Industrialization in the last quarter of the 19th and the beginning of the 20th centuries developed by sectors in specific regions. Agricultural-machine building emerged in Southern and Central Ukraine; sugar-beet processing and refining in the forest-steppe; coal mining, metallurgy, and chemical and metal fabricating in the Donets-Dnieper region; and food processing throughout Ukraine. Heavy-machine building (ships, locomotives) developed in the Black Sea ports and near the Donbas. Agricultural regional specialization progressed with commercial development. The livestock raising in the steppe in the early 19th century gave way to grain production, which was geared to export via Black Sea ports to Western Europe. Sugar-beet production gained commercial prominence in the Right-Bank forest-steppe. The western Ukrainian lands under Austria constituted an economic hinterland for that empire; they remained a distinct underdeveloped agrarian region (although small pockets of intensive agriculture catered to local urban markets).

ECONOMIC REGIONALIZATION OF UKRAINE

In conjunction with the nationalization of the economy and the introduction of state planning, economic regionalization became a tool for the planning and implementing of state policies for centralized management of the national economy during the Soviet period. A struggle developed between the government in Moscow, which aimed to establish its undisputed control over all the economic regions of the USSR, and the republics and other territorial-administrative units, which wanted to preserve or even broaden their prerogatives for autonomous economic decision-making.

The struggle around the economic regionalization of the Ukrainian SSR began in 1920–1. With the support of some leaders of the Russian Communist party (such as F. Artem, M. Kalinin, J. Stalin, and G. Zinovev) and scientific establishments and commissions (such as the Commission for the Study of Productive Forces, affiliated with the Academy of Sciences of the USSR), a number of prospectuses (such as those by I. Aleksandrov, G. Krzhizhanovsky, M. Vladimírsky) proposed the subdivision of Ukraine into three or two administrative units. Those projects limited the Ukrainian SSR mostly to the Right-Bank forest-steppe, and excluded from it all the industrial regions (the Kharkiv region, the Donbas, the Dnieper Industrial Region, and the Black Sea littoral with its ports) because those areas were not dominated by the Ukrainian proletariat. The projects represented the renewal of the concept of Russian proletarian territories, such as the

Donets-Kryvyi Rih and the Odessa soviet republics, which had arisen in those areas in 1918–19. Ukrainian national-communists countered those projects with the argument that a nonproletarian agrarian Ukrainian SSR would not be viable. They proposed to bring the Soviet government to the population by retaining Ukraine intact and by subdividing it into several dozen urban-centered economic-administrative provinces and several hundred regions, united in a centralized Ukrainian SSR. Despite the opposition of the RSFSR, the executive committee of the Ukrainian SSR declared (October 1922) the proposal as the basic principle for the economic-administrative regionalization of Ukraine. The proposal was successfully defended by the Ukrainian delegation (M. Poloz and others) in Moscow, and the 12th Congress of the Russian Communist party adopted it as a basic principle that was extended (1924–9) throughout the USSR. Nevertheless, in February 1924 the Ukrainian SSR lost the eastern Donbas (the predominantly Ukrainian Shakhty and Tahanrih okruhas) to the RSFSR. That measure of reorganization disrupted the integrity of the Donbas economic region but provided an urban-industrial component for the largely rural Don region. In 1931–2 the okruhas of Ukraine were replaced by the larger oblasts, whose party organs were subordinated to both Kiev and Moscow. That centralization remained a major factor in the administration and planning of local industry, agriculture, and cultural activities.

The formation of economic regions in industry and ag-

riculture, both in Ukraine and in the USSR as a whole, proceeded during the NEP as it did before the revolution. Until 1923 in the Ukrainian SSR there were 19 territorial-branch industrial trusts and a number of syndicates and associations. Until 1929 control over those trusts was vested in the hands of the government of the Ukrainian SSR, which also restricted their competition with the trusts of the RSFSR. With the establishment in 1932–4 of centralized all-Union and Union-republican commissariats (since 1946, ministries) for various branches of industry, the existing economic region-forming processes were significantly altered. First, enterprises were subdivided and subordinated to various government organs or Party authorities responsible either directly to Moscow or through Kiev to Moscow. Second, a policy was initiated which involved the planned reallocation of resources and the accelerated development of some economic regions at the cost of the neglect or exploitation of others.

In the First Five-Year Plan, targets were set for the entire USSR within the framework of 24 economic regions. The Second Five-Year Plan involved 32 economic regions, and the Third Five-Year Plan, 19. The national economy of the Ukrainian SSR was planned as a republican unit, but within that framework special plans were designated for the Donbas, for the Kryvyi Rih area, and so forth. From 1930 the eastern regions of the USSR (the Urals, Siberia, Kazakhstan, and northern RSFSR) were designated for accelerated development mostly at the expense of Ukraine. Since the capital and human resources were not returned to Ukraine, they were not loans, nor was there a repayment of interest for lost time. Their shift from Ukraine constituted an outright economic exploitation of the republic. Approximate estimates for the periods 1928–40 and 1950–70 suggest that the capital transfers from Ukraine alone to other regions of the USSR amounted to about 135 billion rubles (1961 valuation). Since capital invested in the eastern regions yielded 20–25 percent lower recoupment than in the Ukrainian SSR, the economic loss was suffered not only by Ukraine but also by the Soviet economy as a whole. Advantages accrued only to the regions that received the investments.

The acceleration of the development of the eastern regions during Stalin's rule was motivated by the needs of strategic defense and, after the war, by an inflated evaluation of the regions' natural-resource base. The main theoretical supporters of the development of the eastern regions were the leaders of the Council for the Study of the Productive Forces of the USSR of the Academy of Sciences of the USSR and the State Planning Committee of the USSR (Gosplan SSSR). The State Planning Committee of Ukraine (Derzhplan URSR) and the Council for the Study of the Productive Resources of Ukraine were among the agencies opposed to such plans. Both Stalin and, after his death, the leadership of the Communist party consistently supported a policy of developing the eastern regions. During the entire period approx 40–50 percent of all capital allocations were invested there.

The economic regionalization of Ukraine was in fact part of the economic regionalization of the USSR as a whole. During the period of highly centralized planning, economic regions had no prerogatives. They served Moscow as convenient spatial units for the purpose of planning output and accounting for performance. Already during the last two prewar five-year plans the economic regionalization of the USSR was being geared to military-

strategic plans. In the first postwar decade the USSR five-year plans distinguished 13 large economic regions (with Ukraine and Moldavia combined into one such region). Within that framework the State Planning Agency of the Ukrainian SSR subdivided Ukraine in 1956 into seven economic regions for the purpose of its own planning: Donbas, Dnieper, Left-Bank, Right-Bank, Western, Polisia, and Southwest.

A brief change occurred after Stalin's death when N. Khrushchev attempted to decentralize industry and construction according to the territorial principle (1957–64). The entire USSR was subdivided into 105 economic-administrative regions, called *regional economic councils, with some managerial and planning prerogatives. Within the Ukrainian SSR there were 11 such units. The administration of so many units directly from Moscow proved somewhat unwieldy. Their self-administration, however, was viewed as a threat to central control. Above all, military considerations (nuclear warfare) prompted their subordination in 1961 to 17 (and in 1963 to 18) large economic regions of the USSR. The regional economic councils too were reduced in number, to 47, so within the Ukrainian SSR there were 7 in 1962.

With the demise of Khrushchev and the return to centralized management in 1965 under L. Brezhnev, the regional economic councils were abolished, although the large economic regions were retained. Two principles formed the basis of the large economic regionalization – economic self-sufficiency of each region in the event of war, and the continued ability to develop the eastern regions during peace. Each large economic region had a planning commission and a council for co-ordination, subordinated directly to Moscow. Three large economic regions constituted the Ukrainian SSR from 1961, the Donets-Dnieper, the Southwest, and the South (see the table). In the 1970s, proposals were even raised to limit the signif-

Economic regions of Ukraine after 1961

| Region | Subregion | Oblast |
|----------------|-----------|---|
| Donets-Dnieper | Donets | Donetske Luhanske |
| | Dnieper | Dnipopetrovske Zaporizhia Kirovohrad |
| | Kharkiv | Kharkiv Poltava Sumy |
| Southwest | Kiev | Kiev Zhytomyr Cherkasy Chernihiv |
| | Podilia | Vinnytsia Khmelnyskyi Ternopil Chernivtsi |
| | Lviv | Lviv Volhynia Rivne Ivano-Frankivske Transcarpathia |
| South | | Odessa Mykolaiv Kherson Crimea |

icance of the republics and to transform the economic regions into autonomous units of the USSR. By contrast, in Ukraine, as in other republics, the directors of the Derzhplan USSR (F. Khyliuk, P. Rozenko) demanded integrated planning of the entire national economy of the Ukrainian SSR and the reporting of Union enterprises to the republic's government.

Despite its unequal regional development Ukraine retained a specific presence within the economy of the USSR. Nevertheless, Ukraine's share in the economy of the USSR had declined as a result of the growth of the economy of central Russia and the eastern regions since the Second World War. Notably, the economic interaction between Ukraine and Russia had lost its previous significance. The shipment of metal from Ukraine to Russia, for example, declined from 60 percent of the production of the Ukrainian SSR in 1940 to 24 percent in 1960 and only 10 percent in 1970. Similarly the shipment of coal from the Donbas to Russia declined from 30 percent of production to 14 percent and 12 percent respectively.

At the same time Ukraine's external economic relations have diversified, with a growing share of interaction with Belarus and the Baltic republics, the Eastern European countries of the Council for Mutual Economic Assistance (CMEA), and, more recently, with the countries of Western Europe, North Africa, and Japan. Now politically independent and situated between Russia, Eastern Europe, and the Black Sea-Mediterranean basin, Ukraine has all the requirements for emerging as an independent economic power.

Regionalization, physical-geographic. A territorial subdivision of the surface of a country or territory into parts that differ from one another in their natural properties. The physical-geographic regionalization of Ukraine is hampered by the fact that, with the exception of a few mountainous areas, variation in relief is small. Consequently the physical-geographic regionalization of Ukraine must incorporate other components of the landscape, such as drainage basin, soils, and vegetation.

The first attempts at physical-geographic regionaliza-

tion of Ukrainian lands in the early 20th century were associated with the regionalization of European Russia (by V. Dokuchaev and G. Tanfilev) and of historical Poland (by E. Romer). They had a general character. More precise physical-geographic regionalization of Ukraine was accomplished in the 1920s by B. Lichkov, who delineated seven regions, and by P. Tutkovsky, who distinguished seven landscape types. The physical-geographic regionalization by S. *Rudnytsky was considerably more comprehensive and placed all Ukrainian lands in 25 regions on the basis of geomorphological criteria. That regionalization has retained its significance to the present day.

More recent physical-geographic regionalization includes that of K. *Vobly (1945), who subdivided the Ukrainian SSR into the Polisia, the forest-steppe, and the steppe zones, and the mountain zone of the Carpathians and the Subcaucasus, and within those zones distinguished nine regions. Beginning in 1957 physical-geographic regionalization was revitalized by the Ministry of Higher and Secondary Special Education of Ukraine for agricultural purposes. Among the schemes formulated was one for the agroclimatic regionalization of Ukraine, which appeared in *Atlas sil's'koho hospodarstva Ukrain's'koi RSR* (Agricultural Atlas of the Ukrainian SSR, 1958) and involved the division of the territory into five zones (forest, forest-steppe, steppe, Carpathians, and Crimean Mountains) and 25 regions. The partition of the republic's territory into five zones became standard practice for subsequent physical-geographic regionalization.

The subdivision of the five zones into varying numbers of smaller regions was commonly undertaken on the basis of geomorphological criteria. A 1962 physical-geographic regionalization by V. Popov, A. Lanko, O. Marynych, and O. Poryvkina, for example, featured the five zones subdivided into 47 regions and 28 subregions. Later Marynych (1969), in the Ukraine volume of an all-Union regional geography series, formulated a simplified physical-geographic regionalization that included the same five zones but only 22 regions. In a 1969 university geography textbook Lanko, Marynych, and M. Shcherban provided a physical-geographic regionalization consisting of the five zones described previously, but subdivided into eight provinces and 50 regions. Lanko, Marynych, Popov, Poryvkina, and N. Syrota, in the 1972 Ukraine and Moldavia volume of an all-Union series on natural conditions and physical resources, presented a scheme of physical-geographic regionalization consisting of the five zones subdivided into 18 provinces and 56 regions. In a 1982 university textbook on the physical geography of Ukraine, Marynych, Lanko, Shcherban, and P. Shyshchenko revised that scheme and subdivided the five zones into 53 regions. The most recent physical-geographic regionalization was done by Marynych, H. Parkhomenko, and V. Pashchenko in a 1990 text that subdivided the Ukrainian SSR into two mountain 'countries' and three lowland 'zones.' In that scheme the steppe zone was further differentiated into three 'subzones,' and then the forest-steppe and the steppe zones divided into provinces. Finally, both the 'countries' and the subunits of the 'zones' were subdivided into 57 regions.

In addition to those general schemes of the physical-geographic regionalization of the Ukrainian SSR, there were various regionalizations that involved the use of a single set of criteria. One example is P. Tsys's 1962 text on the geomorphology of Ukraine, which involved only geo-

morphological criteria and resulted in the subdivision of the republic into 18 provinces, 10 subprovinces, and 109 regions. A subsequent geomorphological regionalization by Yu. Grubrin (1972) provided for 11 provinces and 107 regions. Similar examples can be found for agroclimatic regionalization, agro-soil regionalization, geobotanical regionalization, and the like.

Regions of Ukraine. The regions of Ukraine derive their characteristics from a diverse complex of physical-geographic and human factors, including natural phe-

nomena (topography, vegetation, climate) and human characteristics (population, political-administrative borders, economic indicators). The most permanent features over the centuries of human record are *landforms. They influence the drainage patterns, the climate, the flora, the density of population, and the economy. The most noticeable feature, difference in altitude, is pronounced only where the mountains begin, or where the uplands are marked off by deep valleys or escarpments. In some places, as in the northern lowland, the swamps of Polisia become the prevalent feature; in others, as in the southern plains of Ukraine, the transition from the forest-steppe to the steppe vegetation and a drier climate become the main factors of regional differentiation. Ukraine can thus be divided into four major natural units: the northern, the middle, the southern, and the mountainous. The northern belt, commonly known as Polisia, is a sparsely populated territory of postglacial landscapes, forests, and swamps. The middle belt is a territory of erosive loess landscapes. It has a temperate, subhumid climate and degraded chernozem and chernozem soils that developed under a natural forest-steppe vegetation. Possessing excellent conditions for agriculture, the middle belt supports arable farmland and is densely populated. The southern belt differs from the middle belt in its warmer, semiarid climate. Its chernozem and chestnut soils developed under the steppe flora, which until recently was grazed by herds of wild or domesticated ungulates. At present it is largely plowed where some crops enjoy supplemental irrigation, but it is less densely peopled than the middle belt, except in the industrial areas. The Carpathian Mountains, the Crimean Mountains, and the Caucasus, along with their respective foothills and submontane depressions, constitute separate small units.

HISTORICAL REGIONS OF UKRAINE

The differentiation of Ukrainian national territory on the basis of human characteristics can involve matters of ethnography. The cultural attributes of Ukrainians, which have evolved in conjunction with their use of the environment and interrelations with their neighbours, include subtle differences in language (dialects), music, beliefs, and social behaviour, as well as in elements of material culture, such as house types and styles in clothing, embroidery, pottery, and the like. Such characteristics are best preserved in isolated locations with minimum immigration, such as swampy Polisia or the secluded valleys of the Carpathian Mountains. V. Horlenko recognized six ethnographic regions and several subregions of Ukraine. The Polisia or northern region (which corresponds closely to the physical-geographic region of Polisia) possesses autochthons with archaic cultural traits. It may be subdivided into three subregions, the left-bank region or Chernihiv Polisia, the central region or Kievan Polisia (northwest of Kiev), and the western region or Volhynian Polisia. The Carpathian ethnographic region is the most complex region of all. It includes not only the Carpathian Mountains but also the Tysa Lowland in Transcarpathia and the Dniester Valley in Subcarpathia, extends northward to Roztochchia, and includes the western end of the Podolian Upland. The region shares borders with the Poles, Slovaks, Hungarians, and Rumanians, peoples with whom the Ukrainians of the region have had lengthy interactions. In the mountains there still exist three distinct Ukrainian ethnographic groups (from the southeast to the west, respectively), the Hutsuls, the Boikos, and the Lemkos. The remaining regions, by contrast, are more homogeneous and similar to one another. The Podolian ethnographic region corresponds to the central and eastern parts of the Podolian Upland. The central or Dnieper ethnographic region extends south of Kiev along both sides of the Dnieper to Kirovohrad in the south and Poltava in the east. It is the Ukrainian heartland and was the locus of the most vigorous development of the Ukrainian nationality from the 15th and 16th centuries. Slobidska Ukraine, the fifth major ethnographic region, was settled in the 17th century by Ukrainian Cossacks as military servitors on the Muscovite steppe frontier, and thus experienced a long period of Russian-Ukrainian interaction. The territory extends in an arc from Sumy through Kharkiv and eastward, with a strip in the RF south of Lgov and Belgorod that broadens into a wedge south of Voronezh to Novokhopersk and south to Morozovsk in Rostov oblast. Finally, the southern or steppe ethnographic region is large and not clearly differentiated. It corresponds approximately to the steppe belt. The region was settled only in the 18th century, by Ukrainian farmers who, more than in other regions, were influenced by the commerce and urban way of life of the Russians (throughout the belt), and by interaction with them and with the Germans (in the west, center, and east), the Rumanians (in the west), the Bulgarians (in the west and center), the Greeks (in the east), and the Caucasian peoples (in the Kuban).

Distinct regional Ukrainian identities have developed among segments of the population that have been isolated from the mass of the Ukrainian people by historical circumstance. The most obvious examples are the populations of Transcarpathia (which existed as a unit under the Kingdom of Hungary, Transylvania, Hungary of the Austro-Hungarian Empire, and Czechoslovakia), Galicia (un-

der the Kingdom of Poland, Austria, and then Poland again), Bukovyna (under Rumania), Kholm and Podlachia (both mostly under Poland), Polisia (under Lithuania and then Russia, Poland, and Belarus), Slobidska Ukraine (under Muscovy, the Russian Empire, and the RSFSR), and the Kuban and the eastern Subcaucasus (under the Russian Empire and the RSFSR). The groups affected by regionalism constitute approx one-fifth of the Ukrainian population; the rather undifferentiated mass of Central Ukrainians form the remaining four-fifths.

Taking into consideration the historical past of Ukraine, the regional differences of the population, its present distribution, and economic conditions, V. Kubijovych divided Ukraine into 14 historical-geographic regions. Although Transcarpathia and the Crimea are smaller, they are singled out as separate regions because of their historical and geographical individuality. Similarly, the Kholm area and Podlachia and Bukovyna are regarded as separate regions. Polisia is divided among the Volhynian, Kiev, and Chernihiv regions, because its residents tended to interact (culturally and economically) with the more densely populated and more economically developed centers. The center of each region is based on the potential possibilities of development. (See also *Administrative territorial division.)

Registered Cossacks (*reiestrovi kozaky*). *Cossacks who were accepted into the special Cossack units of the Polish-Lithuanian Commonwealth army and were enrolled in a special register (hence the term). The first effort to secure the Cossacks' military services was made in 1524 by King Sigismund I, who assigned S. Polozovych and K. Kmytych the task of setting up a Cossack unit in the royal army. Because the crown lacked sufficient funds to pay the Cossacks for their services, the plan was not realized, and similar efforts by O. *Dashkevych, the starosta of Cherkasy, in 1533 and again by Sigismund in 1541 also failed. Whereas the starostas in Ukraine wanted to organize Cossack units primarily for more effective defense of the Commonwealth's frontier against Tatar attacks, the kings wanted them for the purpose of controlling the Zaporozhian Cossacks and restraining their anti-Crimean Tatar and anti-Turkish campaigns and raids.

The creation of a registered Cossack force was first decreed on 2 June 1572 by King Sigismund II Augustus, who ordered the grand hetman of the army, J. Jazłowiecki, to hire and register 300 of the wealthiest Cossacks. Thenceforth nonregistered Cossacks were accorded a semilegal status. The registered Cossacks were officially outside the jurisdiction of the local authorities and were placed under the command of a government-appointed elder (*starshyi*), the first of whom was the Polish noble J. Badowski. In 1578 King Stephen Báthory allowed the register to be in-

creased to 600 Cossacks, and appointed Prince *Michał Korybut Wiśniowiecki as their elder. The registered Cossacks were exempted from taxation and granted the right to own land and the privilege of self-government under an appointed member of the *starshyna*. They had their own standards, kettledrums, and other insignia; were paid in cash and clothing; and were given ownership of the town of Trakhtemyriv and its monastery to house their winter quarters, arsenal, and hospital. The Commonwealth government officially named the registered Cossacks the Zaporozhian Army to underscore the fact that it considered the actual *Zaporozhian Host a legal non-entity. The registered Cossacks were obligated to serve in central Ukraine and, when ordered to do so by the government, set up garrisons beyond the Dnieper Rapids.

The efforts of Stephen Báthory and his successors to control the growth of Cossack society through registration proved futile. From the late 16th century on, its consolidation occurred in two centers, the Zaporozhian Sich and Trakhtemyriv. The Sich became the hearth of revolutionary independence, and Trakhtemyriv was the headquarters of the privileged, conservative, registered Cossack elite. After the Cossack rebellions of the 1580s in Ukraine, the Commonwealth government decreed an increase in the register to 1,000 on 25 June 1590 and turned over the Kremenchuk fortress to the registered Cossacks. During the Commonwealth's wars with Muscovy and the Ottoman Empire the register was increased to 10,000, in 1618. The 1619 *Rostavysia Treaty reduced it to 3,000, but in 1620 it was again increased, that time to 20,000.

The 1625 *Kurukove Treaty set the register at 6,000 and granted the registered Cossacks the right to elect their own hetman, subject to approval by the king. Under the provisions of the *Pereiaslav Treaty of 1630 the register was expanded to 8,000. In 1638, after the suppression of the rebellions led by P. Pavliuk and K. Skydan, in which registered Cossacks had joined the rebel side, the register was reduced to 6,000 and then 5,000, the registered Cossacks lost the right to elect their own *starshyna* and have their own court system, the hetman was replaced by an appointed commissioner subordinated to the Polish grand hetman, and Cossacks excluded from the register were enserfed. After the outbreak of the Cossack-Polish War in 1648, the registered Cossacks mostly sided with Hetman B. Khmelnytsky and played an instrumental role in subsequent Polish defeats. Under Khmelnytsky the Cossack register was replaced by the **komput*, and the former registered Cossacks were designated *town Cossacks. The Poles' attempts at reducing the register to 40,000 in the 1649 Treaty of *Zboriv and then 20,000 in the 1651 Treaty of *Bila Tserkva proved unenforceable, and Khmelnytsky increased it to 50,000 and then 60,000 in 1654. The term 'registered Cossacks' was not used after 1660.

Prominent leaders of the registered Cossacks included S. *Kishka, K. *Kosynsky, P. *Sahaidachny, Ya. *Borodavka, M. *Doroshenko, H. *Chorny, and I. *Karaimovych. In 1875 O. Bodiansky published the detailed register of the entire Zaporozhian Host compiled after the Treaty of Zboriv.

Rehabilitation. A Soviet legal practice by which a previously condemned person was cleared, often posthumously, of the crimes attributed to him or her and was restored officially to full civilian status. The procedure was one of the key methods by which the Soviet regime tried to reclaim public confidence and legitimacy after having destroyed, through execution, imprisonment, deportation, and exile, millions of innocent people. The wide-scale use of extralegal procedures and the gross violations of judicial processes that took place under J. Stalin's regime eventually had to be admitted and condemned by the Party, and the stigma of guilt, which justified continued discrimination against the victims of repression and their families, had to be removed.

In Soviet Ukraine rehabilitation began soon after Stalin's death. Several family members of repressed Ukrainian leaders, such as S. Kosior, were released from the labor camps. The first group of Stalin's victims who profited from the milder climate in 1953 was the Soviet partisan group. Its members were repressed in 1944 for acting without proper clearance from the Soviet partisan staff in Ukraine. Until 1956 the process of rehabilitation was conducted in silence, with no announcements in the press. At the 20th Party Congress (1956) A. Mikoyan and N. Khrushchev praised some Party leaders in Ukraine who had been repressed by Stalin, but there was little interest in rehabilitating them. Only in 1958-9 was N. Khrushchev's secret speech echoed in the press by a few references to prominent Ukrainian victims of Stalinist *terror.

The 22nd Congress of the CPSU (1961) persuaded the Ukrainian leaders to adopt a bolder policy on rehabilitation. During the congress M. Pidhirny exposed L. Kaganovich's role in the purge of 1947, and three months later he drew public attention to M. Skrypnyk. It was not until 1962 that Skrypnyk was cleared of 'bourgeois nationalism,' and he was so cleared in the context of an attack on Stalin's nationality policy. The use of rehabilitation for political purposes was typical of the late Khrushchev period. The Ukrainian press participated in the anti-Stalin campaign of 1963-4. The publication of information about V. Zatonsky was an important step. But the disclosures continued to be unreliable and incomplete. Although many victims were mentioned, their ultimate fate remained a secret. Ukrainian victims received less attention than victims from other national groups. After 1963 a number of Ukrainian leaders of the 1930s, such as E. Veger, M. Maiorov, K. Sukhomlyn, P. Liubchenko, and A. Medvedev, were rehabilitated. In the 1970s the anti-Stalin campaign was curtailed, yet the names of prominent victims continued to appear, M. Chuvirin and V. Stroganov, for example. The second edition of *Ukrains'ka radians'ka entsyklopediia* (Ukrainian Soviet Encyclopedia, 1977-85) contained information about many rehabilitated leaders without explaining how they perished.

The rehabilitation of victims who were not Party members was a more delicate problem. In the 1950s most labor-camp inmates who had been involved in the postwar na-

tional movements were not released, let alone rehabilitated. The new category of victims, the prisoners of conscience of Khrushchev's and L. Brezhnev's regimes, had not been rehabilitated by 1991. Under M. Gorbachev's policy of glasnost the amount of information about Stalinist and later repressions increased dramatically, but the range of rehabilitation categories grew slowly.

A. van Goudoever

Rehabilitation medicine. In its medico-social aspect, rehabilitation is a system of knowledge and methods directed to the maximum compensatory adaptive function and independence of physically disabled individuals. Rehabilitative techniques have specific characteristics at various stages of treatment: in-hospital, outpatient, and sanatorium. In the former USSR rehabilitation medicine was not a separate specialty. Rehabilitation therapies were developed in the various individual specialties, particularly in neurology, neurosurgery, and orthopedics. In Ukraine rehabilitation units are associated with the larger hospitals in Kiev, Lviv, Donetsk, Dnipropetrovske, Kharkiv, Odessa, Saky, Slovianske, and Yalta.

The first department of rehabilitation in a medical education institute in the USSR was established in 1969 at the *Kiev Institute for the Upgrading of Physicians, under the directorship of L. Pelekh. Over 500 physicians from Ukraine and from other Soviet republics were trained yearly in the department, which has been instrumental in developing new methods of rehabilitative therapy for patients with neurological and neurosurgical conditions such as stroke, head injury, hemiplegia, and radiculitis. Research is conducted in the use of electrostimulation and manual therapeutics for paralytic conditions. The department has also developed a model for providing rehabilitative care in rural communities. In early 1991 the Department of Rehabilitation Medicine organized the first course in electromyography in the former USSR.

O. Maryniak, A. Ovcharenko

Rehman, Antoni, b 15 May 1840 in Cracow, Poland, d 12 January 1917 in Lviv. He was appointed a professor of geography at Lviv University in 1882. He conducted several botanical expeditions to southern Africa, the Crimea, and Podilia. His two-volume survey *Ziemie dawnej Polski i sąsiednich krajów słowiańskich* (Lands of Ancient Poland and the Adjoining Slavic Territories, 1895, 1904) served for many years as an important reference work about Ukraine's geography and flora.

Řehoř, František, b 16 December 1857 in Stěžery, Bohemia, d 6 October 1899 in Prague. Czech ethnographer and folklorist; honorary member of the Prosvita society from 1895. While living in Galicia (1877–90) he contributed articles to the Czech press about the traditions and lore of the Ukrainian people and wrote over 160 entries on Ukrainian subjects for *Ottův slovník naučný*. He was acquainted with

many Ukrainian scholars and writers, such as I. Franko, M. Pavlyk, V. Shukhevych, and O. Kobylianska. He donated his Czech-language library to the Prosvita society in Lviv and his ethnographic collection to the Prague Industrial Museum, which later transferred it to the ethnography department of the Czech National Museum.

Reich Food Office. See German Labor Front.

Reichskommissariat Ukraine (RKU). An administrative unit that included most of the Ukrainian territory under civilian rule during the German occupation of 1941–4. It was one of the four commissariats that A. *Rosenberg, head of the Ministry for the Occupied Eastern Territories, planned to establish. On 20 April 1941 A. *Hitler instructed him to prepare a plan for the political restructuring of the European portion of the USSR following its occupation. According to the plan the RKU was to constitute a territory independent of Russia with a temporary Ukrainian government under German political, economic, and military control. Hitler appointed Rosenberg minister for the occupied territories on 17 July 1941 but did not sanction the formation of a Ukrainian government. In order to weaken Ukrainian aspirations to independence he excluded several territories from the proposed Reichskommissariat. Galicia was annexed to the Generalgouvernement, and northern Bukovyna and Transnistria were given to Rumania. The Volhynian town of Rivne, not Kiev, was made the capital of the RKU.

The RKU, officially established on 1 September 1941, was made up of Volhynia, Polisia, Right-Bank Ukraine, and part of the Poltava region. Following the advance of German forces the remainder of the Poltava region and Dnipropetrovske, Zaporizhia, and Kherson oblasts were annexed to the RKU on 2 September 1942, and the rest of Left-Bank Ukraine remained under military rule. The territory of the RKU comprised 339,275 sq km, with a population of approximately 17 million.

In practice the administration of the RKU was directed not by Rosenberg but by E. *Koch, whom Hitler appointed Reichskommissar of Ukraine without consulting Rosenberg. Koch, who described himself as 'a brutal dog,' represented Nazi policy at its most ruthless. No Nazi official did more than Koch to antagonize Ukrainians. Owing to his good connections with Hitler's secretary, M. Bormann, Koch was able to neutralize most of Rosenberg's instructions. Among the RKU's most prominent officials were Koch's deputy and follower, P. Dargel, and their opponent A. Frauenfeld, *Generalkommissar* of Tavriia.

A number of important departments operating in the RKU were subordinate to the central authorities in Berlin. Among them were the police, under H. Himmler; H. Göring's Four-Year Plan and Economic Executive Staff East, which managed heavy industry and resource extraction; the mobilization of labor for work in Germany, under the direction of F. Sauckel; propaganda, under J. Goebbels; and transport and communications, directed by ministries in Berlin.

In administrative terms the RKU was divided into *Generalbezirke* headed by *Generalkommissäre* appointed by Hitler; the latter were subdivided into *Kreise*, each made up of four raions, headed by *Gebietskommissäre* appointed by Rosenberg. Larger towns were administered by *Stadtkommissäre*, and raion centers had German police stations and

REICHSKOMMISSARIAT UKRAINE

Landwirtschaftsführer, who were in charge of agriculture. Local administration consisted of raion officials and village elders, all subordinate to *Gebietskommissäre*. The mayors of larger towns were under the authority of *Stadtkommissäre*. The *Ukrainian auxiliary police, recruited by raion heads and mayors of larger towns, was subordinate to the German police and the civil administration of the RKU.

Soviet criminal law was abolished in the RKU and replaced by German law. In civil cases German legal norms (rather than laws) were to be applied, but customary law and the instructions of German administrators were also used. Both German and local (*vlasnokraiovi*) courts existed in the RKU. In centers administered by *Generalkommissäre* there were German courts of first instance for civil and criminal cases involving German citizens and *Volksdeutsche*. The German Supreme Court (Deutsches Obergericht) had its seat in Rivne. Attached to every German court was a so-called special court consisting of a judge and two jurors (who did not necessarily have legal training), which adjudicated cases that threatened the interests of the Reich, such as attacks on German administrators and murders of *Reichsdeutsche*. Such crimes bore statutory death penalties. Sentences imposed by the German Supreme Court and special courts could not be appealed. When an immediate threat to security and public order was involved, cases could be tried by summary courts

(*Standesgerichte*) convened by the *Generalkommissar* or his representatives. Once confirmed by the *Generalkommissar*, their verdicts were not subject to appeal.

Owing to Koch's delaying tactics, it was not until the spring of 1942 that local courts (*kraiove sudivnytsstvo*) were established to deal with civil and minor criminal cases (major cases were tried by German courts). Many cases were adjudicated by *Gebietskommissäre*, who handed down administrative decisions. The insignificant number of tribunals accessible to the non-German inhabitants of the RKU did not provide sufficient legal protection, especially to the rural population. More important, the destructive policies of Koch and Himmler were not subject to the RKU's official norms (see *Nazi war crimes in Ukraine).

Property rights were not formally established. Following the abolition of Soviet law the German administration stood for private ownership in principle and criticized the collective-farm system. Nevertheless the system remained basically unaltered in the RKU. Koch and the officials of the German food and agriculture ministry believed that collective farms facilitated the exploitation of Ukrainian peasants for Germany's benefit. Not until the German defeat at Stalingrad did Rosenberg propose the reprivatization of collective-farm property by means of a statute dated 3 June 1943, but it was largely boycotted by Koch and limited by partisan activity, as well as by the German

retreat. Barely 10 percent of the land intended for distribution was actually allotted to the peasants.

Industry and commerce were mobilized to serve Göring's Four-Year Plan. A law regulating commercial and industrial property ownership was to be enacted after the war; for the duration, property was considered basically nationalized. Industrial concerns were administered by German firms and entrepreneurs (an arrangement known as *Treuhandverwaltung*), and German commercial monopolies were established to produce for Germany's needs and distribute consumer goods to the working population of the RKU. The only exception was the All-Ukrainian Association of Consumer Co-operative Organizations, which was left in Ukrainian hands out of practical considerations, although its organizational structure above the raion level was turned into a German commercial institution at the end of 1942. All taxes levied under Soviet rule remained in force, and a Central Bank of Issue for Ukraine was established in March 1942.

Hitler never clarified the administrative norms that were to prevail in the RKU or the legal status of its population. The national feelings of Ukrainians in the RKU were to be encouraged insofar as they divided Ukrainians and Russians and eliminated the danger of a combined anti-German front. Such motives lay behind measures such as the introduction of the Ukrainian language along with German in the RKU to the exclusion of Russian and the minting of the *karbovanets* instead of the ruble. A particular measure taken for the purpose of fanning anti-Soviet sentiment was the investigation of the *Vynnytsia Massacre. In other respects the Nazis weakened and retarded elements of national consciousness that might have led Ukrainians to demand independence. General education was limited to four grades of primary school, and higher education was restricted to narrowly specialized vocational courses. Cultural institutions, such as the Prosvita society, libraries, museums, theaters, scholarly bodies, and publishing houses, were closed; the press was placed under German control and held to a lower standard. The population's capacity for physical survival was undermined in various ways: food supplies were cut; medical services were reduced (to check the 'biological power of the Ukrainians,' in Koch's words); Ukrainian **Ostarbeiter* and POWs were physically abused; and various strata of the population were decimated for actual or supposed support of the partisan movement. It was in Koch's immediate area, Volhynia, that his brutal methods prompted the formation of the *Ukrainian Insurgent Army in 1942; he was also opposed by *Soviet partisans in Ukraine.

A German colony, the RKU constituted an important part of Hitler's *Lebensraum* and was completely deprived of autonomy or international status. Nazi plans called for the postwar unification of the RKU with the territory of the German Reich; most Ukrainians (considered unfit for Germanization) were to be resettled beyond the Urals to make room for German colonists. In fact Hitler was unable to inspire many Germans to colonize Ukraine. Despite ambitious plans only a few villages were cleared of their Ukrainian inhabitants and populated with Germans (both groups were resettled under duress). Those experiments were profoundly resented by the local population, which saw them as portents of German postwar intentions. Resettlement was also prevented by the German retreat and then by the formal liquidation of the RKU on 10 November 1944.

Reichsnährstand. See German Labor Front.

Reichsrat. See Parliament.

Reikhel, Mykhailo [Rejxel', Myxajlo], b 1880, d 1956. Soviet jurist and statesman. A former Menshevik and a lawyer by profession, under Soviet rule he was Ukrainian SSR people's commissar of labor (1920), chairman of the Little Council of People's Commissars (1921–6), and deputy people's commissar of justice and deputy general procurator (1922–6). From 1926 he served on the Chief Concession Committee in Moscow and as a Soviet diplomat, and from 1938 he taught state and civil law. He wrote books on the constitutional relations of the Soviet republics (1925) and Soviet family law (1942), edited a compendium on Soviet federalism (1930), and contributed many articles to Soviet law journals.

Reims Gospel (Reimske yevanheliie). One of the oldest extant Church Slavonic literary monuments. It consists of (1) parts of the Gospels (the last 16 of 35 folios) in Cyrillic, which the Holy Roman emperor Charles IV acquired somewhere in Hungary and presented to the Emmaus Monastery in Prague; and (2) 31 folios of readings from the Gospels and Epistles transcribed in the Glagolitic alphabet from a Croatian original by a Czech monk at the Emmaus Monastery in 1395 for use in Roman Catholic services. The entire codex was taken to Istanbul, most likely by Hussites after the Emmaus Monastery burned down in 1421. There it was bought by Cardinal Charles of Lorraine and presented to the cathedral in Reims, France, where it was preserved from 1574 and later given to the Reims Municipal Library. In 1793 the gems inlaid in its cover were plundered. The gospel is legendary: it has been said that French monarchs used it during their coronation oaths, and that the Cyrillic text was first read from it by Tsar Peter I in 1717 or by a Russian emissary in 1728. A facsimile edition of the gospel was first published by S. de Sacy in Paris in two volumes in 1843. The text, together with that of the Ostromir Gospel and a parallel Polish translation, was published by V. Hanka in Prague in 1846. An 1852 edition of the text with a Latin translation was funded by Tsar Nicholas I and published in Paris. A fourth edition of the text was published by L. Léger in Reims in

1899. Its language was studied by P. Rakovsky-Biliarsky (1847), who believed the Cyrillic parts were a 14th-century Rumanian copy of a Serbo-Croatian original, and by A. Sobolevsky (1887), who claimed they were of 11th- or 12th-century East Slavic origin. The text, along with a history of the scholarship, was published by L. Zhukovskaia in Moscow in 1978.

O. Horbach

Lev Reinarovych

Reinarovych, Lev [Rejnarovyč] (Rejnarovycz), b 14 January 1914 in Kniashpil, Dobromyl county, Galicia, d 31 January 1987 in New York. Opera singer (baritone). A graduate of the Lysenko Higher Institute of Music in Lviv, from 1941 he was a soloist at the Lviv Opera Theater and from 1946 a member of B. Piurko's Ukrainian Opera Ensemble in Germany. After emigrating to the United States he appeared on stage in New York and other cities and on television. His operatic roles included *Scarpia* in G. Puccini's *Tosca*, Escamillo in G. Bizet's *Carmen*, Karas in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, and Henry I in A. Rudnytsky's *Anna Yaroslavna*.

Reinforced-concrete industry. A branch of the *building-materials industry that produces reinforced-concrete structural members and components for almost every branch of the construction industry. Its chief products are columns, beams, frames, panels, plates, tubes, and poles. About 35 percent of the total volume of the USSR reinforced-concrete production (1970) consisted of cast reinforced-concrete members (nonstandard or very heavy parts). The use of precast reinforced-concrete products in construction allows a considerable gain in labor efficiency and product quality. By 1978 the USSR was producing over 130 million cu m of precast structural members, including over 23 million produced by Ukraine. A substantial part of the production consisted of large panels for housing, manufactured by plants in Kiev, Kharkiv, Donetsk, Odessa, and Dnipropetrovske. The largest precast products plant in Ukraine is the Kremenchuk Experimental Plant of Modular Housing Construction. The first plant-building complexes in the USSR, which manufactured and assembled reinforced-concrete structural parts for industrial plants, were set up in Brovary, near Kiev, Donetsk, Zaporizhia, Dnipropetrovske, Lviv, and Berdianske. The Kiev Reinforced-Concrete Products Plant No. 5 supplies preschool institutions and administrative offices with special products. The Kakhivka, Novomoskovske, and Artsyz plants supply reinforced-concrete parts to the hydrotechnological building industry. Research on the re-

inforced-concrete production process and the application of reinforced-concrete products in the construction industry is conducted at the *Scientific Research Institute of Building Systems and the State Institute for the Development and Design of Civil Residential Construction and Enterprises of the Construction Industry.

Reinfuss, Roman, b 27 May 1910 in Przeworsk, Poland. Polish ethnographer specializing in Western Ukraine. A graduate of Cracow University (PH D, 1946), he lectured on ethnography at Wrocław (1946–9), Lublin, and Cracow universities. From 1946 he headed the research workshop of folk art at the Art Institute of the Polish Academy of Sciences, which he founded. He organized the first systematic research on folk culture in Poland and devoted considerable attention to the Lemko region. In 1960 he organized a research workshop of folk art and a folk architecture museum in Sianik. He has published over 30 ethnographic studies of the Lemkos and Boikos, including articles in *Wierchy* (vol 14, 1936), *Prace i materialy etnograficzne* (vol 7, 1948), and *Etnografia polska* (1961).

Reipolsky, Ivan [Rejpol's'kyj], b 1789, d 3 October 1863 in Kharkiv. Physician. A graduate of Kharkiv College (1810) and the Moscow Medico-Surgical Academy (1814), he served as a military doctor and from 1823 taught pathology, internal medicine, and botany at Kharkiv University. He helped to fight cholera in Kharkiv and Kursk and described various types of poisoning, including lead poisoning. In 1823 he wrote a veterinary handbook.

Rej, Mikołaj, b 4 February 1505 in Zhuravno, near Zhydachiv, Galicia, d 4 November 1569 in Rejowiec, in the Kholm region. Polish writer and moralist, and Calvinist polemicist. His prose works were marked by their folksy and simple style and the use of many Ukrainian loanwords. They were very popular in Ukraine and an important influence on the baroque literature of the 16th and 17th centuries, especially the *didactic gospels.

Rekanovsky, Petro [Rekanov's'kyj], b ca 1800, d after 1865 in Kiev. Theater director and actor. He began his career in Kiev in A. Lenkavsky's troupe and then led his own Ukrainian-Russian-Polish troupe in Kiev (1834–5, 1836–7, 1840–2, 1843), Chernihiv (1837), and Mykolaiv (1837–40). He played Vyboryni in I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava).

Reklinsky, Ivan [Reklins'kyj], b and d ? Late-17th- to early-18th-century wood engraver at the Kievan Cave Monastery Press. He engraved the title pages of A. Radyvylovsky's *Vinets Khrystov* (Christ's Wreath, 1688) and a Liturgicon (1692) and the illustrations of Christ and the bookmen in *Vinets Khrystov*, of the pharaoh's drowning in the Psalter of 1690, of the Theotokos with the Archangels Michael and Gabriel and of Christ with the Holy Mother and John the Evangelist in the Achatistus of 1693, and of King David in the Psalter of 1708.

Reklinsky, Vasyl [Reklins'kyj, Vasyl'], b and d ? Painter of the 18th century. He painted the iconostases in the cathedral at the Monastery of the Exultation of the Holy Cross in Poltava (1727) and in St Nicholas's Cathedral in Nizhen (1734).

Religiino-naukovyi vistnyk (Religious-Scholarly Messenger). An irregular journal of theology and church history published by the Orthodox Brotherhood of St Mary the Protectress in the internment camps for soldiers of the Army of the UNR in Aleksandrów Kujawski and then Szczepiórno, Poland. It appeared from March 1921 to 1923 under the editorship of P. Bilon.

Religious funds. Funds established in the Habsburg Empire in the 1780s by Emperor Joseph II out of assets confiscated from churches and monasteries. They covered the expenditures mainly of the Catholic church, but also of the Orthodox church in Bukovyna. The funds provided for the needs of the eparchies and the chapters of cathedral clergy, and for the education and supplemental income of the clergy. For a brief time there was a single fund administered by a special imperial council; later, separate funds were established for each crownland. In Western Ukraine there were religious funds for Galicia and Bukovyna; Transcarpathia was eligible for the Hungarian religious fund.

In Galicia the fund was quickly dispensed and largely wasted because of the sale of church objects for excessively low prices, and because of the corruption of its administrators. The central government eventually ended up subsidizing the fund annually to cover expenditures.

The religious fund for Bukovyna was large and well run. It was gathered from 14 monasteries and consisted largely of forests, arable land, and fish ponds, totaling over 200,000 ha or almost 20 percent of all of the crownland. It was administered by the Orthodox metropolity in Chernivtsi and gave support to monasteries, schools, and parishes. It provided funds for the construction of the metropolitan's residence (now the main campus of Chernivtsi University) and a large cathedral. It also financed a number of secondary schools, a theological institute, and the theology faculty at Chernivtsi University from 1875.

After the dissolution of the Austro-Hungarian Empire, the landholdings in the religious funds were divided among Austria, Hungary, Poland, Czechoslovakia, Rumania, and Yugoslavia. In Rumania the fund remained in the jurisdiction of the Bukovynian metropolitan's consistory, and the state reserved the right to review its activities.

Religious holidays. See Church holidays.

Religious music. See Church music.

Religious press. Orthodox, Catholic, and Evangelical serials and periodicals devoted to theology, spirituality, and religious affairs.

Orthodox press. The Russian Orthodox press of the 19th and early 20th centuries in Russian-ruled Ukraine was exclusively Russian in language and tsarist in spirit. Each eparchy had an official organ, *Eparkhial'nye vedomosti*, which published official announcements, sermons, articles on theological and church topics, and some articles on local history and ethnography. These semimonthly periodicals were established in Odessa (Kherson eparchy) in 1860, Kiev and Chernihiv in 1861, Kamianets-Podil'skyi (Podilia eparchy) in 1862, Poltava in 1863, Kharkiv and Kremianets (Volhynia eparchy) in 1867, Symferopil (Tavriia eparchy) in 1869, Katerynoslav in 1872, and

Kholm (Kholm-Warsaw eparchy) in 1877. The main religious scholarly journal was **Trudy Kievskoi dukhovnoi akademii* (est 1860). Others were the monthly *Dukhovnyi vestnik* (1862-7) in Kharkiv and the Kharkiv Theological Seminary's weekly and then semimonthly *Dukhovnyi dnevnik* (1864-5) and semimonthly *Vera i razum* (1884-1917). In Kiev the weekly *Rukovodstvo dlia sels'kikh pastyrei* (est 1860) of the Kiev Theological Seminary and the monthly *Propovedchiskii listok* (1882-) helped priests prepare sermons. Other religious periodicals were the weekly *Voskresnoe chtenie* (est 1837) in Kiev; the semimonthly *Blagovest* in Kharkiv (1883-8) and Nizhen (from 1889); the semimonthly *Nastavleniia i utesheniia Sviatoi Very Khristianskoi* (est 1887) of the St Andrew Skete on Mt Athos, published in Odessa; and the weekly *Pochaevskii listok* (est 1887), the political-religious organ of the reactionary Union of the Russian Peoples published by the Pochaiv Monastery Press. Part of *Kholm'skaia Rus'* (1912-17), the daily organ of the Kholm Brotherhood of the Holy Mother of God, appeared in Ukrainian.

After the establishment of the Ukrainian Central Rada in 1917, the first short-lived religious periodicals appeared in Ukrainian: the UNR Ministry of Religious Affairs weekly **Vira ta derzhava* (1918) and daily *Slovo* (from October 1918), and *Kyïvs'kyi pravoslavnyi vistnyk* in Kiev; *Pravoslavnaia Volyn'* (1917-21), the organ of Volhynia eparchy, which appeared primarily in Russian but published sermons in Ukrainian, and *Svitets'* (ed N. Abramovych) in Zhytomyr; and *Tserkovnyi vistnyk* (1918) in Zaporizhia. In the early Soviet period the official organ of the Ukrainian Autocephalous Orthodox church was **Tserkva i zhyttia* (Kharkiv, 1927-8). Other religious journals were *Ukraïns'kyi pravoslavnyi blahovisnyk* (1925-32?), of the Russian Orthodox Patriarchal church in Ukraine, and *Tserkovni visti* (1927), of the so-called Renovatist church. The religious press was almost entirely suppressed during the Stalinist terror of the 1930s. From then in Soviet Ukraine (and from 1945 in annexed Western Ukraine) the only permitted religious journals were the Moscow patriarchate's *Zhurnal Moskovskoi patriarkhii* (est 1931) and **Pravoslavnyi visnyk* (est 1946), the organ of the Ukrainian exarchate of the Russian Orthodox church. These journals were allotted very small pressruns, and their readers were held in great suspicion by the authorities. In contrast, **antireligious propaganda* was fostered by the regime from the early 1920s, and several journals were published by the state to promote atheism, such as **Bezvirnyk* (1925-35), *Voiovnychi ateïst* (1960-4), and its successor, **Liudyna i svit* (est 1965).

The Orthodox church in interwar Poland, especially in Volhynia and Warsaw, enjoyed greater freedom than in the USSR. Published in Ukrainian were **Pravoslavna Volyn'* (1922) and **Tserkva i narid* (1935-8) in Kremianets; **Na varti* (1924-6), *Ridna tserkva* (1927-8), and **Dukhovnyi siach* (1927-31) in Volodymyr-Volyn'skyi; *Dukhovna besida* (1924-5) and *Nasha besida* (1926-7) in Warsaw; and **Za sobornist'* (1932-5) and *Shliakh* (1937-9) in Lutske. The Polish scholarly serial of the Faculty of Orthodox Theology at Warsaw University, *Elpis* (1926-37), published some materials in Ukrainian. In Warsaw the metropolitan see published the weekly *Pravoslavnyi selianyn* (1932-5) and, for children, the monthly *Dytyna* (1936-8) as supplements to its Russian-language paper, *Slovo*. The irregular **Religiino-naukovyi vistnyk* was published in the internment camps

for soldiers of the UNR Army in Aleksandrów Kujawski (1921), Szczepiórno (1922), and Skalmierzyce (1923).

In interwar Transcarpathia Orthodox periodicals were Russophile and appeared in Russian. They were *Ruskii pravoslavnyi vestnik* (1921–2, 1935) in Uzhhorod, which supported the Russian Orthodox Church in Exile; *Tserkovnaia pravda* (1925), *Pravoslavnaia Karpatskaia Rus'* (1928–30), and *Pravoslavnaia Rus'* (1931–9); *Pravoslavnyi karpatorusskii vestnik* (1935–8), the organ of Mukachiv and Prešov eparchies; and *Russkoe slovo* (1936) in Prešov. After the Second World War *Svet Pravoslaviia* appeared in Russian before switching to Ukrainian as *Holos Pravoslaviia* in 1958. Since 1958 *Zapovit sv. Kyryla i Mefodiia* has appeared in Ukrainian as the official organ of the Orthodox church in Czechoslovakia.

Each of the major jurisdictions of the émigré Ukrainian Orthodox church has had its own regular organs. The Ukrainian Orthodox Church in the USA has published **Dnipro* (1922–50), **Ukrains'ke pravoslavne slovo* (since 1950), **Ukrainian Orthodox Word* (since 1967), and the annual *Ukrains'kyi pravoslavnyi kalendar* (since 1951). The Ukrainian Orthodox Church of America has published the bilingual **Ukrainian Orthodox Herald* since 1935. The organs of the Ukrainian Autocephalous Orthodox Church (Conciliar) have been **Pravoslavnyi ukrainets'* (est 1952) and **Tserkva i zhyttia* (1957–77). The organ of the Ukrainian Autocephalous Orthodox Church in Exile was the quarterly *Zhyttia i tserkva* (1956–67). Many parishes, local brotherhoods, and the Ukrainian Orthodox Youth Society have also published their own bulletins and magazines.

In Canada the earliest Orthodox periodicals – *Pravoslaviie* (1907–8) in Winnipeg, *Pravoslavnyi rusin* (1911–13) in Mundare, Alberta, and **Kanadiiskaia pravoslavnaia Rus'* (1916–17) in Winnipeg – attempted to cultivate Russophile sympathies among Ukrainian immigrants, especially Orthodox settlers from Bukovyna. The first Ukrainian-language periodical was *Pravoslavnyi vistnyk* (est 1924), now **Visnyk*, the organ of the Ukrainian Orthodox Church of Canada (UOCC). A pro-autocephaly faction led by V. Svystun published the bulletin *Ridna tserkva* (1935–40) in Winnipeg. After the Second World War the UOCC also published several popular journals of theology and church history edited primarily by Metropolitan Ilarion (I. Ohiienko), such as **Tserkva i narid* (1949–51), **Nasha kul'tura* (1951–3), **Vira i kul'tura* (since 1953), and the annual calendar-almanac *Ridna nyva*.

After the Second World War Orthodox periodicals emerged in other Western countries to which Ukrainian refugees had emigrated: the irregular *Dzvin* (est 1950) in Buenos Aires; **Ukrains'ka pravoslavna nyva* (1953–74) in Brazil; the quarterly **Vidomosti Heneral'noho tserkovnoho upravlinnia UAPT's u Velykii Britanii* (est 1950) in Great Britain; *Tserkovnyi visnyk* (1945–6), *Tserkva i zhyttia* (1946), *Bohoslovs'kyi visnyk* (1948–9), and the quarterly **Ridna tserkva* (1952–88) in Germany; and *Nash holos* (est 1952), *Pratsia i zhyttia* (est 1966), and *Ukrains'ka pravoslavna informatsiina sluzhba* (est 1962) in Australia. Most have been organs of the Ukrainian Autocephalous Orthodox church.

Catholic press. In Western Ukraine the first Ukrainian Catholic periodical was *Poucheniia tserkovnyia* (1853–4), a supplement to **Zoria halytska*. The first separate Catholic publications were **Tserkovnaia gazeta* (1856–8) and *Tserkovnyi vistnyk dlia rusynov Avstriiskoi derzhavy* (1858) in Budapest; both displayed Russophile tendencies and were closed by the Hungarian authorities. Another simi-

lar journal was *Sion, tserkov', shkola*, a biweekly supplement (1858–9) to **Vistnyk* in Vienna.

The first Ukrainophile periodical was the semimonthly **Ruskii Sion* (1871–85) in Lviv. Populist priests published *Druh naroda* (1876), **Rus'* (1885–7), **Myr* (1885–7), **Dushpastyr* (1887–98), and **Nyva* (1904–39) in Lviv and **Prapor* (1897–1900) in Peremyshl. Scholarly journals from that period included the quarterly *Bohoslovskii vistnyk* (1900–3) and the Russophile *Tserkovnyi vostok* (1911–14) in Lviv. Students at the Greek Catholic Theological Seminary in Lviv published the quarterly **Katolyts'kyi vskhid* (1904–7). The official organs of the Peremyshl Consistory (1874–8) and *Vistnyk* of the Peremyshl (1889–1918), Stanyslaviv (1886–1939), and Lviv (1889–1944) eparchies initially appeared in the artificial **yazychiie* or **etymological* spelling. They contained church news, sermons, and articles on theological and historical topics.

The last quarter of the 19th century saw a rapid growth in popular Catholic religious periodicals, such as **Slovo Bozhe* (1879–81) in Lviv; *Kyryl i Metodii* (1886) in Jaroslaw; **Poslannyyk* (1889–1911) in Berezhany, Lviv, Peremyshl, and Ternopil; and **Misionar* (1897–1944) and, for children, **Malyi misionarchyk* (1903–14, 1920) in Zhovkva. The political and social journals **Ruslan* (1897–1914) and **Osnova* (1906–13) in Lviv also supported the Catholic church and devoted attention to religious issues.

In the interwar period *Misionar* and *Nyva* continued to appear, and several new periodicals were published, especially for children and youths. These included **Nash pryiatel'* (1922–39), **Postup* (1921–31), **Ukrains'ke iunatstvo* (1933–9), *Lytsarstvo Presviatoï Bohorodytsi* (1935–9), and *Katolyts'ka aktsiia* (1934–9). The journal **Dzvonny* (1931–9) published prose, poetry, and articles by Catholic writers; the journals **Bohosloviia* (1923–39), **Analecta Ordinis S. Basilii Magni* (1924–39), and **Dobryi pastyr* (1931–9) published scholarly works. The monthly *Sivach* (1936–9) was dedicated to homiletics and catechism. Newspapers with a Catholic orientation were **Nova zoria* (1926–39), **Pravda* (1927–39), **Beskyd* (1928–33), **Ukrains'kyi Beskyd* (1933–9), **Meta* (1931–9), and *Khrystos nasha syl'a* (1933–9).

After the Soviet occupation and annexation of Western Ukraine all Catholic periodicals there were closed. Since that time **Khronika Katolyts'koi tserkovy na Ukraini* and some other publications have been circulated as samvydav. After the official reinstatement of the Ukrainian Catholic church in Ukraine, the magazine *Vira bat'kiv* began to appear in Lviv (1990).

In Uzhhorod, Transcarpathia, the Russophile Society of St Basil the Great published the religious, cultural, and political periodicals **Svit* (1867–71), **Karpát* (1873–86), *Nauka* (1897–1912, 1918–22), and, in Hungarian, *Görök Katholikus Szemle* (1899–1918). The journal **Listok* (1885–1903) was similar in content and orientation. The Basilian Fathers published **Svitlo* (1913–14, 1926) for children. In the interwar period **Dushpastyr* (1921–41) was the monthly organ of Mukachiv and Prešov eparchies. Other periodicals in this period were the monthly *Da priidet Tsarstvie Tvoe* (1928–38), the Russian-language organ of the Society of the Sacred Heart of Jesus in Prešov, and the Basilian monthly **Blahovistnyk* (1921–39, 1946–9). Since 1968 *Blahovestnik*, the monthly eparchial organ for Uniate Catholics in Czechoslovakia, has been published in Prešov.

The official organ of the Greek Catholic **Križevci* eparchy in Yugoslavia has been *Visnyk Kryzhevats'koi eparkhii*.

In the United States the forerunners of the Ukrainian

Catholic press were the newspaper **Ameryka* (1886–90) in Shenandoah and *Tserkovnaia nauka* (1903) in Johnstown, Pennsylvania. The first official church organs were *Dushpastyr* (1908–14), Bishop S. Ortynsky's monthly in New York and then Philadelphia and New Britain, Connecticut; the Basilian monthly **Ukrains'kyi misionar* (est 1917) and the weekly *Katolyts'kyi provid* (1927–8) in Philadelphia; and **Nebesnaia tsaritsa* (1927–55), the organ of the Byzantine Ruthenian Greek Catholic Diocese of Pittsburgh. **Ameryka*, a Catholic newspaper published five times a week by the Providence Association of Ukrainian Catholics in America, has appeared in Philadelphia since 1912, and the weekly **Shliakh* has appeared there since 1940. Catholic periodicals founded in the postwar period include **Kovcheh* (1946–56) in Stamford, Connecticut; the *Byzantine Catholic World* (est 1956) in Pittsburgh; the weekly **Nova zoria* (est 1965) in Chicago; *Eastern Catholic Rite* (est 1965) in Passaic; the quarterly *Myriany* (1967–79) in Chicago; the Ukrainian Patriarchal World Federation monthly **Patriarkhat* (formerly *Za patriarkhat*, est 1967) in Philadelphia; the biweekly **Tserkovnyi visnyk* (est 1968) in Chicago; and the literary and scholarly quarterly *Dzvony* (1977–9) in Detroit.

In Canada the first Ukrainian Catholic paper, *Kanadyi-s'kyi rusyn*, appeared in Winnipeg in 1911; from 1919 to 1931 it was called **Kanadiis'kyi ukrainets*. The Redemptorist monthly **Holos Spasytelia* has been published in Yorkton, Saskatchewan, since 1923, and the Basilian monthly **Svitlo* has been published since 1938 in Mundare, Alberta, and then Toronto. The newspapers **Ukrains'ki visti* (est 1932) in Edmonton, **Nasha meta* (est 1949) in Toronto, and **Postup* (est 1959) in Winnipeg serve as eparchial organs. Other periodicals were founded in the postwar period: the monthly **Mii pryiatel'* (est 1949) for children in Winnipeg; **Lohos* (1950–83), a theological quarterly, published in Waterford, Ontario, and then Yorkton; the scholarly quarterly *Zhyttia i slovo* (1948–9) in Toronto; the monthly *Ekleziia* (1951–64) in Montreal; the Basilian magazine *Beacon* (est 1966) in Toronto; *Za ridnu tserkvu* (1966–75), the bimonthly bulletin of the Committees for the Defense of the Rite, Traditions, and Language of the Ukrainian Catholic Church in the USA and Canada, published in Toronto; and *Pravda* (1969–75), a bimonthly journal published by O. *Mokh in Toronto. Many Catholic parishes and national and local lay organizations in Canada and the United States have issued their own newsletters and bulletins.

Ukrainian Catholic periodicals have also been published in other countries. They include **Misionar* (1911–16), **Pratsia* (est 1912), and *Ukrains'kyi misionar u Brazyl'ii* (est 1935) in Brazil; **Zhyttia* (est 1948), *Visnyk Apostol's'koho ekzarkhatu* (est 1968), and *Nazareth* (est 1973) in Argentina; **Tserkva i zhyttia* (est 1960) in Australia; **Visnyk Ukrain's'koi Hreko-Katolyts'koi Tserkovy v Zakhidnii Evropi* (1940, 1945–52) and **Slidamy maloi sviatoï* (est 1948) in France; *Khrytyians'kyi shliakh* (1946–7), *Khrystos nasha syl'a* (1946–9), and **Khrystyians'kyi holos* (est 1949) in Germany; *Holos Khrysta Cholovikoliubtsia* (est 1947) in Belgium; and the quarterly *Nasha tserkva* (1953 to mid-1960s) in Great Britain. The revived theological-scholarly journals **Analecta Ordinis S. Basilii Magni* (since 1949) and **Bohosloviia* (since 1962), the irregular bulletin *Visti z Rymu* (est 1963), and *Blahovisnyk*, the theological organ (est 1965) of metropolitans Y. Slipy and M. Liubachivsky, have been published in Rome.

Evangelical press. In interwar Galicia the Ukrainian Evangelical Reformed church published **Vira i nauka* (1926–30, 1933–9), **Ukrains'ka reformatsiia* (1929–31), and **Siïach* (1932–3), and the Ukrainian Evangelical Church of the Augsburg Confession published **Stiah* (1932–9), *Novyi svit* (1934) for children, and *Prozry!* (1931–9) in Stanyslaviv. Baptists outside Galicia, including immigrants in North America, were served by the monthly **Pislanets' pravdy* (1927–39). The Pentecostal church in Volhynia published the monthlies *Budivnychi Tserkovy* (1936–9) and *Ievanhel's'kyi holos* (1936–9). In Soviet Ukraine, in the 1920s the Russian-language journal *Baptist Ukrainsky* published some articles in Ukrainian. Since 1945 Evangelical Christians in Ukraine have been served primarily by the Russian-language bimonthly *Bratskii vestnik* in Moscow.

In the West the greatest number of Ukrainian Evangelical periodicals have been published in Canada. They include the Presbyterian biweekly **Ranok* (1905–20) in Winnipeg and monthlies *Nashe slovo* (1933–5) in Oshawa, Ontario, and **Ievanhel's'ka pravda* (1940–79) in Toronto; the Baptist weeklies *Domashnii pryiatel'* (1909–11) and *S'vidok pravdy* (1911–25) in Toronto, the bimonthly *Khrystyians'kyi visnyk* (est 1942) in Winnipeg, and the quarterly **Ukrains'ka nyva* (1947–66) in Saskatoon; the Methodist weekly **Kanadyiets'* (1912–20) in Edmonton; the United church's weekly **Kanadiis'kyi ranok* (1920–61) in Winnipeg; the Ukrainian Bible Student Association's bimonthly *Zorinnia novoi doby i vistnyk prysutnosti Khrysta* (est 1937) in Winnipeg; the Ukrainian Independent Reformed church's bimonthly *Slovo* (1950–5) in Toronto; the Pentecostal monthly *Ievanhelyst* (1957–71) and quarterly *Ievanhel's'kyi holos* (est 1967) in Toronto; and the Ukrainian Evangelical Alliance of North America's monthly and then quarterly **Ievanhel's'kyi ranok* (est 1961) in Toronto. Several other short-lived periodicals have also appeared.

In the United States the first Evangelical organ was the Presbyterian weekly **Soiuz* in New York (1908–11) and Pittsburgh (1912–21). The Pentecostal bimonthly *Ievanhel's'kyi palomnyk* (est 1941) has been published in New York, and the former Galician Baptist *Pislanets' pravdy* has been published in Chester, Pennsylvania, and then Chicago since 1947. The Watch Tower and Bible Tract Society in the United States has published *Vartova basha* and *Probudy's'* in Brooklyn for Ukrainian Jehovah's Witnesses. In Argentina the Pentecostal quarterly *Ievanhel's'kyi holos* (1958–61) and Baptist quarterly/semiannual *Ievanhel's'ka zirka* (est 1953) have appeared. Baptist periodicals published in other Western countries include the quarterly *Dobra novyna* (est 1967) in Australia; the quarterly *Khrystyianyn* and then *Visnyk spasinnia* (est 1951) in Great Britain; and *Doroha pravdy* (1946–9), *Holos pravdy* (1954–60), and the quarterly *Nove zhyttia* (est 1963) in Germany.

The postwar émigré, non-Christian *Ukrainian Native Faith church has published in Canada the monthlies *Samobutnia Ukraïna* (est 1967) and *Novi skryzhali* (est 1972).

V. Borovsky, I. Korovytsky

Rembalovych, Ivan [Rembalovyč], b 1891, d 21 July 1944 near Brody, Galicia. Army officer. In 1917 he was a delegate to the First, Second, and Third all-Ukrainian military congresses in Kiev. He served as chief of communications in the Zaporozhian Corps (1918-19) and in the First Zaporozhian Rifle Division (1920) of the UNR Army. He participated in the First and Second winter campaigns. He attained the rank of lieutenant colonel in the UNR Army. He joined the Division Galizien in 1943 and was killed in the Battle of Brody.

Remeslo, Vasyl, b 10 February 1907 in Teplivka, Pyriatyn county, Poltava gubernia, d 4 September 1983 in Kiev. Agricultural scientist; full member of the USSR Academy of Sciences from 1974 and of the All-Union Academy of Agricultural Sciences from 1964. He completed study at the Maslivka Institute of Selection and Seed Cultivation (1928). In 1968 he became director of the Myronivka Institute of Wheat Selection and Seed Cultivation. Remeslo developed selection methods that led to the production of various strains of wheat that today are in worldwide use. He is also credited with creating 17 varieties of winter wheat.

Yevhen Remez

Remez, Yevhen, b 17 February 1896 in Mstsislau, Mahiliou gubernia, Belarus, d 30 August 1975 in Kiev. Mathematician; corresponding member of the AN URSR (now ANU) from 1939. A graduate of the Kiev Institute of People's Education (1924), he taught at various institutions in Kiev, including the pedagogical institute (1933-55) and university (1935-8), and worked at the ANU Institute of Mathematics (1935-75). Remez made basic contributions to the constructive theory of functions and to approximation analysis. He developed a new numerical method, known as the Remez algorithm, of constructing with a prescribed degree of exactness a polynomial of the best Chebychev approximation for a given continuous function. Later, he constructed a similar algorithm for the rational approximation of a continuous function defined on a request. He also extended the characterization theory of Chebychev and Markov and used it to obtain approximate solutions of differential equations.

Renaissance. A new age in European civilization that started in Italy in the 14th century and culminated in the 16th century. It was marked by the revival of learning, art, and architecture and by the upsurge of *humanism, *philosophy, vernacular literature, and *printing.

In the visual arts and architecture the term Renaissance refers to the style that replaced the prevailing *Gothic style of the Middle Ages. Based on a deliberate return to the art and architecture of classical antiquity, it reached Ukraine in the early 16th century and was popular there until the mid-17th century. It became most widespread in Galicia (particularly in Lviv), where it was introduced by Italian and Swiss architects employed by local magnates, burghers, and church brotherhoods. Its development paralleled that of *cities and towns and their expanding political and economic roles.

Renaissance synagogue in Brody (early 17th century)

Some of the earliest examples of the Renaissance style in Ukraine are the Epiphany Church in Ostrih (rebuilt in 1521) and the synagogue in Sataniv (1532). In secular architecture its influences can be seen in the application of classical systems of articulation of walls and in the harmonious proportions of the rebuilt castles in Kamianets-Podilskyi (1541-4), Stare Selo and Olesko in Lviv oblast, and Berezhany (1554) in Ternopil oblast.

The city of Lviv was reconstructed in the Renaissance style after the fire of 1527. The most interesting examples of surviving Renaissance architecture there are three private residences in Rynok Square: the Hepner building (1540), at no. 28; the *Black Building (1577), at no. 4; and the *Korniakt building (1580), at no. 6. Rusticated stones and pilasters were used in the Black Building; the Korniakt building is a smooth masonry construction with pedimented windows in the upper floors and the only inner-courtyard arcaded loggia in Ukraine. Other examples of Renaissance architecture in Lviv are the buildings of the *Dormition Church; the Kampian family chapel, completed in 1619 by P. Romanus; the Boim family chapel (1609-11), which has an elaborately carved entablature and a façade profusely decorated with carved ornaments and relief figures that hide the underlying classical structure; and the Roman Catholic Bernardine Church (1600-30), built by Romanus and A. Prykhylny, which incorporates baroque elements and is thus an example of a transitional building.

The Renaissance had less impact on Ukrainian architecture outside Galicia, because there was little new masonry construction at the time. As old churches were rebuilt,

Renaissance castle in Stare Selo near Lviv (16th to mid-17th century)

some elements of the late Renaissance were used, but most of these buildings have not survived or were later altered. St Elijah's Church (1653) in Subotiv, funded by Hetman B. Khmelnytsky, combined the northern Renaissance style with baroque elements.

During the Renaissance sculpture flourished. In Lviv it may be seen in the ornamental and relief carvings of the Black Building, the Korniakt residence, and the Korniakt and Boim chapels. Their portals and windows are framed with columns and pilasters with elaborately carved plant motifs. The frieze on the exterior walls of the Dormition Church has a variety of carved rosettes, sunflowers, grapevines, and figures in the metopes, as does the Kampan Chapel. The façade of the Boim Chapel is covered with relief carvings executed by a group of craftsmen headed by H. Scholtz; it included J. Pfister, later one of the best-known sculptors in Lviv.

Iconostases were constructed with classical orders and carved plant motifs. The oldest surviving iconostasis, from the Dormition Church (1630) in Lviv, is now in the church in Velyki Hrybovychi, Nesterov raion, Lviv oblast. The iconostasis of the Church of Good Friday in Lviv is another beautiful example of intricate late Renaissance carving in Ukraine.

Memorial tombs were decorated with sculptures of figures in armor reclining or semireclining in traditional Renaissance architectural settings similar to those found in northern Italian tombs. Examples include the tombs of Prince K. Ostrozky (1579), at the Kievan Cave Monastery; of M. Herburt, in the Roman Catholic cathedral in Lviv, by the Nuremberg master P. Lackenwolf; of O. Lahodovsky (1573), in Univ; of the Syniavsky family (ca 1573–1642), in Berezhany, by J. Pfister; and of K. Ramultova, in Drohobych.

In book decoration geometric designs gave way to three-dimensional plant motifs. The *Peresopnytsia Gospel (1555–61) echoes some aspects of Italian Renaissance ornamentation. The engravings in the Lviv *Apostol* (1574), particularly the rendering of the Apostle Luke, are a combination of German Renaissance traditions and Ukrainian-Byzantine influences. In the early 17th century the center of engraving shifted from the presses in Lviv and Ostrih to the *Kievan Cave Monastery Press. It became famous not only for its religious publications but also for its illustrations of historical themes, portraits, and town plans. The gradual shift from Byzantine iconography and stylization to more realistic representation may be seen in

Renaissance portrait of Kostiantyn Korniakt, Jr (17th century)

the wood engravings in K. Sakovych's book of verses (1622), published on the occasion of the death of Hetman P. Sahaidachny.

In painting changes came about gradually. Icons lost some of their flatness and stylization and were painted with more realistic rendering of facial features and with localized landscapes (eg, the icon *Transfiguration* from Yabluniv, Kosiv raion, Ivano-Frankivske oblast). In the icon *Kiss of Judas* from the 'Passion of Christ' cycle in the Dormition Church in Lviv, the features of the apostles are individualized, and the figures are more three-dimensional. Portraits of patrons appeared alongside depictions of religious personages (eg, that of P. Mohyla in the fresco *Supplication* [1644–6] in the Transfiguration Church in the Berestove district of Kiev). Portraits of patrons and their family members without figures of saints came into existence with the rise of rich burghers. In the portrait of the Pochaiv patron A. Hoiska (ca 1597) the previous static representation and flattened rendering of the figure have given way to a more softly modeled head. Memorial portraits

of patrons were usually done on dark backgrounds, and attention was concentrated on the modeling of faces (eg, the portraits of J. Herbut [1578] and K. Korniakt [1603]). Secular portraits of the ruling aristocracy and of the rich also gained in popularity. The portraits of K. Zbarazky and K. and O. Korniakt (early 17th century) are full-length formal depictions.

The Renaissance style left its imprint on the furniture of the time and in the decorative arts, particularly in the more realistic rendering of plant motifs. The Easter shroud (1655) from the Kievan Cave Monastery, with its embroidered silver and gold floral borders, is a fine example of the decorative art of the period.

BIBLIOGRAPHY

Miliaieva, L.; Lohvyn, H. *Ukrains'ke mystetstvo XIV–pershoi polovyny XVII st.* (Kiev 1963)

D. Zelska-Darewych

Reni. VIII-9. A city (1989 pop 23,900) on the Danube River and a raion center in Odessa oblast. Reni is first mentioned in historical documents in 1548, as part of the Moldavian principality. In 1621 it was annexed by Turkey and renamed Tomarovo. It was captured twice by Russia (1769, 1790) and then assigned to Russia by the Treaty of Bucharest (1812). After handing it over to Moldavia in 1856, Russia recaptured it in 1877–8. From 1918 to 1940 the city was under Rumania. Reni is a river port. Most of its inhabitants are occupied in the transportation industry. It also has some fish-processing and meat-processing plants.

Renovationist church (Russian: *obnovlentsy*). The popular name of a reform movement in the Russian Orthodox church during the 1920s and 1930s. The church emerged in Russia when reform-minded Russian Orthodox clerics proclaimed a dissident 'Living church' in 1922 and established a Renovationist (Synodal) church the following year. The church hoped to take over the jurisdiction of the Patriarchal Russian Orthodox church, which faced a major crisis following the arrest of its spiritual head, Tikhon, in 1922. It rejected traditional episcopal authority and was especially critical of the monastic clergy. It had the backing of the Soviet authorities, who saw it as a means of countering the resistance of the Patriarchal church to the fledgling regime. The Renovationist church started losing political support after 1927, when the Patriarchal church reached an understanding with the government; it was devastated by the antireligion campaign of 1929–41 in the USSR and liquidated in 1943. The Renovationist church actively sought to establish itself in Ukraine during the 1920s (see *Living church), with mixed results.

Repatriation. The act of returning people or restoring cultural objects or documents to their country of origin. People returning to their country of origin usually are those who have resided either temporarily or permanently in other countries (commonly in situations involving armed conflicts); they may be repatriated either by their own free will or forcibly by a political power.

In 1921 Poland broke off relations with the Directory of the Ukrainian National Republic and concluded the Peace Treaty of *Riga with the Ukrainian SSR and the Russian SFSR. One of the provisions of the preliminary agreement in 1920, which later became part of the treaty, involved the repatriation of the former soldiers of the Army of the UNR

(then interned in camps in Poland) to the Ukrainian SSR. It was to be a voluntary repatriation, and most internees resisted it. Soviet representatives undertook intensive agitation in the camps to induce the internees to return home by promising them a pardon and the return of citizenship rights. A number of them did return.

The greatest repatriation of Ukrainians took place in the period immediately following the Second *World War. It was part of a larger effort by the victorious Allies to return home the estimated 5.6 to 8.4 million Eastern Europeans who were displaced during the Nazi occupation or other phases of the war. Most found themselves in the various countries of central, northern, and western Europe, with the largest numbers in Germany and Austria. The total number included approximately 2.8 million persons taken by the Nazis from their homes as forced laborers to work in the German war industry (the so-called **Ostarbeiter*, or Eastern workers). The majority of them (2.2 million) were from Ukraine. Another category were the POWs, including former soldiers of the Red Army who were captured by the Germans. Altogether they numbered around three million people. Other categories were survivors of the German concentration camps (totaling over 200,000) and refugees who fled their homes before the westward advance of the Red Army. The *displaced persons represented a variety of Eastern European nationalities.

The main solution to the problem of displaced people offered by the Allies was repatriation. As the armies of the Allies advanced, they repatriated large numbers of persons on their conquered territories. In 1943 the Allies established the United Nations Relief and Rehabilitation Administration (UNRRA); it began its work in 1944. Its function was the repatriation of all persons displaced by the war. UNRRA worked under the direction of the American-controlled Supreme Headquarters of the Allied Expeditionary Force, which provided an official definition of a displaced person (DP). The legal basis for Eastern European repatriation was established in February 1945 at the *Yalta Conference, when the Western Allies signed an agreement with the Soviet Union which guaranteed repatriation of all Soviet nationals. The term was understood, particularly by the Soviets, to mean (if necessary) forcible repatriation.

By mid-1945 the Soviets had repatriated approx three million people from their areas of occupation. By the fall

Ukrainians at the Regensburg DP camp protesting Allied repatriation actions (1946)

of 1945 an additional 2.2 (or more) million persons had been transferred to areas of Soviet control, when the Western Allies pulled back from German territory previously designated as part of the Soviet zone. Most of the people concerned had to be moved by force. Of the total number of approximately 5.2 million repatriates, around 3 million were former military personnel and 2 million were civilians. The civilians included many of the Ukrainians who had been brought to Germany and Austria by the Nazis as conscript laborers.

The zeal with which the Soviet authorities pursued repatriation may be explained in several ways. One of the foremost reasons was a desire to punish those who had neglected their duty to the 'Soviet homeland' and assisted the Nazis, whether as actual collaborators, POWs, or forced laborers. That motivation involved not only retribution but also the upholding of the principle of mandatory service to the state on the part of Soviet citizens. The need for workers in the process of postwar reconstruction was also a factor. Finally, the Soviet authorities probably feared that their international reputation would be severely damaged by the revelations concerning life under the Soviet regime that would likely surface if a large number of their ex-nationals were living in the West, particularly Ukrainians; the Soviet authorities were especially vigilant in pursuing their repatriation. The apprehensions of refugees facing the prospect of returning to the Soviet Union were based in part on a distaste or even open disdain for the regime and in large measure on the fear of retribution by the Soviet authorities for crimes real or imagined. The worst fears of many repatriates were later realized: approx 300,000 of them were executed upon their return to their homeland, and about 2.5 million were sentenced to labor camps for periods ranging from 3 to 25 years (a 10-year term being the most common). About half of those sentenced to labor camps did not survive their imprisonment. The attitude of the Allied powers in the entire affair was based on several things: ignorance, a desire not to antagonize the Soviet Union (especially at a time when not all Allied POWs in Soviet-controlled territories had been repatriated), and a determination to clear up the refugee situation (which involved substantial expense and major logistical problems) as quickly as possible.

The repatriation process faced one of its major difficulties with the refusal of refugees in the zones occupied by the Western Allies to be returned. Initially the Soviets insisted on their mandatory repatriation in accord with the Yalta Agreement without regard to the wishes of the DPs involved. The Allies did not immediately question that interpretation of the agreement, and assisted the Soviets in the process. The Soviets established a number of repatriation mission teams in the zones occupied by the Allies. Those units engaged both in making appeals to the refugees to persuade them to go home and in organizing convoys to remove refugees from their camps, often by trickery and force. Few refugees had doubts about the treatment they would receive, as numerous incidents testify. Many committed suicide rather than leave. Some jumped off transport trucks or trains either in a bid to escape or in order to commit suicide. Incidents of violence occurred, as Soviet repatriation agents were attacked, or as designated returnees rioted. The most violent incidents took place in the camps of Hersfeld, Kempten, Hanau, Füssen, and Passau.

As the Americans became increasingly aware of the na-

ture of Soviet repatriation and the reasons for the refugees' resistance, they stopped assisting the Soviets in their efforts. A number of limitations on who should be repatriated were established. They specified that 'Soviet citizens' meant only those who were Soviet nationals before the outbreak of the war, and thus effectively excluded Ukrainians, Poles, and Balts from the regions annexed by the Soviet Union in 1939 or later. By the fall of 1945 most American generals were objecting to the use of force in repatriation, and in December 1945, soon after Gen D. Eisenhower was appointed the army chief of staff, the Americans exempted the remaining displaced Soviet civilians from forced repatriation altogether. The Americans also accepted the McNarney-Clark directive, which narrowly specified which former military personnel could be repatriated by force. The British remained more willing than the Americans to assist the Soviets with their repatriation efforts even though their top-level administrators and military were aware of the consequences of such actions. But half a year later they too refused to allow repatriation by force. Isolated incidents of forced repatriation by the Soviets still continued, however, until the middle of 1947, and, in spite of the US State Department's declaration in that year that the Yalta Agreement was no longer in effect, the last Soviet repatriation team did not leave Western Europe until March 1949.

It has been estimated that in addition to the roughly two million Ukrainians who had been repatriated to the Soviet Union by mid-1945, 40,000 to 60,000 more refugees were repatriated after that. By the end of 1947, when UNRRA ceased its operation, and the International Refugee Organization came into existence with the mandate of resettling rather than repatriating refugees, there were close to one million refugees of all nationalities left in Western Europe (including approx 250,000 Ukrainians).

Ukrainian-Canadian and Ukrainian-American organizations played a role in the effort to stop forcible repatriation of the refugees. Both the Ukrainian Canadian Committee (now Congress) and the Ukrainian American Congress Committee conducted advocacy campaigns, and the London-based *Ukrainian Canadian Servicemen's Association in England intervened on behalf of the Ukrainians stranded in Italy. Later those associations established relief organizations which provided substantial help for the resettlement of Ukrainian DPs to the United States, Canada, England, and Australia.

The term repatriation is also sometimes applied to the transfer of populations that took place in Western Ukraine at the end of the Second World War and in the immediate postwar period as a result of border adjustments between Poland and the Soviet Union. The settlement included provisions for a transfer of populations, and between 1944 and 1947 about one million Poles, including Jews and Ukrainians who presented themselves as Poles, were moved across the new border to Poland. In return about 520,000 Ukrainians were transferred, mostly by force, by the Soviet-directed Polish army from the Polish side of the border to the Ukrainian SSR. The process involved some violent incidents, most notably in the village of Zavadka Morokhivska, Sianik county, in 1946. Another postwar population transfer occurred in the 1950s, when 6,000 to 8,000 Ukrainians from the Prešov region of Czechoslovakia, who had been moved to the Ukrainian SSR immediately after the war, were allowed to return to Czechoslovakia.

W. Isajiw

Repen, Mykola, b 18 December 1884 in Hryniv, Bibrka county, Galicia, d ? Editor and political activist. An active member of the *Ukrainian Radical party and an organizer of Sich societies, he emigrated to the United States in 1914. While working in steel mills he used his free time to set up a branch of the Ukrainian Fraternal Association and establish a drama group in Cleveland. He edited *Ukrains'ka hazeta* in New York (1919), *Narodne slovo* in Pittsburgh (1920–1), *Lys Mykyta* in New York (1921–2), and *Narodna volia* in Scranton (1923–4). In 1925 he returned to Hryniv and again became active in the Radical party.

Ilya Repin: *The Zaporozhian Cossacks Write a Letter to the Turkish Sultan* (oil, 1880–91)

Repin, Ilya, b 5 August 1844 in Chuhuiv, Zmiiv county, Kharkiv gubernia, d 29 September 1930 in Kuokkala, Finland. Painter; full member of the St Petersburg Academy of Arts from 1893. He studied in St Petersburg under I. Kramskoi at the Drawing School of the Society for the Support of Artists (1863–4) and then at the Academy of Arts (1864–71), which granted him a scholarship to study in Italy and France (1873–6). He joined the *Peredvizhniki society in 1878 and the Mir Iskusstva group in 1890. For many years he lived in St Petersburg and served as a professor (1894–1907) at and the rector (1898–9) of the Academy of Arts, where his students included the Ukrainian painters M. Pymonenko, O. Murashko, F. Krasysky, and S. Prokhorov. From 1900 Repin lived in Kuokkala. A good part of his work consists of genre paintings. Some of the works show his attachment to Ukraine, its people, and its history, among them the famous painting *The Zaporozhian Cossacks Write a Letter to the Turkish Sultan* (1880–91), *Evening Party* (1881), *Haidamakas* (1898–1917), *Cossack in the Steppe*, *Black Sea Freebooters* (1908), and *Hopak* (1926–30,

unfinished). He painted many portraits of Russian and Ukrainian cultural figures, including M. Murashko (1877), A. Kuindzhi (1877), M. Kostomarov (1880, 1886), I. Kramskoi (1882), V. Tarnovsky (1880), S. Tarnovska (1880), T. Shevchenko (1888), and D. Bahalii (1906); did illustrations for editions of N. Gogol's *Taras Bul'ba* (1872) and *Sorochinskaia iarmarka* (Sorochyntsi Fair, 1882) and for his friend D. Yavornytsky's *Zaporozh'e v ostatkakh stariny i predaniiakh naroda* (The Zaporizhia in the Remnants of Antiquity and the Legends of the People, 1888); submitted four drawings in the competition for the design of Shevchenko's monument in Kiev (1910–14); and sketched many Ukrainian landscapes and inhabitants. Although Repin was a realist, his rich colors and restless lines often produce an almost expressionistic effect. Some of his paintings show the influence of impressionism and symbolism.

S. Hordynsky

Repin, Nikolai (né Volkonsky), b 1778, d 18 January 1845 in Yahotyn, Pyriatyn county, Poltava gubernia. Political and military leader in the Russian Empire; descendant of the Chernihiv line of the Riurykide dynasty; husband of K. Rozumovsky's granddaughter. During the Napoleonic occupation he was governor-general of Saxony (1813–14). Later he served as governor-general of Little Russia, which consisted of Poltava and Chernihiv gubernias, in Left-Bank Ukraine (1816–34), and was a member of the State Council. He sympathized with Ukrainian autonomists, kept in close contact with I. *Kotliarevsky and the Poltava circle, and defended Ukrainian interests before the Russian government. He drew up a plan for the reinstatement of the Cossack regimental system. Repin assisted D. Bantysh-Kamensky in writing *Istoriia Maloi Rossii ...* (A History of Little Russia ..., 4 vols, 1822), and it has been speculated that he was the author of the anonymous historical exposition **Istoriia Rusov*. His political leanings (his brother was the Decembrist S. Volkonsky) and his wide popularity in Ukraine made Tsar Nicholas I suspicious, particularly in the light of the 1830–1 Polish uprisings and the 1832 conspiracy of Georgian autonomists. Repin was removed from the governor-generalship, and left the empire. In 1842 he returned to live out his days on his estate in Yahotyn, where he was visited by T. *Shevchenko in 1843–4. He was buried in the Hustynia Trinity Monastery near Pryluka.

O. Ohloblyn

Repnina, Varvara, b 31 July 1808 in Moscow, d 9 December 1891 in Moscow. Russian princess and writer; daughter of N. *Repin. While growing up in Poltava, she knew N. Gogol, and later she wrote memoirs of him. In the 1840s she lived on her father's estate in Yahotyn, in Poltava gubernia. She fell in love with T. Shevchenko, who was a guest there in 1843–4. Shevchenko dedicated his Russian

poem 'Trizna' (The Funeral Feast) to her and painted two portraits of her. Repnina promoted Shevchenko's artistic career, and during his exile she corresponded with him (until forbidden to do so in 1850) and tried to get the authorities to ease his situation. From the early 1850s she lived in Moscow. She depicted her relationship with Shevchenko in an early unfinished novel, 'Devochka' (A Girl), in which he is a central figure; excerpts of it were published in 1916. Her memoirs and an article about him appeared in *Russkii arkhiv*. M. Vozniak's book about Shevchenko and Repnina appeared in Lviv in 1925.

Repnin-Fomin, Flor [Rjepnin-Fomin], b 1778 in Cherkassk-na-Donu, Don region, d 1857. Painter. After graduating from the St Petersburg Academy of Arts (1802) he taught at the Katerynoslav Gymnasium (1804–15) and Kharkiv University (1815–38). His work consists of thematic paintings and portraits, including *Eviction from the Temple* (1800), *The Death of Socrates* (1802), *The Escape of the Holy Family to Egypt* (1802), and *The Death of Hostomysl* (1804).

Reprev, Oleksandr [Reprjev] (Reprev, Aleksandr), b 26 August 1853 near Suzdal, Vladimir gubernia, Russia, d 21 June 1930. Pathologist; one of the founders of endocrinology in Ukraine. A graduate of the Medico-Surgical Academy in St Petersburg (1878), he taught at Tomsk (1891–5) and Kharkiv (1895–1924) universities and at the same time worked at the Kharkiv Veterinary Institute and the Higher Courses for Women. His publications deal with metabolism during pregnancy, internal secretion glands, and problems of radiobiology and oncology. He wrote *Osnovy obshchei i eksperimental'noi patologii* (Foundations of General and Experimental Pathology, 1911).

Repta, Vasyl (monastic name: Volodymyr), b 1841 in Banyliv on the Cheremosh, Bukovyna, d January 1926 in Chernivtsi. Orthodox metropolitan and pedagogue. He graduated from the theological institute in Chernivtsi and then continued his studies in Vienna, Munich, Bonn, and Zurich before becoming a professor of theology at Chernivtsi University (from 1875). He was consecrated bishop of Rădăuți (1898–1902) and then metropolitan of Bukovyna (1902–25). Although he initially considered himself a Ukrainian (having organized the first Shevchenko memorial festival in Chernivtsi in 1864), from the 1870s he supported the Rumanianization of the Bukovynian metropolitanate and opposed granting Ukrainians equal religious rights in Bukovyna. In November 1918, with his approval, the Rumanian authorities dismissed the Ukrainian members of the consistory and closed down the two academic chairs in the theological faculty of Chernivtsi University where instruction was provided in Ukrainian.

Republyka (Republic). An official daily of the Western Ukrainian National Republic, published in Stanyslaviv (now Ivano-Frankivske) from February to May 1919 (a total of 94 issues). It was edited by I. Krevetsky with the assistance of V. Doroshenko, M. Strutynsky, and M. Yevshan. Members of the editorial board included K. Levvtsky, M. Hrushevsky, S. Vytvytsky, and L. Myshuha.

Research Institute of Volyn (Instytut doslidiv Volyni). An émigré institution established in Winnipeg in 1951 to conduct and publish research on the history and culture

of Volhynia. Its directors have been Yu. Mulyk-Lutsyk (1951–2, 1954–6), A. Shumovsky (1952–4), M. Borovsky (1956–68), and S. Radchuk (since 1969). Metropolitan N. Abramovych was an honorary president, and Metropolitan I. Ohienko was an honorary head of its council. In 1961 the institute had 17 full scholarly members, 20 scholarly members, and 46 corresponding members, most of them in North America. By 1989 the institute had published 15 volumes of *Litopys Volyni* (Chronicle of Volhynia, starting in 1953) and 60 books and brochures, including I. Levkovych's survey history of Volhynia to 1914 (1953); S. Klymnyk's monograph on Ukrainian calendric folk customs (5 vols, 1955–63); Metropolitan Ohienko's books on the Pochaiv Monastery (1961), the life of A. Matsiievych (1964), and Ukrainian pre-Christian beliefs (1965) and his dictionary of T. Shevchenko's language (1961); P. Shumovsky's book on the history of Ostrih (1964); Ye. Pasternak's history of the Kholm region and Podlachia (1968); O. Tsynkalovsky's geographic dictionary of Volhynia and Volhynian Polisia (2 vols, 1984, 1986); and the memoirs of L. Bykovsky, U. Samchuk, M. Hutsuliak, T. Borovets, M. Podvorniak, O. Semmo, H. Stetsiuk, and M. Dubylko. The institute's publications have been financed by branches of the *Society of Volyn in Winnipeg, Toronto, New York, Cleveland, Germany, and England.

Research Society for Ukrainian Terminology (Naukovo-doslidne tovarystvo ukrainskoi terminolohii). An institution established in New York City in 1971. The society has published a new Ukrainian orthographic dictionary (ed J.B. Rudnycky and K. Tserkevych, 1979), a Ukrainian language reference book (ed K. Tserkevych and V. Pavlovsky, 1982), and the memoirs of Yu. Movchan (2 vols, 1982, 1984), I. Desiak (1984), and O. Kaniuka (1984). It has also republished I. Ohienko's dictionary of words not used in literary Ukrainian (1973), P. Derkach's short dictionary of Ukrainian synonyms (ed V. Volkov, N. Pazuniak, and K. Tserkevych, 1975), B. Antonenko-Davydovych's *Iak my hovorymo (i iak treba hovoryty)* (How We Speak [and How We Should Speak], 1980), D. Humenna's novel *Dity chumats'koho shliakhu* (Children of the Milky Way, 1983), and the Russian-Ukrainian legal dictionary edited by A. Krymsky (rev edn, ed K. Tserkevych and V. Pavlovsky, 1984).

Reservoir. See Water reservoir.

Resettlement. Relocation to a new place of residence either in an organized manner or by individual families. Resettlement means the same thing as *migration but is an older term, widely used in the late 19th and early 20th centuries to refer to the agrarian mass emigration from Russian-ruled Ukraine to the east, particularly the colonization of *Siberia, *Kazakhstan, and the *Far East, and from Western Ukraine under Austria-Hungary to the *United States, *Canada, *Brazil, and *Argentina.

During collectivization (1929–30) the Soviet regime forcibly deported and resettled hundreds of thousands of so-called *kulaks from Ukraine to the northern regions of Russia and the Urals. In the 1940s, following the occupation of Western Ukraine by the Soviet authorities, large-scale deportations of Ukrainians to remote regions of Russia and Siberia also took place. After the Second World War nearly 500,000 Ukrainian inhabitants of the *Sian, *Kholm, and *Lemko regions were forcibly resettled in

western and northern Poland or in Soviet Ukraine, and *Poles living in Ukraine were resettled in Poland (see *Operation Wisła). In the 1950s, voluntary resettlement to the Asian regions of the USSR was encouraged in connection with the opening up of the so-called virgin lands. Settlers received financial assistance for the move. Resettlement for the purpose of working in one or another area of industry or construction was called *organized recruitment of workers. In the 1950s and 1960s organized recruitment was responsible for the relocation of a significant portion of the labor force, but from the 1970s its importance decreased. (See also *Migrant workers.)

Reshetar, John [Rešetar], b 14 July 1924 in Minneapolis. Political scientist. He graduated from Harvard University (1946; PH D, 1950). He taught at Princeton, Harvard, and the University of Pennsylvania before joining the faculty of the University of Washington in Seattle in 1957. A specialist in Ukrainian and Soviet affairs, he has written *The Ukrainian Revolution, 1917–1920: A Study in Nationalism* (1952), *A Concise History of the Communist Party of the Soviet Union* (1960), and *The Soviet Polity: Government and Politics in the Soviet Union* (1971).

Reshetylivka [Rešetylivka]. IV-15. A town smt (1986 pop 8,800) on the Hovtva River and a raion center in Poltava oblast. It was first mentioned in historical documents in 1638. Under the Hetman state it was a company center of Poltava regiment (1648–1775). In 1696 the town was destroyed by the Tatars. In 1709 Peter I signed the *Reshetylivka Articles there. In the 19th century the town belonged to Poltava county in Poltava gubernia and became known for its folk handicrafts. Today its factories specialize in traditional kilims, woven cloths, embroidered shirts, blouses, tablecloths, napkins, and *rushnyky.

Reshetylivka Articles of 1709. A 14-point petition submitted by Hetman I. *Skoropadsky to Tsar Peter I in Reshetylivka (Poltava region) on 17 July 1709. Its aim was to obtain an elaboration of the rights and freedoms of the Ukrainian Hetmanate that had been outlined in the tsar's manifesto of 1 November 1708, as well as to address certain issues related to contemporary events and circumstances. In reply Peter issued an ukase on 31 July 1709 in Kiev, in which he reiterated his guarantees of Hetmanate autonomy and confirmed in principle the rights and freedoms and military order as set out in articles submitted by previous hetmans, most notably B. *Khmelnysky. Nevertheless, the provisions of the petition limited Ukraine's autonomy, in that Russian commanders were placed in key posts of the Cossack armies, Russian garrisons in Ukrainian cities were expanded, and Russians assumed control of the collection of taxes. The matter of the petition (not the ukase) was raised once again in 1710, but it was not resolved then or later. Peter I had decided to continue limiting the autonomy of the Hetmanate and did not wish to be restricted by concrete promises or commitments.

Rev Stepan Reshetylo

Reshetylo, Stepan [Rešetyllo], b 26 January 1889 in Uhniv, Galicia, d 26 December 1950 in Dawson, Pennsylvania. Basilian priest. He joined the Basilian order in 1905 and was ordained in 1915, and then became master of novices at the Krekhiv Monastery. He was sent to Transcarpathia in 1924, following a reform of the Basilian order there. Together with other monks from Galicia he created the St Josaphat Missionary Society and carried out major educational and missionary activity. In 1929–30 he was hegumen of the Basilian monastery in Warsaw, and in 1931–5, protohegumen for the order in Galicia. He returned to Transcarpathia in 1935 and served as personal secretary to Bishop D. *Niaradi (1938–9). After the Second World War he moved to the United States.

Resistance. See Partisan movement in Ukraine, 1918–22; Polish Sich; Soviet partisans in Ukraine, 1941–5; and Ukrainian Insurgent Army.

Respublikans'ki visty (Republican News). A weekly newspaper published in Vinnytsia and then Kamianets-Podilskyi in 1919–20. It supported the Directory of the UNR.

Restoration. In architecture and art, the process of bringing a work as close to its original state as possible. It is a craft, like conservation, which demands great skill, awareness of materials, and knowledge of art history. Although restoration has been carried out since antiquity, its theoretical basis was formulated in the 19th century. Restoration includes the preservation of the original, the reconstruction of missing or damaged parts, and the total reconstruction of destroyed objects. Current restorational practice utilizes the scientific discoveries of fields such as chemistry, optics, and radiology.

Much of the restoration funded by the Cossack *starshyna* and hetmans in the 17th and 18th centuries was, in fact, rebuilding (eg, the baroque cupolas of the St Sophia Cathedral in Kiev). Restoration initiated by Metropolitan P. Mohyla ca 1633 was continued under Metropolitan S. Kosov between 1647 and 1657 and was finished in the baroque style under the patronage of Hetman I. Mazepa. The restoration of original frescoes in the 19th century resulted in their being painted over with oils.

In Soviet Ukraine no restoration of churches was done in the 1930s; instead, many churches were destroyed. The State Scientific Research Restoration Workshop established by the Soviet Ukrainian government in 1938 re-

ceived jurisdiction over paintings, sculpture, and other objects of art. Its branches in Kiev, Kharkiv, Lviv, and Odessa service over 327 museums in Ukraine. The *Ukrainian Society for the Protection of Historical and Cultural Monuments is also involved in restoration, but on an amateur level. Since 1951 restoration of architectural monuments has been under the jurisdiction of the republican restoration institute and workshops of the State Committee for Construction (Derzhbud), which have branches in Kiev, Lviv, Chernihiv, Odessa, and the Crimea. They restored the buildings of the Kievan Cave Monastery, the St Sophia Cathedral, and the Vydubychi Monastery in Kiev as well as the medieval churches in Chernihiv. The castle in Olesko, Lviv oblast, was restored in the 1970s and now houses part of the Lviv Art Gallery's collection of Renaissance and baroque paintings, sculpture, and furniture.

The general state of restoration in Ukraine however, is not good. A material base, equipment, and qualified personnel are lacking. Restoration is taught only at the Kiev State Art Institute, and as a profession it does not have legal status in Ukraine. No enterprise in Ukraine manufactures restoration equipment or necessary materials, and restorers are forced to make do with what is available (including dangerous and toxic substances) in their work. The resulting low technical level of restoration affects the quality of work in general. The situation is further complicated by the fact that many of Ukraine's museums are housed not in specially built structures but in adapted buildings. There objects are often stored without proper temperature and humidity controls and their deterioration is thereby accelerated.

Retail trade. The sale of goods or commodities in small quantities to the ultimate consumer. During the medieval period retail trade in Ukraine was limited. The peasantry relied on home industry for household necessities, and retail trade was restricted to the towns, where tradesmen and traveling salesmen provided manufactured goods to noble families, monasteries, and members of the emerging merchant class. When the towns in Ukraine grew in the 14th century, retail trade expanded. It was promoted by regularly scheduled *fairs, at which products from the countryside were exchanged for finished goods produced by foreign and local craftsmen. Large fairs were held in the major towns, and small fairs and markets in smaller towns and villages. In the 19th century the number of markets and retail shops in Ukraine increased sharply, from 3,662 to 15,089 shops between 1825 and 1861.

Discriminatory religious and economic policies by foreign governments in Ukraine kept most of the trade in the hands of non-Ukrainians (Poles, Jews, Germans, and Russians). The enserfment of the Ukrainian peasantry restricted its opportunities to engage in trade. After the abolition of serfdom in Russian-ruled Ukraine in 1861, retail trade assumed greater importance in the economic life of the countryside there. In the 30 years following the reform the number of large and medium fairs increased from 351 to 897, with a trade turnover of more than 80 million rubles. Whereas earlier the fairs had been held mostly in towns, in the second half of the 19th century they were mostly vil-

lage fairs. For the first time goods manufactured in towns became widely available in the countryside. In urban centers, stores, shops, and kiosks replaced fairs as the dominant retail outlets. By 1913 Ukraine had 34,000 retail stores and hundreds of thousands of small shops and kiosks. Nevertheless, the spending power of the population remained low compared to that in other European countries and Russian cities such as St Petersburg and Moscow. In 1913, for example, per capita consumer spending in Moscow was 202 rubles, whereas in Ukraine it was 35-37 rubles. In gubernias such as Podilia, Chernihiv, and Volhynia, per capita spending was as low as 15-17 rubles.

The First World War and War Communism, with its policy of forced grain requisition, devastated the Ukrainian economy. With the introduction of the *New Economic Policy in 1921, private retail trade was encouraged, and grew rapidly. Up to a half of the consumer goods manufactured in Soviet factories were distributed by private retailers. Within a few years, however, the Soviet authorities had begun to support co-operative and state retail enterprises and to use both economic and administrative measures to restrict the private retail sector, first in the countryside and then in the towns (see the table).

In the 1930s Soviet Ukrainian retail trade was organized into three sectors, state, co-operative, and collective-farm. Whereas co-operative retail trade remained dominant in the countryside, consumer co-operatives were taken over and centralized by the state retail system. By 1935 consumer co-operatives accounted for only 4.7 percent of retail trade outlets. Until 1957 retail trade was regulated by the USSR Ministry of Internal Trade. Then its functions were assumed by republican ministries. From the 1930s, retail trade, including prices, quantity, and selection of goods, was controlled by the state. Private retail trade was limited to the output of *private plots. From 1987 private trade in other goods, such as clothing and repair services, was permitted, but a private retail network was barely developed. In 1988 total retail trade turnover in Ukraine amounted to 62,442 million rubles, or 16.6 percent of the USSR retail trade turnover. Retail trade in the USSR was characterized by extremely poor service, high levels of corruption, and an inadequate supply and assortment of consumer goods and services.

B. Somchynsky

Revai, Fedir [Revaj], b 1888, d 1945. Transcarpathian political and civic leader; brother of Yu. *Revai. He was a member of the chief executive of the Prosvita society in Uzhhorod and a deputy of the Czechoslovak Social Democratic party to the Provincial Assembly of Subcarpathian Ruthenia (1928-35). In 1937 he was expelled from the party because of his Ukrainian nationalism. He was a copub-

lisher of the paper *Nova svoboda* (1938–9). In January 1939 he was elected president of the *Ukrainian National Alliance, and in March, deputy speaker of the Diet of Carpatho-Ukraine. At the same time he served as director of the Carpatho-Ukrainian state press in Khust. He was persecuted by the Hungarian authorities (1939–44) and then arrested and deported by the Soviet secret police. He perished in a Soviet prison.

Yuliiian Revai

Omelian Reviuk

Revai, Yuliiian [Revaj, Julijan], b 26 June 1899 in Mircha, Ung komitat, Transcarpathia, d 30 April 1979 in New York. Educator and noted Transcarpathian political leader; brother of F. *Revai. He was a founder and president of the Teachers' Hromada of Subcarpathian Ruthenia, secretary of the Pedagogical Society of Subcarpathian Ruthenia, chief leader of Plast for Transcarpathia, editor of *Uchytel'* (1924–35) and publisher of *Do peremohy* (1935–8), and an executive member of the Prosvita society in Uzhhorod. A member of the Transcarpathian branch of the Czechoslovak Social Democratic party, he was elected to parliament (1935–9) and was one of the authors of the bill granting autonomy to Carpatho-Ukraine. As vice-president of the Central Ruthenian People's Council he was also a founder of the Ukrainian National Alliance and was elected on its slate to the Diet of *Carpatho-Ukraine, where he was appointed minister of communications and public works (October 1938) and minister of health and social welfare (November 1938 to March 1939). With the declaration of an independent Carpatho-Ukrainian state on 15 March 1939, Revai was appointed prime minister and minister of foreign affairs. After fleeing the subsequent Hungarian invasion he sought support in Vienna, Berlin, and Bratislava for ending Hungarian repressions in Carpatho-Ukraine, and aiding Ukrainian refugees. In 1945 he was arrested by the Soviets in Prague but managed to escape to the American zone of Germany, where he served on the executive of the Central Representation of the Ukrainian Emigration in Germany. After emigrating to the United States in 1948, he served as executive director of the Ukrainian Congress Committee of America (1949–57), president of the Self-Reliance Association of American Ukrainians and the Self-Reliance Federal Credit Union, president of the Carpatho-Ukrainian Research Center, and director of the Ukrainian Institute of America. He was one of the founders and an executive member of the World Congress of Free Ukrainians.

Revakovykh, Tyt [Revakovyč], b 1846, d 14 October 1919 in Lviv. Judge, civic leader, and founding member of the *Shevchenko Scientific Society in 1873. A councilor of the provincial court in Lviv, he was active in the Prosvita society as its legal adviser, an organizer, and the president of its Lviv county branch (1914–18). He was also president of the St Raphael Galician and Bukovynian Emigrant Aid Society. He published literary studies in *Zapysky NTSh* and contributed articles to the Ukrainian press.

Revenko, Tymofii, b 20 February 1919 in Novorossiisk, Kuban. Orthopedist and traumatologist; member of the Scientific Council of the USSR Academy of Medical Sciences from 1976. A graduate of the Kharkiv Medical Institute (1949), he worked at the Ukrainian Scientific Research Institute of Traumatology and Orthopedics in Kharkiv, directed the Donetsk Scientific Research Institute of Traumatology and Orthopedics (from 1957), and was vice-president of the Ukrainian Scientific Society of Traumatologists and Orthopedists (1959). His chief publications deal with problems of trauma prevention, reconstructive operations of the large joints, and new operating methods and instruments.

Reviuk, Omelian [Revjuk, Omeljan] (Revyuk, Emil), b 1887 in Pererisl, Nadvirna county, Galicia, d 21 February 1972 in New York. Civic activist and journalist. After emigrating to Canada (1912) and then the United States he helped found the Federation of Ukrainians in the United States. While working as associate (1920–6) and chief editor (1926–33) of the daily **Svoboda* he served as president of the United Ukrainian Organizations in America (1927–39). In addition to articles on Ukrainian immigration to the United States he wrote a pamphlet, *Ukraine and the Ukrainians* (1920), and edited a collection of materials on the 1930 Pacification campaign titled *Polish Atrocities in Ukraine* (1931).

Reviziia. A periodic population census taken in the Russian Empire to determine who should pay the *poll tax and take part in military service (peasants, townspeople, tradesmen, and others). The *reviziia* was introduced at the beginning of the 18th century, when the *household tax was changed to the poll tax. It also counted as a general census of the majority of the population (*revizki dushi*), including those who did not have to pay taxes (the clergy, discharged soldiers and their families, and so forth) and women (in the sixth *reviziia*). The nobility and government officials were not polled in most of the *revizii*, and the regular army, the navy, and foreigners were polled in none. Some *revizii* registered as much as 95 percent of the population. The Russian Empire conducted 10 *revizii*, in 1719, 1744, 1763, 1782, 1795, 1811, 1815, 1833, 1850, 1857; from 1782 on *revizii* were also conducted in Ukraine (except for Slobidska Ukraine, where they began earlier). Each *reviziia* lasted several years. Information recorded in the census rosters (*revizki kazky*) included marital status, age during the previous and current *revizii*, and any births, deaths, and changes of ownership since the last *reviziia*, as well as nationality (during the 18th century). The *revizii* are a valuable source of data on the number, distribution, and composition of the population of Ukraine. *Revizii* during the Hetmanate have been studied by P. Klymenko.

A. Zhukovsky

Revizorchuk, Antin [Revizorčuk], b ? in Krasnopillia, in the Hutsul region, d ca 1835. Opryshok leader. In the 1820s he deserted from the Austrian army and joined M. *Shtoliuk's band of opryshoks. After Shtoliuk's capture and execution in 1830, Revizorchuk headed the band, which attacked the estates of Polish nobles and usurers in the Hutsul region. He was captured by Austrian troops and executed. Folk legends about him were used by J. *Korzeniowski in his drama *Karpaccy góralscy* (Carpathian Highlanders, 1843).

Revkom. See Revolutionary committee.

Revna River. A left-bank tributary of the Snov River. It is 81 km long and drains a basin area of 1,660 sq km. The river starts in Brianske oblast and then cuts across the northern tip of Chernihiv oblast. Its width varies from 5–10 m to 20–40 m. The river is fed by snow and groundwater and is used for domestic water supply.

Revoliutsiia i natsional'nosti (Revolution and Nationalities). A monthly Russian-language journal of the Soviet of Nationalities of the USSR Central Executive Committee, published in Moscow in 1930–7. An important source of information on developments in Soviet Ukraine, it succeeded *Zhizn' natsional'nostei* (1921–4).

Revoliutsiine pravo (Revolutionary Law). A law journal of the People's Commissariat of Justice of the Ukrainian SSR, published 10 to 18 times a year in Kharkiv (1931–6) and semimonthly in Kiev (1937–41). A total of 173 issues appeared. It succeeded **Chervone pravo* and the semimonthly *Visnyk radians'koï iustytstii* (1922–3).

Revolution of 1848–9 in the Habsburg monarchy. The unsuccessful democratic revolution that encompassed much of Europe in 1848–9, which broke out also in the Habsburg monarchy, including the Ukrainian territories. Inspired by a republican revolution in Paris in February 1848, demonstrations broke out in Vienna in March. By mid-month, under pressure from the people, Emperor Ferdinand I had dismissed his reactionary adviser K. Metternich, authorized the formation of a national guard, and promised to establish a parliament. The news of those revolutionary events reached the Ukrainian territories of Galicia, Bukovyna, and Transcarpathia on the weekend of 18–19 March. Immediately crowds gathered in the squares of Lviv, where Polish democrats circulated a petition calling for civil rights and the abolition of serfdom. In Chernivtsi mobs attacked the unpopular mayor and police commissioner. In the small, largely Magyarized towns of Transcarpathia the population gathered to read and discuss the 12 demands put forward by radical Hungarian activists in Pest. Thus began a period of revolutionary development that did not come to an end until the Hungarian revolutionary army surrendered to Austrian imperial and Russian forces on 13 August 1849.

Prior to the revolution there had been a Ukrainian national revival in Galicia and Transcarpathia, but the movement had been entirely cultural. With the outbreak of the revolution, however, the Ukrainian question became a political question. The first representative Ukrainian political organization was founded in Lviv on 2 May 1848, the *Supreme Ruthenian Council (HRR). It was established as

a counterweight to the Galician Poles' National Council (Rada Narodowa) and saw as its chief purpose the defense of the Ukrainian nationality against Polish domination. The Poles attempted to thwart the HRR by establishing the rival, pro-Polish *Ruthenian Congress in late May, but that organization had little influence in Ukrainian society.

The major political goal advocated by Ukrainians during the revolution was the creation of a predominantly Ukrainian crownland within the Habsburg monarchy. The Galicians, in particular the HRR, took the lead. The HRR gathered 200,000 signatures on a petition calling for the division of Galicia into separate Ukrainian and Polish provinces (Eastern Galicia was largely Ukrainian, western Galicia largely Polish). Some Transcarpathian Ukrainians, notably A. *Dobriansky and O. *Dukhnovych, sought to have Transcarpathia joined to Ukrainian Galicia, and petitioned the emperor to that effect in January 1849. In 1848 Bukovyna was still part of Galicia. Rumanian politicians hoped, however, to detach it and eventually unite it with other Rumanian-inhabited territories. The status of Bukovyna was debated in the Austrian Reichstag. The Ukrainian deputies from Bukovyna as well as the HRR sought to keep Bukovyna, or at least Ukrainian-inhabited northern Bukovyna, attached to Ukrainian Galicia. Although the relatively underdeveloped Ukrainian movements in Transcarpathia and Bukovyna were as yet unclear on the point, the Ukrainians of Galicia repeatedly emphasized in their publications that the Ukrainians of the Habsburg monarchy were part of the same distinct Ukrainian nation that could be found in Ukraine in the Russian Empire.

In June 1848, Ukrainians participated in the *Slavic Congress in Prague. Three delegates from the HRR sought to defend Ukrainian interests against Polish pretensions, and also to work out a basis for co-operation with the Poles. No Transcarpathian Ukrainians attended the congress, but the Slovak delegation called for the protection of their national rights in the face of Hungarian chauvinism.

Also in June 1848 the Ukrainians of Galicia and Bukovyna participated in the first parliamentary elections ever held on Ukrainian territory, the elections to the constituent Austrian Reichstag. Altogether 30 Ukrainians were elected (of 383 deputies in total). The Ukrainians of Galicia organized a Ukrainian National Guard (fall of 1848) as well as the volunteer *Ruthenian Battalion of Mountain Riflemen (winter of 1849) to combat Hungarian insurgents. Throughout the revolution the vast majority of Ukrainians remained loyal to the emperor.

The revolution accelerated Ukrainian cultural development. The first Ukrainian-language newspaper, *Zoria halytska*, began to appear in Lviv on 15 May 1848, and several more Ukrainian periodicals were founded within a year. In October 1848 Lviv hosted a *Congress of Ruthenian Scholars attended by over a hundred delegates. The congress formally established the *Halytsko-Ruska Matytsia, a Ukrainian literary and educational society that had existed informally for several months.

The Ukrainian movement made rapid progress during the revolution because the revolution emancipated and politicized the peasantry, who constituted the vast majority of the Ukrainian nation. As early as 22 April 1848, earlier than anywhere else in Austria, the governor of Galicia, F. Stadion, abolished serfdom. Even though Bukovyna was still administratively part of Galicia, the early aboli-

tion of serfdom did not apply to it. That unfavorable separate treatment provoked unrest among the Bukovynian peasantry which continued even after serfdom was abolished there on 9 August 1848 (retroactive to 1 July). The abolition of serfdom still left many questions of vital interest to the peasantry unresolved (notably, the question of compensation to landlords for the abolition of compulsory labor and other feudal rents and the status of the traditional rights of peasant communities to forests and pastures); the peasantry therefore took an active interest in politics during the revolution. In the elections to the Austrian Reichstag in June 1848, Ukrainian peasants tended to elect fellow peasants to represent their interests. Sixteen of the 25 Ukrainian deputies from Galicia were peasants, as were all 5 from Bukovyna. One of the Bukovynian deputies was L. *Kobylytsia, who had led a peasant uprising in the mid-1840s. After the Reichstag was temporarily dispersed in October 1848, Kobylytsia returned to his village and organized an armed rebellion. In Transcarpathia serfdom was largely abolished by the Hungarian revolutionary government on 18 March 1848. In 1848–9 Ukrainian peasants refused to perform labor on seigniorial estates and seized much property disputed between landlords and peasants. In the summer of 1849 the Western Ukrainian countryside was placed under military occupation so that order would be restored.

The end of the revolutionary period, May–September 1849, saw the appearance of Russian troops in Western Ukraine, brought in to subdue the Hungarian insurgent army. The Russians passed through Bukovyna on their way in and through Bukovyna and Galicia on their way out. They stayed longest in Transcarpathia, where Dobriansky was assigned to them as a liaison. The presence of the Russian military in Transcarpathia in 1849 is considered an important moment in the genesis of Russophilism in the region.

The revolution had been defeated by the fall of 1849, and many of the achievements of the revolutionary years were undone. The Austrian government dissolved the Reichstag in March 1849, the HRR was dissolved in 1851, and the Ukrainian periodical press declined through the 1850s until it almost disappeared. The peasants remained emancipated, but on terms much less favorable than they had hoped for. The rebirth of constitutional government in the 1860s restored some of the gains of 1848 in Galicia and Bukovyna, including a Ukrainian periodical press and Ukrainian representation in a parliament.

J.-P. Himka

Revolution of 1905. A period of revolutionary unrest and radical reform in the Russian Empire in 1905–7. The revolution broke out on 22 January 1905, when the tsarist authorities opened fire on a peaceful demonstration of workers in St Petersburg. During the next few weeks workers throughout the empire went on strike, including

those in the Ukrainian cities of Katerynoslav, Kharkiv, Kiev, Mykolaiv, and Odessa. By mid-April some 810,000 workers had gone on strike in the empire, 170,000 of them in Ukraine. The strike movement reached its peak in the fall of 1905 and continued, with declining intensity, into 1907. Strikes in Kharkiv and elsewhere escalated into armed confrontations between workers and representatives of the state. In the fall of 1905, workers' councils or soviets (radas) began to appear in Katerynoslav, Kiev, L'vov, Mariupol, Mykolaiv, Odessa, Oleksandrivske, Yuzivka, and other Ukrainian cities.

The revolution spread to the military, particularly the *Black Sea Fleet. In June 1905 the crew of the battleship **Potemkin* in Odessa harbor mutinied; one of the chief leaders of the mutiny was the Ukrainian P. Matiushenko, and another prominent mutineer was O. *Kovalenko, who had been a founder of the Revolutionary Ukrainian party. In November 1905 the crew of the cruiser *Ochakov*, off Sevastopol, also mutinied.

Peasant unrest was a characteristic feature of the revolution in Ukraine. A wave of agricultural laborers' strikes engulfed Right-Bank Ukraine in the spring and summer of 1905, 1906, and, to a lesser extent, 1907. Among Ukrainian political parties the most active in support of the peasant movement was the Ukrainian Social Democratic *Spilka.

In the face of widespread social unrest Tsar Nicholas II made concessions to the people in a manifesto of 30 October 1905. Among other things, the October manifesto established a limited parliament, the State *Duma, in which Ukrainians participated in 1906–17 (see *Ukrainian caucus in the Russian State Duma). The manifesto also promised fundamental civil rights, including freedom of the press and freedom of association, which did much to accelerate the development of the Ukrainian movement in the Russian Empire. Even before the tsar's manifesto, in March 1905, the Academy of Sciences in St Petersburg had declared that the Ukrainian language was not a dialect of Russian but an independent Slavic language, and recommended that the restrictions placed on it by P. *Valuev's circular and the *Ems Ukase be lifted. In the wake of the October manifesto Ukrainian newspapers and journals began to appear in Kharkiv, Kiev, Lubni, Odessa, Poltava, and elsewhere. In 1906, 18 Ukrainian periodicals appeared. The most important periodical of the era was the daily newspaper **Hromads'ka dumka*, which was succeeded by the daily **Rada*. The fortunes of the Ukrainian periodical press waned with those of the revolution. Beginning in late 1906 the interference of the authorities substantially limited Ukrainian-language publication. Although some attempts were made during the revolution to introduce the Ukrainian language into educational institutions, those attempts were immediately thwarted by the Russian government.

The revolution witnessed the proliferation of Ukrainian voluntary associations. Branches of the adult educational and cultural society *Prosvita were established in Kiev, Odessa, and about a dozen other cities; numerous branches were also established in villages. Few, however, survived the reactionary period that began in 1907. Several hundred Ukrainian co-operatives also appeared in 1905–7. Various other musical, dramatic, and educational clubs emerged during the revolution in Ukraine.

To fight the revolution the Russian government and reactionaries stirred up an extreme Russian nationalism that was antisocialist, anti-Semitic, and anti-Ukrainian. The

nationalists, known as *Black Hundreds, organized *pogroms against Jews and against supporters of the revolution. Moderate Ukrainian politicians condemned the anti-Jewish pogroms in their organ *Ukrainskii vestnik*; revolutionary Ukrainian activists, especially members of the *Ukrainian Social Democratic Workers' party, organized self-defense units to combat the pogromists.

Revolution of 1917. See February Revolution of 1917 and October Revolution of 1917.

Revolutionary committee (*revoliutsiinyi komitet*, or *revkom*). A temporary body of local government set up by the Bolsheviks during the revolutionary period (1918–20). Introduced in October 1917 in Russia, such committees were assigned the task of preparing an uprising against the Provisional Government. In Ukraine the committees appeared from late October to November 1917, in Kharkiv, Kiev, and the Donbas. The revolutionary committees worked closely with the local soviets and Red Guards and sometimes served as local police forces for the *revolutionary tribunals. The *revkomy* often dealt brutally with 'class enemies' and opponents of Soviet rule. In December 1919 the All-Ukrainian Revolutionary Committee was created to co-ordinate Bolshevik activity throughout Ukraine and organize the Red Army. The body was also supported by the Borotbists. As the Party consolidated its power and introduced Soviet rule, the revolutionary committees were disbanded. Because of strong resistance to the Soviets, in Ukraine some *revkomy* continued to operate until mid-1921.

Revolutionary committees were created also by other parties. In December 1918 the *Borotbists organized military-revolutionary committees to overthrow the UNR Directory, and an *All-Ukrainian Revolutionary Committee was created by the Ukrainian Social Democratic Workers' party in Right-Bank Ukraine in 1919 to fight the Bolsheviks.

Revolutionary tribunal (*revoliutsiinyi trybunal* or *revtrybunal*). An extraordinary judicial institution created by the Bolshevik authorities in Russia and then in other republics. In Ukraine the revolutionary tribunals were established by a decree of the Soviet government issued in Kharkiv on 4 January 1918. In early 1919 they served as organs of local Bolshevik revolutionary committees. On 15 April 1919 the Supreme Revolutionary Tribunal was set up under the All-Ukrainian Central Executive Committee to deal with particularly important cases. The tribunals tried individuals considered to be enemies of Soviet rule ('counterrevolutionaries') or class enemies, and employed illegal and brutal methods of investigation and punishment. The only criterion of judgment was the interest of the revolution. The judges and executors of the sentences were members of the Cheka. The revolutionary tribunals were abolished in 1922, when the court system of Soviet Ukraine was reformed.

Revolutionary Ukrainian party (*Revoliutsiina ukrainska partiia*, or RUP). The first mass Ukrainian revolutionary party in Russian-ruled Ukraine, established on 11 February 1900 by the then Kharkiv Student Hromada leaders P. Andriievsky, D. Antonovych, B. Kaminsky, Yu. Kollard, O. Kovalenko, L. Matsiievych, D. Poznansky, and M. Rusov. RUP was the culmination of earlier attempts at creating a Ukrainian political organization in a society whose intelligentsia was by and large apolitical, and whose Ukrainophile activity was limited to the cultural sphere. Its political antecedents were the *Brotherhood of Taras (est 1891) and the first 'Ukrainian Social Democracy' group (est 1896 in Kiev), headed by I. Steshenko and Lesia Ukrainka.

Mykola Mikhnovsky's *Samostiina Ukraina* (Independent Ukraine, 1900), the first RUP publication

Initially RUP based its politics on a speech delivered by a sympathizer, M. *Mikhnovsky, at public commemorations of T. Shevchenko in Poltava and Kharkiv in March 1900; the speech was solicited by the founding members and published as the first RUP brochure under the title *Samostiina Ukraina* (Independent Ukraine, 1900). Mikhnovsky called for 'a single, unitary, indivisible, free, independent Ukraine from the Carpathians to the Caucasus and the immediate goal of the restoration ... of rights defined in the Pereiaslav [Ukrainian-Muscovite treaty] constitution of 1654 and the dissemination of its authority throughout the entire territory of the Ukrainian people in Russia.'

The first RUP members were nationally conscious students at various schools in Ukraine and elsewhere in the Russian Empire. In June 1901 they met for the first time at the clandestine third Ukrainian student conference in Poltava. At the first RUP congress in December 1902 the six existing RUP 'free communities' – based in the cities of Kharkiv, Poltava, Kiev, Nizhen (the Chernihiv Community), Lubni, and Katerynodar, in the Kuban (the Black Sea Community) – and smaller groups in Romen, Pryluka, St Petersburg, Odessa, and Moscow were united in one organization. The congress elected an RUP Central Committee (Antonovych, Ye. Holitsynsky [replaced by V. Vynnychenko], V. Kozynenko, and M. Tkachenko) based in Kiev, and a Foreign Committee (directed by Vynnychenko and Antonovych) and Publications Committee, both of which were to be based in Austrian-ruled Lviv and Chernivtsi.

Initially RUP advocated the use of political terrorism and armed struggle against the tsarist regime and the

large landowners. By 1902 it had moved away from revolutionary nationalism toward an agrarian Marxism that emphasized both national and social liberation. Its members concentrated on politicizing the Ukrainian peasantry and rural proletariat, organizing peasant groups, strikes, and boycotts in Kiev, Chernihiv, Poltava, and Kharkiv gubernias, and disseminating revolutionary literature written in Ukrainian, such as its monthly organs **Haslo* (1902–3), **Selianyyn* (1903–6), *Dobra novyna* (1903), and **Pratsia* (1904–6), 38 brochures and books (including translations of the socialist writings of A. Bebel, P. Lafargue, F. Lassalle, W. Liebknecht, and K. Kautsky), and many proclamations. To that end it co-operated with non-Ukrainian parties in Ukraine, such as the Russian Socialist Revolutionary party, Jewish Workers' Bund, Russian Social Democratic Workers' party (RSDWP), and Polish Socialist party. Most of the RUP publications were printed in Austrian-ruled Chernivtsi and Lviv and smuggled in with the aid of the *Ukrainian Social Democratic party there; some leaflets were printed by underground presses in Russian-ruled Ukraine.

In 1903 RUP repudiated the extreme nationalism of *Samoistiina Ukraina* and adopted a draft program based on the principles, goals, and tactics of international social democracy (ie, the German Social Democratic party's Erfurt Program). For practical reasons the call for an independent Ukraine was replaced by one for Ukraine's full national-territorial autonomy within a federated, democratic Russia. Also that year the small *Ukrainian Socialist party in Right-Bank Ukraine fused (for six months) with RUP, many RUP members were arrested, and others fled to Lviv, where M. Melenevsky became the head of the Foreign Committee.

In 1904 M. Porsh became the new party leader. Under him RUP shifted its focus away from the peasantry to the ethnic Ukrainian urban proletariat, adopted organizational principles of 'democratic centralism,' theoretical training, and strict conspiracy, recruited many new students, workers, and peasants, and expanded its influence to Right-Bank and Southern Ukraine and the Kuban. Holitsynsky represented RUP at the Socialist International Congress in Amsterdam in August; after RSDWP delegates protested against the participation of a separate Ukrainian delegation, he was forced to join their delegation. In December 1904, at the second RUP congress in Lviv, ideological and tactical differences among Porsh, Antonovych, Melenevsky, and Vynnychenko, especially regarding the national question and the need for Ukrainian independence, split the party. In January 1905 an orthodox Marxist minority faction headed by Melenevsky united with the RSDWP as the autonomous Ukrainian Social Democratic **Spilka*. During the Revolution of 1905 RUP members organized workers' and peasants' strikes and boycotts. At the third RUP congress in December 1905, the remaining national-autonomist members renamed their party the *Ukrainian Social Democratic Workers' party.

Although it had many adherents and a mass appeal, RUP had only 116 known members. Another 75 have been identified as possible members, and there were many unidentified members. In addition to those already mentioned, the members who later played important roles in Ukrainian political, cultural, and scholarly life were K. Bezkrivny, V. Chekhivsky, D. Dontsov, D. and V. Doroshenko, M. Halahan, M. Hekhter, H. Ivanytsky, H. Kova-

lenko, M. Kovalsky, P. Krat, M. Livytska, A. Livytsky, I. Lychko, S. Manzhula, B. Matiushenko, Isaak Mazepa, S. and V. Mazurenko, O. Mytsiuk, O. Nazariiv, S. Petliura, P. Poniatenko, N. Romanovych-Tkachenko, I. Rotar, I. Rudychiv, I. Severyn, Mykyta Shapoval, O. Skoropys-Yoltukhovskyy, O. Sokolovsky, O. Stepanenko, V. Stepankivsky, M. Trotsky, S. Tymoshenko, Yu. Tyshchenko, S. Veselovsky, M. Vorony, L. Yurkevych, and Andrii and Anna Zhuk.

A. Zhukovsky

Revue de Prométhée, La. A French-language bimonthly journal dedicated to the national question in the USSR and Eastern Europe, edited by O. Shulhyn with the assistance of M. Kovalsky and published in 1938–40 in Paris (a total of nine issues). It succeeded **Prométhée* as the major organ of the *Promethean movement. In addition to printing articles on political affairs, the journal devoted attention to the culture and history of the non-Russian peoples under Soviet domination, especially the Ukrainians.

Revue des études slaves. A scholarly journal published by the Institute of Slavic Studies at the University of Paris since 1921. It contains articles on Slavic history, literature, linguistics, and culture, including numerous works on Ukrainian topics and extensive bibliographies and reviews of works in Slavic studies. Surveys of Soviet, émigré, and French books and articles in Ukrainian studies have been compiled by A. Mazon, A. Martel, B. Unbegaun, E. Borschak, and M. Scherrer. An index to the first 34 volumes was published in 1949.

Revue ukrainienne, La. A French-language monthly organ of the *Union for the Liberation of Ukraine published in Lausanne, Switzerland, in 1915–17 (a total of nine issues) to inform the Western powers about the Ukrainian question and garner popular support for Ukrainian independence. It was published initially in a pressrun of 7,000 copies and was widely distributed, but the events of the First World War made it impossible for the effort to be kept up. The editor was A. Zelib and then E. Batchinsky, assisted by A. Zhuk.

Revusky, Abraham [Revuc'kyj, Avraam] (Revutsky), b 8 February 1889 in Smila, Cherkasy county, Kiev gubernia, d 8 February 1946 in Yonkers, New York. Journalist and Zionist leader. He grew up in Palestine and studied at the universities of Odessa and Vienna. A member of the *Poale Zion party and a regular contributor to the Russian and Yiddish press, in 1917–18 he was a leader of the Jewish community in Odessa. In 1918 he was the Poale Zion representative to the Central Rada, and in January–Febru-

ary 1919 he served as the minister of Jewish affairs in the UNR *Council of National Ministers; he left that post in protest over the UNR Directory's negotiations with the Entente powers. In 1920 Revusky returned to Palestine, but in 1921 was expelled by the British. In 1925 he emigrated from Western Europe to the United States, where he was active in Zionist politics and the Jewish press. His memoirs of the revolutionary period, *In di Shvere Teg oyf Ukraine* (In the Difficult Days of Ukraine), were published in 1924.

Dmytro Revutsky

Lev Revutsky

Revutsky, Dmytro [Revuc'kyj], b 5 April 1881 in Irzhavets, Pryluka county, Poltava gubernia, d 29 December 1941 in Kiev. Musicologist and folklorist; brother of L. *Revutsky. After graduating from Kiev University (1906) he was a gymnasium teacher until 1918, when he helped to establish and began lecturing at the Kiev *Lysenko Music and Drama Institute. From 1923 he also served as a research associate with the VUAN Commission of Ethnography. Charges of 'bourgeois nationalism' in 1932 led to dismissal from his posts. Only in 1938 was he restored to an official position, as a senior research associate at the AN USSR (now ANU) Institute of Folklore. Having missed the evacuation of scholars from Kiev before its occupation by Nazi forces in 1941, Revutsky continued his academic work under the German regime. Both he and his wife were murdered not long thereafter, probably by Soviet agents.

Revutsky compiled a three-volume collection of Ukrainian folk songs under the name *Zoloti kliuchi* (The Golden Keys, 1926-9) and wrote a variety of articles on topics related to Ukrainian ethnomusicology.

Revutsky, Lev [Revuc'kyj], b 20 February 1889 in Irzhavets, Pryluka county, Poltava gubernia, d 30 March 1977 in Kiev. Composer, teacher, music activist; brother of D. *Revutsky; full member of the AN USSR (now ANU) from 1957. He entered Kiev University in 1907 and began legal studies in 1908. At the same time he studied music, and he graduated from the Kiev Conservatory in 1916. He had studied with M. Lysenko, H. Liubomyrsky, H. Khodorovsky, and R. Glière. His *First Symphony* is one of the compositions of this period. After teaching music for several years in the Pryluka area and being appointed in 1924 to the *Lysenko Music and Drama Institute in Kiev, he reached the height of his composing career. Following a restructuring of music education and the closing of the

Lysenko Institute in 1934, Revutsky began lecturing at the Kiev Conservatory. That same year he was severely criticized by the authorities for his *Second Piano Concerto*. He subsequently focused his energies in the area of teaching, his composing now consisting largely of editing his previous works or generating occasional pieces for state consumption. He was appointed a professor at the conservatory and headed the *Union of Composers of Ukraine (1944-8). He also supervised the editing of the complete works of M. *Lysenko in the 1950s and served on the editorial board of *Ukrains'ka radians'ka entsyklopediia* (The Ukrainian Soviet Encyclopedia) in 1958-68.

The list of Revutsky's pupils, which includes M. Dremliuha, V. Homoliaka, H. Zhukovsky, Yu. and P. Maiboroda, V. Kyreiko, A. Kolomyiets, O. Znosko-Borovsky, V. Rozhdestvensky, and L. Hrabovsky, testifies to the strong influence he exerted on the development of music in Ukraine. His compositions were innovative and continued the trend of the Ukrainian national school into the Soviet era. His two symphonies (1920, revised in 1957; and 1926, revised in 1940 and 1970), which showed his keen ear for orchestral color, were notable developments in Ukrainian music. His chamber and piano works (preludes for piano, works for violin and cello with piano) displayed a fresh musical language and technical skill. His best vocal works include the cantata *Khustyna* (The Kerchief, 1923; revised and orchestrated in 1944) and his anthologies of folk song arrangements for voice with piano, such as *Sonechko* (Little Sun, 1925-6), *Kozats'ki pisni* (Cossack Songs, 1926), and *Halyts'ki pisni* (Galician Songs, 1926-8). Among his other vocal compositions are four quartets and works for choir with orchestra, such as *Pro Karmeliuka* (About Karmeliuk, 1925). Revutsky also edited two versions of M. Lysenko's opera *Taras Bul'ba* (1937 and 1955).

A. Rudnytsky

Valerian Revutsky

Revutsky, Valerian [Revuc'kyj, Valerijan], b 14 June 1911 in Irzhavets, Pryluka county, Poltava gubernia. Theater scholar and critic; son of D. *Revutsky. He graduated from the Moscow Theater Institute (1941) and the University of Toronto (1957). He taught at the Kiev Conservatory (1941-2), was artistic director of the Grono Young Spectator's Theater in Kiev (1942), and worked at the theater

school of the Lviv Institute of Folk Culture (1943–4). Revutsky arrived in Canada in 1950 and taught at the University of British Columbia (1960–76). He is the author of *Piat' velykykh avtoriv ukrains'koi stseny* (Five Great Authors of the Ukrainian Stage, 1955), *P'iesy Mykoly Kulisha* (The Plays of Mykola Kulish, 1956), *Neskoreni berezil'tsi: Iosyp Hirniak i Olympiia Dobrovol's'ka* (Undeclared Berezil Actors: Yosyp Hirniak and Olympiia Dobrovol'ska, 1985), and numerous articles in *Entsyklopediia ukrainoznavstva* (1949–84), *Ukraine: A Concise Encyclopaedia* (1971), and the *Encyclopedia of Ukraine*. He also edited a volume on Les Kurbas (1989).

Revutsky, Yevhen [Revuc'kyj, Jevhen], b 1 June 1919 in Ichnia, Borzna county, Chernihiv gubernia. Internal medicine specialist; son of L. *Revutsky. A graduate of the Kiev Medical Institute (1947), he worked at the AN URSS (now ANU) Institute of Physiology (1954–67), chaired the Department of Diagnostics and Internal Medicine of the Institute of Experimental and Clinical Oncology of the Ministry of Health of the Ukrainian SSR, was deputy director of research at the Ukrainian Scientific Research Institute of Cardiology (from 1970), and was head of the internal medicine department at the Kiev Medical Institute (from 1973). His publications deal with problems of gastroenterology, clinical oncology, and cardiology.

Rewakowicz, Henryk (Revakovich), b 18 January 1837 in Sokolniki, near Tarnobrzeg, Poland, d November 1907 in Lviv. Polish political activist of Ukrainian origin. He had left-wing democratic views. He was editor of the daily newspaper *Kurier Lwowski* (1887–1907) and president (1897–1907) of the populist political party Stronnictwo Ludowe.

Rezana. A monetary unit of Kievan Rus', worth one-fiftieth of a hryvnia (see *Currency and coins).

Rezanov, Vladimir. See Riezanov, Volodymyr.

Rhapsody. A composition in an indefinite form, usually based upon epic or national melodies. In the original Greek the term referred to the recitation of portions of an epic poem. In the works of F. Liszt, A. Dvořák, and others the form is an instrumental fantasia generally employing folk or national themes. In Ukrainian music M. Lysenko wrote two rhapsodies for piano solo; and orchestral works of this type include S. Liudkevych's *Striletska rapsodiia* (The Sich-Rifleman Rhapsody, now known as the *Galician Rhapsody*), V. Barvinsky's *Ukrainian Rhapsody*, M. Verykivsky's *Lemko Rhapsody* and *Transcarpathian Rhapsody*, H. Maiboroda's *Hutsulian Rhapsody*, and L. Kolodub's *Ukrainian Carpathian Rhapsody*. S. Liapunov wrote a *Ukrainian Rhapsody* for piano and orchestra (1907).

Rhetoric (from Greek *rhetorikè téchne*, Latin *ars rhetorica*). The study of the methodology of constructing texts (oral and written) the objective of which is to persuade listeners or readers or to influence their emotions and behavior.

The main corpus of rhetorical theory was formulated in antiquity, when two basic schools of rhetoric existed: the Greek, which was theoretical and reflective, and the Latin, which was pragmatic and normative. From those a third school developed, the Byzantine, which devoted more

attention to the question of esthetics and to the role of rhetoric in teaching. That school also laid the basis on which the rhetorical trends of the Renaissance and baroque periods developed. The break with the classical schools of rhetoric came only in the second half of the 19th century. No modern school of rhetoric traces its development directly from classical rhetoric. Of modern schools, the most important are the French and the American schools.

The development of rhetoric in Ukraine is closely tied to the emergence of the rhetorical theory of the Renaissance and baroque periods. There were only a few Ukrainian pieces of accomplished rhetorical prose written during the Middle Ages, such as the works of Cyril of Turiv and Metropolitan Ilarion. Ukrainian rhetoric from the 17th and 18th centuries can be divided into two areas, rhetoric as a subject in schools and religious oratory prose. The writers of oratory prose were S. Orikhovsky (who wrote in Latin), L. Baranovych, I. Galiatovskyy, A. Radyvyl'sky, T. *Prokopovych, and S. Yavorsky. The earliest surviving course of rhetorical theory, dated 1635, is *Orator Mohileanus Marci Tullii Ciceronis apparatus partitionibus excultus* (1635–6), written by Y. *Kononovych-Horbatsky. The most prominent theoretician of the art of rhetoric was Prokopovych, who lectured in rhetoric in the Kievan Mohyla Academy in 1706. The study of rhetoric declined in Ukraine in the 19th century owing, on the one hand, to the decline of the education system and, on the other, to the rise of romanticism, which substituted artistic individualism for the normativism of rhetoric. Recently an interest in reviving the study of rhetoric has been noted in Ukraine.

M. Ivanek

Rhododendron. A woody plant (genus: *Rhododendron*; Ukrainian: *berdulets*) of the family Ericaceae. There are hundreds of species worldwide; most are evergreen, and the deciduous ones are commonly called azaleas. Many are cultivated as ornamentals. In Ukraine the only native rhododendron (*R. kochii*), a shrub with deep violet-lilac flowers, grows in the East Carpathians on the rocky slopes of subalpine and alpine ranges (elevations to 2,000 m). Whole islands of rhododendron exist in Polisia on the azalea preserve near Tomashhorod. Rhododendron honey is often toxic.

Rhubarb (*Rheum*; Ukrainian: *revin*). Hardy perennial plants of the family Polygonaceae, grown for their large, succulent leaf stalks and for medicine. Of the approx 30 species known worldwide, three – *R. undulatum*, *R. compactum*, and the garden rhubarb *R. rhaponticum* – are cultivated in Ukraine. The leaf stalks contain up to 2.5 percent sugars and 3.5 percent organic acids and vitamin C, as well as minerals. Rhubarb is used to make compotes, jelly,

jam, wine, and aperitifs. The powdered roots of *R. palmatum* are used in *folk medicine as laxatives.

Riabchenko, Serhii [Rjabčenko, Serhij], b 22 October 1940 in Dnipropetrovske. Physicist. After graduating from Dnipropetrovske University (1962) he joined the AN USSR (now ANU) Institute of Physics in Kiev, where since 1983 he has headed the Laboratory of Physics of Magnetic Phenomena. Since 1987 he has also been a professor of physics at Kiev University. His principal contributions are in the fields of semiconductor magneto-optics and magnetic resonance.

Riabchuk, Mykola [Rjabčuk], b 27 September 1953 in Lutske, Volhynia oblast. Critic, poet, and translator. He graduated from the Lviv Polytechnical Institute (1977), has worked as an editor for the journal *Vsesvit* (deputy chief editor from 1991), and became literary editor of **Suchasnist'* in 1992. His insightful literary criticism and political commentaries have appeared in Ukrainian and Russian journals and separately as the collection *Potreba slova* (The Need for a Word, 1985). A collection of his poetry, *Zyma u L'vovi* (Winter in Lviv), was published in 1988. He has also translated Polish, Russian, and Slovak literature into Ukrainian.

Riabchynska, Yuliia [Rjabčyns'ka, Julija], b 26 January 1947 in Odessa, d 13 January 1973. Champion canoeist. She was a member the USSR women's team that won a gold medal in the kayak fours at the 1971 world championships, and she herself won the 1972 Olympic gold medal in the women's 500-m kayak singles and the 1971 Ukrainian and USSR championships.

Riabinin, Nikolai [Rjabinin, Nikolaj], b 31 July 1919 in Krasnoe, Kostroma gubernia, Russia, d 9 March 1992 in Kharkiv. Sculptor; corresponding member of the USSR Academy of Arts since 1973. He studied art in Moscow (1941–4), graduated from the Kiev State Art Institute (1945), and taught at the Lviv Institute of Applied and Decorative Arts (1947–56) and the Kharkiv Art Institute (1956–66). He has sculpted many busts, and portraits in the socialist realist manner, including *Oleksa Dovbush* (with V. Skolozdra, 1950–1), *T. Shevchenko* and *I. Aldridge* (1952), *Africa Awakens* (1957), *Fidel Castro* (1960–3), *Mother* (1967), and *M. Kybalchych* (1971).

Riabinin-Skliarevsky, Oleksander [Rjabinin-Skljarevs'kyj], b 23 May 1878 in the Odessa region, d ? Historian and archivist. He worked at the Odessa Historical Archives and in the history section of the VUAN. He published a number of studies on the history of Ukraine in the 18th to 19th centuries and articles in *Ukraina* (1924–30) on the Odessa Hromada (1926), I. Kotliarevsky and the Zaporozhian Cossacks (1926), the Kiev Hromada (1927), the Ukrainian revolutionary movement of the 1870s and 1880s (1927), Ukrainian themes in A. Pushkin's poem 'Poltava' (1928), and the end of the Danubian Sich (1929). He was arrested and sent to a concentration camp in 1934; his subsequent fate is unknown.

Riabko, Pavlo [Rjabko] (Riabkov), b 29 June 1848 in Kherson, d 28 December 1926 in Zinoviiivske (now Kirovohrad). Civic activist and ethnographer. He graduated

from a land surveying course at the Kherson gymnasium (1868). In 1877–8 he took an active part in the populist movement in Odessa, Kherson, and Yelysavethrad county, and then he moved to Kiev. In 1879–84 he was exiled to Serednokolimsk (in Yakutia, Siberia). After his release he worked in zemstvo statistical offices in Kherson (1884–92) and Yelysavethrad (1892–1901). Having been dismissed for aiding starving peasants in Kherson gubernia, he went abroad and studied at the Russian Higher School of Social Sciences in Paris (est by M. Kovalevsky). In 1904 Riabko participated in an ethnographic-anthropological expedition, led by F. Vovk and I. Franko, to the Boiko and Hutsul regions and Bukovyna; his descriptions were published in *Etnograficheskoe obozrenie*. He researched the way of life and customs of Ukrainian chumaks and fisherman in the Kherson region, and cofounded the local museum of regional studies in Yelysavethrad (1917). He also wrote memoirs of I. Franko and V. Korolenko.

Riabokliach, Ivan [Rjabokljač], b 8 November 1914 in Pivtsi, Kaniv county, Kiev gubernia. Writer. From 1933 he worked as a journalist in the Donbas and translated Russian literature into Ukrainian. He wrote the novel *Zolototysiachnyk* (The Centaury, 1948), for which he received the Stalin State Prize in 1949; the story collections *Zhaivoronky* (Larks, 1957), *Chaiky* (The Gulls, 1960), and *Antoniv Hai* (1967); the historical-biographical plays *Persha ...* (The First, 1969, about I. Kotliarevsky) and *Mariia Zan'kovets'ka* (1971); and the dramas *Shliakhy i stezhynky* (Roads and Trails, 1958), *Na peredn'omu kraï* (On the Leading Edge, 1961), and *Zhyva voda* (Live Water, 1962). An edition of his selected stories appeared in 1984.

Riabov, Ivan [Rjabov], b 25 July 1897 in Goritsy, Moscow gubernia, d 2 June 1984 in Yalta. Horticulturist. A graduate of the Petrine Agricultural Academy (1921), he worked at the *Nikita Botanical Garden (1923–77). He developed 14 peach and 10 cherry varieties.

Riabov, Oleh [Rjabov], b 23 December 1932 in Kremenchuk, Kharkiv (now Poltava) oblast. Conductor. After graduating from the Kiev Conservatory in 1960, he was appointed conductor at the Kiev Theater of Opera and Ballet. In 1966–71 he conducted at the Bolshoi Theater in Moscow. His best performances include the operas *Rigoletto* by G. Verdi, *Lucia di Lammermoor* by G. Donizetti, *Eugene Onegin* by P. Tchaikovsky, and *Nazar Stodolia* by K. Dankevych and the ballets *Swan Lake* and *The Nutcracker* by P. Tchaikovsky, *Romeo and Juliet* by S. Prokofiev, and *The Lily* by K. Dankevych.

Riabov, Oleksii [Rjabov, Oleksij], b 17 March 1899 in Kharkiv, d 18 December 1955 in Kiev. Composer and conductor. After graduating from the Kharkiv Conservatory (1918), he conducted symphony orchestras (1919–29) in Ostrih, Kharkiv, and Armavir (Krasnodar krai). He later became music director, conductor, and composer-in-residence of the Kharkiv Theater of Musical Comedy (1929–41) and the Kiev Theater of Musical Comedy (1941–55). He wrote 25 operettas for the two theaters and is considered the creator of the Soviet Ukrainian operetta. His most popular works are *Sorochyntsi Fair* (1936), *May Night* (1937), and *The Wedding in Malynivka* (1938). His works also include a symphony (1921), a violin concerto (1919), cantatas, and chamber pieces.

Mykola Riabovol

Vera Rich

Riabovol, Mykola [Rjabovol], b 17 December 1883 in Dinska Stanytsia, Kuban, d 28 June 1919 in Rostov-na-Donu. Kuban Ukrainian political leader. He graduated from the Kiev Polytechnical Institute. He served as director of the Kuban–Black Sea railroad co-operative (1911–14) and president of the Kuban Co-operative Credit Union (1918–19). He was head of the Cossack Military Council and its successor, the Kuban Territorial Council (1917–19). Riabovol favored land reform and the creation of independent political entities out of the former Russian Empire, views that placed him in opposition to the Russian Volunteer Army, which had established its base of operation in the Kuban region. He was assassinated while attending a conference called to determine relations among the Don, Terek, and Kuban Cossack hosts, as well as with A. Denikin's army. An investigation suggested that Denikin's army was responsible for the murder.

Riappo, Yan, b 11 April 1880 in what is now Vyrublast, Estonia, d 14 April 1958 in Tallinn, Estonia. Pedagogue. He graduated from St Petersburg University in 1909 with a degree in history, philosophy, and Eastern languages. In 1921–8 he was deputy people's commissar of education of the Ukrainian SSR and played a leading role in developing Ukraine's independent public education system, known as the Hrynko-Riappo system (see *Unified labor school). In 1922–7 he was editor of the journal *Shliakh osvity. In 1928–38 he worked in industry, and in 1938–48 in public education in Ukraine and Russia. Riappo's books include *Reforma vysshei shkoly na Ukraini v roky revoliutsii, 1920–24* (Reforms of the Higher School in the Years of the Revolution, 1920–24, 1925) and *Systema narodn'oi osvity na Ukraini* (The Elementary School System in Ukraine, 1926).

Rice (*Oryza sativa*; Ukrainian: *ryzh* or *rys*). Annual and perennial plants of the family Gramineae, cultivated for their starchy grain. Rice is the principal cereal crop of most of the world's population; its origins have been traced by N. Vavilov to India in approx 3000 BC. Rice was introduced in Ukraine in the 1930s. A large area is now planted annually; in the 1970s, 32,000 ha were under rice cultivation in the Black Sea area and the Danube and Boh river deltas, and an additional 140,000 ha in the Kuban region with a yield of up to 5 t of grain per ha. Varieties have been developed which grow with intermittent flooding or periodic watering rather than continuous flooding. The most

common varieties in Ukraine are Dubivsky 129, Vros 5123, Uzros 2842, and Zeravshanika 427 and 2586-1.

Rich, Vera, b 24 April 1936 in London. English poet and translator; general secretary of the Anglo-Ukrainian Society in the 1950s and 1960s. Her poetry on Ukrainian themes appeared in her collections *Outlines* (1960) and *Portents and Images* (1963). She has published her own poems, translations of Ukrainian poetry (by T. Shevchenko, I. Franko, Lesia Ukrainka, Hetman I. Mazepa, M. Shashkevych, the Neoclassicists, O. Teliha, E. Andrievska, and others), and a few articles in *Ukrainian Review* and *Ukrainian Quarterly*. Published separately have been her translations *Song of Darkness: Poems by Taras Shevchenko* (1961), *Lesya Ukrainka: Selected Works* (1968), *The Medvedev Papers* (1971), and an anthology of Belarusian poetry (1971).

Armand-Emmanuel du Plessis de Richelieu

Arsen Richynsky

Richelieu, Armand-Emmanuel du Plessis, duc de, b 25 September 1766 in Paris, d 17 May 1822 in Paris. French nobleman and statesman. He joined the Russian army in 1790 to fight the Turks at Izmail, and with the outbreak of the French Revolution he fought alongside the royalists (1793–4). He settled in Russia in 1795 and became governor of Odessa in 1803 and governor-general of so-called *New Russia (Katerynoslav, Kherson, and Tavriia gubernias, plus Bessarabia gubernia from 1812) in 1805. He contributed significantly to the development of commerce, trade, and agriculture in the region and oversaw the transformation of Odessa from a village into a modern city. He encouraged the in-migration of Germans, Bulgarians, Greeks, and Jews and helped to defend the population against the plague (1812). In 1814 Richelieu returned to France, where he served as minister of foreign affairs (1815–18) and prime minister (1820–1). The *Richelieu Lyceum in Odessa (est 1817) was named after him, and a monument, by I. Martos, was erected in Odessa in his honor in 1828.

Richelieu Lyceum (Rishelivskyi litsei). A private institution of learning, founded in 1817 in Odessa. It was named in honor of the former governor-general of New Russia, A.-E. *Richelieu. Students were drawn primarily from the aristocracy and wealthy merchant families. French was the only language of instruction until 1820, when a number of Russian pedagogues became affiliated with the lyceum and began to teach classes in Russian as

well. Until 1837 the lyceum operated as a *gymnasium. Its eight-year program emphasized philosophy and juridical-political studies and precluded technical or professional specialization. Under I. *Orlai (the lyceum's director in 1826–9) teaching methods were modernized, and departments of mathematics, physics, chemistry, biology, geography, and history were established. A pedagogical institute was also formed as a branch of the lyceum. Its function was to prepare pedagogical cadres for district and commercial schools. In 1837 the lyceum's status rose to that of an institution of *higher education. At that time also an Eastern languages institute was established to train translators for military departments. In 1842 agricultural and natural science sections were added, and the institute's mandate became the preparation of government officials for various departments. By 1848 the lyceum had a seven-year gymnasium preparatory school affiliated with it. Under the influence of N. *Pirogov, who became head of the Odessa school district in 1856, the lyceum became the basis for the New Russia University (see *Odessa University), established in 1865. The institute's library collection subsequently developed into the Odessa Library. It was one of the most important libraries in Russian-ruled Ukraine, with a collection of 314,000 volumes in 1915.

N. Freeland

Richka [Rička]. v-5. A village (1972 pop 2,400) on the Richka River in Kosiv raion, Ivano-Frankivske oblast. It was first mentioned in historical documents in 1735. It has long been a center for Carpathian folk art, especially decorative woodcarving, burning, and inlay. The town has a museum of Hutsul folk art.

Richynsky, Arsen [Ričyns'kyj], b 1892 in the Volhynia region, d 1941? Orthodox church activist and physician. He completed studies at the Volhynian Theological Seminary and then at the medical faculty of Warsaw University. After graduating in 1916, he established a medical practice in Volhynia and became a strong proponent of the Ukrainianization of the Orthodox church in the region; after the Revolution of 1917 he advocated the transfer of its jurisdiction from the Moscow patriarch to the Ukrainian Autocephalous Orthodox church. To further these goals in the interwar period, he financed, published, and edited several publications, including *Nova doroha*, **Na varti*, *Ridna tserkva*, and *Nashe bratstvo*. In June 1927 Richynsky organized a major gathering of Volhynia eparchy's laity in Lutske to discuss church matters. He headed the 'Church Committee,' elected at the gathering, that coordinated the implementation of resolutions. The committee was dissolved in the summer of 1928 by Polish authorities concerned about its growing militancy. Richynsky's activities also brought him into conflict with the Russophile hierarchy of the Polish Autocephalous Orthodox church, and he was excommunicated in April 1929 (he was permitted to rejoin the church a year later). In 1939 he was jailed in the Bereza Kartuzka concentration camp by Polish authorities. When the Red Army occupied Volhynia, he was arrested and sent to a labor camp, in 1940 or 1941, from which he never returned. Richynsky is the author of *Problemy ukraïns'koi relihiinoï svidomosti* (Problems of Ukrainian Religious Consciousness, 1933).

Richytsky, Andrii [Ričy'kyj, Andrii] (pseud of Anatolii Pisotsky), b 1890 in Richytsia, Radomyshl county,

Kiev gubernia, d 1934 in Bashtanka, now in Mykolaiv oblast. Political leader, publicist, and literary critic. After the February Revolution he was a member of the Ukrainian Social Democratic Workers' party, a representative in the Ukrainian Central Rada (1917–18) and a member of its Little Rada, and the chief ideologue of the *Ukrainian Social Democratic Workers' party (Independentists; 1919) and the *Ukrainian Communist party (UKP, 1920–5). He coedited the UKP organ *Chervonyi prapor*, in which he criticized the CP(B)U as a party of Russian occupation. In 1920 he was elected a member of the *All-Ukrainian Central Executive Committee. After the Comintern abolished the UKP in 1925, Richytsky joined the CP(B)U and was elected a candidate member of its CC. He directed the statistical division of the co-operative *Ukrainbank and then was editor in chief of the *State Publishing House of Ukraine (DVU). From the second half of the 1920s he was also a professor at the Ukrainian Institute of Marxism-Leninism and headed the Commission of Shevchenko Studies at the *Taras Shevchenko Scientific Research Institute. Richytsky was a major interpreter and popularizer of M. *Skrypnyk's Ukrainization policies. Although he had been an official critic of the views of O. Shumsky, M. Volobuiev, M. Hrushevsky, M. Khvylovy, and the émigré V. Vynnychenko, after Skrypnyk's suicide in 1933 he himself was denounced in the Party press as an apologist for Vynnychenko and for allowing the DVU to publish large runs of Vynnychenko's works, labeled a spy and a traitor, and then arrested in Bashtanka, where he was tried on fabricated charges of 'overfulfilling' grain requisition quotas in famine-stricken villages and shot.

Richytsky wrote a book about T. Shevchenko and his works from a sociological Marxist approach (1923; 2nd edn 1925), a collection of articles criticizing Vynnychenko as a writer and politician (1928), a refutation of Volobuiev's views (1928), a booklet about the Central Rada (1928), a monograph on the foundations of Ukrainian studies (1929), an interpretation of Skrypnyk as a theoretician of the national question (1929), a biography of K. Marx (1929), and a booklet on the national question in the light of the directives of the 16th congress of the Bolshevik party (1931). He also edited the first Ukrainian edition of Marx's *Kapital* (1927–9). After his repression all of his works were banned in Soviet Ukraine.

V. Holubnychy, A. Zhukovskyy

Riddle (*zahadka*). A mystifying or puzzling question that is posed as a game and answered by guessing. Most folk riddles are aphoristic expressions in which the subject to be identified is depicted by a mere metaphor. Some are nonmetaphorical; they consist of a partial description of the subject that is to be identified. Riddles are the simplest form of folklore.

In the past, when most of the Ukrainian population was illiterate, riddles played an important role in the life of the peasants. A person's knowledge of riddles and ability to solve them was accepted as an indication of his or her intelligence. A candidate to a bachelors' group was often required to answer publicly a series of riddles before he was accepted. At a wedding the best man or the master of ceremonies answered riddles for the groom. Riddles were among the games played by young people at evening gatherings and at collectively undertaken tasks. In the Middle Ages a correct answer to a riddle sometimes saved a condemned man from death. In ancient times riddles

were believed to have magical powers. During courtship, for example, a suitor would address the family of the courted girl in riddles to deceive the evil spirits. Riddles are an important component of spells, carols, *rusalka* and wedding songs, funeral rituals, tales, legends, and anecdotes. In some folk works riddles play the dominant role. In their aphoristic character some riddles come close to being sayings or proverbs. Riddles appear throughout Ukrainian literature, from the works of H. Skovoroda, I. Kotliarevsky, and T. Shevchenko to those of current authors.

Riddles began to be studied as a separate folklore genre only in the 19th century. Collections of varying size were published by M. Luchkai (1830), H. Ilkevych (1841), I. Holovatsky (1847), M. Zakrevsky (1861), M. Nomys (1864), and P. Chubynsky (1877). The first collection devoted only to riddles was *Malorosiiskie ta galitskie zagadki* (Little Russian and Galician Riddles, 1851), which was compiled and edited by O. Sementovsky and contained 380 items. The most comprehensive collection, consisting of 3,805 riddles, was compiled by I. Berezovsky (1962), who also wrote the best study of riddles. O. Voropai's collection came out in London in 1955, and N. Varkhol's collection of riddles recorded by Ukrainians in eastern Slovakia appeared in Prešov in 1985. The riddle genre continues to develop. New riddles about various features of modern life are being invented constantly.

M. Mushynka

Ridna Khata (Native Home). A cultural and educational society in the Kholm region and Podlachia established in Kholm in 1920. *Ridna Khata* was modeled on the *Prosvita society in Lviv, which was not permitted to expand its organization into the so-called northwestern Ukrainian lands. It was banned by the Polish authorities in 1921 but continued to operate semisecretly until 1922. That year it was registered as the *Ridna Khata Ruthenian Charitable Society*, a name which allowed it to emphasize its charitable profile and deflect attention from its cultural-educational purpose, and which downplayed (before officialdom) the fact that it was a Ukrainian organization. The head office was located in Kholm, where the society owned its own building and boasted a semiprofessional theater (directed by D. Krykh), a choir, and a co-operative bookstore called Buh. Its branches operated libraries, reading rooms, amateur drama groups and choirs, co-operatives, and Ukrainian languages classes. By 1927 there were 90 branches, and by 1930 approx 125, most of them in Volodava (33), Hrubeshiv (32), Kholm (20), and Tomaszów (20) counties. The other counties in the region had two to six branches. The leading members of *Ridna Khata* were A. and P. Vasynchuk, Ya. Voitiuk, S. Liubarsky, S. Makivka, I. Pasternak, O. Rochniak, and K. Soshynsky (its permanent secretary). By the end of the 1920s members of the left faction of Sel-Rob, led by S. Makivka, gained control of the society. This development allowed the Polish authorities to dissolve the group under the pretext that it had become a communist front organization.

During its 10-year existence the *Ridna Khata* society strengthened Ukrainian national consciousness in the Kholm region and Podlachia. After the partition of Poland in 1939, the organization revived, and the number of branches quickly exceeded the 1930 figure. In 1940 the association was banned, and its branches were converted

into *Ukrainian educational societies by the authorities of the Generalgouvernement.

Ridna mova (Native Language). A popular monthly journal published in Warsaw in 1933–6 and then Zhovkva to 1939 (a total of 94 issues). Edited by I. *Ohienko, it was devoted to standardizing Ukrainian *orthography and grammar and advocated the adoption of the academic 'Kharkiv orthography' of 1927 by Ukrainians outside the USSR. It published articles on the language of contemporary Ukrainian writers, etymology, word formation, phraseology, syntax, and dialectology, and a separate book series. In response to its harsh criticism of Russification policies in Soviet Ukraine, the journal was attacked by the Kiev linguistic journal *Movoznavstvo*. *Ridna mova* was also reproached by some Western Ukrainians for its *purism.

Ridna pryroda (Native Nature). A quarterly bulletin of the State Committee for Environmental Protection of Ukraine, the Ukrainian Society of Hunters and Fishermen, and the Ukrainian Society for Nature Conservation. Published in Kiev since 1971, it contains articles on *environmental protection and ecology in Ukraine.

Ridna shkola (Native School). A monthly journal published in Jersey City, New Jersey, from January 1918 to April 1919 by the Society of Greek Catholic Preceptors-Teachers in America. It was intended to raise the educational and cultural level of Ukrainian immigrants in the United States. The editor was D. *Andreiko.

Ridna shkola (Native School). An organ of the *Ridna Shkola* society, published in Lviv. It first appeared in 1927 (six issues), and was renewed in 1932–9 as a semimonthly. It published teaching materials and articles on pedagogy and the history and current status of Ukrainian education. *Ridna shkola* was edited by M. Strutynsky, I. Herasymovych (1933–6), and M. Terletsy.

Ridna shkola (Native School). A cultural and educational magazine of the *Ukrainian Teachers' Federation of Canada, published monthly in Toronto from April 1956 to March 1960. V. Lutsiv was the managing editor. From late 1962 he briefly published a magazine of the same name in Stamford, Connecticut.

Ridna shkola (Native School). An educational journal published quarterly, then every two months, and now three times a year by the school council of the Ukrainian Congress Committee of America and the Ukrainian Teachers' Federation of Canada (1966–7). It has been published in New York since 1964. *Ridna shkola* contains articles on the council's activities, on the teaching of Ukrainian, and on pedagogy, and book reviews. The journal's editors have included E. Zharsky, P. Andriienko-Danchuk, and Ye. Fedorenko.

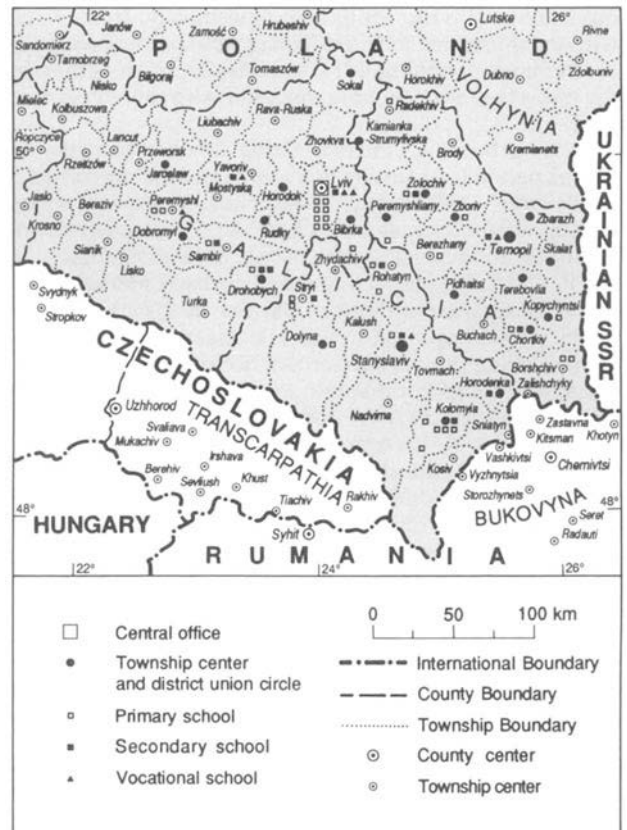

Ridna Shkola society. The popular name of the Ruthenian (later Ukrainian) Pedagogical Society (*Ruske Pedagogichne Tovarystvo*), established in Lviv in 1881 to promote Ukrainian-language education. It was active in Galicia (later in Volhynia) until the Second World War. The society was founded (as the Ruthenian Pedagogical

Members of the chief executive of the Ruthenian Pedagogical Society (later Ridna Shkola society). Sitting, from left: A. Pidliashetsky, Andrii Alyskevych, Rev Ivan Chapelsky, Konstantina Malytska, Rev Demian Lopatynsky; standing: Osyp Yaniv, Sakhryn, Mykhailo Rybachek, M. Moroz, S. Gerusynsky, M. Kots

Society) in an attempt to redress the weakness of Ukrainian educational institutions in Galicia in the late 19th century. After an initial program of petitioning the government for broader Ukrainian educational access and sensitizing the Ukrainian population at large about educational matters, the society began sponsoring its own educational ventures. It established student bursas for village youths studying at institutes of secondary education (by 1905 there were 4 bursas in Lviv and 16 in other larger centers). Its publishing house, **Biblioteka dlia Molodi*, printed children's books and popular editions of fictional and semi-academic works. Ridna Shkola also published the children's journal **Dzvoinok* (1892–1914) and school primers and textbooks. It dealt with the professional concerns of teachers before the establishment of the **Ukrainian Teachers' Mutual Aid Society* in 1905 and published the journal **Uchytel'* (1889–1914). The society did not sponsor private schools of its own until 1898, when it opened a school for girls in Lviv. A teachers' seminary for girls in Lviv (1903) with a training school attached to it (in 1907) and primary schools in villages (from 1906) followed. In purely organizational terms the group saw a steady growth, from 83 members in 1881 to 943 in 1900 and to approx 3,000, with 33 branches, in 1906.

In 1912 the group changed its formal name from the Ruthenian to the Ukrainian Pedagogical Society (UPS). It also decentralized its structure, thereby becoming a federation of largely autonomous regional pedagogical councils. In the years preceding the First World War the UPS concentrated its efforts on opening new schools (secondary schools, preparatory courses for rural youths seeking to attend a **gymnasium*, and teachers' seminaries), starting literacy courses, forming libraries, expanding the bursa network (26 were established in 1907–14), and publishing. By 1914 the society was the sponsor of 18 elementary schools, 38 preparatory courses, and 7 gymnasiums. Its membership had grown to 4,814, organized in 59 branches. Lobbying of government institutions was instrumental in increasing the number of Ukrainian public schools (by 1914 there were 2,510 elementary schools, 6 gymnasiums, and 10 bilingual secondary seminaries providing Ukrainian-language education in Galicia). Some of the outstanding figures involved with the UPS before 1918 were V. Ilnytsky, I. Chapelsky, O. Barvinsky, E. Kharkevych, O.

RIDNA SHKOLA SOCIETY

Makarushka, T. Voinarovsky, A. Vakhnianyn, H. Vretsona, R. Zaklynsky, K. Malytska, K. Pankivsky, Yu. Romanchuk, O. Stefanovych, and V. Shukhevych.

Immediately after the First World War the UPS faced an openly hostile Polish government intent on eliminating Ukrainian-language education. The number of Ukrainian-language schools in eastern Galicia had fallen to 352. In 1924 the society's circumstances improved somewhat following constitutional changes. It was even granted permission to organize in Volhynia and other Ukrainian territories annexed by Poland. In 1926 'Ridna Shkola' was formally added to the UPS name, although the group had been popularly known as such for several years. At the same time the organizational structure was tightened, with the Lviv headquarters overlooking a network of branches whose work was co-ordinated by county councils (*povitovi soiuzy*). By 1939 Ridna Shkola had 2,074 branches, with 105,000 members.

During this period Ridna Shkola became a central agency for the establishment of private Ukrainian educational institutions. By 1938 it was running 33 primary schools (6,100 students), 23 general education secondary schools (2,500 students), and 15 technical schools (1,500 students).

Ridna Shkola also sponsored educational classes for adults, concerts, and theatrical productions, as well as classes in a variety of areas (eg, Ukrainian studies, teacher upgrading, basic literacy, cooking). Local branches ran small lending libraries (653 in 1937, with a total of 72,207 books and 17,097 registered users). The organization's

publishing activity continued (specifically from 1932, with the illustrated journal **Ridna shkola* and its own publishing house), although it was considerably less than in the pre-1914 era. The organization also operated two bookstores.

Among the main figures in *Ridna Shkola* during the interwar period (in addition to a number of the pre-1914 activists) were O. Terletsky, I. Kokorudz, M. Zaiachkivsky, D. Korenets, I. Herasymovych, O. Kysilevska, M. Konovalts, O. Popovych, M. Terletsky, and L. Yasinchuk.

The *Ridna Shkola* society was liquidated following the Soviet occupation of Western Ukraine in 1939. Most of its assets were transferred to the **Ukrainian educational societies* during the 1941–4 German occupation.

Organizations comparable to (and sometimes named after) *Ridna Shkola* were formed outside of Ukraine, in Europe and in North America, to co-ordinate private part-time Ukrainian education. These groups were not formally affiliated with *Ridna Shkola*, although they provided the central organization with funds raised through donation campaigns. Some of these groups have remained active to this day.

Ridna sprava – Dums'ki visti ([Our] Native Cause – Duma News). A semiweekly organ of the **Ukrainian caucus* in the Second Russian State Duma, published from April to June 1907 (a total of 12 issues) in St Petersburg. It was officially edited by M. Khotovytsky and then S. Nechytailo, but the de facto editor was V. Domanytsky. *Ridna sprava* published reports on debates in the Duma, commented on political developments, and supported the idea of Ukrainian autonomy. Unlike **Ukrainskii vestnik*, the journal of the Ukrainian caucus in the first Duma, *Ridna sprava* was published in Ukrainian, probably in an attempt to reach a broader Ukrainian peasant audience.

Ridna tserkva (Native Church). A religious journal and the organ of the Ukrainian Autocephalous Orthodox church (UAOC) in Western Europe. It appeared bimonthly from September 1952 to 1957 and then quarterly to the end of 1988 (a total of 156 issues). It was published in Landshut (1952–70) and Neu-Ulm (1970–88), West Germany. The journal was founded and edited by Archbishop A. Dubliansky. Its contributors included Dubliansky, Metropolitan N. Abramovych, Yu. Boiko, D. Burko (D. Sviatohirsky), P. Dubytsky, S. Fostun, M. Haiuk, M. Hiltaiчук, A. Koval, F. Luhovenko, Yu. Perkhorovych, I. Vlasovsky, N. Polonska-Vasylenko, Z. Sokoliuk, and I. Stus.

Ridna tserkva published pastoral letters of the UAOC hierarchy, sermons, religious articles, and materials on church history. It featured a comprehensive chronicle of events in the life of the Ukrainian Orthodox church, in the diaspora with particular emphasis on the UAOC. It also carried reviews and bibliographies of publications on church affairs, as well as some religious poetry.

Ridna zemlia (Native Land). A weekly newspaper for 'peasants and workers' in the Distrikt Galizien of the **Generalgouvernement*, published by the German occupational authorities in Lviv from August 1941 to May 1944. The newspaper was edited by Yu. Tarnovsky with

the assistance of M. Pasika, H. Sirko-Skhidny, and B. Romanenchuk. Separate editions containing additional information about more local affairs were published for the various counties of Galicia. These appeared as *Volia Pokuttia* (1941–3), *Holos Sambirshchyny* (1942–4), *Stanyslavivs'ke slovo* (1942–4), *Ternopils'kyi holos* (1942–4), *Chortivks'ka dumka* (1943), and *Holos Pidkarpattia* (1943). As the Red Army approached Galicia in 1944, *Ridna zemlia* was published daily to inform the population about events, in a pressrun of 100,000. It was distributed free of charge throughout the countryside.

Ridne slovo (Native Word). A weekly newspaper published by members of the **Bluecoats Division* and the Ukrainian Hromada in Biała Podlaska, from June 1917 to December 1918 in Biała Podlaska and then to February 1919 in Brest. It was edited by M. Solovii and A. Savchuk. The newspaper disseminated the views of the **Union for the Liberation of Ukraine*. Its press also published some popular-educational books and pamphlets.

Ridne slovo (Native Word). The first Ukrainian newspaper in Yugoslavia, published from the spring of 1933 to 1941 by Rev M. Firak, the Greek Catholic curate in Piškorevci and then Ruski Krstur, in the Bačka region of Serbia. He was assisted by Revs F. Didovych and Zh. Slyzh. The paper was printed in Djakovo (1933–4), Osijek (1934–6), Derventa (1936–7), and Ruski Krstur (1937–41). It appeared, in literary Ukrainian, monthly until August 1935, then semimonthly until the first issue in 1940, and thenceforth three times a month. The paper published news and information about Ukraine, Yugoslavia, its Ukrainian community, and the world, as well as popular articles on Ukrainian history, culture, and education. Its press also issued annual calendar-almanacs and popular-educational literature.

Last meeting of the editorial board of *Ridnyi krai* (Poltava, 1907). Sitting, from left: Hryhorii Kovalenko, Panas Myrny, Lesia Ukrainka, Olena Pchilka, Mykola Dmytriiev; standing: Leonyd Pakharevsky and Hryhorii Sherstiuk

Ridnyi krai (Native Land). The second Ukrainian-language newspaper established in Russian-ruled Ukraine. The initiator and first editor was M. **Dmytriiev*, and the first publisher was H. Markevych. It was published weekly in Poltava from 6 January 1906 until May 1907, when it

was closed down by the tsarist authorities because of Dmytriiev's political activity. It was renewed in October in Kiev by O. *Pchilka, who published it there weekly, three times a week from 1910 and then irregularly from 1913 until it was closed down again during the general crackdown against the Ukrainian press after the outbreak of the First World War. It was renewed again in Hadiache in 1915–16 by Pchilka, who circumvented the laws prohibiting publication in Ukrainian by printing the paper in the *yaryzhka alphabet. *Ridnyi krai* covered political, economic, and cultural developments and published prose, poetry, and articles on farming, the co-operative movement, history, literature, ethnography, and education. The children's magazine **Moloda Ukraina* was published as a monthly supplement to *Ridnyi krai*.

Ridnyi krai (Native Land). A daily newspaper published in Lviv in 1920–3 as the organ of the Ukrainian Agrarian Union and then the *Ukrainian Agrarian party. It was funded by the Polish regime and espoused active co-operation with it, thereby earning it great enmity in Ukrainian nationalist circles. The newspaper was founded and edited by S. *Tverdokhlib. After his assassination in 1922 it was edited by M. *Yatskiv. The paper's general line was continued by *Pravo narodu* (1923), the weekly organ of the Ukrainian People's party (Ilkiv faction), published in Kolomyia.

Ridnyi krai (Native Land). A weekly newspaper published in Chernivtsi in 1926–30 (a total of 201 issues). Edited by L. Kohut, it supported the Ukrainian National party in Rumania and promoted the Silskiy Hospodar society. Among the contributors were Yu. Serbyniuk, I. Stryisky, H. Skehar, V. Simenovych, S. Smal-Stotsky, M. Korduba, and S. Siropolko. In 1930 the paper merged with **Chas*.

Rieger, Janusz, b 20 September 1934 in Cracow. Polish linguist. Rieger studied at the Jagellonian University in Cracow (MA, 1955) and at the Polish Academy of Sciences (PH D, 1967). He has taught at various universities in Poland and since 1988 has been a professor at the Catholic University in Lublin. Rieger's specialization is Slavic (esp Ukrainian) dialectology, and he has worked in the areas of Slavic onomastics and Polish-Ukrainian linguistic relations. He is the author and coauthor of 15 books and numerous articles; among them the linguistic atlas of the Boiko dialects (vols 1–6, 1980–6), which he edited and compiled, is of special importance to Ukrainian linguistics.

Riezanov, Volodymyr [Rjezanov] (Rezanov, Vladimir), b 9 September 1867 in Liubache, Oboian county, Kursk gubernia, d 31 December 1936 in Nizhen, Chernihiv oblast. Literary scholar; corresponding member of the Academy of Sciences of the USSR from 1923; VUAN associate. He graduated from the Bezborodko Historical-Philological Institute (1890, see *Nizhen Lyceum), where he taught from 1899 and became a professor in 1910. In 1934 he was purged from his position. Riezanov wrote 70 works on the history of Ukrainian, Russian, and world literature. His studies on the history of Jesuit religious drama and the Ukrainian school drama that arose on its foundation are based on extensive use of primary sources. They include books on the history of Russian drama (1907), an accompanying volume of texts of 17th- and

18th-century school plays (1910), and books on 17th- and 18th-century school plays and Jesuit theater (1910), on Jesuit theater (1910), and on school dramas in Polish-Lithuanian colleges (1916). His *Drama ukrains'ka: Starovynnyi teatr ukrains'kyi* (Ukrainian Drama: Old Ukrainian Theater, vols 1, 3–6, 1926–9) is a fundamental scholarly work and collection of primary sources on the subject. He also wrote *Do istorii literaturnykh styliv: Poetyka renesansu na tereni Ukraïny i Rosii* (Toward a History of Literary Styles: Renaissance Poetics in the Territory of Ukraine and Russia, 1931).

R. Senkus

Riezyk, Borys [Rjezyk], b 5 January 1929 in Kholodna Balka, Odessa okruha. Pediatrician. A graduate of the Odessa Medical Institute (1950), he worked at the Donetske Medical Institute (1956–72, as professor from 1966) and chaired the Department of Faculty and Hospital Pediatrics at the Odessa Medical Institute. He has published numerous papers on juvenile hematology, infectious diseases, and meningitis, the use of pharmacotherapy and electrocardiography in pediatrics, and the influence of vaccines on children's health.

Riezykov, Oleksandr [Rjezykov], b 12 November 1939 in Odessa. Endocrinologist and pathophysiologicalist. A graduate of the Odessa Medical Institute (1962), in 1965 he began to work in the pathophysiological laboratory of the Kiev Scientific Research Institute of Endocrinology and Metabolism. In 1973 he became director of the institute's Laboratory for the Neurohormonal Regulation of Reproduction. His chief publications deal with the physiology, biochemistry, and pathology of adrenal and sexual glands, the neuroendocrine regulation of reproduction and sexual development, and the application of new diagnostic and therapeutic methods in public health and animal husbandry.

Riga. The capital (1989 pop 915,000) of Latvia and one of the main ports of the Baltic Sea. The Ukrainian community in Riga dates from the 19th century. After Latvia won its independence in 1918, the UNR maintained an embassy (headed by V. Kedrovsky) in Riga, and the Western Ukrainian National Republic sent a delegation under K. Levytsky there. In October 1920 Poland signed a peace agreement in Riga with Soviet Russia and Ukraine, and then the Peace Treaty of Riga, on 18 March 1921. In 1933 the Latvian-Ukrainian Society was founded. In the 1970s approx 25,300 residents of Riga were of Ukrainian origin. Of these, 12,000 gave Ukrainian as their mother tongue. (See also *Latvia.)

Riga, Peace Treaty of. A convention, signed on 18 March 1921, between the Polish government and the governments of the Russian Socialist Federal Soviet Republic (RSFSR) and the Ukrainian Socialist Soviet Republic, ending the Polish-Soviet War of 1919–20. The peace negotiations commenced on 17 August 1920 in Minsk, and from 21 September 1920 they were conducted in Riga. The Polish delegation was headed by J. Dąbski; the Russian, by K. Danishevsky (Minsk) and A. Joffe (Riga); and the Ukrainian, by D. Manuilsky, E. Kviring, and Yu. Kotsiubynsky. The delegations of the Ukrainian National Republic, headed by A. Livytsky, and the Western Ukrainian National Republic, headed by K. Levytsky, were not admitted to

the negotiations: Ukraine had, in effect, already been divided in principle between the emerging Soviet state (the Ukrainian SSR) and Poland (eastern Galicia).

On 12 October 1920 both sides signed the preliminary treaty, and on 2 November 1920 they exchanged preliminary documents. Nonetheless the Polish armies remained on the territories to the east of the provisionally delineated Polish-Soviet frontier, where they were protecting the UNR troops of S. Petliura, which were engaged in combat against the Bolsheviks in the regions of Berdychiv, Zhytomyr, Mohyliv, and Kamianets-Podilskyi. Not until 14 November 1920 was a protocol that compelled the Polish side to withdraw its armed forces signed. The final editing of the text of the treaty lasted from mid-November 1920 until the beginning of March 1921.

The Riga treaty is composed of 26 articles. In Article 2 both sides recognized the independence of Ukraine and Belarus (in accordance with the principle of the self-determination of nations) and established the line of frontiers. The Poles received a considerable piece of territory east of the *Curzon Line, which had been designated earlier by the Allies as the border between Poland and Ukraine. In the subsequent articles both sides bound themselves to recognize the other's sovereignty and to refrain from spreading hostile propaganda and from harboring in their territories organizations which would pursue activities directed against the other party (Article 5). The Poles in Russia and Ukraine and the Ukrainians and Russians in Poland received a guarantee of their cultural, linguistic and religious rights (Article 7). Furthermore the Riga Treaty regulated the questions of citizenship, war reparations (from which both sides resigned), the repatriation of the population, the principles of the transit of commodities, and the relocation of state, self-government, and private property.

