and greatly altered in the 19th century. It contains valuable polychromatic 15th- and 16th-century frescoes. The monastery buildings now standing were built after major fires in 1767 and 1909. A center for monastic training, the Lavriv Monastery also housed the main school for the district from 1789 to 1911 (and for many years the only school in Galicia with Ukrainian-language instruction). After 1911 the school was turned into a gymnasium. A valuable library and archives were located on the site. The monastery was liquidated by the Soviet authorities in 1945–6 and replaced by a school and residence for deaf-mutes. The church soon fell into disrepair, and the iconostasis was destroyed.

Rev Ivan Lavrivsky
(1773–1846)

Rev Ivan Lavrivsky
(1822–73)

Lavrivsky, Ivan [Lavrivs'kyj] (Lavrovsky), b 15 May 1773 in Terka, Lisko county, Galicia, d 1846 in Peremyshl, Galicia. Greek Catholic priest, educator, and civic figure. He graduated (D TH, 1801) from and taught at Lviv University before becoming a teacher of religion, pastoral the-

ology, and Greek at the Lviv Lyceum (1805–14). He served as rector of the Greek Catholic Seminary in Lviv (1814–20) and then as a professor of biblical studies at the Pere-myshl Theological Institute and a priest at the Peremyshl cathedral. His major writings (all of which remain unpublished) include a Church Slavonic grammar for seminarians, a translation of the Primary Chronicle into Polish, and a Ukrainian-Polish-German dictionary. A promoter of the use and study of the Ukrainian language, Lavrivsky was one of the pioneers of the Ukrainian revival in Galicia. He donated his large library to the Peremyshl chapter and his estates to a foundation for promoting elementary education in Ukrainian and aiding widows and orphans of the clergy.

Lavrivsky, Ivan [Lavrivs'kyj], b 1822 in Lopianka, Doly-na county, Galicia, d 25 May 1873 in Kholm. Composer and priest. Having developed his musical skills while studying in Peremyshl, he became conductor of the cathedral choir there. His original compositions were comparable in style to those of M. *Verbytsky and constitute part of the 'Peremyshl school' that stood at the heart of Ukrainian musical development during the mid-19th century. Lavrivsky later moved to Cracow (1854–63) and Lviv (1863–6) before being appointed professor and vice-rector of the theological seminary in Kholm. His choral works include both religious and secular compositions such as 'Autumn,' 'Zaspivai my, soloviiu' (Sing for Me, Nightingale), 'Richen'ka' (The Streamlet), as well as the popular operettas *Oman ochei* (A Wile of the Eyes), *Roksoliana*, and *Pan Dohonos* (Mister Long Nose).

Lavrivsky, Markel (Antin) von Plöcken [Lavrivs'kyj], b 14 April 1887 in Sebechiv, Sokal county, Galicia, d 14 April 1927 in Vienna. Highest-ranking Ukrainian officer in the Austrian army. He graduated from the Wienerneustadt Academy and by 1914 had served in various infantry units and commanded the 77th Infantry Regiment. During the First World War, Lavrivsky was promoted to general-major and subsequently to field marshal-lieutenant and decorated with the Order of Leopold.

Lavrivsky, Mykhailo [Lavrivs'kyj, Myxajlo] (Lawriwsky, Michael), b 7 March 1952 in Barmera, South Australia. Economist and civic figure. A graduate of Adelaide University (PHD, 1982), he became a senior lecturer in finance at La Trobe University, Melbourne, in 1984 and full professor in 1990. The editor and founder of *Australian-Ukrainian Review* (1982–), he was instrumental in establishing Ukrainian studies at Monash University in 1983. He has held several leading positions in Ukrainian community organizations, including the Federation of Ukrainian Organizations in Australia. His publications include *Ownership and Control of Australian Corporations* (1978) and *Corporate Structure and Performance* (1984).

Lavrivsky, Yuliiian [Lavrivs'kyj, Julijan], b 1821, d 5 May 1873 in Lviv. Lawyer, civic figure, and political leader. A member of the Ruthenian Congress in 1848, he joined the Halytsko-Ruska Matytsia society and became the first chairman of its law department. He was a founder and long-term president of the Ruska Besida society (see *Ukrainska Besida) and its theater as well as president of the *Prosvita society (1870–3). In 1861, while serving as a

Yulian Lavrivsky

state procurator in Sambir, he was elected to the Galician Diet, and in 1870 he was appointed its deputy marshal. In 1869 he offered the Poles co-operation in the administration of Galicia in return for their granting the Ukrainian language the same status as Polish in government and education. The Polish-controlled provincial executive, however, rejected the offer. Lavrivsky founded the populist newspaper **Osnova* in 1870 and translated the Austrian civil code into Ukrainian.

Lavrov, Fedir, b 24 February 1903 in Veremiivka, Zolotonosha county, Poltava gubernia, d 9 December 1980 in Kiev. Folklorist. He served as director of the *Mystetstvo publishers* (1937) and the Kiev Institute of Foreign Languages. Then he chaired the ethnography (1951–2) and oral folklore (1952–62) departments at the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography. In 1939 he helped organize the First Ukrainian Republican Congress of Kobzars and Lirnyks in Ukraine. His chief works consist of a handbook on folklore (1940), a guide to collecting folklore (1949, 1951), a guide to recording folk poetry (1957), biographies of the kobzars F. Kushneryk (1940), O. Veresai (1955), and Ye. Movchan (1958), *Ukrain-s'ka narodna antyreligiinna satyra* (Ukrainian Antireligious Folk Satire, 1965), and *Kobzari* (Kobzars, 1980).

Lavrov, Pavlo, b 12 July 1903 in Radivtsi, Letychiv county, Podilia gubernia, d 1 June 1973 in Kiev. Marxist historian. A graduate of the Kiev Institute of People's Education (1933), he chaired the Department of the History of the Ukrainian SSR at Kiev University (from 1939) and served as dean of the history faculty. He wrote books on the peasant movement in Podilia gubernia in the first third of the 19th century (1946), the workers' movement in Ukraine in 1913–14 (1957, doctoral diss) and 1910–14 (1966), and Soviet Ukrainian historiography on the workers' movement in Ukraine in 1912–14 (1962).

Lavrovsky, Nikolai [Lavrovskij, Nikolaj], b 4 December 1825 in Vydropusk, Torzhok county, Tver gubernia, Russia, d 1 October 1899 in Kochetok, Zmiiv county, Kharkiv gubernia. Russian philologist and educator; full member of the Russian Academy of Sciences from 1890. A graduate of the Main Pedagogical Institute in St Petersburg, he taught at Kharkiv University (1853–74, professor from 1858) and then served as director of the Nizhen Historical-Philological Institute (1875–82) and rector of Warsaw Uni-

versity (1889–90). He wrote books on the language of the treaties between Rus' and the Greeks (MA diss, 1853), on schools in medieval Rus' (PhD diss, 1854), and on M. Lomonosov (1865).

Lavrovsky, Petr [Lavrovskij], b 25 March 1827 in Vydropusk, Torzhok county, Tver gubernia, Russia, d 12 March 1886 in St Petersburg. Russian philologist; corresponding member of the Imperial Academy of Sciences from 1856. After graduating from the Main Pedagogical Institute in St Petersburg (1851) he taught Slavic languages at Kharkiv University. Then he served as rector of Warsaw University (1869–72) and curator of the Orenburg (1875–80) and Odessa (1880–5) school districts. Some of his numerous works on Slavic languages were devoted to the history and distinctive nature of Ukrainian, eg, *Obzor zamechatal'nykh osobennosti narechiia malorusskogo sravnitel'no s velikorusskim i drugimi slavianskimi narechiami* (A Survey of the Main Peculiarities of the Little Russian Dialect in Comparison with the Great Russian and Other Slavic Dialects, 1859) and *O iazyke severnykh russkikh letopisei* (On the Language of Northern Rus' Chronicles, 1852). Disagreeing with M. Maksymovych, Lavrovsky sided with N. Pogodin and claimed that the language used in Kievian Rus' was Russian.

Lavruk, Pavlo, b 1865, d ? Political figure. A peasant of the Kolomyia region active in the Ukrainian Radical party and in the Sich movement, he was elected in 1911 to the Austrian parliament in Vienna and in 1913 to the Galician Diet. In 1921 he was expelled from the Radical party for advocating co-operation with the Polish government in Galicia.

Lavrushyn, Volodymyr [Lavrušyn], b 28 May 1912 in Kharkiv. Chemist. A graduate of Kharkiv University (1935), he worked at postsecondary institutions in Kharkiv (1945–53) and taught from 1953 at Kharkiv University, where he was rector from 1960 to 1966. His main research has been in physical organic chemistry, particularly the structure and reactivity of organic compounds.

Lavryk, Semen, b 2 November 1915 in Velyka Slobidka, near Ustia, Kamianets-Podilskyi county, Podilia gubernia, d 7 July 1990 in Kiev. Physician and hematologist; corresponding member of the AN URSR (now ANU) from 1979. A graduate of the Vinnytsia Medical Institute (1940), he was rector of the Kiev Medical Institute (1970–84) and director of the laboratory of the Kiev Scientific Research Institute of Hematology and Blood Transfusion. He wrote approx 160 works, including 2 monographs.

Lavryshevo Gospel (Lavryshevske yevanheliie). A manuscript of an Aprakos-type gospel transcribed in the 14th century from a Macedonian original. It consists of 183 parchment folios with double columns. In the 15th to 17th centuries the manuscript belonged to the Lavryshevo Monastery of the Mother of God, near Navahrudak, Belarus. It is now preserved at the Czartoryski Library in Cracow. Its language displays Polish features such as a new *ѣ*, a hardened *r*, a confusion of *ѣ* with *y* and *y* with *ѣ*, and sporadic *akan'e*. The manuscript and its language were described by T. Friedelówna in *Ewangeliarz Ławryszewski* (The Lavryshevo Gospel, 1974).

Law. The set of compulsory rules governing relations among individuals as well as institutions in a given society. Being part of the national culture, the law is influenced by the beliefs of a society and is inextricably involved in its social, political, and economic development. The term for law, *pravo*, is common to all Slavic languages. Originally, it meant 'judgment' or 'trial.' Other Ukrainian historical terms for law are *pravda*, *zakon*, *ustav*, *obychai*, *poshlyna*, *pokon*, *urok*, and *staryna*.

Before states were formed, communities on Ukrainian territory were governed by *customary law. The history of Ukrainian law is divided into periods according to the distinctive states that arose in Ukraine.

In the Princely era (9th–14th centuries) the main sources of law were customary law, agreements such as international treaties, compacts among princes, contracts between princes and the people, princely decrees, *viche* decisions, and *Byzantine law. The most original legal monument of the period is **Ruskaia Pravda*, which includes the principal norms of substantive and procedural law. The distinctions between public and private law and between civil and criminal law were unknown. The medieval Rus' state declined, but its law continued to function. In the 14th to 15th centuries it was known as *Rus' law in Ukrainian territories under Polish rule. Gradually, it was replaced by public as well as private *Polish law. At the same time (14th–17th centuries) *Lithuanian-Ruthenian law developed in Ukrainian territories within the Grand Duchy of Lithuania. The laws compiled in the *Lithuanian Register and the *Lithuanian Statute remained in force within the Polish-Lithuanian Commonwealth and, to some extent, in the Hetman state.

Under Polish and Lithuanian rule different foreign laws were adopted in Ukrainian regions for restricted local use. Among villages governed by Rus' law were scattered communities founded on *Wallachian law or *Germanic law. Armenian and Jewish colonies enjoyed internal autonomy and governed themselves by their own law. Municipal self-government based on *Magdeburg law dates back to the 13th century and survived as late as the 19th century in Ukraine.

The law of the Cossack period was based on the Hetman's treaties and legislative acts, the Lithuanian Statute, compilations of customary and Germanic law, and court decisions. After many years of work, the law was compiled and systematized in the *Code of Laws of 1743. The autonomous Hetman state had its own law, based mostly on the Lithuanian Statute. With the abolition of Ukrainian autonomy at the end of the 18th century, Russian law, first public and then civil, was introduced in Russian-ruled territories. In Western Ukraine, Austrian law was introduced in 1772–5. In 1919–39 some of the territory was governed by Polish law and some by Rumanian law, while Transcarpathia came under Hungarian and Czechoslovak law. These regimes in Western Ukraine tolerated Ukrainian customary law as a supplementary source of legal norms.

Except for state and political laws, the laws of the former regimes remained in force during the brief period of national independence (1917–20). Ukrainian legislators and jurists did not have time to construct an independent system of law.

A new kind of law, known as 'socialist,' 'revolutionary,' and 'Soviet,' arose in the Ukrainian SSR and the USSR. The Soviet regime abolished the previous laws and legal insti-

tutions and introduced its own legal order, which was codified, eventually, as Soviet law. Soviet norms were determined not only by the constitution and the laws or decrees of the government, but also by the Party program, the decisions of the leading organs of the CPSU, and the current Party line. Thus, law was an instrument of politics. The Soviet state was not a law-governed but a police state, in which law played only a subservient role. It lacked constitutional guarantees of individual rights and firm principles of legality that were binding on the authorities. The state was the source of law, but stood beyond the law.

In codifying Soviet law in the 1920s the regime attempted to overcome the revolutionary chaos that arose out of the disintegration of the old legal order and the political experimentation with the idea of the 'withering away of the state.' The introduction of the New Economic Policy also called for a clearly defined system of laws. The new codes remained European to a large degree, in their classification scheme, their institutions and principles of procedural law, and their terminology. The idea of a distinctive Soviet economic law based on Marxism was rejected in favor of a legal system similar to that in bourgeois societies. A uniform system of laws for the whole USSR and separate republican codes slightly different from each other were drawn up. The same principle was followed in the 1950s and 1960s, when new codes were worked out. The accumulation of legislation since the 1920s and the demand for a more liberal system of 'socialist legality' prompted the government to undertake the task of codification.

Soviet legal theory did not recognize the traditional distinction between public and private law. Soviet law was based on the social ownership of the means of production and a centrally planned economy. By regulating production and consumption the state controlled the essentially private sphere of people's lives. Hence, even family, marital, and inheritance relations were not exclusively private. Yet the general division of law into branches accepted in the West was preserved. State law was divided into branches such as *administrative law, financial law (consisting of budgetary law, tax law, credit law, insurance law, and audit law), electoral law, *language legislation, and education law. Some authors also distinguished, within state law, constitutional law, which defined the process of *legislation. Branches that regulated economic relations – water management law, maritime law, and air transport law – fell clearly under public law. Economic law included also *forest legislation, *land law, and collective-farm law. Relations between manual or office workers and the employer (the state or enterprise) were regulated by *labor law, which was public, not private, in nature. The basic part of private law in the USSR was *civil law. The main branches of civil law were property law, *family law, *inheritance law, *housing legislation, and law of *contract. *Copyright and *patent law were special sections of the last branch. The process of civil litigation was governed by the law of *civil procedure.

The latest codification of Ukraine's *criminal law took place in 1960. The code dealt with offenses against the social order and individuals who were punishable by the state. The severest sanctions were applied to *political crime. Another branch of criminal law was criminal military law. The judicial process in criminal cases was governed by the law of *criminal procedure. The norms

defining the institutions and operation of the *penitentiary system are contained in the *Corrective-Labor Code (1971).

Besides norms that regulate legal relations and define the legal order within a state, there are norms that regulate relations between sovereign states or between states and international organizations. International law is based on treaties, legal customs, legal principles, and court decisions. The Soviet theory of international law accepted the principle of exclusive sovereignty and refused to recognize the precedence of international legal norms over national laws. Because Ukraine has enjoyed independence for only brief periods, its contribution to the development of international law has been slight, and its *international legal status has been somewhat problematic.

*Canon law, which governs the internal life of the Catholic and Orthodox churches, today lies outside the secular legal system run by the state.

Problems of legal theory and the history of Ukrainian law have been researched by Ukrainian scholars (see *Legal scholarship). Legal education is provided in Ukrainian institutions of higher learning (see *Law studies). To maintain high professional standards Ukrainian jurists and lawyers have established their own *legal press and have organized professional associations, such as the *Society of Ukrainian Lawyers in Lviv, the *Ukrainian Law Society in Kiev, the *Ukrainian Law Society in Prague, and the Association of Ukrainian Lawyers in the United States and Canada.

Law enforcement. See Police and Procurator's office.

Law studies. The system of preparing members of the legal profession for the practice of law. The aims, teaching methods, and requirements of legal education vary with social, political, and legal context.

In Kievan Rus', the Galician-Volhynian Principality, and the Cossack state, there was no formal legal education. Court officials became familiar with the basic codes and customary law through practice. They read the legal literature, which was translated, usually from Byzantine sources. Law was taught in court schools in the 13th and 14th centuries in Volhynia, Kiev, and Lviv. The Ostrih Academy taught law. *Brotherhood schools in the 16th and 17th centuries, the colleges of the 18th century, and the Kievan Mohyla Academy did not teach law as a separate discipline, but their rhetoric and theology courses covered some elements of law. Monastery schools also taught elements of law. In the 16th to 18th centuries, Ukrainian students acquired a basic legal education in academies and universities in Cracow, Prague, and Western Europe. From the mid-18th century Ukrainians from central and eastern Ukraine could study law at the universities of Moscow (est 1755) and St Petersburg (est 1819). The Ukrainian legal specialist and economist M. *Baluhiansky taught law and served as rector at the latter university.

In Russian-ruled Ukraine a system of legal education was introduced in the early 19th century with the founding of the first universities and lyceums. The universities of Kharkiv, Kiev, and Odessa had law faculties. According to the 1863 statute governing universities in the empire, the four-year legal program included the history of legal philosophy, Roman law, civil law and judicial procedure, criminal law and procedure, the history of Russian

law, state law, international law, financial and commercial law and procedure, church law, political economy, and statistics. In addition, law students had to take courses in logic, Roman history, Russian history, forensic medicine, and a foreign language. Orthodox students were also required to study theology. Legal education was also offered by lyceums, which prepared young men of the privileged estates for careers in government. The *Nizhen Lyceum, which specialized in legal education from 1840 to 1875, trained officials for legal institutions. In the early 19th century, courses in canon law were introduced at the Kiev Theological Academy and at various seminaries.

In Ukrainian territories under Habsburg rule, legal education was offered from 1784 at Lviv University and from 1875 at Chernivtsi University. In 1862 and 1872 the first law chairs with Ukrainian as the language of instruction were set up in Lviv. Ukrainian students studied law also in Vienna, Cracow, and Graz. Instruction lasted for four years and covered three basic areas: history (including legal history, Roman law, theory), jurisprudence (civil, criminal, and procedural law), and political science (state law, positive and administrative law, and economics). Those who passed state examinations were qualified to work in the legal system. Lawyers had to complete a doctorate of law, eight years of articling, and an examination by the chamber of advocates.

Under the Polish regime in the interwar period, legal education culminated in a master of law degree, which qualified the holder for positions in the courts or government or for private practice. A doctorate of law was an academic degree which required the writing of a dissertation and the passing of rigorous examinations. The *Lviv (Underground) Ukrainian University (1921-5) had a law faculty with 23 lecturers and over 600 students.

Transcarpathian lawyers were trained at the universities of Vienna and Budapest, or the law schools in Košice and Nagyvárad (Oradea), where training lasted two years. In the interwar period residents of Transcarpathia could study law at a school for notaries in Košice, in Czechoslovak universities, or at the Ukrainian Free University (est 1921) in Prague. With its faculty of law and socioeconomic studies, this university became the main center for Ukrainian legal education abroad.

Under the educational reforms of the early 1920s in the Ukrainian SSR, law faculties were transferred to institutes of the national economy. Legal education became completely controlled by the Communist party, and subservient to its aims and directives. The leading specialists and professors were trained mostly at higher Party schools. In 1922 a law department was established at the Institute of Red Professors. In 1931 the Institute of Law and Soviet Construction (est 1929) became part of the All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes. Its role was to train lecturers in law for higher educational institutions and conduct law research. With the revival of universities in Ukraine, law faculties were reopened at the universities of Kiev and Odessa. The Kharkiv Juridical Institute (est 1935) had four faculties: Soviet formation, law, economic law, and international law. In 1934 a system of law schools with a one-year program was set up to train raion-level cadres, such as procurators and people's judges.

Today, legal education is offered at Kiev, Lviv, and Odessa universities and at the Kharkiv Juridical Institute.

These institutions train legal specialists with higher qualifications for the courts, the procuracy, the investigative branch, and the administrative courts, as well as legal advisers to government bodies and community organizations. In addition to the regular five-year programs, they offer six-year correspondence and night courses. Special correspondence courses and seminars are open to employees of legal institutions who wish to upgrade their qualifications. Kiev and Lviv universities provide one-year courses or seminars for lower court judges, notaries, assessors, and court secretaries. All economics and finance students are required to take courses in law.

In the late 1950s a system of community universities of legal sciences was created to propagate knowledge of Soviet law. By 1960 there were 36 such universities in Ukraine, and by April 1966 there were 156. Most of the students were from the militia, or were members of social courts, or were people's assessors, factory directors, or Party, trade-union, or Komsomol functionaries. The program, usually lasting one year, consisted of monthly lectures on civil, administrative, criminal, and international law, and on Soviet construction.

I. Bakalo

Lawriwsky, Michael. See Lavrivsky, Mykhailo.

Lawryshyn, Zenoby [Lavryšyn, Zenovij], b 4 June 1943 in Rudnyky, Galicia. Composer, conductor, and pianist. A graduate of the Royal Conservatory of Music (1961) and the University of Toronto (MUS M, 1969), he studied under L. Kolessa and A. Jolivet (Paris). His concert appearances have included works by J.S. Bach, L. van Beethoven, F. Chopin, G. Fauré, and M. Ravel, as well as the Ukrainian composers M. Lysenko, V. Barvinsky, V. Dovzhenko, and V. Kosenko. Lawryshyn was a founder of the Ukrainian-Canadian Opera Association and served as its chorus master from 1978. His main works include two symphonies; chamber music; incidental music for plays such as *Romantychna vatra* (Romantic Bonfire), *Lisova pisnia* (Forest Song) and *Cassandra; Panakhyda* (Requiem) for mixed chorus; and music for the films *Nikoly ne zabudu* (I Shall Never Forget, 1969), *Marichka* (1973), and *Harvest of Despair* (1985). Lawryshyn won the Golden Sheaf Award of Excellence for the last work at the 1985 Yorkton Festival of Short and Video Films.

Lazarchuk, Andronyk [Lazarčuk], b 15 January 1870 in Ukhovets, Kovel county, Volhynia gubernia, d 6 September 1934 in Borzna, Chernihiv oblast. Painter and pedagogue. A graduate of the St Petersburg Academy of Arts (1895) and its pedagogical program (1905), he taught painting in schools in Kovel, Konotip, Kremianets, and elsewhere. From 1915 he taught in Borzna, where he initiated the creation of the town's museum, which he directed until 1925. His genre paintings include *In a Peasant House*, *A Family Group*, *Reading a Letter*, a portrait of T. Shevchenko, and self-portraits. Lazarchuk also illustrated O. Pchilka's newspaper *Ridnyi kraj* (1907–14). An exhibition of 67 of his works was held at the Volhynian Regional Museum in Lutske in 1987.

Lazarchuk, Ipolyt [Lazarčuk], b 13 August 1903 in Pochaiv, Kremianets county, Volhynia gubernia, d 23 February 1979 in Kiev. Animator; son of A. *Lazarchuk. After graduating from the Kiev State Art Institute (1929) he

worked at the Kiev Artistic Film Studio. He was assistant director of one of the first animated sound films in Ukraine, Ye. Horbach's *Murzylka in Africa* (1934), and created the first color animated film in Ukraine, *Lisova uhoda* (The Forest Treaty, 1936). Later he worked at the Kiev Studio of Popular Science Films.

Lazarenko, Andrii, b 27 November 1901 in Kiev, d 13 September 1979 in Lviv. Botanist; corresponding member of the AN URSR (now ANU) from 1951. After graduating from the Kiev Institute of People's Education in 1924, he worked at the ANU Institute of Botany (1922–41, 1943–5), chaired a department of the Lviv Division of the Institute of Botany (1945–9, 1954–6, and 1964–79), directed the ANU Institute of Agrobiology (1951–3), and chaired a department at Lviv University (1945–58). His works deal with the classification and geographical distribution of mosses in Ukraine, Belarus, Central Asia, and the Far East. For five years (1959–64) he was barred from teaching and from continuing his research because he had openly criticized I. Michurin's legacy in Soviet agrobiology.

Lazarenko, Yevhen, b 26 December 1912 in Kharkiv, d 1 January 1979 in Kiev. Geologist and mineralogist; full member of the USSR Academy of Sciences from 1969. He graduated from Kharkiv University (1934) and taught at Voronezh University from 1938. He taught at Lviv University from 1944, became a professor there in 1948, and served as rector from 1951 to 1963. He was head of the AN URSR (now ANU) Institute of Geological Sciences (1969–71) and department head at the ANU Institute of the

Andronyk Lazarchuk: *Portrait of a Girl in a Black Hat* (oil)

Yevhen Lazarenko

Geochemistry and Physics of Minerals (from 1972). Lazarenko initiated the Ukrainian Mineralogical Society and served as its first president (1970) and was vice-president of the All-Union Mineralogical Society (1971). Lazarenko's main works were devoted to general mineralogy as well as to the mineral resources of Ukraine. He wrote several textbooks on mineralogy and coauthored a mineralogical dictionary.

Lazarev, Boris, b 6 August 1906 in Myropillia, Okhtyrka county, Kharkiv gubernia. Low-temperature physicist; AN URSR (now ANU) full member from 1951. A graduate of the Leningrad Polytechnical Institute (1930), he worked at the Leningrad Physical-Technical Institute (1930–6) and at the ANU Physical-Technical Institute in Kharkiv (from 1937). He made substantial contributions to low-temperature physics, particularly to the development of powerful superconducting solenoids. He established a relationship between superconducting properties and the topological structure of the Fermi surface in metals, and contributed to cryogenic vacuum technology.

Lazarevska, Kateryna [Lazarevs'ka], b 1879, d 1940? Historian and archeographer; daughter of O. *Lazarevsky. She worked at the VUAN, where she researched the socioeconomic and cultural history of 18th- and 19th-century Ukraine, the history of guilds in the Kiev and Chernihiv regions (pub in ZIFV, vol 5), and the Lazarevsky family genealogy (pub in *Ukraïns'kyi arkhiv*, 1927, no. 2). She was the archeographic editor for vols 1–4 of *Ukraïns'kyi arkhiv* (1929, 1931) and vol 1 of the chronicle of S. Velychko (1926). The journal *Ukraïna* published her articles on the letters of O. Bodiansky to her father (1926, no. 1), the general survey of landholdings of Starodub regiment (1928, no. 4), T. Shevchenko and the Lazarevsky brothers (1928, no. 4), noble estates in the Starodub region in the first half of the 18th century (September 1929), M. Kulish and M. Vovchok (July–August 1929), and materials for the biography of S. Nis (September 1929). Lazarevska's later fate is uncertain; it is known only that she was released from prison in 1933.

Lazarevsky [Lazarevs'kyj]. A Cossack family from the Chernihiv region that included a number of noteworthy figures in 19th-century Ukrainian culture. Matvii (1778–1857) left some interesting memoirs about the Chernihiv region in the first quarter of the 19th century. His oldest son, Vasyi (b 27 February 1817, d 18 April 1890), held gov-

ernment positions in Kharkiv, Orenburg (1847–8), and St Petersburg (from 1848). He translated W. Shakespeare's plays and French literature into Russian, published a few sketches in Russian journals, and compiled a Ukrainian dictionary (unpublished). Mykhailo (b 12 July 1818, d 3 May 1867) served as an official in Tobolsk (1841–6) and Orenburg (1846–50), where he became one of T. Shevchenko's best friends. He helped the poet financially and, after getting a position in St Petersburg, worked for Shevchenko's release from exile. He took care of the ailing poet in St Petersburg, arranged his funeral and the transportation of his body back to Ukraine, and acted as the executor of his estate. In 1858 Shevchenko presented his diary and self-portrait to Mykhailo. Other members of the family include Fedir (b 20 April 1820, d 13 August 1890) and Oleksander *Lazarevsky and his children, Borys, a Russian writer, Hlib, and Kateryna *Lazarevska.

Oleksander Lazarevsky

Lazarevsky, Oleksander [Lazarevs'kyj], b 20 June 1834 in Hyrivka, Konotip county, Chernihiv gubernia, d 13 April 1902 in Pidlypne, Konotip county. Historian. He graduated in 1858 from St Petersburg University, where he studied under M. Sukhomlinov. After the abolition of serfdom he helped implement reforms in the Chernihiv region as a representative to the Chernihiv Conference of Justices of the Peace (1861–3) and was secretary of the Chernihiv Statistical Committee. From 1868 he served in a judicial capacity in Chernihiv, Poltava, Kremenchuk, Nizhen, and Kursk. In 1880 he moved to Kiev, where he was a member of the Kiev Judicial Chamber, played an active role in the *Historical Society of Nestor the Chronicler and its publications, and was one of the founders of the journal **Kievskaiia starina*.

As a student Lazarevsky contributed articles to *Chernigovskie gubernskie vedomosti* and prepared *Ukazatel' istochnikov dlia izucheniia malorossiiskogo kraia* (A Guide to Sources for the Study of the Little Russian Land, 1858). In the mid-1860s he researched the socioeconomic and cultural history of Left-Bank Ukraine during the 17th and 18th centuries. He wrote a fundamental study of the peasantry titled 'Malorossiiskie pospolitnye krest'iane, 1648–1783' (Little Russian Common Peasants, 1648–1783, *Zapiski Chernigovskogo statisticheskogo komiteta*, vol 1 [1866]) and articles about the Cossack *starshyna* and nobility in *Russkii arkhiv* (1875–6) and *Kievskaiia starina* (1882–93). He made an outstanding contribution to the history of coloni-

zation, administration, and land tenure in *Opisanie Staroi Malorossii* (A Description of Old Little Russia, 3 vols, 1888–1902). He also wrote a commentary on the historical monographs of D. Miller on the Little Russian nobility and the statute courts (1898) and a study of early Ukrainian historiographers in *Kievskaiia starina* (1897, nos 1–2), as well as numerous genealogies. His articles published in *Kievskaiia starina* were reprinted in a five-volume edition of his works (1891–9). In the field of Ukrainian archeography Lazarevsky edited M. Khanenko's diary (1884), the diary of the general treasurer Ya. Markovych (3 vols, 1893–7), materials from the archives of the Sulyma (1884), Motyzhynsky (1890), Poletyka (1891), and other families, the Liubech archive of Count M. Myloradovych (1898), the correspondence of H. Poletyka (1895), and, in collaboration with M. Konstantynovych, *Obozrenie Rumiantsevskoi opisi Malorossii* (A Survey of the Rumiantsev Census of Little Russia, 3 vols, 1866–73).

Lazarevsky's approach to history was based on his populist ideas. He emphasized the exploitation of peasants by the Cossack *starshyna* and regarded the Hetman state and its leading figures with disapproval. But he treated fairly those Ukrainian nobles who made a contribution to Ukrainian culture. He paid little attention to the disastrous influence of Russian policy in Ukraine, but Ukrainian historians noted the one-sidedness without denying his enormous contribution; in contrast, Soviet historians approved of his partiality.

Lazarevsky left around 450 published works. His valuable collection of manuscripts and books, bequeathed to Kiev University, has been preserved along with his archive at the Central Scientific Library of the Academy of Sciences of Ukraine in Kiev.

O. Ohloblyn

Lazarevych, Ivan [Lazarevyč], b 29 March 1829 in Mahiliou, Belarus, d 23 March 1902 in Kharkiv. Obstetrician and gynecologist. A graduate of Kiev University (1853), he obtained his doctorate of medicine in 1857 and was a professor at Kharkiv University from 1862. He refined and invented obstetrical instruments and suggested the internal examination of pelvic tissues and organs. He was vice-president of the Second International Medical Congress (Florence, 1869), honorary president of the gynecological section of the 1883 International Medical Congress, and honorary member of the London Obstetrical Society, the Boston Gynecological Society, and Russian physicians' societies in St Petersburg, Moscow, and Kiev. He wrote *Kurs akusherstva* (A Course in Obstetrics, 2 vols, 1877, 1879).

Lazarian, Vsevolod [Lazarjan], b 16 October 1909 in Orikhiv, Berdianske county, Tavriia gubernia, d 24 December 1978 in Dnipropetrovske. Mechanical engineer; full member of the AN URSS (now ANU) from 1972. A graduate of the Dnipropetrovske Mining Institute (1931), he was director of the Dnipropetrovske Institute of Railway

Transport Engineers (1941–58) and head of the Dnipropetrovske branch of the ANU Institute of Mechanics (1968–78). He made contributions to the theories of motion stability, elasticity, and oscillations and solved a number of practical problems in general mechanics and railway transport.

Lazariev, Hryhorii [Lazarjev, Hryhorij], b 20 April 1907 in Tahanrih, Don Cossack province, d November 1989 in Poltava. Stage actor. He began his theatrical career in the Makiivka Theater of Working Youth (1931–4). After returning from exile in Barnaul, he worked in theaters in Chernihiv, Mykolaiv (1939–45), and Kherson (1945–57). Since 1957 he has been a leading actor in the Poltava Ukrainian Music and Drama Theater.

Lazechko-Haas, Myra. See Haas, Maara.

Lazorsky, Mykola [Lazors'kyj] (pseud of Mykola Kork), b 27 October 1890 in Poltava, d 13 March 1970 in Melbourne, Australia. Novelist, publicist, and editor. During the 1920s he edited a journal in Poltava, prepared school textbooks in geography, and published fiction in journals, such as *Znannia* and *Nova hromada*. During the terror of the 1930s he was arrested and imprisoned for 10 years. After the Second World War he settled in Australia. As a writer Lazorsky specialized in the historical novel and the short story. He has published three large novels, *Het'man Kyrylo Rozumovs'kyi* (1961), *Stepova kvitka* (The Steppe Flower, 1965), and *Patriot* (The Patriot, 1969). His short stories and essays have been published posthumously in the collection *Svitlotini* (Light and Shadows, 1973).

Fedir Lazoryk

Ivan Le

Lazoryk, Fedir (pseud: Fed Makovychanyn, Dalnozir), b 1 April 1913 in Becherov, Bardejov county, Slovakia, d 4 July 1969 in Prěsov. Ukrainian poet, novelist, and journalist in Czechoslovakia. He published several collections of poetry, including *Slovo hnanykh i holodnykh* (The Word of the Persecuted and the Hungry, 1949), *Velyka syla* (A Great Force, 1955), *Snizhni khryzantemy* (Snowy Chrysanthemums, 1968), and *Karpats'ka zamana* (Carpathian Lure, 1971); two novels, *Svitanok nad selamy* (Dawn over Villages, 1953) and *Vik nash festyval'nyi* (Our Festival Age, 1958); and stories for children. He edited the journals *Priasheshchina*, *Druzhno vpered*, and *Duklia* and the newspaper *Nove zhyttia*. The folk songs he collected were published in *Spivanochky moi* (My Songs, 1956).

Lazurenko, Danylo, b 24 December 1902 in Vilshana, Kupianske county, Kharkiv gubernia. Stage director. After graduating from the Kharkiv Music and Drama Institute (1929) he worked in the Kharkiv Chervonozavodskiy Ukrainian Drama Theater (1930–3), the Donetske Ukrainian Drama Theater (1933–48, from 1938 as artistic director), and the Dnipropetrovske Ukrainian Drama Theater (1949–59) and, as principal stage director, in the Mykolaiv Ukrainian Theater of Drama and Musical Comedy (1959–61).

Le, Ivan (pseud of Ivan Moisia), b 22 March 1895 in Moisyntsi, Zolotonosha county, Poltava gubernia, d 9 October 1978 in Kiev. Writer. One of the founders of Soviet Ukrainian literature, he began to be published in the early 1920s. He wrote collections of stories and novels, such as *Budni* (Weekdays, 1926), *Iukhym Kudria* (1926), and *Tanets' zhyvota* (The Belly Dance, 1928). His most popular work was *Roman mizhhir'ia* (The Intermountain Novel, 1929), which was published many times and later somewhat modified because of the treatment of the problem of national relations between Russians and the peoples of Asia in the original. Later he wrote the novel *Integral* (1931) in the official vein. His historical novels *Nalyvaiko* (1940) and *Khmel'nyts'kyi* (3 vols, 1957–65) were written in accordance with official Soviet historiography.

Le Clerc, Nicolas-Gabriel, 1726–98. French physician, writer, and historian. In 1759–62 Le Clerc was in Ukraine as private physician to Hetman K. Rozumovsky. In 1769–75 he lived in Russia, where he became an honorary member of the Imperial Academy of Sciences. During his stay in Ukraine Le Clerc collected valuable material on the history of the Cossacks and the Zaporozhian Sich (which he visited). He later wrote *Histoire physique, morale, civile, et politique de la Russie ancienne et moderne* (3 vols, 1783–5), which was severely criticized by the imperial government and Russian and Russophile scholarly circles (eg, in I. Boltin's *Primechaniia na istoriiu drevniia i nyneshniia Rossii g. Leklerka* [Comments on the History of Ancient and Modern Russia by Le Clerc, 2 vols, 1788]). He was also the author of *L'histoire des Cosaques de Boristhènes* (1776), which has not survived.

League for the Liberation of the Peoples of the USSR. See Paris Bloc.

League of American Ukrainians (Liga amerykanskykh ukrainsiv). A pro-communist Ukrainian organization in the United States. The league was created in 1924 under the name of the United Ukrainian Toilers Organization (Soiuz ukrainskykh robotnychykh organizatsii, or SURO) as an ideological successor to the pro-Bolshevik wing of the Ukrainian Federation of the Communist Party of America. The league presented itself as a defender of the economic interests of Ukrainian American workers and maintained an affiliation with the Communist Party of America. It also established a Ukrainian section of the International Workers' Order in 1935, known as ORDEN or the Ukrainian American Fraternal Union, as a front organization. It was an ideological supporter of Soviet power and solicited support for the 'liberation' of Western Ukraine through its incorporation into the Ukrainian SSR. The league had a highly antagonistic relationship with the

mainstream Ukrainian organizations in the United States and carried on a polemic with them which was particularly severe in the 1930s and 1940s. The major Ukrainian associations have criticized the league for its unswerving loyalty to the Soviet Union and its uncritical posture on the question of national independence for Ukraine. The league's membership declined precipitously after the Second World War, with the onset of the Cold War and the realization of a period of economic prosperity.

League of Nations. An international organization incorporated in the 1919 Treaty of Versailles with the aim of preserving world peace and collective security and fostering international co-operation. From 1920 the seat of the league was in Geneva, Switzerland. Among the league's members were states that occupied parts of Ukraine – Poland, Rumania, Czechoslovakia, and the USSR (1934–9). In 1920 the UNR government failed to gain admission to the league. In 1920–3 the *governments-in-exile of the UNR and the Western Ukrainian National Republic repeatedly submitted protests to the league regarding the occupation of Ukrainian lands by Poland and the USSR. Only once – on 23 February 1921 – did the league take into consideration the protests of President Ye. Petrushevych and acknowledge that eastern Galicia was militarily occupied by Poland.

Because the league was responsible for ensuring that the rights of national minorities guaranteed in a treaty signed by Poland, Rumania, and Czechoslovakia were observed, Ukrainians (including Magyarophile and Russophile circles in Transcarpathia) submitted memoranda to the league when such rights were violated. The largest number of such memoranda were submitted by the Ukrainian Parliamentary Representation and its individual members in the Polish Sejm. In them they protested Poland's discriminatory educational policies, the officially sanctioned colonization of Western Ukrainian lands by Polish army veterans, the persecution of the Ukrainian co-operative movement, the abuse and torture of Ukrainian political prisoners, and the 1930 *Pacification of Galicia by the Piłsudski regime. Because of the unsympathetic attitudes of members of the league's Secretariat and the league's complex procedural norms, only the memorandum regarding the Pacification was passed on by the Secretariat to the league's Council.

The only occasion on which the league took note of Soviet Ukrainian affairs was at the September 1933 secret Council meeting on the famine in Ukraine. The league had the legal authority to care for refugees from the former territories of the Russian Empire, including Ukraine, but it did not formally grant Ukrainian émigrés separate recognition (see *Emigration). Ukrainian interests were defended in the league's various agencies primarily by Ukrainian parliamentarians in interwar Poland and by O. *Shulhyn, the unofficial representative of the UNR government-in-exile.

An International Federation of League of Nations Societies promoted co-operation with the league and propagated its ideas. The émigré Ukrainian League of Nations Society and the Western Ukrainian League of Nations Society (Vienna, 1921–4) were admitted to federation at its Prague Congress in June 1922. The first was headed by M. *Zalizniak, the latter by R. *Perfetsky. In 1925 the Ukrainian Group of the International University Federation for

the League of Nations was founded at the Ukrainian Husbandry Academy in Poděbrady, Bohemia. Although the league was a political instrument of the victorious European powers in the First World War and did not, by and large, recognize Ukrainian national demands, Ukrainian petitions to the league and the participation of Ukrainians in the International Federation facilitated the dissemination of information about Ukrainian affairs in international circles. In 1946 the league was dissolved by its 21st Assembly and was replaced by the Organization of *United Nations.

League of Ukrainian Catholics of America (Liga ukrainskykh katolykiv, or LUC). A social organization for Eastern rite Catholics of Ukrainian origin. It was established in 1933 as a cultural, social, and religious association of young Catholics and was known initially as the Ukrainian Catholic Youth League in America. The first head of the league was B. *Katamai. In the early 1960s its name was changed to the current one. The league provides scholarships for theology students and aid to needy Ukrainians and organizes three national gatherings each year: a convention, a sports competition, and a religious retreat. From 1933 it published a monthly magazine, *Ukrainian Youth*, initially in Ukrainian and then in English. Since 1966 it has published *Action*.

League of Ukrainian National Homes. See Union of Ukrainian Community Centres of Canada.

Members of the League of Ukrainian Nationalists. Sitting, from left: M. Stsiborsky, M. Tobilevych, T. Pasichnyk-Tarnavsky, L. Kostariv, M. Zahryvny; standing: Yu. Rudenko, Yu. Artiushenko, D. Pasichnyk, R. Myniv, D. Demchuk, O. Chekhivsky, K. Dudariv, Ya. Herasymovych

League of Ukrainian Nationalists (Legiia ukrainskykh natsionalistiv, or LUN). A nationalist organization formed in Poděbrady on 12 November 1925 out of three closely related societies, the Ukrainian National Alliance, the Union of Ukrainian Fascists, and the Union for the Liberation of Ukraine. Its purpose was to develop a distinctive Ukrainian nationalist ideology and to unify the national struggle. During its four years of existence the LUN counteracted Sovietophile tendencies and the influence of communist doctrine among Ukrainian émigrés and co-operated in the formation of the OUN. Its member-

ship consisted mostly of émigrés from the Dnieper region (veterans of the UNR Army and students) and included people such as Ye. Malaniuk, L. Mosendz, D. Demchuk, Ya. Moralevych, and M. Seleshko. Branches of the league sprang up in Prague, Brno, Berlin, and Luxembourg, but Poděbrady remained its main center. Its president was M. *Stsiborsky. In 1927 the LUN published two issues of *Derzhavna natsiia* under the editorship of Malaniuk.

League of Ukrainian Organizations. See Ukrainian Workers' League.

Leather industry. A branch of *light industry that manufactures leather from animal hides. Leather is used mainly in the manufacture of footwear, coats, and gloves.

The leather industry has existed in Ukraine since the time of Kievan Rus', but factories were not established until the second half of the 19th century, and they were limited to Kiev (Berdychiv) and Kherson (Odessa) gubernias. In 1865 there were 449 leather enterprises in Russian-ruled Ukraine, with an output valued at 1,364,000 rubles. Most of them were small workshops run by tradesmen. Volhynia gubernia, with the highest number of leather enterprises, for example, had 166 enterprises in 1884, but they employed only 470 workers and produced only 300,000 rubles' worth of goods. At the same time 52 enterprises in Kiev gubernia employed 443 workers and had an output valued at 1,023,000 rubles. In 1912, 36 modern factories in Kiev and Kherson gubernias produced 85 percent of Ukraine's leather output.

The leather industry was an important branch of Ukraine's light industry: it employed 1,700 workers, or 15.2 percent of the work force in light industry, in 1913 and produced 35.7 percent of the industry's gross output. The emphasis was on the production of heavy leather, much of which was exported to Russian manufacturing centers and then reimported as soft leather goods. In 1913 Ukraine manufactured 16 percent of heavy leather but only 10 percent of leather goods. That year Ukraine produced 4,900 t of heavy leather and 130,000 sq m of soft leather.

During the First World War Ukraine's share of leather production rose to 20–24 percent as the imperial government encouraged concentration to meet military needs. During the revolution and foreign occupation the industry's output fell by half. During the 1920s and 1930s the industry became more concentrated, specialized, and modernized. By 1940 its output was five times greater than it had been in 1913. In 1940 Ukraine produced 8,318,000 sq m of soft leather and 15,000 t of heavy leather, or 17.9 percent and 21.5 percent of the USSR output respectively.

After the Second World War the leather and footwear industries had the slowest growth rates of all branches of light industry. In 1950 Ukraine's output of 5,123,000 sq m of soft leather and 8,200 t of heavy leather was still far below the 1940 output. But production grew steadily thereafter, with soft leather becoming increasingly important. The output of heavy leather has declined since 1970. In 1973 Ukraine produced 22,630,000 sq m of soft leather (20.7 percent of the USSR output) and 31,464 t of heavy leather (21.6 percent of the Union output). By 1983 soft leather had overtaken heavy leather in republican importance: heavy leather production declined to 25,041 t (20.2

percent of the USSR output), whereas soft leather production rose to 25,313,000 sq m (22.4 percent of the USSR output).

As leather production became increasingly mechanized, employment in the industry fell. In 1954, 4,203 workers were employed in the leather industry in Ukraine (16.8 percent of all Soviet leather workers), whereas in 1970 only 3,775 were employed, in 24 leather works (19.6 percent of all Soviet leather workers). The main leather factories are in Kiev, Kharkiv, Berdychiv, Vasylykiv, Ivano-Frankivske, Odessa, and Lviv.

B. Somchynsky

Mykola Lebed

Lebed, Mykola [Lebed'], b 23 November 1909 in Strilychi Novi, Bibrka county, Galicia. Revolutionary and Ukrainian nationalist leader. In 1930–2 he organized the OUN youth wing in Western Ukraine, and in 1932–4 he served as liaison between the OUN national executive in Galicia and the OUN leadership abroad. He was sentenced to death for helping to organize the 1934 assassination of B. *Pieracki, but the sentence was commuted to life imprisonment. In September 1939 he escaped from prison, after which he sided with S. *Bandera in the power struggle within the OUN and became one of the Bandera faction's top leaders. After Bandera and most members of Ya. Stetsko's provisional administration were arrested by the Gestapo in 1941, Lebed (under the pseudonym Maksym Ruban) assumed control of the OUN underground struggle against the Nazis in Ukraine and played an important role in organizing the *Ukrainian Insurgent Army (UPA). In the summer of 1943 Lebed became the OUN chief of foreign affairs. He was a founder of the *Ukrainian Supreme Liberation Council (UHVR) and its general secretary for foreign affairs. In July 1944 he left Ukraine to establish contacts with the Allies, and in 1949 he settled in the United States, where he headed the *Prolog Research Corporation (1952–73). He has written the documentary memoir *UPA* (1946; 2nd edn 1987) and numerous articles in the Ukrainian press.

M. Prokop

Lebedev, Anatolii, b 1 February 1931 in Sushchevo, Viazma okrug, Zapadnaia oblast, RSFSR. Specialist in mechanics; full member of the AN URSS (now ANU) since 1988. He graduated from the Kiev Polytechnical Institute (1954) and taught there. From 1960 he worked at the AN URSS Institute of Metal Ceramics and Special Alloys (now the Institute for Problems of Materials Science) and since 1966 at

the Institute for Problems of the Strength of Materials. He has done research on the criteria of strength and the factors affecting the strength of materials under conditions of stress at high and low temperatures.

Lebedev, Sergei, b 2 November 1902 in Nizhnii Novgorod, Russia, d 3 July 1974 in Moscow. Russian scientist in the fields of electrodynamics and computer sciences; full member of the AN URSS (now ANU) from 1945 and of the USSR Academy of Sciences (AN SSSR) from 1953. A graduate of the Moscow Higher Technical School (1928), he founded and directed the Institute of Electrodynamics of the AN URSS (1946–51). Under his leadership the institute constructed the digital computing machine *MEOM in 1950. From 1953 Lebedev was director of the Institute of Exact Mechanics and Computing Technics of the AN SSSR. His work dealt with the problems of reliability and automation in power systems, computer technology, and digital instruments theory.

Lebedev, Vladimir, b 6 June 1922 in Dankov, Riazan gubernia, Russia. Specialist in electric welding; full member of the AN URSS (now ANU) since 1972. He graduated from the Moscow Energetics Institute (1944). He worked at the AN URSS Institute of Electric Welding in Kiev and was appointed deputy director there in 1970. His publications deal with the design of arc welding devices and butt welding techniques.

Lebediev, Petro [Lebedjev], b 23 August 1885 in Pyriatyn, Poltava gubernia, d 3 May 1948 in Moscow. Geologist and petrographer; corresponding member of the USSR Academy of Sciences from 1939. He graduated from the St Petersburg Polytechnical Institute in 1909 and St Petersburg University in 1912. He taught at Rostov-na-Donu University and the Leningrad Polytechnical and Leningrad Mining institutes. He conducted geological research in Karelia, Caucasia, Transcaucasia, the Far East, and Ukraine, particularly near Mariupol and in Volhynia. His works, in petrography, mineralogy, and geochemistry, include *Petrohrafiiia Ukraïny* (Petrography of Ukraine, 1934), which he coauthored.

Lebedyn. III-15. A city (1990 pop 32,800) and raion center in Sumy oblast. It was founded in 1654, and in 1658 it became a company center of Sumy regiment and was renamed Lebiazhyi Horod. During the war of 1708–9 the command of the Russian army was stationed in Lebedyn, and later Hetman I. *Mazepa's supporters were interrogated and punished there. In the 19th century Lebedyn was a county center in Kharkiv gubernia. Today the city has a machine-tool and a metalworking plant, a furniture factory, a fruit-canning and a meat-packing plant, a mixed-feed factory, a building-materials plant, and a textile factory. Its art museum contains portraits from P. Polubotok's private collection (early 18th century). There is a memorial museum dedicated to the famous singer B. *Hmyria. The most important architectural monument is the wooden Church of the Resurrection, built in 1748. A settlement of the *Cherniakhiv culture (2nd–4th century) has been excavated near Lebedyn.

Lebedynets, Mykhailo [Lebedynec', Myxajlo], b ?, d 1 December 1934. Writer and poet. From 1918 to 1921 his poetry and prose appeared in journals, such as *Mystetstvo*,

Lebedyn: St Nicholas's Church (early 18th century)

Universal'nyi zhurnal, and *Shliakhy mystetstva*. His published works include a collection of poetry, *Chervoonyi vinok* (A Red Garland, 1919), and two collections of short stories, *Pasma zhyttia* (Skeins of Life, 1919) and *Vikno rozchynene* (The Window Is Open, 1922). He was executed during the Stalinist terror.

Lebedynsky, Ivan [Lebedyns'kyj], b 12 October 1888 in Breusivka, Kobeliaky county, Poltava gubernia, d 1942. Economist and statistician. In the 1920s he worked in the trade statistics department at the Central Statistical Administration of the Ukrainian SSR and taught at the Kharkiv Institute of People's Education and then at the Kharkiv Institute of Finance and the Economy. His pioneering work on price indexes was published as *Pro chysla-pokazhchyky (indeksy) ta yak ikh vykorystovuvaty* (On Numerals-Indicators [Indexes] and How to Use Them, 1927) and *Selians'kyi indeks na Ukraini: Metodolohichni osnovy ioho vyrakhovuvannia* (The Peasant Index in Ukraine: The Methodological Bases of Its Computation, 1928). His demographic study of Kharkiv was broken off in 1932–3 and was taken up later by M. Kurman and published as *Naselenie bol'shogo sotsialisticheskogo goroda* (The Population of a Large Socialist City, 1968).

Lebedynsky, Sylvestr [Lebedyns'kyj, Syl'vestr], b 1750, d 5 November 1808. Orthodox bishop and biblical scholar. He was educated at the Kiev Theological Academy and served as rector of the Kazan Theological Academy

(1797–9) before being consecrated bishop of Pereiaslav. He was then bishop of Poltava (1803–7) and archbishop of Astrakhan. He wrote *Compendium theologiae dogmaticae* (1799).

Lebedyntsev, Kostiantyn [Lebedyncey, Kostjantyn], b 25 October 1878 in Radom, Poland, d 25 September 1925 in Kiev. Mathematician and pedagogue; son of T. Lebedyntsev. A graduate of Kiev University (1900), he taught at various secondary schools in Kiev until and after the Revolution of 1917. He became a consultant for the People's Commissariat of Education and an assistant rector of the Kiev Institute of People's Education. A proponent of new educational methodology, he edited the journal *Pedagogicheskaiia nedelia* and wrote textbooks on algebra (1911) and general mathematics (1925).

Teofan Lebedyntsev

Kharyton Lebid-Yurchyk

Lebedyntsev, Teofan [Lebedyncey] (Lebedintsev, Feofan), b 24 March 1828 in Zelena Dibrova, Zvenyhorod county, Kiev gubernia, d 24 March 1888 in Kiev. Historian and educator. He studied at the Voronezh and Kiev seminaries and at the Kiev Theological Academy, where in 1861–4 he was a professor, and then directed the Kholm, Lublin, and Radom school districts, in 1864–80. A specialist in the history of the Orthodox church and its brotherhoods in Ukraine, he founded and edited a periodical for village clergy titled *Rukovodstvo dlia sel'skikh pastyrei* (Kiev, 1860–3), in which he published a number of his own articles, and wrote for the journal *Osnova*. Lebedyntsev was one of the founders of the journal **Kievskaiia starina* (1882) and the editor of the second and third volumes of the *Arkhiv Iugo-Zapadnoi Rossii*. He wrote four sermons in Ukrainian (1861–3), the study *Bratstva, ikhnia kolyshnia i nynishnia dolia ta znachennia* (Brotherhoods, Their Former and Present-Day Destiny and Significance, 1862), and memoirs of the poet T. Shevchenko (published in *Kievskaiia starina*).

Lebid, Ananii [Lebid', Ananij], b 1889 in Keleberda, Zolotonosha county, Poltava gubernia, d 1939. Poet and literary scholar; member of the writers' group **Pluh*. He wrote the monograph *M. Kotsiubynskyi: Zhyttia i tvorchist'* (M. Kotsiubynsky: His Life and Work, 1929) and also contributed articles to *Zapysky Istorychno-filolohichnoho viddilu VUAN, Ukraina*, and *Zhyttia i revoliutsiia*. Together with M. Rylsky he compiled the anthology *Za 25 lit* (In 25 Years, 1926). In addition he wrote poems and songs for the contemporary press. He was arrested in 1929 in connection

with the show trial of the *Union for the Liberation of Ukraine but was released. He was arrested again in 1935 and sentenced to 10 years' imprisonment in a concentration camp, where he perished.

Lebid, Dmytro [Lebid'], b 21 February 1893 in Lotsmanska Kamianka (now a part of Dnipropetrovske), Katerynoslav county, Katerynoslav gubernia, d 30 October 1937. Party leader and Soviet state official. A member of the Katerynoslav ('right') Bolshevik faction, after the February Revolution in 1917 he headed the Bolshevik organization of the Katerynoslav railway and the gubernia militia. He rose in the CP(B)U to become a member of the Audit Commission (1919) and the Organizational Bureau (1920) and a candidate member (1920–2) and full member (1922–4) of the Politburo. As second secretary of the CC CP(B)U in 1920–4, he opposed the policy of *Ukrainization. According to his theory of the 'struggle of two cultures,' the Russian urban, proletarian culture would triumph over the Ukrainian rural, peasant culture. From 1924 he held high posts in the Russian Communist Party (Bolshevik). After being arrested during the terror in 1937, he was executed by the NKVD. He was rehabilitated in the 1960s.

Lebid-Yurchyk, Kharyton [Lebid'-Jurčyk, Xaryton], b 1877 in eastern Podilia, d 1945 in Germany. Economist. In 1917–21 he was in the UNR civil service, in which he headed a department of the state treasury and served as deputy minister of finance (1919–21). He lectured in economics at Kamianets-Podilskyi Ukrainian State University. After emigrating to Poland and then to Germany he became a fellow of the agriculture department at the Ukrainian Scientific Institute in Berlin. He specialized in the Ukrainian sugar industry and state finances and wrote *Budzhetove pravo* (Budget Law, 1927) and *Das erste ukrainische Staatsbudget für das Jahr 1918* (1929).

Left Opposition. The name of a faction led by L. *Trotsky within the Bolshevik party. Leaders of the Left Opposition in Ukraine included Kh. Rakovsky, M. Holubenko, Ya. Livshits, and P. Rozengaus. In 1923 the Left Opposition had half the votes in the Kiev Party organization. In its struggle against bureaucratization it obtained the passive support of some Ukrainian national-communist currents (mainly former *Borotbists.). Most Ukrainian Communists were critical of the Left Opposition's neglect of the national question and of its insistence on rapid industrialization. Some members of the *Communist Party of Western Ukraine, however, were sympathetic to it. During the Stalinist terror of the 1930s many former Left Oppositionists were arrested and sent to labor camps in the Arctic Vorkuta region, where they were executed in 1936–8.

In the second half of the 1930s a group of Ukrainians of the Communist Party of Canada emerged as supporters of the Fourth International, founded in 1938 by the Left Opposition, and published the newspaper *Robotnychi visty* in Toronto (1933–8). Under their influence Trotsky wrote articles in support of Ukraine's independence after the Soviet occupation of Western Ukraine in 1939.

Left-Bank Ukraine (Livoberezhia). A territorial-administrative-geographic region consisting of the Ukrainian lands east of the Dnieper River. In the 17th and 18th

centuries Left-Bank Ukraine became a major Ukrainian economic, political, and cultural center administered as 10 Cossack regimental districts (Starodub, Chernihiv, Nizhen, Pryluka, Lubni, Hadiach, Kiev, Pereiaslav, Myrhorod, and Poltava) that formed the *Hetman state (Hetmanate). By extension *Slobidska Ukraine, which had a comparable social and economic order, sometimes has been regarded as part of the Left-Bank realm, even though it was never linked administratively with the Hetmanate and had a separate historical development. The Left-Bank lands have commonly been considered the heartland of Ukrainian ethnic territory. The former Left-Bank Ukraine now constitutes the oblasts of Chernihiv and Poltava, the left bank of Kiev and Cherkasy oblasts, the city of Kiev and its right-bank environs, northern Dnipropetrovske oblast, and northwestern Sumy oblast. The Starodub regimental lands are now within Briansk oblast in the Russian Federation.

The Dnieper waterway provided a specific geographic focus for the Left-Bank region as its dividing line with *Right-Bank Ukraine. The formal partitioning of the two regions made the Dnieper a frontier zone and thereby compelled the Left Bank to reorient itself politically and economically toward Moscow. The Dnieper regained importance only after 1795, when Right-Bank Ukraine had been incorporated in toto into the Russian Empire.

The establishment of the Left Bank as a distinctive geographic and political entity came as an offshoot of the *Cossack-Polish War of 1648–57. Following Hetman B. Khmelnytsky's death (1657) the Cossack polity was racked by dissension between officers and rank-and-file Cossacks, and between pro- and anti-Polish political orientations. The dissension produced a split in Cossack ranks that acquired a specific geographical dimension when the Left-Bank regiments refused to follow the acting hetman, Yu. Khmelnytsky, who supported the Poles against Moscow at the Battle of Chudniv (1660), and elected I. Somko as their leader. Khmelnytsky remained hetman of Right-Bank Ukraine, thereby initiating the division of Ukraine into Left and Right banks. The division soon acquired additional significance in international affairs as a result of the Treaty of *Andrusovo (1667), which established the Dnieper as the dividing line between Russian and Polish zones of influence.

In 1668 the Right-Bank hetman, P. *Doroshenko, successfully united the Cossack regiments on both banks of the Dnieper under his leadership. Internal Right-Bank conflicts and external threats from Poland and Turkey, however, forced his return to the Right Bank. In the interim the acting Left-Bank hetman, D. *Mnohohrishny, was forced by circumstance to break with Doroshenko and swear allegiance to Moscow. Thenceforth the Left Bank remained continuously under Russian influence.

In 1676 Hetman I. *Samoilovych invaded Right-Bank Ukraine, defeated Doroshenko, and proclaimed himself hetman of both banks. In 1678, while retreating before a Turkish advance, Samoilovych forcefully attempted to remove the population of Right-Bank Ukraine to the Left Bank and Slobidska Ukraine.

The *Eternal Peace of 1686 between Russia and Poland cemented the previous Treaty of Andrusovo and confirmed Poland's claim to Right-Bank Ukraine. Russia obtained undisputed control over Left-Bank Ukraine, consisting of the *Hetmanate and a portion of *Zapo-

rizhia. In 1703 Hetman I. *Mazepa occupied Right-Bank Ukraine and was briefly hetman of both banks.

In the 18th century the autonomy of Left-Bank Ukraine was steadily eroded until the Hetmanate was abolished in 1782. From 1796 to 1802 the Left Bank was reconstituted as an administrative territory in *Little Russia gubernia.

Although the Left Bank had ceased to function as an administrative unit, certain features continued to distinguish it as unique for the remainder of the imperial period. The Left-Bank gentry, the former Cossack *starshyna* and its descendants, contributed disproportionately to the formation of a conscious Ukrainian intelligentsia from the end of the 18th to the early 20th centuries. The life of the agricultural population was also distinctive in Left-Bank Ukraine. There free and state peasants, the descendants of rank-and-file Cossacks, formed a significant portion of the rural population, and landlords' serfs were fewer than in Galicia or Right-Bank Ukraine. As well, a characteristic form of peasant settlement, the **khutir*, or single farmstead, was found there. (See also *History of Ukraine.)

A.G. Beniuk

Legal defense. In criminal proceedings, a person empowered to defend the legitimate interests of the defendant and to ensure the observance of the defendant's procedural rights. In the USSR lawyers, trade-union representatives, and relatives could be appointed defense counsel. The appointment procedure and the duties and rights of the defense counsel were defined in the Legislative Foundations of Criminal Jurisprudence of the USSR and Union Republics (1958) and the Code of Criminal Procedure of the Ukrainian SSR (1960). The law required representation by a defense counsel in the following cases: when the defendant, because of physical or mental handicaps, cannot defend himself or herself; when the defendant is a minor; when the defendant does not know the language of the court; when capital punishment is a possible verdict; when compulsory medical treatment is at issue; when there is a conflict of interest between codefendants; when one of the codefendants is represented by a defense counsel. Under Soviet law, the defendant could obtain defense counsel only after the pretrial investigation was completed. Thus, the defendant had no legal assistance during a most crucial stage of the legal process, when false confessions and testimony had been forced routinely from the accused.

Legal press. Periodicals devoted to issues of law and of the legal profession, including the official gazettes of legislatures and reports of the courts.

Gazettes. The earliest gazettes of laws valid in Ukrainian territories were published in Vienna by the Austrian government and were entitled *Allgemeines Reichs-, Gesetz- und Regierungsblatt für das Kaiserthum Österreich* (1848–52), *Reichsgesetzblatt für das Kaiserthum Österreich* (1853–69), and *Reichsgesetzblatt für die im Reichsrathe vereinten Königreiche und Länder* (1870–1918). These gazettes were translated into all the languages of the empire. In Ukrainian they came out as *Obshchii zakonov derzhavnykh i pravytel'stva Vistnyk dlia tsisarstva Avstrii* (1849–53), then as *Vistnyk zakonov derzhavnykh i pravytel'stva* (1854–8), and finally as *Vistnyk zakonov derzhavnykh dlia korolevstva i kraev v derzhavnoi dumi zastuplenykh* (1872–95) and *Vistnyk zakoniv derzhavnykh dlia korolivstva i kraiv, zastuplenykh v Derzhavnii*

Radi (1896–1916). Austria's provincial governments published their own gazettes: in Galicia *Provinzialgesetzsammlung des Königreichs Galizien und Lodomerien* (1819–48) was followed by *Allgemeines Landes-Gesetz- und Regierungs-Blatt für das Kronland Galizien und Lodomerien mit den Herzogthümern Auschwitz und Zator und dem Grossherzogthume Krakau*, which was translated into Ukrainian as *Vseobshchii dnevnykh zemskyykh zakonov i pravytel'stva dlia koronnoi oblasti Halytsii i Volodymerii s kniazhestvom Osvitsynskym i Zatorskym i velykym kniazhestvom Krakovskym* (1851–2), and then by *Landes-Regierungsblatt für das Kronland Galizien und Lodomerien mit den Herzogthümern Auschwitz und Zator und dem Grossherzogthume Krakau* (1853–1914), which appeared also in Ukrainian as *Vistnyk kraievoho pravytel'stva dlia koronnoi oblasti Halytsii ...* For a time, the separate vicegerency in eastern (Ukrainian) Galicia issued *Landes Regierungsblatt für das Verwaltungsgebiet der Statthaltereie in Lemberg* (1854–9), which came out in Ukrainian under different titles as *Vistnyk kraevoho pravytel'stva dlia upravytel'stvennoi oblasti namistnychestva v L'vovi* (1854–7) and *Vistnyk riadu kraevoho dlia oblasti administratsiinoi Namistnytstva vo L'vovi* (1858–9). For Bukovyna, *Allgemeines Landes-Gesetz- und Regierungsblatt für das Kronland Bukowina* (1850–1914) was published in Chernivtsi and translated under the title *Obshchii zakonov kraevykh i pravytel'stva Vistnyk dlia korunnoho kraiu Bukovyny*. In the 1850s the gazette *Landesgesetz und Regierungsblatt für Kronland Ungarn* was published as *Zemskii pravytel'stvennyi Vistnyk dlia korolevstva Uhorshchyny* for the Ukrainian population in the Hungarian crownlands.

In Russian-ruled Ukraine there was no legal gazette before 1917. New laws were published in the official gubernia newspapers (*gubernskie vedomosti*), which were established in the Ukrainian gubernias in the 1860s.

During the struggle for Ukrainian independence (1917–20), every Ukrainian government issued a regular legal gazette. The Central Rada published *Vistnyk General'noho Sekretariatu Ukraïny* (1917–8) and *Vistnyk Rady Narodnykh Ministriv Ukraïns'koi Narodn'oi Respubliky* (1918). *Derzhavnyi vistnyk* (1918) came out under the Hetman regime. Under the UNR Directory, *Vistnyk Ukraïns'koi Narodn'oi Respubliky* (1918–19) was changed to *Vistnyk derzhavnykh zakoniv* (1919–20). The government of Western Ukraine published *Zbirnyk zakoniv, rozporiadkiv, ta obizhnykiv proholoshenykh Derzhavnym Sekretariatom Zakhidnoi Ukraïns'koi Narodnoi Respubliky* (1918) and then *Vistnyk derzhavnykh zakoniv i rozporiadkiv Zakhidnoi Oblasty Ukraïns'koi Narodnoi Respubliky* (1919). In addition, many ministries issued their own gazettes, usually entitled *Vistnyk* or *Visty*.

In the interwar period, a Ukrainian-language legal gazette was published only in Transcarpathia. It was called *Uriadova hazeta Zems'koho Uriadu dlia Pidkarpatorus'koi Rusy* (1919–28) and then *Zems'kyi vistnyk* (1928–38). The gazette of autonomous Carpatho-Ukraine was *Uriadovyi vistnyk Pravytel'stva Pidkarpats'koi Rusy* (1938), which was renamed *Uriadovyi vistnyk Pravytel'stva Karpats'koi Ukraïny* (1939). Laws for Polish- and Rumanian-ruled Ukrainian territories appeared only in Polish or Rumanian gazettes.

The first Soviet government in Ukraine issued its gazette in both Ukrainian and Russian, under the same title as the gazette of the more popular UNR government, *Vistnyk Ukraïns'koi Narodn'oi Respubliky* (December 1917–March 1918). Then the regime published the bilingual

Zbirnyk uzakoneni' i rozporiadzhen' Robitnycho-selians'koho uriadu Ukraïny (1919–29) and *Zbirnyk zakoniv ...* and the newspaper **Visti VUTsVK* (1921–41). In Moscow the gazette of the all-Union government was also issued in Ukrainian. From 1941 the official publication of the Ukrainian Supreme Soviet was the bilingual **Vidomosti Verkhovnoi Rady URSR*. The gazette of the USSR Supreme Soviet was published in the languages of the republics, including Ukrainian, but from 1960 it has come out only in Russian. In the 1920s and 1930s some laws and official pronouncements were published in journals of the People's Commissariat of Justice and various court bulletins. Most of these publications appeared in both Ukrainian and Russian. Various commissariats and executive committees published their own bulletins and official magazines. Some decrees and instructions of the ministries were published in national newspapers, such as *Radians'ka Ukraïna* (Kiev) and *Izvestiia* (Moscow), and oblast or city newspapers run by the Party or by the Soviets.

Journals. The first professional law journals published in Ukrainian were **Chasopys' pravnycha* (1889–99), *Chasopys' pravnycha i ekonomichna* (1900–12), and **Pravnychi vistnyk* (1910–13) in Lviv. Within the Russian Empire there were no Ukrainian-language legal periodicals. Ukrainian jurists published in Russian journals, such as *Zhurnal Iuridicheskogo obshchestva*, *Iuridicheskii vestnik*, and *Vestnik prava*. During the period of Ukrainian independence the monthly *Zakon i pravo* (1918) appeared briefly in Kiev.

In the interwar period, **Zhyttia i pravo* (1928–39) appeared quarterly in Lviv, and the popular monthly *Pravni porady* (1933) came out briefly in Kolomyia. In addition, Western Ukrainian newspapers often carried articles on theoretical and practical legal issues. In Soviet Ukraine the journal *Vestnik sovetskoi iustitsii na Ukraine* (1922–9) was published in Russian until it was renamed (1929–30) **Visnyk Radians'koi iustitsii*. At the same time the People's Commissariat of Justice issued **Chervone pravo* (1926–31). The last two journals were replaced in 1931 by **Revoliutsiine pravo*. After the Second World War no Ukrainian legal journal was published in the USSR for many years, and Ukrainian jurists had to publish their works in various Russian periodicals, such as *Sovetskoe gosudarstvo i pravo* and *Sotsialisticheskaia zakonnost'*. It was only in 1958 that **Radians'ke pravo* was established as the organ of the Ministry of Justice, the procuracy and the Supreme Court of the Ukrainian SSR, and the Sector of State and Law of the AN URSR.

Outside Ukraine, the Association of Ukrainian Lawyers in New York published irregularly the professional journal *Pravnychi visnyk* (4 vols, 1955–79).

A. Bilynsky, V. Markus

Legal scholarship. The study of law in Ukraine began with the emergence of an organized state in Kievan Rus', when 'customary law was systematized in collections such as *Zakon Ruskii* and *Ruskaia Pravda*. The treaties negotiated between Kievan Rus' and Byzantium articulated for the first time the principles of international private law and testify to the legal sophistication of the princes' officials. The Church Slavonic translations of the Greek *Nomocanon* known as **Kormchaia kniga* indicated that there were close ties between Byzantine and Rus' legal specialists. The publication of three editions of the 'Lithuanian Statute in the 16th century confirms that Western-trained legal specialists were active at the time in Ukraine.

In the 18th century, the more prominent legal scholars were V. Stefanovych, the chairman of the committee that prepared the Code of Laws of 1743, and F. Chuikevych, the author of *Sud i rozprava* (Court and Trial, 1750).

As the Ukrainian state declined and became integrated into the Russian Empire, the conditions for an independent tradition of legal scholarship disappeared. Law graduates of the Kievan Mohyla Academy who continued their studies in West European universities served usually in St Petersburg or Moscow.

As a modern discipline, legal scholarship in the Russian Empire dates from the second half of the 18th century. Initially, its area of interest was natural law. This branch of philosophy was developed by foreign thinkers, mostly German ones. V. Zolotnytsky, a Ukrainian, wrote the first independent monograph on natural law in the Russian Empire (1764). The first law professor at Moscow University born in the Russian Empire was another Ukrainian, S. Desnytsky, who completed his doctorate of laws at Glasgow University and advocated an independent judiciary. Several Ukrainians from Transcarpathia – P. Lodii, V. Kukolnyk, and M. Baluhiansky – were invited to St Petersburg and became prominent legal scholars.

In the 19th century the newly established universities in Kharkiv, Kiev, and Odessa, as well as Nizhen Lyceum and the Kiev Theological Academy (canon law), emerged as the centers of legal scholarship in Ukraine. By then the philosophy of law was replaced in the Russian Empire by the encyclopedic study of law. A Ukrainian graduate of Kharkiv University, P. Degai, wrote the first Russian textbook on law, *Posobie v pravilakh izuchenii rossiiskikh zakonov ili materialakh entsiklopedii, metodologii, i istorii literatury rossiiskogo prava* (A Textbook on the Rules of the Study of Russian Laws, or Materials for the Encyclopedia, Methodology, and History of the Literature of Russian Law, 1831). M. Pyliankevych (1819–56), a professor of law at Kiev University, defended a Hegelian position in his *Istoriia filosofii prava* (History of the Philosophy of Law, 1870). O. Lokhvytsky (1830–84), who taught law at the Richelieu Lyceum in Odessa and then at St Petersburg University, studied issues of maritime law and the international law of war. Many of the law professors in Ukraine were Russian, Polish, or German. The more prominent Ukrainian legal scholars of the late 19th and early 20th centuries were L. Bilohryts-Kotliarevsky, a specialist in criminal law; O. Huliaiev, in civil law; V. Karpeka, in civil and financial law; S. Ornatsky (1806–84), in civil law; O. Fedotov-Chekhovskiy, in civil and Roman law; H. Hordienko (d 1849), in criminal law; and P. Lashkarev, in church law. The criminologist S. Bogorodsky played a major role in establishing the law faculty of Kiev University. His student, O. Kistiakovskiy, was a specialist in criminal and Ukrainian customary law. V. Nezabytovskiy (international law), O. Eikhelman (international law), and B. Kistiakovskiy (philosophy of law) served as professors at Kiev University. At Kharkiv University the more important law professors were D. Kachenovskiy, V. Danylevskiy, V. Yastzhembskiy (international law), V. Hordon (civil law and procedure), and M. Chubynskiy (criminology). At Odessa University P. Kazanskiy specialized in international and administrative law, O. Borovykovskiy in civil law, and Yu. Pryhara in constitutional law. Some law professors of Ukrainian origin taught at other universities in the Russian Empire: O. Yashchenko and V. Grabar at Tartu University, V. Aleksandrenko at Warsaw

University, and M. Kravchenko at Tomsk University.

In the 19th century much research was done on the legal history of Ukraine. Polish historians, such as T. Czacki and I. Daniłowicz, and Russian scholars, such as V. Sergeevich, K. Nevolin, V. Chicherin, M. Diakonov, P. Silvansky, and M. Vladimírsky-Budanov, studied the law of Kievan Rus', the Lithuanian-Ruthenian state, and the Hetman state. The Ukrainian national revival of the 19th century encouraged wide research on the legal institutions and structure of the Hetman state. Many historical studies were published in journals, such as *Chteniia v Istoricheskom obshchestve Nestora-letopistsa* and *Kievskaiia starina*, and in the collection *Arkhiv Iugo-Zapadnoi Rossii*. The most important legal monument published separately was the Code of Laws of 1743, with a commentary by O. Kistiakovsky (1879). In the early 20th century major contributions to Ukrainian legal history were made by M. Vasilenko, D. Miller, M. Slabchenko, M. Maksymeiko, Y. Malynovsky, F. Leontovych, M. Liubavsky, O. Balzer, I. Lappo, S. Kutrzeba, and S. Yushkov. Some of these scholars continued to publish in the Soviet period.

In Western Ukraine the major centers of legal scholarship were the universities of Lviv and Chernivtsi. Several professors of Lviv University were Ukrainians: O. Ohonovsky (private law), P. Stebelsky (criminal law), and S. Dnistriansky (civil and state law). The first attempts to standardize Ukrainian legal terminology were made by the editorial board of Austria's official legal gazette, *Allgemeines Reichs-, Gesetz- und Regierungsblatt für das Kaiserthum Österreich* (1848–52). An official commission, which included I. Holovatsky, H. Shashkevych, and Yu. Vyslotsky, compiled a Ukrainian-German legal and political dictionary, *Juridisch-politische Terminologie für die slavischen Sprachen Österreichs: Deutsch-ruthenische Separat-Ausgabe* (1851). Galicia's Ukrainian center for legal scholarship was the Legal Commission of the Shevchenko Scientific Society (NTSh) in Lviv. It published four volumes of the *Pravnycha Biblioteka* (Legal Library) series, three volumes of *Zbirnyk Pravnychoi komisii* (1925–9), and the journals *Chasopys' pravnycha* (1889–99) and *Chasopys' pravnycha i ekonomichna* (1900–12). The quarterly *Pravnychyi vistnyk* of the Society of Ukrainian Lawyers in Lviv published articles on legal history and theory. The more prominent law scholars in Western Ukraine included K. Levytsky, M. Lozynsky, V. Okhrymovych, V. Verhanovsky, S. Baran, V. Paneiko, and V. Levynsky.

In the Ukrainian SSR the development of legal scholarship was difficult and uneven. In the early 1920s the All-Ukrainian Academy of Sciences became the center for research on Ukrainian legal history. The *Commission for the Study of the History of Western-Ruthenian and Ukrainian Law and the *Commission for the Study of Ukraine's Customary Law were established in January 1919 within its Socio-Economic Division. Their primary aim was to study the archival material in Kiev and Moscow. Each commission published its *Pratsi*, which addressed a range of topics, including Lithuanian-Ruthenian law by M. Vasilenko and S. Borysenok, the sociolegal structure of the Zaporozhian Sich by M. Slabchenko, the law of Kievan Rus' by M. Maksymeiko, the legal institutions of the Hetman state by I. Cherkasky, L. Okinshevych, V. Hryshko, and V. Novytsky, and customary law by S. Borysenok, A. Kryster, M. Tovstolis, Y. Malynovsky, and O. Dobrov. Among these scholars the prevailing view was that an independent Ukrainian legal tradition developed continu-

ously from Kievan Rus' to the abolition of the Hetman state. At the beginning of the 1930s the two commissions were dissolved, and research on Ukrainian legal history was interrupted for two decades. It was only in the 1950s that K. Sofronenko's monograph on the Little Russian Office (1951) and V. Diadychenko's book on the sociopolitical system of Left-Bank Ukraine in the 17th and 18th centuries (1959) appeared. In the 1960s V. Kalynovych, A. Tkach, and A. Pashuk also contributed to the history of prerevolutionary law.

Research institutions outside the academy were strongly influenced by Marxism-Leninism and primarily served the economic and political interests of the state. Kharkiv, the first capital of Soviet Ukraine, was the center of legal research and discussion. The Ukrainian Law Society and the People's Commissariat of Justice published jointly *Vestnik sovetskoï iustitsii na Ukrainie* (1922–8) and then *Visnyk radians'koi iustytisii*, which was merged with *Chervone pravo* (1926–31) to form *Revoliutsiine pravo* (1931–41). Jurists tried to develop new branches of law such as co-operative and trade law to handle the new situation. In their works the law was presented generally in traditional terms, as a set of abstract and universally binding norms. This concept of law was accepted by the more prominent jurists of the 1920s, O. Malytsky, H. Volkov, Ye. Nemyrovsky, V. Diablo, V. Boshko, and R. Babuk. Legal specialists, such as M. Paliienko, M. Reikhel, V. Kobalevsky, and A. Evtikhiev, concentrated on constitutional and administrative law. M. Mitilino, S. Landkof, and P. Kovanko-Kovankovsky developed economic law, and V. Koretsky, V. Grabar, L. Velychko, Ye. Kelman, and M. Lozynsky worked on international law.

In the late 1920s legal scholarship began to decline quickly. The theory that technical and organizational norms take precedence over legal ones (legal nihilism) gained favor. Juridical institutes and law faculties were closed. This trend did not last long, since the Soviet authorities demanded severe norms, which assumed a voluntaristic nature. The school of so-called socialist law regarded law as the necessary expression of the will of the state. It was represented by A. Vyshinsky, the general procurator of the USSR. In Ukraine the few active legal scholars confined themselves mostly to commentaries on positive Soviet law: S. Vilniansky on civil law, B. Sokolov on state law, A. Pasherstnyk on labor law, V. Serebrovsky on inheritance law, and S. Landkof on civil law.

It was only after Stalin's death that the Party decided to reject voluntarism and legal relativism, and return to 'socialist legality.' To work out new legal codes it raised the level of legal scholarship. In 1949 the Sector (since 1969, Institute) of State and Law became the chief center of legal scholarship in Ukraine. From 1958 it collaborated with several state agencies in publishing *Radians'ke pravo*. There was an increase in the number of legal publications, the number of law schools (see *law studies), and the enrollment of law students. The publication of the two-volume collective work *Istoriia derzhavy i prava Ukrain'skoi RSR (1917–1967)* (The History of the State and Law of the Ukrainian SSR [1917–1967], 1967) was a significant achievement. Associates of the Kharkiv Juridical Institute prepared several collections of papers entitled *Pytannia derzhavy i prava Ukrain'skoi RSR* (Questions of State and Law of the Ukrainian SSR, 1952–8) and *Pytannia istorii derzhavy i prava Ukrain'skoi RSR* (Questions of the History of State and Law of the Ukrainian SSR, 1953–7). The law

faculty of Kiev University began to publish an interdepartmental collection, *Problemy pravoznavstva* (Problems of Jurisprudence) in 1965. V. Koretsky, P. Nedbailo, Ye. Nazarenko, and V. Tsvietkov dealt with theoretical questions of law and the state. B. Babii, P. Mykhailenko, L. Potarykina, A. Taranov, V. Terletsy, and S. Fuks studied the history of the state and law of the Ukrainian SSR. S. Vilniansky, V. Maslov, H. Matvieiev, M. Hordon, V. Koleichykova, and M. Orydoroha have done work on civil and family law. P. Indychenko, V. Muntian, S. Pidopryhora, and V. Yanchuk specialized in land and co-operative farm law. Ya. Brainin, S. Tykhenko, M. Hrodzynsky, P. Zavorotko, and Ya. Shutin have written on criminal law and procedure. International law has been studied by V. Koretsky, K. Zabihaïlo, M. Korostarenko, I. Lukashchuk, and N. Ulianova, and the law of other countries has been studied by Ye. Tykhonova, S. Makohon, H. Aleksandrenko, and Ya. Pliasun. Besides juridical institutes and universities, legal research is also conducted at the Kiev and Kharkiv scientific research institutes of forensic experts. Some noted Ukrainian jurists, such as S. Bratus, V. Lisovsky, and V. Serebrovsky, worked in the USSR outside Ukraine.

In Western Ukraine in the interwar period, the legal commission of the NTS continued to be the main center of legal research. It was headed by V. Verhanovsky. The works of its associates were published in *Zhyttia i pravo*. The more productive legal scholars were S. Baran, V. Starosolsky (state law), Yu. Paneiko (professor of state and administrative law at Cracow, then Vilnius, university), and M. Chubaty (history of Ukrainian law).

Outside Ukraine law research was conducted at the law faculty of the Ukrainian Free University (UVU) in Prague by émigré scholars, such as O. Eikhelman (state and international law), S. Dnistriansky (state law), M. Lozynsky (state law), S. Shelukhyn, R. Lashchenko, A. Yakovliv (history of Ukrainian law), K. Losky (Roman law), and O. Odarchenko (financial law). O. Lototsky, V. Bidnov, and V. Zaikin at the Ukrainian Scientific Institute in Warsaw worked on the history of Ukrainian canon law. After the Second World War law research has continued at UVU, the NTS, the Ukrainian Academy of Arts and Sciences, and the Association of Ukrainian Lawyers in the United States, which had published three collections of *Pravnychyi visnyk* by 1971. Most Ukrainian law scholars have been interested in the history of Ukrainian law or in Soviet law. Contributors to the former field include V. Hryshko, L. Okinshevych, Ya. Padokh, and A. Yakovliv. Ukrainian state law has been studied by S. Ivanytsky, V. Lysy, and M. Stakhiv; and B. Halaichuk, V. Markus, and R. Yakemchuk have written on international law. Critical studies of Soviet law have been written by A. Bilynsky and Yu. Starosolsky, and O. Yurchenko. M. Chubaty, M. Wojnar, and V. Pospishil have specialized in canon law. Other areas of law and jurisprudence have been studied by E. Pyziur, J. Fedynskiy, T. Ciuciura, and W. Tarnopolsky.

Legal system. See Civil procedure, Criminal procedure, and Court system.

Legends (from Latin *legenda*, 'that which is to be read'). In the Western tradition a legend was originally a text about the life of a saint that was prescribed reading in churches on that saint's day and during meals in monasteries. Because medieval legends, such as those in *Legenda aurea*, were similar to fairy tales, the term was extended to refer to various kinds of tales (historical, folk, and religious). Now the term is used for tales in which the characters are actual historical personages, including saints. In Ukraine, in addition to religious legends and apocrypha, there were also legends about Rus' princes, Cossacks, hetmans, haidamakas, opryshoks, and other famous people (eg, M. Churai, H. Skovoroda, T. Shevchenko). They were published by P. Kulish in his **Zapiski o Iuzhnoi Rusi*, by O. Afanasiev-Chuzhbyn'sky in his *Narodnye legendy* (Folk Legends, 1859 and 1921), and, chiefly, by researchers of Ukrainian fairy tales, such as M. Chubyn'sky, M. Drahomanov, and V. Hnatiuk. Manuscripts of folk legends were collected and edited by I. Franko and published in 1899. The historical legends that appeared in the oldest Ukrainian chronicles were collected by F. Giliarov in his *Predaniia Russkoi Nachal'noi letopisi* (The Legends of the Rus' Primary Chronicle, 1878). Many legends became part of the Cossack chronicles. **Istoriia Rusov* could be considered a historical legend. Legends have reappeared in the historical novel and drama, and folk legends are frequently drawn upon in Ukrainian poetry.

Legend continues to play a role in contemporary Ukrainian literature. Using legends as a base O. *Dovzhenko wrote his scenario *Zvenyhora*, and L. *Kostenko compared her novel-in-verse *Marusia Churai* to a legend. Legends play a prominent role in the works of D. Pavlychko, B. Stelmakh, V. Vovk, E. Andiiiv'ska, and other contemporary writers.

D. Chyzhevsky, D.H. Struk

Léger, Louis-Paul-Marie, b 13 January 1843 in Toulouse, d 30 April 1923 in Paris. Pioneering French Slavist; member of the Russian Imperial Academy of Sciences from 1884 and the Académie Française from 1900. Through his research, travels in Ukraine, and correspondence with M. Drahomanov he developed an interest in Ukrainian folklore and literature, particularly in the poems of T. Shevchenko, some of which he translated. He also translated several Ukrainian folktales and the Primary Chronicle (1884). He was the first to teach Ukrainian language and literature in France, in the years 1904–6 at the Collège de France in Paris. He wrote many works in Slavic studies, including articles and encyclopedia entries about Shevchenko and other Ukrainian writers and a study of N. Gogol.

Legion of Ukrainian Nationalists (Legion ukrain'skykh natsionalistiv or Druzhyny ukrainskykh natsionalistiv). A Ukrainian military formation in the German army during the Second World War. The term 'Legion' was used as a popular name, in an analogy with the Legion of Ukrainian Sich Riflemen, for an OUN-organized military unit which under Col R. *Sushko's command attempted to participate in September 1939 in the German-Polish War. The unit was formed initially in Austria of former soldiers of the Carpathian Sich, who in June 1939

had been released from Hungarian internment. At the end of August 1939 the legion consisted of two understrength infantry battalions, which arrived on 3 September in the vicinity of Prešov, Slovakia. On 24 September it crossed the former Czech-Polish border and started to advance through the Lemko region, but the Germans quickly intervened and demobilized it. In April 1941 the military department of the OUN (Bandera faction), headed by D. *Hrytsai, recruited two battalions with the approval of German military (Wehrmacht) circles. The northern battalion, *Spezialgruppe Nachtigall*, consisted of three companies, commanded by Lt A. Herzner, that underwent final military training near Neuhammer, in Upper Silesia. The southern battalion, *Spezialgruppe Roland*, was commanded by Maj Ye. Pobihushchy and was trained near Wiener-Neustadt in Austria.

With the outbreak of the German-Soviet War, *Nachtigall* marched alongside the German army through Radymno, Lviv, and Ternopil. Placed under the command of Maj Heinz on 13 July 1941 and renamed the Second Battalion of the Brandenburg Regiment No. 800, it was sent into front-line combat in the vicinity of Proskuriv (Khmelnyskyi) and, later, Vinnytsia. During the latter part of August, *Nachtigall* was taken out of the combat zone and transported to Cracow, where it was disarmed and returned to Neuhammer for internment. *Roland* marched through Rumania and Moldavia and entered Ukraine on 25 July. In August, before it could see any action, it too was disarmed and recalled to Austria.

In mid-October 1941 at Frankfurt an der Oder, both units were integrated into *Schutzmannschaftbataillon 201*, under a one-year contract. The entire chain of command (22 officers) was Ukrainian: Maj Ye. Pobihushchy was battalion commander, and R. *Shukhevych, M. Brygider, V. Sydor, and V. Pavlyk were company commanders. The battalion's initial strength was over 600. On 19 March 1942, after intensive retraining, it was sent to Belorussia to protect communication lines and to combat Soviet partisans. The battalion's commanders protested repeatedly against German policy in Ukraine. In November 1942, when its soldiers refused to renew their contract, they were disarmed in Mahiliou, discharged, and sent home. The officers were brought to Lviv and on 8 January 1943 incarcerated in a Gestapo prison. Several of them, including R. Shukhevych, escaped and joined the UPA.

Legislation. The action of making laws, ordinances, or edicts that carry authority in a given society by virtue of their promulgation by an individual or body invested with legislative power. The Ukrainian word for law (*zakon*) dates back to the medieval period and also refers to customary norms. Under the influence of Byzantine legal practice, the term became restricted to normative acts issued by the prince, usually in written form. Other terms for law used in the medieval period were *pokon*, *pravo*, *ustav*, and *urok*. Initially, legislative power belonged to the monarch, who sometimes shared it with representatives

of the higher estates. In modern times it belongs, as a rule, to popular bodies, such as parliaments, representing a wider constituency.

In medieval Rus' legislative power was shared by the prince, **viche*, and **Boyar Council*, but the distribution of power among them varied with principality and time. Bishops and hegumens made laws governing church affairs and affecting church people. Congresses of princes were voluntary and irregular; hence, they lacked legislative authority. M. Vladimirsky-Budanov has argued that such congresses had the right to issue laws for a given territory; eg, a part of the **Ruskaia Pravda* was adopted at the Vyshhorod congress of Yaroslav the Wise's sons (1072).

During the Lithuanian-Ruthenian period, the grand duke enjoyed legislative authority in the Vilnius principality, and the appanage princes made law in their own realms. From the 15th century the grand duke began to legislate for the entire duchy, sharing his power with the Council of Lords and the Great Diet. The most important laws of this period were set forth in the **land charters*, the **sudebniki*, and the **Lithuanian Statute*.

In the Hetman state, legislative authority was held by the hetman, who usually consulted the *starshyna* and obtained their approval. Sometimes the General Military Council also issued laws. As Ukraine's autonomy declined in the 18th century, legislative power passed to the Russian tsar, who exercised it partly through the **Little Russian Collegium*. At the Zaporozhian Sich the Sich Council and the council of officers made law. As in the previous period, no clear divisions of power existed among various branches of government. Sometimes they co-operated in implementing the law, and sometimes they competed.

In the Russian Empire the tsar was the only legislative authority until 1905, although he consulted with the State Council and the Committee of Ministers. After 1905 he shared this power with the State Duma. In the Austro-Hungarian Empire, law-making was the emperor's exclusive right until 1867. Then, under the constitutional monarchy and Assembly of Deputies (*Abgeordnetenhaus*), laws were passed by the State Council (*Reichsrat*). In the interwar period, legislation for Ukrainian territories under Polish, Rumanian, and Czechoslovak rule was passed by the respective national parliaments and state presidents. Only the diet of Subcarpathian Ruthenia within Czechoslovakia was to have enjoyed the power to make law for the autonomous territory.

During the period of Ukrainian statehood in 1917-20, various bodies under different regimes exercised legislative power. On 8 December 1917 the Central Rada passed a law reserving for itself 'the exclusive and indivisible right to make law for the UNR,' and it exercised this power through its executive committee, the Little Rada. The **Constitution of the UNR*, adopted on 29 April 1918, endowed the National Assembly with supreme legislative power and gave the right to propose legislation to its presidium, the Council of National Ministers, groups of deputies, local governments, and citizens themselves (submitting petitions with 100,000 signatures). Under the Hetman government, laws were drafted by the various ministries and passed by the Council of Ministers, but acquired force only after being ratified by the hetman. This system of legislation was to function only until parliament was convened. The Directory of the UNR, as a revolution-

ary organ, claimed all the powers of government, including the legislative power which it exercised with the Council of National Ministers. The Labor Congress (1919) transferred its legislative power to the Directory until the next session, which could not be held because of the Bolshevik victory in Ukraine. According to the Law on the Temporary Supreme Government and the Legislative System of the UNR (12 November 1920), legislative authority in the UNR was to belong to the State People's Council, and the president of the Directory was merely to ratify laws. The *Government-in-exile of the UNR, however, left the legislative power with the Council of National Ministers and the president of the Directory.

In the Western Ukrainian National Republic (ZUNR), legislative authority was held by the Ukrainian National Rada, which transferred it on 9 June 1919 to the Dictatorship of the Western Province of the UNR.

In Soviet Ukraine, legislative power was vested formally in the All-Ukrainian Congress of Soviets and the All-Ukrainian Central Executive Committee (VUTsVK) by the first constitution of the Ukrainian SSR (14 March 1919). In practice, however, it was usually the Presidium of the VUTsVK and the *Council of People's Commissars that exercised this power. The constitution of January 1937 created the *Supreme Soviet of the Ukrainian SSR as Ukraine's highest and only legislative body, and its status was confirmed by the most recent constitution (1978). In practice, the Presidium of the Supreme Soviet took over most of its legislative functions: it issued general normative acts called *ukazy*, which differed from formal laws only in name, and these were later ratified as laws by the Soviet. Fundamental areas of the law in Ukraine came under the power of the Supreme Soviet of the USSR in Moscow. All laws passed by the USSR Supreme Soviet were valid on Ukrainian territory. In the case of conflict between Ukrainian and USSR law, the latter prevailed. The declaration of *sovereignty (16 July 1990) placed Ukrainian law above the law of the USSR in the Ukrainian SSR.

During periods of revolutionary change, new regimes generally abolish old legislation in whole or in part. The Central Rada retained the basic legislation of the Provisional Government and even of the tsarist regime (especially civil, criminal, and trade legislation). Only some of the legislation was explicitly replaced by new laws. The Hetman government retained even more of the old legislation, including much of the administrative law, but discarded the political and social legislation of the Central Rada. The Directory, in turn, overturned the hetman's legislation. In the ZUNR, almost all of the Austrian laws remained in force. The Soviet regime abolished the legislation of all former governments in Ukraine and, through a series of decrees, introduced Soviet Russian laws in Ukraine.

In most modern states, laws come into force when they are published in official gazettes. For gazettes published by Ukrainian governments, see *Legal press.

V. Markus

Legislative foundations of the USSR and Union republics. All-Union laws that define the fundamental general statutes, principles, and tasks of Soviet legislation in a specific branch of law. The Constitution of the USSR empowered the USSR Supreme Soviet to make such laws, which played an important role in maintaining legal cen-

tralization and obedience to central political authority. They were binding principles, on which all republican legislation had to be based. The following legislative foundations were established: criminal (1958), court organization (1958), civil (1962), marriage and family (1968), corrective-labor (1969), health (1970), water (1971), labor (1971), education (1973), mineral resources (1975), forest (1977), administrative (1980), land (1980), and housing (1982) law.

Legumes (Leguminosae or Fabaceae; Ukrainian: *bobovi*). A family of dicotyledonous plants with over 500 species and 13,000 varieties, 300 of which grow in Ukraine. Because of their high protein content and their nitrogen fixation role, legumes are of great economic importance. Some are sources of oil or medicinal substances. Domesticated varieties fall into two main categories: seed legumes, including *peas, beans, *peanuts, lentils, *soybeans, and lupine, and legume forage grasses, including lucerne, clover, esparcet, and *vetch. The land devoted to seed legumes increased in the Ukrainian SSR from 836,000 ha in 1940 to 1,681,000 ha in 1986 despite the concurrent decrease in land devoted to all seed crops from 21,385,000 ha to 16,214,000 ha. No separate figures are available for grass legumes, which are an important part of the *feed base.

Lehotsky, Teodor [Lehoc'kyj] (Hungarian: Tivadar Lehoczky), b 5 October 1830 in Fucine, Italy, d 25 November 1915 in Mukachiv, Transcarpathia. Lawyer and noted archeologist, historian, and ethnographer of Transcarpathia. He founded a museum in Mukachiv that bore his name and to which he donated his archeological collection (now in the Transcarpathian Regional Studies Museum in Uzhhorod). His main works are a three-volume monograph in Hungarian on Bereg *komitat* (1881–2), collections of Hungarian-Ruthenian folk songs (1864) and proverbs (1877), and articles and books on the archeology of Transcarpathia, among them *Adatok hazánk archaeológiájához* (Contributions to the Archeology of Our Homeland, 2 vols, 1892, 1912) and *Beregmegyei régiségek* (Antiquities of Bereg *Komitat*, 1896).

Lehr-Spławiński, Tadeusz, b 20 September 1891 in Cracow, d 17 February 1965 in Cracow. Polish Slavist. A professor of Lviv (1922–9) and Cracow (1929–62) universities, he wrote a number of important works in Slavic and Ukrainian linguistics. Regarding the question of the origin of Ukrainian he defended the theory of a common Old Rus' language. He studied Ukrainian phonetics and certain problems in morphology from the neogrammarian viewpoint, and his ideas on the formation of Ukrainian dialects partly influenced I. *Zilynsky. His most important works on the history of Ukrainian are collected in *Studia i szkice wybrane z językoznawstwa słowiańskiego* (Selected Studies and Essays in Slavic Linguistics, vol 1, 1957).

Leipunsky, Aleksandr [Lejpunskij], b 7 December 1903 in Drahli, Hrodna gubernia (now in Poland), d 14 August 1972 in Moscow. Nuclear physicist; full AN URSS (now ANU) member from 1934. A graduate of the Leningrad Polytechnical Institute (1926), from 1929 to 1941 he worked at the Kharkiv Physical-Technical Institute, and from 1933 to 1937 he served as its director. From 1944 to 1952 he worked at the AN URSS Institute of Physics in Kiev,

Aleksandr Leipunsky

and in 1944 served as its director. An ingenious experimentalist, he contributed significantly to the early development of nuclear instrumentation and nuclear-reaction studies in Ukraine. Together with A. *Walter, K. *Synelnikov, and G. *Latyshev he was the first in the USSR to induce the disintegration of a stable nucleus (lithium) by means of accelerated protons (1932). Leipunsky is internationally known for the first experimental evidence of the existence of the neutrino, obtained in 1934 while he was working as a visiting scientist in E. Rutherford's laboratory in Cambridge, England. The later years of his life were devoted to the development of nuclear-power technology.

Leisure (*dozwillia*). Time spent neither working nor performing necessary tasks. Theories about the nature and role of leisure range from the view that leisure can compensate for uninteresting work to the opposite view, that the quality of leisure is dependent on the quality of work. Theories about leisure were particularly influential in Soviet Ukraine because social planners had the power to control the amount and, to a certain extent, the type of leisure most people enjoyed. Just before the demise of the Soviet Union thinking about leisure was rather ambiguous. Soviet ideologists emphasized, as had K. Marx, the central importance of work in the life of the individual, even though work had not become as challenging or fulfilling as Marx had envisioned it would be in a communist society. Furthermore, the Marxist emphasis on the need to create conditions in which all members of society would be able to reach their full potential was often taken by Soviet technocrats as leave to ensure that all individuals spent a minimum amount of time engaged in 'good' (ie, officially approved and sponsored) leisure activities and to limit access to 'bad' forms of leisure (ie, passive entertainment).

Demographic trends forced planners to modify their position. The postwar generation was better educated than its predecessors and had at most only dim memories of war, revolution, and Stalinist excesses. Many members of that generation came to rely on leisure for the satisfaction that neither work nor political involvement afforded them. A 1973 study of Soviet workers in an electronics factory, for example, showed that 31 percent considered leisure to be their principal life interest, whereas only 17 percent felt that work was of central importance. A 1974 study showed a negative correlation between the quality of work and interest in leisure; nevertheless, improving

the quality of leisure could have been an easier solution to dissatisfaction with work than changing the nature of work itself.

Since the time necessary to attend to personal needs is generally invariable, work outside the home and housework are the two factors that have determined the amount of leisure time available. Although the working day for industrial workers had not diminished significantly in the postwar period, the introduction of the five-day workweek decreased the number of hours worked per week. The change had an important bearing on leisure time: surveys indicated that workers were more likely to use an additional day off as leisure time than to use extra time per day for that purpose.

The workweek of the Soviet elite was probably longer than that of factory workers. Much of the additional burden came on weekends: in 1971, for example, administrators and members of the intelligentsia worked an average of five hours per weekend day. Farmers worked longer hours than all but administrators and the highest officials. An attempt to distribute farm work more evenly throughout the year only resulted in increased work in the winter.

Housework has restricted leisure time almost as much as has work outside the home. Many basic domestic tasks have been and still are time-consuming. In a 1966 Kiev study, for example, 38 percent of the households surveyed spent 2 to 2.5 hours, and 40 percent spent 1 to 1.5 hours, per day shopping for food. Women have borne most of the burden of housework, which has been almost a second job for them. Decreasing the time devoted to housework was long an aim of the Soviet regime, at least in theory. The reality, however, was that the large amount of time spent on housework barely changed. Not only were Soviet planners unable or unwilling to provide enough appliances and services to make household tasks easier, but social attitudes diminished the effect of the few improvements that were made. Custom as much as practical need dictated the amount of housework done: as more non-working time has become available, women have often begun to do more housework. The social pressure on women to spend much of their time in housework has not been challenged by a more equitable involvement of men in household tasks. The share of housework done by men is unaffected by class or education, and increasing that share was overlooked by Party ideologists as a way of decreasing women's share. Instead a theoretical emphasis was placed on the socialization and mechanization of housework.

On the whole, the empirical data on the relationship between the type of work done and the nature of leisure was in accord with the official Soviet view that more challenging jobs ought to predispose workers to more challenging types of leisure. Managers, academics, and skilled workers spent more of their leisure time actively (in sociopolitical participation, study, and amateur creativity), whereas unskilled workers devoted more of their leisure time to entertainment (watching television, reading, going to the theater or cinema). In a 1973 study, however, a significant minority of unskilled workers seemed to compensate for the unchallenging nature of their work by devoting as much leisure time to active pursuits as did managers, researchers, and skilled workers. Women devoted a greater proportion of their total free time to active forms of leisure, but their actual participation was smaller.

Overall, the use of leisure time in Soviet Ukraine was characterized by (1) a large though decreasing amount of time spent reading, from 1.26 hours per day for male workers and 0.32 hour for female workers in 1923–4 to 0.45 and 0.3 hour respectively in 1978, and from 1.28 hours in all forms of study for male collective farmers and 0.67 hour for female collective farmers in 1934 to 0.68 and 0.20 hour respectively in 1964; (2) an increase in radio listening and television viewing, from 1.08 hours for male workers and 0.61 hour for female workers in 1967–8 to 1.76 and 1.3 hours respectively in 1978; (3) a significant amount of time spent on social visits, with an increase from 0.65 hour for male workers and 0.5 hour for female workers in 1923–4 to 0.93 and 0.64 hour respectively in 1978; and (4) a decline in previously high sociopolitical participation and time devoted to adult education. The apparent preference for recreational and cultural leisure activities bore out the findings of a 1967 survey, in which 75 percent of the respondents said they gave priority to recreational and cultural forms of leisure. The decline in adult education and sociopolitical participation can be attributed in part to historical and demographic changes: adults whose education had been inadequate because of the exigencies of revolution or war had all completed remedial adult classes by the time of the study. Sociopolitical work, moreover, was less prominent in postwar Soviet society than it had been in the revolutionary 1920s.

Aleksandr Leites

Leites, Aleksandr [Lejtes] (Oleksander), b 15 December 1899 in Brest-Litovsk, d ? Literary critic and scholar. In the 1920s he lived in Kharkiv, where he belonged to the writers' groups *Hart, *Vaplite, and *Prolitfront and published theoretical and critical brochures and articles about Soviet Ukrainian, Russian, and Western European literature and writers. He also wrote *Syluety Zakhodu* (Silhouettes of the West, 1928) and compiled, with M. *Yashek,

Desiat' rokiiv ukrains'koi literatury (1917–1927) (Ten Years of Ukrainian Literature [1917–27], 2 vols, 1928), an important biobibliographic and documentary source. During the terror of the 1930s he moved to Moscow; there he continued writing, but, for political reasons, not on Ukrainian literature.

Leksykohrafichnyi biuleten' (Lexicographic Bulletin). An annual compendium of lexicographic studies published in the years 1951–5, 1958, 1960–1, and 1963 (nine issues) by the AN URSR Institute of Linguistics. Its chief editors were I. Kyrychenko (1951–5) and V. Ilin (1958–63). Published in it were articles dealing with the history and prospects of Ukrainian lexicography, and the theoretical, ideological, methodological, terminological, and practical aspects of new dictionaries and the lexicons of certain Ukrainian dialects and writers (M. Kotsiubynsky, T. Shevchenko), as well as reviews of dictionaries by over 40 Soviet Ukrainian linguists and lexicographers.

Leluk, Nicholas [Leljuk], b 23 February 1935 in Hillcrest, Alberta. Pharmacist and politician of Ukrainian descent. Educated at the universities of Toronto and Wisconsin, Leluk was executive assistant to the registrar of the Ontario College of Pharmacy (1961–9) and executive director of the Council on Drug Abuse (1969–71) before his election to the Ontario legislature in 1971 as a Progressive Conservative member for York West. He served as minister of correctional services (1981–5) and minister of citizenship and culture (May–June 1985).

Lemish, Yurii. See Kuk, Vasyl.

Lemkivshchyna (Lemko Land). A quarterly organ of the World Federation of Lemkos, published in New York City since 1979. The successor to **Lemkivs'ki visti*, it contains news, articles on the history and culture of the Lemko region, memoirs, belles lettres, and historical documents; it devotes considerable attention to the plight of the Ukrainian Catholic church in the Lemko region, Polish injustices against the Lemkos, and official efforts to Polishize the Lemkos. It also reports on Lemko activities in North America. *Lemkivshchyna* has been edited by O. Pytliar and then by an editorial board.

Lemkivshchyna Museum (Muzei Lemkivshchyna). A Lemko regional museum established in Sianik in 1930. Housed in the residence of the Ukrainian Catholic priest, the museum contained approx 650 books, 3,000 documents, 450 coins, 300 samples of embroidery, 200 Easter eggs, and 170 icons. In the 1930s members of the museum society surveyed over 100 villages in the Lemko region and published three volumes of materials and articles. The museum's founder and director was L. *Gets. During the German occupation (1939–44) the museum was merged with the Polish Museum of the Sianik Land, and after the war its holdings were transferred to the local Polish museum.

Lemkivs'ki visti (Lemko News). A monthly paper published from 1964 to 1975 in Yonkers, New York, by the Organization for the Defense of Lemkivshchyna, and from 1975 to 1979 in Toronto by the Federation of Lemkos in Canada. It succeeded *Holos Lemkivshchyny*, published from 1958 to 1964 in Yonkers and edited by S. Zhenetsky.

Lemkiv'ski visti

From 1975 it was the organ of the World Federation of Lemkos. The paper was edited by Yu. Tarnovych (1964–70), I. Eliiashevsky (1970–4), and then an editorial board. It devoted considerable attention to the plight of the Lemkos under Polish rule and their persecution and forced resettlement after the Second World War. It published news, memoirs, belles lettres, historical documents, and articles on the culture and history of the Lemkos, some of which were written in the Lemko dialect. *Lemkiv'ski visti* also contained reports on Lemko activities in North America. In early 1979 it was succeeded by **Lemkivshchyna*.

Lemko Apostolic Administration (Lemkivska apostolska administratura). A Greek Catholic church administrative unit in the *Lemko region of Galicia. It was founded by the Vatican's Congregation for Eastern Churches in 1934, under pressure from the Polish government, to prevent the Ukrainianization of the Lemko region. Consisting of 9 chapters and 121 parishes detached from Peremyshl eparchy, the administration was under the direct authority of the congregation in Rome. Its seat at first was the township of Rymanów, and then Sianik. The administrators, appointed by the Vatican, were Revs V. Mastsiukh (1934–6), Ya. Medvetsky (1936–40), and O. *Malynovsky (1940–6). Until 1940 a pro-Polish, anti-Ukrainian spirit dominated in the administration, which accepted the premise that the *Lemkos were distinct from Ukrainians. Theology students from the region were obliged to study in Polish Roman Catholic seminaries in Cracow and Tarnów. The Lemko Apostolic Administration ceased to exist in 1946, when most Ukrainians were deported from the Lemko region.

Lemko Association (Lemko-Soiuz). A social fraternal society established in Cleveland, Ohio, in 1929 as Lemko-Soiuz which assumed its present name in 1931. The association was formed by Lemkos in the United States (with some Canadians) who were not satisfied with the existing Ukrainian, Galician Russophile, or Carpatho-Rusyn fraternal societies in North America. The association assumed publication of the Lemko-dialect newspaper *Lemko* (1930–8) and brought out its own publication, *Karpats'ka*

Rus' (1938–). Throughout the 1930s the group expanded the number of its branches, and in 1938 it moved its headquarters to Yonkers, New York. In 1959 the association established a summer resort in Monroe, New York, where the organizational headquarters were again relocated. Initially dominated by Russophiles, the group had strong pro-Soviet sympathies. More recently its members have come out in favor of a separate Carpatho-Rusyn identity. The organization has also launched English-language publications in an effort to appeal to an American-born membership.

Lemko Company of the Ukrainian Insurgent Army (Lemkivska sotnia UPA). A military unit organized in October 1945 in Lisko county, Lemko region. Composed mostly of local peasants with no military training, it was assigned to Capt V. Mizerny's (nom de guerre: Ren) battalion and given the code names 95a and Udarnyk 5. Its zone of operations was the 26th Tactical Sector of the UPA. Under Lt S. *Stebelsky's (Khrin's) command, the company expanded quickly, and by the spring of 1946 it had six platoons and approx 260 men. In April 1946 two of the platoons were detached to form the company Udarnyk 8. The Lemko Company became widely known as an active fighting force. In the first 18 months it fought more than 100 engagements with Polish army or police units. The most famous of them was its successful ambush on 28 March 1947 of Gen K. Swierczewski, Poland's deputy defense minister. In April–June 1947 the company suffered severe losses in almost continuous combat with Polish units, which were conducting *Operation Wisła, and on 29 June it was forced to retreat into the USSR. After several weeks of skirmishes with NKVD border guards, it was strengthened with soldiers from the demobilized Udarnyk 8 and reorganized into two platoons. On 15 August 1947 it was placed under Lt Stakh's command and sent into western Drohobych oblast. On 10 September 1948 it was demobilized, and its soldiers were assigned to the armed underground.

P. Sodol

Lemko dialects. Dialects spoken by the *Lemkos. They belong to the group of Ukrainian *southwestern dialects and are related to the *Sian, *Boiko, and Middle-*Transcarpathian dialects. Situated on the western edge of Ukrainian ethnic territory and wedged in between Polish and Slovak dialects, the Lemko dialects (LD) have developed some striking peculiarities not found in other Ukrainian dialects.

As a result of Slovak expansion into the Prešov region, a belt of transitional, mixed Ukrainian-Slovak dialects emerged. Polish expansion to the southeast resulted in a mixed dialect which was transitional to the Sian dialect and became limited to an island of 10 villages south of Rzeszów (see **Zamishantsi*). According to Polish Slavists, such as Z. Stieber, the Lemko dialectal wedge in the Carpathian Mountains between the eastern Slovak and Polish dialects was the result of 14th- and 15th-century Ukrainian colonization (from the Sian region, according to I. Pankevych) of the highland that constituted a sparsely settled bridge between the Little Polish and Prešov (originally transitional Polish-Slovak) dialects. Czech and Slovak Slavists, such as F. Tichý and J. Vira, believed that the southwestern Lemko region was originally a sparsely settled Slovak highland that became Ukrainianized. Ukraini-

an scholars (V. Hnatiuk, S. Tomashivsky, I. Verkhratsky, Y. Shemlei) held that the LD, except the westernmost ones, are autochthonous. The eastern boundary of the LD runs along the watershed of the Liaborets, Oslava, and Sian rivers. Their southeasterly expansion gave rise between the Laborets and Tsirokha rivers to a belt of dialects transitional to the Middle-Transcarpathian dialects.

The LD have many distinguishing features: (1) *i* from *ō* (eg, *nis* 'nose', but in the west *nyis*); relatively frequent *'u*, *ju* from *ē* (eg, *n'us* 'carried' from *nestýj* 'to carry', *pjuk* [Standard Ukrainian (SU) *pik*] 'he baked'); (2) preservation of (a) the distinction between Proto-Slavic *u*₁ - *i* in the form *ы* - *у* (eg, *syn* - *sýn* 'yj' [SU *syn* - *sýnij*] 'son - blue') and (b) the old groups *кы, бы, хы, гы* (eg, *múxy, nóhy, rúky* [SU *múkhy, nóhy, rúky*] 'flies, legs, hands'); (3) *dž* in place of the Proto-Slavic *d + ĭ* (eg, *médža* [SU *mežá*] 'border'); (4) a stable stress on the penultimate syllable of a word (eg, *moŭóko, rúka* [SU *molokó, ruká*] 'milk, hand'); (5) the combinations *-ыр-, -ыл-, (-ый-)* in place of the Proto-Slavic *-rv-, -rv-, -lv-, -lv-* between consonants (eg, *hыrmítý, сыйза* [SU *hrymítý, sl'ozá*] 'to thunder, tear'); (6) hardness of final softened dentals (eg, *óhen, hist* [SU *vohón', hist'*] 'fire, guest'); (7) preservation of *-l* in eastern LD in such forms as *byl* [SU *buw*] 'he was' (in the central and western LD every hard *l* at the end of syllables and before back vowels is pronounced *ŭ* as in Polish [eg, *moŭóko* 'milk']); (8) dorsal pronunciation of the softened dentals *s', z', c', dz'*; (9) change of the preposition-prefix *v* + vowel or voiced consonant into *h* (eg, *h zými, hmérty* [SU *v zymí, vmérty*] 'in winter, to die') and of *v* + voiceless consonant into *x* (eg, *xpástý* [SU *vpástý*] 'to fall'); (10) absence of prothetic consonants (eg, *óna, ápko* [SU *voná, jábluko*] 'she, apple'); (11) the ending *-om* in the instrumental singular of feminine nouns (eg, *tom dóbrom rúkom* [SU *tijéju dóbroju rukóju*] 'with that good hand'); *-oj* in the genitive singular of feminine adjectives (eg, *dóbroj* [SU *dóbroi*] 'good'); and *-ы* in the nominative plural of adjectives (eg, *dóbrы l'úde* [SU *dóbrі ljúdy*] 'good people'); (12) the influence of hard endings on the soft declension (eg, *kovál'óvy, kovál'om, z n'om* [SU *kovalévi, kovalém, z néju*] 'smith' dat sing, instr sing, 'with her'); (13) archaic endings in the plural of masculine nouns: (a) nominative *-y, -e, -ove* (eg, *s'pivácy, vol'áre, voŭóve* [SU *spiváký, voljart', volý*] 'singers, ox herders, oxen'); (b) dative *-im* (eg, *vól'im* [SU *volám*] 'oxen'); (c) locative *'ix, -ox* (eg, *na vól'ix, na l'úd'ox* [SU *na voláx, na ljúdjax*] 'on oxen, on people'); (14) verbal personal endings in the present of the type *trymam, -aš, -at, -áme, -áte, -ájut* (*-áut', -ávut*) (SU *trymáju, -ješ, -je, -jemo, -jete, -jut'*) 'hold'; the imperative forms *ber, bérme, bérte* (SU *berý, berím, berít'*) 'take'; the conditional forms *xódyŭ bym, -bys, -by, xodyly byzme, -byste, -by* (SU *xodýv by, xodyly b*) 'would have gone'; past tense endings *xódyŭ jem, -jes, xodyly (je)zme, -(je)ste* (SU *xodýv, xodyly*) 'went'; (15) adverbial forms in *-i* (eg, *úádn'i* [cf Polish *ładnie*] 'nicely'); (16) lexical peculiarities (eg, *štýrdés'at, хыжа, выhl'ad* [SU *sórok, xáta, vĭknó*] 'forty, cottage, window'), including Polonisms, Slovakisms, and Hungarian loanwords.

Certain peculiarities of the LD can be found in 16th- to 18th-century literary monuments. The most extensive studies of the LD have been done by I. Verkhratsky, I. Pankevych, and Z. Stieber, the author of a linguistic atlas of the ancient Lemko region (8 parts, 1956-64) and *Dialekt Łemków: Fonetyka i fonologia* (The Lemko Dialect: Phonetics and Phonology, 1982). The LD have been studied also by Y. Shemlei, V. Hnatiuk, I. Zilynsky, and Y. Dzendzelivsky.

O. Horbach

Lemko region (Lemkivshchyna). The territory traditionally inhabited by the *Lemkos forms an ethnographic peninsula 140 km long and 25-50 km wide within Polish and Slovak territory. After the deportation of Lemkos from the northern part in 1946, only the southern part, southwest of the Carpathian Mountains, known as the *Prešov region in Czechoslovakia, has remained inhabited by Lemkos.

The Lemko region occupies the lowest part of the Ukrainian Carpathian Mountains - most of the *Low Beskyd, the western part of the *Middle Beskyd, and the eastern fringe of the *Western Beskyd. The landscape is typical of medium-height-mountain terrain, with ridges reaching 1,000 m and sometimes 1,300 m. Only small parts of southern Low Beskyd and the northern Sian region have a low-mountain landscape. A series of mountain passes along the Torysa and Poprad rivers - Tylych (688 m), Duklia (502 m), and Lupkiw (657 m) - facilitate communications between Galician and Transcarpathian Lemkos.

The northern border with the Poles runs along the first mountain ridges, which closed off the Ukrainian ethnic territory from the low foothills populated densely by the Poles (south of the Ptaszkowa-Szymbark-Cieklin-Zmińgród-Dukla-Rymanów line). Toward the east the Ukrainian-Polish border descends from the highlands and runs across the foothills and the Sianik Depression, which is an ethnically mixed zone. The southern, Slovak limit of the Lemko region has many ethnic islands and peninsulas: the Slovaks expanded far north along the wide valleys of the Torysa, Toplia, Ondava, and Laborets rivers, whereas the Lemkos generally inhabited the mountains. The eastern border with other Ukrainian ethnic groups consists of a wide Lemko-Boiko transitional belt from the Oslava to the Solynka River.

Until 1946 the Galician Lemko region comprised the southern part of Nowy Sącz, Gorlice, Jasło, Krosno, and Sianik counties, the southwestern part of Lisko county, and four villages of Nowy Targ county. Altogether the area covered nearly 3,500 sq km and had a population of 200,000, of which 160,000 (1939) were Ukrainians inhabiting about 300 villages. North of the homogeneous Lemko region lie one large and a few small islands of **zamishantsi*, whose dialect is close to the Lemko dialect. The Transcarpathian Lemko region occupies most of the Prešov region - about 3,000 sq km with a population of 110,000 and a series of ethnic islands. The number of Lemkos in Galicia in 1939 was estimated at (depending on whether or not the transitional groups were included) 140,000 to 200,000, and in the Prešov region, 100,000 to 140,000. The Lemko region is extended sometimes - mistakenly - to the Dynów and the entire Lisko region.

History. The southern Lemko region belonged to Kiev's sphere of influence from the mid-10th century to the 1020s, when it came under the rule of Hungary. The eastern part of the northern Lemko region, extending to the Wisłoka River, belonged to the Kiev, and then the Galician-Volhynian, state. After Casimir III occupied the eastern part of the Lemko region in the 1340s, the entire Lemko region came under the rule of Poland until 1772. The eastern part formed the so-called Sianik land, which was part of Ruthenia voivodeship; the western part was integrated into Cracow voivodeship.

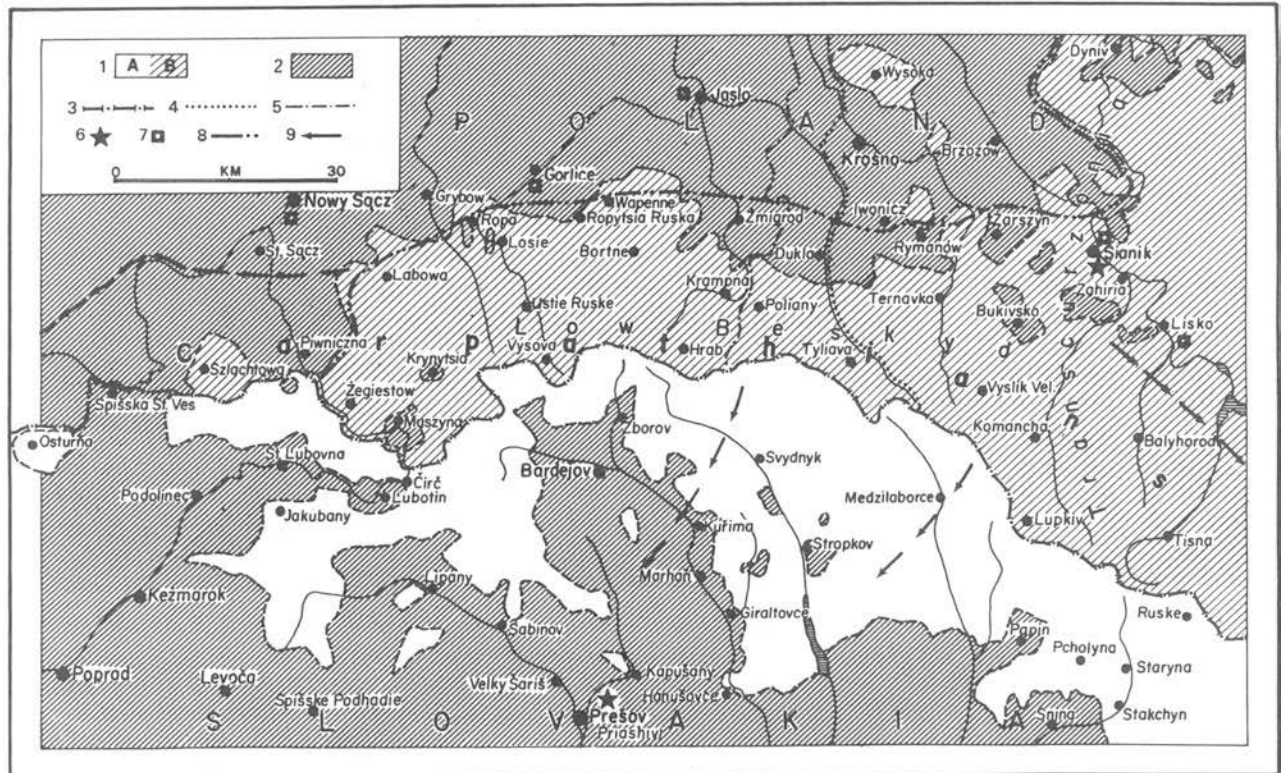

From the mid-14th century three colonization waves penetrated the Lemko region: Slovak-German colonists from the southwest, who settled in Transcarpathia; Ger-

man-Polish colonists from the northwest; and Ukrainians, with Wallachian herdsmen, who settled in the east. The non-Ukrainian colonists occupied the lower, agricultural zone of the foothills and denationalized most of the Ukrainian inhabitants, particularly those between the Wisłoka and Sian rivers. The Ukrainian settlers occupied the sparsely populated wooded Beskyds. Their villages were usually founded on *Wallachian law, and they engaged in animal husbandry. In the western Lemko region, which never belonged to Galicia-Volhynia, the Ukrainian colonists wedged themselves in between the Poles and the Slovaks, although some scholars claim that they overpowered a scanty Polish population that had lived there for a long time. Colonization ended in the 16th century, although some new settlements sprang up in the 17th century. By the end of the 16th century the contemporary *Lemko dialects had been formed (I. Pankevych), and the dialects' boundaries, which with minor changes lasted until 1946, had been established. In spite of political divisions, Galician and Transcarpathian Lemkos maintained close ties: the farmers steadily migrated south, where corvée was less oppressive. The Galician Lemkos took part in the Austrian-Transylvanian struggle in the 17th century and in the Ferenc II Rákóczi uprising at the beginning of the 18th century. The Lemko region was shaken also by

peasant revolts, especially in B. Khmelnytsky's and A. Kostka Napierski's times. The northern Lemko region and, until the 15th century, Transcarpathia belonged to *Peremyshl eparchy. Under Austrian rule (from 1772) the ties between the Lemko region and the rest of Galicia were weak; hence, the Lemko national awakening began only at the end of the 19th century (see *Lemkos).

Population. In 1939 the population density in the Sianik Depression was 110 per sq km, and in the rest of the Galician Lemko region, 55 per sq km. Only 15 percent of the population was urban. The only city was Sianik; the other population centers – Muszyna, Krynytsia, Bukivsko, and Balyhorod – were merely towns. The cities closest to the region – Nowy Sącz, Gręłów, Gorlice, Żmigród, Dukla, and Rymanów – were predominantly Polish and Jewish. Excluding the northern Sianik region, Ukrainians accounted for 82 percent of the population, Poles 13 percent, and Jews 5 percent. In the Sianik region apart from the city, Ukrainians accounted for 60 percent, and in the city, for only 8 percent of the population.

Economy. The basic occupation in the region is farming, which meets only local demand. Before the 1880s ox grazing and sheepherding were important. The animals were bought in the spring in the Boiko and Hutsul regions and then sold in the fall in neighboring towns. After the

LEMKO REGION

1. The territory of *Lemkivshchyna* (including isolated areas) in 1939, spreading over: A, Slovakia; B, Poland (Ukrainians were deported from this territory in 1945–7)
2. The territory inhabited by Poles and Slovaks
3. Polish-Czechoslovak border
4. Boundary of Halych principality (Galicia)
5. Boundary (western) of Lviv voivodeship
6. Episcopates for the Ukrainian population, liquidated by the Polish (1945) and Czech (1950) governments
7. Centers from which Ukrainian inhabitants were deported to the USSR
8. Northern boundary of UPA operations on Polish territory
9. The direction of the UPA expeditions into Western Europe

*servitudes were abolished and grazing in the forests was restricted, animal husbandry declined, and dairy farming and crop growing (oats, potatoes, flax, and, in the northern Sianik region, rye and wheat) expanded. Secondary occupations included lumbering; handicrafts and cottage industries, such as weaving; woodworking; quarrying; and selling grease. Until 1914 seasonal labor in Hungary during harvesting and temporary work in North America were important sources of revenue. The Lemkos also found work and markets for their dairy products, berries, and mushrooms at spas and health resorts in Shchavnytsia, Krynytsia, Zhegestiv, Vysova, Iwonicz, and Rymaków.

Culture. The Lemko region produced many Ukrainian activists and intellectuals, few of whom could find employment there. Most of them were descendants of old clerical families. Many religious leaders, including Y. Sembratovych, S. Sembratovych, T. Poliansky, Yu. Pelesh, and Y. Kotsylovsky, and some scholars, such as Rev Y. Delkevych and Rev T. Myshkovsky, came from the region. Authors of Lemko origin who wrote about the region include Rev V. Khyliak, B. Antonovych, I. Fylypchak, Yu. Tarnovych, H. Hanuliak, and I. Rusenko. The composer M. Verbytsky and the singers M. Menzinsky and the Baiko sisters are of Lemko descent. Contemporary artists whose Lemko heritage is reflected in their work are M. Chershnovsky, V. and I. Odrekhivsky, H. Petsukh, and Nykyfor.

Research work on the Lemko region reached a high point in the 1920s and 1930. It focused mostly on the Lemko dialects (I. Verkhratsky, I. Zilynsky, I. Pankevych, Y. Shemlei, and Z. Stieber) and ethnography (V. Hnatiuk, F. Kolessa, I. Falkivsky, and R. Reinfuss). There are only a few works on the history of the Lemko region (M. Korduba, M. Andrusiak) and several works in contemporary history (I. Fylypchak, Yu. Tarnovych, F. Kokovsky, and V. Buchatsky). Current information about the region can be found in the Lemko press – *Lemkivs'ke slovo* (Warsaw) and *Lemkivshchyna* (New York).

V. Kubijovyč

Lemkos (*lemky*). A Ukrainian ethnic group which until 1946 lived in the most western part of Ukraine on both sides of the Carpathian Mountains and along the Polish-Slovak border (see *Lemko region).

The name seems to be derived from the frequent use of the word *lem* 'only' by the Lemkos. They usually call themselves *rusnak* or *rusyn* (Ruthenian). Scholars and the intelligentsia began to use the name Lemko for the western groups of Ukrainian highlanders in the mid-19th century, and by the end of the century some Lemkos had accepted the name. It is not used widely in the *Prešov region.

The intrinsic conservatism of the Lemkos preserved them from Polonization but at the same time impeded the rise of Ukrainian national consciousness. The Old Ruthenian cultural mainstream, led mostly by local priests, turned in a Russophile direction in the 1900s and received support from the Russian tsarist government. The Russophiles stressed education in the Russian spirit and established boarding schools for young Lemkos in Nowy Sącz, Sianik, and Gorlice. The Ukrainian national movement gained strength among the Lemkos only toward the end of the 19th century and was centered in Nowy Sącz and Sianik. Its leading activists were P. Linynsky, V. Yavorsky, M. Kubiiiovych, Rev O. Hadzevych, and Rev M. Dorotsky in Nowy Sącz, and Rev O. Konstanynovych, O. Gudzo, V. Buchatsky, V. Konstanynovych, and Y. Lukashevych in Sianik. A struggle arose between the Ukrainian and the Russophile tendencies. Some indication of their relative strength can be found in the fact that by 1912 there were 22 Prosvita reading rooms and 109 branches of the Russophile Kachkovsky Society in the Lemko region. At the same time there were 185 Ukrainian and 32 Polish schools in the region; 170 villages had no schools.

During the First World War the region was the site of several battles (1914–15) and sustained some damage. The Austrian authorities took repressive measures against the Ukrainians, in particular the Lemko Russophiles. The struggle for Ukrainian statehood promoted the growth of Ukrainian consciousness among the Lemkos. After the demise of the Austro-Hungarian Empire, the Sianik Commissariat of the Western Ukrainian National Republic (ZUNR), headed by Rev P. Shpylka, remained active until mid-February 1919 and became known as the Komancha Republic. At the same time the Russophile group in the western Lemko region proclaimed the so-called Lemko Republic and used its official paper, *Rus'ka rada*, to agitate for the annexation of the Lemko region by Czechoslovakia.

In the 1920s the Ukrainian movement, supported by young priests and school teachers, began to predominate. Its principal center was Sianik, and its leading figures were Rev I. Kachmar, V. Blavatsky, S. Vanchytsky, and F. Kokovsky. At this time some Lemkos, mostly in the central region, converted to Orthodoxy, which was hostile to the Ukrainian movement. By 1935, of the 145,000 Lemkos in the territory of the Lemko Apostolic Administration, 18,000 were Orthodox. The Polish government attempted to halt the further development of the Ukrainian movement. It supported the Russophiles in order to keep the Lemkos divided and then tried to turn the Lemkos into a Polish ethnic group. The project was carried out under the auspices of the Polish Ministry of War and the Bureau of Nationality Policy under the Presidium of the Council of Ministers. The bureau's Research Commission for the Eastern Lands, reorganized into a special Lemko section in 1934, was to provide a 'scientific' justification for the project. In 1934 the Lemko region was separated from the Peremyshl eparchy and formed into a separate *Lemko Apostolic Administration with a Russophile hierarchy. Ukrainian teachers were replaced by Poles. The Lemko dialects and a special Lemko primer were introduced in the schools, and Polish patriotism was stressed. In 1938 the schools became bilingual. The authorities supported the anti-Ukrainian organization Lemko-Soiuz and the Polonophile weekly *Lemko* (1934–9). In the western Lemko region the links between the Ukrainian co-operatives and

their central organization in Lviv, the Audit Union of Ukrainian Co-operatives, were severed, and nearly all the Prosvita reading rooms were closed down. The law on border zones was used as a pretext for deporting nationally conscious Ukrainians from the Lemko region, and Ukrainian organizations were placed under police surveillance. To counteract the Polish policy the Prosvita society in Lviv set up the Lemko Commission. Its task was to promote Ukrainian culture and education in the Lemko region and to disseminate information about the Lemkos among the Ukrainian public. The semimonthly **Nash Lemko* (1934-9) and book series *Biblioteka Lemkivshchyny* (Library of the Lemko Region) served the same purpose. The **Lemkivshchyna* Museum was set up in Sianik in 1930. In the United States the **Organization for the Defense of Lemkivshchyna* was established to support the Ukrainian movement in the Lemko region.

Under the German occupation (from September 1939) the Ukrainian cultural-educational movement developed rapidly despite difficulties. A number of Ukrainian secondary vocational schools in Sianik and Krynytsia, a teachers' seminary in Krynytsia, the Ukrainian educational societies (UOT), and Ukrainian co-operatives were set up. The activists were local Lemkos and Ukrainian refugees from Soviet-occupied Galicia. With the nomination of Rev O. **Malynovsky* to the post of apostolic administra-

Peasants in the Lemko village of Polonna

Scene from a Lemko wedding

tor and the creation of a separate Lemko Orthodox eparchy under Archbishop P. **Vydybida-Rudenko*, the Russophile influence in religious life was overcome. The Ukrainian Central Committee and its branches – the Ukrainian relief committees in Sianik (under P. Bilaniuk), Krynytsia (under O. Navrotsky), and Jasło (under H. Nychka) – oversaw the social and cultural work in the region.

The Soviets occupied the eastern part of the Lemko region in the summer of 1944 and the western part in early 1945. Taking advantage of the war situation the Polish underground assassinated prominent Lemkos and, in the mixed Lemko-Polish areas, even slaughtered Lemkos in mixed villages. Some 4,000 Lemkos had been resettled in the Ukrainian SSR in 1940 under the Soviet-German treaty on voluntary population exchange. The resettlement of Lemkos was resumed under the Polish-Soviet agreement of 16 August 1945, which also determined the Polish-Soviet border and finally surrendered the entire northern Lemko region to Poland. The operation was hindered by the **Ukrainian Insurgent Army*, which was active in the eastern Lemko region from 1944. Under Polish pressure most Lemkos (up to 80 percent) had been moved to Ukraine by mid-1946, and the remainder, with few exceptions, were resettled in 1947 among Poles on former German lands which now belonged to Poland (see **Operation Wisła*). The depopulated Lemko region was settled partly by Poles, but most of it remained unsettled.

Until 1956 the Lemkos as well as all the other Ukrainians in Poland had no national rights (see *Poland). Ukrainian cultural and educational activity centered around the *Ukrainian Social and Cultural Society. In 1957 the supplement *Lemkiv's'ke slovo* was added to the society's weekly *Nashe slovo*, and in 1959 a separate section for the development of Lemko culture was established within the society. Only a few Lemkos have been allowed to return to their homeland – by 1957–8 only some 4,000 of the 30,000 to 40,000 Lemkos in Poland. They are dispersed in the Gorlice and Sianik regions and form a majority in only a few villages. The return movement has been halted, although large areas of the Lemko region are uninhabited; in Lisko county, for example, the population density is 25 per sq km, whereas in 1939 it was 70 per sq km. Schools in which Ukrainian is taught are the exception in the Lemko region. Until recently Lemkos did not have their own priests; they often were, and still are, subject to greater discrimination than before the Second World War.

The Lemkos who moved to Ukraine were settled mainly in former Polish villages in the Ternopil, Sambir, and Lviv regions. Some live in the Donbas. In Ukraine, as in Poland, they have tried to preserve their own folklore, especially their songs and dances. But the younger generation is losing its distinctive traits. Some Ukrainian monuments have been preserved in the Polish museums in Sianik, Nowy Sącz, Rzeszów, and Peremyshl as well as in Lviv. Most of them, however, have been destroyed, or,

Young Lemkos in the village of Repid

lacking government protection, continue to deteriorate. Representatives of Solidarnosc have criticized the Polish authorities for resettling the Lemkos, but most Poles consider the Lemkos to be part of the Polish, not the Ukrainian, nation.

The Lemkos are a distinct ethnic group within the Ukrainian nation. Their dialects and spiritual and material culture preserved some unique archaic elements that were lost by other Ukrainian ethnic groups. They also absorbed some Slovak and Polish influences, especially linguistic ones (see *Lemko dialects). More than any other Ukrainian ethnic group the Lemkos are attached to their homeland, traditions, and church and are impervious to external influence. They are more united than other groups, even when they are outside their native land. The Lemkos form several distinct subgroups. The western Lemkos (roughly from the Duklia Pass in the east) have more archaic characteristics than the eastern Lemkos, who have some features in common with other Ukrainian groups, such as the Boikos.

The Lemkos' material culture is considerably poorer than that of the Hutsuls. Their culture is more utilitarian. Their homesteads are built of wood and usually consist of a single building, with the corridor separating the living quarters from the stable. The sloping bilateral roof is covered with shingles in the western and with straw in the eastern Lemko region. Church architecture is similar to that of the Boikos, except that Lemko churches are topped with external baroque domes and high belfries over the vestibules. Lemko dress is similar to that of the Boikos but is more attractive because of a finer selection of cloth, colors, and embroidery. Lemko women wear a fancy necklace (*sylianka*) made of colorful beads. The distinctive men's overcoat (*shuba*) is made of homemade felt. The Lemkos are known for their wood carving, which is highly developed in resort areas and around Sianik. Lemko folklore is particularly rich in songs. Most of them, especially the wedding and humorous songs, were composed by the Lemkos, but some are variants of widely known Ukrainian songs. Slovak folklore had a considerable influence on the Lemkos. Lemko melodies have a remarkable variety of forms, a rich ornamentation, and a wide rhythmic range.

Lemkos in North America. In the 1870s Lemkos from the Prešov region were the first Ukrainian immigrants in the United States. Up to the end of the 19th century the majority of Ukrainian immigrants in the country were Lemkos. They were the founders of the first Ukrainian organizations. Because of the large influx of Lemko immigrants up to the 1930s, some 100,000 to 150,000 Americans and Canadians today are of Lemko origin. Their largest concentrations are in Pennsylvania and around Cleveland. The Lemkos in North America are divided into three large camps: the Ruthenian, Ukrainian, and Russophile. The first consists mostly of Lemkos from the Prešov region. The Greek Catholic Lemkos from Transcarpathia (with a few from Galicia) belong to *Pittsburgh metropolis; those from Galicia belong to Ukrainian Catholic eparchies. Orthodox Lemkos belong mostly to the Orthodox Church of America and the Carpatho-Ruthenian Greek-Catholic Orthodox Church of America as well as the Ukrainian Orthodox church. Most Lemkos belong to Ruthenian or Russophile, and fewer to the Ukrainian, mutual aid insurance societies. The *Lemko Association (est 1929) is a relief organization of conservative Russophile

Lemkos; the Organization for the Defence of Lemkivshchyna (est 1936) is a Ukrainian patriotic association. The Ukrainophile Lemko press has included the monthly *Lemkivs'kyi dzvin* (Philadelphia and Passaic, NJ, 1936–9), edited by M. Dudra; *Lemkivshchyna* (Toronto, 1949–52), edited by Yu. Tarnovych; *Holos Lemkivshchyny* (Yonkers, NY, 1963–), edited by S. Zhenetsky; **Lemkivs'ki visti* (Yonkers, 1958–75 and Toronto, 1975–9), edited by S. Zhenetsky and then Yu. Tarnovych; **Lemkivshchyna* (New York, 1979–), edited by U. Liubovych, O. Pytliar, and then M. Dupliak; and *Lemkovyna* (Yonkers, 1971–81), edited by S. Kychura. The Russophiles founded *Lemko* (1928–36) and *Karpatska Rus'* (1939–), both organs of the Lemko Association.

Lemko-Soiuz. See Lemko Association.

Lemkovyna. Ukrainian amateur song and dance ensemble in Poland. It was formed in 1969 by R. Sobolevsky and F. Hoch out of local Lemko choirs and dance groups of the *Lemko region. From the beginning its conductor has been Ya. Trokhanovsky. Its repertoire consists mostly of Lemko folk songs arranged for four voices by R. Sobolevsky and Ya. Trokhanovsky, but it also includes some original works by the conductor and Ya. Poliansky (words by P. Stefanivsky and P. Trokhanovsky), and by noted Ukrainian composers, such as S. Liudkevych and A. Kos-Anatolsky. Its leading soloists are M. Steranka, V. Dudra, P. Karel, O. Haitko, M. Vorobets, and N. Hrbal. The dance group is accompanied by a folk instrument orchestra. The ensemble has performed in Cracow, Warsaw, and Wrocław in Poland and Lviv, Ternopil, Boryslav, and Ivano-Frankivske in Ukraine. It toured Canada and the United States in 1987.

Lemyk, Mykola, b 4 April 1914 in Solova, Peremyshliany county, Galicia, d October 1941 in Myrhorod, Poltava oblast. Revolutionary figure. He studied law at Lviv University and joined the youth branch of the OUN in the early 1930s. In protest against the man-made famine in Ukraine Lemyk assassinated O. Mailov, a representative of the Soviet consulate in Lviv, on 21 October 1933. His death sentence was commuted to life imprisonment, and he escaped from a Polish prison convoy after the fall of Poland in September 1939. In 1941 he was one of the leaders

Mykola Lemyk

Wasyl Lencyk

of the OUN expeditionary groups in Eastern Ukraine. He was hanged by the Gestapo.

Lenartowicz, Teofil, b 27 November 1822 in Warsaw, d 3 February 1893 in Florence. Polish poet. He developed an interest in Ukrainian folklore and translated Ukrainian songs into Polish. In his poem 'O Wernyhorze' (On Vernyhora, 1848) he portrayed the haidamaka movement in Ukraine. He befriended the exiled Cossack Zhurba, to whom he dedicated two poems. In his verses on Ukrainian themes – 'Ukraïnska bajda' (Ukrainian Baida), 'Oboz Chmielnickiego' (Khmelnitsky's Camp), 'Złota hramota' (The Golden Charter), and 'Książę na Ostrogu' (Prince of Ostrih) – he called for a united Ukrainian-Polish struggle against the Russian tsarist regime. He wrote one poem ('Krim Geraj,' 1866) in Ukrainian.

Lencyk, Wasyl [Lencyk, Vasyli'], b 17 March 1912 in Mazurivka, Zhydachiv county, Galicia. Historian, pedagogue, and Catholic activist; full member of the Shevchenko Scientific Society since 1961. He studied at the Greek Catholic Theological Academy in Lviv, the Ukrainian Free University in Munich (PHD, 1947), and, after emigrating to the United States in 1949, Fordham University in New York (PHD, 1961). He taught at the Ukrainian Free University (1948–9), St Basil's College in Stamford, Connecticut (1955–88), and Seton Hall University (from 1962), and in 1963 he was appointed a professor of church and world history at the Ukrainian Catholic University in Rome. From 1978 he was general secretary of the Supreme Council of the Shevchenko Scientific Society and a member of its American executive. From 1964 he was director of the *Ukrainian Diocesan Museum in Stamford. He was president of the *Obnova Society of Ukrainian Catholic Students (1954–8) and in 1991 he received the papal medal Pro Ecclesia et Pontifice. He contributed to *Ėntsyklopediia Ukraïnoznavstva* and to *Encyclopedia of Ukraine* (church subject coeditor) and the *New Catholic Encyclopedia* (1979), and he wrote *The Eastern Catholic Church and Czar Nicholas I* (1966).

Lenin, Vladimir (pseud of V. Ulianov), b 22 April 1870 in Simbirsk (now Ulianovsk), Russia, d 21 January 1924 in Gorkii, near Moscow. Russian revolutionary, founder of the Bolshevik party, leader of the Communist revolution, and head of the Soviet state. After being expelled from Kazan University he studied K. Marx and adopted his ideas.

Lenin made important additions to Marxist doctrine in response to the demands of revolutionary practice. These additions form *Leninism, which reveals Lenin's skill as a tactician and his political flexibility. A key contribution was the concept of the revolutionary party, developed first in his *What Is to Be Done?* (1902) and *One Step Forward, Two Steps Back* (1904). Another was the concept of 'democratic centralism.' In *The State and Revolution* (1917) he justified his decision to seize power and to establish the 'dictatorship of the proletariat.' Lenin often reversed himself; he used the State Duma, for example, as a propaganda forum, recognized briefly the Ukrainian National Republic, established the Far Eastern Republic (1920-2) to further Bolshevik foreign policy, and introduced the New Economic Policy (1921) to restore the economy.

Lenin accepted violence and terror as legitimate tools of class war. He created the Soviet security police, the *Cheka. He established the prototype of the totalitarian dictatorship, which tried to remake society and human nature and claimed the right to control all aspects of life. Lenin's ideological teachings and organizational methods paved the way for J. *Stalin's brutal dictatorship.

His initial indifference and even hostility to the nationality issue expressed itself in his rejection of the ethnic criterion in party organization, his opposition to the Jewish Bund, and his commitment to centralism. The class struggle ruled out any national loyalties. He perceived 'national culture' as an instrument of the national bourgeoisie (landowners, priests, and the bourgeoisie). Lenin never visited Ukraine and only slowly acquired some understanding of its peculiar position. By 1912 he had associated Ukraine with Poland and Finland in his criticism of tsarist policies. Although he condemned nationalism, he paid lip service to the right of national self-determination, including independence, assuming all the time that it would not be exercised. He saw ethnic assimilation as 'progressive,' although he acknowledged the right of each people to use its own language and advocated language tolerance. Lenin believed that the right of national self-determination would be transformed dialectically into its opposite, and that 'sometimes greater bonds obtain after free separation.' He denounced Ukrainian socialists, such as D. Dontsov and L. Yurkevych (L. Rybalka), for advocating a separate Ukrainian Social Democratic Workers' party. He replied with abuse when Rybalka pointed out the inconsistency between Lenin's acceptance of national self-determination and his belief in the progressiveness of large states and in their continued existence. Rybalka had argued that the professed internationalism of the Bolsheviks was a veiled form of traditional Russian imperialism: Lenin's talk of the 'fusion of nations' and his desire to prevent the breakup of Russia were incompatible with his promise of national self-determination. Russia's collapse in 1917 compelled Lenin to confront the nationalities question on the practical level. He criticized the Provisional Government for refusing to grant Ukraine autonomy and used Ukrainian grievances to weaken the central government. But upon coming to power he adopted a hostile attitude to Ukrainian independence: he launched an invasion of Ukraine in January 1918. Although he was forced to recognize Ukraine's independence in the Peace Treaty of *Brest-Litovsk, he sent the Red Army into Ukraine again in January 1919 and again in late 1919. To win Ukrainian support for the Bolshevik regime he set up a

nominally autonomous Ukrainian Soviet government and promised to promote the Ukrainian language and culture. After consolidating his control over the peoples of the former Russian Empire, Lenin adopted, out of regard for their national feelings, a federated instead of a unitary form of state, in 1922. He pointed to Russian great-power chauvinism as the cause of nationalism in the smaller nations of the USSR. Some of his tactical opinions on the nationality problem provided the basis for the Soviet policy of *Ukrainization that was introduced in 1923. After 72 years of near idolatry, Lenin is finally being seen for the imperialist and dictator that he really was. Since the end of 1990 open criticism of Lenin and what he stood for has spread through Ukraine and resulted in the dismantling of Lenin monuments in most cities.

Lenin Lake. v-16. An artificial lake near the mouth of the Samara River that connects to the Dnieper water reservoir above the dam of the *Dnieper Hydroelectric Station in Zaporizhia. The lake is 10 km long and up to 3 km wide and has a basin area of 17 sq km.

Lenine. VIII-16. A town smt (1990 pop 8,900) and raion center on the North Crimean Canal in Crimea oblast. It was founded at the end of the 19th century as Sim Kolo-diaziv. In 1957 it was reclassified as an smt and renamed Lenine. It has a winery, a mixed-feed factory, and a panels plant.

Leningrad. See Saint Petersburg.

Leningrad Society of Researchers of Ukrainian History, Literature, and Language (Leninhradske To-varystvo doslidnykiv ukrainskoi istorii, pysmenstva ta movy). The Leningrad branch of the Historical-Philological Society of the All-Ukrainian Academy of Sciences, established in 1922. It published two issues (1928, 1929) of the scholarly publication *Naukovyi zbirnyk*, edited by the director of the society, V. Peretts. Among its 40 members were V. Adriianova-Peretts, I. Abramov, D. Abramovych, O. Barannykov, V. Danyliv, A. Liashchenko, I. Rybakov, and I. Fetisov. The affiliated Ethnographic Commission, also headed by Peretts, studied the socioeconomic and cultural life of Ukrainians outside Ukraine, mainly in the Kuban. Other branches of the Historical-Philological Society existed in Odessa, Vinnytsia, Zhytomyr, and elsewhere. The Leningrad Society was liquidated at the beginning of the 1930s.

Leninism. A strategy of Marxist revolution designed by V. Lenin for the specific needs of tsarist Russia and the political circumstances in Europe in the early 20th century. In view of Russia's backwardness, Leninism can be interpreted more widely as a strategy of building socialism under adverse or 'unripe' conditions. The problem con-

fronting Lenin at the turn of the century was that, several decades after K. Marx's confident predictions about the dissolution of capitalism and nationalism, neither had disappeared. Lenin explained their persistence by pointing out that capitalism had weakened the revolutionary movement by making some concessions to workers and promoting 'trade-union consciousness.' Hence, Lenin proposed, in *What Is to Be Done?* (1902), that Marxists organize themselves around a nucleus of professional revolutionaries who could not be diverted from revolution. Then, in *Imperialism, the Highest Stage of Capitalism* (1917), he argued that because capitalism had avoided collapse by exploiting overseas markets, the strategy of revolution had to be extended to the Third World, which was part of an 'international proletariat.' In the new circumstances, nationalism (or anticolonialism) was a progressive force. Linking 'Great Russian chauvinism' with imperialism, Lenin persuaded the Russian Social Democratic Workers' party to adopt self-determination as official policy. Since he identified oppression with capitalism and class-divided societies, Lenin saw no contradiction in advocating both the 'right of self-determination' and the 'closest unity of the proletariat of all nationalities.' The right of self-determination, he assumed, would be exercised only against the tsarist regime, not against a socialist one. For Lenin, national liberation was an expedient means to socialist revolution, not a goal in itself.

Leninism represented a militant but minority position within the socialist movement. In contrast to the more moderate Mensheviks or Socialist Revolutionaries, Lenin insisted that Russia was on the verge not merely of a bourgeois-democratic revolution but of a proletarian revolution that would usher in socialism. His strategy took into account the widespread unrest in Russia while sidestepping its causes and their relation to Marxist theory. Lenin believed that the Party as the disciplined vanguard of the proletariat could take the place of a mass working-class uprising, and that it would be supported by the rebellious peasantry and nationalities, which had been oppressed under tsarist rule. Once revolution had occurred in Russia, the 'weak link' in the chain of capitalist states, socialism would sweep through the rest of Europe. Although he was wrong about Europe, Lenin succeeded in overthrowing the Provisional Government and consolidating Bolshevik power throughout most of the former Russian Empire.

During the revolutionary period Leninism complicated and radicalized the political choices available to the Ukrainian leaders. Although the political profile of the Central Rada was democratic and moderately socialist, the Rada was temporarily allied with the Bolsheviks, the most militant faction of the Petrograd Soviet, against the Provisional Government, which was hostile to Ukrainian autonomy. Upon taking power Lenin redrew the military and political battle lines. He sent the Red Army to quash the independence movement in Ukraine. Identifying socialism with Bolshevism and branding everyone else 'counterrevolutionary,' he pushed the entire political spectrum leftward and forced the Ukrainian government to adopt a hastily and poorly constructed agrarian reform program, which alienated the wealthier peasants without satisfying the rural majority. The Ukrainian government was faced not only with an armed struggle against the Red Army but also with a political struggle for the support of the Ukrainian peasantry.

With the end of the Civil War Lenin retreated from strictly socialist principles and introduced the 'New Economic Policy' and a 'cultural revolution' to give the new regime a chance to take root.

In Ukraine Leninism was at first seen as an effort to reconcile Bolshevism and nationalism. To appeal to the Ukrainian intelligentsia and peasantry Lenin granted Ukraine a degree of autonomy within the federal Soviet state and laid the foundations for the policy of 'indigenization' and 'Ukrainization.' Basically, Lenin gave legitimacy to the belief, prevalent among leading figures of the CP(B)U during the 1920s, that defending Ukrainian national interests was compatible with the social aims of communism (see 'National communism').

Z. Sochor

Lenins'ka pravda (Leninist Truth). An organ of the Sumy oblast CPU Committee and Soviet of People's Deputies until 1991. It first appeared in 1917 in Russian as *Izvestiia Sum'skogo soveta rabochikh i soldatskikh deputatov*. In the next few years it was called *Kommuna* (1918-19), *Vlast' sovetam* (1919-20), and *Stiah pratsi* (1921-2). It was renamed *Plug i molot/Pluh i molot* in 1922, and from 1924 it appeared only in Ukrainian. The name *Lenins'ka pravda* was adopted in 1952. In 1980 it had a circulation of 123,000 copies and was published five times per week.

Leninske [Lenins'ke]. v-20. A town smt (1990 pop 5,300) in Sverdlovske raion, Luhanske oblast. It was founded as a workers' settlement of mine no. 9 in 1900 and was renamed Leninske in 1944. There are three coal mines and a railway station in the town.

Stepan Lenkavsky

Lenkavsky, Stepan [Lenkavs'kyj], b 6 July 1904 in Zahvizd, Stanyslaviv county, Galicia, d 30 October 1977 in Munich. Revolutionary leader and nationalist ideologist. He became active in clandestine student groups before graduating from secondary school in Stanyslaviv. While studying philosophy in Lviv he joined the Union of Ukrai-

nian Nationalist Youth and became its leading ideologist and, eventually, a member of its executive council. In 1929 he participated in the founding conference of the OUN and assumed the post of ideology officer for the OUN national executive in Western Ukraine. Besides contributing articles to the legal and underground nationalist press he composed the 'Decalogue of the Ukrainian Nationalist-Revolutionary,' the official membership oath of the OUN. He was a member of the Lystopad group of nationalist writers. His political activity led to his imprisonment by the Poles (1932–6). From the very beginning of the internal dissension in the OUN Lenkavsky sided with S. *Bandera. As one of the authors of the *'Proclamation of Ukrainian Statehood' in 1941, he was imprisoned by the Germans for three and a half years, mostly in Auschwitz. After the war he held top posts in the External Units of the OUN, and at Bandera's death he assumed leadership of the organization (1959–68). After voluntarily stepping down as leader he remained as chief of propaganda and editor of the newspaper **Shliakh peremohy*. In the last years of his life he edited a number of books and helped prepare a collection in honor of Ye. Konovalets.

Lenkewich, Ambrose [Lenkevych, Amvrosija], b 18 January 1876 in Western Ukraine, d 13 May 1953 in Komarno, Manitoba. Pioneer Ukrainian Catholic nun. Lenkewich entered the Order of *Sisters Servants of Mary Immaculate in 1895 and emigrated to Canada (settling initially in Mundare, Alberta) in 1902 with the first group of Ukrainian Catholic missionaries. She was the order's provincial superior (1902–26), and a member of its provincial council until 1939.

Lenkivtsi settlement. An early Trypilian settlement discovered near the village of Lenkivtsi in Kelmentsi raion, Chernivtsi oblast, in 1947 and excavated in 1950–3.

Lentsyk, Vasyl. See Lencyk, Wasyl.

Leo XIII (secular name: Vincenzo Giocchino Pecci), b 2 March 1810 in Carpineto Romano, Italy, d 20 July 1903 in Rome. Pope in 1878–1903. During his papacy a number of initiatives were undertaken in relation to Eastern rite Catholics, including the reformation (1882) of the *Basilian monastic order, the creation (1885) of a new eparchy in Stanyslaviv, and the founding (1897) of a Ukrainian seminary in Rome. Leo XIII also endorsed the resolutions of the Lviv Synod of 1891, and proclaimed (1894) the edict *Orientalium dignitas Ecclesiarum*, confirming the principle of territoriality enunciated in 1890 by the Sacred Congregation for the Propagation of the Faith. The edict limited the jurisdiction of Eastern ecclesiastical authorities to their traditional territories, thereby effectively placing immigrant Ukrainian Catholics under the authority of Latin rite hierarchs in North America. This measure led to considerable dissension and was a major factor behind the conversion of thousands of Catholic Ukrainians to Orthodoxy or other denominations. Leo XIII placed three Halych metropolitans in office and made S. *Sembratovych a cardinal (1895). He also ordered the preparation of a plan for a Lviv-based Ukrainian patriarchate that was opposed by the Hungarian Roman Catholic primate because the new body would incorporate Transcarpathian eparchies.

Leonidze, Georgii, b 27 December 1899 in Patardzeuli, Georgia, d 9 August 1966 in Tbilisi. Georgian writer and national poet, and literary scholar. As a poet he is famous for his lyrical works and his epic *Childhood and Youth* (1939). He visited Ukraine and wrote the cycle *In Myrhorod* and other poems about Ukraine. His admiration of T. Shevchenko is expressed in several essays on the Ukrainian poet and in some poems dedicated to him: 'To Taras Shevchenko,' 'Greetings from Georgia,' and 'The Poet-Prometheus.' Leonidze translated works by Shevchenko, I. Franko, Lesia Ukrainka, and P. Tychyna and sections of **Slovo o polku Ihorevi* into Georgian.

Leontovych, Fedir [Leontovyč], b 1833 in Popivka, Konotip county, Chernihiv gubernia, d 1911 in Kislovodsk, Terek oblast, Russia. Law historian. After graduating in law from Kiev University (1860) he lectured there (1860, 1863–5), at Odessa University (1861–3, 1865–91), and at Warsaw University (1892–1911) on the history of Russian law. He was also rector (1869–77) and prorector of the university in Odessa. Specializing in the law of medieval Rus' and the Caucasian peoples, he wrote a number of important works on Lithuanian-Ruthenian law: *Krest'iane iugo-zapadnoi Rossii po litovsko-russkomu pravu XV–XVI vekov* (The Peasants of Southwestern Russia in Lithuanian-Ruthenian Law of the 15th–16th Centuries, 1863), *Russkaia Pravda i Litovskii statut* (Ruskaia Pravda and the Lithuanian Statute, 1864), *Ocherki istorii litovsko-russkogo prava* (Outlines of the History of Lithuanian-Ruthenian Law, 1894), *Rada velikikh kniaziei* (The Council of the Grand Princes, 1907), and *Tsentral'nye sudebnye uchrezhdeniia v Velikom Kniazhestve Litovskom* (The Central Judicial Institutions in the Grand Duchy of Lithuania, 1910). He published over 750 documents, dating from 1413 to 1507, from the Lithuanian Register.

Mykola Leontovych

Leontovych, Mykola [Leontovyč], b 13 December 1877 in Monastyrok, Bratslav county, Podilia gubernia, d 23 January 1921 in Markivka, Haisyn county, Podilia gubernia. Composer, conductor, and teacher. After graduating from the theological seminary in Kamianets-Podilskyi in 1899, he worked as a teacher at various schools in Kiev, Katerynoslav, and Podilia gubernias. He furthered his musical education on an ongoing basis through private study in St Petersburg, where he earned his credentials as a choirmaster of church choruses, and in Kiev, where he studied under B. Yavorsky. In spite of the popularity of

his compositions, Leontovych was modest about his work and remained a generally unrecognized figure until he was brought to Kiev in 1918–19 to teach at the Conservatory and the M. Lysenko Institute of Music and Drama. He died in tragic circumstances several years later, being shot by a robber at his parents' home.

Leontovych's musical heritage consists primarily of more than 150 choral compositions inspired by the texts and melodies of Ukrainian folk songs. His earlier works consist mainly of strophic arrangements of folk songs; in later years he developed a strophic-variational form strongly related to the text. A group of his compositions, including 'Shchedryk' (Epiphany Carol), 'Dudaryk' (The Duda Player), and 'Hra v Zaichyka' (Playing Rabbit), depart from the simple settings of folk songs and constitute his most original and artistic compositions. Leontovych also wrote several religious works (a liturgy, cantatas), and choral compositions to the texts of various poems (including *L'odolom* [Icebreaker] and *Litni tony* [Summer Tones] by H. Chuprynka). The harmony of his choral compositions is rich and innovative, an important role being played by vocal polyphony, including the use of imitation techniques. His unfinished opera *Na rusalchyn velykden* (On the Water Nymph's Easter), based on B. Hrinchenko's fairy tale, was the first attempt at a Ukrainian fantastic opera.

Leontovych's creativity played an important role in the development of Ukrainian choral tradition and influenced composers of succeeding generations. His works were popularized by the *Ukrainian Republican Kapelle and became the basis of the repertoire of many choral groups (O. *Koshyts). They obtained high praise from critics as well as widespread popularity in Ukraine and elsewhere. Particularly well known is his 'Shchedryk,' which is commonly called 'The Carol of the Bells' in English.

Leontovych, Oleksander [Leontovyč], b 11 November 1869 in Kiev, d 15 December 1943 in Moscow. Physiologist and neurohistologist; full member of the VUAN and AN URSR (now ANU) from 1929. He graduated from Kiev University in 1893 and wrote his doctoral thesis on the double innervation of human skin in 1900. He was a teacher at the agriculture department of the Kiev Polytechnical Institute (1898–1912), a professor of animal physiology at the Moscow Agricultural Institute (from 1923), and director of the physiology division at the AN URSR Institute of Clinical Physiology (from 1936). He wrote nearly 80 works on the physiology and histology of the peripheral nervous system, proposed a theory of the neuron as an alternating current transmitter (1928–39), researched the physiological regeneration of the nervous system, and perfected a method of staining nervous tissue. A monograph on him was written by N. Bodrova and B. Kraiukhin (1950).

Leontovych, Pavlo [Leontovyč], b 9 March 1825 in Shchutkiv, Galicia, d 19 May 1880 in Ruda Krekhivska,

Zhovkva county, Galicia. Poet and writer; Ukrainian Catholic priest by vocation. He was one of the publishers of the almanac *Lirvak iz nad Siana* (Lira Player from the Banks of the Sian, 1852), in which some of his poems and stories appeared under the pseudonym Pavlo iz Shchutkova. His articles, stories, fables, and poetry were published in journals, such as *Novyny* and *Vechermytsi*, in the newspaper *Slovo*, and in several literary collections.

Volodymyr Leontovych
(1866–1933)

Leontovych, Volodymyr [Leontovyč] (pseud: V. Levenko), b 5 August 1866 in Orikhovshchyna *khutir*, Lubni county, Poltava gubernia, d 10 December 1933 in Prague. Civic leader and writer. After graduating in law from Moscow University (1888) he managed his father's estates and was active in local zemstvo affairs and in the Ukrainian cultural movement. He was a member of the Hromada of Kiev and the Society of Ukrainian Progressives as well as a contributor to *Zoria*, *Kievskaiia starina*, *Literaturno-naukovyi vistnyk*, and *Hromads'ka dumka*. The daily *Rada* was financed by him. In 1917 Leontovych sat on the Central Rada, and in 1918 he served as minister of agriculture in F. Lyzohub's cabinet of the Hetman government. When the Bolsheviks occupied Ukraine, he emigrated to Berlin and then to Prague. Leontovych wrote novelettes on contemporary life, such as *Khronika rodyny Hrechok* (A Chronicle of the Hrechka Family, 1922), short stories, and memoirs, such as *Spomyny utikacha* (Memoirs of a Refugee, 1922). He collaborated with O. Yefymov on a Russian-Ukrainian legal dictionary (2 edns, 1917, 1919).

Leontovych, Volodymyr [Leontovyč], b 27 July 1881 in Hadiache, Poltava gubernia, d 29 April 1968 in Kiev. Construction engineer and architect. He graduated from the Kiev Polytechnical Institute in 1906, where he studied the architecture of historic buildings in Ukraine, particularly in Volhynia, and conducted the restoration of major architectural monuments in Zhytomyr and the ancient castle in Ostrih. With V. Maksymov and I. Izhakevych he erected the church-monument at the *Kozatski Mohyly Museum and Preserve near Berestechko. Leontovych also taught at engineering schools and wrote papers on the applications of geodesic measurements in civil engineering.

Leontovych Music Society (Muzychne tovarystvo im. M.A. Leontovycha). A national music society named in honor of M. *Leontovych formed in Kiev in 1922 out of the M. Leontovych Memorial Citizens' Committee (est 1921). With branches in Kharkiv, Poltava, Vinnytsia, Chernihiv,

First presidium of the Leontovych Music Society (1922). Sitting, from left: O. Chapkivsky, Yu. Mykhailiv, M. Kocherovsky, D. Koliukh; standing: P. Kozytsky, T. Melnykiv, Yu. Mezhenko, P. Tychna, S. Durdukivsky

Tulchyn, Mykolaiv, Iziium, and other cities, it consisted of more than 30 music collectives and more than 300 individuals. Dedicated to Ukrainian musical development, the society organized courses of instruction, concerts, and academic research, in addition to publishing the journal **Muzyka*. Notable members of the society included M. Verykivsky, M. Hrinchenko, K. Kvitka, P. Kozytsky, and M. Radziievsky. The society was criticized by Soviet authorities for supposedly propagandizing modern Western styles of music, such as expressionism and constructivism, and gradually was forced to give over control of its branches' activities to the Chief Political Education Committee of the People's Commissariat of Education and to direct its composers to create works 'for the masses.' In 1928 the association was restructured as the All-Ukrainian Society of Revolutionary Musicians (VUTORM), which functioned until the creation of the *Union of Composers of Ukraine in 1932.

Leontovych String Quartet (Kvartet im. M. Leontovycha). A group established in 1971 to continue the traditions of the *Leontovych Music Society of the 1920s. Based in Kiev, its members (1988) include S. Kobets and Y. Kharenko (violins), V. Barabanov (viola), and V. Pentaiev (cello). Since 1978 the quartet members, who also work as instructors at the Kiev Conservatory, have been playing rare instruments made by Italian masters of the 17th and 18th centuries. The quartet won acclaim at both the 16th Leo Weiner International Competition and the 2nd International Festival of String Quartets in Vilnius. In 1988 it visited the United States to perform at the United Nations in New York and at the 'Music Mountain' festival in Connecticut. The quartet's repertoire includes works by F. Haydn, P. Tchaikovsky, and S. Barber, as well as M. Lysenko, M. Skoryk, I. Shamo, A. Filipenko, and M. Leontovych.

Lepkaliuk, Myroslav [Lepkaljuk], b 4 April 1919 in Kosiv Staryi, Kosiv county, Galicia. Engineer, businessman, and community activist. After studying in polytechnical schools in Danzig and Stuttgart, he moved to the United States in 1947 and worked as an engineer. In 1954 he established his own company of bridge designers, whose larger

projects included the Fall River Bridge in Massachusetts and the Mississippi River Bridge at Luling, Louisiana. He has headed the Ukrainian Society of Engineers of America (1949–51) and the Ukrainian People's Home in New York (1952–4).

Lepkova-Jastremsky, Olga [Lepkova-Jastrems'ka, Ol'ha] (née Ivanchuk), b 30 March 1906 in Boryslav, Galicia. Opera and concert singer (mezzo-soprano). She studied piano and voice at the Cracow Conservatory and graduated from the Lysenko Higher Music Institute in Lviv. She also studied under A. Didur and in Vienna. She sang and toured with the Lviv State Opera under the stage name Lepkova. Best remembered for her role as Oksana in M. Lysenko's *Zaporozhian Cossack beyond the Danube*, she remained in the United States following a 1938 concert tour in North America.

Bohdan Lepky

Lepky, Bohdan [Lepkyj], b 4 November 1872 in Krehulets, Husiatyn county, Galicia, d 21 July 1941 in Cracow. Galician writer, literary scholar, civic figure, and artist; member of the Shevchenko Scientific Society from 1932; son of S. *Lepky.

Lepky studied at Lviv, Vienna, and Cracow universities and then taught in gymnasiums in Berezhany (1895–9) and at Cracow University (1899–1914). His home in Cracow was a well-known meeting place for Ukrainian writers, artists, and scholars. During the First World War he taught in Vienna; he also worked in the Ukrainian Cultural Council there and for the Union for the Liberation of Ukraine, as a teacher of Ukrainians interned in German prisoner-of-war camps in Wetzlar and Rastatt. From 1921 to 1926 he lived in Berlin; he worked there for the *Ukrainske Slovo* publishers and the Ukrainian Red Cross and taught courses organized by the Association of Ukrainian Students. From 1926 to 1939 he again taught at Cracow University (from 1932 as the holder of the chair of Ukrainian literature) and was a major promoter of Ukrainian culture in Polish circles. He received an honorary doctorate from the Ukrainian Free University. In 1938–9 he was a member of the Polish Senate. From 1939 he worked for the *Ukrainske Vydavnytstvo* publishers in Cracow.

Inspired by M. Vorony, V. Shchurat, and I. Franko, Lepky debuted as a writer in 1895. In 1906 he became a founding member of the *Moloda Muza writers' group. Some of his poems were put to music by Ukrainian composers; the requiem song 'Zhuravli' (Cranes), composed by his brother, Lev, is the most famous of them. From 1898 to 1911 over a dozen collections of Lepky's realistic stories (about

the peasants' plight, the rural clergy, and generational conflict) and impressionistic prose poems appeared. Between the years 1901 and 1920 he also published over 15 collections of predominantly neoromantic and lyrical (elegiac and introspective) but also social and patriotic poetry. A good half of Lepky's poems and almost all of his stories were republished in two volumes titled *Pysannia* (Writings) in 1922.

After the war Lepky turned to writing historical novels, such as the (unfortunately esthetically uneven) Ukrainian historical prose epic *Mazepa*, which consists of the novels *Motria* (2 vols, 1926), *Ne vbyvai* (Do Not Kill, 1926), *Baturyn* (1927), *Poltava* (vol 1: *Nad Desnoiu* [At the Desna, 1928]; vol 2: *Boi* [Battles, 1929]), and the posthumously published *Zpid Poltavvy do Bender* (From [the Battle of] Poltava to Bendery, 1955). He also wrote the historical novels *Sotnykivna* (The Captain's Daughter, 1927), *Vadym* (1930), and *Krutizh: Istorychni maliunky z chasiov Het'mana Ivana Vyhovs'koho* (The Abyss: Historical Pictures from the Time of Hetman Ivan Vyhovsky, 1941) and the publicistic-philosophical novels *Pid tykhyi vechir* (Toward a Quiet Evening, 1923), *Zirka* (A Star, 1929), and *Veselka nad pustarem* (The Rainbow over the Wasteland, 1930). In the 1930s he also wrote stories and poems for children.

Lepky published articles on Ukrainian literature in Polish and Western Ukrainian periodicals and handbooks. He prepared and wrote critical introductions and notes to Halytska (later Ukrainska) Nakladnia and Ukrainske Slovo editions of works by T. Shevchenko (3 vols, 1918–19 and 5 vols, 1919–20), M. Vovchok (3 vols, 1923), I. Kotliarevsky (2 vols, 1922), P. Kulish (4 vols, 1922–3), O. Storozhenko (2 vols, 1922), and other writers. He also wrote one of the first surveys of old Ukrainian literature (2 vols, 1909, 1912), biographies of Shevchenko (1911, 1918) and M. Shashkevych (1912), the book of literary essays *Nezabutni* (The Unforgettable, 1922), a Polish survey of Ukrainian literature (1930), a book on the problem of translating lyric poetry (1934), and the survey *Nashe pys'menstvo* (Our Literature, 1941). Lepky's memoirs of Franko, V. Stefanyk, and W. Orkan appeared as *Try portrety* (Three Portraits, 1937), and his collected autobiographic prose was republished posthumously as *Kazka moho zhyttia* (The Tale of My Life, 1967). A selection of Lepky's works appeared in a single volume in Ukraine in 1990.

He compiled songbooks, primers, and the poetry anthology *Struny* (Strings, 2 vols, 1922) and translated the medieval epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) into Polish (1905) and modern Ukrainian (1915) and works by M. Kotsiubynsky, Shevchenko, and other Ukrainian writers into Polish. He translated German, Polish, Russian, and English poetry, fairy tales by the Grimm brothers, other children's stories, O. Wilde's *Salome*, and D. Defoe's *Robinson Crusoe* into Ukrainian. He was also an accomplished artist. In 1932 a 60th-birthday exhibition of his landscapes, portraits, and historical paintings was organized in Cracow.

R. Senkus

Lepky, Danylo [Lepkyj] (pseud: Sava Slyvych, D.L. Khomiv, and Sviashchenyk), b 29 December 1858 in Litynia, Sambir circle, Galicia, d 20 March 1912 in Staryi Sambir, Sambir county, Galicia. Priest, writer, and ethnographer. After graduating from the Peremyshl Theological Seminary (1884) he served as a priest in various villages. In 1900 he was appointed to Staryi Sambir, where he organized a credit and loan association (1901) and headed the local Prosvita society. He was a member of the Ethnographic Commission of the Shevchenko Scientific Society. His short stories began to appear in 1880 in *Zoria*, in which he also published ethnographic and folk art studies. His articles and fiction appeared in *Dilo*, *Bat'kivshchyna*, *Prosvita* almanacs, and other Galician periodicals. He also wrote children's stories, which appeared in *Dzvinok*, and novels about the common people.

Lev Lepky

Lepky, Lev [Lepkyj] (pseud: Lele), b 7 December 1888 in Poruchyn, Berezhan county, Galicia, d 28 October 1971 in Trenton, New Jersey. Journalist, writer, and songwriter; brother of B. *Lepky. During the First World War he was an organizer and officer of the Ukrainian Sich Riflemen (USS). While serving as a press officer he wrote songs for the USS, several of which became popular, eg, 'Oi vydno selo' (The Village Is Nigh) and the music to 'Zhuravli' (The Cranes; lyrics by B. Lepky). Many of these were later published in *Velykyi spivanyk Chervonoï Kalyny* (The Great Chervona Kalyna Songbook, 1937). In the interwar period he worked as an editor at the *Chervona Kalyna publishing co-operative in Lviv, which he cofounded, and edited its monthly **Litopys Chervonoï kalyny* (1929–39) and its annual almanacs. He also published and edited the humor journal *Zyz* (1924–6), and cofounded and directed the spa at Cherche (1928–39) and the puppet theater Vertep Nashykh Dniv. During the Second World War he was an editor of *Krakovs'ki visti*. A postwar refugee, in 1952 he settled in the United States, where he helped to revive the Chervona Kalyna publishers in New York City and continued organizing USS veterans.

Lepky, Sylvestr [Lepkyj, Syl'vestr] (pseud: Marko Murava, Borys Boryslav, Borys Lepky, Vasylyshyn, M-o), b 31 December 1845 in Kulykiv, Zhovkva circle, Galicia, d 5

June 1901 in Zhukiv, Berezhany county, Galicia. Priest, writer, and community activist; father of B. *Lepky and L. *Lepky. He graduated from the Greek Catholic Theological Seminary in Lviv in 1871 and then served as a parish priest in various Galician villages. He established a number of Prosvita and Sich reading rooms and assisted in the publication of an edition of T. Shevchenko's works (1867). His verse and fiction, intended to arouse the national consciousness of Ukrainians, appeared in the newspapers *Bukovyna*, *Dilo*, *Pravda*, and *Zoria*. He also published a number of articles and pamphlets on philosophy, literature, sociology, economics, and agronomy. His story *Horyt'* (It Burns, 1901) was given a prize by the Prosvita society and published under separate cover in Lviv. A collection of his verse, *Knzyzhka horia* (A Book of Grief, 1903), appeared posthumously.

Lerman, Zoia, b 14 June 1934 in Kiev. Painter. A graduate of the Kiev State Art Institute (1959), from 1974 to 1977 she attended the USSR Academy of Arts Workshop in Kiev. In the 1960s she participated in exhibitions organized by young artists in cafés and various institutions. Lerman works from memory and imagination in a figurative style often depicting women. Her palette is full of light because of her use of white pigment (eg, *Girl from Poltava* [1971] and *Kiev Woman* [1981]).

Lesawyer, Joseph [Lysohir, Josyp], b 25 May 1911 in Northampton, Pennsylvania. Community leader and businessman. A real estate broker by profession, he was active in Ukrainian American organizational life as vice-president (1950–4) and president (1961–78) of the Ukrainian National Association and vice-president (1961–78) of the Ukrainian Congress Committee of America. He also served as president (1971–3) of the World Congress of Free Ukrainians.

Lesawyer, Mary (Lysohir, Mariia), b 8 October 1917 in Shamokin, Pennsylvania. Opera singer (lyric soprano). After studying music at the Juilliard School, she launched her operatic career with the New York City Opera and for nearly two decades performed in major operas. She appeared in numerous Ukrainian musical productions in the United States, Canada, Europe, and South America and sang in Ukrainian operas such as M. Lysenko's *May Night*, S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, M. Arkas's *Catherine*, and P. Pecheniha-Uhlytsky's *The Witch*. She also collaborated with Ukrainian-American composers M. Haivoronsky, P. Pecheniha-Uhlytsky, O. Koshyts, and M. Fomenko.

Lesevych [Lesevyč]. A Cossack *starshyna* family from the Poltava region. The line's founder was Kostiantyn, a notable military fellow of Lubni regiment (1724). His son, Danylo, was captain of Kovalivka company in Hadiache regiment (1738–68) and then regimental judge (1768–70). The philosopher V. *Lesevych is descended from the line.

Lesevych, Volodymyr [Lesevyč], b 27 January 1837 in Denysivka, Lubni county, Poltava gubernia, d 26 November 1905 in St Petersburg. Philosopher and community figure; full member of the Shevchenko Scientific Society (NTSh). A graduate of the St Petersburg Military Engineer-

Volodymyr Lesevych

ing School (1855), he served as an officer in Caucasia for three years and then entered the Academy of the General Staff. In 1861 he retired to his estate in Denysivka, where in 1864 he established one of the first elementary schools for peasants with Ukrainian as the language of instruction. A staunch populist and supporter of the Ukrainian national revival, he defended use of the Ukrainian language in the Russian press, subsidized M. Drahomanov's émigré activities in Geneva and publications of the Ukrainian Radical party in Galicia, and cofounded the *Philanthropic Society for Publishing Generally Useful and Inexpensive Books in St Petersburg, where he resided. For aiding the revolutionary *Narodnaia Volia, he was exiled to Siberia (1879–81) and then forbidden to live in the capital until 1888. Lesevych was one of the founders of positivism in the Russian Empire. Recognizing the importance of epistemology, he became critical of his earlier Comtean outlook and turned to R. Avenarius's empiriocriticism in formulating his own mature position. The role of philosophy, according to his theory of 'critical realism,' was to synthesize the results of the special sciences into a scientific worldview. He himself did not manage to complete this task. Besides numerous articles in philosophy, Lesevych wrote four books in Russian: a survey of the development of the idea of progress (1868), a critical study of the basic principles of positive philosophy (1877), *Pis'ma o nauchnoi filosofii* (Letters on Scientific Philosophy, 1878), and *Chto takoe nauchnaia filosofiiia?* (What is Scientific Philosophy? 1891). He bequeathed his library to the NTSh in Lviv. A three-volume collection of his works (1915–17) was published in Moscow.

T. Zakydalsky

Leshchenko, Leonid [Leščenko], b 2 June 1931 in Horodnytsia (now in Uman raion, Cherkasy oblast). Historian. He graduated from Kiev University (1954) and received a doctorate in 1985. In 1978 he began working at the AN URSS (now ANU) Institute of Social and Economic Problems of Foreign Countries. He has written books on Ukraine in the international arena in 1945–9 (1969), the Soviet-Canadian alliance and co-operation against Nazi Germany in 1941–5 (1973), and the farmers' movement in Canada in 1900–39 (1979) and coedited a handbook on Ukrainians living outside the USSR (1991).

Leshchenko, Mykola [Leščenko], b 19 February 1911 in Burchak, Melitopol county, Katerynoslav gubernia. Soviet historian. He lectured at Kiev University (1945–9) and

worked at the AN URSS (now ANU) Institute of History. His works examined Ukrainian historiography and the history of the Ukrainian peasantry; among them is *Klasova borot'ba v ukrains'komu seli v epokhu domonopolistychnoho kapitalizmu, 60–90-ti roky XIX st.* (The Class Struggle in the Ukrainian Village in the Period of Premonopolistic Capitalism, 1860s–1890s, 1970).

Leshchynsky, Filofei [Leščyns'kyj, Filofej], b 1650 in Galicia, d 31 May 1727. Churchman. He studied at the Kievan Mohyla Academy and was a monk at the Kievan Cave Monastery before becoming metropolitan of Siberia (1702–11). He was forced to retire to a monastery because of ill health and later resumed his post as metropolitan (1715–21). He was one of the most prominent Orthodox missionaries in Siberia. In 1703 he founded a seminary in Tobolsk that existed until 1721. It is estimated that his mission converted over 40,000 people to Christianity.

Lesia Ukrainka. See Ukrainka, Lesia.

Lesia Ukrainka Theater (Ukrainskyi dramatychnyi teatr im. Lesi Ukrainky). The first Soviet theater in Western Ukraine, established in Lviv in September 1939 on the basis of the former casts of the Kotliarevsky and Stadnyk theaters. The artificial union of these theaters, along with the Soviet repertoire, caused disagreement among the directors, Y. Stadnyk, O. Lein, V. Vasylo, V. Blavatsky, and B. Balaban, and produced no great theatrical results. The theater ceased activity in June 1941 and was succeeded by the *Lviv Opera Theater.

Lesia Ukrainka Theater in Kiev. See Kiev Russian Drama Theater.

Lesiv, Mykhailo (Łesiów, Michał), b 3 May 1928 in Stara Huta, Buchach county, Galicia. Slavist and educator. A graduate of the Catholic University in Lublin and Warsaw University (PH D, 1962), since 1956 he has taught at Lublin University. His publications include articles on the language of 17th-century Ukrainian plays and verse, Ukrainian-Polish linguistic relations, and the Ukrainian dialects of the Kholm and Podlachia regions. He has written a monograph on the place-names of the Lublin region (1972) and on pronouns in literary Ukrainian of the 17th and 18th centuries (1977).

Lesiv, Yaroslav, b 3 January 1943 in Luzhky, Dolyna raion, Ivano-Frankivske oblast, d 6 October 1991 near

Yaroslav Lesiv

Bolekhiv, Ivano-Frankivske oblast, in an automobile accident. Teacher, poet, and human rights activist. In 1967, while working as a physical education teacher in Kirovohrad oblast, he was sentenced to six years' imprisonment for his participation in the clandestine *Ukrainian National Front. An inmate of the Vladimir prison from 1970, he was released in March 1973 and allowed to return to Ukraine. In 1979 he joined the *Ukrainian Helsinki Group. Consequently he was arrested in Bolekhiv in November 1979, and sentenced in 1980 to two years in a labor camp near Sarny, Rivne oblast. In November 1981 he was sentenced to five more years of strict-regime labor, from which he was released in 1986. A book of his poetry, *Myt'* (Moment), was published in New York in 1982.

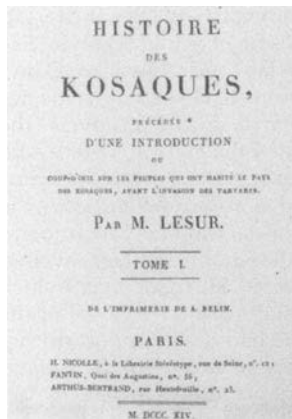

Leskov, Nikolai, b 16 February 1831 in Gorokhov, Orel gubernia, Russia, d 5 March 1895 in St Petersburg. Russian writer. He lived in Kiev from 1849 to 1857; there he learned the Ukrainian language and became acquainted with the life of the Ukrainian people and their culture. Leskov wrote stories on Ukrainian themes, such as 'Nekhreshchenyi pop' (The Unbaptized Priest, 1877), 'Starinnye psikhopaty' (Ancient Psychopaths, 1885), 'Pecherskie antiki' (Pecherske [District] Eccentrics, 1883), and 'Zaiachii remiz' (The Rabbit Warren, 1917). Leskov was personally acquainted with O. Markovych and T. Shevchenko. He wrote articles and memoirs about Shevchenko, such as 'Posledniaia vstrecha i posledniaia razluka s Shevchenko' (The Last Encounter and the Last Farewell with Shevchenko, 1861) and 'Zabyta li Tarasova mogila?' (Is Taras's Grave Forgotten?, 1882).

Lesniak, Omelian [Lesnjak, Omeljan], b 24 April 1882 in Horodenka, Galicia, d near the end of 1953 in Vienna. Senior army officer. As an officer of the Austrian army, in 1916 he commanded the First Battalion of the Legion of Ukrainian Sich Riflemen and was captured by the Russians. After returning to Galicia in 1919, he enlisted in the Ukrainian Galician Army (UHA) and took command of the Zolochiv Military District. In July 1919 he was appointed commander of the Third Brigade of the UHA. Then, as a major, he served in the Supreme Headquarters of the UHA. In the interwar period he lived in Prešov, Czechoslovakia, and after the war in Vienna, where in 1946 he was arrested by the MVD. He was released from Soviet imprisonment in 1953, and returned to Vienna.

Lesnyk, Andrii, b 19 August 1916 in Halzhbiivka, Yampil county, Podilia gubernia. Physicist; corresponding member of the AN URSS (now ANU) since 1976. Since 1947 he has worked at the ANU Institute of Metal Physics. His research deals with the thermodynamics of alloys, the theory of phase transformations in binary alloys, and the physical properties of magnetic films.

Lesur, Charles-Louis, b 24 August 1770 in Guise (Picardie), France, d 1849. French historiographer and publicist. He worked for the Comité du Salut Public (from 1792), where he was Talleyrand's protégé, and for the Ministry of External Relations (from 1812). His *Histoire des Cosaques* (1813; 2nd edn, 2 vols, 1814) was commissioned by Napoleon on the eve of the Russian campaign; the second edition was published with revisions and addenda

following the change of the French regime. Based on earlier works about Ukraine by J. *Długosz, G. le Vasseur de *Beauplan, P. *Chevalier, and J.-B. *Scherer, it emphasized Cossack aspirations for independence.

Title page of Charles-Louis Lesur's *Histoire des Cosaques* (1814)

Vadym Lesych

Lesych, Vadym [Lesyč] (pseud of Volodymyr Kirshak; other pseud: Yaroslav Dryhynych, Yaroslav Yary), b 1909 in Galicia, d 24 August 1982 in New York. Poet and essayist. After studying journalism at Warsaw University, he worked as a journalist and art critic. In 1948 he emigrated to the United States. He began publishing his poetry in 1929 in journals, such as *Literaturno-naukovyi vistnyk* and *Nazustrich* in Lviv and *My* in Warsaw. His early poetry, marked by a predilection for symbolism and dramatic lyricism, is written in strophes that are almost baroque in form. In his later works he stripped the structures of some of their formal elaborateness and incorporated elements of expressionism and narrative lyricism. He is author of nine collections of poetry – *Sontseblыsky* (Sun Flares, 1930), *Vidchyniaiu vikno* (I Open a Window, 1932), *Rizbliu viddal'* (I Sculpt the Distance, 1935), *Lirychnyi zoshyt* (A Lyrical Notebook, 1953), *Poezii* (Poems, 1954), *Rozмова z bat'kom* (Conversation with Father, 1957), *Kreidiiane kolo* (The Chalk Circle, 1960), *Kam'iani luny* (Stone Echoes, 1964), and *Vybrani poezii* (Selected Poems, 1965) – the narrative poem *Naperedodni* (On the Eve, 1960), and numerous essays and articles on literary and artistic themes.

D.H. Struk

Lesyn, Vasyl, b 21 March 1914 in Khotiivka, Sosnytsia county, Chernihiv gubernia, d 1991. Literary scholar. He studied literature at Lviv University. In 1952 he was appointed to the chair of history of Ukrainian literature there. He was a specialist on M. Cheremshyna, L. Martovych, and V. Stefanyk and wrote *Les' Martovych: Literaturnyi portret* (Les Martovych: A Literary Portrait, 1963), *Tvorchist' Vasylia Stefanyka* (The Works of Vasyl Stefanyk, 1965), *Vasyl' Stefanyk: Maister novely* (Vasyl Stefanyk: Master of the Novella, 1970), and *Marko Cheremshyna* (1974). His studies on literary theory include *Kompozytsiia i siuzhet literaturnoho tvoru* (Composition and Plot in a Literary Work, 1960) and *Realistychnyi obraz u khudozhn'omu tvorі* (Realistic Portrayal in a Creative Work, 1976). Together

with O. Pulynets he compiled a short dictionary of literary terms (1961).

Letychiv: the Potocki family's castle and the Dominican church and monastery. Lithograph of a drawing by N. Orda (1860s)

Letychiv or Liatychiv [Letyčiv or Ljatyčiv]. IV-8. A town smt (1990 pop 11,600) and raion center in Khmelnytskyi oblast, located on the Vovk River in the eastern part of the Podolian Upland. It belonged to Galicia principality until 1362 and then came under Lithuanian control. During the period of Lithuanian control a fortress was built there. The town is first mentioned in a historical document in 1411. In 1434 it came under Polish rule, and in 1466 it was granted the rights of *Magdeburg law. In the 15th and 16th centuries it was devastated several times by the Turks and Crimean Tatars. Letychiv played an important role during the Cossack-Polish War of 1648–57. By the end of the century it had witnessed many battles among Cossacks, Poles, and Turks. It took part in the Cossack and popular uprising of 1702–3. After the second partition of Poland in 1793, the town was annexed by Russia and turned into a county center in Podilia gubernia. At the beginning of the 19th century Letychiv played a leading role in the popular uprisings led by U. *Karmaliuk, who was buried there in 1835. Today it has a press assembly plant, a brickyard, a building-materials plant, and a furniture factory. Its architectural monuments include the walls and a tower of the 16th-century castle and two 17th-century Orthodox and Roman Catholic churches. Tools from the Trypilian culture and two early Slav settlements have been discovered near Letychiv.

Leuven (French: Louvain). A Flemish city in Belgium (1985 pop 85,000), and the site of a famous Catholic university (est 1425). Ukrainians (initially from Galicia) have attended the university since 1931, when Metropolitan A. Sheptytsky, with the assistance of the Belgian Jesuit R. Jourdain, sent 50 students for studies there. In 1932–85 approx 100 Ukrainians graduated from Leuven University, three of whom went on to become professors there: V. Gapyshyn, Y. Shukhevych, and R. Yakemchuk. Another

Ukrainian students at Leuven University in 1933

graduate, Zh. Protsyshyn, became a professor at Ghent University. Most of these alumni, among them V. *Mackiw, I. *Ševčenko, M. *Hermaniuk, and O. *Bilaniuk, emigrated to North America, and only about 20 percent stayed on in Belgium. A Ukrainian department was situated at one of the city's libraries. It published books on Ukraine and the monthly *Holos Khrysta Cholovikoliubtsia* (1946–70), which was subsequently taken over by the apostolic visitature.

Vasyl Lev

Prince Lev Danylovych

Lev, Vasyl, b 7 February 1903 in Staryi Yazhiv, Yavoriv county, Galicia, d 23 March 1991 in New York. Linguist and literary historian; member of the Shevchenko Scientific Society from 1947 and of the Ukrainian Academy of Arts and Sciences in the US. After graduating from Lviv University (PHD, 1930) he taught languages in secondary schools in Lviv and then lectured at Lviv University (1937–41). After the war he was a lecturer and professor at the Ukrainian Free University in Munich (1944–9, 1963–88) and then a professor of Ukrainian and Church Slavonic at St Basil's College in Stamford (1952–8), Marywood College (1958–72) in Scranton, and the Ukrainian Catholic University in Rome (1963–88). Lev wrote numerous works, including articles on T. Shevchenko, Lesia Ukrainka, I. Franko, and B. Lepky; linguistic studies of the *Krekhiv Apostol* (1929); articles on the Ukrainian translation of M. Bielski's chronicle (1935); T. Shevchenko's early poetry (1946); and the members of the Ruthenian Triad (1953). With I. Verbiany he compiled a Ukrainian-English and English-Ukrainian dictionary (1947–8). He was a co-

editor of the collected works of V. Grendzha-Donsky (1981–8) and of historical collections on the Ternopil (vol 2, 1970), Berezhany (1970), Yavoriv (1984), and Komarno-Rudky (1987) regions.