In Article 11 Soviet Russia bound itself to return to Poland all art collections, archives, and libraries that had been removed from Poland after 1772, as well as (Article 13) to pay 30 million rubles in gold as Poland's share of the assets of the former Russian Empire. Finally, the treaty foresaw (Article 24) the establishment of diplomatic relations.

The treaty was ratified by the Polish Sejm on 15 April 1921 and by the Russian and Ukrainian soviets on 14 and 17 April, and the ratification documents were exchanged in Minsk on 3 May. It remained valid until 17 September 1939, when the Red Army occupied Western Belarus and Western Ukraine.

Rigelman, Aleksandr [Rigel'man], b 1720 in St Petersburg, d 3 November 1789 in Andriivka, Chernihiv region. Historian, military engineer, and topographer; descendant of a German aristocratic family that settled in Russia in the 1730s. He studied at the Cadet Corps in St Petersburg (1738) and was stationed in Zaporizhia (1741-3) to work on the demarcation of the Russian-Turkish border.

Then he drew plans for Ukrainian cities (1745-8) and built fortified lines extending through Southern Ukraine, along the Azov Sea coast, and around the periphery of Kiev (1747-9). In the 1750s and 1760s he worked in the Don region, where he built the St Dimitrii Fortress (now Rostov-na-Donu). After his retirement in 1782, he settled on his Ukrainian wife's (née Lyzohub) estate, where he died.

Rigelman produced a number of historical studies, focusing mainly on Ukraine and the Don region, most of which were published in the 19th century. They included *Istoriia ili povestvovanie o Donskikh kazakakh* (The History or Account of the Don Cossacks; written in 1778, pub in 1846) and *Letopisnoe povestvovanie o Maloi Rossii i ee narode i kazakakh voobshche* (A Chronicle Account of Little Russia and Its People and the Cossacks in General; written in 4 pts in 1785-6, pub by O. Bodiansky in *Cheniia Moskovskogo obshchestva istorii i drevnostei*, nos 5-9 [1847], and separately). He also wrote a five-part supplement to the chronicle that included a description of the life and customs of the Zaporozhian Cossacks and an ethnographic description of the Ukrainian people, with 28 drawings by T. Kalynsky of Ukrainian types in traditional costumes.

O. Ohloblyn

Rigelman, Nikolai [Rigel'man], b 1817 in Chernihiv gubernia, d 2 June 1888. Historian, publicist, and Slavophile civic leader; grandson of A. *Rigelman. He headed the Kiev Slavic Benevolent Society, supported Russophile societies in Lviv, and worked closely with the *Cyril and Methodius Brotherhood (to the point where he himself was questioned during the inquiry). He became acquainted with T. *Shevchenko in 1840 and came to aid him financially in 1857. He was a director of elementary schools in Kiev gubernia and a member of the Kiev Archeographic Commission; together with I. Samchevsky he edited the chronicle of S. Velychko, which was published by the commission (vols 1-4, 1848-64). Rigelman wrote many publicistic works on Slavic and *Slavophile issues of his time. He approached the Ukrainian issue from the viewpoint of conservative Slavophilism. Having access to government archives, Rigelman wrote about Shevchenko's testimony in the Cyril and Methodius Brotherhood trial ('Dopros T.G. Shevchenka v 1847 g.' [The Interrogation of T. Shevchenko in 1847], *Kievskaia starina*, 1902, no. 2).

Right of national self-determination. See Self-determination.

Right Opposition. A faction that emerged in the All-Union Communist Party (Bolshevik) in the mid-1920s under the leadership of N. Bukharin, M. Tomsky, and A. Rykov. It supported the *New Economic Policy, lower taxes for the peasantry, and other 'liberal' policies. It opposed the *Left Opposition headed by L. Trotsky, which called for rapid industrialization and collectivization. Unlike the Left Opposition, the Right Opposition was a relatively loose and small group. It seems to have had few followers

among the CP(B)U leadership, who supported J. Stalin's plans for rapid, large-scale industrialization. Nonetheless, after the defeat of the Right Opposition a major Party and government purge was launched in Ukraine. Besides Party members many workers of the agricultural commissariat, the Ukrainian Peasant Bank, and the co-operative movement were dismissed and arrested. This purge paved the way for the severe collectivization drive and ultimately for the man-made famine of 1932-3.

Right-Bank Ukraine (Pravoberezhna Ukraina, Pravoberezhzhia). A historical, geographic, and administrative region consisting of the Ukrainian lands west of the Dnieper River, south of the Prypiat marshes, north of the steppes, and east of the upper Boh and the Sluch rivers. The Right-Bank Cossack administration included five core regiments (Chyhyryn, Cherkasy, Korsun, Kaniv, Bila Tserkva) and four frontier regiments (Uman, Bratslav, Kalnyk-Vinnytsia, Pavloch). Under Polish control the region formed the voivodeships of Kiev (without the city and its environs) and Bratslav as well as portions of Volhynia and Podolia. Under imperial Russian rule in the early 19th century, the Right Bank was renamed the *South-western land. Right-Bank Ukraine today encompasses the oblasts of Vinnytsia, Zhytomyr, northern Kirovohrad, and (west of the Dnieper) Kiev and Cherkasy.

Right-Bank Ukraine developed under the Cossacks as an important political, cultural, and economic region. Fol-

lowing the death of Hetman B. *Khmelnytsky in 1657, it was devastated and depopulated during the *Ruin as a result of prolonged fighting among the Cossacks, Poland, Muscovy, and Turkey. The destruction was aggravated by the instability of the Cossack structure itself, which was split in 1660 when the Left-Bank regiments rejected the leadership of Yu. Khmelnytsky and elected their own hetman (Ya. Somko). Their action initiated the political division of Ukraine into Left and Right Banks, which acquired significance in international affairs with the Polish-Muscovite Treaty of *Andrusovo, by which Muscovy and Poland ratified their respective spheres of influence along the Dnieper River: Muscovy received *Left-Bank Ukraine plus Kiev with its environs, and Poland received Right-Bank Ukraine.

The treaty ended the pro-Polish orientation of successive Right-Bank Cossack leaders and initiated nearly a half-century of chaos in the Right Bank. Hetman P. *Doroshenko rejected both Muscovite and Polish interference and unified both banks (1668) under his leadership. His achievement, however, was short-lived, and he was forced to return to the Right Bank, at which time Muscovy restored its influence in the Left Bank. Doroshenko then turned to Turkey for assistance (the result being the Peace Treaty of *Buchach) and embroiled the region in a succession of maneuvers for control. In 1676 the Left-Bank hetman I. *Samoilovych defeated Doroshenko and briefly united both banks under his hetmanship. Pressed by

RIGHT-BANK UKRAINE IN THE 17TH AND 18TH CENTURIES

Turkish forces, Samoilovych attempted in 1678 to remove the Right-Bank population to Left-Bank and Slobidska Ukraine. The Treaty of *Bakhchesarai (1681) delineated the Dnieper River as the boundary between the Ottoman and Muscovite empires, with the southern Right Bank a vacant neutral zone. The *Eternal Peace Treaty between Muscovy and Poland (1686) confirmed the previous Treaty of Andrusovo, whereby Poland retained the Right Bank. Ukraine was now completely partitioned among its three neighbors.

In 1685, as protection against Tatar raids, the Polish king Jan III Sobieski established Cossack regiments in Bratslav, Bohuslav, Korsun, and Khvastiv, but under a royally appointed hetman and officers. Some Cossacks also served as mercenaries in the magnates' armies.

By the terms of the Treaty of Carlowitz (1699) Poland regained control of the Right Bank from Turkey. That year the Cossack administration was formally abolished in the Right Bank, but a Cossack uprising in 1700–3, led by Col S. *Palii, briefly overthrew Polish rule in the Right Bank; the Left-Bank hetman I. Mazepa took advantage of the confusion to unite both banks under his rule. By the Treaty of Prut (1711), however, Right-Bank Ukraine was returned to Poland. The Cossacks were then completely suppressed.

Because continual warfare had destroyed the towns and villages and depopulated the Right Bank, the Polish and Polonized Ukrainian magnates upon their return offered incentives to the peasantry of northwestern Ukraine, especially Volhynia, to resettle the Right Bank. Peasants were promised 15 to 20 years of exemptions from corvée and other obligations. When the concessions ended, and the obligations of serfdom were imposed, spontaneous anti-Polish peasant *haidamaka uprisings swept the Right Bank, in 1734, 1750, and 1768 (see also *Koliivshchyna).

By the Third Partition of Poland (1795) Right-Bank Ukraine was annexed by the Russian Empire. That territorial acquisition brought a substantial number of Jews into the imperial realm for the first time; the Russian authorities responded by establishing the *Pale of Settlement, which restricted Jewish settlement to the Right-Bank regions and other areas removed from the heartland of the empire.

Several distinctive features and structures of Right-Bank Ukraine persisted until the Revolution of 1917. One was the extensive influence of the Right-Bank *Poles in Ukraine. As well, vast tracts of land in the region were worked as large estates known as latifundia. The latifundia system hampered the growth of towns and a Ukrainian urban middle class. Towns were populated predominantly by Jewish merchants and artisans.

In the early 19th century the tsarist administration allowed a Polish school system to function in the Right Bank, under the supervision of the University of Vilnius. The school system included an institution of higher education, *Kremianets Lyceum. After the Right-Bank gentry took part in the *Polish Insurrection of 1830–1, however, the tsarist authorities abolished the Polish educational system in the Right Bank. Some representatives of the Polish gentry in the early 19th century contributed to the development of the nascent Ukrainian movement in the Right Bank by writing literature on Ukrainian themes (see *Ukrainian school in Polish literature) and conducting ethnographic research on the Ukrainian peasantry.

On the eve of the *Polish Insurrection of 1863–4, some

students from the Polonized Ukrainian gentry, including V. *Antonovych, broke with Polish society and returned to their Ukrainian roots. Known as the **khlopomany* (lovers of the peasantry), they contributed much to the development of the Ukrainian national awakening in the Right Bank.

A. Beniuk

Rii (Swarm). A Transcarpathian organization of beekeepers, founded in 1924 in Uzhhorod to promote modern beekeeping. It organized a commercial apiary, beekeeping courses, and exhibitions and published the journal *Pidkarpats'ke pcholiarstvo* (1923–5). The association was active until 1930.

Rii Provincial Beekeeper's Alliance (Kraiove pasichnytske obiednannia Rii). A co-operative organization of beekeepers, established in Lviv in 1926 by Ye. Arkhypenko. It represented beekeepers throughout Western Ukraine, encouraged the use of modern equipment and hives, and provided inexpensive sugar for the bees. Rii also organized the sale of honey produced by its members. Its workshop built hives, and the organization maintained model apiaries near Lviv and in Perehinsko, in Gorgany. It also operated stores in Lviv and Łódź. From 1928 it was assisted by the Silskyi Hospodar society. In 1938 its membership was 1,370, and its honey revenue was 60,800 zlotys. Rii was closed during the first Soviet occupation in 1939–40, but renewed its activities under the German occupation of Galicia (1941–4). During the war it also operated in the Kholm region. Rii was directed by M. *Borovsky (1928–37) and R. *Holod (1937–9); other leaders included A. Adamchuk and S. Yatsura. Its monthly organ was the journal **Ukrains'kyi pasichnyk*.

Rika River (also Velyka Rika). A right-bank tributary of the Tysa River that flows for 92 km through Transcarpathia oblast and drains a basin area of 1,130 sq km. Formed by the confluence of the Pryslip and the Torunka rivers, the Rika has a deep valley in its upper reaches. A hydroelectric station is situated on the river near the city of Khust. The river is also used for industry and water supply.

Rikhter, Anatolii [Rixter, Anatolij], b 24 March 1930 in Beltsi, Bessarabia, Rumania. Ukrainian opera singer (bass). After graduating from the Kiev Conservatory in 1960, he joined the Odessa Opera and Ballet Theater as a soloist. He appeared as Karas in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, Taras in M. Lysenko's *Taras Bulba*, Boris in M. Mussorgsky's *Boris Godunov*, and the General in H. Maiboroda's *Arsenal*.

Rilke, Rainer Maria, b 4 December 1875 in Prague, d 29 December 1926 in Val-Mont, Switzerland. Austro-German poet, acclaimed especially for his collections *Duineser Elegien* (1923) and *Die Sonette an Orpheus* (1923). His poetry, characterized by a subtle and dense symbolism and by its profoundly philosophical reflection on self and world, influenced the development of literary modernism, not least in Ukraine.

Rilke's journeys to the Russian Empire in the spring of 1899 and summer of 1900 were an early and formative experience. The second took him south from Moscow to Ukraine, where he visited Kiev, Kaniv (T. Shevchenko's grave on Chernecha hill), and Poltava. Rilke is known to

have been interested at the time in the early, thematically Ukrainian stories of N. Gogol, and to have acquired a copy of Shevchenko's *Kobzar* in Russian translation. He did not, however, clearly distinguish between Russia and Ukraine, and his responses to what he saw in Russia and Ukraine were strongly influenced by the turn-of-the-century myth of the simple and god-seeking 'Russian soul.'

Thematic echoes of the Ukrainian journey can be found in 'Das Buch von der Pilgerschaft,' which forms the second part of *Das Stunden-Buch* (1905); in 'Karl der Zwölfte von Schweden reitet in der Ukraine' and 'Sturm,' both in *Buch der Bilder* (1902); and in two prose works from *Geschichten vom lieben Gott* (1900), 'Wie der alte Timofei singend starb' and 'Das Lied von der Gerechtigkeit.' Rilke also translated the medieval epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1902-4).

A selection of Rilke's poems was translated into Ukrainian by B. Kravtsiv: *Rechi i obrazy* (Objects and Images, 1947). Other translators have included M. Zerov, M. Yohansen, O. Lutsky, Yu. Lypa, Yu. Klen, L. Mosendz, M. Orest, M. Bazhan, L. Pervomaisky, O. Zuievsky, and V. Stus.

Rillia (Ploughed Field). A semimonthly newspaper for peasants published in Kiev from 1910 until it was closed down in the tsarist campaign against the Ukrainian press that followed the outbreak of the First World War. It was renewed as a co-operative organ by the Ukrainskyi Agronom society in October 1917 and published until sometime in 1918. The newspaper offered practical advice on farming and the co-operative management of agriculture. The editors were A. Avramenko (1910-14), A. Ternychenko (1913-14), and I. Prykhozhenko and K. Osmak (1917-18). In 1914 *Rillia* had 2,000 subscribers.

Internees of the Rimini POW camp during the blessing of their flag

Rimini. A city (1971 pop 121,000) on the Adriatic coast in northern Italy, and the site of British POW camps at the end of the Second World War. About 10,000 soldiers of the *Division Galizien, who surrendered to the British in Austria in May 1945, were interned first in Camp No. 5C at

Bellaria (June-October 1945) and then in Camp No. 1B at Miramare (October 1945 to June 1947). The Soviet repatriation mission persuaded about 900 (8.5 percent) of the prisoners to return home. The camps were placed under the command of Col M. Krat (June-August 1945), Maj S. Yaskevych (August-February 1946 and May 1946 to May 1947), and Lt Col R. Dolynsky (February-May 1946) and their staffs. The soldiers were divided into eight regiments and a special unit consisting of staff workers, a sanitary company, and the military police. Of 9,310 prisoners in May 1946, 288 were officers; 822, junior officers; and 8,200, soldiers. A high standard of discipline and morale was maintained in the camp throughout its existence.

Four Ukrainian Catholic chaplains (Revs E. Korduba, O. Babii, O. Markevych, and M. Ratushynsky) and one Orthodox chaplain (Rev Y. Skakalsky) served the religious needs of the internees. Health care was provided by a staff of 16 physicians under the supervision of Drs B. Dziubanovsky, B. Rozdilsky, L. Miroshnychenko, and, finally, R. Turko. The cultural and educational department under V. Malets, Yu. Kruk-Drozdovsky, B. Pidhainy, and, finally, Ya. Lytvyn oversaw a rich cultural program, consisting of concerts by the Burlaka (conductor S. Humnilovych) and Slavuta (conductor Ya. Havryliak) choirs and the Bandura camp orchestra (conductor O. Holovatsky), film shows, cabarets, and plays in the camp theater. Its school section, headed by Capt O. Vynnytsky and then Lt Ya. Kulytsky, ran elementary and secondary courses, a commercial and pedagogical college, and a one-year technical, farming, and forestry program. The camp press included a daily bulletin, *Zhyttia v tabori*; a weekly paper, *Bat'kivshchyna*; a biweekly paper, *Iunats'kyi zryv*; a satirical biweekly, *Osa*; a sports paper, *Na starti*; and the literary and art journals *Nash shliakh* and *Hrono*. An art circle, a literary club, and Prosvita reading rooms were also active.

The camps were visited by Ukrainian leaders from the United States and Canada, including V. Kushnir, V. Galan, and A. Hlynka. The Ukrainian Relief Committee in Rome, headed by Bishop I. Buchko, was particularly active in helping the internees. In 1947 the internees were transported to England, where they were later released.

Rimsky-Korsakov, Nikolai [Rimskij-Korsakov, Nikolaj], b 18 March 1844 in Tikhvin, d 21 June 1908 near Luga, Russia. Russian composer and conductor. He wrote two operas on Ukrainian subjects based on tales by N. Gogol, *May Night* (1878) and *Christmas Eve* (1894-5), and composed the opera *Tale of Tsar Saltan* (1899-1900), based on Pushkin's tale about fictitious personages from Ukraine's medieval period. His other works include a *Ukrainian Fantasia* for orchestra, arrangements of ancient chants of the Kievan Cave Monastery for male choir a cappella, and *Song about Oleh the Fated* for male chorus, soloists, and orchestra (1899), based on Pushkin's poem about the Kievan Rus' ruler.

Rio Grande do Sul. The most southerly state of Brazil (1990 pop 9,163,200), bordering on Santa Catrina to the north and Uruguay to the south, with an area of 280,674 sq km. Its climate is subtropical. Its capital is Porto Alegre. The fourth-largest Ukrainian community of Brazil (est

pop, near 10,000) lives in the state. The first wave of settlement, consisting of approx 200 families, arrived from Galicia in 1895–9. A second influx occurred after 1907, when immigrants who had worked on the São-Paulo–Rio Grande Railway settled in places such as Guarni, Campinas, Iguí, Jaguari, and Erechim. After the Second World War more Ukrainians settled in the state, particularly its capital. The isolation of the state from the heartland of Ukrainian life in Brazil has resulted in a slow and somewhat truncated development of church and community structures. (See *Brazil.)

Ripai, Andrii [Ripaj, Andrij], b 1829 in Ulych-Kryve, Uzhok county, Transcarpathia, d 1914. Pedagogue. He taught at and for a period of time was director of the teachers' seminary in Uzhhorod. He edited the first Transcarpathian pedagogical journal, **Uchytel'* (Uzhhorod 1867), and was the author of a booklet on farming and cattle breeding (1864) for peasants.

Ripetsky, Myroslav [Ripeč'kyj], b 13 June 1889 in Sambir, Galicia, d 29 April 1974 in Chrzanowo, Suwałki voivodeship, Poland. Ukrainian Catholic priest, community figure, and writer. He was made canon (1927) and dean (1939) by Bishop Y. Kotsylovsky. In June 1947 Ripetsky was deported with many other residents of Lisky, Sokal county, to northeastern Poland. There he organized a chapel (in Chrzanowo) and was for many years the only Ukrainian Catholic pastor in Warmia diocese. He contributed many articles to *Nova zoria*, *Pravda*, and *Ukrains'kyi beskyd*, and wrote 38 brochures, mostly on topics in Ukrainian church, secular, and cultural history. He was mitred by Cardinal Y. Slipy in 1966.

Nestor Ripetsky

Stepan Ripetsky

Ripetsky, Nestor [Ripeč'kyj] (pseud: Bohdar Zharsky, Vsevolod Lystvykh), b 19 April 1919 in Sokal, Galicia, d 19 March 1974 in Toronto. Writer and journalist. In Galicia he contributed to the daily *Dilo* and other papers and was an editor of the journals *Svit pered namy* (1934) and *Na hrani* (1935), the weekly *Stanyslavivs'ki visti* (1936), and the Sokal daily *Ukrains'ki visti* (1941). A postwar refugee, he lived from 1948 in Winnipeg and from 1950 in Toronto. He directed a Ukrainian radio program in Winnipeg; in Toronto he was an editor of the literary and art monthly *Pace* (1954–6) and later headed the Ukrainian Journalists' Association of Canada and the World Federation of Ukrainian

Journalists. He wrote the poetry collections *Kucheriavi dni* (Billowy Days, 1936), *Shliakh pilyhryma* (The Pilgrim's Road, 1937), *Tryvoha* (Trepidation, 1939), and *Povorot* (The Return, 1941); a collection of renderings of Japanese poetry, *Pisni dalekykh ostroviv* (Songs of Distant Islands, 1940); the plays *Ukraina v krovi* (Ukraine in Blood, 1938) and *Halilia* (1947); the publicistic books *Dumky na vitri* (Thoughts in the Wind, 1941) and *Khvyli shukaiut' berehiv* (Waves Seeking Shores, 1954); the story collections *Troiandy v krovi* (Roses in Blood, 1946) and *R 33* (1967); and the novelette *Sontse skhodyt' iz zakhodu* (*Istoriia maizhe pravdyva*) (The Sun Rises in the West [An Almost True Story], 1954).

Ripetsky, Stepan [Ripeč'kyj], b 22 December 1894 in Sambir, Galicia, d 2 October 1986 in Ridgewood, New Jersey. Civic and political figure and publicist; son of T. *Ripetsky. He completed law studies in Lviv and Prague and served as an officer in the Ukrainian Sich Riflemen during the First World War. Later he was head of the Ukrainian Academic Hromada (1921), a lecturer in sociology at the Ukrainian Pedagogical Institute in Prague, and a member of the Foreign Delegation of the Ukrainian Party of Socialist Revolutionaries. In 1926 he returned to Galicia, where he was an executive member of the Ukrainian Socialist Radical party until 1939. He was arrested and interned by the Germans in 1943, and in postwar Germany he served as an executive member of the Ukrainian Socialist party and a representative member of the Ukrainian National Rada. After moving to the United States in 1949, he edited the journal *Vil'na Ukraina* and wrote and edited several books concerning the struggle for statehood in Western Ukraine, including *Za voliu Ukraïny* (For the Freedom of Ukraine, 1967).

Ripetsky, Teodor [Ripeč'kyj], b 1861, d 1901. Priest and community activist. He was the initiator of the *Ryznytsia church goods trade association and established a shelter for the widows and orphans of priests in Sambir. Among his works on historical and religious topics were *Illustrovannaia narodnaia istoriia Rusi* (The Illustrated Popular History of Rus', 1890) and *Vybrani zhyttia sviatykh* (A Selection of Saints' Lives, 1890).

Ripetsky, Vsevolod [Ripeč'kyj], b 1884 in Sambir, Galicia, d July 1919 near Solotvyna, Nadvirna county, Galicia. Student and political activist; son of T. *Ripetsky. He attended the gymnasium in Sambir and studied law in Lviv. A member of the Ukrainian Social Democratic party, he was politically active in the Sambir and Drohobych regions and was an advocate of electoral reforms in 1907. In 1918–19 he served as county commissioner of Turka county (for the Western Province of the UNR). He was executed without a trial by Polish soldiers (along with M. *Martynets, I. Siletsky, and Siletsky's son, Stepan, and son-in-law, V. Padokh).

Ripko, Oleksii, b 25 December 1907 in Okhtyrka, Kharkiv gubernia, d 7 March 1983 in Lviv. Theater director. He began working in theaters in 1929, and in 1934 he completed the stage direction course at the Kharkiv Music and Drama Institute (pupil of B. Tiahno). In 1935–55 he worked in Ukrainian theaters in Kharkiv, Sumy, Ternopil, and Okhtyrka. In 1956–83 he was a director in the Lviv Ukrainian Drama Theater. He staged approx 150 plays in all.

Ripky. II-12. A town smt (1986 pop 6,700) and raion center in Chernihiv oblast. It is first mentioned in historical documents in 1607. Its inhabitants took part in B. Khmelnytsky's uprising in 1648 and then belonged to Chernihiv regiment in the Hetman state. Under Russian rule the town belonged to Chernihiv vicegerency (1782–95), Little Russia gubernia (1796–1802), and Chernihiv gubernia (1802–1925). In the second half of the 17th century its iron-ore deposits began to be mined, and in the 18th century a ceramics industry began to develop there. Today Ripky has a woodworking and a building-materials industry.

Ripniv settlements. Three Slavic settlements of the 3rd to 11th century located near Ripniv, Buzke raion, Lviv oblast. Intermittent excavations during 1954–64 uncovered the remains of semi-pit and surface dwellings (commonly with clay ovens), hand built and wheel thrown pottery, three blacksmith furnaces, kilns, and iron, bronze, bone, and glass objects. The walls of a number of dwellings from the 6th to 7th centuries were faced with wood.

Rishko, Mykola [Riško], b 1907 in Drahove, near Khust, Transcarpathia, d ? Writer. He began publishing poetry in the Transcarpathian dialect in the 1920s in Prešov. A post-war Soviet citizen, he is the author of the poetry collections *Hirs'ki vetry* (Mountain Bonfires, 1936), *Zahrally struny* (The Strings Began Playing, 1960), *Rozмова z matir'iu* (A Talk with Mother, 1973), and *Povernennia* (The Return, 1980) and the prose collections *Vtecha z temriavoy* (Flight from Darkness, 1964) and *Krasa virnosti* (The Beauty of Loyalty, 1983).

Ritter, Pavlo, b 5 April 1872 in Chutove, Poltava county, d 17 April 1939. Literary scholar, linguist-Sanskritologist, and translator. He graduated from Kharkiv University (1894), where he taught from 1897, became a professor in 1921, and became head of the chair of linguistics in 1922. One of the founders of the *All-Ukrainian Learned Association of Oriental Studies and its organ *Skhidnyi svit*, he contributed many entries on Indian literature to the Russian prerevolutionary Granat encyclopedia, translated numerous Sanskrit literary works into Russian, and translated works by Kalidasa and R. Tagore and Vedic hymns into Ukrainian. After being arrested during the Stalinist terror in 1938, he went mad and died in prison. A collection of biographical and bibliographic materials about him was published in 1966.

Ritter von Rittersberg, Ludwig (Ritter z Rittersberku, Ludvík), b 19 November 1809 in Prague, d 6 June 1858 in Vršovice, Bohemia. Czech writer, journalist, and composer. He studied music in Lviv. Among his writings are descriptions of Galicia and tales about the Hutsuls. In his *Gedanken über slavischen Gesang* (1843) and elsewhere he wrote that Podilia was the cradle of the Slavic song and that the *kolomyika* was the prototype.

Rittikh, Aleksandr [Rittix], b 1831, d ? Russian cartographer, ethnographer, and statistician. After graduating from the Nikolai Engineering Academy and the General Staff Academy in St Petersburg, Rittikh served as a career officer in the Russian army (1862–94). He prepared the first detailed ethnographic maps and statistical tables of the territories in the Russian Empire. Some of them, in-

cluding the maps of the Slavic peoples (1874), European Russia (1875), the Russian state (1878), Kharkiv gubernia (1879), and the Slavic world (1885), contained information on the national composition of Ukraine.

Ritual songs (*obriadovi pisni*). Folk songs that accompanied important changes in a person's life and the seasonal cycles in farming. Calendric ritual songs include *carols or *koliadky* and *shchedrivky* (on Christmas and Epiphany), Shrovetide songs, **vesnianky-hahilky* and *ryndzivky* (on Easter), **rusalka* and *tsarynni* songs (on the Rosalia), St Peter's day songs, haymowers' and rakers' songs, Kupalo songs, *harvest songs, **vechernytsi* songs, and songs to St Nicholas. The ritual songs of family life include christening songs, *wedding songs, and funeral hymns and *laments. At one time ritual songs were believed to possess magical powers: they could ensure a bountiful harvest and the well-being of the persons mentioned in them. Eventually they lost their magical meaning and were regarded simply as entertaining or expressive. All ritual songs contain some ancient pagan elements mixed with more recent, mostly Christian, elements. The majority of them are tied to ritual acts, games, dances, and customs.

After the Bolshevik Revolution attempts were made to integrate ritual songs with newly created civic celebrations and rituals. There were also attempts to create artificial new songs praising 'the happy Soviet life' and thanking the Party, V. Lenin, or J. Stalin for it. These songs did not catch on and did not become part of daily life. In the last few years there has been a marked revival of traditional rituals and songs, particularly of carols and wedding songs.

Ukrainian ritual songs have been collected and studied by J. Lasycki, H. Kalynovsky, P. Chubynsky, Ya. Holovatsky, I. Franko, V. Hnatiuk, O. Potebnia, M. Hrushevsky, V. Petrov, K. Koperzhynsky, F. Kolessa, K. Kvitka, Z. Kuzelia, O. Dei, V. Hoshovsky, and O. Zilynsky.

Riuryk [Rjuryk] (Rurik, Riurik), b ? , d 879 in Novgorod, in northern Rus'. According to the Primary Chronicle Riuryk was a Varangian chieftain who was invited to rule Novgorod in 862, and whose brothers, Sineus and Truvor, were invited to rule Beloozero and Izborsk respectively. Within two years both his brothers were dead, and Riuryk annexed their realms, thereby becoming the ruler of the northern Slavic (Slovene and Krivichian) and Finnish (Meria, Chud, and Ves) tribes and territories. According to the Hypatian Chronicle Riuryk ruled in Ladoga before seizing Novgorod in 862, and he suppressed an anti-Varangian uprising there in 869.

An early 12th-century Rus' chronicler's explanation of the emergence of the ruling dynasty of Kievan Rus' as the 'coming of the Varangians led by Riuryk, his brothers, and his host' has served as the basis of the *Norman theory of the origin of Rus'. Later Riuryk's son (or grandson), *Ihor, became the prince of a separate Kievan realm to the south and annexed some of the northern tribes to his state, thereby beginning the ruling *Riurykide dynasty of Kievan Rus'.

Some historians (eg, A. Shakhmatov) have accepted the Primary Chronicle's account of Riuryk and believe him to

have been an actual historical figure; they have, however, rejected the story of his two brothers. Other historians (eg, D. Likhachev) believe that Riuryk was a legendary or semilegendary figure. Still others (eg, B. Beliaev, P. Kovalevsky, O. Pritsak) believe that Riuryk of Novgorod was the same person as Hroerek (Rorik), the 9th-century Norse king of Jutland and Frisia, and that widespread myths about him inspired the chroniclers' account of Riuryk as the progenitor of the Riurykide dynasty.

Riuryk Rostyslavych [Rjuryk Rostyslavyč], b ?, d 1092. Rus' prince; great-grandson of Yaroslav the Wise. The western frontiers of Rus' were governed by the Rostyslavych brothers Riuryk, Volodar, and Vasylo possibly as early as 1077. After the death of Rostyslav Volodymyrovych in 1084, Riuryk remained in Volodymyr-Volynskiy with his brother Vasylo, as princes-in-exile at the court of Yaropolk Iziaslavych, and in 1086 Riuryk became prince of Peremyshl. That year, according to the Primary Chronicle, Riuryk's secret servant Neradets fled to Peremyshl after killing Yaropolk. Riuryk probably hoped to receive the rule of Volodymyr-Volynskiy, but the Kievan prince Vsevolod Yaroslavych granted it to Davyd Ihorevych. After Riuryk died, the rule of Peremyshl passed to his brother Volodar.

Riuryk Rostyslavych [Rjuryk Rostyslavyč], b ca 1140, d 19 April 1212 (other sources state 1211, 1214, or 1215) in Chernihiv. Kievan Rus' prince; grandson of Mstyslav I Volodymyrovych. He governed an independent Derevlianian province in the 1160s, and his son, Volodymyr, replaced him when he went to rule Ovruch in 1168. He later ruled in Novgorod and Kiev for brief periods in 1173 and 1181. Following the death of Sviatoslav III Vsevolodovych in 1194, Riuryk became prince of Kiev, which he ruled until 1210 (with interruptions). A falling out with members of the Olhovych dynasty and, later, with Roman Mstyslavych caused Riuryk to seek an alliance with the Cumans. In 1210 he was forced to abdicate the Kievan throne to Vsevolod Sviatoslavych Chermny; he governed in Chernihiv for the remainder of his life.

Riurykide dynasty (Riurykovych; Russian and Belarusian: Riurikovich). The ruling princely dynasty of *Kievan Rus', descended from Prince *Ihor of Kiev, who according to the Primary Chronicle was the son of the Varangian *Riuryk. The separation of certain Rus' lands and growing independence of individual principalities from the Kievan center resulted in the creation of some 15 (and later more) autonomous Riurykide houses, which were denoted genealogically either by the name of the principality they controlled or by the name of their founder.

Ukrainian branches of the Riurykide dynasty were the Monomakhovych house of Kiev and Volhynia, descended

from *Volodymyr Monomakh; the *Romanovych house of Galicia-Volhynia, descended from *Roman Mstyslavych; the Rostyslavych house of Galicia, descended from *Rostyslav Volodymyrovych; the *Olhovych house of Chernihiv and Novhorod-Siverskiy, descended from *Oleh Sviatoslavych; and the Turiv-Pynske house, descended from *Iziaslav Yaroslavych. One of the houses, descended from Prince *Yurii Dolgorukii, the youngest son of Volodymyr Monomakh, became the family of the grand princes of Vladimir-Suzdal and then of the grand princes and tsars of Muscovy. The last Riurykide tsar, Fedor I Ivanovich, died without heirs in 1598. The Belarusian Riurykides included the Polatsk house, descended from *Iziaslav Volodymyrovych and his grandson, Vseslav, which became autonomous in the 11th century; and the Smolensk house, descended from *Rostyslav Mstyslavych, Monomakh's grandson. The descendants of the various houses, particularly those of Belarus and Chernihiv-Novhorod-Siverskiy, were many, and they maintained their patrimonial appanages until they became servitor princes of the Grand Duchy of Lithuania or Muscovy. A number of junior families lost their princely titles at that time.

Riurykide families who managed to preserve their princely status in the Russian Empire until the 20th century include the Bariatinskys, Dolgorukovs, Gorchakovs, Obolenskys, Repnins, Shcherbatovs, and Volkonskys, descended from the Chernihiv house; the Drutsky-Liubetskys, Drutsky-Sokolynskys, Sviatopolk-Mirskys, and *Sviatopolk-Chetvertynskys, descended from the Galician-Volhynian house; the Kropotkins and Viazemskys, descended from the Smolensk house; and many other families of various Russian houses.

Riv River. A right-bank tributary of the Boh River. It is 104 km long and drains a basin area of 1,160 sq km. It originates in the Podolian Upland and flows through Khmelnytskyi and Vinnytsia oblasts. The river is used for irrigation, water supply, and fishing.

Rivenky or Rovenky [Riven'ky]. V-20, DB III-6. A city (1990 pop 58,300) in Luhanske oblast. It was founded as a Cossack settlement in 1705 and was first known as Osynovi Rovenok or simply Rovenok. From the 1730s to the 1760s it was a defensive outpost on the Ukrainian line and was called Katerynivka. From 1793 it was the sloboda Orlovo-Rovenetska or Rovenky. It was granted city status in 1934. Today it is an industrial center with seven coal mines and a footwear factory.

River transportation. A mode of transportation using natural and man-made waterways. Before railways were built, rivers offered the chief means of transportation in Ukraine, which has a dense river network and conditions favorable to river navigation. There are approx 3,000 rivers over 10 km long and 116 rivers over 100 km long in Ukraine. Owing to rainfall levels and the gentle slope of

TABLE 1
Ukraine's major rivers

| | Total length (km) | Within Ukraine (km) | Navigable length (km) |
|----------|-------------------|---------------------|-----------------------|
| Dnieper | 2,285 | 981 | 981 |
| Dniester | 1,362 | 1,362 | 500 |

| Samara | 311 | 320 | 80 |
| Prypiat | 748 | 261 | 85 |

the land, many of the rivers have a water flow large enough and slow enough for easy navigation (for the main navigable rivers see table 1). River transportation is the cheapest mode of transportation, but it is slow and not always available. River traffic is interrupted by the long, cold winters in Ukraine and by low water levels in the summer, particularly in the southern regions.

The first steamboats appeared on the Dnieper River in 1823, and a regular passenger service was established between Kremenchuk and Pinsk in 1850. The Russian Steamshipping and Trading Society (ROPIT), established in 1857, dominated the freight traffic on the lower Dnieper and along the seacoast. By 1894, 79 of the 280 steamships on the river were owned by ROPIT. In 1913 the Dnieper commercial fleet did not exceed 400 small vessels, and the

and production targets continued to be controlled by the Central State Planning Committee.

During the Soviet period some important changes took place in Ukraine's river transportation: the number and the engine power of vessels increased; new port facilities were built, and existing ones enlarged; navigation barriers, such as the Dnieper and Boh rapids, were virtually removed; the Greater Dnieper project was completed; and the course of the Dniester, Boh, Desna, and Seim rivers was changed.

The Greater Dnieper project consists of 5 giant, artificial 'seas', 6 hydroelectric stations with dams, 3 major canals, and several irrigation systems. The basic indexes of the so-called 'seas' are shown in table 2. The canals serve two purposes, shipping and irrigation. Some branches of irrigation canals are closed to boat traffic. Connecting canals accommodate semilarge vessels and barges. Their productive capacity depends on the water level. The indexes of artificial canals are shown in table 3. There are similar plans for the Dniester, Boh, Desna, and Donets rivers.

Ukrainian rivers are relatively poor in port facilities. Before the 1970s the major ports on the Dnieper River were Kiev, Kremenchuk, Dnipropetrovske, Zaporizhia, and Kherson. Since then Chornobyl, Kaniv, Cherkasy, Dniprodzerzhynske, Nykopol, and Beryslav-Kakhivka have been added. The main ports on the Boh are Mykolaiv and Voznesenske. On the lower Dniester River there are two ports, Bilhorod and Ovidiopil. Ukraine has two major ports on the Danube River, Izmail and Reni, and a third, Ust Dunaiske, is under construction. The Donets has no major ports, but Izium, Rubizhne, and Lysychanske have loading and unloading facilities.

River vessels and barges are mostly built of metal.

Voskhod-type ships with a maximum capacity of 5,000 t are equipped with computers, and their traffic is generally programmed. On the Dnieper passengers are carried in comfortable liners and high-speed hydrofoils. The industry's passenger volume has declined slowly, and its freight volume has increased, but its share of the transportation output has remained fairly stable over the last four decades (see table 4).

E. Bej

Rivers. Courses of flowing water in well-defined channels, usually growing in volume between the source and the point of entry into a sea, a lake, or another river. Streams or rivulets are smaller, with the volumes involved not being closely defined.

The rivers of Ukraine generally flow southward into the Black Sea or the Sea of Azov. The notable exceptions are in the northwest, where the prevalent flow is northward into the *Prypiat, a tributary of the *Dnieper, or into the *Vistula (Wisla), which flows through Poland into the Baltic Sea. Nevertheless over 90 percent of the territory of Ukraine is situated in the Black Sea-Sea of Azov drainage basin. That area is drained by major rivers, such as the *Tysa, the *Prut, and the *Seret, by way of the *Danube; the *Dniester, the *Boh, and the Dnieper, together with its major tributaries, the Prypiat and the *Desna; the *Don with the Donets and its tributary, the *Oskil (Oskol in Russian); and the *Kuban. The remaining Ukrainian territory belongs to the Baltic Sea drainage basin, which incorporates the right-bank tributaries of the Vistula, the Buh, the *Vepr, and the *Sian. With the exception of the Carpathians, the divides between the Black Sea and the Baltic Sea drainage basins and between the major river basins

usually follow low elevations. That allows the rivers of various drainage basins to be connected with canals for river-barge navigation between the Baltic and the Black seas.

There are approx 30,000 rivers crossing Ukrainian ethnographic territory. Of that number about 23,000 are in Ukraine. With a combined length of nearly 180,000 km, most are small; in Ukraine there are 117 rivers the watercourses of which exceed 100 km, but only 13 that are longer than 500 km (they are noted in table 1). The characteristics of rivers, such as the density of the river network as well as the volume and the seasonality of the flow, depend on factors such as climate, geology, relief, vegetation, and human modifications of the landscape.

River characteristics. River networks or drainage densities vary throughout Ukraine. They are highest in the mountainous regions, where the greatest annual precipitation occurs; there they attain nearly 1.1 km of watercourse per sq km of territory. Drainage densities decline to

about 0.6 km/sq km in Subcarpathia, the Tysa Lowland, and Subcaucasia, and to 0.5 km/sq km in the uplands of Roztochia, Podilia, and Donets, where porous limestone provides for better underground drainage. In general the river network becomes less dense to the south and east in keeping with the declining precipitation. Low drainage densities (less than 0.1 km/sq km) occur between the lower Desna and the upper reaches of the *Oster and between the *Trubizh and the *Supii. There are no rivers (except for a few seasonal intermittent streams) between the lower Dnieper and the Molochna.

Rivers are fed by rainfall, snowmelt, groundwater, and glaciers. In Ukraine rainfall accounts for nearly 75 percent of the total precipitation. The greater proportion of rainfall evaporates from the surface or infiltrates the soil, and only a small portion provides for surface runoff into the rivers (less than 10 percent in the plains, although it can reach up to 50 percent in the mountains). In the steppe zone nearly all the rainfall evaporates or seeps into the soil. The rivers of the plains are fed mainly by melting snow. Groundwater feeds rivers throughout the year. The mountain glaciers of the Caucasus provide water for the Kuban and other rivers. In general the main source of water for the mountain rivers is rainfall. In the plains the rivers are fed mainly by snowmelt, 50–80 percent; groundwater contributes an additional 10–20 percent.

For Ukraine as a whole the mean annual surface runoff amounts to 14 percent of the atmospheric precipitation (in Ukraine representing approx 85 mm of river discharge of approx 600 mm). The mean annual surface runoff varies not only among the river basins (see table 1) but also within the river basins themselves, according to the hydrological conditions. The highest runoff (in liters per second per sq km or L/s/sq km) is 75 (2,340 mm) in the Caucasus, 35 (1,100 mm) in the Carpathians, and 15 (470 mm) in the Crimean Mountains. For the Ukrainian uplands and lowlands the mean annual surface runoff ranges from 1 to 4 L/s/sq km (30–130 mm). In the steppe it diminishes to a range of 0.5 to 1 L/s/sq km (16–30 mm). In the nonmountainous areas there is a gradient of decreasing runoff from north to south in keeping with precipitation. High anomalies occur on uplands, where higher precipitation and better drainage contribute to higher runoff. Low anomalies are found in the lowlands north of Lutske and east of Kiev, the former associated with karst (where porous limestone absorbs much of the precipitation), and the latter with bogs (where impeded drainage reduces runoff). In the mountains runoff increases with higher elevation.

Stream flow varies considerably from year to year. In dry years, for example, the large rivers of Ukraine discharge from three-quarters to less than one-half of their flow in normal years (see table 2). Over a monthly period greater variations occur. The Boh River, for example, with a mean March runoff of 20.7 mm, discharged only 3.6 mm in March 1921, but 81 mm in March 1922. Even greater variations are experienced by smaller streams.

Seasonal variation in the flow of rivers is considerable and is closely related to the amount of surface water available. Both the highest availability of surface water and the highest flows occur in the spring, when the snow melts. The spring flow accounts for 50–80 percent of the total annual discharge of the major rivers and for nearly all the annual discharge of the small, intermittent streams of the steppes. The lowest availability of surface water occurs in

the winter, when only occasional thaws release snowmelt, and the lowest flows tend to occur during the warm, dry weather of the late summer and early fall, when the lowest quantities of water are available through both surface runoff and groundwater seepage. Spring floods or high flows in small streams last for 10 to 15 days, whereas large rivers may sustain high flows for 30 to 45 days. In addition to spring peak flows, summer floods associated with downpours are particularly common in the mountain streams of the Caucasus and Carpathian regions. The Kuban River hydrograph, however, reveals four seasonal high flows: two in the spring (in February, when the snow melts in the lower part of the drainage basin, and in April, when the snow melts in the mountains), one in the summer (through June and July, associated with the surface melting of the glaciers), and one in the fall (caused by increased precipitation in October). In the Tysa River Basin, winter floods are not uncommon; they are associated with the thaws triggered by the incursions of cyclonic storms from the Mediterranean.

Before the construction of the Kiev Reservoir particularly large spring floods occurred in the Dnieper River north of Kiev, where waters from snowmelt converged from both the Prypiat and the Desna. Spring floods in the broad, flat Prypiat floodplain occur regularly. Spring floods in the northward-flowing Sian and Buh and in the upper part of the Dniester are caused by early and rapid melting of the snow in the upper part of the river basins, while the frozen middle stretches of the rivers overflow with ice jams. Near the mouths of the Dnieper, the Danube, the Boh, and the Kuban considerable flooding and fluctuation in water level occur in conjunction with the wind's pushing of seawater up against the windward shore (setup) or as a backwash following the offshore wind's withdrawing of it (seiche).

The winter regime of the rivers begins with the formation of ice on the surface. The freeze-up occurs earliest in the northeast (the upper Desna River Basin) at the end of November and progressively expands southward. Freeze-up along the Dnieper comes later; it reaches Kiev by 21 December and Kherson by 28 December. The less voluminous Boh River experiences somewhat earlier freeze-ups, at Vinnytsia by 6 December and at Voznesenske by 11 December. The upper reaches of the Dniester in Subcarpathia begin to freeze up in mid-December, but lower down near Zalishchyky the river does not freeze over until the end of December. Further east at Dubosari, freeze-up sets in by 20 December. The Kuban and the Tysa rivers do not attain a stable ice cover, and the ice cover on the Sian and the Buh rivers is often disrupted by thaws.

The breakup of ice in the spring begins in the south and advances northward. The mean dates for the Dnieper are 3 March at Kherson, 15 March at Zaporizhia, and 24 March at Kiev. For the Boh River they are 7 March at Voznesenske and 21 March at Vinnytsia. On the Dniester ice begins to break up at Zalishchyky (4 March) before it does so at Dubosari (9 March), with ice jam flooding often the result. The problem is even more severe on the northward-flowing Sian and Buh rivers. Mountain streams, which begin the breakup of ice from downstream, are spared the worst ice jam flooding. On average the rivers are ice-covered in northern Ukraine for nearly 3.5 months; in the south the ice cover lasts 2.5 months or less.

Rivers carry considerable material in suspension and solution, the quantity depending on the velocity of the current and the geology of the terrain. Mountain streams transport the largest quantity of suspended material, especially during floods, when they are capable of rolling stones and small boulders along their beds. Slow-flowing rivers in the lowlands carry the least material. Rivers almost always carry very small particles (mostly clay and silt) in suspension, which make the water appear muddy. The clearest rivers of Ukraine are found in Polisia, where small particles in suspension do not exceed 50 g/cu m; the muddiest are the mountain streams in flood and the full-fed tributaries of the middle stretch of the Dniester, which may carry up to 1,000 g/cu m. In other rivers the concentration of particles in suspension generally varies from 150 to 500 g/cu m.

The concentration of dissolved minerals in river waters of northern Ukraine varies from 200 to 500 mg/L. That concentration increases to the south and east, where there is an increasing presence of soluble minerals in sedimentary rocks and an increasing soil salinity; it attains the highest values (nearly 2,000 mg/L) in the Donets Basin and in rivers between the Danube and the Dniester. The lowest concentrations (below 100 mg/L) are found in the fast-flowing Carpathian mountain streams.

Regional characteristics of rivers. Ukraine may be subdivided into 11 regions according to hydrological factors and the nature of the rivers: Polisia, the Volhynia-Kholm Upland, the Podolian Upland, the Dnieper Upland, the Dnieper Lowland, the Donets Ridge, the southwestern margin of the Central Upland, the Black Sea Lowland, the Crimean Mountains, the Carpathians and Subcarpathia, and the Western Caucasus and Subcaucasia. Polisia is drained by the Dnieper (north of Kiev), the Prypiat, the Desna, and the Buh rivers. The mean annual precipitation is 500–600 mm, and the mean annual runoff, 100–120 mm (20 percent). River gradients are gentle (about 0.5 m/km), and the river currents are slow. River valleys are wide, and their low and swampy banks are inundated each year by the spring floods. Ice covers the rivers, on average, 3.5 months, with longer duration in the east than the west.

The Volhynia-Kholm Upland is drained by the Vepr, the Buh, and the right-bank (southern) tributaries of the Prypiat – the *Stokhid, the *Styr with its tributary, the *Ikva, and the *Horyn with its tributary, the *Sluch. The mean annual precipitation is 500–700 mm, and the mean annual runoff, 100–150 mm (20 percent). River gradients in the south exceed 1 m/km but decline to the north. River valleys are wide and frequently swampy and experience floods in the spring. The duration of the ice cover varies from 3 months in the west to 3.5 months in the east.

The Podolian Upland is drained by the left-bank (north-

This page intentionally left blank

ern) tributaries of the Dniester and the right-bank (western) tributaries of the Boh. The mean annual precipitation declines from 700 mm in the west to 450 mm in the southeast, and the range of the mean annual runoff is even greater, from 200 mm (30 percent) in the west to 40 mm (10 percent) in the southeast. The density of the river network varies from 0.4 to 0.5 km/sq km. In the upper reaches of the rivers the gradient is shallow (about 1 m/km), and the valleys are wide and swampy in places. In the middle reaches the gradient becomes steeper, and the river valleys become narrow and deep, most notably in the Dniester's middle reaches. In the southwestern extremity of the Ukrainian Crystalline Shield the riverbeds are stony. Spring floods are common, and the Dniester also experiences summer floods. The ice cover lasts about 3 months.

The Dnieper Upland is drained by the right-bank (western) tributaries of the Dnieper (the *Teteriv, the *Irpın, the *Ros, the *Tiasmyn, and the upper *Inhulets) and the left-bank (eastern) tributaries of the Boh (the *Sob, the *Syniukha, and the upper *Inhul). The mean annual precipitation is 450–550 mm, and the mean annual runoff diminishes from 100 mm (20 percent) in the northwest to 30 mm (6 percent) in the southeast. River gradients are approx 2 m/km. Rivers in the Ukrainian Crystalline Shield are stony and have rapids. The deep river valleys are canyonlike in their upper reaches. Floods occur in the spring. The ice cover lasts for three months, although the period is shorter by one to two weeks in the south.

The Dnieper Lowland is drained by the left-bank (eastern) tributaries of the Dnieper: the *Sula, the *Psol, the *Vorskla, the *Orel, and the *Samara. The mean annual precipitation decreases from 550 mm in the north to 450 mm in the south, and the mean annual runoff declines from 120 mm (22 percent) to 40 mm (9 percent) in the same direction. Riverbeds are well graded, with a drop of 1 m/km. The river valleys are broad with gently sloping banks. High water levels occur in the spring. The ice cover period ranges from 3.5 months in the north to only 2 months in the south.

The Donets Ridge, bounded by the Donets River to the north, is drained by the right-bank (southwestern) tributaries of the Donets, the *Miius, and the *Kalmiius that flow into the Sea of Azov, and the upper reaches of two left-bank (eastern) tributaries of the Dnieper, the *Vovcha and the Samara. The mean annual precipitation is approx 500 mm, and the mean annual runoff, approx 50 mm (10 percent). The gradient of the Donets is only 0.5 m/km; the gradients of the other rivers are 1 m/km or more. The river valleys are deep, and the right bank of the Donets is considerably higher than the left bank. High water occurs in the spring, and the ice cover lasts about 3 months.

The southwestern margin of the Central Upland is drained by the upper reaches of the left-bank (eastern) tributaries of the Dnieper (the Desna with its tributary, the *Seim, the Psol, and the Vorskla), the upper reaches of the Donets and its left-bank (eastern) tributaries (the Oskil, the *Aidar, and the Derkul), and the right-bank (western) tributaries of the Don (notably the Chorna Kalytva). The mean annual precipitation is 400–500 mm, with runoff decreasing from 120 mm (24 percent) in the north to 60 mm (15 percent) or less in the south. River gradients are approx 2 m/km. River valleys are deep, with the right banks higher than the left banks. Floods occur in the spring, and the ice cover lasts about 3.5 months.

The Black Sea Lowland is drained by the lower reaches

of the Dniester, the Boh, the Dnieper, and other smaller rivers flowing into the Black Sea and the Sea of Azov. To the south and east small intermittent streams drain the Crimean Lowland and small, though mostly permanent, streams drain the Kuban Lowland into the Sea of Azov. The mean annual precipitation ranges between 270 and 400 mm (up to 500 mm in the Kuban Lowland); the mean annual runoff, occurring mostly in the spring, is less than 25 mm (6 percent or less) in the dry steppe and up to 50 mm (10 percent) in the Kuban Lowland. In the summer nearly all the water evaporates, and small streams and middle-sized rivers, such as the Malyi Kuialnyk, the Velykyi Kuialnyk, and the Tylihul, tend to dry up. Lacking sufficient power such rivers flow into coastal terminal lakes, which are cut off from the sea by shoreline bars. River valleys are broad with low banks and floodplains overgrown with reeds. The ice cover is not always stable; it lasts up to 2.5 months.

The Crimean Mountains obtain 400–1,000 mm of mean annual precipitation, mostly in the late fall and the winter. A large proportion of the rainfall is absorbed by the porous limestones (underground drainage); there is left a mean annual runoff of 20–200 mm (5–20 percent). The short mountain streams form deep, narrow gorges. Those flowing north onto the Crimean Lowland become intermittent and assume characteristics common to the smaller rivers of the Black Sea Lowland.

The Carpathians and Subcarpathia are drained to the north by the right-bank tributaries of the upper Vistula (the Dunajec, the Wisłoka, and the Sian) and by the Dniester headwaters, including its left-bank tributary, the *Stryvior, and its many right-bank tributaries, such as the *Bystrytsia, the *Stryi, the *Svicha, the *Limnytsia, the *Bystrytsia Solotvynska, and the Bystrytsia Nadvirnianska. To the south the Carpathians are drained by the Tysa with its right-bank tributaries, the Teresva, the *Tereblia, the *Rika, the *Borzhava, the *Liatorytsia, the *Uzh, the *Laborets, and the *Ondava with its tributary, the Toplia. To the east the Carpathians are drained by the headwaters of the left-bank tributaries of the Danube, the Seret and the Prut. The mean annual precipitation varies widely, from 700 mm in the foothills to 1,500 mm at the highest mountain elevations. The mean annual runoff also varies, in keeping with the elevation, from 350 to 750 mm (50 percent or more). River density is 1.1 km/sq km. Gradients are very steep, 60–70 m/km, in the upper reaches but decline to 5–10 m/km in the lower reaches. River valleys in the mountains are relatively narrow and deep (600–800 m), in the foothills, less so (150–250 m). Summer flash floods are not uncommon. The ice cover varies from 2.5 to 4 months, according to the elevation. Almost every winter the ice cover in the foothills is interrupted by thaws. The middle reaches of the Tysa lack a permanent ice cover in winter. Rivers carry a large quantity of material in suspension, but not in solution.

The Western Subcaucasus is drained by the Kuban and its left-bank (southern) tributaries, the *Zelenchuk Malyi, the Zelenchuk Velykyi, the *Laba, the *Bila, and the *Pshysh. The mean annual precipitation increases from 500 mm in the lower reaches of the Kuban to 1,000 mm in the foothills and 2,400 mm in the Caucasus Mountains. Runoff in the mountains attains or exceeds 50 percent of the precipitation; in the lowland it remains at 10 percent. Rivers are fed by rainfall, snow, and glaciers. Valleys in the mountains are deep and narrow; in the lowland they

are wide, with gentle slopes. An ice cover does not form every year.

In the past, rivers provided settlements with water supply, transportation, and fishing. Recently river transport and river fisheries have declined in significance, and the role played by rivers in municipal and industrial water supply, irrigation, drainage, the removal of sewage and industrial effluents, and the generation of hydroelectric power has increased. Rivers also serve as sites for outdoor recreation and as routes for tourism, but with increasing *pollution the quality of their waters and hence their value for municipal, industrial, and recreational uses have declined.

Rivna. A Carpathian mountain group in the Polonynian Beskyds in Transcarpathia oblast. Situated between the Turiia and the Uzh rivers, the massif contains peaks reaching as high as 1,479 m. The mountains are quite wide and, except in the northern section, have gently rising slopes covered with meadows and mixed beech forest. Above 1,100 m the meadows are used for summer grazing.

The Rivne gymnasium, built in the 1870s

Rivne (aka Rovno). III-7. A city (1990 pop 233,000) on the Ustia River and the administrative center of Rivne oblast. The town developed out of a settlement around a fortress in the Principality of Galicia-Volhynia. It is first mentioned in historical documents in 1282, as the site of a battle between the Polish prince Leszek Czarny and the Lithuanian noble Vitenas. In the second half of the 14th century it became part of the Grand Duchy of Lithuania, and by the end of the century it had been granted the rights of *Magdeburg law. Because of its convenient location on the Kiev–Volodymyr trade route the town prospered

as a commercial center. In 1518–1621 it was owned by the Ostrozky family. With the Union of Lublin (1569) Rivne became part of the Polish Commonwealth. With the partitioning of Poland in 1793 it was annexed by Russia and was made a county center of Volhynia gubernia (from 1797).

Toward the end of the 19th century Rivne developed from a small administrative and trading town into a major railway junction on the Odessa–Warsaw (1873), Lviv–Zdolbuniv–Rivne, and Rivne–Lunynets–Vilnius–St Petersburg lines. Its population jumped from 6,300 in 1870 to 24,600 in 1897 and 33,700 in 1911. From the 1890s over half the population was Jewish.

In 1917–19 the city was controlled intermittently by the UNR government. It was awarded to Poland by the Treaty of Riga in 1921. Rivne was occupied by Soviet forces in 1939 and set up as the center of a new oblast. In 1941 it was captured by the Germans and turned into the administrative center for *Reichskommissariat Ukraine. In November 1941 and July 1942 respectively the Germans killed approx 18,000 and 5,000 local Jews. Soviet troops reoccupied Rivne in 1944.

Since the 1950s Rivne has developed rapidly as an industrial center. Its main industries are machine building (tractor assemblies, high-power equipment) and metal-working, building-materials manufacturing, construction, light industry (linen manufacturing), and food processing (meat packing, fruit canning, and confectionery). Rivne remains an important railway junction. It has seven special secondary schools, eight vocational schools, and three higher educational institutions, including a pedagogical institute, an institute of water management, and an institute of culture. The city supports a music and drama theater and a puppet theater, a philharmonic orchestra, and five museums. It had two oblast papers, *Chervonyi prapor* and *Zmina*. Now its city paper is the weekly *Rivne*. Its chief architectural monuments are the Dormition Church and belfry (1756) and the gymnasium building (1839).

Rivne Azot Manufacturing Consortium (Rovenske vyrobnyche obiednannia Azot). A consortium formed in 1975 on the basis of the Rivne Chemical Complex, built in 1965–9 on the outskirts of Rivne. It has three manufacturing facilities, which produce ammonia, ammonium nitrate, dry ice, unconcentrated nitric acid, sulfuric and phosphoric acids, ammonium sulfate, and other chemicals.

Rivne Institute of Culture (Rivenskyi instytut kultury). An institution of postsecondary education in Rivne, administered by the Ukrainian Ministry of Culture. It was founded in 1979 on the basis of the Rivne cultural-educational faculty of the Kiev Institute of Culture (est 1970). In 1986–7 the institute had faculties of cultural education and library science, 16 departments, and a library with over 93,000 volumes. Approx 1,600 students studied there, half of them full-time.

Rivne Linen Complex (Rovenskyi lonokombinat). A linen factory in Rivne, built in 1959–65. The factory produces canvas and tarpaulin for packaging and bags, tablecloth and bedding linen, linen for clothing, textiles for shirts and blouses, and other products. In the 1970s the complex employed over 2,000 workers.

The Kozatski Mohyly Museum and Preserve (formerly St George's Church [1910–14]) in Pliasheva in Rivne oblast

Rivne oblast. An administrative territory in northwestern Ukraine, established on 4 December 1939. It has an area of 20,100 sq km and a population of 1,173,300 (1990). About 62 percent of the population is urban. Its ethnic composition is 93.3 percent Ukrainian and 4.6 percent Russian. The oblast is divided into 15 raions, 10 cities, 18 towns (smt), and 319 village councils. The largest cities are Rivne (the capital), Dubno, Zdolbuniv, Kostopil, and Sarny.

The oblast lies in Polisia, a marshy lowland rich in rivers and lakes. The Volhynian Upland reaches the southwestern corner of the oblast. The climate is moderate continental, with an average January temperature of -5°C and an average July temperature of 18°C . The frost-free period lasts 163 days, and the annual precipitation is 600–700 mm. The oblast's rich flora and fauna are protected in 11 nature preserves.

Under the Soviet regime the oblast was industrialized rapidly. The main branches of its industry are the food industry, which accounts for about 30 percent of the industrial output, light industry (22 percent), the machine-building and metalworking industries (17 percent), the woodworking and paper industries (10 percent), the chemical industry (9 percent), and the building-materials industry (8 percent). The main products of the food industry are sugar (refined mostly in Dubno, Korets, Mizoch, and Ostrih), meat (in Dubno and Rivne), and canning (in Demydivka, Dubno, Ostrozhets, Ostrih, Mezhyrich, and Chervonoarmiiske). The light industry produces textiles and footwear; the largest textile factories are in Rivne. The machine-building and metalworking industries are concentrated in Rivne, Kostopil, and Dubno. The woodworking industry is widely distributed: there are a house-building complex in Kostopil, a woodworking complex in Orzhiv, and furniture factories in Dubno, Kostopil, Ostrih, Rivne, Sarny, and Chervonoarmiiske. There is a large paper mill in Pershotravneve. The largest chemical plant is in Rivne. The oblast is rich in building materials, such as lime and granite.

In 1990 the agricultural output of Rivne oblast was worth 1,339,400,000 rubles or 2.7 percent of that of Ukraine. The area of its arable land is about 929,000 ha

(1988). Of that area 670,000 ha are cultivated, 122,000 ha are in hayfields, and 125,000 are in pasture. The sown area is devoted to feed crops (35 percent); they are followed by winter wheat (14 percent), barley (13 percent), potatoes (12 percent), and sugar beets (8 percent).

Railways are the chief means of freight transport. The oblast has 611 km of track (1982). It is crossed by the Kiev–Kovel–Brest, Brest–Rivne–Vinnytsia–Odessa, St Petersburg–Lviv, and several other trunk lines. The main railway junctions are Zdolbuniv, Rivne, and Sarny. The highway network consists of 5,600 km of road, 3,600 of which are hard surface. The main highways running through the oblast are Kiev–Warsaw, Kiev–Rivne–Dubno–Lviv, Brest–Lutske–Dubno–Ternopil–Chernivtsi, Kiev–Sarny–Kovel, and Rivne–Sarny–Pynske. Rivne is served by an airport.

Rivne Pedagogical Institute (Rivenskyi pedahohichnyi instytut). An institution of higher learning under the jurisdiction of the Ministry of Education of Ukraine. Founded in 1940 as a *teachers' institute, it became a pedagogical institute in 1953. In 1986–7 the institute had five faculties – physics-mathematics, philology, early childhood education, music education, and industrial arts – and an enrollment of 4,700. Its library contains over 322,000 volumes.

Rivne Regional Studies Museum (Rivenskyi oblasnyi kraieznavchyi muzei). A museum located in Rivne, founded in 1906 by W. Okiecki of the Rivne Agricultural Society. It had departments of natural science, archeology, numismatics, and ethnography, and underwent an expansion of its collections, and the addition of a fifth department, of books and manuscripts, in 1910. The museum was destroyed and pillaged during both world wars and was a natural history museum during the interwar Polish occupation. During the Soviet period the museum had departments of natural science, prerevolutionary history, and Soviet social history. In 1975 it was relocated to a new building. Subordinated to it were the *Kozatski Mohyly Museum and Preserve, the Rivne Museum of Atheism, the Sarny, Berezne, and Mlyniv regional studies museums, the Korets Historical Museum, and the Nikolai Ostrovsky and Mykola Kuznetsov memorial rooms, as well as the Dubno Regional Studies Museum. In 1982 the museum had approx 130,000 artifacts in its collections. A guidebook to the museum was published in Russian in 1982.

Rivne Ukrainian Music and Drama Theater (Rivenskyi ukrainskyi muzychno-dramatychnyi teatr). A theater founded in 1939 on the basis of the Melitopil Ukrainian Music and Drama Theater. It premiered W. Shakespeare's *King Lear* in Ukrainian in 1956. Its repertoire has consisted mostly of contemporary Soviet plays. In 1987 its principal stage director was Ya. Babii.

Rizhsky, Ivan [Rižskij], b 19 September 1759 in Riga, Latvia, d 27 March 1811 in Kharkiv. Russian classical and literary scholar and philosopher; member of the Imperial Russian Academy of Sciences from 1803 and the first rector of Kharkiv University (1805–7, 1808–11). He was educated and taught in St Petersburg. There he published two books on ancient Roman religion (1784) and politics (1786), two widely used textbooks on logic (1790) and

rhetoric (1796; 2nd edn [1805] and 3rd edn [1822]: Kharkiv), and a translation of P. Pallas's physical and topographic description of the Crimea (1795). In Kharkiv he was a professor of literature and published an introduction to the study of literature (1806) and one of the first Russian books on poetics (1811). He was influenced by the writings of the encyclopedists and Voltaire.

Volodymyr Riznychenko

Riznychenko, Volodymyr [Riznyčenko], b 18 October 1870 in Valentiiv *khutir*, Nizhen county, Chernihiv gubernia, d 1 April 1932 in Kiev. Geologist; full member of the VUAN from 1929. After graduating from Kharkiv University (1896), until 1916 he took part in geological expeditions to study the Asian mountain ranges of Tarbagataj, Tien Shan, and Altai. His subsequent scientific work dealt exclusively with Ukraine and included the study of the stratigraphy and tectonics of Right-Bank Ukraine (particularly the Kaniv Hills). He also studied hydrogeological conditions in Volhynia and published extensively in the areas of general, dynamic, and regional geology, hydrogeology, geography, and archeology. In 1930–2 he became director of the VUAN Geological Institute. He was also a poet and cartoonist.

Rizol, Mykola [Rizol'], b 19 December 1919 in Katerynoslav. Accordionist and educator. In 1951 he graduated from the Kiev Conservatory. He developed a theory of five-finger application for the accordion and wrote a manual on the subject (1977). He organized an accordion quartet at the Kiev Philharmonic Orchestra in 1939 and served as its artistic director and a member. His compositions for accordion include a concerto for accordion and orchestra, arrangements of folk songs, and short pieces.

Rizun (nom de guerre of Vasyl Andrusiak), b 1914 in Sniatyn county, d 24 February 1946 in the Chornyi Lis forest, near Stanyslaviv. UPA field commander. In 1941 he became active in the anti-Nazi underground and rose to OUN leader in the Sniatyn-Kolomyia area. In June 1943 he helped organize the first UPA units in Galicia, which were known as the Ukrainian People's Self-Defense, and in the following month he established a base of operations in Chornyi Lis. By November 1943 Rizun was commanding a company, and thereafter, several companies. In the second half of 1944 he organized new UPA companies and co-ordinated combat operations in the Chornyi Lis area. In January 1945 he was appointed commander of the Stanyslaviv Tactical Sector, which consisted of five combat battalions. Killed in battle with MVD troops, Rizun was

promoted posthumously to colonel and awarded the highest UPA decorations for bravery: the Gold Cross of Combat Merit First Class and the Gold Cross of Combat Merit Second Class.

Rklytsky, Mykhailo [Rklyc'kyj, Myxajlo], b 22 September 1864 in Pohrebky, Novhorod-Siverskyi county, Chernihiv gubernia, d ? Historian and statistician. He studied law at Kharkiv University. He was exiled to Siberia in 1888 for his involvement in a revolutionary populist group. After his return to Ukraine he worked as an attorney in Novhorod-Siverskyi and as secretary of the Poltava gubernia zemstvo administration (from 1898) and director of its statistical bureau (from 1902). In publications of the Chernihiv and Poltava zemstvos he published articles on the history of Novhorod-Siverskyi, literacy in Novhorod-Siverskyi county, peasant libraries and landholdings in Poltava gubernia, and the Cossacks in Zolotonosha, Poltava, and Zinkiv counties according to the Rumiantsev census. He also wrote a statistical guide to the Russian 'South' (1910) and stories which were published in *Russkiiia vedomosti*, *Russkoe bogatstvo*, and *Zhurnal dlia vsekh*. His reminiscences about P. Hrabovsky were published in the VUAN collection *Literatura* (1928).

Ro, Lev, b 2 November 1883 in Novosaratovka, St Petersburg gubernia, d 14 September 1957 in Kiev. Horticulturist. He taught and did research on the biology and selection of fruit plants in Uman, Poltava, Mliiv, and Symferopil. He developed a pear and 12 types of apples that were adopted as standard varieties in Ukraine.

Roads and highways. Hard-surface (cement or asphalt) or unpaved thoroughfares used by automobiles, buses, or trucks. Compared to those in Western Europe and similarly settled parts of North America Ukraine's road and highway network is not dense; and compared to the adjoining republics, Ukraine's road and highway density is only slightly higher than Belarus's and slightly lower than Moldova's. Ukraine's highway density relative to its population, however, is lower than Belarus's, about the same

TABLE 1
Highway networks of selected republics, 1986

| Republic | Category | | | | | | |
|-----------|----------|-------|------|-------|------|------|-----|
| | A | B | C | D | E | F | G |
| Ukraine | 603.7 | 209.2 | 34.7 | 149.5 | 24.8 | 4.1 | 2.9 |
| Belarus | 207.6 | 51.0 | 24.6 | 42.4 | 20.4 | 5.1 | 4.2 |
| Moldova | 33.7 | 12.3 | 36.5 | 9.5 | 28.2 | 2.9 | 2.3 |
| Lithuania | 65.2 | 29.2 | 44.8 | 20.9 | 32.1 | 8.0 | 5.7 |
| Latvia | 64.5 | 20.3 | 31.5 | 18.1 | 28.1 | 7.7 | 6.8 |
| Estonia | 45.1 | 27.0 | 60.0 | 14.7 | 32.6 | 17.4 | 9.4 |

A = territory (in 1,000 sq km).

B = all paved highways, including ones used exclusively by certain agencies (in 1,000 km).

C = highway density (per 100 sq km), or B/A.

D = paved highways for general public use (in 1,000 km).

E = general highway density (per 100 sq km), or D/A.

F = highway density per unit of population (1,000 people), or B/pop.

G = general highway density per unit of population (1,000 people), or D/pop.

This page intentionally left blank

as Russia's (3.2 km/1,000 people), and higher than Moldova's (see table 1).

The road and highway network of Ukraine has inherited two distinct patterns that developed under the Austro-Hungarian and Russian empires respectively. A dense network of roads and highways was developed in the Austrian crownlands, and today the highest densities are found in precisely those regions – in declining order, Chernivtsi (formerly Bukovyna), Ternopil, Lviv, and Ivano-Frankivske oblasts (formerly Galicia). Lower densities of roads and highways were developed in the Russian Empire, particularly in the less-populated rural regions, such as the steppe (now Kherson, Mykolaiv, Kirovohrad, and Luhanske oblasts) and Polisia (now Chernihiv, Zhytomyr, Rivne, and Volhynia oblasts). Nodal patterns were more clearly established for the economic-administrative centers of Lviv, Chernivtsi, and Ternopil. In the Russian Empire they were less clearly developed for Kiev, Kharkiv, Odessa, Dnipropetrovske, and Donetsk, and that remains largely true today (see table 2).

The network of roads and highways in Ukraine was classified according to a hierarchy common to the entire USSR. At the top were the main highways of all-Union status; they were followed by other highways of all-Union status, highways of republican status, and, finally, roads of local status. The main highways had a strategic value. They formed a major node at Moscow, from which they radiated in all directions, linking the largest cities in the USSR, including Kiev, Odessa, and Kharkiv. The other highways of all-Union status joined intermediate-sized cities in Ukraine. Highways of republican significance joined small cities and towns and served as feeders into large cities. Local roads served villages and towns and fed into highways.

Hard-surface roads in 1940 accounted for only one-tenth of the road kilometers. The number of paved highways increased slowly. After 1970 the share of paved roads doubled each decade. By 1987 the share of paved roads and highways had reached 91.6 percent (see table 3). Road and highway improvement was related closely to the growth of the automobile industry. Even so, road use increased much more rapidly than did the length of paved highways: from 1940 to 1987 the load-distance trucked increased by a factor of 43, and the passenger-distance bused, by a factor of 315, whereas the length of paved roads increased by only a factor of 5.

TABLE 2
Highway distribution among oblasts

| Density range (km/100 sq km) | Oblasts |
|---------------------------------|---|
| 35.8–30.1 | Ivano-Frankivske, Lviv, Khmelnytskyi, Chernivtsi, Ternopil. Similar to Italy and Estonia |
| 29.4–25.8 | Vinnitsia, Donetsk, Kiev, Transcarpathia. Similar to countries in southeastern Europe, such as Bulgaria |
| 25.4–23.5 | Cherkasy, Crimea, Dnipropetrovske |
| 23.0–15.8 | Kherson, Mykolaiv, Kirovohrad, Luhanske, Chernihiv, Kharkiv, Zaporizhia, Odessa, Poltava, Rivne, Sumy, Volhynia, and Zhytomyr |

From 1940 to 1987 the total length of the road network declined by 107,500 km (see table 3). The difference consisted mostly of unpaved roads, which could not be justified economically. At the same time paved roads and highways increased, by 120,200 km, but they are generally in poor condition, and accidents and breakdowns are frequent. Hence, road transportation is expensive. In general the cost of trucking in Ukraine is 35 percent of the value of the cargo, whereas in most countries in Western Europe it does not exceed 10 percent.

TABLE 3
The road and highway network and its utilization in Ukraine, 1940–87

| Indicator | 1940 | 1960 | 1970 | 1980 | 1987 |
|--|-------|-------|-------|-------|-------|
| Length of roads and highways (in 1,000 km) | 270.7 | 236.2 | 223.5 | 163.2 | 163.2 |
| Paved (in 1,000 km) | 29.3 | 47.4 | 90.8 | 133.7 | 149.5 |
| Share of roads paved (%) | 10.8 | 20.1 | 40.6 | 81.9 | 91.6 |

Research on roads and highways is conducted by the Scientific Research Institute of Motor Vehicle Transport in Kiev, which has branches in Dnipropetrovske, Lviv, Odessa, and Symferopil.

Robitfak. See Workers' faculties.

Robitnycha hazeta (Workers' Gazette). A central organ of the *Ukrainian Social Democratic Workers' party published daily (with interruptions) from April 1917 to sometime in 1919 in Kiev, Vinnytsia, and finally Kamianets-Podil'skyi. It was edited by V. Vynnychenko and then by an editorial board headed by Isaak Mazepa. The newspaper fostered the development of Ukrainian national consciousness among Ukraine's working class and is an important primary source on Ukraine during the revolutionary period. It had a circulation of approx 15,000.

Robitnycha hazeta (Workers' Gazette). A newspaper published six times a week in Kiev since January 1957. Until 1962 it was the organ of the Ukrainian Republican Council of Trade Unions; since then there has been no republican Ukrainian trade union organ. In 1962–91 it was an organ of the CC CPU. In the 1960s it was a vocal proponent of Ukrainian economic and cultural autonomy and supported the more liberal policies of CPU First Secretary P. Shelest; it also published articles and letters criticizing policies restricting the development of the Ukrainian-language press and the use of Ukrainian in general. After Shelest's removal from power a purge was conducted at the paper, and several journalists and editors were removed from their positions. A Russian-language edition of the paper has been published as *Rabochaia gazeta*. Because of the official policy of Russification, in 1960 the Ukrainian edition had a pressrun of only 40,000 copies, while the Russian edition's was 85,000; by 1980 the gap had widened, with the two editions having pressruns of 95,000 and 385,000 respectively. In 1992 it began to appear

only three times a week and had a pressrun of 300,000 in each language edition.

Robitnycha hazeta Proletar (Workers' Gazette Proletarian). A daily organ of the All-Ukrainian Council of Trade Unions and, from November 1929, the CC CP(B)U, published in Kharkiv from November 1926 to March 1932. A mass-circulation paper intended primarily for urban workers, it printed *Terpuh* (1927–9), *Industrializatsiia, ratsionalizatsiia, vynakhidstvo* (1927–8), *Fizkul'turna Ukraina* (1929), and other supplements. In 1929 the paper had a daily pressrun of 63,300.

Robitnycha osvita (Workers' Education). A monthly organ of the Komsomol CC and Central Council of Educational Workers of the People's Commissariat of Education (from 1928), the Central Council of Workers' Education of the Supreme Council of the National Economy (from 1931), and the People's Commissariat of Heavy Industry (1932), published in Kharkiv from January 1927 to April 1932.

Robitnyche slovo (Workers' Word). A socialist weekly newspaper published in Toronto from June 1916 to September 1918, when it was closed down by the Canadian government. It succeeded the semimonthly *Svidoma syla* (est June 1915) and continued the same numbering scheme. It was published by members of the *Ukrainian Social Democratic Party (USDP) of Canada who were in opposition to the party's executive. *Robitnyche slovo* aimed to raise the class consciousness of Ukrainian immigrant workers in Canada; informed its readers about developments in Ukraine, especially after the February Revolution of 1917; and polemicized with the more radical, pro-Bolshevik **Robochyi narod*, the official USDP organ. Over time it became a less partisan educational journal for workers and farmers. The editor of both *Svidoma syla* and *Robitnyche slovo* was I. Stefanitsky, and H. Mak, P. Krat, and D. Borysko were associate editors.

Robitnychi visty (Workers' News). A semimonthly and later irregular Trotskyist newspaper published in Toronto from November 1933 to March 1938. It covered news of interest to Ukrainian workers and farmers in North America and from July 1936 included a regular section on literary developments in both Soviet and Western Ukraine. *Robitnychi visty* commented extensively on political developments in Ukraine and criticized Stalinist policies in the USSR and the Canadian Communist movement. It was formally allied with the Fourth International and even printed a letter of greetings from L. Trotsky. The editors were V. Bosovych, M. Oleniuk, and N. Oliinyk.

Robitnyk (Worker). A semimonthly newspaper published briefly in 1897 in Lviv (a total of four issues) by a group of social democrats who split from the Ukrainian Radical party. Edited by M. Hankevych (pseud I. Hlynchak), it was published in the Latin script and promoted better relations between Ukrainian and Polish social democrats in Galicia.

Robitnyk (Worker). A central organ of the Ukrainian Social Democratic Workers' party, published and edited in 1910 in Lviv by I. Skulsky.

Robitnyk (Worker). A radical socialist newspaper founded in Detroit in 1914; from 1915 the organ of the newly formed Ukrainian Federation of the Socialist Party of America. The newspaper appeared three times a month in Detroit in 1914 and then weekly (1915–17), and daily in Cleveland; it was often interrupted, and several times it was suppressed by US authorities. From December 1918 to January 1920 it was published in New York City. *Robitnyk* was edited by T. Pochynok, M. Sichynsky, M. Tsehlynsky, E. Kruk, and, from April 1918, an editorial board consisting of H. Lahun, P. Ladan, D. Moisa, and I. Selsky. At first it was concerned mainly with organizing the Ukrainian socialist movement in the United States and was particularly anticlerical and anti-Habsburg. After the February Revolution of 1917 it devoted considerable attention to developments in Ukraine, and initially it supported the Central Rada and the Ukrainian Social Democratic Workers' party there. Eventually it became pro-Bolshevik, and from September 1919 it was the official organ of the newly formed Ukrainian Federation of the Communist Party in America. *Robitnyk* was succeeded in 1920 by *Ukrains'ki shchodenni visty* (later **Ukrains'ki visty*).

Robitnyk (Worker). An organ of the Ukrainian section of the International Social Democratic Party of Bukovyna, published weekly (with several interruptions) in Chernivtsi in 1919–23. It was edited by V. Rusnak. *Robitnyk* was succeeded by *Borot'ba* (1925–8), a Sovietophile weekly edited by I. Stasiuk, S. Halytsky, I. Mykhailovych, T. Kozak, and Rusnak. Both papers were severely censored by the Rumanian authorities, and the editors were persecuted.

Robitnytsia (Working Woman). An organ of the Women's Section of the *Ukrainian Labour-Farmer Temple Association, published biweekly from 15 March 1924 to July 1937 (except 1932, when it appeared monthly) in Winnipeg. It was created through the merger of two other monthlies published in Winnipeg, *Holos pratsi* (Voice of Labor), established in April 1922 and edited by M. Popovich and M. Shatulsky, and *Holos robitnytsi* (Voice of the Working Woman), established in January 1923 and also edited by M. Popovich. *Robitnytsia* focused on education and child rearing, on the role of women in the class struggle, and on the growth of the Communist women's movement in Canada. It invariably supported Soviet policies in Ukraine and criticized Polish rule in Western Ukraine. In 1929 the newspaper had a circulation of approximately 6,800. Its editors were all men: M. Irchan (1924–9), M. Lenartovych (1929–32), P. Prokopchak (1933–6), and P. Chaikivsky and P. Lysets.

Robochyi narod (*Robuchyi narod, Robotchyi narod*; Working People). A newspaper established in Winnipeg in May 1909 by Ukrainians active in the Socialist Party of Canada. The successor to **Chervonyi prapor*, it appeared monthly (1909–10), biweekly (1910–11), three times a month (1911), weekly (1911–15), and again monthly (1915–18). From September 1910 the paper was the official organ of the *Federation of Ukrainian Social Democrats in Canada. Steadily adopting more radical positions, it published the first Ukrainian translation of K. Marx and M. Engels's *Communist Manifesto* to appear in Canada (1915) and several articles by V. Lenin, advocated Canada's withdrawal from the First World War, and by 1918 was decidedly pro-Bolshevik. In 1917 it had approximately 3,000 subscribers.

Its editors were M. Stechishin (1909–12), I. Navizivsky (1912–13), Ye. Hutsailo (who came from Bukovyna to edit the paper in 1913–14), I. Stefanitsky (1914), P. Krat (1914–15), D. Lobai (1915–16), and M. Popovich (1916–18). *Robochyi narod* was banned and closed down by the Canadian government in late September 1918. It was succeeded in 1919 by *Ukrains'ki robitnychi visti*.

Bishop Andrii Roboretsky

Roboretsky, Andrii [Roborec'kyj, Andrij] (Andrew Roborecky), b 12 December 1910 in Mosty Velyki, Zhovkva county, Galicia, d 23 October 1982 in Toronto. Ukrainian Catholic bishop. After emigrating to Canada with his parents in 1913, Roboretsky was ordained in 1934 and appointed auxiliary bishop to Bishop V. Ladyka in 1948. In 1951 he headed the Saskatoon exarchate, and in 1956 he was appointed bishop of the newly created eparchy of Saskatoon. He was prominent in the creation of the *Sheptytsky Institute in Saskatoon and took part in the Second Vatican Council.

Robselkor. An acronym for *robitnychy i selianskyi korespondent* (workers' and peasants' correspondent). The *robselkor* movement was initiated by the Bolshevik party in the early years of Soviet rule. This network of local correspondents loyal to the Soviet regime has played an important role in Communist agitation and propaganda. In the early 1920s many *robselkory* who denounced the 'anti-Soviet' activities of their neighbors were murdered. The authorities, in their turn, used these crimes to justify state repression and terror. The all-Union press in Moscow acted as patron of the *robselkor* movement, and local newspapers published many articles by these often semiliterate or poorly educated correspondents. In Soviet Ukraine there were regular *okruha* and oblast *robselkor* conferences throughout the interwar period, and the journal **Robsel'kor* was published for them. Since the Second World War, use by newspapers of *robselkor* correspondence has declined. In the 1960s, however, there were still over 400,000 *robselkory* in Ukraine.

Robsel'kor (Workers' and Peasants' Correspondent). An organ of the **robselkor* movement, published in Kharkiv (1928–34) and Kiev (1934–41); established in May 1928 by the merger of the monthlies *Robkor Ukraïny* (1927–8) and *Sel'kor Ukraïny* (1926–8). It contained reports from worker and peasant correspondents throughout Soviet Ukraine and was an important instrument in the agitation and propaganda work of the CP(B)U. *Robsel'kor* was published monthly (1927–8, 1933–4), semimonthly (1929–30, 1934–

41), three times a month (1931–3), and monthly (1933–4). The editor was I. Sazonov.

St Josaphat's Ukrainian Catholic Church in Rochester

Rochester. A city (1980 pop 242,000; metropolitan pop 972,000) on Lake Ontario in northwestern New York State. Founded at the beginning of the 19th century, it has developed from a flour-milling town into a manufacturing center for specialized precision equipment. In 1980 there were between 5,800 (official) and 8,860 (estimated) Ukrainian residents in the area. The first Ukrainian immigrants, who began to arrive in 1901, came mostly from the Rohatyn region, Galicia. By 1908 a group of Ukrainian Catholics had set up St Josaphat's Brotherhood, which formed the core of the first Ukrainian parish. Several local fraternal associations arose to help newcomers and to support Ukrainian institutions in the homeland: the Free Cossack Society (1909), the Zaporozhian Sich Society (1913), the Sisterhood of the Birth of the Virgin Mary (1916), and the Ivan Franko Society (1923). By the mid-1930s there were about 3,000 Ukrainians and 16 Ukrainian organizations in the city. With the influx of new immigrants after the Second World War, the Ukrainian community grew, and new organizations sprang up (52 by 1990). Another Catholic parish (1958) and an Orthodox parish (1950) were set up. The Ukrainian Heritage Center was established in 1983 at St Josaphat's Church to preserve and display samples of Ukrainian folk arts and crafts.

Rocket. A missile propelled by the reaction resulting from the rearward discharge of gases liberated by combustion. Crude rockets have been used for centuries as fireworks, signaling devices, and incendiary devices by the military. There is some evidence in the chronicles that the Cossacks used small rockets filled with gunpowder to create chaos and panic in Tatar encampments. In the 19th

century a number of Ukrainians experimented with rockets and proposed technical improvements or new applications for them. In 1815 O. *Zasiadko, an artillery officer from Hadiache, began experimental work on rockets for military use. In the latter half of the century the revolutionary M. *Kybalchych was interested in the theory of jet propulsion, and in 1881 he outlined a design for a jet-propelled aircraft. The first Ukrainian scientist to treat the rocket as a vehicle for *space travel was Yu. *Kondratiuk (real name: O. Sharhei). By 1921 he had calculated the escape velocity of a space vehicle and the amount of fuel needed to attain that velocity, and designed a four-stage rocket. The three aforementioned Ukrainian scientists have craters on the far side of the moon named for them. S. *Korolov was a member of the Jet Propulsion Research Group set up in Moscow in 1932, and later he was the chief designer of the first earth satellite and the rocket that lifted it into earth orbit in 1957.

Rocky Caucasus Range (Skelysty khrebet). A frontal ridge along the northern slope of the Great Caucasus Range. Stretching from the Bila River in the west to the upper reaches of the Terek in the east, the ridge is 330 km long with peaks ranging in height from 1,200–1,700 m in the west to up to 3,000 m in the east (Mount Karakaia is the tallest point, at 3,646 m). The ridge is situated in the central and western parts of the Caucasus Mountains. The range is a cuesta with a sharp southern slope and gentle northern one. It consists largely of hard limestone and has karst features. A number of rivers, including the Kuban, dissect it into several plateaus. The ridge's southern slopes are covered with mountain steppes and meadows, and broad-leaved forests grow along the northern slopes to approx 1,800 m.

Rococo. An architectural and decorative style that emerged in France in the early 18th century. It replaced the plasticity of the *baroque and was characterized by light, graceful decoration, trivial subject matter, and small-scale sculpture. In decoration the open shell (*rocaille* in French) motif became popular. Rococo was used in church architecture throughout Ukraine, but because baroque influences were strong the two styles were often intermingled. Examples of the rococo style in Ukraine are *St Andrew's Church (1747–53) in Kiev; the Church of the Nativity of the Mother of God (1752–63) in Kozelets, Chernihiv gubernia; the Roman Catholic churches of the Dominican order in Lviv (1747–64) and Ternopil (1745–9); *St George's Cathedral (1745–70) in Lviv; the Dormition Church at the Pochaiv Monastery (1771–83) in Volhynia; and the city hall (1751) in Buchach, Galicia.

Rococo influences in Ukrainian sculpture can be seen particularly in iconostases, where carved shell motifs and interlace patterns replaced grapevines and acanthus foliage, often without structural logic (eg, the Royal Gates in St George's Cathedral in Lviv). The iconostases of St Andrew's Church in Kiev and the church of the Mhar Transfiguration Monastery (1762–5) in Poltava gubernia have delicately carved rococo surface decorations. Three-dimensional carved heads of angels with wings were used to decorate St Andrew's Church in Kiev. In religious painting the rococo style had little impact because of the strong hold of the baroque. A few still lifes, intimate in scale, appeared for the first time, however, and rococo de-

The rococo iconostasis of St Andrew's Church in Kiev

sign and decoration left a mark on furniture produced in Hlukhiv and Nizhen in Chernihiv gubernia and in Olesko in Galicia. Furniture tended to be light, small, and curvilinear, with gold gilding over white. Porcelain with rococo motifs was manufactured in Korets and Volokytyne in Chernihiv gubernia.

D. Zelska-Darewych

Rocznik Wołyński (Volhynian Yearbook). A Polish-language yearbook of the Volhynian branch of the Union of Polish Teachers, published in Rivne in 1930–9 (a total of 8 issues). It contained popular-scholarly articles on the history, culture, and geography of Volhynia and useful bibliographies of Volhyniana. The editor was J. Hoffman.

Rod. A major Slavic deity, the creator of the world and ruler of the heavens and rain. The cult of Rod and the *rozhanytsia* (the Fates) associated with him came under severe attack from the church in 11th-century Rus'. According to B. Rybakov the cult displaced the ancient cult of the Mother, which prevailed under the matriarchal system, and preceded the warrior cult of Perun. The Western Slavs knew Rod by the name of *Sviatovyt.

Rodakove. V-20, DB II-6. A town smt (1986 pop 7,400) in Slovianoserbske raion, Luhanske oblast. It was founded as a workers' settlement in 1878 during the construction of the Debaltseve–Luhanske railway line. By 1912 it was an important railway junction. There is a kurhan from the Bronze Age near the town.

Roden (reconstruction by H. Mezentseva)

Roden or Rodnia [Roden' or Rodnja]. A fortified city on the hill called *Kniazha Hora, near the mouth of the Ros River, south of *Kaniv. According to archeological excavations Roden was founded in the 7th or 8th century. It is mentioned in the Primary Chronicle in 980 as the place where the Kievan prince Volodymyr the Great besieged his brother, Yaropolk I Sviatoslavych. Roden reached its economic and cultural zenith in the 11th and 12th centuries, when it was no longer simply a fortress against nomadic attacks, but also an important center of artisanship and trade. It consisted of a central castle with trade and market districts, encircled by fortified walls and moats. Excavations have unearthed wooden and clay dwellings, work implements, weapons (spear- and arrowheads, swords, sabers), and ornaments (diadems, rings, bracelets, earrings). Roden was destroyed during the Tatar invasions of the 1240s and was not rebuilt. Excavations on the site of the city were conducted by M. Biliashivsky in 1891 and by an expedition from Kiev University in 1958–65.

Rodimyi listok

Rodimyi listok (Native Page). A Russophile semi-monthly newspaper published in Chernivtsi from January 1879 to January 1882 (a total of 73 issues). It published news, belles lettres, and especially articles on Slavic ethnography and culture. The editor was M. Ohonovsky; the newspaper was closed down when he was arrested during an Austro-Hungarian crackdown against Russophiles suspected of treason.

Rodionov, Sergei, b 26 September 1898 in Zagorsk, Russia, d 2 May 1961 in Kiev. Geologist; member of the AN USSR (now ANU) from 1951. After graduating from the Dnipropetrovske Mining Institute in 1929, he held various teaching and administrative positions in Kryvyi Rih and Kiev. He joined the ANU Institute of Geological Sciences in 1938 and became department chairman at Kiev University (1945–52). Rodionov's research dealt with problems of petrography in the Ukrainian tectonic plate and the distribution patterns of Precambrian deposits in Ukraine. He was one of the first to study the numerous magnetic anomalies around the Kryvyi Rih deposits, and his publications have provided a theoretical basis for effective mineral exploration around the iron-ore zones.

Rodynske [Rodyns'ke]. v-18, DB III-2. A city (1989 pop 15,700) in Donetsk oblast, administered by the Krasnoarmiiske municipal council. It was set up in 1950, when two coal mines were opened. In 1962 it was granted city status. Besides the mines it has a coal enrichment plant.

Rodzevych, Serhii [Rodzevyč, Serhij], b 28 August 1888 in Łódź, Poland, d 29 January 1942. Literary scholar. He graduated from Kiev University (1913) and taught in Kiev's secondary schools before becoming a professor at Kiev University in 1935. He wrote articles on T. Shevchenko's early poems, on modern Polish poetry, and on European writers, such as I. Turgenev, N. Gogol, J. Tuwim, J. London, E. Zola, R. Roland, A. France, and L. Aragon, and introductions to Ukrainian translations of works by W. Shakespeare, Voltaire, H. de Balzac, and D. Diderot. In the years 1928–31 he published 10 review articles on new Ukrainian translations of foreign literature in the journal *Zhyttia i revoliutsiia*. He stopped publishing during the Stalinist terror of the 1930s.

Rodzianko [Rodzjanko]. A family line of Cossack officers and nobility of the Poltava and Katerynoslav regions in the 18th to 20th centuries. It was established by Vasyl Rodzianko (1652–1734), a captain of Khorol regiment (1701–4) and *oboznyi* (quartermaster) of Myrhorod regiment (1723–34). The captaincy of Khorol regiment was passed on to his sons, Stepan and Ivan Rodzianko, and grandsons, Yeremii and Ivan Rodzianko (until 1768). Stepan (1687–1736) and Yeremii Rodzianko were also *obozni* of Myrhorod regiment (1735–6 and 1767–9 respectively), and Ivan Rodzianko (d 1751) was also colonel of Hadiache regiment. Their descendants maintained estates and official positions in the Poltava region until the 20th century. In the 1780s, though, a branch of the family settled in the Katerynoslav region, where it was Russified and came to control large estates in Novomoskovske county (eg, Mykhailo *Rodzianko).

The Rodzianko family was related to the Lesevych, Domykovsky, Obolonsky, Ostrohradsky, and Sarytsky (including M. Sarytsky and L. Sarytska-Cherniakhivska) families. Semen Rodzianko (1782–1808?) was a poet and a member of the Friendship Literary Society in Moscow (1801–4). Arkadii Rodzianko (1793–1846) belonged to the Society of Lovers of Literature, Scholarship, and the Arts (1825) and wrote verse in Ukrainian and Russian (he was also a friend of A. Pushkin and T. Shevchenko). His brother, Platon Rodzianko (1802–?), was representative (*predvodytel*) of the nobility in Khorol county, Poltava gubernia.

Valerian Rodzianko (1846–1904) was a member of the Ukrainian (Little Russian) Hromada in Moscow in the 1860s (he was among those arrested in 1866), and later he worked as a court functionary in Kharkiv. Serhii Rodzianko (b 1866) was commissioner of the Central Rada in the Kholm region in 1917–18, and he kept his position under the Hetman government.

O. Ohloblyn

Rodzianko, Mykhailo [Rodzjanko, Myxajlo] (Mikhail), b 1859 in Katerynoslav gubernia, d 24 January 1924 in Yugoslavia. Large landowner and political leader. He was marshal of the nobility for Novomoskovske county (1886–96), chairman of the executive of the Katerynoslav gubernia zemstvo (1900–6), member of the State Council (1906–7), deputy from the Katerynoslav region in the Third and Fourth state dumas (1907–17), and president of the State Duma (1911–17). He was one of the leading members of the Octoberist party and was opposed to Ukrainian national aspirations. An advocate of a constitutional monarchy of the British type, he was associated with Russian antigovernment circles, which during the First World War tried to get rid of G. Rasputin and prepared a 'revolution from above.' In March 1917 he chaired the Provisional Committee of the Duma members, which assumed supreme power from Nicholas II, but was blocked from any position in the Provisional Government that succeeded it. In 1920, serving for a short period in A. Denikin's Volunteer Army, he emigrated to Yugoslavia. His memoirs, *Krushenie imperii*, came out in 1924 and have appeared in several English editions as *The Reign of Rasputin: An Empire's Collapse*.

Rodzin, Mykola, b 28 March 1924 in Novoselivka, Kharkiv okruha, d 2 March 1978 in Dnipropetrovske. Printmaker. A graduate of the Kharkiv Art Institute (1955), he did several series of etchings, including 'Industrial Motifs' (1955), 'Kakhivka Hydroelectric Station' (1956–7), 'Across Ukraine' (1963), and 'My Land' (1966–7); the triptych *Preservation of the Sevastopol Panorama* (1967–70); and various prints.

Roe deer (*Capreolus capreolus*; Ukrainian: *kozulia*). A small (100 cm tall at the shoulder), nimble, almost tailless deer of the family Cervidae that inhabits lightly forested zones of Ukraine in the Carpathian and Crimean mountains and in Polisia. Its coat is reddish brown in summer and grayish brown in winter. The roe deer is hunted commercially for its meat, hide, and antlers. In the 1970s its population in Ukraine exceeded 125,000. It is a protected species; approx 10 percent of the roe deer population is allowed to be taken annually.

Roentgenology. That branch of medicine which studies X rays, their effect on the human organism, and their use in the discovery, diagnosis, and treatment of disease. In Ukraine roentgenology was slow to develop. At the beginning of the 20th century two journals were published, *Rentgenovskii vestnik* (1907–9) in Odessa and *Izvestiia Kievskoi rentgenovskoi komissii* (1915–17) in Kiev. Scientific research institutes of roentgenology were created in Kharkiv and Kiev in 1920. The first departments of roentgenology were established in 1923–4 at the Kharkiv and Odessa medical institutes and at the Odessa Institute for

the Upgrading of Physicians; others followed at the Kiev (1927), Kharkiv (1928), and Donetske (1932) medical institutes and at the Kiev Institute for the Upgrading of Physicians (1936). Pioneers in roentgenology in Ukraine included S. Hryhoriv, S. (Yu.) Teslenko, M. Isachenko, M. Afanasiev, F. Bohatyrychuk, V. Diachenko, and A. Lemberg; Ya. Shyk wrote a medical roentgenology textbook and edited the journal *Eksperymental'na ta klinychna renthenolohiia*, published in 1931. Today the Kiev Roentgeno-Radiological and Oncological Scientific Research Institute is the leader in research and practical work in Ukraine.

Pozmogov, A. 'Razvitie rentgenologii v USSR za gody sovetskoi vlasti,' *Vestnik rentgenologii i radiologii*, 1972, no. 6

P. Dzul

Rogoza, Aleksandr, b 1869 in Kiev gubernia, d 1919. Army general. A regular officer in the Russian army, during the First World War he commanded the Fourth Russian Army and was promoted to major general. In 1918 he served as defense minister in the Hetman government of F. Lyzohub. He was killed by the Cheka.

Rogulia, Petro [Rogulja], b ? in the Poltava region, d ? Icon and portrait painter of the 18th century. He studied under T. Pavlovsky at the Kievan Cave Monastery Icon Painting Studio. His works include icons in the Holy Trinity Monastery cathedral in Okhtyrka (1744) and the Church of the Holy Protectress in Kotelva (1749).

Rogulsky, Ivan [Rogul's'kyj], b 1892 in Holobutiv, Stryi county, Galicia, d 1934. Senior officer of the Sich Riflemen. In 1914 he volunteered to serve in the Legion of Ukrainian Sich Riflemen, and by 1916 he was promoted to lieutenant and commanded a mortar platoon. After internment by the Russians (1916–17) he joined the Sich Riflemen Battalion in Kiev (January 1918). He became regimental (December 1918) and division (July 1919) commander in the Corps of Sich Riflemen and rose to the rank of colonel. He stayed in Soviet Ukraine after 1920. In the 1930s he was arrested and executed by the Cheka.

Mykola Rogutsky

Ivan Rohach

Rogutsky, Mykola [Roguc'kyj], b 31 July 1886 in Kupnovychi, Rudky county, Galicia, d 26 June 1941 in Sambir, Galicia. Civic and political organizer. A farmer by occupation, he was a leading activist and longtime vice-president (from 1924) of the Ukrainian Radical party. He was elected deputy to the Polish Sejm (1928–30) and was arrested a number of times by the Polish authorities for his political activities. On the eve of the Soviet retreat from Western Ukraine he was arrested by the NKVD and tortured to death.

Rohach, Ivan [Rohač], b 1913 in Velykyi Berezhnyi, Transcarpathia, d 1942. Journalist and political figure. In the 1930s he was a leader of the OUN in Transcarpathia, and in 1938–9, of the paramilitary *Ukrainian National Defense and *Carpathian Sich there. He was also secretary to the president of the 1938–9 Carpatho-Ukrainian state, A. Voloshyn, and editor of **Nova svoboda* (1938). In 1941 Rohach commanded an OUN (Melnyk faction) Expeditionary Group in central Ukraine and was managing editor of the nationalist newspaper **Ukrains'ke slovo* in Kiev. He was arrested by the Gestapo in December 1941 and killed by them in 1942, together with his sister, Anna.

Rohachevsky, Ivan [Rohačevs'kyj]. Early 18th-century archpriest in Lohvytsia, Lubni regiment. He was arrested in 1712 and exiled to the Solovets Islands together with others loyal to Hetman I. *Mazepa. Later he obtained permission to teach at a newly founded school in Arkhangel'sk, and in the 1720s he returned to Ukraine. There he joined the commission that prepared the Code of Laws of 1743.

Rohalevsky, Ilarion [Rohalevs'kyj], b ? in Minsk, Belarus, d 1739. Orthodox church hierarch. He studied at the Kievan Mohyla Academy and then served as a military chaplain before becoming archimandrite of the Mhar Transfiguration (1722–8) and Moscow Donskoi (1728–32) monasteries. He was consecrated archbishop of Kazan (1732) and then of Chernihiv (1735). A close associate of T. *Prokopovych, he established schools for newly baptized children, notably Kazan Tatars. He improved the education of the clergy and opposed tsarist limitations on the Ukrainian church, particularly restrictions on monasteries' acquisition of land. This opposition led to his arrest. He was confined to the Kievan Cave Monastery in 1738 and died en route to his trial in St Petersburg. He was buried in Tver.

Rohalyk camp site. An early Mesolithic camping ground located in the *khutir* Rohalyk, now part of Petrivka, Stanychno-Luhanske raion, Luhanske oblast. Excavations in 1927–36 unearthed the remains of fire pits that burned coal or charcoal, flint tools, bone objects, and pendants of crayfish shells and fish spines.

Rohan [Rohan']. IV-17. A town smt (1986 pop 5,200) on the Rohan River in Kharkiv raion, Kharkiv oblast. It was first mentioned in historical documents in 1736. At the end of the 19th century a paper factory, which is still operating, was built there. The town lies on the Kharkiv–Rostov-na-Donu highway. An experimental farm of the Kharkiv Agricultural Institute is located in Rohan.

The iconostasis of the Church of the Holy Spirit in Rohatyn

Rohatyn. IV-5. A city (1989 pop 8,500) on the Hnyla Lypa River and a raion center in Ivano-Frankivske oblast. It was first mentioned in historical documents in the 12th century. In 1415, under Polish rule, it was granted the rights of *Magdeburg law, and subsequently it developed into an important trading and manufacturing town. In 1520 the famous *Roksoliana was captured there by the Crimean Tatars and sold to the Turkish sultan. In the 16th century a renowned school of icon painting arose in Rohatyn, and in the 1580s an Orthodox brotherhood, which obtained stauropogion, was founded. After the partition of Poland in 1772, Rohatyn was annexed by Austria, and became a county center. A Ukrainian gymnasium was established there in 1909, and a minor theological seminary in 1931. During the interwar period the town was under Polish rule. In 1939 it became part of Soviet Ukraine and was granted city status. Today it is an important highway junction; 26 percent of its inhabitants work in the transportation industry. Its chief architectural monuments are the stone Church of the Nativity of the Theotokos (end of the 14th century), the remnants of the town walls and gate from the 13th and 14th centuries, the wooden Church of the Holy Spirit (1644–5) with its magnificent iconostasis (1647–50), the ruins of the Dominican monastery (1614), a Roman Catholic church in the Renaissance style (1666), and the wooden St Nicholas's Church (1729).

Rohatynets, Yurii [Rohatynec', Jurij], b ? in Rohatyn, Galicia, d 1608 in Lviv, Galicia. Religious activist. He was a wealthy burgher of Lviv and a leading member of the Lviv Dormition Brotherhood (coauthor of the statutes of its school). He maintained good relations with Prince K.

*Ostrozky and I. *Potii. Although he defended Ukrainian Orthodoxy in letters to the Lviv (1596) and Vilnius (1599) brotherhoods, he advocated moderation in religious polemics. In 1604 I. *Vyshensky spoke out against Rohatynets's wealth. Some scholars (including I. Franko in *Z dziejów synodu brzeskiego 1596 r.* [From the History of the Berestia Synod of 1596, 1895], and Ya. Isaievych) attribute the authorship of the anti-Uniate pamphlet **Perestoroĥa* to Rohatynets, but many others (eg, P. Yaremenko) dispute that claim.

Rohnida (Rogneda, Ragnheiôr), b ?, d 1000. Princess of Polatsk (Polotsk); daughter of Rogvolod (Rogvald). In 980 *Volodymyr the Great captured the *Polatsk principality and took Rohnida for his wife. They had four sons, *Iziaslav Volodymyrovych, *Mstyslav I Volodymyrovych, *Yaroslav the Wise, and Vsevolod (d 995), and two daughters, one of whom was Predslava (d after 1015). Volodymyr built the city of Iziaslav in the Polatsk land for his son Iziaslav, who ruled there with Rohnida until 988. A lake in the region was reportedly called Lake Rohnida. Rohnida also governed a town called Lybed near Kiev. The Primary Chronicle's description of Rohnida's marriage to Volodymyr was used by T. Shevchenko in his poem 'Tsari' (Princes).

Opanas Rohovych

Rohovych, Opanas [Rohovyč], b 30 January 1812 in Rohivli *khuĥir*, Starodub county, Chernihiv gubernia, d 1878 in Kiev. Botanist and paleontologist. He completed study at Kiev University (1838). He was director of its botanical gardens (from 1852) and a professor of botany there (1853–68). He gathered substantial amounts of information during research expeditions he undertook throughout Ukraine, and he prepared the first fundamental catalog of the flora of Polisia and the forest-steppe region. He also cultivated a herbarium of 10,000 plants (which he donated to the university) and compiled entries for a dictionary of folk colloquial terms for plants in Ukraine that was never published.

Rohoza, Mykhailo. See Rahoza, Mykhailo.

Rohrbach, Paul, b 1869 in Ostsee, Courland (now Latvia), d 19 July 1956 in Munich. Baptist theologian, historian of Eastern Europe, and publicist of Baltic German origin. He studied history and geography at Dorpat University and then moved to Berlin, where in March 1918, together with A. Schmidt, he founded the *German-Ukrainian Society and its organ, *Die Ukraine*. In a series of

books, articles, and brochures beginning in 1914, Rohrbach expounded on the threat of Russian expansionism and argued that Ukraine was nationally and culturally distinct from Russia, and that world powers should support Ukrainian independence. His position won him great popularity among Ukrainians; he was awarded an honorary doctorate from the Ukrainian Free University and named honorary president (1952–6) of the renewed German-Ukrainian Society.

Roik, Vira [Rojik], b 25 April 1911 in Lubni, Poltava gubernia. Master embroiderer. Since 1952 she has lived and worked in Symferopil. She studied the stylistic peculiarities of Ukrainian embroidery of the different regions and created her own distinctive designs. Her works include embroideries for ceremonial **rushnyky*, such as *Roosters* (1960), *Volhynian* (1971), *Grapes* (1973), and *Poltavian* (1977); decorative panels, such as *Dear Sun* (1981); and portraits.

Roiter, Volodymyr [Rojter], b 26 July 1903 in Nyzhno-dniprovske (now part of Dnipropetrovske), d 8 August 1973 in Kiev. Physical chemist; AN URSR (now ANU) full member from 1961. A graduate of the Dnipropetrovske Institute of People's Education (1926), from 1929 to his death he worked at the ANU Institute of Physical Chemistry and taught at postsecondary schools in Dnipropetrovske (from 1934 as a professor). Roiter's research encompassed kinetics, catalysis, and electrochemistry. He studied the mechanisms of industrial processes such as ammonia synthesis, carbon monoxide conversion, and selective oxidations of hydrogen sulfide and of acetylene. He was one of the founders of macrokinetics, a new area of physical chemistry dealing with material transfer in fixed-bed catalytic reactors, and wrote a monograph on the theory of kinetics and catalysis (1962, 1971).

Rokachevsky, Opanas [Rokačevs'kyj], b 1830 in Kiev, d 25 January 1901 in Kiev. Painter; full member of the St Petersburg Academy of Arts from 1860. After studying at the St Petersburg Academy of Arts (1852–7) he returned to Kiev and from 1860 headed the painting school at the Kievan Cave Monastery. His portraits display typical features of *academism. They include portraits of Count A. Tolstoi (1852), Rokachevsky's daughter (1860), a peasant woman, and a student (1880).

Roksolany fortified settlement. An ancient (6th–3rd century BC) Greek city-state on the Dniester Estuary near Roksolany, Ovidiopil raion, Odessa oblast. Excavations since 1957 have unearthed the remains of dwellings with stone foundations and brick walls, tools, coins, amphoras, and black lacquered tableware. Researchers at Roksolany believe that it is the Greek colony Nikhonion mentioned by some ancient writers.

Roksoliana [Roksoljana] (née Nastia Lisovska), b 1505 in Rohatyn, Galicia, d 15 April 1558 (other sources cite 1561) in Istanbul. Ukrainian wife of the Ottoman sultan Süleyman I Canuni. She was captured by Crimean Tatars in 1520 and sold into slavery. In Süleyman's harem she was given the name Roksoliana. Captivated by her personality and intelligence, the sultan made her his only wife, and he frequently consulted her regarding matters of state. A dis-

Roksoliana (16th-century portrait by an unknown artist)

trict in old Istanbul retains the name Khurrem ('laughing one'), Süleyman's pet name for Roksoliana. Their sons, Selim and Bayezid, were rivals to the throne, and Roksoliana eventually maneuvered the elder, Selim, into the position of heir apparent. Roksoliana became a legendary figure among Ukrainians and the subject of an opera by D. Sichynsky (1908), a play by H. Yakymovych (1869), and literary works by O. Nazaruk (1930), M. Lazorsky (1965), and P. Zahrebelny (1980).

Rokytno. IV-11. A town smt (1986 pop 14,200) on the Ros River and a raion center in Kiev oblast. It is first mentioned in historical documents in 1590. During B. Khmelnytsky's uprising in 1648 Rokytno threw off Polish rule

Opanas Rokachevsky: *Portrait of a Woman* (oil, 1860)

and became a company center of Bila Tserkva regiment. In the 1670s it was destroyed by the Tatars and resettled by its Polish owner. After the partition of Poland in 1793, the town was annexed by Russia and assigned to Vasylykiv county, Kiev gubernia. It attained smt status in 1957. Most of its inhabitants are employed in the food industry, but some work in its asphalt factory and two granite quarries.

Rokytno. II-8. A town smt (1986 pop 6,900) and a raion center in Rivne oblast. It was founded in 1888 by a Belgian firm that built a glass factory there to exploit the local sand deposits. The settlement, known as Okhotnykove until 1922, belonged to Ovruch county, Volhynia gubernia. In the interwar period Rokytno was under the Polish regime. Today its main employers are an aggregate plant and a glass factory.

Rokytno. III-16. A village and raion center in Belgorod oblast, RF. According to the Soviet census of 1926, Ukrainians accounted for 49.1 percent of the volost population.

Mykola Rokytsky: *Apple Tree* (tempera, 1923)

Rokytsky, Mykola [Rokyc'kyj], b 19 April 1901 in Zarihia, Kovel county, Volhynia gubernia, d 11 February 1944 in Kiev. Painter and designer. In 1927 he graduated from the Kiev State Art Institute, where he studied under M. *Boichuk. In the 1920s he was a member of the *Asso-

ciation of Revolutionary Art of Ukraine. His easel paintings include *Apple Trees* (1925), the cycle 'Blast Furnace Shop' (1929), and *Defense of Luhanske* (1932). He is best known for his frescoes, such as *Shift Change* at the Kiev State Art Institute (1927) and *Harvest Celebration* (with O. Myzin) at the Peasant Sanatorium in Odessa (1928). His early works were influenced by postimpressionist trends. He was accused of formalism and stylization by Stalinist critics, and in the 1930s he painted socialist-realist works, such as *Funeral of a Comrade in Arms* (1935), and designed tapestries and carpets.

Rokyty. A Carpathian mountain group located in the Hutsul Beskyd in Ivano-Frankivske oblast. Nearly 25 km long, the formation consists of a series of low and middle-sized peaks (Makivka, Rokyta Velyka, Rokyta Mala, and others). The peaks of the mountains and their approaches are generally bare. The mountains are a popular tourist site.

Roland. See Legion of Ukrainian Nationalists.

Yakiv Roll

Roll, Yakiv, b 2 November 1887 in Luhanske, Slovianoserbske county, Katerynoslav gubernia, d 3 November 1961 in Kiev. Botanist and hydrobiologist; corresponding member of the AN URSR (now ANU) from 1939. A graduate of Kharkiv University (1913), he taught and worked at the Kharkiv Agricultural Institute (1920–34), the Kiev Hydrobiological Station (1934–59; from 1939 director of the ANU Institute of Hydrobiology), the Kiev Forest Management Institute (1930–59), and Kiev University (1945–53). His research centered on the flora of freshwater algae and the phytoplankton of rivers in Ukraine.

Rolle, Antoni Józef (pseud: Dr Antoni J.), b 1830 in Henrykivka (now Rolia), near Sharhorod, Mohyliv county, Podilia gubernia, d 21 January 1894 in Kamianets-Podilskyi, Podilia gubernia. Historian and doctor; son of a Polonized French immigrant. He completed his studies in Kiev (1855) and worked as a doctor in Kamianets-Podilskyi (from 1861). He wrote a series of essays and semifictional works about Right-Bank Ukraine during the 16th to 19th centuries, using documents he sought out in the archives of H. Lubomirski's estate. His major work was *Zameczki podolskie na kresach multańskich* (Podilian Fortresses on the Borders of the Muntenia Region, 3 vols, 1869). A number of his stories appeared in *Kievskaja starina* in translation.

Roller, common (*Coracias garrulus*; Ukrainian: *raksha*, *syvoraksha*). Colorful migratory birds of the family Coraciidae, found from southern Europe to western Asia. Common rollers are 25–40 cm long and have vivid blue wings. In northern Ukraine they nest in tree hollows and in southern Ukraine, in ground holes, on cliffs, and on riverbanks. They are also known as Eurasian rollers. They feed on large insects, locusts, and lizards, thereby providing a service to agriculture.

Roman, b ? , d 1361. Metropolitan. After the death of Metropolitan Theognostos of Kiev in 1353, a struggle for control over Kiev metropolity began between Muscovy and Lithuania. The Lithuanian prince Algirdas, supported by the princes of Tver, dispatched Roman to Constantinople to be consecrated. Theognostos, however, had earlier appointed Aleksei, archbishop of Vladimir, as his successor. The Patriarch of Constantinople resolved the conflict by installing Roman as metropolitan of Lithuania and Volhynia in 1354, with his see in Navahrudak. His jurisdiction was extended to include the eparchies of Halych, Kholm, Lutske, Peremyshl, Polatsk and Turiv, and Volodymyr (but not Kiev or any eastern or northern eparchies). Both Algirdas and Roman were dissatisfied with this solution and attempted to win control over the rest of the metropolity. Roman also attempted to have the see of the metropolitan of Kiev and all Rus' moved from Moscow back to Kiev. Upon his arrival in Kiev (which remained in Algirdas's jurisdiction) Roman proclaimed himself metropolitan. He died suddenly shortly thereafter.

Roman, Mykhailo, b 11 November 1930 in Kobylnice, Bardejov county, Slovakia. Literary scholar in the Prešov region. He worked as an elementary school teacher (1950–2) and as a school inspector (1953). He graduated from Kiev University (1958) and has taught Ukrainian literature at Šafařík University in Prešov since 1958, where he became a professor in 1980. He was elected secretary (1977) and, later, head of the Ukrainian branch of the Slovak Writers' Union. A regular contributor to *Duklia* and a member of its editorial board, he is the author of books on Soviet literature in Slovakia in the 1930s (1964, in Russian), interwar Slovak translations of Soviet Russian literature (1970, in Slovak), Slovak-Ukrainian cultural and literary relations (1971), F. Lazoryk (1974), F. Ivanchov (1976), Ukrainian literature in Czechoslovakia since 1945 (1979), and Ukrainian writers in Czechoslovakia (1989). An edition of his selected literary criticism and studies appeared in 1987.

Roman. A Ukrainian folk dance that is meant to depict conditions before and during a windstorm. It is performed by several groups of three couples each. The tempo (2/4 time) is slow at the beginning but increases steadily to one of intense speed. The *roman* was popular in the Kiev region.

Roman Danylovych [Danylovyč], b ?, d 1258. Rus' prince; third of Danylo Romanovych's five sons. He married the heiress of the Austrian throne, Gertrude Babenberg, after the death of the last member of the Babenberg dynasty, Friedrich II. He ruled Austria briefly (1252) and resided in Himberg, near Vienna. Ca 1254 the Lithuanian duke Mindaugas granted him the rule of *Chorna Rus'

(including Navahrudak, Slonim, and Vaukavysk). In 1258 the Tatar leader *Burundai forced Roman, along with *Vasylko Romanovych (prince of Volhynia) and other Ukrainian princes, to join a campaign against Lithuania, and he was killed in battle.

Roman Ihorevych [Ihorevyč], b ? , d September 1211 in Halych. Kievan Rus' prince; son of the hero of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign), Ihor Sviatoslavych. Around 1205–6 he was elevated to the rule of Zvenyhorod by Galician boyars. He launched a campaign of territorial expansion in 1207 and fought his brother Volodymyr for the rule of Halych. After being forced out once by Hungarian forces he returned and sought to strengthen his power by eliminating rivals and enemies. In 1208–9 he killed approx 500 boyars, thereby prompting others to call upon the Hungarian king, Andrew II, for aid. Roman was again ousted from Halych and was captured by the Hungarians. The boyars purchased the custody of him and his brother Sviatoslav and hanged them.

Roman Mstyslavych [Mstyslavyč] (Romanko), b after 1160, d 14 October 1205 in Zawichost, on the Wisła River in Poland. Rus' prince; son of Mstyslav Iziaslavych and Agnieszka (daughter of the Polish prince Bolesław Krzywousty). When his father died he was bequeathed the Volodymyr-Volynskiy principality (1170). After the death in 1199 of the last Halych prince, Volodymyr Yaroslavych of the Rostyslavych dynasty, Roman united Galicia and Volhynia and created the powerful principality of *Galicia-Volhynia. An able political and military leader, he brought the restive boyars to heel and cultivated the support of the burghers. He waged two successful campaigns against the Cumans, in 1201–2 and 1203–4, from which he returned with many rescued captives. In 1204 he captured Kiev and thus became the most powerful of all the Rus' princes. He played an active role in the political affairs of neighboring states, such as Poland, Hungary, Byzantium, Lithuania, and Germany. Roman died in the Battle of Zawichost after he was ambushed by the Poles. He was described by a contemporary chronicler as a 'grand prince, the sole ruler of all Rus', who conquered the pagans and wisely adhered to the commandments of God.' He founded the *Romanovych dynasty (1199–1340).

Romanchenko, Ivan [Romančenko], b 16 March 1894 in Kishinev, Bessarabia, d 3 April 1977 in Lviv. Literary historian and bibliographer. He graduated from the Odessa Institute of People's Education (1928) and taught Ukrainian literature there and at the Odessa Music and Drama Institute (1930–6) and at postsecondary institutes in Nizhen (1938–9), Lviv (1939–41, 1945–55), Drohobych, and Kremianets. He was also a learned secretary of the Pushkin Committee and the Gorky Archive and a senior scholarly associate of the Institute of World Literature in Moscow of the Academy of Sciences of the USSR (1936–8) and worked at the Institute of Social Sciences of the AN URSR (now ANU) in Lviv. From 1928 he published many works, including articles on T. Shevchenko, M. Kostomarov, P. Kulish, I. Franko, and other Ukrainian writers, and numerous articles and a book (1964, with D. Zaslavsky) on M. *Draho-manov. He was also one of the compilers of a Russian bibliographic guide to Shevchenko (1941), and he edited the 1970 edition of Draho-manov's selected works. Ye.

Kravchenko's bibliography of Romanchenko's works was published in Lviv in 1968.

Romanchenko, Mykola [Romančenko], b 29 August 1921 in Romaniv, Novohrad-Volynskiy county, Volhynia gubernia. Writer. He graduated from the Ukrainian Communist Institute of Journalism in Kharkiv (1940) and has been deputy head and secretary responsible for the Lviv branch of the Writers' Union of Ukraine and chief editor (1966–8) of its journal *Zhovten'*. Since 1956 he has published a number of collections of poetry, the novelette *Zakhmarnyi harnizon* (The Garrison beyond the Clouds, 1966), and a book of essays, memoirs, and travel notes. An edition of his selected poetry appeared in 1981.

Romanchenko, Trokhym [Romančenko, Troxym] (pseud: Mykola Hrytsenko, Katerynoslavets, Trokhym R., Roman Trokhymenko), b 4 August 1880 in Poltava, d 11 June 1930 in Dnipropetrovske. Writer and ethnographer. A self-educated worker, for many years he was curator of the Katerynoslav (later Dnipropetrovske) Historical Museum and was active in the Katerynoslav Prosvita society. From 1905 he published poetry, stories, and ethnographic articles in literary miscellanies and journals. A small collection of his poems appeared in 1916, and a book of folk songs collected and transcribed by him was published in Kiev in 1980.

Tyt Romanchuk: *Back from the Journey* (1898)

Romanchuk, Tyt [Romančuk], b 1865 in Lviv, d 1911 in Lovran, Croatia. Painter and graphic artist. He studied at a technical school in Lviv and S. Grocholski's private studio in Munich and then worked as a caricaturist and illustrator in Lviv. He illustrated *Zerkalo* (1882), the Prosvita society's almanac, and M. Arkas's history of Ukraine (1912). His impressionist paintings include landscapes (*Forest Clearing*, 1890), portraits (*Yu. Fedkovych*, 1891), and genre paintings (*At the Watering Hole*, 1893).

Romanchuk, Yuliiian [Romančuk, Julijan] (Roman-czuk, Julian; pseud: U.S. Postupyshyn), b 24 February 1842 in Krylos, Stanyslaviv circle, Galicia, d 22 April 1932 in Lviv. Galician politician, community leader, journalist, scholar, and publisher; full member of the Shevchenko

Yulian Romanchuk

Bohdan Romanenchuk

Scientific Society (NTSh) from 1909; father of T. *Roman-chuk. He graduated from Lviv University and taught classics at a German gymnasium (1863–8) and at the Ukrainian Academic Gymnasium (1868–1900) in Lviv. He was elected to the Galician Diet (1883–95) and headed its Ruthenian Club (1889–95) and the populist *People's Council (1885–99). A leading representative of Western Ukrainian *populism, he spearheaded the campaign in the diet for Ukrainian autonomy, gymnasiums, and teachers' seminaries. In 1890 he was one of the architects of the so-called *New Era in Austrian, Polish, and Ukrainian political co-operation, but with its failure in 1894 he led the Ukrainian opposition to it. For nearly three decades Roman-chuk was a member of the Austrian Reichsrat (1891–7, 1901–18). He headed the Ukrainian Parliamentary Club (1901–10, 1916–17), served as its vice-president from 1910, and in 1905 was the only non-Jewish deputy who spoke in favor of a Jewish curia and equal rights for Jews.

Romanchuk was a founding member and the first leader (1899–1907) of the *National Democratic party. During the First World War he was chairman of the Vienna-based Ukrainian Relief Committee and *Ukrainian Cultural Council. After Austria's defeat he served in the *Ukrainian National Rada (October 1918 to June 1919) of the Western Ukrainian National Republic; on 10 November 1918 he swore in the members of its State Secretariat. On 14 March 1923, after the Conference of Ambassadors sanctioned Poland's occupation of Western Ukraine, he presided over the oath of loyalty to Ukrainian statehood, which thousands of Ukrainians took during the rally in St George's Square in Lviv.

Romanchuk was a distinguished activist in the Galician Ukrainian community. He was a founding member of the NTSh, the *Prosvita society (president in 1896–1906), the Ridna Shkola society, and the *Teachers' Hromada (president in 1912–15) in Lviv and was elected an honorary member of the last three organizations. He contributed to the Lviv gazettes *Slovo* and *Pravda* (which he helped edit in the 1870s); he was the founder (1879), publisher, and actual chief editor (until 1887) of the Lviv populist gazette **Bat'kivshchyna*; and he cofounded and contributed regularly to **Dilo*, Lviv's major Ukrainian newspaper from 1880, and Vienna's **Ruthenische Revue* (1903–5) and **Ukrainische Rundschau* (1905–14). He edited many Prosvita almanacs and monthly booklets, and from 1871 he compiled Ukrainian readers for elementary and junior high

schools in Galicia. He introduced, with O. Barvinsky, the phonetic orthography in schoolbooks in 1890 and in Prosvita publications in 1899. He edited and published in Lviv editions of T. Shevchenko's selected poetry (2 vols, 1894–5), poetry (1902), works (1907, 1912), and *Kobzar* (1914), and he wrote several articles on Shevchenko and his poetry, literary criticism, and the brochure *Die Ruthenen und ihre Gegner in Galizien* (1902). He initiated many Prosvita society publications and founded the library of Ukrainian classics *Rus'ka Pys'mennist', the first 27 volumes of which he edited (1904–20).

Romanchuk actively maintained contact with Ukrainian writers and political and community leaders in Russian-ruled Ukraine. In 1903 he spoke on behalf of Galicia's Ukrainians at the unveiling of I. Kotliarevsky's monument in Poltava. As a senior statesman and the de facto leader (together with Ye. Olesnytsky and K. Levytsky) of Galicia's Ukrainians in 1900–10, he was widely respected by the Ukrainian public.

I. Sokhotsky

Romanchych, Hanka [Romančyč], b 14 February 1907 in Kosiw (near Dauphin), Manitoba, d 14 October 1984 in St Catharines, Ontario. Home economist and community figure. As an employee of the Ministry of Agriculture, she toured the Ukrainian districts of Alberta from the late 1920s and lectured on topics related to home economics. During the Depression of the 1930s she organized rural women's circles, which produced handicrafts for sale. With the founding of the Ukrainian Women's Association of Canada (SUK) she became its first secretary and a founder of the Ukrainian Museum of Canada, for which she collected articles in Canada and Ukraine. She participated in international women's conferences, such as the First Congress of Ukrainian Women in Stanyslaviv (1934), a League of Nations panel on the status of women in Canada (1936), and the International Conference of Women's Councils (1947). In 1945–51 she was vice-president of SUK.

Romanenchuk, Bohdan [Romanenčuk], b 23 February 1906 in Voskresintsi, Kolomyia county, Galicia, d 9 January 1989 in Philadelphia. Literary scholar and critic. He emigrated to Austria in 1944 and then to the United States. He was a professor of Russian language and literature at Niagara University in 1965–80. Romanenchuk published and edited the literary journal **Kyiv* (1950–61) and was the compiler and editor of the unfinished literary encyclopedia *Azbukovnyk: Korotka ensyklopedia ukrains'koi literatury* (A Primer: A Short Encyclopedia of Ukrainian Literature, 2 vols, 1966, 1975). He also edited the bibliographic journal *Ukrains'ka knyha* (1971–81). His works include *Ukrains'ke pys'menstvo: Stara doba* (Ukrainian Writing: The Old Period, 1946), *Z zhyttia i tvorchosty Natalii Kobryns'koi* (From the Life and Works of Natalia Kobrynska, 1951), and *Bibliohrafiia vydan' ukrains'koi emigratsiinoi literatury, 1945–1970* (A Bibliography of Ukrainian Emigré Literature, 1945–70, 1974).

Romanenko, Illia, b 2 August 1909 in Maidanivka, Kiev county, Kiev gubernia, d 28 October 1982 in Kiev. Economist and agronomist; corresponding member of the All-Union Academy of Agricultural Sciences from 1956. A graduate of the Kiev Zootechnical Institute (1932), he worked at various research and teaching institutes in

Kiev. He directed the Ukrainian Scientific Research Institute of the Economics and Organization of Agriculture (1955–66) and headed the Department of Economics at the Ukrainian Agricultural Academy (1966–77). He wrote over 150 works, including the monographs *Sil's'ke hospodarstvo Ukrain's'koi RSR* (The Agriculture of the Ukrainian SSR, 1958), *Ekonomicheskaia effektivnost' intensivnykh sistem zemledeliia* (The Economic Efficiency of Intensive Systems of Land Use, 1963), and several works on animal husbandry in Ukraine.

Romanenko, Ivan, b 1794, d 1854. Kobzar and lirnyk who lived in Borzna and then Brytan, Chernihiv gubernia. His dumas, including those about a Cossack's departure, the orphaned and hapless Fedir, the Cossack Holota, Ivas Konovchenko, and Udovychenko, were written down by M. Bilozersky and published by A. Metlynsky (1854).

Romanenko, Oleksander, b 23 June 1901 in Odessa, d 4 September 1992 in Kiev. Stage and film actor and singer (bass); husband of I. *Steshenko. He began his theatrical career in 1922 in the touring Franko New Drama Theater (1924–5) and then worked in the State Podilian Ukrainian Drama Theater, Berezhil (1926–33), and the Kiev Ukrainian Drama Theater (1934–57). He acted in the films *Suvori dni* (Grim Days, 1933) and *Polumia hnyvu* (Flames of Rage, 1955).

Romanenko, Vitalii, b 13 July 1927 in Rusaniv, Brovary raion, Kiev oblast. Marksman. He won the 1954 world championship in the running-deer competition (world record) and the 1956 Olympic gold medal in the same event, and was a member of USSR teams that won world shooting championships in 1954, 1958, 1961, and 1962 and European championships in 1955 and 1959. He was the USSR shooting champion 11 times.

Romanenko, Yurii, b 1 August 1944 in Koltubanovskii, Orenburg oblast, RSFSR. Ukrainian pilot and astronaut. He graduated from the Chernihiv Higher Aviation School of Pilots (1966) and became an astronaut in 1970. He was commander of the Soiuz-26 space flight from 10 December 1977 to 16 March 1978. With H. Hrechko also on board, the Soiuz-26 docked with the Saliut-6 space station, and later with the Soiuz-27, Soiuz-28, and Progress-1 satellites. Romanenko returned on the Soiuz-27 spacecraft. He has flown two more space missions: on the Soiuz-38, with the Cuban astronaut A. Tamaio Mendes in 1980, and on the Soiuz TM-2 in 1987.

Romanesque. A style that became popular in European art and architecture in the 11th century and prevailed in western Europe until the end of the 12th century. In Ukraine the Romanesque style at first interacted with the dominant Byzantine style of construction, and it was not until the 13th century that it took hold there, primarily in western Ukraine. Adopting the style involved a change of building materials from brick and mortar to cut stone, which was readily available in the western regions. Of the churches built in the Romanesque style in western Ukraine, only St Panteleimon's Church in Halych has survived. Its western portal is marked by two pilasters and alternating columns, is covered by a semicircular vault, and recedes in concentrically narrowing arches typical of

the style. The exteriors of its apses are marked by decorative blind arcades. In secular Romanesque architecture only remnants of towers have survived. The one in Kamianets-Podilskyi is round with several stories of Romanesque window openings and a well-developed cornice. Some elements of Romanesque influence can also be seen in Chernihiv, particularly in the church of the Yelets'kyi Dormition Monastery.

In sculpture, which was for the most part engaged with relief and subordinated to architecture, natural forms were freely adapted to linear designs, with distortions and stylizations the result. In the St Panteleimon's Church in Halych the friezes are carved with acanthus foliage, and the capitals combine interlace patterns with foliage. No examples of Romanesque murals have survived. There are, however, Romanesque elements in the illuminations of the *Trier Psalter (11th century).

D. Zelska-Darewych

Romania. See Rumania.

Romaniuk, Anatol [Romanjuk, Anatol'] (Romanic, Anatole), b 28 February 1924 in Zarozhany, Khotyn county, Bukovyna. Demographer. He graduated from the University of Louvain (PH D, 1967). He then served as chief of the Demographic Bureau in Zaire (1953–60), a professor at the Universities of Ottawa (1964–80) and Montreal (1969–72), and a division director at Statistics Canada (since 1968). He is a coauthor of *The Demography of Tropical Africa* (1968), the editor of *Population Estimation Methods, Canada* (1987) and the author of *Fertility in Canada: From Baby-Boom to Baby-Bust* (1987) and of many articles on fertility in Africa.

Archbishop Vasyl (Volodymyr) Romaniuk

Romaniuk, Vasyl [Romanjuk, Vasyl'], b 9 December 1925. Human rights activist and political prisoner, and Orthodox archbishop. He was accused of participating in the Ukrainian resistance and imprisoned in labor camps in the Urals and Kolyma in 1944–53. In 1958 he was allowed to return to Ukraine. In 1959 he was rehabilitated. He took correspondence courses from the Moscow Theological Seminary and was ordained in 1964, and served in Kosmach, Kosiv raion, Ivano-Frankivske oblast. He was arrested in January 1972 and sentenced to seven years in special-regime labor camps in the Mordovian ASSR and five years' exile in the Yakut ASSR for his active defense of human and religious rights. In the camps he went on a

hunger strike in 1975 and joined the *Ukrainian Helsinki Group in February 1979. After his release in 1981, he was not allowed to do pastoral work until 1984, when he resumed his priestly duties in Pistyn, Kostiv raion. In 1990 he was consecrated Archbishop Volodymyr of the revived Ukrainian Autocephalous Orthodox church, with special responsibility for eastern Ukraine. A collection of Romaniuk's letters, appeals, essays, and materials relating to his case, *A Voice in the Wilderness*, was published in English translation in 1980.

Oleh Romaniv

Romaniv, Oleh, b 21 March 1928 in Sokal, Galicia. Materials scientist. After graduating from the Lviv Polytechnical Institute (1950) he supervised the planning and coordination of power station networks in Lviv. Since 1956 he has worked at the AN URSR (now ANU) Physical Mechanics Institute (until 1964 the Institute of Machine Building and Automation) in Lviv, and in 1977 he became its deputy director. His research has dealt with the thermomechanical strengthening of materials, fractography, and the mechanism of metal corrosion. In 1989 Romaniv was elected president of the revived *Shevchenko Scientific Society in Lviv.

Romaniv. See Dzerzhynske.

Romanivska, Mariia [Romanivs'ka, Marija], b 28 July 1901 in Yerky, Myrhorod county, Poltava gubernia, d 21 September 1983 in Kiev. Writer and teacher. She graduated from the Zinkiv gymnasium and worked as a teacher and later for the newspaper *Visti VUTsVK*. She is the author of the prose collections *Murashyna peremoha* (The Ant's Victory, 1927), *Bolotna solov'ikha* (The Mud Hen-Nightingale, 1959), and *Napovesni* (In Early Spring, 1927), the play *Nezhyt' leitenanta Shvainera* (Lieutenant Schweiner's Cold, 1941), the novelettes *Mariika* (1930), *Vysokyi lit* (The High Flight, 1950), and *Chervonyi tiul'pan* (The Red Tulip, 1956), and the novel *Liubov i myr* (Love and Peace, 1966).

Romankiv, Liubomyr (Lubomyr), b 17 April 1931 in Zhovkva, Galicia. Materials scientist and chemical engineer; member of the Shevchenko Scientific Society and IBM fellow since 1986. He graduated from the University of Alberta (1955) and the Massachusetts Institute of Technology (Ph D, 1962). He was the head of the Plast International Executive (1976–84) and an active member of the World Congress of Free Ukrainians. He is a senior scientist and manager of electrochemistry and device fabrication at the

IBM Thomas J. Watson Research Center in Yorktown Heights, New York. Among his patented inventions and technical advances are microfabrication technology for thin-film magnetic heads in high-performance disk and tape systems and laser-enhanced electrochemical processing. He has published numerous scientific papers and book chapters.

Roman-Kosh [Roman-Koš]. IX–15. The highest elevation in the Crimean Mountains. Situated in the Babuhan Yaila massif, the peak has a height of 1,545 m. Its top portion is bare, and its slopes are covered mainly with mountain meadow vegetation. It consists primarily of limestones. The mountain is located within the Crimean Game Preserve.

Romanov. A dynasty of tsars that ruled Russia and the Russian Empire from 1613 to 1917. With the ending of the *Riurykide dynasty in 1598 (its male side died out), Muscovy entered a period of widespread unrest that lasted until 1613, when Mikhail Fedorovich (1613–45), the son of the Patriarch of Moscow (a Romanov by birth), was elected tsar. His successors to the Russian throne were his son, Aleksei Mikhailovich (1645–76); his grandsons, Fedor Alekseevich (1676–82), Ivan V (1682–82), and *Peter I (1682–1725); *Catherine I (Peter I's second wife, 1725–7); *Peter II (Peter I's grandson, 1727–30), with whom the male side of the line died out; *Anna Ivanovna, Ivan V's daughter (1730–40); Ivan VI, great-grandson of Ivan V (1740–1); and *Elizabeth I (daughter of Peter I, 1741–61), with whom the female side of the line died out. Elizabeth's successors continued to use the dynastic name, although they were actually members of a German lineage. They included *Peter III, the son of Peter I's daughter, Anna, and Karl Friedrich, duke of Holstein-Gottorp (1761–2); Catherine II, the wife of Peter III and a princess of Anhalt-Zerbst by birth (1762–96), and their son, Paul I (1796–1801); Paul's sons, *Alexander I (1801–25) and *Nicholas I (1825–55); *Alexander II (son of Nicholas, 1855–81), his son, *Alexander III (1881–94), and his grandson, *Nicholas II (1894–1917), who abdicated the throne following the *February Revolution in 1917. In 1918, after the Bolsheviks seized power, Nicholas was murdered along with the members of his family. Many other members of the Romanov family were killed in 1918–19, although some managed to emigrate to Western Europe or the United States.

Romanova, Odarka (pseud: Odarka, O. Romanenko). Late 19th- and early 20th-century writer. She lived in Kiev, where she was part of the milieu of the Starytsky, Lysenko, and Kosach families and belonged to the literary circle *Pleiada. From 1887 her poems and stories were published in the journals *Zoria* and *Literaturno-naukovyi vistnyk* and in several literary miscellanies. She is the author of the collection *Pisni, dumky, legendy* (Songs, Thoughts, Legends, 1896) and of fables, many of which appeared in the Lviv children's biweekly *Dzvinkok*.

Romanovsky, Oleksii [Romanovs'kyj, Oleksij], b 18 February 1918 in Talova Balka, Oleksandriia county, Kherson gubernia. Literary scholar and politician. He graduated from the Kiev Pedagogical Institute (1951) and the CC CPSU Academy of Social Sciences (1958) and became scholarly secretary of the Institute of Literature of the AN

URSRS (now ANU). A former secretary of the Kiev City Committee of the CPU, in 1964 and again in 1977 he was appointed rector of the Kiev Pedagogical Institute of Foreign Languages, and later, rector of the Kiev Pedagogical Institute. From 1973 to 1977 he was minister of culture of the Ukrainian SSR, and in 1976 he was elected to the Auditing Commission of the CC CPU.

Romanovsky, Viktor [Romanovs'kyj], b 16 or 18 January 1890 in Hlukhiv, Chernihiv gubernia, d 10 February 1971 in Stavropol, RF. Historian, archeographer, and archivist. He studied at Kiev University (1909–14) under M. Dovnar-Zapolsky, lectured there (1914) and at the Kiev Archeological Institute (1918), and was deputy director (1914–21) and director (1921–31) of the *Kiev Central Archive of Old Documents. He was also active in the VUAN as a member of the Commission for the Study of the History of Western-Ruthenian and Ukrainian Law and the Commission for the Study of the Socioeconomic History of 18th- and 19th-Century Ukraine, and secretary (1929) and director (1930–4) of the Archeographic Commission; and was an associate of the Scientific Research Institute of the History of Ukrainian Culture in Kharkiv. Romanovsky was arrested during the Stalinist terror in 1934 and imprisoned in a labor camp in Kazakhstan. After his release he lectured at the Karaganda Teachers' Institute (1940–7) and then chaired the history department at the Stavropol Pedagogical Institute.

Romanovsky wrote several articles on 17th- and 18th-century Ukrainian history, a book about the pioneering printer I. Fedorovych (1925), a book of essays in archival studies (1927), and a critical evaluation of the 1666 population census in Left-Bank Ukraine and its organization (1967). He edited the VUAN publication of the 1666 census books (1931). His doctoral dissertation (1947) on the state economy of Ukraine in the second half of the 17th century remains unpublished, as does his compilation of the codex of charters granting Magdeburg law to 16th- to 18th-century Ukrainian cities.

A. Zhukovsky

Romanovych [Romanovyč]. A branch of the *Riurykide dynasty, descended from *Roman Mstyslavych, that ruled the Principality of Galicia-Volhynia from 1200 to 1340. Its most noted members were the princes *Danylo Romanovych, *Lev Danylovych, *Yurii Lvovych, *Andrii Yuriiovych, *Lev Yuriiovych, and *Yurii II Boleslav.

Romanovych, Marko [Romanovyč], b 13 December 1904 in Sniatyn, Galicia, d 8 December 1958 in Grimsby, Ontario. Basilian priest. He was ordained in 1930 and came to Canada in 1933 to teach at the Basilian novitiate in Mundare, Alberta. In 1938 he founded the journal *Svitlo, which he edited until 1943, when he moved to Grimsby with the relocated novitiate. He was also the initiator of the Missionary Sisters of Christian Charity, a community established in 1946.

Romanovych, Teofila [Romanovyč] (real surname: Rozhankivska), b 16 May 1842 in Dovhopillia, near Putylyv, Bukovyna, d 16 January 1924 in Chernivtsi, Bukovyna. Actress and theater director. She began her career as an actress in the Ruska Besida Theater (1867–73), where she played character roles. In 1873 she led her own touring company. In 1874–80, as administrative director of the

Ruska Besida Theater, she enlarged its repertoire and improved its artistic level by recruiting many talented actors and directors. In 1880–2 she led her own troupe, and in 1883–5, the amateur theater in Chernivtsi.

Romanovych-Slavitynsky, Oleksander [Romanovyč-Slavityns'kyj], b 14 July 1832 in Voitove, Pereiaslav county, Poltava gubernia, d 7 September 1910. Legal scholar. After graduating from the law faculty of Kiev University (1855) he taught at a gymnasium and prepared his MA thesis on the introduction of gubernial administration in Russia (1859). In 1862 he returned from Western Europe, where for two years he had studied law in London, Heidelberg, and Paris, and began to teach Russian and foreign law at Kiev University. He wrote a textbook on state law (1872), the fundamental *Dvorianstvo v Rossii ot nachala XVIII v. do otmeny krepostnogo prava* (The Nobility of Russia from the Beginning of the 18th Century to the Abolition of Serfdom, 1870), and biographies of M. Ivanyshch (1876) and M. Speransky (1873). His memoirs were serialized in *Vestnik Evropy* in 1903.

Natalia Romanovych-Tkachenko

Gen Joseph Romanow

Romanovych-Tkachenko, Natalia [Romanovyč-Tkačenko, Natalja], b 1884 in Skvyra, Kiev gubernia, d 1933 in Kiev. Prose writer. In 1905 she started to publish short stories in *Literaturna-naukovyi vistnyk*, and later she went on to publish the trilogy *Mandryonytsia* (The Wanderer) and her notes of travels to Galicia (1917–18). She was a member of the writers' group Pluh, and from 1923 she contributed to the journal *Cherovonyi shliakh*. The published collections of her short stories include *Zhyttia liud-s'ke* (Human Life, 1918), *Nespodivanyi zemletrus* (The Unexpected Earthquake, 1928), *Chebrets' zillia* (Wild Thyme, 1928), and *Zin'kova zirka* (Zinko's Star, 1929). Also published was the book *Nas klychut' hudky: Zapysky revoliutsionerky 900-ykh rr.* (The Sirens Are Calling Us: Notes of a Revolutionary of the 1900s, 1931).

Romanow, Joseph [Romaniv, Yosyp], b 3 May 1921 in Saskatoon. General of the Canadian Armed Forces. After serving as a pilot of the Royal Canadian Air Force (RCAF) in Europe (1944–6) he completed his education at the University of Saskatchewan (1950), the Cranfield Institute of Technology (England, 1957), and the National Defence

College of Armed Forces (1971). Advancing quickly in the air force he served as section head at Air Materiel Command (1951–5); commanding officer of the RCAF quality control laboratory in Ottawa (1957–8); chief technical officer, senior staff officer, and chief of staff at Air Transport Command (1961–70); deputy chief of staff at NATO headquarters in Germany (1971–4); and director general of manpower and organization at National Defence headquarters in Ottawa (1974–). He is an active member of the Ukrainian Catholic church and the Ukrainian Canadian Servicemen's Association and a frequent speaker at Ukrainian community events.

Premier Roy Romanow

Romanow, Roy [Romaniv, Roman], b 12 August 1939 in Saskatoon. Lawyer and politician. Educated at the University of Saskatchewan (LL D, 1964), Romanow was first elected to the Saskatchewan legislature in 1967 as the New Democratic party member for Saskatoon–Riversdale. He was re-elected in 1971, 1975, and 1978; defeated in 1982; and re-elected in 1986. He was deputy premier and attorney general of Saskatchewan (1971–82) and minister of intergovernmental affairs (1979–82). In 1981 he played a pivotal role in federal-provincial negotiations on the patriation of the Canadian Constitution and the creation of the Canadian Charter of Rights and Freedoms. He was chosen as party leader in 1987 and elected premier of the province in October 1991.

Romans. During its eastward expansion in the 1st century BC, the Roman Empire seized the southern and eastern coasts of the Black Sea. It successfully waged war against the *Pontic Kingdom and annexed its vassal states, the *Bosporan Kingdom and the Hellenic *ancient states on the northern Black Sea coast. Roman control there was entrenched after the defeat of a rebellion in 48 BC led by Pharnaces II, the son of the last Pontic king, Mithridates IV Eupator. Julius Caesar appointed a ruler for the Bosporan Kingdom, and Roman garrisons were stationed in every Hellenic colony. Roman control in the region was frequently interrupted by invasions of various steppe nomadic peoples, but it was consolidated after Trajan conquered Dacia in 106 AD, strengthened the Roman garrisons, and built a series of fortifications (see *Trajan's Walls). In the 2nd and 3rd centuries *Chersonese Taurica was the center of the Roman army and navy in the Crimea. Rome's control did not extend far beyond the coastal cities

and colonies, however, and its domination of the northern Pontic littoral ended during the great migration of peoples and the arrival of the *Goths in the late 3rd century. In 271 AD Roman legions were withdrawn south of the Danube.

During their rule in what is today Ukraine, the Romans established economic and cultural contacts with the neighboring *Scythians, *Sarmatians, and tribes of the *Zarubyntsi culture. The coastal cities were thriving centers where agricultural products from the Ukrainian territories were traded for Roman-imported weapons, jewelry, textiles, ceramics, and other goods. Many Roman merchants settled there and traveled into the Ukrainian hinterland. Roman coins have been found in over 1,000 locations in Ukraine, and 137 large hoards have been discovered there, evidence that the Roman silver denarius was a principal currency in Ukraine in the 2nd to 5th centuries. Archeologists' discoveries of Roman artifacts of daily use, luxury items, and pagan idols indicate that the Romans influenced the material culture and religious worldview of Ukraine's ancient inhabitants.

Pliny, Ovid, Tacitus, Ammianus Marcellinus, and Justinian are among the Roman writers and historians who wrote about the peoples of Eastern Europe. Ukrainian scholars who have written about the Romans include M. Drahomanov (an 1869 study on the historical significance of the Roman Empire and Tacitus), I. Franko, I. Sharanovych, O. Partytsky (in his 1881 history of ancient Galicia), M. Sonevytsky, M. Smishko, M. Braichevsky, and M. Miller.

A. Zhukovsky

Romanticism. An artistic and ideological movement in literature, art, and music and a world view which arose toward the end of the 18th century in Germany, England, and France. In the beginning of the 19th century it spread to Russia, Poland, and Austria, and in the mid-19th century it encompassed other countries of Europe as well as North and South America. Romanticism, which appeared after the French Revolution in an environment of growing absolutism at the turn of the 19th century, was a reaction against the rationalism of the Enlightenment and the stilted forms, schemata, and canons of *classicism and, at times, sentimentalism. Paramount features of romanticism were idealism, a belief in the natural goodness of the individual person, and, hence, the cult of feeling as opposed to reason; a predilection for the more 'primitive' expressions of human creativity as being closer to the fundamental goodness of the person and, hence, an enthusiasm for folk art, poetry, and songs; a belief in the perfectibility of the individual person and, hence, a

predilection for change and the espousal of 'striving' as a mode of behavior; and a search for historical consciousness and an intensified learning of history (historicism), coupled at times with an escape from surrounding reality into an idealized past or future or into a world of fantasy. The Romantic world view fostered its own style and gave rise to specific genres of literature: ballads, lyrical songs, romances, and historical novels and dramas.

Certain elements of romanticism, especially those which emphasized the value of the folk, such as J. Herder's notion of the importance of folklore in the development of literature, encouraged a resurgence of interest in folklore and history. The study of both resulted in a general reawakening of Slavic peoples, including the Ukrainians. The first manifestations of the influence of romanticism in Ukraine were the publications in St Petersburg of O. Pavlovsky's *Grammatika malorossiiskogo narechiia* (The Grammar of the Little Russian Dialect) in 1818 and of N. Tsertelev's *Opyt sobraniia starinnykh malorossiiskikh pesnei* (An Attempt at Collecting Ancient Little Russian Songs) in 1819 – a collection remarkable not only for the songs but, more important, for its emphasis on the rich and unique nature of Ukrainian folk songs. Appreciation of Ukrainian folk songs was strengthened by the publication in Moscow in 1827 of M. Maksymovych's collection *Malorossiiskie pesni* (Little Russian Songs). In literature the precursor of Ukrainian romanticism was P. Hulak-Artemovsky. His ballads, like Ukrainian romanticism in general, were less a protest against the rather insignificant classical movement in Ukraine than a reaction against the prevalent concept that only burlesque and travesties could be written in the 'peasant' vernacular – the adjective aptly describes the status of the Ukrainian language in the Russian Empire at the beginning of the 19th century.

Also influential in the development of Ukrainian romanticism were the so-called 'Ukrainian schools' in Russian and Polish literature. In Russian literature the leading members of the 'Ukrainian school' were not only Russians (K. Ryleev, F. Bulgarin) enthralled by the exotic nature of things Ukrainian (nature, history, folk mores, and folklore) but also Ukrainians who wrote in Russian (O. Somov, M. Markevych, Ye. Hrebinka, and, foremost among them, N. Gogol). In Polish literature the 'Ukrainian school,' with its fascination with Ukrainian 'exotic' themes, consisted of writers such as A. Malczewski, J.B. Zaleski, and S. Goszczyński.

The interest in folklore and history spawned by romanticism in Ukraine produced a wealth of material: collections of folk songs by Maksymovych (1827, 1834, 1849), compilations of historical songs and *dumas by I. Sreznevsky in *Zaporozhskaia starina* (1833–80), a gathering of oral folk literature by P. Lukashevych (1836), and numerous publications of historical monuments and works, by D. Bantysh-Kamensky, M. Markevych, O. Bodiansky, A. Skalkovsky, and others.

The first locus of Ukrainian romanticism was the Kharkiv Romantic School. The group was centered around Sreznevsky and consisted of poets such as L. Borovykovsky, A. Metlynsky, M. Kostomarov, M. Petrenko, and O. Korsun. It published two miscellanies, *Ukrainskii al'manakh* (1831) and *Zaporozhskaia starina*.

Contemporaneously with the Kharkiv Romantic School appeared the Ruthenian Triad in Galicia. It consisted of I. Vahylevych, Ya. Holovatsky, and, primarily, M. Shash-

kevych and was most noted for the publication of the almanac *Rusalka Dnistrovaia* (The Dniester Nymph, 1836). The romanticism of the Ruthenian Triad lay in its promulgation of the folk language (ie, Ukrainian) in opposition to the prevalent *yazychiie*. The followers of the triad's program were such Galician authors as M. Ustyianovych and A. Mohylnytsky, as well as O. Dukhnovych in Transcarpathia.

The second phase of Ukrainian romanticism, which had a more pronounced national and political program that resulted in a greater variety of literary works, occurred in the late 1830s and early 1840s in Kiev. The Kievan group consisted of Maksymovych, P. Kulish, T. Shevchenko, and the former members of the Kharkiv Romantic School Metlynsky and Kostomarov, who moved to Kiev. The group's philosophical and ideological focus came from the Cyril and Methodius Brotherhood, whose Christian-Romantic program, expressed in *Knyhy bytiia ukrains'koho narodu* (Books of the Genesis of the Ukrainian People), had been inspired by Kostomarov, and manifested itself most artistically in the messianic poetry of Shevchenko. Other expressions of that phase of Ukrainian romanticism can be found in the almanacs and miscellanies *Kievlianin* (1840, 1841, 1850), *Lastivka* (1841), *Snip* (1841), *Molodyk* (1843, 1844), and *Iuzhno-russkii sbornik* (1848). Other writers tied to the Kievan group of Romantics were V. Zabala from Chernihiv, O. Afanasiev-Chuzhbynsky from Poltava, and the poet and editor Bodiansky, who lived in Moscow.

The third phase of Ukrainian romanticism centered around the journal *Osnova* (1861–2), published in St Petersburg by the former members of the Cyril and Methodius Brotherhood V. Bilozersky, Kostomarov, and Kulish. Also part of that late Romantic phase are authors such as O. Storozhenko, with his fantastic stories full of the more gory and Gothic folkloric motifs, poets such as Ya. Shchoholev, and the Bukovynian bard Yu. Fedkovych.

The poetry of Ukrainian romanticism can be divided, in general, into two streams: national-patriotic lyricism, based in the majority of the Ukrainian Romantic poets on an idealization of the heroic Cossack past, and subjective personal lyricism, found to a lesser degree in all of the poets but predominantly in such authors as Petrenko, Zabala, and Shchoholev. The Ukrainian Romantic movement differs from the Russian in the historicism of its epic genre, its idealization of the past, and its predilection for the songlike structure, with motifs of national as opposed to personal longing. Ukrainian romanticism is more akin to Polish romanticism.

Having discovered the importance of folk poetry and folk art in the development and growth of literature, and the importance of historical monuments and research for the development of national consciousness, Ukrainian romanticism also contributed to the independence of the Ukrainian literary language and to the perfection of poetic tropes. Nonetheless the Romantic poets, having chosen the ballad and the lyrical poem as the prime mode of expression, did little in other genres. The exceptions were the early epic poems by Shevchenko, the single historical novel *Chorna rada* (The Black Council) by Kulish, and the valiant attempts at historical dramas by Kostomarov. But Ukrainian themes in the works of the Russian and Polish Romantics did much to popularize Ukraine, its culture and history, in the Western world.

Romanticism gave way in the second half of the 19th century to realism, with its naturalistic method and populist philosophy. Yet elements of romanticism began to appear again in the first decades of the 20th century, during the height of *modernism. That 'neoromanticism' is characterized by a return to folklore as the source of inspiration (eg. M. Kotsiubynsky's *Tini zabutykh predkiv* [Shadows of Forgotten Ancestors, 1911], Lesia Ukrainka's *Lisova pisnia* [The Forest Song, 1911], H. Khotkevych's *Kaminna dusha* [The Soul of Stone, 1911]), or to the personification of nature as a self-willed participant in human life (O. Kobylianska's story 'Bytva' [Battle]). A type of neoromanticism also appeared in the Ukrainian literature of the 1920s in the poetic works of the so-called neo-Romantics M. Bazhan, O. Vlyzko, D. Falkivsky, and V. Sosiura; in the prose of Yu. Yanovsky; and in the concept of 'vitaism' (vitalized romanticism) of M. *Khvylovy.

The ideas, themes, and subjects of romanticism had a profound influence on art toward the end of the 18th and the beginning of the 19th centuries in Western Europe and in the Slavic countries neighboring on Ukraine. In Ukraine romanticism had its effect on the art of non-Ukrainians living in Ukraine, such as the Russian V. Tropinin, the Armenian I. Aivazovsky, and the Poles J. Kossak and A. Grottger. The influence of romanticism can also be seen in the early paintings of Shevchenko and K. Trutovsky, as well as in the works of the Ukrainian artists I. Soshenko, A. Mokrytsky, O. Slastion, M. Ivasiuk, S. Vasylyvsky, M. Pymonenko, and A. Zhdakha, among others.

Romantic influences in Ukrainian music, however, were meager and can be seen only in the works of some composers in the second half of the 19th century, such as S. Hulak-Artemovsky, M. Lysenko, V. Matiuk, P. Vorobkevych, and A. Vakhnianyn, especially in their compositions to the words of Romantic poets. In theater the influence of romanticism was very small. Ukrainian historical plays did not achieve prominence, and only a Romantic sentimentality can be seen in the standard repertoire of ethnographic realism. Thus Ukrainian romanticism was predominantly a poetic phenomenon, the importance of which lies first and foremost in its contribution to the reawakening of Ukrainian national consciousness through the recaptured and idealized heroic past and rich and unique folkloric heritage.

B. Kravtsiv, D.H. Struk

Romanus, Paolo (Pavlo Rymliany), b ? in Rome, d 1618 in Lviv. Italian architect. His name first appears in Lviv guild records in 1585. He built various buildings in Lviv and took part in the construction of Lviv's Dormition (1591–8), Bernardine (1606–30), and Benedictine churches and Kampian Chapel. He creatively adapted the Italian Renaissance style to local traditions and needs.

Mykhailo Romanyshyn: *Shepherd* (fragment, 1968)

Romanyshyn, Mykhailo [Romanyšyn, Myxajlo], b 16 August 1933 in Velykyi Bereznyi, Transcarpathia. Painter. After graduating from the Uzhhorod School of Applied Art (1953), where he studied under A. Erdeli, Y. Bokshai, and F. Manailo, he studied under K. Trokhymenko and H. Melikhov at the Kiev State Art Institute (1954–60). His work consists of genre paintings in the socialist realist manner such as *Logger* (1963) and *Labor Festival* (1975), and landscapes, such as *Moonlit Night: Kiev* (1980). An album of his works was published in 1979. Romanyshyn is director of the Kiev Museum of Ukrainian Art.

Romanyshyn, Oleh [Romanyšyn], b 7 October 1941 in Lviv. Journalist. After emigrating to Argentina (1949) and then Canada (1960) he completed his studies in Hispanic

and Slavic studies at the University of Toronto (PH D, 1979). Since 1981 he has been editor of the newspaper **Homin Ukraïny*. His writings include articles on literary, historical, and political issues, in émigré Ukrainian and Canadian publications. In 1990 he was elected president of the **Canadian League for Ukraine's Liberation*.

Roman Romanyshyn: *Hunter* (from the Carpathian Easter Eggs series, mixed media, 1987)

Romanyshyn, Roman [Romanyšyn], b 13 July 1957 in Tovmach, Ivano-Frankivske oblast. Painter and graphic artist. He graduated from the Lviv Institute of Applied and Decorative Arts (1982). A prolific and inventive artist, he attracted attention through his use of an unusual, wax-resistant method of achieving a pattern of white lines in his early watercolors. Romanyshyn has continued experimenting in mixed media with techniques based on Ukrainian (particularly Boiko) Easter egg decoration, icon painting, and folk painting on glass. His work is dominated by sophisticated, symbolic images rooted in Ukrainian mythology, folklore, literature, and history (eg, the diptych *Two Looks into the Well*, 1987). Solo exhibitions of his works have been held in Lviv (1990), Kiev (1991), and Toronto (1991).

Romanytsky, Borys [Romanyts'kyj], b 31 March 1891 in Chornobai, Zolotonosha county, Poltava gubernia, d 24 August 1988 in Lviv. Actor, director, and public figure. He completed study at the Lysenko Music and Drama School in Kiev (in 1915) and joined the Society of Ukrainian Actors. From 1918 he worked in the People's Theater, and in 1922 he became one of the founders and the artistic director (until 1948) of the Zankovetska Theater (see **Lviv Ukrainian Drama Theater*). Romanytsky's creative activi-

Borys Romanytsky

ty spanned nearly 300 roles and 70 productions. In his repertoire were such important roles as Pototsky in I. Karpenko-Kary's *Sava Chalyi*, Vyhovsky in L. Dmyterko's *Naviky razom* (Forever Together), and the title roles in the M. Starytsky and O. Korniiichuk versions of *Bohdan Khmel'nyts'kyi*, K. Gutzkow's *Uriel Acosta*, and W. Shakespeare's *Othello* (his was the first Ukrainian interpretation of this last role). A versatile actor, he was equally successful in both heroic and character roles. He played Karl and Franz in F. Schiller's *Die Räuber*, Stepan and Koval in M. Kropyvnytsky's *Nevol'nyk* (The Captive), Panas and Tsokul in I. Karpenko-Kary's *Naimychka* (The Servant Girl), and Koshkin and Shvandia in K. Trenev's *Liubov' Iarovaia*. Romanytsky was also a director in **Saksahansky's* troupe, most effective with realistic-psychological dramas, such as I. Franko's *Ukradene shchastia* (Stolen Happiness, 1922, 1940, and 1949). He was a member of the Lviv municipal and oblast governments and a cofounder of the Ukrainian Theatrical Society. Romanytsky is the author of *Ukraïns'kyi teatr u mynulyomy i suchasnomu* (Ukrainian Theater in the Past and Present, 1950). A biography, by B. Zavadka, was published in Kiev in 1978.

V. Revutsky

Rome. See Italy and Vatican.

View of the center of Romen, from the opposite bank of the Sula River, with the Cathedral of the Holy Spirit in the background

Romen or **Romny.** III-14. A city (1989 pop 57,000) at the junction of the Romen and the Sula rivers and a raion center in Sumy oblast. It was first mentioned, as a border fortress of Kievan Rus', in the Laurentian Chronicle under the year 1096. From the mid-14th century it belonged to

the Grand Duchy of Lithuania, and from the beginning of the 17th century, to the Polish Commonwealth. After B. Khmelnytsky's uprising it became a company center of Myrhorod (1648–58) and later Lubni regiment (1658–1782). With the abolition of the Hetman state the town became part of Chernihiv vicegerency, and in 1783 it obtained the rights of *Magdeburg law. In 1802 it became a county center in Poltava gubernia. In the 19th century Romen was a prosperous trading town, and until 1852 the home of one of Ukraine's largest annual fairs. Today the city is an industrial center with a machine-building, a building-materials, and a food-processing industry. Its architectural monuments include the wooden St George's Church (1730), the stone Cathedral of the Holy Spirit (1742–6), and the Assumption Church with its belfry (1753–97). The remains of the *Monasteryshche settlement are nearby.

Romen Drainage System. A canal network covering 14,100 ha of the floodlands of the Romen and the Torhovytsia rivers in Sumy and Chernihiv oblasts. It was constructed in 1933 and rebuilt in 1954. The total length of the pipes and canals is 517.3 km.

Romen geese

Romen goose (*romenska poroda husei*). A popular breed of domestic *goose in Ukraine; its name derives from the city of Romen, in Sumy oblast. Most Romen geese have one or two folds on the abdomen and no wattle on the head. Their plumage is gray, white, or mottled. Romen geese are bred in Chernihiv, Sumy, Poltava, Kiev, Kharkiv, Luhanske, Kherson, and Odessa oblasts. Ganders reach 5–7 kg in weight, geese, 5–6 kg. They are readily force-fed, and yield fatty, juicy, highly caloric meat.

Romen River. A right-bank tributary of the Sula River. It is 121 km long and drains a basin area of 1,660 sq km. It originates in east central Sumy oblast and cuts into Chernihiv oblast, where it briefly bends back to join the Sula at Romen. Its waters are used for irrigation and domestic consumption.

Romen-Borshcheve culture. A medieval culture whose typology is based on Slavic fortified frontier settlements of the 8th to 10th centuries located in the upper reaches of the Desna, Seim, Sula, Psol, and Vorskla rivers. The distinctive features of this culture include the physical location of settlements for defensive purposes, semi-pit houses with clay or stone stoves, hand-built pottery, and crematory funeral practices. Its people (mainly *Siverianians) engaged in agriculture and practiced well-developed trades, including metallurgy. Notable examples of this culture's settlements include *Monasteryshche (near Romen) and the *Novotroitske fortified settlement.

Mykhailo Romensky

Bishop Teodor Yurii Romzha

Romensky, Mykhailo [Romens'kyj, Myxajlo], b 20 November 1887 in Kursk, Russia, d 21 November 1971 in Kiev. Opera singer (bass). He studied with L. Donskoi at the Moscow Conservatory (1913–16) and then appeared as a soloist with theaters in Rostov-na-Donu (1920–34), Kharkiv (1934–42), and Kiev (1942–58) in operas by M. Lysenko, S. Hulak-Artemovsky, M. Glinka, A. Dargomyzhsky, K. Dankevych, and C. Gounod. In recital he performed vocal chamber music and Ukrainian folk songs. In 1947–52 he taught singing at the Kiev Conservatory.

Romer, Eugeniusz, b 3 February 1871 in Lviv, d 28 January 1954 in Cracow. Polish geographer and cartographer; member of the Polish Academy of Learning and the Polish Academy of Sciences. He graduated from Lviv University (PH D, 1894) and was professor there (1911–31). He wrote a number of synthetic works on the borders, morphology, and climate of Poland. In his works he treated Western and Right-Bank Ukraine as an integral part of Poland on the ground that until 1772 they were part of the Polish Commonwealth. He did so in *Geograficzno-statystyczny atlas Polski* (Polish Geographical-Statistical Atlas, 1916), which was used as an authoritative source for establishing the borders of Poland in 1919–21. Romer served as a consultant on borders to the Polish government at the Paris Peace Conference. His attitude toward Ukraine and Ukrainians was hostile.

Romny. See Romen.

Romodan route. An ancient north–south trade route that traversed Left-Bank Ukraine, through Romen, Lohvytsia, Lubni, and Kremenchuk, as part of the route from Russia to the Crimea. It avoided larger settlements and sandy expanses and crossed relatively few rivers. Until the construction of railway lines in the 1860s to 1880s, the Romodan route was one of the most important of the routes used by the Left-Bank *chumaks in their journeys to the Crimea for salt. In the 19th century it was also used for driving herds from Ukraine to the central gubernias of the Russian Empire.

Romzha, Teodor Yurii [Romža, Teodor Jurij], b 14 April 1911 in Velykyi Bychkiv, Transcarpathia, d 1 November 1947 in Mukachiv. Ukrainian Catholic bishop. He studied philosophy and theology in Rome at the Collegium Russicum, and was ordained in 1936. He served as a parish priest in Berezove, Transcarpathia, and a priest and professor of philosophy at the Uzhhorod Seminary (from 1939). In 1944 he was consecrated as an assistant bishop to Bishop M. Dudash and administrator of Mukachiv eparchy. He was assassinated when he opposed the liquidation of his eparchy and refused to co-operate with the Soviet authorities.

Rook (*Corvus frugilegus*; Ukrainian: *haivoron*, *hrak*). An Old World gregarious bird of the family Corvidae, growing to up to 45 cm in length, similar to a carrion *crow except with white skin at the base of the sharp bill. In Ukraine rooks are found year round, nesting in colonies in high trees. They feed on agricultural and forest pest insects, but they may also dig up planted seedlings.

Rooster (*piven* or *kohut*). The rooster was a common figure in Ukrainian folk literature and mythology. It was seen as the summoner and symbol of the sun. Transplanted into the Christian context, the rooster became a symbol of faith; hence, in Ukraine roadside crosses were often decorated with images of roosters. It was also accepted as an image of the independent farmer in Ukrainian folk sayings. The rooster was believed to protect farm animals from evil powers. It was used in folk fortune-telling practices and as a sacrificial bird in wedding and house-building rites.

Ropska, Oleksandra [Rops'ka], b 23 April 1897 in Shyriaievo, Voronezh gubernia, Russia, d 20 April 1957 in Kiev. Opera singer (mezzo-soprano). A graduate of the Saratov Conservatory (1919), she began singing in Poltava, and then worked with the opera theaters of Odessa (1926–7), Kharkiv (1927–8), and Kiev (1928–57), with which she appeared in operas by M. Lysenko, N. Rimsky-Korsakov, P. Tchaikovsky, and G. Verdi. She taught singing at the Kiev Conservatory (from 1944).

Ros region (Porossia). A historical-geographic region located between the Ros and the Stuhna rivers south of Kiev (today the southern part of Kiev oblast and northern tip of Cherkasy oblast). Ros was settled originally by the Polianians, and developed into a frontier area of the Rus' empire. A number of fortified towns were established there in the 10th century, among them Bohuslav, Korsun, Kaniv, and Yuriv (later Bila Tserkva). War captives, among them many Poles, were settled in the region to pro-

vide a frontline force against attacks by steppe nomads. In the 12th century, Pechenegs and Turks began settling in the region and mixing with the local population. The area was overrun by the Tatars in the 13th century, and its fortresses sacked. All references to Ros as a distinctive region then ceased.

The Ros River

Ros River [Ros']. A right-bank tributary of the Dnieper River. It is 346 km long and drains a basin area of 12,575 sq km. It originates in the Dnieper Upland and flows through Vinnytsia, Kiev, and Cherkasy oblasts. There are several small hydroelectric stations on the river and water from it is used for irrigation. The major centers on the river include Bila Tserkva, Bohuslav, and Korsun-Shevchenkivskiy.

Rosalia (Rusallia, Troitsia, Zeleni sviata). A summer feast held 50 days after Easter, and associated with the pagan cult of the dead and the *rusalky. The name 'Rusallia' is derived from the ancient Roman festival of the roses (23 May), which reached Ukraine via the southern Slavs and was incorporated into its pagan calendar as a fertility festival.

The first mention of Rosalia on Ukrainian territory is in the Primary Chronicle under 1067. On the eve of the feast, houses were adorned with green branches and linden or maple leaves. In church the floor was covered with fragrant grasses, including wormwood. On the feast day itself green branches were set up in the fields to protect the growing grain from thunder and evil spirits and to ensure fertility. For this reason the festival is also known as Zeleni sviata 'Green Feast.' In some regions the young people walked about the fields with torches, cracking whips and firing guns into the air to drive away evil spirits. For several days young men and women met in the fields, usually between villages, for games that were frequently erotic and were condemned by churchmen as 'demonic.' The young women collected food and carried a decorated tree into the woods or to a stream, where for days and nights they entertained and frolicked with the young men. The Rosalia was a youth festival from which adults (with the exception of young childless wives) were barred. In some regions this pagan festival survived into the 20th century.

In the 17th and 18th centuries mass pilgrimages to certain monasteries in Western Ukraine took place during this season. Foreigners called them 'girl markets' because many young couples met and married during the pilgrim-

ages. In such a way the church legitimized folk traditions of pagan origin. In eastern Ukraine, particularly in the Poltava region, a personified Topolia ('poplar') was led through the village. In Volhynia the figure was known as Lialia ('doll'), and in Polisia, as Kusta. The favorite rites included dressing girls up as *rusalky*, wreath weaving, dancing *rusalka* group dances, and singing *rusalka* songs. A bachelor who fancied a girl planted a *mai* (a green birch) in her yard. In the Prešov region this custom is still practiced. Until the 18th century, in Western Ukraine the bachelors of a village elected a '*rusalka*' reeve, who ran the village for three days.

Rites honoring the dead were an integral part of the Rosalia. In Volhynia a seven-course commemorative feast was held on Rosalia Saturday. According to folk belief the souls of the departed (called *rusalky*) came out of their graves on this day. To win their favor, food and drink were placed on the graves. The *rusalky* were believed to leave the streams on Rosalia Thursday (called *rusalchyn* or *mavskyi* Easter) and to spend a week in the forests and fields looking for foolhardy bachelors, whom they tickled to death. In some localities Rosalia week concluded with *rusalka* games or a *rusalka* farewell procession.

Various rituals were conducted to protect livestock from spells cast by witches; smoke from herbs was directed at animals, for example, and wreaths or green branches were hung on the horns of cattle.

Today in and outside Ukraine the Rosalia is closely associated with remembrance of the soldiers who fell in the struggle for Ukrainian independence.

Rosava River. A left-bank tributary of the Ros River. It is 90 km long and drains a basin area of 1,720 sq km. It flows through Kiev and Cherkasy oblasts, and its waters are used for industry and domestic consumption. Kaharlyk and Myronivka are located on the river.

Rosdolsky, Roman. See Rozdolsky, Roman.

Rose (*Rosa*; Ukrainian: *rozha*, *roza*, *troianda*). A perennial shrub or vine plant of the family Rosaceae, with a prickly stem and fragrant flowers of many colors. Almost universally distributed and widely cultivated, roses are valuable flowers in decorative horticulture. Attar of rose (esp *R. damascena*) is used in perfume production. Herbal tea and preserves are made from the hips and petals of the *sweetbrier (*R. eglanteria*), the prairie rose (*R. setigera*), and *R. rugosa*. Rose hips contain vitamin C and they were widely used in folk medicine. Roses play an important role in Ukrainian folk songs and poetry as symbols of love and beauty. Many roses are maintained in the Nikita and Odessa botanical gardens as well as in the Central Republican Botanical Garden of the AN URSR (now ANU) in Kiev. Among the various Ukrainian hybrid roses are the Ukrainka, Kateryna, Nikita Pink, Vesnianka, Natalka, Red Ukraina, and Marusia.

Rosenberg, Alfred, b 12 January 1893 in Revel (now Tallinn), Estonia, d 16 October 1946 in Nuremberg. Nazi ideologist of Baltic German origin. He grew up in tsarist-ruled Estonia and studied architecture at Moscow University. He fled from Russia in 1917, joined the nascent Nazi party in Munich in 1919, became editor of its organ, *Völkischer Beobachter*, in 1923, and briefly led the party in 1923–4 after the failed Munich Putsch. Rosenberg was the leading Nazi ideologue and cultural propagandist. He expanded on A. *Hitler's *Lebensraum* ideas in his *Der Zukunftsweg einer deutschen Aussenpolitik* (1927), in which he urged the conquest of Poland and the USSR, and he expounded on Nazi racist, anti-Christian, and German-superiority theories in *Der Mythos des xx Jahrhunderts* (1934). As chief of the Nazi Department of Foreign Affairs from 1933, he had discussions with representatives of the Ukrainian Scientific Institute in Berlin and the OUN leadership there. After the 1941 invasion of the USSR he was the largely powerless Reichsminister of the occupied eastern territories, including the *Reichskommissariat Ukraine. His attempts to persuade H. *Himmler and E. *Koch, the Reichskommissar of Ukraine, to scale down their brutal extermination policies were unsuccessful. Although Hitler accepted Rosenberg's proposal for the partitioning of the USSR, he rejected his idea of gaining the support of non-Russians by allowing them quasi-autonomy and separate armed forces. Rosenberg was tried as a war criminal at the Nuremberg trials and hanged.

Roshchybiuk [Roščybjuk]. A family of master potters from Staryi Kosiv, Kosiv raion, Ivano-Frankivske oblast. It includes Hanna (b 17 November 1903 in Staryi Kosiv, d 29 January 1981 in Kolomyia), the sister of P. *Tsvilyk; her husband, Mykhailo (b 12 March 1903 in Kolomyia, d 20 January 1972 in Kolomyia); and their daughters, Orysia Kozak, Stefaniia Voloshchuk, and Rozaliia Iliuk, who have worked in the shops of the Artistic Fund of the Ukrainian SSR and made decorative plates, vases, candlesticks, and cups.

Roshchynsky, Petro [Roščyns'kyj], b 1890 in Hlukhiv, Chernihiv gubernia, d 23 February 1943. Physician and civic leader in Volhynia. A graduate of the medical faculty of Moscow University (1916), he served as a doctor in the UNR Army and after the war practiced medicine in Kostopil, Rivne, Kholm, Lviv, and Kremianets. He was persecuted by the Polish authorities for his Ukrainian activism and imprisoned in the Bereza Kartuzka concentration camp. During the German occupation he and his wife, Hanna (née Strutyńska), and nephew, Yu. Cherkavsky, were executed by the Gestapo.

Roshkevych, Olha [Roškevyč, Ol'ha] (married name: Ozarkevych), b 1855 in Uhornyyky, Stanyslaviv circle, Galicia, d 1935. Folklorist and translator. As I. *Franko's fiancée she collaborated with him in collecting and publishing the wedding rituals and songs of Lolin village (1886). She also translated works from German, French, and Russian into Ukrainian. Franko's correspondence with her was published by M. Vozniak in 1956. Franko dedicated some of his works to her.

Roshko, Ivan. See Irliavsky, Ivan.

Ihnatii Roshkovych: *SS Methodius and Cyril* (1876)

Roshkovych, Ihnatii [Roškovyč, Ihnatiij], b 28 September 1854 in Salok, Transcarpathia, d 29 November 1915 in Budapest. Painter. After studying art in Budapest and Munich, he painted murals in Transcarpathian churches in Snyna, Prešov, Krasnoshory, and Velyka Kopania; in the Royal Palace and St Stephen's Basilica in Budapest; and in churches in Kecskemet and Cluj (Rumania). His genre paintings include *A Special Passion*, *Red Apple*, and *Only for You*.

Olha Roshkevych

Roxolana Roslak

Roslak, Roxolana [Rosljak, Roksoljana], b 11 February 1940 in Chortkiv, Galicia. Opera singer (lyric soprano). A postwar refugee, she came to Canada with her parents in 1948. She graduated from the University of Toronto's Faculty of Music in 1964. A member of the Canadian Opera Company, she has been featured on Canadian radio and television. In 1967 she created the role of Marguerite in H. Somer's *Louis Riel*. Her operatic repertoire includes principal roles in C. Gluck's *Iphigenia in Tauris*, W.A. Mozart's *Così fan tutte* and *Don Giovanni*, J. Offenbach's *Tales of Hoffmann*, G. Bizet's *Carmen*, R. Wagner's *Parsifal*, G. Verdi's *Don Carlos*, G. Puccini's *La Bohème*, and A. Vakhnianyn's *Kupalo* and solo parts in F.J. Haydn's *Die Schöpfung*, Verdi's *Requiem*, and I. Stravinsky's *Les Noces*. Together with pianist G. Gould she recorded P. Hindemith's *Das Marienleben* for Columbia Records in 1976.

Roslak, Yaroslav [Rosljak, Jaroslav], b 18 August 1927 in Chortkiv, Galicia. Lawyer and jurist. Roslak studied at the University of Innsbruck, emigrated to Canada in 1948, graduated from the University of Alberta (LLB, 1953), and went into private practice. He joined the Alberta attorney general's department in 1960; there he was director of criminal justice (1975–82), director of special services (1982–5), and director of appeals, research, and special projects (1985–7). In 1988 he was appointed to the Court of Queen's Bench in Alberta.

Roslavets, Petro [Roslavec'], b and d ? Cossack officer. A native of Pochev, he was the captain of Pochev company (1653–7) and colonel of Starodub regiment (intermittently in 1663–76). He participated in the 1672 uprising against D. Mnohohrishny and later became an opponent of I. Samoilovych. He secretly planned to detach his regiment from the Hetmanate and place it under the direct control of Moscow (like the Slobidska Ukraine regiments). Roslavets was tried before a military tribunal, stripped of his post, and sentenced to death. The punishment was later commuted by the hetman, and Roslavets was sent by the Russian authorities to Siberia, where he died.

Roslavsky-Petrovsky, Oleksander [Roslavs'kyj-Petrov's'kyj], b 9 April 1816 in Slabyn, Chernihiv county, d 25 December 1871 in Kharkiv. Historian, statistician, and pedagogue. After completing studies at the Bezborodko (Nizhen) Lyceum in 1834, he attended Kharkiv University (1839) and taught there (from 1837, as professor from 1839) and at the university's pedagogical institute (1844–52). He improved the study of statistics by introducing new Western techniques and approaches, headed the first separate department of statistics (from 1841), and wrote two statistics textbooks (1841, 1844). His PH D dissertation (1845) was a historical, political-economic, and statistical comparison of the population of the Russian Empire with that of other European countries. He was appointed dean of the history and philology department (1853) and rector of Kharkiv University (1859–62). In the 1850s he also carried out studies on the potential economic impact of a railway in Kharkiv gubernia. Roslavsky-Petrovsky wrote articles on the economy and trade of Kharkiv gubernia for the journals *Kharkovskie gubernskie vedomosti* and *Ekonomicheskii ukazatel'* and the series *Sbornik statisticheskikh svedenii o Rossii* (Collection of Statistical Data about Rus-

sia). He also wrote on the history of Kharkiv University and higher education in the Russian Empire.

Rosliak. See Roslak.

Stepan Rosokha

Metropolitan Teodosii
Rostotsky

Rosokha, Stepan [Rosoxa] (Rosocha, Stefan), b 27 May 1908 in Drahove, near Khust, Transcarpathia, d 20 April 1986 in Toronto. Journalist, publisher, and political leader; member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences. While studying law at the Ukrainian Free University (LL D, 1936) and journalism at the School of Political Sciences in Prague, he was active in student organizations and the nationalist movement. He edited the student magazine *Vidrodzhennia* (1926–30) and the nationalist journal **Proboiem* in Prague (1934–44) and published the weekly **Nastup* in Uzhhorod and then in Prague (1938–44). He helped organize and then commanded the Ukrainian National Defense in Uzhhorod and from November 1938 served on the staff of the Carpathian Sich. In February 1939 he was elected to the Diet of *Carpatho-Ukraine and became its deputy speaker. After fleeing from the Hungarian invasion to Prague he was arrested there by the Gestapo in 1944 and sent to a concentration camp. In 1949 he emigrated to Canada, where he organized the Carpathian Sich Brotherhood and published its bulletin *Karpats'ka Sich* (1949–53). In 1952–60 he was editor of *Novyi shliakh*, and in 1960–86, editor and manager of the Toronto weekly *Vil'ne slovo*. He was president of the Eastern Chapter of the Ukrainian National Federation (1950–3), the Trident Sports Club (1951–3), and the Ukrainian People's Home in Toronto, and vice-president of the Ukrainian War Veterans' Association of Canada (1952). He wrote the documentary study *Soim Karpats'koi Ukraïny* (The Diet of Carpatho-Ukraine, 1949) and published a number of valuable books on Carpatho-Ukraine.

Rosokhovatsky, Ihor [Rosoxovats'kyj], b 30 August 1929 in Shpola, Cherkasy okruha. Ukrainian and Russian science fiction writer. He graduated from the Kiev Pedagogical Institute (1954) and worked as a newspaper editor. His novels and stories have been published in Ukrainian as the collections *Strilky hodynnyka* (Hands of a Clock, 1964), *Sprava komandora* (The Affair of the Commander, 1967), *Iakym ty povernehsia?* (What Will You Be

Like When You Return?, 1970), *Urahan* (Hurricane, 1977), *U pidvodnykh pecherakh* (In Underground Caves, 1979), *Zvorotnyi zv'iazok* (Reverse Connection, 1983), *Mozhlyvist' vidpovidi* (Possibility of a Reply, 1986), and *Ostannii syhnal* (The Last Signal, 1989). Rosokhovatsky cowrote, with I. Mykolaichuk, the script for the feature film *Under the Constellation Gemini* (1979). A selection of his works was published in English translation under the title *And Man Created Syhom Plus Other Sci-Fi Stories* (1990).

Rossina, Yuliia, b 24 June 1877 in Odessa, d 30 September 1960 in Kiev. Stage actress. She worked in Saksahan-sky's Troupe (1892–1900), O. Suslov's troupe (1900–5), various Russian operetta theaters (1906–28), and the Kharkiv (1929–35) and Kiev (1936–49) theaters of Musical Comedy.

Rostavytsia River [Rostavycja]. A left-bank tributary of the Ros River that flows eastward through Vinnytsia, Zhytomyr, and Kiev oblasts. It is 116 km long and drains a basin area of 1,460 sq km. Its water is used for irrigation and industry.

Rostavytsia Treaty. A Cossack-Polish treaty signed on 17 October 1619 on the Rostavytsia River near the town of Pavoloch, in the Zhytomyr region, by Hetman P. Sahaidachny and the Polish crown hetman S. Żółkiewski. It reduced the number of *registered Cossacks from 20,000 to 3,000, confined their movements to Zaporizhia, and prohibited Cossack campaigns in Crimean or Turkish territories. Registered Cossacks were placed under the control of the Polish government and assigned the task of defending the border of the Polish-Lithuanian Commonwealth; unregistered Cossacks and peasants were subordinated to their Polish masters. The oppressive treaty conditions gave rise to unrest that brought about Sahaidachny's replacement by Hetman Ya. Borodavka.

Rostotsky, Teodosii [Rostoc'kyj, Teodosij], b 1724, d 1805 in St Petersburg. Uniate metropolitan of Kiev. After studies at St Athanasius College in Rome, he was ordained (1754) and became a professor of philosophy and theology in Volodymyr-Volynskiy. Twice the protohegumen of the Lithuanian province of the Basilian order, he was made bishop of Kholm in 1784 and metropolitan of Kiev in 1788. He also became the first Uniate hierarch named to the Polish Senate (1790). After the third partition of Poland (1795) Rostotsky was confined by Catherine II to the city of St Petersburg. He stayed there, maintaining contact with his see through diplomatic correspondence, until his death.

Rostov oblast. An administrative territory set up on 13 September 1937 in the southwestern RSFSR. It encompasses most of the former Don Cossack province, except for the western part, which belongs to Ukraine, and a northeastern part, which belongs to Volgograd oblast. The area of Rostov oblast is 100,800 sq km, and its population in 1989 was 4,308,000, of which 71 percent was urban. The oblast has 42 raions, 22 cities, and 37 towns (smt). Its capital is Rostov-na-Donu. The western and southern regions of the oblast are Ukrainian ethnic territory. (For the history of the oblast see *Don region.)

Rostov-na-Donu. VI-20. A city (1989 pop 1,020,000) on the Don River and the administrative center of Rostov oblast in Russia. It is a major industrial and transportation center with a river harbor and an airport. Its history is linked closely with that of Ukraine and a significant portion of its population is Ukrainian.

The city originated as a settlement around a new fortress built in 1761 and named after St Dymytrii (Rostovsky) *Tuptalo. In 1797 the town became a county center of New Russia gubernia and then of Katerynoslav gubernia (1802–88). When a separate Don Cossack province was set up in 1888, Rostov-na-Donu was selected as its capital. With the building of a port and customs station in 1834 and of a railway link to Moscow in 1871 and Vladikavkaz in 1875, the town developed into a major commercial center. It exported grain and raw materials and imported tobacco and manufactured goods. By the turn of the 20th century it was, after Odessa, the second-largest city in the southern region of the Russian Empire. Its population grew from 3,000 in 1809 to 17,600 in 1860 and 119,500 in 1897.

In 1915, until 1920, many Russophiles from Galicia were evacuated to Rostov-na-Donu by the Russian authorities. There they had their own institutions, such as the Galician-Russian Committee (headed by V. Dudykevych), a gymnasium for their children, and, at the university, a student hromada, which had been transferred from Warsaw. In 1918–20 Rostov-na-Donu was a stronghold of A. Denikin's Volunteer Army. According to the Soviet census of 1926, 59,200 Ukrainians there constituted 19.2 percent of the city's population.

From 1924 Rostov-na-Donu was the capital of North Caucasus krai, in 1934–7 of the Azov-Black Sea krai, and finally, of Rostov oblast. Today the city is one of the largest agricultural-machinery manufacturing centers in Russia. It also has a large food-processing industry, light industry, and a chemical industry. Besides a university it has nine higher educational institutions. Its architectural monuments are a church from the 1780s and the city hall (1896–9).

Rostovsky, Samiilo [Rostovs'kyj, Samijlo], b and d ? Goldsmith of the latter half of the 18th century. In Kiev he produced a silver reliquary for the relics of St Barbara (1787) and a Gospel cover (1796) for St Michael's Golden-Domed Monastery, a silver chalice and disc (1795), rings, ducats, and earrings.

Rostovtsev, Mikhail [Rostovcev, Mixail] (Rostovtzeff, Michael), b 10 November 1870 in Kiev, d 20 October 1952 in New Haven, Connecticut. Russian historian and archaeologist; member of the Imperial Russian Academy of Sciences. He was one of the most influential 20th-century authorities on ancient Rome, Greece, and 'South Russia,' that is, Ukraine, the Crimea, and the Kuban. He graduated from the universities of Kiev and St Petersburg and was a professor at St Petersburg University from 1901. He fled from Russia in 1918 and served as a professor at Oxford, Wisconsin in Madison (1920–5), and Yale (1925–44) universities. Among his many valuable works are *Antichnaia dekorativnaia zhivopis' na iuge Rossii* (Ancient Decorative Painting in the South of Russia, 1913), *Ellinstvo i iranstvo na iuge Rossii* (1918; pub in English as *Iranians and Greeks in South Russia*, 1922; repr 1969), *Skifia i Bospor* (Scythia and

the Bosphorus, 1925; German trans 1931), *The Social and Economic History of the Roman Empire* (1926; repr 1957, 1963), *A History of the Ancient World* (2 vols, 1926–7; repr 1928–30, 1930–3, 1945), *The Animal Style in South Russia and China* (1929; repr 1973), *The Decay of the Ancient World and Its Economic Explanations* (1930), *Caravan Cities* (1932; repr 1971), and *The Social and Economic History of the Hellenistic World* (3 vols, 1941; repr 1953, 1964).

Rostyslav Mstyslavych [Mstyslavyč], b ? , d 14 March 1167 in Zarub, on the Dnieper River. Kievan Rus' prince; son of Mstyslav I Volodymyrovych. He was appointed prince of Smolensk ca 1125–7 by his father. Rostyslav elevated the principality to what is regarded as its highest point of cultural development. He founded churches and towns, strengthened the fortifications of the capital, and established a separate Smolensk bishopric. After the death of his brother, Iziaslav, in 1154, Rostyslav was briefly grand prince of Kiev, which he later ruled (1159–67). During that period his diplomatic skills muted the internecine warfare in Rus' considerably. He died while traveling from Novgorod.

Rostyslav Mykhailovych [Myxajlovyč], b and d ? Kievan Rus' prince; son of *Mykhail Vsevolodovych of Chernihiv. Playing a supporting role for his father's ambitions, he was briefly prince of Novgorod (1229–30) and was later seated in Halych (ca 1239) and Chernihiv (1241). Danylo Romanovych retook Halych, and a protracted struggle ensued for lands in the Galician-Volhynian principality, until Danylo defeated the army formed through an alliance of Rostyslav, his father-in-law, Béla IV of Hungary, and his brother-in-law, Bolesław the Bashful of Little Poland, in the Battle of Yaroslav (1245). Rostyslav fled to Hungary, where he headed a small principality in Slavonia.

Rostyslav Volodymyrovych [Volodymyrovč], b 1038, d 3 February 1067 in Tmutorokan. Kievan Rus' prince; grandson of Yaroslav the Wise. He is not mentioned in chronicles until 1064, but he probably governed Novgorod and Rostov-Suzdal from 1052 (after his father died) and Galicia-Volhynia from 1054 (after Yaroslav died) or 1060 (after Ihor Yaroslavych died); his sons, Volodar and Vasylo, ruled there until 1124. Rostyslav ousted Hlib Sviatoslavych from Tmutorokan in 1064 and subdued the local tribes to his authority. He was poisoned at a banquet by the Greek vicegerent of Kherson, at the bidding of Byzantine officials who feared Rostyslav's growing strength along their borders.

Rostyslav Yuriievych [Jurijevyč], b ? , d 17 April 1151. Kievan Rus' prince; son of Yurii (Volodymyrovych) Dolgorukii. A one-time prince of Novgorod (1138–41), in 1148 he allied himself with his father's major opponent, Iziaslav Mstyslavych of Kiev, ostensibly because he had been denied lands in the Suzdal region. The alliance soon deteriorated because of rumors spread by Iziaslav's boyars that Rostyslav had been seeking aid from steppe nomads in a plot against him. Rostyslav's wealth and the lands ceded to him were seized, and he was sent back to his father. In 1149 he took part in Yurii's campaign against Iziaslav, and in 1151 he was granted the Pereiaslav principality, which he ruled only briefly.

Rotar, Ivan, b 1873, d 15 March 1905 in Katerynodar, Kuban oblast. Civic leader, teacher, and writer. He worked as a lecturer at the teachers' seminary in Katerynodar. Rotar was a founding member and strong supporter of the Revolutionary Ukrainian party in the Kuban. In addition to a collection of poetry, he published a monograph about Ye. Slavynetsky in *Kievskaiia starina* (1900) and left an unfinished work about A. Holovaty.

Sofia Rotaru

Rotaru, Sofiia, b 9 August 1947 in Marshyntsi, Novoselytsia raion, Chernivtsi oblast. Ukrainian pop singer (soprano) of Moldavian descent. She graduated from the Kishinev Institute of Arts in 1974 and became very popular in Ukraine as a vocalist with the Chernivtsi-based ensemble Chervona Ruta. She won renown for her renditions of songs composed by V. *Ivasiuk. In 1977 she moved to the Crimea to sing in resort centers there. Her repertoire includes popular songs of contemporary Soviet composers (now mostly Russian) as well as modern arrangements of Ukrainian and Moldavian folk songs. She has made a number of recordings on the Melodiya label.

Rotmistrov, Volodymyr, b 16 June 1866 in Henzerivka, Pyriatyn county, Poltava gubernia, d 24 October 1941 in Kharkiv. Agronomist; full member of the All-Union Academy of Agricultural Sciences from 1935. He graduated from Kiev University (1889) and conducted research at the Debrechyn (1892–4) and Odessa (1894–1917) experimental fields and at the Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics in Kharkiv (from 1928). He was one of the first advocates of cotton growing in the southern regions of Ukraine. His main publications dealt with the water regime of chernozem soils, the root systems of cultivated plants, soil melioration, and the methodology of field research. His work contributed to the improvement of agriculture in Ukraine's arid regions.

Rovno. See Rivne.

Rovynsky, Dmytro [Rovyns'kyj], b 8 November 1888 in Zinkiv, Poltava gubernia, d 3 November 1937 on Solovets Islands. Stage actor and director. He began his career in Ukrainian touring troupes and then played in Sadovsky's Theater (1916–18), the State Drama Theater (1918–19), and the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–29). In 1929 he founded and directed the Leningrad Zhovten Theater. In 1933 he was arrested.

Rowing and canoeing (*vesluvannia, veslovyi sport*). Two forms of manual boat racing. In rowing, one oar per person is used to propel a shell, and two oars per person are used to propel a scull. In canoeing, a paddle is used to propel a Canadian (open) canoe or a kayak; the kayak paddle has blades on both ends. Olympic and world-championship competitions in rowing are organized by the Fédération internationale des sociétés d'aviron (FISA). Rowing events include eight-oared shell with coxswain; four-oared shell with or without cox; pair-oared shell with or without cox; and single, double, and quadruple sculls. Canoeing competitions are organized by the International Canoe Federation (ICF) and consist of Canadian singles (C-1) and pairs (C-2) events and kayak singles (K-1), pairs (K-2), and fours (K-4) events. In Olympic canoeing, women compete in the kayak events only.

In Ukraine the sport of rowing dates from the late 19th century. The first rowing competitions were held in Odessa in 1893. The first USSR competition in rowing was held in 1923, and in canoeing in 1928. In 1952 the USSR joined FISA and ICF. H. Zhylyn and I. Yemchuk of the Nauka rowing club in Kiev won silver medals in double sculls at the 1952 Olympics and bronze medals at the 1956 Olympics, and captured the European championship in 1955 (a world record) and the USSR championship in 1952 and 1959.

Athletes from the Ukrainian SSR who have won Olympic gold medals in canoeing are S. Makarenko (1960, C-2 1,000 m), A. Khymych (1964, C-2 1,000 m), L. Khvedosiuk (1964 and 1968, women's K-1 500 m; 1972, K-2 500 m), V. Morozov (1964, 1972, and 1976, K-4 1,000 m; 1968, K-2 1000 m), O. Shaparenko (1968, K-2 1,000 m; 1972, K-1 1,000 m), K. Kuryshko (1972, women's K-2 500 m), Yu. Riabchynska (1972, women's K-1 500 m), Yu. Stetsenko (1972, K-4 1,000 m), Yu. Filatov (1972 and 1976, K-4 1,000 m), S. Nahorny (1976, K-2 1,000 m), S. Petrenko (1976, C-2 500 m and 1,000 m), S. Chukhrai (1976, K-4 1,000 m; 1980, K-2 500 m and 1,000 m), and S. Postriekhin (1980, C-1 500 m). Silver medalists in Olympic canoeing are V. Yurchenko (1976, C-1 1,000 m), S. Kirsanov (1988, C-4 1,000 m), O. Motuzenko (1988, K-4 1,000 m), I. Nahaiev (1988, K-2 500 m and K-4 1,000 m), and M. Slyvynsky (1988, C-1 500 m). Ukrainians from the Danube River borderlands have been part of champion Rumanian Olympic canoeing teams; and the Ukrainian G. Bossy, a top paddler in Canada during the 1950s, was on the Canadian Olympic canoeing team in 1956.

Rowers from the Ukrainian SSR on Soviet Olympic teams have included O. Huzenko, O. Kolkova, O. Puhovska, N. Rozhon, N. Tarakanova, and Ye. Zubko, members of the women's eight that won the 1976 silver medal; A. Pustoviit, a member of the women's quadruple sculls that won the 1980 silver medal; N. Frolova, M. Paziun, N. Preobrazhenska, N. Pryshchepa, O. Pyvovarova, T. Stetsenko, O. Tereshyna, N. Umanets, and V. Zhulina, members of the women's eight that won the 1980 silver medal; M. Dovhan and Yu. Shapochka, members of the men's quadruple sculls that won the 1980 silver medal; I. Frolova, I. Kalimbet, and S. Mazii, members of the women's quadruple sculls that won the 1988 silver medal; and P. Hurkovsky, M. Komarov, and V. Omelianovych, members of the men's eight that won the 1988 silver medal.

R. Senkus, T. Zakydalsky

Roxolana. See Roksoliana.

Roxolani. A nomadic tribe of *Sarmatians that ranged over the Ural foothills and Volga lowlands in the eastern Black Sea steppes during the 2nd century BC. Initially they clashed with the *Scythians, but after the 2nd century BC the Roxolani conquered the Scythians and fought together with them against the *Pontic Kingdom and Greek colonies in the Crimea. In the mid-1st century AD some of the Roxolani took to the steppes between the lower Dnieper and the Danube rivers. For nearly 70 years they settled in the Wallachian Plain and as far as Moesia province, until they were crushed by the Romans. Later, along with other Black Sea coastal tribes, they continued to fight against the Romans on the lower Danube River. In the late 2nd century AD the Roxolani were dispersed by the Goths, and in the 4th century they were annihilated by the Huns. They were last mentioned by the Gothic historian Jordan as participants in a battle against the Huns. Excavations in the steppes northwest of the Sea of Azov, between the lower Dnieper and the Molochna rivers, have uncovered a number of Middle Sarmatian barrow graves, attributed to the Roxolani. They date mostly from the 1st century BC to the 1st century AD, although some go back to the late 2nd century BC.

Royal Tribunal (*Trybunał koronny*). The highest appellate court in the Polish-Lithuanian Commonwealth, created in 1578 by the Great Diet in Warsaw. It limited the power of the king and heard appeals of the decisions of city, land, and *pidkomorskyi* courts. The tribunal was composed of 27 judges or deputies elected for one year at the voivodeship dietines of the gentry throughout the Commonwealth. When a case involved a church figure, it was heard by six lay judges and six clerical judges elected by church chapters. The same diet also created the *Lutske Tribunal to handle appeals from the Ukrainian territories of the Commonwealth. In 1581 the Supreme Lithuanian Tribunal was set up for Lithuanian territories. At its sessions in Piotrków and Poznań the Royal Tribunal heard appeals from Polish territories in Lublin and from Ukrainian territories in Lviv. In 1764 a special Royal Tribunal was set up in Lublin to serve the Ukrainian voivodeships of the Commonwealth.

Rozanov, Gavriil (secular name: Vasili), b 1781, d 8 September 1858. Russian churchman and historian. He was rector of the theological seminary in Vologda (from 1814) before being consecrated bishop of Orel (1821) and then archbishop of Katerynoslav (1828–37), Kherson (1837–48), and Tver (1848–57). He was a specialist on the history of Southern Ukraine and the Zaporizhia. His publications include a history of the Samara St Nicholas's Monastery (1838), studies on early churches in the Crimea and Kherson gubernia (1848) and on the history of New Russia in *Zapiski Odesskago obshchestva istorii i drevnosti* (1853), and articles in other journals. Much of his work was based on primary sources, and he published the memoirs of M. Korzha, a Zaporozhian Cossack, in 1842.

Rozbudova derzhavy (State Building). An organ of the Zarevo Ukrainian Student Association, published quarterly in Munich (1949–50), Montreal (1951–4), Cleveland (1954), and Denver (1955–7). Edited by M. Antonovych

(1949–54) and B. Wynar (from 1954), it was ideologically aligned with the OUN Melnyk faction and devoted considerable attention to political affairs. It also published articles in Ukrainian and Soviet studies. A total of 22 issues appeared.

Rozbudova natsii

Rozbudova natsii (Nation Building). An ideological journal of the OUN Leadership (PUN). It was established in January 1928 and published in Prague monthly until 1931 and then bimonthly until August 1934 (a total of 79 issues appeared). The formal publisher was M. Stsiborsky and the chief editor was V. Martynets, who was assisted initially by P. Kozhevnykiv; until April 1929 the journal's editorial offices were located in Berlin, and O. Boikiv was responsible for printing it in Prague. The journal was banned in Soviet-, Polish-, and Rumanian-ruled Ukraine, but was smuggled in and widely distributed there. *Rozbudova natsii* published articles on ideological, political, economic, military, and cultural subjects; memoirs of the period of Ukrainian statehood (1917–21); and surveys of international affairs and developments in Western and Soviet Ukraine. Regular contributors included prominent OUN leaders and other figures. The journal was closed down by the Czech authorities under Polish pressure following the assassination in Galicia of the Polish minister of the interior, B. Pieracki.

Rozdil or Rozdol. IV-5. A town smt (1986 pop 5,000) on the Dniester River in Mykolaiv raion, Lviv oblast. It was first mentioned in historical documents in 1569. A palace built by the Lanckoroński family, who owned the village, is used as a sanatorium today. The town has a large sewing factory, a brewery, and a forestation project.

Rozdilna [Rozdil'na]. VII-11. A city (1989 pop 17,700) and a raion center in Odessa oblast. It sprang up in 1863–5 during the construction of the Odessa–Balta railway line. In 1957 it was granted city status. Today Rozdilna is a transportation and manufacturing center. Its plants service the railway and produce metalworking machinery, dairy products, and wine.

Rozdilsky, Bohdan [Rozdil's'kyj], b 22 November 1916 in Volia Tseklynska, Jasio county, Galicia. Neurologist;

full member of the Shevchenko Scientific Society from 1968. After completing his medical studies at Poznań University (1936–9) and the Lviv Medical Institute (1941) he served in the Division Galizien (1943–5) and was a POW in Italy and Britain. Having emigrated to Canada in 1951, he specialized in neurology at McGill University (1956) and the University of Saskatchewan (PH D, 1958), where he taught until 1984. He wrote on inherited brain defects and infectious and degenerative diseases of the nervous system. He used the autoradiographic method to investigate cerebrovascular permeability.

Rozdol Sirka Manufacturing Consortium (Rozdolske vyrobnyche obiednannia Sirka). A consortium that extracts and concentrates sulfur from sulfurous ore from the *Subcarpathian Sulfur Basin. Based in Novyi Rozdol, Lviv oblast, the enterprise was set up in 1956. It consists of mines, an enrichment factory, and a distillation plant. It produces sulfur in various forms and sulfuric acid. In the 1970s the consortium employed over 5,000 workers.

Rozdol sulfur deposits. See Subcarpathian Sulfur Basin.

Rozdolne [Rozdol'ne]. VIII–14. A town smt (1986 pop 7,600) and a raion center in the Crimea. It was founded in the 1860s by German settlers, who raised sheep and later wheat. In 1944 its name was changed from Ak-Sheikh to the current name, and in 1960 it was granted smt status. The town has a food industry. A Scythian settlement and a burial ground from the 10th century AD have been discovered nearby.

Rozdolne settlement. A multi-occupational archeological site on the Kalmiius River near Rozdolne, Starobesheve raion, Donetsk oblast. Excavations in 1965–7 identified five distinct occupations from the artifacts recovered. Among the items recovered were: Neolithic flint and pottery fragments; Copper Age flint knives and arrowheads; *Pit-Grave culture egg-shaped vases with corded and combed designs; *Bronze Age Multicylindrical Pottery culture stone dwellings and bronze knives; and 8th- to 9th-century *Saltiv culture tableware.

Rozdolsky, Osyp [Rozdol's'kyj], b 29 September 1872 in Dobryvody, Zbarazh county, Galicia, d 27 February 1945 in Lviv. Educator, ethnographer, and translator; full member of the VUAN from 1926 and the Shevchenko Scientific Society from 1930; father of R. *Rozdolsky. A graduate of Lviv University (1897), he taught classical languages, German, and literature at gymnasiums in Lviv, Ternopil, and Kolomyia. Under I. Franko's influence he began gathering ethnographic data in 1892. He published collections of Galician folktales (1895–9), Galician folk novellas (1900), and Galician-Ruthenian folk melodies (with S. Livokevych, 1906–7), all in *Ethnografichnyi zbirnyk*. He also began to record folk songs in 1900. In 1914 he was elected to the Ethnographic Commission of the Ukrainian Scientific Society in Kiev and conducted field research in the Chernihiv and Poltava regions. After returning to Galicia (1918) he continued his work and was elected to the Ethnographic Commission of the VUAN (1926). Besides collecting folklore he translated V. Stefanyk's and S. Va-

Osyp Rozdolsky

Roman Rozdolsky

sylchenko's short stories and Lesia Ukrainka's plays into German, and Plato's *Euthyphro* (1906), Euripedes' *Medea*, and Aeschylus' *Prometheus* into Ukrainian.

Rozdolsky, Roman [Rozdol's'kyj] (Rosdolsky, Rozdolski), b 18 July 1898 in Lviv, d 20 October 1967 in Detroit. Historian, interpreter of Marxism, and political activist; son of O. *Rozdolsky. He began his left-wing political activities in 1913 as an organizer of 'Drahomanov organizations,' whose *Vistnyk* he edited in 1916. In 1917 he edited the revolutionary periodical *Klychi*, and in 1918 he helped to establish the International Revolutionary Social Democratic Youth in Lviv. After serving in the Ukrainian Galician Army (1918–19) Rozdolsky became a cofounder of the Communist Party of Eastern Galicia (renamed the *Communist Party of Western Ukraine [KPZU] in 1923). He was a major theoretician of the KPZU and adhered to the faction, led by O. *Vasylykiv, that opposed Stalinist national policy in Soviet Ukraine.

From 1927 Rozdolsky lived in Vienna. His doctoral dissertation (University of Vienna 1929) concerned Engels's views on the 'nonhistorical' peoples of Austria during the Revolution of 1848; this was the first version of what later became a book on the subject (German edns 1964, 1979; English 1986). To escape a general repression against the left, in 1934 he returned to Lviv, where he worked at the university as a researcher under the Polish economic historian F. *Bujak. In the late 1930s he coedited the journal *Zhyttia i slovo* (published in Drohobych), which exposed Stalinist crimes in Soviet Ukraine while simultaneously polemicizing with the nationalist Ukrainian right. He also wrote two books on the history of the Galician peasantry in the late 18th and early 19th centuries, one on communal landholding (1936; German edn 1954), the other on serfdom. When the Soviets occupied Lviv in 1939 they destroyed all printed copies of the latter book, but Rozdolsky was able to reconstruct it after the war and publish it in Warsaw in 1962 (2 vols). To escape the Soviet authorities he moved to Cracow, where the Gestapo arrested him in 1942. He spent the rest of the war in concentration camps, including *Oświęcim, about which he published a memoir.

In 1947 Rozdolsky emigrated to the United States and settled in Detroit. His major work of the postwar period was an interpretation of Marx's economic thought, which

appeared in German in 1968 and subsequently was translated into many languages, including English (*The Making of Marx's Capital*, 1977). He also wrote studies of *Joseph II's agrarian reforms (1961), the peasant deputies to the Austrian parliament in 1848–9 (1976), and revolutionary tactics in 1914–18 (1973). Although written mainly in German and Polish, Rozdolsky's works had a Ukrainian perspective and, with the exception of the book on Marxian economics, contained much material on Ukrainian themes.

J.-P. Himka

Rozenbaum, Solomon, b 31 December 1885 in Poltava, d 1941 in Poltava. Painter. After graduating from the Odessa Art School (1908) and the St Petersburg Academy of Arts (1917) he worked in I. Miasoedov's studio in Poltava (1915–17) and taught in local schools. In the late 1920s he belonged to the Association of Artists of Red Ukraine. His works include genre paintings, still lifes, portraits, and landscapes, such as *Poltava's Environs* (1926), *Blast Furnaces in Makiivka* (1940), and *Winter* (1940).

Liudvyk Rozenberg

Major Teodor Rozhankovsky

Rozenberg, Liudvyk (pseud: Chornii, Lvivsky), b ?, d 1940 in Lviv. Jewish Ukrainian political figure in Galicia. He graduated from the Ukrainian gymnasium in Rohatyn. He enlisted in the Legion of Ukrainian Sich Riflemen in 1914 and was captured by the Russians in 1916. After the Revolution of 1917 he served as a captain in the Sich Riflemen. He was a close friend of R. *Rozdolsky, and from 1920 he belonged to the Ukrainian Section of the Czech Communist party. In 1923 he was elected to the CC of the Communist Party of Western Ukraine, but he left the party in 1925. In the 1930s Rozenberg belonged to a Communist oppositionist group and contributed to the Lviv paper *Narodnia sprava*; for his activities he was imprisoned in the Polish concentration camp at Bereza Kartuzka. He was arrested by the NKVD in Lviv in September 1939 and executed in prison.

Rozhalin, Kuzma [Rožalin, Kuz'ma], b 1740 in Vovkivtsi, near Romen, d 1795 in Moscow. Physician. After being educated at the Kievan Mohyla Academy (1751–8), the Medico-Surgical School of the St Petersburg Military Hospital (1758–60), and Berlin and Leiden (PH D, 1765) universities, he taught physiology and pharmacology in the hospital schools in St Petersburg. During the Russo-Turkish War (1769–74) he directed the Yelysavethrad Hospital and supervised efforts to control the plague in Yelysavethrad, Novomyrhorod, and Kharkiv. In 1776 he was appointed chief physician for New Russia gubernia.

Rozhankovsky, Teodor [Rožankovs'kyj], b 1875 in Sokal, Galicia, d 12 April 1970 in Weehawken, New Jersey. Military officer and community leader. Under the Austrian regime he was a judge and a deputy to the Galician Diet (1908–18). In 1914 he helped organize the Legion of Sich Riflemen and served as its first commander (briefly) and as deputy commander and commander of its reserve training unit (until November 1918). In the Ukrainian Galician Army he was promoted to major and placed in command of the Stanyslaviv Military District (1918–19). He was also a member of the Ukrainian National Rada. In 1919–20 he served as military attaché in Prague; later he practiced law in Lviv. After the Second World War he emigrated to the United States.

Rozhansky, Dmytro [Rožanskij], b 1 September 1882 in Kiev, d 27 September 1936 in Leningrad. Physicist and radio engineer; corresponding member of the USSR Academy of Sciences from 1933. A graduate of St Petersburg University (1904), he worked at Göttingen University and the St Petersburg Electrotechnical Institute. In 1911 he became a professor at Kharkiv University, where he conducted extensive radio-physics research and founded what became known as the Kharkiv school of radio-physics. Rozhansky moved to Russia in 1921, first to the Radio Laboratory at Nizhnii Novgorod and in 1923 to Leningrad, where he became a professor at the polytechnical institute. His research on ultrahigh-frequency radio waves was instrumental in the early development of the Soviet pulsed radar system.

Rozhansky, Liubomyr [Rožans'kyj, Ljubomyr], b 1872 in Sukhodoly, Brody county, Galicia, d 6 February 1925 in Lviv. Community activist. After studying law at Lviv University he worked as a notary and assistant to various lawyers. Having been influenced by M. Drahomanov's ideas, he became a leader of the populist movement in Western Ukraine and a founder of the National Democratic party. In 1910 he was appointed director of the Land Mortgage Bank in Lviv. Rozhansky wrote articles for the Ukrainian press on economic and political topics, often using the pseudonym L. Seliansky or L. Sukhodolsky.

Rozhavska, Yudyt [Rožavs'ka, Judyt], b 12 November 1923 in Kiev, d 10 March 1982 in Kiev. Composer, pianist, and editor. She studied composition with M. Hozenpud and piano with Y. Slivak at the Kiev Conservatory (1940–51) and then worked as a music editor for the publishers Sovetskii Kompositor and Mystetstvo. Her works for children include the opera *Kazka pro zahublenyi chas* (The Story of Lost Time, 1968) and the ballet *Korolivstvo kryvykh dzerkal* (The Kingdom of Crooked Mirrors, 1955) as well as

Yudyta Rozhavska

Vsevolod Rozhdestvensky

songs and piano pieces. Other works include the symphonic poem *Dnipro* (1956), cantatas, concertos, chamber pieces, art songs, and music for radio and television.

Rozhdestvensky, Vsevolod [Roždestvens'kyj], b 2 July 1918 in Poltava, d 3 March 1985 in Kiev. Composer and conductor. He studied in 1936–9 with S. Bohatyrov at the Kharkiv Conservatory and in 1937–41 with L. Revutsky at the Kiev Conservatory. From 1945 he was music director and principal conductor of the Kiev Ukrainian Drama Theater. His works include the musical comedies *Za dvoma zaittsiamy* (In Pursuit of Two Hares, 1954) and *Cherevychky* (The Little Shoes, 1967), incidental music for O. Ilchenko's *Petersburg Autumn* and I. Kocherha's *Prorok* (The Prophet), *Concert Hopak* (1951) for orchestra, and cantatas, two string quartets, piano music, art songs, arrangements of folk songs, and film scores.

Ivan Rozhin

Rozhin, Ivan [Rožin] b 18 September 1897 in Kumaniv, Kamianets-Podilskyi county, Podilia gubernia, d 10 July 1972 in Detroit. Biologist; full member of the Shevchenko Scientific Society from 1947. After serving in the Army of the UNR he completed veterinary studies and worked at the All-Ukrainian Institute of Experimental Veterinary Medicine. He headed a department of the VUAN Institute of Experimental Biology in Kharkiv (1928–32) and taught pathology and hygiene in Dnipropetrovske and Bila Tserkva (1932–41). He was also a scholarly associate of the Institute of Experimental Biology and Pathology (1930–41). After the Second World War he taught at the Ukraini-

an Free University and the Ukrainian Technical and Husbandry Institute in Munich and then emigrated to the United States. Rozhin published many articles and monographs, including a survey of animal husbandry in Ukraine (1969–71).

Rozhniativ or Rozhnitiv [Rožnjativ, Rožnitiv]. v-5. A city (1986 pop 3,500) and a raion center in Ivano-Frankivske oblast. It was first mentioned in historical documents in the 12th century. At the end of the 14th century it came under Polish rule, and in the early 15th century the Poles built a fortress there. After it was annexed by Austria (1772), the town was granted city status, in 1785. Its fortress has been reconstructed and preserved. It has a furniture and a mixed-feed factory.

Rozhyshche [Rožyšče]. III-6. A town smt (1986 pop 14,300) on the Styr River and a raion center in Volhynia oblast. It was first mentioned in historical documents in 1377, when it was under Lithuanian rule. It was handed over to Poland in 1569, and after the partition of Poland in 1795, to Russia. In the 19th century the town became a center for woolen-cloth weaving. In the interwar period it was under Polish rule. Today the town has a reinforced-concrete plant, a canning factory, a bakery, and a cheese factory.

Rozivka. VI-18. A town smt (1986 pop 5,400) in Kuibysheve raion, Zaporizhia oblast. It was founded by German colonists in 1788. In 1901 a railway station was built in the settlement. Its main enterprises today are a footwear factory, a brickyard, and a food-processing plant. The site of the battle on the *Kalka River (1223) is nearby.

Rozner, Ionas, b 25 February 1924 in Chernivtsi, Bukovyna, d 25 March 1980 in Kiev. Soviet historian of Jewish origin. He graduated from the Kiev Pedagogical Institute (1951) and worked at the AN URSR (now ANU) Institute of History (1959–63), the Kiev Institute of the National Economy (PH D, 1969), and the ANU Institute of Economics. His works on 16th- to 19th-century Ukrainian history include *Severin Nalivaiko, rukovoditel' krest'iansko-kazatskogo vosstannia 1594–1596 gg. na Ukraine* (Severyn Nalyvaiko, Leader of the Peasant-Cossack Uprising of 1594–6 in Ukraine, 1961) and *Kazachestvo v krest'ianskoi voine 1773–1775 gg.* (The Cossack Host in the Peasant War of 1773–5, 1966). He also wrote a work on the socioeconomic history of Russia entitled *Ekonomicheskoe razvitiie Rossii v XVIII v.* (The Economic Development of Russia in the 18th Century, 1966), as well as studies on Ukrainian folk art and the history of economic thought.

Rozniichuk, Ivan [Roznijčuk] (pseud: Marko Barabolia), b 10 or 19 April 1910 in Trebushany (now Dilove), Transcarpathia, d ? Satirist. While working as a village teacher in Transcarpathia he contributed humorous sketches and biting satire on political and cultural topics to the Uzhhorod periodicals *Pchilka* (in 1928–30), *Ukrain-s'ke slovo* (in 1935–6), and *Lyteraturna nedilia* (in 1943). His novel, 'Havrylo Motovylo' (1942), was never published. Rozniichuk was last heard from in 1944 after being conscripted into the Hungarian army. Editions of his works were published in Prague in 1941 and in Bratislava in 1970.

Rozov, Volodymyr, b 15 July 1876 in Kiev, d 21 May 1940 in Zagreb, Croatia. Philologist. A graduate of Kiev University (1902), he taught philological subjects (presenting the first lectures on the history of the Ukrainian language and dialectology) there (1906–16) and at the Nizhen Historical-Philological Institute (1916–18). After emigrating to Yugoslavia (1919) he taught Russian at Skopje (in the 1920s) and Zagreb (from 1930) universities. In 1928 at Ljubljana University he defended his PH D dissertation on the 15th-century Volhynian dialect. He is the author of some 100 works, including an annotated edition of 14th- and 15th-century Ukrainian charters published by the Russian Academy of Sciences (1917) and, in Ukrainian translation, by the VUAN (1928); and articles on the significance and language of the charters, on Galician and Volhynian dialects, on A. Krymsky, on Ukrainian school dramas, and on Old Bulgarian and Serbian literary monuments. His monograph on the language of the charters and his index of personal and geographical names in and lexicon to the charters have not been published.

Rozsoloda, Ivan, b ca 1771 in Slovianske (now Nykopol), d ? Storyteller; son of a Zaporozhian Cossack. In the 1880s, when he was 116, he was visited by D. *Yavornytsky, who wrote down the many tales, legends, songs, and facts about the Cossacks' folkways, customs, material culture, and economic activities Rozsoloda knew. Those materials made up a chapter of Yavornytsky's book on the Zaporizhia (1888).

Rozsosh [Rozsoš] (Russian: Rossosh). III-20. A city (1970 pop 36,000) on the Chorna Kalytva River and a raion center in Voronezh oblast, Russia. According to the census of 1926, Ukrainians represented 85.7 percent of the city's population and 95.8 percent of the county's population.

Rozsudov-Kuliabko, Vasyl [Kuljabko, Vasyl'], b 1863, d 1930. Stage actor and director. He worked in the troupes of M. Starytsky (1885–8), M. Kropyvnytsky (1888–1900), P. Saksahansky (1900–3), O. Suslov, and M. Vasyliiev-Sviatoshenko and from 1927 in the Dnipropetrovske Ukrainian Music and Drama Theater.

Rozsvit (Dawn). A weekly (later semimonthly) newspaper published for Ukrainians in the Russian army interned in the POW camp in Rastatt, Germany, in 1916–18. Edited by V. Simovych, H. Petrenko, and P. Moroz, it contained articles on political developments and on Ukrainian history and culture. The newspaper was supported by the *Union for the Liberation of Ukraine and promoted the idea of Ukrainian independence.

Roztochia [Roztočča]. A plateau that runs in a band northwest of Lviv between the Sian Lowland and the Buh Depression. It is approx 15–20 km in width and up to 400 m in height. An anticline composed largely of chalk, it constitutes a continuation of the Opilia Upland. The rivers of the region flow into the Sian (the Shklo, Liubachivka, Tanew) or Buh (the Rata, Solokiia, Huchva) systems. The region's major centers include Nesterov (Zhovkva), Rava Ruska, Belz, Uhniv, and Tomaszów.

Rozumny, Petro [Rozumnyj], b 7 March 1926 in Dnipropetrovske oblast. Philologist and dissident. During the

Petro Rozumny

Jaroslav Rozumnyj

Second World War he was deported as an *Ostarbeiter* to Germany. After graduating from the Dnipropetrovske Institute of Foreign Languages (1958) he worked as a teacher. He was persecuted in Ivano-Frankivske and then in Dnipropetrovske (1961–7) because of his contacts with the Ukrainian student movement and participation in the Ukrainian cultural revival of the 1960s. In October 1979 he joined the *Ukrainian Helsinki Group and was arrested. In December he was sentenced to three years' imprisonment for possessing a 'dangerous weapon' (a hunting knife).

Rozumnyj, Jaroslav, b 6 September 1925 in Vychilky (now Honcharivka), Buchach county, Galicia. Ukrainian-Canadian literary scholar and community figure. A post-war émigré, he graduated from the University of Ottawa (1958; PH D, 1968) and has taught Ukrainian literature at Laurentian University (1960–3) and the University of Manitoba (since 1964), where he was the head of the department of Slavic studies. He has presided over the Ukrainian Cultural and Educational Centre in Winnipeg (1968–73) and the Ukrainian Academy of Arts and Sciences in Canada (1977–80). His articles on Ukrainian literature have appeared in Ukrainian émigré and Canadian scholarly periodicals.

Rozumovsky [Rozumovs'kyj]. A Ukrainian family of Russian imperial counts and military and civic figures from the Chernihiv region. Yakiv Rozum and his son, Hryhorii (d ca 1730), were registered Cossacks in Kozelets company, Kiev regiment. Hryhorii's son, Oleksii (Aleksei, b 28 March 1709 in Lemeshi, Kozelets company, d 17 July 1771 in St Petersburg), was brought to St Petersburg to sing in the imperial court choir in 1731. There he soon became a favorite of Empress Elizabeth I, who granted him and his family many estates, secretly married him (1742), and appointed him a count (1744) and field marshal (1756). Oleksii was the first to use the name Rozumovsky. Under his influence things Ukrainian became fashionable at Elizabeth's court. He persuaded Elizabeth to restore the office of hetman in Ukraine and to appoint his brother, Kyrylo *Rozumovsky, to that position in 1750. Kyrylo appointed his brother Petro (d 1771) colonel of Nizhen regiment (1753–71) and his brother Vasyl colonel of Hadiache regiment (1755–62).

Kyrylo was married to Countess K. Naryshkina, with whom he had six sons and five daughters. The eldest son, Oleksii (Aleksei, b 23 September 1748, d 17 April 1822 in

Pochep, Mglin county, Chernihiv gubernia), was appointed a privy councillor and senator in 1786, trustee of Moscow University in 1807, and imperial minister of education (1810–16). As minister of education he oversaw the creation of more parish and county primary schools and gymnasiums (eg, in Kiev, Nizhen, and Kharkiv) and the improvement of teaching methods and school inspection. Oleksii had an abiding interest in the natural sciences. He created a large botanical garden with over 2,000 different plants and 500 orange trees on his estate in Gorenki, near Moscow, and amassed the largest private natural-science library in the empire. He was a mystic, a Freemason, and the vice-president of the Russian Bible Society. Oleksii's marriage to Countess Varvara Sheremeteva produced two sons and two daughters. He also had 10 illegitimate children, who received the surname *Perovsky. Oleksii's older son, Petro (Petr, 1775–1835), was a major general (1799–1801) and served as a state counselor to the governor of New Russia in Odessa from 1806. He was the last count of the Rozumovsky family in the Russian Empire. Petro's younger brother, Kyrylo (Kirill, 1777–1829), died insane in Kharkiv.

Hetman Rozumovsky's second son, Petro (Petr, b 26 January 1751, d 26 December 1823), was a general in the Russian army and then a senator and privy councillor. The hetman's third son was Andrii *Rozumovsky. His fourth son, Lev (b 19 January 1757, d 3 December 1818), received the rank of major general in 1790. The hetman's sixth son, Ivan (b 17 August 1761, d 1802 in Italy), served as an adjutant general to his father from 1784 and was a colonel in the Little Russian Regiment from 1789. He retired in 1796 with the rank of major general.

The hetman's fifth son, Hryhorii (Grigorii or Gregor, b 21 November 1759, d 3 June 1837 in Český Rudolec, Moravia), studied mineralogy and geology in Leiden and lived in the 1780s in Lausanne, where he published the mineralogical studies *Oeuvres de M. le comte Grégoire Razoumowsky* (2 vols, 1784) and *Histoire naturelle de Jorat et de ses environs ...* (2 vols, 1789). In 1790 he was elected an honorary member of the Russian Imperial Academy of Sciences. In 1816 he published *Coup d'oeil géognostique sur le Nord de l'Europe général et en Russie en particulier*. After the death in 1818 of his second wife, Baroness Teresa-Elizabeth Schenk de Castel, Hryhorii and his sons Maximilian and Lev left St Petersburg forever, became Austrian citizens, converted to Protestantism, and lived near Vienna, in Baden bei Wien, and on their estate in Český Rudolec. They and Lev's heirs were recognized as the Austrian counts Rasmofsky. In Silesia Hryhorii discovered a new mineral that became known as Razoumowskin. He was elected a member of the royal academies of sciences in Stockholm, Turin, and Munich and of several scientific societies. Lev's son, Leo (d 28 March 1915), served in the Austrian embassy in Paris and funded the restoration of the hetman's palace in Baturyn, the tomb of the Rozumovsky family there, and churches the construction of which had been financed by Hetman Rozumovsky.

O. Ohloblyn

Rozumovsky, Andrii [Rozumovs'kyj, Andrii] (Razumofsky, Andreas), b 2 November 1752 in Hlukhiv, d 23

September 1836 in Vienna. Statesman, society figure, and music patron; son of Hetman K. *Rozumovsky. His diplomatic talents were put to use through postings in Naples (1777–84), Denmark (1784–6), Sweden (1786–8), and Austria (1790–9 and 1801–7), where he played a significant role in the negotiations surrounding the Second and Third Partitions of Poland. Rozumovsky was eventually removed from his Vienna posting for maintaining a steadfast stance against Napoleon that was for a time not in line with the position of the Russian government. His views later paid him dividends, when he was appointed Russian plenipotentiary at the Congress of Vienna (1814–15) and then named prince in 1815. He was a particularly strong supporter of music and kept a kapelle of Ukrainian singers in his palace. He was also a close friend and generous patron of L. van Beethoven, who dedicated three string quartets (op 59, known as the *Razumovsky Quartets*) as well as his *Fifth* and *Sixth* symphonies to him.

Hetman Kyrylo Rozumovsky

Rozumovsky, Kyrylo [Rozumovs'kyj] (Razumovsky, Kirill), b 29 March 1728 in Lemeshi, Kozelets company, Kiev regiment, d 15 January 1803 in Baturyn, Konotip county, Chernihiv gubernia. The last hetman (1750–64) of the Hetman state. He was brought to St Petersburg as the brother of O. Rozumovsky, Empress Elizabeth's favorite, and then sent to study in Germany (1743–5). He was named a count in July 1744, and after his return to St Petersburg he was appointed president (1746–65) of the Russian Academy of Sciences. Elizabeth and the Russian government agreed to restore the office of hetman under the pressure of O. Rozumovsky and other Ukrainian nobles, and Elizabeth chose Kyrylo for the position. The choice was sanctioned by the Cossack *starshyna's* *Hlukhiv Council of March 1750.

Rozumovsky arrived in the Hetmanate's capital of Hlukhiv in July 1751 with G. *Teplov, his adviser and the administrator of his chancellery. Under Rozumovsky the Hetmanate once again had a measure of autonomy. Elizabeth gave Rozumovsky authority over Kiev and the Zaporizhia in November 1750 and shifted supervision of Little Russian (Ukrainian) affairs from the Russian Senate to the College of Foreign Affairs, thereby signifying her treatment of the Hetmanate as a separate state rather than a Russian province.

Rozumovsky sought to rebuild the Hetmanate as an independent state. During that process two main political currents emerged within the upper echelon of the Cossack *starshyna*. The conservative current had as its spokesmen

General Chancellor A. Bezborodko and General Treasurer M. Skoropadsky, who sought to preserve the traditional Cossack order and make the Hetmanate more like the noble-dominated Polish Commonwealth. The reformist current, led by the future general chancellor V. Tumansky and his brothers, consisted primarily of young members of the *starshyna*, many of whom had studied in Western Europe. They sought models for the Hetmanate in the Western European states and proposed a system of enlightened absolutism with a hereditary monarchy (the Rozumovsky dynasty) and a constitutional parliament (general assembly). The reformists became increasingly influential in the 1760s, and in 1764 (most likely with Rozumovsky's support) they tried to present their views to the Russian government.

During Rozumovsky's hetmancy the Hetmanate was divided into 20 counties; a system of *land, *city, and *pidkomorskyi courts was established; and the position of *viit in the larger towns was occupied by members of the *starshyna*. The *starshyna's* political rights were expanded, and they assembled to confer more frequently. At their 1763–4 general assembly in Hlukhiv they discussed major issues and projects for state reform and adopted *shliakhetstvo* (nobility) as their official name. Rozumovsky extended the possibility of becoming a *starshyna* to non-Cossack estates, such as the clergy and the burgher elite. In 1760 he restricted the mobility of the peasantry. During his frequent stays in St Petersburg the Hetmanate was ruled by the *starshyna*.

The vivification of Ukrainian political life and thought during Rozumovsky's hetmancy was due in no small measure to his own activities. He tried, in vain, to convince St Petersburg to grant the Hetmanate the right of diplomatic ties with the European states, fostered the development of trade and industry, and once again made *Baturyn the capital of the Hetmanate. He also reformed the Cossack army according to a project drawn up by Col I. Kuliabka of Lubni regiment, and planned to establish universities in Kiev and Baturyn under his patronage.

The wide-ranging program for modernizing the Hetmanate, Rozumovsky's participation in it, and the political activation of the Ukrainian nobility were completely at odds with the aims of the Russian government, and in the 1750s the government began limiting the Hetmanate's economic and political rights. In 1754 the Hetmanate's finances were brought under imperial control, and import and export duties in the Hetmanate were abolished. In 1755 the border tariffs between Russia and Ukraine were removed. In 1756 the supervision of Little Russian affairs, including control over the hetman's appointments of colonels and other officials and his distribution of hereditary estates to his relatives and supporters, was returned to the Russian Senate. In 1761 the Senate took over control of Kiev from Rozumovsky. The government of the new empress, *Catherine II, intensified Russian centralist policies with respect to Ukraine even further.

Rozumovsky's own social policies, aimed at transforming the Hetmanate into a nobility-dominated state, created greater social disparities and conflicts, and his dynastic plans met with concerted opposition from many members of the new nobility. Those difficulties were compounded by the losses Ukraine suffered as an unwilling participant in the *Seven Years' War. Catherine II used Rozumovsky's petition to make his descendants hereditary hetmans as a

pretext for forcing his resignation in November 1764, and placed the Hetmanate under the control of the *Little Russian Collegium. Rozumovsky was compensated with the rank of field marshal, an enormous pension, and many estates in Ukraine, including the towns of Hadiache and Baturyn. He subsequently traveled in Germany, France, and Italy (1765–7) and led the life of an aristocrat in St Petersburg (1766–76), Baturyn (1776–85, 1794–1803), and Moscow (1784–94).

Rozumovsky's Theater. A *serf theater troupe established in Hlukhiv in 1751 at the court of Hetman K. Rozumovsky. In its repertoire were operas, ballets, and comedies, such as *Iziurns'kyi iarmarok* (The Fair in Iziurn, author unknown). Guest soloists from Italy and France were invited to participate in its productions. It also had a 40-member choir, directed by A. Rachynsky.

Viacheslav Rozvadovsky: *Moonlit Night* (oil, 1904)

Rozvadovsky, Viacheslav [Rozvadovs'kyj, Vjačeslav], b 24 September 1875 in Odessa, d 18 January 1943 in Tashkent, Uzbekistan. Painter and educator. After studying at the Odessa Art School (1890–4) and under A. Kuindzhi at the St Petersburg Academy of Arts (1894–1900) he worked in Ukraine, where he created landscapes and genre paintings, such as *Above the Dnieper* (1900), *T. Shevchenko's Grave in Kaniv* (1903), *Hutsul Girl* (1904), and *Mill* (1905), and organized the first eight traveling art exhibitions in Ukraine (1904–8). Their catalogue (*Opys kartyn narodnoho mystetstva*) was printed in Ukrainian. In 1905 he founded an art school and residence for peasant children in Kamianets-Podilskyi. The Academy of Arts sent him in 1912 to Central Asia, where he painted, taught art, and studied the local folk art.

Rozvaha (Entertainment). A weekly newspaper published for Ukrainians in the Russian army interned in the POW camp in Freistadt, Austria, in 1915–18 (a total of 134 issues). It published articles on political developments

and on Ukrainian history and culture. The newspaper was supported by the *Union for the Liberation of Ukraine and promoted the idea of Ukrainian independence.

RUB. An artists' group in Lviv, formed by students and graduates of the *Novakivsky Art School. RUB held events annually starting in 1926 providing public exposure for its members. It promoted a synthesis of Eastern art with current artistic traditions of Europe, and favored works which expressed local flavor and national characteristics. In *Karby* (Notches), the first art almanac published by RUB in 1933, V. Havryliuk, V. Hrytsenko, V. Lasovsky, S. Lutsyk, M. Moroz, O. Pleshkan, H. Smolsky, and R. Chornii were listed as members.

Rubach, Mykhailo [Rubač, Myxajlo], b 2 December 1899 in Chernecha Sloboda, Romen county, Poltava gubernia, d 17 January 1980 in Kiev. Historian and archivist. From 1917 he taught and worked in Bolshevik organizations in Katerynoslav. In 1923 he was appointed deputy director of the Commission for the Study of the History of the October Revolution and the CP(B)U (Istpart), editor in chief of *Letopis' Revoliutsii*, and director of the Central Archival Administration of the Ukrainian SSR. After graduating from the Institute of Red Professorship in Moscow (1927) he served as director of the Institute of Party History of the CC CP(B)U (1929–32) and worked at the Institute of History of the Communist Academy in Moscow (1933–5). Later he headed the department of USSR history at Kharkiv University, and in 1942 he began working at the AN URSS (now ANU) Institute of History, as director of the archeography department and as senior associate of the department of history of the October Revolution and the Civil War. In 1957–69 he was a professor in the department of CPSU history at Kiev University.

Rubach was the author of *Ocherki po istorii revoliutsionogo preobrazovaniia agrarnykh otноsheni na Ukrainе v period provedeniia Oktiabr'skoi revoliutsii* (Essays on the History of the Revolutionary Transformation of Agrarian Relations in Ukraine in the Period of the Duration of the October Revolution, 1956) and the coauthor of collective works on the Ukrainian SSR during the First World War and on the history of the Ukrainian SSR. In the 1930s he led a publicistic campaign against M. Hrushevsky (in *Chervonyi shliakh*, 1932, nos 5–12), and he was instrumental in efforts to discredit Ukrainian historiography in the 1970s.

I. Myhul

Ruban, Petro, b 1940 in Pryluka, Chernihiv oblast. Soviet political prisoner; a wood-carver by profession. For his Ukrainian pro-independence views he was imprisoned in the years 1965–73, 1976–82, and 1985–8. He was released before completing his last term and allowed to emigrate to the United States.

Ruban, Valentyna, b 30 June 1940 in Kiev. Art historian. She received her doctorate from the Institute of Art History in Moscow (1990). She is a senior researcher at the Ryl'ski Institute of Art, Folklore, and Ethnography at the Academy of Sciences in Kiev and the author of several articles and books on the development of Ukrainian portrait painting, including *Ukrains'kyi radiants'kyi portretnyi zhyvopys* (Soviet Ukrainian Portrait Painting, 1977), *Portret v tvorchosti ukrains'kykh zhyvopystiv* (The Portrait in the

Work of Ukrainian Painters, 1979), *Ukrains'kyi portretnyi zhyvopys pershoi polovyny XIX stolittia* (Ukrainian Portraiture of the First Half of the 19th Century, 1984), *Ukrains'kyi portretnyi zhyvopys druhoi polovyny XIX–pochatku XX-stolittia* (Ukrainian Portraiture of the Second Half of the 19th Century and the Beginning of the 20th Century, 1986), and *Anatol' Petryts'kyi: Portrety suchasnykiv* (Anatol Petrytsky: Portraits of Contemporaries, 1991).

Ruban, Vasyl, b 25 March 1742 in Bilhorod (Belgorod) in Slobidska Ukraine, d 5 October 1795 in St Petersburg. Publisher, historian, and Russian poet of Ukrainian descent; member of the Russian Free Economic Society. He studied at the Kievan Mohyla Academy, the Moscow Slavonic-Latin Academy (ca 1754–5), and Moscow University (1759–61). From 1784 he was head of foreign correspondence at the Imperial War College. In St Petersburg he published an anonymously written book of information about Little Russia (1773), a descriptive geography of Little Russia (1777), and **Kratkaia letopis' Malyia Rossii* (A Short Chronicle of Little Russia, 1777), thereby facilitating Russian study of Ukraine. He also published the St Petersburg journals *Ni to, ni sio* (1769), and *Trudoliubivyi muravei* (1771), Russian almanacs, the historical compendium *Starina i novizna* (Antiquity and New Times, 2 vols, 1772–3), which included materials on the history of Ukraine, V. *Hryhorovych-Barsky's account of his travels (1778), and descriptions of St Petersburg (1779) and Moscow (1782); and he wrote many panegyrics and odes in Russian and translated literature from Latin (especially Virgil), Polish, German, and French.

Ruban, Vasyl, b 1942 in Lisnyky, Kiev-Sviatoshyne raion, Kiev oblast. Writer and dissident. Ruban was arrested in 1972 while a third-year student at Kiev University. He was accused of disseminating anti-Soviet propaganda and then of 'betrayal of the fatherland' and was sentenced to 15 years' imprisonment and 5 years' internal exile. He spent six years in the Dnipropetrovske psychiatric hospital-prison before he was released and rehabilitated in 1978. Ruban published only sporadic poems before his arrest. He had prepared a novel and some short stories, which were not published. After his release he published a collection of poetry, *Khymera* (Chimera, 1988).

Rubashkin, Vladimir [Rubaškin], b 1876 in Novocherkassk, d 1932. He taught at Tartu and Kharkiv (1912–18) universities and was a professor at the Kharkiv Medical Institute (from 1922), director of the Kharkiv Institute of Protozoology (from 1923), and assistant director of the All-Ukrainian Institute of Biology, Morphology, and Experimental Medicine. He studied blood types, founded the journal *Ukrains'kyi visnyk kroov'ianykh uhrupuvan'* (1927–34), and published a histology textbook.

Rubashov, Mykhailo [Rubašov, Myxajlo], b 30 October 1912 in Chudniv, Zhytomyr county, Volhynia gubernia, d 5 January 1974 in Kiev. Writer and literary critic. He graduated from the Kiev Pedagogical Institute (1940) and after the Second World War worked for newspapers and literary journals in Kiev. He began publishing in 1940. He wrote the story collections *Sribna pidkivka* (The Little Silver Horseshoe, 1958), *Iskryste stremeno* (The Glittering Stirrup, 1961), and *Kam'iane svichado* (The Stone Mirror, 1961); the

short novels *Bahriani tini* (Crimson Shadows, 1962, about T. Shevchenko as a young artist), *Plachut' berezy* (The Birches Are Crying, 1963), *Zhaha* (Thirst, 1968), and *Kopyshchans'ka trahediia* (The Kopyshche Tragedy, 1970); and several plays. Editions of his selected prose appeared in 1972 and 1982.

Bohdan Rubchak

Ivan Rubchak

Rubchak, Bohdan [Rubčak], b 6 March 1935 in Kalush, Galicia. Poet and literary scholar. In 1948, after being displaced by the Second World War, Rubchak settled in the United States. He studied comparative literature at Rutgers University in New Jersey (PH D, 1977) and since 1974 has been a professor at the University of Illinois, Chicago Circle. A member of the *New York Group, Rubchak published five collections of poetry – *Kaminnyi sad* (Stone Orchard, 1956), *Promenyista zrada* (Bright Betrayal, 1960), *Divchyni bez kraïny* (For a Girl without a Country, 1963), *Osobyista Klio* (Personal Clio, 1967), and *Marenu topyty* (To Drown Marena, 1980) – and a volume of collected works, *Krylo Ikarove* (The Wing of Icarus, 1983). Rubchak's lyrical poetry is introspective and marked by classical restraint and an intellectual atmosphere enhanced by his literary erudition. His short stories are gifted but too sporadic, and his prose consists mainly of literary criticism. Numerous essays in both English and Ukrainian have appeared in various journals and reveal that he is a knowledgeable, incisive, and eloquent critic of Ukrainian poetry, individual poets (B. Nyzhankivsky, B. Kravtsiv, V. Barka, G. Tarnawsky, P. Kylyna, V. Vovk), modernism, and émigré Ukrainian literature. Of special note are his comprehensive introduction to Ukrainian modernism in *Ostap Luts'kyi – molodomuzets'* (Ostap Lutsky, Member of the Moloda Muza, 1968), his annotations of and introduction to M. Kotsiubynsky in the translation of *Shadows of Forgotten Ancestors* (1981), and his notes to *Bohdan Ihor Antonych – Zibrani tvory* (Bohdan Ihor Antonych: Collected Works, 1967). Together with B. Boychuk he edited and wrote biographical-critical vignettes for the important two-volume anthology of contemporary Ukrainian poetry in the West, *Koordynaty* (Co-ordinates, 1969).

D.H. Struk

Rubchak, Ivan [Rubčak], b 7 March 1874 in Kalush, Galicia, d 11 May 1952 in Lviv. Actor and singer (bass); husband of K. *Rubchak. He worked in the Ruska Besida Theater (1894–1914), Ternopilski Teatralni Vechory (1916), the Theater of the Legion of Ukrainian Sich Rifle-

men (1916–18), the New Lviv Theater (1921–3), V. Kosak's troupe (1920), the Ukrainska Besida Theater (1921–3), the Ruthenian Theater of the Prosvita Society (1924–6), Y. Stadnyk's touring troupe (1927–8), the Tobilevych Theater (1928–38, with interruptions), the Kotliarevsky Theater (1938–9), the Lesia Ukrainka Theater (1939–41), the Lviv Opera Theater (1941–4), and the Lviv Ukrainian Drama Theater (1944–52). During his stage career he played and sang over 500 character, comic, opera, and operetta roles, including Karas in S. Hulak-Artemovsky's *Zaporozhets' za dunaïem* (Zaporozhian Cossack beyond the Danube) and the title role in J. Strauss's *Der Zigeunerbaron*.

Kateryna Rubchak

Rubchak, Kateryna [Rubčak] (née Kossak), b 29 April 1881 in Chortkiv, Galicia, d 22 November 1919 in Zinkivtsi, near Kamianets-Podilskyi. Actress and singer (soprano); wife of I. *Rubchak. Most of her brilliant theatrical and operatic career (1896–1914) was spent in the Ruthenian People's Theater (see *Ukrainska Besida Theater). Her extensive and varied repertoire included Ukrainian and Western European dramatic roles, many of which she premiered for the Galician and Bukovynian public. She performed with L. *Kurbas and V. Yurchak in I. Franko's *Ukradene shchastia* (Stolen Happiness) to great critical acclaim. Her best theatrical roles were in T. Shevchenko's *Nazar Stodolia*, M. Starytsky's *Tsyhanka Aza* (The Gypsy Aza), *Oi ne khody, Hrytsiu ...* (Don't Go to the Party, Hryts ...), *Marusia Bohuslavka*, I. Karpenko-Kary's *Khaziain* (The Master), V. Vynnychenko's *Chorna pantera i bilyi vedmid'* (The Black Panther and White Bear), H. Ibsen's *Ghosts*, E. Rostand's *Les Romanesques*, A. Schnitzler's *Liebelei*, and J. Gordin's *Mirele Efros*. Her best operatic roles were in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, M. Arkas's *Kateryna*, Ya. Lopatynsky's *Enei na mandrivtsi* (Aeneas on the Journey), C. Gounod's *Faust*, J. Offenbach's *Tales of Hoffman*, G. Puccini's *Madame Butterfly*, and S. Moniuszko's *Halka*. She also sang in operettas composed by J. Strauss, A. Sullivan, and F. Lehár. In 1916–18 she headed the Theater of the Legion of Ukrainian Sich Riflemen, and in 1919, the Chernivtsi Ukrainian Theater and the Theater of the Western Ukrainian National Republic. In 1981 UNESCO marked the centenary of her birth. A biography by P. Medvedyk was published in Kiev (1989).

V. Revutsky

Rubchak, Olha [Rubčak, Ol'ha], b 10 May 1903 in Chernivtsi, d 21 November 1981 in Kiev. Actress; daughter of I. and K. *Rubchak and wife of H. *Yura. She studied drama in Kiev (1917–18) and then worked in the New Lviv Theater (1919–20) and the Franko New Drama Theater in Kharkiv (1920–6; later the Kiev Ukrainian Drama Theater, 1926–60).

Rubenchyk, Lev [Rubenčyk], b 3 April 1896 in Odessa, d 1989. Microbiologist; corresponding member of the AN URSR (now ANU) from 1939. He graduated from the Odessa Institute of People's Education (1922) and worked there (until 1927) and at the Odessa Institute of Seed and Flour Technology (1927–31), the Ukrainian Institute of Balneology (1929–41), Odessa University (1933–41), the ANU Institute of Microbiology and Virology (from 1944), and Kiev University (1946–56). He described the role of microorganisms in the geochemical processes of saltwater environments and in the corrosion of metals and cement.

Oleksander Rubets

Rubets, Oleksander [Rubets'], b 13 October 1838 in Chuhuiv, Kharkiv gubernia, d 11 May 1913 in Starodub, Chernihiv gubernia. Musicologist, ethnographer, teacher, composer, and conductor. He studied music theory and composition with M. Zarembo at the St Petersburg Conservatory, from which he graduated in 1866, and where he later taught theory and choral singing until 1895. In 1896 Rubets lost his sight and settled in Starodub. He authored several textbooks on music theory and compiled a biographical dictionary of musicians. An enthusiastic folk song collector, he published several collections of Ukrainian folk songs (1870, 1872, and 1876). These were used as sources for musical themes by P. Tchaikovsky (*Symphony no. 2*, *Piano Concerto no. 1*, and the opera *Mazeppa*), N. Rimsky-Korsakov, and other composers. Rubets's musical works include an orchestral overture, several choral pieces (including a 'Hymn to Gogol'), approx 10 solo songs (such as 'Dumy moi,' the first musical arrangement of T. Shevchenko's text), and works for piano and violin. His students included A. Arensky, S. Rachmaninoff, A. Glazunov, Y. Myklashevsky, and P. Senytsia.

Rubinger, Lev, b 21 February 1890 in Horodok, Galicia, d 24 September 1983 in Rochester, New York. Military and civic activist; member of the Shevchenko Scientific Society. He served as a captain in the Ukrainian Galician Army (UHA) during the struggle for Ukrainian independence and then as a member of the Revolutionary Tribu-

nal of the Field Staff of the Red UHA. After the First World War he remained in Soviet Ukraine, where he graduated from and then taught at the Kiev Commercial Institute. In 1926 he returned to Galicia. He practiced law in Kolomyia (to 1939), served as a prosecutor in Chortkiv (1941–3), and was elected mayor of Kolomyia (1943–4). At the end of the Second World War he fled to the West and emigrated to the United States. Rubinger wrote articles on economic, political, and military affairs for the Ukrainian press.

Rubinowicz, Wojciech, b 22 February 1889 in Sadhora (now a suburb of Chernivtsi), Bukovyna, d 13 October 1974 in Warsaw. Theoretical physicist. Rubinowicz received his doctorate from Chernivtsi University in 1914 and taught at Chernivtsi University (1918) and at the University of Ljubljana (1920–2). In 1922 he became a professor at the Lviv Polytechnical Institute, and in 1937 at Lviv University. After the Second World War he was a professor at Warsaw University (1946–60). Rubinowicz contributed substantially to the development of the quantum theory of radiation, in particular by discovering, in 1918, the selection and polarization rules for electric dipole radiation. In Lviv he gave rise to what became known as the Rubinowicz school of quantum physics.

Rubizhne [Rubižne]. IV-19, DB I-4. A city (1990 pop 75,000) in Luhanske oblast. It originated as the town of Russko-Kraska, which sprang up around the aniline dye factory built near the railway station Rubizhne in 1915. The town was renamed in 1930 and was granted city status in 1934. In addition to the Krasytel Manufacturing Consortium the city has a reinforced-concrete products plant, a metalworking plant, a baking complex, and a hosiery factory.

Rubizhne Krasytel Manufacturing Consortium (Rubizhanske vyrobnyche obiednannia Krasytel). The largest aniline dye and paint enterprise in Ukraine. Located in Rubizhne, Luhanske oblast, the consortium was established in 1974 on the basis of a chemical factory founded in 1915. It makes over 250 products, including almost all the indigo dyes produced in the former USSR from either artificial or synthetic raw materials. In the 1970s the enterprise employed over 7,000 workers.

Ruble (Russian: *rubl*; Ukrainian: *karbovanets*). The main unit of currency in the Russian Empire and then in the USSR. It was known in Muscovy from the beginning of the 14th century as a unit of both payment and weight. In Novgorod it denoted one-half of a *hryvnia. From 1534 one ruble was worth 100 Novgorod *dengi* or 200 Muscovite *dengi*; the *dengi* were also called *kopeini dengi*, from which comes the word *kopeck*. Rubles' silver content declined steadily in the early 17th century from 68 to 48 g. Rubles began to circulate in Ukraine in the beginning of the 18th century. They began to be issued regularly in 1704 and had a silver content of 28 g, which made them equivalent to a Western European taler. The value of the ruble declined in the 18th century, and by 1764 it contained only 18 g of silver. It remained at that level until 1915, when the minting of full-value rubles from silver ceased. Gold and copper rubles were minted only briefly in the 18th century. The paper ruble came into circulation in 1841; earlier it

had been used only for accounting purposes. In 1897 Russia adopted the gold standard, and the ruble was converted to a gold base. At the end of the First World War only debased paper rubles were in circulation.

The first Soviet rubles were issued in 1919 in the form of a state bank note. Silver rubles were minted in the RSFSR in 1921. In 1922 the **chervonets*, equal to 10 rubles, was introduced. In 1924, 1-, 3-, and 5-ruble notes were put into circulation, and silver rubles containing 18 g of silver were minted. In 1937 the value of the ruble was established as 0.19 of the US dollar, which contained 0.888671 g of gold. That figure was used strictly for accounting purposes and calculating import and export costs. In the major reform of 1961 the ruble was dissociated from the US dollar, and its official gold content was increased to 0.987412 g of gold.

Until 1992 rubles were printed by the USSR State Bank and State Treasury in Moscow and Leningrad in denominations of 100, 50, 25, 10, 5, 3, and 2; a 1-ruble copper-nickel coin was also minted. The notes had the Ukrainian *karbovanets*' printed on them. Since personal checks and credit cards were not used, a large number of bills were printed. The branch of the State Bank in Kiev received a supply of new bills every month and put them into circulation only on the orders of the central authorities in Moscow.

Because the ruble was a controlled currency and was not exchanged freely on the world market, its true value relative to that of other currencies was difficult to establish. The official exchange rate for trading purposes was set monthly by the State Bank. One ruble was valued at 1.11 US dollars in 1961 and 1.33 in 1973. Rubles that were traded internally on the black market or exported illegally were always worth much less. In an effort to curb black market trading in currency, in 1989 the Soviet government introduced a new exchange rate of six rubles to the dollar. The rate applied only to rubles exchanged by tourists and other visitors to the USSR and by Soviet citizens for travel abroad. All other transactions continued to be calculated on the even more unrealistic rate (in 1989 1 ruble = 2.20 US dollars). That policy meant that, in general, exports from the USSR were overvalued, and imports were undervalued; obtaining credits from abroad was much more advantageous than granting credits; and tourism and personal shipment of goods from abroad were relatively advantageous for the Soviet economy. According to many economists the inconvertibility of the ruble placed great constraints on the development of Soviet trade and the entire economy. It made it especially difficult for Western firms and individuals to make investments in Ukraine, and distorted economic performance.

B. Balan

Ruchkivsky, Serhii [Ručkivs'kyj, Serhij], b 19 January 1888 in Tarashcha, Kiev gubernia, d ? Epidemiologist; corresponding member of the USSR Academy of Medical Sciences from 1946. A graduate of Kiev University (1914), he taught at the Kiev Institute for the Upgrading of Physicians (1929–58), headed departments of the Kiev Bacteriological Institute (1929–39) and the Kiev Medical Institute (1948–58), and worked at the Kiev Scientific Research Institute of Epidemiology, Microbiology, and Parasitology. His publications deal with typhus, bacterial dysentery, botulism, and the diagnosis of infectious diseases.

Ruchko, Hnat [Ručko], b 20 January 1883 in Velyki Sorochyntsi, Myrhorod county, Poltava gubernia, d 1946. Microbiologist; corresponding member of the AN URSR (now ANU) from 1934. A graduate of the Kharkiv Medical Institute (1925), he worked at the Kharkiv Sanitation and Bacteriology Research Institute (1925–9) and the Berlin Institute of Hygiene and Immunology (1930–2) and then headed a department of the ANU Institute of Microbiology and Epidemiology (1932–7). His major research interests involved bacteriophage and the mutability of viruses, particularly in relation to dysentery. He organized the first Soviet scientific conference in this area (1936) and initiated *Mikrobiolohichnyi zhurnal* in 1934. Ruchko was repressed in 1938 during the Yezhov terror.

Rud, Mykola [Rud'], b 9 May 1912 in Oleksandrivka, Kostiantynohrad county, Poltava gubernia. Prose writer, poet, and publicist. After graduating from the Gorky Institute of Literature (Moscow) he wrote for the Donetsk press and for the periodical *Ukraina*. He has published anthologies of poetry, such as *Naiblyzhche* (The Closest, 1936), *Slovo pislia boiu* (A Word after the Battle, 1947), and *Hrim na zelene hilia* (Thunder on the Green Boughs, 1960); books of novelettes and short stories, such as *Na Podilli* (In Podilia, 1955), *Chas klopotu i spodivan'* (A Time of Troubles and Hopes, 1956), and *Dyven'* (Wedding Bread, 1973); and the novels *I ne skazala 'liubliu'* (And She Didn't Say 'I Love,' 1964), *Z matir'iu na samoti* (Alone with Mother, 1967), and *Ne zhdy, ne klych* (Don't Wait [For Me], Don't Call, 1978).

Rudakov, Elisei, b 27 April 1929 in Tomsk, Russia. Chemist; AN URSR (now ANU) corresponding member since 1972. After graduating from the Moscow Institute of Fine Chemical Technology (1952) he worked at the Leningrad Institute of Petrochemical Processes (to 1959) and thereafter at the Novosibirsk institutes of Organic Chemistry and Catalysis and at Novosibirsk University. Since 1972 he has been a department head at the ANU Institute of Physical-Organic Chemistry and Coal Chemistry in Donetsk. Rudakov developed a method to determine the thermodynamic functions of molecular interactions and a transition-state theory for heterolytic reactions. He also studied the activation of alkyl halides and alkanes by transition-metal complexes, and discovered the oxidative dehydrogenation of alkanes by means of palladium.

Rudansky, Stepan [Rudans'kyj], b 6 January 1834 in Khomutyntsi, Vinnytsia county, Podilia gubernia, d 3 May 1873 in Yalta. Poet. He studied at the St Petersburg Academy of Medicine and Surgery, and after graduation (1861) he worked for the rest of his life as a doctor in Yalta. Rudansky began to write poetry in his pre-St Petersburg days, while still a student at the Kamianets-Podilskiy Theological Seminary, and that poetry shows the influence of T. Shevchenko's work and of folklore. He began to publish his work in 1859 in St Petersburg, where he became friendly with a group of Ukrainian writers working on the journal *Osnova*. Having begun in the genre of the Romantic ballad, Rudansky then turned to poetry on social issues, using that of Shevchenko as a model. That later poetry featured a condemnation of serfdom, a rallying call to work in the field of Ukrainian culture, and a reliving of the glorious history of the Ukrainian people. Rudansky

Stepan Rudansky (portrait by V. Kovalov)

Ivan Rudchenko

achieved long-lasting fame as author of *Spivomovky* (Singing Rhymes, 1880), which consisted of poems of various length, jokes, proverbs, and short anecdotes about landlords, clerics, Gypsies, Muscovites, Poles, Jews, Germans, devils, Cossacks, peasants, and so forth, derived mainly from folk literature and written in a jaunty tone with pointed humor and many witticisms. Apart from those light-hearted *spivomovky*, Rudansky wrote lyric poetry filled with an aching sadness, which reflected not only the poet's personal life but also the sufferings of all his people. Some of those poems are autobiographical, and some became popular songs (such as 'Povii vitre, na Ukraïnu' [Blow, Wind, on Ukraine]). Rudansky's works also include translations, such as of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign), of excerpts from the Králové Dvůr Manuscript, of Homer's *Iliad*, of Virgil's *Aeneid*, of a part of M. Lermontov's *Demon*, and of individual poems by H. Heine, T. Lenartowicz, and B. Radičević. Most of his significant works were published only posthumously. Rudansky's style straddles on the Romantic and the realist. His imagery and the poetics of his ballads and lyric poems are clearly of folkloric derivation. Editions of Rudansky's works have appeared in 1895–1903 (7 vols) and 1972–3 (3 vols).

I. Koshelivets

Rudchenko, Ivan [Rudčenko] (pseud.: Ivan Kyvaiholova, Ivan Ruina, I. Yakovenko, I. Bilyk), b 2 September 1845 in Myrhorod, Poltava gubernia, d 1 June 1905 in Kiev. Folklorist, literary critic, writer, and publicist; brother of P. *Myrny. His first articles and folklore materials appeared in *Osnova* in 1862. Beginning in 1867 the Lviv journal *Pravda* published many of his poems, critical articles, reviews, and translations from Russian, German, English, and Polish. His chief contributions to folklore studies were *Narodnye iuzhno-russkie skazki* (South Russian Folktales, 2 vols, 1869–70) and *Chumatskie narodnye pesni* (Folk Songs of the Chumaks, 1874). The Ems Ukase prevented him from publishing other works on folklore. With Myrny he cowrote the famous novel *Khiba revut'voly iak iasla povni?* (Do Oxen Low When Mangers Are Full?, 1880). He left a great number of manuscripts, including 1,000 folktales, which are preserved in the library of the Academy of Sciences in St Petersburg.

Rudchenko, Panas. See Myrny, Panas.

Bela Rudenko

Larysa Rudenko

Rudenko, Bela, b 18 August 1933 in Bokovo-Anratsyt (now in Luhanske oblast). Opera singer (lyric soprano). A graduate of the Odessa Conservatory (1956), she studied singing under O. Blahovydova. She was a soloist with the Odessa Opera (1955–6), the Kiev Opera (1956–73), and, from 1973, the Bolshoi Theater in Moscow. In 1957 she won the gold medal at the Toulouse International Vocal Competition. Her operatic roles included Liudmila in M. Glinka's *Ruslan and Liudmila*, Marfa in N. Rimsky-Korsakov's *Tsar's Bride*, Yaryna in H. Maiboroda's *Maryna* and the Serf-girl in his *Arsenal*, Gilda in G. Verdi's *Rigoletto* and Violetta in his *La Traviata*, Rosina in G. Rossini's *Barber of Seville*, the Queen of the Night in W. Mozart's *Magic Flute*, and Venus in M. Lysenko's *Aeneas*. She toured abroad and from 1977 taught singing at the Moscow Conservatory. Biographies of Rudenko have been written by V. Tymofieiev and T. Shvachko (1982).

Rudenko, Larysa, b 28 January 1918 in Makiivka (now in Donetske oblast), d 19 January 1981 in Kiev. Opera singer (mezzo-soprano). A graduate of the Kiev Conservatory (1940), she studied under O. Muraviova, and then was a soloist in the Kiev Theater of Opera and Ballet (1939–70). Her nearly 50 operatic roles spanned the works of M. Lysenko, K. Dankevych, H. Maiboroda, P. Tchaikovsky, G. Bizet, and G. Verdi. She concertized abroad and from 1951 taught singing at the Kiev Conservatory. Her biography, by L. Hrysenko, was published in Kiev (1978).

Rudenko, Liudmyla, b 27 July 1904 in Lubni, Poltava gubernia. Champion swimmer and chess player. She won the 1920 Odessa championship in the women's 400-m breaststroke and won the silver medal in that event in the 1925 Ukrainian championship, and was the women's chess champion of Moscow (1928), Leningrad (1932, 1936, 1947, 1962), Uzbekistan (1955), and Ukraine (1956) and the first world women's chess champion (1950–3). In 1976 she became an international grand master.

Rudenko, Mykola, b 19 December 1920 in Yurivka, now in Lutuhyne raion, Luhanske oblast. Writer and dissident. A former managing editor of the Writers' Union of Ukraine's (SPU) journal *Dnipro* (1947–50) and secretary of the CPU organization in the SPU, beginning in 1947 he published over 10 collections of indifferent poetry and a few books of socialist-realist prose and *science fiction. Rudenko became involved in the Soviet human rights

Raisa and Mykola Rudenko

movement in the early 1970s and was consequently expelled from the CPU in 1974 and the SPU in 1975. In November 1976 he became head of the newly formed *Ukrainian Helsinki Group. He was arrested for 'anti-Soviet agitation and propaganda' in February 1977, and in July of that year he was sentenced at a closed trial to seven years in labor camps in central Russia's Perm oblast and the Mordovian ASSR, followed by five years' exile in the Altai region in Soviet Central Asia. During his incarceration, 10 of his works were smuggled to the West and published there. They include the narrative poem *Khrest* (1977; trans: *The Cross*, 1987); the poetry collection *Za gratamy* (Behind Bars, 1980); a volume of physiocratic, pantheistic philosophy, *Ekonomichni monolohy* (Economic Monologues, 1978); the play *Na dni mors'komu* (On the Sea Floor, 1981); and a novel about life in Ukraine, *Orlova balka* (The Eagle's Ravine, 1982). In December 1987 Rudenko and his wife, R. *Rudenko, were allowed to emigrate to the West. They lived in the United States until 1990, when they returned to Ukraine.

Rudenko, Raisa [Rajisa], b 1939. Dissident and political prisoner; wife of M. *Rudenko. She was arrested for disseminating Ukrainian dissident documents in April 1981, and sentenced in September to five years in a labor camp for women in the Mordovian ASSR and five years' exile in the Altai region. In 1987 she was allowed to emigrate to the West with her husband, and in 1990 she returned with him to Ukraine.

Rudenko, Roman, b 18 July 1907 in Nosivka, Nizhen county, Chernihiv gubernia, d 23 January 1981 in Moscow. Soviet jurist. He studied law at Kiev University. From 1929 he worked in the Soviet legal system, in which he advanced from the position of investigator to those of procurator of Staline (now Donetsk) oblast (1938–40), deputy procurator (1942–4) and procurator (1944–53) of the Ukrainian SSR, chief Soviet prosecutor at the Nuremberg Trials (1945–6), and USSR general procurator (1953–81). He was also a candidate member (1956–9) and full member (1961–81) of the CC CPSU. In 1953 he supervised the mass execution of striking political prisoners at the Vorkuta labor camps.

Rudky. IV-4. A city (1989 pop 5,000) in Sambir raion, Lviv oblast. It was first mentioned in historical documents in 1472. Archeological evidence shows that the site was inhabited in the Bronze Age. The town was granted *Magdeburg law in the first half of the 18th century, when it was part of the Polish Commonwealth. After the partition of Poland in 1772, Rudky came under Austrian rule. In the interwar period it was under Polish rule and then part of the Ukrainian SSR. Standing on the Lviv–Sambir railway line, Rudky is an industrial and transportation center. Its factories manufacture bricks, cheese, and baked goods.

Rudky natural gas field. A gas field discovered in the western part of Lviv oblast in 1953. Two separate deposits have been found, one in a fissure of limestone at a depth of 1,200–1,450 m, and the other in a stratum of sand at a depth of 800–900 m. The gas is 96–99 percent methane. It is used for heating in Lviv, and some is exported.

Rudlovchak, Olena [Rudlovčak], b 1 February 1918 in Mukachiv, Transcarpathia. Literary scholar. She received her docent's diploma at Prague University (1967). She worked as a teacher, an editor, and a playwright and stage director of the Czechoslovak Radio's Ukrainian studio before becoming a scholarly associate (1960) and the head of research (1967) in the Šafařík University department of Ukrainian language and literature in Prešov. Rudlovchak has written articles (in *Duklia*, *Naukovyi zbirnyk* of the Svydnyk Museum of Ukrainian Culture, and other periodicals and collections) on the history of Ukrainian (especially Transcarpathian) literature, ethnography, journalism, and theater. She wrote a book-length introduction to the 1968 Prešov edition of O. Dukhnovych's works, and has edited anthologies of Ukrainian folk poetry from the Prešov region (1965) and Transcarpathian poetry to 1945 (1965, with V. Mykytas), a collection of articles on the past and present of Ukrainians in Czechoslovakia (1973, with M. Hyriak), and two anthologies of 19th-century Transcarpathian literature (1964, with Yu. Bacha; 1976). An edition of her selected literary studies, *Bilia dzherel suchasnosti* (At the Sources of the Present), was published in 1981.

Rudne. IV-4. A town smt (1986 pop 7,000) on the western outskirts of Lviv, under the administration of the Zaliznychnyi raion council. The settlement of Rudne is first mentioned in historical records in the 14th century. Today most of its residents work in Lviv.

Rudnyckyj, Jaroslav [Rudnyc'kyj], b 28 November 1910 in Peremyshl, Galicia. Slavist, linguist, and civic figure; husband of Maryna Rudnytska; member of the Shevchenko Scientific Society since 1947. After studying at Lviv University (MA, 1934; PH D, 1937) he became a research associate of the Ukrainian Scientific Institute in Berlin (1938–40), docent (1940–3) and professor (1943–80) at the Ukrainian Free University in Prague and Munich, lecturer at Prague (1941–5) and Heidelberg (1947–8) universities, and professor and first head of the department of Slavic studies at the University of Manitoba (1949–77). As a member of the Canadian Royal Commission on Bilingualism and Biculturalism (1963–71) he made an important contribution to Canada's policy of multiculturalism. He has served as president of the Ukrainian Free

Jaroslav Rudnyckyj

Milena Rudnytska

Academy of Sciences in Canada (1955–70), the Canadian Linguistic Association (1958–60), the Canadian Association of Slavists (1959), the American Name Society (1959), the Canadian Institute of Onomastic Sciences, the Canadian Comparative Literature Association, the Canadian Society for the Comparative Study of Civilizations, the Ukrainian Language Association (in Canada), and the Ukrainian Mohylo-Mazepian Academy of Arts and Sciences. He was also founding editor of *Slavistica* (1948), *Onomastica* (1951), *Ukrainica Canadiana* (1953–73), *Ukrainica Occidentalia* (1956–66), and *Slovo na storozhi* (1964–89). He was appointed member of the UNR government-in-exile in 1978, and he served as its head in 1980–9. His numerous articles and reviews on Ukrainian language, dialects, linguistics, onomastics, folklore, and literature have appeared in Ukrainian émigré and Western periodicals, and over 50 of his works have been separately published, including *Ukrains'ka mova ta її hovory* (The Ukrainian Language and Its Dialects, 1937; 4th rev edn 1977), *Lehrbuch der ukrainischen Sprache* (1940; 4th edn 1964), *Lemberger ukrainische Stadtmundart* (1943), *The Term and Name 'Ukraine'* (1951), *Canadian Place Names of Ukrainian Origin* (1952), *An Etymological Dictionary of the Ukrainian Language* (2 vols [22 fascicles], 1962–82), *Geographical Names of Boikovia* (1939; repr 1962), and *Manitoba Mosaic of Place Names* (1970). He is the coauthor of *Ukrainische Mundarten: Südkarpatoukrainisch (Lemkisch, Bojkisch, Huzulisch)* (1940), *Ukrainisch-deutsches Wörterbuch* (1943), and *A Modern Ukrainian Grammar* (1949; 7th printing 1978). His papers are preserved at the National Archives of Canada in Ottawa. The most recent bibliography of his works was published in 1984.

R. Senkus

Rudnytska, Maryna [Rudnyc'ka] (née Antonovych), b 23 December 1911 in Kiev. Cultural activist; daughter of D. and K. *Antonovych and wife of J. *Rudnyckyj. She studied at Berlin (1929–31) and Prague (1931–6) universities and completed a doctorate at the Ukrainian Free University in Prague (1940). After emigrating to Canada in 1949, she taught art at St Andrew's College (1950–2, 1973–4) and Russian language and literature at the University of Manitoba (1957–8, 1963–5). For many years she worked in the Plast Ukrainian Youth Association. She has contributed articles on art and literature to the Ukrainian press,

compiled a bibliography of books on I. Franko in Canadian and American libraries (1957) and an anthology of Russian poetry (1968), and written a study on O. Stefanovych (1970).

Rudnytska, Milena [Rudnyc'ka], b 15 July 1892 in Zboriv, Galicia, d 29 March 1976 in Munich. Journalist, politician, and civic activist; wife of P. *Lysiak and mother of I.L. *Rudnytsky. After graduating from Lviv University she taught secondary school and later lectured at the Higher Pedagogical Courses in Lviv (1921–8). In the inter-war period she became one of the leading activists of the *women's movement in Western Ukraine: in the 1920s she was an executive member and then president (1929–38) of the *Union of Ukrainian Women; she was one of the organizers of the First Ukrainian Women's Congress in Stanyslaviv (1934); in 1937 she was elected president of the *World Union of Ukrainian Women; and in 1938 she headed the *Druzhyna Kniahyni Olhy. She also edited the women's semimonthly *Zhinka* (1935–9) and represented Ukrainian organizations at international women's conferences. A founder and executive member of the *Ukrainian National Democratic Alliance (UNDO), she was elected to the Polish Sejm in 1928 and 1930. She was a member of the Sejm's educational and foreign affairs committees. As a member of the Ukrainian Parliamentary Representation she presented petitions from the Ukrainian people to the League of Nations, particularly on the issues of the Polish Pacification of Western Ukraine and the man-made famine in Soviet Ukraine. After emigrating in 1939, she lived in Cracow, Berlin, Prague, Geneva (where she directed the Ukrainian Relief Committee in 1945–50), New York, Rome, and Munich. Besides contributing articles on educational and women's issues to the Ukrainian press from 1919, she wrote the books *Ukrains'ka diisnist' i zavdannia zhinochoho rukhu* (The Ukrainian Reality and the Tasks of the Women's Movement, 1934), *Don Bosco: Liudyna, pedahoh, sviatyi* (Don Bosco: Man, Pedagogue, and Saint, 1963), and *Nevydymy styhmaty* (The Invisible Stigmata, 1971).

Rudnytska, Nonna [Rudnyc'ka] (married name: Hurska), b 22 June 1934 in Vinnytsia. Actress. She completed study at the Kiev Institute of Theater Arts (1956) and then worked in the Kherson (1957–65), Chernihiv (1966–70), and Rivne (from 1971) Ukrainian Music and Drama theaters.

Rudnytsky, Antin [Rudnyc'kyj], b 7 February 1902 in Luka, Sambir county, Galicia, d 30 November 1975 in Tom's River, New Jersey. Composer, conductor, pianist, teacher, and musicologist; member of the Shevchenko Scientific Society (from 1962). He studied at the Lysenko Higher Institute of Music in Lviv, the Higher Musical School in Berlin, and Berlin University, with such teachers as E. Petri, A. Schnabel, and F. Schrecker. He subsequently conducted at opera theaters in Kharkiv (1927–30), Kiev (1930–2), Lviv, Warsaw, and Kaunas. He emigrated to the United States in 1939, where he worked as a music teacher in various institutions (including the Philadelphia Music Academy) and as a choir conductor. He was a leading organizer of Ukrainian-American musical activities and wrote the historical survey *Ukrains'ka muzyka: Istorychno-krytychnyi ohliad* (Ukrainian Music: A Historical Critical Survey, 1963) as well as a collection of articles published

Antin Rudnytsky

Ivan Lysiak Rudnytsky

posthumously, *Pro muzyku i muzyk* (On Music and Musicians, 1980). His musical works were initially modernistic but gradually became more impressionistic and romantic. They include the operas *Dovbush* (1938) and *Anna Yaroslavna* (1967), three symphonies, a ballet suite and the ballet *Buri nad Zakhodom* (Storms over the West, 1932), a lyric poem, an overture, a concerto for cello and orchestra, the oratorio *Haidamaky* (1974), the cantata *Moses* (to I. Franko's poem), *Poslaniie* (The Epistle, to T. Shevchenko's poem), and works for chamber orchestra, piano, and choir, as well as approx 50 songs for voice and piano.

W. Wytwycky

Rudnytsky, Ivan. See Kedryn, Ivan.

Rudnytsky, Ivan Lysiak [Lysjak Rudnyc'kyj], b 27 October 1919 in Vienna, d 25 April 1984 in Edmonton. Historian and pedagogue; son of P. *Lysiak and M. *Rudnytska. He was educated at the University of Lviv (1937–9), the University of Berlin (1942), Charles University in Prague (PH D, 1945), the Graduate Institute of International Studies in Geneva (1951), and Columbia University (1951–3). Rudnytsky taught at La Salle College in Philadelphia (1956–67), the American University in Washington, DC (1967–71), and the University of Alberta (1971–84). He helped found the *Canadian Institute of Ukrainian Studies at the University of Alberta and was its associate director (1976–80). Rudnytsky was a prolific essayist; he published the collection *Mizh istoriieiu i politykoiu* (Between History and Politics, 1973) and edited *Drahomanov: A Symposium and Selected Writings* (1952), *Lysty Osypa Nazaruka do Viacheslava Lypyns'koho* (Letters of Osyp Nazaruk to Viacheslav Lypynsky, 1976), and *Rethinking Ukrainian History* (1981). He also contributed articles on history to *Entsyklopediia ukrainoznavstva* and *Encyclopedia of Ukraine*. A posthumous edition of his *Essays in Modern Ukrainian History* appeared in 1987.

Rudnytsky, Ivan Teodor [Rudnyc'kyj], b 20 November 1886 in Bedrykivtsi, Zalishchyky county, Galicia, d 3 March 1951 in Hoester an der Weser, West Germany. Military officer. A graduate in law of Lviv University, during the First World War he served in the Austrian army as commander of a machine-gun company on the Italian front. He was one of the key members of the Ukrainian Military Committee, which organized the *November 1918 uprising in Lviv. In the Ukrainian Galician Army (UHA) he was promoted to captain and oversaw the training of machine gunners. Subsequently he served as a UHA

Ivan Teodor Rudnytsky

Mykhailo Rudnytsky

representative in Vienna and a military attaché in Prague and officer of the Ukrainian Military Organization (UVO) in Czechoslovakia. From the end of the 1920s he practiced law in Lviv and belonged to the UVO home leadership. After the Second World War he settled in West Germany.

Rudnytsky, Mykhailo [Rudnyc'kyj, Myxajlo], b 7 January 1889 in Pidhaitsi, Galicia, d 1 February 1975 in Lviv. Literary critic, literary scholar, and teacher; brother of I. Kedryn, M. Rudnytska, and A. Rudnytsky. He concluded his studies at Lviv University (PH D, 1914) and studied Western European literatures in Paris and London (1919–22). He was a professor at the Lviv (Underground) Ukrainian University (1922–5) and contributed to the newspaper *Dilo* and the journal *Nazustrich* (1934). In 1939 he became a professor of foreign literatures, and in 1948, of Ukrainian literature at Lviv University. Rudnytsky was the author of criticism and original literary work, including *Mizh ideieiu i formoiu* (Between Concept and Form, 1932), *Vid Myrnoho do Khvyli'ovoho* (From Myrny to Khvylovy, 1936), a collection of poetic prose titled *Ochi ta usta* (Eyes and Lips, 1922), collections of short stories, and literary portraits. He wrote memoirs, including *Nahody i pryhody* (Opportunities and Adventures, 1929) *Tvorchi budni Ivana Franka* (Ivan Franko's Creative Days, 1956), *Pys'mennyky zblyz'ka* (Writers at Close Range, 3 vols, 1958–64), *Zmarnovanyi siuzhet* (A Wasted Plot, 1961), *Nenapysani novely* (Unwritten Novellas, 1966), and *Neperedbacheni zustrichi* (Unforeseen Meetings, 1969). Together with V. Bieliaiev he wrote several pamphlets directed against 'bourgeois nationalists' titled 'Pid chuzhymy praporamy' (Under Foreign Flags, pub in Russian in 1954, in Ukrainian in 1956, and in Chinese in 1957). He also translated Shakespeare, H. de Balzac, P. Mérimée, and G. Flaubert into Ukrainian, and V. Stefanyk, M. Kotsiubynsky, and M. Yatskiv into French.

I. Koshelivets

Rudnytsky, Roman [Rudnyc'kyj], b 1 November 1942 in New York. Pianist; son of A. *Rudnytsky and M. *Sokil. Studying initially under his father, he graduated from the Philadelphia Conservatory and the Juilliard School of Music in New York. He has performed as a soloist and with symphony orchestras in the United States, Canada, Spain, Switzerland, Germany, Poland, and Ukraine and has taught music at the University of Indiana and Youngs-

town State University in Ohio. His repertoire includes the works of B. Liatoshynsky, Yu. Fiala, A. Rudnytsky, and other Ukrainian composers.

Stepan Rudnytsky

Leo Rudnytsky

Rudnytsky, Stepan [Rudnyc'kyj], b 15 December 1877 in Ternopil, Galicia, d 3 November 1937 in the Solovets Islands. Geographer; full member of the Shevchenko Scientific Society from 1901 and the VUAN (1929–34). After studying at Lviv (1895–9) and Vienna (1899–1901) universities he taught secondary school in Ternopil (1902–8) and lectured at Lviv University. During the First World War he lived in Vienna, where he was active in the Union for the Liberation of Ukraine and served as a consultant to the Ukrainian Parliamentary Representation and the government-in-exile of the Western Province of the Ukrainian National Republic. After the war he was one of the organizers of and a professor at the *Ukrainian Free University in Vienna and then Prague. In 1926 he was invited to Kharkiv by the government of Soviet Ukraine to organize geographic research. He served as a professor of geography at the Kharkiv Institute of People's Education and as director of the Ukrainian Scientific Research Institute of Geography and Cartography, which he had set up. Then he was the first holder of the chair of geography at the VUAN. In 1933 he was arrested, expelled from the VUAN as an 'outspoken propagator of fascism in geography,' and sent to a prison camp in the Soviet Arctic, where he was eventually executed.

Rudnytsky is a founder of the geography of Ukraine. He wrote comprehensive geographic surveys of Ukraine, such as *Ukraina, Land und Volk* (1916; English trans: *Ukraine: The Land and Its People*, 1918) and *Osnovy zemleznannia Ukrainy* (Foundations of the Earth Science of Ukraine, 2 vols, 1924, 1926), as well as studies of Ukrainian national territories (1923) and Ukrainian political geography (1923). He developed Ukrainian geographical terminology and published the first specialized dictionary (1908) in that field. The first wall maps of Ukraine's physical geography (1918) were prepared by Rudnytsky. His specialized monographs, such as *Osnovy morfolohii i heolohii Pidkarpats'koi Rusy* (Foundations of the Morphology and Geology of Subcarpathian Rus', 2 vols, 1925, 1927), dealt mainly with the morphology of Ukraine, particularly the Carpathian region. He wrote approx 70 scholarly works, including several articles on the methodology and history of geography and on 17th-century Cossack history.

V. Kubijovyč

Rudnytsky, Yaroslav. See Rudnycky, Jaroslav.

Rudnytsky, Yurii. See Opilsky, Yuliiian.

Rudnytsky-Liubienitsky, Sylvestr [Rudnyc'kyj-Ljubjenic'kyj], b and d ? Uniate bishop. He studied at the Basilian school in Volodymyr–Volynskyi, after which he entered the Basilian order and served as hegumen of the Lavriv St Onuphrius's Monastery. He was then consecrated, as the successor to his uncle, T. Rudnytsky-Liubienitsky, as bishop of Lutske-Ostrih (1751–78). During his tenure he sought to increase discipline and educational standards in the eparchy. From 1772 he headed the Basilian chapter in Berestia.

Rudnytsky-Liubienitsky, Teodosii [Rudnyc'kyj-Ljubjenic'kyj, Teodosij], b and d ? Uniate bishop. A hegumen of the monasteries in Lutske, Hoshcha, and Pochaiv (where he funded the Pochaiv Monastery Press), he was consecrated bishop of Lutske-Ostrih in 1731. He was the crown's choice for metropolitan of Kiev in 1747 but was forced to step down in favor of F. *Hrebnytsky. He strove for friendly relations with the Orthodox in Volhynia and in the Kievan metropol, and in 1738 wrote a book of instructions for the clergy.

Rudnytsky, Leo [Rudnyc'kyj, Leonid], b 8 September 1935 in Lviv. Literary scholar; member of the Shevchenko Scientific Society (NTSh). A postwar émigré, he studied at La Salle College in Philadelphia, the University of Pennsylvania, and the Ukrainian Free University (PH D, 1965) and has taught at the University of Pennsylvania (1958–60) and La Salle College (since 1961). He was elected president of the NTSh in the United States in 1990. He has written a book on I. Franko and German literature (1974), articles on Ukrainian literature in émigré and American scholarly periodicals, and entries for American encyclopedias. He coedited the symposium *The Ukrainian Catholic Church, 1945–1975* (1976) and has also coedited or written introductions to a number of NTSh publications.

Rudovyč, Ivan [Rudovyč], b 1868, d 16 August 1929 in Lviv. Ukrainian Catholic priest and pedagogue. From 1897 a religion teacher in primary and secondary schools in Lviv, he was the longtime head of the St Paul the Apostle Society and a founding member of the Ukrainian Theological Scholarly Society. He wrote textbooks and popular works on religious themes and about church history, including *Uniiia v Lvovs'koi eparkhii* (The Church Union in Lviv Eparchy, 1900) and *Korotka istoriia Halytsko-L'vovskoi eparkhii* (A Short History of Halych-Lviv Eparchy, 1901).

Rudychiv, Ivan [Rudyčiv], b 28 May 1881 in Kyshenky, Kobeliaky county, Poltava gubernia, d 28 October 1958 in Abondant, France. Lawyer and civic leader. A schoolmate of S. Petliura at the Poltava Theological Seminary, he joined the Revolutionary Ukrainian party in 1903 and was arrested shortly thereafter for political agitation. After graduating from the law faculty of Kazan University in 1912, he worked at the Mining Institute in Katerynoslav and was active in local Ukrainian organizations. During the revolutionary period he took part in the first two all-Ukrainian military congresses and in the overthrow of the Hetman government. After emigrating with the UNR government he lived in Berlin, Prague, and Paris, where he

managed the Petliura Ukrainian Library (1926–50). His recollections of Petliura appeared in the collection *Symon Petliura v molodosti* (Symon Petliura in His Youth, 1936).

Rudyk, Dmytro, b 13 June 1893 in Strilche, Horodenka county, Galicia, d 30 May 1955 in Kiev. Literary scholar and critic. After the February Revolution he worked as a teacher in Uman. From 1923 he taught in Kiev and was principal of the first Ukrainian-language school there. He joined Pluh and became a founding member of the *Zakhidnia Ukraina writers' group and worked as an editor for its publishing house. His articles on Ukrainian modernist writers and reviews of literary works and translations were published in *Zhyttia i revoliutsiia*, *Krytyka*, *Zakhidnia Ukraina*, *Zoria*, and *Svit*. From 1933 to 1953 Rudyk was imprisoned unjustly in concentration camps in the Soviet Arctic.

Rudyk, Paul, b 28 November 1878 in Leshniv, Brody county, Galicia, d 1 July 1936 in Edmonton. Business and community leader. Rudyk emigrated to Canada in 1898 and opened a grocery store in Edmonton in 1902, reputedly the first Ukrainian-owned business in Canada. A developer and contractor, he helped organize the National Co-operative in Vegreville, Alberta, and the General Wholesale Company. He was among the first and largest shareholders in the Trident Publishing Company, a longtime member and secretary of the Hrushevsky Institute in Edmonton (now St John's Institute), a founder of the newspaper *Ukrains'kyi holos* (Winnipeg), and a supporter of the Presbyterian church.

Metropolitan Stefan Rudyk

Mykhailo Rudynsky

Rudyk, Stefan, b 27 December 1891 in Maidan Ly-povetskyi, Peremyshliany county, Galicia, d 26 March 1969. Orthodox metropolitan. After completing theological studies in Zhytomyr and Orel in 1915, he became a village priest. In the interwar period he joined the Polish Autocephalous Orthodox church and served as a chaplain for Polish troops in Toruń, Katowice, and Cracow, until he was interned in Rumania at the outbreak of the Second World War. He was later released, and he went to Germany before being assigned to a parish in Łódź in 1943. He was consecrated bishop of Wrocław-Szczecin in 1953 and then elevated to the office of archbishop of Białystok-Gdansk in 1961. In 1965 he was made metropolitan.

Rudyk, Stepan, b 1890 in Tysmenytsia, Tovmach county, Galicia, d 1939? Political activist, member of the Communist Party of Western Ukraine (KPZU), and journalist. In 1923–31 he edited the Marxist literary and political journal *Kul'tura* in Lviv. For defending the ideas of Shumskyism and Khvylovism (see O. *Shumsky and M. *Khvylovy) he was expelled from the Party in 1927. He mustered opposition to the KPZU in Galicia and worked with the Trotskyite opposition. He was arrested by the Soviets in 1939 and was probably executed.

Rudykovsky, Andrii [Rudykovs'kyj, Andrij], b 13 October 1796 in Vilshanka, Vasylkiv county, Kiev gubernia, d 14 August 1874 in Kiev. Memoirist; brother of O. Rudykovsky. His autobiography, an unembellished, informative account of his life as an orphaned ward of the state at the Kievan Mohyla Academy in its last years, a poor laborer living with a clerical family in rural Ukraine, and a Russian cavalry officer (1815–48) in Ukraine, was published by his grandnephew, V. *Shcherbyna, in *Kievskaiia starina* and separately with his brother's poetry in 1892.

Rudykovsky, Ostap [Rudykovs'kyj] (Yevstafii), b 2 October 1784 in Vilshanka, Vasylkiv county, Kiev gubernia, d 1851 in Kiev. Poet and physician. He graduated from the Kievan Mohyla Academy and the St Petersburg Medical-Surgical Academy (1806–10) and worked as an army doctor (1810–25) and a physician in hospitals in Kiev. He was a friend of Russian generals and writers and Ukrainian scholars (eg, M. Maksymovych, to whom he dedicated several of his Ukrainian poems). His large literary archive was taken by his son to St Petersburg, where it perished. Twenty-seven of his poems, Kotliarevsky-like burlesque fables in verse about the Ukrainian peasantry, Shevchenko-like Romantic ballads about the Cossacks, and (in Russian) odes and lyric poems, were published by his grandson, V. *Shcherbyna, in *Kievskaiia starina* and separately in 1892.

Rudynsky, Mykhailo [Rudyns'kyj, Myxajlo], b 14 October 1887 in Okhtyrka, Kharkiv gubernia, d 23 June 1958 in Kiev. Archeologist and pedagogue. After completing studies at St Petersburg and Kharkiv universities, he worked in Putyvel, Pereiaslav, and Kiev as a gymnasium teacher (1910–17). He then worked in Poltava as a regional educational co-ordinator (1917–20), overseeing the preparation and publication of numerous children's books, textbooks, and popular works on history and art, and as the regional museum director (1920–4). In 1924 he moved to Kiev to become the academic secretary of the *All-Ukrainian Archeological Committee (VUAK). He also was active in the AN URSR (now ANU) *Cabinet of Anthropology and Ethnography and helped to edit the serial **Antropolohiia*. Together with M. Makarenko, Rudynsky was one of the most prominent Ukrainian archeologists to support the idea of the independent development of a Ukrainian national culture even in prehistoric times. In 1934 he was arrested during the Stalinist terror and exiled to Siberia. He spent part of his time there (1940–4) as the director of a regional museum in Vologda. In 1944 Rudynsky returned to Kiev and resumed his scholarly work with the ANU Institute of Archeology. His major work, *Kam'iana Mohyla*, was published posthumously in 1961.

Rue (*Ruta*; Ukrainian: *ruta*). A perennial herb or shrub of the family Rutaceae. Of its approx 40 species, only the common or fragrant rue (*R. graveolens*) is found in Ukraine, where it grows wild on the rocky slopes of southern Crimea. *R. hortensis* is a popular cultivated ornamental plant that blooms in June or July. A *toxic plant, common rue contains highly aromatic essential oils and the alkaloid rutin, used as a source for vitamin preparations. In folk medicine rue was used for centuries as an antispasmodic and hypotensive agent. Many Ukrainian folk songs have been written about rue.

Rev Philip Ruh

Petro Rulin

Ruh, Philip, b 6 August 1883 in Bikenholtz, Alsace-Lorraine, d 24 October 1963 in St Boniface, Manitoba. Priest, missionary, and architect. He was ordained an Oblate priest in 1910 and went to Galicia for special training as part of a project to send celibate priests to western Canada. He arrived in Canada in 1911 and served Ukrainian Catholic parishes in Alberta and Manitoba. Although not a trained architect, Ruh designed and built over 20 Ukrainian Catholic churches in Canada, as well as the Basilian monastery in Mundare, Alberta (1922–3), and the calvary at Cook's Creek, Manitoba (1954–62). Most of his church designs have a cruciform floor plan, with a central dome and two, four, or more smaller domes, echoing the tradition of Ukrainian baroque churches. St George's Cathedral (1939–43) in Saskatoon has a cruciform plan with a central dome and six smaller ones, as has the Church of the Assumption of the Blessed Virgin Mary (1930–52) in Cook's Creek. St Josaphat's Cathedral (1936) in Edmonton is similar in style and has a classical colonnaded entrance and portico. Ruh designed and built the large wooden St Mary's Church (1924–5) in Mountain Road, Manitoba, and churches in Portage la Prairie and Dauphin (Manitoba); Kenora, St Catharines, and Grimsby (Ontario); and elsewhere. His autobiography was published in 1960.

Ruha. In the Ukrainian and Russian Orthodox churches the term designated for material assistance given, primarily by the state, for the support of the clergy and the maintenance of churches and monasteries which lacked their own landholdings or other sources of revenue. *Ruzhna tserkva* (*ruha*-supported church) was a term often used in Kiev in the 18th century. In villages the *ruha* was provided in kind by the peasant parishioners.

Ruin (*ruina*). A period in the late 17th century in the *history of Ukraine, characterized by the disintegration of Ukrainian statehood and general decline. Some historians (eg, M. Kostomarov) correlate it with the tenures of three Moscow-backed hetmans (I. Briukhovetsky, D. Mnohohrshny, and I. Samoilovych) and limit it chronologically to 1663–87 and territorially to Left-Bank Ukraine. Other historians (eg, B. Krupnytsky) consider the Ruin to apply to both Left- and Right-Bank Ukraine from the death of B. Khmelnytsky to the rise of I. Mazepa (1657–1687).

During the Ruin Ukraine became divided along the Dnieper River into Left-Bank and Right-Bank Ukraine, and the two halves became hostile to each other. Neighboring states (Poland, Muscovy, the Ottoman Empire) interfered in Ukrainian internal affairs, and Ukrainian policies were skewed by efforts to curry favor among the various occupational forces. The Ukrainian Orthodox church was subordinated to the Moscow patriarchate in 1686. Ukrainian leaders during the period were largely opportunists and men of little vision who could not muster broad popular support for their policies (Briukhovetsky, M. Khanenko, Yu. Khmelnytsky, Mnohohrshny, S. Opara, I. Sirko, Ya. Somko, P. Sukhovii, and P. Teteria). The hetmans who did their utmost to bring Ukraine out of decline were P. Doroshenko, Samoilovych, and I. Vyhovsky.

Rukh (Movement). A co-operative publishing house established in Vovchanske, Kharkiv gubernia, in 1917 and transferred to Kharkiv in December 1921. It published several book series of Ukrainian prerevolutionary literary works for general distribution to peasants, workers, and children; a library of over 100 plays; art books; editions of the collected works of I. Franko (30 vols, 1924–31), O. Kobylianska (9 vols, 1927–9), B. Hrinchenko (10 vols, 1926–30), M. Cherniavsky (10 vols, 1927–31), and H. Khotkevych (8 vols, 1928–32); and several volumes of V. Vynnychenko's works. In 1933 Rukh and its extensive network of bookstores throughout Soviet Ukraine were closed down by the Soviet authorities. In the years 1923–6 it published 128 titles with a combined pressrun of 659,500 copies.

Rukh. See Popular Movement of Ukraine.

Rukhymovych, Musii [Ruxymovyč, Musij], b October 1889 in Kagalnik, Rostov county, Don Cossack province, d 20 or 29 July 1938 or 1939. Soviet state figure. He was a political activist in Ukraine in 1911–14, a Bolshevik military leader in Kharkiv in 1917–18, and military commissar of the Donets–Kryvyi Rih Soviet Republic in 1918. In 1919–20 he held several high-ranking political and military positions in Ukraine, among them a seat in the Council of People's Commissars. After the imposition of Soviet rule Rukhymovych was a member of the Politburo of the CP(B)U, and director of the Donvuhillia coal trust

(1923–5), chairman of the Ukrainian SSR Supreme Council of the National Economy (1925–6), deputy chairman of the USSR Supreme Council of the National Economy (from 1926), and USSR people's commissar for railroad transportation (1930–4), heavy industry (1934–6), and defense production (from 1936). He perished during the Yezhov terror.

Rulikowski, Edward, b 1825 in Motovylyvka, Skvyra county, Kiev gubernia, d 1900. Polish historian and ethnographer. He was the author of several valuable works describing the history and geographical features of Right-Bank Ukraine, including *Opis powiatu wasilkowskiego* (Description of Vasylkiv County, 1853), *Zapiski etnograficzne z Ukrainy* (Ethnographic Notes from Ukraine, 1879), and *Opis powiatu kijowskiego* (Description of Kiev County; pub posthumously in 1913).

Rulin, Petro, b 12 September 1892 in Kiev, d 23 July 1940? Theatrical historian, scholar, and pedagogue. He graduated from Kiev University (1916) and then taught at the Lysenko Music and Drama Institute in Kiev (1920–36; since 1934 the Kiev Institute of Theater Arts). He was director of the Kiev Theatrical Museum (1926–36) and editor of *Richnyk ukrains'koho teatral'noho muzeiu* (Annual of the Ukrainian Theatrical Museum, 1930). Rulin was arrested in 1937, and died in prison. He wrote *Shevchenko i teatr* (Shevchenko and the Theater, 1925), *Rannia ukrains'ka drama* (Early Ukrainian Drama, 1927), *Mariia Zan'kovets'ka* (1928), *M. Kropyvnyts'kyi* (1929), and *M. Staryts'kyi* (1931), as well as many articles on contemporary Ukrainian theater, one of which was published posthumously as *Nashliakhakh revoliutsiinoho teatru* (On the Paths of the Revolutionary Theater, 1972, abridged with a large bibliography).

Rumania or Romania. A country in southeastern Europe (1990 pop 23,151,514) in the lower Danube basin, situated between Hungary (west), Ukraine (north and east), Bulgaria (south, with the Danube as the border), and Serbia (southwest). Its capital is Bucharest. Its 237,500 sq km consists of sections of the eastern and southern Carpathians and Transylvanian Uplands, the Panon and Wallachian Lowlands to the west of the mountains, and the Moldavian and Dobrudja (Dobrogea) Uplands to the east. Its history is closely related to that of its historical neighbors: Bulgaria, Hungary, Austria, Austria-Hungary, Kievan Rus', the Principality of Galicia-Volhynia, Poland, the Grand Duchy of Lithuania, the Hetman state, the Russian Empire, the USSR, and Turkey. Parts of Rumania (and at certain times, the entire country) were under the control of these states or were protectorates of them.

In the past, Rumania was divided into three political formations: Moldavia (a country between the Carpathians and the Dniester; its eastern section is known as Bessarabia), Wallachia or Muntenia to the south, and Transylvania to the west. The first two came together as Rumania in 1861, and all three were united in 1918. Rumanians also constitute a majority of the inhabitants in Moldavia (at present called Moldova). Moldavians was the official name given to Rumanians living in the Russian Empire.

Ukrainians and Rumanians share an arching border which is 900 km long. Both nationalities have in common Orthodoxy, the influence of Byzantine culture, and their

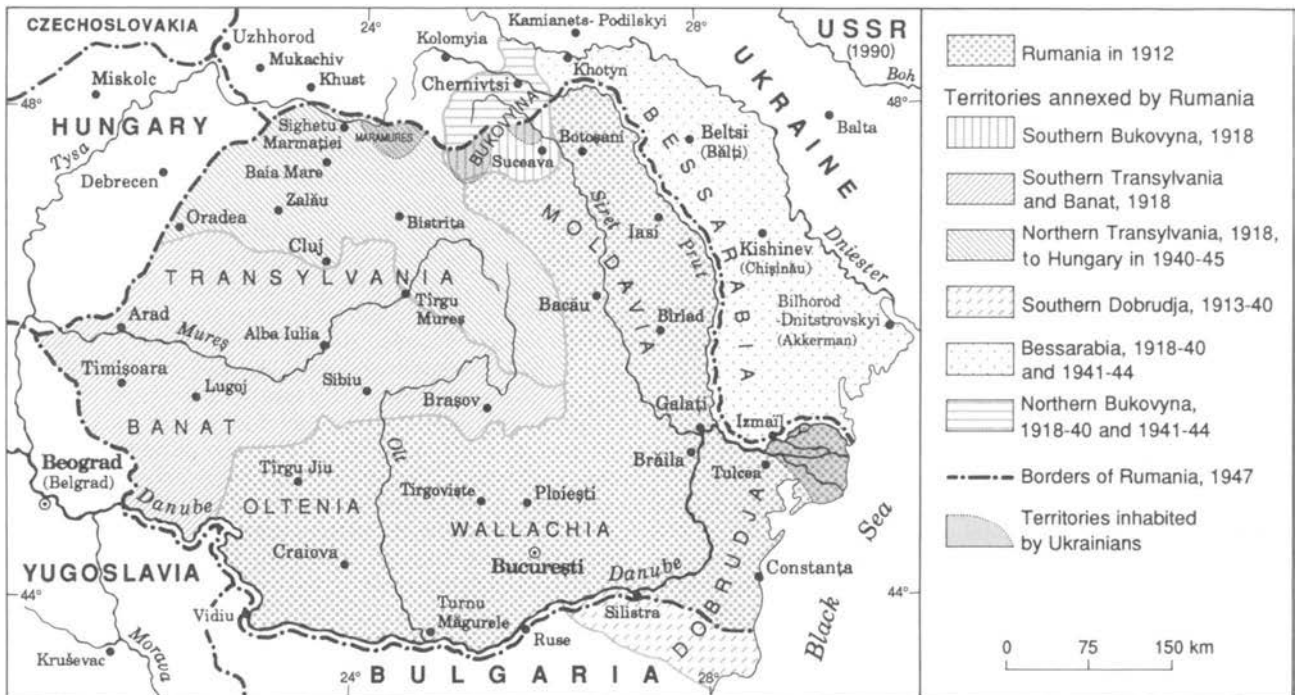

struggle against Turks and Crimean Tatars. They also have some similar folk traditions. Political and cultural relations between the two were active in the 16th and 17th centuries, but they subsequently tapered off because neither had its own state. In fact Ukrainians and Rumanians had virtually no direct political contact in modern times until after the First World War.

Until the creation of the Rumanian state in 1859–61, Rumanian-Ukrainian political relations were conducted mainly through *Moldavia. Contacts with Wallachia were insignificant, and even more rare with Transylvania. In the 16th and 17th centuries Cossacks assisted Moldavia and Wallachia in their struggles against Turkey. M. Viteazul's army in 1595 had 7,000 Cossacks. B. Khmelnytsky signed a treaty with Moldavia and married his son, Tymish, to Roksana, the daughter of V. Lupu, a Moldavian prince. T. Khmelnytsky led 8,000 soldiers on a campaign to defend his father-in-law, but was defeated at the Finta River on 17 May 1653 and killed on 15 September 1653 in the battle at Suceava. The increasing control of Muscovy over Ukraine and of the Ottoman Empire over Rumania that followed ended any possibility of further relations.

The Austrian annexation of *Bukovyna in 1774 and the Russian annexation of Bessarabia in 1812 brought Ukrainians and Rumanians into direct contact with one another. In Bessarabia, where the national consciousness of neither people was well developed, conflict between the two did not arise. In contrast, ethnic relations in Bukovyna became increasingly strained through the late 19th and early 20th centuries as the Ukrainians began to become politically active and demand certain national rights. The balance of power in Bukovyna shifted dramatically in 1918, when the crownland was ceded to the new Rumanian state. Ukrainians, now considered to be errant Rumanians who had forgotten how to speak their 'native' language, came under relentless attack: all schools were Rumanianized, the use of Ukrainian in the courts and in public offices was banned, the Ukrainian chairs at Chernivtsi University were abolished, and many Ukrainian societies (including *Ruska Besida) were closed down. Bukovynian Ukrainians were extremely dissatisfied with this harsh treatment. In 1940 the Rumanians withdrew from Bessarabia and North Bukovyna in response to an ultimatum from the USSR, which subsequently occupied the region.

In 1917–21 the UNR sought to establish normal relations with Rumania. In January 1918 A. Halip was sent on a public relations mission there. Subsequent representatives of Ukrainian governments included M. Halahan, V. Dashkevych-Horbatsky, and K. Matsiievych (1919–22). Rumanian diplomats in Ukraine included the generals Coanda and Conescu. Rumania recognized the Ukrainian state de facto and entered into trade agreements with it. At one point Rumania agreed to supply weapons in exchange for other goods, but the collapse of the Ukrainian front in 1919 put an end to these plans. Some conflicts arose over Rumania's military occupation of Bessarabia in March 1918 and of northern Bukovyna in November 1918, and there was a rearguard attack on the Ukrainian Galician Army in May 1919 during a brief Rumanian invasion of Pokutia.

During the interwar era the Rumanian government did not foster diplomatic or other ties with the Ukrainian SSR or the USSR as a whole. At the same time it took care not to

RUMANIA

antagonize the Soviets and was reluctant to grant asylum to refugees from Ukraine. In 1940 Rumania ceded North Bukovyna to the USSR. After having allied itself with Nazi Germany, Rumania invaded Bukovyna, Bessarabia, and *Transnistria in 1941 and controlled these regions until 1944, when they again came under Soviet rule. That same year Rumania was overrun by Red Army troops and became an Eastern-bloc satellite of the USSR, and closely began to follow the latter's edicts about the Ukrainian question. Rumania maintains a consulate in Kiev.

In the realm of culture, Ukraine's most significant ties to Rumania were with Moldavia, although it also had connections with Wallachia (most notably P. Mohyla's assistance with the establishment of printing presses). U. Năsturel, a scholar of the 17th century, had close relations with Kiev and imitated Ukrainian writers in his works. M. Smotrytsky's grammar was published in Snagov (1697) and Râmnic (1755), and it was influential in the preparation of the first Rumanian grammars. P. Berynda's *Leksikon slavenorosskyi* (Slavonic-Ruthenian Lexicon) was published in five editions in Rumanian translation. U. Năsturel, V. Măzăreanu (1710–90, archimandrite, writer, and reformer of Moldavian schools), G. Banulescu-Bodoni (metropolitan of Kiev, and then of Moldavia and Wallachia), M. Stefanescu (a bishop), and other Wallachian leaders studied at the Kievan Mohyla Academy. P. *Velychkovsky, who became hegumen of the Neamț Monastery in 1779, revived Rumanian monastic life and was active in publishing and other cultural concerns. V. Costache (1768–1846), the metropolitan of Moldavia, corresponded with Ukrainian church leaders and published the Kievan *Sinopsis* in Rumanian in 1837.

In the 19th century a number of Rumanian writers and scholars focused on Ukrainian subjects. A. Hăjdău (1811–74) studied at Kharkiv University, and published a biography of H. Skovoroda in 1835. His son, B. Petriceicu Haș-

deu (1838–1907), was born in Khotyn, studied in Kharkiv, and wrote on Ukrainian themes. His *Ioan-Vodă cel Cumplit* (Ioan-Raging Prince, 1865) was based on L. Bobolynsky's chronicle. N. Gane's (1838–1916) *Domnița Roxana* (Princess Roxana) was an original rendering of T. Khmelnytsky's marriage to Roxana Lupu. G. Asaki (1788–1869), Boleslav Hăjdeu (1812–86), and C. Stamati (1785–1869) were other writers interested in Ukraine, as were the Slavists I. Bogdan (1864–1919) and I. Bianu (1856–1935). C. Dobrogeanu-Gherea (1855–1920) studied at Kharkiv University, became the leader of the Rumanian Social Democratic party, and popularized the work of T. Shevchenko in Rumania.

Among the Rumanians interested in the Ukrainian question in the 20th century were the community leader Z. Arbore; the writers E. Bogdan, L. Fulga, M. *Sadoveanu, and M. Sorbul; the literary scholars E. Camilar and M. *Laslo-Kutsiuk; the historians B. Bezviconi, P. Constantinescu-Iași, M. Dan, E. Hurmuzaki, N. *Iorga, I. Nistor, S. Ciobanu, P. Panaitescu, D. Strungaru, and A. Vianu; and the linguists T. Macovei, G. Mihăila, E. Petrovici, M. Stefanescu, and G. Vrabie. Rumanian scholars have devoted most of their attention to the 17th century in particular. Many articles on Ukrainian-Rumanian relations appeared in the 17 issues of *Romanoslavica*, which were published in 1958–70 in Bucharest before a change in Rumanian government policy toward national minorities led to its demise. Emigré scholars who focused on the subject include G. Ciorănescu, G. Nandriș, and E. Turdeanu. Rumanian-Ukrainian relations have been studied in the Moldavian SSR by V. Hașak, M. Mohov, S. Popovici, and I. Varticean.

Ukrainian scholars and writers who delved into Rumanian-Ukrainian influences included the historians M. Cheredaryk, V. Hrabovetsky, O. Kaluzhniatsky, O. Karpenko, H. Koliada, N. Komarenko, M. Korduba, Ye.

Kozak, V. Mylkovich, A. Petrushevych, O. Romanets (who was interested in Ukrainian-Moldavian relations), I. Sharanevych, F. Shevchenko, and Yu. Venelin (who studied Slavic manuscripts in Rumanian libraries); the ethnographers and historians M. Drahomanov, I. Franko, I. Reboshapka, F. Vovk, and V. Zelenchuk; the musicologists K. Kvitka and S. Vorobkevych; the art critic V. Karmazyn-Kakovsky; the linguists P. Buzuk, I. Doshchivnyk, O. Horbach, Yu. Kokotailo, O. Ohienko, M. Pavliuk, S. Semchynsky, I. Sharovolsky, D. Sheludko, V. Simovych, and R. Smal-Stotsky; and the writers Yu. Fedkovych, H. Khotkevych, M. Kotsiubynsky, A. Miastkivsky, V. Pianov, Ya. Stetsiuk, and S. Vorobkevych.

Rumanian literature is largely inaccessible to Ukrainian readers, but several translations into Ukrainian have been made. The novels translated include B. Haşdeu's *Răzvan și Vidra*, L. Rebreanu's *Ion*, and M. Sadoveanu's *Mitrea Cocor* and *Nicoară Potcoavă*. M. Rylsky, Ya. Shporta, V. Sosiura, and M. Tereshchenko contributed to an anthology of translations of M. Eminescu's poetry, and other verse in Ukrainian translation includes that of V. Tulbure and C. Petrescu. I.L. Caragiale's drama *O scrisoare pierdută* (The Lost Letter) has also appeared in translation. A. Miastkivsky and M. Pianov have translated a number of Rumanian works into Ukrainian.

V. Tulbure translated T. Shevchenko's *Kobzar* into Rumanian, and it was published with an introduction by M. Sadoveanu in 1957. Other Ukrainian writers whose works have been rendered in Rumanian include I. Drach, V. Drozd, I. Franko, O. Honchar, Ye. Hutsalo, O. Kobylinska, M. Kotsiubynsky, Lesia Ukrainka, D. Pavlychko, V. Shevchuk, V. Stefanyk, M. Stelmakh, P. Tychna, and Yu. Yanovsky.

In 1958 the Ukrainian Society for Friendship and Cultural Relations with Foreign Countries began staging days of Rumanian culture in Kiev and other cities of Ukraine. Various Rumanian soloist musicians and the National Theater gave performances. Rumanian films were shown, and exhibitions of Rumanian art and books were organized. There was a Ukrainian department of the Soviet-Rumanian Friendship Society (established in 1959), but it was not very active.

Economic ties. From the mid-17th century, merchants from Kiev, Nizhen, Pereiaslav, and Romen were engaged in vigorous trade with Moldavia and Wallachia. Wine was an important Rumanian export (2,769 barrels in 1759), as were nuts, salt, salted fats, and fruits. Ukrainian exports included manufactured goods, furs, agricultural produce, and various raw materials. In the 19th century imports from Moldavia included wheat, corn, and fruits; Ukrainian exports consisted mainly of sugar, coal, and livestock.

After 1918 trade between Rumania and Ukraine came to a virtual standstill; it resumed only after 1950. Ukraine has a negative trade balance with Rumania. Exports to Rumania constitute only 8 percent of its total exports, whereas Rumania sends 20 percent of its exports to Ukraine. In the 1970s Ukraine imported milled lumber (approx 260,000 cu m annually, 12 percent of the Rumanian total), petroleum products (approx 460,000 tonnes annually), steel freight cars, agricultural machinery, chemical supplies, furniture, clothing, shoes, canned goods, and fruit. Ukraine mainly exported raw materials, such as iron ore (in 1971, 50 percent of Rumania's imports), coke (29 percent), hydroelectric power (16 percent), cast iron (12 per-

cent), and coal (7 percent). Other exports included metal rollers, lathes, conducting material, and small-sized boats.

Ukrainians in Rumania. Before 1918 Ukrainians settled primarily in the northern Dobrudja region, in the Danube delta (see also *Danubian Sich). The settlements flowed directly out of the Ukrainian demographic territory in South Bessarabia and had a total population of around 20,000. About 50,000 Ukrainians also lived in northern Moldavia in the Dorohoi and Botoşani districts, where they were the predominant group until the 17th century. Today the Ukrainian language and folk customs have been only partially preserved, in villages such as Căndeşti, Rogojeşti, and Semenicea.

After the First World War Ukrainian ethnographic lands in Bukovyna, *Bessarabia, and the *Maramureş region (a small section of Transcarpathia) were ceded to Rumania, in addition to a number of Ukrainian 'oases,' such as Banat, that had previously belonged to Hungary. A total of about 1.2 million Ukrainians lived in Rumania, which figure included approx 800,000 on Ukrainian ethnographic territory. Until 1944 they were subjected to discrimination and socioeconomic exploitation.

Many Ukrainians, particularly teachers and civil servants, were transferred from Bukovyna and Bessarabia to cities in the Rumanian heartland in an effort to speed up the pace of Rumanianization. In spite of these conditions, efforts were made to maintain Ukrainian community life.

The Public Relief Committee of Ukrainian Emigrants in Rumania was established in 1923; it was headed by K. *Matsiievych, with V. Trepke as vice-president and D. Herodot as secretary. The committee co-ordinated the work of 10 émigré communities, the largest of which was the Community of Ukrainian Emigrés in Bucharest. Also active in Bucharest were the Union of Ukrainian Emigré Women (headed by N. Trepke), the Society of Ukrainian Veterans in Rumania (headed by H. Porokhivsky), and the Union of Ukrainian Farmers in Bucharest (a hetmanite group founded in 1921, headed by P. Novitsky). Ukrainian students in postsecondary schools in Bucharest established the Zoria society, which was active in 1921-6, and, later, the Ukrainian Cultural and Sports Association Bukovyna (1926-44) and the student Hromada in Iaşi.

The number of Ukrainians residing in central Rumania grew in 1940, when the Soviet annexation of Bukovyna and Bessarabia sent out waves of refugees. Before the outbreak of the Second World War the Rumanian government granted the Ukrainian minority certain cultural rights, and as a result, a Ukrainian radio station (director, M. *Kovalevsky), newspaper (*Zhyttia*, edited by I. Havryliuk), and journal (*Batava*) were established.

During the war the government once again deprived Ukrainians of their rights and began a campaign of terror to speed up assimilation, Rumanian colonization, and economic exploitation. All forms of Ukrainian organizational life were proscribed, and concentration camps were built. Ukrainian patriots, such as O. Huzar and M. Zybachynsky, were subjected to a show trial by a military tribunal in Iaşi on 26 January 1942. Prior to the invasion of Rumania by Soviet forces, some Ukrainians fled to the West, but most stayed behind. With the Soviet occupation, some Ukrainian activists (I. Hryhorovych, O. Masykevych, V. Yakubovych, and others) were arrested and deported to the USSR.

The boundaries of the Ukrainian SSR and the Rumanian

Socialist Republic established after the war did not coincide with ethnographic territories, and thus small segments of Ukrainian ethnographic territory remain part of the latter. These include southern Bukovyna (50,000 Ukrainians in 32 locales), Dobrudja (40,000 Ukrainians in 23 locales), and the Maramureş region (about 45,000 Ukrainians in 15 locales). There are about 15,000 Ukrainians living in eight villages of the Banat region (some of whom emigrated to the Ukrainian SSR in 1940) and another 15,000 dispersed throughout central Rumania. Ukrainians reside also in Baia Mare, Bucharest, Cluj, Constanţa, Iaşi, Lugoj, Ploieşti, Timişoara, Braşov, Tulcea, Suceava, Rădăuţi, and other cities. The figures amount to a total of approx 165,000 Ukrainians in Rumania, although the official figure of the 1956 census was only 68,300. The Union of Ukrainians in Rumania, however, claimed in 1991 that there were 250,000 Ukrainians in Rumania (preliminary official statistics for 1992 state there are only 66,800).

Under the socialist regime in Rumania, no official Ukrainian community organizations existed even though the constitution recognized the rights of national minorities. The attitudes of the Communist party and government to local Ukrainians were variable, but usually negative. Before 1947 they did not even acknowledge the existence of a Ukrainian minority. In 1948–64 Ukrainians were afforded the opportunity for a measure of cultural and educational activity. Nevertheless, an attempt to intimidate the Ukrainian intelligentsia was made at a show trial in 1959, when V. Bilivsky, the editor of a Ukrainian publication, was charged with encouraging readers to read Ukrainian-language materials and maintain their culture, and sentenced to seven years' imprisonment. A similar trial was held in Sighetul Marmăţiei. In 1964 the Rumanian government began to close down Ukrainian cultural institutions. The adoption of a new constitution in 1965 once again enshrined minority rights, but it brought no practical gains for Ukrainians. In 1968 Ukrainians were allowed to organize district workers' councils in the Suceava and Marmureş regions. These were headed by I. Zakhariichuk and Yu. Kaniuka, but achieved little. The policies of N. Ceauşescu's regime (1965–89) thereafter became increasingly chauvinistic.

Cultural and educational life. The school reform of 1948 enabled the development of Ukrainian-language instruction at the primary, secondary, and postsecondary levels. For the next 10 years there were 120 active primary schools with Ukrainian-language courses (involving about 200 Ukrainian teachers and nearly 10,000 pupils). Ukrainian courses matching the regular school curriculum were conducted in gymnasiums in Seret, Sighetul Marmăţiei, and Suceava (with 77 graduates by 1957), and courses in Ukrainian were also offered in teachers' colleges in Seret, Sighetul Marmăţiei, and Tulcea (with 54 graduates by 1957). Textbooks were written to assist in instruction, including M. *Pavliuk's *Kurs istorichnoi hramatyky ukrains'koi movy* (Course in the Historical Grammar of the Ukrainian Language, 1964) and Yu. Kokotailo's *Rumuns'ko-ukrains'kyi slovnyk* (Rumanian-Ukrainian Dictionary, 1963), with 30,000 entries, and *Ukrains'ko-rumuns'kyi slovnyk* (Ukrainian-Rumanian dictionary, 1964), with 35,000 entries.

Various reading rooms, clubs, cultural homes, self-help groups, and youth associations provided cultural ameni-

ties in Ukrainian villages. In the cities there were branches of the Asociaţia Romîna pentru legături cu Uniunea Sovietică, the Rumanian-Soviet friendship society. In general, however, the level of cultural life remained quite low, with local programs conducted in Ukrainian, Rumanian, and Russian. Outside Bucharest no notable folk art ensembles or individual artists existed.

Beginning in the mid-1960s Ukrainian cultural and educational efforts were repressed in both the city and the country. All forms of Ukrainian-language instruction were liquidated, with the exception of the titular existence of the Ukrainian department of the Sighetul Marmăţiei gymnasium and the lectureship in Ukrainian at Bucharest University. Even the use of the Ukrainian forms of place-names in publications was forbidden.

The biweekly *Novyi vik* appeared in 1949–90, under the editorship of Bilivsky and S. Zahorodny until 1959, when they were replaced by M. Bodnia and I. Kolesnyk. Its circulation was initially 10,000 but declined to 4,000 in the 1970s. By that time it consisted largely of Ukrainian translations of Rumanian content. The literary-historical bimonthly *Kulturnyi poradyk*, edited by Bilivsky and V. Fedorovych, was published bimonthly in 1950–8 with a pressrun of 600 to 1,000.

A number of Ukrainians worked in universities and scientific institutes, including I. Robchuk and A. and K. Regush, at the Institute of Linguistics; V. Vynohradnyk (d 1973), at the Pasteur Institute in Bucharest; the Slavists K. Drapaka and I. Lemny; the pedagogue O. Antokhii; the physicist B. Pavliukh, at a polytechnical school in Iaşi; and V. Karmazyn-Kakovsky, also in Iaşi. In 1952 a department of Ukrainian language and literature was established at the Slavic department of Bucharest University. In 1963–74 the head of the chair of Slavic languages of the Institute of Foreign Languages and Literatures was M. Pavliuk, in 1974–83 M. Laslo-Kutsiuk, and from 1983 D. Horia-Mazilu and I. Robchuk.

Ukrainian literature is relatively well represented in Rumania. In the 1950s Ukrainian writers published their works in *Kul'turnyi poradyk* and in the literary supplement to the biweekly *Novyi vik*. Departments for the publishing of works by representatives of national minorities were set up at the Literaturne Vydavnytstvo (1968–70) and Kryterion publishing houses in Bucharest. The editor of the Ukrainian section was M. Korsiuk. In the 1960s collections of poetry by H. Klempush, O. Melnychuk, D. Onyshchuk, and O. Pavlish were published in Bucharest, as were the novels and short stories of I. Fedko and S. Yatsentiuk. *Serpen'* (August, 1964), edited by S. Myhaichuk, and *Lirychni struny* (Lyrical Strings, 1968) were literary almanacs. Since 1970 the Rumanian Writers' Union's Literary Studio of Ukrainian Writers (headed by H. Mandryk) has steered through the publication of collections of verse by M. Balan, I. Fedko, K. Irod, I. Kovach, M. Korsiuk, O. Masykevych, O. Melnychuk, M. Mykhailiuk, I. Nepohoda, Yu. Pavlish, P. Romaniuk, and S. Tkachuk. I. Reboşapka transcribed and edited folk songs from southern Bukovyna, the Maramureş region, Banat, and Dobrudja, and published the anthologies *Narodni spivanky* (Folk Songs, 1969), *Oi u sadu-vynohradu* (In the Vineyard, 1971), and *Vidhomony vikiv* (The Echoes of the Ages, 1974). Other collections of folk songs include *Narod skazhe* (The People Will Tell, 1976), *Na vysokii polonyni* (In the Highlands, 1979), and *Oi Dunaiu, Dunaiu* (Oh Danube, Danube,

The Holubka Ukrainian-Rumanian music ensemble (later banned by the Ceaușescu regime) at a festival of national minorities in 1982

1980). Literary anthologies include *Nashi vesny* (Our Spring, 1972, prose, edited by M. Mykhailiuk), *Pro zemliu i khlib* (About Land and Bread, 1972, newspaper reports), *Antolohiia ukrains'koï klasychnoi poezii* (Anthology of Ukrainian Classic Poetry, 1970, edited by M. Laslo-Kutsiuk), *Z knyhy zhyttia: Antolohiia ukrains'koho klasychnoho opovidannia* (From the Book of Life: An Anthology of Classic Ukrainian Short Stories, 1973), and the annual almanac *Obrii* (est 1979). M. Laslo-Kutsiuk published a study of Rumanian-Ukrainian literary relations (*Relațiiile literare româno-ucrainene în secolul XIX și la începutul secolului al XX, 1979*), a general examination of 20th-century Ukrainian literature under the name *Shukannia formy* (In Search of Form, 1980), and other literary works. She also edited and published a two-volume collection of S. Yarychevsky's works (1977–8).

The majority of the Ukrainian population in Rumania is Orthodox, although in the Maramureș and Banat regions Greek Catholics are greater in number. After the abolition of the Greek Catholic church in Rumania in 1948, its congregation was forced to convert to Orthodoxy, the country's majority religion. In the 1980s permission was granted for Ukrainians in the Maramureș region to form a Ukrainian Orthodox church, which acts as a distinct jurisdiction within the Rumanian Transylvanian eparchy. Liturgies and sermons are almost exclusively (except in Seret) conducted in Rumanian, a practice which abets the process of assimilation. The Rumanianization of Ukrainians has also proceeded quickly because they are dispersed throughout the country and isolated from other countries with large Ukrainian populations, including Ukraine itself. Also, the intelligentsia has been intimidated to the point that it lives in the cities without any contact with the largely rural population.

After the overthrow of the Ceaușescu regime in 1989, Ukrainian life in Rumania began once more to revive. On 29 December 1989 the Union of Ukrainians of Rumania was formed and S. *Tkachuk was elected its first president. **Novyi vik* was reconstituted in 1990 as *Vil'ne slovo* (under the editorship of I. Petretska-Korach and Yu. Lazarchuk) and began printing articles that were more pertinent to the interests of its readers. (See also *Moldavia.)

Rumanianisms. Rumanian loanwords first penetrated into the Carpathian Ukrainian dialects adjacent to the territory of the Rumanian language during the northward Rumanian colonization that took place under Wallachian law in the 14th to 17th centuries and during the Rumanian domination of Bukovyna and Pokutia within the Moldavian Principality in the 14th to 18th centuries. They were introduced in southern Podilia, Bessarabia, and Dobrudja as a result of the interaction of Rumanian and Ukrainian colonists in the 16th to 19th centuries. Rumanianisms are most frequent in the Carpathian *Hutsul and *Bukovyna-Pokutia dialects, where they appear most often in the language of shepherding, customs and rituals, public life, and lumbering, and as Carpathian toponyms and plant names. They also appear as wine-making and fishing terms in the western Steppe and southern Bessarabian dialects, and as argotisms among the Ukrainian lirnyks and in urban slang words in Odessa, Bukovyna, and Bessarabia.

Many medieval Bulgarian, Serbian, Hungarian, Turkish, and Greek loanwords, as well as modern German and French loanwords, came into the Carpathian Ukrainian dialects (eg, in Bukovyna, *șura*, *șušony*, *batoza* 'shed, winter boots, grinder' [Rumanian *șură*, *șoșoni*, *batoză*]) through Rumanian. Few dialectal Rumanianisms became part of Standard Ukrainian vocabulary, however. Those that did include *bryndza*, *hyrlo*, *gyrlyga*, *gryndžoly*, *žerep*, *kukurudza*, *mamalyga*, *papușa*, *tajstra*, *tyrlo*, *cap*, *caryna*, *rumegaty*, *sapaty* '(goat/ewe) cheese, estuary, shepherd's crook, sled, mountain pine, maize, cornmeal, tobacco pouch, hunting bag, corral, billy goat, sown field, to ruminate, to hoe' (from Rumanian *brînză*, *gîrlă*, *cîrlig*, *creangă*, *cucuruz*, *mămăligă*, *păpușă*, *taistră*, *tîrlă*, *țap*, *țarină*, *a rumega*, *a săpa*).

Rumanianisms in the Ukrainian language have been studied by F. Miklosich, O. Kaluzhniatsky, D. Sheludko, R. Smal-Stotsky, I. Sharovolsky, I. Doshchivnyk, J. Janów, G. Pascu, D. Crânjălă, D. Bogdan, O. Melnychuk, A. de Vincenz, Y. Dzendzelivsky, O. Horbach, E. Vrabie, M.

Pavliuk, I. Robchuk, J. Lobiuc, Y. Matsurek, S. Semchynsky, R. Udler, V. Prokopenko, and M. Gabinsky. Ukrainian toponyms of Rumanian origin have been studied by S. Hrabec, J. Rudnyckyj, S. Łukasik, M. Stanivsky, Yu. Karpenko, M. Bank, K. Halas, E. Petrovici, M. Korchynsky, A. Jeremia, O. Horbach, and others.

Rumanians or Romanians. The native population of *Rumania. In 1989 there were 459,350 ethnic Rumanians in Soviet Ukraine. Approx 377,000 others live in Ukrainian ethnic territory outside Ukraine's political borders.

Rumanians have historically lived in the borderlands of *Bukovyna and *Bessarabia (the Khotyn and Akkerman regions). While *Moldavia and Southern Ukraine were part of the Ottoman Empire in the 16th century, *Vlachs from Moldavia began freely colonizing the underpopulated lands between the Dniester and the Boh rivers in *Southern Ukraine. At that time entire Moldavian villages sought refuge in Ukraine, where social conditions were better. Their number rose after Ottoman-controlled territory between the Dniester and the Boh rivers was annexed by the Russian Empire in 1791. There the tsarist government granted Moldavian landowners and officials huge estates populated by Moldavian fugitives (260,000 desiatins in Ananiv and Tyraspil counties in 1792). Some Vlachs also settled east of the Boh River.

The Vlach settlers lived on good terms with their Ukrainian neighbors. They took part in the *haidamaka uprisings and were later also forced to live in the so-called *military settlements in Southern Ukraine. According to the Russian census of 1897, 185,500 Rumanians lived in the nine Ukrainian gubernias: 147,000 of them were in Kherson gubernia; 27,000, in Podilia gubernia; and 9,000, in Katerynoslav gubernia.

The Soviet regime distinguished between Rumanians and *Moldavians, although they are culturally and linguistically the same. According to the 1926 Soviet census there were 257,794 Moldavians and 1,530 Rumanians in Soviet Ukraine, 172,419 of them in the recently created Moldavian ASSR (see *Moldavian SSR). Approx 95 percent were peasants. In interwar Rumania Rumanians also lived in the ethnic Ukrainian parts of Bukovyna (32,000 in 1930) and Bessarabia (36,000 in Khotyn county and 82,000 in Akkerman county in 1930).

The number of Rumanians in Soviet Ukraine increased

after parts of Rumanian ethnic territory in Bukovyna and the *Maramureș region were annexed by the USSR at the end of the Second World War. Of the 459,350 Rumanians in Ukraine according to the 1989 Soviet census, 324,525 were identified as Moldavians. In 1989, as earlier, their highest concentration was in Chernivtsi oblast (100,300 Rumanians and 84,500 Moldavians, mostly in Storozhynets, Hlyboka, Novoselytsia, and Sokyriany raions), where they made up 19.7 percent of the oblast's population, and in Odessa oblast (144,500 Moldavians and 700 Rumanians, mostly in Kotovske, Ananiv, Rozdilna, Tarutyne, and Reni raions), where they made up 5.5 percent of the population. Smaller numbers lived in the oblasts of Transcarpathia (29,500 Rumanians, in Tiachiv and Rakhiv raions), Mykolaiv (16,700 Moldavians), Donetsk (13,300 Moldavians and 500 Rumanians), Kirovohrad (10,700 Moldavians, near Hruzke and Martonosha), Dnipropetrovske (6,600 Moldavians), Crimea (6,600 Moldavians), Luhanske (5,800 Moldavians), and Kherson (5,600 Moldavians). The number of Rumanians in Ukraine outside Odessa oblast has fallen substantially from what it was in the prewar period. In 1989, 62 percent of Rumanians and 78 percent of Moldavians in Ukraine gave Rumanian or Moldavian as their native tongue; only 9.8 and 6.1 percent respectively gave Ukrainian, and 3.5 and 15.5 percent, Russian.

Until the last few years of Soviet rule Ukrainian citizens of Rumanian descent were not allowed to have direct ties with Rumania. Cultural relations with Rumania were conducted through official channels by the Ukrainian Society for Friendship and Cultural Relations with Foreign Countries and the Ukrainian branch of the Rumanian-Soviet Friendship Society.

The Rumanian Ukrainians, particularly those in Chernivtsi oblast, have enjoyed a measure of cultural autonomy, however. In Chernivtsi oblast two CPU Oblast Committee newspapers, *Zorile Bucovinei* and *Bucovina Sovietica*, were published in Rumanian; Rumanian editions of the Novoselytsia, Hlyboka, and Storozhynets raion newspapers appeared from 1957; a special publishing house issued publications in Rumanian; Rumanian has been the language of instruction in some elementary and secondary schools; and Chernivtsi University has had a department of Rumanian philology. The Rumanians have had their own amateur choirs and dance groups. A number of members of the Writers' Union of Ukraine, including I. Zegria, I. Kilaru, V. Levytsky, M. Liutyk, and M. Prepelytsia, write in Rumanian and have contributed to the literary journal *Nistrul*, which is published in Kishinev. A Rumanian literary society headed by Levytsky has been active in Chernivtsi. In February 1990 the Social and Cultural Society of Transcarpathian Rumanians was established in Uzhhorod.

RUMChEROD. The acronym for the Central Executive Committee of the Soviets of the Rumanian Front, Black

Sea Fleet, and Odessa Military District (consisting of Kher-son, Tavriia, and parts of Podilia and Volhynia gubernias). This revolutionary body was set up in May–June 1917 as a coalition of leftist parties with a Menshevik majority. It supported the Provisional Government and collaborated with the gubernia council, an organ of the Central Rada. In November–December 1917 RUMChEROD resisted the Bolshevik government. The Petrograd Soviet of People's Commissars responded to the resistance by sending agents and troops to Odessa. At the beginning of January 1918 the Bolsheviks took over RUMChEROD. The committee became opposed to the Central Rada and, with the help of Bolshevized troops from the front, took power in Odessa. RUMChEROD tried to extend its influence into Bessarabia, which was occupied by Rumanian troops. In the name of the Soviet of People's Commissars it signed a treaty with the Rumanian government on 5–9 March 1918 regarding the evacuation of Bessarabia, but the treaty was never implemented. Later that month Austrian troops occupied Odessa, and a Ukrainian government was restored. RUMChEROD was evacuated to the east and was dissolved in May.

Rumeian dialects. Dialects of the so-called Greek Hel- lenes, or Rumeians (*rumei*), who were forcibly resettled by the tsarist authorities from the Crimea to the northern lit- toral of the Sea of Azov in 1778–9 (see *Greeks). The dia- lects, consisting of five groups, are similar to modern Greek, but have lexical, phonetic, and morphological pec- uliarities. They are written in the Cyrillic alphabet. A lit- erature based on them has been developed by writers such as D. Bhadits, L. Khonahbei, and, in the Soviet peri- od, H. Kostoprav, A. Dimitriu, K. Pastur, A. Diamantopu- lo, A. Shapurma, L. Kyriakov, V. Halla, D. Telenchi, S. Kosse, P. Saravas, O. Petrenko-Ksenofontova, D. Papush, V. Bakhtarov, and H. Danchenko (Meotis). A book on the dialects spoken in the villages of Prymorske and Yalta in Pershotravneve raion in Donetske oblast was written by T. Chernysheva (1958).

Count Petr Rumiantsev
(1798 engraving by John
Walker based on a portrait
by Dmytro Levytsky)

Rumiantsev, Petr [Rumjantsev], b 15 January 1725 in Moscow, d 19 December 1796 in Taman, Pereiaslav coun- ty, Kiev vicegerency. Russian military leader and states- man. He first distinguished himself as a general in the Seven Years' War. In November 1764, after K. Rozu- movsky was forced to resign as hetman of the Left-Bank Hetmanate, Empress Catherine II appointed Rumiantsev president of the *Little Russian Collegium (1764–86) and

governor-general (1764–89) of Little Russia (ie, Left-Bank Ukraine). He also commanded the Russian army that in- vaded Moldavia and Wallachia during the 1769–74 Russo- Turkish War and the 'Ukrainian' army that fought in the 1787–91 war. He personally negotiated the 1774 Peace Treaty of *Küçük Kaynarca.

As Catherine's viceroy in Left-Bank Ukraine Rumian- tsev implemented the centralist policies of the Russian government and eradicated the vestiges of Ukrainian au- tonomy, entrenching the Russian administrative and court systems. He instituted the *Rumiantsev census of Little Russia (1765–9). During the elections to the 1767 Legislative Commission he repressed Cossack *starshyna* and clergy who voiced Ukrainian autonomist demands. He initiated a series of reforms of the Hetmanate's mili- tary, tax system, and schools and in 1765 introduced a postal service. The Hetmanate's *regimental system was abolished in 1781–2; Little Russia was divided among three *vicegerencies (Kiev, Chernihiv, and Novhorod- Siverskyi) in 1782; and the *poll tax was introduced and the Cossack army transformed into Russian carabineer regiments in 1783. Rumiantsev supervised the imposition of *serfdom on the Ukrainian peasantry after Catherine's decree of May 1783, the implementation of Catherine's May 1785 charters to the nobility and the towns defining their rights and obligations, and the secularization of mo- nastic properties in 1786.

In the 1780s Rumiantsev allied himself with noble cir- cles (including Ukrainian autonomists) that supported the future tsar, Paul I, and were opposed to Catherine's favor- ite, G. *Potemkin. Rumiantsev thus incurred the wrath of Catherine, who had him removed as governor-general in 1789 and replaced with M. *Krechetnikov in 1790. Ru- miantsev amassed huge estates in Ukraine. He spent his final years there and was buried in the Kievan Cave Monastery in 1797. His descendants owned the estates un- til the Revolution of 1917.

Rumiantsev census (Generalnaia opis Malorossii). A comprehensive demographic and socioeconomic survey of the Left-Bank Hetman state instituted on the instruction of Empress Catherine II by Gov-Gen P. *Rumiantsev in October 1765. Its aim was to determine the legal status of persons and properties and to gather other information that would facilitate the introduction of the Russian tax, court, and military systems in the Hetmanate. It also laid the groundwork for the eradication of Ukrainian auton- omy, the prevention of peasant and rank-and-file Cossack

mobility, and the eventual imposition of serfdom. The census was conducted on the territory of each of the Hetmanate's 10 regiments by a special commission headed by a Russian officer. Altogether 3,500 settlements were surveyed. Family property (the *dvir*) constituted the basic unit in the census. The information gathered included population figures (age, marital status, state of health, place of birth, social status, occupation), corvée obligations, the equity and income of each family and the taxes paid, the means by which properties were acquired, the number of buildings and domestic animals on each property and their description, and the description of towns, villages, hamlets, cultivated land, forests, hayfields, and manufacturing enterprises. Copies of documents on which property ownership was based (hetmans' universals, regimental decrees, purchase and transfer records, and wills) were submitted with the data.

The census met with passive resistance from the majority of the population. Except in Kiev regiment it was not completed, because of the outbreak of the Russo-Turkish War of 1769–74. Nevertheless the data that were collected provide invaluable socioeconomic information about the Hetmanate prior to its abolition. Not all of the materials gathered have been preserved. Initially they were dispersed among the archives of the gubernial capitals of Chernihiv, Kiev, and Poltava. In the late 19th century the materials in Chernihiv were transferred to the library of the Russian Academy of Sciences in St Petersburg, those in Kiev were deposited in the Kiev University library, and those located in Poltava perished in a fire. In the 1920s all of the extant materials were deposited in the Kiev Central Archive of Ancient Documents. Now they fill 969 volumes, each with 300 to 1,000 folios; the volumes are housed in Kiev, mostly at the Central State Historical Archive but also in the Manuscript Division of the Central Scientific Library of the Academy of Sciences of Ukraine. Scholars who have studied the census include D. Bahalii, I. Boiko, V. Danylevych, P. Fedorenko, O. Hrushevsky, I. Kovalsky, T. Kruglova, O. Lazarevsky, P. Klymenko, I. Luchytsky, M. Lytvynenko, H. Maksymovych, V. Miakotin, N. Lepenko, O. Putro, M. Rklytsky, V. Romanovsky, V. Semevsky, S. Shamrai, M. Slabchenko, M. Tkachenko, and M. Vasylenko.

O. Ohloblyn, A. Zhukovsky

Runkevych, Stepan [Runkevych], b 1867, d ? Church historian. He was an employee in the chancellery of the Russian Holy Synod. He wrote histories of the Minsk archeparchy in the late 18th and early 19th centuries (1893) and of the Russian Orthodox church in the 19th century (1901) and edited *Opisanie dokumentov arkhiva zapadnorusskikh uniatskikh mitropolitov* (Description of Docu-

ments of the Archives of Western Russian Uniate Metropolitans, 2 vols, 1895).

RUP. See Revolutionary Ukrainian party.

Rural court (*sil's'kyi sud*). A local court of the Hetman state that dealt with petty criminal and civil cases in a given village. The rural courts for Cossacks were separate from those for peasants. Cossacks appealed the decisions of their courts to company courts, and peasants appealed the decisions of their rural courts to city courts. The rural courts were abolished with the introduction of serfdom in the 18th century, when their function was assumed by the landowner.

Rural soviet. See Soviet.

Anastasiia Ruryk

Ruryk, Anastasiia (née Melnyk), b 11 November 1897 in Kosiv, Chortkiv county, Galicia, d 30 October 1970 in Vancouver. Educator and civic activist. After arriving in Canada with her parents in 1898, she completed her education and became one of the first Ukrainian women to teach public school. For many years she was secretary, and in 1941–2 president, of the *Ukrainian Women's Association of Canada; later she headed its museum art committees. Her *Ukrainian Embroidery Designs and Stitches* was popular and went through four editions.

Rus'. The former name of Ukraine. In the Kiev Chronicle the term was a collective noun (ie, 'the Rus') referring initially to the *Varangians and then to the land of the *Polianians around Kiev bounded by a triangle formed by the Dnieper, Irpin, and Ros rivers. Gradually it came to signify the entire realm of the grand prince of Kiev (Kievan Rus'). An inhabitant of Kievan Rus' and later Ukraine was called a *rusyn* – a designation that remained in use in Galicia, Bukovyna, and Transcarpathia until the 20th century (see *Ruthenians).

There are still many disputed, inconclusive hypotheses on the origin of the name. One is that its etymology is Norse, or more exactly, Swedish. This *Norman theory, first propounded by G.S. Bayer in the early 18th century, is based on the evidence of the Kiev Chronicle and 9th- and 10th-century West European, Arabic, and Byzantine sources. In *De administrando imperio* Emperor Constantine VII Porphyrogenitus provided separate 'Rus' (Norse) and Slavic names for the Dnieper cataracts. At that time (and even now), the Finns called the Swedes *Ruotsi*. Although

there is no evidence for a Swedish tribe by that name, it has been inferred that the Finns derived *Ruotsi* from the Swedish *Röpsmenn* ('seafarers'; cf Old Swedish *röper* 'ruder' or *rodhr* 'rowing'). One weakness of the theory is that it fails to explain why a Finnish term was adopted for a state founded by Swedes. Nor does it explain the appearance of the term *Rös* in 8th-century Byzantine sources (and once in a 5th-century source, in connection with the Hunnic attack of 434–7), before the *Varangian route to the Byzantines had been established. Some scholars, such as E. Kunik (1875), A. Shakhmatov (1904), and A. Stender-Petersen (1953), have tried to overcome this objection by positing earlier stages of Germanic (Varangian/Gothic) colonization.

Anti-Normanists have put forth the theory of the autochthonous origin of the term 'Rus'. Beginning with M. Maksymovych in 1837, they have proposed etymologies based on the names of the rivers Ros and Rusna and have posited that the Varangians were multiethnic, multilingual companies of mercenaries and traders consisting of Norsemen, Balts, and Slavs. This theory does not explain, however, the fact that the names of known Varangian dukes and warriors are of Swedish origin.

Supporters of a third theory, that 'Rus' is of Iranian origin, derive the etymology of the term from the Iranian tribe of the *Roxolani (from Iranian *rokhs* 'light'). Although it suitably explains the early occurrences of the name, this theory is vitiated by historical and geographic evidence. The Roxolani lived in the Don River Basin, whereas 'Rus' was first used in reference to the Polianian land. Interpretations of the term as being simultaneously of Iranian origin in the Don Basin and of Gothic origin along the Dnieper (eg, by V. Mavrodin), or as having been transferred from a Varangian kaganate along the Don to Kiev (eg, by G. Vernadsky), are in fact compromises with the Normanist theory.

G.Y. Shevelov

Rus'. See Kievan Rus'.

Rus'. A newspaper published twice a week in Lviv in 1867 (75 issues in all). It was founded and financed by Count A. Gołuchowski, the Galician vicegerent, and was

intended to combat Russophilism in Galicia and attract Ukrainian support for the Habsburg regime. When the newspaper's populist editor began to defend Ukrainian interests against the Poles as well as the Russians, Gołuchowski withdrew his support, and the newspaper had to close down. Its publisher was K. Horbal, and its editor was F. Zarevych. Its contributors included O. Levytsky, O. Mohylnytsky, and V. Shashkevych.

Rus'. A semimonthly journal of religious, political, and literary affairs published in Lviv from December 1885 to June 1887 (a total of 22 issues). It was published and edited by L. Bobrovych.

Rus' law (*Ruske pravo*). In a broad sense, the legal culture and system of Kievan Rus', based on Slavic and other sources, and in force in Ukrainian territories in the 9th to 14th centuries. Many aspects of this legal system were preserved in the Grand Duchy of Lithuania. The main written sources or memorials of Rus' law are **Ruskaia Pravda* and the **Lithuanian Statute*.

In a narrower sense, Rus' law refers to the elements of old Ukrainian law that survived in the Kholm and Belz lands and in Galicia after their annexation by Poland in the 14th century. Rus' law continued to function in these territories, and was replaced gradually by *Polish law. Public Rus' law was completely displaced with the introduction of the Polish court system in Galicia in 1506; private law was retained longer in dealing with the Ukrainian population.

Rus' law was especially widespread among the rural population. Villages governed by Rus' law were the self-governing **hromady*, which elected their own leaders and had their own courts. As serfdom spread in the 15th and 16th centuries, many villages under Rus' law were placed under Germanic and then Polish law. Nevertheless, some norms of Rus' law survived in Ukrainian *customary law.

Rus' Sea. An ancient name for the Black Sea that appears in chronicles dating from the period 858–1485. An entry in the Primary Chronicle reads, 'And the Dnieper [River] flows into the Pontic Sea as a stream, and the Sea is called the Rus' [Sea].' Arab sources of the 10th to 12th centuries (eg, al-Masudi) and some Western historians (eg, Hel-mold of Bosau) referred to the Rus' Sea, meaning both the Black Sea and the Sea of Azov.

Rus' voivodeship. An administrative-territorial unit in Ukraine during the 15th to 18th centuries, equivalent to a palatinate. It was established in 1434 by the Polish government on the former territories of the Principality of *Galicia-Volhynia, which was annexed by Poland in the late 14th century. Initially it was called the Rus' (Ruthenia) kingdom and ruled by a viceregent (palatine). It consisted of five territories, some of which were subdivided into counties: Lviv (Lviv and Zhydachiv counties), Sianik, Peremyshl (Peremyshl and Perevor counties), Halych (Halych, Kolomyia, and Terebovlia counties), and Kholm or Belz (Kholm and Krasnystaw counties). The territories and counties corresponded roughly to the Rus' appanage principalities and *volosti*. In 1629 the total population of the Rus' voivodeship was 943,000, and by 1770 it had risen to 1,495,000, of which the majority was Ukrainian; the urban population also included many Poles, Jews, Germans,

and Armenians (for the history of the Ukrainian inhabitants of the region, see *Galicia). The administrative center was Lviv. In 1677 the voivodeship had approx 3,090 villages and 160 cities and towns. It was ruled by a voivode appointed by the Polish king, and judicial and administrative authority was exercised by castellans, city and zemstvo justices, and district reeves. A dietine of representatives of the nobility was regularly convened in Sudova Vyshnia. The voivodeship's coat of arms bore a golden lion with a golden crown on an azure field, with its forepaws on a cliff; each territory also had its own coat of arms. The Rus' voivodeship ceased to exist in 1772, when it was annexed by Austria.

A. Zhukovsky

Rusalka (Water Nymph). A publishing house of popular literature owned and operated by H. *Hanuliak in Lviv from 1921 to 1939.

Rusalka. A water nymph in Ukrainian demonology who has the appearance of a long-haired, pretty young girl and represents the soul of a drowned girl or an unbaptized dead child. According to folk belief the *rusalky* are naked, covered only by their long tresses, or dressed in a shift, or rarely in a full girl's costume. On their heads they wear wreaths of sedge. They live in groups in crystal palaces at the bottom of rivers and emerge from these only in the springtime, on Green Thursday or *rusalka* Easter. Until St Peter's day they play all night long on riverbanks, swing in the branches, run through the grass, dance, and sing. With their singing and charms they attract men, mainly bachelors, and tickle them to death. Their dancing is said to promote the growth of rye. After the first thunder they return to the rivers or rise into the sky. Sometimes *rusalky* are depicted as playful little children. In some regions not only river but also field and forest *rusalky* were believed to exist. They are capable of transforming themselves into other anthropomorphic shapes or animals. For protection against them people carry wormwood or lovage or wear a charmed shirt, kerchief, or piece of cloth. In the Chernihiv region, on the eve of Green Thursday a girl in a veil and red costume representing a *rusalka* was led about the village. The image of the *rusalka* appears frequently in Ukrainian literature, music, painting, drama, and cinema.

Rusalka (Water Nymph). A literary and scholarly populist student weekly in Lviv, edited by V. *Shashkevych; 12 issues appeared from 1 January to 2 April 1866. It published O. Konysky's critical survey of Ukrainian drama begun in *Meta*; articles on natural science and linguistics by I. Verkhratsky and O. Partytsky; works by Shaskevych, Konysky (his first poems), S. Vorobkevych, F. Zarevych, K. Klymkovych, O. Levytsky, and other writers and scholars; folk songs; criticism; and literary translations.

Rusalka (Water Nymph). A Russophile semimonthly women's newspaper published and edited by S. Shukhevych in Lviv from July 1868 to June 1869 and again in 1870 (a total of 23 issues).

Rusalka dance ensemble. A leading Ukrainian-Canadian dance company founded in Winnipeg in 1962 by P. Hladun under the auspices of the Ukrainian National Federation. The ensemble performs folk dances from all

regions of Ukraine in authentic costume, as well as contemporary renditions of Ukrainian dance. It consists of about 50 amateur members between the ages of 17 and 35. Besides touring Canada and the United States, Rusalka has visited Mexico, Scotland, England, Italy, and Ukraine.

Rusalka Dnistrovaia

Vitalii Rusanivsky

Rusalka Dnistrovaia (The Dniester Nymph), subtitled *Ruthenische Volks-Lieder*. The first Ukrainian literary and folkloric miscellany published in Galicia. It was compiled by the *Ruthenian Triad (M. Shashkevych, Ya. Holovatsky, and I. Vahylevych) and printed through their efforts in the **hrazhdanka* script in Buda, Hungary, in December 1836. The miscellany consisted of folk songs recorded in various places in Galicia, with an introduction by Vahylevych; poetry and prose by the Triad's members and their translations of Serbian folk poetry and excerpts from V. Hanka's 'Králové Dvůr Manuscript'; texts of lyrical and heroic poetry from a 15th-century manuscript, with an introduction by Shashkevych; Holovatsky's note on Slavonic manuscripts in the library of St Basil's Monastery in Lviv; and Shashkevych's review of Y. Lozynsky's 1835 book of Ukrainian wedding rituals. In the manifesto-like preface Shashkevych stressed the beauty of the Ukrainian vernacular and oral folklore and provided a list of the most important contemporary publications of literature and folklore in Russian-ruled Ukraine. Of the original 1,000 copies 800 were confiscated in Lviv by the police after its sale, and distribution in Galicia was banned by Venedykt *Levytsky, the provincial censor, who did not approve of the language and orthography or of some of the contents. (The ban, which was not in effect in other provinces in the Austrian Empire, was rescinded in 1848.) Nonetheless, because of the compilers' radical Romantic orientation toward a pan-Ukrainian folk culture, literature, and history, their promotion of the vernacular as the literary language, and their pioneering use of a phonetic orthography based on the vernacular, *Rusalka Dnistrovaia* had a seminal impact on national consciousness and literature in Western Ukraine. It was republished in Ternopil in 1910, and facsimile editions of the original appeared in Kiev in 1950 and 1972 and in Philadelphia in 1961.

R. Senkus

Rusalka songs. Songs connected with the folk rituals of the *Rosalia feast. In time and theme they were related to the **vesnianky-hahilky*. *Rusalka* songs were sung mostly by girls during Whitsuntide, known as *rusalka, zelenyi* 'green,' or *klechalnyi* 'green-branch' week when the young unmarried people engaged in dances and games in the woods or by the rivers. In manuscripts of the 11th and 12th centuries they are described as 'demons' songs.' Despite church opposition some of the *rusalka* games survived into the 20th century. In the game of Topolia (Poplar) a girl decorated with floral wreaths was led through the village, to the accompaniment of songs with the refrain 'Stand still, O poplar, do not grow. Do not give in to the wild wind.' The ritual of *zavyoannia berizky* (wrapping the birch) was accompanied by songs about the birch tree. The ritual of *kumannia* (making friends) was also accompanied by special songs, such as 'O, godmothers and doves, we are going to the woods, we are going to make friends.' In the Pynske region of Polisia, on the second day of the Rosalia the women and girls led a *kusta*, a girl wearing a rich wreath of birch, maple, and linden leaves, various flowers, and ears of wheat, from house to house, singing a cycle of *rusalka* songs. In Svarytsevychi, Rivne oblast, this ritual was still being observed in the 1970s. The songs often mention the *rusalky* (water nymphs), who, according to folk belief, lost their power over human beings after the Rosalia. In Horodnia county, near the Desna River, girls, wearing wreaths of fragrant grasses, led the *rusalky* back to their lakes and rivers at the end of the week. In the Kharkiv region girls sang *rusalka* songs around a female scarecrow, which they finally tore apart and scattered over the fields. The *rusalka* songs are derived from ancient magical incantations that were supposed to secure a rich harvest or attract a lover to a girl. More recent songs often have a love plot in which an abandoned girl is transformed into a poplar, a young wife is poisoned by her mother-in-law, or a young bride commits suicide to escape from a repugnant husband. The *tsarynni* (from *tsaryna* 'sown field') songs are a separate group of *rusalka* songs, connected with farming, and are sung during a ritual procession through the fields. Various writers, such as T. Shevchenko, N. Gogol, P. Hulak-Artemovskyy, M. Lysenko, and V. Symonenko, have drawn on *rusalka* songs in their works.

Rusalsky, Volodymyr [Rusal's'kyj] (pseud of Ivan Hevelenko), b 1911 in Uman county, Kiev gubernia, d 5 May 1957 in Adelaide, Australia. Writer. Before the Second World War he worked for newspapers and several publishing houses in Kiev. As a postwar refugee he lived in Germany and eventually settled in Australia. Rusalsky contributed to several émigré periodicals, especially *Novi dni*, and published four collections of novelettes: *Misiachni nochi* (Moonlit Nights, 1945), *Soniachni dzvonny* (Sunny Bells, 1946), *Smikh Iskariota* (The Laughter of Iscariot, 1947), and *Pislia oblohy mista* (After the Siege of the City, 1951).

Rusanivsky, Vitalii [Rusanivs'kyj, Vitalij], b 25 June 1931 in Kharkiv. Linguist; corresponding (1976–82) and then full member (since 1982) of the AN URSR (now ANU). After completing his graduate studies at Kiev University (1957) he lectured there and joined the staff of the ANU Institute of Linguistics. He served as the institute's deputy director (1964–81) and then director, and has served as academic secretary of the ANU Division of Literature, Languages, and Fine Arts since 1978. He has written books on aspect and tense in 16th- and 17th-century Ukrainian (1959), the structure of the Ukrainian verb (1971), Slavic interlinguistic relations and the formation of functional styles in 16th- and 17th-century literary Ukrainian (1973), the folk vernacular as the source of development of East Slavic literary languages from the 16th to the early 18th century (1978), the origin and development of the East Slavic languages (1980), and the sources of Slavic literary languages (1985). He is also the coauthor of books on the philosophical questions of linguistics (1972), the morphology of contemporary literary Ukrainian (1969), the history of the Ukrainian language (2 vols, 1978–9), and of a Ukrainian orthographic dictionary (1974) and other works, and the editor of a collection of 15th-century Ukrainian charters (1965), several collections of articles, and secondary-school language textbooks.

Rusenko, Ivan, b 15 August 1890 in Krasna, Krosno county, Galicia, d 10 August 1960 in Korolivka, Ivano-Frankivske oblast. Writer and artist. A village teacher, he wrote in the Lemko dialect patriotic, lyrical, and satirical poetry, humorous fables, and the dramas in verse *Lemkivs'ke vesillia* (A Lemko Wedding) and *Vertep v Karpatakh* (A Vertep in the Carpathians), which were staged by many Lemko amateur theater groups. He also illustrated *Lemko* (the first Lemko newspaper) and D. *Vyslotsky's publications. After the Second World War he was forcibly resettled in Soviet Ukraine, where he continued teaching and writing. His postwar poems and stories about the resettled Lemkos remain unpublished.

Rush (*Luzula*; Ukrainian: *ozhyka*). Perennial herbaceous plants of the family Juncaceae, found in cold and temperate zones. Eleven species grow in Ukraine, the more common ones being the hairy (*L. pilosa*), many-headed (*L. multiflora*), and pale wood rush (*L. pallescens*). Rushes grow in wet meadows, shady forests, thickets, and grassy areas. Some, such as the snowy, the hairy, and the greater wood rushes, are cultivated as ornamental plants.

Rushnyk. An embroidered or woven towel 20–50 cm wide and 1–4 m long, used usually for a decorative or ceremonial purpose. In medieval times it was used as a basic piece of dress, covering the front and back of the body, or as a monetary unit. In Ukraine the *rushnyk* accompanied a person throughout his or her life: a newborn was placed immediately on a *rushnyk*. The *rushnyk* played a prominent role in the wedding rituals: in the engagement ceremony and the church wedding the *rushnyk* was used to tie the hands of the young couple; at the shower the bride-to-be and her bridesmaids wore the *rushnyk* across the chest; the engaged couple or their attendants carried the *rushnyk* when they invited guests to the wedding; at the wedding it was the bride's chief gift to the bridegroom, her in-laws, and the matchmakers; the *rushnyk* was worn across the

Embroidered *rushnyk*Woven *rushnyk*

chest by the most important, if not all, wedding guests; at the departure from the bride's home and during the church service the couple stood on a *rushnyk*; and at the wedding the wedding bread was placed on a *rushnyk*. As a component of the bride's dowry the *rushnyk* represented her wealth and talents. The Hutsuls hung a *rushnyk* in the window to inform others of a death in the family. At funerals the deceased were covered with a *rushnyk*, the oxen pulling the hearse were decorated with it, the coffin was lowered into the grave with *rushnyky*, and the cross over the grave was draped with a *rushnyk*. A *rushnyk* was the most common gift made to churches. It was used in various folk rituals and celebrations – to decorate the ice cross on Epiphany and the birch tree on the Feast of the Trinity. During the Kupalo festival *rushnyky* and flower wreaths were used for decorating roadside crosses. The final sheaf of grain gathered during the harvest festival was tied with a *rushnyk*. At St Andrew's festival girls hung *rushnyky* outside their windows at night to learn whether or not they would get married. *Rushnyky* were also widely used in domestic life. When a house was constructed, the final beam was hoisted into place with *rushnyky*, which were then given to the workmen as gifts. Special *rushnyky* called *bozhnyky* or *naobraznyky* decorated icons or favorite paintings in the house. The *rushnyk* was also a symbol of the family hearth, a link between the living and the dead. A young man leaving home received a *rushnyk* from his mother or betrothed.

Rushnyky are either embroidered or woven, and each region of Ukraine has its own characteristic patterns and colors. The embroidered *rushnyky* of the Kiev, Poltava, and Chernihiv regions usually have a floral design arranged vertically in the form of a vase. A basic element of the design is the tree of life, subtended by a horizontal along the edge of the *rushnyk*. The dominant color in the Poltava *rushnyk* is bright red; in the Kiev *rushnyk* it is red and black or red and blue. A geometric pattern, embroidered in parallel stripes, is typical of Podilia. Stylized female animal and bird figures are also popular there. Volhynian *rushnyky* have geometric designs of red and blue made with a standard cross-stitch or running stitch. In Subcarpathia the dominant colors are black, red, and

yellow, and the most popular stitch is the *nyz*. In Bukovyna and the Ternopil region the *rushnyky* are richly embroidered, with the horizontal and vertical stripes of black and red designs often covering one-quarter of the surface. (See also *Embroidery.)

There are two basic techniques used in *rushnyk* weaving, and they determine the nature of the design. Shuttle weaving is used to create a horizontal geometric design, in which red is the dominant color. Twill weaving is used for more elaborate designs, in which horizontal stripes are combined with stylized flowers and birds as well as squares, rhombuses, rosettes, and stars. (See also *Weaving.)

Today *rushnyky* are made mostly at specialized embroidery and weaving workshops and factories that employ hundreds of artisans. Some of them – M. Stefan from Kiev, for example, and T. Vasylieva from Kharkiv – are creative artists. Nineteen enterprises in Ukraine specialize in embroidery. The major centers are in Kiev oblast (Ivankiv, Vasylykiv, Kaharlyk, Litky), Poltava oblast (Opishnia, Velyki Sorochyntsi, Lubni), Chernihiv oblast (Nizhen, Pryluka), Vinnytsia oblast (Vinnytsia, Klembivka, Horodkivka), and Lviv oblast (Chervonohrad, Berdykhiv, Lviv). Since the 1960s much of the embroidery work has been mechanized. The recognized masters of hand embroidery include H. Herasymovych (the Hutsul region), V. Roik (Symferopil), M. Havrylo (Transcarpathia), N. Liakhova and E. Talashchenko (Kiev), A. Zaduvailo (Cherkasy), H. Hryn and O. Vasylenko (Poltava region), and Z. Chepela (Nizhen).

Woven *rushnyky* are more common. They are produced by factories in Krolevets, Bohuslav, Dihtiari, and Pereiaslav-Khmelnytskyi. Krolevets, in Sumy oblast, has been an important weaving center of high-quality *rushnyky* since the 16th century. In its products the design stands out against the plain white background and consists mostly of geometric motifs of rosettes, rhombuses, vases, flowers, and especially the tree of life. Most of the design is concentrated at the ends of the cloth. The best-known weavers in Krolevets are O. Vasylenko, Z. Cherenkova, M. Datsenko, and H. Yefimenko. Other master weavers are H. Veres (Kiev) and H. Vasylyshchuk (Ivano-Frankivske oblast). In the West, K. Kolotylo in Vienna is known for her embroidered *rushnyky*.

Virtually every regional studies and ethnographic museum in Ukraine has a collection of *rushnyky*. The largest belongs to the *Ukrainian State Museum of Ethnography and Crafts in Lviv. A large collection is found in I. Honchar's private museum in Kiev.

Besides traditional designs there were also new 'artificial' designs with V. Lenin's and J. Stalin's portraits, five-point stars, hammers and sickles, and various political slogans. *Rushnyky* are a popular form of interior decoration in Ukraine and are exported to many foreign countries. The *rushnyk* often appears in folk and contemporary songs as a symbol of love, faithfulness, and patriotism.

Rusin" (The Ruthenian). A weekly organ of the Greek Catholic Priests Mission Association of Pittsburgh and later of the *United Societies of Greek Catholic Religion in the USA, a fraternal organization for Carpatho-Ruthenian immigrants primarily from Transcarpathia. It appeared in Philadelphia and then Pittsburgh from June 1910 to December 1916 under the editorship of Y. Hanulia. The paper was closely allied with the Byzantine Ruthenian Greek Catholic Diocese of Pittsburgh, and defended the church against attacks by the more conservative *Amerikanskii russkii viestnik*. It was succeeded by *Prosvita* (1917).

Ruska Besida in Bukovyna. A Ukrainian community cultural-educational society which existed in Bukovyna in 1869–1940. Formed through the initiative of Ye. *Hakman, Ruska Besida was the first and (until 1918) the most active Ukrainian civic organization in Bukovyna. The organization was started as a club for the Ukrainian intelligentsia of Bukovyna, with a membership of approx 150. The group was initially headed (1869–78) by V. *Prodan and dominated by *Russophiles. In 1870–1 it published the first Ukrainian newspaper in Bukovyna, *Bukovynskaia zoria* (in **yazychiie*).

During the 1880s Ruska Besida was transformed into a community-oriented educational body whose express aim was 'to spread knowledge and improve the lot of the Ruthenian [Ukrainian] people in Bukovyna.' Working through a network of village-based reading societies (*chytalni*), Ruska Besida became a regional counterpart to the Galician-based *Prosvita society. The watershed date in this process was 1884, when the organization's leadership was assumed by Ukrainian national populists (*narodovtsi*), and the group's scope of activity expanded substantially. By 1906 the Ruska Besida structure included a central office in Chernivtsi, seven regional branches, 83 village reading clubs, and a total membership of approx 6,800. By 1914 it included nine regional branches, 150 reading clubs, and a membership of approx 13,000. From 1835 Ruska Besida published the newspaper **Bukovyna* and a series of popular monthly books under the name Biblioteka dlia molodezhy, selian, i mishchanstva (with a total run of 120 titles before the undertaking ceased in 1895). Other publications issued by the society included *Lastivka* (1894–6), *Chytnia* (1911–14), *Bukovynskiyi pravo-*

slavnyi kalendar (1874–1918), and individual books by authors such as Yu. Fedkovych, S. Vorobkevych, and M. Korduba. By 1918 the group had printed 270 titles.

Ruska Besida also served as the spawning ground for a host of Ukrainian institutions and organizations in Bukovyna. The first of these was the *Ruska Rada society, formed as a political body in 1870 with a membership that paralleled that of Ruska Besida. In 1875 the society was instrumental in establishing a chair of Ukrainian language and literature at the newly formed Chernivtsi University, and in 1899, a Ukrainian-language chair in the theology department of the same institution. Other groups which emerged out of Ruska Besida included Mishchanska Chytnia (1880), the Ruthenian Dramatic and Literary Society (1884), the Chernivtsi People's Home (1884), *Ukrainska (Ruska) Shkola (1887), Bukovynskiyi Boian (1895), *Ruska Kasa (1896), and the *Women's Hromada in Bukovyna (1906). These specialized affiliate organizations addressed particular sociocultural concerns while Ruska Besida took charge of its many branches and reading societies.

The activities of reading societies were banned in 1918, after the Rumanian occupation of Bukovyna, a development which effectively limited the activities of Ruska Besida to the city of Chernivtsi. Even there the local People's Home and Ukrainska Shkola society had taken on much of Ruska Besida's former activities. Only in 1938, with the banning of the Ukrainian National party by the Rumanian government, did Ruska Besida again come to life, this time as the de facto spokesbody of Ukrainian interests in Bukovyna. With the Soviet occupation of Bukovyna in 1940, Ruska Besida (along with all other Ukrainian organizations) was prohibited.

Ruska Besida in Galicia. See Ukrainska Besida.

Ruska Besida Theater. See Ukrainska Besida Theater.