Lev Danylovych [Lev Danylovyč], b ca 1228, d ca 1301. Prince of Galicia from 1264; son of King *Danylo Romanovych, brother of *Mstyslav and *Shvarno Danylovych, and father of *Yurii Lvovych. He had dynastic ties with Hungary through his marriage to Konstancia, the daughter of Bela IV. Lev inherited the Halych, Peremyshl, and Belz lands from his father in 1264. In 1268 he murdered *Vaišvilkas after Vaišvilkas abdicated and gave the Grand Duchy of Lithuania to his son-in-law, Shvarno, instead of to Lev. Lev inherited the Kholm and Dorohychyn lands after Shvarno's death ca 1269. He made Lviv (which was named after Lev) his capital in 1272. A vassal of the *Tatars from the early 1270s, he had their support during his campaigns against Lithuania (1275, 1277), Poland (1280, 1283, 1286–8), and Hungary (1285). He made a pact with Wenceslas II of Bohemia in 1279 and, as his ally, tried unsuccessfully to seize Cracow in 1280. Lev's long war with Poland brought little gain. He annexed to his realm part of Transcarpathia (including Mukachiv) ca 1280 and part of the Lublin land ca 1292.

Lev Society (Tovarystvo Leva). An independent civic organization in Lviv dedicated to preserving the historical and cultural heritage of Ukraine, formed in 1987. The society has focused its energies on national, cultural, and ecological undertakings. Its most important projects were the restoration of Lviv's Lychakiv Cemetery and undertakings to preserve and reclaim several Ukrainian historical sites. A project attempting to revive folk handicrafts resulted in the establishment of a school in Bilyi Kamin to teach an ancient form of Ukrainian pottery known as black ceramics. In 1988 the society organized an expedition on the Dniester River to call attention to the river's ecological problems (specifically the disruption of the natural flow by man-made dams and the severe pollution). Originally the society had 175 postgraduate members (average age, 25), but by 1991 the membership had dropped to 50 (average age, 18). The presidents of the society have been O. Sheika, I. Hrynyv, I. Zakharchyshyn, and Ya. Rybak.

Lev Yuriiiovych [Jurijovyč] (Lev II Yuriiiovych), b ?, d not later than June 1323. Galician prince; son of *Yurii Lvovych. After his father died (in 1308 or, according to other sources, in 1315), Lev ruled the Principality of Galicia-Volhynia together with his older brother, *Andrii Yuriiiovych. Later he ruled Galicia separately. The brothers' policy was to weaken the principality's vassalage to the Golden Horde by maintaining alliances with the *Teutonic Knights and with Poland. The brothers died in battle against the Tatars.

Levada, Oleksander (full surname: Kosiak-Levada), b 26 November 1909 in Kryvchuncka, Tarashcha county, Kiev gubernia. Writer. In the postwar years he was appointed to various state positions, among them those of deputy minister of culture of the Ukrainian SSR (responsible for cinema) and vice-president of the Derzhkino. He is the author of books of essays, such as *Bezvirnyky shtur-*

Oleksander Levada

Ivan Levakovsky

muiut' Dnipro (The Infidels Are Storming the Dnieper, 1931) and *Balkans'kyi shchodennyk* (A Balkan Diary, 1946); the collections of poetry *Poezii* (Poems, 1941) and *Berezen'-zhovten'* (March–October, 1973); and the novel *Pivdennyi zakhid* (Southwest, with I. Le, 1950). He also wrote numerous plays, published in the collection *Dramy i komedii* (Dramas and Comedies, 1967), of which the most popular was the tragedy *Faust i smert'* (Faust and Death, 1960). His later works include the plays *Zdrastui, Prypiat'* (Greetings, Prypiat, 1973) and *Persten' z diiamantom* (The Diamond Ring, 1977), the collections of screenplays *Bereh nadii* (The Shore of Hope, 1967) and *Kinopovisti* (Film Narratives, 1977), *Tvory u 4-kh tomakh* (Works in 4 Volumes, 1979–80), and *Dva kol'ory* (Two Colors, 1989).

Levakovsky, Ivan [Levakovs'kyj], b 1828 in St Petersburg, d 27 March 1893 in Kharkiv. Geologist. He graduated from Kharkiv University (in 1852), lectured there (from 1860), and became its first professor of geology (1864). He helped to organize the *Kharkiv Society of Naturalists in 1869 and served as its president until his death. Levakovsky conducted geological research in Ukraine, especially in the Crimea (he outlined the asymmetric structure of the Crimean Mountains) and the southwestern parts of the Donets Basin. He also studied the hydrogeography and soil structure of Ukraine, as well as the geomorphology and tectonics of Right-Bank Ukraine, and wrote the first geology textbook in the Russian Empire (1861–4).

Levanda, Ivan (Ioan; real surname: Sikachka), b March 1734 in Kiev, d 6 July 1814 in Kiev. Churchman and eminent preacher. In 1786 he became pastor of the St Sophia Cathedral in Kiev. Levanda wrote approx 200 sermons and homilies, over 100 of which were collected and published in 1821. Initially influenced by baroque and Polish oration, he eventually developed a unique narrative style, characterized by clarity and realism. He was interested in Ukrainian history and acquired a large collection of historical documents. He also had a large circle of friends among Ukrainian activists, including V. Kapnist, O. Lobysevych, and O. Shafonsky. Levanda is buried in the St Sophia Cathedral.

Levandovsky, Viacheslav [Levandovs'kyj, Vjačeslav], b 23 February 1897 in Kiev, d 18 April 1962 in Moscow. Pioneering animator. While studying at the Kiev Theater

Academy (1918) and the Ukrainian State Academy of Arts (1920–2) he designed sets for a number of theaters and worked as a commercial artist in Kiev. In 1927 he directed a documentary film about the first 10 years of Soviet rule incorporating animation and graphics. In Odessa he made the first Ukrainian animated cartoon, *Kazka pro solom'ianoho bychka* (Tale about the Straw Bullock, 1927). In 1928 he made another in Kiev, *Kazka pro Bilku-hospodyniu ta Myshku-zlodiiku* (Tale about Squirrel the Housewife and Mouse the Thief, 1928). In 1932 he began working in Odessa on one of the first Ukrainian animated sound films, *Tuk-Tuk ta ioho tovarysh Zhuk* (Tuk-Tuk and His Friend Zhuk), which was completed in 1935 by Ye. Horbach and S. Huietsky. From 1933 Levandovsky made animated films at Mosfilm studios in Moscow.

Levanidov, Andrei, b and d ? Russian general. He was commander of the Starodub Carabineer Regiment (1785), corps commander in Kiev (1790–4), and governor-general of Slobidska Ukraine (1796–7). He had ties with Ukrainian autonomist circles and was the protector of A. *Khudorba and A. *Vedel. He took an interest in the history of Ukraine and left a collection of manuscripts called *Andrei Levanidov Malorossiiskii Letopisets* (Andrei Levanidov, a Little Russian Chronicler, ca 1790), which is preserved in the National Museum in Lviv.

Olena Levchanivska

Levchanivska, Olena [Levčaniys'ka] (née Hrodzynska), b 27 January 1881 on the Horodno estate in Volhynia, d 1943 in Kazakhstan. Civic and political leader. After completing her education in St Petersburg and Moscow ca 1907, she became a school organizer and teacher. She returned to the Volhynia region in 1919 and became active in the social welfare and charitable work of the Prosvita society in Kovel and Lutske. In 1922–8 she was a deputy to the Polish Senate and a member of its foreign affairs commission. She was particularly critical of the treatment of Ukrainians under the Poles and spoke out openly on that subject, most notably at the Congress of Minorities called by the League of Nations in Geneva in 1925. She was arrested by the Soviets in 1939 and deported in 1940. She later died in a prison camp in Kazakhstan.

Levchenko, Fedir [Levčenko], b 20 June 1876 in Kononivka, Lubni county, Poltava gubernia, d 24 April 1937 in Zhytomyr. Soil scientist. He graduated from the Kiev Polytechnical Institute in 1904. He then lectured at the Kiev Agricultural Institute (1922–30) and chaired a department at the Kiev Agricultural Engineering Institute of

the Sugar Industry and the Zhytomyr Agricultural Institute. In 1908–11 he studied the soil structure of the Turgai steppe and the Karakum desert; subsequently he did soil research in Ukraine. His writings and soil maps were later used in the preparation of soil maps of Ukraine.

Levchenko, Hryhorii [Levčenko, Hryhorij], b 30 November 1901 in Novoselytsia, Skvyra county, Kiev gubernia, d 19 February 1944 in Kiev. Linguist. A graduate of the Kiev Institute of People's Education (1926), he was a docent at Kharkiv and, later, Kiev University. Levchenko wrote a number of pioneering works on 19th-century literary Ukrainian, including an article on T. Shevchenko's role in the history of literary Ukrainian (1939) and *Narysy z istorii ukrains'koi literaturnoi movy pershoi polovyny XIX st.* (Essays on the History of Literary Ukrainian in the First Half of the 19th Century, 1946).

Levchenko, Mykhailo [Levčenko, Myxajlo], 1830–1892. Lexicographer. His *Opyt rusko-ukrainskogo slovaria* (An Attempt at a Russian-Ukrainian Dictionary, 1874) was one of the first dictionaries of its kind. It contained approx 7,600 Russian and 9,000 Ukrainian words (including synonyms). The Ukrainian vocabulary was derived mostly from the southeastern dialects. In spite of its small range, the dictionary played an important role in normalizing literary Ukrainian. Levchenko also contributed articles on Ukrainian terminology and place-names to *Osnova* (1861).

Mykola Levchenko

Petro Levchenko:
Self-Portrait (oil)

Levchenko, Mykola [Levčenko], b 1900 in the Chernihiv region, d 1934 in Kiev. Folklorist and literary scholar. After graduating from the Kiev Archeological Institute and the Kiev Institute of People's Education he served as A. Krymsky's secretary at the All-Ukrainian Academy of Sciences. In 1927 he was put in charge of publishing at the academy. A specialist in folk prose, he edited the still-unsurpassed collection *Kazky ta opovidannia z Podillia* (Fables and Stories from Podilia, 1928) and *Opovidannia selian za chasy hromadians'koi viiny na Ukraini* (Peasant Stories from the Civil War in Ukraine, 1926) and wrote a study of the warrior Illia Muromets in medieval Ukrainian folktales (1927). His two-volume collection *Z polia folkl'orystyky ta etnografii* (From the Field of Folklore Studies and Ethnography, 1927–8) was an important contribution to the history of Ukrainian folk culture. Also a literary scholar, he

published V. Antonovych's correspondence in *Zapysky Istorychno-filolohichnoho viddil'u UAN* (no 16, 1928) and collaborated with A. Krymsky on the collection *Znadoby do zhyttiepysu Stepana Rudans'koho* (Materials for the Biography of Stepan Rudansky, 1926). He also published some recollections about Rudansky (1929). After being arrested at the end of 1929 in connection with the *Union for the Liberation of Ukraine showtrial, he refused to sign any fabrications and was sent to the GULAG without trial. He was released from labor camp in the fall of 1934, and returned to Kiev. Unable to find work and resume normal life, he committed suicide.

M. Mushynka

Levchenko, Petro [Levčenko], b 11 July 1856 in Kharkiv, d 27 January 1917 in Kharkiv. Painter and pedagogue. He studied art in Kharkiv under D. Bezperchy, at the St Petersburg Academy of Arts (1878–83), and in Paris and Rome. From 1886 he lectured at the Kharkiv Painting School. He was a member of the *Society of South Russian Artists and a participant in almost all of the exhibitions of the *Peredvizhniki (1886–1904), and from 1900 his works displayed the influence of the impressionists. Levchenko did some 800 landscapes and genre paintings. A posthumous retrospective exhibition of 700 of his paintings was held in Kharkiv in 1918. Monographs about him were written by M. Pavlenko (1927), Yu. Diuzhenko (1958), and M. Bezkhutry (1984).

Levchenko, Serhii [Levčenko, Serhij], b 1902 in the Chernihiv region, d 24 June 1969 in Kiev. Linguist and lexicographer. Levchenko studied at the Chernihiv Institute of People's Education and the Kharkiv branch of the AN USSR Institute of Linguistics. After the Second World War he was appointed a lecturer at Kiev University and a senior research associate of the Institute of Linguistics. He wrote a candidate's dissertation on the language of O. Kornichuk (1947) and a course on Ukrainian phonetics (1955), contributed to several dictionaries and reference works, and coedited the last four volumes of the six-volume Ukrainian-Russian dictionary (1953–63).

Levchenko, Yurii [Levčenko, Jurij], b 1956 in Korostyshiv, Zhytomyr oblast. Painter. Although Levchenko graduated from the Kiev State Art Institute in 1980, his work was not accepted for exhibitions until 1987. His paintings *Gold and Purple* and *Reign of Darkness*, dedicated to the millennium of Christianity in Ukraine, were part of the 1988 Dialogue through the Ages Exhibition in Kiev. In them, using Christian symbolism of the Crucifixion and fire, Levchenko suggests parallels with human suffering.

Levchuk, Dmytro [Levčuk], b 28 May 1900 near Kobryn, Hrodna gubernia, Polisia, d 18 July 1977 in Philadelphia. Economist and journalist. After graduating from Kiev University in law (1930) and economics (1931) he worked in state enterprises and taught law in a variety of institutions. He emigrated to the United States after the Second World War. There he became an ideologue for the hetmanite movement, published numerous articles on Soviet affairs in *Ameryka* and *Bat'kivshchyna*, and wrote several books, including the posthumous *Zasnuvannia Moskovii ta shliakh utvorennia despotychnoi imperii* (The Establishment of Muscovy and the Path to the Creation of a Despotic Empire, 1979).

Tymofii Levchuk

Ivan Levynsky

Levchuk, Tymofii [Levčuk, Tymofij], b 19 January 1912 in Bystriivka, Skvyra county, Kiev gubernia. Film director. Upon graduating from the Kiev Cinematography Institute (1934) he joined the Kiev Artistic Film Studio as a director. Among his films are *Ivan Franko* (1950); adaptations of two O. Korniiuchuk plays, *V stepakh Ukraïny* (In the Steppes of Ukraine, 1952) and *Kalynovyi hai* (The Viburnum Grove, 1953); the trilogies *Kyianka* (The Kiev Girl, 1958–60) and *Duma pro Kovpaka* (Duma about Kovpak, 1975–8); the feature films *Zakon Antarktydy* (The Law of Antarctica, 1963) and *Kosmichnyi splav* (The Cosmic Raft, 1964); and *Pomylka Onore de Bal'zaka* (Honoré de Balzac's Mistake, 1968), *Sim'ia Kotsiubyns'kykh* (The Kotsiubynsky Family, 1971), *My zovnuvachuiemo* (We Accuse, 1983), and *Iakshcho voroh ne здаiet'sia* (If the Enemy Does Not Surrender, 1984). Since 1963 he has served as first secretary of the Union of Cinematographers of Ukraine.

Levenets [Levenec']. A Cossack *starshyna* family in the Poltava region in the 17th and 18th centuries. Prokip (d 1691) served briefly as colonel of Poltava regiment (1674, 1677–8) and distinguished himself in the Chyhyryn campaigns (1677–8). In 1685 he was promoted to the rank of fellow of the standard by Hetman I. Samoilovych. In 1687 he became regimental quartermaster and was even a candidate for the hetman's office. His son, Ivan (d ca 1736), was captain (1687) and then colonel of Poltava regiment (1701–9). In 1708 he turned against Hetman I. Mazepa. He did not aid the Russian side, however, and was dismissed from office. In 1711 he was appointed fellow of the standard, and in 1724 he became one of the three directors of the General Military Chancellery. His son, Ivan (d 1747), was osaul (1726–37) and quartermaster (1737–47) of Poltava regiment.

Levshin, Aleksei [Levšin, Aleksej], b 1799, d 28 September 1879 in Kursk gubernia. Russian civic and political leader. A graduate of Kharkiv University (1818), in 1831–7 he was mayor of Odessa, where he founded a public library and published **Odesskii vestnik*. In 1856–9 he was undersecretary to the imperial minister of internal affairs, and in 1857, as a supporter of the abolition of serfdom, he prepared a project for land reforms. His memoirs, *Dostopamiatnye minuty v moei zhizni* (Unforgettable Minutes in My Life), were published in *Russkii arkhiv* (1885, no. 8).

Levy en masse (*opolchennia*). An armed force of a temporary nature recruited on a voluntary basis from the general population in a national emergency, such as a war. In the Princely era (9th–14th centuries), a levy en masse of burghers and peasants was raised by the prince when the realm was threatened with invasion. The volunteers were organized by territory, each land forming its own *tysiacha* (thousand) commanded by a *tysiatskyi*. They were armed with different weapons and formed a light infantry that played a minor role in battle. In the Grand Duchy of Lithuania (until the mid-16th century) the levy en masse was similarly organized, but in the Polish Commonwealth it affected mostly the gentry. In the Russian Empire and Austria-Hungary, after the introduction of compulsory *military service, levy en masse was an exceptional measure. It was used to reinforce the active army and provide a rear guard. During the Napoleonic Wars a levy en masse was raised throughout the Russian Empire, in the second half of 1812. The Ukrainian gubernias provided 19 Cossack cavalry regiments and 4 Cossack infantry regiments (totalling 23,000 men), 3 Buh Cossack cavalry regiments (1,700 men), and over 12 cavalry and 16 infantry regiments of the other estates (47,000 men). Another levy en masse was called during the Crimean War. In Austrian-ruled Galicia during the Revolution of 1848–9 the *National Guard and the *People's Militia were formed. In both world wars levies en masse were raised, in the First World War by both Russia and Austria-Hungary, and in the Second by the USSR. There was no levy en masse in Ukrainian armies.

Levynsky, Ivan [Levyns'kyj], b 6 July 1851 in Dolyna, Stanyslaviv county, Galicia, d 4 July 1919 in Lviv. Architect. A graduate of the Lviv Technical Academy (1875), he opened an architectural firm, a building-materials company, and an artistic pottery studio in Lviv. There he designed and built many public buildings in the Moderne style, in which he incorporated motifs from Ukrainian folk architecture and ornamentation. They include the Chamber of Commerce and Industry, the main railway station, the George Hotel, hospitals, clinics, the building of the *Dnister insurance company (1905), the student residence of the Ukrainian Pedagogical Society, the Akademichnyi Dim student residence, the Narodnia Hostynnytsia building, the building of the Lysenko Higher Institute of Music (1916), and the new building of the *Academic Gymnasium. He also designed and built sanatoriums and hospitals in Vorokhta, Zolochiv, Kolomyia, Zalishchyky, Horodenka, and Ternopil. Levynsky was a patron of the Postup society for workers' enlightenment, the Silskyi Hospodar society, the Osnova student society, and other associations; a founding member of the Prosvita society; and a member of the board of the National Museum. In 1903 he became a professor of architecture at the Lviv Polytechnical Institute. During the 1914 Russian retreat from Galicia he was deported to Kiev. There after the February Revolution, he founded the Pratsia agronomic and technical society and built the wooden Ukrainian Catholic church in the Hutsul style. After returning to Lviv in 1918, he founded the Pratsia society there.

S. Hordynsky

Levynsky, Stepan [Levyns'kyj], b 1897 in Lviv, d 8 October 1946 in Gap, France. Civic figure, engineer, and Ori-

entalist; the son of I. *Levytsky. He studied at the Lviv Polytechnic and the Brussels Colonial Institute and received doctoral degrees from the Polytechnical School and National Institute of Oriental Languages and Civilizations in Paris. From 1936 to 1940 he worked in the economics section of the Polish consulate in Harbin, Manchuria, and was active in the Ukrainian community there, by contributing to *Man'dzhurs'kyi vistnyk* and helping compile a Ukrainian-Japanese dictionary. He then studied in Beijing (1940–1) and was an official Japanese translator for the French government of Indochina in Saigon (now Ho Chi Minh City; 1942–5). He translated Japanese literature into Ukrainian and published many accounts of his extensive travels, including *Vid Vezuviia do piskiv Sahary* (From Vesuvius to the Sands of the Sahara), *Z iapons'koho domu* (From a Japanese Home, 1932), and *Skhid i Zakhid* (East and West, 1934).

Volodymyr Levytsky

Anastasiia Levytska

Levytsky, Volodymyr [Levyts'kyj], b 8 August 1880 in Drohobych, Galicia, d 19 December 1953 in Vienna. Editor, journalist, and political leader and theorist. A dissenter who left the Ukrainian Radical party in 1900 and helped establish the *Ukrainian Social Democratic party, Levytsky edited the party's papers *Volia*, *Zemlia i volia* (1907–12), and *Vpered* (1912–13), as well as the monthly *Dzvin* in Kiev (1913–14). During the First World War he worked in Vienna and Geneva, and later he belonged to the External Group of the Ukrainian Communist party in Vienna, where together with V. Vynnychenko he edited its weekly *Nova doba* (1920–1). In the 1930s he returned to Lviv and contributed articles to *Nova Ukraina* in Prague, and *Nova kul'tura*, *Kul'tura*, *Novi shliakhy*, and *Kooperatyvna respublika*. His most important publications are *Narys rozvytku ukrains'koho robitnychoho rukhu v Halychyni* (An Outline of the Development of the Ukrainian Workers' Movement in Galicia, 1914), *Tsarskaia Rossiia i ukrainskii vopros* (Tsarist Russia and the Ukrainian Question [also in Ukrainian], 1917), *Narodnist' i derzhava* (Nationality and the State, 1919, trans into French), *Sotsialistychna revoliutsiia i Ukraina* (The Socialist Revolution and Ukraine, 1920), *Relihiia, nauka i sotsiializm* (Religion, Science, and Socialism, 1920), and *Sotsialistychnyi Internatsional i ponevoleni narody* (The Socialist International and Subjugated Peoples, 1920, also trans into French).

Levytska, Anastasiia [Levyts'ka, Anastasija] (real name: Kashko), b 16 February 1898 in Kulykivka, Chernihiv gu-

bernia, d 6 November 1955 in Kharkiv. Opera singer (mezzo-soprano). After graduating from the Lysenko Music and Drama Institute in Kiev, she worked as a soloist with the Kiev (1927–30) and the Kharkiv (1930–49) theaters of opera and ballet and then served as professor at the Kharkiv Conservatory (1950–5). Her most important roles included Odarka in S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, Nastia in M. Lysenko's *Taras Bulba*, Liubasha in N. Rimsky-Korsakov's *The Tsar's Bride*, Liubov in P. Tchaikovsky's *Mazeppa*, Solokha in M. Musorgskyy's *Sorochyntsi Fair*, Carmen in G. Bizet's *Carmen*, and Delilah in C. Saint-Saëns's *Samson and Delilah*.

Levytska, Halyna [Levyts'ka], b 23 January 1901 in Porokhnyk, Jaroslaw county, Galicia, d 13 July 1949 in Lviv. Pianist, publicist, and pedagogue; spouse of I. *Krushelnytsky. She studied music at the Lysenko Higher Institute of Music in Lviv and at the Vienna Academy of Music (1916–20), lectured at the Lysenko Institute (1921–39), and was professor at its successor, the Lysenko Conservatory (1940–1 and 1944–9). She toured Western Ukraine, Poland, Prague, Vienna, and elsewhere with a repertoire including works by L. von Beethoven, C. Frank, F. Chopin, and F. Liszt. In 1936–7 she gave a series of piano recitals in Lviv devoted to Ukrainian and foreign piano music. She also performed works by contemporary Ukrainian composers, including L. Revutsky, V. Kosenko, P. Kozytsky, B. Liatoshynsky, R. Simovych, M. Kolessa, and A. Rudnytsky.

Levytska, Nataliia. See Nychka, Nataliia.

Olena Levytska

Levytska, Olena [Levyts'ka], b 30 May 1873 in Ozhydiv, Zolochiv county, Galicia, d 24 October 1963 in New York. First Ukrainian woman industrialist in Galicia. After leaving the teaching profession she worked for 15 years at a chemical factory in Warsaw. In 1907 she and her brother set up the Zoria chemical products factory, which she ran by herself after his death in 1914. As a member of the Union of Ukrainian Women she encouraged women to enter professions traditionally closed to them.

Levytska, Olha [Levyts'ka, Ol'ha] (née Buchma; stage name: Szpychlerska), b 15 December 1879 in Pustomyty, Lviv county, Galicia, d 19 March 1925 in Stanyslaviv (now Ivano-Frankivske), Galicia. Actress and singer (soprano); sister of A. *Buchma. She sang in the Polish opera theater in Lviv and then joined the Ruska Besida Theater in 1898. In 1913 Y. Stadnyk left the Ruska Besida Theater, and

Levytska joined his Lviv Ukrainian People's Theater. In 1916–18 she worked in the Theater of the Legion of Ukrainian Sich Riflemen with K. Rubchak.

Sofiia Levytska: *Tempest* (woodcut)

Levytska, Sofiia [Levyc'ka, Sofija], b 9 March 1874 in Vykhylivka, Proskuriv county, Podolia gubernia, d 20 September 1937 in Paris. Painter, woodcut artist, and translator; sister of Modest *Levytsky. She studied at L'École des beaux arts in Paris (1905) and exhibited at the Salon des Artistes Indépendants and Salon d'Automne, of which she became a member in 1910. She was close to the cubists, and her painting *White Rhinoceros in the Garden of Eden* (1911) attracted the attention of G. Apollinaire. In 1912 she exhibited with the Section d'Or together with A. Archipenko and held her first individual exhibition in the Galerie Weil. Her translation into French of N. Gogol's *Evenings on a Farm near Dykanka*, illustrated with her own woodcuts, was published in 1921. Her artistic salon in Paris attracted the elite of French artists and writers, among them R. and J. Duffy, D. de Segonzac, P. Valéry, and E. Bernard. Her large-scale compositions with genre scenes – eg, *Harvesting Grapes*, *The Girl on Horseback*, *Clowns*, *Church in Vence* – are painted in a postimpressionist style typical of the L'École de Paris. She did ornamental woodcuts for the collector's edition of P. Valéry's *Le Serpent* (1925) and illustrations for *La Chronique de Joinville*, G. de Louche's *Le Jardin*, and Paris editions of *La Revue musicale*. Her graphic work was exhibited many times in France and at Ukrainian group exhibitions in Paris, Lviv, Berlin, Prague, Warsaw, and Rome. A posthumous exhibition of her works was held in Paris in 1938. A study of the artist by V.

Popovych appeared in the *Ukrainian Art Digest*, no. 7 (1968).

S. Hordynsky

Vira Levytska

Borys Levytsky (1915–84)

Levytska, Vira [Levyc'ka] (née Herasymovych-Vyshnevskya), b 26 February 1916 in Porytske (now Pavlivka), Volodymyr-Volynskiy county, Volhynia gubernia. Stage actress. She began her theatrical career in the Zahrava Theater in Peremyshl (1933–8) and then worked in the Kotliarevsky Theater (1938–9) and the Lesia Ukrainka Theater (1939–41), in the drama sector of the Lviv Opera Theater (1941–4), and in the Ensemble of Ukrainian Actors in West Germany (1945–9). She performed the title role in J. Anouilh's *Medea*, staged by Teatr u Piatnytsiu in Philadelphia. Levytska retired from the stage in 1970.

Levytsky, Andrii. See Lewicky, Andrew.

Levytsky, Borys [Levyc'kyi] (Lewytzkyj), b 9 May 1890 in Uman, Kiev gubernia, d 2 May 1953 in Poltava. Veterinary surgeon and zootechnician. A graduate of the Kharkiv Veterinary Institute (1914), he lectured at the Derhachiv School of Agriculture (1914–19) and was a scientific researcher at the Poltava Epizootic (1922–3) and Zootechnical (1922–30) stations. A professor (from 1950) at the Poltava Agricultural Institute, he wrote numerous works dealing with animal diseases and feed technology and proposed a method of leavening animal feed.

Levytsky, Borys [Levyc'kyi] (Lewytzkyj), b 19 May 1915 in Vienna, d 28 October 1984 in Munich. Journalist, political activist, and Sovietologist. While studying philosophy and psychology at Lviv University (MA, 1938) he edited **Nove selo* (1936–9) and was active in the OUN. With the outbreak of the Soviet-German War he went east with I. *Mityrynga's group and helped found the *Ukrainian People's Democratic party. After the war he left the OUN and helped organize the *Ukrainian Revolutionary Democratic party, in which, together with I. Maistrenko, he headed a leftist faction and edited **Vpered* (1949–56). In 1948 he founded his own research bureau for Soviet affairs, which published a monthly bulletin about the higher officials of the Party. In the 1950s he was a contributor to the German liberal daily *Süddeutsche Zeitung* in Munich (under the pen name Paul Sikora) and research associate of the East European Research Service in Düsseldorf. In the 1970s he worked as a specialist on Soviet affairs for the German Social Democratic party. He wrote numerous

works on the Soviet Union, including *Vom roten Terror zur sozialistischen Gesellschaft* (1961), *Die Sowjetukraine, 1944–1963* (1964), *Die rote Inquisition* (1967; trans: *The Uses of Terror*, 1971), *The Soviet Political Elite* (1969), *Die sowjetische Nationalitätenpolitik nach Stalins Tod, 1953–1970* (1970), *Die Marschälle und die Politik* (1971), *Sowjetische Entspannungspolitik heute* (1975), and *Politics and Society in Soviet Ukraine, 1953–1980* (1984). He also compiled several biographical dictionaries, such as *The Stalinist Terror in the Thirties* (1974) and *Who's Who in the Socialist Countries* (1978).

B. Osadchuk

Dmytro Levytsky: *Portrait of P. Demidov* (oil, 1773)

Levytsky, Dmytro [Levyc'kyj] (Russian: Levitsky, Dmitrii), b 1735 in Kiev, d 16 April 1822 in St Petersburg. The most prominent portraitist of the classicist era in the Russian Empire. He acquired his basic training from his father, H. *Levytsky, and helped him do engravings for the Kievan Cave Monastery Press. In 1753–6 he helped his father and A. Antropov decorate *St Andrew's Church in Kiev. From 1758 to 1761 he worked in St Petersburg, where he likely studied with Antropov, L.-J.-F. Lagrené, and G. Valeriani. From 1762, while living in Moscow he was a portraitist in great demand among the Russian aristocracy. He moved to St Petersburg in 1769, and he won the highest award at the summer exhibition in 1770 held by the St Petersburg Academy of Arts and was elected a member of the academy. A teacher of portraiture at the academy (1771–88), he retired to Ukraine in 1788, but in 1795 he returned to St Petersburg to become portraitist at the imperial court.

Building on the baroque, classicism, and Western European traditions, Levytsky created a school of portrait painting. His portraits reveal his expert knowledge of drawing, composition, color, and the appropriate gesture. He executed over 100 portraits, including ones of Empress Catherine II, other members of the Russian imperial family, King Stanislaus I Leszczyński, the French encyclopedist D. Diderot (now in the Geneva Museum of Art and History), his own father, brother, and daughter, and six of the first graduates of the Smolny Institute for aristocrats' daughters. Many Ukrainian (eg, L. Myrypolsky, S. Maiatsky, L. Kalynovsky) and Russian portraitists studied with Levytsky at the academy, and his works influenced V. *Borovykovsky.

S. Yaniv

Dmytro Levytsky (1877–1942)

Fedir Levytsky

Levytsky, Dmytro [Levyc'kyj], b 1877 in Dobrachyn, Sokal county, Galicia, d 31 October 1942 in Bukhara, Uzbek SSR. Lawyer and civic and political leader. After graduating from the law faculty of Vienna University he practiced law in Rava Ruska (1912–14) and then briefly in Berezhany. An officer in the Austrian army, he was captured by the Russians in 1915 and deported to Tashkent. During the revolution he organized and headed the Galician-Bukovynian Committee in Kiev. During the Hetman regime he was secretary of the oppositional Ukrainian National Union and then chief of the UNR diplomatic mission to Denmark (1919–21). Upon returning to Galicia he edited the daily *Dilo* (1923–5) and served as the first president (1925–35) and then vice-president (1936–9) of the *Ukrainian National Democratic Alliance (UNDO), which he helped found. After being elected to the Polish Sejm (1928–35) he chaired the *Ukrainian Parliamentary Representation in the assembly. He formed and led the Ukrainian Co-ordinating Committee (1936–9), which represented all the legal Ukrainian parties in Galicia. He was arrested by the Soviets in September 1939 and was imprisoned in Moscow until the outbreak of the German-Soviet War, after which he was permitted to live in Uzbekistan.

Levytsky, Fedir [Levyc'kyj], b 14 May 1858 in Novoukrainka, Yelysavethrad county, Kherson gubernia, d

19 February 1933 in Chernihiv. Actor (mainly comedic) and director. After working as a teacher in Novoukrainka (1877–87) and founding an amateur theater he began his professional career in M. Kropyvnytsky's troupe, joined M. Sadovsky's troupe (1892–7), founded and directed his own troupe in 1905–8, and then entered Sadovsky's Theater in Kiev (1909). Later he was a leading actor in the Ukrainian National Theater (1917–18) and the State Drama Theater (1917–19). After serving in Chernihiv okruha as an instructor of amateur village theaters he returned to Kiev in 1925, to the Shevchenko First Theater of the Ukrainian Soviet Republic. In 1930 he joined the Zhovten Theater in Leningrad. His last year was with the local theater in Lubni. Characteristic of Levytsky's acting was an ability to extend the dramatist's intention and refresh it by strong improvisation. His repertoire consisted mostly of roles of dramas in the ethnographic theater of manners, including the Clerk in I. Karpenko-Kary's *Burlaka* (The Vagabond), Cherevyk in M. Starytsky's *Sorochyns'kyi iarmarok* (The Fair at Sorochyntsi, based on N. Gogol), the Bailiff in M. Kropyvnytsky's *Po revizii* (After the Inspection). He was also successful in roles such as Makar in V. Vynnychenko's *Moloda krov* (Young Blood), Kopystka in M. Kulish's *97*, and, in the non-Ukrainian repertoire, Chris in E. O'Neill's *Anna Christie*, Engstrand in H. Ibsen's *Genjengere*, and Zemlianka in Gogol's *Revizor* (The Inspector General). A biography, by V. Vasylo, was published in Kiev in 1958.

V. Revutsky

Levytsky, Hryhorii [Levyc'kyj, Hryhorij] (né Nis), b ca 1697 in Maiachka, Poltava regiment, d 19 May 1769 in Maiachka. Baroque master engraver and painter. Levytsky studied engraving in Wroclaw (until 1735). From ca 1738–41 he was an Orthodox priest in Maiachka and continued to do engravings for the Kievan Cave Monastery Press. Over 40 of his engravings illustrate the press's Gospel (1737), Psalter (1737), and *Apostol* (1737–8, 1752), and the title pages and ornamentation of Kievan students' theses in verse, such as those in honor of R. Kopa (after 1730), I. Nehrebetsky (1738), Metropolitan R. Zaborovsky (1739), and D. Tuptalo (1752). He also prepared four engraved boards for M. Kozachynsky's collection of theses on Aristotle's philosophy (Lviv 1745), containing portraits, coats of arms, cartouches, allegories, symbols, views of Kiev's architectural monuments, genre scenes, and O. Rozumovsky's family tree. In 1753–6, together with his son, D. Levytsky, and A. Antropov, Levytsky painted rococo murals inside St Andrew's Church in Kiev. A book about him by V. Fomenko was published in Kiev in 1976.

Levytsky, Hryhorii [Levyc'kyj, Hryhorij] (Lewitsky), b 19 November 1878 in Bilky, near Popilnia, Skvyra county, Kiev gubernia, d 20 May 1942 in a Soviet prison camp, location unknown. Botanist, cytologist, and cytogeneticist; corresponding member of the USSR Academy of Sciences (1932). A graduate of the biology faculty of Kiev University in 1902, where he studied with the cytologist S. Navashin, he began teaching in 1904 at the Kiev Polytechnical Institute. He was arrested in 1907 for his involvement with the All-Russian Union of Peasants and exiled abroad for four years. While working at the Russian marine biological station at Villefranche and in the laboratory of E. Strasburger at the University of Bonn, Levytsky studied the 'chondriosomes' (mitochondria) of plant cells, devel-

Hryhorii Levytsky: *St John The Evangelist*, engraving in the *Apostol* printed by the Kievan Cave Monastery Press (1738)

oped fixative techniques, worked out the microscopic organization of plant cells, and observed their continuity through cell division. After his return to Kiev in 1911, Levytsky was a professor at the polytechnical institute until 1921, when he was charged with Ukrainian nationalism and dismissed by the Bolsheviks. In 1922–5 he directed the cytology laboratory of the Ukrainian Sugar Trust and organized the trust's Scientific Selection Institute. He wrote one of the first textbooks in the field of cytogenetics, *The Material Basis of Heredity* (1924), and redefined the terms 'karyotype' and 'idiogram' in their modern sense.

Levytsky, Ivan [Levyc'kyj], b 18 January 1850 in Berlohy, Kalush county, Galicia, d 30 January 1913 in Lviv. Bibliographer and writer; member of the Shevchenko Scientific Society and head of its Bibliographic Commission (from 1909). His more important works include a

Ivan Levytsky (1850–1913)

Kost Levytsky

Galician-Ruthenian bibliography of the 19th century with an overview of Ruthenian publications in Hungary and Bukovyna in 1801–86 (2 vols, 1888, 1895), a Galician-Ruthenian bibliography for 1772–1800 (1903), a bibliography of Ukrainian works published in Austria-Hungary in 1887–93 (3 vols, 1909–11), and a biographical dictionary of 19th-century Transcarpathian Ruthenians (incomplete, 4 issues, 1898). He also published a bibliography of M. Hrushevsky's works, a history of education in Galicia under Austria, and popular historical tales (under the pseudonym Ivan iz Berloh).

Levytsky, Ivan [Levyc'kyj], b 16 November 1875 in Mala Luka, Husiatyn county, Galicia, d 8 April 1938 in Lviv. Composer, choir conductor, and pedagogue. From 1910 he lectured at the Ukrainian Teachers' Seminary and the Lysenko Higher Institute of Music in Lviv. He wrote music for violin (*Nocturne, Romance*), choir, and vocal solo. He set many of T. Shevchenko's verses to music and also wrote music textbooks, most notably *Narys istorii muzyky* (An Outline of the History of Music, 1921).

Levytsky, Kost [Levyc'kyj, Kost'], b 18 November 1859 in Tysmenytsia, Tovmach county, Galicia, d 12 November 1941 in Lviv. Lawyer, publicist, civic and economic organizer, and prominent political leader in Galicia; full (from 1899) and honorary member of the Shevchenko Scientific Society. A graduate of Lviv University, he opened a law office in Lviv in 1890 and became active in various areas of Ukrainian community life. He edited **Chasopys' pravnycha* (1889–1900), which he helped found. As a member of the executive he transformed the Prosvita society from a purely educational into an educational-economic institution. To build a firm economic foundation for the social and political development of the Ukrainian community in Galicia, he helped found a whole string of important economic organizations, such as Narodna Torhovlia, the Dnister insurance company, Tsentrobank (which he directed in 1898–1939), the *Audit Union of Ukrainian Cooperatives (which he headed in 1904–14), the Land Mortgage Bank, and the Karpatia mutual insurance company.

A populist by conviction, he helped to organize the People's Council and served as its secretary and vice-president (1885–99). Then, after joining the National Democratic party, he served as secretary and chairman (from 1902) of its executive, the Popular Committee. In 1907 he was elected deputy to the Austrian parliament, and in 1908, to the Galician Diet. As head of the strongest Ukrai-

nian party and chairman of the Ukrainian clubs in the parliament and the Diet, he had become the most influential Ukrainian political leader in Galicia by 1910.

During the First World War Levytsky played a prominent role in the independence movement in Western Ukraine. In 1914 he was elected president of the Supreme Ukrainian Council in Lviv, and in 1915–16, of the *General Ukrainian Council in Vienna. When the Austrian government proposed in 1916 to set up a separate and autonomous Galicia under Polish control, the disillusioned Levytsky resigned as chairman of the Ukrainian Parliamentary Representation. As head of the Lviv delegation of the Ukrainian National Rada, which had decided to establish a Ukrainian state on Austro-Hungarian territories, he ordered the Central Ukrainian Military Council to stage an armed coup in Lviv on 1 November 1918. A week later he became the first head of the State Secretariat of the Western Ukrainian National Republic. A year later, when the Poles occupied Galicia, Levytsky served as secretary of press and propaganda and then of foreign affairs in Ye. Petrushevych's government-in-exile. After returning to Galicia in 1923, he directed his energies to strengthening Ukrainian professional, economic, and cultural institutions. He served as president of the Union of Ukrainian Lawyers, editor of *Zhyttia i pravo*, and director of Tsentrobank. Although he sat on the executive of the Ukrainian National Democratic Alliance, he did not engage in active politics. When the Soviets occupied Galicia in 1939, he chaired the Ukrainian Relief Committee and headed a delegation from the Ukrainian community to the new authorities. He was promptly arrested and was imprisoned in Moscow until the spring of 1941. After the German invasion he helped organize and headed the short-lived Ukrainian National Council in Lviv.

In addition to numerous articles on political, legal, and historical issues Levytsky wrote a number of monographs, including *Istoriia politychnoi dumky halyts'kykh ukraïntsiu 1848–1914* (A History of the Political Thought of Galician Ukrainians, 1848–1914, 2 vols, 1926), *Istoriia vyzvol'nykh zmahan' halyts'kykh ukraïntsiu z chasu svitovoi viny* (A History of the Liberation Struggle of Galician Ukrainians during the Period of the [First] World War, 3 vols, 1929–30), *Velykyi zryv* (The Great Upheaval, 1931; repr 1968), and *Ukraïns'ki polityky* (Ukrainian Politicians, 1936); he also compiled *Deutsch-ukrainisches juridisches Wörterbuch* (1893; 2nd rev edn 1920).

V. Mudry

Levytsky, Leopold [Levyc'kyj, Leopold], b 7 August 1906 in Burdiakivtsi, Borshchiv county, Galicia, d 14 May 1973 in Lviv. Painter and graphic artist. He studied at the Cracow Academy of Fine Arts (1925–32) and its Paris branch (1930–1). For his involvement in the Communist Party of Poland and his political artwork he was expelled from the academy and twice imprisoned (1932, 1935–6). From 1944 Levytsky worked in Lviv, where he became head of the Union of Artists branch in 1949. He created hundreds of linocuts, etchings, monotypes, and lithographs; several linocut series, including the large 'From the Tales of My Father' (1946–7), 'From My Memories' (1946–8), 'Women' (1905–6), and 'Carpathians' (1968–72); over 30 oil paintings (eg, the socialist-realist *Ivan Franko in His Father's Smithy* [1953]); the watercolor series 'Village Vrasiv in Lviv Oblast' (1955–6); and illustrations for editions of works by Western Ukrainian Communist writers,

Leopold Levitsky: *Woman* (monotype, 1960s)

such as Ya. Halan, S. Tudor, O. Havryliuk, and P. Kozlaniuk. Many of his early works show the influence of cubism and expressionism. A book about him by G. Ostrovsky was published in Moscow in 1978.

Levytsky, Modest [Levyc'kyj] (pseud. V. Makohonenko, M. Pylypovych), b 25 July 1866 in Vykhylivka, Proskuriv county, Podilia gubernia, d 16 June 1932 in Lutske, Volhynia voivodeship. Physician, civic leader, and writer. After graduating from Kiev University in 1893, he practiced medicine in Kovel, Okny, Boiarka (near Kiev), Radyvyliv, and Bila Tserkva. In 1918–19 he headed the sanitary and cultural-educational departments of the UNR Ministry of Highways. In 1919 he served as adviser, and later, as head, of the UNR diplomatic mission to Greece. As an émigré he directed a tuberculosis hospital for Ukrainian veterans in Zakopane (1922) and then lectured at the Ukrainian Husbandry Academy in Poděbrady. In 1927 he settled in Lutske, where he practiced medicine and taught Ukrainian in secondary school. He wrote short stories, recollections, popular medical pamphlets, and translations. His stories appeared in periodicals, such as *Kiev-skaia starina*, *Rada*, *Nova hromada*, and *Literaturno-naukovyi vistnyk*, under the pseudonyms M. Pylypovych and Vyboryni-Makohonenko, and in separate collections, including *V sudi* (In Court, 1918), *Gloria vistsis* (1925), *Zemlytsia ridna* (Native Land, 1926), and *Tiazhka doroha* (The Hard Road, 1928). He translated several novels into Ukrainian, including H. Sienkiewicz's *Quo vadis*, and Sh. Asch's play *Got fun Nekomeh* (The God of Vengeance).

Modest Levytsky

Cardinal Mykhailo Levytsky

Levytsky, Mykhailo [Levyc'kyj, Myxajlo], b 1774 in Lanchyn, Stanyslaviv circle, Galicia, d 14 January 1858 at the Univ Monastery, Zolochiv circle, Galicia. Ukrainian Catholic metropolitan and cardinal. After studying theology at the Barbareum in Vienna, he was ordained (1798) and appointed professor of biblical studies at the Greek Catholic Theological Seminary in Lviv. In recognition of his abilities he was made a canon in 1808 and then consecrated bishop of Peremyshl (1813). With the assistance of I. *Mohylnytsky, he launched a major campaign in the field of education: he established 383 new parish schools in the eparchy, petitioned the government for Ukrainian-language instruction in schools, and established a clerical society to print religious and educational materials. He was elevated to the office of metropolitan of Halych and archbishop of Lviv in 1816 and continued his duties in Peremyshl until 1818. As metropolitan, Levytsky continued to press for educational development and the formation of new schools. His conservative attitudes, however, led to conflict with a new generation of intelligentsia (most notably the *Ruthenian Triad) over questions of language (he favored an *etymological orthography, while they advocated a phonetic system) and national identity (he regarded Galician Ukrainians as a separate nation [see *Old Ruthenians], while they accepted a pan-Ukrainian identity). Levytsky enjoyed the complete confidence of the Austrian emperor and obtained concessions from him for his church. In 1848 the emperor named him primate of Galicia, though this position had previously always been held by the Roman Catholic bishop of Lviv. In 1856 Pope Pius IX appointed Levytsky a cardinal, the second Ukrainian in history to receive this honor. By this time he had largely withdrawn from public life because of ill health and was confined to the monastery in Univ.

Levytsky, Mykhailo [Levyc'kyj, Myxajlo], b 9 February 1891 in Yavche, Rohatyn county, Galicia, d 1933. Galician Communist activist. During the First World War he was interned by the Russians as a POW in Central Asia. He joined the Bolshevik party and edited the Ukrainian paper *Tashkents'ka rada* in Tashkent (1918). In 1919 he was sent to Lviv as a member of the Provisional Committee and the underground CC of the Communist Party of Eastern Galicia (KPSH). He was elected to the CP(B)U Galician Organizing Committee (1920) and then to the KPSH Politburo and the *Galician Revolutionary Committee. From late 1921 he served as Soviet plenipotentiary in Austria, Germany, and

Czechoslovakia. Upon returning to Ukraine he was elected a member of the CP(B)U Central Control Committee in 1925 and candidate member of the CC CP(B)U in 1927. Accused of belonging to a 'Ukrainian National Center' headed by M. Hrushevsky, he was arrested and probably executed.

Levytsky, Mykola [Levyc'kyj], b 8 June 1819 in the Chernihiv region, d 14 February 1885 in Kiev. Pedagogue. He graduated from the Kiev Seminary in 1841 and studied at Kiev University. From 1846 he taught in the regions of Kiev and Chernihiv, and from 1858 in secondary schools in the city of Kiev. He proposed a new system of elementary education which would develop a child's mind, fulfill society's physical, moral, and esthetic requirements, and instill and develop in children the desire for useful activity. Levytsky is the author of a number of scholarly articles on methodology and education at the elementary school level. His major work is *Ocherki kursa gramotnosti* (Outline for a Course in Literacy, Kiev 1874).

Mykola Levytsky (1859–1936)

Levytsky, Mykola [Levyc'kyj], b 7 April 1859 in Khmilna, Kaniv county, Kiev gubernia, d 1 December 1936 in Kiev. Pioneer of the artel and co-operation movement in Ukraine. After being expelled from Moscow University he graduated in law from Kharkiv University in 1885 and worked as secretary of the Oleksandriia zemstvo and then as a lawyer in Yelysavethrad. A convinced populist, he devoted his spare time to propagating and organizing artels among farmers, tradesmen, and industrial workers. The first artels were established in 1887 in Oleksandriia county, and spread quickly. Under Levytsky's influence 125 agricultural artels, with a membership of over 3,000 peasants, arose in 1894–8. Many of them were short-lived. Beginning in 1903 Levytsky organized artels in Yelysavethrad, Odessa, Kiev, Balta, Vinnytsia, and other cities. In his articles on the model contract for farmers' artels he proposed various credit and insurance schemes for such artels. In the revolutionary period he was active in the Ukrainian co-operative movement and served in the Central Rada.

Levytsky, Mykola [Levyc'kyj], b 1880, d 1935. Lawyer and political leader. A member of the Ukrainian Social Democratic Workers' party (USDRP), he sat on the Central Rada and represented the UNR at the negotiations with the Central Powers in Brest-Litovsk. He served in the Hetman government as assistant director of the Department of Ex-

ternal Relations at the Ministry of Foreign Affairs and took part in peace negotiations with Soviet Russia. Under the Directory he was a member of the UNR diplomatic mission in Paris. He returned to Ukraine in 1923 and worked in Kharkiv. After being arrested in 1929, he was sent to a prison camp in Krasnoiarsk oblast, where he died several years later.

Myron Levytsky: *Yaroslavna* (oil, 1961)

Levytsky, Myron [Levyc'kyj] (Lev), b 14 October 1913 in Lviv. Painter, graphic artist, journalist, and writer. After studying at the Novakivsky Art School in Lviv (1931–3) and at the Cracow Academy of Arts (1933–4) he worked as a book illustrator and designer in Lviv (from 1935) and published and edited the monthly *My i svit* (1938–9). During the Soviet occupation of Galicia he worked as staff artist at the AN URSR archeology department in Lviv and at the Lviv Historical Museum. During the Nazi occupation he worked for the *Ukrainske Vydavnytstvo* publishing house and then as a war correspondent of the Division Galizien paper, *Do peremohy* (1943–4). A postwar refugee in Austria, he emigrated to Canada in 1949 and worked in Winnipeg as art editor of I. Tyktor's publishing house and editor of the humor magazine *Komar* (1949–50) before settling in Toronto in 1954. After he had spent two years painting in Paris, his first one-man exhibition was held there, in 1958. Other solo exhibitions were held in Toronto (1961, 1963, 1964, 1973, 1976, 1978), Waterloo (1965), New York (1964, 1974), Detroit (1972), Ottawa (1975), Edmon-

ton (1977), Chicago (1984), Lviv (1991), and Kiev (1992). Levytsky's canvases are characterized by their rich color harmonies, flowing linearity, and stylized, abstracted forms (eg, *Moroccan Musicians* [1964], *Spanish Town* [1965], and *Portrait of My Wife, Halyna* [1985]). His interests range from portraiture, urban landscapes, classical and Ukrainian mythology, nudes, literature, and history to icons and religious themes (eg, numerous Madonnas and the oil *Day of the Pentecost* [1968]). He has painted the murals and icons in 10 Ukrainian Catholic churches (5 in Canada and 5 in Australia). Levytsky has been instrumental in modernizing Ukrainian sacred art and freeing it from the confines of the traditional Ukrainian-Byzantine style (eg, in the Church of the Holy Eucharist [1974–5] in Toronto and St Andrew's Church [1979–80] in Lidcombe, Australia). He has designed and illustrated over 300 books and magazines and many bookplates, in which he has used a distinctive type of lettering and graphic style. Levytsky has also written a short story collection, *Likhtari* (Lanterns, 1982). A monograph about him by D. Zelska-Darewych was published to coincide with the retrospective exhibition of his works in Toronto and Winnipeg in 1985.

D. Zelska-Darewych

Levytsky, Oleksii [Levyc'kyj, Oleksij], b 10 October 1887 in Kiev, d 18 June 1959 in Dornstadt, near Ulm, Germany. Comic actor. He began his career in O. Suslov's troupe in 1905. In 1910–18 he worked in I. Sahatovsky's troupe, with a hiatus in the Ruska Besida Theater (1913–14). Levytsky joined Sadovsky's Theater in 1919, and in 1920–44 he worked in various Ukrainian troupes in Galicia, and then, until 1949, in the Ensemble of Ukrainian Actors in West Germany.

Orest Levytsky

Osyp Levytsky

Levytsky, Orest [Levyc'kyj] (pseud. O. or L. Orlenko, Orelsky, Levko Maiachynets, Levko Maiachenko, Levko Maiachsky), b 6 January 1849 in Maiachka, Kobeliaky county, Poltava gubernia, d 9 May 1922 in Drabiv, Zolotonosha county, Poltava gubernia. Historian, archeographer, and writer; full member of the Shevchenko Scientific Society from 1910 and the Ukrainian Academy of Sciences from 1918; great-grandson of D. *Levytsky. After completing a program at the Poltava Theological Seminary (1869) he studied at Kiev University (1870–4) under his mentor V. *Antonovych and then taught until 1909 in a Kiev gymnasium. An active member of the *Hromada of Kiev, he researched and published archival materials and studies

pertaining to 16th- to 18th-century Ukrainian history, folkways, marriage, social relations, customary law, and religious social movements. He was secretary (1874–1921) of the *Kiev Archeographic Commission and editor of its publications, a full member (from 1878) of the *Historical Society of Nestor the Chronicler and its vice-president (from 1902), and a frequent contributor to **Kievskaiia starina*. After retiring Levytsky was also a member of the editorial board of the journal *Ukraina* (1914–18) and served as vice-president of the Ukrainian Scientific Society in Kiev. He was elected acting president of the Ukrainian Academy of Sciences in December 1919 and president in March 1922, and he also headed the VUAN Legal Terminology Commission (from 1919), the entire Social-Economic Division (from May 1920), and its Commission for the Study of Customary Law.

Levytsky's works include studies of Ukraine in the second half of the 17th century (1875), the Samovydet's Chronicle (1878), Socinianism in Poland and Right-Bank Ukraine (1882), the Ruthenian church in the late 16th-century Polish-Lithuanian state (1884), B. Khmelnytsky (1884), folkways in 16th-century Volhynia and the Poltava region (1888, 1891), social and political life in Kiev and Right-Bank Ukraine in 1811–12 (1891), the first 50 years of the Kiev Archival Commission (1893), life in Little Russia in the second half of the 17th century (1902), the peasantry in Right-Bank Ukraine in 1826–50 (1906), and family life in 16th- and 17th-century Right-Bank Ukraine (1909). His historical stories about life in 16th-century Volhynia and the Hetman state were published in *Literaturno-naukovyi vistnyk* and separately as *Volyns'ki opovidannia* (Volhynian Stories, 1914), *Hanna Montovt* (1926), *Istorychni opovidannia* (Historical Stories, 1930), and *Po sudakh Het'manshchyny* (At the Law Courts of the Hetmanate, 1940). A bibliography of his works was published in *Zapysky Sotsiial'no-ekonomichnoho viddilu VUAN*, vol 1 (1923).

A. Zhukovsky

Levytsky, Osyp [Levyc'kyj], b 21 December 1886 in Verbizh, Kolomyia county, Galicia, d 11 June 1973 in Fort Wayne, Illinois. Educator. A graduate of Graz University (1913), during the First World War he served in the Austrian army and later in the Ukrainian Galician Army as chief of its press bureau and then as officer for special assignments. After the war he taught at and later became principal of the Ukrainian gymnasium in Stanyslaviv and organized scouting troops for the *Plast Ukrainian Youth Association. At the end of the Second World War he directed gymnasiums in Krynytsia and Vienna. After emigrating to the United States in 1949, he organized and supervised a Ukrainian school in Chicago and served as an inspector of schools for the Ukrainian Congress Committee of America (1954–62). He wrote a book of recollections, *Halyts'ka armiiia na Velykii Ukraini* (The Galician Army in Central Ukraine, 1921), and helped to edit the first two volumes of *Ukrains'ka halyts'ka armiiia* (The Ukrai-

nian Galician Army, 1958–60) and *Al'manakh stany-slavivs'koï zemli* (Almanac of the Stanyslaviv Region, vol 1, 1975).

Levytsky, Parfenii [Levyc'kyj, Parfenij] (secular name: Pamfil), b 10 October 1858 in Plishyvets, Hadiache county, Poltava gubernia, d January 1922 in Poltava. Orthodox bishop. A graduate of the Kiev Theological Academy (1882), he worked as an inspector of religious schools before being consecrated bishop of Mohaisk (near Moscow) in 1899. As bishop of Kamianets-Podilskyi (1904–9) he supported the Ukrainianization of church life. He supervised the editing and publication of the first Ukrainian translation of the Gospels in the Russian Empire and introduced its use in services, and in 1907 he asked the Holy Synod for permission to introduce Ukrainian into local parish schools. Levytsky also made frequent tours of his eparchy, on which he delivered sermons in Ukrainian and encouraged his priests to do the same. His conduct earned him the enmity of the conservative and chauvinistic Russian hierarchy of the church, and he was transferred to Tula.

Levytsky returned to Plishyvets after the February Revolution of 1917. Although in official retirement, he soon organized a Ukrainian Orthodox brotherhood in Poltava and then consented to be bishop of Poltava after the emigration of the serving bishop. At the request of the *All-Ukrainian Orthodox Church Council, he agreed to assume the leadership of the newly formed *Ukrainian Autocephalous Orthodox church (UAOC) in 1920 and was elected metropolitan of Kiev in May 1921. Under pressure from the hierarchy of the Russian church, however, he withdrew his candidacy and severed ties with the UAOC. He died soon afterward.

Levytsky, Roman [Levyc'kyj], b 18 August 1908 in Rohachyn, Berezhany county, Galicia. Banduryst-singer (bass-baritone), conductor, and teacher. After studying music at the Cracow State Conservatory (solo voice faculty, 1928–30) and graduating from the University of Cracow, he began a career in teaching bandura and voice and conducting choruses in Western Ukraine. Emigrating after the war to Germany and then the United States, in 1954–79 he taught bandura at the Ukrainian Music Institute of America in New York. He toured and appeared as leading soloist with such choruses as *Vatra*, *Dumka*, and the Ukrainian Bandurist Chorus. He later became a member and soloist (bandura) of the Kean College Choir in Union, New Jersey. In his appearances he favors works by D. Bortniansky, A. Vedel, M. Verbytsky, M. Lysenko, M. Leontovych, F. Kolessa, and O. Bilash, many of which he has recorded.

Levytsky, Severyn [Levyc'kyj] (pseud: Siryi Lev), b 6 March 1890 in Shchyrovtsi, Radekhiv county, Galicia, d 30 January 1962 in Buffalo, New York. Pedagogue and scout leader. He graduated from Lviv University and taught at the teachers' seminary in Lviv during the interwar period. He headed the Supreme Executive of the *Plast Ukrainian Youth Association in 1924–34. After the outlawing of Plast by the Polish authorities he devoted his efforts to ensuring youth activism according to the movement's principles. In 1941–5 he taught in schools set up by the *Ukrainian Central Committee and headed its *Ukrainian Teachers'

Severyn Levytsky

Volodymyr Levytsky
(1854-1939)

Labor Alliance. He emigrated to Germany in 1945. In 1947, at a Plast jamboree in Regensburg, he was elected *Nachalnyi Plastun* (Head Scout). He moved to the United States in 1949. He published many articles on educational matters in the Ukrainian press. His work on the early history of Plast, *Ukrains'kyi plastovyi ulad, 1911–45* (The Ukrainian Order of Plast, 1911–45, 1967), was published posthumously.

Levytsky, Venedykt Rudolf [Levyc'kyj], b 24 May 1783 in Ivanivtsi, Zhydachiv circle, Galicia, d 14 January 1851 in Lviv. Priest, pedagogue, and censor. A graduate of Lviv University (PHD, 1810), he was a priest at St George's Church in Lviv, vice-rector (1815–19) and rector (1820–4) of the Greek Catholic Theological Seminary, and professor of moral theology at Lviv University (from 1818). From 1828 to 1847 he was dean of the theology faculty of Lviv University. From 1832 Levytsky also served as a censor of Cyrillic books for the Austrian government in Galicia. In this capacity he fought the modernization of Ukrainian (favoring the *etymological spelling based on Church Slavonic) and opposed the publication (and importation, if they were published elsewhere) of works such as *Rusalka Dnistrovaia*, because they were too close to the vernacular. He also criticized *Rusalka Dnistrovaia* for its political liberalism, although it had been approved for publication by the Viennese censor. In 1837 he again became rector of the Lviv seminary. He published two textbooks on biblical studies and several articles on religious topics.

Levytsky, Volodymyr [Levyc'kyj], b 6 June 1854 in Starostyntsi, Vinnytsia county, Podilia gubernia, d 26 October 1939. Economist and statistician; full member of the AN URSR (now ANU) from 1925. A graduate of Odessa University (1878), he taught political economy at the Demidov Lyceum in Yaroslavl, at Kharkiv University (1893–1917), and at the Kharkiv Agricultural Institute (1919–30). He wrote a number of books in economic history and political economy, including *Sel'skokhoziaistvennyi krizis vo Frantsii (1861–1892)* (The Agricultural Crisis in France [1861–1892], 1899), *Istoriia politicheskoi ekonomii v sviazi s istoriei khoziaistvennogo byta* (The History of Political Economy in Relation to the History of Agricultural Life, 1914), and *Ocherki istorii khoziaistvennogo byta narodov drevnego Vostoka: Vaviloniia, Egipet* (Outlines of the History of the

Economic Life of the Peoples of the Ancient East: Babylonia, Egypt, 1926).

Volodymyr Levytsky
(1872-1956)

Yevhen Levytsky

Levytsky, Volodymyr [Levyc'kyj], b 31 December 1872 in Ternopil, Galicia, d 13 August 1956 in Lviv. Mathematician and physicist; full member of the Shevchenko Scientific Society (NTSh) from 1899. Levytsky graduated from Lviv University (PH D, 1901) and then taught mathematics and physics in gymnasiums in Lviv and Ternopil as well as at the Lviv (Underground) Ukrainian University. From 1940 to 1956 (with interruptions due to war) he taught at the Lviv Pedagogical Institute. For many years he headed the mathematical-natural sciences-medical section of the NTSh in Lviv and edited its publications; he twice served as NTSh president (1931-5). He wrote numerous scientific papers, mostly devoted to the study of functions of complex variables as well as problems in theoretical physics. He is also known for his work in mathematical, physical, and chemical terminology.

Levytsky, Volodymyr [Levyc'kyj], b 16 August 1888 in Krychka, Nadvirna county, Galicia, d 14 February 1980 in New York. Community leader. He worked for the *Union for the Liberation of Ukraine in German internment camps (1915-18) and then headed the press office of the UNR mission in Berlin (1919-20). After emigrating to the United States in 1924, he became a leading member of *Oborona Ukrainy and editor of its *Orhanizatsiini visti* (1936-41). In 1930 he organized a choir in Scranton, Pennsylvania, and in 1933 he was director of the Ukrainian pavilion at the world's fair in Chicago. He served as vice-president of the *Ukrainian Fraternal Association (1933-41). At the same time he was a secretary of Oborona Ukrainy and chief editor of its *Hromads'kyi holos*. He gradually adopted a Sovietophile outlook that helped cause a split in Oborona Ukrainy at its 1947 convention.

Levytsky, Volodymyr. See Lukych, Vasyl.

Levytsky, Vsevolod [Levyc'kyj], b 2 September 1913 in Radekhiv, Galicia, d 31 December 1976 in Winnipeg. Political activist. He was arrested in 1933 for being a member of the OUN and was forced to leave Ukraine. While studying medicine at Zagreb, he was appointed to the leadership of the OUN and served as contact with the Croat

underground. When civil war erupted in Spain, he was sent there to organize Ukrainian units of the Spanish foreign legion. This idea fell through, but Levytsky himself joined the Falange and was wounded in action. He returned to Galicia with the rank of captain and helped organize the *Division Galizien in 1943. By the end of that year he had been arrested by the Gestapo, and he spent the rest of the war in a concentration camp. In 1948 he emigrated to Canada. He was active in Ukrainian veterans' organizations in Winnipeg. From 1973 he was curator of the Ukrainian military history museum of the Ukrainian Academy of Arts and Sciences.

Levytsky, Yaroslav [Levyc'kyi, Jaroslav], b 3 May 1878 in Pistyn, Kosiv county, Galicia, d 1961. Catholic priest, scholar, and publicist. He was ordained in 1901 after finishing theological studies in Lviv, and then taught at the Academic Gymnasium, the Greek Catholic Theological Academy, and the Ukrainian theological faculty at Lviv University (from 1921). He wrote many works, including *Katolyts'kyi narodnii katekhyzm* (The Catholic Folk [Popular] Catechism, 3 vols, 1913-14), a translation of the New Testament (1921), several surveys of church history, a survey of early Ukrainian homiletics (1930; 2nd edn 1973), and numerous popular and scholarly works. He also edited many journals, including *Nyva* (1904-7 and 1910-18) and *Osnova* (1906-13).

Levytsky, Yevhen [Levyc'kyj, Jevhen], b 17 January 1870 in Sydoriv, Husiatyn county, Galicia, d 21 November 1925 in Vienna. Journalist, civic figure, and political leader. While studying at Lviv University he became critical of the populists and helped found the *Ukrainian Radical party. He later helped establish the *National Democratic party (1899) and was a coauthor of its program. Its unification under the command of the Popular Committee was largely his accomplishment. He also edited the party's newspapers *Buduchnist'* (1899), *Svoboda* (1902), and *Dilo* (1903-6). In 1907 and 1911 he was elected from the Stanyslaviv district as deputy to the Austrian parliament, where he played a leading role in the Ukrainian caucus. As a member of the *Union for the Liberation of Ukraine, he went on lecture tours of Germany and Austria during the First World War and published German-language booklets in an effort to gain public support for Ukrainian independence. In 1919-20 he served as envoy of the Ukrainian National Rada in Berlin and Prague. Afterward he resumed his law practice in Vienna.

Levytsky, Yosyp [Levyc'kyj, Josyp], b 1801 in Tovmachyk, Kolomyia circle, Galicia, d 24 May 1860 in Nahuievychi, Sambir circle, Galicia. Writer, philologist, publicist, and Ukrainian Catholic priest. After completing his theological studies in Vienna he taught Church Slavonic in Peremyshl (1825-53) and served as curator of several parishes. His translations of German literature (J. Schiller and J. Goethe) and his own fables and verses began to appear in **yazychiie* in 1822. In 1834 he wrote *Grammatik der ruthenischen oder kleinrussischen Sprache in Galizien*. Levytsky believed that *Church Slavonic should be the basis for literary Ukrainian, although the revised version of this grammar, *Grammatika iazyka russkogo v Galitsii* (Grammar of the Ruthenian Language in Galicia, 1849 and 1850), was closer to the vernacular. In his gram-

mar and in *Priruchnyi slovar slaveno-pol'skii* (Slavonic-Polish Reference Dictionary, 1830) he intermixed elements of the Ukrainian vernacular (*Sian dialects of the Pere-myshl region) with elements of Church Slavonic and Russian. In the 1830s he engaged in polemics with Y. *Lozynsky, criticizing particularly his proposals to adopt the Latin alphabet for Ukrainian.

Vasyl Levytsky-Sofroniv

Levytsky-Sofroniv, Vasyl (Sofroniv-Levytsky) [Levy-c'kyj, Vasył'], b 14 December 1899 in Stryhantsi, Stry county, Galicia, d 1 November 1975 in Toronto. Editor and author. Levytsky graduated from Charles University in Prague and worked as an editor of *Hospodars'ko-kooperyvnyi chasopys* (1927–43) and *Litopys Chervonoj kalyny* (1929–39) in Lviv. He came to Canada in 1950 and worked on the editorial staff of *Vil'ne slovo* (1954–60) and **Novyi shliakh* (1960–72). He served as president of the Ukrainian Journalists' Association in Canada (1967–9). He is the author of 14 volumes of fiction, plays, and essays. He also translated French and German classics into Ukrainian. An edition of his selected works was published in 1972.

Lewicki, Anatol, b 4 April 1841 in Prysivtsi, Zolochiv district, Galicia, d 25 April 1899 in Cracow. Polish historian. The son of a Ukrainian Greek Catholic priest, he studied at Lviv University (1862–6) and was a gymnasium teacher in Peremyshl (1867–79) and Lviv (1879–83) before becoming a professor of history at Cracow University in 1883. He was elected a member of the Polish Academy of Sciences in 1890. He wrote articles on the history of 14th- to 16th-century Ukraine, coauthored a Polish secondary-school textbook on the history of Poland and adjacent Ruthenian lands (1884; 7th edn 1917), and wrote books on ancient Peremyshl (1881) and Grand Duke Švitrigaila of Lithuania (1892). He also published a list of archival sources for Polish history.

Lewicky, Andrew [Levyč'kyj, Andrij], b 6 June 1945 in Oberaldorf, Bavaria. Ophthalmologist. A graduate of Northwestern University (MD, 1970), he is an assistant professor of ophthalmology at Rush Medical College and codirector of the ophthalmology section at the Illinois Masonic Medical Center in Chicago. A specialist in cataract surgery, in 1981 he invented a surgical instrument (the Chamber Maintainer System) that makes cataract extraction and intraocular lens insertion safer and easier.

Lewytkyj, Borys. See Levytsky, Borys.

Lexicography. The making of dictionaries. Ukrainian lexicography dates back to the 16th century, when the first *alfavyty* and **azbukovnyky*, handwritten glossaries of Hebrew, Greek, and Church Slavonic words in the Holy Scriptures and other religious writings, were prepared. These were followed by the first printed lexicons, compiled by L. *Zyzanii (1596; repr 1964) and P. *Berynda (1627, 1653; repr 1961), reversed as a Church Slavonic (Ukrainian)-Polish lexicon in Suprasl 1722, repr 1751, 1756, and 1804 in Pochaiv. A. Calepino's 1590 Latin-multilingual dictionary served as the basis for a 'Heptaglot' including Ukrainian translation of approx 2,500 Latin words that was prepared somewhere in the Ottoman Empire in the early 17th century (manuscript preserved at the Bodleian Library, Oxford). With the introduction of Latin courses at the Kievan Mohyla College, Ye. *Slavynetsky prepared a Latin-Slavonic (Ukrainian) lexicon (1642; repr 1973) based on the Polish part of A. Calepino's and G. Knapski's 1621 Polish-Latin dictionary. He revised this with A. *Koretsky-Satanovsky's help ca 1650 in Moscow (repr Rome 1968, Kiev 1968, 1973). Later Slavynetsky prepared a Greek-Slavonic-Latin lexicon (before 1675; manuscript preserved at the Moscow Patriarchal Library), which served as the basis for F. Polikarpov-Orlov's printed lexicon (1704). A reverse dictionary of Berynda's, *Synonima slavenorosskaia* (Slavonic-Ruthenian Synonyms), was compiled anonymously in the middle of the 17th century (repr 1889, 1964).

In the early 1700s an anonymous 'Dictionarium Latino-Rutenicum' of approx 20,000 words in the Ukrainian redaction of Church Slavonic was prepared (manuscript preserved at the Franciscan monastery in Dubrovnik). In 1718–24, I. Maksymovych prepared an unpublished Latin-Slavonic dictionary based on G. Knapski's 1626 Latin-Polish dictionary (facsimile edn Rome, 1991).

Ukraine under Russian rule. In the Russian Empire, the earliest lexicographic works containing vernacular Ukrainian words appeared in St Petersburg. The comparative dictionary edited by P. Pallas (2 vols, 1787, 1789) included a glossary of 285 Ukrainian words compiled by H. Bacmeister. Other Ukrainian-Russian dictionaries were prepared in the 1830s; the only extant manuscripts are 19 notebooks containing 4,500 words (ca 1835), which have been ascribed to A. Metlynsky, and P. Biletsky-Nosenko's pioneering dictionary of over 20,000 Ukrainian word nests (1838–43), which was published only in 1966.

The first Ukrainian-Russian dictionaries to be published separately were by O. Afanasiev-Chuzhbynsky (6,000 words from A to Z, in *Izvestiia Otdela russkago iazyka i slovesnosti Imperatorskoi akademii nauk*, 1855, parts 1–2, 4), K. Sheikovskiy (A–B, 1862; T–Ya, 1883, 1886), M. Zakrevskiy (11,127 words, 1861), F. Piskunov (ca 8,000 words, 1873, 1882), and V. Dubrovskiy (1909, 1914). The first separately printed Russian-Ukrainian dictionary was by M. Levchenko (7,600 words, 1874). After the imposition of the *Ems Ukase (1876), two decades passed before the next two Russian-Ukrainian dictionaries – by M. Komarov et al (37,000 words, 4 vols, 1893, 1894, 1896, 1898, published under the pseudonyms M. Umanets and A. Spilka in Austrian-ruled Lviv, repr, Berlin 1924; aka 'Russian-Galician dictionary,' published under the pseudonym A. Hurt in Vienna 1896–8) and by Ye. Tymchenko (40,000 words, 2 vols, Kiev 1897, 1899) – were published. The most important Ukrainian vernacular–Russian dictionary was initiated by

P. *Kulish in 1861, compiled and edited successively by P. Zhytetsky, V. Naumenko, and Ye. Tymchenko, and completed by B. *Hrinchenko (68,000 words, 4 vols, 1907–9; repr, Berlin 1924, Kiev 1925, 1958–60). It played a decisive role in the later standardization of literary Ukrainian.

A few specialized dictionaries dealing with vernacular botanical, agricultural, and technical terms were published (see *Terminology). Ukrainian vernacular terms were also included in N. Annenkov's Russian botanical dictionary (1859, 2nd edn 1878), the Imperial Academy's Russian dictionary edited by Ya. Grot and A. Shakhmatov (1891–1916), and I. Sreznevsky's dictionary of Old East Slavic (4 vols, 1893, 1895, 1903, 1912; repr, Moscow 1958).

The only lexicons published in the Russian Empire with explanations in Ukrainian were a dictionary of 1,500 foreign terms and little-understood words (1906; repr after 1914 in Winnipeg) by V. Domanytsky and a dictionary of T. Shevchenko's vocabulary (7,000 words, 1916) by Nestor Litopysets (pseud of N. Malecha).

Western Ukraine under Austrian rule. In Galicia, Y. Levytsky's Slavonic-Polish dictionary (1830, based on the Suprasl lexicon 1722, repr 1751, 1756, and 1804 in Pochaiv) contained Ukrainian vernacular words. Ukrainian lexicography did not truly develop in Galicia and Bukovyna, however, until the latter half of the 19th century. Nearly a century of Austrian rule passed before the first German-Ukrainian dictionary, compiled by O. Partytsky (35,000 words, 1867), was published. One by V. Kmitykevych (34,000 words, 1912) appeared almost a half-century later. The first Ukrainian-German dictionary (over 64,000 words) was compiled by Ye. Zhelekhivsky and S. Nedilsky (2 vols, 1884, 1886; repr 3 vols, 1982). It served as the foundation for the Ukrainian-German dictionary by O. Popovych (1904; repr [ca 25,000 words] 1911). I. Ohonovsky's Greek-Ukrainian dictionary of 13,000 words and names in Homer's *Odyssey* and *Iliad* (1900), Yu. Koblyan-sky's Ukrainian-Latin (1907) and Latin-Ukrainian (17,000 words and phrases, 1912) dictionaries, and Y. Tanchakovsky's small Ukrainian-Polish dictionary (1910) were used in Galicia's Ukrainian schools.

Several specialized dictionaries of legal, political, administrative, botanical, mathematical, physical, chemical, and economic terms were compiled (see *Terminology).

In Transcarpathia, where the official language was Hungarian, Ruthenian-Hungarian dictionaries were published by O. Mytrak (ca 70,000 words, 1881) and L. Csopey (ca 20,000 words, 1883). The Ruthenian part was a combination of the Transcarpathian dialects and **yazychiie*.

Independent Ukraine, 1917–19. After the February Revolution, Ukrainian became the major language of communication. The acute shortage of dictionaries was remedied to some extent by the publication of a dictionary of grammatical terminology and orthography approved by the Society for School Education (1917); an orthographic dictionary by H. *Holoskevych (3 edns, 1918); over 20 Russian-Ukrainian dictionaries by authors such as V. Buriachenko (1917), S. Ivanytsky and F. Shumlinsky (2 vols, 1918), M. Kamenetsky (1918), O. Konysky (3 edns, 1918), M. Kolomyichenko (1918), D. Lebid (1918), the Chas publishing house (1918), B. Stepanenko (2 edns, 1918), P. Terpylo (3 edns, 1918), A. Tomylenko and M. Antonovych (1918), P. Shestopal (1918), and V. Hrebinkovsky (1919); Ukrainian-Russian dictionaries by F. Bezkrövy and S. Pereiaslavets (1917), V. Dubrovsky (edns 3–6, 1917–18),

and two anonymous authors (1917, 1918); a dictionary of foreign terms by Z. Pyptenko (1918); a dictionary of Ukrainian physical terminology by the Ukrainian Scientific Society (1918); a Russian-Ukrainian legal dictionary by V. Leontovych and O. Yefymov (2 edns, 1917, 1919); a dictionary of physics terms by O. Kurylo and H. Kholodny (1918); and 20 small (8–60-page) terminological dictionaries (10 of them Russian-Ukrainian ones) in the fields of medicine, geography, science, mathematics, law, and administration.

Western Ukraine, 1918–41. Ukrainian lexicographic works published in Galicia in this period included a German-Ukrainian dictionary by M.N. (1918); a Ukrainian-Polish dictionary by I. Svientsitsky (1920); a nomenclature of higher plants by M. Melnyk (1922); a Ukrainian stylistic dictionary by I. Ohienko (1924); an orthographic dictionary by K. Kysilevsky (1927, 1934); a Ukrainian-Polish and Polish-Ukrainian dictionary by Ye. Hrytsak and K. Kysilevsky (1931); a Ukrainian-German dictionary by V. Kalynovych (5,000 words, 1931); a musical dictionary by Z. Lysko (1933); I. Ohienko's dictionary of words not used in literary Ukrainian (1934); a botanical dictionary by S. Makowiecki, of 3,500 Latin names and 21,253 Ukrainian equivalents transliterated using the Polish alphabet (1936); a pocket dictionary of foreign terms by R. Borys and S. Skorbut (1937); a dictionary of foreign terms by M. Matchak (1938); an orthographic dictionary by O. Paneiko (1941); and a German-Ukrainian dictionary by Ya. Yarema (1941).

In Czechoslovakian-ruled Transcarpathia, Hungarian-Ruthenian (Transcarpathian dialect) dictionaries by N. Beskyd (1919), O. Mytrak (1922), and E. Bokshai, Yu. Revai, and M. Brashchaiko (1928) and a Hungarian-Ruthenian dictionary of legal terms by E. Toronsky (1925–7) were published.

Soviet Ukraine, 1920–32. In the first decade of Soviet rule, lexicographers, most of them in Kiev, concentrated on the preparation of practical Ukrainian-Russian and Russian-Ukrainian dictionaries and the development of a standard *orthography and scientific *terminology. New Ukrainian-Russian dictionaries by D. Yavornytsky (A–K, 5,000 words, 1920), L. Savchenko (1923; 2nd edn 1924; 3rd and 4th edns 1925; 5th edn 1926), A. Nikovsky (1927), V. Mankivsky and M. Shcherbak (1929; 2nd edn 1930), and O. Iziumov (1930) were published. The seminal Ukrainian-Russian dictionary edited by B. Hrinchenko was published in 1925, and S. Yefremov, A. Nikovsky, and others began working on a revised third edition incorporating examples from contemporary literary sources (the first edition had been based on literature written before 1870); only vols 1–3 (A–N, 1927–8) were published.

New Russian-Ukrainian dictionaries by the State Publishing House of Ukraine (5 edns, 1923–5), L. Savchenko (1925), O. Iziumov (1926; 2nd and 3rd edns 1927), M. Yohansen, M. Nakonechny, K. Nimchynov, and B. Tkachenko (1926), and H. Sabaldyr (1926) appeared, and the Russian-Ukrainian dictionary edited by M. Komarov et al was reprinted (1925). The VUAN Commission for the Compilation of a Dictionary of Contemporary Ukrainian published a 2,000-page Russian-Ukrainian dictionary (letters A–P) edited by S. Yefremov, V. Hantsov, H. Holoskevych, M. Hrinchenko, A. Krymsky, and A. Nikovsky (vol 1, 1924; vol 2 [3 parts]: 1929, 1932–3; vol 3, parts 1–2, 1927–8); it is one of the finest achievements of Ukrainian lexicography.

Also appearing were orthographic dictionaries by H. Holoskevych (4th–7th edns 1922, 1924, 1926, 1930), O. Iziumov (60,000 words, 1931; revised by O. Paneiko, 1941), H. Sabaldyr and O. Kolomatska (25,000 words, 1930), and other authors; dictionaries of foreign terms by the Chas publishing house (1924) and O. Badan-Yavorenko (1932); a dictionary of Ukrainian administrative phraseology (1926, 1927) by V. Pidmohylny and Ye. Pluzhnyk; a German-Ukrainian dictionary by I. Sharovolsky (20,000 words, 1929; rev edn 1948); a Russian-Ukrainian dictionary of proverbs by H. Mlodzynsky (1929); part of a historical dictionary of the Ukrainian language that Ye. Tymchenko (ed) and others had compiled at the turn of the 20th century (*A-Zh*, 1930, 1932; repr, Munich 1985); and a dictionary of foreign terms by I. Boikiv, O. Iziumov, H. Kalyshevsky, and M. Trokhymenko (1932; repr, New York 1955).

Terminological research and compilation was co-ordinated initially in Kiev by a terminological commission (est 1918) at the Ukrainian Scientific Society and the VUAN Orthographic and Terminological Commission (est 1919). In 1921 these commissions were amalgamated to form the VUAN *Institute of the Ukrainian Scientific Language (IUNM). Before it was disbanded in 1930, the IUNM published 20 Ukrainian-Russian dictionaries in the mathematical, technical, natural, and social sciences. In 1931–3 the Institute of Linguistics continued the work of the IUNM. About 70 terminological dictionaries came out in Ukraine by 1933.

Soviet Ukraine since 1933. During the Stalinist terror most Ukrainian lexicographers were repressed as 'bourgeois nationalist saboteurs,' and their works were blacklisted (see *Language policy). Thenceforth a Russified scientific orthography and terminology, expunged of all words deemed archaic, dialectal, or 'contrived' (ie, introduced in the 1920s), was imposed and published in 5 VUAN terminological bulletins (medicine, mathematics, botany, physics, manufacturing, ed P. Mustiatsa, 1934–5), 10 Russian-Ukrainian terminological dictionaries for secondary schools (1933–5), 2 AN URSR Russian-Ukrainian dictionaries (S. Vasylevsky et al, 1937; ed M. Kalynovych, L. Bulakhovsky, and M. Rylsky, 80,000 words, 1948; rev edns 1955–6, 1961–2), an orthographic dictionary (D. Levi, H. Levchenko, and L. Rak, 1936), a dictionary of medical terms (I. Kyrychenko et al, 1936), a Latin-Ukrainian-Russian medical dictionary (M. Knipovych, 1948), and other Russian-Ukrainian and orthographic dictionaries.

Russified orthography, vocabulary, and terminology have remained normative in the many Soviet Ukrainian dictionaries published since Stalin's death. Nonetheless, the post-Stalin era has been the most productive period in Ukrainian lexicography in terms of the number and variety of dictionaries published. Many orthographic dictionaries and handbooks have appeared (I. Kyrychenko, 40,000 words, 1955, rev edn 1960; M. Pohribny, 50,000–52,000 words, 1959, rev edn 1964; I. Vykhovanets et al, 50,000 words, 1973; A. Buriachok, L. Palamarchuk, V. Rusanivsky, and N. Totska, 1973; S. Holovashchuk et al, 114,000 words, 1975, 1977; S. Holovashchuk, 40,000 words, 1979, 1989). The AN URSR (now ANU) has sponsored the preparation and publication of several major multivolume dictionaries: the largest Ukrainian-Russian and Russian-Ukrainian dictionaries (ed I. Kyrychenko et al, 6 vols, 121,700 words, 1953, 1958, 1961–3; ed I. Bilodid et al, 3

vols, 1968, rev edn 1980–1), the largest dictionary of the Ukrainian language (ed I. Bilodid et al, 11 vols, 1970–80), the first dictionary of 14th- to 15th-century Middle Ukrainian (ed L. Humetska et al, 2 vols, 1977–8), and the Ukrainian etymological dictionary in seven projected volumes (ed O. Melnychuk et al; vol 1: *A–H*, 1982; vol 2, *D–Koptsi*, 1985; vol 3, *Kora–M*, 1989). These have served as the foundation of a Russian-Ukrainian dictionary for secondary schools (D. Hanych and I. Oliinyk, 1962; 5th edn 1979), the AN URSR Ukrainian-Russian dictionary (ed V. Ilin, 65,000 words, 1964; 4th edn 1976), and a one-volume school dictionary of the Ukrainian language (ed D. Hrynchyshyn, L. Humetska, et al, 1978).

Over 15 other bilingual dictionaries have appeared: four English-Ukrainian (M. Podvezko, 50,000 words, 1948, 1951; M. Podvezko, 25,000 words, 1955, 1965; M. Podvezko and M. Balla, 65,000 words, 1974, repr Edmonton 1988; Yu. Zhluktenko, N. Bykhovets, and A. Shvants, 20,000 words, 1978, 1982, 1984), a Ukrainian-English (M. Podvezko, 60,000 words, 1952; rev edn 1957, 1962, 1965), four German-Ukrainian (ed I. Sharovolsky, 2nd edn, 25,000 words, 1955; V. Leshchynska, O. Mazny, and K. Sylvestrova, 50,000 words, 1959; V. Bukhbinder, 2,500 words, 1972; ed Ye. Lysenko, 20,000 words, 1978, 1983), a (the first) French-Ukrainian (O. Andriievska and L. Yavorovska, 50,000 words, 1955), a Polish-Ukrainian (ed L. Humetska et al, 2 vols [3 books], 1958–60), (the first) two Ukrainian-French (O. Andriievska and L. Yavorovska, 50,000 words, 1963; M. Lysenko and Y. Donets, 1985; K. Andrashko, O. Kolomyiets, and K. Tyshchenko, 20,000 words, 1986), a (the first) Bulgarian-Ukrainian (I. Stoianov and O. Chmyr, 43,000 words, 1988), and a major Czech-Ukrainian (AN URSR, 2 vols, 1988–9) dictionary. The only two English-Ukrainian phraseological dictionaries (K. Barantsev, 7,000 phrases, 1956; 30,000 phrases, 1969), a dictionary of 2,500 synonyms in the English language (K. Barantsev, 1964), and a Russian-Ukrainian-Hungarian phraseological dictionary (V. Laver and I. Zikan, 1985) have also appeared.

In 1957 a Dictionary Commission headed by Y. Shtokalo was founded at the ANU Institute of Linguistics. It has co-ordinated the compilation of over 20 Russian-Ukrainian specialized terminological dictionaries (see *Terminology).

In the 1950s and 1960s many other specialized dictionaries appeared: a Russian-Ukrainian dictionary of geographic names (A. Kara-Mosko and M. Tokarsky, 1953), a dictionary of linguistic terms (Ye. Krotevych and N. Rodzevych, 1957), two dictionaries of Ukrainian synonyms (A. Bahmet, *Vitchyzna*, 1959, no. 2–1961, no. 12; P. Derkach, ed and rev S. Levchenko, 1960), dictionaries of terms in literary scholarship (V. Lesyn and O. Pulynets, 1961; rev edns 1965, 1971), a Ukrainian-Russian and Russian-Ukrainian dictionary of personal names (ed I. Kyrychenko, 1954; ed S. Levchenko, 1961, 1967; L. Skrypnyk, 1972, 1976, 1986), a brief geological dictionary (V. Vyshniakov, 1962), a Ukrainian-Russian dictionary of geographic names in the Ukrainian SSR (V. Nezhnyypapa, 1964; rev edn 1971), a dictionary of T. Shevchenko's language (ed V. Vashchenko et al, 2 vols, 1964), a short dictionary of musical terms (S. Pavliuchenko, 1965), a Ukrainian phraseological dictionary (N. Batiuk, 1966), a political dictionary (1966; 3rd edn 1982), a dictionary of over 2,200 Ukrainian idioms (H. Udovychenko, 1968), a handbook of

Ukrainian surnames (Yu. Redko, 1969), and a brief Russian-Ukrainian dictionary of printing and publishing terms (V. Bova and M. Dolomino, 1969).

Even more specialized dictionaries were published in the 1970s and 1980s: a Ukrainian-Russian and Russian-Ukrainian phraseological dictionary (I. Oliinyk and M. Sydorenko, 1971; rev edn 1978), a dictionary of musical terms (Yu. Yutsevych, 1971; rev edn 1977), a dictionary for fans of cinema (M. Panfilov, 1971), a numismatic dictionary (V. Zvarych, 1972), a toponymic dictionary of the Ukrainian SSR (M. Yanko, 1973), an economic dictionary (ed P. Bahrii and S. Dorohuntsov, 1973), a dictionary of foreign words (ed O. Melnychuk, 1974; 2nd rev edn 1985), a juridical dictionary (eds B. Babii, V. Koretsky, and V. Tsvetkov, 1974), an economic-agricultural dictionary (O. Krysalny, 1975), a dictionary of Shevchenko studies (2 vols, Ye. Kyryliuk et al, 1976-7), a dictionary of the language in H. Kvitka-Osnovianenko's works (3 vols, 1978), a dictionary of Ukrainian rhymes (A. Buriachok and I. Huryn, 1979), a dictionary of Ukraine's hydronyms (ed A. Nepokupny, O. Stryzhak, and K. Tsiluiko, 1979), a dictionary of associative norms in the Ukrainian language (N. Butenko, 1979), a scientific dictionary (I. Bilenko, 1979), a frequency dictionary of words in Soviet Ukrainian prose from 1945 to 1970 (ed V. Perebyinis, 2 vols, 1981), a dictionary reference book of morphemic analysis (I. Yatsenko, 2 vols, 1981), a morphemic dictionary (L. Poliuha, 1983), a major Ukrainian phraseological dictionary (H. Udovychenko, 2 vols, 1984), a Ukrainian morphological dictionary of medical terminology (O. Fedotov, O. Ochkurenko, and K. Fenchny, 1985), a dictionary of classical mythology (ed A. Biletsky, 1985), a new dictionary of linguistic terms (D. Hanych and I. Oliinyk, 1985), a brief dictionary of Ukrainian periphrases (M. Kolomiets and Ye. Rehushevsky, 1985), a Ukrainian reverse dictionary (ed S. Bevzenko, 1985), a dictionary of Ukrainian paronyms (D. Hrynchyshyn and O. Serbenska, 1986), a biological dictionary (ed K. Sytnyk and V. Topachevsky, 2nd rev edn, 1986), a philosophical dictionary (V. Shynkaruk, 2nd rev edn, 1986), a dictionary of over 2,000 pairs of Ukrainian antonyms (L. Poliuha, 1987), an encyclopedic dictionary (A. Kudrytsky et al, 3 vols, 1986-7), a dictionary of over 21,000 Ukrainian abbreviations and acronyms (ed M. Feshchenko and V. Zhaivoronok, 1988), a dictionary of Ukrainian phraseological synonyms (M. Kolomiets and Ye. Rehashevsky, 1989), and a dictionary of difficult language usage in Ukrainian (S. Yermolenko, 1989).

Since the 1950s dialectal dictionaries of Odessa oblast (O. Melnychuk, *Leksykohrafichnyi biuletyn' [LB]*, 2 [1952]), Sumy oblast (I. Pryimak, 1957; A. Moskalenko, Odessa 1958), Transcarpathia (Y. Dzendzelivsky, 1958; H. Hrytsak, typescript, 1962), the lower Dniester region (Y. Dzendzelivsky, *LB*, 6 [1958]; A. Berlizov, 1959), right-bank Cherkasy oblast (P. Lysenko, *LB*, 6 [1958]), Zhytomyr oblast (L. Palamarchuk, *LB*, 6 [1958]), the Poltava region (V. Vashchenko, 1960), Polisia (P. Lysenko, 1961, 1974; M. Nykonchuk, 1979), Bukovyna (V. Prokopenko, in *Karpat'skaia dialektologiya i onomastika*, ed G. Klepikov, Moscow 1972), the Boiko region (M. Onyshkevych, 2 vols, 1984), and western Volhynia (M. Korzoniuk, in *Ukrains'ka dialektna leksyka*, ed I. Matviias et al, 1987) have been published.

Interwar Eastern and Central Europe. Ukrainian émigrés, most of them affiliated with the *Ukrainian Free

University and *Ukrainian Husbandry Academy in Czechoslovakia and the *Ukrainian Scientific Institutes in Berlin and Warsaw, also compiled dictionaries. They published a dictionary of foreign terms (Z. Kuzelia, Leipzig 1919), the first two Czech-Ukrainian dictionaries (N. Kovalevska-Koroleva, 1920; N. Shcherbyna, 1924), some terminological dictionaries, two German-Ukrainian dictionaries (H. Nakonechna, 1939, 1941; the *Ukrainske Vydavnytstvo* publishing house, 1941), two Ukrainian-German dictionaries (J. Rudnyckyj, over 20,000 words, 1940, 1941; Z. Kuzelia and J. Rudnyckyj, 98,000 words, 1943, repr Wiesbaden 1983), and a Ukrainian-Italian dictionary (Ye. Onatsky, 1941). The Ukrainian-Russian dictionary edited by B. Hrinchenko was reprinted in Berlin in 1924. Also of note were the German-Ukrainian and Ukrainian-German dictionary of military terminology (I. Ilnytskyj-Zankovych, 1938) and German-Ukrainian and Ukrainian-German dictionary of aviation terminology (I. Ilnytskyj-Zankovych, 1939).

The New World. The earliest dictionaries published outside Ukraine appeared in Canada: M. Yasenitsky's *Pocket Dictionary of the Ukrainian-English and English-Ukrainian Languages* (1914) and E. Kozlovsky's *English-Ukrainian Pocket Dictionary* (1917, 1923). Since that time other dictionaries have appeared in Canada, most of them after the Second World War: H. Platsko's (1929) and J. *Krett's (1931) Ukrainian-English and English-Ukrainian dictionaries, F. Dojacek's *New English Interpreter and Ukrainian-English and English-Ukrainian Dictionary* (1930), C. Andrusyshen and J. Krett's *Ukrainian-English Dictionary* (1957; repr 1981, 1985), I. Ohienko's *Grammatical and Stylistic Lexicon of Shevchenko's Poetry* (1961), V. Ninovsky's Ukrainian reverse dictionary (1969), J. Rudnyckyj's *Etymological Dictionary of the Ukrainian Language* (2 vols, 1962-75, 1978-82), F. Bohdan's *Dictionary of Ukrainian Surnames in Canada* (1974), P. Shtepa's dictionary of foreign terms (1977), I. Ohienko's etymological-semantic dictionary (3 vols, A-O, 1979, 1982, 1988), P. Shtepa's phraseological dictionary (1980), and W. Niniows'kyj's *Ukrainian-English and English-Ukrainian Dictionary* (24,000 words, 1985). M. Podvezko's English-Ukrainian and Ukrainian-English dictionaries (1958) and I. Ohienko's 1924 Ukrainian stylistic dictionary (1978) have been reprinted.

In the United States the first Ukrainian-English and English-Ukrainian dictionary was M. Surmach's pocket dictionary (1931). Several Ukrainian dictionaries have been published since the Second World War: an English-Ukrainian nautical dictionary (W. Stepankowsky, 1953), an English-Ukrainian dictionary (J. Salastin, 1956), a Ukrainian dictionary of foreign terms (A. Orel, 3 vols, 1963-6), an anatomical dictionary (F. Tsekhivsky and O. Cherniavsky, 1971), two orthographic dictionaries (P. Kovaliv, 1977; ed J. Rudnyckyj and K. Tserkevych, 1979), an English-Ukrainian scientific and technical dictionary (A. Wowk, 1982), and an English-Ukrainian dictionary of color names (A. Wowk, ed B. Struminsky, 1986). Several dictionaries have been reprinted: H. Holoskevych's orthographic dictionary (8th edn 1952, 1962); I. Boikiv, O. Iziumov, H. Kalyshevsky, and M. Trokhymenko's 1932 dictionary of foreign terms (1955); M. Podvezko's *Ukrainian-English Dictionary* (1954, 1963, 1973); M. Halyn's 1926 Latin-Ukrainian medical dictionary (1969); I. Ohienko's 1934 dictionary of words not used in literary Ukrainian (1973); P. Derkach's 1960 dictionary of Ukrainian synonyms (rev edn, ed V. Volkov, N.

Pazuniak, K. Tserkevych, 1975); A. Bahmet's 1959–61 dictionary of Ukrainian synonyms (A–P, ed H. Luzhnytsky and L. Rudnytsky, 1982); the Russian-Ukrainian dictionary of legal terms (ed A. Krymsky, 1984); M. Knipovych's 1948 Latin-Ukrainian-Russian medical dictionary (1985); and P. Oesterle's 1944 German-Ukrainian medical dictionary (1986).

In Argentina, a Ukrainian-Spanish and Spanish-Ukrainian dictionary by T. Petrivsky was published in Buenos Aires as early as 1930. In Australia, a few dictionaries by postwar Ukrainian immigrants have appeared: an orthographic dictionary (D. Nytchenko, 1968, 1985), a *Ukrainian-English Dictionary for Popular Use* (M., W., and A. Dejko, 50,000 words, 1979), and an *English-Ukrainian Dictionary for Popular Use* (M., W., and A. Dejko, 50,000 words, 1979).

Postwar Western Europe. A few dictionaries by and for displaced persons were published in Germany immediately after the Second World War: V. Zakharkiv's (1945–6) and V. Lev and I. Verbiyany's (1947) Ukrainian-English and English-Ukrainian dictionaries and A. Orel's orthographic dictionary (1946). Since that time the dictionaries published in Germany have been O. Horbach's dialectal dictionaries of the northern Dniester region (*Naukovi zapysky UTHI* [NZUTHI], vol 7 [1965]), northern Dobrudja (NZUTHI, vol 15 [1968]; *Zapysky NTSh*, vol 185 [1969]), Terebovlia county (NZUTHI, vols 19–20 [1969–70]), western Polisia (NZUTHI, vol 25 [1973]), the Prešov region (1973), and southern Volhynia (1973); M. Savchuk's German-Ukrainian electrotechnical dictionary (UTHI, 1981); and V. Irklyevsky's etymological dictionary of Ukrainian surnames (1987). In Rome, a small Church Slavonic-Ukrainian-English dictionary (D. Popovych and K. Pasichny, 1962) and Ye. Onatsky's Ukrainian-Italian (2nd enlarged edn 1977) and Italian-Ukrainian (1977) dictionaries have been published.

Postwar Eastern Europe. In Poland, a Ukrainian-Polish dictionary (30,000 words, ed S. Hrabiec and P. Zwoliński, 1957) was published. In Czechoslovakia, the indigenous Ukrainians have published a Ukrainian-Slovak dictionary (I. Popel, ed M. Buchynska, 1960), a Ukrainian vernacular-Russian dictionary compiled by Ya. Holovatsky in 19th-century Galicia and Transcarpathia (*Naukovyi zbirnyk Muzeiu ukrains'koi kul'tury u Svydnyku*, vol 10 [1982]), and the first Slovak-Ukrainian dictionary (P. Bunhanych, 40,000 words, 1985). A Hungarian-Ukrainian dictionary (L. Vladimir, K. Halas, V. Dobosh, et al, 1961) and a Ukrainian-Hungarian dictionary (L. Katona, 1963) have been published by the Hungarian Academy of Sciences. In Bucharest, a Rumanian-Ukrainian (30,000 words, 1963) and a Ukrainian-Rumanian (35,000 words, 1964) dictionary were compiled by native and Soviet lexicographers and edited by G. Cocotailo. In Yugoslavia, the indigenous Ukrainians have prepared a Serbo-Croatian-'Rusinian' (Bačka dialect) and 'Rusinian'-Serbo-Croatian elementary-school dictionary (M. Kochysh, 1970), a Serbo-Croatian-'Rusinian'-Ukrainian school dictionary (M. Kochysh, 1972), and the first Ukrainian-Serbo-Croatian and Serbo-Croatian-Ukrainian dictionary (A. Menac and A. Koval [a Soviet lexicographer], 1979).

Lexicology. A branch of linguistics dealing with the study of the meaning, usage, derivation, and history of words and word elements. In Ukraine lexicological problems were usually treated in terms of their practical application, in connection with the establishment of a system of Ukrainian *terminology and of a standard literary Ukrainian lexicon, by scholars such as H. Kholodny (the general principles of terminology), T. Sekunda (the principles of technical terminology), M. Osypiv, Ye. Hrytsak (neologisms), and M. Hladky (author of *Mova suchasnoho ukrains'koho pys'menstva* [The Language of Contemporary Ukrainian Literature, 1930] and *Nasha hazetna mova* [Our Newspapers' Language, 1928]) and by various authors of articles on *lexicography and the theory and practice of translation. Other linguists, such as O. Syniavsky, M. Sulyma, I. Ohienko, G.Y. Shevelov, H. Levchenko, I. Bilodid, P. Pliushch, and I. Hrytsiutenko, devoted much attention to lexicological problems in their studies of the language of various writers. Chapters by I. Troian in *Pidvysychenyi kurs ukrains'koi movy* (An Advanced Course in the Ukrainian Language, 1930, ed L. Bulakhovsky), by Yu. Sherekh in his *Narys ukrains'koi literaturnoi movy* (Outline of the Ukrainian Literary Language, 1951), and by P. Horetsky in vol 1 of *Kurs suchasnoi ukrains'koi literaturnoi movy* (A Course in the Contemporary Ukrainian Literary Language, 1951, ed L. Bulakhovsky) contained systematic but brief surveys of the lexicon of literary Ukrainian.

Since the 1930s the AN URSR (now ANU) Institute of Linguistics has been the co-ordinating center of Ukrainian lexicology. In 1965–9 it published the serial *Leksykohrafiia ta leksykohrafiia*. Until recent times Ukrainian theoretical lexicology was underdeveloped and was limited to M. Kalynovych's work on the concept of the word and B. Larin's research on urban speech. In the 1970s several publications on theoretical lexicology appeared: the collection *Pytannia strukturoi leksykohrii* (Questions of Structural Lexicology, 1970), L. Lysychenko's *Leksykohriia suchasnoi ukrains'koi movy: Semantychna struktura slova* (The Lexicology of the Contemporary Ukrainian Language: Semantic Structure of the Word, 1977), M. Kocherhan's *Slovo i kontekst* (The Word and Context, 1980), and particularly *Z istorii ukrains'koi leksykohrii* (From the History of Ukrainian Lexicology, 1980). Despite their shortcomings, such as political bias and excessive descriptivism, the collectively written *Leksyka i frazeolohiia* (Lexicon and Phraseology, vol 4 of *Suchasna ukrains'ka literaturna mova* [The Contemporary Ukrainian Literary Language, 1973]) and *Istoriia ukrains'koi movy: Leksyka i frazeolohiia* (History of the Ukrainian Language: Lexicon and Phraseology, 1983), both edited by M. Zhovtobriukh and V. Rusanivsky, mark a breakthrough in Ukrainian lexicology.

Lezhohubsky, Teodosii [Ležohubs'kyj, Teodosij], b 21 January 1869 in Rybnyky, Berezhany county, Galicia, d 1919. Priest, preacher, educator, and civic leader. A graduate of the Central Seminary in Vienna (1891), from 1913 he was principal of the gymnasium run by the Basilian order of nuns in Lviv. He was vice-president of the Prosvita society and sat on the Popular Committee of the National Democratic party. His sermons were published posthumously in five volumes (1933–6).

Rev Teodosii Lezhohubsky

Antin Liakhotsky

Liadova River [Ljadoval]. A left-bank tributary of the Dniester River. It is 93 km long and drains a basin area of 748 sq km. The Liadova flows through the Podolian Upland within the borders of Khmelnytskyi oblast and Vinnytsia oblast and joins the Dniester near Mohyliv-Podilskyi. The river is used for irrigation and pisciculture.

Liakhotsky, Antin [Ljaxoc'kyj] (pseud: Kuzma), b 1853 in Zhytomyr, Volhynia gubernia, d 24 April 1918 in Lausanne, Switzerland. Political activist. After being arrested for his involvement with a revolutionary circle in Kiev, he escaped to Geneva in 1878 and became manager of the *Ukrainska Drukarnia* press, set up by M. Drahomanov. After Drahomanov's departure (1889) he assumed full control of the printing house, which published about 110 books, pamphlets, and journals. He had close contacts with various Ukrainian and Russian circles opposed to the tsarist regime, and after the Revolution of 1905 he headed the Ukrainian hromada in Geneva, which consisted largely of young revolutionaries.

Liakhovych, Yaryna [Ljaxovyč, Jaryna] (Lachowicz, Yarina), b 2 October 1942 in Ukraine. Artist. After the Second World War, together with her parents she emigrated to Australia. She studied under D. Baker and completed a degree in fine arts at the Royal Institute of Technology in Melbourne. She paints in a modern abstract style and has received numerous awards and prizes at public exhibitions.

Liakhovych, Yevhen [Ljaxovyč, Jevhen], b 4 June 1900 in Ushnia, Zolochiv county, Galicia, d 16 October 1976 in Deerfield Beach, Florida. Journalist and community leader. From 1923 he studied at the Polytechnic Institute of New York in Brooklyn and promoted the Ukrainian Military Organization and then the OUN and their ideology in the United States. In 1933–5 he was the official OUN representative in Great Britain, contributed to *Rozbudova natsii*, and wrote the brochure *The Ukrainian Question* to inform the British government and public about Ukrainian aspirations. After returning to the United States in 1935, he became a leading member of the pro-OUN Organization for the Rebirth of Ukraine and was an associate editor of the daily *Svoboda* (1936–42). After the Second World War he founded the *Organization for the Defense of Four Free-

doms for Ukraine, served as its first president (1946–8), and contributed to the Ukrainian-American press.

Liakhy [ljaxy]. An old Ukrainian name for the Poles, used for the first time in the 11th century in *Povist' vremennykh lit* (The Tale of Bygone Years) and other chronicles. The word is believed to have evolved from *liada* (uncultivated field). At first it probably designated only a tribe of western Slavs bordering on Rus'; the chronicle mentions the 981 campaign of Volodymyr the Great against the *liakhy*, for example. Later the term was applied to Poles in general. In folk songs not only Poles but enemies in general are called *liakhy*. In the last few centuries the term has been used in a pejorative sense, sometimes to designate Polish gentry.

Lialychi [Ljalyčī]. The former estate of Count P. *Zavadovsky, now a town in Surazh raion, Bryansk oblast, RF. Lialychi has a monument of 18th-century Ukrainian architecture – a three-story palace built by G. *Quarengi (1797–1800) in the classical style, with a six-column Corinthian portico, loggias on the side façades, and one-story wings. The so-called Italian Hall in the central part of the palace is covered by a dome. Two orangeries frame the main courtyard, beyond which is an orchard and a landscaped park. In the park stand a summer palace with a four-column Tuscan portico and façade; the Temple of Thanksgiving – a circular pavilion covered by a flattened dome supported by 12 Corinthian columns, in the center of which is a statue of Count P. Rumiantsev; and a church with five cupolas, which is connected by a colonnade to identical belfries at either end, and by an alley to the main palace. The palace's interior was lavishly decorated with sculptures, murals with geometric and floral designs, rare plants, marble, and plaster ornamentation. The palace was damaged during the Second World War and was restored.

Lianytsky, Oleksander [Ljanyc'kyj], b and d ? Painter in late-17th-century Lviv. Works ascribed to him include the iconostasis and fresco icons in the Dormition Church's Chapel of the Three Saints (1698) and the frescoes in the Nestorivtsi residence (discovered in 1910). He probably also painted the portraits of M. and A. Krasovsky (ca 1714).

Liapunov, Aleksandr [Ljapunov], b 6 June 1857 in Yaroslavl, Russia, d 3 November 1918 in Odessa. Russian mathematician and engineer; from 1902 full member of the St Petersburg Academy of Sciences. Liapunov graduated from the University of St Petersburg in 1880, and from 1885 was a docent and then (1892) professor at Kharkiv University. He was active in the *Kharkiv Mathematics Society, as vice-president (1891–8), president (1899–1902), and publications editor. While in Kharkiv Liapunov conducted research in mathematical physics and the theory of probability and obtained important results in both fields. One of his great achievements was the rigorous development of the fundamental concepts of stability theory (now known as the Liapunov-Poincaré theory of stability), which he published in his doctoral dissertation in 1892. In this and succeeding works, he obtained a series of fundamental results on the solution of ordinary linear and nonlinear differential equations. Liapunov's

work 'Some Questions Connected with the Dirichlet Problem' (1898) was of great importance to mathematical physics. It investigated the properties of the potential arising from charges and dipoles distributed on a surface, and later led to the study of double-layer potential in the case of dipoles. Liapunov was the first to demonstrate the symmetry of the Green's function for the Dirichlet problem, and to prove that the solution may be represented by a surface integral. His contributions to probability theory included the introduction and the study of the method of characteristic functions and a general proof of the central limit theorem of probability, which covered much wider conditions than proofs of his predecessors. Liapunov's scientific work received wide recognition. In 1902 he moved to St Petersburg as successor to P. Chebyshev as an academician in applied mathematics.

W. Petryshyn

Liapunov, Boris [Ljapunov], b 6 August 1862 in Bolobonovo, Kurmysh county, Simbirsk gubernia, Russia, d 22 February 1943 in Borovoe, Akmolinsk oblast, Kazakhstan. Russian Slavist; full member of the USSR Academy of Sciences from 1923. After graduating from St Petersburg (1881–5) and Kharkiv (1886–91, where he studied under M. Drinov and O. Potebnia) universities, he taught at Kharkiv (1892–1900) and Odessa (1900–23) universities and then worked at various institutions in Leningrad. His publications deal with Proto-Slavic, Old Church Slavonic, the etymology of Slavic words, and a number of old Ukrainian monuments such as the Dobrylo Gospel of 1164 and the Odessa Gospel. In his booklet *Edinstvo russkogo iazyka v ego narechiiakh* (The Unity of the Russian Language in Its Dialects, 1919) he defended the theory of a common Russian language in the Princely era. A bibliography of his works can be found in *Voprosy iazykoznaviia* (1958, no. 2). His article on the earliest relations between Russian and Ukrainian and their separation was published posthumously in 1968.

Liashchenko, Arkadii [Ljaščenko, Arkadij], b 26 January 1871, d 1931. Historian of Ukrainian literature; full member of the Shevchenko Scientific Society; corresponding member of the Academy of Sciences of the USSR; member of the Leningrad Society of Researchers of Ukrainian History, Literature, and Language. His articles on old Ukrainian literature and on 19th-century literature appeared in various scholarly journals and in collections published by the VUAN and the Leningrad Society.

Liashchenko, Petro [Ljaščenko], b 22 October 1876 in Saratov, Russia, d 24 July 1955 in Moscow. Economist specializing in agrarian studies and economic history; corresponding member of the USSR Academy of Sciences from 1943 and full member of the AN URSS (now ANU) from 1945. After graduating from St Petersburg University (1900) he lectured there (1903–12) and at Tomsk University (1913–17). After the revolution he served as a university professor in Rostov-na-Donu and Moscow and as a senior research associate of the Institute of Economics in Kiev. He wrote over 150 works, including *Ocherki agrarnoi evoliutsii Rossii* (Outlines of the Agrarian Evolution of Russia, 2 vols, 1908, 1913), *Krest'ianskoe delo i poreformennaia zemleustroitel'naia politika* (The Peasant Problem and the Post-reform Land Tenure Policy, 2 vols, 1913, 1917), and *Istoriia*

Petro Liashchenko

narodnogo khoziaistva SSSR (3 vols, 1947–8; trans as *History of the National Economy of Russia*, 1949).

Liashenko, Luka [Ljašenko], b ca 1894, d ? Film actor, director, and screenwriter. He worked at the Ukrainfilm studio in the 1930s, where he appeared in the films *Zemlia* (The Earth, 1930), *Khlib* (Bread, 1930), *Avangard* (The Avant-Garde, 1932), and *Ostannii port* (The Last Port, 1935), and directed *Shturm zemli* (The Storming of the Earth, 1930), *Vovchi stezhky* (Wolf Paths, 1931), for which he wrote the screenplay, and *Na peredovykh pozytsiakh* (In Leading Positions, 1932). He was arrested in 1935 during the Stalinist terror.

Liashenko, Vasyl [Ljašenko, Vasyl'], b 12 February 1902 in Nosivka, Nizhen county, Chernihiv gubernia. Solid-state physicist. A graduate of the Kiev Institute of People's Education (1928), he worked at the AN URSS (now ANU) Institute of Physics (1930–60) and Institute of Semiconductors (from 1960) and taught at postsecondary schools in Kiev. He has made substantial contributions to the understanding of carrier-density phenomena in semiconductor surface states and their role in photoconduction and catalysis.

Liashko, Ivan [Ljaško], b 9 September 1922 in Matskivtsi, Lubni county, Poltava gubernia. Mathematician and cyberneticist; full member of the AN URSS (now ANU) since 1973. A graduate of the Kiev Pedagogical Institute (1952), he began to work at Kiev University in 1955, where in 1965 he became a professor and head of the department of mathematical physics. In 1978 he became president of the Znannia Society of the Ukrainian SSR. His principal works deal with the mechanics of solid media, computational mathematics, and cybernetics. He has made important contributions to the theory and application of approximate analytic methods for solving boundary value problems. Also of great importance are his contributions to the development of computer-controlled packet switching automatic system control by means of branching. He has obtained significant results in studying the linear filtering of pink noise and the control problem with bilinear quality criteria.

Liashko, Oleksander, b 30 December 1915 in Rodakove, Slovianoserbske county, Katerynoslav gubernia. A Party functionary and Soviet official. A graduate of the Donetsk Industrial Institute (1947), he rose in the Party

apparatus to the positions of first secretary of the Donetsk Oblast Committee of the CPU (1960–3) and second secretary of the CC (1966–9). In 1969–72 he served as chairman of the Presidium of the Supreme Soviet of the Ukrainian SSR and chairman of Ukraine's Council of Ministers (1972–87). He was a member of the CC CPU (1960–84), the CC CPSU (1961–87), and the Presidium (1963–6) and the Politburo of the CPU (1966–87). Until his retirement in July 1987, Liashko was an obedient executor of Moscow's centralist policies.

Liaskoronsky, Sylvestr [Ljaskorons'kyj, Syl'vestr], b ? d 19 May 1754 in Kiev. Orthodox churchman and writer. He graduated from the Kievan Mohyla Academy and then taught there (1729–41) before becoming hegumen of the Holy Spirit Monastery in Vilnius and archimandrite of the Nizhen Annunciation (1745) and Kiev Epiphany Brotherhood (1746–51) monasteries. He also served as rector and professor of theology at the Kiev academy (1746–51). He wrote the tragicomedy *Obraz strastei mira seho* (A Portrait of the Passion of This World, 1729), which was thematically linked to the Easter cycle.

Vasyl Liaskoronsky

Borys Liatoshynsky

Liaskoronsky, Vasyl [Ljaskorons'kyj, Vasyl'], b 5 January 1860 in Zolotonosha, Poltava gubernia, d 1 January 1928 in Kiev. Historian and archeologist. He graduated from Kiev University in 1885 where he studied under V. Antonovych and I. Luchytsky. He participated in several archeological excavations throughout Ukraine (with V. Khvoika and others), publishing articles about the findings in *Kievskaja starina* and elsewhere. He edited the bulletins of the all-Russian archeological congresses held in Kiev in 1899, Kharkiv in 1902, and Katerynoslav in 1905, and led several expeditions under the auspices of the congresses. A privatdocent at Moscow University (1903–7), eventually he was allowed to assume a similar position at Kiev University (1907–9) before becoming a full professor at the Nizhen Historical-Philosophical Institute (Lyceum) in 1909. After the Revolution he worked in a variety of institutions, but his most important appointment was as the head of the archeological department of the All-Ukrainian Archeological Committee.

A specialist in historical geography, historical topography, numismatics, and other ancillary historical disciplines, Liaskoronsky's major works include *Istoriia Pereia-*

slavskoi zemli s drevneishikh vremen do poloviny XIII st. (The History of the Pereiaslav Land from the Earliest Times to the 13th Century, 1897 [his PhD dissertation]), *Inostrannye karty i atlasy XVI i XVII vv. odnosiaschiesia k Iuzhnoi Rossii* (Foreign Maps and Atlases of the 16th and 17th Centuries Concerning Southern Russia, 1901), *Gil'om Levasser de Boplan i ego istoriko-geograficheskie trudy odnositel'no Iuzhnoi Rossii* (G. Le Vasseur de Beauplan and His Historico-Geographic Works on Southern Russia, 1901), and dozens of articles on excavations of the Trypillian culture, kurhans throughout Ukraine, and excavations of the Saint Sophia Cathedral, the Golden Gate, and other sites around Kiev. A biography of Liaskoronsky and bibliography of his works by K. Melnyk-Antonovych appeared in ZIFV, no. 24 (1929).

Liatorytsia River [Ljatorycja] (aka Latorytsia). A left-bank tributary of the Bodrog River (which it joins in southeastern Czechoslovakia). It is 144 km long and drains a basin area of 2,735 sq km. It flows through the Polonynian Beskyd and Volcanic Ukrainian Carpathians within the borders of Transcarpathia oblast. Its main tributaries are the Stara (right-bank) and the Vicha and Kerepets (left-bank). Its waters are used for industrial and domestic consumption as well as for irrigation. The river flows through the city of Mukachiv.

Liatoshynsky, Borys [Ljatošyns'kyj], b 3 January 1895 in Zhytomyr, d 15 April 1968 in Kiev. Composer and teacher. He graduated in law from Kiev University in 1918, and then in music (studying under R. Glière) from the Kiev Conservatory in 1919. He lectured at the conservatory from 1920 and was appointed professor of composition there in 1935. He also held a professorship at the Moscow Conservatory in 1935–8 and 1941–4.

Liatoshynsky is one of the initiators and main representatives of the modern school in Ukrainian music, using expressionistic style and atonal technique. His mastery of composition and instrumentation is shown throughout his repertoire. He began his work in the style of A. Scriabin, but later came under the influence of the French impressionists, and finally under west European impressionism. His contribution to Ukrainian music lies in a skillful blending of Ukrainian themes with contemporary European style. Together with L. *Revutsky, he exerted a profound influence on Ukrainian composers of the younger generation. His main works include the operas *Zoloty obruch* (The Golden Ring, 1929, based on the I. Franko novelette *Zakhar Berkut*) and *Shchors* (1937–8), five symphonies, an *Overture on Four Ukrainian Folk Themes* (1926), the suites *Taras Shevchenko* (1952) and *Romeo and Juliet* (1955), the *Slavic* concerto for piano and orchestra (1953), and the completion and orchestration of R. Glière's *Concerto for Violin and Orchestra* (1956). He also composed the cantatas, for chorus and orchestra, *Testament and Urochysta* (The Solemn One) in 1939; a piano quintet; five string quartets; two piano trios; and many other works for the piano (two sonatas, ballads, and preludes) and the violin. He wrote nearly 50 solo songs to poems by T. Shevchenko, I. Franko, M. Rytsky, V. Sosiura, H. Heine, A. Pushkin, and others; music for the films *Karmeliuk* (1932), *Ivan* (1932, with Yu. Meitus), *Taras Shevchenko* (1950), *Ivan Franko* (1956, with M. Kolessa), *Hryhoryi Skovoroda* (1959), and others; and arrangements of Ukrainian folk songs.

Liatoshynsky also edited and arranged the score for the comic opera *Eneida* (1927) and for the new edition of M. Lysenko's opera *Taras Bulba* (1936–7).

W. Wytwycky

Oksana Liaturynska

Bishop Ivan Liatyshevsky

Liaturynska, Oksana [Ljaturyns'ka] (pseud: Rokšana Vyshnevetska, Oksana Pechenih, Oksana Cherlenivna), b 1 February 1902 in Katerburg, Kremianets county, Volhynia gubernia, d 13 June 1970 in Minneapolis, Minnesota. Writer and sculptor. In 1924 she emigrated; she lived first in Czechoslovakia, then in Germany, and finally in the United States. She began her literary career in Prague and belonged to the Prague group of Ukrainian writers. Her poetic miniatures are noted for their economy of expression and historical themes. Several collections of her poetry were published, including *Husla* (the title refers to a multistring musical instrument; 1938) and *Kniazha emal'* (Princely Enamel, 1941; 2nd edn 1956). She also wrote a book of novellas, *Materynky* (Wild Thyme, 1946). Two collections of her poems for children were published, *Bedryk* (An Epiphany Carol, 1956) and, posthumously, *Iahilka* (A Spring Song, 1971). In her sculptures a synthetic monumental form is predominant. In 1932 she designed the monument to fallen soldiers in Pardubice; in 1939, Ye. Konovalets's grave monument in Rotterdam; in 1941, I. Bilyk's grave monument in Milvazanky; and in 1949, A. Zhyvotko's grave monument in Aschaffenburg. She sculpted busts of T. Shevchenko, S. Petliura, and Ye. Konovalets, historical portraits, and, using different techniques, compositions in various materials. She also created a series of model dolls and worked with ceramics.

Liatychiv. See Letychiv.

Liatyshevsky, Ivan [Liatyševs'kyj], b 17 October 1879 in Bohorodchany, Stanyslaviv county, Galicia, d 27 November 1957 in Stanyslaviv (Ivano-Frankivske). Catholic bishop and professor. After studying in Vienna and Innsbruck he was ordained in 1907 and then taught in Stanyslaviv at a gymnasium and the theological seminary. In 1918–19 he

was director of church and religious affairs for the Western Ukrainian National Republic. He became a canon of Stanyslaviv eparchy in 1928 and was consecrated auxiliary bishop of Stanyslaviv in 1930. He was arrested by the Soviet authorities in 1945 and sentenced to 10 years in a labor camp. He returned to Stanyslaviv in 1955.

Liberalism. A political philosophy and movement that aims to maximize individual freedom by means such as representative democracy, the separation of powers, the protection of individual liberties, and the removal of restrictions on private initiative.

Historically, liberalism has flourished mostly in Western Europe and North America, where the growth of substantial middle classes with access to wealth and social mobility has led to a broad social consensus. In Ukraine, as in Eastern Europe generally, liberalism has been identified with a minority of the intelligentsia. In the late 19th century the zemstvos were the vehicle of liberal opposition to tsarist absolutism in the Russian Empire, which included most of Ukraine. M. Drahomanov's *Volnoe slovo* (Geneva 1881–3) was considered the organ of the Zemstvo Union. After the Revolution of 1905 liberal activity intensified. The *Ukrainian Democratic Radical party (UDRP), whose program resembled that of the Russian Constitutional Democrats, was established in 1905. Drawing support from the intelligentsia, the lower and middle bourgeoisie, and the middle peasantry, the UDRP accounted for more than three-quarters of the Ukrainian representation in the Second State Duma. A moderate element of the URDP, led by M. Hrushevsky, S. Yefremov, and Ye. Chykalenko, formed the *Society of Ukrainian Progressives. In 1917 members of the society founded the *Ukrainian Party of Socialists-Federalists (UPSF). Composed of liberal intellectuals but lacking a mass base, the party played an important role in the early stages of the Ukrainian revolution. It supplied well-qualified functionaries to the Central Rada and subsequent governments. The UPSF supported a democratic federation with Russia, constitutional government, and a moderate form of evolutionary socialism. Given the revolutionary situation, the party did not succeed in implementing its program.

In Western Ukraine the *National Democratic party (est 1899) and its successor, the *Ukrainian National Democratic Alliance (1925–39), supported a liberal program. Both parties were coalitions which claimed to stand above the class struggle and to represent the aspirations of the Ukrainian people to national independence. They sought to achieve this independence by parliamentary means and called for the autonomy of Western Ukraine, first in the Habsburg Empire and then in Poland. The National Democrats dominated Ukrainian political life in Galicia before the First World War. The alliance's influence declined, because its policy of accommodation with the Polish government proved to be counterproductive, and because political life became rapidly radicalized in the 1930s. With the Soviet occupation of Western Ukraine the alliance was dissolved. Its later revival in the emigration was merely symbolic. The *Ukrainian Democratic Alliance, established in New York in 1976, represented an attempt by émigré Ukrainian politicians to co-operate with each other on the basis of a liberal consensus.

M. Yurkevich

Liberec. A city (1975 pop 76,000) in northern Czechoslovakia. In March 1920 an internment camp for soldiers of the Ukrainian Galician Army, mostly from Gen A. *Krav's army group, was set up in its vicinity. It held over 1,000 internees, including 450 officers, 560 soldiers, and 90 women and children. An intensive cultural-educational program was directed by the Cultural and Educational Circle. It included various courses and the publication of the semimonthly *Ukraïns'kyi skytalets'*. V. *Andriievsky was one of the organizers. In April 1921 the camp was moved to *Josefov. A monument to Ukrainian soldiers has been erected in Liberec.

Liberman, Ovsii, b 2 October 1897 in Slavuta, Khmelnytskyi oblast, d 12 March 1983 in Moscow. Economist and engineer. After graduating from Kiev University (1920) and the Kharkiv Engineering and Economics Institute (1933) he lectured in economics at the latter (1947–63) and in statistics at Kharkiv University (1957–63). His 1962 article in *Pravda* opened a wide discussion on new economic policies. Liberman advocated less control by central planners, and rewards to enterprises based on a profit index, to raise the efficiency of the Soviet economy. Some of his ideas were incorporated in A. Kosygin's reforms in 1965. His major works were *Puti povysheniia rentabel'nosti sotsialisticheskikh predpriatii* (Ways of Raising the Profitability of Socialist Enterprises, 1956) and *Ekonomicheskie metody povysheniia effektivnosti obshchestvennogo proizvodstva* (1970; trans as *Economic Methods and the Effectiveness of Production*, 1971).

Libovicki, Vladimir, b 10 November 1906 in Cheski Novyni, near Ustyluh, Volhynia gubernia, d 18 December 1984 in Prague. Czech ballet dancer and choreographer. Libovicki studied in the ballet school of V. Avramenko in Rivne, where he was trained in Ukrainian folk dance. In 1937 he was appointed artistic director of the Regional Theater in Uzhhorod, where he favored Ukrainian as the language used during rehearsals. In 1938 Libovicki joined the *Nova Stsena theater, where he worked as a director and choreographer and later became artistic director. He was noted for his production of O. Oles's dramatic poem *Nad Dniptom* (On the Banks of the Dnieper). Libovicki played a leading role in the film about Hutsul life *Polonyns'ke kokhannia* (Love in the Mountain Meadows, 1938), the first Ukrainian-language motion picture made in Transcarpathia (it was destroyed in processing). In 1954 Libovicki was appointed choreographer in the operetta group of the Ukrainian National Theater in Prešov. In 1955 he was coauthor, with the composer P. Spisak, of *Marijka*, the first full-length Ukrainian ballet to originate in Czechoslovakia.

Libraries. Information concerning the earliest libraries in Ukraine can be found in chronicles from the 11th century. The oldest Kievan chronicle, *Povist' vremennykh lit*, contains a special section in the year 1037 devoted to Prince Yaroslav the Wise, describing him as a man well versed in books and identifying him as the founder of the first library in Kiev, housed at the St Sophia Cathedral. On the basis of information gathered from preserved specimens of Kievan literature, it has been established that the cathedral library at St Sophia contained approx 500 volumes, including original Greek manuscripts, translations from

the Greek prepared by Bulgarian and native authors, and some original books written by Kievan authors. During Yaroslav's reign another library was established (ca 1050) at the Kievan Cave Monastery; it is considered the first monastery library in medieval Ukraine. Thereafter, church and monastery libraries were established in other cities. Private collections were developed by the Kievan princes, and other, smaller private collections were owned by the aristocracy as well as by some priests and monks.

During the 16th century numerous collections of manuscripts (and, later, books) were established by church brotherhoods. The most famous of the libraries belonged to the Lviv Dormition Brotherhood (est 1585–6). That extensive collection of manuscripts and books apparently employed a rudimentary classification system, a significant advance over the simple inventories of earlier monastery libraries (see *Library science). The Lviv Dormition Brotherhood Library was active for many centuries (it survived as the Stauropigion Institute until 1939). Similar brotherhood libraries were established in Western Ukraine in Ostrih, Lutske, Brest, and Drohobych, and in Kiev and Chernihiv. The prominent Kievan Mohyla Academy housed the largest library in 17th-century Ukraine (10,000 vols).

During the 17th and 18th centuries many private collections were developed, most belonging to clergy. Among them were the libraries of P. Mohyla, D. Tuptalo, T. Prokopovych, I. Galiatovskiy, L. Baranovych, and S. Yavorsky. Significant private collections were also owned by members of the Ukrainian Cossack nobility (eg, Ya. Markovych, H. Poletyka, M. Khanenko), scholars (eg, I. Samoilovych, A. Rigelman), members of the Ukrainian gentry (eg, I. Lukashevych), government officials (eg, O. Bezborodko, K. Rozumovskiy), and merchants (eg, S. and I. Kuliabka, S. Lashkevych).

19th and early 20th centuries. The Kievan Mohyla Academy and similar but smaller institutions (colleges) that were established in Chernihiv (1700), Kharkiv (1727), and Pereiaslav (1738) all had significant academic libraries which later provided the groundwork for library services at the newly created university libraries. By 1917 the library at Kharkiv University (est 1805) consisted of 250,000 volumes. The Kiev University Library (est 1834) developed from the nucleus of the Kremianets Lyceum Library and had grown to over 500,000 volumes by 1913. The Odessa University Library began with the collection of the Richelieu Lyceum and had grown to 314,000 volumes by 1913.

During the 19th century specialized libraries also began to appear, many connected with archival commissions in gubernia capitals or started by scholarly societies (eg, the Historical Society of Nestor the Chronicler in Kiev, the Odessa Historical Society, the Volhynia Research Society in Zhytomyr). In larger cities *public libraries and reading rooms were established. The Odessa Municipal Library (founded 1829) was the first such library in Ukraine; it also became one of the largest, with 60,000 volumes in 1890 and 162,000 in 1911. The Kiev Municipal Library (founded 1866) housed a significant Ukrainian collection donated by M. Yuzefovych. Additional public and private libraries were organized by zemstvos and civic clubs.

After the Revolution of 1905, during a short period of relative laxity in Russian censorship, several private

Ukrainian libraries came into existence, sponsored by *Prosvita societies and Ukrainian clubs. Following the dissolution of those organizations by the Russian government in 1912, the activities of the libraries were curtailed or completely abandoned. There were 2,739 small rural libraries in Ukraine by 1913 (or one for approx 180 villages), with an average of 400 volumes per library or reading room.

Conditions in Western Ukraine under Austro-Hungarian rule were more favorable for the development of Ukrainian book collections. The oldest university library in Ukraine was founded in Lviv in 1784, and consisted of 340,000 volumes before the Second World War. Other important research libraries in Lviv were the Ossolineum Institute (est 1817, with 298,000 vols), the Lviv Polytechnical Institute Library (est 1844, with 84,000 vols), the Baworowski Foundation Library (est 1856, with 55,000 vols), the National Museum Library (est 1905), the Prosvita Library (20,000 vols), and the Municipal Library (est 1911, with 20,000 vols). By the late 19th century the People's Home Library (est 1849) housed a large collection of *Ucrainica*, including 100,000 volumes and many manuscripts and documents. The Ukrainian Catholic church had an important library in the Greek Catholic Theological Academy in Lviv (est 1783, with 8,500 vols) and in other cities, such as Peremyshl. Significant book and manuscript collections were also maintained at the monasteries of the Order of St Basil the Great in Lviv (42,000 vols), Krekhiv (15,000 vols), and Buchach (15,000 vols). In rural communities and smaller towns a network of small libraries was developed by the Prosvita (3,000 libraries) and Kachkovsky societies. They were usually attached to reading rooms in educational institutions.

The most important Western Ukrainian research library was established in Lviv by the Shevchenko Scientific Society in 1894; it had 90,000 volumes in 1914 and over 200,000 volumes in 1938, including 1,500 manuscripts. Under the direction of I. Krevetsky and V. Doroshenko the library became an internationally recognized center for depository material and bibliographical research, and it established interlibrary loans with all leading university libraries in Europe. In 1939 the library was transformed into a separate unit of the Soviet Ukrainian Academy of Sciences.

In Bukovyna the largest library was at Chernivtsi University (420,000 vols in 1936). The Ruska Besida society maintained a network of 150 smaller libraries for the use of the local population. In comparison with that in Galicia, library development in Transcarpathia was modest. Among its oldest libraries were the monastic libraries established by the Basilian order at Chernecha Hora (est 1720, with 8,000 vols) and the Greek Catholic church in Hrushiv (est 1775, with 15,000 vols). The library of the Prosvita society in Uzhhorod (est 1921) also ran a small rural network of libraries (235 in 1935). Following the Soviet occupation of Galicia and Volhynia (1939), Bukovyna (1940), and Transcarpathia (1945) all existing libraries were nationalized and incorporated into the Soviet centralized library system.

Under the Soviet regime. During its independence (1918–21) Ukraine experienced a growth in libraries and book production. On 2 August 1918 the National Library of the Ukrainian State was established with a nucleus of 40,000 volumes. Its collection had grown to 500,000 volumes by 1919 and over one million volumes by 1921.

In November 1922 the Soviet authorities issued a decree on the 'Establishment of the Unified System of Libraries,' which authorized the maintenance of academic libraries by the People's Commissariat of Education and the creation of a network of people's (public and regional) libraries in cities and villages. A number of larger libraries were established from nationalized book collections, including the Central Children's Library in Mykolaiv, the Central Jewish Library in Kiev and a similar Jewish library in Odessa, the Polish State Central Library in Kiev, and other specialized larger libraries, such as the October Revolution Library in Katerynoslav.

The largest library in Ukraine during that period was still the National Library, which was renamed the National (or All-People's) Library of Ukraine in 1919 (from 1965 the *Central Scientific Library of the AN URSS [now ANU]). Many specialized private collections, and even entire libraries, were transferred to that central library. In 1932 the National Library housed 2.5 million volumes in Kiev and 125,000 in its Vinnytsia branch. Following the abolishment of the autonomy of the VUAN and its reorganization by the Soviet authorities into the AN URSS in the 1930s, the Kiev and Vinnytsia libraries merged, and their holdings were consolidated into a single library belonging to the academy, consisting of over 7 million volumes (1936).

During the 1920s all universities were abolished and replaced by 'institutes of public education,' and their library collections (except textbooks) were transferred either to the National Library in Kiev or to local central libraries. As a result of the reorganization the Odessa State Library became the second-largest library in Ukraine (2.3 million vols in 1932); smaller collections were found at the Kharkiv Central Library, the Poltava Central Scientific Library, and elsewhere.

In 1934 the universities were re-established, and by 1935 the Kharkiv University Library had 740,000 volumes, the Kiev University Library, 700,000 volumes, and the Odessa University Library, 250,000 volumes. The Soviet government was also interested in developing the network of public (or 'people's') libraries in the cities and villages, which in 1922 had consisted of 3,067 libraries and approx two million volumes. The number of such libraries increased rapidly to 10,000 libraries with 21 million volumes in 1933 and 16,000 libraries with 27 million volumes in 1938.

Repressions and reforms of the Soviet regime in the 1930s stifled the development of libraries in Ukraine. A decree 'About Library Work in the Soviet Union' (March 1934) brought to an end the limited autonomy enjoyed by Ukrainian libraries during the 1920s. Strong censorship was introduced in academic libraries, and many books found unfavorable to communist ideology were removed.

Research libraries suffered particularly great losses during the German-Soviet War of 1941–5. When Ukraine was occupied by German troops, many collections were destroyed during the hurried evacuation of the Soviet authorities, and remaining collections were seriously depleted by the Germans. Some of the lost collections were recovered after the end of the war; the National Library (in 1948–65 the State Public Library of the Ukrainian SSR), for example, recovered its old imprints and manuscripts, which had been evacuated by the Soviet authorities to Ufa in 1941, and also part of the collection taken to Germany.

Such losses have continued to occur on a smaller scale. During the 1960s and 1970s a number of valuable collections of Ukrainian prerevolutionary materials were destroyed in unexplained circumstances, either by fire or through some kind of negligence. In May 1964 arson in the Central Scientific Library of the ANU resulted in the loss of the singular collection of M. Hrushevsky, as well as of other historical materials. Not long afterward the famous Vydybychi Monastery and its library, containing rare books from the 17th and 18th centuries, were also destroyed by fire. In the early 1970s a significant part of the rare books collection of S. *Maslov was lost from the Kiev University Library, apparently through negligence. In 1974 a fire destroyed a large number of books of V. Kolosova's collection in the library of the ANU Institute of Linguistics. Historic musical documents, housed at the library of the Lysenko Higher Institute of Music in Lviv, perished in 1977.

Postwar library development in the Soviet Union was influenced by such All-Union decrees as 'On the Current Status of Libraries and Their Improvement' (1959) and 'The Increasing Role of Libraries in the Communist Education of Workers and in the Scientific and Technological Process' (1974). A high degree of standardization and uniformity was applied in library organization and services, in spite of the existing diversity of nationalities, cultures, and library traditions. The Soviet press and library professional literature stressed that the principal task of libraries was to propagandize the resolutions of Party congresses and to explain the policy and decisions of the Communist party and the Soviet government. Most of the public libraries and many academic and specialized libraries in Ukraine were under the jurisdiction of the Ukrainian SSR Council of Ministers and the Ministry of Culture.

Political vigilance in regard to book selection was enforced by a network of distributing centers which published lists of recommended book acquisitions and were actively involved in centralized acquisition processing. The largest distributing center for research libraries, supplying over 2,000 such institutions throughout the Soviet Union, was located in Moscow; regional distribution centers in Ukraine existed in Kiev, Kharkiv, Odessa, and Lviv. They were the main source for the bulk of acquisitions by academic, public, and school libraries. In that centralized system each library was supplied with books under an annual contract that specified the particular library's subject of interest, the average number of copies required, and the proposed expenditure on acquisitions during the year.

The rise and fall of leading personalities in the Soviet Union, and especially in Ukraine, accompanied by abrupt shifts and turns in official policies, resulted in a constant process of weeding library collections of 'deteriorated material' and 'obsolete publications.' An estimated 4 percent of public library holdings in the USSR were withdrawn from circulation every year; several factors indicate that the percentage was significantly higher in Ukraine. According to the observations of Western scholars, special collections of confiscated material existed in many of the larger libraries (see **Spetsfondy*). Those collections included books by 'enemies of the people,' 'obsolete' histories, foreign works inimical to the Soviet Union, and even pornography.

In a typical Soviet library there were usually at least

two types of catalogs. The readers' or public catalog provided a selective coverage of the collection; occasionally it contained annotations guiding the user to the most 'popular' or politically significant material. The official catalog served as an inventory of library holdings, supposedly covering the whole collection (and possibly including some innocuous foreign material). Only researchers and some advanced students with written authorization were allowed to consult the official catalog. It is believed that special inventories or catalogs of removed and politically undesirable materials were maintained in most research libraries and in some larger district libraries. When certain Soviet personalities were rehabilitated, their works might have been reinstated, at least in the official catalog.

New building of the Central Scientific Library of the Academy of Sciences of Ukraine

As of 1985 the Central Scientific Library of the ANU was the largest library in Ukraine. It housed some 12 million volumes, including 291,000 manuscripts, 1.6 million periodicals, 40,000 unpublished dissertations, and a substantial number of nonbook materials. Of special interest were its holdings of incunabula and rare books. That library, along with several others in Ukraine, received depository copies of all books published in the Soviet Union. Its affiliate, the *Lviv Scientific Library of the ANU, had approx six million items, including 75,000 manuscripts and a substantial number of rare books.

University libraries with significant collections can be found at Kiev University (2.7 million vols in 1985), Lviv University (2.5 million vols), Kharkiv University (2.3 million vols), Odessa University (3.5 million vols), Chernivtsi University (1.7 million vols), Uzhhorod University (1.2

million vols), and Dnipropetrovske University (1.2 million vols). Smaller collections are housed at some 140 libraries of pedagogical institutes, such as the Kiev Pedagogical Institute (700,000 vols) and the Drohobych Pedagogical Institute (415,000 vols); ANU institutes, such as the Institute of Linguistics (150,000 vols) and the Institute of History (120,000 vols); and libraries subordinated to various ministries, such as the Library of the Ministry of Culture (130,000 vols) and the Ministry of Education Pedagogical Library (260,000 vols).

By the 1980s there were also over 2,000 specialized libraries in Ukraine, the largest of which were the State Republican Scientific and Technical Library of the Ukrainian Scientific Research Institute of Scientific-Technical Information and Technical-Economic Research in Kiev (est 1935, with 1.7 million vols), the Library of the Kiev Institute of Light Industry (est 1930, with 600,000 vols), and the Central Research Library of the Ministry of Agricultural Industries (est 1944, with 360,000 vols). The Ukrainian SSR had approx 100 large industrial libraries, such as the Kiev Library of Building Industries (est 1944, with 330,000 vols) and the Kiev Library of Automobile Transportation of the Ministry of Special Education (est 1945, with 288,000 vols), and several hundred smaller libraries. Among the 36 sizable agricultural libraries was the Central Scientific Agricultural Library in Kiev (est 1921, with 480,000 vols). There were 73 medical libraries, the largest of which was the Republican Scientific Medical Library in Kiev (est 1930, with 850,000 vols). Many larger regional libraries also served as public district libraries, and usually reflected regional economic and professional interests. The Korolenko State Scientific Library in Kharkiv (est 1886 as a public library), for example, housed 5.8 million volumes, with emphasis on science and technology, and the State Regional Library for Adults in Donetsk (est 1926) contained 1.4 million volumes, with emphasis on technology, particularly mining and metallurgy.

Most secondary and eight-year schools had their own libraries of 2,000 to 5,000 volumes. Larger libraries were found in the professional schools, including *tekhnikums*. The elementary schools, especially in rural districts, had rather small collections, and children used local libraries for supplementary reading. In 1980 there was a total of 59,300 libraries in Ukraine (including school libraries), with combined holdings of 883 million volumes; in 1985 there were 57,900 libraries in Ukraine (compared to 165,000 in the RSFSR), with 1,011 million volumes (compared to 3,019 million vols in the RSFSR). (See the table.)

Public libraries in Ukraine, 1984

Type of library	No. of libraries	Holdings in thousands of vols
Oblast	37	100,766
Raion	521	18,850
Urban	1,852	46,621
Rural	18,242	144,672
Children's	1,242	38,658
Collective-farm	138	467
Trade-union	3,935	55,588
Total	25,995	411,167

Abroad. Through the efforts of Ukrainian émigrés, many educational institutions, churches, civic clubs, and professional organizations have supported libraries of varying size and utility. Some important collections of Ukrainian materials were transferred out of Ukraine to existing university and state libraries. The Austrian State Library, for example, obtained depository copies of all Ukrainian books published in Austria up to 1918. After the First World War the largest émigré Ukrainian libraries were founded in Czechoslovakia, at the Ukrainian Free University in Prague (est 1922, with 10,000 vols in 1938), the Ukrainian Husbandry Academy in Poděbrady (est 1922, with 30,000 vols), the Ukrainian Higher Pedagogical Institute in Prague (est 1923, with 11,000 vols in 1936), the Museum of Ukraine's Struggle for Independence in Prague (est 1925, with 10,000 vols in the main collection and 35 special collections, including more than 1,000 complete sets of Ukrainian periodicals and newspapers), and the Ukrainian Historical Chamber in the Czechoslovakian Foreign Ministry in Prague (est 1931, with 17,000 vols in 1936). With the occupation of Czechoslovakia by the Soviet army in 1945, most of those collections were taken to the Soviet Union, destroyed, or partially integrated into the Slavic collection of the Prague University Library.

The libraries of the Ukrainian scientific institutes in Berlin (est 1926, with 32,000 vols) and Warsaw (est 1930, with 7,000 vols and several special collections, including the archives of M. Drahomanov) were destroyed during the Second World War. The *Petliura Ukrainian Library in Paris (est 1929, with 15,000 vols by 1940) was confiscated and shipped to Germany during the war. It was re-established in Paris after the war (10,000 vols).

Postwar Ukrainian émigrés established new libraries as part of scholarly and educational institutions. Two important libraries were founded in Rome, at the Ukrainian Catholic University (20,000 vols) and St Josaphat's Ukrainian Pontifical College (15,000 vols, including valuable archives pertaining to the history of the Ukrainian Catholic church). In Munich a significant collection of Ukrainian was established by Ukrainian émigrés at the Ukrainian Free University Library (12,000 vols). During the 1950s the Shevchenko Scientific Society Library was transferred from Munich to Sarcelles, France (in 1978 it had 20,000 vols), and in 1950 the Ukrainian Academy of Arts and Sciences Library, originally in Augsburg, Germany, was transferred to New York (in 1978 it contained 20,000 vols and a rich collection of manuscripts).

Other libraries established in the United States during the 1950s were the St Basil's College Library (15,000 vols) and the Ukrainian Diocesan Museum and Library (20,000 vols) in Stamford, Connecticut, the Ukrainian National Museum Research Library in Chicago (12,000 vols), the Ukrainian Orthodox Church of America Library in South Bound Brook, New Jersey (14,000 vols), and the Ukrainian Museum-Archives in Cleveland (6,000 vols).

The largest collections of Ukrainian materials in the United States are found at the Library of Congress (61,500 vols), the University of Illinois (45,000 vols), the New York Public Library (25,000 vols), Harvard University (60,000 vols), the University of Michigan (18,000 vols), Indiana University (18,000 vols), the University of Chicago (16,000 vols), and the University of California at Berkeley (15,000 vols).

In Canada significant Ukrainian collections are housed

in libraries at the Basilian Fathers' Museum in Mundare, Alberta (20,000 vols), the Ukrainian Fraternal Society in Vancouver (8,000 vols), the St Vladimir Institute (22,000 vols) and the Ukrainian National Federation (20,000 vols) in Toronto, and St Andrew's College (40,000 vols) and the Ukrainian Cultural and Educational Centre (20,000 vols) in Winnipeg.

Collections of Ukrainian materials are also housed in the libraries of the University of Toronto (20,000 vols), the University of Alberta (15,000 vols), and the University of Manitoba (30,000 vols). The National Library and the Public Archives of Canada, located in Ottawa, have significant collections of Ukrainian-Canadian folklore and Ukrainian (the latter including the personal archives of V. Kubijovyč).

Large collections of Ukrainian materials and Ukrainian are housed in leading university and research libraries in Europe (Warsaw, Prague, Vienna, Helsinki, Paris, Munich, London), in the Svydnyk Museum of Ukrainian Culture (now the Dukhnovych Museum) in Slovakia, in Rumanian libraries, in Moscow (the Lenin Library and the Saltykov-Shchedrin Library), and in the libraries of the Russian Academy of Sciences in Moscow and St Petersburg.

B. Wynar

Library science. Although *libraries are known to have existed in the Kievan Rus' period, the first recorded name of a Ukrainian library scientist is that of P. Yarkovsky. In 1809-32 he was chief librarian of the Kremianets Lyceum, where he taught bibliology and established a bibliographic system. He also served as director of the library of Kiev University.

In the 19th century, library sciences were entirely applied and rarely theoretical. In 1838 S. Bohorodsky and E. Hofman's *Nastaolenie bibliotekariu universiteta sv Vladimira* (Instructions for the Librarians of St Vladimir's [Kiev] University) was published. Innovations in the field appeared in N. Bunge's *Pravila biblioteki* (Rules of the Library, 1880) and other trade publications.

Around that time a number of excellent catalogs and inventories were compiled at the libraries of Kharkiv University (V. Dzhunkovsky, 1824, 1866), Kiev University (A. Krasovsky, 5 vols, 1854-8), Odessa University (O. Ko-

chubynsky, S. Yaroshenko, 3 vols, 1878-1914), and the Kiev Theological Academy (A. Krylovsky, 14 vols, 1890-1915). Collections of manuscripts held by libraries attracted particular attention; descriptions of such collections, however, were more archeographic than bibliographic. Among them were M. Petrov's *Opisanie rukopisnykh sobraniï, nakhodiashchikhsia v Kieve* (Description of Manuscript Collections Found in Kiev, 3 vols, 1891-1904), I. Svietsitsky's guide to the collections of the People's Home in Lviv, and S. Maslov's *Obzor rukopisei Biblioteki Imperatorskogo universiteta sv. Vladimira* (Survey of Manuscripts in the Library of the Imperial University of St Vladimir [Kiev], 1910). M. Popruzhenko, S. Ptashytsky, and V. Suboch wrote studies on the collections of individual libraries. In 1910 Z. Kuzelia promoted the establishment of a public library system.

Specialized studies in library science became widespread in the 1920s and 1930s. Yu. Mezhenko studied planning in large and scientific libraries (1923, 1926), D. Balyka studied literacy education (1926, 1927), M. Vasylenko (1919) and O. Ohloblyn (1927) studied the history of the Kremianets Lyceum Library, and L. Bykovsky produced a systematic overview of problems in library science (1923). Catalogs were compiled on Ukrainian materials in the libraries of Kiev (V. Barvinok), Kamianets-Podilskyi (Ye. Sitsinsky), Leningrad and Samara (V. Peretts), and Paris (E. Borschak). Many works were published about the libraries in Kiev (L. Bykovsky, S. Posternak, M. Saharda), Odessa (I. Faas, B. Komarov, Yu. Tiuneeva), and Lviv (B. Barvinsky, V. Doroshenko, I. Krevetsky). B. Bodnarsky promoted the decimal system of classification.

The field of library studies became more intensive and varied after the All-Ukrainian Council of Library Workers in Kharkiv (November 1923) and the Conference of Scientific Libraries of the Ukrainian SSR in Kiev (December 1925). A chair of library science was established in 1925 at the National Library of Ukraine (from 1965 the *Central Scientific Library of the AN URSR [now ANU]). Library science publications included *Bibliotechnyi zbirnyk* (3 issues, 1926-7) and *Zhurnal bibliotekoznavstva ta bibliografii* (4 issues, 1927-30).

The repressive policies of the succeeding years, designed to destroy Ukrainian culture, interrupted the development of Ukrainian library science, and many scholars and workers in the field were persecuted.

After the Second World War Ukrainian library science was, until 1991, completely subordinated to the central authorities in Moscow (although work in Lviv maintained an element of national content). The *Lviv Scientific Library of the ANU has regularly published thematic anthologies (with varying titles) from 1972. Guides to incunabula in Ukrainian libraries have been published by M. Heppener, F. Maksymenko, and V. Mykytas. Other researchers in the field include M. Humeniuk, D. Isaievych, Ye. Kolesnyk, M. Valo, and H. Zlenko.

Lice (*voshi*). Any of the more than 3,000 species of insect parasites of the order Phthiraptera. Infestation with lice is fostered by inadequate sanitation and crowded living conditions. The human louse (Anoplura, *Pediculus humanus*) carries three dangerous diseases: relapsing fever, trench fever, and *typhus. During the First World War and the ensuing struggle for Ukrainian independence the Ukrainian army and the Ukrainian population were decimated by lice-borne typhus. The fact that typhus is transmitted by lice was first demonstrated by the Ukrainian microbiologist M. *Hamaliia, in 1908. Two years later, Hamaliia proved the value of eradicating lice as a means of eliminating typhus.

Lichkov, Boris [Ličkov], b 30 July 1888 in Irkutsk, Siberia, d ? Geologist. A member of the Ukrainian Scientific Society in Kiev, he taught at the Kiev Institute of People's Education in the 1920s. Together with V. Luchytsky he founded the Ukrainian Geological Committee in 1917 and then established it as an autonomous branch of the St Petersburg Geological Committee in 1922. His main scholarly interests were the geology and geomorphology of the Dnieper region. With Luchytsky he established a scheme of the hydrogeological regions of Ukraine. Lichkov disappeared in 1934 during the Stalinist terror.

Lider, Danylo, b 8 May 1917 in Viktorivka, Donets county, Don Cossack Region. Scenery designer. He graduated from the Repin Institute of Painting, Sculpture, and Architecture in Leningrad in 1956 and then worked in Leningrad, Moscow, and Cheliabinsk before moving to Kiev. In 1964 he designed scenery for the Kiev Operetta Theater and the Kiev Russian Drama Theater, and in 1965 he began working as principal designer for the Kiev Ukrainian Drama Theater (eg, he designed sets for I. Kocherha's *Yaroslav Mudryi* [Yaroslav the Wise, 1970]).

Liège. A city in Belgium (1990 pop 199,000); the center of its Walloon section, and site of the country's largest concentration of Ukrainians. Until 1919 the few Ukrainians who lived there formed the Ruthenian Neutral Circle (Cercle Neutre Ruthène). In the interwar period the Ukrainian community grew to about 200, including many political exiles and 25 students. Main organizations included the Ukrainian Hromada and the Society of Former Ukrainian Combatants in Belgium. In 1945 the number of Ukrainians in the city grew to 2,000, the increase consisting mainly of women from displaced persons' camps in Germany. After a wave of emigration to North America, the community in Liège stabilized at around 1,000. There are two local Ukrainian parishes, one Catholic and one Orthodox. Other organizations include the Union of Ukrainians in Belgium (SUB), branches of the Ukrainian Relief Committee, the Ukrainian Women's Association of Belgium, and the Ukrainian Youth Association (SUM). The St Sophia Community Center was built in Liège in 1978 and is used by local cultural and religious groups.

Liekh, Ivan [Ljex], b 1868 in Zhovkva, Galicia, d 7 December 1950 in Prudentópolis, Brazil. He emigrated to Brazil as a young man and worked from 1899 as a teacher in the first Ukrainian school in Prudentópolis. In 1910 he was put in charge of organizing new immigrant colonies. For his contribution to the development of Paraná he was appointed colonel of the 61st Cavalry Regiment, and he held a number of municipal offices.

Illia Lifshyts

Yevhen Lifshyts

Lifshyts, Illia [Lifšyc', Illja] (Lifshits, Ilia), b 13 January 1917 in Kharkiv, d 23 October 1982 in Moscow. Theoretical physicist; full member of the AN URSS (now ANU) from 1967 and the USSR Academy of Sciences from 1970. A graduate of Kharkiv University (1936) and the Kharkiv Polytechnical Institute (1938), he worked at the ANU Physical-Technical Institute in Kharkiv (1937–68) and was a physics professor at Kharkiv University (1944–64). He moved to Moscow in 1968. He made significant contributions to the electron theory of metals, the dynamic theory of real crystals, the theory of disordered systems, and the kinetics of second-order phase transitions.

Lifshyts, Yevhen [Lifšyc', Jevhen] (Lifshits, Evgenii), b 21 February 1915 in Kharkiv, d 29 October 1985 in Moscow. Theoretical physicist; full member of the USSR Academy of Sciences from 1979. A graduate of the Kharkiv Polytechnical Institute (1933), he worked at the AN URSS (now ANU) Physical-Technical Institute in Kharkiv (1933–8). In 1939 he moved to Moscow. He made significant contributions to ferromagnetism and relativistic cosmology, and with L. *Landau authored the landmark 10-volume textbook series *Course of Theoretical Physics*, which was translated into English and many other languages.

Liga vyzvolennia Ukrainy. See Canadian League for Ukraine's Liberation.

Light industry. A group of industries that produce consumer goods from different raw materials. It includes the primary processing of cotton, wool, silk, leather, hemp, linen, jute, and fur; the production of synthetic textiles; and the manufacture of fabrics, clothing, furs, and shoes.

In Ukraine light industry originated with domestic handicrafts and cottage industry in the early 10th century. By the 12th century some of the trades in the larger cities

had begun to participate in a wider commercial network. In the 14th to 16th centuries the division between the towns and the villages became sharper as a distinct stratum of independent tradesmen arose and organized itself into guilds, first in Western Ukraine and then in the Dnieper region. Some branches of light industry, particularly woolen-cloth and linen manufacturing, were established in the 17th century. The woolen factories were usually owned by landowners and employed serf labor, but leather work manufactures were mostly under the control of merchants and burghers.

In the second half of the 19th century, Russian economic policy discouraged the development of light industry on a larger scale in Ukraine and encouraged it in central Russia and Poland. As a result most branches of light industry in Ukraine continued to operate at the level of the cottage industry and trade shop. A few larger factories were set up only in the leather and jute-hemp industries: leather factories in Berdychiv, Kiev, and Vasylyk (1855-65), a jute factory in Odessa (1885), and a rope factory in Kharkiv (1896). The success of the policy is evident in the number of workers employed by large and small manufacturing enterprises in Ukraine (see table 1). In 1912 there were only one clothing and two footwear factories in Ukraine. Ukraine's textile industry accounted for only 0.9 percent of the empire's output. In 1913 light industry ac-

counted for only 2.6 percent of the output of large enterprises in Ukraine and for only 2 percent of Ukraine's labor force. Hence, Ukraine exported a large part of its raw materials (wool, leather, etc) to central Russia, Poland, and other regions of the empire and imported manufactured goods. The great disproportion between light and heavy industry in Ukraine underlines the colonial nature of Ukraine's economy at that time.

A similar situation existed in the western Ukrainian territories under Austrian rule. In 1910 there were only 15 light-industry enterprises employing over 20 workers. Among them were several textile factories that employed 100 to 150 workers, such as Heller's weaving factory in Kolomyia, the linen and batting factories in Stanyslaviv, the kilim-weaving factory in Hlyniany, and a few clothes factories in Lviv and Stanyslaviv. Most light-industry en-

TABLE 1
Number of workers in large and small enterprises in Ukraine in 1912 (in 1,000s)

Branch of industry	Large	Small
Fiber processing	8.9	156.8
Leather and footwear manufacturing	1.7	73.7
Clothes manufacturing	0.4	47.0

terprises were small-scale, particularly in the footwear and clothing industries. Light industry in Ukraine did not follow the pattern of development, into large-scale manufacturing, that took place in Western Europe, North America, and some parts of the Russian Empire in the 19th century.

In the 1920s during the NEP period, light industry in the Ukrainian SSR grew somewhat, through private initiative and some reorganization of the manufacturing process. The output of the textile industry grew from 34.6 million rubles' worth in 1913 to 69.2 million in 1927 (at fixed 1926-7 prices). The fur and leather footwear industries expanded sixfold. The clothing industry, which had been hardly visible, produced 119.4 million rubles' worth of goods. Small enterprises of the knitwear industry multiplied rapidly in the 1920s, thanks mainly to private initiatives. In general, Ukrainian light industry attained its prewar level of production in 1923-5. Most of the production continued to be concentrated in small enterprises. In 1926-7, large factories produced 1.32 million pairs of leather footwear, and small enterprises, 7.22 million pairs. Large and small enterprises of the clothing industry produced 24.3 million and 153.8 million rubles' worth of goods respectively. As agriculture was collectivized and supplies of raw materials decreased, and as the development of heavy industry was speeded up, light industry stopped expanding. Most of the smaller enterprises were abolished. By 1932 Ukraine's textile production had not even reached the prewar level. The output of woolen and semiwoolen fabrics had increased only slightly, from 5,285,000 m in 1913 to 6,625,000 m in 1932. The footwear, knitwear, and clothing industries fared somewhat better. During the First Five-Year Plan new leather factories were built in Kiev, Kharkiv, and Poltava, and the Gorky Clothing and Luxemburg Knitwear factories in Kiev were reconstructed. From 1927 to 1932, the output of Ukraine's light industry rose from 404 to 1,369 million rubles' worth. Most growth occurred in the clothing and knitwear industries. The industry's largest enterprises in the interwar period were the knitwear plants in Kiev, Kharkiv, and Odessa; the woolen-cloth complex in Kiev; the cotton-spinning factory in Poltava; the Gorky Clothing Factory in Kiev; and a number of leather factories in the larger cities. In 1940 light industry accounted for 10 percent of the output of large-scale production in Ukraine (2.6 percent in 1913). Its share in the USSR output was highest in the jute-hemp (28.6 percent), knitted underwear (24.6 percent), footwear (19 percent), and socks and hose (16 percent) industries. Light industry was weakest in the Donbas. Ukraine continued to import many textile goods from Russia and other parts of the Soviet Union.

After the Second World War the output of Ukraine's light industry grew significantly, owing to larger harvests of industrial crops and improvements in technology. In 1959-69, 33 new large enterprises were set up, and 79 were expanded and rebuilt. The largest cotton manufacturing complex in the USSR was built in Kherson, as well as a cotton mill in Ternopil, a wool-carding plant in Chernihiv, a silk manufacturing plant in Darnytsia, linen factories in Rivne and Zhytomyr, a shoe factory in Lubni, cotton-spinning factories in Lviv and Kiev, and clothing plants in Artemivske, Drohobych, Mykolaiv, and Pereiaslav-Khmelnytskyi. Today there are about 600 light-industry enterprises in Ukraine. The level of concentration and co-

operation among factories has improved. Since the 1960s a number of production associations have been formed, such as the Prohres footwear company, the Svitank leather company, and the Maiak clothing company, all in Lviv; the Zoria clothing company in Drohobych; and the Ukraina clothing company in Kiev. The level of capital investment in light industry rose considerably: beginning with the Ninth Five-Year Plan, more than a billion rubles have been invested. The production of synthetic fibers out of residual products of the oil, coal, and gas industries, which in the 1980s accounted for 20 percent of the output, contributed to the growth of light industry. The production process has been highly automated. Table 2 gives an overview of the growth of light industry in Ukraine from 1913 to 1988.

TABLE 2
Output of Ukraine's light industry, 1913-88
(percentage of the Russian Empire or USSR output in parentheses)

	1913	1940	1960	1980	1986	1988
Cotton fabrics (millions of m)	4.7 (0.2)	13.8 (0.3)	96.0 (1.5)	-	-	-
Woolen fabrics (millions of m)	5.3 (4.9)	12.0 (10.0)	19.1 (5.6)	-	-	-
Silk fabrics (millions of m)	-	40.0 (4.9)	-	-	-	-
Knitted outerwear (millions of items)	-	12.0 (20.5)	21.7 (19.4)	79.0 (16.5)	81.6	-
Knitted underwear (millions of items)	-	30.3 (24.3)	106.9 (22.6)	214.8 (18.8)	246.0	-
Hose (millions of pairs)	-	79.4 (16.3)	212.9 (22.1)	353.7 (21.2)	398.2 (20.2)	413.7
Leather footwear (millions of pairs)	-	40.8 (19.3)	76.8 (18.3)	177.2 (23.8)	186.9 (23.3)	190.8

Since the mid-1970s statistical data on Ukraine's output of cotton, woolen, and silk textiles have not been published. Figures exist only for the entire USSR. It is reasonable to estimate that Ukraine's share of the USSR output decreased steadily. There are no figures on Ukraine's production of linen. Ukraine's output of semimanufactured goods, such as textile fibers and yarns, is given in table 3.

The distribution of light-industry plants in Ukraine remains uneven. The Donets-Dnieper economic region, where heavy industry is highly concentrated, accounts for only 15 percent of the country's textiles output, up from 6.5 percent in 1970 and 10.5 percent in 1975. The respective percentages for the southwestern region in 1970 and 1975

TABLE 3
Production of textile fibers and yarns, 1940-87
(in 1,000 metric tonnes)

	1940	1970	1980	1987
Linen fiber	1.3	40.7	67.4	106.3
Hemp fiber	24.6	34.6	12.5	15.3
Washed wool	11.2	35.1	35.1	34.8
Raw silk	-	0.2	0.1	0.1
Cotton yarn	12.2	94.4	135.7	157.6
Linen yarn	1.3	21.1	24.1	27.5
Wool yarn	6.0	34.7	48.0	44.2

were 24.6 and 45.3, and for the southern region, 68.9 and 44.2. The southwestern economic region contains all of Ukraine's linen industry and 75 percent of its silk industry. There is a silk textiles complex in Cherkasy and a technical textiles plant in Lysychanske. The leather industry is also distributed unevenly: 75 percent of it is in the southwestern region, and another 12 percent is in two other regions. Such uneven distribution raises the cost of the industry's products, as does the practice of exporting yarn, washed wool, and other semimanufactured goods to Russia. The cotton industry in Ukraine is dependent on raw materials imported from Central Asia and Transcaucasia. Except for the clothing and knitwear industries, which at least meet some of the demands, there is little evidence to suggest that the situation of Ukraine's light industry will improve in the near future.

Likars'kyi visnyk (New York)

Likars'kyi visnyk (Physician's Herald). The official journal of the *Ukrainian Medical Association of North America, published since May 1954, at first semiannually and since 1958 quarterly. In 1962 its office moved from New York to Chicago. About one-third of the journal is devoted to scientific articles, including original research, conference papers, and reviews of medical publications. Another third addresses issues from the history of Ukrainian medicine, such as medical terminology, surviving practices of *folk medicine, personal memoirs, and histories of medical institutions. The remaining third deals with current affairs: reports of the association's sections, bulletins from the executive, biographies, and obituaries. The journal has been edited by R. Osinchuk (1954–5, 1958–61), Ya. Voievidka (1956–7), T. Lapychak (1962–6), and P. Dzul (since 1967). Its covers have been designed by J. Hnizdovsky, O. Moshynska, E. Kozak, G. Khudikian, and L. Palii.

Likars'kyi visnyk (Physician's Herald). A professional and scholarly journal of the *Ukrainian Physicians' Society in Lviv, published monthly in 1920, quarterly in 1921–35, and bimonthly in 1935–9, then also under the auspices of the Medical Commission of the Shevchenko Scientific Society. The first editor was I. Kurovets. The editorial board consisted of T. Burachynsky, Yu. Dobrylovsky, S. Drymalyk, Yu. Kordiuk, Ye. Lukasevych, M. Muzyka, I. Ortynsky, M. Panchyshyn, and S. Parfanovych.

Liknep. See Elimination of illiteracy.

Likowski, Edward, b 26 September 1836 in Września, Poland, d 20 February 1915 in Poznań. Polish church figure and historian. He studied theology in Münster, was ordained in 1861, and was a professor of canon law and church history at the Poznań Theological Seminary from 1865. A member of the Polish Academy of Sciences from 1886, he wrote scholarly monographs in Polish on the history of the union of the Ruthenian and Roman churches (1875), the history of the Uniate church in Lithuania and Ruthenia (ie, Ukraine and Belarus) in the 18th and 19th centuries (1880; 2nd edn 1906), and the 1596 Church Union of Berestia (1896; 2nd edn 1907; Ukrainian trans 1916). In Poznań he served as the vicar-general and vicar of the archdiocesan chapter. He was elevated to the rank of archbishop in 1914.

Liliecrona, Gustaf, b 10 October 1623, d 19 April 1687. Swedish diplomat and statesman. He was an emissary to Ukraine in June–October 1657, sent to negotiate a Swedish-Ukrainian alliance against Poland. Through Liliecrona the Swedish king Charles x Gustav informed Hetman B. *Khmelnysky that his government had no objections to Khmelnysky's uniting eastern Ukraine with the western Ukrainian lands then under Polish rule. Khmelnysky and representatives of the *Cossack *starshyna* agreed to strengthen the Ukrainian-Swedish union in their mutual war against Poland, and they proposed Ukrainian mediation in the matter of restoring peace between Sweden and Russia. The negotiations resulted in the signing of the Korsun Treaty of Alliance on 17 October 1657. The instructions of King Charles to Liliecrona and the diplomat's correspondence with the Swedish government represent a valuable source for the political history of Ukraine during that time. The materials were published in *Arkhiv Iugo-Zapadnoi Rossii* (pt 3, vol 6 [1908]).

Lily of the valley (*Convallaria majalis*; Ukrainian: *konvaliia*). A low perennial herb of the lily family Liliaceae, usually with two large oblong leaves and a raceme of small, fragrant, bell-shaped white flowers. In Ukraine it grows wild in woods and shrubbery and is cultivated as a decorative plant. A valuable *medicinal plant, lily of the valley contains glycosides, and infusions of the flowers are used in the treatment of heart conditions.

Lime industry. A branch of the building-materials industry that produces lime or quicklime by roasting limestone or chalk under controlled conditions. Lime is used as a building material, a flux in steel making, a fertilizer, and a chemical in the manufacture of sugar, paper, and glass and in waste treatment. By the end of the 18th century lime works had been set up in Podilia and the Cherni-

hiv and Novhorod-Siverskyi regions by monasteries and landlords. The industry expanded in the 19th century, but factories remained small, with 18 to 40 workers. In 1875 there were 79 factories in Russian-ruled Ukraine, employing 889 workers and producing 101,000 rubles' worth of lime. By 1895 the number had risen to 232 factories, employing 1,233 workers and producing 273,000 rubles' worth of lime. After 1917 the greatest expansion of the lime industry was in the Donbas. In 1928 Ukraine produced 192,100 t of lime, or 36.9 percent of the total Soviet output. Ukraine's share of the Soviet output declined in the 1950s and rose in the mid-1960s. In 1967 Ukraine produced 6,982,000 t, or 35.5 percent of the Soviet output, and in 1982, 8,727,000 t, or 30.4 percent. Donetsk, Dnipropetrovske, Kharkiv, and Vinnytsia oblasts account for 90 percent of the republic's lime output.

Limestone (*vapniak*). A sedimentary rock consisting chiefly of calcium carbonate (over 50 percent), primarily in the form of calcite, but in very young rocks also of aragonite. A third calcium carbonate mineral, vaterite, occurs only in traces, because it quickly alters to calcite. There is a continuous series of transition to dolomite (the calcium-magnesium carbonate), most of the time through secondary dolomitization and consequent recrystallization. *Marble is a metamorphosed equivalent of either limestone or dolomite. The color is mostly white or gray, but it can vary widely, if the rock is stained by traces of impurities. In the commercial manufacture of lime, limestone refers to any rock which contains at least 80 percent carbonate of calcium or magnesium, and which slakes when water is added upon calcination (thermal decomposition).

Limestone of different ages is found in various forms nearly everywhere in Ukraine (except in its central reaches). The oldest are the thick deposits of crinoid Silurian limestones in the Zbruch River valley; they are followed by the Devonian dolomitic limestones of southwestern Podilia, the southern Donets Ridge, and the southwestern part of the Dnieper-Donets Trough. Carboniferous limestones form thick deposits in the Donets Basin. Jurassic limestones are known in the southern part of the Crimean Mountains and the Caucasus and in the southern part of the Opilia Upland and are found at considerable depths in the Dnieper-Donets Trough. Cretaceous limestones are exposed in Podilia, Roztochia, the Volhynia-Kholm Upland, and, less commonly, the Carpathian Mountains. They form large deposits in the northern part of the Crimean Mountains and the Caucasus, lie at considerable depths in the Black Sea Depression, the Dnieper-Donets Trough, and the Prypiat Trough, and rest on the southern slopes of the Voronezh Massif. Paleogene marls occur in the Donets Basin, and Miocene bryozoan and reefy limestones in western Ukraine.

The limestones of the Donets Basin are of the greatest industrial use. Most notable are the large, high-quality deposits of fluxstone mined at Komsomolske, Dokuchaievske, and Novotroitske (respectively southeast, south, and southwest of Donetsk), as well as at Balaklava (a suburb of Sevastopol) and (of lesser quality) at Bila Krynytsia and other sites south of Kryvyi Rih. Much limestone is mined for cement in Vynnytsia and Mykolaiv oblasts. Limestone is used as building stone largely in the Crimea, the Donets Basin, Kharkiv oblast, and Podilia.

Chemical and other industrial uses of limestone correspond to the location of the respective industries.

P. Sonnenfeld

Limnychenko, Vasyl. See Melnyk, Vasyl.

Limnytsia River [Limnycja] (aka Lomnytsia). A right-bank tributary of the Dniester River. The Limnytsia is 122 km long and drains a basin area of 1,530 sq km. It has its source in the Gorgany Range of the Ukrainian Carpathians and flows through Ivano-Frankivske oblast. Throughout its course the Limnytsia is a mountain river. Its waters are used for industrial, agricultural, and domestic consumption and irrigation.

Linden (*Tilia*; Ukrainian: *lypa*). A large deciduous tree of the family Tiliaceae, reaching heights of 15–25 m and a trunk diameter of 2 m. Some lindens grow for 500 to 1,000 years. Lindens are widely cultivated as ornamental trees in parks. There are approx 50 known species of linden, 4 of which are found in Ukraine's deciduous and mixed forests. The most common is the little-leaf linden (*T. cordata*; Ukrainian: *lypa sertseva*). The wide-leaf linden (*T. platyphyllos* Scop.) and silver linden (*T. argentea* Desf.) are found in Western Ukraine. The Crimean or green linden (*T. euchlora* Koch.) is found in the Crimean Mountains. Linden wood is soft yet strong. It is widely used in Ukraine for the production of furniture, cabinets, musical instruments, veneer, and millwork. The bark of young trees is used in basketweaving, footwear, and twine. The fragrant, creamy golden flowers are rich in nectar; dried flowers are brewed as a diaphoretic tea and as a gargling solution.

Linear Spiral-Meander Pottery culture: pottery excavated near Nezvyzko, Horodenka raion, Ivano-Frankivske oblast

Linear Spiral-Meander Pottery culture (Liniinostričkovoi keramiky kultura). An early Neolithic culture that existed throughout western, central, and eastern Europe and in the upper Dniester and western Volhynia regions of Ukraine in the late 5th to mid-4th millennium BC. The settlements of this culture in Ukraine commonly featured semi-pit dwellings with hearths inside and storage pits outside. Both full body burials and cremation were practiced by the people of this culture. Their pottery was known for its globular shape, thin walls, and distinctive linear ornamentation employing frequent spirals. The culture's major occupations included agriculture and animal husbandry.

Linens industry. A branch of the *textile industry that produces linen cloth, sacking, twine, cords, and other goods from *flax fibers. Like other branches of light industry in Ukraine, the linen industry is and has been underdeveloped in relation both to Ukraine's output of flax fiber and to the needs of the population.

The cultivation of flax and the domestic weaving of linen have always played an important role in the Ukrainian economy. Linen was made as early as the Trypilian period. In the 18th century it was said that every household had flax in the fields and a loom at the hearth. The first linen manufactories were established in the 18th century in the flax-growing northern regions. The main centers of linen manufacture in Russian-ruled Ukraine were Pochep, Sheptaky, and Topal, in the Chernihiv region, Rivne, in Volhynia, and Shpola, in the Kiev region. In 1750 the Pochep manufactory was transferred to Russia in accordance with imperial discrimination against Ukrainian manufacturing.

Western Ukraine under Austrian rule grew almost a quarter of the empire's flax (23 percent in the 1840s). The linen industry, valued at 13 million florins, accounted for a quarter of the region's industrial output. Characteristically, only the initial processing of flax fibers was done in Western Ukraine; the finished goods were manufactured in Vienna, Brno, or Pest.

Output of Ukraine's linen industry, 1940-87

Product	1940	1960	1970	1980	1987
Flax fiber (in 1,000 t)	1.3	20.4	40.8	67.4	106.3
Linen yarn (in 1,000 t)	1.3	0.4	21.1	24.1	27.5
Linen cloth (in million m)	2.1	0.35	48.7*	-	-

* Figure for 1968

Linen factories appeared in the Ukrainian gubernias only toward the end of the 19th century, but up to the revolution most of the linen output came from the cottage industry. As new flax varieties were introduced, fiber processing grew rapidly. Its growth rate was not matched by that in linen spinning or weaving (see the table). By 1970 there were 18 linen factories in Ukraine: 8 in Chernihiv oblast, 6 in Zhytomyr oblast, and 1 each in Volhynia, Kiev, Lviv, and Rivne oblasts. The *Zhytomyr and the *Rivne linen manufacturing complexes went into operation in 1962 and 1964 respectively and have raised the republic's output of linen cloth. The linen industry in Ukraine, however, remains underdeveloped in relation to its material base: in 1983 Ukraine grew almost a quarter of the USSR's flax but produced only 11 percent of its linen yarn.

C. Freeland

Linguistic geography. A trend in linguistics begun by J. Gilliéron, who proposed to recover the history of a given language from the present-day territorial distribution of linguistic data. Linguistic geographers study dialects systematically and compile dialectal atlases. In the Slavic countries this scholarly trend had the greatest following in Poland.

Although a pioneering work in linguistic geography, P. *Buzuk's dialectological study of the Poltava region, was written in Ukraine in 1929, the first Ukrainian dialectal atlas did not appear until almost three decades later. Some data on Ukrainian dialects appeared in J. Tarnacki's comparative study of Polish dialects in Mazovia and Polisia (1939) and the dialectological atlas of the Belorussian language (1963). Some works on Ukrainian dialects, such as Pankevych's book on the Transcarpathian dialects (1938), H. Shylo's on the southwestern dialects north of the Dniester River (1957), V. Vashchenko's on the Poltava dialect (1957), and K. Dejna's on the Ternopil region's dialects (1957), contain a number of maps and can be considered embryonic dialectal atlases. Atlases of Ukraine's dialects began to appear only in the 1950s; they include Z. Stieber's atlas of the Lemko region (8 parts, 1956-64), Y. Dzendzelivsky's atlas of Transcarpathia oblast (2 parts, 1958-60), the Carpathian dialectological atlas by S. Bernshtein et al (1967), J. Rieger's atlas of Boiko dialects (6 vols, 1979-86), F. Czyżewski's atlas of Polish and Ukrainian dialects (1986), and Z. Hanudel's south Lemko dialect atlas (2 vols, 1981-9). Work on a dialectal atlas covering all of Ukraine began in 1948-9, using B. Larin's program for collecting data. With Larin's departure to Leningrad, F. *Zhylo, the leading linguistic geographer in Ukraine, became the director of the atlas project. He propagated the principles of linguistic geography in his *Narysy z dialektolohii ukrains'koi movy* (Studies in the Dialectology of the Ukrainian Language, 1955; 2nd edn 1966), organized annual conferences on Ukrainian dialectology, and edited several collections of conference papers, including *Ukrains'ka linhvystychna heohrafiia* (Ukrainian Linguistic Geography, 1966). The project came to a standstill when Zhylo moved to Moscow, but it was eventually revived under the direction of I. Matviias. The first two volumes of *Atlas ukrains'koi movy* (Atlas of the Ukrainian Language, 1984, 1988) cover Polisia, the central Dnieper region, Volhynia, the Dniester region, and Transcarpathia and adjacent territories. The change of editors and revisions in the project's program, including the reduction of the number of projected volumes from six to three, had a detrimental effect, and the atlas does not measure up to its Polish, Slovak, Bulgarian, and Belorussian counterparts. Of great importance for a description of Ukrainian linguistic geography is also the *Obshch斯拉vianskii dialektologicheskii atlas* (General Slavic Dialectological Atlas), published in a series from 1988. Besides work on the linguistic atlas, other studies in linguistic geography have been written by V. Vashchenko (the Dnieper region), P. Lyzanets (Transcarpathia), V. Latta (the Prešov region), M. Nykonchuk, and others.

Linguistics. The origins of language study in Ukraine date back to Kievan Rus'. The *Izbornik* of Sviatoslav (1073), which was transcribed from the Bulgarian, contained a chapter 'On Images' by the Byzantine author G. Choironboschos. We do not know whether the contemporary treatise 'On Letters,' by the Bulgarian monk Khrabr, transcriptions of which are dated not earlier than the 15th century, was known at the time, and have no information about linguistic works of local origin.

A somewhat more independent approach to language studies was adopted in Ukraine only at the end of the 16th and in the first half of the 17th century. This development

was conditioned by the polemics over the Church Union of Berestia and by the needs of education. Ideologically, it was grounded in the project of reviving Church Slavonic and Greek; hence, attention was focused on preparing grammars and dictionaries of these languages. Besides primers and elementary school textbooks, some important grammars were published: **Khramatyka slovens'ka iazyka* (Grammar of the Slavic Language, 1586), **Adelphotos* (1591), L. Zyzanii's Slavonic grammar with a small dictionary (1596), M. Smotrytsky's Slavonic grammar (1619), and P. Berynda's Slavonic-Ruthenian lexicon (1627). For some time these works determined the grammatical and lexical tradition not only in Ukraine, but also in Russia and Serbia and to a certain extent even in Rumania. Based on Western European textbooks of Latin and Greek by Donatus, Alvares, Lascaris, Moschopoulos, and others, they mechanically combined medieval scholastic traditions with elements of humanistic grammar. No observations about vernacular usage were made.

In the early 19th century, as universities were founded and romantic-national ideas spread in Ukraine, language studies underwent a renewal and adopted new methods and subjects. Because of Ukraine's colonial status, the development of philology in Ukraine was in some ways distinctive. As state-supported and -controlled institutions, the universities in Ukraine were Russian, Polish, or German-Austrian, not Ukrainian. The study of Ukrainian – called the Little Russian dialect under Russia and Ruthenian under Austria-Hungary and Poland – was not forbidden, but neither was it encouraged. Furthermore, treated as provincial, the universities in Ukraine were constantly drained of their most talented young scholars by universities in the imperial capitals. Thus, I. *Sreznevsky and D. *Ovsianiko-Kulikovsky were drawn away from Kharkiv to St Petersburg, A. *Sobolevsky from Kiev to St Petersburg, and A. Brückner from Lviv to Berlin.

To overcome these obstacles to the development of linguistics in Ukraine, central academy-like institutions were set up. In the 19th century there were only three such schools in Ukraine: the school of philosophical linguistics at Kharkiv University, the F. Miklosich school in Galicia and Bukovyna, and the O. Potebnia school at Kharkiv University. Only the last originated in Ukraine; the first emulated German and Russian examples, and the second was transplanted from Vienna.

Philosophical linguistics, which was inspired by the French encyclopedists and influenced to a slight extent by the German Romantics, was cultivated in the first two decades after the founding of Kharkiv University (1805). Its adherents were interested in universal grammar, the origin and development of languages, the value of language, and the poetic and rhetorical uses of language. Their main works were I. Rizhsky's *Opyt ritoriki* (An Essay on Rhetoric, 1796; 2nd ed 1805; 3rd ed 1822) and *Vvedenie v krug slovesnosti* (Introduction to the Sphere of Language, 1806), I. Tymkovsky's *Opytnyi sposob k filosoficheskomu poznaniu rossiiskogo iazyka* (The Empirical Method for the Philosophical Study of the Russian Language, 1811), and R. Honorsky's and M. Paki-de-Sovini's writings.

Romanticism in linguistics is associated with I. Sreznevsky at Kharkiv University and M. *Maksymovych at Kiev University. Sreznevsky initiated research on the history of Ukrainian and Russian and on Slovenian dialectology. Maksymovych was interested primarily in the history of Ukrainian and other Slavic languages. Occa-

sionally, he adapted the facts to fit his national-romantic theory. Other representatives of Romanticism were not associated with any university, but were autodidacts and dilettantes. They discovered and introduced into scientific discussion many facts about contemporary Ukrainian, but most of their generalizations and historical speculations were unscientific. Nonetheless, a number of Ukrainian grammars were produced by amateurs, such as O. Pavlovsky (1805, publ 1818), M. Luchkai (1830), I. Mohylnytsky (1823, publ 1910), Y. Lozynsky (before 1833, publ 1846), Y. Levytsky (1834), and I. Vahylevych (1845). *Rozprava o iazytsi iuzhnoruski i ieho narichiiakh* (Treatise on the South Ruthenian Language and Its Dialects, 1849) by Ya. Holovatsky, the first holder of the chair of Ruthenian philology at Lviv University, can also be included among these grammars.

More serious scientific research began with the arrival of P. *Lavrovsky at Kharkiv University in 1851 and of A. Małecki at Lviv University in 1856. The former worked mostly in the history of Russian, the latter in Polish grammar, but both used comparative Slavic materials. Together with A. Kochubinsky at Odessa University (from 1871) they were representatives of positivist, preneogrammarian linguistics.

The first members of F. *Miklosich's pragmatic school in Ukraine were O. Ohonovsky, holder of the chair of Ruthenian philology at Lviv University (from 1874), and his successor to the chair in 1895, O. Kolessa. At Chernivtsi University, S. Smal-Stotsky (1885–1918) and O. Kaluzhniatsky (1875–1914) promoted this linguistic school in Bukovyna. Unlike their teacher, these scholars were not interested in comparative studies but in the history of Ukrainian.

O. *Potebnia, holder of the chair of Russian language and literature at Kharkiv University (1874–91), was the only noted linguist of the period at a university in Russian-ruled Ukraine with a clearly defined Ukrainian identity. Specializing in the field of general linguistics, he embraced the ideas of J. Herbart and R. Lotze's school of psychology and developed an original concept of language bridging linguistics and literary theory. His followers, including D. Ovsianiko-Kulikovsky, V. Khartsiiev, B. Lezin, and O. Vetukhiv, were grouped around the serial *Voprosy teorii i psikhologii tvorchestva* (8 vols, 1907–23). The Russian A. Sobolevsky, who taught at Kiev University (1882–8), regarded Ukrainian as a Russian dialect and proposed the theory of Kiev's 'Great-Russian' origins. Political circumstances prevented two remarkable Kiev linguists from pursuing university careers: K. Mykhalchuk expounded highly original, quasi-structuralist ideas on the history of Ukrainian phonetics, and P. Zhytetsky wrote the first history of Ukrainian phonetics (1876) and historical surveys of literary Ukrainian of the 17th and 18th centuries (1889, 1900).

In Slavic linguistics the chief neogrammarians in Ukraine were A. Brückner at Lviv University (1878–81), S. Kulbakin (1905–19), Ya. Endzelin at Kharkiv University (1911–20), O. Lukianenko at Kiev University (1907–20), and B. Liapunov at Odessa University (1903–23). In general linguistics the school was represented by the phoneticist A. *Tomson at Odessa University (1897–1932) and the Sanskritologists T. Knauer at Kiev and V. Schertzl at Kharkiv (1870–84) and Odessa (1884–96) universities. M. *Hrunko of Kiev University (1915–41) and V. *Rozov (1903–16), who in 1913–14 read the first course in the his-

tory of Ukrainian at Kiev University, were less consistent in their neogrammarian approach. At this time the dilettantes in Ukrainian linguistics, such as V. Naumenko in Kiev, I. Verkhratsky in Lviv, and A. Krymsky, an Orientalist in Moscow, adhered to old philological ideas. In 1906 the first department of Romance and Germanic languages in Ukraine was set up at Kiev University. The first studies in Romance linguistics were S. Savchenko's works on the genesis of the Romance languages (1916) and the history of Provençal (1918).

The Revolution of 1917 marked a turning point in the development of linguistics in Ukraine. The Ukrainian Academy of Sciences (est 1918), along with the universities, became an important center of learning. Ukrainian linguistics became for the first time a distinct discipline in institutions of higher learning. During the period of Ukrainian independence and the subsequent years of *Ukrainization, Ukrainian linguists in Soviet Ukraine had to prepare textbooks of Ukrainian for students and adults, compile high-quality dictionaries (see *Lexicography and *Terminology), and normalize Standard Ukrainian and its orthography.

In the process of normalization two groups with radically different tendencies emerged: the 'ethnographic' group – Ye. Tymchenko, S. Smerechynsky, and O. *Kurylo (until 1925) – which based itself on the principle of *purism; and those who rejected this romantic-nationalist approach – O. *Syniavsky, O. Kurylo (after 1925), M. Sulyma, and K. Nimchynov. The first syntheses of the results of normalization were O. Syniavsky's *Normy ukraïns'koi literaturnoi movy* (The Norms of Literary Ukrainian, 1931) and vols 2 and 3 of the VUAN Russian-Ukrainian dictionary (1927, 1933).

At the same time research was actively conducted in Ukrainian dialectology and the history of the Ukrainian language. Besides descriptions of particular dialects, significant attempts at explaining the genesis of Ukrainian dialects were made by V. *Hantsov, O. Kurylo, and I. *Zilynsky. Descriptive studies of particular literary monuments and analyses of the language used by individual writers were published. P. Buzuk (1927) and Ye. *Tymchenko (1930) wrote the first comprehensive histories of the Ukrainian language, and M. Sulyma (1927) wrote a history of the literary language. Vol 1 of a historical dictionary of Ukrainian (2 parts, 1930, 1932) came out under Ye. Tymchenko's editorship.

Although research on the Ukrainian language prospered in the early Soviet period, other areas of linguistics were neglected. In general linguistics only L. *Bulakhovsky's *Osnovy movoznavstva* (Foundations of Linguistics, 1928–9) was published during this period. Also in the early 1930s O. Kurylo tried to transplant some of the achievements of structuralism to Ukraine. Comparative Indo-European linguistics was almost completely neglected. The little that was published in comparative Slavic linguistics was written by L. Bulakhovsky (on Slavic accentology, particularly frequency in Czech) and M. Hrunsky (on Church Slavonic). In Oriental linguistics only some textbooks appeared, eg. A. *Krymsky's *Tiurky, ikh movy ta literatury* (Turki, Their Languages and Literatures, 1930), T. Kezma's Arabic grammar (1928), and T. Hrunin's Turkish grammar (1930). E. Spivak and M. Shapiro of the VUAN Hebraist Commission conducted research on Yiddish. Romani dialects were studied by O. Barannykov (1931).

The Stalinist terror of the 1930s put an end to the development of Ukrainian linguistics. Almost every noted linguist except L. Bulakhovsky and M. Hrunsky was repressed, or perished. The newly founded Institute of Linguistics became a tool of Russification. Except for H. Levchenko's work on literary Ukrainian of the first half of the 19th century (1939, 1946) and L. Bulakhovsky's university textbooks of Russian, not one serious work on Ukrainian, Russian, Slavic, or general linguistics appeared during the 1930s and 1940s.

In Rumanian-ruled Bukovyna during the interwar period linguistic research at Chernivtsi University died out completely. In Polish-ruled Galicia, Lviv University became an important, though up to 1939 exclusively Polish, linguistic center. Among the noted linguists who worked there were the Polonists K. Nitsch (1917–20), H. Gaertner (1926–35), and W. Taszycki (1929–41, 1944); the Slavists T. Lehr-Splawiński (1922–9) and Z. Stieber (1937–9, 1944–5); the Indo-Europeanists A. Gawroński (1917–27) and J. Kuryłowicz (1929–45); the Germanists W. Dołmajer (1913–32) and O. Kuryłowicz (1932–9); the Romance linguists E. Porębowicz (1899–1931) and Z. Czerny (1924–46); the Anglicist W. Tarnawski (1924–41); the classical philologists S. Witkowski (1902–35), R. Gansiniec (1920–46), and J. Kowalski (1920–45); and the student Polonists S. Bąk, W. Kuraszkiwicz, T. Milewski, S. Hrabec, and K. Dejna. The chair of Ruthenian philology was occupied for the first time by a Pole, J. Janów (1927–45). Linguists associated with the Shevchenko Scientific Society, including O. Kolesa, I. Svientsitsky, V. Lev, K. Kysilevsky, J. Rudnyckyj, and I. Pankevych, conducted research in the spirit of F. Miklosich and V. Vondrák, concentrating mostly on dialects and literary monuments. The society's research program expanded with the arrival from Prague in 1933 of V. *Simovych, the author of pioneering structuralist works in the history of Ukrainian and of interesting works in onomastics. A. Artymovych, a professor at the Ukrainian Free University in Prague, also used the structuralist method. The Ukrainian Scientific Institute in Warsaw was another secondary center for Ukrainian linguistics. It published several works by Galician linguists, such as M. Pshepiurska-Ovcharenko, V. Lev, and M. Pushkar, and supported the work of I. *Ohienko and R. *Smal-Stotsky. Ohienko, a representative of the 'ethnographic' tendency, propagated the methods of the Kiev philological school and published *Ridna mova* (1933–9), the first popular Ukrainian linguistic journal. Smal-Stotsky studied specific grammatical categories of contemporary Ukrainian using A. Marty's psychological approach.

Since the Second World War and particularly since Stalin's death, the number of linguists and their publications in Soviet Ukraine has increased. *Movoznavstvo*, the journal of the Institute of Linguistics, was revived in 1941 under L. Bulakhovsky's editorship and has raised its scientific standards. Several new linguistic serials were founded: *Ukraïns'ka mova v shkoli* (1951), renamed in 1963 *Ukraïns'ka mova i literatura v shkoli*; *Diialektolohichniy biuleten'* (9 issues, 1950–62); *Leksykohrafichnyi biuleten'* (9 issues, 1951–63); and *Doslidzhennia i materialy z ukraïns'koi movy* (6 vols, 1959–64). The Lviv branch of the AN USSR published *Doslidzhennia z movy ta literatury* (2 vols, 1954–7) and *Doslidzhennia i materialy z ukraïns'koi movy* (6 vols, 1959–64). Many collections of articles have been published, including *Slov'ians'ke movoznavstvo* (Slavic Linguistics, 5 vols, 1958–67), *Filolohichniy zbirnyk* (Philological Collec-

tion, 1958), and *Slavistychnyi zbirnyk* (Slavistic Collection, 1963). Collections dealing specifically with dialectology, syntax, the history of Ukrainian grammar, lexicology, onomastics, and stylistics have appeared. The most important synthetic works on Ukrainian that appeared in the decade after Stalin's death were L. Bulakhovsky's book on the origin of the Ukrainian language (1956), L. Humetska's survey of the word-formation system of the Ukrainian language in 14th- and 15th-century official documents (1958), S. Bevzenko's book on the historical morphology of the Ukrainian language (1960), A. Gensorsky's studies of the language of the Galician-Volhynian Chronicle, and F. Zhylko's dialectological research.