Rus'ka istorychna biblioteka (Ruthenian Historical Library). A book series dealing with Ukrainian history, published in Galicia in 1886–1904 (24 volumes in all). It was edited and published by O. *Barvinsky with the assistance of O. Konysky. With V. Antonovych's help Barvinsky developed a plan to cover the full scope of Ukrainian history. Most of the books were translations from Russian of works by Ukrainian and Russian historians, such as Antonovych, D. Bahalii, M. Vladimirsky-Budanov, M. Dashkevych, M. Kostomarov, A. Yefymenko, I. Lynnychenko, F. Leontovych, I. Novytsky, and Ya. Shulhyn. At first the series was published in Ternopil. After vol 15 was released (1894), the Shevchenko Scientific Society assumed responsibility for publication of the series, and the other nine volumes came out in Lviv.

Ruska Kasa (Ruthenian Bank). A savings and loan society founded by I. Okunevsky in 1896 in Chernivtsi. By 1913 it had over 1,500 members. After the First World War the Rumanian government limited the society's activities. In 1924 it was forced to reconstitute itself as a credit bank, and it was closed by the authorities soon afterward.

Rus'ka khata (The Ruthenian House). A Bukovynian literary miscellany. It was edited by D. Mlaka (S. *Vorobkevych) in Chernivtsi and printed in 1877 in Lviv. Among the contributors were Vorobkevych (the heroic poem 'Nechai' and other works), Yu. Fedkovych (the drama 'Dovbush' and other works), N. Shram (H. Vorobkevych), P. Kulish (a libretto and a historical essay about Galicia in Cossack times), H. Barvinok, A. Shanovsky, and K. Ustyianovych.

Ruska khata (Ruthenian House [subtitled 'An Illustrated Periodical of Literature, Science, and Contemporary Life']). A semimonthly literary journal published in Lviv in 1905 (24 issues) and 1906 (1 issue) by D. Sembratovych and edited by him and Ya. Nebylovets. Among the contributors were members of the modernist group *Moloda Muza and other writers, such as V. Budzynovsky, O. Kovalenko, M. Pavlyk (who published in it the correspondence of M. Drahomanov with N. Kobrynska), and M. Mikhnovsky (the eight-part essay 'Spirillum patricianum ukrainophilicum'). Although the journal was intended for a general audience, it failed to attract many readers and was succeeded by *S'vit.

Ruska Kraina (Hungarian: Ruszka Krajna). A name for *Transcarpathia that was used briefly by the Hungarian government in 1918–19. The Hungarian government granted autonomy to Transcarpathia under that name in December 1918, and it appointed a Hungarian governor in Mukachiv and a minister of state for Ruthenia in Budapest. The Communist Hungarian government (March–August 1919) retained the use of the name Ruska Kraina. During its period in power the Ruska Kraina Commissariat, which replaced the Ministry of State, published the Ukrainian-language newspaper *Rus'ka pravda* in Budapest (13 issues in all). But on 8 May 1919 the representatives of Transcarpathian councils proclaimed the union of Transcarpathia with Czechoslovakia, and their proclamation was sanctioned by the Treaty of *Saint-Germain (10 September 1919). Under Czechoslovakia the region was known as Subcarpathian Ruthenia.

Rus'ka nyva (Ruthenian Field). A weekly organ of the *Ruthenian Agrarian party, published in Uzhhorod in 1920–4 and edited by M. Brashchaiko. The newspaper helped further Ukrainian national consciousness in Transcarpathia and promoted a pan-Ukrainian identity. Initially it used *etymological spelling.

Ruska Pravda. See *Ruskaia Pravda*.

Rus'ka pys'mennist' (Ruthenian Writing). A book series of Ukrainian literary classics published in Lviv in the years 1904–28. It was established and edited by Yu. *Romanchuk, who was succeeded in 1920 by V. Lukych (V. Levytsky) and then by M. Vozniak. The book series was renamed *Ukrains'ke pys'menstvo* after the First World War. Twenty-eight volumes of works were published (23 of them by Romanchuk), including works of authors such as H. Kvitka-Osnovianenko, T. Shevchenko, P. Kulish, S. Vorobkevych, S. Rudansky, and Yu. Fedkovych.

Ruska Rada. See Ruthenian Council.

Ruska rada (Ruthenian Council). A semimonthly and, from 1900, weekly organ of the *Ruska Rada society in Chernivtsi, published from April 1898 to November 1908. It contained news; reports from village correspondents throughout Bukovyna; belles lettres; and articles on political and economic affairs and on scientific, technical, and agricultural subjects. *Ruska rada* played an important role in spreading Ukrainian national consciousness in Bukovyna. Its editors included I. Sozansky, I. Zakharko, and V. Stroich.

Ruska Rada society. A Bukovynian political organization founded in Chernivtsi in 1870 by members of the *Ruska Besida society. Its first president was Rev V. Prodan. The society's members informed the Ukrainian public about political matters and organized election campaigns. Until 1885 the society was dominated by Russophiles and thereafter by populists (led by I. Tyminsky, Ye. Pihuliak, O. Popovych, and I. Okunevsky), who published the organs **Ruska rada* (1898–1908) and **Narodnyi holos* (1909–11). From 1904 to 1914 the president was S. Smal-Stotsky. After the creation of Ukrainian parties in Bukovyna in 1906, the society's political role was diminished. In 1913 it had 842 members. The society was banned by the Rumanian regime in 1923.

Ruska Shkola. See *Ukrainska Shkola*.

Ruskaia Pravda (Rus' Truth [Law]). The most important collection of old Ukrainian-Rus' laws and an important source for the study of the legal and social history of Rus'-Ukraine and neighboring Slavic countries. It was compiled in the 11th and 12th centuries on the basis of customary law. The original text has never been found, but there are over 100 transcriptions in existence from the 13th to 18th centuries. There are three redactions of *Ruskaia Pravda*, the short, expanded, and condensed versions, and the connections between them have not been completely analyzed. V. Tatishchev found the first short redaction in 1738 in the text of a Novgorod chronicle from the 1440s. This was published by A.-L. von Schlözer in 1767. Since then some 10 more copies of the short redaction have been found, including the so-called Academic and Archeographic editions from approximately the same period. Of over 100 copies of the expanded redaction, the oldest are the Synodal edition, contained in the text of a **Kormchaia kniga* from 1282, and the Troitskyi edition, found in the legal compendium *Mirylo Pravednoie* from the second half of the 14th century. The expanded *Ruskaia Pravda* was first published in 1792 by N. Boltin. The text of the condensed redaction differs somewhat from that of the two basic redactions. Its oldest version comes from a **Kormchaia kniga* of the 17th century. Most historians (eg, M. Maksymeiko, A. Zimin) believe that the condensed redaction is a shortened version of the expanded redaction, and that it appeared in the 15th to 17th centuries; M. Tikhomirov and others, however, claim that the condensed redaction dates back to the mid to late 12th century, and that it served as the basis of the expanded redaction.

Noteworthy editors and publishers of the *Ruskaia Pravda* have been A. Musin-Pushkin, N. Kalachov, P. Mrochek-Drozdovsky, M. Vladimirsky-Budanov, V. Sergeevich, S. Yushkov, and B. Grekov. *Ruskaia Pravda* was

published in German by G. Ewers (1814), E. Tobien (1843–4), and L. Goetz (1910–13); in French by M. Szeftel and A. Eck (1963); in Polish by I. Rakowiecki (1820–2) and A. Kucharski (1838); and in English by G. Vernadsky (1947).

Studies of the *Ruskaia Pravda* and attempts to systematize its redactions have been published by N. Kalachov, V. Kliuchevsky, V. Sergeevich, L. Goetz, and others. N. Karamzin studied its sources, particularly the influence of Byzantine canon and imperial law on the code. N. Kalachov and V. Kliuchevsky saw it as a clerical work, based on customary law and intended for church judges in civil cases. Others have detected the influence of Bulgarian law of the 9th and 10th centuries. Soviet historians (such as B. Grekov and L. Cherepnin) have used *Ruskaia Pravda* chiefly as a source of understanding social relations in Kievan Rus'; it has also been used to analyze the Kievan Rus' culture (B. Romanov) and to study the internal history and content of specific legal norms (S. Yushkov).

The 43 articles of the condensed redaction of *Ruskaia Pravda* are divided into four parts: (1) 'Pravda Iaroslava' (or 'the oldest part,' as it is called by historians [eg, V. Sergeevich, A. Presniakov, M. Tikhomirov] who do not agree that *Ruskaia Pravda* was initially promulgated by Yaroslav the Wise), consisting of articles 1–18; (2) 'Pravda Iaroslavychiv' or 'Ustav Iaroslavychiv,' consisting of articles 19–41; (3) 'Pokon vyrnyi,' which defines the penalty for murder (art 42); and (4) 'Urok mestnykam' (art 43) (see *Mest).

'Pravda Iaroslava' dates from ca 1016 according to some historians, or from the 1030s according to others. The decrees in this section are as old as the 8th or 9th century, particularly those dealing with blood vengeance. 'Pravda Iaroslavychiv' was composed at a conference of Yaroslav's sons, Iziaslav, Vsevolod, and Sviatoslav, in Vyshhorod in 1072 (according to M. Tikhomirov, S. Yushkov, and L. Cherepnin) or in 1032–54 (according to B. Grekov and A. Zimin). The articles of this section carefully define and defend the interests of princes, government officials, and private property. The varying fines for murder (see *vyra), depending on the victim's social rank, point to a differentiated society. Most norms of the short redaction are devoted to the protection of life, health, and property.

The expanded redaction of *Ruskaia Pravda*, consisting of 121 articles, was the most widespread. There is considerable disagreement in dating it: according to S. Yushkov and A. Zimin, it was compiled during the reign of Volodymyr Monomakh (after 1113); according to B. Rybakov, during the reign of Mstyslav I Volodymyrovych; and according to M. Tikhomirov and L. Cherepnin, before 1209.

In the criminal law of the expanded redaction blood vengeance was replaced by monetary fines and state penalties called *vyry*. If the criminal could not be identified, responsibility for murder was placed on the community in whose territory the crime occurred. Besides compensation to the victim, a state fine was imposed for assault and insult. Serious crimes, such as horse stealing, robbery, and arson, were punished by *banishment and seizure. *Ruskaia Pravda* also contained a number of very clear laws on civil issues, such as loans, interest, land disputes, and wills, and on procedural matters, such as witness testimony, oaths, and ordeal. Most of these issues were also covered in the condensed redaction.

Ruskaia Pravda was a legal code of great importance, as can be seen from the abundance of copies that have been

found. With the exception of the most privileged strata in the society, all free citizens were protected by the code. Its main purpose was to provide individuals with the power to defend their right to life, health, and property and to provide courts with the basis for a fair judgment. A characteristic feature of *Ruskaia Pravda* was its evolution toward a more humane law system.

Ruskaia Pravda is also an important source of historical information on the administration of Kievan Rus', social differentiation, financial affairs, and agricultural technology. It is an indispensable source for the study of customary law and Princely-era legislation. It had a direct influence on *Lithuanian-Ruthenian law and the *Lithuanian Statute and an indirect influence on the *Code of Laws of 1743. Some evidence of its influence can even be found in the legal codes and systems of other Slavic nations, especially in the codes of the Polish king Casimir III the Great (mid-14th century). According to the historian F. Leontovych, however, its influence on medieval Muscovite law is doubtful.

Ruske slovo (Ruthenian Voice). A weekly newspaper of Ukrainians in the Bačka region of Serbia. The newspaper was founded in 1945 in Ruski Krstur and then moved to Novi Sad in 1967. The Ruske Slovo press has published a monthly children's supplement (*Pyonerska zahradka*) since 1947, a monthly publication for youths (*Mak*) since 1972, and a literary-cultural quarterly (*Shvetlosts*) regularly since 1966. All of these organs appear in the local Bačka dialect, but a special literary page in *Ruske slovo* and other supplements have been published in standard Ukrainian. The press has also printed books on a regular basis.

Ruski Krstur (Kerestur Ruskyi; Hungarian: Bács-Keresztur). A town (1981 pop 7,000) situated 50 km northwest of Novi Sad, in the *Bačka region of Serbia, that is inhabited almost exclusively by Ukrainians. Established in 1746, it was the first settlement of Bačka Ukrainians. Since 1751 a Greek Catholic parish has been active there. Published there have been the weeklies *Ruski novini* (1931–41) and *Ruske slovo* (1945–67); the children's monthlies *Nasha zahradka* (1938–41) and *Pyonerska zahradka* (from 1947); the literary and arts journals *Shvetlosts* (1952–4, and then from 1966), *Tvorchosts*, and *Visnik kulturi*; and almanacs and school texts. A gymnasium at which Ukrainian is taught was established in 1945. The town also boasts an amateur theater group, a museum, a cultural center, and a cultural and educational association named in honor of T. Shevchenko.

Ruski novini (Ruthenian News). A weekly newspaper published for the Ukrainians of the Bačka region, Serbia, by the Ruthenian People's Enlightenment Society. It began publication in December 1924 in Novi Sad under the editorship of a Croatian priest, D. Pavić. From 1927 it also published a children's supplement, *Mali novini*. Briefly suspended in 1930, *Ruski novini* renewed publication in August 1931 in Piškoveci and then Ruski Krstur under the editorship of Rev M. Firak. The newspaper was published in the local *Bačka dialect in a pressrun of 2,000. It was closed down in 1941, after the Hungarian army occupied the region.

Ruskii Sion (Ruthenian Sion). A semimonthly organ of the Ukrainian Catholic Lviv archeparchy published from 1871 to 1885 in Lviv. It was established on the initiative of Metropolitan Y. *Sembratovych and was initially called *Sion Ruskii* (1871–2). In 1880 he briefly closed the newspaper for publishing an article that offended him. It was then renamed *Halytskii Sion*, and it came out under this title until the end of 1882, when it reverted to being called *Ruskii Sion*. It published articles on theology and on church history and law, sermons, and, primarily, reports from local parishes. Its editors included Revs Yu. Pelesh, Y. Milnytsky, K. Sarnytsky, O. Toronsky, O. Bachynsky, and I. Bartoshevsky.

Rusko, Oleksii [Rus'ko, Oleksij], b 30 March 1906 in Białystok, Poland, d 25 August 1964 in Kiev. Pedagogue and government official; corresponding member of the Academy of Pedagogical Sciences of the RSFSR from 1957. He completed study at the Kiev Chemical-Technical Institute in 1932. In 1930–8 he held administrative and teaching positions at the Kiev Pedagogical Institute, and in 1938–44 he was rector of Kiev University. In 1944–58 he served as deputy minister of education of the Ukrainian SSR, and in 1958–64 as director of the *Scientific Research Institute of Pedagogy of the Ukrainian SSR. He wrote works, including textbooks, relating to the teaching of chemistry in secondary and postsecondary institutions, and on general pedagogical topics.

Ruskyi amvon (Ruthenian Pulpit). A journal containing sermons for Ukrainian Catholic priests, published in Lviv in 1896–1905.

Ruskyi Narodnyi Soiuz. See Ukrainian National Association and Ukrainian Fraternal Association.

Ruskyi selianyyn (Ruthenian Peasant). A newspaper for peasants, published semimonthly from April to June 1903 and then three times a month to 1906 in Lviv. It contained articles on political affairs and popular enlightenment. It was published by Zh. Holob and edited by him and V. Demianchuk.

Ruslan. A conservative populist daily newspaper published in Lviv from 1897 to 1914. Founded by O. Barvinsky and A. Vakhnianyn, it served as the organ of the Catholic Ruthenian People's Union and then the Christian Social party (see *Christian Social Movement), supported the politics of the *New Era (co-operation with the Poles), spoke out against the Russophile movement in Western Ukraine, and advocated closer ties with the Ukrainians in Russian-ruled Ukraine. It published the works of promi-

ent writers in Russian-ruled Ukraine, such as O. Konytsky, I. Nechui-Levytsky, and M. Starytsky, and contributions from Western Ukrainian writers, such as B. Lepky, O. Makovei, K. Studynsky, and V. Shchurat. The paper was especially noted for its popular-scholarly articles on Ukrainian history and the correspondence of V. Antonovych with O. Barvinsky and O. Ohonovsky, and A. Vakhnianyn with P. Kulish. *Ruslan* was edited by T. Baranovsky, S. Kulchytsky (1897–8), L. Lopatynsky (1898–1907), S. Goruk (1907–14), and V. Barvinsky (1914).

Orest Rusnak

Mykhailo Rusov

Rusnak, Orest (stage name: Rudolph Gerlach), b 24 July 1895 in Dubivtsi, Bukovyna, d 23 January 1960 in Munich. Opera and concert singer (tenor). In 1923 he graduated from the Prague Conservatory in the class of E. Fuchs; he also studied in Milan. From 1924 he appeared in Prague, Vienna, and (mainly) Germany, and from 1929 he made frequent tours in Central and Western Ukraine. Among his roles were Fernando in G. Donizetti's *La Favorita*, Arnold in G. Rossini's *William Tell*, Manrico in G. Verdi's *Il Trovatore*, Lionel in F. von Flotow's *Martha*, Chapela in A. Adam's *Le Postillon de Longjumeau*, Cavaradossi in G. Puccini's *Tosca*, and Rodolfo in his *La Bohème*. In concert he performed art songs and folk song arrangements by M. Lysenko and other Ukrainian composers. In the 1930s he recorded for the German Elekrola label. His biography, by I. Novosivsky, was published in New York (1971).

Rusnak, Vasyi, b 23 February 1899 in Nopolokivtsi, Kitsman county, Bukovyna, d 24 July 1981 in Bucharest. Bukovynian political activist. He graduated in law (1924) and history (1926) from Chernivtsi University and then established a legal practice in Chernivtsi. He headed the workers society Volia and the Ukrainian faction of the Rumanian Social Democratic party in Bukovyna, for which he edited *Borot'ba*. He was a Sovietophile and cofounder of an underground committee of communist organizations in Bukovyna. A 1928 trip to Soviet Ukraine left him largely disillusioned with radical politics, and his major activities through the 1930s were in the cultural field, particularly in theater. He is the author of a history of Ukrainian theater in Bukovyna (1975). After the Second World War he was arrested by the Soviets. Following his release in 1956, he lived in Rumania, where he helped compile Rumanian-Ukrainian and Ukrainian-Rumanian dictionaries (1963–4).

Rusov, Mykhailo (pseud: Totsky, M. Liashenko, Mishelia), b 9 November or December 1876 in Oleshnia, Horodnia county, Chernihiv gubernia, d 24 February 1909 in St Petersburg. Political revolutionary and ethnographer; son of O. *Rusov and S. *Rusova. Like his parents, he was an adherent of M. Drahomanov's political and socialist ideas. He entered Kharkiv University in 1895, but he was expelled in 1899 for one year for his involvement in the Kharkiv Student Hromada. He initiated the creation of the *Revolutionary Ukrainian party (RUP) and its Poltava branch (1900). In 1901 he was arrested for leading a political demonstration in Poltava and spreading revolutionary propaganda, again expelled from Kharkiv University, and banned from Kharkiv and other cities with universities for two years. After emigrating in 1902, he studied at Leipzig University (1902–6), did field research for his PH D thesis on Subcarpathian buildings, and was a member of the RUP Foreign Group in Lviv. He subsidized RUP publications and activities and contributed to the party's organs *Haslo* and *Dobra novyna*. He also published several articles in *Literaturno-naukovyj vistnyk* in 1900–1 and a brochure on peasant handicrafts (1906).

Oleksander Rusov

Yuriy Rusov

Rusov, Oleksander, b 7 February 1847 in Kiev, d 8 October 1915 in Saratov, Russia. Statistician, folklorist, and civic figure of Russian origin; husband of S. *Rusova and father of M. and Yu. *Rusov. A graduate of Kiev University (1868), he taught at gymnasiums in Kiev (1868–74) and belonged to the Old Hromada of Kiev. He was a founding member of the *Southwestern Branch of the Imperial Russian Geographic Society. In 1874 he helped organize the Kiev census, and in 1875–6 he prepared with F. Vovk the two-volume Prague edition of T. Shevchenko's *Kobzar*. Along with P. Chervinsky, V. Varzar, and O. Shlykevych he was one of the founders of the zemstvo statistical service in Chernihiv gubernia. He worked in the Nizhen county zemstvo (1878–80), supervised statistics-gathering in Kherson and Kharkiv gubernias (1882–92), developed an economic survey of Chernihiv gubernia (1893–8), and directed the Statistical Bureau of Poltava gubernia (1899–1902). After being banished from Poltava he worked for a few years in St Petersburg and then taught statistics at the Kiev Commercial Institute (1909–15). Rusov wrote over 40 scholarly works and many articles in statistics, history, and ethnography. His more important contributions to statistics are *Russkie trakty v kontse XVII i nachale XVIII vekov*

(Russian Highways at the End of the 17th and the Beginning of the 18th Centuries, 1876), a statistical-economic description of Nizhen county (1879), a statistical description of Kharkiv based on the 1892 census (1893), and a description of Chernihiv gubernia (2 vols, 1898–9). He also wrote studies of O. Veresai (1874), *torban* players (1892), carols (1907), and M. Lysenko (1903).

Rusov, Yuriy, b 1895 in Kharkiv, d 2 August 1961 near Montreal. Biologist; member of the Shevchenko Scientific Society; son of O. *Rusov and S. *Rusova. A graduate of Kiev and Vienna universities, he represented Ukrainian students as a delegate to the Central Rada in 1917 and taught zoology and ichthyology briefly at Kamianets-Podilskyi Ukrainian State University. In the 1920s he taught in schools in Czechoslovakia and in 1930–41 he headed the ichthyology division at the National Zoological Institute in Bucharest. In Berlin (1941–6) he was a leading figure in the Ukrainian hetmanite movement. After emigrating to Canada he worked (from 1947) at the University of Montreal and the Mont-Tremblant Biological Research Station.

Sofiia Rusova

Rusova, Sofiia (née Lindfors), b 18 February 1856 in Oleshnia, Horodnia county, Chernihiv gubernia, d 5 February 1940 in Prague. Pedagogue, author, and political activist; wife of O. *Rusov and mother of M. and Yu. *Rusov; member of the Ukrainian Central Rada and a founding member and first president of the *National Council of Ukrainian Women. She headed the Department of Pre-school and Adult Education in the Ministry of Education under the Hetman government, and was a professor of education at the Froebel Pedagogical Institute in Kiev before the First World War and at Kamianets-Podilskyi Ukrainian State University immediately after the war. Rusova escaped from Soviet Ukraine in 1922 and settled in Prague, where she taught at the Ukrainian Higher Pedagogical Institute between 1924 and 1939. As a member of the *Union of Ukrainian Women and honorary president of the *World Union of Ukrainian Women she frequently represented Ukrainian women at international women's conferences.

She was a vocal proponent of the left democratic wing of the Ukrainian political spectrum. She promoted day-care, adult education, and political organization of the peasants. She remained an active member of the Ukrainian Party of Socialist Revolutionaries and contributed frequently to its newspapers, especially to the Prague-based *Nova hromada*.

Her works include the memoirs *Moï spomyny* (My Memoirs, Lviv 1937) and *Nashi vyznachni zhinky* (Our Prominent Women, Kolomyia 1934; 2nd edn, Winnipeg 1945), *Persha chytanka dia doroslykh dia vechirnykh ta nedil's'kykh shkyl* (First Reader for Adults for Evening and Sunday Schools, 1918), *Iedyna diial'na (trudova) shkola* (The

Unified [Labor] School, 1918), *Teoriia i praktyka doshkil'no-ho vykhovannia* (Theory and Practice of Preschool Education, 1924), *Suchasni techii v novii pedahohitsi* (Contemporary Trends in Modern Pedagogy, 1932), and *Moral'ni zavdannia suchasnoi shkoly* (Moral Tasks of the Contemporary School, 1938).

M. Bohachevsky-Chomiak

Russia (Rosii; Russian: Rossiia). The country to the north and east of Ukraine, inhabited primarily by Russians, an Eastern Slavic people, but also by numerous minorities of diverse ethnicity. The borders of the state of Russia and, to a lesser degree, of the area of compact settlement of the Russian people have expanded dramatically over the centuries. The nucleus of the Russian state was the principality of Suzdal-Vladimir in northeastern Kievan Rus'. This polity then expanded by conquest and purchase until it acquired all the other former principalities of

Kievan Rus' except those of Ukraine and Belarus, which had fallen under the rule of the Polish-Lithuanian Commonwealth. Through conquest and colonization, it extended its borders to the Pacific Ocean in the mid-17th century. In the later part of the 17th century, following the *Cossack-Polish War, *Left-Bank Ukraine came under Russian suzerainty, although it was not fully integrated into the Russian state until the late 18th century. During that century the state, now formally constituted as the Russian Empire, expanded to the Black and Baltic seas by acquiring Estonia, Latvia, Lithuania, Belarus, and much of the rest of Ukraine (the *Right Bank, *Southern Ukraine, the *Crimea). In the 19th century it acquired Finland, Bessarabia, and much of Poland as well as Caucasia and more of Asia. By 1914 the Russian Empire covered an area of over 21 million sq km (about one-quarter in Europe, the rest in Asia).

The origins of Russia lay in the basin of the Oka and the

EXPANSION OF THE RUSSIAN EMPIRE IN EUROPE

upper Volga rivers, where the Slavic and Finnic areas of settlement met. There the principality of Suzdal-Vladimir emerged as part of Kievan Rus' in the late 11th century. The country's origins in the Kievan Rus' state account for both its modern name (Russia was a Latin name frequently used for Rus') and the Russian claim to the Kievan legacy. Under Prince *Yurii Dolgorukii (ca 1125–57) the principality of Suzdal-Vladimir grew in importance, and Yurii made a bid to win the Kievan throne and thus become its grand prince. His son, *Andrei Bogoliubskii (1157–74), even sought to replace Kiev as the center of the Rus' land with his own capital, Vladimir-on-the-Kliazma; to that end he waged war on Kiev in 1169, and his army plundered the city ruthlessly. Suzdal-Vladimir was involved in a second sack of Kiev in 1203.

By the beginning of the 13th century the rulers of Suzdal-Vladimir, with a territory of about 230,000 sq km and a population of about a million, were titling themselves 'grand prince.' The invasion of the *Tatars increased the importance of the principality, because Kiev was thoroughly weakened after the Tatars sacked the city in 1240, and because the Golden Horde conferred the title 'grand prince' on the rulers of Suzdal-Vladimir. Moreover there was some emigration from the Ukrainian principalities to this northern principality because of its distance from the Tatars. In 1299 the metropolitan of Kiev transferred his residence to Vladimir-on-the-Kliazma.

Nevertheless, by the end of the 13th century Vladimir was being surpassed in importance by two other cities in the principality, Moscow (first mentioned in the chronicles in 1147) and Tver. Those became the centers of two new principalities. The Muscovite principality flourished under the two grand princes Ivan Kalita (1328–41), who transferred the residence of the metropolitan of 'all Rus'' from Vladimir to Moscow (1328), had his title confirmed by the Mongol khan (1328), and extended his influence to Novgorod, Pskov, and other northern principalities, and Dmitrii Donskoi (1359–89), who conquered Tver (1375) and defeated a Mongol army at Kulikovo Pole (1380). Moscow continued to extend its influence among the other northern principalities through the early 15th century. It also exercised some attraction for Ukrainian and Belarusian boyars in Lithuania, which was falling under Polish domination.

Muscovite expansionism reached unprecedented heights during the reign of Grand Prince Ivan III (1462–1505). In that period Muscovy annexed the principalities of Yaroslavl (1463), Rostov (1474), and Tver (1485) as well as the Viatka territory (1489) and the greater part of the principality of Riazan. The greatest acquisition of Ivan III, however, was Novgorod (1471–89), a rich and huge polity that the ruler thoroughly integrated into the Muscovite state (using such methods as extensive executions and the mass deportation of the city's original population). By the early 16th century Moscow ruled over a territory approaching 3 million sq km in area and had become fully independent of Mongol suzerainty (1480).

Coinciding with the rapid expansion of Muscovy in the late 15th century was the development of an imperial ideology. Muscovy had already become an autocratic and centralist state. Ivan III, who married the niece of the last Byzantine emperor, began from time to time to call himself tsar (caesar), a title implying imperial aspirations. The Muscovites came to feel that they were superior to the

Greeks, who in their view had fallen from the true faith by agreeing to the Church Union of *Florence (1439), and who moreover had fallen under Muslim Turkish rule. The Russian church asserted administrative independence from Constantinople in the 1440s (after rejecting the Florentine union), and that independence was abetted by the fall of the Byzantine capital to the Ottomans in 1453. In the early 16th century the Pskovian monk Filofei codified the theory that Muscovy had now become a *Third Rome, heir to the imperial and orthodox Christian traditions of the lapsed Roman and Byzantine empires. Moreover, in the 1450s Muscovy first began to lay official claims to Kiev and the Kievan inheritance (in the *Vita* of Dmitrii Donskoi); those claims were to be developed further in succeeding decades, as Muscovite territorial aggrandizement became represented as the 'gathering together' of the 'lands of Rus'. In 1493 Ivan III assumed the title 'sovereign of all Rus'' (*gosudar' vseia Rusi*).

Muscovy had begun to contend with Lithuania for some lands of Rus' in the 1360s, and the conflict escalated during the reign of Grand Prince Vasiliĭ I (1389–1425). But the conflict acquired new dimensions after Lithuania united with Poland (1385), and Muscovy had begun to perceive itself as the natural heir to the lands of the former Kievan Rus'. Muscovy and Poland-Lithuania struggled over Tver and Novgorod from 1449 to 1485, and in 1487–1537 they joined battle in a series of wars over Belarus and Ukrainian territories. In the course of the latter struggles Moscow frequently allied itself with the Crimean Tatars, who with Muscovite encouragement attacked Ukraine repeatedly and wreaked large-scale devastation. The Tatar sack of Kiev in 1482, undertaken at the instigation of Ivan III, was particularly brutal. In the course of those conflicts Muscovy managed to incorporate the Ukrainian principalities of Starodub and Novhorod-Siverskyi (1503–17).

Muscovy had avoided conflict with Poland-Lithuania during the mid- and late 16th century. But when Muscovy was plunged into a deep succession crisis during the so-called Time of Troubles (1598–1613), Poland-Lithuania seized the opportunity to intervene in Muscovy's affairs and attempted to place its own candidate on the throne of Moscow. Ukrainian Cossacks took part in Polish military campaigns against Muscovy. Although Muscovy recovered from its troubles in 1613, when the *Romanov dynasty was installed, Poland renewed hostilities in 1617 and won back Starodub and Novhorod-Siverskyi (according to the Armistice of Deulino in 1618). War broke out again in 1632 but brought no substantial change; the Polianovka Peace Treaty of 1634 essentially confirmed the agreement of 1618. The Polish-Lithuanian campaigns of the early 17th century mark the apogee of Polish eastward expansion; thereafter Poland-Lithuania went into decline, and Muscovy began to take its place as the greatest power in Eastern Europe.

In the late 16th and early 17th centuries some Ukrainians began to look to their Orthodox coreligionists in Muscovy for help in the struggle against the Catholic Poles and the Muslim Tatars. In the 1580s and 1590s Ukrainian delegations traveled to Muscovy to obtain contributions for their churches. In 1625 the Kievan metropolitan Y. Boretsky even appealed to the Muscovite tsar to take Ukraine under his protection. In 1556–9 Prince D. Vyshnevetsky and the Zaporozhian Cossacks undertook joint campaigns with Russian Cossacks, and Vyshnevetsky

even formally entered Muscovite service and traveled to Muscovy. In the early 1590s Muscovy gave some material assistance to the anti-Polish Cossack uprising led by K. *Kosynsky; after the uprising was suppressed, many of the Cossacks fled to Muscovite-held Slobidska Ukraine, a pattern that was to be repeated in the early 17th century. In 1620 Hetman P. Sahaidachny sent a delegation to Moscow to try to enlist its co-operation in a campaign against the Crimean Tatars.

Beginning in the late 16th century Ukraine underwent a cultural renaissance that was to have a major impact on Muscovy by the mid-17th century. Kiev, especially after the founding of the *Kievan Mohyla College (later Academy) in 1632, became an important center of learning and the intellectual capital of the entire Orthodox world. The wide-ranging liturgical reforms of Patriarch Nikon of Moscow (1652–66) drew heavily on Kievan, as well as Greek, scholarship, and M. Smotrytsky's Slavonic grammar (1619; repub in Moscow in 1648 and 1721) influenced the development of a Russian literary language. Ukrainian influence on Russian culture became especially pronounced after 1654, when much of Ukraine came under Moscow's suzerainty.

Ukraine's entrance into the Russian sphere of political influence came as an unexpected result of the Cossack uprising against the Polish-Lithuanian Commonwealth initiated by Hetman B. *Khmelnysky in 1648. Seeking a strong ally in his cause, Khmelnysky began as early as 1649 to petition the Muscovite tsar for his protection. Muscovy was reluctant to renew war with the Polish-Lithuanian Commonwealth, but eventually, under the influence of Patriarch Nikon, the tsar decided to aid the Cossacks. The legal relationship between Ukraine and Muscovy was established by the *Pereiaslav Treaty of 1654, the original text of which has not survived, and the intent of which has been the subject of widely differing interpretations by Ukrainian, Russian, and Polish historians. Khmelnysky, however, fell out with the Russians in 1656, when they made a separate peace with the Poles (but he did not formally break with them before his death in 1657). His successor, Hetman I. Vyhovsky, repudiated the relationship with Muscovy and entered into the Treaty of *Hadiache with Poland in 1658. War over Ukraine between Poland-Lithuania and Muscovy broke out anew, with Turkey also intervening. Ukrainian Cossacks joined the hostilities, often divided among themselves and often changing sides. The devastating warfare lasted until the Treaty of *Andrusovo of 1667, which in effect partitioned Ukraine between the contestants. Left-Bank Ukraine (the *Hetman state or Hetmanate) and Kiev became part of the Muscovite sphere of influence; Right-Bank Ukraine (and Galicia) remained under Polish rule. The partition was confirmed by the *Eternal Peace of 1686, signed by Muscovy and Poland.

In the course of those decades of strife (known as the *Ruin in Ukrainian historiography) the Muscovites took measures to limit the autonomy of the Hetman state. In particular Muscovy concluded several agreements (called articles) with the Cossacks, in which the terms of the Pereiaslav Treaty were restated in such a way as to restrict Ukrainian rights. Hetman I. Briukhovetsky was induced to sign the *Baturyn (1663) and *Moscow (1665) articles, which curtailed the hetman's authority and increased that of the tsar and his administration. The *Hlukhiv Articles

(1669) restored some of the Hetman state's prerogatives, but the *Konotip (1672) and *Kolomak (1687) articles again limited them. The Russian government particularly insisted on reducing and in fact eliminating the hetman's right to conduct foreign policy. In 1663 the *Little Russian Office was established as a link between the Muscovite administration and that of the Hetman state.

During the same period the Ukrainian Orthodox church was subordinated to the Muscovite church. The Kiev metropolitan S. Kosiv (1647–57), who had been reluctant to swear an oath to the tsar in 1654, favored retaining the Ukrainian church under the jurisdiction of the distant Patriarch of Constantinople. In spite of promises that Ukrainian ecclesiastical independence would be respected, the Russian authorities took advantage of internal dissension in the Ukrainian church to place it under the jurisdiction of the patriarchate of Moscow (est 1589). The formal request for that subjugation was made at a church council headed by Metropolitan H. Sviatopolk-Chetvertynsky in 1685. The Patriarch of Constantinople, faced with strong Russian political pressure, agreed to the new order in 1686.

The erosion of Ukrainian autonomy was accelerated during the reign of Tsar *Peter I, a centralizer who formally adopted for his state the name Russia (Rossiia) and proclaimed it an empire (1721). Aiming to establish access to the Baltic, he waged the Great Northern War (1701–21) against Sweden. In the course of the war he requisitioned men and provisions from Ukraine, thereby greatly burdening the country, and strove to integrate the Cossacks more completely into Russia's armed forces. Those measures prompted Hetman I. *Mazepa to turn against Peter and join forces with the Swedish king Charles XII in 1708. The Russian forces responded by destroying the Hetman state's capital of Baturyn in 1708 as well as the *Zaporozhian Sich in 1709 (both were rebuilt several decades later). Mazepa and Charles were decisively defeated at the Battle of *Poltava in 1709. To avoid a repetition of the Mazepa defection a tsarist resident was attached to the hetmancy as of 1709. After the death of Hetman I. Skoropadsky in 1722, Peter left the office of the hetman vacant. In 1722 Peter also replaced the hetmancy resident and the Little Russian Office with the *Little Russian Collegium. The Collegium assumed much greater powers than the Office had held and in fact controlled the Ukrainian administration. It even began to collect direct taxes. Acting Hetman P. Polubotok protested the activities of the Collegium (*Kolomak Petitions of 1723) and died in prison for

Gov-Gen Petr Rumiantsev's design for the new Russian state seal for relations with Ukraine

his pains (1724). In his transformation of Russia Peter initiated massive building projects; as a result thousands of Ukrainian Cossacks and peasants perished in the construction of canals and fortresses and in the building of the new capital of St Petersburg. Peter also regulated Ukrainian trade to the advantage of Russian rather than Ukrainian *merchants.

Ukrainian cultural influences were pronounced in Russia during the late 17th and early 18th centuries. Because of their relatively high level of education and their Western European cultural orientation, Ukrainians who sought careers in Russia were generally successful. They had a profound and formative influence on the emerging Russian educational system. Peter I often relied on Ukrainian intellectuals to provide leadership in various reforms. Especially prominent roles were played by the Ukrainian clergymen T. Prokopovych and S. Yavorsky in the tsar's church reform, which replaced the office of patriarch with the Holy Synod and subordinated the Russian Orthodox church to the state. Ukrainian writers, painters, directors, actors, and architects contributed to the diffusion of baroque culture in Russia.

In 1727 Tsar *Peter II (1727–30), under the influence of his adviser Prince A. *Menshikov, abolished the Little Russian Collegium and allowed a new hetman to be elected, D. Apostol. Apostol's relations with the Russian government were regulated by the Authoritative Ordinances (Reshitelnye Punkty) issued by the tsar in 1728. After the death of Apostol in 1734, Empress Anna Ivanovna (1730–40) refused to allow the election of a new hetman. Instead a *Governing Council of the Hetman Office, consisting of three Russian officials and three Cossack officers, administered Ukraine. Empress *Elizabeth I (1741–62) permitted the restoration of the hetman's office, and in 1750 the Governing Council was abolished. K. Rozumovsky was elected hetman, although he spent much of his reign fighting a rearguard action to defend Ukrainian autonomy.

The Hetman state lost its remaining autonomy when it was dismantled and Left-Bank Ukraine integrated directly into the Russian Empire during the reign of *Catherine II (1762–96). In 1764 she forced Hetman Rozumovsky to resign and abolished the office of hetman permanently. She reconstituted the Little Russian Collegium with General-Governor P. *Rumiantsev as president; it lasted until 1786, by which time Ukraine was so integrated into the imperial administrative system that a separate Little Russian administrative office was no longer necessary. In 1775 Catherine ordered the Zaporozhian Sich destroyed. In 1782 a *gubernia structure completely replaced the Ukrainian regimental system. Catherine induced the *Cossack *starshyna* to acquiesce in the eradication of Ukrainian autonomy primarily through material incentives. In 1783 she officially sanctioned serfdom in Ukraine, and in 1785 she made the Cossack *starshyna* equal to the Russian *nobility (*dvorianstvo*). Nonetheless some autonomist sentiment survived among the Cossack gentry into the 19th century.

One of the achievements of Catherine's reign was the rolling back of the Ottoman Empire through a series of successful *Russo-Turkish wars (1768–92) and the acquisition of the northern coast of the Black and Azov seas, including the Crimean Peninsula. That large territory, known as *New Russia, was sparsely inhabited, and Catherine charged its governor-general, G. *Potemkin, with the responsibility of finding colonists for it. Germans

as well as Slavs and Greeks from the Balkans were encouraged to relocate there, and numerous new settlements were established, including the major port city of Odessa (1794). Catherine also intervened in the internal affairs of neighboring Poland, as her predecessors had done throughout the century. At first her agents helped provoke and then her troops crushed the great *haidamaka uprising of 1768 (*Koliivshchyna), which plunged Right-Bank Ukraine into chaos. That episode was a prelude to the partitions of Poland (1772–95), by which Russia annexed the Right Bank up to the Zbruch River. Thus, by the end of the 18th century approx 85 percent of Ukraine had come under Russian rule; only the Western Ukrainian territories of Galicia, Transcarpathia, and Bukovyna were under the Habsburg rather than the Romanov scepter. That state of affairs was to last, with only temporary and minor changes, until 1917. At the end of the 18th century the Russian Empire had a territory of 14.5 million sq km and a population of over 36 million.

Ukrainians continued to contribute to the cultural life of Russia in the mid- and late 18th century. K. Rozumovsky presided over the Russian Academy of Sciences. Other prominent Ukrainians working in Russia in the late 18th century included the composers and directors D. Bortniansky and A. Vedel, who influenced the development of Russian choral music; the court singer and publisher of folk songs V. Trutovsky; the singer M. Poltoratsky; the painters V. Borovykovsky and A. Losenko; the portraitist D. Levytsky; the sculptor and rector of the St Petersburg Academy of Arts I. Martos; the Russian-language writer I. Bogdanovich; the editor of *Sankt-Petersburgskii vestnik* H. Braiko; the men of letters and civil servants M. Antonovsky, V. Ruban, and F. Tumansky; the jurist and professor at Moscow University S. Desnytsky; and the imperial chancellor O. Bezborodko.

By the 19th century the Russian Empire had almost wholly dismantled the political and military institutions of Ukraine, eliminated from the Right Bank the last vestige of Ukraine's separate legal code (the Lithuanian Statute) in 1840, and largely assimilated Ukraine's elite as part of the Russian nobility. Ukraine was not treated as an entity in itself; it was regarded as a region and administered as nine gubernias. Western ideas and trends no longer flowed from Ukraine to Russia, as in the 17th and 18th centuries, but from Russia to Ukraine. The most telling sign of Ukraine's subordinate status was the development of a mind-set of cultural inferiority (a common trait of colonial peoples) among many Ukrainians – *malorossistvo* or the *Little Russian mentality.

The 'Great Russians' dealt with their Little Russian 'brothers' as subordinates. Although they regarded Ukrainians as their blood relations and rejoiced in the fact that they had become part of their body politic, they clearly did not regard Ukrainians as their social, cultural, or political equals. As Ukraine had in fact been reduced to provincial status, Ukrainians increasingly began to be seen as less sophisticated. The folk arts, foods, dance, and music of Ukraine became celebrated within the empire, but the notion that Ukrainians could sustain any serious cultural undertakings of their own was commonly dismissed as nonsense. Moreover the Russians did not differentiate between their own ethnic territory and that of Ukraine. They regarded Ukraine as part of one whole, an integral and indivisible part of the empire. Any sugges-

tion on the part of Ukrainians that they constituted a distinct people or territory was greeted with hostility. People holding such opinions were regarded as treacherous 'Mazepists,' and the imperial authorities were always alert to signs of 'separatist' tendencies among Ukrainians.

The fondness with which Russians regarded Ukraine, and conversely their virulent attitude toward any notion of autonomy for Ukraine, were motivated by certain economic and geopolitical considerations. The total absorption of Ukraine by the Russian state had given the empire a strong agricultural base that virtually eliminated the threat of periodic famine and provided valuable products for export. In the later 19th century the development of the *Donets Basin (Donbas) provided for the growth of industry. The access to the Black Sea that followed the acquisition of Ukraine's Black Sea littoral gave the empire warm-water ports. The presence of Ukraine substantially increased the size of the empire's Slavic 'heartland' and strengthened the empire's perception of itself as a European rather than a Eurasian power.

During the reigns of Emperors *Paul I (1796–1801) and *Alexander I (1801–25) a Ukrainian national revival, similar in character to those of other East European peoples of that era, began in the Russian Empire. The vernacular Ukrainian language appeared in literature (I. *Kotliarevsky, 1798), a grammar of the language was written by A. Pavlovsky, histories of Ukraine circulated in manuscript form (**Istoriia Rusov*) and appeared in print (D. Bantysht-Kamensky's *Istoriia Maloi Rossii* [History of Little Russia, 1822]), and a university was founded in Kharkiv (1805) with much support from local patriots (especially V. *Karazyn). A new generation of patriotic Ukrainian intelligentsia began to emerge from among the gentry of the Left Bank, largely descendants of the Cossack *starshyna*.

During the course of the Napoleonic Wars there were some minor territorial changes affecting Ukrainian lands under Russian rule. The Ternopil district was temporarily annexed by Russia from 1809 until 1815, when it was returned to Austria. In 1812 Russia acquired Bessarabia with its substantial Ukrainian population. In 1815 the Kholm region became part of the Congress Kingdom of Poland, which was an autonomous part of the Russian Empire.

Throughout the first half of the 19th century Ukrainians continued to contribute to Russian culture and to imperial administration. The outstanding Russian writer N. *Gogol was a Ukrainian. Other Ukrainians who wrote in the Russian language and earned a place in the history of Russian literature were N. Gnedich and V. Kapnist. Ukrainians prominent in Russia's intellectual and political life also included the minister of justice D. Troshchynsky, the minister of internal affairs V. Kochubei, the minister of education P. Zavadovsky, and the bibliographer and journalist V. Anastasevych. A number of Ukrainian emigrants from Transcarpathia also made careers in Russia in the early 19th century, including the Slavist Yu. Venelin, the philosopher P. Lodii, the economist and lawyer M. Baluhiansky, and the physician I. Orlai.

In the same period some of the more significant political developments within the Russian Empire unfolded in whole or in part on Ukrainian soil. Many Ukrainians belonged to the revolutionary *Decembrist movement, which was opposed to both tsarist absolutism and serfdom. The primary Decembrist organization in Ukraine was the *Southern Society. The *Society of United Slavs,

which unlike the Southern Society sought the establishment of a Slavic federal republic, nonetheless merged with it in the fall of 1825. Also connected with the Decembrist movement was the *Little Russian Secret Society, which had a shadowy existence; it is said to have called for the erection of an independent Ukrainian state. Another manifestation of revolutionary ferment in the Russian Empire was the unsuccessful *Polish Insurrection of 1830–1, which encompassed Right-Bank Ukraine. The suppression of the Polish insurrection had a number of repercussions for Ukrainians. Some Polish revolutionaries decided that they had been defeated because of a lack of popular support, especially among the peasantry. That conviction gave rise to an interest in and sympathy with the Ukrainian people on the part of democratically inclined representatives of the Right-Bank gentry. Also, in the aftermath of the insurrection Tsar *Nicholas I (1825–55) took measures to eliminate Polish and strengthen Russian influence in the Right Bank and Kiev: in 1835 Kiev's right of *Magdeburg law was rescinded; in 1839 the Uniate church in Belarus and Right-Bank Ukraine was abolished and replaced by the Russian Orthodox church; and in 1834 the *Kremianets Lyceum was closed and Kiev University established. Some of the government's efforts to promote Russification actually contributed to the development of the Ukrainian national movement. For example, to collect documentation showing that the Right Bank was an ancient Russian land, the government established the *Kiev Archeographic Commission in 1843; the commission, however, gave employment to some of the most outstanding representatives of the Ukrainian movement and published dozens of volumes of sources for Ukrainian history. In 1845–6 the Ukrainian movement in the Russian Empire assumed an overt political dimension with the emergence in Kiev of the *Cyril and Methodius Brotherhood, a secret society that advocated the establishment of a Slavic federal republic (with its capital in Kiev) and the abolition of serfdom.

Ukrainians participated in the military actions of the empire in the mid-19th century. In 1849 the tsar sent troops to put down the Hungarian insurrection (see the *Revolution of 1848–9 in the Habsburg monarchy); his army, which included many Ukrainian soldiers, passed through Bukovyna and Galicia and encamped for some months in Transcarpathia. In 1853–6 Russia fought Turkey and its Western European allies in the *Crimean War. The war put a great strain on the Ukrainian population and gave rise to peasant unrest, including the movement of the *Kiev Cossacks in 1855.

Defeat in the Crimean War and the growth of discontent throughout the empire forced the new tsar, *Alexander II (1855–81), to initiate a series of reforms, including the abolition of serfdom (1861) and the establishment of municipal self-government through the *zemstvo. The new, liberal atmosphere within the empire allowed the Ukrainian movement to revive; the former members of the Cyril and Methodius Brotherhood put out the journal **Osnova* in St Petersburg (1861–2), and students founded the *Hromada of Kiev in 1859. The reform momentum was halted, however, after the failed *Polish Insurrection of 1863–4. The insurrection had been preceded by Polish student ferment, especially at Kiev University. Some of the Polish students there, led by V. Antonovych, began to identify with the Ukrainian people and adopted Ukraini-

an nationality; most of those **khlopomany* (peasant-lovers) refused on principle to take part in the insurrection when it broke out in January 1863. But many members of the Right-Bank Polish gentry joined the insurgents, and the insurrection spread very quickly to the territory of Right-Bank Ukraine. The insurrection provoked reactionary and Russian nationalist sentiment in Russian society and in the tsarist government. It was alleged in the press and government circles that the Ukrainian movement was Polish-inspired, and Minister of the Interior P. *Valuev issued a secret circular in 1863 that prohibited the publication of scholarly, religious, and educational works in the Ukrainian language and limited Ukrainian publication exclusively to belles lettres. Also as a result of the insurrection, the institution of the zemstvo was excluded from Right-Bank Ukraine until 1911. The Russian government began an intensive campaign ostensibly to remove Polish influence in the last Uniate eparchy in the Russian Empire, that of Kholm; the campaign ended with the forcible liquidation of the Uniate church there in 1875.

The anti-Polish actions of the Russian government in the 1860s and 1870s favorably impressed many Ukrainians in Austrian-ruled Galicia, where the emperor had just given the Polish gentry a free hand in the political control of that crownland. Deeply embittered, many leading Galician Ukrainians looked to Russia for deliverance from the Poles. *Russophiles were also located in Transcarpathia, where the Magyar gentry was granted even more far-reaching powers in 1867, and where people well remembered that Russian troops had suppressed the Magyar insurgents in 1849. Within Russia itself a growing spirit of *Pan-Slavism encouraged a belief that in time Galicia and Transcarpathia, as lands of Rus', should be 'reunited' with Russia. The Russian government provided Russophiles in Western Ukraine with direct and indirect subsidies.

While promoting pro-Russian sympathies abroad imperial authorities were virulent about containing pro-Ukrainian sympathies at home. In 1876 the government decided to clamp down firmly on a resurgent Ukrainian movement. Tsar Alexander II issued the secret *Ems Ukase, which basically outlawed the use of the Ukrainian language in print, and the authorities simultaneously closed down the *Southwestern Branch of the Imperial Russian Geographic Society and the Ukrainophile newspaper **Kievskii telegraf* and expelled M. *Drahomanov and M. *Ziber from their positions at Kiev University. The Ukrainian movement was thereafter thoroughly persecuted in the Russian Empire. The Ukrainian language was effectively banished from the school system, the courts, and even churches, and Ukrainophiles were in jeopardy of losing their positions or even their freedom. Under those conditions the center of the Ukrainian national movement shifted westward, to Galicia under Austrian rule. During the reign of *Alexander III (1881–94) the only significant achievement of the Ukrainian movement in the Russian Empire was the publication of a Russian-language journal of Ukrainian studies, *Kievskaiia starina* (1882–1907). The intransigence of the tsarist authorities was such that when the Ukrainian movement revived at the end of the 1890s, it assumed a decidedly revolutionary character. Its major representative was in fact the *Revolutionary Ukrainian Party (RUP; est 1900), which initially called for the establishment of a Ukrainian state independent of Russia. RUP

quickly abandoned that aim and embraced a federalist program, such as had been traditional for Ukrainians in the Russian Empire since the time of the Decembrists.

A major concern of the Ukrainian movement throughout the second half of the 19th century was the problem of the relation of the Ukrainian nationality to the Russian and the relation of both to the legacy of Kievan Rus'. In the late 1850s and 1860s Ukrainian scholars, particularly M. Maksymovych, polemicized with the Pan-Slavist M. Pogodin, who claimed that Kievan Rus' had been Russian and not Ukrainian. The historian M. Kostomarov argued that the differences between the Ukrainian and Russian (in his terminology, Little Russian and Great Russian) nationalities went back to Kievan Rus'; he saw a profound divergence in national character even then, the Ukrainians being democratic and federalist and the Russians autocratic and centralist. The views of Ukrainian scholarship were codified in a 1904 essay by M. *Hrushevsky that squarely opposed the 'traditional' scheme of Russian history. Hrushevsky wrote that the Ukrainians constituted a nation distinct from the Russians and had created the Kievan Rus' state and culture; the Russians appeared on the stage of history only later, as the creators of the Suzdal-Vladimir state.

In 1897 there were over 22 million Ukrainians in the Russian Empire (17.9 percent of the total population), of whom about 20 million lived in Ukrainian ethnographic territory. The Ukrainians living in Russia proper included a large number of Ukrainian peasants who migrated into southern *Siberia in the late 19th and early 20th centuries.

The situation of Ukrainians in the Russian Empire changed dramatically as a result of the *Revolution of 1905. Under the pressure exerted by empire-wide upheaval, including tremendous peasant unrest in Ukraine, mutiny in the Black Sea Fleet, and strikes in Kharkiv, Katerynoslav, and elsewhere, Tsar *Nicholas II (1894–1917) made a number of concessions to the population. The ban on Ukrainian publication was lifted, and Ukrainian newspapers and periodicals proliferated. Branches of the *Prosvita society, co-operatives, and other Ukrainian organizations appeared. Ukrainians were elected to the limited parliament, the State *Duma (see *Ukrainian caucus in the Russian State Duma). Attempts to introduce Ukrainian into the educational system, however, were aborted by the authorities. By 1907 the revolutionary momentum had been broken, and the tsarist authorities again began to persecute the Ukrainian movement, although they were not able to return to the status quo before 1905. In particular, Ukrainian publishing continued to exist, although it was prevented from developing as dynamically as it could have in a more favorable environment. In the aftermath of the revolution the imperial court and conservative circles gave support to the extreme Russian chauvinism of the *Black Hundreds, who were also active in Ukraine.

In the late 19th and early 20th centuries Ukrainians continued to play a vital role in Russian culture and society. Drahomanov, in addition to his work in the Ukrainian sphere, was an important figure in Russian journalism and political thought; in particular, he was a founding father of Russian liberalism. Another Ukrainian proponent of Russian liberalism was M. Mohyliansky, an active constitutional democrat in St Petersburg before 1917. O. Bodiensky, a professor at Moscow University, did much to

develop Slavic studies in Russia. B. Kistiakovsky was an outstanding jurist and sociologist who taught in Moscow and edited an important legal journal there. The outstanding scientist V. Vernadsky, who became the first president of the Ukrainian Academy of Sciences in 1918, had been a professor at Moscow University before the revolution.

When the First World War broke out, the tsarist government closed down many of the existing Ukrainian publications and arrested Hrushevsky, the Ukrainian movement's most prominent representative. During the course of the war Russia twice occupied Galicia and Bukovyna, where it ruthlessly persecuted the local Ukrainian movement and harassed the *Ukrainian Catholic church. The war put such a strain on the empire that in March 1917 the tsar abdicated, and power passed to the *Provisional Government. Also in March the *Central Rada was formed in Kiev, and soon it demanded autonomy for Ukraine. The Provisional Government was reluctant to recognize Ukrainian autonomy and did so only under great pressure in July 1917. In November 1917, after the Bolsheviks seized power from the Provisional Government, the Rada proclaimed the *Ukrainian National Republic (UNR), which was formally in federation with Russia. In December 1917, however, the UNR waged war on Soviet Russia. In January 1918 the UNR broke all ties with Russia and declared itself an independent state. The *Ukrainian-Soviet War that followed was largely a contest between Ukrainian independence forces and Soviet Russian armies. The contest was complicated by the presence of a large contingent of imperial loyalist troops (the Volunteer Army) headed by A. *Denikin, who viewed Russia as 'one and indivisible' and wished to restore the empire to its prerevolutionary boundaries. By 1920 most of Ukraine was under Soviet rule and factually, if not juridically, under Russian domination. In December 1922 Soviet Ukraine entered into federation with Soviet Russia and other Soviet republics as part of the Union of Soviet Socialist Republics. (For the history of Ukraine's relations with Russia since 1918 see *Union of Soviet Socialist Republics.)

Ukrainians in Russia, 19th and 20th centuries. The first indication of the number and geographic distribution of Ukrainians in Russia was provided by the census of 1897 (the surveys of 1795 did not provide a breakdown by nationality), but the data provided by that census are not accurate. Many Ukrainians were listed as Russians, and figures were given only for each county. In 1897-1914 there was a large flow of Ukrainian emigrants to beyond the Urals (about 1.5 million Ukrainians settled in Russian-ruled Asia at that time) and to eastern Subcaucasia. The number and distribution of Ukrainians in Russia just prior to the First World War were, therefore, substantially different from what the figures of 1897 would suggest. In 1915-26, emigration from Ukraine ceased almost entirely, so the prewar situation actually corresponds more closely to the situation revealed by the data gathered in the 1926 census (if substantial fatalities due to war, civil war, influenza, and typhoid are allowed for).

According to the 1897 census 22,380,000 Ukrainians lived in the Russian Empire, of whom 20,160,000 (90.1 percent) dwelt in Ukrainian ethnographic territories, 670,000 (3 percent) in regions bordering on those territories, and 1,560,000 (6.9 percent) elsewhere. Of those who dwelt elsewhere, 1,020,000 were listed as residents of European Russia, and 209,000 of Asian (not including Subcaucasian

Russia. The actual number of Ukrainians on ethnic borderlands and on primarily Russian ethnic territory was higher.

Ukrainian-Russian ethnic borderlands included eastern Subcaucasia, the Crimea, and the northern Chernihiv region. Eastern Subcaucasia consists of the eastern section of Kuban oblast (the Batalpashinsk, Labinsk, and Maikop districts), where there were 204,800 Ukrainians (25.4 percent of the local population); Stavropol oblast, where there were 319,000 Ukrainians (36.6 percent); Black Sea gubernia, 9,300 Ukrainians (19.1 percent); Terek oblast, 42,000 Ukrainians (4.5 percent); and the Salske district of Don oblast, 22,400 Ukrainians (31 percent). According to the 1897 census there were a total of 798,000 Ukrainians (21.8 percent) in eastern Subcaucasia, and virtually all of them lived in rural settlements. (See also *Don region, *Kuban, *Stavropol region, and *Terek region.)

The 1897 figures for the Crimea suggest that only 65,000 Ukrainians (11.8 percent) resided there (with Tatars making up 35.5 percent, Russians, 31.7 percent, and others, 21 percent), but their number was probably higher. Subsequently a greater number of Ukrainians than Russians settled there and made the Crimea an ethnically mixed Ukrainian ethnographic territory. (See also *Crimea.)

The 1897 census counted only 500 Ukrainians (0.1 percent of the local population, compared to 72 percent Russian and 24 percent Belarusian) in the northern Chernihiv region (in Starodub, Mglin, Novozybkiv, and Surazh counties), on the Ukrainian-Belarus border. The actual number was probably much higher, since in 1926, 125,000 were listed as Ukrainians (14.1 percent of the total). (See also *Chernihiv region.)

The 1,020,000 Ukrainians who lived in European Russian ethnographic territories were concentrated in the Ukrainian oases near the Ukrainian ethnographic territory, northern Slobidska Ukraine (the Voronezh and Kursk regions), and the Don region; large Ukrainian settlements in the Volga Basin; and smaller outposts in the Urals. The latter two areas were situated on the eastern borders of the Russian ethnographic territory. In other sections of European Russia Ukrainians constituted less than 0.1 percent of the local population.

In northern Slobidska Ukraine the population was predominantly Russian, but 225,000 Ukrainians lived near the Ukrainian ethnographic territory. Of that number 180,000 resided in Kursk gubernia (in Belgorod, Oboian, Staryi Oskol, Putyvel, Sudzha, and Novyi Oskol counties) and 45,000 in Voronezh gubernia (in the Bobrov, Korotoiak, Novokhopersk, Valuiky, and Pavlovske districts). In those areas Ukrainians constituted 4-15 percent of the population and lived almost exclusively in rural settlements. Ukrainians were almost entirely absent from the northernmost regions of the two gubernias. (See also *Slobidska Ukraine.)

About 65,000 Ukrainians lived, primarily in villages, in the eastern end of Don oblast (in the Koper, Ust-Medveditskaia, and Don districts and in sections of the Cherkassk, Rostov, and Donets districts), where they made up 7-12 percent of the population. There was also a substantial number of Ukrainians, however, in the major cities of the oblast, including Rostov-na-Donu (5,000, or 4.7 percent) and Novocherkassk (2,600, or 5 percent). The western section (the Sal district) of Don oblast formed part of ethnographically mixed Ukrainian-Russian eastern

Subcaucasia, where Ukrainians constituted a majority.

The largest Ukrainian colonies were in the Volga Basin. They were established mainly in the 18th century and then supplemented by additional waves of immigrants. Large oases of Ukrainians lived on both banks of the Volga, and by the late 19th century they served as a link between the Ukrainians living in Ukrainian European territories and those living in settlements in Asia. According to the census of 1897, 392,000 Ukrainians lived in the Volga Basin (7,000 of them in cities). In Astrakhan gubernia the census found 133,000 Ukrainians, or 13.3 percent of the local population. By county the distribution was as follows: Tsarev county, 75,600, or 38.2 percent; Chernyi Yar, 40,900, or 40.8 percent; and Enotaevsk, 13,700, or 18 percent. There were 149,000 Ukrainians in Samara gubernia, where they constituted 6.2 percent of the local population. By county the distribution was as follows: Novouzensk, 70,000, or 17 percent; Nikolaevsk, 18,800, or 3.5 percent; Buguruslan, 10,400, or 2.6 percent; and Buzuluk, 9,500, or 2 percent.

A far smaller proportion of Ukrainians lived in the Urals, where Ukrainian settlements were established in the 18th and 19th centuries. Concentrations of Ukrainians lived in Orenburg gubernia (42,000, or 2.6 percent of the local population; by county: in Orenburg, 28,400, or 6 percent, and in Orsk, 8,600, or 4.5 percent) and in Ufa gubernia (5,000, or 0.2 percent of the local population, distributed in Belebei, Sterlitamak, and Ufa counties). In the Urals Ukrainians lived in regions inhabited by Russians, Finns (Mordovians), Tatars, and Bashkirs. (See also *Urals.)

According to the 1897 census there were only 34,000 Ukrainians in the rest of European Russia (central, eastern, and northern, including Belarus), where they made up less than 0.1 percent of the local population. Of that number 23,000 lived in cities, and small groups lived in villages in Elets county of Orel gubernia and in Borisoglebsk county of Tambov gubernia. The census indicated that the largest centers of Ukrainian population were St Petersburg (5,200) and Moscow (4,500). Other cities with a Ukrainian population of over 1,000 included Kursk (2,000), Kaluga (1,300), Mahiliou (1,200), Saratov (1,200), Tsaritsyn (1,100), and Tver (1,000). The actual number of Ukrainians in those regions was much higher. According to the census of 1920 there were 39,200 Ukrainians in European Russia, and according to the census of 1926, 84,000.

(For figures on Ukrainian population and distribution in Asia, see *Far East and *Siberia.)

There is little information about the life of Ukrainians in Russia, apart from the communities in *Moscow and *St Petersburg, which were important centers of Ukrainian cultural (particularly in the early 20th century), community, and political life. St Petersburg was also an important center of Ukrainian studies, as well as of literature and art.

Russian Communist Party (Bolshevik). See Communist Party of the Soviet Union.

Russian Empire. See Russia.

Russian Executive Committee (Russian: Russkii ispolnitelnyi komitet). A political association of Galician Russophiles established in Lviv in December 1918. It supported the Hetman government in eastern Ukraine and approved of the idea of a federation with a revived Russia ruled by the Whites. The committee's organ was the renewed **Prikarpatskaia Rus'*. Its leading members were prominent Galician Russophiles, such as V. Kurylovych, D. Markov, M. Tretiak, and E. Valnytsky. It co-operated with the Ukrainian *Interparty Council and boycotted the 1922 elections to the Polish parliament. In 1923 the committee split into the socialist pro-Soviet People's Will party, which later joined the Sel-Rob party, and the conservative Galician-Russian People's Organization, which enjoyed the support of the Polish government and was given control of institutions such as the People's Home in Lviv and the Stauropigion Institute. From 1929 to 1931 the People's Organization was divided into two groups, the Russian Agrarian party and the Russian Peasants' Organization.

Russian Foreign Trade Bank (Russian: Russkii bank dlia vneshnei trgovli). One of the largest joint-stock banks in the Russian Empire, established in St Petersburg in 1871. Its major shareholders were the Deutsche Bank and several other German banks. In 1914 its assets exceeded 400 million rubles. The bank financed mainly foreign and domestic trade, although it also acquired some interests in heavy industry and sugar refining in Ukraine. In 1914, of its 66 branches 17 were located in Ukraine, where it played a major role in financing the grain and sugar trades. In 1917 its rival, the *Russian Trade and Industry Bank, gained a controlling share of it. The Soviet government of Russia nationalized it at the end of 1917, and the Soviet government of Ukraine at the beginning of 1919.

Russian language in Ukraine. The linguistic contacts involved in the political, ecclesiastical, literary, and commercial relations and population transfers between the principalities of Kiev, Chernihiv, Halych, and Volodymyr-Volynskyy and the northern Rus' principalities of Novgorod, Rostov, Suzdal, and Pereiaslavl during the medieval period have not been studied. Nor have Russian-Ukrainian relations in the Lithuanian-Ruthenian pe-

riod, and particularly during Moscow's rule over the Chernihiv region (1503–1618), been examined. Discounting the Russian garrison stationed in Kiev from 1654, the first substantial Russian settlements in Ukraine (mainly of *Old Believers) arose in the northern Chernihiv region in the second half of the 17th century. From there they spread in the 18th and 19th centuries to Right-Bank and Southern Ukraine. Another branch of Old Believers, the followers of I. Nekrasov, settled in the Danube Delta in the 1770s and then migrated to Austrian-ruled Bukovyna and the Khotyn area in the 1780s. In the late 1950s V. Stolbunova and V. Kuznetsov studied their dialects in the Chernivtsi oblast villages of Bila Krynytsia, Bilousivka, and Lypovany. Because of their religious isolation from the Ukrainian milieu, their original dialects (mostly southern Russian and some central Russian) were relatively little affected, and then mostly in vocabulary, by the Ukrainian language.

Ukrainian settlers came into contact with Russian rural colonists in Slobidska Ukraine in the 17th century and in Southern Ukraine in the late 18th century. Except for those living in compact colonies, most of the Russian Old Believers, serfs, military settlers, and refugees were assimilated by the dominant Ukrainian peasantry. In the process the Ukrainian Steppe and Slobidska Ukraine dialects were influenced to varying degrees by Russian (eg, the arrested change of *o* into *i* and the transition of stressed *e* into 'o, sporadic *akan'e*, forms such as *na ruk'i* [Russian: *na ruké*, Ukrainian: *na rucí*] 'on the arm', and dual forms of masculine nouns such as *dva hōda* (Russian: *dva gōda*) 'two years'; see also *Steppe dialects). More compact Russian dialectal areas exist in Voznesenka, Vvedenka, and Pavlivka in Artsyz raion, Odessa oblast (brought by settlers from Kursk gubernia); Serhiivka and Uspenivka in Sarata raion (brought from Orel gubernia); the Old Believer village of Velykoploske in Mykhailivka raion in northern Odessa oblast (est over 200 years ago); among the Old Believers in Vinkivtsi raion in Khmelnytskyi oblast; Piatydub in Malyn raion, Zhytomyr oblast; Rakhvalivka and Krasylivka in Ivankiv raion in northern Kiev oblast; and along the northern littoral of the Sea of Azov. The Kharkiv oblast villages of Velyki Prokhody and Mali Prokhody in Derhachi raion and Ruski Tyshky, Ploske, and Lyptsi in Kharkiv raion belong to the southern group of the south Russian dialects of the Kursk region, but their stress in verbs has been influenced perceptibly by Ukrainian.

Ukraine's lower urban strata and inhabitants of suburbs and workers' settlements in the Donbas and Dnipropetrovske oblast speak a variety of Russified dialects which evolved through the Russification of local Ukrainian residents and the constant influx of Russians, who migrated or were sent to Ukraine. The slang and argot of the Russian lumpen and criminal elements in the large cities (Odessa, Kiev, Kharkiv, Dnipropetrovske, and the cities of the Donbas) became widespread in the Soviet period. They retained their Russian forms as a result of the continual seasonal influx of such elements from Leningrad and Moscow. Some features common to Ukrainian and south Russian are characteristic of this mixed Russian-Ukrainian patois (*surzhyk*): the Ukrainian pronunciation of *h* and the vowels *o*, *e*, *y*, with sporadic *akan'e*; the pronunciation of *e*'/*elje* from etymological *ě*; hardened *r* and labials at the ends of words; iotized pronunciation of groups of the type *vja*, *bja*, *pja*; the hard *č*, *šč*; Ukrainian interword phonetics,

stress, and verbal and prepositional government (eg, *po domax* instead of Russian *po domam* 'in the homes'); lexical Ukrainianisms from everyday life; and the nondifferentiation between the predicate and attribute forms of adjectives. The *surzhyk* of Kharkiv, the Donbas, and Dnipropetrovske oblast has been studied by B. Larin, K. Nimchynov, and V. Shadura respectively. In belles lettres it has been used to depict tsarist military officers (by V. Vynnychenko), burghers (M. Starytsky), the Soviet police (O. Kornichuk), and the lumpen proletariat (V. Vynnychenko, A. Teslenko, I. Mykytenko, L. Pervomaisky, and L. Brasiuk).

Because of Russification pressures, a 'Ukrainian' provincial variant of literary Russian developed among the gentry and intelligentsia in the tsarist period, and among Party functionaries and the technical intelligentsia in the Soviet period. The imperial government attracted Russian civil servants to Ukraine by offering premiums. The Soviet government had forced Ukrainians to take seasonal or permanent jobs in other parts of the USSR and given jobs in Ukraine to non-Ukrainian immigrants. At the same time, Standard Ukrainian has been purged consistently of distinctively Ukrainian features, and the use of *surzhyk* has been tolerated. In 19th-century Galicia and Bukovyna (particularly from 1866 to the 1920s) and in Transcarpathia (until 1945) the periodicals and publications of the *Russophiles promoted a special form of literary Russian known as **yazychiie* among the clergy and, to a lesser extent, the secular intelligentsia. (See also *Russian-Ukrainian linguistic relations.)

O. Horbach

Russian Liberation Army (Russian: *Russkaia osvoboditelnaia armiia* [ROA]). A military formation in the German armed forces during the Second World War. It was organized in 1943 with the approval of the German High Command by Gen A. *Vlasov, a captured Red Army general, from among Soviet prisoners of war held by the Germans. In 1944 control of the ROA was transferred to the SS. In early 1945 the ROA's total strength was approx 200,000,

of which about 40 percent were Ukrainians. The ROA was used by the Germans largely for propaganda purposes; its units were never committed to combat. Some ROA units participated in the anti-German uprising of early May 1945 in Czechoslovakia. At the end of the war many ROA officers and men surrendered to the Western Allies in the hope of escaping Soviet reprisal. Most of them, however, were turned over to the Soviet authorities (see *Repatriation).

Russian Music Society. Formed in St Petersburg in 1859, the society was dedicated to the development of refined musical taste and talent in the Russian Empire. It subsequently established branches in Kiev (1863), Kharkiv (1871), and Odessa (1884). These played a leading role in the music life of each center through the establishment of music schools and the sponsorship of concert programs. In 1913 the society's music schools in Kiev and Odessa were turned into full conservatories. The society was disbanded throughout the Russian Empire in 1917 with the outbreak of the revolution. The activities of the Kiev branch are described in M. Kuzmin's *Zabuti storinky muzychnoho zhyttia Kyieva* (The Forgotten Pages of the Musical Life of Kiev, 1972).

Russian Orthodox church (Russian: Russkaia Pravoslavnaia Tserkov [ROC]). The largest contemporary autocephalous Orthodox church. It is headed by the 'Patriarch of Moscow and All Rus', who chairs the church's highest body, the Patriarchal Synod, which includes as permanent members the metropolitans of Kiev, Leningrad, and Krutitsy. In 1990 the Moscow Patriarch declared its Ukrainian and Belarusian exarchates the Ukrainian Orthodox church and the Belarusian Orthodox church. Although these new entities are granted considerable autonomy, they at present continue as components of the ROC. The synod has departments for administration, external church relations, publishing, economy, education, and other functions. The official organ of the church is the monthly *Zhurnal Moskovskoi patriarkhii* (32,000 copies in 1989). The patriarchate also publishes (since 1989) a weekly newspaper, *Moskovskii tserkovnyi vestnik*, and a monthly digest with the same name, in addition to various church and theological books and collections (eg, irregular collections put out by the theological academies, titled *Bogoslovskie trudy*) and separate journals for its exarchates abroad.

In the USSR in 1989 the ROC had 70 eparchies. Its hierarchy in 1986 comprised 82 individuals: the patriarch, 13 metropolitans, 41 archbishops, and 27 bishops (including 8 serving abroad and 6 retired hierarchs). In October 1989 there were approx 9,700 parishes, served by 8,100 priests and deacons, and 2,400 precentors. Although the number of the church's faithful is difficult to determine, it was estimated in the late 1970s at 30 to 40 million regular worshippers. In 1989 the ROC lost large numbers of believers and parishes in Ukraine to the Ukrainian Catholic, particularly in Galicia, and the Ukrainian Autocephalous Orthodox churches. From the late 1940s until the late 1980s the majority of operating Orthodox churches in the USSR (almost two-thirds) were located within the Ukrainian exarchate of the ROC, renamed the Ukrainian Orthodox church in 1990. In 1989 the ROC established an exarchate for Belarus, renamed the Belarusian Orthodox church in

1990. Outside the USSR the church has the Western European exarchate (based in London), the Central European exarchate (East Berlin), the exarchate of Central and South America (Buenos Aires), an administration for its parishes in the United States (New York) and Canada (Edmonton), spiritual missions in the Holy Land, and a permanent representation at the World Council of Churches in Geneva. Other Russian Orthodox churches outside the USSR (which often number many Ukrainians among their members) retain ties with the ROC, for example, the Autocephalous Orthodox Church in America (formerly the Russian Orthodox Greek Catholic Church in North America). The Russian Orthodox Church outside Russia, however, stands in opposition to the ROC.

The ROC maintains two theological academies (in St Petersburg and Zagorsk, near Moscow) and six seminaries (Zagorsk, St Petersburg, Odessa, and, since 1989, Kiev, Minsk [Zhirovitsky], and Tobolsk). In 1989 the academies graduated 37 full-time and 10 correspondence students; 192 full-time and 81 correspondence students completed study at the three seminaries (60 of them in Odessa). In 1988-9 the ROC was allowed to open five secondary theological schools - in Kishinev, Novosibirsk, Smolensk, Stavropol, and Chernihiv - primarily for the training of precentors. In addition the ROC operates one icon painting school and two women's choral conductor schools (in Moscow and St Petersburg). In October 1989 the ROC had 35 monasteries and convents (in 1980 there were only 16), including the Kievan Cave Monastery, reopened in 1988.

According to the Soviet constitution, the church was separate from the state. In reality, however, the latter closely controlled the former, as it did all other religious groups, through the *Council on Religious Affairs of the USSR Council of Ministers, analogous councils in the various republics, and plenipotentiaries in the individual oblasts. Prior to 1988 the activity of the ROC was limited to conducting services and performing other rites, and it was not permitted to engage in missionary, charitable, educational, or community political work (except in its officially sanctioned 'patriotic' activities). Though the ROC and other recognized religious groups acquired the rights of a juridical person, including property rights, the church did not have the right to own church buildings or their contents; they were loaned under contract by the state to a parish committee, usually composed of 20 lay people. These committees, which were officially registered with the state, were responsible for the parish's finances and activities, for hiring the priest, and so on. The state could refuse to recognize a parish, thereby making it illegal for the parishioners to gather or hold services. The state also gave permission for church synods and conferences, and for any other church function held outside the church premises. Until 1988, priests were not allowed to teach catechism to children, and organized religious instruction for people over 18 was strictly controlled. In 1988 a new all-Union law on the freedom of conscience and religious organizations was promulgated.

History. Officially the ROC traces its history to the introduction of Christianity in Rus' in the 10th century. In reality, however, the existence of the church dates only from the aftermath of the Mongol attack on Kiev in 1240 and the transfer of the seat of the Kievan metropolity to Vladimir on the Kliazma, by Metropolitan Maximos after 1283. Sub-

sequent metropolitans of Kiev had their see in Moscow, which became the center of the new and rapidly growing Muscovite state (later Russia). With the increase in the strength and prestige of Moscow, the metropolitans began to demand their independence of the Patriarch of Constantinople, under whose jurisdiction the Kiev metropolity remained.

In 1448 Grand Prince Vasilii of Moscow appointed Bishop Iona of Riazan the new metropolitan without the consent of Constantinople, and the ROC then declared its autocephaly, which was recognized by Constantinople only in 1589. Thus, beginning in 1458, two separate and distinct Eastern Slavic metropolities came to coexist: the metropolity of Kiev, or Ukraine-Belarus, and the 'metropolity of Moscow and all Rus'.

Having lost its links with the centers of Eastern Christianity, the Muscovite church increasingly became a tool in the state's hands. By the early 16th century, when Muscovy was freed from Mongol rule, the conviction gained currency that Moscow ('the Third Rome') was the direct descendant of Rome and Constantinople as a great Christian capital and center of Orthodoxy. This belief was buttressed after the fall of Constantinople in 1453 to the Ottoman Empire. The ROC consistently rejected closer relations with the Catholic West and opposed attempts at union (see the Church Union of *Florence).

In 1589 the ROC became a patriarchate, but this did not diminish its subservience to the tsar. After the 10th patriarch (Adriian) died in 1700, no successor was appointed to his position for over 200 years. In 1721 the patriarch was officially replaced by the *Holy Synod as the highest authority in the church. This completed the formal subjugation of the church, which became almost a governmental institution ruled by imperial fiat. The head of the Holy Synod was the *ober-prokuror*, a lay state official who was referred to as 'the tsar's eyes.' It was only in 1917 that the ROC was able to throw off briefly its state control. In November 1917 the All-Russian Local Sobor restored the patriarchate and elected Metropolitan Tikhon Belavin as Patriarch of Moscow. After his death in 1925, the Soviet authorities prevented the election of a successor. From 1926 to 1943 the ROC was headed by patriarchal locum tenens Sergii Stragorodsky, who was elected patriarch in September 1943. After his death in 1944, he was succeeded by patriarchs Aleksei Simansky (1945–70), Pimen Izvekov (1971–90), and Aleksei Ridiger.

In its expansion the ROC relied on the political strength of the Russian state, and spread its influence to the eparchies of Kiev metropolity, especially after the Treaty of Pereiaslav in 1654. The Kievan metropolitans tried to resist this pressure and remain under the patriarchate of Constantinople, but they were unsuccessful; in 1686 the metropolity passed to the jurisdiction of Moscow. Many of the most learned clergy and hierarchy moved to Moscow and later St Petersburg, where they worked in church administration, education, missionary work, and so on. ROC missionaries established the church throughout the eastern Russian Empire, and Siberia, and even in Russian possessions in the Aleutians and Alaska, where an eparchy was established in 1870.

At its height the ROC owned vast estates and was extremely wealthy, and its affluence helped to attract many priests and monks. Increasingly, however, the state sought ways to limit its wealth, for example, by placing a

ban on its acquisitions of new territories (1649). Tension between the two bodies reached its peak during the term of Patriarch Nikon (1652–8), who was removed from his position for defending too forcefully the church's prerogatives. Earlier his attempts to modernize the church had resulted in a major split, driving the *Old Believers from the ROC. The persecution of the Old Believers in Muscovy forced many of them to flee, and some established colonies in Ukraine and Belarus.

The ROC furthered Russification among the peoples conquered by the Russians and in the various churches (eg, the Georgian Orthodox church) that came under Russian domination. In particular the Kiev metropolity was prohibited from cultivating its traditional liturgical style and language (see *Church rite) and forced to conform to Russian liturgical practices and rituals.

A major shortcoming of the ROC was the low level of education that marked the clergy in the 15th and 16th centuries. To combat this problem, the church brought in numerous foreign theologians and educators, such as Maximos the Greek (in the first half of the 16th century), who translated many Greek church books. In the 17th century numerous Ukrainian churchmen – S. Yavorsky, D. Tuptalo, T. Prokopovych, and others – also rose to prominence in the church hierarchy and in theological institutions. From the 19th century the situation improved markedly. By 1913 the ROC maintained 4 theological academies (in Kiev, Moscow, St Petersburg, and Kazan), 59 seminaries, and almost 200 other schools in the Russian Empire. (See also History of the Ukrainian *Church, *Ukrainian Orthodox church, and *Kiev metropolity.)

Russian People's Council (Russian: Russkii narodnyi sovet). An organization of émigré Galician and Bukovynian Russophiles in Kiev and Rostov-na-Donu who were evacuated to the east when the Russian army retreated from Western Ukraine in 1915. The president was V. *Dudykevych.

Russian Revolution of 1905. See Revolution of 1905.

Russian Social Democratic Workers' party (Russian: Rossiiskaia sotsial-demokraticheskaia rabochaia partiia, or RSDRP). The Marxist (later Communist) party of the Russian Empire. It was formed by local Marxist

groups, which sprang up in the 1890s. Its founding congress was held in Minsk in March 1898 and was attended by only nine delegates, from the St Petersburg and Moscow groups, the Jewish Bund, the small Kiev newspaper *Rabochaia gazeta*, and the Kiev and Katerynoslav groups. The Minsk Congress was inconsequential, and most of the delegates were soon arrested.

An enduring controversy over goals and strategy divided the party. The so-called Economists favored legal methods of class struggle and a broadly based workers' movement that would become a political force. Their opponents, with V. Lenin in the forefront, gave priority to the political struggle and contended that the preoccupation with economic issues would lead to reforms instead of the political revolution. Lenin's rejection of 'economism' was linked closely to his effort to reorganize the RSDRP into a very different kind of party. He advocated a party with a limited membership of dedicated and tested professional revolutionaries, well trained in conspiratorial methods. Opposition to Lenin's views emerged at the Second Congress (held in Brussels and London, August 1903) and split the RSDRP into the Bolshevik (majoritarian) and *Menshevik (minoritarian) factions. Lenin's claim to the majority support in the party was untrue. His victory in 1903 was accidental, and the Stockholm Congress (April–May 1906) showed that the majority of the party supported the Mensheviks. At the May 1907 Congress in London neither faction obtained a clear majority; the balance of power was held by Jewish Bundists and Polish and Latvian delegates. After efforts to heal the breach between the factions in 1905–11 failed, Lenin held his own party conference in Prague in January 1912, elected a new Central Committee, and named his faction the RSDRP (Bolshevik). In March 1918 it changed its name to the Russian Communist Party (Bolshevik) or RCP(B).

In Ukraine the RSDRP had attracted mostly members of a minority – the Russian urban workers as well as some intellectuals and Jews. It had no appeal for the largely peasant Ukrainian population and the Ukrainian intelligentsia. The RSDRP in Ukraine was not a unified organization but reflected various divisions. Besides the Bolsheviks and Mensheviks, who were initially more numerous in Ukraine, it encompassed the Jewish Bundists, who favored national cultural (nonterritorial) autonomy and opposed Lenin's policy of assimilating Jews. The RSDRP had to contend with the emergence in 1905 of the *Ukrainian Social Democratic Workers' party (USDWP), which demanded that socialist parties be organized on the basis of nationality. The RSDRP tried to use the Ukrainian Social Democratic *Spilka against the USDWP.

Both the Bolshevik and the Menshevik factions of the RSDRP opposed Ukrainian independence. Although both factions participated in the Central Rada in 1917, they withdrew when independence was proclaimed. When the RSDRP (Bolshevik) had to give up Kiev in 1918 after signing the Peace Treaty of *Brest-Litovsk, it was confronted with an identity problem. Under the impact of defeat and retreat the party adopted the name Communist Party (Bolshevik) of Ukraine (CP(B)U) at its founding congress in Moscow on 5–12 July 1918. But it was Ukrainian only in name: its membership was mostly Russian and Jewish, and its leadership was largely non-Ukrainian and dominated by the so-called Katerynoslav group. The key Ukrainian leaders in the CP(B)U were V. Zatonsky, M.

Skrypnyk, V. Shakhrai, and Yu. Kotsiubynsky. Attempts to free the CP(B)U from the control of the Russian Communist Party (Bolshevik) were condemned by Lenin and defeated by the non-Ukrainian leaders of the party.

Russian Soviet Federated Socialist Republic (Russian: Rossiiskaia Sovetskaia Federativnaia Sotsialisticheskaia Respublika, or RSFSR). The largest and most important of the 15 republics constituting the former Soviet Union. In the north it borders on the Arctic Ocean; in the east, on the Pacific Ocean; in the west, on Norway, Finland, Estonia, Latvia, Lithuania, Poland, and Belarus; and in the south, on Ukraine, Georgia, Azerbaijan, Kazakhstan, Mongolia, China, and North Korea. The Ural Mountains mark the conventional boundary between Russia's European and Asian (Siberian) parts. With an area of 17,075,400 sq km, the RSFSR accounted for 76 percent of all Soviet territory.

Because of its vast size and the diversity of its ethnic groups the RSFSR was structured as a federation. It had jurisdiction over 16 autonomous republics, 49 oblasts, and 6 kraia, which themselves contain 5 autonomous national oblasts and 10 national okrugs. This division served chiefly to give the appearance of respect for national differences.

In 1989 the population of the RSFSR was 147,386,000, a figure making it the fifth most populous state in the world. Russians hold a comfortable majority of 82 percent in their own republic. They are concentrated in the European part (especially in the huge central plain around Moscow), the Volga region, southern Siberia, and the Far East. Russians constitute a majority in the Bashkir, Buriat, Kalmyk, Karelian, Komi, Mari, Mordovia, Udmurt, and Yakut autonomous republics and in most autonomous oblasts, and a significant proportion of the population in the other regions of the RSFSR.

According to the 1989 census there were 4,364,000 Ukrainians in the RSFSR. The largest and most established concentrations were in the southern regions of the European RSFSR (approx 170,000 in Krasnodar krai, 157,000 in Rostov oblast, 135,000 in Voronezh oblast, and 185,000 in Moscow oblast); in the southern Urals, (105,000 in the Orenburg oblast); and in several regions of the Asiatic RSFSR (163,000 in Primore krai, 90,000 in Khabarovsk krai). Unlike Russians who lived in Soviet Ukraine, expatriate Ukrainians in the RSFSR did not have their own schools, press, or facilities. Hence, only 43 percent of them had retained the Ukrainian language.

In economic terms the RSFSR was the backbone of the USSR. It contained three-fifths of the farmland and seven-tenths of the Union's industry. It accounted for 90 percent of the crude petroleum, 70 percent of the natural gas, 70 percent of the hard coal, 58 percent of the steel, 80 percent of the timber, and 60 percent of the cement output of the USSR; 80 percent of Soviet hard-currency exports came from the RSFSR. In 1989, 74 percent of the RSFSR's population was urban, compared with 67 percent in Soviet

Ukraine. The rate of industrialization, the level of economic development (measured by per capita industrial output), and the average per capita national income were considerably greater in the RSFSR than in other Soviet republics, with the exception of Estonia and Latvia. The average annual growth of national income per person in the 1980s (given a Soviet norm of 100) was 109 in the RSFSR and 96 in Soviet Ukraine, whose per capita output was close to the RSFSR's. Since the 1980s the RSFSR 'imported' more industrial resources, goods, and agricultural products than it 'exported' to the other USSR republics. Much of Soviet Ukraine's agricultural output, coal, iron, and steel was sent to the RSFSR. An important part of the RSFSR's investment capital was extracted from Soviet Ukraine. According to most criteria the economic development of the RSFSR was higher than that of Ukraine. But the privileged position of the Russians in the USSR could not be described in economic terms such as these.

Although neither the RSFSR nor the USSR could be described as a nation-state, they were the creations and political instruments of the Russian nation. The Russians enjoyed a special status within the USSR. Soviet ideology paid tribute to the 'great Russian people' as the 'leading nation,' with a 'special historical role' in the Soviet state. Of the 15 Union republics Russia was the only one to be mentioned in the USSR anthem. Russians were significantly overrepresented in the Soviet power structure. The central institutions and the political hierarchy were dominated by Russians. About 60 percent of the CPSU membership was Russian. In 1986, 85 percent of the 13 CC CPSU secretaries, 83 percent of the 83 USSR ministers, and 88 percent of the 17 top military commanders were Russians. By 1988 the Union leadership and elite had become more Russian than in any other period. In 1982 non-Russians constituted 38 percent of the Politburo; in 1988 they amounted to a mere 15 percent. Similarly, within the CC CPSU and the central Party bureaucracy there was a visible decline in non-Russian representation. The 16-member presidential council appointed in March 1990 included only 5 non-Russians (one Ukrainian among them). Its only non-Communist member was a Russian right-wing nationalist.

Furthermore, the Russian republic was not as distinct structurally from the USSR as were the other republics. The RSFSR had its own Supreme Soviet and Council of Ministers but did not have a separate capital, KGB branch, television and radio system, or trade-union organization. The RSFSR had no international status: in contrast to the Ukrainian SSR and the Belorussian SSR it did not even have a seat at the United Nations. From 1925 the RSFSR did not have its own Party apparatus (with a Congress, Central Committee, Politburo, and Secretariat) distinct from the all-Union structure, as had the other 14 republics, although a special Russian Bureau was set up in the CC CPSU by N. Khrushchev and M. Gorbachev. It was only in 1990 that the Russian republic got its own ministry of the interior and academy of sciences (the former USSR academy).

History. The RSFSR dates back to 7 November 1917, when the Bolsheviks overthrew the Provisional Government and established the Soviet of People's Commissars under V. Lenin's leadership as the new government of the Russian Empire. The Third All-Russian Congress of Soviets (23–31 January 1918) proclaimed the establishment of the RSFSR, and the Fifth All-Russian Congress of Soviets

adopted the First Constitution of the RSFSR on 10 July 1918. The most striking feature of the Constitution (and its revisions in 1925, 1937, and 1978) was the absence of provisions for any genuine federation. After conquering non-Russian territories the RSFSR tried to legitimize its dominance over them by proclaiming its laws to be applicable throughout the lands of the old empire and by signing bilateral treaties with the new Soviet republics, set up in the territories. By decree of the All-Russian Central Executive Committee in June 1919 Ukraine's administration of military, economic, and financial affairs, communications, railways, and labor was merged with Russia's. In the 'federation' treaty of December 1920 all the major government powers were handed over to unified Russian-Ukrainian commissariats and in reality to the RSFSR government. In later 'federative' agreements Ukraine consented to have the RSFSR represent it on the international stage. In 1920–1 similar treaties were signed by the RSFSR with other Soviet republics, which were thereby deprived, in effect, of any internal and external independence. This process of absorption of the non-Russian republics by the RSFSR led eventually to the formation of the USSR.

When the federal state of the *Union of Soviet Socialist Republics (USSR) was created on 31 December 1922, the RSFSR was reduced to the status of a republic within the Union. According to the new constitutional arrangement proposed by Lenin, the existing and future Soviet republics did not merge with the RSFSR but joined it in a state of a 'higher level,' the USSR. With the dissolution of the USSR in 1991 the RSFSR was renamed the Russian Federated Republic, and then the Russian Federation.

Russian Trade and Industry Bank (Russian: Russkii torгово-promyshlennyi bank). One of the largest joint-stock banks in the Russian Empire, founded in 1890 in St Petersburg by a consortium of French banks. In the early 1900s it was saved from bankruptcy by the Ministry of Finance, and in 1912 majority control was acquired by British financiers. Of the bank's 111 branches 14 were located in Ukraine. It had assets of 360 million rubles (1917) and interests in railways, heavy industry, and sugar refining in Ukraine and elsewhere. In January 1917 controlling interest was acquired by K. Yaroshinsky, a financial magnate from Ukraine. He merged it with the *Russian Foreign Trade Bank and the International Commercial Bank, but the whole consortium was soon nationalized by the Bolshevik regime. The branches in Ukraine were nationalized by the Soviet government on 21 January 1919.

Russian Union (Russian: Russkii soiuz). A Russian political organization in Ukraine, established in May 1918 in Kiev. It represented various Russian parties and groupings, including the Constitutional Democrats, Popular Socialists, Socialist Revolutionaries, and Mensheviks. The official purpose of the union was to preserve the Russian

school system and to promote Russian culture, but in practice it demanded the restoration of the privileged position of the Russian language and culture in Ukraine. Its members ultimately sought the dismantling of the Ukrainian state and the rebuilding of Russia in its prerevolutionary form.

Russianisms. See Russian-Ukrainian linguistic relations.

Russians in Ukraine. Prior to the 14th and 15th centuries an insignificant number of Russians (or more precisely, peoples of the principality of Moscow and other Russian territories) lived in Ukraine. For the most part individual Russian governmental officials or clergymen and itinerant merchants who lived for a few months at a time in the trading districts of Kiev, Chernihiv, Lutske, and other larger cities constituted the only Russian presence. In time there was also a movement of boyar families and their servants between Muscovy and Ukraine (in both directions). During the reign of Ivan IV (1533–84) the princes Pronsky, Kurbsky, and others moved into the Ukrainian territories of Lithuania, where they offered their services to the grand duke and received estates in return. Others fled to Ukraine and Belarus to escape religious or other persecution. A number of figures opposed to the official dogmas of the Russian Orthodox church, including F. Kosoï and the monks Vasiian and Artemii (a former student of Maximos the Greek), were regarded as heretics and compelled to flee from Muscovy to Ukraine. Another refugee was the printer I. Fedorov. Persecuted by Russian scribes and religious hierarchs, he left Moscow in 1566, moved to Lithuania, and then went on to Lviv and Ostrih, where he changed his name to I. *Fedorovych and became the founder of Ukrainian printing.

The first sustained Russian presence in Ukrainian lands was in the northeastern borderland regions. In the 16th century Muscovy began developing a string of fortified frontier posts in *Slobidska Ukraine as a line of defense against the Tatars. The area was then opened up to colonists, most of whom were Ukrainians, but some of whom were Russians. Muscovy's control of the Chernihiv-Siversk region in the 16th and early 17th centuries enabled Russian landowners and other Muscovite settlers to establish themselves in the region. Most of them remained there even after those territories passed under the control of the Polish-Lithuanian Commonwealth (1618–48) and then the Hetmanate. After the Time of Troubles they were joined by various Muscovite émigrés (including the Klimov, Lovshin, Griaznoi, and Saltykov families), who were granted estates by the Vasa kings Sigismund III and Władysław IV. Some of them kept their holdings throughout the Khmelnytsky period and thereafter; others intermarried with the Ukrainian nobility and Cossack officers and became assimilated.

Some Muscovites, mostly refugees, fought in the Cossack armies in the 16th and 17th centuries. Others (writers, artists, tradesmen, and the like) lived in Ukrainian monasteries, particularly in Kiev. I. Savelov, the Patriarch of Moscow after 1674, had been a monk in the Mezhyhiria Transfiguration Monastery.

Starting in the 1640s Russians studied at the Kievian Mohyla Academy, among them I. Ozerov and P. Zerkalnikov. Zerkalnikov was a merchant who subsequently

brought Ye. *Slavynetsky, A. *Koretsky-Satanovsky, and other scholars to Moscow. In the 1680s the students of the academy included K. Istomin, subsequently a printer in Moscow, and K. Zotov, a naval explorer. The children of Muscovite noblemen, such as those of Prince G. Romodanovsky and the boyar P. Sheremetev, also studied in Kiev.

Mid-17th to 18th centuries. The Russian presence in Ukraine increased dramatically following the *Pereiaslav Treaty of 1654. It consisted initially of garrisons in Kiev and other Ukrainian cities and the presence of Muscovite voivodes. In Kiev the 2,000-man infantry force was increased to 5,000 in 1661. A fortress was built in the old quarter of the city, and cavalrymen and fusiliers (with their families) were accommodated next to it. Kiev's Russian population also included various administrative personnel as well as tradesmen, merchants, and traders whose extensive dealings with the troops allowed them to begin competing strongly with their local Ukrainian counterparts. The *Moscow Articles of 1665, drawn up during the tenure of Hetman I. Briukhovetsky, allowed the Muscovite force in Ukraine to increase to 11,600, with garrisons in Kiev, Chernihiv, Pereiaslav, Nizhen, Novhorod-Siverskyi, Pryluka, Poltava, and other cities. Under I. Mazepa a rifleman's regiment was stationed in the hetman's capital, Baturyn, ostensibly for his defense; the force was soon expanded to three regiments.

Wars with Turkey (until 1700) and Sweden (1700–21) and the development of the *Kievan Cave Fortress (1706–23) as a military and administrative center increased the Russian presence in Ukraine. After the Battle of *Poltava in 1709, up to 10 Russian regiments occupied the Hetmanate. Officials of the military and governmental bureaucracy, particularly of the first *Little Russian Collegium, intruded increasingly into internal Ukrainian affairs. Russian governors and military commanders were assigned to Kiev, soldiers were billeted in Hlukhiv (the new capital of the Hetmanate), and commandants were installed in all regimental towns and cities.

Beginning in the time of Peter I Russian landowners acquired increasingly larger holdings in the Hetmanate and Slobidska Ukraine. The estates of Mazepa's loyal *starshyna* and of 'Mazepist' émigrés were given to Russian aristocrats after the defeat at Poltava, most notably to Peter's favorite, A. *Menshikov. The Russian nobles often brought Russian serfs along with them to work, particularly in small-scale manufacturing enterprises. The Authoritative Ordinances imposed by the Russian government on Hetman D. Apostol in 1728 gave Russians permission to purchase land in Ukraine. The tsarist authorities also forbade the Hetmanate to trade with Western Europe as foreign commerce came to be controlled either by the government directly or by Russian merchants. The privileges thus accorded the Russians resulted in a further influx of Russian merchants or their agents into Ukraine, particularly to Kiev and other larger centers. By 1742 there were 120 major Russian merchants in Kiev, and Russians controlled much of the large-scale commerce in Left-Bank Ukraine.

Among the Russians who studied in Kiev in the early 18th century was K. Shchepin of Viatka. In 1734 M. Lomonosov began his studies at the Kievian Mohyla Academy.

There was a significant influx of Russian *Old Believers into Ukraine. Having fled persecution at the hands of the

Russian Orthodox church and the government, they established a number of settlements in the Starodub and Chernihiv regimental territories. The movement began during the tenure of Hetman D. Mnohohrshny and intensified under Mazepa and I. Skoropadsky. Despite protests from Ukrainian landowners and government officials the Russian government not only permitted the Old Believers to continue to leave Russia, but even gave them title to land on which the local Ukrainian landowners and administrators had temporarily allowed them to settle. A similarly arbitrary granting of land occurred in the northern Chernihiv region, where the ongoing settlement of Russians in the borderland reaches (in the Klintsy district) changed the region's ethnic composition. This eventually served as the rationale for excluding those lands from the Ukrainian SSR when it was being formed. (See also *Russian language in Ukraine.)

Other refugees who came to Ukraine from Russia in the 18th century included serfs and military deserters, who expected to find at least temporary shelter or freedom in the Hetmanate, the territory of the Zaporozhian Cossack state, Slobidska Ukraine, and even Right-Bank Ukraine. Some of them were forced to return, but a substantial number remained, particularly in the south, where the Zaporozhian officials and (later) the Russian administration and landowners were keen to see the area settled. They often sheltered refugees and preferred not to return them to their places of origin. In addition a number of Russian nobles to whom Catherine II granted large estates in Southern Ukraine brought their serfs with them in order to populate the region.

The exact number of Russians living in Ukrainian territories in the 18th century is unknown, but fragmentary data suggest that it was relatively small and mostly concentrated in New Russia. In 1763-4, for instance, there were 4,273 Russians and 20,505 Ukrainians in Yelysavethrad province (subsequently Kherson gubernia); the number rose to 5,851 and 57,302 respectively in 1782. In Bakhmut province there were 3,891 Russians and 12,177 Ukrainians in 1763-4, and 12,837 and 57,302 respectively in 1782.

19th and early 20th centuries. Russians were virtually absent from Right-Bank Ukraine (other than in or near Kiev) prior to the second and third partitions of Poland in 1793 and 1795. Even then only a small number of civil servants and military personnel and a still smaller number of merchants, craftsmen, and itinerant workers moved into the region. Few peasants were among the migrants. That trend continued after the unsuccessful Polish Insurrection of 1830-1 and particularly after the Polish Insurrection of 1863-4, when some of the estates confiscated from Poles were given to Russian landowners. The imperial authorities sought to de-Polonize and Russify the Right-Bank regions to the greatest extent possible, but they could not manage to dislodge the substantial Polish (and Ukrainian) presence there.

A steady stream of Russians continued to settle in the sparsely populated regions of *Southern Ukraine, in both its cities and its villages. The migrants included serfs, state peasants, military personnel, and free settlers. Some of them were subsequently assimilated by the Ukrainian population, which had grown in the region owing to mi-

RUSSIANS IN UKRAINE, 1897

grations from the Left Bank and Right Bank as well as from Slobidska Ukraine. In areas where they constituted a large percentage or a majority of the population Russians tended to maintain their national identity. After the abolition of serfdom this became more common as emancipated Russian peasants also settled in Southern Ukraine.

The political and administrative changes that dismantled the Hetman state and Zaporizhia and imposed Russian imperial rule had cleared a wide path for Russian immigration to Left-Bank Ukraine. By the early 19th century Russian civil servants, military men of various rank, landowners (particularly from the regions of Russia bordering on Ukraine), merchants, peddlers, craftsmen, and laborers had established themselves in Ukraine. The cities in Left-Bank Ukraine lost their right of Magdeburg law, and their economies, community life, and municipal governments increasingly fell under the control of recently arrived Russians. Except in the larger port cities, such as Odessa, Russian merchants secured a firm hold on the commercial life of the Left Bank and Southern Ukraine. According to statistics for 1832, Russians controlled the most capital-intensive industries (44.6 percent; Ukrainians controlled 28.7 percent). In the commercial sector they enjoyed an absolute majority (52.6 percent; Ukrainians, 22.2 percent), particularly in the higher guilds. In 1832, Russians constituted 35.5 percent of the landed gentry in Ukraine (31.4 percent were Ukrainian). Except in the Right Bank, where Poles and Jews maintained substantial economic strength, Russians dominated the capitalist development of Ukraine. As a result the major cities of Ukraine developed an increasingly Russian character.

Another wave of Russian immigration to Ukraine came in the 1880s, when the surplus population from the central chernozem gubernias (Voronezh, Kursk, Orel, and others) began flooding into the newly established industrial centers of the Donbas and the Dnieper Industrial Region as well as (to a lesser extent) Kharkiv. In 1897, Russians made up 68 percent of the workers in heavy industry of Katerynoslav gubernia. A substantial number of them were seasonal laborers.

According to the census of 1897 there were 3.8 million Russians living in Ukraine. That figure suggests that they formed 11.7 percent of the total population of 27.8 million. There were virtually no Russians in Ukrainian territories under Austria-Hungary (apart from a settlement of 3,000 Old Believers, known as Lipovany, in Bukovyna). Russians thus made up 13.1 percent of the population in Ukrainian territories in the Russian Empire. There were 2.4 million Russians in the nine Ukrainian gubernias (10.4 percent of the local total population), 2.1 million (10 percent) within the Ukrainian SSR's 1938 boundaries, and 2.8 million (10.5 percent) within Ukraine's current boundaries.

A high proportion (42.3 percent) of the Russians in Ukraine lived in cities, particularly in comparison to the proportion (5.4 percent) of Ukrainians who lived in cities. The urban population of Ukraine made up 12.6 percent of the total population of the country (within the 1938 borders of the Ukrainian SSR). Of the urban population, Russians constituted 33.7 percent (Ukrainians, 32.5 percent). In cities of over 100,000 inhabitants they represented 53.4 percent (Ukrainians, 12.6 percent). Only 6.7 percent of the rural population in Ukraine was Russian (83 percent, Ukrainian). The largest urban concentrations of Russians in Ukraine (1897) were in Odessa, 198,200 (48.2 percent of

the city's total population); Kiev, 134,300 (54.4 percent); Kharkiv, 109,000 (63 percent); Mykolaiv, 61,000 (66.3 percent); Katerynoslav, 47,100 (41.8 percent); and Kherson, 27,900 (47.9 percent).

The Russian inhabitants of Ukraine were not evenly distributed geographically. There were few of them (approx 600,000, or 3 percent of the local total) in the long-settled forested steppe regions (with the exception of Slobidska Ukraine) and northern Ukraine, and of that number 134,000 were residents of Kiev. A larger number (1.2 million) lived in Southern Ukraine and Slobidska Ukraine (approx 1 million). Another 340,000 lived in the Kuban (not including the eastern section), where they constituted about 34 percent of the population.

The Russian element in rural Ukraine tended to live either in separate villages or in separate sections of villages and only rarely with Ukrainians. Russian villages commonly differed from Ukrainian ones in appearance. They had fewer garden plots, and the structure of the farm buildings and houses was different. Their inhabitants tended to go about their daily affairs apart from Ukrainians, and there was infrequent contact between the two groups. Relations were restrained, and mixed marriages were uncommon. Russian Old Believers made up one-third of the Russian peasant population in Ukraine, but they lived completely apart from everyone else (even other Russians).

In general Russians in Ukraine considered Ukraine and Ukrainians to be an organically constituent element of the Russian state, and they assisted the imperial government in effecting its policies of centralization and Russification. They believed that Ukrainians were a Russian tribe, that their language was merely a dialect of Russian, and that their culture was a lesser variant of Russian culture, although some expressed their liking for Ukrainian nature, folklore, literature, and language and respected Ukraine's (Cossack) past.

Even those Russians in Ukraine who espoused revolutionary and internationalist ideas sought to have them realized on an 'all-Russian' scale, and believed that Ukrainian strivings for the preservation of national identity and the development of the Ukrainian language were narrow concerns that detracted from the universality of their own cause. Russian participants in the *Decembrist movement in Ukraine supported the view that all nationalities within the Russian Empire should fuse into a single (Russian) nation. The majority of the supporters of *Narodnaia Volia and liberal constitutional movements in Ukraine were either indifferent or hostile to the local national movement. The members of Russian parties active in Ukraine – the *Constitutional Democratic party (the Kadets), the *Russian Social Democratic Workers' party, and the Russian Party of Socialist Revolutionaries – supported centralist policies. Russian right-wing elements, such as the Union of the Russian People and the Kiev Club of Russian Nationalists, were openly hostile to Ukraine and Ukrainians.

The general tendency of Russians in Ukraine to subsume all features of Ukrainian identity into an overriding imperial Russian one was buttressed by Russian state policies, a thoroughly Russified educational system, the Russian Orthodox church, and the Russian press (both official and private).

As the number of Russians in Ukraine grew, so did

their influence, not only in the political, administrative, and socioeconomic spheres but also in the development of Ukrainian scholarship and culture, particularly academic life. Russian professors occupied leading positions in Ukraine's institutions of higher education, and many of them contributed significantly to the field of Ukrainian studies. Among them were the historians V. Ikonnikov and S. Golubev, the literary historians M.(N.) Petrov and V. Peretts, the philosopher A. Giliarov, the archeologist M. Rostovtsev, the chemist S. Reformatorsky, the physicist Y. Kosonogov, the mathematician M. Krylov, the botanists A. Fomin and S. Navashin, the zoologist A. Severtsov, the surgeon O.(A.) Krymov, and the ophthalmologist V. Filatov.

The following Russian writers wrote about and/or lived in Ukraine: M. Artsybashev, I. Bunin, A. Chekhov, V. Garshin, N. Leskov, S. Nadson, N. Nekrasov, K. Ryleev, A. Tolstoi, K. Trenev, and A. Zhemchuzhnikov. Russian artists active in Ukraine included G. Miasoedov, M. Nesterov, V. Vasnetsov, M. Vrubel, N. Ge, I. Repin, I. Kramskoi, and L. Zhemchuzhnikov.

1917–20. The general Russian population and the revolutionary parties they supported during the period (the Kadets, the Mensheviks, the Socialist Revolutionaries [SRs], and the Bolsheviks) were largely hostile to the organization of Ukrainian national forces following the February Revolution of 1917 and to Ukrainian strivings for autonomy. They also pressured the Provisional Government in St Petersburg to institute measures inimical to Ukrainian autonomy. Shortly before the Ukrainian National Congress of April 1917 the head of the Kiev Soviet of Russian Deputies declared that demands for an autonomous Ukraine were 'a stab in the back of the revolution,' and that 'democratic forces' would reply to such demands 'with bayonets.' The Russian intelligentsia, civil servants, and influential publications, such as *Kievlianin* and *Kievskaiia mysl'*, were also hostile.

The proclamation of the First Universal on 23 June 1917 and the creation of the General Secretariat were considered by most Russians in Ukraine a wrongful seizure of power. When the Ukrainian government began to exercise its legal authority, they changed their minds and urged the Provisional Government to arrive at an agreement with the Central Rada. The two governments did agree in July. After the Second Universal (16 July 1917) and the opening of the Central Rada and General Secretariat to representatives of national minorities, 54 Russian deputies (20 SRs, 20 Mensheviks, 10 Kadets, and 4 Popular Socialists) joined the two bodies. There were 8 deputies from Russian parties in the Little Rada: 3 Mensheviks (M. Balabanov and 2 Ukrainians, K. Kononenko and D. Chyzhevsky), 4 SRs (S. Saradzhiev, I. Sklovsky, K. Sukhovykh, and A. *Zarubin), and 1 Kadet (S. Krupnov). Bolshevik representatives (Yu. Piatakov and V. Zatonksy) also sat briefly in the Central Rada, but they walked out on 8 November 1917. There were two representatives of Russian parties in the General Secretariat, A. Zarubin (postal and telegraph services) and D. Odinets (secretary of Russian affairs).

Those who remained to vote on the Third Universal (20 November 1917) and the declaration of the establishment of the Ukrainian National Republic in the Little Rada included one Menshevik and two SRs, but the lone remaining Kadet walked out. The Mensheviks opposed the Fourth Universal (22 January 1918), but the SRs supported

it. Odinets continued to serve as secretary of Russian affairs in the new cabinet.

The Hetman government (April–December 1918) enjoyed the support of the majority of Russians, particularly right-wing and centrist elements. They were included in P. Skoropadsky's cabinets (they formed the majority in the administration led by S. Gerbel) and had considerable influence in the state apparatus and the army. Right-wing and extremist Russian organizations became active once again. In May 1918 the *Russian Union was established, ostensibly to unite all Russians in Ukraine in order to further Russian culture and education in the country, but in fact as an anti-Ukrainian grouping. The number of Russian refugees in Ukraine increased after the Bolshevik consolidation of power in Russia, and Russian officers used Ukraine as a base in establishing A. Denikin's loyalist Volunteer Army. Those elements left Ukraine after the seizure of power by the UNR Directory, which included no Russians in its administration.

During the course of Ukraine's independence struggle most Russians sided either with Denikin's forces (the majority of the bourgeoisie and the intelligentsia) or with the Bolsheviks (primarily the Russian proletariat). The Russian peasantry remained largely neutral.

1920–33. The establishment of Soviet power in Ukraine initially brought no change in the relations between nationalities in the country. Most Russians who held posts in the Ukrainian state, administrative, and Party apparatus believed that only the form of political system had changed, and that the 'country' (the Russian Empire and now the Soviet Union) should remain undivided and largely under central (Russian) control. The ruling party, the Communist Party (Bolshevik) of Ukraine (CP[B]U), was Ukrainian in name only. Its membership consisted primarily of Russians (53.6 percent in 1922) and other non-Ukrainian peoples (such as the Jews and Balts, and others) and was either indifferent or hostile to Ukrainian national concerns. Russian elements in the CP(B)U even attempted to separate the Donets and Kryvyi Rih regions to form the Donets–Kryvyi Rih Soviet Republic within the RSFSR. They largely ignored the development of a separate state structure for the Ukrainian SSR; they considered it and the party they belonged to as inconsequential short-term arrangements.

Change in the number of Russians in Ukraine during the first years of Soviet rule cannot be measured accurately. A substantial number of (Russian or Russified) nobles and functionaries of the tsarist regime fled from Ukraine (in fact from the USSR altogether). In Ukraine they were replaced to a certain extent by an influx of Bolsheviks from Russia. The decline of cities and industries, where Russians constituted a high percentage of the inhabitants or laborers, during the revolutionary period probably caused an out-migration to other parts of the former empire. Nevertheless the influx of Russians into the Donets Basin region continued (16,000 in 1921–3, 64,000 in 1924–5).

A more detailed picture of the Russian presence in Ukraine is provided by the Soviet census of 1926. Its figures show that there were 4.2 million Russians living in Ukrainian ethnographic territories within the USSR (12.1 percent of the total population of those regions), 2.7 million of them in the Ukrainian SSR (9.2 percent). A smaller number of Russians lived in Western Ukraine (approx 60,000) and Bessarabia (also 60,000).

RUSSIANS IN UKRAINE, 1926

A high proportion (50.4 percent) of the Russians who lived in the Ukrainian SSR lived in cities, although the figures drop if all Ukrainian ethnographic territory within the USSR (40.5 percent) is included. Russians made up 25.1 percent of the urban population of the Ukrainian SSR (Ukrainians, 47.4 percent) and 5.6 percent of its rural population (Ukrainians, 87.6 percent). Relative to the 1897 census the percentage of Russians in the Ukrainian SSR seemed to drop from 10 to 9.2, although the actual decline was probably much smaller, because the earlier census contained somewhat inflated figures.

As in 1897, the major concentrations of Russians in Ukraine (1926) were in Odessa (162,000, or 38.7 percent of the total population), Kharkiv (154,400, or 37 percent), Kiev (125,500, or 24.4 percent), Dnipropetrovske (73,400, or 31.5 percent), Donetsk (59,900, or 56.3 percent), Mykolaiv (46,700, or 37 percent), Luhanske (31,300, or 43.5 percent), and Krasnodar, in the Kuban (83,400, or 51.3 percent). In general the proportion of Russians in a city increased with its size: they constituted approx 33.3 percent of the population in cities with over 100,000 inhabitants, 20.1 percent in those with between 50,000 and 100,000, and 12.2 percent in smaller cities.

The geographical distribution of Russians in Ukraine was practically the same as in 1897. There were very few in Western Ukraine (overall, 2 percent; in isolated areas, 5 percent of the local total). The larger concentrations were in four areas: Slobidska Ukraine, with an overall percentage of about 25 percent, concentrated in the Ukrainian sections of Kursk (46 percent) and Voronezh (30 percent)

gubernias; Southern Ukraine, where Russians clustered in and around seaside cities (their largest rural concentration [24 percent] was in Melitopol okruha); the Donets Basin, particularly Luhanske okruha (42.7 percent) and the Ukrainian sections of the Shakhty-Donets district (37 percent); and the Kuban (33.5 percent, particularly in the eastern areas).

Russian as a mother tongue was claimed (1926) by 98.1 percent (2,627,000) of the Russians in Ukraine as well as by 5.5 percent (1,289,000) of Ukrainians, 22.6 percent (356,000) of Jews, and 154,000 others. Linguistic Russification was particularly marked among the Ukrainian population in the cities, where 24.4 percent listed Russian as their native tongue. Of their rural counterparts only 3.2 percent did so. In contrast, barely 1.4 percent of Russians gave Ukrainian as their native tongue (1.8 percent in rural areas).

The age and gender profiles of the Russian and Ukrainian inhabitants of Ukraine in 1926 were fairly different.

Russians in Ukraine,* 1926-89

| Year | Total population (Ukraine) | Russians | |
|------|----------------------------|------------|------------|
| | | Number | % of total |
| 1926 | 38,569,000 | 3,164,800 | 8.2 |
| 1959 | 41,869,000 | 7,091,300 | 16.9 |
| 1970 | 47,127,000 | 9,126,000 | 19.4 |
| 1989 | 51,452,000 | 11,356,000 | 22.1 |

*Within Ukraine's postwar borders

The ratio of men to women among Ukrainians was 100:106.1, among Russians, 100:100.2. A greater proportion of Russians (51.2 percent) than Ukrainians (43.1 percent) were aged 20 to 59 (that age-group formed 45.3 percent of the total population). Likewise there were fewer teenagers or young children among Russians (43.4 percent) than among Ukrainians (50.6 percent; that age-group represented 49 percent of the total population) and fewer old people (5.4 percent of Russians and 6.3 percent of Ukrainians; that age-group was 5.7 percent of the total).

The social/professional profile of Russians also differed from that of Ukrainians. The Ukrainians were a largely undifferentiated peasant mass, in marked contrast to the Russian community. Agriculture employed 50.6 percent of the Russians, compared to 90.7 percent of the Ukrainians. The Russians were represented more in industry (20 percent, compared to 3.8 percent for Ukrainians), the civil service (12.2 percent, compared to 2.6 percent), trade (3.3 percent, compared to 0.8 percent), and other professions (12.7 percent, compared to 2.1 percent). Russians in Ukraine were better educated than Ukrainians. In 1926, 76.5 percent of males and 51.2 percent of females over the age of five were literate, compared to figures of 66.5 percent and 32.5 percent for Ukrainians. Russian pupils made up 14.1 percent of all those enrolled in elementary schools in Ukraine, although Russian children in that age-group made up only 8.4 percent of the country's total. Russian enrollment in Ukrainian vocational schools stood at 16 percent, in technical schools, at 14.7 percent, and in workers' faculties, at 21.5 percent. That trend continued through 1936, when Russians constituted 15.4 percent of the students in postsecondary institutions, 10.3 percent of those in technical schools, and 16.2 percent of those in workers' faculties.

A substantial number of Russians in the Ukrainian SSR in 1926 had been born outside of its borders; 779,200 originated from the RSFSR (not including the Kazakh and Kirghiz ASSRs), and 112,500, from other republics. Seventy percent of the new arrivals settled in cities. Immigrants made up about one-quarter of the Russian population in Ukraine (one-third of the urban Russian population and approx 15 percent of the rural). Some 271,000 Russians had settled in the Donbas, where they constituted about one-third of the population. The constant influx of Russians into Ukraine and an emigration of Ukrainians (particularly to Siberia) account for the growing proportion of Russians in the country. That growth was not offset by the higher natural growth rate among Ukrainians.

The policy of *Ukrainization instituted in 1923–32 diminished the influence of Russians in Ukraine significantly. Some Russians returned to their country of origin, some assimilated with the Ukrainian surroundings, and some Russified Ukrainians reverted to a Ukrainian identity. The number of Russians in leading administrative and political posts was reduced as they were replaced by Ukrainians. The proportion of Russians in Ukraine's administrative apparatus in 1928–9 (given in percentages, with figures for Ukrainians in parentheses) was as follows: in rural soviets, 5.1 percent (87.9 percent); town soviets, 20.9 percent (50.9 percent); city soviets, 23.9 percent (50.4 percent); raion party conferences, 7.9 percent (82.9 percent); and okruha soviets, 14.5 percent (68.6 percent). They constituted 27.5 percent of the membership of the CP(B)U (compared to 52 percent for Ukrainians) and 17.1

percent of that of the Komsomol (compared to 64.1 percent).

After 1933. Ukrainization came to a full stop in 1933 with the tenure of P. *Postyshev. The 17th Congress of the All-Union Communist Party (Bolshevik), held from 26 January to 10 February 1934, at which J. Stalin declared that Ukrainian nationalism was 'a principal threat,' marked the formal end of the Ukrainization period. The Ukrainian position was also eroded by the man-made famine of 1932–3 (which killed millions of Ukrainian peasants), the wholesale destruction of the Ukrainian intellectual elite and religious structure in 1929–33, and the execution or deportation of between one and two million people. But the gains within the state apparatus made by Ukrainians relative to Russians during the 1920s held until the Second World War.

After 1945 the *national composition of Ukraine changed dramatically as the proportion of Russians living there more than doubled. Such a fundamental change in the *population of Ukraine did not occur spontaneously, but as part of an overall Soviet policy of Russification. The formula used for implementing the policy was systematic and straightforward. Ukrainians were moved out of their republic as often as possible on the pretext of an 'organized distribution of labor' to other parts of the USSR (particularly northern regions of the Union), where they would be bereft of Ukrainian cultural amenities and presumably assimilate with the surrounding Russian or Russian-speaking majority. Russians were brought into Ukraine on a continual basis and afforded a privileged socioeconomic status and a wide range of cultural amenities.

By 1989 the Russian population of Ukraine had grown to 11,356,000 and constituted 22.1 percent of the total population of 51,452,000. It was most concentrated in the southeastern industrial regions, in Luhanske (44.8 percent of the total oblast population), Donetske (43.6 percent), Kharkiv (33.2 percent), and Zaporizhia (32 percent) oblasts. In Crimea oblast Russians formed 67 percent of the population. They were least numerous in the western (particularly Ternopil, Ivano-Frankivske, and Transcarpathia oblasts) and northwestern (Volhynia and Rivne oblasts) regions of Ukraine. The table gives their proportional increase in the population of the Ukrainian SSR.

The influence of the Russians in Ukraine during the period increased even more than their increase in number would suggest, largely as a result of a concerted campaign of *Russification. Under the Russian Empire the efforts to Russify Ukraine were aimed largely at the cities and the middle and upper classes. In Soviet times they were extended to the countryside and to all levels of society. Consequently a Russian assigned to a rural posting in Ukraine would commonly be not only a state functionary but also an agent of cultural assimilation. Also contributing to the trend of broad Russification was the *urbanization characteristic of the 20th century, whereby millions of Ukrainians were brought to cities that had been centers of Russian (and Jewish) cultural life for over a hundred years.

The Russians in Ukraine acted as a dominant minority group by virtue of the fact that their nationality group was the controlling force in Soviet society. Their increased numbers provided them with the demographic mass to make an impact at all levels of Ukrainian society.

Socially and economically the Russians occupied a

RUSSIANS IN UKRAINE, 1979

privileged position within Ukraine. They constituted a disproportionately high proportion of skilled blue-collar workers, white-collar workers, and the intelligentsia. They could obtain a full range of services in the Russian language and felt no compulsion to learn Ukrainian. Their children could be educated in Russian-language schools in every region of the republic, and the entrance requirements for higher educational institutions in Ukraine strongly favored Russians. The majority of public signs and postings on public buildings in most districts of Ukraine were unilingually Russian, as were most labels on consumer products. Official business was usually transacted in Russian. As for cultural amenities, Ukrainian publishing houses produced a disproportionately high number of Russian-language titles, translations of foreign-language literature were far more likely to be available in Russian than in Ukrainian, the theater and cinema were dominated (in quantity and often in quality) by Russian-language works, and museum and gallery services were commonly provided in Russian rather than Ukrainian.

With social pressures to adhere to Russian norms and economic mobility often linked to fluency in the Russian language, many Ukrainians became Russophones. Their number included a substantial group who became totally Russified, or who retained only a minimal ability in Ukrainian (4.5 percent in 1926, 6.5 percent in 1959, 8.5 percent in 1970, and 10.9 percent in 1979). Another linguistic phenomenon was the rise of a Ukrainian-Russian patois known as *surzhyk*. One sign of the increased Russian influence in Ukraine was a substantial rise in the number of mixed Ukrainian-Russian marriages, particularly among

white-collar workers and the intelligentsia. Subtly encouraged by Soviet officials, such matches were sometimes viewed as a means of advancing one's career.

Some Russians in the Ukrainian SSR have supported the Ukrainian people and defended their interests. In the 1920s M. *Volobuiev demanded that Ukraine's economy be permitted to develop autonomously. In the 1960s and early 1970s the writer V. Nekrasov came out in defense of Ukrainian dissidents. The majority of Russian academics and writers in Ukraine, however, were simply purveyors of Russification who considered Ukrainian scholarship and culture to be elements within a Russian context. The Ukrainian dissident movement of the 1960s and 1970s gained some support among Russian circles in Ukraine, but their expressions of support for Ukrainian aspirations were sporadic and not very clear.

The sizable Russian minority in Ukraine became a significant factor in the campaign for independence in 1990–1. Some Russians were among the most vocal opponents of Ukraine's political aspirations for separation from the Soviet Union. Likewise, many Soviet and Russian political figures cited the need to 'protect' the Russian minority as an excuse for Moscow's potential intervention in Ukrainian affairs. Ultimately a substantial majority of Ukraine's Russians chose to vote for Ukrainian independence in the referendum of 1 December 1991. Observers have noted that the result reflected the Russians' belief that the Ukrainian SSR was being treated unfairly (economically and politically) within the USSR, and that they and the country would benefit by independence. At the same time the result reflected the degree to which the Russians were satis-

fied with the assurances of respect for minority rights that had been given by Ukrainian political leaders.

Russian-Ukrainian Evangelical Baptist Union of the USA (Rosiisko-ukrainskyi soiuz yevanhelskykh khrystiiian baptystiv). An Evangelical church in the United States and Canada. Formed initially among the immigrant Baptist and Stundist communities of North Dakota by I. Kolesnykiv, the church was formally constituted in 1919 in Philadelphia. It used mostly Russian for church services in spite of the fact that a large portion of its membership was Ukrainian. This situation soon led to the formation of rival Ukrainian-language congregations, in the Ukrainian Baptist Evangelical church. Among the prominent leaders of the Russian-Ukrainian union were I. Davydiuk and I. Kmeta, author of *With Christ in America: A Story of the Russian-Ukrainian Baptists* (1948). In the 1980s the union consisted of 35 churches and missions with approx 2,000 adherents. It has official publications in Russian (*Seiatel' istiny*), Ukrainian (*Siiach pravdy*), and English (*Herald*).

Russian-Ukrainian linguistic relations. Ukrainian influences on the Russian literary language date from the period of Kievan Rus'. They occurred mainly through literary and oral contacts within the Orthodox church. These influences grew during the so-called second period of South-Slavic influence (the end of the 14th to the 16th century, particularly under Metropolitan Cyprian) and from the mid-17th to the late 18th century, when, following Patriarch Nikon's reforms, many Ukrainians (and Belarusians) occupied important positions in the Russian church hierarchy and established religious schools in Russia. The grammars of L. Zyzanii and particularly M. Smotrytsky laid the foundations of Russian linguistic norms as they were later codified in B. Adodurov's (1738-50) and M. Lomonosov's (1755-7) grammars.

Under the impact of the Ukrainian pronunciation of Church Slavonic (CS), the Russian pronunciation of CS (and, in part, 17th- and 18th-century literary Russian) underwent archaization: (1) *akan'e* (the pronunciation of *o* as *a*), the change of unstressed *e* before hard consonants into *o* in CS expressions (eg, *odězda: oděza* 'clothing'), and the

mixing of etymological *ě* and *e* in pronunciation (later only in orthography, to 1917) were eliminated; (2) the spirant *h* was not pronounced *g* in religious words (eg, *Boh, Hospod', blaho* 'God, Lord, grace', until the 1930s) or in Western loanwords or names (this rule later changed; *galstuk, Gejne, Gejdel'berg* 'tie, Heine, Heidelberg' with the newer pronunciation of foreign *h* as *x*: *Xel'sinki, Ejzenxauer* 'Helsinki, Eisenhower'). The hard pronunciation of consonants before *e* in the religious books of several northern Russian Old Believer priestless groups (later eliminated in some groups through the unified pronunciation taught at Russian theological seminaries) is most likely of Ukrainian origin. The Ukrainian CS tradition also had an archaizing influence on the morphology of literary Russian in the 18th century: it brought about the abolition of (1) earlier vernacular forms used in administrative speech (-*y/-i* endings in the nom pl of neut nouns, eg, *ókny, znán'i* 'windows, sciences'; sing forms without an extended stem eg, *ímja* 'name'; endings -*ov/-ej* in the gen pl, eg, *mestóv, púlej* 'of places, of bullets'); and (2) the unstressed ending -*oj/-ej* in the nominative singular of masculine adjectives (eg, *velíkoj, sínej* 'great, blue'). It was probably then that the nominal predicate in the instrumental case became widespread (eg, *on byl/budet uchitelem* 'he was/will be a teacher').

The Ukrainian language influenced Russian through Ukrainian folk songs, which became popular among the 18th-century nobility. Beginning in the 18th century Ukrainian vocabulary, syntactic constructions, and stresses were introduced into modern literary Russian. N. *Gogol almost singlehandedly 'Ukrainianized' literary Russian. Other Ukrainian authors who wrote in Russian (eg, V. Kapnist, V. Narezhny, Ye. Hrebinka, H. Kvitka-Osnovianenko, P. Kulish, T. Shevchenko, M. Vovchok, M. Kostomarov, O. Storozhenko, H. Danylevsky, D. Mor-dovets, V. Korolenko), Russian writers who grew up or lived for some time in Ukraine (eg, A. Chekhov, I. Babel, E. Bagritsky, I. Selvinsky, N. Ostrovsky), and Russian authors writing on Ukrainian themes (eg, A. Pushkin, K. Ryleev, A. Malyskin, A. Serafimovich, I. Erenburg) used Ukrainianisms in their works for local color.

The penetration of Russianisms into the Ukrainian language was due to Russian political expansion into Ukraine beginning in the 17th century. Apart from the commercial and administrative-military terminology (eg, *sóbol', lazútyk, prykáz* 'sable, scout, government department'), Russianisms began to enter literary Ukrainian of the 17th to 18th century through the elevated and chancery style of writing as common Ukrainian-Russian lexical and phraseological Church Slavonicisms (eg, *vrah, dyjávol* 'enemy, devil') and loanwords from other languages (eg, *soldát* 'soldier' from the French), and replaced Ukrainian folk expressions, Polish calques, and Polonisms. The initiators of these processes were educated 17th- and 18th-century religious and secular writers who (in the tradition of 16th- and 17th-century Ukrainian-Belarusian unifying tendencies) wrote for both Ukrainian and Russian readers. Ukrainian authors who moved to Russia (Ye. Slavy-netsky, S. Yavorsky, D. Tuptalo, T. Prokopovych, and others) replaced the more colorful Ukrainianisms in their language with neutral Church Slavonicisms and even Russianisms. An even more Russified literary language with a Russified phonetics and morphology was introduced at the *Kievan Mohyla Academy in the middle of the 18th century by H. Kremianetsky and S. Myslavsky

and in government institutions after the abolition of the Hetmanate in Left-Bank Ukraine. H. *Skovoroda wrote in that language.

With the compulsory introduction of Russian pronunciation for the more or less orthographically, lexically, and grammatically unified 'Ukrainian-Russian' literary language in the 18th century, this language became entirely severed from its Ukrainian phonetic base. Common (Ukrainian-Russian) and Church Slavonic lexemes came to be considered Russianisms. In Orthodox church usage the Russian pronunciation of Church Slavonic texts became the norm in the 19th century.

The appearance and evolution of modern *Standard Ukrainian (SU) in the first half of the 19th century meant the rejection of the corrupted older literary language. The new language was almost devoid of Russianisms. Its journalistic and scientific style and terminology were developed under Austrian rule in 19th- and early-20th-century Galicia and Bukovyna by the borrowing of words from Polish, German, and Czech instead of Church Slavonic. In the UNR and Soviet Ukraine the normalization process of the 1920s tended to abolish unacceptable foreign elements in word formation, vocabulary, and syntax and to introduce neologisms better suited to the vernacular-folkloric style of the Ukrainian language (see *Purism).

This process was cut short by administrative interference in the 1930s and replaced by compulsory linguistic Russification (see *Language policy). In orthoepy and inflection only the Ukrainian dialectal pronunciations and morphemes that coincided with those in Russian were maintained. The most glaring Russification took place in *orthography and scientific *terminology. Recently created and already partly assimilated neologisms were replaced by new calques from the Russian, often without their being adapted to the phonetic requirements of Ukrainian; for example, the change of *o*, *e* into *i* was ignored (eg, the Russian calques *vzvod*, *pidhotovka* 'platoon, training'), while the non-Ukrainian change of *e* into *o* (eg, *ročot*, *pol'ot* 'gun crew, flight') and the Russian prefix *s* (eg, *snarjad* 'cannon/bullet shell') were retained. Western loanwords that had been assimilated without the mediation of Russian and which differed phonetically from the corresponding Russian ones were replaced with the Russian forms (eg, *lampa*, *klub*, *proekt*, *dialekt*, *Hehel'* were substituted for *ljampa*, *kljub*, *projekt*, *dijalekt*, *Hegel'* 'lamp, club, project, dialect, Hegel'). Neologisms introduced in the 1920s were replaced with loanwords existing in Russian (eg, *ekvator*, *poljus* replaced *rivnyk*, *bihun* 'equator, pole'). Russian suffixes were used widely in the word formation of scientific terms: *-čyk/-sčyk* (eg, *pikirovščyk* instead of *pikuval'nyk* 'dive-bomber'); *-tel'* (eg, *začynatel'* instead of *započatkuvač* 'starter'); *-ka* (for names of actions, eg, *zakl'opka* instead of *zaklepuvannja* 'riveting'); *-o/-e-vydneyj* (eg, *konusovydneyj* instead of *stizhkuvatyj* 'cone-shaped'); *-ščyj*, *-a(ju)čyj*, *-ujučyj*, *-všyj* (for active participles, eg, *trudjaščyj/sluzhačyj*, *spivčuvažujučyj*, *zaisnuvažujučyj*, *peremihšyj* instead of *pracivnyk*, *spivchutlyvyj*, *zaisnuvalyj*, *peremožnyj* 'laboring/laborer, sympathizing/sympathetic, existing, conquering/triumphant'); *-myj* (for passive participles, eg, *ljubymyj* instead of *ljublenyj* 'loved'); and *-yčaty* (in verbs, eg, *važnyčaty* instead of *vdavaty važnogo* 'to feign importance').

The pressure for Russification was eased somewhat in 1939–41 (as a concession to the newly annexed Western

Ukrainians) and 1955–67. It rose again in the late 1960s, and was justified by the Party's theories on the creation of an 'areal super language' and on Russian as the 'second native language' of all the Soviet peoples. This time the offensive was directed against the language of Ukrainian belles lettres: words differing from Russian ones were rejected as 'unviable,' 'archaisms,' and 'limited dialecticisms,' and neologisms had to be borrowed from Russian.

Phonetic and lexical Russianisms are used mainly by Russified urban dwellers and workers in southern and eastern Ukraine and by army veterans in rural areas. Colloquial Russianisms are most widespread among speakers of the eastern Ukrainian dialects in the Donbas, the steppe oblasts, and the former USSR outside Ukraine. They are not as common in Slobidska and in Left-Bank and Right-Bank Ukraine. Since the Second World War they have spread to the dialects of Galicia, Bukovyna, and Transcarpathia.

There are various types of Russianisms: (1) phonetic word forms taken from Russian (eg, *fakul'tet*, *z vjeterkóm* 'faculty, with a breeze [ie, a fast drop in a mine shaft elevator]'); (2) grammatical categories (differentiating between predicative and attributive forms, eg, *ščaslyva junist' nam daná* 'a happy youth is given us' and *dána vy-mova xybna* 'the given pronunciation is wrong'); (3) inflectional morphemes (eg, *profesorá*, *xodimtel'pidemte* instead of *profesory*, *xodimo* 'professors, let's go'); (4) word-forming morphemes (eg, *pokažčyk*, *pidšývka*, *bezdíl'nyčaty* instead of *pokaznyk*, *pidšyvannja/pidšyttja*, *bajdykuvaty* '[book] index, lining, to loaf'); (5) semantic forms (eg, *napravlennja*, *zbutysja*, *zakazaty* instead of *naprjamok*, *zdijsnytysja*, *zamovyty* 'direction, to be realized, to place an order'); (6) syntactic forms (eg, *ne ženysja na bahatij*, *narada po pytan'nx* instead of *ne ženysja z bahatoju*, *narada z pytan'* 'don't marry a rich [woman], conference on questions of'); (7) names of places in and outside Ukraine (eg, *Rovno*, *Sjeverodonec'k*, *Buxarest* instead of *Rivne*, *Sivers'kodonec'ke*, *Bukarešt*); and, mostly, (8) phrases and words (eg, *dobro požalovaty!*, *pryjmaty miry*, *polosá*, *ljubýj*, *pryjom*, *daže*, *l'otčyk*, *postrojka* instead of *vita-jte!*, *porobyty xaxody*, *smuha*, *buđ'-kotryj*, *zasib/sposib/pidxid*, *navit'*, *letun*, *pobudova* 'welcome!, to take measures, belt/zone, any [one], device/means/approach, even, pilot, construction'). In colloquial speech many lowbrow phonetic Russianisms, including argot and slang words, and diminutive forms of personal names (eg, *Ser'oža*, *Svjeta* instead of *Serhijko*, *Svitlanka*) are used frequently.

In the eastern Ukrainian dialects there are many common old Ukrainian-Russian lexemes and syntactic constructions that were used in 19th-century literary Ukrainian and still appear in poetry, but are not part of the normative vocabulary and syntax (eg, *hórod*, *hod*, *svád'ba*, *posobyty*, *u mene je*, *u mene bolyt' holova* [cf SU *misto*, *rik*, *vesillja*, *dopomohty*, *ja maju*, *meni bolyt' holova*] 'town, year, to help, I have, I have a headache').

Russian-Ukrainian linguistic relations have been studied by P. Zhytetsky, O. Kurylo, M. Sulyma, M. Hladky, O. Syniavsky, S. Smerechynsky, R. Smal-Stotsky, V. Chaplenko, I. Bilodid, Y. Bahmut, H. Izhakevych, F. Sereda, H. Hnatiuk, D. Miroshnyk, A. Shylovsky, B. Sharpylo, R. Boldyrev, O. Serbenska, V. Stolbunova, V. Iliencko, M. Rohal, L. Korobchynska, T. Chertorizhskaia, N. Arvat, N. Golubeva, L. Evdokimova, A. Evgrafova, B. Antonenko-Davydovych, G.Y. Shevelov, and others. In Ukrainian dialectal areas and compact colonies outside the official

borders of Ukraine – in the adjacent Kursk, Belgorod, Voronezh, and Rostov oblasts of the Russian RSFSR, and in Moldavia, the Kuban, the Ural region, Siberia, and Soviet Central Asia and the Far East – Russian-Ukrainian linguistic relations have been determined by the dominant influence of Russian in all spheres of life and the absence of Ukrainian schools, institutions, press, and mass media. The Russified transitional Ukrainian-Russian dialects in Korotoiak county, Voronezh gubernia, have been studied and described by N. Grinkova; in the Voronezh, Belgorod, and Kursk regions, by A. Beskrovny, F. Medvedev, V. Sobinnikova, G. Denisevich, A. Pashkivsky, and V. Titovskaia; in the Don region, by A. Mirtov and K. Udovkina; in the Kuban, by I. Shalia, V. Chistiakov, N. Bushina, M. Sadilenko, E. Tarasenko, O. Sheinina, M. Shabalin, N. Fedorenko, and I. Cherednychenko; in the Volga region, by A. Dulzon, L. Barannik, A. Severianova, and I. Valchenko; in Kirgizia, by S. Leiferman; in the Far East, by A. Georgievsky and T. Nazarova; and in Moldavia, by L. Ermakova, Z. Riapolova, and Yu. Listrova.

O. Horbach

Russification. A set of policies or processes encouraging non-Russians to adopt the Russian language and culture and thus increasing Russian political domination in Ukraine and other Eastern European countries.

The rapid expansion of Muscovy and then of the Russian Empire was connected with the Russification of the indigenous peoples of eastern Europe and northern and central Asia. The smaller nations or tribes were assimilated by the Russians. The most ambitious and talented elements of various nationalities were drawn to the administrative, industrial, and cultural centers of the empire and became Russified. Also Russified were many scholars and specialists from Western Europe who made their careers in Russia. Some figures of Balkan and even Polish and Galician (see *Russophilism) origin looked toward a powerful Russia for protection against Turkey or Germany (or Austria) and became Russified.

Ukraine came under increasing Russification pressures after the *Pereiaslav Treaty of 1654. Ukrainian autonomy was gradually restricted and finally abolished. In 1720 it was forbidden to print books in Ukrainian, and Ukrainian redactions of Church Slavonic books had to be checked against Russian redactions 'to avoid any discrepancies.' The Governing Council of the Hetman Office (est 1734) was given secret instructions to promote the merging of the two nations through intermarriage. During the reign of Catherine II a wide Russification program was implemented in Ukraine by the Second Little Russian Collegium under P. Rumiantsev. Russian became compulsory in the schools and in publications. The language of instruction at the Kievan Mohyla Academy was switched to Russian. Russian was adopted as the administrative language in the Orthodox church, and Church Slavonic, used for sermons, had to be pronounced in the Russian way. The Holy Synod in 1769 did not permit the Kievan Cave Monastery to print primers in Ukrainian. The policy of Russification was extended gradually into all spheres of social life, first in Left-Bank Ukraine, Kiev, and Slobidska Ukraine, and after the suppression of the Polish uprising (1830–1) in Right-Bank Ukraine as well.

The imperial government sharply increased its Russification efforts in the second half of the 19th century: the *Valuev circular (1863) and the *Ems Ukase (1876) blocked the development of Ukrainian literature until the Revolution of 1905. Even then some restrictions on the Ukrainian language and literature remained in force, and during the First World War Ukrainian publications were banned in Ukraine. Nevertheless, in spite of government efforts, until 1917 Russification was limited largely to the cities and industrial centers, which were inhabited by Russians and the higher strata (the intelligentsia, landowners, clergy, and burghers) of the indigenous society. Some members of these strata maintained Ukrainian traditions, language, and culture. The bulk of the Ukrainian population, the peasantry, remained Ukrainian and was not deeply affected by the Russification of education and church life. Yet long years of military service left a lasting mark on a limited segment of the common people.

The national revival and de-Russification of Ukraine that began with the 1917 Revolution was interrupted by the Soviet occupation in 1919–20. With the consolidation of Soviet power the Russians regained their dominant position in Ukraine. Russian became the language of the Party and government: most of the official press, decrees, and announcements were published in Russian. Most of the books printed in 1919–23 were Russian. The *Ukrainization of the Soviet Ukrainian government and the educational and cultural institutions met with much opposition from Russians and Russified elements. Soon after its inauguration in 1923, the process was slowed down. In 1927 the CC CP(B)U decided to 'recognize the special importance of the Russian language.' By 1930 there was active opposition to Ukrainization in the Party and a demand to revoke the policy. In 1932–3 the Party switched to an extreme anti-Ukrainian course: the cultural, state, and Party activists who had implemented Ukrainization were arrested and either imprisoned or shot. Ukrainization in the Kuban and other regions of the RSFSR settled by Ukrainians was replaced by intensified Russification.

In contrast to the tsarist period, under the Soviet regime Russification encompassed all Ukrainian territories, administrative and ethnic, and all social strata, including the peasantry. It was conducted by the enormous state and Party machine with the active support of the Russian minority in Ukraine and the Russian Orthodox church. Russification efforts after the Second World War, particularly in newly annexed Western Ukraine, gave rise at the beginning of the 1960s to a dissident movement among Ukrainian intellectuals and some workers. They demanded that Ukrainian be introduced as the language of instruction in higher and special secondary schools and in preschool education and as the language of administration in public institutions, enterprises, communications, and trade. They wanted the Academy of Sciences, the universities, and state publishers to issue more publications in Ukrainian. The government responded with repressions and increasing Russification pressures.

Soviet efforts at Russifying the non-Russian nationalities were based on a Soviet theory of the merging of nations. The theory tacitly assumed that the one Soviet nation being formed was Russian in language and culture. Shortly after N. Khrushchev came to power, he adopted an insidious plan to force the non-Russian languages out of elementary and secondary education. In April 1959 a

new law was passed by Ukraine's Supreme Soviet giving parents the right to decide which schools, Russian-language or native-language, their children would attend. Given the state-bestowed advantages enjoyed by Russian-speakers in higher education, political and economic institutions, and cultural life, this seemingly democratic law was designed to make the non-Russian nationalities the agents of their own Russification. The Tashkent Conference of 1975 was devoted to ways of improving the teaching of Russian to non-Russian children. The Ukrainian Ministry of Education developed a plan in 1983 for upgrading Russian-language instruction in Ukraine. By 1987 only 16 percent of the schools in the national and oblast capitals were Ukrainian, 12 percent were mixed (predominantly Russian), and 72 percent were Russian. In Chernihiv, Donetsk, Symferopil, and Voroshylovhrad there was no Ukrainian school at all.

Apart from pedagogical schools, vocational-technical and specialized secondary schools were almost completely Russified by the 1960s. This was true of higher education as well. Except in the departments of Ukrainian language and literature only Russian was used at the universities of Dnipropetrovske, Odessa, Kharkiv, and Donetsk. At Kiev, Lviv, Uzhhorod, and Chernivtsi universities some lecturers in the social sciences used Ukrainian. All the polytechnical, medical, industrial, commercial, agricultural, and economic institutes, except for a few in the western oblasts, taught only in Russian. In 1960 only 62.5 percent of the students in Ukraine's higher educational institutions were Ukrainians (30 percent were Russians), and only 58.3 of the specialists with a higher education in Ukraine were Ukrainians (26.5 percent were Russians). In 10 years the number of higher education textbooks in Ukrainian fell from 168 titles (1970) to 38 (1980), while those in Russian rose from 263 to 422. All candidate and doctoral dissertations submitted in the academy were written in Russian.

The scientific literature published in Ukraine indicates strong discrimination in favor of Russian. Of 947 scientific titles published in Ukraine in 1970, 64.3 percent were in Russian. By 1980 Russian titles constituted 86.5 percent. Similarly, the percentage of Russian-language journals published by the AN URSR (now ANU) rose from 36.6 in 1969 to 76.2 in 1980. The production of Ukrainian books and booklets in general fell from 4,041 titles in 1961 to 2,981 in 1973, while the number of Russian titles remained unchanged at slightly above 4,400. The number of Ukrainian journals increased from 51 in 1961 to 63 in 1970 and fell to 50 in 1980, while the number of Russian journals published in Ukraine rose steadily from 26 to 41 to 50. Moreover, most of the Ukrainian journals were devoted to literature and art. According to some estimates the Ukrainian-language holdings of public libraries in Ukraine accounted for only 10 to 20 percent of the total holdings. Discrimination in favor of Russian culture was evident also in other fields; the number of museums in Ukraine, for example, fell from 174 in 1940 to 147 in 1972, while in Russia the number rose from 592 to 610. The most frequent and available radio and TV programs in Ukraine were Russian, either produced in Ukraine or beamed in from Russia.

Buttressing the efforts at Russification was a widespread attitude that the Soviet people could gain access to world culture and science only through Russian. A subtle

form of Russification was practiced by linguistic institutes: their task was to make the vocabulary and grammar of literary and scientific Ukrainian increasingly similar to Russian (see *Standard Ukrainian).

The central government resettled people and manipulated migration patterns so as to promote Russification (see *National composition and *Migration). Russians were encouraged in various ways to move to Ukraine, and large numbers of them were settled there (see *Russians in Ukraine). Whereas Russians accounted for only 8.2 percent of Ukraine's population (within its postwar borders) in 1926, by 1959 they accounted for 16.9 percent, and by 1989, for 22.1 percent. The practice of resettling whole villages from the RSFSR to Ukraine continued even under Perestroika. At the same time millions of Ukrainians were resettled by force or attracted by various incentives to move to other parts of the USSR. By 1989 there were, for example, 185,000 Ukrainians in the Baltic countries, whereas before 1945 there were virtually none. In 1989 almost 6.8 million Ukrainians were scattered throughout the USSR outside Ukraine.

The success of the different Russification policies is evident to some extent in the linguistic assimilation of Ukrainians. In 1926, 4.5 percent of Ukrainians in Ukraine considered Russian their native tongue. By 1959 this figure had risen to 6.5, and by 1989, to 12.2. In 1989, 78 percent of Ukraine's population was fluent in Ukrainian, and 78.4 percent, in Russian. Russian is more prevalent in the urban areas, where only 72.1 percent of the residents are fluent in Ukrainian but 87.4 are fluent in Russian. The most Russified oblasts in Ukraine are those in which Russians constitute the highest percentage of the population: Crimea, Donetsk, Luhanske, Kharkiv, Odessa, and Dnipropetrovske.

Ukrainians in other Soviet republics have been subjected to even stronger Russification pressures. They have no national rights – no Ukrainian schools and no Ukrainian publications (books and press) of their own. Likewise, access to Ukrainian materials from Ukraine is made difficult for them. Ukrainians in the RSFSR along the Ukrainian border (in Belgorod, Kursk, Voronezh, and part of Rostov oblast and Krasnodar krai) constituted 66 percent of the population there in 1926. By 1970 only 9 percent of the population in the same regions was Ukrainian. In Subcaucasia the percentage of Ukrainian inhabitants fell from 33.4 in 1926 to 2.3 in 1970. In 1926 there were 2,318,000 Ukrainians in the Asiatic part of the USSR, and in 1970 there were 2,235,000.

When M. Gorbachev's policy of Glasnost made it possible to discuss basic social problems, Russification became one of the first and central issues to be raised in the Ukrainian press. The Taras Shevchenko Ukrainian Language Society was founded in February 1989 to revive the Ukrainian language in Ukraine, and at the end of October 1989 the Supreme Soviet of the Ukrainian SSR adopted the Languages Act establishing Ukrainian as the republic's official language. The act's schedule for the conversion of state institutions, enterprises, civic organizations, and mass media to Ukrainian was based on the premise that the effects of Russification could be overcome only gradually, through patient and persistent effort.

Russka pravda (Ruthenian Truth). A Russophile newspaper published in Vienna in 1888–92 (68 issues appeared). It was intended for the Russophile community in Bukovyna, and published regular articles about life there and especially about the Orthodox church. It also devoted considerable attention to developments in the Russian Empire. The editors were H. Kupchanko and then K. Kozarkevych and Y. Bukhovyt'sky; after 1892 Kozarkevych edited and published **Pravoslavnaiia Bukovina*.

Russkaia beseda (Russian Colloquy). A Russian Slavophile journal published in Moscow as a quarterly (1856–8) and bimonthly (1859–60). Among its Ukrainian contributors were P. Kulish (a Russian version of his *Chorna rada* [The Black Council], 1857), M. Vovchok (Russian peasant stories, 1858), T. Shevchenko (Russian and translated works), M. Maksymovych, and D. Mordovets (Mordovtsev).

Russkaia beseda (Russian Colloquy). A Russian Slavophile journal published monthly in St Petersburg in 1894–6. In 1894 it was called *Galitsko-russkii vestnik*. Edited by V. Dragomiretsky, it supported the Russophile movement in Western Ukraine. Contributors included the Galician Russophiles I. Hushalevych and Yu. Yavorsky.

Russkaia pravda (Ruthenian Truth). A Russophile weekly newspaper published in place of **Pravoslavnaiia Rus'* in Chernivtsi from October 1910 to 1914 by A. Gerovsky. Edited by I. Tsurkanovych and, from 1912, I. Orobets, it continued the anti-Ukrainian policies of its predecessor.

Russkaia Rada. See Ruthenian Council.

Russkaia rada (Ruthenian Council). A Russophile semi-monthly newspaper published in 1871–1912 in Kolomyia. It contained articles on village life, politics, economics, history, and popular enlightenment. The newspaper was published and edited by M. Bilous, initially with the assistance of Rev I. Naumovych.

Russkaia shkola (Ruthenian School). A Russophile weekly newspaper for teachers, published in Prešov by the Union of Ruthenian Teachers in Slovakia from 8 June 1926 to 1931. The four-page paper came out in **yazychiie*. It defended the interests of teachers, criticized the official Slovokization policy, and promoted a higher educational standard in the region. Its editor was I. Pieshchak, and its manager was I. Hender.

Russkaia volia (Ruthenian Will). A popular Russophile periodical published semimonthly in Ternopil (1906–7, 1910–11), Peremyshl (1908–9), and Zolochiv (1910) by F.

Protsyk and M. Matveikov. The editors were A. Stelmakh, M. Riznychok, and M. Krupa.

Russkaia zemlia (Ruthenian Land). A Russophile weekly newspaper published in Uzhhorod from June 1919 to 1938. The organ of the Carpatho-Russian Labor party, it frequently attacked the Ukrainian nationalist movement in Transcarpathia and advocated the creation of a unitary 'Russian' state encompassing Transcarpathia, Bukovyna, the rest of Ukraine, and Russia. Its editors included D. Vislotsky, V. Nichai (1919–20), A. Gagatko, and I. Tsurkanovich (1922–3, 1925–38).

Russkii golos (Ruthenian Voice). A Russophile weekly paper published in Edmonton from April 1913 to July 1916 in Russian and **yazychiie*. It tried to appeal to Orthodox Ukrainians and harshly criticized the Catholic church. It also opposed the teaching of Ukrainian in Alberta schools. The newspaper's publisher was V. Cherniak, and its editors were V. Hladyk (1913–14) and M. Ostrovsky (1914–16). In 1914 it was adopted as the organ of the Russian National Association in Canada. In total, 158 issues appeared.

Russkii golos (Russian Voice). A weekly newspaper of the Russophile right-wing community in Galicia, published in 1922–39 in Lviv. It advocated the restoration of a unitary Russian Empire and co-operation with the Russian White émigrés in Poland.

Russkii narod (Ruthenian People). A Russophile weekly newspaper published in Winnipeg from November 1914 to May 1919 (in 1918–19 on an irregular basis). Articles appeared in both Russian and **yazychiie*. The newspaper accused the organized Ukrainian community of being pro-Austrian during the First World War and opposed Ukrainian independence. *Russkii narod* also campaigned against the teaching of Ukrainian in Manitoba schools. In 1918 the paper was adopted by the newly created League for the Liberation of Carpatho-Russia, and began advocating the annexation of Transcarpathia to Russia. Its editors were V. Hladyk and P. Samilo.

Russkii solovei (The Ruthenian Nightingale). A collection of about 200 folk songs and poems in various Ukrainian dialects, published in Uzhhorod in 1890. Edited by M. *Vrabel, it contained Ukrainian folk songs from the Bačka and Prešov regions, Transcarpathia, and Galicia as well as verses by O. Dukhnovych, O. Pavlovych, and several versifiers from Bačka, such as P. Kuzmiak and H. Segedi. The book was financed partly by the Ukrainian community in Bačka; it is therefore justly claimed to be the first book published by Bačka Ukrainians. It played an important role in preserving their national identity.

Russkii vestnik (Ruthenian Herald). A weekly organ of the Autonomous Agrarian Alliance in Transcarpathia, published from 1923 to 1938 in Uzhhorod. Published in the artificial **yazychiie* by A. *Brodii and edited by him and I. Shpak, it was Russophile and pro-Hungarian in orientation and was supported by official Hungarian circles. The paper was closed down by the government of Carpatho-Ukraine in November 1938.

Russkoe slovo (Ruthenian Word). A Russophile newspaper published in Lviv weekly in 1890–1912 and semi-monthly in 1913–14. It contained mostly reports on village life and articles on political and economic affairs, and also many biographies of prominent Russophiles. After the split in the Galician Russophile movement in 1909, *Russkoe slovo* became the organ of the *Old Ruthenians. Its longtime editor and publisher was V. Lutsyk. He was succeeded by Y. Markov, I. Pelekh, H. Hanuliak, and others.

Russkoe slovo (Ruthenian Word). A popular weekly (semimonthly from 1933) published in Prešov by the Greek Catholic Prešov eparchy from 8 March 1924 to 23 December 1938. Published in **yazychiie*, it contained articles on educational, cultural, and political subjects. It continued the traditions of O. Dukhnovych in defending the rights of the Ruthenian (Ukrainian) population in the Prešov region, opposing Slovakization, and rejecting ties with the Soviet Union. Until 1930 local Ukrainophile populists, such as D. Zubrytsky and I. Nevytska, contributed to the paper. Its editors were S. Hoidych, S. Diulai, F. Roikovykh, I. Pieshchak, A. Zubrytsky, and A. Demianchuk. The conservative religious newspaper *Da priidet tsarstviie tvoie* (1928–38), printed partly in Roman characters, came out as a supplement to *Russkoe slovo*.

Russophiles (*rusofily*, or *moskovofily*). The adherents of a sociopolitical current that appeared in the 19th century among Ukrainians in Galicia, Transcarpathia, and Bukovyna who considered themselves to be a part of the Russian nation. Russophilism covered a broad range of cultural and political attitudes and incorporated enthusiasts, sympathizers, and those looking for assistance in their national struggle. Underlying the notion of Russophilism was the implicit or explicit assumption of eventual political union with the Russian Empire. Such sympathies were encouraged by the imperial Russian authorities, who provided the Russophiles with substantial subsidies and moral encouragement.

The reasons for the emergence of Russophilism are varied. The linguistic and cultural similarities between Russians and Ukrainians at a time before the crystallization of a modern Ukrainian national consciousness represented one factor. Also important was the marked sense of inferiority many leading Ukrainians felt in the face of Polish culture. The complex was generated in part by the pseudoaristocratic aspirations of the Galician intelligentsia of the period as well as by their disdain for (and desire not to be identified with) the common people. Galician Russophiles sought to fill a cultural void in their lives by identifying with the Russian nation and the achievements of a highly developed Russian culture. Finally, social frustration came into play, as many prominent Ukrainians began looking to Russia as their savior after political changes in Austria-Hungary during the 1860s had diminished their power and prestige.

The first manifestations of Russophilism appeared in Transcarpathia in the late 18th and early 19th centuries in the use and propagation of the Russian language and the adoption of Russian etymological practices in Ukrainian; in travels by local scholars and students to Russia for study and work (Yu. Venelin, P. Lodii); in interest in Russian cultural life; and in the use of Russian by local Ukrainian authors. The harbinger of Russophilism in Galicia

was the historian D. Zubrytsky, who was strongly influenced by the ideas of the Russian historian and Pan-Slavist M. *Pogodin. A professor at Moscow University, Pogodin sojourned in Lviv in 1835 and 1839–40 and developed a following among members of the Galician Ukrainian intelligentsia. The resident priest of the Russian embassy in Vienna, M. *Raevsky, was also a major figure in developing Russophile sympathies among Slavic intellectuals from the 1840s.

The Russophiles did not emerge as an identifiable group until the 1860s. Throughout the 1850s they existed in a nascent form as the secular wing of the so-called *Old Ruthenians, with whom they shared a common concern about linguistic and cultural Polonization (playing a key role in the *alphabet war) and church Latinization. Centered around the so-called Pogodin colony, the emerging movement included figures such as B. Didytsky, Ya. and I. Holovatsky, I. Hushalevych, M. Malynovsky, A. Petrushevych, S. Shekhovych, and Zubrytsky. Russophilism became particularly important in the 1860s, when the Austrian emperor granted the Polish gentry a free hand in an autonomous Galicia. (In contrast, the Russian tsar was punishing the Polish gentry in Right-Bank Ukraine for its participation in the Polish Insurrection of 1863–4.) The Russophiles split with the Old Ruthenians, who now constituted a spent force, and began to define themselves more clearly as a distinct group.

Didytsky dealt with linguistic issues in his anonymous pamphlet *V odyn chas nauchyt'sia malorusynu po velikorussky* (In One Hour a Little Russian Can Learn Great Russian) and articles in the newspaper *Slovo*, and I. Naumovych outlined the political platform of the Russophile movement in the Galician parliament and in articles in *Slovo*. The Russophiles were adherents of the notion of a common origin of the three 'Rus' nations. They used the vernacular only for works of popular education intended for distribution among the peasantry. More commonly they employed the macaronic **yazychiie* among themselves (only occasionally using Russian). *Yazychiie* was a creation of the Russophiles, who lacked fluency in Russian and were fascinated by the forms of Old Church Slavonic; the use of *yazychiie* also fed their aristocratic pretensions by differentiating them from 'common folk.' In all cases they adhered to an etymological orthography.

While maintaining a façade of loyalty to the Habsburg realm the Russophiles continued developing their pro-Russian orientation. Increasingly their Russophile sympathies brought them remuneration. The Greek Catholic clerics and teachers who emigrated to the Kholm region (within the Russian Empire) in the 1860s, ostensibly to preserve the purity of the rite in the face of Polish-inspired attempts at Latinization, secured rewarding positions. Scholarships granted by Russian institutions to students in Galicia further entrenched Russophile tendencies in the area, as did the loss of Austro-Hungarian prestige after the empire's defeat in the Austro-Prussian War of 1866. In 1867 Ya. Holovatsky and Naumovych received a stipend. In the following year V. Ploshchansky and K. Klymkovych received financial assistance. By the end of the decade a significant part of the Ukrainian intelligentsia of Galicia, secular and clerical, consisted of Russophiles. They came to control the Stauropigion Institute, the People's Home in Lviv, and the Halytsko-Ruska Matytsia society. In 1870 they gained control of the *Ruthenian

Council, which was to have continued the traditions of the Supreme Ruthenian Council of 1848.

In addition to assuming leading positions in existing structures the Russophiles established their own bodies. In 1868 a Russophile cultural organization, *Ruskaia Osnova*, was established in Vienna. More significantly, the *Kachkovsky Society was formed in Kolomyia in 1874 (its headquarters moved to Lviv in 1876). Russophile publications included *Slovo* (1861–87), *Ruskaia rada* (1871–1912), *Nauka* (1871–1939, with interruptions), *Prolom* (1880–2), *Novyi prolom* (1883–7), *Chervonaia Rus'* (1888–91), *Halytskaia Rus'* (1891–2), *Halychanyin* (1893–1913), and *Russkoe slovo* (1890–1914). *Nauka* and the reading rooms of the Kachkovsky Society were the main centers of Russophile cultural and educational work in the villages.

The principal counterbalance to the Russophiles in Galicia was the Ukrainophile populist group, which had established itself initially around the *Prosvita society in 1867. Throughout the remainder of the 1860s and through the 1870s the populists and Russophiles maintained a hostile rivalry and an ongoing struggle for control of national institutions. In 1877 a radical group of Ukrainophiles led by I. Franko and M. Pavlyk managed to wrest the students' Academic Circle from Russophile control.

The Russophiles lost their pre-eminent position in Galician Ukrainian society during the 1880s, in large measure owing to the upsurge in support for the Ukrainophile populists. The Russophiles also suffered a major setback in 1881 when a group of their prominent leaders (including O. Hrabar, A. Dobriansky, Naumovych, Ploshchansky, and Y. Markov) was tried for treason in Lviv. Although the accused were acquitted (after which a number moved to the Russian Empire), the trial tainted the movement and weakened its support. Although the Russophiles remained entrenched in the institutions they had come to dominate, and continued as a significant presence among the Galician clergy, they clearly constituted a minority party.

In the early 20th century the Russophile movement underwent some major changes. In 1900 the largely Russophile Ruthenian Council initiated a political body, the Ruthenian People's party. The Russophiles had some limited political success. In the 1906 elections to the Viennese parliament the Russophiles elected 5 deputies (compared to 27 for the populists). They managed, however, to garner support from Galician Poles, and in 1908 they elected 8 representatives to the Galician provincial diet (compared to 12 representatives of pro-Ukrainian parties).

At the same time a more radical faction of Russophiles emerged. Faced with a vigorous and politically and economically organized Ukrainian national populist movement, the younger faction called for the complete national and cultural integration of Galician Ruthenians with Russians and the adoption of the Russian language as a literary standard. The group became particularly active after the conclusion of the Russo-Japanese War and an escalation of tensions between the Russian and Austro-Hungarian empires. It allied itself with a resurgent current of *Pan-Slavism in the Russian Empire that sought to annex Galicia, Bukovyna, and Transcarpathia and thus 'reunite' all the lands of ancient Rus'.

In 1909 the Russophiles split into two factions, the *starokursnyky* (Old Liners) and the *novokursnyky* (New Liners). The leading activists of the former faction included V. Davydiak and M. Korol as well as M. Hli-

bovytsky, I. Kostetsky, V. Kurylovych, O. Monchalovsky, and Yu. Paventsky. The *starokursnyky* opposed full union with Russia, continued to use vernacular Ukrainian, and maintained their allegiance to Austria. Their official press included the newspaper *Halychanyin* and the popular weekly *Russkoe slovo*. The *novokursnyky* were led by V. Dudykevych and D. Markov. Other activists included K. and I. Cherliunchakevych, M. Hlushkevych, S. Labensky, M. Rastavetsky, K. Senyk, and O. Valnytsky. Their official organs were the daily *Prikarpatskaia Rus'* (1909–15) and the popular weekly *Golos naroda* (1909–14). The *novokursnyky* were the more active of the two groups, and they came to control most Russophile organizations, such as the Kachkovsky society, the Union of Russian Teams (sports organizations), and co-operatives. They also gained majorities in student organizations (Drug in Lviv and Bukovina in Vienna).

Russophile agitation in Galicia intensified during the years leading up to the First World War. A major reason was the material support of the Galician-Russian society. Based in St Petersburg, the group was founded in 1909 by the Russian ultranationalist V. Bobrinsky, and cultivated supporters in Galicia, which its members hoped would soon become part of the empire. Other leaders of the society were D. Verhun, E. Georgievsky (archbishop of Kholm), A. Khrapovitsky (archbishop of Volhynia), and Yu. Yavorsky (a Galician Russophile who had lived in Kiev from 1904). Galician youth were given scholarships to study in Russia, and some entered Russian Orthodox theological seminaries. Members of the Russian State Duma participated in Russophile political demonstrations. Bobrinsky conducted his pro-Russian agitation with impunity in the villages of Galicia and Bukovyna. Campaigns of conversion to Russian Orthodoxy were conducted in the Lemko region and in counties bordering the Russian empire. The religious agitation was conducted by Austrian citizens who had studied in Russia and then were sent back to Galicia as missionaries. The Austrian and Galician authorities arrested Russian Orthodox missionaries who had been sent to Galicia, or threatened to draft them into the army. In the spring of 1914 S. Benda-siuk and other missionaries were tried on charges of high treason, but were acquitted. A similar trial was held in Sighetul Marmatiei in 1913–14, with O. Kabaliuk and 180 peasants as defendants. Most of them were found guilty.

The shift among the *novokursnyky* to total support of Russian policies prompted the defection of such Russophiles as S. Drymaliuk, M. Korol, and I. Svientsitsky to the Ukrainian populists. The relative strength of the two movements was reflected in the size of their organizations. In 1914 the Kachkovsky Society had 300 reading rooms, and the Ukrainophile Prosvita society had 2,944; the Russophile Ruthenian Audit Union oversaw 106 co-operatives, and the Audit Union of Ukrainian Co-operatives, 909. In the elections to the Galician diet of 1913, 1 Russophile and 30 Ukrainophiles were elected.

Russophile activists living in the Russian Empire founded the Committee for the Liberation of Carpathian Ruthenia on 11 August 1914 in Kiev. They also issued a proclamation addressed to the 'long-suffering Russian people in Galicia,' which urged the people in that region to greet the Russian army and suggested that Ukrainian soldiers in the Austro-Hungarian army should defect to Russian forces. That and the committee's close collaboration with the Russian military authorities brought about

repercussions in Austria-Hungary, with the massive arrest of Russophiles and Ukrainian populists alike. Thousands of Ukrainians were sent to concentration camps in Thalerhof and other locations, of whom most were freed in 1915. Thousands were also executed as the Russian army advanced, some by Austrian but most by Hungarian forces. After the capture of Lviv the committee dissolved itself in favor of the Russian People's Council, headed by Dudykevych. Russophiles sought an active role in the Russian imperial administration and attempted to liquidate all Ukrainian populist elements.

After the retreat of the Russian armies from Galicia many Russophiles followed them eastward and established several settlements near Rostov-na-Donu. A substantial number of the Russophiles, now faced with the real difference between Ukrainians and Russians, became conscious Ukrainians. Some participated in the Ukrainian Revolution of 1917 in central Ukraine, and others returned to Galicia and supported the Western Ukrainian National Republic.

In 1918 the remaining adherents of Russophilism in Galicia established the Russian Executive Committee in Lviv and revived the periodical *Prikarpat'skaia Rus'* (1918–20). The Executive Committee worked with the Ukrainian Interparty Council, opposed the Polish authorities, and boycotted the elections to the Polish Sejm in 1922. Soon the Russophiles split into two groups. A left-wing faction, led by K. Valnytsky and K. Pelekhaty, established the *People's Will party, whose official press organ was *Volia narodu* (1921–8). In 1926 they joined the Sel-Soiuz group of Kholm and Volhynia to form *Sel-Rob; in the process they were compelled to drop their Russophile line and declare themselves Ukrainian-oriented. The more conservative wing of the Russophiles was based around the Russian People's Organization. Their petitions to the Polish governmental officials bore fruit when they were given control of key institutions, such as the People's Home in Lviv and the Stauropogion Institute. The Russophiles also worked closely with the Russian minority in Poland. The conservatives later split into two factions, the right-wing Russian Agrarian party and the moderate Russian Peasant Organization, but they reunited in 1931.

In the 1920s, Galician Russophiles revived the Kachkovsky society, the Ruthenian Audit Union (which in 1939 oversaw 250 co-operatives, while its Ukrainian counterpart oversaw 3,455), and other institutions. Through the 1920s and 1930s the Russophiles failed to elect a single representative to the Polish parliament, but in 1932 two of their delegates were made members of the Nonparty Bloc of Co-operation with the Government. Despite their collaboration with the Poles the Russophiles' movement went into decline, and virtually all of its members joined the Ukrainian camp.

Russophilism existed in *Transcarpathia from the second half of the 19th century, but it did not result in the establishment of a separate, distinctive group. That state of affairs reflected the uniqueness of the regional patriotism that existed there. In that period Transcarpathian Ukrainians generally considered themselves Carpatho-Ruthenians (or Rusyns). Their understanding of their national identity, however, tended to fluctuate between an uncrystallized Russophilism and a local particularism. Consequently the major patriotic Ukrainian associations or groups (specifically those that were not Magyarophile) tended to have a strong Russophile influence. That influ-

ence was reinforced by the migration of notable members of the local intelligentsia to the Russian Empire. The development of Russophilism was also influenced by the presence of imperial Russian troops in the region during the suppression of the Revolution of 1848–9 in the Habsburg monarchy. Prior to the First World War members of the Transcarpathian intelligentsia who found themselves threatened by the Hungarian authorities turned to Russia and the Pan-Slav movement for assistance. After the war there was a movement to develop Russian Orthodoxy in the region. At the same time an openly Ukrainophile movement began to develop there, which had become a major force regionally by the 1930s. A Russophile presence remained in Transcarpathia, centered largely around the *Dukhnovykh society (1923–45).

Russophilism in Bukovyna developed in reaction to the Rumanianizing policies of the local authorities. Other factors included a religious affinity to Orthodox Russia and the influence of the Russian consulate in Chernivtsi. Russophilism prompted many Bukovynian youths to leave Austria and settle in Russia. Its leading activists were V. Hlibovytsky, H. Kupchanko, and V. Prodan. Like their Galician counterparts, the Bukovynian Russophiles initially dominated the nascent national cultural (Ruska Besida) and political (*Ruska Rada society) organizations in the region, but they were eclipsed by the Ukrainian populists by the end of the 19th century.

In the Lemko region Russophile activists, such as M. Hromosiak, Ya. Kachmaryk, and D. Khyliak, established, in December 1918, the Lemko Russian People's Republic. The Russophile groups did not recognize Poland's annexation of the region in 1921. They did not remain a lasting force in the region.

A Russophile current developed among Ukrainian emigrants in North America in the early part of the 20th century, largely as a result of missionary work by the Russian Orthodox church (most notably by A. *Tovt in the United States). Its activity was subsidized heavily by the Holy Synod in Moscow, which was following a policy developed by K. *Pobodenostsev. The Synod's intent, in part, was to influence indirectly the development of Russophile sentiment in Western Ukraine, the home of most of the emigrants. Russophile activity in North America waned with the fall of the Russian Empire (and the end of subsidies) in 1917.

Russo-Turkish wars. For two centuries the imperialist powers of Russia and Ottoman Turkey fought for hegemony of the Black Sea and its coastal regions. Initially Russia's goal was to gain control of the Black Sea and its straits and thereby ensure access to the Mediterranean. Russia's expansionism was disguised by its self-appoint-

ed defense of all Orthodox Christians subjugated by Turkey, liberation of the Balkan peoples from the Turkish yoke, and prevention of Turkish and Crimean Tatar raids and pillaging in Southern Ukraine and Russia. Turkey sought to protect and retain its possessions and considered Russia the aggressor. From the second half of the 18th century the Russo-Turkish wars were linked to the gradual disintegration of the Ottoman Empire.

According to the obligations enumerated in various 17th- and 18th-century treaties with Russia the Hetman state and Ukraine's inhabitants were duty-bound to participate in Russia's wars. Thousands of Ukrainian Cossacks and peasants fought and died as allies and later citizens of the Russian Empire. In the later wars many of them volunteered to help liberate their fellow Slavs and coreligionists. All of the wars involved Ukrainian strategic interests, and during each one Russian armies passed through Ukraine, inflicting various degrees of ruin and hardship.

The war of 1676–81. In 1677 a Turkish–Crimean Tatar army invaded and ravaged Right-Bank Ukraine and took the capital, Chyhyryn. The Turks' attempt to retain Chyhyryn was repelled by a Russian-Ukrainian force led by Prince G. Romodanovsky and Hetman I. Samoilovych (see *Chyhyryn campaigns, 1677–8), and the Turks were forced to retreat. In 1681 the Ottoman Porte, the Crimean Khanate, and Muscovy signed the Treaty of Bakhchesarai, according to which Muscovy had sovereignty over the Hetmanate and the Zaporizhia, both sides agreed not to colonize the Southern Ukrainian lands between the Boh and the Dniester rivers for 20 years, and Turkey retained control of the southern Kiev region, the Bratslav region, and Podilia.

The war of 1686–99. As a member of the Holy League against Turkey, Russia began the war with unsuccessful Russian-Ukrainian Cossack campaigns against the Crimean Khanate in 1687 and 1689. Hetman Samoilovych was blamed for the failure of the first campaign and was replaced by I. Mazepa. Later Peter I undertook the Azov campaigns of 1695–6, in which he captured Oziv (Azov) in 1696. By the 1699 Treaty of Carlowitz Russia consolidated its hold over the Sea of Azov and its littoral.

The war of 1710–13. During Russia's Great Northern War with Sweden the Porte, encouraged by Swedish, French, and Austrian diplomats, declared war on Russia. In early 1711 the Russian army of Peter I and Hetman I. Skoropadsky's Left-Bank Cossack regiments defeated the Crimean Tatar army and its Cossack allies, led by P. *Orlyk, and forced them to abandon Right-Bank Ukraine. The Russian offensive in Moldavia was defeated at the Prut River, however, and the *Prut Treaty of 1711 forced Russia to abandon Oziv and to destroy its fortifications on the Azov coast.

The war of 1735–9. After the Crimean Tatars invaded Ukraine in 1735, the Russian Dnieper Army (which included Ukrainian Cossack regiments) invaded the Crimea, where they captured Perekop, Yevpatoriia, and Bakhchesarai in 1736 and Ochakiv in 1737. Another Russian army recaptured Oziv and invaded the Crimea from the east. In 1739, while Turkey was occupied with its war with Austria, the Russian army captured Khotyn. The 1739 Russo-Turkish Treaty of Belgrade granted Oziv to Russia and consolidated Russia's control over the Zaporizhia but forbade Russian fleets on the Azov Sea and Black Sea.

The war of 1768–74. The theater of the war was in Moldavia and Wallachia, where Russian troops and Zaporozhian Cossacks under the supreme command of Gen P. Rumiantsev were victorious in various battles. The Russian fleet destroyed the Turkish navy in the Aegean Sea. Under the 1774 Peace Treaty of *Küçük Kaynarca Russia gained the right to have a fleet on the Black Sea and coastal fortresses in Southern Ukraine. Weakened by the war, Turkey was forced to cede *Bukovyna to Austria in 1774. Having finally gained access to the Black Sea, Catherine II no longer considered the *Zaporozhian Sich necessary for the defense of the empire and in 1775 had it destroyed.

The war of 1787–91. The new conflict erupted as a result of Turkish efforts to regain the *Crimea, which had been annexed by Russia in 1783. Under the command of A. Suvorov, Russian forces defeated the Turks at Kinburn (1787) and Foçşani, in Moldavia (1789), and took Ochakiv and Izmail (1790). The 1791 Treaty of Iaşi confirmed Russia's annexation of the Crimea and granted Russia control of the lands between the Boh and the Dniester.

The war of 1806–12. After Turkey tried to regain the Black Sea's northern littoral, Russia again invaded and occupied Moldavia and Wallachia and routed the Turks near Rushchuk, on the Danube. Under the 1812 Treaty of Bucharest Turkey ceded *Bessarabia, that is, the territories between the Dniester and the Prut rivers, to Russia and guaranteed Russian access to shipping on the Danube.

The war of 1828–9. Hostilities began after Russia came out in support of the Greek revolution and sent troops to the Balkans and the Caucasus. In the early phase of the war a small force of Cossacks of the *Danubian Sich led by Otaman Y. Hladky went over to the Russian side. By the 1829 Treaty of Edirne Turkey accepted Russia's annexation of the islands at the mouth of the Danube and the Caucasian coast, including the fortress of Anapa, recognized Russia's title to Georgia and other Caucasian principalities, and guaranteed Russia access to the Danube and the Black Sea straits.

The war of 1853–6. See *Crimean War.

The war of 1877–8. In 1877 Russia declared war on Turkey in support of the Balkan rebellions. Many Ukrainian volunteers had already joined the Herzegovinian and Bulgarian uprisings and the Serbian army. Several (eg, S. Krut, A. Lysenko, V. Yanovsky) wrote memoirs about their experiences. Thousands of Ukrainians fought in Russian units during the Balkan campaign, and committees that gathered funds and medical aid for Serbian and Bulgarian soldiers were formed in Ukraine. In 1878 the Russo-Turkish Treaty of San Stefano created a 'Great Bulgaria' as Russia's satellite. At the Congress of Berlin, however, Austria-Hungary and Britain did not accept the treaty, imposed their own partition of the Balkans, and forced Russia to retreat from the Balkans.

Rustical lands. Peasant landholdings in the Austro-Hungarian Empire, including the Western Ukrainian territories, Galicia (from 1772), and Bukovyna (from 1774). The agrarian reforms introduced by Joseph II in the 1780s specified that rustical lands belonged to the peasants and guaranteed the peasantry the use of the lands in perpetuity. The peasants, however, were not permitted to sell or divide them. Nobles were legally barred from purchasing the lands, but between 1787 and 1847 nobles were able to acquire over 5 percent of all rustical lands. In 1844 rustical lands in eastern Galicia accounted for 70 percent of all the arable land, 68.5 percent of the meadows, 63.7 percent of the pastures, but only 0.7 percent of the forests (of which the nobles claimed some 98 percent). Rustical lands represented almost 49 percent of all the land, whereas over 47 percent was owned by the nobility. With the abolition of serfdom in 1848, the rustical lands were transformed into the private holdings of individual peasants.

Rustytsky, Yosyp [Rustyc'ky], [Josyp], b 12 April 1839 in Ukraine, d 26 April 1912. Surgeon. A graduate of Kiev University (1861), he worked in its surgery clinic and abroad with the leading surgeons in Berlin, Vienna, Würzburg, Strassburg, and Paris. He lectured at Kiev (from 1874) and Kazan (1889–98) universities and worked in Red Cross hospitals in Kiev. His publications dealt chiefly with treating damaged corneas, bone putrefaction, and malignant tumors and with the history of surgery.

Rusyn, Pavlo (Paulus Ruthenus; pen name of Pawel Procler), b ca 1470 in Krosno, in the Lemko region, d November 1517 in Stary Sącz, Poland. Educator and humanist poet of Ukrainian origin (see *Humanism). A graduate of Greifswald University (1499), he received his master's degree from Cracow University in 1506 and taught classical literature there (1507–8, 1511–16). Among his students were Copernicus and the Polish Latin poets Jan from Wislica and J. Dantyszek. Collections of his Latin verse were published in Vienna in 1509, in Cracow in 1887, and in Warsaw in 1962; several poems in Ukrainian translation appeared in an anthology of 16th-century Ukrainian poetry (Kiev 1987). J. Krukierok's book about him was published in Krosno in 1935.

Rusyn (The Ruthenian). A semiweekly newspaper published in Uzhhorod in 1920–2. The semiofficial organ of H. Zhatkovych, the Czechoslovak governor of the province of Subcarpathian Ruthenia, it was published in the Transcarpathian dialect and edited by T. Zhatkovych and A. Shtefan.

Rusyn (The Ruthenian). A populist newspaper published in the Transcarpathian dialect daily in Uzhhorod in 1923.

It was supported by the Czechoslovak deputy governor of the province of Subcarpathian Ruthenia. The chief editor was a Czech, F. *Tichý; he was assisted by A. Shtefan and V. Grendzha-Donsky. *Rusyn* issued a weekly literary supplement, *Nedilia Rusyna*, and a series of popular books.

Rusynov, Yukhym, b 6 October 1905 in Odessa, d 30 November 1969 in Odessa. Composer and conductor. A graduate of the Odessa Conservatory (1936), he studied composition with P. Molchanov and M. Vilinsky and conducting with J. Přibík. He conducted the conservatory's orchestra (1934–6), and opera companies in Dnipropetrovske (1936–41), Krasnoiar'ske (1941–4), Kharkiv (1944–5), and Odessa (from 1945). His works include the ballets *The Three Musketeers* (1939), *Olesia* (1947), and *On the Blue Sea* (1954); character pieces for orchestra; chamber music; and art songs.

Rusyns. See Ruthenians.

Ruthenia voivodeship. See Rus' voivodeship.

Ruthenian Agrarian party (Ruska khliborob'ska partiia). A small Ukrainophile populist party in Czechoslovak-ruled Transcarpathia, founded in August 1920 in Uzhhorod by Rev. A. Voloshyn, Rev. V. Zheltvai, M. and Yu. Brashchaiko, A. Shtefan, and A. Tovt (the party chairman). In its organ **Rus'ka nyva* (1920–4) it promoted pan-Ukrainian unification, political autonomy for the Ukrainians of Transcarpathia and the Prešov region, and official use of the Transcarpathian dialect. In 1924 the party was succeeded by the *Christian People's party.

Ruthenian Audit Union (Russkii revizionnyi soiuz). The central co-ordinating body for Russophile co-operatives in Galicia, founded in 1908 in Lviv. It was analogous to the *Audit Union of Ukrainian Co-operatives (RSUK), but much smaller: the Ruthenian union had 106 co-operative branches in 1914 and 250 in 1939, whereas RSUK had 909 and 3,455 in those years.

Ruthenian Battalion of Mountain Riflemen (Ruskyi batalion hirs'kykh striltsiv; German: Ruthenisches Bergschützen-Corps). A pro-Austrian military formation created in January 1849 on the initiative of the *Supreme Ruthenian Council. Its purpose was to guard the Carpathian mountain passes to prevent the spread of the Hungarian insurrection into Galicia, where it found many Polish sympathizers. Of 3,460 Ukrainian volunteers, 1,410 were accepted in April. They were equipped by the Austrian government and divided into six companies stationed in Berezhany, Kolomyia, Lviv, Stanyslaviv, Stryi, and Sambir. Most of the officers were Ukrainian, but the higher command was Austrian. In May the battalion took part in the Lviv celebrations of the first anniversary of the abolition of serfdom. In September it was sent to Slovakia, where it occupied the towns of Senica and Kremnica. After the suppression of the Hungarian insurrection the battalion served as a reserve unit until January 1850, when it was demobilized in Peremyshl.