Despite a considerable growth in the range of subjects studied and a budding interest in methodological problems (particularly I. Kucherenko's studies in the methodology of morphology), linguistics in Soviet Ukraine in the early 1960s still had many shortcomings. Political bias and propaganda continued to mar many works, particularly I. Bilodid's (ed) *Kurs istorii ukrains'koi literaturnoi movy* (A Course in the History of the Ukrainian Literary Language, 2 vols, 1958, 1961). When the AN URSS was subordinated to the USSR Academy of Sciences in 1963, the publication policy of its institutes, including the Institute of Linguistics, changed drastically. Most periodicals and series were abolished and replaced by occasional collections of articles on specific research questions or individuals such as O. Potebnia, T. Shevchenko, or M. Lomonosov. Only the bimonthly *Movoznavstvo* survived. The publication programs of universities also suffered severe cuts. The only remaining linguistics periodical that serves all the republic's universities is the annual *Ukrains'ke movoznavstvo* (est 1974). The precarious situation in linguistics is illustrated by the dictionary of the language of H. Kvitka-Osnovianenko's works (3 vols, 1978-9) that was issued by Kharkiv University in only 350 copies, none of which appeared in bookstores. Thus, the Institute of Linguistics and the Institute of Social Sciences in Lviv have become the only serious publishers in Ukrainian linguistics.

During the years 1964-84 the Institute of Linguistics explored some areas that previously had not been systematically studied: the intonation of the contemporary vernacular (four collections of articles), the peculiarities of speech (three collections), and onomastics (six collections). In 1966-70 it published four collections of articles on statistical and structural methods in linguistics. Subsequent collections on topics such as the philosophical questions of linguistics (1972) and language and time (1977) have been marred by propaganda. Most of the studies dealing with Ukrainian have been in dialectology: altogether, seven collections of articles on Ukrainian dialects have appeared. Only three collections have been published on the morphology of modern Ukrainian, one on syntax, four on lexicology, two on the history of linguistic studies, and one on the history of Ukrainian. More monographs than before were published on historical subjects, but generally, the Ukrainian language and its history have been underemphasized. The only exceptions to this rule have been (1) a series of publications of Middle Ukrainian texts, such as 14th- and 15th-century charters; dictionaries by L. Zyzanii, P. Berynda, and Ye. Slavynetsky; grammars by L. Zyzanii, M. Smotrytsky, and I. Uzhevych; and 16th- and 18th-century chancery documents, but no religious texts; and (2) comprehensive textbook series, such as one on Modern Standard Ukrainian (5 vols, 1969-73) edited by

I. Bilodid et al, and the one on the history of Ukrainian (4 vols, 1978-83) edited by A. Hryshchenko et al. Some valuable reference works have appeared also; eg, a dictionary of 14th- and 15th-century Ukrainian (2 vols, 1977-8) based on the language of old charters, edited by L. Humetska and I. Kernytsky; the first three of seven volumes of a Ukrainian etymological dictionary (1982-), edited by O. Melnychuk et al; the first two volumes of a three-volume atlas of Ukrainian dialects (1984-), edited by I. Matviias et al; a dictionary of Ukrainian hydronyms (1979), edited by K. Tsiluiko et al; and an eleven-volume Ukrainian dictionary (1970-80), edited by I. Bilodid et al. The almost complete restriction of research to the Institute of Linguistics and the emphasis on collections of articles and collectively prepared reference tools made creative individual scholarship in linguistics almost impossible. Soviet linguists became merely executors of a centrally prescribed program, subject to the dogmas of political ideology. Hence, scholarly discussion was virtually nonexistent in Soviet Ukrainian publications.

Another major change in Ukrainian linguistics was brought about by a shift in Soviet nationality and language policy. At the all-Soviet conferences on teaching Russian held in Tashkent in 1975 and 1979, it was announced that as the universal medium of communication in the USSR, Russian must become through education the 'second native language' of all non-Russians. Accordingly, the Institute of Linguistics in Kiev began feverishly publishing books to promote Russian in Ukraine. As a rule its publications were in Russian and bore titles (in translation) such as *The Russian Language - The Language of International Communication and of the Unification of the Peoples of the USSR* (1976), *A Comparative Study of the Russian and Ukrainian Languages* (1975), *The Culture of Russian Speech in Ukraine* (1976), *The Russian Language as a Source of Enrichment of the Languages of the USSR* (1979), and *The Functioning of the Russian Language in a Close Linguistic Environment* (1981). The institute also began publishing, only in Russian, books on general linguistics.

In the West, linguists have concentrated mostly on problems of Ukrainian grammar and stylistics (eg, J. Barnstead, C. Bethin, V. Yashchun, P. Kovaliv, V. Swoboda), the history of Ukrainian (G.Y. Shevelov, B. Struminsky, P. Wexler), etymology (J. Rudnycky), dialectology (O. Horbach, B. Struminsky), Old Ukrainian texts (O. Horbach, V. Swoboda, G. Perfeky, I. Gerus-Tarnawecka), and onomastics (J. Hursky, W. Zyla). (See also *Dialectology, *Grammar, Ukrainian *Language, *Lexicography, *Lexicology, *Morphology, *Orthography, *Standard Ukrainian, *Stylistics, and *Syntax.)

Linnet (*Carduelis cannabina*; Ukrainian: *ziablyk, konoplianka*). A common, small Old World finch of the family *Carduelidae*, approx 15 cm long, weighing 23 g. The male has a crimson crown and breast, brown-streaked back, and white-edged, forked tail; the female and young are grayish brown. Linnets are valuable for controlling insects.

Linnyk, Volodymyr (Linnik, Vladimir), b 6 July 1889 in Kharkiv, d ? Physicist specializing in applied optics and optical mechanics; full member of the AN URSR (now ANU) from 1939. He graduated from Kiev University (1914) and worked at the Kiev Polytechnical Institute and the State Optical Institute (from 1926). His main contributions were in the fields of X-ray optics (where his formulations are considered classical), applied optics (interferometry, spectroscopy, microscopy), photoelectronics, and astronomical optics. He invented numerous optical instruments, among them the widely used Linnyk microinterferometer, microprofilometers, and double microscopes, as well as various astronomical and measuring-type interferometers, collimators, microscope attachments, and astronomical instruments.

Linova, Yevgeniia [Lin'ova, Jevgenija] (née Paprits), b 9 January 1854 in Brest-Litovsk, d 1919. Russian singer, folklorist, conductor, and educator. In 1890 she came to the United States, organized a choir, and presented concerts of Ukrainian and Russian folk songs in New York, Boston, Philadelphia, and Chicago. In 1896 she returned to Russia, bringing with her a phonograph, which she adapted for collecting folk songs. A year later she made the first phonograph recordings of Ukrainian choral music. On her initiative a musical ethnography commission was set up at the Society of Lovers of Natural Science, Anthropology, and Ethnography. During her expedition to the Poltava region (1904) she recorded about 120 songs, 18 of which appeared in her *Opyt zapisi fonografom ukrainskikh narodnykh pesen* (An Attempt to Record Ukrainian Folk Songs with a Phonograph, 1906). In 1913 she collected folk songs in Galicia and Czechoslovakia. Linova illustrated her lectures at international conferences in Vienna (1909), London (1911), and Paris (1914) with her recordings. Of her large collection, 116 drums have been preserved in Soviet archives.

Lintur, Petro, b 4 May 1909 in Horonda, Bereg komitat, Transcarpathia, d 3 November 1969 in Uzhhorod, Transcarpathia. Folklorist and literary scholar. After graduating from Prague University (1937) he taught at a gymnasium in Khust and lectured at Uzhhorod University (1953–69). He collected almost 1,500 folktales and over 3,000 folk

songs and wrote 18 books and 43 scholarly articles. His more important folklore collections are *Zakarpats'ki kazky Andriia Kalyna* (Transcarpathian Tales of Andrii Kalyn, 1955), *Narodni balady Zakarpattia* (Folk Ballads of Transcarpathia, 1959, 1966), *Maister Ivanko* (Master Ivanko, 1960), *Kazky zelenykh hir* (Tales of Green Mountains, 1965), *Dido Vsevido* (Grandfather See-All, 1969), and *Kazky odnogo sela* (A Village's Tales, 1979). His *Ukrainische Volksmärchen* (1972) is an anthology of Ukrainian folktales in German translation. Lintur also studied the works of 19th-century Transcarpathian writers, such as O. Dukhnovych and I. Silvai.

Liubov Linytska

Linytska, Liubov [Lync'ka, Ljubov], b 27 December 1865 in Preobrazhenske, Oleksandrivske county, Katerynoslav gubernia, d 5 February 1924 in Kiev. Actress and singer (mezzo-soprano). She completed gymnasium in Kharkiv and began her professional career in M. Kropyvnytsky's troupe (1889). She worked in Saksahansky's troupe (1892–1909, with interruptions), Sadovsky's Theater in Kiev (1909–15), the Society of Ukrainian Actors (1915–17), and the Ukrainian National Theater (1917–18) and appeared sporadically in the State People's Theater in 1918 and in the Zhovten Theater (from 1923). During her artistic career she created 120 different characters (young and old) from the ethnographic theater of manners, as well as roles in W. Shakespeare's plays (Gertrude in *Hamlet* and Emilia in *Othello*). Among her best roles were the romantic leading ladies in M. Kropyvnytsky's *Olesia*, M. Starytsky's *Marusia Bohuslavka*, I. Karpenko-Kary's *Handzia* and *Beztalanna* (The Fortuneless Maiden), L. Starytska-Cherniakhivska's *Het'man Doroshenko*, J. Gordin's *Mirele Efros*, and H. Heijermans's *The Good Hope*. A biography of Linytska was published in Kiev in 1957.

Linytsky, Petro [Lync'kyj], b 5 December 1839 in Okhtyrka, Kharkiv gubernia, d 25 June 1906 in Kiev. Philosopher and theologian. After graduating from the Kiev Theological Academy (МТН, 1865) he was appointed a lecturer there; later he headed its departments of the history of philosophy and, from 1887, logic and metaphysics. Influenced strongly by German idealism, he argued that reason, with its a priori concepts, is capable of attaining necessary truth about reality, and constructed his own philosophical system, which he presented in *Osnovnye voprosy filosofii* (The Fundamental Questions of Philosophy, 1901). Philosophy's conflicts with science and religious faith could be avoided, according to Linytsky, by restrict-

ing each to its proper sphere: science to sensible experience, philosophy to formal knowledge, and faith to a few revealed truths necessary for personal salvation. Linytsky also wrote a survey history of philosophical teachings (1874) and monographs on ancient Greek moral and religious concepts (1870), Plato's theology (1876; his PH D diss), speculation (1881), Slavophilism and liberalism (1882), social activity and the origins of social organization (1884), cognition and thought (1895, 1897), metaphysics (1897), and the philosophy of E. von Hartmann.

Lipatov, Yurii, b 10 July 1927 in Ivanovo-Voznesensk, RSFSR. Polymer chemist; corresponding member of the AN USSR (now ANU) since 1969 and full member since 1973. After graduating from the Moscow Petroleum Institute (1949) he worked in Moscow and Minsk. From 1965 to 1985 he directed the ANU Institute of Macromolecular Chemistry. He outlined the theoretical mechanism of interaction between the polymer matrix and various organic and inorganic fillers, and developed a new hypothesis on the mechanism of interphase phenomena in composite materials, taking into account the thermodynamics of compatibility and of colloidal chemical processes. His monographs *Physical Chemistry of Filled Polymers* (1979) and *Colloid Chemistry of Polymers* (1988) have been published in English translation.

Lipatova, Tatiana, b 23 April 1924 in Moscow. Chemist. A graduate of the Moscow Petroleum Institute (1949), she has worked at the AN USSR (now ANU) institutes of Macromolecular Chemistry (1965–76) and Organic Chemistry (since 1976). The main thrust of her research has been in kinetics and mechanism of polymerization reactions. She developed a new area in macromolecular chemistry – the formation of biologically compatible polymeric materials for use in prosthetic implants.

Lipetsky, Yevsevii [Lipeč'kyj, Jevsevij], b 5 June 1899 in Verbivtsi, near Zastavna, Bukovyna, d 18 June 1970 in Bayreuth, West Germany. Realist painter. He studied at the Munich (1910–15) and Vienna art academies. From 1918 he lived in Chernivtsi, where he taught art at a Ukrainian gymnasium, ran an art school, and painted sets for Ukrainian stage productions. From 1941 he lived in Germany. Lipetsky painted many portraits of foreign dignitaries (eg, members of the Austrian royal family) and Bukovynian cultural, church, and political leaders (eg, Metropolitan N. Kotliarchuk, O. Kobylanska, I. Nediłsky), landscapes, and genre scenes. He also did many restorations, among them the iconostasis in the church of Khreshchatyk, near Zastavna, and paintings in the Krekhiv Monastery, and designed book covers and diplomas.

Lipiński, Karol, b 30 October 1790 in Radzyń Podlaski, Poland, d 16 December 1861 in Urliv, Zboriv county, Galicia. Polish composer and violinist. A concertmaster (1809), then kapellmeister (1812–14) of the Lviv Municipal Theater, he collaborated with F. Mozart in staging the works of his father (W. Mozart) and other classics, and performed in concert in Lviv, Kiev, Kamianets-Podilskyi, and Kremianets. He later provided the musical notation and accompaniment to W. *Zaleski's collection of *Pieśni polskie i ruskie ludu galicyjskiego* (Polish and Ruthenian Songs of the Galician People, 1833). In his compositions, Lipiński often took advantage of Ukrainian folk melodies.

Yevsevii Lipetsky: Lukian Kobylitsia

Lipliave. A Slavic burial ground of the 10th to 12th centuries AD near Lipliave, Kaniv raion, Cherkasy oblast. Seventy-nine kurhans were excavated there in 1906, 1913–14, and 1949. Each kurhan contained a single individual burial, usually in a pit. A variety of grave goods, including iron knives, scissors, and axes, pottery vessels, and ornaments, were recovered.

Lipovany. See Old Believers.

Liquor and spirits distilling. A branch of the *food industry that produces distilled and rectified alcohol from food substances, such as grains, potatoes, fruits, honey, and beets, and yields by-products, such as baking and feed yeasts, feed vitamins, esters, and acids. Distilled spirits are used in the food-processing industry, chemistry, medicine, and technology.

Before 1914. The manufacture of distilled alcohol has been known since ancient times and has been practiced in Europe for millennia. In Ukraine distilling became widespread in the first half of the 16th century. Mead, beer, and whiskey (*horilka*, usually made from rye) were the main alcoholic beverages. Usually the distilleries were owned by the gentry, and their production was sold locally in taverns leased to Jews (see *Propination). The exclusive right to make and sell liquor proved one of the main sources of the gentry's income. Distilleries were common in the Hetman state and were owned by the Cossack *starshyna*, burghers, and monasteries. When the Russian and Austro-Hungarian governments established state monopolies on liquor sales in Ukraine, the excise tax (78 per cent in 1913) generated a considerable part of the state revenue.

In the 17th century a distillery was a small enterprise with four to six stills tended by a few local peasants. In the second half of the 18th century, distilling technology improved: the crude alembic producing a single bucket (12.3 L) of whiskey a day was replaced by a superior English fire box still with a capacity of 4 to 25 buckets a day. Larger distilleries and specialized factories were established. According to the Russian cadastre of 1782, 2,666 out of 2,863 (93 percent) manufactories in Left-Bank Ukraine were distilleries. In 1801, 7,839 distilleries in the Dnieper region produced 62 million L of whiskey. In the 1820s the first steam distilleries appeared in Ukraine. Many old manufactories were replaced by fewer but larger modern ones. The number of distilleries decreased, but the production of spirits (40 percent alcohol) increased (see table 1).

The number of distilleries fell sharply after the abolition of serfdom in 1861, because unpaid serf labor was no longer available. But distillery owners in Ukraine had the advantage of locally supplied raw materials and a ready consumer market – hence, the preponderance of small distilleries owned by landowners. As distilling technology improved, the distilling of spirits was gradually separated from the distilling of whiskey and became an independent industry. Polisia and Left-Bank Ukraine, where raw materials (potatoes, rye, molasses) were produced, had the largest number of distilleries; the largest factories were located in Katerynoslav, Kiev, and Kharkiv gubernias. In 1899–1900, 226.3 million L of spirits were produced. In 1897 the distilling industry employed 6,000 full-time workers and a large number of seasonal laborers. Ukraine produced 29 percent of the spirits in the Russian Empire, 90 percent of which were used for whiskey production.

In the Ukrainian territories under Austria-Hungary, liquor distilling was the most developed branch of the food industry. As in Russian-ruled Ukraine, small distilleries belonging to the landed gentry predominated. At the beginning of the 20th century there were about 400 distilleries in Galicia, producing about 30 million L of liquor per year (an average of 75,000 L per factory, compared to 680,000 L in Russian-ruled Ukraine).

1914–41. During the First World War and the struggle for Ukrainian independence (1917–20) the distilleries in central and eastern Ukraine ceased to operate. In 1921 only 21 distilleries were in operation, producing 130 million L of spirits. Production rose during the NEP period. In 1928, 82 factories, employing 4,300 workers, produced 67 million L of raw alcohol. By the mid-1930s production had reached the prewar level. By 1940 the annual output had risen to 264.8 million L of raw alcohol. The increase in spirits production was a result of the utilization of ethanol (over 50 percent) in the production of synthetic rubber and other chemical products.

In Western Ukraine distilling declined significantly in the interwar period. In 1926 there were only 287 small distilleries in Galicia, with an output of 115,000 L. In the northwestern territories there were 452 small distilleries, producing 12,000 L per year. Galicia's production remained low because of a decrease in alcohol consumption and the competition from the more developed distilleries in western Poland.

1945–78. After the disruption of the war period the distilling industry attained its prewar level of production only in 1951. Since then production has grown steadily. The distilleries themselves have been modernized, and production has been concentrated. Most of the small dis-

TABLE 1
Output of spirits in the Ukrainian gubernias, 1801–1913

	1801	1840	1860	1913
Number of distilleries	7,839	3,595	2,407	586
Output (in million L)	61.5	197	228	400

TABLE 2
Output of raw alcohol within the borders of present-day Ukraine, 1913–78 (in million L)

1913	160	1945	66
1928	67	1950	228
1932	107	1960	387
1937	209	1970	564
1940	265	1978	731

stilleries in Western Ukraine were closed down. The number of distilleries in Ukraine fell from 348 in 1940 to 93 in 1965 and then stabilized. In 1970 the average annual output per distillery was 5.9 million L. Table 2 presents the growth in raw-alcohol production in the territories of present-day Ukraine (calculated at 100 percent alcohol – hence the discrepancy with table 1). Ukraine produces 34.5 percent of the raw USSR output of alcohol and 9 percent of the world output. It is the third-largest producer of alcohol in the world (after the United States and Russia).

In 1963 the distilling industry in the Ukrainian SSR employed 10,800 people. In spite of its absolute growth, its share in the food industry has decreased: it now constitutes only about 2 percent of the industry. Major changes have occurred in the type of raw materials predominantly used by the industry. In 1913 sugar-beet molasses yielded 6 percent of the alcohol produced, potatoes, 73 percent, and grains (rye, corn, etc), 21 percent. In 1940 molasses yielded 38 percent, and potatoes and grains, 62 percent. In 1958 the respective percentages were 23 and 77, in 1970, 85 and 15, and in 1978, 92 and 8.

The geographical distribution of the industry is similar to what it was in the past. Most distilleries are located in the forest-steppe belt, and some in the forest belt. The largest enterprises are the Lohkvytsia and Andrushivka spirits distilling complexes; they are followed by the distilleries in Bar and Kalynivka (Vinnytsia oblast), Ivashky (Kharkiv oblast), Kosari (Cherkasy oblast), and Luzhany (Chernivtsi oblast). Ukraine produces over 200 brands of liquor. The largest liquor distilleries are located in Lviv, Artemivske, Donetske, Voroshylovhrad, Dnipropetrovske, and Kharkiv. Today alcohol is exported to former Soviet republics and abroad. Research for the distilling industry has been conducted since 1958 at the Ukrainian Scientific Research Institute of the Spirits and Liqueur-Whiskey Industry in Kiev.

Lira (hurdy-gurdy). A folk string instrument. It was introduced in Ukraine from the West and spread rapidly during the 15th century. The sound is produced by cranking a rosined wheel against strings within the instrument. Most frequently, the *lira* has three strings; the two lower strings are monotonic, and the higher string leads the melody. The instrument was played commonly in Ukraine until the 20th century by itinerant musicians called *lirnyks.

Lirnyk

Lirnyks. Wandering folk minstrels, often blind, who accompanied themselves on a *lira. They appeared in Ukraine in the 15th century and had formed a guild by the end of the 17th century. There were special schools for them. Their repertoire consisted mainly of religious songs, although humorous and satirical songs were also popular. Some lirnyks specialized in historical songs and dumas.

Lisanevych, Borys [Lisanevyč] (Lisanevich, Boris), b 1904 on Lisanevychivka *khutir*, Odessa county, Kherson gubernia, d 20 November 1985 in Kathmandu, Nepal. Adventurer and big game hunter. After his education at the Cadet Academy of Odessa he was a dancer in S. Diaghilev's Ballet Russe. In 1933 Lisanevych went to India, where he became a guide for big game hunting expeditions, a popular host, and a confidant of maharajas. He was the founder of the famous Club 300 in Calcutta and is regarded as the father of modern tourism in Nepal. In 1954 he opened the Royal Hotel in Kathmandu, which be-

came a meeting place for royalty, international celebrities, and Himalayan mountaineering expeditions. His life is described in M. Peissel's *Tiger for Breakfast: The Story of Boris of Kathmandu – Adventurer, Big Game Hunter, and Host of Nepal's Famous 'Royal Hotel'* (1967).

Lisenkov, Nikolai, b 4 August 1865 in Moscow, d 11 October 1941 in Odessa. Russian anatomist and surgeon. A graduate of the medical faculty of Moscow University (1893), he served as a professor at Odessa University (1902–41, from 1923 the Odessa Medical Institute) and founded the anatomy museum in Odessa. He researched brain disorders and operative methods in heart, brain, and neurosurgery. He wrote textbooks in operative surgery and topographic and normal anatomy and proposed a method of preserving anatomical specimens.

Lishansky, Yukhym [Lišans'kyj, Juxym], b 9 October 1905 in Kiev, d 21 May 1982 in Kiev. Stage director and pedagogue. In 1922 he completed the third studio course at the Moscow Art Theater, and in 1925–6 he apprenticed at Berezil. In 1927–30 he worked in the Kharkiv and Kiev theaters of opera and ballet. In 1931–41 he was stage director at the Kiev Theater of the Red Army, and in 1946–82 stage director and pedagogue in the opera studio at the Kiev Conservatory.

Ivan Lishchynsky

Lishchynsky, Ivan [Liščyns'kyj], b 1883, d 1941. Educator and civic and political leader. A teacher by profession, under the Western Ukrainian National Republic he served as school inspector of the Drohobych district (1918–19). After the war he edited **Uchytel's'ke slovo* (1921–2) and was president of the Organization of the Ukrainians of Lviv (1922–6) and of the Ukrainian Teachers' Mutual Aid Society (1925–9). He was also active in politics, first as a member of the executive and the Central Committee of the Ukrainian Labor party and then as a deputy of the Ukrainian National Democratic Alliance to the Sejm (1928–30). In 1930 he was imprisoned in Brest by the Polish authorities for his political activities.

Lishko, Valerii [Liško, Valerij], b 26 October 1937 in Kiev. Biochemist; AN URSR (now ANU) corresponding member since 1979 and full member since 1982. After graduating from Kiev University (1960) he joined the ANU Institute of Biochemistry and became its deputy director in 1970 and director in 1977. Lishko's research has dealt

with the molecular mechanisms of active and passive ion transport through organic membranes. He developed ways of identifying channels of nerve and muscle membranes in noncellular systems.

Liskevych, Taras [Liskevyč], b 14 October 1948 in Munich, Germany. Ukrainian-American sports figure. He graduated from Loyola University in Chicago (1970) and Ohio State University (PH D in physical education, 1976). He was assistant coach of the US women's volleyball team that competed in the 1975 Pan-American Games, and head coach of the men's volleyball team at Ohio State University (1975–6) and the women's volleyball team at the University of the Pacific (Stockton, California, 1976–84). Since 1985 he has been head coach of the US women's volleyball team that competed in the 1988 and 1992 Olympic Games and other international competitions. He cofounded the American (formerly Collegiate) Volleyball Coaches Association and is the coauthor of *A Pictorial Analysis of Power Volleyball* (1972) and author of *Volleyball Is a Hit*.

Lisko [Lis'ko] (Polish: Lesko). IV-3. A town (1968 pop 2,600) on the Sian River in the eastern Lemko region, now a county town in Poland's Krosno voivodeship. In 1932 the Ukrainian peasants of the region revolted against the Polish authorities and landlords. The army was summoned, and 6 peasants were killed, 15 injured, and nearly 100 arrested. Soviet sources present the rebellion as a communist-led action by united Ukrainian and Polish peasants and workers. Until 1939 Lisko county was part of Lviv voivodeship under Poland. Its population was 81,600, of whom 86.2 percent were Ukrainians. In 1947 almost all the Ukrainians were resettled.

Lisnytsky, Hryhorii [Lisnyc'kyj, Hryhorij], b ? in the Kiev region, d 1664. Nobleman and Cossack colonel. He was sent by Hetman B. Khmelnytsky to the Siverske region (1648), and later he served as colonel of Myrhorod regiment (1652–8, with interruptions) and general judge (1657, 1661–2). He was sent as an envoy to Moscow in 1658 and to Poland in 1659. An opponent of Muscovy, he took part in the preparation of the treaties of *Hadiache and *Slobodyshe. A member of the Lviv Brotherhood from 1662, he was killed by the Poles.

Lisovska, Nastia. See Roksoliana.

Lisovska, Zoia [Lisovs'ka, Zoja], b 14 April 1925 in Lviv. Artist; daughter of R. *Lisovsky and S. *Turkevych-Lukianovych and wife of Oleh *Nyzhankivsky. A postwar refugee, she studied at the Vienna Art Academy (1945–6), received a national diploma in design from the London Polytechnic of Art (1951), and studied painting at the Rome Academy of Fine Arts (1952–5). A resident of Geneva, where she teaches painting and drawing, she has created paintings (gouache landscapes, portraits, and other compositions), frescoes, stained-glass windows, mosaics, enamels, ceramics, sculptures, lithographs, and wood engravings. Solo exhibitions of her works have been held in Munich (1957), Geneva (1960), Rio de Janeiro (1961), New York City (1964, 1970), Toronto (1964, 1984), and Chicago (1974). Joint exhibitions of the works of Lisovska, her father, and her daughter, L. *Nyzhankovska, were held in

Zoia Lisovska: *The Passion* (gouache, 1953)

New York, Philadelphia, and Washington, DC, in 1989, in London in 1990, and in Lviv in 1991.

Lisovsky, Heraklii [Lisovs'kyi, Heraklij] (secular name: Yosyf Odrovuzh-Lisovsky), b 1734 in Usachy, Belarus, d 30 August 1809 in Polatsk. Ukrainian-Belarusian Catholic metropolitan in 1806–9. Although born into a Latinized noble family, Lisovsky found the Eastern rite appealing and entered the Basilian order after studying philosophy and theology in Polatsk. In 1778 he became archimandrite of the St Onuphrius Monastery in Orsha, and in 1784, archbishop of Polatsk. In 1806, after the death of Metropolitan T. *Rostotsky, Tsar Alexander II appointed him de facto metropolitan of Kiev, although under the altered title 'Metropolitan of the Uniate Church in Russia.' During his lifetime Lisovsky faced numerous problems in trying to re-establish the jurisdictional and administrative structure of the Greek Catholic church after the successive partitions of Poland had transferred much of the territory in which the church was based to Russian control.

Lisovsky, Oleksii [Lisovs'kyj, Oleksij], b 24 February 1861 in Machukhy, Poltava county, d 1934 in Krasnodar, Kuban region. Literary scholar and folklorist. After graduating in law from the University of Odessa (1886) he worked at the Odessa and Kharkiv courts. He did research on kobzars and wrote *Opyt izucheniia malo-russkoi dumy* (An Essay on the Study of the Little-Russian Duma, 1890) and *Glavnye motivy v poezii T.G. Shevchenko* (The Main Motifs in the Poetry of T.H. Shevchenko, 1893). Many of his articles appeared in the provincial papers. He was persecuted by the authorities for his liberal ideas.

Lisovsky, Robert [Lisovs'kyj], b 29 December 1893 in Oleksandrivske (now Zaporizhia), d 28 December 1982 in Geneva. Painter and graphic artist; husband of S. *Turkevych-Lukianovych and father of Z. *Lisovska. He studied in Kiev at O. Murashko's art school, under M. Boichuk and H. Narbut at the Ukrainian Academy of Arts (1917–20), and at the Berlin Academy of Arts (1927). An émigré from 1920, he worked as a graphic artist in Lviv and was a professor of graphic art at the *Ukrainian Studio of Plastic Arts in Prague (1929–45). After the Second

Robert Lisovsky

Vasyl Lisovy

World War he lived in London and, from 1962, Geneva. Lisovsky exhibited in Kiev, Lviv, Warsaw, Berlin, Prague, and Rome. He was a masterful book illustrator and designer, whose expressionism incorporated traits of the Kievan baroque in an original and modern fashion. Lisovsky, P. *Kovzhun, and M. *Butovych were the three most eminent Ukrainian book artists of the 1920s and 1930s. Lisovsky also designed the *trident with a sword, bookplates, and O. Basarab's tombstone (1924) in Lviv and painted in watercolors and oils (flowers, landscapes, still lifes, and portraits).

Lisovy, Oleksander [Lisovyj], b 1 June 1938 in Serov, Sverdlovsk oblast, RSFSR. Cameraman. A graduate of the State Institute of Cinematography in Moscow, he has worked at the Kiev Studio of Chronicle-Documentary Films since 1955. Among his films are *Pisnia* (The Song, 1968), *Uchytel'* (The Teacher, 1970), *Zakharova ridnia* (Zakhar's Family, 1972), *Persha borozna* (The First Furrow, 1974), *Kantata pro Chervonyi orkestr* (Cantata on the Red Orchestra, 1975), and the full-length films *Ukraina: Zemlia i liudy* (Ukraine: The Land and the People, 1970) and *Rozum, chest', i sovist' epokhy* (The Reason, Honor, and Conscience of the Epoch, 1977).

Lisovy, Petro [Lisovyj] (pseud of Petro Svashenko), b 22 June 1891 in Derhachi, Kharkiv county, Kharkiv gubernia, d 17 January 1943? Writer. From 1920 to the early 1930s his works were published in *Literaturnyi iarmarok*. His sketches and short stories about peasant life appeared in the collection *V revoliutsiiu* (Into the Revolution, 1927). He wrote several novelettes—family chronicles – *Nashi slobozhany* (Our Free Settlers, 1930), *Za Zbruchem* (Beyond the [River] Zbruch, 1932), *Chervona raketa* (The Red Rocket, 1932), and *Harri Smit, abo lanki v ukrains'kykh preriakh* (Harry Smith, or A Yankee on the Ukrainian Prairies, 1933) – and two novels, *Mykola Iarosh* (1928) and *Zapysky Iurii Dibrovy* (The Notes of Yurii Dibrova, 1930). He was arrested and exiled during the terror of the mid-1930s.

Lisovy, Vasyl [Lisovyj, Vasyl'], b 5 May 1937 in Stari Bezradychi, Obukhiv raion, Kiev oblast. Philosopher and dissident. After graduating from Kiev University (1961), he taught logic and esthetics at the Ternopil Medical Insti-

tute (1962–6) and then returned to Kiev for postgraduate studies. In 1970 he received his candidate's degree and became a research associate of the AN URSS (now ANU) Institute of Philosophy and a lecturer at Kiev University. The articles Lisovy published in 1970–2 – three on ordinary language, one on the history of logic, and one a critique of scientism – reveal a perceptive and original thinker. After sending an open letter to the CC CPSU protesting the wave of arrests of Ukrainian writers and artists in early 1972 and calling for greater openness and democracy, he was arrested on 6 July 1972 and sentenced in November 1973 to seven years in a Mordovian labor camp and three years' exile in the Buriat ASSR for anti-Soviet agitation and propaganda. In 1980 he was sentenced to an additional year of imprisonment for 'parasitism.' He was released in 1983, but he was not permitted to work in philosophy until the beginning of 1990, when he was reinstated in his position at the Institute of Philosophy.

Lisovyk, Oleksander (pseud of Hnyda), b ca 1895 in Poltava gubernia, d ca 1933. Revolutionary figure. A member of the underground Socialist Revolutionary Youth Association (1915–16), after the 1917 Revolution he joined the *Borotbists and became a leading organizer of the partisan struggle in the Poltava region, against the Germans, the Hetman government, and the Denikin army. He took part in negotiations with N. *Makhno to form an independent Ukrainian Red Army. In 1919 he headed the Soviet Department of Education in Poltava gubernia, and from December 1919 he edited the Borotbist paper *Ukrain-s'kyi proletar* in Katerynoslav. After the Borotbists merged with the CPBU in 1920, he chaired the Artemivske Okruha Executive Committee and sat on the Presidium of the All-Union Central Executive Committee. In the early 1930s he directed the Chief Administration of Automobile Transportation in Soviet Ukraine. He was arrested with other former Borotbists during the Stalinist terror, and executed.

Lisovyk. A figure of Ukrainian folk demonology who controlled the forests and their riches – the trees, animals, and birds. Every forest had its own *lisovyk*, who appeared in the form of a human being, a giant with horns, a tree, or an animal. He could be recognized by the absence of a shadow. He lived in the woods or in inaccessible places and in winter inhabited caves or deserted shepherds' huts, where he whistled and sang. He could lead people astray in the forest or could help hunters by sending animals into their paths. In the Hutsul region the *lisovyk* was represented as a shepherd. After Ukraine's conversion to Christianity St George also became a protector of animals and cattle.

Listok (Sheet). A Transcarpathian Russophile 'religious-literary journal' published semimonthly in Russian in Uzhhorod from September 1885 to December 1903. Its editor was Ye. Fentsyk. Only one issue appeared after Fentsyk's death; it was edited by A. Voloshyn. *Listok* published editorials on religious and political topics; sermons; religious, historical, ethnographic, linguistic, and philosophical articles; poetry; and prose. In 1891–3 it also published an irregular popular education supplement in the Transcarpathian dialect. The journal's contributors were

mostly Transcarpathian writers and intellectuals, such as O. Dukhnovych, A. Kralytsky, O. Mytrak, S. Pasichynsky, O. Pavlovych, I. Silvai, Yu. Stavrovsky, and Yu. Zhatkovych. It had few subscribers (150 in 1887; 25 in 1903).

Liszt, Franz, b 22 October 1811 in Raiding, Hungary, d 31 July 1886 in Bayreuth, Germany. Hungarian composer and virtuoso pianist. Ukrainian themes and melodies are evident in a number of Liszt's works. He was familiar with Ukraine, and had his final concert tour there in 1847 (appearing in recitals in Kiev, Zhytomyr, Nemyriv, Berdychev, Kremianets, Lviv, Odessa, Mykolaiv, and Yelysavethrad). He stayed on through late 1847, visiting the estates of Princess Carolyne von Sayn-Wittgenstein at Voronyntsi in Podilia, where he composed two piano pieces ('Ballade d'Ukraine' and 'Complainte') based on Ukrainian folk songs. These were later incorporated into the set *Glanes de Woronince*. In 1840 Liszt finished a transcendental étude, *Mazeppa*, for piano, after the poem by V. Hugo, and in 1851 he composed a symphonic poem of the same title. In 1855 he arranged *Mazeppa* for two pianos, and in 1874 for piano four hands. In 1881 Liszt orchestrated *Danses galicennes* by his student J. Zarębski (originally for piano four hands), the last movement of which is a **kolomyika*.

Litavry (Kiev)

Litavry (Kettledrums). A literary and art weekly published in Kiev in the autumn of 1941. The editor was O. Telih. It was banned by the Nazi authorities after the first four issues.

Litavry (Kettledrums). A journal of literature, art, and popular science; the organ of the Association of Ukrainian Scholars, Writers, and Artists in Austria. It was published in Salzburg in 1947 and 1948. The editor in chief was Yu. *Klen, and the editorial board included Yu. Dyvnych, I. Koshelivets, B. Nykolyn, and B. Oleksandriv. The journal contained poetry by V. Skorupsky, H. Cherin, Klen, I. Kovaliv, and M. Orest; prose by I. Kachurovsky (as well as his poetry), O. Satsiuk, M. Tsukanova, and O. Zvychaina; articles on literature by V. Derzhavyn and B. Romanenchuk; and literary reviews by Dyvnych, Klen, Oleksandriv, and Romanenchuk. It published translations from German, English, and Belarusian literatures as well as

Litavry (Salzburg)

obituaries (eg, of M. Matviiev-Melnyk, I. Bryk, M. Trzhepel, and Klen). The 1947 September–December issue was edited by B. Nykolyn, who was later succeeded by Romanenchuk.

Literacy (*pysmennist*). The ability to read and write in a person who has reached a certain age (nine years being the age standard commonly used in Ukrainian lands for statistical purposes); a distinction is made between full and partial literacy, or the ability to read but not write. At the beginning of the 20th century the majority of the population in Ukrainian lands was illiterate, a result of the state neglect of education (in lands ruled by Austria and Hungary), the absence of legal provision for enforcing compulsory education (in lands ruled by Russia), and a weakly developed network of schools. Instruction in foreign (non-Ukrainian) languages and the short length of the school year also hindered full literacy, even among elementary school graduates. Concerted efforts aimed at increasing literacy were made in Russian-ruled Ukraine by *literacy societies and in Western Ukraine by the *Prosvita society.

An 1886 survey showed that 16 percent of Russian army recruits from Right-Bank Ukraine and 26 percent of those from the Left-Bank region were literate (the latter figure reflects a growth in *zemstvo schools). The 1897 Russian census revealed that 26 percent of the total population over nine years of age in the Ukrainian gubernias was literate; the figure for Ukrainians there stood at 23.6 percent (38.6 percent of men, 12.4 percent of women). With the expansion of the school system the figure had grown to approx 42 percent of the total population by 1914.

The transition to using Ukrainian as the language of instruction in schools (from 1917), the further expansion of the school system, the introduction of mandatory education measures, and the work of the Liknep (*elimination of illiteracy) network during the 1920s and 1930s resulted in increased literacy. Table 1 illustrates the success of these undertakings in popular education.

Notwithstanding such progress, the literacy rate of Ukrainians in the Ukrainian SSR in 1926 was below that of the other national groups in the republic (see table 2). According to Soviet census figures the literacy rate in the Ukrainian SSR continued to rise and reached 85.3 percent in 1938.

The literacy rate among Ukrainians in Western Ukraine

TABLE 1
Literacy in the nine Ukrainian gubernias of the Russian Empire, 1897, and the Ukrainian SSR, 1926 (in percentages)

Age	Total population		Urban		Rural	
	1897	1926	1897	1926	1897	1926
<i>Males</i>						
5-8	5.7	12.8	19.4	23.8	4.3	11.7
9-14	43.4	76.0	69.5	86.6	40.3	74.9
15-19	47.9	79.2	71.7	89.7	44.5	77.9
20-24	47.1	88.2	64.2	94.1	41.4	86.8
25-29	44.4	87.2	68.2	93.8	39.9	86.0
30-39	39.0	83.5	65.4	92.1	34.7	81.9
40-49	31.7	72.6	59.1	87.0	27.5	70.0
50-59	23.6	55.4	53.9	79.1	19.5	51.4
60+	17.3	35.3	45.0	65.0	13.8	31.5
All ages	34.2	68.6	59.9	83.6	30.2	66.2
<i>Females</i>						
5-8	3.1	9.9	12.7	22.8	2.1	8.6
9-14	16.3	54.7	49.0	82.4	12.2	51.4
15-19	16.9	54.8	45.6	82.1	12.3	50.8
20-24	15.8	56.8	46.4	84.1	10.8	52.0
25-29	12.6	47.3	40.9	79.4	8.3	41.2
30-39	10.4	37.3	35.4	70.5	6.7	31.2
40-49	8.0	22.4	28.3	56.6	5.1	16.5
50-59	7.0	14.7	23.9	46.8	4.5	9.2
60+	6.2	9.6	19.5	34.2	4.0	5.4
All ages	11.2	37.7	35.3	66.8	7.5	33.2

TABLE 2
Literacy in the Ukrainian SSR by nationality and sex, 1926 (in percentages)

	Males	Females
Total population	68.6	37.7
Ukrainians	66.5	32.5
Russians	76.5	51.2
Jews	84.1	74.2
Poles	60.0	45.7

TABLE 3
Literacy rates in Ukrainian territories under Poland, 1921 and 1931 (in percentages)

	1921	1931
Total population	50.5	64.7
Towns and cities	75.1	85.0
Villages	44.6	59.6
Males	57.2	73.8
Females	44.4	56.0

was significantly higher than in Russian-ruled Ukraine. In 1900, 25 percent of Ukrainians there were literate; in 1910 the figure reached 43 percent (compared to 47 percent of the total population). The literacy rate continued to grow through the 1920s and 1930s (see table 3).

According to Soviet sources illiteracy ceased to exist in the Ukrainian SSR. Census figures from 1970 show that 99.7 percent of 5- to 49-year-olds were literate.

V. Kubijovč

Literacy societies (*tovarystva hramotnosti*). Community-based societies for popular education that were active in the Russian Empire from the second half of the 19th century until 1917. Their chief purpose was to increase literacy and general knowledge among the population at large. The work of these groups resulted in the establishment of *Sunday schools and library-reading rooms, in the organization of public readings and lectures as well as literary and musical evenings, and in the printing of popular literature for broad distribution. Most of this activity was centered in larger towns and cities, with only occasional forays into villages. The oldest group of this type in Ukraine, the *Kharkiv Literacy Society, was founded in 1869. It focused mainly on publishing popular works, but few of its titles were in Ukrainian. The Kiev Literacy Society, founded in 1882, was more active in Ukrainian-language work. It published Ukrainian literature (including the works of T. Shevchenko) and built the People's Home in 1902, which provided a facility for Ukrainian theater and lectures and later for a Prosvita organization. The *Kiev Literacy Society was also active in Right-Bank Ukraine, where it had affiliates and provided assistance for educational programs in Kiev, Podilia, and Volhynia gubernias. Similar societies formed in the 1890s included the Society for Spreading Popular Literacy in Katerynoslav Gubernia and the Poltava Society for the Development of Popular Education. A Volhynian literacy society was formed in the 1900s. These various societies for popular education tended to limit their work to larger centers and in fact did little to spread literacy in the Ukrainian language. A similar sort of work was taken up in Central and Eastern Ukraine after 1905 by the *Prosvita society. The cause of Ukrainian-language popular education was taken up during the Soviet period by the Het' Nepysmennist (Away with Illiteracy) society (1923-36), which had 1,500 branches and affiliates and a membership of 59,000 in 1925.

Literary criticism. In Ukraine the beginnings of criticism as a separate literary genre coincide with the rebirth of *literature studies in the early decades of the 19th century. Some scholars, however (eg, M. Plevako), suggest a later date because of the virtual absence of Ukrainian-language periodicals until the 1860s.

Early 19th-century Ukrainian literary criticism was linked to the debate on whether or not real literature could be written in Ukrainian. Assertions that it could were first formulated by O. Lobysevych in a letter (1794) to H. Konytsky and by Ya. *Markovych in his *Zapiski o Malorossii ...* (Notes on Little Russia ..., 1798). Some early remarks of a critical nature can be found in O. *Pavlovsky's 'Grammar of the Little Russian Dialect' (1818), and the first journals published in Ukraine, **Khar'kovskii Demokrit* (1816), **Ukrainskii vestnik* (1816-19), and **Ukrainskii zhurnal* (1824-5), devoted some passing attention to the question of the viability of a Ukrainian-language literature. The last of the aforementioned journals (1825, no. 5) published a favorable article by I. *Kulzhynsky on the history and nature of 'Little Russian' poetry. Most Russian critics reacted negatively to works published in Ukrainian. Among them were M. *Kachenovsky, the author of an article in *Vestnik Evropy* in 1815 that was hostile to Ukrainian writing in general and I. Kotliarevsky's *Eneida* (Aeneid) in particular, and V. *Belinsky. Consequently, Ukrainian critics at that

time, and even more so later, were forced to limit themselves almost exclusively to defending the right of a Ukrainian literature to exist.

One of the first critical surveys of works in Ukrainian was written by M. *Kostomarov and published in the 1844 literary miscellany *Molodyk*. The first significant contributions to the development of Ukrainian literary criticism, however, were made by P. *Kulish in the late 1850s and early 1860s, particularly in the miscellany *Khata* (1860) and the journal **Osnova* (1861–2). Kulish argued that the Ukrainian language and literature were independent of the Russian, and expressed the hope that writers would produce works that would reflect the Ukrainian identity. He believed that the genres of travesty and burlesque were inimical to Ukrainian literature because they made it appear as fit only for expressing vulgar wit, and he consequently condemned Kotliarevsky and P. Hulak-Artemovsky for the disrespect he felt they had shown in their works for the Ukrainian language. Kulish esteemed the Ukrainian tales of H. Kvitka-Osnovianenko, however, and he was one of the first critics to emphasize the importance of T. Shevchenko's poetry for all the Slavic nations. Although he adhered to the idealized populist notion of the peasantry as the embodiment of the Ukrainian people (*narodnist*) and remained loyal to the ethnographic principle, Kulish had high esthetic standards and considered it the duty of literary critics to struggle against talentless scribblers and epigones. The critical attitudes of Kulish and his supporters in the 1850s and 1860s evolved into *populism, the ideas of which dominated Ukrainian literary criticism until the early 20th century. (The pseudopopulism of Soviet literary criticism from the 1940s to 1960s was of a different origin.)

In Austrian-ruled Galicia literary criticism appeared somewhat later than in Russian-ruled Ukraine. There it was also linked to the movement in support of writing in the vernacular that began with the publication of the miscellany **Rusalka Dnistrovaia* (1837) by the *Ruthenian Triad. In his many articles the triad's Ya. *Holovatsky propagated the idea that literature written in the vernacular could not be limited in scope but should deal with all aspects of life. He also promoted in Galicia the Ukrainian works written in Russian-ruled Ukraine. The question of how a 'Ruthenian' literature could develop, and especially the related issue of language and *orthography, was debated in two miscellanies titled **Vinok rusynam na obzhynky* (1846–7), in the newspaper **Zoria halytska*, in other Galician publications of the mid-19th century, and at the 1848 *Congress of Ruthenian Scholars. In the following decades antipopulist tendencies in Galicia were manifested by advocates of the use of Church Slavonic (eg, M. Malynovsky) and by the *Russophiles (eg, A. Petrushevych). As a result writing in the bookish **yazychiie* became widespread, despite the harsh criticism of *Osnova* and particularly M. *Maksymovych. In neighboring Transcarpathia the Ruthenian literary rebirth of the 1860s had a slightly different orientation. Its primary spokesman, O. *Dukhnovych, did not support the use of the vernacular in literature; he thereby made it possible for later Transcarpathian Russophiles to exploit his name for their purposes. Neither the Russophiles nor the supporters of the **yazychiie* in Galicia and Transcarpathia produced notable literary critics.

In the 1860s, after the 1863 tsarist ban on printing Ukrai-

nian-language publications, the center of Ukrainian literary activity shifted to Galicia, and the ideas of the *Osnova* writers attracted a substantial following there. Articles from *Osnova*, particularly those by Kulish and Kostomarov, were reprinted in the Lviv journal **Pravda* (1867–98), which became the most important Ukrainian publication of its time. *Pravda* was greatly influenced by Kulish and then, for many years, by O. *Konysky. I. *Nechui-Levytsky, a prominent populist writer and literary critic living in Russian-ruled Ukraine, debuted in *Pravda* and contributed regularly to it. In his now-famous article in *Pravda* on contemporary literary directions (1878) he formulated three principles of literary creativity (verisimilitude, nationality, and *narodnist*) and harshly condemned the widespread orientation of Ukrainian writers to Russian literature.

In the 1870s the key figure in Ukrainian literary criticism was M. *Drahomanov. Drahomanov introduced the idea of progress and emphasized the importance of social questions in literature. In a longer work on Shevchenko, the Ukrainophiles, and socialism (1879) Drahomanov condemned the cult of Shevchenko and the tendentious approaches to his poetry; at the same time he presented a social and cultural framework for the study of Shevchenko's poetry. Although because of his federalist convictions Drahomanov had an artificial, untenable schema of four literatures (the Russian, 'Great Russian,' Ukrainian, and Galician) that virtually no one accepted during or after his lifetime, more than any of his contemporaries he stimulated and enlivened critical thought and provoked a lively polemic in Galician literary circles. In general he hoped that Ukrainian literature would develop in step with the Western and Central European literary movements. Drahomanov pioneered the sociological approach in Ukrainian literary criticism. That approach greatly influenced contributors to *Pravda*, such as I. *Rudchenko in Russian-ruled Ukraine and V. *Navrotsky in Galicia.

Konysky was another prominent advocate of the independence of Ukrainian literature and of the adoption of 'universal liberal ideas ... directly from European sources' rather than through the medium of Russian literature. Other contributors to *Pravda*, such as M. *Buchynsky, O. *Ohonovsky, and V. *Barvinsky, advocated populist perspectives and came into conflict with Drahomanov.

In the mid-1870s Drahomanov's ideas influenced the Lviv student journal *Druh* and its principal contributor, I. *Franko. In his 1876–7 articles in *Druh* Franko was the first Ukrainian literary critic to discuss philosophical and esthetic problems as they related to literature and the relationship between poetry and life. In his article on literature, its tasks, and its most important traits, published in the 1878 literary miscellany *Molot*, Franko reprehended the narrowness of the populist approach, particularly the views expressed by Nechui-Levytsky in his article of that year. Later, however, in his articles in *Zhytie i slovo* and *Literaturno-naukovyi vistnyk (LNV)*, Franko transcended Drahomanov's positivist critique and developed a broader understanding of literature as art.

From 1882 to 1907 the principal forum of literary criticism in Russian-ruled Ukraine was the journal **Kievskaiia starina* (it appeared as *Ukraina* in 1907). One of its authors was V. *Horlenko, who had been influenced by the critical method of C.-A. Sainte-Beuve and H. Taine and contributed articles about earlier and contemporary 19th-century

Ukrainian writers and book reviews from a cultural-historical perspective.

At the beginning of the 20th century modernist literary criticism became popular in Ukraine. In 1901 *LNV* published M. *Vorony's modernist manifesto, in which he exhorted Ukrainian writers to abandon the populist model, to write poetry the quality of which mirrored contemporary world standards, and to embrace the principle of pure art. The modernist esthetic was advanced by the Lviv journal **S'vit* (1906–7) and by the Galician modernist writers' group **Moloda Muza*, which emulated European contemporaries, such as M. Maeterlinck, H. Ibsen, and F. Nietzsche, and the earlier C.-P. Baudelaire. The leading Ukrainian modernist critic was M. *Yevshan. In his articles in the Kiev journal **Ukrains'ka khata* and his book *Pid praporom mystetstva* (Under the Flag of Art, 1910) he analyzed the works of Ukrainian modernist writers and tried to formulate the esthetic principles of modernist literary criticism. Those principles remained vague and contradictory, however. Another modernist critic, O. *Lutsky, formulated the fundamental positions of *Moloda Muza* in his contributions to *Dilo* and *S'vit*.

In addition to the modernists a neopopulist criticism based on the earlier, 19th-century, populist perspective flourished in the early 20th century. Its leading exponent was S. *Yefremov, who rejected the esthetic approach as inappropriate for evaluating Ukrainian literature. Instead Yefremov based the value of a literary work on whether or not it promoted the ideal of national liberation, and whether or not its content and form (particularly its language) were suitable for the reading public at large.

From 1902 until the outbreak of the First World War a heated discussion took place among the representatives of various critical methods. It was sparked by Yefremov's antimodernist article 'V poiskakh novoi krasoty' (In Search of a New Beauty, 1902). In the ensuing debate the modernist critics (eg, Lutsky and H. *Khotkevych) published their views in *LNV* and *Ukrains'ka khata*, and the neopopulists published theirs in *Kievskaiia starina* and *Nova hromada*. Franko was critical of the modernists because he believed firmly that a literary work should enlighten the reader and focus on social issues. At the same time, however, he spoke out against Yefremov because he believed authors had the right to provide a 'psychological analysis of social phenomena' and to try out new forms of artistic expression. Lesia *Ukrainka shared many of Franko's critical views regarding both Ukrainian and foreign literature.

The February Revolution of 1917, the ensuing Ukrainian struggle for independence, and the first decade of Soviet rule in Ukraine stimulated literary activity. During the brief period of Ukrainian independence the journal **Knyhar* (1917–20) published many articles and reviews by M. *Zerov, P. *Zaitsev, V. *Koroliv-Sary, and other critics. During that period a variety of literary currents, each with its own critical method, quickly evolved. Criticism was published in ephemeral journals and miscellanies and separately in the essay collections of P. *Tychyna, M. *Semenko, Ya. *Savchenko, M. *Rylsky, and A. *Nikovsky (in his *Vita nova* [1919], Nikovsky discussed modern poetry in the context of the Ukrainian rebirth). The short-lived rebirth also produced occasional criticism by the symbolists (eg, Ya. Savchenko, D. *Zahul, and Yu. *Mezhenko) and writers of the Proletkult movement (who rejected art in its

traditional sense), more enduring criticism by the *Neoclassicists Zerov and P. *Fylypovych, and many other critical opinions.

By the mid-1920s two main currents of literary criticism had crystallized in Soviet Ukraine. On the one side there was a proregime current consisting more of advocates of official Bolshevik views than orthodox Marxists. On the other there were critics who opposed the proregime line but supported diverse artistic credos (eg, the members of **Vaplite* and the essentially apolitical Neoclassicists). This basic bipolarization of critical opinion became most evident during the Soviet Ukrainian *Literary Discussion of 1925–8. The chief spokesmen of the Party line were the vulgar Marxists V. *Koriak, S. *Shchupak, and H. *Ovcharov and the politically more consistent B. *Kovalenko, who advocated the use of 'proletarian realism,' a precursor of the official method of *socialist realism that became obligatory in the 1930s. Key representatives of the oppositional current were the *Vaplite* leader M. *Khvylovy and the Neoclassicist Zerov. Those critics advocated the view that writers had to develop a high level of literary craft and familiarity with the best literary achievements of the West. The 'opposition' also included unaffiliated critics, such as O. *Biletsky. Biletsky played an important role in the development of Ukrainian literary criticism by pioneering a multidimensional approach that focused on the formal, esthetic aspects of a literary work and on Ukrainian literature in the context of Western literature.

In 1932 the CC of the all-Union Party adopted a resolution that abolished all literary groups, created a single writers' union subordinated to the Party, forbade all literary criticism not sanctioned by the Party, and proclaimed socialist realism to be the only literary method that Soviet writers could use. Consequently all independent literary criticism disappeared, and most critics, including not only many of those in the 'opposition' (eg, Zerov, Fylypovych, M. *Mohyliansky) but also the representatives of Party opinion (including Koriak, Shchupak, and Kovalenko), were arrested during the Stalinist terror. Most of them were shot, or perished in concentration camps; those who survived remained silent until the post-Stalin thaw two decades later.

During the interwar years literary criticism in the non-Soviet territories of Western Ukraine and in the Ukrainian émigré community was linked not to literary trends but to literary-cum-political journals and newspapers. M. *Shapoval, P. *Bohatsky, and other émigré followers of M. Hrushevsky's sociological approach or the neopopulist Yefremov contributed to the Prague-based journal **Nova Ukraïna*; V. *Pisniachevsky, M. *Slavinsky, and other émigré and Galician critics contributed to National Democratic or socialist publications. Only a few critics modeled their work on Western European modernist criticism: M. *Rudnytsky, M. *Strutynsky, and several younger contributors to the literary miscellany *Terem* (1919) and the journals **Mytusa* (1922) and *LNV* (from 1922). The modernist critics came to be viewed as 'liberals.' Liberal views (eg, of Rudnytsky, V. *Simovych, O. *Bodnarovych, and Ya. and S. *Hordynsky) were published in the daily newspaper *Dilo*, the biweekly *Nazustrich* (from 1934), and the Warsaw-based bimonthly *My* (from 1935).

The Western Ukrainian and émigré nationalist movement that emerged in the early 1920s rejected not only the communist, but also the populist and esthetic approaches

to literature. The most influential nationalist critic was D. *Dontsov, the editor from 1922 of *LNV* and its successor in 1933, **Vistnyk*. Other critics of the nationalist school were M. *Mukhyn, Ye. *Malaniuk, Yu. *Lypa, Yu. *Klen, V. *Doroshenko, I. *Korovytsky, B. *Kravtsiv, and, especially, L. *Lutsiv. Similar criticism appeared in the journal *Dazhboh* (1932–5), which published articles and reviews by the publisher Ye. *Pelensky and by B.I. *Antonych, Y. Shemlei, and B. *Romanenchuk; and in *Obrii* (1936) and *Naperedodni* (1937–8), where O. *Hrytsai, D. *Vikonska, O. *Olzhych, and V. Rudko published their articles. Mukhyn and Hrytsai also contributed to the principal nationalist organ in Bukovyna, **Samostiina dumka*. Among the Western Ukrainian nationalist critics D. *Nykolyshyn devoted the most attention to Soviet Ukrainian literature.

Interwar Catholic criticism in Galicia was characterized by its anticommunism and antiliberalism. It was published in the journals *Postup* and *Dzvony* and the newspapers *Meta* and *Nova zoria* by M. *Hnatyshak and O. *Mokh. H. *Luzhnytsky (pseud: L. Nyhrytsky), the principal literary critic for the periodicals published by I. Tyktor's publishing house, shared many of the Catholic critics' views. Other critics who contributed to Tyktor's periodicals, particularly the literary-scientific supplement to *Novyi chas* (1937–9), were liberal or nationalist (eg, S. *Siropolko, M. *Holubets, S. Hordynsky, Pelensky, and Romanenchuk).

Communist critics in Western Ukraine were insignificant, both in number and in influence. In the 1920s they contributed to the Lviv journals *Nova Kul'tura*, *Kul'tura*, and *Vikna*. In the late 1920s and early 1930s Galician Sovietophile critics, such as A. and I. *Krushelnytsky, published their views in *Novi shliakhy* and *Krytyka*. After their emigration to Soviet Ukraine and the beginning of the Stalinist terror there, Sovietophile criticism virtually disappeared in Western Ukraine.

During the Second World War the principal organs of Ukrainian literary criticism were the Prague-based nationalist journal **Proboiem* and the Lviv journal **Nashi dni*, to which Simovych, Yu. *Stefanyk (pseud: Yu. Hamorak), and new émigrés from central and eastern Ukraine contributed.

After the war the state of literary criticism in Soviet Ukraine remained fundamentally unchanged. In addition, in the late 1940s, critics with German or Jewish roots (eg, Ye. *Adelheim and I. *Stebun) were persecuted as 'rootless cosmopolitans.' During the first postwar decade Soviet critics applauded the pseudo-*narodnist* of authors who utilized the structures of folk literature. A controlled revival in literary criticism began during the post-Stalin thaw of the mid-1950s, when noteworthy articles by older critics, such as Biletsky, Rylsky, and the labor-camp survivor B. *Antonenko-Davydovych, were allowed to be published.

During the Soviet Ukrainian cultural rebirth of the early 1960s a new criticism arose for the first time since the 1920s. The leading new critics were I. *Dziuba, I. *Svitlychny, Ye. *Sverstiuk, I. Boichak, M. Kotsiubynska, and V. *Stus. Their articles and surveys, in which they applied esthetic criteria rather than the scholastic principles of socialist realism, were interesting attempts at reconceptualizing 'rehabilitated' writers of the 1920s (eg, V. Svidzinsky, Ye. Pluzhnyk, and O. Vlyzko) and sober evaluations, devoid of traditional Soviet biases, of literary developments in Ukraine. The forgotten genre of the liter-

ary feuilleton was revived by the critics A. Shevchenko, M. Kosiv, L. Senyk, and M. *Malynovska, who parodied the ideologized writings of the Soviet literary 'generals' and the dubious examples of the class and *narodnist* approach. In various literary debates V. *Donchyk, H. *Syvokin, A. *Makarov, M. Ilnytsky, and V. Ivanyenko challenged orthodox stalwarts such as M. *Shamota, A. *Trypilsky, B. *Buriak, and D. *Shlapak. The latter group continued exhorting critics in a directivelike fashion to adhere to Party-sanctioned sociological schemata, in which the only measure for evaluating a literary work remained whether or not it helped to educate readers in the spirit of communist morality and mobilized them to build a 'radiant future for all of progressive humanity.'

The 1972 CC CPSU resolution 'On Literary-Artistic Criticism' made it clear, however, that the Party was not prepared to relinquish its strict control over literature and criticism, and that critics would have to continue playing the role of censor and policeman in literature. The chill of ideological scholasticism and state intervention again enveloped all publications, and *Komunist Ukrainy* and other Party periodicals resumed publishing articles by Shamota and other literary 'commissars' that denounced many talented writers and their works. Only through the *samvydav network were works such as Sverstiuk's *Cathedral in Scaffolding*, Dziuba's *Internationalism or Russification?*, and Svitlychny's and Stus's articles disseminated in Ukraine.

Those critics were soon subjected to brutal repression, and the 1970s proved in fact a barren decade in terms of literary criticism. The only partial exceptions are L. *Novychenko's books on Tychyna (1979) and Rylsky (1980). In the 1970s the eight-volume multiauthor history of Ukrainian literature (1967–71) prepared by the AN URSR (now ANU) Institute of Literature was censored by Party critics. Its authors were rebuked for devoting excessive attention to the Ukrainian classics and uncritically examining Soviet Ukrainian literature of the 1920s.

Only on the eve of the 1980s did a group of younger critics, born in the 1940s and 1950s – among them M. *Zhulynsky, V. Melnyk, V. Briukhovetsky, O. Nykanorova, M. Strelbytsky, V. Panchenko, S. Hrechaniuk, T. Salyha, L. *Skyrda, M. *Riabchuk, V. Morenets, L. Taran, and N. Bilotserkivets – become influential. Although they had to conform to rules imposed by the Party and occasionally had to exalt socialist realism, they applied esthetic criteria in their criticism and used Aesopian language to discuss the social phenomena depicted in literary works. On the pages of *Literaturna Ukraina*, where the editor in charge of literary criticism was M. *Slaboshpytsky, lively exchanges of views were published on the state of Ukrainian prose, poetry, and literature for children and adolescents, and on the ethical code of literary criticism.

In the perestroika years Ukraine's journals and newspapers were filled with what would earlier have been 'criminal' references to proscribed writers, and concerted efforts were made to enrich the public's knowledge of how Ukrainian literature had truly developed, about the many writers repressed during the Stalinist terror, and about Ukrainian émigré literature. Nevertheless the first two volumes (1988, 1990) of a projected five-volume Ukrainian encyclopedia of literature prepared at the ANU Institute of Literature still refer to émigré writers, such as I. Bahriany, V. Barka, and T. Osmachka, as Ukrainian bourgeois nationalists, and the newest history of Ukraini-

an literature prepared at the institute (2 vols, 1987–8) avoids mentioning such writers altogether or treats them as enemies of the people, and presents superficial, simplistic accounts of the tragic fate of most 20th-century Ukrainian writers. But newspapers and journals of the late 1980s and early 1990s have published many previously banned literary works and have provided detailed accounts of their authors. In the process literary criticism and literature studies have overlapped in their discussion of the literature of the past decades, and the distinction between criticism and publicism has become blurred in recent articles (eg, by Dziuba, Sverstiuk, O. Pakhlovska, L. Kostenko, and O. Zabuzhko) addressing the acute problems of national survival.

In the postwar period G.Y. *Shevelov (pseud: Yu. Sherekh) has been the most influential literary critic within the Ukrainian émigré community in the West. In his articles in the journal *Arka* (1947–8) he formulated the principles of a 'national-organic style' and stimulated a lively discussion that continued for some time. Another émigré critic, V. *Derzhavyn, produced articles that combined the Neoclassicist and modernist approaches. In the 1950s and 1960s Yu. *Lavrinenko wrote insightful articles and reviews of Soviet Ukrainian and émigré literature (particularly the poets of the New York Group), and M. *Hlobenko and I. *Koshelivets wrote surveys of Soviet Ukrainian literature and articles about individual Soviet and émigré writers. In the 1960s Kravtsiv contributed systematic surveys of Soviet Ukrainian literature to the monthly journal *Suchasnist'*. The principal intellectual forum within the émigré community since 1960, *Suchasnist'* has also published criticism by B. *Boychuk, Doroshenko, J. *Fizer, Korovytsky, Koshelivets, I. *Kostetsky, H. *Kostiuk, B. *Rubchak, and D.H. *Struk. Some of the other notable émigré critics in the postwar period are Lutsiv, Romanenchuk, Stefanyk, O. Tarnavsky, and A. Yuryniak.

Literary Discussion. A wide-ranging debate during 1925–8 which coincided with the implementation of a policy of Ukrainization and engaged figures active in the political and cultural life of the new Soviet Ukrainian republic. The polemical pamphlets of M. *Khvylovy, which were serialized in *Kultura i pobut* (1925–6), outlined the themes and defined the tone of the debate, which came to be known as the Literary Discussion. Among the issues raised were the right of Ukrainian literature to set its own course, the relationship of current writing to past cultural values, the role of literary organizations, and the function of literature and criticism.

Two fundamental camps emerged. On one side stood Khvylovy, the literary organization Vaplite, and the Neoclassicists, who insisted on the deprovincialization of Ukrainian writing, the assimilation of European literary classics, and the cultivation of high artistic achievements. On the other side stood figures such as M. *Skrypnyk and A. *Khvyliia, who acted as spokespeople for the Party, and critics such as V. *Koriak, S. Shchupak, and B. Kovalenko. They supported the *All-Ukrainian Association of Proletarian Writers (VUSSP), an organization sponsored by the Party for the purpose of defeating Vaplite. The VUSSP tended to see intellectual life in Ukraine as a reflection of Russian trends, considered works of the past as potentially pernicious, and applied a crude sociological analysis to and held a utilitarian view of literature. Its members felt that literature must implement the Party's directives and shape the new communist society. Still other figures, such as O. *Biletsky, avoided any organizational involvement and stressed the need for a multifaceted approach to literature and the value of formal analysis.

The Literary Discussion is generally considered to have ended in February 1928, after a formal debate took place in Kharkiv, presided over by Skrypnyk. The issues raised by the Literary Discussion continued, however, to agitate Ukrainian intellectuals and to enliven the pages of literary journals until the early 1930s.

Literary Fund (Literaturnyi fond). The popular name for a private relief fund for writers in need, established in St Petersburg in 1859 as the Society for Assistance to Needy Writers and Scholars. The only branch in Ukraine existed in Odessa. The society was open to all writers in the Russian Empire as well as to all other interested persons. Its funds came from dues, bequests, donations, and proceeds from readings, concerts, and publications, as well as from the Ministry of Education. Its aim was to give financial assistance to writers or bereaved families of writers, to have their works published, and to help young and talented but needy persons to attain an education toward a literary or teaching career. Subsistence grants were not made public until after the recipient's death. It is believed that among Ukrainian writers T. Shevchenko, M. Vovchok, M. Kotsiubynsky, and P. Hrabovsky all received aid from the fund. The literary fund society ceased to exist in 1918. A fund with similar aims of all-encompassing aid to needy writers was established in the USSR in 1934; it was run by the state and was under the auspices of the Writers' Union of the USSR. Grants, however, were restricted to writers faithful to the Party. In the same year a branch was opened in Kiev with subbranches in Kharkiv, Donetske, Lviv, and Odessa. Under the fund's auspices were also the 'buildings of creativity' in Irpin and Odessa, the writers' building in Kiev, living quarters, clubs, and the like.

Literary journals. Periodical publications, usually appearing monthly, devoted to the publication of literary works and literary criticism. Initially the scope of such periodical publications was broader: they included, in addition to literary works, articles on social, political, and civic themes. The first such general literary magazines to appear in Ukraine were **Khar'kovskii Demokrit* (1816), **Ukrainskii vestnik* (1816–19), and **Ukrainskii zhurnal* (1824–5). Much more than just a literary journal, **Osnova* (1861–2) played an important social and organizational role by providing a forum for the fledgling Ukrainian vernacular literature.

In Ukraine under Austro-Hungarian rule periodical literature began with journals, such as **Pchola* (1849), **Vechernytsi* (1862–3), **Meta* (1863–6), **Rusalka* (1862–6), and **Pravda* (1867–96). The 1870s and 1880s saw the appearance of literary journals with a more radical perspective, such as **Druh* (1874–7), **Hromads'kyi druh* (1878–9), and **S'vit* (1881–2). **Zoria* (1880–97) became a general journal representative of Ukrainian literature in the 1890s. Unlike *Zoria*, which had a conservative orientation, *Narod* (1890–5) and **Zhytie i slovo* (1894–7) were started by writers and scholars with radical and socialist ideas. In 1898 M. Hrushevsky established **Literaturno-naukovyi vistnyk*, a single literary-scientific journal uniting all Ukrainian literary trends and the most prominent critics and scholars from all Ukrainian territories. The journal played a leading role in Ukrainian literary development until 1919. Since publication in Ukrainian was forbidden by the **Ems Ukase*, the scholarly literary journal **Kievskaiia starina* (1882–1906) was published in Kiev in Russian. In 1907 it was renamed **Ukraina*, and four issues appeared in Ukrainian. The first literary journal after the liberalization of 1905 was **Nova hromada* (1906), but its importance diminished with the transfer of *Literaturno-naukovyi vistnyk* to Kiev in 1907. Nevertheless, with the emergence of new literary trends, another literary journal was established in Kiev, **Ukrains'ka khata* (1909–14), which became the forum for Ukrainian 'modernism.' It opposed the traditional Ukrainophilism and conservative populism.

In Lviv the new literary and art magazines founded by followers of modernist trends included the monthly **Ruska khata* (1905–6), the short-lived **S'vit* (1906–7), *Bdzhola* (1908), and *Buduchnist'* (1909–10). Emphasizing art and literature was the semimonthly magazine **Iliustrovana Ukraina* (1912–13).

The cultural and national renaissance after the dissolution of the Russian and Austro-Hungarian empires was also marked by an increase of literary journals. Literature, criticism, popular science, and art were represented by **Nashe mynule* (1918–19), **Mystetstvo* (1919–20), and **Knyhar* (1917–20), which also included a section on bibliography. In addition to the revived *Literaturno-naukovyi vistnyk* in Kiev, there were the **Universal'nyi zhurnal* (1928–9) in Kharkiv and the monthly **Shliakh*, which appeared in Moscow in 1917 and was transferred to Kiev in 1918, where it continued in the tradition of *Ukrains'ka khata* until 1919. The symbolists were represented by the almanac **Muzahet* (1919), and the futurists published **Semafor u maibutnie* (1922), *Katafalk mystetstva* (1922), *Gong komunkul'ta* (1924), and the monthly **Nova generatsiia* (1927–30). The leftist writers close to the futurists were organized in the group *Avanhard*, and published a bulletin, *Biuleten' Avanhardu* (1928–9, three issues). The all-Ukrainian

an peasant writers' union, *Pluh*, published its journal **Pluh* (1925–33).

The monthly **Zhyttia i revoliutsiia* was published in Kiev between 1925 and 1934. It recruited contributors from many groups, including **MARS* and the **Neoclassicists*. It also devoted some space to the cultivation of Ukrainian traditions and cultural ties with the West. An important literary function was performed by *Kul'tura i pobut*, a literary supplement to **Visti VUTsVK*. M. **Khvylovy's* group published the bimonthly **Vaplite* beginning in 1926; it was forced to close in 1927. Khvylovy tried to continue the tradition of an engaging literary journal in the monthly **Literaturnyi iarmarok* (1928–30, 12 issues) and, when that too failed, in **Prolitfront* (1930).

The most prestigious forum of literature, art, criticism, and political opinion was the Kharkiv monthly **Chervonyi shliakh* (1923–36), which replaced **Shliakhy mystetstva* (1921–3) and united writers of all persuasions. Some other literary journals published in Kharkiv were the semimonthly *Selians'kyi zhurnal* (1929–31); the literary monthly for agricultural workers, *Traktor*; and the semimonthly of the All-Ukrainian Association of Proletarian Writers, *Literaturnyi pryzo* (1931–2). That association also published the most important Russian-language literary journal, *Krasnoe slovo* (1927–32), which became *Litstroii* in 1933 and *Sovetskaia literatura* in 1934.

In addition to *Zhyttia i revoliutsiia*, **Molodniak* (1927–37), the journal of the Central Committee of the Young Communist League of Ukraine, and the literary art magazine *Nova hromada* (1923–9) were published in Kiev. As a supplement to the Odessa newspaper *Chornomors'ka komuna*, there was the literary journal **Shkval* (1924–33) and the literary, art, and critical publication *Metalevi dni* (1930–3). The latter two periodicals merged in *Literaturnyi zhooten'* (1934–5). Literary magazines published in other cities were *Chervonyi krai* (1927–8) in Vinnytsia; the monthly *Zoria* (1925–34) in Dnipropetrovske, renamed *Shturm* (1935–7); the monthly *Tempy* (1931) in Zaporizhia; the monthly *Kryobas* (1931–3) in Kryvyi Rih; the monthly *Stapeli* (1931–2) in Mykolaiv; and *Zaboi* (1923–32), renamed *Literaturnyi Donbas* in 1933.

The bibliographical journals *Knyhar* (1917–20), *Knyha* (1923–4), and *Nova knyha* (1924–5) published some criticism and also recorded current book production. In the late 1920s there were the bimonthly of literary studies **Literaturnyi arkhiv* (1930–1), published by the Taras Shevchenko Scientific Research Institute, and the Marxist journal of literary criticism *Krytyka* (1928–32), renamed *Za markso-lenins'ku krytyku* in 1932 and *Literaturna krytyka* in 1936. Emigré writers from Western Ukraine published in Soviet Ukraine **Zakhidnia Ukraina* (1927–9; and as a monthly, 1930–3). Once **Ukrainization* was abandoned as a government policy, and the various literary groups were unified into the **Writers' Union of Ukraine*, most literary journals ceased to exist; only *Radians'ka literatura* (1933–41, later renamed **Vitchyzna*), *Literaturna krytyka* (1936–41), and **Literaturnyi zhurnal* (1936–41, replacing *Chervonyi shliakh*) were permitted.

In Western Ukraine, which found itself under Polish rule after the Treaty of Versailles, the most influential literary journal was D. **Dontsov's* *Literaturno-naukovyi vistnyk*. Other literary journals with a nationalist orientation were **Dazhboh* (1932–5), **Obrii* (1936–7), and **Naperedodni* (1937–8). At the opposite end of the political spectrum

Literary journals

were the communist journals **Vikna* (1927–32) and **Novi shliakhy* (1929–32). The short-lived **Mytusa* (1922) and, later, **Nazustrich* (1934–9) were more concerned with literature than politics, whereas **Dzvony* (1931–9) reflected a Catholic viewpoint. In Bukovyna under Rumanian occupation the primary literary journal was **Samostiina dumka* (1931–7), and in Hungarian-ruled Transcarpathian Ukraine, the journal **Nasha zemlia* (1927–9). Literary journals also appeared among the émigrés after the revolution and the First World War, such as *Na perelomi* (1920) and *Vyzvolennia* (1923) in Vienna, **Nova Ukraina* (1922–8) and **Proboiem* (1933–43) in Prague, and **My* (1933–9) in Warsaw.

When the Soviet Union occupied Western Ukraine at the beginning of the Second World War, all literary journals ceased publication. The only permitted literary journal was *Literatura i mystetstvo* (1940–1) in Lviv. In 1941–5, during the German occupation of Ukraine, the only literary publications permitted were the short-lived biweekly literary newspaper **Litavry* (1941) in Kiev and the monthly journal **Nashi dni* (1942–4) in Lviv.

The trend in Soviet Ukraine toward a centralized press, which began in the 1930s, continued after the Second World War. All the literary journals were official organs of the various branches of the Writers' Union of Ukraine. Today the literary journals are the monthly *Vitchyzna*, the Russian-language **Raduga*, **Vsesvit* (since 1958 a monthly devoted to art and literature abroad), and **Kyiv* in Kiev; **Prapor* (now *Berezil'*) in Kharkiv; **Zhovten'* (now *Dzvyn*) in Lviv; and **Donbas* in Donetsk. **Slovo i chas* (*Radians'ke literaturoznavstvo* until 1990) is devoted to literature studies. **Ranok* and **Dnipro* appeared as organs of the Komsomol.

Some literary journals have appeared among Ukrainians outside of Ukraine. **Duklia* is the literary journal of the native Ukrainian population of Slovakia and is published every two months in Prešov. Beginning in July 1990 *Nash holos* began to appear in Rumania. After the Second World War a number of literary-artistic journals were established among the Ukrainian émigrés in DP camps: collections of **MUR* (Munich, Regensburg 1946–7), the highly sophisticated journal **Arka* (Munich 1947–8), the journal *Litavry* (Salzburg 1947–8), the scientific-literary journals *Ukraina i*

svit (Hannover, 1949–69) and *My i svit* (Mittenwald, 1950; Paris, 1951–5; Toronto and Niagara Falls, 1955–85). The newspaper *Ukrains'ka literaturna hazeta*, established in 1955, combined with *Suchasna Ukraina* in 1961 to become the literary-artistic and social monthly **Suchasnist'*. Although under the auspices of the *Ukrainian Supreme Liberation Council, *Suchasnist'* maintained a nonpartisan approach to literature and thus served as the major literary journal in the emigration. In 1992 it began publication in Kiev. Other more local or more political journals exist as well: the nationalist monthly **Vyzvol'nyi shliakh* (London, since 1948); the monthly **Novi dni* (since 1950) and the irregular *Terminus* (five issues since 1986), both published in Toronto; and the now-defunct **Kyiv* (1950–64) in Philadelphia. The latest literary journal is a joint venture of Ukrainian writers in the West and in Ukraine called **Svito-vyd.* (See also **Press*, **Humoristic and satiric press*, **Children's magazines*, and **Almanac*.)

D.H. Struk

Literary memorial museums. Collections of documents, manuscripts, printed works, monuments, photographs, and personal effects of noted Ukrainian writers usually established in buildings where those writers lived and worked. There are about 30 such museums in Ukraine, among them the Mykhailo Kotsiubynsky museums in Vinnytsia (est 1927) and Chernihiv (est 1935); the Vladimir Korolenko museums in Poltava (est 1928) and Zhytomyr (est 1973); the Nikolai Gogol Museum in Velyki Sorochyntsi, Poltava oblast (est 1929); the Taras Shevchenko Museum in Shevchenkove, Zvenyhorodka raion, Cherkasy oblast (est 1939); the Panas Myrny Museum in Poltava (est 1939); the Ivan Franko museums in Lviv (est 1940), Ivan Franko (formerly Nahuievychi), Drohobych raion (est 1946), and Kryvorivnia, Verkhovyna raion, Ivano-Frankivske oblast (est 1960); the Vasyl Stefanyk Museum in Rusiv, Sniatyn raion, Ivano-Frankivske oblast (est 1941); the Olha Kobylanska Museum in Chernivtsi (est 1944); the Marko Cheremshyna Museum in Sniatyn, Ivano-Frankivske oblast (est 1949); the Ivan Kotliarevsky Museum in Poltava (est 1952); the Ivan Nechui-Levytsky Museum in Stebliv, Cherkasy oblast (est 1959); the Markian Shashkevych Museum in Pidlissia, Zolochiv raion, Lviv oblast (est 1959); the Yaroslav Halan Museum in Lviv (est 1961); the Oleksander Dovzhenko Museum in Sosnytsia, Chernihiv oblast (est 1961); the Lesia Ukrainka museums in Kiev (est 1962) and Novohrad-Volynskiyi (est 1971); the Mykhailo Pavlyk Museum in Kosiv, Ivano-Frankivske oblast (est 1967); the Leonid Hlibov Museum in Chorny Ostriv, Khmelnytskyi oblast (est 1968); the Maksym Rylsky Museum in Kiev (est 1968); the Hryhorii Skovoroda Museum in Skovorodynivka, Zolochiv raion, Kharkiv oblast (est 1972); the Oleksander Kornichuk Museum in Kiev (est 1975); and the Pavlo Tychyna Museum in Kiev (est 1980). The *Kiev Shevchenko Museum (est 1949), the Yurii *Fedkovych Museum in Chernivtsi (est 1945; branch in Putylyiv), and the Anton Makarenko Museum in Kremenchuk (est 1951) are classified as cultural-educational institutions. A few are also preserves: the Ivan Karpenko-Kary Khutir Nadiia Museum-Preserve near Kirovohrad (est 1956), the Lesia Ukrainka Museum-Homestead in Kolodiazhne, Kovel raion, Volhynia oblast (est 1949), the Shevchenko Building-Museum in Kiev (est 1927), and the Shevchenko *Kaniv Museum-Reserve in Kaniv (est 1925).

Beyond Ukraine there are several literary museums dedicated to Ukrainian writers: the Marko Vovchok Building-Museum in Nalchik, Kabardino-Balkar AR, the Lesia Ukrainka Museum in Surami, Georgia, and the Shevchenko Museum in Fort-Shevchenko, Kazakhstan.

Literatura v shkoli. See *Ukrains'ka mova i literatura v shkoli*.

Literature. Ukrainian literature did not have a smooth path of development. The language for writing (see *Standard Ukrainian), introduced with Christianity and used for religious ritual, changed at a slower pace than did the spoken word. The rift between the spoken and the written language widened over the years, owing to political events (the numerous invasions of the Mongols and the Tatars; the subjugation of Ukraine by other states, Lithuania, Poland, Russia, and Austria-Hungary; and the outright prohibitions of the Ukrainian language in print). The outcome of the divergence between the written and the spoken language was the adoption in the 19th century of a completely 'new' literary language based on the spoken variant. Although beneficial for the growth of Ukrainian national awareness, it had a detrimental effect on the development of literature. Mostly, noticeably the continuity between pre- and post-19th-century literature seemed lost. Even literature in the vernacular did not develop smoothly. Ukraine at that time was split between two empires, a state of affairs that gave rise to regional vernacular differences and somewhat different tempi of literary growth. Nevertheless, in presenting Ukrainian literature as a whole, the literary process of the last millennium can be viewed as a continuum with several broad periods: the Kievan, the Cossack, the vernacular, the renaissance of the 1920s, and the contemporary. This periodization serves as a historical time frame; it does not divide according to esthetic or philosophical currents, more than one of which may be present in the literature of a given time period. More detailed periodizations have sometimes been used but would be inappropriate in a concise survey.

The Kievan period. Both translated literature and a rich oral tradition played an important role in the development of original literature in Kievan Rus'. The christening of Kievan Rus' in 988 gave impetus to a dissemination of various adaptations (from the Balkan Slav originals) and translations (mainly from Greek) of religious texts. Besides Gospels (*Ostromir Gospel, 1056–7), Acts of the Apostles, and Psalters, of interest for the development of an independent literature were collections of sermons and lives of saints. The translations in such collections were often augmented with local materials, and existed in several redactions. The earliest and most notable such collection was the **Izbornik* of Sviatoslav (1073 and 1076), and the latest, a 14th-century compendium of teachings titled **Izmarahd* (The Emerald). Also popular were such gatherings of aphorisms and sermons as *Pchela* (The Bee) and *Zlataia tsip* (The Golden Chain), which circulated in various editions. The oldest and most noted didactic work is *Slovo o zakoni i blahodati* (A Word on Law and Benevolence, 1050) by Ilarion, the first native metropolitan of Kiev. Somewhat more worldly are the teachings of *Volodymyr Monomakh titled *Poucheniie ditiam* (An Instruction for [My] Children, ca 1117), included in the Primary Chronicle. Noteworthy as a sermonizer in the 12th century was Bish-

op Cyril of Turiv. His art is especially discernible in *Slovo v novu nediliu po Pastsii* (A Word on the First Sunday after Easter, ca 1170).

A more subtle form of didactic literature can be found in the numerous lives. Modeled on translated hagiographies, lives of St Anthony of the Caves, St Volodymyr the Great, St Olha, and others were written and collected in the *Kievan Cave Patericon, the most remarkable collection of lives in the Kievan period. Also noteworthy are the early *chronicles, which are unique for their wealth of information and their blending of fact and fiction, written sources and eyewitness accounts (eg, the tale of Borys and Hlib). The chronicles were compiled by anonymous scribes and copied many times. They can be divided into three parts, the Primary Chronicle (up to the 12th century), the Kievan Chronicle (from 1118 to 1190), and the Galician-Volhynian Chronicle (from the beginning of the 13th century to 1292).

Quite prevalent were apocryphal writings (*Khozheniie Bohorodytsi po mukakh* [The Mother of God's Journey through Suffering (Hell), mid-12th century]) as well as translated tales, such as *Varlaam i Ioasaf* or **Aleksandriia* (end of the 11th century). Also popular was the first 'travelogue,' *Zhytiii i khozhdeniie Danyla, rus'koi zemli ihumena* (The Life and Pilgrimage of Danylo, Hegumen of Rus', ca 1100). The most unusual and outstanding monument of old Ukrainian literature, however, is the secular epic poem **Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, ca 1187). Particularly rich in poetic tropes (epithets, similes, metaphors, metonymy, hyperbole, and personification), the work suggests a sophistication indicative of a rich tradition of folk and martial literature with highly developed poetics. But the plea of the anonymous author for unity among the princes fell on deaf ears. The Kievan state, disunited, was too weak to withstand the onslaughts from the East. Kiev fell to the Mongols in 1240, and the Principality of *Galicia-Volhynia became the focus of political and cultural life in Ukrainian lands. The incorporation of Volhynia into the Grand Duchy of Lithuania (1340) marks the end of the period and of significant literary activity. No major literary monuments remain from the 14th and 15th centuries.

The Cossack period, or the Middle period of Ukrainian literature, began in the 16th century; its vitality was eventually smothered by Russian domination, in the 18th century, together with all vestiges of Cossack independence. It was a period of great unrest and political upheaval which culminated in the *Cossack-Polish War, and of religious strife between the Uniates and the Orthodox, which centered around the Church Union of *Berestia in 1596. Yet the period is also noted for its vibrant and varied cultural activity. When this period began, Ukraine was part of the Polish-Lithuanian state and thus was open to influences from the West, especially to the post-Renaissance, post-Reformation emphasis on learning. It is not surprising that the Orthodox *brotherhoods, experiencing their heyday at that time, established schools (the *Lviv Dormition Brotherhood in the 1580s and the *Kiev Epiphany Brotherhood in 1615). Besides being bastions against Polonization the schools served as centers of literary creativity. The most famous and important school was the Kievan Mohyla College (later Academy), founded by Metropolitan P. *Mohyla in 1632. Of immeasurable importance for the development of literature was the

establishment of the first printing press in Lviv by I. *Fedorovych in 1574 and of subsequent printing houses by the brotherhoods. Even prior to the printing of the Lviv *Apostol* (1574) and the Ostrih Bible (1581) several new translations of the Gospels appeared. Under the influence of Protestantism from the West, those publications were intended to make the word of God more understandable to the people (eg, F. *Skoryna's publications [1517–25], the Peresopnytsia Gospel [1555–6], the Krekhiv *Apostol* [1563–72], the Volhynian Gospel [1571]).

One consequence of religious controversy over the Church Union of Berestia was a rich polemical literature. The multitude of works which appeared varied in size and form from short, sharply worded 'epistles' to long scholarly exposés (eg, the *Palinodiia* of Z. Kopystensky [1621]). Typical of many of them is the fiery tract by an anonymous polemicist *Perestoroha* (Warning, 1605–6), which lauds the brotherhoods for spreading education and cautions against Catholicism (the 'Union'), which will destroy that achievement. In another interesting anonymous polemic, *Protestatsiia* (Protestation, 1620), the author draws a direct historical line of development between contemporary Ukraine and Kievan Rus'. Notable for their literary artistry are the writings of Metropolitan I. *Potii (eg, *Uniiia ...* [Union, 1595]) defending the Uniates and the plea for Orthodoxy by M. *Smotrytsky, *Trenos , to iest lament ...* (Threnos, or the Lament ... , 1610). But it is the 20-odd extant writings of the maximalist defender of Orthodoxy and Eastern asceticism, I. *Vyshensky, which occupy the most important place in the polemical literature of the period.

Related to polemical writing and equally developed was the art of sermonizing. Some of the most noted practitioners were Smotrytsky, Mohyla, L. *Baranovych, K. *Stavrovetsky-Tranquillon, A. *Radyvulovsky, St Dymytrii *Tuptalo, and S. *Yavorsky. Copious use of allegory and allusion and the inclusion of various tales, translations, anecdotes, and apocryphal writings were the norm, and special emphasis was placed on the form and style of the sermon. I. *Galiatovsky, for example, added to his collection of sermons (*Kliuch razumieniia* [Key of Understanding, 1659]) a large treatise on how to compose a proper sermon.

The popularity of the sermonizer's use of the unusual and the fantastic as illustration, and of tales accepted as 'knowledge,' was reflected in the publication of collections dealing with miracles and the lives of saints. Notable in that respect were the republications of the Kievan Cave Patericon, first by S. Kosiv in Polish as *Paterikon* (1635) and then in Ukrainian (1661); the collections of short stories dealing with the miracles of the Mother of God (eg, Galiatovsky's *Nebo novoie* [New Heaven, 1665] and Tuptalo's *Runo oroshennoie* [The Bedewed Fleece, 1680]); and Tuptalo's famous *menaion of daily readings, *Chet'i minei* (1689–1705).

Fascination with the lives of saints and with the extraordinary also gave rise to a renewed interest in history, which fostered the development of the historiographic genre. T. *Safonovych, a teacher in the Kievan Mohyla College, compiled a history (*Kroinika*) in 1672 composed of previous Rus' as well as Polish chronicles. Even more prominent was the historical compilation **Sinopsis*, published in 1674 in Kiev and attributed to I. *Gizel. The work was republished many times and remained a basic histor-

ical text throughout the period. The momentous upheavals of the B. *Khmelnitsky period were recognized for their historical importance by the contemporary participants. Several Cossack chronicles appeared. Although strictly speaking those chronicles belong more to historiography than to literature, their style and influence on the Ukrainian Romantics played an important role in the later development of literature proper. Three chronicles deserve special mention: the anonymous *Samovydyets* (Eyewitness) Chronicle, which begins with the Khmelnytsky uprising and ends in 1702; the H. Hrabianka Chronicle (1710), which concentrates on the Khmelnytsky period but begins in antiquity and ends at the beginning of the 18th century; and the S. Velychko chronicle, completed after 1720. The last is perhaps the most lively and interesting of the three. In vivid and colorful language Velychko chronicles events and attempts to give the reasons for them, as well as to draw a moral for future generations. Not quite in the same genre but equally lively and interesting is the autobiography of I. *Turchynovsky. His adventures vividly portray the life of the wandering students-preceptors who played an important role in the development of literature, especially poetry and drama.

Although the religious tales, sermons, and secular chronicles are of interest, they nonetheless belong more to the realm of the 'written word' than to literature. Literature in its purer form developed in poetry and drama. Although a large corpus of poems survived (many of them in manuscript), no really major poet emerged. Many of the poems are of unknown authorship. Some have the name of the author encoded into the poem, acrostics being popular at the time; there are also poems in various shapes (cross, half-moon, pyramid, etc) and so-called crabs, which could be read both from left to right and from right to left. Such excess, playfulness, and ornamentation have prompted some scholars (eg, D. *Chyzhevsky) to refer to the period as the *baroque. Poetics were taught at the Kievan Mohyla Academy and in the brotherhood schools (a course written by M. *Dovhalevsky [1736] and another by H. *Konysky [in Latin, 1744] are extant), and most of the poems show traces of having been school exercises. Written in syllabic meters, they mix images from the Christian and the ancient worlds. Allegory is a predominant trope (as in the extremely popular 17th-century didactic collection of prose and poetry with allegorical drawings, **Ifika iieropolitika*), and much use is made of certain set images ('emblems' – a scythe for death, dove for purity, etc). Along with poems of religious or moral content, which stress the vanity and brevity of earthly life, there are numerous panegyrics and heraldic poems devoted to verbal description and the glorification of coats of arms. Epigrams are also quite widely represented. Those by the archpriest I. *Velychkovsky are perhaps the most interesting.

Remarkable among the many religious poetasters were Stavrovetsky-Tranquillon (*Perlo mnohotsinnoie* [A Priceless Pearl, 1646]), who used lines of irregular length close to those of folk *dumas; I. *Maksymovych, who presented religious truths in a broad narrative manner (*Bohorodytse Divo* [Virgin Mother of God, 1707] and *Otche nash* [Our Father, 1709]); and *Klymentii, known as Zynovii's son, who is notable for the sheer number (369) of opinionated poems which he composed at the beginning of the 18th century. Arguably the best poet of the period, the peripatetic

philosopher H. *Skovoroda wrote religious and morally didactic poetry. The popularity of his live-and-let-live theocentric philosophy as expressed in the collection *Sad bozhestvoennykh pesnei* (Garden of Divine Songs, 1753–85) can be seen in the fact that some of the poems (eg, nos 10 and 18) became folk songs. His *Basni Khar'kovskii* (Kharkiv Fables, 1774) marks the beginning of the fable genre in Ukrainian literature. Quite widely known toward the end of the period was the collection of religious poetry *Bohohlasnyk* (The Praise Book, 1790), from Pochaiv, with many poems based on legends and apocrypha about the Mother of God.

Among the more worldly poems are numerous pae-gyrics, such as those written in honor of Metropolitan P. Mohyla (eg, *Evkharistiron, albo vdiachnost'* [Eucharisterion, or Gratitude, 1632], *Evfoonia veselobrmiachaia* [Joyful Ringing Euphony, 1633]). One of the earliest such poems was *Vizerunk tsnot* (A Pattern of Virtue, 1618), by O. Mytura in honor of Ye. *Pletenetsky. K. *Sakovych wrote a eulogy to Hetman P. Sahaidachny (*Virshi na zhalosnyi pohreb zatsnoho rytsera Petra Konashevycha Sahaidachnoho ...* [Poems for the Grievous Funeral of the Knight Petro Konashevych Sahaidachny, 1622]) in which he praised the role of the Cossacks as defenders of Ukraine against the Tartars. The *Alfavit sobrannyy rifmami slozhennyyi ot sviatykh pisanii ...* (An Alphabet Compiled and Rhymed from the Holy Writings ..., 1705) consists of short narratives about sins and punishments. Remarkable for its separatist aspirations was S. *Divovych's *Razgovor Velikorossii s Malorosiei* (A Conversation of Great Russia with Little Russia, 1762). The few poems attributed to Hetman I. *Mazepa stand out because of their lyricism coupled with concern for the Cossack nation.

Equally important was the development of the dramatic genre. Western European morality, miracle, and mystery plays were part of the Jesuit school curriculum in Poland and from there entered the curriculum of the brotherhood schools. Joined with the study of poetics, *school drama concentrated on the development of poetic dialogue. One early example of a dramatic dialogue is the collection of Christmas poems of P. *Berynda (1616). Soon afterward, full-length dramas were composed, such as the widely known play by an anonymous author *Aleksii, chelovik Bozhyi* (Alexis, Man of God, 1673). To captivate the audience and to provide relief from their often-heavy didacticism, plays were interrupted by entr'actes consisting of humorous dialogues called *intermedes. Those contained rather down-to-earth slapstick humor, but also, at times, social commentary in the form of mocking stereotypes of members of the various social strata of the time – Polish lords, Jews, Cossacks, Gypsies, and peasants – as in an untitled play by M. Dovhalevsky (1737) or in H. Konysky's *Voskreseniie mertvykh* (The Resurrection of the Dead, 1746). Students and seminarians were more than willing to compose intermedes, especially for the plays which were part of the repertoire of the puppet theater, the *vertsep. (Texts for vertsep dramas have survived only from the 1770s.) Since the students and wandering preceptors presented the vertsep at village and city fairs, both the serious mystery plays and the slapstick interludes reached a wide audience. The most famous play of the time, *Vladimir* (1705) by T. *Prokopovych, is unusual in its blurring of the strict division between the serious and the comic. Glorifying Volodymyr the Great for christening

Rus', Prokopovych merges the comic and derisive elements with other elements of the play and so initiates the genre of tragicomedy. A much weaker tragicomedy, dealing with the fall in morals of the day, is V. Lashchevsky's *Tragedokomediia ...* (1742). Of interest also is the drama **Mylost' Bozhiia Ukrainu ... svobodyvshaia* (God's Grace Which Has Liberated Ukraine ..., 1728), by an anonymous author. It moves away from religious themes and deals with events during the Khmelnytsky period. The use of personifications in the play to portray such 'personages' as Ukraine or News (in Ukrainian both are singular and feminine: *Ukraina, Vistka*) is also quite typical of the time.

Although the Cossack period in Ukrainian literature lasted until the end of the 18th century, it had begun to decline in 1654 with the signing of the *Pereiaslav Treaty, when Ukraine came under ever-increasing Russian domination. In 1667 the *Andrusovo Treaty divided Ukraine between the Russian and the Polish states. In 1709 Hetman Mazepa, in league with Charles XII of Sweden, failed in his attempt to wrest Ukraine from Russian control. In 1720 Peter I of Russia banned all ecclesiastical printing in Ukrainian by decree, and in 1723 the Cossack state lost the right to choose its own hetmans. Catherine II of Russia had the Zaporozhian Sich razed in 1775; in 1783 serfdom was introduced in Ukraine. By 1785 the remaining Cossack *starshyna* had been given the status of nobility so that its absorption into the Russian nobility would be facilitated. All through the Cossack period most of what was written in Ukraine was written in the bookish language, which in the 18th century came under the strong influence of the Russian language and consistently grew farther away from the vernacular.

Also important in ending the Cossack period in Ukrainian literature was the rise of classicism in the literature of the West. The influence of classicism began to be felt in the Russian Empire in the second half of the 18th century. Of the prescriptive tenets of classicism the most important for the further development of Ukrainian literature was that which defined the three styles of literary writing, high, middle, and low. Classicism recognized different registers of language: only odes, tragedies, and scholarly writings were written in the high style (ie, the bookish scholarly language; in Ukraine at the time that meant Russian); drama and prose were relegated to the middle style (a mixture of the bookish and the vernacular spoken by clerks and other literate people); and comedy, burlesque, and travesty were written in the low style (the language of the peasantry; in 'Little Russian,' Ukrainian).

Vernacular literature. It is not surprising then that travesty links the Cossack period with the period of the vernacular. The transposing of high and serious works of antiquity studied in school into the 'low' language of the common people was popular. Many verse-travesties have survived from the 18th century. Some, such as *Iarmarok* (The Fair, 1790) and *Zamysl na popa* (The Plot against the Priest, 1790) by I. *Nekrashevych, tend more toward the burlesque; others, such as *Virgilievi pastukhy ... v malorosii-s'kyi kobeniak pereodiahneni* (Virgil's Shepherds ... Dressed in a Little Russian Vest, ca 1794) by O. Lobysevych, rely more heavily on the humor derived from the use of the common language. It is in that spirit that the 'father' of Ukrainian vernacular literature, I. *Kotliarevsky, wrote his famous epic poem, *Eneida* (Aeneid, pts 1–3, 1798; pt 4, 1809; pts 5–6, ca 1820; first complete edn 1842).

The work, which appeared in its entirety only after Kotliarevsky's death, was a tremendous success, no doubt because of its skillful travesty of the Roman classic and its able use of the Ukrainian vernacular to reveal that language's wealth of picturesque idioms. Although Kotliarevsky was only following the dictates of classicism and did not set out to 'create a literature in the vernacular,' his highly sensitive ear for the idiomatic language, sharp eye for ethnographic detail, and talent as a writer produced the unexpected. No small part of the success of the travesty lay in the fact that Kotliarevsky abandoned the stilted syllabic versification which had never quite suited the randomly stressed Ukrainian, and wrote the *Eneïda* in a 10-line strophe of four-foot iambs, thereby giving a start to the use of syllabo-tonic metrics in Ukrainian literature. Surprised by his own success, Kotliarevsky nonetheless seemed to realize the importance of his work, for he injected a serious tone in the last three sections of the epic and also went on to write two plays in the newly 'discovered' language, *Natalka Poltavka* (Natalka from Poltava) and *Moskal' charivnyk* (The Soldier Sorcerer), both in 1819.

The most important follower of Kotliarevsky in the genre of travesty was P. *Hulak-Artemovsky, noted for his travestied adaptations of the odes of Horace (*Do Parkhoma*) and the expanded adaptation of a fable by the 18th-century Polish writer I. Krasicki (*Pan ta sobaka* [Master and His Dog, 1818]). Hulak-Artemovsky's attempt to use Ukrainian outside of travesty or burlesque, as in his translation of J.W. von Goethe's *Fisherman*, produced awkward results. His language was still too much in the register of the burlesque. H. *Kvitka-Osnovianenko, the initiator of the Ukrainian short story, was more successful in his attempt to write 'serious' works in the vernacular. Although his play (*Svatannia na Honcharivtsi* [The Betrothal in Honcharivka, 1836]) and early stories still reflect the burlesque tradition (eg, 'Saldats'kyi patret' [A Soldier's Portrait]), his later stories are more somber in tone and are imbued with the sentimentalism that was fashionable at the time. Whereas Kotliarevsky in his comedies showed that Ukrainian peasants could laugh and were funny, Kvitka-Osnovianenko (his collection of stories appeared in 1834) did no more than show that they are capable of tears and sadness.

As classicism gave way to *romanticism its rigid laws were abandoned. Gone were the high and low styles. The Romantics were genuinely interested in folk legends, songs, myths, and the heroic past. Several histories appeared, the most notable being **Istoriia Rusov* (printed in 1847 but written at the beginning of the century and circulated in manuscript form). The authorship is uncertain; but although the language of the work is Russian, its message is that of Ukrainian patriotism. Also important is *Istoriia Maloi Rossii ...* (History of Little Russia ..., 1822) by D. *Bantysh-Kamensky.

Several collections of Ukrainian songs and dumas appeared in quick succession, the most influential of them N. *Tsertelev's first gathering of dumas (1819) and M. *Maksymovych's *Malorossiiskie pesni* (Little Russian Songs, 1827). At Kharkiv University young scholars imbued with the spirit of romanticism formed a group (see *Kharkiv Romantic School) around I. *Sreznovsky, a Ukrainophile Russian scholar and ethnographer. Their interest in and collection of folklore confirmed their belief that the Ukrainian folk tradition was indeed rich in con-

tent and language and convinced them of the inaccuracy of the notion that the vernacular language could be used only for humorous literature. They developed new genres, translated and imitated works from other literatures, and wholly embraced J. *Herder's idea that Slavic folk poetry was closer to nature and less soiled by corrupt civilization than that of other peoples. The most prominent of the Kharkiv group were L. *Borovykovsky, whose ballads and whose contribution to the development of poetic vocabulary make him a precursor of T. *Shevchenko; A. *Metlynsky, a poet full of nostalgia for the heroic past of the Cossacks and pessimism for the future; and the lyrical poet M. *Petrenko, known for one extant poem, in which he captures supremely the eternal quest to escape into boundless space. Most of the authors of the period also wrote in Russian; some did so exclusively and thus belong to Russian literature. The famous N. *Gogol is a prime example.

Although by the early 19th century Polonization had progressed in *Galicia as far as Russification had in central Ukraine, if not farther, the national awakening in terms of a turn to the vernacular occurred there at almost the same time as in Russian-ruled Ukraine. The 1837 publication of a collection of poems in the vernacular, **Rusalka Dniestrovaia* (Dniester Water Nymph), published in Buda, Hungary (its printing was not permitted in Galicia), marks the beginning of Ukrainian vernacular literature in Galicia. The collection was the effort of three Lviv seminarians, Ya. *Holovatsky, I. *Vahylevych, and, the most talented author and the leader of the 'trinity,' M. *Shashkevych (see *Ruthenian Triad).

Such authors as M. *Ustyianovych ('Mest' verkhovynsia' [The Highlander's Vengeance, 1849]) and A. *Mohylnytsky continued to write in the Romantic tradition in Galicia, but Kiev became the center of romanticism in the 1840s. Kiev was the seat of the *Cyril and Methodius Brotherhood, which consisted, among others, of T. Shevchenko, P. *Kulish, and M. *Kostomarov, the last of whom provided a link with the Kharkiv school of the 1830s. Yet unlike the Kharkiv school the brotherhood had a definite, if rather utopian, political and national program: it called for a Slavic federation and believed that Ukraine, where the Cossack traditions of freedom and democracy had flourished, would provide the leadership in the federation. Those ideas were incorporated into **Knyhy byt'ia ukrains'koho narodu* (The Books of Genesis of the Ukrainian People), written by Kostomarov. He also wrote drama on the Shakespearean model, philosophical poetry, and literary criticism. Another prominent member of the brotherhood, Kulish is noted primarily for his novel-chronicle *Chorna rada* (The Black Council, 1857), the first historical novel written in Ukrainian. Kulish was also a poet, a translator (of W. Shakespeare and the Bible), and a publisher (see **Osnova*). Although Kulish's prose works far surpassed those of his predecessor Kvitka-Osnovianenko, as a poet he could not surpass Shevchenko.

Unlike Kulish Shevchenko was imbued with the Romantic spirit of revolt, and with him Ukrainian romanticism reached its pinnacle. Shevchenko had the ability to express profound thought in seemingly simple words. With the appearance of his **Kobzar* (The Minstrel, 1840), and his 'Haidamaky' (The Haidamakas, 1841) Shevchenko dispelled all doubt as to whether the Ukrainian vernacular was suitable for a full-range literature. His poems

consist of simple lyrics, ballads, Byronic poems, social and political satire, didactic exhortations, and paraphrases of biblical texts. He was popular in his day, and his popularity continued to grow and with it the influence of his poetry. Though Kotliarevsky is the 'father' of literature in the Ukrainian vernacular, Shevchenko is the father of the national revival which culminated in an independent state in 1918.

The death of Shevchenko in 1861 for all practical purposes marks the end of the Romantic movement in Ukraine, although Romantic works continued to be written not only by his epigones but also by some talented writers. The most prominent of the belated Romantics were the poet Ya. *Shchoholev, the prosaist O. *Storozhenko, who in his stories and in an unfinished novel dealt with the fantastic elements of the Cossack past, and Yu. *Fedkovych. Fedkovych is known primarily for his lyrics, imbued with German romanticism and full of Hutsul folklore, with which he brought about a revival of Ukrainian literature in Bukovyna.

Barring those few exceptions, the majority of writers of the time followed the new literary trend of realism and its philosophy of positivism. They stressed the importance of the exact sciences, expressed belief in evolution and progress, preached democracy, and tried to portray reality in an objective, naturalistic manner (naturalism). To be sure, the transition from romanticism to realism was not a sudden one; both elements can be detected in the works of many writers. The best example of the duality is found in the prose of M. *Vovchok, the first major woman writer in Ukrainian literature. In her short stories (1857) she joined elements of the former ethnographic romanticism (descriptions of various folk customs, ceremonies, and dress) with themes of serfdom, and she was one of the first to speak out against the evils of such a social system. Other notable writers on the border of the two movements were S. *Rudansky, whose collection of verse based on folk humor (*Spivomovky*) is unique, and L. *Hlibov, a sensitive lyricist noted mainly, however, for his adaptation of traditional fable plots into Ukrainian by using Ukrainian motifs and folklore to illustrate them.

Realism, however, had its greatest impact on the development of prose, especially of the long short story, the novelette (*povist'*). The genre proved most suitable for conveying the populist message. The first to introduce populist propaganda into his writings was O. *Konysky. The real masters of 19th-century Ukrainian realistic prose were I. *Nechui-Levytsky and P. *Myrny. Nechui-Levytsky formulated the principles of Ukrainian populist realism (a work must be realistic in its portrayal of the world, national in inspiration, and populist in ideology) to which both writers adhered. B. *Hrinchenko was also an important practitioner of the realistic novelette, although he is better known as a poet and lexicographer.

In the second half of the 19th century the tsarist regime severely curtailed literary activity through the Valuev circular of 1863 (see P. *Valuev) and the *Ems Ukase of 1876, which prohibited most publication in the Ukrainian language. Since those decrees were not repealed until 1905, many works remained unpublished or had to be published outside of the Russian Empire, most often in Galicia, where no such restrictions existed. Some works appeared too late to have any influence on the literary process. Such was the case with the family-chronicle novel

Liuboratski by A. *Svydnytsky, written in 1861–2 but not published until 1898. Some scholars and writers even left Russian-ruled Ukraine for Galicia, most notably the historian M. *Hrushevsky. Others went farther west, as did the journalist, scholar, and political ideologist M. *Drahomanov, who in 1876 settled in Geneva, where he published the journal *Hromada*. Through his socialist works he exercised a profound influence on intellectual life in Ukraine.

The most important writer to be influenced by Drahomanov was I. *Franko, the dominant Ukrainian literary figure in the last quarter of the 19th century. Franko's choice of the Ukrainian vernacular over the **yazychiie*, the dialect advocated by the *moskwofily* (see *Russophiles), irrevocably confirmed the end of that movement in Galicia. Franko was a universalist. He was equally at ease with the realistic novelette, the lyrical poem, the epic poem, drama, the essay, the political pamphlet, and translation. He was a first-rate philologist and literary critic, as well as an avid collector and cataloger of folk literature. He could not, however, always reconcile his feeling of duty toward his people with the strict artistic demands of a work of literature. As a consequence his literary output is uneven. Nevertheless, owing to his efforts Ukrainian literature made enormous advances in the development of genres and themes.

The desire of the realists to reach as wide an audience as possible with their positivistic message, coupled with the tsarist prohibition of Ukrainian publications, made theater important and spurred the writing of drama. The three most noted dramatists were M. *Sarytsky, M. *Kropyvnytsky, and I. *Karpenko-Kary. Sarytsky had a predilection for melodrama, and in addition to writing his own plays he adopted and improved works of others. All three mixed ethnographic romanticism with realism, especially in their comedies, but Karpenko-Kary was the first to succeed with historical drama. In his works the line between comedy and tragedy is no longer distinct, and the love intrigue does not necessarily provide the central conflict.

Toward the end of the 19th century realism in Ukrainian literature started to give way to modernism. Some writers no longer aimed for a naturalistic 'copy' of reality, and instead elected an impressionist mode. Along with that change the novelette gave way to the short story. In drama the action passed inward, to explore the psychological conflicts, moods, and experiences of the characters. Poetry abandoned its realistic orientation in favor of the symbolic; emphasis on content gave way to a fascination with form. The work of M. *Kotsiubynsky marks the transition from realism to modernism. His first stories were in the vein of Nechui-Levytsky and Myrny. Later he adopted and perfected the impressionistic manner of narration (eg, *Intermezzo*). O. *Kobylanska, a woman writer contemporary of Kotsiubynsky, was not so much an impressionist in her manner as a neoromantic. She instilled in her heroes (often women) an aloofness and an aristocracy of spirit. The neoromantic tendency in modernism prompted a rekindling of interest in folklore and resulted in the appearance of three remarkable works of literature: H. *Khotkevych's novel *Kaminna dusha* (A Soul of Stone, 1911), which in its treatment of female sexuality anticipates D.H. Lawrence; Lesia *Ukrainka's play *Lisova pisnia* (A Forest Song, 1911); and Kotsiubynsky's novelette *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors, 1913).

The master of the very short impressionistic story was V. *Stefanyk. Condensed, dramatically charged, their subtle orchestration owing much to the local dialect of Stefanyk's heroes, his stories reveal the anguish at the heart of human existence. Two other writers who joined with Stefanyk to form the Pokutia triad were M. *Cheremshyna and L. *Martovych. They used methods similar to those of Stefanyk but rarely achieved the same results. The novelist and dramatist V. *Vynnychenko was deeply interested in the psychological experiences and especially the morality of the intelligentsia. Other modernist prose writers of note were S. *Vasylchenko, A. *Teslenko, and B. *Lepky.

Lepky also wrote poetry, as did most of the other members of the modernist group represented by *Moloda Muza. The most prominent in that group of Galician modernists were P. *Karmansky, with his end-of-the-century pessimism, and V. *Pachovsky, remarkable for his formal diversity. A modernist group in Russian-ruled Ukraine, centered around the journal **Ukrains'ka khata*, produced no major poets. Outside of that group stood O. *Oles, by far the most popular lyricist of the period, the spirit of whose lyrics waxed and waned with the success and failure of the revolutions of 1905 and 1917; V. *Samiilenko, with his satiric verse; A. *Krymsky, with his exoticism; and H. *Chuprynka, memorable for his experimentation in sound. All of them contributed to the development of modernist poetry. Average poets but important to the modernist movement were M. *Vorony, the author of a modernist manifesto of 1901, and S. *Cherkasenko, who introduced elements of *symbolism into Ukrainian drama.

Although the realist Franko wrote some modernist verse (*Ziv'iale lystia* [Withered Leaves, 1896]), by far the most renowned poet of the modernist era was Lesia Ukrainka. More Romantic than modernist in style, her lyrics reflect wilful determination to conquer the disease that afflicted her body. The fighting spirit of her poems made them timely for the increasing struggle of Ukrainians for self-realization. Yet her greatest achievement was in the realm of the poetic drama. She chose universal themes and gave them her own unique treatment, as in *Kaminnyi hospodar* (The Stone Host, 1912), where she provided an early feminist treatment of the Don Juan motif.

The renaissance of the 1920s. The vernacular period came to an end with the First World War. The downfall of the Russian and Austro-Hungarian empires, the revolution, the establishment of an independent Ukraine (even if for a very short time), and, finally, the relative leniency of the Soviet regime during the period of *Ukrainization in the 1920s all led to a stupendous renaissance of literary activity. New writers appeared by the dozen. They formed literary groups and organizations (Lanka, *MARS, *Hart, *Pluh, *Nova Generatsiia, *Vaplite, *Prolitfront), published almanacs and magazines (such as the highly imaginative **Literaturnyi iarmarok*), and espoused various literary trends (symbolism, expressionism, impressionism, futurism, neoclassicism, neorealism, etc.). There was a boom in literary criticism and scholarship. New histories of literature were written. It was the most vital era in Ukrainian literary history.

The most renowned poet of the time was P. *Tychyna. An innovator in form, rhythm, and imagery, he was the embodiment of what has since his day been called a 'romanticism of vitaism' (Yu. *Lavrinenko). A predilection for canonic metrics and classical harmony united a group

of five poets commonly referred to as the *Neoclassicists. The group was centered around M. *Zerov and included M. *Rylsky, M. *Drai-Khmara, P. *Fylypovych, and Yu. *Klen. M. *Bazhan was an exponent of expressionism, and M. *Semenko propagated futurism. Other important poets of the time were V. *Blakytyn, O. *Vlyzko, Ya. *Savchenko, D. *Falkivsky, D. *Zahul, G. *Shkurupii, V. *Polishchuk, M. *Yohansen, T. *Osmachka, the prolific lyricist V. *Sosiura, and the philosophical poet Ye. *Pluzhnyk.

The 1920s were by no means a renaissance only for poetry. The prose of M. *Khvylovy, with its erratic telegraphic style, and his pamphlets, with their turbulent exhortations and rhetorical questions, were part and symptom of the prevalent spirit of national vitality. Khvylovy's pamphlets, which provoked the *Literary Discussion, and his attempt at grouping writers into organizations – Vaplite and Prolitfront – to create a new proletarian Ukrainian culture make him the most important single author of the period from a literary and cultural but also a political point of view. Ukrainian prose was enriched by the lyrically romantic works of Yu. *Yanovsky and by V. *Pidmohylny, who gave Ukrainian literature its first modern novel in the neorealistic tradition. Ukrainian drama reached its apogee in the works of M. *Kulish especially during his collaboration with L. *Kurbas and the *Berezil theater. Other prose writers of note were M. *Ivchenko, A. *Holovko, I. *Senchenko, H. *Epik, V. *Gzhytsky, A. *Liubchenko, B. *Antonenko-Davydovych, O. *Slisarenko, the lyrical impressionist H. *Kosynka, the humorist O. *Vyshnia, and the essayist and parodist K. *Burevii. All of them were soon to be repressed.

The contemporary period. The renaissance of the 1920s ended abruptly and brutally. By the 1930s the Communist party had taken full control over literature; all independent organizations were abolished, and writers were forced into the *Writers' Union of Ukraine. The great terror began, and by 1938 most of the writers had either accepted Party control or been imprisoned, killed, or driven to suicide. It is estimated that over 250 writers perished during the decade, and the shortest but most intense period of Ukrainian literary development thus ended. *Socialist realism was proclaimed the sole acceptable literary manner. Authors who survived the terror (eg, Tychyna, Rylsky, Bazhan, Yanovsky, Sosiura) were cowed into submission. They renounced their former literary works and wrote panegyrics to J. Stalin and to the Party. Other themes (eg, collectivization, five-year plans, industrialization) were decreed and enforced from above. The 1940s and 1950s in Soviet Ukrainian literature were lean years with respect to literary quality. Representative of the period were the novels of N. *Rybak, I. *Le, L. *Pervomaisky, Yu. *Smolych, P. *Panch, I. *Vilde, and M. *Stelmakh; the dramas of O. *Korniichuk, I. *Mykytenko, and I. *Kocherha; and the poetry of Tychyna, Rylsky, and A. *Malyshko. The exception was the highly individualistic V. *Svidzinsky.

Between the world wars the national struggle continued to be the dominant theme of literature in Western Ukraine and among the political émigrés in Prague. Most representative of the émigré group both in theme and style was the nationalist-romantic poetry of Ye. *Malaniuk. A fighting spirit and historical determinism mark the works of many poets of the nationalist school, such as Yu. Drahan, Yu. *Lypa, L. *Mosendz, O. *Stefanovych, O.

*Liaturynska, S. *Hordynsky, B. *Kravtsiv, and two who fell victim to the Gestapo terror in Ukraine, O. *Olzhych and O. *Teliha. Teliha managed by her extreme sensitivity to soften the often-sharp edges of nationalist poetry. Quite apart from the nationalist group stood the most unusual poet of the period, the imagist B.I. *Antonych, and the pro-communist V. *Bobytsky.

Ukrainian literature outside of Soviet Ukraine experienced an unusually intensive period of development in the displaced persons' camps in West Germany and Austria immediately after the Second World War. Thrown together from various regions of Ukraine, writers managed to replay on a small scale the activity of the 1920s. They convened congresses, organized literary activity (see *MUR), and published almanacs, journals, and books. A key role in the activity was played by the linguist, scholar, and literary critic G.Y. *Shevelov and the novelist U. *Samchuk. Variety and impetus came from a large group of authors, some of whom, such as Osmachka, Klen, I. *Bahriany, M. *Orest, and D. *Humenna, had managed to escape the purges in Soviet Ukraine. Also of note were the dramatist, poet, and publisher I. *Kostetsky; the politically ambivalent Yu. *Kosach; the poets V. *Barka, V. *Lesych, and newcomers to literature, O. *Zuievsky, Ya. *Slavutych, L. Poltava, and I. *Kachurovsky (who also wrote prose). The episode came to an end in the early 1950s as the majority of the authors died or emigrated to North America and continued their literary work there.

There had been Ukrainian literary activity in North America since the turn of the century. Many of the early works were poems, written in simple, folklike verse, expressing longing for Ukraine or for acceptance in the strange new land. A few figures stand out, among them the dramatist M. *Irchan (who returned to Soviet Ukraine), the poet M. *Mandryka, and the novelist-chronicler I. *Kiriak. With the advent of the immigrant writers after the Second World War, literary activity increased; it was especially enlivened by the appearance in the late 1950s of a group of younger authors known as the *New York Group. There was little stylistic convergence between the depoliticized strophes of G. *Tarnawsky, the sensual earthy images of B. *Boychuk, the surrealism of E. *Andiiivska, the erudite allusions of B. *Rubchak, the mythical exoticism of V. *Vovk, and the otherworldliness of P. Kylina (P. *Warren), but the members of the group were united in their attempt to create modern poetry devoid of immediate links to the tradition of nationalist poetry. Andiiivska has also contributed significantly to the development of the modern Ukrainian novel. Some of the other writers who continued their literary activity in North America were the poets Barka, Lesych, Zuievsky, Slavutych, Poltava, V. *Skorupsky, B. *Oleksandriv, Yu. *Kolomyiets, O. *Tarnavsky, and B. Kravtsiv; the satirists O. *Smotrych and B. *Nyzhankivsky (Babai); the humorists I. *Kernytsky and M. *Ponedilok; and the novelists Samchuk and O. *Izarsky. Literary essays and criticism continued to be written by Yu. Sherekh (G.Y. Shevelov), Lavrinenko, and I. *Koshelivets.

After the death of Stalin in 1953 and the 'de-Stalinization' speech by N. Khrushchev at the 20th Party Congress in February 1956, the controls over literature in the Soviet Union began to slacken. A former member of Vaplite, the film director O. *Dovzhenko initiated the 'thaw' in Ukrainian literature with the publication of his autobiographical novelette *Zacharovana Desna* (The Enchanted Desna,

1957). The process of rehabilitation of some of the authors destroyed in the 1930s began slowly. Contemporaries of the purged authors wrote their memoirs of the times (eg, Yu. Smolych and his three volumes about the era of 'restlessness' [*nespokii*], 1968, 1969, and 1972). The rediscovery of the 1920s had a profound influence on the generation that was born just before or during the Second World War and began publishing in the 1960s. The so-called **shestydesiatnyky* (the Sixtiers) succeeded in a span of 10 years in revitalizing all genres of Ukrainian literature. Among the most prominent authors were, in poetry, L. *Kostenko, I. *Drach, V. *Korotych, M. *Vinhranovsky, and V. *Symonenko; in prose, Ye. *Hutsalo, H. *Tiutiunyk, and Valerii *Shevchuk; in literary and cultural criticism, I. *Dziuba, I. *Svitlychny, and Ye. *Sverstiuk; and in drama, O. *Kolomyiets. Some authors, such as the poet D. *Pavlychko and the novelists O. *Honchar, L. Pervomaisky, R. *Ivanychuk, Yu. *Mushketyk, and P. *Zahrebelny, entered a newly creative phase. Although almost immediately new repressions occurred, in the 1970s, a second generation of writers managed to appear. Among them the most notable were the poets I. *Kalynets, V. *Stus, and V. *Holoborodko and the prosaist V. *Drozd. With the exception of Kostenko and Shevchuk, who ceased publishing for a decade, most of the authors of the 1960s and 1970s either accepted the strictures of Party control (eg, Korotych, Drach, Dziuba, and Pavlychko) or were repressed (eg, Svitlychny, Sverstiuk, Kalynets, Holoborodko). Symonenko, Tiutiunyk, and Stus died, Stus in a prison camp of the Gulag.

The changes in the USSR in the six years before its dissolution in 1991 rekindled interest in the 'white spots' – all that which had been removed from the history of Ukrainian literature. Writers who had been absent from Ukrainian literature since the 1930s have now been republished (Khvylovy, Zerov, Pidmohylny, etc), as have poems by poets repressed during L. Brezhnev's regime, such as Kalynets, M. *Vorobiov, and T. *Melnychuk. The literary scholar M. *Zhulynsky has filled in some of the missing literary biographies. A new phenomenon in the development of Ukrainian literature has been the appearance of the urban avant-garde groups Bu-Ba-Bu (V. Neborak, Yu. Andrukhovych, O. Irvanets), LuHoSad (I. Luchuk, N. Honchar, R. Sadlovsky), and Propala Hramota (S. Lybon, Yu. Pozaiak, V. Nedostup). Their poetry is marked by a desire to *épater*, and frequently resorts to parody and satire. New in the development of Ukrainian prose are the urban and demimonde environments and expanded lexical registers in the prose works of Andrukhovych and V. Yavorsky. Among other younger writers of interest are the poets V. Herasymyuk, I. Malkovych, I. Rymaruk, O. Lysheha, and O. Zabuzhko.

Ukrainian literature had a brief flowering in the 1960s in Czechoslovakia, during the Prague Spring. Most noteworthy were the psychological short stories of Ye. *Biss and V. *Datsei, the poetry of S. *Makara and S. *Hostyniak, the criticism of Yu. *Bacha, and the scholarship of O. *Zilynsky, M. *Molnar, and M. *Mushynka. Although no major figures have emerged, some Ukrainian literary activity exists in Yugoslavia, Rumania, Poland, and other countries where Ukrainians have settled (see *Canada, *Great Britain, *Brazil, *Australia, *France, *Germany, and *United States, and also *Literary criticism, *Literature studies, *Drama, *Poetry, and *Prose).

Literature in translation. Ukrainian belles lettres have been translated into many languages of the world. In addition to major Western European languages (English, French, Spanish, German, Italian), Slavic languages (Russian, Belarusian, Polish, Bulgarian, Czech, Slovak, Serbo-Croatian, Slovenian), and languages of the non-Slavic peoples of the former USSR, translations from Ukrainian literature are available in languages such as Albanian, Arabic, Bengali, Chinese, Danish, Dutch, Esperanto, Finnish, Flemish, Greek, Hebrew, Hungarian, Icelandic, Japanese, Kanarese, Korean, Mongolian, Norwegian, Punjabi, Portuguese, Rumanian, Sinhalese, Swedish, Tamil, Telugu, Turkish, Vietnamese, and Yiddish. A special edition of T. Shevchenko's poem 'Zapovit' (Kiev 1989) is a polyglot anthology in 147 languages. A polyglot edition of I. Franko's 'Kameniari' (Kiev 1983) includes 67 versions of the poem translated into 37 languages. The novelist O. Honchar is the most widely translated contemporary Ukrainian writer. By 1985 his novel *Praporonostsi* (The Standard-bearers) had 40 Russian editions, 21 editions in languages of the peoples of the USSR, and 55 editions outside of the Soviet Union. In many languages, however, Ukrainian literature is represented only by a few samples. The widest coverage is probably in Russian: a Russian edition of Shevchenko's *Kobzar* appeared as early as 1860, during the poet's lifetime. There are hundreds of books translated from Ukrainian literature into Russian, both contemporary and classic, many in multivolume editions. Systematic translations into Western European languages have been undertaken only recently, notably by the Dnipro Publishers of Kiev (translations into English, French, and Spanish of contemporary and classic Ukrainian literature, anthologies of Ukrainian poetry and prose), by the Ukrainian Academic Press of the United States (translations into English mostly of classic authors, an anthology of Ukrainian prose), by Bayda Books of Australia (mostly contemporary authors, translated into English), and, as part of systematic efforts, by individual translators, such as V. Selianska (*Vovk) (translations into Portuguese: anthologies of poetry and prose, works of classic authors) and A.H. *Horbach (translations into German: anthologies of 20th-century Ukrainian prose, popular fiction, and works of dissident poets of Ukraine).

Translations into English. Ukrainian dumas attracted the attention of literary scholars in England and America as early as the middle of the 19th century. Scholarly discussions and/or translations of dumas appeared in *Foreign Quarterly Review* (1840–1), *American Eclectic* (1841), Talvj's *Historical View of the Languages and Literature of the Slavic Nations* (1850), and *Athenaeum* (1873). The first note on Shevchenko, a paraphrase of a few lines from his poem 'The Caucasus,' was, as far as can be determined, in the *Alaska Herald* of 1 March 1868. The earliest-known account of Shevchenko's life and work was J. Austin Stevens's English version of E. Durand's French article published in the *Galaxy* (New York, October 1876). Among the pioneer translators of Shevchenko's poetry were W.R. Morfill, F.P. Marchant, and E.L. Voynich. The first book of Shevchenko's poetry (*Six Lyrics from the Ruthenian of Taras Shevchenko* in E.L. Voynich's translation) and the first separately published essay (*T. Shevchenko, the National Poet of Oukraina* by L.P. Rastorgoueff) were both published in London

in 1911. The earliest-known books of Ukrainian prose are M. Vovchok's *Maroussia, a Maid of Ukraine* (New York, 1880s and 1890), which was translated indirectly from the French version coauthored by P.-J. Stahl, and R.N. Bain's collection *Cossack Fairy Tales and Folk Tales* (London 1894), which may well be the first book of translations directly from the Ukrainian language. A collection of Ukrainian folk songs and selected poems by Shevchenko, S. Rudansky, H. Vorobkevych, and Yu. Fedkovych in the English version of F.R. Livesay (New York 1916) was probably the first English anthology of Ukrainian poetry.

Translations from Ukrainian literature and writings about Ukrainian literature had a dramatic quantitative increase in the 1960s, 1970s, and, especially, 1980s. Although many Ukrainian writers remain unrepresented or underrepresented in English, enough Ukrainian belles lettres are available to make university-level courses based exclusively on primary sources in translation possible. The quality of translation is on the rise, and literary criticism occasionally reaches the level of profound analytical study.

Anthologies. There are several anthologies of Ukrainian poetry. The most important are *The Ukrainian Poets, 1189–1962* (Toronto 1963; trans C.H. Andrusyshen and W. Kirkconnell), *Anthology of Soviet Ukrainian Poetry* (Kiev 1982; comp Z. Honcharuk), *Poetry of Soviet Ukraine's New World* (1986), and *Four Ukrainian Poets: Drach, Korotych, Kostenko, Symonenko* (1969; ed G.S.N. Luckyj, trans M. Bohachevsky-Chomiak and D.H. Struk). Ukrainian fiction is represented by the following anthologies: *Their Land* (1964; ed M. Luchkovich), *Stories of the Soviet Ukraine* (1970), *Modern Ukrainian Short Stories* (1973; ed G.S.N. Luckyj), *Valor: Stories by Soviet Ukrainian Writers about the Great Patriotic War of 1941–1945* (1975), *Written in the Book of Life: Works by 19th- and 20th-Century Ukrainian Writers* (1982; trans M. Skrypnyk), *Soviet Ukrainian Short Stories* (1983 and bk 2, 1985), and *Before the Storm: Soviet Ukrainian Fiction of the 1920s* (1986; ed G.S.N. Luckyj, trans Yu. Tkach). Anthologies of Ukrainian folklore include *Ukrainian Folk Tales* (1964; trans M.H. Bloch), *Ukrainian Dumy* (1979; trans G. Tarnawsky and P. Kilina), *Down Singing Centuries* (1981; trans F.R. Livesay), *Ukrainian Folk Tales* (1985; trans I. Zheleznova), and *How Ivan Went to See the Sun* (1989; trans A. Bilenko). A general representative anthology of émigré writers is conspicuous by its absence. There are, however, anthologies by country – of Ukrainian writers of Canada, *Yarmarok* (1987; eds J. Balan and Yu. Klynovy), which includes both poetry and prose; and of Australia, the collection of prose *On the Fence* (1985; ed D. Chub, trans Yu. Tkach) and *Australia's Ukrainian Poets* (1973; trans R.H. Morrison). Literary history and criticism are represented by such important collections (where some of the material has been translated from Ukrainian) as *Taras Ševčenko, 1814–1861* (1962; eds V. Mijakovskij and G.Y. Shevelov), *Shevchenko and the Critics, 1861–1980* (Toronto 1980; ed G.S.N. Luckyj), and *Studies in Ukrainian Literature* (New York 1986; ed B. Rubchak).

Individual writers. Among translations of Ukrainian classics Shevchenko is most fully represented. *The Poetical Works of Taras Shevchenko* (1964; trans C.H. Andrusyshen and W. Kirkconnell) contains all the poems Shevchenko ever wrote in Ukrainian. Outstanding among other Shevchenko collections are *Taras Shevchenko, the Poet of Ukraine: Selected Poems* (1945; trans C.A. Manning),

Shevchenko's Thoughts and Lyrics (1961), *Song Out of Darkness* (1961; trans V. Rich), *Selected Works: Poetry and Prose with Reproductions of Paintings by T. Shevchenko* (1964 and 1979; ed J. Weir), *Selected Poetry* (1977 and 1989), and *Selections, Poetry, Prose* (1988; trans J. Weir). Among the critical and biographical studies of Shevchenko in addition to the aforementioned mention must be made of *Taras Shevchenko: A Life* by P. Zaitsev (1988; trans and ed G.S.N. Luckyj), and *The Exile*, a biographical novel by Z. Tulub (1988; trans A. Bilenko).

Books of Franko's poetry and prose include *Ivan Franko, the Poet of Western Ukraine: Selected Poems* (1948 and 1968; trans P. Cundy), *Poems and Stories* (1956; trans J. Weir), *Boa Constrictor and Other Stories* (1957; trans F. Solasko), *Stories* (1972), *Moses and Other Poems* (1973; trans V. Rich), *Short Stories* (1977), *Fox Mykyta* (1978; trans B. Melnyk), *Ivan Vyshensky* (1983; trans R.O. Tatchyn), *When the Animals Could Talk* (1984 and 1987; trans M. Skrypnyk), *Selections: Poems and Stories* (1986; trans J. Weir), *Moses and Other Poems* (1987; trans A. Hnidj), and *Zakhar Berkut* (1987; M. Skrypnyk). Lesia Ukrainka is represented by *Spirit of Flame* (1950; trans P. Cundy), *Lesya Ukrainka: Life and Work* (1968; ed C. Bida, trans V. Rich), *In the Catacombs* (1971; trans J. Weir), *Hope: Selected Poetry* (1975; trans G. Evans), and *Forest Song* (1985; trans G. Evans). M. Vovchok, in addition to the pioneering translation of *Maroussia, Maid of Ukraine*, has two recent books in English, *After Finishing School* (1983; trans O. Kovalenko) and *Ukrainian Folk Stories* (1983; trans N. Pedan-Popil). There exists a translation of P. Kulish's novel *The Black Council* (1973; trans G.S.N. and M. Luckyj). H. Kvitka-Osnovianenko's novel *Marusia* (trans F.R. Livesay) was published in New York in 1940. Translations of M. Kotsiubynsky appear as *Chrysalis and Other Stories* (1958; trans J. Guralsky), *The Birthday Present and Other Stories* (1973), *Fata Morgana* (1976; trans A. Bernhard), *Fata Morgana and Other Stories* (1980; var trans), and *Shadows of Forgotten Ancestors* (1981; trans M. Carynnyk). The short stories of V. Stefanyk are available in at least three collections: *The Stone Cross* (1971; trans J. Wiznuk and C.H. Andrusyshen), *A Study of Vasyl Stefanyk: The Pain at the Heart of Existence* (1973; trans and commentary by D.H. Struk), and *Maple Leaves and Other Stories* (1988; trans M. Skrypnyk). I. Nechui-Levytsky's *Mikola Dzerya: A Long Story* was published in Kiev in 1985 (trans O. Kovalenko).

Translations of prose works include S. Vasylychenko's *Stories* (1984; trans O. Kovalenko); A. Teslenko's *Stories* (1981; var trans); M. Khvylovy's *Stories from the Ukraine* (1960; trans G.S.N. Luckyj); V. Pidmohylny's *A Little Touch of Drama* (1972; trans G.S.N. and M. Luckyj); A. Holovko's *The Weeds* (1976; trans A. Bilenko) and *The Red Kerchief* (1979; trans A. Bilenko); B. Antonenko-Davydovych's *Behind the Curtain* (1980; trans Yu. Tkach) and *Duel* (1986; trans Yu. Tkach); V. Gzhytsky's *Night and Day* (1988; trans I. Press); O. Vyshnia's *Hard Times* (1981; trans Yu. Tkach); A. Dovzhenko's *The Enchanted Desna* (1982; trans A. Bilenko); Yu. Yanovsky's *The Horsemen* (1989; trans S. Sinhayivsky); M. Stelmakh's *Let the Blood of Man Not Flow* (1962; trans E. Manning and O. Shartse); O. Honchar's *The Standard-bearers* (1948; trans N. Jochel), *Short Stories* (1950s; trans V. Shneerson), *The Cyclone* (1972; trans A. Ingman), *The Shore of Love* (1980; trans D. Sinclair-Loutit), *Man and Arms* (1985; trans A. Bilenko), and *The Cathedral* (1989; trans Yu. Tkach and L. Rudnytzky); P. Zahrebelny's *From*

the *Point of View of Eternity* (1978; trans C. English); Ye. Hutsalo's *A Prevision of Happiness and Other Stories* (1974; trans E. Manning); O. Berdnyk's *Apostle of Immortality* (1984; trans Yu. Tkach); Valerii Shevchuk's *The Meek Shall Inherit* (1989; trans V. Kholmogorova); Vasyl Shevchuk's *Blood Brothers* (1980; trans Yu. Tkach); A. Dimarov's *Across the Bridge* (1977; trans Yu. Tkach); V. Malyk's *The Cossack Ambassador* (1985; trans S. Sinhaivsky); D. Mishchenko's *The Siverianians* (1986; trans O. Olexiv); Yu. Mushketyk's *Cruel Mercy* (1986; trans O. Panasyev); V. Nestaiko's *Two Toreadors from Vasukovka Village* (1983; trans F. Glagoleva) and *In the Land of the Sunbeam Bunnies* (1986; trans A. Bilenko); M. Pryhara's *The Cossack Holota* (1985; trans M. Skrypnyk); V. Blyznets's *In the Land of the Living Lights* (1987; trans V. Ruzhitsky); R. Sambuk's *The Jeweler from Capuchins Street* (1982; trans A. Bilenko); M. Vinhranovsky's *Summer Evening* (1987; trans A. Bilenko); H. Tiutiunnyk's *Cool Mint* (1986; trans A. Bilenko); V. Zemliak's *The Swan Flock* (1982) and *Green Mills* (1984), both trans by A. Bilenko; V. Vladko's *Descendants of the Scythians* (1986; trans O. Panasyev); B. Kharchuk's *A Measure of Life and a Measure of Death* (1989; trans O. Panasyev). Translations of émigré writers include V. Vynnychenko's *Selected Short Stories* (1991; trans S. Prokopov); I. Kiriak's *Sons of the Soil* (1959 and 1983; trans M. Luchkovich); I. Bahriany's *The Hunters and the Hunted* (1954 and 1956); T. Osmachka's *Red Assassins* (1959); I. Kachurovsky's *Because Deserters Are Immortal* (1979; trans Yu. Tkach); V. Sokil's *And Then There Was Glasnost* (1990; trans K. Windle); M. Ponedilok's *Funny Tears* (1982; trans Yu. Tkach); I. Bodnarchuk's *The Generations Will Get Together* (1986; trans Yu. Tkach); and H. Meriam-Luzhnytsky's *Twelve Letters from F.A. Sheptytsky to His Mother* (1983; trans R.O. Tatchyn).

Among the poetry of individual poets are P. Tychyna's *Selected Poetry* (1987; var trans); M. Rylsky's *Selected Poetry* (1980; trans G. Evans); B.I. Antoniych's *Square of Angels* (1977; var trans); I. Drach's *Orchard Lamps* (1978; ed S. Kunitz; 2nd edn 1989); V. Stus's *Selected Poems* (1987; trans J. Lassowsky); I. Kalynets's *Crowning the Scarecrow* (1990; trans M. Carynnyk); L. Kostenko's *Selected Poetry: Wanderings of the Heart* (1990; trans M. Naydan); V. Holoborodko's *Icarus with Butterfly Wings* (1991; trans M. Stefaniuk); O. Teliha's *Boundaries of Flame* (1977; trans O. Prokopiv); V. Symonenko's *Granite Obelisks* (1976; trans A.M. Chirovsky); and, of the émigré poets, Ya. Slavutych's *The Conquerors of the Prairies* (1974 and 1984; var trans) and *Oasis* (1959; trans M. Manly); G. Tarnawsky's *This Is How I Get Well* (1978; trans by author); V. Vovk's *Meanders* (1979; trans M. Lukianowicz) and *Mandala* (1980; trans O. Gomes); and B. Boychuk's *Memories of Love* (1989; trans M. Rudman and D. Ignatow).

Drama is represented in English by O. Korniiuchuk (*Wings*, 1956; trans J. Gibbons), M. Kulish (*Sonata Pathétique*, 1975; trans G.S.N. and M. Luckyj), and I. Kocherha (*Yaroslav the Wise*, 1982; trans W. Mary).

Notable among memoirs, diaries, and biographical works are O. Dovzhenko's *The Poet as a Filmmaker* (Cambridge, Mass 1973; trans and commentary by M. Carynnyk), M. Osadchy's *Cataract* (1976; trans M. Carynnyk), V. Drozd's *The Road to Mother* (1987; trans V. Castelli and S. Vladkov), and O. Asher's *Letters from the Gulag: The Life, Letters, and Poetry of Michael Dray-Khmara* (1983).

Outstanding among books of literary history and criticism are D. Chyzhevsky's *A History of Ukrainian Literature*

(1975), Ye. Sverstiuk's *Clandestine Essays* (1976; ed and trans G.S.N. Luckyj), M. Khvylovy's *The Cultural Renaissance in Ukraine* (1986; ed and trans M. Shkandrij), and Ye. Shabliovsky's *Ukrainian Literature through the Ages* (1970).

Translations of Ukrainian belles lettres in the periodical press have appeared most frequently in the pages of such journals as *Ukraine*, *Ukrainian Canadian*, *Soviet Literature*, *Ukrainian Review* (London), *Journal of Ukrainian Studies* (Edmonton), *Forum* (Scranton), and *Smoloskyp* (Ellicott City, Maryland). Articles of literary criticism are published in many English-language journals devoted to Slavic studies, most notably in *Harvard Ukrainian Studies*, *Slavonic and East European Review*, *Slavic and East European Journal*, *Canadian Slavonic Papers*, *Annals of the Ukrainian Academy of Arts and Sciences in the US*, and *Journal of Ukrainian Studies*.

M. Tarnawsky (Tarnavsky)

Literature studies. Literary scholarship in Ukraine originated in the baroque period. M. Smotrytsky was the first to transcend the bounds of grammar proper, in the scholarly treatment of prosody in his Slavonic grammar (1619). At the Kievan Mohyla College (later Academy) students received thorough instruction in the study of styles, as is evident from the theorizing elements in their panegyrics to P. Mohyla that appeared in books published by the Kievan Cave Monastery Press, among them *Imnolohiia ...* (Hymnology ..., 1630), *Eufonia veselobrmiachaia* (Joyful Ringing Euphony, 1633), and, particularly, *Evkharistirion ...* (Eucharisterion, 1632). In 1705 T. Prokopovych taught a course on the theory of literature at the academy; in his lectures (pub 1786) he examined the various literary genres in a comprehensive and professional manner. With the exodus of Ukrainian scholars into the Russian imperial service in Moscow and then St Petersburg, the study of literature in Ukraine declined.

From the 19th century to 1917. Literature studies in Ukraine were revived in entirely different circumstances in the first half of the 19th century. Inspired by the ideas of European romanticism, the scholars M. Maksymovych, I. Sreznevsky, O. Bodiansky, M. Kostomarov, Ya. Holovatsky, and I. Vahylevych published surveys of Ukrainian literature in almanacs and periodicals. In Western Ukraine the first survey of the kind appeared in I. Mohyl-nytsky's *Vidomost' o russkom iazytsi* (Information about the Ruthenian Language, 1829). Later P. Kulish's survey articles in the journals *Russkii vestnik* (1857, no. 2) and *Osnova* (1861, no. 1) and in his almanac *Khata* (1860) were particularly important for their time.

In the late 1860s the first cultural-historical studies of the development of Ukrainian literature from the perspective of evolutionary historicism were written; notable examples are the surveys of Ukrainian literature by the Russians I. Pryzhov (in his book on Little Russia, 1869) and A. *Pypin and V. Spasovich (in their history of Slavic literatures, 2nd edn, vol 1, 1879). Of particular note are M. Drahomanov's series of articles on Russian and Ukrainian literature (*Pravda* [Lviv], 1873, nos 4–6, 16–21; 1874, nos 1–9) and his study of T. Shevchenko, the Ukrainophiles, and socialism (*Hromada* [Geneva], no. 4 [1879]). Unlike his Romantic precursors, Drahomanov examined Ukrainian literature from the perspective of realism and democracy.

A valuable bibliographic guide to Ukrainian writers was M. (N.) *Petrov's Russian-language history of 19th-century Ukrainian literature (1884). It had a major weakness, however: Petrov claimed that the development of Ukrainian literature was dependent on its Russian counterpart. In his 1888 critique of Petrov, M. *Dashkevych argued that Ukrainian literature evolved independently, and his response, together with Petrov's work, laid the foundation for further literary studies. Around the same time O. *Ohonovsky's history of Ruthenian literature (4 pts, 1887–94) was published in Galicia. Ohonovsky's thesis that the writing of Kievan Rus' was the initial stage of Ukrainian literature elicited bitter criticism from Pypin and other Russian historians. The responses by Ohonovsky and his defenders M. Komarov and I. Nechui-Levytsky (the latter writer's *Ukrainstvo na literaturnykh pozvakh z Moskovshchynoiu* [The Ukrainian Entity in Literary Challenges with Russia, 1891]) sparked a debate which was reminiscent of an earlier one between Maksymovych and the Russian historian M. Pogodin.

In the 19th century many literary works and chronicles of the medieval and Cossack periods were published by Russian scholarly societies, by the Shevchenko Scientific Society in Lviv, and in the documentary collections *Akty, otnosiashchiesia k istorii Iuzhnoi i Zapadnoi Rossii* (Documents Pertaining to the History of Southern and Western Russia) and *Arkhiv Iugo-Zapadnoi Rossii* (The Archive of Southwestern Russia). Their publication facilitated in-depth studies of medieval and early modern Ukrainian literature by M. Sumtsov, M. *Markovsky, A. Krymsky, M. (N.) Petrov, P. Zhytetsky, and other scholars from the 1880s on. A particularly important role in the furthering of such literary studies was played by I. *Franko in Galicia and by V. *Peretts in Russian-ruled Ukraine; the pre-eminent representative of the so-called philological school, Peretts trained such scholars as L. Biletsky, S. Maslov, I. *Ohienko, O. Nazarevsky, and V. Adrianova-Peretts. Many studies appeared in the journals *Zapysky NTSh* and *Literaturno-naukovyi vistnyk* in Lviv and *Kievskaiia starina* and *Ukraina* in Kiev.

In the late 19th and early 20th centuries much attention was devoted to modern Ukrainian literature, particularly to Shevchenko studies, by Franko, V. *Shchurat, K. *Studynsky, O. *Kolessa, O. *Konysky, Yu. *Romanchuk, V. *Horlenko, and other scholars. At that time a utilitarian, 'neopopulist' approach to literary studies became dominant. Its primary exponent was S. *Yefremov; B. Hrinchenko, I. Steshenko, and O. *Hrushevsky were other prominent neopopulists. In contradistinction to the neopopulists a small group of scholars (M. *Yevshan, V. *Doroshenko, and others) advocated an esthetic approach to the study of literature.

Soviet Ukraine

The interwar years. Literature studies entered an entirely new phase in the early Soviet period. Until the onset of the Stalinist terror in the early 1930s, the Historical-Philological Division of the All-Ukrainian Academy of Sciences (VUAN) published many articles in the field of literary theory in its periodicals and collections, authoritative annotated texts of old Ukrainian literature, and pioneering monographs by such scholars as Peretts (on the medieval epic *Slovo o polku Ihorevi* [The Tale of Ihor's Campaign, 1926]), D. Abramovych (on the Kievan Cave Patericon, 1931), and V. Riezanov (5 vols on Ukrainian drama, 1926–9). M. Hrushevsky published a major history of old Ukrainian literature (5 vols, 1923, 1925–7) using a cultural-historical approach that was similar to that of the neopopulists. M. *Zerov, P. *Fylypovych, M. *Drai-Khmara, V. *Petrov, M. *Mohyliansky, O. *Doroshkevych, O. *Biletsky, Ya. *Aizenshtok, A. *Shamrai, M. *Novytsky, Markovsky, A. *Muzychka, A. *Leites, M. *Plevako, P. Rulin, T. Slabchenko, and O. *Bahrii made pioneering contributions to the study of modern Ukrainian literature; their work was published separately or in numerous VUAN serials and collections of articles. Shevchenko studies in particular flourished. Scholars edited, provided scholarly introductions to, and annotated the collected or selected works of Shevchenko and most other prominent Ukrainian writers that were published by the State Publishing House of Ukraine and several co-operative publishers (Rukh, Knyhospilka, Slovo, and others). Formalistic research thrived, and new textbooks on the history of Ukrainian literature and theoretical studies (by B. *Yakubsky, D. *Zahul, B. *Navrotsky, H. *Maifet, and others) appeared. Scholars also published their research and criticism in several literary journals, particularly *Chervoniy shliakh*, *Zhyttia i revoliutsiia*, and *Krytyka*.

At the same time, however, literature studies were hampered by political interference in scholarship. Marxist critics representing the Party line (V. *Koriak, A. Richytsky, V. Yurynets, I. *Lakyza, S. *Shchupak, Ye. *Hirchak, A. *Khvyliia, B. Kovalenko, H. Ovcharov, and, later, I. Stebun, S. *Shakhovskiy, and others) falsified the history of Ukrainian literature, and with the Stalinist assault on bourgeois nationalism and the resulting 'terror and physical destruction of almost an entire generation of Ukrainian intellectuals in the early 1930s, literature studies virtually disappeared. Restrictions on what the few surviving scholars could research and write effectively negated the achievements of the 1920s.

The postwar years. There was no noticeable change until the post-Stalin 'thaw' that began in the mid-1950s. At that time the ANURSR (now ANU) *Institute of Literature became the central, co-ordinating institution of literature studies in Ukraine, and a special commission chaired by the institute's director was created to guide and determine the work of literary scholars at all postsecondary institutions in Ukraine.

Since the mid-1950s the development of literature studies in Ukraine has been uneven. Truly scholarly works in literary theory, particularly in esthetics, have been sorely lacking. With the exception of I. Ivano's *Ocherk razvitiia esteticheskoi mysli Ukrainy* (Outline of the Development of Ukraine's Esthetic Thought, 1981), which, significantly, was published in Russian and in Moscow, most of what has been written in the field of literary theory has been

dogmatic and propagandistic. Soviet Ukrainian theorists were not allowed to, or did not, deal with Western theories in their research. Only a few works devoted to general or concrete theoretical subjects have been published; among them are P. Volynsky's book on the foundations of literary theory (1962), V. Kovalevsky's book on rhythmic devices in Ukrainian literary verse (1960), and V. Lesyn and O. Pulynets's brief dictionary of literary terms (1961).

Research on 11th- to 13th-century Ukrainian literature has generally been neglected in the postwar period. It has been discussed in Ukrainian in journal articles, in a chrestomathy of old Ukrainian literature (1948; 3rd edn 1967) edited by O. Biletsky, in a few other reference books on Ukrainian literature, and in M. Hrytsai, V. Mykytas, and F. Sholom's university textbook on old Ukrainian literature (1978, the first of its kind). Usually, however, it has been approached within the parameters of Russian literature and written about in Russian. *Slovo o polku Ihorevi* is a case in point. Three editions of various renderings of it into modern Ukrainian were prepared, by Maslov (1953), M. *Gudzii (1955), and L. *Makhnovets (1967), but most scholarly studies of it, even by the Ukrainians Gudzii, L. Bulakhovsky, M. Sharleman, P. Popov, and M. Hetmanets, have been published in Russian in Moscow.

Similarly, most of the postwar research on 14th- to 18th-century Ukrainian literature was, until the late 1950s, conducted in Moscow. Soviet editions of the works of I. Vyshensky (1955) and Prokopovych (1961), for example, were first published in Russian in Moscow. A volume of Peretts's research (1962) also appeared there in Russian, even though it dealt with 16th- and 17th-century Ukrainian literature. In the early 1960s a few important publications concerning the period appeared in Ukraine: a collection of articles about the 17th- and 18th-century Ukrainian translated narrative (1960), edited by B. Derkach, with an appendix of valuable original texts; a collection of articles about Ukrainian intermedes (1960), edited by Makhnovets; H. *Syvokin's book on old Ukrainian poetics (1960); an annotated edition of H. Skovoroda's works (2 vols, 1961); Ya. Dzyra's pioneering article on S. Velychko's Cossack chronicle and its influence on Shevchenko in the journal *Vitchyzna* (1962, no. 5); and Makhnovets's book on satire and humor in 16th- to 18th-century Ukrainian prose (1964).

A resurgence of scholarship on the literature of the period began in the early 1970s, and a few other important works were published: annotated editions of the works of Klymentii, Zynovii's son (1971), I. Velychkovsky (1972), and Skovoroda (2 vols, 1973); a modern Ukrainian edition of M. Dovhalevsky's *Poetyka* (Poetics, 1973), translated and annotated by V. Masliuk; Makhnovets's biography of Skovoroda (1972); and H. Sydorenko's book on Ukrainian versification (1972). After the 1972-3 KGB crackdown on Ukrainian dissidents and 'nationalist' intellectuals in general, nothing of lasting value was published in Ukraine until the late 1970s. Since that time, particularly since the reforms of 1985, there has been a perceptible liberalization in scholarship, and important new books have appeared: an annotated anthology of late 16th- and early 17th-century Ukrainian poetry (1978), edited by V. Kolosova and V. Krekoten; a modern Ukrainian edition of Prokopovych's philosophical works (3 vols, 1979-81); a collection of articles on the literary legacy of Kievan Rus' and 16th- to 18th-century Ukrainian literature (1981), edited by O. *Myshanych; P. Yaremenko's books on Vyshensky (1982)

and Smotrytsky (1986); an annotated anthology of 18th-century Ukrainian literature (1983), edited by Myshanych; a book on A. Radyvlovsky's stories (1983), edited by Krekoten; Masliuk's book on poetics and rhetoric in Latin in the 17th and first half of the 18th century and their role in the development of literary theory in Ukraine (1983); O. Apanovych's book (in Russian) on the handwritten secular book in 18th-century Ukraine (1983); a collection of articles on 16th- to 18th-century Ukrainian literature and other Slavic literatures (1984), edited by Myshanych; M. Sulyma's study of late 16th- and early 17th-century Ukrainian versification (1985); an annotated edition of I. Galiatovskyy's *Kliuch razuminiia* (Key of Understanding, 1985); annotated anthologies of 16th- and 17th-century Ukrainian poetry (1987, 1988), edited by V. Yaremenko; and a collection of scholarly articles on Ukrainian literature of the baroque period (1987), edited by Myshanych.

Most postwar Soviet scholars have focused their attention on 19th- and 20th-century literature. Many works (by N. Krutikova and others) have dealt with the subject of Ukrainian-Russian literary ties and have been of a propagandistic nature, emphasizing the salutary influence of Russian literature and writers. There have, however, been works – by M. Bernshtein, Volynsky, O. Babyshkin, N. Kalenychenko, M. Yatsenko, P. Fedchenko, and others – which, despite their political bias, have provided abundant factual material from previously banned sources (by Kulish, Drahomanov, and others) on individual periods and problems and on such topics as journalism and literary criticism. Numerous articles and monographs on individual writers, notably on Shevchenko, Franko, Lesia Ukrainka, M. Kotsiubynsky, V. Stefanyk, and O. Kobylanska, have appeared, as have biographies, analyses of particular aspects of the works, and even collections of primary materials and memoirs of most luminaries of 19th- and early 20th-century Ukrainian literature. Until the late 1980s, analyses were usually politically biased, however, and in certain cases authors even bowdlerized or falsified texts to try to show the love of certain Ukrainian writers for things Russian. Some of the leading postwar specialists on pre-Soviet modern Ukrainian literature have been, besides those already mentioned, I. Bass, O. Biletsky, L. Bolshakov, V. Borodin, D. Chaly, O. Dei, Derkach, V. Herasymenko, O. Honchar, Hrytsai, M. Hrytsiuta, Yu. *Ivakin, Kalenychenko, A. Kaspruk, L. Khinkulov, Yu. Kobyletsky, P. Kolesnyk, Ye. *Kyryliuk, O. Kyselov, Lesyn, M. Levchenko, Z. Moroz, Mykytas, O. Honchar, I. Pilhuk, F. Pohrebennyk, Popov, P. Prykhodko, Ye. *Shabliovsky, S. Shakhovsky, V. Shubravsky, Stebun, L. Stetsenko, Sydorenko, M. Syvachenko, H. Verves, Volynsky, M. *Vozniak, O. Zasenka, and S. Zubkov.

In post-Stalinist scholarship on Soviet literature, in accordance with the Party line, most writers who had been destroyed in the terror of the 1930s were posthumously rehabilitated by way of selective, limited republication of their works (the exception being I. Mykytenko, who has been widely studied and republished). Their biographies, however, have been presented in a distorted manner to emphasize their Soviet patriotism, and any discussion of the reason for their untimely deaths was deliberately avoided until the reforms of 1980s. Until the late 1980s, authors of monographs and articles about the writers of the 1920s generally distorted and even denigrated their pre-socialist-realist writings (eg, L. *Novychenko's 1959 book

on P. Tychyna's early poetry and S. *Kryzhanivsky's 1960 book on M. Rylsky) and were not allowed to discuss, except in passing and in a biased manner, the lives and works of various important literary figures (eg, M. Khvylovy, V. Vynnychenko, and Yefremov) who were deemed anti-Soviet. The foremost postwar specialists on Soviet Ukrainian literature have been Ye. Adelheim, Babushkin, O. Diachenko, V. *Donchyk, I. Duz, I. *Dzeverin, V. Fashchenko, K. Frolova, Z. Holubieva, A. Ishchuk, Kobyletsky, L. Kovalenko, P. Kononenko, B. Korsunska, N. Kostenko, Kryzhanivsky, N. *Kuziakina, O. Kylymnyk, Y. Kyselov, M. Nainenko, Novychenko, M. Ostryk, S. Plachynda, V. Radchenko, M. Rodko, I. Semenjuk, Shabliovsky, Shakhovskiy, D. Shlapak, Ye. Starynkevych, Sydorenko, M. Syrotiuk, Syvokin, A. Trostianetsky, A. Trypilsky, D. Vakulenko, and M. *Zhulynsky.

Advances in literature studies have nonetheless occurred in the post-Stalinist period. Works of many, though not all, writers banned under Stalin from the scholarly purview have been included in various books, such as Rylsky and M. Nahnybida's anthology of Ukrainian poetry (4 vols, 1957) and an anthology of the Ukrainian short story (1960) edited by O. Biletsky et al. Studies of genres, particularly in pre-Soviet literature, have been freely developed (eg, H. Nudha's books on parody in Ukrainian literature [1961], the Ukrainian ballad [1970], and the Ukrainian poetic epic and dumas [1971]). A few collections of materials for the study of Ukrainian literature (eg, a study edited by O. Biletsky [5 vols, 1959–63]), valuable works in literary bibliography (by L. Holdenberh, M. Moroz, I. Boiko, and others), and Dei's dictionary of Ukrainian pseudonyms and cryptonyms (1969) have appeared. Hundreds of monographs, textbooks, literary biographies and 'portraits,' chrestomathies, and collections of articles, documents, and memoirs have been issued, and scholars have had the opportunity to publish in many periodicals, including *Radians'ke literaturoznavstvo* (now *Slovo i chas*), *Ukrains'ke literaturoznavstvo*, *Ukrains'ka mova i literatura v shkoli*, *Inozemna filolohiia*, *Problemy sloviانوznavstva*, and *Slov'ians'ke literaturoznavstvo i fol'klorystyka*. The study of classical literature has been fostered by such scholars as O. Biletsky, M. Bilyk, Y. Kobiv, M. Kuzma, Masliuk, Yu. Mushak, F. Lutska, E. Kudrytsky, Yu. Sak, and Y. Bahlai; and Shamrai, D. Zatonsky, T. Yakymovych, Verves, M. Sokoliansky, Yu. Pokalchuk, V. Shevchuk, T. Denisova, D. Nalyvaiko, I. Zhuravska, and O. Pakhlovska, and other scholars have written monographs on European, American, and other foreign literature.

Until the late 1980s, however, prominent scholars who survived Stalinism, including O. Biletsky, the 'dean' of postwar Soviet Ukrainian literary scholarship, have not had many of their earlier, superior writings republished in representative editions of their works. Formalist and other 'esthetic' approaches were viewed as being incompatible with the obligatory Marxist-Leninist method. All manuscripts were subject to several levels of scrutiny – by the self-censoring authors themselves, the supervising editor of a publication, and the editorial board – and then still had to be sanctioned by a state censor. Consequently, all histories of Ukrainian literature, such as those published in two vols in 1954–7 and 1987–8 and in eight vols (nine books) in 1967–71, were written by 'collectives' of authors; the orthodox purity of all the individual contributions was thus safeguarded.

Western Ukraine and abroad, 1918–39. Under interwar Polish rule Lviv was the main center of literature studies in Western Ukraine. Ukrainian scholars were barred from Lviv University by the Polish authorities, and survived by teaching in gymnasiums or working for Ukrainian community organizations. They could, however, publish their works in Galicia, without having to endure the political constraints placed on their Soviet colleagues, in the serials of the *Shevchenko Scientific Society (NTSh), in *Literaturno-naukovyi vistryk*, and in other periodicals. Older scholars, such as I. Bryk, Doroshenko, Ya. *Hordynsky, D. Lukianovych, Shchurat, Studynsky, I. *Sviatsitsky, and Vozniak, remained productive, and important contributions were also made by their younger colleagues in Lviv, notably M. *Hnatyshak, V. *Lev, L. *Lutsiv, H. *Luzhnytsky, Ye. *Pelensky, V. *Radzykevych, M. *Rudnytsky, and M. *Tershakovets.

In the 1920s and 1930s most scholars who fled from Soviet rule found refuge in Czechoslovakia, Poland, Austria, Germany, and France. Together with Galician and Bukovynian expatriates also living there they founded many new scholarly institutions, such as the Ukrainian Free University, the Ukrainian Higher Pedagogical Institute, the Ukrainian Historical-Philological Society in Prague, and the Ukrainian Scientific Institute in both Berlin and Warsaw, all of which maintained close ties with the NTSh in Lviv. Valuable contributions to literature studies were published in the serials and collections of those institutions in Western Ukrainian, Czech, Polish, and German periodicals and in individual books by D. Antonovych, L. *Biletsky, P. *Bohatsky, K. Chekhovych, D. *Chyzhevsky, D. Doroshenko, O. Kolessa, V. *Simovych, and S. *Smal-Stotsky in Prague, V. Birchak in Uzhhorod, Ye. Perfetsky in Bratislava, B. *Lepky in Cracow, I. Ohienko and P. *Zaitsev in Warsaw, O. *Hrytsai in Vienna, and E. *Borschak in Paris. Several Czech scholars, notably V. Charvát, A. Hartl, J. Horák, J. Máchal, and F. Tichý, also published works about Ukrainian literature.

Postwar scholarship outside Ukraine

Western Europe. After the Second World War many scholars sought refuge from Soviet rule and occupation as displaced persons in the Allied occupation zones in Germany. The Shevchenko Scientific Society and Ukrainian Free University were re-established in Munich, and a new body, the Ukrainian Free Academy of Sciences (UVAN), was created in Augsburg in 1945. By the late 1940s most refugees had resettled overseas. Emigré literary scholars who have lived in postwar West Germany in the period after 1950 and have made important contributions to the study of Ukrainian literature are Yu. *Blokhyh, Chyzhevsky, V. *Derzhavyn, A.H. Horbach, I. *Kachurovsky (since 1969), I. *Koshelivets, and I. *Kostetsky. Another, V. Petrov, returned to Ukraine in 1949, and another, M. *Hlobenko, moved to France in 1951. Only one prominent emigré literary scholar, V. *Swoboda, has lived and published in Great Britain. In France contributions to literature studies have been made more recently by M. Scherrer, E. Kruba, and L. *Pliushch.

Canada. G.S.N. *Luckyj, who became chairman of the Slavic studies department at the University of Toronto in 1954, has played a leading role in the advancement of Ukrainian literature studies at Canadian and American universities through his pioneering English-language books, translations, and articles. Two prominent interwar scholars, L. Biletsky and Ohienko, continued their liter-

ary activity after moving from Germany to Winnipeg. Other Canadian university professors have also contributed articles and books in English: the émigrés C. *Bida and V. Revutsky, and the younger, North American-educated M. Shkandrij and D.H. *Struk. Academics who have written articles and prepared anthologies include the Canadian-born C. Andrusyshen and W. Kirkconnell (an Anglo-Canadian) and the émigré Ya. Slavutych. The émigré academics A. Malycky, N. Pedan-Popil, J. Rozumnyj, W. Smyrniw, W. Shelest, and O. Zuiievsky and the younger, North American-educated R. Bahry, O. Ilnytskyj, R. Karpjak, I. Makaryk, N. Pylypiuk, and M. Tarnawsky have contributed articles. Other postwar émigrés in Canada who have written books or articles on Ukrainian literature are M. Carynyk, O. Chernenko, A. Horokhovych, O. Kopach, D. Kozii, P. Roienko, Yu. Rusov, Yu. Stefanyk, M. Solovii, and Yu. Voichyshyn. Books on Ukrainian-Canadian literature have been written by the émigrés O. Hai-Holovko and M. Mandryka, by the Canadian-born J. Balan, and by the Ukrainian-Canadian Communist writer P. Krawchuk.

United States. Of the Ukrainian literary scholars who emigrated to the United States after the Second World War H. *Kostiuk, B. *Kravtsiv, and Yu. *Lavrinenko, in particular, have produced important literary studies, anthologies, and editions of the repressed Soviet Ukrainian writers of the 1920s and 1930s. Books in Ukrainian have also been written and/or edited by other émigrés, including V. Barka, V. Bezushko, B. *Boychuk, V. *Chaplenko, O. Drai-Khmara-Asher, P. *Holubenko, S. Hordynsky, Lev, Lutsiv, Luzhnytsky, P. *Odarchenko, S. Pohoriyl, Radzykevych, B. *Romanenchuk, and A. *Yuryniak. Among American academics Ukrainian literature was first treated systematically in the 1940s and 1950s by C. *Manning of Columbia University. Since the 1950s, émigré scholars have taught at American universities and published English-language studies of Ukrainian literature. Books and articles have been written by the professors S. Chorney, J. *Fizer, G. *Grabowicz, and L. *Rudnytzky, and articles have been contributed by other university scholars, such as L. Onyshkevych, M. Ovcharenko (Pshchepiurska), B. *Rubchak, G.Y. *Shevelov, and W. *Zyla. Bibliographic research in Ukrainian literature has been conducted by M. Tarnavska.

Eastern Europe. Until the late 1980s postwar Ukrainian literature studies developed in Poland, Czechoslovakia, and Rumania not without ideological constraints. Nonetheless, important works were produced there, particularly in the area of the literary relations between those countries and Ukraine. Scholars in Poland have written on both old and modern Ukrainian literature. Books and articles have been produced there by the Ukrainian S. *Kozak and the Poles M. Jakóbiec, M. Kuplowski, P. Lewin, R. Łuźny, F. *Nieuważny, and E. Wiśniewska. Articles have been written by Ukrainians, such as Ya. Hrytskovian, M. Ivanek, V. *Mokry, V. Nazaruk, A. Srednytsky, and M. Syvitsky, and by the Poles G. Pazdro, F. Sielicki, and P. Zwoliński. Ukrainian literature studies in Czechoslovakia have focused on Ukrainian-Czechoslovak literary relations, the history of Transcarpathian literature, and contemporary Ukrainian writing in the Prešov region. Books and/or articles have been written there by the Ukrainian scholars Yu. *Bacha, Z. Genyk-Berezovska, F. Kovach, M. *Molnar, M. Roman, O. Rudlovchak, Y. Shlepets, and O.

*Zilynsky and by the Czechs M. *Nevrlý and V. Židlický. In Rumania there has been only one prominent scholar of Ukrainian literature, M. *Laslo-Kutsiuk in Bucharest.

Elsewhere. Ukrainian literature studies in other parts of the world have had few contributors. In Brazil V. *Vovk has taught and written in Portuguese on Ukrainian literature. In Argentina I. Kachurovsky wrote in Spanish on Ukrainian literature while living there in 1948–69. In Australia studies of Ukrainian literature have been written by the émigrés Bohatsky, O. Fylypovych, S. Haievsky, and D. *Nytchenko (Chub). Since the early 1980s the first Australian university lecturer in Ukrainian literature, M. *Pavlyshyn of Monash University, has published articles on modern Ukrainian writers and on Ukrainian literature in Australia.

Literaturna hazeta. See *Literaturna Ukraïna*.

Literaturna krytyka (Literary Criticism). A Marxist monthly of literary criticism, scholarship, theory, and bibliography; art, theater, film, and folklore were also discussed. It was first published in Kharkiv in January 1928, and until April 1932 it was the unofficial organ of the *All-Ukrainian Association of Proletarian Writers and was called *Krytyka*. M. Skrypnyk, A. Khvyliia, V. Desniak, V. Koriak, T. Taran, I. Kulyk, T. Stepovy, and Ya. Savchenko belonged to its editorial board. Among its contributors were Ya. Aizenshtok, V. Atamaniuk, O. Biletsky, M. Dolengo, I. Kapustiansky, Ye. Kyryliuk, H. Maifet, M. Motuzka, I. Mykytenko, M. Novytsky, O. Poltoratsky, V. Sedliar, I. Vrona, and F. Yakubovsky. From May 1932 the journal was the organ of the newly founded *Writers' Union of Ukraine and was called *Za markso-lenins'ku krytyku*. Thenceforth its content was excessively dogmatic and Stalinist; among its contributors in that period were P. Kolesnyk, B. Kovalenko, I. Kulyk, Ye. Kyryliuk, A. Paniv, L. Pidhainy, S. Shchupak, A. Trostianetsky, and Yu. Yosypchuk. From 1934 the journal was published in Kiev. It was renamed *Literaturna krytyka* in December 1935 and *Radians'ka Ukraïna* in January 1941. The last issue of the journal appeared in February 1941.

Literaturna Odesa. A publicistic almanac of the Odessa branch of the Writers' Union of Ukraine. It was published between 1948 and 1958 in Odessa in both Ukrainian and Russian and contained articles on literature and art.

Literaturna Ukraina

Literaturna Ukraina (Literary Ukraine). A literary newspaper founded by a resolution of the CC CPBU as the organ of the *All-Ukrainian Association of Proletarian Writers. It began publication on 21 March 1927 in Kiev under the name *Literaturna hazeta* (1930–4 published in Kharkiv). Between 1941 and 1945, it was published as *Literatura i mystetstvo*, in Luhanske, Ufa, Moscow, Kharkiv, and, in 1944, Kiev. From 1945 to 1962 it was again called *Literaturna hazeta* and published in Kiev. It was renamed *Literaturna Ukraina* in 1962. It has been first a fortnightly, later a weekly, from 1957 a biweekly, and since 1985 a weekly. *Literaturna Ukraina* was the first literary newspaper that unwaveringly toed the Party line; it supported the so-called proletarian writers and had already declared war on Ukrainian culture in the 1920s. *Literaturna Ukraina* played an important part in condemning not only the so-called bourgeois literature, of the members of MARS for example, but also that of the members of Vaplite, Prolitfront, and Nova Generatsiia, who although they called themselves 'proletarian,' were in fact opposed to the Party line in literature. In 1932 it became the organ of the *Writers' Union of Ukraine and was the mouthpiece of J. Stalin's, later N. Khrushchev's, literary policies. In the first years of its existence B. *Kovalenko played a major part in establishing the newspaper's orientation. Its editors in chief have been I. Le, P. Usenko, L. Novychenko, M. Shamota, A. Khyzhniak, and, since 1980, P. Perebyinis, I. Kocherha, D. Tsmokalenko, P. Zahrebelny, and B. Rohoza. In the mid-1980s the newspaper assumed the role of defender of the Ukrainian language, and in the early 1990s it became an organ for national revival and independence.

Literaturnoe zavedenie priashevskoe. See Prešov Literary Society.

Literaturno-naukova biblioteka (Literary-Scientific Library). A series of books and booklets published by I. *Franko in Lviv from 1889 to 1898. It included Franko's narrative poem *Smert' Kaina* (The Death of Cain); his novel

Dlia domashn'oho vohnyshcha (For the Home Hearth); his habilitation dissertation on I. Vyshensky; T. Shevchenko's narrative poem 'Perebendia,' with Franko's introduction; M. Drahomanov's *Avstrorus'ki spohady* (Austro-Ruthenian Memoirs) and *Chudats'ki dumky pro ukrains'ku natsional'nu spravu* (Eccentric Thoughts about the Ukrainian National Problem); a poetry collection by U. Kravchenko; V. Shchurat's translation of G. Flaubert's *La légende de Saint Julien l'Hospitalier*; other translations; and reprints of Franko's writings from the socialist periodicals *Narod* and *Zhytie i slovo*.

Literaturno-naukovyi vistnyk

Literaturno-naukovyi vistnyk (Literary Scientific Herald, or LNV). A monthly journal published in 1898–1906 in Lviv, in 1907–14 and 1917–19 in Kiev, and in 1922–32 again in Lviv. It was founded on the initiative of M. Hrushevsky as the organ of the Shevchenko Scientific Society (NTSh), incorporating the journals *Zoria* (published by the NTSh) and *Zhytie i slovo* (published by I. Franko). From 1905 it was published by the Ukrainian-Ruthenian Publishing Company. LNV became the foremost literary-scientific journal of the day. The editorial board consisted of M. *Hrushevsky (editor in chief), I. *Franko, O. Borkovskiy, and O. Makovei. The latter two soon resigned and were replaced by V. *Hnatiuk. The de facto editor during the first period of LNV in Lviv was Franko, who published a large number of his own poems, stories, and tales therein, as well as literary critiques, history articles, and reviews. He also obtained the collaboration of leading writers from all parts of Ukraine, including established writers, such as H. Barvinok, O. Konysky, and D. Mordovets, and younger writers, such as V. Vynnychenko, M. Vorony, B. Hrinchenko, I. Tobilevych, A. Krymsky, V. Leontovych, V. Samiilenko, L. Starytska-Cherniakhivska, Lesia Ukrainka, K. Hrynevych, P. Karmansky, Yu. Kmit, B. Lepky, O. Makovei, L. Martovych, V. Pachovsky, V. Stefanyk, M. Cheremshyna, M. Yatskiy, and O. Kobylanska.

After the Revolution of 1905, when publication in Ukrainian became possible in Russian-ruled Ukraine, Hrushevsky transferred LNV to Kiev, where he took over the editorial responsibility and published his own belletristic works, signed 'M.Z.' (Mykhailo Zavoloka), publicistic articles, reports, and reviews. So that the circulation of LNV could be extended to Galicia and Bukovyna, the jour-

nal was sent in folio to Lviv, where it was then bound at the NTSh shop. Later the Lviv editorial office was created and managed by M. Yevshan. New contributors included S. Cherkasenko, H. Chupryna, D. Lukiianovych, O. Hrushevsky, M. Zalizniak, V. Lypynsky, A. Nikovsky, M. Porsh, V. Sadovsky, M. Stasiuk, I. Feshchenko-Chopivsky, K. Shyrotsky, V. Doroshenko, I. Dzhydzhora, M. Yevshan, Ye. Levytsky, M. Lozynsky, M. Mochulsky, and L. Tshel'sky. Until the beginning of the First World War *LNV* played an important part in uniting the cultural forces that had been separated in consequence of the division of Ukraine between the Russian and Austro-Hungarian empires.

In 1914, like all Ukrainian press, *LNV* was banned. When the tsarist regime fell in 1917, the journal resumed publication under the editorship of O. Hrushevsky. New contributors included P. Tychyna, M. Rylsky, Ya. Savchenko, and M. Ivchenko. Conditions in Kiev, however, were unfavorable for its progress, and in 1920 *LNV* was again banned, this time by the Soviet authorities.

In 1922 *LNV* was revived in Lviv with the financial support of former Sich Riflemen. The editorial committee consisted of V. Hnatiuk, V. Doroshenko, M. Halushchynsky, Ye. Konovalets, Yu. Pavlykovsky, and I. Rakovsky, and was headed by D. *Dontsov. The idea behind the revival of *LNV* was to unite all the literary forces in Western Ukrainian territories and in the diaspora that defended a Ukrainian national standpoint. Former eminent contributors were followed by younger collaborators, such as B.I. Antonych, N. Livytska-Kholodna, Ye. Malaniuk, Yu. Lypa, B. Kravtsiv, O. Olzhych, and O. Stefanovych. The editorial board, however, progressively ceased to function, and Dontsov, the editor in chief, caused a portion of the collaborators to quit because of his nationalistic ideological attitude. The declining artistic standard of the journal, combined with financial difficulties, caused *LNV* to cease publication at the end of 1932. Dontsov thereupon began publishing his own journal, **Vistnyk*. In 1948–9 two more issues of *LNV* appeared in Regensburg, edited by V. Shulha.

The first 20 volumes of *LNV* were cataloged by V. Domanytsky (1903), and M. Svientsitska later compiled an index of the entire edition (nd).

BIBLIOGRAPHY

Doroshenko, V. 'Literaturno-naukovyi Visnyk (1898–1914, 1917–1919, 1922–30),' *LNV*, vol 1 (Regensburg 1948)

V. Doroshenko

Literaturnyi arkhiv. A bimonthly journal of literature studies which was the organ of the Taras Shevchenko Scientific Research Institute. It was published in Kharkiv in 1930–1 and was edited by D. Bahalii, O. Biletsky, O. Doroshkevych, and S. *Pylypenko (chief editor).

Literaturnyi Donbas (Literary Donbas). A literary and art almanac of the Donetsk branch of the Writers' Union of Ukraine. It was originally published under the title **Zaboi* and was renamed *Literaturnyi Donbas* in 1932. In 1933 it was moved from Artemivske to Staline (now Donetsk). From its 10th issue it was printed in Russian. It was published monthly at first, bimonthly in 1936, five times a year in 1937 and 1938, and bimonthly again in 1939. It ceased publication during the Second World War

and resumed publication in 1946. Since 1958, under the title *Donbass*, it has appeared as a bilingual Ukrainian-Russian quarterly, although in fact it has been almost exclusively in the Russian language. It mostly features works on the subject of life in the mines.

Literaturnyi iarmarok: dust jacket (watercolor by A. Petrytsky) and title page

Literaturnyi iarmarok (Literary Fair). A literary and art almanac in Kharkiv, edited by M. *Khvylovy. Twelve issues appeared between December 1928 and February 1930. Officially nonpartisan, *Literaturnyi iarmarok* was in fact the organ of the group of former members of the dissolved **Vaplite*. The literary-historical significance of the almanac lies in its representing one of the last organized attempts to resist the Communist party's efforts to force all writers to adopt socialist realism. *Literaturnyi iarmarok* published works which were later labeled bourgeois-nationalist, including M. Kulish's plays, Khvylovy's satires *Ivan Ivanovych* and *Revizor* (The Inspector General), V. Gzhytsky's novel *Chorne ozero* (The Black Lake), I. Senchenko's *Chervonohrads'ki portrety* (Chervonohrad Portraits), V. Sosiura's poem *Mazepa*, poetry and prose by V. Mysyk, O. Vlyzko, and M. Yohansen, and intermedes by O. Vyshnia and V. Yurynets. Attacks from the official critics even provoked an original arrangement of the almanac, in which modernism (particularly the illustrations) was combined with traditional Ukrainian forms (framing and linking the whole text were intermedes, which were written by different authors in each issue). After the forced liquidation of *Literaturnyi iarmarok* the nucleus of its contributors, together with many other writers, founded the group **Prolitfront*, which published a journal of the same name.

I. Koshelivets

Literaturnyi sbornik (Literary Miscellany). A literary and historical serial published by the **Halytsko-Ruska Matytsia* Society in Lviv in 1865–6, 1868–9, 1874, 1885–6, 1889, 1891, and 1897. Until 1869 it was called *Naukovyi sbornik*. The serial contained pioneering articles in Galician history, philology, and ethnography and some belletristic works by Ya. Holovatsky, A. Petrushevych, M. Ustyianovych, V. Stefanovych, I. Sharanevych, O. Lepky, V. Terletsky, M. Kostomarov, I. Hushalevych, I. Ozarkevych, and others. The serial also published information about the society's activities and other scholarly developments in Lviv. The 1874, 1891, and 1897 issues consisted primarily of A. Petrushevych's Galician-Volhynian chronicle for the years 1600–1772. From 1885 B. Didytsky was the serial's editor.

Literaturnyi zhurnal (Literary Journal). A monthly of socialist-realist literary and art criticism and publicism. It was published in Kharkiv from August 1936 as an organ of the Writers' Union of Ukraine and replaced the prominent journal **Cheromnyi shliakh*. It ceased publication in 1941 after 58 issues.

Lithography: illustration for H.C. Andersen's *Snow White* by M. Murashko (1873)

Lithography. The method of printing a text or drawing from a smooth limestone surface onto paper, invented in 1796 by A. Senefelder in Germany. It was introduced in Ukraine in the 1820s at the art studio of the Kievan Cave Monastery and private studios in Lviv, Kiev, Odessa, and Mykolaiv. In 1828 the engraving shop at the Mezhyhiria Faience Factory near Kiev began using lithography to decorate unglazed china. The studio Mykolaiv (est 1829) printed navigational charts, manuals, and, later, illustrations. In Odessa the studio of A. Braun (est 1829) ran prints of artistic views of Odessa, Crimea, and other places in southern Ukraine. In Lviv, lithographs were printed at the studio of J. P., and K. Piller (from 1822), the Ossolineum Institute (1830–4), and the Stauropogon Institute (from 1846). From the 1830s on, lithography studios at Kharkiv and Kiev universities printed illustrations for textbooks, document collections, albums, and literary almanacs.

In Ukraine the first master lithographers were from Central Europe – L. Kwaas from Saxony, H. Schöngold from Switzerland, and O. Braun, I. Walner, J. Piller, and A. Lange from various German lands. They produced lithographs of their own drawings and of works by Ukrainian artists. In the first half of the 19th century lithography was mastered by Ukrainian artists (eg, I. Vendzylovych and S. Vozniak in Galicia). In the second half significant achievements in lithography were attained by K. *Trutovsky, O. *Slastian, and M. *Murashko. The notable lithography workshops existed at the Kievan Cave Monastery Press, which printed large runs of landscapes of this ancient site and other churches in Kiev, as well as oleographed icons, and at the printery of S. Kulzhenko, which issued both religious and secular lithographs. In the 20th century, lithography played an important role in book *illustration

and *poster art as well as flourishing in its own right as a graphic art. Notable 20th-century Ukrainian lithographers are O. Slastian, M. *Zhuk, I. *Padalka, V. *Zauze, O. *Dovhal, V. *Kasiian, V. *Myronenko, M. *Derehus, H. *Pustoviit, H. *Bondarenko, V. *Averin, V. Parchevsky, V. *Savin, Ye. *Svitlychny, O. *Liubymsky, and A. Nasedkin. (For a bibliography, see *Graphic art.)

D. Stepovyk

Lithuania (Lithuanian: Lietuva; Ukrainian: Lytva). A country on the eastern shore of the Baltic Sea. Its capital is *Vilnius. The Lithuanians belong to the Baltic group of Indo-European nations. They have had a long history of linguistic, cultural, and political interaction with their Slavic neighbors, including the Ukrainians. In 1940–1 and from January 1945 to March 1991 Lithuania constituted a Soviet republic, with an area of 65,200 sq km. In 1989 it had a population of 3,674,802, of whom 2,924,251 (79.6 percent) were Lithuanians, 344,455 (9.4 percent) were Russians, 257,994 (7 percent) were Poles, 63,169 (1.7 percent) were Belarusians, and 44,789 (1.2 percent) were Ukrainians. Of the Ukrainians living in Lithuania in 1989, 51 percent gave Ukrainian as their native language, 45.3 percent gave Russian, and only 0.3 percent gave Lithuanian; only 16.8 percent could speak Lithuanian.

There are over 3.5 million Lithuanians in the world today. The largest concentrations outside Lithuania are in the United States (over 330,000 in 1970), Russia (70,427 in 1989), Latvia (34,630 in 1989), Canada (14,725 in 1986), Ukraine (11,278 in 1989), and Poland (approx 10,000).

The medieval Lithuanian tribes (including the *Yatvingians) frequently fought over territories with the Rus' princes of Kiev, Galicia-Volhynia, and Polatsk and with the *Teutonic Knights. Not until the early 13th century, however, did they create a common political entity. In 1225 the majority of the Lithuanian tribes were united under the rule of *Mindaugas, and formed the Grand Duchy of Lithuania. Taking advantage of the disintegration of Rus' under the impact of the Mongol invasion, Mindaugas conquered *Chorna Rus' and parts of Polatsk principality and entered into a military alliance and dynastic union with the Principality of *Galicia-Volhynia. In the 1250s King Danylo Romanovych of Galicia-Volhynia routed the Yatvingian tribes inhabiting what is today northern Podlachia, and their territory was divided among the princes of Galicia-Volhynia and Mazovia and the Teutonic Knights. Chorna Rus' came under the rule of Danylo's son Roman Danylovych.

In 1267 Mindaugas's son and successor, *Vaišvilka, abdicated the Lithuanian throne in favor of his brother-in-law, Danylo's son *Shvarno Danylovych. Thus Lithuania and Galicia-Volhynia were briefly (until Shvarno's death in 1269) ruled by one dynasty. Lithuania's internecine conflicts and wars with its neighbors temporarily halted its southward and eastward expansion. Expansion resumed during the reign of Grand Prince *Gediminas (1316 to ca 1340), who conquered most of Belarus and the Ukrainian lands of Turiv-Pynske and northern Volhynia. With the demise of the Principality of Galicia-Volhynia in 1340, Volhynia came under the rule of Gediminas's son *Liubartas. In the 1360s, during the reign of Gediminas's son *Algirdas, the *Lithuanian-Ruthenian state was consolidated, and extended over all the Belarusian and most of the Ukrainian lands except Galicia, which was annexed by

Poland. During the height of its expansion Lithuania's possessions included nearly half of the former territory of Kievan Rus'. Only 10 percent of the realm was inhabited by Lithuanians, and the official culture, language, and religion of the new state became Ruthenian (ie, Ukrainian-Belarusian). An Orthodox *Lithuanian metropolity was created. Following the Lithuanian-Polish dynastic Union of *Krevo (1385) Lithuania ceased to be completely independent and became officially Catholic. Polish control increased steadily, particularly after the demise of the *Jagiellon dynasty in 1572. After the Union of *Lublin (1569) Lithuania was left with only limited autonomy within the Polish Commonwealth, having ceded most of its Ukrainian lands to *Poland and accepted the Polish crown and a common parliament. With time Polish culture and religious influence displaced Ruthenian influence and resulted in the Polonization of the Lithuanian-Ruthenian nobility. In 1529 the Lithuanian-Ruthenian state adopted a new law code, the *Lithuanian Statute, revised in 1566 and again in 1588, introducing Polish concepts into its criminal and civil sections. Polish domination of Lithuania did not cease after the partitions of Poland and the occupation of nearly all of ethnic Lithuania by the Russian Empire. Although Polish was banned as the official language in 1822, only after the unsuccessful Polish Insurrection of 1830–1 did Russification and the suppression of Lithuanian culture intensify. In the second half of the 19th century a Lithuanian national rebirth occurred, led by the intelligentsia of peasant origin and bolstered by Lithuanian immigrants in the United States and the nearly 150,000 Lithuanians living in the Prussian-ruled Klaipėda (Memel) region. During the First World War Lithuania was occupied by the Germans (1915–18), and after several preliminary efforts Lithuania became an independent republic in November 1918. The Vilnius region, however, which was inhabited by Belarusians, Poles, and Lithuanians, was forcibly annexed by Poland in 1920. After two decades of domestic instability and tensions with Poland and later Nazi Germany (culminating in Germany's annexation of the Klaipėda region in March 1939) Lithuania was occupied by the USSR in June 1940. Soviet oppression was followed by that of the Nazi occupation (June 1941 to January 1945). Thereafter Lithuania remained a Soviet republic until March 1991, when it regained its independence.

Toward the end of the 19th century Lithuanian-Ukrainian relations were renewed. In the Russian State Duma Ukrainian and Lithuanian representatives collaborated within the *Autonomists' Union, and O. Lototsky maintained close ties with the Lithuanian leader V. Matulaitis. Lithuanian students in Kiev co-operated with Ukrainian student organizations. At the peace talks with the Central Powers culminating in the Peace Treaty of Brest-Litovsk in 1918, the future Lithuanian prime minister A. Voldemaras secretly took part in the UNR delegation as an adviser so as to inform the Lithuanians of the progress of the negotiations with the Germans. The newly formed Ukrainian and Lithuanian republics did not have the opportunity to solidify relations, however. After the unsuccessful Ukrainian struggle for independence Lithuania supported the revolutionary struggle of the Ukrainian Military Organization (UVO) and the OUN in Polish-ruled Western Ukraine through semi-official organizations, such as the Lithuanian Riflemen's Association and the Union for the

Liberation of Vilnius (headed by M. Biržiška). The UVO organ **Surma* was printed in Kaunas, and Ukrainian-Lithuanian activists were issued Lithuanian passports and granted asylum. The Ukrainian-Lithuanian Society in Kaunas (1927–35), headed by Biržiška, informed the Lithuanian public about the Ukrainian question through its bulletin *Lietuvių Ukrainiečių Draugijos Žinios* (1933–5). The UVO and, later, OUN representative I. Reviuk-Bartovych resided in Kaunas. In the West émigré Ukrainians collaborated with émigré Lithuanians in the Anti-Bolshevik Bloc of Nations and other organizations.

The Lithuanian-Ukrainian bulletin published in Kaunas in 1933–5

There were also cultural ties between Lithuania and Ukraine. Before the First World War theatrical troupes from Russian-ruled Ukraine toured Lithuanian towns several times, and from 1912 I. Kotliarevsky's play *Natalka Poltavka* (Natalka from Poltava) was part of the repertoire of many Lithuanian amateur theatrical groups. In the 1880s J. Andziulaitis's translations of several of T. Shevchenko's poems were published in Lithuanian journals. In 1891, stories by I. Franko were also translated. From 1909 L. Gira translated and popularized Shevchenko's poetry; his translations were published as a separate volume in 1912. Gira also wrote the first Lithuanian article about Shevchenko. In 1914, despite the tsarist ban, a celebration of Shevchenko's centenary was organized by the writer J. Žemaitė in Lithuania. Throughout the postwar Soviet period many Lithuanian poets translated Shevchenko's works. Separate editions of them were published in 1951, 1955, and 1961, and in 1964 V. Abramavičius's book about Shevchenko in Vilnius was published. Works by Lesia Ukrainka, M. Kotsiubynsky, M. Rylsky, P. Tychna, O. Vyshnia, O. Honchar, M. Stelmakh, and other Ukrainian writers have also been translated into Lithuanian. Lithuanian-Ukrainian literary relations were surveyed in a book by K. Korsakas (1954). Lithuanian writers whose works have been translated into Ukrainian include S. Nėris, A. Venclova, Žemaitė, P. Cvirka, J. Baltušis, E. Mieželaitis, and M. Sluckis. Plays by Franko, O. Kornii-chuk, V. Mynko, and other Ukrainian dramatists have been staged in Lithuania, and since 1955 S. Hulak-Artemovksy's opera *Zaporozhets' za Dunaiem* (Zaporozhian Cossack beyond the Danube) has been part of the repertoire of the Vilnius Opera and Ballet Theater. Similarly, Lithuanian plays have been staged in Ukraine. Since 1961, 10-day festivals of Ukrainian literature and art have been held in Lithuania, and in 1968 the 17th Shevchenko scholarly conference was held in Vilnius.

In December 1988 the Hromada of Ukrainians of Lithuania was formed in Vilnius, and in October 1989 the

Constituent Congress of Ukrainians in Lithuania was held there. The Hromada supported the Lithuanian independence movement and has had close ties with the Popular Movement of Ukraine (Rukh). Hromada branches are active in Vilnius, Kaunas, Klaipėda, Mažeikiai, and Jonava. Ukrainian choirs have been formed in Vilnius and Klaipėda, and Ukrainian Sunday schools in Vilnius and Jonava.

Lithuanian metropolity. An Orthodox church province that existed in the 14th and 15th centuries within the Grand Duchy of Lithuania. It was founded following the occupation of much of western Ukraine by Lithuania. When Roman, the Kievan metropolitan, transferred his see to Moscow, the Lithuanian princes Gediminas and, later, Algirdas demanded a separate metropolity, free of Muscovite control. The Patriarch of Constantinople agreed and consecrated Roman 'metropolitan of Lithuania and Volhynia' in 1355, with his see in Navahrudak (Belarus) and jurisdiction over the eparchies of Polatsk and Turiv, Volodymyr, Lutske, Kholm, Halych, and Pere-myshl. After Roman's death in 1361, the metropolitan of Kiev moved to prevent the appointment of a successor. Later the western eparchies of the metropolity were transferred to the renewed *Halych metropolity. In 1376 Grand Duke Vytautas succeeded in having *Cyprian consecrated as metropolitan, who in 1389 assumed control over all eparchies of the Halych and Kiev metropolities. He resided in Moscow, and had the title 'Metropolitan of all Rus'.' Cyprian's successor, however, was not accepted in the Lithuanian-controlled territories of Ukraine, and a synod of the bishops of Polatsk, Smolensk, Lutske, Chernihiv, Volodymyr, Turiv, Pere-myshl, and Kholm elected G. *Tsamblak as metropolitan of Lithuania in 1415. After Tsamblak died in 1419, the Lithuanian eparchies once again came under the authority of Moscow. A final attempt to renew the Lithuanian metropolity under Bishop Herasym of Smolensk (1431–5) failed.