Ruthenian Congress (Sobor ruskyi). A political committee that was active in Lviv during the *Revolution of 1848. It was founded in May by Polish and Polonized nobles and intellectuals as a counterbalance to the *Supreme

Ruthenian Council. Its 64 members opposed the Polish-Ukrainian administrative partition of Galicia and collaborated with the Polish People's Council. Although it declared its loyalty to the Habsburg state, it criticized the government's liberal policies. The congress accepted the abolition of serfdom but opposed the expansion of peasant rights. Its leaders, such as L. Sapieha, A., J., and W. Dzieduszycki, and J. and L. Jabłonowski, claimed to represent the Ukrainian people simply because their ancestors had been Ruthenian nobles. Although a number of Polonophile Ukrainians, including I. *Vahylevych (who edited the congress's organ **Dnewnyk Ruskiy*), M. *Popel, and O. *Krynytsky, were members of the congress, it received little Ukrainian support. On 6 October 1848 the congress was absorbed by the Polish People's Council, and ceased to exist as a separate organization.

Ruthenian Council (Ruska rada). A political organization in Lviv established in 1870 as a successor to the Supreme Ruthenian Council. It quickly became dominated by *Russophiles (V. Kovalsky, Ya. Shvedzitsky, T. Pavlykiv), who refused to co-operate with Ukrainian populists in various undertakings. The populists finally established the *People's Council in 1885 as a counterpart to it. The Ruthenian Council remained in existence until 1914. Its official publications included *Russkaia rada* (1871–1912) and *Halytskaia Rus'* (1891–2). In 1890 it helped to establish the *Ruthenian People's party.

Ruthenian National Association. See Ukrainian National Association.

Ruthenian Pedagogical Society. See Ridna Shkola.

Ruthenian People's Council in America. See American Ruthenian National Council.

Ruthenian People's Council in L'ubovňa, 1918. A political assembly that sought to exercise self-determination for *Transcarpathia after the collapse of the Habsburg Empire in 1918. On 8 November 1918 several hundred Transcarpathian Ukrainians under the leadership of Rev E. Nevytsky convened in Stara L'ubovňa, in the westernmost part of the *Prešov region, to discuss the future of their region in the light of the disintegration of Austria-Hungary. The council declared that the Ruthenians of Transcarpathia were of the same nationality as Ruthenians across the Carpathians, and that they no longer wanted to be united with Hungary. The council then drew up a questionnaire for distribution to the villages, asking particularly if the villagers 'want[ed] to join Rus' (Ukraine).' The original leadership of the L'ubovňa council favored union with the *Western Ukrainian National Republic and opposed union with Czechoslovakia. But when the council reconvened in Prešov on 19 November, leadership had been wrested from Nevytsky and his supporters by A. *Beskyd and other Russophiles who wanted Transcarpathia to join Czechoslovakia.

Ruthenian People's Council in Lviv. See Supreme Ruthenian Council.

Ruthenian People's Enlightenment Society (Ruske narodne prosvitne druzhstvo, or RNPĐ). A cultural-educational society for the Ruthenian-Ukrainians living in the *Bačka and Srem regions of Yugoslavia. Popularly known as Prosvita, it was founded 2 July 1919 in Novi Sad. Among its activists were Bishop D. Niaradi, Rev H. Kostelnyk, N. Polyvka, M. Niaradi, O. Fa, I. Kraister, M. Vynai, and O. Kostelnyk. The society had branches in all the major centers of Ruthenian-Ukrainian settlements in the Bačka and Srem regions. Their activities included providing reading rooms and organizing choirs and drama groups. The society published a variety of publications, including *Rusky kalendar* (1921–41), the weekly *Rusky novyny* (1924–41), *Ridne slovo* (1933–41), the bimonthly *Dumka* (1924–44), the children's monthly *Nasha zahradka* (1936–41), and over 100 books of the popular type. From 1936 the society had its own publishing house, in Ruski Krstur. It maintained close links with both the Lviv and the Uzhhorod *Prosvita societies. With the outbreak of the German-Yugoslav War in 1941 and the subsequent Hungarian occupation of the Bačka and Srem regions the society was suppressed. At the conclusion of the Second World War the society was not renewed.

Ruthenian People's party (Russkaia narodnaia partiia). The first *Russophile political party in Galicia. The party was formed in 1900 at the initiative of the Ruthenian Council and was supported in elections by the vicegerent and the Polish parties, who tried to use it against the growing Ukrainian populist movement. The original division in the party between the Old Ruthenians and the Russophiles eventually resulted in an open split (1909).

Ruthenian People's Theater. See Ukrainiska Besida Theater.

Ruthenian Radical party. See Ukrainian Radical party.

Ruthenian Red Guard (Rusynska chervona gvardiia). A communist military formation in Transcarpathian Ukraine in 1919. At the end of March 1919 the Communist Béla Kun came to power and established a Soviet republic in Hungary, including part of Transcarpathia (the autonomous Ruska Kraina). On 24 March the Hungarian Soviet government began the organization of a Red Army, and on 9 April the Ruthenian Red Guard was formally established in Mukachiv. The 6,000 soldiers in the Ruthenian Red Guard fought against the Rumanian and Czechoslovak armies. Even after the Communists were driven from Transcarpathia in May 1919, the Ruthenian Red Guard continued to fight in the Hungarian Red Army, until August of that year.

Ruthenian Theater of the Prosvita Society (Ruskyi teatr tovarystva Prosvita). The first professional Ukrainian theater in Transcarpathia. Established in Uzhhorod in 1921 with the help of the Czechoslovakian government, it gave over 1,200 musical and dramatic performances in its eight-year history. Its first director was M. *Sadovsky (1921–3), who developed a populist-ethnographic repertoire. His successor, O. *Zaharov (1923–5), elevated the theater's artistic level with plays such as V. Vynnychenko's *Brekhniia* (Lies) and *Zakon* (The Law), G.B. Shaw's *Candida*, K. Čapek's *R.U.R.*, and others by Molière, C. Gol-

doni, and F. Langer. M. Lysenko's *Utoplēna* (The Drowned Maiden), B. Smetana's *Bartered Bride*, S. Moniuszko's *Halka*, I. Kálmán's *Silva*, and J. Strauss's *Zigeunerbaron* were performed under Ya. Barnych's musical direction. Most successful were the productions of C. Gounod's opera *Faust* and A. Schnitzler's play *Liebelel*. Financial difficulties arose during M. Pevny's tenure as director (1926–7), and under F. Bazylevych's direction (1927–9) the theater's activities dwindled and finally ceased.

Ruthenian Training School students and faculty (1914)

Ruthenian Training School (Ruska uchyteľska seminariia). An institution established in Winnipeg in 1905 by the government of Manitoba to provide bilingual teachers for Ukrainian settlements in the province. The curriculum consisted of English language, Canadian and British history, literature, mathematics, geography, botany, science, accounting, art, music, and Ukrainian language and literature, with pedagogical courses in the normal school. A Third Class Normal School Diploma was awarded to those who completed the two- to three-year program. Transferred to Brandon, Manitoba, in 1907, the school was without a Ukrainian teacher from 1910 to 1913, and in 1912 it became part of the Brandon Normal School. Faced with opposition to bilingual education, the government closed the school in 1916. J. Cressy was the school's director, and the Ukrainian teachers were Ya. Makohin, D. Pynch, T. Ferley, and P. Karmansky. Many future Ukrainian-Canadian community leaders attended the school.

Ruthenian Triad (Ruska triitsia). A Galician literary group named after the number of the predominant members, M. *Shashkevych, Ya. *Holovatsky, and I. *Vahylevych, which existed in the late 1830s, while the three were students at the Greek Catholic Theological Seminary in Lviv. Since the group came into being during the period of *romanticism, it retained the predominant interests and features of that movement – an interest in folklore and history and a striving for Pan-Slavic unity. Its Slavophilism was noticeable in the use of Old Slavic pseudonyms: Ruslan by Shashkevych, Dalibor by Vahylevych, and Yaroslav by Holovatsky. The group united around itself other youths who were burning with a desire to work for the good of their people. Some of them (H. Ilkevych, M. Kulchytsky) were also involved in Polish revolutionary circles; most, however, were engaged in collecting oral folk literature, studying the history of Ukraine, translating the works of other Slavic authors, and writing their own verses and treatises. The members of the group maintained that the 'Ruthenians' of Galicia, Bukovyna, and

Transcarpathia were all part of one Ukrainian people who had their own language, culture, and history. They emulated the Ukrainians under Russian rule, and were especially influenced by I. Kotliarevsky's *Eneida* (Aeneid, 1789, 1809, 1820s), the collections of songs by M. Maksymovych and I. Sreznovsky, the grammar of O. Pavlovsky, and some of the early works of the *Kharkiv Romantic School. They made several attempts at publishing their own works. Their first two collections, 'Syn Rusi' [The Son of Rus', 1833] and 'Zoria' [The Star, 1834], were not published. Their third collection, **Rusalka Dnistrovaia* (The Dniester Nymph, 1836), was published in Buda, but 800 of the original 1,000 copies printed were immediately confiscated. Although the collection was short-lived, its importance was immense, in that it was written in the spoken Ukrainian and not in the 'learned' **yazychiie*; it thus initiated the use of vernacular Ukrainian for literature in the Ukrainian lands in the Austro-Hungarian Empire. The Pan-Slavic sentiment in the miscellany makes it similar to the Slovak poet J. Kollár's collection of sonnets *Slávy dcera* ([Goddess] Slava's Daughter, 1824), which was to a great degree the inspiration for the Ruthenian Triad.

D.H. Struk

Ruthenians. A historic name for Ukrainians corresponding to the Ukrainian *rusyny*. The English 'Ruthenians' (sometimes 'Ruthenes') is derived from the Latin *Rutheni* (singular *Ruthenus*), which also gave rise to the German *Ruthenen* and similar words in other languages. Originally the Latin name *Rut(h)eni* was applied to a Celtic tribe of ancient Gaul (their town Segodunum later became known as Rodez). The name *Rutheni* came to be applied to the inhabitants of Kievan Rus' as a result of the medieval practice of giving newly encountered peoples the names of extinct ancient peoples. B. Unbegaun has suggested that the attested Latin *Rucenus*, a rendering of the Old Ukrainian *rusyn*, was instrumental in the selection of the name *Ruthenus*. The first use of the word *Rutheni* in reference to the inhabitants of Rus' was in the *Annales Augustiani* of 1089. For centuries thereafter *Rutheni* was used in Latin as the designation of all East Slavs, particularly Ukrainians and Belarusians. In the 16th century the word more clearly began to be associated with the Ukrainians and Belarusians of the Polish-Lithuanian Commonwealth as distinct from the Russians, who were designated *Moscovitae*.

After the partitions of Poland (1772–95) the term 'Ruthenian' underwent further restriction. It came to be associated primarily with those Ukrainians who lived under the Habsburg monarchy, in Galicia, Bukovyna, and Transcarpathia. In 1843, at the request of the Greek Catholic metropolitan of Halych, M. Levytsky, the Austrian authorities established the term *Ruthenen* as the official name of the Ukrainians within the empire. In the 1870s the cen-

tral-Ukrainian political theorist M. *Drahomanov, as well as his Galician disciples I. *Franko and M. *Pavlyk, used the term *rutentsi* (a Ukrainianized version of *Ruthenen*) to denote narrow-minded, provincial, and Habsburg-true members of the Galician Ukrainian intelligentsia. Although the term *Ruthenen* remained in official use until the collapse of the Habsburg monarchy in 1918, Galician Ukrainians themselves began to abandon that name (from around 1900) and its Ukrainian equivalent, *rusyny*, in favor of the self-designation *ukraintsi* (Ukrainians).

In the last decades of the existence of the Habsburg monarchy there was a massive wave of Ukrainian emigration from there to the Americas. In their new countries the emigrant Ukrainians were often referred to and referred to themselves as 'Ruthenians.' In the interwar era the name 'Ruthenian' became even more restricted: it was generally used to refer to the inhabitants of Transcarpathia and to Transcarpathian emigrants in the United States. Since the Second World War the term 'Ruthenian' has been used as a self-designation almost exclusively by descendants of Transcarpathian emigrants in the United States, but since the 1970s even they have begun to abandon it in favor of the designation 'Rusyn' or 'Carpatho-Rusyn.' In official Catholic ecclesiastical language the term *Rutheni* was used in a wide sense, to denote all East Slavs of the Eastern rite (Ukrainians of Galicia and Transcarpathia as well as Belarusians) until the early 1960s. Since then the term *Rutheni* has been used to refer only to Byzantine rite Catholics of Transcarpathian origin in the United States.

J.-P. Himka

Ruthenian-Ukrainian Radical party. See Ukrainian Radical party.

Ruthenische Revue. A German-language semimonthly organ of the Lviv People's Committee and the Ukrainian caucus in the Austrian parliament, published in Vienna in 1903–5 by A. Kos and B. Yavorsky. Edited by R. Sembratovych, it informed the Western public and policymakers about the Ukrainian question in the Russian and Austro-Hungarian empires. It criticized Polish domination in Galicia and especially the prohibition of Ukrainian-language publishing in the Russian Empire. Poor translations of works by Ukrainian writers appeared in the journal. Its news articles were republished in German, French, Italian, Spanish, Swedish, Norwegian, and Japanese newspapers. After Sembratovych died, the newspaper stopped appearing. It was succeeded in 1906 by **Ukrainische Rundschau*.

Ruthenium. Ruthenium belongs to the platinum group of elements, and occurs native with other members of the group. It is hard, brittle, has a high melting point, and it forms alloys with most other metals, some of which are used for demanding applications. It possesses a plethora of co-ordination chemistry and is used in catalysis. It was identified in 1827 by G. Osann, a professor at Dorpat (Tartu) University. In 1844 C. Claus (Klaus) showed Osann's material to be quite impure, but confirmed the presence of a new element, which he named ruthenium after the Latin name for Rus' (Ruthenia [Ukraine]).

Rutka, Teofil (Bogumil), b 1623 in Kiev, d 1700 in Lviv. Polish Jesuit writer of Ukrainian descent. He entered the Jesuit order in 1647 and taught in Jesuit colleges in

Poznań, Kalisz, and Lublin. He was chaplain at the court of the Lviv palatine and for the Polish crown hetman S. Jabłonowski and served as a theological instructor and adviser to Bishop Y. Shumliansky of Lviv. He devoted his attention to promoting the Church Union of *Berestia: he wrote over 30 theological and polemical works, including refutations of the writings of I. Galiatovsky (1689) and P. Mohyla (1690), and translated many Roman Catholic works from Latin into Polish.

Ivan Rutkovych: *Flight to Egypt* (fragment)

Rutkovych, Ivan [Rutkovyč], b ? in Bilyi Kamin, near Zolochiv, Galicia, d ? Icon painter of the 17th century. Most of his creative life was spent in Zhovkva (1667 to ca 1708). Some of his work has been preserved, in whole or in part, such as the iconostases of the wooden churches in Volytsia Derevlianska (1680–2) and Volia Vysotska (1688–9); the large iconostasis of the Church of Christ's Nativity in Zhovkva (1697–9, now in the National Museum in Lviv), which is considered to be the finest Ukrainian iconostasis; and separate icons, such as *Supplication* (1683) from Potylych (now in the National Museum) and *Mary's Nativity* (1683) from Vyzhliv. Rutkovych's treatment of religious subjects was realistic and almost secular in spirit. The emotive richness of his colors and the rhythm of his lines testify to the influence of contemporary European art on his style. V. Svientsitska's book about Rutkovych was published in Kiev in 1966.

Rutsky, Illia [Ruc'kyj, Illja], b 1744 in Vysoke, Pryluka regiment, d 13 October 1786 in Moscow. Physician. After being educated at the Kievan Mohyla Academy (1753–61) and the Medico-Surgical School of the St Petersburg Military Hospital (1761–6), he worked as a military doctor in the Yelysavethrad region, where he fought the plague (1770–4). Later he lectured at the St Petersburg Medico-Surgical School (1776–8) and completed a doctoral dissertation on the plague at Strasbourg University (1781). In 1782 he was appointed a professor at the Moscow Medical School.

Rutsky, Yosyf [Ruts'kyj, Josyf] (secular name: Ivan Veliamyln), b 1574 in Ruta, near Navahrudak, Belarus, d 5 February 1637 in the Derman Monastery near Dubno. Uniate churchman. He was raised as a Calvinist but came

Metropolitan Yosyf Rutsky

under the influence of Jesuits and converted to Roman Catholicism (1592) while studying in Prague. After finishing his theological training at the St Athanasius College in Rome (1603), he converted to the Uniate rite at the request of Pope Clement VII and moved to Vilnius. In 1605–6 he traveled to Moscow with a papal legate. He entered a monastery in 1607 and worked with Y. *Kuntsevych to reform monasticism in Belarus and Ukraine. In 1611 he was made an archimandrite, and in 1613 he succeeded I. Potii as metropolitan of Kiev.

As metropolitan Rutsky sought to place the Uniate educational system on a par with its Latin rite counterpart. He obtained privileges for the church, including stipends for monks to study in Rome and in Catholic academies elsewhere, and implemented measures to raise the level of teaching in Uniate schools. In 1616–17 Rutsky established a unified structure for the Basilian order which made it independent of local bishops. He also placed the Basilians in charge of a reformed school system and laid plans (discussed in 1626 at the Synod of Kobryn) for establishing a theological seminary in Minsk. Finally, Rutsky demanded (through petitions to King Sigismund III, speeches in the Diet, and discussions with Vatican officials) and obtained (1624) church legislation that prohibited Catholics from freely changing their rite.

In 1624 Rutsky started discussions with Orthodox church leaders, including Y. Boretsky, M. Smotrytsky, and P. Mohyla, about the possibility of uniting the churches under a single Patriarch of Kiev. Nothing had been realized from these negotiations by the time he died in 1637. He was buried in Vilnius, but in 1655 Muscovite soldiers removed his remains to an unknown location. A collection of Rutsky's letters, edited by A. Welykyj (Velyky), appeared in Rome in 1956.

Ruysbroeck, Willem van, b 1215 in Rubrouck, France, d ca 1295. Flemish Franciscan friar and diplomat. He was sent by King Louis XI of France in 1253–5 on an informal mission to the camp of Batu Khan on the Mongolian plain. His account of the journey, republished in 1900 as *The Journey of William of Rubruck to the Eastern Parts of the World, 1253–55*, provides a valuable description of the

Mongol Empire and includes passages describing life in Kievan Rus' in this period.

Ruzhychanka burial site. A Cherniakhiv culture burial ground on the Vovk River near Ruzhychanka, Khmelnytskyi raion. Excavations in 1964–6 revealed 73 burials in which the interred were either cremated or inhumed. Among the grave goods recovered were pottery vessels, glass and carnelian jewelry, and silver and brass clasps.

Ruzhyn [Ružyn]. IV-10. A town smt (1986 pop 5,500) on the Rostavytsia River and a raion center in Zhytomyr oblast. It is first mentioned, as Shcherbiv, in historical documents at the end of the 15th century. From 1569 it was under Polish rule. In 1591 the village was acquired by the Ruzhynsky family, who changed its name to Ruzhyn and built a castle there. Its inhabitants took part in the popular revolts against the Polish nobility in 1591–3 and 1634–8. After B. Khmelnytsky's successful uprising Ruzhyn became a company center of Pavoloch regiment. In 1663 the town was destroyed by the Poles. Its inhabitants joined the anti-Polish haidamaka uprisings in 1734, 1750, and 1768. After the partition of Poland in 1793 Ruzhyn was transferred to Russia and belonged to Kiev vicegerency and then Kiev gubernia (1797–1925). Some manufacturing enterprises were set up: a woolen-cloth factory in 1811, a flour mill, a brick factory, and a distillery in 1829. Today the town is known for its agricultural output and its fish farm.

Ruzhynsky [Ružyns'kyj] (Rozhynsky). A Lithuanian princely family, with extensive estates in Volhynia and the Kiev region, that produced several Cossack leaders in the 16th century. Bohdan (Bohdanko) Ruzhynsky, known as the hetman of the Lower [Dnieper River] Cossacks and remembered in folk songs, died in 1576 during a siege by 500 Cossacks of the Tatar fortress Aslan Kermen (now Kakhivka). Ostafii Ruzhynsky (d 1587) was representative of the Polish voivode in Kiev (1575–81) and deputy starosta of Cherkasy. They were both described in **Istoriia Rusov*. Ostafii's son Mykhailo Ruzhynsky was hetman of the registered Cossacks (1585). His other son, Kyryk Ruzhynsky, was a Zaporozhian otaman and deputy starosta of Cherkasy; he commanded a Polish military detachment that suppressed the uprising led by S. Nalyvaiko, but he was defeated at Bila Tserkva in 1596.

Rvachov, Volodymyr [Rvačov], b 21 October 1926 in Chyhyryn, Kiev gubernia. Mathematician and mechanic; full member of the AN URSR (now ANU) since 1978. After graduating from Lviv University (1952) he worked and taught at the Berdianske Pedagogical Institute (1955–63) and the Kharkiv Institute of Radioelectronics (1963–7). Since 1967 he has been with the ANU Institute for Problems of Machine Building. Rvachov studied Bogoliubov R-functions and used his results to solve multidimensional problems in mathematical physics, elasticity, and the theory of plates and shells. Using R-functions, he developed a method which sped up the compiling of computer programs.

Rybachek, Mykhailo [Rybaček, Myxajlo], b 20 February 1874 in Orikhivets, Skalat county, Galicia, d 22 May 1926 in Lviv. Pedagogue and mathematician. He was a teacher of physics and mathematics at the gymnasium in

Kolomyia from 1898 to 1907 and then at the Academic Gymnasium of Lviv. He wrote research works and review articles in the field of mathematics and edited school textbooks. From 1916 to 1919 he was director of the branch (*filii*) of the gymnasium. He was forced to resign from this post when he refused to sign an oath of loyalty to the Polish Republic.

Rybachuk, Ada [Rybačuk], b 27 July 1931 in Kiev. Painter, mosaicist, and graphic artist. A graduate of the Kiev State Art Institute (1951), she has created decorative mosaics, murals, and canvases; illustrated books; and made prints. Her works include several linocut series (eg, 'Seven Women from Seven Tents,' 1955–63); numerous paintings, such as *The Test* (1957) and *Hunter's Song* (1958); and woodcut and linocut illustrations for L. Pervomaisky's *Dykyi med* (Wild Honey, 1965–70) and *Opovidannia riznykh rokiv* (Stories from Different Years, 1965–70) and for her own books *Ostrov Kolguev* (Kolguev Island, 1967) and *Bab'e leto* (Indian Summer, 1969). With V. Melnychenko she created large mosaics in the Bus Station (1960–1) and Pioneer Palace (1963–9) in Kiev.

Rybak, Ihor, b 21 March 1934 in Kharkiv. Weight lifter. He won the 1956 Olympic gold medal in the lightweight class and the 1956 European championship in the middleweight class. Since the late 1950s he has been a physician.

Natan Rybak

Ivan Rybchyn

Rybak, Natan, b 3 January 1913 in Ivanivka, Yelysavethrad county, Kherson gubernia, d 11 September 1978 in Kiev. Socialist-realist writer of Jewish origin. He began publishing in 1930 and produced 3 poetry collections in the 1930s and about 20 story collections, most of them in the 1930s and 1940s. He is best known for his novels. *Harmaty zherlamy na skhid* (Cannons with Muzzles Facing East, 1934) and *Kyiv* (Kiev, 1936) idealize Stalinist industrialization and the struggle with 'counterrevolution.' *Dnipro* (The Dnieper, 2 vols, 1937–8) depicts the revolutionary period in Southern Ukraine. *Pomyłka Onore de Bal'zaka* (The Mistake of Honoré de Balzac, 1940) portrays Balzac's stay in Ukraine; it was made into a film by T. Levchuk in 1969. *Zbroia z namy* (The Weapons Are with Us, 1943) is set in Ukraine during the Second World War. *Pereiaslavs'ka rada* (The Pereiaslav Council, vol 1, 1948, for which Rybak was awarded a Stalin Prize in 1950; vol 2,

1953) is a major Soviet historical epic about the Cossack-Polish War and Hetman B. Khmelnytsky. The novels *Chas spodivan' i zvershen'* (A Time of Expectations and Achievements, 1960) and *Soldaty bez mundyryv* (Soldiers without Uniforms, 1966) focus on the Cold War and Soviet nuclear physics. Editions of Rybak's works in five volumes were published in 1963–4 and 1981. Books about him by Yu. Kobyletsky (1963) and M. Lohvynenko (1972) and a collection of articles and reminiscences about him (1983) have appeared.

R. Senkus

Rybakov, Boris, b 3 June 1908 in Moscow. Russian archeologist and historian. After graduating in history from Moscow University, he worked for the Institute of Archeology of the Academy of Sciences of the USSR doing extensive fieldwork in Ukraine on Kievan Rus' sites. He became a professor of history at Moscow University (1943), director of the Institute of Archeology (1956), and director of the USSR Academy of Sciences' Institute of the History of the USSR (1968–70). A prolific writer, he has produced many scholarly and popular works about early Slavic history and Kievan Rus', including *Remeslo drevnei Rusi* (The Crafts of Old Rus', 1948), *Drevniaia Rus': Skazaniia, byliny, letopisi* (Old Rus': Tales, Epic Songs, Chronicles, 1963), *Pervye veka russkoi istorii* (1964; English translation, *The Early Centuries of Russian History*, 1965), *Iazychestvo drevnikh slavian* (The Paganism of the Early Slavs, 1981), and *Kievskaiia Rus' i russkie kniazhestva XII–XIII vv.* (Kievan Rus' and the Rus' Principalities of the 12th–13th centuries, 1982). He also wrote the entries about Kievan Rus' in the multivolume *Istoriia SSSR* (History of the USSR, 1966) and edited collections on the relations between Russia, Poland, and the northern Black Sea region in the 15th to 18th centuries (1979) and on the 1073 *Izbornik* of Sviatoslav (1977). His writings have helped to establish the official Soviet interpretation that the Kievan state was the historical antecedent of 'three fraternal nations': Russia, Ukraine, and Belarus.

Rybalchenko, Vsevolod [Rybal'čenko], b 23 August 1904 in Kharkiv, d 2 February 1988 in Kiev. Composer. After graduating from the Kharkiv Institute of Music and Drama (1931), where he studied composition with S. Bohatyrov, he taught music theory at the Kharkiv Technical School of Musical Theater (1931–4). With Yu. Meitus and M. Tits he authored the operas *Perekop* (1938) and *Haidamaky* (1941). His other works include the symphonic poem *Slovo o polku Ihorevi* (Tale of Ihor's Campaign, 1968); two operas; pieces for wind instruments; and art songs to words by H. Skovoroda, T. Shevchenko, M. Rylsky, and V. Sosiura. From 1944 he worked in Kiev.

Rybalko, Pavlo, b 4 November 1894 in Malyi Istorop, Lebedyn county, Kharkiv gubernia, d 28 August 1948 in Moscow. Soviet Army marshal. He fought in the Russian Civil War. After graduating from the Frunze Military Academy (1934) he was a military attaché in Poland and China (1937–40). During the German-Soviet War he commanded the Fifth and Third tank armies and the Third Guard Army, and rose from brigadier general to marshal of tank forces. After the war he was given command of tank and mechanized forces of the Soviet Army.

Rybalske oil and gas field. One of the largest oil and gas deposits in the *Dnieper-Donets Trough. Located near Rybalske, Okhtyrka raion, Sumy oblast, it was discovered in 1962 and has been exploited since 1963. The oil and gas are found in fissures and veins at a depth of 1,500–3,450 m. Natural gas, which is up to 93 percent methane, predominates in the deposit. The oil is light and paraffinic with low sulfur content. The oil from the Rybalske field is refined at the Kremenchuk Petroleum Refinery, and the gas is piped mostly to Kiev.

Rybchyn, Ivan [Rybčyn], b 1892 in Bratysliv, Tovmach county, Galicia, d 17 January 1970 in Sydney, Australia. Pedagogue and sociologist; full member of the Shevchenko Scientific Society from 1962. He was a longtime gymnasium teacher in Stanyslaviv (now Ivano-Frankivske) and head of the Teachers' Hromada branch there. After the Second World War he was docent of sociology and East Slavic history at the University of Graz, Austria. He emigrated to Australia in 1950. He was head of the Shevchenko Scientific Society in Australia from 1961. He wrote *Heopsykhichni reaktsii i vdacha ukraintsia* (Geopsychic Reactions and the Character of the Ukrainian, 1966) and many articles on social psychology and social philosophy.

Rybka. A Ukrainian folk dance performed by many couples, originally to singing and then to instrumental music in 2/4 time. The song was first written down by V. *Verkhovynets in the Kiev region in 1913.

Rybnica. VI-10. A city (1971 pop 32,000) on the left bank of the Dniester River in Moldova in a region of mixed Ukrainian-Rumanian settlement. Rybnica is a river port with a food-processing industry (sugar refinery, distillery, and creamery) and a construction materials industry (cement and steel products). Before 1917 it belonged to Balta county in Podilia gubernia. In 1926 its population of 9,400 was 33.8 percent Ukrainian, 38.0 percent Jewish, and 16.0 percent Rumanian (Moldavian). The surrounding region was 48.3 percent Ukrainian, 35.7 percent Rumanian, and 3.8 percent Russian.

Rybinsky, Volodymyr [Rybyns'kyj], b 23 February 1867 in Kozlov county, Tambov gubernia, Russia, d ? Ukrainian historian. He was a professor at the Kiev Theological Academy, an editor of *Vira ta derzhava*, a VUAN research associate (from 1920), and a member of the VUAN Hebraic Historical Archeographical Commission. He wrote many articles on ancient Hebrew history and the history of Jews in Ukraine, which appeared mostly in the academy's collection *Trudy Kievskoi dukhovnoi akademii*.

Rydz-Śmigły, Edward, b 11 March 1886 in Berezhany, Galicia, d 2 December 1941 in Warsaw. Polish military and political figure. The commander in chief of the Polish Army Organization from 1917, he saw action in Ukraine (among other places). In January 1918 he was minister of war for the Provisional Government of the Polish Republic, and he took part in the Polish-Soviet War of 1919–20 as a front commander (in Volhynia, Lithuania, and Latvia). On 7 May 1920, as commander of a combined Polish and Ukrainian army, he briefly held Kiev. From 1921 to 1935 he was an army inspector. He was a strong supporter of the Sanacja regime and the initiator of a secret military so-

ciety formed to ensure the regime's continued existence even in the case of its leader's (J. Piłsudski's) death. He was also a strong supporter of the Polonization of national minorities (including forced conversion), separatism among regional Ukrainian groups, and the yeoman movement. After Piłsudski's death in 1935, he was appointed chief inspector of the armed forces (upon instructions left by Piłsudski), which position made him one of the most powerful figures in Poland.

Rye (Ukrainian: *zhyto*). A family of annual (rarely perennial) grasses that includes several wild and one cultured species (*Secale cereale*). It probably originated in southwestern Asia ca 6500 BC and has been known in Ukraine (in the Dnieper and Dniester basins and on the Kerch Peninsula) since the Hallstatt period (1000–500 BC). It is a very hardy grain and is grown chiefly in regions with a harsh climate and poor soil; it also thrives at higher altitudes.

Rye is used primarily as flour for bread, as livestock feed, and as pasture. It is a good source of albumin (protein) and vitamins, and contains many other nutrients and amino acids. On average, rye kernels are 11 percent proteins, 1.7 percent fats, 69.6 percent carbohydrates, 1.9 percent cellulose, and 1.8 percent ash. The stalks grow to 70–200 cm high and are topped by 4 to 6 ears of grain. Rye has a vegetation period of 120–150 days. Traditionally, rye straw was used for thatching roofs and stuffing mattresses. In Ukrainian folklore rye symbolized health and prosperity, to ensure which it was often buried in the corners of house foundations. Rye is also used widely in alcohol distilling, and some by-products are used in making cellulose and in starch hydrolysis.

In Ukraine 10 species of rye grow wild, and 1 (*S. cereale*) is cultivated. Except in a few small areas in the Subcarpathians, only winter rye is grown, mostly in Polisia and the Subcarpathians, some in the forest-steppe region, and a little in the steppe. Rye cultivation was fairly common in the 19th century, but its importance in Ukraine has declined in the 20th century: in 1913 some 4,517,000 ha were devoted to rye, compared to 623,000 ha in 1987 (approx 4 percent of the grain area; see *Grain production). Moreover, relatively little has been done to develop and improve rye output. Average yields have increased only marginally, from 10.1 centners per ha in 1913 to 17.8 centners per ha in 1976–80. By contrast, average yields of all the grains increased in that period from 9.4 to 26.1 centners per ha. The most common variety of rye grown in Ukraine is Kharkiv 194; others include Kharkiv 60 and 55, Polisia, Kushtro, Desnianka 2, Selected Dankivka (the most productive type), Verkhnia 32, and Belta. Most of those strains were developed in the 20th century, and displaced such traditional local strains as Turka and Hlyboka.

V. Kubijovyč

Ryegrasses. The common name for about 10 species constituting the genus *Lolium* (family Poaceae). They include annual and perennial forage and lawn grasses and darnel, a noxious weed. Ryegrasses are about 0.3–3 m high and have tough, dark green leaves. They grow wild in low-lying areas or meadows and in mountain and hilltop

clearings. In Polisia, the forest-steppe, and the northern steppe regions ryegrass is sown often with other grasses, and yields 50–80 centners of hay per ha. The perennial *L. perenne* is very hardy and provides good pasturing for 7 to 10 years and longer. Ryegrasses are slowly being displaced by other fodder crops in Ukraine (see *Hayfields).

George Ryga

Maksym Rylsky

Ryga, George, b 27 July 1932 in Deep Creek, Alberta, d 18 November 1987 in Summerland, British Columbia. Dramatist. The son of Ukrainian immigrant parents, Ryga is one of Canada's most acclaimed playwrights. His best-known work is *The Ecstasy of Rita Joe* (1971), a play dealing with the plight of Canada's Indian peoples. His other plays include *Indian* (1967), *Captives of the Faceless Drummer* (1971), *Letter to My Son* (1984; on a Ukrainian theme and broadcast on Kiev State radio in 1985), and *Paracelsus* (1982). Among his novels are *Hungry Hills* (1963) and *Ballad of a Stonepicker* (1966) (both published in Ukrainian translation in Ukraine), *Night Desk* (1976), and *In the Shadow of the Vulture* (1985). Ryga wrote numerous television scripts and radio dramas, including '1927,' on Ukrainians in Canada, for the television series 'The Newcomers' (1979).

Ryhorenko, Mykola, b and d ? A kobzar of the first half of the 19th century, from Krasnyi Kut, Kharkiv gubernia. His dumas, including those about Fesko Handzha Andyber, Marusia Bohuslavka, Cossack life, and the Korsun victory, were written down by N. Nihovsky and published by P. Kulish in his *Zapiski o Iuzhnoi Rusi* (Notes on Southern Rus', 1856–7).

Ryk, Yakiv, b 6 December 1929 in Kharkiv. Sculptor. A graduate of the Kharkiv School of Applied Art (1949), he has sculpted compositions such as *Our Future* (1962–3), *Azovstal Workers* (1966–7), and *Azov Fishermen* (1969) and several public monuments in Kharkiv.

Rykhliivsky, Danylo [Rykhlijiv's'kyj] (Danylo Bandurka, Maly), b ca 1738 in Kiev, d ? Banduryst. He began to play the bandura at the age of 10. As a young man he joined the Korsun kurin at the Zaporozhian Sich. In 1761 he was imprisoned for taking part in the Haidamaka uprisings. His subsequent fate is unknown.

Rykhlik, Yevhen [Rykhlik, Jevhen], b 28 November 1888 in Vilshanka, Zhytomyr county, Volhynia gubernia, d

1939. Slavist of Czech origin. A graduate of Kiev University, he taught at the Nizhen Institute of People's Education in the 1920s and was a member of the VUAN Ethnographic Commission. He published studies on the Slavophilism of the *Cyril and Methodius Brotherhood and on Ukrainian motifs in J. Słowacki's poetry (1929), articles on the lexicon of the village of Vilshanka in the Zhytomyr region, a study of Ukrainian ethnography outside Soviet Ukraine, a study of the 18th-century rebels Sava Chaly and Sawa-Caliński in Polish literature, a study of Polish translations of Ukrainian dumas, a survey of literature about Czechs in Ukraine, and reviews of Czech and Polish ethnographic journals in *Etnohrafichnyi visnyk*. He was repressed during the Stalinist terror (1930?) and most likely perished in a Soviet labor camp.

Rykhlo, Ivan [Ryxlo], b 1891, d ? Army doctor and civic leader. In 1915, while serving in the Legion of Ukrainian Sich Riflemen, he was captured by the Russians. He was one of the organizers of the Sich Riflemen in Kiev in 1917. During the next three years he served as sanitation chief of the Corps of Sich Riflemen and of the UNR Operational Army.

Rykhly Saint Nicholas's Monastery (Rykhlovskyy Pustynno-Mykolaivskyy manastyr). A men's monastery located in Rykhly, near Korop, in the Chernihiv region. It was established in 1666 on the site of a 1620 apparition of an icon of St Nicholas. Its first benefactors were Hetman D. Mnohohrishny and his brother, Vasyl. The initial wooden structures were replaced by stone ones in the 18th century. From then the monastery had four churches: the three-nave Church of St Nicholas (built in 1749–60); the Church of St John the Baptist, funded by Hetman I. Samoilovych; the Church of the Birth of Christ, built in 1749 and restored in 1847; and a small church located on the site of the reputed appearance of the icon. The monastery also had a hospice. At the turn of the 20th century the monastery was headed by a hegumen, and housed 52 monks and 100 novices. In the 1920s it was closed by the Soviet authorities, and all of its buildings were razed.

Rykhlytsky, Liubomyr. See Liubomyrsky, Stepan.

Rykov, Valerian, b 1874 in Tbilisi, Georgia, d 25 March 1942. Architect. After graduating from the St Petersburg Academy of Arts (1902) he lectured at the Kiev Polytechnic (1904–10). He was one of the founders of and a professor at the Kiev Architecture Institute (1918–23) and a lecturer at and, eventually (1934–9), the chairman of the architecture department at the Kiev State Art Institute. He designed many residential and public buildings in Kiev, including the People's Auditorium (1909), the building of the St Mary's Society of the Red Cross (1913, now the Clinical Institute), the Hippodrome (1916), and the Kiev Artistic Film Studio (1927–30). P. Makushenko's book about him was published in Kiev in 1967.

Ryleev, Kondratii, b 29 September 1795 in Batovo, near Gatchina, St Petersburg gubernia, d 25 July 1826 in St Petersburg. Russian writer and Decembrist leader. He edited the popular literary almanac *Poliarnaia zvezda*. He also became a leading figure in the Northern Society of the *Decembrist movement. For his role as a key organizer of

the 1825 uprising he was arrested and later hanged in St Petersburg's Peter and Paul Fortress. While living in the Ostrohozke region Ryleev developed a considerable interest in Ukrainian history and ethnography (as documented in I. Zaslavsky's book *Rylieiev i rosiis'ko-ukraïns'ki literaturni vzaiemny* [Ryleev and Russian-Ukrainian Literary Relations, 1958]). He incorporated Ukrainian themes into his writings, notably in the collection *Duma* (1825) and the poems 'Voinarovskii' and 'Mazepa.'

Rylo, Maksymilian, b 1715, d 1794. Uniate bishop and church figure. He was raised in the Vilnius region and became a Basilian priest (1742) and hegumen of the Kholm Monastery (1748–56). While bishop of Kholm (1759–84), he occasionally (1763–6 and 1773–4) had jurisdiction in areas of Right-Bank Ukraine. In 1780–4 he was the administrator and in 1784–93 bishop of Peremyshl. Rylo founded theological seminaries in Kholm and Peremyshl, saw to the establishment of canonical chapters, and took measures to improve the quality of the clergy. He convinced Leopold II to issue a decree in 1790 establishing the equality of the Byzantine and Latin rites in the Habsburg Empire and took measures to renew Halych metropol. Rylo kept a diary from 1742 that provides valuable insights into church affairs.

Rylsk [Ryl'sk]. II-15. A town (1979 pop 19,000) on the Seim River and a raion center in Kursk oblast, Russia. A Siverianian settlement probably stood at the site in the 9th century. Rylsk is first mentioned in the chronicles under the year 1152, when it was a part of Siversk principality. It was annexed by Lithuania in the 14th century and then by Russia in the 16th century. A strategic defensive point for the Russian Empire, Rylsk was attacked by the Tatars many times. From 1797 to 1926 it was a county town in Kursk gubernia. According to the Soviet census of 1926, Ukrainians represented 20.9 percent of the Rylsk county population. Most of them lived in the southern part of the county.

Rylsky, Maksym [Ryl's'kyj], b 19 March 1895 in Kiev, d 24 July 1964 in Kiev. Poet, translator, and community activist; full member of the AN URSR (now ANU) from 1943 and of the Academy of Sciences of the USSR from 1958; son of T. *Rylsky. From 1944 until the end of his life he was director of the Institute of Fine Arts, Folklore, and Ethnography of the ANU. He studied at Kiev University, initially in the medical faculty and later in the historical-philological faculty. Rylsky started to write early in life (he published his first poem in 1907), and by 1910 he had published his first youthful collection, *Na bilykh ostrovakh* (On the White Islands). The first mature collection to show his promise as an exceptional poet was *Pid osinnimy zoriamy* (Beneath the Autumn Stars, 1918). An abridged version, of half the original length, was published in 1926. The poetic talents of Rylsky reached full bloom with the publication of the collections *Synia dalechin* (The Blue Distance, 1922), *Poemy* (Poems, 1924), *Kriz' buriu i snih* (Through Storm and Snow, 1925), *Trynadtsiata vesna* (The Thirteenth Spring, 1926), *Homin i vidhomin* (The Resonance and the Echo, 1929), and *De skhodiat'sia dorohy* (Where the Roads Meet, 1929).

Rylsky's lyric poetry grew out of the best achievements of Ukrainian poetry at his time, and out of his broad

knowledge of world poetry, French writers in particular (especially the works of the Parnassians). He often used motifs and images from ancient mythology and adhered to classical forms, which practices linked him to the group of *Neoclassicists. In many other respects, however, his philosophical and contemplative lyric poetry, with its wealth of moods and motifs of nature and of the individual becoming one with nature, did not fit the narrow definition of Neoclassicism. Rylsky's apolitical poetry provoked fierce attacks from official critics. He was arrested for a brief period in 1931, and then declared himself reformed and proclaimed his acceptance of the official Soviet view of reality in his collection *Znak tereziv* (The Sign of Libra, 1932). He alone of the Neoclassicists managed to live through the Stalinist terror and become one of the main poets in the ranks of the official Soviet versifiers. He became a member of the Party in 1943. In contrast to other official poets, however, he often expressed himself ambiguously in his eulogies of the Communist party, especially in those of Stalin.

From the time he became an official poet, Rylsky published over 30 books of poetry. The major prewar works were *Kyiv* (Kiev, 1935), *Lito* (Summer, 1936), *Ukraina* (Ukraine, 1938), and *Zbir vynohradu* (The Harvest of Grapes, 1940). During the war and the evacuation of Soviet Ukrainian leaders to Ufa he published, among others, the collections, *Za ridnu zemliu* (For the Native Land, 1941), *Slovo pro ridnu matir* (A Song about My Mother, 1942), *Zhaha* (The Thirst, 1943), and *Mandrivka v molodist'* (Journey into Youth, 1944). His numerous postwar collections include *Chasha druzhby* (The Cup of Friendship, 1946), *Virnist'* (Fidelity, 1947), *Pid zoriamy Kremlia* (Beneath the Stars of the Kremlin, 1953), *Na onovlenii zemli* (On the Reclaimed Land, 1956), *Holosiiv's'ka osin'* (Autumn in Holosiiv, 1959), and *V zatinku zhaivoronka* (In the Shade of the Lark, 1961).

Throughout his literary career Rylsky also did many literary translations. An excellent example of his mastery of the art is his translation of A. Mickiewicz's *Pan Tadeusz*. His translations from French are of a similarly high standard, from the classics of the 17th century to the poetry of P. Verlaine, in particular the translations of V. Hugo's *Hernani*, E. Rostand's *Cyrano de Bergerac*, and Voltaire's *La Pucelle d'Orléans*. He also translated W. Shakespeare's *King Lear* and *Twelfth Night*, and A. Pushkin's *Evgenii Onegin*.

Like most of the Soviet poets of the interwar generation, Rylsky did not manage to revitalize his writing at the beginning of 'de-Stalinization,' and his work remained merely technically proficient versification. Rylsky achieved much, however, in his role of community activist and publicist and contributed greatly to the brief literary rebirth of the early 1960s. In his essays and articles of that period, which are collected in publications such as *Vechirni rozmovy* (Evening Conversations, 1962) and *Pro mystetstvo* (On Art, 1962), he carefully and tactfully, though unflinchingly, defended Ukrainian culture against the pressure of Russification. Rylsky was not so much an innovator in Ukrainian poetry as a practitioner of classic verse, the sonnet form in particular. He contributed more than any of his contemporaries to the development of the Ukrainian literary language. His selected works have been published as *Poezii* (Poetry, 3 vols, 1946), *Poezii* (Poetry, 3 vols, 1949), *Tvory* (Works, 3 vols, 1956), and *Tvory* (Works, 10 vols, 1960–2; 20 vols, 1983–).

I. Koshelivets

Tadei Rylsky

Antin Rzhepetsky

Rylsky, Tadei [Ryl's'kyj, Tadej], b 2 January 1841 in Stavyshe, Tarashcha county, Kiev gubernia, d 7 October 1902 in Romanivka, Skvyra county, Kiev gubernia. Civic and cultural leader and ethnographer; member of the Shevchenko Scientific Society (NTSh); father of M. *Rylsky. During his student years at Kiev University (he graduated in 1862) he made the acquaintance of V. *Antonovych and was an active member of the *Hromada of Kiev. Rylsky became one of the cofounders of the **khlopoman* movement. He founded a school on his estate in Romanivka and taught there for nearly 20 years. He contributed articles to the journals *Osnova* (using the pseud Maksym Chorny), *Kievskaiia starina* (KS), and *Zapysky NTSh* and to the Polish newspaper *Głos* on economic and social issues and on the ethnography and folklore of the Ukrainian people. Among his most important works are 'Kizuchenii ukrainskogo narodnogo mirovoztreniia' (Toward the Study of the Ukrainian Folk Weltanschauung, KS, 1888, no. 11; 1890, nos 9–11; 1903, nos 4–5), *O khersonskikh zarabotkakh* (About Kherson Wages, 1904), *Sil's'ki pryhody* (Village Adventures, 1905), and 'Studii nad osnovamy rozkladu bahatstva' (Studies of the Bases of the Distribution of Wealth, ZNTSh, vols 1–2 [1892–3]), written in the tradition of the Austrian school of political economy.

Rymarenko, Serhii, b 11 December 1839, d 1869 in Krasnyi Yar, Astrakhan gubernia. Populist revolutionary. A medical student at Kharkiv University, he joined the Kharkiv-Kiev Secret Society in 1857 and was expelled from university for taking part in the student protests of 1858. He audited courses at the Medical-Surgical Academy in St Petersburg and organized Sunday schools. He was one of the founders of *Zemlia i Volia. Through his sister, who had married M. *Ballin, he maintained contact with clandestine circles in Kharkiv and supplied them with revolutionary literature. In 1862 he was arrested and, after a lengthy investigation, exiled to Astrakhan, where he died of consumption.

Rymaruk, Ihor, b 4 July 1958 in Miakoty, Iziaslav raion, Khmelnytskyi oblast. Poet. Rymaruk completed journalism studies at Kiev University in 1979 and has worked in the editorial offices of *Visti z Ukrainy* and the Molod publishing house and as editor of the poetry section of the Dnipro publishing house. Since 1990 he has been coeditor of the journal **Svito-vyd*. A lyrical and melodious poet, he is the author of two collections of verse, *Vysoka voda* (High Water, 1984) and *Uprodovzh snihopadu* (During the Snowfall, 1988).

Rymliany, Pavlo. See Romanus, Paolo.

Rymsha, Andrii [Rymša, Andrij], b ca 1550 in Pianchina, near Navahrudak, Belarus, d after 1595. Ukrainian and Belarusian writer. According to some sources, he studied at the Ostrih Academy. He is the author of *Khronolohiia* (Chronology), a versified explanation of the names of the months in Church Slavonic, Hebrew, and Ukrainian, published in 1581 in Ostrih. He also composed epigrams and odes on the heraldic crests of O. Volovych (1585) and L. Sapieha (1588). Rymsha wrote prose (he wrote of the battle deeds of K. Radziwiłł in Polish, 1585) and translated from Latin. His works have been published in Kiev, in the anthology *Ukrains'ka poezii: Kinets' XVI – pochatok XVII st.* (Ukrainian Poetry: The End of the 16th and the Beginning of the 17th Century, 1978).

Ryndyk, Stepan, b 1887 in Dunavitsi, Nova Ushytsia county, Podilia gubernia, d 1972 in Chicago. Satirist and mechanical engineer. He graduated from the Kiev Polytechnical Institute in 1914. In the interwar period he fled Bolshevik rule and went to Bohemia, where he taught at the Ukrainian Higher Pedagogical Institute and the Ukrainian Gymnasium. He was evacuated to Germany in 1945, and emigrated to the United States in 1951. He wrote three poetry collections, all titled *Logos* (Prague 1942; Chicago 1961, 1971), the story collections *Smilians'ka khronika* (The Smila Chronicle, 1944) and *Pryhody i liudy* (Adventures and People, 1960), and Ukrainian textbooks on the strength of materials (1924) and the elements of machines (1943).

Ryndziivky (also *rohulky*). Ukrainian Easter songs sung by boys or young men under the windows of unmarried or recently married girls during **volochinnia*, on the second or third day of Easter. They were similar to Christmas carols except for the Easter theme. The *ryndziivky* survived into the 19th century only in the Yavoriv region and the Ukrainian-Belarusian borderlands.

Ryzhenko, Yakiv [Ryženko, Jakiv], b 13 November 1892 near Pustovii tove, Kobeliaky county, Poltava gubernia, d 29 May 1974 in Astrakhan, Russia. Art scholar. A graduate of the Moscow Polytechnical Institute, in the 1920s he was deputy director of the Poltava Regional Museum. He completed postgraduate studies (1926) and worked as a researcher (from 1929) in the Department of the History of Ukrainian Culture at the Kharkiv Institute of People's Education. From 1932 he worked in Kursk and then Astrakhan. Ryzhenko wrote books on kilim weaving and the kilims of the Poltava region (1928), Ukrainian needlework (1929), and the pottery of the Poltava region (1930).

Ryzhevsky, Vasyl [Ryževs'kyj, Vasyl'], b 1886 in Strusiv, Terebovlia county, Galicia, d 4 March 1965 in Miami, Florida. Civil engineer, surveyor, and entrepreneur. During the struggle for Ukrainian independence he was a captain and technical specialist in the General Staff of the Ukrainian Galician Army. He was one of the pioneers of the budding Ukrainian industry in Galicia between the two world wars, and owned a construction company and co-owned a road construction company and cardboard factory in Lviv. He was the founding president of the Ukrainian Technical Society in Lviv and an honorary member of the Ukrainian Engineers' Society of America. He lived in the United States from 1950.

Ryznytsia (Vestry). An association for making and selling church goods, established in Sambir in 1893. It was founded by Revs T. *Ripetsky (who also served as the first director) and F. Rabii. The central office in Sambir contained a workshop, warehouse, and store. Ryznytsia also had branches in Lviv, Peremyshl, and Stanyslaviv. In 1898 the society was a founding member of the Provincial Credit Union. Ryznytsia was dissolved by the Soviet authorities in 1939.

Rzeszów voivodeship. An administrative territory in southeastern Poland, centered in Rzeszów. The voivodeship encompasses 18,658 sq km and has a population (1990) of approx 2 million. Included within its boundaries are traditionally Ukrainian regions settled by Lemkos and Boikos as well as Liubachiv county. After the Second World War the Ukrainian population was forcibly resettled from that territory in *Operation Wisła.

Rzewuski. A Polish magnate family that held large estates in Western Ukraine in the 18th and 19th centuries. It included several important figures in Polish history. Stanisław Mateusz (?–1728) was appointed field hetman (1706), voivode of Podlachia (1710), and grand hetman (1726). His son, Waclaw (1706–79), was voivode of Podilia (1736–50 and 1756–62), field hetman (from 1752), grand hetman (1773–4), and starosta of Kholm, Dolyna, and Drohobych. Waclaw's son, Seweryn (1743–1811), was field hetman (1774–93) and starosta of Dolyna. He defended the privileges of the magnates and the oligarchical structure of the Polish Commonwealth and played a leading role in the *Torhovytsia Confederacy. Seweryn's son, Waclaw (1785–1831, also known as Emir Tadż ul-Fehr and Kozak Revukha), was an adventurer, Orientalist, and writer. In 1817–20 he traveled in Turkey and the Arab countries. Upon his return he established on his estate a Cossack order. He wrote poetry and memoirs and set T. Padura's verses to music. In 1831 he joined the Polish insurrection at the head of his own detachment and died in a skirmish.

Rzhpetska, Olena [Ržepc'ka] (née Pokrovska), b 1885 in Zhytomyr, Volhynia gubernia, d 1948 in Lviv. Writer. She published stories under the pseudonym Nychy in *Literaturno-naukovyi vistnyk* and in the Lviv calendar *Dnipro* (1934). Her prose collection *Na berehakh Horynia* (On the Banks of the Horyn) was published in 1936.

Rzhpetsky, Antin [Ržepc'kyj], b and d ? Civic and political leader. He was a bank director and a member of the Kiev Municipal Council before the Revolution of 1917. During the First World War he managed the operations of a committee for aiding refugees. As finance minister in the Hetman government (May–December 1918) he helped to develop the Ukrainian monetary system and to strengthen the *karbovanets*. In negotiations with Germany he defended Ukrainian economic interests and argued for Ukraine's right to the Crimea, but at the same time he opposed the Ukrainization of the administrative system and favored Ukraine's federation with Russia. When the Hetman government was overthrown, he was arrested by the Directory of the UNR but was eventually released.

Rzhpetsky, Borys [Ržepc'kyj], b 22 January 1895 in Lavriv, Lutske county, Volhynia gubernia, d 3 August 1976 in New York. Economist and civic and political activist. His studies at St Petersburg University were interrupted by his military service during the First World War. After returning to Ukraine in 1917, he became a deputy gubernia commissioner for Volhynia and set up and edited the paper *Selians'ka dumka* in Berdychiv. Having been sent to Warsaw in October 1919 as a member of a UNR diplomatic mission, he remained in Poland, completed his studies in law and economics at Lublin University, and worked as an economist for the Central Union of Polish Industry and coeditor of the journal *Przegląd Gospodarczy*. During the German occupation he worked for the Ukrainian Relief Committee in Lublin and Kholm. In 1949, after spending several years in DP camps, he emigrated to the United States. He was active in the Ukrainian community in New York and served as president of the Literary-Artistic Club (1964–72).

Rzhyschiv [Ržyščiv]. IV-12. A town smt (1986 pop 10,300) on the Dnieper River in Kaharlyk raion, Kiev oblast. In medieval times *Ivan-Horod stood at the site. After its destruction by the Mongols in 1240, the site remained uninhabited for a long time. The new settlement of Rzhyschiv is first mentioned in historical documents in 1506. The village belonged to Kiev metropolity. After the Union of Lublin in 1569, it came under Polish rule. Its inhabitants supported the anti-Polish revolt in 1637–8 and B. Khmelnytsky's uprising. In 1648–57 Rzhyschiv was a company center in Kaniv regiment. A monastery was built there at that time. The town tried repeatedly (in 1664, 1750, and 1768) to throw off Polish rule. In 1783 it and the entire Kiev region were acquired by Russia. In the 19th century it became a busy trading town and attracted some manufacturing – a sugar refinery in 1854 and a foundry in 1874. Today Rzhyschiv is a river port that ships farm products and some manufactured goods. Its largest factory is a radiator plant. It is the birthplace of L. *Kostenko.

Rzhyschiv Transfiguration Monastery (Rzhyschivskyyi Preobrazhenskyi manastyr). A monastery situated near Rzhyschiv, on the right bank of the Dnieper River, 85 km south of Kiev. First mentioned in 1649, it belonged to the Uniate church from the early 18th century until 1794. In 1852 it was converted into a women's monastery. At the turn of the 20th century the monastery housed 70 nuns and 213 novices. It was closed by the Soviet authorities in the 1920s.

S

Sabadosh, Mykhailo [Sabadoš, Myxajlo], b 18 August 1920 in Pryborzhavske or Zadnie, near Irshava, Transcarpathia. Ukrainian writer in the Prešov region of Slovakia. A Soviet partisan during the Second World War, after the war he became a colonel in the Czechoslovak army. He has written memoirs, sketches, stories, novels, and radio plays. His major works are the wartime memoirs *Parashutystom v Karpatakh* (As a Parachutist in the Carpathians, 1966), *Frontovymy dorohamy* (Along Roads at the Front, 1970), and *Partyzans'ki Karpaty* (The Partisan Carpathians, 1973), and a trilogy about a Transcarpathian peasant family in the 1930s and 1940s, consisting of the novels *Burkhlivi roky* (Turbulent Years, 1976), *Vidvazhni* (The Valiant, 1980), and *Peremoha* (Victory, 1984).

Sabadysh, Petro [Sabadyš], b 3 January 1909 in Oleksandrivske, Katerynoslav gubernia. Painter. In 1932 he graduated from the Kiev State Art Institute, where he studied under O. Bohomazov, V. Palmov, and M. Boichuk. He produced works such as *Apple Picking* (1929), *Pond* (1939), *Dnieper Vista* (1953), *Sunflowers* (1960), and *In the Poltava Region* (1967).

Sabal, Viktor [Sabal'], b 12 March 1919 in Ulaziv, Liubachiv county, Galicia, d 16 September 1990 in Munich. Political activist and economist. After completing study at the Ukrainian gymnasium in Peremyshl he joined the OUN. During the German occupation of Ukraine he worked in Volhynia as a member of I. Mitrynga's Ukrainian Revolutionary Democratic party and under the pseudonym Viktor Chorny wrote articles for its organ *Vpered*. After the war he settled in the United States and then moved to West Germany, where he completed his professional education and worked as an economist. He took a special interest in the Soviet economy and contributed articles on the subject to *Ukrains'ki visti* and *Suchasnist'*.

Sabaldyr, Hryhorii, b 11 October 1883 in Pokrovska Bahachka, Khorol county, Poltava gubernia, d ? Linguist and lexicographer. He wrote a handbook of Ukrainian orthographic rules (with M. Hrunsky, 1924), a dictionary of useful words in administrative circles (1925), a Ukrainian grammar and dictionary (with M. Hrunsky, 4 edns, 1926–7), a practical Russian-Ukrainian dictionary (30,000 words, 1926), and an orthographic dictionary (with O. Kolomatska, 25,000 words, 1930). In 1934 an abusive review of books by M. Hrunsky, P. Kovaliv, and S. Smerechynsky appeared under his name in *Movoznavstvo*. He disappeared during the terror of the 1930s.

Sabaneev, Ivan, b 19 October 1856 in Moscow, d 1937 in Odessa. Russian surgeon. A graduate of Kiev University (1882), he worked in Odessa (from 1887) and helped found the municipal hospital and a residence for young doctors. In 1904–8 he lectured at Odessa University. His

publications deal chiefly with plastic surgery. He designed an osteoplastic intercondylar amputation of the thigh (1890), which was widely adopted and bears his name. He studied the problems of treating tuberculosis and suturing blood vessels.

Sabanieieva, Liudmyla [Sabanjejeva, Ljudmyla], b 23 February 1922 in Korosten, Volhynia gubernia. Sculptor. In 1954 she graduated from the Kiev State Art Institute, where she studied under M. Helman. She has done realistic compositions in plaster, wood, and stone, such as *Roosters* (1957), *Metallurgists* (1960), *Little Taras* (1964), and *Father* (1967).

Mykola Sabat

Sabat, Mykola, b 1867 in Obertyn, Horodenka county, Galicia, d 1930. Pedagogue and classical philologist; director of the Ukrainian gymnasium in Stanyslaviv (now Ivano-Frankivske) in 1905–19 and 1923–7 and director of the Academic Gymnasium of Lviv in 1928–30. During the period of the Western Ukrainian National Republic he headed the secondary-school section of the State Secretariat of Education. He was a professor of Greek philology and ancient archeology at the Ukrainian Free University in Prague in 1921–3 and at the Lviv (Underground) Ukrainian University in 1924–5. He wrote on the history of Greek literature and ancient art and in 1929–30 published, in two volumes, T. Shevchenko's *Kobzar* for school-age children.

Sabat-Svirskya, Mariia [Svirs'ka, Marija], b 22 March 1895 in Pomoniatyna, Rohatyn county, Galicia, d 6 April 1983 in Rivne. Opera and chamber singer (soprano). She studied at the Lysenko Higher Institute of Music in Lviv and graduated from the Lviv Conservatory (1926, class of S. Kozlovska). She appeared in Poland as a soloist of the Torun Opera (1926–9) and at the Warsaw Olimpia Theater (1929–30) and then worked in Lviv. Her main roles were Marguerite in C. Gounod's *Faust*, Tamara in A. Rubinstein's *The Demon*, and Oksana in S. Hulak-Artemovsky's

Zaporozhian Cossack beyond the Danube. She taught in music schools in Lviv (1944–50) and Rivne (1950–7).

Sabatynivka culture. A late *Bronze Age culture that existed in Southern Ukraine and the Crimea in the late 14th to 12th century BC. It was researched in the 1930s and 1940s and named after a site in Kirovohrad oblast. The culture is notable for its indigenous bronze industry and trading activity. The people lived in surface and semi-pit dwellings, often with stone walls. Burial practices included both kurhans and ground burials. Their pottery was rounded, often with a characteristic band of applied ornamentation near the crown. Some scholars regard the Sabatynivka culture as a local variant of the late *Timber-Grave culture, while others maintain that it is distinctive. There is evidence of *Multicylindrical-Pottery culture influence on this grouping and of its ties with *Noua culture tribes. Notable examples of Sabatynivka settlements include Voloske, the site of a major bronze workshop, Ushkalka, Peresadvka, and Chykalivka.

Saber. A steel sword with a curved blade and a hand guard, known in Ukrainian as a *shablia*. It first appeared in Ukraine during the 10th century. It was a primary individual weapon of the Zaporozhian Cossacks and later was adopted by the Russian cavalry. In 1918–20, sabers were used widely by the Army of the UNR and by the cavalry units of the Ukrainian Galician Army. The cavalry of the Red Army also used sabers.

Lev Sabinin

Rev Sevastiian-Stepan Sabol

Sabinin, Lev (real surname: Teplynsky), b 15 November 1874 in Poltava, d 7 December 1955 in Moscow. Actor, choreographer, and stage director. He began his theatrical career in 1890 in L. Avedikov's Russian-Ukrainian troupe and then was an actor in H. Derkach's and O. Sukhodolsky's troupes (1891–1907); director of his own Ukrainian troupe, which staged approx 100 performances of the populist-realist repertoire (1907–20); stage director of various workers' and peasants' theaters (1920–9); actor and stage director in the Ukrainian Theater of the RSFSR in Moscow (1930–4); actor in the Chernihiv Music and Drama Theater (1934–41); and artistic director of the Ukrainian Ensemble at the Novgorod Philharmonic Society (1945–50). His memoirs are titled *Sorok-p'iat' rokiv na ukrains'kii stseni* (Forty-five Years on the Ukrainian Stage, 1937).

Sable (*Martes zibellina*; Ukrainian: *sobol*). A graceful carnivore of the family Mustelidae, 30–50 cm long (plus a 15-cm tail), and highly valued for its fine, silky fur, colored from light cinnamon to dark chestnut brown. Sables live a solitary life; they inhabit primarily the cedar and spruce forests in the taiga and northern forest zone of the former USSR. In the past sables were common in the northern forests of Ukraine; at present they are found only on animal farms, where they are bred for their fur.

Sabluchok, Ivan [Sabluchok] (Sablukov), b ca 1735, d ? Portrait painter and educator. As a boy he was taken to St Petersburg to sing in the imperial court kapelle. In 1753 he began to study painting, under I. Argunov, and in 1759 he entered the Academy of Arts, where he studied under D. Levytsky and quickly rose to the rank of professor (1761) and the status of full member (1765). After moving to Kharkiv in 1767, he taught art at Kharkiv College until 1773. Only one of his paintings survives, a portrait of S. Yurev (now in the Tretyakov Gallery in Moscow).

Sabol, Sevastiian-Stepan, b 7 December 1909 in Prešov, Slovakia. Religious figure and writer. In 1924 he joined the Basilian monastic order and studied at the Chernecha Hora, Krekhiv, Lavriv, and Dobromyl monasteries. Later he studied theology at the Pontifical Gregorian University (PHD, 1950). After being ordained a Ukrainian Catholic priest in Prešov in 1934 and receiving his licentiate in theology in Rome in 1935, he was prefect for students at the Theological Seminary and a gymnasium teacher in Uzhhorod. He also edited the eparchial monthlies *Misionar* (1937–8) and *Blahovistnyk* (1939). In 1939 he was arrested by the Hungarians in Khust and then deported to the Prešov region. There he founded four new Basilian monasteries and a novitiate, on the basis of which the new Basilian province of SS Cyril and Methodius was created in 1948. In December 1948 he avoided arrest by the Czechoslovak Communist regime by escaping to Austria. A Prague court sentenced him in absentia to life imprisonment as an 'American spy, the chief leader of the Ukrainian Insurgent Army, and an enemy of the people.' After emigrating to the United States in 1951, he served as a missionary in Uniontown, Pennsylvania, and New York City and as superior of the Transcarpathian branch of the Basilian order. Sabol began writing lyrical and religious poetry in Ukrainian in 1928 under the pseudonym Zoreslav. In Uzhhorod he published the collections *Zi sertsem u rukakh* (With My Heart in My Hands, 1933) and *Sontse i blakyt'* (The Sun and the Azure [Sky], 1936). As an émigré he published the historical-dogmatic monograph *Katolytstvo i Pravoslaviie* (Catholicism and Orthodoxy, 1955), the poetry collection *Z rannikh vesen* (From Early Springtimes, 1963), and the books *Vid Uhors'koi Rusy do Karpats'koi Ukrainy* (From Hungarian Ruthenia to Carpatho-Ukraine, 1956, under the pseudonym Yuri Borzhava) and *Holhota Hreko-katolyts'koi Tserkvy v Chekho-Slovachchyni* (Golgotha of the Greek Catholic Church in Czechoslovakia, 1978).

R. Senkus

Sabov, Kyrilo, b 28 August 1838 in Stavne, Transcarpathia, d 10 February 1914 in Košice, Slovakia. Priest, educator, Russophile, and cultural figure. After graduating from the Barbareum in Vienna he taught language, history, and geography at Uzhhorod Gymnasium (1862–71). He wrote two textbooks, *Grammatika pis'mennogo russkogo*

iazyka (A Grammar of the Literary Russian Language, 1865) and the companion *Kratkii sbornik izbrannykh sochine-nii v proze i stikhakh dlia uprazhneniia v russkom iazyke* (A Short Collection of Selected Works in Prose and Verse for Exercises in the Russian Language, 1868). He was also assistant editor (1867) and then chief editor (1867–9) of the first literary paper for Transcarpathian Ukrainians, *Svit*. Because of his Slavophile sympathies he was transferred to Szeged (1871–9), but later he was allowed to teach in Mukachiv and Košice.

Rev Yevmenii Sabov

Sabov, Yevmenii, b 1859 in Verbiazh, Bereg komitat, Transcarpathia, d 1934. Greek Catholic priest, educator, and Russophile leader. After his ordination (1885) he taught Ruthenian language at Uzhhorod Gymnasium (1887–98) and was active in the Society of St Basil the Great and the Uniiia educational society. He cofounded the paper *Nauka* (1897–1922). After the war he served as honorary president of the Dukhnovych Society (1923–34) and edited the journal *Karpatskii svet* (1928–38). He wrote a number of grammars and anthologies, which were approved by the Hungarian authorities and used widely in schools. He advocated a distinctive literary language for Transcarpathian Ukrainians, based on *yazychiie*, Russian, and Transcarpathian dialects.

Sacerdotal Council (Dukhovna rada). A clerical committee of the *Association of Ruthenian Church Communities in the USA and Canada. Formed in 1901 as part of the effort to provide administrative order to Ukrainian Catholic church parishes in North America, the council oversaw the appointment of priests to immigrant parishes. It was headed by Rev I. *Konstankevych and continued its work until the installation of an American-based Ukrainian Catholic bishop in 1907.

Sachenko, Hryhorii [Sačenko, Hryhorij], b 6 December 1905 in Khaienky, Borzna county, Chernihiv gubernia, d 16 January 1939. Poet. He was first published in 1926, and was a member of the literary organization Pluh. His works include the collections *Zustrichnyi entuziiazm* (The Enthusiasm of Meeting, 1931) and *Zenit* (The Zenith, 1936). He also wrote literary criticism. One of his works has been published posthumously as *Na chatakh* (On Guard, 1964). He was arrested by the NKVD in 1936. After being accused of belonging to a counterrevolutionary Ukrainian organization he was sentenced in 1937 and imprisoned in concentration camps in the Far East, where he perished.

Sacher-Masoch, Leopold von, b 27 January 1836 in Lviv, d 9 March 1895 in Lindheim, Hesse. Austrian writer and historian; son of L. von Sacher-Masoch. For a brief period of time he taught at Lviv University. Some of his works are set in Galicia, and reveal his familiarity with Western Ukrainian folkways and society. They include the historical novel *Eine galizische Geschichte 1846* (1858), the short novel *Don Juan von Kolomea* (1864), and the story collections *Galizische Geschichten* (1876), *Judengeschichten* (1878), and *Polnische Geschichten* (1886). Many of his later stories have little literary value but are well known for their depiction of sexual perversion, for which R. Krafft-Ebing coined the term masochism. Translations of Sacher-Masoch's stories were published in the 1880s and 1890s in *Chervona Rus'* and *Halychanyn*.

Sacher-Masoch, Leopold von (Leopold von Sacher until 1838), b ?, d 10 September 1874 in Bruck, Lower Austria. Police director in Lviv; father of novelist L. *Sacher-Masoch. Although his duties required that he suppress peasant unrest and maintain surveillance of the budding Ukrainian movement in Galicia, his writings and some of his actions demonstrated a profound sympathy with the peasantry and Ukrainians as a whole, both of whom he felt were victimized by the Polish nobility. In both his memoiristic publications, *Polnische Revolution* (Prague 1863) and 'Memoiren eines österreichischen Polizeidirektors,' which his son published posthumously in *Auf der Höhe*, vol 2 (Leipzig 1882), he sketched the history of the Ukrainian people from the Kievan Rus' period and argued that the Ukrainians were the most gifted of the Slavic nations. Sacher had many contacts among the Ukrainian clergy and intelligentsia; he was a friend of the Galician awakener D. *Zubrytsky, whose historical researches he encouraged, and in 1835 he offered M. *Shashkevych support for the Ukrainian movement provided that it did not make an alliance with Polish revolutionaries. In 1846 Sacher-Masoch submitted a memorandum to the governor's office urging that all decrees relating to the eastern Galician peasantry be promulgated in the Ukrainian vernacular.

Sachok, Yakiv [Sačok, Jakiv], b ca 1744 in Brusyliv, Podilia, d ? Haidamaka leader. As a young man he fled to the Zaporozhian Sich and became a member of haidamaka forces under M. Zalizniak and M. Shvachka during the *Koliivshchyna rebellion (1768). After making his way to Russian-ruled Kiev he organized a haidamaka band that crossed into Polish-ruled Right-Bank Ukraine and was active in the vicinity of Kaharlyk, Bohuslav, and Smila, south of Kiev. Sachok was arrested by the Russian authorities in Kiev in May 1770; his further fate is unknown.

Sachsenhausen (aka Sachsenhausen-Oranienburg). One of the major Nazi concentration camps. It was situated near Berlin and was opened in 1936. In 1939 many Jews and political prisoners were incarcerated there; they were joined in the succeeding years of the Second World War by prisoners of war. In the fall of 1941 some 1,800 Soviet POWs, among them many Ukrainians, were executed there. Over time thousands more were either shot or killed by phenol injections. The camp supplied slave labor for the German armaments industry; several armaments factories were located at the camp. Altogether 200,000

people (about half of whom subsequently perished) were sent to Sachsenhausen, including an undetermined number of Ukrainians. Among them were the OUN leaders A. Melnyk and Ya. Stetsko, who were interned there in 1944, and O. *Olzhych, who perished there in 1944.

Saciuk, Bohdan [Sacjuk], b 12 July 1941 in Dubno, Volhynia. Educator and linguist; member of the Shevchenko Scientific Society. After emigrating to the United States with his parents he studied Romance languages at the University of Illinois (PH D, 1969) and served as vice-president and president of the *Federation of Ukrainian Student Organizations of America (1963–7). Since 1969 he has taught linguistics, Spanish, Portuguese, and English at the University of Florida. He coedited *Generative Studies in Romance Languages* (1971) and has contributed articles to scholarly journals and collections.

Sacred Congregation for Eastern Rite Catholic Churches. See Congregation for Eastern Churches.

Saddle making. Leather saddles and harnesses have been made in Ukraine since ancient times. Ornamental saddle making was well developed under the Scythians, and archeological digs have uncovered saddle remains from the Princely era. Saddles were needed for farm animals as well as for the military and for general transport. In the 15th and 16th centuries there were guilds of saddle makers in both Kiev and Lviv. The artisans often made other leather goods too, including bookbindings, belts, bags, and hats. Saddle making remained a craft until the beginning of the 20th century: at that time there were still over 1,000 small workshops in Russian-ruled Ukraine, and the work was done by hand. In the 20th century, saddles and harnesses are manufactured by the *leather industry. Saddle output has declined as the use of horses in the economy has diminished.

Sadhora (also Sadgura or Sadagura). A suburb of Chernivtsi. The town was formally established in 1770. Populated mainly by Jews (73 per cent of 4,600 inhabitants in 1910), it was a renowned market center in Bukovyna and the site of a large synagogue. In 1941–4 a Rumanian concentration camp was located there. After the Second World War the town was incorporated into Chernivtsi. Archeological excavations reveal that the Sadhora site was settled as early as Trypilian culture times, and that a Rus' center once existed there.

Sadkovsky, Viktor [Sadkovs'kyj], b ? in Kiev, d 11 November 1803 in Chernihiv. Orthodox church hierarch. A graduate of the Kievian Mohyla Academy, he was a teacher and prefect of the Mahiliou Theological Seminary from 1758 and later the chaplain of the Orthodox church for diplomats in Cracow. In 1783 he became archimandrite of the Slutsk monastery, where he founded a theology school. A diplomatic arrangement between Poland and Russia concluded in the early 1780s allowed for the formation of an Orthodox eparchy in Poland to be headed by an exarch of the metropolitan of Kiev. In 1785 Sadkovsky was elevated to this post (bishop of Pereiaslav) while retaining his position as archimandrite. His organizational efforts in the new eparchy were quite successful, and had the result that a substantial number of Uniate parishes and priests

Archbishop Viktor Sadkovsky

Mariia Sadovska-Barilotti

joined the Orthodox church. But his efforts led to his arrest in 1789 by the Polish authorities on charges of inciting the population to arms and maintaining illicit contacts with Russia. He was released in 1792, following the partitioning of Poland, and was appointed archbishop of Minsk. From 1796 he was archbishop of Chernihiv.

Sadoveanu, Mihail, b 5 November 1880 in Pașcani, Rumania, d 18 October 1961 in Bucharest. Prominent Rumanian writer. In his *Șoimii* (Falcons, 1904), *Nicoară Potcoavă* (1952), and other historical novels he depicted Ukrainian-Rumanian relations in the Cossack period. He translated a few of T. Shevchenko's poems into Rumanian and wrote the introduction to the first Rumanian edition (1952) of Shevchenko's poetry.

Sadovska-Barilotti, Mariia [Sadovs'ka, Marija] (née Tobilevych), b April 1855 in Kamiano-Kostuvate, Yelysavethrad county, Kherson gubernia, d 27 March 1891 in Odessa. Stage actress and singer (soprano); sister of I. *Karpenko-Kary, M. *Sadovsky, and P. *Saksahansky. She began her theatrical career in 1876 in a touring Russian operetta troupe and then appeared in the troupes of M. Starytsky (1883–5), M. Kropyvnytsky (1885–8), Starytsky again (1888–90), and P. Saksahansky (1890–1), in which she mostly played heroic leading-lady roles.

Sadovska-Tymkivska, Tetiana [Sadovs'ka-Tymkivs'ka, Tetjana], b 11 January 1889 in Chernihiv, d ? Actress. She began her theatrical career in the Society of Ukrainian Actors in Kiev (1915–16) and then worked in the Ukrainian National Theater (1917–18), the State Drama Theater (1918–19), the People's Theater (1919–22), and, with A. Ratmyrov, various Ukrainian theaters in Vinnytsia, Kiev, and Kirovohrad (1924–49).

Sadovsky, Ivan [Sadovs'kyj], b 6 June 1855 in Stepanivka, Sumy county, Kharkiv gubernia, d 10 August 1911 in St Petersburg. Veterinary anatomist and microbiologist. A graduate of the Kharkiv Veterinary Institute (1879), he was appointed a professor at the institute in 1890 and was the first president of the Kharkiv Society of Veterinary Physicians. He directed the Warsaw Veterinary Institute (1904–7) and the veterinary-bacteriological laboratory of the Ministry of Internal Affairs (1907–11). His publications dealt with problems of veterinary anatomy, surgery, and epizootiology. With L. Tsenkovsky he did research on anthrax and implemented vaccination against the disease.

Sadovsky, Ivan [Sadovs'kyj], b 10 July 1876 in Zhytomyr, Volhynia gubernia, d 1 April 1948 in Vinnytsia. Character and comic stage actor. He began his theatrical career as a choir member in the Odessa Italian Opera and then worked in the troupes of P. Saksahansky and M. Sadovsky (1897–1900) and of O. Suslov, M. Yaroshenko, F. Kostenko, and V. Yavorsky (1900–18), and in various theaters in Kiev, Odessa, Kharkiv, and Vinnytsia (1919–48).

Gen Mykhailo Sadovsky

Mykola Sadovsky

Sadovsky, Mykhailo [Sadovs'kyj, Myxajlo], b 29 July 1887 in Kiev, d 29 December 1967 in Toronto. Senior UNR Army officer. Commissioned in the Russian army in 1912, he joined the UNR Army and was assigned with the rank of colonel to the General Staff and then to Supreme Headquarters. Under the UNR Directory he was chief of the field office of the defense ministry (1918–20). In the interwar period he served at the rank of brigadier general in the defense ministry of the UNR government-in-exile in Poland, and was active in community and veteran organizations. He was vice-president of the Ukrainian Military History Society and chief editor of its *Za derzhavnist'* collections and the journal *Ukrains'kyi invalid*. After emigrating to Canada in 1950, he remained active in the UNR government-in-exile, UNR Army veterans' organizations, and the Ukrainian Orthodox church. He organized and headed the *Ukrainian Military History Institute and edited the two final volumes of *Za derzhavnist'*. He wrote many articles on the 1917–21 period in Ukrainian military history.

Sadovsky, Mykola [Sadovs'kyj] (real surname: Tobilevych), b 13 December 1856 in Kamiano-Kostuvate, Yelysavethrad county, Kherson gubernia, d 7 February 1933 in Kiev. Theater director, actor, and singer; brother of I. *Karpenko-Kary, M. *Sadovska-Barilotti, and P. *Saksahansky. In 1881 he began his theatrical career in H. Ashkarenko's, M. Kropyvnytsky's, and M. Starytsky's troupes. From 1888 he led his own troupe, which in 1898 joined Saksahansky's Troupe. Sadovsky was the artistic director of the Ruska (see *Ukrainska) Besida Theater (1905–6) and then organized the first resident Ukrainian theater in Kiev (see *Sadovsky's Theater), which was active until 1919. In 1919 he was the commissioner of people's theaters in the UNR. He was also director of the *Ruthenian Theater of the Prosvita Society (1921–3). In 1923 he worked with the émigré Ukrainian community in

Prague to organize a theater and directed several of its productions. After returning to the USSR in 1926, he performed the lead role in the film *Viter z porohiv* (English title: *The Last Pilot*, 1930) and formed a touring troupe with P. Saksahansky.

Acclaimed by Starytsky as the most talented of the *Tobilevych family, Sadovsky was an actor of the realistic-psychological school, whose best roles were profound interpretations of the heroes in historical and social dramas, such as Starytsky's *Bohdan Khmel'nyts'kyi*, Karpenko-Kary's *Sava Chalyi*, and L. Starytska-Cherniakhivska's *Het'man Doroshenko*. He also played with success as the Komandor in Lesia Ukrainka's *Kaminnyi hospodar* (The Stone Host) and was a key force behind the flowering of Ukrainian operatic theater, in which genre he staged operas by composers such as M. Lysenko, D. Sichynsky, S. Moniuszko, and P. Mascagni. He wrote *Moi teatral'ni zhadky* (My Theatrical Reminiscences, 1930; 2nd edn 1956). Biographies of him were published in Kiev in 1962, 1964, and 1982.

V. Revutsky

Valentyn Sadovsky

Sadovsky, Valentyn [Sadovs'kyj], b 27 August 1886 in Plishchyn, Iziaslav county, Volhynia gubernia, d 24 November 1947 in Kiev. Economist, political activist, and civic leader; full member of the Shevchenko Scientific Society from 1935. After graduating in law from Kiev University (1909) and in economics from St Petersburg Polytechnic (1911) he practiced law in St Petersburg. In 1915 he became an inspector of the Union of Cities of the Southwestern Front, a relief organization that worked in Russian-occupied Galicia. He joined the Revolutionary Ukrainian party in 1904 and then the Ukrainian Social Democratic Workers' party (USDRP). Having returning to Kiev after the February Revolution of 1917, he became a member of the Central and Little radas and the first secretary of justice in the General Secretariat of the Central Rada (from 28 June 1917). In 1918 he and V. Vynnychenko represented the USDRP in the Ukrainian National Union, which organized the overthrow of Hetman P. Skoropadsky. After being forced to flee Ukraine in 1920, Sadovsky lived in Tarnów, Lviv, and Czechoslovakia, where he taught at the Ukrainian Husbandry Academy in Poděbrady. He was also an associate of the Ukrainian Scientific Institute in Warsaw. In 1945 he was arrested by the NKVD in Prague and held in Lukianivka Prison in Kiev, where he died.

Sadovsky was a prolific writer who published several monographs on Ukrainian economics and demography. The most important of them were *Narys ekonomichnoi heo-*

hrafii Ukraïny (A Survey of the Economic Geography of Ukraine, 1920), *Problemy industrializatsii v narodnomu hospodarstvi* (Problems of Industrialization in the National Economy, 1929), *Raionizatsiia Ukraïny* (The Regionalization of Ukraine, 1931), *Pratsia v USSR* (Work in the Ukrainian SSR, 1932), *Robocha syla v sil's'komu hospodarstvi Ukraïny* (Labor Resources in Ukraine's Agriculture, 1935), and *Natsional'na polityka Sovietiv na Ukraïni* (Soviet Nationality Policies in Ukraine, 1937). He was also a regular contributor to many prerevolutionary and émigré Ukrainian newspapers and journals, such as *Rada*, *Ukrainskaia zhizn'*, *Robocha hazeta*, *Literaturno-naukovyi vistnyk*, *Dzvony*, and *Tryzub*.

Sadovsky, Volodymyr [Sadovs'kyj] (pseud: Domet), b 18 August 1865 in Dovzhanka, Ternopil county, Galicia, d 1940 in Lviv. Conductor, music critic, and civic leader. As a student he belonged to the so-called *Dvanadtsiatka* (Twelve) choir group set up by Omelian *Nyzhankivsky. After graduating from the Lviv Theological Seminary (1891), he served as a priest in the Ternopil region, where he organized and conducted Ukrainian folk choirs (1891–4). In 1894 he set up a church choir at St Barbara's Church in Vienna. His last years were spent in Lviv. Sadovsky transcribed music and arranged folk songs for choir. He was one of the founders of *Artystychnyi vistnyk* in 1905 and a contributor to *Muzychnyi kalendar* (1904–7). He wrote studies in the theory and history of music and essays on composers, including M. Berezovsky, D. Bortniansky, A. Vedel, M. Lysenko, and Y. Kyshakevych.

Sadovsky, Yosyp [Sadovs'kyj, Josyp], b 10 November 1929 in Strutsivka, Zhytomyr okruha. Sculptor. A graduate of the Lviv Institute of Applied and Decorative Arts (1966), where he studied under V. Borysenko, he has taught there since 1969. He has sculpted compositions, such as *Morning* (1965), *Family of Loggers* (1967), *Highlanders* (1969), *Kozak-Mamai* (1970), *Lesia* (1971), and *Miner* (1977).

Sadovsky Ukrainian Drama Theater (Ukrainskyi dramatychnyi teatr im. M. Sadovskoho). A Galician touring theater troupe under the directorship of O. and A. Karabinevych, active in 1920–39 and then reorganized into the Ternopil Franko Ukrainian Drama Theater (see *Ternopil Ukrainian Music and Drama Theater). Its repertoire consisted mostly of ethnographical Ukrainian plays and classical operettas, as well as historical adaptations, such as *Mazepa* (based on B. Lepky's trilogy) and *Pisnia Beskydu* (The Song of the Beskyds, based on I. Lukavychenko's novel).

Sadovsky's Theater. The first Ukrainian resident theater, established by M. *Sadovsky in Poltava in 1906, with a cast drawn mostly from a young amateur drama circle in Nizhen. From 1907 it was based in Kiev. Sadovsky's Theater formed an important transitional step from the populist-ethnographic to a modern Ukrainian theater. From the modern repertoire Sadovsky's Theater staged Lesia Ukrainka's *Kaminnyi hospodar* (The Stone Host), V. Vynnychenko's *Brekhnia* (Lies) and *Moloda krov* (Young Blood), and O. Oles's études. It was most successful, however, in its productions of Ukrainian historical dramas, including M. Starytsky's *Bohdan Khmel'nyts'kyi*, L. Starytska-Cherniakhivska's *Het'man Doroshenko*, B.

Hrinchenko's *Stepovyi hist'* (The Steppe Guest), and S. Cherkasenko's *Pro shcho tyrsa shelestila* (What the Steppe Grass Murmured About). Sadovsky's Theater was also acclaimed for its staging of Ukrainian operas – M. Lysenko's *Aeneid*, *The Drowned Maiden*, and *Christmas Night*, D. Sichynsky's *Roksoliana*, B. Smetana's *The Bartered Bride*, S. Moniuszko's *Halka*, and P. Mascagni's *Cavaleria rusticana*. It also performed productions of plays translated into Ukrainian, including H. Heijerman's *The Good Hope*, J. Gordin's *Mirele Effros*, N. Gogol's *Revizor* (The Inspector General), A. Ostrovsky's *Dokhodnoe mesto* (Easy Money), J. Slowacki's *Mazepa*, and G. Zapolska's *Moralność pani Dulskiej* (Madam Dulaska's Moral Code). The theater was prohibited from performing E. Chirikov's *Ievrei* (The Jews) and F. Schiller's *Wilhelm Tell*. Besides Sadovsky, the directors were I. Marianenko, S. Pankivsky, F. Levytsky, and Ye. Zakharchuk. The actors were M. Zankovetska, L. Linytska, O. Korolchuk, H. Borysohlibska, H. Zatyrykevych-Karpynska, O. Polianska-Karpenko, M. Malyshe-Fedorets, Ye. Khutorna, L. Kurbas, and S. Stadnyk; the soloist singers, O. Petliash-Barilotti, T. Ivliiv, H. Pavlovsky, M. Lytvynenko-Volhemut, and M. Mykysha; the designers, V. Krychevsky, I. Burachok, and V. Diakiv; the conductors, H. Elinek and O. Koshyts; and the choreographer, V. Verkhovynets. In 1916 Marianenko departed with many of the leading actors to form the *Society of Ukrainian Actors. Kurbas also left, to found *Molodyi Teatr. The Sadovsky's Theater productions subsequently deteriorated, and it ceased to exist in 1919; some of the cast joined the Ukrainian Touring Theater.

V. Revutsky

Yurii Sadylenko: *Steelworkers* (1930)

Sadylenko, Yurii, b 20 January 1903 in Zhytomyr, Volhynia gubernia, d 30 November 1967 in Kiev. Painter. After graduating from the Kiev State Art Institute (1930), where he studied under L. Kramarenko, he lectured at the Kharkiv Art Institute (1931–41) and, from 1944, at the Kiev State Art Institute. In the 1920s he was a member of the Association of Revolutionary Art of Ukraine and the Union of Contemporary Artists of Ukraine. He painted historical canvases, such as *T. Shevchenko's Arrest* (1939); genre paintings, such as *Steelworkers* (1930) and *Construction* (1930); portraits; the panel *T. Shevchenko's Grave* (1940) at the Kaniv Museum-Preserve; and illustrations for an edition of Shevchenko's *Kateryna* (1939). In 1930 he and I. Zhdanko created the large-scale frescoes of the VUAN conference hall, which were plastered over in 1940.

Šafařík, Pavel, b 13 May 1795 in Kobeliarovo, Slovakia, d 26 June 1861 in Prague. Pioneering Slavicist and leading figure in the Czech and Slovak national revivals. After graduating from Jena University (1817) he taught secondary school in Novi Sad (1819–33) and then became curator (1841) and director (1848) of the Prague University library. He was a founder of several branches of Slavic studies and the author of fundamental works in Slavic history and language, including *Geschichte der slavischen Sprache und Literatur nach allen Mundarten* (1826) and *Slovanské starožitnosti* (Slavic Antiquities, 2 vols, 1836–7). He regarded Ukrainians as a distinct people with their own language and literature. His ideas had a strong impact on the Ukrainian national awakening. He maintained close ties with the Ruthenian Triad and with other Ukrainian Slavicists, such as I. Sreznevsky, O. Bodiansky, and M. Maksymovych.

Safflower (*Carthamus tinctorius*; Ukrainian: *saflor*). A cultivated flowering annual plant of the family Asteraceae (or Compositae). It grows to 30–120 cm in height and has red, orange, yellow, or white flowers; dried flowers were once used to obtain an orange-red textile dye. Its seeds contain up to 60 percent oil, which is used in the production of margarine, soap, linoleum, and clear, nonyellowing varnish. As a *vegetable oil safflower compares in quality with sunflower oil. The meal or cake residue is used as a protein supplement for livestock.

Safonovych, Teodosii [Safonovyč, Teodosij] (Sofonovych, Feodosii), b ? , d 1676 in Kiev. Writer, church leader, and one of the first systematic Ukrainian historians. He studied at the Kievan Mohyla College and then taught there (1650–5) and served as its acting director (1653–5). From 1655 he was hegumen of St Michael's Golden-Domed Monastery. His history of Ukraine, *Kroinika z litopistsov starodavnikh ...* (Chronicle from Ancient Chroniclers ..., 1672), introduced the idea of the unity of all Ukrainian lands and set out the course by which the Cossack estate gained supremacy in Ukraine. Only a few manuscript copies of it have survived.

In the first part of the *Kroinika*, concerning history up to the end of the 13th century, Safonovych reworks the Hypatian Chronicle, and in the second part he presents a collection of accounts based mainly on Polish chroniclers, especially M. Strykowski. The work was often used by Ukrainian chroniclers of the 17th and 18th centuries, particularly by the author of **Sinopsis*. A detailed summary of the *Kroinika* was published by E. Bolkhovitinov in his his-

Headpiece depicting the Battle of Kulikovo Pole in Teodosii Safonovych's chronicle

torical dictionary of clerical writers (vol 2, 1827). An edition of the *Kroinika* begun before the First World War by S. Golubev for the Kiev Archeographic Commission was not completed. An original manuscript of the *Kroinika* is preserved in the Västeraser Gymnasialbibliothek in Sweden, a copy of which was given to the AN URSR (now ANU) Institute of History in the 1960s; another manuscript is held by the Central State Archive in Moscow.

Sage (*Salvia*; Ukrainian: *shavliia*). An aromatic perennial herb of the family Lamiaceae (Labiatae), native to the Mediterranean area. The leaves of the medicinal or garden sage (*S. officinalis*; Ukrainian: *shavliia likarska*) contain essential oil, alkaloids, and tanning substances. In Ukraine it is cultivated for medicinal purposes and as a food flavoring (fresh or dried). The clary sage (*S. sclarea*; Ukrainian: *shavliia muskatna*) is cultivated in southern Ukraine for its essential oil, used in the pharmaceutical, distilling, and tobacco industries.

Sago, Mitchell (né Mykhailo Saramaga), b 6 August 1914 in Winnipeg, d 15 July 1989 in Toronto. Communist leader and journalist. He joined the Young Communist League in 1930 and the Communist Party of Canada in 1932. In 1940 he was interned for two years by the Canadian government. He edited the weekly *Westerner* and then served as editor (1954–80) of the semimonthly **Ukrainian Canadian*. He was also a member of the national executive of the Association of United Ukrainian Canadians. He was a coauthor (with H. Polowy) of a book on T. Shevchenko, *The World Is My Village* (1964), and a coeditor of a history of the Workers' Benevolent Association, *Friends in Need* (1972).

Sahaidachny, Petro [Sahajdačnyj] (né Konashevych or Kononovych), b 1570? in Kulchytsi, Sambir region, Galicia, d 20 April 1622 in Kiev. Zaporozhian hetman, organizer of Ukrainian Cossack armies, and political and civic

Hetman Petro Sahaidachny (engraving, 1622)

leader. He received the appellation Sahaidachny at the Zaporozhian Sich. He was a member of the Orthodox nobility in Galicia, and he studied at the Ostrih Academy. In 1592–1600 he worked for the Kievian judge I. Aksak. He traveled to the Sich in 1601 and participated in campaigns against the Tatars and Turks. Under his leadership the Cossacks captured Ochakiv and Perekop (1607) and various towns along the Anatolian coast in Turkey (1608), including Sinop and Trabzon, where they destroyed a force of 10,000 Turks and freed many slaves. In 1618 Sahaidachny joined the anti-Turkish Holy League. Also in that year he led a 20,000-strong Cossack army in Władysław IV Vasa's Polish campaign against Muscovy. Those victories strengthened the Cossack order and captured the attention of European rulers. Sahaidachny's orientation as hetman (1614–22) was toward the conservative faction of the Cossack *starshyna*. He transformed the Cossack Host into a regular military formation and imparted a statist character to the Cossack movement.

Sahaidachny also fought for the religious and cultural rights of the Ukrainian people. Together with the entire Zaporozhian Host he registered in the Kiev Epiphany Brotherhood in 1616–19. He contributed to the establishment of a cultural center in Kiev and sought to unite Cossack military might with the Ukrainian clergy and nobility. Owing to his efforts the Orthodox hierarchy in Ukraine and Belarus was revived in 1620, and Patriarch Teophanes III of Jerusalem ordained Metropolitan Y. Boretsky and five bishops.

Sahaidachny's moderate policies regarding Poland provoked dissatisfaction among Cossack circles, and in 1620 they briefly elected Ya. Borodavka as hetman. In 1621 Sahaidachny led a force of 40,000 Cossacks alongside the Polish army in the Battle of *Khotyn, at which they routed the Turkish army. Sahaidachny died of wounds suffered in the battle; he was buried in the monastery of the Kiev Epiphany Brotherhood. He bequeathed his assets to the

brotherhood schools in Kiev and Lviv and for church causes. The director of the Kiev Epiphany Brotherhood School, K. *Sakovych, wrote the panegyric *Virshi na zhalsnyi pohreb zatsnogo rytsera Petra Konashevycha Sahaidachnoho* (Verses for the Sorrowful Funeral of the Noble Knight Petro Konashevych Sahaidachny, 1622), which remains a valuable source of biographical information on Sahaidachny. Some scholars consider Sahaidachny to be the author of the tract *Poiasnennia pro uniiu* (An Explanation of the Union). He became the subject of the folk song 'Hei na hori tam zhentsi zhnut' (Hey, on the Mountain the Harvesters Are Harvesting).

L. Wynar, A. Zhukovsky

Sahaidachny, Petro [Sahajdačnyj], b 1898 in Berezhany county, Galicia, d 12 January 1975 in New York. Journalist. A veteran officer of the Ukrainian Sich Rifleman, in the 1930s he coedited the paper *Novyi chas* and several other publications of the Ukrainiska Presa publishing house in Lviv. During the Second World War he worked as an editor with *Krakivs'ki visti* in Cracow (1939–41) and managing editor of the daily *Nova Ukraïna* in German-occupied Kharkiv (late 1941 to early 1942). As a postwar refugee he worked for the Novi Dni publishing house and edited the daily *Ostanni novyny* in Salzburg. After emigrating to New York he briefly edited the journal *Novyi svit* and worked for the Ukrainian Congress Committee of America.

Yevhen Sahaidachny

Sahaidachny, Yevhen [Sahajdačnyj, Jevhen], b 22 April 1886 in Kherson, d 21 August 1961 in Kosiv, Ivano-Frankivske oblast. Painter, scenery designer, and teacher. He was educated in St Petersburg, and in 1911–18 he worked as a designer for St Petersburg and Kiev theaters. From 1917 he was a member of the Ukrainian State Academy of Arts in Kiev, and from 1922 he lectured at the Kiev State Art Institute, the Mezhyhiria Ceramics Tekhnikum, the arts and crafts school in Myrhorod, the Luhanske Workers' Faculty of Art (1932–6), the Dnipropetrovske Art Tekhnikum, and the Kosiv School of Applied Art

(from 1947). His works include the decorative mural *Wedding* (1911); landscapes, such as *Lanes in Turkey* (1912) and *Gullies near Luhanske* (1930s); and many genre paintings of the Hutsuls (1940s). He amassed a large collection of folk art, particularly of the Hutsuls.

Saharda, Mykola, b 13 December 1870 in Zolotonosha, Poltava gubernia, d 1943 in Kiev. Religious scholar, librarian, and bibliographer. A graduate of the Poltava Theological Seminary (1896) and the St Petersburg Theological Academy (1904), he taught Latin at the Poltava Religious School (1897) and church history at the Poltava seminary (1899–1904) and was appointed to the chair of patristics at the St Petersburg Academy (from 1904). His articles in theology and Ukrainian church history were published in the serial *Poltavskiiia eparkhial'nyiia vedomosti*. Under Soviet rule he contributed bibliographic articles to *Knyhar* (1917–20), served as a presidium member in charge of the periodicals department at the National Library of Ukraine in Kiev (1925–32), coedited and contributed to *Bibliotechnyzi zbirnyk* (1926–7) and the National Library's *Zhurnal bibliotekoznavstva ta bibliohrafiu* (1927–30), served as the scholarly secretary of the VUAN Bibliographic Commission (1927–32) and as an associate of the VUAN Commission for the Study of Byzantine Literature and Its Influence in Ukraine, and contributed surveys of Ucrainica in Russian journals to *Ukraina* (1927–8). He was arrested in 1932 during the Stalinist terror.

Sahatovsky, Ivan [Sahatovs'kyj] (pseud of Mavrenko-Kotok), b 12 March 1882 in Kiev, d 13 December 1951 in Stryi, Lviv oblast. Character actor and theater director. He began his career in 1898 in the Solovtsov Russian Theater in Kiev and then worked in M. Kropyvnytsky's troupe (1900–2), led his own touring troupe in Belarus, central Russia, and the Ural region (1902–19), and worked as an actor and director in Ukrainian theaters in Kherson, Kiev, Odessa, Dnipropetrovske, and Stryi.

Oleksander Saienko: *Girl Grazing Sheep* (1922)

Saienko, Oleksander [Sajenko], b 20 August 1899 in Borzna, Chernihiv gubernia, d 5 March 1985 in Kiev. Painter and decorative artist. A graduate of the Kiev State Art Institute (1928), where he studied under V. Krychevsky, in the early 1930s he worked as an animator at the Kiev Film Factory and then as a ceramic artist in the Sci-

entific Research Institute of Mineralogy. Saienko created over 500 works. They include portraits of his wife and daughter, V. Krychevsky, M. Hrushevsky, and V. Vynnychenko; the panels *Harvest* (1922), created by means of a unique technique of straw inlay, and *Captives* (in the building of the VUAN historical section), as well as *T. Shevchenko under a Willow* (1937), and *Ivan Sirko* (1967). He also designed decorative plates, tapestries, and kilims. An album of his works was published in Kiev in 1980.

Saienko, Oleksander [Sajenko], b 25 February 1921 in Izium, Kharkiv gubernia. Writer. He is the author of the poetry collections *Oi, vydno selo* (Oh, the Village Is in Sight, 1957), *Koordynaty* (Co-ordinates, 1965), and *Obnizhok lita* (The Vestige of Summer, 1981); the novelettes for schoolchildren *Shukannia krynytsi* (The Search for the Well, 1958) and *Na chotyry brody* (The Four Crossings, 1968); and five children's books.

Saievych, Mykola [Sajevyč], b 1885, d 1944. Military officer and forester. After joining the Ukrainian Sich Riflemen Legion in 1914, he directed the legion's commissariat in Volodymyr-Volynskyi (1916–18) and developed its cultural and educational program. In 1918–19 he was the Western Ukrainian government commissioner of Kosiv county and then captain in the Ukrainian Galician Army and commander of the Guard Battalion in Kamianets-Podilskyi. In the interwar period he was a member of the leadership of the Ukrainian Military Organization. He managed Halych metropol's forests in the Carpathians. He wrote studies of insects in Transcarpathia's forests and works on Ukrainian forestry terminology.

Saievych, Omelian [Sajevyč, Omeljan], b 1869, d 1944. Early co-operative leader. One of the first organizers of co-operatives in Galicia, he was the first director of the head office of the Audit Union of Ukrainian Co-operatives (1904–14) and its chief auditor (1904–21). For many years he was director of the Provincial Credit Union in Lviv (later Tsentrobank) and assistant to its director, K. Levytsky.

Saiga (*Saiga tatarica*; Ukrainian: *saihak*). A medium-sized mammal of the family Bovidae, similar to the antelope. It was once common in Ukraine, but its numbers were greatly reduced by hunting in the 19th century. It was given complete protection by the Soviet government in 1919 and reintroduced in the Askaniia-Nova Nature Reserve. The total saiga population now stands at about two million; it is increasing in Siberia but not in Ukraine. Since 1957 limited hunting of the saiga for its meat and skin has been allowed.

Sainfoin (*Onobrychis*; Ukrainian: *espartset*). A perennial forage herb, shrub, or annual grass of the family Leguminosae. A valuable feed crop, sainfoin grows successfully in forest-steppe and steppe regions in almost all types of soils. Three species are cultivated in Ukraine, for green feed, hay, and pasture covering respectively: *O. viciaefolia* (also known as holy clover or espartet), *O. transcaucasica* (the most productive), and *O. arenaria* (the most recent and hardy). Sainfoin is grown alone or mixed with clover, lucerne, or other grasses.

Saint Andrew (Andrii Pervozvannyi [Andrew the First-Called]), b ? , d ca 70 in Patras, Greece. Brother of St Peter and the first of the twelve disciples of Christ. Tradition has it that St Andrew was a missionary to lands surrounding the Black Sea, and that he traveled along the Dnieper River. Both the Byzantine and Ukrainian churches have, on the basis of this tradition, associated the origins of their Christianity with his name. The Kiev Church council of 1621 recognized St Andrew as the *Roskii apostol* (the apostle of Rus'), and *St Andrew's Church was later built in Kiev in his honor.

The eve of St Andrew's feast day was marked by various folk traditions and customs in the Ukrainian churches (13 December [30 November OS]). Games, often involving fortune-telling with hot wax poured in water, were played by young people throughout Ukraine. There were also many elaborate dating rituals performed at parties and village gatherings.

St Andrew's Church

Saint Andrew's Church (Andriivska tserkva). A masterpiece of rococo architecture in Kiev. It was designed for Empress Elizabeth I by B. *Rastrelli and built under the direction of I. Michurin in 1747–53. Set on a hill above the Podil district on a cruciform foundation atop a two-story building, the church has a central dome flanked by four slender towers topped with small cupolas. The exterior is decorated with Corinthian columns, pilasters, and complex cornices designed by Rastrelli and made by master craftsmen, including the Ukrainians M. Chvitka and Ya. Shevlytsky. The interior has the light and grace characteristic of the rococo style. The iconostasis is decorated with carved gilded ornaments, sculptures, and icon paintings done in 1751–4 by the Russian painter A. Antropov and

his assistant at the time, D. *Levytsky. Other paintings in the church are by P. Boryspilets, I. Romensky, and I. Chaikovsky. During the Seven Years' War the imperial court lost interest in the church, and it was unfinished when it was consecrated in 1767. Because of ground instability, the maintenance and preservation of the church have been a constant problem. Since 1958 the church has been a branch of the *Saint Sophia Museum.

St Andrew's College

Saint Andrew's College (Kolegiia sv. Andreia, or SAC). A seminary of the *Ukrainian Orthodox Church of Canada and students' residence, located in Winnipeg on the University of Manitoba campus. Incorporated in April 1946, SAC succeeded the small Orthodox seminary established in Winnipeg in 1932 to prepare candidates for the priesthood and community leadership through programs in theology, approved high school courses, and Ukrainian language and culture summer courses. In 1964 it moved to its own building on the campus and became an associate college of the university. In 1972 it was authorized to teach accredited university courses in Ukrainian and religious studies leading to a BA degree at the university. In January 1981 its humanities courses were organized into the Centre of Ukrainian Canadian Studies, which offers a BA program in Ukrainian-Canadian heritage studies. At the same time SAC was formally affiliated with the university, which provides the operating budget for the center while the college furnishes the physical facilities. The Faculty of Theology remains under the jurisdiction of the Ukrainian Orthodox church and offers a four-year B TH and M DIV degrees and a two-year diploma in theology. SAC is administered by a principal and a board of directors, and the center is headed by the director. It contains a library of 50,000 volumes, including the collection of 11,000 rare books belonging to the late Metropolitan I. *Ohienko, a former dean of theology there. The residence can accommodate over 50 students, and regular summer and extension courses have been held there. The principals of SAC have included Rev S. Sawchuk, Rev O. Krawchenko, and P. Kondra. The current (1991) principal is R. Yereniuk; N. Aponiuk is director of the center.

O. Gerus

Saint Anthony of the Caves (Sviaty Antonii Pecherskyi; secular name: Antyp), b ca 983 in Liubech, Chernihiv district, d 1073 in Kiev. As a youth he joined the monastery at Mt Athos, where he was tonsured and adopted the religious name Anthony. After many years he returned to Ukraine; reputedly he took up residence in a cave in

which *Ilarion had lived, near the village of Berestove, on the outskirts of Kiev. Anthony's deeds and fasting attracted other monks, including *St Theodosius. This monastic community became the nucleus of the *Kievan Cave Monastery, and Anthony emerged as the founder of monasticism in Ukraine. Later, Anthony and the monks built a church and elected the first hegumen, Varlaam. When the monastic community expanded, Anthony, an adherent of hermitism and a strict ascetic, excavated for himself a new cave in an area that came to be called the Near Caves or Anthony's Caves, to distinguish them from the older caves, called the Far Caves or Theodosius's Caves. There he would cure the sick with herbs and reputedly perform miracles. Toward the end of his life Anthony was forced by Prince Iziaslav to leave Kiev briefly and settle in Chernihiv, but he soon returned to Kiev. The cult of St Anthony grew in the late 12th and early 13th centuries, and it was probably around this time that he was canonized; his feast is celebrated on 23 July (10 July OS). His life, based on an older life which has not survived, is found in the Kievan Cave Patericon.

The iconostasis of St Barbara's Church

Saint Barbara (Sviata Varvara). Martyr, born in Nicomedia, believed to have been killed in 306, and revered in Kievan Rus'. Her life story was well known in Ukraine, and it was commonly believed that her remains were taken from Constantinople to Kiev in 1108 and held in the St Michael's Golden-Domed Monastery until its ruin. Her feast day (17 December [4 December OS]) generally marked the transition from the fall cycle to the winter cycle of activities. Folk beliefs associated with St Barbara stress her beneficial powers for pregnant women and her protection of people against skin diseases.

Saint Barbara's Church (Tserkva sv. Varvary). A Catholic church in Vienna built by the Jesuits in 1652. After the abolition of the Order of St Barbara in 1773, the church was granted to the Greek Catholics by Empress Maria Theresa, in 1775. In 1784 a parish was organized at the church, and it became a center of Ukrainian community life in Vienna. Eventually the parish became an important cultural center for the Ukrainians of the Austrian Empire, particularly when the *Barbareum seminary and a crown boarding school functioned there. Its notable curates were Ye. Striletsky (1784–1804), I. Snihursky (1813–18), I. Fogarashii (1818–34), P. Paslavsky (1834–47), S. Lytvynovych (1848–57), Y. Pelesh (1875–83), and M. Hornykevych (1923–56). The parish owns a valuable archive. In 1862 the St Barbara Brotherhood was created; it has been in existence (with small interruptions) since then.

Saint Basil the Great (Sviaty Vasyl' Velykyi), b ca 329 in Turkey, d 379 in Turkey. Archbishop of Caesarea and church father. He was an influential preacher and writer and an early organizer of Eastern monastic life. His works were widely read in Kievan Rus'. Several translations ap-

St Basil's Church

peared in the *Izbornik* of Sviatoslav (1076), including his 'Address to Young Men' and 'Hexaameron,' nine Lenten sermons on creation. His rules for monasticism and his ascetic writings influenced Ukrainian monasticism and inspired the formation of the *Basilian monastic order, named in his honor. St Basil also wrote a Divine Liturgy that is still used by the Ukrainian Orthodox and Catholic churches on certain holidays.

Saint Basil's Church (Tserkva sv. Vasyliia). An architectural monument of the Princely era in Ovruch (now in Zhytomyr oblast). Built in the second half of the 12th century in a Byzantine style influenced strongly by the Romanesque, it was a square, three-nave structure with two towers at its western end. In 1321 the church was destroyed during the siege of Ovruch by the Lithuanian grand duke Gediminas. In 1734 a small wooden church was raised within the neglected building, and thereby saved it from complete destruction. During restoration work in 1842, the ceiling and cupolas caved in. In 1907–9 the church was restored in the pseudo-Byzantine style by A. Vesnin and V. Maksimov, using A. Shchusev's design, and many of its original features were obliterated.

ss Cyril and Methodius Ukrainian Catholic Church in St Catharines

Saint Catharines. A city (1986 pop 343,258) in Ontario on the western end of Lake Ontario in the Niagara Peninsula. It owes its development as a manufacturing (metalworking and machine-building) and shipping center to the opening of the Welland Canal (1829); it also has a winery and is a canning center for the Niagara fruit belt. According to the 1991 census, 3,245 inhabitants of St Catharines claimed Ukrainian as their only mother tongue. Ukrainians began to settle in the region in 1919. By 1931 they had set up a Prosvita society, which in 1935 became a branch of the Ukrainian National Federation. The society staged plays, ran a Ukrainian school, and sponsored public lectures. After the Second World War a number of new organizations arose: the Ukrainian Credit Union, the Plast and SUM Ukrainian youth associations, and organizations of the Canadian League for Ukraine's Liberation, which in 1962 opened the Black Sea Hall. The Ukrainian Catholics are grouped in two parishes: ss Cyril and Methodius (est 1942) and St John the Theologian (est 1979). The Ukrainian Orthodox parish of St George's was founded in 1949.

Saint Clement I, b ?, d ca 97. Apostolic church father and pope (ca 88–97). Several important early church writings, including the *Letter to the Church of Corinth* and an important collection of ecclesiastical law, have been attributed to him. It is believed that Clement I died a martyr in Chersonese Taurica in the Crimea. His reputed relics were brought to Rome in 867–8 by ss Cyril and Methodius and were deposited in the Basilica of St Clement. According to legend, some relics that remained in Chersonese were taken to Kiev by Volodymyr the Great and deposited in the Church of the Tithes. For this reason Clement was honored throughout Rus'-Ukraine on 8 December (25 November OS). Cardinal Y. Slipy named the Ukrainian Catholic University in Rome in his honor.

Saint Cyril (Sviaty Kyrylo; secular name: Constantine), b 827 in Salonika, Greece, d 14 February 869 in Rome. Byzantine theologian, philosopher, and missionary. He learned Macedonian in Salonika, where his father was a governor. He was ordained in 848 and began his missionary work in 851. He traveled to the Arabs in the Near East (the so-called Saracen mission) and, with his brother, *St Methodius, to the Khazars (860–1); they stopped in Chersonese Taurica, where they reputedly discovered a copy of the Scriptures and Psalms in the Rus' language. There they also found what were believed to be the relics of St Clement I, which they later took to Rome. In 863 Cyril and Methodius traveled to Moravia at the invitation of Prince Rostislav and on the instructions of the Byzantine emperor Michael, in order to give the Slavic converts to Christianity a liturgy and scriptures in their vernacular. Cyril created the *Glagolitic alphabet – the oldest Slavic alphabet – and proceeded to translate church books, beginning with the Scriptures. The language that he used (and, to a large extent, created to serve the translation needs) is now known as Old *Church Slavonic; it consists of a mixture of Macedonian dialect and the language of Moravia's Slavic inhabitants. His work was acknowledged and praised by Pope Adrian II, at whose invitation the two brothers arrived in Rome in 867. There Cyril died, but his brother returned to Moravia to continue their missionary work.

St Cyril wrote a number of theological works in Greek, and possibly the *Prohlas* (Prefatory) poems to the Gospel, in which he defended the right of all peoples, Slavs in particular, to have a liturgy in their own language. The alphabet and the first Slavic literary language he created had a decisive influence on the development of Ukrainian writing, scholarship, and literature. Less attention has been paid by historians to the influence of Cyril and Methodius on Christianity in Ukraine, as their mission was restricted to the Moravian territory.

Medieval frescoes inside the church of St Cyril's Monastery

Saint Cyril's Monastery (Kyrylivskiy manastyr). A monastery founded by Grand Prince Vsevolod Olhovych ca 1140 on the outskirts of medieval Kiev. Its church, St Cyril's, was built ca 1146; a cruciform construction with three naves and apses, six pillars, and a single dome, it served as the mausoleum of the Olhovych family of the Chernihiv branch of the Riurykide dynasty (eg, Sviatoslav III Vsevolodych, Vsevolod Sviatoslavych Chermny) in the 12th and 13th centuries. The monastery was partially destroyed by the Mongols in the 13th century. It was rebuilt under the supervision of Hegumen V. Krasovsky in 1605. In the mid-18th century a baroque pediment and four octagonal cupolas were added to the church, and in 1760 a stone campanile designed by I. Hryhorovych-Barsky, with a church on its second story, was built above the monastery's gate.

In 1786 the monastery was secularized and turned into a hospital and home for the handicapped. St Cyril's Church remained in use, however. In 1881–4 marble choir parapets and a new marble iconostasis (designed by A. Prakhov) were installed in the church; its medieval frescoes were restored, under the supervision of A. Prakhov, by M. Murashko, I. Izhakevych, I. Seleznov, Kh. Platonov, and M. Pymonenko of the Kiev Drawing School, and by M. *Vrubel, who also painted new murals in the vaults and narthex and the four icons of the iconostasis. In 1929 the monastery's grounds were classified as the St Cyril State Preserve and the church was turned into a museum. The campanile was dismantled in 1937–8. Now the church and an extant 18th-century section of the monastery's wall and corner tower constitute a branch of the *St Sophia Museum. The church's frescoes are fine examples of 12th-century Ukrainian art and the influence of Bulgarian-Byzantine painting on it. They depict the Nativity of

Christ, the Presentation of Christ at the Temple, the Eucharist, the Annunciation, the Dormition, the Last Judgment and Apocalypse, an angel gathering the heavens into a scroll, the apostles, the evangelists, and various prophets and martyrs. Murals of saints – Cyril and Methodius, John the Macedonian, Euphemios – adorn its pillars, and compositions depicting St Cyril teaching the heretic, teaching in the cathedral, and teaching the emperor are found in the southern apse.

Saint Elijah (Sviaty Illia). Old Testament prophet of the 9th century BC whose feast is celebrated on 2 August (20 July OS). He was particularly popular among Ukrainians, and in folk mythology took on certain roles of *Perun, the ancient god of thunder. This association was reinforced by his feast day, commonly known as 'the thundering feast day' (*hromove sviato*), which falls in a period often marked by summer storms. Folk legend attributed such unsettled conditions to God's having asked Elijah to clear the heavens of demons who had risen up against him: since that time Elijah could still be heard doing his work using thun-

St Elijah's Church

der and lightning. The feast day also marked the beginning of the harvesting season. Ukrainian iconography commonly depicted St Elijah, according to the biblical account, ascending directly to heaven in a fiery chariot.

Saint Elijah's Church (Tserkva sv. Illi). An architectural monument built at the end of the 12th century in Chernihiv as part of the *Trinity–Saint Elijah Monastery. The Romanesque stone structure consisted of a single nave and one cupola resting on a cylinder supported by internal projections of the walls. In 1649 it was rebuilt in the baroque style, and a vestibule and two smaller cupolas were added. The original interior decorations have not survived. The present iconostasis was prepared in 1774.

St George (sculpture by Johann Pinzel adorning the exterior of St George's Cathedral in Lviv)

Saint George (Sviaty Yuri). A Christian martyr of the 3rd to 4th century whose feast is celebrated on 5 May (23 April OS). This feast day heralded the arrival of spring in the traditional Ukrainian calendar. Folk motifs note that it is St George who 'unlocks' the earth. As he was commonly regarded as a protector of agriculturists, processions to bless the fields – complete with priests, church banners, icons, and holy water – were common on his feast day. Frequently meals were eaten in the fields, and some of the food was often buried afterwards with a prayer for the fecundity of the land, or fed to animals (particularly the remains of Easter fare). St George was also regarded as a protector of animals, and on his feast day a variety of rituals were enacted to ward off 'unclean spirits' from them, particularly witches, who were believed to be doubly active during this transitional period in their efforts to 'take away' the milk of cows and leave them dry. The evening before St George 'arrived' all animals on a farmstead were rounded into outbuildings, whose entrances were then symbolically secured with a cross painted on with grease or tar. The following day the cattle were herded across embers (from fires lit the evening before as an additional protective measure) to purify and make them 'as strong as fire.' The ashes were later scattered across the sown fields.

The figure of St George in Ukrainian iconography is much in line with the general Christian image of him as

the dragonslayer riding a white horse, representing the triumph of Christianity over paganism. As a symbol of chivalry St George is the patron saint of the Ukrainian scouting organization *Plast, and his feast is traditionally commemorated by Plast members as the 'Celebration of Spring' (*Sviato vesny*).

Saint George Trial (Sviatouirskyi protses). The trial of 39 Communists accused of treason, which began its deliberations on 30 October 1921 in one of the buildings of the St George Greek Catholic Cathedral complex in Lviv. The majority (22) of the accused were Ukrainian; the remainder were Poles or Jews. Many of them were arrested when they convened for a meeting of the Communist Party of Eastern Galicia. The trial itself lasted from 22 November 1922 to 11 January 1923. Only the better known of the leaders, with a more revolutionary background, admitted they were active members of the Communist party, among them C. Grosserowa, K. Cichowski, O. Krilyk (Vasylkiv), N. Khomyn, and S. Królikowski. Most of the remaining defendants denied their membership in the Communist party and claimed only to have greater or lesser sympathies with communism. Ten of the accused were given sentences of two to three years; the rest were acquitted. The convicted defendants did not serve their sentences. They were released on bail, and never returned to prison. Abridged reports of the trial were published in 1923 in both Ukrainian and Polish. A second edition appeared in Polish in Warsaw in 1958.

St George's Cathedral

Saint George's Cathedral (Sobor sv. Yura). One of the finest examples of rococo church architecture in Europe, built in Lviv. From 1817 to 1946 it served as the seat of the Ukrainian Catholic *Halych metropolity. The cathedral's complex, consisting of the church, the campanile (its bell was made in 1341), the metropolitan's palace, office buildings, a wrought-iron fence, two gates, and a garden, stands on a high terrace overlooking the old city of Lviv. According to legend the site of the complex was originally occupied by a wooden church and a fortified monastery founded ca 1280 by Prince Lev I Danylovych and, after their destruction by King Casimir III (in 1340), by a three-apsed, four-column Byzantine stone basilica (1363–1437). Under Metropolitan Atanasii Sheptytsky the basilica was dismantled and replaced by the present church, which

was designed by and built under the direction of B. *Mere-
tyn in 1744–59 and finished in 1764 by S. Fessinger, who
also built the adjacent metropolitan's residence (1761–2).

Built on a cruciform ground plan, the four-column
church is topped by one large cupola and four small ones.
The high exterior walls are decorated with simplified
Corinthian pilasters, rococo stone lanterns, and a cornice.
Two stairways with delicate rococo balustrades lead to the
main entrance, which is flanked by statues of Metropoli-
tans Atanasii and L. Sheptytsky. Above the entrance is a
balcony, a high window, the coat of arms of the Shep-
tytsky family, and an attic surmounted by a statue of St
George the Dragon Slayer by J. Pinzel. The grounds in
front of the church are enclosed by two rococo gates dec-
orated with allegorical figures of Faith, Hope, and the Ro-
man and Greek Catholic churches.

The church's interior decorations were completed only
in 1790. The paintings were done by masters such as Yu.
Radylovsky (*Archpriest and Appearance before the Apostles*),
M. Smuhlevych (*Christ's Sermon*, behind the altar, and
Christ Pantocrator, in the dome), and L. Dolynsky (local
icons, oval icons of the prophets, and scenes of 16 feast
days). The sculptured frame of the two entrance doors, the
decorations around the entrances, and the many lanterns
were done by M. Filevych. In 1942 M. Osinchuk restored
the paintings and repainted the murals. With the suppres-
sion of the Ukrainian Catholic church by the Soviet regime
in 1946, the cathedral was placed under the jurisdiction of
the Russian Orthodox church. With renewed religious
freedom in the early 1990s, the cathedral reverted to the
Ukrainian (Greek) Catholic church.

St George's (Dormition) Cathedral

St George's Church

Saint George's Church (Tserkva sv. Yura). A master-
piece of Galician wooden architecture. It was moved to
Drohobych from Nadiiv in 1656, after the original church
had been burned down by the Tatars in 1499. In its present
form the church dates back to the beginning of the 18th
century. It consists of a square central frame (7.5 by 7.5 m)
flanked by two octagonal choirs, an octagonal altar frame,
and a vestibule. Together the three frames are 18 m in
length. They are topped by three domes without tiers. The
choir tops have one tier. The oldest parts of the church are
the nave and vestibule. In 1678 a 27-m-high belfry was
built. The paintings in the nave were done in 1657–9 under
the supervision of Stefan from Medyka; those of the octag-
onal upper part, in 1678; those in the choirs, in 1691; and
those in the vestibule, in 1714. The iconostasis and its
icons were done in 1648–50 in the Renaissance style. The
latest restoration was carried out in 1974–5.

Saint George's (Dormition) Cathedral (Yuriiivskiy
[Uspenskyi] sobor). An architectural monument in Kaniv,
built in 1144 for Prince Vsevolod Olhovych. A small, six-
column church with three naves and apses and a single
cupola, it was similar in structure to the church of *Saint
Cyril's Monastery and the *Pyrohoshcha Church of the
Mother of God in Kiev. Incorporated in its façade are rows
of small niches once decorated with frescoes. Frescoes also
adorned the portals. In 1805–10 the church's exterior was
remodeled in the neoclassical style. The characteristic fea-
tures of Kievan Rus' architecture have been relatively well
preserved in the cathedral.

Saint John Chrysostom (Sviaty Ivan Zolotousty), b ca 347, d 407. An eminent preacher and church father. In 398 he was elected Patriarch of Constantinople, but in 403 he was deposed. His many sermons (and those attributed to him) circulated widely in 12th– to 17th-century Ukraine in Old Bulgarian and Old Ukrainian translations. Several manuscripts of both 'full' (138 sermons) and 'short' (67 sermons) editions of his sermons have survived. The sermons were usually didactic in tone, and exhorted people to attend church and participate in the liturgy; to observe fasts; and to revere their parents, elders, and teachers. They also encouraged believers to be generous, honest, sincere, and charitable. The Liturgy of St John Chrysostom, which is the most commonly used *liturgy in the Ukrainian church, was probably not composed by him.

Saint John's Eve. See Kupalo festival.

Saint John's Institute (Instytut sv. Ivana). A Ukrainian Orthodox students' residence established in Edmonton in 1918 as the M. Hrushevsky Ukrainian Institute on the initiative of the Adam Kotsko Student Club. The institute housed students from outside Edmonton, encouraged postsecondary education, and popularized Ukrainian culture and identity in Canada. By 1943 it had 718 alumni. In May 1944 it was renamed St John's Institute to reflect its Ukrainian Orthodox orientation. It is an integral component of the *Ukrainian Self-Reliance League. Originally located on the north side of the city, the institute was moved to a location near the University of Alberta in 1949–50. With accommodation for 60 students, a library, museum, chapel, and classrooms, it provides regular summer courses in Ukrainian studies and choir conducting. A jubilee book of the M. Hrushevsky Ukrainian Institute was printed in 1943, and of the St John's Institute in 1959.

Saint Josaphat. See Kuntsevych, Yosafat.

St Josaphat's Ukrainian Pontifical College

Saint Josaphat's Ukrainian Pontifical College (Kolegiia sv. Yosafata). A papal institution for training Ukrainian theologians, founded in 1897 by Pope Leo XIII in Rome. Since 1904 it has been run by the *Basilian monastic order. In the 1930s theology students from all Ukrainian Catholic eparchies attended St Josaphat's College. The col-

lege has produced about 350 clergymen and 5 bishops. The college's summer center is at Castelgandolfo, near Rome.

Saint Kuksha [Kukša], b ?, d 1113. A hieromonk at the Kievan Cave Monastery. Possibly of Viatician origin, he left Kiev for (what is now) the Orel region of Russia in order to undertake pioneering missionary work among the Viaticians. He was martyred during the course of his proselytizing. Reputed to have created miracles, St Kuksha is remembered on 9 September (27 August OS). His relics are kept in the Near Caves of the Kievan Cave Monastery.

Saint Leontii. See Kunytsky, Leontii.

Saint Methodius (Sviaty Metodii), b ?, d 885. Byzantine missionary. After joining the Byzantine imperial service, he governed a province with a large Slavic population (probably in Macedonia) before becoming hegumen of a monastery on Mt Olympus. He joined his brother *Saint Cyril in 860 for a mission to the Khazars. On their return they visited Chersonese Taurica on the Crimean Peninsula, where they acquired the reputed relics of St Clement I, which they later took to Rome. In 863 the brothers began a mission to the Slavs of Moravia. Together with Cyril, Methodius translated many liturgical texts into the early form of Church Slavonic that Cyril had developed. The brothers traveled to Rome in 867 for an audience with Pope Adrian II. Cyril died while they were in Rome, but Methodius returned to his mission as papal legate to and then bishop of Moravia. His attempts to develop a separate Slavic (vernacular) church rite were opposed by the Frankish clergy and nobility, and Methodius was imprisoned for over two years. He continued his writings, however: he completed a biography of Cyril, translated the Old Testament, and composed a code of civil and ecclesiastical law based on a Byzantine model. Although he was eventually released, his missionary work did not survive in Moravia for long. His disciples were driven out by the Franks and took refuge in Bulgaria, where they were later instrumental in the establishment of Christianity.

ss Cyril and Methodius, as the 'teachers of the Slavs,' played an important symbolic role in the Ukrainian national awakening of the 19th century. One of the first organizations dedicated to the political and national revival of Ukrainians was the *Cyril and Methodius Brotherhood.

Saint Michael the Archangel (Arkhanhel Mykhail). The supreme angel in Christian belief. Ukrainians shared many of the Christian beliefs about St Michael, particularly about his leading role in the struggle against Satan – hence, the name Arkhystratyh Mykhail 'the Supreme Commander Michael.' He was believed to have taken thunder away from Satan and handed it over to St Elijah. Ukrainians adopted St Michael as the patron saint of hunters and the city of Kiev.

Saint Michael's Golden-Domed Monastery (Mykhailivskyi Zolotoverkhyi manastyr). An Orthodox men's monastery in Kiev. Little is known about its early history. In the 1050s Prince Iziaslav Yaroslavych built St Demetrius's Monastery and Church in the old upper city of Kiev, near St Sophia Cathedral. In 1108–13 his son,

St Michael's Golden-Domed Monastery

Sviatopolk II, built a church at the monastery dedicated to the Archangel Michael. The monastery probably came under the control of the Kievan Cave Monastery ca 1128; it was mostly destroyed during the Tatar invasion of 1240 and ceased to exist.

Written records confirm that the monastery was reopened by 1496. Soon afterward it began to be known as St Michael's Golden-Domed Monastery, its name being taken from the church built by Sviatopolk (although historians are not certain which church survived the Tatar invasion, St Demetrius's or St Michael's). Restored and enlarged over the 16th century, it gradually became one of the most popular and wealthy monasteries in Ukraine. In 1620 Y. Boretsky made it the residence of the renewed Orthodox metropolitan of Kiev, and in 1633 I. *Kopynsky was named supervisor (both men were buried there). It enjoyed the patronage of hetmans and other benefactors and acquired many valuable artifacts (including the relics of St Barbara, brought to Kiev from Byzantium in the 11th century and kept in a silver sepulcher donated by Hetman I. Mazepa, and an iconostasis funded by Hetman I. Skoropadsky). Although most of the monastery's properties were secularized in the late 18th century, in the 19th and 20th centuries as many as 240 monks have lived there, and after 1800 it served as the residence of the bishop of Chernihiv (who was also vicar of Kiev). A preceptors' school was located there, and many prominent composers (eg, K. Stetsenko and Ya. Yatsynevych) studied or taught at the school.

The main church of the monastery (built in either 1654–7 or 1108–13) was an important architectural and cultural monument. Originally it had three naves and three apses on the eastern side and was topped by a single large gilded cupola. It was rebuilt in a baroque style and expanded with a new façade and six additional cupolas in the 18th century. The most striking elements of the interior were the 12th-century frescoes and mosaics, probably done by Kievan artisans (including perhaps Olimpiii). Although many of these were destroyed in the 13th to 16th century, some – notably the mosaics of St Demetrius of Thessalonika, the Eucharist, and Archdeacon Stephen – survived and were partially restored in the late 19th century. Several other frescoes were restored by A. Prakhov. Other buildings in the monastery complex included a bell tower and

three residences and refectories. Several Kievan princes were buried in the church, including Sviatopolk II.

After the Soviet seizure of power the monastery was closed, and in 1936 the main church was demolished by the authorities. Before that, some of the mosaics were hastily removed and deposited in the Tretiakov Gallery in Moscow or taken to the St Sophia Cathedral. The art scholar M. *Makarenko was repressed for protesting the destruction of St Michael's Golden-Domed Monastery and subsequently arrested and shot.

St Nicholas (late-17th-century icon from Mykhnivka, Volhynia)

Saint Nicholas (Sviaty Mykolai). One of the most popular saints of the Eastern and Western churches. Little is known about him except that he was bishop of Myra (now in Turkey) in the 4th century, and that he was probably born in Patara (near modern Kalamaki, Turkey). Legends of his charity, especially toward children, and of miracles associated with him, soon spread throughout Europe. In Ukraine the cult of St Nicholas was probably introduced by Metropolitan Yefrem (1089–98), to whom a popular manuscript on the miracles of St Nicholas is attributed. According to chronicles a church in St Nicholas's honor

had already been built in Kiev during the reign of Prince Ihor (d 945).

In Ukrainian folk tradition there are two figures known as St Nicholas. One, 'warm Nicholas,' was celebrated in the spring, on 22 May (9 May OS), and the other 'old Nicholas,' was commemorated in the winter, on 19 December (6 December OS). The warm Nicholas was considered to be the patron saint of agriculture. He was said to walk the land, examining the freshly sown fields, 'drying places over-damp, and dampening those over-dry' after the winter. On the festival, householders would lead their horses into the fields for the first night's grazing, shear sheep, and sow buckwheat. St Nicholas was called upon to protect livestock from wolves, and his name frequently appeared in shepherds' prayers. He was also a patron of youth, particularly of orphans and poor girls. The latter he was said to assist in preserving their chastity and in seeking a husband.

In the Kiev region and Podilia a feast known as *nykol'shchyna* was held on 22 May. Ukrainian Cossacks considered Nicholas to be patron of the seas. When venturing out to sea the Cossacks would hold a church service in his honor and would carry icons with his likeness. They would pray to these icons for salvation if caught in violent storms, and there were numerous sailors' tales about their miraculous powers.

According to folk tradition the old Nicholas brought the first snow 'by shaking his beard.' He was considered the patron of spinning, and yarns and thread were often brought to church on his festival 'to add to his beard.' In Western Ukraine gifts were given to children on the eve of his feast day. The Ukrainian Catholic church encouraged the development of ritual plays and games depicting St Nicholas, an angel, and the devil (in appropriate masks and garb), which exhorted children to do good deeds. These plays, some of which were written by professional authors, were often staged by amateur theaters.

St Nicholas often appears in carols and legends. In Ukraine icons with his image were greatly cherished and found in virtually every home. His icon was also placed in an important position in iconostases, usually flanking Jesus, the Mother of God, or the patron saint of the church. In Ukraine St Nicholas was so popular that over time the 'functions' of other saints (such as Michael, Andrew, George, and Barbara) were ascribed to him.

During the Princely era, according to Ye. Onatsky, Ukrainians conducted pilgrimages to the relics of St Nicholas in Bari in southern Italy (where they had been taken in 1087 by Italian sailors). This tradition was revived in 1953 by Ukrainian émigrés on the initiative of Archbishop I. Buchko.

M. Mushynka

Saint Nicholas's Military Cathedral (Sobor sv. Mykolaia, aka Viiskovo-Mykyl'skyi Sobor and Velykyi Mykola). One of the finest Cossack baroque buildings financed by Hetman I. Mazepa. It was built by Y. Starchenko in 1690–3 on one of the highest sites in Kiev, on the grounds of St Nicholas's Monastery. The cathedral consisted of three naves, five domes, an elaborately carved façade, and richly embellished portals. Inside was a unique baroque seven-tier iconostasis (15.5 m high, 22.0 m wide) donated by the Kiev burgher S. Balyka. After Mazepa's death his coat of arms was removed from the

St Nicholas's Military Cathedral

façade. A three-story baroque campanile was built in the 1750s. In 1831 the Russian military expropriated the monastery, which was then within the area of the Kiev Citadel, and began using the cathedral as the Kiev garrison church. In the 1920s, restoration of the cathedral was supervised by the VUAN. Nevertheless, the Soviet authorities dismantled the iconostasis, and in 1934 they demolished the entire cathedral.

Saint Nicholas's Monastery (Mykolaivskyyi manastyr). One of the earliest monasteries in Kiev, located on a hillside later known as Askoldova Mohyla (Askold's

St Nicholas's Monastery

Tomb) in the Pecherske district. Believed to have been established in 1113 by Grand Prince Mstyslav I Volodymyrovych the Great, it was originally called the Pustynnyi Monastery because of its uninhabited location. The monastery came under the jurisdiction of the Kievian Cave Monastery in 1174. It was destroyed during the 13th-century Mongol invasion but rebuilt, and in 1497 Grand Duke Alexander Jagiellończyk of Lithuania granted it lands stretching down to Kiev's Podil district. Later the monastery enjoyed the patronage of the Zaporozhian Host. From 1696 it was called St Nicholas's Small (Malyi Mykola) Monastery to distinguish it from the nearby St Nicholas's Great (Velykyi Mykola) Monastery, whose construction that year was funded by Hetman I. Mazepa (see *St Nicholas's Military Cathedral). From 1715 the monastery was known as the Slupskiy or Slup (Pillar) Monastery, after the pillar-shaped, stone St Nicholas's Church built in the baroque style there that year (funded by Governor-General D. Golitsyn). The church was substantially remodeled in the 19th century. In 1908 the monastery housed 50 monks and novices. The monastery was secularized under Soviet rule, and the church and adjacent three-story campanile (built in 1874) were dismantled in the mid-1930s to make way for a park.

Saint Nicholas's Prytyska Church (Prytysko-Mykilska tserkva). A baroque church built at the end of the 17th century in the Podil district of Kiev. The name is derived from an icon of St Nicholas, which earlier had hung at a dock (*prytyka*) in the Kiev harbor. Its floor plan had the form of a Greek cross. Over the center of the nave a large dome rested on an octagonal drum. A campanile was built next to it in the early 18th century. In 1718 and again in 1811 the church was badly damaged by fire. It was rebuilt in the baroque style in 1750 and again in the 1820s from A. Melensky's plans. The interior was painted in 1833 by A. Sukhoveev and his assistants. In 1984, after the completion of the restoration begun in 1977, much of the building collapsed.

Saint Onuphrius's Church and Monastery (Tserkva i manastyr sv. Onufriia). A church and monastery located

St Onuphrius's Church and Monastery

in Lviv. First mentioned in documents from 1292, the complex has been built and rebuilt several times – in 1453 (funded by S. Dropan), 1518 (funded by K. Ostrozky), 1655, and 1902. In 1693–8 the monastery was surrounded by defensive walls, parts of which can still be seen.

The monastery was controlled by the *Lviv Dormition Brotherhood until 1767. During this period it housed a hospital (1591–1765) and, for a time, the printing press of I. Fedorovych. In the 1630s the engraver *Illia began his work there. In 1709 the monastery (and brotherhood) accepted the Church Union of Berestia and was subordinated directly to the Vatican. In 1767 it joined the *Basilian monastic order. Expanded considerably in 1815–20, the monastery came to house a library containing, by 1939, many valuable manuscripts and over 40,000 books, the Basilian archives, and a gallery featuring icons and portraits of church and historical figures. It also served as the Basilian order's headquarters and publishing center in Galicia. Notable figures buried in the monastery's cemetery (closed after 1820) and in the church's crypts include Fedorovych and his son, Ivan; important Lviv burghers; and Basilian protohegumens such as M. Hrynevetsky and A. Radkevych.

The complex includes Saint Onuphrius's Church, a three-nave and three-apse structure built in 1680; monks' cells built in 1683; and a bell tower. The monastery was closed by the Soviet authorities following the Second World War, and the monks were exiled or killed. In 1990 the monastery was returned to the Basilian order.

St Panteleimon's Church

Saint Panteleimon's Church (Tserkva sv. Panteleimona). The only surviving example of 12th- to early-13th-century church architecture in Galicia, built near Halych in the Byzantine style with Romanesque influences. Now located in the village of Shevchenkove, in Halych raion, it has a square floor plan, four columns, three naves, and one dome. Destroyed and rebuilt several times, in the 16th century it was renovated in the late Renaissance style, expropriated by the Polish Roman Catholic church, and renamed St Stanislaus's Church. The latest renovations took place in 1965–9. Of the original structure, the walls, the western and southern portals, and three apses of the eastern façade have survived. The Romanesque decorations of the main portal and the altar apse testify to the high devel-

opment of stone carving in Galicia. Grafitti and drawings dating from the 12th to 17th centuries can be found on the interior and exterior walls.

Saint Parasceve (Sviata Paraskeviiia). The name of a number of saints in the church calendar. One of the most popular saints in the Eastern church is Parasceve of Ikonion (in Asia Minor), who was martyred during the reign of Emperor Diocletian. Her feast day is 28 October, when girls used to pray to her to give them a spouse soon. Another Parasceve, who is assumed to have been of Slavic origin, lived in the 11th century and gained wide popularity in Byzantium. Her relics are found in Tirnovo (Turnovo), Bulgaria. Metropolitan G. Tsamblak introduced her cult in the Ukrainian church and set her feast day as 14 October. In Belarus a Parasceve-Prakseda is honored on 28 October. She was a princess of Polatsk and a nun who made pilgrimages to many holy places. She died in Rome in 1239 and was canonized by Pope Gregory X in 1273. In Ukrainian Christian folk belief, the cult of Parasceve is associated with the cult of Fridays ('Paraska' was even used as a synonym for *piatnytsia* 'Friday,' when women did not work as hard as usual).

Saint Paul. See Minneapolis.

Saint Petersburg (Russian: Sankt-Peterburg). A city (1989 pop 5,024,000) in the delta of the Neva River in northwestern Russia. From 1712 to 1918 it was the capital of the Russian Empire. Its name was changed to Petrograd in 1914, to Leningrad in January 1924, and back to St Petersburg on 6 September 1991. Today St Petersburg is Russia's second-largest and second-most important city, with a seaport, a large industrial base, and extensive cultural, scientific, and educational facilities.

The city was founded in 1703 with the construction of the Peter and Paul Fortress and the admiralty shipyards (1704). In the 1710s Ukrainian Cossack regiments under the command of Cols P. *Polubotok, A. Markovych, and I. Charnysh took part in draining the marshes and digging the canals for ships. The development of the city was costly in human lives: the labor was backbreaking, the treatment of laborers was brutal, and the climate was harsh. In Ukraine it became common knowledge that 'St Petersburg was built on Cossack bones.' Further large-scale projects were undertaken with the labor not only of army units but also of Swedish war prisoners, Cossack convicts, and conscripted workers from all the gubernias. In Kiev gubernia alone, labor conscriptions for the St Petersburg work force raised 2,125 men in 1710, 1,365 in 1712, 1,790 in 1713, and 1,435 in 1714 and in 1715. Hired workers and skilled tradesmen were also used. Later, labor conscription was replaced by special tax levies on the gubernias.

St Petersburg was proclaimed capital of the Russian Empire in 1712, and soon became an important center of culture, learning, science, art, and education. Ukrainians summoned to the capital by Peter and his successors or attracted there by career opportunities played a prominent and sometimes a leading role in the political and cultural life of the city and empire. The city's Western atmosphere appealed to Ukrainian cultural figures. As the empire's 'window on Europe' it offered opportunities for direct contacts with the West, for foreign travel and study at foreign universities. Conditions for Ukrainian cultural and

even political work were more favorable in St Petersburg than in Ukraine.

It is unknown how many Ukrainians lived in St Petersburg in different periods. Besides state officials and intellectuals there were many petty civil servants, workers, serfs, and domestic servants. Tens of thousands of Ukrainians served in military units stationed in St Petersburg and its vicinity. According to the 1897 census there were 1,500 Ukrainians in the city, but according to the estate breakdown over 11,000 peasants and over 3,000 burghers in the city came from Ukrainian gubernias. According to the 1926 census there were 10,781 Ukrainians in Leningrad, 7,392 of whom were men. In 1959 there were 68,300 Ukrainian residents, accounting for 2 percent of the total population, and 30.2 percent of them spoke Ukrainian. In 1989 there were 97,100 (2.46 percent), 31.5 percent of whom spoke Ukrainian.

18th century. During the period of the Hetman state hetmans and their plenipotentiaries or delegations came to St Petersburg for talks with the tsar or his representatives. The first hetman to visit the capital was I. *Skoropadsky. Acting hetman P. Polubotok and his officers were summoned in 1723 to St Petersburg, arrested, and imprisoned in the Peter and Paul Fortress for demanding the restoration of their former rights. Polubotok died in prison. Some of his officers, including D. Apostol, Ya. Lyzohub, V. Zhurakovsky, and M. Khanenko, were released at the beginning of 1725 after the death of Peter I but were detained in St Petersburg for several years. Ukraine's last hetman, K. Rozumovsky, often visited the capital. In 1764 his accompanying chancellery was headed by O. Tuman-sky, and his personal secretary was I. Martos, who stayed in St Petersburg and later became a department head at the Ministry of Justice. M. Khanenko's son, Vasyl, and S. Karnovych were personal adjutants of Grand Prince Petr Fedorovich (later Peter III), and A. Hudovych was his adjutant general. In 1775 O. *Bezborodko was appointed secretary to Catherine II, and rose steadily through the bureaucracy to become chancellor of the Russian Empire in 1797 and obtain a princely title. His circle of friends and collaborators in St Petersburg included P. Zavadovsky, Catherine's secretary, senator, and education minister (1802–10); D. Troshchynsky, Catherine's and Paul I's state secretary and then minister of appanages and minister of justice; S. Shyrai, a general and then marshal of the nobility of Chernihiv gubernia; M. Myklashevsky, eventually governor of Volhynia, Little Russia, and New Russia gubernias; O. Sudiienko, secret counsel and member of the postal authority; and Count O. Rozumovsky, senator and minister of public education. Toward the end of the 18th century the Collegium of Foreign Affairs and other state bodies were staffed by Ukrainians, such as Ya. Markovych, O. Kotlubytsky, O. Khanenko (later secretary of the Russian embassy in Britain), and I. Tuman-sky. V. Tomara, A. Italynsky, and, later, P. Poletyka made a career in the diplomatic service. Ukrainians such as Field Marshal I. Hudovych and Gen P. Kaptsevych attained high military rank in the imperial service.

Ukrainian scholars and educators, most of them professors or graduates of the Kievan Mohyla Academy, played a leading role in the development of Russian learning and education as well as the emergence of Ukrainian studies. Archbishop T. *Prokopovych, who supported Peter's reforms, was summoned in 1716 to St Petersburg, where he

headed the Learned Council and set up an eparchial seminary. Besides Prokopovych its faculty included V. Stefanovych, V. Dmytrashko-Raicha, and I. Obydovskyy. Its graduates, including H. Kozytsky and M. Motonys, became associates of the St Petersburg Academy of Sciences (est 1724) and lecturers at the academy's university and gymnasium. The two schools were attended by many Ukrainians who later distinguished themselves as scholars, such as the brothers P. and Ya. Myrovych, Ya. Kozelsky, O. Lobysevych, I. Tumansky, and S. Divovych. K. *Rozumovsky was president of the academy (1746–96), and H. Poletyka worked there as a translator. T. Yankovsky founded the Neva Seminary (1721) in St Petersburg; and many of its lecturers, including A. Zertys-Kamensky, O. Kalynovsky, and H. Kremenetsky, were Ukrainians. Besides Prokopovych some eminent leaders of the Russian Orthodox church were Ukrainians. A whole line of St Petersburg archbishops – N. Stebnytsky (1742–5), Yankovsky (1745–50), S. Kuliabka (1750–61), and V. Putsek-Hryhorovych (1761–2) – came from Ukraine.

Ukrainians were among the first organizers of medical research and training in St Petersburg, among them I. *Poletyka, N. *Ambodyk-Maksymovych, M. Terekhovskyy, N. Karpynsky, Kh. Tykhorsky, S. Andriievskyy, Ya. Sapolovych, and Y. Kamenetsky. Some of the original professors of the St Petersburg Medical-Surgical Academy (est 1799) were Ukrainians, such as the brothers I. and T. Smilivskyy and P. Zahorsky. I. Orlai, from Transcarpathia, practiced medicine in St Petersburg. Ukrainians also taught in other schools in the capital; H. Poletyka, for example, was inspector, and L. Sichkarev a lecturer, at the Naval Cadet School. The philosopher I. Khmelnytsky and the jurist V. Zolotnytsky worked in St Petersburg.

Ukrainians in St Petersburg contributed to the development of Russian journalism. Prokopovych took part in publishing one of the first Russian newspapers, *Sankt-Peterburgskie vedomosti*. P. Bohdanovych edited that paper and published the journals *Nevinnoe uprazhnenie* (1763) and *Sobranie novosti* (1775). Editors or publishers such as M. Antonovsky, V. Ruban, F. Tumansky, and Kozytsky were of Ukrainian origin. In their journals they devoted some space to Ukrainian history, to which H. Poletyka, Bezborodko, Divovych, Ya. Markovych, and A. Rigelman devoted attention. The first work in Ukrainian ethnography, H. Kalynovsky's description of marriage rituals (1777), came out in St Petersburg, and I. Kotliarevsky's *Eneida* (Aeneid, 1798), the first literary work in the Ukrainian vernacular, was published there.

Many Ukrainian artists studied and worked in the capital, including the architect I. Zarudny, the painters K. Holovachevskyy, D. Levytsky, A. Losenko, and V. Borovykovskyy, who were also professors of the St Petersburg Academy of Arts (est 1757), the engravers I. Liubetsky and H. Srebrenytsky, and the sculptor M. Kozlovskyy. Ukrainian music and musicians were in great demand in St Petersburg. The court kapelle included singers and conductors such as H. Skovoroda (1741–4), M. Poltoratsky (1763–96), and D. *Bortniansky (1796–1825). Of the many singers and bandurysts employed in the capital the better known were T. Bilohradsky and O. Rozumovsky (later husband of Elizabeth I). The composer M. *Berezovsky worked in St Petersburg.

19th and early 20th centuries. After the abolition of the Hetman state Ukraine lost all attributes of autonomy and

was reduced to a mere province within the empire. Individual Ukrainians continued to play a role in the imperial administration; Prince V. *Kochubei, for example, was vice-chancellor, minister for internal affairs (1802–12, 1819–25), and president of the State Council and the Committee of Ministers (1827–34), and Count M. Mylorodovych was general governor of St Petersburg (1818–25). Some of the members of the clandestine revolutionary circles in St Petersburg, from which the Decembrist movement arose, were Ukrainians. O. Myklashevskyy, O. Yakubovych, S. and O. Kapnist, and P. Horlenko belonged to the Union of Welfare (est 1818), and Myklashevskyy and D. Iskrytsky were among the founders of the Northern Society. After the Decembrist uprising was suppressed, the Little Russian Secret Society was investigated, and its leader, V. Lukashevych, was held in the Peter and Paul Fortress.

As in the previous century Ukrainians played an important part in the development of science, scholarship, and education in the Russian Empire. The first rector of St Petersburg University (1819–21) was a Ukrainian from Transcarpathia, M. Baluhiansky, who drafted its statute. P. Lodii and V. Kukolnyk taught at the Pedagogical Institute and then at the university. In medicine D. Vellansky, Ya. Kaidanov, I. Buialsky, and O. Kalynsky, the founder of the Russian Medical Association, left their mark as researchers and educators. P. Naranovych and P. Pelekhin served on the faculty of the Medical-Surgical Academy, and F. Yavorsky was chief physician at the Admiralty Hospital (1813–21). V. Buniankovskyy taught mathematics, and M. Ostrohradsky founded the St Petersburg school of mathematics. I. Sreznevskyy was a professor of Slavic philology (1847–80), and M. Lazarenko was a professor of international law at the university. The director of the Mining Engineering School was Ye. Kovalevskyy, who became education minister (1858–61) and permitted the printing of T. Shevchenko's *Kobzar* (1860).

At the beginning of the 19th century St Petersburg became a center for Ukrainian studies: O. Pavlovskyy published a grammar of the Ukrainian vernacular (1818), and N. Tsertelev compiled a collection of old Ukrainian songs (1819). The St Petersburg Archeographic Commission, founded in 1834 under the Ministry of Public Education, published many volumes of historical documents and materials on Ukraine (see *Archeography). An impressive circle of specialists in Ukrainian studies formed around the St Petersburg journal **Osnova* (1861–2). It included V. Bilozersky, P. Kulish, M. Kostomarov, and O. Markovych. At the same time the city was one of the main centers of Ukrainian literary life. Shevchenko spent his most creative years and wrote his *Kobzar* (1840) and *Haidamaky* (1841) there. M. Markevych studied there, and from 1834 Ye. Hrebinka lectured in the city's military schools. Kulish founded the first Ukrainian printing house, which was managed by D. Kamenetsky, in St Petersburg. It printed the works of Ukrainian writers, such as M. Vovchok. Some of the Ukrainian writers or publicists who worked in the capital were V. Maslovych, B. Markovych, V. Lazarevskyy, and M. Makarov. The almanacs *Molodyk* (2nd issue 1844) and *Khata* (1860) came out in St Petersburg.

Some noted Ukrainian artists studied or worked in St Petersburg in the first half of the century. I. Martos taught sculpture and served as rector (1814) of the St Petersburg Academy of Arts. D. Bezperchy, I. Buhaievskyy-Blahorod-

ny, I. Soshenko, A. Mokrytsky, H. Chestakhivsky, Shevchenko, and O. Lytovchenko were established painters. S. Hulak-Artemovsky was a leading soloist in Italian opera at the Mariinskii Theater, and Y. Petrov excelled in Russian opera.

In the second half of the century Ukrainians in St Petersburg began various organizations to meet their own needs as well as to promote larger national purposes. By staging concerts of Ukrainian music, holding commemorative services and meetings, and inviting theatrical groups from Ukraine those organizations cultivated a sense of Ukrainian identity and maintained communal unity among the inhabitants of the foreign capital. The first Ukrainian hromada was established there (see *Hromadas) and was active by the autumn of 1858. In the 1880s a large student hromada and a small populist circle arose around Kostomarov. Toward the end of the 1890s a clandestine hromada consisting mostly of civil servants was organized by activists such as O. Lototsky, P. Stebnytsky, Ye. Chykalenko, O. Borodai, V. Leontovych, and M. Slavinsky. It became known as the Old Hromada. With its support Gen M. Fedorovsky set up in 1898 the *Philanthropic Society for Publishing Generally Useful and Inexpensive Books, which devoted itself to popular education and enlightenment. In the same year the charitable *Shevchenko Society in St Petersburg was founded to give financial assistance to students from Ukraine pursuing higher education in St Petersburg. The underground *Ukrainian Student Hromada in St Petersburg (1898–1916) included students from most of the higher schools in the city. In 1903 the clandestine Northern Committee of the *Revolutionary Ukrainian party (RUP) was created in St Petersburg. Its membership included S. Tymoshenko, D. Doroshenko, P. Diatliv, and N. Shlykevych. In 1904 some of its members broke away to form the Ukrainian Social Democratic Workers' party (USDWP), and others in 1905 joined the Ukrainian Democratic Radical party, which organized the *Ukrainian caucus in the first Russian State Duma. In 1908 two branches of the *Society of Ukrainian Progressives (TUP) were set up in St Petersburg: the first consisted of the members of the Old Hromada, which had been active in the different parties during the brief liberalization period, and the second, of young members headed by M. Korchynsky. Until the Revolution of 1917 those two groups played a dominant role in the capital's Ukrainian community.

Because censorship was milder than in Ukraine, St Petersburg became the chief center for Ukrainian publishing. Over 700 titles were published there before the revolution, including the almanacs *Skladka* (The Contribution, 4th issue, 1897) and *Z nevoli* (From Captivity, 1908), a Shevchenko collection (1914), the classics of Ukrainian literature (I. Nechui-Levytsky and V. Stefanyk), the full edition of Shevchenko's *Kobzar* edited by V. Domanytsky (1907, 1908, 1910; the last one was confiscated by the censor), O. Lototsky's children's anthology *Vinok* (Garland, 1911), and the series Mal'ovani kazochky (Colored Stories). Two encyclopedic volumes of *Ukrainskii narod v ego proshlom i nastoiashchem* (The Ukrainian People in Its Past and Present, 1914–15) came out in St Petersburg. Several Ukrainian writers worked there in the late 19th century, among them I. Rudchenko, A. Kashchenko, T. Zinkivsky, S. Opatovych, D. Mordovets, and O. Dosvitny. As soon as the prohibition was lifted, the Ukrainian press began to

appear there, including the journal *Ukrains'ke bdzhl'nystvo* (1906–9), edited by Ye. Arkhypenko, and the official organ of the St Petersburg Committee of the USDWP *Nashe zhyttia* (1915–17). In the early 1910s P. Balytsky founded a Ukrainian bookshop. In 1917 the Drukar publishing house was founded there. When it moved to Kiev, it left a branch behind.

Many Ukrainian scholars who worked in St Petersburg were active in the Ukrainian civic and cultural organizations. The historian and sociologist M. Kovalevsky headed the Shevchenko Society for a time. The anthropologist F. *Vovk was curator of the Ukrainian section of the Ethnographic Department in the Alexander III Museum. Other scholars, such as O. Rusov and his wife, S. Rusova, A. Yefymenko, H. Zhytetsky, I. Zhytetsky, Pelekhin, O. Hrushevsky, K. Shyrotsky, V. Tymoshenko, O. Kysil, and P. Zaitsev, played an important role in the capital's Ukrainian community. In its scholarly and publishing activities the Ukrainian community found support among some eminent Russian linguists, such as A. Pypin, F. Korsh, and A. Shakhmatov, who in 1905 drafted a memorandum from the Imperial Academy of Sciences urging the lifting of all government restrictions on the Ukrainian language. Some established Ukrainian and Russian scholars and many young scholars, such as H. Holoskevych, V. Yaroshenko, V. Hantsov, L. Chykalenko, and O. Alesho, were active in the Student Circle of Ukrainian Studies, which was formed in 1906 at St Petersburg University. At the demand of the student hromada, lectures on the history of Ukrainian literature (O. Hrushevsky) and the history of Ukraine (Yefymenko) were introduced in the 1910s at the Higher Courses for Women. In 1914–17 a clandestine Ukrainian university was operated by the Hromada Ukrainian Club and the Chief Student Council. The faculty of St Petersburg University included some professors of Ukrainian origin, such as S. Bershadsky (law), I. Andrievsky (law professor and rector in 1883–7), V. Liubymenko (botany), and P. Liashchenko (economics). There were Ukrainian scholars who worked in other institutions, such as A. Markovych (law and ethnography), V. Kistiakovsky (physics and chemistry), V. Kovalevsky (economics and finance), M. Maksymovych (hydrology), B. Sreznevsky (meteorology), O. Nykolsky (zoology), and A. Marshynsky (finance). Some eminent Russian scholars, including V. Ikonnikov (history), V. Peretts (literary history), and the aforementioned linguists, specialized in Ukrainian studies.

Some members of the St Petersburg Academy of Arts were Ukrainians by descent or by place of birth, among them A. Kuindzhi, I. Repin, M. Pymonenko, K. Kostandi, and M. Bodarevsky. Among the many Ukrainian graduates of the academy were M. Murashko, S. Vasylykivsky, P. Levchenko, V. Beklemishev, M. Samokysh, I. Izhakevych, K. Trokhymenko, Yu. Bershadsky, F. Krasysky, O. Murashko, O. Shovkunenko, G. Lukomsky, O. Hryshchenko, S. Zhuk, I. Mozalevsky, and M. Andriienko-Nechytailo. The Ukrainian graphic artists V. Masiutyn and H. Narbut (1907–8 and 1910–17) worked in St Petersburg. Ukrainians also played a prominent role in the capital's musical life. The composers M. Leontovych, Ya. Stepovy, and M. Lysenko worked there. I. Alchevsky was a star of the Imperial Opera, where another Ukrainian, M. Malko, was chief conductor until 1914. The musical scholar Y. Myklashevsky was director of the St Petersburg Institute of Mu-

sic (1913–18) and editor of the journal *V mire iskusstva*. During the First World War some of the Ukrainian writers and artists in Petrograd belonged to the Ukrainian Literary and Artistic Society, founded by Zhuk.

Revolutionary and postrevolutionary period. At the outbreak of the February Revolution of 1917 the Provisional Ukrainian Revolutionary Committee of Petrograd and the Petrograd branch of the TUP issued their proclamations and organized a Ukrainian demonstration, on 12 March, in which over 30,000 people, mostly soldiers, took part. A memorandum on the Ukrainian language, Ukrainian education, and the Ukrainian church was submitted to Prince G. Lvov, the head of the Provisional Government. The *Ukrainian National Council in Petrograd, which represented 16 local organizations, was founded on 19 March 1917. Its executive committee consisted of O. Lototsky, M. Korchytsky, Stebnytsky, F. Sliusarenko, and Zaitsev. In May 1917 the functions of the council were assumed by the Ukrainian commissioner in the Provisional Government, Stebnytsky. The organizations that continued to operate set up the Council of Ukrainian Organizations in Petrograd, which was active until mid-1918. At the end of May 1917 the Central Rada sent a delegation to Petrograd for talks with the Provisional Government.

As the Ukrainian state was rebuilt, Ukrainian activists, soldiers, scholars, and artists returned in large numbers to Ukraine, and Ukrainian organizations in Petrograd were discontinued. Under the Soviet regime Ukrainian organizations were banned and dissolved. The *Leningrad Society of Researchers of Ukrainian History, Literature, and Language did some valuable work in the 1920s and was abolished in 1933. Later some Ukrainian scholars, such as Yu. Mezhenko, Ya. Aizenshtok, K. Koperzhynsky, V. Adriianova-Peretts, V. Parkhomenko, F. Pryima, M. Morenets, P. Zhur, and Yu. Margolis, found refuge and work in Leningrad. A Ukrainian drama theater operated in the city in the 1920s and was revived briefly in 1930–2 (see *Zhovten Theater in Petrograd-Leningrad). Thereafter Leningrad theaters occasionally staged Russian translations of Ukrainian prerevolutionary and Soviet plays. In the early years of Soviet rule a statue of Shevchenko was erected, and his apartment-workshop at the Academy of Arts was set aside as a memorial museum.

Some signs of organized Ukrainian activity in Lenin-

Members of St Petersburg's Ukrainian Cultural Society at the unveiling of the memorial stone at the site of the future Taras Shevchenko monument (1989)

grad appeared in the 1960s. Under the auspices of the Leningrad Writers' Union P. Zhur began to stage annual concerts in honor of Shevchenko. At the end of the 1970s a circle of Ukrainian students formed around the painter V. Kalnenko, and at the beginning of the 1980s the composer I. Matsiievsky organized a folk-song ensemble, which took part in Shevchenko concerts at the Leningrad Institute of Theater, Music, and Cinema. The Ukrainian Cultural Society, which sprang up in 1988, was registered officially at the beginning of 1989 (membership, 120). It organized concerts dedicated to Hulak-Artemovskyy, folk-art festivals at the Leningrad Museum of the Ethnography of the Peoples of the USSR, and commemorative evenings honoring Shevchenko, and it collected funds to construct a monument to Shevchenko. In the last 30 years a number of Ukrainian artists, such as V. Makarenko, V. Antonenko, L. Kolybaba, F. Humeniuk, M. Kovalenko, N. Pavlenko, and A. Driuchylo, have worked in St Petersburg.

Saint Raphael Galician and Bukovynian Emigrant Aid Society (Tovarystvo sv. Rafaila dlia okhorony ruskykh emigrantiv z Halychyny i Bukovyny). A branch of the Austrian St Raphael Society that operated in Lviv from 1907 to 1914. Dedicated to aiding emigrants and maintaining contact with them, the Lviv society took an interest in all the countries to which Ukrainians had recently emigrated. In 1911 it began to publish *Emigrant* as a source of practical advice. The society's leading members were Rev N. Budka and M. Zaiachkivsky. After 1914 its activities ceased. From 1925 a similar purpose was served by the *Ukrainian Emigrant Aid Society.

Saint Raphael's Ukrainian Immigrants' Welfare Association of Canada (Tovarystvo opiky nad ukrainskymy poselentsiamy im. sv. Rafaila v Kanadi). A benevolent society formed in Winnipeg in January 1925 to assist Ukrainians in emigrating to Canada. The founding committee included Bishop N. Budka, A. Zahariichuk, K. Prodan, and D. Elcheshen, its longtime secretary. It published *Providnyk*, *Nove pole*, and *Prerii* and worked with its Lviv-based counterpart, the St Raphael Galician and Bukovynian Emigrant Aid Society. It ceased activities in 1938, after the Depression and restrictive government policies had brought Ukrainian immigration to Canada to a virtual halt.

The St Sophia Cathedral

Saint Sophia Cathedral (Sofiiskyi sobor). A masterpiece of the *art and *architecture of Ukraine and Europe. It was built in Kiev at the height of Kievan Rus', in the Byzantine style, and significantly transformed during the baroque period. The cathedral was founded by Grand Prince Yaroslav the Wise and built between 1037 and 1044 (some suggest 1017–37). The original building, most of which remains at the core of the existing cathedral, is a cross-in-square plan with twelve cruciform piers marking five east–west naves intersected by five transverse aisles. Each nave springs from an apse in the east. The central nave and the main transverse aisle (transept) are barrel-vaulted and twice the width and height of the side naves. A balcony tops the north and south naves and narthex. Over the balcony, aisles, and naves rises a pyramidal arrangement of 12 smaller, peripheral domes and 1 large, central dome, all 13 of them hemispherical on tall drums. An open ambulatory girdles the north, south, and west sides, and to it a further ambulatory and exonarthex with two staircases towers were added in the late 11th century.

The centripetal plan, internal volumes, and external massing reflect the hierarchical ordering of the mosaics and frescoes inside. As the surfaces of the walls advance from the floor and the narthex, the frescoes increase in size and religious significance and culminate in the monumental mosaics *Mother of God (Orante)* in the central apse and *Christ Pantocrator* in the central dome. Among the most masterful mosaics are those of the *Church Fathers*. The more archaic *Orante* in the central apse, often referred to as the *Indestructible Wall*, is the most famous.

The cathedral's 11th-century exterior walls are of *opus mixtum*, a widely used technique of alternating courses of brick and stone. Exterior ornamentation of the original walls consists of decorative brickwork, the monochromatic painting of key architectural elements, and a number of frescoes.

The architects of earlier masonry buildings in Kiev, such as the Church of the Tithes (989–96), were from Chersonese Taurica, but those responsible for St Sophia are not documented. Despite popular speculation, the cathedral did not borrow much from the Hagia Sophia of Constantinople other than its name and some general features. Some 19th-century scholars and contemporary Byzantologists contend that all features of Kiev's St Sophia are im-

itations of Byzantine types created by master builders from Byzantium. Others liken certain features to German examples and suggest Romanesque influences. Some see features in the cathedral resembling churches in Armenia and Georgia, and a few even trace elements to Iran, Islam, or Bulgaria. More convincingly, a number of scholars have established an autochthonous hypothesis. They argue that by the 11th century an architectural tradition had already been established in Kievan Rus', exemplified by the 10th-century Byzantine structures and the vernacular masonry palaces and wooden structures of the Polianians from the 8th century, and that it was this hybridized tradition, not Byzantine architecture alone, that shaped St Sophia.

A number of the cathedral's features are extremely rare or do not appear at all outside of Kievan Rus' prior to its construction. Among the most notable are the number of domes and their elongation, the marked pyramidal form and overall striving for height, the fact that the width of its body is greater than its length, the combined use of mosaics and frescoes, and the styling and much of the subject matter of the frescoes.

With the sack of Kiev by the Suzdal prince Andrei Bogoliubskii in 1169, the city and the cathedral fell into a 460-year period of decline. Frequently plundered during this period, the cathedral functioned only intermittently. By 1585, its roof ruined, the cathedral had deteriorated significantly. After it had been under the Uniate church for a brief period (1610–33), the Orthodox metropolitan, P. Mohyla, took control of the cathedral. Over the following 24 years it was extensively restored, and new monastery

The iconostasis and main apse of the St Sophia Cathedral

buildings and other wooden structures were built in its precinct. After the 1654 Pereiaslav Treaty between the Hetman state and Muscovy, autocephalous control over the cathedral was lost, and after 1657, repairs became sporadic and at times deleteriously expeditious.

From 1690 to 1707 Hetman I. Mazepa influenced and funded the completion of the repairs. Most significant was the exterior work: portions were heightened; the masonry was stuccoed and whitewashed; pediments and other decorative features were added throughout; all the domes, including six new ones, were covered with distinctive pear-shaped and capped cupolas; and the central cupola was gilded. A new three-story bell tower was also built in the precinct's wall. Up to that time the character of the cathedral had remained largely medieval. All the exterior work during this period, however, reflected the newly developed principles of the Ukrainian baroque. This created the current exterior appearance of the cathedral.

An 11th-century mosaic of St Mark the Evangelist on the southwestern pendentive of the St Sophia Cathedral

In the mid-18th century, largely under the patronage of Metropolitan R. Zaborovsky, another period of intense artistic activity occurred. Many silver chandeliers and finely carved and gilded wooden iconostases were installed. The three-tiered iconostasis in front of the main altar is considered to be among the most important examples of 18th-century wood carving (only the lower tier has remained). Between 1744 and 1752 the bell tower was partly rebuilt, and a fourth story and new cupola were added. The refectory (1722–30) and metropolitan's residence (1722–30, with later additions) are both fine examples of Ukrainian

baroque architecture. A wall surrounding the precinct was rebuilt in masonry, and included the flamboyantly ornamented and carefully ordered *Zaborovsky Gate (1746–8). The gate and parts of the bell tower were designed by J. *Schädel.

In the 19th century an exonarthex was added to the cathedral to replace the collapsed western gallery. In the mid-19th century the first exact survey of the cathedral was undertaken, by F. Solntsev. In the intense cultural activity unleashed by the collapse of tsarist rule in 1917, considerable research, investigations, documentation, and restoration of the cathedral took place. Much of this activity, including systematic photodocumentation, continued through the early Soviet years. In 1934, however, all religious activity was terminated, and the cathedral was turned into a museum. Many of its most important objects were confiscated by the state, and many of these were destroyed, lost, or sold abroad. In 1941–3 most of the confiscated articles preserved in Kiev's museums and the AN URSR (now ANU) Central Scientific Library were plundered by the Nazis. Currently the cathedral is part of the *St Sophia Museum.

An 11th-century fresco of the children of Grand Prince Yaroslav the Wise on the southern wall of the central nave of the St Sophia Cathedral

The art and architecture of the St Sophia Cathedral have had a wide influence. The original building's cross-in-square plan, its tall, pyramidal, domed spaces and silhouette, and its organization and stylistic treatment of mosaics and frescoes provided the model for many Kievan Rus' and later Ukrainian churches. It influenced many more, such as *Saint Volodymyr's Cathedral in Kiev (1862–82). Its clearly ordered organization, structural logic, and use of materials informed the development of the more rational and constructivist attitudes of almost all subsequent Ukrainian architecture.

Key events in Ukrainian religious, political, and cultural life have taken place in and around the cathedral. The first library in Ukraine was founded there by Yaroslav the Wise. He was eventually buried in the cathedral (his sarcophagus remains), as were other grand princes and metropolitans. Coronations were performed, foreign ambassadors were received, councils met, and many historic

treaties, proclamations, and universals were announced there.

Saint Sophia Museum (Sofiiskyi muzei). A state historical and archeological preserve established in Kiev in 1934 to protect and restore the famous *St Sophia Cathedral and other buildings and structures on the grounds (5 ha) of the former St Sophia Monastery. Its constituent monuments include the Baroque *Zaborovsky Gate, the 76-m bell tower (built 1699–1706; rebuilt 1744–8 and 1851–2), the metropolitan's residence (1722–48), the 90-m-long *bur-sa* (1763–7) housing the Ukrainian Archive-Museum of Literature and Art (from 1970), the brotherhood building (1750s; rebuilt 1760s and early 20th century), the 'Small' St Sophia Church opposite the cathedral (1722–30, 1760s; rebuilt 1822 and expanded 1872), and the consistory building (1722–30, 1770–83). The museum is a major European tourist attraction. The cathedral contains, in addition to its own mosaics and frescoes, those from the destroyed *St Michael's Golden-Domed Monastery, the sarcophagus of Prince Yaroslav the Wise, and exhibits dealing with the architecture of Kievan Rus' and the history of the cathedral. Kiev's famous *St Cyril's Monastery Church, *St Andrew's Church, and *Golden Gate, as well as the 14th- to 15th-century Genoese fortress in Sudak (Crimea) and the Chernihiv Architectural-Historical Preserve, are branches of the museum. In 1987 the museum received from the Hamburg Foundation the European Gold Medal for the Preservation of Historical Monuments. The Ukrainian Academy of Arts and Sciences in the US published O. Powstenko's extensive historical and architectural monograph on the subject, *The Cathedral of St Sophia in Kiev* (1954). An album about the cathedral was published in Ukrainian and English in Kiev in 1984.

Saint Theodosius of the Caves (Sviatyi Teodosii [Feodosii] Pecherskyi), b ca 1036 in Vasylykiv, in the Kiev region, d 3 May 1074 in Kiev. He studied in Kursk until 1055, when he traveled to Kiev and joined *St Anthony as one of the first monks of the Kievan Cave Monastery. A gifted leader, he became hieromonk and then hegumen of the monastery (1062), succeeding Varlaam. In 1070 he introduced a strict *Studite Typicon and reformed the monastic life. He initiated the construction of the Dormition Church in 1073 (completed in 1089) and of various buildings and catacombs, and presided over the impressive development and growth of the monastery.

Theodosius also used his authority to influence secular affairs and served as an adviser to a number of princes. He opposed Sviatoslav II Yaroslavych, who illegally seized the throne, and wrote a defense of his younger brother, Iziaslav Yaroslavych. In total, some 15 works are commonly attributed to him, including several sermons in

which he chastised monks for indifference and preoccupation with personal well-being.

Theodosius was buried in the Kievan Cave Monastery catacombs, in a section known as Theodosius's Caves or the Far Caves. His relics were transferred to the Dormition Cathedral of the monastery in 1091. The major source of information on Theodosius is the life written by Nestor the Chronicler ca 1080 and included in the *Kievan Cave Patericon. Prince Sviatopolk Iziaslavych had Theodosius canonized in 1108. His feast is celebrated on 16 May.

St Volodymyr's Cathedral

Saint Volodymyr's Cathedral (Volodymyrskyi sobor; Sobor sv. Volodymyra). A cathedral in Kiev, built between 1862 and 1896. Its interior wall paintings and Byzantine revival architecture reflect some of the major currents in Ukrainian art and architecture of the middle and late 19th century, a period characterized by national rediscovery and the Romantic revival of historical styles.

The cathedral has an elongated cross-in-square plan. Three naves spring from apses in the east and are intersected by five transverse aisles. The apses and the first east aisle form the sanctuary. The next aisle, wider than the others and similar in dimension to the central nave, forms the transept. The westernmost aisle forms the narthex. There are balconies over the side naves and west aisles. The cathedral is topped by a series of Byzantine-like domes and barrel vaults corresponding to the plan divisions below. A large central dome on a tall drum is located over the crossing and is surrounded by four smaller domes over the adjacent side naves. Two short towers with domes are located over the narthex. The exterior walls are heavily loaded with ornamentation and marked with buttresses and three squat entry pavilions, one attached to the narthex, and the other two to each of the transepts.

In the stylistic treatment of the cathedral, its architects hoped to renew the traditions of Kievan Rus' architecture, but the result is an eclectic and Romantic rather than authentic version of the architecture of Byzantium or Kievan Rus'. In the exterior ornamentation, for example, motifs have been borrowed from many Eastern sources, most apparently from the Byzantine church architecture of early Bulgaria.

O. Beretti is generally credited with the cathedral's final design, but because of many problems, especially shortages of funds and, later, structural defects, many other architects were involved before and after him. The

first design, a wider cross-in-square plan with 13 domes, was prepared by I. Shtrom in 1859. This design was altered in 1861 by P. Sparro, who made a narrower plan with seven domes. In 1862 an essentially new design was prepared by Beretti. Full construction finally began in 1872. In 1875 R. Bernhardt made significant structural revisions to the design, and in 1876 V. Nikolaev was given the responsibility of overseeing the project to its final completion.

The paintings and decorations, executed between 1885 and 1896 by many leading Ukrainian and Russian artists, loosely follow the pictorial program of Byzantine art and church decoration. The Russian painter V. Vasnetsov, together with teachers and pupils of the Kiev Drawing School (eg, S. Kostenko, O. Kurinny, M. Pymonenko, V. Zamyrailo), is responsible for much of the work, most notably *The Baptism of Volodymyr*, *The Baptism of Rus'*, *The Blessedness of Paradise*, and paintings on the columns and pilasters. By far the most striking is Vasnetsov's *Mother of God* in the central apse, a monumental mural charged with mystery, showing the influence of the new symbolist movement. Others who contributed to the interior of the cathedral include M. Nesterov, W. Kotarbinski, P. Świdomski, A. Prakhov, and M. Vrubel.

Since the 1930s the cathedral has held the relics of the 4th-century Greek martyr St Barbara and the 15th-century Kievan metropolitan Makarios III. During the Second World War much of it was damaged. After the war, through donations from parishioners and state aid, it was extensively repaired and restored. Since 1943 it has been the cathedral of the Russian (from 1991, Ukrainian) Orthodox church's Kiev metropolity and the principal functioning church of Kiev.

Saint-Germain, Treaty of. A treaty signed between the Allies and Austria in the French town of St-Germain-en-Laye on 10 September 1919. One of the treaties ending the First World War, it recognized the dissolution of the Austro-Hungarian monarchy and the creation of the republics of Austria, Hungary, and Czechoslovakia as well as the Kingdom of Serbs, Croats, and Slovenes (from October 1929, Yugoslavia). The terms of the treaty transferred Bukovina to Rumania and Transcarpathia to Czechoslovakia. Galicia was ceded by Austria to the Allies for their disposition. The cultural rights of all minorities living in Rumania and Czechoslovakia were to be guaranteed by Articles 10–13 of the League of Nations. The treaty recognized the autonomous status of Transcarpathia within Czechoslovakia; it was to possess its own diet, with 40 members, which would exercise jurisdiction over local matters of administration, language, education, and religion. Articles 10–13 of the St-Germain treaty were inserted into the constitution of the Czechoslovakian republic of 29 February 1920, although the territorial limits of Transcarpathia had not been defined, and the dates for the implementation of autonomy were not specified.

Saints. After the Christianization of Ukraine, the Ukrainian church initially venerated the saints of the Byzantine church. It soon began to recognize some saints of the Roman church, particularly those in the calendar of Western Slavic churches (eg, Viacheslav). The early Ukrainian church also venerated *St Cyril and *St Methodius, the original missionaries to the Slavs, who were not recognized by Byzantium. All saints were commemorated on the appropriate day, as recorded in the church calendar (*misiatse Slov* or *menaion*). The Ukrainian church also encouraged the development of cults of its own saints.

The first native Rus' saints were *Saints Borys and Hlib, the martyred sons of Volodymyr the Great, who were canonized in the 11th century. Olha and Volodymyr were canonized by Metropolitan Ilarion ca 1037–50, although they were not assigned a feast day until later (Volodymyr's was set only in 1254 or 1263). *St Theodosius of the Caves (d 1074) was canonized in 1108, and *St Anthony of the Caves in the early 13th century. The early monks buried in the Kievan Cave Monastery (approx 118 in all), many of whom are known only by their first names, were collectively canonized by Metropolitan P. Mohyla in 1643, during services held on 28 August and 28 September. The earliest Ukrainian saints were often monks who devoted themselves to caring for the sick (eg, Ahapii, Damian of the Caves). Others were secular figures or churchmen involved in other work, eg, *St Kuksha (a missionary); *Nestor the Chronicler; *Olimpii (an icon painter, d 1114); and *Sviatoslav (Sviatosha), prince of Chernihiv (d 1143). *Iurodyvi* or 'fools for Christ,' persons who were known for their remarkable piety but also their aberrant behaviour, were rarely beatified in medieval Ukraine, although they were often venerated in Muscovy. A large number of church hierarchs became saints, beginning with Stefan, bishop of Volodymyr-Volynskyi (d 1094); *Yefrem, bishop of Pereiaslav (d 1098); Teoktyst, bishop of Chernihiv (d 1123); and *Cyril of Turiv (d 1189). Early secular saints include Prince *Mstyslav (Fedir, d 1132), son of Volodymyr Monomakh; Princess Anna (d 1113), daughter of Vsevolod I Yaroslavych; Prince Mstyslav (Yurii, d 1180), great-grandson of Volodymyr Monomakh; and *Mykhail Vsevolodovych, prince of Chernihiv, who was martyred with the boyar Teodor by the Tatars in 1246.

Later saints include *Petro (d 1326), the metropolitan of Kiev, who was born in Volhynia, and Ivan of Suceava, martyred in Akkerman (both from the 14th century); and Prince Fedir (Teodosii) of Ostrih, killed by Tatars in 1497, and Princess Yuliana Olshanska (d 1540), whose remains are associated with a number of miracles (both from the 15th–16th centuries).

After the Church Union of *Berestia the Catholic church recognized Y. *Kuntsevych as a saint (d 1623, canonized 1867). Orthodox saints from this period include Afanasii, the hegumen of Brest, who was martyred by the Poles for his support of B. Khmelnytsky; Yov, the miracle worker of Pochaiv (d 1651); Makarii, hegumen of Ovruch and Kaniv, who was killed by the Turks in 1678; T. *Uhlytsky, archbishop of Chernihiv (d 1696); D. *Tuptalo, metropolitan of Rostov (d 1709); and Y. *Horlenko, bishop of Bilhorod (d 1754). Several Ukrainian Orthodox saints were missionaries in Siberia, among them Ioan *Maksymovych, metropolitan of Tobolsk (d 1715); I. *Kulchytsky, bishop of Irkutsk (d 1731); and S. Krystalevsky, bishop of Irkutsk (d 1771).

Most saints canonized during the Princely era, and some from afterward (eg, the Vilnius martyrs Ivan, Antin, and Evstafii), were recognized by both the Orthodox and Uniate churches (with some exceptions in the 17th–19th centuries). After the Union of Berestia the Ukrainian Catholic church was bound by the process of canonization imposed by Pope Urban VIII. Under this system, when an individual is beatified his or her cult is initially celebrated locally, and only later can full canonization occur. The recognition of a saint to be revered by the entire Catholic world is the pope's prerogative. With the absorption of the Ukrainian Orthodox church by the Russian Orthodox church in the 18th century, the right of canonization was claimed to be the special right of the Russian Holy Synod. The Orthodox church in Ukraine commemorated only those saints canonized by the Holy Synod who were of Ukrainian origin.

Today both Ukrainian churches recognize the same saints, with few exceptions. Feast days are observed for each saint, and special services are held in honor of particular saints, as well as pilgrimages to their burial places or to monasteries and churches named after them. With the imposition of Soviet rule in Ukraine, authorities forbade public celebration of saints' days, destroyed their icons and statues, and discouraged the custom of naming children after them. Saints Borys and Hlib. The first saints to be canonized in Kievan Rus'. The two princes were killed in 1015 by their elder brother, Prince Sviatopolk I, during the succession struggle following the death of their father, *Volodymyr the Great. Their older brother, *Yaroslav the Wise, thereupon presented his struggle for power with Sviatopolk as a crusade to avenge the fratricide. After he came to power, Yaroslav actively sought the canonization of the princes, which was finally realized ca 1068. Meanwhile the memory of Borys and Hlib had captured the imagination of the Rus' population, in large measure because of accounts of the calmness and resignation with which they had accepted their deaths. An account of their murders, **Skazaniie i strast' i pokhvala sviatuiu muchenyku Borysa i Hliba*, is one of the oldest monuments of Ukrainian literature. The two saints have remained popular figures in Ukrainian religious thought. They are commemorated annually in both the Ukrainian Orthodox and Catholic churches on 6 August (24 July OS).