Lithuanian Register (Lithuanian: Lietuvos Metrika; Ukrainian: Lytovska metryka). A register listing and describing documents issued and received by the chancellery of the Grand Duchy of Lithuania from the end of the 14th century to 1794. The name is applied also to the chancellery archive, which consisted of 566 volumes of registration lists, and to a variety of original documents or copies – treaties, instructions to ambassadors and their reports, charters granting lands or privileges, permits and licenses, court decisions, appointment lists, and military instructions. The earliest documents were written mostly in the chancellery version of Ruthenian; others were written in Latin, Polish, German, and even Arabic. At the beginning of the 16th century the archive was moved from Trakai castle to the Low Castle in Vilnius. When in 1569

Volhynia, Bratslav, and Kiev palatinates were transferred to Poland by the Treaty of Lublin, the documents pertaining to those territories were deposited in a special Volhynian Register in Warsaw, and documents connected with Galicia were preserved at the Crown Register in Cracow. In 1765 the Crown Register was moved to Warsaw and was supplemented with the rest of the Lithuanian Register from Vilnius. After the partition of Poland the Lithuanian Register was transferred to the Russian imperial archive in St Petersburg, and the Volhynian Register and the Galician documents of the Polish national archive were integrated with it. In 1887 the archive was moved to Moscow. Today it is located at the Central State Archive of Old Documents in Moscow. Some materials from the Lithuanian Register have been published in the collections *Akty, otnosiashchiesia k istorii Iuzhnoi i Zapadnoi Rossii* (Documents on the History of Southern and Western Russia, 1863–92) and *Akty, otnosiashchiesia k istorii Zapadnoi Rossii* (Documents on the History of Western Russia, 1846–53) and in publications of the Kiev Archeographic Commission.

Title page of the third
 Lithuanian Statute (1588)

Lithuanian Statute. The code of laws of the *Lithuanian-Ruthenian state, published in the 16th century in three basic editions. It was one of the most advanced legal codes of its time. Before its appearance, Lithuanian-Ruthenian law was based on **Ruskaia Pravda* and Lithuanian, Ukrainian, and Belarusian customary law. The First or Old Lithuanian Statute, ratified by the diet in Vilnius in 1529, consisted of 243 articles (272 in the Slutsk redaction). Organized under 13 sections, these articles included norms of contract, procedural, criminal, and civil law, as well as state statutes. The overriding concern of this code was to protect the interests of the state and nobility, especially the magnates. The Second Lithuanian Statute (367 articles in 14 sections), often called the Volhynian version because of the influence of the Volhynian nobility in its preparation, was ratified in 1566. It brought about major administrative-political reforms, such as the division of the country into counties, and especially expanded the

privileges of the lower gentry by admitting it to the diet. It confirmed in legal terms the leading role of the nobility in the state and further restricted the rights of the peasantry (cities were governed by *Magdeburg law). The Third Lithuanian Statute, consisting of 488 articles in 14 sections, was compiled after the union of the Grand Duchy of Lithuania with Poland in 1569 and was ratified by Sigismund III Vasa in 1588. In this edition many Polish concepts were introduced into the criminal and civil law, which were systematized anew. For the first time, it established a unified code of laws for the entire Lithuanian-Ruthenian state and the entire population; in this respect it differed from the earlier editions, which were collections of local laws. It also entrenched the privileges of the nobility and completed the enserfment of the peasants.

All three editions of the Lithuanian Statute were written in the contemporary Ruthenian chancellery language, which was a mixture of Church Slavonic, Ukrainian, and Belarusian. The first two appeared only in manuscript form; the last was printed in Vilnius. In 1614 the first Polish translation was published, and in 1811 a Russian translation, based on the Polish one, appeared. The Lithuanian Statute was one of the sources used in preparing the first Muscovite code of law (1649).

The Lithuanian Statute remained for several centuries the basic collection of laws in Ukraine, even in the territory annexed by Poland. It was the main source of Ukrainian law for the Hetman state and the basic source of the *Code of Laws of 1743. In Right-Bank Ukraine it remained in force until 1840, when it was annulled by Nicholas I. Some parts of it were incorporated into the collection of Russian laws and remained valid in Chernihiv and Poltava gubernias until the Revolution of 1917.

Lithuanian-Ruthenian law. The system of law of the Lithuanian-Ruthenian state or, more precisely, the Grand Duchy of Lithuania, which from the 14th to the 18th century included Lithuania, Belarus, and most of Ukraine (to the Union of Lublin in 1569). The systematic study of Lithuanian-Ruthenian law began in the first half of the 19th century. Polish historians considered it a local variant of Polish law, and Russian historians usually referred to it as 'western Russian' law and treated it as part of Russian law. Eventually, it was studied by Lithuanian, Belarusian, and Ukrainian historians and legal scholars, who accepted it as part of the legal history of all three nations.

Lithuanian-Ruthenian state. A feudal state of the 13th to 16th centuries that included Lithuanian, Belarusian, and Ukrainian territories. Each of its constituent principalities enjoyed a wide-ranging autonomy. The ruler was the grand duke, who was assisted by a boyars' council.

From 1323 the capital was Vilnius. The state was shaped by its struggles with the *Teutonic Knights, the Principality of Galicia-Volhynia, the Tatars, and then Poland and Muscovy. Lithuania began to encroach on Ukrainian and Belarusian territories during the reign of its founder, *Mindaugas (1236-63). *Gediminas (1316-41) and his son, *Algirdas (1345-77), annexed the Pynske, Berestia, Chernihiv-Siversk, Podilia, Pereiaslav, and Kiev regions. Weakened by Tatar attacks and internal strife, the Ukrainian princes offered little resistance to Lithuanian hegemony and joined its administrative system.

Political and cultural life in the Lithuanian-Ruthenian state was based on the traditions of the Kiev and Galician-Volhynian states. An official Ruthenian language evolved from the language used in Rus'. The legal system was based on the legal traditions of Rus' (see *Lithuanian-Ruthenian law and *Lithuanian Statute). The Lithuanians also benefited from the military expertise of Rus' in organizational and fortification skills. Dynastic ties between the princes of Rus' and Lithuania helped to maintain the Ruthenian influence. The Ruthenian princes belonged to the duke's councils and were part of the ruling class. The Orthodox church was allowed to develop freely, and it played an important role in the country's cultural and educational life. Manufacturing and trade developed rapidly in the towns and cities. The situation changed abruptly after 1385, when *Jagiello (1377-92) concluded the Union of *Krevo and assumed the Polish crown.

Jagiello's pro-Polish policies aroused strong Lithuanian-Ruthenian opposition. The ruling classes resisted the Polonization and the Latinization of political and cultural life. Initially the opposition was headed by *Vytautas (1392-1430), who supported the Ukrainian princes and intended to make Lithuania-Ruthenia independent of Poland and to expand it southward and eastward. After being defeated by the Tatars in 1399, however, he had to come to terms with Jagiello. The Union of *Horodlo (1413) gave the nobles of the Lithuanian-Ruthenian state, who were Catholic, equality with the Polish nobility but restricted the participation of Orthodox (mostly Ruthenian) lords in state affairs. A new opposition was headed by Jagiello's brother, *Švitrigaila (1430-5). His pro-Ruthenian policy resulted in a split in the Lithuanian-Ruthenian state: the pro-Polish forces installed *Zygmantas (1435-40) as grand duke, and Švitrigaila established his power base in Volhynia, which for a brief period became a separate state. After the death of Zygmantas *Casimir IV Jagiellończyk (1440-92) was proclaimed grand duke. He continued his predecessor's pro-Polish centralist policy. To appease the growing opposition of the Ruthenian princes, *Olelko Volodymyrovych (the grandson of Algirdas) was appointed ruler in Kiev. The measure strengthened Ruthenian influence on state policy for a time. After Švitrigaila's death (1452) the Volhynian principality was abolished, and after *Semen Olelkovich's death (1470) Casimir installed the Polonized M. Gasztod (Gasztold) as voivode of Kiev. The Ruthenian princes responded to the growing Polish influence by organizing a conspiracy under the leadership of *Mykhailo Olelkovich. The plot was uncovered in 1481, and many of its participants were executed.

The rise of Polish power prompted many Orthodox Ukrainian and Belarusian princes to look for aid to Muscovy, which had defeated the Tatars and was consolidat-

ing its centralist state. Ivan III of Muscovy proclaimed himself the defender of Orthodoxy and heir to the Kiev dynasty. His action increased tensions and military conflicts between Lithuania and Moscow. By the early 16th century most of the Chernihiv and Siversk territories had been annexed by Muscovy. In 1508 Prince M. *Hlynsky and his brothers led an anti-Lithuanian revolt aimed at separating Ukraine and Belarus from Lithuania and renewing the state of Rus'. Theirs was the last attempt of the Ukrainian princes to oppose Lithuanian and Polish power.

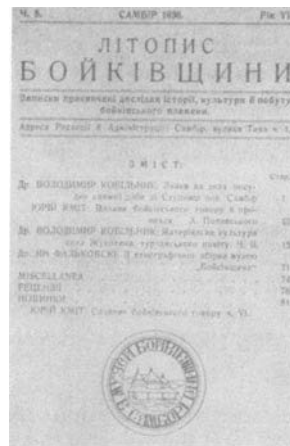

Poland spared no effort to bring Lithuania under its control and to transform the personal union signed at Krevo into a complete fusion of the two states. To that end it exploited the lesser Lithuanian nobility, which was promised equal status with the Polish nobility. The Lithuanian aristocracy, magnates, and upper nobility continued to oppose the union, which they saw as signaling the demise of the Lithuanian-Ruthenian state. In spite of strong Lithuanian opposition the union of the two states in the Polish Commonwealth was proclaimed in Lublin (1569). Lithuania preserved some of its autonomy, but the Ruthenian lands formerly under its control were divided. Except for parts of Podlachia and Polisia the Ukrainian lands fell under Polish rule, and virtually all the Belarusian lands remained under Lithuania. Lithuania's legal status within the commonwealth remained unchanged until Poland was partitioned in 1772, 1793, and 1795. (See also *Lithuania.)

Litko, Anatolii, b 23 September 1934 in Horodnie, Bohodukhiv county, Kharkiv oblast. Stage director and actor. In 1963 he graduated from the Kharkiv Institute of Arts, and in 1965 he staged his first production in the Kharkiv Ukrainian Drama Theater. He then worked in the Mykolaiv Ukrainian Theater of Drama and Musical Comedy (1965–74). He has been artistic director in the Dnipropetrovske Ukrainian Music and Drama Theater (1979–85) and, since 1987, in the Mykolaiv Russian Drama Theater.

Litky Gospel (Litkivske yevanheliie). A gospel transcribed at the end of the 16th century in Volhynia from a Church-Slavonic gospel printed in Kiev. The 255-page manuscript was discovered in Litky (now in Brovary raion, Kiev oblast). According to O. Hruzynsky it was written between 1595 and 1600 in the Monastery of the Lutske Brotherhood of the Elevation of the Cross. A Ukrainian translation of a part of St Luke's Gospel was inserted on folios 122 (reverse) to 146. The first part of the insert corresponds to the text of the *Peresopnytsia Gospel (1556–61); the second part is mostly Church Slavonic. The language of the Ukrainian part of the Litky Gospel was studied by O. Hruzynsky, who published this part in *Chteniia v Istoricheskoi obshchestve Nestora-letopistsia* (vols 22–23).

Litopys Chervonoï kalyny

Litopys Boikivshchyny (Chronicle of the Boiko Region). A journal dedicated to the study of the ethnography, history, geography, music, dialect, and economy of the Boiko region, published by the Boikivshchyna Society in Sambir, Galicia, in 1931–9 (nos 1–11) and in Philadelphia since 1969. Since 1969 the editors have been O. Berzhnytsky (1969–79) and M. Utrysko (1979–89). By 1989, 60 issues had been published.

Litopys Chervonoï kalyny (Chronicle of Chervona Kalyna). An illustrated monthly of the *Chervona Kalyna publishing house in Lviv. It came out in 1929–39 and was devoted mainly to the struggle for Ukrainian independence in 1914–21. It contained memoirs, bibliographies, reviews of historical books published in the interwar period, photographs, and documents. The editors were L. *Lepky and V. *Levytsky-Sofroniv. Publication of the journal was renewed in 1990 in Lviv under the editorship of O. Khodak.

Litopys druku URSS (Chronicle of Print of the Ukrainian SSR). The bibliographic organ of the Soviet Ukrainian state, published by the Book Chamber of the Ukrainian SSR since 1924. Originally called *Litopys ukrains'koho druku*, it was published as a monthly in 1924, a semimonthly in 1925–6, a weekly in 1927–8, and a quarterly in 1929–30. During that period it provided bibliographic descriptions of all publications appearing in Soviet Ukraine and all Ukrainian-language publications elsewhere, and published biblio-

graphic surveys and articles. The serial was suspended in October 1930. Revived under its present name in 1935, since that time it has published bibliographic descriptions of all publications in Soviet Ukraine. Its periodicity has varied from 12 to 52 issues per year, with a hiatus in the years 1942–6. Bibliographic descriptions of books, journal and newspaper articles, book reviews, musical scores, and periodicals have been published in the separate serials *Litopys knyh* (since 1935), *Litopys zhurnal'nykh statei* (since 1936), *Litopys retsenzii* (since 1936), *Litopys hazetnykh statei* (since 1937), *Litopys muzychnoi literatury* (since 1954), and *Litopys periodychnykh vydan' URSR* (since 1972).

Litopys hazetnykh statei (Chronicle of Newspaper Articles). A semimonthly bibliographic serial published in Kiev by the Book Chamber of the Ukrainian SSR since 1937. Until 1954 it was called *Litopys druku: Hazetni statii*. The serial indexes the most important articles, literary works, and documentary materials appearing in Ukraine's republican newspapers, and all literary works and articles on local affairs appearing in its oblast newspapers. Each issue also contains a name and place index and a list of newspapers surveyed.

Litopys knyh (Chronicle of Books). A monthly serial published by the Book Chamber of the Ukrainian SSR since 1935. Until 1953 it was called *Litopys druku: Knyhy*. The serial provides bibliographic descriptions of books, brochures, and dissertation abstracts published separately in Soviet Ukraine.

Litopys revoliutsii (Chronicle of the Revolution). A journal on the history of the CP(B)U and the years 1917–21 in Ukraine, published in Kharkiv in 1922–33. Until 1928 it was published in Russian as *Letopis' revoliutsii*, and thereafter, in Ukrainian. It usually came out every two months. Altogether 57 issues appeared. They contained large amounts of material later omitted from the official history of the CP(B)U.

Litopys ukrains'koho druku. See *Litopys druku URSR*.

Litopys UPA: title page of vol 17

Litopys Ukrains'koï povstans'koï armii (Chronicle of the Ukrainian Insurgent Army). A series of volumes containing documents and source materials relating to the history of the UPA. Each volume or group of volumes is devoted to a specific theme and has a separate title. *Litopys* is

published jointly by two UPA veterans' organizations, the Former Members of the Ukrainian Insurgent Army and the Society of Former UPA Soldiers, and is edited by Ye. Shtendera and P. Potichnyj. Since 1976, 21 volumes have come out.

Litopys zhurnal'nykh statei (Chronicle of Journal Articles). A semimonthly serial published by the Book Chamber of the Ukrainian USSR since 1936. Until 1960 it was a monthly called *Litopys druku: Zhurnal'ni statii*. It provides bibliographic descriptions of articles, documentary materials, and literary works appearing in all periodicals published in Soviet Ukraine.

Litoshenko, Leonid [Litoshenko], b 2 June 1907 in Kursk, Russia, d 18 May 1972 in Kursk. Ukrainian graphic artist and architect. He designed many bookplates using primarily needle and linoleum engraving, and also engraved in celluloid. Using S. Taranushenko's work as inspiration he created the engraving series 'Windmills' (1944) and 'Ukrainian Folk Furniture' (1944). He also edited three albums of O. Kulchytska's works (1956, 1957, 1960) and amassed a huge collection of bookplates (over 3,500).

Little Entente. A series of alliances among Czechoslovakia, Rumania, and Yugoslavia, made in 1920–1 and consolidated in a single treaty in May 1929. Its purpose was to protect its members against the threat of Hungarian or Austrian aggression and to preserve the territories acquired from Austria after the First World War. Although each member of the Little Entente justified its own claim to independence by the principle of national self-determination, not one of them applied the principle to Ukrainian Transcarpathia; instead they regarded demands for self-determination in that region as an internal problem. The alliance disintegrated after the Munich Agreement (1938) and was formally ended in February 1939.

Little Poland (Polish: Małopolska). The historical territory of Poland in the basin of the upper and middle Vistula River, inhabited by the Vistulans. It became part of the Polish state at the end of the 10th century. The name Little Poland, distinct from the name Great Poland (western Poland), was used to refer to Cracow, Lublin, and Sandomierz voivodeships and, after the Union of Lublin in 1569, to the eight so-called Ruthenian voivodeships, or all the Ukrainian territory under Poland, as well. In the interwar period the Polish government used the name Little Poland for the former Austrian crownlands of Galicia and Lodomeria and the artificial name Eastern Little Poland (Małopolska Wschodnia) for the Ukrainian part of Galicia.

Little Polisia (Male Polissia). A depression in western Ukraine lying between the Volhynia-Kholm Upland in the north and the Podolian Upland in the south and between Roztochia in the west and Podilia (near Shepetivka) in the east. In the south Little Polisia is delineated by a steep, 70–150 m escarpment running along the line Shepetivka–Kuniv–Kremianets–Olesko–Pidiarkiv–Lviv–Nesterov–Rava-Ruska. In the north it is bounded by a 40–60 m rise along the line Krupets–Ostrih–Verba–Berestechko–Chervonohrad–Uhniv. The length of Little Polisia is approx 300 km; its width varies from 20–25 km in the east to 40–70 km in the west, where it encompasses the Upper Buh

River Basin. It is narrowest (5 km) near Ostrih. Its highest elevation is 245 m above sea level.

The foundation of Little Polisia consists of Upper Cretaceous marls, covered with glacial and alluvial deposits. The depression probably originated in the Pliocene. Its glacial landscape has been formed mostly by the action of meltwaters. The latter, dammed by the continental glacier blocking the north side of the Upper Buh River Basin, overflowed eastward, carving the Little Polisia spillway. After the glacier had melted, the Buh, the Styr, the Ikva, the Viliia, and the Horyn rivers began to flow north, and the spillway was transformed into a series of river basins (the Buh, the Styr, the Ikva, and the Horyn), separated by low watersheds. Little Polisia is thus mostly an outwash plain, although in the west, where the ice lobe was present, there are some moraine-outwash deposits, and even lacustrine-loess plains at elevations of 190–270 m, carved gently by slow rivers. Podzols, meadow soils, and bog soils prevail. The eastern part resembles Polisia: it is well forested, swampy, and choked with barchan sand dunes. Forests of pine, birch, oak, aspen, and hornbeam cover about 30 percent of the territory. Hayfields (often waterlogged) and pastures account for over 25 percent, and cultivated land makes up about 40 percent of the area. The population density is approx 50 persons per sq km. Only about 30 percent of the population is urban. Except for Kamianka-Buzka, the towns of Little Polisia are located along the borders with the uplands.

I. Stebelsky

Little Rada. See Central Rada.

Little Russia (Mala Rus', later Malorosiia). The name appeared in Byzantine sources at the beginning of the 14th century and was used for the church administrative unit covering the territory of the Galician-Volhynian state. In Byzantine documents and eparchy registers Halych metropolity (est 1303), consisting of six eparchies (Halych, Peremyshl, Volodymyr, Kholm, Lutske, and Turiv), was known as *Micra Rosia* (Little Rus'). From 1354 the name *Macra Rosia* (Great Rus') was used for the 13 eparchies under the Kiev metropolitan, namely, the Ukrainian eparchies of Kiev, Chernihiv, Pereiaslav, and Bilhorod and 9 Belarusian and Russian eparchies. It was probably under the influence of Byzantine church nomenclature that Prince Yuriï II Boleslav called himself *Dux totius Russiae Minoris* in a charter of 1335. Galician kings and princes usually used the title *Rex Russiae*, *Dux totius terrae Russiae*, or *Dux et Dominus Russiae*.

The name Little Russia does not appear in 15th- or 16th-century documents. Only in the first half of the 17th century did it begin to be used in church correspondence between Kiev and Moscow. Until almost the end of the 17th century the names Rus' (Latin: *Russia*), Ruthenian land (Polish: *Ziemia Ruska*) and Red Rus' (Latin: *Russia Rubra*) were used in chronicles and maps to designate western Ukrainian territory. The term Great Rus', which had been applied originally to the eparchies of Kiev metropolity, was used later to refer to the territories of Novgorod and then Suzdal and Moscow, although until the 18th century those territories were usually called Muscovy in books and on maps. Great Russia was used by foreigners, however, to designate the Ukrainian state of B. Khmelnytsky, whom they titled Master and Hetman of Great Russia (1650). Af-

ter the Pereiaslav Treaty of 1654 Tsar Aleksei Mikhailovich added to the usual title of the Muscovite tsars the phrase 'of all Great and Little Russia.' Later the term Little Russia (*Malaia Rossiia* or *Parva Rossiia*), as the designation of the Ukrainian territory united with Muscovy, began to be adopted in Ukrainian official documents, chronicles, and literature. The name does not appear on the geographical maps of Ukraine published by the Russian Academy of Sciences in 1736–8 or in the Russian atlas of 1745.

Malorosiia, which is derived from *Malaia Rossiia*, began to be used in official nomenclature in the 18th century to refer only to Left-Bank Ukraine, that is, to the Hetman state. In 1781 the Hetman state was abolished and replaced by three vicegerencies, Chernihiv, Novhorod-Siverskyi, and Kiev. In 1796 they were merged to form Little Russia gubernia (excluding Kiev), which in 1802 was divided into Poltava and Chernihiv gubernias. The official terms Little Russia (*Malorosiia*), Little Russian (*malorusskii*), and Little Russians (*malorossy*) were used for Russian-ruled Ukraine and its inhabitants only in the 19th and at the beginning of the 20th century. Ukrainians living outside the Russian Empire were also called Little Russians. But the name Ukraine was also quite widely used in Russian scientific and literary publications. The name Little Russia was sometimes restricted only to Left-Bank Ukraine within the limits of Poltava, Kharkiv, and Chernihiv gubernias. After the Revolution of 1917 the terms Little Russia and Little Russian were dropped from general and official usage. Ukrainians did not approve of the term Little Russia, and it does not appear in Ukrainian folklore.

B. Kravtsov

Little Russia gubernia. An administrative territory of the Russian Empire set up in 1796. It consisted of the former Kiev (except for the city itself and its region on the right bank of the Dnieper), Novhorod-Siverskyi, and Chernihiv vicegerencies as well as the town of Kremenchuk and the former Poltava and Myrhorod regiments. The capital of the gubernia was Chernihiv. The court system of the Hetman state, including the general court, the estate land courts, and the *pidkomorskyi* courts, was restored in the gubernia. In 1802 Little Russia gubernia was divided into Chernihiv and Poltava gubernias.

Little Russian Collegium (Malorosiiska kolehiia; Russian: Malorosiiskaia kollegiia). Two distinct administrative institutions set up in Ukraine in the 18th century by the imperial Russian government. The first collegium was established by Peter I on 29 April 1722 in Hlukhiv. Its purpose was to oversee and monitor the activities of the hetman and his officers as well as the regimental and company *starshyna* in Ukraine. The collegium consisted of six staff officers from Russian regiments and garrisons stationed in Ukraine and a procurator, all of whom were appointed by the tsar and were to serve only one year. Its

chairman was Brigadier S. Veliaminov. At the same time responsibility for Ukrainian affairs in St Petersburg was transferred from the Collegium of Foreign Affairs to the Senate (ie, from external to internal affairs). Taking advantage of the interregnum after Hetman I. Skoropadsky's death, when only an acting hetman, P. Polubotok, was appointed, the collegium usurped the powers of the hetman and acted as the highest administrative, judicial, and financial body in Ukraine. It reviewed the instructions of the hetman's office, served as an appeals court, and made fiscal decisions (increasing taxes fivefold). Its interference in the affairs of the hetman administration and arbitrary behavior aroused the indignation of the *starshyna* and sparked many protests from the hetman's office. Peter II promised to abolish the collegium and finally did so on 29 September 1727.

The second collegium was established by a decree of Catherine II, issued on 10 November 1764. With the abolition of the Hetman state it was to act as the highest governing body in Ukraine. Its task was to eradicate the last vestiges of Ukraine's autonomy, destroy the Cossack *starshyna*, and increase the economic exploitation of Ukraine. It consisted of eight permanent members appointed by the central government – four Ukrainians chosen from the general *starshyna* and four Russians. The president of the collegium was Count P. *Rumiantsev, who was also the governor-general of Ukraine and the commander in chief of all troops on its territory. His jurisdiction extended to the Zaporizhia. In 1782 the administrative system of Russian-ruled Ukraine began to be reorganized. Three vicegerencies were set up, and the second Little Russian Collegium was finally abolished on 20 August 1786.

Little Russian mentality (*malorosiistvo*). An inferiority complex in some Ukrainians, particularly among the intelligentsia, with respect to the Russians. Its essential components are admiration and identification with Russian culture and imperial tradition and a denial of Ukrainian distinctiveness, accomplishment, and political aspirations. According to M. *Drahomanov the mentality is typical of Russified Ukrainians, whose national identity was shaped by alien pressures. Their experience led them to absorb mostly the bad qualities of the alien Russian culture and to reject the good qualities of their own culture. For V. *Lypynsky the Little Russian mentality is a sickness arising out of Ukraine's lack of statehood. Ye. *Malaniuk defined the political Little Russian complex as a lack of national spiritual sovereignty, 'the lack of the most elementary national instinct and the paralysis of political will,' and a 'national defeatism' that was manifest in self-hatred in the 18th century and later in surrender to Moscow and servility to its rulers. A similar analysis can be found in M. *Khvylovy. Among the intelligentsia of Western Ukraine there was a somewhat analogous complex with respect to the Poles, expressed in the self-definition '*gente Ruthenus, natione Polonus*' and labeled *khrunivstvo* (piggishness) by Ukrainians. Ukrainians in Transcarpathia who were de-

voted to Hungary were called *Magyarones. There is a distinction between the Little Russian mentality and Russophilism (see *Russophiles), although the two were sometimes similar in their expression and their results.

B. Kravtsiv

Little Russian Office (Russian: Prikaz Malyia Rossii, Malorossiiskii prikaz). A Muscovite agency established in 1663 to represent the tsar's interests in the Left-Bank or Hetman state. The office was based in Moscow and had a staff of approx 20. It maintained ties on the tsar's behalf with the hetman's government and representatives in Moscow, kept the tsar informed of developments, gathered intelligence, supervised and supplied the Muscovite garrisons in several of the Hetmanate's towns, mitigated conflicts between them and the people, oversaw the construction of fortresses and bridges, looked after the interests of Russian merchants in Ukraine, issued travel permits, and settled jurisdictional disputes. The office also monitored the administrative institutions of the Hetman state and the hetman's correspondence with foreign rulers, reviewed the hetman's appointments, and interfered in the affairs of the Orthodox church in Ukraine. From 1707 it had a resident general in the hetman's capital. The head of the Little Russian Office also usually headed the Muscovite Office of Foreign Envoys and was responsible directly to the tsar. The office was replaced in 1722 by the *Little Russian Collegium.

A. Zhukovskiy

Little Russian Secret Society (Malorosiiske taïemne tovarystvo). A political organization active in the early 1820s in Left-Bank Ukraine. It was organized and headed by V. *Lukashevych, marshal of the nobility of Pereiaslav county. Although precise information about the society is not available, from the testimony of many leading activists of the Decembrist movement it appears that the society's main goal was to gain independence for Ukraine. The society had its 'catechism,' which to the question 'Where did the sun rise?' prescribed the reply 'In Chyhyryn.' A number of landowners from the Poltava region, including S. Kochubei, V. Tarnovsky, and the Oleksiiv brothers, belonged to the society and were arrested in 1826 in consequence. Lukashevych and the society developed contacts with some professors of the Nizhen Lyceum and some residents of Kiev and other towns of Left-Bank Ukraine, as well as with clandestine Polish organizations, but probably avoided closer ties with Russian Decembrists. During the tsarist investigation in St Petersburg in 1826 Lukashevych denied that such a society had ever existed. All its members were released quickly, but Lukashevych was confined to his estate in Boryspil for the rest of his life.

Liturgical books. Books that contain the text and instructions for liturgical services. These books contain basic church services (the Divine *Liturgy, vespers, matins, and so forth) and/or special services (such as baptisms, weddings, and funerals). General liturgical books include

the *Liturgicon (*sluzhebnyk*); *chasoslov (Horologion); *Octoechos (*oktoikh*); *Menaion (*mineia*); *Triodion (*triody*); and *Typikon (*typikon* or *typyk*), which contains the statutes governing services. Special or individual services are contained in the *trebnyk, Acathistus (*akafisnyk*), Breviary (*molytoslov*), and other books. Liturgical books that provide both text and notes (for singing) include the Octoechos; *Hirmologion; and *triody notna*, a type of Triodion. The *bohohlasnyk* includes text and notes for popular religious songs and hymns sung in the Ukrainian Catholic church. A final category of liturgical books includes those with texts of the Scriptures: the Bible, *Apostol, and *Psalter.

The earliest liturgical books used in Ukraine were Church Slavonic translations of Byzantine texts. The subsequent history of Ukrainian liturgical books is linked closely to major changes in the history of the Ukrainian churches, including the devastation suffered during the Mongol invasion, the strife resulting from division into two churches, subordination to the Russian Orthodox church in the 18th to 20th centuries, the brief renaissance of the 20th century, repression under Soviet rule, and existence as a diaspora church outside of Ukraine. Each such major change in the circumstances of the churches has been accompanied by calls to revise extant church texts. During the 16th-century Ukrainian Orthodox revival, for example, discussions begun at sobors in 1591 and 1593 resulted in an extensive review of church texts (which were checked against Greek originals and earlier Church Slavonic versions) and revision of the *Trebnyk* (1606), Liturgicon (1617 and 1620), Triodion (1627 and 1631), Menaion (1638), and other books. With the strengthening of Russian control over Ukrainian church affairs, liturgical books were Russified and purged of Ukrainian elements, and for much of the 18th and 19th centuries the Russian church officially prohibited the printing and distribution of Ukrainian liturgical books. At the same time, Ukrainian Catholic liturgical books and practices were being subjected to strong Latinizing and Polonizing pressures, evident, for example, in the decisions of the Synod of *Zamostia of 1720.

Many of these trends were reversed in the 20th century. The *Ukrainian Autocephalous Orthodox church attempted to Ukrainianize the church rite in the 1920s and commissioned the preparation of several new liturgical books in Kiev. Such work was also undertaken in the interwar period by scholarly institutions located in Lviv, Warsaw (the *Ukrainian Scientific Institute), and Lutske (the *Mohyla Society). Under the leadership of Metropolitan A. *Sheptytsky, the Ukrainian Catholic church also worked to Ukrainianize its liturgical books, beginning in the early 20th century. This effort was reflected in the publication of a new Liturgicon in 1906. It was continued under Cardinal Y. *Slipy, who personally oversaw the preparation of several revised texts after his arrival in Rome in 1963. Since the Second World War most work on the revision of liturgical books has been carried on outside Ukraine, in Rome, South Bound Brook (United States), and Winnipeg (Canada). The Liturgical Commission of the Ukrainian Catholic church was especially active in the 1960s and 1970s, when it published Ukrainian translations of several church texts that had existed only in Church Slavonic. (See also *Church rite.)

I. Korovytsky

Liturgical language. The language used in church services. Although Latin remained the only liturgical language in the Western church for many centuries, from the beginning the Eastern Christian church encouraged the use of the vernacular (eg, Syrian, Armenian, Georgian) in newly established churches. In the 9th century the basic liturgical texts were translated by the Byzantine missionaries Cyril (see *Saint Cyril) and Methodius into a form of Old Bulgarian that later became known as Old *Church Slavonic. This language was to serve as the main church language of Rus'-Ukraine (as well as of other Eastern rite Slavic churches) for many centuries.

The Church Slavonic language used in Ukraine was phonetically Ukrainianized virtually from its adoption to make it more comprehensible for believers. In the 16th century, in part under the influence of the Reformation, some attempts were made to introduce the vernacular for use in churches, and several translations of the Gospels were made.

The widespread use of the Ukrainian variant of Church Slavonic (as well as attempts to introduce the vernacular) ceased following the subjugation of the Ukrainian Orthodox to the Russian Orthodox church in the late 17th century. Church hierarchs launched a full assault on the Ukrainian language by condemning the Ukrainian pronunciation of Church Slavonic in singing, sermons, and the performance of rites and replacing it with a Russian pronunciation. This measure was accompanied by heavy censorship of church books printed in Ukraine. For the next two centuries the traditional form of Ukrainian liturgical articulation was retained only outside the boundaries of the Russian Empire (in Galicia, Bukovyna, and Transcarpathia).

With the renewal of Ukrainian statehood in 1917–20, the Ukrainian Autocephalous Orthodox church (UAOC) revived the traditional Ukrainian articulation of Church Slavonic and introduced the vernacular for use in some parts of the service. Within a relatively short period of time a circle of scholars (including Metropolitan V. *Lypkivsky) had translated many essential church texts, including the *Liturgicon and *trebnyk, into modern Ukrainian. After the Russian Orthodox church re-established its dominance in Ukraine following the liquidation of the UAOC in the 1930s, the Ukrainian vernacular and the Ukrainian form of Church Slavonic were not recognized as liturgical languages. A revival of Ukrainian liturgical language during the Second World War (under the German occupation) was likewise short-lived. Churches of the official Russian Orthodox church in Ukraine (since 1990 called the Ukrainian Orthodox church) today use the Russian form of Church Slavonic except in the Western Ukrainian areas annexed in 1945, where a traditional Ukrainian articulation is tolerated. The UAOC, revived again in the late 1980s, has again introduced Ukrainian into common use. The various *Evangelical Christian denominations in Ukraine are generally either Russian or Ukrainian.

During the interwar period the use of vernacular Ukrainian as a liturgical language made considerable headway in Ukrainian parishes of the *Polish Autocephalous Orthodox church. The texts most commonly used included the Kiev translations of the 1920s and works prepared by I. *Ohiienko; the *Ukrainian Scientific Institute in Warsaw; and the *Mohyla Society in Lutske, which published

texts of individual services and monographs about the distinctiveness of the Ukrainian church. A large-format Gospel published by the Orthodox metropolity in this same period provided a much-needed addition to the basic library of Ukrainian liturgical texts. After the Second World War, when Poland became a Soviet satellite, church life was simultaneously Polonized and Russified, and the use of Ukrainian was severely limited.

Ukrainian is used as a liturgical language by Ukrainian Catholic, Orthodox, and Protestant churches in the West. Orthodox churches and Protestant denominations generally started moving toward the use of vernacular Ukrainian in the early 20th century; the Ukrainian Catholic church retained Church Slavonic until the 1960s. The Second Vatican Council decreed that in the Latin rite the use of the vernacular as a liturgical language was permissible. The synod of Ukrainian bishops accepted the decree for the Ukrainian Catholic church and initiated the change (despite opposition from some believers). Since then, English has overtaken Ukrainian as the language of the church in many parishes in North America.

Title page of the Liturgicon printed by the Kievan Cave Monastery Press in 1629

Liturgicon (*sluzhebnyk*). Also called a missal, a church book that contains the text of the prayers of the priest, deacon, and participants – as well as ritual prescriptions – which are required for the performing of a Divine *Liturgy. The complete or *velykyi* (Great) Liturgicon includes the text for the four forms of the Liturgy and the full range of gospel and epistle readings that they might require, as well as other prayers.

The oldest Church Slavonic Liturgicons – those used in Kievan Rus' – were attributed to Anthony the Roman (d 1147) and Barlaam (d 1192). Modern Liturgicons are based upon the Diataxis of Philotheus Coccinus, the Patriarch of Constantinople (1352–76), which was translated into Old Church Slavonic and introduced into the Ukrainian church by the Kievan metropolitan Cyprian (d 1406). The most important Liturgicon for the Ukrainian Orthodox church was compiled and edited by Metropolitan P. Mohyla in Kiev in 1629 (revised in 1639). It was used in all Orthodox churches until the Russian Holy Synod adopted

the Synodal text and imposed it on the Ukrainian church in 1721. The first known Ukrainian Catholic text of the Liturgicon appeared in Vilnius in 1617. The Liturgicon in an enlarged format (by Metropolitan K. Zhokhovsky, 1692) included the epistle and gospel readings with all the propers of the movable and immovable feasts and the liturgical hours; it was greatly influenced by Roman Catholic practices. Revised and republished in 1905 (after the Lviv Synod of 1891), this basic text was used until 1941, when, at the request of the Ukrainian Catholic bishops, the Vatican promulgated a new version based on the Liturgicon used prior to 1692. All Ukrainian Catholic Liturgicons used Old Church Slavonic, and it was only in 1968 that a modern Ukrainian version was approved for use in the church. Several translations of Liturgicons have been prepared for the Ukrainian Orthodox church since 1917, including a complete set undertaken by a commission of the *Ukrainian Scientific Institute in Warsaw during the 1930s and another prepared at the Theological Research Institute in New York in 1963. There is, however, no single standard Liturgicon adopted by all Orthodox jurisdictions.

I. Korovytsky, M. Vavryk

Liturgy, Divine (*Bozhestvenna Liturhiia*). A eucharistic church service performed by a priest or bishop, with the assistance of a deacon; known commonly as the Mass in the Latin rite. The most fundamental of Christian church services, the Divine Liturgy symbolically commemorates the earthly life, death, and resurrection of Jesus Christ. The four Divine Liturgies used by Ukrainians date from the 4th century but acquired their present format in the 9th century. The Divine Liturgy of St John Chrysostom is the most commonly used and is celebrated on Sundays and weekdays. The Divine Liturgy of St Basil the Great is observed 10 times a year and is distinguished mainly by the longer silent prayers said by the priest. The Divine Liturgy of the Presanctified Gifts is performed on Wednesdays and Fridays during the Great Lent and on the first days of the week preceding Easter. It is notable for using eucharistic species consecrated during a previous Liturgy. The Divine Liturgy of the Holy Apostle Jacob (James) is celebrated once a year, on his feast day (5 November [23 October OS]).

The Divine Liturgy might be described as a series of connected prayer sequences or as the divine drama (*leitourgia*). It is celebrated in three parts: (1) the prayers of entry, with vesting and Proskomidiia (Prothesis); (2) the Liturgy of the Catechumens or the Word; and (3) the Liturgy of the Faithful or the Eucharist, which includes the Anaphora and Communion. Proskomidiia is an elaborate rite during which the priest prepares the bread and wine to be used in the Communion. The Liturgy of the Catechumens begins with the Great Litany of Peace, includes the processional entrance of the priest with the Gospel, and is centered around the reading of the New Testament letters (*Apostol*) and Gospel and a sermon or a homily. It concludes with the admonition of the catechumens (unbaptized) to leave; they are not permitted to participate in the rest of the service. The Liturgy of the Faithful reaches its climax during the Anaphora, which is centered around transubstantiation or the transformation of the bread and wine into the Body and Blood of Jesus Christ (consecration). It is followed by the Communion or distribution of the consecrated species among the congregation of believ-

ers. It includes the recitation of the Creed and the Lord's Prayer. The texts of the Liturgies can be found in a *Liturgicon.

The Ukrainian celebration of the Liturgy involves numerous well-developed practices, including the assistance of deacons in the service (when they are available), a pronounced spatial division between priest and congregation (accented during certain portions of the Liturgy by the opening or closing of the middle or Royal Gates of the *iconostasis), symbolic processions by the bishop or a priest and his retinue around the altar, and the extensive use of candles and incense. Likewise, the choral accompaniment to the Liturgy is well defined and highly regarded (see *Church music). Additional services commemorating feast days or other occasions are commonly performed separately from but in conjunction with the Liturgy (see *Church holidays).

The Ukrainian Orthodox and Catholic churches, like all Eastern Slavic churches, maintain their own specific ritual forms in celebrating the Divine Liturgy. These are particularly evident if compared to the liturgical norms of the Russian Orthodox church. The priest in a Ukrainian church, for example, traditionally reads the Gospel facing the congregation, while in the Russian church he is turned away from them; moreover, the Ukrainian priest keeps the Royal Gates of the iconostasis open considerably longer than does the Russian. After the subjugation of the Ukrainian Orthodox to the Russian Orthodox church in the 18th century, numerous Russian elements were introduced into the Liturgy. The Ukrainian Autocephalous Orthodox church that emerged after 1917 reformed the Liturgy (including abbreviations) and revived many old Ukrainian traditions. These traditions are now observed by most Ukrainian Orthodox jurisdictions in the West, but the official Ukrainian Orthodox church under the Moscow patriarch retains many Russian elements in its Liturgy.

In Galicia, Ukrainian Catholic liturgical practice was subjected to Latinizing influences through Polish Roman Catholicism until the end of the 19th century. The *Lviv Synod of 1891 undertook a number of reforms intended to restore a more traditional form of observance, but with only limited success. In the late 1920s Metropolitan A. *Sheptytsky also favored a return to traditional practices, and a special commission tried to standardize liturgical practices. More recently, the Liturgical Commission under the Congregation for Eastern Churches at the Vatican published authoritative editions of the three major Liturgies used in the Ukrainian Catholic church, which have given rise to greatly increased standardization since the 1960s.

Lityn. IV-9. A town smt (1990 pop 7,200) on the Zhar River and a raion center in Vinnytsia oblast. Lityn is first mentioned in a historical document in 1431. At that time a fortified castle, situated on an island in the Zhar River, was built there. In 1578 Lityn was granted the rights of *Magdeburg law. The town was heavily damaged in the Cossack-Polish War of 1648-57. It was involved in the popular rebellions of 1687 and 1702-3 and in the haidamaka uprisings of 1750 and 1768. After the second partition of Poland in 1793, Lityn was annexed by Russia, and became a county center in Podilia gubernia. At the beginning of the 19th century it took part in U. *Karmaliuk's rebellion. He was imprisoned there in 1822-3, 1827, and 1830-2, and escaped twice (1827, 1832). In 1919-20 Ota-man Ya. Shepel's partisans fought the Red Army and A. Denikin's army in the vicinity of Lityn. The Ukrainian Galician Army and the UNR Army were also active in the region, in 1919 and 1920 respectively. Today Lityn has a fruit- and vegetable-canning factory, a mixed-feed factory, two granite quarries, and a regional museum.

Liubachiv [Ljubačiv] (Polish: Lubaczów). III-4. A town (1989 pop 11,600) on the Liubachivka River and a county center in Poland's Peremyshl voivodeship. It was part of Peremyshl principality in Kievan Rus' at the end of the 11th century. In 1344 it was annexed by Poland, and Casimir III built a castle there. For a period in the 17th century it was held by the Cossacks. In 1717 A. Sieniawski established a famous glass-works there.

Metropolitan Myroslav Liubachivsky

Liubachivsky, Myroslav [Ljubačivs'kyj], b 24 June 1914 in Dolyna, Galicia. Ukrainian Catholic cardinal and metropolitan. Having studied at the Greek Catholic Theological Academy in Lviv, at the Catholic University in Innsbruck, in Sion, Switzerland (D TH, 1941), and at the Gregorian University in Rome, he arrived in the United States in 1947. After a period of teaching and pastoral work at St Basil's Seminary in Stamford and other locations, he was assigned to a parish in Cleveland. In 1968 he became spiritual director of St Josaphat's Seminary in Washington, and in 1977 he assumed the same post at St Basil's Seminary. In 1978 Liubachivsky was named archbishop of Philadelphia and metropolitan of the Ukrainian Catholic church in the United States. In 1979 he was made coadjutor and successor to Cardinal Y. Slipy at an extraordinary synod of Ukrainian Catholic bishops. When Slipy died in 1984, Liubachivsky became archbishop major of Lviv, metropolitan of Halych, and head of the Ukrainian

Catholic church. In 1985 Pope John Paul II appointed him a cardinal. Liubachivsky has traveled extensively to visit his followers, and in 1991 he was finally permitted to travel to his see of Lviv. He has been actively involved in the rebirth of the church in Ukraine in presiding over the re-establishment of a formal church structure and regular eparchies. He has also published collections of sermons and other works.

Liubar [Ljubar]. IV-8. A town smt (1990 pop 2,700) on the Sluch River and a raion center in Zhytomyr oblast. It originated as Liubartov in the mid-14th century when the Lithuanian duke Liubartas extended the old town of Bolokhiv by building a castle on the right bank of the river. Liubartov became the center of one of the principalities of the Lithuanian state. In 1569 it came under Polish rule, and in 1604 it was renamed Liubar. An important trading center, Liubar was destroyed by the Crimean Tatars in 1593 and 1618. It played an important role in the Cossack-Polish War of 1648–57. In the 1760s there was a strong haidamaka movement in the region. In 1793 Liubar came under Russian rule and played a part in the Decembrist movement. In the 19th century it was an important economic center in Volhynia, but it declined under Soviet rule, and it became an smt in 1924. Today Liubar has a food industry. Its architectural monuments include a Dominican Catholic church built in 1752 and a monastery built in 1634 in the Renaissance style. Archeologists have discovered several settlements of the *Trypilian culture, Bronze Age, early Iron Age, and *Cherniakhiv culture near Liubar.

Semen Liubarsky

Liubarsky, Semen [Ljubars'kyj], b 1878, d July 1944 in Skryhichyn, Hrubeshiv county, Kholm region. School teacher and civic and church activist. He was a member of the Central Rada (1917–18) and, in the interwar period, a deputy to the Polish Sejm (1922–8). He published articles on the history and ethnography of the Kholm region.

Liubart, Varvara [Ljubart] (real surname: Kolyshko), b 26 April 1898 in Poltava, d 4 November 1967 in Lviv. Stage actress. She studied in St Petersburg at the conservatory and at the drama school in the Aleksandrian Theater (1916–18). She joined the State People's Theater under P. Saksahansky in 1918 and continued in his People's Theater (1919–22). In 1922 she was one of the founders of the Zankovetska Theater in Kiev, with which she stayed when it moved to Lviv in 1944. Her best roles were Desde-

mona in W. Shakespeare's *Othello*, Hilda in I. Kocherha's *Svichchynne vesillia* (Svichka's Wedding), and Anna in I. Franko's *Ukradene shchastia* (Stolen Happiness).

Liubartas [Ljubartas] (Ukrainian: Liubart), b ?, d ca 1385. Lithuanian-Ruthenian duke of Volhynia; son of Grand Duke *Gediminas. Ca 1322 he married a daughter of Prince *Andrii Yuriiiovych of Galicia-Volhynia. After Liubartas accepted Orthodoxy and was baptized as Dymytrii, Andrii awarded him the Lutske land. After Andrii's death ca 1323, his successor and Liubartas's cousin, *Yurii II Boleslav, granted Liubartas the Volodymyr-Volynskyi land. In 1340, after Yurii was poisoned, the boyars offered the Galician-Volhynian throne to Liubartas. Liubartas's and Yurii's brother-in-law, *Casimir III of Poland, contested Liubartas's rule, however. War between Poland and Liubartas and his brothers lasted for 40 years. By 1349 Casimir had seized Galicia, and by 1366 he controlled all of Volhynia except the Lutske land. After Casimir's death in 1370, Liubartas and his brother Kęstutis failed to regain Galicia but recaptured all of Volhynia, which thereafter remained under Lithuanian-Ruthenian rule until 1569. Liubartas was succeeded briefly by his son, Fedor, who ca 1387 was forced to surrender his lands to his cousin, *Vytautas.

Liubashivka [Ljubašivka]. VI-11. A town smt (1990 pop 9,900) in the northwestern part of the Black Sea Lowland and a raion center in Odessa oblast. It was founded in the late 18th century, and became an smt in 1957. Liubashivka has a mixed-feed factory, a dairy, an oil-pressing plant, a grain elevator, and a regional museum.

Liubavsky, Matvii [Ljubavs'kyj, Matvij] (Liubauski, Matsvei), b 13 August 1860 in Bolshie Mozharj, Riazan gubernia, d 22 November 1936 in Ufa. Historian of Belarusian origin; full member of the USSR Academy of Sciences from 1929. He was a student of V. Kliuchevsky and later became a professor at Moscow University (1901–17, rector from 1911). A specialist in the history of the Lithuanian-Ruthenian state, he wrote *Oblastnoe delenie i mestnoe upravlenie Litovsko-Rus'kogo gosudarstva ko vremeni izdaniia pervogo Litovskogo statuta* (Regional Division and Local Government in the Lithuanian-Ruthenian State to the Time of the Publication of the First Lithuanian Statute, 1898), *Litovsko-russkii seim* (The Lithuanian-Ruthenian Diet, 1901), and *Ocherk istorii Litovsko-Russkogo gosudarstva* (Survey of the History of the Lithuanian-Ruthenian State, 1910), as well as *Istoriia zapadnykh slavian* (History of the Western Slavs, 1917; 2nd edn 1918) and a study in Belarusian of the Lithuanian-Belarusian state at the beginning of the 16th century (1926). M. Hrushevsky published *O knige M.K. Liubavskogo 'Lektsii po drevnei russkoi istorii do kontsa XVI v.'* (On the Book by M. Liubavsky 'Lectures in Ancient Ruthenian History to the End of the 16th Century,' 1915), and I. Borozdin's bibliography of Liubavsky's works was published in the commemorative *Sbornik statei v chest' M.K. Liubavskogo* (Collection of Articles in Honor of M. Liubavsky, 1917). After the revolution Liubavsky was exiled to Ufa.

Liubchenko, Arkadii [Ljubčenko, Arkadij], b 7 March 1899 in Saryi Zhyvotiv, Uman county, Kiev gubernia, d 25 February 1945 in Bad Kissingen, Germany. Writer. He

Arkadii Liubchenko

Panas Liubchenko

was active in the literary movement of the 1920s and 1930s, as secretary of the literary association Hart, co-founder and permanent secretary of Vaplite, and co-founder of Prolitfront and the almanac *Literaturnyi iarmarok*. He edited the State Publishing House of Ukraine editions of V. Vynnychenko's selected works (1927) and V. Stefanyk's selected works (1928). He also worked in the editorial office of the newspaper *Vil'na Ukraina* in Kharkiv (1941–2). He began to publish his work in 1918, including the neoromantic-impressionist collections of stories and novels *Buremna put'* (The Tempestuous Road, 1927), *Vona* (She, 1929), and *Vitryla tryvoh* (The Sails of Anxieties, 1932) as well as articles, essays, and translations of the French authors A. Daudet and F. Mauriac. His *Shchodennyk* (Diary, 1951) was published posthumously.

Liubchenko, Mykola [Ljubčenko] (pseud: Kost Kotko), b 29 February 1896 in Kiev, d 25 November 1937. Writer. During the revolution he was a leading member of the *Borotbists and edited that group's organ, *Borot'ba*. Later, as a member of the CP(B)U, he edited *Komunist* (see **Radians'ka Ukraina*). He began to publish his works in 1911. During the Soviet period his feuilletons appeared in the press, and several collections of his satirical sketches, particularly aimed at the Ukrainian National Republic, were published: *Petliurina* (1921), *Proty Symona Petliury* (Against S. Petliura, 1921), and *Istukrev* (1928). He was arrested in 1934, imprisoned in the Soviet Arctic, and executed there by the NKVD.

Liubchenko, Panas [Ljubčenko], b 14 January 1897 in Kaharlyk, Kiev county, Kiev gubernia, d 29 August 1937 in Kiev. Soviet political leader. A member of the Central Committee of the Ukrainian Party of Socialist Revolutionaries, in 1918 he headed its leftist faction, known as the *Borotbists. Eventually, when internationalists within the party, which split off and in 1918–20 reorganized, formed the Ukrainian Communist party (of Borotbists), and merged with the CP(B)U, he became secretary of the Party's Kiev Gubernia Committee, head of the Chernihiv Gubernia Executive Committee (1921–2), and president of the All-Ukrainian Association of Agricultural Co-operatives (1922–5). In 1927 he was promoted to the position of secretary of the CC CP(B)U, and in 1934, to that of full member of the Politburo. At the same time he was deputy

chairman (1933) and chairman (1934–7) of the Council of People's Commissars of the Ukrainian SSR. Liubchenko carried out the Party's centralist policies in Ukraine. In the show trials of the Union for the Liberation of Ukraine he acted as a 'people's prosecutor' from the All-Ukrainian Council of Trade Unions. He also played a political role in the collectivization and the grain requisition, which precipitated the 1932–3 famine in Ukraine. He seems to have committed suicide while facing imminent arrest. At the Moscow show trials he was accused posthumously of creating a nationalist-fascist organization. He was rehabilitated in the early 1960s, and his biography was published in 1970.

V. Markus

Liubech [Ljubeč]. II-11. A town smt (1990 pop 3,800) on the left bank of the Dnieper River in Ripky raion, Chernihiv oblast. One of the oldest towns in Ukraine, Liubech is first mentioned in the chronicles in 882, when it was captured by Prince Oleh. In the 10th and 11th centuries it was an important center of the Chernihiv region. It was the birthplace of St Anthony, the founder of the Kievan Cave Monastery. It was the site of the Battle of *Liubech in 1016 and of the *Liubech congress of princes in 1097 and a similar congress in 1135. Liubech was burned down by Prince Rostyslav in 1147 and by the Cumans in 1157. It was annexed by Lithuania in 1356, and under the Treaty of Lublin it was transferred to Poland and became a starostvo center. The town played an important role in the Cossack-Polish War of 1648–57 and then came under Muscovy's rule. From then Liubech declined and lost political significance. In 1958 it became an smt. Today Liubech has a fruit-drying plant, a cheese workshop of the Ripky dairy, and a fish farm. Archeologists have discovered 16 settlements from the Neolithic Period, 6 settlements from the early Iron and Bronze ages (8th–2nd century BC), and 5 Slav settlements around Liubech. The remnants of the medieval castle have been uncovered, and a stone building from the 17th century has survived.

Liubech, Battle of. A battle between the sons of Volodymyr the Great, Sviatopolk I and Yaroslav the Wise, in 1016 near the town of Liubech. Volodymyr's death in 1015 precipitated a struggle among his sons for the throne of Kiev. Sviatopolk proclaimed himself grand prince and ordered his half-brothers, Borys and Hlib, as well as Sviatoslav, prince of the Derevlians, killed. Upon learning of his crime, Yaroslav gathered an army of 40,000 Novgorodians and 1,000 mercenary Varangians and marched against Sviatopolk. After being defeated at Liubech Sviatopolk fled to his father-in-law, Bolesław I the Brave, in Poland, and Yaroslav assumed the throne of Kiev (see *Yaroslav the Wise).

Liubech congress of princes. A conference of the princes of Kievan Rus', convened at the initiative of Volodymyr Monomakh in Liubech in 1097. Its purpose was to end the conflicts among the princes and to unite them in the struggle against the Cumans. Besides Volodymyr Monomakh the congress was attended by five princes: Sviatopolk II Iziaslavych, the grand prince of Kiev, Oleh Sviatoslavych of Chernihiv, Davyd Sviatoslavych of Smolensk, Davyd Ihorevych of Volodymyr-Volynskyi, and Vasylo Rostyslavych of Terebovlia-Peremyshl. The con-

gress abolished the seniority principle of succession and adopted the principle of patrimony, whereby each prince would possess the lands ruled by his father. The congress thereby transformed a formally unitary state into a group of independent states joined together in a unique kind of federation, in which issues of common interest were settled at princely congresses. The Liubech congress decided to conduct a joint campaign against the Cumans. The congress did not succeed in ending the strife among princes, which weakened and eventually undermined Rus'.

Liubeshiv [Ljubešiv]. II-6. A town smt (1990 pop 5,100) on the Stokhid River and a raion center in Volhynia oblast. It is first mentioned in a historical document in 1484, when it was under Lithuanian rule. In 1569 it became part of the Polish Commonwealth, and at the end of the century a Pi- arist monastery was built there. In 1706 the town was destroyed by Charles XII of Sweden. After the partition of Poland in 1795, Liubeshiv was annexed by Russia, and became a *volost* center in Pynske county, Minsk gubernia. Today it is an agricultural town with a silicate brick factory and several food-processing enterprises. Its old monastery and 18th-century park are tourist attractions.

Liubin Velykyi [Ljubin' Velykyj]. IV-4. A resort town smt (1988 pop 5,000) on the Vereshytia River in Horodok raion, Lviv oblast. It has been known since the 13th century, and received the status of smt in 1964. From March to May 1919 the Ukrainian Galician Army fought several battles against the Polish army around Liubin Velykyi. The resort's hydrogen sulfate and calcium sulfate springs and muds are used for curative baths.

Liuboml [Ljuboml']. II-5. A city (1990 pop 10,200) in the southwestern part of Volhynian Polisia and a raion center in Volhynia oblast. Liuboml is first mentioned in the Hypatian Chronicle under the year 1287. It was Prince *Volodymyr Vasylykovich's favorite town, and his place of death in 1288. In the 14th century a castle was built there, and in 1541 the town was granted the rights of *Magdeburg law. From 1768 it belonged to the Branicki family, who built a palace and park there. In the interwar period Liuboml was a county center in Volhynia voivodeship. The city has the Svitiaz Machine-Building Plant, two lumber mills, and a regional museum. Its architectural monuments include the Church of St Gregory (1264), a Catholic church (1412), castle catacombs (15th–16th century), and a partly preserved 18th-century trading center. A burial site from the 3rd to 4th centuries and two fortified settlements from the time of Kievan Rus' have been excavated near Liuboml.

Liubomyrsky, Hryhorii [Ljubomyrs'kyj, Hryhorij], b 13 February 1865 in Vasylykiv, Kiev gubernia, d 14 February 1937 in Kiev. Music teacher and composer. A cofounder of the *Lysenko Music and Drama School in 1904, he taught there and at its successor institutions, the Lysenko Music and Drama Institute (from 1918) and the Kiev Conservatory (from 1934). His compositions include a Symphony in G-flat, *Elegy*, and eastern dances. He also wrote textbooks on elementary theory of music and harmony and articles in music journals. Liubomyrsky taught many individuals who figured prominently in Ukrainian musical life, including K. Stetsenko, O. Koshyts, and V. Verkhovynets.

Hryhorii Liubomyrsky

Stepan Liubomyrsky

Liubomyrsky, Stepan [Ljubomyrs'kyj] (pseud of Liubomyr Stepan Rykhtytsky; other pseud: Stepan Elerson, Mykola Khortytsia), b 21 April 1921 in Drohobych, Galicia, d 16 July 1983 in Chicago. Writer. Liubomyrsky's studies at Lviv University were interrupted when the university was shut down by the Germans. He joined the *Division Galizien in 1943. His writing career began in the POW camp in Rimini, Italy, in 1946 with the collection of stories *Son litn'oi nochi* (Dream of a Summer's Night, 1953), and the pseud Stepan Elerson). His second work, *Zhorstoki svitanky* (Cruel Dawns, 1947), was the first in a long series of novels devoted to the underground struggle for Ukraine's independence. Some of his novels, which were heavy on intrigue and full of national pathos, were extremely popular (*Plem'ia Vovkiv* [The Clan of Wolves, 1951], *Mizh slavoiv i smertiu* [Between Glory and Death, 1953], and *Pid molotom viiny* [Under the Hammer of War, 4 vols, 1955–6), although of little literary value and marred by two-dimensional characterizations. In his later novels, including the posthumous trilogy *Slidamy zapovitu* (Following the Testament, 1985), plot often gives way to ideological preaching. His first novel, *Zhorstoki svitanky*, was made into a film in 1965, produced by W. Wasik in Canada. Liubomyrsky wrote two more film scenarios for the Canukr film production company in Oshawa, Ontario: *Nikoly ne zabudu* (I Shall Never Forget, 1969) and *Zashumila verkhovyna* (Whispering Highlands, 1975).

D.H. Struk

Liubotyn [Ljubotyn]. IV-16. A city (1990 pop 29,000) in Kharkiv raion, Kharkiv oblast. Founded in the mid-17th century, Liubotyn served as a company center of Kharkiv regiment. In the mid-18th century the region was involved in the haidamaka movement. Since the 1880s Liubotyn has been an important railway junction on the Kharkiv–Mykolaiv line. It was given city status in 1938. It has several railway-related enterprises, a textile plant, a brickyard, a liquor distillery, and a dried yeast-feed factory. A Scythian settlement from the 2nd millennium BC has been discovered near Liubotyn.

Liubotyn fortified settlement. An important archaeological site located approx 25 km west of Kharkiv. Utilized extensively from the 7th to the 4th century BC, the site is noted for its defensive walls of earth and wood. Artifacts uncovered in the course of excavation in the early 1960s

indicate that Liubotyn was a highly developed bronze and iron manufacturing center.

Liubovsky, Petro [Ljubovs'kyj], b and d ? Philosopher and teacher of the early 19th century. After graduating from Kharkiv University (1808) he taught at the Kharkiv Gymnasium for five years and was a member and secretary of the Kharkiv Scientific Society (est 1812). He recognized the role of both experience and reason in knowledge and claimed that language was necessary to thought. He wrote short textbooks in Russian on experimental psychology (1815) and logic (1817).

Liubovych, Petro [Ljubovyč], b 1826 in Staryi Zbarazh, Zbarazh county, Galicia, d 1869 in Hrymaliv, Skalat county, Galicia. Composer and conductor. After graduating from the Lviv Theological Seminary in 1853, he was ordained and appointed conductor of a church choir in Peremyshl. He wrote a liturgy for mixed choir and a piano potpourri *Ulubione sola ruskie* (Favorite Ruthenian Solos), the first collection of Ukrainian piano music. He also arranged folk songs.

Liubovych, Uliana. See Starosolska, Uliana.

Oleksandra Liubych-Parakhoniak

Liubych-Parakhoniak, Oleksandra [Ljubyč-Paraxonjak] (Parakhoniak), b 14 March 1892 in Stanyslaviv, Galicia, d 23 February 1977 in Vynnyky (a suburb of Lviv). Opera singer (lyric-dramatic soprano). She was a student of O. Myshuha and the first performer of most of S. Liudkevych's solo songs. From 1917 she performed at the Lviv Municipal Theater as well as in the theaters of Cracow, Poznań, and Torun, notably the name-roles in S. Moniuszko's *Halka* and G. Verdi's *Aida*. She also toured Germany and Czechoslovakia. She quit the stage in 1937.

Liubymenko, Volodymyr [Ljubymenko], b 16 January 1873 in Veidelevka, Valuiky county, Voronezh gubernia, d 14 September 1937 in Leningrad. Botanist and plant physiologist; corresponding member of the USSR Academy of Sciences from 1922 and 1929 full member of the VUAN (now ANU) from 1929. A graduate of the Forestry Institute in St Petersburg (1898), he worked in France and at various scientific institutions in Leningrad. In 1928 Liubymenko organized the Institute of Applied Botany in Kharkiv, and in 1929 he became head of the Department

of Chemical Plant Physiology at the VUAN Institute of Botany. Most of his research dealt with the chemical aspects of plastids and pigments, photosynthesis, and photoperiodism. Besides publishing over 200 research papers he wrote the influential *Kurs obshchei botaniki* (A Course in General Botany, 1923). Liubymenko was critical of T. *Lysenko's theory of plant development, and died in the 1937 terror perhaps as a result.

Liubymivka fortified settlement and kurhans. Remains of a fortified settlement that existed from the 3rd century BC to the 3rd century AD, and a group of 60 kurhans of various dates, located near the present-day village of Liubymivka, Kakhivka raion, Kherson oblast. The settlement was situated on the left bank of the Konka River (now the left bank of the Kakhivka Reservoir). Excavations of the site were done in the 1920s (by the Kherson Historical Museum), 1951–2, 1968–9, and 1978 (by the AN URSR Institute of Archeology). The fortified settlement covered 3.5 sq ha and was surrounded by ramparts (5–10 m high) and a trench (6–25 m wide). Uncovered in the settlement were domestic stone dwellings, commercial buildings, and a cobblestone square. Pottery of local and foreign manufacture, tools, amphoras, coins, and other items were recovered in the course of excavations. The primary subsistence activity of the inhabitants was agriculture and animal husbandry; crafts and trade with such cities as *Olbia and *Chersonese Taurica were also important.

Liubymsky, Oleksandr [Ljubyms'kyj], b 26 March 1907 in Melitopil, Tavriia gubernia, d 19 April 1981 in Kharkiv. Painter. A graduate of the Kharkiv Art Institute (1932), he later taught there (1947–65). He painted landscapes, such as *Evening in the Steppe* (1937) and *At Dawn* (1957); socialist-realist genre scenes, such as *Descent into the Mine* (1932) and *Competition of Blast-Furnace Workers*; and, with M. Rybalchenko, large decorative panels, such as *Gathering Apples* (1939, for the Ukrainian pavilion at the USSR Exhibition of Economic Achievements in Moscow), *Toward the Star* (1969), and *At Lunch Break* (1977).

Liubynetsky, Roman [Ljubynec'kyi], b 3 December 1885 in Chesnyky, Rohatyn county, Galicia, d 30 June 1945 in Komarov, near Plzeň, Czechoslovakia. Opera singer (lyrical tenor) and teacher. He graduated from the Academy of Music in Vienna (1914) and was a soloist at the opera theaters of Dresden (1914–15), Cracow (1917–18), and Zagreb (1918–29). His main roles included Faust in C. Gounod's *Faust*, Cavaradocci in G. Puccini's *Tosca*, and Don José in G. Bizet's *Carmen*. In 1929–44 he was a professor at the Lviv Conservatory.

Liubynsky, Mykola [Ljubyns'kyj], b 5 October 1891 in Strikhiivtsi, Nova Ushytia county, Podilia gubernia, d 1930s. Political activist. A member of the Ukrainian Party of Socialist Revolutionaries, he sat on the Central Rada and the Little Rada. He represented the UNR at the Brest-Litovsk peace conference and signed an appeal to the German people for military assistance (12 February 1918). In March and April 1918 he served as UNR minister of foreign affairs in V. Holubovych's cabinet. Later, under the Soviet regime, he worked at the VUAN Institute of the Ukrainian Scientific Language in Kiev and was a member of the edi-

Mykola Liubynsky

Stanyslav Liudkevych

torial board of *Visnyk instytutu ukrains'koi naukovoï movy* (1930). He was arrested in the 1930s, and his fate is unknown.

Liubynsky, Vsevolod [Ljubyns'kyj], b 1840 in Kiev gubernia, d 1920. Pharmacologist and political leader. An active member of the Ukrainian People's Hromada, established by P. Skoropadsky in 1917, he participated in Skoropadsky's coup d'état and served in F. Lyzohub's and S. Gerbel's cabinets as minister of public health. He was a strong advocate of Ukrainianization in the Hetman government and in his own ministry placed Ukrainian officials in key positions.

Liubystok, Hryhorii [Ljubystok, Hryhorij], b and d ? Banduryst. From 1730 he served as musician at the court of Elizabeth I in St Petersburg. He attempted an escape to Ukraine in 1731 but was unsuccessful. In 1749 he was ennobled and granted the rank of colonel. He received an estate near Lubni, where he lived for the rest of his life. Liubystok was also active in the effort to restore the office of the hetman, which was filled by K. Rozumovsky in 1750.

Liudiie. The old term for the common people as distinct from the nobles and boyars of Kievan Rus'. Most of them were free: they paid the prince tribute but were not required to perform personal services. According to **Ruskaia Pravda* the penalty for killing a *liudin* was a single **vyra*, and for killing a prince's officer, a double *vyra*. In the 11th and 12th centuries various subclasses of *liudiie* were distinguished, including *chorni* (free town workers, mostly tradesmen), *narochyti* (wealthy merchants), and *tserkovni* (charges of the church).

Liudkevych, Stanyslav [Ljudkevyc], b 24 January 1879 in Jaroslav, d 12 September 1979 in Lviv. Composer, musicologist, folklorist, and pedagogue; member of the Shevchenko Scientific Society since 1935. He was taught piano as a child by his mother, and continued to study in Lviv under M. Soltys and in Vienna under O. Zemlinsky and P. Gredener (composition and instrumentation) and Guido Adler (musicology), where he obtained a PhD in 1907 with a dissertation on program music. He taught in gymnasiums in Lviv and Peremyshl in 1901–7; in 1908 he

was appointed director of the M. Lysenko Institute of Music in Lviv, and in 1919 he became an inspector of its branches and a lecturer in music theory. From 1939 he taught at the Lviv State Conservatory and then held the Chair of Composition until his retirement in 1972.

Liudkevych began composing choral works while still a gymnasium student. His symphonic cantata *The Caucasus* (1902–13), inspired by T. Shevchenko's poem of the same name, is considered one of the most eminent works in Ukrainian music of that time. Other choral compositions include *The Eternal Revolutionary* (1898), *The Reaper* (1901), *Khor pidzemnykh kovaliv* (The Chorus of Underground Blacksmiths, 1905), *Oi, vyhostriu tovarysha* (Oh, I'll Hone My Knife, 1917), and *The Testament* (1934). His symphonic compositions include *Strilets'ka rapsodiia* (The [Sich] Riflemen's Rhapsody, 1920), *Kameniari* (The Stonecutters, 1926, 2nd edn 1956), and *Vesnianky* (Spring Songs, 1935). He also wrote a piano trio, minor works for the piano and the violin, solo songs, the unfinished opera *Bar Kokhba* (1926), and arrangements of folk and rifleman songs. In his later period, he composed orchestral works, including *Symfonieta* (1943), *Koliadnytsia* (Christmas Caroler, 1944), *Iunats'ke rondo* (The Rondo of Youth, 1946), the symphonic poem *The Dnieper* (1948), *Prykarpats'ka symfoniia* (The Subcarpathian Symphony, 1952), concertos for piano and for violin, and the opera *Dovbush*.

Liudkevych edited works by earlier composers, including M. Verbytsky, O. Nyzhankivsky, V. Matiuk, and S. Vorobkevych. He composed and orchestrated the additional act in S. Hulak-Artemovsky's opera *Zaporozhian Cossack beyond the Danube* and orchestrated M. Lysenko's operas *Nocturne* and *Utoplana* (The Drowned Maiden). Liudkevych is the author of various theoretical works on Ukrainian music, including *Zahalni osnovy muzyky* (The Basic Principles of Music, 1921) and *Materiialy do nauky sol'fedzho i khorovoho spivu* (Materials for the Study of Solfège and Choral Singing, 1930). With O. Rozdolsky he compiled *Halyts'ko-rus'ki melodiï* (Galician-Ruthenian Melodies, 2 vols of *Etnohrafichnyi zbirnyk*, 1906–7). He wrote numerous commentaries and reviews, and edited articles on music in the journals *Artystychnyi vistnyk* (1905), *Muzychnyi lystok* (1925), and *Muzychnyi vistnyk* (1929–34).

A major anthology of Liudkevych's writings was published in Kiev in 1973 but immediately withdrawn from circulation. In 1976 a reprint edition of this work was published in the United States, and a considerably shortened anthology appeared in the Ukrainian SSR.

Liudkevych played an important part in developing musical culture in Ukraine through his activity in the *Boian society and in the *Lysenko Higher Institute of Music. His compositions are characterized by highly professional skill and a tendency toward monumentalism and drama.

A. Rudnytsky, R. Savytsky

Liudyna i svit (Man and World). A monthly published by the Znannia Society of Ukraine in Kiev since October 1960. Until 1964 it was called *Voiovnnychy ateist*. Until 1990 it included articles on atheism and the methodology of atheistic propaganda and propagated new Soviet feasts and rites to replace traditional church holidays.

Arkhryp Liulka

Liulka, Arkhryp [Ljul'ka, Arxyp], b 23 March 1908 in Savarka, Kaniv county, Kiev gubernia, d 1 April 1984 in Moscow. Airplane engine designer; full member of the USSR Academy of Sciences from 1968. He graduated from the Kiev Polytechnical Institute (1931), worked in Kharkiv, Leningrad, and Moscow, and taught at the Kharkiv Aviation Institute. He headed the Aircraft Design Bureau of the State Committee for Aviation Engineering at the USSR Council of Ministers and from 1965 worked in the USSR Ministry of the Aircraft Industry. He designed the first Soviet turbo-compressor jet engine (1937–9) and other turbo jet engines, such as the AL-3 and AL-5, and worked on new fuels.

Liutkovych-Telytsia, Pavlo [Ljutkovyč-Telycja] (Domzhiv-Liutkevych), b ? in Western Ukraine, d 1634 in Chorna, Volhynia. Churchman and printer. He ran a series of printing presses in Uhortsy, near Sambir (1617–21); in Minsk, Belarus (1622); and in Volhynia at the Chetvertnia (1624–5), Lutske (1625–8), and Chorna monasteries. He was also hegumen of the SS Peter and Paul Monastery in Minsk (from 1611) and the monastery in Chorna (1628–34). Seven of the nine books he is known to have printed have been preserved, including his own panegyric to O. Sheptytsky (1622). He printed panegyrics, theological works, poetry, and textbooks.

Liutsenko, Oleksander [Ljucenko], b 12 August 1806, d 9 February 1884 in St Petersburg. Archeologist. While serving as director of the Kerch Archeological Museum from 1853 to 1878, he conducted excavations of Scythian and Hellenic monuments in Katerynoslav gubernia, the Taman Peninsula, and the Crimea near Kerch. He excavated the well-known *Oleksandropil and *Melek-Chesmen kurhans. The finds that he discovered are preserved at the Kerch Museum and the Hermitage in St Petersburg.

Among his archeological studies is the monograph *Drevnie evreiskie nadgrobnnye pamiatniki, otkrytye v nasypakh Fanagoriiskogo gorodishcha* (Ancient Hebrew Grave Monuments Found in the Mounds of the Phanagoria Fortified Settlement, 1881).

Livadiia Palace (now a sanatorium)

Livadiia [Livadija]. IX-15. A town smt (1990 pop 1,900) on the southern coast of the Crimea 3 km southwest of Yalta and under the administration of the Yalta city council. In the 18th century there was a Greek settlement at the site, which in the second half of the 19th century became an estate of the Russian royal family. After the Revolution of 1917 it was transformed into a health resort. Some sessions of the Yalta Conference in 1945 were held in Livadiia. Today the town has a vineyard and a winery, several sanatoriums, and resorts for victims of heart, lung, and nerve diseases. Livadiia's most important architectural monument is the Grand Palace, designed by M. Krasnov in 1910–11 and surrounded by a park designed by I. Peter in 1834. Traces of Copper Age and Taurian settlements and a burial place from the 1st century have been found near the town. The ruins of a 10th- to 12th-century castle are nearby.

Livchak, Osyp [Livčak] (Lyvchak), b 1839 in Tysova, Pemyshl county, Galicia, d 1914 in Petrograd. Inventor and writer. He obtained his education at Lviv and Vienna universities and in Vienna was editor of the journals **Strakhopud* (1863), **Zolotaia hramota* (1864–7), and **Slavianskaia zaria* (1867–8). From 1869 he lived in Vilnius and St Petersburg. He designed a prototype of a linotype (1881, years before a similar construction was presented by O. Morgentaller in the United States), a diascope (type of periscope), and an all-purpose sighting mechanism that was awarded a gold medal by the Paris Academy (1886). His automatic meter indicating the speed and distance traveled by a locomotive was awarded a gold medal by the Russian Technical Society (1900). Livchak was the author of several books on technical topics as well as some original literary works.

Livesay, Florence Randal (family name: Randal), b 3 November 1874 in Compton, Quebec, d 28 July 1953 in Toronto. Journalist and author. She translated into English a volume of Ukrainian verse, *Songs of Ukraine* (1916), with the assistance of P. *Krat and others. She also translated H. Kvitka-Osnovianenko's *Marusia* (1940), assisted by Krat and T. *Humenuik. A collection of her various

Florence Randal Livesay

Natalia Livytska-Kholodna

translations (including dumas) and writings on Ukrainian topics was published in 1981 as *Down Singing Centuries: Folk Literature of the Ukraine*.

Livestock. See Animal husbandry, Cattle raising, Horse breeding, Hog raising, Sheep farming, and Goat farming.

Living church (Zhyva tserkva). A major faction of the *Renovationist church that was active in the Ukrainian SSR during the 1920s and 1930s. The church was formed in 1922 by liberal-minded Russian Orthodox clergymen who took advantage of a standoff between the Patriarchal Russian church headed by Tikhon and the Soviet regime to ascend to a position of religious prominence. Since the church shared a general distrust of the traditional episcopal authority and the conservative monasteries with the newly formed Ukrainian Autocephalous Orthodox church (UAOC), the Living church initially hoped to cooperate with the latter (this would also have provided the fledgling group with a well-developed base of operations). The UAOC, wary of what it viewed as essentially a Russian church and cautious in order to guard its independence, rejected the offer. The Living church then formally structured itself in 1923 into the Ukrainian Orthodox (Synodal) church under the leadership of a Kharkiv-based metropolitan, P. Pegov.

For the next several years the Living church sought to submerge Orthodox groups in Ukraine under its leadership. It hoped to attract adherents of the Patriarchal church by following a relatively conservative (compared with the Russian Renovationist) course of action. In order to undermine the UAOC, the church set off on a much-proclaimed process of Ukrainization and even declared itself autocephalous in 1925. These moves were largely tactical, however, and the church remained essentially Russian in character and tied to its founding body. The Renovationists were assisted by Soviet authorities, who preferred them to the more conservative Patriarchal church and the more nationalistic UAOC. The regime even coerced a number of Patriarchal clergymen and parishes to join the Living church. As well, it was free to publish books and journals (*Golos pravoslavnoi Ukrainy* and later *Ukrains'kyi pravoslavnyi blahovisnyk*) and to run a theology school in the Kievan Cave Monastery. Nevertheless, it failed to gain many adherents, although some UAOC parishes, especially in Podilia, did join.

The Living church fell victim to a massive antireligion

campaign that swept the USSR after 1929. Even before that, the number of its priests had declined from 3,500 in 1925 to 2,200 in 1928. This downturn in its fortunes was hastened by the political reconciliation of the Patriarchal church with Soviet authorities in 1927. By 1941 not a single functioning Living church parish remained in Ukraine.

Living standard. See Standard of living.

Livytska, Mariia [Livyc'ka, Marija] (née Tkachenko), b 9 April 1879 in Berdychiv, Kiev gubernia, d 16 August 1971 in Yonkers, New York. Civic and political figure; wife of A. *Livytsky and mother of M. *Livytsky. As a student in Kiev she was active in the student hromada. After joining the Revolutionary Ukrainian party and its successor, the Ukrainian Social Democratic Workers' party, she was involved in revolutionary activity in Lubni, and in 1909 she was a defendant in the trial of the so-called *Lubni Republic. In 1917 she was active in the political life of the Poltava region. She emigrated in November 1920 to Poland, where she served as president of the Union of Ukrainian Emigrant Women in Poland (1927–39). From 1944 she lived in Germany, and from 1954, in the United States. Her memoirs, *Na hrani dvokh epokh* (Between Two Epochs, 1972), deal with events prior to 1920.

Livytska-Kholodna, Natalia [Livyc'ka-Kholodna, Natalja], b 1902 in the Poltava region. Poet; daughter of A. *Livytsky. She was active in Ukrainian women's organizations and coedited the journal *Zhinka*. A displaced person after the Second World War, she eventually settled in the United States. Her poetry appeared in various journals – *Literaturno-naukovyi vistnyk*, *Vistnyk*, *My*, and others – and was published in several collections, including *Vohon' i popil* (Fire and Ashes, 1934) and *Sim liter* (Seven Letters, 1937). She wrote a biography of T. Shevchenko for young readers, *Shliakh veletnia* (A Giant's Path, 1955). She has also translated from French and Italian into Ukrainian.

Andrii Livytsky

Mykola Livytsky

Livytsky, Andrii [Livyc'ky, Andrij], b 9 April 1879 in Lypliava, Zolotonosha county, Poltava gubernia, d 17 January 1954 in Karlsruhe, Germany. Jurist and civic and political leader. After graduating from Galagan College in Kiev and the law faculty of Kiev University he worked as a lawyer and civic judge. He was active in the Ukrainian movement as president of the student hromada in Kiev,

and in 1901 he joined the *Revolutionary Ukrainian party and became president of its Lubni branch. He was arrested in 1905 for his political activities and tried as the chief instigator of the so-called Lubni Republic and Civil Self-Defense, which opposed Jewish pogroms. From 1905 to 1920 Livytsky was a leading member of the Ukrainian Social Democratic Workers' party. In 1917–18 he sat on the Central Rada and the Central Committee of the Peasant Association, served as the UNR commissioner of Zolotonosha county and then of Poltava gubernia, and belonged to the Ukrainian National Union, which prepared the uprising against the Hetman government (November 1918). Under the UNR Directory he chaired the commission for convening the Labor Congress, which he attended. In April 1919 he was appointed minister of justice and deputy prime minister of the UNR government, and in August he was also appointed director of the Ministry of Foreign Affairs. In October 1919, as head of the diplomatic mission in Poland, he was given the difficult assignment of forging an alliance against Soviet Russia. His negotiations in Warsaw culminated in the Treaty of *Warsaw.

One year later Livytsky became head of the UNR government and went with it into exile in Tarnów, Poland. At the end of 1921, after the tragic outcome of the Second Winter Campaign, he persuaded his colleagues to set up the *Government-in-exile of the UNR. While living in Warsaw he collaborated with S. Petliura, the leader of the Directory, in managing the government's diplomatic, political, and military affairs. After Petliura's death in 1926, Livytsky succeeded him as vice-president of the Directory and chief otaman of the UNR Armed Forces and thenceforth headed the government-in-exile. During the Second World War he was confined to Warsaw by the Germans. On his express instructions V. Prokopovych (and the head of the government, O. Shulhyn) in Paris assumed the temporary presidency of the Directory and declared the UNR government's support of France, Britain, and Poland against Germany. In 1945 Livytsky reactivated the UNR government-in-exile and invited representatives of the new emigration to join it. In 1946 he instructed I. Mazepa to unite all political parties around the state center of the UNR, and that union eventually resulted in the organization of the Ukrainian National Council (1948). At the first session of the council Livytsky was elected president of the UNR government-in-exile for life. In 1965 his remains were transferred to the Ukrainian cemetery in South Bound Brook, New Jersey.

K. Pankivsky

Livytsky, Mykola [Livyč'kyj] (pseud. V. Tkach), b 9 January 1907 in Zhmerynka, Vinnytsia county, Podilia gubernia, d 8 December 1989 in Philadelphia. Political leader and journalist; son of A. *Livytsky. He studied in Prague, Warsaw, and Geneva and in 1925–7 headed the Ukrainian Students' Hromada in Warsaw. In 1932–9 he served as the representative of the *Government-in-exile of the UNR in Geneva, and in 1945–6 he helped establish the *Ukrainian National State Union (which he headed in 1950–67). In 1949 he became a member of the executive of the Ukrainian National Council, and in 1957 became its head as well as director of foreign affairs. He was elected president of the Government-in-exile of the UNR in 1967 at the 6th session of the Ukrainian National Council. In 1984 he moved to Philadelphia. Livytsky published many articles and publicistic works for a wide range of Ukrainian periodicals

and publicistic brochures; a number of them are compiled in *Vidnosyny Zakhid-Skhid i problemy ponevolenykh Moskvoiu narodiv* (East-West Relations and the Problems of Nations Enslaved by Moscow, 1975).

Lizards (Lacertidae; Ukrainian: *yashchirky*). A family of the suborder Sauria of the order Squamata, class Reptilia, representing a large group of scaly reptiles found throughout the world in tropical and temperate zones; its genus *Lacerta* includes most of the species of European lizards. Lizards are multicolored and blend with their surroundings. Most feed on insects and small invertebrates, some eat snails and crabs, and others are vegetarians. Lizard eggs, enclosed in a soft, leathery shell, are laid under rocks, in crevices, or in the sand. In Ukraine the green lizard (*L. viridis*) lives in the steppe on the right bank of the Dnieper River. The fast lizard (*L. agilis*) is found all over Ukraine. The viviparous lizard (*L. vivipara*) inhabits areas of Polisia, the northwestern forest-steppe, and the Carpathian Mountains. The Crimean lizard (*L. taurica*) lives along the shores of the Black Sea. The cliff lizard (*L. saxicola*) is also a Crimean native. The blindworm (*Anguis fragilis*; Ukrainian: *veretynnytsia*) has an apodal body and is found throughout Ukraine, with the exception of the Crimea and some steppe regions. The rare scheltopusik (*Ophisaurus apodus*; Ukrainian: *zhovtobriukh*; Russian: *zheltopuzik*), a reddish brown, legless lizard up to 1.5 m long, can be found in the dense vegetation of the Crimea and the Caucasus Mountains. The sand lizard (*Eremias arquata*) inhabits semidesert, arid steppe, and forest-steppe areas. Other species include the Crimean gymnogecko (*Gymnodactylus kotshyi*), the multicolored chameleon (*Chameleon deremensis*), the steppe lizard (*Agama sanguinolenta*), and the short-tail lizard (*Trachysaurus rugosus*).

Lobachevsky, Nikolai [Lobačevskij, Nikolaj], b 1 December 1772 in Nizhnii Novgorod (now Gorkii), Russia, d 24 February 1865 in Kazan, Russia. Russian mathematician of Ukrainian ancestry. He studied at the university in Kazan (1807–11), where in 1814 he became adjunct professor, in 1822 full professor, and in 1827–46 rector. He and J. Bolyai independently founded non-Euclidean geometry (published 1829 and 1831, respectively). Lobachevskian geometry was based on the same fundamental premises as Euclidean, except for the parallel postulate. Lobachevsky's parallel postulate is as follows: through a point not on a given line, there pass at least two lines lying in the same plane and not intersecting the line. This replacement of Euclid's parallel postulate heralded a new era in the development of geometry and mathematics in general.

Lobach-Zhuchenko, Boris [Lobač-Žučenko], b 16 November 1899 in St Petersburg. The foremost authority on M. *Vovchok (his grandmother). He is the author of a chronicle of her life and works (1969; 2nd edn 1983), a book about Vovchok in the Caucasus (1976) based on family archives, a biography of Vovchok (1979), and a collection of reminiscences and information about her (1987).

He has also coedited editions of Vovchok's letters (2 vols, 1984) and letters to her (2 vols, 1979) and compiled (with L. Ilnytska) a bibliography pertaining to Vovchok and her contemporaries (1983).

Danylo Lobai

Andrii Loboda

Lobai, Danylo [Lobaj](Lobay), b 30 December 1893 in Ulvivky, Sokal county, Galicia, d 27 December 1966 in Toronto. Journalist and community leader. Lobai was active in Sich and Prosvita societies in his native village. He emigrated to Canada in 1913 and joined the *Federation of Ukrainian Social Democrats in Winnipeg. Coeditor of **Robochyi narod* (1914–18) and its successor, **Ukrains'ki robotnychi visti* (1919–35), Lobai was a founder and stalwart lieutenant of the *Ukrainian Labour-Farmer Temple Association (ULFTA) as well as a member of the *Communist Party of Canada (CPC). In August 1935, disturbed by the Great Famine and purges in Soviet Ukraine, the growing domination of the ULFTA by the CPC, and the disappearance of two former ULFTA members (M. *Irchan and I. Sembai) who had returned to the USSR, Lobai left the ULFTA with a group of disenchanted followers. He then founded the League of Ukrainian Organizations (renamed *Ukrainian Workers' League [UWL] in 1940) and edited its papers *Pravda* (1936–8) and *Vpered* (1938–40). He became president of the UWL (1940–66), a founding member of the Ukrainian Canadian Committee (now Congress) and a member of its presidium, and an active member of the Ukrainian National Home in Winnipeg. From 1948 until 1965 he was coeditor of **Ukrains'kyi holos* in Winnipeg. Lobai was the author of *Za diisne vyiasnennia polozhennia na Radians'kii Ukraini* (For a Truthful Clarification of the State of Affairs in Soviet Ukraine, 1935) and *Neperemozhna Ukraina* (Unconquerable Ukraine, 1950). His account of the relationship between the ULFTA and the CPC as well as of the events leading to his break with the former was published in the 1949 *Propam'iatna knyha* (Memorial Book) of the Winnipeg Ukrainian National Home.

B. Krawchenko

Lobanov-Rostovsky, Yakov [Lobanov-Rostovskij, Jakov], 1760–1831. Russian prince. He was the governor-general of Left-Bank Ukraine in 1808–16. In 1812 he directed the organization of 17 Little Russian regiments for the war against Napoleon. He promised to reward the participants by restoring their former Cossack privileges. His promise was not kept, and the soldiers were again enserfed after the war. His severe policy of Russian cen-

tralism provoked open dissatisfaction among the Ukrainian nobility.

Lobaj, Mary [Lobaj, Marija], b 24 June 1920 in Wasel, Alberta. Educator and community leader; sister of W. Hawrelak. A graduate of the University of Alberta (MED, 1966), she worked as a teacher and administrator in the Edmonton public school system for many years. She sat in the senate of the University of Alberta (1978–84, 1986–) and on its board of governors (1986–). She was the founding president of the Friends of the Ukrainian Heritage Cultural Village and a member of the Canadian Multiculturalism Council (1985–8). In 1988 she was appointed a member of the Order of Canada.

Lobchuk, William (Lobčuk), b 20 December 1942 in Neepawa, Manitoba. Printmaker. After graduating from the University of Manitoba (1966) he opened the first silk-screen printing shop in Winnipeg, which became a meeting place for artists. Lobchuk has been active in the Manitoba Arts Council and the Canadian National Committee of the International Association of Art, and a board member of the Ukrainian Cultural and Educational Centre, which runs the Oseredok Art Gallery in Winnipeg. Most of his serigraphs depict the Canadian prairie and convey the flatness of the land and the majesty of the sky through horizontal composition and intense hues. Lobchuk uses photosensitive block-out film, thereby combining the photographic richness of texture with the flat hard-edge areas of color and line (eg, *Sunflower Sunset* and *Moo One*).

Loboda, Andrii, b 26 June 1871 in Švenčonys, Lithuania, d 1 January 1931 in Kiev. Folklorist, literary scholar, and pedagogue; full member of the Shevchenko Scientific Society, and the VUAN (now ANU) from 1922, corresponding member of the USSR Academy of Sciences from 1924, and honorary member of the Leningrad Ethnographic Society from 1925. After graduating from Kiev University (1894) he taught there and at St Olha's Women's Institute in Kiev. He edited the university's journal and was secretary of the Faculty of History and Philology. He was the first professor to offer a course in 19th-century Ukrainian literature at Kiev University. After 1919 he served as vice-president and administrative head of the VUAN, head of the ethnographic section of the Ukrainian Scientific Society in Kiev (1920–1), director of the VUAN Ethnographic Commission (1921–30) and Regional Studies Commission (from 1923), and editor of *Etnohrafichnyi visnyk* (1925–31), *Biuleten' Etnohrafichnoi komisii* (1926–30), various collections such as *Materialy do vyvchennia vyrobnychykh ob'iednan'* (Materials for the Study of Manufacturing Associations, 1929–31), and O. Andriievsky's bibliography of Ukrainian folklore (1930). His earliest books dealt with the *bylyny* (1895, 1896, 1904). Then he wrote several reference works on the Russian oral tradition (four editions, 1909–14) and on 18th-century Russian literature.

Altogether he published nearly 100 scholarly works and edited many folklore collections. He was a proponent of the comparative historical method in folklore studies. In the late 1920s he emphasized the need to collect and to study 'contemporary' folklore without corrupting it. In *Etnohrafichnyi visnyk* (1925) he published a programmatic article on the current state and tasks of Ukrainian ethnography.

M. Mushynka

Loboda, Hryhorii, b ? in the Kiev region, d May 1596. Hetman of the registered Cossacks (1593–6, with interruptions). In 1594 and 1595 he and S. *Nalyvaiko took part in the anti-Turkish campaign in Moldavia as allies of Rudolf II. During the Cossack rebellion of 1596 Loboda and Nalyvaiko raided Kiev voivodeship and Belarus. Loboda was assassinated by Nalyvaiko's supporters during the Battle of Solonytsia for attempting to come to terms with the Poles.

Loboda, Liudmyla (née Topolina), b 11 November 1945 in Magnitogorsk, Russia. Painter and graphic artist; wife and student of Volodymyr *Loboda. She moved to Dnipropetrovske in 1958 and graduated from the Dnipropetrovske Institute of Civil Engineering in 1969. Her works include landscapes, figural compositions, nudes, and portraits of Ukrainian writers and artists. She works in a figurative manner combining an expressionistic brush stroke with dark energetic lines and a subdued, clear palette (eg, *Church in Boryslav* and *Land Washed by Rain* [1987]). She has produced many series of linocuts inspired by the writings of T. Shevchenko, N. Gogol, A. Pushkin, E.A. Poe, and other writers; depicted well-known figures, such as L. Kurbas, B.I. Antonych, A. Archipenko, and V. Stus; and illustrated several children's books.

Liudmyla Loboda: *Family* (oil, 1985)

Loboda, Viktor, b 1823, d after 1876. Political activist and writer. After graduating from a civil engineering course in St Petersburg, he worked in the civil service in Ukraine and Russia and was a member of the Poltava Hromada. In 1862 he was arrested for participating in political circles with 'an extreme Little Russian tendency' (in fact, for advocating political independence for Ukraine) and exiled to Perm gubernia. In 1868 he was released without the right to return to Ukraine. He wrote literary works, publicistic articles, and recollections of T. Shevchenko in *Kievskaiia starina*.

Volodymyr Loboda: *Prickly Conversation* (oil, 1988)

Loboda, Volodymyr, b 6 July 1943 in Dnipropetrovske. Painter and graphic artist; husband of L. *Loboda. A graduate of the Dnipropetrovske Institute of Civil Engineering (1971), he has worked as a visual artist. His expressionist manner conveys an atmosphere of impulsive energy and turmoil through slashing lines, dark outlines, and bright colors (eg, *Men and Women: Dialogue* [1983] and *Waiting* [1987]), and his emotionally charged linocuts echo the expressive qualities of his paintings. Loboda works in series, some of which commemorate events, such as the 1922–3 famine and the millennium of Christianity in Ukraine, and some of which commemorate people, including his favorite poet, T. Shevchenko, and artists, such as F. de Goya, P. Picasso, D. Velázquez, and Rembrandt (the 360-print series 'Great Wandering in Ukraine' [1986]). Loboda is not a member of the Union of Artists of Ukraine and has been an outspoken critic of the restrictions placed on artists by *socialist realism. He has striven to create an art synthesizing Ukrainian artistic traditions and the achievements of world art. Since moving to Lviv in 1982, he has influenced the work of several younger artists there (eg, P. and A. Humeniuk).

Łobodowski, Józef, b 19 March 1909, d 18 April 1988 in Madrid. Polish poet, literary critic, and translator. Before the Second World War he published a few collections of engagé poetry in Poland. From 1945 he lived in Spain, where he published over a dozen more collections. He continued the tradition of the *Ukrainian school in Polish literature and wrote many poems on Ukrainian themes; they are included in *Rozmowa z Ojczyzną* (Conversation with the Fatherland, 1936), *Złota gramota* (The Golden Charter, 1954), *Pieśni o Ukrainie* (Song about Ukraine,

1959), and other collections. From the 1930s on he also translated into Polish works by many Ukrainian writers, among them T. Shevchenko, Lesia Ukrainka, I. Bahriany, L. Mohylianska, and O. Teliha, and he wrote about those authors and Ukrainian literature in general, mostly in the Polish émigré monthly *Kultura*. His poetry has been translated into Ukrainian by S. Hordynsky, B. Kravtsiv, Ya. Slavutych, and L. Poltava.

Lobodych, Roman [Lobodyč], b 8 January 1893 in Soroky, Buchach county, Galicia, d 22 August 1969 in Philadelphia. Priest and church and civic leader. After completing his theological studies at Lviv University, he was ordained (1917) and served as chaplain in the Austrian army on the Italian front. Upon his release from a POW camp, he joined the Ukrainian Galician Army as chaplain. After the war he worked in various parishes before being appointed canon and vicar of the Stanyslaviv cathedral in 1930. A candidate of the Ukrainian Catholic People's party, he was elected to the Polish Senate in 1935. Three years later he was appointed canon of the metropolitan's chapter and vicar of St George's Cathedral. During the Second World War he served as chaplain of the Division Galizien (1943–5), and in 1947, he emigrated to the United States, where he organized a parish in Los Angeles. He also served as the first rector of the Ukrainian seminary in Washington, DC, chaplain of the Basilian orphanage in Philadelphia, and president (1957–9) of the Providence Association of Ukrainian Catholics in America.

Lobysevych, Opanas [Lobysevych], b 1732 in Pohar, Starodub regiment, d 1805. Writer; pioneer of the Ukrainian national renaissance. He studied at the Kievan Mohyla Academy (1747–52) and then at the university at the St Petersburg Academy of Sciences (1754–60). Later, in Novhorod-Siverskyi, he became county (1783) and gubernial (1785–7) marshal of the nobility and one of the leading members of the Novhorod-Siverskyi group of patriots (1780–90). Lobysevych is the author of *Vergilievikh pastukhov...v malorossiiskii kobeniak pereodetykh* (1794), a Ukrainian adaptation of Virgil's *Bucolics*. The work was lost. His Russian translations from Latin and French were published in the journals *Trudoliubivaia pchela* (1759) and *Baryshek vsiakiia vsiachini* (1770).

Local government. See Municipal government, County, and Gubernia.

Local industry. In the Soviet economy, a group of enterprises producing mostly consumer goods and subordinated to the Ministry of Local Industry and to oblast and raion soviets. Local industry utilizes mainly local raw materials and discarded materials and, besides regular workers, employs retired, disabled, and seasonally unemployed help. By employing resources that would have remained unused, local industry helps to raise the standard of living. It accounts for a substantial share of the consumer-goods output. Taxes paid by local industry provide most of the revenue for local government; thus, the industry serves as the basis of local autonomy and initiative.

The administrative subordination of local industry changed several times in the Soviet period. In 1927, when raions were introduced, and the powers of local soviets

were determined, enterprises using local raw materials and selling their output on local markets were classified as local industry. Some of the enterprises were quite large. In 1927 local industry accounted for 30 percent of producer-goods output. During the First Five-Year Plan investment in local industry was controlled from Moscow, and starting in 1933 the industry's output was included in the central planning. Such a system restricted local initiative. A Ukrainian People's Commissariat of Local Industry (est 1934) assumed supervision over medium and large enterprises, which had been under the jurisdiction of local soviets. This part of industry became known as the narrower local industry. The smaller enterprises, called the broader local industry, continued to be overseen by local soviets. In 1936 the broader local industry produced slightly over one-third of Ukraine's industrial output, including almost all shoes, knitwear, clothes, lignite, peat, china, printed matter, furniture, and paper, 81 percent of metal consumer goods, 76 percent of electric power, and almost 70 percent of canned goods and beer. It employed 47 percent of the work force. The narrower local industry produced 10.9 percent of the industrial output and employed 8.3 percent of the work force. In the late 1930s several larger enterprises were transferred to newly created industrial secretariats, and in 1939 all small enterprises, which had been under raion jurisdiction, were brought under the Secretariat of Local Industry. Centralization hampered the efficient use of local resources and lowered the standard of living.

In 1957 the Ministry of Local Industry, along with most of the industrial ministries, was abolished. Its larger enterprises were placed under *regional economic councils (*sovmarkhozy*), and the rest were returned to the jurisdiction of local soviets. The term 'local industry' was restricted to the latter, which in 1959 produced 12.8 percent of all producer goods and 33 percent of all consumer goods. In 1960 this group of enterprises accounted for 24.8 percent of the output of Ukraine's light industry, 22.6 percent of its food-industry output, 21.5 percent of its woodworking-industry output, 95 percent of the washing machines produced, and 96 percent of the children's bicycles produced. The recentralization of local industry began with the subordination of all its enterprises to the *sovmarkhozy* in 1963 and culminated in the resurrection of the Ministry of Local Industry in 1965.

Since then production has tended to become more and more concentrated: the number of enterprises under ministry supervision decreased from 912 in 1965 to 388 and 4 republican production associations in 1985. The enterprises, including 43 production associations, subordinated to local soviets, increased their total output by a factor of 2.3 from 1970 to 1984. Republican associations subordinated to the Ministry of Local Industry increased their output as follows: the peat industry by a factor of 2.3, the musical instruments industry by a factor of 1.8, the handicrafts industry by a factor of 2, and the mechanical equipment industry by a factor of 1.3. The productive potential of local industry has grown. In the early 1980s a number of new enterprises were set up: a folk-instruments factory in Lviv, a consumer-metal products factory in Rivne, a drafting equipment plant in Odessa, a research and development enterprise in Kirovohrad, and a folk-handicrafts plant in Pryluka. The industry's fixed assets, however, are inadequate and largely obsolete. About 30 percent of its

equipment has to be replaced. In the production of musical instruments 50 percent of the equipment must be replaced. Consumer goods, amounting to over 10,000 separate items, account for three-quarters of the industry's total output. Many products that previously came under other industrial ministries are now produced by the local industry. The output of chemical, petrochemical, plastic, and polymer products increased by five times from 1966 to 1984. The local industry makes stainless steel products, steel enameled products, electroplated items, children's bicycles and carriages, sleds, skates, locks, and other metal products. Wood products of the local industry, such as furniture, school and office equipment, wagons, wheels, and barrels, increased by a factor of six in the last two decades. Most important among the industry's products are light-industry goods, such as clothes, textiles, footwear, and leather items. Their output increased by eight times from 1966 to 1984.

The artistic-handicrafts industry consists of 5 production associations and 22 enterprises. Its output includes wood carvings, kilims and decorative weavings, embroidery, and ceramics. In 1985 its annual output was valued at 225 million rubles. The musical instruments industry is organized in an industrial association of 11 enterprises.

Locomotive industry. A branch of the machine-building industry specializing in locomotive engines. The first locomotive works in Ukraine were established in Kharkiv in 1895 and Luhanske in 1896. In 1901 those factories became part of a Russian syndicate called the Locomotive Union. By 1912 the Kharkiv factory had built 1,846 engines, and in 11 years (1900–11) the Luhanske factory built about 1,500. In 1913 Ukraine's output was 189 locomotives, or 40 percent of the Russian Empire's output. After the revolution of 1917 the locomotive industry in Ukraine continued to grow, and the traditional centers of Kharkiv and Luhanske expanded greatly. By 1940 Ukraine was producing 672 locomotives per year, or 73.5 percent of USSR's output. During the Second World War the industry was completely ruined, and it did not achieve its prewar level until 1954. By 1957 the conversion from steam to diesel and electric locomotive production was complete. Output of diesel locomotives peaked in 1967, when 1,439 units were produced. In 1983 Ukraine produced 1,306 locomotives. Ukraine has continued to specialize in locomotive production; it increased its share of Soviet production in 1983 to 95 percent. The major locomotive works are the *Luhanske Diesel Locomotive Building Consortium and the Kharkiv Transport Machine-Building Plant.

Lodii, Petro [Lodij], b 15 May 1764 in Zboi, in the Prešov region, d 22 June 1829 in St Petersburg. Philosopher, jurist, and educator. After studying philosophy in Nagyvárad (now Oradea, Rumania) and theology in Uzhhorod and Lviv, he taught philosophy, mathematics, and law at the *Studium Ruthenum in Lviv (1787–1802), served as dean of its philosophy faculty (1797), taught at Cracow University (1803), and held the chair of philosophy and law at the

Petro Lodii

St Petersburg Pedagogical Institute (1804–19) and its off-spring, St Petersburg University (1819–29). He also lectured at other higher schools in St Petersburg and was principal of the St Petersburg Commercial School (1819–25) and dean of the university's philosophy and law faculty (1819–25). Lodii's translation of a part of C. Baumeister's *Elementa Philosophiae* dealing with practical philosophy (1790) is important for the development of Ukrainian philosophical terminology. Lodii wrote one of the best Russian logic textbooks of his time (1815); it provides an introduction not only to logic but to philosophy in general and is one of the first attempts in the Russian Empire to refute I. Kant's system. Embracing deism in theology and realism in epistemology, Lodii followed C. Wolff on most philosophical issues. His contribution to practical philosophy consists of *Teoriia obshchikh prav* (A Theory of Universal Laws, 1828).

Lodomeria. The Latin name of Volodymyr-Volynskyi principality, as in *Regnum Galiciae et Lodomeriae*. It appeared in the title of Andrew II of Hungary (*Galiciae Lodomeriaeque rex*) starting in 1206 and in the title of the Austrian emperors after Austria's annexation of Galicia in 1772. In the manifesto of 18 September 1772 Maria Theresa justified the annexation of Galicia on the ground that Lodomeria was a former possession of Hungary.

Loeffler, Charles, b 30 January 1861 in Mulhouse, Alsace, d 19 May 1935 in Medfield, Massachusetts. American composer and violinist of French birth. As a young child he lived in the town of Smila, near Cherkasy, before moving to Hungary, Switzerland, France, and then the United States. An impressionistic cosmopolitan, he drew his inspiration from many sources. His *Les Veilles de l'Ukraine* (1891), based on Gogol's *Evenings on a Farm near Dykanka*, is a suite of four movements for violin and orchestra. It was first performed in Boston on 20 November 1891 with the composer as soloist and the Boston Symphony Orchestra conducted by A. Nikisch. One of his orchestral poems, *Memories of My Childhood* (1923), reflects the modal feelings of Ukrainian songs and dances.

Loess. Deposits of unstratified fine-grained, pale buff yellow mineral particles. The particles in loess consist mostly of silt (up to 60 percent; particles 0.05 to 0.005 mm in diameter), although some clay (10–20 percent; particles less than 0.005 mm) and fine sand (up to 7 percent; particles 0.1 to 0.25 mm) are also present. The minerals that make up the particles are mostly quartz, followed by feldspar, mica, kaolinite, and montmorillonite. The soils that

form on loess tend to be neither too wet nor too dry, and the chemical properties of loess provide the soil with high levels of fertility. Loess covers nearly three-quarters of the surface territory of Ukraine. It is found at various elevations, including uplands, slopes, plains, and valley terraces. Only the mountains, the glaciated lacustrine plains of Polisia, and the floodplains of major river valleys are devoid of loess. The thickness of loess in Ukraine ranges from several tens of centimeters to 40 to 50 meters (near Dnipropetrovske); the most common thickness is 5 to 10 meters (as in the Podolian Upland and the Azov Upland).

Loev (Ukrainian: Loiv [Lojiv]). II-11. A town smt (1972 pop 5,000) and raion center in Homel oblast, Belarus. It is situated on the Ukrainian-Belarus border near the confluence of the Sozh and the Dnieper rivers. In 1649 a Lithuanian-Polish army led by Prince J. Radziwiłł defeated Col M. Krychevsky's Cossack forces near the town.

Logic. A branch of *philosophy dealing with the forms of valid reasoning. Formal logic, which was first systematized by Aristotle, deals with the nature of concepts, propositions, and syllogistic arguments. Mathematical or symbolic logic, which is a formal logic more powerful than the traditional Aristotelian logic, was developed in the 19th century. Dialectical logic is the branch of dialectical materialism dealing with the categories and the three laws of thought.

In Ukraine the earliest knowledge about logic was derived from Slavonic translations of Byzantine sources. The *Izbornik* of Sviatoslav (1073) contains St Maximus the Confessor's and Theodore of Rhaithu's discussion of concepts, definitions, and categories based on Aristotle's *Organon* and Porphyry's *Isagoge*. A late 13th- to early 14th-century Slavonic translation of St John of Damascus's *Dialectica* reached Rus' in the first half of the 15th century. Toward the end of the 15th century two important additions were made to the literature on logic: *Lohika Aviasafa* (Aviasaf's Logic, 1483), a compilation based on al-Ghazali's *Aims of the Philosophers*, and *Knyha, hlaholemaia lohika* (The Book Called Logic), a compilation based on M. Maimonides' *Logical Terms*. Both of these works were translated most probably in Kiev and were based on Hebrew, not Byzantine, sources. Their treatment of logic was much fuller than that in the *Izbornik* and *Dialectica*: it covered not only concepts, definitions, and categories, but also propositions, inferences, and syllogisms. Instead of adopting the Church Slavonic technical vocabulary of the earlier works, they introduced a terminology based on the Ukrainian vernacular.

With the introduction of European forms of higher education in the 17th century, logic became an important and permanent part of the curriculum. At the Kievan Mohyla Academy one year of the three-year philosophy program was devoted to logic, which was valued primarily for its usefulness in rhetoric. The short introductory course, called dialectic or minor logic, was taught often at the end of the rhetoric course. The full course, called major logic, discussed the nature of terms, categories, predicables, universals, propositions, inference, and syllogisms, as well as the concept of science and logic. Although the courses differed from each other because each lecturer prepared his own course, they were patterned more or less on Peter of Spain's textbook. The core of Aristotle's

logic was supplemented with new ideas and techniques worked out by scholastic and neoscholastic thinkers. Occasionally the Kievan professors raised objections to Aristotle and offered their own solutions to problems. Over 30 logic manuals prepared in Kiev have survived, including the courses of Y. Kononovych-Horbatsky (1639–40), I. Gizel (1645–6), S. Yavorsky (1691), Y. Turoboisky (1702), T. Prokopovych (1708), Y. Volchansky (1717), S. Kalynovsky (1729), M. Kozachynsky (1743), H. Konysky (1749), and H. Shcherbatsky (1751). Only a few of them have been translated, wholly or partly, from Latin into Ukrainian. Ya. Kozelsky, a graduate of the academy, devoted a section of his *Filosoficheskie predlozheniia ...* (Philosophical Propositions ..., 1768) to logic. In the mid-18th century Wolffian philosophy was adopted by the academy, and C. Baumeister's logic textbook became the basic source for its courses in logic. The Wolffian tradition was continued into the 19th century by P. Lodi, whose *Logicheskie nastavleniia ...* (Logical Principles ..., 1815) was the best textbook in the Russian Empire at the time.

In the 19th century, logic studies were strongly emphasized at Kharkiv University. Its first rector, I. Rizhsky, had taught logic in Moscow and had written a textbook (1790) based on C. Baumeister. T. Mochulsky (1811), L. Jacob (1811, 1815), I. Liubachynsky (1817), and P. Liubovsky prepared logic textbooks in Russian; J. Schad explored the nature of formal logic in contrast to transcendental logic in his *Institutiones philosophiae universae ...* (1812). The mathematics professor T. Osipovsky translated E.B. de Condillac's (1805) *La Logique* into Russian. At Kiev University O. Novytsky published a large textbook on logic and scientific methodology (1841) and a short version of it (1846, 1848). A section of the third volume of S. Hohotsky's philosophical lexicon (1866) was devoted to logic. In Odessa O. Mykhnevych wrote an elementary logic textbook for the students of the Richelieu Lyceum (1848; 2nd edn 1874). Toward the end of the 19th century Odessa University became a leading center of logic studies. There N. Lange wrote a textbook (1891; repr 1894, 1898, 1903, 1910) that was accepted as the standard in the field. His colleagues I. Sleshynsky (1893), Ye. Bunytsky (1896), and S. Shatunovsky (1917) followed the development of mathematical logic in the West and made their own contributions to it. P. Poretsky, a graduate of Kharkiv University and professor of astronomy at Kazan University, made some important discoveries in mathematical logic (1881, 1884, 1902). The leading logicians at Kiev University were F. Kozlovsky, whose logic textbook went through 4 editions (1894–1907), and G. Chelpanov, whose textbook went through 10 editions (1906–18). At Kharkiv University F. Leikfeld worked on the nature of hypothetical judgment (1906), and S. Glagolev pointed out the shortcomings of traditional syllogistic logic (1907, 1910).

In the Soviet period formal logic continued to be taught according to pre-Soviet textbooks written by G. Chelpanov (repr 1918, 1924) and N. Lange (repr 1918). Research in mathematical logic was continued at Odessa and Kharkiv universities, but the attention of philosophers was concentrated increasingly upon dialectical logic. To define the place of the dialectic in the general system of knowledge, Marxist thinkers had to show how it was related to traditional (formal) logic. For over a decade this relation was the main subject of discussion. V. Asmus in his book on dialectical materialism and logic (1924) and O.

Bervytsky in his book on logic and dialectic (1929) conceded that formal logic, being static and discrete, cannot reflect, as dialectical logic does, constantly changing and interconnected reality, and yet they defended the usefulness of formal logic for systematizing knowledge and even for expanding it.

By the early 1930s opinion had turned against this conciliatory position: if formal logic did not correspond to reality, then it was false and could not be useful. This conclusion was stated clearly in a collection of articles published in Kharkiv on dialectical materialism (1932). Mathematical logic was associated with formal logic and denounced as mechanistic (V. Yurynets), abstract, and useless (Ya. Kaufman). As these logics were dismissed from the schools and research institutes, the development of dialectical logic was encouraged. Following V. Lenin's instructions, published in his *Philosophical Notebooks* (1929), to work out a materialist interpretation of G. Hegel's dialectic and give a materialist treatment of the categories, philosophers such as O. Bervytsky, T. Stepovy, O. Vasileva, Ya. Bludov, R. Levik, N. Milhevsky, and S. Semkovsky wrote many articles on Hegel's logic, and P. Demchuk, T. Stepovy, V. Hadzinsky, and V. Boiko analyzed various logical categories.

After the Second World War the discussion of the relationship between formal and dialectical logic was reopened by the 1946 CC CPSU decision to reintroduce formal logic into the educational program. Old Russian textbooks by G. Chelpanov (1945, 1946) and S. Vinogradov and A. Kuzmin (1949, 1952, 1953, 1954) were republished (sometimes in translation), and new ones were prepared by V. Asmus (1947, 1954) and M. Strogovich (1949). Some of them were translated into Ukrainian. J. Stalin's new position on language as a realm outside the economically determined superstructure gave the defenders of formal logic an additional argument in its favor. The theoretical debate over formal logic dragged on for many years, while the subject spread quickly in the schools and institutes. In Kiev one of the chief defenders of mathematical logic was V. Beliaev, a historian of Aristotelian logic. The rapid development of cybernetics and the philosophy of science in Kiev stimulated interest in mathematical logic. P. Kopnin, the director of the AN URSR (now ANU) Institute of Philosophy (1962–8), wrote a number of influential books on dialectics as logic (1961, 1973) and on logic and science (1968, 1973). His colleague M. Popovych discussed the basic methods of modern logic and its cognitive status and relation to the dialectic (1971). F. Moskalenko explored the relationship between inductive and deductive logic and wrote a history of inductive logic in the Russian Empire (1955); V. Melnikov (1959), V. Nychyk (1960), and M. Bulatov (1981) studied the nature of the categories; S. Krymsky speculated on the evolutionary emergence of logical forms and laws (1962); and M. Popovych examined the role of cultural context in the history of logic (1979). The development of logic in Ukraine has been investigated by V. Nychyk, S. Krymsky, and I. Paslavsky.

In interwar Western Ukraine the psychologist S. Balei taught logic at the Lviv (Underground) Ukrainian University and wrote an elementary textbook (1923). As a member of the Polish Lviv Philosophical Association he was acquainted with the new work done by Polish logicians in Lviv. Rev V. Maksymets taught logic at the Greek Catholic Theological Academy in Lviv (1931–9).

Outside Ukraine logic has been taught at Ukrainian postsecondary schools in interwar Prague and postwar Munich. D. Chyzhevsky wrote an outline (1924) of his logic course at the Ukrainian Higher Pedagogical Institute in Prague.

Ruslan Logush: *Celestial Composition '82* (silk screen)

Logush, Ruslan [Loguš], b 4 June 1950 in Montreal. Canadian silk-screen artist of Ukrainian origin. A graduate of Sir George Williams University in Montreal, he has worked independently in Studio Graphia, a group of 10 Canadian artists. Solo exhibitions of his works have been held in Minneapolis (1973), Winnipeg (1973), Toronto (1974), and Montreal (1976). He has also taken part in various group shows, among them Salon International de l'Art Libre in Paris (1972, honorable mention), the International Print Biennale in Cracow (1974), the Olympic Exhibition in Montreal (1976), and the Ukrainian Artists International Exhibition in Toronto (1982). In works such as *Celestial Composition '82* or *St. Luke Chapter 27:11* he has tried to express cosmogony through geometric forms suggesting planets in their orbits, subordinated to the divine laws of cosmic motion.

Lohos

Lohos (Logos). A scholarly quarterly concerned with theological and philosophical questions and with Ukrainian church history. It was founded by Rev M. *Hermaniuk in Waterford, Ontario, in 1950 and published by the Redemptorist Fathers in Yorkton, Saskatchewan, until 1983. The quarterly was edited by Revs Hermaniuk (1950–1), V. Malanchuk (1951–61), M. Hrynchyshyn (1961–6), and S. Shawel (1966–83). Circulation fell from 1,000 during the 1950s to 150 in 1983.

Hryhorii Lohvyn

Mykhailo Lomatsky

Lohvyn, Hryhorii, b 22 May 1910 in Kosivka, Oleksandriia county, Kherson gubernia. Ukrainian art scholar. A graduate of the Kharkiv (1934) and Moscow (1941) art institutes, he obtained a doctorate in 1968. Lohvyn has written extensively on the medieval, Renaissance, and baroque architecture, painting, sculpture, book miniatures, and decorative art of Ukraine. He has published, in Russian, books on the architectural monuments of Kiev (1960, 1967, 1982), 10th- to 18th-century Ukrainian art (1963), and the architectural monuments of Chernihiv, Novhorod-Siverskyi, Hlukhiv, and Putyvl (1965, 1980) and a guidebook to the artistic monuments of Ukraine and Moldavia (1982). His best-known Ukrainian work is *Po Ukraïni* (Through Ukraine, 1968), a book on Ukraine's old artistic monuments. Some of his works have been translated into English, namely *Kiev's Hagia Sophia* (1971) and *Into the Deep Past: Miniatures and Ornaments in Old Manuscripts of the 11th–18th Centuries* (1977). More recently he published a monograph in Ukrainian on engravings in 16th- to 18th-century Ukrainian books (1990). Lohvyn also co-authored a book on Ukrainian medieval painting (1976, with L. Miliaieva and V. Svientsitska), contributed chapters to vols 2 and 3 of the AN URSR six-volume history of Ukrainian art (1967–8), and was the editor in charge of vols 3 and 4 of the four-volume guide in Russian to the monuments of urban construction and architecture in Ukraine (1985, 1986).

S. Hordynsky

Lohvyn, Yurii, b 5 February 1939 in Kremenchuk, Poltava oblast. Graphic artist and writer; son of H. Lohvyn. A graduate of the Kiev State Art Institute (1965) and the Higher Literature Courses of the Gorky Institute of Literature in Moscow, he has worked as a book illustrator and created many series of color linocuts and engravings on plastic and wood, among them 'My Forefathers,' 'The Earth and People,' and 'Ukrainian Folk Ballads.' Among

Yurii Lohvyn: *Over the Mountains* (wood engraving)

the books he has illustrated are H. Kosynka's *Sertse* (The Heart, 1967) and P. Tychyna's poem *Skovoroda* (1971). His artistic works show the influence of N. Rerikh and H. Narbut. He is the author of prose collections, such as *Pivnichne siaivo* (The Northern Lights, 1961), *Vohon' na skeli* (The Fire on the Cliff, 1965), *Daleka veselka* (The Distant Rainbow, 1970), *Znaiomyi lev: Pys'mena mynulykh dniv* (The Known Lion: Writings of Past Days, 1972), *Kolor dlia neba* (Color for the Sky, 1978), and *Zakliatyi vershnyk* (The Damned Rider, 1990), and the historical novel *Taiemnytsia odnogo diamanta* (The Secret of One Diamond, 1989).

Lohvynenko, Vitalii, b 28 January 1928 in Dycheskulove, Zinovivske (now Kirovohrad) okruha, d 1990. Writer. He began to publish in 1952. Several collections of his short stories have appeared: *Davni rany* (Old Wounds, 1961), *Suzir'ia* (Constellation, 1963), and *Biostrumy* (Bio-currents, 1970). He also published a number of novels: *Lita molodii* (Years of Youth, 1957), *Vinchannia* (The Marriage, 1965), *Rubikon* (The Rubicon, 1966), *Vazhka voda* (Heavy Water, 1972), and *Rosava* (1975). Selections of his works were published in two volumes titled *Vybrane* (Selections, 1986). Many of his works were translated into Russian.

Lokachi [Lokači]. III-5. A town smt (1990 pop 3,600) and raion center on the Luha River in southwestern Volhynia oblast. It is first mentioned in historical documents in 1542. After the third partition of Poland in 1795, it came

under Russian rule. Among its architectural monuments are an ancient chapel and a church built in 1609.

Lokhvytsia: Monument to H. Skovoroda by I. Kavaleridze (1922)

Lokhvytsia [Loxvycja]. III-14. A town (1990 pop 13,600) on the Lokhvytsia River and a raion center in Poltava oblast. It is first mentioned in historical documents in 1320. In 1628 it was granted town status, and belonged to the Vyshnevetsky family. Lokhvytsia played an important role in the Cossack and popular uprisings of the 1630s. In 1648–9 and 1658–1781 it was a Cossack company center. In 1802–1923 Lokhvytsia was a county center in Poltava gubernia. Today it has a sewing factory and a food-processing plant. Near Lokhvytsia archeologists have found several burial sites of the *Cherniakhiv culture (2nd–5th century), a settlement of the *Romen-Borshcheve culture (8th–10th century), and a medieval fortress which belonged to Pereiaslav principality.

Lokhvytsia Sugar Refining Complex (Lokhvytskyi tsukrovyyi kombinat). A refining enterprise established in 1928 in Chervonozavodske, now in Lokhvytsia raion, Poltava oblast. When the refinery went into operation in 1929, its processing capacity was 20,000 centners of sugar beets per day. In 1930 a local state farm was linked with the refinery, and a complex thereby formed. In 1979 the complex had a capacity of 93,000 centners of beets per day.

Lokhvytsky, Kindrat [Loxvyc'kyj], b 20 March 1774, d late 1830s. Mystic and amateur archeologist in Kiev. In the course of excavations he discovered in 1824 the foundations of the Church of the *Tithes, in 1832 the remains of

the *Golden Gate, in 1833 the foundations of St Irene's Church dating back to the times of Yaroslav the Wise, and ruins of unidentified buildings from the Princely era. He amassed a valuable collection of coins and medals from various historical periods.

Lokota, Ivan, b 3 June 1884 in Velykyi Bychkiv, Transcarpathia, d 20 November 1942 in the USSR. Communist organizer and leader in Transcarpathia. A member of the Communist Party of Czechoslovakia from 1921, he belonged to the Party's regional committee for Transcarpathia (1924–9) and its Central Committee (1929–39). In 1929 he was elected to the Senate, but three years later he was arrested by the Czechoslovak authorities, imprisoned for subversive activity, and deprived of his seat. In 1937, before having served his full sentence, he was released because of failing health, and in 1940 he fled to the USSR.

Lomachka, Svyryd. See Oleksandriv, Borys.

Lomatsky, Mykhailo [Lomac'kyj, Myxajlo], b 23 November 1886 in Husiatyn, Galicia, d 1968 in Munich. Writer. From 1906 he worked as a village school teacher and itinerant tutor in Galicia. After being persecuted by the Polish authorities and imprisoned during the 1939–41 Soviet occupation he sought refuge following the Second World War in Germany; there he taught and helped to organize the Ukrainian Youth Association in displaced persons camps and contributed to Ukrainian émigré newspapers. Between 1956 and 1968 he published 13 books of ethnographic sketches and Romantic-historical prose about the colorful inhabitants of the Hutsul region, where he had once lived and taught.

Lomnicki, Marian, b 9 September 1845 in Bavoriv, Ternopil circle, Galicia, d 26 September 1915 in Lviv. Polish natural scientist of Ukrainian origin; full member of the Shevchenko Scientific Society from 1914. He studied at Cracow and Vienna universities (1864–8), worked in Stanyslaviv and Lviv, and became director of the Dzieduszycki Museum in Lviv (from 1905). His work included entomological, malacological, geological, and paleontological studies of Western Ukraine. He was a major contributor to the *Atlas Geologiczny Galicji* (Geological Atlas of Galicia, 1895–1902).

Lomykovsky, Ivan [Lomykovs'kyj], b ? in Volhynia, d 1714 in Iași, Moldavia. Cossack officer. He was general chancellor under Hetman M. Khanenko, and in the 1670s he moved to Left-Bank Ukraine, where he became a member of the Ukrainian government, as general standard-bearer (1689–91), acting hetman (1690), general osaul (1692–1707), and general quartermaster (1707–9). He strongly advocated Ukraine's break with Moscow and knew about I. Mazepa's negotiations with the Swedes. After the defeat at Poltava he emigrated with Mazepa to Bendery.

Lomykovsky, Vasyl [Lomykovs'kyj, Vasyl'], b 26 January 1777 in Meliushky, near Khorol, New Serbia gubernia, d ca 1848. Historian and ethnographer, and agronomist by profession. After retiring from military service he experimented with new agricultural methods and collected historical materials. He compiled the first collection of

Ukrainian dumas (16 in all), which was published by P. Zhytetsky in 1893, and a valuable dictionary of contemporary Ukrainian, which was published in *Kievskaia starina* and by O. Lazarevsky as a separate book in 1894. In 1809 he also translated J.-B. *Scherer's *Annales de la Petite-Russie ou Histoire des Cosaques ...* (1788) into Russian.

Lomynsky, Fedir [Lomyns'kyj], b 1 February 1856 in Kiev, d 30 November 1927 in Kiev. Histologist. A graduate of Kiev University (1882), he worked in its histology department from 1891 (from 1905 as chairman; in 1921 the department was transferred to the Kiev Medical Institute). His research centered on microbial parasitism and cytology (intracellular). He was the first to observe (1882) that nerve cells could divide (karyokinesis), and he described the phenomenon of neuronophagy (the engulfment of damaged neurons by leukocytes) in 1884. He also demonstrated the transmission of anthrax to humans and animals through grasses and other cultivars.

Bohdan Lonchyna

Lonchyna, Bohdan [Lončyna, Bohdan], b 2 January 1917 in Lviv, d 27 March 1985 in Detroit. Pedagogue, community figure, and Catholic activist. He studied Western European and Romance languages at the universities of Lviv (1935–9) and Vienna (1940–2) and during extended tours of the Continent. He worked as a student affairs officer for the Ukrainian Central Committee in 1942–4; in this position he drew upon his involvement with the Obnova Society of Ukrainian Catholic Students and the Sich student society as he headed the Labor Alliance of Ukrainian Students and edited the monthly *Students'kyi prapor*. Lonchyna subsequently emigrated to the United States, where he taught at Steubenville College in Ohio (1949–59) and the University of Detroit (1959–72). In addition he served as a dean of the Ukrainian Catholic University in Rome and organized its summer programs in 1972–84, fostered an Obnova society of Ukrainian Catholic intellectuals, and headed the Ukrainian Patriarchal Society of the United States (1979–83) and the Ukrainian Patriarchal World Federation (1982–5). His writings include a textbook on Ukrainian culture (1971) and translations into Ukrainian of *Poema de Mio Cid* (1972) and *Chanson de Roland* (1977).

London. The capital of Great Britain (1988 pop 6,735,400), situated on the Thames River in southeastern England. It has an active port and is one of the world's leading financial, trading, industrial, and cultural centers. Concerted Ukrainian presence in London begins on the eve of the First World War. In 1912–15 G. *Raffalovich (pseud Bedwin Sands), a naturalized Briton of French and Jewish (from Odessa) background, published valuable materials there about Ukrainian affairs and advocated Ukraine's independence. In 1919–23 the diplomatic missions of the Western Ukrainian National Republic (ZUNR) and UNR governments existed in London and were staffed by A. Margolin, Ya. Olesnytsky, M. Stakhovsky, M. Vishnitsker, and S. Vytvytsky. In 1931–40 Ya. Makohin sponsored the Ukrainian Press Bureau there; its director was V. *Kaye-Kysilevsky until 1938–9, when it was headed by the Ukrainian Canadian S. Davidovich. In 1932–4 a hetmanite group led by V. Korostovets published a bulletin, the *Investigator*, in London. In 1933–5 Ye. Liakhovych served as the Organization of Ukrainian Nationalists' representative in the city.

During the interwar period there was a growing interest in Ukrainian issues among Britons. The *Slavonic Review*, whose contributors included M. Andrusiak, E. Borschak, D. Doroshenko, I. Mazepa, I. Mirchuk, V. Paneiko, R. Smal-Stotsky, O. Shulhyn, and A. Voloshyn, provided a forum for the discussion of Ukrainian matters.

In 1935 the Anglo-Ukrainian Committee was established, with Lord Dickinson, Lord Noel-Buxton, several MPs, and the noted historians G. Gooch and R. Seton-Watson among its members. Other Londoners who involved themselves with Ukrainian affairs included the intelligence specialist T. *Philipps, the lawyer and politician A. Lincoln, the businessman and politician C. Malone, and the publicist L. Lawton. After the war the publicist A. Herbert and a Catholic activist and editor of the weekly *Tablet*, D. Woodruff, were also sympathetic to Ukrainian concerns.

In August 1943 the Ukrainian Canadian Servicemen's Association moved its headquarters from Manchester to London. In 1945 it initiated the *Central Ukrainian Relief Bureau. In August 1945 the Association of Ukrainian Soldiers in the Polish Armed Forces was established in London, and this organization enabled many Ukrainians, particularly those who had served in the *Polish Second Corps under W. Anders, to begin settling in the city in 1946. In 1947 former members of the *Division Galizien (approx 8,500 men) were relocated from Italy and joined by many immigrants from the displaced persons' camps in Germany.

Today the Ukrainian community in London consists of about 1,500 people. Initially they were predominantly factory and trade workers, but the second generation has managed to establish itself in professions, such as law, medicine, teaching, journalism, and computer science.

The Ukrainian organizations in London include the *Association of Ukrainians in Great Britain (SUB, est 1946), the *Federation of Ukrainians in Great Britain (est 1949), the Anglo-Ukrainian Committee, the Mazepa Society, the Polish-Ukrainian Society, the Academic Society, the Students' Hromada, the Ukrainian Graduates and Professional Association, the Ukrainian Press Agency, the Ukrainian Central Information Service, the Ukrainian

The monument in London to St Volodymyr (sculptor Leonid Molodozhanyan), erected in 1988 in commemoration of the millennium of Christianity in Ukraine

Society, the Society of Ukrainian Litterateurs, the Association of Ukrainian Women, and the Ukrainian Former Combatants in Great Britain. There are also branches of international organizations, such as the Ukrainian National Council, the Anti-Bolshevik Bloc of Nations, the Ukrainian Democratic Alliance (1970–1980s), the Ukrainian Helsinki Union, the Ukrainian Catholic University, the St Sophia Religious Society, the Plast Ukrainian Youth Association, and the Ukrainian Youth Association (SUM). The apostolic exarchate for Ukrainian Catholics in Great Britain and the eparchial administration of the Ukrainian Autocephalous Orthodox church have cathedrals in the city. The headquarters of most British Ukrainian organizations, a number of which have their own buildings, are in London.

Two publishing houses, *Ukrainian Publishers Ltd and *Nashe Slovo*, were active for some time, but only the former, the larger company, now remains. The weekly *Ukrains'ka dumka* (the organ of SUB), the monthlies *Vyzvol'nyi shliakh*, *Soviet Nationality Survey*, *UGPA Newsletter*, and *Press Releases of the Ukrainian Press Agency*, and the quarterlies *Ukrainian Review*, *Vidomosti eparkhiiial'noho upravlinnia UAPTs*, and *Surmach* (a veterans' publication) are all published in London. The Catholic quarterly *Nasha tserkva* was issued in 1953–75, and irregularly for a few years after that, before being replaced by the irregular *Tserkovni visti*.

The libraries of the British Museum and the London School of Slavonic and East European Studies have large holdings of valuable material concerning Ukraine and Ukrainians.

(See also *Great Britain.)

C. Zelenko

Long-fallow system. A method of land cultivation that alternates short periods (usually about 3 years) of crop raising with long periods (up to 25 years) of idleness. Livestock is often pastured on the fallow land. During the first two or three idle years a weedy fallow of annual and biennial plants appears; it is followed by rhizomatous plants and then by grasses as the soil becomes more compact. Finally the wild vegetation typical of the region comes to predominate. During the fallow period the soil's fertility and moisture are restored. Because of its inefficient use of land, the system is rarely practiced today. It has been replaced by no- or low-tillage systems, crop rotation, and the application of fertilizers and herbicides.

The long-fallow system in Ukraine dates back to the Trypilian culture (4,500–2,000 BC). As population increased and land became scarcer, the system had to be abandoned. In the central regions of Kievan Rus' the fallow period, initially, was reduced to as few as three years, and then the fallow system was replaced altogether by a two- or three-year crop rotation system. In the thinly populated steppe and Transcarpathian regions the long-fallow system survived longer. It was still practiced there in the mid-19th century, although it had disappeared from Western Europe by the 16th century. In 1917, substantial tracts in Ukraine (318,000 ha in Kharkiv gubernia and 187,000 ha in Poltava gubernia) lay fallow, most of them belonging to big landowners. As late as the 1930s 500,000 ha of long-fallow land were being used for sheep pasturing.

C. Freeland

Lopan River [Lopan']. A left-bank tributary of the Udy River (which it joins at Kharkiv). It is 96 km long (78 km in Ukraine) and drains a basin area of 2,000 sq km. The Lopan flows through the Central Upland within the borders of Belgorod oblast (RFR) and Kharkiv oblast. Its waters are used for industrial and domestic consumption. The main cities located along the river are Kharkiv and Derkach.

Lopatynska, Filomena [Lopatyns'ka] (née Kravchuk), b 1873 in Chernivtsi, d 26 March 1940 in Odessa. Opera singer (soprano); spouse of L. *Lopatynsky and mother of F. *Lopatynsky. A graduate of the Lviv Conservatory (1904), she performed in 1891–7 at the Ruska Besida Theater in Lviv and later at the Lviv Municipal Opera Theater. For some time she was with the Chernivtsi German theater, although she continued to appear on the Ukrainian stage. In 1915–16 she joined L. Kurbas's Ternopilski Teatralni Vechory theater, and in 1917–23 she performed with the Ukrainian Theater in Chernivtsi and other troupes in Galicia. From the mid-1920s she lived in Soviet Ukraine. Her more important roles included Maryna in N. Kybalchych's *Katria Chaikivna*, Tatiana in P. Tchaikovsky's *Eugene Onegin*, and the title roles in D. Sichynsky's *Roksoliana*, S. Moniuszko's *Halka*, and G. Bizet's *Carmen*.

Filomena Lopatynska

Favst Lopatynsky

Lev Lopatynsky

Yaroslav Lopatynsky (1906–81)

Lopatynsky, Demian [Lopatyns'kyj, Demjan], b 12 March 1866 in Lviv, d 8 February 1951 in Newark, New Jersey. Priest and church and civic leader. After serving in several rural parishes he was appointed canon of the Greek Catholic Lviv metropolity and catechist for secondary schools. A populist by conviction, he became one of the leading members of the National Democratic party and, later, the Ukrainian National Democratic Alliance. He served on the Lviv municipal council, chaired the board of directors of the Dilo Publishing Company (1910–39), and served on the board of Narodna Torhovia. Under his care the Dormition Church in Lviv was restored. After emigrating in 1944, he organized parishes in Germany and England, and in 1950 he joined his family in the United States.

Lopatynsky, Favst [Lopatyns'kyj], b 1899 in Lviv, d 1937. Stage actor and director and film director; son of F. *Lopatynska and L. *Lopatynsky. He began his stage career in the Ternopilski Teatralni Vechory (1915–16) and then worked in Molodyi Teatr (1917–19), the Theater of the Western Ukrainian National Republic (1919), Kyidramte (1920–2), Berezil (1922–7), and the Fairy-Tale Theater in Kharkiv (1926–7). During 1926–33 he was a film director at the Odessa and Kiev Artistic Film studios. He was arrested during the Stalinist terror, and died in a concentration camp. In acting and stage directing Lopatynsky was a follower of L. *Kurbas's system. He played Yarema in *Haidamaky* (The Haidamakas, based on T. Shevchenko) and Leon in F. Grillparzer's *Weh' dem, der lügt* and directed the Berezil productions of *Novi idut'* (The New Are Coming, based on O. Zozulia, 1923), *Mashynobortsi* (adapted from E. Toller's *Die Maschinenstürmer*, 1924), and *Poshyls' u durni* (They Made Fools of Themselves, adapted from M. Kropyvnytsky, 1924). In 1922 Lopatynsky was in charge of Berezil's second experimental workshop. He filmed *Synii paket* (Blue Package, 1926), *Vasia – reformator* (Vasia the Reformer, with O. Dovzhenko, 1926), and *Karmeliuk* (1931). He was also the author of the drama *Kozak Holota* (1927).

Lopatynsky, Lev [Lopatyns'kyj], b 29 February 1868 in Lviv, d 7 September 1914 near Yaniv, Galicia. Actor, author, and public figure; husband of F. *Lopatynska and father of F. *Lopatynsky. After studying law at Lviv University he graduated in drama from the Vienna Conserva-

tory (1891–92) and then was an actor in the Ruska Besida Theater, of which he became director in 1898. As an actor he played mostly heroic character roles, including Hnat in T. Shevchenko's *Nazar Stodolia* and Robert Heinecke in H. Sudermann's *Die Ehre*. He wrote the plays *Do Brazylії* (To Brazil, 1878), *Svekrukha* (The Mother-in-law, 1899), and *Parazia* (1901) and the book *Zur Psychologie des Schauspielers* (1893). After abandoning his stage career Lopatynsky edited the newspapers *Ruslan* (1898–1907) and *Bukovyna* and practiced law in Sambir and Kopychyntsi.

Lopatynsky, Teofilakt [Lopatyns'kyj], b 1670 in Volhynia, d 6 May 1741. Theologian and churchman. A graduate of the Kievan Mohyla Academy, he taught there and then served as rector of the Moscow Slavonic-Greek-Latin Academy (1706–22). He was a member of the Russian Holy Synod, bishop of Tver (1723–5), and archbishop of Pskov (1725) and then of Tver (1726–36). Lopatynsky was one of a number of Ukrainian hierarchs grouped around Metropolitan S. *Yavorsky who sought to reform the Orthodox church in Russia but opposed the more radical positions, the destruction of the patriarchate, and the complete subservience to the state espoused by T. *Prokopovych. Lopatynsky helped prepare a new edition of the Ostrih Bible and published Yavorsky's *Kamen' very ...* (The Stone of Faith ..., 1718). For his opposition to Prokopovych, Lopatynsky was arrested in 1736 and defrocked in 1738. He was released in 1740. He left several unpublished manuscripts on philosophical and religious topics.

Lopatynsky, Yaroslav [Lopatyns'kyj, Jaroslav], b 19 August 1871 in Dolyna, Galicia, d 14 January 1936 in Holohirky, Zolochiv county, Galicia. Composer. A graduate of the Vienna Medical Institute (1898), he worked as a village physician in Pomoriany (Zboriv county) and then in Holohory. He served as a doctor with the Ukrainian Galician Army from 1918 and was eventually captured and imprisoned in Ukraine. He returned to Holohory in 1923. Lopatynsky's compositions include pieces for piano, approx 100 songs for solo voice and for chorus ('*Vstavai, Ukraïno!*' [Arise, Ukraine, 1905]), and stage works, such as the opera *Oksana*, the comic opera *Enei na mandriotsi* (Aeneas on a Journey, 1911), the children's opera *Zirka shchastia* (Star of Happiness), the fantastic opera *Kazka skel'* (Tale of the Cliffs), and several operettas.

Lopatynsky, Yaroslav [Lopatyns'kyj, Jaroslav], b 9 November 1906 in Tbilisi, Georgia, d 10 March 1981 in Donetsk. Ukrainian mathematician; full member of the AN URSR (now ANU) from 1965. Lopatynsky graduated from Azerbaidzhan University in 1926. He taught at institutions of higher learning in Baku, and in 1945–63 he held a chair in differential equations at Lviv University. After working two years at Moscow's Industrial Institute, in 1966 Lopatynsky became head of the Section of Partial Differential Equations at the ANU Institute of Applied Mathematics and Mechanics in Donetsk. Most of his basic research was devoted to the development of the theory of linear and nonlinear partial differential equations. During his Lviv period Lopatynsky obtained important results in the theory of systems of elliptic linear equations, for which he constructed local fundamental solutions. He also developed a method of reducing general boundary value problems to regular integral equations. Lopatynsky was the first person to formulate a condition on the relation between the coefficients of the system and the coefficients of the boundary operators which is necessary and sufficient for the normal solvability of boundary value problems. This is now known as the Lopatynsky Condition. He also obtained some basic results in the solvability of the Cauchy problem for operator equations in Banach spaces. In addition to his scientific articles Lopatynsky wrote *Introduction to the Contemporary Theory of Partial Differential Equations* (1980).

W. Petryshyn

Lopatynsky, Yurii [Lopatyns'kyi, Jurij] (noms de guerre: Kalyna, Sheik), b 12 April 1906 in Ternopil, Galicia, d 16 November 1982 in Hunter, New York. UPA staff officer. Having received officer training in the Polish army (1928–30), he served as an officer in the Carpathian Sich (November 1938–March 1939) and in the Nachtigall Legion of Ukrainian Nationalists (April–September 1941). After spending 18 months in the Sachsenhausen concentration camp he returned to Ukraine in December 1944 and served at UPA headquarters. In May 1945 he conducted negotiations with the Polish Home Army. At the end of the year he arrived in Munich and became deputy chief of the UPA Mission. He was promoted to lieutenant colonel (1950) and awarded the Gold Cross of Merit (1952). After emigrating to the United States (1953) he served as president of the Former Members of the UPA and board member of the *Prolog Research Corporation.

Lopukhov, Oleksandr [Lopuxov], b 12 September 1925 in Horodnia, Chernihiv okruha. Painter. Lopukhov studied at the Kiev State Art Institute (1947–53) and has taught there since 1953 and served as its rector (1973–85). In 1983 he was elected head of the Union of Artists of Ukraine. His paintings, many of which are in the Kiev Museum of Ukrainian Art, portray revolutionary and military themes in the spirit of Soviet patriotism. His best-known works are *To Petrograd (V.I. Lenin)* (1953), *The Arrest of the Provisional Government* (1955–7), *The Arsenal Rebels* (1956–60), *War* (1968–9), *Moonlight Sonata* (1968–70), and *Victory* (1973–5). An album of his works was published in Kiev in 1975.

Los, Fedir [Los'], b 19 June 1908 in Pivnivshchyna, Horodnia county, Chernihiv gubernia, d 21 July 1980 in

Kiev. Historian. He lectured at institutions of higher education (1931–5) and at Kiev University (1949–65, as professor from 1954) and worked at the AN URSR (now ANU) Institute of History (1935–79, as assistant director in 1948–58). His works deal with the Stolypin reforms, the Revolution of 1905 (1955), and the history of the working class (1955, 1962) in Ukraine; he also authored secondary-school history textbooks.

Ukrainian Catholic Church of the Nativity of the Blessed Virgin Mary in Los Angeles

Los Angeles. The second-largest city (1990 pop 3,485,400) in the United States and a major financial, manufacturing, research, and entertainment center on the Pacific coast in southern California. Few Ukrainians settled in Los Angeles before the Second World War. The earliest arrival came in the 19th century, and by 1938 the number had grown to about 150. By 1948 there were approx 500 Ukrainian families in the area, and in 1980, 11,300 residents of Ukrainian origin. The community's activities are centered around the Ukrainian Culture Center, which arose out of the Ukrainian Club in 1946. Headed for many years by M. Novak, the center organized concerts, dances, and plays and raised funds for Ukrainian refugees. In 1961 it bought its own building, the Ukrainian National Home. The Ukrainian Orthodox parishes of St Volodymyr and St Andrew date from 1946 and 1951 respectively. The Ukrainian Catholic parish of the Nativity of the Blessed Virgin Mary was founded in 1947, and a Ukrainian Evangelical Baptist church in 1963. As the community grew, new organizations, such as branches of the Ukrainian National Association (1949), the Ukrainian Fraternal Association (1951), the Ukrainian National Aid (1963), the Ukrainian National Women's League (1957), the Plast Ukrainian Youth Association (1965), and the Ukrainian Youth Association (SUM, 1967), were set up. A Ukrainian credit union was organized in 1964.

Losenko, Antin, b 10 August 1737 in Hlukhiv, Nizhen regiment, d 4 December 1773 in St Petersburg. Painter; a leading exponent of historical painting in the classicist style. He was brought to St Petersburg to sing in the imperial court choir in 1744. After his voice changed, he was sent to study art under I. Argunov (1753–8) and at the St Petersburg Academy of Arts (1759–60), which gave him bursaries to study in Paris (1760–5) and Rome (1766–9).

Antin Losenko: *Zeus and Themis* (oil, 1769)

Losenko became a member of and professor at the academy in 1770, served as its director (1772–3), and wrote its textbook on human proportions (1772). His oeuvre includes paintings on biblical and mythological themes, such as *The Miraculous Draught of Fishes* (1762), *Abraham's Sacrifice* (1765), *Cain* (1768), *Abel* (1769), *Zeus and Themis* (1769), and *Hector's Parting with Andromache* (1773); paintings on historical themes, such as *The Holy Apostle Andrew* (1769) and *Grand Prince Volodymyr and Rohnda* (1770); portraits of prominent personalities; a self-portrait; and approx 200 drawings of nude figures and parts of the body, which were held up as models of excellence to students at the academy for many years. Losenko introduced to Russian painting the *pompier* style and influenced the work of several artists, including I. Akimov, P. Sokolov, and G. Ugriumov. Most of his works are preserved at the Russian Museum in St Petersburg and the Tretyakov Gallery in Moscow. Books about him have been written by A. Kaganovich (1963) and E. GavriloVA (1977).

Loshkarev, Mikhail [Loškarjov, Mixail], b 24 January 1913 in Orenburg, Russia, d 13 October 1986 in Dnipropetrovske. Electrochemist; AN URSR (now ANU) corresponding member from 1967. After graduating from the Ural Industrial Institute (1936) he worked there and at the Ivanovo Chemical Technology Institute. From 1948 he chaired a department at the Dnipropetrovske Chemical Technology Institute, where he also served as rector (1951–72). A specialist in the kinetics of electrochemical processes, he developed a theory of the effect of surface-

active agents on the kinetics of electrode processes and studied the cathodic separation of metals.

Losky, Ihor [Los'kyj], b 15 December 1900 in Lublin, Poland, d 27 May 1936 in Lviv. Historian; son of K. *Losky. As a student at the Ukrainian gymnasium in Kiev he took part in the Battle of *Kruty. After graduating from the Ukrainian Free University in Prague (PHD, 1927) he worked at the Ukrainian Scientific Institute in Berlin (1927–32) and then taught French and German at the Greek Catholic Seminary in Lviv. He contributed historical articles to *Zhyttia i znannia* and helped edit *Khliborob-s'kyi shliakh* and *Ridna shkola*. He specialized in the culture of the Hetman state and 19th-century revolutionary movements in Ukraine.

Kost Losky

Losky, Kost [Los'kyj, Kost'], b 28 January 1874 in St Petersburg, d 14 October 1933 in Prague. Jurist, civic and political figure, writer, and publicist; full member of the Shevchenko Scientific Society. He graduated in history and law from Warsaw and St Petersburg universities and then served as a government official in the Kholm region, where he became a leading figure in the Ukrainian movement. In 1905 he founded a branch of the Prosvita society in Hrubeshiv and a publishing house for popular Ukrainian books. He was a copublisher of the newspaper *Buh*. In 1917 he served as assistant gubernial commissioner for Galicia and then as chairman of the Kholm Gubernia Council. Losky was a member of the Central Rada and director of a department in the Secretariat of Internal Affairs and then in the UNR Ministry of Foreign Affairs. In 1918 the Hetman government sent him as an envoy to Finland, and later, to Sweden and Norway. In 1920 he settled in Prague and turned to academic work: he was appointed a professor of Roman law, dean of the law and social sciences faculty (1927–8), and prorector (1929–30) of the Ukrainian Free University. His main publications were *Ukrainskii vopros: Rossiia i Antanta* (The Ukrainian Question: Russia and the Entente, 1918), *Narys ryms'koi istorii* (An Outline of Roman History, 1919), *Korotkyi narys hrets'koi istorii* (A Brief Outline of Greek History, 1921), *Istoriia dzherel ryms'koho prava* (History of the Sources of Roman Law, 1921), and *Istoriia i systema ryms'koho pryvathoho prava* (The History and System of Roman Private Law, 2 vols, nd). He also published a collection of feuilletons and articles, *Vid velykoho do smishnoho* (From the Sublime to the Ridiculous, 1919), and some translations of A. Chekhov and H. Heine.

Bishop Basil Losten

Bishop Innocent Lotocky

Losten, Basil, b 11 May 1930 in Chesapeake City, Maryland. Ukrainian Catholic bishop in the United States. Ordained shortly after completing his studies at the Catholic University of America in Washington, DC (1957), he became personal secretary to Metropolitan A. *Senyshyn. He was appointed by the Vatican in 1971 as auxiliary bishop of Philadelphia archeparchy, without consultation with the synod of Ukrainian Catholic bishops (headed by Cardinal Y. Slipty). In 1976–7 Losten was administrator of Philadelphia archeparchy, and in 1977 he became bishop of Stamford eparchy. In June 1990 Cardinal M. Liubachivsky appointed him special emissary to assist in the rebirth of the Ukrainian Catholic church in Ukraine.

Losynivka. III-12. A town smt (1990 pop 4,800) in Nizhen raion, Chernihiv oblast. It is first mentioned in historical documents in 1627. Losynivka has a brick factory and a bread-baking complex. Several medieval settlements have been discovered near the town.

Lotocky, Innocent [Lotoc'kyj, Inokentij], b 3 November 1915 in Petlykivtsi, Buchach county, Galicia. Ukrainian Catholic bishop. After studying in Dobromyl and Lavriv he was ordained in 1940 in Czechoslovakia. He completed further studies in Vienna (1945), served in Belgium, and moved to the Pittsburgh area in 1946 to become acting provincial of the Basilian order in the United States. In 1957–81 Lotocky was a pastor at churches in New York City, Glen Cove (New York), Chicago, and Hamtramck (Michigan). In 1981 he was consecrated bishop of Chicago eparchy.

Lototska, Olena [Lotoc'ka] (née Folys), b 23 May 1894 in Liubycha Kniazie, Rava Ruska county, Galicia, d 2 December 1975 in Albany, New York. Activist of the women's movement. She emigrated to the United States with her first husband, Rev V. Dovbushovsky, in 1912, and after his death married V. *Lototsky. She was a founder and longtime president (1931–4, 1943–65) of the *Ukrainian National Women's League of America. She was also the moving force behind the convening of the First Ukrainian Women's Congress in America (1932), the founding of the journal **Nashe zhyttia* (1944), and the organizing of the 1948 World Congress of Ukrainian Women in New York, which gave rise to the *World Federation of Ukrainian Women's Organizations. She served as vice-president and then president (1969–72) of the federation and helped organize the Second World Congress of Ukrainian Women

Olena Lototska

Antin Lototsky

in 1959. She maintained contacts with various international women's associations and attended international women's conferences in Washington (1925), Helsinki (1954), Montreal (1957), and Paris (1958).

Lototska-Tokarzewski, Oksana [Lotoc'ka-Tokarzëvs'ka], b 1887, d 1950 in London. Community activist; daughter of O. *Lototsky and wife of J. *Tokarzewski-Karaszewicz. She served as a secretary of the Ukrainian diplomatic mission in Turkey (1919–20) before moving to France, where she was active in organizing exhibitions of Ukrainian art and various concerts. She represented Ukrainian women at international women's congresses in Vienna (1921) and Paris (1926). She moved to Italy in 1936 and published articles on Ukrainian affairs in *Osservatore Romano*. Later she settled in England, where she continued her community involvements.

Lototsky, Antin [Lotoc'kyj] (pseud: Ya. Vilshenko), b 1881, d 28 May 1949 in Lviv. Writer and pedagogue. For many years he taught at a gymnasium in Rohatyn. He wrote novelettes, short stories, and tales in verse for children and adolescents: *Tsvity z polia* (Flowers from the Field, 1907), *Vedmedivs'ka popivna* (The Priest's Daughter from Vedmedivka, 1909), *Trylisy* (1910), *Smertne zillia* (Deadly Herbs, 1921), *Naïzd obriv* (The Raid of the Avars, 1923), *Try pobratymy* (The Three Blood Brothers, 1934), *Bulo kolys' na Ukraïni* (Once upon a Time in Ukraine, 1934), *Kozak Baida* (The Cossack Baida, 1936), *Roksoliana* (1936), *Otrok kn. Romana* (Prince Roman's Page, 1937), and *Kniazha slava* (The Princes' Glory, 1939). Most of those works have historical themes and are marked by a fine sensitivity to the psychology of children. Some of them have been reprinted several times. Lototsky coedited several children's magazines, such as *Svit dytyny* and *Nash pryiatel*.

Lototsky, Oleksander [Lotoc'kyj] (pseud: O. Bilousenko, O. Liubenky, and Spectator), b 22 March 1870 in Bronnytsia, Mohyliv county, Podilia gubernia, d 22 October 1939 in Warsaw. Civic and political figure, writer, publicist, and scholar; full member of the Shevchenko Scientific Society (from 1900) and the Ukrainian Scientific Society in Kiev. After graduating from the Kiev Theological Academy in 1896, he worked (1900–17) in the Ministry of State for the Control of Finances in Kiev and then in St Petersburg, where he rose to the position of deputy gener-

Oleksander Lototsky

Volodymyr Lototsky

al comptroller. An active member of the *Society of Ukrainian Progressives from 1908, he assisted in establishing the Ukrainian caucus in the Russian State Duma. He became head of the *Ukrainian National Council in Petrograd in 1917 and then gubernial commissioner of Russian-occupied Bukovyna and Pokutia. His positions in the UNR government included that of secretary general (September–November 1917) and state comptroller (1918) in the General Secretariat of the Central Rada, and in the Hetman government he was minister of religious affairs (October–November 1918). As acting minister of religious affairs under the UNR Directory Lototsky was instrumental in the declaration of autocephaly by the Ukrainian Orthodox church (1 January 1919). He also went to Constantinople as minister plenipotentiary to obtain the patriarch's recognition of that church's new status. He emigrated in 1920 to Vienna, then Prague, and finally Warsaw. He served as a docent and eventually professor of canon law at the Ukrainian Free University (1922–8) and professor of Orthodox church history at Warsaw University (1929–39). He was a founder and director (1930–9) of the *Ukrainian Scientific Institute in Warsaw. He was also minister of internal affairs and deputy premier in the *Government-in-exile of the UNR (1927–30).

Lototsky's earliest publications (1889) were children's books. He published readers and the anthology *Vinok* (The Wreath) and helped found the Vik publishing house. In the 1890s his scholarly and popular studies began to appear in *Kievskaia starina*, *Pravda* (Lviv), *Literaturno-naukovyi vistnyk*, and *Zapysky Naukovoho tovarystva im. T. Shevchenka*. He contributed articles on economics to Russian economic journals, *Ukrainskii vestnik*, and *Ukrainskaia zhizn'*. He wrote many articles on the history of schools in Ukraine and Russia. As a publicist he contributed hundreds of articles to leading (usually liberal) Russian journals and newspapers defending Ukrainian causes. As a church activist he collaborated with the Synod in publishing a Ukrainian translation of the Gospel, wrote textbooks on the Old and New Testaments, and belonged to the commission for translating liturgical books at the Ukrainian Scientific Institute in Warsaw. Lototsky was also active in civic affairs. He promoted the printing of Ukrainian books, and in the 1900s he was active in the revival of Ukrainian-language publishing. He defended Ukrainian interests before the St Petersburg bureaucracy. A liberal democrat and a republican, he belonged to the Ukrainian

Democratic Radical party, which later became the *Ukrainian Party of Socialists-Federalists. Lototsky remained active while abroad in writing articles for foreign journals (Turkish, Greek, Finnish, Czechoslovakian, Polish, and French) and participating in various civic and cultural undertakings.

Lototsky's major writings include studies of cathedral chapters in Ukraine in the 15th and 16th centuries (1896) and of the social position of the secular clergy in Ukraine and Russia in the 18th century (1898), as well as *Ukrains'ki dzherela tserkovnoho prava* (Ukrainian Sources of Ecclesiastical Law, 1931; repr 1984) and *Avtokefalia* (Autocephaly, 2 vols, 1935, 1938). His memoirs, *Storinky mynuloho* (Pages of the Past, 4 vols, 1932–4) and *V Tsarhorodi* (In Constantinople, 1939; repr 1966), are valuable sources for the history of Ukrainian cultural and civic life in the late 19th and early 20th centuries.

R. Smal-Stotsky

Lototsky, Volodymyr [Lotoc'kyj], b 15 May 1883 in Shchepaniv, Berezhany county, Galicia, d 17 March 1958 in Philadelphia. Journalist and civic activist; husband of O. *Lototska. As a member of the Ukrainian National Democratic party, he worked as an editor of *Dilo* and chief editor of *Svoboda* (1910–13) in Lviv. After emigrating to the United States in 1913, he worked on the staff of **Svoboda* and eventually became its chief editor (1919–26). He then headed the paper **Ameryka* in Philadelphia (1927–43) and **Narodna volia* in Scranton, Pennsylvania (1943–6). Lototsky was active in many Ukrainian organizations and served as secretary of the Education Commission of the Ukrainian National Association, a member of the General Ukrainian Committee (1915), secretary of the Ukrainian National Committee (1918), and secretary of the League of Four Nations (1919).

Lotykove. V-19, DB II-5. A town smt (1986 pop 4,000) in Slovianoserbske raion, Luhanske oblast. Founded at the beginning of the 20th century as Ivanivskyy Rudnyk, it was renamed Gustav in 1912 and Lotykove in 1919 (in honor of the Bolshevik V. Lotyk). It has a coal mine and a building-materials plant.

Louvain. See Leuven.

Lovchyi. The game warden at a prince's court in Rus'. He was responsible for managing the lands, game, and personnel related to hunting. For his remuneration he was allowed to collect a special tax called *lovche* in cash or kind from the local town or village population. The post was prestigious, for the princes attributed great importance to hunting. The earliest reference to the position is found in Volodymyr Monomakh's **Poucheniie ditiam*.

Low Beskyd (aka Lemko Beskyd). The section of the Beskyd Mountains between the Bila River at Tylych Pass and the Toplia River in the west, and between the Sian River along Oslava and Lupkiv Pass and the Laborets River in the east. The Low Beskyd has the lowest elevation and widest area of the external flysch part of the Carpathians. It includes, from north to south, the Carpathian foothills, the Gorlice-Sianik Basin, and the Low Beskyd itself.

Low Beskyd: eastern part of the Gorlice-Sianik Basin

The foothills, composed of soft sand-hills, slate, clay, and marls, roll gently along a path 30–50 km across. Wide ridges reaching 350–450 m in height rise 150–200 m above wide valleys. A truly mountainous aspect is found only on the Chornorih Ridge (592 m) north of Krosno and in the eastern part along the middle Sian River (Peremyshl foothills). That area was settled by a pocket of Ukrainians (see **Zamishantsi*).

The Gorlice-Sianik Basin is a zone nearly 80 km in length and 8–12 km in width between the foothills and the Low Beskyd itself. Partially forested, it includes several plateaus (270–350 m) and low hills. Owing to advantageous natural conditions and a favorable location, the area is densely populated, with 150 to 200 persons per sq km. Its eastern region (including the town of Sianik) was populated by Ukrainians until 1946.

The Low Beskyd itself, which rises 200–300 m above the Gorlice-Sianik Basin, constitutes a long-standing ethnographic border between Ukraine and Poland. The Low Beskyd is the lowest and (along with the Middle Beskyd) the gentlest part of the Carpathians. Only a few peaks exceed 1,000 m (such as Busiv, at 1,010 m), and a large portion of the region consists of elevations similar in landscape to foothills. The ravines are also low and easily traversed. The most massive ridges reach over 800 m in the middle part of the Low Beskyd, but only on the Galician side. The southwestern region is characterized by insular hills, and the eastern region has a lattice structure (lengthwise ridges and valleys). In the south, between the Toplia and the Laborets rivers, the Low Beskyd becomes the Ondava Highlands, at 400–500 m, which are crossed by relatively deep perpendicular valleys at 200–300 m.

The Low Beskyd is the largest deforested area in the Ukrainian Carpathians (29 percent forested, 40 percent cultivated, 26 percent hayfields and pasture). The forests in the lower regions consist of oak, elm, linden, and other trees; beech and fir are common in the upper reaches.

Until 1946 the entire northern (Galician) part of the Low Beskyd lay in Ukrainian ethnographic territory, and the southern (Transcarpathian) part was mainly Ukrainian and partly Slovak. The Ukrainian population consisted predominantly of *Lemkos. Since the resettlement of Ukrainians from the Lemko region, Ukrainians have been found only in the southern parts of the Low Beskyd.

V. Kubijovč

Lower-Don Lowland. A large lowland in the lower Don Valley that includes most of the *Don region (territory of the Don Cossacks). It consists of four geographical regions. The first is the Azov Lowland, in the southwest, which joins the Kuban Lowland (and is sometimes known as the Kuban-Azov Lowland). In the east is a second formation, the Sal-Manych Ridge, which has an eroded terrain that drops sharply in the east to the Caspian Lowland. The third region, the Kuma-Manych Depression, is located in the south. The fourth region, the Don Ridge in the northwest, has a broken relief that represents an extension of the Central Upland.

Łoziński, Władysław (pseud: Władysław Lubicz), b 29 May 1843 in Opari, Drohobych county, Galicia, d 20 May 1913 in Lviv. Polish writer, literary critic, and historian. He produced a number of historical novels, including *Czarne godziny* (Black Hours, 1869) and *Hazardy* (Risks, 1870), and numerous stories published in over 10 collections. As a historian he took a special interest in the past of the burghers and nobility of Galicia, in the works *Patrycjat i mieszczaństwo lwowskie w XVI–XVII w.* (The Lviv Patriciate and Burghers in the 16th–17th Centuries, 1890), *Kupiectwo lwowskie* (The Lviv Merchant Class, 1891), *Sztuka lwowska* (Lviv Art, 1898), *Prawem i lewem: Obyczaje na Czerwonej Rusi* (With the Right and Left: Customs in Red Ruthenia, 1903), and *Życie polskie w dawnych wiekach* (Polish Life in Ancient Times, 1907).

Lozivskiyi [Lozivs'kyj]. v-17. A town smt (1990 pop 7,000) in Slovianoserbske raion, Luhanske oblast. It was founded in 1949 and has a coal mine and a coal-enrichment plant. A number of kurhans from the 11th to 13th century are located near Lozivskiyi.

Lozova. v-17. A city (1990 pop 73,700) and raion center in Kharkiv oblast. It was founded in the late 1860s during the construction of the Kursk–Kharkiv–Azov railway line. In April 1918 the UNR Army fought several battles against the Red Army near Lozova. Today the city is a major railway junction and has several railway-related enterprises, a metallurgical machinery plant, a machine-building factory, and a tractor plant.

Lozovsky, Oleksander [Lozovs'kyj], b 12 September 1900 in Kiev, d 22 March 1922 in Kiev. Graphic artist. He studied at the Ukrainian State Academy of Arts (1918–22).

Oleksander Lozovsky: cover design of a poetry collection by P. Tychna (1920)

His teachers, of major influence on him, were H. *Narbut and M. *Boichuk. Lozovsky designed the covers of P. Tychna's early poetry collections *Soniashni klarnety* (Solar Clarinets, 2nd edn, 1920), *Zamists' sonetiv i oktav* (Instead of Sonnets and Octaves, 1920), and *Pluh* (Plow, 1920); an edition of M. Kotsiubynsky's works (1922); S. Vasylichenko's collection *V kholodku* (In the Shade, 1922); and several editions of scores of Ukrainian folk songs (1921). At the academy he exhibited his prints *Malachite*, *Annunciation*, *St John the Baptist*, and *Memento mori* in 1920 and portraits of V. Lenin and H. Skovoroda in 1921.

Mykhailo Lozynsky

Roman Lubkivsky

Lozynsky, Mykhailo [Lozyns'kyj, Myxajol], b 1880, d 23 October 1937. Lawyer, publicist, and political figure. He was a collaborator with the *Union for the Liberation of Ukraine, editor of *Hromads'kyi holos*, a longtime contributor to and coeditor of *Dilo*, and a contributor to *Hromads'ka dumka*, *Rada*, and *Haslo*, the official organ of the Revolutionary Ukrainian party (RUP). In March 1919 he served as undersecretary of foreign affairs for the Western Province of the Ukrainian National Republic, a member of the delegation for negotiating the Ukrainian-Polish peace treaty, and a participant at the Paris Peace Conference. In 1921–7 he was a professor of international law at the Ukrainian Free University in Prague. Later he emigrated to the USSR and chaired the Department of Law at the Institute of the National Economy and worked at the Ukrainian Institute of Marxism-Leninism in Kharkiv. Lozynsky's works, dealing with the modern history of Western Ukraine, included *Pol'skyi i rus'kyi revoliutsiinyi rukh i Ukraïna* (The Polish and Ruthenian Revolutionary Movement and Ukraine, 1908), *Utvorennia ukrains'koho koronnoho kraiu v Avstrii* (1915; pub in German as *Die Schaffung einer ukrainischen Provinz in Oesterreich*, 1915), *Halychyna v zhyttii Ukraïny* (Galicia in the Life of Ukraine, 1916), *Halychyna v rr. 1918–1920: Rozvidky i materiialy* (Galicia in the Years 1918–20: Research and Materials, 1922; repr 1970), *Uvahy pro ukrains'ku derzhavnist'* (Remarks Concerning Ukrainian Statehood, 1927), and *U desiatyrichchia halyts'koï revoliutsii: Fakty i sproba otsinky* (On the Tenth Anniversary of the Revolution in Galicia: Facts and an Attempted Evaluation, 1928). He was also the author of a textbook on international law (1922) and a collection dedicated to S. Dnistriansky, *Okhorona natsional'nykh menshostei* (Defense of National Minorities, 1923), as well as research articles on M. Drahomanov, M. Pavlyk, and others. In 1930 he was arrested and deported to the Northern Urals, where he was shot.

Lozynsky, Volodymyr [Lozyns'kyj], b 1855, d 1914. Civic figure. A forester by profession, he was active as a young man in Narodnaia Volia and in the Russian Socialist Revolutionary party. Later he supported the Ukrainian Popular Defense and, during its suppression in 1909, saved many of its members. He published and edited the satirical magazine *Shersten'* in Kiev (1906) and provided financial support for *Svitlo* (1910–14) and *Ukrains'kyi etnohrafichnyi zbirnyk* (1914).

Lozynsky, Yevhen [Lozyns'kyj, Jevhen], b 18 May 1909 in Tysmenytsia, Tovmach county, d 17 December 1977 in New York. Political activist. He joined the Ukrainian Military Organization and the OUN while he was still a gymnasium student, and he was imprisoned several times by the Polish authorities for his political activities. In 1932 he graduated in law from Cracow University. As a leading member of the OUN (Bandera faction) he was arrested in September 1941 and spent a number of years in German concentration camps. After the war he was placed in charge of social affairs in the OUN leadership in Munich. He emigrated to the United States and became a leading figure in pro-Banderite organizations there and served as president of the *Self-Reliance Association of American Ukrainians. He was also a member of the executive of the Ukrainian Congress Committee of America.

Lozynsky, Yosyp [Lozyns'kyj, Josyp], b 20 December 1807 in Virky, near Peremyshl, d 11 August 1889 in Yavoriv, Galicia. Ethnographer, publicist, grammarian, and Greek Catholic priest. Influenced by the Slovenian philologist J. Kopitar and the debates on South Slavic orthography, he proposed to adopt the *Latin alphabet for Ukrainian (1834) and provoked considerable opposition from the Ukrainian intelligentsia, including M. *Shashkevych. He wrote a valuable grammar of the Ukrainian vernacular, *Gramatyka jazyka ruskiego (matoruskiego)* (Grammar of the Ruthenian [Little Russian] Language, 1846), and published in the Latin alphabet a collection of Western Ukrainian wedding songs, *Ruskoje wesile* (The Ruthenian Wedding, 1835). Lozynsky consistently opposed *yazychiie as literary Ukrainian and polemicized with Y. *Levytsky on the issue. He wrote a study of folk games (1860) and a biography of I. Snihursky (1851).

Lubart. See Liubartas.

Lubchenko, Andrii [Lubčenko, Andriij], b 27 October 1921 at Lomakivskyi *khutir*, Myrhorod county, Poltava gubernia, d 26 November 1977 in Kiev. Solid-state physicist. A graduate of Lviv University (1951), he worked in Kiev at the AN URSR (now ANU) institutes of Physics (1957–66), of Theoretical Physics (1966–71), and for Nuclear Research (1971–7). He made significant contributions to the field of the optical properties of solids.

Lubenets, Tymofii [Lubenec', Tymofij], b 21 February 1855 in Krolevets, Chernihiv gubernia, d 14 April 1936. Pedagogue and education activist. He taught at a gymnasium in Kiev from 1883 to 1889. He became an elementary school inspector for the Kiev school district in 1889 and later the director of elementary schools for Kiev gubernia. He wrote grade-school textbooks and methodological studies, supported *Sunday schools, and advocated teach-

ing in the Ukrainian language. He published a Ukrainian primer in Lviv under the pseudonym of Norets which cost him his position as director of elementary schools.

Lubensky, Stepan [Lubens'kyj] (Lubenchenko), b and d ? Early-18th-century icon painter. A presbyter at St Nicholas's Church in Kiev, he painted the iconostases in the Dormition Cathedral of the Kievan Cave Monastery (from 1720) and St Michael's Golden-Domed Monastery in Kiev.

Lubkivsky, Roman [Lubkivs'kyj], b 10 August 1941 in Ostrivets, Ternopil oblast. Poet, editor, and translator. He graduated from the pedagogical faculty at Lviv University (1963). He was deputy chief editor of the Lviv literary monthly *Zhovten'* (1966–80), and since 1981 he has headed the Lviv branch of the Writers' Union of Ukraine. In 1990 he was elected to the Supreme Soviet from the Yavoriv district. In 1992 he was appointed the first ambassador of newly independent Ukraine to Czechoslovakia. His poetry collections are *Zachudovani oleni* (Mesmerized Deer, 1965), *Hromove derevo* (The Thunderous Tree, 1967), *Rame-na* (Shoulders, 1969), *Smoloskypy* (Torches, 1975), and *Zviz-dar* (The Stargazer, 1977). He has compiled and translated the poetry anthologies *Slov'ians'ke nebo* (The Slavic Sky, 1972) and *Slov'ians'ka lira* (The Slavic Lyre, 1983), edited other books of translated poetry, and written literary criticism and publicism.

Lublin (Liublin). II-3. A city (1990 est pop 349,600) in eastern Poland and a voivodeship center. In the Middle Ages Lublin was an important Polish city on the border with Kiev and then Galicia-Volhynia principalities. In 1244 it was captured by Danylo Romanovych, and ca 1289, by his son Lev. Until 1302 Lublin was part of the Galician-Volhynian state. In 1474 it became the seat of a Polish voivode, and in 1578, of the crown tribunal, the highest court for southern Poland. In the 16th and early 17th centuries Lublin was an important trade center and the seat of many Polish diets. The Union of *Lublin (1569) was signed at one such session. Ukrainians constituted an important segment of the city's population. Lublin was also at that time an important Ukrainian religious center. In 1593 an Orthodox brotherhood modeled on the Lviv Dormition Brotherhood was established at the Church of the

Lublin: 15th-century Ruthenian frescoes in the Trinity Chapel

Lublin: 15th-century Ruthenian frescoes in the Trinity Chapel

Savior, and in 1607 a school was added. In the mid-17th century the church was acquired by the Basilian monks, who founded a monastery that remained active until 1864. Hetman B. Khmelnytsky occupied Lublin a number of times in 1648–9. In the second half of the 17th century the local Ukrainian population was thoroughly Polonized.

From 1815 Lublin belonged to the Congress Kingdom of Poland and then became a Russian gubernial town under direct rule of St Petersburg. It was the administrative center of Lublin gubernia, which included the Kholm region until 1912. Until 1914 few Ukrainians lived in the city.

In the interwar period Lublin was the center of a voivodeship which included the Kholm region and Podlachia. A Ukrainian colony of 300 to 400 people was established in the city. A few dozen Ukrainians studied at the Polish Catholic university. During the German occupation, mainly in 1939–41, the number of Ukrainians in Lublin grew to 1,000 as Ukrainians fled Soviet-occupied Western Ukraine. Lublin was the home of the Ukrainian Relief Committee, two Ukrainian parishes (one Catholic and one Orthodox), and a district office of the Ukrainian Central Committee (headed by V. Tymtsiurak and then L. Holeiko). From 1960 the local Ukrainian colony belonged to the Ukrainian Social and Cultural Society in Warsaw. A part of the archive and library of the former Greek Catholic Peremyshl-eparchy is housed in the library of Lublin Catholic University. The Trinity Chapel contains frescoes by the Ukrainian painter *Andrii (1415). The Church of the Transfiguration, built in 1607, represents the Ukrainian adaptation of the Renaissance style.

Lublin, Union of. A union agreement between the Grand Duchy of Lithuania and the Kingdom of Poland, signed on 1 July 1569 at a joint assembly of Lithuanian and Polish deputies in Lublin. The treaty gave birth to a single state, the Polish-Lithuanian Commonwealth, with a common elected monarch combining the offices of the Polish king and the Lithuanian grand duke, a common diet and senate, a joint foreign policy, and one monetary system. The Grand Duchy preserved its autonomy with its own laws, government, administration, courts, army, and finances. The treaty was signed by Lithuania at a time when it needed Polish help in its war against Muscovy. For Poland the treaty provided a means of acquiring some

Lithuanian territory. Under the treaty Poland (the Polish crown) obtained the Ukrainian territories of Podlachia, Volhynia, Podilia, and the Bratslav and Kiev regions. The nobility of those territories were given the same rights and privileges as the Polish nobility. The Grand Duchy retained, apart from Lithuanian territory, Belarus and the Berestia and Pynske regions. Thus the union gave Poland control over a large part of Ukrainian territory, where it proceeded to subjugate and exploit the indigenous population.

Lubni or Lubny. III-13, 14. A city (1990 pop 59,800) and raion center in Poltava oblast. It was founded as a fortified frontier town in 988 by Prince Volodymyr Sviatoslavych of Kiev. In 1107 the Rus' princes defeated the Cumans in battle there. Lubni was destroyed by the Mongols in 1239. Rebuilt in the latter half of the 16th century by the Wiśniowiecki family, Lubni was granted the rights of *Magdeburg law. In May 1596 the Polish army crushed the Cossack-peasant rebellion led by S. Nalyvaiko and H. Loboda in the Battle of Solonytsia near Lubni. In 1637-8 the town was a center of Cossack-peasant unrest. It was a regimental capital in the Hetman state (1648, 1658-1781) and then a county town in Poltava gubernia in the Russian Empire (1802-1917). A botanical garden with medicinal plants and the first field apothecary in Ukraine were established there in the early 18th century.

Today Lubni is an industrial city with machine building and metalworking as its chief industries: the largest plants are the Komunar Machine-Tool Plant, the Komsolets Machine-Building Plant, and a computing-machine plant. A branch of the All-Union Scientific Research Institute of Medicinal Plants operated in Lubni. The city has an art gallery and a regional museum (est 1897). The *Mhar Transfiguration Monastery is located nearby.

Lubni regiment (Lubenskyi polk). An administrative territory and military formation of the Hetman state. The regiment was formed in 1648 at the outbreak of the Khmelnytsky uprising but in 1649 was divided into Myrhorod and Kropyvna regiments. It was reconstituted in 1658 when Kropyvna regiment was abolished. Until the mid-18th century the regiment had 13 companies, and later, 23. In 1721 its population was approx 22,000, including 10,700 Cossacks. It could field almost 2,700 infantry and 4,000 cavalry troops. According to the 1764 census the regiment encompassed 21 towns and 1,609 villages and estates and had a population of 147,000, including over 68,000 Cossacks. Its Cossacks took part in several Russian military expeditions, the Great Northern War (1700-21), the Russo-Turkish War (1735-9), and the Seven Years' War (1756-63). In 1781 Lubni regiment was dissolved, and its territory was divided between Kiev and Chernihiv vicegerencies.

Lubni Republic (Lubenska respublika). The name of a trial held in 1909 at the Military Circuit Court in Kiev. Of the 57 defendants the principal ones were A. *Livvytsky, M.

Livytska, V. and M. Shemet, and M. Sakharov. Among the lawyers conducting the defense were M. *Mikhnovsky and A. *Margolin. The charge of conspiracy to overthrow the tsarist government stemmed from the activities of the Revolutionary Coalition Committee, which was formed in Lubni at the outbreak of the Revolution of 1905 by the Ukrainian Social Democratic Workers' party and other socialist parties, such as the Jewish Bund and Poale Zion. Having been frustrated in its plans by the failure of the revolution at the center, the committee set up a combat force known as Lubni Self-Defense or Civil Self-Defense under A. Livvytsky's command to counteract Jewish pogroms organized by the Black Hundreds and to stop the arrests of revolutionaries. A court of appeal revoked the military court's harsh sentences and acquitted all the defendants.

Lubok literature (from *lub* 'linden plank'; hence, a woodcut print). Inexpensive illustrated books for the mass reader in which certain genres of poetry and prose were commonly published. They first appeared in the second half of the 18th century, after *lubok pictures began to circulate. In their day the booklets served the function of modern-day comic books. The most popular of them were songbooks of Little Russian folksongs, such as *Molodyi chumak* (The Young Wagoner, 1884), *Banduryst* (The Banduryst, 1887), and *Slipyi kobzar* (The Blind Kobzar, 1899); lives of saints; legends; booklets of religious and moral instruction, such as *Lysty z neba* (Letters from Heaven); calendars; collections of anecdotes, such as *Veselyi opovidach* (The Witty Narrator) and *Pobrekhen'ky* (Tall Tales); collections of folktales; collections of everyday sketches, such as *Byla zhinka muzhyka* (A Wife Beat Her Husband), *V mistechku Dzhulyni trapylas' novyna* (In the Town of Dzhulyna an Amazing Thing Happened), and *Iak kum Bandura chortia ku piimav, ta ne vtrymav* (How Godfather Bandura Caught a Devil but Could Not Hold Him); dream books; ghost stories; declaimers; adventure and pseudo-historical novels, such as *Naimychka, povest' iz malorossiiskoi zhizni* (The Servant Girl, a Novelette about Little Russian Life) and *Ivan Stepanovich Mazepa, malorossiiskoi getman* (Ivan Stepanovych Mazepa, the Little Russian Hetman). Many of the books were translations from Russian, particularly of N. Gogol's *Taras Bul'ba* (which appeared under the sensationalized titles *Rozbiinyk Taras Chornomor* [The Brigand Taras Chornomor] and *Pryhody otamana Urova* [The Adventures of Otaman Urvan]), *Vii*, and *Nich pid Rizdvo* (The Night before Christmas). Some translations of classic Western writers, such as W. Shakespeare, Dante, and A. Dumas, were also published in *lubok* form. I. Kotliarevsky's *Eneida* (Aeneid) and *Natalka Poltavka* (Natalka from Poltava) circulated widely in such editions. *Lubok* literature was also widely known among Ukrainian immigrants in the New World.

Lubok pictures. A form of graphic art for the common people, combining a printed and colored image with a subscript (often a simple verse). *Lubok* pictures were popular in Ukraine from the end of the 18th century. The name is derived from *lub*, the linden plank in which the picture was engraved or the linden bark from which the baskets for transporting the pictures were woven. In the 19th century, *lubok* pictures were produced by means of li-

Lubok illustration to the Bible by Illia (wood engraving, 17th century)

Lubok sheet by E. Denbrovsky (wood engraving, late 18th century)

thography and chromolithography and offered a cheap way of decorating peasant homes. They depicted scenes illustrating folk songs, tales, legends, the Bible, literary works, and proverbs. Sometimes they carried a critical or satirical comment on the political order. In prerevolutionary Ukraine many *lubok* pictures were printed in Odessa by Yu. Fesenko and at the Kievan Cave and Pochaiv monasteries. The tradition was revived during the Second World War by H. Bondarenko, A. Rieznychenko, V. Fatalchuk, and L. Chernov. The stylistic qualities of the genre are sometimes used in Soviet posters and illustrations of children's books.

***Lubok* theater.** A pseudo-ethnographic, popular theatrical genre of a coarse artistic quality, performed by *touring theaters. Approx 70 *lubok* theater troupes existed during the 1880s and 1890s, with the actors and directors creating the repertoire themselves. To a certain degree *lubok* theater developed as an antipode of the ethnographic theater, which strove to portray village life in a realistic way or the Ukrainian heroic past in a colorful poetic form. *Lubok* theater twisted these portrayals into grotesque caricature and farce. It was not interfered with by the tsarist government, and some *lubok* theater troupes in Russian-ruled Ukraine were active until the NEP. Satires based on *lubok* theater performances were produced by the Ukrainian Drama Theater and by Berezil.

Lucaris, Cyril, b 13 November 1572 in Crete, d 27 June 1638 near Constantinople. Greek theologian and patriarch. He was exarch in the Polish-Lithuanian Commonwealth of the Patriarch of Alexandria Meletios Pegas, and rector of the theological academy in Vilnius. He participated in the Orthodox sobor that opposed the Church Union of *Berestia in 1596, and worked to undo the union and restore Orthodox hegemony in Ukraine. He was elected Patriarch of Alexandria in 1602 and Patriarch of Constantinople in 1620. His support for many Protestant reforms earned him the enmity of the conservative clergy, and he was deposed (and reinstalled) as patriarch five times. Lucaris maintained close relations with Ukraine and in 1623 ratified the statutes of the Lutske Brotherhood of the Elevation of the Cross and its school. In 1633 he con-

firmed the election of P. *Mohyla as Kievan metropolitan and named him exarch of the Patriarch of Constantinople.

Luchakivsky, Kostiantyn [Lučakivs'kyj, Kostjantyn], b 19 April 1846 in Yavche, Berezhany circle, Galicia, d 24 March 1912. Educator and classical philologist. A graduate of the universities of Lviv and Vienna, Luchakivsky taught Greek, Latin, and Ukrainian at the Academic Gymnasium of Lviv and the Ukrainian gymnasium in Buzke. He was also an inspector of Ukrainian schools. He wrote articles on classical philology and on Ukrainian literature. He is the author of school textbooks, among them a reader (1892) and *Vzory poezii i prozy* (Patterns of Poetry and Prose, 1894; 2nd edn 1909).

Roksoliana Luchakovska: *Madonna*

Luchakovska, Roksoliana [Lučakovs'ka, Roksoljana], b 6 July 1938 in Stanyslaviv (now Ivano-Frankivske). Ukrainian-American painter. A postwar refugee in Philadelphia from 1951, she studied at the Ukrainian Art Studio there and the Pennsylvania Academy of Fine Arts (BFA, 1961). Since 1964 she has lived in Spain with her husband, the sculptor R. Armstrong. Her oeuvre contains landscapes and figural compositions in an impressionist style, frescoes, mosaics, and stained-glass windows. She has had many solo exhibitions in the United States (Philadelphia, New York, Princeton, Washington) and in Spain (Málaga, León, Madrid, and Santander). Her paintings

and windows are found in churches, public buildings, and private collections in Europe and the United States.

Luchakovsky, Bohdan [Lučakovs'kyi], b 19 November 1900 in Stanyslaviv county, Galicia, d 11 August 1971 in Spain. Forestry engineer. A graduate of the polytechnical institute in Prague (1925), he was the founder and several times president of the *Union of Ukrainian Foresters and Woodsmen. In 1948–51 he lectured on forestry and forest economy at the Ukrainian Technical and Husbandry Institute in Munich. He was the author of many articles on hunting and forestry. In 1951 he emigrated to the United States.

Luchakovsky, Hryts [Lučakovs'kyj, Hryc'], b 13 September 1892 in Obertyn, Horodenka county, Galicia, d 21 June 1951 in Bathurst, Australia. Judge. While studying law at Lviv University he took part in the campaign for a Ukrainian university and helped found the Ukraina sports society. During the First World War he served as a lieutenant in the Austrian army. After the war he completed his law studies and served as judge in Bolekhiv and Peremyshl. During the 1939–41 Soviet occupation of Western Ukraine he sat on the supreme court of the Generalgouvernement in Cracow and presided over the Labor Alliance of Ukrainian Jurists. When the Germans occupied Galicia he returned to Zolochiv, where he worked as district judge. He helped to organize the Division Galizien and then enlisted in it as a lieutenant. After being interned as a POW by the British he emigrated to Australia.

Volodymyr Luchakovsky

Michael Luchkovich

Luchakovsky, Volodymyr [Lučakovs'kyj], b 1839 in Dovzhanka, Ternopil county, Galicia, d 29 March 1903 in Ternopil. Civic leader, writer, and lawyer. He established a law office in Ternopil in 1862 and became a leading organizer in the local community. He was a founder of various cultural institutions in Ternopil, including the Prosvita society, Ruska Besida, and an amateur theater. In 1884 he helped establish the Prince Ostrozky Foundation, and in 1885, the political organization known as the *People's Council in Lviv. Toward the end of the 1890s he was elected mayor of Ternopil. He collected proverbs and riddles, which eventually were published by I. Franko,

and wrote the study *Prychynok do etnohrafii halyts'koho Podillia* (Materials on the Ethnography of Galician Podillia, 1883). He wrote poems, stories, comedies for the local theater, and articles on public issues for such papers as *Pravda*, *Dilo*, and *Zerkalo*. He translated a number of German and Polish plays. In the field of law he translated the Austrian criminal and criminal-procedure codes from German into Ukrainian and compiled notes on legal terminology, which were later used by K. *Levytsky in preparing his legal dictionary.

Luchkai, Mykhailo [Lučkaj, Myxajlo] (Lutskay; né Pop), b 19 November 1789 in Velyki Luchky, Transcarpathia, d 3 December 1843 in Uzhhorod, Transcarpathia. Historian, linguist, and Greek Catholic priest. After graduating from the Barbareum seminary in Vienna, he served as archivist and librarian of the Uzhhorod eparchy and devoted himself to the history, ethnography, and language of Transcarpathia. He wrote *Grammatica Slavo-Ruthena ...* (1830), based on J. Dobrovsky's Czech grammar of 1822. It is one of the earliest descriptions of a Ukrainian dialect. It was studied by M. Vozniak (1890), V. Simovych (1930–1), G. Gerovsky (1931), and V. Pogorelov (1939). The grammar was reprinted with an introduction by O. Horbach in 1979. Luchkai argued that Church Slavonic was the oldest form of the Transcarpathian dialect and therefore it should be the literary language of Transcarpathia. Although his six-volume history of Transcarpathia was not published, it was circulated widely and influenced many later historians.

Luchkovich, Michael [Lučkovyč, Myxajlo], b 13 November 1892 in Shamokin, Pennsylvania, d 21 April 1973 in Edmonton. Politician, writer, and teacher, of Ukrainian descent. He moved to Canada in the footsteps of his sisters (who became teachers in Manitoba) and studied at the University of Manitoba (BA, 1916) and the Calgary Normal School (teaching certificate, 1917). He then held a succession of teaching posts in the Ukrainian immigrant communities of east central Alberta until 1926, when he was elected in the Vegreville constituency as the first Canadian member of parliament of Ukrainian origin. He was re-elected in 1930. His parliamentary career was highlighted by his vigorous response to disparaging public comments made by the Anglican bishop of Saskatchewan, G. Lloyd, about 'unpreferred continentals' and by an address to Parliament regarding the violation of minority rights in Poland (following the *Pacification campaign against Ukrainians). After his defeat in 1935, Luchkovich wrote extensively; his works include translations of N. Prychodko's *One in Fifteen Million* (1952), I. Kiriak's *Sons of the Soil* (in abridged form, 1959), and S. Goldeman's *Jewish National Autonomy in Ukraine* (1968). His reminiscences appeared in 1965 as *A Ukrainian Canadian in Parliament*. The Alberta Heritage Scholarship Trust grants a fellowship in his name.

Luchuk, Volodymyr [Lučuk], b 27 August 1934 in Matche, Hrubeshiv county, Kholm region, d 24 September 1992 in Lviv. Poet and translator. He graduated from Lviv University (1958), and worked as poetry editor of the journal *Zhovten'* (1959–63), secretary of the Lviv branch of the Ukrainian Society for the Protection of Historical and Cul-

tural Monuments, and director of the manuscript division of the Lviv Scientific Library. He was the author of the poetry collections *Dovir'ia* (Trust, 1959), *Osonnia* (Sunny Places, 1962), *Maievo* (The Swaying, 1964), *Obrii na krylakh* (The Horizon on Wings, 1965), *Vahomist'* (Weightiness, 1967), *Bratni luny* (Fraternal Echoes, 1974), *Dyovovyd* (Strange View, 1979), *Navstrich* (Toward a Meeting, 1984), and *Kolobih* (Circle Run, 1986). He also wrote over 10 books of verse for children, translated many literary works, and edited a collection of S. Hordynsky's poetry (1990).

Ivan Luchyshyn

Ivan Luchytsky

Luchyshyn, Ivan [Lučyšyn], b 20 May 1895 in Hrushatychi, Peremyshl county, Galicia, d 6 July 1984 in Zurich, Switzerland. Engineer and civic figure. After being arrested and imprisoned in the early 1920s by the Polish authorities for his activity in organizing co-operatives, he left for Czechoslovakia, where he completed his engineering studies in 1926. He returned to Galicia in the late 1920s and became active in the Ukrainian Socialist Radical party, the Kamenari youth association, and the newspaper *Hromads'kyi holos*, while working as an inspector for the Ridna Shkola vocational schools. After the Second World War he emigrated to Germany, where he was active in the Ukrainian National Council, and then to Switzerland.

Luchytska, Kateryna [Lučyc'ka], b 30 September 1889 in Kiev, d 25 January 1971 in Kiev. Stage actress and director. She began her theatrical career in 1908 in the troupe of her father, L. Luchytsky, and then worked in the Ukrainian National Theater in Kiev (1917–18), the Shevchenko First Theater of the Ukrainian Soviet Republic (1920–1), and the Zankovetska Theater (1922–3). From 1923 she worked in various theaters in Kiev, Dnipropetrovske, and Odessa. In 1945–59 she directed the Stryi Ukrainian Music and Drama Theater.

Luchytsky, Borys [Lučyc'kyj], b 7 February 1906 in Ust-Medveditskaia, Don Cossack province, d 6 March 1966 in Chernihiv. Stage actor and director. A pupil of O. Sukhodolsky, in 1923 he began working as an actor and director in various workers' and peasants' theaters, mainly in Chernihiv. In 1933–60 he was artistic director of the Nizhen Ukrainian Music and Drama Theater, and from

1960 he led the Chernihiv Ukrainian Music and Drama Theater.

Luchytsky, Ivan [Lučyc'kyj] (Loutchisky), b 14 June 1845 in Kamianets-Podilskyyi, Podilia gubernia, d 22 August 1918 in Kiev. Historian and civic figure; corresponding member of the St Petersburg Academy of Sciences from 1908. He graduated from Kiev University (1866) and served as a professor of history there (1877–1908) and taught at the Higher Courses for Women in St Petersburg. He worked in the Poltava zemstvo administration and was elected to the State Duma as a representative of Kiev and the *Constitutional Democratic party. He was a member of the Old *Hromada of Kiev and a contributor to *Kievskaiia starina*. He was one of the cofounders of the *Ukrainian Scientific Society in Kiev. Luchytsky's major works concerned socioeconomic and cultural-religious history; among them are *Katolicheskaia Liga i kalvinisty vo Frantsii* (The Catholic League and Calvinists in France, 1877), *Krest'ianskoe zemlevladienie vo Frantsii nakanune revoliutsii* (1900; repub in French as *La propriété paysanne en France à la veille de la révolution*, 1912), *Rabochee naselenie i ekonomicheskaiia politika germanskikh gorodov 15–16 vv.* (Worker Population and the Economic Policy of German Towns in the 15th–16th Centuries, 1894), *Materialy dlia istorii zemlevladieniia v Poltavskoi gubernii v 18 v.* (Materials for the History of Land Holding in Poltava Gubernia in the 18th Century, 1883; on the basis of the Rumiantsev census), and *Etudes sur la propriété communale dans la Petite Russie* (2 vols, 1895, 1899; also pub in *Revue internationale de sociologie*, 1895). His studies of the Ukrainian peasantry are considered the standard in the field.

Hrushevs'kyi, O. 'Pamiaty profesora I.V. Luchyts'koho,' in *Nashe mynule*, 3 (Kiev 1918)

A. Zhukovsky

Volodymyr Luchytsky

Luchytsky, Volodymyr [Lučyc'kyj], b 2 May 1877 in Kiev, d 20 October 1949 in Kiev. Geologist and petrographer; full member of the AN URSR (now ANU) from 1945; son of I. *Luchytsky. He graduated from Kiev University in 1899 and studied abroad. He then taught at Kiev University, where in 1912 he was appointed a professor of geology. He was head of the Ukrainian Geological Committee (1917–23), which he helped organize. Then he served as a professor at the Moscow Mining Academy

(1923–30) and the Moscow Institute of Geological Prospecting (1930–41). He returned to Kiev, where he was a professor of mineralogy and petrography at Kiev University (1945–9) and became director of the Institute of Geological Sciences (1947–9). Luchytsky's scientific works were devoted to the petrography and mineralogy of the Ukrainian Crystalline Shield, the stratigraphy of Precambrian rocks of the East European Platform, regional hydrogeology, and the mineral resources of Ukraine. He prepared hydrogeological and geological maps of Ukraine. His petrography textbook, first published in 1910, had gone through six editions by 1947. He was editor in chief of the fifth volume of *Geologiya USSR* (Geology of the USSR, 1944).