Saints Borys and Hlib Cathedral (Borysohlibskyi sobor). A cathedral built in Chernihiv in 1120–3 (or in the 1170s, according to some sources) as the family church and burial place of the Chernihiv princes. The cruciform, one-story structure had three naves, three apses, and six columns. Three burial niches were built into both the southern and northern walls of the narthex and the main circumference. Stairs to the choir balcony were built into the western wall. The façades had arching bands of ceram-

ss Borys and Hlib (late-13th-century icon)

ss Borys and Hlib Cathedral

ic decorations and a series of small decorative niches. The interior was decorated with light-colored frescoes and a colorful ceramic-tile and mosaic floor. Excavations have uncovered the remains of the gallery, fragments of two finely sculpted stone capitals, and the cornerstone of a portal with a teratological Romanesque carving depicting the pagan god Simarhlo as a dog-bird. The cathedral was rebuilt in the early 17th and again in the 19th century. From 1627 to 1659 it served as a Polish Dominican church. A campanile was added in 1672, and in the early 18th century the cathedral had five cupolas. It was heavily damaged during the Second World War and poorly restored in 1952–8 under the direction of M. Kholostenko. The ornate silver Royal Gates of the cathedral's 17th-century iconostasis are preserved in the cathedral.

Saints Peter and Paul (Sviati Petro i Pavlo). Two apostles who figure prominently in Ukrainian religious belief and whose feast day on 12 July (29 June OS) was observed as a major holiday. In Ukrainian Christian iconography Peter is portrayed as the gatekeeper of heaven, and Paul is the bearer of a sword or book. They are also regarded as plowers and protectors of fields, probably because their feast day coincides with the beginning of harvesting in Ukraine. The feast day itself was preceded by a fast (*petrivka*), during which women sang *petrivchani* songs and whitewashed and decorated their houses. The feast was celebrated with a church service, followed by a family meal and group games.

Sak, Liudmyla, b 16 September 1910 in Beirut, Lebanon, d 25 October 1985 in Kiev. Art scholar. A graduate of the Kiev State Art Institute (1930), she began teaching there in 1946. She wrote scholarly and popular articles on Ukrainian and Western European art and books on composition in sculpture (1959, with M. Helman), sculpture (1960), 17th-century Flemish painting (1970), and sculpture (1971).

Sakhalin Island [Saxalin]. An island off the Pacific coast of the Russian FR situated between the Seas of Japan and Okhotsk. With an area of 76,400 sq km it constitutes most of Sakhalin oblast (which also incorporates the Kurile Islands). Its terrain is largely mountainous and it is heavily (60 percent) forested. Temperatures range from 12 to 15°C in July and from –10 to –20°C in January. Its annual precipitation is 400–750 mm. In 1855–75 it was jointly held by the Russian Empire and Japan, and then in 1875–1905, by the Russian Empire alone. In 1905 the southern half was ceded to Japan. In 1945 the whole again came under Russian (Soviet) control; the island has been intensively colonized since then. From the mid-19th century it was used by the Russian Empire as a site for exiles and forced labor. In 1926 there were 11,000 inhabitants on the northern end of the island. In 1959 the population of Sakhalin oblast (including the sparsely inhabited Kuriles) was 649,000; it rose to 710,000 by 1989. Most (78 percent) of its inhabitants live in the city of Yuzhno-Sakhalinsk. According to the 1989 census Ukrainians made up 6.5 percent (46,000) of the island's population. Of those, 17,300 (37 percent) claimed Ukrainian as their native tongue.

Sakhnenko, Danylo [Saxnenko], b 1875 in Katerynoslav, d 1930 in Kharkiv. One of the first Ukrainian cameramen. In 1906 he operated a cinema-show booth in Katerynoslav, and in 1908 he became a chronicler for the

French firm Pater, with which he made the short documentaries *Povin' na Dnipro* (The Flood on the Dnieper) and *Katerynoslav*. He recorded the Sadovsky's Theater performances of *Natalka Poltavka* (Natalka from Poltava) and *Naimychka* (The Hired Girl) in 1911 and of *Bohdan Khmel'nytskyi* in 1914. In 1912 he established the cinema atelier Rodina in Katerynoslav and filmed *Obloha i oborona Zaporozhzhia* (The Siege and Defense of Zaporizhia) and *Liubov Andriia* (Andrew's Love, based on N. Gogol's *Taras Bul'ba*). In 1921 he took part in the organization of the cinema laboratory at the All-Ukrainian Photo-Cinema Administration, and from 1925 he made newsreels in Kharkiv.

Sakhnivka settlements. Multi-occupational settlements near Sakhnivka, Korsun-Shevchenkivskiy raion, Cherkasy oblast. Excavations in the early 20th century and in 1949 revealed a *Zarubynetsi culture settlement, three early Slavic (7th–8th century) settlements, and a Rus' manor-fortress, destroyed during the Mongol invasion. A cache of Kievan Rus' valuables was found in the area of the fortress in the late 19th century.

Sakhno-Ustymovych, Mykola. See Ustymovych, Mykola.

Sakhnovshchyna [Saxnovščyna]. IV-16. A town smt (1986 pop 9,400) and a raion center in Kharkiv oblast. A workers' settlement, it was named after the local landowner when the Kostiantynohrad–Lozova railway line was built in 1897–1900. Today the town has a canning factory (est 1957), a building-materials plant, and a tractor repair plant.

Olena Sakhnovska: *Witch* (woodcut)

Sakhnovska, Olena [Saxnovs'ka], b 15 May 1902 in Kiev, d 28 March 1958 in Moscow. Graphic artist. She studied at S. Nalepinska's xylography studio (1921–4) and under I. Pleshchynsky at the Kiev State Art Institute (1927–9). In 1925 she joined the *Association of Revolutionary Art of Ukraine. To escape the Stalinist terror in Ukraine she moved to Moscow in 1934. Sakhnovska specialized in printmaking and book illustrating and created mostly xylographs until 1936, after which she turned to lithographs. The influence of S. Nalepinska is evident in her early woodcuts, such as *Listening to the Radio* (1927) and *Return from the Front* (1927). She produced several series, such as 'Woman in the Revolution' (1930–2), 'T.H. Shevchenko' (1934), and 'Donbas' (1934–5). Her best-known lithographs are the cycles 'Gorky's Places in Ukraine' (1939–41), 'Kiev in 1944' (1944), and 'Old Lviv' (1946). In her book illustrations she developed her own style based on 16th- to 18th-century Ukrainian traditions. She illustrated editions of N. Gogol's works (1928–9), Lesia Ukrainka's *Lisova pisnia* (The Forest Song, 1930), and works by Soviet Ukrainian writers such as P. Panch, O. Kopylenko, and I. Mykytenko. She also designed woodcuts and etched bookplates. A catalog of a retrospective exhibition of her works was published in Kiev in 1963.

Sakhnovsky-Onykevych, Paisii [Saxnovs'kyj-Onykevych, Pajisij], b ?, d 1626. Uniate church hierarch. As archimandrite of the Minsk monastery he signed the Church Union of *Berestia (1596). He later served as archimandrite of Kobryn and bishop of Pinsk (1603), where he defended the Uniate church against the Orthodox. He was the first head of the monastery in Byten, Volhynia (1607), and initiated a chronicle that contains valuable information about the early history of the Basilian order in Ukraine.

Sakovych, Iryna [Sakovyč], b 6 December 1926 in Slutsk, Belarus. Ceramic artist and art scholar. A graduate of the Moscow Institute of Applied and Decorative Arts (1952), she makes majolica and porcelain vases, tea sets, and cups. She has contributed articles on art to Ukrainian journals and the chapters on ceramics and artistic glass to the AN URSR (now ANU) history of Ukrainian art (vol 6, 1968) and has written a book on the ceramic folk sculpture of Soviet Ukraine (1970).

Sakovych, Kasiian [Sakovyč, Kasijan] (secular name: Kallist), b ca 1578 in Potylych, Rava Ruska district, Galicia, d 1647 in Cracow. Churchman, philosopher, and polemicist. He studied at the Zamostia and Cracow academies before being tonsured in 1620. He served as rector of the Kiev Epiphany Brotherhood School (1620–4) and then as chaplain for the local Orthodox brotherhood in Lublin. He soon joined the Uniate church and became archimandrite of the Dubno Monastery (1626–39). In 1640 he joined the Roman Catholic church and entered the Augustinian order in Cracow.

Sakovych was a gifted writer. His *Aristoteles problemata, albo Pytania o przyrodzeniu czlowiecznym* (Aristotle's Problem, or the Question of the Nature of Humanity, 1620) and *Tractat o Duszu* (A Tract on the Soul, 1625), both of which were published in Ukrainian translation with commentaries in *Pam'iatky bratskykh shkil na Ukraini, kinets' XVI–pochatok XVII st.* (Monuments of the Brotherhood Schools in Ukraine, Late 16th–Early 17th Centuries, 1988), were prob-

Engraving of the capture of Kaffa in Kasiian Sakovych's *Virsh ...* (1622)

ably the first surveys of Western philosophy by a Ukrainian author. His *Virshi na zhalosnyi pohreb zatsnoho rytsera Petra Konashevycha Sahaidachnoho* (Poems for the Grievous Funeral of the Noble Knight Petro Konashevych Sahaidachny, 1622), written in Ukrainian in a baroque syllabic style, was recited as an elegy at Hetman P. *Sahaidachny's funeral by students of the brotherhood school. In this work he portrayed the Cossacks as knights defending Orthodoxy. After his conversion to Roman Catholicism he wrote several polemical attacks on Orthodoxy and Uniatism, including *Sobor Kiiowski schismaticcki* (The Schismatic Sobor in Kiev, 1641); *Kalendarz stary ...* (The Old Calendar ..., 1642), where he criticized the retention of the Julian calendar among Ukrainians; and *Epanorthosis, albo Perspektiwa ...* (Epanorthosis, or Perspective ..., 1642), where he criticized the Byzantine church rite and described Ukrainian religious practices as superstitious. This last book drew a sharp response from both Orthodox (probably P. Mohyla) and Uniate (P. Oransky-Voina) polemicists.

Saksahan River [Saksahan']. A left-bank tributary of the Inhul River that flows through Dnipropetrovske oblast. It is 144 km long and drains a basin area of 2,025 sq km. The river is joined to the Dnieper by the Dnieper-Kryvyi Rih Canal. Kryvyi Rih is situated at its mouth. Its waters are used for industry (in the *Kryvyi Rih Iron-ore Basin) and irrigation.

Saksahansky, Panas [Saksahans'kyj] (pseud of Panas Tobilevych), b 15 May 1859 in Kamiano-Kostuvate, Yelysavethrad county, Kherson gubernia, d 17 September 1940 in Kiev. Theatrical director and actor; brother of M. *Sadovsky, I. *Karpenko-Kary, and M. *Sadovska-Barilotti. After completing his education in Yelysavethrad (1880) he worked in M. Starytsky's (from 1883), M. Kropyvnytsky's (1885), and Sadovsky's (1888) troupes; led his own *Saksahansky's Troupe (1890–1909); worked in T. Kolesnychenko's troupe (1910–15) and in the *Society of

Panas Saksahansky

Oleksander Salikovsky

Ukrainian Actors (1915–16); directed the *People's Theater (1918–22); worked in the Zankovetska Theater (intermittently in 1922–6); and, from 1927, led a touring troupe with Sadovsky. Saksahansky was an actor of the realistic-psychological school, gifted in gesture and mimicry, whose most famous roles were in satirical comedies, such as I. Kotliarevsky's *Natalka from Poltava*, Karpenko-Kary's *Sto tysyach* (One Hundred Thousand), *Murtyu Borulia*, and *Palyvoda xviii st* (A Rogue of the 18th Century), and Starytsky's *Za dvoma zaitiamy* (After Two Hares). His best heroic-moralist role was Ivan in Karpenko-Kary's *Suieta* (Vanity). In Ukrainian translation he staged F. Schiller's *Die Räuber*, K. Gutzkow's *Uriel Acosta* (both in 1918), and W. Shakespeare's *Othello* (1926). He is the author of two plays, *Lytsemiry* (Hypocrites, 1908) and *Shantrapa* (Rabble, 1914), and two books of memoirs, *Po shliakhu zhyttia* (On the Path of Life, 1935) and *Iz proshlogo ukrainskogo teatra* (From the Past of the Ukrainian Theater, 1938). Biographies of him have been written by V. Chahovets (1951), B. Tobilevych (1957), L. Melnychuk-Luchko (1958), and L. Stetsenko (1959), and collections of memoirs about him were published in 1939 and 1984.

V. Revutsky

Saksahansky's Troupe. A populist-ethnographic *touring theater troupe founded in 1850 and led by P. *Saksahansky and I. *Karpenko-Kary. Originally the Society of Russian and Little Russian Actors, it changed its name many times, finally to the Society of Ukrainian Actors under the directorship of P. Saksahansky in 1907. Among the actors were M. Sadovska-Barilotti (d 1891), L. Linytska, S. Tobilevych, O. Shevchenko, D. Mova (also choir director), P. Vasylykivsky, R. Chychorsky, H. Borysohlibska, L. Rozsudov-Kuliabko, K. Pozniachenko, and S. Pankivsky. The repertoire consisted primarily of all 18 Karpenko-Kary plays, some of them premiered by the troupe. Karpenko-Kary, also an actor, was in charge of stage design, costumes, the library, and administration. Other premieres included those of M. Starytsky's *Bohdan Khmel'nyts'kyi*, I. Franko's *Ukradene shchastia* (Stolen Happiness), B. Hrinchenko's *Na hromads'kii roboti* (Doing Community Work), and L. Yanovska's *Dzvoin do tserkvy sklykaie ...* (The Bell Calls to Church ...). Besides Ukraine, the troupe toured St Petersburg (1890), the Volga region (1895), the Crimea (1899), Warsaw (1903), Minsk (1908), Bessarabia, Moscow, the Don region, and the Kuban. Karpenko-Kary died in 1907, Saksahansky left the troupe in 1909, and it disbanded in 1910.

Saky. VIII-14. A city (1989 pop 34,000) on Saky Lake and a raion center in the Crimea. It sprang up at the end of the 18th century, when a salt industry, based on the salt water of Saky Lake, was established. In 1827 the first mud therapy clinic was set up. In 1952 the town was granted city status. Today Saky is a health resort and industrial center. The mud and brine from Saky Lake and local mineral water are used in treating arthritis and gastrointestinal, nervous, and gynecological disorders. The main industrial enterprises are a chemical plant, a mineral-water bottling factory, and a winery.

Saky Lake. VIII-14. A saltwater lake in western Crimea oblast. The lake is 5.5 km long, up to 3 km wide, and 1.5 m deep, with a surface area of 8.1 sq km. It has been artificially divided into two halves. Water from the eastern half (salt content, 19 percent) is used for curative baths; the water in the western half (salt content, 30 percent) serves as a source of table salt. The lake is separated from Kalamitska Bay in the Black Sea by a spit of gravel and sand 800 m wide, through which a canal has been built. The city of Saky is situated on the north shore of the lake.

Sal River. A left-bank tributary of the Don River formed by the confluence of the Dzhurak-Sal and the Kara-Sal. The river flows through Rostov oblast. It is 776 km long and drains a basin area of 21,100 sq km. It is fed by snow, and its waters are used in irrigation. The upper stretch of the river dries up seasonally.

Elia Sala: some of the sculptures adorning V. Horodetsky's residence in Kiev

Sala, Elia, b April 1864 in Milan, d 10 January 1920 in Gorla-Precotto, Italy. Italian sculptor. In the late 19th and early 20th centuries he worked in Kiev, where he carved decorative sculptures and taught at the Kiev Art School. His works include the façade composition and two lions outside the present Kiev Museum of Ukrainian Art (1897–1905), the sculptures on St Nicholas's Roman Catholic Church (1899–1909, now the Republican Building of Organ and Chamber Music), the fantastic sculptures on the façade of V. Horodetsky's residence (1902), the dragons on the State Bank building (1902–5), and portraits, such as the marble *Portrait of a Girl* (1903–5).

Salamon Shchasny, V. [Salamon Ščasnyj], b 1834, d 1900. Folklorist and publicist. While serving as a Greek Catholic priest in Galicia, he collected folk songs and published them as *Kolomyjky i shumky* (1864). These songs were reprinted by Ya. Holovatsky in his collection *Narodnye pesni Galitskoi i Ugorskoi Rusi* (Folk Songs of Galician and Hungarian Ruthenia, 4 vols, 1878). Salamon also contributed to the newspapers *Slovo*, *Novyi prolom*, and *Russkaia rada*.

Salesians (*saleziiany*). The popular name of the Society of St Francis de Sales, a Catholic religious order established in 1859 by J. Bosco for the purpose of providing a Christian education for youths. A Ukrainian branch of the Salesians was established in 1932 on the initiative of Bishop M. *Charnetsky. Shortly thereafter several Ukrainian students from the Peremyshl gymnasium went for training in Italy. After the Second World War a group of Ukrainian Salesians was sent to Argentina (Buenos Aires and Alem) for missionary work among Ukrainian emigrants there; others remained in Europe to run the St Josaphat Ukrainian Pontifical College. In 1980, 20 Ukrainian priests were members of the Salesian order, including Bishop A. Sapeliak in Argentina.

Salhyr Irrigation System. Constructed in 1952–62, it was one of the first irrigation systems in the Crimea. Its chief source of water is the Salhyr Reservoir. The water needs to be pumped at only a few points along the system; elsewhere it flows by gravity. The irrigation system serves 16 farms, which grow fruits and vegetables for the city of Symferopol, and covers an area of 8,100 ha.

Salhyr River. The largest river in the Crimea. It is 204 km long and drains a basin area of 3,750 sq km. It flows northward from a source on the northern slopes of the Crimean Mountains and empties into Syvash Lake. During the summer the upper reaches of the river dry up. A reservoir has been built on the river just outside Symferopol.

Salikovskyy, Oleksander [Salikovs'kyj], b 13 March 1866 in Staryi Potik, Vinnytsia county, Podilia gubernia, d 22 November 1925 in Warsaw. Journalist and civic and political leader. Barred from university by the authorities, he worked as a rural teacher, private tutor, and gubernial civil servant. In 1904 he joined the staff of the paper *Kievskie otkliki*, and eventually he became its editor. In 1910 he moved to Moscow, where he edited *Ukrainskaia zhizn'* with S. Petliura, and later, to Rostov-na-Donu, where he edited *Priazovskii krai* (1913–15). After returning to Moscow he resumed editing *Ukrainskaia zhizn'* (1915–17) and presided over the Ukrainian Council there. In September 1917 he was appointed commissioner of Kiev gubernia. As a leading member of the Ukrainian Party of Socialists-Federalists he sat on the Central Rada and the Little Rada. Under the UNR Directory he worked in the internal affairs ministry and edited the daily *Trybuna* (1918–19) and the monthly *Literaturno-naukovyj vistnyk* (1919). In May 1920 he was appointed minister of internal affairs in V. Prokopovych's cabinet, and in October, deputy prime minister. After emigrating to Poland, he edited the daily *Ukrains'ka trybuna* (1921–2), the monthly *Trybuna Ukraïny* (1923), and the weekly *Ukrains'ka sprava* in Warsaw.

Saline soils. Soils with a raised content of dissolved salts (in excess of 0.25 percent). The salts are most commonly chlorides or compounds of sodium and sulfur oxides. When saline soils contain dissolved salts in excess of 1 percent, they are called solonchaks; at lower concentrations they are referred to as saline soils. Field crops grow unimpeded in soils the total salt concentration of which does not exceed 0.25 percent, or the sodium concentration of which does not rise above 0.05 percent.

Saline soils occur mostly in poorly drained lowlands of deserts, semideserts, and steppes. In Ukraine they are common on the low river terraces of the left-bank tributaries of the Dnieper River, in the Black Sea Lowland, and in the floodplains of all the steppe rivers. Together with the solonchaks the saline soils occupy 4,456,000 ha in Ukraine, or 7.4 percent of the republic's land area. In the past, saline soils occupied a smaller area in Ukraine. With the rapid expansion of irrigation in Ukraine in the 1960s, however, the level of mineralized groundwater was raised, and correspondingly, the area occupied by saline soils was increased, by the use of unlined distribution canals (which caused seepage), the lack of drainage facilities in the irrigated fields, and overwatering (there was no charge for irrigation water). A concerted effort is needed to improve or even rebuild the irrigation systems and to initiate a program of soil melioration.

Salman, Oleksandr [Sal'man], b 12 September 1914 in Petrograd, d 16 July 1971 in Lviv. Scenery designer. He studied at the Higher State Art and Technical Institute in Leningrad (1929–31) and then worked at Russian theaters until 1939; at the Odessa, Kiev, and Kharkiv opera theaters (1939–46); and at the Lviv Opera Theater (from 1946), where he became principal stage designer in 1961. He designed productions such as A. Kos-Anatolsky's *Orysia* (1964) and H. Maiboroda's *Arsenal* (1967).

Liudvyh Salo

Gen Volodymyr Salsky

Salo, Liudvyh [Sal'o, Ljudvyh], b 1853, d 1915. Pedagogue; specialist in classical philology and mathematics. He taught at the gymnasium in Kolomyia from 1893 and at the Academic Gymnasium of Lviv from 1905. In 1894–8 he headed the Shkilna Pomich society. He was a member of the Teachers' Hromada in Lviv and served as director

of the Ukrainian private secondary school section of the *Provincial School Union from 1911.

Salsk [Sal'sk]. VII-22. A city (1990 pop 61,000) on the Srednii Egorlyk River and a raion center in Rostov oblast, Russia. When it was granted city status in 1926, the census showed that 38.9 percent of its population was Ukrainian. Today Salsk is a railway junction and an industrial center. Its largest plants are a foundry and brick, textile, and footwear factories.

Salsky, Volodymyr [Sal's'kyj], b 28 July 1883 in Ostrih, Volhynia gubernia, d 4 October 1940 in Warsaw. Senior staff officer. A graduate of the Nikolai Military Academy of the General Staff in St Petersburg (1912), during the First World War he served in the Russian army as division chief of staff and operations officer on corps and army staffs. In 1917, as a lieutenant colonel, he joined the UNR Army and served as chief of staff at several headquarters. In 1918–19 he was a member of the General Staff and in May 1919 became commander of the Zaporozhian Corps which liberated Kiev on 30 August. In September 1919 Salsky took command of the UNR Army, but two months later he resigned because of failing health. He served as defense minister of the UNR government-in-exile in 1920–1 and 1924–40. His highest rank was brigadier general.

Salt industry. A branch of the *food industry that extracts and processes table salt. It is one of the oldest industries in Ukraine, and for a long time it was one of the most important industries. Table salt is mined in a rock form from subterranean deposits and extracted from seawater or natural brines through evaporation. Rock salt, which is crystalline sodium chloride, occurs widely in the form of rock masses and beds and is abundant in various rocks. Natural brines are usually found in underground pools. Table salt has been an element of the human diet and a trading commodity since ancient times. It is used widely in food preservation and animal feed and as a raw material in the chemical industry (in making acids, sodas, and sodium sulfate).

In Ukraine reserves are huge: in 1969 they were estimated at over 10 billion t. Salt deposits are found in the Donets Basin, the Dnieper-Donets Trough, Subcarpathia, and Transcarpathia. Salt is also found in the waters of the Black and Azov seas, especially in their numerous estuaries and shallow bays. The largest deposits in the Donets Basin – the *Artemivske rock salt deposits, the Slovianske soda deposit (3.3 billion t), and the deposits in the Kalniius and Kazennyi Torets valleys – were formed in the early Permian period. The salt veins are 19–220 m wide and are found at depths of 124–1,110 m. The salt is very pure, with a sodium chloride concentration of 62–98 percent. In Subcarpathia a Miocene salt seam stretches some 230 km, from near Peremyshl in the north to Bukovyna in the southeast. The seam is up to 10 km wide, and veins 0.2–70 m wide are found at depths of 14–170 m.

The salt industry in Ukraine emerged first in Subcarpathia, which for a long time was the main salt-producing area, although its reserves were not great. The salt there was extracted by boiling. Today only small deposits, near Drohobych, Bolekhiv, and Dolyna, are exploited. In Transcarpathia salt is found in a Miocene seam stretching some 300 km from Prešov in the northwest to the Maramureş Basin in the southeast. Only a part of the seam

crosses Ukrainian territory; the *Solotvyna rock salt deposits are the most important part of the seam. Despite the large seawater salt reserves in southern Ukraine, especially in the Crimea, little salt is extracted from seawater. Only three sources are exploited, the *Henicheske salt lakes, Syvash Lake, and Sysak Lake.

To the end of the 18th century. Evidence of salt making and trading in Ukraine dates back to ancient times. Greek colonies on the Black Sea exported salt to Greece. The Maramureş deposits were probably mined in Roman times. Salt extraction in Subcarpathia was mentioned in the Kievan Cave Patericon under the year 1096. Some of the salt was exported to central Ukraine, which also imported salt from the east (although the eastern salt routes were vulnerable to attack by nomadic tribes). The most common salt route was the *Soliany route. Technologically the industry was comparatively well developed. Salt brine was lifted out of shallow mines in buckets attached to a wheel turned by horses. It was boiled in large cauldrons, and the salt residue was formed in conical molds called *holovazhni* (later *topky* or *topky*).

After the Polish annexation of Galicia salt production became almost the exclusive preserve of the crown. Most of the larger mines (see *Zhupa) were owned by the king, and some of them were leased out or granted to nobles or churchmen. The salt industry provided the state with considerable revenues. Beginning in the 16th century the industry became more modernized and concentrated. In the 18th century Galicia in some years produced as much as a million centners of table salt. After meeting local demand Galicia exported much salt to Lithuania and Poland.

Salt production on the Black Sea coast was much less developed, although from the 16th century it was widely practiced by the Zaporozhian Cossacks. The cost of mining was negligible, but the expense of transporting the salt to large population centers was very high. Until 1774 many of the most important deposits were under Turkish or Tatar control.

In the 17th and 18th centuries salt mining began to gain some importance in Slobidska Ukraine. Some of the deposits there had been known since 1619. Initially, peasants and Cossacks worked the salt mines on a temporary basis. After B. Khmelnytsky's revolution permanent mining settlements were established. Tor (later *Slovianske) became an early center of the salt industry in the region. In the 1660s some of the mines were acquired by the Hetman treasury. The Cossack administration of Slobidska Ukraine, especially of the Iziium regiment, promoted the development of the salt industry, but progress was often hindered by Tatar attacks and the policies of the Russian authorities. In 1715 the Russian government nationalized the salt factories in Tor, Bakhmut (Artemivske), and Spivakivka and made them crown factories (sometimes in cooperation with private salt producers) under the control of the Salt Administration in St Petersburg. The labor force consisted of state peasants. In the first half of the 18th century the factories produced some 8 million kg of salt annually. It was exported to the Hetmanate, southern Russia, and even Right-Bank Ukraine. In the second half of the century the production of the Tor and Bakhmut factories began to fall, because of competition from salt enterprises in the Crimea, Astrakhan, and the Don region, the depletion of wood fuels, and the low productivity of serf labor. In 1782 the factories were closed.

Late 18th century to 1917. When Galicia became part of

the Austro-Hungarian Empire, its salt industry could not compete with that of other parts of the empire, and was undercut by the salt monopoly. Most of its *zhupy* were closed. At the beginning of the 20th century Galicia produced only about 50,000 t a year. The major salt factories were in Liatske, Drohobych, Stebnyk, Bolekhiv, Dolyna, Kalush, Deliatyn, Lanchyn, and Kosiv. The only salt mine in Transcarpathia in the period was in Solotvyna.

By contrast, in central and eastern Ukraine, especially in the southern regions, the salt industry grew quickly. Until 1861 salt production was controlled completely by the state, which later leased out the deposits to private producers. Production levels fluctuated greatly from year to year (in the mid-19th century between 1.5 and 3 million centners) but tended to move upward. The salt was transported to markets by wagon (120,000 wagons and 300,000 oxen were used in 1845) or by boat along the Dnieper. In 1869–80 some 1.6 million centners of salt were produced annually in the Crimea (representing 40 percent of the output of the Russian Empire). In 1881–7 the figure reached 2.7 million. Most of that salt was made by the evaporation of natural brines. Production around Odessa was much lower than in the Crimea. Great changes in the structure of the industry followed the discovery of major rock salt deposits near Bakhmut (Artemivske) in the late 1870s. That region quickly replaced the Crimea as the most important salt-producing area, although most of the mines and processing facilities were owned by foreign syndicates. In 1910, of every 1,000 t of salt produced in Russian-ruled Ukraine, 297 were produced in the Crimea, 555 in the Donets Basin, and 11 near Odessa. In 1913 almost 1 million t of table salt was produced within the current borders of the Ukrainian SSR; that amount represented approx one-half of the total output for the Russian Empire and some 6 percent of the world output.

Since 1918. Salt production in Subcarpathia in the interwar period continued to decline, and fell to 38,000 t annually in the late 1930s. The decline was due mainly to competition from Poland. Meanwhile, production from the Solotvyna deposits in Transcarpathia increased to 200,000 t, which met almost all the demand in Czechoslovakia. In Soviet Ukraine the trend in the salt industry was to concentrate production in the larger enterprises and modernize the technology of salt processing. The trend toward salt mining (as opposed to evaporation) as the major source of salt has also continued. In 1940 the total salt output of the Ukrainian SSR was 1.9 million t.

Following an abrupt drop in production during and immediately following the Second World War the industry was rebuilt and expanded. Total production reached over 3 million t in 1960, 5 million t in 1970, 5.9 million t in 1980, and over 8 million t in 1987. In 1970 Ukraine's output accounted for 41 percent of all Soviet production and 8 percent of total world production. Some three-quarters of that production was mined in Artemivske, and another 8 percent in Solotvyna. In 1972 Holovsil, a trust under the Ukrainian SSR Ministry of the Food Industry, co-ordinated the 16 enterprises that mined and processed salt in Ukraine. Problems of the industry are studied at the Scientific Research Institute of the Salt Industry in Artemivske.

Iron artifacts of the Saltiv culture

Saltiv culture. An archeological culture of the 8th to 10th century that existed among the tribes of the Khazar kaganate along the Don and Donets Rivers and in the northern Caucasus, Azov, and middle Volga regions. It was named after a site discovered in Vovchanske county, Kharkiv gubernia, in 1900. Scholars have divided the Saltiv culture into two groups. The first lived in permanent agricultural settlements with surface dwellings, and practiced catacomb burial, including grave goods such as armor and weapons, pottery, and personal effects. The second group was composed of nomadic and seminomadic people who lived in makeshift camp sites with tentlike shelters and interred their dead without extensive grave goods. The Saltiv culture included *Alans in the forest-steppe and Bulgars in the steppe region; some members also lived in coastal centers such as Phanagoria and Sarkel. Excavations at culture sites have revealed dwellings, outbuildings, implements, pottery, and locally produced metal, stone, and wood items of high quality. Gold and silver coins as well as Byzantine and Oriental adornments testify to extensive trading activity. The onslaught of the *Pechenegs in the 10th century brought an end to the Saltiv culture. Scholars believe that after the fall of the Khazar kaganate in the latter part of that century some Saltiv culture tribes were incorporated into Kievan Rus'.

Salvini, Luigi, b 11 February 1911 in Milan, d 4 June 1957 in Rome. Italian Slavist; member of the Shevchenko Scientific Society from 1956. He graduated from Rome University and taught at the universities of Helsinki, Turku, and Ljubljana and, after the Second World War, the Higher Oriental Institute in Naples and the universities of Bari and Rome. Among his many works on Eastern European and Slavic literature and folk songs are two anthologies of Ukrainian stories in Italian translation, *Le quattro sciabole* (1940) and *L'Altopiano dei pastori* (1949). His translations of H. Kosynka, Yu. Lypa, M. Cheremshyna, V. Stefanyk, M. Khvylovy, and U. Samchuk were published in Italian journals.

Salzburg. A city (1988 pop 139,000) on the Salz River in Austria. In 1945–50, 4,000 to 8,000 Ukrainians lived in *displaced persons' camps in the city and the surrounding area. They were served by Catholic and Orthodox parishes, and maintained the weeklies *Novi dni* and *Promin'* and the daily *Ostanni novyny*. There were also a gymnasium and a number of cultural, educational, and sporting organizations, including a theatrical troupe led by H. Sovacheva. In 1951 Salzburg became the headquarters of the Ukrainian Central Relief Alliance in Austria. Today approx 265 Ukrainians live in the city and surrounding area. In Grödig, a nearby village, there is a Ukrainian cemetery, where 300 victims of the First World War (mainly evacuees from Volhynia) are buried.

Salzwedel. A city in Sachsen-Anhalt county, Germany, and the site of a German POW camp for soldiers of the Russian army in 1915–21. The camp held about 30,000 Ukrainians, for whom the *Union for the Liberation of Ukraine organized an educational and cultural program. The union's printing press in Salzwedel printed brochures and several papers: *Vil'ne slovo* (1916–19), the organ of camp organizations; *Selianyn* (1918); *Shliakh* (1919–20), the organ of the Ukrainian Military Sanitary Mission; and *Nove slovo* (1920), the organ of the Ukrainian People's party. Elementary and secondary courses were conducted in Ukrainian by interned officers, and a drama group and choir helped raise national consciousness among the soldiers.

Samara River. A left-bank tributary of the Dnieper River that flows through Donetsk, Kharkiv, and Dnipropetrovske oblasts and empties into *Lenin Lake. The Samara is 311 km long and drains a basin area of 22,600 sq km. The river ices over from mid-December to mid-March and dries out in its upper reaches in the summer. It is used for industry, irrigation, and fishing. The industrial port city of Novomoskovsk is located 80 km from the mouth of the river.

Samara Saint Nicholas's Monastery (Samarskyi pustynno-mykolaivskiyi manastyr). An Orthodox men's monastery on the Samara River near the settlement of Samarchuk (Novoselytsia, now part of Novomoskovsk, Dnipropetrovske oblast). It was founded in 1602 as a small fortified monastery with a wooden church and a home for convalescing Cossacks on the territory of the Samara *palanka of the Zaporozhian Host. The original buildings were destroyed in the mid-17th century and then rebuilt in 1672. The Zaporozhian Host granted the monastery 18,500 ha of arable land, five mills, pasturelands, and for-

ests to provide the Sich with food. It continued to serve as a retreat for sick and elderly Cossacks. After the destruction of the Sich in 1775, it was assigned to the Mezhyhiria Transfiguration Monastery. In 1787 it became independent once again, and in 1791 it came under the control of the eparchial bishop. Before the First World War it housed eight monks and a boys' school. The main church at the monastery, built in 1782, contained a valuable icon of the Mother of God and many church artifacts from the Zaporozhian era. The monastery was closed by the Soviet authorities in the 1920s.

Sambat. An old name of Kiev, or more precisely, of its fortress. The term is used by the Byzantine emperor Constantine VII Porphyrogenitus in his *De administrando imperio* (mid-10th century).

Sambir's town hall and market square (19th-century drawing)

Sambir. IV-4. A city (1989 pop 40,100) on the Dniester River and a raion center in Lviv oblast. When Staryi Sambir was destroyed by the Tatars in 1241, the survivors settled in the fortified settlement of Pohonych and renamed it Sambir, Novyi (New) Sambir, or Nove Misto (New Town), although the name Pohonych was used until the mid-15th century. Sambir was part of the Principality of Galicia-Volhynia (until 1349), the Polish Commonwealth (1387–1772), and the Austrian Empire (1772–1918). It was under Polish rule (1919–39) and finally became part of the Ukrainian SSR. In 1390 it was granted the rights of *Magdeburg law. In the 15th and 16th centuries it was an important trading and manufacturing town. Under Austrian and then Polish rule it was a county center. Today Sambir is an industrial and transportation center. Its factories produce radio parts, instruments, glass, furniture, clothes, and sugar and repair road-building machinery. Its chief architectural monuments are the Dominican monastery (1406), a Gothic Roman Catholic church (1530–68), Stephen Báthory's hunting lodge (16th century), the ruins of the town walls (16th–17th century), the city hall (1668) with a tall Renaissance tower, the theological seminary (1679), the Byzantine cathedral (1738, restored 1893–4), a Jesuit church (1751), an 18th-century park, and residential buildings of the 18th and 19th centuries. Recently the Les Kurbas Memorial Museum (1987) and the Boikiv-

shchyna Historical-Ethnographical Museum (1989) have been opened.

Sambir Brigade of the Ukrainian Galician Army (Sambirska [8] brygada UHA). A unit of the Third Corps of the UHA, formed in late January 1919 out of the Rudky, Hlyboka, and Krukenychi combat groups. Its first commander was Lt Col A. Kraus. In late May the Hlyboka and Krukenychi combat groups were separated from the rest of the brigade and were interned by the Czech army. In June 1919 the brigade consisted of four infantry battalions (under Lt A. Tarnavsky, Capt O. *Stanimir, Capt D. Bizanz, and Lt M. Pidhirny) and one artillery regiment (under Capt O. Bradner) from the Rudky Group and had a strength of 2,000 men. Its new commander was Maj K. Hoffman. On 31 August 1919 it was one of the first units to enter Kiev. In February 1920 the brigade was reorganized into the Eighth Galician Rifle Regiment of the Red Ukrainian Galician Army. In late April it left the Red Army, and its members were interned by the Poles.

Archbishop Volodymyr Samborsky

Samborsky, Volodymyr [Sambors'kyj], b 24 December 1882 in Kiev, d 1935 in Kiev. Archbishop of the Ukrainian Autocephalous Orthodox church (UAOC). After finishing theological studies in Uman and Kiev, he was ordained in 1902 and had become a district missionary for the Tarashcha region by 1907. He joined the UAOC in 1921 and was consecrated bishop of Lypovets (1923–5). He served as bishop of Zhytomyr (1925–6) before pressure by the Soviet authorities caused him to step down, but he resumed his duties in 1927 as bishop of Hlukhiv with responsibility for the Konotop region (to 1930) and archbishop of Vinnytsia (1930–2). After being forced once more from his post Samborsky remained under constant surveillance until 1935, when he returned to Kiev. He was arrested by the NKVD and shot.

Sambuk, Rostyslav, b 28 September 1923 in Kopatkevichy, Homel oblast, Belarus. Writer. He studied at the philological faculty of Tartu University until 1947. He is the author of many crime fiction novels in Ukrainian, such as *Iuvelir z vulytsi Kaputsyniv* (The Jeweler from Capuchin Street, 1966), *Valiza pana Vorobkevycha* (Mr Vorobkevych's Suitcase, 1970), *Seif* (The Safe, 1985), *Vybukh* (The Explosion, 1985), *Zhorstokyi lis* (The Cruel Forest, 1976), *Avtohraf dlia slidchoho* (Autograph for the Investigator, 1977), *Spe-*

kotnyi lypen' (Scorching July, 1979), and *Vel'vetovi dzhynsy* (Velvet Jeans, 1985). He has also written, in collaboration with Ye. Hutsalo, the documentary-style propaganda novels *Imeni Lenina* (Having Lenin's Name, 1974) and *Shchaslyva rodyna* (The Happy Family, 1976).

Samchevsky, Osyp [Samčevs'kyj], b 1799 in Liskonohy in the Novhorod-Siverskyi region, d 1887. Pedagogue. He taught at the Chernihiv Theological Seminary (see *Chernihiv College) and was inspector of the Novhorod-Siverskyi Gymnasium. His memoirs are published in the journal *Kievskaia starina*, vols 43–46.

Ulas Samchuk

Volodymyr Samiilenko

Samchuk, Ulas [Samčuk], b 20 February 1905 in Derman (now Ustenske), Ostrih county, Volhynia gubernia, d 9 July 1987 in Toronto. Writer and journalist. Samchuk was educated at the University of Breslau (now Wrocław, Poland) and at the Ukrainian Free University in Prague (1931). His literary career began in 1926 with short stories published in *Dukhovna besida* (Warsaw) and *Literaturno-naukovyi vistnyk*, which were later republished as the collection *Vidnaidenyi rai* (Rediscovered Paradise, 1936). He was editor of the Rivne newspaper *Volyn'* (1941–3), and he fled to Germany in 1944, where he headed the literary-artistic organization *MUR (1945–8). He emigrated to Canada after 1948 and became a longtime head of the *Slovo Association of Ukrainian Writers in Exile. Samchuk's prose is deeply rooted in the 19th-century realist tradition. His novels are broad-canvas chronicles of the Ukrainian experience in the 20th century. Themes progress from the difficult national and cultural nascence in the trilogy *Volyn'* (Volhynia, 1932, 1935, 1937), the novelette *Kulak* (1932), and the novel *Iunist' Vasylia Sheremeta* (The Youth of Vasyl Sheremeta, 1946, 1947) to the Hutsul national struggle in *Hory hovoriat'* (The Hills Are Speaking, 1934), the devastating man-made famine in *Mariia* (1934), and the Second World War and forced Ukrainian labor in the trilogy *Ost* (East, 1948, 1957, 1982). He captured the struggle of the Ukrainian Insurgent Army in the novel *Choho ne hoit' vohon'* (What Fire Does Not Heal, 1959) and turned his attention to the plight of Ukrainian pioneers and later émigrés in *Na toverdii zemli* (On Solid Ground, 1967) and *Slidamy pioneriv: Epos ukrains'koi Ameriky* (In the Footsteps of the Pioneers: The Saga of Ukrainian America, 1979). What his fiction did not encompass he captured in a series of memoirs: *Piat' po dvanadtsiatii* (Five after Twelve, 1954),

Na bilomu koni (On a White Horse, 1965), *Na koni voronomu* (On a Black Horse, 1975), and *Planeta Di-Pi* (The Planet of the DPS, 1979). An archive and museum devoted to his work was established in Toronto in 1988.

D.H. Struk

Samets, Petro [Samec'] (Sametz), b 4 June 1893 in Hleshchava, Terebovlia county, Galicia, d 6 February 1985 in Niagara Falls, Ontario. Ukrainian Orthodox priest. After emigrating to Canada in 1910, he graduated from Wesley College in Winnipeg and worked as a teacher. In 1920 he was ordained by Metropolitan Germanos and served as a missionary among Ukrainian settlers in the prairies, where he was instrumental in organizing new parishes. In 1938 he moved to Toronto, and after the war helped many new émigrés settle there.

Samiilenko, Ivan [Samijlenko], b 19 August 1914 near Poltava. Civic and political leader. Samiilenko completed a graduate degree in history at the Moscow Institute of History, Philosophy, and Literature in 1941, and taught at the Ukrainian Technical and Husbandry Institute at the DP camp in Regensburg, Germany, in 1945–9. He emigrated to the United States in 1949, completed his graduate studies at the University of New York, and taught at Long Island University in 1961–80. He was deputy premier of the *Government-in-exile of the Ukrainian National Republic from 1984 to 1988, and its premier from 1988 to 1992.

Samiilenko, Polina [Samijlenko], b 17 May 1891 in Vasylykiv, Kiev gubernia, d 1 December 1984 in Kiev. Actress. She completed study at the Lysenko Music and Drama School in Kiev (1915–17) and then joined *Molodyi Teatr* (1916–19) and the *Franko New Drama Theater* (1920–4). In 1924–33 she worked in various touring theaters in the Odessa, Podilia, and Donbas regions and in the Odessa Ukrainian Drama Theater (1928–30). In 1934–47 she was a leading actress in the Kiev Ukrainian Drama Theater. Her roles were mainly heroic-dramatic, including *Yaroslavna* in I. Dnirovsky's *Iablunevyi polon* (The Apple-Blossom Captivity) and the title role in G.B. Shaw's *Saint Joan*. Her memoirs are titled *Nezabutni dni horin'* (Unforgettable Days of Ardor).

Samiilenko, Stepan [Samijlenko], b 25 December 1906 in Stanislav, Kherson county, d 26 October 1977 in Zaporizhia. Linguist and educator. A graduate of the Kherson Institute of People's Education (1930), he taught at the Poltava, Luhanske, and Zaporizhia pedagogical institutes. He published over 110 works, including articles on the science of linguistics, the history of Ukrainian grammar, and the language of various writers. His most important work was *Narysy z istorychnoi morfolohii ukrains'koi movy* (Essays in the Historical Morphology of the Ukrainian Language, 2 vols, 1964, 1970). He coauthored the textbooks *Istorychna hramatyka ukrains'koi movy* (A Historical Grammar of the Ukrainian Language, 1st edn 1957; 2nd edn 1962) and *Porivnial'na hramatyka ukrains'koi ta rosiis'koi mov* (A Comparative Grammar of the Ukrainian and Russian Languages, 1961), and wrote the introduction to *Istoriia ukrains'koi movy: Morfolohiia* (History of the Ukrainian Language: Morphology, 1978).

Samiilenko, Volodymyr [Sami]lenko] (pseud: Ivanenko, V. Poltavets, V. Syvenky, L. Sumny), b 3 February 1864 in Sorochyntsi, Myrhorod county, Poltava gubernia, d 12 August 1925 in Boiarka, Kiev oblast. Poet, dramatist, and translator. He belonged to the *Brotherhood of Taras. From 1905 he worked in Kiev for the newspapers *Hromads'ka dumka*, *Rada*, and *Shershen'*. During the period of Ukrainian statehood he served in the UNR Ministries of Education and Finance, and in 1919 he moved to Galicia with the UNR government. In 1924 he returned to Kiev, where he worked as an editor in a literary publishing house. He began to publish his verse in the Lviv *Zoria*, and from 1886 he published his poems in the almanacs *Skladka* and *Vatra* and in the journals *Pravda* and *Literaturno-naukovyi vistnyk* (LNV). His first collection, *Z poezii Volodymyra Samiilenka* (From the Poetry of Volodymyr Samiilenko), was published in Kiev in 1890; his second, *Ukraini* (To Ukraine), which included poems written from 1884 to 1906, was published in 1906 in Lviv with an introduction by I. Franko. His unfinished poem, *Heia*, was published in part in *Literaturno-naukovyi vistnyk* (1922). In his lyric poetry Samiilenko expressed a high degree of idealism; quite a few of his poems are satirical (he wrote poems condemning ultra-patriotism, despotism, sellouts, and graphomania). He is the author of the dramatic works *Marusia Churaivna* (1896), *U Haikhan-Beia* (At Haikan-Bey's, 1917), sections of the play *Drama bez horilky* (A Drama without Whiskey, 1895), and others. Samiilenko translated into Ukrainian Homer's *Iliad*, Dante's *Divine Comedy*, dramas by Molière, Tristan, P.-A. de Beaumarchais, and A. France, and poems by P.-J. de Beŕanger, G. Byron, and many others. His *Vybrani tvory* (Selected Works), which includes his autobiography, was published in Kiev in 1926; it was followed by *Vybrani poezii* (Selected Poems, 1941, 1944, 1965) and *Tvory v dvokh tomakh* (Works in Two Volumes, 1958).

I. Koshelivets

Samizdat. See Samvydat.

Samofalov, Kostiantyn, b 12 November 1921 in Khutir Mykhailivskyyi (now Druzhba), Novhorod-Siverskyyi county, Chernihiv gubernia. Computer scientist. After completing his studies at the Kiev Polytechnical Institute in 1957, he taught there and in 1960 assumed Ukraine's first chair in computer technology at the institute. He has contributed to the study and the design of computer operating systems and data structures.

Samofalov, Viktor, b 31 January 1905 in Kiev, d 23 September 1973 in Kiev. Soviet historian. He graduated from the Kiev Institute of Social Education (1931) and completed courses for instructors of CP history (1932). He worked as a lecturer and CP activist in institutions of higher education in Kiev, Poltava, Cherkasy, and Tashkent until 1944. Then he worked at the Institute of Party History of the CC CPU (1945–9) and chaired the Department of CPSU History at the Higher Party School of the CC CPU (1949–73, professor from 1965). He was the author of *Komunistychna partiia Ukrainy v borot'bi za vidbudovu narodnoho hospodarstva, 1921–1925* (The CPU in the Struggle for the Rebuilding of the National Economy, 1921–5, 1963), a coauthor of *Narysy istorii Komunistychnoi partii Ukrainy* (Outlines of the History of the CPU, 1st–3rd edns, 1961–71), a member of the ed-

itorial board of *Ukrains'kyi istorychnyi zhurnal* (1957–62), and head of the editorial staff of *Ukrains'ka radians'ka entsyklopediia* (Ukrainian Soviet Encyclopedia, 1st edn, 17 vols, 1959–65).

Anatolii Samoilenko

Samoilenko, Anatolii [Samo]lenko, Anatolij], b 2 January 1938 in Potiivka, Radomyshl county, Zhytomyr oblast. Mathematician; corresponding member of the AN URSS (now ANU) since 1978. Since completing his studies at Kiev University (1960), he has worked at the ANU Institute of Mathematics (as director since 1988) and at Kiev University (since 1967). Samoilenko's main contributions are to the theory of linear and nonlinear ordinary differential equations of various types and to the theory of nonlinear oscillations. In a series of papers published in the early 1960s (some jointly with M. Perestiuk) he provided a rigorous foundation for the application of asymptotic methods in solving discontinuous and impulsive systems. His most original contribution was the numeric-analytical method for the study of periodic solutions of differential equations with periodic right-hand side. A monograph on the method of accelerated convergence, written jointly by Samoilenko, N. Bogoliubov, and Yu. Mytropolsky in 1969, gives an exhaustive analysis of the speed of convergence, error estimates, stability, and applications. In the late 1960s and early 1970s Samoilenko constructed a general theory of perturbation of invariant toroidal manifolds of dynamical systems. He (jointly with Mytropolsky) also made a contribution to the theory of multifrequency oscillation. In the late 1970s and early 1980s he studied aspects of the theory on systems of ordinary differential equations with impulse effects under various assumptions. His results were unified and extended in a monograph he wrote jointly with M. Perestiuk in 1987. Samoilenko, Mytropolsky, and D. Martyniuk worked together on a system of evolutionary equations with periodic and conditional periodic coefficients and published their results in a joint monograph in 1984.

W. Petryshyn

Samoilovich, Anatolii [Samo]lovič, Anatolij], b 29 November 1906 in Rostov-na-Donu, Russia, d 22 October 1981 in Chernivtsi. Theoretical physicist. A graduate of Leningrad University (1929), he joined the faculty of Chernivtsi University in 1949 and became head of the department of theoretical physics there in 1962. His major contributions were in the fields of solid-state theory,

where he developed a theory of surface electron states in metals, and of semiconductors, where he became a leading expert on their magnetic properties. His extensive list of publications includes a monograph on thermodynamics and statistical physics (1953).

Samoilovych [Samojlovyč]. A Cossack *starshyna* family, founded by Samuil, who was a priest in Khodorkiv, in the Skvyra region, before becoming pastor of Krasnyi Koliadyn, in Pryluka regiment. Three of his sons, Vasyl, Martyn, and Tymotei, were priests in Lebedyn and Romen, and *I. Samoilovych was hetman of Ukraine from 1672 to 1687. Ivan's son, Semen Samoilovych (b ca 1660, d 19 May 1685; buried in the Kievan Cave Monastery), served as acting hetman (1679–80) and as colonel of Starodub regiment (1680–5); he married M. Sulyma, the granddaughter of Hetman I. Sulyma. Ivan's second son, Hryhorii Samoilovych (d 11 November 1687), served as colonel of Chernihiv regiment (1685–7) and as acting hetman (1687); he married the daughter of Hetman I. Briukhovetsky. He was arrested by Muscovite forces at the Cossack General Council held near Kolomak (see *Kolomak Articles) and was beheaded in Sevsk. Hryhorii's son, Ivan Samoilovych, was a military fellow of Nizhen regiment in 1736. Ivan's youngest son, Yakiv Samoilovych (d 9 July 1695), who took over as colonel of Starodub regiment (1685–7), was subsequently arrested along with his father and exiled to Eniseisk and then Tobolsk, Siberia, where he died. Ivan's nephew, Mykhailo Samoilovych, was colonel of Hadiache regiment (1678–87) and a court functionary in Moscow from 1685; for his participation in a plot against Hetman I. Mazepa he was exiled to Tobolsk in 1692.

O. Ohloblyn

Danylo Samoilovych

Hetman Ivan Samoilovych

Samoilovych, Danylo [Samojlovyč] (real name: Sushkivsky), b 22 December 1742 in Yanivka, Chernihiv regiment, d 4 March 1804 in Mykolaiv, Kherson gubernia. Physician and founder of epidemiology in Ukraine; member of 12 foreign academies of science. After completing his studies at the Kievan Mohyla Academy (1756–61) and the Medico-Surgical School of the St Petersburg Military Hospital (1761–5) he served as chief physician of the Women's Venereological Hospital and as official doctor of Konotip regiment. He studied abroad at Strassburg and Leiden (PH D, 1780) universities and then returned to Ukraine, where he assumed the posts of physician in chief for Katerynoslav vicegerency (1784–90), quarantine chief

for Ukraine (1793–1800), and inspector for the Black Sea Medical Board (1800–4). He devoted over 30 years to the struggle against the plague in various parts of Ukraine. He showed that the disease is transmitted by contact with patients or infected objects and tried to isolate the infecting agent. He predicted the effectiveness of vaccination against the plague, which he tested on himself, and worked out a system of control methods. His selected works were published in Moscow in 1949–52.

BIBLIOGRAPHY

Borodii, M. *Danylo Samoilovych* (Kiev 1987)

Samoilovych, Ivan [Samojlovyč] (Popovych), b ? in Khodorkiv, Skvyra region, d 1690 in Tobolsk, Siberia. Cossack leader. He studied at the Kievan Mohyla College until 1648. During the tenure of Hetman D. Mnohohrishny he served as colonel of Chernihiv regiment (1668–9) and as general judge (1669–72). After Mnohohrishny was deposed, Samoilovych was elected hetman at a Cossack General Council held near Konotip in June 1672 (see *Konotip Articles). He sought to unite Left-Bank and Right-Bank Ukraine under his rule and fought against the Right-Bank hetman, P. Doroshenko. On 17 March 1674 a council of 10 senior *starshyna* of Right-Bank Ukraine recognized him as their hetman, but he could not rule de facto until Doroshenko abdicated, on 18 September 1676. Samoilovych also sought to join the regiments of Slobidska Ukraine to the Hetmanate, but that aim was decisively opposed by Moscow.

Samoilovych opposed a Muscovite-Polish alliance, which would have been detrimental to Ukraine, but he supported peaceful relations between Moscow and the Crimean Khanate and Turkey. The *Chyhyryn campaigns (1677–8) of the Turks, however, which devastated Right-Bank Ukraine and resulted in a mass forced migration to the Left Bank (1680), brought about Samoilovych's political demise. The *Eternal Peace of 1686 between Moscow and Poland (opposed vigorously by Samoilovych) officially confirmed the partition of the Hetmanate and drew it into another war against Turkey and the Crimea (campaigns in 1687 and 1689).

Samoilovych favored an authoritarian system of rule. As the self-proclaimed absolute ruler of the Little Russian State he was probably the first to formulate theoretically the hetmancy as a monarchic institution based on divine right. He wanted to secure hereditary rule of the Hetmanate for his sons, to whom he gave the best regimental governments and huge estates. Under his regime there was a significant economic resurgence in Left-Bank Ukraine. Trade with Western Europe resumed, and economic ties with Muscovy, the Balkans, the Don region, and Caucasia were strengthened. Internal trade also improved, between the Hetmanate in the north and the Zaporizhia in the south and between Slobidska Ukraine and Right-Bank Ukraine. Various trades and industries began to develop, and cultural life, which had suffered during the years of the *Ruin, was invigorated. The construction of large new churches (eg, the Mhar Transfiguration Monastery) was financed by Samoilovych and his senior *starshyna*. Under his rule, however, the Moscow patriarchy began to subvert the Ukrainian church, and subjugated it finally in 1686.

Samoilovych's despotism aroused considerable opposition among the senior Cossack *starshyna*, and they began

plotting against him as his health failed. Abetted by the Muscovite government and capitalizing on the failure of the 1687 Crimean campaign, they charged him with arbitrariness and corruption and even accused him of establishing secret treasonous contacts with the Crimean khan. Samoiloivych was deposed at the behest of Moscow at the Cossack General Council at Kolomak; his assets were seized, and he was exiled to Tobolsk.

O. Ohloblyn

Samoiloivych, Mykola [Samojlovyč], b 1890 in Kupianka county, Kharkiv gubernia, d 1951. Civic figure and stage performer. He received his musical education in Kiev. In 1917–18 he was a member of the Ukrainian Central Rada and a delegate to the first two all-Ukrainian military congresses. An émigré from 1920, he lived in Prague, where he studied theater, performed at the Prague Opera, and received a PH D from the Ukrainian Free University. He also appeared in plays staged by the Sadovsky Ukrainian Drama Theater in Uzhhorod and the Nova Stsena theater in Khust, and he performed in Western Europe.

Samoiloivych, Viktor [Samojlovyč], b 17 September 1911 in Pryluka, Poltava gubernia. Architect and art scholar. A graduate of the Kiev Civil-Engineering Institute (1940), he taught at the Kiev State Art Institute from 1941. He codesigned apartment buildings in many places in Ukraine (1951, 1955) and produced a series of plans for typical (1958, 1959, 1962) and experimental (1960) apartment buildings; wrote books on the home of the collective farmer (1951, 1956), folk creativity in the architecture of the rural dwelling (1961), the Ukrainian folk home (1972), and folk architecture (1977); and contributed to several multiauthor monographs, including one on the history of architecture in Ukraine (1957).

Samoiloivych, Zakhariia [Samojlovyč, Zaxarija] (Samuilovych), b and d ? Engraver of O. *Tarasevych's school. In 1691–1706 he worked in Kiev and Moscow. The 14 copper engravings known to be done by him include the large *Adoration of the Magi* depicting Tsars Peter I and Ivan Alekseevich and the Cossack *starshyna* (dedicated to Hetman I. Mazepa), *The Resurrection* (1691), the philosophical thesis of H. Terpylovsky (1699–1706), *The Theotokos*, *St Stephen*, *St Catherine*, and *St Gregory the Great*.

Samokhvalenko, Yevhen [Samoxvalenko, Jevhen], b June 1917 in Russia, d 30 November 1984 in Dobrzyń, Poland. Ukrainian writer and community figure in postwar Poland. A pharmacist by occupation, he was a founding member of the literary and artistic association within the Ukrainian Social and Cultural Society in Poland, edited the literary-cultural supplement to the weekly *Nashe slovo* (Warsaw), and was politically active in Dobrzyń. He published hundreds of poems and articles in the Ukrainian and Polish press and wrote the poetry collections *Nad Visliu* (At the Vistula, 1974) and *Paraleli* (Parallels, 1979).

Samokvasov, Dimitrii, b 27 May 1843 on an estate near Molotech, Novhorod-Siverskyi county, Chernihiv gubernia, d 16 August 1911 in Moscow. Russian archeologist and law historian. After studying at St Petersburg University, he taught law at Warsaw University from 1877 until he moved to Moscow in 1892 to direct the Ministry of Justice archives and teach the history of Russian law at Mos-

cow University. He directed a number of digs in Russia and Ukraine, including the renowned *Chorna Mohyla site near Chernihiv. He published monographs and articles on early Rus' cities (including his MA dissertation in 1873), on legal history, and on early Rus' grave sites (the latter have little scholarly value). Although born in Ukraine, he opposed the Ukrainian national movement.

A drawing by Mykola Samokysh in his and Serhii Vasylykivsky's album of Ukrainian antiquities

Samokysh, Mykola [Samokyš] (Samokysha), b 25 October 1860 in Nizhen, Chernihiv gubernia, d 18 January 1944 in Symferopil. Painter and graphic artist; full member of the St Petersburg Academy of Arts (SPAA) from 1890. While studying at the SPAA (1879–85) he belonged to a group of painters, including S. Vasylykivsky, P. Martynovych, and O. Slastion, dedicated to depicting the history and folkways of the Ukrainian people. After returning from his studies in Paris (1886–9) he painted several historical canvases for the Tbilisi Museum of Military History, which established his reputation as a battle painter. In 1894–1917 he headed the SPAA battle-painting studio. He created an album of drawings and watercolors of the Russo-Japanese War with texts from his diary (1905) and the series 'The Great War in Images and Pictures' (1915). Later he painted canvases of the Russian Civil War, such as *Attack of the Budenny Cavalry* (1923) and *The Red Army Crossing the Syvash* (1935). Samokysh never lost contact with Ukraine. Around the beginning of the century he often visited Ukraine and took part in exhibitions there. He designed an album of T. Shevchenko's works (1889) and illustrated an album about Sevastopol and its past (1904). With Vasylykivsky he illustrated D. Yavornytsky's *Iz ukrainskoi stariny/La Petite Russie d'autrefois* (1900), an album which was seen as the continuation of Shevchenko's **Zhivopisnaia Ukraina*. In 1912 Samokysh prepared an album of Ukrainian ornamentation. In the early 1900s he and Vasylykivsky painted the murals in the Poltava Gubernia Zemstvo building. From 1911 he spent every summer painting in Ukraine. In 1921 he moved to Symferopil, and from 1937 to 1941 he taught at the Kharkiv Art Institute.

In the Soviet period much of Samokysh's work was devoted to Cossack history, which he depicted in canvases such as *B. Khmelnytsky's Entry into Kiev in 1648* (1929), *The Battle of Zhovti Vody* (1930), *I. Bohun's Battle with Czarniecki*

at *Monastyryshche in 1653* (1931), *Sea Battle of the Zaporozhians with a Turkish Battleship* (1932), and *The Kharkiv Fortress in the 18th Century* (1936). A good part of his graphic work consists of battle scenes done in watercolor, ink, or pencil. Altogether Samokysh painted or drew over 10,000 works. Several thousand were book illustrations, some of them to editions of works by Ukrainian writers, such as Marko Vovchok, N. Gogol (his *Taras Bul'ba*), and I. Nechui-Levytsky (his *Mykola Dzheria*), and others for journals, such as **Ukrains'ka khata* (1909–14), *Niva* (1910, 1912, 1914–15, 1917), *Solntse Rossii* (1914–16), and *Myslyvets' ta rybalka* (1928). Samokysh's works are distinguished by their dynamic composition, realistic rendering, vivid colors, and rich content. Books about him have been written in Ukrainian by M. Burachek (1930) and V. Yatsenko (1954, 1979), and in Russian by G. Portnov (1954), A. Polkanov (1960), and V. Tkachenko (1964).

S. Yaniv

Samokyshyn, Roman [Samokyšyn], b 1877 in Pechenizhyn, Kolomyia county, Galicia, d 1971. Partisan leader during the revolutionary period. He was a Russian POW in 1915–17 and an organizer of Free Cossack detachments in the Katerynoslav and Kherson regions after the 1917 revolution. He particularly distinguished himself in the battle for Katerynoslav against the Bolsheviks and N. Makhno's forces in January 1919.

Samooborona (Self-Defense). A military organization active in the Kholm region during the Second World War. Formed in June 1942 to defend local residents from attacks by partisans of the *Polish Home Army (AK), the group was centered in the Hrubeshiv region. Following the death of Col Ya. Halchevsky-Voinarsky in March 1943 at the hands of Polish partisans, it was led by Capt Yu. Lukashchuk. The group had up to 500 men at the height of its activity. Its most significant action was a successful encounter against a large AK detachment on 6 June 1944. Early in 1945 the force merged with the *Division Galizien.

Samoosvita (Self-Education). A correspondence school offering university-level courses in Lviv from 1930 to 1939. Major financial support was provided by the United States-based Ukrainian Workingmen's Association. In 1930–9 *Samoosvita* published popular encyclopedia-like fascicles, which appeared monthly under its name. A total of 117 booklets were published, with an approximate pressrun of 10,000 copies each. An additional 24 booklets were devoted to belles lettres. The editorial staff consisted of over 40 people, the chief editors being M. Stakhiv, K. Kobersky, I. Luchyshyn, and Ye. Yavorivsky. Topics covered in the periodical included social studies, world and Ukrainian history with special attention to the period 1917–20, political and current events, Ukrainian literature, science, geography, and economics.

Samoosvita (Self-Education). A journal published monthly from January 1926 and semimonthly from October 1929 to February 1933 in Kharkiv. It was sponsored by the Komsomol and the All-Ukrainian Council of Trade Unions, and was dedicated to promoting extramural education and self-education. The editor was A. Ivanivsky.

Samoosvitnyk (Self-Enlightener). A mass-circulated educational monthly (later semimonthly) journal published in Lviv in 1937–9 by the *Desheva Knyzhka publishing house. It appeared in a pressrun of 18,000 to 22,000 copies and was edited by R. Paladiichuk.

Samopomich (Self-Help). A monthly supplement to the newspaper **Economist* published by the Audit Union of Ukrainian Co-operatives in Lviv in 1909–14. Edited by O. Saievych and then A. Zhuk, it contained reports on the co-operative movement in Western Ukraine and practical farming advice.

Samostiina dumka

Samostiina dumka (Independent Thought). A literary, scholarly, and political journal published in Chernivtsi monthly in 1931, semimonthly in 1932, and again monthly from January 1933 to March 1937. Edited by S. Nykoryvych and O. Olzhych, the journal contained articles by prominent émigré and OUN figures (eg, M. Shapoval, N. Hryhoriv, O. Mytsiuk, M. Stsiborsky, S. Rusova, Ye. Onatsky, and R. Sushko) and Bukovynian publicists, and scholarly and literary contributions from U. Samchuk, M. Mukhyn, O. Hrytsai, S. Smal-Stotsky, L. Biletsky, V. Simovych, S. Cherkasenko, and others.

Samostiina Ukraïna (Independent Ukraine). A monthly and, beginning in 1973, bimonthly magazine published since 1948 (except for a hiatus in 1970–1) in Chicago (and at various times and for brief periods in Winnipeg, St Paul, New York, and Toronto). The organ of the *Organization for the Rebirth of Ukraine and, since 1973, of the OUN (Melnyk faction), it contains articles on politics, history, and culture; analyses of developments in Ukraine; memoirs; and reviews. Its editors have included B. Bociurkiw, S. Kotsiuba, T. Lapychak (1950–5), Z. Knysh (1956–7), S. Kuropas (1958–9), V. Shemerdiak (1960–3), M. Panasiuk (1963–8, 1971–2), D. Kvitkovsky (1973–9), V. Nahirniak (1979–86), P. Stercho (1986–7), and P. Dorozhynsky (1987–).

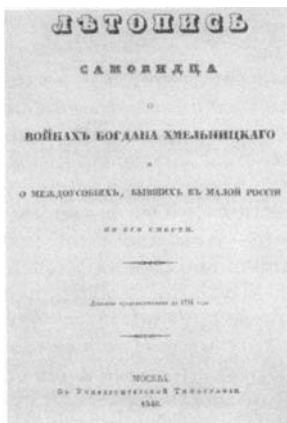

Samostiinist' (Independence). A weekly pro-OUN newspaper published in Chernivtsi from January 1934 to March 1937. It did much to gain support for the nationalist cause in Bukovyna, especially among students. At its peak it had over 7,000 subscribers. The newspaper was edited by D. Kvitkovsky with the assistance of P. and I. Hryhorovych and L. Huzar. Contributors included Ukrainian activists in Bukovyna as well as OUN leaders, such as M.

Samostiinist'

Stsiborsky and Ye. Onatsky. In 1936–7 it published a humor supplement, *Chortopolokh* (ed O. Masikevych-Shypynsky), and two annual almanacs. The staff was constantly harassed, and *Samostiinist'* was censored by the Rumanian authorities, who suspended it several times and prevented its distribution in Bessarabia. The authorities finally closed it down in 1937 and sentenced the managing editor, I. Hryhorovych, to three years' hard labor for publishing 'irredentist' propaganda.

Samotos, Ivan, b 20 August 1933 in Ustia, Zhydachiv county, Galicia. Sculptor. He studied under I. Severa at the Lviv Institute of Applied and Decorative Arts (1953–9). He has done busts of I. Kotliarevsky (1966), H. Skovoroda (1969), Lesia Ukrainka (1970), and D. Yavornytsky and the portraits *Natalia* (1975) and *Oksana* (1975), and has collaborated on the victory monument in Stryi (1965–6, stone and iron), the monument to the heroes of the Second World War in Vilkhove (1967–8, marble), and other monuments.

The first edition of the Samovydyts Chronicle (1846)

Samovydyts Chronicle. One of the most important sources for the history of Ukraine during the years 1648–1702; it was named *Litopys samovydytsia* (Chronicle of an Eyewitness) by P. *Kulish. The introduction describes conditions in Ukraine prior to the B. *Khmelnysky era (O. Bodiansky included it when he published the chronicle in the journal *Chteniia v Imperatorskom obshchestve istorii i drevnostei rossiiskikh* [1846], but O. Levytsky rejected it in his edition of the chronicle [1878], believing that it had been added at a later date). Following the introduction,

the first part examines the Khmelnytsky period and the *Ruin (up to 1676); it was probably written some time after the events occurred. The second part constitutes a true chronicle of events in Left-Bank Ukraine until 1702; it was probably written in Starodub (surmised from the prevalence of local detail).

The *Samovydyts Chronicle* was written in the Ukrainian literary language of the day, which was close to the vernacular of a dialect of Right-Bank Ukraine. The author of the chronicle is unknown, but he was likely a highly placed member of the Cossack *starshyna* and a functionary in the Ukrainian government. The investigation of his identity was carried out on the basis of autobiographical materials in the chronicle, and was greatly facilitated by V. Modzalevsky's writings (1919–22) on R. *Rakushka. In the 1920s the scholars V. Romanovsky and M. Petrovsky independently arrived at the conclusion (initially voiced by the amateur historian P. Serdiukov in 1846) that the chronicle's author was most likely Rakushka. That theory was adopted by many historians, including D. Bahalii, D. Doroshenko, M. Hrushevsky, I. Krypiakevych, and modern Soviet historiographers. Other candidates for the authorship of the chronicle were I. Bykhovets, a military chancellor (favored by L. Okinshevych), and F. Kandyba, a colonel of Korsun regiment (favored by M. Andrusiak and M. Vozniak).

The original of the *Samovydyts Chronicle* has not been preserved; six manuscript copies, made in the 18th century or later, have survived. The oldest and most reliable are those made by P. Iskrytsky (dated 1734, closest to the original) and Ya. Kozelsky (made in the late 18th century). Those have served as the basis for scholarly research and for more recent editions, including the one published by Bodiansky (1846), who obtained the manuscript from Kulish. A more scholarly edition was issued by the Kiev Archeographic Commission (1878), edited and with an introduction by Levytsky. It was republished by the AN USSR (now ANU) Institute of History (1971, edited and with an introduction by Ya. Dzyra), and as part of the Harvard Series in Ukrainian Studies (*The Eyewitness Chronicle*, 1972).

O. Ohloblyn

Samsonov, Grigorii, b 15 February 1918 in Detskoe Selo (now Pushkin), near Petrograd, d 22 December 1975 in Kiev. Russian physical chemist; corresponding member of the AN USSR (now ANU) from 1961. He graduated from the Moscow Institute of Chemical Technology (1940) and worked at the Moscow Institute of Nonferrous Metals and Gold (1947–56) and the ANU Institute for Problems of Materials Science. He led the Technical Sciences Division of the ANU (1961–3) and became head of the Department of Powder Metallurgy and Rare Metals at the Kiev Polytechnical Institute (in 1962). His research dealt predominantly with solid state chemistry. He developed and put into industrial production over 400 compounds (borides, nitrides, carbides, etc), including metalloceramics for atomic reactors and heat-resistant materials for machine construction. He studied the structure and properties of

pyroceramics over a wide temperature range, and particle interactions during their formation. He also developed the basis for a quantum-mechanical electronic theory of particle sintering in pyroceramics.

Samus, Anatolii [Samus', Anatolij], b 17 October 1930 in Kehychivka, now in Kharkiv oblast. Sculptor. A graduate of the Voroshylovhrad Art School (1954) and Kharkiv Art Institute (1961), he has done portraits and compositions, such as *Liberation* (1965) and *Partisans* (1967), and collaborated on the monuments to the Komsomol underground in Krasnodon (1965) and the heroes of the Second World War in Luhanske (1965) and Brianka (1966).

Samus, Samiilo [Samus', Samijlo] (actual name unknown), b and d ? Cossack officer from the Pereiaslav region. He served as colonel of Bohuslav regiment (1685–1713) and as acting hetman of Right-Bank Ukraine (1692–1704), appointed by the Polish government. In 1683 he led a Cossack army in a joint engagement with Jan III Sobieski against Turkish and Tatar forces near Vienna. During the anti-Polish uprisings led by S. Pali (1702–4) Samus's army of 5,000 Cossacks defeated the Polish army near Berdychiv on 17 October 1702. Later that month, together with A. Abazyn, the colonel of Bratslav regiment, he captured Nemyriv. As a result the entire Bratslav region and large areas of Podilia fell into the hands of the rebels. Samus favored the unification of Right-Bank Ukraine with the Hetmanate, and he recognized the authority of Hetman I. *Mazepa. The advance of a superior Polish force, however, and the lack of aid from Moscow or Mazepa forced him to retreat to Bohuslav and to relinquish his title of acting hetman in January 1704. He continued as colonel of Bohuslav regiment under Mazepa, and he fought against Right-Bank Polish magnates and the Swedes (1708–9). In 1711 he joined most of the Right-Bank Cossacks in backing Hetman P. *Orlyk, and after Orlyk's capitulation Samus was captured by the Russians (along with his son, a colonel in Orlyk's army). His subsequent fate is unknown.

O. Ohloblyn

Gen Petro Samutyn

Samutyn, Petro, b 1897 in Poltava, d 14 September 1982 in Baltimore. Senior army officer. An official in the Russian army during the First World War, in 1917 he helped Ukrainians of the Sixth Russian Corps and attended as a delegate the Second and Third all-Ukrainian military con-

gresses in Kiev. In 1920 he commanded a company of the Sixth Sich Division. In the interwar period he served on contract in the Polish army and graduated from the General Staff Academy in Warsaw. The UNR government-in-exile promoted him to brigadier general. After the Second World War he emigrated to the United States, where he was active in veterans' and community organizations. He wrote some historical articles based on his years of service in the UNR Army.

Samvydav (from *sam* 'self' and *vydannia* 'publication'; Russian: *samizdat*). Uncensored underground leaflets, monographs, serials, and other items published and distributed illegally in the USSR. Samvydav publications included a wide variety of philosophical, literary, political, scholarly, and religious studies, letters, political declarations, translations of banned foreign works, and reports on political opposition and repressions in the USSR. They provided the most detailed and accurate descriptions and criticisms of political trials, KGB actions, and conditions in labor camps and prisons. Samvydav appeared in almost all the languages of the USSR.

Generally the author of a samvydav piece typed out several copies for friends. Since access to publishing and duplicating technology was strictly controlled in the USSR, others recopied the document and distributed it further. Popular works even of book length were recopied many times and read by a large number of people. In Ukraine, as in the rest of the USSR, the first samvydav publications date from the post-Stalin period of the mid-1950s. In the early 1960s a great number of literary works, including the poetry of the **shestydesiatnyky*, appeared in samvydav. There was always a strong political current in Ukrainian underground publications, with a special interest in national and human rights and religious freedom (see *Disident movement). The repressions of the 1970s slowed the production of samvydav materials. Many people were punished severely for writing or distributing uncensored publications.

Ukrainian samvydav materials can be found in a variety of sources: the **Chronicle of Current Events*, **Ukrains'kyi visnyk*, and in many collections, such as *The Human Rights Movement in Ukraine: Documents of the Ukrainian Helsinki Group, 1976–1980* (1980). The most important samvydav works, by V. *Moroz, V. *Chornovil, I. *Dziuba, and M. *Osadchy, were smuggled to the West and published there, first in the original Ukrainian and then in English, French, and German translations. The largest collection of samvydav material has been amassed by Radio Liberty in Munich. *Nonconformity and Dissent in the Ukrainian SSR, 1955–1975: An Annotated Bibliography* (compiled by G. Liber and A. Mostovych, 1978) lists 1,242 separate samvydav documents smuggled to the West.

In the late 1980s political liberalization created a fertile setting for samvydav. The easing of censorship permitted more open and technically sophisticated publications to appear. Hand-copied clandestine publications were replaced by a large variety of serials, leaflets, journals, and monographs printed by numerous unofficial groups (**neformally*) and individuals.

B. Balan

San Francisco. A city (1980 pop 679,000; metropolitan pop 3,253,000) in California on the northern tip of a peninsula between the Pacific Ocean and San Francisco Bay. In

1980 about 3,600 people of Ukrainian origin lived in the metropolitan area. The first Ukrainians to arrive in the city came via Alaska along with Russian settlers in North America. In 1867 A. *Honcharenko settled in the city; later he established the Ukraina homestead nearby. The Russian Orthodox church used the city as its home base in North America in the late 19th century and launched its missionary activities among Ukrainians in Canada and the United States from there. The Prosvita society was the leading institution of the Ukrainian community in the 1910s, 1920s, and 1930s. Today Ukrainian Catholics are organized in the parish of the Immaculate Conception, and Orthodox in St Michael's parish.

Sanacja regime. The popular name for the political leadership of Poland during the years 1926–39. The Sanacja regime was founded after the armed coup of J. *Piłsudski in May 1926. The name referred to the healing (from Latin *sanatio*) of Polish social, economic, and political life Piłsudski hoped to achieve. The major political organizations under the regime were the Nonparty Bloc of Co-operation with the Government (1927–35, led by W. Ślawek) and the Camp of National Unity (1936–9, led by A. Koc). The Sanacja regime's main goal was the creation of a strong executive, with restricted civil rights (April Constitution, 1935) and a stable economy. Following Piłsudski's death in 1935, the regime split into two opposing groups: the liberals, centered around President I. Mościcki, and the totalitarian nationalists, under E. *Rydz-Śmigły. The Sanacja regime was brought to an end by the German occupation in September 1939.

With regard to the Ukrainian question the regime engendered various programs (such as those drawn up by B. Miedzinski and S. Srokowski) as well as strong pro-Ukrainian tendencies (L. Wasilewski, T. Hołowko, and P. Dunin-Wąsowicz). From a planned policy of state assimilation (realized essentially only in Volhynia by H. Józewski) the Sanacja regime shifted toward the Polonization ideals of the National Democrats. Despite its undertaking provisional and tactical attempts at political resolution (discussions in 1931, the *Normalization of 1935), repression was more often applied (the 1930 *Pacification, the construction of the *Bereza Kartuzka concentration camp in 1934). Toward the end of the 1930s the Sanacja regime strongly advocated the strengthening of the Polish presence in the outlying territories through forced Polonization, colonization, restricted national development, and the creation of artificial divisions among the Ukrainian population (Lemko and Hutsul separatism, the yeoman movement, and the Polish Greek Catholic and Polish Orthodox movements). The activity of pro-Ukrainian circles of the Sanacja regime was limited.

Sanatoriums. See Health resorts and sanatoriums.

Sandler, Oskar, b 26 January 1910 in Kiev, d 3 May 1981 in Kiev. Composer and conductor. A graduate of the Kiev Conservatory (1937), he studied composition with V. Kosenko and conducting with H. Taranov. In 1937–40 he was a conductor at the Kiev Theater of Opera and Ballet, and in 1940–5 music director of the Kiev Russian Drama Theater. One of the creators of the Soviet musical drama in Ukraine, his works include the operas *Elsa Strauss* (1938)

and *V stepakh Ukrainy* (In the Steppes of Ukraine, 1951), the operettas *Kelykh het'mana Bohdana* (The Chalice of Hetman Bohdan, 1954) and *Kashtany Kyieva* (The Chestnut Trees of Kiev, 1972), the musical comedy *Fabryka chudes* (The Factory of Miracles, 1949), as well as nearly 40 film scores and more than 100 songs.

The fresco depicting the Dormition inside the Sandomierz cathedral

Sandomierz (Sandomyr). III-2. A Polish city (now in Tarnobrzeg voievodeship) on the left bank of the Wisła River, near the mouth of the Sian River (1989 pop 24,000). It was situated on the Kiev–Volodymyr–Volynskyyi–Cracow trade route, at the junction of its branches to Peremyshl and Halych. It was destroyed in several Tatar incursions; a siege of the city by Lev Danylovych allied with the Nogay Tatars was described in the Galician-Volhynian Chronicle (1280). As Lviv and Lublin became established economic centers in the 16th century, Sandomierz declined in significance. The city has many architectural monuments. Its Gothic cathedral (built ca 1360–82) contains frescoes in the Byzantine-Ukrainian style, painted in the 1430s at the behest of Władysław II Jagiełło by Ukrainian masters of the Galician school. The main fresco depicts the Dormition of the Mother of God, and others show scenes from the life of Christ. They were discovered in 1887. An inferior restoration (1932–4) obscured the coloration and stylistic detail of the original.

Sandpiper (*Tringa*; Ukrainian: *ulit*). A small shore bird of the suborder Charadrii. With nondescript brown or gray plumage, it is long-legged and has a long, straight beak. In Ukraine the common sandpiper (*T. hypoleucos*; Ukrainian:

pereviznyk) nests on the grassy shores of lakes and rivers. Others nesting in Ukraine are the redshank (*T. totanus*; Ukrainian: *travnyk*), the green sandpiper (*T. ochropus*; Ukrainian: *chornysh*), the marsh sandpiper (*T. stagnatilis*; Ukrainian: *poruchainyk*), and the wood sandpiper (*T. glareola*; Ukrainian: *fifi*). Sandpipers migrate from Ukraine in the winter.

Sandraky settlement. A late Trypilian culture settlement near Sandraky (now incorporated into Shyroka Hrebliia), Khmilnyk raion, Vinnytsia oblast. Excavations in 1949–50 revealed the remains of a surface dwelling, stone and bone tools (including a cache of flint knives), pottery (most of it decorated), the bones of domestic and wild animals, and earthenware figures of women and bulls. Artifacts from the late *Bronze Age and 17th to 18th centuries were found in the upper layer of the excavation.

Sands, Bedwin. See Raffalovich, George.

Sandstone. A type of sedimentary rock found throughout Ukraine. The highest grades of sandstone in Ukraine are located in the Dnieper region and in Kiev, Cherkasy, Kirovohrad, and Sumy oblasts. The rock is used for making grindstones and as a material in brick manufacturing. The best sandstone for the latter purpose is found in Donetske oblast and the Crimea.

Sanduliak, Ivan [Sanduljak] (Sanduliak-Lukyniv and Sanduliak-Lukych), b 1848 in Karliv near Sniatyn, Galicia, d 1926 in Karliv. Civic and political leader. A village farmer, he was active in the Ukrainian Radical party and was elected to the Galician Diet in 1908 and 1913.

Sandul-Strudza, Yakiv, b 1756 in Kozatske, Chernihiv regiment, d after 1810. Physician. A graduate of Chernihiv College (1769–77) and the medical school in Moscow (1777–9), he served as a doctor's assistant in the army and then completed his medical training in St Petersburg (1783). He worked in Southern Ukraine, where he devoted much of his time to research on leprosy. In 1792 he wrote a doctoral thesis on leprosy, the first work on the subject in the Russian Empire. From 1799 he was in charge of the gubernial medical board in Kharkiv.

Sanguszko [Sanguško]. A Lithuanian-Ukrainian princely family whose members controlled large estates in Volhynia, Podilia, and the Bratslav region from the 15th century. They held various positions in the governments of the Grand Duchy of Lithuania and the Polish Kingdom. They were initially Orthodox and later converted to Catholicism.

Although some Polish heraldists (eg, B. Paprocki) assert that the Sanguszko family line was established by *Liubartas, others (eg, M. Strykowski) contend that it was founded by Fedor, the son of *Algirdas. Notable members of the line included Oleksander Sanguszko (d ca 1491), the starosta of Volodymyr-Volynskiy and originator of the Koshary line (which died out in 1653); Mykhailo Sanguszko (d ca 1511), the originator of the Kovel line; Oleksander's son, Andrii Sanguszko, the starosta of Volodymyr-Volynskiy and marshal of Volhynia in the 15th century; and Oleksander's grandson, Andrii Sanguszko, the starosta of Lutske in the 16th century. Fedir Sanguszko (d 1547) was starosta of Vinnytsia, Bratslav, and Volo-

dymyr-Volynskiy as well as marshal of Volhynia; he participated in campaigns against the Crimean Tatars. Dmytro Sanguszko, the starosta of Cherkasy (ca 1530–4), was murdered in Moravia as a result of family feuding. Oleksander's grandson and Dmytro's brother, Roman Sanguszko (1537–71), was the Lithuanian field hetman (from 1567), noted for his victories against Moscow and the Tatars; he opposed the Polish-Lithuanian Union of *Lublin (1569), but he was forced to sign the treaty. Adam Oleksander Sanguszko, a voivode of Volhynia, promoted the union of the Ukrainian Orthodox church with the Catholic church; he served as an emissary between Pope Urban VIII and Metropolitan P. Mohyla. Evstafii (Eustachy) Sanguszko (1768–1844) was a powerful landowner and industrialist, with textile mills and other business ventures in Volhynia and the Kiev region; his support of Napoleon in 1812 was pardoned, and his memoirs of the years 1786–1815 were published in 1876. Evstafii's son, Roman Stanyslav (Stanisław) Sanguszko (1800–81), a Polish politician, was exiled to Siberia for his part in the Polish Insurrection of 1830–1; he returned to Slavuta, where he administered the family industrial concerns (especially sugar refineries). Roman's nephew, Evstafii (Eustachy) Sanguszko (1842–1903), was a conservative politician in Galicia, marshal of the Galician Diet (1885–95), and governor of Galicia (1895–8). A selection of materials from the substantial family archive was published in *Archiwum Książąt Lubartowiczów Sanguszków w Stawucie* (Archive of the Princes Lubartowicz Sanguszko in Slavuta, 6 vols, 1887–1910).

A. Zhukovsky

Sanitary Charitable Service. See Ukrainian Medical Charitable Service.

Sanitary-epidemiological stations. Institutions created under the Soviet health care system, whose purpose is to monitor the implementation of sanitary-hygienic and epidemic-prevention measures by ministries, departments, businesses, and civil servants. These measures include steps to stop *pollution and clean the environment, to improve safety and health conditions at the workplace and in the home, and to eliminate infectious diseases. A sanitary-epidemiological station conducts research on the frequency of occurrence of infectious and work-related diseases in a given region, develops directives and methods for combating them, and monitors their implementation. It has departments of sanitary-hygiene, epidemiology, parasitology, and disinfection and is equipped with laboratories for bacteriology, virology, parasitology, and sanitary hygiene. The water-transport industry is served by special sanitary-epidemiological stations. The first station in the USSR was set up in 1927 in the Donbas. Beginning in 1931 a network of stations was developed in Ukraine. In 1983 there were 722 such stations and 24 disinfection stations in Ukraine.

Sanitation. The promotion and maintenance of health by applying principles of *hygiene, in order to prevent disease and enhance the well-being of the environment. Sanitation in the Ukrainian SSR was governed from Moscow,

with delegated authority to the republic, municipal, and rural levels. In theory *public health measures were to address separately industrial sanitation, sanitation of the home and community, radiation sanitation, food sanitation, and sanitation of schools. Some of these programs were carried out by *sanitary-epidemiological stations, but there was no identifiable government regulatory organ to take responsibility or control. In theory Soviet sanitary legislation also provided for the sanitary protection of water reservoirs, air, soil, and borders.

In reality there has been a certain amount of difficulty in obtaining an accurate assessment of the sanitation situation in Ukraine. Since the Chernobyl catastrophe and with the implementation of economic reforms, Ukraine is beginning to acknowledge that there are enormous problems in cleaning up the environment and the country's establishments. Among others the Green Party of Ukraine is putting forward as its platform an ecologically clean, nuclear-free Ukraine.

Sanok. See Sianik.

Santa Catarina. One of the southern states of Brazil (1990 pop 4,461,400), bordering on Paraná to the north and Rio Grande do Sul to the south, and occupying 95,318 sq km. Its capital is Florianópolis. Estimates of the number of Ukrainians in the state range from 14,000 to 35,000 and make it the second- or third-largest region of Ukrainian settlement in Brazil. Two hundred families established the state's first Ukrainian settlement, in Iracema in 1886. They were joined by additional waves of settlers, who established new communities in Itaiópolis, Papanduva, Canoinhas, Jangada, Tres Barras, Costa Carvalho, Moema, and Mafra. They faced pioneering difficulties comparable to those of Ukrainians in other areas of Brazil, with an added problem of social unrest caused by a boundary dispute with Paraná. Organized religious life started in 1897, when the Catholic priest I. Voliansky undertook missionary work in the Itaiópolis region. He was followed by Basilian priests in the early part of the century. An Orthodox church was established in Marco Cinco in Jangada. Civic institutions started with the establishment of branches of the Prosvita society in the early part of the century. (See also *Brazil.)

Santsevych, Anatolii [Sancevyč, Anatolij], b 23 June 1924 in Kostroma (now part of Kremenchuk), Poltava gubernia. Soviet historian and historiographer. He graduated from Kiev University (1952; PH D, 1969) and worked as a senior research associate at the Scientific Research Institute of Pedagogy of the Ukrainian SSR (1955–61) and the AN URSR (now ANU) Institute of History (from 1961; deputy

director in 1979–83 and professor from 1982). In 1981 he also became director of the Institute of History's Department of Bibliographic Studies and Auxiliary Historical Disciplines. He was on the editorial board of *Ukraïns'kyi istorychnyi zhurnal* (1962–88; assistant editor in 1962–4 and 1967–72). He published works in historiography, bibliographic studies, the pedagogy of history, and general history.

A Ukrainian Orthodox church in São Paulo

São Paulo. A leading industrial state and the most populous state in Brazil (1991 pop 33,069,900), occupying 248,256 sq km in the southeastern part of the country. Its capital is São Paulo. The Ukrainian community, numbering approx 30,000, is the second largest in Brazil, after Paraná. Most of the Ukrainians live in São Paulo or São Caetano do Sul, one of the four centers which form the São Paulo metropolitan region.

Ukrainian immigrants began arriving in the state in significant numbers during the 1890s, although most of them were simply passing through. One of the early settlements was the colony Ukraina in Rancharia, which was formed in 1926 by 40 Ukrainian families who had moved from Santa Catarina and Paraná. It was particularly notable for being a predominantly Catholic community that nevertheless invited an Orthodox priest to serve it in 1931, after several years of seeking a priest of its own denomination. The community later established a school and other organizations, but ultimately most of its members resettled once more in Nova Ukraïna in Paraná.

The scattered pockets of Ukrainian settlement in the

state achieved a focal point only after the Second World War, when Ukrainian church and community organizations were established on a firmer footing. These were centered in the capital. The Ukrainian population of São Paulo is notable for its predominantly urban character, which is in contrast to the largely agrarian character of other Ukrainian communities in *Brazil.

N. Kerechuk

Bishop Andrii Sapeliak

Andrii Sapiehin

Sapeliak, Andrii [Sapeljak, Andrij], b 13 December 1919 in Ryshkova Volia, Jarosław county, Galicia. Ukrainian Catholic bishop of Argentina. In 1937, after schooling in Jarosław and Peremyshl, he went to Rome, where he entered the Salesian order, finished his studies, and was ordained in 1949. For several years he taught in France and Italy in the minor seminary for Ukrainian youths and served as superior of the Ukrainian Salesians. He was consecrated in 1961 and sent to Argentina as apostolic visitor (to 1968), then apostolic exarch (1968–78), and finally (since 1978) bishop. A member of the synod of the Ukrainian Catholic church since 1971, he has also served as a consultant to the Vatican commission for the codification of Eastern rite canon law.

Sapeliak, Stepan [Sapeljak], b 26 March 1951 in Rosokhach, Chortkiv raion, Ternopil oblast. Poet and dissident. He was arrested in February 1973 for raising the Ukrainian national flag in Rosokhach to mark Ukrainian independence day (22 January), and sentenced in the spring of 1974 to five years in labor camps in Perm oblast, and in Vladimir prison near Moscow, where he was active in prisoners' protests. In February 1978 he was exiled for three years to Kolyma and then the Khabarovsk territory in far eastern Siberia. After his release he was forbidden to live in Western Ukraine, and lived in Leningrad oblast and the Soviet Far East before settling in Kharkiv. In the late 1980s he cofounded the Ukrainian Association of Independent Creative Intelligentsia. In 1989 his poetry collections *Bez shabli i vitchyzny* (Without a Sword and Native Land) and *Z hirkotoiu v kameni* (With Bitterness in Stone) were published in the West.

Sapieha [Sapjeha] (Sapiha, Sopiha). A Belarusian-Lithuanian family line of magnates that owned large estates in Podlachia, around Brest, and on the Buh River. They were the second most wealthy and influential family in the

Grand Duchy of Lithuania after the *Radziwiłłs. The line probably originated among the Smolensk boyars; it was formally established by Semen Sapieha, the scribe to Prince Casimir IV Jagiellończyk. The Sapiehas held high governmental and military positions through the 16th to 18th centuries in the Grand Duchy of Lithuania, the Polish Commonwealth, and the Russian Empire. Initially they were all Orthodox, but in the late 16th and early 17th centuries they converted to Catholicism. Several members of the family line played a role in Ukrainian history.

Ivan Sapieha (ca 1450–1517) served as scribe and then marshal of the Grand Duchy of Lithuania and as voivode of Vitsebsk (1511–14) and Podlachia (from 1514); he founded the town of Kodon (1511) and was the first of the family to convert to Catholicism (1514). Lev Sapieha (1557–1633) was Lithuanian chancellor (from 1589) and voivode of Vilnius (1623–33); as grand hetman of Lithuania (from 1625) he oversaw the preparation of the third *Lithuanian Statute and opposed the church union and Y. *Kuntsevych's policies. Andrii Sapieha (ca 1560–1621) held various military posts in Lithuania and was briefly voivode of Kiev (1605–9). Kazymyr Lev Sapieha (1609–56) owned estates in the Chernobyl region, served as deputy chancellor of Lithuania (from 1645), fought against B. *Khmelnysky, halting the Cossack advance on Lithuania in 1649 and in the Battle of Berestechko (1651), and briefly captured Kiev with J. Radziwiłł's forces (1651). Paweł Jan Sapieha (ca 1610–1665) was grand hetman of Lithuania; he fought against the Cossacks near Zboriv (1649), Berestechko (1651), and Suceava (1653) and elsewhere in Galicia, Volhynia, and Polisia. Lev (Leon) Sapieha (1803–78) initially served the Russian Empire; he then participated in the Polish Insurrection of 1830–1 and had to emigrate to Galicia, where he was a political and economic leader (marshal of the Galician Diet, 1861–75) and advocated the abolition of serfdom in Galicia. Adam Sapieha (1828–1903), a Galician Polish politician, advocated Galician autonomy in the 1860s.

A. Zhukovsky

Sapiehin, Andrii [Sapjehin, Andrij] (Sapegin, Andrei), b 11 December 1883 in Voznesenske, Yelysavethrad county, Kherson gubernia, d 8 April 1946 in Kiev. Botanist and selection scientist; full member of the AN URSR (now ANU). A graduate of Odessa University (1907, professor from 1917), he organized and directed the selection department at the Odessa experimental farm (from 1912), which developed into a selection station (1918) and then the All-Union Selection and Genetics Institute (from 1928). He also was a founder and rector (1919–21) of the Odessa Agricultural Institute. He served as deputy director of the Institute of Genetics in Moscow (1933–9) and vice-president of the ANU (1939–45) and director of its Institute of Botany. Sapiehin's research dealt mainly with floristics, cytology, and genetics. He made important contributions to plant breeding and developed new varieties of spring (Odessa 3 and Odessa 4) and winter (Kooperatorka, Stepniachka, and Zemka) wheat and barley (*Pallidum* 32).

Sapiezhko, Kyrilo [Sapježko], b 18 March 1857, d 1928 in Kishinev, Moldavia. Surgeon. A graduate of Kiev University (1884), he taught there (1889–1901) and at Odessa University (1902–19). In 1906 he was elected chairman of the Sixth Conference of Russian Surgeons in Moscow. From 1919 he lived in Kishinev. His publications dealt

with the surgical treatment of cancer and stomach ulcers and the transplantation of the mucous membrane. He proposed a new operation for umbilical hernia.

Sapitsky, Viktor [Sapic'kyj], b 1 August 1889 in the Kiev region, d 9 June 1942 in Poděbrady, Czechoslovakia. Lawyer and co-operative leader. As a student he was active in Ukrainian revolutionary organizations. During the period of Ukraine's independence he directed the Credit Bureau of the UNR Ministry of Finance. From 1922 he lectured on producer and farming co-operatives at the Ukrainian Husbandry Academy in Poděbrady. He helped edit *Ukrains'kyi inzhener* and *Ukrains'kyi ekonomist* and contributed articles and reviews to those journals.

Sapolovych, Yakiv [Sapolovyč, Jakiv], b 1760 in Sribne, Chernihiv regiment, d 26 August 1830 in St Petersburg. Surgeon. A graduate of the Kievan Mohyla Academy (1772–8) and of hospital schools in Kronstadt and St Petersburg (1778–83), he invented new versions of surgical instruments for army doctors. He was the first to use percussion in the Russian Empire. He was a professor of surgery at the St Petersburg Medico-Surgical School (from 1790), a member of the Medical Collegium (1795–1804), and director of the St Petersburg Medical Instruments Plant (1796–1829). He died fighting a cholera epidemic.

Sapozhnikov, Leonid [Sapožnikov], b 29 April 1906 in Pavlohrad, Katerynoslav gubernia. Fuel technologist; corresponding member of the USSR (now Russian) Academy of Science from 1946. He graduated from the Dnipropetrovske Mining Institute (1930) and headed a laboratory of the Institute of Fossil Fuels of the USSR Academy of Sciences (1937–61). Then he worked for the USSR State Planning Committee. His scientific contributions deal with coal classification and coal coking.

Sarabei, Oleh [Sarabej], b 3 October 1933 in Ordzoni-kidze, North Ossetia ASSR. Physicist. After graduating from Rostov University in 1955 he joined the AN URSR (now ANU) Institute of Physics in Kiev, where he subsequently became head of the Division of Solid State Electronics. His principal contributions concern the electronic structure of the solid state.

Sarafinchan, Lillian [Sarafinčan], b 17 April 1935 in Vegreville, Alberta. Painter and film production designer of Ukrainian origin. She studied at the Ontario College of

Lillian Sarafinchan: *Orchestration* (watercolor and ink, 1983)

Art in Toronto. In her swirling abstract compositions she explores the interaction of colors and properties of paint by letting the pigments run. The overall surface design is in the tradition of abstract expressionist painting, but the rhythmic patterns and dancing hues are evocative of music without lyrics (eg, her series 'Orchestration'). Sarafinchan has worked on several television and film productions as an art director, and in 1987 she received a Genie Award for best art direction in the film *Dancing in the Dark*.

Bohdan Saramaga

Saramaga, Bohdan, b 1 April 1905 in Ternopil, Galicia, d 10 April 1975 in Detroit. Conductor, violinist, teacher, and composer. In 1927 he graduated from the Lviv Conservatory in the theory and conducting class of A. Soltys. He worked as concertmaster and conductor in various theaters, including Besida in Lviv, the Tobilevych in Stanyslaviv, and the Franko in Ternopil, where he also served as artistic director in 1939–44. He subsequently emigrated to Germany, where he was a violinist in the Munich Radio Orchestra (1949). From 1950 he lived in Detroit, where he worked as a teacher at the Ukrainian Music Institute of America. His compositions include stage music, cantatas to texts by T. Shevchenko and P. Tychnyna, and numerous songs.

Sarata. VII-10. A town smt (1986 pop 6,100) on the Sarata River and a raion center in Odessa oblast. It was founded in 1822 by German colonists at the site of the former Tatar settlement of Hura-Kuruder. Part of Bessarabia, it belonged to the Russian Empire in the 19th century and Rumania in 1918–40; then it became part of Ukraine. Sarata is known for its wineries.

Sarata River. A waterway that flows through Moldova and Odessa oblast into Lake Sasyk. It is 119 km long and drains a basin area of 1,250 sq km. Sections of the river are used for irrigation, although its upper course dries out in the summer.

Saratov oblast. An administrative territory set up in the RSFSR on 5 July 1936. Its area is 100,200 sq km, and its 1989 population was 2,686,000, of which 74 percent was urban. The oblast is divided into 38 raions, 17 cities, and 31 towns (smt). Its capital is Saratov. According to the 1959 census, there were 106,700 Ukrainians (4.3 percent of the population) in Saratov oblast, of whom 44,500 specified Ukrainian as their native language. The actual number of

Ukrainians in Saratov oblast is probably higher. According to the more reliable 1926 census, there were 237,000 Ukrainians (7 percent of the population) in the region, 80 percent of whom were fluent in Ukrainian.

Sarbei, Vitalii [Sarbei, Vitalij], b 30 January 1928 in Yanchehrad (now Kamianske), Zaporizhia okruha. Historian. After graduating from Kharkiv University in 1951, he taught history in secondary school. Having completing graduate studies at the AN URSR (now ANU) Institute of History (1956), he joined its staff as a research associate. Since 1978 he has chaired a department there. He has written numerous articles and 16 monographs, including *Istorični pohliady O.M. Lazarevs'koho* (The Historical Views of O.M. Lazarevsky, 1961) and *Istoriia Ukraïny v dozhovtnevi bil'shovyts'kii presi* (The History of Ukraine in the Pre-October Bolshevik Press, 1986).

The building of the Shevchenko Scientific Society in Sarcelles

Sarcelles. A town (1989 pop 58,000) in the department of Val d'Oise in France, 17 km north of Paris. Since 1951 it has been the headquarters of the West European section of the *Shevchenko Scientific Society (NTSh). The society has a library of 20,000 titles and served as the editorial office of *Entsyklopediia Ukraïnoznavstva*. The Ukrainian Students' Aid Commission (1951–82), a representation of the Ukrainian Free University (until 1980), and the Ukrainian Christian Movement were also located there. The town has served as the publishing center of *Visti iz Sarseliu*, *Visti NTSh v Evropi*, and other publications. V. *Kubijovyč, O. Kulchytsky, Z. Kuzelia, O. Shulhyn, and other scholars affiliated with the NTSh are buried in a special section of the local cemetery.

Sardines (*Sardina*, *Sardinella*, *Sardinops*; Ukrainian: *sardyny*). The common name for fish of the family Clupeidae and other small (to 30 cm long) herringlike fish. Sardines are eaten fresh, salted, smoked, or canned in oil or tomato or mustard sauce; some are used as animal feed or for oil production. In Ukraine the Atlantic sardine (*Sardina pilchardus*) and *Sardinella aurita* are found in the Black Sea. (See also *Fishing industry.)

Sarkil or **Sarkel**. A fortified Khazar city built in the 830s on the lower Don River. Standing at the crossing of the major trade routes over the Don, Sarkil quickly developed into a trade center with a mixed Khazar, Bulgar, and Oghuz population. It was captured by Sviatoslav I Ihorvych in 965 and converted into an outpost of Kievan Rus' called Bila Vezha. Threatened by the Cumans, the city was abandoned by Rus' in 1117. The remains of Sarkil were studied in 1934–6 and 1949–51 by M. Artamonov.

Sarmatia. The name used by ancient and medieval writers to designate eastern and central Europe, which was occupied by Sarmatians in the later part of the 1st millennium BC. C. Ptolemy (ca 90–168 AD) distinguished between European Sarmatia (between the Don and the Vistula rivers) and Asiatic Sarmatia (east of the Don and the Sea of Azov). On M. Waldseemüller's (1513) and B. Wapowski's (1526) maps of eastern Europe, in Polish (J. Długosz, Maciej of Miechow) and Italian (O. Guanini) chronicles and travel accounts, and in humanist writings of the 16th and 17th centuries the term was used for Ukrainian and Polish territory. Polish magnates and nobles adopted the doctrine of *Sarmatyzm* in the 17th and 18th centuries, which claimed that they were descended from the ancient Sarmatians and were therefore superior to other nations. S. Velychko called the Cossacks Sarmatians, and Yu. Khmelnytsky adopted the title 'prince of Sarmatia.'

Sarmatian Sea. A sea that existed in the late Miocene epoch, around 25 million years ago. It was shallow and low in salinity, and it covered an area from the Carpathian Mountains to the Aral Sea. The sediment left by the Sarmatian Sea can still be found in southern Ukraine, Subcarpathia, and Transcarpathia.

Sarmatians (Ukrainian: *sarmaty*; Greek: *Sarmatai*; Latin: *Sarmatae*). A confederation of nomadic Iranian tribes (Aorians, *Alans, *Roxolani, Siraces, and Iazyges) related culturally to the *Scythians. Originally, in the 7th to 4th centuries BC, they were known as *Sauromatians. In the 3rd century BC the Sarmatians conquered the Scythians in the Crimea and thenceforth dominated the steppe between the Tobol River in Siberia and the Danube. Most ancient and modern scholars (eg, Polybius, Pliny, M. Vasmer, L. Zgusta) have considered the Sauromatians and the Sarmatians to be the same people, but some (eg, Strabo, M. Rostovtsev) have viewed them as distinct. Contemporary scholars (eg, K. Smirnov, T. Sulimirski) tend to view the Sauromatians as the older ethnic substratum and culture of the Sarmatians.

Having consolidated their power in northern Caucasia and the northern Pontic steppe in the 4th to 2nd centuries BC, the Sarmatians began allying themselves with the Pontic states and helped the Scythians fight the Pontic general Diophantes. In the 1st century BC they were allies of the Pontic king Mithradates VI during his war with Rome. Thereafter the northern Pontic littoral was called *Sarmatia, and it was so designated on M.V. Agrippa's map. Some Sarmatian tribes, notably the Roxolani and Iazyges, colonized what is today southern Bulgaria and Rumania and had frequent conflicts with the Romans there.

The Sarmatians gradually became sedentary after penetrating the Hellenic colonies on the Pontic littoral and set-

ting in the *Bosporan Kingdom. They took up agriculture and assimilated into local cultures there and in the forest-steppe region of Right-Bank Ukraine. Their political might was broken by the Ostrogoths in the 3rd century and the Huns in the 4th century. Some of the Sarmatians migrated west with the Huns and even reached as far as Spain and northern Africa. Those who remained behind intermingled with the indigenous Slavs and other peoples. The language of the Ossetians in northern Caucasia has preserved certain Sarmatian elements.

The initially matriarchal character of the Sarmatian culture (eg, women warriors before marriage) gradually disappeared as the tribes became more organized, the political power of the generals grew, and new military tactics, armor, weapons, and riding equipment (metal stirrups) were introduced. The Sarmatians' cult of the sword and fire was reflected in their art, jewelry, and metal ornamentation of armor and weapons.

B. Kravtsiv, A. Zhukovskiy

Sarny. II-7. A city (1989 pop 34,400) on the Sluch River and a raion center in Rivne oblast. It sprang up as a workers' settlement in 1885, when the Rivne–Luninets railway line was built. Before the First World War the town belonged to Lutske county, Volhynia gubernia. In the interwar period it was under Polish rule, and in 1939 it became part of the Ukrainian SSR. Today the city is an industrial and transportation center. Its main industries are machine building and metalworking, building materials, woodworking, and flax processing.

Rev Klyment Sarnytsky

Sarnytsky, Klyment Karol [Sarnyc'kyj], b 1832, d 1909. Basilian priest and church activist. He taught biblical studies at Lviv University (from 1867) and served several terms as dean and rector of theology. In 1867 he was also appointed hegumen of St Onuphrius's Monastery in Lviv.

He oversaw the reform of the Basilian order in the Galician province by the Jesuits in 1882–1904, and in 1902 he was appointed archimandrite. Sarnytsky wrote a Hebrew grammar textbook in Polish, an elucidation of the Psalms and other biblical songs, and various other religious scholarly works.

Sartana. See Pymorske.

Sasiv. IV-5. A village (1971 pop 700) on the Buh River in Zolochiv raion, Lviv oblast. In 1615 Komarove was renamed Sasiv and granted the rights of *Magdeburg law. In 1675 the town was burned down by the Tatars, and it never recovered its former status. In the 19th century the village became known as a health resort. It is the home of the wooden St Nicholas's Church (1731), which contains a famous iconostasis painted by masters of the Zhovkva school in 1681 and an icon from 1685 depicting the transfer of St Nicholas's relics.

Saskatchewan. A prairie province (1986 pop 1,010,198) of Canada, lying between Manitoba and Alberta and covering an area of 652,330 sq km. Its capital is Regina. Its Ukrainian population in 1981 was 100,090. In the 1991 Canadian census only 28,935 inhabitants claimed Ukrainian as their mother tongue.

The first Ukrainian colony in Saskatchewan was established in 1896 in Grenfell. In subsequent years large numbers of Ukrainian immigrants moved into bloc settlements, the largest of which were in the Yorkton–Canora–Preeceville region (eastern Saskatchewan), the Rosthern–Yellow Creek–Cudworth region (north of Saskatoon), and the Radisson–Hafford–Whitkow region (east of North Battleford). The steady influx of Ukrainian settlers peaked in 1911–14.

St John the Baptist Ukrainian Catholic Church (1926) in Smuts, Saskatchewan

The urbanization of Saskatchewan's Ukrainians is a relatively recent phenomenon. In 1921 only 10 percent lived in cities. This figure jumped from 20.5 percent in 1951 to 63.3 percent in 1981. Ukrainian urban residents are mostly

workers, small businessmen, public servants, and professionals. Ukrainians are the largest ethnic group in many rural localities, and in several dozen towns they constitute an absolute majority. Their influence is evident in the names of the localities, the style of the churches, the frequency with which the Ukrainian language and traditions are encountered, and the large number of municipal politicians of Ukrainian origin. The largest Ukrainian communities are in *Saskatoon, *Regina, and *Yorkton. These cities are the centers of Ukrainian religious and cultural life. Because they settled in compact groups, the Ukrainians of Saskatchewan have a higher rate of Ukrainian language-use than the Canadian average.

St Nicholas's Ukrainian Catholic Church (1912) near Brooksby, Saskatchewan

The largest Ukrainian church in Saskatchewan is Catholic. The Redemptorist Fathers established a monastery (1913) and press in Yorkton; later the Academy of the Sacred Heart (1917), established by the Sisters Servants of Mary Immaculate for girls, and St Joseph's College (1919), established by the Christian Brothers for boys, were opened there. In 1935 the Ukrainian Catholic Brotherhood (est 1932) set up the Sheptytsky Institute in Saskatoon. The second-largest Ukrainian church is the Orthodox church, which had 21,000 faithful in the province in 1981. Saskatoon, with its Mohyla Ukrainian Institute (est 1916), has played an important role in the history of this church. It hosted the founding conferences of the church (1918) and the Ukrainian Self-Reliance League (1927). Saskatoon is the seat of both the Ukrainian Catholic and the Orthodox eparchies. In addition it is the home base of the provincial council of the Ukrainian Canadian Congress. Even though the first Ukrainian-Canadian member of the legislative as-

Holy Trinity Ukrainian Orthodox Church (1963) in Canora, Saskatchewan

sembly in Saskatchewan, G. Dragan, was not elected until 1934, Ukrainians have played an important role in the province's political life. In 1952 A. Kuziak became the first Ukrainian to be appointed to a provincial cabinet. In 1956 M. Fedchuk Batten was elected to the provincial legislature, the first woman of Ukrainian origin to win a seat. *Worobetz served as the province's lieutenant governor in 1969-75, and S. Fedoruk has served since 1988. R. *Romanow served as deputy premier and as minister of inter-governmental affairs under A. Blakeney (1971-82), succeeded him as leader of the New Democratic party, and became premier of Saskatchewan in 1991. R. *Hnatyshyn, a Conservative MP from Saskatchewan, was a federal cabinet minister (1979-88) and was appointed Governor-General of Canada in 1990.

Ukrainians in Saskatchewan, 1911-81
(in thousands)

| Year | Ukrainians | % of total population |
|------|------------|-----------------------|
| 1911 | 22.3 | 4.5 |
| 1921 | 28.1 | 3.7 |
| 1931 | 63.4 | 6.9 |
| 1941 | 79.8 | 8.9 |
| 1951 | 78.4 | 9.4 |
| 1961 | 78.9 | 8.5 |
| 1971 | 85.9 | 8.1 |
| 1981 | 76.8 | 8.0 |

The province passed the Multiculturalism Act in 1974, and in 1978 amended the Education Act to allow for bilingual (including Ukrainian-English) education; passage of the latter has resulted in the launching of a Ukrainian-English school program in Saskatoon.

G. Foty

Saskatoon. The second-largest city (1992 pop 186,058) in Saskatchewan, situated on the South Saskatchewan River. It is the province's chief education, food-processing, mining, and manufacturing center. Of its residents 19,825 identified themselves as of Ukrainian origin in 1981; they constitute the province's largest Ukrainian community. In 1991 only 5,245 inhabitants claimed Ukrainian as their mother tongue. The first group of Ukrainian immigrants

The first building of St George's Ukrainian Catholic Cathedral and rectory and the Prosvita hall in Saskatoon

arrived in Saskatoon in 1898. The earliest Ukrainian institutions were religious: the Ukrainian Catholic parish of St George, which in 1951 became the seat of the Saskatoon eparchy, arose in 1912, and the Orthodox Church of the Holy Theotokos's Induction into the Temple was established in 1916. The city became an important center for Ukrainian Orthodoxy: the *Ukrainian Orthodox Church of Canada (1918), the *Ukrainian Women's Association of Canada (1926), and the *Ukrainian Self-Reliance League (1927) were founded there. In 1963 the Orthodox parish of the Holy Trinity (est 1918) became the seat of Saskatoon eparchy. Since 1929 the city has been an important center of the Ukrainian Evangelical Baptist church, and since 1945 of the Ukrainian Mission and Bible Society. The *Mohyla Ukrainian Institute (est 1916) and the Catholic Shashkevych Student Residence (est 1935), which was reorganized into the *Sheptytsky Institute in 1953, have educated generations of Ukrainian community leaders. The first Ukrainian language and literature courses at a Canadian university were taught by T. Pavlychenko at the University of Saskatchewan in 1944, and the first Canadian Slavic studies department was formed at the university by C. *Andrusyshen in 1945. Since 1977 the same university has had an exchange program with the University of Chernivtsi in Ukraine. A branch of the Ukrainian National Federation was set up in 1932, and the federation's national office was located in Saskatoon (1934-40). Its paper *Novyi shliakh* was published there in 1933-41. The Ukrainian Students' National Federation (1933) and the Ukrainian National Youth Federation (1934) were founded in Saskatoon. In 1939 the first Ukrainian credit union in Canada, the New Community Savings and Credit Union, was organized there. The Ukrainian Museum of Canada (est 1936) has its main branch housed in a modern structure with several exhibition galleries. A Catholic eparchial museum is also situated in the city. Saskatoon is the home of several notable Ukrainian performing ensembles, including the Yevshan Ukrainian Folk Ballet, Pavlychenko Folklorique Ensemble, and the Vesna and Lastivka youth choruses. It also hosts a Ukrainian festival (Vesna) in the spring as well as a multiethnic festival (Folkfest) in the summer. A bilingual Ukrainian-English program has been offered at St Goretti School since 1979.

G. Foty

Sasyk Estuary (Sasyk lyman; also Kunduk Lake). VIII-10. A shoreline lake in the southern part of Odessa oblast

along the Black Sea coast. Varying in width from 3 to 12 km, the lake is approx 29 km long and has a surface area of 210 sq km. Although the Kohlynyk and the Sarata rivers flow into it, the Sasyk was long a saltwater lake because of the seepage of Black Sea water into it. Its salinity commonly reached 19-20 per cent in the summer. In 1980 the Sasyk was turned into a freshwater lake with the construction of a canal from the Danube and a 14-km dam to separate it better from the Black Sea. The lake is now used for irrigation.

Sasyk Lake (Sasyk ozero). VIII-14. A salty shoreline lake in the Crimea east of Yevtaporiia. It is 14 km long, up to 9 km wide, and up to 1.2 m deep and has a surface area of 75.3 sq km. It is separated from the Black Sea by sand and gravel deposits up to 1.7 m in height. Nevertheless, since it is fed by groundwater, a certain amount of seawater seeps into the lake. The lake's water level drops in the summer, and deposits of salt are left behind.

Satanovsky, Arsenii. See Koretsky-Satanovsky, Arsenii.

Satire. A literary or artistic mode of ridicule of an individual person, a group, ideas, or society at large, through the use of hyperbole, the grotesque, parody, or irony. In art caricature is employed for the purpose of satire. Since classical times satire has existed in two major strains, the Horatian, which mildly mocks human foibles and frailties, and the Juvenalian, which expresses moral displeasure and indignation at human vices.

In Ukraine some satire appears in folk songs from the earliest times, but in literature satire developed in the 16th and 17th centuries as an effective weapon in the *polemical literature of the time, especially in that of I. *Vyshensky. Some satiric elements were present in the *intermedes of *school and *vertep dramas in the 17th and 18th centuries. In the 18th century, samples of sociopolitical satire of the Horatian tradition appeared: the carol '1764 hoda dekabria 23 dnia k. R.' (1764 Year December 23 day k. R.) by an anonymous author; the 'lampoon verses' by Ieremiia, a monk of the Kievan Cave Monastery, 'Plach kievskikh monakhov' (The Lament of Kievan Monks, 1786) and 'Pribavok k plachu kievskikh monakhov' (Addendum to the Lament of Kievan Monks, 1792); and the dialogue 'Zamysl na popa' (A Design against the Priest), ascribed to I. Nekrashevych. Some satiric elements are to be found in the tales and poems of H. Skovoroda. Likewise, I. Kotliarevsky's *Eneida* (Aeneid, 1798) satirized contemporary mores.

Satire through irony and sarcasm is found in many of T. Shevchenko's poems, or in parts of poems ('Ieretyk' [Heretic], 'Kavkaz' [Caucasus], 'I mertvym, i zhyvym ...' [To the Dead and to the Living ...], 'Neofity' [Neophytes], 'P.S.' 'Iurodyvyi' [The Holy Fool], 'Vo Iudei vo dni ony' [In Judea Long Ago], 'Molytva' [A Prayer], 'Himn chernychyi' [Nuns' Hymn], and 'Saul'). His long poem 'Son' (A Dream) is a political satire, a 'comedy' bordering on the sardonic. Elements of satire can be found in Shevchenko's followers and predecessors, in the fables and proverbs of P. Hulak-Artemovsky, Ye. Hrebinka, and L. Borovykovsky and especially in the *Spivomovky* (Singing Rhymes) of S. Rudansky. Some Horatian satire can be found in works of the second half of the 19th century, such as 'Baba Paraska ta Baba Palazhka' by I. Nechui-Levytsky, 'Lovy' (The

Hunt) by P. Myrny, 'Smikh' (Laughter), 'V dorozhi' (On the Way), and 'Koni ne vynni' (Horses Are Not to Blame) by M. Kotsiubynsky, some stories by S. Vasylchenko and L. Martovych, and some comedies of M. Kropyvnytsky and M. Starytsky. Political satire was often used by I. Franko ('Svyns'ka konstytutsiia' [The Swinish Constitution], *Lys Mykyta* [Fox Mykyta], and various poems).

At the beginning of the 20th century satire appeared in the poems of V. Samiilenko, O. Oles (the collection *Perezva* [The Postwedding Party, 1921]), and O. Makovei (the collection *Pryzhmurenym okom* [Through a Squinting Eye, 1923]). After the Revolution of 1917 the populist satirical traditions of the 19th century were continued by Yu. Vukhnal, Yu. Gedz (pseud of O. Savytsky), and V. Chechviansky (all repressed in the 1930s). A special place in satiric literature belongs to O. *Vyshnia (*Usmishky*, 4 vols [Smiles, 1928]). Highly satiric were some of the later stories of M. Khvylovy ('Redaktor Kark' [Editor Kark], 'Ivan Ivanovych,') and some passages of his pamphlets, in their attacks on cultural backwardness and pseudo-enlightenment (*prosvitianstvo*), took on the sarcastic, often sardonic tone of Juvenalian satire.

Satire like all other art forms was of poor quality from the 1930s to the 1960s. Most of the satiric works written, by authors such as D. Bilous, S. Voskrekasenko, P. Kliuchyna, O. Kovinka, Ye. Kravchenko, and S. Oliinyk, were tendentious in the spirit of Party decrees; those of Ya. Halan, Yu. Melnychuk, S. Tudor, and others were defamatory in their attacks on Ukrainian nationalists. True satire revived in the 1960s in some of the poetry of V. *Symonenko, I. Drach, V. Korotych, A. Kosmatenko, and even L. Kostenko. Of interest are the satiric works of the Shevchenko scholar Yu. *Ivakin through to the 1970s. Bitter satire on the realities of the Soviet world is found in the works of repressed dissident authors, such as V. Moroz ('Reportazh iz zapovidnyka imeny Berii' [Report from the Beria Reserve, 1968; trans 1974]) and M. Osadchy (*Bil'mo* [Cataract, 1971]; trans 1976), as well as in some poems of S. Karavansky, I. Kalynets, and others.

In Western Ukraine between the two world wars satire appeared in the feuilletons of T. Horobets (pseud of S. Charnetsky) and R. Kupchynsky. Among émigrés in the West, authors such as E. Kozak (*Hryts' Zozulia*, 1972), I. Kernytsky (*Budni i nedilia* [Weekdays and Sunday, 1973]), M. *Ponedilok, M. Tochylo (M. *Koliankivsky), B. Nyzhankivsky-Babai (*Virshi ironichni, satyrychni i komichni* [Poems Ironic, Satiric, and Comic, 1959]), and Z. Kohut (*Kul'turni arabesky* [Cultural Arabesques, 1969]) continue in the satiric vein, targeting the life of Ukrainians in their new countries of residence. (See also *Humoristic and satiric press.)

B. Kravtsiv, D.H. Struk

Satsiuk, Oleksii [Saciuk, Oleksij], b 18 October 1909 in Volhynia, d 3 April 1960 in Chicago. Writer and commu-

nity figure. After studying law at Lviv University he practiced law in Volodymyr-Volynskyi and Dubno in the 1930s. As a postwar émigré he coedited the journal *Litavry* in Salzburg, Austria, and headed the Association of Ukrainian Scholars, Writers, and Artists in Buenos Aires. He emigrated to Chicago in 1958, where he worked as an editor for the journal *Ovyd* and the M. Denysiuk publishing house. His works were published in émigré periodicals and separately as the story collection *Kolosky* (Grain Spikes, 1947), the novels *Smertonostsi* (Bearers of Death, 1947) and *Zlat-zholud'* (The Gold Acorn, 1951), and the plays *Skrypka na kameni* (A Violin on a Rock, 1952) and *U tsarstvi Okha* (In Okh's Realm, 1963).

Sauromatians. Nomadic Iranian tribes that lived in the steppes beyond the Don and the Volga rivers in the 7th to 4th centuries BC. Their origins, culture, and language were similar to those of the Scythians and Sakers. Greek historians, particularly Herodotus, remarked on the central role of women in the Sauromatian society; his observations have been supported by archeological findings. The Sauromatians allied themselves with newly arrived eastern tribes in the 3rd century BC, and from then on they were known as *Sarmatians.

Bishop Nil Savaryn

Peter Savaryn

Savaryn, Nil (Neil), b 19 May 1905 in Staryi Sambir, Galicia, d 8 January 1986 in Edmonton. Ukrainian Catholic bishop. Savaryn entered the Basilian order in 1922 and was ordained in 1931. As a missionary in Alberta he taught at the Basilian monastery at Mundare and performed parish duties until 1943, when he was consecrated as Bishop V. Ladyka's auxiliary. He was named apostolic exarch for Western Canada in 1948, and he became bishop of the newly created eparchy of Edmonton in 1956. He wrote *Rolia ottsiv Vasyliianiv u Kanadi* (The Role of the Basilian Fathers in Canada, 1939) and edited *Propam'iatna knyha z nahody zolotoho iuvileiu poselennia ukrains'koho narodu v Kanadi* (The Commemorative Book on the Occasion of the Golden Anniversary of Ukrainian Settlement in Canada, 1941). As a participant in the Second Vatican Council Savaryn supported the Ukrainian Catholic patriarchate movement.

Savaryn, Peter (Petro), b 17 November 1926 in Zubrets, Buchach county, Galicia. Lawyer and community leader. He emigrated to Canada in 1949 and graduated from the University of Alberta in 1956. He became a stalwart sup-

porter of the Progressive Conservative party (PC) and served as president of the Alberta PC association and Alberta vice-president for the national association. He was instrumental in the establishment of the Ukrainian-English bilingual school program in Alberta, the *Canadian Institute of Ukrainian Studies, the Canadian Foundation for Ukrainian Studies (president, 1979–83), and the Edmonton-based Heritage Savings and Trust Company. He was a member of the board of governors and of the senate at the University of Alberta (1972–8) as well as the university's chancellor (1982–6). In 1983–8 he was president of the *World Congress of Free Ukrainians. Savaryn was appointed a Queen's Counsel in 1974 and was awarded the Order of Canada in 1987.

Savchak, Demian [Savčak, Dem'jan], b 13 July 1847 in Nowa Wieś, Nowy Sącz county, Galicia, d 29 December 1912 in Lviv. Judge and civic leader. A graduate of Lviv and Cracow (LLD) universities, he was an executive member of the National Democratic party, a deputy to the Galician Diet, and a member of the Galician provincial executive for twelve years (1889–1901). He used his public office to promote the development of Raiffeisen credit cooperatives in Galicia. He was also a founding member and the first director of the *Dnister credit union and a member of the audit committee of the Provincial Audit Union. After losing his seat in the Diet he was appointed to the provincial court in Lviv. Upon retirement he opened his own law office in Borschiv and was elected deputy marshal of the county council.

Savchak, Volodymyr [Savčak], b 25 May 1911 in Berezhany, Galicia. Painter. In the late 1930s he studied at the Vilnius Academy of Arts. A postwar refugee, since 1948 he has lived in Australia, where he worked as an art teacher. He has painted portraits of Ukrainian historical figures, Australian landscapes (eg, *Morning in Brisbane*), and icons. Ten solo shows of his work have been held in Australia, and several in North America.

Savchenko, Fedir [Savčenko] (Savtchenko, Théodore), b 1892 in the Poltava region, d ? Historian; member of the Shevchenko Scientific Society from 1927. After graduating from the Nizhen Institute of History and Philology he continued studying history, sociology, ethnology, and Romance philology in Paris (from 1914) and became a professor of Russian at the Ecole supérieure de commerce et d'industrie de Paris. In 1918, with E. Denis and A. Thomas, he founded the Cercle d'Etudes Franco-Ukrainiennes and edited its organ, *La France et l'Ukraine*. He also wrote a number of pamphlets, including *L'Ukraine et la question ukrainienne* (1918). In 1919 Savchenko was in charge of the UNR press bureau at the Paris Peace Conference. His contacts with the émigré Ukrainian Party of Socialist Revolutionaries and with M. Hrushevsky assisted him in arranging his return to Ukraine in 1925. In Kiev he worked in the historical section of the VUAN, as director of its Commission of Western and American Studies and Commission of Western Ukraine. He was also the secretary of the socioeconomic section of the VUAN Institute of the Ukrainian Scientific Language and a member of the Commissions for Cultural and Historical Songs and of Modern Ukrainian History. He was also secretary of the journal *Ukraina* and a corresponding scholar in the Cabinet of Primitive Culture.

Savchenko wrote over 50 articles and monographs, most of which were published by the VUAN in *Ukraina* and in *Za sto lit*. He wrote about French-Ukrainian cultural ties and the Cossackophilism of P. Mérimée (1925), H. de Balzac in Ukraine (1924), T. Shevchenko in the unpublished correspondence of O. Bodiansky (1930), and on ethnography (a collection of Ukrainian songs from 1827 to 1927, 1927–8). His monograph *Zaborona ukraïnstva 1876 r.* (1930) was republished in the Harvard Series in Ukrainian Studies as *The Suppression of the Ukrainian Activities in 1876* (1970). Savchenko was arrested and imprisoned in 1931, and perished in the Stalinist terror.

A. Zhukovsky

Ihor Savchenko

Savchenko, Ihor [Savčenko], b 11 October 1906 in Vinnytsia, d 14 December 1950 in Moscow. Film director and educator. After completing theater school in Vinnytsia (1921) he worked as an actor and director in various theaters and then studied at the Leningrad Institute of Scenery Art (1926–9). He apprenticed in the Baku Theater of Working Youth, where he acted in N. Shengelaia's film *Dvadtsat'shest' kommissarov* (Twenty-six Commissars, 1932) and produced the agitprop film *Liude bez ruk* (People without Arms, 1931). In Moscow he directed the movie *Garmon* (The Accordion, 1934) and *Duma o kazake Golote* (Duma about the Cossack Holota, 1937). From the late 1930s Savchenko became a proponent of the heroic-romantic cinema genre. In the Kiev Artistic Film Studio he directed *Vershnyky* (Riders, 1939, based on Yu. Yanovsky's novel), *Bohdan Khmel'nyt'skyi* (1941), *Partyzany v stepakh Ukrainy* (Partisans in the Ukrainian Steppes, 1943, based on O. Korniiichuk's play), and *Taras Shevchenko* (1950). He taught in the Moscow State Institute of Cinema from 1946. A biography, by I. Korniienko and M. Berezhny, was published in Kiev in 1963.

Savchenko, Ivan [Savčenko], b 2 March 1862 in Romen county, Poltava gubernia, d 3 November 1932. Pathologist and microbiologist. A graduate of Kiev University (1888), he worked there and in I. Mechnikov's laboratory at the Pasteur Institute (1895). He was a professor at Kazan University (1896–1919) and later at Kuban University (1920–32). In Kazan he also worked at the local bacteriological institute, and in Krasnodar he directed the Kuban Chemo-Bacteriological Institute. In 1905 he prepared an anti-scarlet fever serum, which was widely used in Russia and abroad. In the Kuban he organized efforts to control infectious diseases, such as scarlet fever, malaria, and typhus. He wrote scientific works on infectious diseases, immuni-

ty, phagocytosis, leprosy, cholera, anthrax, typhus, rheumatism, and pneumonia. With D. Zabolotny he performed the first enterovaccination experiment: after taking a vaccine by mouth, he swallowed a live culture of cholera.

Savchenko, Kostiantyn [Savčenko, Kostjantyn], b 27 December 1910 in Kherson, d 26 November 1956 in Odessa. Astronomer. A graduate of the Kherson Institute of People's Education (1927), he worked at Kharkiv University (1927–40) and Odessa University (from 1944) and specialized in cosmology, cosmogony, and gravitation theory.

Savchenko, Mykhailo [Savčenko, Myxajlo], b 6 June 1914 in Hlobyne, Kremenchuk county, Poltava gubernia, d 12 August 1982. Playwright and actor. He graduated from the Kharkiv Music and Drama Institute (1938). He performed at the Kharkiv (1938–41) and Kiev (1945–9) Ukrainian drama theaters and was director of the republican Building of Litterateurs. His first play, *Pravo na shchastia* (The Right to Happiness), was published in 1957. He published several collections of plays, *Rozplata za dovir'ia* (Payment for Trust, 1959), *Shliakhy do shchastia* (Roads to Happiness, 1962), *P'iesy* (Plays, 1967), *Travnevi hrozy* (May Storms, 1973), and *Hippokraty* (Hippocrateses, 1983). Published separately were his plays *Lastivka* (The Swallow, 1961), *Prohnozy* (Prognoses, 1962), *Syny Hippokrata* (Hippocrates' Sons, 1962), *Chest'* (Honor, 1963), *Mii syn* (My Son, 1969), and *Proshu vstaty!* (Please Rise!, 1971).

Savchenko, Mykola [Savčenko], b 19 December 1903 in Korsun (now Korsun-Shevchenkivskyyi), Kaniv county, Kiev gubernia, d 16 March 1985 in Voroshylovhrad (now Luhanske). Plant selection scientist. A graduate of the Maslivka Institute of Selection and Seed Cultivation (1927), he worked at the Mliiv Orcharding Research Station (1927–30) and the Voroshylovhrad Agricultural Institute (1935–75, as department head; 1975–80, as professor and consultant). His research dealt mainly with the selection of fruit-bearing plants.

Savchenko, Pavlo [Savčenko], b 28 July 1887 in Zhabky (now Lutsenky), Lohvytsia county, Poltava gubernia, d 1920 in Romen, Poltava gubernia. Symbolist poet; brother of Ya. Savchenko. A graduate of the Poltava Teachers' Seminary, he taught in Krovne (1908–10), Velyka Pysarivka (1910–12), and Derkachy (1912–14, 1918–19), in Kharkiv gubernia. From 1909 his poems and prose-poems appeared in various periodicals. He wrote the collection *Mii smikh, moia zaduma: Epilohy* (My Laughter, My Melancholy: Epilogues, 1913) and a collection in Russian, *Penie pul'* (The Singing of Bullets, 1916).

Savchenko, Stepan [Savčenko], b 28 December 1889 in Syniavka, Sosnytsia county, Chernihiv gubernia, d 16 January 1942 in Tashkent, Uzbekistan. Literary scholar and educator. A graduate of Kiev University (1913), from 1917 he taught foreign literature and Romance philology there. He wrote books in Russian on the Russian folktale (1914) and on the origin of the Romance languages (1916). In the 1920s he published articles and reviews of Western literature in *Zhyttia i revoliutsiia*. He edited, with introductions, Ukrainian editions of works by A. France (1925), R.

Rolland (1927), and G. de Maupassant (10 vols, 1927–30), French 17th-century classics (1931), and other foreign works. A book of his selected writings on foreign literature was published in Kiev in 1975.

Col Volodymyr Savchenko

Yakiv Savchenko

Savchenko, Volodymyr [Savčenko], b 1882, d 18 November 1957 in the United States. Senior army officer. He served in various staff positions in the UNR Army, including chief of staff of the Katerynoslav Republican Kish and of the Eighth Zaporozhian Divisions in 1919 and acting first quartermaster general of the UNR Army in 1920. He attained the rank of colonel. During the interwar period he lived in Poland and contributed articles on recent military history to *Za derzhavnist'*, *Tabor*, and other periodicals. After the Second World War he emigrated to the United States.

Savchenko, Yakiv [Savčenko, Jakiv] (pseud: Ya. Mozheiko), b 2 April 1890 in Zhabky (now Lutsenky), Lohvytsia county, Poltava gubernia, d 2 November 1937. Symbolist poet and literary critic. He studied at Kiev University and taught for a time in Sumy county. He began publishing poetry in Ukrainian periodicals in 1913. Published separately were his collections *Poezii* (Poems, 1918) and *Zemlia* (Earth, 1921). He evolved from *symbolism, as a member of the group Muzahet, and became a leading member of the writers' groups *Zhovten and the *All-Ukrainian Association of Proletarian Writers. From 1918 on he published literary and film criticism in *Mystetstvo*, *Zhyttia i revoliutsiia*, *Nova generatsiia*, and other Soviet Ukrainian journals; some of it was reprinted in his books *Poety i beletristy* (Poets and Belletrists, 1927), *Doba i pys'mennyk* (The Age and the Writer, 1930), and *Narodzhennia ukrains'koho radians'koho kino: Try fil'my O. Dovzhenka* (The Birth of Ukrainian Soviet Cinema: Three Films by O. Dovzhenko, 1930). In the *Literary Discussion of the 1920s he expounded the Party line and spoke out against the positions of M. Khvylovy and M. Zerov; his views were expressed in the polemical books *Aziats'kyi apokalipsis* (The Asiatic Apocalypse, 1926) and *Protiv restavratsii hreko-ryms'koho mystetstva* (Against the Restoration of Greco-Roman Art, 1927). He was arrested during the Stalinist terror in 1937 and executed.

Savchenko, Yurii [Savčenko, Jurij], b 1908? in Poltava gubernia, d ? Literary scholar and critic; associate of the Taras Shevchenko Scientific Research Institute in Kharkiv in the 1920s. In the 1920s and 1930s he wrote articles about contemporary writers and a brochure on the history of T. Shevchenko's grave (1929) and edited an edition of H. Kvitka-Osnovianenko's works. He was arrested in 1934 and incarcerated in a Soviet labor camp, where he most likely perished.

Gen Volodymyr Savchenko-Bilsky

Mykola Savchuk

Savchenko-Bilsky, Volodymyr [Savčenko-Bil's'kyj], b 27 July 1867 in Olyshivka, Chernihiv county, d 21 September 1955 in Abondant, France. Senior naval officer. A commissioned officer of the Russian Black Sea Fleet, in 1917 he joined the Ukrainian armed forces and helped organize and manage the UNR Ministry of the Navy. He commanded the naval officer school in Kamianets-Podil'skyi (1919) and directed the chancellery of the Ministry of the Navy (1919–20). He was promoted to rear admiral. In the interwar period he lived in Poland and then France and contributed articles to *Tabor*, *Ukraïns'kyi invalid*, and *Za derzhavnist'*.

Savchuk, Mykola [Savčuk], b 16 December 1899 in Zubivshchyna, Iziaslav county, Volhynia gubernia, d 16 February 1976 in Odessa. Zoologist; corresponding member of the AN URSR (now ANU) from 1948. A graduate of the Odessa Institute of People's Education (1930), he taught at medical, agricultural, and food-processing institutes in Odessa (1930–5) and at Odessa University (1934–48, rector from 1939). He was minister of education of the Ukrainian SSR (1948–9). His main research was in experimental biology, including regeneration, transplantation, and helminthology. He wrote *Zoolohiia bezkhrbetnykh* (The Zoology of Invertebrates, 1954).

Savchuk, Oleksii [Savčuk, Oleksij], b 30 March 1912 in Fediukivka, Zvenyhorodka county, Kiev gubernia. Writer and newspaper editor. Since 1947 he has published three books of sketches and stories, a book about O. Boichenko (1957), and the novels *Zelene sontse* (The Green Sun, 1962), *Hryhorii Ivanovych* (1967, about H. Petrovsky), *Misiats' liutyi* (The Month February, 1971), *Hostre pys'mo* (Sharp Handwriting, 1976), and *Vysoki khvyli* (Tall Waves, 1980, about V. Lenin in 1900–1).

Savchuk, Semen. See Sawchuk, Semen.

Stefaniia Savchuk

Savchuk, Stefaniia [Savčuk, Stefaniija] (née Herytska), b 27 March 1899 in Zolochiv, Galicia, d 19 April 1988 in Toronto. Educator and civic leader. She graduated from the Zolochiv teachers' seminary and was a member of the Society. In 1924 she emigrated to Canada, and in 1932 she organized the Ridna Shkola Olha Basarab Women's Society in Toronto, which in 1934 became a part of the *Ukrainian Women's Organization of Canada (OUK). She was an executive member of OUK for many years, and then president (1954–72) and honorary president (1972–88). At the same time she was active in the Ukrainian National Federation as a member of its executive and presidium and in the Ukrainian Canadian Committee (now Congress). She sat on the board of directors of the Ukrainian Cultural and Educational Centre, the Ukrainian Canadian Relief Fund, the Novyi Shliakh publishing house, and the Ukrainian (Toronto) Credit Union. In 1948 she was one of the founders of the *World Federation of Ukrainian Women's Organizations, and she served as its vice-president (1956–71) and president (1971–7). As a member of the Pan-American Ukrainian Conference, she helped organize the World Congress of Free Ukrainians, served on its executive (1968–71), and headed its Welfare Council (1978–83). She was active in Canadian organizations, such as the Red Cross, the Health Council of Canada, and the National Council of Women.

Savchynsky, Hryhorii [Savčyns'kyj, Hryhorij], b 1804, d 16 February 1888 in Zvenyhorod, Galicia. Greek Catholic priest and civic activist. He contributed poems, short stories, novelettes, and articles to Galician papers, such as *Slovo*, *Nedilia*, *Lastivka*, *Zoria halytska*, *Chytanka*, *Vechnytsi*, and *Dom i shkola*. His short story 'Het! het! het!' (Away! Away! Away! 1851) is a temperance story typical of the 1850s. Some of his works were published by the Kachkovsky Society.

Savchynsky, Mykola [Savčyns'kyj], b and d ? Civic activist and publicist. He was coeditor (1854–7) and then chief editor of *Zoria halytska* and its supplement *Poucheniia tserkovnyia* (Church Teachings, 1853–4). Under his editorship the journal was published in vernacular Ukrainian.

Savelov, Yoakim, b 1620, d 1690 in Moscow. Patriarch of Moscow. He entered the Mezhyhiria Transfiguration Monastery in 1655. In 1657 he became archimandrite of a

monastery in Moscow. He was consecrated metropolitan of Novgorod in 1673 and elevated to the dignity of Patriarch of Moscow in 1674. As patriarch, Savelov was particularly interested in gaining jurisdiction over Kiev metropolity from the Patriarch of Constantinople and reached an agreement on this matter with Hetman I. Samoilovych. He extended Moscow's control over the Ukrainian church by confirming the election of H. Sviatopolk-Chetvertynsky as Kievan metropolitan and establishing his authority over the metropolitan. The Patriarch of Constantinople agreed to the formal transfer of jurisdiction in 1686. Savelov repressed Westernizing Ukrainian and Belarusian churchmen and theologians in Moscow in his campaign against Western influences in church literature and education.

Savenko, Petro, b 1795, d 1843. Surgeon and ophthalmologist. A graduate of the St Petersburg Medico-Surgical Academy (1813), he specialized in surgery and ophthalmology in Germany. From 1822 he lectured at the academy on ophthalmology and surgery. His publications dealt with frostbite, burns, bladder surgery, and the mineral waters of Caucasia.

Hurii Savin

Karlo Savrych (Maksymovych)

Savin, Hurii, b 1 February 1907 in Vesegonsk, Tver gubernia, Russia, d 28 October 1975 in Kiev. Physicist, specialist in the field of mechanics; full member of the AN URSR (now ANU) from 1948. He graduated from Dnipropetrovske University (1932), became director of the ANU Institute of Mining Mechanics (1940–5), and headed various technical agencies in Lviv. He was rector of Lviv University (1945–52), vice-president of the ANU (1952–7), and chairman of the ANU Council for the Study of the Productive Resources of the Ukrainian SSR. Savin taught at Kiev University and chaired a department of the ANU Institute of Mechanics (1957–75). His main scientific contributions were in the field of the strength of materials and in the theory of elasticity, particularly as applied to mining technology. He developed equations and methods to calculate stresses and deformations in homogeneous and polymeric materials, and calculated dynamic stresses in elevator cables in mines.

Savin, Viktor, b 13 February 1907 in Zavadvivka, Yelysavethrad county, Kherson gubernia, d 9 June 1971 in Lviv. Painter. He studied under S. Prokhorov and O.

Kokel at the Kharkiv Art Institute (1924–7). From 1946 he worked in Lviv. His works include portraits of U. Karma-liuk (1937), T. Shevchenko (1939) and I. Franko; genre paintings, such as *The First Tractor Column in the Village* (1930), *Class Vengeance* (1935), and *Our Girls* (1966–7); and posters and book illustrations.

Savings. Accumulated money that is not used by the population for consumption. When the money is deposited in banks, savings become one of the most important sources of capital for the economy. Prior to 1917, banks in the Russian and Austro-Hungarian empires served primarily commercial needs; their role as savings institutions was minor. (See *Banking system.) Following the 1917 Revolution, savings banks were established in the USSR and in Ukraine to absorb any excess income that was not spent by workers on their immediate needs. Because of widespread poverty and difficult living conditions in the 1920s and 1930s, savings were low and played a minor role in national finance. Fear of property confiscation discouraged people from opening savings accounts. From 1950, savings in the USSR increased at a remarkable rate. The growth was attributable mostly to the imbalance between the money supply and the consumer-goods supply. As wages and salaries rose, earners had few alternatives to depositing their unused funds into savings accounts. Thus, savings served the dual purpose of preventing inflation by absorbing the excess spending power of consumers, and channeling funds into the national economy. The growth in savings indicated a chronic shortage of consumer goods, not a higher level of affluence.

Just prior to the dissolution of the USSR depositors could open five different kinds of accounts: demand deposits, time deposits, conditional accounts, lottery accounts, and current accounts. There were four different kinds of individual savings institutions in the USSR: the central savings societies, banks of the first and second order, and savings agencies. Interest on savings was very low, 2–3 percent. Because it fell below the inflation rate, the real interest rate was negative.

Although depositing money into a savings account was relatively simple, withdrawing funds from an account (even in the case of demand deposits) was a complicated process. Depositors were allowed to withdraw only limited amounts of money at a time and had to explain what they intended to do with it. For that reason many people avoided savings banks and hoarded their savings at home, especially people involved in black market operations. With the economic reforms of 1990, a number of new co-operative savings societies have sprung up in Western Ukraine. They may be the harbinger of further changes in savings institutions.

Annual deposits in savings accounts in Ukraine, 1940–88 (in billion rubles)

| Year | Rubles |
|------|--------|
| 1940 | 0.1 |
| 1970 | 9.2 |
| 1980 | 34.3 |
| 1985 | 49.7 |
| 1988 | 65.7 |

By 1988 Ukraine's population had deposited a total of 65.7 billion rubles in various savings accounts. Of that amount 48.0 billion were deposited in urban areas, and 17.7 billion in rural areas. The average annual deposit amount was 1,516 rubles.

D. Goshko, B. Krawchenko

Savka, Andrii, b ca 1619 in Stebnyk, in the Prešov region, d ? Legendary leader of *opryshoks in the Prešov, Sian, and Lemko regions. During the Cossack-Polish War of 1648–57 he and V. Chepets commanded a force of 500 opryshoks that attacked Polish estates and castles (eg, in Sianik), fought units of the Polish nobility, and helped the Polish peasant rebels led by A. Napierski Kostka to fight the army of Bishop P. Gembicki of Cracow at Czorsztyn (1651). According to some sources Savka was captured and executed in Muszyna, near Nowy Sącz, in 1661.

Savoika, Teodor [Savojka], b 16 February 1866 in Liubychi Kniazi, Rava Ruska county, Galicia, d 14 July 1943 in Bircha, Dobromyl county, Galicia. He completed his theological studies in Lviv and Peremyshl and in 1901 became a parish priest in the Bereziv district. He was instrumental in the development of Ukrainian institutions in the Sian region. He also helped found the National Democratic party. Several collections of his sermons were published (1900, 1910, 1924).

Savran [Savran']. v-11. A town smt (1986 pop 7,100) at the junction of the Savranka and the Boh rivers and a raion center in Odessa oblast. It was first mentioned in historical documents at the end of the 14th century, when it was under Lithuanian rule. After 1569 it belonged to the Koniiecpolski and Lubomirski magnate families. S. Koniiecpolski built a fortress in the 17th century to defend the town against Turkish and Tatar attacks. After a brief period of Cossack rule (1654–67) Savran belonged to the Polish Commonwealth. In 1793 it was annexed by Russia, and later it was turned into a military settlement (1839–65). By the end of the 19th century it was a busy trading center. Today Savran is the center of a farming region and has a food industry.

Savran camp site. A Neolithic Boh-Dniester culture settlement of the 5th to early 4th millennium BC located near Savran, Odessa oblast. Excavations in 1949 and 1955 uncovered the remains of two dwellings, one of which had a stone foundation and used framing posts. Flint tools, a bone hoe, and pottery fragments were also recovered at the site.

Savranka River. A right-bank tributary of the Boh River, which it joins at Savran, that flows through Vinnytsia and Odessa oblasts. The river is 97 km long and drains a basin area of 1,770 sq km. Its waters are used for industrial and agricultural purposes as well as for irrigation and pisciculture.

Savrych, Karlo [Savryč] (pseud: Maksymovych), b 18 January 1892 in Kukilnyky, Rohatyn county, Galicia, d 1937. Western Ukrainian Communist activist. In February 1919 he chaired the conference establishing the Communist Party of Eastern Galicia (KPSH, later the *Communist Party of Western Ukraine, or KPZU) in Stanyslaviv. Savrych was elected Party secretary. To escape arrest he

fled to Czechoslovakia, and then to Austria (1920). In Vienna he formed the Foreign Committee of the KPSH and founded the newspaper *Nasha pravda*. Savrych adhered to a national-communist perspective and was a leading figure in the Party's Vasylykiv faction. In 1922–4 he was secretary of the Soviet Ukrainian diplomatic mission in Warsaw. In August 1924, after being expelled from Warsaw, he took over the position of director of the Foreign Office of Aid for the Revolutionary Movement in Western Ukraine in Kharkiv and represented the interests of the KPZU before the Central Committee of the CP(B)U (to which he was elected as an alternate member and, from October 1925, a full member). On 3 March 1927 he spoke out strongly at a critical meeting of the CP(B)U Central Committee in defense of O. *Shumsky, who had come under attack for his political views. As a result he was later sent into administrative exile in Astrakhan. Subsequently he was repressed, and died in the Stalinist terror.

J. Radziejowski

Savur, Klym (nom de guerre of Dmytro Kliachkivsky), b 1914? in Galicia, d 12 February 1945 in Klevan raion, Rivne oblast. Senior UPA commander and OUN leader. After being arrested by the NKVD in 1941 for OUN activities, he was saved from execution by the outbreak of the Nazi-Soviet War. In early 1942 he was leader of the OUN (Bandera faction) in the northwestern region (Volhynia and Polisia), and in the autumn he organized combat units to fight the Germans. As the OUN combat units coalesced into the UPA in 1943, he became its commander in chief. After the reorganization and consolidation of the UPA, the Ukrainian People's Self-Defense, and other insurgent units at the end of 1943, he became, at the rank of major, commander of the UPA-North. He was killed in action by NKVD troops and promoted posthumously to colonel.

Savych [Savýč]. A family line of Cossack officers in the Chernihiv region, established by Sava *Prokopovych, who was a high-ranking *starshyna* officer, captain of Voronezh regiment (1669), and general judge (1687–1700). He traveled to Moscow with Hetman I. Mazepa on 26 July 1687. Sava's son, Semen *Savych, was the brother-in-law of P. Polubotok. He died in prison and was buried in the Aleksandr Nevsky Monastery. A branch of the Savych family relocated to Slobidska Ukraine in the early 18th century.

Other members of the Savych family line included Petro Savych (b 14 May 1729), who worked in the General Military Chancellery (1747–9 and 1751–4) and assisted Hetman K. Rozumovsky (1761); Danylo Savych (d 1763), who graduated from the Kievan Mohyla Academy (1743–9) and Moscow and Württemberg universities (1754) and became a professor of geography and physics at Moscow University (1757–61); and Oleksii *Savych, a 19th-century astronomer and mathematician.

Another Savych family line died out in the 18th century. Its members included Sava Savych, who served as captain (1671–2, 1695) and judge (1672, 1675) in Lubni regiment, and Sava's son, Vasyl Savych (d 1714), a captain (1695–1702, intermittently), osaul (1698–1700), and colonel of Lubni regiment (1709–14).

Savych, Ivan [Savýč] (pseud of Ivan Lukianenko), b 19 January 1914 in Savynky, Sosnytsia county, Chernihiv gubernia. Poet. He graduated from the Kharkiv Institute of

Journalism (1934) and Kiev University (1940) and worked as a newspaper editor in Kiev and a teacher in Kremianets and the Donbas. He was interned in German POW (1942–5) and Stalinist labor camps (1948–56). From 1957 on he published numerous poetry collections, including the representative selection *Zirko moia vechorova* (O My Evening Star, 1984), the long poem *Mariia Zan'kovets'ka* (1961), the novel *Iun' komunisty'ka* (The Commune's Youth, 1976), and the book of memoiristic narratives *Nezboryma pam'iat'* (Unflinching Memory, 1980).

Savych, Oleksander [Savyč] (pseud: Ivan Tarasenko), 1846–1902. Writer and lawyer; member of the Lubni circuit court. He wrote the poetry collection *Na Ukraïni* (In Ukraine, 1889) and the long poems *Hanusia* (1891) and *Kyrylo: Svitova poema* (Kyrylo: A Wordly Poem, 1896). Seven poems and two stories appeared in the literary miscellany *Persha lastivka* (The First Swallow, 1905).

Savych, Oleksii [Savyč, Oleksij], b 30 March 1811 in Pushkarivka, Sumy county, Slobidska Ukraine gubernia, d 27 August 1883 in Tula gubernia, Russia. Astronomer and mathematician; member of the Russian Imperial Academy of Sciences from 1862. He studied at Kharkiv University and graduated from Moscow University (1829) and the Professorial Institute of Dorpat (Tartu) University (PH D, 1839). As a professor at St Petersburg University (1839–80) he contributed to areas such as the calculation of orbits of comets and planets, planetary science, optical refraction phenomena in astronomical observations, barometric corrections of optical observations, and gravimetric measurements. He was one of the first astronomers to use the theory of probability to interpret astronomical observations. He carried out geodesic measurements between the Black and the Caspian seas and proved that the sea levels of the two differ markedly. He wrote over 100 scientific papers; monographs on the application of practical astronomy in the geographical determination of places (1845) and on the application of the theory of probabilities in calculating observations (1857), both of which were translated into German; and an astronomy textbook (2 vols).

Savych, Semen [Savyč], b and d ? Cossack officer. Previously a registered Cossack, he was colonel of Kaniv regiment (1648–51) and an officer in charge of home front security and the mobilization of Cossack troops. He also carried out important diplomatic missions to Russia (1651) and the Crimea (1654).

Savyntsi [Savynci]. IV-18. A town smt (1986 pop 5,700) on the Dinets River in Balakliia raion, Kharkiv oblast. A Cossack settlement was established at the site in 1671. It belonged to Kharkiv and then to Iziium regiment. The farming settlement was destroyed by the Tatars several times. In 1923 Savyntsi became a raion center of Iziium okruha. In 1962 one of the largest sugar refineries in Ukraine was built in the town.

Savytska, Ivanna [Savyc'ka] (née Trashnevsk), b 14 March 1914 in Oparivka, Krosno county, Galicia. Writer; wife of R. Savytsky. Her poems, fairy tales, stories for children, plays, songs, games, and riddles were first published in the 1930s in the Galician periodicals *Vohni*,

Ivanna Savytska

Olena Savytska

Ukrains'kyi Beskyd, Mii pryiatel', Svit dytyny, and *Ukrains'ke doshkillia*. A postwar refugee in the United States since 1949, she has contributed to émigré papers and children's and women's magazines. She is the author of the verse collections *Sertse* (Heart, 1953), *Molodi pisni* (Young Songs, 1957, with music by M. Fomenko), and *Nezabud'ky* (Forget-me-nots, 1959); the story collections *Nasha khatka* (Our Little House, 1957), *Zoloti dzvinochky* (Golden Bellflowers, 1958), *Try kazochky* (Three Fairy Tales, 1961), and *Dennyk Romtsia* (Little Roman's Journal, 1963); the plays *Kazka-fantaziia* (A Fairy Tale–Fantasy), *Splacha korolivna* (The Sleeping Princess), and *Hist' iz neba* (A Guest from Heaven, 1955); and the feuilleton collection *Z ptashynoho letu* (From a Bird's-eye View, 1974).

Savytska, Olena [Savyc'ka] (née Kharechko; Helen Savytsky), b 17 February 1901 in Poltava. Geneticist and embryologist. A graduate of Leningrad University (1940), she worked in Kiev at the All-Union Scientific Research Institute of the Sugar Industry (1927–41) and the Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics (1941–3). After emigrating to Germany (1944) and then to the United States she was a cytogeneticist with the US Department of Agriculture (from 1947) and the Beet Sugar Development Foundation (1947–61). Together with her husband, V. *Savytsky, she developed a monogerm sugar beet.

Savytska, Stefaniia [Savyc'ka, Stefaniia], b 15 July 1891 in Peremyshl, Galicia, d 15 July 1977 in Toronto. Civic activist; wife of M. *Matchak. She was a founding member of the Union of Ukrainian Women in Lviv (1917) and the Ukrainian Women's Union in Vienna (1920). After returning from Vienna to Lviv in 1921, she worked as a bookkeeper and served on the audit committee of the Trud co-operative. She helped set up the *Ukrainske Narodne Mystetstvo* co-operative and then its magazine *Nova khata* (1925). After the Second World War she settled in Philadelphia, where she served as business manager of the women's magazine *Nashe zhyttia*.

Savytsky [Savyc'kyj]. A family line of Cossack officers, whose members later became landowners and community activists in the Poltava and Chernihiv regions. Stepan *Savytsky was a military clerk (1712) and the chancellor of Lubni regiment (1714–39), and a member of the codification committee that compiled the Code of Laws of 1743.

Among the descendants of the Savytsky family line were Andrii Savytsky (1811–84), a landowner in Krolevets who was an activist for peasant reform in 1861, an economist and philosopher, and the author of the work *Opyt estestvennogo bogosloviia* (Inquiry into Natural Theology, 1879–84); Andrii's nephew, Mykola *Savytsky, marshal of the nobility in Krolevets county (1896–9), head of the Chernihiv gubernia zemstvo administration (from 1906), and Chernihiv gubernial starosta in 1918; and Mykola's son, Petro *Savytsky.

Savytsky, Kostiantyn [Savyc'kyj, Kostjantyn], b 1 June 1901 in Pishchanka, Olhopil county, Podilia gubernia. Agronomist and doctor of agricultural sciences (1965). He graduated from the Faculty of Agricultural Organization at the Kiev Polytechnical Institute (1929) and worked as an experimental researcher at the farm-machinery standardization bureau of the Kiev Institute of Machine Science, and then headed the Groznyi base of the All-Union Institute of Grain Production. From 1935 to 1967 he was a senior research associate of the Ukrainian Scientific Research Institute of Land Cultivation. His most important works concern the technology of buckwheat growing.

Savytsky, Mykola [Savyc'kyj], b 1867, d 1940s? Civic and political activist. A landowner in Krolevets county, he was president of the Chernihiv gubernia zemstvo (1906–14). In the Hetman government of 1918 he served as deputy minister of internal affairs.

Savytsky, Oleksii [Savyc'kyj, Oleksij] (pseud: Yukhym Hedz, Oles Yasny), b 30 March 1896 in Zolotonosha, Poltava gubernia, d 15 July 1937 in Kiev. Popular humorist and playwright of the 1920s and 1930s. He studied at the Lysenko Music and Drama Institute in Kiev and was a member of the Pluh peasant writers' association. His humorous and satirical stories and feuilletons of rural life in Soviet Ukraine were published in many Soviet Ukrainian papers and magazines and separately as the collections *Avtor Troiandenko* (Author Troiandenko, 1927), *Buvaie i take* (Such Things Happen, 1927), *Pryntsypial'no* (On Principle, 1929), *Troglodyty* (Troglodytes, 1929), *Bubna – kozyr* (Diamonds – Trump, 1930), *Zavziatyi seredniak* (The Zealous Middle Peasant, 1930), *Konkurs na hopak* (Hopak Contest, 1930), *Ti zh i Myron Hrechka* (They and Myron Hrechka, 1931), *Stolychnyi hist'* (Guest from the Capital, 1930), *Pershyy ispyt* (First Exam, 1931), and *Tykhoiu sapoiu* (With a Quiet Hoe, 1933). He also wrote several plays, and an edition of his comedies was published in 1931. Savytsky was arrested in 1936 and was executed by the NKVD.

Savytsky, Omelian [Savyc'kyj, Omeljan], b 1845 in Hrabivka, Kalush county, Galicia, d 8 August 1921 in Bolekhiv, now in Ivano-Frankivske oblast. Pedagogue. He graduated from Lviv University with a doctorate in physics and mathematics and taught at the Academic Gymnasium of Lviv from 1871 until 1907, when he became director of a gymnasium in Ternopil, a post he held until 1914. He was the author of the first textbooks in mathematics and physics published in Ukrainian for secondary school students in Galicia. He also worked on a Ukrainian terminology for mathematics and physics.

Petro Savytsky

Roman Savytsky

Savytsky, Petro [Savyc'kyj], b 29 June 1899 in Bila, Kamianets-Podilskyi county, Podilia gubernia, d 29 September 1983 in Munich. Scientist and educator. A UNR Army veteran, he completed two doctorates in Prague (in philosophy in 1924 and in natural science in 1931) and lectured at Charles University and at the Ukrainian Higher Pedagogical Institute. At the same time he undertook private research and published articles in Czech, German, and Polish scientific journals. After the Second World War he taught at the *Ukrainian Technical Husbandry Institute in Regensburg, where he served as rector in 1952–61.

Savytsky, Roman [Savyc'kyj], b 11 March 1907 in Sokal, Galicia, d 12 January 1960 in Philadelphia. Concert pianist, educator, and critic. He studied piano with V. Barvinsky at the Lysenko Higher Institute of Music in Lviv (1923–7) and with J. Herman at the Prague State Conservatory, where in 1932 he graduated from the master school for pianists in the class of V. Kurz. He performed extensively in 1932–52 as soloist with symphony orchestras and in recitals in Ukraine, Poland, Czechoslovakia, Germany, and the United States, and also performed on radio in Prague, Lviv, Kiev, and Philadelphia. In the 1930s he taught piano at the Lysenko Higher Institute of Music (Lviv, also Stryi and Sambir branches), and in 1939–41 he was assistant professor and dean of the piano department at the Lviv State Conservatory. In 1941–4 he worked as music editor and music director at Lviv Radio. He subsequently emigrated to Germany, where he founded and directed Ukrainian music schools in Karlsfeld and Berchtesgaden (1945–9). After his arrival in Philadelphia (1949) he became a faculty member of the Settlement Music School and of the Philadelphia Conservatory. From 1952 he was involved in the formation and development of the *Ukrainian Music Institute of America, of which he was the first director (1952–9). His students included V. Baley, I. Kondra-Fedoryka, Z. Krawciw-Skalsky, O. Kryshchalsky, N. Nedilsky-Slobodian, Yu. Oliinyk, J. Osinchuk, R. Savytsky Jr, M. Shlemkevych-Savytsky, and I. Zadorozhny.

R. Savytsky

Savytsky, Roman, Jr [Savyc'kyj], b 9 March 1938 in Lviv. Musicologist; son of R. *Savytsky. He studied music theory and piano (1945–60) with his father and at the Ukrainian Music Institute of America (1959). He completed a degree in library science at the Drexel Institute of Technology in Philadelphia (1962), where he specialized

Roman Savytsky, Jr

Viacheslav Savytsky

Rev Semen Sawchuk

Terry Sawchuk

in music bibliography. His writings include an English-language introduction with notes to the first volume of Z. Lysko's *Ukrains'ki narodni melodiï* (Ukrainian Folk Melodies, 1967); bibliographies on M. Lysenko, Z. Lysko, and M. Holubets; discographies with notes on O. Myshuha, M. Menzinsky, and others; and *Ukrainian Film Guide* (1980). He has also written numerous articles and reviews in the Ukrainian periodical press and contributed entries to Ukrainian and American encyclopedias. Since 1988 he has been the music subject editor for the *Encyclopedia of Ukraine*.

Savytsky, Stepan [Savyc'kyj], b ca 1684 in the Lubni region, d 1751. Cossack officer. He served as chancellor of Lubni regiment from 1714 to 1739. In 1718 he translated into Ukrainian the first part of S. Twardowski's epic poem *Wojna domowa ...* (The Civil War ..., 1681), which was later published in the addenda to S. Velychko's *Chronicle* by the Kiev Archeographic Commission (vol 4, 1864). M. Hrushevsky regarded Savytsky's *Povest' o kozatskoi voïne s poliakami* (The Story of the Cossack War with the Poles, 1718) as an independent historiographical work (1934). Savytsky was a member of the commission that compiled the *Code of Laws of 1743.

Savytsky, Viacheslav [Savyc'kyj, V'jačeslav] (Savitsky), b 1902 in the Kuban, d 16 April 1965 in Salinas, California. Biologist. A graduate of the Kharkiv Agricultural Institute (1924) and Leningrad University (1939), he headed the genetics laboratory at the All-Union Scientific Research Institute of the Sugar Industry (1930–41) and worked in Kiev (1941–3), Poznań (1943–5), and Halle, Germany (1945–7). After emigrating to the United States (1947) he worked for the Beet Sugar Development Foundation in Salt Lake City, Utah (1947–61), and Salinas. Savytsky and his wife, O. *Savytska, obtained productive monogerm varieties of sugar beet that enabled sugar-beet farming to be mechanized and are in use today throughout the world.

Sawchuk, Semen (Savčuk), b 14 February 1895 in Volkivtsi, Borshchiv county, Galicia, d 28 October 1983 in Winnipeg. Orthodox priest and community leader. Sawchuk emigrated to Canada with his parents in 1899. Active at the Mohyla Ukrainian Institute in Saskatoon, he took part in the founding conference of the *Ukrainian Ortho-

dox Church of Canada in 1918 and later was instrumental in establishing the *Ukrainian Self-Reliance League. He was ordained in 1920 and played a leading role in the development of the church as administrator of the consistory (1933–51) and head of its presidium (1955–63). He organized and oversaw a seminary that was attached to the consistory in 1932–45, and he helped found *St Andrew's College in 1946 and served as its rector in 1952–5. Prominent in the formation of the Ukrainian Canadian Committee (now Congress), he was its vice-president (1940–56) and an honorary president after 1980. He was president of the Ethnic Press Club of Canada (1964–7) and author of *Iak postala Ukraïns'ka pravoslavna tserkva v Kanadi* (How the Ukrainian Orthodox Church in Canada Was Formed, 1924), *Tserkovni kanony v teorii i praktytsi* (Church Canons in Theory and Practice, 1955), and *Istoriia Ukraïns'koï hreko-pravoslavnoi tserkovy v Kanadi* (History of the Ukrainian Greek Orthodox Church in Canada, 1985). His plays and short stories appeared under the pseudonym Matveiv Semen.

Sawchuk, Terry (Terrance), b 28 December 1929 in Winnipeg, d 31 May 1970 in New York. Professional hockey player. As a goaltender in 21 seasons, he recorded a goals-against-average of 2.52 with 103 regular-season and 12 play-off shutouts. He won the Calder Trophy as the National Hockey League (NHL) rookie of the year (1950–1) and the Vezina Trophy as the best goaltender in 1951–2, 1952–3, 1954–5, and 1964–5 (shared). He was a member of four Stanley Cup winners as a player with the Detroit Red Wings (1952, 1954, 1955) and Toronto Maple Leafs (1967). He was inducted into the NHL Hall of Fame in 1971.

Sazhen. See Weights and measures.

Sazhin, Mikhail [Sažin, Mixail], b 1814 in Galich, Kostroma gubernia, Russia, d ca 1885 in Omsk, Russia. Russian painter; full member of the St Petersburg Academy of Arts from 1855. In 1846 he and T. Shevchenko shared a dwelling and worked together on an album of Kiev landscapes, some of which were published as lithographs in the late 1840s by I. Laufer. Sazhin's paintings include *St Sophia Cathedral*, *Vydubychi Monastery*, *Shchekavytsia – Prince Oleh's Burial Place*, *At the Dnieper Crossing*, *Celebration of the Founding of the Chain Bridge in Kiev*, *Old Kiev:*

Mikhail Sazhin: *Shchekavytsia* (1840s)

Pecherske, View of Kiev from Kurenivka, Kiev University, Ruins of the Golden Gates, The Podil District, Monument to Št Volodymyr, Št Andrew's Church, Št Nicholas's Monastery, and Št Cyril's Monastery.

Sazhin, Viktor [Sažin], b 15 April 1917 in Yuriuzan, Ufa gubernia, Russia, d 2 October 1985 in Kiev. Technological chemist; AN URSR (now ANU) corresponding member from 1978. He graduated from the Kazakh Mining and Metallurgy (now Polytechnical) Institute in 1951. He worked there and, later, at the ANU Institute of General and Inorganic Chemistry (1961–76). He developed the theoretical foundation for industrial utilization of mineral raw materials, particularly those of low quality; introduced the upgrading of aluminum ores by autoclave treatment with acids or bases; and devised treatments for industrial wastes with high sulfur content.

Sazonov, Vitalii, b 4 April 1947 in Siberia, d 6 September 1986 in Munich. Painter. He studied archeology and history at Odessa University before devoting himself full time to painting in 1972. He participated in two exhibitions of Ukrainian nonconformist art held in a private Moscow apartment in 1975 and 1976, as well as in other unofficial exhibitions. In 1980 he was allowed to emigrate to the West, and settled in Munich. He worked in an abstract, nonobjective manner inspired by the writings of V. Kandinsky, abstract art, and the texture, color, and composition of old icons. Many of his paintings are carefully balanced, serene compositions that convey the metaphysical spirit of icons without the canonical rendering of the figures, which have been replaced by a combination of geometric and symbolic forms constituting a transformation of the visual conventions of the icon into a modern, abstract idiom (eg, *Untitled* [1979] and *Stone Baba with Angel* [1979]). The surface of his paintings is a rich overlay of colors and glazes partly stripped to reveal the layers underneath, as well as textured areas with darkened details. Solo exhibitions of his work were held in Germany, France, Spain, Australia, and Canada, and an album of his paintings was published in 1984.

Sbornik Khar'kovskogo istoriko-filologicheskogo obshchestva (Collection of the *Kharkiv Historical-Philological Society). A collection of papers and materials on

Vitalii Sazonov: untitled painting (oil, 1980)

Ukrainian literature, ethnography, history, and church history of Slobidska Ukraine, Zaporizhia, and Left-Bank Ukraine, published irregularly by the Historical-Philological Society at Kharkiv University. Between 1886 and 1914, 21 volumes appeared, edited by D. *Bahalii. The main contributors were M. Sumtsov (president of the society), M. Plokhynsky, V. Barvinsky, D. Miller, P. Korolenko, O. Vetukhiv, and V. Danylevych. Certain volumes were devoted to special subjects: volume 8 (1896), for example, to H. Skovoroda, volume 16 (1905) to the papers of the Kharkiv commission for organizing the 13th Archeological Congress in Katerynoslav (ed E. Redin), and volume 18 (1909) in honor of M. Sumtsov.

Scabious (*Scabiosa*; Ukrainian: *skabioza*). An annual and perennial herb of the teasel family Dipsacaceae, native to temperate Eurasia and the Mediterranean region, numbering about 100 species. The plants grow in steppes, in dry, sandy meadows, and occasionally in light pine forests. Yellow scabious (*S. ochroleuca*) can be found in almost all regions of Ukraine, and the Ukrainian scabious (*S. ucrainica*) grows mostly in the south. The blue *S. caucasica* and the deep purple pincushion flower or sweet scabious (*S. atropurpurea*) are used in floriculture as ornamentals. All species of scabious yield substantial amounts of nectar.

Scenery, theatrical. Elements of scenery and costume design in Ukrainian theater were present in **vertep* puppet plays and in the productions of school theaters in the 17th

In *Olivia's House*, Anatol Petrytsky's design for a 1936 Soviet Ukrainian production of Shakespeare's *Twelfth Night*

and 18th centuries. Painted backdrops were used in serf theaters from the late 18th century, and in amateur and professional touring theaters, from the middle of the 19th century. The Ruska Besida Theater employed K. *Ustyianovych, K. *Ploshevsky, F. *Pohlmann, and P. *Diakiv as scenery painters. The scenery for M. Starytsky's troupe was prepared under the supervision of the ethnographer F. Vovk. M. Kropyvnytsky himself was responsible for scenery in his troupe and demanded that it be made according to illustrations by the historian A. Rigelman. The designers at Sadovsky's Theater in Kiev were V. *Krychevsky Sr and I. *Buriachok, who began producing three-dimensional scenery. During the revolutionary years M. *Burachek, I. Kavalidze, and K. *Yeleva worked for agitprop theaters. A. *Petrytsky was the designer for a number of L. Kurbas's productions at Molodyi Theater, where he created interesting sets for the *vertep* and for Sophocles' *Oedipus Rex*. During the 1920s V. *Meller's constructivist approach to scenery and costumes at Berezil resulted in strong designs for Kurbas's productions of G. Kaiser's *Gas I* (1923) and *Jimmie Higgins* (1923, based on U. Sinclair's novel). Meller also led a design laboratory at Berezil, where he trained such designers as D. *Vlasiuk, Ye. Tovbin, V. Shklieriev, and M. *Symashkevych. *Constructivism also influenced scenery designs by M. Matkovych, Yu. *Pavlovych, H. *Tsapok, and B. *Kosariiev. In opera, scenery by A. Petrytsky, O. *Khvostenko-Khvostov, and I. *Kurochka-Armashevsky was used to highlight the costumes. From the mid-1930s, with the introduction of socialist realism, painted scenery once again dominated. Designers in Western Ukraine, however (L. Borovyk and M. Radysh, for example), continued to work with more modernist techniques into the early 1940s. Notable designers of this period were F. *Nirod, Yu. *Stefanchuk, and D. *Narbut. From the late 1950s, restrictions on scenery design were lessened, and some innovation was brought in (H. Batii and M. *Kypriian) and constructivism reappeared. Ukrainian scenery designers have also worked on foreign stages – F. *Yakhymovych in the Imperial Vienna Opera (1851–71), M. *Andriienko-Nechytailo in the Royal Bucharest Opera (1923), V. *Perebyinis and M. *Krychevsky in Paris, and O. *Klymko in Buenos Aires, Washington, and New York.

V. Revutsky

Schad, Johann Baptist, b 1758 in Mürsbach, Bavaria; d 1834 in Jena, Thüringen. German philosopher. Influenced by I. Kant's moral teachings, he renounced his monastic vows in 1798, wrote a PH D dissertation, and taught philosophy at Jena University (1799–1804). The author of several books, in 1805 he was invited to the chair of philosophy at the new Kharkiv University, and for the next 12 years he lectured there on logic, psychology, metaphysics, natural law, and the history of philosophy. His thought was influenced first by J. Fichte and then by F. Schelling's philosophy of nature, but formed an independent and original system and was presented in a lucid and elegant style. During his Kharkiv period he published an original book on logic, *Institutiones philosophiae universae. Tomus primus: Logicam puram et applicantam complectens* (1812), in which he distinguished formal (restricted to the understanding) and transcendental (metaphysics based on reason) logic; and a treatise on natural law, *Institutiones juris naturae* (1814), in which he argued for the harmony of law, morality, and faith and their foundation in reason. His rationalist approach to religion and praise of freedom in the lecture 'De libertate Europae vindicata' (1814) was brought to the attention of the tsarist minister of education, and in December 1816 Schad was expelled from the Russian Empire. He returned to Jena and resumed teaching there. Although his lectures in Kharkiv had attracted many students and some 10 dissertations had been written under his supervision, he left no worthy successor behind him in Kharkiv.

T. Zakydalsky

Schädel, Johann Gottfried, b 1680 in Wandsbek, near Hamburg, Germany, d 21 February 1752 in Kiev. German architect. He came to Russia in 1713 and oversaw the construction of palaces for Duke A. Menshikov on Vasiliï Island, St Petersburg, in Oranienbaum, and in Kronshtadt. Later he worked with B. *Rastrelli on buildings in the Kremlin and elsewhere in Moscow (1729–31). After settling in Kiev in 1731, he designed and built an additional story to the Kievan Mohyla Academy (1732–40), the famous campanile of the Kievan Cave Monastery in transitional baroque-classicist style (1731–44), and, probably, the Zaborovsky Gate. He supervised the reconstruction of the campanile of the St Sophia Cathedral (1736–40) and the Kiev metropolitan's residence (1744–8). In his works he skillfully blended features of Western architecture with the Cossack baroque and motifs of folk ornamentation.

Schamaneck, Alfred [Šamanek], b 22 May 1883 in Lviv, d 20 May 1920. Military figure. An ethnic German, he graduated from the military academy in Vienna and in 1914 was a captain on the General Staff of the Austrian army in Galicia. After serving on the Italian front he became chief of staff of the Auxiliary Corps in Syria. He returned to Galicia and in April 1919 took command of the Second Corps of the Ukrainian Galician Army (UHA) at the rank of colonel. He distinguished himself during the *Chortkiv offensive and then served as chief of the

Col Alfred Schamanek

General Staff during the UHA advance on Kiev. In 1920 he became chief of the General Staff of the Red Ukrainian Galician Army (10 February–1 March). He was killed while fighting the Bolsheviks.

Schechtman, Joseph, b 1891 in Odessa, d 1 March 1970 in New York City. Zionist leader and authority on population transfers in Europe. A graduate of Berlin University (LLD, 1914), he cofounded, with V. *Zhabotinsky, the Zionist Revisionist movement and headed it for many years. Active in Ukrainian Jewish politics, he became a member of the Central Rada, where he consistently advocated Jewish self-defense against pogroms. During the Hetman and UNR Directory regimes Schechtman collaborated with E. Tcherikower and other prominent Jews on one of the most authoritative accounts of the Jewish experience during the Ukrainian revolution, *Di idische avtonomie un der natzionaler sekretariat in Ukraine: Materialn un dokumentn*. A shortened account of his experiences was published later in English. He also wrote a book on Jewish pogroms by A. Denikin's forces. Schechtman emigrated in 1921 and later worked with the Committee of Jewish Delegations preparing materials for the *Schwartzbard Trial.

Schelling, Friedrich Wilhelm Joseph von, b 27 January 1775 in Leonberg, Württemberg, d 20 August 1854 in Bad Ragaz, Switzerland. German idealist philosopher. His thought contains many different, sometimes contradictory, tendencies and can be divided into at least four distinct stages. In Ukraine, as elsewhere, the most influential stage was that of *Naturphilosophie*, which conceived the natural world as a self-sufficient organism of infinite variety unified by the law of identity of opposites and evolving continuously under the compulsion of internal contradiction. Emphasizing the speculative rather than the empirical method as the key to a deeper understanding of nature, Schelling pointed out various analogies between different forces, genera, and levels of evolution. In spite of their fantastic quality, these analogies had a stimulating effect on later naturalists and led to important scientific discoveries. Other parts of Schelling's thought, such as his philosophies of religion and freedom, had little influence in Ukraine.

Schelling's ideas about nature were introduced in Ukraine by J. *Schad, the first holder of the chair of philosophy at Kharkiv University (1805–16). His books and lectures acquainted students, faculty members, and the educated public with Schelling. Schad's students pro-

duced some 10 philosophical dissertations (1812–18) that borrowed freely from him and Schelling. Schad's colleagues, the medicine professors G. Koritari and Ya. Gromov, adopted Schelling's ideas in their lectures; the physics professor A. Stojković and mathematics professor T. Osipovsky criticized them as fantastic and unscientific. Schad's student and successor in the chair, A. Dudrovych (1818–30), emphasized the mystical rather than the rationalist aspects of Schelling's thought, but the interest in philosophy kindled by Schad died out gradually. Another student of Schad (or Dudrovych), N. Belousov, taught philosophy at the Nizhen Lyceum (1825–30), relying heavily on Schad's writings.

A number of Schellingians taught at the Richelieu Lyceum in Odessa in the first half of the 19th century. N. Kurliandtsev, who taught mathematics and physics (1826–35), produced the first Russian translation of Schelling – that of *Erster Entwurf eines Systems der Naturphilosophie* (1834) – and wrote a paper on the development and current state of experimental physics in which he expounded and defended Schelling's basic ideas on nature. K. Zelenetsky, who taught Russian literature (1837–58), under I. Davidov's influence combined the ideas of Schelling with those of I. Kant without having a clear idea of the differences between them. His collection of studies on some theoretical questions (4 vols, 1835–6) contained several philosophical papers on logic, the foundations of knowledge, and history. The lyceum's professor of philosophy in 1839–59, O. *Mykhnevych, was influenced mainly by Schelling's philosophy of revelation and wrote, in Russian, an exposition of Schelling's philosophy for the layman (1850).

In Kiev a Christian outlook with a Schellingian hue was propagated by P. Avsenev, who taught at the Kiev Theological Academy (1836–50) and Kiev University (1838–44). Interested in psychic phenomena, he expounded the ideas of the Schellingian school of psychology (G. von Schubert and C. Carus). Through his personal acquaintance with V. Bilozersky, M. Hulak, and O. Markovych he may have exercised a formative influence on the Romantic Christian ideology of the *Cyril and Methodius Brotherhood. The first rector of Kiev University, M. *Maksymovych, came under the influence of Schelling's *Naturphilosophie* during his study of botany at Moscow University (1821–3). In his scientific works on the chief foundations of zoology (1824) and nature (1833; 2nd edn 1847) he emphasized the unity of the natural world and its evolution. Although as a scientist he became increasingly critical of the speculative method, he rejected crude empiricism as an adequate scientific method. Schellingian ideas can be detected also in his later ethnographic works (eg, in his symbolic understanding of folk songs).

Although D. *Vellansky, the first Schellingian of Ukrainian origin, worked in St Petersburg, his writings had an influence in Ukraine as well as in Russia. His Swedish-Finnish student C. Ekeblad, the author of a biopsychological study of the capacities of the human soul (1872), served as principal of the Nizhen Lyceum for 25 years (1835–60).

Schelling's influence in Ukraine was diverse and often contradictory. His ideas aroused interest in the natural sciences, but also encouraged a contemptuous attitude toward the scientific method. Schelling glorified the creative and cognitive power of reason but diverted its energy to

Romantic musings and mystical wandering. His ideas stimulated interest in folklore and language. They were popular among members of the *Kharkiv Romantic School and may have influenced O. *Potebnia's theory of language.

T. Zakydalsky

Scherer, Jean-Benoît, b 1 September 1741 in Strasbourg, France, d 1824. Historian, geographer, and economist. After studying at Strasbourg, Jena, and Leipzig universities, he served in the Russian civil service and then at the French embassy in St Petersburg. In 1808–24 he taught French literature and Russian history at Tübingen University. He translated the Primary Chronicle with extensive annotations (1774) and wrote *Histoire raisonnée du commerce de la Russie* (1788), which contained a chapter on Ukraine, and the two-volume *Annales de la Petite-Russie ou Histoire des Cosaques-Saporogues et des Cosaques de l'Ukraine ou de la Petite-Russie* (1788), one of the earliest works in Western Europe on Ukrainian history and geography, which influenced the author of **Istoriia Rusov*.

Marie Scherrer

Ivan Schmalhausen

Scherrer, Marie, b 20 June 1902 in Rumania. French scholar of Ukrainian language and literature; member of the Shevchenko Scientific Society. She was educated in Strasbourg and Paris, and taught French in Prague until 1939. After returning to Paris she worked in the library of the Institute of Slavic Studies and taught Ukrainian literature at École des langues orientales (with E. Borschak). She wrote *Les Dumy ukrainiennes: Épopée Cosaque* (1947), translated Ukrainian literary classics into French (particularly T. Shevchenko, I. Franko, and M. Rylsky), and contributed to *Revue des études slaves* in 1959–80, notably as a longtime editor of the publication's chronicle of Ukrainian scholarship.

Schiller, Johann Christoph Friedrich von, b 10 November 1759 in Marbach, Swabia, d 9 May 1805 in Weimar. German dramatist, poet, literary theorist, and

historian. Since 1839 his poems have been translated into Ukrainian by Y. Levytsky, Yu. Fedkovych, K. Bilylovsky, P. Kulish, B. Hrinchenko, I. Franko, A. Mohylnytsky, M. Markovych, O. Navrotsky, O. Levytsky, O. Konysky, O. Pchilka, I. Steshenko, O. Hrytsai, T. Piurko, S. Hordynsky, D. Zahul, and other writers. His plays (*Kabale und Liebe* and *Die Räuber*) were first staged in Ukrainian at the Ruska Besida Theater in Lviv (1881–9). In central Ukraine (because Ukrainian-language plays were banned under the tsars) the first Ukrainian performance did not take place until 1918, when *Die Räuber* was staged by P. Saksahansky at the People's Theater in Kiev. Famous Soviet Ukrainian productions of Schiller's plays include the Kiev Young Spectator's Theater's *Wilhelm Tell* in 1927, the Berezil theater's *Die Verschwörung des Fiesco zu Genua* in 1928, and the Kiev Ukrainian Drama Theater's *Don Carlos* in 1936.