Luciuk, Lubomyr [Lučjuk, Ljubomyr], b 9 July 1953 in Kingston, Ontario. Geographer and Ukrainian-Canadian community figure. A graduate of Queen's University (MA, 1979) and the University of Alberta (PH D, 1984), he has taught at the Royal Military College in Kingston since 1989. A specialist in historical geography, Luciuk has written a history of Ukrainians in Kingston (1980). He has edited the memoirs of G. Panchuk (1983); and has co-edited documentary collections on Ukrainian-Canadian history (1986), Anglo-American foreign policy vis-à-vis Ukraine in 1938–51 (1987), the documents of the British Foreign Office and the 1932–3 famine in Ukraine (1987), collections of articles on ethnicity and the Canadian state in 1939–45 (1988), and the compendium *Ukrainians in Ontario* (1988). He has coauthored (with B. Kordan) a geography of Ukrainians in Canada (1989).

George Luckyj

Luh society: coat of arms

Luckyj, George Stephen Nestor [Luc'kyj, Yurii], b 11 June 1919 in Yanchyn, Peremyshliany county, Galicia. Literary scholar; member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences; son of O. *Lutsky. He was educated at the University of Birmingham and Columbia University (PH D, 1953). He taught at the University of Saskatchewan (1947–9) and the University of Toronto (1952–84), where he occupied the position of chairman of the Department of Slavic Languages and Literatures (1957–61). He was an associate director of the *Canadian Institute of Ukrainian Studies (1976–82) and the first editor of *Canadian Slavonic Papers* (1956–61). He was one of the editors of the two-volume *Ukraine: A Concise Encyclopedia* (1963, 1970) and the English-language editor of the first volume of *Encyclopedia of Ukraine* (1984).

Most of Luckyj's studies are devoted to Ukrainian and

Soviet literature. He has edited and introduced a number of volumes, including a documentary study of Vaplite (1957), *Four Ukrainian Poets* (1969), *Modern Ukrainian Short Stories* (1973), *Discordant Voices: The Non-Russian Soviet Literatures* (1975), *Shevchenko and the Critics* (1980), and *Sami pro sebe: Avtobiografii vydatnykh ukraintsiv XIX-ho stolittia* (About Themselves: Autobiographies of Notable Ukrainians of the 19th Century, 1989). He is the author of *Literary Politics in the Soviet Ukraine, 1917–1934* (1956; 2nd edn 1990), *Between Gogol' and Ševčenko: Polarity in Literary Ukraine, 1798–1847* (1971), *Panteleimon Kulish: A Sketch of His Life and Times* (1983), *Young Ukraine: The Brotherhood of Saints Cyril and Methodius, 1845–1847* (1991), *Lystuvannia z Ievhenom Sverstiukom* (A Correspondence with Yevhen Sverstiuk, 1992), and *Ukrainian Literature in the Twentieth Century: A Readers' Guide* (1992). A prolific translator, he translated (often in co-operation with his wife, Moira) into English works by I. *Bahriany, M. *Khvylovy, and V. *Pidmohylny as well as P. Zaitsev's classic biography of T. Shevchenko (1988). A festschrift in his honor, *In Working Order: Essays presented to G.S.N. Luckyj*, was published as a separate volume of the *Journal of Ukrainian Studies* (1989).

D.H. Struk

Lud (Folk). A Polish ethnographic quarterly published in Lviv from 1895 (as an annual from 1912) by the Polish Ethnographic Society. Its founder and first editor was A. Kalina (1895–1904). In 1945 it was moved to Wrocław. Besides Polish and Slavic ethnographic material *Lud* published a substantial amount in Ukrainian ethnography.

Ludwig, Albert (né Mykhailo Bzovy), b 14 November 1919 in Melfort, Saskatchewan. Lawyer and politician of Ukrainian descent. After serving in the Royal Canadian Air Force during the First World War, Ludwig studied law at the University of Alberta. From a riding in southern Alberta, he was the first Ukrainian elected to the Alberta legislature, as the Social Credit member for Calgary–Mountain View in 1959, 1963, 1967, and 1976. He served as minister of public works from 1969 to 1971, and was appointed a judge in the Athabasca region in 1974.

Luh (Meadow). A paramilitary sports, physical-fitness, and fire-fighting society in Galicia, founded by R. *Dashkevych in Lviv in 1925 after the *Sich society was banned by the Polish government. Luh grew from 163 branches in 1925 to 817 in 1927, and then declined to 750 in 1929 and 598 in 1931, partly as a result of the creation of the *Union of Ukrainian Progressive Youth. The members (8,250 in 1925, 60,000 in 1927, 45,000 in 1931) practiced calisthenics, shooting, and military drills; played organized sports; participated in provincial and county jamborees and community celebrations; and organized amateur theaters. The parent organization (Velykyi Luh) in Lviv owned a sports field and a gymnasium and published a monthly organ, **Visty z Luhu* (1925–39). The Polish government forbade Luh to form branches in Volhynia, Podlachia, and the Kholm and Lemko regions, and in 1932 it placed Luh under the jurisdiction of the state physical education administration and forbade its members to fight fires. The existing branches were split up between those who rejected and those who accepted the new Polish statute imposed on them. In 1934 the former group had 92 branches

with 2,000 members, and the latter, 330 branches with 20,000 members. Leading figures in Luh were Dashkevych, V. Fedorchak, O. Kobersky, M. Kozlaniuk, A. Kurdydyk, O. Kurtseba, M., R., and Yu. Mamchak, and O. Pavlova. In 1939, after the Soviet occupation of Galicia, Luh and its 805 branches (50,000 members) were banned.

Luha River. A right-bank tributary of the Buh River. It is 93 km long and drains a basin area of 1,348 sq km. The river flows through Volhynia oblast. It is used by industry, especially the sugar refining industry. The main city located on the river is Volodymyr-Volynskyi.

Luhanchyk River [Luhanchyk]. A right-bank tributary of the Donets River. It is 83 km long and drains a basin area of 659 sq km. The river flows through the Donets Ridge within the borders of Luhanske oblast. It is used for irrigation and water supply. Two sluice-gates and several water reservoirs have been built on it.

Luhanka River (also Luhan). A right-bank tributary of the Donets River, which it joins at Stanychno-Luhanske. It is 198 km long and drains a basin area of 3,670 sq km. It flows through the Donets Ridge within the borders of Donetske and Luhanske oblasts. Its waters are used for industry and irrigation. Several water reservoirs and sluice-regulators have been built on it. The main cities located on the river are Pervomaiske, Kirovske, and Luhanske.

Luhanske [Luhans'ke]. V-20, DB II-6. A city (1989 pop 497,000) at the confluence of the Luhan and Vilkhivka rivers and the capital of Luhanske oblast. It is one of the major industrial centers of the country. In 1935–58 and from 1970 until May 1990 it was called Voroshylovhrad.

Luhanske was founded in 1795, when the imperial government decided to build a cannon foundry and ammunition factory for the Black Sea navy there. During the Napoleonic Wars the plant was greatly expanded, and the workers' population increased. The state enterprise stimulated the development of mining in the Donets Basin. After the Crimean War the foundry could not compete with more efficient plants, and in 1887 it was shut down. By then Luhanske was a large industrial center linked by rail to the Dnieper Industrial Region and the ports of the Sea of Azov. In 1882 the county administration was moved from Slaviansoserbske to Luhanske, and the town was granted city status. In 1895 the government reopened a munitions factory in Luhanske, and in 1896 a Belgian firm established the largest steam-engine plant in the Russian Empire there. By 1905 the plant was building 21 percent of the steam engines produced in the empire. The city's population grew from 20,400 in 1897 to 34,000 in 1904 and 68,000 in 1914. Much of its population (68.2 percent in 1897) was Russian.

Under the Soviet regime the city grew rapidly in the interwar period. In 1938 it became the administrative center of a new oblast. Today it is an important railway and highway junction and a major industrial center. Its most important industries are machine building and metalworking; it has a diesel-locomotive building consortium, a coal machine-building plant, a motor-vehicle assembly plant, a crankshaft factory, a combustion-engine parts factory, and a tube-rolling mill. The light industry manufactures goods such as fine fabrics, footwear, knitwear, and clothing. The plants of the food industry include meat

Luhanske: view of Kotsiubynsky Street

packers, dairies, and confectionery factories. The building-materials industry produces bricks, tiles, and reinforced concrete. The energy to run the industries is supplied by the Luhanske Power Station in Shchastia.

The city's educational system includes 4 institutions of higher learning – the Agricultural, Pedagogical, Machine-Building, and Medical institutes – as well as 12 specialized secondary schools and 21 vocational schools. The first Ukrainian gymnasium was opened only in 1991. There are about 40 research institutes, including a coal-enrichment institute and a branch of the Institute of the Economics of Industry. The cultural facilities of the city include three theaters (Ukrainian music and drama, Russian drama, and puppet), a circus, a museum of regional studies, and an art museum.

V. Kubijovyč

Luhanske Agricultural Institute (Luhanskyi silskohospodarskyi instytut). An institution of higher learning, until 1991 under the USSR Ministry of Agriculture. It was formed in 1921 out of a secondary agricultural school. In 1991 it consisted of eight faculties, including agronomy, economics, zootechnics, agricultural mechanization, a correspondence school, and a graduate program. The institute maintains an experimental farm. It published the newspaper *Za radians'ki kadry*. At the end of the 1970s its enrollment was almost 5,000.

Luhanske Art Museum (Luhanskyi khudozhnii muzei im. Artema). A collection of paintings, sculptures, graphic art, and decorative art, established in Luhanske in 1945. It was opened to the public in 1963. It is divided into departments of Ukrainian and Russian prerevolutionary art, Soviet art, Ukrainian decorative folk art, and Western European art. The museum contains over 5,000 works. Approx 1,000 of them are exhibited in its 13 exhibition halls. They include works by V. Tropinin, I. Aivazovsky, R. Sudkovsky, A. Kuindzhi, M. Pymonenko, P. Levchenko, O. Murashko, Ye. Bukovetsky, P. Volokidin, S. Svitolavsky, V. Orlovsky, S. Prokhorov, Ye. Volobuiev, O. Shovkunenko, T. Yablonska, V. Chekaniuk, S. Hryhoriev, Y. Bokshai, and H. Yakutovych.

Luhanske Coal Machine-Building Plant (Luhanskyi zavod vuhilnoho mashynobuduvannia im. O. Parkhomenka). A factory producing mining and mineral-processing equipment. It grew out of a small railway repair shop established in 1878. Since 1930 it has specialized in

the production of machines and equipment for mineral enrichment complexes.

Luhanske Diesel-Locomotive Building Consortium (Luhanske vyrobnyche obiednannia teplevozbuduvannia). A consortium created in 1976 and consisting of a diesel-locomotive factory and a branch of the All-Union Scientific Research Institute of Diesel Locomotive Building. The main plant was established in 1896 to produce steam locomotives for freight and passenger trains, boilers, and steel and iron castings. The first locomotive, with a 560-HP capacity, was built in 1900. Since 1957 the plant has specialized in the production of diesel locomotives. By 1980 it was producing almost 95 percent of the diesel locomotives built in the USSR. Many of them were exported. It also produces parts and other railway equipment.

Luhanske Machine-Building Institute (Luhanskyi mashynobudivnyi instytut). An institution of higher learning under Ukraine's Ministry of Higher and Specialized Secondary Education. It was founded in 1960 through the reorganization of the Evening Machine-Building Institute for Workers. It has seven faculties, as well as an evening and correspondence school and a graduate program. The institute's two branches are in Rubizhne and Krasnodon. In 1976–7 the enrollment was about 13,000, in 25 specialties. The interdepartmental collection *Konstruiuvannia i vyrobnytstvo transportnykh mashyn* is published by the institute.

Luhanske Nature Reserve (Luhanskyi zapovidnyk). A nature reserve established in Luhanske oblast for the study and preservation of the natural habitat of floodplain forests, meadows, and multiple grass steppes. The reserve extends over a total area of 1,579.5 ha in three separate divisions: the Striletskyi Steppe (494 ha, est 1936), Stanychno-Luhanske (498 ha, est 1968), and the Proval'skyi Steppe (587.5 ha, est 1975 along the Donets Ridge). The aim of the reserve is to preserve in their natural state steppe vegetation and wild fauna, especially the endangered steppe marmot. Over 400 species of flora can be found in the reserve, including tall plants, feather grass vegetation, and brushwoods.

Luhanske oblast. An administrative territory (1989 pop 2,864,000) in eastern Ukraine, formed on 3 June 1938. It has an area of 26,700 sq km and is divided into 18 raions, 37 cities, 109 towns (smt), and 189 rural councils. The capital is *Luhanske.

Physical geography. The Donets River, which flows in a southeasterly direction, divides the oblast into two distinct zones. The northern part consists of a hilly plain rising from the Donets Lowland to spurs of the Central Upland. The southern region consists of the Donets Ridge, an undulating plain with an elevation of up to 200–250 m dissected by river valleys and ravines. That part of the oblast is rich in coal and natural gas deposits as well as limestone, marl, chalk, and clay. The climate is continental: the summers are hot and dry, and the winters are cold and snowless. The average January temperature is -7°C and the average July temperature, 22°C . The annual precipitation ranges from 400–450 mm in the north to 550 mm in the Donets Ridge. The water resources of the oblast are

Luhanske oblast: landscape in Antratsyt raion

limited. The main tributaries of the Donets are the Luhan and the Velyka Kamianka on the right bank and the Krasna, the Borova, the Aidar, and the Derkul on the left. Chernozems cover 81 percent of the surface. Only 8.6 percent of the oblast is forested. In the ravines the prevalent trees are oak, ash, maple, pear, and apple, and in the floodplains, alder, poplar, and willow. Most of the natural steppe vegetation in the oblast has been replaced with cultivated plants; only remnants are left, along riverbanks and in the *Luhanske Nature Reserve.

History. The territory of the oblast has been inhabited since the Paleolithic period. In the 10th to 14th centuries it was occupied by nomadic tribes. In the 16th and 17th centuries Muscovy set up forts and fortifications in the steppes to protect its southern borders from nomadic raiders. The Zaporozhian Cossacks established some outposts in the territory. In the second half of the 17th century runaway peasants from Ukraine and Russia began to form settlements. At the beginning of the 18th century the Russian rulers brought in Serbian, Wallachian, and Moldavian colonists to establish military settlements in the Donets region. The territory became part of Azov gubernia (1775–82) and Katerynoslav vicegerency (1783–1802). In the 19th century the eastern part of the present oblast belonged to Don Cossack province, the southern and western parts to Katerynoslav gubernia, and the northern part to Kharkiv gubernia. After the revolution the territory was incorporated into the Ukrainian SSR.

Population. According to the census of 1989, Ukrainians form a slight majority (51.9 percent) of the oblast's population, followed by Russians (44.8). The rest of the population consists mostly of Belarusians, Tatars, and Jews. The population density is 107 people per sq km and is highest in the southern parts of the oblast. After Donetsk oblast, it is the most urbanized oblast in Ukraine: 86 percent of its population is urban. The largest cities are Luhanske, *Komunarske, *Kransyi Luch, *Stakhanov, and *Lysychanske.

Industry. Most of the oblast's output (87.6 percent) is industrial. The main industries are the fuel industry (27.3 percent of the industrial output in 1986), which includes coal (19.2 percent), machine building and metalworking (24 percent), the chemical industry (14 percent), and fer-

rous metallurgy (12 percent). The energy for those industries is supplied by thermoelectric power plants in Shchastia, Siverskodonetske, and Lysychanske. Coal mining is conducted by 9 consortia, which control 94 mines and 28 enrichment plants. The metallurgical industry imports iron ore from the Kryvyi Rih region for the manufacture of steel (in Komunarske), ferrous alloys (Stakhanov), and tubing (Luhanske). The machine-building and metalworking industries produce transportation vehicles (particularly diesel locomotives in Luhanske), mining machinery (Krasnyi Luch), railway coaches (Stakhanov), and computers (Siverskodonetske). The chemical industry includes a petroleum refinery in Lysychanske, a mineral fertilizers plant in Siverskodonetske, an aniline dyes factory in Rubizhne, and a soda plant in Luhanske. The large building-materials industry produces approx half of the window glass in Ukraine as well as brick, silicate blocks, ceramic plates, and reinforced-concrete products. The main products of light industry are clothing, footwear, and fine fabrics.

Agriculture. In 1986 there were 169 collective and 152 state farms and 8 poultry factories in the oblast. Of the total 1,888,000 ha of farmland 77.2 percent was cultivated, 19.9 percent was pasture, and 1.6 percent was hayfield. Of the farmland 96,400 ha were irrigated. Slightly over half of the sown area (1,352,000 ha) was devoted to grain crops, such as winter wheat (10.7 percent), barley (16.4 percent), and corn (10.3 percent). Feed crops occupied 34.2 percent of the sown area. The main industrial crop was sunflower (10.4 percent). Approx 5 percent of the area was set aside for fruit and vegetable farming. Animal husbandry accounts for 64 percent of the oblast's agricultural output. Most of it consists of beef and dairy cattle farming; hogs, horses, sheep, goats, and poultry are also raised.

Transportation. In 1986 the railway network in the oblast had 1,192 km of track. The main lines crossing the oblast are the Luhanske–Kiev, Luhanske–Moscow, Debal'tseve–Luhanske–Millerovo, Kharkiv–Volgograd, and Luhanske–Rostov-na-Donu. There were 5,600 km of highway, 5,300 km of which were paved. The major highways running through the oblast are the Luhanske–Kharkiv, Kharkiv–Rostov-na-Donu, and Luhanske–Donetske. There are two main airports, in Luhanske and Siverskodonetske. The Stavropol–Moscow and Soizuz gas pipelines and the Kuibysheve–Slovianske and Groznyi–Lysychanske oil pipelines cross the oblast.

BIBLIOGRAPHY

Istoriia mist i sil URSR: Luhans'ka oblast (Kiev 1968)

Luhanske Pedagogical Institute (Luhanskyi pedahohichnyi instytut im. T.H. Shevchenka). An institute of higher learning, under the jurisdiction of the Ministry of Education. Originally formed in 1923 as a branch of the Donetsk Institute of People's Education, the school was reorganized as a pedagogical institute in 1934 and named after T. Shevchenko in 1939. The institute has six faculties: philology, physics and mathematics, physical geography, history and pedagogy, music education, and physical education. It also operates a research division, branch laboratories, and an agricultural research station. In 1976–7 a total of 5,691 students were enrolled at the institute.

Luhanske Regional Studies Museum (Luhanskyi kraieznavchyi muzei). A museum founded in Luhanske in 1920. Most of its collections were destroyed during the Second World War. After the war the museum was rebuilt. In the late 1970s over 100,000 items were preserved in its natural science, pre-Soviet history, and Soviet history sections. Branches of the museum are also located in Starobilske, Antratsyt, Krasnyi Luch, Sverdlovske, Lysychanske, and Parkhomenko, Krasnodon raion (the Oleksander Parkhomenko Museum). Guides to the museum were published in 1963, 1968, 1977, and 1980.

Luhansky, Mykola [Luhans'kyj], b 8 December 1906 in Kharkiv gubernia, d 29 August 1968 in Kiev. Pharmacologist and toxicologist. A graduate of the Kharkiv Medical Institute (1931), he was director of the Ukrainian Sanitary and Chemical Scientific Research Institute in Kharkiv (1939–41) and the Kiev Scientific Research Institute of Pharmacology and Toxicology (from 1951). From 1942 to 1951 he served as deputy minister of health of the Ukrainian SSR. In his published works he dealt with the mechanism of the action and medicinal properties of thiotic compounds and the combined use of antidotal and pathogenetic therapy.

Luhova Mohyla. See Oleksandropil kurhan.

Maksym Luhovtsov

Luhovtsov, Maksym [Luhovcov], b 11 May 1885 in Yuzivka (now Donetske), Bakhmut county, Katerynoslav gubernia, d 7 June 1956 in Kiev. Metallurgist; full member of the AN URSR (now ANU) from 1939. He graduated from the Katerynoslav Higher School of Mining (1916) and served as director of the AN URSR Institute of Ferrous Metallurgy (1939–51). He did research in the statistical theory of blast furnace processes and sintering and developed methods of improving the quality of cast iron.

Luhovy, Laryssa [Luhova, Larysa], b 23 January 1942 in Ternopil. Ukrainian-Canadian painter. She was raised in Belgium (1943–50) and Montreal, and graduated from George Washington University (MFA, 1969), where she won first prize at the 1969 Annual Art Show. Solo exhibitions of her works have been held in Washington (1970, 1976) and New York (1981). Using oils and acrylics and employing strong hues, nonobjective forms, and highly expressive brush strokes Luhovy has developed her own vocabulary of images.

Laryssa Luhovy: *Composition* (acrylic)

Oleksander Luhovy

Luhovy, Oleksander (pseud of Oleksander Ovrutsky-Shvabe), b 8 January 1904 in Ovruch, Volhynia gubernia, d 30 September 1962 in Chisholm, Alberta. Writer. In 1929 he emigrated to Canada, where he worked as an agricultural and industrial laborer. His dramas and novels, all based on historical topics, include *Vira Babenko* (1936), *Za voliu Ukraïny* (For the Freedom of Ukraine, 1939), *Chorni khmary z-za Prypiati* (Black Clouds from beyond the Prypiat, 1946), and a novel on the life of Ukrainians in Canada, *Bezkhvatnyi* (Homeless, 1946). In 1943 he published the historical outline *Vyznachne zhinotstvo Ukraïny* (Outstanding Women of Ukraine), and in 1947 he became publisher and editor of the monthly *Ukraïns'ka rodyna* (Toronto and Edmonton).

Luhyny. II-9. A town smt (1990 pop 5,100) on the Zheriv River and a raion center in Zhytomyr oblast. It is first

mentioned in a historical document in 1606. Luhyny received smt status in 1967. A settlement from the early Meolithic period (5th millennium BC) was discovered near the town.

Luka Lake. II-4. A lake located in northwestern Volhynia oblast between the Buh River and the upper part of the Prypiat River. It has an area of 7 sq km and a depth of up to 10 m and is located at an altitude of 162 m. The lake has flat, marshy banks and is fed by surface runoff. Straits connect Luka Lake with Pulemet and Svytiaz lakes.

Luka Zhydiata. See Zhydiata, Luka.

Luka-Raikovetska. An early Slavic settlement of the 7th to 9th century AD, located in the Luka basin on the Hnylopiat River near the present-day village of Raiky, Berdychiv raion, Zhytomyr oblast. The site is approximately 250 m long and 80–120 m wide. It was excavated in 1946–7 by an expedition of the AN URSR Institute of Archeology under the direction of V. Honcharov. Uncovered were the remains of eight semi-pit dwellings which contained stone ovens, hand-molded clay pottery, and iron implements. The material culture found at Luka-Raikovetska was characteristic of the southwestern groups of the East Slavic tribes living along the right bank of the Dnieper River just prior to the emergence of the Kievan Rus' state. In Polisia such groups belonged to the forest-dwelling *Derevlians.

Yevmen Lukasevych

Mykola Lukash

Lukasevych, Yevmen [Lukasevyč, Jevmen], b 26 December 1871 in Bila, Chortkiv county, Galicia, d 20 December 1929 in Warsaw. Physician and civic leader. After completing his medical studies in Zurich (1901) he settled in Kiev, where he worked as a zemstvo physician, was a member of the Ukrainian Scientific Society, helped found the Chas publishing house and the Prosvita society, and was active in the Rodyna club. In 1917–18 he helped organize the Ukrainian Red Cross and the Chief Sanitation Administration and published the monthly *Ukraïns'ki medychni visty*. At the end of 1918 he headed a diplomatic mission of the UNR to Switzerland, and in 1920 he was appointed deputy minister for foreign affairs in V. Prokopovych's cabinet. Having settled in Warsaw after the First World War, he founded and directed a hospital there and

financed the daily newspaper *Ukrains'ka trybuna*. He compiled and published *Anatomichnyi slovnyk* (Anatomical Dictionary, 1926).

Lukash, Mykola [Lukaš], b 19 December 1919 in Krolevets, Chernihiv gubernia, d 29 August 1988 in Kiev. Translator. He graduated from Kiev University (1941) and the Kharkiv Institute of Foreign Languages (1947), and until 1953 he taught German, French, and English in Kharkiv's postsecondary schools. For most of his life Lukash worked as a translator of literature. He translated into Ukrainian from 18 European languages, including J.W. von Goethe's *Faust*, G. Boccaccio's *Decameron*, G. Flaubert's *Madame Bovary*, M. de Cervantes's *Don Quixote*, Lope de Vega's plays, poetry by P. Verlaine, V. Hugo, G. Apollinaire, F. Schiller, H. Heine, R. Burns, A. Mickiewicz, and J. Tuwim, and works by many other writers. He also wrote on lexicographical matters. Through his translations, he restored into use many 17th- and 18th-century words and introduced neologisms into the contemporary Ukrainian literary language. In 1973 he was expelled from the Writers' Union of Ukraine and the editorial board of the journal *Vsesvit* for offering to serve the ailing I. *Dziuba's sentence of political imprisonment.

Lukashevych [Lukaševyč]. A Cossack *starshyna* family in the Pereiaslav region. Lukash (d 1736) was the osaul (1716–33), quartermaster (1735), and acting colonel of Pereiaslav regiment. Hryhorii (1735–52), Mykhailo (1752–67), and Luka (1769–73) were osauls in that regiment. Luka was also the regiment's last quartermaster (1773–9) and the last colonel of Kiev regiment (1779–83). His son was V. *Lukashevych. Other descendants include the ethnographer P. *Lukashevych and the bibliophile I. Lukashevych (1811–60), who was a gubernial secretary (1844–50).

Lukashevych, Antin [Lukaševyč], b 18 February 1870 in Babyn, Bukovyna, d 23 May 1936 in Chernivtsi. Civic and political leader in Bukovyna. A candidate of the National Democratic party, he won a seat in the Bukovynian Diet (1911–18) and in the Austrian parliament (1907–18). In the interwar period he was elected to the Rumanian parliament (1920) and to the Rumanian Senate (1926). In both houses, as well as the minorities department of the League of Nations, he defended the national rights of the Ukrainian people in Bukovyna. In 1922 he helped found the Ukrainian Popular Organization in Bukovyna. In his articles, which appeared in the Ukrainian and Austrian press, he criticized the Rumanian government's discriminatory policies toward Bukovynian Ukrainians.

Lukashevych, Platon [Lukaševyč], b 1806 in Berezan, Pereiaslav county, Kiev gubernia, d 1887 in Berezan. Folklorist. A graduate of Nizhen Lyceum, where he was N. Gogol's classmate, and of the Richelieu Lyceum (1828), he began to collect Ukrainian folklore under J. Kollár's influence. Of the collected materials, he published only four carols and the collection *Malorossiskie i chervonorusskie narodnye dumy i pesni* (Little Russian and Red Ruthenian Folk Dumas and Songs, 1836), which contained 176 songs of various genres and spells against toothache. Some of the dumas in the collection – on S. Kyshka, the Cossack Holota, and the storm on the Black Sea, and the captives' lament – appeared in print for the first time; others – on I.

Ivas-Konovchenko, I. Nechai, Perebynis, and Morozenko – appeared in a new version. After his death some of Lukashevych's notes were published by V. Horlenko and B. Hrinchenko. His manuscripts are preserved at the Central Scientific Library of the ANU; they include a study of Ukrainian superstitions, a collection of Ukrainian songs written down by him, a collection of folk songs with his commentary, an essay on Ukrainian fables, and his autographs of all the dumas and many of the songs in the 1836 collection.

Lukashevych, Vasyl [Lukaševyč, Vasyl'], b ca 1783 in the Pereiaslav region, d 16 October 1866 in Boryspil, near Kiev. Political activist. After working in St Petersburg at the Collegium of Foreign Affairs (1803–5) and the Ministry of Internal Affairs (1805–7) he settled in Boryspil and founded a county school in Pereiaslav, and from 1811 he served as marshal of the nobility of Pereiaslav county. He was a prominent Ukrainian *Freemason, a member of the Love of Truth Lodge in Poltava and the United Slavs Lodge in Kiev, and in 1818 he joined the *Union of Welfare in St Petersburg. He advocated Ukrainian statehood and political independence, and he organized the *Little Russian Secret Society. In February 1826 he was imprisoned in the Peter and Paul Fortress in St Petersburg and then confined to his estate in Boryspil until the end of his life. According to some historians (eg, M. Petrovsky) Lukashevych was probably the author of **Istoriia Rusov* (History of the Rus' Peoples).

Lukashov, Ivan [Lukašov], b 25 October 1901 in Opishnia, Zinkiv county, Poltava gubernia, d 26 May 1970 in Kharkiv. Epizootologist; corresponding member of the All-Union Academy of Agricultural Sciences from 1956. He graduated from the Kharkiv Veterinary Institute (1926) and from 1931 chaired its epizootiology department. His works are devoted to problems of epizootiology, diagnosis, prophylaxis, and the treatment of chronic infections and viral diseases.

Lukashova, Iraida [Lukašova, Irajida], b 14 January 1938 in Sverdlovsk (now Ekaterinburg) RF. Ballet dancer. After graduating from the Odessa Ballet School (1953) she danced as a soloist with the Odessa (1954) and Kiev (1955–75) opera and ballet theaters, with which she appeared in the roles of Lily in K. Dankevych's *The Lily*, Mavka in M. Skorulsky's *The Forest Song*, Giselle in A. Adam's *Giselle*, Princess Aurora and Masha in P. Tchaikovsky's *Sleeping Beauty* and *The Nutcracker*, and Maria in B. Asafev's *The Fountain of Bakhchesarai*. In 1976 she joined the Kiev Theater of Opera and Ballet as a choreographer and teacher.

Lukavetsky, Zenon [Lukavec'kyj], b 1869, d ? Judge. He served as a judge in Kolomyia and Lviv and sat on the Supreme Court in Warsaw (1929–32). He was a leading member of organizations such as the Ukrainian Invalids' Aid Society, the Ukrainian Catholic Union, and the *Society of Ukrainian Lawyers in Lviv. In 1939 he was deported by the Soviet authorities, and perished without a trace.

Luka-Vrublivetska. A multi-occupational site on the left bank of the Dniester River in Kamianets-Podilskyi raion, Khmelnytskyi oblast. Excavated between 1945 and 1950, the site revealed a Paleolithic occupation, a Trypillian settlement, and *Cherniakhiv culture and Kievan Rus'

Luka-Vrublivetska: unearthed zoomorphic and anthropomorphic figures

habitation. The Paleolithic occupation, one of the oldest sites in Ukraine, produced examples of Mousterian flint tools. The Trypilian settlement of the fourth millennium BC revealed seven semi-pit dwellings, the largest being 45 m long and 3–5 m wide, with eleven hearths arranged on the long axis of the building. Faunal remains uncovered indicate the use of domesticated stock (cattle, horses, pigs), as well as wild animals (deer, elk, roebuck, boar, and bear). In addition to the recovery of bone and stone implements (such as sickle blades and bow drills), ceramic vessels (often decorated with curvilinear ornamentation), and approximately 250 terra-cotta effigies of humans and animals, a few copper items (fishing hooks, awls, and small ornaments) were also recovered. These copper items constitute the oldest man-made metal objects found in Ukraine.

Lukianenko, Lev [Lukjanenko], b 24 August 1928 in Khrypivka, Chernihiv okruha. Lawyer, political leader, and dissident. After graduating in law from Moscow University in 1958, he worked as a lawyer in Western Ukraine. Although a Party member, he was a staunch Ukrainian separatist. In 1959 he organized a clandestine group which discussed the possibility of Ukraine's independence and democratization and drafted the program of a projected Ukrainian Workers' and Peasants' Union. The group was uncovered, and in May 1961 Lukianenko was sentenced to be shot, but the sentence was commuted to 15 years' imprisonment. During his 5 years in the Vladimir prison and 10 in strict-regime labor camps in Mordovia and Perm, he was active in protests demanding recognition for political prisoners. Upon completing his

Lev Lukianenko

term he lived under constant police surveillance in Chernihiv. In 1976 he was a founder of the *Ukrainian Helsinki Group. He was arrested at the end of 1977 and sentenced in July 1978 to 10 years in strict-regime labor camps and 5 years of exile for anti-Soviet agitation and propaganda. After spending 10 years in Mordovian and Perm camps he was exiled to Tomsk oblast and released in December 1988. As head of the Helsinki Group (1988–90) he became active in the political revival in Ukraine and won election to the Supreme Soviet in March 1990. He is a founder and president of the Ukrainian Republican party, the first non-communist party to be registered in Ukraine. In 1992 Lukianenko was appointed the first ambassador of Ukraine to Canada. His letters, petitions, and articles appeared in various underground publications in the USSR and in collections of materials on the Ukrainian human rights movement published in the West.

O. Zinkevych

Lukianivka Prison (Lukianivska tiumra). A fortified prison built in 1863 on Parkhomenko Street in the Lukianivka district of Kiev. In tsarist times V. Vynnychenko, M. Kybalchych, M. Kovalevsky, M. Hrushevsky, S. Bohomolets (a member of the South Russian Workers' Union, who gave birth to the future AN URSR president O. Bohomolets while imprisoned there), Ya. Stefanovych, A. Lunacharsky, and many other political prisoners were held there.

In Soviet times, particularly during the Stalinist terror, myriad Ukrainian political and cultural figures were incarcerated in the prison. They include alleged members of the *Union for the Liberation of Ukraine, such as A. Barbar, V. Chekhivsky, O. Cherniakhivsky, V. Durdukivsky, V. Hantsov, Y. Hermaize, O. Hrebenetsky, H. Kholodny, B. Matushevsky, A. Nikovsky, M. Pavlushkov, L. Starytska-Cherniakhivska, V. Strashkevych, and S. Yefremov; Yu. Bachynsky, Ya. Blachenko, A. Bohdanovych, P. Boretsky, K. Burevii, P. Butuzov, Ye. Dmytriiev, D. Falkivsky, P. Helmer-Didushko, A. Karabuta, I. Khop-tiar, H. Kosynka, L. Kovaliv, A. and I. Krushelnitsky, M. Lebedynets, V. Levytsky, A. Liaschenko, L. Lukianov-Svechezarov, S. Matiash, V. Mysyk, M. Oksamyta, V. Piatnytsia, K. Pivnenko, D. Polovy, H. Protsenko, A. Shcherbyna, R. Shevchenko, R. Skazynsky, A. Skrypa-Kozlovska, H. Stupyn, P. Sydorov, I. Tereshchenko, O. Vlyzko, and A. Vynnytsky, who were arrested in connection with the Kirov affair of 1934; the *Neoclassicists M. Zerov, P. Fylypovych, and M. Drai-Khmara; the poets A.

Lebed and M. Vorony; the linguists I. Boikov, O. Iziunov, and M. Trokhymenko; the physiologist V. Radzymovska; Lesia Ukrainka's sister, I. Kosach-Borysova; and the writers H. Kostyuk, V. Petrovsky, V. Pidmohylny, and Ye. Pluzhnyk.

The prison has held prisoners under investigation in its isolation blocks as well as prisoners in transit. Many prisoners of conscience were held there on fabricated charges. They include O. Feldman (1975), V. Smohytel (1977), M. Horbal (1979–80), and many religious activists, particularly Evangelical Christians.

N. Svitlychna

Lukianova, Olena [Luk'janova], b 13 January 1922 in Blastove, near Mena, Sosnytsia county, Chernihiv gubernia. Pediatrician; corresponding member of the USSR Academy of Medical Sciences from 1978. After graduating from the Kiev Medical Institute (1949) she began working at the Kiev Scientific Research Institute of Pediatrics, Obstetrics, and Gynecology, and in 1979 she became its director. Her works deal with the pathogenesis, prophylaxis, and the treatment of juvenile gastroenteritis and rickets.

Denys Lukiianovych (portrait by V. Kravchenko) Ivan Lukinov

Lukiianovych, Denys [Lukijanovyč] (pseud: L. Zhurbenko, Ivan Levytsky, Ivan Makukha), b 13 September 1873 in Horodnytsia, Husiatyn county, Galicia, d 28 January 1965 in Lviv. Writer, literary scholar, publicist, and pedagogue. For many years he worked as a secondary-school teacher in Bukovyna and Galicia. After the Second World War he was appointed professor of Ukrainian literature at Lviv University. His first published book was the collection *Noveli* (Novellas, 1895). In addition to a large number of short stories he wrote several novelettes: *Za Kadyl'nu* (For Kadylna, 1902) and *Vid kryvody* (From Injustice, 1904), both dealing with peasant life; *Filister* (Philistine, 1909), about teachers and the middle class; *Franko i Berkut* (Franko and Berkut, 1956), a biographical work; and *Ia-z bil'shistiu* (I Am with the Majority, 1934), a satirical novel. As a literary historian he wrote numerous articles and studies, in particular about Yu. Fedkovych, T. Shevchenko, and I. Franko.

Lukiianovych, Stefaniia. See Turkevych-Lukiianovych, Stefaniia.

Lukinov, Ivan, b 5 October 1927 in Popovka, now in Korocha raion, Belgorod oblast, RF. Economist; member of the All-Ukrainian Academy of Agricultural Sciences since 1973 and of the AN USSR (now ANU) since 1976. After graduating from the Kharkiv Agricultural Institute in 1951, he worked at the Institute of Economics and in the apparat of the CC CPU (1956–67). He has served as a department head (1965–7) and director (since 1976) of the Institute of Economics and director of the Ukrainian Scientific Research Institute of the Economics and Organization of Agriculture (1967–76). In 1977 he was appointed editor of *Ekonomika Radians'koi Ukrainy*, and in 1979, vice-president of the AN USSR. He has written numerous works, including monographs on labor productivity in agriculture (1958), pricing and profitability in the production of farm products (1964), and economic relations between the state and the collective farms (1974).

Lukoml [Lukoml']. A fortified medieval town in Pereiaslav principality on the right bank of the Sula River. It is first mentioned in the Hypatian Chronicle under the year 1178. In the 13th century it was destroyed by the Mongols; eventually it revived. In the 16th century it belonged to the Wiśniowiecki princes. During Ya. Ostrianyyn's uprising the rebels made camp there (1638). Under the Hetman state Lukoml was a company center of Lubni regiment. Today a small village called Lukimia, in Orzha raion, Poltava oblast, stands at the site of the old town.

Lukomsky, Georgii [Lukomskij, Georgij] (Loukomski, Georges), b 16 March 1884 in Kaluga, Russia, d 1952 in

Georgii Lukomsky: *The Boim Chapel in Lviv* (1915)

southern France. Russian architect, architectural and art historian, and painter. He studied at the St Petersburg Academy of Arts and in Paris and Rome and was curator of the Russian imperial palace in Tsarskoe Selo. He researched and painted, drew, or photographed many architectural monuments in the Russian and Austrian empires, France, and Italy. In 1919 he was curator of the Khanenko Art Museum in Kiev and worked with M. Biliashivsky and M. Makarenko on the restoration of the St Sophia Cathedral. Around 1920 he fled Bolshevik rule and lived as an émigré in Berlin and Paris. During the Second World War he lived in London. His many works on Russian, Ukrainian, French, and Italian architecture and art include books in Russian on the buildings of the Rozumovsky family in Chernihiv gubernia (1911), the ancient Rus' architecture of Chernihiv (1912), the history of the destruction and restoration of the Baturyn Palace (1912), the architecture of 12th- to 18th-century Galicia (1915, containing his own illustrations), and old estates in Kharkiv gubernia (1917). As an émigré he published books in Russian on his friend H. Narbut (1923), Kiev's ancient architecture and the Ukrainian baroque (1923), Kiev's church architecture (1923, containing his own photographs; German trans 1923; French trans 1929), and the Khanenko Museum (1925).

S. Hordynsky

Lukomsky, Stepan [Lukoms'kyj], b 1701 in Uman, Bratslav voivodeship, d ca 1779. Historian. A graduate of the Kievan Mohyla Academy (1730), he served as a scribe in the General Military Chancellery and as captain of the Pryluka (1735–47), Yahotyń (1751–7), and Perevolochna (1757–63) companies and quartermaster of Pryluka regiment (1763). He translated S. Okolski's Polish diary, as *O Ostraninovoï voïne z liakhami* (On [Ya.] Ostrianyń's War with the Poles, 1738), and M. Tytłowski's notes on the Polish-Turkish War of 1620–1, which he supplemented with information about events in Ukraine from 1639 to 1648, based on various Cossack chronicles (it appeared in the fourth volume of S. Velychko's chronicle, 1864). From Polish and Ukrainian chronicles Lukomsky compiled *Sobranie istoricheskoe* (Historical Collection, 1770), which covers the history of Ukraine from Gediminas (1299) to the end of the 16th century. It was published as a supplement to the Samovydet's Chronicle in 1878 (trans and repub as *The Eyewitness Chronicle* [1972], accompanied by an analysis of Lukomsky's work by O. Levytsky). Lukomsky's autobiography was published in *Kievskaiia starina* (vol 9 [1890]), and A. Yershov's analysis of his sources was published in the *Zapysky* of the Nizhen Institute of People's Education (vol 8 [1928]).

Lukomsky, Vladislav [Lukoms'kyj], b 17 July 1882 in Kaluga, Russia, d 11 July 1946 in Moscow. Heraldry scholar of Ukrainian descent. He graduated from St Petersburg University (1905). He became director of the heraldry department of the Imperial Senate (from 1914) and the heraldic museum (1918–28). He wrote, with V. Modzalevsky and H. Narbut, *Malorossiiskii herbovnyk* (Little Russian [Ukrainian] Heraldry Directory, 1914), a study of the printer I. Fedorovych (1935), and articles about Russian and Ukrainian heraldry, including the Myloradovych coat of arms, M. Romanchenko's collection, and K. Ostrozky's medal. He was a member of the Lviv Heraldic Society

(from 1910), the Chernihiv gubernial Scholarly Archival Commission (from 1913), and the Ukrainian Bibliological Society in Kiev (from 1928).

Lukomsky, Volodymyr [Lukoms'kyj], b 24 February 1927 in Bodzentyn, Poland. Architect. A graduate of the Lviv Polytechnical Institute (1950), he has worked in Ivano-Frankivske. His contributions to Ukrainian architecture include the Hutsulshchyna tourist center in Yaremcha (built 1963, expanded 1970) and the airport (1962), the pedagogical institute (1967), a fashion center (1964), the trade tekhnikum (1965), and the main post office (1968) in Ivano-Frankivske.

Lukovsky, Leon [Lukovs'kyj], b 23 April 1903 in Voronezh. Ukrainian otolaryngologist. A graduate of the Faculty of Medicine of Voronezh University (1925), he worked at the Dnipropetrovske Institute for the Upgrading of Physicians (1931–7) and at the Dnipropetrovske Medical Institute (from 1940), where he held the chair of otolaryngology (from 1948) and was deputy academic director (1952–8). A member of the board of the Ukrainian Scientific Society of Otolaryngologists and head of the Dnipropetrovske Scientific Society of Otolaryngologists, he studied acute and chronic tonsillitis, atypical mastoiditis, and sinus thromboses of allergic origin.

Lukyč, Vasyl [Lukyč, Vasyl'] (pseud of Volodymyr Levytsky), b 2 September 1856 in Belzka, now Honcharivka, Zolochiv raion, Lviv oblast, d 6 October 1938 in Vynnyky, now a suburb of Lviv. Writer and civic figure; full member of the Shevchenko Scientific Society from 1926; honorary member of the Prosvita society from 1925. His literary activities began in 1875. He coedited the student journal *Druh* and the almanac *Dnistrianka* (1876). He collaborated with I. Franko in compiling an anthology of Ukrainian poetry (1881) and edited many publications, including the almanacs of the Prosvita society for 1880–5, 1890, 1893, and 1916–18; a popular handbook for peasants, *Rus'kyi pravotar domovyi* (The Ruthenian Home Judge, 1885, which he coedited with Yu. Selsky); the almanac *Vatra* (1887); and the journal *Zoria* (1890–6), in which he introduced the phonetic orthography. Under his editorship the journal assumed an all-Ukrainian character. He edited the works of some Ukrainian writers, particularly writers from the Dnieper region. In 1919 he edited the official legislative bulletin *Vistnyk derzhavnykh zakoniv i rozporiadkiv Zakhidnoi oblasti UNR*. He wrote ethnographic studies, surveys of national and cultural life in central Ukraine, short stories, and tales.

Lullabies (*kolysanky, kolyskovi pisni*). A basic form of children's folklore, the examples of which were designed to calm children and put them to sleep. They derive their name, *kolyskovi*, from the fact that they are sung over a crib (*kolyska*) to the accompaniment of gentle rocking (*kolysannia*). In the past they were believed to have magical powers. Lullabies are characterized by caressing words, a special intonation, refrains, and a rhythmic repetition of certain words and sounds. Addressed only to the child and to no other listener, they are meant to convey the deep feeling the parent has for the child. Because of their simple composition they permit wide improvisation. The most

frequent images in Ukrainian lullabies are personified Sleepiness (*Drimota*) and Dream (*Son*) and various domestic animals and birds. They express the parent's hope for the child's happiness, expectations of future support from the child, and complaints about the difficulties of raising a child. Lullabies played an important role in the child's upbringing.

The first published text of a Ukrainian lullaby was of 'Oi khodyt' son kolo vikon' (Oh, Dream Walks by the Windows), which appeared in the almanac *Rusalka Dnistrovaia* (1837). The first melody to be transcribed was that of 'Oi ty kote, ne hudy' (Oh, Cat, Don't Purr) in M. Vovchok's collection (1867). A number of lullaby collections, such as those of M. Nahorny and H. Sukhobrus (1939) and H. Sukhobrus and I. Fedas (1973), came out in Soviet Ukraine. The largest of them (933 songs) is H. Dovzhenok and K. Luhanska's *Dytiachyi fol'klor* (Children's Folklore, 1984).

M. Mushynka

Lumber industry. A branch of the forest products industry that cuts timber and prepares sawn lumber for the woodworking, furniture, and chemical industries. The lumber industry in Right-Bank Ukraine began to export timber to Western Europe in the late 15th century. In the 17th century the industry expanded to Left-Bank Ukraine. Until the beginning of the 19th century timber was used as fuel in foundries and smelting furnaces and in the manufacture of potash, tar, furniture, and barrels. As rail transportation developed, coal was substituted for wood as fuel, and it became easier to transport lumber. By the late 1890s approx 2,000 small lumber mills in Ukraine were employing 78 percent of all lumber workers, and 121 larger mills were employing 45,051 workers and producing 2.1 million rubles' worth of lumber. Most of the mills were in Volhynia and Kiev gubernias. In 1913, 27,100 ha of forest were harvested, and 4.5 million cu m of timber were produced. Of that production, 2.7 million cu m were processed in sawmills and woodworking plants, and the rest was used for firewood. There were 185 sawmills in the Ukrainian gubernias of the Russian Empire at the time; they employed about 10,100 workers.

After the 1917 Revolution the industry in Soviet Ukraine developed rapidly under the five-year plans. From 1928 to 1937 the production of industrial timber rose from 1 to 3.9 million cu m, or from 2.4 percent to 3.4 percent of the USSR output. Much of the timber was exported from Ukraine and then imported in the form of finished wood products. Consequently, the output of sawn wood in Ukraine rose only from 0.8 to 1.3 million cu m, and Ukraine's share of the Soviet lumber output declined, from 5.8 percent to 3.8 percent. The rapid expansion of timber cutting depleted Ukraine's forest resources and was not curtailed until 1938.

After the Soviet occupation of Western Ukraine at the end of the Second World War, the forests of the Carpathian Mountains were exploited ruthlessly. Despite severe erosion the average annual wood harvest during the 1950s was twice as high as the theoretical limit for proper forest reproduction. From 1940 to 1950 the output of industrial timber rose from 5.2 to 11.2 million cu m, and of sawn lumber, from 3.0 to 6.2 million cu m. In 1948 Ukraine's share of the Soviet timber output peaked at 8.5

percent, and in 1950 its share of the Soviet lumber output reached a high of 12.4 percent. For the rest of the decade the timber harvest remained stable, and lumber production increased. In 1959, new restrictions on harvesting were introduced. Overcutting had given rise to significant waste through improper felling and logging. When 30 percent of the harvest was fit only for firewood, over 54 percent of the timberland consisted of young forest (1956), and large areas of the Carpathians had been denuded, it became obvious that the industry had to be reorganized. Since 1961 the logging area has been reduced to permit the forests to recover.

In the last 15 years the output of industrial timber rose from 7 million cu m in 1970 to 9 million cu m in 1983, and Ukraine's share of the Soviet output rose from 2 percent to 3.3 percent. The output of lumber continued to decline, however. In 15 years it fell from 10.4 to 7.6 million cu m, and Ukraine's share of the Soviet output declined from 8.9 percent to 7.8 percent.

The Carpathian Mountains provide half of the timber harvested in Ukraine, Polisia a third, and the forest-steppe and steppe regions the rest. Since 1950 the industry has become increasingly mechanized: felling, sorting, and sawing are almost completely mechanized. The transportation of logs is labor-intensive. From 1959 to 1970 employment in the lumber industry declined from 69,720 to 45,241 workers, or from 9.6 percent to 8.7 percent of the Soviet lumber labor force. But there may be up to 100,000 seasonal workers in the industry.

Approx 60 percent of the timber harvested in Ukraine is processed into building materials and other wood products, 25 percent is used as logs in construction, and 13 percent is used by the chemical industry to produce cellulose. Ukraine's lumber industry is unable to meet domestic demand: 67 percent of its timber and 38 percent of its lumber were imported from other republics in 1966. Less than 2 percent of its output, mostly hardwoods, is exported to Belarus and Moldova.

B. Somchynsky

Luna (Echo). A Ukrainian literary almanac published by I. Ilnytsky, with the help of O. Konysky, in Kiev in 1881. In it were published poems by T. Shevchenko, M. Starytsky, Ya. Shchoholev, O. Konysky, and V. Mova, as well as I. Nechui-Levytsky's novel *Pryiateli* (Friends) and essay 'Shevchenkova mohyla ...' (Shevchenko's Grave) and M. Starytsky's vaudeville *Iak kovbasa ta charka ...* (If [There Is] Sausage and a Shot Glass ...). The publication of *Luna* initiated a series of literary-art almanacs in central Ukraine, particularly in Kiev, and stimulated literary activity.

Lunacharsky, Anatolii [Lunačarskij, Anatolij], b 23 November 1875 in Poltava, d 26 December 1933 in Menton, France. Bolshevik revolutionary, the first Soviet people's commissar of education (1917-33), writer, literary critic, and art scholar; full member of the USSR Academy of Sciences from 1930. Lunacharsky was a contributor to the journal *Dzvin* and wrote works on T. Shevchenko (*Velykyi narodnyi poet* [A Great National Poet, 1912]), the speech he gave at the commemoration of the 50th anniversary of Shevchenko's death organized by the Ukrainian community in Paris in 1911), M. Kotsiubynsky, Lesia Ukrainka, and M. Kulish. He also critiqued the performance given by the Ivan Franko Theater when it toured Moscow

(1926). Some of Lunacharsky's plays, such as *Iad* (Poison), were included in the repertoire of Soviet Ukrainian theaters.

Lundin, Aksel, b 1886 in Stockholm, d 1943? Actor and film director. He came to Russia in 1905 and completed drama school in Petrograd (1920). In 1912 he joined the Khudozhnii Ekran society in Kiev as an actor. Then he became an agitprop film director for the Chervona Zirka company (1919), the Photo-Cinema Committee in Kharkiv (1920), and the Odessa Film Factory of the All-Ukrainian Photo-Cinema Administration (1924), where he directed the films *Za chorne zoloto* (For Black Gold, 1924), *Lisovyj zvir* (The Forest Beast, 1925), and *Pilsuds'kyi kupyv Petliuru* (Pilsudski Bought Petliura, 1926). Having been criticized for his adaptation of V. Vynnychenko titled *Pryhody poltynnyka* (Adventures of a Half Ruble, 1929) Lundin returned to theater work in the RSFSR.

Lupii, Oles [Lupij, Oles'], b 28 March 1938 in Nova Kamianka, now in Nesterov raion, Lviv oblast. Poet, prosaist, and dramatist. His works include the collections of poems *Vinky iunosti* (The Wreaths of Youth, 1957), *Odnaiedyna* (One and Only, 1984), and *Dovholittia bđzholy* (The Longevity of the Bee, 1987); the novelettes *Persha zyma* (First Winter, 1975) and *Sontse pomizh sosnamy* (The Sun among the Pines, 1979); and the novels *Herts'* (The Duel, 1966), *Hran'* (The Embers, 1968), *Virnist'* (Loyalty, 1976), and *Nikomu tebe ne viddam* (I Will Surrender You to No One, 1984). His poetic and prose works have been published in Russian, Belarusian, Lithuanian, Moldavian, Georgian, Armenian, Polish, German, Vietnamese, and Spanish translations.

Lupii, Yaroslav [Lupij, Jaroslav], b 2 June 1946 in Nova Kamianka, Zhovkva county, Lviv oblast. Film director. After graduating from the Kiev Institute of Theater Arts (1971) he worked at the Odessa Artistic Film Studio, where he directed *Liubi moi* (My Dears, 1975), *Khlib dytynstva moho* (The Bread of My Childhood, 1978), *Bahriani berehy* (The Purple Banks, 1979), the environmental film *Sto radostei, abo knyha velykykh vidkryttiv* (A Hundred Joys, or the Book of Great Discoveries, 1982), and *Zrozumii mene* (Understand Me, 1983).

Lupkiv Pass (Lupkivskyy pereval). IV-2. A mountain pass (elevation, 657 m) in the Middle Beskyds of the eastern Lemko region. Situated along the Polish-Slovak border, the pass provides a thoroughfare for the Peremyshl-Michalovce-Budapest train line.

Lupu, Roksana (Rozanda, Ruxandra), b ?, d 1686. Moldavian princess; daughter of V. *Lupu. She married T. *Khmelnysky in 1652. After his death in 1653, she lived in Chyhyryn; later she moved to an estate given to her by B. Khmelnysky, in the town of Rashkiv, in Podilia. In 1666 she returned to Moldavia. The details of her marriage are discussed in A. Horbach's *Tymish Khmel'nyts'kyi v rumun-s'kii istoriohrafii ta literaturi* (Tymish Khmelnysky in Rumanian Historiography and Literature, 1969).

Lupu, Vasile, b 1593?, d 1661. Hospodar of Moldavia (1634–54). He was a supporter of Poland and then became an ally of his son-in-law's father, B. *Khmelnysky, with

whom he made a pact in 1652. Lupu played a key role in Khmelnysky's plans for creating a Danube League, in which Ukraine was to have a decisive influence. The plans were thwarted when T. *Khmelnysky died in 1653. During Lupu's reign (1634–54) the Rumanian language was used for the first time in official deeds, and at his request professors from the Kievan Mohyla Academy founded a Slavic-Latin college in Iași in 1640 (headed by S. Pochasky). In 1641, with the help of P. *Mohyla, the first Moldavian print shop was established in Iași. In 1642 a common synod of the Ukrainian and Moldavian Orthodox churches was held in Iași, with the participation of Mohyla's representatives (including I. Kozlovsky-Trofymovych).

Manoly Lupul

Ivan Lutsenko

Lupul, Manoly (Robert), b 14 August 1927 in Willingdon, Alberta. Historian, educator, and community leader. A graduate of the universities of Alberta, Minnesota, and Harvard (PHD, 1963), he taught educational foundations and Canadian educational history at the University of Alberta from 1958. He became a leading figure in the Ukrainian Canadian Professional and Business Federation and played a major role in the establishment of the Ukrainian-English bilingual program in Alberta schools (1974) and the creation of the *Canadian Institute of Ukrainian Studies (CIUS). As the institute's first director (1976–86) he was instrumental in setting the direction of Ukrainian studies in Canada at a critical juncture in its development and in involving CIUS in its most ambitious venture, the preparation of the *Encyclopedia of Ukraine*. He was also active in promoting multicultural policy in Canada as prairie regional chairperson and national vice-chairperson of the Canadian Consultative Council on Multiculturalism (1973–9) and in searching out new directions for Ukrainian-Canadian development as a key member and first chairperson (1982–3) of the *Ukrainian Community Development Committee. He is the author of *The Roman Catholic Church and the North-West School Question, 1875–1905* (1974) and editor of five major collections on Ukrainian-Canadian themes, including *A Heritage in Transition* (1982).

D.H. Struk

Lupynis, Anatolii, b 1937 in Cherkasy oblast. Poet and dissident. In late 1956 he was sentenced to six years in Mordovian labor camps for his nonconformist poetry. In

September 1957 he had his sentence extended by five years for heading a Mordovian camp strike-committee. Lupynis served part of his term in the Vladimir Prison near Moscow. When he was released in 1967, both his legs were paralyzed. For reciting poetry at the Shevchenko monument in Kiev in May 1971, he was sentenced to an indefinite term in psychiatric prisons in Moscow, Dnipropetrovske, Kiev, Alma Ata, Smila, and Orel. His maltreatment there was brought to the attention of the international human rights movement, and his case was brought up at the 1977 International Congress of Psychiatrists in Honolulu. He was finally released in 1987. In 1990 he began publishing the independent periodical *Zoloti vorota* in Kiev.

Lurie, Oleksander [Lur'je], b 3 February 1868 in Kiev, d 17 January 1954 in Kiev. Dermatologist and venereologist. A graduate of the medical faculty of Kiev University (1893), he was department head at the Kiev Institute for the Upgrading of Physicians (1919–49). He specialized in the diagnosis and treatment of fungal skin diseases and syphilis. He set up the first mycological dispensary in the USSR, in Kiev in 1920. For many years he was president of the Kiev Scientific Society of Dermatologists and Venereologists.

Lurie, Oleksander [Lur'je], b 12 October 1897 in Klymovychi, Mahiliou gubernia (Belarus), d 24 May 1958 in Kiev. Obstetrician and gynecologist; corresponding member of the AN URSS (now ANU) from 1939. A graduate of the medical faculty of Moscow University (1921), he headed a department at the Kiev Medical Institute (1938–58) and was chief obstetrician and gynecologist in the Ukrainian SSR Ministry of Health (1948–58). He researched maternal mortality, painless birthing, the prophylaxis and treatment of uterine cancer, and midwifery. The obstetric-gynecology clinic of the Kiev Medical Institute was named after him.

Lusatian culture. An archeological culture of a large group of tribes in the Bronze and early Iron ages (12th–4th century BC). It was widespread in the Oder and Vistula basins and extended as far east as the Buh River. The name is derived from the Sorbian region of Lusatia (Lausitz), now in east Germany, where monuments of the culture were first discovered and studied. Remains of fortifications, settlements, burials with cremations, tools, ornaments, and hoards were excavated. The people of the culture lived in patriarchal clans and practiced land cultivation, herding, hunting, and fishing, and traded with the tribes of the Dnieper basin. Their bronze-casting and iron-working were highly developed. Relics of this culture have been found in Ukraine in the Kholm region and western Volhynia. Most Slavic scholars consider the culture to be proto-Slavic.

Lushpynsky, Oleksander [Lušpyns'kyj], b 1878, d 1943. Architect. A graduate of the Lviv Polytechnic (1904), he was the chief engineer of I. *Levynsky's construction firm in Lviv. He also built wooden churches in the villages of Mykytyntsi, Veldizh, Vorobliachyn, and Tysmenytsia and buildings such as the Basilian convents in Lviv and Stanyславiv and the People's Home in Drohobych. He is the author of two albums, one on rebuilding the village

(1917), which contains plans in a traditional folk style for village houses and institutions, and one on 16th- to 19th-century Galician wooden churches (1920). Lushpynsky consciously used a 'national' Ukrainian style in his urban designs.

Lustration (*liustratsiia*; Polish: *lustracja*; derived from the Latin *lustrum*, a five-year period or censor's term of office). An inventory of royal lands for tax and military purposes. The first such descriptions were prepared in the Lithuanian-Ruthenian state in the early 16th century. From 1568 until the partitions of Poland they were prepared by Polish officials (*lustratory*) every five years. The lustration contained detailed information about estates and villages, their inhabitants, and the condition of lands, domestic animals, and buildings. After the Polish partitions the tsarist government carried out lustrations in the annexed territories in 1778–9, 1839–63, and 1867. The voluminous data recorded in the lustrations make them an important source for the social and economic history of Ukraine.

Lutherans. Members of Protestant churches based on the Augsburg Confession, the catechism of M. Luther (1528–9), and various writings of the 16th century. Lutheranism is widespread throughout Germany, Scandinavia, Latvia, and Estonia and is closely related to other Protestant and Evangelical Christian churches. Lutheranism was occasionally the subject of early polemical writings in Ukraine, but the movement attracted fewer followers in Ukraine than did Calvinism, which was widespread among the gentry. The number of Lutherans increased considerably with the arrival of the German colonists who settled in southern Ukraine in the 18th century. Lutheran churches were established in Ukrainian cities where there were sizable German communities and in certain German agricultural colonies. They were also established among Czech settlements in Volhynia and by Hungarian and Slovak Lutherans in Transcarpathia. In the interwar period Lutheranism attracted a few thousand followers in Western Ukraine (Galicia and Volhynia), where the *Ukrainian Evangelical Church of the Augsburg Confession was formed. At the outset of the First World War the Russian authorities repressed the church along with all other German institutions in the empire. Under Soviet rule, an attempt to revive the church in 1924 was unsuccessful, and the subsequent antireligious campaigns of the 1930s destroyed almost all organized church life in Ukraine. Lutherans continued to be persecuted through the late 1940s. Today there is no organized Lutheran movement in Ukraine, although the recent liberalization may permit a rebirth of the church. (See *Evangelical Christians.)

Lutsenko, Ivan [Lucenko], b 1864, d 25 March 1919 in Polonne, Novohrad-Volynskyi county, Volhynia gubernia. Physician and political leader in Odessa. During the revolutionary period he was a member of the Central Rada and a leader of the *Ukrainian People's party. He helped organize and chaired the Odessa Military Council, and sat on the Ukrainian General Military Committee. While serving as a military doctor with the UNR Army he was captured and executed by the Bolsheviks.

Lutsenko, Oleksander [Lucenko], b 2 April 1911 in Yelysavethrad, Kherson gubernia. Stage actor. Besides the

Ukrainian heroic repertoire, *Zalizniak* in T. Shevchenko's *Haidamaky*, *Hyria* in M. Kulish's *97*, and *Svichka* in I. Kocherha's *Svichchene vesillia* (*Svichka's Wedding*), he played the title role in B. Brecht's *Herr Puntila und sein Knecht Matti*. From 1930 he worked in the Odessa Ukrainian Music and Drama Theater.

Luka Lutsiv

Lutsiv, Luka [Luciv] (Luciw, Luke), b 30 October 1895 in Hrushova, Drohobych county, Galicia, d 1 December 1984 in Philadelphia. Literary scholar and critic; member of the Shevchenko Scientific Society. He studied in Prague at the Ukrainian Free University (1921–6) and at Charles University (PH D, diss on T. Shevchenko, 1926). From 1927 to 1944 he worked as a teacher in Galicia. As a postwar refugee he taught in displaced persons camps in Bavaria before settling in New York City in 1949. From 1952 to 1970 he worked as an editor for the daily *Svoboda*. He published literary articles and hundreds of book reviews in Galician and émigré periodicals and scholarly serials and wrote books on the writers M. Shashkevych (1963), O. Kobylanska (1963), T. Shevchenko (1964), I. Franko (1967), and V. Stefanyk (1971). He also edited two books of articles on the Drohobych region (1973, 1978). A selection of his articles and reviews from 1925 to 1975 with a bibliography and autobiography appeared in 1982 as *Literatura i zhyttia* (*Literature and Life*).

Lutsiv, Volodymyr [Luciv], b 25 June 1929 in Nadvirna, Galicia. Tenor singer and banduryst. After emigrating to

Volodymyr Lutsiv

Yurii Lutsiv

England in 1948, he studied music in Bradford and London and at St Cecilia's Conservatory in Rome (with Bishop I. Buchko's support). He has toured Italy, Germany, the United States, and Canada with his concerts, and has organized tours for Ukrainian choirs in Europe and North America in an effort to popularize Ukrainian music. He commonly sings under the stage name Tino Valdi.

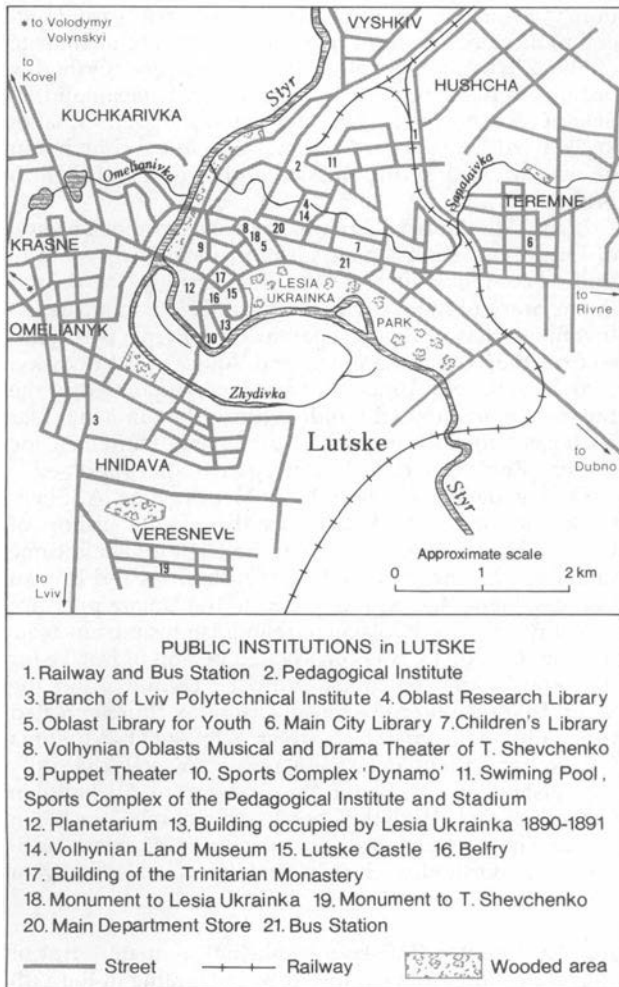

Lutsiv, Yurii [Luciv, Jurij], b 12 May 1931 in Lviv. Conductor. A pupil of M. Kolessa, he graduated from the Lviv Conservatory in 1953 and was directly engaged to conduct the symphony orchestra of the Lviv Philharmonic (1953–4 and 1960). In 1954–9 he worked in Zaporizhia. Since 1960 he has been a conductor with the Lviv Theater of Opera and Ballet (principal conductor during 1963–73) and a lecturer at the Lviv Conservatory. His productions include B. Liatoshynsky's opera *Zoloty obruch* (*The Golden Ring*), S. Prokofiev's ballets *Cinderella* and *Romeo and Juliet*, and P. Tchaikovsky's *Nutcracker Suite*. In 1961 he toured Canada (Calgary and Edmonton).

Lutskay, Mykhailo. See Luchkai, Mykhailo.

Lutske: 14th-century castle of Prince Liubartas (rebuilt in the 15th–16th centuries)

Lutske or **Lutsk** [Luc'ke or Luc'k]. III-6. A city (1991 pop 210,000) on the Styr River and the center of Volhynia oblast and Lutske raion. It is first mentioned in the Hypatian Chronicle under the year 1185, but it was probably a tribal center of the Luchanians as early as the 10th century. There is evidence that the area was settled in the Neolithic period. Lutske was the capital of an independent principality from 1154. In 1225 it belonged to Volodymyr-Volynskyi principality and later to Galicia-Volhynia principality. In 1340 it was annexed by Liubartas, who built a large castle there and established Lutske as the capital of an appanage principality (1340–84, 1440–53) within the Lithuanian-Ruthenian state. After the Union of Lublin in 1569, the city came under Polish rule and served as a voivodeship center. In the 15th and 16th centuries it was one of the main trade centers in Ukraine because of its location at the crossroads of major trade routes. Many *Karaites from the Crimea settled there in that period, as Armenians had done earlier. In 1429 Vytautas of Lithuania called a conference of European monarchs in Lutske. The city was also an important Ukrainian religious and cultural center. In the 13th century it was the seat of an eparchy, and the *Zhydychyn St Nicholas's Monastery was established nearby. In 1617 the *Lutske Brotherhood

of the Elevation of the Cross was founded, and in 1621 it set up a school. A Jesuit college was added in 1614 to the city's Polish schools. Later in the 17th century Lutske declined. It was annexed by Russia in 1795, and became a county center. The town grew: in 1897 its population was 14,800 (79 percent Jewish), and in 1912, 26,600. Until the First World War there was a Russian fortress in Lutske. In 1917–19 the city belonged to the Ukrainian state. In May 1919 the Polish army overpowered the Ukrainian Kholm Division and took Lutske.

As a voivodeship center under the Polish regime, Lutske grew to 35,600 by 1931. In the interwar period it was the Ukrainian political and cultural center for western Volhynia. It was the center of a network of *Prosvita* reading rooms (134 of which were closed down by the Polish authorities in 1932) and the seat of a Ukrainian Orthodox eparchy. It had a private Ukrainian gymnasium, a *Ridna Khata* club, and the Volhynian Ukrainian Theater and was the base of the religious-education *Mohyla* Society (est 1931). It was also a modest publishing center: periodicals such as *Hromada* and *Volyns'ka hromada* in the 1920s and *Volyns'ka nedilia*, *Ukrains'ka nyva* (later *Volyns'ke selo*), and *Ridnyi kolos* in the 1930s appeared there. In 1939 Lutske was occupied by the Bolsheviks, who, retreating from the Germans in 1941, murdered about 3,000 Ukrainians in the local prison.

Lutske: a view of the center

Today Lutske is a center of food production (milling, meat-packing, and sugar refining), smelting, machine building, brick-making, and clothes and footwear manufacturing. It has a pedagogical institute, a drama theater, a philharmonic orchestra, and a regional museum. The old quarter of the city is situated on an elevated section of the bank of the *Styr River, surrounded by swampland on both sides. The city expanded northward, toward the railroad station, and, recently, toward the west and southwest. The most important historic monument is Liubartas's castle, which stands on a small hill between the Styr and the Hlushytsia rivers. It includes remnants of the upper castle built in the 13th century and several towers. The most majestic building is the baroque Ukrainian Catholic church built in 1619–20. Few old Ukrainian churches remain. There are no traces of the cathedral that stood within the fortifications or of St Demetrius's Church (14th century). The Church of the Holy Protectress was reconstructed from its 15th-century ruins, and the Church of the Elevation of the Cross was rebuilt in 1890 from the remains of the brotherhood's church (1619–20). Outside the old quarter is the Orthodox cathedral, built in the baroque style in 1754 on the site of a wooden church (1648).

V. Kubijovyč

Lutske Brotherhood of the Elevation of the Cross (Lutske khresto-vozdvyzhenske bratstvo). A renowned Orthodox *brotherhood founded in 1617 by H. Mykulych, the hegumen of the Chercha monastery. The Lutske Brotherhood included monks, priests, bishops, nobles, aristocrats, and members of the middle class from Lutske and Volhynia. It received a charter from the Polish king Sigismund III in 1619 and was granted the status of *stauropogion by the Patriarch of Constantinople in 1623. It ran the *Lutske Brotherhood of the Elevation of the Cross School and operated a printing press in the monastery. After the Khmelnytsky era the brotherhood entered a period of steady decline. It was revived in 1896 by the Russian government with the intention that its activities 'strengthen the Russian people.' From 1920 the brotherhood functioned without a charter. In 1931 it was liquidated by the Polish government, only to be granted a new charter in 1935 which recognized the brotherhood's 17th-century

Ruins of the church of the Lutske Brotherhood of the Elevation of the Cross (lithograph of a painting by Strukov, 1867)

roots but not the right to its holdings (they were left under government jurisdiction). The activities of the brotherhood ceased with the Soviet occupation of Lutske.

Lutske Brotherhood of the Elevation of the Cross School (*Lutska bratska shkola*). A *brotherhood school founded by Volhynian noblemen and townsmen who were members of the *Lutske Brotherhood of the Elevation of the Cross. The most prominent member of this group was the nobleman L. *Drevynsky.

The Lutske School was established between 1617 and 1620. Extant records of its statutes and regulations dating from 1624 testify to the fact that it was modeled on the *Lviv Dormition Brotherhood School. From the beginning its educational program stressed philological training in Greek, Church Slavonic, and Latin within a liberal arts curriculum. Later the teaching of Greek was de-emphasized, and Polish was introduced as the language of instruction. The school attained considerable reputation for the teaching of polyphonic choral music.

In the tradition of brotherhood schools, the Lutske School was open to male children of all estates and from various economic backgrounds. Among its teachers were I. Ilkovsky (school director in 1628), P. Bosynsky (1634), Hegumen A. Slavynsky (instructor in rhetoric, philosophy, and mathematics in the mid-17th century), Z. Sohnykevych, and the famous iconographer and painter Y. *Kondzelevych. Between 1625 and 1628 the school benefited from the services of the peripatetic printing shop run by P. *Liutkovych-Telytsia.

The Lutske school frequently suffered from repressive measures enforced by the Catholic opposition. Its actual decline began after the Khmelnytsky wars.

N. Pylypiuk

Lutske eparchy. An eparchy in Volhynia, with its see in Lutske. The earliest mention of the eparchy dates from ca 1326. From 1495 it was known as Lutske-Ostrih eparchy. In 1595 Bishop K. *Terletsky traveled to Rome to make his confession of faith to the pope and became a leading proponent of the Church Union of *Berestia. Orthodox forces continued to battle for control of the eparchy, however, and Ye. Pochapovsky, Terletsky's successor, was forced to relinquish the eparchy to the Orthodox bishop A. Puzyna

in 1633. From then the remaining Uniate parishes and several monasteries were administered by the archimandrite of the Zhydychyn St Nicholas's Monastery. Orthodox bishops in the 17th century included D. Balaban and H. Sviatopolk-Chetvertynsky. In 1702 Bishop D. *Zhabokrytsky led the eparchy back into the Uniate church, but he was arrested by the Russian authorities, and died in prison.

In the 18th century there was only one Orthodox bishop of Lutske but eight Uniate bishops, including T. and S. Rudnytsky-Liubienitsky. After the partitions of Poland the territory of the eparchy came under Russian rule. At that time a new Orthodox eparchy of Volhynia was created from most of Lutske-Ostrih and Volodymyr-Volynskiy eparchies. Several Uniate bishops were appointed to the Lutske see in the early 19th century, but in 1839 Tsar Nicholas I forcibly liquidated the Uniate church in the Russian Empire, and the Uniate eparchy was dissolved.

During the First World War, Metropolitan A. Sheptytsky appointed Y. Botsian as the Uniate bishop of Lutske. After the war, however, the territory again came under Polish rule, and the Polish authorities and Roman Catholic hierarchy, both opposed to the Uniate presence in Volhynia, forced Botsian to relinquish his post in 1924. In 1932 P. Sikorsky was consecrated bishop of Lutske for the *Polish Autocephalous Orthodox church. After the Second World War the Russian Orthodox church created the Volhynian eparchy, which contained Volhynia (Lutske) and Rivne oblasts. In 1963–72 V. Velychkovsky was bishop of Lutske for the underground Ukrainian Catholic church. With the liberalization of religious life in Ukraine in the early 1990s, the renewed Ukrainian Autocephalous Orthodox church established an eparchy in Lutske.

Lutske Gospel (*Lutske yevanheliie*). A manuscript of 262 two-column folios transcribed in Ukraine in the 14th century from a south Slavic original. In the 14th and 15th centuries it belonged to the Monastery of the Savior on the outskirts of Lutske. Today it is preserved in the Lenin Public Library in Moscow. The gospel contains many Ukrainianisms, particularly phonetic ones: a new *ь*, *e* instead of *y* in unaccented syllables, a prothetic *v-*, and the confusion of *i* with *yi* and *u* with *v*. Its language was studied by A. Sobolevsky in *Ocherki iz istorii russkogo iazyka* (Essays on the History of the Russian Language, 1884) and particularly by P. Buzuk in *Zbirnyk Komisii dlia doslidzhennia istorii ukrains'koi movy*, vol 1.

Lutske Pedagogical Institute (*Lutskyi pedahohichnyi instytut im. Lesi Ukrainky*). A postsecondary institution established in Lutske by the Ministry of Education of the Ukrainian SSR as a teachers' college in 1940. In 1951 it was transformed into a pedagogical institute. During the 1979–80 academic year the institute had eight faculties: physics-mathematics, philologies, history, natural sciences-geography, foreign languages, physical education, pedagogy, and elementary education. During that year the institute had an enrollment of 4,561 students. It has a library (with 340,000 volumes) and a botanical garden and offers extramural courses. In 1964 V. *Moroz taught modern history there.

Lutske Tribunal (*Trybunal lutskyi*). The highest appellate court for Bratslav, Volhynia, and Kiev voivodeships,

created in 1578 by the Great Diet of the Polish-Lithuanian Commonwealth in Warsaw. Modeled on the *Royal Tribunal, it was composed of 13 judges (deputies) elected by the voivodeship dietines: five judges from Volhynia and four each from Kiev and Bratslav. The tribunal heard appeals of decisions of the city, land, and *pidkomorskyi* courts and was governed by the Lithuanian Statute of 1566. The official language of the tribunal was Ukrainian. Because of opposition from the Polish gentry and Roman Catholic hierarchy, the court was merged in 1589 with the Royal Tribunal, which heard appeals from Ukrainian territories at its sessions in Lublin and Lviv. The abolition of the Lutske Tribunal was an important blow to Ukrainian autonomy in the Polish-Lithuanian Commonwealth.

Lutskevych, Marko [Luckevyč], b 26 April 1882 in Kovel, Volhynia gubernia, d 1934. Co-operative and political leader in Volhynia. After completing his studies in Moscow he became involved in co-operative work. In 1922 he was elected to the Polish Sejm, from which he was quickly expelled for attacking the Polish state in his speeches. He fled from the Polish police to Czechoslovakia, and in 1924 he moved to the Ukrainian SSR. Two years later he was arrested by the Soviets and sentenced to forced labor camps in Siberia, where he died.

Lutskevych, Yurii [Luckevyč, Jurij], b 9 September 1934 in Kirovohrad. Painter and graphic artist. A graduate of the Kiev State Art Institute (1959), he continued his studies at the workshops of the USSR Academy of Arts in Kiev (1962–5). His early works (eg, *In the Days of the War* [1965]) were in keeping with *socialist realism. His later work remained figurative, but his subject matter and style changed. He now paints more intimate compositions, using a flickering brush stroke and an abundance of white pigment to create interesting overall effects and surfaces full of light (eg, *Bouquet of Lilies* [1987] and *Small Fountain* [1988]).

Lutsky, Myron [Luc'kyj], b 29 September 1891 in Luka, Sambir county, Galicia, d 10 March 1961 in Toronto. Military and civic leader; brother of O. *Lutsky. After studying law in Lviv and agriculture in Vienna he joined the 41st Chernivtsi Infantry Regiment of the Austrian army and served in it as a lieutenant during the First World War. Having been assigned to the Ukrainian Sich Riflemen at the end of October 1918, he was acting chief of staff of Group East during the siege of Lviv and then chief of staff of the First Brigade of the Ukrainian Sich Riflemen. In 1920 he was appointed chief of the operative department of the Second Brigade of the Red Ukrainian Galician Army. After the war he was active in the Ukrainian National Democratic Alliance and in a number of important economic institutions: he was president of Silskyi Hospodar in Lviv (1936–9), vice-president of the Lviv Agricultural Chamber (1936–9), and director of the sugar trust in Ukraine (1941–3). After emigrating in 1944, he chaired the Ukrainian Relief Committee in Berlin. In 1948 he settled in Canada, where he was active in various Ukrainian organizations.

Lutsky, Oleksander [Luc'kyj] (noms de guerre: Andriienko, B.A. Bohun), b 1910 in Bodnariv, Stanyславiv county, Galicia, d ? Senior UPA military officer. In 1933 he was sentenced to six years' imprisonment by the Poles for his

OUN activities. After his release he finished the OUN military courses in Cracow (1939–40) and was appointed OUN leader for Stanyславiv oblast. After service in the *Legion of Ukrainian Nationalists (1941–3), he was appointed as the first commander of the UPA-West (1943–4). In February 1944 he was appointed commander of the UPA front in the southern Kholm region and was captured en route by the Gestapo. He escaped in July 1944 and served briefly as sector commander of the UPA-West. He was captured by the NKVD in 1945 and sentenced to 25 years' hard labor.

Ostap Lutsky

Lutsky, Ostap [Luc'kyj], b 8 November 1883 in Luka, Sambir county, Galicia, d 1941 near Kotlas, RSFSR. Political leader, co-operative organizer, publicist, and poet; father of G.S.N. *Luckyj. While studying liberal arts at Prague and Cracow universities he joined the literary group *Moloda Muza and wrote several collections of poetry – *Bez masky* (Without a Mask, 1903), *Z moikh dniiv* (From My Days, 1905), and *V takii khvyli* (At Such a Moment, 1906). While working in Chernivtsi as an editor of *Bukovynna* (1907–13) he became active in the local co-operative movement and in the Ruska Besida society. During the First World War he served as a lieutenant in the Austrian army, and in 1918 he was appointed aide-de-camp to the young Archduke Wilhelm. With the collapse of the Austrian Empire he joined the Ukrainian Galician Army and served as chief of staff of the Fourth Zolochiv Brigade (1919) and then as S. Petliura's liaison with J. Piłsudski. After the war he settled in the Stryi region and became active in its economic revival: he restored the local branch of Silskyi Hospodar and founded and directed (1926–8) the Stryi County Union of Co-operatives. As supreme director and head of the organizational department of the *Audit Union of Ukrainian Co-operatives (1928–39) he was largely responsible for the success of the co-operative movement in Galicia. His writings in the field included *Kooperatyvna problema* (The Problem of Co-operation, 1937) and *Sil's'ko-hospodars'kyi kredyt* (Agricultural Credit, 1939). He also played a prominent role in Galician politics: he sat on the executive of the Ukrainian National Democratic Alliance (1925–39) and was elected as its candidate to the Polish Sejm in 1928 and 1930 and to the Senate in 1935. As a Sejm member he served on the budget and economic committees, and as senator he sat on the foreign relations committee. On 2 October 1939, shortly after the Soviet occupation of Galicia, Lutsky was arrested. He was deported to a concentration camp in northern European Russia, where he perished.

Lutsky, Yurii. See Luckyj, George Stephen Nestor.

Stepan Lutsyk at his easel (1948)

Lutsyk, Stepan [Lucyk], b 10 October 1906 in Lviv, d 10 October 1963 in St Paul, Minnesota. Painter. He studied at the Novakivsky Art School in Lviv (1926–30) and F. Léger's Modern Academy in Paris (1931). A cofounder of the *RUB artists' group and coauthor of its almanac *Karby* (Notches, 1933), he took part in exhibitions organized by the Association of Independent Ukrainian Artists (1931) and the Society of Friends of Ukrainian Art (which he cofounded) and contributed art reviews to D. Dontsov's *Vistnyk* (1933–9). His impressionist oil paintings of that period include *Hay Harvest in the Hutsul Region* (1931), *Sunday at the Lviv Castle*, *Ruins of the Maniava Hermitage*, portraits, and many landscapes, enlivened by human figures, of Lviv, its environs, and the Hutsul region. An émigré from 1944, in Munich he was active in the *Ukrainian Association of Artists, coedited its journal *Ukrains'ke mystetstvo*, painted Alpine landscapes, and took part in German exhibitions. From 1950 he lived in St Paul, where he was active in the Ukrainian community, was a member of the Minneapolis Society of Fine Arts (from 1957), and participated in exhibitions at the Minnesota Institute of Arts and the University of Minnesota. A collection of articles about him, with reproductions of his works, was published in Toronto in 1973.

Lutugin, Leonid, b 21 February 1864 in St Petersburg, d 17 August 1915 in Kolchugino, Tomsk gubernia, Russia. Russian geologist. He graduated from the St Petersburg Mining Institute (1889) and then taught there (as professor from 1897) and worked with the Geological Committee (from 1892). For 22 years he conducted geological research of the Donets Coal Basin. He produced the first geological diagram of the coal-bearing strata of the basin (1911) and together with other geologists surveyed and determined the extent of its deposits. In 1914 he conducted research in the Kuznetsk Coal Basin, where he determined the correlation between the quality of coal and the degree of metamorphism. Lutuhyne, a city in Luhanske oblast, was named after him.

Lutuhyne. V-20, DB III-6. A town smt (1990 pop 18,900) on the Vilkhivka River and a raion center in Luhanske oblast. It was founded in 1896 when a steel-rolling machinery plant was built there. In 1914 a railway station was built, and the settlement was named Shmidtivka. In 1925 it was renamed Lutuhyne. It became an smt in 1960. It has a coal mine and machine-building and metalworking plants.

Hryhorii Luzhnytsky

Rev Leonyd Luzhnytsky

Luzhnytsky, Hryhorii [Lužnyc'kyj, Hryhorij] (Luznycky, Hryhor or Gregory; pseud: L. Nyhrytsky, Meriam, B. Polianych), b 27 August 1903 in Lviv, d 3 March 1990 in Philadelphia. Writer, journalist, and literary scholar and critic; member of the AN URSR (now ANU) Lviv branch in 1939–41; full member of the Shevchenko Scientific Society from 1952 and the Free Czecho–Slovak Academy of Arts and Sciences. Luzhnytsky studied Slavic culture at the University of Graz and received his PhD from the University of Vienna in 1926. He was a member of several faculties, at the University of Lviv (1939–41), University of Graz (1945–50), and University of Pennsylvania (1959–68), where he was a visiting professor. He was a literary consultant for the Lviv Ukrainian Drama Theater (1939–44) and the literature editor for *Ukrainska Presa* publishers (until 1939). From 1959 he worked in the editorial office of the newspaper *Ameryka* (Philadelphia). In addition to numerous articles on historical and cultural themes he wrote several novels, plays, and sketches. His scholarly works include *Ukrains'ka tserkva mizh Skhodom i Zakhodom* (The Ukrainian Church between East and West, 1954), *Ukrainian Literature within the Framework of World Literature* (1961), and *Persecution and Destruction of the Ukrainian Church by the Russian Bolsheviks* (1964). He is the coauthor of *The Quest for an Ukrainian Catholic Patriarchate* (1971) and coauthor and editor of *P'iatdesiat rokiv ukrains'koho teatru* (Fifty Years of the Ukrainian Theater, 1975).

D.H. Struk

Luzhnytsky, Leonyd [Lužnyc'kyj], b 25 April 1869 in Sorotsko, Skalat county, Galicia, d 16 October 1951 in Hecksternüst, West Germany. Ukrainian Catholic priest and pedagogue; founding member of the *Ukrainian Theological Scholarly Society. He taught catechism at the Academic Gymnasium of Lviv (1894–1929) and church history at the Greek Catholic Theological Seminary and Academy in Lviv. He wrote several textbooks on dogma, liturgics, ethics, and church history.

Luźny, Ryszard, b 1927 in Vovchiv, Stanyslaviv county, Galicia. Polish scholar of Ukrainian and Russian baroque literature. He received his doctorate from Cracow University in 1963 and has been director of its Institute of Russian Philology and dean of its Faculty of Philology. He is the author of a monograph in Polish on writers of the Kievan Mohyla Academy circle and Polish literature (1966); of articles about the academy, about T. Prokopovych, S. Polotsky, and S. Yavorsky, and about related topics, which were published in Polish and Soviet scholarly periodicals and collections and in *Harvard Ukrainian Studies*; and of a survey of the history of Ukrainian literature in a 1970 Polish handbook on Ukraine edited by M. Karaś and A. Podraza.

Lva River [L'va] (also Mostva). A left-bank tributary of the Stvya River. It is 160 km in length and drains a basin area of 2,400 sq km. The river flows through Rivne oblast into Belarus. Its valley, though partially drained, remains fairly marshy.

Lviv [L'viv] (Latin: Leopolis; Polish: Lwów; German: Lemberg; Russian: Lvov). IV-4, 5. A city (1991 pop 803,000) and oblast center, the historical capital of Galicia and Western Ukraine, and, after Kiev, the second cultural, political, and religious center of Ukraine. By population it is the seventh-largest city in Ukraine and the largest in the western oblasts. Standing at the meeting place of three geographical-economic regions – the Roztochia woodlands, the cultivated fields of the Buh Depression, and the fields of Podilia – Lviv has been for centuries a natural exchange center among them. But the main reason for its development was its location at the intersection of natural trade routes – the north-south route from the Baltic Sea to the Black Sea (Kholm-Halych) and the east-west route (Cracow-Kiev). Because of its location Lviv became an important commercial and cultural intermediary between Western and Eastern Europe, a role assumed from the declining cities of Zvenyhorod, Halych, and Kholm. Lviv's influence fluctuated between national and regional, according to historical events, particularly the power of Galicia. Its western location, far from the usual invasion routes of the Tatars, assured it a more peaceful development than Kiev's. Nevertheless, it was the principal arena of Polish-Ukrainian conflict.

Physical geography. The oldest part of Lviv lies in the depression of the Poltva River, which cuts into the Podolian Upland. The plain, 3-4 km wide and 260-270 m above sea level, was once a peat bog. It narrows to 1 km toward the north and slides between the Podolian Upland and Roztochia to the Buh Depression. The northern side of the depression along the Poltva is hemmed in by the western part of the *Holohory, which separates it from the Buh Depression with a thin ridge 100-150 m above the depressions running from the Chortivska Cliff (414 m) in the east to Vysokyi Zamok (413 m) in the northwest. Built of chalk marls and Miocene sand, sandstone, and limestone dissected by wooded ravines, the ridge is the most scenic part of Lviv. In the northwest it is continued by the somewhat lower, forested Roztochia from Kortumivka Hill (374 m) west of the Poltva River to Lysa Hill (380 m) near Briukhovychi.

The depression of the Poltva rises 60-100 m toward the south, southwest, and west to the *Opilia Upland (the so-

called Lviv Plateau), which forms part of the European watershed running from the northwest to the southeast. The gently undulating plain, which reaches 350 m above sea level, is covered with loess and chernozem and is not forested. The western outskirts of Lviv have a different landscape. There the Lviv Plateau descends to 310 m above sea level. The meltwaters of a glacier, which reached as far west as Yaniv, once ran along the Bilohorske slope to the Buh Depression. Sand and gravel fields, with moving sand hills, and marshes cover the slope. The northern part of Lviv is a plain 240-280 m above sea level consisting of wide, gentle ridges (Malekhiv) covered with fertile loess and separated by the peat-covered valleys of the Buh's tributaries.

Lviv lies in a moderate, damp climate belt, between a continental and a maritime climate. Its average annual temperature is 7.5°C, with averages of 18.5°C in July and 4.1°C in January. The annual rainfall is 666 mm, most of it in July (102 mm) and least in January (27 mm). The average cloud cover is 66 days (maximum in December, minimum in August).

Since 1841 the Poltva River has been covered up. It is exposed only at its source and at its emergence from the city.

History. Lviv was founded in the mid-13th century by Prince *Danylo Romanovych near *Zvenyhorod, which had been razed by the Tatars, and named after his son Lev. Excavations on Vysokyi Zamok have shown that the site was settled in the 10th century. The city is first mentioned in the Galician-Volhynian Chronicle under the year 1256. The chronicle goes on to recount how the Tatar khan, Burundai, ordered the castle to be destroyed in 1259, and how Khan Telebuh attacked Lviv in 1263 and 1287. In the 1260s, during the reign of Prince *Lev Danylovych, Lviv became the capital of the Principality of *Galicia-Volhynia; it remained its capital until the end (1340s). As Kiev declined, Lviv rose to national stature.

At first Lviv covered a small area (later the Zhovkva suburb) on the right bank of the Poltva and consisted of three parts: the *ditynets* or stronghold on Lysa Hill (today the western plateau of Vysokyi Zamok), the inner town at the foot of the *ditynets*, and the outer town, the least fortified suburb, stretching as far as the Poltva River. The population was 2,000 to 3,000. Besides Ukrainians it included Germans, Armenians, Tatars, Poles, Karaites, Hungarians, and Jews. The names of some streets, such as Virmenska and Tatarska, as well as of Stare Okopyshche (the Old Jewish cemetery) date back to medieval times. There were 10 Orthodox churches, 3 Armenian churches, and 2 Catholic churches.

The Polish period, 1387-1772. After the death of Prince *Yurii II, Galicia was governed by D. Dedko, the vicegerent of Liubartas, until 1349, when Casimir III the Great captured Lviv. After a short period of joint Polish-Hungarian rule (1370-87) Lviv was annexed by Poland. At first it served as the capital of a separate country united with Poland. Called Regnum Russiae, it had its own coat of arms (the lion), currency, laws, and administration dating back to the Princely era. Then it became the capital of the Polish province known as *Rus' voivodeship (1434-1772). In 1356 Casimir granted Lviv the rights of *Magdeburg law, which enabled the German and Polish merchants to take control of the municipal government. The influx of German merchants and tradesmen increased rapidly.

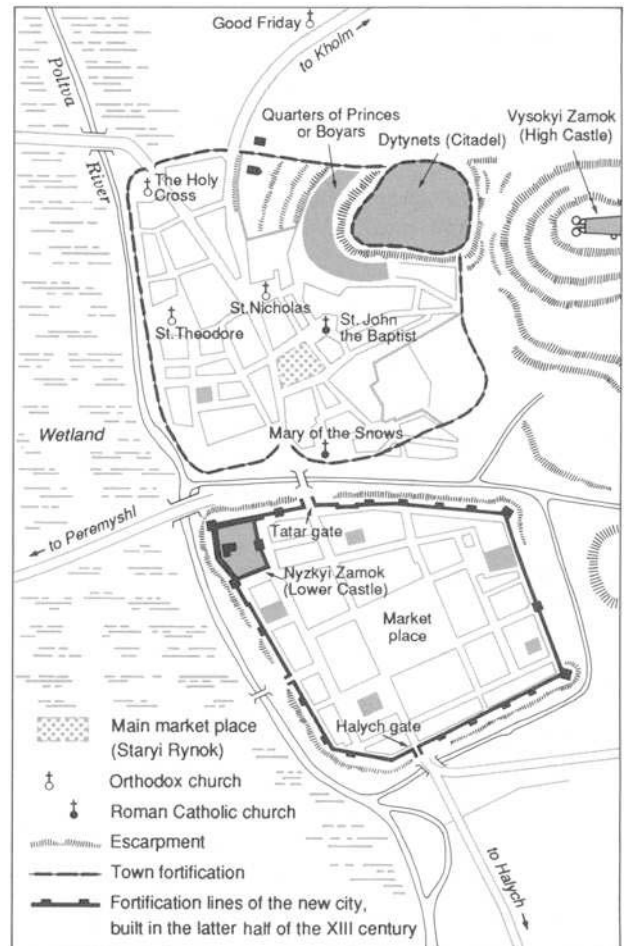

LVIV IN THE 13TH AND 14TH CENTURIES

A. Initial territory of Lviv

B. Territory of Lviv established in 1270

1. High Castle
2. *Ditynets*
3. Dwellings of the princes and boyars
4. Staryi rynek – the city's old market square
5. St Nicholas's Church
6. St John the Baptist Roman Catholic Church
7. Church of the Resurrection
8. St Theodore's Church
9. Virgin of the Snows Roman Catholic Church
10. Probable fortifications of the original territory of the city
11. Church of Good Friday
12. Fortifications of the city as of 1270, built in the second half of the 13th century
13. Low Castle
14. Tatar Gate
15. Halych Gate
16. Market square
17. Volhynian path
18. Podolian path
19. Galician path
20. Moats

In the second half of the 14th century the city center shifted southwest to the wide valley of the Poltva River, which provided a better site for a fortified town on the Western European model. The ramparts and moats ran along today's Pershoho Travnia Street, Danylo Halytskyi Square, Pidvalna Street, and Valova Street and enclosed an area of approx 50 ha. Walls were built within the ramparts; in the 15th century they were expanded and reinforced with 17 towers. Today only one of them, the Porokhova Tower, opposite Lysenko Street, survives. The city's fortifications included two castles, the Low Castle, the residence of the voivode, and the High Castle, an observation post with a magazine and a jail built by Casimir in 1360. The fortified town had two main gates, the Cracow Gate in the north and the Halych Gate in the south. There were two smaller gates for pedestrians, the Jesuit Gate in the west, near the Jesuit church, and the Bosatska

LVIV IN THE 14TH CENTURY

(Barefoot) Gate in the east, opposite Ruska Street, which led to the monastery of the discalced Carmelites. The suburbs, which stretched out along the main roads to the city, were unfortified and vulnerable to enemy attack. In 1438 the Crimean Tatars raided the suburbs, and in 1498 the Turkish army lay siege to the city. Much of the town was destroyed by fires in 1479, 1494, 1511, and 1527.

Cottages of Lviv burghers and estates (called *yurydyky*) of nobles, who did not come under the city courts, sprang up around the city and turned eventually into farming settlements. In the 20th century they became the new suburbs of Zamarstyniv (from the estate of I. Sommerstein, est 1349), Klepariv (from the estate of A. Klopper, 1419), Holosko (1401, near the Olovsko Basin), Kulparkiv (from the estate of P. Goldberg, 1425), Bilohorshcha (1463), and Briukhovychi (1503). There were over 50 churches in the city and its suburbs.

Lviv's economy developed from a farming, manufacturing, and commercial base in the Princely era to a commercial and manufacturing economy with a range of operations extending beyond the frontiers of Poland. Lviv had 'absolute warehousing rights,' which made it a unique trade center. Its renowned trade fairs were held on St Agnes's Day, 3 February (21 January OS), and St Margaret's Day, 30 July (17 July OS), and in later times on St George's Day, 6 May (23 April OS). Banking was in the

Lviv: old fortifications with the campanile of the Bernardine monastery in the background

Old Lviv: view from Zamkova (Castle) Mountain

hands of Jewish and Armenian merchants. After the first period of development ending in the mid-15th century, Lviv's trade declined because of changes in the trade routes. From the mid-16th to the mid-17th century its trade grew again. Most of the townsmen were craftsmen organized in guilds. The first reference to guilds dates from 1386. By the mid-17th century there were as many as 30 guilds totaling over 500 craftsmen. Lviv's manufactured products had a high reputation, especially its metalware, jewelry, and weapons.

Until the early 16th century Lviv had a German charac-

Lviv: seal of the municipal council depicting the town's coat of arms (16th century)

ter. The Germans had gained control of the city government and judiciary, and German was the official language of the city council. Sermons in the Roman Catholic churches were in German, and the first Catholic bishop was a German. Lviv also attracted many Armenians, Poles, and, later, Jews. By the beginning of the 16th century most of the German and Armenian population had been Polonized, and Lviv to a large extent had assumed the character of a Polish town. Ukrainians were in the majority only in the suburbs. Their rights were limited by Magdeburg law, which applied only to Catholics. Thus, Ukrainians were excluded from municipal affairs, their trading rights were limited, and they were shut out from the better residential areas.

Lviv in the 17th century (drawing by A. Passarotti)

The name of Ruska Street dates back to that period. Ukrainians suffered not only social but also national and religious discrimination from the ruling Roman Catholic circles. They protested often and organized themselves into *brotherhoods. The most prominent of the 10 brotherhoods in the 16th and 17th centuries was the *Lviv Dormition Brotherhood (est 1439), which was granted the right of *stauropigion in 1586. Through the efforts of the Lviv brotherhoods, the city once again, after the Princely era, became an important Ukrainian cultural and religious center. I. *Fedorovych's publishing activity also contributed to Lviv's prominence.

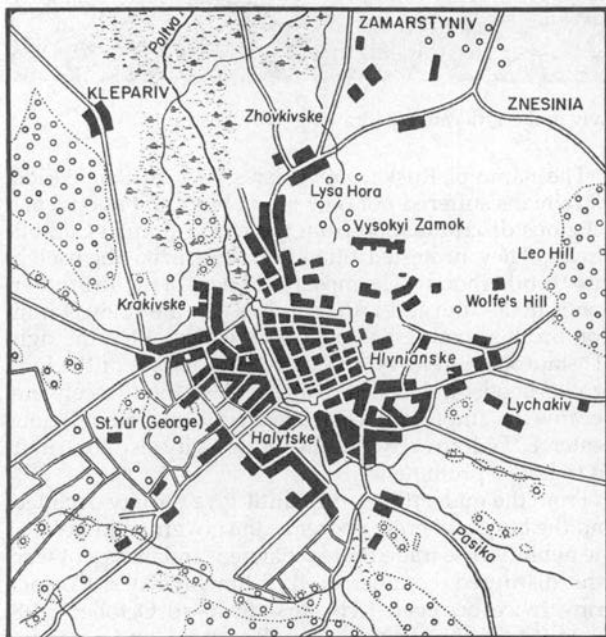

From the mid-17th century until 1772 the city declined, and the burghers grew poorer as the government favored the nobility. The trade routes changed, and incessant warfare disrupted commerce. B. Khmelnytsky's Cossack army twice besieged Lviv; first on 6–10 October 1648, when it took the Vysokyi Zamok fortress, and again between 25 September and 8 November 1655. The city was attacked several times by Turkish-Tatar armies; in 1672, 1675, 1691, and 1695. The greatest blow was inflicted by the Swedes in 1704: they plundered the city and exacted a

Lviv: buildings of the Lviv Dormition Brotherhood, including the Dormition Church and the Korniat Tower

heavy tribute from the burghers, especially the Dormition Brotherhood, thereby weakening Lviv for decades.

In the 18th century the guild system disintegrated, and the number of unorganized tradesmen, known as *partachi* (outsiders, from Latin *a parte*), increased. A period of fierce competition between the two groups was followed by general impoverishment and decline. The castle and many buildings fell into ruin. Many merchant and manufacturing shops were empty. Approx 75 percent of the enterprises were taken over by Jews.

LVIV IN THE LATE 18TH AND EARLY 19TH CENTURIES

The Austrian period, 1772–1918. The transfer of Lviv to Austria (19 August 1772) as the capital of the Crownland of Galicia and Lodomeria opened a new chapter in the city's development. Lviv was inundated with German civil servants, soldiers, merchants, and colonists. After the partitioning of Poland many Polish immigrants poured into Lviv. The city grew into a commercial, administrative, and cultural center. The first newspaper on Ukrainian territory, the French-language **Gazette de Léopol*, came out in Lviv in 1776. The first city theater was founded that year. In 1784 the **Lviv University* and an academic gymnasium were set up.

As the population increased, the city had to expand. In 1777 the fortifications, which had lost their military value, were torn down and replaced with tree-shaded boulevards. The Poltva River was walled in and diverted into an underground canal. The suburbs spread along the main roads to the city. First to be built up was Horodok district, on both sides of the paved highway leading to Vienna. The city began to be developed beyond the belt of grand buildings along the city walls, the wooded areas along Copernicus Street, toward Franko Park (Jesuit Garden). Emperor Joseph II closed down 27 Roman Catholic churches and monasteries, 7 Ukrainian churches, and 3 Armenian churches and converted them into public buildings, citadels, and prisons. A new city hall was built in 1835.

Lviv's population grew rapidly. By the mid-19th century it was as large as Kiev's and, among Ukrainian cities, second only to Odessa's. By the turn of the century Lviv was the fifth-largest city in the Austro-Hungarian Empire

Lviv: main railway station

and the fourth-largest city (after Odessa, Kiev, and Kharkiv) in Ukraine.

The spread of railways stimulated the city's growth. The first lines were Lviv–Peremyshl–Cracow (1861), Lviv–Stanyslaviv–Chernivtsi (1866), Lviv–Krasne–Brody (1869), Lviv–Ternopil–Pidvolochyske (1870), and Lviv–Stryi–Lavochno (1873). Another five lines were laid later. Lviv became an important railway junction, one of the largest in Austria-Hungary and Eastern Europe. With the building of the main station and the Pidzamchia freight station the city spread from the valley of the Poltva to the adjacent plateau. In 1871 Lviv was divided for the first time into districts – Halych, Cracow, Zhovkva, Lychakiv, and Central. In 1890 Novyi Svit was added.

In the 19th century Lviv's industry and trades developed rapidly. In 1814 there were 21 guilds, although the guild system had lost its former influence. In 1841 the first steam mill was built in Lviv. The chief industries were food processing, clothes manufacturing, construction, and metalworking. There were 9 major enterprises in 1850, 16 in 1870, and 25 in 1902. The enterprises became larger through the 20th century: in 1900 the 22 largest enterprises, with over 100 workers each, represented approx 8 percent of all the enterprises (278) and employed 5,580 workers, or approx 55 percent of the total work force (10,163). Beginning in 1841 banking and savings and loan institutions appeared as branches of Austrian banks or of local Jewish, Polish, or Ukrainian ventures (Dnister, 1892; Tsentrobank, 1898; Land Mortgage Bank, 1910).

Austria's social reforms and enlightened cultural and educational policies, and a relatively liberal political regime, were favorable to the Ukrainian national revival. Before the Revolution of 1848 Lviv was the center of the national awakening: the *Ruthenian Triad wrote at the beginning of the 1830s and D. Zubrytsky published *Kronika miasta Lwowa* (Chronicle of the City of Lviv, 1844). During the Spring of Nations the *Supreme Ruthenian Council arose in Lviv and declared the people of Galician Ruthenia to be one nation with the people of central Ukraine. At the same time the *Congress of Ruthenian Scholars and the *People's Home were set up in Lviv. A chair of Ukrainian language and literature was founded at Lviv University. By the end of the 19th and the beginning of the 20th century, owing to the particular historical situation whereby there was a repressive Russian regime in central Ukraine and a liberal Austrian regime in Galicia, Lviv, for the third time in its history, assumed a leading role in Ukrainian national development. That role is evident in the history of the evolution of Ukrainian political thought from populism to Galician autonomy and, finally, to the idea of complete national independence and unity. The headquarters of the major political organizations, such as the National Democratic party, the Ukrainian Radical party, and the Ukrainian Social Democratic party, were in Lviv. The key Ukrainian cultural institutions, such as the *Prosvita society (1868), the Ruska Besida theater (1864; later Ukrainska Besida), the Ridna Shkola society (1881), the *Lysenko Music Society (1903), and the National Museum, were established in Lviv. The head offices of the various Ukrainian co-operatives were located there. As the home of the *Shevchenko Scientific Society (est 1873) Lviv made an enormous contribution to Ukrainian learning. It was also the leading center for Ukrainian publishing: in 1913, of 83 Ukrainian periodical and 410 nonperiodical publications in the world, 65 and 299 re-

spectively were published in Lviv. Important newspapers, such as **Pravda* (1867–96), **Dilo* (1880–1939), and **Svoboda* (1897–1918), and journals, such as **Zoria* (1880–97), **Literaturno-naukovyi vistnyk* (1898–1906, 1922–32), and *Zapysky Naukovoho tovarystva im. Shevchenka* (1892–1939), were published in Lviv.

In the 19th century Lviv was also a Polish political and cultural center. Taking advantage of their privileged status in Galicia and political influence with the Austrian government, the Poles strenuously opposed the Ukrainian movement. Lviv became a battleground between Ukrainians and Poles. The struggle sometimes erupted in violence, such as A. *Potocki's assassination in 1908, and finally led to the *Ukrainian-Polish War in Galicia, beginning on 1 November 1918. On 19 October 1918 the Ukrainian National Rada in Lviv had proclaimed a Ukrainian state in the western Ukrainian territories, and on 9 November the Rada named it the Western Ukrainian National Republic (ZUNR). On 21 November the Poles captured Lviv, thereby forcing the ZUNR government to flee to Ternopil.

Interwar period, 1919–39. After the First World War Lviv's importance declined. It was no longer the capital of a large province of the Austro-Hungarian Empire but the center of a voivodeship. The USSR's economic isolation undermined Lviv's role as a trading intermediary between east and west. Attempts to sell Polish goods to the USSR (the eastern trade) were fruitless. Lviv supplied mostly agricultural products from Galicia and Volhynia to the home and Western markets. In 1935, of 6,242 commercial enterprises, 3,022 sold food products, and 1,340 sold confectionery products. Industrial enterprises accounted for only a quarter of the turnover of commercial firms. Compared to Poles and Jews, Ukrainians did not play an important role in Lviv's economy. Nevertheless, Ukrainian provincial co-operatives, such as **Maslosoiuz*, **Tsentrosoiuz*, and **Narodna Torhovlia*, the Union of Ukrainian Merchants and Entrepreneurs, and the Zoria artisans' association, had a great impact on the economic life of Galicia's Ukrainian population.

Polish-Ukrainian hostility increased sharply in the period as Lviv became the center of organized resistance to the Polish occupation of Galicia. On 18 March 1923 40,000 people demonstrated against the decision of the *Conference of Ambassadors to award Galicia to Poland. The Ukrainian Military Organization (UVO) conducted an armed struggle against the regime, in attempting to assassinate J. Piłsudski (25 September 1921) and President S. Wojciechowski (5 September 1924) on their visits to Lviv. On the 10th anniversary of the *November Uprising a massive Ukrainian demonstration was held in the city. In 1929 the national executive of the OUN was set up in Lviv. On 22 October 1933 a staff member of the Soviet consulate in Lviv was assassinated by the OUN in protest against the man-made famine and the terror in Soviet Ukraine. In 1936 the OUN executive for Western Ukraine was put on trial in Lviv. In defiance of Polish discrimination in education, the *Lviv (Underground) Ukrainian University and the *Lviv (Underground) Ukrainian Higher Polytechnical School were set up. The headquarters of Ukrainian political parties, such as the Ukrainian National Democratic Alliance, the Ukrainian Socialist Radical party, the Ukrainian Social Democratic party, the Ukrainian Catholic People's party, and the clandestine Communist Party of Western Ukraine, were in Lviv.

The Second World War. Under the first Soviet occupation

(22 September 1939 to 30 June 1941) Lviv served as an oblast center. Before fleeing the German advance the Soviet occupational regime murdered thousands of Ukrainian civilians, mainly members of the city's intelligentsia. During the three-year German occupation (June 1941 to July 1944) Lviv was the center of the Galicia district within the *Generalgouvernement. In 1942 an executive branch of the *Ukrainian Central Committee headed by K. Pankivsky was set up in Lviv. The city was a center of the Ukrainian resistance movement (OUN, UPA). On 30 June 1941 the *Proclamation of Ukrainian statehood took place there and the *Ukrainian State Administration was formed. The Ukrainian National Council, headed by K. Levytsky, operated in Lviv from July 1941. On 27 July 1944, Soviet forces re-entered Lviv without battle. The city sustained little damage during the war.

Lviv: airport terminal

The Soviet period. After the war Lviv's administrative division was changed a number of times. Today Lviv is divided into five raions: Zaliznychiy, Halytskyi, Shevchenkivskyi, Lychakivskyi, and Frankivskyi. The city's streets, parks, and institutions were given Ukrainian names, and new cultural and scientific institutions, such as the Lviv branch of the AN URSR (3 April 1951, now ANU), were set up. The national composition of its population changed dramatically. Rapid industrial development was accompanied by demographic growth and changes in the social structure of the city. New industrial and residential districts sprang up. With the Sovietization of the economy, civic life, and private life, Lviv lost its historical role as a center of Ukrainian national and religious life and as Ukraine's link with the West. All pre-Soviet cultural institutions and the Ukrainian Catholic church were abolished. The inhabitants resisted the anti-Ukrainian acts of the Soviet authorities, passively and actively. In the 1960s and 1970s a number of Ukrainian intellectuals were arrested and tried in Lviv (see *Dissident movement). The funeral of the murdered (allegedly by the KGB) composer V. *Ivasiuk in 1979 turned into a massive demonstration. In the late 1980s Lviv took the lead in democratic reform and in the revival of national consciousness. The first mass political rallies in Ukraine took place in Lviv in the summer of 1988. In the national and local elections of March 1990, democratic candidates, some of them former dissidents, won large majorities in the Lviv city and oblast councils. After that victory many pre-Soviet Ukrainian institutions

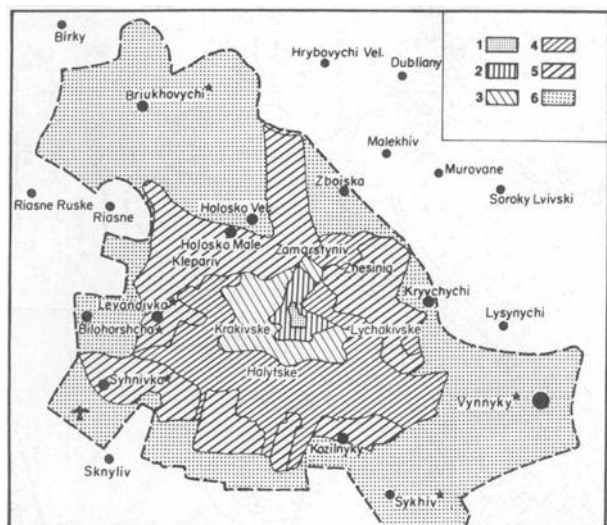

and associations, such as the Ukrainian Catholic church, the Shevchenko Scientific Society, the Prosvita society, and the Plast scouting organization, were revived in Lviv.

Economy. Until 1939 Lviv was a commercial, administrative, and industrial city. Its dominant industry, accounting for 60 percent of the output, was the food industry. Under the Soviet regime its industry was nationalized, some of the older plants were reconstructed, and many new ones were built. Today the main industry is machine building (40 percent of the total output), especially middle- and precision-machine and tool manufacturing, and its largest plants are the *Lviv Bus Plant, the truck-building consortium Avtonavantazhuvach, the conveyor-building consortium Konveier (est 1965), and the locomotive and car repair plant (est 19th century), the bicycle factory, the diamond and diamond instruments manufacturing consortium, and the farm-machinery and chemicals manufacturing consortium Lvivkhimsilhosp-mash. The chief representatives of the tool and instrument manufacturing industry in Lviv are Lvivprylad, Ternoprlyad, and Mikroprylad, the last of which makes electronic measuring devices, automation equipment, and computers. In radioelectronics Kineskop makes color picture tubes and specializes in color (7 models) and black-and-white (15 models) television sets, and Rema makes electronic medical equipment. Lviv's insulator plant was the only plant in the former USSR to produce glass insulators for every type of power transmission.

The food industry accounts for 20 percent of Lviv's industrial output. It includes a bacon packing factory and a poultry packing complex, a liquor distillery, flour mills and bakeries, the Svitoch confectionery consortium, and the Kolos brewing consortium. Light industry is third in importance. Factories of the Promin manufacturing consortium produce cotton thread, cloth, and knitwear. The Prohres consortium makes footwear, and the Vesna, Ma-iak, and Yunist consortia sew clothes. The building-materials industry is dependent on local sources of materials. Its plants produce bricks and tiles, wall and facing materials, window glass, and reinforced concrete. Lviv also has a woodworking industry that makes furniture, flooring, musical instruments, and plywood and a chemical industry that produces petrochemicals, oxygen, paints and varnishes, pharmaceuticals, and perfumes. Lviv is an important publishing center with a number of large printing enterprises. In 1978 there were 137 large enterprises in Lviv. Of a total work force of 281,000 in 1980, 172,000 people were employed in industry.

Lviv is also an important communication center. It is the junction of nine railroad lines and has five railway stations. A number of national highways converge in Lviv. Its Sknyliv airport connects it by air with the major cities of Eastern Europe.

Population. In the mid-17th century Lviv had a population of 30,000 (Kiev ca 10,000) and was the largest city in Ukraine. By the time Lviv was annexed by Austria, the population had fallen to 20,000. During the Austrian period it grew steadily, from 19,500 in 1776 to 38,700 in 1795, 46,000 in 1820, 70,000 in 1857, 87,000 in 1869, 109,700 in 1880, 159,000 in 1900, and 206,100 in 1910. The First World War interrupted its growth (219,400 in 1921). In 1931 some suburban districts were included in Lviv, and its population jumped from 241,800 to 312,200.

TERRITORIAL EXPANSION OF LVIV

1. Lviv in the 15th century
2. Lviv in the late 17th and early 18th centuries
3. Lviv in the 19th century
4. Lviv in the 20th century
5. Lviv between 1939 and 1941
6. Lviv's present territory

*Briukhovychi has been incorporated into the city's Shevchenkivskiyi raion, Vynnyky and Sykhiv into Lychakivskiyi raion, Levandivka (Zhovtneve) and Bilohorshcha into Zaliznychiy raion, and Syhnyvka into Frankivskiyi raion.

Under Austrian rule Lviv attracted new residents from eastern and western Galicia, whereas in the interwar period almost all new residents came from eastern Galicia. In 1900–10 immigration to the city (28,000) exceeded its natural growth (18,000); in 1921–31 the respective figures were 53,000 and 18,000. The expansion occurred mainly in the suburbs. During the Second World War the population fluctuated wildly. It jumped by over 100,000 to 430,000 (May 1940) as refugees from Poland poured into the city. In 1943, during the German occupation, it decreased to 180,000 (discounting the Germans), because of the destruction of the Jews. After the war the population increased rapidly, to 387,000 in 1956, 411,000 in 1959, 553,000 in 1970, 665,000 in 1979, and 787,000 in 1989, mainly be-

cause of industrialization. The ethnic composition of Lviv changed gradually until the last war. Before 1914 the proportion of Ukrainians increased slowly but steadily because of immigration from the countryside. During the First World War the proportion of Jews increased because of their influx from the small towns, and the proportion of Ukrainians fell because of war casualties and political emigration. In the interwar period the Ukrainian population increased slightly at the expense of the Poles and Jews. In the Second World War the number of Jews fell drastically, and the number of Ukrainians increased. After the war most of the Poles left Lviv, and their place was taken by Ukrainians, including inhabitants of the Sian and Lemko regions, which were annexed by Poland. Thus, the ethnic composition that had characterized Lviv for centuries changed radically, and the Ukrainians became by far the largest group. Then Russians began to settle in Lviv (see the table).

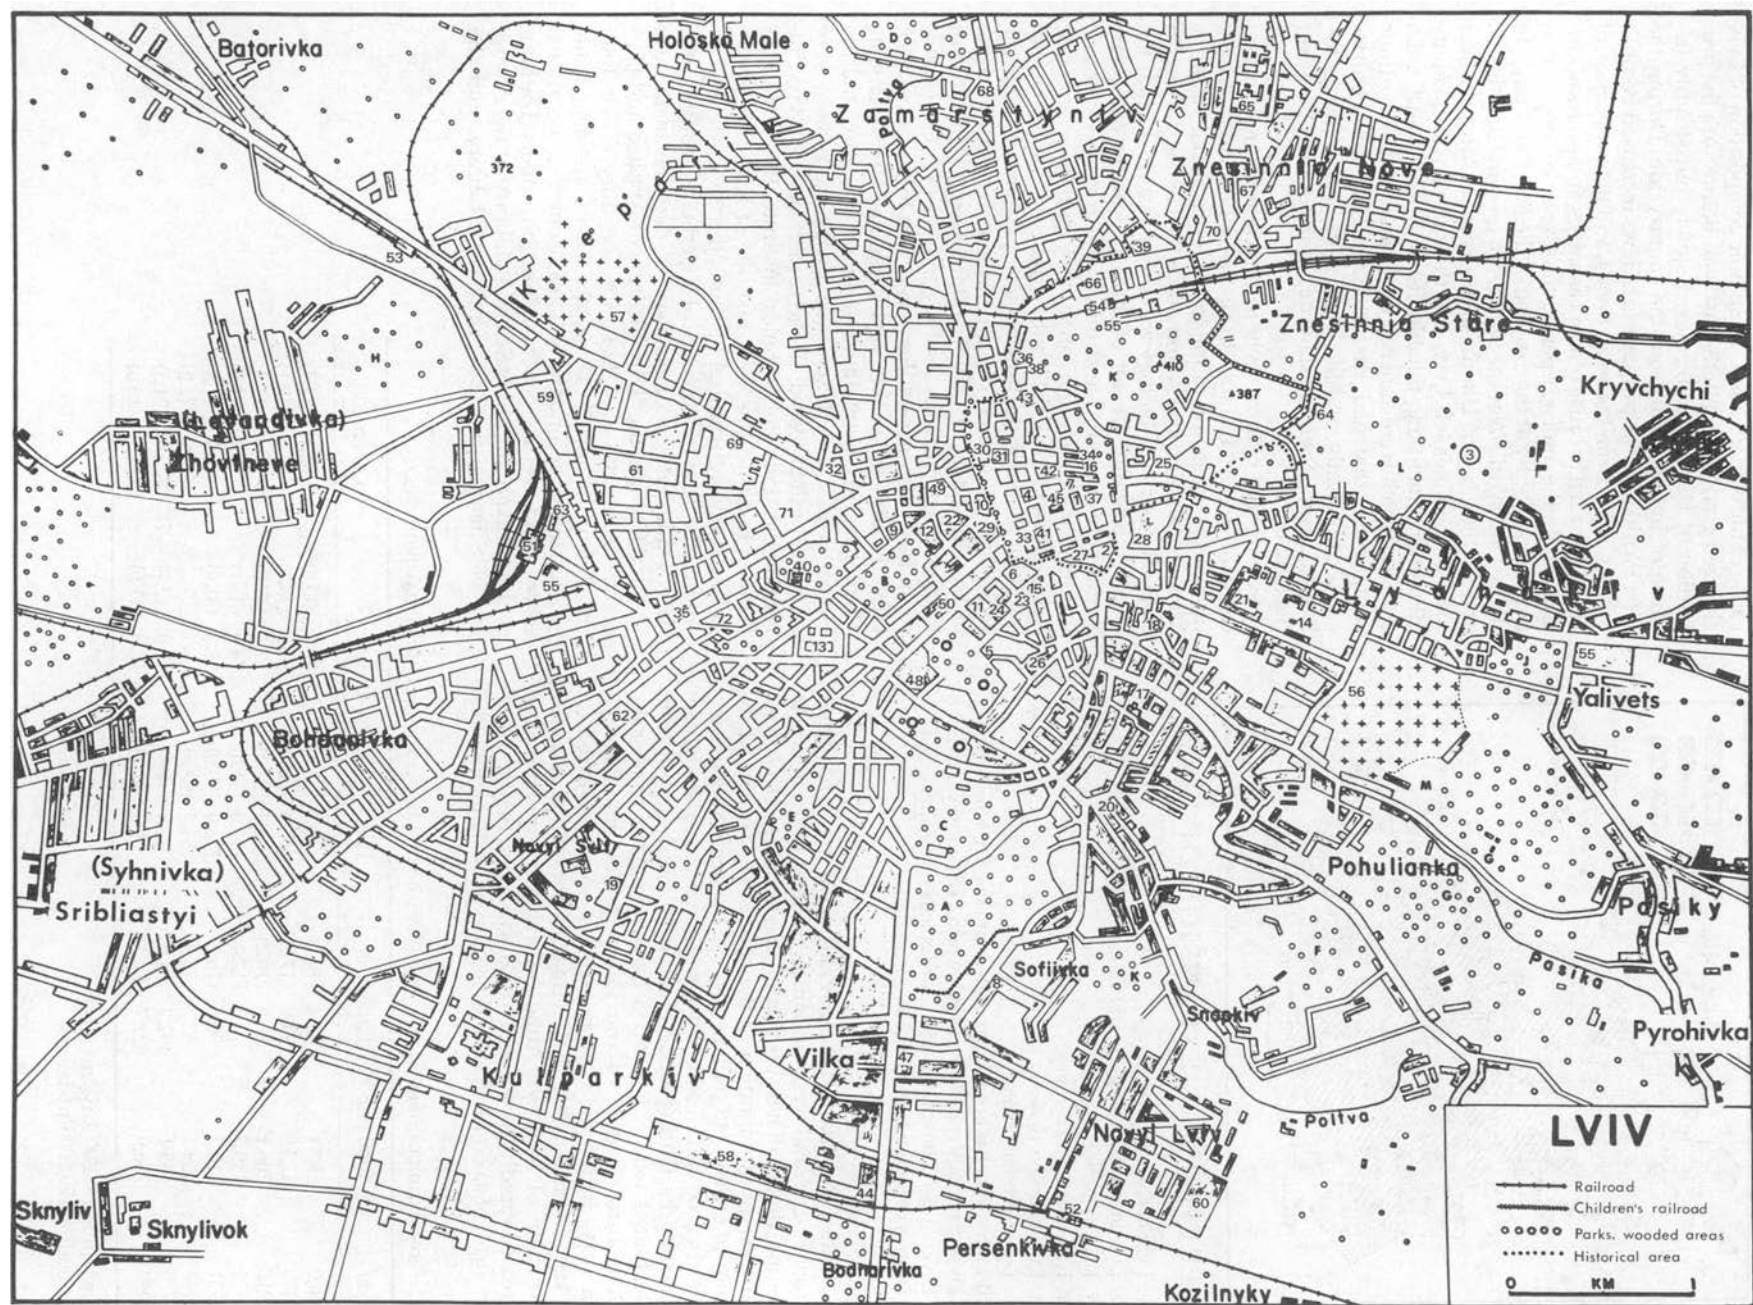

Science and culture. Lviv is the scientific and cultural center of western Ukraine. In 1951 a branch of the AN URSS (now ANU) consisting of the Institutes of Social Sciences, Machine Building and Automation, the Geology of Useful Minerals, and Agrobiology was set up in Lviv. In 1971 the Western Scientific Center of the ANU was opened there. Besides the academy's institutes there are many research institutes with high reputation: the *Ukrainian Scientific Research Institute of the Printing Industry, the *Ukrainian Scientific Research Institute of Geological Prospecting, the (until 1991 All-Union) Design and Experimental Institute of Bus Building, the Lviv Scientific Research Institute of Epidemiology and Microbiology, and the Lviv Observatory. In the Polish period there were five higher schools in Lviv: the university, the polytechnic, the Greek Catholic Theological Academy, the Veterinary Academy, and the Higher School of Foreign Trade. By the 1980s there were 11, some of them based on the earlier schools: Lviv University, the *Lviv Polytechnical Institute, the *Ukrainian Printing Institute, the *Lviv Institute of Forest Technology, the *Lviv Agricultural Institute, the *Lviv Medical Institute, the *Lviv Zootechnical-Veterinary Institute, the *Lviv Trade and Economics Institute, the *Lviv Institute of Physical Culture, the *Lviv Institute of Applied and Decorative Arts, and the *Lviv Conservatory. Their total enrollment in 1979 was 62,500. There are also some 30 specialized secondary schools, some 30 vocational schools, and over 100 general education schools. The largest libraries are the *Lviv Scientific Library of the Academy of Sciences, the Lviv University Library, and the

The ethnic composition of Lviv, 1869–1989 (thousands; percentage of total in parentheses)

Year	Total pop	Ukrainians	Poles	Jews	Others
1869	87.1	12.4 (14.2)	46.3 (53.2)	26.3 (30.2)	2.1 (2.4)
1890	127.9	21.9 (17.2)	67.3 (52.6)	36.1 (28.1)	2.6 (2.1)
1910	206.1	39.3 (19.2)	105.5 (51.2)	57.4 (27.8)	3.9 (1.8)
1921	219.5	7.3 (12.4)	111.9 (51.0)	76.9 (35.1)	3.4 (1.5)
1931	312.2	50.9 (16.3)	156.0 (50.0)	99.6 (31.9)	5.7 (1.8)

Library of the Lviv Polytechnical Institute. There are approx 400 public libraries, with total holdings of over 15 million books. The most important archives in Lviv are the *Central State Historical Archive of Ukraine and the Lviv Oblast State Archive.

In the interwar period the city theater in Lviv was Polish, and the Ukrainian public was served by a number of itinerant troupes. Today there are five main theaters: the *Lviv Theater of Opera and Ballet, the *Lviv Ukrainian Drama Theater, the *Lviv Young Spectator's Theater, the *Lviv Russian Drama Theater, and the Lviv Puppet Theater. There is also a symphony orchestra, the Lviv Oblast Philharmonic, and the *Trembita state choir. Of the 40 or more cinemas in the city, the largest are Myr, Dnipro, Lviv, Kyiv, and Ukraina.

Most of the 10 museums that served Lviv in the interwar period, including the *National Museum and the museums of the Shevchenko Scientific Society and the Stauropogion Institute, were reorganized during the Soviet period. The chief museums today are the *Lviv Historical Museum, the National Museum, the *Natural Science Museum of the Academy of Sciences, the *Lviv Art Gallery, the Ukrainian State Museum of Ethnography and Crafts, the Franko Literary Memorial Museum, the Lviv Museum of Folk Architecture and Folkways, and the Arms Museum (est 1981).

Once a center of Ukrainian publishing (65 papers before 1939), Lviv was reduced in the Soviet period to only one Ukrainian daily (*Vil'na Ukraina*), one monthly journal (**Zhovten'* [*Dzvin*, as of 1990]), and a young people's magazine (*Lenins'ka molod'*). The chief publishing houses were Kameniar and Vyshcha Shkola. Under the reforms of the late 1980s some new papers appeared, most of them organs of unofficial organizations. After Ukraine's independence many new papers (*Za vil'nu Ukrainu*, *Dilo*, *Moloda Halychyna*) and journals appeared.

Religious life. For several centuries Lviv was a bastion of the Orthodox faith in Western Ukraine. The *Lviv Dormition Brotherhood had an important impact on the religious and cultural life of all Ukraine in the 16th and 17th centuries. The city was the seat of *Lviv eparchy, which was Orthodox until the end of the 17th century and then Uniate, and of *Halych metropoly (est 1807). Through the efforts of Metropolitan A. *Sheptytsky Lviv became the leading center of Ukrainian Catholic theology. It was the home of the *Greek Catholic Theological Seminary, the *Greek Catholic Theological Academy, and the *Ukrainian Theological Scholarly Society, which published the journal **Bohosloviia*. At the same time it was the seat of Polish and Armenian eparchies. After the abolition of the Ukrainian Catholic church by the Soviet authorities in 1946, only the Russian Orthodox church was permitted to maintain an archbishop in Lviv. In 1990 the Ukrainian Catholic church under Metropolitan V. Sterniuk in Lviv was officially recognized, and St George's Cathedral was returned to it. Since early 1991 its head, Cardinal M. *Liubachivsky, has resided in Lviv.

Layout. Today Lviv has an area of 155 sq km. For descriptive purposes Lviv can be divided into three concentric circles: the central core, consisting of the old city in the depression of the Poltva, an architecturally and economically mixed area built up in the 19th and early 20th (to 1930) centuries, and the suburbs that were once villages and are not yet fully built up.

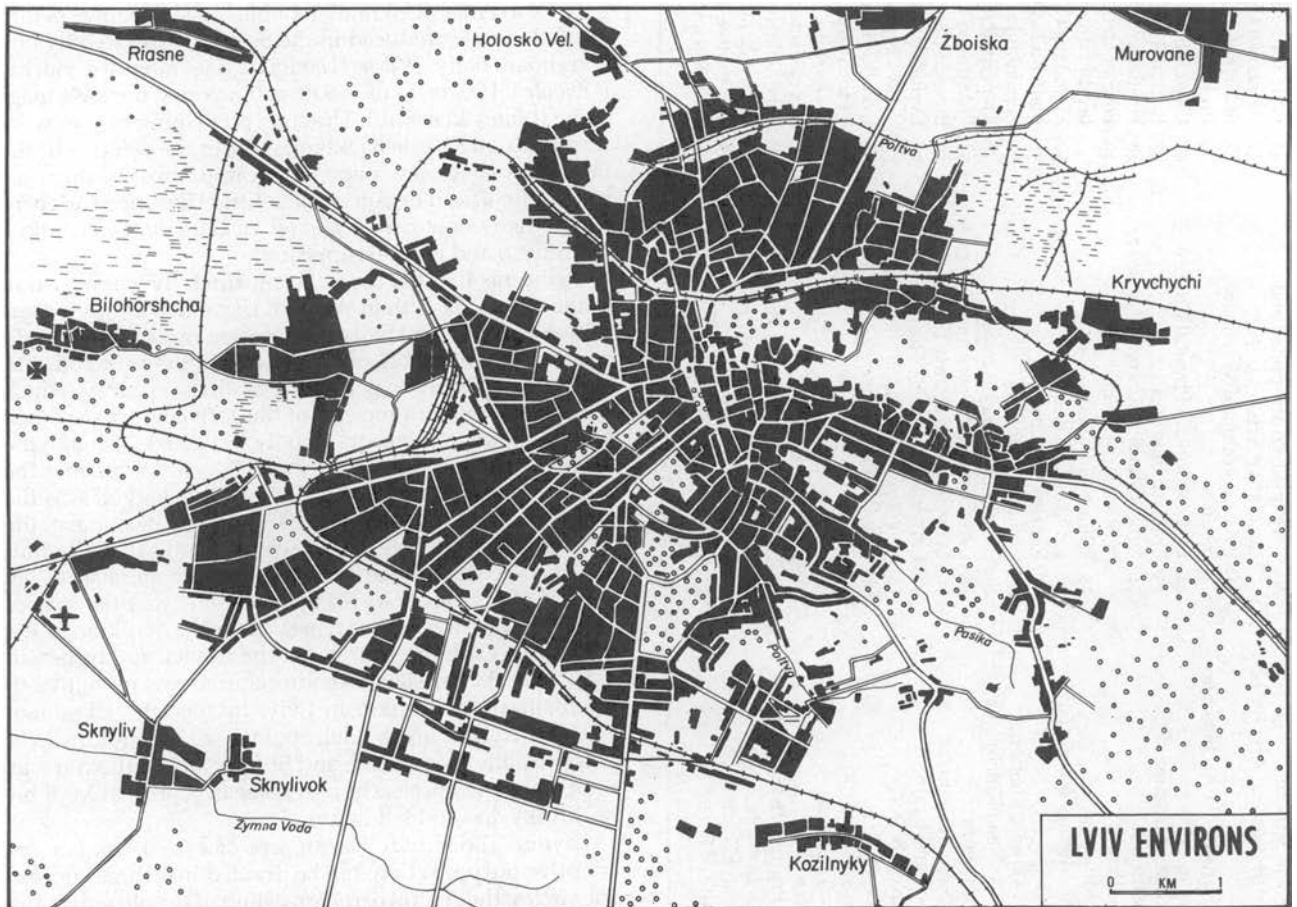

Legend moved to page 224

Old Lviv (woodcut by Bohdan Soroka, 1981)

The core is the city of the 14th to 18th centuries. It appears well planned: the rectangular market square and city hall stand at the center of the street grid, which is encircled by broad, green boulevards at the site of the old walls. The core is densely built up with tall stone buildings, many of them in their original style. In the second half of the 19th century the center of the city shifted west and southwest. Shevchenko (formerly Akademichnyi) *prospekt*, Mickiewicz Square, and Horodetska Street became the new axis of the city. That is the most imposing part of Lviv, with many public buildings, hotels (eg, the Inturist, formerly George Hotel), cafés, stores, and banks in 19th- and early 20th-century styles. At one end of the axis stands the opera theater, and off to the sides are Lviv University, the ANU Institute of Social Sciences, and the main post office.

The core is surrounded by several districts: Krakiv, in the west, is a mixed residential and commercial area, with an industrial section near the main railway station; Halych and Novyi Svit, in the south, are residential areas with fine villas; Zhovkva, in the north, is an old manufacturing and trading district, its southern part settled mostly by Jews until the war and its northern edge covered with factories; and Lychakiv, in the east, is residential, with

✘ Site of military combat against special units of the MVD, where the supreme commander of the UPA, Taras Chuprynka (R. Shukhevych), was killed on 5 March 1950.

A new railroad line was built near Bilohorshcha for military purposes (Warsaw Pact); it links the western, eastern, and northern lines.

A

B

C

Lviv: A) Bernardine church; B) Boim Chapel; C) Transfiguration Church; D) Armenian Cathedral; E) Dominican church; F) Chapel of the Three Saints

hospitals and a cemetery on its outer edge. The third circle consists of the suburbs: to the north, Zamarstyniv and Znesinnia are the most industrialized districts of Lviv, and Male and Velyke Holosko, Zboiska, Kryvchytsi, and Klepariv have preserved some of their agricultural character; to the west, Levandivka, Bohdanivka, and Syhnyvka are settled by workers and have some industry; to the south, Kulparkiv has a large psychiatric hospital; and to the southwest, Kozilnyky, Snopkiv, and Pasiky are green residential areas with some farmland.

Lviv is a very green city with a varied vegetation. The largest and most picturesque parks are Stryi (60 ha, est 1887), in the south, Vysoky Zamok (37 ha, est 1835) and Shevchenkivskiy Hai (84 ha), in the east, and Druzhba (60 ha, est 1959–63). The smaller parks are Zalizna Voda (18.2 ha, est 1905), Franko (the former Jesuit Garden, 12.2 ha, est late 16th century), Lychakiv (8.4 ha), Pohulianka, and Khmelnytsky (25 ha). The Lychakiv Cemetery, which contains some famous monuments to noted Ukrainian and Polish residents of Lviv, and the Yaniv Cemetery, with over 200 graves of fighters for Ukrainian independence, resemble parks.

Architecture and art. The oldest monument in Lviv consists of the foundation and walls of St Nicholas's Church, built by Prince Lev Danylovykh in the 13th century. The church burned down in 1623 and 1783 and was rebuilt in 1800. The remnants of Vysoky Zamok date back to the 13th century. A number of medieval churches, built originally in the Byzantine Romanesque style, have since been reconstructed; among them are *St Onuphrius's Church and Monastery, the Church of *Good Friday (reconstructed in 1643–5), the Roman Catholic churches of St John the Baptist (1260) in the old Market Square and the Virgin of the Snows (14th century), both rebuilt at the end of the 19th century, and St George's Church and Monastery (later St George's Cathedral), built by Prince Lev outside the city. St Theodore's Church, the Church of the Resurrection, and the Church of the Annunciation from medieval times have completely disappeared. The *Armenian Cathedral was restored in the 1920s. The only indubitably medieval piece of art is Dymytrii's bell, poured for St George's Church in 1341. Lviv's Gothic architecture of the 14th and 15th centuries was destroyed by fire in 1527. Only the Latin Cathedral (built 1340, rebuilt 1761–76) survived, and in 1619 the Renaissance chapel of the Kampian family was added to it.

By the end of the 16th century Lviv had the appearance of a Renaissance city. It is the only city in Ukraine that still has some original Renaissance architecture. The finest examples of the style are the *Dormition Church (1591–1629); the Chapel of the Three Saints (1578–91); the central part of the Armenian Cathedral complex; the Boim family chapel (1609–15); the Roman Catholic churches of the Bernardine monks (1600–30), St Lazarus (1620–40), Mary Magdalene (1615–35), St Wojtich (1602), and St Sophia (1574); the Synagogue of the Golden Rose (1582); the residential buildings in Rynok Square, such as the *Black Building (1577–88), *Korniakt building (1580), and Massari building; and the additions to the fortifications, consisting of the city arsenal (1555–6) and the gunpowder tower (1554–6).

The baroque style of the 17th century is characteristic of Kiev rather than Lviv. There are only a few monuments in

that style in Lviv: the Church of ss Peter and Paul (1668), the Church of the Holy Spirit (1722–9, destroyed 1939), the Church of the Transfiguration (1729, restored 1906), the churches of the Jesuit order (1610–30), the Carmelite order (1634), and the Franciscan order (1708), St Anthony's Church (1718), and the General Hospital (formerly the Piarist College, 1748). During a period of decline in the 18th century, several rococo buildings were constructed: *St George's Cathedral (1744–70), the Dominican church (1749–66), the Royal Arsenal, and the façade of the Lubomirski Palace.

The Austrian period was marked by the classical style, which is embodied in the guardhouse on Pidkova Square, the Ossolineum (1823–33, now the Lviv Scientific Library of the Academy of Sciences), the Dzieduszycki Museum (now the Natural Science Museum), and the Baworowski Library (now the Arts Cabinet of the ANU). The City Hall (1827–35) and the four fountains around it are in the Empire style; the Polytechnical Institute (1872–7), University (1877–81), Opera (1897–1900), main railway station, and post office (1921–2) are in the pseudo-Renaissance or Art Nouveau styles. During the Soviet period Khmelnytsky and Tereshkova streets were lined with residential buildings (1962–73). The Gagarin Palace of Culture (1961), the new buildings of the polytechnical institute (1964–72), the Computing Center (1969), the Lviv (1969) and Dnister

The Lviv city hall

Lviv: the Neptune Fountain in Market Square

(1983) hotels, the Museum of the Carpathian Military District (1952), and the bus terminal (1980) were added to the skyline.

The main monuments in the city are to A. Mickiewicz (by M. Parashchuk and A. Popel, 1905–6), I. Franko (1964), V. Stefanyk (1971), and I. Fedorovych (1978); there are also sculptures and an eternal flame (1958) at the Kholm Slavy Memorial Military Cemetery. The Lenin monument (1952) was dismantled in 1990. A monument to Sluvchenko was erected in 1992.

Lviv Agricultural Institute (Lvivskyy silskohospodarskyi instytut). A technical school of *higher education in Dubliany, Lviv oblast. It was founded in 1946 on the basis of the agronomy and forestry faculties of the *Lviv Polytechnical Institute. In 1980 it was under the jurisdiction of the USSR Ministry of Agriculture and had faculties of agronomy, economics, surveying, agricultural mechanics, architecture, and upgrading of qualifications (for leading cadres and specialists). Both degree and graduate programs are offered. A total of 6,413 students were registered for courses in 1980, 3,390 of whom studied by correspondence. The institute has a 3,791-ha experimental farm and a 380,000-volume library.

Lviv Almazinstrument Manufacturing Consortium (Lvivske vyrobnyche obiednannia Almazinstrument). An enterprise of the equipment- and instrument-building industry, formed in 1979 out of the Lviv Plant of Diamond Instruments (est 1957), the Boryslav Plant of Artificial Diamonds, and a special technical design office for diamonds. It produces artificial diamonds and diamond instruments.

Lviv Art Gallery (Lvivska kartynna halereia). An art museum in Lviv, established in 1939 on the basis of the nationalized People's Museum in Lviv (1907–39). The core of its collection consists of 300 paintings once owned by a magnate from Podilia, J. Jakowicz, and canvases formerly in Lviv's Museum of Artistic Industry (est 1905), National Museum (1905), Lubomirski Museum (1907), B. Orzechowicz collection (1921), Museum of the Staurapegion Institute, Greek Catholic Theological Seminary, and numerous private collections. During the Second World War hundreds of valuable paintings were removed by the Nazis. Today the gallery's 34 halls have over 1,000 works on permanent display. In 1986 it possessed over 35,000 works – Ukrainian, Russian, Polish, Western and Eastern European, and Soviet paintings, graphic works, sculptures, ceramics, and ornamental and applied art from the 15th century on, ranging from works by Leonardo da Vinci and Titian to those of contemporary Ukrainian painters (L. Medvid, V. Patyk, R. Selsky, O. Shatkivsky, H. Smolsky) and sculptors (T. Bryzh, D. Krvavych, E. Mysko). It has original porcelain from Korets, Meissen, and Vienna, a copy of the *Lviv Apostol* of I. Fedorovych, and other priceless artifacts. Since 1966 departments of 16th- to 18th-century Lviv portraiture and 18th- to 19th-century Oriental art have existed at the gallery. Branches of the gallery are the 17th-century Boim Chapel and the I. Fedorovych Museum (est 1977) in Lviv and the Olesko Castle Museum-Preserve (est 1975) in Buzke raion. Many albums with reproductions of paintings in the gallery have appeared, most recently in 1987, and a guide to the gallery was published in 1975.

Lviv Astronomical Observatory. See Astronomy.

Lviv Brigade of the Ukrainian Galician Army (Lvivska [7] brygada UHA). Formed in January 1919 from units of the Southern Group, the brigade consisted of two infantry regiments and an artillery regiment and was part of the Third Corps. Its commanders were Col K. Sliusar-

chuk and Maj A. Bizanz. In June 1919 the Lviv Brigade spearheaded the Chortkiv offensive against the Polish army. Later it fought successfully in Volhynia and Podilia against Bolshevik and Denikin forces. In February 1920 the brigade was reorganized into the Seventh Infantry Regiment of the First Brigade of the Red Ukrainian Galician Army and was sent into action against the Poles. At the end of April 1920 it left the Red Army and was encircled by the Poles. Some of its units surrendered immediately; others broke out of the encirclement but surrendered two weeks later.

Lviv Brotherhood. See Lviv Dormition Brotherhood.

Lviv Bus Plant (Lvivskiy avtobusnyi zavod). A large enterprise of the automotive industry, built in Lviv in 1946. Until 1957 it built mobile cranes and hitches. In 1957 it began to build the LAZ-695 passenger bus seating 55 people, and in 1958 it became a specialized plant. It built several versions of the basic model: the LAZ-695Ye for urban transportation, the LAZ-695YeE for countries with a temperate climate, the LAZ-695YeYu for countries with a tropical climate, and the LAZ-697Ye Tourist for intercity transportation. Since 1970 those models have been replaced by the LAZ-695M Lviv and the LAZ-695M Tourist. The plant also builds hydraulic transmissions and spare parts for its buses.

Lviv Chronicle (Lvivskiy litopys). A chronicle written in the first half of the 17th century and discovered by D. *Zubrytsky, who named it after the city where he found it. It describes events mostly in western Ukraine (the Kiev region, Podilia, and Galicia) from 1498 to 1649. From 1630 the author of the chronicle deals with events in which he was involved in greater detail. The unidentified author devotes much attention to the causes of the Cossack-Polish wars, to the Cossack rebellions of 1636 and 1637–8, and to B. Khmelnytsky's uprising (up to the Treaty of *Zboriv) and gives a positive evaluation of P. Sahaidachny's, Khmelnytsky's, and P. Mohyla's roles. The language is close to the western Ukrainian dialect. The chronicle was part of M. Hunashevsky's manuscript, and M. Hrushevsky, M. Marchenko, and O. Bevzo consider him to be the author of the chronicle. It was published by A. Petrushevych in his *Naukovyi sbornik* (1868; repr 1971). Today the manuscript is preserved in the Central Scientific Library of the Academy of Sciences of Ukraine.

Lviv Conservatory (Lvivska konservatoriia im. M. Lyсенka). A higher school of music, established in Lviv in 1940 by the merger of the *Lysenko Higher Institute of Music (est 1904) and the Polish Lviv Conservatory (est 1830). Its teachers have included V. Barvinsky (director 1940–8), S. Liudkevych, M. Kolessa (director 1953–65), W. Wytwycky, B. Kudryk, Z. Lysko, R. Liubynetsky, R. Savytsky, H. Levytska, and A. Soltys. In 1985–6, there were six faculties (composition, history and theory of music, conducting, and vocal, piano, and orchestra studies), with a total of nearly 500 students, and 16 chairs associated with the conservatory, in addition to a basic course of musical instruction for children. The conservatory's library holds approx 140,000 volumes.

Lviv Dormition Brotherhood (Lvivske uspenske bratstvo, aka Lviv Stauropegion Brotherhood [Lvivske stavropihiiske bratstvo]). An Orthodox religious association founded in the 15th century by Lviv merchants and tradesmen at the Dormition Church. It is the oldest and one of the leading Ukrainian brotherhoods, and it served as an example to other brotherhoods. There are historical references to it dating back to 1463. According to its charter, which was confirmed by Patriarch Joachim of Antioch in 1586 and Patriarch Jeremiah of Constantinople in 1589, the brotherhood was independent of the local bishops (right of stauropegion) and subject directly to the Patriarch of Constantinople. It had the right to oversee the activities not only of secular members of the church but also of the clergy and even the bishops. Its membership was open to all estates and to Orthodox believers from other cities and countries. Membership dues, profits from book sales, donations, and gifts were used to support the Dormition Church and St Onuphrius's Monastery, which were owned by the brotherhood, and to operate a printing press, school, orphanages, hospitals, and homes for elderly members. As the leading cultural and religious institution for Western Ukraine, the Lviv brotherhood played a key role in resisting Polish national and religious oppression and in fighting for equality with the Catholics and the Polish burghers. Owing to its efforts the Lviv eparchy was restored in 1539, and one of the brotherhood's members, M. Tuchapsky, was appointed bishop. For a century it was one of the centers of opposition to the Church Union of *Berestia. On 5 April 1709, after Pope Clement XI guaranteed its rights, the brotherhood accepted the union with Rome and thenceforth limited its activities to church affairs. In 1788, under Austrian rule, the brotherhood was disbanded. It was restored the same year with a different statute as the *Stauropegion Institute, was taken over by Russophiles, and continued to operate until 1939.

As the owner of a printing press the brotherhood developed a wide publishing program. Its earliest surviving publications came out in 1591: the charter of Patriarch Jeremiah of 1589; a collection of verses in honor of Metropolitan M. Rahoza, titled *Prosphonia*; and a Greek grammar known as *Adelphotos*. From 1591 to 1722 the brotherhood press printed 140 titles in 160,000 copies, including liturgical books, school textbooks, and polemical literature. In the first half of the 17th century it published three editions

Lviv Dormition Brotherhood: coat-of-arms

Lviv Dormition Brotherhood Press: coat-of-arms

of the Octoechos (1630, 1639, 1644), the *Apostol* (1634, 1637, 1648), and the *Antolohion* (1632, 1638, 1643) and two editions of the Gospel (1636, 1644). The most important of its later publications were I. Galiatovsky's *Kliuch razumieniia* (The Key of Understanding, 1663 and 1665) and *Nebo novoie* (The New Heaven, 1665) and **Ifika iieropolitika* (1760). The directors of the printing press included Brother Myna and Rev Nykyfor in the 16th century and M. Slozka and A. Skulsky in the 18th century. Its books spread throughout Ukraine and even beyond it, to Belarus, Wallachia, Moldavia, Bulgaria, and Serbia. In Russia the import and sale of Lviv books was prohibited. Peter I permitted them to be sold, but only in Left-Bank Ukraine. The Stauropegion Institute press existed until 1939.

On 8 October 1586 the brotherhood opened a 'Greek and Ruthenian school,' the first brotherhood school in Ukraine. It was governed by a special statute (*Poriadok shkilnyi*), which was worked out by the founders and the first rector of the school, Bishop Arsenii of Elason. The statute is the oldest document in Ukrainian pedagogical literature. Besides merchants' children boys from the lower classes were admitted. Instruction was conducted in vernacular Ukrainian, and Old Church Slavonic, Greek (until the 1660s), Latin (from 1604), and Polish (occasionally) were studied as subjects. The other subjects were music, astronomy, mathematics, dialectics, poetics, rhetoric, grammar, philosophy, and theology. By training teachers and printing textbooks the school played an important role in the development of education not only in Ukraine but also in Belarus, Russia, Wallachia, and Moldavia. Its rectors and professors included some noted Ukrainian cultural figures, such as L. and S. Zyzanii, K. Stavrovetsky-Tranquillon, Y. Boretsky, O. Mytura, Z. Kopystensky, P. Berynda, F. Sydorovych, and M. Hrek. In the 18th century the school began to decline. The Stauropegion Institute maintained a school and a student residence until 1939.

The Dormition Brotherhood maintained close ties with Orthodox countries in the 16th and 17th centuries. The hospodars and statesmen of Moldavia, such as A. Lopușnianu (1558–66), J. Movilă (1598–1606), L. Stroici (1598–1606), S. Movilă (1606–7), V. Lupu (1641), M. Movilă (1650–60), A. Movilă-Potocki (1664), G. Duca (1671), and C. Duca (1694), supported the brotherhood and corresponded with it, usually in Ukrainian.

Lviv Dormition Brotherhood Press. A press founded by the Lviv Dormition Brotherhood in 1586. With a printing press and other equipment used by I. *Fedorovych, it printed liturgical books, primers, poetry, dramas, and theological, educational, and polemical literature. Its oldest extant publications date from 1591: the 1589 charter of Patriarch Jeremiah granting the brotherhood the right of *stauropegion, a booklet of verses in honor of Metropolitan M. Rahoza titled *Proshphonima*, and the grammar **Adelphotes*. From 1591 to 1722 the press issued 140 books with a total run of some 160,000 copies. They were distributed

throughout Polish-ruled Ukraine and Belarus, and even in Wallachia, Moldavia, Serbia, and Bulgaria. They were not, however, permitted to be sold in Russian-ruled Ukraine until 1707. Among the authors published were P. Berynda, A. Skulsky, I. Volkovych, S. Kosiv, A. Zhelyborsky, and M. Kozachynsky. The press's directors and master printers included the monk Myna, P. Kulchych, P. Berynda, Y. Kyrylovych, M. Slozka, A. Skulsky, I. Kunotovych, D. Kulchytsky, S. Polovetsky, S. and V. Stavnytsky, D. Pyniavsky, I. Hrozevsky, and Ya. Paslavsky. The press played an important role in the intellectual life of Ukraine and the defense of the Orthodox church. In 1788 the Lviv brotherhood and its press were succeeded by the *Stauropegion Institute.

Lviv Dormition Brotherhood School (Lvivska bratska shkola). An institution of *secondary education established by the *Lviv Dormition Brotherhood in 1586. It was the first *brotherhood school in Ukraine. Its organizers were Orthodox burghers and noblemen who integrated across estate lines in the defense of their ancestral religion and traditions. One of their main goals was to raise the spiritual and intellectual level of the Orthodox church with the help of a network of urban schools open to children of all estates. Among the better-known activists associated with the early history of the Lviv School were Yu. *Rohatynets, L. Maletsky, I. Krasovsky, and S. Morokhovsky. Their fund-raising efforts were supported by the city's Orthodox bishop, H. *Balaban.

The Lviv School opened at a time when there were only a few Orthodox ecclesiastical schools, none of which offered secondary education. An important stimulus to its creation was a discriminatory ruling of Lviv's municipal government, controlled by Catholic patricians, which had prevented Orthodox children from enrolling in the Catholic cathedral school since 1570.

Following the humanistic patterns of the Western European classical grammar school, the liberal arts curriculum of the Lviv School was divided into separate subjects, and from the outset stressed philological training. In its program, grammar was regarded as the key introductory discipline, from which students would progress through poetics and rhetoric to philosophy and theology. But rather than emphasizing Latin over Greek, as was being done in Protestant and Catholic schools, the Lviv School concentrated on Church Slavonic and Greek, the sacred languages of the Orthodox Slavs, and placed Latin last in the hierarchy. Because of this divergence Lviv teachers and other Ukrainian pedagogues set out to publish their own Greek and Church Slavonic grammars and Slavonic-Ruthenian dictionaries. The first comparative Greek-Slavonic grammar, the **Adelphotes* (1591), was prepared at the Lviv School and published by the Lviv Brotherhood. One of the school's first teachers was L. *Zyzanii, who compiled a Slavonic grammar and a dictionary in 1596. The pedagogical activity of the Lviv School initiated linguistic scholarship among Ukrainians and subsequently among the East Slavs.

Descriptions of the library of the Lviv School attest to the fact that for other curricular needs brotherhood teachers relied on Polish and Western European publications of Greek and Roman authors (Aesop, Aristotle, Demosthenes, Euripides, Isocrates, Pindar, Horace, Virgil, Ovid, Cicero) and of contemporary Greek and Latin grammari-

ans (G. Cnapius, Clenardi, C. Valer, E. Álvarez). A considerable body of poetry and the first Ukrainian religious drama are direct products of this school's linguistic-literary activity. Among the school's holdings were also contemporary European works on music theory. The library houses a collection of manuscripts of polyphonic choral music by various composers which, according to a 1697 list, make up 87 volumes.

Between 1589 and the mid-17th century the Lviv School's curriculum and educational philosophy were instrumental and influential in the establishment of many brotherhood schools in Ukraine and Belarus. A number of Lviv teachers and administrators (among them, the Latin and Greek instructor Y. Boretsky and the famous lexicographer P. Berynda) subsequently moved to Kiev and laid the foundations of the *Kiev Epiphany Brotherhood School. Throughout the 17th and 18th centuries instructors and alumni of the *Kievan-Mohyla Academy and the Lviv School maintained close professional contacts.

Lviv Elektron Manufacturing Consortium (Lvivske vyrobnyche obiednannia Elektron). A television manufacturing enterprise set up in 1970 on the basis of 10 television plants and 4 research institutes in Lviv and Transcarpathia oblasts. Its largest factory is the Lviv Television Plant (est 1957), which produced 15 models of black-and-white TV sets and 7 models of colored sets, including Ogonek, Elektron, and Elektron-2. The consortium was the first TV manufacturer to introduce an automated production-control system and a complex system of quality monitoring.

Lviv eparchy. A church administrative unit with its see in Lviv. The eparchy had its beginnings as Halych eparchy, founded in the mid-12th century. This eparchy was under the jurisdiction of the Kievan metropolitan, although in 1303 it was elevated to the status of a run metropolity (see *Halych metropolity). It ceased to function as a separate eparchy in the early 15th century and was administered by vicars designated initially by the Kiev metropolitan and later by the Roman Catholic archbishop of Lviv. The Polish king Sigismund I renewed the eparchy in 1539 and named the previous administrator, M. Tuchapsky, as bishop of Halych, Lviv, and Kamianets-Podil'skyi, with his see in Lviv. Ordained by the Kievan metropolitan Makarii II in 1540, Tuchapsky (1540–9) was the first in a long uninterrupted line of Lviv bishops that included A. Balaban (1549–69), G. Balaban (1569–1607), Ye. Tyssarovsky (1607–41), Arsenii Zhelyborsky (1641–63), and Atanasii Zhelyborsky (1663–76). In 1700 Bishop Y. Shumliansky (1646–1708) accepted the Church Union of *Berestia, and the eparchy joined the Greek Catholic church. Uniate bishops of Lviv included V. Sheptytsky (1710–15), A. Sheptytsky (1715–46), L. Sheptytsky (1749–79), P. Biliansky (1780–98), and M. Skorodynsky (1798–1805). In 1807 Halych metropolity was re-established with two eparchies, Lviv and Peremyshl. Since then the Lviv

bishop (later archbishop) has also been metropolitan of Halych.

In 1885 a portion of Lviv eparchy was established as Stanyslaviv eparchy. In 1936 Lviv eparchy included 1,266 parishes and 1,350,000 faithful. After the Second World War the territory of Lviv eparchy was incorporated into the Ukrainian SSR. The Ukrainian Catholic church was suppressed, and the sham *Lviv Sobor of 1946 proclaimed the conversion of the eparchy to Orthodoxy. The eparchy was enlarged with some parishes from Peremyshl eparchy; its name was changed to the Lviv-Ternopil eparchy; and a bishop of the Russian Orthodox church was installed. The Ukrainian Catholic church survived in the underground, however, and on 1 December 1989 it was legalized. At that time V. Sterniuk was recognized as the ordinary of Lviv archeparchy, assisted by bishops F. Kurchaba, M. Sapryha, and Yu. Voronovsky. In March 1992 the eparchy claimed approx 1,000 parishes. The late 1980s also saw the rebirth of the Ukrainian Autocephalous Orthodox church and the establishment of a Lviv eparchy of that church, under Metropolitan I. Bodnarchuk.

W. Lencyk

Lviv Franko Literary Memorial Museum (Lvivskiyi derzhavnyi literaturno-memorialnyi muzei). It was established on 10 October 1940 by the government of the Ukrainian SSR in the building in Lviv where I. *Franko resided from 1902 to 1916, and where he died. The writer's study has been restored. The museum houses a collection of about 4,000 objects, including Franko's manuscripts, photographs, correspondence, and printed works, almost all of which are first-edition copies.

Lviv Gospel (Lvivske yevanheliie). Monument of the Old Ukrainian language written in 1423. It was preserved in the Church of Tithes in Kiev.

Lviv (2nd) Group of the Ukrainian Insurgent Army (Lvivska [2] hrupa UPA Buh). A division of the UPA-West, organized in 1943 out of UPA units operating in the Second Military District, which consisted of the northern and eastern counties of Lviv oblast. In the spring of 1944 its units fought against the Polish Home Army on the northwestern border of Galicia, and in the autumn of 1944 they joined combat against NKVD troops. The largest battle occurred on 29 August near Kariv, Rava-Ruska county, when two UPA battalions and two training companies successfully fended off an attack by NKVD border guards. At its peak strength in late 1944, the Lviv Group had at least seven battalions and many independently operating companies. In 1945 the Second Military District was expanded to include the First Military District with Lviv city and the surrounding counties. It then encompassed the entire Lviv oblast, along with Rohatyn, Rudky, Mostyska, and (partly) Zhydachiv counties. The new district was divided into 5 tactical sectors, numbered from 11 to 15, but the number of combat units in the region was reduced drastically, and by 1947 only platoon-size units were still operating in it. The Lviv Group ran the last UPA school for noncommissioned officers, which graduated a class on 6 December 1946. Two of its combat units, Pereiaslavy and Halaida-II, were active until the summer of 1947. The UPA Supreme Headquarters was located in the district, and Col O. Hasyin and Brig Gen R. Shukhevych fell in battle

there. The group's commanders were Lt O. Lynda (nom de guerre: Yarema, 1943–4) and Maj V. Levkovych (nom de guerre: Vorony, 1944–6).

P. Sodol

Lviv Historical Museum (Lvivskiy istorychnyi muzei). A state museum established in 1940 on the basis of Lviv's Historical Museum (est 1893) and Polish People's Museum (est 1903) and supplemented with collections from the museums of the Shevchenko Scientific Society, the Stauropigion Institute, and the Greek Catholic Theological Academy as well as the National Museum and the Lubomirski Museum. It is housed in three Renaissance buildings (including the Korniakt and Black buildings) in the old market square in the center of the city. Its holdings consist of about 270,000 items, connected mostly with the city's history beginning in the 13th century and with the western oblasts of Ukraine. The museum has four departments: primitive society, feudalism, capitalism, and Soviet society. It has valuable archeological monuments of the Trypillian, Bronze, and Scythian cultures, numismatic and sphragistic collections, and rich collections of weapons, tools, printing presses, manuscripts and incunabula, jewelry, glass, weavings, and prints.

Lviv Institute of Applied and Decorative Art (Lvivskiy institut prykladnoho ta dekoratyvnoho mystetstva). A postsecondary institution, under the jurisdiction of the Ministry of Higher and Specialized Secondary Education, offering a five-year program. It consists of two faculties, applied and decorative arts (with departments of pottery and glassware, and decorative woven textiles and garment designing) and interior decoration (departments of interior and furniture design). Approximately 150 students attend the institute during a given academic year. (In 1961 there were 131 students registered in the day program and 58 in the evening courses.)

The institute was established in 1946 by decrees of the Councils of Ministers of the USSR (13 August 1946) and of the Ukrainian SSR (6 September 1946). Initially the institute fell under the Ministry of Culture of the Ukrainian SSR and consisted of the faculties of applied and decorative arts and applied and graphic arts. The faculty of graphic arts was transferred to the *Kharkiv Industrial Design Institute and the *Kiev Art School. Two sections of the faculty of applied and decorative arts – the departments of monumental decorative painting and of monumental decorative sculpture – were later also transferred to the Kiev Art School. In 1959 a department of garment designing complemented the department of decorative woven textiles. A department of interior design, added in the 1960s, later developed into a faculty. The woodcrafting department was abolished in the late 1970s.

The academic staff of the institute has included the painter V. *Manastyrsky, the painter and graphic artist I. Hutorov, the graphic artist S. Lazeba, and the art historian Ya. Zapasko. Among the graduates of the institute are the ceramist A. Bokotei, the painter Z. Flinta, and the sculptors D. *Krvavych and L. *Terletsky.

B. Medwidsky

Lviv Institute of Forest Technology (Lvivskiy liso-technichniy instytut). A technical school of higher education formed in 1945 and until 1992 under the Ukrainian

SSR Ministry of Higher and Specialized Secondary Education. It contains departments of forestry, forestry engineering, mechanical engineering, and engineering economics, and a correspondence school, an evening school, preparatory courses, a school of continuing education, and graduate-level studies. As of 1979 the institute had approx 7,000 students and had graduated over 16,000 engineers.

Lviv Institute of Physical Culture (Lvivskiy institut fizychnoi kultury). An institute of higher education founded in 1946 on the basis of the Lviv Tekhnikum of Physical Culture. Until August 1991 it was administered by the Committee on Physical Culture and Sport of the Council of Ministers of the Ukrainian SSR. It also acted as a resource center for sports methodology; it assisted sports teams in Ukraine and other parts of the USSR in training programs and in the study of theoretical and administrative questions regarding physical education. It has sports, pedagogical, and correspondence faculties. In 1980–1 the institute had an enrollment of 1,856 students. One of the most notable graduates of the institute was V. *Chukarin.

Lviv Kineskop Manufacturing Consortium (Lvivske vyrobnyche obiednannia Kineskop). An enterprise formed in 1976 out of the Lviv Electric Lamp Plant (est 1940) and the Yavir Plant. The former began to manufacture picture tubes for TV sets in 1954, the first to do so in the USSR. Its tubes were used in the Lviv, Verkhovyna, Syhnal, Ogonek, Elektron, Horyzont, and Krym television sets. Since 1967 it has manufactured large tubes for colored sets, and since 1977, small tubes for portable colored sets. The Yavir Plant manufactures automated infrared heating equipment and ultraviolet irradiation devices.

Lviv Medical Institute (Lvivskiy medychniy instytut). A higher teaching institution, until 1992 under the Ministry of Health of the Ukrainian SSR. It was formed in 1939 out of the medical faculty of Lviv University, which was itself established in 1894 out of the Lviv Collegium Medicum (est 1773). The first institute of *medical education in Ukraine, the Collegium Medicum was incorporated into the medical faculty (est 1784) of the university in 1817. Under both Austrian and Polish rule in Galicia, the number of Ukrainian medical students was restricted. The Lviv Medical Institute graduated 495 physicians in its first two years (1939–40). It consists of six faculties – internal medicine, pediatrics, hygiene, stomatology, pharmacology, and continuing medical education – and 74 departments. It has three museums (anatomy, human diseases, and the history of the institute), a large library (500,000 vols), and four dispensaries, and it oversees 5,000 hospital beds. Its faculty has included O. *Makarchenko, D. *Panchenko, and Ya. Parnas. The enrollment is over 5,000.

Lviv Mikroprylad Manufacturing Consortium (Lvivske vyrobnyche obiednannia Mikroprylad). An instrument-building enterprise formed in 1975 out of the Lviv Plant of Electric Measuring Devices (est 1946), the Omega Plant in Sambir, the Vymiriuvach Plant in Ostriv, the Modul Plant in Peremyshliany, the Kvant Plant in Sokal, and a design office for microelectronics and instrument-making. It produces over 150 devices, including

electric measuring instruments, parts for automated systems, and computing technology.

Lviv Museum of Folk Architecture and Folkways. See Museums of folk architecture and folkways.

Lviv Museum of Ukrainian Art. See National Museum.

Lviv oblast. An administrative territory on the western edge of Ukraine, established by the Soviet regime on 4 December 1939. Its area of 21,800 sq km is divided into 20 raions, 483 rural councils, 41 cities, and 36 towns (smt). Its 1989 population was 2,727,400. The oblast center is *Lviv.

Physical geography. Most of the oblast consists of the rolling hills of the Volhynia-Podilia Upland, which rises toward the northwest to form the Holohory watershed. South of the upland lie the Sian and Dniester lowlands and then the foothills of the Carpathian Mountains. The southern rim of the oblast is occupied by the Middle and High Beskyd of the Carpathians. In the north the soil is mostly degraded chernozems and gray and dark gray forest podzolized soils; in the northeast, deep chernozems; in Subcarpathia, clayey and peat podzolic soils; in the Carpathians, brown soils and mountain meadow soils; and in the river valleys, alluvial bog soils. Forests consisting mainly of beech, fir, and pine in the mountains and oak, beech, and ash in the lowlands cover approx 545,000 ha, or 29 percent of the oblast's territory. The oblast is rich in mineral resources, including oil, natural gas, coal, potassium and rock salt, ozocerite, peat, limestone, sandstone, marl, gypsum, clays, and mineral waters. It is drained by two river systems: the Dniester River, with its right tributaries (the Bystrytsia, the Stryi, and the Svicha) and left tributaries (the Vereshchytzia, the Stryvior, the Zubra, and the Svirzh), and the Styr River, a tributary of the Prypiat, drain into the Black Sea; the Sian with its tributaries (the Vyshnia and the Shklo) and the Buh, with the Poltva, the Rata, and the Solokiia, drain into the Baltic Sea. There are numerous lakes in the oblast, especially in the Dniester Valley. The climate of the oblast is temperate continental: temperatures in the lowlands average -4°C in January and 18.3°C in July, and in the mountains, -6°C and 12.8°C respectively. The annual precipitation is 700 mm (up to 1,000 mm in the mountains), and the growing season lasts up to 210 days a year.

History. Until the 12th century the territory of the present oblast was part of Kievan Rus'. When the realm splintered into small principalities in the 11th and 12th centuries, the western section of the oblast's territory became part of Peremyshl principality, the eastern section, part of Zvenyhorod principality, and the northern and central sections, part of Volodymyr-Volynskiy principality. In the second half of the 12th century the territory of today's oblast was consolidated within Halych principality and then the Principality of Galicia-Volhynia. In the 13th and 14th centuries the land was ravaged by the Tatars but never completely conquered. It was annexed by the Poles in 1349 and remained under Polish rule until the 18th century. At the first partition of Poland in 1772, the Lviv territory was acquired by Austria. During the First World War it was briefly a part of the Western Ukrainian National Republic, and after the postwar settlement it was again under Poland. In the interwar period the territory consti-

tuted the eastern part of Lviv voivodeship. It was occupied by the Soviet army in 1939, reorganized into Lviv oblast, and recaptured from the Germans in 1944.

Population. The population of the oblast grew by 6.3 percent in 1969-79 and by 6.2 percent in 1979-89. Its density in 1989 was 125.1 persons per sq km. It is the most urbanized of the western oblasts. The proportion of the urban population rose steadily, from 42.4 percent in 1963 to 47.3 percent in 1970, 53.2 percent in 1979, and 59 percent in 1989. The ethnic composition of the population has changed slightly in favor of Ukrainians during the last 30 years: in 1989 (1959 figures in parentheses) Ukrainians accounted for 90.4 percent (86.3) of the population, Russians for 7.2 percent (8.6), and Poles for 1 percent (2.8). In 1989 the four largest cities in the oblast were Lviv (786,900), Drohobych (78,000), Chervonohrad (72,000), and Stryi (67,000).

Industry. Industry accounts for over 80 percent of the goods and services produced by the oblast. Its main branches are machine building and metalworking (43.4 percent of the industrial output in 1988), food processing (16.8 percent), light industry (13 percent), fuel and energy (8.2 percent), chemicals and petrochemicals (7.7 percent), forest products (4.5 percent), and building materials (3 percent). The chief centers of the machine-building and metalworking industries are Lviv (buses, mobile cranes, conveyors, television and radio sets, appliances, diamond instruments, milling machines, and farm machinery), Drohobych (mobile cranes, chisels), Stryi (metalworking presses, locomotive repairs), and Khodoriv (printing presses). The key branches of the food industry are sugar refining (Khodoriv, Sambir, Krasne, Zolochiv, and Radekhiv), meat packing (Lviv, Zolochiv, Boryslav, and Stryi), dairying (Lviv, Chervonohrad, and Drohobych), vegetable-oil and lard processing (Lviv), brewing (Lviv), and confectionery (Lviv). The light industry consists mainly of clothes manufacturing (Lviv, Chervonohrad, Drohobych, Stryi, and Sambir), textiles (Boryslav, Lviv), and footwear (Lviv, Boryslav, Drohobych, and Stryi). For energy the oblast depends on its Dobrotvir Regional Electric Station and the Lviv and Boryslav thermoelectric centers, the wells of the *Subcarpathian Petroleum and Natural Gas Region, and the mines of the *Lviv-Volhynia Coal Basin. The chemical and petrochemical industry produces sulfur (Novyi Rozdol and Novoiavorivske), chemical (Novyi Rozdol) and potassium fertilizers (Stebnyk), synthetic fibers (Sokal), and paint (Lviv and Boryslav). Woodworking and furniture manufacturing are centered in Lviv, Drohobych, Dobromyl, Saryi Sambir, Stryi, Sambir, Skole, and Kamianka-Buzka, and cellulose and paper manufacturing, in Zhydachiv and Lviv. The building-materials industry consists mostly of cement production (Mykolaiv), concrete and reinforced-concrete structures manufacturing (Lviv, Chervonohrad, and Drohobych), and glass- and porcelain-making (Lviv, PISOCHNE, Nesterov, and Boryslav).

Agriculture. In 1988 the agricultural sector of Lviv oblast was organized into 306 collective farms, 90 state farms, 10 agroindustrial complexes, 8 agroindustrial associations, 2 agroindustrial co-operative associations, 6 agrofirms, and 2 agrocommercial international enterprises. Of the 1,267,000 ha of farmland (in 1987), 861,000 ha were cultivated land, 155,000 ha were hayfields, and 229,000 ha were pasture. The seeded land was devoted

mostly to feed crops (371,000 ha) and grains (326,000 ha), but potatoes and vegetables (92,000 ha) and industrial crops (86,000 ha) were raised also. Winter wheat and spring barley are the chief grains, and sugar beets and flax the chief industrial crops, grown in the oblast. The principal fruits are apples, pears, plums, and cherries. Animal husbandry accounts for over 60 percent of the oblast's agricultural output. It consists mainly of dairy- and beef-cattle farming as well as hog, sheep, and goat raising. Poultry farming, fishing, and beekeeping are practiced widely.

Transportation. In 1989 there were 1,309 km of railway, 763 km of them electrified, in the oblast. The main railway lines are Kiev–Zdolbuniv–Lviv–Stryi–Chop, Kiev–Ternopil–Lviv, Lviv–Sambir–Uzhhorod, Stryi–Drohobych–Sambir, Lviv–Chervonohrad–Volodymyr–Volynskyyi, and Lviv–Khodoriv–Ivano–Frankivske. The main junctions are Lviv, Krasne, Sambir, Chervonohrad, and Stryi. There are 8,000 km of motor highways and roads, 7,400 km of which are paved. The main highways are Kiev–Rivne–Lviv–Stryi–Mukachiv, Lviv–Ternopil, Lviv–Sambir–Uzhhorod, Lviv–Mostyska–Peremyshl, and Lviv–Ivano–Frankivske. There is an airport in Lviv. The Druzhba oil pipeline and the Braterstvo gas pipeline run through the oblast to Eastern Europe.

BIBLIOGRAPHY

Rozkvit ekonomiky zachidnykh oblastei URSS (1939–1964 rr.) (Lviv 1964)

Lviv Oblast Ukrainian Music and Drama Theater

(Lvivskyyi oblasnyi ukrainskyi muzychno-dramatychnyi teatr). A theater established in Drohobych in 1939. The cast originally consisted of local amateurs and young actors from eastern Ukraine. In 1941–4 the theater was reorganized into a professional musical-drama theater, with the directors R. Tymchuk and, later, Y. Stadnyk, the musical director B. Piurko, and the administrator Yu. Sherehii, and a varied repertoire, including M. Tsukanov's *Prolisky* (The Snowdrops), Yu. Kosach's *Obloha* (The Siege), F. Lehár's *Land of Smiles*, and M. Arkas's *Kateryna*. Since 1945 its repertoire has been dominated by Soviet Ukrainian and Russian plays. In 1987 its artistic director was F. Makulovych.

Lviv Opera Theater (Lvivskyyi opernyi teatr). A theater that existed during the German occupation in 1941–4 under the management of A. Petrenko, with V. *Blavatsky as principal director. It was installed in the former Municipal Theater and was a virtual successor to the *Lesia Ukrainka Theater. During the short time of its existence, the Lviv Opera Theater was the most eminent theater in Ukraine. Its drama troupe (directed by Blavatsky and Y. *Hirniak) included the renowned Galician actors O. Kryvytska, V. Levytska, S. and S. Stadnyk, H. Sovacheva, M. Stepova-Karpiak, I. Rubchak, and B. Pazdrii. The theater produced W. Shakespeare's *Hamlet* for the first time on a Ukrainian stage (1943); M. Halbe's *The River*; Lesia Ukrainka's *Kaminnyi hospodar* (The Stone Host), *Na poli krovi* (On the Field of Blood), and *Iohanna zhinka Khusova* (Joanna, Wife of Chuza); and M. Kulish's *Myna Mazailo*. The opera troupe (musical director, L. Turkevych; concertmaster, M. Lysenko; choirmaster, Ya. Boshchak; choreographer, Ye. Vigilov; scenery designer, M. Radysh) had considerable success with the European repertoire, including G. Ver-

di's *Aida*, *La Traviata*, and *Il Trovatore*, G. Bizet's *Carmen*, G. Puccini's *Tosca* and *Madame Butterfly*, R. Leoncavallo's *I Pagliacci*, B. Smetana's *Bartered Bride*, and C. Gounod's *Faust*. Notable soloists included Ye. Pospieva, L. Chernykh, Z. Dolnytsky, I. Romanovsky, O. Rusnak, and V. Tysiak. The Lviv Opera Theater also produced classical ballets and operettas (musical director, Ya. Barnych). Most of its actors had fled Ukraine by 1944, and continued their work in the Ensemble of Ukrainian Actors in Germany and, after emigrating to the United States, in the *Ukrainian Theater in Philadelphia and the *Theater-Studio of Y. Hirniak and O. Dobrovol'ska.

W. Wytwycky

Lviv Polytechnical Institute

Lviv Polytechnical Institute (Lvivskyyi politekhnichnyi instytut). The oldest technical school of higher education in Ukraine, founded as a technical academy in 1844 on the basis of an Austrian Realschule. From 1872 it was called the Lviv Higher Polytechnical School and from 1921 the Lviv Polytechnic; in 1939 it acquired its present name. In 1919 the Dubliany Agricultural Academy (est 1891) and the Lviv School of Forestry (est 1874) were incorporated into the institute's Department of Agriculture and Forestry. In 1922–5 the Lviv (Underground) Ukrainian Higher Polytechnical School was run by Ukrainians to counter the discriminatory, anti-Ukrainian educational policies of the Polish authorities.

In 1985 the institute had departments of electrical energy, electromechanics, mechanical engineering, mechanical machine building, automation, electrophysics, construction engineering, geodesics, architecture, radio engineering, chemical technology, heating technology, organic substances technology, engineering economics, and general engineering, as well as a graduate school. It had branches in Ternopil, Lutske, Drohobych, Chervonohrad, and Novovolynske. Its library had approx 1.9 million volumes (1980). In 1985–6 the institute had approx 30,000 students. The main building housing the institute in Lviv was designed (1873–7) by J. Zacharjewicz.

Lviv Prohres Manufacturing Consortium (Lvivske vyrobnyche obiednannia Prohres). A footwear manufacturing enterprise set up in Lviv in 1961 and known until 1976 as the Prohres footwear plant. In 1980 it consisted of

the Lviv Footwear Factory No. 3 and similar factories in Stryi, Boryslav, Kulykiv, Lutske, and Terebovlia. The consortium produces men's and women's footwear for various age-groups and several lines of model footwear. It has a research laboratory and an automated system of quality control.

Lviv Russian Drama Theater (Lvivskyi rosiiskyi dramatychnyi teatr). Established in 1931 in Kiev as the Theater of the Kiev Military District. It was renamed several times. In 1941–4 it performed outside of Ukraine (mainly in Siberia), and in 1944–53 it was the Theater of the Odessa Military District. Since 1954 it has been stationed in Lviv under its present name. All of its performances have been in Russian. Its artistic directors were Yu. Lishansky (1931–40) and V. Lyzohub (1958–63); in 1987 the director was A. Rotenshtein.

Lviv Scientific Library of the Academy of Sciences of Ukraine

Lviv Scientific Library of the Academy of Sciences of Ukraine (Lvivska naukova biblioteka Akademii nauk Ukrainy im. V. Stefanyka). The Lviv branch library of the *Central Scientific Library of the AN URSS (now ANU) in Kiev. It was established in January 1940, after the Soviet occupation of Western Ukraine, by the appropriation of the library collections of the *Shevchenko Scientific Society (207,900 vols, 2,250 geographic and historical charts and maps, and 1,500 manuscripts and individual parchments), the *People's Home in Lviv (120,000 vols and 5,000 manuscripts), the *Ossolineum Institute (297,460 vols and 6,270 manuscripts), the Baworowski Foundation (founded in 1856 on the basis of the Stadnicki family's and D. Zubrytsky's collections, 55,000 vols), the Dzieduszycki collection, the Lviv Jewish Community Library, the St Onuphrius's Church and Monastery, and 76 other state, public, private, and theological libraries. As the Lviv branch library of the AN URSS, it was transformed in 1941–2 by the German occupational authorities into the Lviv State Library (Lemberger Staatsbibliothek). In 1944 the retreating German forces removed a part of the early manuscript collection, some of which was later turned over to various state libraries in Warsaw and Wrocław. In 1944 the library once again became the Lviv Library of the AN URSS; in June 1963 it was renamed the Lviv State Scientific

Library and placed under the jurisdiction of the Ministry of Culture of the Ukrainian SSR; in 1969 it was returned to the jurisdiction of the AN URSS; and in 1971 its name was amended in honor of the Ukrainian writer V. Stefanyk. In January 1971 the Stefanyk Library (as it is popularly known) contained over 5.5 million items (books, letters, journals, posters, maps, incunabula, and graphics, including 100,000 manuscripts dating from the 15th century). With its four branches (all located in Lviv) it has the most complete collection of materials on the sociopolitical, economic, and cultural life of Galicia and represents one of the former Soviet Union's largest libraries. Many of the materials are still housed in their original (pre-Soviet) premises.

Lviv Sobor of 1946 (Lvivskyi sobor). The central formal event in the annexation of Halych metropoly of the Ukrainian (Greek) Catholic church by the Moscow patriarchate and the Russian Orthodox church following the Soviet occupation of Western Ukraine. Held on 8–10 March 1946 in St George's Cathedral in Lviv, the sobor was the culmination of a lengthy campaign against the church. Some preparatory work – particularly the probing of political, ideological, and personality differences within the Ukrainian Catholic church – had been undertaken by the Soviet authorities during their first occupation of Galicia in 1939–41. The cohesiveness of the Ukrainian Catholic church structure, however, and the exposed strategic location of Galicia on a frontier with German-occupied territories made any campaign of 'reunification' with the Russian Orthodox church politically untenable. Postwar conditions were considerably different. The death of Metropolitan A. *Sheptytsky (1 November 1944), the spiritual leader of Ukrainian Catholics, had left the church without a strong figurehead, and the extension of Soviet influence over the entire Eastern bloc had diminished Galicia's relative strategic significance. Moreover, the Soviet authorities could conveniently employ charges of 'treason to the Fatherland' against the Ukrainian Catholic church because of the moral support it had lent to anti-Soviet Ukrainian groups during the German occupation of Ukraine. Thus the stage was set for a campaign against the church which ultimately led to its formal liquidation in 1946 at the Lviv Sobor.

The Lviv Sobor set the stage for similar actions in Transcarpathia (1949) and Czechoslovakia (1950). The case of the Halych metropoly, however, was of particular significance, partly because of the sheer size of the metropoly, with (according to 1938 statistics) 2,354 diocesan and monastic priests, at least 315 brothers, 929 nuns, and 3.4 million faithful. More significant was the potential political challenge the church represented because of its traditional role as a bulwark of Ukrainian national consciousness in the newly annexed region.

Events immediately following the Soviet occupation seemed to indicate that a *modus vivendi* might be reached between the church and the Soviet authorities. An elaborate funeral was allowed for Metropolitan A. Sheptytsky

after his death on 1 November 1944, and the Soviet press noted the installation of Y. *Slipy as the new metropolitan of Halych. In turn, a Ukrainian Catholic delegation went to Moscow in December 1944 for discussions with Soviet officials about the normalization of the church's status, and also paid a courtesy visit to the Moscow patriarchate. The situation had changed dramatically, however, by the early spring of 1945. In the wake of the church's refusal to partake in Soviet propaganda efforts, particularly those denouncing the Ukrainian nationalist movement, the official press published articles and pamphlets (notably those written by the publicist Ya. *Halan) which attacked the Ukrainian Catholic church and accused it of subversive acts. Soon afterwards (11 April 1945) Metropolitan Slipy and Bishops H. Khomyshyn, M. Charnetsky, N. Budka, and I. Liatyshevsky were arrested, and later (in June 1946) they were sentenced to lengthy terms in forced labor camps for their purported 'traitorous activities and collaboration with the German occupation forces.' At the same time the Soviet authorities took measures to block the election by the Ukrainian Catholic clergy of capitular vicars to administer the vacant sees, thus rendering the church leaderless.

A government-approved 'Sponsoring Group for the Re-Union of the Greek Catholic Church with the Russian Orthodox Church' emerged publicly on 28 May 1945 and proclaimed itself as the only legally constituted leadership of the Ukrainian Catholic church. In spite of a letter of protest from some 300 Ukrainian Catholic clergymen, the sponsoring group was officially given an exclusive jurisdiction over the church by Soviet Ukrainian authorities on 18 June 1945. Likewise, the newly appointed Russian Orthodox bishop for Western Ukraine, Makarii (Oksiuk), was instructed to 'assist' the group in its efforts. The Sponsoring Group consisted of three priests, representing each of the metropolys' eparchies: H. *Kostelnyk (the Lviv-based chairman and a well-known critic of the Vatican's policy toward the Uniate church), M. Melnyk (vicar-general of Peremyshl eparchy), and A. Pelvetsky (a dean in Stanyslaviv eparchy). The three priests led an intensive campaign to convince the Galician clergy of the benefits of 'reunification,' focusing mainly on the political realities of living under the new Soviet regime and on dissatisfaction with the Latinizing elements within the Uniate church. Priests who were not convinced by these arguments were subjected to less subtle persuasion by Soviet security officials, through direct threats, deportation, or summary sentences to terms in forced labor camps. By March 1946 a total of 986 priests (over 50 per cent of the clergy) had been convinced to support the 'reunification.' Of the remaining 'recalcitrant' priests in Galicia, only 281 were reported to be still at large; others either had been imprisoned or deported or had gone into hiding.

With overt public resistance from the clergy now unlikely, the road was almost clear for completion of the 'reunification' process. The one remaining obstacle was the canonic need for the participation of bishops in convening and conducting a church sobor. Since none of the imprisoned Ukrainian Catholic bishops would succumb to Soviet pressure to convert to Orthodoxy, the Moscow patriarchate undertook the extraordinary action of ordaining two of the Sponsoring Group leaders, Pelvetsky and Melnyk, as Orthodox bishops in February 1946.

The sobor itself was a carefully staged showpiece. Set to

coincide with the 350th anniversary of the Union of *Berestia, which had given birth to the Uniate church, its proceedings were covered by Soviet film crews and reporters. A total of 216 clerical and 19 lay delegates were 'invited' to participate. The agenda of the proceedings was not announced until the commencement of the sobor, following the pronouncement by the leaders of the Sponsoring Group that they had appointed themselves as the presidium of the gathering. The first day of the session consisted of the Sponsoring Group's reports and its presentation of a draft resolution abolishing the Union of Berestia and 'returning' the metropolys to the Russian Orthodox church. With no further discussion, the resolution was adopted 'unanimously' by a show of hands. Only then did Kostelnyk reveal to the delegates that Pelvetsky and Melnyk had been ordained as Orthodox bishops. The remaining two days of the sobor were taken up with ceremonial aspects of the 're-union,' the approval of earlier-prepared political messages to state authorities, and a plea to the clergy and faithful of the Ukrainian Catholic church to accept the new state of affairs.

The sobor was followed by a wave of repression against those priests and monks who had refused to accept the 're-union.' The Ukrainian Catholic church, as such, became an illegal, catacomb organization. Extensive popular resistance was demonstrated against the new situation as many parishes refused to allow Russian Orthodox clergymen into their churches. In September 1948 the Sponsoring Group leader, Kostelnyk, was assassinated in Lviv, allegedly by a 'Vatican-nationalist' agent; in fact, all indications are that this act was masterminded by the Soviet authorities. The leading polemicist against the Ukrainian Catholic church, Halan, was killed by Ukrainian nationalists in October 1949. In 1972 the 'reunion' of the Greek Catholic church was ratified by the local sobor of the Russian Orthodox church. In the West the uncanonical nature of the Lviv Sobor was noted, and the liquidation of the church roundly condemned by Catholic authorities, most notably by the papal encyclical *The Oriental Churches* of 15 December 1958 and, later, at the meeting of the synod of the Ukrainian Catholic bishops in Rome in 1980. On 1 December 1989 the Ukrainian Greek Catholic church was legalized by the authorities of the Ukrainian SSR.

Lviv Svitoch Consortium of the Confectionery Industry (Lvivske vyrobnyche obiednannia kondyterskoi promyslovosti Svitoch). An enterprise formed in 1962 out of several confectionery factories in Lviv oblast. It manufactures over 300 varieties of confectionery, including candies, caramels, chocolates, jams, and waffles. Its gross output is 52,000 t per year.

Lviv Synod (Lvivskyi synod). The *synod of the Galician province of the Greek (Ukrainian) Catholic church which took place in Lviv on 22 September to 8 October 1891. It

was convened by Metropolitan S. *Sembratovych, and its express intention was to reform church practices that had existed since the *Zamostia Synod of 1720. Under the chairmanship of an apostolic legate, the participants in the Lviv Synod included Sembratovych, bishops Yu. Pelesh (Peremyshl) and Yu. Kuilovsky-Sas (Stanyslaviv), the members of the canonical chapters in all three eparchies, the archimandrite and superiors of the Basilian order, noted theologians, eminent priests, and the senior of the Stauropigion Institute, I. Sharaneyvych.

The synod determined the number of feast days and fasts during the year and reached agreements on several contentious issues, including church discipline and the manner of conducting the Liturgy. The two main currents in the church – the traditionalist Eastern and reformist Western – disputed the question of a mandatory celibate clergy, which was rejected by the synod. The synod, however, did oblige priests to follow the Latin practice and to recite the priest's breviary in their daily routines.

In spite of losing some minor prerogatives, the Halych metropolitan emerged from the Lviv Synod with powers comparable to those afforded to a Latin rite metropolitan by the Council of Trent. He could determine the manner of ordinations, and supervise the affairs of eparchies in his metropolity. The decisions of the synod were printed in Ukrainian and Latin with a large addendum. They were confirmed by Rome in 1895 with some changes, which were made by Sembratovych himself in response to pressure from Polish and Vatican officials. The decisions of the Lviv Synod were adopted by Ukrainian Catholic church jurisdictions beyond Galicia, including Transcarpathia, the United States, and Canada, as a particular church law.

Lviv Theater of Opera and Ballet

Lviv Theater of Opera and Ballet (Lvivskiy teatr opery ta baletu im. I. Franka). Founded in 1940 in the former Lviv Municipal Theater built in 1900 by the architect Z. Gorgolewski. It functioned until 1941 (see *Lviv Opera Theater), and then was re-established under the new Sovi-

Lviv Theater of Opera and Ballet: view of the balcony and ceiling in the auditorium

et regime in Lviv. The theater staged productions of the classical European repertoire and of Ukrainian and contemporary works, including M. Lysenko's *Taras Bulba* and *Utoplena* (The Drowned Maiden), K. Dankevych's *Bohdan Khmel'nytskyi*, Yu. Meitus's *Moloda Gvardiia* (The Young Guard) and *Ukradene shchastia* (Stolen Happiness), V. Kyreiko's *Lisova Pisnia* (The Forest Song), A. Kos-Anatolsky's *Zahrava* (Incandescence) and his ballet *Soichyne krylo* (The Jay's Wing), and B. Liatoshynsky's *Zoloty obruch* (The Golden Ring). Opera soloists included P. Duma, P. Karmaliuk, N. Shevchenko, V. Herasymenko, Z. Holovko, M. Popil, and Yu. Lysiansky. Ballet soloists included N. Slobodian, M. Tryhubiv, and O. Stalinsky. The conductors were Ya. Voshchak and Yu. Lutsiv, and the directors were O. Hrechnov and S. Smiian. The scenery designers were F. Nirod and O. Salman.

Lviv Trade and Economics Institute (Lvivskiy torhovelno-ekonomichnyi institut). A higher educational institute administered by the Central Association of Consumer Co-operatives (Tsentrospilka). Founded in 1939, it teaches economists about trade, accounting, finances, and commodity management. In 1979 the institute had 2,700 full-time and 2,980 corresponding students. Its library contains over 500,000 titles.

Lviv Ukrainian Drama Theater (Lvivskiy ukrainskyi dramatychnyi teatr im. M.K. Zankovetskoi). Founded in 1922 as the Zankovetska Theater from the cast of the State *People's Theater in Kiev, it has been one of the foremost drama theaters in Ukraine. In 1923–31 it worked as a *touring theater in the Donets and Poltava regions, and in 1931–41, as the resident drama theater in Zaporizhia. During the war it worked in Tobolsk, Siberia, and since 1944 it has been based in Lviv.

During the 1920s it used renowned Ukrainian actors in the staging of world classics. As a guest director P. *Saksahansky staged F. Schiller's *Die Räuber* (1922) and W. Shakespeare's *Othello* (1926); as well, the theater staged Molière's *Tartuffe*, C. Goldoni's *La Locandiera*, L. de Vega's *Fuenteovejuna*, J. Słowacki's *Mazepa*, and K. Gutzkow's *Uriel Acosta*. From the Ukrainian classics it staged an adaptation of P. Kulish's novel *Chorna rada* (The Black Coun-

Lviv Ukrainian Drama Theater

cil) and M. Starytsky's *Ostannia nich* (The Last Night). S. Cherkasenko's *Zemlia* (The Land), V. Vynnychenko's *Chuzhi liudy* (The Foreigners), *Memento*, and *Dysharmoniiia* (Disharmony), and Lesia Ukrainka's *U pushchi* (In the Wilderness) were staged from the modern Ukrainian repertoire; Ya. Mamontov's *Do tretikh pioniv* (Until the Third Crowing of the Cocks), *Rozheve pavutyynnia* (The Pink Web), *Respublika na kolesakh* (Republic on Wheels), *Kniazhna Viktoriia* (Princess Victoria), and *Ioho vlasnist'* (His Property), I. Kocherha's *Feia hirkoho myhdaliu* (The Fairy of the Bitter Almond) and *Marko v pekli* (Marko in Hell), and M. Irchan's *Rodyna shchitkariv* (The Family of Brush Makers) and *Pidzemna Halychyna* (Underground Galicia), from the contemporary playwrights; and O. Mirabeau's *Les Mauvais Bergers*, M. Pagnol and P. Nivoix's *Les Marchands de gloire*, and J. Synge's *The Playboy of the Western World*, from the new Western European repertoire. With the beginning of Russification in the 1930s a leading place was given to dramas by O. Korniiuk, I. Mykytenko, and L. Pervomaisky and to numerous Soviet Russian playwrights, but to only one play from the non-Soviet repertoire, S. Kingsley's *Men in White*.

In Lviv from 1944, the theater staged Soviet patriotic productions, such as I. Chabanenko's *Na Ukraïni mylii* (In Dear Ukraine), L. Smiliansky's *Muzhyts'kyi posol* (The Peasant Representative), and L. Pervomaisky's *Dovbush*. It also staged contemporary plays, such as J. Priestley's *They Came to a City*. Later, notable Ukrainian productions were an adaptation of I. Franko's novelette *Boryslav smiiet'sia* (Boryslav Is Laughing, 1951) and his *Son kniazia Sviatoslava* (The Dream of Prince Sviatoslav, 1957), adaptations of T. Shevchenko's poems *Haidamaky* (1963) and *Maryna* (1964), Lesia Ukrainka's *Blakytna troianda* (The Azure Rose, 1968), M. Kulish's *Maklena Grasa* (1967), an adaptation of I. Vilde's novel *Sestry Richyns'ki* (The Richynsky Sisters), O. Levada's *Faust i smert'* (Faust and Death), I. Riabokliach's *Mariia Zan'kovets'ka*, an adaptation of P. Kozlaniuk's trilogy *Iurko Kruk*, V. Vrublevska's *Kafedra* (The Department, 1980), and M. Zarudny's *Obochyna* (The Roadside). Shakespearean tragedies performed have included *Hamlet* (1956), *King Lear* (1969), and *Richard III* (1974). The theater also staged an adaptation of G. Boccaccio's *Decameron* (1982) and, from the modern repertoire, J.

Lviv Ukrainian Drama Theater: poster advertising performances of W. Shakespeare's *Othello*

London's *Theft* and F. Molnár's *The Devil*. Recent productions include A. Vakhnianyn's operetta *Eve of Kupalo*, a *vertep-style *Oi raduisia, zemle* (O Rejoice, Earth), and M. Kulish's *Narodnii Malakhii* (The People's Malakhii).

The theater's main founders were B. Romanytsky (artistic director until 1948), O. Korolchuk, V. Yaremenko, and V. Liubart. Its directors have been I. Chabanenko, V. Kharchenko, B. Tiahno, V. Hrypych, S. Danchenko, A. Kravchuk, and F. Stryhun (since 1987); its scenery designers, Yu. Stefanchuk, V. Borysovets, and M. Kyprian (since 1963 the main designer); and its actors, D. Dudariv, V. Danchenko, V. Polinska, N. Dotsenko, F. Haienko, D. Kozachkivsky, O. Hai, I. Rubchak, O. Kryvytska, B. Stupka, L. Kadyrova, B. Kozak, I. Lytvynenko, M. Hryenko, and V. Maksymenko.

Lviv Ukrainian Independent Theater (Ukrainskyi nezaleznyi teatr). Established in May 1920 in Lviv by members of the Theater of the Supreme Command of the Ukrainian Galician Army, under the administration of H. Nychka and artistic directorship of M. Bentsal. Under the auspices of the Ukrainska Besida society it staged 12 plays from the modern Ukrainian and Western repertoire. In August 1921 it joined the cast of the reborn Ukrainska Besida Theater.

Lviv Ukrainian Youth Theater-Studio (Lvivskyi ukrainskyi molodizhnyi teatr-studiia, or LUMT). A contemporary professional troupe founded in Lviv in March 1988, with V. Kuchynsky as artistic director, A. Matsiak as director, A. Humeniuk as designer, and a cast composed mainly of young actors who had left the *Lviv Ukrainian Drama Theater. LUMT concentrates on teaching and developing the L. *Kurbas method of 'image transformation,' enhanced by contemporary theatrical approaches, workshop study, and experimentation. The LUMT productions are expressive; they integrate poetic metaphor, psychological character interpretation, music, mime, and modern stage design, scenery, and choreography. The repertoire includes poetic interpretations of the works of V. Stus; L. Kostenko's *Sad netanuchykh skul'ptur* (The Garden of Un-

melting Sculptures), *Nich u Florentsii* (A Night in Florence), and *Proshcha* (A Pilgrimage, based on *Marusia Churai*); V. Vynnychenko's *Mizh dvokh syl* (Between Two Powers) and *Zakon* (The Law); S. Mrožek's *Tango*; and Lesia Ukrainka's *Na poli krovi* (In a Field of Blood). Among the leading actors are T. Kaspruk, O. Drach, O. Oleksyshyn, O. Hrechanovsky, and N. Polovynka. The LUMT is Ukraine's only 'uncategorized' theater. In 1989 it was the first recipient of the Vasyl Stus Award.

Lviv (Underground) Ukrainian Higher Polytechnical School (Lvivska [taiemna] ukrainska vysoka politekhnichna shkola). An institution of higher education established in 1922–3 at the *Lviv (Underground) Ukrainian University. The program consisted of one-year general courses in theoretical subjects, which had to be continued by studies abroad, usually in Danzig (*Gdańsk). There were three departments – general studies, engineering, and forestry – modeled on the Danzig Polytechnic and the Příbram Mining Academy in Czechoslovakia (forestry department). The rector was V. Luchkiv; there were 64 students. In 1925 the school ceased operations in conjunction with the closure of the university.

Building of the Lviv (Underground) Ukrainian University (1921–5) and the Shevchenko Scientific Society (to 1939), now the Institute of Social Sciences of the Academy of Sciences of Ukraine at Lviv University

Lviv (Underground) Ukrainian University (Lvivskyi [taiemnyi] ukrainskyi universytet). An institution of *higher education established in July 1921 on the basis of university courses initiated in September 1919 by the *Shevchenko Scientific Society, the *Mohyla Scholarly Lectures Society, and the *Stauropegion Institute. The courses were instituted because the Polish authorities had abolished all Ukrainian chairs and teaching positions at *Lviv University in 1919 and had made higher education available exclusively to Polish citizens and citizens of Allied states who served in the Polish or Allied armies. When the government banned Ukrainian courses in 1920, a clandestine program of instruction in the humanities, law, and medicine was undertaken, and a boycott of Polish higher educational institutions was announced. The first rector was V. *Shchurat; he was followed by M. *Panchyshyn and Ye. Davydiuk. There were 54 departments and 1,260 students in 1921, and 65 departments and 1,500 students in 1922–3. The Faculty of Medicine offered only a two-year program; it had to be continued by

studies abroad. Virtually all Ukrainian scholars and professionals living in Lviv taught at the university, which was financed by private donations. The program was recognized by foreign universities.

In February 1923 the Board of Ukrainian Higher Schools was established to supervise the university and the *Lviv (Underground) Ukrainian Higher Polytechnical School. It proposed the legalization of the university, which proposal led to negotiations in 1924–5 involving K. *Studynsky and R. *Smal-Stotsky on the Ukrainian side and S. *Grabski, S. Łoś, and T. Waryński on the Polish. A government commission studied the proposal, but it received scant support and was undermined by the relentless persecution of Ukrainian education in Poland. Denied official recognition, the university ceased operations in late 1925.

M. Yurkevich

Lviv University, main building

Lviv University (Lvivskyi universytet im. I. Franka). The oldest university in Ukraine, established in 1784 by the emperor of Austria Joseph II with Latin as the language of instruction. Candidates for the priesthood who knew no Latin could study in the vernacular, but only after the establishment of the *Studium Ruthenum in 1787. In 1805 the university was transformed into a *lyceum, and in 1817 the university status was restored, the institution was renamed in honor of Emperor Francis I, and German became the language of instruction. During the Revolution of 1848–9 in the Habsburg monarchy, demands were raised for the introduction of the Ukrainian and Polish languages. In 1849 the chair of Ukrainian language and literature was established (first held by *Ya. Holovatsky). Ukrainian-language instruction was introduced in the second half of the 19th century, first in the Department of Theology and then of Law (1862–72). From 1867 the struggle for the language and character of the university began between Ukrainians and Poles. In 1871 all restrictions in teaching in either Ukrainian or Polish were abolished and it was ordered that only people with the command of either of the two languages could occupy university chairs. In 1879 Polish became the administrative language at the university, and the appointment of Ukrainians to docent positions was obstructed. In 1894 the

Chair of Ukrainian History was established and given to M. *Hrushevsky. In 1900 a separate Chair of Ukrainian Literature was added.

The Ukrainians continued to try to establish their own university in Lviv and to get rid of the Polish domination at the existing one. Ukrainian university students, organized in the secret Committee of Ukrainian Youth (KUM), led the battle. In 1901 they staged a protest secession from Lviv University. In 1910 a member of KUM, A. Kotsko, was killed in a fight with Polish students. In 1912 the Austrian government finally agreed to establish a Ukrainian university in Lviv by 1916, but the realization of the plan was prevented by the outbreak of the First World War.

By 1914 the university consisted of four faculties – theology, philosophy, law, and medicine (est 1894) – with an enrollment of 5,000. After the Polish occupation of eastern Galicia the authorities abolished Ukrainian chairs and docent positions. By the order of 14 September 1919 only those who had served in the Polish army and were Polish citizens were eligible for admission to the university. Since the status of eastern Galicia was not resolved by the victorious Entente until 1923, and Ukrainians refused to consider themselves Polish citizens, they were not permitted to enroll at the university. In 1919 the name of the university was changed to Jan Casimir University in honor of the Polish-Lithuanian king who founded a Polish Jesuit college in Lviv (1661–1763), which the Poles claimed was the predecessor of the university. In 1920 the university was moved to its present site, the building of the former Galician Diet (built in 1877–81). Ukrainians, who continued their demands for a separate Ukrainian university in Lviv, boycotted the university until 1925 and organized the *Lviv (Underground) Ukrainian University and the Department of Theology at the *Greek Catholic Theological Seminary in Lviv to replace the one abolished at Lviv University. In the 1930s the university had 6,000–7,000 students and up to 200 faculty members. There were few Ukrainian lecturers (none in 1928–33). Ukrainian language and literature were taught by the Polish professor J. *Janów. A Ukrainian students' circle was organized among his students.

After the annexation of Western Ukraine by the USSR in 1939, Lviv University was Ukrainianized in language and Sovietized in spirit. The Galician Ukrainian literary scholar K. *Studynsky was appointed its prorector or vice-chancellor. The Faculty of Theology was abolished, and the Faculty of Medicine was reorganized into a separate medical institute, in keeping with the Soviet education system. In 1940 the name of I. *Franko (who had been a student at Lviv University) was conferred upon the university. The Soviets promulgated a false genealogy for the university, one claiming that it originated in 1661 but ignoring its affiliation with the Jesuits. After the retreat of the Soviets at the end of June 1941, the Ukrainian linguist V. *Simovych was elected rector of the university, but it was not allowed to operate under the German occupation. Its main building was occupied by the Gestapo.

The university was reopened in 1944, when the Soviets reoccupied Lviv. The Ukrainianization of 1939 was replaced with a program of Russification. In 1982 the university had departments of philology (for Slavic languages and literatures, including Ukrainian), foreign languages (including classical philology, a feature unique in the Ukrainian SSR), history, law, biology, chemistry,

physics, mathematics, applied mathematics and mechanics, geography, journalism, geology, and economics (with a five-year curriculum), as well as evening and extramural departments (with a curriculum of five or six years). The university had about 11,000 students in 1988–9 (almost 50 percent of whom were enrolled in evening or extramural courses). More than 57,000 students had graduated from the university between 1939 and 1989. The library had approx 2.5 million volumes in 1981. The university has published its journal *Visnyk* since the 1960s.

B. Struminsky

Lviv Workers' Theater (Robitnychi teatr). A pro-communist theater established in Lviv in 1927. Besides performing and helping to organize drama courses for workers and peasants, it published *Zhyva stsen*a as a supplement to the journal *Vikna*. The Polish government restricted its activities in 1932 and suppressed it in 1934.

Lviv Young Spectator's Theater (Lvivskiy teatr yunoho hliadacha). Founded in Kharkiv in 1920 as the Fairy-tale Theater (Russian), from 1921 it was called the Kharkiv First State Children's Theater (bilingual from 1925), and in 1944 it was transferred to Lviv. In 1945 the director, V. Skliarenko, staged Yu. Kostyuk's *Taras Shevchenko*. From Ukrainian classics the theater staged I. Franko's *Uchytel'* (The Teacher) in 1956. Its repertoire for children has included an adaptation of M. Twain's *The Adventures of Tom Sawyer* and A. Shyian's *Kotyhoroshko* (The Pea Roller) and *Letiuchy korabel'* (The Flying Ship). Its contemporary Ukrainian repertoire has included M. Irchan's *Rodyna shchitkariv* (The Family of Brush Makers), V. Gzhytsky's *Po zori* (At Dawn), and P. Lubensky's *Neskorena poltavchanka* (The Undeclared Girl from Poltava). It has also staged the Russian plays *Nedorosl'* (The Minor) by D. Fonvizin and *Revizor* (The Inspector General) by N. Gogol. In 1982 the director, V. Kozmenko-Delinde, staged an experimental production of W. Shakespeare's *Hamlet*. The theater's artistic directors have been V. Kharchenko, S. Danchenko, and O. Ripko, and the stage designers, B. Kosariv and I. Deshko.

Lviv Zootechnical-Veterinary Institute (Lvivskiy zooveterynarnyi instytut). A higher institution of learning, until 1992 under the jurisdiction of the USSR Ministry of Agriculture. Located in Lviv, it was formed in 1939 out of the Academy of Veterinary Medicine, which itself was organized in 1897 out of the Lviv Veterinary School (est 1881). The institute consists of zoological engineering and veterinary faculties, a correspondence and graduate school, two experimental farms, two laboratories, a research sector, and a large library. In 1974 the Faculty for Upgrading Zootechnical-Veterinary Specialists was added. The enrollment in 1980 was 3,800, including 1,900 correspondence students. The institute is known for its

research in areas such as the prevention of animal sterility, the treatment of metabolic disorders and poisoning, and raising animal productivity.

L'vivs'ki visti (Lviv News). A daily paper published in Lviv from August 1941 to July 1944. It was controlled by the German chief of the press in the German-occupied Distrikt Galizien. The paper superseded the organ of the Lviv municipal government established after the Soviet retreat, the daily *Ukrains'ki shchodenni visti* (June–July 1941), which had been banned by the Germans. The chief editors were O. Bodnarovych and, from 26 June 1944, M. Semchyshyn. The paper had a circulation of 124,000 copies in 1941, 296,000 in 1942, 238,000 in 1943, and 93,000 in 1944.

Lviv-Volhynia Coal Basin. A major coalfield in western Ukraine, covering almost 8,000 sq km of Lviv and Volhynia oblasts and extending into Poland. Its geological structure is connected with the Galician-Volhynian geosyncline, and contains deposits from the Paleozoic, Mesozoic, and Cenozoic periods. The basin has almost 60 coal seams (of 0.6 to 2 m width) at depths of between 300 m in the north and 600 m in the south. Aquifers hinder mining. The coal has an ash content of 13.7 percent, a sulfur content of 1–4 percent, and a phosphorus content of 1.5 percent. Its thermal value is 6,800–7,500 kcal/kg. In 1986 the recoverable reserves were estimated at 970 million t.

LVIV-VOLHYNIA COAL BASIN

1. State boundaries
 2. Oblast boundaries
 3. Raion boundaries
 4. Railway lines
 5. Boundary of the coal deposit
 6. Cities with population over 30,000
 7. Towns with population over 10,000
 8. Settlements with population under 10,000
- Raion centers are underlined.

A search for the coal deposits, which were first predicted by the Russian geologist M. Tetiaev in 1910, was conducted in the interwar period by the Polish geologist J. Samsonowicz supported by a large Silesian industrial concern. After the war detailed explorations were carried out, and mining began in 1954. The development of the basin played a major role in the industrialization of Western Ukraine after the war. In the 1960s some 30,000 people, 75 percent of them Ukrainians, were employed in the coal mines. In 1976 their output totaled 15 million t, or about 7 percent of Ukraine's coal output. Coal from the basin is used mainly for fuel. Some 30 percent is exported, primarily to Kaliningrad oblast and the Baltic republics.

LVU. See Canadian League for Ukraine's Liberation.

Lybid River [Lybid']. A right-bank tributary of the Dnieper River. It is 14 km long and drains a basin area of 68 sq km. It flows within the boundaries of Kiev from its source in the western end of the city and joins the Dnieper River in the southeastern part of the city. Its average width is 3–4 m. It is believed that the river was named after Lybid, a sister of Kyi, the legendary founder of Kiev. In the Middle Ages the Lybid formed the southwestern boundary of Kiev, and several dams with watermills were constructed on it. At that time its lower course was navigable. Later the river was silted up. Numerous burial sites dating from the times of the Zarubyntsi culture and the Cherniakhiv culture have been excavated in the river's valley.

Lyceum. A type of secondary school, in some cases also an institution of higher education. In Russian-ruled Ukraine there were three lyceums resembling institutions of higher learning, the *Kremianets Lyceum (1819–33), the *Richelieu Lyceum in Odessa (1817–65), and the *Nizhen Lyceum (1832–74).

In Galicia lyceums were schools for women that offered incomplete secondary education. From the end of the 19th century until 1918, the *Ukrainian Girl's Institute in Peremysl was the only Ukrainian lyceum.

Ukrainian lyceums as senior secondary schools appeared in Galicia and Volhynia following the 1932 Polish school reform. By 1939 there were 21 Ukrainian general education lyceums (5 state-supported and 16 private), as well as the Co-operative Lyceum in Lviv of the *Audit Union of Ukrainian Co-operatives, offering a three-year course, and the state agricultural lyceum in Chernelytsia (est 1934).

Since the late 1980s, as a consequence of political changes and the greater flexibility in education administration, lyceums have re-emerged. Lyceums were established in 1989 at the *Odessa Pedagogical Institute and at the Izmil Pedagogical Institute which offer an enriched complete secondary education for selected students at the grade nine level.

Lychakiv Cemetery. A cemetery in the Lychakiv district of Lviv. It is mentioned in historical documents at the end of the 16th century. Until the Austrian authorities moved the cemeteries outside the cities at the end of the 18th century, prominent and rich people were buried within or under the churches, and Lychakiv served as the burial ground of the common people or the victims of epidemics. The present layout of the cemetery dates from 1855–61. Besides many Polish noblemen and cultural fig-

Lychakiv Cemetery: Ivan Franko's burial monument (sculpture by Serhii Lytvynenko)

ures, prominent Ukrainians are buried there, including M. Shashkevych, I. Franko, M. Pavlyk, V. Barvinsky, A. Petrushevych, A. Vakhnianyn, P. Svientsitsky, Yu. Lavrivsky, D. Zubrytsky, V. Shashkevych, I. Levytsky, O. Terletsky, Yu. Tselevych, V. Nahirny, and V. Ivasiuk. A special section is set aside for the Ukrainian soldiers who died in the November Uprising of 1918. In the interwar period commemorative services were held annually at the cemetery for those who had fallen in the struggle for Ukrainian independence. Such commemorations were banned under the Soviet regime and were revived only at the end of the 1980s.

Lykholat, Andrii [Lyxolat, Andrii], b 12 December 1914 in Rozsokhuvatka, near Cherkasy, Kiev gubernia. Historian and Communist party functionary. He worked in the CC of the All-Union Bolshevik Party (1942–61) and in the AN URSS (now ANU) Institute of History. In the 1970s he came to play an important role as official historian of the Soviet rise to power. His works include *Razgrom natsionalisticheskoi kontrrevoliutsii na Ukraine (1917–22 gg.)* (The Defeat of the Nationalist Counterrevolution in Ukraine [1917–22], 1954), *Zhovten' na Ukraini* ([The] October [Revolution] in Ukraine, 1967), and *Lenins'ka natsional'na polityka partii v dii* (The Leninist Nationality Policy of the Party in Action, 1977).

Lyman, Leonyd, b 13 August 1922 in Mali Sorochyntsi, now in Myrhorod raion, Poltava oblast. Poet and writer. He began to publish lyric poetry when he was still a student at the Kharkiv Pedagogical Institute. A postwar refugee, in 1949 he settled in New York City and resumed writing. His poetry appeared in various journals and collections. Excerpts from his novels 'Kolhospyky' (Collective Farmers) and 'Povist' pro Kharkiv' (A Tale about Kharkiv) have been published in several periodicals. He has edited the cultural and political news digest *Notatnyk*

since 1961. Although no collections of his poetry have been published so far, some critics consider Lyman to be one of the best Ukrainian poets of his generation.

Lymanske [Lymans'ke]. VII-10. A town smt (1990 pop 8,700) in Rozdilna raion, Odessa oblast. It is located on the Kuchurhan Estuary on the border between Ukraine and Moldova. It was founded in the late 18th century and was called Zeltsi until 1944. Lymanske has two vineyards with wineries and a branch of the Odessa Furniture Manufacturing Complex.

Lymansky, Vasyl. See Mova, Vasyl.

Lymarenko, Danylo, b 2 January 1895 in Karlivka, Yelysavethrad county, Kherson gubernia, d 14 August 1968 in Philadelphia. Military and community figure. An officer in the tsarist army during the First World War, in December 1917 he became an officer with the Ukrainian Free Cossacks in Kherson gubernia. In 1919–20 he commanded a partisan detachment fighting both the Whites and the Bolsheviks, and then served as captain in the First Zaporozhian Rifle Division. As a postwar refugee in Germany, he was a founding member of the Ukrainian National State Union (UNDS) and the Union of Ukrainian Veterans. After emigrating to the United States he headed the Philadelphia branch of the UNDS (from 1956) and the Union of Ukrainian Veterans in America (from 1967).

Lynnychenko, Ivan [Lynnychenko], b 24 October 1857 in Kiev, d 9 April 1926. Historian. He graduated from Kiev University (1879), where he studied under V. Antonovych, and became a professor at Odessa (1884–8, 1896–1926) and Moscow (1888–96) universities. His works deal with the history of Kievan Rus' and the sociopolitical history of Galicia in the 14th and 15th centuries. He treated Ukrainian history from a Russian imperial viewpoint, but his studies on Galicia contain valuable source materials.

Lyntsevsky, Hervasii [Lyncevs'kyj, Hervasij], b 1683 near Kiev, d 2 January 1770. Orthodox churchman and missionary. He graduated from and then taught at the Kievan Mohyla Academy before becoming leader of the Peking Orthodox mission (1742–55) and, later, bishop of Pereiaslav (1757–68). He fought against the spread of Uniate Catholicism in Right-Bank Ukraine and supported the Koliivshchyna rebellion.

Lypa, Ivan (pseud: Petro Shelest, I. Stepovyk), b 24 February 1865 in Kerch, Tavriia gubernia, d 13 November 1923 in Vynnyky, Lviv county, Galicia. Civic and political figure, writer, and physician. As a student at Kharkiv University he helped found the Brotherhood of Taras and was imprisoned (1893) for over a year for his activity in it. After completing his studies at Kazan University he practiced medicine in the Kherson region, Poltava, and then (1902–18) Odessa, where he published the Ukrainian paper *Narodnyi stiah* and organized a Ukrainian club, a Prosvita society, and the Odessa Literary Association. During the revolutionary period he was elected Ukrainian commissioner of Odessa and sat on the CC of the Ukrainian Party of Socialists-Independents. Under the Directory of the UNR he served as minister of religious affairs in V. Chekhivsky's and S. Ostapenko's cabinets. After emigrating to Tarnów (Poland) in 1921, he chaired the Council of

Ivan Lypa

Yurii Lypa

the Republic and became minister of health in the UNR government-in-exile. In 1922 he settled in Vynnyky, near Lviv. As a writer Lypa is known for his symbolic-philosophical poetry and short stories, which appeared in various journals, such as *Literaturno-naukovyi vistnyk* and *Ukrains'ka khata*, and various almanacs. They were collected posthumously in *Opovidi pro smert', viinu i liubov* (Stories about Death, War, and Love, 1935) and *Trynadtsiat' prytych* (Thirteen Parables, 1935). His stories for children were published in *Dzvinok*, and his numerous articles, in leading Ukrainian papers, such as *Pravda*, *Dilo*, and *Bukovyna*.

Lypa, Yurii, b 1900 in Odessa, d 1944. Writer and publicist; the son of I. *Lypa. He was a graduate of Poznan University (1929) and a physician by profession. From 1920 he lived in Poland and Galicia. He died serving as a physician with the Ukrainian Insurgent Army. His poetry began to be published in 1919. Several collections of his poetic works appeared: *Svitlist'* (Brightness, 1925), *Suvarist'* (Severity, 1931), *Viruiu* (I Believe, 1938), and *Poeziia* (Poetry, 1967). His prose works include a novel, *Kozaky v Moskovii* (The Cossacks in Muscovy, 1931, 1942, 1957), three volumes of short stories *Notatnyk* (Note Book, 1936–7, 1955), *Ruban* (1946), and *Kinnotchyk ta inshi opovidannia* (The Horseman and Other Stories, 1946), and a collection of essays, *Bii za ukrains'ku literaturu* (The Battle for Ukrainian Literature, 1935). He wrote a number of publicistic works which were popular at the time: *Ukrains'ka doba* (The Ukrainian Age, 1936); a kind of trilogy, consisting of *Pryznachennia Ukraïny* (The Destiny of Ukraine, 1938), *Chornomors'ka doktryna* (The Black Sea Doctrine, 1940, 1942, 1947), and *Rozpodil Rosii* (The Partition of Russia, 1941, 1954), in which he outlined his so-called Black Sea doctrine; and numerous publicistic articles and essays of literary criticism. Lypa's 'imperial' concept was not well-founded but it was expounded in such a brilliant and stirring style that he became one of the most popular figures of his time in Galicia and among Ukrainian emigrants. His medical works, such as *Fitoterapiia* (Phytotherapy, 1933), *Tsiliushchi roslyny v davnii i suchasnyy medytsyni* (Healing Plants in Ancient and Contemporary Medicine, 1937), and *Liky pid nohamy* (Medicines under Foot, 1943), were reprinted several times and enjoyed great popularity.

Lypkivsky, Ivan [Lypkivs'kyj], b 14 September 1892 in Lypovets, Kiev county, Kiev gubernia, d late 1930s. Painter. He studied under M. Boichuk at the Kiev State Art Institute (1921–7) and was a member of the *Association of Revolutionary Art of Ukraine. He perished during the Great Terror. Some of his works, such as *The Red Blast Furnace* (1926), *The Steelworkers* (1929), and *Agreement on Socialist Competition* (1932), have been preserved at the Kiev Museum of Ukrainian Art.

Metropolitan Vasyl Lypkivsky

Rev Bohdan Lypsky

Lypkivsky, Vasyl [Lypkivs'kyj, Vasyl'], b 19 March 1864 in Popudnia, Lypovets county, Kiev gubernia, d 27 November 1937. Church leader; cofounder and metropolitan of the *Ukrainian Autocephalous Orthodox church (UAOC). He studied at the Uman Theological School (1873–9), the Kiev Theological Seminary (1879–84), and the Kiev Theological Academy (1884–9). He was ordained in 1891, and from 1892 to 1903 he was dean of the cathedral in Lypovets and supervisor of the schools in Lypovets county. In 1903–5 he lectured on canon law in the Kiev Church Teachers' School, but he lost this position for his support of a separate Ukrainian church. With the fall of the tsarist regime in 1917, Lypkivsky joined the struggle for the establishment of an independent Ukrainian Orthodox church. He was elected chairman of the Kiev Eparchial Sobor and of the *Brotherhood of the Resurrection, which later became the *All-Ukrainian Orthodox Church Council. In May 1919 he celebrated the first Liturgy in the Ukrainian language – after translating many of the liturgical works into modern Ukrainian – in St Nicholas's Military Cathedral in Kiev. Although this action was opposed by the Russian hierarchy, who defrocked Lypkivsky, it was welcomed by supporters of the emerging Ukrainian national church. In the summer of 1919 Lypkivsky became parish priest of the St Sophia Cathedral in Kiev.

In October 1921 the All-Ukrainian Church Council in Kiev, which had declared the establishment of the UAOC in May 1920, elected Lypkivsky the first metropolitan of the church. When bishops of the official Russian church denounced the election and refused to consecrate the new metropolitan, the sobor revived the ancient Alexandrine tradition of 'the laying of hands' to consecrate Lypkivsky without the participation of other bishops. Without a traditional episcopal ordination, Lypkivsky was constantly

vilified by the Russian church as a noncanonical bishop outside the apostolic succession. His legitimacy was also questioned by other churches and some of the Ukrainian faithful. Nonetheless, Lypkivsky devoted himself to organizing the new church. He traveled throughout Ukraine, visiting more than 500 parishes after his election and overseeing the growth of the UAOC (by 1927 the church claimed 36 bishops and over 2,500 priests). Insisting on the active participation of the laity in church affairs, he propagated many church reforms, and he modified many Orthodox canons and traditions, including the absolute celibacy of bishops, with the result that married men were admitted to episcopal ordination. He was also insistent on preserving the independence of the Ukrainian church vis-à-vis Moscow. Lypkivsky's popularity soon earned him the enmity of the Soviet authorities, who, after arresting him a few times, had him dismissed by the All-Ukrainian Orthodox Council in 1927. From 1927 to 1937 he lived in a Kiev suburb, under virtual house arrest and in poverty. He was arrested by the NKVD in November 1937, charged with anti-Soviet activity, and summarily executed (although it was commonly believed that he had survived at least to early 1938).

Lypkivsky wrote prolifically on canon law, church history, and theology, but most of his writings remained in manuscript and were destroyed during the Second World War. Only the last volume of his seven-volume history of Ukrainian Orthodoxy was published (posthumously). This volume, concerning the history of the UAOC, has appeared in three different editions, the most authoritative of them edited and annotated by S. Savchuk as *Vidrodzhennia Ukraïns'koi Tserkovy* (1961). Several of Lypkivsky's articles appeared in postwar periodicals, including 'Ukraïns'ka Avtokefal'na Tserkva i radians'ka komunistychna vlada' (The Ukrainian Autocephalous Church and Soviet Communist Rule) in *Vil'na Ukraïna* (1955–8) and 'Iak Ukraïns'ka Tserkva povernula sobi voliu' (How the Ukrainian Church Regained Its Freedom) in *Ukraïns'ke pravoslavne slovo* (1956). A collection of his sermons, including a short autobiography, *Propovidy na nedili i sviata* (Sermons for Sundays and Holidays, 1969), and a number of his letters to Rev P. Maievsky in 1933–7 also appeared posthumously in the West, and an autobiography appeared in the Warsaw journal *Nasha kul'tura* in 1936.

Lypko, Petro, b 1876, d ? Senior UNR Army officer. A graduate of the General Staff Academy in St Petersburg and officer of the Russian army, he joined the UNR Army and served on its General Staff in 1919 as chief of intelligence and then as general quartermaster. In 1920 he became chief of staff and was promoted to brigadier general.

Lypova Dolyna. III-14. A town smt (1990 pop 5,400) on the Khorol River and a raion center in Sumy oblast. It was founded in the first half of the 17th century, and it was part of the estates of J. Wiśniowiecki until 1654. It received the status of smt in 1962. The town has a dairy and a mixed-feed factory.

Lypovets [Lypovec']. IV-10. A town smt (1990 pop 9,400) on the Sob River and a raion center in Vinnytsia oblast. According to a historical document of 1545 Lypovets arose in the 14th century. The Union of Lublin in 1569 assigned the town to Poland. The castle built there at the beginning of the 17th century played an important role in the Cossack-Polish War of 1648–57 and the popular uprisings of 1702–4 and 1737. With the second partition of Poland in 1793, Lypovets was annexed by Russia and turned into a county center of Kiev gubernia. In 1918–19 the UNR Army fought the Red Army near Lypovets on several occasions. In August 1919 the Zaporozhian Division crushed a Bolshevik unit there. Lypovets became an smt in 1925. Today it has a research plant of the Remdetal Scientific and Manufacturing Association.

Lypovetska, Mlada [Lypovec'ka] (Lipovetzka; Norlander; real name: Belman, Taisa), b 1897 in Volhynia, d ? Singer, translator, literary scholar. In 1914 she came to Italy to study singing. She gave concerts and popularized Ukrainian songs. Her articles on T. Shevchenko and her translations of several of his poems appeared in 1919 in the newspaper *La Voce dell' Ucraina* (Rome). In 1926, in collaboration with C. Meano, she prepared a collection of translations of Shevchenko's poetry into Italian, entitled *Taras Scévchenko: Liriche scelte dal 'Cobsar.'* The collection was never published, but some of the poems appeared in 1932 in *Ucraina*, a journal of Ukrainian studies founded by Lypovetska.

Lypovetsky, Ivan [Lypovec'kyj], b 24 March 1897 in Rivne, Volhynia gubernia, d 30 December 1975 in Toronto. Civic leader and journalist. During the struggle for Ukraine's independence Lypovetsky joined the *Sixth Sich Division of the Army of the UNR and edited its journal *Ukraïns'kij strilets'*. During the division's internment in Poland he worked in the editorial office of its newspaper *Nove zhyttia* and then edited the journal *Na chuzhyni* and represented the Parisian weekly *Tryzub* among the Ukrainian émigrés in Poland. In 1952 he emigrated to Canada, where he cofounded the political party known as the *Ukrainian National State Union in Canada, headed the *Ukrainian War Veterans' League of Canada (1959–70), and edited the journal *Dorohovkaz*.

Lypsky, Bohdan [Lyps'kyj], b 9 April 1903 in Lviv, d 12 October 1969 in Toronto. Ukrainian Catholic priest and professor. After completing his studies at the Pontifical Oriental Institute in Rome, he taught at the Khrystynopil Basilian monastery and then moved to Lviv in 1932 to teach moral theology and dogma at the Greek Catholic Theological Academy. He also served as chaplain (1932–9) of Ukrainian political prisoners in Galicia. In 1940–4 he was a member of the chancery office, in the Lemko region, and in 1946–51 he taught at seminaries in Germany and Holland. He moved to Canada in 1951 to serve as a parish priest at St Nicholas's Church in Toronto. In his pastoral

work and in a monograph, *Dukhovist' nashoho obriadu* (The Spirituality of Our Rite, 1974), he stressed the importance of avoiding Latin influences and of maintaining the purity of the Eastern rite in the Ukrainian Catholic church.

Volodymyr Lypsky

V'iacheslav Lypynsky

Lypsky, Volodymyr [Lyps'kyj], b 11 March 1863 in Samostrily, Novhorod-Volynskyi county, Volhynia gubernia, d 24 February 1937 in Odessa. Botanist; full member of the VUAN from 1919 and corresponding member of the USSR Academy of Sciences from 1928. After graduating from Galagan College (1881) and Kiev University (1886) he worked in the university's and the Imperial Botanical Gardens. After the Revolution of 1917 Lypsky helped organize the VUAN, of which he served as vice-president (1921–2) and president (1922–8). From 1928 he was director of the Odessa Botanical Garden. Lypsky conducted many botanical expeditions to Central Asia, the Far East, Africa, and the Americas. He identified 4 new plant genera and over 220 new species and studied marine plants of the Black Sea and radioactive mineral springs of the Zhytomyr region. He published scientific accounts of the flora of Ukraine, Bessarabia, Caucasia, Central Asia, Tunisia, Algeria, and Indonesia, including multivolume works on the flora of Caucasia (1899–1902) and Central Asia (1902–5), as well as *Botanichnyi sad Ukraïns'koi akademii nauk* (Botanical Garden of the Ukrainian Academy of Sciences, 1922). Lypsky's biography, by A. Barbarych, was published in Kiev in 1958.

Lypynsky, V'iacheslav [Lypyns'kyj, V'jačeslav], (Lipiński, Waclaw), b 5 April 1882 in Zaturtsi, Volodymyr-Volynskyi county, Volhynia, d 14 June 1931 near Vienna. Historian, political philosopher, and publicist; full member of the Shevchenko Scientific Society from 1914. After studying history and agronomy at Cracow and Geneva universities he settled on his estate in the Uman region and devoted his energies to reconverting the Polonized nobility to Ukrainian culture. He wrote the brochure *Szlachta ukraińska i jej udział w życiu narodu ukraińskiego* (The Ukrainian Gentry and Its Participation in the Life of the Ukrainian People, 1909) and articles in the biweekly *Przegląd Krajowy*. He accepted some of the ideas of the **khlompomany* but wanted the nobility to change into a politically conscious Ukrainian class that would preserve its

corporate character. His efforts were at least partly successful.

His first historical works were articles in the serials *Literaturno-naukovyi vistnyk*, *Zapysky NTSh*, and *Rada*, as well as the monumental *Z dziejów Ukrainy* (From the History of Ukraine, 1912; repr 1959), which was edited and for the most part written by him (particularly the monograph *Stanisław Michał Krzyczewski*). In 1917 he took part in organizing the *Ukrainian Democratic Agrarian party and drafted its program, based on the principle of a sovereign Ukrainian state and the private ownership of land. Under the Hetman government Lypynsky was appointed Ukrainian envoy to Vienna, and he retained that post under the UNR government until June 1919.

Except for a brief stay in Berlin (1926–7), where he held the chair of state history at the Ukrainian Scientific Institute, Lypynsky lived in Austria after the struggle for Ukraine's independence. That was his most creative period; his monograph *Ukraina na perelomi 1657–1659 ...* (Ukraine at the Turning Point of 1657–1659, 1920, 1991) was published, and at his initiative the *Ukrainian Union of Agrarians-Statists (USKhD) was formed. He drafted its statute and served as president of its board of directors. He became a leader and ideologist of the conservative monarchist movement, which won adherents among Ukrainians abroad and in Western Ukraine. Its ideological journals were the irregular collection **Khlivorobs'ka Ukraina* (1920–5), which published his fundamental political treatise *Lysty do bratviv-khlivorobiv* (Letters to Brothers-Agrarians) in 1926 (repr 1956). Tactical and ideological disagreements with Hetman P. *Skoropadsky led Lypynsky to dissolve the USKhD in 1930, and with a small group of followers (M. Kochubei, V. Zalozetsky, and V. Kuchabsky) he set up the short-lived Brotherhood of Ukrainian Classocrats-Monarchists. Its organ was *Zbirnyk khlivorobs'koi Ukrainy*.

Lypynsky's historical research centered on the Cossack revolution of the mid-17th century. He offered the view, in contrast to the populist interpretations of the B. Khmelnytsky period, that that period represented a fundamental stage in the development of Ukrainian statehood. According to Lypynsky the rebirth of the Ukrainian state was conditioned by the following factors: (1) the consolidation of all social strata around the Cossack nucleus, which in the course of the liberation war absorbed the most active elements of all the other estates; (2) the strong influx of the Ukrainian nobility into the Cossack ranks, which at a decisive moment raised the political culture of the Cossacks and enabled the settled, town Cossacks to control the seminomadic Zaporozhian Cossacks; (3) the victory of the nobility-*starshyna* land tenure system, with its intensive *khutir* farming, over the extensive colonial and parasitic farming practiced by Polish magnates on their latifundia; and (4) the Orthodox church's blessing for the liberation war. Lypynsky paid particular attention to the way in which the essentially military organizations were transformed into a territorial government of a monarchic (hereditary) inclination. He regarded the Treaty of Pereiaslav (1654) as a military alliance of Ukraine and Muscovy. Along with S. Tomashivsky and D. Doroshenko Lypynsky founded a new statist school of Ukrainian historiography.

His Ukrainian political program was based on a universal theory that was influenced by a number of contemporary Western (particularly French) thinkers, such as G.

Sorel, V. Pareto, and G. Lebon. According to Lypynsky states arose by conquest, either external or internal. Regardless of their structure all states had a certain quantity of power and an elite which exercised it. For Lypynsky the three sources of power were military (warriors), economic (producers), and intellectual (intelligentsia), of which various combinations were possible. He attributed special politically creative abilities to the warriors and producers and gave the intelligentsia the auxiliary role of articulating the elemental, unconscious strivings of society. His three main kinds of state were classocracy, democracy, and ochlocracy; they were timeless, and appeared in various periods, at various stages of economic development, and in various cultures. Characteristic of a classocracy was the balance between power and liberty, and between conservative and progressive forces; democracy promoted personal freedom; and ochlocracy, the absolutist rule of warriors-nonproducers, suppressed liberty and civic initiative. The three state types succeeded each other with a certain regularity: the classocracy, spoiled by excessive prosperity, degenerated into democracy, which was then destroyed by ochlocracy, and the struggle against ochlocracy gave rise to classocracy. That historical cycle was not, however, deemed deterministic.

Lypynsky rejected the subordination of the church to the state (cesaropapism) and the striving of the clergy for political power (clericalism). Instead he advocated co-operation between the church and the state as two autonomous and equal institutions. The religious theme was omnipresent in his works; he professed that the ultimate purpose of human activity is to realize, as far as possible, the eternal truth in the life of nations. Lypynsky expressed his views on the historical role of the Ukrainian church in *Relihiia i tserkva v istorii Ukraïny* (Religion and Church in the History of Ukraine, 1925, 1933, 1956).

On those foundations he built his Ukrainian political program. He believed that the Ukrainian nation could best be unified on the basis of territorial patriotism, that is, solidarity among all the permanent inhabitants of Ukrainian territories regardless of their social standing, religious faith, ethnic origin, and even national consciousness. The Ukrainian liberation movement had to depend not only on the intelligentsia, but also on the managers of agriculture, industry, and the military. Ukraine would be a common homeland for all; hence, the reassimilation of the denationalized higher social strata was a necessary condition for the revival of Ukrainian statehood. It was more important to have Ukrainian organic class (professional) structures than Ukrainian political parties. Lypynsky was a severe critic of the democratic wing (the UNR camp) and the ochlocratic wing (the Soviet and nationalist movements) in Ukrainian politics. In his opinion only the classocratic system, based on a hereditary and legal 'labor monarchy' in the traditional form of the hetmanate, could meet the needs of Ukrainian state-building.

Lypynsky East European Research Institute

Lypynsky East European Research Institute (Skhidno-evropeyskyi doslidnyi instytut im. V.K. Lypynskoho). A nonprofit research and publishing institution in Philadelphia, founded in 1963 by E. Zyblikewycz, its first president (1963–86), and headed since 1986 by J. Pelenski. The institute houses the personal papers and library of V. *Lypynsky, a major Ukrainian conservative political theorist, historian, and sociologist, as well as the papers of more than 50 prominent historical figures linked to the history of Ukraine since the turn of the century. The most important of these are the personal papers of Hetman P. Skoropadsky. The institute's library has more than 7,000 volumes relating to the social, economic, and political history of Ukraine. The institute has published important government documents, monographs, and the correspondence of various Ukrainian political leaders from the 1914–40 period, the most significant of which are *Ereignisse in der Ukraine 1914–1922 ...* (1966–9), editions of the letters of D. Doroshenko (1973) and O. Nazaruk (1976) to Lypynsky, a parallel Polish-Ukrainian edition of Lypynsky's *Stanisław Michał Krzyczewski ...* (1980), and Lypynsky's *Ukraïna na perelomi 1657–1659 ...* (1991), all of them with long, scholarly introductions and notes.

Lypytsia culture. An archeological culture of the inhabitants of the upper Dniester region from the 1st century BC to the 3rd century AD. Its name is derived from Verkhnia Lypytsia, now a village in Ivano-Frankivske oblast, where the first burial site of this culture was discovered by I. *Kopernicki in 1889. In the 1930s intensive research on the Lypytsia monuments was begun. The remains of semipit and ground dwellings grouped in unfortified settlements along rivers and burial grounds were excavated. The clay, bronze, and glass ware, iron tools and weapons, and bronze ornaments discovered indicate that the inhabitants had close trade ties with the Roman provinces. They practiced communal farming and herding and some hunting and fishing. The ethnic affiliation of the culture is still unclear, but some scholars assert that its people are the direct ancestors of the *Tivertsians.

Lyric poetry (from Greek *lyra*, 'lyre'; hence, a song sung to the accompaniment of a lyre). A literary genre the main purpose of which is to express emotions, not to depict actions or events as in epic poetry or drama. It is difficult to draw a clear line between lyric poetry and epic poetry or drama, for lyrical elements appear in all literary genres – subjective passages in epic poetry and monologues in dramas. The lyrical element plays an important role in Ukrainian folk songs and dumas as well as in the 'poems' of the 17th century – love poems, religious cantos, and the so-called worldly songs. In the 17th and 18th centuries satirical and epigrammatic lyric poetry became widely known, and lyrical features appeared in monologues of religious dramas and baroque homilies. In the Romantic period lyrical verse was even introduced into epic poems; T. Shevchenko and P. Kulish, for example, inserted lyrical passages into their Byronic poems. It also played an important role in the mixed genre known as the ballad. Furthermore, all the imitations of lyrical folk songs, including poetic montages of excerpts from folk songs, were essentially lyrical works. At the same time the role of political lyric poetry, particularly in poems by Kulish, gained importance. The practice of imitating folk songs continued in the period of realism; the most apparent example is the frequent use of songs in plays. Reflective lyric poetry, in which the expression of feeling is combined with reflection, appears in Ukrainian literature much later than in other European literatures. Although reflective lyrical poems are not infrequent in Shevchenko and Kulish, they become prominent only in the work of I. Franko and Lesia Ukrainka. In the period of modernism, as represented by poets such as M. Vorony, M. Cherniavsky, and O. Oles, the Romantic tradition of imitating folk songs was replaced by the use of formally perfected lyrical genres and styles. In postrevolutionary poetry the current of lyric poetry, represented by the early collections of M. Rylsky, P. Tychna, and others, was exceptionally strong. The rebirth of Ukrainian poetry in the 1960s was marked by a resurgence of lyricism (L. Kostenko, M. Vinhranovsky, and I. Drach). A lyricism of national and social engagement developed in the poetry of the 1970s (I. Kalynets, V. Holoborodko).

Beginning in the 17th century, literary lyrical works were in large measure absorbed by the oral folk tradition. Among contemporary folk songs there is a significant number of lyrical works, often considerably altered, of literary origin. The borrowings are not limited to I. Kotli-

revsky's and T. Shevchenko's verses, but include poems of other classical poets and even of lesser poets, such as S. Pysarevsky, M. Petrenko, Ya. Komarnytsky, S. Hulak-Artemovsky, and P. Nishchynsky. Some works of Polish poets, such as T. Padura and K. Ciegiewicz, have made their way into the Ukrainian folk tradition.

Lyrical songs. The largest and most popular group of Ukrainian *folk songs, they are songs of relatively recent origin expressing the feelings and moods of individuals. The genre developed out of calendric ritual folk poetry, ballads, and laments and became well established in the 16th century. It includes a broad range of themes, and although there is yet no universally accepted classification scheme, lyrical songs are often divided into two groups, songs about social life and songs about family life. The first includes Cossack and serf songs, *recruits' and soldiers' songs, *chumak songs, wanderers' and migrant laborers' songs, and servants' songs. The second group consists of lullabies, love songs, women's songs, and humorous songs. Lyrical songs are usually built in the form of a monologue or dialogue (a conversation between parents and a son or daughter). Poetic devices, such as psychological parallelism, similes, symbols, epithets, and metaphors, are used extensively. Rhythmically, lyrical songs evolved from a free recitative to a syllabic verse and then to regular syllabo-tonic symmetry.

The oldest examples of lyrical songs date from the 16th century, but these examples of genre were not published until the end of the 18th century. They are assigned a particularly important place in 19th- and 20th-century song collections. The more important collections published in and outside Ukraine are *Lira* (The Lyre, 1945), B. Zarevych's *Velykyi spivannyk* (The Great Songbook, nd), and H. Sydorenko's *Ukrains'ki narodni pisni* (Ukrainian Folk Songs, 3 vols, 1964–7). The Institute of Fine Arts, Folklore, and Ethnography of the AN URSR published a series of song collections including *Pisni Iavdokhy Zuikhy* (The Songs of Yavdokha Zuikha, 1965), *Zhartivolyvi pisni* (Humorous Songs, 1967), *Tantsiuval'ni pisni* (Dance Songs, 1970), *Rekruts'ki ta soldats'ki pisni* (Recruits' and Soldiers' Songs, 1974), *Naimyts'ki ta zarobitchans'ki pisni* (Servants' and Laborers' Songs, 1975), *Chumats'ki pisni* (Chumak Songs, 1976), *Vesil'ni pisni* (Wedding Songs, 1982), and *Dytiachyi fol'klor* (Children's Folklore, 1984). The more important regional collections of lyrical songs are L. Yashchenko's *Bukovyns'ki narodni pisni* (Bukovynian Folk Songs, 1964), Z. Vasylenko's *Zakarpats'ki narodni pisni* (Transcarpathian Folk Songs, 1962), V. Goshovsky's *Narodnye pesni Zakarpattia* (Folk Songs of Transcarpathia, 1971), N. Prysiashniuk's *Pisni Podillia* (Songs of Podilia, 1976), and Yu. Kostyuk, Yu. Tsymbor, and A. Duleba's *Ukrains'ki narodni*

pisni Skhidnoi Slovachchyny (Ukrainian Folk Songs of Eastern Slovakia, 3 vols, 1958–77)

M. Mushynka

Lys Mykyta

Yurii Lysan

Lys Mykyta (Fox Mykyta). A magazine of humor and satire published and edited from 1947 to 1990 by E. *Kozak, who was also its principal caricaturist and cartoonist. Its name is taken from I. Franko's famous book of fables in verse about a wily fox. Originally a semimonthly, until March 1949 *Lys Mykyta* was published in Munich. Interrupted during Kozak's emigration to the United States, it reappeared in New York City in 1950 under the abbreviated title *Lys* (until April 1951). From November 1951 *Lys Mykyta* was published in Detroit, first as a semimonthly to the end of 1953, then once every three weeks, and then monthly from 1957. It satirized Ukrainian émigré life and politics and was especially biting in its portrayal of Soviet rule in Ukraine. Among its contributors were I. Kernytsky, B. Nyzhankivsky, S. Ryndyk, M. Ponedilok, M. Levytsky, I. Manylo, O. Smotrych, B. Oleksandriv, and Z. Kohut.

Lysak, Adriane (née Sobchysyn), b 9 October 1930 in Yavoriv, Galicia. Painter and graphic artist. A postwar refugee, she started her art studies at the School of Applied Arts in Graz, Austria. After emigrating to Canada in 1949, she studied at the Sir George Williams School of Arts (1952–3) and L'Ecole des beaux arts (1963–6) in Montreal. Since 1961 she has participated in over 60 group shows in Canada, the United States, and France, where she received an honorary diploma at the 1973 Salon International des Arts Libres. Solo exhibitions of her works have been held in Toronto (1965), Montreal (1965, 1973, 1974), Detroit (1970, 1974), Winnipeg (1974), and New York (1980). Lysak is a versatile artist who uses many techniques and combines real objects with geometric forms to create sophisticated plays of real and abstract elements.

Lysan, Yurii, b 1874, d 1946. Bukovynian political and civic leader. As mayor (1910–14) of Vashkivtsi he promoted Ukrainian civic life and education and was instrumental in establishing a Realgymnasium there in 1912. A candidate of the National Democratic party, he was elected to the Bukovynian Diet (1911–18). After the First World War he was a founder of the Ukrainian People's Organization (1922) and then of the Ukrainian National party

(1927–8) in Bukovyna. As a member of the Rumanian Senate in 1926–7, he protested against the government's policy of Rumanianization.

Lysenko. A Cossack *starshyna* family in Left-Bank Ukraine in the 17th and 18th centuries. Ivan Lysenko (d 1699) was colonel of Chernihiv regiment (1669–71), envoy of the general *starshyna* to Moscow (1672), general osaul (1672–8) of the Hetman state, colonel of Pereiaslav regiment (1677–8, 1690–2), and a participant in the Chyhyryn (1687), Crimean (1689), and Azov (1696) campaigns. His son, Fedir Lysenko (d 1751), was a general osaul (1728–41) and general judge (1741–51). The composer Mykola *Lysenko was a descendant of the family.

Lysenko, Andrii, b 1851 in Zhovnyne, Zolotonosha county, Poltava gubernia, d 10 June 1910 in Sviatoshyne, Kiev county. Civic and revolutionary figure; brother of Mykola *Lysenko. A physician by profession, he took part in the Revolution of 1905 as a supporter of the Bolshevik Russian Social Democratic Workers' party and was deported to Viatka. He fled abroad and lived in Switzerland and Galicia. He contributed to the Ukrainian press.

Lysenko (Hurevych), Liudmyla, b 20 November 1934 in Taman, Krasnodar krai, RSFSR. Champion runner. A graduate of the Kiev Institute of Physical Culture (1960), in 1960 she set an Olympic and world record in the women's 800-m race. She set two world, two Soviet, and five Ukrainian records in the 800-m in the years 1955–63 and was the USSR champion in women's cross-country in 1960 and 1964.

Adriane Lysak: *Cobwebs of Vikings* (relief)

Lysenko, Mariana, 1887–1946. Pianist; daughter of Mykola *Lysenko. She was a lecturer as well as director of the Lysenko Music and Drama Institute in Kiev (1912–8) and concertmaster at the Kiev and Lviv (1939–44) operas. She wrote the textbook *Shkola navchannia na fortepiano* (A School for Teaching Piano).

Mykhailo Lysenko: *In the Torture Chamber of Fascism* (fragment, plaster, 1935)

Lysenko, Mykhailo, b 29 October 1906 in Shpylivka, Sumy county, Kharkiv gubernia, d 8 May 1972 in Kiev. Sculptor; full member of the USSR Academy of Arts from 1970. He studied at the Kharkiv Art Institute (1926–31) and taught there (1938–41) and at the Kiev State Art Institute (1944–72). He executed many sculptural portraits, monuments, and socialist-realist compositions, usually in collaboration with others. They include the high reliefs *Heroism of the Civil War* and *Heroism of Socialist Construction* for the USSR pavilion at the 1939 New York World's Fair; the compositions *China Rises Up* (1933), *Partisan Raid* (1947), and *Loyalty* (1947); monuments to S. Kovpak (1971), V. Lenin (1964), M. Shchors (1954), and other Bolshevik leaders, in various towns; the memorial complex at the Kholm Slavy military cemetery in Lviv (1958); and the Babyn Yar memorial in Kiev (1976). Books about him were published in Kiev in 1958 and 1975.

Lysenko, Mykola, b 22 March 1842 in Hrynky, Kremenchuk county, Poltava gubernia, d 6 November 1912 in Kiev. Composer, ethnomusicologist, conductor, pianist, teacher, and community figure. The descendant of an aristocratic Cossack family, he acquired the rudiments of piano playing from his mother and gained a strong appreciation of Ukrainian music and Cossack lore from his grandparents. From 1860 he studied at Kharkiv and Kiev universities, graduating in 1865 with a degree in natural sciences. His stay in Kiev, his activities in the *Hromada of Kiev, and his close relationships with his cousin M. *Strytsky, and with V. *Antonovych, T. *Rylsky, and others, led Lysenko to make a strong personal commitment to the study and development of Ukrainian music. He worked for two years as an arbitrator in Tarashcha county, then furthered his music studies in Leipzig (1867–9) under K. Reinecke and E. Richter. After returning to Kiev in 1869 to work as a music teacher and conductor, he

Mykola Lysenko

moved to St Petersburg (1874–6) to study orchestration under N. Rimsky-Korsakov; then he returned to Kiev in 1904 to open his own school of music and drama.

At the time, Lysenko was at the center of Ukrainian cultural and musical life in Kiev. He gave piano recitals and organized choirs for performances in Kiev and tours through Ukraine in 1893, 1897, 1899, and 1902. He cultivated an informal network of patriotic Ukrainians, and headed the *Ukrainian Club from 1908. He also maintained close ties with community leaders in Western Ukraine from as early as 1867, most notably with I. Franko.

Lysenko's musical compositions were numerous and varied. His operatic works include the singspiel *Chornomortsi* (Black Sea Cossacks, 1872); the operetta *Natalka from Poltava* (1889); the operas (based on works by N. Gogol) *Christmas Night* (1873–82), *Utoplena* (The Drowned Maiden, 1883), and *Taras Bulba* (1890); the operetta *Aeneid* (1911); the miniature opera *Nocturne*; and three operas for children: *Koza Dereza* (Billy Goat's Bluff, 1888), *Pan Kots'kyi* (Sir Catsky, 1891), and *Winter and Spring* (1892). Other theatrical musical works include *Sappho* (1886–94), which is composed of scenes from life in ancient Greece, and music for W. Shakespeare's *Hamlet*.

An eminent concert pianist, Lysenko wrote many compositions for the piano. These works include a sonata, two rhapsodies, a suite, a scherzo, and a rondo, as well as a long list of smaller forms such as 'Songs without Words,' nocturnes, waltzes, and polonaises. In these works he often uses the melodies and rhythms of Ukrainian folk songs. In some, F. Chopin's influence is noticeable. In the field of chamber music, Lysenko wrote many works for violin and piano as well as a trio for two violins and viola and a string quartet. He also wrote a symphony (unfinished) and a symphonic fantasia.

Settings of words by T. Shevchenko occupy a special place in Lysenko's works. The settings include solo songs, choral works, and cantatas for choir and orchestra, such as *Raduisia nyvo nepolytaia* (Rejoice, Unwatered Field), *Biut' porohy* (The Rapids Roar), and *Na vichnu pam'iat' Kotliarevs'komu* (To the Eternal Memory of Kotliarevsky). Shevchenko's collection *Kobzar* particularly fascinated Lysenko, who composed music for 82 of its texts. He also wrote many vocal solos with piano accompaniment to the poems of I. Franko, Lesia Ukrainka, O. Oles, H. Heine, A. Mickiewicz, and others.

From an early age Lysenko displayed an interest in musical folklore. While still in school he began transcribing Ukrainian folk songs, and when working in Tarashcha

Title page of Mykola Lysenko's cantata, *Jan Hus* (design by Yuliiian Pankevych, 1888)

county he recorded the wedding songs of the Pereiaslav region and the dumas and songs performed by the renowned kobzar O. *Veresai. Lysenko's ethnomusicological works include *Kharakterystyka muzychnykh pytomnostei ukrains'kykh dum i pisen'*, *vykonuvanykh kobzarem O. Veresaiem* (Characterization of the Musical Traits of Ukrainian Dumas and Songs, Performed by the Kobzar O. Veresai, 1874; repr 1955) and *Narodni muzychni instrumenty na Ukraini* (Folk Musical Instruments in Ukraine, 1894; repr 1955). He also published several collections of folk songs.

Over his lifetime Lysenko arranged approx 500 folk songs, including both solos and choruses with piano accompaniment, and a cappella choruses. He concentrated on tonal and harmonic particularities of Ukrainian folk songs, selecting appropriate means for the arrangement of various types of songs and preserving the folk style of melodizing.

Lysenko was the founder of the national movement in Ukrainian music, based on a specific Ukrainian cultural tradition and the originality of its folk music. His prolific and versatile life's work became the foundation for the further development and expansion of Ukrainian musical culture. Lysenko influenced a large group of Ukrainian composers, including K. Stetsenko, Ya. Stepovy, M. Leontovych, O. Koshyts, S. Liudkevych, L. Revutsky, and M. Verykivsky.

A compilation of Lysenko's works was published in 20 volumes in Kiev in 1950–9.

W. Wytwycky

Lysenko, Ostap, b 13 July 1885 in Kiev, d 1 October 1968 in Kiev. Musical scholar; son of Mykola *Lysenko. After graduating from the Lysenko Music and Drama Institute in Kiev in 1930, he taught at music schools in Kiev until 1941, when he reorganized the Kiev Conservatory and be-

came its director. He later lectured at the Lviv (1945–51) and Kiev (1951–68) conservatories. He edited the collections *Neopublikovani vokal'ni tvory M. Lysenka* (The Unpublished Vocal Works of M. Lysenko, 1967) and *M.V. Lysenko u spohadakh suchasnykiv* (M.V. Lysenko in the Memoirs of His Contemporaries, 1968) and was instrumental in steering through publication a complete rendition of his father's works during the 1950s. He is also the author of the memoirs *M.V. Lysenko: Spohady syna* (M.V. Lysenko: A Son's Memoirs, 1959, 1966).

Lysenko, Sofiia, b 1865 in the Poltava region, d 10 November 1946 in Baku, Azerbadzhan. Opera singer (soprano). She learned singing by taking private lessons in St Petersburg and Italy. In 1887–91 she appeared in operas in Milan and Venice, and in 1891–3 sang as a soloist with the Kharkiv Opera. She appeared on stage in Moscow, St Petersburg, and Kiev. From 1912 she taught music in St Petersburg and Baku. Her main roles were Tamara in A. Rubinstein's *Demon*, Rosina in G. Rossini's *Barber of Seville*, and Dinorah in G. Meyerbeer's *Dinorah*.

Trokhym Lysenko

Lysenko, Trokhym [Lysenko, Troxym], b 29 September 1898 in Karlivka, Kostiantynohrad county, Poltava gubernia, d 20 November 1976 in Moscow. Agronomist and agrobiologist; full member of the AN URSS (now ANU) from 1934 and the USSR Academy of Sciences from 1939; head of the Michurinist trend in Soviet biology. Lysenko attended horticultural schools in Poltava (1913) and Uman (1917–20) and studied agronomy at the Kiev Agricultural Institute (1921–5). He rose to prominence in 1925–9 while posted in Azerbaidzhan, by publishing an article (1928) on the relationship between cold temperatures and late ripening, suggesting that it was possible to produce desirable characteristics by manipulating growing conditions. He experimented with winter wheat on his father's farm (1928–9) by burying germinating seeds in snow, and this measure reportedly led to greatly increased yields. Lysenko termed this procedure 'vernalization' (*yarovizatsiia*). In 1929 he was given a laboratory in the physiology division of the All-Union Selection and Genetics Institute in Odessa. To popularize his work, in 1931 the USSR Ministry of Agriculture created the journal *Biuletyn' iarovizatsii* (renamed *Iarovizatsiia* in 1935 and *Agrobiologiya* in 1946).

During the heyday of Soviet 'vernalization' (1929–35) Lysenko devised similar techniques and applied them to a wide range of vegetables, fruits, and grains. He and his

supporters made extravagant claims for the efficacy of his techniques, and 'vernalization' was reportedly used for many millions of hectares of crops in the early 1930s. For this work, in 1934 Lysenko became scientific director of the All-Union Institute of Genetics and Selection in Odessa and a full member of the Ukrainian Academy of Sciences. He led similar campaigns for the summer planting of potatoes (1935) and maize (1956), for grafting or 'vegetative hybridization' (late 1930s), for the 'grassland system' of planting (1939–52) and the 'cluster method' of forestation (1948–52), and for increasing the butterfat content in milk (1958–62).

In 1935 Lysenko joined forces with the Leningrad lawyer and philosopher I. Prezent and began to elaborate his agronomic practices into a theoretical framework with heavy ideological content. In pamphlets the two asserted that, with alteration in the conditions at the end of a developmental stage, the heredity of a plant could be destabilized or 'cracked,' and the plant thereby rendered plastic and malleable. Following the death of the plant breeder I. Michurin in 1935, Lysenko declared himself the heir to Michurin's tradition and named his own approach 'Michurinist biology,' as a contrast to the approach of G. Mendel and A. Weismann's genetics, a 'bourgeois capitalist science.' Lysenko was a member of the USSR government's Central Executive Committee (1935–7) and assistant to the president of the council of the Supreme Soviet (1937–50).

In 1935 N. *Vavilov was removed as president of the All-Union Academy of Agricultural Sciences (VASKhNIL), and Lysenko was elected a full member; the next year he was put in charge of its Odessa Institute. Lysenko assumed the president's post of VASKhNIL in 1938 and held it for almost two decades. With the help of the NKVD he used his position to harass and undermine Vavilov's supporters. After Vavilov's arrest in August 1940, Lysenko left Odessa to replace him as director of the academy's Institute of Genetics in Moscow, a post he held until 1965.

In 1948–9 the massive Soviet reforestation program made use of Lysenko's cluster method of planting and sustained extensive losses. Lysenko was forced to resign as president of VASKhNIL in 1956. By late 1958 he had embraced N. Khrushchev's agricultural policy, and he gained influence in the subsequent development of Khrushchev's agricultural program. In 1961–2 Lysenko was again briefly president of VASKhNIL. After Khrushchev's ouster a joint commission of the Ministry of Agriculture and the two academies investigated Lysenko's Lenin Hills experimental farm. It concluded that his experimental work had been carried out and tested improperly, and that all of his agricultural techniques were either ineffective or harmful. Lysenko was removed as director of the Institute of Genetics (1965), and it was officially disbanded, but he kept control of his Lenin Hills farm until his death.

M. Adams

Vera Lysenko

Lysenko, Vera (pseud of Vera Lesik, who also wrote under the name of Luba Novack), b 7 August 1910 in Winnipeg, d 20 October 1975 in Toronto. Writer; daughter of Ukrainian immigrants from Kiev gubernia. Lysenko graduated from the University of Manitoba (BA, 1930). She moved to eastern Canada in 1936 and worked for *Magazine Digest* in Toronto and for the *Windsor Star*. During and immediately after the Second World War she researched and wrote *Men in Sheepskin Coats: A Study in Assimilation* (1947), a popular examination of Ukrainian-Canadian life from the perspective of the pro-communist *Association of United Ukrainian Canadians. She also wrote two novels, *Yellow Boots* (1954, repub 1992), the story of a Ukrainian-Canadian girl who sacrifices everything for material success, and *Westerly Wild* (1956), a melodramatic tale of life in rural western Canada during the 1930s. She did not publish after 1956.

Lysenko, Yurii (Heorhii), b 21 April 1910 in Valiava, Cherkasy county, Kiev gubernia. Actor and stage and film director. A graduate of the Kiev Institute of Theater Arts (1940), he worked as an actor and the chief stage director in Volhynia, Melitopil, and Poltava theaters. In 1957 he began directing films at the Kiev Artistic Film Studio, where in 1978 he became artistic director of the film actors' theater. Among his films are *Iak by kaminnia hovorylo* (If the Stones Talked, 1957, based on a story by I. Franko), *Tavriia* (1959, based on a novel by O. Honchar), *Hroza nad poliamy* (A Storm over the Fields, 1959, based on a novel by A. Shyian), *Litak vidlitaie o 9-tii* (The Plane Leaves at 9, 1960), *Perevireno – min nemaie* (Confirmed, There Are No Mines, 1965), *Vohon'* (The Fire, 1974), and *Bilyi kruh* (The White Circle, 1975).

Lysenko Chorus. A choir established as the Canadian Ukrainian Opera Chorus in 1974 in Toronto under the auspices of the Canadian Ukrainian Opera Association; it was renamed in 1990. Its artistic director is V. *Kolesnyk, and its choirmaster, Z. *Lawryshyn. A mixed chorus num-

bering 60 voices, it has performed full and concert versions of operas by Ukrainian and Canadian composers in many North American cities. In 1979 the Lysenko Chorus premiered in the Western world A. Vakhnianyn's opera *Kupalo*. It has also performed world premieres of *Symphony No. 4* and *Concerto-Cantata for Piano and Chorus* by G. Fiala and the North American premiere of S. Liudkevych's symphony-cantata *Kavkaz*. In 1991 it staged a concert version of D. Sichynsky's opera *Roksoliana* in Toronto.

Lysenko Higher Institute of Music (Vyshchy muzychnyi instytut im. M. Lysenka). A school formed in 1903 by the *Lysenko Music Society in Lviv. An institute from 1907, it was an important training facility for Ukrainian musicians in Galicia. It grew from 6 teachers with 50 pupils in 1907 to 25 teachers with 248 pupils in 1935. Its directors included A. *Vakhnianyn (1903–8), S. *Liudkevych (1908–15), and V. *Barvinsky (1916–40). The institute began establishing branches in 1911 and eventually formed nine of them (Peremyshl, Stanyславiv, Stryi, Drohobych, Kolomyia, Ternopil, Zolochiv, Drohobych, and Boryslav). In 1935 the branches employed 30 teachers with approx 350 pupils. The institute had its own building in Lviv from 1916 and published *Muzychnyi vistyntyk* (The Music Bulletin) bimonthly. In 1940 it was amalgamated with the *Lviv Conservatory, and its branches were turned into independent music schools. Its structures and ethos later provided a model for the establishment of Ukrainian *music education societies in the West after the Second World War.

Lysenko Music and Drama Institute (Muzychno-dramatychnyi instytut im. M. Lysenka). A music school established in 1918 in Kiev, succeeding the *Lysenko Music and Drama School. The institute served as a major training center for many of the most promising musical and stage talents in Soviet Ukraine. It functioned until 1934, when it was restructured as the *Kiev Conservatory and the *Kiev Institute of Theater Arts. Musicians such as K. Stetsenko, M. Leontovych, M. Mykysha, P. Kozytsky, and D. Revutsky, and theater directors such as L. Kurbas, I. Stadnyk, and M. Starytska, taught at the institute.

Lysenko Music and Drama School (Muzychno-dramatychna shkola im. M. Lysenka). A school established in Kiev 1904 by Mykola Lysenko to foster the development of Ukrainian music. Lysenko financed the project with funds originally gathered by his supporters to buy him a country house for his 35th jubilee celebration. The school's curriculum was on the level of a conservatory, and there was a separate drama department and a museum of Ukrainian folk instruments. The school was directed initially by Lysenko and then by his daughter Mariana (1912–18). Teachers included Lysenko, H. Liubomyrsky, O. Myshuha, and M. Starytska. The school was the only Ukrainian higher music school of its day, and its influence in the development of Ukrainian music is reflected in the list of its graduates, which includes K. Stetsenko, O. Koshyts, L. Revutsky, and M. Mykysha. In 1918 the school was reorganized and renamed the *Lysenko Music and Drama Institute.

Lysenko Music Society in Lviv (Muzychne tovarystvo im. M. Lysenka u Lvovi). A society founded in 1903

to promote the development of Ukrainian music in Western Ukraine. Its original name, the Union of Song and Music Societies, was changed in 1907 to honor the work of Mykoia *Lysenko. The group's first president was V. Shukhevych. Other leaders included V. Barvinsky, S. Liudkevych, and N. Nyzhankivsky. The society sponsored concerts, competitions, and the publication of music. Its most significant undertaking was the running of a music school that eventually developed into the *Lysenko Higher Institute of Music.

Lysenko String Quartet (Kvartet im. M. Lysenka). A musical instrumental ensemble formed in Kiev in 1951 and named in honor of Mykola Lysenko in 1962. In 1989 members of the ensemble were A. Bazhenov and B. Skvortsov (violins), Yu. Kholodov (viola), and L. Krasnoshchok (cello). The ensemble has recorded works by D. Bortniansky, Lysenko, B. Liatoshynsky, and V. Barvinsky on the Melodiya label and has performed world premieres of works by S. Liudkevych, B. Liatoshynsky, A. Shtoharenko, A. Filipenko, P. Kozytsky, and A. Kos-Anatolsky. The ensemble's large repertoire (more than 250 works) testifies to its creative range and its efforts to familiarize listeners with various schools and styles. The quartet is equally at home with L. van Beethoven, D. Shostakovich, M. Skoryk, Ye. Stankovych, L. Dychko, and V. Sylvestrov.

Lysiak, Mariia [Lysjak, Marija], b 18 July 1916 in Monastyryska, Buchach county, Galicia. Heroic and character actress and singer. She worked in Y. Stadnyk's touring theaters (1935–9), in the Lviv Theater of Opera and Ballet and with Veselyi Lviv (1939–44), and in the Ukrainian theater in Aschaffenburg, Germany (1946–7). Since moving to the United States in 1949, she has appeared in productions of the Veselyi Lviv (1959–66) and Teatr u Piatnytsiu (1968–71) theaters.

Oleh Lysiak

Lysiak, Oleh [Lysjak], b 27 July 1912 in Lviv. Journalist and writer. He was a member of the press corps of the Division Galizien in 1943–5, and after the war he worked in Munich as an editor of the émigré papers *Ukrains'ka trybuna* (1946–8) and *Ukrains'kyi samostitnyk* (1950–2) and also edited there *Visti Bratstva kolyshnykh voiakiv i Ukrain's'koï dyvizii Ukrain's'koï Natsional'noi Armii* (1950–2). After emigrating to Philadelphia in 1953, he worked for the paper *Ameryka* (1953–7) and contributed feuilletons and articles to other Ukrainian émigré periodicals. Lysiak also wrote two novels about his comrades-in-arms and Galician con-

temporaries, *Za strilets'kyi zvychai* (The Rifleman's Way, 1953) and *Liudy taki, iak my* (People like Us, 1960), and edited a collection of articles about the Division Galizien, *Brody* (1951).

Pavlo Lysiak

Borys Lysiansky

Lysiak, Pavlo [Lysjak], b 10 March 1887 in Uhniv, Rava Ruska county, Galicia, d 8 January 1948 in Wattenscheid, West Germany. Lawyer, civic and political figure, and publicist; husband of M. Rudnytska and father of I. Lysiak Rudnytsky. As a student of law, economics, and political science at Lviv and Berlin universities he was active in the student movement. After the First World War he edited *Ukrains'kyi prapor* in Vienna (1919–21) and the monthly *Natio* (1926) in Warsaw. Upon his return to Galicia he practiced law in Zhuravno, near Stryi (1927–39), and in 1938 he was elected as a candidate of the Ukrainian National Democratic Alliance to the Polish Sejm. During the Second World War he practiced law in Cracow (1940–4) and then emigrated to Germany, where he served in Goslar as president of the Regional Representation of the Ukrainian Emigration in the British zone. A brilliant editor and journalist, he contributed many articles, particularly on economics and Soviet policy in Ukraine, to such papers as *Dilo*, *Novyi chas* (which he briefly edited), and *Krakivs'ki visti* and wrote the booklet *Nasha natsional'na polityka i ostannii Narodnii Z'їzd* (Our Nationality Policy and the Last Popular Congress, 1938).

Lysiak-Rudnytsky, Ivan. See Rudnytsky, Ivan Lysiak.

Lysianka [Lysjanka]. IV-11. A town smt (1990 pop 8,900) on the Hnylyi Tikych River and a raion center in Cherkasy oblast. It is first mentioned in a historical document in 1593. Lysianka was granted the rights of *Magdeburg law in 1622, and a castle was built there afterward. The town played an important role in the Cossack-Polish War of 1648–57, the popular uprisings against the Poles in 1664–5, and the haidamaka revolt of 1768. In 1674 the town was captured and almost razed by the Turks. Today Lysianka has a bakery, a mixed-feed factory, and a regional museum.

Lysiansky, Borys [Lysjans'kyj], b 22 September 1892 on Mezynivka *khutir* in Zvenyhorodka county, Kiev gubernia, d 7 September 1952 in Aulnay-sous-Bois, France. Physicist. An interwar émigré, from 1922 he chaired the physics department and Terminological Commission of

the Engineering Faculty at the Ukrainian Husbandry Academy (later Ukrainian Technical Husbandry Institute) in Poděbrady, Bohemia. A specialist in electric and radio technology, he wrote five volumes of lectures (1923, 1925–6) for use by the academy's students, a biography of V. Samilenko (1926), and articles on civic and political subjects. As a postwar refugee in Germany, he published the poetry collection *Pro patria* (1948). From 1950 he lived in France, where he was secretary of the Metropolitan Council of the Ukrainian Autocephalous Orthodox church.

Lysiansky, Yurii [Lysjans'kyj, Jurij], b 13 August 1773 in Nizhen, d 6 March 1837 in St Petersburg. Explorer and captain in the Russian navy. He completed naval training in the Kronstadt Naval Academy in 1786. In 1788–90 he took part in battles in the Baltic Sea. With the Estonian A. Krusenstern Lysiansky organized the first Russian expedition around the world on the *Neva* and the *Nadezhda* (1830–6). Lysiansky commanded the *Neva*, which followed the route Kronstadt–Cape Horn–Hawaii–Alaska–Canton–Cape of Good Hope–Kronstadt. His numerous oceanographic and ethnographic findings and the navigational charts made by him were published in 1812 as *Puteshestvie vokrug sveta na korable 'Neva' v 1803–1806 godakh* and appeared in English in 1914 as *Voyage round the World on the Ship 'Neva' in 1803–1806*. An island near the shore in the Sea of Okhotsk and a mountain on the island of Sakhalin have been named after Lysiansky.

Lysin, Borys, b 4 August 1883 in Novohrad-Volynskyyi, Volhynia gubernia, d 22 November 1970 in Kiev. Chemical engineer; full member of the AN URSR (now ANU) from 1939. He graduated from the Kiev Polytechnical Institute (1909) and taught there until 1956. He studied the methods of processing and the properties of raw silicates, clays, cements, and other building materials and researched the faience industry in Ukraine.

Kalenyk Lysiuk

Zinovii Lysko

Lysiuk, Kalenyk [Lysjuk] (also Lissiuk; real name: Lepykash, Vasyi), b 18 August 1889 in Bubnivka, Haisyn county, Podilia gubernia, d 12 August 1980 in Chicago. Revolutionary, civic leader, and philanthropist. In 1909 he was sentenced to 20 years' imprisonment for participating in an assassination plot, but he escaped within eighteen months. During the First World War he served in the Russian army, and during the revolutionary period (1917–20),

in the UNR Army. After emigrating to the United States in 1923, he sold rare postage stamps and later set up a manufacturing and an investment firm. He donated some of his expanding profits to Ukrainian cultural and charitable institutions, such as the Ukrainian Scientific Institute in Berlin, the Ukrainian Husbandry Academy in Poděbrady, the Ukrainian Invalids' Home in Lviv, and the Museum of Ukraine's Struggle for Independence in Prague. In 1954 he founded the Ukrainian National Museum in Ontario, California; he served as its president until it was merged four years later with the Ukrainian National Museum in Chicago. In 1958 he set up the Ukrainian-American Foundation. He published the bilingual journal *Our News* (1940) and the museum quarterly *Na slidakh* (1955–6), compiled three stamp catalogues, and wrote several political pamphlets.

Lysko, Zinovii [Lys'ko, Zinovij], b 11 November 1895 in Rakobovty, Kaminka Strumylova county, Galicia, d 3 June 1969 in New York. Musicologist and composer. A former Sich Rifleman, he studied composition privately in Lviv under V. Barvinsky and in Prague under F. Yakymenko, then musicology under Z. Nejedlý in Prague at Charles University (1926); he completed a doctorate (1929) at the Ukrainian Free University with a dissertation on S. Hulak-Artemovsky's opera *Zaporozhian Cossack beyond the Danube*. He also studied at the Prague Conservatory under J. Suk. He taught at the Kharkiv Conservatory and in Lviv at the Conservatory and the Lysenko Higher Institute of Music. After the Second World War he lived in Germany and (from 1960) the United States, where he taught at and was president of the *Ukrainian Music Institute of America.

Lysko's compositions are in the modern style and include orchestra, chamber, and piano works, as well as works for chorus and arrangements of Ukrainian folk songs. His writings include *Muzychnyi slovnyk* (Music Dictionary, 1933), *Ukrains'kyi muzychnyi leksykon* (Ukrainian Music Lexicon, 1947), and other reference works, bio-historical studies, textbooks, and articles on folk music. He was editor-in-chief of the journal *Ukrainska muzyka* (1937–9) and compiler of *Spivanyk Chervonoï kalyny* (The Chervona Kalyna Songbook, 1937), which contained arrangements of Ukrainian songs for chorus. He also edited and published the religious works of O. *Koshyts (1970). Lysko's magnum opus was his collection, analysis, and systematization of 11,447 Ukrainian folk songs in the 10-volume *Ukrains'ki narodni melodiï* (Ukrainian Folk Melodies, 1967–86 [vols 1–8]), the largest collected body of folk songs from Eastern Europe. This undertaking took nearly 15 years to complete (1947–61) and represents the culmination of Lysko's lifelong interest in Ukrainian folk music.

R. Savvitsky

Lysohir, Mariia. See Lesawyer, Mary.

Lysonia. A hill lying approx 4 km southeast of *Berezhany, situated between the valley of the Zolota Lypa River and its left-bank tributary, the Tsenivka. From September 1916 to July 1917 the front line between the Austro-Hungarian and Russian armies ran through this area. On 2–4 September 1916 the Ukrainian Sich Riflemen fought the Russian army there, and on 18 June 1919 the Ukrainian Galician Army defeated the Poles there.

Lysonia (3rd) Group of the Ukrainian Insurgent Army (Ternopilska [3] hrupa UPA Lysonia). A division of the UPA-West comprising combat units operating on the sparsely forested territory of the Third Military District (covering Ternopil oblast). Organized in 1943, units of the Lysonia Group fought their first battle with the Germans on 16 December 1943 in Koropets raion. By 1944 the Lysonia Group numbered at least 12 rifle companies and conducted its own school for noncommissioned officers. In the summer of 1944 most of the group moved temporarily into the Carpathian Mountains to avoid the German-Soviet front line, which came to a halt in the middle of Ternopil oblast. In August some of the returning companies were grouped into battalions and launched a series of raids against the NKVD. In September O. Polovy's brigade, consisting of two UPA battalions, fought several engagements in Berezhany county and then set off on a raid to Volhynia. Along the way it fought pitched battles on 24 September in Pochaiv raion and on 27 September in Zboriv raion. The largest battle in the district occurred on 30 September near Univ, Peremysliany raion, when D. *Karpenko's battalion pushed back a motorized NKVD brigade. In November 1944 Bystry's battalion set out on a raid from the Berezhany area through southern Galicia into Bukovyna, where it crossed the Dniester River and fought a major battle on 29 November.

In 1945 the Third Military District was restructured and divided into four tactical sectors, numbered from 16 to 19. The number of combat units was reduced, and they were assigned to specific sectors. During the summer of 1947 the last three companies were demobilized, and their soldiers were reassigned to the armed underground. The commanders of the Lysonia Group were Lt O. Polovy (nom de guerre: Ostap, 1943–5) and Maj V. Yakubovskyy (nom de guerre: Bondarenko, 1945–7).

P. Sodal

Lysovets, Demian [Lysovec', Dem'jan], b ?, d November 1654. Cossack officer. A close associate of Hetman B. Khmelnytsky, he served as his general osaul (1649–54) and as acting hetman in the Don (1650), Polish (1651), Moldavian, and Podilian (1653) campaigns. In 1654 Khmelnytsky sent him as a diplomatic envoy to Moldavia and Wallachia. He was also an adviser to T. Khmelnytsky.

Lyst. A legal document issued by the grand duke of the Grand Duchy of Lithuania. The *sudebnik* codified under Casimir IV Jagiellończyk in 1468 was called a *lyst*. Along with charters of privilege, *lysty* were a source of private rights. Documents of guaranty were also known as *lysty: zaliznyi lyst* was a safe-conduct and *lysty davaty* in the Cossack period meant 'to recommend.' In the Hetman state, *lysty* were the documents issued to regimental *starshyna* confirming their ownership of land.

Lystopad (November). A literary group of young nationalist writers which met in Lviv in 1928–31. Among its members were R. Drahan, V. Kovalchuk, B. Kravtsiv, S. Lenkavsky, R. Olhovykh, Ye. Pelensky, Zh. Protysyshyn, and V. Yaniv. The members published a collective volume, *Litavry* (Kettledrums), and contributed to *Literaturno-naukovyi vistnyk*.

Lysty do pryiateliv (Letters to Friends). A journal of politics, history, and culture, published as a monthly

Lysty do pryiateliv

(March 1953–December 1960), bimonthly (January 1961–April 1965), and trimonthly (May 1965–December 1967) in New York City. Its founder and chief editor was M. *Shlemkevych; after his death in February 1966 the journal was edited by V. Rudko and then by an editorial board consisting of D. Kuzyk, M. Stepanenko, and O. Tarnavsky. *Lysty do pryiateliv* contained essays and reports on a wide range of developments in Ukraine and on Ukrainian émigré life and Western culture, memoirs, and book and art reviews. It was nonpartisan, and frequently criticized the émigré Ukrainian establishment. Its contributors included prominent émigré figures. An index to the journal by R. Sawycky, Jr, was published in two parts (1964, 1969).

Lysy, Alberto [Lysyj], b 11 February 1935 in Buenos Aires, Argentina. Violinist, teacher, and conductor. The product of a musical immigrant family, he won musical awards as a youth that allowed him to study in Paris and London. In 1955 he won first prize at the Queen Elizabeth of Belgium International Competition, and then he went on to study with Y. Menuhin. He has toured extensively in solo recitals and with orchestras in Europe, Japan, India, and North and South America. He formed the Camerata Bariloche in Buenos Aires in 1965 and later became the director of the International Menuhin School in Gstaad, Switzerland, where he established a new chamber orchestra called Camerata Lysy.

Lysy, Illia [Lysyj, Illja], b 1882, d 2 January 1961 in Ternopil. Co-operative activist and civic and political figure. He was executive manager of Silskyi Hospodar in Lviv and was active in the Prosvita society, the Ridna Shkola society, and the credit co-operative movement. A onetime member of the National Democratic party, later he devoted much of his time to the Organization of the Ukrainians of Lviv and the Ukrainian National Democratic Alliance.

Lysy, Volodymyr [Lysyj], b 5 November 1893 in Kopychyntsi, Galicia, d 26 December 1966 in Detroit. Lawyer, publicist, and civic and political leader. In 1917, after studying law at Lviv University, he was drafted into the Austrian army, in which he served as liaison between the Austrian command in Ukraine and the Central Rada. In 1919 he worked in the State Secretariat of Internal Affairs of the Western Province of the Ukrainian National Republic and prepared a draft of the election law (with an extensive commentary) for the Ukrainian National Rada. After

Volodymyr Lysy

Yuriy Lytvyn

the war he passed his bar examinations and in 1924 opened a law office in Ternopil. He was an active member of local educational and economic organizations and also sat on the executive of the Ukrainian Socialist Radical party (from 1928 as its deputy leader). He left Ukraine in 1944, and in 1949, he settled in Detroit, where he was active in the Ukrainian-American Center and the Self-Reliance Credit Union. A leading figure in the Ukrainian Free Society of America, he edited and managed the journal *Vil'na Ukraina* for many years. Lysy wrote numerous articles on political and legal issues, some of which (eg, *Derzhavnyi status URSR v 1917–1923 rr.* [The Legal Status of the Ukrainian SSR in 1917–1923, 1963]) were published under separate cover.

Lysychanske [Lysyčans'ke]. v-19, DB II-4. A city (1990 pop 126,600) on the Donets River in Luhanske oblast. Founded in 1795, it is the oldest coal-mining center in the Donets Basin. It received the status of city in 1938. Today Lysychanske has six coal mines, an oil refinery, a soda, rubber, and glass factory, a regional museum, and the V. Sosiura Literary Memorial Museum.

Lysyk, Kenneth, b 1 July 1934 in Weyburn, Saskatchewan. Lawyer, educator, and judge. Educated at McGill University, the University of Saskatchewan (LL B, 1957), the University of Oxford, and Columbia University, Lysyk taught law at the universities of Toronto and British Columbia, where he was dean of the law school (1976–82). He held a number of advisory positions, served as deputy attorney general of Saskatchewan (1972–6), and acted as chairman of the Alaska Highway Pipeline Inquiry (1977). Lysyk was appointed Queen's Counsel in 1973 and appointed to the Supreme Court of British Columbia in 1983.

Lysyk, Yevhen, b 17 September 1930 in Shnyriv, Brody county, Galicia, d August 1991 in Lviv. Theatrical scenery designer. In 1961 he completed study at the Lviv School of Applied and Decorative Arts; since then he has worked as a designer in the Lviv Opera Theater (from 1967 as principal designer). He has also created scenery for productions in the Kiev Theater of Opera and Ballet (eg, B. Liatoshynsky's *Golden Ring*, 1971).

Lysytsia, Ivan [Lysycja], b and d ? Cossack colonel in the Bratslav regiment. A personal aide to Hetmans I. Samoilovych and I. Mazepa, he undertook diplomatic missions

on several occasions, most notably in 1685, when he was sent by Samoilovych to Constantinople to obtain from the patriarch confirmation for the election of H. Chetvertynsky as metropolitan of Kiev, and agreement for the transfer of Kiev metropolity to the jurisdiction of the Moscow patriarchate.

Lysytsia, Mykhailo [Lysycja, Myxajlo], b 15 January 1921 in Vysoke, Radomyshl county, Kiev gubernia. Physicist; full AN URSS (now ANU) member since 1982. A graduate of Kiev University (1950), he taught there and was a professor from 1963 to 1976. Since 1961 he has headed a department at the AN URSS Institute of Semiconductors. A highly productive researcher with a wide range of expertise, he has contributed substantially to the fields of molecular spectroscopy, semiconductor phonon modes, nonlinear optics, quantum electronics, thin-film physics, the interaction of laser light with transparent materials, and multi-quantum transitions.

Lyta Mohyla. See Melgunov kurhan.

Lytovchenko, Ivan [Lytovčenko], b 8 July 1921 in Buhuvate, Okhtyrka county, Kharkiv gubernia. Decorative artist. A graduate of the Lviv Institute of Applied and Decorative Arts (1954), he was one of the artists that created the mosaic wall panels inside the Kiev River Station (1961) and Boryspil Airport (1965) and the mosaic panel (with O. Kishchenko) at the restaurant of the Khreshchatyk metro station that was covered over by the Soviet authorities in the 1960s. He has created artistic tapestries, such as *Koliivshchyna* (1968), *Earth* (1987), and *Prometheus* (1989), together with his wife, Mariia, or V. Priadka, and the high-relief, mosaic-stone-and-metal compositions *Music* (1976), *To the Light* (1976), *Dawn* (1979), and *Creation* (1982) at the Chornobyl Atomic-Electric Station.

Lytovchenko, Oleksander [Lytovčenko], b 1835 in Kremenchuk, Poltava gubernia, d 28 June 1890 in St Petersburg. Painter. He studied at the St Petersburg Academy of Art until 1863. A cofounder of the St Petersburg Artists' Artel, in 1868 he was elected a member of the academy, and in 1876 he joined the *Peredvizhniki. He painted portraits and historical canvases, among them *Falconer* (1868), *Heavy Thoughts* (1866), *Christ in the Garden of Gethsemane*, and *Tsar Aleksei Mikhailovich and [Archbishop] Nikon* (1886). He painted seven murals in the Moscow Church of Christ the Savior.

Lytvak, Leonid, b 16 April 1899 in Tyraspil, Kherson gubernia, d 20 March 1970 in Kharkiv. Neurologist. A graduate of the Odessa Medical Institute (1924), he served as a professor at the Kharkiv Medical Institute (1941–5) and the Kharkiv Institute for the Upgrading of Physicians (1946–53) and the scientific director of the Ukrainian Psychoneurological Scientific Research Institute in Kharkiv (from 1953). His research dealt with the localization of brain functions, blood circulation within the brain, the circulation of cerebrospinal fluid, and the diagnosis of brain trauma.

Lytvyn, Mykhailo. See Michalon Lithuanus.

Lytvyn, Oleksander, b 21 November 1927 in Sumy. Geologist and mineralogist. He graduated from Kiev Univer-

sity (1952) and since 1969 has worked at the Institute of Geochemistry and the Physics of Minerals of the AN URSS (now ANU, as department head from 1979). His main contributions have been in the areas of mineralogy, crystal chemistry, structural crystallography, and X-ray analysis of crystal structures.

Lytvyn, Stepan, b 10 June 1931 in Holovchyntsi, now Karmaliukove, Zhmerynka raion, Vinnytsia oblast. Poet. Lytvyn graduated from the philological faculty of Kiev University (1954). His poetry began to appear in newspapers and journals in 1950. Since then he has published several collections, including *Sertse ne movchyt'* (The Heart Is Not Silent, 1958), *Pid nebom Krymu* (Under the Skies of the Crimea, 1960), *Bentezhnist'* (Embarrassment, 1966), *Rushnyk i shablia* (The Rushnyk and the Saber, 1972), and *Nezdolannist' liubovi* (Invincibility of Love, 1976). He has also translated poetry from Russian, Belarusian, Georgian, and Bulgarian into Ukrainian.

Lytvyn, Vitalii, b 5 February 1937 in Radyslavka, Rivne county, Volhynia. Artist. A graduate of the Lviv Institute of Applied and Decorative Arts (1964), he has done decorative carvings, woodcuts, oils, mosaics, ceramics, and stained glass. His works appeared in group exhibitions in Kiev (1971, 1972), Lviv (1972, 1973), and Yalta (1971). In 1980 he emigrated to Toronto, where he has continued to work as an artist; he has produced woodcuts and the iconostases in the Ukrainian Catholic churches in Niagara Falls and Chatham, Ontario.

Lytvyn, Yurii, b 1934 in Barakhty, Vasytkiv raion, Kiev oblast, d 5 September 1984 in Kuchino, Perm oblast, RSFSR. Journalist, poet, and dissident. He was sentenced on false charges five times and spent a total of 20 years in labor camps. In 1955, after he had served two years of a sentence, the sentence was revoked, but he was imprisoned again that year for allegedly having organized an anti-Soviet group in the labor camp. After being released in 1965, he returned to Ukraine and became active in the human rights movement. In 1974 he was sentenced to three years for 'slandering the state.' He joined the *Ukrainian Helsinki Group in 1978 and contributed articles to its underground bulletin. In spite of a severe stomach ulcer and thrombophlebitis, he was given three years in December 1979 for 'resisting authority' and an additional 10 years' imprisonment and 5 years' exile in 1982 for anti-Soviet agitation and propaganda. He died of unknown causes, probably of illness, in Perm Camp 36–1. His verses on prison life, titled 'Trahichna halereia' (The Tragic Gallery), have not been published. His remains were transferred (with those of V. Stus and O. Tykhy) to Ukraine and interred in Kiev on 19 November 1989.

Lytvynchuk, Ivan [Lytvynčuk] (nom de guerre: Dubovy), b 1917 in Derman, Dubno county, Volhynia gubernia, d 1951 south of Lutske, Volhynia oblast. Revolutionary and senior military officer. In the 1930s he served time in a Polish prison for his OUN activities. In 1942 he became the OUN (Bandera faction) chief leader for Sarny district, and in 1943 an organizer of the UPA and commander of its Zahrava Group (1943–5), which operated in the area between Rivne and Pynske. In 1943 he fought recurrent skirmishes with Soviet partisans, and in 1944 with NKVD troops. In 1945 he was promoted to major and appointed

commander of the UPA-North, and in 1949 deputy OUN chief for the northwestern region. Facing imminent capture by the NKVD, he committed suicide.

Lytvynenko, Leonid, b 12 January 1921 in Tahanrih, d 26 October 1983 in Donetske. Chemist; full member of the AN URSR (now ANU) from 1965. A graduate of Kharkiv University, he taught there (1950–65), was rector of Donetske University (1965–8), directed the Donetske branch of the AN URSR Institute of Physical Chemistry (1968–75) and the AN URSR Institute of Physical-Organic Chemistry and Coal Chemistry, and chaired the Ukrainian Section of the Scientific Council of the USSR Academy of Sciences (1982–3). His research covered the structure-reactivity relationship in organic compounds and the kinetics of organic reactions. He studied the mechanism of nucleophilic substitution in unsaturated carbon, sulfur, and phosphorus systems; elucidated the mechanism of organic catalysis in acyl transfer reactions, particularly nucleophilic catalysis in nonaqueous solvents; formulated the rules of bifunctional catalysis; and discovered a number of important organic catalysts.

Lytvynenko, Leonid, b 7 May 1938 in Kharkiv. Radio physicist and radio astronomer; AN URSR (now ANU) corresponding member since 1982. A graduate of Kharkiv University (1959), in 1976 he became a professor there. A specialist in radiation in the millimeter and submillimeter range, including radio astronomy at these wavelengths, he has also contributed to the fields of wave propagation and diffraction at high frequencies.

Lytvynenko, Serhii, b 5 October 1899 in Poltava gubernia, d 20 June 1964 in New York City. Sculptor. An interwar émigré from 1920, he studied at the Cracow Academy of Fine Arts (1924–9) and in Paris (1930), where he exhibited at the Salon des Tuileries. From 1930 he lived in Lviv, where he was an active portrait sculptor; executed many memorial monuments, including those to I. Franko, Metropolitan A. Sheptytsky, V. Pachovsky, and soldiers who died in battle for the liberty of Ukraine; and ran a pottery studio. Until 1941 he took part in the exhibitions of the Society of Friends of Ukrainian Art and the Association of Ukrainian Pictorial Artists. He was a postwar refugee in Germany, and from 1949 he lived in New York, where he cofounded and first headed the *Ukrainian Artists' Association in the USA (1952–7) and chaired the Ukrainian Literature and Art Club (1949–59). He participated in Ukrainian group exhibitions in New York (1953–62), Toronto (1953), and Syracuse (1956) and at the Carnegie Foundation in New York (1956) and the Wayne State University Art Museum in Detroit (1960), and sent his works to be exhibited in Paris at the Salon des Indépendants (1956, 1958, 1961). Three solo exhibitions of his work were held in New York (1957, 1961), and one in Philadelphia. Lytvynenko created many compositions and monuments, and over 100 bronze, plaster, or terra-cotta portraits, mainly of Galician and émigré cultural and political figures (eg, V. Barvinsky, M. Bentsal, M. Kolessa, I. Svientsitsky, K. Hrynycheva, E. Kozak, O. Harkavenko, O. Hrytsai, Ivan Mazepa, O. Boidunyk, L. Makarushka, F. Dudko, B. Kravtsov, R. Kupchynsky, I. Kernytsky, Ye. Malaniuk, V. Lesych, E. Andiiivska, M. Ponedilok, M. Shlemkevych, V. Kubijovyč, I. Rakovsky, L. Kuzma, V.

Serhii Lytvynenko and his bust of Hetman I. Mazepa

Lasovsky, M. Moroz, L. Morozova, I. Pryima, Gen O. Zahrodsky, V. Hrytsyn, I. Zhukovsky, V. Blavatsky, M. Fomenko). An impressionist of the post-Rodin school, he did not copy his models but tried to capture their emotional traits. A catalog of his works was published in New York in 1963.

S. Hordynsky

Lytvynenko, Valentyn, b 28 August 1908 in Kremenchuk, Poltava gubernia, d 15 December 1979 in Kiev. Graphic artist. He studied under M. Samokysh in Symferopol and at the workers' faculty of the Kharkiv Art Institute (1932–4). From 1941 he worked as a caricaturist for the satirical journal *Perets' and designed Soviet political posters and leaflets; *lubok pictures; linocuts, such as *The Jury* (1945), *Hunting Lyrics* (1951), *Hunting Jokes* (1961), and *Spring Silence* (1959); and linocut illustrations for books, including editions of fairy tales by L. Hlibov (1946), Lesia Ukrainka (1962), and I. Franko (1966), O. Vyshnia's stories (1954), and Ukrainian folk tales (1968).

Lytvynenko, Vasyli, b 2 February 1899 in Saratov, Russia, d 14 January 1966 in Moscow. Choreographer, ballet dancer, and singer. A graduate of K. Aleksitovich's ballet school in Saratov (1918), M. Mordkin's dance studio in Tbilisi (1922), and the Tbilisi Conservatory (1923), he worked as a ballet soloist and choreographer at the opera and ballet theaters of Saratov (1918–21), Tbilisi (1922–6, 1935–44), Kharkiv (1927–31, 1946–56), and Kiev (1932–4). He staged several ballets in which he himself performed, as Yarosh in M. Verykivsky's *The Nobleman Kanovsky* (the first Ukrainian ballet, premiered 1931 in Kharkiv and 1932 in Kiev), Major Campbell in B. Yanovsky's *Ferenji* (1932),

Valentyn Lytvynenko: *The Jury* (linocut, 1945)

and Danko in V. Nakhabin's *Danko* (1948). He also danced the roles of Phoebus in C. Pugni's *La Esmeralda*, Basilio in L. Minkus's *Don Quixote*, and Siegfried in P. Tchaikovsky's *Swan Lake*.

Mariia Lytvynenko-Volgemut

Lytvynenko-Volgemut, Mariia, b 13 February 1892 in Kiev, d 3 April 1966 in Kiev. Opera singer (dramatic soprano). In 1912–14 she performed in Sadovsky's Theater and then was a soloist at the St Petersburg Theater of Musical Drama. She returned to Ukraine in 1917, performed in Kiev, Kharkiv, and Vynnytsia, and was a soloist at the Kharkiv (1923–34) and Kiev (1934–51) operas. Lytvynenko-Volgemut created many classical stage parts

in Ukrainian opera – Odarka in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube* and Natalka and Terpelykha in *Natalka from Poltava*, the mother in M. Lysenko's *Taras Bulba*, Roksoliana in D. Sichynsky's *Roksoliana*, Oksana in A. Vakhnianyn's *Kupalo*, Varvara in K. Dankevych's *Bohdan Khmelnytsky*, and Hanna in M. Verykivsky's *Naimychka* (The Hired Girl) – and in classical opera – Yaroslavna in A. Borodin's *Prince Igor*, Lisa in P. Tchaikovsky's *Queen of Spades*, and the eponymous roles in S. Moniuszko's *Halka*, G. Verdi's *Aida*, and G. Puccini's *Tosca*. From 1946 Lytvynenko-Volgemut was a professor at the Kiev Conservatory.

Lytvynov, Ivan, b 7 July 1907 in Sumy, d 20 October 1976 in Kiev. Structural engineer; full member and secretary of the Academy of Construction and Architecture of the Ukrainian SSR from 1956. He graduated from the Kharkiv Civil-Engineering Institute (1930) and served as director of the Southern Scientific Research Construction Institute in Kharkiv (1952–7) and head of the academy's Department of Structural Foundations and Soil Mechanics (1963–76). He did research on the strengthening of reinforced concrete thermal structures and the deep stabilization of soils.

Lytvynov, Olimpii, b 5 November 1905 in Beryslav, Kherson county. Civil engineer. He graduated from the Odessa Industrial Institute (1928) and worked on housing construction projects in Artemivske, Kiev, Nykopol, Tbilisi, and Kharkiv. In 1946–63 he worked in Kiev at the Scientific Research Institute of Construction Materials and Products and the Scientific Research Institute of Building Production. In 1963 he joined the Kiev Civil-Engineering Institute. His main contributions are in building technology, particularly the application of stone in building exteriors.

Lytvynov, Volodymyr, b 16 April 1936 in Cherkaske, Slovianske raion, Donetsk oblast. Philosopher. A graduate of Lviv University (1963), he taught Latin and classical literature at the Nizhen Pedagogical Institute and headed the Department of Foreign Languages there until 1980. Since obtaining a candidate's degree in philosophy (1974), he has been a senior research associate of the AN URSR (now ANU) Institute of Philosophy. A specialist in 16th- to 18th-century Ukrainian thought, he has written a book in Ukrainian on the ideas of the early Enlightenment in the philosophical thought of Ukraine (1984); cocompiled a collection of descriptions of the philosophy and rhetoric courses of professors at the Kievan Mohyla Academy (1982); translated into Ukrainian Erasmus's *In Praise of Folly* (1981) and Phaedrus's fables (1986); contributed three chapters to the first volume of the ANU history of philosophy in Ukraine (1987); composed a university-level Latin textbook (1990); and coauthored a book on humanistic and Reformation ideas in Ukraine in the 16th and early 17th centuries (1990).

Lytvynova, Pelahiia (née: Bartosh), b 15 October 1833 at Tereben *khutir*, Chernihiv gubernia, d 20 September 1904 in Zemlianka, Hlukhiv county, Chernihiv gubernia. Ethnographer and civic activist. After graduating from the Elisavetskii Institute in Moscow (1852) she worked as a teacher in Zemlianka and collected economic statistics

and ethnographic materials. She wrote a school primer (1877), compiled an album of folk designs, *Iuzhnorusskii narodnyi ornament* (South Russian Folk Ornamentation, 1878; 2nd edn 1902), and wrote a study of wedding rituals in Zemlianka (1900).

Metropolitan Spyrydon
Lytvynovych

Andrii Lyzohub

Lytvynovych, Spyrydon [Lytvynovyč], b 6 December 1810 in Dryshchiv, Berezhany circle, Galicia, d 4 June 1869 in Lviv. Ukrainian Catholic metropolitan and political activist. After finishing his studies in Vienna with a doctorate in 1839, he delivered sermons at St George's Cathedral in Lviv and served as parish priest of St Barbara's Church in Vienna, and then became rector of the theological seminary in Vienna (1852). He was consecrated auxiliary bishop of Lviv in 1857 and elevated to the office of metropolitan of Halych in 1864. Lytvynovych was a prominent member of the Diet and the Reichsrat, in which he defended Ukrainian interests and fought Polish dominance in Galician affairs. He promoted the interests of the Ukrainian Catholic church by seeing through a *concordat establishing the equality of the Eastern and Latin rite churches in the Habsburg Empire and by gaining formal recognition for canonical chapters in Lviv and Peremyshl eparchies. Opposed to Russophilism, in 1859 he issued instructions to his priests to use Ukrainian in their pastoral work and to ensure its use in local schools. He was loyal to the Habsburg monarchy, and when administrative control of Galicia was granted to the Poles in 1867, he retired from political life.

Livchak, Yosyp. See Livchak, Osyp.

Lyzanivsky, Ivan [Lyzaniv's'kyj], b 1892 in Zarichia, Zolochiv county, Galicia, d 1934. Civic and political figure and publicist. In 1912 he moved to central Ukraine. He became a member of the Central Rada and of the CC of the Ukrainian Party of Socialist Revolutionaries (UPSR, the so-called central current), as well as one of the founders of the Sich Riflemen. He joined the Committee for the Defense of the Republic (March 1919), directed the Ministry of Press and Propaganda in the government of B. Martos (from April 1919), and was a member of the regional council in Khmilnyk. In 1921 a Bolshevik tribunal convicted Lyza-

nivsky at the show trial of V. Holubovych and the members of the CC of the UPSR. He was later released, and he worked for Knyhospilka publishers and edited the works of I. Franko. In 1934 Lyzanivsky was among those tried by P. Postyshev for espionage and treason; he was probably executed by the NKVD.

Lyzohub. A family line of Cossack *starshyna* from the Pereiaslav region, known from the B. Khmelnytsky period. Ivan Lyzohub (Kobyzenko) was colonel of Kaniv (1659, 1662) and Uman (1659–61) regiments and Hetman I. Vyhovsky's emissary to Moscow (1658). He was shot on Yu. Khmelnytsky's orders in late 1662 or early 1663. His brother was Yakiv *Lyzohub. Yakiv's son, Yukhym (d 1704), was general standard-bearer (1688–90), general flag-bearer (1694–8), colonel of Chernihiv (1698–1704) regiment, and Hetman P. Doroshenko's son-in-law. Yukhym's sons were Yakiv *Lyzohub and Semen Lyzohub (b 1678 or 1680, d 19 April 1734 in Hrodna); Semen graduated from the Kiev Academy in 1699 and was a fellow of the standard in 1715–34. The family also included Illia Lyzohub (b 26 October 1787 in Kulykivka, Horodnia county, d 1867 in Sedniv, Chernihiv county), who was a member of the United Slavs Masonic Lodge in Kiev, and his brother, Andrii *Lyzohub; both were aldermen in Sedniv. Andrii's sons were Dmytro and Fedir *Lyzohub; Fedir was head of the Hetman government in 1918.

Lyzohub, Andrii, b 16 June 1804 in Burkivka, Sosnytsia county, Chernihiv gubernia, d 1864 in Sorochyntsi, Myrhorod county, Poltava gubernia. Descendant of a Cossack officer family in the Chernihiv region; father of D. and F. *Lyzohub. He graduated from Moscow University and worked as a civil servant in 1827–38. He owned a large estate in the Chernihiv region, where his close friend T. *Shevchenko visited him in 1846–7. Lyzohub was a good musician and painter, as well as a supporter of Ukrainian language and literature. He was among the few who corresponded with Shevchenko in exile and who sent him material aid.

Lyzohub, Dmytro, b 29 July 1849 in Sedniv, Chernihiv county, d 22 August 1879 in Odessa. Revolutionary and political activist; son of A. *Lyzohub. In 1874 he joined a Kiev group of Russian populists led by I. Fesenko, and in 1877 he was one of the founders of the party *Zemlia i Volia (Land and Freedom). He was convicted of participating in terrorist activities, sentenced in Odessa by a military tribunal, and hanged.

Lyzohub, Fedir, b 6 November 1851 in Sedniv, Chernihiv county, Chernihiv gubernia, d 1928 in Yugoslavia. Civic and political leader; son of A. *Lyzohub. A member of the Chernihiv gubernia zemstvo assembly (1886–1901), he served as executive chairman of the Poltava gubernia zemstvo in 1901–15. He emerged as a defender of Ukrainian cultural interests: he ensured that the Poltava Zemstvo Building was built in a Ukrainian style, founded the Poltava Museum, erected a monument to I. Kotliarevsky in Poltava and published his works, and encouraged Ukrainian handicrafts. In 1915–17 he sat on the council of the Russian vicegerent for Caucasia. In the Hetman government he served as premier (10 May to 14 November 1918) and minister of internal affairs (10 May to 8 July 1918) and

Fedir Lyzohub

conducted a moderate conservative policy which sought a compromise with the Ukrainian National Union. Eventually he emigrated to the Crimea and, later, to the Balkans.

Lyzohub, Oleksander, b 1790 in the Chernihiv region, d 1839. Composer and pianist. He was one of the first Ukrainian composers for piano. His works include nocturnes, mazurkas, romances ('Death in a Foreign Land'), and sets of variations on Ukrainian folk songs ('Oh, There Is a Well in the Field,' 'And I Had a Wife,' and 'Don't Go to the Party, Hryts'). Contemporary sources also refer to some works by Lyzohub that have not survived, including two lyrical nocturnes.

Lyzohub, Yakiv, b ?, d 9 August 1698 in Chernihiv. Cossack *starshyna*. He served as colonel of Kaniv regiment (1666–9), Hetman I. Briukhovetsky's emissary to Moscow (1667), P. Doroshenko's general osaul (1669–74), and acting hetman (1670 and 1673). In 1674 he crossed over to Left-Bank Ukraine. He participated in the general council that signed the *Kolomak Articles and was a candidate for hetman in 1687. Lyzohub was known as a remarkable commander; he took part in the Chyhyryn and Crimean

campaigns and served as colonel of Chernihiv regiment (1687–98) and acting hetman at the siege of Oziv (1696). He was buried in the Yeletsnyi Dormition Monastery.

Lyzohub, Yakiv, b 22 October 1675, d 24 January 1749 in St Petersburg. Cossack officer; son of Yukhym and grandson of Yakiv *Lyzohub. He was educated at the Kievan Mohyla Academy, and served as general standard-bearer (1713–28), in the course of which service he accompanied Hetman I. Skoropadsky to Moscow in 1718, and general quartermaster (1728–49). He headed the government of the Hetman state in 1723–4, and after the death of Hetman D. Apostol he was senior representative of the *starshyna* in the Russian administration of the Hetmanate (from 1734). He took part in the Polish (1733) and Turkish (1737) campaigns. He is thought by some researchers to be the author of the *Lyzohub Chronicle.

Lyzohub Chronicle. A historical record written in 1742. Of its two sections the first is a chronological compilation of events from the beginning of the 16th century to the end of the 17th century on the basis of Cossack chronicles, and the second is an account of events in which the *Lyzohub family played an important role. The latter begins in the 1690s and covers the years 1725–37 in great detail. The chronicle ends with a description of the Cossack campaign against the Crimean Khanate commanded by Acting Hetman Ya. Lyzohub. Ukraine's past is evaluated in the chronicle from an autonomist standpoint, and its present is seen through the eyes of a Russian loyalist who is not uncritical of the tsarist policy toward Ukraine. The authorship of the work has been attributed by some (V. Antonovych, P. Klepatsky) to Ya. *Lyzohub; the possibility of his brother Semen's contribution has not been excluded. The chronicle was first published by M. Bilozersky in *Iuzhmorusskie letopisi* (South Russian Chronicles, 1856), and then in another version in V. Antonovych's *Sbornik letopisei, otnosiashchikhsia k istorii Iuzhnoi i Zapadnoi Rossii* (Collection of Chronicles Pertaining to the History of Southern and Western Russia, 1888).

M

Macaronics. Burlesque compositions, usually in verse, in which words of one or more languages are intermixed and hybridized. The form's inventor, the Benedictine monk T. Folengo, applied Latin endings to Italian words to produce the burlesque epic of chivalry *Baldus* (1517). The form spread through medieval Europe in schools, where macaronics were written using Latin or Greek and the vernacular. In Ukraine the form became popular with the wandering preceptors and in the *intermedes. I. *Kotliarevsky gave the form currency in modern Ukrainian literature when he used it in his *Eneida* (Aeneid, 1798–1809; 'Eneus noster magnus panus / i slavnyi troianorum kniaz'). As Latin and Greek gave way to the vernacular, authors using macaronics began to mix many languages to produce a humorous effect. Kotliarevsky used the technique in creating the character of Voznyi in his operetta *Natalka Poltavka* (Natalka from Poltava, 1819), in which the village scribe speaks a mixture of the learned Church Slavonic and the Ukrainian vernacular.

In that second use by Kotliarevsky macaronics soon lost the prime reason for their existence, the comic, and began to be used as a characterization technique. Many Ukrainian authors used a mixture of two languages to characterize the ethnic (Jewish, Russian, and Polish) and social origins of personages. The plays of the dramatists M. Kropyvnytsky, I. Karpenko-Kary, and M. Starytsky and the works of the prosaists Yu. Fedkovych, I. Franko, V. Vynnychenko, and V. Stefanyk, along with many others, are replete with such characterizations.

Closer to using macaronics in the original way are the works of such émigré writers as Ya. *Maidanyk, whose creation and alter ego Shtif Tabachniuk, with his mixtures of English and Ukrainian, became extremely popular in interwar Canada; Maidanyk's work was published in 1959 as *Vuiko Shtif Tabachniuk i inshi novi korotki opovidannia* (Uncle Shtif Tabachniuk and Other New Short Stories). E. *Kozak's *Hryts Zozulia* mixes the Pokutia Ukrainian dialect with many languages (German, Polish, Yiddish, and English); the author, like his hero, was displaced by the Second World War, and moved from his native Galicia to Germany and thence to the United States. *Hryts Zozulia's* macaronics have been the longtime staple of the humorous journal *Lys Mykyta* and have appeared in separate collections as *Hryts' Zozulia* (1973) and *Na khlops'kyi rozum Hrytsia Zozuli* (According to *Hryts' Zozulia's* Common Sense, 1982).

The rich field of 'Ukeish' (a Ukrainian-English linguistic mixture) is exploited by many Ukrainian-Canadian humorists and comedians (eg, T. Woloshyn, L. Goy) and has found its way into humorous folk songs and **kolomyiky* ('Sori, Meri, ia ne khtiv / ia traiuiu azh zipriv') as well as into works by such authors as I. Kernytsky (Iker), Z. Koshut, W. Cap, M. Ponedilok, and M. Koliankivsky (M. Tochylo).

D.H. Struk

Maccabees' Feast (*Makovii*). A church feast observed on 14 August (1 August OS). This day is noted for its ritual blessing of flowers and herbs picked and plaited into wreaths by young girls and women in the early morning before the church service. The blessed flowers and herbs were believed to possess magical and protective qualities, and were dried and hung in homes.

Mace, James, b 18 February 1952 in Muskogee, Oklahoma. Historian. He graduated from the University of Michigan (PHD, 1981). He worked at the Ukrainian Research Institute at Harvard University, where he studied the man-made famine of 1932–3 (1984–6), and directed the US (Congress) Commission on the Ukraine Famine in Washington, DC (1986–90). He wrote the *Report to Congress* (1988) resulting from the commission's research, as well as the monograph *Communism and the Dilemmas of National Liberation: National Communism in Soviet Ukraine, 1918–1933* (1983). He was the founder and chairman of the American Friends of *Memorial.

Macenko, Paul. See Matsenko, Pavlo.

Machine building. A branch of industry that builds machines, machine parts, and equipment for use in other industries. It includes *agricultural machine building, the *automotive, *electrotechnical, *locomotive, *railroad-car, and *construction and road-building machinery industries, and various other branches grouped under either heavy machine building (HMB) or light machine building (LMB). Under the Soviet classification of industry the *metalworking industry was closely related to machine building, and the two were usually grouped together in statistics.

The development of the machine-building industry in Ukraine began in the mid-19th century. The first plants produced agricultural machinery and, later, sugar refining equipment and textile machines. The industry grew rapidly in the second half of the century in response to the demand for machinery and equipment from the metallurgical, mining, and railway industries. Early production, particularly of steam turbines, boilers, and locomotives, was concentrated in the Donets Basin, the Dnieper Industrial Region, and Kharkiv. Initially, much of the industry was developed and owned by foreign firms and syndicates, which imported modern machinery from Western Europe. By 1913 Ukraine accounted for almost one-quarter of all machine building in the Russian Empire (excluding the Baltic regions and Poland). The industry was concentrated in the agricultural machine and locomotive branches; the other branches were poorly developed.

Machine building, along with all other branches of the economy, was severely disrupted by the First World War and the struggle for Ukrainian independence. Only in 1925 were prewar levels of production matched. Some

new plants were built in the 1920s, and many older ones were reopened. The greatest growth in the industry came during the industrialization drive of the First Five-Year Plan (1928–32), which stressed the development of heavy industry. Much capital was invested in Ukraine, especially in the Donets Basin. The republic's share of the USSR machine-building industry increased from 6.8 percent in 1925 to 12.1 percent in 1929, 21.6 percent in 1932, and 24.8 percent in 1938. Among the major HMB plants modernized in that period were a mining and railway machinery plant in Kramatorske, transport machine plants in Kharkiv and Luhanske, and metallurgical and mining-equipment factories in Donetske, Horlivka, Slovianske, Debaltseve, Kryvyi Rih, and Druzhkivka. New plants included a machine-building plant in Kramatorske, the Kharkiv turbine plant, and metallurgical plants in Dnipropetrovske. Many of them were the sole producers of specific machines in the USSR. By 1934 the machine-building industry had emerged as the largest and most important industry in Ukraine. In the second half of the 1930s Ukraine's share in the USSR industry declined somewhat, because the development of eastern regions of the RSFSR was given priority. The total number of factories in Ukraine increased from 94 in 1927 to 150 in 1940. The profile of the industry also changed: the importance of agricultural and railway machinery declined in comparison with that of mining, electrotechnical, and chemical machinery. In the interwar and postwar periods little attention was paid to the development of LMB.

At the outset of the Second World War many machine-building plants were evacuated to the east. Most of the physical plant that was left behind was destroyed. Soon after the German armies retreated, most factories were reconstructed. In the 1950s and 1960s Ukraine's machine-building industry expanded rapidly: from 1950 to 1965 the average annual growth rate in the machine-building and metalworking sector combined was 15.5 percent, compared to the industrial average of 11.1 percent. Ukraine's growth rate, however, was lower than that of the USSR: regions less affected by the war recovered more quickly. Since the mid-1970s the industry's growth rate has fallen considerably, to an annual average of 9.5 percent from 1965 to 1985, and much of the physical plant has deteriorated. Nonetheless, machine building has greatly increased its share in Ukraine's overall economy: in 1970 it accounted for 16.3 percent of all industrial production, in 1980 for 25.7 percent, in 1985 for 29.3 percent, and in 1987 for 30.5 percent. From 1980 to 1987 production in machine building and metalworking increased by 53 percent. The largest gains were registered in the instrument-making (87 percent), energy (74 percent), and chemical (70 percent) machine-building branches; the poorest performances were in the gas-processing (21 percent), automotive (16 percent), and cellulose-paper (13 percent) machine-building branches. The output of construction and road-building machines showed a decline of 3 percent in that period.

The machine-building and metalworking industries in Ukraine were subordinated to all-Union ministries in Moscow until the dissolution of the USSR, and most of their plant managers did not report to republican authorities. This industrial organization was introduced in the 1965 economic reform.

Heavy machine building. According to the Soviet classification system HMB referred to the conglomerate of me-

tallurgical, coal-mining, and mining machine building. According to a broader definition HMB includes also machinery for heavy industry, transport, and construction. The development of HMB is closely related to the overall development of "heavy industry."

Since HMB products are made of metals, the machine factories are usually located close to metallurgical plants. Ukrainian HMB benefits from the local availability of high-quality metals and plentiful energy and labor resources. Ukraine produced a wide range of modern machines and equipment for Soviet heavy industry and for export.

The HMB branch of metallurgical equipment turns out blooming rolling mills, equipment for blast furnaces, continuous-operation steel casting machines for cast slabs, oxygen converters, pipe welding and rolling mills, roasters for iron-ore pellets, section bending units, equipment for the vacuum casting of steel, rolling mills for the cold rolling of sheet and pipe, and wide-band sheet mills. Among the largest producers are the "New and "Old Kramatorske Machine-Building plants, the "Slovianske Heavy-Machine-Building Plant, the "Dnipropetrovske Metallurgical Equipment Plant, and the "Mariupil Heavy-Machine-Building Plant.

The coal-mining machinery branch produces cutter loaders, coal plows, power drills, powered roof supports, entry-driving machines, hydraulic excavators, ventilating and lighting equipment, and water pumps. The largest plants belonging to this branch are in Horlivka, Luhanske, Donetske, Druzhkivka, and Kharkiv.

The mining machinery branch manufactures machines and equipment such as cutter loaders and entry-driving combines, drill bits and drilling rigs, ventilation fans, ore-dressing equipment, rotary excavators with spoil dumpers, shaft and mine winches, shields, and surface equipment. The largest producers are plants in Kryvyi Rih, Konotip, Donetske, and Luhanske.

Oil and gas equipment produced in Ukraine includes turbodrills, turbine pumps, and other devices for deep exploration and exploitation. The largest plants of this branch are located in Drohobych, Chernivtsi, and Ivano-Frankivske. Ukrainian HMB plants accounted for almost one-third of all the chemical and petrochemical machines and equipment manufactured in the USSR. The most important plants are located in Sumy, Kiev, Berdychiv, and Khvastiv. The hoisting and conveying equipment branch in Ukraine manufactures cranes, conveyors, elevators, escalators, loaders, and stacking cranes. Of the many specialized enterprises of this branch the most important are in Kharkiv, Odessa, Kramatorske, and Lviv.

In the late 1980s the development of HMB in Ukraine, especially the growth of the metallurgical, mining, coal-mining, chemical, and transport equipment branches, was emphasized.

Light machine building. This classification refers to the group of machine-building branches that manufacture equipment and machinery for the textile, garment, leather, footwear, food-processing and food services, retail trade, and printing industries. It is also customary to include in LMB the production of consumer durables, even though these are dispersed throughout the entire machine-building sector in Ukraine.

Ukraine is a major manufacturer of food-processing equipment: in 1979 it accounted for almost half of all the USSR output. A variety of pasteurizing, bottling and canning, packing, baking, milling, and other machines are

produced in Cherkasy, Melitopil, Odessa, Symferopil, Poltava, and Smila. Production in that branch was worth some 368 million rubles in 1987.

The major centers for producing equipment and machinery for the retail trade and the food services industry are Kharkiv and Luhanske. The output includes refrigerators, steam tables, cash registers, and vending machines. Household goods, such as washing machines, refrigerators, and appliances, are produced in Kiev, Donetsk, Melitopil, Kharkiv, and Lviv. The production of those branches was worth 112 million rubles in 1987.

In 1979 almost one-third of all the machinery and equipment for the printing industry in the USSR was made in Ukraine. Duplicating machines and printing presses are made in Kiev, Kharkiv, Romen, and Odessa. Little (only 2 percent of the Soviet total) machinery and equipment for the textile and clothes industries is made in Ukraine.

Machine science. Machine science was introduced in Ukraine in the latter half of the 19th century by O. Latyshev and H. *Proskura at the Kharkiv Technological Institute, K. Shindler and M. Delone at the Kiev Polytechnical Institute, O. Dynnyk at the Katerynoslav Higher Mining School, and at the Lviv Polytechnical Institute. Until 1917 machine research was concentrated on problems of mechanics (Delone), the resistance of materials, the theory of elasticity and oscillation (Dynnyk and S. *Timoshenko), the theory of mechanisms (V. Kirpichov), metal cutting (K. Zvorykin), and the strength of materials (K. *Siminsky and A. *Vynohradov). M. *Kybalchych sketched the first recorded design of a jet-propelled flying machine, and Proskura designed propeller turbines. From 1918 scientific work on machines was conducted at the Institute of Technical Mechanics at the VUAN in Kiev, initially under the directorship of Timoshenko (1919–20). In the postwar period institutes were set up within the AN URSS (now ANU), with specialties in physical mechanics, electric welding, mechanics, cybernetics, technical thermophysics, electrodynamics, and metal physics. Machine science institutes were established in Kramatorske and Kharkiv, and the Ukrainian Scientific Research Institute of the Machine Tool and Instrument Industry was founded in Odessa. In the 1920s, research on farm machinery was undertaken at experimental stations in Hrushky (Kiev region), in Akyminske (Melitopil region), and at the Kharkiv Institute of Agricultural Machine Science and Machine Building.

Ukrainian scientists, such as D. *Grave, contributed to

theoretical machine science. M. *Krylov and N. Bogoliubov developed a theory of nonlinear mechanics that is applied in estimating the efficiency of electric machines and the stability of airplanes. Proskura specialized in the theory of hydraulic machines, A. *Vasylenko in the theory of tilling machines, and V. Dobrovolsky and S. *Serensen in machine parts. Yu. *Kondratiuk developed *rocket technology and wind turbines, and H. Chechet and D. *Hryhorovych contributed to aircraft construction. H. *Savin investigated the concentration of stress around openings in machine elements. H. *Pysarenko studied the strength of materials. A. *Kovalenko developed new methods of assessing the efficiency of turbomachines and thermal elasticity. The theory and construction of thermal engines and power equipment were worked out by I. *Shvets and Ye. Dyban. O. *Penkov, Yu. *Mytropolsky, and V. Kononenko studied the strength, endurance, and oscillation of mechanical systems, and H. Karpenko studied the physicochemical mechanics of materials. K. *Starodubov, V. Danylov, and V. *Svechnikov dealt with metals processing. A. *Filipov and A. *Pidhorny investigated the strength of large power machines. O. *Kukhtenko and O. Ivakhnenko developed the theory of automatic control and the regulation of mechanisms. M. *Kilchevsky examined the problems of impact theory.

Ukrainian specialists have developed advanced gas turbines and jet engines for airplanes (O. *Ivchenko and A. *Liulka), turbines (L. *Shubenko-Shubin), transport and passenger planes (O. *Antonov), welding machines and mechanisms (B. *Paton), farm machines (Shindler, A. Vasylenko, O. *Karpenko, L. *Kramarenko, P. *Vasylenko, Siminsky), and thermal engines (Shvets).

A number of journals in the different fields of machine science are published in Ukraine, all of them in Russian: *Dvigateli vnutrennego sgoraniia, Lokomotivostroenie, Gornye stroitel'nye i dorozhnye mashyny, Tekhnologiya i avtomatizatsiia mashinostroeniia, Stanki i rezhushchie instrumenty, Samoletostroenie i tekhnika vozdushnogo flota, Teplovye napriazheniia v elementakh konstruktsii, Soprotivlenie materialov i teoriia sooruzhenii, and Dinamika i prochnost' mashin*. The Institute of Machine Science and Agricultural Mechanics of the AN URSS (now ANU) published its collected papers in 1950–4.

L. Onyshkevych

Machine-tractor stations (*mashyno-traktorni stantsii*, or MTS). State-run institutions that provided machinery, combines, and other heavy equipment for agriculture in the USSR. In the 1920s, co-operatives were set up for the joint purchase and use of expensive farming equipment. They were organized by informal groups of peasants, agricultural *artels, *associations for the joint cultivation of land, and other bodies. The first MTS is considered to be the Shevchenko MTS in Bereziv raion, Odessa county. It was organized in 1927–8 by the agronomist A. Markevych, who proposed a system in which the MTS provided farmers with tractors and other machinery as well as seed and technical expertise (although the peasants did most of the work) in return for a portion of the grain harvest. The relationship between the partners was contractual. The idea spread quickly, and various *state farms and other organizations in Ukraine and the RSFSR began to establish stations. Markevych's initiatives soon gained the attention of the authorities. In 1929 the All-Union Center of Machine-Tractor Stations was established as a joint-

stock association to co-ordinate the development of the MTS.

Official support for the movement grew quickly after 1930 and the beginning of the forced *collectivization of agriculture. Then the Party realized the importance of the MTS as an instrument for controlling the peasantry and implementing Party policies, especially in *grain procurement. In 1933, political departments were organized in all the MTS, and personnel were selected according to political criteria. They were usually workers or other city residents who knew little about agriculture, yet they were given great authority over the collective farms. The lack of trained agricultural machine operators and machinery in good repair further diminished the economic impact of the MTS. Such problems were particularly acute in the 1930s. The MTS came under the Ministry of Agriculture, which provided general guidelines for their activities. The stations signed formal contracts with collective farms, setting rates and conditions of work. After the mid-1930s a typical contract gave the MTS up to 22 percent of the crop.

Machine-tractor stations in Ukraine, 1940–57

	1940	1945	1950	1957
Number of MTS	1,227	1,227	1,347	1,367.0
Number of 15-HP tractors (in 1,000s)	77.3	44.4	80.7	118.0
Total power of tractors (in 1,000 HP)	1,371	737	1,832	2,740.8
Number of combines (in 1,000s)	27.9	12.5	26.2	51.6
Number of trucks (in 1,000s)	6.9	3.0	10.2	14.4
Area tilled under contract (in 1,000 ha)	51,472	23,767	71,362	124,632

Despite those problems, the MTS movement in Ukraine continued to grow (see the table). By 1957 the stations were servicing 14,700 collective farms and performing 85 percent of all fieldwork. Forty-three percent of all stations served from 6 to 10 collective farms, and 44 percent served from 11 to 20 farms. Some 610,000 people were employed by the MTS (1956), 48,000 of whom were administrative staff, 32,000, political cadres, and the rest, operators or mechanics.

Under N. Khrushchev the MTS were initially given an expanded role and greater authority over the collective farms. They failed to meet expectations, however, and were abolished in 1958. Their tractors and machinery were transferred to the collective farms, although repair and technical stations were established to provide facilities for major repairs, rent specialized equipment, and distribute spare parts and fuel.

Machtet, Grigorii [Mačtet, Grigorij], b 15 November 1852 in Lutske, d 27 August 1901 in Yalta. Russian writer and revolutionary populist of Ukrainian-Polish descent. In 1870–1 he was a teacher in Volhynia, where he became a friend of M. Starytsky. From 1872 to 1874 he worked as a farm laborer in the United States and began publishing

stories in Russian journals about his travels and about immigrant life. He was imprisoned in 1876. From 1877 to 1885 he lived in political exile in northern Russia and Siberia and continued publishing stories and novels. While living in Zhytomyr (1896–1900) he contributed to the paper *Volyn'* and befriended M. Kotsiubynsky. Editions of his complete works were published in 1902 (12 vols) and in 1911–13 (10 vols). His novel *I odin v pole voin* (And a Single Warrior in the Field, 1886), about life in a Western Ukrainian village, appeared in a Ukrainian translation in 1929. M. Grebennikov published a book about Machtet in Kiev in 1961.

Machukhy settlement and burial mounds. A Scythian settlement and burial ground of the 6th to 5th century BC near the village of Machukhy, now in Poltava raion. Excavations by M. *Rudynsky in the 1920s and again in 1946 exposed substantial quantities of ceramic vessels (bowls, jars, ladles, small goblets), iron knives, and the bones of domesticated fauna within the boundaries of the settlement. Excavation of the burial ground in the late sixties and early seventies revealed the existence of two types of burial traditions and a variety of grave goods. Excavations in 1969 uncovered a fragment of a mold for a Scythian-style stag figurine – the first physical evidence of the local production of such ornaments.

Maciej of Miechów (Ukrainian: Matvii z Miekhova; actual surname: Karpiga), b 1457 in Miechów, near Cracow, d 8 September 1523 in Cracow. Polish historian and geographer, and physician by profession. He was a professor (from 1485) and rector (1501–19) of the Cracow Academy and the author of *Tractatus de duabus Sarmatis Asiana et Europiana et de continentis eis* (1517; Polish trans 1535), a survey of Asian Sarmatia east of the Don River and the European lands from the Vistula to the Don, in which he recognizes the geographic, cultural, and linguistic identity of Ruthenians (Ukrainians). The work was translated into several languages and reprinted 18 times during the 16th century; it became a standard reference work on the subject in Europe.

Maciejowski, Waclaw, b 1793, d 9 February 1883 in Warsaw. Polish historian. He was a professor of Roman and universal law at Warsaw University (1818–31) and a proponent of Pan-Slavism. He researched the cultural development and legal history of the Slavic peoples, particularly the customary laws of Ukrainians and Russians. He wrote *Historia prawodawstw słowiańskich* (The History of Slavic Legislations, 4 vols, 1832–5) and *Polska i Ruś aż do pierwszej połowy w. XVII pod względem obyczajów i zwyczajów* (Poland and Rus' up to the First Half of the 17th Century with Respect to Customs and Traditions, 4 vols, 1842).

Mackerel (*Scomber scombrus*; Ukrainian: *skumbriia, makrelia*). A commercially valuable fish of the perch family Scombridae, found in temperate and tropical seas. It grows up to 50 cm in length and approx 1.6 kg in weight. Its back is bluish-green with several curved black stripes, and its belly is silver-white. In Ukraine mackerel is abundant in the Black Sea and rarer in the Sea of Azov.

Mackiw, Theodore [Mac'kiv, Teodor] b 30 May 1918 in Strutyn, Zolochiv county, Galicia. Historian. He studied at

Theodore Mackiw

Vladimir Mackiw

the University of Frankfurt, where he received a PHD (1950) for his dissertation on the Ukrainian Cossacks in German literature of the first half of the 18th century. A resident of the United States since 1950, he also studied at Seton Hall (1953–4) and Yale (1959–61) universities. From 1962 to 1984 he taught at the University of Akron. His major works are *Mazepa in dem Lichte der zeitgenössischen deutschen Quellen (1687–1709)* (1963), *English Reports on Mazepa: Hetman of Ukraine and Prince of the Holy Roman Empire, 1687–1709* (1983), and a book in Ukrainian on Hetman I. Mazepa in Western European sources of the years 1687–1709 (1988).

Mackiw, Vladimir [Mac'kiv, Volodymyr], b 4 September 1923 in Stanyslaviv (now Ivano-Frankivske), Galicia. Metallurgical engineer; fellow of the Chemistry Institute of Canada and the American Institute of Mining and Metallurgical Engineers, and full member of the Shevchenko Scientific Society since 1962. He was educated at universities in Breslau, Erlagen (1946), and Leuven (1948). He emigrated to Canada in 1948, where he joined Sherritt Gordon Mines Ltd (1949) and became a director of research (1952) and executive vice-president (1972). A specialist in the extraction of nickel from ore, he was a member of the National Research Council of Canada (1971–7), an adviser to the Ministry of Energy, Mines, and Resources (1972–9), and chairman of the Nickel Development Institute (1984–6). In 1976 he received an honorary doctorate from the University of Alberta, and in 1977 the Gold Medal of the Institute of Mining and Metallurgy in London, England. In 1991 the Mackiw Materials Center was opened in Fort Saskatchewan, Alberta. Mackiw is the author of numerous scientific publications and the holder of over 50 patents.

Maday, Andrij [Madaj, Andrij], b 26 November 1953 in Philadelphia. Graphic artist and iconographer. A graduate of the Pennsylvania Academy of Fine Arts (1977), he spent a year as resident artist at Manor Junior College (Jenkintown, Pennsylvania) and studied icon painting under Rev Yu. Mokrytsky at St Theodore's Studite Monastery in Castel Gandolfo, Italy. Maday has had 22 solo exhibitions of his woodcuts and drawings and has participated in many group shows. He has also created icons on panels and decorated St Joseph's Church in Chicago.

Madey, Johannes, b 23 April 1933 in Katowice, Silesia, Poland. German Catholic scholar; member of the Shevchenko Scientific Society since 1985. He studied philosophy and theology in Fulda and Munich, and completed a DTH in 1961 with a dissertation on V. Solovev. He has been a professor of Eastern theology at the Johann-Adam-Möhler Ecumenical Institute in Paderborn since 1972, and an honorary professor of the Pontifical Eastern Institute of Religious Studies in Kottayam, the only faculty of Eastern Catholicism in India. He has also served as a special adviser on Eastern Christianity to the Melchite and German Catholic churches. Madey has published several monographs on the history and organization of the Ukrainian Catholic church, including *Kirche zwischen Ost und West* (1969) and *Le Patriarcat Ukrainien vers la perfection de l'état juridique actuelle* (1971), and articles in *Encyclopedia of Ukraine*, *Bohosloviia*, and other collections and journals.

Madrid. See Spain.

Maetians (*meoty*). Ancient agricultural tribes inhabiting the eastern shore of the Sea of Azov (Greek: Maeotis) between the Don River and the Kuban River, from the 1st millennium BC to the middle of the 1st millennium AD. The Maeotians are mentioned in old Greek and Roman sources. According to Strabo they included the Sindians, the Dandarii, and the Doschi. Some of the tribes spoke an Iranian language, others a language related to that of the Adygs. In the 4th and 3rd centuries BC the Maeotian tribes were under the *Bosporan Kingdom.

Semen Magalias

Magalias, Semen [Magaljas], b 17 May 1885 in Vynnyky, Lviv county, Galicia, d 1978 in Newark, New Jersey. Civic and military figure. While studying law at Lviv University he became active in the Prosvita society and then worked as an inspector and organizer for the Silskyi Hospodar society. With the collapse of the Austrian Empire he volunteered for service in the Ukrainian Galician Army and was put in charge of arms acquisition. He headed the foreign affairs department of Otaman S. Petliura's general staff and later the mobilization department of the UNR Army (1920–1). After returning to Lviv he served as executive director of the Prosvita society's head office in Lviv from 1922 to 1939. Magalias compiled a list of Ukrainian books that were banned and confiscated by the Polish authorities in the interwar period (1932; 2nd rev edn 1937). Under the German occupation he was secretary of the

Lviv municipal executive. At the close of the war he emigrated to Germany and then to the United States.

Magdalenian culture. The last of the Paleolithic cultures in Europe, named after the rock shelter of La Madeleine in France. It lasted in Ukraine from approx the 20th to the 8th millennium BC. People of the Magdalenian culture engaged in hunting, gathering, and fishing. They lived a seminomadic life in loose tribal groupings with a matriarchal structure. Their dwellings consisted of conical huts made from animal skins placed on a frame of large bones (occasionally wood) and secured by stones and bones. Their flint technology, while still primitive, had become more sophisticated than in earlier eras. Notable artistic developments took place during this time, especially as seen in sculpture (particularly female figurines carved out of mammoth tusks) and (cave) paintings of the period. Important Magdalenian culture sites in Ukraine include Molodove v, Mizyn, and Kyrylivska. (See also *Paleolithic Period.)

Magdeburg law. The legal code adopted in medieval times by the city of Magdeburg and copied by many municipalities in Germany and Eastern and Central Europe, including Ukraine and Belarus. The code was based on the compilations of *Germanic law (the *Sachsenspiegel*) and showed little influence of Roman law. It combined norms of customary law with various municipal regulations.

Magdeburg law (ML) was brought to Ukraine by German colonists. King Danylo Romanovych and his successors granted them the right to establish their own judicial and administrative institutions and to use their own law. When Ukrainian territories were annexed by Lithuania and Poland, the right to use ML was granted by Polish kings or Lithuanian grand dukes. The first cities to receive ML included Volodymyr-Volynskiy (before 1324), Sianik (1339), Lviv (before 1352), Kamianets-Podilskiy (1374), and Berestia (1390). In the 15th and 16th centuries several towns of Right-Bank Ukraine received it, including Kiev (1494). Originally, ML applied only to the German inhabitants of the town. It was extended to all the residents of a town for the first time in Sianik, by Yuriy II Boleslav.

Initially, the appointed *viit* (mayor) held much power in cities under ML, but eventually the cities purchased his power for themselves. The **magistrat* from then on was composed of an elected *viit*, two **burmistry*, and a body of **raitsi*. New members of the *magistrat* were co-opted. In a few instances the *viit* and *lava* court members were elected, and then the *magistrat* members were chosen from among the court members. Judicial authority was shared by the *magistrat* and *lava* court: their powers were not always distinctly defined. The *lava* courts were usually responsible for criminal matters. The *magistrat's* unrestricted power often led to an abuse of power by the city oligarchy. To protect the public against abuses, the king sometimes set up competing bodies representing the interests of the general population; eg in 1577 King Stephen Báthory established the *izba gminna* in Lviv to represent the broad spectrum of city residents and to advise the *magistrat*.

According to the first royal charters, the *magistrats* in towns governed by ML were to be composed of both Polish (Catholic) and Ukrainian (Orthodox) representatives. The Poles, however, often pushed the Ukrainians out of the

city councils. In Kamianets-Podilskiy there were three separate national jurisdictions: Ukrainian, Polish, and Armenian. Only a few Ukrainian cities, including Lviv, Kiev, and Kamianets-Podilskiy, enjoyed the full rights of ML. Most towns had only partial rights; eg, their *viit* or *starosta* remained independent of the *magistrat*. In these towns, *magistrat* and *burmistry* were elected. The Lviv *magistrat* acted as an appellate court for other cities of Galicia.

The *Pereiaslav Treaty of 1654 guaranteed the rights of the Ukrainian cities governed by ML. The following cities in the Hetman state enjoyed ML: Kiev, Chernihiv, Pereiaslav, Starodub, Nizhen, Oster, Kozelets, Pohar, Pohep, Mglin, Novhorod-Siverskyi, and Poltava. Most of them received ML during the Polish-Lithuanian period, and the hetmans confirmed their rights. The rest obtained ML from the hetmans or the Russian tsars. The cities of the Hetman state usually had only some of the rights of ML: appeals of the decisions of city courts were heard by regimental courts and from 1730 by the General Court, and the regimental *starshyna* interfered in municipal affairs and limited the autonomy of the cities. However, some towns without ML acquired certain trappings and privileges of ML. Municipal self-government declined at the end of the 18th and the beginning of the 19th century, as Ukraine lost its autonomy and was absorbed into the Russian Empire. In 1831, the tsar finally abolished ML in all the cities except Kiev, where it remained in force until 1835. In Western Ukraine it was abolished by Joseph II in 1786.

The institution of ML in Ukraine promoted the formation of a distinct social estate out of the urban population. Although its influence was not as strong as in Western Europe, ML did introduce certain characteristics of Western city life into Ukraine and played an important role in bringing Ukrainian culture and law closer to European developments.

The main sources of ML in Western Ukraine and the Hetman state were 16th-century Polish translations of German and Latin codes done by P. Szczerbic and B. Groicki. In the second half of the 17th and in the early 18th century these codes were translated into Ukrainian. City courts relied not only on these codes but also on the *Lithuanian Statute and on local customary law. The *Code of Laws of 1743 provided for municipal self-government based on ML, but it did not come into force. ML was increasingly replaced by the Lithuanian Statute in the 18th century.

Many historians and jurists have studied ML in Ukraine, including V. Antonovych, M. Vladimírsky-Budanov, O. Kistiakovskiy, O. Lazarevskiy, M. Hrushevskiy, D. Bahalii, M. Vasylenko, F. Taranovskiy, D. Doroshenko, and A. Yakovliv. In general, Hrushevskiy and Vladimírsky-Budanov pointed to the negative consequences of ML, while Antonovych, Bahalii, and Yakovliv noted its positive influence on Ukraine's legal and social traditions. Since the 1930s Soviet historians have paid little attention to ML and have usually been critical of its influence on the development of Ukrainian cities. (For further bibliography, see also *Germanic law.)

Magic. A set system of notions, rituals, and invocations that are believed to have a mysterious mystical power to influence physical phenomena or natural events. Magical practices can be traced into the distant past. They can be classified by their social function into malefatory, military, love, medical, preventative, productive, and meteorological, or by their psychological mechanism into contact (touching an object), imitative (similarity or mimicry), and sympathetic (substitution of part for the whole).

Magic played an important role in the life of Ukrainians, particularly the peasantry. Not a step could be taken without it. It was used widely in medicine: shamans used spells and charms, often combined with rational practices, employing medicinal plants or psychotherapy. Water, fire, and eggs were held in the highest esteem by Ukrainian sorcerers. Magic was also an important part of calendric folk rituals tied to farming (sowing, harvesting, taking livestock to pasture) and family life (birth, marriage, and death). Wetting with water, leaping over a fire, and the use of fur coats as a symbol of wealth often appear in these rituals. The most common form of malefatory magic was witchcraft. Witches were believed capable of depriving a cow of milk, of harming crops, and of inflicting disease and even death on particular people, but also of charming young men, of protecting people from disease, and of canceling the spells of other witches.

Magic is closely tied to religion. In the Middle Ages white magic, which invoked the saints and angels, and black magic, which turned to 'unclean spirits' such as devils and demons, were practiced widely in Ukraine. The alleged practitioners of black magic were often tried by the community or the courts, but there were no witch hunts comparable to those known in Western Europe.

Magistrat. An institution of municipal self-government in Ukrainian cities enjoying *Magdeburg law in the 14th to 18th centuries. It was composed of the **viit* (mayor), two **burmistry* (chairmen of the city council), and two *collegia*: the city council composed of *raitsi*, and the **lava* court. The officers and councilmen were elected by the city's residents or co-opted by sitting members. Sometimes the *viit* was appointed by the crown or landlord. The *magistrat* was responsible for city administration, the courts, the local economy and finances, and the police. This institution spread throughout Right-Bank Ukraine in the 15th to 17th centuries, to most cities of the Left Bank in the first quarter of the 17th century, and to Slobidska Ukraine in the early 18th century. In the Russian Empire *magistraty* were introduced by Peter I in the early 18th century to bring Russian urban administration closer to Western European models. They were abolished as organs of municipal self-government after the urban reforms of the

1780s, but the term was used until the 1860s to describe courts for merchants. In Ukrainian territories under Austrian and then Polish rule, the term was applied to the municipal executive that was elected by the municipal council.

Magner, Yukhym, b 1883, d 1931. Painter and set designer of German origin. In the 1920s he worked in Kharkiv for the Franko Theater (until 1926) and the Chervonozavodskyi Ukrainian Drama Theater. He designed the sets for productions of I. Karpenko-Kary's *Suieta* (Vanity), Ya. Mamontov's *Respublika na kolesakh* (Republic on Wheels), B. Lavrenov's *Rozlom* (The Split), I. Kocherha's *Pisnia v kelykhu* (Song in a Chalice), and M. Starytsky's *Oborona Bushi* (The Defense of Busha). An early victim of the Stalinist terror, he died in a Soviet prison camp.

Paul Magocsi

Sylvester Magura

Magocsi, Paul, b 26 January 1945 in Englewood, New Jersey. Historian. He studied at Rutgers and Princeton (PHD, 1972) universities and worked at the Harvard Ukrainian Research Institute as a scholarly associate and lecturer (1976–80). He has held the Chair of Ukrainian Studies at the University of Toronto since 1980 and became director of the Multicultural History Society of Ontario in 1990. His main scholarly interests include the history of Galicia and Transcarpathia and East Slavic immigration to the United States. He has written *The Shaping of a National Identity: Subcarpathian Rus', 1848–1948* (1978), *Galicia: A Historical Survey and Bibliographic Guide* (1983), and *Our People: Carpatho-Rusyns and Their Descendants in North America* (1984). He also prepared *Ukraine: A Historical Atlas* (1985) and *Carpatho-Rusyn Studies: An Annotated Bibliography* (vol 1 [1975–84], 1988). Magocsi has advocated a 'Rusyn,' as opposed to Ukrainian, identity for the inhabitants of Transcarpathia and the Prešov region. A bibliography of Magocsi's works was published in 1985.

Magura, Sylvester, b 2 January 1897 in Husiane, Lublin gubernia, and d ? Archeologist. He specialized in the Trypilian culture and wrote many scholarly articles during the 1920s and 1930s. In 1934 Magura became a member of the AN URSR (now ANU) Institute of the History of Material Culture. He remained in this position until 1937, when he was arrested in the Stalinist terror and sent to a prison camp, where he died. In 1960 he was rehabilitated.

Magura. The name (derived from a Rumanian word for hill) of several mountains and mountain ridges in the Ukrainian Carpathians. The highest of them is the Magura Ridge (1,362 m in height), located between the Opir and the Myzunka rivers in the High Beskyd. Also of note are Mt Magura (1,015 m) in the Hutsul Beskyd between the Cheremosh and Seret rivers in Bukovyna and Mt Magura in the southern part of the Gorgany.

Magyarone. The term applied, often pejoratively, to members of the Transcarpathian intelligentsia, especially the Greek Catholic clergy and hierarchy, who in the 19th and early 20th centuries consciously Magyarized themselves. Although some Magyarones sympathized with the Transcarpathian Russophiles or with the *tuteishi*, that is, the local patriots with a low level of Ukrainian national consciousness, they believed that Transcarpathia's Ukrainians would be better off if they became linguistically and culturally Magyarized. They actively fostered that assimilationist goal in the church and schools, where they introduced the use of Hungarian, through their Magyar-language periodicals *Kelet* (1888–1901) and *Görögkatholikus Szemle* (1899–1918) and through Budapest-based organizations, such as the National Committee for Magyars of the Greek Catholic Rite (est 1898) and the Union of Magyar Greek Catholics (est 1902). In the 19th century they opposed Transcarpathian 'awakeners' such as Rev O. Dukhnovych, A. Dobriansky, and Rev I. Rakovsky. After 1920, when Transcarpathia was part of Czechoslovakia, they propagated the idea of Transcarpathia's restoration to Hungary, and during the 1939–44 Hungarian occupation of Transcarpathia they supported and collaborated with the M. Horthy regime. Some prominent Magyarones were Bishops S. *Pankovych (I. Pankovics) and A. Papp of Mukachiv and I. Novak of Prešov, the scholars S. *Bonkáló and A. *Hodinka, and the politicians A. *Beskyd, A. *Brodii, M. Demko, S. *Fentsyk, Rev O. *Illytsky, Y. *Kaminsky, M. Kutkafalvy (Kutka), and A. Stefan (not to be confused with A. Shtefan).

Mahadyn, Trokhym, b 1801 in Bubny, Lohvytsia county, Poltava gubernia, d after 1876. Kobzar. His repertoire included the classical dumas, such as those about the flight of the three brothers from Azov, Ivas Konovchenko, and the storm on the Black Sea. In 1876 P. Martynovych wrote down not only Mahadyn's dumas and songs but also his account of the kobzar brotherhood and its initiation rites.

Mahala settlement. A *Noua culture settlement of the late Bronze and early Iron ages, located near the village of Mahala, Chernivtsi oblast. Excavated between 1955 and 1960, this site and the *Ostrivets archeological site are the most illustrative examples of Noua culture in Ukrainian lands.

Mahalevsky, Yurii [Mahalevs'kyj, Jurij], b 1876 in Podilia gubernia, d 29 October 1935 in Lviv. Painter. He studied, at the St Petersburg Academy of Arts, under I. Repin and then in Paris. In 1917–18 he worked in education in the Katerynoslav region. As an émigré, from 1922 he lived in Lviv, where for many years he headed the *Ukrainian Emigrant Aid Society. Mahalevsky painted many portraits of Ukrainian leaders, such as Gen A. Huly-

Hulenko, Gen M. Omelianovych-Pavlenko, I. Lypa, I. Svientsitsky, O. Zaharov, and S. Fedak; painted decorative murals in churches and chapels in Galician villages, such as Holosko Velyke, Uhersko, Stare Selo, Olesko, Rava Ruska, and Kholoiv; and illustrated books. His recollections were published in *Literaturno-naukovyi vistnyk* and the *Dnipro* almanacs.

Mahar, Volodymyr, b 5 July 1900 in Kalnybolota, Zvenyhorodka county, Kiev gubernia, d 11 August 1965 in Zaporizhia. Stage director and actor. In 1934 he completed study at the Lysenko Music and Drama Institute in Kiev. In 1936 he joined the Kiev Oblast Touring Theater as artistic director and actor. He moved in 1938 to Zhytomyr and then in 1944 to Zaporizhia with the theater, of which he remained artistic director until his death.

Mahda, Ivan, b 12 June 1904 in Barvinkove, Iziium county, Kharkiv gubernia. Veterinary surgeon. A graduate of the Kharkiv Veterinary Institute (1926), he began working there in 1927 (today the Kharkiv Zootechnical-Veterinary Institute) and became head of the surgery department in 1935. He is the author of scholarly works and textbooks on anesthesiology and veterinary surgery.

Mahdalynivka. v-15. A town smt (1990 pop 7,000) on the Chaplynka River and a raion center in Dnipropetrovske oblast. It was founded in the late 18th century and was made an smt in 1958. The town has a regional museum and several enterprises of the food industry.

Mahomet, Yosyp, b 13 January 1880 in Kornyn, Skvyra county, Kiev gubernia, d 27 September 1973 in Skvyra, Kiev oblast. Horticulturist. A self-educated man, he began working at the Skvyra experimental farm in 1919 and became head of its selection and seed cultivation division in 1946. He developed and refined over 100 fruit, vegetable, and flower varieties, among them the 1-528 onion, the 247-4 carrot, and the Skvyra early melon.

Maiak, Yosyp [Majak, Josyp], b 25 December 1882 in Pidlisnivka, Sumy county, Kharkiv gubernia, d 28 October 1974 in Kiev. Stage actor. Maiak worked in the troupes of M. Yaroshenko, D. Haidamaka, and L. Sabinin in 1908–14 and in the Kharkiv Theater of Miniatures in 1918. He studied at the Kharkiv Theater-Studio under the direction of Ya. Mamontov and I. Yukhymenko in 1920–2 and worked in the Kharkiv Franko Theater (1923–6), the Dnipropetrovske Ukrainian Drama Theater (1926–7), the Kharkiv Chervonozavodskiyi Ukrainian Drama Theater (1928–30), and the Odessa Ukrainian Drama Theater (1931–64). He played Shevchenko in S. Holovanivsky's *Poetova dolia* (A Poet's Fate) and the title role in W. Shakespeare's *Othello*.

Maiak. A publishing house founded in Odessa in 1964 on the basis of the Odessa Oblast Newspaper-Journal Publishers (1945–60) and the Odessa Book Publishers (1960–4). It publishes books on a wide range of topics, including regional studies, and tourist guides to Odessa, Mykolaiv, and Vinnytsia oblasts. In the early 1970s it published approx 100 titles annually, with a total run of approx 1.2 to 2.4 million copies.

Maiak (Beacon). An illustrated weekly of culture and civic affairs, published in Kiev from January 1913 to July 1914. Edited by Z. Shevchenko, it published articles on literary and historical topics, political commentaries, prose, and poetry. Contributors included P. Tychyna, Ya. Mamontov, O. Slisarenko, and M. Hodovanets. Special issues were devoted to M. Kotsiubynsky, T. Shevchenko, and Lesia Ukrainka. The journal advocated liberal democratic politics and devoted special attention to the Ukrainian and peasant questions in the Russian Empire. The tsarist government used the pretext of the outbreak of the First World War to close down *Maiak*.

Maiak (Beacon). A Russian literary and cultural monthly published in St Petersburg in the years 1840–5. It was edited by P. Korsakov and S. Burachek, who despite their reactionary, xenophobic views promoted 'Little Russian' literature and published in the journal works by the Ukrainian writers H. Kvitka-Osnovianenko, P. Hulak-Artemovsky, Ye. Hrebinka, O. Korsun, K. Dumytrashko, and T. Shevchenko, and articles by such ethnographers as I. Sreznevsky, M. Kostomarov, A. Metlynsky, and O. Afanasiev-Chuzhbynsky.

Maiakovsky, Vladimir [Majakovs'kij], b 19 July 1893 in Bagdadi (now Maiakovsky), Georgia, d 14 April 1930 in Moscow. Russian futurist poet of Ukrainian descent. His attitude to Ukraine ranged from one of great sympathy for the land of his ancestors and its language, as in 'Dolg Ukraine' (Debt to Ukraine, 1926), to one of Russian chauvinism, as in 'Nashemu iunoshestvu' (To Our Youth, 1927). Many editions of his poetry have appeared in Ukrainian translation, including *Vybrane* (Selections, 1936, 1940) and *Vybrani tvory* (Selected Works, 3 vols, 1953).

Heorhii Maiboroda

Platon Maiboroda

Maiboroda, Heorhii [Majboroda, Heorhij], b 1 December 1913 at Pelekhivshchyna *khutir*, Kremenchuk county, Poltava gubernia, d 7 December 1992 in Kiev. Composer; brother of P. Maiboroda. A student of L. Revutsky, he graduated from (1941; graduate studies, 1949) and taught at (1952–8) the Kiev Conservatory. In 1967–8 he served as head of the Union of Composers of Ukraine, and in 1967, 1971, and 1975 as deputy to the Supreme Soviet of the Ukrainian SSR. His works commonly use heroic and patriotic themes in monumental forms, and have achieved wide recognition among state authorities and the general public. He composed the operas *Mylana* (1957), *Arsenal*

(1960), *Taras Shevchenko* (1964), and *Yaroslav the Wise* (1973); three symphonies (1940, 1952, 1976); a concerto for voice and orchestra (1969); the symphonic poems *Lily* (text by T. Shevchenko, 1939) and *Kameniari* (Stone-cutters, text by I. Franko, 1941); the vocal-symphonic poem *Zaporozhians* (text by L. Zabashta, 1954); and the orchestral *Hutsul Rhapsody* (1949). He also wrote songs to texts by V. Sosiura, T. Masenko, A. Mickiewicz, Lesia Ukrainka, I. Franko, and P. Tychyna, as well as incidental music for W. Shakespeare's *Hamlet* and *King Lear*. Together with L. Revutsky he edited and orchestrated piano and violin concertos by V. Kosenko.

R. Savytsky

Maiboroda, Platon [Majboroda], b 1 December 1918 at Pelekhivshchyna *khutir*, Kremenchuk county, Poltava gubernia, d 8 August 1989 in Kiev. Composer; brother of H. Maiboroda. He studied under L. Revutsky and graduated (1947) from the Kiev Conservatory. His works include the symphonic overture *Prometheus*, choral works, and the vocal-symphonic poem *Poplar* (text by T. Shevchenko, 1966). He is best known for his popular songs, such as 'The Kiev Waltz,' 'White Chestnuts,' 'Song about the Dnieper,' and the widely familiar 'Rushnychok' (Embroidered Towel, text by A. Malyshko), which is commonly known as 'Ridna maty moia' (Dear Mother Mine). He was awarded the Shevchenko State Prize in 1962.

BIBLIOGRAPHY

Hordiichuk, M. *Platon Ilarionovych Maiboroda* (Kiev 1964)

Maichyk, Ivan [Majčyky], b 1927 in the Lemko region. Folk musicologist, composer, and conductor. He was artistic director of the Trembita Kapelle, which he founded, and the Choir of the Lviv Television and Radio Committee. He has published seven collections of folk music, arranged over 120 Lemko songs for choir, and set over 150 poems to music. His chief works are *Ukrains'ki narodni pisni v obrobtsi I. Maichyky* (Ukrainian Folk Songs Arranged by I. Maichyk, 1980), *Oi zatsvila cheremshyna* (Oh, the Chokecherry Has Bloomed, 1981), and *Ukrains'ki narodni pisni z repertuaru O. Vrabelia* (Ukrainian Folk Songs from O. Vrabel's Repertoire, 1982).

Maidansky, Vsevolod [Majdans'kyj] (Kolomiitsev-Maidansky), b 10 December 1927 in Kalisz, Poland. Orthodox bishop. He studied theology at the Warsaw Theological Seminary and at the Dillingen Theological University in Germany, and social work at Yeshiva University in New York (MA, 1964), and worked at the Albert Einstein College of Medicine. In 1985 he was ordained a priest of the Ukrainian Orthodox Church of America, and in 1987 he was consecrated a bishop and head of the church. He has been actively involved in the ecumenical movement, in cultivating close relations with other Ukrainian Orthodox churches and the Ukrainian Catholic church and serving as a member of the Standing Conference of Canonical Orthodox Bishops of America.

Maidanyk, Yakiv [Majdanyk, Jakiv] (Maydanek, Jacob), b 20 October 1891 in Svydova, Chortkiv county, Gali-

Yakiv Maidanyk: title page of his *Vuikova knyha*

cia, d 3 June 1984 in Winnipeg. Cartoonist and writer. After emigrating to Canada in 1911, he graduated from teachers' college in Brandon and worked as a teacher for a while. His popular caricatures and humorous letters and stories on Ukrainian immigrant life, written in the voice of the loutish cartoon character Shtif Tabachniuk, appeared in the Ukrainian and English press. He also wrote a successful comedy, *Manigrula* (1915). In the 1920s he edited and published the magazine **Vuiko* and illustrated calendars of Shtif Tabachniuk. He also published two collections of his drawings and writings, *Vuikova knyha* (Uncle's Book, 1931) and *Vuiko Shtif Tabachniuk i inshi novi korotki opovidannia* (Uncle Shtif Tabachniuk and Other New Short Stories, 1959). H. Kuchmij's film *Laughter in My Soul* (1983) provides a portrait of Maidanyk and his comic creation.

Maievsky, Ivan [Majevs'kyj], b and d ? Political activist and journalist. He appeared in Kiev in 1917; his origin remains a mystery. Some claim he came to Ukraine from the United States. He was elected to the CC of the Ukrainian Party of Socialist Revolutionaries, and represented the party in the Central Rada and the Little Rada. He published the paper *Konfederalist*, which advocated independence for Ukraine. In January 1919 he organized an unsuccessful uprising against the Rumanians in Khotyn. He was last seen in April 1919.

Maifet, Hryhorii [Majfet, Hryhorij], b 1 August 1903 in Romen, Poltava gubernia, d 13 September 1975 in Kanin, near Pechora, RSFSR. Literary scholar and critic. He graduated from the Poltava Institute of People's Education in 1924 and completed postgraduate studies at the Taras Shevchenko Scientific Research Institute in Kharkiv. From 1931 to 1934 he taught Western European literary history at the Poltava Pedagogical Institute. He was arrested in 1934 and was sentenced to 10 years' imprisonment in concentration camps. He was released in 1946 and was ordered to settle in Kanin in the Soviet Arctic. Maifet was fluent in English, German, French, Italian, and Spanish. From 1925 to the time of his arrest he published over 100 articles dealing with the development of Ukrainian and Western literatures and with translations of the works of T. Shevchenko into other languages. Among his works were *Materiialy do kharakterystyky tvorchosty P.H. Tychny*

Hryhorii Maifet

Ivan Maistrenko

(Materials for the Characterization of the Work of P.H. Tychnyna, 1926), *Pryroda noveli: Zbirka persha* (The Nature of the Novella: First Collection, 1928), *Pryroda noveli: Zbirka druha* (The Nature of the Novella: Second Collection, 1929), *'Meni odnakovo' ta ioho vidtvorennia v anhliis'komu i nimets'komu perekladakh* ([Shevchenko's] 'Meni Odnakovo' and Its Rendering in English and German Translations, 1929).

Maiorov, Mikhail [Majorov, Mixail] (né Biberman), b 10 January 1890 in Skorodnoe, Homel county, Mahiliou gubernia, d 20 January 1938. Bolshevik activist and Soviet official. After the February Revolution in 1917 he was a leader of the Bolshevik faction in the Kiev Council of Workers' Deputies, chairman of the Bolshevik All-Ukrainian Provisional Committee (May–June 1918), and a leader of the Bolshevik underground in Kiev and Katerynoslav. Under Soviet rule he was a candidate (1918–20) and full member (1920–1) of the CC CP(B)U, first secretary of the Party's Odessa Gubernia Committee (1922–3) and Odessa Oblast Committee (1932–3), deputy head of the CP(B)U Central Control Commission (CCC; 1927–30), a member of the All-Union CCC (1927–34), the people's commissar of supply in Ukraine (1930–2), and a candidate member of the CC CP(B)U Politburo (1932–3). He wrote books on the revolutionary struggle in Ukraine in 1914–19 (1922; Ukrainian trans 1928) and the 1905 Revolution in Ukraine (1932). He perished in the Stalinist terror.

Maisky, Mykhailo [Majs'kyj, Myxajlo] (pseud of Mykhailo Bulgakov), b 3 June 1889 in Hraivoron, now in Kursk oblast, RF, d 31 December 1960 in Kharkiv. Writer. Maisky initially wrote in Russian, and was first published in 1920. He then began writing in Ukrainian, joined Hart and Vaplite, and published collections of stories, among which were *Nich* (Night, 1925), *Tvortsi biloho mista* (The Creators of the White City, 1927), *Borh* (Debt, 1930), *Industriial'ni etudy* (Industrial Etudes, 1930), *Ispyt* (The Test, 1930), *Noveli* (Novellas, 1930), *Zlochyny staroho maistra* (The Crimes of the Old Master, 1931), and *Kosmynyna problema* (Kosmyn's Problem, 1932). He was repressed in the early 1930s, and withdrew from further literary work.

Maistrenko, Ivan [Majstrenko] (pseud: Babenko, Daleky, Korsun, Radchenko, Hrebinka, Avgur), b 28 August 1899 in Opishnia, Zinkiv county, Poltava gubernia, d 18 November 1984 in Munich. Political figure and publicist.

In 1919–20 he was a leading member of the *Borotbists' Kobeliaky partisan brigade. In 1920 he entered the CP(B)U together with the Borotbists, but he soon quit it to join the independentist *Ukrainian Communist party (UKP), was elected to its CC, and became a UKP activist in the Donbas (1920–1). When the UKP was forced to dissolve in 1925, he rejoined the CP(B)U and worked as an editor for the republican papers *Selians'ka pravda* and *Komunist*, in the cooperative movement, and as a political lecturer and propagandist. He played an important role in the Ukrainization of Odessa as deputy chief editor of the city paper *Chornomors'ka komuna* (1929–31). From 1931 he was deputy director of the All-Ukrainian Communist Institute of Journalism in Kharkiv. After being expelled from the Party in 1935, he was arrested in December 1936, and he survived over a year in a Kharkiv prison and three years in Siberian labor camps. In 1942–3, under German rule, he managed the Ukrainian Banduryst Kapelle that toured Western Ukraine and entertained Ukrainian *Ostarbeiter* in Germany. As a postwar refugee in Bavaria he led the left faction of the *Ukrainian Revolutionary Democratic party and edited its monthly newspaper **Vpered* (1949–59). He also prepared regular political commentaries and analyses for Radio Liberty and was a professor at and rector (1979–84) of the *Ukrainian Technical and Husbandry Institute. Maistrenko wrote numerous articles and brochures (many under the pseud Babenko) on Soviet politics, economics, and society and on Marxist theoretical issues. His most important works are *Borot'bism: A Chapter in the History of Ukrainian Communism* (1954); books, in Ukrainian, on the nationality policy of the CPSU (1978) and the history of the CPU (1979); and his memoirs, *Istoriia moho pokolinnia* (History of My Generation, 1985).

Maivsky, Dmytro [Majivs'kyj] (nom de guerre: Taras Kosar), b 8 November 1914 in Reklynets, Zhovkva county, Galicia, d 19 December 1945. Revolutionary and OUN leader. He joined the OUN when he was still a secondary-school student, and eventually was placed in charge of its cadres in Zhovkva county. During the Soviet occupation of Galicia (1939–41) he was OUN commander for Sokal okruha and delegate to the Second Great Assembly of the OUN. In May 1943 he was appointed to the three-man OUN Executive Bureau and placed in charge of propaganda. He was editor of *Ideia i chyn* (1942, 1944–5) and one of the organizers of the Third Great Assembly, which made major revisions in the OUN political program. He died in battle against Soviet border guards as he tried to cross the Soviet-Czechoslovak border.

Majer, Józef, b 12 March 1808 in Cracow, d 3 July 1899 in Cracow. Polish anthropologist. A doctor of medicine and a surgeon by profession, he held the Chair of Physiology at Cracow University (1848–56, 1861–77), where he also served as rector (1848–51, 1865–6). Among his numerous works are a study (with I. Kopernicki) of the physical traits of Galicia's population in *Zbiór wiadomości do antropologii krajowej* (vols 1 and 9, 1877, 1885) and articles on the physical traits of Ukrainians in the Dnieper region as compared to those of Ukrainians in Galicia (1879) and on the annual physical growth of Galicia's population (1881). A biography of Majer, by A. Wrzosek, was published in Wrocław in 1957.

Majolica or maiolica. Earthenware made of colored, coarse-grained clay and covered with a white tin glaze. A massive form, brilliant glaze, and sharp color contrast are its typical features. Majolica was introduced in Italy from Moorish Spain through the island of Majorca or Maiolica (hence its name). Introduced in Ukraine as early as the 11th century, majolica tableware was used by the nobility there, and majolica tiles decorated the Church of the Tithes and St Sophia Cathedral in Kiev and other churches in Chernihiv, Halych, and Volodymyr-Volynskyy. In the 17th to 19th centuries majolica tiles, tiled stoves and fireplaces, and tableware were produced in Kiev and in Nizhen, Horodnia, and Ichnia in the Chernihiv region. Today majolica products are made by potters in Opishnia, in Poltava oblast; Ichnia and Nizhen, in Chernihiv oblast; Vasylykiv and Dybyntsi, in Kiev oblast; Hnylets and Holovkivka, in Cherkasy oblast; Bubnivka and Bar, in Vinnytska oblast; Smotrych, in Khmelnytskyi oblast; Kosiv and Kolomyia, in Ivano-Frankivske oblast; and Vilkhivka, in Transcarpathia. A book about contemporary Ukrainian majolica by V. Shcherbak was published in Kiev in 1974.

Major schools (*holovni shkoly*). Public *elementary schools established in cities of the Austrian and Russian empires in the 18th century. In their Austrian variant, major schools (German: *Hauptschulen*) had a four-year program with a teacher for each grade. Clerics were often the instructors at and the administrators of the schools. After completing practical training, graduates of major schools were qualified to teach in the more rudimentary trivium schools. Major schools were established in the larger cities of Galicia and Bukovyna in 1776; instruction was in German and later in Polish. Courses were taught in Ukrainian only at the Basilian major school in Lavriv (1789–1911), which graduated 7,000 students. After the Austrian reorganization of urban public schools in 1863, the major schools were transformed into seven-year public elementary schools (see also *Senior elementary schools).

In 1786 Catherine II issued the Statute for Public Schools in the Russian Empire, which made education a state responsibility and established major schools (Russian: *glavnye narodnye uchilishcha*). Modelled largely on the Austrian model, these schools had a five-year, four-grade program, with the final grade lasting two years. Graduates of the major schools could become teachers at minor schools. Major schools were established only in large cities and towns. The first Ukrainian major school was established in Kiev in 1789. Major schools were abolished in 1804 with Alexander I's school reform and replaced with *county schools.

B. Krawchenko

Mak, Bohdan, b 11 June 1926 in Polivtsi, Chortkiv county, Galicia. Engineer and business executive. He served as an officer in the UPA in 1943–7. Emigrating to the United States in 1950, he completed his education in mechanical engineering and business administration and worked as a research engineer and manager in the fields of rocketry and explosives with the United States Department of Defense. He lectured at the University of Miami and then worked in private industry. In 1972 he was appointed vice-president of Valiant Metal Co. Mak has published numerous papers on subjects such as rocket propellants, valves, and cyclotol explosives.

Olha Mak

Stefan Makar

Mak, Olha (pseud of O. Hets; née Petrov), b 20 July 1913 in Kamianets-Podilskyi, Podilia gubernia. Emigré writer. A postwar refugee, she emigrated in 1947 to Brazil, where she was active in the Ukrainian Relief Committee (1948–9) in Curitiba. She emigrated to Toronto in 1970, where she became president of the Association of Ukrainian Writers for Young People (1971–6). She has written several widely read works: the memoirs *Z chasiv iezhovshchyny* (From the Time of the Yezhov Terror, 2nd edn, 1954); the adventure novel *Boh vohniu* (The God of Fire, 3 vols, 1955–6) and the historical novel *Zhaira* (2 vols, 1957–8), which are set in Amazonia; and the novels *Chudasii* (The Strange One, 1956), *Proty perekonan'* (Against One's Convictions, 1959), *Kudy ishla stezhka* (Where the Path Went, 1961), and *Kaminnia pid kosoiu* (Stones beneath the Scythe, 1973), which deal with Stalinist rule in Ukraine. Mak has also published prose, as well as articles and feuilletons, in émigré periodicals.

Makar, Stefan (pen name: Stepan Khlopiv), b 1870 in Bushkovychi, Peremyshl county, Galicia, d 2 January 1915 in Cleveland. Greek Catholic priest and community activist. After emigrating to the United States in 1897, he was elected to the auditing committee of the Ruthenian National Association and became editor of the association's paper *Svoboda* (1897–1900). He contributed sketches, stories, and a survey of Ukrainian immigration to the United States. His plays *Amerykans'kyi shliakhtych* (American Noble) and *Skupar* (Miser) were staged successfully, and a collection of his stories appeared in the early 1900s as *Biznes* (Business). He translated English books into Ukrainian and compiled a Ukrainian–English dictionary (1901). Much of his time was devoted to organizing Ukrainian schools and financial institutions.

Makar, Volodymyr, b 4 January 1911 in Stanyславiv, Galicia. Political activist and journalist. As a student at Lviv University (1929–32) he became involved in the OUN and was arrested by the Polish authorities in 1932, 1934, and 1936 for his activities. He emerged from prison only after Poland's defeat in 1939 and remained in the OUN underground during the Soviet occupation of Galicia. Under the German occupation he worked in the press and information agency of the OUN (Bandera faction), and in 1943 he joined the staff of its underground radio station, Free Ukraine. After being stricken with typhus in 1944, he was

Volodymyr Makar

Oleksander Makarchenko

taken to the West. He has served in the OUN network in Austria, Belgium, and Canada. He has written several books of memoirs – *Bereza Kartuz'ka* (1956), *Boiovi druzi* (Comrades in Arms, 1980), and *Proidenyi shliakh* (The Traveled Road, 1983).

Makara, Arsen, b 31 January 1916 in Lubiianka, Kiev county, d 17 April 1975 in Kiev. Metallurgist; corresponding member of the AN URSR from 1967. He graduated from the Kiev Polytechnical Institute (1940) and from 1954 to 1970 was deputy director of the AN URSR Institute of Electric Welding. His main technical contributions were in the area of the electric welding of special steels.

Makara, Serhii, b 6 May 1937 in Michalovce, Slovakia. Ukrainian poet in the Prešov region. He began writing in 1953 and has published six collections of poetry, the titles of which reveal the content of his poems: *Osiainia iunist'* (Illuminated Youth, 1958), *Zrostannia* (Maturing, 1961), *Shukaiu sebe* (I Am Searching for Myself, 1967), *Sovist'* (Conscience, 1970), *Lenin z namy* (Lenin Is with Us, 1980), and *Syvyna torknulas' skron'* (Grayness Has Touched the Temples, 1985). He has also written a collection for children, *Shcho virsh – to zahadka* (Every Poem Is a Riddle, 1982). His poetry is marked by a heavy reliance on simile, a paucity of metaphors, attempts at philosophizing, and a didactic declarative tone.

Makarchenko, Oleksander [Makarčenko], b 22 October 1903 in Mariupil, Katerynoslav gubernia, d 5 July 1979 in Kiev. Neurophysiologist; full member of the AN URSR (now ANU) from 1961. A graduate of the Kharkiv Medical Institute (1933), he served as director of the Ukrainian Institute for the Upgrading of Physicians in Kharkiv (1937–9) and the Lviv Medical Institute (1939–41). He was deputy health minister of the Tadzhik SSR (1942–4), the Ukrainian SSR (1944–9), and the Russian SFSR (1949–50) and then worked at the Kiev Institute for the Upgrading of Physicians (1950–3) and the Institute of Physiology of the AN URSR (1953–66, from 1955 as director). He served one term (1962–3) as vice-president of the AN URSR. His work dealt with the influence of infections and intoxication on the bioelectrical activity of the cerebral cortex, the interrelations between the cortex and the subcortical regions under normal and pathological conditions, and the effect of manganese poisoning on the nervous system.

Andrii Makarenko

Anton Makarenko

Makarenko, Andrii, b 17 July 1886 in Hadiache, Poltava gubernia, d 28 September 1963 in Houston, Texas. Civic figure. During the revolution, while holding a high position in the railway administration for Ukraine, he used his influence to organize Ukrainian railway workers, and in the summer of 1917 he formed a railway regiment, which became a part of the UNR Army. Under the Hetman government he was appointed chairman of a department in the Ministry of Railways. As a member of the Ukrainian National Union he helped organize P. Skoropadsky's overthrow and then sat on the Directory of the UNR. In the interwar period he lived in Czechoslovakia, where he completed a doctorate at the Ukrainian Higher Pedagogical Institute. After the war he fled from Soviet forces to Germany, where he worked to save Ukrainian refugees from repatriation to the USSR. In 1951 he settled in the United States.

Makarenko, Anton, b 13 March 1888 in Bilopillia, Sumy county, Kharkiv gubernia, d 1 April 1939 in Moscow. Soviet pedagogue and writer. After completing teacher training in Kremenchuk (1905) Makarenko held various teaching positions in Ukraine. He studied at the Poltava Pedagogical Institute (1914–17) and taught at schools in Poltava and Kriukiv. In 1920 he began a new phase of his career by founding and running an institution outside of Poltava for homeless children, the Gorky Labor Colony. From 1927 until 1935 Makarenko headed the Dzerzhynsky Children's Commune, a penal institution for young offenders outside of Kharkiv. The colony held many children left homeless by the man-made famine of 1932–3. Makarenko then worked in Kiev as deputy head of the labor-colony division of the NKVD (1935–6) and also headed a labor colony in Brovary, a village near the mass grave of victims of the NKVD in the Bykivnia forest, on the outskirts of Kiev. In 1937 Makarenko moved to Moscow, where he spent the rest of his life writing literary and pedagogical works.

The central tenet of Makarenko's pedagogical theories was that the education of children should be based upon and accomplished through the collective. Makarenko applied this principle by creating a system of children's brigades and hierarchical structures of self-government that allowed children to participate in the administration of the collective and relied on peer pressure to enforce conformity to the standards of behavior demanded by the collective. Competition among brigades (similar to the

Stakanovite method used in industry), paramilitary uniforms and daily rituals, collective criticism of misbehavior, and the director's exclusive right to punish miscreants served to maintain order in Makarenko's children's collectives. The children were always reminded that their own collective was part of the larger Soviet collective. Makarenko countered the objection that educating children through the collective destroys individuality by maintaining that in a socialist society the interest of the collective and the interest of the individual become the same.

Makarenko's most important works are *Marsh 30 goda* (The March of 1930, 1932), *Pedagogicheskaia poema* (Pedagogical Poem, 3 vols, 1933–5; often titled *The Road to Life* in English translations), an account of his work at the Gorky Labor Colony, and *Kniga dlia roditelei* (A Book for Parents, 1937). Makarenko wrote only in Russian, but his books have been translated into 58 languages. His collected works (in 7 vols) appeared in Ukrainian (1953–5) and Russian (1957–8). Makarenko's fiction was influenced by M. Gorky. Centers specializing in the study of Makarenko and his pedagogical theories exist in England, Bulgaria, Italy, Germany, Czechoslovakia, and Japan. The Makarenko research center based at Philipps University in Marburg, Germany, is the leader in the field.

C. Freeland

Makarenko, Ivan, b 4 January 1884 in the Kuban, d May 1945 in Prague. Kuban civic and political leader; brother of P. *Makarenko. At the outbreak of the revolution in 1917, he was active in the councils that sprang up in the Kuban. He proposed the idea of a union of the various Cossack hosts and mountain peoples that led to the formation of the Southeastern krai, and he served as the union's vice-president. He was the author of the constitution of the Kuban krai, adopted in September 1917, and the republic's general comptroller. After the revolution he emigrated to Czechoslovakia. In April 1945 he was arrested by the Gestapo. He was liberated by the Czech resistance but later the same day was shot in street fighting.

Makarenko, Mykola, b 4 February 1877 in Moskalivka, Romen county, Poltava gubernia, d 1937. Art historian, archeologist, and graphic artist; full member of the Ukrainian Scientific Society (UNT) and Poltava and Chernihiv archival commissions. A graduate of the Shtiglits Technical Art School and Archeological Institute in St Petersburg, from 1902 to 1917 he conducted many digs in Ukraine and Russia for the Russian Archeological Commission and the Moscow Archeological Institute while teaching art history and working as an assistant curator in the Hermitage Museum in St Petersburg. In 1919 he moved to Kiev, where he became chairman of the UNT art section, full member of the *All-Ukrainian Archeological Committee, the first director (1920–5) of the VUAN Museum of Arts (now the *Kiev Museum of Western and Eastern Art), and a member of the Restoration Commission (est 1924). He continued working as an archeologist; he

Mykola Makarenko (1877–1937)

Petro Makarenko

excavated settlements near Romen, Olbia, Oster, and Pryluka and oversaw restorations of medieval churches and monasteries in Chernihiv, Kiev, and Pryluka. He wrote many articles; a book in Russian on barrows and fortified settlements in Poltava gubernia (1917); books in Ukrainian on the VUAN Art Museum (1924), 16th- to 18th-century Ukrainian book ornamentation (1926), and the Mariupil burial site (1933); and long articles on the Chernihiv Transfiguration Cathedral (1928) and sculpture and carving in Kievan Rus' before the Mongol invasion (1930). He was arrested in late 1933 and exiled to Kazan, Russia, where he taught at the university for two years. In 1937 he was rearrested and executed by the NKVD.

Makarenko, Mykola, b 19 December 1912 in Kiev. Stage and film director. After completing study at the Kiev Institute of Theater Arts (1935) he began to work in cinema (1937). In 1942–56 he worked as actor and director in theaters in Zaporizhia, Luhanske, and Vinnytsia. Assisted by the writer M. Stelmakh, Makarenko produced a film trilogy based on Stelmakh's novel *Velyka ridnia* (The Great Family): *Krov liuds'ka – ne vodytsia* (Human Blood Is Not Water, 1960), *Dmytro Horytsvit* (1962), and *Liudy ne vse znaiut* (People Don't Know Everything, 1964).

Makarenko, Petro, b 6 July 1888 in Novoshcherbynivka Stanytsia, Kuban, d 13 April 1970 in Caracas, Venezuela. Political leader, brother of I. *Makarenko. A graduate of the Higher Pedagogical Institute in Moscow (1914), he rose to prominence in the Kuban during the revolutionary period. He was a member of the Kuban Territorial and Legislative councils (1917–19) and headed the Kuban Committee for Propaganda, the Territorial Council's school commission, the Kuban delegation to the General Cossack Congress in Petrograd (mid-1917), and the special mission to Ukraine (1918). On 19 November 1919, after A. Denikin's coup d'état, he was arrested, and a month later he was deported to Turkey. After settling in Prague, Makarenko helped organize the Kuban Hromada, which he headed (1921–39), and the Kuban Historical Archive and Library Abroad (1925). In 1930 he directed a protest campaign against Polish repressions in Galicia. During the Second World War he fled to Germany, and in 1949 he emigrated to Venezuela. In Caracas he founded and di-

rected the Center for Research on Ukrainian Culture and a Ukrainian radio program (1951–9). He edited a number of Ukrainian newspapers in the Kuban and Prague as well as *Kuban'*: *Zbirnyk stattiv pro Kuban' i kubantsiv* (Kuban: A Collection of Articles on the Kuban and Kubanians, 1926). He also wrote the monumental *Tragediia kozachestva* (The Tragedy of Cossackdom, 5 vols, 1933–9) and *Imperialismo, colonialismo y capitalismo en Rusia: Panorama historico, 1462–1962* (1963).

Makarenko, Serhii, b 10 January 1904 in Chernihiv gubernia, d 6 May 1979 in New York. Painter. In the 1920s he studied at the Kiev State Art Institute and became a member of the *Union of Contemporary Artists of Ukraine (1928). After graduating in 1930, he worked as a book illustrator and designer in Kharkiv, supervised an art workshop, and chaired the Department of Art Studies at the Kharkiv Pedagogical Institute. He emigrated to Yugoslavia in 1943, and thence to Italy, Argentina (1949), and the United States (1960). In Argentina he achieved a national reputation as a portraitist. In the United States he created many portraits, of figures such as V. Lypynsky, O. Arkhimovych, S. Smal-Stotsky, M. Shashkevych, T. Shevchenko, and Hetman I. Mazepa, and painted murals and iconostases in Ukrainian churches in Brooklyn, Boston, Long Island, Trenton, Parma, and Cleveland. A monograph on him and his wife, N. *Somko, was published in 1971.

Makarenko, Serhii, b 11 September 1937 in Kryvyi Rih. Canoeing champion. Together with L. Geishtar, he won the 1960 Olympic gold medal in the men's 1,000-m Canadian pairs and the 1961 and 1963 European championships in the men's 10,000-m Canadian pairs. He was also the Canadian singles world champion in 1963 and the Ukrainian and USSR champion several times in 1959–63.

Makarenko, Volodymyr (Makar), b 26 July 1943 in Verkhivtseve, Verkhnodniprovske raion, Dnipropetrovske oblast. Painter and graphic artist. A graduate of the Dnipropetrovske Art School (1963) and Leningrad Institute of Applied Art (1969), he was forced to leave Leningrad in 1973, and settled in Tallinn, Estonia. In 1975 he received first prize at the Biennale of Graphic Art in Ljubljana, Slovenia, and helped to organize the first Ukrainian nonconformist exhibition, which was held in Moscow in a private apartment. In 1976 his first one-man exhibition was held at the Galerie Hardy in Paris. Makarenko emigrated to the West in 1979 and settled in Paris. The subjects of most of his works are highly personal, as are his images and vocabulary, which often reflect his Ukrainian heritage and Ukrainian history and literature. His 'mixed-media' watercolors and oils reveal his childhood dreams (eg, *Souvenir de ma mère*, 1973), nostalgia for his homeland (*Melancholy Evening in Kiev*, 1975), erotic fantasies (*Symbole erotique*, 1975), and interest in the metaphysical (the series 'Buste métaphysique,' 1974–5). Although Makarenko is not a narrative artist, some of his paintings are visual texts with multiple readings; his *My Ukraine* (1975), for example, makes a statement about the lack of freedom in his homeland. Makarenko also paints still lifes and figural compositions, often on religious themes, such as the Annunciation (*La Rencontre*, 1983), *Palm Sunday* (1978, 1983), and the *Holy Trinity* (1982). In works such as *Three Dreams* (1982) he has transformed the traditional composition of

Volodymyr Makarenko: *Self-Portrait* (oil, 1990)

icons into a secular, symbolic statement that can be read as that of a woman or of Mother Ukraine. He has successfully synthesized several disparate sources, including V. Kandinsky, Ukrainian icons, surrealism, and abstract art, into an unusual and unique vision. Since 1981 he has had numerous one-man exhibitions in France, Germany, Switzerland, and North America, including Toronto (1982, 1983, 1991) and Chicago (1983).

D. Zelska-Darewych

Makarii I [Makarij], b ?, d 1 May 1497 in Stryholovo, near Mozyr, Belarus. Kievan metropolitan and martyr. The archimandrite of the Trinity Monastery in Vilnius, he was elected metropolitan at a congress of bishops in 1495. He was murdered by Tatars during a journey from Vilnius to Kiev. His remains were transferred to Kiev, where they were placed in the St Sophia Cathedral, and then moved to St Volodymyr's Cathedral. Makarii was canonized in 1621–2.

Makarii II [Makarij], b ? in Moscow, d ? Metropolitan of Kiev (1534–56). He was instrumental in reviving the Halych Orthodox eparchy, with its see in Lviv, and consecrated M. Tuchapsky as bishop. Under his direction a church congress was held in Navahrudak, Belarus, in February 1540, which defined the relationship between the bishop of Lviv and the metropolitan of Kiev and strengthened the authority of the latter.

Makarios (Macarius) III, b and d ? Patriarch of Antioch (1647–72). He traveled on a long journey, in 1652–9, through Wallachia, Moldavia, Ukraine, and Muscovy. His

TRAVELS OF MAKARIOS III

Patriarch Makarios III

son and companion, *Paul of Aleppo, wrote an account of their trip which included descriptions of their visits with Hetman B. Khmelnytsky and other Cossack and church leaders, and of everyday life in Ukraine. The account remains an important source for the history and culture of 17th-century Ukraine. In 1666 Makarios attended a church sobor in Moscow, where he criticized the reforms of Patriarch Nikon.

Makariv. III-10. A town smt (1990 pop 12,200) on the Zdvyzh River and a raion center in Kiev oblast. At the end of the 16th century the village of Voronine was renamed Makariv, and in the 17th century a castle was built there by Polish landlords. After M. Kryvonis captured the castle in 1648, the town became the center of a Cossack company. Its inhabitants took part in the popular uprisings of 1664–5, 1694, and 1702–4. Makariv became an smt in 1956. Today it has a flax-processing plant, a food industry, and a branch of the Bila Tserkva Clothing and Haberdashery

Consortium. Archeologists have found some tools from the Bronze Age near the town.

Makarov, Anatolii, b 28 January 1939 in the Far East. Literary critic. He graduated from Kiev University and has worked for the paper *Literaturna Ukraina* and the Radianskyi Pysmennyk publishing house. His criticism and reviews have been published in Ukrainian periodicals and separately as the collections *Rozmaïttia tendentsii* (Variety of Tendencies, 1969), *Barvy Ukraïny* (Colors of Ukraine, co-author, 1970), and *Svit obrazu* (The World of the Image, 1977) and the award-winning collection *P'iat' etiudiv: Pidsvidomist' i mystetstvo* (Five Studies: The Subconscious and Art, 1990).

Makarovsky, Mykhailo [Makarovs'kyj, Myxaijlo], b 1783, d 19 September 1846 in Hadiache, Poltava gubernia. Poet. He studied at the Poltava Theological Seminary and worked for many years as a tutor and county-school teacher in Hadiache. In the 1840s he wrote epigonic Romantic poetry, which is interesting because of its ethnographic and historical descriptions. It was published posthumously: the long poems 'Natalia ...' and 'Haras'ko ...' appeared in A. Metlynsky's miscellany *Iuzhnyi russkii sbornik* (South Russian Collection) in Kharkiv in 1848 and separately in Lviv in 1899, and a short collection of the poetry was published in Poltava in 1864.

Makarukha, Lidiia [Makaruxa, Lidija], b 23 March 1929 in Peremyshl, Galicia, d 25 April 1972 in Buenos Aires. Community leader. Having emigrated to Argentina in 1930, she completed medical school in 1955 and worked at a Buenos Aires hospital. She was active in community affairs as a member of numerous organizations, president of the Union of Ukrainian Women of Argentina, and an executive member of the World Federation of Ukrainian Women's Organizations.

Liubomyr Makarushka

Ostap Makarushka

Makarushka, Liubomyr [Makaruška, Ljubomyr], b 12 August 1899 in Sivka Voinylivska, Kalush county, Galicia, d 6 February 1986 in Bad Godesberg, Germany. Political and military leader; son of O. and Ye. *Makarushka. After graduating from the Theresa Military Academy in Wiener Neustadt he served briefly in the Austrian army and then as captain in the First (Stanyslaviv) Battalion of the Ukrainian Galician Army. After the war he studied economics at the World Trade Academy in Vienna (PH D, 1927). Upon

his return to Lviv he served as executive director and then general secretary (1927–9) of the Ukrainian National Democratic Alliance (UNDO) and in 1930 was elected as its candidate to the Polish Sejm. As a major of the *Division Galizien he negotiated the unit's surrender to the British at the end of the Second World War. From 1948 he represented the UNDO on the émigré Ukrainian National Council and sat on the council's executive body (1948–51). He also headed the Department for Non-German Refugees at the German Refugee Bank in Bonn (1951–64).

Makarushka, Ostap [Makaruška], b 9 August 1867 in Yavoriv, Galicia, d 24 November 1931 in Lviv. Galician philologist and pedagogue; full member of the Shevchenko Scientific Society from 1919; husband of Y. and father of L. *Makarushka. After graduating from Lviv University (1894) he studied abroad and then obtained a PHD from Chernivtsi University (1904). He taught classical philology at the Ukrainian gymnasium in Kolomyia and the Academic Gymnasium in Lviv (1897–1905). He served as principal of the Ukrainian Pedagogical Society's women teachers' seminary in Lviv (1910–21) and inspector of secondary schools run by the Ridna Shkola society (1921–31). He was also on the faculty of the Lviv (Underground) Ukrainian University. His articles and brochures dealt with topics such as Turkish loanwords (1895), compound participles in the Galician-Volhynian Chronicle (1896), the life and importance of O. *Potebnia (1901), and M. Smotrytsky's grammar (1908). He also wrote five gymnasium textbooks of classical Latin and Greek.