Some of Schiller's dramas have been published in Ukrainian translation: *Wilhelm Tell*, trans V. Kmitykevych (1887), B. Hrinchenko (1895, 1908), and B. Ten (1955); *Die Jungfrau von Orleans*, trans Ye. Hornytsky (1889), I. Steshenko (1906), and Ye. Drobiazko (1955); *Maria Stuart*, trans B. Hrinchenko (1896, 1911) and Yu. Koretsky (1941); *Die Räuber*, trans O. Cherniakhivsky (1911), M. Yohansen (1936), and B. Ten (1953); *Kabale und Liebe*, trans M. Yohansen (1934), A. Hozenpud (1947), and Yu. Nazarenko (1955); and *Don Carlos*, trans Iryna Steshenko (1955). Other editions of his works published in Ukrainian translation include poems (Lviv 1914, ed O. Hrytsai), ballads (Kiev 1927, trans D. Zahul), lyric poems (Kiev 1967, trans M. Lukash), selected (six) dramas (Kiev 1955), works (five poems, three dramas, Kiev 1968), and writings on esthetics (*Estetyka*, Kiev 1974, trans B. Havryshkiv).

R. Senkus

Schimser, Anton, b 16 February 1790 in Vienna, d 5 February 1836 in Lviv. Sculptor; son of the Viennese sculptor A. Schimser the Elder and brother of J.B. *Schimser. He studied at the Vienna and Paris academies of art. From 1812 he worked in Lviv, where he decorated buildings, such as No. 10 Trybunalska St, the Credit Society, and the Boworowski Library, with bas-reliefs and created many of the family monuments in the Lychakiv Cemetery. His classicist works are distinguished by their clean lines and balanced composition.

Schimser, Johann Baptist, b 30 March 1793 in Vienna, d 11 July 1856 in Lviv. Sculptor; brother of A. *Schimser. A graduate of the Vienna Academy of Art (1818), he moved to Lviv in 1826. There he worked under the supervision of his brother and, later, as an independent sculptor. He created numerous family monuments in the Lychakiv Cemetery in Lviv, the largest of which is the monument to M. Bauer, and in cemeteries in Ternopil and Stansylaviv. He also did decorative bas-reliefs for buildings.

Schmalhausen, Ivan, b 15 April 1849 in St Petersburg, d 19 April 1894 in Kiev. Botanist of German descent; full member of the St Petersburg Academy of Sciences from 1893; father of I. *Schmalhausen. A graduate of St Petersburg University (1871), he taught at Kiev University (from 1878) and researched the flora of central Ukraine (1886), central and southern Russia, the Crimea, and northern Caucasia (2 vols, 1895, 1897), as well as fossilized plants.

Schmalhausen was one of the founders of paleobotany in the Russian Empire.

Schmidt, Axel, b 20 October 1870 in Dorpat (now Tartu), Estonia, d 1941. German journalist. A newspaper editor in Tallinn (1896–1900) and Riga (1907–11), in 1911 he moved to Berlin, where he edited prominent journals, such as *Deutsche Politik* (1917–21) and *Der Deutsche Gedanke* (1925–8). A supporter of Ukrainian independence, during the First World War he advised the German government on its eastern policy, and he made an official visit to Kiev in 1918. That year he cofounded the *German-Ukrainian Society, and he served as the organization's general secretary and as editor of its organ *Die *Ukraine* in 1918–26. He wrote articles and several books about Eastern Europe and especially Ukraine, including *Ukraine – Land der Zukunft* (1939), which was confiscated by the Nazi authorities.

Bishop Joseph Schmondiuk

Schmondiuk, Joseph [Šmondjuk, Josyfl], b 6 August 1912 in Wall, Pennsylvania, d 25 December 1978 in Philadelphia. Ukrainian Catholic church and community leader. He studied at St Josaphat's Ukrainian Pontifical College in Rome and was ordained in 1936. He was consecrated auxiliary bishop of Philadelphia in 1956. In 1961 he was appointed bishop of Stamford, Connecticut. In 1977 he was installed as metropolitan of the Ukrainian Catholic church in the United States and archbishop of Philadelphia. He played an active role in the Providence Association of Ukrainian Catholics in America and the Ukrainian Congress Committee of America and was a member of the presidium of the World Congress of Free Ukrainians. He was the first Ukrainian Catholic metropolitan born in the United States.

Schneider, Antoni (pseud: Sartorius), b 12 June 1825 in Vilshanytsia, Zolochiv circle, Galicia, d 25 February 1880. Amateur archeologist and historian. The son of German colonists, he collected materials for an archeological map and history of Galicia's towns and villages. His Polish regional studies encyclopedia of Galicia (letters A–B, 2 vols, 1868, 1874) contains ethnographic materials and information about inhabited places and Lviv's streets and buildings. He also wrote one of the first guidebooks to Lviv (1871; 2nd edn 1875). His notebooks of historical documents, compiled by place-name and topic, are preserved in the Lviv Scientific Library of the ANU and the Cracow city and voivodeship state archives.

Scholarly societies. The first learned society in Ukraine was the *Odessa Society of History and Antiquities (1839). Learned societies did not become widespread, however, until the last few decades of the 19th century. Most were associations of scholars in the humanities, law, and social sciences, such as the *Church-Archeological Society (1872) at the Kiev Theological Academy, the *Historical Society of Nestor the Chronicler (1873) at Kiev University, the *Kharkiv Historical-Philological Society (1877), the *Kiev Juridical Society (1877), the *Odessa (1889) and Nizhen (1894) historical-philological societies, the Volhynian Church-Archeological Society in Zhytomyr (1894), the Kiev Society of Antiquities and Art (1897), the *Podilia Church Historical-Archeological Society in Kamianets-Podilskyi (1903), and the *Kiev Society for the Preservation of Ancient and Artistic Monuments (1910). In regional studies the first associations were the *Society of Kuban Researchers in Katerynodar (1896), a similar one in Katerynoslav (1901), and the *Volhynia Research Society in Zhytomyr (1900).

In 1907 the *Ukrainian Scientific Society was founded in Kiev to unite all scholars in Russian-ruled Ukraine. It modeled itself on the important, multidisciplinary *Shevchenko Scientific Society (NTSh, est 1873), to which most Ukrainian scholars and scientists in Austrian-ruled Galicia belonged. Other societies in Galicia were the *Halytsko-Ruska Matytsia (1848), the *Society of Friends of Ukrainian Scholarship, Literature, and Art (1904), and the *Society of Ukrainian Lawyers (1909).

In the natural sciences the first associations were the university-affiliated *Kiev (1869), *Kharkiv (1869), and Odessa (1870) societies of naturalists; they were followed by the Kharkiv Physics and Chemistry Society (1872), the *Kharkiv Mathematics Society (1879), the *Kiev Physics and Mathematics Society (1890), and the *Kiev Physics and Chemistry Society (1910). In Galicia some Ukrainians belonged to Polish naturalists', historical, philological, and anthropological societies (see also *Naturalists' societies).

Many scholars in Russian-ruled Ukraine also belonged to imperial societies, such as the Free Economic Society (1765), the Moscow Society of History and Russian Antiquities (1805), the St Petersburg (1846) and Moscow (1864) archeological societies, the Russian Historical Society (1866), the St Petersburg Military History Society (1907, with branches in Kiev and Odessa), and the Imperial Russian Geographic Society (1845). The *Southwestern Branch of the Imperial Russian Geographic Society was a center of Ukrainian scholarship in 1873–6.

After the Revolution of 1917 most active scholarly societies were affiliated with universities or other postsecondary institutions. Under Soviet rule most of them became part of the VUAN network. In 1928 the VUAN societies were the Historical Society of Nestor the Chronicler and the Ukrainian Scientific Society in Kiev, which became affiliates in 1920; the History of Literature (1922) and Pedagogical societies in the VUAN Historical-Philological Division; the Geological (1918) and *Ukrainian Botanical (1919) societies in the VUAN Physico-Mathematical Division; and the *Society of Economists (1919) and *Society of Ukrainian Jurists (1921) at the VUAN Social-Economic Division. Outside Kiev other societies (most of them based on pre-revolutionary societies) functioned as VUAN branches. They included the Poltava (1918), Lubni (1920), *Kharkiv

(1924), Dnipropetrovske (1924), Kamianets-Podilskyi (1925), *Odessa (1926), and Shepetivka (1926) scientific societies; the Oster (1924) and Nizhen (1927) scientific regional studies societies; the Cabinet for the Study of Podilia (1924) in Vinnytsia; the *Odessa Regional Studies Commission (1920); and, outside Ukraine, the *Leningrad Society of Researchers of Ukrainian History, Literature, and Language (1922). All of these societies had their own publications.

Non-VUAN societies were also active in the first years of Soviet rule, particularly in the natural, medical, and technical sciences. The Kharkiv Medical Society (1925), with its 16 sections, was prominent among them. In other areas notable associations were the Kharkiv Juridical Society (1923) and the All-Ukrainian Ethnographic Society (1924) in Kiev, the Military Sciences Society at the general staff of the Ukrainian Military District, the Donbas Scientific Society (1926) in Luhanske, and the *All-Ukrainian Learned Association of Oriental Studies (1926), All-Ukrainian Association of Physicists (1926), Ukrainian Society of World Studies (1928), and Ukrainian Physiological Society (1928) in Kharkiv. In the field of *regional studies local societies were created in Ananiv, Bila Tserkva, Berdianske, Dnipropetrovske, Konotip, Luhanske, Poltava, Proskuriv, Tulchyn, and Zinovivske. In 1930 there was a total of 44 scholarly societies in Soviet Ukraine.

In Polish-ruled interwar Western Ukraine the only new scholarly society established was the *Ukrainian Theological Scholarly Society (1923) in Lviv. The Shevchenko Scientific Society continued to unite most Western Ukrainian scholars until 1939.

During the Stalinist terror of the 1930s most societies in Soviet Ukraine were liquidated by the Soviet regime. The same fate befell the Galician societies during the Soviet occupations of 1939–41 and 1945. In Hungarian-occupied Transcarpathia (1941–4) the *Subcarpathian Scientific Society was active.

After 1945 all newly established Soviet Ukrainian societies functioned as republican branches of the all-Union geographic (see *Geographic Society of the Ukrainian SSR), botanical, microbiological, entomological, physiological, biochemical, hydrobiological, paleontological, mineralogical, chemical, medical, and other societies. The popular-scientific *Znannia Society of the Ukrainian SSR was also a branch of an all-Union counterpart. Only the Ukrainian Republican Scientific Society of Parasitologists (1945; nine branches), the Ukrainian Society for Nature Conservation (1946), the Pedagogical Society of the Ukrainian SSR (1960), and the *Ukrainian Society for the Protection of Historical and Cultural Monuments (1966) had independent republican status. Independent of all-Union and republican organizations were the Lviv Geological, Kharkiv Mathematics, and *Odessa Archeological societies.

Ukrainian émigré scholars in Bohemia during the interwar period established the *Ukrainian Historical-Philological Society, the *Ukrainian Law Society, the *Ukrainian Pedagogical Society in Prague, the *Ukrainian Physicians' Association in Czechoslovakia, the *Ukrainian Society of Bibliophiles in Prague, the *Union of Ukrainian Engineers' Organizations Abroad, the *Ukrainian Scholarly Association, and other societies. Scholars in Poland created the *Ukrainian Military History Society.

After the Second World War émigré societies functioned only in the West. They included the revived NTSH

and the Ukrainian Theological Scholarly Society, the *Ukrainian Academy of Arts and Sciences in the US and Canada, the Scholarly Theological societies of the Ukrainian Orthodox Church in Canada (Winnipeg) and the USA (South Bound Brook, New Jersey), the *Ukrainian Academic Society in Paris, the *Research Institute of Volyn, and the *Ukrainian Historical Association. Scholarly work has also been conducted by the *Ukrainian Medical Association of North America, the *Ukrainian Veterinary Medical Association, the *Ukrainian Engineers' Society of America, the *Association of Ukrainian Lawyers, the *Ukrainian Library Association of America, and other professional émigré associations.

(See also *Medical scientific societies, *Pedagogical societies, *Prosvita societies, and *Scientific-technical societies.)

B. Kravtsiv, R. Senkus

School communes (*shkoly-komuny*). General education boarding schools for homeless children and youths, orphans, and juvenile delinquents, founded in the USSR in 1918. They were most prominent in the 1920s, and some schools continued to exist into the 1930s. At first the school communes provided elementary education and basic training in manufacturing processes. In the mid-1920s they became *incomplete secondary schools or institutions of *secondary education, which provided professional preparation as well as the necessary fundamentals for continued education in *tekhnikums and institutions of *higher education. Practical experience in workshops and agriculture was considered fundamental to the life of the children's collectives at the school communes. Among the best-known school communes were the Dzerzhinsky Children's Colony (founded by A. *Makarenko), the Lepeshinsky School Commune, and the Odessa School Commune.

School districts (*uchbovi okruhy*). Prerevolutionary educational administrative territorial divisions created in imperial Russia in 1803 with the educational reforms of Alexander I. The fledgling school system was to be administered from the district capital, and there was to be one university per district. By the 20th century the original 6 districts set up by Alexander I's reform had been parceled into 12 districts. According to the original legislative act only one Ukrainian city, Kharkiv, was the center of a district. Ultimately, three Ukrainian districts were created, the Kiev district (made up of Kiev, Volhynia, Podilia, Chernihiv, and Poltava gubernias), the Odessa district (encompassing Kherson, Katerynoslav, Tavriia, and Bessarabia gubernias), and the Kharkiv district (Kharkiv, Voronezh, Kursk, Penza, and Tambov gubernias and the province of the Don Cossack Host). The school districts were headed by curators.

School drama. A theatrical form of the 17th and 18th centuries, organized around the schools of that time. The playwrights were teachers of poetics, and the performers were the students, who would study the principles of drama by performing. School drama developed from the dialogic verse of the Christmas and Easter cycles, popular in Western Europe from the 12th and 13th centuries and in Ukraine from the late 16th to early 17th centuries. The ear-

liest extant examples are P.*Berynda's *Na rozhstvo virshi ...* (Christmas Poems, 1616) and Y. Volkovych's *Rozmysliian'ie o mutsi Khrysta Spasytela nasheho* (Reflections on the Sufferings of Christ Our Savior, 1631), printed in Lviv. The earliest dramatic works, in a more precise sense of the word, were *Prodav kota v mishku* (He Sold a Cat in a Sack) and *Naikrashchyi son* (The Best Dream), two *intermedes in J. Gawatowicz's Polish tragedy about the death of John the Baptist (1619).

In the second half of the 17th century dramatic literature saw significant developments. Following literary theories of the time, lecturers in poetics would divide dramatic works into tragedies (plays which portrayed tragic events in noble and famous families), comedies (scenes from the lives of the common people), and tragicomedies (works with elements of both). Thematically, school dramas can be divided into plays from the Christmas and Easter cycles, miracle plays (dramas based on legends about saints), morality plays (instructional dramas, in which the characters were personified abstract concepts: Truth, Love, Pride, Faith, Vanity, etc), and historical dramas. From among the extant texts the earliest is a miracle play by an anonymous author, *Aleksii, chelovik Bozhii* (Alexis, Man of God), which was staged in 1673. It was composed of a prologue, two acts, and an epilogue and was based on the legend of Alexis, the son of the Roman senator Euphilian. Influenced by Christ's teachings, Aleksii left his home and marriage and was absent for 17 years. Upon returning to his father's home he lived there for another 17 years as an unrecognized beggar. Only after his death did it become known, from a letter that he had written, that he was truly the senator's son. The repertoire of the Kievan Mohyla Academy also included, among others, the popular morality play *Tsarstvo natury liudskoi* (The Kingdom of Human Nature, 1698), from which only fragments have been preserved.

One of the most popular plays in Western Ukraine was the Easter drama, based on apocryphal tales of the descent of Jesus Christ into hell, *Slovo o zbuveniu pekla* (The Tale of the Harrowing of Hell), which has been preserved in several extant manuscripts from the second half of the 17th and from the 18th century. The drama is notable in that it departs from the rules of poetics of the period; it contains witticisms and portrays folk customs, and therein lay its popularity. The play appeared in an English translation by I. Makaryk as *About the Harrowing of Hell* (1989).

The first play with a historical theme was T. *Prokopovych's tragicomedy *Vladimir*, written in 1705, when the author was beginning to lecture in poetics at the Kievan Mohyla Academy. The play glorifies Volodymyr the Great for having Christianized Rus', and for his battle against paganism, and Hetman I. Mazepa for his patronage of scholarship and the arts, painting and architecture in particular. A drama on a biblical theme, *Iosif patriarkha* (Joseph, the Patriarch, 1708), was written by L. Horka, a lecturer at the Kievan Mohyla Academy. The second play based on Ukraine's historical past, which followed Prokopovych's *Vladimir*, was the drama **Mylost' Bozhii ...* (Divine Grace ..., 1728), written anonymously. Researchers have recognized it as one of the best dramatic works of the 18th century, the 'swan song' (O. Biletsky) of Ukrainian school drama. The well-known historical drama *Trahediia, sirich Pechal'naia povest' o smerty posledniho tsaria*

serbskoho Urosha v ... (A Tragedy, or The Sad Tale of the Death of the Last Serbian Tsar, Urosh v, 1733) was written by a graduate of the Kievan Mohyla Academy, M. Kozachynsky.

In the 18th century dramas were also written on Christmas and Easter themes, namely M. Dovhalevsky's *Komicheskoe diistvie* (A Comic Play, 1736) and *Vlastotvornii obraz chelovikoliubiia Bozhii* (The Power-Endowing Image of Divine Love for Man, 1737), H. Konysky's *Voskreseniie mertvykh* (The Resurrection of the Dead, 1746), and V. Lashchevsky's morality play *Trahedokomediia ...* (Tragicomedy, ca 1742). Altogether 20 handwritten and printed manuscripts of dramas have survived in Ukraine. The graduates of the Kievan Mohyla Academy spread the school drama to Russia as well (such as the plays staged by D. Tuptalo in Rostov). Later researchers (particularly M. Petrov, V. Riezanov) traced the origins of the Ukrainian school drama to the Western European school theater, specifically the Jesuit theater.

Schools for children of the clergy (*dukhovni uchylyshcha*). Four-year schools established in 1884 in the Russian Empire for the children of the clergy. These schools represented the first level of religious education, and their graduates could enter seminaries. Their program of study was similar to that of the first years of the *gymnasium, with the exception of the study of foreign languages. In Ukraine, in 1917 there were 30 such schools. All instruction was in Russian.

Schools for peasant youth (*shkoly selianskoi molodi*). Rural general polytechnical schools created in the USSR in 1923. These schools admitted 12- to 18-year-olds who had completed three- or four-year elementary school programs. Schools for peasant youth offered a four-year program that provided a general education with an agricultural theory and practice component. In 1928, one- and two-year evening courses were introduced, which, among other things, trained tractor operators. In the Ukrainian SSR in 1928, there were 115 schools for peasant youth. In the 108 such schools for which data exist, there were 7,018 students, of whom 1,304, or 18 percent, were women. In 1930, schools for peasant youth were renamed schools for collective-farm youth. In 1934 these schools were reorganized into *seven-year schools.

Schools for rural youth (*shkoly silskoi molodi*). Night schools for youths employed full time in the agricultural industry, established in 1944. Initially, schools for rural youth offered classes which were the equivalent of grades one to four and grades one to seven in *seven-year schools. After 1956 the schools provided courses which covered the material in grades five to ten and eight to ten in *ten-year schools. Graduates of schools for rural youth were eligible for admission to postsecondary institutions. In 1962, in the Ukrainian SSR there were 7,081 schools for rural youth, with 226,900 students. In 1958, schools for ru-

ral youth were renamed evening secondary schools for workers' and rural youth, and in 1971 they were renamed evening secondary general education schools.

Schools for workers' youth (*shkoly robotnychoi molodi*). Night schools for students who work full time, established in 1943 in the USSR. The schools offered the equivalent of grades five through seven in *seven-year schools or grades five through ten in *ten-year schools. Graduates of the schools were eligible for admission to postsecondary institutions. In 1962 there were 2,105 schools for workers' youth, with 469,000 students, in the Ukrainian SSR. In 1958 these schools were renamed evening secondary schools for workers' and rural youth, and in 1971 they were renamed evening secondary general education schools.

Schools-sanatoriums (*shkoly-sanatorii*). Special general education boarding schools for ill and physically disabled children. The curriculum and the general organization of the schools-sanatoriums are the same as those of other boarding schools. In addition the sanatoriums are responsible for supervising the students' medical conditions and treatments and for ensuring that a prescribed regime is followed under trained medical personnel. Emphasis is placed on time spent outdoors, particularly in the sunshine; students are kept on carefully regulated diets according to their conditions. Instruction is conducted at a more relaxed pace than at other schools, with a maximum of three or four classes per day. In some schools-sanatoriums – in those for children with tuberculosis, for example – students maintain a full course load of the *eight-year or even *ten-year school programs. There are schools-sanatoriums in Kiev, Odessa, Transcarpathia, Ternopil, Luhanske, and other oblasts.

Schrijvers, Joseph, b 19 December 1876 in Belgium, d 4 March 1945 in Rome. Belgian Redemptorist priest. In 1913, while he was a professor of theology and prefect at a Redemptorist seminary in Belgium, Metropolitan A. Sheptytsky asked him to establish an Eastern rite branch of the *Redemptorists in Galicia. He was protohegumen of the new province of the order until 1933. He wrote several ascetic works, a number of which appeared in Ukrainian.

Schultz, Heinrich (Shults, Henadii), b 20 December 1907 in Kiev. Hygienist. A graduate of the Kiev Medical Institute (1931), he worked as a sanitation inspector at the Donbasvodtrest in Chervonyi Promin and the Kiev Communal Sanatorium, as the Kiev oblast epidemiologist, as an associate of the Kiev Bacteriological Institute (1934–41), and as director of the Department of Public Health in the Kiev municipal government (1942–3). After the war he emigrated to Germany, where he worked as library director (1951–7) and director (1958–72) of the Institute for the Study of the USSR. He wrote numerous scientific works, including monographs on Soviet epidemiology (1951) and gerontology (1961), and medical entries for the *Entsyklopediia ukrainoznavstva* (Encyclopedia of Ukraine, 10 vols, 1955–88) and *Encyclopedia of Ukraine* (vols 1–2, 1984, 1988).

Schulz, Bruno, b 12 July 1892 in Drohobych, Galicia, d 19 November 1942 in Drohobych. Polish writer and artist of Jewish origin. After studying architecture in Vienna and Lviv, he taught drawing at the Drohobych gymnasii-

um (1924–39). In his autobiographical prose he depicts life in Drohobych and its vicinity using both fantasy and realism. Among his works are *Sklepy cynamonowe* (1934; English trans: *Cinnamon Shops and Other Stories*, 1963), *Sanatorium pod Klepsydrą* (1937; English trans: *Sanatorium under the Sign of the Hourglass*, 1978), and a Polish translation of F. Kafka's *Trial* (1936). He was murdered by the Gestapo.

Schwartzbard Trial. The trial of S. *Petliura's assassin, Shalom Schwartzbard (b 1886 in Izmail, Bessarabia, d 1935 in Cape Town, South Africa), which took place in Paris on 18–26 October 1927. The defendant was a Jew who had participated in the Revolution of 1905 and fled to France in 1906. After serving in the French Foreign Legion during the First World War, he returned to Ukraine in 1917 and joined the Red Guards in Odessa. In 1920 he returned to Paris, where he worked as a watchmaker. After stalking his intended victim for several weeks, he shot the former head of the Ukrainian state on the Rue Racine, Paris, on 25 May 1926. His motive, he claimed, was to avenge the Jewish pogroms that Petliura had instigated in Ukraine during his term in office. There was no question that Schwartzbard had killed Petliura; the central issue of the trial was whether or not he was justified in doing so. In effect the attention of the court was focused on Petliura's actions and policies in 1918–20. The debate on Petliura's responsibility for the anti-Jewish pogroms spilled beyond the courtroom into the European press. In Petliura's defense the Ukrainian community pointed to the chaotic conditions of the revolutionary period and the serious limitations to his power. Their position was developed in *Documents sur les pogromes en Ukraine et l'assassinat de Simon Petliura à Paris* (1927). The prosecution also suggested that Schwartzbard had not acted alone but was part of a conspiracy involving the Soviet authorities. The defense, on the other hand, presented numerous witnesses of the pogroms who claimed that Petliura's sanctioning of them was common knowledge. The defense also dismissed Petliura's orders to stop the pogroms as no more than a belated attempt to win the West's support for his regime. Two books supporting the defense were published in 1927: *Les pogromes en Ukraine sous les gouvernements ukrainiens (1917–1920): Aperçu historique et documents* and B. Lecache's *Au pays des pogromes: Quand Israël meurt*.

The trial attracted much public attention in France. The press depicted Schwartzbard as a 'boyish' watchmaker-soldier who had braved the wrath of the law to slay a notorious *pogromchik*, and aroused much sympathy for him. Ultimately Schwartzbard was acquitted on grounds of justifiable homicide. After the trial he visited Jewish communities in various countries and published his memoirs, *Inem Loyf fun Yoren* (1934). Ukrainians in the West viewed the outcome as a gross miscarriage of justice. In 1958 the Committee in Defense of the Memory of Symon Petliura published *Dokument sudovoï pomylyky: Protseš Shvartsbarda* (A Document of a Judicial Error: The Schwartzbard Trial).

A. Makuch

Schwyz cattle. A breed of dairy and meat cattle developed from original brown shorthorn cattle in the Schwyz canton of Switzerland, introduced in Ukraine at the end of the 19th century to improve local stock. Adult males weigh 800–950 kg; females weigh 550–600 kg and yield

4,000–4,500 kg of milk annually. The animals are colored light gray to dark brown and have characteristic white patches along the upper torso and around the nose. By means of crossing with local cattle new breeds were developed in Ukraine – Lebedyn, Kostroma, and others.

Science fiction (*naukovo fantastychna literatura*). A narrative prose genre predicated on the notion that new scientific discoveries or technological innovations will have an influence on the existence of individuals or societies. Modern science fiction evolved at the end of the 19th century and appeared first in Ukrainian literature in P. Krať's utopian tale *Koly ziishlo sontse* (When the Sun Rose), published in Canada in 1918. The first major work was M. Chaikovsky's *Za sylu sontsia* (For Solar Power, 1925), which featured the development of solar cells capable of converting the sun's rays into electricity and storing it effectively to provide current for public utilities and to power automobiles, trains, and even airplanes. The next important publication was V. Vynnychenko's utopian novel *Soniashna mashyna* (Solar Machine, 1928), which also featured an invention that utilized solar energy, in a machine to produce 'solar bread' from any kind of vegetation.

Although acclaimed by readers, the aforementioned works were proscribed in Soviet Ukraine and superseded by an ideologically oriented 'science fiction of close aims,' a variant of *socialist realism aimed at juvenile readers which monopolized literary production until the late 1950s. Science fiction authors extolled Soviet science and technology and hailed the role of Party ideology in their depictions of imagined events and enterprises such as Soviet supported revolutions of American workers (eg. Yu. Smolych, V. Vladko), the invention of unbreakable glass for the building of tanks and other weapons that could not be seen by the enemy (D. Buzko), the construction of a tunnel between Moscow and Vladivostok for faster transport and military strategy (M. Trublaini), the discovery of the means to control the movement of clouds to irrigate parched areas, and the erection of a wind-driven electric power station (M. Romanivska). Such construction themes prevailed in most science fiction works, which were set in the near future on planet Earth. Only two imagined space journeys were written before the 1950s. One of them entailed a manned expedition to Mars and the discovery of extraterrestrial life (M. Kapil) and the other a flight to Venus to obtain some 'ultragold' needed by the state (Vladko). Even in works with a focus on scientific discoveries, such as an imagined cure for cancer (M. Dashkiiev) or the isolation of new metals to provide complete protection against radiation and high temperatures (V. Savchenko), the themes were meant to illustrate the primacy of socialism and to denounce its enemies.

A new era of Ukrainian science fiction began in the late 1950s with the publication of V. Berezhny's *U zoriani svity* (Into the Astral Worlds, 1956) and O. Berdnyk's *Poza chasom i prostorom* (Beyond Time and Space, 1957). Those works served as pacesetters in new depictions of cosmic journeys to other stars and galaxies and contacts with alien civilizations. In the years that followed there was an unprecedented increase in the number of science fiction themes. Authors began to feature travels to distant solar systems and galaxies, journeys through time and to a 'parallel universe' and into other extraordinary dimensions,

and to dwell on notions such as interplanetary and galactic warfare, including invasions of Earth by hostile alien creatures; above all they began to write about previously prohibited subjects, such as the evolution of humans and other life forms, including robotic and humanoid creatures that gave rise to superhuman or even godlike beings. The authors also began to raise questions about the psychological, parapsychological, and sociological implications of such phenomena.

The proliferation of such themes during the 1960s and in the following decades contributed to the rise in popularity of science fiction, which soon became the most widely read genre in Soviet Ukraine. But the number of themes and the volume of publications did not ensure an overall improvement in the quality of works of science fiction. A great many of them remained simple and puerile adventure tales. A few science fiction writers, however, became the foremost contributors to the genre either by way of their extraordinary imagination, or by the number of then published items, or by the significance of the scientific, technological, philosophical, and religious notions postulated in their works. That group includes Berdnyk, Berezhny, O. Romanchuk, I. Rosokhovatsky, O. Teslenko, and V. Zaiets. Some of those writers addressed themes such as the consequences of genetic engineering for the evolution of human nature and whether it should culminate in a 'synman' (synthetic man) or an immortal and omniscient godlike being; the utilization of genetic engineering for hostile purposes, including the design and production of biological entities which could annihilate the human race and the development of techniques which would give rise to thought or mood control of entire populations; the growth, storage, and retrieval of vast volumes of knowledge in all scholarly fields; and the rise of intelligent and self-programming robotic beings and their rights and privileges in human societies.

Frequently linked and intertwined with scientific, psychological, and philosophical notions is the problem of ethics. Science fiction writers dwell not only on human ethics in the context of new developments in science and technology, but also on 'xenological ethics,' pertaining to the 'human' behavior of various creatures from space and the robotic and humanoid cultures that could evolve as a result of advancements in science.

The prevalence of complex scientific, philosophical, and even religious notions in recent Ukrainian science fiction alarmed and confused the Soviet literary authorities and Party ideologists, to such an extent that the Soviet regime harassed and prosecuted writers such as Berdnyk and M. Rudenko and eventually incarcerated them for their involvement in the Ukrainian Helsinki Group movement. But the majority of the Ukrainian science fiction writers realized that no criticism of the Soviet system would be tolerated in their popular genre, and refrained from criticizing it either overtly or obliquely. They were not reluctant, however, to censure the scientists for their professional involvements. They lampooned the role that scientists play in developments such as warfare and direct or indirect mind-control and in undertakings that benefit not the population at large but only the scientists themselves and political leaders. In addition to ridiculing severely the careerists in science, science fiction authors strove to scrutinize the general aims of science and the final results of scientific endeavors.

As a literary genre Ukrainian science fiction reached the apex of its development in the 1970s and 1980s with the rise of humorous treatments of scientific premises and of parodies of the ideas and literary forms promulgated by science fiction writers. That phenomenon does not augur the decline of science fiction in Ukrainian literature, however. Recently there has occurred a resurgence of interest in history on the part of science fiction writers, an attempt to view Ukrainian culture in the light of its contemporary and future development and place it in the context of the cosmic evolution of life. Science fiction as a result has gained an ascendancy not achieved by other genres, by dwelling on themes from the past, present, and future perspectives of Ukrainian culture in global and cosmic dimensions.

Some of the more noteworthy works of Ukrainian science fiction from 1925 to 1949 in addition to those already mentioned are Vladko's novelette *Idut' robotari* (The Robots March, 1931) and novel *Arhonavyi Vsesvitu* (The Argonauts of the Universe, 1935), M. Kapii's *Kraina blakytynykh orkhidei* (The Land of Azure Orchids, 1932), P. Lisovy's *Chervona raketa* (The Red Rocket, 1932), Buzko's *Kryshdalevyi kraj: Roman* (The Crystal Land: A Novel, 1935), Smolych's *Prekrasni katastrofy* (Beautiful Catastrophes, 1935), and Trublaini's novel *Hlybynnnyi shliakh* (A Profound Path, 1948); from 1950 to 1960, Dashkiiiev's *Torzhestvo zhyttia* (Celebration of Life, 1952) and *Volodar vsesvitu* (Ruler of the Universe, 1955), Berdnyk's novels *Shiakh Tytaniv* (The Paths of the Titans, 1959) and *Strila chasu* (Arrow of Time, 1960), and Savchenko's *Chorni zori* (Black Stars, 1959); and from 1960 to 1970, Berdnyk's *Sertse vsesvitu* (Heart of the Universe, 1962) and *Dity bezmezhhzia* (Children of Infinity, 1964), Berezhny's *V nebi - zemlia* (The Earth in the Heavens, 1962), *Istyna poruch* (The Truth at Hand, 1965), *Trava spivaie* (The Grass Sings, 1965), and *Koliuche ternia* (The Prickling Thornbush, 1966), Savchenko's *Pryvyd chasu* (The Apparition of Time, 1964), M. Rudenko's *Charivnyi bumeranh* (The Magic Boomerang, 1966), Yu. Lotsmanenko's collection of fantastic stories *Pravo zhyty* (The Right to Live, 1967), Rosokhovatsky's *Sprava komandora* (The Affair of the Commander, 1967), V. Bezorudko's somewhat humorous *Neitrino zalyshaetsia v sertsii* (Neutrino Remains in the Heart, 1968), and Yu. Yacheikin's *Zoriani mandry kapitana Nebrekhy* (The Stellar Wanderings of Captain Nebrekha, 1969).

Since 1970 the most prolific author of science fiction has been Berezhny (*U prominni dvokh sonts'* [In the Rays of Two Suns 1970], *Pid kryzhanym shchytom* [Under the Icy Shield, 1971], *Povitriana linza* [The Aerial Lens, 1975], *Povernennia 'Halaktyky'* [The Return of the 'Galaxy', 1978], *Kosmichnyi Hol'fstrim* [The Cosmic Gulf Stream, 1980], and *Labirynt* [The Labyrinth, 1986]); he is closely followed by Rosokhovatsky (*Iakym ty poverneshsia?* [What Will You Be Like When You Return?, 1970], *Urahan* [Hurricane, 1977], *Zvorotnyi zv'iazok* [Reverse Connection, 1983], *Mozhlyvist' vidpovidii* [Possibility of a Reply, 1986], and *Ostannii syhnal* [The Last Signal, 1989]), and Teslenko (*Dozvol'te narodytysia* [Let Me Be Born, 1979], *Koryda* [Corrida, 1983], *Vykryulenyi prostir* [Twisted Space, 1985], and *Kam'iane iaitse* [Stone Egg, 1988]). Other notable works include Berdnyk's *Zorianyi korsar* (Stellar Corsair, 1971), Rudenko's *Narodzhennyi blyskavkoiu* (Born from Lightning, 1971), V. Hrybenko's *Fabryka heniiv* (Genius Factory, 1976), A. Dimarov's *Druha planeta* (Another Planet, 1980), Roman-

chuk's *Taiemnytsia zhovtoi valizy* (Secret of the Yellow Suitcase, 1981) and *Zorianyi krystal* (Stellar Crystal, 1986), and Zaiets's *Mashyna zabuttia* (Forgetting Machine, 1982).

W. Smyrniw

Scientific Research and Design-and-Technology Institute of the Urban Economy (Naukovo-doslidnyi i konstruktorsko-tehnolohichniy instytut miskoho hospodarstva). An institution established in Kiev in 1963 under the Ukrainian SSR Ministry of Communal Housing. It prepares construction plans and designs and conducts research in fields such as civil engineering, road building, electrification, and sanitation engineering. The institute is composed of over 50 specialized departments and sections.

Scientific Research and Planning Institute of the Metallurgical Industry (Naukovo-doslidnyi i proektnyi instytut metalurhiinoi promyslovosti, or Diprostal). A research institution, until 1992 under the jurisdiction of the USSR Ministry of Ferrous Metallurgy. It was founded in Kharkiv in 1928 as a branch of a state institute for planning new metallurgical plants and reconstructing existing ones in Ukraine. It was reorganized in 1930 into the State Institute of the Metallurgical and Manganese Industries and in 1965 into its present form. It has (1980) 44 departments, 11 of them on location at operating plants. Its chief areas of interest are technical and economic problems in the production of ferrous alloys and the planning of new and reconstructed metallurgical plants, plants for reprocessing secondary ferrous metals, and repair plants for metallurgical equipment. In the former USSR it was one of the main research institutes for the automation of labor-intensive processes in the production of ferrous alloys and designing machinery for pouring cast iron and ferrous alloys.

Scientific research chairs (naukovo-doslidni katedry). Soviet Ukrainian academic institutions of the 1920s and 1930s that conducted research and trained scholarly cadres. They were directly subordinated to the Ukrainian SSR Commissariat of Education. Most were attached to postsecondary schools, some were affiliated with the VUAN, and a few were completely independent. Each chair had a director and section leaders, full members, scientific co-workers, and graduate students (who became scientific co-workers after successfully defending their theses before a public meeting of the chair). Most of the chairs published their own serials and collections. In 1930 there were 104 chairs: 48 in Kharkiv, 32 in Kiev, 13 in Odessa, 7 in Dnipropetrovske, 3 in Kamianets-Podilskyi, and 1 in Nizhen. Institutions with more than one chair were the Kharkiv Technological and People's Education institutes (10 each), the Ukrainian Institute of Marxism-Leninism in Kharkiv (9), the Kiev Polytechnical Institute and the VUAN (8 each), the Kharkiv Medical Institute (7), the Kiev Agricultural Institute (6), the Kiev People's Education and Dnipropetrovske Mining institutes (5 each), the Kharkiv Agricultural Institute (4), the Kiev Medical and Odessa People's Education institutes (3 each), and the Kharkiv Veterinary, Kamianets-Podilskyi Agricultural, Odessa Polytechnical, Agricultural, and Medical, and Dnipropetrovske People's Education institutes (2 each). Some larger chairs subsequently became scientific research in-

stitutes (eg, the Scientific Research Institute of the History of Ukrainian Culture in Kharkiv). In the mid-1930s most of the chairs were liquidated and replaced by institutes at the newly reorganized universities and other postsecondary schools.

R. Senkus

Scientific Research Institute of Animal Husbandry of the Forest-Steppe and Polisia of Ukraine (Naukovo-doslidnyi instytut tvarynnytstva lisostepu i Polissia Ukrainy). Established in 1956 in Kharkiv on the basis of the Ukrainian Scientific Research Institute of Animal Husbandry (est 1935), which itself evolved from the union of the Ukrainian Scientific Research Institute of Great Horned Cattle (1932–5) and the Southern Scientific Research Institute of Milk Production of the All-Union Academy of Agricultural Sciences (1930–2). It consists of 10 divisions and 6 laboratories. Divisions are organized according to animals – great horned cattle, swine, sheep, horses, rabbits – and activities – agricultural animal breeding, the technology of animal husbandry products, mechanization, agricultural economy, and the organization and production of fodder. The six laboratories are for zoochemical analysis, the artificial insemination of agricultural animals, biochemistry, combination fodder, dairy science, and the physiology of agricultural animals. The Kiev Experimental Station of Animal Husbandry eventually became a part of the institute. Many new breeds of animals were developed there, including Myrhorod swine and Lebedyn cattle, as well as a new method of artificial insemination with cryopreserved semen.

Scientific Research Institute of Building Production (Naukovo-doslidnyi instytut budivelnoho vyrobnytstva). The chief research institution in Ukraine for the organization, technology, mechanization, and economics of construction. Set up in Kiev in 1957 under the jurisdiction of the Ukrainian SSR State Committee for Construction, it was divided into departments in Lviv and Odessa, branches in Dnipropetrovske and Luhanske, laboratories, and a building design office. A graduate program was offered.

Scientific Research Institute of Building Systems (Naukovo-doslidnyi instytut budivelnikh konstrukttsii). A research institution, until 1992 under the jurisdiction of the USSR State Committee for Construction. It was founded in Kiev in 1957, with branches in Siverskodonetske, Zaporizhia, and Kremenchuk. Its departments and laboratories developed methods for determining structural demands on buildings on settling strata and filled grounds, improved building systems for industrial buildings, devised new methods of testing the quality of building systems, and studied the problems of applying precast parts in residential construction. Since 1964 it has published the technical collection *Stroitel'nye konstrukttsii*.

Scientific Research Institute of Corn, All-Union (Vsesoiuznyi naukovo-doslidnyi instytut kukurudzy). Located in Dnipropetrovske, it was the main center for scientific research on the selection and cultivation of corn in the All-Union Academy of Agricultural Sciences. It was established on the basis of the Ukrainian Scientific Research Institute of Grain in 1956, at the height of N.

Khrushchev's campaign to increase corn production in the USSR. With research stations in all the main corn-growing areas of the USSR, it developed new hybrids and strains of corn, offered graduate studies, and published a bulletin.

Scientific Research Institute of Dermatology and Venereology (Kharkivskiyi naukovo-doslidnyi instytut dermatologii i venerologii). A research agency of the Ministry of Health of Ukraine. Founded as an institute by O. Fedorovsky in Kharkiv in 1924 on the basis of the Kharkiv Dermatological and Venereological Polyclinic, it is the main research center in its field in Ukraine. With its three clinical departments, five laboratories, and several auxiliary departments, it conducts research of the pathogenesis, etiology, early diagnosis, treatment, and prophylaxis of skin and venereal diseases, and publishes a serial collection of papers, *Dermatologiya i venerologiya*, in Russian.

Scientific Research Institute of Economics of the State Planning Committee of the Ukrainian SSR (Naukovo-doslidnyi ekonomichnyi instytut Derzhplanu URSR). An institution of the State Planning Committee of the former Ukrainian SSR, established in 1962 in Kiev. It prepared economic predictions and forecasts and participated in the *economic planning process in Ukraine. It also conducted research on the methodology of economic planning and capital investment. The institute was composed of 23 sections, 13 of which focused on specific sectors of the economy. It co-operated closely with other state planning bodies and the AN URSR (now ANU) Institute of Economics and published collections of articles by its researchers.

Scientific Research Institute of Land Cultivation and Animal Husbandry of the Western Regions of Ukraine (Naukovo-doslidnyi instytut zemlerobstva i tvarynnytstva zakhidnykh raioniv Ukrainy). Part of the Ukrainian Academy of Agricultural Sciences, it was established in 1956 by the union of the AN URSR (now ANU) Institute of Agrobiology, the Lviv Scientific Research Station of Agriculture, and the Lviv State Farm. It is located in Obroshyne, Pustomyty raion, Lviv oblast. The Subcarpathian and Alpine-Carpathian agriculture research stations and two independent research units in Sokilnyky and Obroshyne are also components of the institute. It has 13 divisions: land cultivation, vegetation, selection and seed cultivation, meadow cultivation and fodder production, the melioration and control of ground erosion, fruit production, the organization and economy of agricultural production, plant protection, the husbandry of great horned cattle, swine, sheep and poultry, agricultural mechanization, and scientific information. Its five laboratories are for agricultural products technology, the artificial insemination of agricultural animals, agricultural animal breeding, the zoohygiene of agricultural animals, and plant nourishment, physiology, and agrochemistry. The institute offers a graduate program leading to advanced professional degrees.

Scientific Research Institute of Pedagogy of Ukraine (Naukovo-doslidnyi instytut pedahohiky Ukrainy). A research institution under the jurisdiction of the Ministry of Education of Ukraine. Founded in Kharkiv

in 1926 as the Ukrainian Scientific Research Institute of Pedagogy, it opened a branch in Kiev in 1930 and was moved there in 1934. From 1955 to 1991 it was called the Scientific Research Institute of Pedagogy of the Ukrainian SSR. The institute has 17 departments. It initiates and coordinates research in the field of pedagogy and is the leading center of pedagogical training in Ukraine. Since 1963 it has published nine periodic compendiums, among them *Pedahohika*, *Doshkil'na pedahohika i psykholohiia*, and *Metodyka ukrains'koi movy i literatury*.

Scientific Research Institute of Sugar Beets, All-Union (Vsesoiuznyi naukovo-doslidnyi instytut tsukrovykh buriakiv). A Kiev-based center, formerly under the USSR Ministry of Agriculture, responsible for organizing and co-ordinating research on sugar beets and the selection of new beet types. The institute was established in Kiev in 1922 as the Scientific Institute of Selection, and obtained its present name in 1945. The institute (1984) consists of 20 departments, 4 laboratories, and 2 research farms. It also manages nine research and selection stations and an affiliated branch in Krasnodar krai. The institute's mandate included the development of sugar beet varieties appropriate for the varied climatic zones of the USSR. In addition to cultivating 29 sorts and hybrids, the institute was a leader in the development of the monogerm variety of sugar beet. It also offers a graduate program and publishes collections of scientific literature.

Scientific Research Institute of the History of Ukrainian Culture (Naukovo-doslidnyi instytut istorii ukrainskoi kultury im. D. Bahaliia). An institution of higher learning, established in 1922 in Kharkiv. It was founded by D. Bahalii as the Scientific Research Chair of the History of Ukrainian Culture, with departments of Ukrainian history, ethnography, literature, and arts, as well as a graduate department. Members of the institute included a majority of Kharkiv historians, students, and Bahalii's associates, and historians from Kiev (O. Ohloblyn, N. Polonska-Vasylenko, V. Romanovsky), Odessa (M. Slabchenko), Poltava (M. Hnip), Nizhen (M. Petrovsky, A. Yershov), and other Ukrainian cities. The institute's associates worked on subjects of general Ukrainian interest and on problems of the history of Slobidska Ukraine. The institute (and earlier the chair) published the collection *Zbirnyk* and its scientific proceedings, *Naukovi zapysky* (10 vols, 1924–30). In 1934 the institute was liquidated and many of its members were either repressed or transferred to the AN URSR (now ANU) or to the All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes.

Scientific Research Institute of the Leather and Footwear Industry (Naukovo-doslidnyi instytut shkriano-vzuttievoi promyslovosti). One of the chief research institutions under the Ministry of Light Industry, devoted to the improvement of the technology and the quality of products in the leather and footwear industry. It was organized in Kiev in 1930 out of the Central Laboratory of the Leather and Footwear Trust. In 1983 the institute consisted of 4 departments, 12 laboratories, and an experimental factory. Its research was directed toward improving the existing technology and replacing it with a more efficient one.

Scientific Research Institute of the Organization and Mechanization of Mine Construction, All-Union (Vsesoiuznyi naukovo-doslidnyi instytut orhanizatsii ta mekhanizatsii shakhtnoho budivnytstva). The chief research institute for the organization and mechanization of mine shaft construction in the former Soviet Union. Founded in Kharkiv in 1947, it came under the jurisdiction of the USSR Ministry of the Coal Industry. It had (1980) 15 laboratories, 5 departments, a branch in Kryvyi Rih, an experimental mine in Donetske, and sectors in Voroshylovhrad (now Luhanske), Donetske, Karaganda in Kazakhstan, and Nizhnii Tagil, Novokuznetsk, Shakhty, and Shchekino in the RSFSR. The institute developed and refined methods for organizing the construction and reconstruction of shafts, pits, and complexes. It designed and introduced improved equipment, instruments, structural systems, and building materials and drafted safety standards and codes for mine construction. From 1949 it published the collection *Voprosy organizatsii i mekhanizatsii shakhtnogo stroitel'stva*.

Scientific Research Institute of the Organization of Production and Labor in Ferrous Metallurgy, All-Union (Vsesoiuznyi naukovo-doslidnyi instytut orhanizatsii vyrobnytstva i pratsi chornoii metalurhii). A research institute organized in Kharkiv in 1956 out of the Research Office for the Organization and Rationalization of Ferrous Metallurgy, until 1992 under the jurisdiction of the USSR Ministry of Ferrous Metallurgy. In 1980 it had 12 departments, which dealt mainly with new production and management methods, transportation, the regulation and improvement of labor productivity, and the conservation of materials and energy. The institute published the periodic collections *Organizatsiia truda v chernoi metallurgii* and *Organizatsiia i upravlenie metallurgicheskim proizvodstvom*.

Scientific Research Institute of the Sugar Industry, All-Union (Vsesoiuznyi naukovo-doslidnyi instytut tsukrovoi promyslovosti). A research institution under the USSR Ministry of the Food Industry until 1991. It was organized in Kiev in 1927 out of the department of agricultural technology at the Kiev Polytechnical Institute. It was a key member of the Tsukor research and production conglomerate. In 1983 the institute consisted of 9 departments and 13 laboratories, a graduate school, and a branch in Kursk. Its mandate was to improve the technology of harvesting and storing sugar beets, to develop more efficient control methods and equipment for processing sugar beets and cane and for refining raw sugar, to reduce the consumption of energy in sugar refineries, to mechanize labor-intensive phases of the production process, and to automate as much of the process as possible. Attention was also devoted to labor management and work safety in the sugar industry.

Scientific Research Institute of Urban Planning (Naukovo-doslidnyi i proektnyi instytut mistobuduvannia, aka Kiev Scientific Research Institute of Urban Planning). An architectural research institution organized in Kiev in 1963 out of the Scientific Research Institute of Urban Planning of the former Academy of Construction and Architecture of the Ukrainian SSR and several architectural planning workshops of the Ukrainian Scientific Research

Institute of Urban Planning. It deals with economic problems of city planning, population distribution, regional planning, the architectural layout of cities and settlements in Ukraine, transportation networks, landscaping, environmental upgrading, and the distribution and planning of resort areas. The institute offers full-time and correspondence graduate programs. New cities in Ukraine, such as Dniprorudne, Chervonohrad, Novovolynske, Dniprodzerzhynske, and Pivdenne, were developed according to plans prepared by the institute.

Scientific Research Institute of Virology and Epidemiology (Odeskyi naukovo-doslidnyi instytut virusolohii ta epidemiolohii im. I. Mechnikova). A research institution under the Ministry of Health of Ukraine, formed in 1920 out of the Odessa Bacteriological Station, which had been established by I. *Mechnikov in 1886. The institute has 5 departments and 10 laboratories. Among its scientists have been M. *Hamaliia and D. *Zabolotny. Its main research interest is the prevention, diagnosis, and treatment of influenza. It publishes an annual collection of papers on viruses and viral diseases titled *Virusy i virusni zakhvoriuvannia*.

Scientific Research Institute of Wheat Selection and Seed Cultivation. See Myronivka Institute of Wheat Selection and Seed Cultivation.

Scientific research institutes (*naukovo-doslidni instytuty*, or NDI). Research institutions that function independently or are part of scientific academies, scholarly societies, universities, other postsecondary schools, governmental bodies, or international agencies. In Soviet Ukraine most NDI were established in the 1920s. The overwhelming majority were located in Kharkiv (Soviet Ukrainian sources [1930] list 43, whereas émigré Ukrainian sources contend there were 93), Kiev (21 vs 69), and Odessa (7 vs 42). Others were located in Dnipropetrovske (2), Poltava (2), and Makiivka, and (according to émigré sources) Vinnytsia and Chernihiv. *Scientific research chairs and certain VUAN commissions, committees, and cabinets functioned in the same way as NDI, and most of them were reorganized into NDI in the late 1920s and early 1930s (14 in 1933, 21 in 1935).

Many NDI were established after the Second World War. By the 1980s over 60 had become part of the *Academy of Sciences of the Ukrainian SSR. Hundreds of others were subordinated to the USSR academies of Sciences, Agricultural Sciences, and Medical Sciences, various all-Union and republican ministries and agencies, the Council for Mutual Economic Assistance, UNESCO, and several international scientific organizations. (For information on individual Soviet Ukrainian institutes, see entries beginning with 'Institute ...,' 'Scientific Research Institute ...,' 'Ukrainian Institute ...,' and 'Ukrainian Scientific Research Institute ...')

In the West the role of Ukrainian NDI was performed during the interwar period by the Ukrainian Sociological Institute in Vienna (1919–24), the Ukrainian Institute of Sociology in Prague (1925–32), and the Ukrainian scientific institutes in Berlin (1926–45) and Warsaw (1930–9). In the postwar period the Shevchenko Scientific Society's Encyclopedia of Ukraine Institute in Munich and Sarcelles, France (est 1947), the Research Institute of Volyn in

Winnipeg (est 1951), the Scientific Theological Institute of the Ukrainian Orthodox Church in South Bound Brook, New Jersey, the Ukrainian Military History Institute in Toronto (1952–69), the Lypynsky East European Research Institute in Philadelphia (est 1963), the Harvard Ukrainian Research Institute (est 1973), the Canadian Institute of Ukrainian Studies in Edmonton (est 1976), and the Ukrainian Canadian Research and Documentation Centre (est 1982) have functioned as NDI.

Scientific research institutes of forensic experts (*naukovo-doslidni instytuty sudovykh ekspertyz*). Institutions that conduct forensic analysis in criminal and civil cases and theoretical and practical research in forensic sciences. On order from the courts or the police they perform chemical, physical, ballistic, biological, and various technical tests for use in investigations and trials. There are two forensic research institutes in Ukraine, in Kiev (with a branch in Lviv) and in Kharkiv. Both were founded in 1923.

Scientific researcher (*naukovyi spivrobotnyk*). A term applied to persons involved in scholarly research in scientific research institutes, departments, laboratories, stations, and other institutions. The term also denotes rank.

The term 'scientific researcher' became widely used in Ukraine and in the USSR during the 1920s. Until 1922 all research was concentrated in *universities and the All-Ukrainian *Academy of Sciences. That year, however, universities were reorganized into institutes of people's education and industrial-technical institutes. Research chairs were established in those institutions, and their scholarly staff were called scientific researchers.

From the mid-1920s the term 'scientific researcher' came to denote a specific position, also known as 'scientific worker' (*naukovyi pratsivnyk*). By 1925 there were six ranked categories of scientific researchers, ranging from graduate students to renowned senior scholars. The title of scientific researcher did not necessarily imply that the person who held it had academic qualifications. Party figures (eg, V. Zatonsky and M. Skrypnyk) who had no academic degrees were listed as scientific researchers of research chairs at the *Ukrainian Institute of Marxism-Leninism.

During the 1930s the number of scientific researchers rapidly expanded to meet the Soviet state's science and technology needs. In Ukraine their number had increased from 866 in 1929 to 1,543 by 1934. As a result of the Stalinist purge of so-called bourgeois nationalists, however, the proportion of ethnic Ukrainian researchers declined from 50 percent of the total in 1929 to 30 percent in 1934. The proportion of Russians increased from 30 to 50 percent in the same period, and the proportion of Jews in the group remained stable at 16 percent. By 1940 there were 19,304 scientific researchers in Soviet Ukraine. The growth in their number was accompanied by an overall drop in the level of their professional qualifications. The ranks of senior scientific researcher and junior scientific researcher were introduced in 1934 and 1937 respectively. They remained in use until 1985.

The number of scientific researchers in Ukraine grew from 22,363 in 1950 to 46,657 in 1960 and 171,478 in 1975. With time the term came to be applied to any researcher with appropriate educational credentials. Most, however,

have not had graduate degrees, and their rising number has tended to reduce the level of qualifications of the group as a whole. Between 1950 and 1975 the number of scientific researchers with doctorates dropped from just over 4 percent to 2.4 percent, and the proportion of those with candidate of sciences graduate degrees remained the same, at 27.5 percent. Most Soviet research was centralized in Russia, particularly in Moscow. In 1975 Ukraine had only 14 percent of the total number of scientific researchers in the USSR, whereas its share of the total population of the USSR was 20 percent.

In 1987 Ukraine had 215,000 scientific researchers, of whom only 3 percent had doctorates, and 33 percent, candidate of sciences degrees. Its share of the total number of scientific researchers in the USSR remained at 14 percent. Almost 17,000 scientific researchers worked in AN URSS (now ANU) institutions; 9 percent of them had doctorates, and 51 percent had candidate of sciences degrees.

In 1985 a new system of five scientific research categories was introduced: junior (*molodshyi*) scientific researcher, scientific researcher, senior (*starshyi*) scientific researcher, directing (*veduchyi*) scientific researcher, and chief (*holovnyi*) scientific researcher. The last two ranks are, as a general rule, offered only to those with a doctorate. The five categories were introduced to provide material incentive to improve research and qualifications, inasmuch as a promotion to a higher rank included a salary increase. In practice, however, because promotion has been under the control of the administration of a research institution, the new ranks have served as a bureaucratic tool for manipulating scholars.

H. Kasianov, B. Krawchenko

Scientific-technical societies (*naukovo-tekhnicni tovarystva*). Mass organizations for promoting scientific and technological development, improving economic performance, and raising labor productivity. The history of scientific-technical societies in Ukraine is linked closely with the development of such societies in Russia. Branches of the Imperial Russian Technical Society (est 1866) in St Petersburg were set up in Ukraine: in Mykolaiv (1869), Kiev (1870), Odessa (1871), Kharkiv (1879), Volhynia (1897), and Kremenchuk (1900). The Kiev branch took part in the construction of the city's water-supply and sewage systems, streetcar network, gas and electric lighting, and river transport. In 1884 it organized the empire's only secondary technical school of sugar refining, at the Smila refinery, and in 1897 it began to raise funds for building the Kiev Polytechnical Institute.

After the revolution the government called for the formation of mass organizations to promote economic development: in 1921 the Soviet of People's Commissars of the Russian SFSR issued a decree encouraging such organizations. The Ukrainian Scientific-Technical Society was established in Kharkiv in 1927 as an organization of technical-school teachers and engineers. It sponsored lectures and publications, such as *Naukovo-tekhnicnyi visnyk*, *Ukrains'ki sylykaty*, *Sil's'ko-hospodars'ka mashyna*, *Tekhnika masam*, and *Problemy teplotekhniki*. It had branches in Kiev, Poltava, Dnipropetrovske, Odessa, and Artemivske and a membership of over 300. It was headed by K. Sukhomlyn and was dissolved in the mid-1930s. Its functions were taken over by the Ukrainian branches of all-Union scientific and engineering societies that were set up in the different industries starting in 1932.

Since 1954 the activities of scientific-technical societies have been directed by the trade unions. The First Ukrainian Republican Conference of Scientific-Technical Societies, held in Kiev in 1958, represented 150,000 members and elected the Ukrainian Republican Council of Scientific-Technical Societies. By 1984, societies in 24 branches of the economy represented 2,600,000 members in Ukraine. The largest (over 200,000 members) were in agriculture, machine building, and the construction industry. The work of 31,000 primary cells at the local level is co-ordinated by city and oblast councils within each society. The societies hold conferences, seminars, courses, exhibitions, and competitions on scientific and economic issues and sponsor local groups and laboratories (860,000 members) devoted to research, information gathering, and economic analysis. The societies publish 14 magazines with the help of ministries and departments of industry. The Ukrainian Republican Council of Scientific-Technical Societies was headed by I. Trefilov. Many members of the Academy of Sciences of Ukraine are active in the societies.

Scopolia (Ukrainian: *skopoliia*). A genus of large perennial herbs of the family Solanaceae. In Ukraine *S. carniolica* is found in the Carpathian Mountains and the western and Right-Bank forest-steppe, and *S. tubiflora* Kreyer is found in the western forest-steppe. The herbs are also cultivated as medicinal plants; their roots contain the alkaloids atropine, hyoscyamine, and scopolamine.

Scouting. See Plast Ukrainian Youth Association.

Scraba, Wasyl [Škraba, Vasył'], b 1 March 1907 in Dominion City, Manitoba, d 18 April 1971 in Toronto. Businessman, politician, and community leader. He served 11 years as a trustee on the Winnipeg Board of Education, and then as alderman (1934-40) and the Liberal member of the legislative assembly for Winnipeg North (1945-9). Besides publishing the irregular *Ukrainian Canadian Review* (Winnipeg, 1936-42) he was active in the Prosvita Institute, the Ukrainian People's Home, the Ukrainian Professional and Business Club, and the Ukrainian Canadian Legion No. 141.

Scranton. A city (1980 pop 88,117) in northeastern Pennsylvania, with an estimated Ukrainian population of 2,500. The first Ukrainian census, conducted in 1909, indicated 2,000 people, a figure which rose to 4,000 in 1916. The Ukrainian population then began to diminish, so that by 1930 there were only 3,212 Ukrainians. After the Second World War an influx of displaced persons increased the Ukrainian population to approx 7,000 (1960). It has dropped rapidly since then.

Ukrainians began to arrive in Scranton during the 1880s to work in the anthracite mines, as well as on the railway and in textile industries. The community church was built in 1890 on the South Side; it later split into separate Galician (Ukrainian) and Transcarpathian parishes.

For many years the local Ukrainian Catholic church of St Volodymyr was instrumental in guiding Ukrainian social and cultural activities, including the staging of plays and the sponsoring of a Saturday school (from the 1920s). After the Second World War the church built a school (1950s) and a social hall (1960s). In the late 1920s a portion of the Ukrainian Catholic parish separated and formed the St Michael Ukrainian Orthodox church.

In 1910 Scranton hosted the founding convention of the Ruthenian National Association, and later became its headquarters. The association's name was changed to the Ukrainian Workingmen's Association in 1918 and to the *Ukrainian Fraternal Association (UFA) in 1978. In Scranton the UFA has organized a school, orchestras, and drama groups. The Ukrainian Community Center, purchased in 1957, serves as a major focal point for social and youth activities. The UFA has used Scranton as the publishing center for its newspaper *Narodna volia* (1910–) and its *English Supplement* (renamed *Fraternal Voice* in 1976); the magazine *Forum* (1967–); the almanacs *Tovarysh Emigranta* (1915–23), *Kalendar Robitnychoho Soiuзу* (1923–42, 1951), and *Almanac* (published irregularly since 1950); and other publications. Rev. I. Ardan edited *Svoboda* in Scranton in the early 1900s and opened the Ruthenian Book Store, which also published books.

Chapters of the Ukrainian American Veterans, the League of Ukrainian Catholics of America, and the Ukrainian Orthodox League of the United States have been active in Scranton. In 1984 the local Ukrainian Students' Club organized Eastern Christian studies and published *Diakonia*, an English-language quarterly. In addition to branches of the UFA, Scranton has branches of the Ukrainian National Association, the Providence Association, the Ukrainian Congress Committee of America, and the Ukrainian American Citizens' Club.

A. Lushnycky

Sculpture. A general term in visual art for three-dimensional representations made by carving or modeling in a variety of materials, of which stone and clay are the most widely used. Sculpture encompasses monuments and statues, which are usually large in scale and are meant for public display; decorative or ornamental works; intimate or private pieces; and small forms. Basically it may be divided into works that are freestanding and works that are attached to a background (relief sculpture).

In Ukraine sculptural depictions dating back to the Paleolithic period have been found at the Mizyn archeological site (schematized female figures made from mammoth bones). Terra-cotta figures from the Trypilian culture and stone stelae have survived from the Bronze Age. The *Scythians left behind beautiful examples of relief sculpture. Numerous examples of Hellenic figural sculpture have been found among the ruins of the *ancient states on the northern Black Sea coast. These include heads of Aphrodite, Zeus, and Artemis, at the site of Olbia; a memorial bust (3rd–2nd century BC), at the site of Chersonese Taurica; and terra-cotta figures connected with the cults of Demeter, Aphrodite, and Astarte. Pre-Christian examples from the 1st millennium AD include the stone relief in the village of Busha, Vinnytsia oblast, of a kneeling figure, behind which stands a deer with antlers, praying to a tree with a rooster in it (1st century); stone idols, such as the one in the village of Ivankivtsi, Khmelnytskyi oblast (4th–6th century); and the *Zbruch idol, carved in low relief on all four sides of a block of stone. None of the wooden, gilded idols mentioned in the Rus' chronicles have survived. Life-size freestanding *stone *babas* dating from the 11th to 13th centuries AD were erected in the steppes of Ukraine by Turkic tribes. Thought to be tomb monuments of unknown function, these male and female figures in standing and sitting poses were bulky, schematized depictions differentiated by accessories of dress.

Only a few sculptures from the period of Kievan Rus' (10th–12th centuries) have been preserved. Two reliefs from St Michael's Golden-Domed Monastery in Kiev show ss Nestor and Demetrius and ss George and Theodosius (11th century). The stylized, detailed hair and armor of Nestor and Demetrius suggest Eastern prototypes; the hair and armor of George and Theodosius show a greater simplification of planes, as in Greek models. Two panel reliefs found in the catacombs of the Kievan Cave Monastery are thought to represent Hercules fighting a lion and Cybele on a chariot, themes from classical antiquity that have antecedents in sculptural reliefs found at the sites of Hellenic colonies on the northern Black Sea coast. A sarcophagus with relief carvings from the Church of the Tithes in Kiev is thought to be that of Princess Olha, and the sarcophagus from the St Sophia Cathedral in Kiev is considered to be that of Grand Prince Yaroslav the Wise, the founder of the shrine. The latter has relief carvings of crosses intertwined with plant motifs and depictions of fish and birds. The 16 stone panels in the St Sophia (11 of which are in the choir section) are carved with geometric patterns interspersed with foliage, fish, birds, and crosses. The panel above the fresco of Prince Yaroslav's family contains an eagle, an ancient symbol of Jupiter and the Roman emperors. The capitals of ss Borys and Hlib Cathedral in Chernihiv (late 12th century) contain carvings of exotic part-dog, part-bird, and part-dragon animals similar to the likeness of the pagan god Simarhlo. These have antecedents in Romanesque sculpture, as do the carvings found in the main portals of St Panteleimon's Church in Halych.

Metal icons from the 12th and 13th centuries have been found near Kiev (*Crucifixion*), and stone ones have been preserved in Kiev (*St Thomas and Christ*) and Kaniv. The relief in stone of the *Orante* (13th–14th century) in the Kievan Cave Monastery is stylized without much modeling, whereas 15th-century depictions, such as *Mother of God with ss Anthony and Theodosius of the Caves* (1470) from the Dormition Church at the monastery, have fine three-dimensional modeling. One of the most beautiful carvings is the miniature four-part, folding wood iconostasis with multigure panels (late 15th century) from Kamianets-Podilskyi. In general the development of sculpture in Ukraine was hindered by the hostile attitude of the Eastern church to sculptural images. Sculpture was limited to relief carvings, mostly in stone or wood.

As the influence of Renaissance art spread to Ukraine, particularly Galicia, sculpture became more common. There is an attempt to convey volume and movement in the high relief in stone of *The Convincing of Thomas* (mid-16th century) from the Armenian Cathedral in Lviv, but without an understanding of anatomy and proportions. Memorial tomb sculpture appeared with depictions of reclining and semireclining figures in Renaissance architectural settings similar to those found in northern Italy (the tombs of O. Lahodovsky, A. Kysil, J. Herbut, Prince K. Ostrozky, the Syniavsky family, and K. Ramultova). The Renaissance period also engendered carved and gilded wooden iconostases with classical orders and decorative details, such as that of the Dormition Church in Lviv, now in the church of Velyki Hrybovychi, Nesterov raion, Lviv oblast. Secular buildings in the Renaissance style were lavishly decorated with carved reliefs. Architectural elements, such as the door and window frames of the Black and Korniakt buildings in Lviv, were embellished with

decorative carvings on both the exterior and the interior. Relief sculptural decorations became common in church architecture. Examples may be seen in Lviv, in the exterior frieze of the Dormition Church, with carved plant motifs and figures in the metopes; the Chapel of the Three Church Fathers; and the Kampian and Boim family chapels, which have elaborately carved entablatures and a rich decoration of carved relief figures and ornaments.

During the baroque period (mid-17th to early 18th century) in Ukraine, relief carvings reached the zenith of their development in architectural decoration and in the multi-storied iconostasis, rather than, as in western Europe, in three-dimensional sculpture. Baroque profiling, s-curves, and plant motifs, including typical Ukrainian elements such as stylized sunflower heads, embellished sacred and secular architecture. Ornately carved and sumptuously gilded wooden iconostases rose to new heights of splendor in churches such as the ones in Bohorodchany (17th century, by Y. Kondzelevych) and Rohatyn (1649–51). Emphasis shifted from painted icons and architectural elements to richly carved surfaces, and these eventually dominated the structures. Plant motifs were most common, although some figures found their way into the designs. Side chapels were also adorned with smaller carved iconostases. (Many of the magnificent baroque iconostases in Kiev and elsewhere were destroyed by the Soviet regime in the 1930s.) Nizhen, in the Chernihiv region, and Zhovkva, in Galicia, became centers of iconostasis production. Sculptors such as Yu. Shymonovych-Semyhynovsky, S. Putiatytsky, O. Kuliavsky, V. Sakovych, and H., I., and S. Stobensky worked out of Zhovkva. One of the finest baroque iconostases was in the Zhovkva Church of the Holy Trinity (ca 1720), where baroque devices such as the play of light and dark, dynamic movement, and dramatic contrasts of curved and perpendicular forms and smooth and heavily carved surfaces were used to full advantage. One of the largest surviving iconostases was installed in the Transfiguration Church in the village of Velyki Sorochyntsi, in the Poltava region, in 1732. It is 20 m wide and 17 m high, and so lavishly carved that the columns have lost their structural elements and resemble bouquets and flowering fields. The Royal Gates of the iconostasis in the St Sophia Cathedral in Kiev, commissioned by Metropolitan R. Zaborovsky in 1747, are a masterpiece of late baroque Ukrainian art. Carved entirely in silver and covered in gold, they were removed by the Soviet authorities between 1935 and 1937, as were eight chapel iconostases.

The best and most numerous examples of three-dimensional sculpture are to be found in Galicia (in the rest of Ukraine the Orthodox church continued to oppose figural carving). There sculpture was incorporated into church and secular architecture (eg, the city hall in Buchach). Figural sculptures were particularly popular in Roman Catholic churches. In the Dominican Church in Lviv, for example, 18 figures in the second story beneath the dome were carved by S. Fessinger. Sculpture in the round was incorporated into the architecture of Ukrainian Catholic churches, such as St George's Cathedral in Lviv.

These achievements resulted from efforts by talented local sculptors and imported ones, such as J. *Pfister and J. *Pinzel. In Pinzel's carved *Crucifixion with Mary and St John* (1750s) in St Martin's Church in Lviv, the polychromatic wooden figures are unequalled in the clarity of their

contrasting planes and their dramatic juxtaposing of drapery folds. In contrast the polychromatic figure of St Michael, the patron saint of Kiev, from the tower of the Town Hall in Kiev lacks sophistication. It was executed from two sheets of copper fitted over a silhouette.

The aristocracy and the rich continued to commission tomb sculptures and memorial wall plaques carved in relief. A fine example is A. Schlüter's monument to J. Sobieski and S. Danilowicz in Zhovkva, which incorporates two allegorical figures and putti with the central urn. Examples of ceramic sculpture, such as the coat of arms of Hetman I. Mazepa on the exterior of Chernihiv College, the reliefs of Mary and saints in the niches on the gates of the Novhorod-Siverskyi Transfiguration Monastery, and various decorations for secular buildings in Kiev and Pereiaslav, have survived.

Rococo sculpture in the round was characterized by elongated proportions and contrapposto poses, and it continued to be an organic part of the architectural design of buildings (eg, the statues in the Catholic cathedral of Kamianets-Podilskyi, 18th century). Decorative carvings, however, became more delicate and graceful and often appeared to float on the surface. The popularity of high, ornate iconostases did not diminish, but the carved decorations became somewhat lighter and more whimsical, and the iconostases therefore more subdued, as in the cathedral of the Mhar Transfiguration Monastery (1762–5, by S. Shalmatov), St Andrew's Church in Kiev (1760s), and the Cathedral of the Nativity of the Mother of God in Kozelets (1760s). Angel heads carved in the round were used to decorate the interior of St Andrew's Church, and shell-like forms were incorporated into asymmetrical designs. The iconostasis from the wooden Church of the Holy Protectress (carved by S. Shalmatov, 1768–73) in Romen is a rococo masterpiece, with irregular sections and carved figures in places usually reserved for painted icons. These include the central Crucifixion, the city-fortress in a cartouche below it, and the Annunciation carved in relief into the Royal Gates, which provide the architectural setting. Three-dimensional, life-size figures of Zacharius, Aaron, John the Evangelist, and John the Baptist appear in the third story. The iconostasis is topped with a beautiful composition showing the skillfully modeled figure of God carved in high relief on a background of swirling roses, putti heads, and fanciful seashell forms.

Classicism appeared in the mid-1750s and brought with it a return to the harmony, clarity, and serenity of antiquity. It did not become widely accepted, however, until the beginning of the 19th century. The Empire style was a development of classicism inspired by Greek rather than Roman prototypes and was more geometric and austere. Classicism coincided with the decline of Ukrainian autonomy and the annexation of eastern and most of central Ukraine by Russia. Russian domination brought about the loss of cultural freedom. Under tsarist rule all building designs had to be approved by the imperial government in St Petersburg. Among Ukrainian artists working in the classical style were M. Kozlovsky, I. *Martos, and K. *Klymchenko, all of whom worked mostly in Russia. Martos executed several monuments in Ukraine, including the statue of Duc de Richelieu (1823–8) in Odessa. He also designed the grave monument to Hetman K. Rozumovsky (1803–5) in Baturyn.

The unprecedented emphasis on civic architecture and

This page intentionally left blank

town planning during the classicist period created a need for public sculpture of the type formerly unknown in Ukraine. Freestanding sculptures resembling classical models appeared as civic monuments (eg, Martos's statue of Duke A.-E. de Richelieu in Odessa) and as decorative features in city squares, parks, and gardens. The famous landmark statue of St Volodymyr by V. Demut-Malynovsky and P. Klodt (1850–3) overlooking the Dnieper River is one of the most popular examples of classical sculpture in Kiev. Most monuments, however, were dedicated to the tsars and their appointees.

In Western Ukraine under Austro-Hungarian rule, the need for civic sculpture was at first met by imported talent from Central and Western Europe, such as H. Wittwer, who was trained in Vienna, and A. *Schimser, from Bratislava, who received training in Vienna and Paris. Wittwer created the sculptures of the four fountains (1793) in Rynok Square in Lviv, which he modeled on the classical figures of Diana, Neptune, Adonis, and Amphitrite. The relief carvings of mythological and allegorical figures on the former Credit Society Building in Lviv were done by Wittwer and Schimser. Schimser also executed the Trenkle-Breyer-Venkler family monument in the Lychakiv Cemetery, composed of an angel, a grieving woman, and a youth in classical drapery carrying the symbolic vessel of sadness and tears.

In the second half of the 19th century romanticism and realism replaced classicism. The life of the peasants was depicted by H. Krasutsky in the four niches above the second story in the 'Four Seasons' Building in Lviv. In Russian-ruled Ukraine F. *Balavensky introduced ethnographic elements into his allegorical sculptures *Life and Charity* and created portrait busts of famous Ukrainian writers. Ukrainian themes became prevalent in the work of Ye. *Trypilska, who worked in marble and ceramic (*At the Market*, 1918). P. *Viitovych executed the figures for the Lviv Opera House, and H. *Kuznevych worked on tomb sculptures and several portrait busts of T. Shevchenko.

The monument to Hetman B. Khmelnytsky (1888) in Kiev was executed by the Russian sculptor M. *Mikeshin in a realist style. Ukrainian sculptors who worked in the realist manner were the versatile L. *Pozen, B. Eduards, and P. *Zabila, whose work was influenced by academic sculpture.

Many Ukrainian sculptors studied in Paris and were influenced by A. Rodin and the impressionists. Among them were M. *Parashchuk, who later worked in the academic style in Sofia, Bulgaria, E. *Blokh, M. *Brynsky, M. *Havrylko, and B. *Kratko.

A. *Archipenko is the most famous Ukrainian sculptor. In the 1910s he created some of the first cubist sculptures (*Walking* [1912], *Gondolier* [1914]), experimented with constructions in a variety of materials and abstraction, and revived polychromatic sculpture. His later portrait busts of T. Shevchenko and I. Franko are realistic depictions lacking the innovative approach for which he was famous. Another pioneer of modern sculpture and the father of constructivism, V. *Tatlin, spent most of his creative years working in Russia, where he was one of the leading figures of the Russian avant-garde. In Kharkiv in the 1920s, V. *Yermilov explored constructivism in his wood and metal 'experimental compositions' and 'constructions,' which were colored in an attempt to warp a continuous surface. Cubism influenced the early work of I. *Kava-

leridze, who participated in the avant-garde of the 1910s in Ukraine and in the 1920s created cubist monuments in Ukraine (monument to T. Shevchenko) before succumbing to socialist realism (eg, *Lenin and Gorky*, 1952). Other sculptors of the 1920s and 1930s were less inventive and remained loyal to realist traditions. They included I. *Severa, Ye. *Sahaidachny, M. Novoselsky, H. *Tenner, A. Pysarenko, Zh. *Dindo, and V. Klimov.

In Soviet Ukraine sculpture, like all the arts, has been subject to the dictates of *socialist realism and Party control since the 1930s. As a result most works have glorified the Bolshevik Revolution, Party leaders, workers, peasants, and Soviet heroes. Sculpture was particularly pompous during the Stalinist period, in which thousands of monuments to V. Lenin, K. Marx, J. Stalin, and M. Gorky were erected. Notable sculptors who have worked in the socialist-realist manner are M. *Lysenko, I. *Makohon, H. *Petrashevych, Ya. *Razhba, A. *Bilostotsky, H. *Pyvovarov, I. and V. *Znoba, T. *Bryzh, V. *Borodai, D. *Krvavych, Y. *Sadovsky, H. *Kalchenko, I. *Honchar, and E. *Mysko. M. Hrytsiuk, who modeled expressive figures not in keeping with socialist realism (*Artemii Vedel*), together with Yu. *Synkevych and A. *Fuzhenko executed the Shevchenko monument in Moscow (1964). H. *Sevruk, who works in ceramic relief sculpture and gets her inspiration from Ukrainian historical themes, had difficulties exhibiting her work until 1988.

The policy of Glasnost introduced in the late 1980s made it possible for many young sculptors in Ukraine to explore individual visions and experiment with new forms and materials. Several of them have worked in ceramic sculpture or terra-cotta – V. and N. Isupov, A. Ilin-sky, O. Kostin, L. Krasiuk, O. Mylovzorov, M. Khusid, and R. Petruk. M. Andruschuk and H. Drul have created abstract figures in stone, E. Kotkov has experimented with constructions in space, and M. Malyshko has worked in wood.

In the postwar years several émigré sculptors gained prominence: H. *Kruk and V. *Masiutyn in Germany; L. *Molodozhany in Canada; S. *Lytvynenko, V. *Simian-tsev, A. *Darahan, M. *Mukhyn, A. *Pavlos, M. *Dzyndra, P. *Kapshuchenko, M. *Chereshnovsky, and the abstractionists K. *Milonadis, A. *Hunenko, and M. *Urban in the United States; F. *Yemets in Venezuela; and H. *Petsukh in Poland. Many sculptors of Ukrainian origin have worked in North America: in the United States, Ya. *Gerulak, who specializes in ceramic sculpture, M. *Bentov, who creates symbolic bronzes using geometric shapes and greatly reduced figural forms, A. Farion, who carves in stone, Ya. Harabatsch, who works with abstracted shapes, L. Koverko, and Ya. Strutynsky, who works in constructed reliefs; and in Canada, R. Kosteniuk, who creates abstract constructions based on the structure of living organisms, D. *Proch, whose work includes space-age masks, assemblages, and installations, E. *Zelenak, who creates abstract fiberglass compositions, and R. Yuristy, who constructs large-scale animal pieces for outdoor spaces.

Scythia (Skytiia, Skifiia). The domain of the *Scythians. According to Herodotus Greater Scythia occupied a large rectangle of land extending nearly 700 km (20 days travel) from the Danube River in the west across the Black Sea coast and steppe region of what is today Ukraine to the lower Don Basin in the east. Individual Scythian settlements also existed in what is today the Hungarian-Rumanian borderland, probably as outposts. It is not known how far north Scythia reached into the forest-steppe zone. The Scythians were forced out of the steppe into Scythia Minor – the Crimea and the Dobrudja region south of the Danube Delta – in the 3rd century BC. The steppe of Southern Ukraine was occasionally referred to as Scythia (Skufia and Great Skuf in the Primary Chronicle) and Sarmatia until the 19th century.

Scythian art. The art of the *Scythians combined Eastern elements with influences from the Hellenic *ancient states on the northern Black Sea coast. The combination gave the art an exquisite and unique quality. The center of Scythian art can be considered *Panticapaeum, the capital of the *Bosporan Kingdom. The many Scythian artifacts found in barrows in Southern Ukraine and the Kuban were either imported from Greece or made by indigenous Hellenic and Scythian artisans. Scythian jewelry in particular attained a high level of intricacy and magnificence.

The principal feature of Scythian art is its use of a zoomorphic symbology. Objects found in Ukraine are distinguishable from their Caucasian counterparts, which reflect more the influence of Iranian, Urartian (ancient Armenian), Altaic, and, through this last, Chinese art. The Scythians fashioned gold objects depicting semirecumbent stags, deer, lions, panthers, horses and other domesticated animals, birds, and fantastic beasts (eg, griffins and sirens), as well as human faces, bodies, and groups of humans. Numerous vases, goblets, quivers, scabbards, combs, and other objects portray scenes from everyday life (eg, combat, farming, herding, taming horses, milking sheep, sewing skins) as well as motifs from Greek mythology and history. This symbology is often coupled with Greek geometric and floral ornamentation. Objects depicting griffins with lion's or eagle's heads tearing apart horses or deer personify evil forces; they were likely created as amulets.

The finest works of Scythian art have been excavated in the so-called Royal Scythian kurhans, *Kul Oba, *Haimanova Mohyla, *Melitopil, *Solokha, *Krasnokutskyi, and *Chortomyk kurhans in Southern Ukraine, and the *Velyka Blyznytisia, Kelermes, and Kostromska kurhans in the Kuban.

In the 4th century BC, Hellenic influences began declining in the northern Black Sea littoral as a result of the in-

Scythian gold pectoral from the Krasnokutskyi kurhan

A detail on the pectoral

migration of the Sarmatians and other Iranian tribes. In the 3rd century BC the Sarmatians forced the Scythians out of Southern Ukraine into Crimea, where a new Scythian art developed. On the site of the new Scythian capital, *Neapolis, a mausoleum for luminaries, who were buried along with their horses, was excavated. Over 1,300 works of art were uncovered there, including frescoes with scenes of horseback riding and hunting.

During the 19th century many Scythian treasures were taken from Ukraine and Crimea to the St Petersburg Hermitage Museum. During the *Crimean War a tsarist ukase ordered the transfer of all gold artifacts found in Ukraine to the Hermitage. Only the discoveries of Scythian art made by AN URSR (now ANU) archeologists in the last few decades of the 20th century can be found in Ukraine's museums today.

Scythians (*skyty, skify*). A group of Indo-European tribes that controlled the Southern Ukrainian steppe in the 7th to 3rd centuries BC. They first appeared there in the late 8th century BC after having been forced out of Central Asia. The Scythians were related to the *Sauromatians and spoke an Iranian dialect. After quickly conquering the lands of the *Cimmerians they pursued them into Asia Minor and established themselves as a power in the region. In the 670s BC they launched a successful campaign to expand into Media, Syria, and Palestine. They were forced out of Asia Minor early in the 6th century BC by the Medes, who had by then assumed control of Persia, and retreated to their lands between the lower Danube and the Don, known as *Scythia.

The bellicose Scythians were often in conflict with their neighbors, particularly the Thracians in the west and the *Sarmatians in the east. They faced their greatest military challenge around 513–512 BC, when the Persian king Darius I led an expeditionary force against them. By withdrawing and undertaking scorched-earth tactics rather than engaging in pitched battles, they forced the Persians to retreat in order to preserve their army. The event had a significant impact on subsequent Scythian development, for it confirmed their position as masters of the steppes and spurred on the political unification of the various tribes under the Royal Scythians. By the end of the 5th century BC the *Kamianka fortified settlement, near present-day Nykopol, had been established as the capital of Scythia.

The Scythians reached their apex in the 4th century BC under King Ateas, who eliminated his rivals and united all the tribal factions under his rule. He waged a successful war against the Thracians but died in 339 BC in a battle against the army of Philip II of Macedon. In 331 BC the Scythians defeated one of Alexander the Great's armies. Subsequently they began a period of decline brought about by constant Sarmatian attacks. They were forced to abandon the steppe to their rivals and re-established themselves in the 2nd century BC in the Crimea around the city of *Neapolis. There they regained part of their strength and fought several times against the *Bosporan Kingdom, and even managed to conquer Olbia and other Hellenic city-states on the northern Black Sea (Pontic) coast. Continued attacks from the Sarmatians, however, further weakened the Scythians, and an onslaught by the Germanic *Goths in the 3rd century AD finished them off completely. The Scythians subsequently disappeared as an ethnic entity through steady intermarriage with and assimilation into other cultures, particularly the Sarmatian.

The Scythians were divided into several major tribal groups. Agrarian Scythian groups lived in what is now Poltava region and between the Boh and the Dnieper riv-

A depiction of Scythians on a gold vase (4th century BC) found in the Kul-Oba kurhan near Kerch in the Crimea. The figures have combination quiver-and-bow cases that were characteristic of the Scythians.

ers. The lower Boh region near *Olbia was inhabited by Hellenized Scythians, known as Callipidae; the central Dniester region was home to the Alazones; and north of them were the Aroteres. The kingdom was dominated by the Royal Scythians, a small but bellicose minority in the lower Dnieper region and the Crimea that had established a system of dynastic succession. Their realm was divided into four districts ruled by governors who maintained justice, collected taxes, and gathered tribute from the Pontic city-states. A separate coinage, however, was not developed by the Scythians until quite late in their history. Their administrative apparatus was in fact quite loose, and the various Scythian groups handled most of their affairs through a traditional structure of tribal elders. Over time Scythian society became increasingly stratified, with the hereditary kings and their military retainers gaining an increasing amount of wealth and power. Although most Scythians were freemen, slaves were common in the kingdom.

The Scythians inhabiting the steppe were nomadic herders of horse, sheep, and cattle. Those in the forest-steppe were more sedentary cultivators of wheat, millet, barley, and other crops. (Some scholars believe that those agriculturists may have been the predecessors of the Slavs.) Scythian artisans excelled at metalworking in iron, bronze, silver, and gold. The Scythians also engaged in hunting, fishing, and extensive trade with Greece through the Pontic city-states; they provided grains, livestock, fish, furs, and slaves in exchange for luxury goods, fine ceramics, and jewelry.

The Scythians' military prowess was in large measure the result of their abilities as equestrian archers. They raised and trained horses extensively, and virtually every Scythian male had at least one mount. They lavished care and attention on their horses and dressed them in ornate trappings. Saddles and metal stirrups were not used by the Scythians, although felt or leather supports may have been. The foremost weapon of a Scythian warrior was the double-curved bow, which was used to shoot arrows over the left shoulder of a mounted horse. Warriors commonly

SCYTHIA

carried swords, daggers, knives, round shields, and spears and wore bronze helmets and chain-mail jerkins. The Scythians became a potent force not only because of their impressive array of weapons and training but also because they shared a strong underlying military ethos and belonged to a warrior society that bestowed honors and spoils on those who had distinguished themselves in battle. That ethos was reinforced by the common rite of adopting blood brothers and the use of slain foes' scalps or skulls as trophies or drinking cups.

Because of their generally nomadic or seminomadic existence the Scythians usually had relatively few possessions. Those they did have were often of exquisite quality and craftsmanship and established the Scythians' reputation in the ancient world as devotees of finery (see *Scythian art).

The Scythians never developed a written language or a literary tradition. They had a well-defined religious cosmology, however. Their deities included the fire goddess Tabiti, followed by Papeus (the 'Father'), Apia (goddess of the earth), Oetosyrus (god of the sun), Artimpasa (goddess of the moon), and Thagimasadas (god of water). The Scythians did not build temples, altars, or idols to worship their deities, but they maintained a caste of soothsayers and believed strongly in witchcraft, divination, magic, and the power of amulets. Representations of Scythians and their gold ornaments suggest that they were the first people in history to wear trousers.

Scythian burial customs were elaborate, particularly among the aristocracy. A chieftain remained unburied for 40 days after his death. During that time his internal organs were cleansed, his body cavity was stuffed with herbs, and his skin was waxed. He was then paraded through his realm accompanied by a large retinue indulging in ostentatious lamentation. After 40 days he was interred in a large *kurhan (up to 20 m high) together with his newly killed favorite wife or concubine, household servants, and horses, as well as weapons, amphoras of wine, and a large cache of goods. Lesser personages had less elaborate funerals. A common practice was the erection of anthropomorphic statues (*stone *babas*) as grave markers.

For many years the memory of the Scythians was best preserved by Herodotus, who included a lengthy, basically factual account of them in his *Histories*. After the last Scythians had died out in the 3rd century AD, the tribes were largely forgotten. Interest in them was revived as a result of some spectacular finds in Scythian barrows, starting with the *Melgunov kurhan in 1763. The ensuing search for richer caches impeded archeological research on the more prosaic aspects of Scythian life until Soviet archeologists undertook work in that realm in the 20th century. Scythian archeological sites in Ukraine include the *Bilske, *Kamianka, *Karavan, *Nemyriv, *Pastyrsk, and *Sharpivka fortified settlements and the *Chortomlyk, *Haimanova Mohyla, *Kul Oba, *Krasnokutskiy, *Melito-

pil, *Oksiutyntsi, *Oleksandropil, *Solokha, *Starsha Mohyla, and *Zhabotyn kurhans.

Sea buckthorn (*Hippophae rhamnoides*; Ukrainian: *oblipykha, shchets*). A willowlike shrub of the family Elaeagnaceae. It grows along sea- and lakeshores and in the floodplains of rivers on gravel and sand. Sea buckthorn is used in stabilizing landslides, slopes, and ravines. Its fruit is rich in carotene, vitamin C, and vitamin E. It yields medicinal oil used to treat gastric ulcers, bedsores, and radiation injury to the skin.

Sea gull (Ukrainian: *morska chaika*). The common name given to a host of web-footed sea birds of the family Laridae (order Charadriiformes), which is composed of two subfamilies: Larinae (gull; Ukrainian: *martyn*) and Sterninae (tern; Ukrainian: *kriak* or *kriachok*). Some of the birds have a thin, straight bill; others, a powerful, curved bill. The long, pointed wings are adapted for prolonged flights over water; the legs are short. The plumage is thick and waterproof; white and black are the predominant colors. All sea gulls live close to water – seas, lakes, rivers, or marshes. They are gregarious birds that flock and nest in colonies on sandbars and cliffs, among broken reeds, and occasionally in trees and shrubs. They are scavengers; their diet includes worms and grubs, fish, marine and freshwater invertebrates, waste products of the fishing industry, and garbage. Nine species of the most common Larinae genus, *Larus*, are found in Ukraine, including the black-headed gull (*L. ridibundus*), the herring gull (*L. argentatus*), the Mediterranean gull (*L. melanocephalus*), and the slender-billed gull (*L. genei*). Nine species of Sterninae

(mainly of the genus *Sterna*) are found in Ukraine, including the black tern (*S. niger*), the common tern (*S. hirundo*), and the little tern (*S. albifrons*). The image of the seagull is commonly invoked in Ukrainian folk songs and literature and the Cossacks named their seafaring boat **chaika*.

Sea transportation. A mode of transporting cargo and passengers on domestic or international seas. Sea traffic has many advantages over other modes: it uses natural waterways at the lowest cost of production, its load capacity is high, it is more fuel-efficient than other modes. Ukrainian sea traffic accounted for almost a quarter of the USSR tonnage and over half of the passenger traffic.

In Ukraine sea transportation dates back to Kievan Rus', but a steady development of the industry began in the 18th century after Russia established control of the northern shores of the Black and Azov seas. The new administration built port facilities, such as the Mykolaiv shipyard in 1775, Kherson port in 1778, Sevastopol port in 1783, and Odessa in 1794. In 1828 the Odessa steamship ran cruises on the Black Sea, and in 1833 the first steamship society was organized. Sea traffic grew rather slowly in the 19th century, because connecting railway routes began to be built only in the 1860s. The Russian government was more interested in a strong base on the Baltic Sea and an ice-free port at Murmansk than in the southern seas.

After the Second World War sea transportation became an important trade link with the West. Initially interest in sea transportation was prompted by defense requirements. Recently the growth in trade has raised the importance of Ukrainian ports.

Ukraine's sea traffic was not an autonomous industry. It was a branch of the all-Union economic system and was administered by three directorates: the Black Sea, with head office in Odessa; the Azov Sea, with an office in Mariupol; and the Danube directorate in Izmail.

Odessa was by far the largest and most important of the directorates. It has the best facilities for internal and international cargo. Its modern equipment is capable of horizontal loading. Its ships are designed for heavy freight. Odessa's passenger traffic is also heavy. Besides having easy access to the Black Sea ports, Odessa is connected with numerous foreign ports in Asia and Europe. The Azov directorate handled mostly internal transportation, but some of its traffic flows to ports in the Near East, Northern Africa, and the Mediterranean region. Its vessels are equipped with modern devices for transporting dry cargo and timber. Container-ships are used to carry substances at high temperatures. The Danube directorate dealt with local traffic. Its physical plant consists mostly of riverboats, which carry goods along the Danube River. The directorate also served ports on the Black Sea, Soviet and foreign. More than half of its traffic is internal.

Much of the Ukrainian merchant and passenger fleet has been built in Ukraine, although some Finnish, Polish, and German ships are used (see **Shipbuilding*).

Ukraine's share in the USSR freight output was approx 27.6 percent, and in the USSR shipping volume, 24.1 percent (1985). Its share of the passenger output was 54.6 percent, and of passenger volume, 59.2 percent. The reason for the high share in passenger output and volume is the climate of the Black Sea, which attracts tourists and vacationers.

Basic indexes of sea transportation, 1970–86

| Category | 1970 | 1980 | 1986 |
|---|---------|---------|---------|
| <i>Freight traffic</i> | | | |
| 1. Output (in billion Tnm*) | 93.0 | 91.1 | 153.0 |
| 2. Volume (in million t) | 38.2 | 471.1 | 59.8 |
| 3. Average trip distance per t of haul (in nm) | 2,434.6 | 1,934.2 | 2,558.0 |
| <i>Passenger traffic</i> | | | |
| 4. Output (in million m) | 431.7 | 701.6 | 755.5 |
| 5. Volume (in million passengers) | 19.8 | 28.5 | 28.7 |
| 6. Average trip distance per passenger (in nm) | 21.8 | 24.4 | 26.3 |
| 7. Percentage of sea transportation to total transportation | | | |
| (a) freight output | 28.2 | 21.8 | 28.3 |
| (b) passenger output | 1.1 | 0.8 | 0.8 |

*Tnm = tonnes × nautical miles.

In the last decade Odessa has become the main southern center for sea transportation. To increase its capacity, the Illichivske satellite port was developed. With its heavy cranes, Illichivske surpasses Odessa in its cargo-handling power. In 1978 the world's largest ferry began to operate between Illichivske and Varna, Bulgaria. Northeast of Odessa the new port of Yuzhnyi, specializing in chemicals, is being built. It is connected by a special railway with Horlivka, in Donetsk oblast, and Togliatti, on the Volga River. Ukraine's second-largest port is Mykolaiv, which handles coal, metals, and grain. Kherson is noted for its grain shipping. Kerch is a large transit port for iron ore, coal, petroleum, and raw materials. Mariupil, on the Sea of Azov, transports raw materials and agricultural products, particularly to Caucasia. Teodosiia and Berdianske ship mostly farm products. Ports such as Ochakiv, Yevpatoriia, Henicheske, and Skadovske are better known for their fisheries. Passenger traffic along the Crimean coast is heavy year round.

E. Bej

Seal, monk (*Monachus monachus*; Ukrainian: *tiulen bilocherevnyi, monakh*). The only species of seal in Ukraine. An inhabitant of the waters of the Black Sea, this aquatic mammal belongs to the family Phocidae of true earless seals. It has been listed as an endangered species in Ukraine.

Seals. See Sphragistics.

Secession of Ukrainian students from Lviv University. In 1899 the Galician Ukrainian public began campaigning for the creation of a Ukrainian university in Lviv. Ukrainian students took an active part in the campaign. Their public rallies and demonstrations calling for the establishment of the university brought them into open conflict with the Poles, often in the form of violent street clashes. In 1901, after the administration of Lviv University expelled the Ukrainian student organizers and called on Polish students to fight the Ukrainians, 440 of the university's Ukrainian students formally withdrew in protest and registered at other universities in Vienna, Prague, Graz, and Cracow. The students had the general support of the Galician Ukrainian community, which

created a 'secessional fund' to support them. The secession, which lasted from 1 December 1901 until the 1902 summer semester, had no practical results. The Ukrainian community's demands for equal status for the Ukrainian language in Lviv University's administration and the creation of Ukrainian chairs there (earlier they had demanded a separate university or the division of Lviv University into Ukrainian and Polish campuses) were ignored by the Austrian governmental bureaucracy. The secession, however, brought the issue to the attention of the Austrian parliament and of European public opinion, and the students' studies abroad widened their intellectual horizons. In the opinion of contemporary publicists and later historians the secession had negative consequences, in that it was a 'flight from the field of battle' which served only to weaken the existing Ukrainian student organizations and the campaign for a Ukrainian university in general.

B. Kravtsiv

Second World War. See World wars.

Secondary education (*serednie shkiltystvo*). Instruction in schools for children who have completed elementary education; it provides either a general or a specialized program of study and allows students to continue their studies in institutes of *higher education.

In Ukraine, prior to the 18th century there was no significant difference among lower, middle, and higher schools. Nor was a distinction made between general and specialized programs of study. *Brotherhood schools, *college schools, and schools run by the Jesuit, Basilian, and Piarist orders provided what could be considered secondary education. Toward the end of the 18th and in the first half of the 19th century the *boarding school offered basic secondary education, as did the *gymnasium and *Realschule in the first half of the 19th century. The gymnasiums, *lyceums, and *institutes for daughters of the nobility were among the establishments offering secondary education for girls. (See *Education of women.) Secondary education was also provided by Orthodox *theological seminaries.

With the abolition of serfdom in 1861, secondary education in Russian-ruled Ukraine gradually expanded. A new development was the establishment of secondary professional schools. (See *Professional and vocational education.) The language of instruction in schools in Ukrainian territories within the Russian Empire was Russian. Only a tiny proportion of youths of school age obtained secondary education. The impoverishment of the Ukrainian peasantry and social and national discrimination resulted in a low percentage of school-age children attending secondary schools. (Two-thirds of children of school age in Ukraine in 1915 had never set foot inside a classroom.) The 1897 general population census revealed that there were only 192,582 people in the Ukrainian gubernias (out of a total population of 23.4 million) with complete secondary education, of whom 40 percent were members of the nobility or high-ranking bureaucrats.

In Western Ukraine under Austrian rule, gymnasiums and Realschulen were the principal institutions offering secondary education. There were relatively few secondary schools in Western Ukraine. In all of Galicia in 1906–7, for example, there were only 68 secondary schools, with 107,000 students, and in Bukovyna, 10 such schools, with

a total enrollment of 7,300 (of which 1,800 were Ukrainians). Efforts by the Ukrainian community leadership to develop a network of Ukrainian secondary schools faced serious obstacles. The mass of the rural population was impoverished. In addition there were political barriers which were difficult to overcome. In Galicia, for example, the Polish majority in the Diet systematically blocked the development of a Ukrainian-language network of secondary schools. (The establishment of any secondary school required the passage of a resolution by the Diet.) As a result there were only six state-supported Ukrainian gymnasiums in Galicia in 1909–10.

In the course of the Ukrainian struggle for independence in 1917–20, secondary education was somewhat Ukrainianized, particularly in the gymnasiums. Wartime conditions did not permit the realization of the proposed 12-grade *unified labor schools, advocated by the Ukrainian National Republic, in which grades 9 to 12 were to have constituted general secondary education. During the period of the Western Ukrainian National Republic the Austrian system of education was retained, although efforts were undertaken to Ukrainianize secondary education.

Secondary education underwent many changes after the establishment of Soviet rule in Ukraine. In 1920 a new version of the unified labor school was introduced in the Ukrainian SSR. Grades five to seven of the *seven-year school offered secondary education. Graduates of the schools were able to continue their education in secondary professional schools, *tekhnikums, or *institutes.

In 1934 education throughout the USSR was unified, and Ukraine lost its distinctive education system. The *ten-year school was established as the basic institution of general secondary education. The seven-year school was established as the main institution offering incomplete secondary education. Since the 1930s a wide variety of other types of schools offering secondary education have been established, among them *schools for workers' youth and *schools for rural youth. *Tekhnikums have been reduced to the status of secondary schools. Parallel to the general secondary education system is a network of schools offering *secondary special education.

In the 1950s and early 1960s, under N. Khrushchev, secondary education was reformed to stress *polytechnical education. The 1966 school act downplayed this trend. More recently major reforms of the secondary school curriculum were undertaken, among them the rewriting of history and literature textbooks to rid the school program of the distortions of the past. During the recent reforms a large-scale public debate about the state of secondary education has unfolded. Among the major concerns addressed have been the scarcity of resources allocated to secondary education and the resulting shortage and inadequacy of buildings (almost 20 percent of schools operate on a two- or three-shift basis) and the absence of laboratory facilities and modern technology, such as computers.

Until the 1920s only a small number of people obtained secondary education. In 1914–15 (within the boundaries of contemporary Ukraine) there were 386 incomplete general secondary schools and 480 general secondary schools, with 49,600 and 185,800 pupils respectively. In 1927–8, incomplete general secondary schools numbered 2,420, and general secondary schools 28, with a total enrollment of 2.9 million and 231,900 respectively. By 1988–9 there were 7,984 incomplete secondary schools, with 1.1 million pu-

pils, and 9,543 secondary general-education schools, with 5.6 million pupils.

In 1958, eight years of schooling was made compulsory for all Soviet children. In 1966, universal 10-year complete secondary education was decreed and was to have been achieved by 1970. That goal, however, has not been realized.

In the 1920s the educational system underwent *Ukrainization. By 1929–30, 74 percent of all seven-year schools had Ukrainian as their language of instruction. The Russification of Ukraine's educational system, initiated in 1932–3, continued unabated until 1989. In the 1960s, for example, only 21 percent of pupils attending 10-year secondary schools in urban centers studied in Ukrainian-language establishments. Since 1989, when Ukrainian was granted state-language status, and with the rise of the Ukrainian national movement, the number of Ukrainian-language secondary schools has slowly increased.

In the 1920s and 1930s, in Ukraine under Polish rule, gymnasiums and lyceums functioned as the basic institutions offering secondary education. Technical schools were not numerous. In 1937–8 the number of students attending gymnasiums and lyceums was approximately 45,000. The number of Ukrainian students attending these schools was negligible because the transition from rural elementary to secondary schools was difficult. The Polonization of secondary education and the reluctance of the Polish authorities to allow the establishment of Ukrainian secondary schools further hindered Ukrainian access to secondary education. In 1937–8 there were only 24 Ukrainian gymnasiums, of which 19 were private institutions, and 21 lyceums, of which 16 were private schools. In Transcarpathia (under Czechoslovak rule), in 1938 there were 11 gymnasiums, of which 5 were Ukrainian institutions. In Bukovyna (under Rumanian occupation) all Ukrainian secondary schools had been Rumanianized by 1927.

In the same period Ukrainian émigrés established gymnasiums in Prague and in Kalisz, Poland. In 1945–50 many types of secondary schools operated in Ukrainian camps for displaced persons in Germany and Austria. At present the only secondary institutions outside Ukraine which use Ukrainian as the language of instruction are those located in Czechoslovakia, the Minor Seminary in Rome, and those offering *Ukrainian bilingual education, in western Canada. Ukrainian has been taught in private schools in the United States, Canada, and Brazil and in public and Catholic schools in some provinces of Canada (where numbers warrant).

B. Krawchenko

Secondary general-education school (*serednia zahal'no-osvitnia shkola*). A type of school established in the USSR by the 1958 school reform. Its full name was 'secondary general-education labor polytechnical school with production teaching.' The school was to offer an 11-year program of study giving pupils a complete secondary general education, as well as some vocational training in a branch

of the economy. The same reform made the study of the Ukrainian language optional in the Russian-language school system in Ukraine. The vocationalization of secondary education was opposed by many education officials, and under N. Khrushchev the 11-year program was never fully implemented. The 1965 school act downplayed the vocational and polytechnical component in secondary education and restored a 10-year program (except in some non-Russian-language schools, where an 11-year program was permitted). Completion of the program gives the pupil the right to apply for entry to postsecondary institutions. Since 1986, 10-year secondary general-education schools have been gradually transformed into schools with an 11-year program. In 1988–9 there were 9,543 secondary general-education schools in Ukraine, with 5.6 million pupils. (See *Secondary education.)

Secondary special education (*serednia spetsialna osvita*). An educational program which gives vocational or semiprofessional training as well as basic secondary education. Secondary special education in Ukraine is offered in schools under the jurisdiction of the Ukrainian Ministry of Higher and Specialized Secondary Education. Secondary special education can be obtained in some secondary schools offering training in over 400 occupations, in *tekhnikums, or in *vocational-technical schools. Full-time day study for those with 8 years of schooling (see *Eight-year school) is 3 or 4 years, and for those with completed secondary education (see *Ten-year school) 2 or 3 years (an additional year for those enrolled in evening or part-time programs). Graduates of secondary special-schools can apply to institutions of *higher education. In 1988–9 there were 737 secondary special schools in Ukraine, with 792,400 students (of whom 320,000 studied in schools offering training in industrial or construction occupations). Of the total number of students 523,400 were in full-time day programs. In 1967, secondary special education faculties were organized by some of the larger institutions of higher learning. In 1985 there were 17 such faculties in Ukraine.

The origins of secondary special education go back to the prerevolutionary period (see *Professional and vocational education). Secondary special education underwent a great expansion with industrialization. In 1914–15 there were 88 secondary special schools in Ukraine, with 88,000 students. By 1940–1 the figures were 693 and 196,300 respectively. In the 1950s secondary special schools started to attract young people with complete secondary education.

B. Krawchenko

Secretariat of the CC CPU. The top administrative and organizational body of the Communist Party of Ukraine. Similar bodies existed in the CPSU and its republican sections. The Secretariat of the CC CPU was established in 1918. It was composed of four to seven members chosen by the plenum of the CC CPU. Each member was usually responsible for a special area, such as ideology or industry. As a whole the group was responsible for managing the day-to-day affairs of the Party and enjoyed considerable influence. It was headed by the first (in 1925–34, general) secretary of the CPU. The Secretariat worked closely with the *Politburo, and there was usually some overlap in membership between the two bodies.

Sector of Government and Law of Ukraine. See Institute of State and Law of the Academy of Sciences of the Ukrainian SSR.

Sects. Religious bodies commonly formed as dissenting factions of a larger religious group and frequently regarded as extreme in their views and practices. A number of sects established religious communities in Ukraine, including various mystic and rationalist groups, offshoots of the Baptists, and groups splitting from the official Orthodox church. Although some individual groups had been active there earlier, the sects in Ukraine started becoming widespread in the 19th century.

The only indigenous Ukrainian sect to emerge was the *Malovantsi, who were active in Kiev gubernia in the late 19th and early 20th centuries. Ukraine, however, provided an attractive haven for sectarians fleeing persecution in Russia because it was outside the heartland of the empire. As early as the 1660s a significant number of *Old Believers, the first large sect to emerge from the Orthodox church in Russia, fled persecution by moving to Ukraine. Since Ukraine's southern reaches were relatively unsettled, tsarist authorities were more likely to leave sects in peace if they were out of the public eye and performing a socially useful task (ie, colonization).

The most notable sects in Ukraine – the Khlysts, Doukhobors, and Molokans – had a common origin in the Tambov region of Voronezh gubernia. The *Khlysts (also known as Khrystovoviry) arose in the mid-17th century at the same time as the Old Believer movement. Sect members started moving into Ukraine in the 1860s and established themselves in Kiev, Podilia, Poltava, and Kharkiv gubernias as well as the Kuban. The Doukhobors and Molokans had their origins in a Khlyst offshoot, the Spiritual Christians. In 1802, after a period of persecution, the Doukhobors were allowed to settle along the Molochna River in Tavriia gubernia. This region soon became their largest settlement in the Russian Empire. The Doukhobors prospered there until the early 1840s, when 4,000 of their number were relocated by tsarist authorities to the Caucasus region. The Doukhobors were subjected once again to persecution in the late 19th century, and more than 7,000 emigrated to Canada in 1897–8 under the leadership of P. Veregin. There they settled in east central Saskatchewan adjacent to an area colonized by Ukrainians. The *Molokans were formed in the 18th century in Tambov gubernia by a former Doukhobor. Because of their pacifism, members of this sect frequently came into conflict with state authorities, and throughout the 19th century groups of them were exiled to Caucasus, Siberia, and the Volga and Amur regions. By the beginning of the 20th century there were approx 1.2 million Molokans in the Russian Empire, many of whom had settled in Southern Ukraine.

Various denominations of *Evangelical Christians, most notably the *Baptists, emerged in Ukraine during the 19th century as an offshoot of German colonization in the region. Although these Protestant-based movements were regarded by tsarist authorities as sectarian, they were tolerated among the German population. When they began to emerge among Ukrainians through the *Stundists, efforts were made to eradicate what was regarded as a schismatic development.

The Soviet authorities were more openly hostile to religious sects than was the tsarist regime, particularly from

the 1930s. Nevertheless, they did not eliminate sects; today a number are active in Ukraine and other parts of the former Soviet Union. The numbers of their followers are not known.

Secular schools (*svitski shkoly*). Schools which operate outside of the influence of the church. They are under the jurisdiction of secular (often government) authorities, as opposed to *parochial schools, which are operated by the church.

In Ukraine before the 1917 Revolution, the distinction between secular and parochial schools was not entirely clear, since most schools combined religious and secular education, and many were jointly administered by a closely linked government and church.

This state of affairs held particularly in the Princely era. Both Volodymyr the Great and Yaroslav the Wise implemented a number of education programs focusing on literacy. Secular subjects, such as philosophy, rhetoric, grammar, and foreign languages, were taught (Vsevolod, the son of Yaroslav the Wise, for example, knew five languages). Eventually arithmetic and calendar calculation also became important at the schools.

After their reasonably independent inception, however, these schools gradually came under ecclesiastic authority, especially after the Mongol invasions, when the church was a somewhat sheltered haven. The schools remained under the church's domination until well into the 16th century, when the diffusion of Renaissance values and secular humanism to Eastern Europe resulted in many students' leaving traditional Orthodox schools. Although the alternatives were other religious schools – Catholic, particularly Jesuit, schools, and Protestant schools, the most prominent of which were Calvinist – these tended to be more modern than their Eastern Orthodox counterparts, and hence to have predominantly secular curricula and emphasis. In reaction to the increasing Western (primarily Polish) presence in Ukraine, the Orthodox schools also became more secular. This change in their nature enabled their graduates to compete with those of the Catholic and Protestant schools and thereby ensured the Orthodox schools' ability to survive. The most renowned and successful examples were the *brotherhood schools, the first of which was founded in Lviv in 1586. Throughout the 17th century the brotherhood schools provided a quasi-secular education, as did other schools established during the Hetmanate to educate the people. Religion was still a subject at these schools, but their focus was on basic education for laymen. The *Kievan Mohyla Academy, for example, had more laymen than clergy in attendance, according to 1727 data.

Under tsarist rule secularization progressed in Russian-ruled Ukraine, although the education system as a whole declined. Peter I closed monastery schools and then tried to substitute government-supported secular schools as the basic form of public education. These schools were usual-

ly poorly administered and underfunded, however; the result was that many of them closed, and that the literacy level in Ukraine dropped during Peter's reign. Catherine II tried to remedy the situation by also establishing some secular schools in Kiev, but they could not replace the widespread system of parochial schools at the village and elementary levels.

In Right-Bank Ukraine under Poland, in 1789 an education commission declared all 'Ruthenian' church schools closed, and established a new Polish secular school system in their place. Many of these schools were closed with the partition of Poland, however, and the remainder were closed after the Polish Insurrection of 1830–1 was crushed.

In the 19th century the tsarist government tried to weaken the potential for Ukrainian resistance by closing all but the most elementary-level Ukrainian schools. All new schools (two-year county schools, four-year gymnasiums, and universities) were Russian and secular. These schools had a foreign language and curriculum and were disliked by the Ukrainian population. Many people refused to attend them and were instead educated informally by the church. In the mid-1800s there were probably more Ukrainians receiving this sort of ad hoc religious education than attending the official secular schools. This state of affairs persisted, despite a decree in 1869 that officially separated the schools from the church.

The 1917 Revolution was a turning point in the secularization of schools. A resolution of the Second All-Ukrainian Teachers' Congress, held in Kiev on 10–12 August 1917, demanded that schools be secularized, and that religious instruction be allowed only with the consent of parents. In early 1918 a Ukrainian National Republic school decree based on the congress resolutions made education secular and placed it under the jurisdiction of the local organs of self-government. Only under Soviet rule was attendance at government schools enforced, and informal church instruction strictly and actively prohibited. From 19 January 1919 the church and state of the Ukrainian SSR was officially separate, and all education was secular.

In Western Ukraine Austrian- and Polish-ruled schools were separate from the church from 1863, but private religious schools were allowed. Under Soviet rule all private institutions were abolished.

(For a bibliography, see *Education.)

N. Freeland, B. Krawchenko

Sedge (*Carex*; Ukrainian: *osoka*). A perennial grassy, flowering plant of the family Cyperaceae, from a few centimeters to 4 m or more in height. The plants grow everywhere, mainly in damp places in forest zones. Many species are eaten before they bloom by grazing cattle; some are used as silage or hay. In Ukraine, of approx 100 species the most abundant are fox sedge (*C. vulpina*), elongated sedge (*C. elongata*), and early sedge (*C. praecox*). Sedge can be used in paper production and for basket or floor-mat weaving. Some sedges are cultivated as ornamental flowers.

Sedliar, Vasyl [Sedljar, Vasyl'], b 12 April 1899 in Liubech, Horodnia county, Chernihiv gubernia, d 13 July 1937. Painter and graphic artist. Sedliar studied at the Kiev Art School (1915–19) and then at the Ukrainian Academy of Arts (1919–22) under M. *Boichuk. He worked on large-scale murals, illustrated books, designed packaging, and produced ceramic works. He was part of the team

Vasyl Sedliar

that decorated the Lutske regimental army barracks in Kiev under Boichuk's direction (1919), and he did the murals at the Kiev Institute of Plastic Arts (1924) and the Mezhyhiria Art and Ceramics Tekhnikum (1924) with O. Pavlenko. Like Boichuk, he worked in a style combining the techniques and large simplified forms of traditional icon and folk art with formalist theory and contemporary subject matter. He used fresco in his murals and egg tempera in works such as *Portrait of the Artist O. Pavlenko* (1927) and *In the Liknep School* (1924–5). The director of the Mezhyhiria Art and Ceramics Tekhnikum (1922–30) and a teacher at the Kiev State Art Institute (1930–6), he was arrested and executed during the Stalinist terror.

Sedniv. II-12. A town smt (1982 pop 1,900) on the Snov River in Chernihiv raion, Chernihiv oblast. Known first as Snovsk, it was a well-fortified town of Kievan Rus'. According to the chronicles Prince Sviatoslav of Chernihiv defeated a Cuman army much larger than his own at Snovsk in 1068. In 1234 the town was annexed by Danylo Romanovych, and five years later it was destroyed by the Mongols. In the mid-14th century it fell under Lithuanian rule. In the 16th century it became known as Sedniv and belonged to the Polish Commonwealth. In the Hetman state established by B. Khmelnytsky Sedniv was a company center in Chernihiv regiment. From 1782 it was a volost center of Horodnia county, which was a part first of Chernihiv vicegerency and then of Chernihiv gubernia. Today it is a small agricultural town with a hydroelectric station built in 1953, a potato research station (est 1963), and a rest home of the Union of Artists. The ruins of the

Sedniv (drawing by Taras Shevchenko, 1846)

old fortress and the Church of the Annunciation and Lyzohub mansion, both built by Col Ya. Lyzohub ca 1690, are tourist attractions.

Sedykh, Yurii [Sedyx, Jurij], b 11 May 1955 in Novocherkassk, Rostov oblast, Russia. Champion hammer thrower. A member of the Kiev Burevisnyk sports club, he won Olympic gold medals in the hammer throw in 1976 and in 1980 (world record), was the 1978 and 1986 European champion, won many Ukrainian SSR and USSR championships, was the 1981 world champion, set a new world record in 1984, and won the 1988 Olympic silver medal.

Seed beetles (Ukrainian: *zernoïdy*). A common name for more than 900 species of the family Bruchidae. About 15 species are found in Ukraine, where they infest crops of peas, beans, beets, rice, and other seeds. The larvae develop in the seeds, thereby damaging their nutritional and sowing value.

Seed production. The branch of agriculture that produces and sorts high-quality natural and hybrid seeds for cultivation.

The first stage in seed production is seed *selection. Seeds are bred to produce plants with desirable qualities: higher yields, a shorter growing period, heat or drought resistance, and so on. Before the 20th century there was little planned seed production, and few agronomists were trained in seed sorting or selection. Peasants planted mostly unsorted seeds. In the late 19th century, however, some large landowners imported sorted seeds from abroad. The first attempts to sort seeds locally were made by landowners trying to improve the quality of sugar beets in Ukraine. Small seed-testing stations were established in Kiev in 1897 and in Katerynoslav (Dnipropetrovske) in 1907.

After the Revolution of 1917 seed sorting developed rapidly. As early as 1922 the Kharkiv Selection Station, directed later by V. Yuriev, pioneered seed sorting in Ukraine. Several attempts to organize comprehensive seed production were made in the interwar period, but they were only partly successful because of the ravages of the famine of 1932–3. Over 30 large seed farms (covering an average of over 53,000 ha, and some covering up to 100,000 ha) were set up in Southern Ukraine and the

Crimea. They were given priority access to farm machinery and fertilizer. Nevertheless, they were under-equipped and underproductive. By 1932 they had been abolished, and the entire system of seed production had been centralized under the All-Union State Seed Inspectorate of the People's Commissariat of Agriculture in Moscow. By 1940 the system was producing an adequate amount of seed for cultivation.

After the Second World War priority in seed production was given to improving strains primarily of oil-yielding, commercial, and fodder plants. Considerable attention was also given to the large-scale introduction of corn, especially after the mid-1950s. The whole matter, however, was highly politicized. T. *Lysenko's theories and practices in seed selection and production had little scientific merit but received strong support from J. Stalin and N. Khrushchev. Only in the early 1960s was a new, more rational system of seed production established.

Until the demise of the USSR in 1991, old seed varieties were improved and new hybrids developed at some 45 institutions in Ukraine, such as the *Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics in Kharkiv, the All-Union Scientific Research Institute of Selection and Genetics in Odessa, and specialized institutes associated with the cultivation and processing of sugar beets, wheat, corn, and other cultures. Those institutes produced superelite and elite seeds in research nurseries. The seeds were then given to various *agricultural scientific research institutions, where they were tested and then classified and regionalized by agronomists and officials of the USSR Ministry of Agriculture. Approx 50 research stations produced elite and first-reproduction seeds that were then made available to state and collective farms for widespread cultivation.

Seeded area. See Crop cultivation and Land use.

Segedi, Yoakym, b 27 October 1904 in Ruski Krstur, Bačka region. He was ordained in 1927 and was a priest in the Bačka region before being consecrated auxiliary (1963-81) and then bishop (1981-3) of Križevci eparchy.

Seichter, Rudolf, b 17 October 1889 in Reichenbach, Silesia, d 19 October 1977 in Soltau, West Germany. Philatelist and a leading authority on Ukrainian stamps. A physician by profession, he graduated from Berlin University (1921) and served as a naval doctor until 1931 and during the Second World War. From 1927 he was active in the Union of Philatelists of Ukraine; he served as president in 1940-75. He studied the stamps issued by the UNR in 1918-20 and published a special catalog of them. He wrote numerous monographs and articles on Ukrainian stamps.

Seignorial court (*votchynnyi sud*). A private court established by a noble on his estate to administer justice to his peasants. The nobles had wide authority (see *domanial jurisdiction), and their decisions could not be appealed. Seignorial courts emerged in Kievan Rus' and reached their greatest power under feudalism. In Ukrainian territories of the Polish-Lithuanian Commonwealth, they sometimes heard appeals from community courts. In Rus-

sian-ruled Ukraine seignorial courts were introduced along with serfdom in the late 18th century and were abolished in the reforms of 1864.

Seignorial manufacture (*votchynna promyslovist*). A term designating industry that depended upon the forced labor of enserfed peasants on patrimonial estates or service-tenure lands. The origins of this form of industry can be traced back to Kievan Rus', when it was used in light production or handicrafts. It was used for heavy manufacturing during the 17th century, and the state abetted its growth from the second half of the 18th century. Those peasants who worked in seignorial manufacturing firms often did so with a view to annulling their *quitrent. During the first half of the 19th century seignorial manufacture declined in favor of those manufacturing companies which used wage labor. It then ceased altogether with the abolition of serfdom in 1861. The first manufacturing firms of the seignorial type in Ukraine were introduced into the Left-Bank regions and were mainly geared toward tobacco, sugar, and silk processing.

Seignory (*votchyna*). Hereditary land owned outright and without any obligations to an overlord. The system of alodial landholding was practiced in Kievan Rus' as early as the 9th or 10th centuries and was the most common form of land tenure among the princes and nobles in the 11th to 15th centuries. Owners of seignories could not only dispose of their land as they wished but also administer justice and collect taxes for the state on their estates. In Ukraine the system was developed further under Lithuanian and Polish rule. In Russia the seignorial system gradually gave way to a system of service tenure.

Seim region (Posemia). A historical-geographic region along the upper Seim River contested by the Chernihiv and Pereiaslav principalities. It included such settlements as Kursk, Rylsk, and Putyvel. Its proximity to the steppe left it open to frequent attacks by nomads. Ultimately the Chernihiv principality won control over the region.

Seim River [Sejm]. The largest tributary (left-bank) of the Desna River. After originating in the uplands of Belgorod oblast the river flows for 748 km through Kursk, Sumy, and Chernihiv oblasts. It has a width of approx 80-100 m, a valley of 9-12 km, and a basin area of 27,500 sq km. It ices over from early December to late March. Its waters are used for industrial and water-supply purposes as well as for pisciculture and agriculture. Navigation is possible on its lower reaches. Some of the major centers on the river are Kursk, Lgov, Rylsk, Putyvel, and Baturyn.

Seitler. See Nyzhnohirskiyi.

Sejm. See Diet and Parliament.

Sekunda, Tadei, b ca 1892, d ? Mechanical engineer and lexicographer. In 1918-19 he worked in the technological section of the Terminological Commission of the Ukrainian Academy of Sciences and then at the Institute of the Ukrainian Scientific Language. He was a specialist in Ukrainian technical terminology and edited Ukrainian technical dictionaries in the fields of statics, reinforced concrete, mining, and so forth. He also published a Ukrai-

nian-German-Russian mechanical engineering dictionary (1925), using mostly the Ukrainian dialect from the Oster region in central Ukraine as the basis for creating new Ukrainian technical terms. He was arrested, and disappeared during the Stalinist purges in the late 1930s.

Selbud. See Village center.

Selection. The process of intentionally preferential reproduction or elimination of individual plants or animals with a certain genetic composition. It has been used from time immemorial to create new or improved species of agricultural plants and animals. Artificial selection differs from natural selection in that inherited variations are controlled by breeding. Selective breeding draws upon the sciences of anatomy, physiology, ecology, embryology, molecular biology, and *genetics. One of the early selection scientists, N. *Vavilov, formulated the homologous series law and the theory of the centers of culture in plant genesis. He defined selective breeding as a highly complex science that borrows and transforms laws dealing with plants and animals from other sciences in a discriminant way with the goal of developing a given variety; it develops its own methods and determines the phenomena which lead to the creation of new breeds.

Early successes in Ukrainian selection research were in the field of sugar beets at the end of the 19th century. Monosperm varieties were developed by I. *Buzanov and V. *Zosymovych. Other sugar beet selection scientists were L. *Sempolovsky, O. Gelmer, V. *Mykhalevych, and T. Hrynko. In 1884 the Poltava Experimental Field Station and Sugar Beet Selection Station was established; it was joined by other units in Uladivka (1880), Nemerchanka (1886), Ivanivka (1881), Verkhnia (1889), and Myronivka (1911). All of them were closed during the First World War and re-established in the 1920s. In 1911 the First Congress of Breeders and Seed Growers was held in Kharkiv.

Other scientific entities were formed: the *Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics in Kharkiv, the Ukrainian Scientific Research Institute of Agriculture in Kiev, the All-Union Selection and Genetics Institute in Odessa, the All-Union *Scientific Research Institute of Corn in Dnipropetrovske, and the *Myronivka Institute of Wheat Selection and Seed Cultivation (expanded in 1968 from the original Myronivka Selection Research Station), as well as the All-Union institutes concerned with agriculture – the Institute of Sugar Beets in Kiev, the Institute of Bast Cultures in Hlukhiv, the Institute of Horticulture near Kiev, the Institute of Tobacco in Kiev, the Institute of Oil Cultures in Krasnodar, the Institute of Irrigation Agriculture in Kherson, the Institute of Land Cultivation and Animal Husbandry of the Western Regions of Ukraine in Lviv, and so on.

The short rebirth of scientific activity during the 1920s was sharply curtailed during the purges of the 1930s and the Second World War. Many leading selection scientists disappeared without a trace, including B. Panshyn, V. Kolkunov, B. Lebedynsky, I. Voitkevych, V. Rakochi, S. Nyzovy-Kysil, D. Duz-Kriatchenko, O. Filipovsky, I. Shaposhnykiv, P. Soliakov, and A. Zaporozhets.

After 1945 M. Kott, M. Bulin, A. Pozdniak, T. Hrynko, P. Hordienko, and D. Popadiuk came to the forefront in connection with the development of the Verkhnia ozo and Uladivka 752 sugar beet varieties. The theory of distant

hybridization was proposed by H. Karpechenko. Numerous grain varieties were developed with high productivity under Ukrainian climatic conditions by V. *Yuriev, director of the Kharkiv Selection Station.

Advances in Ukrainian selection also include the development of varieties of wheat – Michurin; Odessa 3, 4 (A. *Sapiehin), and 16 (F. *Kyrychenko); Durable (B. Lebedynsky); Myronivka 264 and 808 and Jubilee (V. *Remeslo); Bilotserkivska 198 and 223; Lisostepova 74 and 75 (A. Horlach); and Ukrainka (E. Zheltkevych, L. Kovalevsky, and I. Yermeev); of winter wheat – Krymka; of millet – Myronivka 85 and 51; of Sudan grass – Myronivka 10 and 325; of spring wheat – Poltavka; of sunflower – Peredovyk (V. Pustovoit with V. Shcherbyna and H. Romanenko); of barley – Orion and Odessa 31 and 46 (P. Harkavy); and of peas – Uladivka 6 and 8 (M. Shulha), Uladivka 208 and 303 (I. Hromyk, T. Stehailo, and V. Havrylova), and Chernihivka 190 (M. Khandohin and I. Pereshkura).

A number of new corn varieties have been developed by Ukrainians: Bukovyna 1 and 3 (V. Kozubenko, at the Bukovyna Selection Station), Dnipro 56 and 90T (B. *Sokolov, at the Dnipropetrovske Selection Station), Odessa 23 and 27 (O. *Musiiiko and P. Kliuchko, at the Odessa Selection Station), and Kyiv 8 (P. Oseledets, at the Kiev Selection Station). Ukrainian selection scientists in the field of orcharding and horticulture include Y. Mahomet, V. Symyrenko, I. Riabor, M. Savchenko, and L. Ro.

Because of a lack of academic freedom, and, in some cases, political persecution, many scientists emigrated from the Ukrainian SSR and continued their work in the West: O. *Arkhimovych, I. Bezpalov, H. Haharyn, I. Hromyk, O. and V. *Savitsky, S. *Symko, R. *Shekhaiev, and I. Bolsunov.

BIBLIOGRAPHY

Haharyn, H. 'Istoriia selektsii sil's'ko-hospodars'kykh kul'tur v Ukraïni,' *Naukovi zapysky Ukraïns'koho tekhnichno-hospodars'koho instytutu*, 12 (1967)

I. Masnyk

Mykhailo Seleshko

Seleshko, Mykhailo [Seleško, Myxajlo], b 4 October 1901 in Vytvytsia, Dolyna county, Galicia, d 27 April 1981 in Toronto. Engineer, journalist, and political activist. A veteran of the Ukrainian Galician Army, he joined the Ukrainian Military Organization in 1920 and was arrested several times by the Poles. After completing a degree in chemical engineering at the Ukrainian Husbandry Academy in Poděbrady, he moved to Berlin, where he served as Col Ye. Konovalets's secretary and correspondent for sev-

eral nationalist papers. He helped set up the Ukrainian Press Service in Berlin and became a member of the OUN Leadership. He was also active in the Ukrainian National Alliance in Germany. After coming to Canada in 1948, he served on the executive of the Ukrainian War Veterans' Association of Canada and the Ukrainian Liberation Fund.

Seletsky [Selec'kyj]. A family line of Cossack officers from the Chernihiv region, founded by Semen Seletsky in the 17th century. Semen's son, Vasyl Seletsky (d 1714), was a captain of the Cossack company in Divytsia (1694 and 1711–4), and his descendants retained that post until 1767. Vasyl's son, Yakiv Seletsky (d before 1762), assumed the captaincy of Divytsia company in 1714; he took part in the Derbent (1772), Polish (1733–4), and Crimean (1735, 1739) campaigns. Vasyl's grandson, Lavrentii Seletsky (b ca 1732, d 16 July 1789), was postmaster of Little Russia (1770–82); his brother, Ivan Seletsky (b 1743, d 25 July 1810), was governor of Katerynoslav and governor-general of New Russia. Lavrentii's great-grandson was Petro *Seletsky. In the 19th and early 20th centuries the Seletsky family (including Yosyp Seletsky, d 1918) held large estates in the Poltava and Katerynoslav regions.

Rev Kyrylo Seletsky

Yaroslav Selezinka

Seletsky, Kyrylo [Selec'kyj], b 29 April 1835 in Pidbuzh, Sambir circle, Galicia, d 28 April 1908 in Tsebliv, Sokal county, Galicia. Ukrainian Catholic priest and author. After being ordained in 1860, he was a priest in several villages in Galicia and authored a number of popular religious books. From 1874 he was curate of Zhuzhil and Tsebliv. There he established the first residence of the *Sisters Servants of Mary Immaculate and helped found the *Sisters of St Joseph (1894). He served as spiritual adviser to both congregations.

Seletsky, Petro [Selec'kyj], b 2 March 1821 in Maliutyntsi, Pyriatyn county, Poltava gubernia, d 5 March 1880 (buried in the Vydubychi Monastery in Kiev). After graduating in law from Kiev University he served as a functionary in the Kiev gubernial administration (from 1844) and worked for the Kiev Archeographic Commission (1845–6). He became acquainted with T. Shevchenko through N. Repnin but differed with him on the Ukrainian question. Seletsky was deputy governor of Kiev gubernia (1858–66) and marshal of the gubernial nobility (1866–80).

His notebooks were published in *Kievskaiia starina* (1884, nos 2–9).

Selezinka, Yaroslav, b 1887, d July 1941 in Yertsevo, Arkhangelsk region, Russia. Army officer and community activist. After joining the Ukrainian Galician Army at the end of 1918, he served at the headquarters of the Third Corps in Stryi (January–June 1919) and then was chief logistics officer of the government of the Western Ukrainian National Republic. During the interwar period he practiced law in Radekhiv and was active in the Ukrainian National Democratic Alliance. In 1939 he was arrested by the NKVD and deported to a concentration camp, where he was executed.

Seleznov, Ivan [Selezn'ov], b 3 January 1856 in Kiev, d 31 March 1936 in Kiev. Painter. After graduating from the St Petersburg Academy of Arts (1881) he returned to Kiev, where he took part in the restoration of the 12th-century frescoes in St Cyril's Church (1884) and taught at the Kiev Drawing School (1886–90) and Kiev Art School (1901–20). He did genre paintings (eg, *The Last Chord*, 1885), historical paintings (eg, *In Pompei*, 1886), and portraits (eg, of M. Murashko and his daughter).

Self-determination. The right of every society to determine its social and political system and choose its government. Self-determination was a basic principle in 18th-century liberal thought and was one of the basic ideas of the French and American revolutions. In the 19th and 20th centuries many nations exercised this right in their constitutional acts. National self-determination, or the right of every nation to set up its own state or to associate with other nations in a larger state based on *federalism or *autonomy, is entailed by the general principle. The right of various branches of the same nation to unite in a single state is implicit in the concept of self-determination. National self-determination is accepted generally as a progressive concept in contrast to the reactionary principles of legitimacy or imperialism. During the First World War the Entente Powers supported self-determination to weaken the allegiance of the national minorities in the multinational Central Powers. In January 1917 President W. Wilson announced that the self-determination of nations was one of the aims of war. The *Paris Peace Conference applied the principle of national self-determination selectively in East-Central Europe: it recognized Poland's but not Ukraine's claim. In the interwar period many nations not satisfied with the new order in Europe pursued a revisionist policy based on the principle of self-determination. The League of Nations also applied the principle selectively: it settled several territorial disputes by means of plebiscites but ignored Western Ukraine. The charter of the United Nations refers to self-determination (in articles 1 and 2) only in a general way, but the organization's later declarations on colonialism and imperialism clearly recognize the right of self-determination.

In the 19th century the Ukrainian national movement at first alluded only vaguely to self-determination. M. *Drahomanov first defined it in political terms as self-rule and autonomy within a reorganized Russian or Austrian federation. The goal of complete independence was raised only at the end of the 19th and the beginning of the 20th centuries, by thinkers such as M. *Mikhnovsky, I. Franko,

and Yu. Bachynsky. During the revolutionary period (1917–20) the idea of self-determination was expressed unequivocally in the *universals, constitutional acts, proclamations, diplomatic notes, and statements of the Ukrainian governments. The law on *national-personal autonomy, for example, granted extensive rights to the national minorities of Ukraine. The Western Ukrainian National Republic arose and united with the UNR in accordance with the idea of national self-determination.

The Soviet regime in Russia, drawing upon earlier Party declarations and V. Lenin's writings, from the very beginning actively propagated the slogan of national self-determination. The Declaration of the Rights of the Peoples of Russia, issued in November 1917, proclaimed the 'right of the peoples of Russia to free self-determination, even including secession and independent statehood.' In a note to the UNR government on 17 December 1917, the Council of People's Commissars recognized Ukraine's right to self-determination but at the same time sent an army against the republic. This behavior was based on the presupposition that only the working class, and in practice the Communist party, could exercise self-determination, if it were in the interests of the revolution. In Ukraine's case the Party decided that self-determination was detrimental to the world revolution. Nonetheless, the Soviet government often theoretically assumed Ukraine's self-determination – for example, in the 1920 agreement between the RSFSR and the Ukrainian SSR, in the Peace Treaty of Riga (1920), and in the protest notes against Poland's incorporation of Galicia. The 'self-determination' of the Ukrainian people was also the excuse for the Soviet annexation of Western Ukraine in 1939. The 1919, 1926, and 1936 constitutions of the Ukrainian SSR, however, contained no explicit reference to self-determination. In general the Party supported the self-determination of nations when doing so served Soviet foreign interests, but refused to apply it to the peoples of the USSR. Although in theory the republics had the right of self-determination insofar as they had the right to secede from the USSR, in practice they could not exercise this right. Nonetheless, the government of Ukraine executed the right to self-determination by proclaiming sovereignty on 16 July 1990 and complete independence on 24 August 1991.

V. Markus

Self-government. The authority of communities to legislate and administer their own affairs within a certain defined area, such as a province, county, or city, that is a part of a state. Self-government is closely related to *autonomy and can be bestowed also on groups, such as ethnic minorities, which do not inhabit a compact territory (see *National-personal autonomy). The modern concept of self-government should not be confused with various forms of local autonomy under feudalism or other political systems; it functions only within the framework of the modern state. Self-government is defined and granted by the sovereign state; it can take various forms and apply to different levels of government. In a federated state (see *Federalism) the constituent states or provinces enjoy a certain measure of self-government. To some degree the *Hetman state, the crownlands of *Galicia and *Bukovyna within Austria-Hungary, and the *Ukrainian SSR within the USSR enjoyed self-government. At the local level the rural **hromady* and *cities and towns enjoyed a degree of self-

government under the Russian and Austrian imperial regimes, the Polish interwar regime, and the Soviet regime (see *Municipal government).

Self-heal (*Prunella*; Ukrainian: *sukhovershok*). A perennial herb of the family Labiatae. In Ukraine common self-heal (*P. vulgaris*) is found in forests, often growing as a weed; *P. grandiflora* grows in the forest-steppe and steppe zones and in the Crimea, and *P. lancinata* is found in dry meadows and in the forest margins of Transcarpathia and the Crimea.

Self-Reliance Association of American Ukrainians (Obiednannia ukraintsiv Ameryky, or Samopomich). A social welfare organization founded in New York in 1947 by recently arrived Ukrainian immigrants. The association organized Ukrainian nurseries, schools, and homes for the elderly. It supported financially Ukrainian schools in Germany, Austria, and Poland and Ukrainian student organizations in Western countries. The original professional sections of the association (engineers, teachers, and students) eventually separated into independent societies. Most of the local branches of Self-Reliance formed credit unions bearing the same name. In 1950 the association began to publish the magazine *Novyi svit*, which in 1959 was renamed *Nash svit*. By 1962 it had 18 branches and almost 7,000 members. In 1990 it had 21 branches and 15,000 members. Its presidents have included P. Andrusiv, V. Kalyna, Yu. Revai, S. Sprynsky, and Ye. Lozynsky.

Self-Reliance federal credit unions (Samopomich). A group of Ukrainian credit unions in the United States set up since the 1950s by the larger branches of the *Self-Reliance Association of American Ukrainians. All of them are regulated and audited by the Federal Bureau of Credit Unions. By 1979 there were 16 such unions, the largest of which were in Chicago, New York, Detroit, Philadelphia, Newark, Jersey City, Passaic, and Baltimore. Along with other Ukrainian credit unions they belong to the *Ukrainian National Credit Union Association.

Selianin'' (Peasant). A monthly Russophile newspaper published in Mamaivtsi (now Novosilka) and then Chynkiv, Bukovyna, from 1895 to 1901. It was edited by G. Savchuk and then I. Biletsky.

Selianka Ukraïny. See *Kolhospyntsia Ukraïny*.

Selianska, Vira. See Vovk, Vira.

Selians'ka bidnota. See *Selians'ka pravda*.

Selians'ka dolia (Peasant Fate). A weekly organ of the Ukrainian Social Democratic party caucus in the Polish Sejm, published in Lutske in 1923 and January 1924. It was edited by Ye. Tkachuk, I. Stepaniuk, and H. Hladky. It was closed down by the Polish authorities; the weekly *Nash shliakh* (ed Kh. Prystupa) appeared in its place from March 1924 to 1925.

Selians'ka hromada (Peasant Community). A popular weekly paper published by the UNR Ministry of Education in Kamianets-Podilskyi and then Vinnytsia in 1919.

Seliaska Kasa (Peasant Bank). The central association of *Raiffeisen credit co-operatives in Bukovyna, founded by S. *Smal-Stotsky and L. *Kohut in 1903 in Chernivtsi. By 1912 it represented 159 credit, 11 consumer, 2 dairy, and 2 other co-operatives, with a total membership of almost 20,000. Seliaska Kasa provided loans to individuals and co-operatives, helped in the marketing of agricultural produce, organized retail stores, and ran a logging operation. It also served as the central auditing body for all types of Ukrainian co-operatives in Bukovyna. The organization experienced a major crisis after 1911. It had over-extended its funds and was placed under the control of the Provincial Bank by the Austrian government and ordered to institute several reforms. It continued to function after Bukovyna was taken over by Rumania, but the authorities increasingly limited its autonomy and activities. In 1924 it was reconstituted as the Northern Bukovyna Bank. It lost its Ukrainian character and ceased to play a role in civic life. Seliaska Kasa published the organ *Vistnyk soiuza* (1903–7), *Narodne bohatsvo* (semimonthly, 1908–10), and brochures and booklets on co-operative and educational topics. Its directors before the First World War were Kohut and O. Lutsky.

Seliaska pravda (Peasant Truth). An organ of the CC CP(B)U and the Central Committee of Poor Peasants, published in Kharkiv daily in July 1921 and then three times a week to December 1925. It succeeded the daily *Seliaska bidnota* (March 1920 to April 1921). *Seliaska pravda* was edited by S. Pylypenko; the editorial secretary was O. Vyshnia. It published news in brief, much peasant correspondence, and advice on how and what to write about to newspapers. Members of the *Pluh writers' group were frequent contributors, and the paper did much to popularize Ukrainian literature among the peasantry. *Seliaska pravda* had a pressrun of 7,500. It was merged with **Radians'ke selo*.

Seliaska rada. See *Peremys'kyi vistnyk*.

Seliaska kyi prapor (Peasant Flag). A popular organ of the Ukrainian People's Union, published weekly in Stanyslaviv (now Ivano-Frankivske) from July 1925 to March 1928. It was edited by I. Stovpiuk and V. Bala-huttrak.

Seliaska kyi shliakh (Peasant Path). A weekly organ of the socialist *Sel-Soiuz peasant alliance, published in Kholm from 1927 to the end of 1928. It was published by P. Vasynchuk and edited by V. Hul.

Selianyn (Peasant). A clandestine monthly organ of the *Revolutionary Ukrainian party. It was printed in Austrian-ruled Chernivtsi in 1903 and in Lviv in 1904–5, smuggled into Russian-ruled Ukraine, and illegally distributed there among the Ukrainian peasantry. The paper was subsidized by Ye. *Chykalenko. In Chernivtsi the managing editor was L. Kohut, although D. Antonovych was the main force behind its publication. In Lviv the paper was published by M. Hankevych and edited by S. Vityk. *Selianyn* had a pressrun of some 1,000 copies. Thirty-two issues appeared.

Selianyn (Peasant). A weekly newspaper for the peasantry, published in Lviv in 1929–35. It was pro-Polish in orientation and supported the official Non-Party Bloc of Cooperation with the Government. The editors were E. Kukh, M. Chornenko, and I. Behmetiuk.

Seliava, Antonii Atanasii [Seljava, Antonij Atanasij], b ca 1583, d 1655. Uniate metropolitan. He completed his theological studies in Rome and became archimandrite of a monastery in Vilnius. In this position he engaged in polemics with M. Smotrytsky. In 1624, following the death of Archbishop Y. Kuntsevych, he became archbishop of Polatsk. He was elevated to the office of Uniate metropolitan of Kiev in 1640 and took part in delicate negotiations with Orthodox hierarchs regarding the creation of a single Uniate patriarchate for the Ruthenian (Ukrainian and Belarussian) church. These negotiations ended at the death of the Orthodox metropolitan, P. Mohyla, in 1647. The turbulent events of the Khmelnytsky uprising forced Seliava into exile to the Podlachia region, where he died.

Seliber, Valentyn, b 24 April 1920 in Tyraspil, in present-day Moldavia. Sculptor. A graduate of the Kiev State Art Institute (1953), he has created figures and compositions, such as *Female Javelin Thrower* (1951), *The Koliivshchyna Rebellion* (1954), *For Land, for Freedom* (1955), and *Snow* (1967), and collaborated on the monument to the victims of the Second World War in Petropavlivka, Cherkasy oblast (1970).

Seliuchenko, Oleksandra [Seljučenko], b 6 May 1921 in Opishnia, Zinkiv county, Poltava gubernia, d 23 June 1987 in Opishnia. Folk ceramist. She studied at the school of the Opishnia Ceramics Plant (1937–9) and then worked at the plant, where she created figurines, such as *The Vixen and Rooster* (1967), *The Sorochyntsi Fair* (1976), and *Rider* (1985), as well as decorative plates and ceramics. Her works have been exhibited at international shows in Marseille (1957, 1958), Brussels (1958), and Expo-70 in Osaka.

Ivan Selivanov: *The Golden Gate* (linocut)

Selivanov, Ivan, b 5 January 1924 in Riabkovo, now in Cheliabinsk oblast, Russia, d 2 November 1984 in Kiev. Graphic artist. After graduating from the Kiev State Art Institute in 1952, he taught there. He has produced several series of prints on Soviet themes, such as 'The Victors'

(1954) and 'The Great Working Class' (1960); linocuts, such as *Kobzar* (1961); and illustrations to editions of works by A. Holovko (1959), Yu. Yanovsky (1961), and O. Honchar (1964) and to the epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1965–73).

Selo (Village). An illustrated weekly newspaper for peasants and workers, published in Kiev from September 1909 to February 1911. It was one of the first Ukrainian-language newspapers in the Russian Empire. The official publishers were H. Yampolska and I. Malych, but the guiding force behind the newspaper was M. *Hrushevsky, who wrote most of the editorials. The managing editor and literary critic was Yu. Tyshchenko. Popular features included chronicles of developments in the Russian Empire (by M. Hekhter) and Western Ukraine and Europe (by Mykola Zalizniak and V. Doroshenko), and political and cultural commentaries by P. Stebnytsky (pseud: Smutok), Mykyta Shapoval, and others. The paper also contained articles on agriculture, hygiene, and rural economics by A. Ternychenko, V. Koroliv, and O. Mytsiuk; poetry by O. Oles, V. Samiilenko, H. Chuprynka, and Ya. Shchoholiv; and prose by V. Vynnychenko, O. Kobylanska, A. Teslenko, Modest Levytsky, L. Martovych, V. Storozhenko, V. Stefanyk, and S. Cherkasenko. At the height of its popularity, *Selo* had 4,500 to 5,000 subscribers. The publishers were constantly harassed and fined by the tsarist authorities, and the paper was finally forced to cease publication. It was succeeded by **Zasiv*.

Selo (Village). A semimonthly organ of the Podolia Gubernia executive published in Kamianets-Podilskiy in 1918–19. It was edited by M. Butovsky.

Selo (Village). A semimonthly organ of the Transcarpathian branch of the Czechoslovak Agrarian party, published in Mukachiv in 1920–4. The editors were I. Pavlyk and P. Sydor. The newspaper was printed in the Transcarpathian dialect, a feature which reflected its early official support for the Ukrainian movement in Czechoslovakia. It was succeeded as the party's organ by the Russian-language *Karpatorusskii vestnik* (1923–4) and *Zemledel'skaia politika* (1927–38) and the Ukrainian-language **Zemlia i volia* (1934–8).

Selo i Misto (SiM). See Futurism and Moscow.

Sel-Rob (Ukrainian Peasants' and Workers' Socialist Alliance; *Ukrainske seliansko-robotnyche sotsialistychne obiednannia*). A mass political party with pro-Soviet leanings, founded on 10 October 1926 in Lviv through a merger of *Sel-Soiuz and the People's Will party (PNV). The Communist Party of Western Ukraine (KPZU) was instrumental in the founding of Sel-Rob in that it acted as a mediator in the negotiations. The Central Committee of the new party was based on equal representation from both founding groups: M. Chuchmai, S. Makivka, and S. Kozyt'sky from Sel-Soiuz and K. Valnytsky, M. Zaiats, and K. Pelekhaty from the PNV. During the merger, the PNV adopted a pro-Ukrainian position (earlier it had been strongly Russophile) and issued a declaration to that effect. The directorate of the KPZU in Sel-Rob was initially represented by P. Kraikivsky. From the middle of 1927 Sel-Rob was involved in the debate among KPZU members

which ensued in the wake of the O. *Shumsky affair. On 1 September 1927 Sel-Rob was dissolved, with a return to life of both founding parties. The former PNV members now called themselves Sel-Rob Left; former Sel-Soiuz members who supported the Shumsky faction of the KPZU were called Sel-Rob Right. During the election campaign of February 1928 both sides fought bitterly against each other. The right won four seats in Volhynia and Polisia, and the left won three seats.

In May 1928 the Sel-Rob Unity, an apparently neutral organization, was established by Sel-Rob Left members. A substantial percentage of Sel-Rob Right members joined the new party. The Sel-Rob Unity had three official organs, *Nashe zhyttia*, *Nashe slovo*, and *Sel'-Rob*. Among its best-known leaders were K. Valnytsky, M. Durdella, S. Makivka, K. Pelekhaty, and M. Zaiats. Its influence was greatest in Volhynia. With the passage of time the Sel-Rob Unity became completely dominated by the KPZU and lost whatever slight independence it had had. The party organized peasant strikes and demanded the parcelation of regional and church lands for the benefit of the poorer peasants. During times of open conflict it called for the withholding of taxes. Its greatest influence was in Ukrainian rural co-operatives. Sel-Rob spoke out against any and all criticism relating to life in the USSR, collectivization, and the state of Ukrainian culture. In September 1932 the party was dissolved by the Polish authorities.

J. Radziejowski

Sel'-Rob

Sel'-Rob. A pro-Soviet weekly newspaper published in Lviv from September 1927 to September 1932 (a total of 293 issues). It was the organ of the Left faction and, from May 1928, the Unity faction of the *Sel-Rob Ukrainian Peasants' and Workers' Socialist Alliance. The editors were K. Pelekhaty, F. Yavorsky, and I. Shkvarok; they were assisted by K. Valnytsky, M. Holinaty, M. Zaiats, P. Kozlaniuk, and I. Dovhaniuk. In 1930 *Sel'-Rob* had a press-run of 8,500. It was closed down by the Polish authorities.

Selska, Mariia [Sel's'ka, Marija] (née Reich), b 23 June 1903 in Kolomyia, Galicia, d 3 February 1980 in Lviv. Painter; wife of R. *Selsky. She studied at the Cracow (1924–5) and Vienna (1926–7) academies of art and the Académie moderne in Paris (1928–30). In the 1930s she was a member of the *Association of Independent Ukrainian Artists in Lviv. She painted landscapes, such as *Hutsul Landscape* (1956), *Bilhorod* (1964), and *Grape Gathering*

Mariia Selska (self-portrait, oil, 1978)

(1968); portraits, such as *Girl* (1939) and *Lesia Ukrainka* (1950); and still lifes. The influence of constructivism and cubism is evident in her works.

Sel'skii hospodar' (The Farmer). A semimonthly newspaper for peasants, published in Chernivtsi from March 1878 to March 1879 (a total of 25 issues). The publisher and editor was M. Dymytriievych.

Roman Selsky (self-portrait)

Selsky, Roman [Sel's'kyj], b 21 May 1903 in Sokal, Galicia, d 4 February 1990 in Lviv. Painter, graphic artist, and teacher; husband of M. *Selska. He studied at the Novakivsky Art School in Lviv, graduated from the Cracow Academy of Fine Arts (1927), and made several trips to Paris, where he studied with F. Léger. Upon his return to

Lviv in 1929, he was instrumental in establishing Artes, an association of left-wing artists, and taught at the Applied Arts High School (1935–47) and the Lviv Institute of Applied and Decorative Arts (1947–72). Surrealist influences are apparent in his early works, such as *Port in Hel* (1930) and *Seashore in Hel* (1932). In the late 1960s Selsky returned to painting the seashore, in works such as *At the Seashore* (1969) and *Decorative Composition* (1966), which show the influence of Léger. Selsky painted numerous landscapes, particularly of the Carpathian Mountains, such as *Fallen Spruces* (1960), *Late Flowers* (1971), the often-reproduced *Chornohora* (1972), and *Flowers in Dzembronia* (1983). The Carpathian environment is also reflected in his still lifes and compositions of interiors, such as *Dzembronia Still Life* (1965) and *Interior of a Hutsul House* (1975); many of them include views through windows and open doors, such as the impressionistic *Landscape Seen through a Window* (1938), *Winter Seen through a Window* (1970), and *Still Life by the Window* (1971) and the Matisse-like *Still Life* (1980). Except for a few realistic landscapes and somber still-life compositions from the 1940s and early 1950s, Selsky managed to avoid the narrow confines of socialist realism. His sensitive and vibrant palette and organization of flattened forms and space are in the Western European art tradition. His contribution to Ukrainian art was only partially acknowledged in the publication of a modest album of his works in 1988.

D. Zelska-Darewych

Selsky, Shchasny Feliks [Sel's'kyj, Ščasnyj], b 1852 in Kolodnytsia, Stryi county, Galicia, d 20 May 1922 in Vytvytsia, Dolyna county, Galicia. Physician and civic leader; full member of the Shevchenko Scientific Society from 1899. As a university student he was active in the Sich student society, and in 1878 he was tried with I. Franko and M. Pavlyk for being a member of a secret socialist society. After graduating from Vienna University in 1880, he specialized in gynecology, and in 1882 he became head of the gynecology department of the Lviv Polyclinic. His articles on gynecology appeared in Ukrainian and German medical journals. He also worked on Ukrainian medical terminology.

Volodymyr Selsky

Selsky, Volodymyr [Sel's'kyj], b 13 October 1883 in Vykhylivka, Proskuriv county, Podilia gubernia, d 18 February 1951 in Kiev. Geologist and geophysicist; member of the AN URSR (now ANU) from 1939. He graduated from Kiev University in 1909. He then taught at Warsaw University (1910–13), Kislovodsk gymnasium (1914–20), and

the Petroleum Institute in Grozny (1921–8). In the 1930s he worked as a geologist in state petroleum enterprises. He chaired the geophysics department of the ANU Institute of Geological Sciences (1939) and after the war organized geophysics departments at Lviv University and the Lviv Polytechnical Institute. Selsky researched the theoretical and practical problems of oil exploration, the genesis and migration of oil, and the oil reserves of Ukraine and the USSR.

Sel-Soiuz (Ukrainske sotsiialistychnе obiednannia Selianskyi soiuz [The Peasant Union Ukrainian Socialist Alliance]). A Galician Ukrainian political party formed in March 1924 by members of the socialist faction of the Ukrainian Club in the Polish Sejm. The party carried out most of its activities in Volhynia and the Kholm region. Its program, ratified on 27 August 1924, asserted that it was a Ukrainian class party whose aim was to abolish the exploitation of poor Ukrainian peasants and to offer them land in the areas where they resided. It strove for national self-determination and universal, free, secular schooling in the Ukrainian language. Ultimately the party sought to eliminate capitalism and replace it with socialism. Its leaders were P. *Vasynchuk (first head), A. Bratun, S. Kozytzky, S. Nazaruk, M. Chuchmai, and S. Makivka. Its official organ was the weekly *Nashe zhyttia*. Sel-Soiuz was also involved in the development of the popular educational society *Ridna Khata*, and the party defended the authority of the Orthodox church from attempts to restrain it. The party's attitude toward Soviet Ukraine and the Communist Party of Western Ukraine was initially reserved and tentative, but it became more positive over time. Sel-Soiuz challenged the Polish Socialist party on its own ground, by charging that that party's policies were accommodating to the right, and its cultural activities assimilationist. On 10 October 1926 Sel-Soiuz joined forces with the People's Will party to create *Sel-Rob. A small group of Sel-Soiuz members, headed by Vasynchuk, refused to join the new organization and continued their independent activities as Sel-Soiuz until 1928. In 1927 they published the newspaper *Selians'kyi shliakh*.

J. Radziejowski

Selydove. V-18, DB III-2. A city (1989 pop 82,500) on the Solona River in Donetsk oblast. It originated in 1770–3 as a settlement of Moldavian and Wallachian colonists, who were replaced within a decade by Cossacks of Myrhorod regiment. Coal deposits were discovered in the area in the 1850s. In 1956 the town was given city status, and its name changed from Selydivka to Selydove. Today it is an industrial center with two coal mines, a coal enrichment plant, a building-materials industry, and a food industry.

Semafor u maibutnie (Semaphore into the Future). A literary almanac published in Kiev by the *Association of Panfuturists in May 1922. It contained M. *Semenko's Panfuturist manifesto and articles and literary works by Semenکو, G. Shkurupii, Yu. Shpol (M. Yalovy), O. Slisarenko, M. Irchan, Mykola and Marko Tereshchenko, and V. Desniak.

Semaka, Illia, b 1867 in Berehomit, Bukovyna, d 4 January 1929 in Prievidza, Slovakia. Judge and civic and political leader; brother of Ye. *Semaka. A graduate of Chernivtsi University, he served as a judge and eventually

became chief judge of the provincial court. A member of the National Democratic party, he was elected to the Austrian parliament in 1907 and 1911 and to the Bukovynian Diet and its executive in 1911. In 1915–16 he was a member of the General Ukrainian Council in Vienna. As a member of the Ukrainian National Rada and its Bukovynian section, the Ukrainian Regional Committee, he played an important role in asserting Ukrainian control of Bukovyna in November 1918. In Vienna he was active in the Government-in-exile of the Western Ukrainian National Republic and then served as a judge in Slovakia.

Rev Yevhen Semaka

Semaka, Yevhen, b 1863 in Banyliv, Bukovyna, d 17 July 1912 in Chernivtsi. Church and civic leader; brother of I. *Semaka. He completed his theology training at Chernivtsi University and then was catechist in the Ukrainian gymnasium in Chernivtsi, from 1898. As a member of the Orthodox church consistory in Bukovyna, he defended the rights of the Ukrainian Orthodox believers and opposed Rumanianization of the church. He authored many religious textbooks for elementary and high schools and an illustrated history of the *Ruska Besida society in Chernivtsi (1909) under the pseudonym Yevhenii Dmytriv, and contributed articles to the newspaper *Ruska rada* (1898–1905). He also co-edited the bilingual Rumanian-Ukrainian church journal *Candela*.

Semaniuk, Ivan. See Cheremshyna, Marko.

Semantics. A branch of linguistics dealing with the meaning of morphemes, words, and phrases through time and the relationship of language, thought, and meaning. The semantics of the Ukrainian language have not been studied systematically. Semantic questions have been discussed, however, in works in lexicology and normative stylistics and in studies of the language of individual writers or literary genres, by linguists such as M. Levytsky, I. Ohienko, V. Simovych, M. Sulyma, M. Hladky, I. Troian, B. Tkachenko, A. Kyrychenko, V. Vashchenko, I. Cherednychenko, I. Bilodid, V. Franchuk, and A. Koval. In 1982 H. Arpolenko published a book on the structural-semantic construction of the sentence in modern Ukrainian. Materials on the semantics of particular Ukrainian words and word groups have appeared in serials such as *Ridna mova* (Warsaw, 1933–9), *Pytannia movnoi kul'tury* (Kiev 1967–71), *Ridne slovo* (Kiev, 1971–4), and *Kul'tura slova* (Kiev, since 1976).

Semashko, Yosyf [Semaško, Josyf], b 5 January 1799 in Pavlivka, Lypovets county, Kiev gubernia, d 5 December 1868 in Vilnius. Church hierarch. The son of a Uniate priest, he graduated from the Catholic Theological Seminary of Vilnius University, and was ordained in 1821. In 1822 he entered the Roman Catholic College in St Petersburg. There he and members of the Holy Synod of the Russian Orthodox church prepared plans for the conversion of the *Uniates of Right-Bank Ukraine and Belarus to Orthodoxy. He helped prepare a project to establish a Uniate college, and assisted in drawing up plans to abolish the Basilian order (realized in 1832), to reorganize the eparchies, and to purge Latin elements from Uniate church rites. He was consecrated bishop of Mstislau and head of the Belarusian consistory in 1829 and bishop of Lithuania in 1832. In 1835 he joined a secret committee working to incorporate the Uniate church into the Russian Orthodox church. Its objective was formally accomplished in February 1839. Semashko was made Orthodox archbishop of Vilnius and Lithuania, and in 1844 he moved to Zhyrovichy to assist in the conversion of Belarus. Semashko's actions were condemned by Pope Gregory XVI in 1839 and by Mykhailo Levytsky, the metropolitan of Halych and archbishop of Lviv. Semashko joined the Holy Synod in 1847 and was named a metropolitan in 1852. His autobiography and a collection of documents associated with his life were published as *Zapiski Iosifa, mitropolita Litovskogo* (The Notes of Yosyf, Metropolitan of Lithuania, 1883, 3 vols).

Roman Sembratovych

Cardinal Sylvester Sembratovych

Sembratovych, Roman [Sembratovyč], b 6 July 1875 in Monastyrets, Lisko county, Galicia, d 8 January 1906 in Vienna. Journalist and publicist. As a law student at Vienna University he was a leading member of the Sich student

society there. He became a regular contributor to various German and Austrian newspapers, for which he reported primarily on developments in Galicia (initially using the pseudonym Galizischer Slave). In 1901 he founded the weekly *X-Strahlen* to inform the German and especially the Viennese public about Ukrainian affairs. After the paper folded at the end of that year, he became the Vienna correspondent of *Frankfurter Zeitung*. In late 1902 he published the book *Polonia irredenta*, in which he severely criticized Polish chauvinism and conservatism. From 1903 to his death Sembratovych was editor of the semimonthly *Ruthenische Revue* in Vienna. In 1905 he published a second book, *Das Zarentum in dem Kampfe mit der Zivilisation*, on the tsarist repression of the Ukrainian national movement and culture.

Sembratovych, Sylvester [Sembratovyč, Syl'vester], b 3 September 1836 in Doshnytsia, Jasło circle, Galicia, d 4 August 1898 in Lviv. Ukrainian Catholic metropolitan and cardinal. He studied in Vienna and Rome and completed a PHD at the Athanasius College in 1861. He was ordained in 1860 and returned to Galicia to become a parish priest in Tylych. He served as prefect of the Greek Catholic Theological Seminary in Lviv (1863–9) and taught dogma and was dean of the theology faculty (1873–9) at Lviv University. In 1870 he founded the newspaper *Ruskii Sion*. He also helped prepare and publish popular prayer books (including the first one in Ukrainian) and church manuals. In 1879 he was consecrated bishop and named assistant to Metropolitan Y. Sembratovych, his uncle. In 1882 he became administrator of Lviv archeparchy, and in 1885 he was named metropolitan of Halych by Pope Leo XIII. Under his leadership Stanslaviv eparchy was formed in 1885, and the *Lviv Synod held in 1891. The synod did much to reform church practices in the metropoly, and rejected attempts to introduce compulsory celibacy for Ukrainian clergymen. Sembratovych expanded the Lviv theological seminary and appointed the scholars I. Dolnytsky and O. Bachynsky to the faculty. He also helped establish St Josaphat's Ukrainian Pontifical College in Rome. During his tenure the Sisters Servants of Mary Immaculate order was established in Galicia, and the Basilian Order of Sisters was reformed. Politically, Sembratovych supported the *New Era policy of appeasement with the Poles in Galicia. In 1894 Pope Leo XIII made him a cardinal. He was buried in the crypt of St George's Cathedral in Lviv.

W. Lencyk, I. Nazarko

Sembratovych, Yosyf [Sembratovyč, Josyf], b 8 November 1821 in Krynytsia, Nowy Sacz circle, Galicia, d 23 October 1900 in Rome. Ukrainian Catholic metropolitan; uncle of S. Sembratovych. A Vienna University graduate in theology, he was ordained in 1845. After receiving a DTH degree from Vienna, he served as prefect (1850–2) at the Greek Catholic theological seminaries in Peremyshl and Lviv, vice-rector (1852–60) of the Greek Catholic seminary in Vienna, and an assistant professor (1850–2) and professor (1861–5) of New Testament studies at Lviv University. In 1865 Pope Pius IX nominated him titular bishop of Nazianzus in Rome. In 1867 he was appointed administrator of Peremyshl eparchy, a position he held until 1872. In 1870 Emperor Francis Joseph I nominated him archbishop of Lviv and metropolitan of Halych, and Pius IX made him a Roman count and assistant to the papal

Metropolitan Yosyf
Sembratovych

Rev Stefan Semchuk

throne and appointed him consultator to the Congregation for the Propagation of the Faith. Sembratovych spearheaded the temperance movement in his metropoly, thereby incurring the wrath of the local Polish nobility, which monopolized distilling and owned all the taverns. They used their influence in Vienna to try to have Sembratovych removed by accusing him of political incompetence and blaming him for the spread of Russian Orthodoxy and the Russophile movement among the peasants and clergy of Galicia. In 1882, after Rev I. *Naumovych converted to Orthodoxy and was followed by his parishioners in Hnylychky, Zbarazh county, Francis Joseph ordered Sembratovych to Vienna and demanded that he give up his metropoly. Sembratovych went to Rome, where Pope Leo XIII accepted his resignation and appointed him, instead, titular archbishop of Theodosiopolis, consultator to the Congregation for the Propagation of the Faith and to the Congregation of the Index, and chairman of the papal commission for the revision of ecclesiastical texts. During his last 18 years in Rome, Sembratovych promoted and defended the rights of the Uniate church.

W. Lencyk, I. Nazarko

Semchuk, Stefan [Semčuk], b 2 November 1899 in Lviv, Galicia, d 4 August 1984 in Winnipeg. Catholic priest and poet. Having served in the Austrian army and partisan units during the First World War, he completed his education at the Peremyshl seminary and was ordained in 1923. He served as parish priest in the Boiko and Hutsul regions before he was sent to Canada (1928) and appointed to the Holy Protectress parish in Winnipeg. He was a founder (1932) of and leading figure in the *Ukrainian Catholic Brotherhood, the editor of its publications, and its representative on the presidium of the Ukrainian Canadian Committee (now Congress). After the war he organized CARE packages for refugees in Europe and helped them to immigrate to Canada. He published several collections of verses, such as *Meteory* (Meteors, 1924), *Fanfary* (Fanfares, 1931), and *Kanads'ka rapsodiia* (Canadian Rhapsody, 1959); a collection of short stories, *Proroky* (Prophets, 1927); a history of Ukrainian literature (1965); a study of the Union of Berestia (1946); and a biography of Metropolitan Y. Rutsky (1967).

Semchyshyn, Myroslav [Semčyšyn], b 26 August 1910 in Zolochiv, Galicia. Philologist, journalist, and community figure. He studied at Lviv University (1932) and taught at the Academic Gymnasium in Lviv (1936–8) and the Lviv Pedagogical Institute (1939–41). During the German occupation he worked for the Ukrainian Relief Committee in Lviv. As a postwar refugee he worked for the Ukrainian Relief Committee in Vienna (1944–6) and taught at a Ukrainian gymnasium in Salzburg. He emigrated to England in 1947 and was the editor of *Ukrains'ka dumka* in London (1948–50). From 1955 he lived in Chicago, where he cofounded and edited (1955–7) the paper **Ukrains'ke zhyttia*. He was a professor of Russian, Polish, and (from 1973) Ukrainian at Northeastern Illinois State University (1961–78). He wrote articles on linguistic, literary, and pedagogical subjects, booklets in English on Ukrainians in Illinois (1976) and the Ukrainians (1977), and a book on 1,000 years of Ukrainian culture (1985). From 1981 he headed the Chicago chapter of the Shevchenko Scientific Society.

Stefan Semchyshyn

Mykola Semenenko

Semchyshyn, Stefan [Semčyšyn], b 19 August 1940 in Stara Dubrova, Bosnia, Yugoslavia. Obstetrician and maternal-fetal specialist. He emigrated to Canada in 1960 and obtained his medical training at Queen's University in Kingston, Ontario (MD, 1971) and Ohio State University in Columbus (maternal-fetal medicine, 1976–8). He has been an associate professor of obstetrics and gynecology at Seton Hall University in West Orange, New Jersey, since 1989. An advocate of education as a means of preventing pregnancy losses, he has initiated and established perinatal networks and high-risk pregnancy care centers that use his innovative programs on pregnancy literacy. He has lectured extensively and contributed numerous papers to scholarly medical journals. He is the founder of the Jacobs Institute of Women's Health, the *Perinatal Newsletter*, and the Partnership in Pregnancy Institute in New Jersey, and the author of *How to Prevent Miscarriage and Other Crises of Pregnancy* (1989; 2nd edn 1990).

Semchyshyn, Tymish [Semčyšyn, Tymiš] (nom de guerre: Richka), b 1915 in Sambir county, Galicia, d 1945? in Odessa. OUN leader. In 1941 he was deputy leader of the Southern Expeditionary Group of the OUN (Bandera faction) and organized anti-Nazi resistance in southern

Ukraine. After being arrested by the Gestapo in early 1942, he was sent to a concentration camp. He escaped in March 1943 and became OUN leader for Transnistria, where he co-ordinated resistance to the Rumanian regime. In 1944 he was a member of the OUN team that conducted negotiations with Rumanian military representatives. He was captured by the Rumanian secret police in 1945 and turned over to the NKVD, who probably killed him.

Semchyshyn, Yaroslav [Semčyšyn, Jaroslav], b 29 March 1930 in Winnipeg. Singer, actor, and community leader. A pharmacist by profession, he graduated from the University of Manitoba (1956), studied voice at the Royal Conservatory of Music in Toronto (1956–9), and sang in operas and concerts. He founded the Ukrainian Theater in Winnipeg and directed plays such as *Marusia Churai*, *Zaporozhets' za Dunaiem* (Zaporozhian Cossack beyond the Danube), and *Natalka Poltavka* (Natalka from Poltava). After serving as director of the Secretariat for Liaison with the Federal Government on Cultural Affairs (1976–83), he became director of the Department of Cultural Heritage Initiatives within the ministry and in 1984 was elected president of the Manitoba Credit Union Central.

Semdor, Semen (pseud of Symon Doroshenko), b 1888 in the Kherson region, d 12 August 1938 in Symferopil. Actor and director. He began his artistic career in Chibisov's Russian troupe in Oleksandriia (1910–13) and then worked as an actor in the Ruska Besida Theater (1913–14); led an amateur troupe in Katerynoslav (1915–17); and acted in *Molodyi Teatr* (1918–19), the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–20), the Independent Theater in Zhytomyr (1921–2), and the Franko New Drama Theater (1923–6, with interruptions). In 1927–32 he was artistic director of a touring theatrical workshop in the Crimea. He staged H. Ibsen's *Enemy of the People*, K. Wittfogel's *Rote Soldaten*, and K. Gutzkow's *Uriel Acosta*.

Semeinaia biblioteka (Family Library). A Russophile journal of politics, history, and culture, published monthly in 1855 and then semimonthly to June 1856 in Lviv. It was edited and published by S. Shekhovych in **yazychiie*. It printed two novellas by H. Kvitka-Osnovianenko and reprinted many articles and literary works from Russian journals.

Semen Olelkovich [Olel'kovyč], b ca 1420, d December 1470 in Kiev. The last appanage prince of Kiev (from 1454); son of *Olelko Volodymyrovych, brother of *Mykhailo Olelkovich, and great-grandson of the grand duke of Lithuania, Algirdas. He served as the representative of the Rus' population in the *Lithuanian-Ruthenian state and sought to expand the autonomy of the Kiev principality. He supported the Lithuanian opposition to the Polish king Casimir IV Jagiellończyk. He was backed by Lithuanian and Ruthenian boyars in an unsuccessful bid for the Lithuanian throne. After his death Kiev principality was abolished.

Semenenko, Mykola, b 16 November 1905 in Mariupil, Katerynoslav gubernia. Geologist; full member of the AN URSR (now ANU) since 1948. He graduated from the

Dnipropetrovske Mining Institute in 1927 and taught there (1937–41) and at other mining institutes. From 1944 he chaired a department at the ANU Institute of Geological Sciences and concurrently taught at Kiev University (1944–53). He organized and became director of the ANU Institute of the Geochemistry and Physics of Minerals (1969–77). Semenenko's research was in petrography, theories of metamorphism and metasomatism, Precambrian geology and geochronology, problems of ore content and the structure of metal deposits, the origin of the continental earth crust and lithosphere, and the theoretical foundations of planetary geochemistry.

Semenenko, Oleksander, b 27 August 1898 in Yelysavethrad, Kherson gubernia, d 1 June 1978 in New York. Lawyer and civic leader. During 1917–20 he was active in the Ukrainian Workers' Union in Yelysavethrad, a branch of the All-Russian Social Democratic party. After completing his law studies at the Kharkiv Institute of People's Education (1924) he joined the Kharkiv Gubernia College of Lawyers. In 1937–8 he was twice arrested by the NKVD. Under the German occupation he served as chairman of the Kharkiv Municipal Council (1942–3). As an émigré in Germany, he directed the Ukrainian Social Care Agency and was vice-president of the Ukrainian National Committee (1944–5). After living in Brazil for over 10 years, he moved to New York, where he worked at the Ukrainian Academy of Arts and Sciences and in a law firm. His memoirs, published in 1976 as *Kharkiv, Kharkiv*, provide a unique glimpse of life in the first Soviet Ukrainian capital during the 1920s and 1930s.

Semeniuk, Lidiia [Semenjuk, Lidija], b 24 March 1918 in Kiev. Architect. Since graduating from the Kiev Civil-Engineering Institute (1941) she has worked for various planning institutions in Kiev. She designed the cultural center in Zvenyhorodka (1948) and film theaters in Chernihiv and Nizhen (1949–50) and collaborated with other architects in designing the square in Pereiaslav-Khmelnytskyi (1954), residential buildings on Povitroflotskyi Prospekt in Kiev (1955–7), and the Universytet metro station in Kiev (1960).

Semenivka. I-13. A town smt (1986 pop 8,000) on the Revna River and a raion center in Chernihiv oblast. It was founded in the 1680s as a Cossack settlement in Starodub regiment by Col S. Samoilovych. After the abolition of the Hetman state it belonged to Novhorod-Siverskyi vicegerency (1782–96), Little Russia gubernia (1796–1802), and Chernihiv gubernia. In 1919, as part of Homel gubernia, Semenivka became part of Russia, but in 1926 it was reassigned to Hlukhiv and then Konotip okruhas in Ukraine. Since 1932 it has been part of Chernihiv oblast. In the 19th century the town manufactured woolen cloth and sugar. Today it has a footwear, a starch, and a brick factory.

Semenivka. IV-14. A town smt (1986 pop 8,000) and a raion center in Poltava oblast. It was established at the end of the 17th century. Under the Hetman state the village belonged to Khorol company in Myrhorod regiment. In the 19th century it was part of Khorol county in Poltava gubernia. It remains an agricultural town with a sugar refinery, a flour mill, and grain storage facilities.

Mykhailo (Mykhail) Semenko Semen Semkovsky

Semenko, Mykhailo (Mykhail), b 31 December 1892 in Kybyntsi, Myrhorod county, Poltava gubernia, d 23 October 1937. Poet, and founder and theoretician of Ukrainian *futurism; son of the writer M. *Proskurivna. Semenko studied at the Psycho-Neurological Institute in St Petersburg. His first collection, *Préludes* (1913), shows the influence of the poets of **Ukrains'ka khata*. In the collections that followed (*Derzannia* [Excitation, 1913] and *Kverofuturizm* [Quero-Futurism, 1914], and in the manifesto in the latter collection, Semenko initiated Ukrainian 'quero-futurism,' or the art of searching, at a time when Russian cubofuturism and egofuturism were appearing in Ukraine (in authors such as D. Burluiuk, V. Kruchenykh, and V. Khliebnikov). In 1918 Semenko published in Kiev the collections *P'iero zadaiaet'sia* (Pierrot Puts on Airs), *P'iero kokhaie* (Pierrot Loves), and *Deviat' poem* (Nine Long Poems). In 1919 his collections *P'iero mertvoopetliie* (Pierrot Deadnooses), *Bloc-notes*, and *V sadakh bezroznykh* (In the Roseless Orchards) and the poem 'Lilit' (Lilith) were published by Fliamingo, a publishing house of the futurist writers' group of the same name, which Semenko had founded. In 1919 he proclaimed the beginning of 'revolutionary futurism' and published his 'revolutionary futurist' poems, *Tovarysh Sontse* (Comrade Sun) and *Dvi poezofil'my* (Two Poetryfilms). He was also editor of the journal *Mystetstvo*.

In 1920, together with M. Liubchenko and O. Slisarenko, Semenko published *Al'manakh tr'okh* (The Almanac of Three), and in 1921, his collection *Prominnia pohroz* (The Rays of Menace). At that time he organized the Shock Brigade of Futurist Poets, later called the *Association of Panfuturists (Aspanfut), which published its credo and manifestos in the almanac *Semafor u maibutnie* (Sema-phores into the Future, 1922) and the newspaper *Katafal'k iskusstva* (1922). In response to critics Semenko altered his position to 'left-wing front-line' and changed Aspanfut to Komunkult (1924). From 1924 to 1927 he worked as editor in chief of the Odessa film studios of the All-Ukrainian Photo-Cinema Administration. In 1924 he published two collections of his works from 1910 to 1922, both titled *Kobzar*, and in 1925, the collection *V revoliutsiiu* (Into the Revolution). In 1925 he also produced the poetic film *Step* (The Steppe).

In 1927 *Zustrich na perekhresnii stantsii* (Meeting at a Crossroad Station), which contained the works of Semen-

ko, G. Shkurupii, and M. Bazhan, was published. Also in that year Semenko founded a new futurist association called *Nova Generatsiia. After severe criticism, Semenko abandoned futurism and became a poet of the Bolshevik revolution (with poetry such as *Malyi kobzar i novi virshi* [The Little Kobzar and New Poems, 1928] and *Evropa i my* [Europe and We, 1929]). At the beginning of the 1930s he confessed to his 'erroneous' earlier position and with a 'reformed' vision wrote *Suchasni virshi* (Contemporary Poems, 1931), *Zadians'koho shchodennyka* (From a Soviet Diary, 1932), *Kytai v ohni* (China on Fire, 1932), and *Mizhnarodni dila* (International Affairs, 1933). Nevertheless Semenko was arrested in 1937 and executed with other Ukrainian writers. In the mid-1960s he was rehabilitated.

Semenko's early futurist writing abounds with urban and F. Marinetti-inspired themes and subjects, and is characterized by experimentation with form and language which attempts to shock the reader. Despite his insistence on the discarding of classical and contemporary literary achievements, especially the legacies of T. Shevchenko, O. Oles, M. Vorony, and M. Filiansky, Semenko greatly influenced the development of Ukrainian modern poetry. A complete edition of his work was published in Kharkiv in three volumes (1929–31), and there has also been a posthumous edition titled *Poezii* (Poems, 1985).

B. Kravtsiv

Semenko, Yurii, b 30 April 1920 in Mykhailivka, now in Apostolove raion, Dnipropetrovske oblast. Journalist and political figure. He graduated from Dnipropetrovske University and the Zaporizhia Pedagogical Institute (1941). As a postwar refugee in Germany, he contributed to the newspaper *Ukrains'ki visti* (Neu-Ulm) and its monthly Russian-language supplement, *Osvobozhdenie*. The deputy leader and, since 1971, leader of the émigré *Union of Lands of United Ukraine (SZSU), in 1955–62 he edited its organ, *Ukrains'kyi selianyn*. He also compiled and edited collections of eyewitness accounts of the 1933 famine (1963), Soviet Ukrainian popular humor (1964), and articles on V. Dolenko and the SZSU (1975) and wrote a history of chess in Ukraine (1980) and a collection of memoirs, *Tychky* (Supports, 1991).

Semenov-Tian-Shansky, Petr [Semenov-Tjan-Šanskij], b 14 January 1827 in Urusovo, Riazan gubernia, Russia, d 11 March 1914 in St Petersburg. Russian geographer, statistician, and explorer. He graduated from St Petersburg University (1848) and studied abroad (1853–5). As director of the Central Statistical Committee at the Ministry of Internal Affairs (1864–80) and chairman of the Statistical Council (1875–97) he developed the methodology and mechanisms of data-gathering that made possible the first empire-wide census in 1897. He was one of the founders of regional geography and the inspiration behind the monumental *Rossia – polnoe geograficheskoe opisanie nashego otechestva* (Russia – A Full Geographical Description of Our Fatherland, 19 vols, 1899–1914), which

was edited by his son. Volumes 7 and 14 of that work (titled 'Little Russia' and 'New Russia') were devoted to Ukraine.

Semenov-Zuser, Semen, b 4 August 1887 in Pavlohrad, Katerynoslav gubernia, d 8 November 1951 in Kharkiv. Archeologist. A graduate of the St Petersburg Institute of Archeology, he taught at several institutions in Leningrad (1915–29) and was a curator of the USSR Academy of Sciences Museum of Anthropology and Ethnography (1929–33) before becoming professor of ancient history and archeology at Kharkiv University in 1937. From 1920 Semenov-Zuser took part in many archeological expeditions in the Black Sea area. His areas of specialization included the *Olbia settlement and the Scythian era. His doctoral dissertation, *Skifskaia problema v otechestvennoi nauke* (The Scythian Question in the Scholarship of Our Fatherland), was published as a monograph in 1948.

Sementovsky, Kostiantyn [Sementovs'kyj, Kostjantyn], b 1823 in Semenohirka, Zolotonosha county, Poltava gubernia, d 1902. Ethnographer; brother of M. and O. *Sementovsky. After graduating from the Nizhen Lyceum (1839) he worked in the civil service in Chernihiv, Poltava, Kharkiv, and Orel. He maintained friendly ties with I. Sreznevsky, A. Metlynsky, M. Kostomarov, and H. Kvitka-Osnovianenko and collected ethnographic materials and folklore. In 1843 he published several articles, on Ukrainian folk beliefs, feast days, and H. Kvitka-Osnovianenko, and in 1851, a collection of 'Little Russian' and Galician riddles.

Sementovsky, Mykola [Sementovs'kyj], b 2 March 1819 in Semenohirka (now a part of Chervonohirka, near Irkliiv), Zolotonosha county, Poltava gubernia, d 5 November 1879 in Semenohirka. Writer, historian, and ethnographer; brother of K. and O. *Sementovsky. He graduated from the Nizhen Lyceum in 1840. Among his works are the play *Nishchii* (The Pauper; pub in *Maiak*, 1843); the novels *Kochubei* (1845), *Baronessa Flagsberg* (1848), and *Potemkin* (1851); a biographical essay about I. Kotliarevsky (pub in *Severnaia pchela*, 1846); and the historical works *Starina malorossiiskaia, zaporozhskaia i donskaia* (Little Russian, Zaporozhian, and Don Antiquity, 1846), *Zaporozhskaia rukopis' ...* (Zaporozhian Manuscript ..., 1856), and *Kiev i ego sviatyni, drevnosti, dostopamiatnosti* (Kiev and Its Shrines, Antiquities, and Landmarks, 1864; 7th edn 1900).

Sementovsky, Oleksander [Sementovs'kyj], b 1820s in Semenohirky, Zolotonosha county, Poltava gubernia, d ? Forester, historian, ethnographer, and statistician; brother of M. and K. *Sementovsky. He graduated from the Nizhen Lyceum (1840), and from 1843 to 1867 he worked as a forester in Kiev and Vitsebsk gubernias. He founded a cabinet of natural resources at the Kiev Palace of State Properties and discovered lignite in Zvenyhorodka county. He wrote book-length articles in Russian on the histories of Kamianets-Podilskyi (1865), the Pochaiv Monastery (1870), and the Nizhen Lyceum (1881). He also compiled a statistical atlas.