Yevheniia Makarushka

Hryhorii Makhiv

Makarushka, Yevheniia [Makaruška, Jevhenija] (née Mulyk), b 4 August 1880 in Lviv, d 6 July 1977 in New York. Civic leader; wife of O. and mother of L. *Makarushka. An organizer of vocational education for women, she headed the *Union of Ukrainian Women before its formal constitution (1917–21) and was a member of its executive until 1931. Active in the Ukrainian National Democratic Alliance, she ran in the 1928 elections as its candidate to the Polish Sejm. She chaired the organizing committee of the Ukrainian Women's Congress in Stanyslaviv (1934) and the building committee of the Girls' Vocational Residence in Lviv (1935).

Makhiv, Hryhorii [Maxiv, Hryhorij], b 23 August 1887 in Kiev, d 22 August 1952 in Birmingham, Michigan. Soil

scientist; full member of the Shevchenko Scientific Society from 1948 and the Ukrainian Academy of Arts and Sciences of the US. He graduated from Kiev University (1913), worked as a soil scientist for the Kiev zemstvo, and then taught at Kiev University (1920) and the Kharkiv Agricultural Institute (1924). He headed the soil research section of the Agricultural Scientific Committee of Ukraine and of the VUAN. After being dismissed from his positions for political reasons in 1927, he worked as a researcher and consultant in Kiev, Odessa, and Kharkiv. A postwar refugee in Germany, he taught at the Ukrainian Technical and Husbandry Institute, and in 1949 he emigrated to the United States, where he helped found the Ukrainian Academy of Arts and Sciences. Makhiv specialized in solonetz soils and their amelioration, soil depletion and erosion, the effectiveness of shelterbelts in the steppe region, and drought control. He wrote numerous works, including the textbook *Gruntoznavstvo* (Soil Science, 1925), *Chetvertynni poklady Ukraïny* (The Quaternary Deposits in Ukraine, 1924), and *Grunty Ukraïny* (Soils of Ukraine, 1930); edited the first seven volumes of *Materialy doslidzhennia gruntiv Ukraïny* (Materials for the Study of Soils in Ukraine, 1923–7); and prepared the first synthetic soil map of Ukraine (1927; pub also in English).

Makhnenko, Volodymyr [Maxnenko], b 27 October 1931 in Cherkasy. Metallurgist; full member of the AN URSR (now ANU) since 1990. He graduated from the Odessa Institute of Naval Engineers (1955) and taught there and has worked at the ANU Institute of Electric Welding since 1964. His main scientific work is in electrical welding and special metallurgical problems.

Nestor Makhno

Leonid Makhnovets

Makhno, Nestor [Maxno], b 27 October 1889 in Huliai-Pole, Katerynoslav gubernia, d 25 July 1934 in Paris Anarchist leader. Because of the injustice he experienced Makhno joined an anarcho-communist group. As a result of the group's terrorist activities Makhno was twice arrested; the second time, in 1910, he was sentenced to death. The death penalty, however, was commuted to life imprisonment. He served his sentence in the Butyrki prison in Moscow. In prison Makhno acquired a general

and political education from the prison library and from other political prisoners. There he became a confirmed anarchist. Makhno was released on 2 March 1917.

Makhno returned to Huliai-Pole, where he organized local peasants, workers, and artisans and headed the local soviet of workers' and peasants' deputies. He also organized peasant bands for the expropriation and redistribution of the manors of the local nobility. In July 1918 he began to mobilize resistance to the Central Powers and Hetman P. Skoropadsky. Makhno led a popular insurrection against the occupying German forces while conducting raids on local estates. As military leader he combined clever and unorthodox tactics with a resolute and well-disciplined army (based for the most part on voluntary enlistment). Instrumental to Makhno's military successes were the light mobile cavalry units he formed, which featured innovative horse-driven carriages (known as *tachanky*) upon which machine guns had been mounted.

The withdrawal of the Central Powers from Ukrainian territory in November 1918 left Makhno in a position of considerable strength in Katerynoslav gubernia. His forces effectively controlled the entire Huliai-Pole region for the first five months of 1919. In the spring of 1919 he was strengthened by the arrival of members of the Nabat Confederation of Anarchist Organizations, which had its headquarters in Kharkiv but maintained branches in the major cities of Ukraine. They assisted in the cultural and ideological work of the anarchist movement by editing its periodicals *Put' k svobode* and *Nabat*.

Makhno concluded a shaky alliance with the Bolsheviks in March 1919 against A. *Denikin but resisted attempts to subordinate his command to the Red Army, and the alliance deteriorated. On 14 June 1919 Bolshevik forces attacked Huliai-Pole and dissolved the existing anarchist communes. In July 1919 Otaman N. *Hryhoriiv, whose army was operating in the vicinity, offered to ally himself with Makhno. Makhno refused, executed Hryhoriiv, and brought a large portion of the otaman's forces into his army's ranks. The alliance with the Bolsheviks resumed in the summer of 1919 with the advance of Denikin's Volunteer Army into Ukraine. Makhno's forces were pushed back as far as Uman, where they encountered the Ukrainian Galician Army and S. Petliura's regular UNR Army. A brief pact was concluded with them on 21 September 1919, but Makhno continued to operate against Denikin's forces independently. On 26 September he delivered a major blow to the Whites near Perehonivka, and forced them to retreat while the Bolsheviks inflicted further damage.

With the defeat of Denikin Makhno reached the zenith of his influence in Ukraine, at which time he took the cities of Katerynoslav and Oleksandrivske, in October and November 1919. (In Katerynoslav a Ukrainian-language anarchist newspaper, *Shliakh do voli*, was started.) His troops, numbering approx 40,000, controlled about one-third of the present territory of Ukraine (mainly in Left-Bank and Southern Ukraine) and included a population of roughly 7 million.

In October 1920 in the face of a renewed White threat emerging from the Crimea, the Makhnovites and Bolsheviks concluded a treaty calling for military co-operation and amnesty for all anarchists held in Russian jails. The offensive launched by P. Wrangel's army was dealt with

quickly, and afforded the Bolsheviks an opportunity to deal decisively with the Makhnovites. They massacred a group of Makhno's soldiers returning from the Crimean campaign on 25 November 1920 and then turned their troops on Huliai-Pole. Makhno was forced to make a dash for the Rumanian border, and crossed it on 28 August 1921 with a small band. The remnants of his army in Ukraine were soon crushed.

In Rumania Makhno and his band were arrested and interned, but he escaped to Poland, where he was arrested a second time on charges of fomenting rebellion among Galicia's Ukrainians. After being acquitted he moved to Danzig (now Gdańsk), where he was arrested a third time. He escaped to Berlin and from there moved to Paris. There he remained active in anarchist circles and contributed regularly to the international anarchist press (including occasional articles discussing the latest developments in Ukraine). He also wrote his incomplete memoirs (in Russian), dealing with events to 1918.

S. Cipko, M. Palij

Makhnovets, Leonid [Maxnovec'], b 31 May 1919 in Ozera, Kiev county. Literary scholar. In 1950 he defended his candidate of sciences diss on I. Franko as a scholar of 16th- to 18th-century Ukrainian literature. He wrote a book on satire and humor in 16th- to 18th-century Ukrainian prose (1964) and large parts of vols 1 and 2 of the AN URSR history of Ukrainian literature (8 vols, 1967–71; he was the editor responsible for vol 1 and a member of the editorial board of the entire history). He compiled vol 1 of the biobibliographical dictionary of Ukrainian writers (1960). He edited, with introductions, annotated compilations of old Ukrainian humor and satire (1959) and fables in 17th- and 18th-century Ukrainian literature (1960), a collection of articles on Ukrainian intermedes (1960), and a book of poetic translations and renderings of the medieval *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1967). In 1972 he published a popular biography of H. Skovoroda in which he used many new archival sources; his interpretation was condemned by neo-Stalinist critics. His annotated modern translation of the medieval Kiev Chronicle was published in nos 6–8 of the literary monthly *Kyiv* for 1984, and his annotated translation of the Hypatian Chronicle was published in 1989.

Makhorin, Kostiantyn [Maxorin, Kostjantyn], b 13 August 1928 in Dnipropetrovske. Chemical technologist; AN URSR (now ANU) corresponding member since 1972. A

graduate of the Dnipropetrovske Metallurgical Institute (1950), he has worked at the AN URSR Institute of Gas and served as its deputy director (1961–77). He has researched the chemical transformations of gaseous hydrocarbons and carbonaceous materials, the modeling of fuel-conversion processes, and related areas.

Makhorka. See Tobacco.

Makhov, Gregory. See Makhiv, Hryhorii.

Makiivka [Makijivka]. V-18, DB III-3. A city (1990 pop 426,700) on the Hruzka River in Donetske oblast. Makiivka village was first mentioned in historical documents in 1777. In 1875–7 several small mines were opened there. In 1920 Makiivka and Dmytriiivske villages were merged to form the city of Dmytriiivske, which in 1931 was renamed Makiivka. During the industrialization drive of the 1930s, the city's population rose from 79,000 (1926) to 242,000 (1939). After the Second World War Makiivka was rebuilt, and by 1959 its population had reached 381,000. Today it is a major coal-mining and metallurgical center and a railway junction. It has 18 coal mines and 4 enrichment plants, a large metallurgical plant, a tube plant, a civil engineering institute, a branch of the Donetske Regional Museum, and a metallurgical museum. Several kurhans from the Bronze Age, the Scythian period, and the 9th to 13th centuries AD have been excavated near Makiivka.

Makiivka Civil-Engineering Institute (Makiivskyi inzhenerno-budivelnyi instytut). A technical institute, until 1992 under the jurisdiction of the Ukrainian SSR Ministry of Higher and Specialized Secondary Education. It was founded in 1972 on the basis of the Makiivka branch of the *Donetske Polytechnical Institute. The institute includes faculties of architecture, institutional and civic construction, metal construction, and sanitation technology. Day, evening, and correspondence courses are offered. In 1980 the library contained approx 280,000 titles, and the institute had an enrollment of 4,500 students.

Makiivka Metallurgical Plant (Makiivskyi metalurhinyi zavod im. S. Kirova). One of the largest metallurgical plants in the Soviet Union, located in Makiivka, Donetske oblast. It was built in 1898 by a French joint-stock company, the General Company of Cast Alloy, Iron, and Steel Factories of Russia. Within two years the plant had one blast furnace, three Martin furnaces, and two blooming mills. It was destroyed during the First World War, reconstructed in 1923, and enlarged in 1926. In 1929 the Soviet Union's first and largest mechanized blast furnace was constructed there. The plant was destroyed again during the Second World War. It reached its prewar output by 1950. Postwar construction included a blast furnace, four open-hearth furnaces, and blooming, rod, and sheet mills. The principal products are cast iron, rolled steel, alloy steels, sheet metal, and pipes.

Makivchuk, Fedir [Makivčuk], b 9 September 1912 in Kordyshivka, Berdychiv county, Kiev gubernia, d 4 December 1988. Journalist and writer. He began his journalistic career in 1931 at *Komuna*, the Starokostiantyniv raion newspaper, and then edited Komsomol newspapers in Kamianets-Podilskyi and Lviv before briefly serving as

chief editor of *Molod' Ukraïny* (1944–6). From 1946 to 1986 he was chief editor of the republican humor magazine *Perets'*. He wrote hundreds of feuilletons for *Perets'* and other Soviet magazines, and several books of satire and humor, including *Zdoroven'ki buly!* (How Are You!, 1952), *I smikh, i hrikh* (Both Laughter and Sin, 1957), and *Liubov i parahraf* (Love and the Paragraph, 1966). His anti-American *Reportazh z toho svitu* (Report from the Other World, 1960), which contained vicious attacks on Ukrainian émigrés, earned him official praise and awards.

Stepan Makivka

Makivka, Stepan, b 11 October 1889 in Kodon, Tomaszów county, Lublin gubernia, d 24 January 1966. Podlachian civic and political leader. After studying history at Kiev University he served in the sanitation department of the Eighth Russian Army (1915–17). In 1922–8 he was a deputy to the Polish Sejm. In the 1920s he helped found *Sel-Soiuz and *Sel-Rob and then its left wing and published (1925–8) the Kholm newspapers *Nashe zhyttia* and *Nove zhyttia*. In 1929–36 he was imprisoned by the Poles for his political activity. After Poland's collapse he demanded that the Kholm region and Podlachia be annexed to Ukraine. After the war he settled in Soviet Ukraine, where he wrote journalistic and fictional works and several volumes of memoirs, including *Neskoreni kresy* (The Indomitable Borderlands, 1954; 2nd ed 1957).

A trench of the Ukrainian Sich Riflemen on Mt Makivka (1915)

Makivka. A mountain (958 m) in the Carpathian Mountains near the town of Slavske. At this site the first major battle of the *Ukrainian Sich Riflemen (USS) took place, on 29 April to 2 May 1915. The USS victory against the overwhelming forces of the Russian army raised the morale of the Ukrainian people and established the reputation of the USS as an elite fighting force. After the struggle for independence the battle was commemorated annually with pilgrimages to the site and memorial services. This tradition was rekindled in Ukraine in 1989.

Mako, Serhii, b 1885 near Tomsk, Siberia, d 4 June 1953 in Nice, France. Portrait painter. In 1919 he was a member of the UNR diplomatic mission to Italy. As an émigré he lived in Prague, where he was a professor of drawing and painting at the *Ukrainian Studio of Plastic Arts (1924–32) and founded the 'Scythians' artists' group, which tried to create a 'synthesis of the spirit of the East with that of the West.' His impressionist works include a portrait of Ye. Chykalenko. Several of his paintings are in museums in Nice.

Makohin, Yakiv, b 1880 in Ukraine, d 13 January 1956 in Boston. Ukrainian-American political activist. In 1905–21 he served in the US armed forces. Later he married S. Fallon, a wealthy widow. In 1930 he toured Galicia with his wife, and after his tour he informed British parliamentarians and journalists about the *Pacification. He set up and financed the *Ukrainian Bureau in London and then in Geneva and a representation of the bureau in Prague. He and his wife supported the *Museum of Ukraine's Struggle for Independence in Prague and provided scholarships for Ukrainian students and artists. They owned a valuable collection of old Ukrainian icons and paintings and a fine stamp collection.

Makohon, Dmytro (pseud: Makohonenko, Ivan Halaida, Khorostkivsky), b 28 October 1881 in Khorostkiv, Husiatyn county, Galicia, d 7 October 1961 in Ivano-Frankivske. Writer and teacher; father of I. *Vilde. He was a public school teacher in Bukovyna (1903–14, 1919–22) and in Galicia (1923–56). For a time he also coedited the journal *Kamieniari* in Chernivtsi. His publications include a collection of poetry, *Muzhyts'ki idyllii* (Peasant Idylls, 1907), and collections of short stories about the hard life of peasants and teachers: *Shkil'ni obrazky* (School Sketches, 1911), *Uchytel's'ki harazdy* (Teachers' Fortunes, 1911), *Proty fyli* (Against the Current, 1914), and *Po nashykh selakh* (In Our Villages, 1914). After 1945 he wrote humorous sketches and fables in the Soviet spirit. A collection of his stories, *Vybrani opovidannia* (Selected Stories), was published in 1959.

Makohon, Ivan, b 26 October 1907 in Hrushuvakha, Iziium county, Kharkiv gubernia. Sculptor. He studied at the Kharkiv Art Institute (1926–31) and with I. Severa. After the Second World War he was a member of the Studio of Military Painters (1944–53) and taught at the Kiev State Art Institute (from 1954). His works include M. Hrushovsky's burial monument (with V. Krychevsky), portraits of I. Severyn (1937) and O. Honchar (1971), a bust (1938) and bronze medal (1939) of T. Shevchenko, the compositions *Banner of Victory* (1946) and *Harvest* (1970), the 6-m bas-relief at the Arsenal metro station in Kiev

Ivan Makohon: fragment of the monument to N. Sosnina in Teterivske, Kiev oblast (bronze, 1968)

(with A. Nimenko), a bas-relief of M. Bazhan (1984), and Gen Yu. Shchadenko's (1952) and Yu. Yanovsky's (1961) burial monuments.

Makov, Konstantin, b 7 January 1911 in Voronezh, Russia, d 15 August 1948 in Kiev. Hydrogeologist; corresponding member of the AN URSS (now ANU) in 1948. He graduated from the Kiev Geological Prospecting Course (1933) and was deputy director of the AN URSS Institute of Geological Sciences from 1945. His main technical contributions were studies of underground water, of the hydrology of Ukraine and Bashkiria, and of a method of structural hydrogeological analysis.

Osyp Makovei

Yakiv Makovetsky

Makovei, Osyp [Makovej] (pseud.: *, **, Yevmen, M., M*, Mak, Om., Omikron, Sokolyk, O. Stepanovych, Stefan, Spektator, Yaroshenko), b 23 August 1867 in Yavoriv, Galicia, d 21 August 1925 in Zalishchyky. Writer, journalist, and teacher. He attended Lviv University, from which he graduated in 1893. Varied work as an editorial assistant and a contributor to **Dilo* (1891), **Narodna chasopys'* (1892), and other newspapers prepared him for the position of editor of **Bukovyna* (1895–7). He was also one of the editors of **Literaturno-naukovyi vistnyk* (1897–9). He was

awarded a scholarship to the University of Vienna in 1899, from which he graduated with a doctorate in 1901. He taught Ukrainian language and literature at the teachers' seminaries in Chernivtsi (1899–1910) and Lviv (1910–13). From 1913 until his death he was director of the teachers' seminary in Zalishchyky. Makovei began his literary career with translations from H. Heine, which were published in *Zoria* (1885). Although he wrote several longer poems and even published a collection of poetry in 1894, Makovei was primarily a writer of short prose, feuilletons, and literary sketches marked by good-natured and at times poignant observation of human life. Besides two longer novelettes – one of village life, *Zalissia* (1897), and one historical novelette, *Iaroshenko* (1905) – and numerous works scattered through contemporary newspapers, his literary output primarily consists of collections of stories, *Nashi znakomi* (Our Acquaintances, 1901), *Opovidannia* (Stories, 1904), *Krovave pole* (A Bloody Field, 1921), and the satiric and humorous *Pryzhmurenym okom* (Through a Squinting Eye, 1923). His output in literary criticism consists of numerous critical articles, introductions to the works of various authors, and three major studies: on P. *Kulish, *Pan'ko Kulish: Ohliad ioho diial'nosti* (Pan'ko Kulish: A Survey of His Activities, 1900); on philology, *Try halyts'ki hramatyky* (Three Galician Grammars, 1903); and on Yu. *Fedkovych, *Zhyttia Osypa Iuria Fed'kovycha* (The Life of Osyp Yurii Fedkovych, 1911). A selection of his works appeared in 1930, 1954, 1961, and 1979, and a full, two-volume edition appeared in 1990. His poetry collection of 1894 was republished in 1967.

D.H. Struk

Makovetsky, Yakiv [Makovec'kyj, Jakiv], b 19 May 1909 in Ryplyn, Jaroslaw county, Galicia, d 8 July 1990 in Munich. Civic leader. After moving to France in 1932, in 1939 he interrupted his studies there to join the Carpathian Sich and then the Legion of Ukrainian Nationalists. He switched to civilian work for the remainder of the war, during which he handled resettlement matters in Warsaw and Biala Podlaska. In 1945 he moved to Munich, where he was active in resettling Ukrainian refugees (until 1954) and helped create the *Central Representation of the Ukrainian Emigration in Germany. A leading figure in the Melnyk faction of the OUN, Makovetsky also served on the Ukrainian National Council.

Makovsky, Vladimir [Makovskij], b 7 February 1846 in Moscow, d 21 February 1920 in Petrograd. Russian painter. A member of the *Peredvizhniki society from 1872 and the St Petersburg Academy of Arts from 1873, he painted genre scenes in Ukraine. They include *Waiting for the Teacher* (1881), *Fair in Poltava* (1882), *Ukrainian Girl* (1882), *Horse Fair in Ukraine* (1885), *Mother and Daughter* (1886), *Respite on the Road from Kiev* (1888), *Maiden's Evening* (1888), *Feast Day in Ukraine* (1898), and *Ukrainian Man* (1918). Makovsky's brothers, Konstantin and Nikolai, also painted genre scenes in Ukraine.

Vladimir Makovsky: *Ukrainian Girl* (oil, 1882)

Makovsky, Volodymyr [Makovs'kyj], b 27 July 1870 in Yeiske, Rostov county, Don Cossack province, d 3 January 1941 in Kharkiv. Machine scientist. He studied and worked in Kharkiv. In 1899 he was arrested and exiled for revolutionary activities. He returned to Ukraine in 1904 and taught at the Katerynoslav (later Dnipropetrovske) Mining Institute (1904–30) and the Kharkiv Polytechnical Institute (1930–41), where he organized a department of turbine construction. In 1933 he organized the first turbine laboratory in the USSR, and in 1940 he built a stationary gas turbine with a capacity of 736 kW.

Makovytsia Massif. A group of volcanic mountains located between the Uzh and the Liatorytsia rivers in Transcarpathia oblast. Part of the Vyhorlat-Hutyn Ridge in the Volcanic Ukrainian Carpathians, it consists of two volcanic rings, the Antalovedska Poliana (971 m) and Makovytsia (976 m), the largest ring in the Volcanic Ukrainian Carpathians). The massif is built mainly of andesites, basalts, and tuffs. Its slopes are covered with thick beech and oak forests and are almost uninhabited. At the foot of the mountains is a densely populated agricultural region with numerous vineyards.

Makovytsia region. The historical name for the northwestern part of the Prešov region. The northern part of the former Sáros komitat, the region historically has been inhabited mainly by Ukrainians. Its name is derived from the 13th-century Makovytsia castle, near Zborov, north of Bardejov.

Maksaky Transfiguration Monastery (Maksakivskyi Preobrazhenskyi manastyr). A monastery on the Desna River near Maksaky, now in Mena raion, Chernihiv region. It was founded by A. *Kysil in 1642 as a men's monastery. After 27 years of vacancy it reopened in 1803; in 1829 it was converted into a women's monastery. In the early 20th century it had 20 nuns and 15 novices. The monastery's main church was built in the late 17th to early 18th century. The monastery was dismantled in the 1930s.

Maksymchuk, Juliiian [Maksymčuk, Julijan], b 30 August 1890 in Stryi, Galicia, d 13 December 1980 in Chicago. Lawyer and philatelist. A former student activist, Ukrainian Galician Army veteran, and civic official in Drohobych and Boryslav, he emigrated to the United States in 1951. His writings include listings of Ukrainian postage stamps (11 catalogues, 1950–75), non-government issue Ukrainian stamps, foreign stamps with Ukrainian themes, and heraldic stamps and bank notes. The Ukrainian Philatelic and Numismatic Society has recognized his contribution to this field of endeavor by naming an award in his honor.

Maksymeiko, Mykola [Maksymejko], b 17 June 1870 in Batsmany, Romen county, Poltava gubernia, d 14 April 1941 in Kharkiv. Legal historian; from 1926 a corresponding member of the VUAN and AN URSR (now ANU). Having graduated from Kiev University (1892), he lectured at Kharkiv University (1897–1925). After chairing the section on the history of Ukrainian law at the Kharkiv Institute of People's Education (1926–34), he became a senior research associate of the ANU Institute of History. He specialized in Rus' and Lithuanian law. His more important works were *Seimyy Litovsko-Russkogo gosudarstva do Liublinskoi unii 1569 goda* (The Diets of the Lithuanian-Ruthenian State up to the Lublin Union of 1569, 1902), *Opyt krytycheskogo issledovaniia Russkoi Pravdy* (An Attempt at a Critical Examination of *Ruskaia Pravda*, 1914), and 'Systema Rus'koï Pravdy v ïï poshyrenii redaktsiï' (The System of the *Ruskaia Pravda* in Its Expanded Edition), *Pratsi Komisii dlia vyuchuvannia istorii zakhidnorus'koho ta ukrains'koho prava*, no. 2, 1926.

Maksymenko, Fedir, b 4 February 1897 in Bilenke, Oleksandrivske county, Katerynoslav gubernia, d 24 November 1983 (reportedly) in Lviv. Bibliographer. He graduated from the Kiev Institute of People's Education (1925) and became director of the regional studies museum in Bakhmut (now Artemivske, 1919–20). He worked from 1921 as a bibliographer in libraries in the Donbas, Kiev, and Lviv (as assistant director of the research library at Lviv University). He compiled a book of bibliographic materials on Ukrainian regional studies in 1847–1929 (1930), a catalog of incunabula at the Lviv University Scientific Library (1958), a book on collections of historical information about Soviet Ukraine's inhabited places (1964, reprinted in *Arkhivy Ukraïny*), and a catalog of Cyrillic books printed in Ukraine in 1574–1800 that are preserved in collections in Lviv (1975).

Maksymenko, Oleksandr, b 18 November 1916 in Luchky (now Vilkhuvatka), Kobeliaky county, Poltava gubernia. Painter. A graduate of the Kiev State Art Institute (1947), he has done mostly genre paintings, portraits, and landscapes. They include *Approaching Autumn* (1948),

Land: Plowed Field (1952), *The Water Has Arrived* (1957), *Meditations of a Farmer* (1963), *Golden Autumn* (1968), *Father's Cares* (1971), *Collective-Farm Market* (1974), *Apple Tree* (1978), and several views of Sedniv. An album with reproductions of his works was published in Kiev in 1982.

Maksymiuk, Stefan [Maksymjuk] (Maksymjuk), b 16 June 1927 in Uzhhorod. Radio producer and discographer. A longtime employee of the Voice of America (1955–87), he has written articles on the discography of soprano S. Krushelnyska (1965), the O. Koshyts Chorus (1966–7), the Lineva expedition (1966), dumas (1969), and renditions during the years 1900–65 of works by T. Shevchenko (1990). His collection of Ukrainian phonograph records contains more than 1,000 78 RPM and approx 1,500 45-RPM and LP items. It includes releases from the early 1900s to the most recent issues from Ukraine, Russia, Austria-Hungary, Poland, Germany, England, the United States, and Canada and covers classical, popular, folk, and religious music. It is considered the largest collection of its kind outside Ukraine.

Maksymiw, Myron [Maksymiv], b 13 May 1946 in Goslar, Germany. Conductor. He grew up in England and came to Canada in 1968, where he completed university degrees in Slavic studies and music at the University of Toronto. In 1981 he founded Canada's first independent professional Ukrainian choral ensemble, *Musicus Bortnianskii, and became its musical and artistic director.

Maksymonko, Leontii [Maksymon'ko, Leontij], b 4 August 1893 in Tseniava, Dolyna county, Galicia, d 5 April 1965 in Toronto. Ophthalmologist. He interrupted his medical studies to serve in the Austrian army and then in the First Corps of the Ukrainian Galician Army as adjutant to its sanitation chief. After graduating from Graz University (1923) he worked at the General Hospital in Lviv and then opened his own practice. For 10 years he served as secretary and in 1934 as president of the Ukrainian Physicians' Society. He was also treasurer of the Narodnia Lichnytsia hospital and lecturer at the Lviv (Underground) Ukrainian University. During the Second World War he was in charge of the eye clinic of the Lviv Medical Institute. In 1944–8 he was a senior clinician at Graz University. Afterward he emigrated to Canada.

Maksymovych [Maksymovyč]. A family of Cossack *starshyna* established by Maksym Vasylykivsky (b in Nizhen, d ca 1694–8), one of the wealthiest men in the Hetmanate. He owned a number of mills and niter sources in the Kiev region, leased lands from the Sapiieha family in the Chornobyl area, and conducted significant trade in Right-Bank Ukraine, Poland, and Moldavia. His sons were Ioan (1651–1715), the archbishop of Chernihiv from 1697 and metropolitan of Tobolsk from 1711; Vasyly (d 1698), the acting colonel of Pereiaslav, slain in a battle with the Tatars on the Kodyma River; Petro, a notable military fellow; Hryhorii, the archpriest of Pereiaslav (1680–1711); Mykhailo and Antin, fellows of the standard; and Dmytro *Maksymovych. Dmytro's sons were Fedir, the colonel of Starodub regiment (1741–56), and Ivan *Maksymovych. Fedir's son, Ivan (d ca 1803), was the first colonel of the Starodub Carabineer Regiment (1783–9) and later a Russian major general and a member of the *Novhorod-Si-

verskyi patriotic circle. Their descendants were landed gentry in Chernihiv and Poltava gubernias. Mykhailo *Maksymovych was a descendant of Vasyly, and Yuriy *Maksymovych was a descendant of Dmytro.

Maksymovych, Andrii [Maksymovyč, Andrij], b 1865 in Poltava gubernia, d 9 February 1893 in Yalta, Tavriia gubernia. Actor. After studying in the Poltava theological seminary he was a leading character and comic actor in the troupes of M. Kropyvnytsky (1882–3, 1885–8), M. Starytsky (1883–5), and M. Sadovsky (1888–92).

Antin Maksymovych

Borys Maksymovych

Maksymovych, Antin [Maksymovyč], b 1881, d ? Civic and political activist. An employee of the Limanova Co, he was active among the Ukrainian workers in the Boryslav region. In 1928 he was elected to the Polish Sejm as a candidate of the Ukrainian National Democratic Alliance. In 1940 he was deported by the Soviets, and his further fate is unknown.

Maksymovych, Borys [Maksymovyč] (Maximovich), b 1906 in Kiev. Concert pianist and teacher. He graduated from the Kiev Conservatory (1928), where he studied under the virtuosi S. Barere and H. Beklemishev, and then taught at the conservatory. A postwar émigré he appeared as solo pianist in Western Europe and the United States. His repertoire as soloist included D. Scarlatti, L. van Beethoven, F. Chopin, R. Schumann, F. Liszt, and I. Stravinsky. Maksymovych was noted for his performances of P. Tchaikovsky's Piano Concerto no. 1 in B-flat Minor. He also popularized the piano works of L. Revutsky and V. Kosenko.

Maksymovych, Dmytro [Maksymovyč], ?–1732. Cossack official; husband of T. *Sulyma. After gaining access to Hetman I. Mazepa's inner circle through D. Zelensky, he was chancellor of Nizhen regiment (1682–92), military executor responsible for collecting taxes on monopoly goods (from 1694), and general standard-bearer (1703–8) and general osaul of the Hetman state (1708–9). He gave himself up to the Russians after the Battle of Poltava, and in 1710 he was exiled with his family to Arkhangelsk.

Maksymovych, Heorhii [Maksymovyč, Heorhij], b 26 April 1922 in Horostyta, near Lublin, Poland. Scientist in physical chemistry and the mechanics of materials; corresponding member of the AN URSR (now ANU) since 1978.

He graduated from the Lviv Polytechnical Institute (1951). Since 1958 he has been deputy director of the ANU Physical-Mechanical Institute. His main contributions are in the fields of the high-temperature strength of construction materials, microhardness measurements, and alloy properties.

Maksymovych, Ihnatii [Maksymovyč, Ihnatij], b 1730s, d 11 December 1793 in Chernihiv. Writer, educator, and churchman. From 1757 to 1764 he lectured at the Kievan Mohyla Academy, from which he had graduated. From 1768 until his death he served as hegumen of various monasteries. His 'Oda na pervyi den maia 1761 goda' (Ode on the First Day of May in the Year 1761) is the first syllabo-tonic verse in Ukrainian literature.

Maksymovych, Ioan [Maksymovyč, Joan], b 1651 in Nizhen, d 10 July 1751 in Tobolsk, Siberia. Orthodox churchman, missionary, and writer. He graduated (1669) from and then taught at the Kievan Mohyla Academy before entering the Kievan Cave Monastery. A noted preacher, he became hegumen of the Yeletskyi Dormition Monastery in Chernihiv (1696) and then archbishop of Chernihiv (1697). In 1700 he founded *Chernihiv College with the support of I. Mazepa. In 1711 Tsar Peter I named him metropolitan of Siberia, with his see in Tobolsk. From there he conducted missionary work among the various Siberian peoples. While in Chernihiv, he published sermons, epigrams, and poems, including *Alfavit sobrannyi, rifmami slozhennyi ot sviatykh pisanii ...* (An Alphabet Compiled and Rhymed from the Holy Scriptures ..., 1705) and *Bogomyslie v pol'zu pravovernym* (Pious Thoughts for the Benefit of True Believers, 1710, 1711). His biography appeared in *Kievskie eparkhialnye vedomosti* in 1916.

Maksymovych, Ivan [Maksymovyč], b ?, d 1732. Cossack official. After studying at the Kievan Mohyla Academy he became active in Hetman I. Mazepa's administration. He fled from Ukraine with Hetman I. Mazepa after the Battle of Poltava, and then became general chancellor under Hetman P. Orlyk and was instrumental in concluding alliances with the Crimean Tatars and the Ottoman Porte. After returning to Ukraine in 1715, he was exiled to Moscow, where he worked as a clerk and was responsible for cataloging and putting in order the library of the synodal printing house. In 1722–6 he prepared a Latin-Slavonic dictionary based on G. Knapski's Latin-Polish dictionary (1626), but it remained unpublished. He was dismissed in 1728 for political disloyalty.

Maksymovych, Ivan [Maksymovyč], b 1679 in Pyriatyn, Lubni regiment, d 3 March 1745 in Kiev. Monk and church painter. He was in charge of the icon painting studios at the Zolotonosha, Mhar, Pereiaslav, and Kievan Cave (1718–45) monasteries. His mural paintings in these monasteries have not survived (they are known only from archival sources), and his most famous works, in the Dormition Cathedral of the Kievan Cave Monastery, were destroyed in the 19th century. The Kiev Museum of Ukrainian Art has his *Crucifixion*, with a depiction of Col L. Svichka.

Maksymovych, Karlo. See Savrych, Karlo.

Maksymovych, Manasiia [Maksymovyč] (secular name: Mykhailo), b ? in the Myrhorod region, d 13 July 1758 in Kiev. Orthodox churchman. He graduated from the Kievan Mohyla Academy and then taught German, Hebrew, and theology there (1746–9) and served as rector. He was also archimandrate of the Kievan Epiphany Brotherhood Monastery (1755–8). An author and translator, he oversaw the publishing activities of the Kievan Cave Monastery.

Mykhailo Maksymovych

Maksymovych, Mykhailo [Maksymovyč, Myxajlo], b 15 September 1804 at the Tymkivshchyna estate, near Zolotonosha, Poltava gubernia, d 22 November 1873 at the Mykhailova Hora estate, near Prokhorivka, Zolotonosha county, Poltava gubernia. Historian, philologist, ethnographer, botanist, and poet. In 1832 he concluded his studies at Moscow University, and remained at the university for further academic work. He lectured in botany. In 1833 he received his PHD and was named professor for the chair of botany in Moscow University. In 1834 he was appointed professor of Russian folk literature at Kiev University, and that year he became the university's first rector, a post he held until 1835. Owing to ill health he retired in 1845, and he devoted the rest of his life exclusively to scientific and literary work, which he engaged in on his estate, Mykhailova Hora. Notwithstanding his authority as an academic (he was an honorary member of numerous Ukrainian and Russian universities and many scientific societies) he was made a corresponding member of the Russian Academy of Sciences only toward the end of his life, in 1871. Maksymovych's learning was of encyclopedic dimensions and covered an unusually wide range, from botany to history. His scientific work in the field of the natural sciences was published in the 1820s and 1830s. That work, such as *O sistemakh rastitel'nogo tsarstva* (On Systems of the Plant Kingdom, 1827), *Osnovaniia botaniki* (The Foundations of Botany, vols 1–2, 1828, 1831), *Razmyslenniia o prirode* (Reflections on Nature, 1833), not only met the standards of contemporary science but proposed a new methodology.

As a folklorist Maksymovych published *Malorossiiske pesni* (Little Russian Songs) in Moscow in 1827 and *Ukrainskie narodnye pesni* (Ukrainian Folk Songs) in 1834. A third anthology, *Sbornik ukrainskikh pesen* (A Collection of Ukrainian Songs, pt 1), was published in Kiev in 1849. Maksymovych's publications on folklore had a major influence on Ukrainian folklore studies, even in Galicia.

They also created interest in Ukrainian folklore in other Slavic nations (especially among Russians, Poles, and Czechs) and also in England and America. In the field of philology Maksymovych published many papers on the classification of Slavic languages (1838, 1845, and 1850), in which he extensively used examples from Ukrainian. He was also the author of an *etymological spelling, guide, the **maksymovyčivka*. As a literary scholar Maksymovych studied *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) and transcribed it into contemporary Ukrainian. He wrote *Istoriia drevnei russkoi slovesnosti* (The History of Old Rus' Literature, vol 1, 1839). In addition he translated the Psalms into Ukrainian and wrote several poems (of note is the one dedicated to T. Shevchenko, 'Oi, iak duzhe za Toboiu tuzhyla Vkraïna' [O, How Ukraine Has Longed after You]). Maksymovych published the anthologies and almanacs *Dennitsa* (1830–4), *Kievlianin* (1840–1, 1850), and *Ukrainets* (1859, 1864).

Maksymovych adhered to the then-popular idea of romanticism and identification with the peasant ethnoscience (*narodnist'*). He defended the theory of the organic link between the Princely and Cossack eras in Ukrainian history, to which he devoted much research and many articles, critical notes on sources, and other writings. In his article 'O mniimom zapustenii Ukrainy' (On the Imaginary Desolation of Ukraine, 1857) and in letters to M. Pogodin, Maksymovych exposed the faulty basis of Pogodin's hypothesis of the 'Great Russian' population of the Kiev region during the Princely era. The works of Maksymovych on the history of Rus', Kiev, and its historic monuments are numerous; among them are *Ocherk Kieva* (Essay on Kiev, 1847) and *Pis'ma o Kieve k M. Pogodinu* (Letters about Kiev to M. Pogodin, 1871). He wrote many articles on the history of the Cossack period, the Hetmanate, and the haidamaka uprisings (on Hetman P. Sahaidachny, for example) and *Istoričeskie pis'ma o kazakakh pridneprovskikh* (Historical Writings on the Dnieper Region Cossacks, 1863–5), *Pis'ma o Bogdane Khmel'nitskom* (Writings about Bohdan Khmelnytsky, 1859), and *Bubnovskaia sotnia* (Bubniv Company, 2 vols, 1848–9). His research in those areas was significant for the development of Ukrainian historiography.

Maksymovych also worked in the field of Ukrainian archeology and was the author of the first archeological report using the typological method in Ukraine, *Ukrainskie strely drevneishikh vremen ...* (Ukrainian Arrows of More Ancient Times ..., 1868). His work in the natural sciences and history found common ground in his philosophical work. Following F. von Schelling's philosophy of nature, Maksymovych claimed that the study of nature and society should be based on scientifically researched facts. Research should be 'rigorously analytical and carefully synthetic, and thus positive' because 'philosophy can be found in every work of the mind,' and 'all learned disciplines should be philosophy.' 'Regarding the various sciences, or various branches of knowledge, one all-encompassing philosophy ought to be used, right down to fine details.' His historical and philological work has been collected in three volumes, edited by O. Kotliarevsky and published in Kiev in 1876–80. His correspondence has been only partially published, in *Kievskaiia starina* (1904); his autobiography also appeared there (1904, no. 9). The Maksymovych archival collection is located in the manuscript division of the Central Scientific Library of the

Academy of Sciences of Ukraine and, partially, in the Central State Archive of Literature and Art in Moscow.

O. Ohloblyn

Maksymovych, Mykola [Maksymovyč], b 7 March 1855 in Kiev, d 14 March 1928 in Kiev. Hydraulic engineer and designer. A graduate of the St Petersburg Institute of Road Engineers (1878), he designed and supervised the construction of the river port in Kiev (1896). He was a professor at the Kiev Polytechnical Institute (from 1900) and head of the hydrological section of the Ukrainian Academy of Sciences (from 1919). He wrote important works on the Dnieper and its watershed, electrification of the Kiev region, and regulation of the Dnieper River in Kiev.

Maksymovych, Mykola [Maksymovyč], b 29 April 1914 in Dobratycze, near Lublin, Poland. Electrical engineer. A graduate of the Lviv Polytechnical Institute (1941), he was director there (from 1954) and rector of Lviv University (from 1963). His main technical contributions are in the areas of electrotechnical theory and electric circuit calculations.

Maksymovych, Yurii (Heorhii) [Maksymovyč, Jurij (Heorhij)], b 2 May 1877 in the Chernihiv region, d ? Historian. He studied at Kiev University under M. Dovnar-Zapolsky and was a professor at the Nizhen Historical-Philological Institute, Kiev University (until 1919), and the Crimean Pedagogical Institute in Symferopil (during the 1920s). In the 1920s he was a full member of the Kharkiv Scientific Research Department of the History of Ukrainian Culture. He was imprisoned during the Stalinist terror of the 1930s, but he was later released, and became a professor at the pedagogical institute in Piatigorsk (1954). He wrote studies in the history of the 18th-century Hetman state, including monographs on Count P. Rumiantsev as governor of Little Russia (1913), military exercises in Little Russia in the second half of the 18th century (1913), and elections and mandates in Little Russia to the Legislative Commission of 1767 (1917).

Maksymovych-Ambodyk, Nestor. See Ambodyk-Maksymovych, Nestor.

Maksymovyčivka [Maksymovyčivka]. An *etymological spelling first used by M. *Maksymovych in his three editions of Ukrainian folk songs (1827, 1834, 1849). Its principles were set forth in his article on orthography and pronunciation in the 1827 edition and in an 1842 letter to H. Kvitka-Osnovianenko. In order to distinguish the Ukrainian language from Russian and yet make it recognizable to Russian readers, Maksymovych retained the etymological letters *ы, и, ъ, and ь* (eg, *сынъ, робити, ісьъ* 'son,

to work, forest'); rendered the letters *o*, *e*, *i*, and *u*, when pronounced as *i*, simply with a diacritical mark (eg, *вѣнъ, мѣдѣ, добрѣ* 'he, honey, good' pl), and used *ѣ* after labial consonants before iotated vowels (eg, *вѣззѣе, кровѣју* '(s)he drives in, with blood'), *ѣ* instead of *ѣо* and *ѣо* (eg, *ѣно, сѣно* 'his, of this'), and *e* for both *e* and *je*. P. Lukashevych used the *maksymovychivka* in his 1836 song collection, and P. Kulish wrote in it for a while, but almost all writers in Russian-ruled Ukraine rejected it. In Galicia, Bukovyna, and Transcarpathia, however, a modified version (mainly with regard to etymological markings and the use of -l endings in the past tense [eg, *ходыль* instead of *ходыв* 'he went']) was adopted by the 1848 *Congress of Ruthenian Scholars in Lviv and was used in the grammars of M. Osadtsa (1862), H. Shashkevych (1865), P. Diachan (1865), O. Partytsky (1873), and O. Ohonovsky (1889). In Galicia and Bukovyna the *maksymovychivka* remained in force in the schools until 1895, and in the Russophile press and books until the 1930s. Ye. *Zhelekhivsky's Ukrainian-German dictionary (1886) and S. *Smal-Stotsky's Ruthenian grammar (1893) played a decisive role in its withdrawal from the schools. In Transcarpathia, however, an etymological spelling based on the *maksymovychivka* was sanctioned by O. *Dukhnovych's grammar (1853), L. *Csopey's primers of the 1880s, and the school questionnaire issued in Uzhhorod in 1920. It remained current there because of the archaic phonetics of the Transcarpathian dialects and the unfamiliarity of Transcarpathian populist writers with literary Ukrainian. I. *Pankevych's (1923, 1927) and A. *Voloshyn's (1907, 1920) grammars were based on this orthography. (See also *Orthography.)

O. Horbach

Ivan Makukh

Ivan Makushenko: Self-Portrait (oil, 1907)

Makukh, Ivan [Makux], b 17 September 1872 in Dorozhiv, Sambir county, Galicia, d 18 September 1946 in Salzburg, Austria. Lawyer, civic and political leader, and co-operative organizer. Upon graduating from Lviv University (PH D, 1901) he was active in the *Ukrainian Radical party and edited its paper **Hromads'kyi holos*. In 1907 he opened a law office in Tovmach and became active in the educational and political life of the county: he organized Prosvita reading rooms, Sich branches, and the Selianska Kasa credit union. As deputy to the Galician Diet (1908–18) he demanded reform of the electoral system, which was biased against the Ukrainian population. Dur-

ing the First World War he was a member of the General Ukrainian Council and the Ukrainian National Rada. He served as secretary of public works in the First State Secretariat (1918) and secretary of internal affairs in the Second State Secretariat of the Western Ukrainian National Republic (1919). After the government's evacuation beyond the Zbruch River he became deputy minister of internal affairs of the UNR (1920). Upon returning to Tovmach at the end of 1920, he resumed his law practice and political activity. He headed the Ukrainian Socialist Radical party (1930–9) and was twice elected to the Polish Senate (1928 and 1930). In 1944 he emigrated to Austria, where he wrote his memoirs, which were published posthumously as *Na narodnii sluzhbi* (In the People's Service, 1958).

Makukh, Vasyl [Makuxa, Vasyl'], b 1921 in Kariv, Rava Ruska county, Galicia, d 5 November 1968 in Kiev. Political protester. Having served long terms of imprisonment throughout the 1950s, he set himself on fire on Khreshchatyk Boulevard, the main thoroughfare of Kiev, to protest Soviet political repression and the colonial subjugation of Ukraine. Before his death he was heard to shout 'Colonialism out of Ukraine!' and 'Long live a free Ukraine!' His self-immolation was the first such act of protest in Ukraine.

Makushenko, Ivan [Makušenko] (Makukha), b 30 March 1867 in Lysiianka, Zvenyhorodka county, Kiev gubernia, d 7 June 1955 in Kiev. Painter and educator. He studied under I. Repin at the St Petersburg Academy of Arts (1892–7) and then worked in Ukraine, where he taught at the Kiev Art School (1905–19) and the Kiev State Art Institute (1934–55). He is known for his genre paintings, such as *Feast Day in Ukraine* (1900), *Before the Feast Day* (1904), *Lirnyk in the Village* (1911), and *Grandmother with Little Girl* (1936). Some of his works have been preserved at the Kiev and Lviv museums of Ukrainian art.

Mal, b ?, d 946. *Derevlianian prince, also known as Niskinei. According to the Primary Chronicle, *Povist' vremennykh lit*, in 945 Mal led the Derevlians of Iskorosten (Korosten) in a revolt against the Kievan prince *Ihor. Ihor was killed in the revolt, and the Derevlians proposed that his widow, *Olha, marry Mal, so that he could lay claim to the Kiev principality. She replied by forcibly suppressing the revolt in 946, at which time Mal was either killed or executed. In certain interpretations of the chronicles it is alleged that Mal was the father of *Malusha (mother of Volodymyr the Great), but that is highly unlikely.

Mala, Liubov, b 13 January 1919 in Kopani, Berdianske county, Tavriia gubernia. Internal medicine specialist; full member of the USSR Academy of Medical Sciences from 1974. A graduate of the Kharkiv Medical Institute (1938), she began working at the institute in 1946. In 1955 she was appointed head of the internal medicine department and scientific head of the cardiology laboratory at the institute's hospital. Her publications deal with the early diagnosis and treatment of arteriosclerosis, arterial hypertension, and ischemia. She wrote *Ishemicheskaia bolezni' serdtsa u molodykh* (Ischemic Heart Disease in Young People, 1978).

Mala Danylivka. III-17. A town smt (1990 pop 8,400) on the Lopan River in Derkachy raion, Kharkiv oblast. It was founded in 1714, and attained smt status in 1938. It is the home of the *Kharkiv Zootechnical-Veterinary Institute and a branch of the Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics.

Mala Vyska. VI-12. A city (1990 pop 14,900) on the Mala Vys River and a raion center in Kirovohrad oblast. It was founded in the first half of the 18th century, and attained city status in 1957. It has a sugar-refining complex, a distillery, and a powdered-milk plant.

Malakhov, Heorhii [Malaxov, Heorhij], b 29 March 1907 in Bilopillia, Sumy county, Kharkiv gubernia. Mining scientist; full member of the AN URSS (now ANU) since 1967. He graduated from the Dnipropetrovske Mining Institute (1930) and worked in the mining areas of Kryvyi Rih and the Urals. Since 1973 he has been in charge of the Kryvyi Rih division of the ANU Institute of Geological Sciences. His works deal with mining (particularly mining at great depths), prospecting, and geology.

Malakhov, Petro [Malaxov], b 1753 in Chernihiv, d 1807 in Chernihiv. Physician. A graduate of Chernihiv College and the Moscow Medical-Surgical School (1773), he was physician of Chernihiv vicegerency from 1784 and inspector of the Chernihiv Medical Administration from 1797. He compiled the first medico-topographical description of Chernihiv gubernia.

Malakhov, Vasyl [Malaxov, Vasyl'], b 8 March 1779 in Malakhivka, Chernihiv region, d 1856. Physician and surgeon. Educated at Chernihiv Seminary and the St Petersburg Medico-Surgical Academy 1801, he was general staff doctor of the Podilia army from 1813 and a hospital inspector (from 1829). In 1820 he proposed a practical classification scheme for diseases.

Malanchuk, Hryhor. See Malantschuk, Gregor.

Malanchuk, Valentyn [Malančuk] (né Milman), b 13 November 1928 in Proskuriv (now Khmelnytskyi), d 25 April 1984 in Kiev. Stalinist functionary and historian. A graduate of Lviv University (1950), he worked in the Lviv Oblast Komsomol Committee (1950–2) and then in the Lviv Oblast Party Committee (1952–67). He served as deputy minister of higher and specialized secondary education (1967–72), CC CPU ideology secretary (1972–7), and candidate member of the Politburo (1972–81). A protégé of M. Suslov, Malanchuk made his reputation by suppressing 'Ukrainian bourgeois nationalism' in Lviv oblast in the 1960s and purging the CPU and Ukrainian academic and cultural institutions of dissidents after P. Shelest's downfall in 1972. A professor at Kiev University from 1968 and head of the department of CPSU history at the Kiev Polytechnical Institute from 1979, he wrote articles on the history of the Communist Party of Western Ukraine, a book on the Komsomol in Western Ukraine (1959), and a book on Soviet nationality policy (1963), in which he advocated Russification.

Malanchuk, Volodymyr [Malančuk], b 20 August 1904 in Zalishchyky Mali, Buchach county, Galicia, d 29

Bishop Volodymyr Malanchuk

Ira Malaniuk

September 1990 in Saskatoon, Saskatchewan. Ukrainian Catholic bishop. He graduated from the Redemptorist seminary in Eschen, Belgium, in 1924 and entered the Redemptorist order. He was ordained in 1931, and taught at Redemptorist schools in Galicia and continued his studies at the universities of Lviv and Munich (PHD, 1944). A postwar refugee, he was a lecturer at the Ukrainian Catholic seminaries in Hirschberg, Germany, and Kulemborg, Netherlands, and general vicar in Great Britain (1949–50) before emigrating to Canada. He served as protohegumen of the eastern rite Redemptorists in North America and edited the order's journal *Lohos. In 1962 he was consecrated bishop and first exarch of the Ukrainian Catholic church in France. After retiring in 1982, he returned to Canada.

Malaniuk, Ira [Malanjuk], b 19 January 1919 in Stanyslaviv (now Ivano-Frankivske), Galicia. Opera and concert singer (mezzo-soprano). She studied under A. Didur in Lviv and at the Vienna Music Academy. In 1941–4 she appeared at the Lviv Opera Theater, and in 1947 at the Municipal Opera in Zurich. From 1952 she was a soloist of the Munich State Opera, and she also sang at the Vienna State Opera, La Scala, the Paris Opera, and Covent Garden, and in Berlin and Stuttgart. She was highly regarded in operas by R. Strauss and was well known at the Salzburg Festivals. In recitals she sang from the Ukrainian repertoire, including works by M. Lysenko, D. Sichynsky, S. Liudkevych, V. Barvinsky, Ya. Stepovy, N. Nyzhankivsky, B. Liatoshynsky, and A. Hnatyshyn. She recorded for many international labels.

Malaniuk, Yevhen [Malanjuk, Jevhen], b 20 January 1897 in the Kherson region, d 16 February 1968 in New York. Poet and political and community activist. He became an officer of the UNR Army in 1917 and was interned in Kalisz, Poland, in 1920. He graduated from the Ukrainian Husbandry Academy in Poděbrady in 1923. Toward the end of the Second World War he resettled in Germany, and then he emigrated to the United States. He founded the literary journal *Veselka* with Yu. Darahan in Kalisz, and he continued to publish it in 1922–3. Published collections of his poetry include *Stylet i stylos* (The Stiletto and the Stylus, 1925), *Herbarii* (Herbarium, 1926), *Zemlia i zalizo* (Earth and Steel, 1930), *Zemna madonna* (The Earthly Madonna, 1934), *Persten' Polikrata* (The Ring of Polycrates,

Yevhen Malaniuk

Gregor Malantschuk

1939), *Vybrani poezii* (Selected Poetry, 1943), *Vlada* (Power, 1951), *Poezii* (Poems, 1954), and *Ostannia vesna* (The Last Spring, 1959). He also published a longer poem, *P'iata symfonia* (The Fifth Symphony, 1953), and a number of collections of essays, including *Narysy z istorii nashoi kul'tury* (Essays in the History of Our Culture, 1954), *Do problemy bol'shevyzmu* (On the Problem of Bolshevism, 1956), and *Knyha sposterezhen'* (A Book of Observations, 1962). An edition of his selected works with extensive annotation and a bibliography, *Zemna Madonna* (The Earthly Madonna), was published in 1991 in Prešov.

His poetry is one of the better examples of the literary resurgence of the 1920s and 1930s. He was a member of the *vistnykivtsi*, made up of literary contributors to D. Dontsov's journal **Vistnyk*. His work was influential in émigré circles, in Western Ukraine, and in the Ukrainian SSR, where he was under constant attack by official critics, who called him a Ukrainian fascist.

The style and engaged content of his poetry emerged as a result of his generation's anger and frustration at Ukraine's subjugation, at the defeat of the national revolution, and at the ongoing tragedy caused by Moscow's domination of Ukraine. His anger was directed not only at external forces but also at internal weaknesses, such as the *Little Russian mentality, anarchism, lack of national discipline and organization, and the domination of emotion over intellect. His poetry is accordingly characterized by dynamism, the frequent use of words with shock value, pathos, prophecy, and reflections on the past. He used mostly regular strophes, with classical meter (he favored the energy of iambs) and rhyme schemes, and was inventive in his use of visual imagery. According to V. Derzhavyn, 'Only partially imbued with classicism, his poetry ranges for the most part between symbolism and the baroque (or romanticism) with a preference for the latter.'

Yu. Lavrinenko

Malanka (aka *Melanka*). A Ukrainian folk feast on New Year's Eve corresponding to St Sylvester's Feast in the Latin calendar. The name originates from St Melaniia, whose day falls on 13 January (31 December OS). In central and eastern Ukraine the feast was also known as *Shchedryi vechir* (Generous Eve) or *Shchedra kutia*. Traditionally, Ma-

lanka (a bachelor dressed in women's clothing), with a dressed-up goat, gypsy, old man, old woman, Jew, and other characters and musicians, went from house to house in the village supposedly to put the households in order. But instead of bringing order Malanka played all kinds of pranks. In some locales young men and women brought a plow into the house and pretended to plow a field. The folk play was concluded with caroling. The *Malanka* traditions were most prevalent in the Dnieper region. They combine old agrarian themes with folk theater (the *intermede and **vertep*). After the 1917 Revolution the *Malanka* tradition declined, but it was revived in the early 1930s as part of the New Year celebrations. Today Ukrainians in and outside Ukraine celebrate *Malanka* as the traditional way of inaugurating the Julian-calendar New Year.

Malantschuk, Gregor [Malančuk, Hryhor], b 2 September 1902 in Harbuziv, Zboriv county, Galicia, d 20 August 1978 in Copenhagen. Philosopher; a leading authority on S. Kierkegaard. After studying at Berlin University (PH D, 1934) he moved to Copenhagen, where from 1939 he conducted private study circles in philosophy and psychology, taught Ukrainian language and literature (1948–61), lectured on Kierkegaard (1962–73), and was a research fellow (1966–73) at the University of Copenhagen. His Kierkegaard lectures attracted scholars from around the world, and his works on Kierkegaard have been translated from Danish into several languages. He wrote over five monographs on Kierkegaard, the most important of which are *Dialektik og Existens hos Søren Kierkegaard* (1968; English trans: *Kierkegaard's Thought*, 1971) and *Fra Individ til den Enkelte* (1978). Malantschuk's Kierkegaard collection was acquired by McGill University in Montreal in 1981.

Malaria (Ukrainian: *maliariia*). An acute debilitating disease characterized by periodic recurrences of chills and fever, anemia, enlargement of the spleen, and high mortality. The infection is caused by various organisms of the genus *Plasmodium* that are transmitted by Anopheles mosquitoes. Malaria is most common in tropical and subtropical climates and is therefore not a major illness in Ukraine. Before the revolution 3 percent of the population yearly developed the disease. In 1919 the number of cases rose sharply, mainly as a result of lack of drugs (quinine), generally bad health care, and the suspension of control of the mosquito population. In 1923–4 there were nearly three million sufferers annually in Ukraine; in some regions up to 20 percent of the population was infected. Outbreaks also occurred in 1932–4 (up to two million afflicted) and 1943–5 (approx 5 percent of the population). The Ukrainian Protozoan Institute was founded in Kharkiv in 1923. The People's Commissariat of Health Protection created a department to combat malaria, and 285 antimalarial stations were set up that year. To combat the mosquito population, extensive draining of marshes and aerial spraying were employed.

A global eradication program was launched in 1955 under the auspices of the World Health Organization. These preventive and control measures contributed to the virtual elimination of malaria in Ukraine (32 cases in Ukraine in 1958).

A number of Ukrainian scientists contributed to research on the infection. V. Danylevsky discovered the ma-

laria pathogen in birds (1884); V. *Rubashkin studied the microscopic structure of *Plasmodium*; and F. Favr, K. Selivanov, and M. Morozovska studied its infection patterns.

P. Dzul

Malashchuk, Roman [Malaščuk], b 11 November 1913 in Bedrykivtsi, Zalishchyky county, Galicia, d 8 May 1991 in Toronto. Political leader. He joined the OUN as a gymnasium student in Kolomyia and by 1937 had been appointed to its national executive as chief of the student network. In March 1939 he was arrested by the Polish police along with other participants in a student congress. After fleeing from the Soviets to Cracow he helped organize *OUN expeditionary groups. At the outbreak of the German-Soviet War, he returned to Stanyslaviv, where he was arrested in September by the Gestapo. He spent the rest of the war in the Auschwitz concentration camp. From 1945 he played a leading role in the Bandera faction of the OUN in the West. After emigrating to Canada in 1948, he helped to found the Ukrainian Youth Association, the *Canadian League for Ukraine's Liberation (which he headed in 1949–75), and the newspaper *Homin Ukraïny*. Malashchuk headed the presidium of the *Ukrainian Liberation Front in 1967–83 and sat on the Secretariat of the World Congress of Free Ukrainians in 1973–83. His experiences are described in *Z knyhy moho zhyttia: Spomyny* (From the Book of My Life: Memoirs, 2 vols, 1987, 1988).

Malashevych, Ivan [Malaševyč], b ?, d ca 1737. Zaporozhian Cossack leader. He was elected kish otaman nine times in 1714–37, first of the Oleshky Sich and later of the New Sich. He was a leading advocate of returning the Zaporozhian Cossacks to their traditional strongholds (albeit under the suzerainty of the Russian tsar). In 1714, 1716, 1717, 1727, and 1728 he was the emissary of Hetmans I. Skoropadsky and D. Apostol to the tsarist government. In March 1734 they returned from Oleshky and established the New Sich. Malashevych died during the Zaporozhian campaign to Ochakiv.

Malashkin, Leonid [Malaškin], b 1842 near Riazan, Russia, d 11 February 1902 in Moscow. Russian composer, conductor, and pedagogue. After studying music in Berlin, he was appointed conductor of the Kiev Opera in 1877. He also taught singing at the Kiev Theological Academy. While in Kiev, Malashkin composed a cycle of liturgical music based on Kievan chant, premiered his opera *Illia Muromets'* (1879), and composed piano works based on Ukrainian folk songs (including 'Kozachok' and 'Our Ukraine'). In 1888 he returned to Moscow, where he published an anthology of 50 Ukrainian songs arranged for voice and piano.

Malashko, Mykhailo [Malaško, Myxajlo], b 1882, d 1920. Military and political activist. An officer of an infantry school in the Russian army, in June 1917 he was elected to the All-Ukrainian Council of Military Deputies. At the end of the year he was appointed deputy commissioner of the Central Rada for the Donetsk Basin. As commander of a partisan detachment in 1919–20, he fought the Bolsheviks, N. Makhno's forces, and A. Denikin's troops. He was captured and executed by the Bolsheviks.

Malavsky, Volodymyr [Malavs'kyj], b 1853 in Kamianets-Podilskyi, Podilia gubernia, d 28 March 1886 in Schlüsselburg county, St Petersburg gubernia. Civic activist. He was a political propagandist in Podilian villages from 1874, and he was arrested in 1877 for his role in planning a peasant uprising in Chyhyryn county, Kiev gubernia. He was sentenced to 20 years of hard labor in Siberia in 1880 and had 15 years added to his term after an unsuccessful escape attempt in 1881. For taking part in protests over severe prison conditions he was transferred to the Peter and Paul Fortress in St Petersburg in 1883 and then to the nearby Schlüsselburg Fortress, where he died of consumption.

Malczewski, Antoni, b 3 June 1793 in Kniahynyne, near Dubno, Volhynia, d 2 May 1826 in Warsaw. Polish poet; member of the *Ukrainian school in Polish literature. He completed his education at the Kremianets Lyceum in 1811. His only published work, *Maria, powieść ukraińska* (Maria, A Ukrainian Novelle, 1825), was written under the influence of the Ukrainian oral tradition and contains descriptions of Ukraine's landscape and people.

Malecha, Nestor [Maleča], b 8 November 1887 in Struhovska Buda, Surazh county, Chernihiv gubernia, d 9 August 1979 in Uralsk, Kazakhstan. Philologist and educator. A graduate of the Free Higher School in St Petersburg (1907) and the Kiev Archeological Institute (1925), he compiled the first dictionary of T. Shevchenko's language (1916) and prepared a number of primers and textbooks for adults. He was director of the lexicological office of the VUAN Institute of Linguistics (1930–3). After his arrest and exile he lectured at the Uralsk Pedagogical Institute and compiled a dialectological dictionary of the language of the Ural Cossacks (unpublished). He was a founder of the Ukrainian Ethnographic Society and of the Western Kazakhstan Section of the USSR Geographical Society.

Viktor Malets

Malets, Viktor [Malc'], b 1 October 1894 in Chuhuiiv, Zmiiv county, Kharkiv gubernia, d 9 July 1969 in London. Military figure. An officer in the Russian army during the First World War, in December 1917 he joined the UNR Army and became staff captain in the First Serdiuk Division, battalion commander in the Second Zaporozhian Regiment (October 1918), and commander of the 19th Zaporozhian Republican Regiment (April 1919). In 1920 he commanded the 48th Battalion of the Sixth Sich Division and retreated with it into Poland. In the 1920s he studied engineering at the Ukrainian Husbandry Academy in Poděbrady and then served as a major in the Polish

army. In 1940 he organized and directed an OUN officer school near Cracow, and in autumn 1941 he served as an officer with the OUN (Melnyk faction) expeditionary groups in central Ukraine. From May 1943 he was in charge of the officers' sector at the Military Board (Division Galizien). After being released from British internment in 1948, for many years he served as a representative of the defense department of the UNR government-in-exile and president of the Ukrainian Combatants' Council and Ukrainian Officers Club in England.

Bishop Volodymyr Malets

Malets, Volodymyr [Malec'], b 23 April 1890 in the Kherson region, d 23 July 1967 in Detroit. Orthodox bishop. He graduated from the historical-philological faculty of Kiev University in 1915 and then taught in postsecondary schools and engaged in scholarly work. In June 1942 he was consecrated bishop of Cherkasy in the renewed Ukrainian Autocephalous Orthodox church (UAOC) in Kiev. In 1944 he emigrated to Warsaw, and then to Germany, where he was made bishop of UAOC faithful in northern Bavaria. From 1946 he was a member of the Ukrainian Orthodox Scholarly Theological Institute and curator of the Theological Academy of the UAOC in Munich (1948–9). In 1951 he emigrated to Detroit, and in 1957 he was elevated to the office of archbishop.

Malevich, Kazimir [Malevič], b 23 February 1878 in Kiev, d 15 May 1935 in Leningrad. Painter, designer, and theorist. He studied at the Kiev Art School (1895–7), the Moscow School of Painting, Sculpture, and Architecture (1904–5), and F. Rerberg's studio in Moscow (1905–10). Influenced at first by the Impressionists and Fauvists, he participated in avant-garde exhibitions in Moscow, at which he displayed paintings in a neoprimitivist style, such as *Peasants in Church* (1910–11) and *The Harvest* (1911); cubo-futurist works, such as *The Knife Grinder* (1912); and paintings, such as *An Englishman in Moscow* (1914) and *Woman beside an Advertising Pillar* (1914), which show the influence of P. Picasso and G. Braque's synthetic cubism. In 1915 Malevich launched the artistic movement of *suprematism in Petrograd. He was the first modern painter to work in a purely geometric, cerebral, nonfigurative manner (eg, his paintings *Black Square* [1913] and *White on White* [1918]). In 1916 he published the journal *Supremus*. Under Soviet rule he was a member of the Division of Visual Arts of the Russian Commissariat of Enlightenment; taught at the Vitsebsk Art Institute in Belarus (1919–22), the Leningrad Academy of Arts (from 1922), and the Kiev State Art Institute (1927–9); and direct-

Kazimir Malevich: *Girls in a Field* (oil, ca 1928–32)

ed the Leningrad Institute of Artistic Culture (1923–6). In the 1920s he began working in a constructivist style, in which he produced urban architectural models and furniture, textile, and china designs. He was a prolific writer and produced various theoretical works, notably *The World as Non-Objectivity* (English trans 1976), developed new educational methods, and established original theoretical frameworks for the analysis of paintings. His works and theories influenced a number of Soviet avant-garde artists, including the Russians I. Chasnik and El Lissitzky and the Ukrainians V. Yermilov, V. Meller, and A. Petrytsky. In the late 1920s, because of growing opposition on the part of the central Soviet government to the avant-garde, Malevich was able to publish 13 articles of his theories only in the Kharkiv journal **Nova generatsiia* (1928–9). Having been forced to return to a figurative style of painting in 1929, he died in poverty and oblivion.

N. Mykytyn

Mali druzi (Little Friends). An illustrated children's monthly published in Lviv (1937–8, 1942–4) and Cracow (1940–4). The magazine was renewed in Augsburg, Germany (1947–8), by the Association of Ukrainian Writers for Young People. It was edited by B. Hoshovsky and illustrated by R. Chornii and O. Sodomora. Contributors included V. Barahura, I. Bahriany, I. Kernysky, B. Nyzhankivsky, S. Hordynsky, Yu. Tarnovych, L. Poltava, V. Onufriienko, O. Oles, O. Stefanovych, O. Liaturynska, O. Kobets, K. Perelisna, V. Chaplenko, I. Savytska, B. Zaklynsky, and V. Vovk.

Mali Mynky. A village now in Narodychi raion, Zhytomyr oblast. On 17 November 1921 the Volhynia Group of the UNR Army, during the Second Winter Campaign, was surrounded there by Bolshevik forces. Many UNR soldiers died in battle, but the majority were captured and later executed at *Bazar. This marked the end of UNR military operations against the Bolsheviks.

Maliar, Volodymyr [Maljar], b 7 April 1941 in Kharkiv. Actor. In 1962 he completed study at the Kharkiv Theater

Institute, and since then he has worked in the Kharkiv Ukrainian Drama Theater. He has played mainly heroic and character roles, notably the title role in W. Shakespeare's *Richard III* (1976).

Maliarstvo i skul'ptura. See *Obrazotvorche mystetstvo*.

Maliatko (Preschooler). An illustrated monthly children's magazine published in Kiev by the Communist Youth League of Ukraine from 1960 to 1992. It contains poems, folktales, stories, songs, games, riddles, and exercises intended primarily for preschoolers. In 1980 it had a circulation of 611,000.

Maliieva-Tahaieva, Hanna. See Tahaiv, Anna.

Archbishop Kostiantyn
Maliushkevych

Maliushkevych, Kostiantyn [Maljuškevyč, Kostjantyn], b 2 February 1890 in Zhylyntsi, Zaslav county, Volhynia gubernia, d 1937? Bishop of the Ukrainian Autocephalous Orthodox church (UAOC). A graduate of the Zhytomyr Theological Seminary (1912) and the Kiev Theological Academy (1916), he was ordained in 1915, and worked as a teacher (1916–21). In 1922 he was consecrated bishop of Uman. After serving as bishop of Katerynoslav (1924) he was elected vice-president of the presidium of the All-Ukrainian Orthodox Church Council (1926) and elevated to the office of archbishop of Kiev and vice-metropolitan (1927). After the UAOC was dissolved, he headed the Kiev eparchy of the restructured Ukrainian Orthodox church (1930–4). Harassed constantly by the authorities, he was forced to resign in 1934 and forbidden to deliver sermons or conduct services. Maliushkevych was arrested in 1937, and his subsequent fate is unknown; he was probably shot in 1937 or 1941.

Maliutsa, Antin [Maljuca], b 1908 in Toky, Zbarazh county, Galicia, d 17 June 1970 in New York City. Painter, graphic artist, and critic. He studied at the Novakivsky Art School (1926–30) and State Institute of Plastic Art (1935–9) in Lviv and was a member of the RUB artists' group. A postwar refugee, in 1950 he emigrated to New York, where he was an executive member of the Literary-Artistic Club and the Ukrainian Artists' Association in the USA. He experimented with various printing techniques. He produced two series of drawings, 'Horrors' and 'A Voyage in Darkness,' and oils, engravings, and church murals, and wrote many articles on art for the Ukrainian émigré press.

Antin Maliutsa: *That Way* (charcoal, 1947)

Rev Mykola Maliuzhynsky

Maliuzhynsky, Mykola [Maljužyns'kyj], b 1903 in Liubar, Novohrad-Volynskyi county, Volhynia gubernia, d 15 October 1943 in Rivne, Volhynia. Priest and Orthodox church activist. He graduated from the Kremianets Theological Seminary and then received an MA in theology from Warsaw University. While serving as a parish priest in various villages in Volhynia, he protested the forced conversion of Orthodox Ukrainians to Catholicism by the Polish authorities in 1937–8, for which action he was persecuted. When the Soviets occupied Volhynia in 1939, he fled to the Kholm region, where he served as general vicar and as member of the Kholm Consistory. In 1941 he joined the administration of the Ukrainian Autocephalous Orthodox church in Lutske as an assistant to Metropolitan P. Sikorsky. He was executed by the Nazis in a Rivne prison.

Mykola Malko

Malko, Mykola [Mal'ko] (Nicolai), b 4 May 1883 in Brailiv, Vinnytsia county, Podilia gubernia, d 23 June 1961 in Sydney, Australia. Conductor. He studied under N. Rimsky-Korsakov, A. Liadov, A. Glazunov, and N. Tcherpnin in St Petersburg, M. Lysenko in Kiev, and F. Mottl in Munich before taking a position with the St Petersburg Opera (1909–18). He then moved between Vitsebsk and Moscow, Kiev, and Kharkiv (1921–4) before returning to Leningrad to teach in the Conservatory and conduct the Philharmonic. From 1928 he toured Western Europe to considerable acclaim, and in 1930 he emigrated permanently to the West. He settled initially in Copenhagen, where he founded the Danish National Orchestra. In 1940 he moved to the United States to teach conducting at Mills College in Oakland and then conducted the Chicago Symphony Orchestra. He subsequently conducted the Yorkshire Symphony Orchestra in England (1954–6) and the Sydney Orchestra in Australia (1956–61). His performances of P. Tchaikovsky, N. Miaskovsky, S. Prokofiev, B. Liatoshynsky, and others were highly regarded for their clarity and balance. Malko conducted many world premieres, including Miaskovsky's Symphony no. 5 (Moscow, 1920) and the first two symphonies of the young D. Shostakovich (Leningrad, 1926 and 1927). He was also the first to conduct in the West the 'Galician Dances' from Liatoshynsky's opera *The Golden Ring*. Widely recorded, Malko earned particularly high regard for his discs with the London Symphony Orchestra. He also wrote a methodological study, *The Conductor and His Baton* (1950), and a memoir about his mentors, *A Certain Age* (1966). A collection of his writings was translated into Russian and published in Leningrad in 1972.

R. Savytsky

Malkovych, Ivan [Malkovyč], b 10 May 1961 in Nyzhnii Bereziv, Kosiv raion, Ivano-Frankivske oblast. Poet. He graduated from Kiev University (1985) and has worked as an editor for the Veselka and Molod publishing houses. Malkovych is the author of two poetry collections, *Bilyi kamin* (White Stone, 1984) and the avant-garde *Kliuch* (The Key, 1988).

Malorosiistvo. See Little Russian mentality.

Malorossiiskii prikaz. See Little Russian Office.

Malorusskii literaturnyi sbornik (Little Russian Literary Collection). A Ukrainian literary almanac published in 1859 in Saratov by D. *Mordovets. It contained works by Mordovets and M. Kostomarov; over 200 folk songs; the first four Ukrainian folk tales to be published, 'Okh,' 'Koza-dereza' (Billy Goat's Bluff), 'Kazka pro Ivasyka i pro vid'mu' (A Tale about Ivasyk and the Witch), and 'Kazka pro korolevu Katerynu' (A Tale about Queen Catherine); and the first translation of N. Gogol ('Vecher nakanune Ivana Kupala' [St John's Eve]) into Ukrainian. In his introduction to the poem 'Kozaky i more' (The Cossacks and the Sea) Mordovets argued for the use of Ukrainian in the press and the schools.

Malovantsi. A religious sect in the Kiev region that split from the Baptists in the late 19th century. It was founded by K. Malovany, a peasant born in 1844 in Tarashcha, Kiev gubernia. Adherents of the sect believed that the end of the world was approaching, and most stopped working and awaited the Apocalypse. When Malovany's prophecies did not come true, his followers became disillusioned and resumed their normal lives. After Malovany's death in 1913, the sect disappeared.

Malovany, Volodymyr [Mal'ovanyj], b 1848 in Katerynoslav county, d 10 March 1893 in Tomsk, Siberia. Political activist and poet. He was exiled to Balagansk, Irkutsk gubernia, in 1879 for being a member of the Odessa Hromada, but he escaped in 1881 to Geneva, where he became active in M. Drahomanov's circle. He returned to Ukraine in 1883 under the assumed name of Hryhorii Petrov, and in Kharkiv he helped to establish a hromada and developed plans for a Ukrainian radical party. He was arrested a second time in 1883, and died of stomach cancer in Tomsk. His poem 'Ne puturai' (Pay No Heed) was published by I. Franko in the anthology *Akordy* (1903).

Maltsev, Aleksandr [Mal'cev], b 7 April 1855 in Totma county, Vologda gubernia, Russia, d 26 November 1926 in Poltava. Russian physician. A graduate of the St Petersburg Medico-Surgical Academy (1880), he worked under V. Bekhterev at Kazan University. In 1886 he became director of the Poltava Psychiatric Hospital, and in 1890 he organized a psychiatric clinic for Poltava gubernia that provided free treatment. He wrote textbooks in psychiatry and pharmacology.

Malusha [Maluša] (real name: Malfrid), b ?, d ca 1000. Concubine of Sviatoslav I Ihorevych the Conqueror; sister of *Dobrynia of Liubech and mother of *Volodymyr the Great. According to the ancient chronicles, which recorded her name as Malusha, she was the daughter of Malko Liubchanyn and a favorite of Princess Olha, Volodymyr's grandmother. Other sources say she was the daughter of the Derevlianian prince *Mal. The *Zapiski* of the Russian Imperial Academy of Sciences (vol 5) contain articles on Malusha by D. Prozorovsky and I. Sreznevsky.

Malyi Kuialnyk River [Malyj Kujal'nyk]. A river in Odessa oblast. It is 89 km in length and drains a basin area of 1,540 sq km. It empties into the Black Sea at the Khadzhybei Estuary. The river is dammed and used for irrigation. Its flow is intermittent owing to seasonal droughts.

Malji misionarchyk (Little Missionary). A monthly Catholic children's magazine published in Zhovkva, Galicia, by the Basilian Fathers in 1903–14 and 1920 as a supplement to **Misionar*. It was edited by Revs Ye. Teodorovych and L. Berezovsky, who also edited *Misionar*.

Malyk, Volodymyr (pseud of Volodymyr Sychenko), b 21 February 1921 in Novosilky, Kiev gubernia. Writer of popular fiction. Since 1957 he has published several collections of historical-mythical tales and poetry for children; five children's novels, including *Slid vede do moria* (The Trail Leads to the Sea, 1975), *Kniaz' Kyi* (Prince Kyi, 1982), and *Dvoie nad pririvoiu* (Two above the Abyss, 1983); and several widely read, well-researched novels set in the Cossack and medieval periods: a tetralogy consisting of *Posol Urus-Shaitana* (Urus-Shaitan's Emissary, 1968; English trans: *The Cossack Ambassador*, 1986), *Firman sultana* (The Sultan's Coachman, 1969), *Chornyi vershnyk* (The Black Rider, 1976), and *Shovkovyi shnurok* (The Silk String, 1977), and the novels *Taiemnyi posol* (The Secret Emissary, 2 vols, 1981–2) and *Cherleni shchyty* (Crimson Shields, 1985). A two-volume selection of his works appeared in 1986.

Malyn. III-10. A city (1990 pop 29,700) on the Irsha River and a raion center in Zhytomyr oblast. It was founded in the 11th century, and played an important role in the Cossack-Polish War of 1648–57. It attained city status in 1938. Malyn is an important center of the paper industry and the building-materials industry. Its pride is a large park established in the 19th century.

Malyn. A village in Ostrih district, Volhynia (now in Mlyniv raion, Rivne oblast). On 14 July 1943 German security forces consisting of Poles and Uzbeks forced its Ukrainian and Czech inhabitants, including the pastor, into the village church, school, and barns and set them afire. Eight hundred and fifty people perished.

Malynivka. IV-17. A town smt (1990 pop 7,600) on the Donets River in Chuhuiv raion, Kharkiv oblast. It was founded in 1652 as a Cossack settlement, and attained town status in 1938. Several Scythian settlements from the 5th to 3rd centuries BC have been excavated near Malynivka.

Malynka, Oleksander, b 19 August 1865 in Mryn, Nizhen county, Chernihiv gubernia, d 22 May 1941 in Kiev. Folklorist. A graduate of the Nizhen Historical-Philosophical Institute (1890), he worked as a teacher in different regions of Ukraine and collected ethnographic materials. In the 1920s he was a research associate of the VUAN Ethnographic Commission. He was interested particularly in the songs of lirnyks and kobzars. His works include studies of the Ukrainian wedding (1897), the Kupalo festival (1898), and baptism (1898); a collection of materials in Ukrainian folklore (1902); and a song collection based on the repertoires of the kobzars O. Vlasko and D. Symonenko and the lirnyk A. Ivanytsky (1929).

Malynkovych, Volodymyr [Malynkovyč], b 1940. Physician and dissident. He joined the Ukrainian Helsinki Group in December 1978 and was harassed by the KGB until he left Ukraine at the end of 1979. He settled in Munich,

where he edited *Forum*, a journal dealing with Soviet affairs.

Malynovska, Marharyta [Malynovs'ka], b 22 November 1941 in Uim, Volhynia, d 22 October 1983. Writer and literary critic. She graduated from Kiev University (1966) and worked on the editorial boards of the journals *Vitchyzna* and *Literaturna Ukraina*. She was appointed secretary responsible for the Dramaturgy Commission of the Writers' Union of Ukraine. She published many articles and two collections of criticism on contemporary Soviet Ukrainian theater, books on O. Honchar (1971) and on L. Leonov and Ukraine (1979), and the novels *Hrymuchi ozera* (Thunderous Lakes, 1977) and *Polissia* (1980).

Malynovsky, Borys [Malynovs'kyj], b 24 August 1921 in Luhk, now in Ivanovo oblast, Russia. Computer scientist; corresponding member of the AN URSS (now ANU) since 1969. He graduated from the Ivanovo Energetics Institute (1950) and worked at the AN URSS Institute of Electrotechnology (1953–7) and the AN URSS Computing Center (since 1962; now the ANU Institute of Cybernetics). His main contributions are in computational theory. He was in charge of the Dnipro computer project and developed the design principles for the main line of Soviet microcomputers.

Rev Mykhailo Malynovsky

Rev Oleksander Malynovsky

Malynovsky, Mykhailo [Malynovs'kyj, Myxajlo], b 1812, d 1894. Ukrainian Catholic priest. A canon of the Lviv archeparchy, he also served as its administrator (1869–70) and as a member of the Galician Diet (1861–6). He wrote several works concerning the history of the Ukrainian Catholic church in Ukrainian and German, including *Die Kirchen- und Staats-Satzungen bezüglich des griechisch-katholischen Ritus der Ruthenen in Galizien* (1861). He also arranged for the 1862 publication of the *Annales Ecclesiae Ruthenae* by M. Harasevych.

Malynovsky, Oleksander [Malynovs'kyj], b 12 January 1889 in Zhukiv, Zolochiv county, Galicia, d 18 November 1957 in Bradford, England. Ukrainian Catholic priest. After finishing gymnasium in Peremyshl, he worked and then joined the Austrian army (1911–20); he eventually attained the rank of captain in the Ukrainian Galician Army. After further studies, he was ordained in 1925. He held a

number of administrative positions in 1927–40 in Lviv at the Greek Catholic Theological Seminary and Academy. In 1940 he became apolistic administrator of the *Lemko Apostolic Administration (1940–6). After the war he was rector of the Ukrainian Catholic seminaries in Germany and Holland. He moved to England in 1950, where he was the Ukrainian Catholic vicar general for the United Kingdom until his death.

Marshal Rodion Malynovsky

Andrii Malyshko

Malynovsky, Rodion [Malynovs'kyj], b 23 November 1898 in Odessa, d 31 March 1967 in Moscow. Marshal of the Soviet Union. He joined the Red Army in 1919. After graduating from the Frunze Military Academy (1930) he participated in the Spanish Civil War (1937–8). In the Second World War he commanded the Third and then the Second Ukrainian fronts of the Red Army. After the war he was commander in chief of the Soviet forces in the Far East (1947–56) and then served as the USSR minister of defense (1957–67).

Malynovsky, Yoanykii [Malynovs'kyj, Joanykij], b 16 November 1868 in Ostrih, Volhynia gubernia, d March 1932. Historian of law; from 1919 a full member of the VUAN. He taught law at Tomsk and Don universities before moving to Kiev (1924) and becoming chairman of its Commission for the Study of Ukraine's Customary Law and editor of its publications. He was also president of the Society of Ukrainian Jurists. His specialty was the law of Rus' and the Lithuanian-Ruthenian state, customary law, and Soviet law. His more important works were *Uchenie o prestuplenii po Litovskomu Statutu* (The Doctrine of Crime according to the Lithuanian Statute, 1894), *Rada Velikogo Kniazhestva Litovskogo v sviazi s boiarskoi Dumoi drevnei Rusi* (The Council of the Grand Duchy of Lithuania in relation to the Boyar Duma of Ancient Rus', 2 vols, 1903–4, 1912), *Radians'ki popravcho-trudovi ustanovy porivniuiuchy z burzhuznymi tiurmamy* (Soviet Corrective-Labor Institutions as Compared to Bourgeois Prisons, 1928), and *Starodavnii derzhavnyi lad skhidnikh slov'ian i ioho piznishi zminy* (The Ancient State System of the Eastern Slavs and Its Later Changes, 1929).

Malyshevsky, Ivan [Malyševskij], b 1828 in Belarus, d 23 January 1897 in Kiev. Church historian. He studied at the Kiev Theological Academy and was later a lecturer

and professor (1861–97) of Russian church history there. A member of the Historical Society of Nestor the Chronicler, he published his research in the society's *Chteniia*, in the academy's *Trudy* (TKDA), and in *Kievskaiia starina* (KS). His works in TKDA included studies on the relations of Rus' with the Roman church during the reign of Prince Volodymyr the Great (1863, no. 2), on the legend of St Andrew's visit to Rus' (1866, no. 6), on Jews in Southern Rus' and Kiev in the 10th to 12th centuries (1878), on the identity of the first Kievan metropolitan (1883, no. 10), on Kievan church sobors (1884, no. 12), on ss Cyril and Methodius (1885), and on the Varangians in the initial history of Christianity in Kiev (1887, no. 12); and in KS, on the ancestry of Princess Olha (1889, nos 7–8). His major works are monographs on Patriarch Meletios Pigas and his involvement in the Rus' church (1872) and on western Rus' and its defense of its faith and nationality (2 vols, 1897, 4 edns). He also wrote about Patriarch Jeremiah and Prince K. Ostrozky and an article on the history of the Kiev Theological Academy (TKDA, 1869).

Malysh-Fedorets, Mariia [Malyš-Fedorec', Marija], b 20 January 1885 in Nizhen, Chernihiv gubernia, d 5 April 1960 in Melbourne, Australia. Actress. She was a leading heroic and character actress in Sadovsky's Theater (1907–20) and later toured with M. Sadovsky and P. Saksahan-sky (1926–32). She also acted in the film *Zaporiz'kyi skarb* (Zaporozhian Treasure, 1913). In 1945 she emigrated to Germany, and in 1951 to Australia.

Malyshko, Andrii [Malyško, Andrij], b 15 November 1912 in Obukhiv, Kiev county, d 17 February 1970 in Kiev. Poet and publicist. He graduated from the Kiev Institute of People's Education in 1932 and then taught in Ovruch. He worked for *Komsomolets' Ukrainy*, *Literaturna hazeta*, and *Molodyi bil'shovyk*. Malyshko's first published works appeared in *Molodniak* in 1930, and his first published collection of poetry was *Bat'kivshchyna* (The Fatherland, 1936). His other prewar collections included *Liryka* (Lyrics, 1938), *Z knyhy zhyttia* (From the Book of Life, 1938), *Narodzhennia syniv* (The Birth of Sons, 1939), *Lysty chervonoarmiitsia Opanasa Baidy* (The Letters of Red Army Serviceman Opanas Baida, 1940), *Berezen'* (March, 1940), *Zorevi dni* (Starry Days, 1940), and *Zhaivoronky* (The Meadow Larks, 1940). During the Second World War he was a correspondent of front-line newspapers and published the collections *Do boiu vstavajte* (Arise to Battle, 1941), *Ukraino moia* (My Ukraine, 1942), *Ponad pozhary* (Above the Conflagrations, 1942), *Slovo o polku* (A Word about the Regiment, 1943), and *Bytva* (The Battle, 1943). His postwar material, among numerous collections, includes *Za synim morem* (Beyond the Blue Sea, 1950), *Knyha brativ* (The Book of Brothers, 1954), *Sertse moieï materi* (My Mother's Heart, 1959), *Zapovitne dzherelo* (The Source of the Testament, 1960), *Dubovyi tsvit* (Oak Blossoms, 1960), *Taras Shevchenko: Dramatychna pisnia* (Taras Shevchenko: A Dramatic Song, 1964), *Synii litopys* (The Blue Chronicle, 1968), and *Serpen' dushi moieï* (August of My Soul, 1970). He also published collections of critical essays, *Dumky pro poeziiu* (Thoughts on Poetry, 1959) and *Slovo pro poeta: M.T. Ryl's'kyi ta ioho tvorchist'* (A Word about a Poet: M.T. Rylsky and His Work, 1960), and translations of Russian verse. Compilations of his work appeared in 5 vols (1962) and 10 vols (1972–4).

The references to internal and international politics and Party directives throughout Malyshko's voluminous canon made him the recipient of various Soviet awards. His works were held out as models of socialist realism and lauded for their populism and adherence to the Party line. In accordance with the prime directive of socialist realism of 'creating for the people' he employed a simplistic lexicon and poetic form and concentrated on the sentimental and patriotic. Many of his works have been put to music (eg, 'Kyivs'kyi val's' [Kievan Waltz]).

I. Koshelivets

Konstantyna Malytska

Malytska, Konstantyna [Malyc'ka] (pseud: Rastyk, Vira Lebedova, and Chaika Dnistrova), b 30 May 1872 in Kropyvnyk, Kalush county, Galicia, d 17 March 1947 in Lviv. Educator, writer, and women's leader. After graduating from the State Teachers' Seminary in Lviv (1892), she taught elementary school in Halych and Luzhany and at the Shevchenko Girls' School in Lviv. She edited the children's magazine *Dzvinok* (1906–12), in which her stories and plays appeared. She was also active in the Women's Hromada in Lviv. In 1913 she was one of the founders of the Fund for Ukraine's Needs, which provided aid to the Ukrainian Sich Riflemen in 1914. During the Russian occupation she was arrested and deported to Siberia (1915–20). On her return she presided over the Women's Congress of 1921 and then served as president (1923–4) and executive member (1924–8) of the Union of Ukrainian Women. In 1930 she joined the editorial board of *Nova khatka*, to which she contributed articles. In 1941 she initiated the relief organization Women's Service to Ukraine (1941). After the Second World War she worked at the Lviv Scientific Library of the AN URSR (now ANU). Some of Malytska's magazine contributions have come out in separate collections – her stories for children in *Mali druzy* (Little Friends, 1899; 2nd edn 1906) and her pedagogical articles in *Maty* (Mother, 1902) and *Z trahedii dytiachykh dush* (From the Tragedies of Children's Souls, 1907). She also wrote children's plays and Sich songs and translated children's literature.

Malytsky, Fedir [Malyc'kyj, Fedir], b 1 March 1900 in Dovobychiv, in the Kholm region, now in Poland, d 21 July 1988. Writer and poet. He graduated from the Kiev Institute of People's Education in 1929. He began publish-

ing his works in 1926, at which time he belonged to the writers' groups Pluh and Zakhidnia Ukraina. He published several collections of poetry: *Kholmshchyna* (The Kholm Region, 1927), *Poezii* (Poems, 1931), *Hrozy nad smerekamy* (Storms over the Firs, 1966), *Tsvit lomykamenniu* (The Flower of Rockfoil, 1971), and *Obzhynky* (Harvest Festival, 1979). He composed two historico-biographical poems, *Iurii Kotermaak*, about Yurii Drohobych, and *Mudrets' z Chornukh* (The Wise Man from Chornukhy), about H. Skovoroda. His prose works consist of novels, such as *Bystryi Buh* (The Fast-flowing Buh, 1931), and short stories, which appeared in such collections as *Zahravy nad Buhom* (Crimson Skies over the Buh, 1970). He was arrested by the GPU in 1933 and imprisoned until 1935. Many of his poems have been set to music.

Malytsky, Mykola [Malyc'kyj], b 1890, d ? Civic leader and philanthropist. A teacher by profession, he served as a lieutenant in the Ukrainian Galician Army and edited *Ukrains'kyi holos* (1918, renamed *Ukrains'ki visti* in 1919), the official paper of the Ternopil County National Council. Through marriage with D. *Vikonska he became the owner of an estate in Shliakhtyntsi and a patron of Ukrainian students and artists. He donated a tract of land to the People's Home in Ternopil and helped found the Luh sports society. In 1938 he was elected as a candidate of the Ukrainian National Democratic Alliance to the Polish Senate. During the Soviet occupation of Galicia he was arrested and deported (1940). His subsequent fate is unknown.

Malytsky, Oleksander [Malyc'kyj], b 10 September 1874 in Moscow, d ? Jurist. He served as a professor of law and dean of the law faculty of the Kharkiv Institute of the National Economy, and as assistant to the state procurator of the Ukrainian SSR. He wrote a number of works and textbooks on Soviet state and civil law, including *Cheka i GPU* (Cheka and the GPU, 1923), *Komentari do tsyvil'noho kodeksu USSR* (A Commentary on the Civil Code of the Ukrainian SSR, 1927), and *Radians'ka konstitutsiia* (The Soviet Constitution, 3rd edn 1928). He was arrested during the Yezhov terror, and his further fate is unknown.

Mamonich [Mamonyč]. Two Belarusian merchant brothers, Kuzma (b and d ?) and Luka (?–1606) Mamonich, from the Mahiliou region. In 1575 they established a religious press with P. Mstislavets in Vilnius. In 1576 the brothers were granted a royal monopoly on the printing and sale of books in Vilnius, and began publishing mainly church texts and religious literature in Belarusian, Ukrainian, and Polish (from 1591). Their works reached a wide market throughout Eastern Europe and contributed to the support of national minorities in the Grand Duchy of Lithuania. The operation assumed a pro-Uniate character when Kuzma's son, Leon Mamonich, became its manager (1601) and then owner (1606). The press was sold to the local church brotherhood in 1622.

Mamontov, Yakiv, b 4 November 1888 in Strilytsia (now Shaposhnykove), Sumy county, Kharkiv gubernia, d 31 January 1940 in Kharkiv. Dramatist, theater scholar, and pedagogue. He began his literary career by writing poetry and prose. He published the story *Pid chornymy khmaramy* (Under Black Clouds) in 1907, and poems, such

Yakiv Mamontov

as 'Koly ia dyvliusia' (When I Look, 1908), which later appeared in the collection *Vinky za vodoiu* (Wreaths on the Water, 1924). The majority of his literary output, however, was plays: *Divchyna z arfoiu* (The Girl with a Harp, 1918), *Veselyi kham* (The Happy Boor, 1921), *Dies Irae* (1922), *Koly narod vyzvoliaiet'sia* (When a Nation Liberates Itself, 1923), *Ave Maria* (1924), *Do tretikh pivniiv* (Until the Third Cockcrow, 1924), *Respublika na kolesakh* (The Republic on Wheels, 1928), *Rozheve pavutyynnia* (Pink Cobweb, 1928), *Kniazhna Viktoriia* (Princess Victoria, 1928), *Het'manshchyna* (The Hetmanate, 1930–9), and *Svoia liudyna* (A Person One Can Trust, 1936). He also wrote a number of stage adaptations of the works of T. Shevchenko, M. Kotsiubynsky, I. Franko, and others. Most of his plays centered on the revolution and the Ukrainian-Soviet War, in which *otamanshchyna*, or warlordism, is satirized. He wrote operatic librettos, including *Zoloty obruch* (The Golden Ring), *Turbaitsi*, and *Karmeliuk*. He also tried his hand at screenplays and children's plays (*Kho*). Having begun to write before the First World War, he continued to be mainly influenced by Ukrainian *modernism. For that reason, although his plays were popular in the 1920s (of the 27 he wrote, 21 were staged, in many Ukrainian and Russian theaters), and although some of them, such as *Respublika na kolesakh* and *Rozheve pavutyynnia*, were written with the Soviet censors in mind, Soviet critics harshly attacked his works. In the early 1930s his plays were barred from theatrical repertoires altogether.

Mamontov also wrote a number of studies in drama, including *Dramatychne pys'menstvo* (Dramatic Writing, 1927–8), *Ukrains'ka dramaturhiia peredzhovtnevoi doby* (Ukrainian Prerevolutionary Drama, 1931), and *Dramaturhiia I. Tobilevycha* (The Dramaturgy of I. Tobilevych, 1931). Together with O. Biletsky he edited *Khrestomatiia istorii ukrains'koho teatru* (An Anthology in Ukrainian Theater History, 1941). He also wrote 'Pedahoh iak mystets'' (The Pedagogy as an Artist, *Suchasni problemy pedahohichnoi tvorchosty*, 1922, no. 1) and taught pedagogy in various postsecondary schools in Kharkiv. A volume of his works was published in 1962.

I. Koshelivets

Mamutov, Valentyn, b 30 January 1928 in Odessa. Jurist; full member of the AN URSR (now ANU) since 1988. A graduate of the Sverdlovsk Juridical Institute (1949), he worked for several government ministries before joining the Donetsk branch of the Institute of Economics of the

AN URSR in 1966. In 1969 he was appointed assistant director and in 1981 director of the Institute of the Economics of Industry. A specialist in industrial law and administration, he is the author of several books, including *Regional'noe upravlenie: Opyt i problemy* (Regional Administration: Experience and Problems, 1984) and *Pravovaia rabota v narodnom khoziaistve: Sbornik normativnykh aktov* (Legal Work in the National Economy: A Collection of Normative Acts, 1986).

Fedir Manailo: *On St John's Eve* (tempera, 1933)

Manailo, Fedir [Manajlo], b 19 October 1910 in Ivanivka, near Mukachiv, Transcarpathia, d 15 January 1978 in Uzhhorod. Painter. He studied at the Higher Art and Industrial School in Prague (1928–34). He depicted the landscapes and folkways of Transcarpathia on his canvases. His early works, such as *Old Pauper* (1932), *On St John's Eve* (1933), and *Hutsul Girl* (1939), were influenced by expressionism. He also created murals and mosaics (eg. in the Uzhhorod Restaurant in Uzhhorod and the Verkhovyna Restaurant in Kiev). An album of reproductions of his works was published in 1970. A small museum dedicated to his life and works was opened in Uzhhorod.

Manastyrsky, Antin [Manastyr's'kyj], b 2 November 1878 in Zavaliv, Pidhaitsi county, Galicia, d 15 May 1969 in Lviv. Painter and graphic artist; father of V. *Manastyrsky. He studied at the Lviv Art and Industrial School (1895–9) and Cracow Academy of Fine Arts (1900–5).

Antin Manastyrsky:
Self-Portrait (oil, 1919)

From 1899 he was a member of the *Society for the Advancement of Ruthenian Art, and from 1905 he lived in Lviv. Manastyrsky painted icons, church murals, and many Carpathian landscapes, portraits, historical scenes (particularly from Cossack history), genre paintings, architectural views, still lifes, and works inspired by T. Shevchenko's poems. He also illustrated interwar children's storybooks and primers, a Ukrainian Bible (Lviv 1926), and editions of works by Shevchenko, I. Franko, N. Gogol, A. Pushkin, I. Turgenev, and A. Chekhov. Many of his historical paintings were reproduced on Galician post-cards of the 1910s and 1920s. His paintings include *Road* (1900), *Winter in the Carpathians* (1904), *At the Fortune-Teller's* (1910), *Kateryna* (1913), *The Cossacks Rose before Dawn* (1914), *Lirnyk* (1914–16), *At the Watering Spot* (1917), *Willows* (1927), *Portrait of M. Yatskiv* (1929), *Zaporozhian Cossack* (1932), *Gathering Sheaves* (1949), *Prut River Valley* (1953), and *The Scout* (1955). Books about him, with reproductions of his works, have been written by H. Ostrovsky (1958), Ya. Nanovsky (1959), and Kh. Sanotska (1980).

Manastyrsky, Inokentii [Manastyr's'kyj, Inokentij], ?–1697. Orthodox churchman and writer. The hegumen of Lublin (1678–81) and St Cyril's in Kiev (1681–97) monasteries, he was twice (1685 and 1689) sent to Moscow to represent the Ukrainian clergy and defend Ukrainian church interests. In 1690 he headed the church sobor that elected V. Yasynsky as metropolitan of Kiev. He enjoyed the support of Hetman I. Mazepa, who helped him restore the Trinity Cathedral of St Cyril's Monastery and expand the monastery's landholdings.

Manastyrsky, Oleksander [Manastyr's'kyj], b 22 June 1857, d 23 October 1920 in Chernivtsi. Bukovynian Orthodox church and community activist and ethnographer. As an adviser to the consistory (from 1898) and then archimandrite and vicar to the metropolitan, he fought for Ukrainian rights in the Bukovynian Orthodox metropolity. He wrote a religious textbook for elementary schools and the article 'Die Ruthenen' in the collection *Die Österreichisch-Ungarische Monarchie in Wort und Bild – Bukowina* (1899), and coauthored *Die Ruthenen in der Bukowina* (with R. Kaindl, 2 vols, 1889–90). Manastyrsky's ethnographic works include articles, written in Ukrainian and German, on New Year and Easter traditions.

Vitold Manastyrsky: *Highland Girl* (1960)

Manastyrsky, Vitold [Manastyr's'kyj, Vitol'd], b 11 January 1915 in Lviv. Painter; son of A. *Manastyrsky. A graduate of the Warsaw Academy of Arts (1939), from 1947 he lectured at the Lviv Institute of Applied and Decorative Arts. He has painted Carpathian, Crimean, and Baltic landscapes, portraits, genre paintings, and still lifes. His works include *Century-old Grandmother* (1935), *Group of Hutsul Folk Musicians* (1951), *Haystacks* (1956), *Highland Girl* (1960), *Mt Chornohora* (1963), *At the Foot of Mt Sokil* (1965), *Blooming Dzembronia* (1967), *Marichka* (1973), and *Happy Childhood* (1979). A book about him by M. Tkachenko was published in 1977.

Manchester. A city in northwestern England (1988 pop 445,900). In the 1920s and 1930s it was home to 15 or 20 Ukrainian families that had remained there while en route to Canada. The community was centered largely around the Ukrainian Social Club. During the Second World War many Ukrainians in Canadian army units stayed in the city and the surrounding area. On 7 January 1943 a local chapter of the Ukrainian Canadian Servicemen's Association was founded, and by midyear it had over 1,000 members. After the war an influx of people from DP camps in Germany and of war prisoners from Italy made it one of the largest Ukrainian communities in Great Britain, with nearly 900 people. A chapter of the *Association of Ukrainians in Great Britain, the *Federation of Ukrainians in Great Britain, and a number of other Ukrainian community and cultural groups (including the Homin choir and the Orlyk dance ensemble) were established. Both the Ukrainian Orthodox and Catholic churches have their own churches and parishes in the area. The community club,

Bukovyna, is also active. The larger concentrations of Ukrainians in the surrounding area include those in Bolton (500), Bury (300), Oldham (800), and Rochdale (600), which together with those in the city proper make up a community of approx 3,000.

Manchuria. See China.

Mandelshtam, Leonid [Mandel'stam], b 4 May 1879 in Mahiliou, Belarus, d 27 November 1944 in Moscow. Physicist; full member of the USSR Academy of Sciences from 1929. A graduate of Strasbourg University, he became a docent at Odessa University in 1915 and a professor at the Odessa Polytechnical Institute in 1918. In 1925 he became a professor of physics at Moscow University, and later he worked concurrently at the Institute of Physics of the USSR Academy. Mandelshtam played a major role in the study of radio physics and optics.

Mandryka. A Cossack *starshyna* family, known from the 16th century. It had several members on the Cossack register of 1649, and it controlled the captaincies of Kobyzhcha company in Kiev regiment during 1672–1781. The Mandryka family was related to the Polubotok, Khanenko, and other *starshyna* families. Matvii Mandryka opposed a Ukrainian treaty with Moscow and was executed in 1705 for speaking out against Hetman I. Mazepa.

Mykyta Mandryka

Mandryka, Mykyta, b 28 September 1886 in Kiev, d 20 August 1979 in Winnipeg. Writer, diplomat, and community leader. A member of the Central Rada in Kiev, Mandryka also served in the diplomatic corps of the Ukrainian National Republic (UNR) in the Far East, Batum, Istanbul, Sofia, and Prague. He attended the Ukrainian Free University in Prague (LL D, 1925), where he became a docent of international law in 1927. He was sent to Canada in 1928 by the *Ukrainian Party of Socialist Revolutionaries to undertake organizational work. Backed by the Ukrainian National Home (UND) in Winnipeg, Mandryka toured extensively on a speaking tour in 1928–9, laying the groundwork for a UND-centered *Union of Ukrainian Community Centres of Canada, the establishment of the newspaper **Pravda i volia*, and the staging of an All-Ukrainian Educational-Economic Conference in Winnipeg (all in 1929). These efforts failed to achieve their desired goals, but provided Mandryka with enough support to establish a Ukrainian Labor Association (Ukrainske trudove obiednannia), which was active for about a decade. He later helped organize the Ukrainian Canadian Committee

(now Congress) and was president of the Ukrainian Free Academy of Sciences in Canada (1970–3). His published collections of poems include *Pisni* (Songs, 1907), *Pisni pro Anemonu* (Songs about the Buttercup, 1917), *Mii sad* (My Orchard, 1941), *Zolota osin'* (Golden Autumn, 1958), *Radist'* (Joy, 1959), the epic poem *Mazepa* (1960), and *Vik Petliury* (The Age of Petliura, 1966). He also wrote a *History of Ukrainian Literature in Canada* (1968). His nonliterary publications include *Natsionalni menshosti v mizhnarodn'omu pravi* (National Minorities in International Law, 1925), *Istoriia konsul's'koho prava i instytutiv* (History of Consular Law and Institutes, 1927), and *Teoriia hospodars'koi demokratii* (The Theory of Economic Democracy, 1934).

Mandych, Olena [Mandyč] (née Shinali), b 26 September 1902 in Dulafagva, Transylvania, d 12 March 1975 in Košice, Slovakia. Sculptor. A graduate of the Prague Academy of Fine Arts (1925), she won an honorable mention at the academy's exhibition in 1927. She created monuments to O. Dukhnovych in Prešov (1933), Ye. Fentsyk in Uzhhorod (1926), T. Masaryk in Uzhhorod (1927), and A. Dobriansky in Uzhhorod (1929) and Prešov (1933) and sculptural portraits and compositions (eg, *Carpatho-Ruthenian Song*, 1930).

Mandychevsky, Yevsevi [Mandyčevs'kyj, Jevsevii] (Mandyczewski, Eusebius), b 17 August 1857 in Molodiia, Chernivtsi county, Bukovyna, d 13 July 1929 in Vienna. Musicologist, composer, and conductor. He studied under S. Vorobkevych in Chernivtsi and R. Fuchs and M. Nottebohm in Vienna, his home from 1875. In 1880 he became conductor of the Vienna Singakademie and archivist of the Gesellschaft der Musikfreunde. In 1896–1921 he was a professor at the Vienna Academy of Music as well as the Vienna Conservatory, teaching music history, composition, and instrumental science. His students included K. Böhm, G. Szell, and C. Prohaska. Mandychevsky was also engaged as a researcher, editor, and publisher of the collected works of F. Haydn, and worked on collections by F. Schubert, J.S. Bach, and his close personal friend J. Brahms. He also wrote a study of S. Vorobkevych. His musical works included piano pieces, choruses, and songs, a number of which used Ukrainian texts.

Man'dzhurs'kyi vistnyk (Manchurian Herald). A weekly newspaper published in Harbin, Japanese-occupied Manchuria, from September 1932 to July 1937. It reported on developments in Soviet and Western Ukraine – reprinting articles from such periodicals as *Dilo*, *Svoboda*, and *Tryzub* – and in the Ukrainian community in the *Far East, especially *China. In general the newspaper supported the politics of the Government-in-exile of the UNR. Its editor and publisher was I. *Svit. A total of 199 issues appeared.

Mandziuk, Nicholas [Mandzjuk, Mykola], b 13 December 1902 in Kryvche, Borshchiv county, Galicia, d 7 September 1969 in Winnipeg. Lawyer, community leader, and political activist. After coming to Canada with his parents in 1904, he graduated from the University of Manitoba (LL B, 1932) and practiced law in Oakburn. He served as president of the local board of trade, chairman of the board of education, president of the Ukrainian Self-Reliance League, and general secretary of the Ukrainian Canadian Committee (now Congress). For five consecutive

terms (1957–68) he was the Progressive Conservative MP for Marquette (Manitoba). In 1968 he was named Queen's Counsel.

Abram Manevich: *Kievian Roofs* (oil)

Manevich, Abram [Manevič], b 25 November 1881 in Mstsislau, Mahiliou gubernia, Belarus, d 30 June 1942 in New York. Painter. A graduate of the Kiev Art School (1905), he studied at the Munich Academy of Arts and was a founder of and professor at the *Ukrainian State Academy of Arts (1917–19). He had two solo exhibitions in Kiev (1910, 1916). Manevich was noted for his impressionistic landscapes, particularly of Kiev, such as *Autumn: The Dnieper* (1913), *Roman Catholic Church in Kiev*, *Spring in Kiev's Kurenivka District*, *Urban Landscape* (1914), and *Kievian Roofs*. From 1920 he lived abroad. In 1922 he settled in the United States, where he did the urban landscape series 'Prosaic America' (1925–7), portraits, and landscapes, such as *Winter: Canada* (1932) and *Spring* (1942).

Manevychi [Manevyčī]. II-6. A town smt (1990 pop 9,000) and raion center in Volhynia oblast. It was founded in 1892 during the construction of the Kovel–Sarny railway line, and given smt status in 1940. The town has a furniture factory and a food industry.

Manganese industry. A branch of the mining industry that extracts manganese ore and processes it for use in the metallurgical, chemical, ceramics, glass, and pharmaceutical industries. Over 95 percent is used to make ferroalloys, particularly steel. Steels usually contain under 1 percent manganese; alloys containing more are hard and wear-resistant. The Soviet Union has the world's largest manganese reserves, and Ukraine accounts for 40 percent (2.3 billion t) of them. In Ukraine manganese deposits are located in the *Nykopil and Tokmak manganese basins at Inhulets and Khashchuvate, and in the Carpathian Mountains.

The industry arose in the 1860s, when the Bessemer and Martin processes were introduced in the iron and steel industry. Manganese mining in the Nykopil basin began in

1885. By 1895, 42,500 t were being mined, and by 1913, 275,900 t. Over 95 percent of the output was exported. The number of workers employed at Nykopil doubled from 1899 to 1916, from 1,120 to 2,252. Before the First World War Nykopil was producing 22.2 percent of the empire's manganese; it was second only to the Chiatura Basin in Georgia. By the 1920s the Nykopil basin was the Soviet Union's chief producer, with 75.5 percent of its output. Without new investments Nykopil's relative position declined: in 1940 it produced 893,000 t of manganese, or 40 percent of the Soviet production. During the Second World War the Germans exploited the mines at Nykopil before destroying them. The mines were reconstructed soon after the war. In 1952 the first open-pit mines came into operation, at Ordzhonikidze, where lower-grade carbonate ores are found. By 1968 nearly 74 percent of the manganese ore was being mined in that manner.

Since the 1950s Ukraine has regained its leading position as a producer of manganese ore. In 1975 it produced 6,537,000 t, or 77.3 percent of the Soviet output, and in 1985, 7,115,000 t, or 71.9 percent. In 1968, 48 percent of the ore was enriched. The main manganese enrichment plants in Ukraine are the Marhanets and Ordzhonikidze mineral enrichment complexes and the enrichment factories in Chkalove, Bohanivka, and Hrushivka.

B. Somchynsky

Maniak, Volodymyr [Manjak], b 6 November 1934 in Kryshtopivka, Proskuriv okruha, Vinnytsia oblast, d 23 June 1992. Writer. He graduated from Lviv University (1956). He is the author of the poetry collection *Povnolittia* (Maturity, 1957); the prose collections *Zelenyi merydian*, *Eureka*, *Month of the Calm Sun*, 1967), *Prospekt imeni liudei* (Avenue in the Name of the People, 1970), *Makove pole* (Poppy Field, 1972), and *Kolyska vitriv* (Cradle of the Winds, 1975); and the novels *I ziishov den'* (And the Day Rose, 1974), *Borozny* (Furrows, 1977), *Vysoki berehy zemli* (The High Shores of the Land, 1979), *Plot' tvoia i krov* (Your Flesh and Blood, 1981), *Podillia* (1984), and *Reid* (The Raid, 1986). In recent years he cochaired the *Memorial society and edited collections of eyewitness accounts of Nazi destruction in Ukraine (1988) and the man-made *famine of 1932–3 (1990).

Maniava Hermitage (Maniavskiyi Skyt). An Orthodox monastery near Maniava, now in Bohorodchany raion, Ivano-Frankivske oblast. It was founded by Y. *Kniahyntsky when he settled in an isolated wooded area in the Gorgany Mountains on the banks of a tributary of the Bystrytsia-Solotvynska River. Although he planned to live in solitude, he soon began to attract other monks and believers, who built the first cells of the monastery in 1611 and then a wooden church in 1612. Later, additional cells were constructed, and with the patronage of O. Movilă, the daughter of a Moldavian magnate, the main church, of the Elevation of the Cross, was erected. In 1620 the Constantinople patriarch Timothy II granted the monastery stauropegion status, which enabled it to remain Orthodox despite the subsequent conversion of the entire region to the Uniate church.

Maniava Hermitage (reconstruction by Mykola Pavliuk)

The Maniava Hermitage soon came to house nearly 240 residents. It became a model of monastic life throughout Ukraine and maintained close relations with monasteries in Uhornyky, Kolomyia, Tovmachyk, and Suceava (Moldavia). The hermitage was also an important cultural center. Its library contained many rare manuscripts and books, and it was the site of one of the first professional schools of church music in Western Ukraine. Although it was fortified by a defensive wall and three towers (a gate tower, a bell tower, and a defensive tower), the monastery was destroyed by the Turks in 1676. It was rebuilt in 1681. In September 1785 the hermitage was closed by order of the Austrian government, and its monks dispersed to monasteries in Kiev and Bukovyna. The monastery collapsed in ruins, and only the outer walls and the foundations of the main church and bell tower remained.

Throughout its 150-year existence the hermitage was renowned for the asceticism of its monks. Many laymen asked to be buried there, including Hetman I. Vyhovsky. Most of the monastery's important artifacts have not survived, but the iconostasis by Y. *Kondzelevych, painted in 1698–1705, was taken to Bohorodchany after the monastery was closed, and then deposited in 1923 in the National Museum in Lviv. In 1785 the wooden church of the hermitage was transferred to Nadvirna, where it stood until it was destroyed by fire in 1914. In 1972–80 restorations were conducted on the site of the hermitage, and all three main towers, the defensive walls, and the wooden and stone cells were rebuilt, and the frescoes restored. In 1981 it was made into a branch of the Ivano-Frankivske Regional Museum.

The Maniava Hermitage has inspired many literary and artistic works (eg, by I. Mohylnytsky, I. Franko, Ya. Holovatsky, O. Makovei, N. Kobrynska and I. Trush), and I. Vahylevych wrote a historical study of it in 1848.

Holy Resurrection Orthodox Church in Sifton, Manitoba

Manitoba. A prairie province (1989 pop 1,026,241), situated near the geographical center of Canada, with an area of 649,947 sq km. Its capital and largest city is *Winnipeg. Formed in 1870, the province experienced large-scale colonization after 1890 when thousands of agriculturalists settled its virgin lands. Between 1870 and 1901 the population grew from 20,000 to 255,000. The first Ukrainian rural settlements were established in 1896 by immigrants from Galicia and Bukovyna at Stuartburn, south of Winnipeg, and at Lake Dauphin (Terebowla), in the northwest. By 1914 a network of Ukrainian homesteads and rural trade centers or railway towns could be found stretching from the American border in the southeast (Senkiw, Zhoda, Sarto, Vita [formerly Shevchenko], Tolstoi, Caliento, Sirko, Rosa) to the peripheries of Winnipeg (Brooklands, Gonor), in the Interlake region (Komarno, Ethelbert, Zbaraz), and from Sandy Lake to Swan River (Halicz, Ukraina, Zoria) in the northwest. A substantial amount of the land settled by Ukrainians in Manitoba, particularly in the southeast and Interlake area, was of substandard quality, and economic progress was in consequence impeded over time.

Manitoba Ukrainians quickly entered the political arena and by 1910 had been absorbed into the Conservative party machine of Premier R. Roblin at the provincial level (until the party's downfall in 1915). The first reeve elected was I. Storoszczuk, in Stuartburn (1908); the first alderman was T. Stefanyk, in Winnipeg (1911); and the first member of the legislative assembly (MLA) was T. Ferley, in the Gimli electoral district (Independent, 1915). By 1939 a total of 10 MLAs had been elected, all from outside Winnipeg. In 1950 N. Bachynsky became the speaker of the assembly, and in 1955 M. Hryhorczuk was appointed the first Manitoba Ukrainian cabinet minister. That same year

W. Wall (Wolokhatiuk) became the first Ukrainian-Canadian senator. Ukrainians achieved a high profile in the New Democratic party administrations of the 1970s and 1980s, with cabinet ministers such as S. Uskiw, B. Uruski, and W. Parasiuk.

Ukrainian-English bilingual schools were established in approx 120 Manitoba localities early in the century. Teachers for them were trained at the *Ruthenian Training School in Brandon, and many of them went on to become community leaders throughout western Canada. The bilingual schools were forcibly abolished in 1916, ostensibly in the course of 'educational reform.' They returned to the province only in 1979 and have been promoted by the Manitoba Parents for Ukrainian Education since 1980. To preserve their culture and language, Ukrainians have maintained their own privately funded evening and Saturday schools.

Dancers at the 1970 Ukrainian Festival in Dauphin, Manitoba

Manitoba (particularly Winnipeg) traditionally has been an important center of Ukrainian community life, and most Ukrainian-Canadian associations have their headquarters or branches in the province. Moreover, Manitoba's landscape is dotted with Ukrainian church architecture and Ukrainian place-names. In 1981 there were 130,285 Ukrainians in the province, of whom 69,351 lived in Winnipeg. In 1991, 39,175 inhabitants claimed Ukrainian as their mother tongue; they represented 19.97 percent of the Canadian total.

O. Gerus

Manizer, Matvei, b 17 March 1891 in St Petersburg, d 20 December 1966 in Moscow. Russian sculptor. A graduate of the St Petersburg Academy of Arts (1916), he taught at the Leningrad Academy of Arts (1921-9, 1935-41, 1945-7), Moscow Institute of Applied and Decorative Arts (1946-52), and Moscow Art Institute (1952-66). His works were found throughout the USSR, including Ukraine, where his chief works are the monuments to T. Shevchenko in Kharkiv (1935), Kiev (1938), and Kaniv (1939).

Matvei Manizer: monument to T. Shevchenko in Kharkiv (1935)

Mankin, Valentyn, b 19 August 1938 in Bilokorovychi, Olevske raion, Zhytomyr oblast. Yachting champion. A graduate of the Kiev Civil Engineering Institute, he won Olympic gold medals in yachting in 1968 (Finn class), 1972 (Tempest class), and 1980 (Star class) and a silver medal in 1976 (Tempest class). He was also the European and world Tempest-class champion in 1973, the European Star-class champion in 1978, and a USSR champion in 1959, 1961-3, 1967, 1970, 1972, and 1974-8. Mankin wrote *Bilyi trykutnyk* (The White Triangle, 1976).

Mankivka [Man'kivka]. v-11. A town smt (1990 pop 9,300) on the Mankivka River and a raion center in Cherkasy oblast. It was first mentioned in a historical document in the late 16th century. During Hetman B. Khmelnytsky's rule it was a company center of Uman regiment. Its inhabitants took part in popular uprisings against the Poles in 1664-5 and 1768. In 1672 Mankivka was destroyed by the invading Turks and Tatars. It attained smt status in 1965. The town has a majolica factory and two brick factories. Archeologists have found six settlements of the *Trypilian culture, six Bronze Age settlements, and four settlements of the *Cherniakhiv culture near the town.

Mankivsky, Borys [Man'kivs'kyj], b 23 March 1883 in Kozelets, Chernihiv gubernia, d 24 November 1962 in Kiev. Neurologist; full member of the USSR Academy of Medical Sciences from 1944. A graduate of Kiev University (1910), he was a department head at the Kiev Medical Institute (1922-59), the founding director of the Kiev Psychoneurological Scientific Research Institute, and a de-

partment head at the Kiev Institute for the Upgrading of Physicians (1926–60). He also headed the department of gerontologic changes in the nervous system at the Institute of Gerontology of the USSR Academy of Medical Sciences. The founder of the school of neurology in Ukraine, he wrote works dealing with neurological diseases as they affect the reactivity of the whole organism, sclerosis disseminata, neuroinfections, inflammations of the brain, and disorders of the brain vessels. His biography was published in Kiev in 1975.

Manko, Hryhorii [Man'ko, Hryhorij], b 1885, d ? Opera singer (baritone) and actor. He was a soloist with the Kharkiv Opera (1925) and the Kiev Opera (1934–41), with which he performed leading roles in A. Borodin's *Prince Igor*, A. Dargomyzhsky's *Rusalka*, B. Smetana's *The Bartered Bride*, and N. Rimsky-Korsakov's *Christmas Eve*. He acted in the film *Natalka Poltavka* (1936). As a postwar refugee, from 1950 he taught and performed in Toronto under the surname Yaroshevych.

Leonid Manko

Clarence A. Manning

Manko, Leonid [Man'ko], b 29 March 1863 in Poltava, d 16 April 1922 in Yelysavethrad (now Kirovohrad), Khereson gubernia. Actor and playwright. He played character and comic roles in the troupes of M. Kropyvnytsky (1882–3, 1888–92), M. Starytsky (1893–8), H. Derkach (1893–4), P. Myrov-Bediukh (1895–8), O. Suslov (1901–9), and D. Haidamaka (1911–16). Manko is the author of dramas and adaptations, including *Neshchasne kokhannia* (Unrequited Love) and *Krashche svoje latane, nizh chuzhe khvatane* (Better Poor Than Dishonestly Rich).

Mannerism. An artistic style that prevailed in much of Europe in the period between the High Renaissance and the baroque (ca 1525–1600). It has not received any recognition in Ukrainian art history studies. The qualities to which it gave precedence were idealized beauty and elegance, cultured poise, sophistication, and facility rather than truth to nature. Even though there are examples of mannerist art in Lviv from the early 17th century, no attempts have been made to study them separately from the *baroque. According to V. Liubchenko, one of the few Ukrainian scholars to have mentioned mannerism (book on Lviv sculpture, 1981), mannerist tendencies were

present in Western Ukraine in the 1620s. The few examples are the wooden altar attributed to I. Luk (now in the Lviv Art Gallery) and the sculpture *Credence of Thomas* in the Armenian Cathedral in Lviv. In Lviv's architecture mannerism was limited to external decoration and did not affect building design (eg, the treatment of second-story windows and the Archangel Michael over the doorway in the Royal Arsenal Building [1639–46]).

Manning, Clarence Augustus, b 1 April 1893 in New York, d 4 October 1972 in Pleasantville, New York. American Slavist; member of the Shevchenko Scientific Society. He graduated from Columbia University (PHD, 1915) and taught there from 1917 to 1958. He became a professor in 1924 and chairman of the Slavic department in 1940. In 1948 he received an honorary PHD from the Ukrainian Free University. An early promoter of Ukrainian studies and the Ukrainian national cause in American academic circles, he wrote *Ivan Franko* (1938), *Ukrainian Literature: Studies of the Leading Authors* (1944), *Taras Shevchenko, Poet of Ukraine: Selected Poems* (1945, intro and trans), *The Story of Ukraine* (1947), *Outline of Ukrainian History* (1949), *Twentieth-Century Ukraine* (1951), *Ukraine under the Soviets* (1953), *Hetman of Ukraine, Ivan Mazepa* (1957), and many articles in the *Ukrainian Quarterly*. He was one of the initiators of the project to publish *Ukraine: A Concise Encyclopaedia* and edited collections of I. Franko's selected poems (*Ivan Franko, the Poet of Western Ukraine*, 1948) and Lesia Ukrainka's works (*Spirit of Flame*, 1950) translated by P. Cundy.

Manoilo, Mykola [Manojlo], b 8 December 1927 in Manyly, Kharkiv okruha. Opera singer (baritone). A graduate of the Kharkiv Conservatory (1960), he began performing as a soloist with the Kharkiv Theater of Opera and Ballet in 1958. His notable roles have been Ostap in M. Lysenko's *Taras Bulba*, the Prince in P. Tchaikovsky's *Enchantress*, the Demon in A. Rubinstein's *Demon*, Rigoletto in G. Verdi's *Rigoletto*, and Iago in G. Verdi's *Othello*. He served as a member of the Supreme Soviet of the Ukrainian SSR (1974–84).

Manor Junior College (MJC). A Ukrainian Catholic junior college located in Jenkintown, Pennsylvania, a suburb of Philadelphia. It was founded in 1947 and operated by the *Basilian order of nuns. The college offers two-year associate of arts and associate of science degrees in liberal arts and career-oriented programs. In 1986 MJC had 340 students and 41 faculty members. The college library houses over 28,000 volumes. In 1977 the Ukrainian Heritage Study Center (UHSC) was established at MJC. It consists of four major areas: academics, museum collection, library, and archives. The UHSC library includes over 4,000 Ukrainian books and journals, among them many rare and first-edition books.

Manorial Cossacks (*nadvirni kozaky*). Cossacks who served in the private armies of the great landowning magnates in Ukraine during the 16th to 18th centuries. Wealthy Polish or Ukrainian magnates, such as the Wisniowiecki, Ostrozky, Zaslawski, Korecki, and Potocki families, maintained their own military forces, recruited from among peasants or serfs, who received land grants, cash payments, and exemptions from corvée in return for

their services. The armies numbered up to several thousand men. They were used by the magnates to maintain social order on their estates and to repel raids. Occasionally the manorial Cossacks turned against their masters and participated in Cossack and haidamaka rebellions. The best-known examples are Capt *Verlan's rebellion against Prince Lubomirski in 1734 and I. *Gonta's support of M. *Zalizniak in 1768. Manorial armies were disbanded in the Left-Bank Hetman state and in Right-Bank Ukraine after the partitions of Poland in 1772 and 1793.

Manoryk, Andrii, b 1 September 1921 in Verbivka, Lypovets county, Kiev gubernia, d 25 June 1974 in Kiev. Botanist and plant physiologist; AN URSS (now ANU) corresponding member from 1973. A graduate of the Uman Agricultural Institute (1948), he joined the ANU Institute of Plant Physiology and Agrochemistry in 1951, became its associate director in 1957, and served as its director in 1973–4. His major research interests included the use of composts for producing organic fertilizers and nitrogen fixation in leguminous plants.

Manufacturing consortium (*vyrobnyche obiednannia*). A group of manufacturing enterprises in the USSR, including plants, research and design organizations, and construction and planning institutions, that are bound together by production ties and centralized administration. Manufacturing consortia emerged in the 1960s in response to the growing complexity of the production process to improve planning and co-ordination among different organizations contributing to the process. The first such association in the USSR was the Prohres leather firm in Lviv. The industrial reform of 1973, which was to eliminate some of the bureaucratic interference in industry, gave impetus to the movement. By 1975, 2,314 associations had been formed, in various Soviet industries. They accounted for 24.4 percent of the industrial output. A manufacturing consortium was not limited by territory: members could be located in different regions of the USSR. It could vary greatly in size, from as few as 5 to as many as 30 or more enterprises. Its structure also varied: some associations consisted of scientific and technical institutions, some of similar enterprises (eg, mines in a single region), and others of supplier and consumer organizations. Most were headed by a general director, who was responsible to a board of directors composed of the directors of the component enterprises. These consortia were not usually legal entities under Soviet law.

The consortia fulfilled their mandate only partially. Since they were usually formed on orders from a relevant ministry, they were not autonomous but controlled by the ministry. Moreover, the component enterprises were often incompatible or too dispersed for effective central management. Although they were supposed to be somewhat independent of the state, the various state planning bodies continued to dictate production targets and prices. M. Gorbachev's economic reforms tended to reduce state interference in the affairs of manufacturing enterprises.

B. Balan

Manuilovych, Ivan [Manujlovych], b ?, d 1740. Cossack official. He rose through the ranks as general osaul of the Hetman state (1713–14), captain of Hlukhiv company in Nizhen regiment (1714–28), member of the tribunal in the

General Chancellery (1724–7), and general osaul to Hetman D. Apostol (1728–38), to whom he was related.

Sofiia Manuilovych

Manuilovych, Sofiia [Manujlovych, Sofija], b 13 October 1892 in Ponornytsia, Krolevets county, Chernihiv gubernia, d 12 August 1971 in Odessa. Actress, director, and playwright. After completing study at the Lysenko Music and Drama School in Kiev, she worked in Molodyi Teatr (1916–19), acted in the Zhytomyr Ukrainian Drama Theater (1919–22) and Berezhil (1922–6), directed Berezhil's Odessa workshop (1925–6), founded and directed the Odessa Children's Theater (1928–30), taught at the Odessa Music and Drama Institute (1926–34), and worked in the Moscow Puppet Theater (1934–6) and the Mykolaiv Young Spectator's Theater (1934–9). She wrote several agitprop dramas.

Manuilsky, Dmytro [Manujil's'kyj], b 3 October 1883 in Sviatets (Manuilske), Kremianets county, Volhynia gubernia, d 22 February 1959 in Kiev. Bolshevik revolutionary and Soviet functionary; full member of the AN URSS from 1945. A member of the Russian Social Democratic Workers' party (RSDRP) from 1903, he studied at St Petersburg University and helped organize the 1906 Kronstadt and Sveaborg mutinies. He was punished with exile to Yakutia, but he escaped and worked in the RSDRP underground in Kiev. After fleeing to Paris in 1907, he belonged to the Vpered group and completed his law studies at the Sorbonne (1911). In 1918 he became a member of the CP(B)U Provisional Bureau and deputy head of the Soviet delegation that negotiated with the Hetman government in Kiev. Then he headed the Political Committee for the Defense of Kiev (July–August 1919) and attended the secret conference of Ukrainian Bolshevik 'federalists' led by Ya. *Lapchynsky (November). Siding with Moscow, he was appointed member of the *All-Ukrainian Revolutionary Committee (1919–20), special delegate to the Soviet-Polish peace negotiations in Riga (1919), member of the CC CP(B)U Politburo (1920–3), people's commissar for agriculture in Ukraine during the famine of 1920–1, and first secretary of the CC CP(B)U and editor of its organ *Kommunist* (1921–2). From 1922 he held senior posts in the *Communist International. As secretary of its Executive Committee (1928–44) he supervised the Stalinist purges and terror in the Comintern apparatus and foreign Communist parties, including the Communist Party of Western Ukraine. From 1944 to 1950 he was deputy chairman of Ukraine's Council

of People's Commissars (from 1946, Ministers), people's commissar and minister of foreign affairs, and head of the Ukrainian delegation at the United Nations. In 1950 he fell into disfavor and was forced to retire.

R. Senkus

Vadym Manzhelii

Manzhelii, Vadym [Manželij], b 3 May 1933 in Kharkiv. Experimental physicist; AN URSR (now ANU) corresponding member since 1982 and full member since 1990. A graduate of Kharkiv University (1955), he did postgraduate work there until 1960 and then joined the staff of the newly formed AN URSR Physical-Technical Institute of Low Temperatures in Kharkiv. Manzhelii has investigated the thermal properties of molecular crystals and contributed significantly to the understanding of the dynamics of crystal lattices.

Stepan Manzhula

Manzhula, Stepan [Manžula], b 3 January 1885 in Dinska Stanytsia, Kuban, d ? Civic and political leader. A graduate in agronomy from the Kiev Polytechnical Institute, he was a member of the Revolutionary Ukrainian party and one of the leaders of the Ukrainian independence movement in the Kuban. He became a member of the Kuban Territorial and Legislative councils (1917–20) and a delegate from the Kuban to the Paris Peace Conference. After emigrating to Prague ca 1920, he worked as an agronomist and educator in the Berehove region of Transcarpathia. In 1945 he was deported from Prague by the Soviets. His further fate is unknown.

Ivan Manzhura

Manzhura, Ivan [Manžura] (pseud: Ivan Kalichka), b 1 November 1851 in Kharkiv, d 15 May 1893 in Katerynoslav. Poet, folklorist, and ethnographer. He was a full member of the Kharkiv Historical-Philological Society (from 1887) and the Moscow Natural Sciences, Anthropology, and Ethnography Society (from 1891). Manzhura studied at the Kharkiv Veterinary Institute (1870–1), from which he was suspended for 'political bad conduct'; he remained under tsarist police surveillance for the rest of his life. Manzhura's debut as a poet came in 1885 in the weekly *Step'*. In 1889 his first anthology of poetry, *Stepovi dumy ta spivoy* (Steppe Dumas and Songs), was published. He subsequently prepared another anthology, *Nad Dniptom* (By the Dnieper), and a book of edited folk literature, *Kazky ta prykazky i take inshe* (Fables, Proverbs, and Other Such Things), neither of which was published in his lifetime. Manzhura's social and intimate lyric poetry was greatly influenced by folk literature. Finely written and completely original in the context of the literature of its time, his poetry showed the poet's close attention to language and was unencumbered by needless poetic decorative devices. Among Manzhura's longer works are stories in verse, *Tr'omsyn-bohatyr* (Tromsyn the Giant), *Ivan Holyk*, and *Kazka pro khytroho lysovyna ...* (The Tale of the Crafty Fox ...). Two of the more extensive editions of Manzhura's works are *Poezii* (Poems, ed Ya. Aizenshtok, 1930) and *Tvory* (Works, ed M. Bernshtein, 1961).

I. Koshelivets

Manzii, Volodymyr [Manzij], b 4 April 1884 in Kiev, d 22 April 1954 in Kiev. Opera director. He graduated from the Kiev School of Music (1903; now the Kiev Conservatory) and worked in various theaters from 1917. In 1925 he became director of the Kharkiv Opera, and in 1928 of the Kiev Ukrainian Opera. He directed many operas, among them M. Lysenko's *Taras Bul'ba* and *Utoplena* (The Drowned Maiden), B. Liatoshynsky's *Zoloty obruch* (The Golden Ring), M. Verykivsky's *Naimychka* (The Hired Girl), and B. Smetana's *Bartered Bride*.

Maple (*Acer*; Ukrainian: *klen*, *yavir*). A deciduous tree or shrub of the family Aceraceae that grows in mixed and deciduous forests. Pure maple stands are rare. The common maple (*A. campestre*) measures up to 15–20 m in height and 50–60 cm in trunk diameter. It is used as a decorative tree in parks because its leaves turn brilliant colors in autumn. The tree sap contains 2–5 percent sugar; maple flowers yield nectar. Maple wood has many uses in the manufacture of furniture, musical instruments, and millwork. In Ukraine the Norway maple (*A. platanoides*) grows almost everywhere. The sycamore maple (*A. pseudoplatanus*) is concentrated in Western Ukraine and in parks; its wood is used in the production of furniture and musical instruments. The Tatar maple (*A. tataricum*), with smooth, almost black bark, is a hardy tree or shrub that grows in the steppe, forest-steppe, and Caucasia. The American maple, also known as the box elder (*A. negundo*), is used in landscaping.

Maps. See Cartography.

Mara. A female figure in Ukrainian and other Slavic folk mythology who was believed to assume various forms – animal, plant, inanimate, monstrous, or ghostly – and to cause people harm. The name was occasionally used to refer to the devil or to a house demon known as a *domovyk*.

Marakhov, Hryhorii [Maraxov, Hryhorij], b 18 August 1918 in Kevsala, near Ipatovo, Stavropol gubernia. Soviet Ukrainian historian. He graduated from the Krasnodar Pedagogical Institute (1941), taught the history of the CPSU and the USSR at institutions of higher education in Kiev (from 1945), worked at the AN URSS (now ANU) Institute of History (1958–63), chaired the Department of Marxism-Leninism at the Ukrainian Printing Institute in Lviv (1963–70), and lectured at Kiev University (from 1970). He oversaw the compilation of *Suspil'no-politychnyi rukh na Ukraïni v 1856–1864 rr.* (The Sociopolitical Movement in Ukraine in 1856–64, 2 vols, 1963–4) and wrote monographs on the Polish Insurrection of 1863–4 in Right-Bank Ukraine (1967), T. Shevchenko and his contemporaries (1976), sociopolitical movements in Ukraine in 1820–40 (1979) and during the 1850s and 1860s (1981), and 'revolutionary-democratic' movements at Kiev University (1984).

Maramureș Basin (also Khust-Solotvyna Basin or Upper Tysa Basin). A basin in the Transcarpathians along the upper Tysa River. Situated between the Polonynian Beskyds in the northeast and the Volcanic Ukrainian Carpathians in the southwest, it is a continuation of the *Inner Carpathian Valley. In the west the basin connects (by way of the Tysa River valley) with the Tysa Lowland; its southeastern portion lies within Rumania. The basin is over 50 km long and up to 30 km wide; it covers an area of nearly 1,400 sq km, with a population of approx 140,000. It is the main geographic feature of the Maramureș region.

The basin itself is a tectonic depression, filled out by a thick layer of Miocene sedimentary deposits mixed with relatively thin layers of salt and tuff. Its northeastern part consists of gently rolling hills (300–600 m in height) divided by the tributaries of the Tysa, the Rika, the Tereblia, and the Teresva rivers. In the southwest stretches the Tysa River valley (elevation, 160–240 m; width, 6–8 km), with well-defined terraces covered by alluvial sediment. The relief of the Maramureș Basin is also marked by *cuestas* of Miocene conglomerates, volcanic remains (notably Fortress Hill in Khust), and salt pillars (around Solotvyna). The climate of the region is more continental than that of the rest of Transcarpathia: the average temperature for the city of Khust is -4°C in January and $+21.1^{\circ}\text{C}$ in July, with precipitation of up to 900 mm per year. The soils in the region are of medium quality, with slightly clayey types in the valleys and meadows and light brown forest and clayey types in the hilly regions. The forests in the region are of oak and beech, although most of them have been transformed for agricultural applications. At present the forests make up approx 30 percent of the terrain, pastures and hayfields about 40 percent, and tillage 25 percent.

Because of advantageous natural conditions and a location along transport routes, the Maramureș Basin has long been densely populated, particularly in the Tysa River valley (average, 100 persons/sq km). The main occupation is agriculture, with corn and fruit (apples, pears, apricots, plums, and cherries) the predominant crops. The

local industries include food processing, forestry, wood products, and salt industries.

The major cities and towns of the region are on the Tysa River. Until 1918 the main center was Sighetul Marmației (Syhit). Since then that city's role has been taken over in the northern part of the basin by Khust (1987 pop, 34,000). Other notable centers include Tiachiv, Solotvyna, Velykyi Bychkiv (the center of the salt-producing industry), Bushytyna, and Teresva.

V. Kubijovyč

Maramureș region (Ukrainian: Marmaroshchyna, Maramorshchyna; Hungarian: Máramaros). A historical-geographic region in the *Maramureș Basin. Its larger, northern part is Ukrainian ethnic territory (eastern Transcarpathia), the inhabitants of which speak a *Transcarpathian dialect of Ukrainian. The south is settled by Rumanians.

The name Máramaros appears in a Hungarian charter in 1199. Until the 14th century the region was sparsely populated and served mainly as a hunting ground for Hungarian kings and nobles. In the 14th century it was colonized by Ukrainians from Galicia and Vlachs from *Transylvania. At that time it was ruled by a voivode under Hungarian tutelage. In 1385 it became an administrative-territorial *komitat. After the partition of Hungary in 1526, the region was part of Transylvania until 1733, when it was reclaimed by Hungary, and it remained under Hungary's control until 1918. In 1891 Máramaros komitat (10,354 sq km) had a population of 268,281: 122,528 Ukrainians, 64,957 Rumanians, 45,679 Germans, and 33,610 Magyars. In 1910, 45 percent of the region's population of 360,000 was Ukrainian, 24 percent was Rumanian, 17 percent was Jewish, and the rest was German or Magyar. The region's Ukrainians were Greek Catholics and belonged to *Mukachiv eparchy. In the early 20th century a portion of them converted to Orthodoxy and were accused by the Hungarian government of being Russian agents. In the resulting show trials 9 peasants in 1904–6 and 96 in 1913–14 were sentenced to various terms of imprisonment.

After the dissolution of the Austro-Hungarian Empire the northern Maramureș region was annexed by Czechoslovakia and administered as a *župa* (county). The south was annexed by *Rumania. Because the new Czechoslovak-Rumanian border along the Tysa River did not correspond to the ethnic border, much of the region's Ukrainian ethnic territory – 800 sq km – became part of Rumania.

Fourteen Ukrainian villages are now within Rumania: along the Ruskova River, Poliany or Ruska Poliana (Rumanian: Poienile de sub Munte, approx pop 8,000), Kryvyi (Repedea, pop 3,000), and Ruskova (Ruscova, pop 3,000); along the Vyshava (Vișeu) River, Krasnyi (Crasna, pop 2,000), Bystryi (Bistra, pop 3,000), Vyshavska Dolyna (Valea Vișeului, pop 1,200); and on the left bank of the Tysa, Luh (Lunca la Tisa, pop 1,500), Velykyi Bychkiv (Bocicoiul Mare, pop 1,000), Krychuniv (Crăciunești, pop 1,500), Vyshnia Rivna (Rona de Sus, pop 4,000), Myhovo (Virîșmort, pop 1,000; 300 Ukrainians), Dovhopole (Câmpulung la Tisa, pop 3,000; 550 Ukrainians), Tiachevo (Teceu, pop 700), and Remety (Remeți, pop 2,000). Outside the territory of compact Ukrainian settlement, Ukrainians also live in the town of Vișeu de Sus (pop 13,000; 500 Ukrainians). In 1960 there were more than 30,000 Ukraini-

MARAMUREȘ REGION

ans in the Maramureș region. In 1971, 3,500 Ukrainians lived in the border town of *Sighetul Marmației (pop 40,000).

Under interwar Rumanian rule Ukrainian community life in the Maramureș region was poorly developed. In the 1920s and 1930s the region's Ukrainians relied on the cultural influence of the Bukovynian capital of Chernivtsi. The Greek Catholic church was largely responsible for preserving Ukrainian identity against the militant onslaught of Rumanianization, as it had previously preserved it against Magyarization. In the 1930s, 11 Ukrainian Greek Catholic parishes and 3 of their chapters were subordinated to the vicar-general for Ukrainian Catholics in Rumania. In the early 1920s the region's Ukrainians elected two representatives, O. Ilnytsky and T. Bokotei, to the Rumanian parliament. In 1926 Rev A. Sabo founded a Ruthenian party in Sighetul Marmației, but it did not have a significant impact. In 1931 a branch of the Ukrainian National party in Rumania was founded in the region, but it too was largely unsuccessful. The leading Ukrainian cultural and educational figure in the region at that time was the lawyer I. Odovichuk. In March 1939 the region's Ukrainians helped refugees who had fled from the Hungarian occupation of Carpatho-Ukraine.

The *Vienna Arbitration of 1940 granted the Maramureș region to Hungary, which occupied it until 1944. In 1944-5 the region was occupied by the Soviet army. In the winter of 1945 Transcarpathian Ukrainians took over the administration of Sighetul Marmației and the Ukrainian villages. Soon thereafter, however, the region again came

under Rumanian rule, which was confirmed by the Paris Peace Treaty of 1947. The Rumanian administrative reform of 1968 established a province called Maramureș (6,215 sq km, 1980 pop 543,000) in the region.

Ukrainian cultural life in the region improved after 1948, when new educational rights were granted to Rumania's national minorities. The Ukrainian lyceum (est 1948) and Ukrainian pedagogical school (est 1950) created in Sighetul Marmației fostered a new generation of nationally conscious Ukrainian intelligentsia for Rumania as a whole. In all the elementary schools in villages with a Ukrainian majority, teaching was conducted mostly in Ukrainian. Later, however, Rumanian sections were introduced in most of them, and with time the language of instruction became Rumanian. In the 1960s the pedagogical school in Sighetul Marmației was closed down, and the Ukrainian, Rumanian, and Hungarian lyceums there were amalgamated into one lyceum with three sections, the Dragoș Vodă Lyceum, where approx 150 Ukrainian students study each year. In each of the sections instruction is conducted in the native language of the students, but general subjects, such as history and geography, are taught only in Rumanian. Since 1980 the only elementary schools where teaching is conducted in Ukrainian have been those in Krychuniv, Poliany, and Vyshnia Rivna. Elsewhere Ukrainian has only been taught as a subject. Ukrainian reading rooms, clubs, and amateur groups are active in the villages.

In 1948 the Rumanian authorities forced the region's Ukrainian Catholic church and faithful to convert to Or-

thodoxy. In the churches liturgies are conducted in Old Church Slavonic, but sermons are delivered in Ukrainian. In the 1980s the region's eight Ukrainian parishes and eight priests were placed under the authority of an archpriest of the Ukrainian Orthodox church in Rumania, which is itself subordinated to the Rumanian Transylvanian eparchy.

Maramureş-Bukovynian Upland (also Maramureş-Bukovynian Massif, Maramures Massif, Rakhiv-Chyvychn Massif). A crystalline massif in the southeastern part of the Ukrainian Carpathians. The upland stretches beside the Polonynian and the Bukovynian Beskyds from the Chorna Tysa River valley in the northwest, southeast to the headwaters of the Vişeu (Vyshava) and the Bistriţa Aurie (Zolota Bystrytsia) rivers near Prislop Pass, in northern Rumania. The orographic foundation of the upland is a ridge 100 km long, which is the watershed between the Tysa River on one side and the Prut and the Seret rivers on the other.

The core of the anticlinal zone consists of metamorphosed crystalline rocks – gneiss, crystalline schist, and marbled limestone. The sedimentary rocks that formerly covered the crystalline core, consisting of Triassic and Jurassic formations (limestones, sandstones, porphyrites, and conglomerates) as well as Cretaceous and Paleogene layers, were partly destroyed by erosion. Because of its varied geological composition, significant absolute (average ridge height, 1,600–1,900 m) and relative (approx 1,000 m) elevation, and glacial formations, the Maramureş-Bukovynian Upland is more picturesque than other parts of the Ukrainian Carpathians. That is particularly true of the *Hutsul Alps, in the western reaches of the upland, and the *Chyvychn Mountains, near its center. Further to the southeast the Bukovynian part of the upland, consisting of crystalline schist formations, is considerably lower in elevation. Only occasionally do peaks of hard limestone or conglomerates rise above the nearly even ridges.

The upland is covered with forests of fir and of beech (in the southwest), which often grow at elevations of 1,500 m, and in places of 1,600 m. At higher elevations there are alpine meadows, although the Hutsul Alps have rocky

outcroppings not fit for cultivation. Junipers are found in the eastern part of the upland. The ridges of the middle portion of the upland are covered throughout by alpine meadows, which make up the largest such area in all the Ukrainian Carpathians. Barely 5 percent of the upland is inhabited; the population consists of Ukrainians (see *Hutsuls) and (in the southwest) Rumanians. Forestry and pasturing provide a significant influx of inhabitants on a seasonal basis.

V. Kubijovyč

Marble. Granular metamorphic rock formed as a result of a recrystallization of limestone or, less frequently, dolomites, under the influence of heat, pressure, and aqueous solutions. Pure marble is white; various admixtures result in different colors, such as pink, red, yellow, brown, green, black, gray, and blue. The largest deposits of marble are in Italy and Greece. In Ukraine deposits of marble are located in the Ukrainian Crystalline Shield (mostly gray marble) on the Teteriv River (Koziiivka) and the Boh River (Khashchuvate, Zavallia); in Transcarpathia, where deposits of marble in Dilove (white, gray, and dark gray), Rakhiv and Tiachiv (red and pink), and other locations have significant industrial importance; in the Crimean Mountains (mainly pink, red, and brown), near Balaklava, Haspra, and other sites; and in the Donets Basin, where deposits of marblelike limestones are located near Troitsko-Khartsyzke and Novopavlivka and elsewhere.

Marchak, Valerii [Marčak, Valerij], b 1949 in Krasnohirka, Holovanivske raion, Kirovohrad oblast. Painter and muralist. A graduate of the Lviv Institute of Applied and Decorative Arts (1977), he has taught painting there since 1978 and was appointed head of its Faculty of Painting. He created a stylized mural based on Ukrainian folk tales and another using fantasy at the Pioneer Palace in Lviv. At Lviv's House of Children no. 173 he painted the mural *Sounds of Music*.

Marchenko, Andrii [Marčenko, Andrij], b 1908 in Volhynia, d 1943 in Lviv. Political activist. While studying in Lviv in the 1930s, he became active in the OUN and a driving force behind the organization of the OUN underground in Volhynia. He served time in Polish prisons and was murdered in a Gestapo prison. His articles and militant poetry and songs appeared in the nationalist press.

Marchenko, Ivan [Marčenko], b 1 November 1892 in Parichi, Minsk gubernia, Belarus, d 3 March 1968 in Derby, England. Educator and mathematician. After graduating from St Petersburg University (1913) he was wounded in action in the First World War and then taught secondary school in Poltava. From 1925 he taught mathematics in Dnipropetrovske at the electrical sciences tekhnikum and then at the Metallurgical Institute (1930–41). After emigrating to Germany in 1944, he became active in the United Hetman Organization and edited its weekly *Ranok* (1948–54). In 1951 he settled in England, where he became a leading member of the hetmanite movement and the Association of Ukrainians in Great Britain. He was a founder and president (1959–62) of the British Association of Ukrainian Teachers and Educators and the author of two widely used textbooks, *Matematyka v tekhnikum* (Mathematics in the Tekhnikum, 1930) and *Zadachnyk z*

matematyky dlia tekhnikumiv (Exercise Book in Mathematics for Tekhnikums, 1932).

Mykhailo Marchenko

Valerii Marchenko

Marchenko, Mykhailo [Marčenko, Myxajlo], b 19 September 1902 in Hatne, Kiev county, d 21 January 1983 in Kiev. Historian; grandfather of V. *Marchenko. A graduate of the Institute of Red Professors in Kiev (1937), he chaired the Department of Feudalism at the AN URSS (now ANU) Institute of History and the USSR History Department at the Kiev Pedagogical Institute (1937–9), was rector of Lviv University (1939–41), and lectured at the pedagogical institutes in Novosibirsk (1941–5) and Kiev (1945–56). From 1956 he taught at Kiev University. He wrote many articles and reviews, and monographs on the struggle between Russia and Poland for Ukraine in 1654–64 (1941), Ukrainian history as depicted in the works of T. Shevchenko (1957), the historian O. Lazarevsky (with L. Polukhin, 1958), Ukrainian historiography up to the mid-19th century (1959), and the history of Ukrainian culture up to the mid-18th century (1961).

Marchenko, Valerii [Marčenko, Valerij], b 16 September 1947 in Kiev, d 7 October 1984 in Leningrad. Literary scholar, writer, and dissident; grandson of M. *Marchenko. After graduating in philology from Kiev University he studied Azerbaijani language and literature at Baku University and wrote a dissertation on A. Krymsky's research and translations of Azerbaijani literature. He translated H. Tiutiunnyk's short story 'Markiiian' into Azerbaijani and A. Rzaev's 'Sklianka vody' (Glass of Water) into Ukrainian. In 1970–3 he worked as an editor for *Literaturna Ukraina*. He was arrested in June 1973 and sentenced to six years' imprisonment and two years' exile for 'Ukrainian and Azerbaijani nationalism.' He was accused of writing three samvydav articles. Having served his time in the Perm concentration camps and his exile in Aktiubinsk, in May 1981 he returned to Ukraine. In 1984 he was tried again and sentenced to 10 years' imprisonment and 5 years' exile for 'anti-Soviet agitation and propaganda.' He died of kidney failure resulting from inadequate medical attention during his incarceration.

Marchenko, Volodymyr [Marčenko], b 7 July 1922 in Kharkiv. Mathematician; full member of the AN URSS (now ANU) since 1969 and of the Russian Academy of Sciences since 1987. A graduate of Kharkiv University (1945), he

Volodymyr Marchenko

taught there in 1945–61 (professor from 1953). Since 1961 he has worked at the Physico-Technical Institute of Low Temperatures in Kharkiv. Marchenko's main work is in the theory of differential equations, theory of functions, mathematical physics, and functional analysis. He is well known for his original results in the spectral theory of differential equations, including the discovery of new methods for the study of the asymptotic behavior of spectral functions and the convergence of expansions in terms of eigenfunctions. He also obtained fundamental results in the theory of inverse problems in spectral analysis for the Sturm-Liouville and more general equations. In the periodic case the famous Kordeweg-de Vries equation was solved by Marchenko in 1972 by the use of the method of the inverse problem in the theory of dissipation. In the spectral theory of differential operators he proved a basic theorem on the unique determination of a differential operator by its spectral characteristics. He laid the foundation for the spectral theory of non-self-adjoint singular differential operators and for the theory of boundary value problems with a fine-grained boundary. He also solved many problems in the approximation theory of continuous functions defined on the entire line and the theory of almost periodic functions. Marchenko made significant contributions to the theory of self-adjoint differential operators with infinitely many independent variables and also to the theory of spaces of functions of infinitely many variables as inductive limits of locally convex function spaces.

W. Petryshyn

Marchlewski raion. See Dovbysh.

Marchuk, Ivan [Marčuk], b 12 May 1936 in Moskalivka, Kremianets county, Volhynia voivodeship. Painter and sculptor. He graduated from the Lviv Institute of Applied and Decorative Arts in 1965 and then moved to Kiev. Until 1988 he was denied membership in the Union of Artists of Ukraine because his themes and style did not conform to *socialist realism. In Kiev he created the wall-size ceramic-tile relief compositions (1969–72) in the AN URSS (now ANU) Institute of Theoretical Physics. Marchuk paints fantastic figural and floral compositions with elements of *surrealism, hyperrealist portraits (eg, *R. Selsky*, 1981), enigmatic landscapes, and abstract expressionist compositions (eg, the series 'Colored Preludes' [1978]). His figural tempera paintings of the 'Voice of My Soul' series depict seemingly irrational situations with skeletal, often

Ivan Marchuk: a painting of his Shevchenkiana series (tempera, 1983)

grotesque, persons cut off at the waist and surrounded by sinister objects and creatures set in a vast empty landscape (eg, *Empty Nest* [1975] and *Dialogue without Words* [1976]). Marchuk's palette borders on the monochromatic, and the unreality of the imagery is thereby reinforced. His realistic landscapes have a peculiar, dense texture consisting of weblike layers of pigment that, combined with the dramatic use of light and dark, create an atmosphere of unease and mystery (eg, *Willows in the Embrace of a Moonlit Night* [1978] and *Apple in the Snow* [1979]). After the 1986 Chernobyl nuclear accident Marchuk created nightmarish compositions depicting the total destruction of our planet (eg, *Warning* [1986]). He has had numerous solo exhibitions, starting in Moscow in 1979 and Kiev in 1980. His 43 canvases inspired by the poetry of T. Shevchenko were exhibited at the Shevchenko Museum in Kaniv. Since 1989 he has had several exhibitions in Australia, Canada, and New York City.

D. Zelska-Darewych

Marcinkowski, Antoni (pseud.: Albert Gryf, Antoni Nowosielski), b 29 January 1823 in Mostyshche, Kiev county, Kiev gubernia, d 12 September 1880 in Kiev. Polish writer, literary critic, and ethnographer. After graduating from Kiev University (1844) he worked for the Polish newspaper *Gwiazda* in Kiev (1846–9). He traveled extensively in Ukraine and wrote several works on Ukrainian ethnography and history: *Stepy, morze i góry: Szkice i wspomnienia z podróży* (Steppes, Sea, and Mountains: Sketches and Reminiscences from a Trip, 2 vols, 1854), *Lud Ukraiński* (The Ukrainian People, 2 vols, 1857), and *Pogranicze Naddnieprzańskie* (The Dneiper Frontier, 2 vols, 1863).

Marena. A figure of Ukrainian folk mythology, identified by some scholars as a goddess of spring and of the waters. Marena plays a prominent role in March celebrations and the *Kupalo festival. In the latter she is represented by a wood-and-straw figure decorated with wreaths, flowers, and candles and is either paraded with song or stationed in one spot to be entertained with dances and games. At the end of the festivities she is burned, thrown into the water, or buried in the ground.

Aleksei Marenkov: poster design (1921)

Marenkov, Aleksei, b 25 March 1888 in Orel, Russia, d 1942 in Kiev. Graphic artist and muralist. He studied at the Kiev Art School (1905–12). In the 1920s he belonged to the *Association of Artists of Red Ukraine and designed many posters and book covers, in a style combining formalist simplicity with Cossack-baroque and Ukrainian folk-art motifs. His early posters and book covers show the influence of his teacher, H. *Narbut. Marenkov also painted murals inside the building of the All-Ukrainian Central Executive Committee and the Chervonyi Hotel in Kharkiv and taught at the Kharkiv Art Tekhnikum and Institute (1923–31).

Marenych Trio. A vocal and instrumental group established in Lutske in 1975. It consists of Valerii Marenych (baritone and guitar), his wife Antonina (soprano), and her sister Svitlana (alto, the group's musical director). They accompany themselves on guitar and percussion (drum, castanets, and bongo). The trio, with its distinctive gentle and relaxed style, has become very popular in Ukraine and among Ukrainians in the West. Its repertoire

Marenych Trio

consists of folk songs arranged by Svitliana. It has toured Ukraine, Eastern Europe, and Canada.

Marfiievych, Mykola [Marfijevyč], b 20 March 1898 in Ispas, Bukovyna, d 2 September 1967 in Kiev. Writer. He graduated from the teachers' institute in Chernivtsi in 1920 and completed graduate studies at the AN URSR (now ANU) Institute of Linguistics in 1933. He published collections of poetry, *Mizh verkhamy* (Between Summits, 1922), *Kvity* (Flowers, 1923), *Mykola Shuhai* (1927), *Halata* (1927), *Povstantsi* (The Rebels, 1930), and *Bukovyni* (For Bukovyna, 1930); a play, *Zbuduiemo Dniprel'stan* (We Shall Build the Dnieper Hydroelectric Station, 1928); and the novellettes *Proty boiar* (Against the Boyars, 1929) and *Krutizh* (The Vortex, 1931). He belonged to the *Zakhidnia Ukraina literary organization and was repressed in the 1930s, but rehabilitated in 1957. His work was republished posthumously in *Cheremoshe, bratku mii* (Cheremosh, My Brother, 1968).

Margolin, Arnold, b 17 November 1877 in Kiev, d 29 October 1956 in Washington, DC. Ukrainian-Jewish political leader, scholar, and lawyer; corresponding member of the Ukrainian Academy of Arts and Sciences in the US. He graduated from the law faculty of Kiev University and studied abroad until 1900. After being called to the bar, he acted as defense counsel in many political trials, including the M. Beilis trial (see *Beilis affair), and headed the South Russian Branch of the Union for Equal Rights for Jews in Russia (1905–17) and the Jewish Territorial Organization (1906–18). A firm believer in national self-determination, during the revolutionary period he joined the *Ukrainian Party of Socialists-Federalists and played a prominent role in the Ukrainian liberation struggle: he sat on the General Court of the UNR and served as deputy minister of foreign affairs in V. Chekhivsky's cabinet, as a member of the UNR delegation to the Paris Peace Conference, and as chief of the UNR mission to London. In 1922 he emigrated to the United States, where he practiced law, lectured at

Arnold Margolin and his wife

various universities, and promoted Ukrainian-Jewish understanding. He defended Ukraine's right to independence and the reputation of S. *Petliura. He served as a professor at the Ukrainian Technical Institute in New York and contributed to the weekly *Narodna volia*. Besides numerous articles on law and contemporary history, he wrote a number of books: *Ukraina i politika Antanty* (Ukraine and the Policy of the Entente, 1922; English trans, 1977), *The Jews of Eastern Europe* (1926), and *From a Political Diary: Russia, the Ukraine, and America, 1905–1945* (1946).

Marhanets [Marhanec'] (Marsanets). VI-15. A city (1990 pop 54,500) at the mouth of the Tomakivka River on the right bank of the Kakhivka Reservoir in Dnipropetrovske oblast. At the end of the 19th century a mining settlement was established at the site. In 1938 several settlements were amalgamated to form the city of Marhanets. Today the city is a major mining center of the Nykopol Manganese Basin. It is the home of a manganese mining and enrichment complex, a mining machinery repair plant, and a regional museum.

Maria Theresa, b 13 May 1717 in Vienna, d 29 November 1780 in Vienna. Archduchess of Austria and queen of Hungary and Bohemia from 1740, and the de facto ruler of the Holy Roman Empire from 1745 (the emperor, Francis I, married her in 1736). She was the daughter of Emperor Charles VI, and in 1765 her son (later her successor) *Joseph II became coregent. During Maria Theresa and Joseph's reign Austria annexed Galicia from partitioned Poland (1772) and Bukovyna from the Ottoman Empire (1774). The numerous modernizing administrative, fiscal, economic, judicial, ecclesiastical, educational, and military reforms Maria Theresa had introduced elsewhere in the empire, including Transcarpathia, were implemented in those lands. She introduced a number of reforms that improved the legal status of the peasantry and limited the Polish magnates' powers and privileges, and introduced various measures to stimulate the development of agriculture and commerce. The Ukrainian Greek Catholic clergy had their status raised to that of the Roman Catholic clergy (which they had not under Polish rule), a seminary was founded in Vienna (see *Barbareum), and the Uniate church was entrusted with establishing new elementary schools. Maria Theresa's reforms aimed to lift Galicia and Bukovyna out of the cultural restriction and economic stagnation they had endured under Polish and Ottoman rule.

Marian of Jaśliśka's dictionary, 1641. A Slavonic dictionary of Ukrainian recension. The Polish Dominican monk Marian (d 1658) compiled the dictionary at Zhovkva in 1641 under the title *Dictionarium Sclauo-Polonicum: hoc est vocabula quaedam Illyrica seu Dalmatica Polonice explicata ordine alphabetico* (according to popular belief, Church Slavonic had been created by St Jerome in Illyria and Dalmatia in the 4th and 5th centuries). The Slavonic register (ca 4,000 entries in Polish transliteration) was based mostly on P. *Berynda's Slavonic-Ruthenian dictionary of 1627. Definitions were given in Polish and sometimes in Latin.

Marian societies (Mariiski tovarystva; Latin: Sodalitates Marianae). Canonically erected Catholic lay bodies which promote a Christian way of life for their members through a program of spiritual formation and group religious activity centered on the veneration of Mary, the Mother of God. The first body of this type was formed in Rome in 1563 by a Jesuit priest, J. Leunis, and the movement was subsequently introduced into a number of Catholic countries. Approbation to form Marian societies in Ukraine was granted in 1615 by Pope Paul V in response to a request by Metropolitan Y. Rutsky. Promoted mainly by priests and nuns of the Basilian order through their network of schools, approx 30 to 40 societies were established in Ukraine during the 17th and 18th centuries. In spite of some efforts at rejuvenation by I. *Dolnytsky, the movement declined during the 19th century.

In 1920 Rev Y. *Markevych launched a successful campaign to form Marian societies throughout Galicia. His efforts were aided by a vigorous publishing program that included journals for youths and children (**Postup* and **Nash pryiatel'*), a society bulletin (*Vistnyk Mariis'koho tovarystva*), series of popular books (Biblioteka Nashoho pryiatelia and Tsikavi opovidannia), calendars, and brochures. The number of societies reached 31 in 1926 and continued to grow steadily until 1939. The societies' work was co-ordinated by an organizational center in Lviv that was headed first by Markevych and then by Rev I. *Nazarko. The societies expanded from their initial target groups of secondary and primary school students to include children, the elderly, and even adults. Societal activity centered around semimonthly meetings, corporate participation in the Liturgy at least once a month, the raising of religious consciousness, and various group programs.

The movement was outlawed with the Soviet occupation of Western Ukraine. Marian societies have been established in Ukrainian Catholic parishes in countries such as the United States, Canada, Brazil, and Argentina. Following the easing of religious persecution in Ukraine in the late 1980s, attempts have been made to revive Marian societies there.

BIBLIOGRAPHY

Villaret, E. *Abridged History of the Sodality of Our Lady*, trans W. Young (St Louis 1957)

Marianenko, Ivan [Mar'janenko] (real surname: Petlishenko), b 9 June 1878 at Sochevaniv *khutir*, near Marianivka, Yelysavethrad county, Kherson gubernia, d 4 November 1962 in Kharkiv. Actor of heroic roles, director, and teacher. After completing district school in Kupianka (1895) he worked in the troupe of his uncle, M. Kropyvnytsky, as a stage manager and actor, in O. Suslov's troupe (1899–1906), and in F. Volyk's troupe (1903–4). He was an

Ivan Marianenko in the role of Yaroslav the Wise

actor and director in Sadovsky's Theater in Kiev (1906–14). He led the Society of Ukrainian Actors (1915–16) and the *Ukrainian National Theater in Kiev (1917–18). In 1918 he joined the State Drama Theater (from 1919 the Shevchenko First Theater of the Ukrainian Soviet Republic). He worked in *Berezil (1922–34) and in the Kharkiv Ukrainian Drama Theater (1934–58). Marianenko appeared in nearly 200 roles in a variety of plays ranging from Ukrainian populist-ethnographic plays to world classics. An established actor of the populist-ethnographic theater, he made the transition to Berezil's formally innovative acting style. In 1933, when L. *Kurbas was attacked, Marianenko spoke in his defense. Marianenko's best roles were Gonta in *Haidamaky* (based on T. Shevchenko), Davidson in *Sadie* (based on S. Maugham's *Rain*, Verryrna in F. Schiller's *Die Verschwörung des Fiesko zu Genua*, Felix Grandet in *Eugénie Grandet* (based on H. de Balzac), and the title roles in W. Shakespeare's *Macbeth*, O. Korniiuchuk's *Bohdan Kmel'nyts'kyi*, and I. Kocherha's *Iaroslav Mudryi* (Yaroslav the Wise). He also acted in films: *The Downpour* (1929), *Fata morgana* (1931), *Koliivshchyna* (1933), and *Prometheus* (1936). He taught at the Lysenko Music and Drama School in Kiev (1917–18) and at the Kharkiv Theater Institute (1944–61). Marianenko is the author of *Mynule ukrains'koho teatru* (The Past of the Ukrainian Theater, 1953). Biographies of him were published in Kiev in 1964 and 1968.

V. Revutsky

Marianivka culture. A Bronze Age culture of the early 2nd to early 1st millennium BC located in Left-Bank Polisia and the northern forest-steppe regions of Ukraine. It was named after the site excavated in 1929 near the village of Marianivka, Sumy oblast. Excavations there and at other sites revealed surface dwellings and shallow pit-houses of a relatively large size, pottery with featherlike and pitted ornamentation, flint and quartz tools, and a small number of bronze items. The tribes of this culture engaged in hunting, fishing, and (later) agriculture and animal husbandry. The culture can be divided into three chronological periods – early Marianivka, middle Studenok, and late *Bondarykha (the latter being regarded as a separate or equal culture). Evidence suggests the origins of the Marianivka culture are linked to the *Pitted-Comb Pottery culture.

Máriapócs Monastery. A Basilian monastery located in an area of northeastern Hungary inhabited mostly by Magyarized Greek Catholic Ukrainians. It was established in 1749 and served as an important religious and cultural center for Transcarpathia. A miraculous icon of the weep-

Máriapócs Monastery

ing Mother of God was located there. The monastery attracted up to 100,000 pilgrims annually to 1914 and during the Second World War. After the war it was closed; the church was declared a minor basilica in 1948.

Mariinskyi Palace. The tsarist palace in Kiev. Using Count O. Rozumovsky's palace in Perov, near Moscow, as his model, B. *Rastrelli designed it in the rococo style for Empress Elizabeth I. It was built above the Dnieper River in the Pecherske district under the supervision of the architects I. Michurin, P. Neelov, and I. *Hryhorovych-Barsky in the years 1747–55. The palace consisted of a long central section with a stone ground floor and wooden second story (destroyed by a fire in 1819), two stone one-story wings, and a large adjacent park with an orangery and orchards. It was inhabited sporadically by visiting members of the royal family and various governors, including P. Rumiantsev (in 1776), but otherwise stood empty. From 1834 to 1868 it was leased by a mineral-water company. The palace was renovated in 1870 according to K. Maievsky's Louis XVI-style design for the visit of Emperor Alexander II and Empress Maria (hence its name). In 1918 it housed the Hetman government's Ministry of the Interior and the National Guard headquarters, in 1919, the Soviet Council of People's Commissars, and in 1920, the Soviet military-district headquarters. From 1923 to 1925 an agricultural school was located there. Since 1925 the palace has housed an agricultural museum, a permanent industrial exhibit, and various official agencies. After being damaged and looted during the Second World War, it was rebuilt by 1949.

Street In Mariupil

Mariupil or Mariupol [Marijupil' or Mariupol']. VI-18. A port city (1990 pop 519,900) on the Sea of Azov at the mouth of the Kalmiius River in Donetsk oblast. A major industrial center, it is the ninth-largest city in Ukraine. From 1948 to 1989 it was called Zhdanov. Its origins date back to the beginning of the 16th century, when the Cossack fortress of Kalmiius was built. By 1611 Kalmiius was the center of a palanka. When Russia annexed the territory in 1775, the fortress was renamed Pavlovsk, and the palanka was reorganized into a county. In 1780 many Greeks from the Crimea were resettled there, and the town was renamed Mariupil (Mariupol, Marianopol). In the late 19th century Mariupil was developed as a shipping port for the Donets Basin, in 1882 it was linked with Donetsk by rail, and in 1886–9 the port was built. The main exports were coal and grain. By 1900 the port was handling 1 million t of freight, and the tonnage doubled in the next decade. At the turn of the century a tube-rolling and a metallurgical plant were built, and from that time the town's heavy industry grew rapidly. From 1892 to 1897 the population of Mariupil almost doubled, from 17,000 to 32,000. About half of it was Ukrainian and Russian, 28 percent Greek, and 21 percent Jewish. By the beginning of the First World War it had jumped to 110,000, and by 1921 it had fallen to 30,000. In the late 1920s the port was expanded to handle the Donets Basin's increased output, and the Azovstal Metallurgical Plant, one of the largest in the Soviet Union, was built. The Mariupil region became, after the Donets Basin and the Dnieper Industrial Region, the third-largest center of heavy industry in Ukraine. By 1939 its population had reached 227,000. The city was heavily damaged during the war, and its population fell to 85,000 in 1943.

Today Mariupil has many metallurgical and heavy-machine-building plants, a coke refinery, and a large food industry. Its port is second only to Odessa's in Ukraine. The use of icebreakers enables it to remain open year-round. Known as 'the ocean gateway of the Donbas,' Mariupil is used by Ukraine to export coal, metals, grain, salt, and machines and to import iron ore, manganese ore, and cement. Its importance as a shipping outlet increased with the completion of the Volga-Don Canal, which linked the Sea of Azov with Moscow and the Caspian Sea. After the Second World War the seacoast near Mariupil was developed into a resort area specializing in climatological and mud therapy. Mariupil is one of the most polluted cities in Ukraine. Its heavy industry is largely responsible for polluting the Sea of Azov.

Mariupil Azovstal Metallurgical Plant (Mariupil'skyi metalurhiinyi zavod Azovstal. One of the largest ferrous metallurgical plants in Ukraine. Located in Mariupil, it uses iron ore from the Kerch Iron-ore Basin and coal from the Donets Basin. The construction of the plant began in 1930. Most of its machines and equipment were imported from the United States, and American engineers took part in building the plant. The first blast furnace went into operation in 1933, and the first Martin gas furnace in 1935. By 1941 the plant had four blast furnaces and six Martin gas furnaces. After the war the plant was reconstructed. In 1948 a large blooming, rail, and girder mill – the largest mill in Ukraine and one of the largest in the Soviet Union – was opened. As a result the plant could carry out a complete metallurgical cycle. In October 1953 a large rolling mill was added. By 1959 the plant had 6 blast furnaces and 12 Martin furnaces, and in 1961 the Martin furnace shop was reconstructed and expanded. The plant's steel output is still insufficient, and its quality is low because of phosphorus content in the ore. Since 1958 the plant has used a special flux agglomerate delivered in a hot state by sea from the Komyshe-Burunny Iron-ore Complex. The plant produces such products as rails, poles, stands, girders, and structural forms for buildings and bridges.

Mariupil burial site. A late Neolithic tribal burial site from the 3rd or 4th millennium BC, located near the city of Mariupil. It was excavated in 1930 by M. *Makarenko, who published a monograph about his findings in 1933. The site included approx 120 skeletons buried three-deep with their heads oriented toward the east or west. The grave pits were covered by an elongated wooden vault to which sections were added as needed. Traces of red ocher, evidently used in burial rites, were found on half the skeletons. Stone utensils and adornments made from shells and the teeth of animals were also uncovered. Similar burial sites were found in the lower Dnieper area after the Second World War.

Mariupil Heavy-Machine-Building Plant (Mariupil'skyi zavod vazhkoho mashynobuduvannia). A major factory of Ukraine's machine-building industry, located in Mariupil. It was organized in 1958 out of the machine-building division of the Mariupil Metallurgical Plant, which built railway tankers. It was the only plant in the USSR that made railway tankers for transporting oil, chemicals, natural gas, food products, and other goods. Its also produces machinery and equipment for the metallurgical, shipbuilding, and mining industries and for hydroelectric stations. In the early 1970s the plant employed over 5,500 workers.

Mariupil Iron-ore Deposit. An ore source in Donetsk oblast 20 km west of Mariupil. The deposit covers an area of approx 150 sq km and consists of iron quartzites (principally magnetite) with an iron content of 20–30 percent. The seams, 20–160 m thick, are found 80–600 m underground and can be mined by open-pit or deep-shaft methods. The ores contain few impurities and are easily concentrated. The deposit was discovered in 1963 but has yet to be exploited. It is a potential source of iron ore for the nearby iron and steel center of Mariupil.

Mariupil Metallurgical Institute (Mariupil'skyi metalurhiinyi instytut). A higher educational institution, un-

til 1992 under the Ministry of Higher and Secondary Specialized Education of the Ukrainian SSR. It was established in 1930 as an evening school of metallurgy, and in 1939 it acquired a day division. The institute has seven faculties, including metallurgy, technology, energy, and welding, and an evening and graduate school. In 1979 its enrollment was about 6,000.

Mariupil Metallurgical Plant (Mariupil'skyi metalurhiinyi zavod). A major factory of the metallurgical industry, located in Mariupil (until 1989, Zhdanov), Donetsk oblast. The factory was built in 1897 by the Nykopol-Mariupil Mining and Metallurgical Company. A second metallurgical factory, called Providence, was built in Mariupil in 1899. The two plants were nationalized and merged in 1919 to form the Mariupil Association of State Metallurgical Plants. The plant received its present name in 1924.

In the interwar period the plant produced extrastrength and ironclad steel, new types of pipes, and the first pipes for boreholes in the USSR. The plant was destroyed during the Second World War and then rebuilt. At first it built railway tankers. In 1958 the Mariupil Heavy-Machine-Building Plant was founded on the basis of the machine-building division of the metallurgical plant. Now the plant produces cast iron, steel, rolled steel, sheet metal, pipes, and other products. In 1970 it employed almost 5,000 workers and was one of the largest metallurgical plants in Ukraine.

Marine Hydrophysical Institute of the Academy of Sciences of Ukraine (Morskyi hidrofizychnyi instytut ANU). A physical oceanography research institute based in the Crimea since 1963, in Sevastopol and Katsyveli near Simeiz. Its predecessor was the Marine Hydrophysical Station (est 1929), which came under the Marine Hydrophysical Institute of the Academy of Sciences of the USSR in 1948 (transferred to the AN URSR [now ANU] in 1961). The institute consists of 15 departments, an experimental station, and a construction shop. The main areas of study are circulation in the world's oceans, interaction between the atmosphere and the oceans, surface and deep oceanic waves, and ocean turbulences. The institute operates a Black Sea research ship *Muksun* and the far-ranging oceanic research vessels *Akademik Vernadskyi* and *Mikhail Lomonosov*. It also owns various major testing facilities, including a very large wave tank, for the study of storm systems and uses computer modeling to produce oceanic maps. The institute took part in an international project to study the Caribbean Sea and the Gulf of Mexico (MOCARIB) and in a joint project with the United States to study the dynamics of oceans (POLIMODE).

Marinka [Marjinka]. VI-18, DB IV-3. A city (1990 pop 10,900) on the Osykova River and a raion center in Donetsk oblast. It was founded in the 1840s, and attained city status in 1977. Marinka has a tire manufacturing and repair plant and a food industry.

Maritchak, Oleksander [Maritčak] (Maritczak), b 18 September 1887 in Stryi, Galicia, d 1 October 1981 in Detroit, Michigan. Lawyer, political figure, and educator; member of the Shevchenko Scientific Society from 1918. A graduate of Lviv University (LL D, 1909), he opened his own law office in Rudky in 1918. During the November

Oleksander Maritchak

uprising he was elected county commissioner and member of the Ukrainian National Rada in Stanyslaviv. With the collapse of the Western Ukrainian National Republic he emigrated to Vienna, where he became secretary of the Western Ukrainian League of Nations Society (1921–4) and studied international law. Upon returning to Lviv in 1923, he resumed his law practice and taught international law at the Lviv (Underground) Ukrainian University. He often acted as defense counsel in political trials. He sat on the presidium of the Ukrainian People's Labor party and then on the presidium and CC of the Ukrainian National Democratic Alliance. During the Soviet occupation of Galicia he headed the department of international law at Lviv University. After emigrating in 1944, he taught international law at the Ukrainian Higher School of Economics in Munich and then (1949) resettled in the United States. He was active in the Ukrainian community in Detroit, where he served as president of the local Self-Reliance Credit Union.

Markelov, Hryhorii (Grigorii), b 7 February 1880 in Perm, Russia, d 8 April 1952 in Odessa. Neurologist; full member of the AN URSR (now ANU) from 1939. A graduate of Odessa University (1906), he taught at the Odessa Medical Institute (from 1918) and in 1927 became chairman of a department there. From 1930 he was director of the Odessa Psychoneurological Scientific Research Institute. His work dealt with the normal and diseased state of the autonomic nervous system, methods for studying patients, the pathology of brain vessels, neurological disorders associated with malaria, and the effect of external factors, such as light, on physiological processes. He wrote *Zabolevaniia vegetativnoi sistemy* (Diseases of the Autonomic System, 1948).

Markevych, Andrii [Markevych, Andrii], b 21 November 1830 in Poltava gubernia, d 24 March 1907 in St Petersburg. Jurist and music ethnographer; son of M. *Markevych. An official of a juridical department in St Petersburg, he attained the rank of full councillor and the office of senator. He was an assistant of the curator of the Imperial Philanthropic Society and vice-president of the Russian Music Society. He became acquainted with T. Shevchenko in 1858 in Moscow and corresponded with him. From 1898 he presided over the Shevchenko Society in St Petersburg, which supported poor Ukrainians studying in the city. Markevych obtained permission to use Shevchenko's manuscripts in the archives of the police's

Third Section for the first full publication of *Kobzar* (ed V. Domanytsky, 1907). He arranged the music to 25 Ukrainian folk songs, which appeared in P. Kulish's *Zapiski o Iuzhnoi Rusi* (Notes on Southern Rus', vol 2, 1857), and compiled the collection *Narodnye ukrainskie napevy, polozhennye na fortepiano* (Ukrainian Folk Melodies Arranged for Piano, 1860).

Markevych, Hryhorii [Markevych, Hryhorij], b 1849 in Voronky, Lohvytsia county, Poltava gubernia, d 1923. Civic leader, educator, and writer. A graduate of the Kiev Theological Academy (1871), he was an inspector at the Poltava Girl's School and served on Poltava's municipal council. He organized a printing press and bookstore in the city, where he published the newspaper *Ridnyi krai*, Ukrainian textbooks, and the works of Ukrainian writers, such as I. Tobilevych, M. Kropyvnytsky, and A. Kashchenko. He was one of the initiators of the Kotliarevsky monument and school in Poltava. His writings include a study of the elective principle in the Ukrainian church and some poetry.

Mykola Markevych (portrait by L. Zhemchuzhnikov, 1861)

Markevych, Mykola [Markevych, Nikolai], b 7 February 1804 in Dunaiets, Hlukhiv county, Chernihiv gubernia, d 21 June 1860 in Turivka, Pryluka county, Poltava gubernia. Historian, ethnographer, poet, musician, and composer. He studied in St Petersburg at the boarding school of the Pedagogical Institute (1817–20), where he befriended M. Glinka. He served as an officer in the Russian army (1820–4) and later studied piano and composition under J. Field in Moscow. Markevych was close to Decembrist literary circles (eg, A. Pushkin, K. Ryleev). In 1829 his collections *Elegii i evreiskii melodiï* (Elegies and Jewish Melodies) and *Stikhotvoreniia eroticheskii i Parizina*

(Erotic Poems and [a translation of Byron's poem] *Parisina*) were published in Moscow, and in 1831 his collection of Romantic ballads about Ukraine's heroic past, *Ukrainskiiia melodii* (Ukrainian Melodies), was published there. From 1830 Markevych lived on his estate in Turivka and collected materials on the history of Ukraine, particularly those found in archives in Chernihiv and Poltava gubernias, and Ukrainian folklore and folk songs. In 1836 he published the first volume of a historical, mythological, and statistical dictionary of the Russian Empire.

The then unpublished *Istoriia Rusov* had a significant impact on Markevych's major work, the five-volume *Istoriia Malorossii* (History of Little Russia), published in Moscow in 1842–3. Vols 3–5 contain valuable documentary addenda, notes, source descriptions, lists of regiments, the General Officer Staff, and colonels in the Hetman state, of companies at the Zaporozhian Sich, and of the Ukrainian higher clergy, and chronological tables. In his monograph Markevych approached the history of Ukraine as an independent, uninterrupted process from earliest times to the late 18th century. Markevych's history greatly influenced 19th-century Ukrainian historiography and his Romantic contemporaries, particularly his friend T. Shevchenko. Among Markevych's other historical writings the most noteworthy are on Hetman I. Mazepa (*Maiak*, 1841), the hetmancy of Ya. Barabash (*Russkii vestnik*, 1841, no. 2), the first Little Russian hetmans and official documents explaining the history of Little Russia (*Chteniia v Moskovskom obshchestve istorii i drevnostei rossiiskikh*, 1848, no. 8), and the Cossacks (*ibid*, 1858, no. 4).

Among Markevych's ethnographic writings are a larger work on Little Russian customs, beliefs, cuisine, and beverages (1860) and compilations of Little Russian songs (1840) and 'South Russian' (ie, Ukrainian) songs (1857). Many of Markevych's works have not been published. His personal archive (including his diary) is preserved at the Institute of Russian Literature in St Petersburg. His valuable annotated collection of 6,550 documents from the 16th to 18th centuries is in the State Library in Moscow. Ya. Shchapov and I. Kudriavtseva's annotated bibliography of Markevych's and I. Lukashevych's collections of manuscript books in that library was published in Moscow in 1959. A biography of Markevych by E. Kosachevskaia was published in Leningrad in 1987.

O. Ohloblyn

Markevych, Oleksander [Markevych], b 9 April 1894 in Troitske, Vasylykiv county, Kiev gubernia, d 5 February 1978 in Kiev. Folk singer and kobzar. After losing his eyesight in the First World War, he learned to play the kobza and bandura and developed an extensive repertoire of dumas, historical songs, psalms, and musical renditions, often his own, of poems by T. Shevchenko, S. Rudansky, and L. Hlibov. In 1939 he took part in the First Republican Conference of Kobzars and Lirnyks and joined the State Kobzar Ensemble. In the 50 years of his career he visited almost every village of the Kiev region.

Markevych, Oleksander [Markevych], b 19 March 1905 in Ploske, Tarashcha county, Kiev gubernia. Zoologist; full member of the AN URSR (now ANU) since 1957 (corresponding member from 1948). He graduated from the Kiev Institute of People's Education (1930) and worked in Leningrad (1930–5) before becoming an associate of the

Oleksander Markevych
(1905–)

Rev Yosafat Ivan Markevych

ANU Institute of Zoology in 1935 and its director in 1948–50. From 1970 he was affiliated with the ANU Institute of Hydrobiology. Markevych also taught and held several administrative positions at Kiev University (1935–61), and he organized the Ukrainian Parasitology Society in 1945. His principal research was on parasitology, the zoology of invertebrates, the phylogeny of animals, and the history of zoology. His major publications include *Osnovy parazytolohii* (The Principles of Parasitology, 1950) and *Filoheniia tvarynnoho svitu* (The Phylogeny of the Animal World, 1964).

Markevych, Oleksii [Markevych, Oleksij], b 1847 in Smosh, Pryluka county, Poltava gubernia, d 18 June 1903 in Odessa. Historian and community figure; full member of the Shevchenko Scientific Society (NTSh) from 1901. He studied at the Nizhen Lyceum, graduated from Odessa University (1869), and taught Russian history in gymnasiums in Odessa and Tahanrih before becoming a docent (1880–8) and professor (1888–95) at Odessa University. He was forced to retire from the university after he was accused of spreading Ukrainophile propaganda. He remained an active member of the Odessa Society of History and Antiquities and the Tavriia Scholarly Archival Commission. A specialist on the history of Muscovy and Southern Ukraine, he wrote monographs on the Muscovite service nobility (PHD diss, 1879) and the Rus' chronicles (2 vols, 1883, 1885) and contributed articles to *Kievskaiia starina*, *Zapysky NTSh*, and *Zapiski Odesskago obshchestva istorii i drevnostei*, which published a bibliography of his works in vol 26.

Markevych, Yosafat Ivan [Markevych, Josafat], b 1880 near Kańczuga, Przeworsk county, Galicia, d 31 January 1959 in Chicago. Basilian monk and Catholic activist of Polish descent. He was introduced to the Basilian order while attending a gymnasium in Buchach and then continued his studies at the Jesuit seminary in Innsbruck, where he was ordained in 1904 and completed a DD in 1911. He was a leading organizer of the 'Marian societies movement in Galicia and a regular contributor to various Catholic journals for youth (**Postup* and **Nash priyatel*'). After the Second World War he moved to the United States, where he was less active owing to failing health.

Markina, Valentyna, b 24 December 1910 in Teplivka, Pyriatyn county, Poltava gubernia, d 24 July 1990 in Kiev. Historian. She studied at the Moscow Pedagogical Institute (1933–7) and taught medieval history at the Izhevsk Pedagogical Institute in the Udmurt ASSR (1937–45). In 1945 she received a candidate's degree from Moscow University and began teaching at Kiev University. From 1961 to 1984 she chaired the department of ancient and medieval history, and in 1963 she became a professor. Markina wrote monographs on magnates' estates in Right-Bank Ukraine in the second half of the 18th century (doctoral diss, 1961) and the peasantry of Right-Bank Ukraine from the late 17th century to the 1860s (1971), and over 70 articles.

Markish, Perets [Markiš, Perec], b 7 December 1895 in Polonne, Novohrad-Volynskiy county, Volhynia gubernia, d 12 August 1952 in Moscow. Soviet Yiddish poet, novelist, and playwright. Markish began to publish in Yiddish in 1917 and with D. Hofstein and L. Kvitko formed the so-called Kiev lyric triad of Yiddish poets. His early poetry glorifies the new Soviet revolution. From 1921 to 1926 he lived in Poland and in France, and in 1926 he returned to the USSR. Markish wrote about industrialization, collectivization, and other aspects of life in the Soviet Union. Among his best-known works is the epic poem 'Briders' (Brothers, 1929). Markish was arrested in 1948 during the Zhdanov purge of Jewish culture and sentenced to death with other Yiddish cultural figures by a secret Military Collegium tribunal. He was executed in the Lubianka Prison. He was posthumously rehabilitated.

Markivka. IV-20. A town smt (1990 pop 7,900) on the Derkul River and a raion center in Luhanske oblast. It was founded in 1703 as a Cossack settlement and razed by Russian troops in 1709 for its part in K. Bulavin's uprising. It was rebuilt a generation later. In 1960 it attained smt status. The town has a food industry and a regional museum.

Markov, Dimitrii, b ?, d 26 July 1938 in Bratislava, Czechoslovakia. Lawyer, political leader, and publicist; son of O. and brother of Y. *Markov. A prominent Russophile leader in Galicia, he claimed that there were two Ruthenian peoples in Galicia, Russians and Ukrainians. In 1907 he was elected to the Austrian parliament, and in 1913, to the Galician Diet, where he was the sole Russophile among 31 Ukrainian deputies. In his works, such as *Die russische und ukrainische Idee in Österreich* (1908; 2nd edn 1912; trans into Russian 1915) and *Mémoire sur les aspirations nationales des petits-russiens de l'ancien empire austro-hongrois* (1918), he advocated a 'reunion' of Galicia with Russia. After the war he revised his views and cooperated with Ukrainian émigré circles.

Markov, Mykhailo, b ca 1760, d 1819. Historian and administrator. He was procurator of Chernihiv gubernia (1794–7), director of Ukrainian schools in Little Russia gubernia (1800), and director of the Chernihiv gymnasium (1805–19). His studies of the Chernihiv district were among the first attempts at writing detailed regional histories of Ukraine based on primary sources. His works include *O gorodakh i seleniakh v Chernigovskoi gubernii, upominaemykh v Nestorovoi letopisi* (About Towns and Settlements in Chernihiv Gubernia, Mentioned in Nestor's Chronicle, 1813), an introduction to Little Russian (Ukrainian) history (published in *Ukrainskii vestnik*, 1817), an ar-

ticle on the important monuments of Chernihiv, and several unpublished items.

Markov, Osyp, b 1849 in Hrushova, Sambir circle, Galicia, d 10 November 1909 in Lviv. Russophile journalist; father of D. and Y. *Markov. As a student at the Academic Gymnasium in Lviv, he became involved with the Russophile press, working for the newspaper *Slovo* under the tutelage of B. Didytsky. In 1881 he started the weekly **Prolom*, which eventually became a daily. Because of injunctions by the Ukrainian Catholic church against the publication, it appeared under a variety of names: *Novyi prolom* (1883–7), *Chervonaia Rus'* (1888–91), *Halytskaia Rus'* (1891–2), and **Halychamyn* (1893–1913). Markov also published the popular Russophile weekly **Russkoe slovo* (1890–1914).

Markov, Yosyp, b 25 October 1890 in Lviv, d 27 November 1976 in Bratislava. Jurist, pedagogue, and ethnographer; son of O. and brother of D. *Markov. He studied in Lviv (1913) and Rostov-na-Donu (1917) and worked in Paris, Vienna, and Mukachiv. He was a professor at Prague (from 1931) and Bratislava (1945–50, rector in 1948–9) universities, where his research centered on the legal history of Czechoslovakia, Yugoslavia, and Transcarpathia. His views changed from Russophilism to Ukrainian nationalism, and for that reason he was dismissed from the university. His works, based on extensive archival research, include studies of N. Gogol in Galician-Ruthenian literature (1913), A. Dobriansky (1930), and the social history (1930), customary law (1932), and folk art (1962) of 18th-century Transcarpathia.

Markovsky, Leonid [Markovs'kyj], b 21 November 1939 in Grodekovo, Primorskii krai, RSFSR. Organic chemist; AN URSS (now ANU) corresponding member since 1978 and full member since 1988. A graduate of the Lviv Polytechnical Institute (1961), since 1966 he has worked at the AN URSS Institute of Organic Chemistry. A specialist in organosulfur, organofluorine, and organophosphorus chemistry, he discovered reactions leading to compounds with multiple sulfur-nitrogen bonds and has developed additives to synthetic fibers and leather, foamed polyurethanes, and electrical insulators.

Markovsky, Mykhailo [Markovs'kyj, Myxajlo], b 20 November 1869 in Ksaverivka, Vasylykiv county, Kiev gubernia, d 30 June 1947 in Kiev. Literary scholar and critic. Markovsky lectured on Ukrainian literature and language at higher educational institutions and coedited the publications of the Historical-Philological Division of the VUAN. His most important works are studies on the baroque and modern periods of Ukrainian literature published in *Zapysky Istorychno-filolohichnoho viddilu VUAN*.

Markovsky, Yevhen [Markovs'kyj, Jevhen], b 18 November 1893 in Papuzhyntsi, Uman county, Kiev gubernia, d ? Literary scholar; son of M. *Markovsky. He worked in various VUAN historical institutes and wrote works on I. Kotliarevsky and A. Radyvylovsky, as well as a pioneering book on the Ukrainian **vertep* (1929). He was arrested in 1932 during the Stalinist terror, and his further fate is unknown.

Markovych [Markovyč]. A family of Cossack *starshyna* of Jewish origin. It originated with Avraam in the early

17th century. His son, Marko (d 1712), was a wealthy rentier in Pryluka in the 1660s and Pyriatyn in 1683–5. Marko's daughter, Anastasiia (Nastia, 1671 to 30 December 1729), married Hetman I. Skoropadsky. Marko's sons were Andrii *Markovych, a colonel of Lubni regiment (1714–27) and general treasurer (1729–40) of the Hetman state; Ivan (d 30 October 1724), a captain of Pryluka company (1709–19) and judge (1719–24) of Pryluka regiment; and Fedir (d 1737 or 1738), a captain of Pryluka company (1719–24) and a fellow of the standard (1724–7). Andrii's son Yakiv *Markovych began the Chernihiv branch of the family, which includes his grandsons Yakiv *Markovych and Oleksander *Markovych. Semen, Andrii's other son, was a captain of Romeni company in Lubni regiment (1731–8). His descendants are the ethnographer Opanas *Markovych and the writer Dmytro *Markovych. Fedir's descendants constituted the Pryluka branch of the family, who in the 19th century changed their name to Markevych. They include the historians Mykola *Markevych and Oleksii *Markevych, and Mykola's son, Andrii *Markevych. Andrii's grandsons are the pianist and composer Igor Markevitch (1912–83), who conducted the Montreal Symphony (1956–60) and several Western European orchestras, and his Swiss-born brother, Dmitry (b 1923), a cellist and the founder and director of the Higher Musical Institute in Montreux.

Markovych, Andrii [Markovyč, Andrij], b ca 1674 in Pryluka, d 23 January 1747 in Poharshchyna, Romeni company, Lubni regiment. Senior official in the Hetman state; father of Ya. *Markovych. A captain of Hlukhiv company in Nizhen regiment (1701–14) and a notable military fellow (from 1708), he turned against Hetman I. Mazepa in 1708 and helped A. Menshikov's Russian army to capture Baturyn. In 1709 he was Peter I and Hetman I. Skoropadsky's envoy in Constantinople. For his loyal services he was awarded large estates and appointed colonel of Lubni regiment (1714–27). He was removed after court proceedings were initiated against his extreme maltreatment of his peasants. He was acquitted, however, because of pressure exerted by the Russian government and his sister, Anastasiia, Skoropadsky's wife. Despite opposition from Hetman D. Apostol he was appointed general treasurer (1729–40). He was accepted into the Russian nobility in 1736.

Markovych, Dmytro [Markovyč] (pen name: Olenin), b 8 November 1848 in Poltava, d December 1920 in Vinnytsia, Podilia gubernia. Jurist, civic and co-operative activist, and writer; nephew of Opanas *Markovych. He served as a court official in various localities of the Russian Empire – in Kherson, the Kuban, and Warsaw. In the early 1900s he retired to his estate in Mykhalkivtsi, Volhynia, and devoted himself to community service, co-operative and zemstvo affairs, and political activity. He became a member of the Society of Ukrainian Progressives. After moving to Vinnytsia he edited the weekly *Podil's'ka volia* (1917). During the revolutionary period he served as general procurator under the Central Rada, senator under the Hetman government, and minister of justice in S. Ostapenko's cabinet under the UNR Directory. His stories first appeared in the almanac *Step* in 1886 and were collected later under the title *Po stepakh ta khutorakh* (Through the Steppes and Homesteads, 1898; 2nd edn 1908). His complete works were published in two volumes in 1918–19.

Markovych, Lev [Markovyč], b 1881, d 1930. Civic and political leader in Volhynia; son of D. *Markovych. When his father moved to Vinnytsia in 1912, he managed the family estate in Mykhalkivtsi, near Ostrih. He served as president of the county school and sanitation-epidemic councils and was an honorary member of the Prosvita society. In 1922–8 he represented Ostrih county in the Polish Senate.

Markovych, Oleksander [Markovyč], b 31 July 1790 in Svarkove, Hlukhiv county, Novhorod-Siverskyi vicegerency, d 3 December 1865. Nobleman, historian, and civic figure in the Chernihiv region; brother of Ya. *Markovych. He graduated from Kharkiv University and then worked in Chernihiv gubernia as a registrar (1807–12), county judge in Hlukhiv (1820–1), general justice (1827–30), and marshal of the nobility (1826–7, 1832–8). In 1852 he submitted a proposal to the tsarist government for the emancipation of his 979 serfs and their right freely to purchase his land, but his request was refused. After the abolition of serfdom in 1861, he took an active part in implementing peasant reforms in Chernihiv gubernia. He built and funded a school for the peasants in Svarkove, paid their taxes, and maintained a hospital for syphilitics that was established by his grandfather. Markovych wrote a socio-economic, historical, and statistical study of the Left-Bank gentry as an estate and their properties in Chernihiv gubernia, based on the archives of the Chernihiv Gentry Assembly (pub in a book of the Ministry of the Interior's materials on the statistics of the Russian Empire [vol 2] in 1841 and separately in 1894); a historical description of Hlukhiv (excerpts pub in O. Lazarevsky's work on Old Little Russia, vol 2, 1893); a history of the Hamaliivka monastery in Hlukhiv county (pub in F. Gumilevsky's history of Chernihiv eparchy, 1873); and a novelle about the 18th-century Cossack *starshyna*, 'Malorossiiskaia svad'ba' (Little Russian Wedding, pub in *Kievskaiia starina* in 1897). Markovych also published nine historical documents from his family's archive in *Ukrainskii zhurnal* (1824) and a condensed version of the diary of his grandfather, Ya. *Markovych, in Russian translation (2 vols, 1859).

A. Zhukovsky

Opanas Markovych

Markovych, Opanas [Markovyč], b 8 February 1822 in Kulazhyntsi, Pyriatyn county, Poltava gubernia, d 1 September 1867 in Chernihiv. Ethnographer, composer, and civic figure; husband of M. *Vovchok. After graduating from Kiev University (1846) he was arrested for belonging to the *Cyril and Methodius Brotherhood and exiled to

Orel. Apart from a brief stay in St Petersburg (1860–1), where he worked on the journal **Osnova*, from 1851 he lived in Ukraine and collected folkloric and ethnographic materials. Many of them were published in collections edited by A. Metlynsky, M. Nomys, and V. Antonovych and M. Drahomanov or in journals and almanacs. He scored the music for I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava, 1857) and K. Topolia's *Chary* (Charms, 1866) and staged these operettas in Chernihiv and Novhorod-Siverskyi. A collection of the materials gathered by Markovych and his wife, titled *Fol'klorni zapysy Marka Vovchka ta Opanasa Markovycha* (Folklore Notations of Marko Vovchok and Opanas Markovych), came out in 1983.

Markovych, Pavlo [Markovyč], b 19 November 1924 in Habura, Prešov region. Artist, pedagogue, and ethnographer. After completing his art education in Bratislava (1953) he taught art in a Prešov secondary school and then lectured at the pedagogical faculty of Šafařík University. His paintings consist mainly of landscapes and ethnographic sketches (ink, pastels, tempera, oils). He has held solo exhibitions in Svydnyk, Prešov, Bardejov, and Humenné. A specialist in Ukrainian embroidery and Easter eggs, he has written *Ukraïns'ki narodni khrestykovyi vyshyvky Skhidnoi Slovačchyny* (Ukrainian Folk Cross-stitch Embroidery of Eastern Slovakia, 1964), *Ukraïns'ki pysanky Skhidnoi Slovačchyny* (Ukrainian Easter Eggs of Eastern Slovakia, 1972), and *Rusyn Easter Eggs from Eastern Slovakia* (1987). He emigrated to the United States in 1991.

Markovych, Petro [Markovyč], b 13 August 1937 in Chornoriky, Krosno county, Galicia. Painter, graphic artist, and ceramist. A graduate of the Lviv Institute of Applied and Decorative Arts (1965), he has experimented with styles such as postimpressionism and surrealism (eg, his paintings *Yellow Trees* [1961] and *Pale Blue Spring* [1971]). In his later compositions he has used images and colors as symbols. He has also produced decorative plates and reliefs (eg, *King Danylo* [1967]).

Markovych, Yakiv [Markovyč, Jakiv], b 17 October 1696 in Pryluka, d 20 November 1770 in Svarkove, Hlukhiv company, Nizhen regiment. Cossack *starshyna* in the Hetman state and writer; son of A. *Markovych. He studied at the Kievan Mohyla Academy, where he was a prize pupil of T. Prokopovych. He became a Cossack fellow of the standard in 1721 and served as acting colonel of Lubni regiment (1723–5) and general judge (1739) and general treasurer (1740, 1762) of the Hetman state. In 1714 he married Olena, the daughter of Hetman P. Polubotok. One of the more learned men of his time, he wrote prose and religious verse, composed valuable genealogical notes, and translated Latin writings. His most outstanding work was his diary of the years 1717–67, which contains a wealth of information about political, socioeconomic, cultural, and daily life in the Hetmanate. Until the 1930s the manuscript was preserved in Kiev in the library of the Historical Museum (vols 2–10) and the State Public Library (vol 1) of the Ukrainian SSR. An abridged version of the diary was published in Russian translation in 2 vols in 1859 by O. Markovych, Yakiv's grandson. A fuller, though incomplete, version for the years 1717–34, edited by O. Lazarevsky, was published in the original language as appendixes to *Kievskaiia starina* from April

1891 to December 1896 and reprinted in 3 vols (1893, 1895, 1897). A similar version of the diary for the years 1735–40 was edited by V. Modzalevsky and published by the Archeographic Commission of the Shevchenko Scientific Society as vol 22 of *Zherela do istorii Ukraïny-Rusy* (1913).

A. Zhukovsky

Markovych, Yakiv [Markovyč, Jakiv], b 27 October 1776 in Pyriatyn company, Lubni regiment, d 1804. Nobleman and historian; brother of O. *Markovych. He studied at the Hlukhiv boarding school and at Moscow University's boarding school. In 1795 he traveled throughout Left-Bank Ukraine, researching its geography and economy. From 1797 he was an interpreter in the College of Foreign Affairs in St Petersburg, where he was part of O. *Bezborodko and D. *Troshchynsky's coterie. On the basis of historical monuments and documents (including those provided by A. *Chepa) and of Slavic, French, Latin, and German sources, he wrote and published in St Petersburg the first part of his pioneering *Zapiski o Malorossii, eia zhyteliakh i proizvedeniakh* (Notes on Little Russia, Its Inhabitants and Works, 1798). Written with obvious love for his native land, it provides information about the physical geography, folkways, folklore (especially songs), political structure, society, and economy of the 18th-century Hetman state, and about the Ukrainian language, ancient and medieval Ukrainian history and mythology (to the middle of the 11th century), and the origin of the Slavs and Rus'. The completion of Markovych's work, which made a significant impact on his contemporaries, was interrupted by his suicide. His archive has not been preserved.

Vasyl Markus

Markus, Vasyl [Markus', Vasył'], b 27 December 1922 in Bedevlia, Máramúres county, Transcarpathia. Political scientist and activist; full member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences in the US. After studying Slavics at the Ukrainian Free University (PHD, 1948) and law at the University of Paris (PHD, 1956), he taught Russian at Notre Dame University (1959–62) and political science at Loyola University in Chicago (1962–88). He collaborated for many years on *Entsyklopedia Ukraïnoznavstva* (Encyclopedia of Ukraine, 10 vols, 1955–84) and was an editor of *Ukraine: A Concise Encyclopedia* (vol 2, 1971) and an associate editor of the first two volumes of *Encyclopedia of Ukraine* (1984–8). He heads the encyclopedia of the Ukrainian diaspora project and is active in the Ukrainian Catholic church and other Ukrainian organizations. Besides numerous articles

on current and historical themes he has written the monographs *L'incorporation de l'Ukraine subcarpathique à l'Ukraine soviétique, 1944-5* (1956) and *L'Ukraine soviétique dans les relations internationales et son statut en droit international, 1918-1923* (1959).

Markush, Oleksander [Markuš], b 2 November 1891 in Khust, Transcarpathia, d 27 October 1971 in Khust. Writer and pedagogue. From 1910 to 1939 he worked as an elementary school teacher and then as a school inspector. He was editor of the children's magazine *Nash ridnyi krai* (1922-38) and published many readers and textbooks. His short stories were published in several collections: *Vymiryaly zemliu* (They Surveyed the Land, 1925), *Irynu zasvataly* (They Got Iryna Engaged, 1941), *Korovku hnaly* (They Drove the Little Cow, 1943), *Maramors'ki opovidannia* (Maramureş Stories, 1956), and *Lyst materi* (A Letter to Mother, 1963). He also wrote two novels, *Iulyna* (1942) and *Mriinyky* (Daydreamers, 1961).

Marl. A term applied to a great variety of sediments and rocks which contain an earthy mixture of fine-grained minerals. They normally consist of calcium carbonate (calcite) or magnesium carbonate and clayey minerals, and they are commonly used as building material or (in the case of marls with a high carbonate content) in the manufacture of cement. In Ukraine marls occur among sediments from various ages (most frequently from the Upper Cretaceous period) in Volhynia, the Chernihiv region, the Donetske Basin, the Crimea, the Dniester River Basin, and other regions. Marl deposits near Amvroziivka and Karpivka, in Donetske oblast (one of the largest marl deposits in the world), and near Novorosiiske, in Krasnodar krai, have significant industrial importance, particularly in the cement industry.

Marmarosh region. See Maramureş region.

Marples, David, b 17 October 1952 in Chesterfield, England. Specialist in Soviet Ukrainian energy policy and economics. A graduate of the University of Alberta (1980) and the University of Sheffield (PH D, 1985), he has worked as a research analyst for Radio Liberty in Munich, as a publications editor and research associate of the Canadian Institute of Ukrainian Studies, and as a professor (since 1991) in the department of history at the University of Alberta. He has written *Chernobyl and Nuclear Power in the USSR* (1986), *The Social Impact of the Chernobyl Disaster* (1988), and *Ukraine under Perestroika: Ecology, Economics, and the Workers' Revolt* (1991).

Marriage. The state in which a man and a woman are formally united for the purpose of living together (usually in order to procreate), and by virtue of which they establish legal rights and obligations with respect to each other. In Ukraine, as everywhere in the former USSR, a marriage was considered valid only if it was registered with the *ZAHS, the civil registry. The legal age for marriage in Ukraine is 18 for men and 17 for women. Entrance into marriage is marked by the acceptance of certain moral, social, and economic obligations. Though the rights and obligations of both spouses are not as clearly defined as they are in the marriage contract in Western countries, full equality in rights and obligations (eg, equality in the own-

ership of property and equal rights in the raising and support of children) is presumed. The principle of the economic equality of spouses becomes apparent during divorce, when the division of property is carried out according to that principle irrespective of actual income. Spouses also have an equal responsibility to render each other and their children financial assistance.

Marriage between close relatives is not permitted, nor is marriage to a mentally ill person who has been declared legally incompetent or to a person already married. In the 1940s and 1950s, marriage to a foreigner was forbidden in the USSR, and such marriages are still hindered by a range of administrative formalities (eg, the need to obtain the necessary certificates and visas). The prevention of a marriage on the grounds of religion, nationality, or race is legally forbidden. Likewise, it is forbidden for parents or the civil authorities to force or prevent a marriage.

Before the Revolution of 1917 civil marriages did not exist. Marriages had to be concluded in religious institutions, usually in a church with a service conducted by a priest. Although divorce was legal, it occurred rarely because it was virtually impermissible in the eyes of the ecclesiastical tribunal that decided such matters. The parents of the bride and groom played a significant role in the conclusion of the marriage by giving their blessing (that is, permitting the marriage) and by taking part in all discussions concerning the household, such as of the bride's dowry and groom's property. As a rule the wife moved into the home of the husband, where she was subservient not only to the husband's parents but to all his relatives.

The Central Rada passed legislation allowing civil marriage and divorce. After the establishment of Soviet rule church weddings were abolished, government registration of marriages was introduced, and divorce was made relatively easy. The first Soviet decrees on marriage in Ukraine were issued on 20 February 1919; they recognized common-law marriages as well as registered marriages. Those laws, together with the quick destruction of the traditions of the old society, resulted in a significant change in the character of marriage, especially in the cities, and also in a noticeable weakening of the marriage bond. Demographic changes in the structure of the population, the increased number of urban dwellers, and the waning influence of religion all gave rise to a decrease in the number of marriages. But the decrease was offset by factors conducive to the growth of the marriage rate, such as the simplification of the procedure for marrying and the increasing economic independence of young people. Thus, whereas between 1911 and 1914 there were 7.9 marriages per 1,000 inhabitants in Ukraine, by 1926 the figure had grown to 12.1 (see table 1). At the same time the length of married life increased as a result of the decrease in mortality. In the 1920s a Ukrainian woman who had reached the age of 15 would spend 29 years, or 58 percent of her remaining life, married. In the 1920s, changes in the marriage law and changing conceptions of morality also resulted in a rapid increase in the number of divorces.

Because of the growth in the number of divorces and the large numbers of male deaths during the terror of the 1930s and the Second World War, the length of time women remained married had decreased to 25.6 years by 1958-9. Thereafter the figure increased gradually, and it had reached 31.3 years by 1979.

TABLE 1
Marriages and divorces in Ukraine (per 1,000 inhabitants), 1886–95 to 1990

Year	Marriages	Divorces
1886–1895	9.0	–
1896–1910	8.5	–
1911–1914	7.9	–
1926	12.1	1.9
1940	7.3	0.9
1950	11.7	0.3
1960	10.7	1.2
1970	9.8	2.9
1980	9.3	3.6
1990	9.3	3.7

In the mid-1930s the Soviet regime took measures to strengthen the stability of the family. The family was assigned an increasingly critical role in sustaining new patterns of authority, maintaining high birthrates, and maximizing the productivity of the labor force by accommodating itself to female employment. While working outside the home, however, wives were still expected to provide a full range of domestic services. The intensification of the state's demands on the family was accompanied by greater state regulation. The state forbade *abortion and made *divorce more difficult to obtain by introducing court proceedings. In 1944 common-law marriage was invalidated.

During the 1960s, limitations on divorce were gradually relaxed, and a fairly rapid rise in the divorce rate ensued. At the same time, as in the West, the age at which people first married increased, to an average of 24 for men and 22 for women. The number of people married, divorced, or widowed has also increased (see table 2), as has the number of births to young parents and of illegitimate births. Premarital relations have increasingly become the norm, and the three-generation patriarchal family has been replaced by the nuclear family.

The integration of Ukraine into the USSR and the consequent large-scale in-migration of Russians have resulted in a rapid rise in ethnic intermarriage, which Soviet authorities encouraged as a way of promoting Russification and hailed as a virtual act of internationalism. Whereas in 1927 ethnically mixed marriages constituted only 6.5 percent of all marriages in Ukraine, in 1979 they constituted 21.9 percent. In 1979, 30 percent of all urban and 9.3 percent of all rural marriages were between members of dif-

TABLE 2
Ukraine's population aged 16 and over by marital state (per 1,000 inhabitants), 1926–89

Year	Married	Never married	Widowed	Divorced
<i>Males</i>				
1926	678	276	41	5
1979	744	201	24	29
1989	743	177	30	46
<i>Females</i>				
1926	613	220	157	10
1979	588	138	205	67
1989	605	119	193	79

ferent nationalities. In 1979, 63 percent of all marriages were between partners both of whom listed Ukrainian as their nationality.

Members of MARS. From left: Borys Antonenko-Davydovych, Hryhorii Kosynka, Mariia Halych, Yevhen Pluzhynyk, Valerian Pidmohylny, Teodosii Osmachka

MARS (Maisternia revoliutsiinoho slova [Workshop of the Revolutionary Word]). A literary organization established in 1924 in Kiev under the name Lanka; it adopted its new name in 1926. It included a group of talented writers of varying literary predilections who were united by their desire to be independent of official politics in the area of literature. They included B. Antonenko-Davydovych, M. Ivchenko, Ya. Kachura, H. Kosynka, T. Osmachka, V. Pidmohylny, Ye. Pluzhnyk, Ya. Savchenko, and B. Teneta. They were all also members of the editorial board of **Zhyttia i revoliutsiia*. Together with the *Neoclassicists, for a long time they continued their opposition to the politicization of literature. They were forced to disband in 1929. Most of the members were executed during the Stalinist terror; Osmachka managed to emigrate at the end of the Second World War, and B. Antonenko-Davydovych was persecuted until his death in Kiev in 1984. In the late 1980s all of the members were rehabilitated, and their works began to be republished.

Marshal (*marshalok*). The title of several high state officials in the Polish Commonwealth and the Grand Duchy of Lithuania. As early as the 13th century, the royal (*koronnyi*) marshal was the highest minister of the king. His deputy was called court (*nadvornyi*) marshal. From Poland the term spread to the Lithuanian court. The marshal of the

land (*marshalok zemskyyi*) was the highest official of the grand duke's court. He was in charge of etiquette at the court and in the diet. In the duke's absence he represented the ruler in the Council of Lords. He was assisted by the court (*dvornyyi*) marshal, who headed the court servitors. The *hospodarski* marshals were lower government officials who also had some judicial responsibilities. In Russian-ruled Ukraine in the late 18th (after 1785) and in the 19th century, marshals were presidents of elected gubernial or county noble assemblies. They represented the local nobility before the tsar and Senate, and carried out some administrative functions at the local level.

Marshal-commissioner court (*marshalkivsko-komisarskyi sud*). An appellate court in Left-Bank Ukraine that heard appeals of decisions of the **pidkomorski* courts. The courts evolved from the marshal and commissioner courts, which were central state institutions in the Grand Duchy of Lithuania. Their decisions could be appealed directly to the grand duke. Marshal-commissioner courts consisted of the county marshal of the nobility, who presided over the court, and commissioners appointed by the hetman or Little Russian Collegium. According to the Lithuanian Statute, their decisions could not be contested. From 1801 their rulings could be appealed to the General Little Russian Court or the Russian Senate, if the commissioners were appointed without the consent of both parties. The marshal-commissioner courts were abolished in 1861.

Marshall, Joseph, b and d ? 18th-century English traveler and writer. His *Travels through Holland, Flanders, Germany, Denmark, Sweden, Lapland, Russia, the Ukraine, and Poland in the Years 1768, 1769, and 1770* (3 vols, 1772; repr edn of vol 3 as *Travels through Germany, Russia, and Poland in the Years 1769 and 1770, 1771*) provided an account of Ukraine as a particularly rich and fertile region, with a high degree of agricultural productivity.

Marshes. See Wetlands.

Apolinarii Marshynsky

Ivan Martiuk

Marshynsky, Apolinarii [Maršyns'kyj, Apolinarij], b 1865, d 30 July 1929 in Prague. Civic leader, financial expert, and educator. A civil servant in the Russian finance ministry, he worked in St Petersburg, Latvia, and Estonia, where he organized a Ukrainian hromada in Dorpat. In

1917 he was director of the Department of Financial Affairs in the General Secretariat of the Central Rada, and in 1919, UNR deputy minister of finance. From 1924 he lectured at the Ukrainian Pedagogical Institute in Prague. His recollections about the 1880s were published in the 1923 *Dnipro* calendar.

Martel, Antoine, b 2 February 1899 in Baume-les-Dames, Doubs, d 12 October 1931 in Besançon, France. French Slavist. A graduate of the School of Oriental Studies in Paris (1924), from 1927 he taught Russian and Polish languages and literatures at the University of Lille and published a chronicle of Ukrainian publications in *Revue des études slaves*. His posthumously published book, *La Langue polonaise dans le Pays des Ruthènes* (1939), is one of the most important surveys of the history of 16th- and 17th-century literary Ukrainian.

Martel, René, b 23 August 1893 in Baume-les-Dames, Doubs, France, d 6 January 1976 in Paris. French historian and publicist. He taught history in lycées in Sens, Chartres, and Paris (Montaigne) and was a professor at Ljubljana University (1926–9). He cotranslated (with S. Borschak) T. Shevchenko's *Ivan Hus* into French (1930) and wrote *Vie de Mazeppa* (with E. Borschak, 1931; Ukrainian trans 1933), *La question d'Ukraine* (1927), *Les Blancs Russes* (1929), *La France et la Pologne: Réalités de l'Est Européen* (1931, using Ukrainian documents), *La Ruthénie Subcarpathique* (1935), *Le problème de l'Ukraine* (1938), and 'La politique allemande en Ukraine' (in *L'Allemagne contemporaine*, 1939). He also contributed articles to *Le Monde slave* on L. Léger (1929), D. Bahalii (1932), Soviet nationality policy in Ukraine (1934), Ukrainian proverbs (1935), Transcarpathia in the Middle Ages (1936), Ukraine after the Battle of Poltava (1937), and E. Borschak's book on Napoleon and Ukraine (1938).

Martiuk, Ivan [Martjuk], b 19 September 1889 in Skala, Borshchiv county, Galicia, d 26 April 1972 in Świdnica, Wrocław county, Poland. The chief organizer of Sich societies in the Borshchiv region. During the First World War he served in the Austrian army and the Ukrainian Galician Army. After returning to civilian life he was director of the County Union of Co-operatives in Kopychyntsi until 1930 and then a founder and director of **Tsentrosoiuz* in Lviv. As the union's chief manager of farm-product export he visited various European countries and served as vice-chairman of the State Exporting Board. His *Tsentrosoiuz: Soiuz kooperatyvnykh soiuziv u L'vovi v rokakh 1924–1944* (*Tsentrosoiuz: The Union of Co-operative Unions in Lviv in 1924–1944*, 1973) is a valuable historical account based on his recollections.

Marton, Ishtvan, b 24 November 1923 in Sofiia, Bereg county, Transcarpathia. Ukrainian composer of Hungarian descent. He graduated from the Uzhhorod Music School (1949) and subsequently became a lecturer and concertmaster there. From 1975 he was musical director of the Hungarian folk ensemble of the Transcarpathian Philharmonic Orchestra. His works include the musical comedy *Konvalii tsvitut' dlia tebe* (*The Lilies of the Valley Bloom for You*, 1963), the vocal suite *Wreath of Immortality* (1963), pieces for choir, and arrangements of Ukrainian and Hungarian folk songs.

Martos. A family of Cossack *starshyna* in the Poltava region. Its Lubni branch originated with the Lohkvytsia Cossack Vasyl in the 17th century. His sons were Martyn (d 1708), a captain of Lohkvytsia company (1693–8) and a judge of Lubni regiment (1698–1706), and Pavlo (d 1745), a captain of Lohkvytsia company (1699–1708, 1710–20) and quartermaster (1712–37) and acting colonel (1728–30) of Lubni regiment, who was imprisoned in 1708–9 for siding with Hetman I. Mazepa against Peter I. Later an Andrii Martos was osaul of Lubni regiment (1772–81), and Petro Martos (b 1809), a noble with estates in Lohkvytsia and Lubni counties, paid for the publication of T. *Shevchenko's *Kobzar* in 1840 (Shevchenko dedicated his poem 'Tarasova nich' [Taras's Night] to him). The Pryluka branch of the Martos family originated with Petro, an otaman of Ichnia company (1756). His son was the sculptor Ivan *Martos, and his grandson was the historian Oleksii *Martos. Other members of the branch included the government official Ivan *Martos and the political leader Borys *Martos.

Borys Martos

Ivan Martos: monument for Hetman Kyrylo Rozumovky's grave in Baturyn (1803–5)

Martos, Borys, b 1 June 1879 in Horodyshche, Kremenchuk county, Poltava gubernia, d 19 September 1977 in Union, New Jersey. Political leader, co-operative organizer, and educator; full member of the Shevchenko Scientific Society from 1948. As a student at Kharkiv University he was active in the clandestine Ukrainian student hromada and collaborated with the Revolutionary Ukrainian party. For these activities he was arrested three times. In 1905 he joined the Ukrainian Social Democratic Workers' party and became involved in the revolutionary movement in Kharkiv and Liubotyn. He was not permitted to teach after graduating in 1908, so he worked as a co-operative instructor in Volhynia (1910–11), a financial director of the Black Sea–Kuban Railway Board, a director of the Kuban Co-operative Bank, and a co-operative inspector of the Poltava gubernia zemstvo (1913–17). During the revolutionary period he was a member of the Central Rada and the Little Rada and served on its General Secretariat, first

as secretary and then as deputy secretary of agrarian affairs. Under the Hetman government he retired from political life and devoted himself to the co-operative movement: he chaired the executive of the Central Ukrainian Co-operative Committee and the board of directors of Dniprosiuz, lectured at the Kiev Commercial Institute, and organized the Co-operative Institute in Kiev. Under the UNR Directory he served in V. Chekhivsky's cabinet as minister of food supplies and then as premier and finance minister (April–August 1919). In 1920 he emigrated, and eventually he settled in Prague, where he directed the co-operatives office of the Ukrainian Civic Committee in Czechoslovakia and founded the Society of Ukrainian Co-operative Leaders. He was one of the founders of and a professor (from 1924) at the Ukrainian Husbandry Academy and the director of the *Ukrainian Technical and Husbandry Institute (1936–8). He was elected full member of the Institut pour les études cooperatives. After the Second World War he moved to Munich, where he was founder and rector of the Ukrainian Higher School of Economics (1945–9). A senior associate of the *Institute for the Study of the USSR, he served as president (1954–6), vice-president (1956–7), and secretary (1957–8) of its Learned Council. In 1958 he emigrated to the United States, where he lectured for a time at the Ukrainian Technical Institute in New York. Among his numerous works on co-operation and contemporary history are *Teoriia kooperatsii* (The Theory of Co-operation, 1924), *Kooperatyvna reviziia* (Co-operative Auditing, 1927), and *Hroshi ukrains'koi derzhavy* (The Currency of the Ukrainian State, 1972, coauthor). A collection of Martos's articles and reminiscences about the Ukrainian national movement was published by the Shevchenko Scientific Society in 1989.

Martos, Ivan, b ca 1752–4 in Ichnia, Pryluka regiment, d 17 April 1835 in St Petersburg. Classicist; sculptor; father of O. *Martos. After studying at the St Petersburg Academy of Arts (1764–73) and in Rome (1774–9) he taught at the academy (1779–1835) and served as its rector (1814–35). He created numerous sculptures in Russia and Ukraine, including the burial monuments of Hetman K. Rozumovsky in Baturyn (1803–5) and Count P. Rumiantsev at the Kievan Cave Monastery (1797–1805) and statues of Count A. de Richelieu in Odessa (1823–8), Emperor Alexander I in Tahanrih (1828–31), and Prince G. Potemkin in Kherson (1829–36). His works are noted for their restrained, lucid form and philosophical depth.

Martos, Ivan, b 1760 in Hlukhiv, Nizhen regiment, d 4 April 1831. Government official. He studied at the Kievan Mohyla Academy and served as Hetman K. Rozumovsky's cabinet secretary. After joining the Russian imperial civil service in 1778, he held posts in Ukraine, Belarus, and St Petersburg, including those of secretary of the Senate Department from 1802 and director of a department in the Ministry of Justice in 1815–16. An active Freemason and a friend of V. *Kapnist, he wrote a study on bath construction as described by Nestor the Chronicler (1809). O. Lazarevsky published Martos's correspondence in *Kievskaiia starina* (1896, nos 6, 10–11; 1897, nos 7–8; 1898, nos 6–8) and separately (1898), and his biography of Martos appeared in that journal (1895, no. 10).

Martos, Oleksii, b 12 December 1790 in St Petersburg, d 25 August 1842. Historian; son of the sculptor I. *Martos.

A graduate of the Engineering Corps in St Petersburg (1806), he worked as a military engineer in Kiev and took part in the Russo-Turkish War of 1806–12 and the War of 1812. From 1821 he worked as a civil servant in various places in Russia and Siberia. Martos wrote a five-volume history of Little Russia to the end of the Hetman state. Although the work was esteemed by scholars, its publication was not allowed by the tsarist censors, and the manuscript subsequently was lost. Only two chapters from vol 3 – accounts of the Battle of Berestechko and T. Khmelnytsky's marriage and death – were published, in *Severnii arkhiv* (1822, nos 13–14; 1823, nos 6, 12–13). Martos's memoirs and diary of the years 1806–16 were published in *Russkii arkhiv* (1893, nos 7–8). O. Lazarevsky's biography of Martos appeared in *Kievskaia starina* (1895, no. 2).

Les Martovych

Oleksander Martynenko

Martovych, Les [Martovyč, Les'], b 12 February 1871 in Torhovytsia, Horodenka county, Galicia, d 11 January 1916 in Poharysko, Rava Ruska county, Galicia. Writer, lawyer, and community activist. He completed his legal studies by correspondence at Lviv University in 1909 and worked as a clerk and legal assistant in various Galician towns. From 1898 he lived in Lviv and edited the radical newspaper *Hromads'kyi holos*. His first published work appeared in 1889, a story entitled 'Nechytal'nyk' (The Illiterate). He later published collections of stories, including *Nechytal'nyk* (1900), *Khytryi Pan'ko* (Clever Panko, 1903), *Strybozhnyi darunok* (Gift from Stryboh, 1905), and the novella *Zabobon* (Superstition, 1917). He depicted the daily life of the Galician peasantry and small-town intelligentsia, particularly that of priests and teachers of the late 19th and early 20th centuries. He wrote in the realist style, with touches of impressionism and with occasional sharp satire directed at the rural bourgeoisie and the bureaucracy. He contributed to *Dilo* and other newspapers and journals. His works were translated many times, and a three-volume compilation of his works, edited by Yu. Hamorak, was published in 1943. Other editions of selected works have appeared in Ukraine since 1949.

Martych, Yukhym [Martyč, Juxym] (pseud of Mordukh Finkelshtain), b 28 June 1910 in Kiev, d 27 July 1981 in Kiev. Writer and theater director. He wrote biographical novels, including *Natalia Uzhvii* (1939), *Oleksander Bohomolets* (1951), *Polina Kumanchenko* (1964), *Povist' pro narodno-*

ho artysta (Tale about a Folk Artist, 1954), and *Zustrichi bez proshchan'* (Meetings without Farewells, 1970). He also wrote the novel *L'otnyi den'* (Flight Day, 1947), the essay in literary theory *Put' povely* (They Led the Way, 1941), and the autobiography *Pro druziv i pro sebe* (About My Friends and about Myself, 1960).

Martynenko, Ivan, b 21 October 1924 in Khrestyshche, Iziium county, Kharkiv gubernia. Agricultural mechanization specialist; member of the All-Union Academy of Agricultural Sciences since 1970. After graduating from the Moscow Institute of Agricultural Mechanization and Electrification (1955) he worked at the Ukrainian Scientific Research Institute of Agricultural Mechanization and Electrification (1957–62) and then at the Ukrainian Agricultural Academy. His research has dealt primarily with farm mechanization.

Martynenko, Oleksander, b 1895 in the Poltava region, d 24 June 1983 in Minneapolis. Opera singer (dramatic baritone). After concluding his studies at the Kiev Conservatory in 1925, he performed in opera theaters in Kharkiv, Odessa, Donetske, and Kiev and in musical drama theaters in Luhanske and Vinnytsia. He fled to Western Europe in 1943 and emigrated to the United States in 1950. His major roles were the title role in V. Kostenko's *Karmeliuk*, Telramund in R. Wagner's *Lohengrin*, Amonasro in G. Verdi's *Aida*, and Scarpia in G. Puccini's *Tosca*.

Martynenko, Volodymyr, b 6 October 1923 in Horbuliv, now in Cherniakhiv raion, Zhytomyr oblast, d 18 April 1988 in Kiev. Soviet diplomat. After serving in the Soviet Army (1941–6), he graduated from the Faculty of International Relations at Kiev University in 1951 and worked in the CC CPU system and the Ukraina Society (1951–61). Upon completing his graduate studies at the CC CPSU Academy of Social Sciences (1964) he served as first secretary of the USSR embassy in Canada (1965–8), deputy minister of foreign affairs for Ukraine (1968–73), and Ukraine's permanent representative to the UN (1973–9). In November 1980 he was appointed minister of foreign affairs of the Ukrainian SSR, and in 1981 he was elected a member of the CC CPU and of Ukraine's Supreme Soviet. His works deal with the history of Canada, the activities of the UN, and Ukraine's role in international relations.

Martynets, Hnat [Marty nec'], b 25 June 1882 in Kalush, Galicia, d 9 December 1968 in Munich. Pedagogue and

Hnat Martynets

community leader. In 1915–17 he was the Austro-Hungarian military mayor of Volodymyr-Volynskyi, where he helped organize the Ukrainian school system in Volhynia. He served as commissioner of the Western Ukrainian National Republic in Sniatyn county (1918–19). From 1924 Martynets lived in Sambir, where he was a cultural and educational activist and director (1941–4) of the Sambir Teachers' Seminary. From 1944 he lived in Germany and was active in many Ukrainian community activities, especially the Ukrainian Christian Movement, which he headed from 1954 until his death.

Martynets, Mykhailo [Martyneč', Myxajlo], b 1859 in the Boiko region, d 8 June 1919 near Nadvirna, Galicia. Forestry engineer. A graduate of Vienna University, he worked in Sambir as head of a ministry department for the regulation of mountain streams in Galicia (1900–14) and wrote several works on the subject. During the First World War he directed the head office for reconstruction in Lviv (1916–18), and in December 1918 he accepted the portfolio of agrarian affairs in the State Secretariat of the Western Ukrainian National Republic. During his tenure as secretary he helped draft the land reform law. As the Ukrainian Galician Army was retreating, he and his co-workers were captured by Polish troops and executed without trial.

Volodymyr Martynets

Martynets, Volodymyr [Martyneč'], b 15 July 1899 in Lviv, d 10 December 1960 in Winnipeg. Political leader and publicist. He served in the Ukrainian Sich Riflemen and the Sich Riflemen and was a gubernial official in the Polisia, Podlachia, and Kholm regions under the Hetman government. After spending seven months in Polish POW camps he resumed his studies in Lviv and became active in the student movement. He was elected secretary of the Academic Hromada, treasurer of the Provincial Student Council, and a trustee of the Lviv (Underground) Ukrainian University and Higher Polytechnical School, which he had helped organize. In 1923 he moved to Prague, where he studied at the Higher Commercial School and played an important role in student organizations, as vice-president of the Central Union of Ukrainian Students (1926–7) and as editor of *Natsional'na dumka* (the organ of the Group of Ukrainian National Youth) and of *Nash shliakh* (the organ of the Ukrainian Student Council). After being summoned by Ye. Konovalts to Berlin in 1927, he became a member of the Supreme Command of the *Ukrainian

Military Organization (1927–31) and chief editor of **Surma* (1927–33) and **Rozbudova natsii* (1928–34). At the beginning of 1929 he was one of the key organizers and participants in the Congress of Ukrainian Nationalists, which gave birth to the *Organization of Ukrainian Nationalists (OUN). In 1934–40 he lived in Paris, where he edited **Ukrains'ke slovo*. Upon returning to Lviv Martynets served officially as director of the Literary-Artistic Club and president of the Association of Ukrainian Journalists (1941–4), and secretly as leader of the OUN (Melnyk faction) in Western Ukraine (1941–2). In 1944 he was imprisoned in the Brätz concentration camp by the Germans. After emigrating to Canada in 1949, he became an editor of *Novyi shliakh* in Winnipeg and a member of the presidium of the Ukrainian Canadian Committee. He wrote numerous articles and over a dozen books, of which the most important are *Za zuby i pazuri natsii* (For the Nation's Teeth and Claws, 1937), *Ukrains'ke pidpillia: Vid uvo do OUN ...* (The Ukrainian Underground: From UVO to OUN, 1949), and *Ideolohiia orhanizovanoho i t. zv. volevoho natsionalizmu* (The Ideology of Organized and So-Called Voluntarist Nationalism, 1954).

Bishop Yosyp Martynets

Bishop Ivan Martyniak

Martynets, Yosyp [Martyneč', Josyp] (Martenetz, José), b 7 February 1903 in Lviv, d 23 February 1989 in Curitiba, Brazil. Basilian priest and Ukrainian Catholic bishop. After moving to Brazil at an early age with his parents, he studied in Rome until his ordination in 1928 and then returned to Brazil to serve with the Basilian order. From 1953 he worked in the Basilian curia in Rome, headed a commission for the publication of the Bible in Ukrainian, and was rector of St Josaphat's Ukrainian Pontifical College. Martynets was consecrated auxiliary bishop to Cardinal J. Câmara for Eastern rite Catholics in 1958. In 1962 he was named exarch, and in 1971 he was appointed bishop of the Ukrainian eparchy of Brazil. He retired in 1978.

Martyniak, Ivan [Martynjak], b 20 June 1939 in Spas, Kaminka Strumilova county, Galicia. Ukrainian Catholic bishop. A graduate of the Warsaw Theological Seminary, he was ordained in 1964. He served as a parish priest among Ukrainians in the Legnica and Szprotawa regions

before being appointed vicar-general for Ukrainian Catholics in Poland in 1981. In 1989 Martyniak was consecrated as the first Ukrainian Catholic bishop in Poland since the Second World War. Initially an assistant to the Polish cardinal J. Glemp, in 1991 he was appointed bishop of Peremyshl.

Martynivka hoard: unearthed silver adornments

Martynivka hoard. A hoard of Slavic archeological artifacts from the 6th to 7th century found in 1909 in Martynivka, Cherkasy oblast. Fifty-five silver (some gilded) artifacts were uncovered, including clasps, belt ornaments, women's jewelry pieces, and effigy figures of horses and humans. The horse figures were stylized in a Scythian-Sarmatian manner, while those of the humans depicted mustached men wearing long-sleeved shirts and long pants. The collection is now housed in the Historical Museum of Ukraine.

Martynovsky, Volodymyr [Martynovs'kyj], b 22 May 1906 in Moscow, d 2 August 1973 in Odessa. Technical thermodynamics scientist. He graduated from the Odessa Polytechnical Institute (1930) and taught in Odessa and Baku (1933–47). He served as rector of the Odessa Technological Institute of the Refrigeration Industry (1948–73, with interruptions) and led a group of Soviet scientists at the Bombay Technological Institute in India (1956–8). From 1960 to 1964 he was deputy chairman of the Department of Education at UNESCO. His main scientific contributions were in the fields of refrigeration, thermodynamics, and gas cycles.

Martynovych, Porfyrii [Martynovyč, Porfyrij], b 7 March 1856 in Kostiantynivka, Kostiantynohrad county, Poltava gubernia, d 15 December 1933 in Krasnohrad, Kharkiv oblast. Painter and graphic artist. He studied at the St Petersburg Academy of Arts (1873–81) and spent his summer vacations in the Poltava region collecting ethnographic materials and painting or drawing village scenes and portraits of peasants, landlords, stewards, and preceptors. From 1881 he lived in Kostiantynohrad (now Krasnohrad) and traveled throughout the Poltava region with O. *Slastion, drawing and painting landscapes and portraits. He and V. Horlenko compiled a register of historical monuments in the region (1888). Martynovych also drew historical and literary figures (eg, B. Khmelnytsky, I. Mazepa, H. Skovoroda, and H. Kvitka-Osnovianenko) and pictures inspired by I. Kotliarevsky's *Eneida* (Aeneid, 1903), Shevchenko's poems 'Kateryna' and 'Haidamaky', folk songs, and Cossack dumas. His best-known genre

Porfyrii Martynovych:
Self-Portrait (pencil, 1877)

Michael Marunchak

paintings are *Old Women Baking Bread* (1877–80) and *At the Volost Inspector's Office* (1879). His ethnographic notes were published in *Kievskaja starina* in 1904. O. Slastion wrote recollections of Martynovych (1919, 1931), and P. Zholtovsky (1930) and S. Taranushchenko (1958) wrote books about him.

Marunchak, Michael [Marunčak, Myxajlo], b 4 October 1914 in Dalesheva, Horodenka county, Galicia. Community figure and historian. Marunchak studied at the University of Lviv (1936–40), Ukrainian Free University in Prague (PH D, 1941), and University of Manitoba (1955). He was interned by the Germans during the Second World War. After the war he headed the League of Ukrainian Political Prisoners (1947–8), and he left Germany for Canada in 1948. He has been active in the Ukrainian Canadian Committee (now Congress), the Shevchenko Scientific Society (full member since 1961), and the Ukrainian Academy of Arts and Sciences in Canada (president since 1983). Marunchak compiled a considerable private archive of materials related to Ukrainian-Canadian history and started developing a broad scheme about Ukrainian life in Canada. His magnum opus is the two-volume *Istoriia ukraïntsiiv Kanady* (1968, 1974), which appeared in English in a single volume as *The Ukrainian Canadians: A History* (1970; 2nd edn, 1982). His other major Ukrainian-Canadian works include *Studii do istorii ukraïntsiiv Kanady* (Studies in the History of Ukrainians in Canada, 5 vols, 1964–80) and *Biohrafichnyi dovidnyk do istorii ukraïntsiiv Kanady* (A Biographical Guide to the History of Ukrainians in Canada, 1986). Marunchak also wrote *Systema nimetskykh kontsentratsiinykh taboriv i polityka vymyshchuvannia v Ukraïni* (The System of German Concentration Camps and the Politics of Extermination in Ukraine, 1963) and *Ukraïntsi v SSSR poza kordonamy URSR* (Ukrainians in the USSR outside the Borders of the Ukrainian SSR, 1974).

Maruniak, Volodymyr [Marunjak], b 2 November 1913 in Rozhubovychi, Peremyshl county, Galicia. Community figure, journalist, and scholar. A graduate of the Free School of Political Science in Prague (1936), in 1940 he moved from Prague to Berlin, where he served as the cultural-educational and propaganda representative of the *Ukrainian National Alliance and edited its newspaper

**Ukrains'kyi visnyk*. A postwar refugee in Germany, he worked for the Information Section of the Central Representation of the Ukrainian Emigration in Germany (1947–9) and was European secretary of the Ukrainian Canadian Relief Fund (1950–1) and representative of the United Ukrainian American Relief Committee in northwestern West Germany (1954–9). Later he worked as an editor for the newspaper **Ukrains'ke slovo* in Paris (1964–9) and the Radio Liberty Ukrainian broadcast section in Munich (1972–8). Maruniak edited a book about the Ukrainian Gymnasium in Czechoslovakia (1975) and wrote books on the Ukrainian displaced persons in Germany and Austria after the Second World War (1985) and on the émigré leader O. Boikiv (1986).

Marusia Bohuslavka. The main character in a renowned Ukrainian drama of the same name. The heroine is a priest's daughter from Bohuslav who, enslaved by the Turks, renounces her faith and wins her master's trust. On Holy Saturday, when the pasha is away, she frees 700 Cossacks from the dungeon. There is no evidence that Marusia Bohuslavka existed; she is probably a composite of slave girls who had helped captive Cossacks in some way. Marusia Bohuslavka became a common image in Ukrainian literature and the subject of several novels and plays and a ballet.

Archbishop Myroslav
Marusyn

Marusyn, Myroslav, b 26 June 1924 in Kniazhe, Zolochiv county, Galicia. Ukrainian Catholic archbishop; member of the Shevchenko Scientific Society since 1979. He studied theology at the Greek Catholic Theological Academy in Lviv, the Catholic academy in Paderborn, Germany (1944–9), and the Papal Institute for Oriental Studies in Rome (PH D, 1951). He was ordained in 1946 and became secretary and chancellor to Archbishop I. Buchko in Rome in 1949. In 1958 he joined the Liturgical Commission of the Congregation for Eastern Churches, which prepares new editions of liturgical books. In 1963 he became a professor of liturgical studies at the Ukrainian Catholic University. He also served as a priest for parishes in Italy, Switzerland, and Scandinavia, and in 1971 he was made apostolic visitator for Ukrainians in Western Europe. He was consecrated a bishop in 1974, and Pope Paul VI then appointed him deputy head of the commission charged with revising the Eastern canon law. Pope John Paul II made him archbishop on 12 November 1982 and appointed him as secretary of the *Congregation for Eastern Churches. Marusyn has published a history (in German) of the relationship between Lviv and Peremyshl eparchies

and the Vatican (1951), and a number of pamphlets and articles on liturgical, theological, and historical themes.

Marvan, Jiri, b 28 January 1936 in Prague. Linguist, educator, and publicist. He studied at Charles University in Prague (PH D, 1966) and began university teaching in 1966 in Uppsala, Sweden. He later moved to Pennsylvania State University and then Monash University in Sydney, Australia, where he helped to lay the groundwork for a Ukrainian Studies program. His main field of interest is Slavic linguistics.

Marx-Engels-Lenin Institute. See Institute of Party History of the Central Committee of the Communist Party of Ukraine.

Marxism. The set of political, economic, philosophical, and social doctrines developed by K. Marx (1818–83) and F. Engels (1820–95). In Ukraine interest in Marxian ideas appeared as early as the 1870s. The economist M. *Ziber was one of the first interpreters of Marx in the Russian Empire. S. *Podolynsky corresponded with Marx and Engels and attempted to show that the laws of thermodynamics confirmed Marx's theory of surplus labor. In the late 1870s and early 1880s I. *Franko wrote popularizations of Marxist theory and translated portions of *Das Kapital* and Engels's *Anti-Dühring*. In 1875 the first Marxist organization on Ukrainian territory, the *South Russian Union of Workers, was formed in Odessa. Some tendencies in Ukrainian socialism at that time, however, were strongly critical of Marxism. M. *Drahomanov and his disciple M. *Pavlyk criticized Marxism on various grounds. As members of a stateless nation and as anarchists, they opposed the Marxian preference for centralism and the idea of state control of the economy; in particular, they objected to Marx and Engels's call for the restoration of a Polish state within historical boundaries that would include Ukrainian territory. They also felt that Marxism, which identified the urban proletariat as the only revolutionary class in capitalist society, had little to offer a nation whose masses were largely peasant; moreover, Marx and Engels's views of the peasantry as politically and economically backward and on the verge of extinction found few adherents among Ukrainians. Drahomanov, Pavlyk, and, later, Franko developed *radicalism as an alternative to Marxian socialism.

Marx and Engels's views on Ukraine were shaped in relation to their views on Russia and particularly Poland. Both placed great hopes in a Polish revolution against Russia, which they considered the greatest menace to European democracy and the future of socialism. Because of their pro-Polish attitudes they often ignored the fact that the Polish revolutionaries were landowning gentry, and denied the existence of a separate Ukrainian nation. Engels in particular, during the *Revolution of 1848–9, classified Ukrainians among the 'nonhistoric' peoples of East Central Europe who were counterrevolutionary by nature and doomed to extinction. By the 1870s, however, Marx and Engels began to hope for a revolution within Russia itself and consequently became more critical of Polish aspirations to Ukrainian territory.

By the beginning of the 20th century Marxism and Marxist political parties had become a serious force throughout the Russian and Austro-Hungarian empires,

including their Ukrainian-inhabited territories. In Galicia in the 1890s the dissident radicals V. *Budzynovsky and Yu. *Bachynsky used a Marxist framework to argue that Ukraine was essentially a colony under imperialist rule and needed to become an independent state. Bachynsky and other dissidents left the Ukrainian Radical party in 1899 to form the avowedly Marxist *Ukrainian Social Democratic party. The latter party's leading theoretician, V. *Levytsky, devoted several works to the Marxist interpretation of the nationality question. In the Russian Empire the Revolutionary Ukrainian party also split in 1904–5 and gave birth to the Marxist *Spilka and *Ukrainian Social Democratic Workers' party. A leader of the latter party, L. *Yurkevych, wrote an important critique of V. Lenin's position on the nationality question with particular reference to the Ukrainian question. The economist M. *Tuhan-Baranovsky was a leading exponent of legal Marxism in the 1890s and wrote a series of revisionist interpretations of Marxist economic theory. In general, prior to 1917, Ukrainian Marxists and Marxist parties inclined to the reformist rather than to the revolutionary wing of Marxism, although L. Yurkevych took a highly radical stand against participation in the First World War.

In Soviet Ukraine the Marxist CP(B)U established its monopoly in political life, and *Marxism-Leninism became the official ideology. Marxist studies were concentrated at the *Ukrainian Institute of Marxism-Leninism (UIML). Some intellectual independence and debate were tolerated until the end of the 1920s, and then a rigid vulgarized version of Marxism-Leninism was imposed by J. Stalin. Most Ukrainian Marxists who had been active in the 1920s were repressed. In 1931 the UIML was accused of harboring national deviationists and was broken up into an association of autonomous institutions, the *All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes (VUAMLIN), which was dissolved in 1937–8 and replaced in 1939 by the Ukrainian branch of the Institute of Marx-Engels-Lenin of the CC of the All-Union Communist Party (Bolshevik).

In Western Ukraine Marxism enjoyed some prestige in the 1920s thanks to its association with *Sovietophilism and the nationally conscious *Communist Party of Western Ukraine (KPZU). In the 1930s the expulsion of the KPZU's leaders for nationalism, the man-made famine of 1932–3, and the terror in Soviet Ukraine ruled out any attraction Marxism might have had for most Western Ukrainians.

In Soviet Ukraine since the Second World War, Marxism has remained largely an instrument of Party policy. Members of the dissident movement, such as I. Dziuba and L. Pliushch, have used Marxism as a tool of critical analysis. M. Rudenko wrote a critique of Marx's economic theory from a physiocratic standpoint. Some Ukrainian scholars outside Ukraine have contributed to our understanding of Marxism. R. *Rozdolsky, a founder of the KPZU, achieved international recognition for his interpretation of Marx's economic thought. V. Holubnychy, B. Levytsky, and I. Maistrenko (all associated with the left wing of the *Ukrainian Revolutionary Democratic party and its newspaper *Vpered*, 1945–59) as well as J.-P. Himka and B. Krawchenko have been influenced by Marxism or have studied it sympathetically.

Marxism-Leninism. The official ideology of the CPSU and the USSR. Its advocates have claimed that it is not merely a scientific description of nature, society, and knowledge, but also a practical means for their transformation. The name implies that this ideology is a synthesis of *Marxism and *Leninism. Its basic ontological and epistemological doctrines were, however, elaborated by F. Engels. Marxism-Leninism is usually divided into three parts: (1) a philosophical theory that encompasses dialectical materialism and historical materialism, (2) Marxian economic theory, and (3) a sociopolitical theory known as scientific communism.

Dialectical materialism consists of an ontology that defines matter, the principles and categories of reality, and the three laws of dialectic; an epistemology that deals with the relation of mind and being; and the dialectic method, which treats laws and categories of the dialectic as normative rules of thought. Historical materialism is claimed to be the application of dialectical materialism to history. As a philosophy of history it assumes history to be law-governed, distinguishes the determining factors (base) from the determined factors (superstructure) in social life, and describes the five stages of history and the laws of transition between them. Marxian economic theory deals mostly with the nature of capitalism and its inevitable self-destruction. Scientific communism consists of the Party's pronouncements on the gradual evolution of Soviet society toward communism.

In the first decade of Soviet rule the main task of Soviet philosophers, including those in Ukraine, was to ensure that the ideology of the new regime prevailed throughout society. Although they devoted much energy to developing the synthesis of K. Marx's, F. Engels's, and V. Lenin's views which they called Marxism-Leninism, they concentrated on translating the classics of the official philosophy, preparing popular anthologies and textbooks, and training ideological cadres. Most of the classics were issued in Russian translation, but Engels's *Anti-Dühring* (1924, 1932), *Ludwig Feuerbach ...* (1926), and *Dialectics of Nature* (1932, 1934) and Lenin's *Materialism and Empiriocriticism* (1932) and collected works in 29 volumes (1936) also came out in Ukrainian. S. Semkovsky compiled a Marxist anthology in Russian (1922); R. Levik and S. Hopner and E. Kvirning published Lenin anthologies. The first textbook in Ukraine in historical materialism was written in Russian by M. Perlin (1925). Textbooks in Ukrainian were prepared by V. Boiko (1928), H. Yefymenko (1929), S. Lavrov (1930), and S. Semkovsky (1933). The most notable textbook from the philosophical viewpoint was a collectively written work by O. Bervytsky, R. Levik, T. Stepovy, V. Yurynets, and others (1932), which was condemned and banned for its 'nationalism' a few years later.

In his article on the meaning of militant materialism (1922) Lenin pointed out the main questions to be addressed by Soviet thinkers: the relation of Marxism to the natural sciences and the materialist interpretation of the Hegelian dialectic. Within this framework S. Semkovsky wrote several monographs (1924, 1926) defending the compatibility of dialectical materialism and the theory of relativity. V. Asmus (1924) gave, in Russian, the first Soviet account of the evolution of the dialectic from I. Kant to Lenin and defined the distinctive features of Marx's dialectic. O. Vasyliiva, Ya. Bludov, and O. Zahorulko wrote a book in Ukrainian (1930) examining the influence of G. Hegel's dialectic on Marx, and S. Petropavlovsky (1924), S. Semkovsky (1927), T. Stepovy (1929), and M. Lohvyn (1930) wrote articles assessing Lenin's contribution to Marxism. Particular categories were analyzed by P. Demchuk (chance, 1928), T. Stepovy (cause, 1929), and A. Slutskin (quality, 1929). The main controversies centered on (1) the place of the dialectic in the new synthesis, with the supporters of A. Deborin defending the importance of the dialectic against the 'mechanists,' and (2) Lenin's contribution to Marxism-Leninism, with the 'Deborinists' being condemned for underestimating Lenin's philosophical importance and separating theory from practice. In the early 1930s further discussion was suppressed, and in the terror of the following years most of the participants in earlier discussions were arrested. An oversimplified official version of Marxism-Leninism was set down in *A History of the All-Union Communist Party (Bolsheviks): Short Course* (1938).

It was only after J. Stalin's death in 1953 that philosophical discussion of the basic issues in Marxism-Leninism was revived. More attention has been devoted to dialectical materialism than to any other branch of the philosophy. V. Voitko wrote the widely used textbooks in the field in Russian (1962) and Ukrainian (1972). A. Bosenko examined the dialectic as a general theory of development (1966), and others analyzed its particular laws and categories: M. Zolotina (1957) and V. Bosenko (1961), the transformation of quantity into quality; D. Fesenko (1957), the negation of the negation; Ya. Savenko (1959) and V. Hott and N. Depenchuk (1960), the unity and struggle of opposites; V. Melnykov (1959) and, in Russian, M. Bulatov (1980), the nature and function of the categories; V. Nichyk (1960), causality; H. Ivanov (1960), necessity and chance; Yu. Bogdanov, in Russian (1962), essence and appearance; and M. Parniuk, in Russian (1967, 1972), determinism. In the 1980s a group at the AN URSR (now ANU) Institute of Philosophy headed by M. Parniuk produced a series of collectively written books in Russian describing the history and role of the various categories in philosophy, the sciences, and social practice: finitude and infinity (1982), continuity and discontinuity (1983), space and time (1984), reality and appearance (1987), law and chaos (1987), necessity and contingency (1988), connectedness and separateness (1988), and possibility and actuality (1989). The dialectic was presented as a method of knowledge in Russian-language monographs by P. Kopnin (1961), V. Lutai (1970), and V. Shynkaruk (1977, 1979).

In epistemology I. Holovakha wrote, in Russian, on the intelligibility of the world (1955); L. Horbatova, on the theory of reflection (1961); and D. Mykytenko, on sensation (1966). P. Kopnin wrote, in Russian, an introduction to Marxist epistemology (1966) and a study of the dialectic as

a logic and theory of knowledge (1978). The subject-object relation in knowledge was discussed by M. Duchenko (1964) and, in Russian, by M. Parniuk (1979). V. Tabachkovsky dealt in Russian with the role of the categories in knowledge and practice (1986).

Marxism-Leninism's claim to scientific status raised the problem of reconciling dialectical materialism with advances in science and, particularly, with the revolutionary changes in physics. Ukrainian philosophers have figured among the leading Soviet authorities in this field. M. Omelianovsky wrote in Russian on the relevance of Lenin's ideas to modern physics (1947), criticized the positivist interpretation of quantum theory (1953, 1956), and edited a collection of articles on philosophical problems of modern physics (1956). Similar collections were edited by D. Ostrianyn and others (1954, 1958) in Ukrainian and by Y. Shtokalo and others (1964) and V. Bazhan et al (1974) in Russian. N. Depenchuk interpreted, in Russian, the principle of complementarity in dialectical terms (1975). P. Dyshlevy wrote a monograph on time and space in the theory of relativity (1959), coauthored, with O. Kravchenko and M. Rozhenko, a book on philosophical issues in physics (1967), and edited Russian collections of articles on A. Einstein's theory of gravitation (1964, 1965, 1966). The methodological role of the materialist dialectic in the natural sciences was analyzed in Ukrainian by I. Holovakha (1961) and in a collection edited by V. Shynkaruk, V. Ivanov, and O. Yatsenko (1973). A Russian-language analysis was written by I. Kravets (1960), I. Holovakha (1971), P. Kopnin (1962), and V. Chornovolenko (1970) and in collections edited by N. Depenchuk and V. Lukianets (1976), P. Dyshlevy (1976), P. Dyshlevy and F. Kanak (1977), N. Depenchuk and L. Ozadovskaia (1980), V. Lutai (1981), P. Dyshlevy and V. Naidysh (1981), M. Duchenko and others (1983), I. Isaev (1984), and N. Kiselev and V. Khmarova (1985). Its role in biology was discussed in a collection edited by P. Dyshlevy and others (1966) and in Russian by N. Depenchuk (1973). Without abandoning epistemological realism, Soviet philosophers have gradually reduced their claims about the objectivity of science and the intelligibility of nature.

Marxism-Leninism constituted the theoretical core of the 'scientific' worldview dominant in Soviet society. V. Shynkaruk and his colleagues at the Institute of Philosophy collectively wrote a series of monographs in Russian on the nature of a worldview and its role in individual existence and social life. While broadening the discussion about the nature and role of philosophy, this approach did not lead to any new discoveries. Much of it consisted of old dogmas dressed up in new terminology.

Some attention was devoted to the methodology and basic concepts of historical materialism, but much more time has been spent on the so-called practical issues of 'developing socialism' and the 'transition to communism.' The methodological function of historical materialism in the social sciences was discussed in Russian in I. Boichenko's monograph (1982) and several collections of articles edited by V. Kutsenko (1972, 1985, 1986, 1987). Under Kutsenko's editorship the Department of Historical Materialism at the Institute of Philosophy prepared collections in Russian in which it tried to apply the laws and concepts of historical materialism to problems of social forecasting (1977) and social management (1979). In Russian, Yu. Pryliuk examined the problem of communication in historical

materialism (1985), and M. Bulatov (1982), Bulatov and V. Tabachkovsky (1983), and M. Honcharenko (1980, 1987) applied the dialectic to an analysis of cultural progress.

In the field of 'scientific communism,' a number of 'practical' themes were discussed continuously: the friendship of nationalities (in Ukrainian: O. Bilous et al, 1953; in Russian: I. Kravtsev, 1965, 1966), democratic centralism (in Ukrainian: V. Vasylenko, 1957), the stage of developed socialism (in Russian: V. Kutsenko et al, 1980, 1982; A. Butenko, 1984; N. Kirichenko, 1984, 1985; and V. Pazenok, N. Kirichenko, et al, 1987), the development of the individual within socialist society (in Russian: L. Sokhan, 1966; A. Lysenko, 1976; and V. Kutsenko et al, 1983), scientific-technological progress (in Ukrainian: V. Shynkaruk et al, 1976; in Russian: Ye. Holovakha et al, 1988), and the imminent transition from socialism to communism (in Ukrainian: P. Koval et al, 1965; in Russian: L. Sokhan, 1966, and N. Kirichenko, 1984). From the 1960s this field was extensively revised and developed. But this was not the only area of Marxism-Leninism where discussion and change were permitted.

Despite the appearance of unanimity and changelessness, there was some debate among Soviet philosophers even on the basic doctrines of dialectical and historical materialism. Competing interpretations were offered, and the consensus of philosophical opinion shifted on some points. Yet diversity and change were difficult to detect. They appear to have been concealed intentionally by the avoidance of open confrontation and the adherence to traditional formulas. In spite of the growing disparity between the predictions of Marxism-Leninism and reality, the claim of its scientific nature has not been given up.

Mary. The mother of Jesus. Her stature as a Christian cult figure is second only to that of Christ. She has been venerated since apostolic times. Images of her first appeared in the 2nd century, and shrines in her honor were built from the 5th century and named in commemoration of particular events in her life, such as the Annunciation, Assumption (Dormition), Birth, and Presentation at the Temple. The doctrinal recognition of Mary as the Theotokos or Mother of God was finally defined at the Council of Ephesus in 431. Other dogmatic titles were applied to her throughout the early church period, including the Most Holy Virgin, the Ever-Virgin, the Lady, the Protectress of All Christians, the Immaculate, the Pneumatophora (Carrier of the Holy Spirit), and the Triadophora (Carrier of the Trinity).

In the Eastern Christian church her role as the mother of God has always been the main focus of her cult. Her cult was particularly promoted in the East by ss Ephrem the Syrian, John of Damascus, and Andrew of Crete, and St John Chrysostom's theology was revived and popularized in Ukraine in the 17th century by Metropolitan P. Mohyla. In the Western church the Mary cult has empha-

sized her virginity. The major theological differences persisting between the Eastern and Western churches today concern the doctrines of the Immaculate Conception (declared a dogma by Pius IX in 1854) and the Assumption (declared a dogma by Pius XII in 1950), which are not accepted as dogmas in the East. The liturgical veneration of Mary is an older tradition in the East than in the West, and is seen in various prayers, canons, and supplications and especially in *Hymnos Akathistos*. The personal cult of Mary was condemned by the reformers of the 16th century and is not practiced in most non-Catholic Western churches.

The great popularity of the cult of Mary has left its mark on Ukrainian literature, beginning with the apocryphal tales of Kievan Rus' – such as the 'Knyha rozhdestva Divy-Marii' (The Book of the Nativity of the Virgin Mary), 'Khozhdeniie Bohorodytsi po mukakh' (The Mother of God's Journey through Agony), and 'Son Bohorodytsi' (The Mother of God's Dream) – and continuing through the works of I. Galiatovsky, L. Baranovych, A. Radyvyllovsky, D. Tuptalo, I. Maksymovych, T. Shevchenko, Yu. Fedkovych, and P. Tychyna. The motif of Mary has an important place in oral tradition as well, especially in incantations, carols, hymns, and various other pious songs, some of which are of pre-Christian origin and were adapted to Marian devotion. It has also been reflected in toponymy: Bohorodytsia (Mother of God) in the Kholm region, Bohorodchany in Galicia, and Bohorodychne in Kharkiv oblast are among the many place-names associated with her. Even plants have been named after her (eg, *Bohorodchyna kosa* 'the Braid of the Mother of God').

Accounts of miracles associated with Mary abound. The early chronicles attribute the defeat of the Cumans in the 12th century to her intervention, in retribution for their destruction of the Church of the Tithes in Kiev. The account of her appearance at the *Pochaiv Monastery, when she intervened to save the monastery during a Turkish and Tatar attack in the late 17th century, is especially popular and has been immortalized in the famous song 'Oi ziihsla zoria vecherovaia' (Lo, the Evening Star Ascended). Over two hundred miraculous *icons of Mary, held in churches in Kiev, Korsun, Kholm, Dobromyl, Hoshiv, Sambir, Zhovkva, Zarvanytsia, and elsewhere, have attracted pilgrims for centuries. The icons of Mary (of Byzantine origin) in the Pochaiv Monastery and in Czestochowa, Poland (brought from Byzantium during the reign of Volodymyr the Great to Belz in Western Ukraine, and then taken in 1382 to Poland), and the Vyshhorod (Vladimir) Theotokos are the most famous icons of her. In addition to icons depicting Mary with the infant Christ, popular images of her in Ukrainian iconography are of the deesis, or her adoration, with St John, of Jesus on the heavenly throne, and of Mary the Protectress. One of the oldest images of Mary in Ukraine is the mosaic Oranta in the main apse of the St Sophia Cathedral in Kiev.

Holidays in Mary's honor occupy an important place in the church calendar; they include the Annunciation (25 March), the Dormition (15 August), the Nativity of Mary (8 September), and the Presentation at the Temple (21 November). In Ukraine, 14 October (1 October OS) is the day of Mary the Protectress. This holiday, which gained great popularity among the Zaporozhian Cossacks, is almost a national celebration (it was not celebrated in the Byzantine church).

Many significant churches and chapels in Ukraine were

dedicated to Mary, including the *Dormition Cathedral of the Kievan Cave Monastery; the Church of the Tithes; and churches in Volodymyr-Volynskyy, Halych, Kholm, Lviv, Chernihiv, and elsewhere.

In the Ukrainian Catholic church, *Marian societies have been particularly active in preserving and furthering the cult of Mary.

I. Korovytsky

Ukrainian-American veterans in front of St Michael's Ukrainian Catholic Church in Baltimore, Maryland (1945)

Maryland. A state (1990 pop 4,798,622) on the eastern coast of the United States covering an area of 27,400 sq km. Its capital is Annapolis, and its largest city is Baltimore. There are about 16,000 Ukrainians in the state. Most of them (44 percent) live in the Baltimore metropolitan area. Another 20 percent reside in the outskirts of Washington and in the Baltimore–Washington corridor. The rest are scattered in eastern farming counties, such as Worcester, Wicomico, and Cecil, and the western coal-mining counties of Allegheny and Garrett.

Ukrainian immigrants from Galicia, Bukovyna, and Transcarpathia began emigrating to Maryland in the 1890s, with at least 1,100 arriving in 1899–1914. Most of them settled in *Baltimore, where the first Ukrainian parishes and secular associations appeared. Just before the war a small Ukrainian farming community sprang up in Chesapeake City around the Ukrainian Catholic Orphanage. Hundreds of Ukrainians found jobs in the coal mines of western Maryland. The second wave of immigrants from Western Ukraine, in the interwar years, strengthened the existing organizations, and the newcomers founded some others, such as the Ukrainian American Citizens Club (1929) and the Ukrainian National Home (1931) in Baltimore. After the Second World War a large number of Ukrainian refugees and displaced persons en-

tering the United States came to Maryland as farm workers. Within a year most of them headed to the cities. The Ukrainian community in Baltimore more than doubled in numbers at this time, and its level of activity rose sharply. The Ukrainian Education Association of Maryland was founded in 1972 to educate the American public about Ukrainian culture and history. It co-ordinated the publication of *The Ukrainians of Maryland* (1977). A number of Ukrainians have been prominent in state politics, notably P. Dypsky, J. Staszak, C. Yarema, M. Hrabec, and J. Shmorhun.

T. Zakydalsky

Maryniak, Bohdan [Marynjak], b 1844 in Rozdzhalyovychi, Sambir circle, Galicia, d 9 June 1912 in Lviv. Machine-building specialist and pedagogue. After completing his studies at the Lviv Technical Academy he taught drafting at the academy (from 1872 the Lviv Higher Polytechnical School). He was elected to chair the department of machine building (the only such department in Galicia). After upgrading his qualifications in Berlin and Belgium, he returned in 1876 to the Polytechnical School and continued to chair the machine-building department. He was a patron of Ukrainian theater and a benefactor of the *Osnova society, as well as an advocate for the creation of a Ukrainian university in Lviv.

Maria Maryniak:
Self-Portrait (pastel, 1981)

Myroslav Marynovych

Maryniak, Maria [Marynjak, Marija] (née Murynets), b 10 May 1939 in Horodok, Galicia. Artist and art instructor. Maryniak arrived in Canada in 1949. She graduated from the University of Alberta in 1979. She creates impressionistic chalk pastel compositions, mostly of Canadian landscapes. Since 1981 Maryniak has had several solo exhibitions in Canada, participated in over 20 group exhibitions, and contributed to *Arts Atlantic* and *Site Sound*. Since 1985 she has lived in London, Ontario. In 1987 she received an award at the International Exhibition of Pastels held in Toronto, and in 1989 she exhibited two works at the International Exhibition of Pastels held in Compiègne, France.

Maryniuk, Viktor [Marynjuk], b 10 April 1939 in Kazavchyn, Haivoron raion, Kirovohrad oblast. Painter and muralist. A graduate of the Odessa Art School (1967), he participated in official and unofficial group exhibitions

in Odessa and in the Second Exhibition of Nonconformist Ukrainian Artists (1976), held in a private Moscow apartment. From the representational style of the early 1970s (eg, *Girl with Ribbons*) Maryniuk has moved through several contemporary styles, from partial (*Outside the Town*, 1979) to total abstraction (*Composition*, 1981) to neoexpressionism (*Two Women*, 1988). Most of his compositions contain figures of women. He also painted the murals inside the Odessa Student Palace and the Odessa Book Building.

Marynovych, Mykola [Marynovyč], b 1861, d 1944. Army officer. A colonel in the Austrian army during the First World War, he joined the Ukrainian Galician Army in November 1918 and was briefly its first chief of general staff during the battle for Lviv. He was murdered by Soviet partisans in 1944.

Marynovych, Myroslav [Marynovyč], b 4 January 1949 in Drohobych, Lviv oblast. Dissident. In November 1976 he became one of the cofounders of the *Ukrainian Helsinki Group in Kiev. For his participation in various activities in defense of human rights, he was arrested in April 1977 and sentenced in March 1978 to seven years in strict-regime labor camps and five years' exile. While in a camp in Perm oblast, he took part in hunger strikes and other protest actions of the political prisoners there. He was released from exile in Kazakhstan in 1987, and returned to Ukraine. Since 1987 Marynovych has lived in Drohobych, where he writes for a local paper and teaches at the pedagogical institute.

Marynych, Hryhorii [Marynyč, Hryhorij], b 29 November 1876 in Hupalivka, Novomoskovske county, Katerynoslav gubernia, d 11 April 1961 in Dnipropetrovske. Actor. He began his theatrical career in Saksahansky's Troupe in 1906, and then worked in T. Kolesnychenko's troupe (1910) and in Sadovsky's Theater in Kiev (1911–14). He joined the Shevchenko First Theater of the Ukrainian Soviet Republic in 1920 (with a hiatus with an amateur theater in Kursk in 1921–4) and followed it when it was transferred and renamed the Dnipropetrovske Ukrainian Music and Drama Theater (1925–57).

Marynych, Oleksander [Marynyč], b 4 September 1920 in Subotsti, Oleksandriia county, Kherson gubernia. Geographer and geomorphologist; corresponding member of the AN URSR (now ANU) since 1969. After studying at Kiev University he graduated from Kazan University in 1942. After the war he taught at Kiev University, and he served there as dean of the geography faculty (1956–68) and department head of physical geography (1958–71). In 1964 he was elected president of the Geographical Society of the URSR. He served as Ukraine's minister of education (1971–9), headed the geographical division of the ANU Institute of Geophysics, and was a professor at Kiev University (1989). Marynych specializes in the physical geography and geomorphology of Ukraine and the rational use of the natural environment. He has written two books on the physical geography of Polisia (1962, 1963) and coauthored books on the physical geography of Ukraine (1982), the landscapes of Ukraine (1985), and environmental protection in the Middle Dnieper region (1986). He is the editor in chief of the three-volume *Heo-*

hrafichna entsyklopediia Ukrainy (Geographic Encyclopedia of Ukraine), which began to appear in 1989 in Kiev.

Marzeev, Aleksandr, b 6 April 1883 in Nizhnii-Novgorod, Russia, d 1 February 1956 in Kiev. Russian hygienist; full member of the USSR Academy of Medical Sciences from 1944. A graduate of Moscow University (1911), he headed the sanitation and epidemiology department of the People's Commissariat of Public Health of the Ukrainian SSR (1922–35), directed the Ukrainian Scientific Research Institute of Communal Hygiene (1931–56), and chaired the departments of communal hygiene at the Kharkiv (1934–41) and Kiev (1944–56) medical institutes. He was one of the first organizers of public sanitation in Ukraine.

Masalsky, Volodymyr [Masal's'kyj], b 25 July 1896 in Kiev, d 14 January 1979 in Kiev. Linguist. A graduate of Kiev University (1920), he worked as a teacher in provincial towns. From 1933 he was an associate of the AN URSR (now ANU) Institute of Linguistics, taught (with interruptions) at Kiev University, and chaired its department of Slavic philology (1960–71) as well as the methodology division of the Scientific Research Institute of Pedagogy. From the mid-1930s on he published articles on the methodology of secondary-school teaching of Ukrainian and Russian, on Ukrainian grammar, and on stylistics (T. Shevchenko, M. Kotsiubynsky, P. Tychyna, and I. Kyrylenko).

New extension of the Masandra winery

Masandra. IX-15. A town smt (1990 pop 6,400) on the Black Sea coast in Crimea oblast. Lying only 5 km from Yalta, it is administered by Yalta's municipal council. Masandra was first mentioned in historical documents in the mid-18th century. It attained smt status in 1941. The town is known as a health resort and as the home of the main winery of the Masandra Wine-Making Complex. On its outskirts is the famous *Nikita Botanical Garden. Traces of Taurian burial mounds and ancient settlements, catacombs from the 1st to 3rd centuries, and the ruins of a 12th- to 15th-century monastery are found near Masandra.

Masaryk, Tomáš Garrigue, b 7 March 1850 in Hodonín, Moravia, d 14 September 1937 in Lány, Kladno county, Czechoslovakia. Czech scholar, philosopher, and statesman. A graduate of Vienna University (PH D, 1876),

he was a professor of philosophy at Charles University in Prague (1882–1914) and the first president of the Czechoslovak Republic (1918–35). In his scholarly and publicistic works, such as *Russland und Europa* (1913; English edn: *The Spirit of Russia*, 1919), *The New Europe: The Slav Standpoint* (1918), and *The Slavs after the War* (1922; Ukrainian edn 1923), and his memoirs, *Světova revoluce: Za války a ve válce, 1914–1918* (1925; English edn: *The Making of a State: Memories and Observations*, 1927; Ukrainian edn: *Svitova revoliutsiia*, 1930), Masaryk often expressed his opinion on Ukrainian issues. He treated the question of Ukrainian nationhood as an open one and sympathized with Ukrainian aspirations to national emancipation. But he hoped that one day Ukraine would be part of a democratic, federated Russia, which would serve as a counterweight to the German threat.

Masaryk came into contact with Ukrainian issues at various times in his career. He was acquainted with I. Franko, who dedicated a collection of translated verses to him and contributed his recollections about their relations to a festschrift on Masaryk's 60th birthday. He assisted Ukrainian students in Prague after their secession from Lviv University in 1901–2. As a deputy to the Austrian parliament he took part in the 1908 debates on the Ukrainian-Polish conflict in Ukraine, and in a major speech on 25 May he defended the rights of the Galician Ukrainians to develop freely and independently. After the outbreak of the First World War he headed the Czechoslovak independence movement within the Entente alliance. During his stay in Russia and Ukraine (1917–18) he organized a legion of Czech and Slovak POWs and negotiated an agreement with the UNR guaranteeing the legion's extraterritorial status in Ukraine and obtaining government support for it. When the UNR declared its independence and concluded the Peace Treaty of Brest-Litovsk, he annulled the agreement. The legion remained neutral in the Soviet-Ukrainian conflict that followed and eventually left Ukraine for the Far East.

During his visit to the United States (May–November 1918) Masaryk organized the Mid-European Democratic Union, an organization of émigré representatives of the various nationalities of the Austro-Hungarian Empire. It included M. Sichynsky and L. Tsehlynsky from the Ukrainian community and H. Zhatkovych from the *American National Council of Uhro-Rusins. On the basis of an agreement between the Uhro-Rusin council and Masaryk, Transcarpathia was incorporated into the new Czechoslovak Republic in 1919.

As president of Czechoslovakia Masaryk supported the use of the local dialect instead of Russian in Transcarpathian educational and administrative institutions. He was sympathetic to the cultural needs of the large émigré community from Russian-ruled Ukraine and helped establish such institutions as the Ukrainian Free University in Prague and the Ukrainian Husbandry Academy in Poděbrady (see *Bohemia and *Czechoslovakia). In spite of his sometimes pro-Soviet and Russophile leanings, Masaryk was popular among Ukrainians.

I.L. Rudnytsky

Masenko, Teren, b 10 November 1903 in Hlodosy, Yelysavethrad county, Kherson gubernia, d 6 August 1970 in Kiev. Poet and journalist. He was a member of the literary organizations *Molodniak and *Prolitfront and first

began to publish his work in 1924. He is the author of the anthologies *Stepova mid'* (Copper of the Steppes, 1927), *Pivdenne more* (The Southern Sea, 1929), *Virshi ta poemy* (Verses and Poems, 1939), *Tsvit zemli* (The Earth's Bloom, 1948), *Kyïvs'ki kashtany* (The Chestnut Trees of Kiev, 1954), *lak pakhne zemlia* (How the Earth Is Fragrant, 1958), and many others, and of a versified novel, *Step* (The Steppe, 1938). Masenko also published collections of articles and essays and the autobiographical *Zhyttia i pisnia* (Life and Song, 1960). He is the author of several books of verses for children. Over 200 of his verses have been set to music by Ukrainian composers.

Mashchenko, Mykola [Maščenko], b 12 January 1929 in Miluvatka, now in Svatove raion, Luhanske oblast. Film director. In 1953 he completed study at the Kharkiv Theater Institute, and from 1957 he has worked in the Kiev Artistic Film Studio (since 1988 as director), where he has directed many films on moral and social problems and the telefilms *Shliakh na Sofiiu* (Road to Sofia, 1978) and *Ovid* (The Gadfly, 1980, based on E. Voinich's novel); he was awarded the Shevchenko Prize in 1982. He has also taught at the Kiev Institute of Theater Arts.

Mashivka [Mašivka]. IV-15. A town smt (1990 pop 4,300) on the Tahamlyk River and a raion center in Poltava oblast. It dates from the mid-19th century. Mashivka attained smt status in 1971. It has a food industry and a regional museum.

Masiuk, Kalenyk [Masjuk], b 1878 in Dybyntsi, Kaniv county, Kiev gubernia, d 3 June 1933 in Dybyntsi. Master potter. He made bowls, pitchers, and tiles, which he decorated with original vegetative motifs and stylized images of animals, birds, and human beings. His design was scratched onto the surface of the clay. Masiuk's works can be found in museums in Kiev, Lviv, Poltava, and St Petersburg. His son, Vasyl, has continued the art.

Masiutko, Mykhailo [Masjutko, Myxajlo] (pseud: Mykhailo Perekop), b 18 November 1918 in Chaplynka, Dnieper county, Tavriia gubernia. Dissident. After studying at the Kherson and Zaporizhia pedagogical institutes he worked as a teacher in the Zhytomyr region. Having been accused of disseminating counterrevolutionary propaganda he was imprisoned in concentration camps in the Soviet Arctic (1937–40) and then exiled to the Khabarovsk region (1940–2). He was arrested in Teodosiia in September 1965 for possessing dissident and émigré literature and sentenced in March 1966 in Lviv to six years in Vladimir Prison and in a strict-regime labor camp in Mordovia. Some of his extant poems, stories, letters, petitions, and documents pertaining to his trial were published in the West in V. *Chornovil's *Lykho z rozumu* (1967; trans: *The Chornovil Papers*, 1968) and in *Ukrains'ka inteligentsiia pid sudom KGB* (Ukrainian Intellectuals Tried by the KGB, 1970).

Masiutyn, Vasyl [Masjutyn, Vasyl'] (Masjutin, Wassilij), b 29 January 1884 in Riga, Latvia, d 15 December 1955 in West Berlin. Ukrainian engraver, medalist, sculptor, painter, graphic artist, writer, and art scholar. He studied at the Moscow School of Painting, Sculpture, and Architecture (1909–14). His early work consisted of fantastic

Vasyl Masiutyn:
Self-Portrait (1938)

Volodymyr Masliak

symbolist, often grotesque, etchings, such as *Hermaphrodite* and *Woman with Tail*. In 1920 a large solo exhibition of his works was held at the Rumiantsev Museum in Moscow. An émigré in Berlin from 1921, he worked there as a commercial artist and illustrator of Russian books. In the early 1930s he became a member of the Association of Independent Ukrainian Artists and took part in its exhibitions in Lviv. Having turned his attention to Ukrainian themes, he sculpted busts of Hetmans P. Sahaidachny, B. Khmelnytsky, P. Doroshenko, and I. Mazepa and produced a series of 63 bronze historical medallions (10 on Kievan Rus', 47 on the Cossack period, and 7 on the modern period). He also did the print series 'Seven Mortal Sins,' colored woodcuts, illustrations to Aesop's fables and the works of N. Gogol, F. Dostoevsky, A. Pushkin, and H. Balzac, and oils. He wrote *Die Gravüre und die Lithographie* (1922), a study of the English graphic artist T. Bewick (1923), articles on Ukrainian art and artists in Ukrainian and German art journals, and novels in German (eg, *Der Doppelmensch*, 1925), two of which appeared in Ukrainian – *Dva z odnogo* (Two from One, 1936) and *Tsarivna Nefreta* (Queen Nefertiti, 1938).

S. Hordynsky

Maskiewicz, Bogusław Kazimierz (Maszkiewicz), b ca 1625, d 1683. Polish memoirist and officer in the private army of the magnate J. Wiśniowiecki. He maintained a diary in 1643–9 which provided descriptions of manor life, the Kodak fortress and the Dnieper Rapids, and the Khmelnytsky uprising of 1648–9. Although the original has not survived, the memoirs were published in Polish and Russian during the 19th century, and together with those of his father Samuel in *Pamiętniki Samuela i Bogusława Kazimierza Maskiewiczów* (1961).

Masliak, Stepan [Masljak], b 19 November 1895 in Stanyславiv, d 8 July 1960 in Lviv. Writer. In 1924–5 he lived in Prague, and from 1945, in Lviv. He was a senior lecturer of the chair of Slavic philology of Lviv University. His first published work appeared in 1923, and his writings continued to appear in Lviv's leftist journals *Nova kul'tura* and *Vikna*. Masliak belonged to *Horno. He wrote the epic poem *Prolom* (The Breakthrough, 1934), but he is known primarily as a translator of Polish (A. Mickiewicz, J. Slowacki, M. Konopnicka, A. Asnyk, J. Tuwim), Czech (J.

Hašek's *Good Soldier Schweik* and I. Olbracht's *Nikola Šuhaj loupežník* [Nikola Šuhaj, the Bandit]), German, French, Italian, and Slovak, including 17 librettos for opera translated into Ukrainian. He also translated Ukrainian works into Polish (T. Shevchenko, L. Hlibov, Yu. Fedkovych, P. Tychyna, V. Sosiura, L. Pervomaisky).

Masliak, Volodymyr [Masljak] (pseud: Volodymyr Zalukvych), b 14 September 1858 in Sernky Seredni, Galicia, d 15 December 1924. Writer, poet, and publicist. He published several collections of poetry, including *Poezii* (Poems, 1886) and *Z chornoho shliakhu* (From the Black Road, 1897). His best poems are similar to folk songs and have been set to music. In his satirical novel *Kistiaky Hol'd-beina* (Holdbein's Skeletons, 1896) he portrayed the Galician clergy. In 1885 Masliak edited *Nove zerkalo*, a magazine of political satire, and in 1898 he compiled and published *Na velyki rokovyiny* (On the Great Anniversary), a literary collection in honor of I. Kotliarevsky.

Masliuchenko-Hubenko, Varvara [Masljuchenko], b 1902, d 23 January 1983 in Kiev. Actress; wife of O. *Vyshnia. She mostly played heroic roles in the State Drama Theater (1918–19), the Shevchenko First Theater of the Ukrainian Soviet Republic (1918–19), the Franko New Drama Theater in Kharkiv (1923–6), the Kharkiv Chervonozavodskyi Ukrainian Drama Theater (1927–30), and the Kharkiv Theater of the Revolution (1931–4). She was arrested in 1934 and imprisoned in the Soviet Arctic. After her release she acted in the films *Poema pro more* (A Poem about the Sea, 1958) and *Lisota pishnia* (The Forest Song, 1961, based on Lesia Ukrainka's drama).

Masliukov, Oleksa [Masljukov], b 2 June 1904 in Cherkasy, Kiev gubernia, d 14 April 1962 in Kiev. Film director. In 1929 he completed study at the Odessa State Cinema College; later he worked in the Odessa and Kiev Artistic Film studios (since 1952 in the Kiev studio only). He produced several films on children's education, notably *Pedahohichna poema* (A Pedagogical Poem, 1955, based on A. Makarenko's novel).

Maslosoiuz Provincial Dairy Union (Kraievyi molocharskyi soiuz 'Maslosoiuz'). An association of dairy co-operatives that was founded in Stryi in 1905 by the Stryi branch of the Prosvita society and was first called the Union of Ruthenian Dairy Co-operatives. From 1907 to 1925 it was known as the Provincial Farm and Dairy Union. The organizers and first leaders of Maslosoiuz were Ye. *Olesnytsky, O. Nyzhankivsky, L. Horalevych, and I. Bachynsky. By 1914 it represented about 100 small dairy unions, which together collected some 7.5 million L of milk from peasants and produced about 300,000 kg of butter annually.

The union was reorganized in 1924, after recovering from the First World War. In 1925 it changed its name and statute. Individual members were replaced by corporate members, and new people – mostly former officers of the Ukrainian Galician Army who had graduated from professional schools abroad – took over the management of the union. The main figures in the organization in the interwar period were O. *Bachynska, A. *Mudryk, A. *Paliu, M. *Khronoviat, T. Kotyk, and O. Lys. Formally its head office was in Stryi, but its real center was Lviv, where its

A Maslosoiuz store in Lviv

Main Trading Office was located. In 1927 Maslosoiuz began to export its butter to Czechoslovakia and Austria and restored the dairy school that had been founded in Stryi in 1913. Its monthly **Kooperatyvne molocharstvo* appeared in 1926. To improve efficiency and facilitate mechanization, small dairy co-operatives serving single localities were reorganized into larger regional co-operatives called district dairy associations. The first association was set up in Voinyliv in 1926. In 1928 the associations were reorganized into district dairies, each of which served several villages. Almost all of the district dairies had modern equipment and trained technical staff. The growth of Maslosoiuz is summarized in the table.

In 1938 Maslosoiuz had 12 departments, with 26 wholesale and 57 retail stores. Its base consisted of 136 district dairies with a total membership of 205,000 farms, which supplied the milk. Maslosoiuz itself employed about 300 people, and the district dairies employed 150 dairy technicians, 64 farming experts (mostly professional agronomists), and 18 veterinarians. The association was the most vital part of the *co-operative movement in Western Ukraine, and the leading force behind the movement's modernization. Together with the *Silskyi Hospodar society, Maslosoiuz played a major role in modernizing agriculture in Western Ukraine. The Polish authorities, however, restricted its operation to Galicia, where it achieved almost complete control of the butter market, its produce being sold to Poles and Jews as well as to Ukrainians. In Volhynia there was only one department of

The growth of Maslosoiuz, 1925–38

	1925	1931	1935	1938
Number of member dairies	72	224	141	151
Number of district dairies	–	112	113	136
Number of milk-collecting dairies	300	1,259	1,400	2,000
Milk received (in million L)	8.4	65	74.6	115
Butter supplied to Maslosoiuz by district dairies (in thousand kg)	165	2,428	2,810	2,948
Butter exported (in thousand kg)	0.2	842	483	112
Sales (in million zlotys)	0.9	14.7	9.3	12.1

Maslosoiuz, with two stores in Lutske. The few district dairies in Volhynia were not permitted to trade with Maslosoiuz. Another two departments were opened in Silesia.

During the first Soviet occupation of eastern Galicia (1939–41) the dairy co-operatives were brought formally under the control of so-called food co-operatives but in effect were subordinated to state control. Most of Maslosoiuz's managers fled to the Generalgouvernement in German-occupied Poland, where they organized about 50 co-operative dairies and a department of Maslosoiuz in Jarosław, which came under the supervision of the Lublin and Cracow branches of the Audit Union of Ukrainian Co-operatives. When the Germans occupied eastern Galicia in 1941, they permitted Maslosoiuz to resume its operations but limited the union's activities to the new Distrikt Galizien of the Generalgouvernement. All dairy farming was brought under the Provincial Union of Dairy Farming, which also took over technical and organizational responsibilities; Maslosoiuz retained responsibility for commercial operations. As the only central organization of dairy co-operatives in Galicia, Maslosoiuz was one of the few institutions that could defend the interests of Ukrainian peasants before the German authorities. In 1943 there were 181 Ukrainian district dairies in the Generalgouvernement, 137 of which were in Galicia. They processed 220 million L of milk, and their gross sales came to over 100 million zlotys. Maslosoiuz was dissolved when the Soviets occupied Galicia for the second time (1944).

A. Kachor

Maslov, Leonyd, b 1909, d 1943 in Rivne, Volhynia. Architect; son of Senator M. Maslov. In interwar western Volhynia he researched architectural monuments, particularly old churches, and wrote about them in Ukrainian and Polish periodicals, such as *Nasha bat'kivshchyna* and *Zhyttia i znannia*; he also wrote a book on wooden churches of the Kholm region and Podlachia (1941). He was executed by the Germans.

Maslov, Mykola, b 1880 in Lubni, Poltava gubernia, d 1942 in Kazakhstan. Community figure and politician. He studied law at St Petersburg University, was active in the Ukrainian student hromada there, and practiced law in St Petersburg. After the February Revolution he served as a commissioner of the Central Rada in Borshchiv county, Galicia, and then directed the chancery of the Little Rada in Kiev. Under the UNR Directory he headed a government department in 1919. As an interwar émigré in Polish-ruled Volhynia, he headed the executive of the local government in Lutske, was active in the *Volhynian Ukrainian Alliance and the *Ridna Khata society, administered the state property of the Orthodox Brotherhood of the Elevation of the Cross, and presided over the Ukrainian Theater Society. Maslov was elected to the Polish Senate in 1930 and 1935 and became a deputy senator in 1938. He served as a secretary in the senate and was a member (from 1935) of its Legal Commission. From 1935 on he spoke out in support of educational and agricultural reforms, the erad-

ication of unemployment among the Ukrainian peasantry and intelligentsia, and normalization of the legal status of the Orthodox church. Maslov was arrested during the 1939 Soviet occupation of Western Ukraine and deported to Kazakhstan, where he died or was killed.

Serhii Maslov

Maslov, Serhii, b 28 November 1880 in Ichnia, Chernihiv gubernia, d 11 January 1957 in Kiev. Literary scholar and bibliologist. From 1914 he was a privatdocent and a professor at Kiev University, and from 1939, a corresponding member of the AN URSR (now ANU). Maslov was the author of many works in the history of Ukrainian literature, mainly of the 17th and 18th centuries, and in Ukrainian bibliography, archeography, paleography, ethnography, and other areas. Among his major writings are 'Rukopysy Sofiis'koi katedry v Kyievi' (Manuscripts of the St Sophia Cathedral in Kiev, *ZNTSh*, vol 72, 1906), *Obzor rukopisei biblioteki Imperatorskogo Universiteta sv. Vladimira* (A Survey of Manuscripts in the Library of the [Kiev] Imperial University of St Vladimir, 1910), *Biblioteka Stefana Iavorskogo* (The Library of Stefan Yavorsky, 1914), *Drukarstvo na Ukraïni v XVI–XVIII st.* (Printing in Ukraine in the 16th to 18th Centuries, 1924), *Ukrains'ka drukovana knyha XVI–XVIII st.* (The Ukrainian Printed Book in the 16th to 18th Centuries, 1925), 'Ukrainische Druck-Kunst des 16 bis 18 Jahrhunderts' (*Gutenberg Jahrbuch*, 1926), *Etiudy z istorii ukrains'kykh starodrukiv* (Studies in the History of Ukrainian Old Printed Books, 1926–8), *Kul'turno-natsional'ne vidrodzhennia na Ukraïni v kints'i XVI i pershii polovyni XVII st.* (The Cultural-National Rebirth in Ukraine at the End of the 16th Century and the Beginning of the 17th Century, 1943), and *Pochatkovyi period v istorii ukrains'koho knyhodrukuvannia* (The Initial Period in the History of Ukrainian Book Printing, 1949). Maslov was the coauthor, with Ye. Kyryliuk, of *Narys istorii ukrains'koi literatury* (An Outline of the History of Ukrainian Literature, 1945), which was condemned by the CC CPU for bourgeois nationalism. A biobibliography, *Serhii Maslov, 1902–27*, appeared in 1927.

I. Koshelivets

Maslov, Vasyl (Maslii), b ca 1841, d 12 December 1880 in Moscow. Writer and teacher. In the late 1850s he studied in Kiev, where he became acquainted with T. Shevchenko. He wrote the first Russian popular biography of the poet (1874) and collected materials on the archeology and history of Ukraine.

Maslov, Vasyl, b 2 January 1885 in Ichnia, Chernihiv gubernia, d 22 March 1959 in Kiev. Literary scholar and ethnographer; brother of S. Maslov. After graduating from Kiev University (1909) he taught the history of Russian and Ukrainian literature at the university and at the Kiev Pedagogical Institute. He wrote over 50 works, including studies of Ukrainian ethnography in the first half of the 19th century (1934), agricultural implements and technique in the feudal period (1937), and A. Pushkin and the Decembrists (1951). Some of them (eg, the study of the Decembrist influence in 19th-century Ukrainian literature) remain unpublished.

Maslovsky, Opanas [Maslovs'kyj], b 1739 in Tserkovyshche, near Kozelets, Chernihiv regiment, d 7 October 1804 in Kiev. Physician. A graduate of the Kievan Mohyla Academy and the Moscow Medico-Surgical School (1772), he was appointed physician of the Kiev vicegerency in 1784. He introduced the practice of quarantine, attained the rank of doctor of medicine (1792), served as inspector of the Orel (1797–1801) and Kiev (from 1801) medical administrations, and taught medicine at the Kievan Mohyla Academy (from 1802). He wrote a number of works on obstetrics, infectious diseases, botany, and toxicology.

Maslovych, Vasyl [Maslovyč, Vasyl'], b 1793 in Kharkiv, d 1841 in St Petersburg. Writer and journalist. In 1816 he published and edited the journal '*Khar'kovskii Demokrit*', in which his own satirical poems appeared. After it was closed down by the tsarist authorities, he moved to St Petersburg, where he continued writing, but most of his poetry was never published. His tale of Kharko, the founder of Kharkiv, his daughter, Hapka, and the journeyman Yakiv was published in 1890, and his essay on St Petersburg's Nevskii prospekt appeared in 1928.

Masnyk, Ihor, b 17 September 1930 in Mostyska, Lviv county, Galicia. Organic chemist and civic and cultural activist; member of the Shevchenko Scientific Society. A postwar displaced person, he emigrated to the United States in 1949 and completed his education at the University of Chicago (PH D, 1962). Masnyk worked in the field of predictive indices for early recurrence of breast cancer, and administered and comanaged large screening studies in early detection of lung, breast, and colon cancer. Since 1984 Masnyk has been deputy director of the Division of Cancer Biology, Diagnosis, and Centers of the National Cancer Institute (NCI), National Institutes of Health (NIH), in Bethesda, Maryland. From 1983 to 1988 he was also director of international affairs of NCI-NIH. In 1991–2 he participated in setting up and implementing a study of ophthalmic complications in Ukrainian children after the Chernobyl nuclear accident. In 1990 he was honored as Washington's Ukrainian of the Year. Masnyk is the biology subject editor of vols 3–5 of the *Encyclopedia of Ukraine*.

Masnytsia (aka *masliana* and *maslianytsia* 'butter week'). The last week of fun, games, and good food before Lent. During this week, milk, dairy products, and eggs, but not meat, could be consumed. The *masnytsia* had a special ritual menu, which included cheese dumplings with sour cream and butter and buckwheat pancakes. Its rites included the burning of a straw scarecrow representing

winter and the mock fettering of eligible young men and women for not having married during the preceding *miasnytsia* (pre-Lenten or inter-Lenten period, or meat week). The first day of the week (Monday) is called *kolodii* (see **Kolodka*), and the last day (Sunday), *pushchennia* 'farewell' (or *lacte vale*). Under the Soviet regime some traditional elements of butter week were preserved in the officially approved spring festivities.

Petro Masokha

Mykhailo Matchak

Masokha, Petro [Masoxa], b 16 September 1904 in Pliuvaky (now Pervomaiske), near Monastyryshche, Lypovets county, Kiev gubernia, d 28 July 1991 in Kiev. Film and stage actor. He completed study at the Lysenko Music and Drama Institute in Kiev (1923) and then played in Bezil (1923–8) and in the Drohobych Ukrainian Music and Drama Theater (1942–4). He acted in O. Dovzhenko's films *Zemlia* (The Earth, 1930) and *Ivan* (1932; the title role) and in other films. After 1945 he was arrested and imprisoned. After his release he participated in the film *Je takyi khlopets'* (There Is Such a Boy, 1956) and wrote a memoir of L. Kurbas.

Masol, Vitalii, b 14 November 1928 in Olyshivka, now in Chernihiv raion. Communist party leader and Soviet official. After graduating in mechanical engineering from the Kiev Polytechnical Institute (1951) he worked at the Novokramatorske Machine-Building Plant and eventually became its director (1963–71). In 1972 he was appointed first deputy chairman of Ukraine's State Planning Committee, and in 1979, first deputy chairman of the Council of Ministers and chairman of the State Planning Committee. From 1979 he was also deputy to the Ukrainian SSR Supreme Soviet. In July 1987 he replaced O. Liashko as chairman of Ukraine's Council of Ministers, and three years later he was dismissed from the post at the demand of striking students in Kiev. He was a member of the CC CPU from 1976 and of the Central Auditing Committee of the CPSU in 1981–6.

Masons. See Freemasonry.

Masovyï teatr (Mass Theater). A monthly illustrated sociopolitical arts journal. In 1926–31 it was published as *Sil's'kyi teatr* by the Kharkiv municipal art department of the Administration of Political Education of the Ukrainian

SSR. It contained one-act plays, adaptations, reviews of performances of professional and amateur theaters, and instructions for amateur groups, and organized repertory competitions in villages. In 1929–31 another illustrated journal, *Radians'kyi teatr*, was published in Kharkiv by the arts administration of the People's Commissariat of Education of the Ukrainian SSR. It contained theoretical, practical, and historical analyses of theater arts. In 1931–3 the Kharkiv Narkomos and the CC of the Komsomol of the Ukrainian SSR together published *Masovyï teatr*.

Mass. See Liturgy, Divine.

Matchak, Mykhailo [Matčak, Myxajlo], b 28 February 1895 in Volia Yakubova, Drohobych county, Galicia, d 19 November 1958 in Potma, Mordovian ASSR. Political leader, publicist, and publisher. A volunteer to the Ukrainian Sich Riflemen (1914), he was captured in action by the Russians and in 1917 helped organize the Sich Riflemen in Kiev. After being promoted to the rank of captain he sat on the Sich Council and was in charge of the corps's recruitment and training department. After the war he studied law in Lviv and took part in organizing the Lviv (Underground) Ukrainian University and the Ukrainian Military Organization (UVO). A member of the Supreme Command of the UVO, he was sentenced to two years in prison for his involvement in an attempt on J. Piłsudski's life (1921). After resigning from the UVO he became a member of the Chief Secretariat of the Ukrainian Socialist Radical party and its deputy to the Polish Sejm (1930–5). In 1931 he set up his own publishing house, Izmarahd. After emigrating to Vienna in 1944, he worked for the United Nations Relief and Rehabilitation Administration. On 27 February 1947 he was kidnapped by Soviet agents, and subsequently he was sentenced to 25 years of hard labor in Kazakhstan. He was released from labor camp as an invalid in 1955 but was not permitted to leave the USSR.

Mateiuk, Antonii [Matejiuk, Antonij], b ? in Podlachia, d November 1919 in Zhmerynka, Vinnytsia county, Podilia gubernia. Orthodox priest and political and military activist. In 1917 he organized the All-People's Congress of the Kholm Region in Kiev and served as vice-chairman of the Kholm Gubernia Executive Committee and as one of its representatives to the Central Rada. Later he was chaplain of the Second Serdiuk Guard Division and (under the Directory) head chaplain of the UNR Army. After contracting typhus he was captured and shot by A. Denikin's troops.

Materials science (*materialoznavstvo*). The study of the structure, properties, and applications of all types of materials, including metals, ceramics, glasses, and polymers. The earliest research on materials in Ukraine was done in the second half of the 19th century at Kharkiv University, where N. Beketov did some work in aluminothermia. The strength of materials was studied by M. *Ostrohradsky, whose theory of elasticity achieved world renown. D. *Zhuravsky was the first to establish the existence of shearing stresses (1855), and he derived a formula that is still used in design calculations. F. Yasynsky developed a theory of buckling for stresses below and beyond the elastic limit (1893). Research was conducted at the Ukrainian

Academy of Sciences (est 1918) and at universities and higher educational institutions.

In the early 20th century the wider use of reinforced-concrete and steel structures and the advent of complex machines and mechanisms gave an impetus to the development of materials science in Ukraine. In the 1920s and 1930s scientists such as G. Kurdiumov, L. Lysak, L. Khandros, and M. Arbutov conducted X-ray studies of the tempering and annealing of steel and martensitic transformations in nonferrous alloys which laid the foundation for current theories of the thermal treatment of steels and alloys. Norms governing the structure and formation of solids through crystallization from a liquid under external influences were formulated by V. Danilov, D. Ovsienko, and others. A. Vynohradov studied the layered structure of steel. Various metal powders were produced by the electrolysis of metal melts and nonaqueous solutions by V. Izbekov, V. Plotnikov, and E. Natanson, and iron powder was obtained by M. Luhovtsov and I. Frantsevych by the renewal of mill scale with natural gas. The fundamental mechanisms of the plastic deformation of crystals were investigated and the difference between the theoretical and the empirical strength of crystals was explained by I. Obreimov, N. Brylliantov, R. Harber, V. Startsev, and Y. Hindin.

After the Second World War materials science institutes were set up within the AN URSR (now ANU), including the Institute of Metal Ceramics and Special Alloys (now the Institute for Problems of Materials Science), the Institute of Metal Physics, the Institute of Casting Production (now the Institute for Problems of Casting), the Physical-Technical Institute of Low Temperatures, the Ukrainian Design and Technological Institute of Synthetic Superhard Materials and Instruments (now the Institute of Superhard Materials), and the Physical-Technical Institute in Donetsk. Materials science research is also conducted at the Kiev and Kharkiv polytechnical institutes, Kiev University, the Kharkiv Aviation Institute, and the Dnipropetrovske Metallurgical Institute.

Theoretical and experimental research in materials science in Ukraine has been concerned with heterogeneous equivalences and physical-chemical analysis (V. Yeremenko, A. Berezhnoi, P. Budnikov, L. Lopato), electron theory and the electron structure of metals (I. Lifshyts) and chemical bonds (G. Samsonov), the physical theory of the deformation and destruction of solids (V. Trefilov), the thermodynamics of molten metals and the chemistry of surfaces (Yeremenko, Yu. Naidych, H. Lukashenko), the theoretical problems of heat proofing and thermal and heat resistance (Frantsevych), and theoretical aspects of the formulation of the properties of porous and composite materials and products (D. Karpynov, V. Skorokhod, P. Kysly). A unique method of heat treating high-carbon steels was developed by V. Hridniev, Trefilov, and Yu. Meshkov. The norms of diffusion and recrystallization processes were studied by S. Hertstriken, Ya. Geguzin, I. Dekhtiar, and L. Larikov. Theories were developed about imperfections in crystal structure and how to detect them (M. Kryvohlaz, A. Smirnov, Ye. Nesterenko, Dekhtiar), powder sintering (B. Pines, Geguzin), and the diffusion-dislocation tendency of crystals, the dislocation mechanism of crystal growth, and pore and crack filling under pressure (Lifshyts, A. Kosevych, V. Slozov). The effect of

temperature on the plastic deformation and strengthening of uranium, as well as methods and conditions for the alloying of uranium, was studied by V. Zelensky, A. Voloshchuk, and A. Stukalov. A dislocation theory for the cold frangibility of refractory materials and bonds was proposed by Trefilov, Yu. Milman, and S. Firstov. Pioneering studies on the plastic deformation of metals and laminated materials produced by vacuum rolling were begun by K. Synelnykov, V. Ivanov, and V. Amonenko. Descriptions of norms in the appearance of secondary grain boundaries in cast metals and alloys and the properties of the mechanism of intercrystalline destruction in those materials (B. Movchan) had many practical applications.

The physicochemical approach to materials science was widely developed in Ukraine and was focused on diagramming the states of metal and nonmetal systems, the thermodynamics of metal melts, the interphase interaction and adhesion of diffuse melts, and the internal adsorption in solids (V. Svechnikov, V. Arkharov, Yeremenko, Naidych, Yu. Krakovetsky-Kocherzhynsky). A series of experiments was conducted on the synthesis and crystallochemistry of refractory bonds, their physicochemical and mechanical properties, and the technology for producing such materials (Samsonov, T. Kosolapova, V. Obolonchik, M. Smolin, Ye. Hladyshevsky). Frantsevych and I. Radomyselsky refined the technology and equipment for producing iron powder.

Methods for producing superthin fibers and preparing porous materials out of discrete fibers were developed. New materials were created, including frictional and frictionless, filter (I. Fedorchenko), resistant (G. Gnesin, O. Teodorovych), and superhard instrumental materials (V. Bakul, Frantsevych, H. Kariuk, Kurdiumov, O. Pyliankevych), materials with special physical properties (O. Goldman, M. Lysytsia, K. Tovstiuk, L. Palatnyk), and superconducting alloys (B. Lazarev). Yu. Taranzhovnir developed the theory of the multiphase crystallization of eutectic alloys; S. Tresviatsky studied diagrams of the oxide states of rare-earth elements; K. Starodubov developed the theoretical foundations, technology, and equipment for the strengthening heat treatment of cast products; and B. Hrozin proposed a complex method of investigating the surface-active layers of metals.

Advances were made in the technological processes of metalization, particularly the gas-detonation method, and in the soldering of nonmetallic materials. Fundamental work was done by O. Aksonov and V. Popov on friction and wear resistance in metals, by K. Bunin on phase transitions in metals, by O. Romaniv on the mechanics of the corrosive destruction of metals, by V. Trufiakov on the strength of materials and structures, by G. Zemskov on the chemical-thermal treatment of metals and alloys, by D. Dudko on the plasma treatment of materials, and by M. Braun on new methods of fracture analysis.

Recent materials science research in Ukraine is focused on developing chemical and technological processes for producing new substances and materials with more efficient and environmentally benign properties as well as investigating the real dislocational structure of monocrystals of refractory metals.

Results appear in Russian-language scientific journals, published in Ukraine, such as *Poroshkovaia metallurgiiia*, *Sverkhтвердые материалы*, *Металлофизика*, *Физико-химическая механика материалов*, and *Проблемы прочности*.

Materialy z etnografii ta mystetstvoznavstva (Materials in Ethnography and Art Studies). An annual collection of the Ukrainian State Museum of Ethnography and Crafts, published in Kiev from 1954 to 1963 (a total of eight volumes). The first three issues were titled *Materialy z etnografii ta khudozhn'oho promyslu*. The serial published articles on ethnography and the history of Ukrainian culture and art, concentrating on Galicia, Transcarpathia, Polisia, and the Carpathian region. Its chief editors were I. Symonenko, M. Ivasiuta, and Yu. Hoshko.

Materiialy do ukrains'koï bibliografii (Materials for Ukrainian Bibliography). An irregular serial published in Lviv by the Bibliographic Commission of the Shevchenko Scientific Society from 1909 to 1939. A total of eight volumes appeared. The first three volumes consisted of I. Levytsky's bibliography of Ukrainian publications in the Austro-Hungarian Empire. Many of the subsequent volumes were edited by V. Doroshenko.

Materiialy do ukrains'koï etnologii (Materials on Ukrainian Ethnology). An annual publication of the *Ethnographic Commission of the Shevchenko Scientific Society, published in Lviv in 1899–1928 (a total of 22 volumes). The collection was called first *Materiialy do ukrains'korus'koï etnologii* (16 vols, 1899–1908) and then *Materiialy do ukrains'koï etnologii* (1909–19). In 1928 it reappeared briefly as *Materiialy do etnologii i antropologii*. It contained articles on Ukrainian and non-Ukrainian ethnography, folklore, culture, and history; book reviews; and surveys of developments in ethnographic studies. The editors of the collection were F. Vovk (1899–1905), I. Franko (1906–15), and V. Hnatiuk. Among its many contributors were F. Kolessa, V. Shukhevych, M. Rusov, S. Liudkevych, I. Rakovsky, V. Domanytsky, and K. Hrushevskia.

Mathematics. Mathematics can be defined as the systematic treatment of magnitude, relationships between figures and forms, and relations between quantities expressed symbolically.

Elements of mathematical knowledge are found in the early history of Ukraine. In Kievan Rus' the requirements of commercial transactions, trade, taxation, land measurement, construction, architecture, military fortifications, navigation, the calendar, and other undertakings contributed not only to the development of a specific system of measurement but also to the application of elementary rules of arithmetic and geometry. The Rus' way of counting was used until the introduction of the decimal system at the end of the 17th century. Some explanations of Aristotelian definitions of abstract mathematics is contained in the *Izbornik* of Sviatoslav (1073), and some mathematical problems are contained in *Ruskaia Pravda*. The first textbooks on mathematics appeared in Ukrainian in the 17th century.

One of the most distinguished professors of mathematics and physics at the Kievan Mohyla Academy was T.

*Prokopovych. His courses in mathematics at the academy were the first in Ukraine and in the Russian Empire. Although mathematics was taught at Lviv University, it was not a subject of serious study until the second half of the 19th century.

Beginning of the 19th century to 1917. The development of mathematics as a separate science began in Ukraine early in the 19th century with the establishment of universities in Kharkiv (1805) and Kiev (1834). The growth of this discipline by the later 19th century is reflected in the establishment of the *Kharkiv Mathematics Society (1879) and the *Kiev Physics and Mathematics Society (1890). A significant role in the development of mathematics was also played by the founding of universities in Odessa (1865) and Chernivtsi (1875). Since 1897 the mathematical–natural sciences–medical section of the *Shevchenko Scientific Society (NTSh) has published transactions that include articles on mathematics and on Ukrainian mathematical terminology.

One of the first mathematicians and physicists at Kharkiv University was T. *Osipovsky, whose main contribution to mathematics was a three-volume treatise (1801–23) that was a basic university textbook for many years. The first Ukrainian mathematician to gain world renown was M. *Ostrohradsky. In addition to original contributions to number theory, algebra, and geometry, he is best known for his contributions in mathematical analysis and, in particular, for his work on the transformation of multiple integrals, a theory of which he (together with G. Green and K. Gauss) is regarded as the founder. The so-called Green-Ostrohradsky or Gauss-Ostrohradsky theorem forms a basis for the modern study of partial differential equations, variational calculus, theoretical mechanics, and electromagnetism. V. *Buniakovsky is well known for his work in mathematical analysis, number theory, and probability theory. Ostrohradsky's students I. Sokolov and E. Beyer joined the staff of Kharkiv University in 1839 and 1845 respectively. Sokolov's teaching and research were in theoretical mechanics; Beyer was primarily interested in differential equations and the theory of probability. Beyer's course on probability initiated a field of study for which Kharkiv University became well known. In the 1870s and 1880s most mathematics courses were taught by D. Delarue and M. Kovalsky, both graduates of Kharkiv University, and by K. *Andreev, V. Ishmenetsky, and M. *Tykhomandrytsky.

At the end of the 19th and the beginning of the 20th century Kharkiv University played a particularly significant role in the development of mathematics in Ukraine. During that time its faculty was joined by a group of young mathematicians that included A. *Liapunov, V. *Steklov, A. Psheborsky, S. *Bernshtein, and D. *Syntsov. They gained world recognition for fundamental results: Liapunov's stability theory of motion and central limit theorem of probability; Steklov's results in the theories of potential and heat conduction, the existence of Green's function and its analytic representation, the use of eigenfunction expansion, and the notion of completeness in the solvability of boundary value problems in mathematical physics; Psheborsky's results in the theory of elliptic functions and differential geometry; Bernshtein's new method of determining the solvability of ordinary and partial differential equations, constructive function theory, and the axiomatic theory of probability; and Syntsov's theory of conics and the geometry of differential equations.

At Kiev University S. Vyzhevsky, M. *Diachenko, and A. Tykhomandrytsky taught mathematics from its founding in 1834. In the later part of the 19th century important research was conducted by M. *Vashchenko-Zakharchenko (the use of operational calculus in determining the solvability of linear differential equations, theory of probability, history of mathematics), V. *Yermakov (new method of determining the solvability of the canonical system of dynamics, some problems of algebra and the convergence of series, theory of probability), B. *Bukreev (theory and applications of Fuchsian functions of rank zero, projective and non-Euclidean geometry, study of differential invariants and parameters in the theory of surfaces, history of mathematics), and P. Pokrovsky (theory of ultraelliptic functions).

At the beginning of the 20th century the mathematics faculty in Kiev was joined by three talented newcomers, Yu. *Pfeiffer (1900), P. *Voronets (1899), and D. *Grave (1902). Pfeiffer's most important contributions were to the development of the theory of partial differential equations along the lines initiated by the famous Norwegian mathematician S. Lie. Voronets's most important work was done in mechanics when in 1908 he derived the equation of motion for nonholonomic systems. Grave did some work in applied mathematics and mechanics, but his main interest was in algebra and number theory, where he obtained some new results in Galois theory and the theory of ideals. Several of his students (including O. Shmidt, M. Chebotarev, B. Delone, V. Velmin, M. Kravchuk, E. Zhilinsky, and A. Ostrovsky) later became world-class algebraists. With Grave as the founder of the Kiev algebra school, Kiev became by 1917 the leading center of algebraic studies in Ukraine.

Mathematical research at Odessa University in the 1890s was conducted by V. Preobrazhensky (calculus, differential equations), I. *Sleshynsky (method of least squares, mathematical logic, theory of probability), and S. *Yaroshenko (analytic geometry, least squares method). At the turn of the century the mathematics faculty was enlarged by Sleshynsky's promising graduates I. Tymchenko (differential equations, history of mathematics, analytic functions), V. Tsimmerman (variational calculus, projective geometry), and E. Bunitzky (integral equations, ordinary differential equations, construction of Green's functions for n th order equations). This group was further strengthened by the addition of the two talented mathematicians V. Kahan (axiomatic treatment of Euclidean geometry different from Hilbert axiomatics, study of Lobachevsky geometry) and S. *Shatunovsky (algebra, geometry, number theory, analysis, constructive approach to mathematics).

In the later 19th century, mathematical research at Lviv University was conducted by W. Zmurko (analytic geometry, algebra, and mathematical analysis) and later by J. Puzyna (analytic function theory). The basic mathematics courses at the university were taught by Puzyna and J. Rajewski. Important research activity began in 1909, when W. Sierpiński started to teach analytic number theory, theory of functions, and mathematical analysis. In 1913 Z. Janiszewski joined the faculty, and in 1917 Lviv University attracted the talented mathematician H. Steinhaus, thus initiating the famous Lviv school of functional analysis. Mathematics was also taught at the Lviv Polytechnic (today the Lviv Polytechnical Institute).

From 1893 to 1917 the mathematical-natural sciences-medical section of the NTS published 17 volumes of its *Zapysky*. It provided a valuable forum for Ukrainian mathematicians, such as V. *Levytsky, M. Chaikivsky, and M. *Zarytsky. The major emphasis of the section was to develop Ukrainian terminology in mathematics and the natural sciences. The noted Ukrainian-born mathematician Ya. *Kulyk worked at Charles University in Prague (1826-63).

After 1917. The structure of the Ukrainian Academy of Sciences included a division of physics and mathematics. The entire Ukrainian educational system, however, was now required to have a practical orientation. One result was that in the 1920s D. Grave discontinued the algebra seminar which formed the basis of his famous prerevolutionary Kiev school of algebra, but led a seminar in applied mathematics devoted to various technological problems. The abolition of the university system in Ukraine provided additional difficulties and spurred a wholesale departure of mathematicians from Ukraine for universities in Moscow, Leningrad, and Kazan. Scholars such as Shmidt, Delone, and Chebotarev left and later became founders of different algebraic schools at their respective universities. Kahan left Odessa in 1923 for Moscow University, where he became the founder of a school of tensor differential geometry.

During the 1920s the Academy of Sciences in Kiev and its affiliates – commissions on pure mathematics (chaired by Yu. Pfeiffer), applied mathematics (Grave), and mathematical statistics (Kravchuk), and the chair of mathematical physics (M. *Krylov) – assumed the leading role in mathematical research in Ukraine. Some research was also done at the mathematical chairs of institutes of people's education and of polytechnical and other institutes.

In the 1930s a shift in Soviet policy led to the reorganization of research and educational institutions in Ukraine, but mathematical research continued to be harnessed to the needs of the heavy industrialization program in Ukraine. The academy became an association of 36 branch institutes. The *Institute of Mathematics was established in 1934 out of three mathematical commissions and Grave served as the institute's first director (1934-9). After the Soviet occupation of Galicia in 1939 and Bukovyna in 1940, several distinguished Polish mathematicians of the well-known Lviv school of functional analysis (notably S. *Banach) and some mathematicians from Chernivtsi University became affiliated with the institute. During Yu. *Mytropolsky's directorship (1958-88), the institute experienced a great expansion in research personnel and mathematical disciplines, and an improvement in the quality of research. Until the middle of 1941 the Kiev institute was a co-ordinating center for mathematical work done at the universities in Kiev, Kharkiv, Odessa, Dnipropetrovske, Lviv, and Chernivtsi. At present, mathematical research is conducted at various institutes of the Academy of Sciences, including the institutes of Mathematics (Kiev), Cybernetics (Kiev), Theoretical Physics (Kiev and Kharkiv), Applied Mechanics and Mathematics (Lviv), and Applied Mathematics and Mechanics (Donetske). There is a mathematical section at the Physical-Technical Institute of Low Temperatures (Kharkiv) and there are mathematics chairs at nine universities, at polytechnical institutes, computer centers, and other institutions.

Algebra, geometry, topology. The development of al-

gebra, including number theory, in Ukraine passed through two stages. The first began with the founding of the Kiev school of algebra and number theory by Grave in the early 20th century and ended in the late 1920s when Grave was ordered to shift his research and teaching activities from algebra (including number theory) to mechanics and various problems in applied mathematics. During the second decade of this stage Grave and his former students Shmidt, Delone, and Chebotarev obtained important results in Galois theory and other areas. At the same time fundamental contributions to the theory of semigroups were made by A. Sushkevych, the proponent of a concept known as the Sushkevych kernel. He was also the founder of the theory of quasi-groups. During the 1930s new results in algebra were obtained by Sushkevych, Kravchuk, and M. Krein from Odessa.

The publication of the works of H. Vorony in 1952–3 provided a fresh stimulus, and from the mid-1950s Kiev began to regain its position as a strong center of algebraic studies. In 1955 the noted algebraist L. Kaluzhnin, who worked in the area of group theory, occupied the fledgling chair of algebra at Kiev University. In 1956 V. *Hlushkov joined the AN URSR (now ANU) Institute of Mathematics. He received world recognition for his fundamental work in topological algebras and cybernetics. In the early 1950s V. Velmin returned to Kiev as a professor of algebra and number theory, and in 1952–4 he published his lectures on the theory of algebraic fields. In the mid-1960s an algebra section was established at the Institute of Mathematics of the ANU. Its longtime director, S. Chernikov, obtained results in the study of locally solvable and locally nilpotent groups and other areas and established a useful principle of limiting solutions in the study of the algebraic theory of linear inequalities. In the early 1960s the work of Hlushkov on topological groups was continued by V. Charin, who joined Chernikov, Kaluzhnin, and the talented younger algebraists D. Zaitsev and Ya. Sysak, and later by Yu. Drozd at Kiev University in studying the theory of groups of various types. Work in linear algebra was done by A. Roiter, L. Nazarova, and V. Bondarenko. Sushkevych's work on semigroups was continued in the 1960s by his student L. Hlushkin. The chair of algebra and number theory at Kharkiv University was directed by Yu. Lulich, who led studies of periodic and almost periodic semigroups in Banach and other spaces, while Drozd at Kiev University studied mostly the representation of finite groups.

During the 1920s some important work in tensor differential geometry was initiated in Odessa, and interesting results in kinematic geometry were obtained in Dnipropetrovske. In Kiev, B. Bukreev continued his main research into various geometries and from the 1940s concentrated on aspects of Lobachevsky geometry. During that time interesting results in geometric constructions in the Lobachevsky plane were also obtained by O. Smorhzhhevsky of the Kiev Polytechnical Institute. After 1961 geometry was taught at Kiev University by M. Kovantsov, who obtained significant results in nonholonomic and projective differential geometries. Kharkiv, however, emerged as the most important center of geometry studies in Ukraine, the university and the ANU Physical-Technical Institute of Low Temperatures playing a leading role in this regard. The base for a Kharkiv school of geometry was laid by Syntsov and his students (including Ya. Blank

and D. Hordiiievsky). O. *Pohorielov, who taught at Kharkiv University from 1947, assumed the leadership of the school and turned it into a leading scientific center. V. Drinfeld, a member of that center, was awarded the Fields Medal in mathematics in 1990 for his contributions to algebraic geometry, number theory, and quantum group theory.

In the 1960s a group of Kiev mathematicians at the ANU Institute of Mathematics began the study of topological properties of functions and transformations, including problems in Morse theory and κ -theory. Yu. Trokhymchuk has shown that if the transformation of a domain in an n -dimensional Euclidean space into itself is nullmeasurable and its local degree is defined and positive, except for a certain set, then it is isolated and open on the entire domain, and its local degree is positive everywhere. A series of theorems characterizing holomorphic mappings in terms of local geometric characteristics was proved by A. Bodnar in the study of multidimensional analogues of derivative operators in complex spaces. Using multivalued mappings Yu. Zilinsky obtained the geometrical criteria for strong linear convexity of compacts and domains in multidimensional complex space and solved a number of problems concerning the transformation of domains into manifolds. V. Sharko found necessary and sufficient conditions for the exact Morse function defined on a simply connected manifold to be isotopic, devised a method for the construction of the minimal Morse function on a non-simply-connected manifold, and developed substantially the finite-dimensional Morse theory and its applications. Quite general cover theorems and other results were obtained by P. Tamrazov. Morse functions were also studied by E. Mykhailiuk and I. Solopko.

Theory of functions. The most fruitful development in the theory of functions has been in the theory of approximation of functions of real and complex variables by algebraic or trigonometric polynomials or other simpler functions.

After 1917 S. Bernshtein continued his work at Kharkiv University in constructive function theory, for which he became internationally known in the early 1920s. In the 1920s and early 1930s Bernshtein and members of his school obtained important results in the study of absolutely monotone functions and entire functions with finite degrees. From the many members of the Kharkiv school significant contributions were made by Ya. Geronimus (orthogonal polynomials, studies of extremal properties of trigonometric and rational polynomials), V. Honcharov (approximation and interpolation of functions), B. Levin (theory of entire functions with regular growth), and B. Levitan (study of almost periodic functions defined in all of \mathbb{R}). In 1933 N. *Akhiezer joined the Kharkiv school and soon became its leading member. His most outstanding work consisted of deep approximation results in the constructive function theory, including the solution of the problem of Zolotarev. Outstanding results in the approximation theory were obtained in the 1950s by V. *Marchenko of the Physical-Technical Institute in Kharkiv including the study of almost periodic functions in \mathbb{R} . Important contributions for the latter class of functions were also made in the 1930s to 1950s by O. Kovanko and I. Sokolov in Lviv, N. Bogoliubov, M. Kravchuk, and S. Zukhovyt'sky in Kiev, and M. Krein and B. Korenblum in Odessa. In the mid-1930s Ye. *Remez made a significant contribution to

a new aspect of the constructive function theory by developing a rigorous numerical method known as the Remez algorithm. Subsequently a similar algorithm was constructed for the rational approximation of continuous functions defined on a segment.

In the mid-1930s the works of A. Kolmogorov and J. Favard laid the foundation for the study of a new problem (known as the extremal problem on classes of functions). In 1937 Akhiezer and Krein solved the extremal problem in space C for differentiable periodic functions, and somewhat later Akhiezer solved it for analytic functions. In 1940 S. Nikolsky of Dnipropetrovske University extended the result of Kolmogorov to other classical methods of approximation (Fejer method, interpolation polynomial, and others), to different classes of functions, and for spaces with integral and other norms. Favard proposed a conjecture known as the Favard problem, which was studied extensively in both the former Soviet Union and Europe, until it was solved completely in 1959 by V. *Dziadyk. A by-product of Dziadyk's work on aspects of the Favard problem provided the best linear approximation on classes of functions with bounded fractional derivatives. The problem of finding the exact least upper bound (l.u.b.) of the errors for the class of Hölder continuous periodic functions when the approximation is given by the linear Favard method was solved in 1961 by M. Korniiichuk of Dnipropetrovske University. In 1970 Korniiichuk solved that problem in its complete generality by inventing a new method, which was subsequently used by various authors. In the late 1960s and early 1970s Korniiichuk, Dziadyk, and A. Stepanets developed a new method for finding asymptotic l.u.b. when smooth functions are approximated by general Fourier summation polynomials. This method was later extended by Stepanets to the multidimensional case.

Korniiichuk joined Dziadyk at the ANU Institute of Mathematics in 1974, thereby making Kiev a strong center for the study of the approximation theory of functions. Dziadyk and his students V. Konovalov and L. Shevchuk developed new methods for the solution of extremal problems and found the best conditions to ensure the continuation of a function in a Sobolev space from some plane set to the entire plane. Korniiichuk and his school continued to work on the theory of approximation of functions, which led in 1987 to the publication of a monograph on exact constants in the theory of approximation (1987). In 1983 Stepanets developed a new approach in the classification of periodic functions. Yu. Melnyk developed new effective methods for the construction of entire functions with given asymptotic properties, which were then applied to the theory of system representation. V. Havryliuk found necessary and sufficient conditions for the convergence of multiple singular integrals at Lebesgue points of summable functions. These types of results in real function theory were extended by Konovalov, Shevchuk, P. Zaderei, and others. Important work in the real function theory was also carried on in Kharkiv (Y. Ostrovsky, V. Protsenko), Dnipropetrovske (A. Timan), Lviv, Odessa, and other centers.

The development of the theory of functions of a complex variable was influenced by the Moscow mathematician M. *Lavrentev, who was appointed director of the Institute of Mathematics in Kiev (1939–41, 1945–8) during the height of industrialization and hydrotechnical con-

struction in Ukraine. Lavrentev made fundamental contributions to the theory of conformal and quasi-conformal mappings and its diverse application to various fields, including industrial development. His theories were further developed by a number of his students and associates in Ukraine and elsewhere. P. Bilinsky of Lviv University made significant contributions in the 1950s to the differentiability and the behavior theory of quasi-conformal mappings at isolated points and to structure theory. He was the first to introduce the basic variational method into the theory of quasi-conical maps. His students S. Krushkal and P. Biluta continued his work. In the 1960s H. *Suvorov of Donetsk extended a number of Lavrentev's results for conformal and quasi-conformal mappings, including stability and differentiability theorems, to more general classes of plane and spatial transformations. Original results in the theory of functions of a complex variable were obtained in the 1950s and 1960s by H. *Polozhii of Kiev, who introduced a new notion of p -analytic functions, defined the notions of derivative and integral for these functions, developed their calculus, obtained a generalized Cauchy formula, and devised a new approximation method for solution of problems in elasticity and filtration. His results were further developed by his students and I. *Lia-shko, who solved a series of problems in the theory of filtration. P. Filchakov obtained important results in the effective approximate construction of the Riemann function, the determination of constants in the Kristoffel-Schwartz integral, and the development of a method, based on the earlier results of Lavrentev, for the solution of general problems of plane filtration in homogeneous and anisotropic grounds. Efforts of Lavrentev's and his colleagues' research were directed after 1945 toward the development of methods that laid the foundation for the massive hydrotechnical construction of dams, canals, and bridges on the Volga, Dnieper, and Don rivers.

Significant results in the theory of general analytical functions were obtained in the 1960s and 1970s by I. *Danyliuk of Donetsk who used them to solve complicated PDEs and singular integral equations. Dziadyk obtained a simple geometrical characterization of analytic functions and their conjugates and introduced new ideas into their study. P. Tamrazov solved an important general problem concerning the limiting behavior of the holomorphic function and also solved a number of extremal problems for conformal mappings. I. Mitiuk obtained new results for univalent and multivalent conformal mappings and developed new methods for their study. Using some topological results of Reshetniak of the late 1960s, Yu. Trokhymchuk showed that the well-known theorems of D. Menshov on conformal mappings are valid in n -dimensional Euclidean space for n larger than two. Earlier V. Zmorovych of Kiev extended significantly the Riesz-Gerglotz theorem to obtain new integral representation theorems for certain classes of univalent and nonunivalent injective holomorphic and meromorphic functions, by means of which theorems he solved many extremal problems. The approach of integral representation used widely by Kiev mathematicians in the theory of univalent functions (1948–66) was later 'rediscovered' and developed anew by Western mathematicians.

Fundamental and multifaceted contributions to the theory of entire and meromorphic functions were made by scholars based in Kharkiv (Bernshtein, Levin, Honcharov,

Akhiiezer, Ostrovsky, and Marchenko), Odessa (Krein, V. Potapov), and Lviv (A. Goldberg), and earlier by Kravchuk and Chebotarev. The problem of approximating various classes of functions of a complex variable by polynomials and rational functions was considered by Lavrentev and Bilinsky. But the constructive theory of functions of complex variables (similar to the one originated by Bernshtein for functions of real variables) arose from the work of Dziadyk in the late 1950s and in new methods he described in a series of outstanding papers in the 1960s and 1970s. Significant results were also obtained in the 1970s and 1980s by his former students Shevchuk, V. Bely, A. Holub, and V. Andriievsky in Donetsk and Konovalov, Tamrazov, V. Temlakov, and Zaderei in Kiev.

Functional analysis and its applications. The development of functional analysis and its applications was a fruitful field in Ukraine, especially after 1950, when the renowned Odessa school was joined by strong functional analysis groups in Kiev (N. Bogoliubov, O. Parasiuk, Yu. Berezansky, Yu. Daletsky, M. Horbachuk, and H. Kats), Kharkiv (Akhiezer, Marchenko, Ostrovsky, I. Glazmann, M. Kadets, L. Pastur, and D. Milman), Donetsk (I. Skrypnyk, Danyliuk), Lviv (V. Lantse, A. Plishko), and Chernivtsi (M. Popov).

The first major results in Ukraine were obtained in 1935–7 by Bogoliubov and Krylov, who proved the existence of an invariant measure in dynamical systems that had been simply assumed until then. This proof was essential to the development of a general theory. During the first phase of development (1935–50) M. Krein obtained fundamental and, in some cases, pioneering results in areas such as cones in Banach spaces, eigenvalue problems for positive linear operators, and topology and geometry in Banach spaces. Some of these results are now found in standard books on functional analysis as theorems of Krein, Krein-Rutman, Krein-Shmulian, Krein-Milman, Krein-Krasnoselsky, and so on. The development of functional analysis in Ukraine was enhanced after the annexation of Western Ukraine when one of the founders of its study, S. Banach of Lviv, joined the Ukrainian mathematical community. In the 1950s important topological and geometrical properties of Banach spaces were obtained by Kadets, Milman, and Levin and a series of results on extension of operators (different from Krein's) were obtained by I. Glazmann of Kharkiv and Lantse of Lviv. The first essential step toward studying the spectral theory was taken in the late 1940s by Krein, who later applied his results and the theory of entire operators to the Sturm-Liouville problem on semiaxis. In 1956–65 Berezansky developed a new abstract method in the expansion theory in Hilbert spaces and used it to extend Krein's results to partial differential operators of a certain type in functional Hilbert spaces. He also showed that an abstract self-adjoint operator in Hilbert space admits an expansion in terms of its generalized eigenvectors. Some results of the latter type were also obtained by Kats. In the late 1970s and early 1980s Berezansky further extended his results. The study of differential equations which can be written only in bilinear forms was undertaken by M. Horbachuk and his students in Kiev. In the 1970s and 1980s V. Koshmanenko of Kiev developed a general theory of dissipative operators. During this time Berezansky together with his students H. Uson, Yu. Kondriatev, and Yu. Samoilenko developed a spectral theory of elliptic operators with

an infinite number of variables and applied it to some operators in quantum field theory. Further results in this direction were obtained by L. Nizhnyk for nonelliptic operators.

The first basic results on the asymptotic behavior of the spectral measure and of the spectral function for the Sturm-Liouville equation were obtained in the early 1950s by Marchenko, who later obtained similar results for the Schrödinger equation. The so-called inverse problem for Sturm-Liouville was solved independently by different methods in the 1950s by Marchenko, Krein, and by I. Gelfand and B. Levitan in Moscow. Jointly with Y. Ostrovsky, Marchenko also solved the eigenvalue problem for the Hill equation with periodic boundary conditions and summarized the results in his monograph *Sturm-Liouville Operators and Applications* (1986). Berezansky was the first to study the inverse problem for equations involving partial derivatives or partial differences. In the 1960s Nizhnyk began detailed study of direct and inverse problems in nonstationary dissipation and, in particular, the system of Dirac equations. In 1947–8 M. Krein began the study of equations in Banach space involving bounded operator coefficients with emphasis on stability. This work was continued by Daletsky, S. Krein, and others. In 1949 Bogoliubov and B. Khatset showed that some equilibrium problems in statistical mechanics lead to the solvability of an operator equation of the above type in a Banach space of distributions. The case of differential equations whose coefficients are unbounded operators in Hilbert space was studied by Horbachuk and others. The study of spectral properties, completeness of generalized eigenvectors, resolvents, and other properties of non-self-adjoint operators and operator-functions was undertaken in the 1950s to 1980s by Yu. Berezansky, M. Horbachuk, M. Krein, V. Marchenko, V. Lantse and others. In the 1950s to 1970s M. Krein developed the theory of linear operators in spaces with indefinite metric. A. Kuzhel of Kiev dealt with spectral analysis and extensions of various classes of linear operators in the 1960s to 1980s.

Berezansky and Kats introduced and studied the abstract form of Sobolev spaces with positive and negative norms. The application of these spaces disclosed a series of interesting facts about partial differential equations and provided a framework for other work. Berezansky, V. Didenko, Ya. Roitberg, and others studied the Dirichlet boundary value problem for elliptic equations, smoothness of solutions, and properties of Green's functions. O. Parasiuk used the generalized functions to study the solvability of integral equations. Together with Bogoliubov he proved a fundamental theorem on the possibility of regularization of a matrix of dissipation for any order of the perturbation theory. These results were later applied to the construction of a theory of electromagnetic and weak interactions. Since 1970 I. Skrypnyk has made fundamental contributions to the development of nonlinear functional analysis, in which he introduced a new class of type (α) nonlinear operators acting from a Banach space to its dual, developed for it a detailed topological degree theory, and applied this theory to obtain new existence theorems for a general class of abstract and concrete nonlinear partial differential equations in mechanics, elasticity, mathematical physics, and other fields. Direct methods of qualitative spectral analysis were applied by Glazmann in the 1960s to singular differential operators.

Mathematical physics and nonlinear mechanics. The first important and new results in mathematical physics in Ukraine were contained in pioneering works published in the late 1920s and early 1930s by Krylov and Bogoliubov, who founded the renowned Krylov-Bogoliubov school. They laid the foundation of nonlinear mechanics, a new branch of mathematical physics that deals with the development of effective mathematical methods in the study of nonlinear oscillations by means of nonlinear differential equations involving a small parameter. Bogoliubov's most important contribution, the so-called method of averaging, was made in 1945. In 1949 Mytropolsky began a sustained and systematic study of this and other asymptotic methods as well as the construction of a general theory of dynamic systems. He developed new asymptotic methods with applications to problems in contemporary physics and technology and, together with Bogoliubov, published (1961) a classic work on asymptotic methods in the theory of nonlinear oscillations. The ideas of Krylov and Bogoliubov were further developed in monographs by O. Lypkova (1973), B. Moseenkov (1976), D. Martyniuk (1979), A. Molchanov (1981), H. Khoma (1983), A. Samoilenko and D. Martyniuk (1985), Samoilenko (1987), and A. Lopatin (1988), all coauthored by Mytropolsky.

The development of mathematical physics in Ukraine after the 1930s was undertaken by Bogoliubov, Parasiuk, V. Fushchych, D. Petryna, L. Pastur, L. Drimfold, and others. Bogoliubov again made pioneering contributions. He was the first to provide the mathematical foundation for a consistent microscopic theory of superfluidity (1947) and constructed a mathematical theory of superconductivity (1958). The latter theory represents a fundamental achievement in theoretical physics. He also derived equations in hydrodynamics and obtained important results in quantum statistics. Together with Parasiuk he provided the mathematical foundation for the method of renormalization in quantum field theory – the so-called Bogoliubov-Parasiuk theorem. Continuing these studies, Parasiuk developed a theorem in the theory of generalized functions analogous to E. Titchmarsh's theorem, and obtained new results in the theory of plasticity, and dynamical systems. Fushchych studied the symmetric properties of equations of mathematical physics and introduced an effective method (distinct from the method of S. Lie) for the study of symmetric properties of solutions of partial differential equations.

Since the 1970s L. Pastur has dealt with the spectral properties of various operators, an area of study which relates to mathematical physics, theoretical physics, and in particular, the theory of disordered condensed systems. In 1964 Petryna obtained important results in the study of analytic properties of the enclosed Feynman diagram. Petryna, V. Garasimenko, and V. Malyshev studied solutions of Bogoliubov equations for an infinite three-dimensional system of particles.

Theory of differential equations. Mathematicians such as Bernshtein, Pfeiffer, Krylov, Bogoliubov, Yu. *Sokolov, M. Krein, Daletsky, Lavrentev, Y. *Shtokalo, Ya. *Lopatynsky, Marchenko, Mytropolsky, Berezansky, Danyliuk, Skrypnyk, A. *Samoilenko, M. Perestiuk, O. *Sharkovsky, and A. Myshkis and their students made some important contributions to the theory of ordinary, functional, and partial differential equations (ODEs, FDES, and PDES). Fundamental applications to mechanics, elas-

ticity, hydrodynamics, geometry, and other fields are contained in the works of Krylov, Bogoliubov, Yu. Sokolov, O. Dynnyk, H. Savyn, Pohorielov, L. Pastur, M. Lavrentev, and others. In addition to the well-known Kiev school of nonlinear mechanics and the school of theoretical physics founded by Bogoliubov, the elasticity school founded in the late 1920s by O. Dynnyk in Dnipropetrovsk had a considerable influence on the development of the theory of differential equations in Ukraine, especially on the development of asymptotic methods and their application to various types of nonlinear ODEs and FDES. As well, Yu. Sokolov obtained significant results in the theory of differential equations, which he applied to problems of analytical mechanics, and developed the Sokolov method (averaging method with functional corrections).

In 1955 Bogoliubov and Mytropolsky published a monograph on asymptotic methods in the theory of nonlinear oscillations. It led to further refinements of the theory of asymptotic methods and to new methods of solving nonlinear ODEs and FDES. In the 1960s the Kiev school of nonlinear mechanics shifted its attention to at least three areas that involve certain classes of ODEs and FDES: systems of nonlinear ODEs with impulsive action (culminating in A. Samoilenko and M. Perestiuk's monograph in 1987), ODEs with delay and/or deviating argument (A. Myshkis, Mytropolsky, Martyniuk, and A. Samoilenko), and FDES and related equations (Sharkovsky, E. Romanenko, and H. Pelekh).

Since the mid-1940s the qualitative theory, particularly the stability theory of solutions of systems of linear ODEs, has become a subject of considerable study. Important contributions to linear ODEs with almost-periodic and quasi-periodic coefficients were made in the 1940s and 1950s by Shtokalo, who was the first to extend the applicability of the operational method to linear ODEs with variable coefficients. M. Krein studied the problem of the existence and distributions of stability and instability zones for linear Hamiltonian systems with periodic coefficients, extended Liapunov's results to systems of equations, and established the connection between the eigenvalues of certain differential operators and the boundary of the stability zones. For these systems Krein also obtained important results in the theory of direct and inverse spectral problems. In the 1960s M. Gavrilov and his students in Odessa obtained new and very general criteria for stability in the Liapunov sense of solutions of linear systems and even nonlinear ODEs. Interesting results concerning the asymptotic behavior of solutions of linear ODEs and systems of ODEs were obtained in the 1950 and 1960s by S. Feshchenko, M. Shkil, and I. Rapoport under various conditions on the coefficients.

In the 1960s V. Skorobohatko and E. Bobyk in Lviv found the necessary and sufficient conditions for the solvability of the Vallée-Poussin problem for linear ODEs of the n th order in an arbitrary interval, and the analogous sufficient condition for the solvability of nonlinear ODEs of any order. Fundamental results for direct and inverse spectral problems for one-dimensional Sturm-Liouville equations were obtained by Marchenko. Qualitative studies of and spectral analysis of singular differential operators were done by Glazman in the 1960s.

Although his work at Kharkiv University after 1917 dealt mostly with the theory of probability and constructive function theory, Bernshtein also made qualitative

studies of some PDEs. In Kiev Pfeiffer continued his studies of linear systems of PDEs of the first order with one unknown function. While in Ukraine during the 1940s, Lavrentev developed the theory of quasi-conformal mappings that determined a new geometric approach to the theory of PDEs with applications to hydrodynamics, filtration detonation, and other fields. Some of his results in the theory of filtration were extended by Filchakov and his students. The foundation of the general theory of boundary value problems for linear systems of PDEs of elliptic type is contained in the works of Lopatynsky. In addition to making other important contributions to the theory of linear PDEs, he was the first to identify the condition for the compatibility of the coefficients of the elliptic system with the coefficients of the boundary operator, now known as the Lopatynsky condition. In the 1950s Berezansky was the first to develop a method for dealing with the inverse problem of spectral analysis for PDEs. Among other results, he developed the spectral theory for self-adjoint PDEs in unbounded domains. Nizhnyk studied the nature of the spectrum for nonelliptic PDEs. In addition to his work on systems of ODEs with delay in the 1960 and 1970s, Myshkis obtained interesting results for PDEs of hyperbolic and other types. In his work on PDEs Skorobohatko obtained a generalization of the Gerlotz formula, solved the Cauchy problem in case of multiple roots of the characteristic equation, and made a deep study of the solvability of the Dirichlet problem for systems of elliptic PDEs. In the 1970s and 1980s the asymptotic methods of nonlinear mechanics of Krylov, Bogoliubov, and Mytropolsky were extended to PDEs in monographs by Moseenkov, Khoma, A. Bakai, and Yu. Samoilenko, all written jointly with Mytropolsky. The celebrated Stefan problem was studied in the 1980s by several researchers from Donetsk, including Danyliuk. The Kordeweg-de Vries equation was solved by V. Marchenko in 1972 and the Cauchy problem for the Kordeweg-de Vries equation was studied in the 1980s by V. Kotliarov and E. Khrysllov.

Since the 1960s Danyliuk has made significant contributions to the theory of PDEs and nonlinear problems in mathematical physics with free (unknown) boundaries. He applied his results to various problems of physics (such as the Stefan problem), mechanics, and other fields. Since 1970 deep and systematic studies of abstract and concrete very general nonlinear elliptic PDEs of the higher order of divergence type were conducted by Skrypnyk, who developed and worked with a new topological degree theory for the abstract nonlinear operator of type (α) from a separable Banach space to its dual. He extended his results to some nonelliptic PDEs and to elliptic equations which are not of divergence form.

Probability and statistics. Until 1917 the theory of probability and mathematical statistics was developed in Ukraine by mathematicians in Kharkiv (A. Pavlovsky, M. Tykhomandrytsky, Liapunov, and Bernshtein), Kiev (Vashchenko-Zakharchenko, V. Yermakov, and Ye. Slutsky), and Odessa (Sleshytsky). The development of the theory in Ukraine after 1917 can be divided into two phases, 1917–45 and 1945 to the present. The first phase focused mainly on such related fields as limit theorems in probability, the theory of random processes, and mathematical statistics and has involved such mathematicians as Kravchuk, Slutsky, Bernshtein, Krylov, Bogoliubov, and Y. Hikhman. Kravchuk studied orthogonal polyno-

mials corresponding to discrete probabilistic distributions (now known as Kravchuk's polynomials). Slutsky obtained a series of interesting results in the theory of random functions which contributed to the development of the theory of random processes. Bernshtein extended Liapunov's central limit theorem, made the first attempt at the axiomatic construction of the theory of probability, initiated the study of stochastic equations, and considered a very special case of the Markov process. A different approach to the qualitative study of random processes was proposed by Krylov and Bogoliubov. Hikhman developed the theory of stochastic differential equations.

The second phase of development started in 1945, when B. *Hniedenko joined the Lviv branch of the ANU Institute of Mathematics and immediately organized a section on the theory of probability and mathematical statistics. He wrote a textbook in Ukrainian on probability theory and coauthored a monograph on the boundary resolution for sums of independent random quantities (1949), which explained his ideas on local limit theorems in probability. The latter work had a substantial impact both within and outside the USSR. Further results on local limit theorems were obtained by Parasiuk and E. Rvacheva, who used them to solve problems in statistical mechanics and physics.

In 1949 Hniedenko joined the Institute of Mathematics in Kiev and organized a section on the theory of probability and mathematical statistics. It studied nonparametric problems in mathematical statistics and the theory of massive service. The section attracted talented young mathematicians such as V. Koroliuk, A. Skorokhod, M. Portenko, A. Husak, A. Dorogovtsev, Buldygin, I. Yezhov, A. Turbin, H. Butsan, V. Mykhalevych, and N. Slobodeniuk and constituted the nucleus for the so-called Kiev school of probability theory. Skorokhod's pioneering monograph on random processes and stochastic differential equations (1961) was followed by new results on the martingale problem and equations in infinite-dimensional space. He introduced a number of new notions and methods now called Skorokhod space, Skorokhod topology, Skorokhod versions of weak convergence, the Skorokhod convergence theorem, and the Skorokhod-Wichura-Dudley theorem. Solutions of stochastic differential equations were obtained by Portenko; problems in the stability of solutions of differential with random coefficients were studied by Mytropolsky, A. Samoilenko, and Y. Hikhman. In the early 1970s Hikhman and A. Skorokhod published a three-volume treatise on the theory of stochastic processes. Skorokhod obtained original results in studying various aspects of the Markov processes, one of the main areas of study in the probability and statistics section. He was later joined by younger specialists. Portenko and R. Boiko studied branching processes, while V. Koroliuk and A. Husak worked on boundary problems for random processes.

Semi-Markov processes began to be studied in the USSR in the mid-1960s. In 1965 Koroliuk solved a problem that was a key to various application problems. He also studied the asymptotic analysis of the distribution of functionals related to semi-Markov processes. Together with Turbin he obtained new results for larger classes of Markov and semi-Markov processes and applied them to some problems of statistical physics and hydrodynamics.

In the 1970s A. Skorokhod developed further the theory

of probabilistic measures in infinite-dimensional spaces and established the theory of quasi-invariant measures in Hilbert spaces, which provided the most general conditions for the absolute continuity of measures under nonlinear transformation. Important studies in this area were done also by Buldygin and H. Sytoi.

The study of evolutionary random families represents a new direction in the theory of random processes founded earlier by the members of the institute. In the 1960s A. Skorokhod suggested a new method for describing matrix noncommutative random processes with independent multiplicative increments and obtained new results by means of classical random processes. These studies were continued by Butsan, who introduced a general notion of stochastic subgroups as a random two-parameter family of operators satisfying the evolutionary relation and indicated important classes of stochastic continuous multiplicative semigroups. Further studies in this and other areas were done by A. Skorokhod, V. Koroliuk, and their former students. In the 1980s the Kiev school of probability theory made rapid progress in its work on the theory of probability and mathematical statistics: its members, such as Buldygin, V. Girko, D. Silvestrov, Daletsky, A. Volpert, Husak, and Butsan, published dozens of monographs, many of which were translated into English. It consolidated its international reputation as a leading center of mathematical research.

Approximation methods for solving abstract and differential equations. Starting in the 1920s Krylov, Bogoliubov, and Kravchuk developed new methods for obtaining fundamental results in the areas of approximate solvability of differential equations and abstract operator equations. Krylov first provided a rigorous justification for the use of variational methods and the direct methods of Ritz and least squares for the approximate solvability of self-adjoint problems of mathematical physics. Krylov (later with Bogoliubov) succeeded in obtaining effective error estimates for his approximation methods. Kravchuk studied the existence and convergence of the approximate solutions obtained in Krylov's research when applied to ODEs, PDEs, and integral equations. He obtained good error estimates and characterized the speed of convergence depending on the coefficients of the equations.

In the 1950s M. Polsky in Kiev made a deep study of the abstract projection method (mostly in Hilbert spaces), which included methods of the Ritz-Galerkin type. A number of results for Ritz-Galerkin and projection type methods, dealing mostly with the study of good and effective error estimates, the speed of convergence, and the stability of the methods, were obtained by A. Luchka in Kiev in the late 1960s. From the late 1950s A. Martyniuk in Zhytomyr studied the approximate solvability of odd ODEs, complicated PDEs, and abstract operators in a Hilbert space.

At the end of the 1950s Yu. Sokolov introduced and studied a new and effective method for the approximate solvability of differential and integral equations. Further development of the Sokolov or the averaging method with functional correction was done by Luchka and N. Kurpel. In the late 1950s Polozhii began an intensive effort to construct an effective approximate method for solving boundary value problems in mathematical physics, which led to the development of the method of summary representation.

Dziadyk made a major contribution to the theory of approximation methods for solving operator equations. He examined ways of using the Chebychev theory of the approximation of functions in order to construct new and practically effective methods for the solution of differential and integral equations. His results, as well as those obtained by his students in the 1970s and 1980s, were summarized by Dziadyk in a 1988 monograph on approximation methods for the solution of differential and integral equations.

Mathematicians in the West. Important results have been obtained by mathematicians of Ukrainian ancestry in the West, most of whom worked or are working as professors at various universities in the United States, Canada, Australia, and other countries. They include O. *Andrushkiv, R. Andrushkiv (eigenvalue problems for linear and nonlinear K -symmetric operators, solution of nonlinear parabolic PDEs with application to cryosurgery, theory of hydrodynamics stability), I. Bohachevsky (applied mathematics, stochastic optimization), M. Derzhko (operator theory, PDEs, applied mathematics, operational research), I. Hawryshkewycz (computer sciences, development of new areas of research in computer sciences, structure techniques for analysis of information systems), B. Lawruk (general theory of PDEs, special symplectic spaces, symplectic relations to PDEs, involutory conditions for Riemann invariants), W. Madych (applied mathematics, including certain aspects of signal processing, computerized tomography, classical Fourier theory and approximations), A. Nagurney (applied mathematics, operational research), A. Ostrowski (algebra, geometry, analysis), W. *Petryshyn (iterative and projection methods, fixed point theorems, nonlinear Friedrichs extension, A-proper mapping theory, solvability of ODEs and PDEs, topological degree for multivalued K -set-contractions [with P. Fitzpatrick]), L. *Romankiv (computer sciences, operational research), E. Seneta (theory of probability and mathematical statistics, history of mathematical statistics), M. Skalsky (theory of probability, statistics, applications), W. Vasilaki (new probabilistic approach to the approximation methods for PDEs and boundary layer problems, computerized tomography, nuclear magnetic resonance), and R. Voronka (analysis, applied mathematics, development of effective methods for teaching mathematics).

History of mathematics. Until 1917 the study of the history of mathematics in Ukraine focused mostly on the history of a specific field, institution, or mathematician. Historical research was conducted sporadically by mathematicians in Kharkiv (Pavlovsky, Syntsov), Kiev (Diachenko, Vashchenko-Zakharchenko, Bukreev, Grave), and Odessa (Tymchenko, Kahan, Shatunovsky). In 1917–50 the research became more systematic: Grave studied the history of algebraic analysis; Krylov, the emergence of variational calculus and the role of the minimum principle in contemporary mathematics; Kravchuk, mathematics and mathematicians at Kiev University in 1835–1935, the influence of Euler on the development of mathematics; Marchevsky, history and development of mathematics chairs and the first 75 years of the Kharkiv Mathematics Society; Sushkevych, mathematics at Kharkiv University in 1805–1917 and the history of group theory; Syntsov, detailed study of the works of the faculty of Kharkiv University; Tymchenko, history of logarithms; D. Kryzhanivsky, lectures on the history of mathematics given at Odessa

University; Levytsky, mathematics at the NTSU and the Lviv (Underground) Ukrainian University; Chaikivsky, bibliography of Ukrainian mathematics; and Zarytsky, historical developments in mathematics.

Since the 1950s the history of mathematics has gained increasing attention at Ukrainian universities and the Academy of Sciences in Kiev. In 1956 the Institute of Mathematics established a separate section on the history of mathematics under the supervision of Shtokalo and a special seminar, which quickly became republican in scope. Between 1956 and 1964 the section published 13 volumes, in Ukrainian, on the history of mathematics as well as some special historical books. It also published the collected works of distinguished Ukrainian mathematicians, including Ostrohradsky (3 vols, 1959–61), Krylov (3 vols, 1949–61), H. Vorony (3 vols, 1952–3), Bogoliubov (3 vols, 1964), Grave (1971), and Liapunov (1982). L. Hratsianska and V. Dobrovolsky have written a series of papers on the development of mathematics at Kiev University and biographies of Kiev mathematicians such as Vashchenko-Zakharchenko, Yermakov, Grave, Bukreev, and Pfeiffer. B. Bily studied the contributions of Liapunov, Steklov, and S. Kovalevska, while I. Naumov published a biography of Syntsov and Akhiezer wrote a book about Bernshtein. A. Bogoliubov wrote a collection of short biographies of Kiev mathematicians (1979) and *Matematiki i mekhaniki* (Mathematicians and Mechanicians, 1983). Book-length biographies of S. Kovalevska (1955), Grave (1940, 1968), Ostrohradsky (1963), Kravchuk (1979), and Krylov (1987) have appeared.

In the 1950s Hikhman and Hniedenko examined the development of the theory of probability in Ukraine. Hniedenko and I. Pohrebynsky published several articles on the development of mathematics in Ukraine. Blank, Hordiiievsky, and Pohorielov prepared a history of geometry at Kharkiv University (1956). Shtokalo edited a Russian-Ukrainian mathematical dictionary (1960) and a Ukrainian mathematical bibliography for 1917–60 (1963). In the late 1950s and in the 1960s M. Krein, S. Kiro, and others wrote on the history of mathematics in Odessa. Chaikivsky wrote on the history of mathematics in Lviv. Some historical studies on nonlinear mechanics by Mytropolsky appeared in the 1970s. M. Pavlenko wrote a study of Hlushkov's ideas (1988).

Although some attempts to write a separate history of mathematics in Ukraine have been made, the most informative source for the subject is the four-volume *Istoriia otechestvennoi matematiki* (A History of the Fatherland's Mathematics, 1966–70), edited by Shtokalo, which deals with the development of mathematics in the countries of the former USSR.

W. Petryshyn

Mathematics, Institute of the Academy of Sciences of Ukraine. See Institute of Mathematics of the Academy of Sciences of Ukraine.

Matiiv-Melnyk, Mykola [Matijiv-Mel'nyk], b 1 December 1890 in Yablonyv, Kolomyia county, Galicia, d 28 September 1947 in New Haven, Connecticut. Writer, journalist, and teacher. He was a teacher of Ukrainian and German in gymnasiums in Stanyslaviv and elsewhere in Galicia. He published a collection of poetry and several short novels: *Po toi bik hrebli* (On That Side of the Dam,

1922), *Za ridne hnizdo* (For the Home Nest, 1927), *Kriz' dym i zhar* (Through the Smoke and Ember, 1928), and *Na chornii dorozh* (On the Black Road, 1930). He rendered in Ukrainian *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1936). His best-known poem is *Na rikakh Vavylons'kykh* (On the Rivers of Babylon, 1921). A collection of his poetry, *Horyt' mii soit* (My World Is Burning, 1951), appeared posthumously.

Matiuk, Viktor [Matjuk], b 18 February 1852 in Tudorokovychi, Zhovkva circle, Galicia, d 8 April 1912 in Kariv, Rava Ruska county, Galicia. Composer and musicologist. He studied music and began composing while attending the Peremyshl gymnasium (1873–6) and then had the most fruitful period of his musical activity while at the Lviv seminary (1876–80). Matiuk composed secular and religious choral works; the cantata *Hamaliia* to the poetry of T. Shevchenko; and songs for solo voice, including 'Vesnivka' (Spring Song) to the words by M. Shashkevych. He arranged folk songs and musical games, in addition to scoring melodramas such as 'Kapral Tymko' (Corporal Tymko), 'Neshchasna liubov' (Unlucky Love), 'Invalid' (The Invalid), and 'Nashi poselentsi' (Our Settlers). He also compiled an anthology of the works of Ukrainian composers titled *Boian* (The Troubadour, 1884; 2nd edn 1886), wrote school (1886) and church songbooks, and penned many articles on musical topics, among them a biography of I. Lavrivsky. In his compositions Matiuk continued the musical traditions of the Peremyshl school.

Borys Matiushenko

Zynovii Matla

Matiushenko, Borys [Matjušenko], b 1883 in Kiev, d 25 March 1944. Physician and civic and political leader; full member of the Shevchenko Scientific Society from 1931. A graduate of Kiev University, he was active in the Revolutionary Ukrainian party from 1903 and then in the Ukrainian Social Democratic Workers' party. As head of the Chief Medico-Sanitary Board under the General Secretariat of the Central Rada in 1917, he organized the health care system in Ukraine. During the Hetman government he was director of the health department. In 1919 he was a member of the UNR delegation to the Paris Peace Conference and head of the foreign office of the Ukrainian Red Cross (1919–21). In 1922 he settled in Prague, where he headed the hygienics department at the Ukrainian Free University, and taught at the Ukrainian Husbandry Academy in Poděbrady. He founded and headed (1922–35) the

*Ukrainian Physicians' Association in Czechoslovakia and edited its journal *Ukrains'kyi medychnyi vistnyk* (1923–5). He was a member of the Ukrainian Scientific Institute in Berlin and of the Czech Eugenics Society. He wrote articles on public hygiene and eugenics and coedited M. Halyn's *Medychnyi latyns'ko-ukrains'kyi slovnyk* (Latin-Ukrainian Medical Dictionary, 1926).

Matla, Zynovii (nom de guerre: Sviatoslav Vovk), b 1910. Political and military figure. An OUN activist, in 1934 he was sentenced to death by a Polish court, but the sentence was commuted to life imprisonment, and with the collapse of Poland, he was set free. In 1941 he commanded the Southern Expeditionary Group of the OUN (Bandera faction). After being promoted to the faction's leadership (1942–3) he was imprisoned by the Germans. In Germany in 1945, he became a member of the Leadership of the External Units of the OUN. In 1952 he settled in the United States. In 1954 he joined with L. Rebet to form the so-called *dviikari* (the twosome) opposition to the leadership of S. Bandera. In 1956 this opposition formally became the OUN (Abroad). Matla wrote articles on ideological and political questions, using the pseudonym O. Lvivsky, and a short book of memoirs, *Pivdenna pokhidna hrupa* (The Southern Expeditionary Group, 1952).

Matriarchy. A term designating a social structure in which women hold political and often religious power. Matriarchy is usually understood to subsume matrilineality, or the inheritance of property and position according to the female line, and matrilocality, or a married couple's joining the village or clan of the wife rather than that of the husband. Matriarchy is the opposite of patriarchy, or a social order dominated by men, as is typical of many current, especially Western, societies. Matriarchy is usually assigned to a time in the distant past and thus assumed to be a social order that was supplanted by patriarchy.

For the Slavs, specifically the Ukrainians, the most significant Western archeological study is M. Gimbutas's *The Goddesses and Gods of Old Europe*. Examining artifacts from an area which had major sites in both central Ukraine (the *Trypilian culture) and western Ukraine and Moldavia, Gimbutas found a predominance of female cult statuary (eg, the *stone *baba*), votive figurines, and sacred images. Her finds prompted her to theorize that Neolithic cultures on the territory of Ukraine offered religious devotion to a goddess rather than to a god. The goddess was a mistress of animals; she appeared with wolves and bears or was portrayed alone, zoomorphically, as a woman-bird or a woman-frog. She was connected to water, the snake, and the fertility of crops and other vegetation. She was sculpted with the symbol of a plowed field on her stomach or over her entire body; sometimes marks showed where seeds had been pressed into the clay of the statue, and sometimes the statue was shaped as a vessel containing seeds or clay pellets representing seeds. She was probably also a goddess of human fertility, as evidenced by her depiction in birthing position or holding a child. The various figurines Gimbutas examined are highly stylized and lead one to suspect that they were not representational but symbolic and sacred. Because such female statuary was found in temples and on altars, Gimbutas theorized that the archeological objects portrayed a goddess or a pantheon of goddesses, and the sheer number of female images

led her to presume that worship of goddesses was the primary form of early religious activity. The appearance of male figurines in archeological materials from later periods led her to postulate further that worship of a goddess or goddesses was eventually replaced by worship of a male 'year god.'

The psychologists interested in matriarchy have been mostly Jungian, and their work can also be connected to the early theories of a primordial past when women ruled. Studies in Jungian psychology dealing with matriarchy, such as E. Neumann's *The Great Mother*, point to various pictorial and verbal images of the mother archetype from all areas of the world and from all time periods. J. Stalin's strong feelings against psychology resulted in the exclusion of psychological studies of the mother archetype and matriarchy from Soviet scholarship until the M. Gorbachev period.

Matriarchy is important to the Slavs, specifically the Ukrainians, for a number of reasons. First, the Amazons of ancient Greek myth are said to have lived in an area that corresponds to Ukraine, and some of the earliest written sources indicate that primeval Ukrainian social organization was indeed female-dominated. Second, major sites with goddess artifacts are located in Ukraine. Third, the social structure ascribed to the *Cossacks can be seen as a remnant of matriarchy. The pattern whereby women and children live on and farm the land while men (the Cossacks) live in an all-male separate group (the *Zaporozhian Sich) for extended periods of time bears great resemblance to descriptions of matriarchy. Finally, Ukrainian literature, art, and even popular culture contain a plethora of strong, if not dominant, female figures. Powerfully built women appear in the representational arts. Perhaps the most striking is the huge Second World War monument erected in Kiev in 1980; called Fatherland-Mother, its Amazon-like features are unmistakable. D. Richardson noted the importance of the Theotokos (Mother of God) to Byzantine Orthodoxy and traced it to possible ancient goddess beliefs. A similar source can be argued for the figure of *Mary, Mother of God, in Ukrainian Orthodoxy. Certainly the Theotokos and Child dominate in most churches, at least visually. Strong women appear in literature, from N. Gogol's inadvertently destructive heroines and the courageous and long-suffering women in late 19th-century works to the formulaic Communist heroines in socialist-realist prose who lead their men to the correct path.

Evidence of possible earlier matriarchal social organization is even stronger in folklore than in the fine arts. Folk songs and dumas present mothers who are objects of intense longing. These elder women have great power; they aid or kill their offspring with just a prayer or a curse. In folk material culture, wood carving, and especially embroidery the female images are so close to prehistoric goddess images that connections can be made on almost every level. Embroidered female figures appear in 'scenes' surrounded by stylized vegetation, birds, and horses. Water and sun symbols are frequently used for borders. The embroidered figures can therefore be seen as mistresses of crop and animal fertility, much like the Neolithic goddesses. More stylized versions show a woman giving birth or a larger figure with a smaller 'child,' making the embroideries therefore analogous to ancient human fertility artifacts. Curious 'temple' structures are sometimes sewn

about the central female figures, as if they were sacred. Even more convincing than the images on the embroidery are the uses to which the embroidered objects are put, especially in ritual. **Rushnyky* embroidered with what can be called goddess figures are used in the home to 'protect' openings such as doors and windows. Similar ones adorn the bride's wedding costume, the crib, and the coffin. A woman in childbirth traditionally held a *rushnyk* to ease labor. The *rushnyky* have the appropriate form of the goddess figure: the one held during labor is embroidered with birth figures; the one worn by the bride, with bird-goddesses and other animals; and the one used for infants and the dead, with goddesses and a tree of life. The use of different symbols indicates that the meanings of the embroideries were, at least partially, consciously continued into the 19th and 20th centuries.

In Ukrainian folk belief there is a water nymph called a *navka* or **rusalka*. She leaves her watery home at night to sit in trees, sing beautiful songs, and seduce men. She also joins her fellow *rusalky* to dance in the fields, where their presence stimulates crop growth. This supernatural female being seems to be associated with water and crops, much like the goddesses of matriarchal times. Like matriarchal women she is the aggressor in sexual relations. The various beliefs connected with the *rusalka* suggest that she is a remnant of matriarchy. She is said to be the ghost of a woman who drowned herself because she became pregnant out of wedlock. She bears and nurses her infant in her watery home, under circumstances which may allude to the matriarchal world being literally submerged by the advent of patriarchy. Traditional Ukrainian wedding rituals include a lamentation by the bride, but no such expressions of sorrow or regret by the groom, because it is the man who imposes marriage on the reluctant woman. Forced matrimony is exactly what scholars such as M. Stone assume occurred when the patriarchal Indo-Europeans conquered the matriarchal clans.

N. Kononenko Moyle

Matsenko, Pavlo [Macenko] (Macenko, Paul), b 24 December 1897 in Kyrykivka, Okhtyrka county, Kharkiv gubernia, d 8 March 1991 in Winnipeg. Musicologist and pedagogue. After serving in the armies of Imperial Russia and the UNR, Matsenko emigrated to Czechoslovakia via Cyprus in 1924. In Prague he studied at the Ukrainian Higher Pedagogical Institute (1926–8) and at the Conservatory of Music, where he completed a doctorate in musical-pedagogical studies in 1932. He settled in Winnipeg in

Pavlo Matsenko

Kost Matsiievych

1936, where he initiated and co-ordinated higher educational courses for Ukrainian-Canadian cultural activists. A founding member in 1945 of the Ukrainian Cultural and Educational Centre (Oseredok) in Winnipeg, he was affiliated with the Ukrainian National Federation and a strong supporter of the Ukrainian Canadian Committee. He taught at St Andrew's College (University of Manitoba) after 1956, served as rector of St John's Institute in Edmonton (1958–61), and lectured at St Vladimir's College in Roblin, Manitoba (1963–72). His publications include arrangements of the Full Divine Liturgy for mixed choir (1931), the Divine Liturgy for three women's voices (1948), and other religious texts, as well as a wide range of folk songs and carols. He wrote *Narysy do istorii ukrains'koi tserkovnoi muzyky* (Studies in the History of Ukrainian Church Music, 1968) and biographies of such composers as F. Yakymenko, D. Bortniansky, and M. Berezovsky. A collection of Matsenko's autobiographical articles, articles about him, and letters to him was published in 1992.

R. Savytsky

Matsiievaska, Lidiia [Macijevs'ka, Lidija] (married name: Morenets), b 8 December 1889 in Kashperivka, Tarashcha county, Kiev gubernia, d 24 December 1955 in Odessa. Actress. She grew up in the M. Kropyvnytsky family and studied history at the Odessa Higher Courses for Women (1906–9). She did agitprop performances for the state political education department in 1921–3 and helped organize the First Ukrainian Workers' and Peasants' Theater (1924) and the Odessa Derzhdrama theater (1925), in which she was the leading character and comic actress until her death. During 1935–41 and 1945–52 Matsiievaska taught at the Odessa Theater Arts and Technology College.

Matsiievych, Arsenii [Macijevych, Arsenij] (secular name: Oleksander), b 1697 in Volodymyr-Volynskiy, d 11 March 1772 in Revel (Tallinn), Estonia. Orthodox metropolitan, theologian, preacher, and writer. The son of a Uniate priest, he studied at the Varenytsia and Lviv colleges and, from 1715, at the Kievan Mohyla Academy. In Kiev he converted to Orthodoxy, and in 1716 he was tonsured at the Novhorod-Siverskyi Transfiguration Monastery. He was ordained a hieromonk in 1723. After a brief stay at the Trinity-St Elijah Monastery in Chernihiv, he worked as a missionary in Siberia, there engaging in lengthy polemics with Old Believers. Matsiievych was

consecrated metropolitan of Tobolsk and Siberia (1741), and then metropolitan of Rostov and Yaroslavl (1742) and a member of the *Holy Synod. In these positions he was in constant conflict with secular and religious authorities. He protested against secular control of the Synod (which had been essentially reduced to a government department) and advocated the re-establishment of the patriarchal system. He was especially critical of Catherine II's religious policies and her secularization of monastery and church property in Ukraine (in 1763 he even pronounced an anathema on those who wanted to seize church estates). For his actions Matsiievych was stripped of his ecclesiastical rank and exiled to a monastery. When he continued his protests and criticism of Catherine, he was defrocked (1767) and imprisoned in solitary confinement in Revel. The majority of Matsiievych's polemical and theological writings were not published, but a volume of his sermons appeared in the 1740s, and his biography of St D. Tuptalo was published in several editions.

I. Korovytsky

Matsiievych, Kost [Macijevyč, Kost'], b 18 May 1874 in the Kiev region, d 2 April 1942 in Poděbrady. Agronomist, educator, and civic and political leader. A graduate of the agricultural institute in Novo-Aleksandriia (now Puławy), he served as scientific secretary of the Poltava Agricultural Society (1899–1901), gubernial agronomist of the Saratov zemstvo (1901–5), research associate of the Kharkiv Agricultural Society (1907–15), editor of the popular magazine *Khliborob* and the scientific periodical *Agronomicheskii zhurnal*, and a professor of agricultural economics at the Higher Agricultural Courses for Women and the Kamianoostriv Agricultural Courses in Petrograd (1915–17). After returning to Kiev he was active in the Ukrainian Party of Socialists-Federalists. As deputy general secretary of agrarian affairs under the Central Rada, he drafted a land reform bill for Ukraine. He also taught agricultural economy in higher educational institutions, edited *Vistnyk hromads'koï ahronomii*, and organized farm co-operatives. In 1918–19 he was assigned by the UNR Directory to negotiate with the Entente and was appointed minister of foreign affairs in S. Ostapenko's cabinet. Then he headed the UNR diplomatic mission to Rumania (1919–23). After emigrating to Czechoslovakia he served as a professor at the Ukrainian Husbandry Academy and then at the Ukrainian Technical Husbandry Institute. He continued his political activity as a member of the Ukrainian Radical Democratic party and president of the Ukrainian Democratic Club in Prague.

Matsiievych, Lev [Macijevyč], b 13 January 1877 in Oleksandrivka, Yelysavethrad county, Kherson gubernia, d 7 October 1910 in St Petersburg. Maritime engineer and airplane pilot and civic leader. Matsiievych was active in the Ukrainian student movement, the Revolutionary Ukrainian Party, and the St Petersburg Hromada. He graduated from the Kharkiv Technological Institute (1901) and the Mykolaiv Naval Academy (1906) and worked on the construction of battleships in Sevastopol and at naval installations in St Petersburg. He developed a number of advanced submarine designs and antimine measures, and

Lev Matsiievych

worked on theoretical and design problems in aeronautics, as well as designing a hydroplane (1909). He died in a plane crash. A collection of commemorative articles about him was published in St Petersburg in 1912.

Matskevych, Volodymyr [Mac'kevyc], b 14 December 1909 in Pryvilne, Tavriia gubernia. Soviet government and Party official. After graduating from the Kharkiv Zootechnical Institute in 1931, he was a secondary-school teacher, director of the institute (1939–41, 1943–6), and editor of *Kolkhoznaia proizvodstvennaia entsiklopediia* (Collective-Farm Production Encyclopedia, 1940–50). After serving as deputy minister and minister of animal husbandry and then of agriculture and deputy chairman of the Council of Ministers in the government of Ukraine (1946–52), he was appointed deputy minister (1953–5) and minister of agriculture (1955–60, 1965–71) in the USSR government. He retired after serving as ambassador extraordinary to Czechoslovakia (1973–80). For many years he sat on the CC CPSU (1956–81).

Matskiv, Teodor. See Mackiw, Theodore.

Matskiv, Tymotei [Mac'kiv, Tymotej], b 7 July 1892 in Poberezhe, Stanyslaviv county, Galicia, d 18 January 1972 in Toronto. Galician jurist and émigré civic figure. He completed his studies at Vienna University (LL.D., 1921), practiced law in Stanyslaviv, served as civil court judge in Dolyna (1925–37), and served as district court judge in Poznań (1937–40) and Cracow (1940–1). In Cracow he was active in the Ukrainian Relief Committee. Under the German occupation (1942–4) he was deputy chief prosecutor of the Lviv Appellate Court and helped prepare the Ukrainian versions of the criminal, criminal-procedure, and civil-procedure codes. After emigrating to Germany he presided over the court of honor under the *Central Representation of the Ukrainian Emigration in Germany, and represented Ukrainian interests before Allied military and UNRRA authorities. In 1949 he emigrated to Canada, where he served as first president of the Ukrainian Canadian Committee branch in Ottawa. He wrote a book of memoirs, *Z-nad Dnistra na kanads'ki prerii* (From the Dniester to the Canadian Prairies, 1963).

Matskiv, Volodymyr. See Mackiw, Vladimir.

Matskov, Fedir [Mackov], b 21 November 1897 in Ostrohozke, Voronezh gubernia, d 3 February 1977 in Kharkiv.

Plant physiologist; corresponding member of the AN URSS (now ANU) from 1948. After graduating from the Kharkiv Agricultural Institute (1922) he worked at the Kharkiv Institute of Applied Botany (1928–35) and then became a professor at the agricultural institute (1934). He was director of the Ukrainian Scientific Research Institute of Forest Management (1945–9), the research laboratory of the ANU Institute of Genetics and Selection (1949–51), and the Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics in Kharkiv (1957–61). Matskov specialized in the physiology of the development and mineral alimentation of agricultural plants, particularly non-rootage alimentation. He also researched photoperiodism and hybridization.

Matson, Yulii (Ferdinand) [Macon, Julij], b 1817 in Riga, d 1 January 1886 in Kiev. Pathologist and internal medicine specialist of German descent. After graduating from Tartu University (1843) he worked as a physician in Kiev, taught internal medicine and pathological anatomy at Kiev University (1852–75), and was director of the university's clinic and dean of its medical faculty (1868–70). He was president of the Society of Kiev Physicians (1871–81) and the first director of the Alexandrian Municipal Hospital in Kiev (1875–85).

Matsuka, Hennadii [Macuka, Hennadij], b 5 September 1930 in Prymorske, Donetsk oblast. Biochemist; AN URSS (now ANU) corresponding member sine 1976 and full member since 1985. A graduate of the Kiev Veterinary Institute (1955), he has practiced veterinary medicine; worked at the ANU Institute of Biochemistry, where he chaired a department from 1964; and has directed the ANU Institute of Molecular Biology and Genetics since 1973. He has published extensively in the area of structure and function studies of transport ribonucleic acids (tRNA) and aminoacyl-tRNA-synthetases of animals; discovered the adaptation phenomena of these compounds during protein synthesis; and studied inactive tRNA in animal tissues. Matsuka has been academic secretary of the ANU Division of Biochemistry, Physiology, and Theoretical Medicine; vice-president of the Ukrainian Society of Geneticists and Selectionists; editor of the USSR journal *Biopolimery i kletka*; and chairman of the ANU Molecular Biology Problems Council.

Masurevich, Ippolit [Macurevič], b 8 February 1882 in Hlusk, Babruisk county, Minsk gubernia, d 22 July 1939. Organic chemist; full member of the AN URSS (now ANU) just before his death. He graduated in 1907 from Kiev University, remained there as a researcher, and became a professor in 1935. He studied the synthesis of beta-oxyacids, of alcohols by way of the Grignard reaction, of 1,2,4-triazole derivatives, and of semicarbazides of unsaturated ketones.

Matsynsky, Ivan [Macyns'kyj], b 9 April 1922 in Medzilaborce, Prešov region, d 14 March 1987 in Prešov, Slovakia. Writer and cultural figure in the Prešov region. He worked in Prešov as an editor and literary consultant, a lecturer in political economy (1951–6), director of the *Ukrainian National Theater (UNT, 1956–60), head of the Department of Ukrainian Literature at the Slovak Pedagogical Publishing House (1960–9), the first secretary of

Ivan Matsynsky

Mykola Matussevych

the *Cultural Association of Ukrainian Workers (KSUT, 1969–70), and an editor of Ukrainian literature at the Slovak Pedagogical Press (1970–85). While serving as the external director of the KSUT cultural and educational department he initiated the creation of the Ukrainian Branch of the Slovak Writers' Union and served as its first chairman (1952–5), its secretary, and a member of the editorial board of its journal, *Duklia* (est 1953).

Matsynsky wrote several poetry collections: *Belye oblaka* (White Clouds [in Russian], 1949), *Nasha mova* (Our Language, 1956), *Ivanko ta Olenka* (1958), *Karpats'ki akordy* (Carpathian Chords, 1962), *Prystritnyky* (Sorcerers, 1968), the lyrical *Vinky sonetiv* (Garlands of Sonnets, 1985; his largest and, finest collection), and the posthumous *Merydiany i paraleli* (Meridians and Parallels, 1989). He also wrote literary criticism and reviews; stories (published mostly in *Duklia*); two plays in Russian (in the early 1950s); an anthology of Slovak poetry in Ukrainian translation (1953); a short novel, *Zymova nich* (A Winter's Night, 1961), about collectivization in the Prešov region; a book, *Rozmova storich* (A Discourse of Centuries, 1965), on the sociocultural development of 18th- and 19th-century Transcarpathia; a book on Slovak and Ukrainian literary development and on J. Botto, with Ukrainian translations of Botto's poetry (1981); scholarly studies of the UNT, early Ukrainian primers, the 19th-century Transcarpathian poet V. Dovhovych, and the artist O. Dubai; and materials for a cultural dictionary of Czechoslovakia's Ukrainians (serialized in *Duklia*).

R. Senkus

Matthews, William, b 22 February 1901 in Estonia, d 3 May 1958 in London. British linguist and Slavist. After graduating from Manchester (1923) and London (PHD, 1926; DLITT, 1955) universities, he taught English at the State Institute of English in Riga and the University of Latvia (1926–40). From 1946 he taught Russian language and literature at the School of Slavonic and East European Studies in London, and from 1950 he edited *The Slavonic and East European Review*. His works include *Languages of the USSR* (1951); *The Structure and Development of Russian* (1953) and *Russian Historical Grammar* (1975), in which he discusses Old Ukrainian; articles on the phonetic basis of pleophony in East Slavic and on the Ukrainian system of declension; the brochure *Taras Shevchenko the Man and the Symbol* (1951; repr 1961); and a critical essay in *Taras*

Shevchenko: Song Out of Darkness: Selected Poems (1961). He was elected an honorary member of the Association of Ukrainians in Great Britain in 1955 and the first president of the British Association of Slavists in 1957.

Matusevych, Mykola [Matusevyč], b 19 July 1947 in Matiushi, Bila Tserkva raion, Kiev oblast. Human-rights activist and political prisoner. An editor at the Zdorovia publishing house in Kiev, in November 1976 he became one of the cofounders of the *Ukrainian Helsinki Group. Consequently he was arrested in April 1977 and sentenced in March 1978 to seven years in a strict-regime labor camp in Perm oblast and five years' exile in Chita oblast, Siberia. In the camp he took part in hunger strikes and other protest actions by the political prisoners. In October 1980 he was transferred to the prison in Chistopol in Caucasia. He was released from exile in late 1988.

Olha Matusevych-Heiko

Vira Matushevskia

Matusevych-Heiko, Olha [Matusevyč-Hejko, Ol'ha], b 9 September 1953 in Kiev. Philologist and dissident; wife of M. *Matusevych. She joined the *Ukrainian Helsinki Group in May 1977 after her husband's arrest. She was arrested in March 1980 for 'anti-Soviet slander' and sentenced to three years in a women's labor camp near Odessa. On the eve of her release she was charged with 'anti-Soviet agitation and propaganda' and given another three years in a Mordovian camp. In 1986 she returned to Kiev.

Matushevskia, Vira [Matuševs'ka] (née Popova), b 1874 in Kharkiv, d 22 April 1944 in Temnikovskii, Mordovian ASSR. Civic activist and physician; wife of F. *Matushevsky. A graduate of the Women's Medical Institute in St Petersburg, she was appointed director of the zemstvo hospital in the Kiev suburb of Boiarka in 1904. A member of the Revolutionary Ukrainian party, she worked during the 1920s in Kiev polyclinics and sat on a language commission of the All-Ukrainian Academy of Sciences formed for the purpose of compiling a medical dictionary. In 1937 she was arrested by the NKVD and sent to a labor camp in Mordovia, where she perished.

Matushevsky, Borys [Matuševs'kyj], b 1907 in Boiarka, Kiev county, Kiev gubernia, d 14 January 1977 in Kiev. Political prisoner; son of F. and V. *Matushevsky. A student at the Kiev Institute of People's Education, he was arrest-

Borys Matushevsky

Fedir Matushevsky

ed in 1929 for purportedly belonging to a clandestine Ukrainian Youth Association (SUM) and was sentenced to five years in prison. He was released in 1934, and he worked at a meteorological station in Kirovske until he was arrested again in 1938. After being released in 1940, he served in the Soviet army (1943–5) and then returned to Kiev, where he worked at a hydrometeorological station.

Matushevsky, Fedir [Matuševs'kyj], b 21 June 1869 in Smila, Cherkasy county, Kiev gubernia, d 21 October 1919 in Athens. Civic and political leader and publicist. After graduating from the law faculty of Dorpat University (1904), where he founded a Ukrainian student hromada, he settled in Kiev and devoted himself to writing and publishing. He was one of the founders of the *Vik publishing house and a contributor to *Rada*, *Kievskaiia starina*, *Literaturno-naukovyi vistnyk*, and *Ukrainskaia zhizn'* as well as editor of the first Ukrainian daily in Russian-ruled Ukraine, **Hromads'ka dumka* (1905–6). He organized co-operatives in the villages of Kharkiv and Kiev gubernias and edited the co-operative weekly *Muraveinyk-Komashnia*. A leading member of the Ukrainian Democratic Radical party and the Society of Ukrainian Progressives and, later, of the Ukrainian Party of Socialists-Federalists, he devoted much of his energy to political work. During the revolutionary period he was a member of the Central Rada. In January 1919 he was appointed head of the UNR diplomatic mission to Greece. Particularly notable among his numerous articles were his report on T. Shevchenko's grave, his study of A. Svydnytsky, his biography of V. Antonovych, and his essays on Shevchenko. Excerpts from his diary were published posthumously in the first volume of *Z mynuloho* (From the Past, 1938).

Matveev, Aleksandr, b 2 May 1816 in Orel gubernia, Russia, d 4 June 1882 in Kiev. Russian obstetrician, gynecologist, and pediatrician. A graduate of Moscow University (1841), he taught at Kiev University (from 1844) and served as dean of the medical faculty (1862–5) and rector (1861–71 and 1875–8) of the university. He did research on postnatal diseases and invented the silver nitrate bath for preventing blennorrhoea (1853). He wrote two popular obstetrics manuals.

Matveev, Artamon, b 1625 in Moscow, d 25 May 1682. Russian diplomat. In 1653 he and I. Fomin were sent as

emissaries to Hetman B. Khmelnytsky to negotiate the terms of the *Pereiaslav Treaty of 1654. In 1655 Matveev commanded Muscovite troops in the battles against the Poles near Kamianets-Podilskyi and Lviv. He later headed the *Little Russian Office (from 1669) and the Diplomatic Office (concurrently from 1671). Matveev was a strong advocate of Russian territorial expansion into Ukrainian lands, and he played a major role in shaping Muscovite policy toward Ukraine.

Nina Matviienko

Matviienko, Nina [Matviienko], b 10 October 1947 in Nedilyshche, Yemilchyn raion, Zhytomyr oblast. Singer (alto). She graduated from the studio of the Verovka State Chorus in 1968 and from the Kiev University in 1975. From 1968 she has sung as soloist with the Verovka State Chorus. She has also sung as lead vocalist in the Zoloti Kliuchi folk music trio. Her large repertoire consists mostly of Ukrainian folk songs, but she also performs works by contemporary Ukrainian composers. Matviienko has appeared in films and radio. Immensely popular in Ukraine, she was awarded the 1988 Shevchenko Prize.

Mavka (aka *niavka*, *navka*, from Old Slavic *nav* 'the dead'). A mythological female figure, tall, round-faced, long-haired, and sometimes naked. The nymphs known by this term represented the souls of girls who had died unnatural deaths. They were believed to live in groups in forests, mountain caves, or sheds, which they decorated with rugs. They made thread of stolen flax and wove thin transparent cloth for making clothes for themselves. They loved flowers, which they wore in their hair. In the spring they planted flowers in the mountains, to which they enticed young men, whom they tickled to death. On Pentecost (known as *Mavka's* Easter) they held games, dances, and orgies. A demon accompanied them on a flute or pipes. They are depicted in literature, most notably in Lesia Ukrainka's *Lisova pishnia* (The Forest Song) and M. Kotsiubynsky's *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors).

Maximos, b ?, d 6 December 1305 in Vladimir, on the Kliazma. Greek churchman. The successor to Cyril II, he served as metropolitan of Kiev and all Rus' in 1283–1305. He transferred the see of the metropolity to Vladimir in 1299–1300, thereby prompting demands for the creation of a separate metropolity for the Principality of Galicia-Volhynia.

Maydanek, Jacob. See Maidanyk, Yakiv.

Mayer, Johann, b and d ? Swedish diplomat. While traveling from Bucharest to Stockholm in 1651, he maintained a diary that included a description of his passage through Ukraine. He also provided an account of the Ukrainian Cossacks and assisted W. Hondius in preparing a map of Ukraine.

Mazade, Fernand, b 14 October 1863 near Anduze, France, d 17 June 1939. French poet, critic, and journalist. Sympathetic to the cause of Ukraine's independence, he rendered assistance to the Ukrainian delegation at the Paris Peace Conference (1919–22). He was a cofounder of the French Society of Ukrainian Studies. His translations of two poems by T. Shevchenko were published in the weekly *France et Ukraine* in 1920. He also translated some of M. Rylsky's poetry. M. Tereshchenko translated some of Mazade's poetry into Ukrainian.

Mazapeta. A 17th- to 18th-century gentry family of Greek heritage. Manuil Mazapeta became a member of the Lviv Dormition Brotherhood in 1590, and his son, Kostiantyn (d 1656), was an elder of the same body in 1637–40. His descendants, in turn, settled in Left-Bank Ukraine under Hetman B. Khmelnytsky and became part of the *starshyna* of Chernihiv regiment. The family line died off on the male side in the mid-18th century, and its descendants on the female side maintained the name Mazapeta-Brodovych.

Mazaraki. A Ukrainian and Polish gentry family of Greek heritage. Christos (Krzysztof) Mazaraki (d before 1641) was a Greek merchant who settled in Lviv near the end of the 16th century. His son, Ivan (d before 1667), was nominated for nobility status by Hetman I. Vyhovsky for services rendered to the Zaporozhian army; the status was granted by the Polish Sejm in 1659. Ivan and his son, Ivan (d ca 1690), were marshals of the Lviv Dormition Brotherhood, and the younger led the brotherhood's opposition to Bishop Y. Shumliansky. One of his sons, Demian, settled in the Hetmanate, where his descendants became part of the Cossack *starshyna*. In the 19th and 20th centuries members of the Mazaraki family were estate owners in Poltava gubernia and Southern Ukraine. Serhii Mazaraki (d 1912) was an amateur archeologist and collector who excavated Scythian burial grounds near Romen for the Kiev Historical Museum.

Mazepa (aka Koledynsky). A noble family in the Bila Tserkva region, first mentioned in the 16th century. Mykhailo Mazepa received the *khutir* Kamenets (later called Mazepyntsi) from King Sigismund I in 1544. His son, Mykola, Hetman Ivan *Mazepa's great-grandfather, received confirmation of his right to the estate from Sigismund II in 1572. Another Mazepa (Fedir?), possibly Mykola's brother, was a Cossack leader who was executed in Warsaw in 1596 for his part in S. Nalyvaiko's uprising. Several Mazepas appear in the 1649 Cossack register of Bila Tserkva regiment. One of them, Stepan-Adam *Mazepa, was the hetman's father. The family line was extinguished with the hetman's death in 1709.

Mazepa, Halyna, b 9 February 1910 in St Petersburg. Ukrainian modernist painter, graphic artist, and ceramist; daughter of Isaak *Mazepa. From 1923 she lived in Prague, where she studied at the Ukrainian Studio of

Halyna Mazepa: *Poterchata* (The Unbaptized Dead, oil, 1965)

Plastic Arts, the School of Applied Art (1929–35), and the Academy of Arts. In the 1930s she began painting; illustrating Czech and Ukrainian books, magazines and postcards; and designing theatrical and ballet costumes. In 1947 she resettled in Caracas, Venezuela. Her first solo exhibition was held there in 1948. While working as an animator and as an illustrator for Venezuelan magazines (eg, *Tricolor*) and the publishing house of the Venezuelan Ministry of Education, she devoted her spare time to painting, ceramics, and illustrating Ukrainian books. For her ceramic icon of the Holy Protectress she received a national prize in 1956. Her first solo show in the United States was held in New York in 1970. Her distinctive work is noted for its iconlike simplicity of line and composition and flat planes, gentle stylization, and vibrant, contrasting colors. Many of her paintings and drawings depict female figures and deal with Ukrainian historical, folkloric, or literary themes (eg, T. Shevchenko's poems). An album of her works was published in Munich by the Ukrainian Free University in 1982.

Isaak Mazepa

Mazepa, Isaak, b 16 August 1884 in Kostobobriv, Novhorod-Siverskyi county, Chernihiv gubernia, d 18 March 1952 in Augsburg, West Germany. Political leader and statesman; husband of N. *Synhalevych-Mazepa and father of H. *Mazepa. In 1905, while studying at St Petersburg University (1904–10), he joined the underground *Ukrainian Social Democratic Workers' party (USDRP), and he soon became one of its leading members. He was also

active in the *Ukrainian Student Hromada in St Petersburg. After graduation he worked as an agronomist for the gubernial zemstvos in Nizhnii Novgorod (1911–15) and Katerynoslav (1915–18). After the February Revolution of 1917 he was a member of the Katerynoslav City Duma and the Katerynoslav Council of Workers' and Peasants' Deputies. In April 1918 he headed the Katerynoslav Gubernia Revolutionary Council. Under the Hetman regime he coedited the USDRP paper *Nasha sprava*. In January 1919 Mazepa was a delegate at the *Labor Congress in Kiev and was elected secretary of the USDRP CC. On 9 April 1919 he was appointed UNR minister of internal affairs, and from 29 August 1919 to late May 1920 he was prime minister of the UNR and head of the *Council of National Ministers. In May and June 1920 he was the last UNR minister of land affairs.

From late 1920 Mazepa lived as an émigré in Lviv, where he edited the USDRP serial *Vil'na Ukraïna* and the monthly paper *Sotsiialistychna dumka*. In 1923 he emigrated to Prague. From 1927 he was a botany docent at the Ukrainian Husbandry Academy and its successor, the Ukrainian Technical and Husbandry Institute (UTHI), in Poděbrady. Mazepa represented the USDRP and defended Ukrainian interests at many international socialist conferences and was a member of the executive committee of the Labor and Socialist International. As a postwar refugee in Germany he was a professor at the UTHI in Munich from October 1946, cofounded the *Ukrainian National Rada, was the first chairman of its executive organ (July 1948 to January 1952), and was a founding member of the *Ukrainian Socialist party (est 1950).

Mazepa wrote many political articles; the book *Bol'shevyzm i okupatsiia Ukraïny* (1922; German trans: *Bolshevismus und die russische Okkupation der Ukraine*, 1923); a study, concentrating on the national movement and major Ukrainian historical processes and problems, *Pidstavy nashoho vidrodzhennia* (Foundations of Our Rebirth, 2 vols, 1946); and memoirs of the years 1917–21, *Ukraïna v ohni i buri revoliutsii* (Ukraine in the Fire and Storm of Revolution, 3 vols, 1941; 2nd edn 1950–2). His major scientific works are a book of lectures on plant morphology (1934) and a monograph on Carpathian mountain pastures (1944).