Semianchuk, Illia [Semjančuk, Illja], b 26 March 1895 in Opryshivtsi, Stanyslaviv county, Galicia, d 28 April 1955

in Chicago. Co-operative leader. He served as an officer in the Austrian army and then in the Ukrainian Galician Army. In 1932, after studying at the Higher Trade School (1923–7) in Prague and working for an American firm, he returned to Stanyslaviv and became director of the Regional Union of Co-operatives. He also served on the board of directors of the Audit Union of Ukrainian Co-operatives, the audit committee of Tsentrobank, and the Industry and Trade Chamber in Lviv. Under the German occupation he managed the Ukrainian Co-operative Bank in Stanyslaviv and then directed Tsentrosoiuz in Lviv. After emigrating to the United States (1949) he helped found the Self-Reliance Association of American Ukrainians and the Self-Reliance Federal Credit Union in Chicago.

Semko, Mykhailo, b 1 October 1906 in Baliasne, Poltava county, d 9 September 1979 in Moscow. Mechanical engineer. He studied at the Kharkiv Polytechnical Institute and later worked there, from 1950 to 1978 as rector. He was a specialist in metal machining; he developed new methods of metal cutting utilizing superhard materials and contributed to the study of the plastic deformation of materials.

Semkovsky, Semen [Semkovskij] (né Bronshtein), b 15 March 1882 in Mahiliou, Belarus, d 18 March 1937 in Kharkiv. Philosopher and sociologist; full member of the VUAN from 1929; cousin of L. Trotsky. A graduate in law of St Petersburg University and a Menshevik, he spent 10 years in Vienna and then lectured at Kiev University (1918–20) and the Kharkiv Institute of People's Education (1920–36). In 1920 he renounced his Menshevik ties, and then advanced quickly in the academic world: he became head of the Philosophy-Sociology Division of the *Ukrainian Institute of Marxism-Leninism in Kharkiv (1922–31), chairman of the Department of European Cultural History at the Kharkiv Institute of People's Education (from 1922), chairman of the VUAN Sociology Commission (1927–36), member of the VUAN Presidium and chairman of its Association of Natural Science (1931–6), a member of the Council for the Study of the Productive Resources of the Ukrainian SSR (1934–6), and chairman of the VUAN Philosophical Commission (1934–6). He wrote many works in Russian, including books on L. Feuerbach (1922), the theory of relativity and materialism (1924), dialectical materialism and the principle of relativity (1926; Ukrainian trans, 1931), and physics and chemistry in the light of Marxism (1933). A member of the All-Ukrainian Central Executive Committee, he was arrested at the end of 1936, accused of forming a 'Trotskyist-Zinovevite terrorist organization' in Ukraine, and executed. He was posthumously rehabilitated in 1956. (See also *Philosophy.)

T. Zakydalsky

Sempolovsky, Lev [Sempolovs'kyj], b 4 April 1868 in Krerowo (now in Poznań voivodeship), Poland, d 10 October 1960 in Antonopil, Kalynivka raion, Vinnytsia oblast. Plant selection scientist. A graduate of Rostock University in Germany (1889), he worked as a chemist at selection stations in Italy and Germany (1890–7) and in 1898 became director of the sugar beet selection division at the Uladivka-Liubyntsi Selection Station (Vinnytsia county, Podilia gubernia). He developed numerous varieties of sugar beets.

Liudmyla Semykina: the stained-glass panel at Kiev University (created with Opanas Zalyvakha and Alla Horska) destroyed by the Soviet authorities in 1964

Semykina, Liudmyla, b 1924 in Odessa. Painter and designer. A graduate of the Kiev State Art Institute (1953), she painted views of Odessa, seascapes, landscapes, and still lifes. In 1963 Semykina joined the 'dissident' Club of Creative Youth in Kiev, and in 1964 she, O. *Zalyvakha, and A. *Horska created the stained-glass panel at Kiev University depicting T. Shevchenko that was destroyed by Party authorities. For her activities Semykina was expelled from the Union of Artists for one year. She was again expelled in 1968 for signing public petitions in defense of human rights and was not reinstated until 1988. In the meantime she designed original coats and outfits using Ukrainian folk-dress motifs. Her costume designs were used in the film *Zakhar Berkut*.

Senate (from Latin *senatus*, 'council of elders'). In ancient Rome and in many modern states the senate is the highest governing council. In some countries it is one of the legislative chambers of *parliament or a judicial college of the higher courts, sometimes even the supreme court (as with the *State Senate under Hetman P. Skoropadsky's regime). The ruling council in higher educational institutions is also called a senate.

In the Polish Commonwealth the Senate evolved from the royal council and in the first half of the 16th century became (along with the chamber of deputies) a part of the Parliament. After the Union of Lublin (1569) a single bicameral diet served both Poland and Lithuania. The Senate's 150 members included the Roman Catholic clergy (primate, archbishops, bishops) and secular officials (ministers, voivodes, castellans). Its sessions were held separately from those of the deputies, and its role was to approve the decisions of the lower house. Gradually that exercise became a mere formality. Neither Orthodox nor Uniate bishops were admitted to the Senate until 1791, when a new constitution guaranteed the Uniate metropolitan a Senate seat.

The Senate was introduced into Russia by Peter I in 1711 to replace the Boyar Duma, and its powers changed during the subsequent two centuries. Under Peter it served as the chief instrument of reform. For some time it

was the highest governing body with administrative, judicial, and auditing powers. Collegiums and agencies of local government, represented by governors, were subordinate to it. Under Catherine II the powers of the Senate were reduced, particularly when the gubernias were placed under the control of governors general who were responsible directly to the empress. With the introduction of the State Council in 1810, the Senate was largely transformed into the empire's highest judicial body. It was abolished by the Soviet government on 5 December 1917.

In the 1920s and 1930s the Senate served as an upper house of the parliaments of Poland, Czechoslovakia, and Rumania. The Polish Senate could pass or reject bills passed by the Sejm. If the Sejm passed the bill again, it became law. The senators were elected in general elections. The 1935 constitution expanded the powers of the Senate, some of whose members were now appointed by the president. The 1920 constitution of Czechoslovakia provided for a Senate similar to the Polish one. In the 1920s its members were elected by a general vote. In Rumania some of the senators were elected by communities and counties (indirect elections), and some were appointed by the king. Deputies of the Ukrainian minorities in those three countries sat in their senates, but their numbers were disproportionately small given the size of the Ukrainian populations there.

Ivan Senchenko

Senchenko, Ivan [Senčenko], b 12 February 1901 in Natalyne, Kostiantynohrad (now Krasnohrad) county, Kharkiv gubernia, d 9 November 1975 in Kiev. Writer. He graduated from the Kharkiv Institute of People's Education in 1928. He began to publish his work in 1921 and joined the literary organizations *Pluh, *Hart, and, later, *Vaplite (1925-8). His early collections *V ohniakh vyshnevyykh zaviriukh* (In the Fires of Crimson Storms) and *Opovidannia* (Stories, 1925) received positive reviews. But his subsequent prose, *Istoriia odnii kar'ieri ta inshi opovidannia* (The History of a Career and Other Stories, 1926), the novel *Parovyi mlyn* (The Steam Mill, 1926), and later prose met with criticism, and Senchenko was accused of idealizing the kulaks. His *Iz zapysok* (From Notes, 1927), also titled *Kholuievi zapysky* (A Lackey's Notes), was criticized most harshly of all, since the official critics interpreted it as a satire on the subordination of Ukrainian culture to the dictates of the Party. Senchenko continued to write many prose collections, such as *Dubovi hriady* (A Flower Bed of Oaks, 1927), *Chervonohrads'ki portrety* (Chervonohrad Portraits, 1930), *Komuna* (The Commune, 1932), *Povist' pro*

Klyma (A Tale about Klym, 1933), *Za gratamy* (Behind Bars, 1934), *Rudi vovky* (Red Wolves, 1936), *Chorna brama* (The Black Gate, 1936), *Noveli* (Novellas, 1940), *Metalisty* (The Metal Workers, 1932), *Naperedodni* (On the Eve, 1938), and *Ioho pokolinnia* (His Generation, 1947; rev edn 1965). He received a positive critical reaction only in the 1950s, with his poetry cycles on the life of the workers of Solomianka, a suburb of Kiev (1956–7), and of the Donbas (1964). The works about his native Chervonohrad (Krasnohrad) district, with which he began his literary career (especially *Chervonohrads'ki portrety*), were his best works, and he would periodically return to that subject, as in *Podorozh do Chervonohradu* (Journey to Chervonohrad, 1971) and *Savka* (1973). The autobiographical nature of those works is clearly evident. Senchenko's writing is characterized by its intimate knowledge of the life of the peasant and of folk customs, by the romanticization of the Ukrainian past, and by gentle humor. He is also the author of works for children, *Maryna* (1954), *Oi, u poli zhyto ...* (O, the Rye in the Field ..., 1957), and *Kharytonchuk-chyk* (1969). A heavily censored edition of his collected works, *Vybrani tvory* (Selected Works), was published in two volumes in 1971. Senchenko's previously banned novel *Liubov i Khreshchatyk* (Love and Khreshchatyk [Boulevard]), written in the mid-1960s, was published in 1988.

I. Koshelivets

Senchenko, Mykola [Senčenko], b 1 May 1945 in Nizhen, Chernihiv oblast. Applied mathematician, computer scientist, and librarian. A graduate of the Kharkiv Institute of Radioelectronics, he worked at the Kharkiv Engineering Institute of Public Construction; under his direction, its computing laboratory became a major computing center. As director (1985–92) of the *Central Scientific Library of the AN URSR (now ANU), he oversaw the completion of its new premises, spearheaded its computerization, and changed its status to that of a scholarly research institute. In 1989 he became chairman of the Bibliographic Commission of the International Association of Ukrainian Studies, which initiated work on a bibliography of Ukraine. In 1989 he also became a professor of information and computational science at the Kiev Institute of Culture. A Russian-language biobibliographic catalog of his works was published in Kiev in 1990.

Sendulsky, Apollon [Sendul's'kyj], b 17 October 1830 in Sadky, Kremianets county, Volhynia gubernia, d 7 January 1882. Priest, regional historian, and educational activist. Starting in 1868 with a study of his own village, he published a series of historical and ethnographic essays about various Volhynian locations in the eparchial bulletin *Volynskie eparkhial'nye vedomosti*. His memoirs were published posthumously in *Kievskaiia starina* (1896).

Seneta, Eugene, b 12 March 1941 in Saryi Sambir, Galicia. Mathematician; full member of the Shevchenko Scientific Society. A graduate of the University of Adelaide (1965) and the Australian National University in Canberra (PH D, 1968), he was appointed professor and head of the mathematics department at the University of Sydney in 1979. He has conducted research on probability and statistics as well as the demography of Ukrainian settlement in Australia. He was elected to the Australian Academy of Sciences in 1985.

Senhalevych, Fedir [Senhalevyč] (Synhalevych, Khvedir), b ca 1890, d October 1941 in Kiev. Physician, ethnographer, and civic leader. While working at the zemstvo hospital in Bohuslav (1917–18) he founded a museum and gymnasium there. Then he worked at the Lukianivka Prison in Kiev and devoted his spare time to ethnographic research. His studies on Kiev lirnyks (1927) and the spring songs, *hahilky* (1930), appeared in the periodicals of the VUAN Ethnographic Commission. He was executed by the Germans during the Second World War.

Senhalevych, Marharyta [Senhalevyč], b 1901 in Kamianets-Podilskyyi, d ? Writer, translator, journalist, and librarian. She worked as an editor for *Selianka Ukraïny* (from 1928) and *Visti VUTsVK* (1934–41). From 1943 she lived in Moscow. In 1925 she published a few stories in *Hart* and *Sil's'ko-hospodars'kyi proletar*, and later, the story collections *Veleten'* (The Giant, 1930), *Nepomitna* (The Inconspicuous [Woman], 1930), and *Odnoho zymovoho vechora* (One Winter Evening, 1931) and the collection of sketches *Biitsi i budivnyky* (Fighters and Builders, 1934). She wrote, in Russian, the children's novel *Svetit vдали ogonek* (The Fire Shines from Afar, 1960).

Senin, Ivan, b 26 December 1903 in Katerynoslav gubernia, d ? Soviet government official and Party functionary. After graduating from the Kiev Polytechnical Institute in 1930, he studied at Columbia University in New York. He worked briefly as director of the Ukrainian Cable Plant in Kiev and then held various positions in the government of the Ukrainian SSR: deputy commissar and commissar of light industry (1938–46), deputy chairman of the Council of People's Commissars (1943–6), and deputy chairman of the Council of Ministers (1946–53). In the CPU he rose to the position of member of the Politburo (1949–65). Before retiring in 1965, he was elected to the USSR Supreme Soviet (1950, 1954, 1958, 1962) and Ukraine's Supreme Soviet (1951, 1955, 1963). He attended the United Nations founding conference in San Francisco in 1945 as a member of the Ukrainian delegation.

Senior elementary school (*vydilova shkola*). The name given in Austrian-ruled Galicia to the three upper classes of the seven-grade elementary urban school established by the education law of 1863. The name applied also to the two upper grades of the five-year elementary schools for girls. Instruction in these schools was in Polish, and only two private girls' schools provided instruction in Ukrainian, the Basilian order of nuns' institute in Yavoriv (1897–1906) and the Shevchenko Elementary School for Girls in Lviv. Under Polish rule senior elementary schools were abolished in favor of a seven-grade public elementary school system, introduced in the 1932 education reform. (See *Elementary schools.)

Seniutovych, Ioanykii [Senjutovyč, Ioanykij], b ? in Sosnytsia, Chernihiv regiment, d 12 November 1729 in Kiev. Orthodox churchman. He became a hieromonk in 1682 and then archimandrite and vicar of the St Sophia Monastery in Kiev. He subsequently became hegumen of St Michael's Golden-Domed Monastery (1711) and then archimandrite (1715) of the Kievan Cave Monastery. He was active in organizing the rebuilding of the monastery after a devastating fire in 1718. Seniutovych was opposed to the extension of Russian control over Ukrainian church

affairs and did not abide by Peter I's decree of 1720 allowing the monastery press to print only religious books that had been censored by the Holy Synod. He was fined 1,000 rubles in 1724 for his transgression.

Seniutovych-Berezhny, Viacheslav [Senjutovyč-Berežnyj, V'jačeslav], b 15 June 1902 in Tokari, Lkhvytsia county, Poltava gubernia, d 3 February 1992 in Santa Barbara, California. Historian specializing in heraldry and genealogy; member of the Shevchenko Scientific Society from 1952. He served in A. Denikin's Volunteer Army (1919–20) and then emigrated and completed his studies at Belgrade University (1925) and the Ukrainian Free University in Munich (PH D, 1947). He moved to the United States in 1952. His publications include studies of the genealogy of P. Mohyla, I. Mazepa, N. Gogol, P. Orlyk, D. Apostol, and I. Vyhovskyy and a study of the sources for medieval Ukrainian heraldry (pub in *Litopys Volyni*, 1955, no. 2).

Seniv, Ivan, b 7 October 1905 in Rohatyn, Galicia. Art historian. A graduate of the USSR Institute of Painting, Sculpture, and Architecture (1953), he has written articles on Ukrainian art and furniture and a book about the artist O. Kulchytska (1961).

Senkiw, Christina [Sen'kiv, Xrystyna] (née Welyhorsky), b 20 October 1950 in Toronto. Ukrainian-Canadian painter and graphic artist. A graduate of the University of Toronto (BFA, 1973), she has worked as an illustrator and book designer. She has designed covers for the children's magazine *Veselka* and has illustrated *The History of Ukrainian Costume* (1986) and *Timmy Kitten* (1989). Her drawings for children and paintings have been displayed in 10 solo and several group exhibitions in Toronto, Chicago, Detroit, Cleveland, and Ottawa.

Senko, Yurii [Sen'ko, Jurij], b 27 April 1913 in Burimka, Borzna county, Chernihiv gubernia, d 20 November 1957 in Trenton, New Jersey. Ethnographer. After graduating from the Kharkiv Pedagogical Institute he taught secondary school in the Poltava region and gathered materials on local ethnography, folklore, and archeology. He collaborated with the Ethnographic Commission of the VUAN. In 1943 he emigrated to Germany, and in 1950 to the United States, where he published articles on folk sayings about the liberation struggle of 1917–21 (1953) and on the destruction of the Ukrainian church under the Soviet regime (1953).

Senkovych, Fedir [Sen'kovyč], b ? in Shchyrets, Galicia, d 1631 in Lviv. Icon and portrait painter. He owned a studio in Lviv and eventually became head of the Lviv painters' guild. He painted the first iconostasis and holy shroud in the Dormition Church in Lviv (1630). The icon of the Theotokos with the prophets from Ripne (1599) and the portrait of I. Danylovyč have been attributed to him. After his death his studio was inherited by his student M. Petrakhnovych.

Senkus, Murray [Sen'kus', Myroslav], b 31 August 1914 in Redberry, Saskatchewan. Organic chemist; full member of the Shevchenko Scientific Society since 1948. A graduate of the universities of Saskatchewan (M SC, 1936) and

Chicago (PH D, 1938), he was the R.J. Reynolds Tobacco Co director of chemical research (1951–60), assistant director (1960–4), and director of scientific affairs (1976–9). Since 1979 he has been a consultant in the United States and Indonesia. His research centered around organic chemistry and the chemistry of tobacco, insecticides, the recovery of fermentation products, chemotherapeutic agents, and the chemistry of flavors. He is the holder of over 60 patents.

Sentimentalism. A literary current in the literature of the late 18th century that emerged as a reaction against the rationalism of the Enlightenment and the traditions of *classicism. Its adherents stressed the importance of emotion, extolled nature, and made heroes of the common people. Early sentimentalism was influenced by the works of English writers, such as T. Gray, S. Richardson, and J. Thompson. It resulted in the development of new genres in prose and focused renewed attention on elegies, idylls, and folktales in poetry.

In Ukrainian literature sentimentalism is evident in the plays of I. Kotliarevsky (eg, *Natalka Poltavka*), in the tales of Ye. Hrebinka, and, particularly, in the stories of H. Kvitka-Osnovianenko, which were sentimental in both subject matter and motifs. O. Doroshkevych, A. Shamrai, and M. Zerov have attributed the sentimentalism of Kvitka-Osnovianenko's works (eg, *Marusia*, *Shchyra liubov* [Sincere Love], and *Serdeshna Oksana* [Poor Oksana]) to the influence of scholastic and folk poetry. D. Chyzhevsky, however, has argued that sentimentalism was not prominent in Ukrainian literature.

The influence and elements of sentimentalism are evident in the development of melodrama in Ukrainian theater of the 19th and early 20th centuries, in the works of I. Hushalevych (eg, *Pidhiriany* [Inhabitants of the Foothills, 1869]), S. Vorobkevych (eg, *Hnat Prybluda* [1875] and *Uboha Marta* [Poor Marta, 1878]), L. Manko (*Neshchasia kokhannia* [Unfortunate Love]), and O. Sukhodolsky (*Pomsta, abo Zahublena dolia* [Revenge, or the Lost Fate]). Melodrama also characterized certain plays and stagings of M. Starytsky's and M. Kropyvnytsky's productions.

B. Kravtsiv

Iryna Senyk

Omelian Senyk

Senyk, Iryna, b 8 June 1926 in Lviv. Nurse, poet, and dissident. She was arrested in December 1946 for belonging to the OUN, and served 10 years of hard labor and 13 years

of exile. After settling in Ivano-Frankivske in 1969, she worked as a nurse and became acquainted with activists of the Ukrainian cultural revival. During the 1972 repressions of Ukrainian activists she was arrested again and sentenced in February 1973 to six years of strict-regime labor camp and five years of exile. At the women's labor camp in Barashevo, Mordovia, she participated in protests staged by Ukrainian inmates. After completing her exile in Kazakhstan she returned to Ukraine. Senyk's verses were published in the anthology *Invincible Spirit: Art and Poetry of Ukrainian Women Political Prisoners in the USSR* (1977) and in the collection *Suvii polotna* (Scroll of Linen, 1990).

Senyk, Oleksa (pseud: Zaporizky, Pavlo Baida), b 25 August 1915 in Myroliubivka, Oleksandrivske county, Katerynoslav gubernia, d 20 May 1968 in Buffalo. Writer. He graduated from the Zaporizhia Pedagogical Institute in 1934. From 1936 to 1939 he was imprisoned in a Siberian labor camp. As a postwar refugee he lived in Germany (1944–9), Brazil (1949–61), and the United States (1961–8). He is the author of the fable collection *Novi baiky* (New Fables, 1953) and the plays *Maty pomyryla* (The Mother Made Peace between Them, 1946), *Shvaitars'kyi pashport* (A Swiss Passport, 1946), and *Granit* (Granite, 1947).

Senyk, Omelian (pseud: Hrybivsky, Kantsler, Urban), b 21 January 1891 in Yavoriv, Galicia, d 30 August 1941 in Zhytomyr, Volhynia. Political activist. During the First World War he served as a captain in the Austrian army and then in the Ukrainian Galician Army. After escaping from a Polish internment camp he returned to Lviv and helped found the Ukrainian Military Organization. He was a member of its home, and then of its supreme, command. After leaving Ukraine in 1927, he helped edit *Surma*, and in 1929 he became a member of the OUN Leadership. He visited the United States, Canada, and South America to promote the Ukrainian nationalist movement. After Ye. Konovalets's death he organized the Second Great Congress, which elected A. Melnyk as chief of the OUN. He opposed the split in the OUN in 1940. He was assassinated together with M. *Stsiborsky, allegedly by an OUN Bandera faction supporter, while leading the expeditionary groups of the Melnyk OUN faction.

Senyshyn, Ambrose [Senyšyn, Amvrozij], b 23 February 1903 in Staryi Sambir, Sambir county, Galicia, d 11 September 1976 in Philadelphia. Ukrainian Catholic metropolitan. A Basilian novice and monk from 1922 at the Krekhiv, Lavriv, Dobromyl, and Krystynopil monasteries, he was ordained in 1931 and served as a pastor in Warsaw (1931–3), hegumen of the Basilian monastery in Chicago (1933–42), and pastor at St Nicholas's Church in Chicago (1937–42). In 1942 he became auxiliary bishop of the Ukrainian Catholic exarchy in the United States. While residing in Stamford, Connecticut (at St Basil's College), he founded the Missionary Sisters of the Mother of God (1944) and the Ukrainian Catholic Committee for Refugees (1946). He also published liturgical books, edited the monthly *Kovcheh/The Ark* (1946–56), and initiated a series of recordings to standardize Ukrainian liturgical chant. Senyshyn served as apostolic exarch of Stamford (1956–8), the first bishop of Stamford eparchy (1958–61), and metropolitan of the Ukrainian Catholic church in the United

Metropolitan Ambrose
Senyshyn

Pavlo Senytsia

States and archbishop of Philadelphia archeparchy (1961–76). As metropolitan he introduced the mandatory use of the Gregorian calendar in his archeparchy. He built 25 new churches and a new cathedral (in Philadelphia) and founded eight new parishes and missions and, in 1965, the Ukrainian Studies Center and Byzantine Slavic Arts Foundation at St Josaphat's Seminary in Washington, DC. In 1973 he was appointed to the Congregation for Eastern Churches.

Senyshyn, Lev [Senyšyn], b 1908 in Galicia, d 10 December 1957 in Toronto. Journalist and caricaturist. In Lviv he illustrated the humor magazines *Zhorna* (1933–4) and *Komar* (1934–9) and worked as an editor for the *Ukrainska Presa* publishing house. As a postwar émigré he illustrated the satirical weekly *Proty shersty* (1946–7) in Landeck, Austria. After emigrating to Canada he edited the weekly *Sport* (1955–6) in Toronto and contributed articles and illustrations to the weekly *Homin Ukraïny*.

Senytsia, Pavlo [Senycja], b 23 September 1879 in Maksymivka, Pereiaslav county, Poltava gubernia, d 3 July 1960 in Moscow. Musicologist, composer, and teacher. He studied at the Moscow Conservatory (1909) and taught in several music schools in Moscow (1905–15). He later (1921–31) worked as a research associate for the Ukrainian SSR Commissariat of Education and served as secretary of the ethnographic division of the State Institute of Music Education (1923–39). His major musicological studies include *Suchasna ukraïns'ka muzyka* (Contemporary Ukrainian Music, 1923) and *Ukraïns'ka vokal'na muzyka* (Ukrainian Vocal Music, 1925). His musical works include the operas *Life Is a Dream* (based on Calderon-Balmont) and *The Servant Girl* (based on T. Shevchenko, 1913–16); two symphonies (1905, 1912); an overture (1908); seven string quartets; approx 50 works for chorus to texts by T. Shevchenko, M. Bazhan, and others; and approx 100 solo songs to texts by T. Shevchenko, P. Tychna, M. Rylsky, and others.

Separate Cavalry Division of the Army of the UNR (Okrema kinna diviziia Armii UNR). Organized in May

1920 by consolidating various smaller units, it consisted of two cavalry brigades of two regiments each. The division was commanded by brigadier general I. Omelianovych-Pavlenko and had 3,000 cavalrymen. It was active until 21 November 1920, when, defending the army's rear, it crossed the Zbruch River and surrendered to the Poles.

Separate Detachment of Sich Riflemen. See Sich Riflemen.

Separate Zaporozhian Detachment. See Zaporozhian Corps.

Separation of church and state. See Church-state separation.

Sequoia (Ukrainian: *sekvoia*). A coniferous evergreen tree of the family Taxodiaceae, the tallest and probably the oldest tree known to exist, exceeding heights of 90 m and dating back some 4,000 years. The two species of sequoia are the redwood (*Sequoia sempervirens*) and the big tree, giant sequoia, or Sierra redwood (*Sequoiadendron giganteum*). In Ukraine the sequoia was introduced in the mid-19th century in the southern Crimea, in Transcaucasia, and on the Caucasian shores of the Black Sea. Ukrainian sequoias reach heights of 91 m. In the distant past sequoias were native to Ukraine. Fossils of the trees dating from the Paleogenic and Neogenic periods have been found in Dnipropetrovske, Kiev, Zhytomyr, Kirovohrad, Chernihiv, and Transcarpathia oblasts.

Seraphim [Serafym] (secular name: Stefan Ustvolsky), b and d ? Ukrainian-Canadian church figure. A Russian monk from Mount Athos and a self-proclaimed bishop, Seraphim came to Canada (after arriving in the United States in 1902) in 1903 at the request of a group of early Ukrainian-Canadian community leaders (including K. Genyk, I. Negrych, and I. Bodrug) to head the Winnipeg-based synodal 'All-Russian Patriarchal Orthodox church.' This church was intended as an independent 'democratic' Ukrainian church free of Catholic or Orthodox control. Commonly called the Seraphimite church, it quickly gained a substantial following among the immigrant Ukrainian population, which had been coping until then with sporadic religious care. Seraphim's indiscretions, however, soon raised doubts about his credibility, and the church synod persuaded him to go to Russia to seek approbation from the Holy Synod. After Seraphim's departure in January 1904 the synod assumed full control of the church, removed the bishop from his post, and reconstituted the church as the *Independent Greek church. The establishment of the Seraphimite and the Independent Greek churches caused great concern in the Ukrainian and Roman Catholic churches, which thereafter resolved to make special efforts to maintain the immigrants' traditional religious affiliations. The short-lived Seraphimite church also gave rise to the first Ukrainian-Canadian newspaper, **Kanadiis'kyi farmer* (est 1903), which had strong links to the church and its backers.

A. Makuch

Serapion of Vladimir, b ?, d 1275. Bishop and renowned preacher. An archimandrite of the Kievan Cave Monastery (from ca 1238), he was made bishop of

Vladimir in northern Rus' in 1274. Five of his sermons have survived, as well as two works that might have been written by him. In these sermons Serapion argues that certain natural disasters as well as the Tatar invasions were punishments for sins committed by the people of Rus'. His writings also refer to folk beliefs of his time regarding matters such as the existence of werewolves and witches. His biography, by E. Petukhov, and a collection of his writings appeared in 1888.

Serbia. A constituent republic (1990 pop 9,800,000) of *Yugoslavia which covers an area of 88,400 sq km and incorporates the autonomous territories of Vojvodina and Kosovo. Its population is predominantly Serbian (nearly 80 percent), with substantial Albanian, Hungarian, Rumanian, Slovak, and Ukrainian (nearly 40,000) minorities.

Up to the 16th century. Serbian-Ukrainian relations began during the Kievan Rus' period. Ukrainian writers, such as Yelysei of Kamianets-Podilskyi (15th century), Andrii of Sianik and V. Nykolsky of Transcarpathia (16th century), and S. Bakachych (17th century), influenced the development of Serbian literature through their translations of Greek and Church Slavonic texts into Serbian as well as through original works they wrote in Serbian. M. Hrushevsky speculated that Ukrainian dumas were probably influenced by Serbian heroic poetry.

17th–18th centuries. An increase in Serbo-Ukrainian contacts resulted from Serbian participation in Ukrainian Cossack armies beginning in the period preceding the Khmelnytsky revolution. In the Cossack register of 1649 there are several dozen Serbian names. Serbs acted as military leaders or were hired as mercenaries by Cossack commanders (notably under I. Vyhovsky). The *Serbyn family was a line of Cossack officers, three of whom were colonels: Ivan Yuriiovych, Ivan Fedorovych, and Voitsa. R. Dmytrashko-Raich was a colonel of the Pereiaslav regiment.

Throughout the 17th and 18th centuries Ukrainian publications were disseminated in Serbia and other southern Slavic countries, particularly those of the Kievan Cave Monastery, the sermons of Z. Kopystensky, and the works of L. Baranovych and T. Stefanovych (those of the latter in Serbian translation). Y. Raich and A. Stojković were among the many Serbs who studied at the Kievan Mohyla Academy in the 18th century. The academy's lecturers and sermonizers also traveled to Serbia, among them S. Zalutsky, who delivered sermons at the cathedral of the Belgrade metropol. In 1733 the Serbian metropolitan, V. Joanovič, asked the Kievan metropolitan, R. Zaborovsky, to send M. Kozachynsky, T. Klymovsky, T. Levandovsky, I. Mynatsky, T. Padunovsky, and H. Shumliak to Serbia. They subsequently served as instructors of Old Church Slavonic, poetics, and rhetoric in schools in Karlovač, Vukovar, Belgrade, and Osijek. V. Kryzhanivsky, I. Lastovetsky, and P. Mykhailovsky were other graduates of the academy to teach in Serbia.

In the reign of Peter I (particularly during the Russo-Turkish War) many Serbian families, notably the Božić, Milutinović, Miloradović, and Trebinsky families, aligned themselves with the Russians. Once they became members of the Cossack *starshyna* and received estates in Ukraine, they remained there and sent their children to the Kievan Mohyla Academy. Some of their descendants became leaders in Ukrainian political and cultural life.

The number of Serbs in Southern Ukraine grew substantially in the mid-18th century as they emigrated in large numbers from the Austrian-controlled northern regions of their country. Together with Wallachian and other emigrants, they became the nucleus for new administrative and territorial units established by the Russian government, including *New Serbia (1752) and *Sloviano-Serbia (1753), both of which were incorporated into New Russia gubernia in 1764. Many of these new settlers fled to the Zaporozhian Sich. Serbs took part in the *Haidamaka uprisings and the *Koliivshchyna rebellion, but also joined the ranks of Russian armies sent to suppress them. Serbs who settled in Southern Ukraine largely became assimilated with Ukrainians.

In Serbia, Ukrainian settlements were established in the *Bačka and *Srem regions in the mid-18th century.

19th–20th centuries. V. *Karadžić, a Serbian writer, folklorist, and linguist who visited Ukraine in 1819, had a marked effect on the Ukrainian revival and the development of Ukrainian literature, and a particular influence on the members of the *Ruthenian Triad. The first Ukrainian phonetic orthography was developed on the basis of his Serbian orthography. Ya. Holovatsky, M. Kostomarov, and other Ukrainian activists maintained personal relations with their Serbian contemporaries.

In the late 19th century, committees that provided monetary, military, and voluntary assistance to the Serbian (and the general Balkan) movement for liberation from Turkey were formed in many Ukrainian cities. In Kiev such a committee was headed by M. Drahomanov, and in Odessa, by A. *Zheliabov. The poet I. *Manzhura, the actor and director M. *Sadovsky, V. Yanovsky, and other activists participated in Serbian battles against the Turks. In 1876 M. *Starytsky published *Serbs'ki narodni dumy i pisni* (Serbian Folk Dumas and Songs) in Kiev and devoted all proceeds to the Serbian Red Cross. The works of Yu. Fedkovych, I. Franko, O. Pchilka, Lesia Ukrainka, and S. Vorobkevych were influenced by events taking place in Serbia. In the late 19th and early 20th century, Serbian songs and literature were translated into Ukrainian by O. Barvinsky, M. Buchynsky, I. Franko, and O. Navrotsky. Interest in the works of M. Vovchok, T. Shevchenko, and other Ukrainian writers was also growing in Serbia. O. Barvinsky, M. Drahomanov, M. Lysenko, and other Ukrainian community activists were familiar with Serbian writers. Š. Bosković, I. Erdeljanović, B. Milojević, and other Serbian scholars were accepted as full members of the Shevchenko Scientific Society.

After the Second World War M. Rylsky published Ukrainian translations of Serbian poetry in collections, including *Serbs'ki epichni pisni* (Serbian Epic Songs, 1946) and *Serbs'ka narodnia poezia* (Serbian Folk Poetry, 1955, with L. Pervomaisky). Serbian authors whose works appeared in Ukrainian translation include I. Andrič, B. Copic, and B. Nušić. *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) and the works of I. Franko, O. Honchar, L. Kostenko, M. Kotsiubynsky, M. Stelmakh, Yu. Yanovsky, and others appeared in Serbian translation. In 1969 the first Serbian edition of T. Shevchenko's *Kobzar* was published. In 1972 M. Kočiš published a Serbian-Croatian-Ruthenian-Ukrainian dictionary in Novi Sad.

A tendency toward Russophilism became firmly entrenched among Serbs and eventually led to an anti-Ukrainian orientation in their politics. In 1917–20 Serbia

did not recognize Ukrainian independence and hindered the work of the Ukrainian Red Cross among refugees in Serbia. During the interwar period the Serbian government assistance favored Russian émigrés instead of Ukrainians. After the Second World War Ukrainian organizations were permitted to function, albeit under state supervision; the churches, however, were subject to persecution. Serbo-Ukrainian relations now occur in the context of official relations between Serbia and Ukraine. (See also *Yugoslavia.)

Oleksander Serbychenko

Serbychenko, Oleksander [Serbyčenko], b 29 November 1890 in Liubotyn, Valky county, Kharkiv gubernia, d 14 January 1938. Soviet Ukrainian leader. A Bolshevik revolutionary in Kremenchuk and Kharkiv during the First World War, after the February Revolution he was a member of the Kharkiv Council of Workers' and Soldiers' Deputies and the city's Bolshevik Committee. Under Soviet rule he headed the Kremenčuk and, from 1922, the Poltava gubernia executive committees and served as deputy chairman of the Ukrainian SSR Council of People's Commissars. Then he was a member of the All-Ukrainian Central Executive Committee, the Soviet trade representative in Austria, and a member of the CC CP(B)U (1925–33) and a candidate member of its Politburo (1930–3). He was arrested during the Yezhov terror and was most likely executed.

Serbyn. The surname of a number of officials of the Cossack Hetman state during the 17th century. It denoted their Serbian ethnic or national origins; the persons so named were probably not related. Ivan Serbyn was colonel of Lubni regiment (1668–76, with interruptions) and the father-in-law of the Kish otaman I. Sirko. Ivan Serbyn

(d 11 June 1665), a Serbian nobleman from Novyi Bazar and a relative of the Serbian metropolitan Gavriilo, was colonel of Bratslav regiment (1657–8, 1663–5). He had arrived in Ukraine as a Serbian captain in 1653, and joined the Cossack armies in their struggle against Poland. A supporter of Hetman I. Vyhovsky, he assisted in the suppression of the rebellion led by M. Pushkar and participated in D. Vyhovsky's attack on Kiev (1658). He was captured and exiled to Muscovy, whence he returned in 1660. In 1664–5 he fought against Hetman P. Teteria and the Poles, and he died in battle near Uman. Voitsa (also Vuitsa, Vuk, or Vuich) Serbyn was colonel of Pereiaslav regiment (1687) and a bitter enemy of Hetman I. Samoilovych. He became general osaul in 1687, after the Kolomak mutiny. He was among the *starshyna* who opposed Hetman I. Mazepa. Mazepa denounced him to the Muscovite tsar, and in 1688 he was discharged and exiled to Sevsk.

Serbyn, Roman, b 21 March 1939 in Vyktoriv, Stany-slaviv county, Galicia. Historian and pedagogue. He studied economics, political science, and history at McGill University (PH D, 1975) and l'Université de Montréal. Since 1969 he has taught Eastern European history at l'Université du Québec à Montréal. In 1967–8 he was president of the Ukrainian Canadian Students' Union and founder and the first editor of its newspaper *Student*. He has researched and written on the 1921 famine in Ukraine, the nationality question in the Soviet Union, Ukrainian-Jewish relations, and student movements and intellectual trends in 19th-century Ukraine. He coedited *Fédéralisme et nations* (1971), *Famine in Ukraine, 1932–1933* (1986), and *Serhii Podolyns'kyi: Vybrani tvory* (Serhii Podolynsky: Selected Works, 1990).

Serbyn, Yakiv, b and d ? Printmaker of the latter half of the 18th century in Kiev. He owned his own printing shop, where he printed and sold, without the censor's approval, his own engraved texts and icons, such as *The Okhtyrka Theotokos*, *St Nicholas the Miracle Worker*, and *St Barbara*.

Serbyniuk, Yurii [Serbynjuk, Juriij], b 1887 in Sadhora, Bukovyna (now part of Chernivtsi), d ? in Rumania. Political and community activist and journalist. He worked for the UNR government-in-exile in Vienna (1920–1) and served as general secretary of the Ukrainian National party in Rumania (1927–38) and as a member of the Rumanian parliament (1932–3). He edited a number of newspapers in Chernivtsi, including *Hromadianyn* (1909), *Narodnyi holos* (1911–15), *Nova Bukovyna* (1914 and 1918), *Chas* (1929–32), *Narodnia syla* (1932–4), and *Rada* (1934–8). He contributed to the entry on Bukovyna in *Ukrains'ka zahal'na entsyklopediia* (Ukrainian General Encyclopedia, vol 3, 1935). He emigrated from Chernivtsi to Rumania in 1940. He was imprisoned in the Soviet Union in 1945–54, and then returned to Rumania.

Serczyk, Władysław, b 23 July 1935. Polish historian. A professor of history at Cracow University and then at the Białystok branch of Warsaw University, he is the author of numerous essays and several books on Ukrainian history, including *Koliszczynna* (Koliivshchyna, 1968), *Hajdamacy* (Haidamakas, 1978), *Historia Ukrainy* (History of Ukraine,

1979), *Poltava 1709* (Poltava 1709, 1982), and *Na dalekiej Ukrainie: Dzieje Kozaczyny do 1648 r.* (In Faraway Ukraine: History of the Cossacks before 1648, 1984). His work, though sometimes following standard Soviet lines of interpretation, is significant for its attempts to understand objectively Ukrainian-Polish historical relations and its treatment of Ukraine as a distinct political entity whose interests did not necessarily coincide with those of Poland or Russia.

Serdiuk, Oleksa [Serdjuk], b 1884 in the Kuban region, d 1927 in Kiev. Orthodox priest and church activist. After graduating from St Petersburg University he continued his studies abroad. In 1921 he became a priest of the Ukrainian Autocephalous Orthodox church (UAOC) and an organizer of UAOC parishes in the Kuban region. His activities led to his arrest by the GPU. Following a lengthy incarceration and the murder of almost his entire family, he went insane and died in prison.

Oleksander Serdiuk

Antin Sereda

Serdiuk, Oleksander [Serdjuk] (Les), b 27 June 1900 in Bziv, Pereiaslav county, Poltava gubernia, d 14 December 1988 in Kiev. Actor, director, and educator. After completing studies at the Lysenko Music and Drama Institute (1919) he was a leading actor in the Shevchenko First Theater of the Ukrainian Soviet Republic in Kiev (1919–22) and in Berezil (from 1922), later (1935) the Kharkiv Ukrainian Drama Theater, of which he was also artistic director in 1957–62. His repertoire consisted of approx 200 heroic and character roles. In Berezil he played Tom Kittling in *Sekretar profspilky* (The Walking Delegate, based on L. Scott's novel, 1924), Fiesco in F. Schiller's *Die Verschwörung des Fiesco zu Genua* (1928), Mokii in M. Kulish's *Myna Mazailo* (1929), and the title role in W. Shakespeare's *Othello* (1952). He acted the title roles in the films *Prometheus* (1936) and *Nazar Stodolia* (1937). As a director he staged *Oi pidu ia v Boryslavku* (Oh, I'll Go to Boryslavka, based on I. Franko, 1956) and M. Zarudny's *Antei* (Antaeuses, 1961). He taught at the Kharkiv Theater Institute from 1945. A biography, by O. Popova, was published in Kiev in 1979.

Serdiuk, Vasyl [Serdjuk, Vasyl'], b 13 March 1900 in Chernihiv. Actor and scenery designer. He was an officer in the Army of the UNR. He acted in Ukrainian troupes in

West Volhynia (1923–32) and then acted and designed scenery in Lviv in the Zahrava Theater (1933–8), the Kotliarevsky Theater (1938–9), the Lesia Ukrainka Theater (1939–41), and Teatr u Piatnytsiu in Philadelphia (from 1963).

Serdiuk, Yurii [Serdjuk, Jurij], b 15 April 1938 in Lozova, Kharkiv oblast. He graduated from the Gorky Institute of Literature in Moscow (1965), has worked for the Molod publishing house and the Kiev Studio of Documentary-Chronicle Films, and has been a member of the editorial board of *Vitshyzna* and deputy director of the Bureau for the Promotion of Creative Literature of the Writers' Union of Ukraine. He has written the poetry collections *Surmy sertsia* (Trumpets of the Heart, 1965), *Porohy viku* (Thresholds of an Era, 1967), *Svitlytsia* (The Living Room, 1970), *Vse, shcho zi mnoiu* (All That Is with Me, 1972), *Z lirychnoi strichky* (From a Lyrical Stanza, 1976), *Okean* (The Ocean, 1979), and *Vidkrytyi okean* (The Open Ocean, 1983) and the children's storybook *Mors'kyi lev Botsmaniatko* (The Sea Lion Botsmaniatko, 1985).

Serdiuk guard divisions (*Serdiutski dyvizii*). Volunteer elite military units in the Ukrainian armed forces of 1917–18. In November 1917 two serdiuk guard divisions were formed in Kiev, one under the command of Col Yu. Kapkan and the other under Gen O. Hrekov. Together they numbered 12,000 men. Four of their regiments defended Kiev against the Bolsheviks in January 1918; the other regiments remained neutral. Toward the end of the month the two divisions were demobilized by the Central Rada, and some of their soldiers volunteered to the Separate Zaporozhian Detachment.

In July 1918 Hetman P. Skoropadsky formed a new serdiuk division, consisting mostly of volunteers from the wealthier peasantry in Left-Bank Ukraine. By October the division had 5,000 soldiers and was commanded by Col Klymenko. In the uprising against the hetman most of the division changed sides. Some of its men later joined the Siege Corps of Sich Riflemen.

Serdiuk regiments (*serdiutski polky*). Units of mercenary infantry organized by the Hetmanate in the late 17th and early 18th century for military and police duty. They were paid and outfitted by the Hetmanate. The first regiments were organized by P. Doroshenko in Right-Bank Ukraine, and they soon spread to Left-Bank Ukraine as well. Their volunteer soldiers were mainly Ukrainian peasants, Moldavians, and defecting registered Cossacks. There were three or four Serdiuk regiments, each consisting of approx 400 to 500 soldiers. They were used in frontier military campaigns, as guards for the hetman's residence, and as guards at weapons depots. They were responsible directly and only to the hetman. Serdiuk regiments were abolished by a tsarist ukase issued on 14 July 1726.

Serdiukov, Ivan [Serdjukov], b 12 November 1803 in Smilo, Romen county, Poltava gubernia, d 1886 in Mstislau county, Belarus. Landowner and writer. After studying medicine at Kharkiv University (1822–4) he served in the chancery of N. Repnin, the governor-general of Left-Bank Ukraine, and in other government offices in Poltava. Upon retiring in 1841, he wrote articles on farming, novels, and comedies in both Ukrainian and Russian. He also

compiled a Ukrainian dictionary, which remains unpublished. His autobiographical notes, published posthumously in *Kievskaiia starina* (1896, nos 11–12), are a valuable source for the social history of the Poltava region.

Serdiukova, Liudmyla [Serdjukova, Ljudmyla], b 6 May 1899 in Nemovychi, Rivne county, Volhynia gubernia, d 13 July 1984 in Trenton, New Jersey. Stage and film actress; wife of V. Serdiuk. She worked in Ukrainian troupes in western Volhynia (1923–32) and in the Zahrava, Kotliarevsky, Lesia Ukrainka, and Lviv Opera theaters (1933–44) and appeared in the film *Viter zi skhodu* (Wind from the East, 1941). In the United States she led an amateur group in Trenton.

Sereda, Antin, b 11 February 1890 in Shkarivka, Vasylkiv county, Kiev gubernia, d 11 August 1961 in Korsun-Shevchenkivskiyi, Cherkasy oblast. Graphic artist, educator, and art scholar. A graduate of the Stroganov School of Applied Art in Moscow (1914), he organized many artistic handicraft workshops in Galicia and Bukovyna (1916–17) and taught at the Kiev Architectural Institute (1920–4), the Kiev State Art Institute (1924–9, 1934–41, 1944–50), and the Ukrainian Printing Institute in Kharkiv (1929–34). Sereda adapted H. *Narbut's ornamentation and lettering but used a simpler line and stronger contrast of white and black in his work. His most successful cover designs were for the journal *Siaivo* (1913), an edition of T. Shevchenko's poetry (1927), and editions of M. Kotsiubynsky's *Fata morgana* (1939), Shevchenko's *Kobzar* (1937), I. Franko's works (25 vols, 1941), and *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1952). He also designed a Ukrainian postage stamp (1918), commercial logos, and ornamental kilims. A retrospective show of his graphics and paintings was held in Kiev in 1969. Sereda also wrote articles on folk art and folk dress and a booklet on Narbut as a book artist (1927).

Sereda, Mykola, b 16 May 1890 in Stari Sanzhary (now Reshetnyky), Poltava county, d 16 February 1948 in Leningrad. Opera singer (lyric tenor). A graduate of the Moscow Conservatory, he was a soloist of the Kharkiv Opera (1926–33), the Sverdlovsk Opera (1933–5), and the Leningrad Opera (1935–48). His main roles included the title role in R. Wagner's *Lohengrin*, Alfred in G. Puccini's *La Traviata*, Lensky in P. Tchaikovsky's *Eugene Onegin*, Levko in N. Rimsky-Korsakov's *May Night*, and Andrii in M. Lysenko's *Taras Bulba*.

Sereda, Vasyl, b 1906 in Pohreby, Pryluka county, Poltava gubernia. Mechanical engineer. He studied and worked at the Kharkiv Institute of Railway-Transport Engineers, where he became assistant director and chaired a department from 1941. His technical contributions were in the fields of railroad machinery, the loading of granular substances, and advanced precision mechanisms. He developed vibrating feeders for loading and unloading grain and published numerous technical papers.

Sereda, Yaroslav, b 28 November 1900 in Radekhiv, Galicia, d 25 March 1981 in Lviv. Petroleum chemist; corresponding member of the AN URSS (now ANU) from 1951. He graduated from the Lviv Polytechnical Institute (1929) and taught there. He worked in Drohobych, Groznyi, Ufa,

Yaroslav Sereda

Serhii Serensen

and Lviv (1935–53) and became head of the petrochemical laboratory at the ANU Institute of the Geology and Geochemistry of Fossil Fuels (1956–63) and director of the surface-active agents laboratory at the Lviv branch of the All-Union Scientific Research and Design Applications Institute for the Petroleum-Processing and Petrochemistry Industry. His research dealt with the chemistry of petroleum processing, especially in mixtures containing sulfonic and naphthenic acids, and mineral oils. He introduced new methods of analysis for sulfur-containing crudes.

Seredenko, Mykhailo, b 21 November 1906 in Kharkiv, d 1983 in Kiev. Economist. After graduating from the Red Professors' Institute he worked in the Party apparat (1935–40) and then in the AN URSR (now ANU) Institute of Economics, where in 1947 he became head of the Department of Industrial Economics. Then he worked at the Scientific Research Institute of Economics of the State Planning Committee of the Ukrainian SSR (1964–82). Seredenko wrote over 100 works, including *Chorna metallurhiia Ukrainy, 1917–1957* (Ferrous Metallurgy of Ukraine, 1917–1957, 1957) and *Voprosy ekonomiki legkoi promyshlennosti Ukrainiskoi SSR* (Questions in the Economy of Light Industry of the Ukrainian SSR, 1956, coauthor L. Gorelik), and edited *Promyslovist' Radians'koï Ukrainy za sorok rokiv* (The Industry of the Ukrainian SSR over Forty Years, 1957).

Serednii Stih culture. A Copper Age culture of the mid-4th to mid-3rd millennium BC that existed mainly along the Dnieper River and in the upper Donets River and northern Azov Sea coastal regions. It was first studied in the early 20th century and named after a site on the outskirts of Zaporizhia. Closely related to the Corded-Ware Pottery cultures of western Europe, the people of this culture made pottery with characteristic rope imprint decorations. They are also notable for being among the first people in Europe to ride on horses. Burials were in flat graves with the deceased placed in a supine position with flexed legs. Excavations at sites revealed copper adornments, earthenware figures of humans and animals, and battle axes made from antlers.

Serednytsky, Antin [Serednyc'kyj] (pseud: Antin Verba, Antin Bilchuk), b 1 March 1916 in Verbivka, Borshchiv county, Galicia. Ukrainian writer, educator, and commu-

nity figure in postwar Poland. He graduated from Warsaw University (1948) and became a teacher in Warsaw. In 1960 he became an associate of the Warsaw University department of Ukrainian philology. He developed the curriculum for teaching Ukrainian in Poland's elementary and secondary schools, and in 1966 he was appointed deputy head of the Ukrainian Language Curriculum Commission of the Polish Ministry of Education. In the years 1969–87 he published an elementary-school Ukrainian grammar and seven Ukrainian readers. He has also played a prominent role in the *Ukrainian Social and Cultural Society (USKT [now OUP]) in Poland; for several terms he has been its vice-president and head of its literary association, and he was chief editor (1962–87) of its annual, *Ukrains'kyi kalendar*. He is a member of the Union of Polish Writers. His works have been published in Soviet Ukrainian and OUP periodicals and separately. They include the story collections *Proidennyi shliakhom* (The Road Traveled, 1976) and *Mandrivka do Chaichynets'* (A Trip to Chaichynetsi, 1984). His literary criticism and reviews have appeared in the Polish press and scholarly journals. He has received several Polish medals and citations for his contributions.

Seredyna-Buda. I-15. A city (1989 pop 9,000) on the Boryk River and a raion center in Sumy oblast. It was founded in the 1660s by Old Believers from Muscovy. For over a hundred years the village belonged to Starodub regiment. With the abolition of the Hetman state it became part of Novhorod-Siverskyi vicegerency (1782–96), Little Russia gubernia (1796–1802), and Chernihiv gubernia (1802–1925). By the end of the 19th century soap, hemp-oil, leather, and milling enterprises had been established in the town. A railway link encouraged the development of lumbering at the turn of the 20th century. In 1964 the town attained city status. Today about a third of its work force is employed in industries, such as machine building, metalworking, food processing, forest products, and sewing.

Serensen, Serhii, b 29 August 1905 in Khabarovsk, Primore oblast, Far East, d 2 May 1977 in Moscow. Mechanics scientist; full member of the AN URSR (now ANU) from 1939. He graduated from the Kiev Polytechnical Institute (1926) and worked at the ANU Institute of Construction Mechanics (as director in 1934–41). He taught at aviation institutes in Kiev (1934–41) and Moscow (1934–77) and worked at the State Scientific Research Institute of Machine Science (1967–77). He calculated the load capacities of machine elements, fatigue effects, and failure modes.

Seret (Rumanian: Siret). VI-7. A town (1965 pop 6,200) on the Seret River in south Bukovyna, Rumania. According to archeological evidence the site has been inhabited since the Neolithic Period. It is first mentioned in historical documents in 1334. In 1365–88 it was the capital of Moldavia, and in 1370–1435, the seat of a Catholic diocese. Under Austrian rule (1774–1918) Seret was a county administrative center of Bukovyna crownland (1868–1918). At the beginning of the 20th century branches of the Ruska Besida and Ukrainiska Shkola societies were active in Seret. Ukrainian was taught at the German gymnasium and a Ukrainian bursa was open to out-of-town students. In 1910 Ukrainians accounted for 41.8 percent of the population of Seret county. In 1918 all Bukovyna, including Seret,

was occupied by Rumania. The Greek Catholic administrator, K. Zlepko, was stationed in Seret (1923–30). In 1940 Seret county was divided between Rumania and the Ukrainian SSR, and Seret, along with some 14 Ukrainian villages, remained in Rumania. In the 1950s parallel Ukrainian courses were offered at the gymnasium and teachers' college in Seret. The town's architectural monuments include the Church of the Holy Trinity (1358) and St John's Church (1377).

The Seret River

Seret River. A left-bank tributary of the Dniester River that winds along the Podolian Upland almost entirely through Ternopil oblast. It is 242 km long and drains a basin area of 3,900 sq km. The cities of Ternopil and Chortkiv and a hydroelectric station are located on the river. Its waters are used in industry and for irrigation.

Serf theater (*kripatskyi teatr*). A type of theater that appeared in eastern Ukraine in the 18th century with the imposition of serfdom in the former Hetman state. In the manner of their Russian counterparts Ukrainian landlords adopted the serf theater, themselves acting as directors; the serf theater repertoire consisted mainly of Russian, French, and Italian plays imported by the landlords from Moscow, St Petersburg, and the West, ranging from dramas and operas to ballet. The actors and musicians were illiterate peasants, and the costumes and scenery were the work of local serf craftsmen. Ukrainian plays were occasionally staged – dramas by I. Kotliarevsky and H. Kvitka-Osnovianenko and vaudevilles by V. Hohol-Yanovsky and D. Dmytrenko – particularly in the Kharkiv region. The best-known serf theater troupes were maintained in the Chernihiv region, by D. Shyrai in Sprydonova Buda, A. Budliansky in Pantusove, and H. Tarnavsky in Kachanivka; in the Poltava region, by D. Troshchynsky in Kybyntsi; in the Zhytomyr region, by A. Ilinsky in Romanove (some actors of his troupe even received their musical education in Italy); and in the Kharkiv region, by A. Khorvat in Holovatyne. Serf theaters disappeared in the mid-19th century, but not before they had facilitated the emergence of professional theater in Ukraine and produced scores of well-trained actors.

Serfdom. A form of peasant servitude and dependence on the upper landowning classes that was characteristic of the feudal system and existed in different parts of Europe from the medieval period to the 19th century. The degree of subservience and the prevalence of the serf-lord relation differed with time and country according to natural, economic, social, and political conditions. In Ukraine serfdom developed first in the territories ruled by Poland. Under the Polish system of serfdom the peasants were bound by law to their plots of land, which were owned by the lord. The amount of obligatory labor (*corvée*) owed by the peasant to the lord depended on the size and quality of the peasant's plot, but the amount of labor effectively exacted was often arbitrary. The Russian system of serfdom, which was established in most Ukrainian territories under Russian rule at the end of the 18th century, was based on the principle that the lord owned the peasant under his control. He could dispose of his serfs as he wished: he could even separate them from their land. The amount of labor owed by the peasants and the size of their allotments depended on the number of adult males in their families.

Medieval period. In Kievan Rus', the Principality of Galicia-Volhynia, and the Grand Duchy of Lithuania the larger households of the princes and boyars usually produced enough to meet only their own needs, and the work was done mostly by slaves or by semifree **nepokhozhi* peasants of different types (*zakupy*, *izhoi*, *siabry*, etc). The bulk of the peasants lived on their own land and paid tribute in kind or money to the ruling prince. The free **pokhozhi* peasants sometimes had to provide unpaid labor for the construction of fortifications and roads and in emergencies were called to bear arms in a *levy en masse*.

Under Polish rule. As Polish rule spread throughout Ukraine in the second half of the 15th and in the 16th centuries, the position of the peasantry in Ukrainian territories changed radically. In Poland alodial land ownership was already an established privilege of the ruling class. The nobility had been exempted from any form of conditional (feudal) land tenure, and the peasants had been deprived of their former rights to land. The Polish magnates and nobles extended their serf system to Western Ukraine and, after the Union of Lublin in 1569, to Right-Bank Ukraine as well. To equalize the obligations of the different categories of peasant, the **voloka* land reform was introduced in 1557 in Ukrainian territories and was implemented gradually over the next century. Polish nobles set up **filvarky* on the better lands and began to specialize in grain farming for export. The nobles' diets of 1496, 1505, 1519, and 1520 issued decrees tying the peasants ever more closely to the land, depriving them of the right to move, subjecting them completely to the nobles' courts, and increasing their obligations to the nobles. Finally, the amount of labor owed by the serfs and all other matters affecting them were left to the decision of the nobles, their tenants, or their stewards. A uniform system of serf obligations and relations was maintained on the royal estates, where serfs received better treatment than on the private estates of the nobility.

The obligations imposed on the serfs rose steeply in cases where a tenant, not the landowner, managed the estate. Although the plots of the serfs gradually shrank, their obligations were not lowered. In 1566, 58 percent of the peasant farms in Galicia consisted of more than a half field (*pivolan*). By 1648 only 38 percent were of that size, by

1665 only 16 percent, and by 1765 only 11 percent. At the end of the 16th century the typical serf allotment was a half field. Almost 41 percent of the serf plots were of that size, and 24 percent were a quarter field. Either allotment called for draft corvée with ox or horse. The larger plots required corvée with a pair of draft animals and were therefore known as *parovi* (pair). The smaller ones were called *poiedynky* (single). Depending on the period and the locality, the amount of corvée varied from three to six days per week by one or more members of a household. The poorer serfs, such as the **horodnyky* and **komornyky*, with smaller or no field allotments, provided one to six days of pedestrian corvée per week. The weekly corvée quota, other seasonal or special forms of labor, and additional **quitrent* varied with the territory and even the estate, as did the size of the allotments. In the 1620s, corvée on magnate estates in Volhynia came to four to six days per week per *voloka* (16.8 ha) of land, but some lords demanded labor every day of the week, including holidays. Farther eastward the serf plots became larger, the corvée became smaller, and the bond to the plot grew weaker. In the 16th and 17th centuries there were three distinct serfdom belts in Ukrainian territories. In Western Ukraine, where the *filvarky* were most developed, the peasants were exploited intensely and had the smallest allotments. In the middle belt, encompassing eastern Podilia and the northwestern Kiev region, mixed (alodial and conditional) land tenure lasted longer, and the transition to *filvarok* farming was slower. The large landowners there were usually content to receive payment in kind, and the peasants were not completely or uniformly deprived of the right to own land. In the third belt, covering the lands along the Dnieper and the Boh rivers in southwestern Ukraine, serfdom was difficult to impose: because of the proximity of the steppes and the constant danger of Tatar attack, the population was too mobile. North of the defensive line of castles many estates in the second and third belts offered 15-, 20-, or 30-year waivers from corvée or other obligations in order to attract and hold settlers.

The Hetman period. As the serfs became increasingly exploited in the western and middle belt, and as the corvée waivers expired or were foreshortened by the landowners, the peasants fled to the territories under Cossack control and joined Cossack uprisings. Those conditions contributed to the Cossack-Polish War. The peasantry participated in the war on a mass scale. Some of the peasant combatants joined the Cossack ranks and along with new Cossacks from the other estates demanded open access to land and other Cossack privileges. Former serfs who failed to gain admission to the Cossack estate first took possession of free lands in the liberated territories. But in their universals B. Khmelnytsky and his successors called upon former serfs to return in certain cases to the service of the monasteries and the nobles who recognized the Cossack state. Generally, peasant obligations in the Hetman state during the second half of the 17th and the beginning of the 18th century were light. The serf-lord relationship and the corvée depended on the kind of village and on its owner. A large number of **pospolyti*, who performed corvée for the state, could own property. The Cossack *starshyna*, who received rank estates, demanded labor from their subjects. Many peasants from Western Ukraine and Right-Bank Ukraine, which were retained by Poland, fled to the Hetman state or to Slobidska Ukraine.

Most of them settled as **landless* peasants on the estates of the Cossack *starshyna* or monasteries. According to the 1729–30 census of the Hetman state only 35 percent of the peasant farmers were subject to private landowners, and not all of those were required to perform corvée. Hetman I. Mazepa's universal in 1701 prohibited more than two days' corvée per week. Gradually the peasants in Hetman Ukraine lost the right to dispose of their land and, eventually, their freedom as well. In the 1740s the *pospolyti* could still move from one landowner, to another but had to leave their property (land and inventory) behind. The Cossack officers and monasteries made every effort to attach the peasants to the land, and the process was reinforced by the Russian government, which was interested in extending the imperial serf system to Ukraine.

In Right-Bank Ukraine, particularly in Volhynia, B. Khmelnytsky's uprising in 1648 brought no basic changes in the position of the peasantry. During the 18th century the *filvarok* system was restored, and the corvée demands on the serfs increased.

Under Russian rule. By the decree of 3 May 1783 Catherine II introduced the Russian serf system in the territory of the former Hetman state, and in 1785 the Cossack *starshyna* received the rights of the Russian nobility. After the Second and Third partitions of Poland the Russian serf system was extended to Right-Bank Ukraine. According to official estimates made in 1858, 60 percent of the serfs belonged to landowners, and 40 percent lived on state or appanage lands. Of the landowners' serfs only 1.2 percent paid quitrent, and the rest did corvée. State peasants usually paid quitrent. During the first half of the 19th century the land allotted to peasants diminished to the advantage of the *filvarky*, corvée increased, and the number of landless peasants rose sharply. Corvée and the poll tax rose on average to between four and six labor days per week. The norm (*urochna*) system of labor was widely adopted. Many peasants, known as *misiachnyky*, lost their land and worked only on the lord's demesne for a monthly ration of products. Others became household serfs, who worked and lived in the lord's manor. The landowners increased corvée to cover the state-imposed poll tax and tax arrears. In a separate manifesto in 1797 the Russian government proposed that the landowners limit their demands on the peasants to a three-day corvée. In 1819 it clarified some aspects of the serf-lord relationship. Those and other manifestos were largely ignored by the landowners. In 1847–8 the government issued the so-called Inventory Regulations for Right-Bank Ukraine, which diminished the personal dependence of the peasants on their masters, lowered the corvée and regulated it according to the household allotments, prohibited the transfer of corvée from one week to another, abolished certain payments, and prohibited the conversion of ordinary serfs into household serfs. Infringement of the regulations was punishable by military court, yet the position of the serfs hardly changed.

Transcarpathia. Serfdom was practiced in Transcarpathia from the 14th century. In the first half of the 16th century the serfs were bound to the land, and the corvée was greatly increased. In 1546 Stephan Werböczy codified the laws governing the serf-lord relation in the Tripartitum Code. A serf had to pay the state a household tax (*podymne*), the church a tithe (one-tenth of his grain), and his lord one-tenth of his income and perform usually three

days' corvée per week. The burdens placed on the peasants, however, varied with external conditions (diminishing in wartime) and the will of the landowner.

The condition of the serfs improved after 1767, when Maria Theresa restored their right to resettle, defined their obligations, and reduced corvée by half. In 1848 the Hungarian Diet abolished corvée, but the law did not come into effect until 1853.

Bukovyna. Under Moldavian rule the peasants in Bukovyna usually performed 12 days of corvée per year and paid the lord one-tenth of their harvest. But they were free to move. The serf system introduced in 1544 was less exploitive than the Polish one, and as a result many peasants from Pokutia and Podilia escaped to Bukovyna. In 1749 the Moldavian ruler K. Mavrokordatos (Mavrocordat) abolished serfdom and imposed 24 days of corvée per year and a tax. According to the Golden Charter of Voivode G. Ghica in 1766, peasants were obliged to do 12 days of corvée and to surrender one-tenth of their harvest. That law was in effect until 1848.

Galicia and Bukovyna under Austrian rule. To increase tax revenues and improve the recruit pool for the army in the newly annexed lands, Maria Theresa and Joseph II tried to regulate serf-lord relations and to limit the dependence of the peasant on the landowner. In the 1780s a cadastre and a survey of serf obligations were carried out. The land belonging to landowners was separated from the *rustical lands reserved for the peasants, and transfers from one category to the other were prohibited. The serf's personal dependency on the lord was restricted, and he was allowed to appeal to state institutions against the lord's verdicts. Corvée was limited to a fixed number of days depending on the size of the land allotment, and additional burdens were abolished. The peasant acquired the right to sell his products freely. Village communities were given new powers of self-government. A special ombudsman (*mandator*) was appointed to look after the affairs of the peasants. Many of the reforms were ignored by the successors of Joseph II. His decree limiting serf obligations to 30 percent of the serf's total income was revoked. In spite of the law, by 1848 the landowners annexed to their *filvarky* about a million morgen of rustical land.

At the beginning of the 19th century 78 percent of the serf families in Galicia were attached to private estates, and 22 percent to state lands. The peasants were divided, according to amount of property and number of obligations, into *parovi* (pair) serfs (2.5 percent of all households, possessing 6.9 percent of the rustical lands), *poiedynky* (single) serfs (42.6 and 60.5 percent respectively), pedestrian serfs (45.9 and 32.6 percent), and the landless *komirnyky* and *khalupnyky* (9 percent of households). On the average a peasant household had to till 2 ha of the lord's land and perform 78 days of corvée per year on state lands and 133 days, and sometimes as much as 300 days, on private estates. Most (68.2 percent) of the peasant's obligations consisted of corvée, 26.6 percent of monetary payments, and 5.2 percent of other services and fees. The lord sometimes made further (illegal) exactions from the peasants by imposing various fines and by forcing them to buy a certain amount of alcohol (see *Propination).

Abolition of serfdom. The abolition of serfdom in Galicia, Bukovyna, and Transcarpathia on 16 April 1848 was speeded up by the revolutionary events in Austria. In Russia the political repercussions of the Crimean War

brought about the emancipation of the serfs on 19 February 1861. But the *redemption payments and the continued social inequality of the peasants diminished the impact of those reforms and hindered the economic progress of the peasantry. (See also *Peasants.)

I. Vytanovych

Sergeev, Nikolai, b 1855 in Kharkiv, d 1919. Painter. He studied at the St Petersburg Academy of Arts and co-founded the Kuindzhi Artists' Society (1909). He painted Ukrainian landscapes, such as *Water Mill*, *Cossack Village*, and *Apiary in Ukraine* (1885).

Sergeevich, Vasilii [Sergeevič, Vasilij], b 1832 in Orel, Russia, d 26 November 1910 in St Petersburg. Russian legal historian. After graduating from the law faculty of Moscow University (1857) he taught state law at the universities of Moscow (1868–72) and St Petersburg, where he also served as dean (1888–97) and rector (1897–9). He wrote many valuable works on the law of Rus', including *Veche i kniaz'*: *Russkoe gosudarstvennoe ustroistvo i upravlenie vo vremena kniazei Riurikovichei* (Assembly and Prince: The Russian State System and Government in the Era of the Riurykides, 1867), *Lektsii i issledovaniia po drevnei istorii russkogo prava* (Lectures and Research in the Ancient History of Russian Law, 1883), *Russkie iuridicheskie drevnosti* (Russian Juridical Antiquities, 3 vols, 1890–1903), and *Drevnosti russkogo prava* (Antiquities of Russian Law, 3 vols, 1908–9). He also wrote works on land ownership, serfdom, and rural life in Rus'.

Serhienko, Hryhorii [Serhijenko, Hryhorij], b 6 April 1925 in Voronyntsi, Orzhytsia raion, Poltava oblast. Historian. He studied at Kiev University (1949–57) and worked for the Chief Archival Administration of Ukraine (1957–61). After defending his candidate's dissertation (1961) he worked for the AN URSR (now ANU) as managing editor of history, archeology, and ethnography in its publishing house, as consultant to its presidium, and as chairman of the feudal history department at its Institute of History (since 1974). He has published numerous works, among them monographs on social liberation movements in late 17th- and early 18th-century Right-Bank Ukraine (1963), society and politics in Ukraine after the Decembrist revolt

(1971), the Decembrists and their revolutionary traditions in Ukraine (1975), the Decembrists and T. Shevchenko (1980), Shevchenko and the Cyril and Methodius Brotherhood (1983), and Shevchenko in Kiev (1987). He has also coedited the institute's multivolume histories of Ukraine, of its cities and villages, and of Kiev.

Serhiienko, Ivan [Serhijenko], b 13 August 1936 in Bilotserkivtsi, near Pyriatyn, now in Poltava oblast. Cyberneticist and computer scientist; full member of the ANU (formerly AN URSR) since 1988. He graduated from Kiev University (1959) and has worked at the ANU Institute of Cybernetics (since 1952), and has taught at Kiev University (since 1970). He has contributed significant theoretical papers on cybernetics and the theory of computing. In particular he has developed new methods of numerical analysis and automated systems design.

Oleksander Serhiienko

Archbishop Teodosii Serhiiv

Serhiienko, Oleksander [Serhijenko], b 25 June 1932 in Tetkino, Kursk oblast, RSFSR. Human-rights activist and political prisoner. An art restorer by profession, he was arrested in January 1972 in Kiev for his participation in the human-rights movement, and sentenced in June to seven years in labor camps in Perm oblast and in Vladimir prison near Moscow, and three years' exile in the Khabarovsk territory in far eastern Siberia. While incarcerated, he was active in prisoners' protests and authored several appeals and declarations. His mother, O. *Meshko, wrote appeals in his defense that were circulated in Soviet samvydav and published in the West.

Serhiienko, Petro [Serhijenko], b 17 February 1902 in Vovchuk, Lubni county, Poltava gubernia, d 1 January 1984 in Kiev. Actor and pedagogue. He completed study at the Lysenko Music and Drama Institute (1931) and then worked in the Kiev Ukrainian Drama Theater (1932–75, with small interruptions), where he led the studio. He taught in the Kiev Institute of Theater Arts and the Kiev Conservatory (opera studio). He played a variety of character and morality roles, from Yarchuk in I. Mykytenko's *Sol'o na fleiti* (Solo on a Flute) to Marquis Poza in F. Schiller's *Don Carlos*, and acted in the film *V stepakh Ukraïny* (In the Steppes of Ukraine, 1952, adapted from O. Korniiuk's play).

Serhiienko, Raisa [Serhijenko, Rajisa], b 13 July 1925 in Novoukrainka, Kirovohrad okruha, d 20 March 1987 in Odessa. Opera and concert singer (lyric-dramatic soprano). After graduating from the Odessa Conservatory in 1951, she joined the Odessa Opera and Ballet Theater and appeared in roles such as Natalka in M. Lysenko's *Natalka from Poltava*, Odarka in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, Maria in P. Tchaikovsky's *Mazeppa*, and Mariana in H. Maiboroda's *Arsenal*.

Serhiiv, Teodosii [Serhijiv, Teodosij], b 1890, d 1938? Orthodox church hierarch. He was ordained bishop of Pryluka under the jurisdiction of the Patriarchal Russian Orthodox church in 1923, and then switched to the Living (Synodal) church in 1924 and served briefly as its bishop in Poltava. Later that same year he again changed affiliations and joined the Ukrainian Autocephalous Orthodox church as a bishop of Pereiaslav (1924–8) and then Berdychiv (1928–30). From 1933 he worked as a parish priest in the Poltava region. In 1936 he was arrested and sent to a labor camp in the Kolyma region, where he died.

Serho. See Stakhanov.

Serov, Aleksandr, b 23 January 1820 in St Petersburg, d 1 February 1871 in St Petersburg. Russian composer, musicologist, and critic. A lawyer by training and initially by profession, he became one of the leading Russian musicians of the mid-19th century and perhaps the foremost music critic of his day. A strong promoter of 'Russian' music, he used also Ukrainian themes and prepared a study of Ukrainian music for the journal *Osnova* in 1861. His Ukrainian works include the opera *May Night*, based on Gogol's writings (written in 1852–3 but never produced and later destroyed); several fragments ('Hopak,' 'Hrechanyky,' and 'Zaporozhian Cossack Dance') from his unrealized opera *Taras Bul'ba*; 'Little Russian Dances' for piano; and arrangements of numerous Ukrainian folk songs for chorus and orchestra. In 1861 he conducted a symphony concert in St Petersburg to raise money for the family of his deceased friend, T. Shevchenko.

Serov, Ivan, b August 1905 in Afimskaia, Vologda gubernia, Russia, d ? Stalinist functionary and general. A graduate of the Leningrad military school (1928), in the 1930s he served as a regimental commander and in Stalin's personal secretariat. Under N. Khrushchev's patronage he became a member of the CC CP(B)U Politburo and the NKVD commissar in Ukraine (1940–1) in charge of mass repressions and terror in Ukraine. As the first deputy commissar of state security (1941–5) and then internal affairs (1946–54) in Moscow, he was responsible for the mass deportation of the Volga Germans, Chechens, Ingush, Crimean Tatars, and Kalmyks. In 1945–6 he was deputy commander-in-chief of the Soviet occupational forces in Germany and oversaw *SMERSH operations, the repatriation of Soviet refugees, and the deportation of German scientists. After serving as KGB chairman (1954–8), he was put in charge of military intelligence. In 1963 he was dismissed from his job and in 1965 he was expelled from the Party for crimes committed under Stalin's regime.

Serpilin, Leonyd, b 4 April 1912 in Kiev, d 27 February 1973 in Kiev. Writer and journalist. He completed studies at the Kiev Civil-Engineering Institute in 1937. During the Second World War he was a correspondent for the newspaper *Radians'ka Ukraina* and then became editor of *Literaturna Ukraina*. He is the author of collections of short stories, such as *Shliakh druzhby* (The Path of Friendship, 1949) and *Ser'ozhchyna radist'* (Serozha's Joy, 1958); novels, such as *Svitanok* (Dawn, 1947), *Kliatva nad bahattiam* (Oath by the Bonfire, 1951), *Zolota osin'* (Golden Autumn, 1960), and *Vohnyk na uzlissi* (The Little Fire at the Edge of the Forest, 1967); and the romance novel *Budivnychi* (The Builders, 1955).

Serradella, common (*Ornithopus sativus*; Ukrainian: *seradelia*). An annual plant of the family Leguminosae. In Ukraine it is planted primarily in the sandy soil of Polisia for forage and green fodder.

Servetnyk, Stanyslav, b 6 October 1928 in Kurnyky, Proskuriv okruha. Muralist and stained-glass artist. A graduate of the Lviv Institute of Applied and Decorative Arts (1956), he decorated the interior of the Building of Culture in Rusiv (1964, with H. Levytska), created the stained-glass windows and decorative panels in the Dytiachyi Svit store in Lviv (1965), and painted the wall panel *Bathing* in the pavilion on Hlynnna Navariia Lake, near Lviv (1966). He has also done easel paintings and book illustrations.

Service industry. A branch of the economy that provides various consumer services. In the official reporting of economic statistics in the USSR, it included such services as car repairs, tailoring, house painting and maintenance, haircutting and hairdressing, dry cleaning, photography, consumer-goods repairs (eg, televisions, radios, watches, bicycles), and some transportation services. The services were provided by state enterprises and co-operatives. In 1988 there were 892 co-operatives of the service industry in Ukraine.

In general the service industry was considered to be one of the worst developed sectors of the Soviet economy. According to official statistics the total value of such services in Ukraine in 1987 was 2.25 billion rubles, or approx 44 rubles per capita. Although the value of services increased steadily in the last years of the USSR – the respective figures for 1975 were 1.06 billion and 25, and for 1980, 1.52 billion and 31 – the supply of services still lagged considerably behind that in the developed countries. The number of service enterprises increased from 58,342 in 1980 to 63,196 in 1987. Services were especially inadequate in the countryside: per capita levels there were approx 33 rubles in 1987, compared with 49 rubles in the cities. By sector, shoe repairs accounted for approx 10.5 percent of the value produced by the industry, tailoring for 18.5 percent, housing construction and repairs for 10.3 percent, consumer-goods and vehicle repairs for 8.1 percent, and hairdressing and -cutting for 7.5 percent (1980).

The unavailability of services and their inferior quality led to the growth of a large private (black market) sector in the USSR. In recent years economic reforms have stimulated the development of a legitimate private sector in the service industry. Many private services have sprung up in Ukraine in the late 1980s and early 1990s.

Service tree. See Mountain ash.

Servitudes. Rights contained in customary or civil law to specified limited use of other people's property. In the past, peasants were allowed to use a landowner's lands for certain purposes. In Ukraine peasants usually had the right to gather wood in forests and to herd livestock in pasture and meadows owned by landowners. The 1848 land reforms in Austria granted the peasants land but did not settle the question of ownership for forests and pastures. The landowners claimed exclusive rights to these lands and demanded compensation in fees or services from the peasants for the use of them. This led to serious conflicts between landowners and peasants. In 1853 the landlords were ordered by imperial patent to compensate the peasants for the loss of servitudes with monetary payments or grants of land. Special commissions were set up to oversee the elimination of servitudes, and their work continued to 1890. Out of 30,733 claims, the commissions rejected 11,205 and settled the rest, usually by setting low indemnity payments or small transfers of forests and pasture to the peasant communities. In Galicia the peasants received altogether 1.2 million florins, 94,100 ha of forest, and 67,000 ha of grazing land for servitudes from the landowners. In some regions, particularly mountain regions, servitudes were brought under state regulation.

In Russian-ruled Ukraine, servitudes were common in Right-Bank Ukraine, which had been under Polish rule until the late 18th century, but were rare in Left-Bank Ukraine, where land was more abundant and the nobility's control over it more tenuous. Following the emancipation of the peasantry in 1861, pasture and hayfields were to be shared by landlords and peasants as before. In 1886 the Senate granted the landlords complete control over these lands, and the peasants were forced to pay for their use in fees or services.

I. Vytanovych

Seseli (Ukrainian: *zhabyrytsia*). A genus of smooth perennial herbs of the family Umbelliferae, native to temperate and cold climatic regions of the Old World, with ternately compound leaves and white flowers. Eleven of its 50 species grow in Ukraine, the most common being *S. arenarium* in the steppe and forest-steppe and *S. lehmannii*, which is endemic to the Crimea.

Sevastopil or Sevastopol [Sevastopil' or Sevastopol']. IX-14. A city (1990 pop 361,000) and port on the Black Sea in the Crimea. The region was inhabited by the Taurians from the beginning of the 1st millennium BC. In the 5th century BC the Greek colony of *Chersonese Taurica was established at the site. In 1784, after annexing the Crimea, Catherine II ordered the fortress and naval port of Sevastopol to be built at the site of the Tatar village of Akhtiar. In 1804 it became the home of the Russian Black Sea Fleet. The city grew from 30,000 inhabitants at the beginning of the century to 47,400 in 1853. During the Crimean War (1853-6) the city was almost completely destroyed. After the war it was demilitarized. In the 1870s its naval facilities were rebuilt and expanded, and a railway connecting it with the grain-growing interior was constructed. The population of the city grew rapidly, from 11,000 in 1875 to 53,000 in 1897. Many of the residents were naval personnel. During the First World War the city was occupied by

Sevastopol

the Germans (May–November 1918), the Allied Powers (November 1918 to April 1919), and A. Denikin's forces (June 1919 to November 1920) before it was taken, finally, by the Red Army. On 29 April 1918, just before the German occupation, the Ukrainian flag was raised on the ships of the Black Sea Fleet in Sevastopol. After the war the city's port and industries were rebuilt, by 1928. Its population grew from 96,700 in 1926 to 112,000 in 1941. During the Second World War Sevastopol resisted the Germans for eight months before surrendering in July 1942. After its recapture in May 1944 the city was in ruins. In 1945–55 it was rebuilt and expanded. By 1959 its population had reached 148,000 (19 percent Ukrainian, 76 percent Russian).

Sevastopol is a picturesque city stretched out along the northern and southern shores of Sevastopol Bay. Many of its buildings are finished in white limestone, and the broad avenues are lined with trees. The port is one of the finest natural ports on the Black Sea and can accommodate the largest ships. The city is an important trading and manufacturing center in southern Ukraine. It has a significant food industry, with large fish-processing and canning plants, wineries, and meat packing plants; a machine-building industry; ship repair yards; an electric power industry; and a building-materials industry. As a commercial port in the Crimea it is second only to Teodosiia. Its chief research institutions are the Sevastopol Biological Station, the Marine Hydrophysical Institute, with its aquarium, and a branch of the Oceanography Institute. It supports two Russian theaters and four major museums: the *Khersones Historical-Archeological Museum, the Sevastopol Art Museum, the Museum of the Black Sea Fleet (est 1869), and the Museum of the Defense of Sevastopol. The main architectural monuments are the Doric Cathedral of ss Peter and Paul (1843–8), the quay Graftska Prystan (1846), and the Sevastopol Panorama (1905).

Sevastopol Art Museum (Sevastopils'kyi khudozhnii muzei). A museum in Sevastopol, founded as the Sevastopol Picture Gallery in 1927. It replaced the People's Art Museum in Yalta (est 1922), which consisted of nationalized private collections from the summer homes and palaces of Crimea. The gallery was renamed in 1965. Housed in a turn-of-the-century four-story building in the eclectic

style, it contains over 4,000 works of painting, graphic art, sculpture, and applied art in its departments of Russian and Ukrainian prerevolutionary art, Soviet art, and Western European art, including works by M. Samokys, S. Vasylkivsky, V. Orlovsky, V. Tropinin, I. Aivazovsky, I. Kramskoi, O. Murashko, P. Levchenko, M. Hlushchenko, T. Yablonska, V. Kasiian, I. Kavaleridze, P. Slota, A. Kashshai, P. Sulymenko, S. Shyshko, and V. Zaretsky. An album of paintings in the museum was published in Kiev in 1986.

Sevastopol Biological Station. See Institute of the Biology of Southern Seas of the Academy of Sciences of the Ukrainian SSR.

Ihor Ševčenko

Ševčenko, Ihor, b 10 February 1922 in Radość, Poland. Byzantine scholar and pedagogue; foreign member of the AN URSR (now ANU) since 1991. A graduate of Charles University in Prague (1945) and the University of Leuven in Belgium (1949), from 1949 he taught in the United States at the universities of California and Michigan, Columbia University, and (from 1965) Harvard. In 1973 he became an associate director of the Harvard Ukrainian Research Institute. His essays have been published in the collections *Society and Intellectual Life in Late Byzantium* (1981), *Ideology, Letters, and Culture in the Byzantine World* (1982), and *Byzantium and the Slavs in Letters and Culture* (1991). He has written articles about relations between Byzantium and Kievan Rus'. His translation of G. Orwell's *Animal Farm* into Ukrainian (1947) was the first foreign-language translation of that work. A festschrift in Ševčenko's honor, titled *Okeanos*, was published in 1983.

Seven Years' War. In the years 1756–63 England and Prussia fought against a coalition of France, Austria, Russia, and other nations seeking political influence, some of whom were desirous of maintaining their colonial systems. The war spread beyond Europe to the French and English colonies in North America and the Indies. As a result of the conflict Prussia emerged as a powerful force in Europe.

Despite Hetman K. *Rozumovsky's efforts to have Ukraine remain neutral he was forced to provide troops for the Russian army's invasion of East Prussia. In 1757 he sent 8,000 Ukrainian peasants into the war, most of whom died. The regular Cossack forces, including the Chernihiv, Chuhuiv, Kiev, and Nizhen regiments, took part in various campaigns; they were a deciding factor in the victory at Gross-Jägersdorf on 30 August 1757. On 9 October 1760

Berlin was captured by Cossack divisions serving in the Russian army.

H. *Orlyk participated in the war as a French general. He died in 1759 from wounds received at the Battle of Bergen.

Seven-year school (*semyrichna shkola*). In Soviet Ukraine, a seven-grade incomplete-secondary school, established in 1920 and in existence until 1958 (see *Unified labor school). In 1925–8 some of the seven-year schools in urban areas were transformed into *factory seven-year schools, and some rural seven-year schools were turned into schools for collective-farm youth (see *Schools for peasant youth). In 1934 a unified general-education school system was introduced. Seven-year schools were reorganized into incomplete-secondary schools of seven grades. Graduates of seven-year schools could continue to complete their secondary education or gain admission to institutions offering *secondary special education. In 1958 the seven-year school was transformed into the *eight-year school.

Ivan Severa: *Portrait of Ivan Franko* (plaster, 1955)

Severa, Ivan, b 21 May 1891 in Novosilky, Yavoriv county, Galicia, d 20 December 1971 in Lviv. Sculptor and educator. He studied at the wood carving school in Yavoriv (1904–7), the Lviv Handicrafts School (1910–14), and the St Petersburg (1915–17), Prague (1919–20), and Rome (1921–4) academies of art. In 1926 he emigrated from Prague to Soviet Ukraine, where he lectured at the Kiev (1926–9) and Kharkiv (1929–33) art institutes. To escape the Stalinist terror in Ukraine he moved to Frunze, Kirgizia. In 1935 he settled in Moscow, and in 1941 he returned to Lviv. From 1945 he taught at the Lviv Institute of Applied and Deco-

orative Arts. In his early sculptures, such as *Wave* (1921) and *Self-Portrait* (1925), modernist influences are evident. Later he created realist busts of T. Shevchenko (1927), V. Lenin (1929), I. Franko (1947), and V. Stefanyk (1949); sculptures of I. Gonta and Lesia Ukrainka; and the composition *Rebellious Egypt*. D. Krvavych's book about Severa was published in Kiev in 1958.

Severtsov, Aleksei [Sjevercov, Aleksej], b 23 September 1866 in Moscow, d 19 December 1936 in Moscow. Russian zoologist; full member of the USSR Academy of Sciences (AN SSSR) from 1920 and the VUAN/AN URSS (now ANU) from 1925. A graduate of Moscow University (1890), he worked at Yurev (1899–1902), Kiev (1902–11), and Moscow (1911–30) universities. One of the pioneers of evolutionary morphology, while in Kiev he proposed a theory of 'phylembriogenesis' and documented the relation between phylogenesis and ontogenesis. In 1930 he founded the AN SSSR laboratory of evolutionary morphology. Severtsov wrote *Etiudy po teorii evoliutsii* (Studies on the Theory of Evolution, 1912) and *Morphologische Gesetzmässigkeiten der Evolution* (1931). His collected works were published by V. Kasianenko (1951) and E. Veselov (1975).

Ivan Severyn: *Hutsul Girl from Dovhopole* (pastel, 1908)

Severyn, Ivan, b 5 October 1881 in Ostapivka, Myrhorod county, Poltava gubernia, d 20 February 1964 in Kiev. Landscape painter. He studied under O. Slaktion at the Myrhorod Handicrafts School and the Kharkiv City School of Drawing and Painting (1903–5) and then at the Cracow Academy of Arts (1905–7) and in Rome (1907) and Paris (1908, 1912–13). He painted many landscapes while

he was a member of a geological expedition to Tian Shan and Tibet (1915–17). After living in Kirgizia for several years, he returned to Ukraine and taught at an art tekhnikum (1925–7) and the Kharkiv Art Institute (1927–33). A member of the *Association of Revolutionary Art of Ukraine, in the mid-1930s he was arrested and sent to a labor camp. His early works, such as *Zakopane* (1907), *Envi-rons of Rome* (1907), *Kuban Cossack* (1909), and the cycle 'Hutsul Region' (1905–11), are impressionist in style. The few works he produced during the Soviet period include the cycle 'Dnieper Hydroelectric Station' (1930–2).

Severyn, Yurii, b 12 October 1927 in Kharkiv. Graphic artist. A graduate of the Kharkiv Art Institute (1952), he has done satirical prints and book illustrations, using mostly lithography. He has produced several series, such as '1905' (1955), 'From the Time of the Civil War in Ukraine' (1957), and 'History Lesson' (1965), in collaboration with V. Chernukha, and has illustrated the collection *Smiities' na zdorov'ia* (Laugh for Good Health, 1960), S. Rudansky's *Spivomovky* (Sung Sayings, 1966), and O. Vyshnia's *Myslyvs'ki usmishky* (Hunting Humor, 1969). A catalog of his works was published in 1964.

Sevliush or Sevluš. See Vynohradiv.

Oleksander Sevriuk

Sevriuk, Oleksander [Sevrjuk], b 1893, d 26 or 27 December 1941 near Frankfurt an der Oder. Political leader and diplomat. In 1917–18 he represented the Ukrainian Party of Socialist Revolutionaries in the Central Rada. In November 1917 he was elected to the Rada's Committee for the Defense of the Revolution in Ukraine and drafted the law creating the Constituent Assembly of Ukraine. In early 1918 he headed the UNR delegation that negotiated the Peace Treaty of *Brest-Litovsk with the Central Powers and served as UNR emissary in Berlin. From April 1919 he was a member of the Ukrainian delegation at the Paris Peace Conference, and later he worked with the UNR mission in Rome for the repatriation of Ukrainian prisoners of war. In 1920–31 he lived as an émigré in France and then in Germany and was involved in Ukrainian Sovietophile circles. His recollections of the negotiations in Brest-Litovsk appeared in the Paris Sovietophile paper *Ukrains'ki visty* (1927). Sevriuk died in a railway accident. There were allegations that he was a Soviet-Nazi double agent and that he was assassinated by the Gestapo.

Halyna Sevruc: *Olimpii* (1975)

Sevruc, Halyna, b 18 May 1929 in Samarkand, Uzbekistan. Ceramist. After graduating from the Kiev State Art Institute (1959) she worked for the Art Fund as a decorator of buildings; she created mosaics (*The Forest Song*, 1963) and large-scale ceramic panels (eg, for the Khmilnyk Sanatorium, the Chorne More Hotel in Odessa, the Kiev Hotel in Kiev, the Hradetskyi Hotel in Chernihiv, and School 204 in Kiev). For speaking out against the political persecution of her friends she was expelled from the Union of Artists of Ukraine in 1968. In 1970–5 she produced several relief sculptures of Slavic pagan gods for the Cinema Building and the Kievan Cave Monastery Preserve in Kiev. Sevruc has won recognition for her many small ceramic reliefs depicting historical figures from Ukrainian history, mythology, folklore, and famous historical buildings. She has also done over 20 paintings (mostly in tempera) and over 30 ink drawings. The first solo exhibition of her works was held in Kiev in 1984, and in 1991 she had a solo exhibition in Toronto.

Sexual life. Ethnographic and anthropological studies of ancient cultures in Ukraine present a complex image of customs, rituals, norms, and traditions that celebrated and regulated sexual activity. The permissive pagan norms that regulated sexual relations and customs were universally accepted as manifestations of the will of the gods, the laws of nature, and the interests of society. The idea of individual love had not yet emerged; instead the human body was perceived as an integral part of nature, and sexuality as a general generative force. Although sexual activity was closely tied to the need to perpetuate the clan and was regulated by the institutions of marriage and family, it was not limited simply to the procreative function, but was practiced in a broad context of cultural phenomena. The juxtaposition of the spiritual and the physical and of 'pure' love and 'impure' sensuality that is characteristic of later repressive morality was absent.

Sexuality was openly discussed and was incorporated into songs, dances, and other celebratory elements of folk culture. Group amusements, games, and rituals were

given special import, and the entire population – children, youths, and adults – participated in them. Those mechanisms of sexual socialization combined the reproductive and the erotic functions of sexuality. Some relicts of ancient customs and traditions were even orgiastic in nature, but they in no way prove there was total sexual freedom at the time of their inception. All sexual activity in ancient Ukrainian society was strictly regulated by particular norms, customs, traditions, and other elements of the folk culture.

After the Christianization of Rus' the sexual customs and mores of the population became subject to the regulation of the church and the strictures of Christian morality. The church condemned carnality and limited sexual relations to their basic procreative function. All manifestations of eroticism, sensuality, and even attraction were discouraged, sometimes by force. The new morality effected considerable changes in many spheres of everyday life, where sexuality and eroticism had not been segregated from other elements of human and social interaction. Folk customs, rituals, songs, dances, and other elements of popular culture with erotic content were banned, and the nature of married life changed through its subordination exclusively to reproduction and its strict regulation by the church. Because the church's impositions on sexual and other accepted folkways and social behavior were foreign in origin, they elicited widespread dissatisfaction and opposition, even on the part of princes.

The church sanctioned only conjugal sexual relations and punished extramarital ones. In accordance with the Fifth Book of Moses (or Deuteronomy, chapter 22, verse 22) adultery with a married woman was a capital offense. In Byzantine law adultery was punishable by amputation of the nose; the marriage of the adulteress was then annulled, but the adulterer was forbidden to leave his wife. The *ustav* of laws issued by Grand Prince Volodymyr the Great made no mention of church and Byzantine regulation of sexual activity, with the implication that customary norms were still in force. In the *ustav* of Yaroslav the Wise, however, the norms of church and customary law were merged. Thereafter women who gave birth to illegitimate children were imprisoned in convents, marriage dissolutions were banned, and monetary fines were levied on rapists. An important norm was introduced that contributed much to the liberalization of gender relations: the strict prohibition of forcibly arranged marriages of children by their parents, under church penalty.

Under Christianity in the Ukrainian lands of Kievan Rus' and after its disintegration, there was a tendency to combine Byzantine and customary law. Some Byzantine norms were adopted by the population wholeheartedly or as compromises, but the majority were rejected altogether, and sexual relations continued to be regulated by customs, traditions, and customary law. Later, in the Lithuanian-Ruthenian state, the Lithuanian Statute prohibited nonconsensual betrothals and marriages, but all other aspects of sexual life remained under the regulation of customary law.

After the fall of Kievan Rus' a different tendency manifested itself in the Russian lands, particularly during the rise of the Muscovite centralized state: an increasing reliance on Byzantine legal norms, which later served as the foundations of Russian legislation. In the Hetman state, even after the Pereiaslav Treaty of 1654 and subsequent

encroachments of tsarist rule, Russian legislation had a limited application, and in the lower courts the norms of customary law were applied almost exclusively. Even under tsarist rule sexuality in Ukraine, as opposed to Russia proper, continued to be subject to the more liberal norms of customary law. Although Christian morality had a certain impact, it was interpreted by the population in a manner that blended it with the norms and customs of pagan times. Thus, for example, the *Kupalo festival remained a folk tradition until recently, and the custom of rolling couples across a sown field was still practiced in the 19th century. Folk oral literature, folk dances, and folk songs composed at the height of the influence of the Orthodox church retained erotic and romantic motifs. Certain forms of sexual relations proscribed by Christianity did not so much disappear as become disguised. One could say that under Christianity there was a separation of folkways and official culture, although the latter predominated. Such was the case in the sphere of sexuality, where a dual morality was established and has persisted to this day, though with a different content.

The gulf between official and actually practiced sexual morality widened in the 19th and early 20th centuries under the impact of the concept of the individual and his or her rights and the rise of secularism and the secular state. Changes occurred in both sexual attitudes and the means of controlling sexual relations. 'External' controls and prohibitions were largely replaced by 'internal' norms emphasizing the intimacy of sexual relations and their significance in emotional development. New biological, physiological, and psychological studies enhanced the scientific study of sexuality and substantiated the positions of those who polemicized with the still dominant Christian ideology.

Under Soviet rule the domination of the church was forcibly ended, and an entirely new situation emerged. Contradictory processes were unleashed: on the one hand, a progressive individualization of sexuality not regulated by external taboos but by internal moral factors, and on the other, the threat of the dehumanization of gender relations, the growth in sexual alienation, and the increasing instability of relationships. New mechanisms of socialization and the control of sexuality had not yet replaced the old religious ones, and people lost their points of reference for sexual conduct and had to face their problems alone. A significant proportion of peasants abandoned their villages and folkways and resettled in the cities, thereby altering the traditional pattern of life, destroying customary attitudes, relations, and socialization patterns, and affecting sexual relations. For many sexuality became the last refuge in the face of economic hardships and complex social and psychological problems. The transformations spawned various psychiatric, psychological, and sociological studies of sexuality, which replaced the earlier, prerevolutionary, biological and physiological focus on sexual life and examined problems in a wider social, political, and cultural context.

Soviet sociological studies of sexual behavior conducted in Ukraine and Russia in the 1920s were distinctive in their methodology and depth and the variety of problems they addressed. The sociological studies conducted by Z. Hurevych, F. Grosser, M. Glezer, A. Vorozhbyt, O. Furmanov, and D. Las deserve attention. Some, including Hurevych and Grosser's study of contemporary sexual

life (1928), were published later in the German periodical *Zeitschrift für Sexualwissenschaft* and reprinted in other countries. Those studies were the first to show the complex and contradictory picture of the simultaneous demise of old sexual mores and the creation of and search for new social norms of sexual conduct.

Hurevych's studies indicated that 94.7 percent of married men and 61.7 percent of married women had had premarital sex. Comparison of other data for Ukraine and Russia indicates that premarital sex was widespread. Eleven percent had had intercourse before the age of 17, and 40 percent married and had sex at 17. The average age of sexual initiation was 17.2 for males and 19.3 for females. A comparison of data from the early and mid-1920s reveals that the average age of sexual initiation dropped among women, and that the age range for maximal sexual activity expanded. Studies conducted in the 1920s indicated significant tendencies: on the one hand, the traditional pattern whereby women's first sexual experience was with their husbands and men's was with casual acquaintances, and on the other, the novel phenomenon whereby women were widening their circle of sexual partners to include casual acquaintances and men were decreasing their contacts with prostitutes.

Forty-five percent of married men and 18 percent of married women had had extramarital relations. The reasons given by men were marital breakup (38 percent), 'infatuation' (25 percent), and dissatisfaction with married life (14 percent), and by women, marital breakup (38 percent), dissatisfaction with married life (21 percent), and the inadequacy of their sexual relations with their spouses (17 percent).

The data thus indicated a breakdown of traditional norms and sexual values and not the establishment of new ones. Premarital sex was engaged in not only by men, as was considered natural, but also by women. Both men and women allowed extramarital affairs, an attitude which indicates a certain dissociation of sex from marriage. On the one hand, the freedom to remain married in spite of such affairs had spread to include both genders, which change was a positive development. On the other hand, women had begun to adopt traditionally 'male' values, the implication being an imminent loss of moral direction in sexual conduct and, ultimately, a consumerist attitude vis-à-vis sex.

The sociological studies of sexual problems conducted in the 1920s and 1930s tended not to be objective in their conclusions, however. Just as Christian morality had sanctioned only the reproductive function and deemed all other sexual activity sinful, many of the studies were biologically biased in their conclusions, and approved only of sexual activity resulting in procreation. Masturbation was considered a physically and mentally debilitating disease that hampered normal development, or a perversion. Premarital celibacy was deemed healthy. Sexual activity was deemed to require a great amount of energy which 'could be better expended in more valuable areas.' One could consider those conclusions to be an ideological justification of the principles of the new sexual morality that was subsequently imposed by the totalitarian Soviet state. Its principles were essentially identical to those of Christianity. Only sex within marriage that served the reproductive needs of the family was approved of. All other sexual activity was considered an unhealthy

distraction that prevented people from engaging in more important activities, such as the construction of the new communist society.

*Abortion, which had been allowed in 1920, was banned in Soviet Ukraine in 1936. Thereafter discussion of sexual matters was not allowed in the press or in any public forum. Only the mention of sexual deviants or perpetrators of sex crimes was allowed, and only to highlight their severe punishment. Further studies of sexuality were prohibited, and existing publications dealing with sex were removed from stores and libraries. Even folk customs and rituals with erotic undertones that had been tolerated by the Orthodox church were suppressed.

Given that prior to the clampdown sexual matters had been freely discussed by scholars, in the press, and by society at large, the state's about-face produced a conspicuous gulf between official attitudes and actual sexual mores.

The sociological studies of the 1920s had convincingly proved that under Christian morality society had maintained a certain sexual culture and corresponding mechanisms of socializing new generations. The fairly disparate picture of the sexual life of the time, which portrayed a pursuit of simple human gratification and an absence of spiritual values, indicated not a 'sexual bacchanalia' but a search for new moral directions, the rupture of the old system of double standards, and the transition to liberalized and more egalitarian sexual norms.

The destructive influence of the totalitarian state, begun in the 1930s, continued into the 1980s. The various prohibitions and punishments, the censorship, and the dearth of information about sexuality and its importance resulted in the imposition of an antisexual, repressive morality. The consequences became manifest only when the totalitarian system began crumbling after 1985.

It became obvious that there were practically no mechanisms of socializing youth, in society at large or within the family. Not only sexual education but any information concerning sexuality had been effectively suppressed for decades. Recent sociological sample studies indicate that 33 percent of young people first learn about sex from their peers; 19 percent, from their parents; 17 percent, from literature; 12 percent, from their teachers and doctors; 7 percent, from older siblings; and 3 percent, from casual acquaintances.

In 1983 a course on the 'ethics and psychology of family life' was introduced in Ukraine's primary schools. Similar courses were introduced in pedagogical institutes. Both in content and intent, however, they promoted only a slightly more liberal perspective on the existing repressive morality. The total information ban on sexuality has been replaced by information about gender differences, psychophysiology, and hygiene with the aim of dissuading youth from engaging in adolescent and premarital sex. Homosexuality, pornography, group sex, and contraception are still not discussed. Only information about venereal diseases and the harmful consequences of adolescent sex, abortion, and masturbation has been presented, and sexual restraint and sex solely within the parameters of marriage have been condoned. Sexual love as an important component of human life has been completely ignored, as has a positive attitude toward sexuality.

It is not surprising that such forms of sex education have not attracted or been useful to the young. Adolescent sexuality, which is now manifested at an early age and

much earlier than the capacity or need to form a family, has had no place in recent sex education in Ukraine. The attitudes of young people have consequently been shaped by varied and not always positive information and personal experiences. Their problems and interests have not corresponded to their knowledge and understanding of ethical and psychological issues. Most parents and teachers have approached sexuality from a biological perspective and have had little knowledge about it themselves. They have not recognized that sexuality is more than just relief of physical tension, that it is also an important avenue of self-realization, emotional bonding, and sharing of experiences.

As a consequence the number of adolescent abortions, extramarital births, and abandoned babies has grown, and the average age of those who contract venereal diseases and those forced into marriage by pregnancy has dropped. The repressive model of sexual morality still dominates and has resulted in marital crises. In recent years there have been a marked increase in divorce rates (now almost one in three marriages end after the first year), a reduction in birthrates, greater incidence of marital discord, sexually contracted illnesses, and sterility, and one of the highest abortion rates in the world. In 1925–7 there was an average of 5 abortions per 1,000 women aged 15 to 49. In 1980–8 the average rose to 90 per 1,000.

General attitudes toward sexuality have changed. The taboo of the 'sacredness' of intimacy has been removed. Sex has become the subject of study, therapy, education, and recreation and is now exploited in advertising and business. Sexuality has become a preoccupation of writers and artists. Most of the literature produced, however, has been of little merit and has bordered on the pornographic, because a society that has been saddled with a repressive morality is not immune to fascination with pornography.

A certain breakdown of the stereotypes of sexual conduct generated by totalitarianism has occurred. Social changes and the disintegration of existing forms of social relations have brought about changes in the family and have affected spousal intimacy. Such changes become more acute with the increase in social and psychological tensions and the accelerated deterioration of socio-economic conditions to be found in a society ridding itself of its totalitarian legacy.

Alongside the detrimental changes the progressive historical process of the liberation of women has begun. Monogamy for men was and continues to be only nominal. The secret impetus in the rupture of traditional norms is women's need for sexual equality. That does not mean a blurring of gender roles, but an equality in sexual gratification and the removal of constraints imposed by Christian and communist morality. Whereas previously the fidelity of a wife was viewed as the sine qua non of marital life, now the perception is forming that the wife owes fidelity only if her husband is satisfactory in all respects. Most recent divorces and separations have been initiated by women, and societal opinion has just begun rejecting the condemnation of women who are unfaithful as a result of their dissatisfaction with their husbands.

The new tendencies in heterosexual relations indicate that new principles of sexual morality are being established, which increasingly contradict the prevailing systems of sex education, official morality, and laws governing sexual relations. Today the article of Ukraine's criminal code that has prohibited male homosexuality since

1934 is widely considered an anachronism. Also inconsistent with 'civilized' views on sexual relations is another article of the code, that which stipulates punishment for 'perversions,' such as the intentional prolongation of the sexual act, coitus interruptus, the watching of erotica, erotic fantasies, and other 'morally and socially unacceptable forms of sexual gratification.'

In Ukraine not only the legal aspects of the regulation of sexual relations but also scientific views about the nature of sexuality, its norms, and pathology are out of step with progressive attitudes toward sexual morality and current practices. Although the medico-biological aspects of sexuality were studied during the Soviet period, sexual relations in a wider social and cultural context have essentially been ignored since the 1920s.

Shabatura, Stefaniia [Šabatura, Stefanija], b 6 November 1938 in Ivanie Zolote, Zalishchyky county, Galicia. Textile artist and political prisoner. A graduate of the Lviv Institute of Applied and Decorative Arts, she gained prominence in the 1960s as a tapestry and kilim maker. Her work was displayed at many group exhibitions. Her participation in public campaigns in defense of V. Moroz and other Ukrainian political prisoners resulted in her expulsion from the Union of Artists of Ukraine and her own arrest, imprisonment in a Mordovian labor camp (1972–6), and exile in a Tadzhiik village (1976–9). In the camp she produced over 100 bookplates and over 150 drawings, which were confiscated and destroyed. Toward the end of her exile she joined the *Ukrainian Helsinki Group. In December 1979 she was allowed to return to Lviv, but she was not permitted to exhibit her works until the late 1980s. In 1990 she was elected a member of the Lviv City Council.

Shablenko, Antin [Šablenko], b 17 January 1872 in Sumy, Kharkiv gubernia, d 24 May 1930. Writer. From 1893 he published his work in *Zoria* (1893), *Vil'na Ukraina* (1906), *Ukrains'ka khata*, and *Literaturno-naukovyi vistyky* (1910). His short stories and prose were also published as separate collections, such as *Likhtarnyk* (Lampighter, 1899), *Nova khatyna* (The New Cottage, 1900), and *Za pivdnia* (In Half a Day, 1906). During the Soviet period he belonged to the literary organization *Pluh and contributed to the current press.

Stefaniia Shabatura: *Cassandra* (tapestry)

Yevhen Shabliovskyy

Shabliovskyy, Yevhen [Šabliovs'kyj; Jevhen], b 27 April 1906 in Kamin-Koshyrskyy, Kovel county, Volhynia gubernia, d 10 January 1983 in Kiev. Literary scholar and critic; corresponding member of the AN URSR (now ANU) from 1934. He studied at the Kiev Institute of People's Education until 1931. He specialized in the works of T.

Shevchenko and in 1932 published his first study, *Proletars'ka revoliutsiia i Shevchenko* (The Proletarian Revolution and Shevchenko), which was the first attempt to treat Shevchenko according to official ideology, as a revolutionary democrat and student of the Russian literary critics V. Belinsky and N. Chernyshevsky. For his loyalty to Party policy Shabliovskyy was appointed director of the *Taras Shevchenko Scientific Research Institute (1933–5). His other works on Shevchenko were written in a similar official vein – *T.H. Shevchenko, ioho zhyttia ta tvorchist'* (T.H. Shevchenko: His Life and Works, 1934) and *Shevchenko i rosiis'ka revoliutsiina demokratiia* (Shevchenko and Russian Revolutionary Democracy, 1934). Shortly after his appointment Shabliovskyy was arrested and sent to a prison camp. In 1954 he was released and was rehabilitated, and in 1956 he was reinstated as a corresponding member of the ANU and worked at the Institute of Literature of the ANU. He published several more works on Shevchenko: *Narod i slovo Shevchenka* (The People and the Poetry of Shevchenko, 1961), *Humanizm Shevchenka i nasha suchasnist'* (Shevchenko's Humanism and Our Times, 1964), *Poetychnyi svit Tarasa Shevchenka* (The Poetic World of Taras Shevchenko, 1976), *T.G. Shevchenko i russkie revoliutsionnye demokraty* (T.H. Shevchenko and the Russian Revolutionary Democrats, 1962; in Russian), and others. Shabliovskyy also wrote some works on the theory of *socialist realism, including *Sotsialistychnyi realizm i svitova kul'tura* (Socialist Realism and World Culture, 1973) and *Na peredovykh rubezhakh suchasnosti* (On the Front Line of Contemporaneity, 1975). His literary scholarship is marked by an adherence to official Party policy and an emphasis on the guiding role of Russian literature in the development of Ukrainian literature (as in *Estetyka Chernyshevs'koho i nasha suchasnist'* [The Esthetics of Chernyshevsky and Our Times, 1978] and, in Russian, *Chernyshevskii i Ukraina* [Chernyshevsky and Ukraine, 1978]).

I. Koshelivets

Shad (*Caspialosa*; Ukrainian: *puzanok, ploskun*). A fish of the family Clupeidae, it is among the largest of the herrings, reaching 75 cm in length and 5.5 to 6 kg in weight. In Ukraine shad is found in the Black Sea; it swims up rivers to spawn. It is a valuable commercial fish with good-quality, though bony, meat. Water pollution and damming of rivers have caused the shad population to decrease in recent years.

Shadlun, Mykola [Šadlun], b 6 December 1883 in Vesele, Melitopil county, Tavriia gubernia, d ? Geologist and civic figure. A professor at the St Petersburg Mining Institute, in 1919 he served as UNR minister of the national economy. An émigré in Czechoslovakia, he lectured at the Ukrainian Husbandry Academy in Poděbrady (1922–3) and then returned to the Soviet Union. In the late 1920s he lectured in the mining faculty of the Urals Polytechnical Institute in Sverdlovsk. In Poděbrady he wrote two textbooks, one on crystallography (1922) and the other on mineralogy (1923).

Shafonsky, Opanas [Šafons'kyj], b 13 December 1740 in Sosnytsia, Chernihiv region, d 27 March 1811 in Yaklychi, Sosnytsia county, Chernihiv gubernia. Historian, medical doctor, and government official. From 1750 he studied abroad in Halle (LL D), Leiden (PH D), and Strasbourg (MD,

1763). In 1770 he moved to Moscow, where together with D. Samoilovych and K. Yahelsky he took measures to combat the bubonic plague. With the publication of his description of plagues in Moscow (1774) and his medical typological description of Moscow, Shafonsky established the foundation for the development of *epidemiology in the Russian Empire. In 1781 he returned to Chernihiv, where he served as a court prosecutor, a civil servant, and a general judge. He is best known for his *Chernigovskogo namestrichestva topograficheskoe opisaniie* (A Topographical Description of Chernihiv Vicegerency, 1851), published in Kiev after his death. It contains a wealth of information (based on materials and documents compiled by D. Pashchenko) concerning the history, natural science, economics, demographics, and socioeconomic and sanitary conditions in Left-Bank Ukraine in the late 18th century.

Shafran, Oleksa [Šafran], b and d ? Cossack officer. As a Zaporozhian colonel Shafran distinguished himself in numerous raids against the Turks and Tatars in Turkey and the Crimea. In particular he led a Cossack escape from Balaklava after a seven-year captivity. In 1626 he commanded 400 Cossacks in a successful action against Trabzon and other fortified locations.

Shah. A minor silver coin used in the Polish Commonwealth in the 16th to 18th centuries. It was introduced in 1528; the largest quantity of *shahy* was minted in 1618–24 under Sigismund III. In value the *shah* was equivalent to two kopecks; hence, the two-kopeck copper coin minted in Russia in the 19th century was called a *shah* in Ukraine. In the 19th century the *shah* was devalued to the equivalent of half a kopeck; hence, the half-kopeck silver coin was popularly known as a *shah* in Ukraine. In 1918 the Central Rada established the *shah* as one of its main units of currency: its value was set at a hundredth of a *hryvnia* (or one two-hundredth of a *karbovanets*). It was printed on paper and issued in denominations of 10, 20, 30, 40, and 50.

Stepan Shahaida

Hryhorii Shain

Shahaida, Stepan [Šahajda] (real surname: Shahady), b 9 January 1896 in Biloholovy, Zboriv county, Galicia, d 12 January 1938. Stage and film actor. He first performed in an army drama circle. Then he became a pupil of L. Kurbas and a leading actor in Berezhil (1922–8), particularly in its productions of G. Kaiser's *Gas I* and P. Mérimée's *La*

Jacquerie. Simultaneously he began acting in the Odessa Artistic Film Studio, and from 1928 he worked only in cinema, in which genre he appeared in O. Dovzhenko's *Ivan* and *Aerograd*, F. Lopatynsky's *Karmeliuk*, and other films. He was arrested in late 1937 and executed.

Shain, Hryhorii [Šajn, Hryhorij], b 19 April 1892 in Odessa, d 4 August 1956 in Moscow, buried near Simeiz, in the Crimea. Astrophysicist; full member of the USSR Academy of Sciences from 1939. He served as director of the Crimean Astronomical Observatory from 1942 to 1952. His main areas of interest were astrospectroscopy and the physical processes in nebulae. He is credited with the discovery of the correlation between very fast star rotations and a certain class of spectral characteristics. He discovered over 150 gas nebulae and studied carbon spectral lines in stellar atmospheres, as well as binary stars, comets, stellar corona, and other astronomical phenomena.

Shaitan-Koba. Paleolithic camp site in a grotto on the Bodrak River near Skalyste, Crimea. Excavations in 1929–30 uncovered flint tools, the bones of various wild animals, and other objects.

The Ukrainian edition of William Shakespeare's complete works

Shakespeare, William, baptized 26 April 1564 in Stratford-upon-Avon, d 3 May 1616 in Stratford. His works were first translated into Ukrainian by P. Kulish and M. Starytsky. Other translators of Shakespeare's plays include I. Franko, Yu. Fedkovych, P. Hrabovsky, Ya. Hordynsky, M. Rylsky, I. Kocherha, Yu. Klen, and L. Taniuk. Among the more outstanding translations are T. Osmachka's rendering of *Macbeth* and *Henry IV*, I. Steshenko's *Othello*, H. Kochur's *Hamlet*, M. Lukash's *Two Gentlemen of Verona*, and M. Bazhan's *The Tempest*. Emigré writers who have translated Shakespeare's works include V. Barka, M. Slavinsky, I. Kostetsky, S. Hordynsky, O. Tarnavsky, Ya. Slavutych, and O. Zuiievsky.

The first staging of a Shakespeare play in Ukraine was L. Kurbas's production of *Macbeth* by Kyidramte in 1920, in which Kurbas both directed the play and played the lead role. *Othello* was first staged in 1923 by the Ukrainska Besida Theater in Lviv under the direction of O. Zaharov,

who also played the title role. It was staged again in 1925–6 in Dnipropetrovske, directed by P. Saksahansky, with the lead role played by B. Romanytsky. The Ukrainian premiere of *Hamlet* was staged in Lviv in 1943, directed by Y. Hirniak with V. Blavatsky in the title role. It was subsequently staged in 1956 in Kharkiv with Ya. Helias in the title role. M. Krushelnytsky played the role of King Lear in a production of *King Lear* staged in Kiev in 1959. Of all his plays Shakespeare's comedies *Taming of the Shrew*, *The Merry Wives of Windsor*, and *Much Ado About Nothing* have become most popular in Ukraine and are staged most often.

In addition to individual editions of Shakespeare's works, the following collections of his works in Ukrainian translation have been published: *Vybrani tvory* (Selected Works, 2 vols, 1950, 1952), *Tvory* (Works, 3 vols, 1964, 1969), and the complete *Tvory* (Works, 6 vols, 1983–6). His sonnets were translated and published as a complete collection by I. Kostetsky in 1958 and by D. Palamarchuk in 1964.

I. Koshelivets

Stepan Shakh

Shakh, Stepan [Šax], b 3 January 1891 in Kulykiv, Zhovkva county, Galicia, d 16 September 1978 in Sydney, Australia. Teacher, civic leader, and writer; member of the Shevchenko Scientific Society from 1954. After graduating from Lviv University (1915) he served in the Austrian army and the Ukrainian Galician Army. He taught at the Academic Gymnasium (1920–5 and 1929–32) and served as secretary of the Prosvita society's main branch (1920–32, with interruptions) in Lviv, and directed the gymnasium in Peremyshl (from 1932). A postwar refugee in Germany, he taught in Bavaria (1946–56) and retired before moving to Australia (1978), where he died after his arrival. He wrote a popular history of the Prosvita society (1932), the reminiscences *Lviv, misto moieï molodosty* (Lviv, the City of My Youth, 3 vols, 1955–6) and *Mizh Sianom i Dunaitsem* (Between the Sian and the Dunajec, 1960), and three studies about M. Shashkevych.

Shakhbazian, Haik [Šaxbazjan, Hajk], b 21 January 1896 in Panik, Surmalinskii county, Yerevan gubernia (now in Turkey), d 10 September 1982 in Kiev. Hygienist; corresponding member of the USSR Academy of Medical Sciences from 1957. A graduate of the Kiev Medical Institute (1925), he worked at the Ukrainian Scientific Research Institute of Occupational Hygiene and Diseases in Kiev as a research associate (1939–41) and as its director (1946–52),

and at the Kiev Medical Stomatological Institute (1932–52). From 1952 he was a professor at the Kiev Medical Institute. His publications deal with the effects of low-concentration pollutants on workers and the reclamation of microclimates.

Boris Shakhlin

Shakhlin, Boris [Šaxlin], b 27 January 1937 in Ishim, Tiumen oblast, Russia. Champion gymnast. A member of the Kiev Burevisnyk sports club, he was the overall 1960 Olympic, 1958 world, and 1955 European champion in gymnastics. In 1956 he won Olympic gold medals in the pommel horse and team exercises. In 1960 he captured four Olympic gold medals (combined exercises, horse vault, pommel horse, parallel bars), two silver (rings team), and one bronze (horizontal bar). In 1964 he took one gold (horizontal bar), one silver (combined exercises), and one bronze (rings) Olympic medal. He was also a world champion in 1954 (team exercises) and 1958 (team exercises, combined exercises, pommel horse, parallel bars, horizontal bar) and a European champion in 1955 (combined exercises, horizontal bar, parallel bars, pommel horse) and 1963 (rings and horizontal bar), and he won a total of 19 medals in the USSR championships of 1954, 1957–60, and 1962–4. Since leaving competition he has taught at the Kiev Institute of Physical Culture. He wrote the books *Narodzhennia peremoh* (The Birth of Victories, 1962) and *Moia himnastyka* (My Gymnastics, [1964]).

Shakhmatov, Aleksei [Šaxmatov, Aleksej], b 17 June 1864 in Narva, d 16 August 1920 in Petrograd. Russian Slavist and linguist; from 1897 member of the Russian Academy of Sciences (RAS). After receiving his doctorate from Moscow University (1894) he worked in the Division of Russian Language and Literature of RAS, as head of the division in 1906–20, and as editor of the academy's Russian dictionary in 1897–1907. From 1908 he was a professor at St Petersburg University. He was basically a neogrammarian, although he combined the neogrammarian and philological methods in his historical-linguistic studies. He viewed Ukrainian and Belarusian as the major north and south Russian dialectal groups and examined their origins within the historical framework of the Russian language. Finding little historical evidence for his

theories, Shakhmatov repeatedly changed his views and rejected his previous works.

His views on the origins of Ukrainian changed least: he consistently held that it developed out of the autochthonous 'southern dialect' of the 'common ancient Russian' language. But, he situated its source sometimes between the Prut and lower Dnieper rivers, and at other times farther north, in the middle Dnieper Basin. During the first half of the 20th century, the Shakhmatov school was the most influential linguistic school in Russia and the USSR. It included some Ukrainian linguists, such as V. *Hantsov and, to a degree, L. *Bulakhovsky. Also significant for Ukrainian studies was Shakhmatov's textual criticism of the medieval Rus' chronicles, particularly of the Primary Chronicle, which is known today only from copies from 1377 onwards. He presented a synthesizing survey and a reconstruction of these chronicles in *Razyskaniia o drevneishikh russkikh letopisnykh svodakh* (Research on the Oldest Rus' Chronicle Compilations, 1905-8), *Povest' vremennykh let* (The Tale of Bygone Years, 1916), and *Obozrenie russkikh letopisnykh svodov XIV-XVI vv.* (Survey of 14th- to 16th-Century Rus' Chronicle Compilations, 1938).

His most important publications on the Ukrainian language consist of an article on the dispalatalization of consonants before *e* and *i* (1903), a short survey of the history of Ukrainian in the encyclopedic compendium *Ukrainskii narod v ego proshlom i nastoiashchem* (The Ukrainian People in Its Past and Present, 1916), and detailed reviews of A. Krymsky's and S. Smal-Stotsky's grammars and of the manuscript of B. Hrinchenko's four-volume Ukrainian-Russian dictionary (which made possible its publication). He sat on the RAS committee that recommended the abolition of tsarist restrictions on Ukrainian publications (in 1905-6) and on the commission that verified P. Morachevsky's Ukrainian translation of the Gospel. Shakhmatov's attitude toward Ukrainian was in keeping with his liberal politics and his support of the cultural rights of all the peoples in the Russian Empire. He opposed the empire's dismemberment, however, and after the February Revolution he was a vocal opponent of the Ukrainian independence movement.

G.Y. Shevelov

Shakhovskoi, Aleksandr [Šaxovskoj], b 5 May 1777 on the Bezzabota estate in the Smolensk district, Russia, d 3 February 1846 in Moscow. Russian writer, playwright, and theatrical activist. He is the author of over 100 works for theater, including vaudeville pieces of little artistic value based on Ukrainian life, such as *Aktor u sebia na rodine* (The Actor at Home in His Native Land), *Ukrainskaia nevesta* (The Ukrainian Bride), and, the most widely known, *Kazak-stikhotvorets* (The Cossack Poet), which remained in the repertoire of theaters for over 50 years. P. Hulak-Artemovsky derided the play for its distortion of the Ukrainian language and Ukrainian life, and customs. The journal *Ukrainskii vestnik* published similar criticisms. I. *Kotliarevsky wrote his vaudeville *Moskal'-charivnyk*

(The Muscovite-Sorcerer) as a 'retort' to *Kozak-stikhotvorets*.

Shakhovskoi, Aleksei [Šaxovskoj, Aleksej], b ca 1690, d 1737. Russian imperial official in Ukraine. After being assigned to Hetman D. Apostol (1729-31) Shakhovskoi became head of the *Governing Council of the Hetman Office, which in 1734 appropriated the functions of the hetman. He was ordered secretly by Empress Anna Ivanovna to encourage mixed marriages between Ukrainians and Russians and to prevent contacts of Hetmanate officers with Right-Bank or Belarusian nobles. After reporting conflicts that had arisen with Cossack officers in the governing council Shakhovskoi received further instructions to start a rumor campaign blaming the hetman and his supporters for the taxes, abuses, and sundry ills in the land. He was replaced in 1736 by Prince I. Bariatinsky.

Semen Shakhovsky

Vasyl Shakhrai

Shakhovsky, Semen [Šaxovs'kyj], b 20 May 1909 in Syniakivshchyna (now Bilousivka), Lokhvytsia county, Poltava gubernia, d 16 June 1984 in Lviv. Literary scholar and critic. He graduated from the Kharkiv Institute of People's Education in 1932 and completed postgraduate studies at the Taras Shevchenko Scientific Research Institute in Kharkiv. He was a lecturer in Ukrainian literary history at the Universities of Kharkiv and Lviv and, in his last years, a professor at the Ukrainian Printing Institute in Lviv. He is the author of texts in Ukrainian literary history, including *Istoriia ukrains'koi literatury* (History of Ukrainian Literature, 1951), and a number of monographs about individual writers, such as M. Kotsiubynsky, P. Ty-chyna, V. Stefanyk, Yu. Smolych, and Lesia Ukrainka. He also wrote books on literary theory, including *Literaturni rody i vydy* (Literary Genres and Aspects, 1963), and published numerous critical articles.

Shakhrai, Vasyl [Šaxrai, Vasył'], b 11 February 1888 in Kharkivtsi, Pyriatyn county, Poltava gubernia, d fall 1919 in Katerynodar, Kuban oblast. Bolshevik leader. Upon the outbreak of the 1917 Revolution he quickly established himself as a revolutionary leader in Poltava gubernia. With the other Bolshevik deputies he left the All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies in December 1917 to participate in the First All-

Ukrainian Congress of Soviets, at which he defended Ukraine's right to self-determination and was elected to the Central Executive Committee of Ukraine's Soviets. As people's commissar for military affairs he helped disarm the Haidamaka units supporting the Central Rada and organize Red Cossack detachments in the gubernia. In January 1918 he represented the Soviet government of Ukraine in the Russian delegation to the Brest-Litovsk peace conference. On 16–19 March, at the Second All-Ukrainian Congress of Soviets, Shakhrai was chosen people's commissar for agrarian affairs. He took part in the *Tahanrih Bolshevik Conference of 19–20 April. Under the pseudonym of V. Skorostansky he wrote the booklet *Revolutsiia na Ukraïni* (Revolution in Ukraine, 1918) and, with S. *Mazlakh, *Do khvyli! Shcho diet'sia na Ukraïni i z Ukraïnoi?* (1919; trans, *On the Current Situation in the Ukraine*, 1970). In March both authors were expelled from the Party for criticizing V. Lenin's nationality policy and advocating an independent Ukrainian communist party and state. Shakhrai continued to serve in the Bolshevik underground in Ukraine and Kuban, where he was executed by A. Denikin's troops.

J. Koshiw

Shakhtarske [Šaxtars'ke]. V-19, DB III-4. A city (1989 pop 88,400) and a raion center in Donetsk oblast. It was established in 1953 by the amalgamation of the towns of Oleksiieve-Orlivka (founded 1764), Katyk (founded 1905), and Olkhivchyk (founded 1784). In 1958 Shakhtarske was granted city status. The city has seven coal mines and three coal enrichment plants as well as concrete, asphalt, sewing, and knitwear factories.

Shakhty [Šaxty]. VI-21. A city (1986 pop 223,000) in Rostov oblast, Russia. It originated as the mining settlement of Gornoe Grushevskoe in 1867. In 1881 it became the town of Aleksandrovsk-Grushevskii, and in 1920 it was renamed Shakhty. According to the 1926 census, Ukrainians represented 13.5 percent of the city's and 13.1 percent of the raion's population. In 1928 it was the site of the *Shakhty Trial. Today Shakhty is an industrial and transportation center. Its main industries are cotton-fabrics manufacturing, sewing, and coal mining.

Shakhty Trial. The first major show trial in the USSR. In March 1928, in the raion center of Shakhty in the Donbas, 53 mining engineers and technicians were arrested by the Unified State Political Administration (OGPU) and accused of organizing mine accidents, engaging in industrial wrecking and sabotage, maintaining criminal links with former mine proprietors in the West, and belonging from 1922 to a counterrevolutionary organization funded and directed by a 'Paris center.' They were tried at the USSR Supreme Court in Moscow between 18 May and 6 July 1928. The presiding judge was the future USSR general procurator and foreign minister A. Vyshinsky, and the prosecutor was the future RFSR and USSR people's commissar of justice, N. Krylenko. The court gave 4 acquittals, 4 suspended sentences, 34 imprisonment sentences of 1 to 10 years, and 11 death sentences. To demonstrate the 'humaneness' of Soviet justice 6 death sentences were commuted to imprisonment from 6 to 10 years. The Stalinist regime used the trial to lay the blame for the failure of its industrialization policies on 'bourgeois specialists' and foreign-capitalist-inspired conspiracies. The trial opened the Party's general

offensive against internal opponents, both real and imagined, particularly in Soviet Ukraine (see *Purges and *Terror). The methods of extracting false confessions that proved effective in this case were used in subsequent show trials.

B. Krawchenko

Shalaputy. See Khlysts.

Shalashnikov, Aleksandr [Šalašnikov], b 1857 in Berezovo, Tobolsk gubernia, Russia, d 11 March 1890 in Kharkiv. Microbiologist and parasitologist. A graduate of the Kharkiv Veterinary Institute (1882, 1886), he worked with V. Danylevsky in its physiology department and as head of its bacteriology laboratory (from 1887). Together with L. Tsenkovsky he developed the first anthrax vaccine in the Russian Empire and distributed it in Ukraine.

Shalia, Ivan [Šalja], b 9 April 1893 in Baryshivka, Pereiaslav county, Poltava gubernia, d ? Linguist. A graduate of Petrograd University (1916), he was a school inspector in Pereiaslav and Kiev and a lecturer at the Kiev (1920–6) and Kuban (1926–33) pedagogical institutes. With P. Horetsky he cowrote the best and most widely used Ukrainian language textbook of the 1920s (8 edns, 1926–9). When Ukrainian institutions in the Kuban were shut down in 1933, he was arrested; he probably perished in a concentration camp.

Oleksander Shalimov

Shalimov, Oleksander [Šalimov], 20 January 1918 in Vvedenka, Lipetsk county, Tambov gubernia, Russia. Surgeon; full member of the AN URSS (now ANU) from 1978. A graduate of the Kuban Medical Institute (1941), from 1959 to 1970 he worked in Kharkiv as a leading surgeon in hospitals and research institutions. He was appointed a department head at the Kiev Institute for the Upgrading of Physicians (1970) and director of the Kiev Scientific Research Institute of Clinical and Experimental Surgery (1972). He introduced new surgical procedures in the treatment of gastroenterological and vascular diseases. The first pancreas transplants in Ukraine were performed under his supervision.

Shalimatov, Sysoi [Šalimatov, Sysoj], b ? in Ostashkov, Tver gubernia, Russia, d ? Wood carver and sculptor. In 1752 he moved to Okhtyrka, in Slobidska Ukraine, and set up his own workshop, at which he carved iconostases for

Sysoi Shalmatov: the iconostasis in the cathedral of the Mhar Transfiguration Monastery

the churches of the Okhtyrka (1755–60), Mhar (1762–5), Lokhvytsia (1765–70), and Poltava (1772) monasteries. His finest works were the iconostasis and wooden statues commissioned by Otaman P. Kalnyshevsky for the Church of the Holy Protectress in Romen (1768–75). The statues for the Catholic church in Chopovychi, near Malyn, in the Kiev region, were also carved by Shalmatov, in 1774–5.

Shamo, Ihor [Šamo], b 21 February 1925 in Kiev, d 16 August 1982 in Kiev. Composer. He studied composition with B. Liatoshynsky and graduated from the Kiev Con-

Ihor Shamo

Ahapii Shamrai

servatory in 1951. His works include the cantatas *Duma pro tr'okh vitriv* (Duma about Three Winds, 1948) and *Spi-va Ukraïna* (Ukraine Is Singing, 1961); 3 symphonies (1964, 1967, 1975); concertos for flute with orchestra; chamber pieces; film scores; and more than 300 solo songs, including 'Kyieve mii' (My Kiev), 'Ne shumy kalynon'ko' (Don't Rustle, Vibernum), and 'Try porady' (Three Admonitions). He has a lyrical style and is best known for his popular songs.

Shamota, Mykola [Šamota], b 17 December 1916 in Poltava, d 4 January 1984 in Kiev. Literary scholar, publicist, and Communist party functionary. He graduated from the Nizhen Pedagogical Institute in 1939 and studied at the Academy of Social Sciences of the Central Committee of the CPSU. He was a full member of the AN URSS (now ANU) and director of its Institute of Literature (1961–78). He specialized in the theory of *socialist realism. His works include *Ideinist' i maïsternist'* (Idealism and Mastery, 1953), *Pro khudozhnist'* (About Artistic Work, 1957), *Talant i narod* (Talent and the People, 1958), *Pro svobodu tvorchoosti* (About Creative Freedom, 1973), and *Humanizm i sotsialistychnyi realizm* (Humanism and Socialist Realism, 1976). Shamota was the spokesman of L. Brezhnev's policy of Russification. After N. Khrushchev's thaw he used his position as director of the Institute of Literature to suppress the renaissance in literature engendered by the **shestydesiatnyky*. He vociferously opposed deviations from the Party line and rehabilitations of proscribed authors. After the announcement of the new policy of Glasnost Shamota's works were harshly criticized as examples of ideological dogmatism.

Shamov, Vladimir [Šamov], b 3 June 1882 in Menzelsinsk, Ufa gubernia, Russia, d 30 March 1962 in Leningrad. Russian surgeon; full member of the USSR Academy of Medical Sciences from 1945. A graduate of the St Petersburg Military-Medical Academy (1908), he worked in Kharkiv as director of the surgery department at the Kharkiv Medical Institute (1923–39), the surgical clinic at the All-Ukrainian Institute of Experimental Medicine, the Kharkiv Oblast Clinical Hospital, and the Ukrainian Central Institute for Blood Transfusion (1930–9). He wrote numerous scientific works on blood transfusion, anesthesia, tissue and organ transplantation, neurosurgery, urology, and oncology.

Shamrai, Ahapii [Šamraj, Ahapij], b 2 October 1896 in Myopillia, Sudzha county, Kursk gubernia, d 7 April 1952 in Kiev. Literary scholar and critic. He graduated from Kharkiv University in 1921 and then taught Ukrainian literary history at the Kharkiv Institute of People's Education and contributed to the work of the Taras Shevchenko Scientific Research Institute in Kharkiv. He lived in internal exile in 1933–44 and headed chairs of Western European literature in Izhevsk, Ferhan, and Perm. In 1944 he returned to Ukraine and was a professor at Kiev University. He was one of the leading representatives of the new school in literary studies. He wrote a study of Ukrainian literary history, *Ukraïns'ka literatura: Styshlyi ohliad* (Ukrainian Literature: A Concise Survey, 1927, 1928); edited *Kharkivs'ki poety 30–40-ykh rokiv XIX stolittia* (Kharkiv Poets of the 1830s and 1840s, 1930); and wrote a study of Ukrainian romanticism, *Pershyi tvir novoi' ukraïns'koi literatury* (The First Work of the New Ukrainian

Literature, 1951), and the posthumously published *Natalka Poltavka I. Kotliarevs'koho* (I. Kotliarevsky's 'Natalka Poltavka,' 1955). He also wrote studies of the works of H. Kvitka-Osnovianenko, M. Kotsiubynsky, T. Shevchenko, O. Storozhenko, and S. Vasylychenko. Western writers whose works he examined include W. Shakespeare, V. Hugo, and E.T.A. Hoffman. A selection of his works was published posthumously, *Vybrani statyi i doslidzhennia* (Selected Articles and Studies, 1963).

I. Koshelivets

Shamrai, Hanna [Šamraj], b 4 April 1869, d 7 August 1943 in Kiev. Historian and translator; mother of S. Shamrai and sister of M. and O. Hrushevsky. Until the early 1930s she was an associate of the VUAN and published in its collections and periodicals (1924–9) studies dealing with the urban history of Left-Bank Ukraine in the 17th and 18th centuries and articles on A. Soltanovsky's stories and on P. Kulish's literary plans in the 1870s.

Serhii Shamrai

Gen Pavlo Shandruk

Shamrai, Serhii [Šamraj, Serhij] (Shamraiev), b 30 August 1900 in Vladikavkaz, Terek oblast, d 27 January 1939. Historian. He graduated from the Kiev Institute of People's Education. From 1924 he worked for the VUAN Historical-Geographical Commission and the Kiev Scientific Research Chair of Ukraine's History. He specialized in the socioeconomic history of 18th- and 19th-century Ukraine; his major work was *Kyïvs'ka kozachchyna 1855 r.* (The Kiev Cossacks of 1855, 1928). Many of his studies were published in the *Zapysky* of the historical-philological division of the VUAN and in the journal *Ukraina*. He was arrested in 1932 and 1937 for his association with M. *Hrushevsky, his uncle, and died in a labor camp. A bibliography of Shamrai's works was compiled by S. Bilokin (1985).

Shandor, Vikentii [Šandor, Vikentij], b 12 October 1907 in Baranyntsi, Transcarpathia. Civic and political activist. After graduating from the Mukachiv Trade Academy (1927) he worked at the Subcarpathian Bank, studied law at Prague University (1930–5), and served at the Land Bank in Bratislava (1935–45). In 1938–9 he was the official representative of the government of Carpatho-Ukraine to the Czechoslovak government in Prague. After emigrating to the United States in 1947, he helped found the Carpathian Alliance, which he headed for many years, and worked as executive director of the secretariat of the Pan-

American Ukrainian Conference. In 1985 he was elected vice-chairman of the executive of the Ukrainian National Council. He has written many articles on legal and political issues, particularly in relation to Transcarpathia.

Shandro, Andrew [Šandro, Andrij], b 3 April 1886 in Ruskyi Banyliv, Vyzhnytsia county, Bukovyna, d 14 January 1942 in Edmonton. Politician and community leader. Shandro came to Canada with his parents in 1898. He was elected to the Alberta legislature in 1913 as a Liberal in the Whitford constituency, the first Ukrainian to occupy such a post in Canada. His first election was overturned by the courts, but he won the subsequent by-election. A Russophile in ideology, he supported the Alberta Liberal party's anti-Ukrainian position on the bilingual school question in 1913–14.

Shandruk, Pavlo [Šandruk], b 28 February 1889 in Borsuky, Kremianets county, Volhynia, d 15 February 1979 in Trenton, New Jersey. Senior UNR Army officer; full member of the Shevchenko Scientific Society from 1948. A graduate of the Aleksei Military School in Moscow (1913), he was commissioned in the Russian army and commanded a company and a battalion during the First World War. He joined the UNR Army in February 1918 and held a variety of positions: commander of an armored train of the Zaporozhian Corps (1918), battalion commander (1919), commander of the Ninth Infantry Regiment of the Third Iron Rifle Division (1919), commander of the First Recruit Regiment (1919), and commander of the Seventh Infantry Brigade of the Third Iron Rifle Division (1920). While serving under contract in the Polish army (1936–9) he graduated from the General Staff Academy (1938) and was promoted to lieutenant colonel and to colonel.

After being released from a German POW camp at the end of 1944, he chaired the *Ukrainian National Committee. In March 1945 the UNR government-in-exile appointed him commander in chief of the Ukrainian National Army (UNA). At the end of the war, during May 1945, he tried to save UNA units from capture by the Red Army. After the war he emigrated from Germany to the United States, where he continued to be active in veterans' organizations and in the UNR government-in-exile. He was promoted to major general and elected honorary commander of the Free Cossacks. Shandruk was the editor of *Ukrains'kosmoskovska viina v 1920 r. v dokumentakh* (The Ukrainian-Russian War in 1920 in Documents, 1933) and the author of *Arms of Valor* (1959).

P. Sodol

Shanghai. A major city (1988 pop 7,220,000) in eastern *China, on the East China Sea coast along the Yangtze River. It is a major industrial and commercial center, a seaport, and a railway and truck terminal. In the 1930s and 1940s about 4,000 Ukrainians lived in Shanghai; it was the second-largest center of Ukrainian life in China after *Harbin.

Ukrainians began to settle in Shanghai in the early part of the century. A Ukrainian Hromada, consisting of merchants and office workers of local Russian institutions, was soon established, and in 1905 it donated 400 rubles to a fund in St Petersburg for publishing the Gospel in Ukrainian. In the 1920s refugees from the Far East and Siberia and, eventually, Manchuria settled in Shanghai. They

formed the Shanghai Hromada, which had about 250 members in 1938 and was active until 1949. Its leading members were M. Kvashenko, B. Vobly, and M. Milko. On its initiative the Ukrainian Emigration Committee was founded in Shanghai in 1939. The committee was recognized by the Japanese military mission, which governed Shanghai under the Japanese occupation in 1937–45, as an official institution for aiding Ukrainians (as well as Georgians and Turko-Tatars). On its initiative the Ukrainian National Colony in Shanghai was set up in 1941. The colony's leading members were P. Boiko-Sokolsky, O. Vitkovsky, H. Totsky, H. Snizhny, and O. Drobiazko. In 1942 the committee was renamed the Ukrainian Representative Committee. That same year a Ukrainian National Committee headed by Drobiazko became active.

The Ukrainians in Shanghai had their own press: in 1937 two issues of *Shankhais'ka hromada* appeared, followed by the paper *Ukrains'kyi holos na Dalekomu Skhodi* (1941–4, ed Milko, Drobiazko, and I. Svit). At the same time S. Vasyliiv and Svit edited *Call of the Ukraine* (1941–2, seven issues), to which Milko and R. Korda contributed articles. In 1941–2 a Ukrainian radio program served the residents of Shanghai.

Before Communist troops took Shanghai in 1949, most of its Ukrainian residents managed to emigrate to Argentina, the United States, or Canada.

A. Zhukovsky

Shan-Koba. A Mesolithic–Neolithic cave site near the Chorna River in southwestern Crimea. Excavations in 1928 and in 1935–6 revealed six distinct occupations. Items from the lower strata consisted of flint tools and wild animal bones. Thick-walled pottery fragments were discovered in the uppermost strata.

Shankovsky, Amvrosii [Šankovs'kyj, Amvrosij] (pen names: Perekonos, Hermohen, Ponomarev Hermohen, Starshyi sviashchenyk), b December 1832 in Lopatyn, Zolochiv circle, Galicia, d 7 May 1906 in Chernivtsi, Bukovyna. Greek Catholic priest, civic leader, and publicist. After completing his theological education in Vienna and Lviv (1856) he taught secondary school in Stanyslaviv, Kolomyia, and Chernivtsi and contributed numerous poems, short stories, humorous sketches, and articles under various initials and pseudonyms to papers such as *Holos narodnyi* (1866), *Hazeta shkol'na* (1875), *Rodimyj listok* (1880), and *Halytskaia Rus'* (1891–2). He translated German-language textbooks and revised them for the use of Ukrainian students (1879–86). His recollections, published in *Rodimyj listok* (1880–3), are a valuable source for Galician history of the 1840s.

Shankovsky, Lev [Šankovs'kyj], b 9 September 1903 in Duliby, Stryi county, Galicia. Military historian; member of the Shevchenko Scientific Society. After completing studies in Lviv and Warsaw he taught commerce in secondary schools in Western Ukraine and Poland. A veteran of the Ukrainian Galician Army and the UNR army, he was a sergeant in the UPA (1942–5) and a founding member of the Ukrainian Supreme Liberation Council. As a postwar refugee in Germany he taught at the Ukrainian Economic Institute in Munich (1946–9); he then moved to the United States, where he worked as a librarian and edited the English-language quarterly *Prologue* (1957–61) and the

Lev Shankovsky

Vladimir Shaposhnikov

newspaper *Ameryka* (1968–76). Many of Shankovsky's writings have dealt with the Ukrainian struggle for independence, in particular the role of military forces in those efforts. He has written *Ukrains'ka armiiia v borot'bi za derzhavnist'* (The Ukrainian Army in the Struggle for Statehood, 1958) and *Pokhidni hrupy OUN* (The OUN Expeditionary Groups, 1958) and contributed to *Istoriia ukrains'koho viis'ka* (History of the Ukrainian Army, 1936; 2nd rev edn 1953), *Entsyklopediia ukrainoznavstva*, and *Encyclopedia of Ukraine*.

Shaparenko, Oleksandr [Šaparenko], b 16 February 1946 in Stepanivka, now in Sumy raion. Champion canoeist. As a member of USSR teams he was the 1966 world champion in the men's 1,000-m kayak singles and pairs (with Yu. Stetsenko), the 1967 European championship in the 1,000-m kayak singles, the Olympic gold medalist in the 1968 1,000-m kayak pairs (with V. Morozov) and the 1972 1,000-m kayak singles, the 1969 European champion in the 1,000-m kayak singles and pairs, the world champion in the 1,000-m singles in 1970 and 1973 and 10,000-m kayak fours in 1977 and 1978, and the USSR champion 18 times in the years 1967–9 and 1971–9.

Shaposhnikov, Vladimir [Šapošnikov], b 6 June 1870 in Volsk, Saratov gubernia, Russia, d 3 October 1952 in Kiev. Organic chemist and technologist; VUAN/AN USSR (now ANU) full member from 1922. A graduate of the St Petersburg Technological Institute (1893), he worked there (to 1900), taught and directed a department at the Kiev Polytechnical Institute (1900–22), directed a department and the technological laboratory at the Kiev Commercial Institute (1913–20) and Institute of the National Economy (1920–34), and directed the ANU Institute of Chemical Technology (1934–8) and a department at the ANU Institute of Organic Chemistry (1938–41). His research dealt mainly with the technology of fibrous materials and the chemistry of dyes. He studied the problems of color, structure, and tautomerism in dyes and introduced a new method of azophenine synthesis. He wrote over 150 works, including a six-volume study of Soviet cotton (1932–3), and edited *Zbirnyk Instytutu khimichnoi tekhnologii* (12 issues, 1936–41).

Shaposhnykov, Volodymyr [Šapošnykov], b 1949 in Kharkiv. Architect and painter. A graduate of the Kharkiv Civil-Engineering Institute (1976), he worked as an architect for two years and then turned to 'magic realist' painting. In his large and ambitious *Small Kharkiv Poliptych* (1987) Shaposhnykov attempted to paint a secular iconostasis. His painting *Night* (1986), created after the Chernobyl nuclear accident, depicts a frontal figure with radiation streaming from its darkened body. Shaposhnykov has exhibited in Kharkiv (1988) and Leningrad.

Shapoval, Ivan [Šapoval], b 4 January 1905 in Harazhivka, now in Blyzniuky raion, Kharkiv oblast. Writer and pedagogue. He completed studies at the Dnipropetrovske Metallurgical Institute (1938) and until 1970 was a docent at the Dnipropetrovske Mining Institute. He achieved great popularity as a writer with his fictionalized biography of D. Yavornytsky, *V poshukakh skarbiu* (In Search of Treasures, 1963; repub 1983), after the publication of which he became active in the movement to revive Ukrainian culture. His other works include *Stezhkamy nezvidanymy* (Along Unfamiliar Paths, 1966), *Shyroki kryla* (Broad Wings, 1969), *Akademik O.P. Chekmar'ov* (Academician Chekmarov, 1971), *Volodymyr Maiakov's'kyi* (1974), and *Prydnyprovs'ki dzherela* (Dnieper Springs, 1982).

Shapoval, Ivan [Šapoval], b 26 January 1909 in Pavlivshchyna, Zolotonosha county, Poltava gubernia. Sculptor. A graduate of the Odessa (1934) and Kiev State (1941) art institutes, he taught at the latter from 1944. He has done marble portraits of Soviet figures, such as M. Strazhesko (1946) and P. Tychyna (1949), and several monuments, including one to V. Chubar in Kiev (1967–70).

Gen Mykola Shapoval

Mykyta Shapoval

Shapoval, Mykola [Šapoval], b 17 December 1886 in Sriblianka, Bakhmut county, Katerynoslav gubernia, d 25 June 1948 in Seloncourt, Doubs, France. Military and political figure; brother and political supporter of Mykyta *Shapoval. A Russian army officer from 1910, in 1915 he was wounded and captured at the East Prussian front. In a POW camp at Rastatt he founded the Zaporizka Sich cultural and educational society. After his release he organized and headed the Ukrainian Hromada in Biała Podlaska (1916–17), published the paper *Ridne slovo* there, and worked for the *Union for the Liberation of Ukraine. In 1918 he helped organize the *Bluecoats division of the UNR Army and was colonel of its First Zaporozhian Regi-

ment until late April. Under the UNR Directory, in 1919 he commanded the Seventh Infantry Division and the Podilian Group, which later became part of the Third Iron Rifle Division. He then commanded the UNR cadet schools in Kamianets-Podilskyi, Jasło, and Stanyslaviv, where he was promoted to the rank of general. In November 1920 Shapoval and his cadets were demobilized and sent to Polish internment camps in Łańcut and Kalisz. In 1923 he fled Polish persecution to Prague, and from September 1924 he lived in Paris. From 1929 he headed the 2,000-member *Ukrainian Hromada in France and edited its organs, *Vistnyk* (1929–37) and *Ukrains'ka volia* (1938–40), in Paris. A committed democratic-socialist and antifascist publicist, he was imprisoned by the Gestapo in 1940–1, and from October 1942 until the Allied liberation of France he was forbidden to live in Paris or to have contact with Ukrainians. Shapoval wrote many political articles and a book on the problems of democracy in T. Masaryk's works, in addition to translating R. Rolland's *Le Jeu de l'amour et de la mort* into Ukrainian. He is buried in Sochaux, France.

Shapoval, Mykola [Šapoval], b 15 June 1919 in Persha Bahachka, Myrhorod county, Poltava gubernia, d 22 March 1982 in Kharkiv. Writer and journalist. He graduated from Uzhhorod University (1950) and from 1947 on published nine poetry collections, several children's poetry books, the novels *Idu do liudei* (I Am Going to the People, 1967) and *Ostannii postril* (The Last Shot, 1977), and the prose collections *Oliana* (1958), *Movchazna liubov* (Silent Love, 1960), *Nad Pslom nebo vysoke* (Over the Psalms of the Heavens Are High, 1962), *Vesna pochynalas' u veresni* (Spring Began in September, 1963), *Nichna vtecha* (Night Escape, 1963), *Troie, de vy?* (Threesome, Where Are You?, 1964), *lasnyi khlib* (Light Bread, 1969), *Neimovirna pravda* (Unbelievable Truth, 1972), *Veresnevi zlyvy* (September Downpours, 1973), *Hulkyi step* (The Humming Steppe, 1974), *Moiei radosti teplo* (The Warmth of My Happiness, 1976), and *Pole v obiimakh* (The Field in an Embrace, 1977).

Shapoval, Mykyta [Šapoval] (pseud: M. Sribliansky, M. Butenko), b 8 June 1882 in Sriblianka, Bakhmut county, Katerynoslav gubernia, d 25 February 1932 in Rževnyca, near Prague. Political and civic leader and publicist; brother of Mykola *Shapoval. He was a forester by profession. He joined the Revolutionary Ukrainian party in 1901 and became coeditor of the journal **Ukrains'ka khata* (1909–14), as well as a co-organizer of the Ukrainian Party of Socialist Revolutionaries (UPSR) and leader of its CC. He was a member of the Central Rada and Little Rada (1917–18) and became the postal and telegraph minister after the Third Universal (November 1917). He assisted in the drafting of the Fourth Universal and served as the commissioner of Kiev county. After the fourth congress of the UPSR (12 May 1918) he became a member of its 'central current' faction. During the rule of the Hetman government Shapoval was general secretary and then head of the *Ukrainian National Union (14 November 1918 to January 1919). He was a co-organizer of the rebellion against the Hetman government (November 1918) and then minister of lands in the Directory (December 1918 to February 1919). In February 1919 he moved to Galicia, but the Western Ukrainian National Republic would not grant him residency owing to his revolutionary political views.

Shapoval then lived in Budapest, where he was secretary of the UNR diplomatic mission (1919–20), and in Prague, where (with the support of T. Masaryk) he came to play an important role in Ukrainian community life. He headed the *Ukrainian Civic Committee (1921–5) and was instrumental in founding Ukrainian institutions of higher education in Prague and the Ukrainian Husbandry Academy in Poděbrady, the Ukrainian Higher Pedagogical Institute, and the All-Ukrainian Workers' Union in Czechoslovakia. He headed the *Ukrainian Institute of Sociology in Prague and the affiliated Ukrainian Workers' University, and he published and edited the monthly **Nova Ukraina* (1922–8). He also headed the émigré UPSR, which criticized the actions of the UPSR Foreign Delegation in Vienna, and strongly opposed the Government-in-exile of the UNR.

Shapoval wrote over 50 publicistic works, including *Revoliutsiyni sotsiializm na Ukraïni* (Revolutionary Socialism in Ukraine, 1921), *Misto i selo* (The Town and the Village, 1926), *Mizhnatsional'ne stanovyshe ukrains'koho narodu* (The International Status of the Ukrainian People, 1934), *Velyka revoliutsiia i ukrains'ka vyzvol'na prohrama* (The Great Revolution and the Ukrainian Liberation Agenda, 1927), *Liakhomaniia* (Polonophilism, 1931), *Shchodennyk* (Diary [from 22 January 1919 to 22 February 1932], 2 vols, 1958), and *Het'manshchyna i Dyrektoriia* (The Hetman Government and the Directory, 1958); much of his work remained unpublished. He also wrote the poetry collections *Sny viry* (Dreams of Faith, 1908) and *Samotnist'* (Loneliness, 1910) and the short prose works *Zhertvy hromads'koi baiduzhosty* (The Victims of Community Apathy, 1910), *Shevchenko i samostiinist' Ukraïny* (Shevchenko and the Independence of Ukraine, 1917), and *Lysty z lisu* (Letters from the Wood, 1918). A biography of Shapoval was written by B. Homzyn (1932), and his autobiography was edited by S. Zerkal (1956).

A. Zhukovsky

Col Oleksander Shapoval

Archbishop Nestor
Sharaievsky

Shapoval, Oleksander [Šapoval], b 1888, d 1972 in Chicago. Military leader. He served as an officer in the UNR Army, in which he commanded the Khmelnytsky Regiment (1917), and took part in the overthrow of the Hetman government in 1918. Under the Directory he commanded the UNR Army's Right-Bank front against the Bolsheviks,

and on 13 February 1919 he became defense minister in S. Ostapenko's cabinet. Eventually he left the Ukrainian Party of Socialists-Independents and joined the hetmanite movement. After emigrating to Prague he managed the library of the Ukrainian Higher Pedagogical Institute. In 1927 he settled in the United States, where he was appointed supreme otaman of the United Hetman Organization and editor of its organ **Nash stiah*.

Shapovalenko, Ivan [Šapovalenko], b 1820 in Mykolaivka, Hadiache county, Poltava gubernia, d 15 July 1890 in Duvan, Trans-Baikal oblast, Russia. Painter. A serf owned by P. Kapnist, he was granted freedom in 1836 while serving Kapnist in Naples. Having received a stipend from the Russian Committee for the Support of Artists he studied under R. Dauria in Naples and A. Ivanov in Rome. With the support of N. Gogol and H. Galagan he was able to remain in Rome. There he copied works by Raphael and other Italian masters. From 1845 he worked in the mosaic workshop of St Luke's Academy in Rome, which trained mosaicists for St Isaac's Cathedral in St Petersburg. From 1851 to 1862 he worked as a master in the mosaic department of the St Petersburg Academy of Arts. His extant works include *Portrait of a Neapolitan Woman* (1851) and copies of two mosaic floors from the ancient baths of Otricoli, near Rome.

Sharaievsky, Nestor [Šarajevs'kyj], b 1865 in the Chyhyryn region, d 29 October 1929 in Kiev. Archbishop of the Ukrainian Autocephalous Orthodox church (UAOC). A graduate of the Kiev Theological Academy (1890), he was ordained in 1891 and then taught law in gymnasiums in Vinnytsia. During the period of Ukrainian statehood he was delegate from the Ukrainian clergy to the Central Rada. With V. Lypkivsky he campaigned for the Ukrainianization of the Orthodox church in Ukraine and the creation of the UAOC. In 1921 he was consecrated archbishop of Kiev and elected vice-metropolitan. He also served on the presidium of the All-Ukrainian Orthodox Church Council and headed the UAOC commission for translating liturgical texts into Ukrainian. He is the only bishop of the UAOC who died a natural death. He is buried in Kiev.

Isydor Sharanevych

Sharanevych, Isydor [Šaranevyč], b 16 February 1829 in Kozara, Stryi circle, Galicia, d 4 December 1901 in Lviv. Historian and civic leader. After being educated in Lviv and Vienna he taught at gymnasiums in Peremyshl and Lviv and at Lviv University (from 1871). His valuable work in the field of Galician history was published in *Is-*

torii Galitsko-Volodimirskoi Rusi (History of Galician-Volodymyrian Rus', 1863), *Rys wewnętrzných stosunków Galicji Wschodniej w drugiej połowie XV w.* (Outline of the Internal Conditions of Eastern Galicia in the Second Half of the 15th Century, 1869), and *Die Hypatios-Chronik als Quellen-Beitrag zur österreichischen Geschichte* (1872, based on his doctoral dissertation). In the field of church history he wrote *Rzut oka na beneficja Kościoła ruskiego za czasów Rzeczypospolitej Polskiej* (A Glance at the Benefices of the Ruthenian Church during the Time of the Polish Commonwealth, 1875; rev edn 1902 under a different title) and works on the Stauropigion brotherhood and Ukrainian church figures. He also undertook archeological expeditions and worked to preserve historical monuments in Galicia. Sharanevych was a longtime elder of the Stauropigion Institute and the only lay participant in the Lviv Synod of 1891. Somewhat Russophile in his orientation, he wrote many of his studies in the artificial *yazychiie. Biographies of him were written by M. Hrushevsky (*ZNTSh*, 1902) and M. Kravets (*Arkhivy Ukraïny*, 1969).

Sharhei, Oleksander. See Kondratiuk, Yurii.

St Nicholas's Monastery in Sharhorod

Sharhorod [Šarhorod]. v-9. A town smt (1986 pop 5,000) on the Murashka River and a raion center in Vinnytsia oblast. In 1383 Grand Duke Vytautas granted the site to his servant V. Karachevsky, who established the settlement of Kniazhna Luka. In 1497 it was renamed Karacheva Pustynia. In 1579 J. Zamoyski renamed it Sharhorod and built a fortress there. In 1588 the town obtained the rights of *Magdeburg law. It participated in the anti-Polish revolts led by K. Kosynsky and S. Nalyvaiko. In 1626 an Orthodox brotherhood was founded there. During B. Khmelnytsky's uprising Sharhorod was captured by M. Kryvonis and assigned to Bratslav regiment. It was surrendered to Poland under the Treaty of Andrusovo in 1667. In 1672–99 the town was occupied by the Turks, who called it Küçük Stambul (Little Stambul). In 1734 Capt Verlan led a haidamaka revolt from Sharhorod. After the partition of Poland in 1793, Sharhorod was transferred to Russia and became part of Mohyliv county in Podilia gubernia. Its Basilian monastery (est 1717) was converted to an Orthodox one. Today the town has a food industry. Its

architectural monuments include the ruins of the old fortress, a synagogue (1589), a church (1595), and some residential buildings from the 18th and 19th centuries.

Sharko, Vadym [Šarko], b 14 April 1882 in Kiev, d 1930? Political activist. A mathematician by profession, he lectured at the Kiev Co-operative Institute and worked at the VUAN Institute of the Ukrainian Scientific Language on the development of mathematical terminology. He was arrested and imprisoned in 1930 as a member of the *Union for the Liberation of Ukraine; his further fate is unknown.

Oleksander Sharkovsky

Yelysaveta Shasharovska-Chepil

Sharkovsky, Oleksander [Šarkovs'kyj], b 7 December 1936 in Kiev. Mathematician; corresponding member of the AN URSR (now ANU) since 1978. A graduate of Kiev University (1958), he has worked at the ANU Institute of Mathematics since 1961 and at Kiev University since 1967. His main publications deal with the theory of dynamical systems, theories of stability and oscillations, and the development of qualitative and analytical methods in the theory of functional and functional-differential equations (and the same equations with delay). He developed a celebrated theorem on continuous functions in 1964, which attracted attention in the mid-1970s after a new and surprising theorem proven by S. Lie and J. Yorke was shown to be a special case of Sharkovsky's general scheme. He has also made contributions to difference equations and their application.

Sharleman, Mykola [Šarleman'] (Charlemagne), b 12 February 1887 in Kremenchuk, Poltava gubernia, d 1970. Zoologist; member of the Shevchenko Scientific Society from 1929. He worked at the AN URSR (now ANU) Institute of Zoology (1919–41) and was one of the founders of its museum. A specialist in zoogeography and ornithology, he wrote *Slovnnyk zoolohichnoi nomenklatury* (A Dictionary of Zoological Nomenclature, 2 vols, 1927), *Ptakhly Ukraïny* (The Birds of Ukraine, 1938), and a monograph about **Slovo o polku Ihorevi* as a source for the natural history of Kievan Rus'.

Sharonov, Mikhail [Šaronov, Mixail], b 30 October 1881 in Belgorod, Kursk gubernia, Russia, d 30 December

1957 in Kiev. Painter. A graduate of the Moscow School of Painting, Sculpture, and Architecture (1910), he studied at the St Petersburg Academy of Arts (1911–15). In the Soviet period he taught at the Kharkiv (1925–35) and Kiev State (1935–57) art institutes. He painted socialist-realist canvases, such as *Red Army Commander* (1928) and *On Patrol* (1930), and portraits of writers such as M. Rylsky, I. Kocherha, and M. Stelmakh (all in 1942–3).

Sharovolsky, Ivan [Šarovol's'kyj], b 16 June 1876 in Prokhorivka, Zolotonosha county, Poltava gubernia, d 9 July 1954 in Prokhorivka. Philologist and translator. A graduate of Kiev University (1900), he became a professor there in 1908. The author of a Russian history of Western European medieval literature (1909), in the late 1920s he wrote articles on German and Rumanian loanwords in the Ukrainian language and on the Rumanian origin of the Ukrainian future-tense verb ending *-mu*. He was also chief editor of two German-Ukrainian dictionaries (1929; 1948, 2nd edn 1955) and translated into Ukrainian T. More's *Utopia*.

Sharpivka fortified settlement. A Scythian town of the 6th to 4th century BC near Pastyrsk, Smila raion Cherkasy oblast. The settlement was protected by its location on a ravine and by walls and moats. Excavations in 1938–40 and 1945–7 uncovered the remains of wood-frame surface dwellings, local and Greek pottery, iron-smelting furnaces, tools, jewelry, and zoomorphic and anthropomorphic cult statues. The town's inhabitants were agriculturalists who also hunted and traded with other centers in the Black Sea region.

Sharukan. A Cuman town of the 11th to 13th centuries, believed to have been located along the lower Donets River. Sharukan was formed around an Alan settlement. It had a mixed population and served as a winter haven for the Cumans. It was captured by Volodymyr Monomakh's army in 1111, and then gradually declined over two centuries.

Sharvarok (Polish: *szarwark*, from German *Scharwerk*). The labor obligations of serfs in addition to *corvée* under Polish rule. Also called *mostovshchyna* (from *mist* 'bridge'), *sharvarok* consisted of constructing roads, bridges, dams, and buildings for the nobles. A form of *daremshchyna* (literally, 'unpaid' labor), it was abolished in Left-Bank Ukraine by Hetman B. Khmelnytsky, but it persisted in the Right-Bank latifundia until the mid-19th century. It was abolished in Austrian-ruled Western Ukraine in 1848. In Russian-ruled Ukraine it was limited in 1847 to eight days per peasant household per year and abolished in 1861. Thereafter the term was used in Ukraine to refer to road maintenance, which was the responsibility of the village *hromady* until the Revolution of 1917 in Right-Bank Ukraine and the Soviet occupation of 1939 in Western Ukraine.

Shary, Ivan [Šaryj], b 1894 in Veremiivka, Zolotonosha county, Poltava gubernia, d 1930. Political activist. He graduated from Kiev University (1917), and took part in the Battle of Kruty in 1918 and published an account of it in the Kiev newspaper *Narodnia sprava*. He was a Socialist Revolutionary delegate to the 1919 Labor Congress, a pro-UNR partisan in the Kholodnyi Yar region (1920–3) under the assumed name Ivan Chorny, and a Ukrainian teacher

in institutions of higher education (until 1929). He was arrested by the GPU for organizing resistance to collectivization and for being a member of the *Union for the Liberation of Ukraine, sentenced to death, and shot.

Shasharovska-Chepil, Yelysaveta [Šašarovs'ka-Cėpil', Jelysaveta] (Liza), b 4 October 1916 in Hannover, Germany. Stage actress. She worked in the Tobilevych Theater and Y. Stadnyk's troupe in Lviv (1929–39), the Lesia Ukrainka Theater and the Lviv Opera Theater (1939–44), and the Ensemble of Ukrainian Actors in West Germany and the United States (1945–57). In 1943 she played Ophelia in the first Ukrainian production of W. Shakespeare's *Hamlet*.

Volodymyr Shasharovsky

Otaman Bohuslav
Shashkevych

Shasharovsky, Volodymyr [Šašarovs'kyj], b 11 January 1905 in Peremyshl, Galicia, d 15 December 1992 in Philadelphia. Actor and stage director. He began his theatrical career in 1925 in Polish theaters and then worked in various Ukrainian troupes in Western Ukraine (1926–39) and in the Lesia Ukrainka Theater (1939–41), the Lviv Opera Theater (1941–4), and the émigré Ensemble of Ukrainian Actors (1946–53). In the United States he was artistic director of the Rozvaha Theater, the Ukrainian Theater in Philadelphia, and Teatr u Piatnytsiu (1953–74).

Shashkevych, Bohuslav [Šaškevyč], b 1 July 1888 in Lolyn, Dolyna county, Galicia, d 23 June 1935 in Edmononton. Military figure; great-grandson of M. Shashkevych. An officer in the Austrian army on the eastern front, he was captured by Russian forces in 1915 and sent to a POW camp in Turkestan. He escaped and led an Iranian rebel unit against the British and Russians. In 1916 he returned via Baghdad and Istanbul to Austria and rejoined the Austrian army on the northern and eastern fronts. He received six military decorations. During the Ukrainian-Polish War in Galicia (1918–19) he was a major commanding the Uhniv Brigade and, in May 1919, the First Division of the Ukrainian Galician Army. In June and July 1919 he organized and commanded the Zbarazh Brigade and then the Zolochiv Brigade. In February 1920, instead of joining the Red Ukrainian Galician Army, his brigade fought the Bolsheviks and joined with the UNR Army under Col O. Udovychenko in Mohyliv-Podilskyi. After being released from an internment camp in Czechoslovakia he moved to Germany (1922) and then to Canada.

Rev Hryhorii Shashkevych

Shashkevych, Hryhorii [Šaškevyč, Hryhorij], b 1809, d 30 August 1888 in Peremyshl, Galicia. Greek Catholic priest and civic and political leader. In 1848 he was elected president of the Regional Ruthenian Council in Stanyславiv (a branch of the Supreme Ruthenian Council in Lviv) and deputy to the Austrian parliament. In Vienna he served as adviser to the education ministry (1848–65) and head of its Galician school department as well as rector of the Greek Catholic Theological Seminary. After returning to Galicia he was elected to the Galician Diet (1867). He wrote one of the first Ukrainian grammar textbooks for public schools (1862) and collaborated with Ya. Holovatsky and Yu. Vyslobotsky on a German-Ukrainian legal dictionary (1851).

Monument to Rev Markiiian Shashkevych at the new Rusalka Dnistrovaia Museum in Lviv (sculptors Dmytro Krvavych and Mykola Posikira, 1990)

Shashkevych, Markiiian [Šaškevyč, Markijan] (pseud: Ruslan), b 6 November 1811 in Pidlyssia, Zolochiv circle, Galicia, d 7 June 1843 in Novosilky Lisni, now in Buzza raion, Lviv oblast. Poet and leader of the literary revival in Western Ukraine based on the vernacular. He graduated from the Greek Catholic Theological Seminary in Lviv in 1838 and worked as a priest in the rural Lviv region. During his studies he met Ya. Holovatsky and I. Vahylevych, with whom he formed the *Ruthenian Triad. He also organized nationally conscious Ukrainian young people (H. Il-

kevych, I. Bilynsky, F. Minchakevych, M. Kozlovsky, A. Velychkovsky, and others) to work for national and cultural revival in Western Ukrainian lands, particularly to reintroduce the use of spoken Ukrainian in writing and sermons. Their efforts resulted in the preparation of collections of folklore, *Syn Rusy* (Son of Rus', 1833) and *Zoria* (The Star, 1834), and the publication of the almanac **Rusalka Dnistrovaia* (1836). The almanac had a decisive effect on the revival and development of Ukrainian literature in Galicia.

Shashkevych's first published poem appeared in 1835. His literary canon, however, is fairly small. Apart from a few personal lyric verses, he largely wrote patriotic poems. In 1836 he published the brochure *Azbuka i Abecadlo* (The Alphabet and the Abecedarium), written against attempts to Latinize the Ukrainian alphabet. He relayed into spoken Ukrainian selections of *Slovo o polku Ihorovi* (The Tale of Ihor's Campaign) and translated the New Testament into the vernacular (1842). His *Chytanka dlia malykh ditei* (Reader for Small Children, 1850) was published posthumously by Holovatsky.

His fame as a reviver of national consciousness and initiator of a new Ukrainian literature in Galicia began growing after his death. In 1911 a large celebration of the centenary of his birth was staged, and a monument was erected in his memory on Bila Hora (near Pidlyssia). In 1959 a literary memorial museum was opened in Pidlyssia. In recent times Shashkevych has been invoked in reaction to the Russification of Ukraine and the assimilation of Ukrainians in the diaspora. The Shashkevych Institute was established in 1961 in Winnipeg; it publishes the periodical *Shashkevychiiana* (edited by M. *Marunchak).

M. Marunchak

Shashkevych, Volodymyr [Šaškevyč], b 7 April 1839 in Nestanychi, Zolochiv circle, Galicia, d 16 February 1885 in Lviv. Writer; son of M. Shashkevych. He studied at Lviv and Vienna universities and worked as a civil servant in Galician towns from 1869. His poetry, influenced by folklore and T. Shevchenko, was published in the literary miscellanies *Zoria halytskaia* (Galician Star, 1860) and *Antolohiia ruska* (Ruthenian Anthology, 1881) and in the periodicals *Vistnyk* (1865), *Pravda* (1867), and *Osnova* (1872). His collection *Zil'nyk* (Herbarium) was published in 1863. He also wrote the play *Syla liubovy* (The Power of Love, 1864), edited the Lviv periodicals *Vechermytsi* (1862–3) and *Rusalka* (1866) and two readers for peasants (*Zoria* [The Star], 1871, 1872), and translated a few of H. Heine's poems into Ukrainian.

Shatalin, Viktor [Šatalin], b 15 November 1926 in Zemlianye Khutory, now in Saratov oblast, Russia. Painter;

corresponding member of the USSR (now Russian) Academy of Arts since 1978. A graduate of the Kiev State Art Institute (1953), in 1968 he began teaching there. He is known for his socialist-realist paintings, such as *Combat Assignment* (1960), *Land* (1964), *Detachments of Young Fighters Gathered* (1969–70), *Comrades in Arms* (1971–2), and *Battle for the Dnieper* (1983). He has also painted portraits, including one of H. Maiboroda (1977), and landscapes. An album of his works came out in 1974.

Oleksa Shatkivsky: *Callas* (oil, 1967–70)

Shatkivsky, Oleksa [Šatkivs'kyj], b 28 May 1908 in Pochaiv, Kremianets county, Volhynia gubernia, d 28 June 1979 in Lviv. Painter and printmaker. While studying at the Warsaw Academy of Arts (1931–9) he belonged to the *Spokii group of Ukrainian artists. After the Second World War he taught at the Lviv Institute of Applied and Decorative Arts (1948–56) and the Ukrainian Printing Institute in Lviv (1950–6). He painted many landscapes of Volhynia, the Carpathians, and Lviv, including *Apiary* (1951), *Lenin Avenue in Lviv* (1967), and *Carpathian Landscape* (1968), and created many lithographs and engravings. Expressionist influences are evident in his work. Catalogs of retrospective and posthumous exhibitions of his works were published in 1969 and 1981.

Shatsk National Park. The second national park to be created in Ukraine, after the Carpathian National Park. It was proposed in the 1970s and set up in 1983. The park covers 32,500 ha in the northwestern part of Volhynia oblast, near the Belarusian and Polish borders. Its vegetation consists mainly of mixed forests and peat marshes on the upper watershed of the Prypiat River. More than 25 lakes dot the area, the largest of which is Svytiaz Lake. The

A lake in Shatsk National Park

intermittent forests are predominantly pine and hornbeam. Numerous organizations have established recreational bases in the area, particularly around Svytiaz Lake. Besides providing camping and hiking facilities the park conserves the natural landscape and its forest and wetland ecosystems, and supports scientific research.

Shatulsky, Matthew [Šatul's'kyj, Matvij], b 16 November 1883 in Bazaliia, Starokostiantyniv county, Volhynia gubernia, d 20 December 1952 in Winnipeg. Communist activist and journalist. He emigrated to the United States (1909) and then to Canada (1911), where he became active in the workers' organization *Samoobrazovanie*. He joined the staff of *Ukrains'ki robitnychi visti* in 1920 and helped organize the Workers' Benevolent Association. Together with M. Popovich and I. Navizivsky, he was a leading member of the *Ukrainian Labour-Farmer Temple Association. In 1940–2 he was arrested under Defence of Canada regulations and kept in a detention camp. His articles, short stories, and feuilletons were collected by P. Krawchuk and published with a biographical introduction in *Siiach slova pravdy* (Sower of the Word of Truth, 1983).

Shatunovsky, Samuil [Šatunovs'kyj, Samujil], b 25 March 1859 in Velyka Znamianka, Melitopol county, Tavriia gubernia, d 27 March 1929 in Odessa. Mathematician. He studied and then taught at technological and engineering institutes in St Petersburg. In 1905 he joined the faculty of Odessa University and in 1917 became a professor. In his works he deals with various problems in mathematical analysis and algebra, particularly in group theory, theory of numbers, and geometry. Shatunovsky was one of the founders of the constructive approach in contemporary mathematics. He used the axiomatic method to lay the logical foundations of geometry, algebraic fields and Galois group theories, and analysis.

Shatylov, Petro [Šatylov], b 1869 in Kozatska sloboda, Staryi Oskol county, Kursk gubernia, d 13 May 1921. Internal medicine specialist. After graduating from Kharkiv University in 1895, he lectured there and in 1909 was appointed a professor of diagnostics and propaedeutics of internal medicine. In 1914 he also became a professor at the Kharkiv Women's Institute. Shatylov was the founder

of the Kharkiv school of internal medicine and an innovator in diagnostics. In 1912 in the Kharkiv Military Hospital he performed the first vaccination against typhoid fever in the Russian Empire. His writings include medical textbooks and monographs on microbiology, epidemiology, immunology, anthropology, and hematology. He tested vaccines against epidemic typhus on himself, and died of the disease.

Shaulya, Matvii [Šaula, Matvij], b ?, d 1596 in Warsaw. Zaporozhian Cossack leader. A supporter of S. Nalyvaiko's uprising, in 1595 he took Kiev with a detachment of Zaporozhian Cossacks and advanced into Belarus against Polish forces. In March 1596, after returning to Right-Bank Ukraine, Shaulya was elected by the Cossacks to replace the deposed hetman H. Loboda. Later that year he was injured in the Battle of Solonytsia, turned over to S. Żółkiewski by traitors, and executed.

Dmitrii Shavykin: *For Steam Travel* (poster, 1930)

Shavykin, Dmitrii [Šavykin, Dmitrij], b 3 April 1902 in Aleksandrov, Vladimir gubernia, Russia, d 29 March 1965 in Kiev. Painter and graphic artist. From 1915 he lived in Kiev, where he studied at the Kiev State Art Institute (1922–8) under M. Burachek, F. Krychevsky, and L. Kramarenko. In 1927 he joined the *Union of Contemporary Artists of Ukraine. His series of Donbas landscapes (1931–4) and *Evening on the Dnieper* (1957) show expressionist influences. M. *Boichuk's influence is evident in Shavykin's murals at the Children's Village in Kiev (1924, destroyed)

and the Kaniv Museum-Preserve (1940). He also painted portraits of writers, such as his wife, N. Zabala, and L. Per-vomaisky, and created kilims, posters, and illustrations for children's magazines (*Zhovtenia* and *Tuk-tuk*) and books, including Zabala's retelling of the tale of Ihor's campaign (*Slovo pro Ihoriv pokhid*, 1940) and A. Holovko's *Maty* (Mother, 1936). B. Lobanovsky's book about him was published in Kiev in 1962.

Shchaslyvy, Pavlo [Ščaslyvyj], b ?, d 1610 in Lviv. Builder in Lviv of Italian origin. From 1582 he presided over the masons' guild in Lviv. He constructed a number of buildings in Lviv, including the Golden Rose Synagogue (1580–2), the Jesuit school, and the residential buildings of M. Nakhmanovych and I. Siuskiundovych. In 1592 he moved to Zhovkva, where he began building the local castle (from 1596), designed the model of the Roman Catholic cathedral (1604–9), and served as mayor from 1601.

Shchasny, Serhii [Ščasnyj, Serhij], b 7 September 1875 in St Petersburg, d 19 March 1943. Microbiologist and epidemiologist. A graduate of Kiev University (1899, pupil of V. Pidvysotsky), he worked at Odessa University (from 1901, from 1919 as a professor), directed the Odessa Bacteriological Station (1919–28), taught at the Odessa Medical Institute (1921–8), and worked at the Crimean Institute of Epidemiology and Microbiology (from 1928) and the Crimean Medical Institute (1928–38). A specialist in immunology, epidemiology, and anaphylaxis, he played an active role in combating an outbreak of plague in Odessa (1910–11).

Shchastia [Ščastja]. v-20, DB II-6. A city (1989 pop 14,300) on the Dinets River in Luhanske oblast. In the mid-18th century a village was established at the site by runaway serfs. A workers' settlement was built in 1953 during the construction of the Luhanske Raion Electric Power Station. In 1963 Shchastia attained city status. It is administered by a municipal raion council of Luhanske city. Its chief industries are coal mining and power generation.

Shchavnytsky, Mykhailo [Ščavnyč'kyj, Myxajlo], b 1754, d 1819. Uniate priest and pedagogue. He was raised in Transcarpathia and he finished his studies in Vienna in 1780, after which he became vice-rector of the Barbareum. In 1784–7 he was the first rector of the Greek Catholic Theological Seminary in Lviv. He was the organizer and briefly rector of the Studium Ruthenum at Lviv University. From 1787 he was vice-director of the Uzhhorod Theological Seminary.

Shchavynsky, Vasyl [Ščavyns'kyj, Vasył'], b 1868 in the Kiev region, d 27 December 1924 in Leningrad. Art historian, collector, and restorer; member of the *Leningrad Society of Researchers of Ukrainian History, Literature, and Language from 1922. He studied chemistry at the St Petersburg Technological Institute and the Riga and Zürich polytechnical institutes. In 1917 he organized the Society for the Study and Preservation of Monuments of Ukrainian Antiquity in Petrograd. From 1918 he worked as a restorer at the Hermitage Museum, and in 1919 he became director of the Department of Painting Techniques at the Russian Academy of Material Culture and a professor at the Petrograd Institute of Photography and Photo-

technology. He wrote articles on Dutch painting, art restoration, and T. Shevchenko and Rembrandt (*Ukraina*, 1925, nos 1–2). His valuable collections of Dutch paintings, Mezhyhiria ceramics, Ukrainian kilims, and Shevchenko's self-portrait are preserved at the Kiev Museum of Western and Eastern Art and the Hermitage Museum. His Russian monograph on the history of painting techniques and color technology in Kievan Rus' was published posthumously in 1935.

Shchedrivky. See Carols.

Shchedrova, Valentyna [Ščedrova], b 10 January 1930 in Sursko-Lytovske, Katerynoslav okruha. Sculptor. A graduate of the Dnipropetrovske Art School (1952) and the Kharkiv Art Institute (1961), she has created plaster statues, such as *Builders* (1963), *A Mother's Dream* (1964), and *Youth* (1965). She collaborated on memorial monuments to the students of the Dnipropetrovske Transport Institute (1967) and to medics (1970) who died in Dnipropetrovske in the Second World War.

Shchekariv. See Krasnystaw.

Shchekavytsia (19th-century engraving)

Shchekavytsia [Ščekavycja] (also Olehivka, Olehova hora, or Skavyka). A landmark hill in Kiev overlooking the old town district of Podil. Named after Shchek, one of the legendary founders of Kiev, the hill is mentioned in medieval chronicles as early as 1151. By the 15th or 16th century it had been fortified, and in 1619 it was designated a residential area for the burghers of Kiev. A renowned cemetery was established on the hill in the later 18th century, which became the burial site of figures such as A. Vedel, A. Melensky, and V. Ikonnikov. In 1782 the famous All Saints' Church was built there, and a stone bell tower was added in 1809. Neither structure is still standing. The hill is also occasionally called after the Kievan prince Oleh, who was reputed to have been buried there.

Shchelkov, Ivan [Ščelkov], b 1833 in Kharkiv, d 1909. Physiologist. He completed medical studies at Kharkiv University (1855) and later was a professor (1863–86) and rector (1884–90) there. From 1890 he was rector of Warsaw University.

Mikhail Shchepkin (portrait by Taras Shevchenko, 1858)

Fedor Shchepotiev

Shchepkin, Mikhail [Ščepkin, Mixail], b 17 November 1788 in Krasne, Slobidska Ukraine gubernia, d 23 August 1863 in Yalta, Tavriia gubernia (buried in Moscow). Actor and one of the founders of theatrical realism on Ukrainian and Russian stages. A serf until 1822, he began his career in P. Barsov's troupe in Kursk (1805) and then acted in Y. Kalynovsky and I. Shtein's troupe in Kharkiv (1816–18) and in the Poltava Free Theater (1818–21), led his own troupe in Kiev (1822), and worked in the Moscow Malyi Theater (from 1823). He toured frequently in Ukraine; his repertoire included Chuprun in I. Kotliarevsky's *Moskal'-charivnyk* (The Muscovite-Sorcerer) and the title role in H. Kvitka-Osnovianenko's *Shel'menko-denshchyk* (Shelmenko the Orderly). He was a friend of T. *Shevchenko.

Shchepotiev, Fedor [Ščepotiev], b 19 July 1906 in Alforovka, Novokhopersk county, Voronezh gubernia. Forester, dendrologist, and selection scientist; corresponding member of the ANU (formerly AN URSS) since 1965. A graduate of the Voronezh Forest Technology Institute, he worked at the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration in Kharkiv (1933–41, 1946–66) and headed a department of Donetsk University (from 1966). He published over 125 works on the introduction, selection, and mutation of tree species and the influence of different chemical and physical stimulants on tree growth and development. By crossing distant breeds he developed hybrid forms of the walnut and poplar that are fast-growing and cold-resistant.

Shchepotiev, Volodymyr [Ščepot'jev], b 6 November 1880 in Poltava, d 29 November 1937. Ethnographer and literary historian. Before the Revolution of 1917 he was a member of the Archival Commission of Poltava (ACP). In the Soviet period he was a professor at the Poltava Institute of People's Education, head of the Poltava Scholarly Society of the VUAN, an associate of the Kharkiv Chair of the History of Ukrainian Culture, and a member of the Ethnographic Commission of the VUAN. One of the compilers of the systematic index to **Kievskaiia starina* (published by the ACP in 1911), he wrote a booklet about M. Lysenko (Poltava 1913, under the pseud Budyshanets) and a book about Ukrainian writers from the earliest times to the 1860s (published by the Poltava Prosvita society in

Volodymyr Shchepotiev

Mykola Shcherbak

1918; 2nd edn 1919), and contributed articles on Ukrainian folklore and writers (I. Kotliarevsky, T. Shevchenko, O. Storozhenko) to *Trudy Poltavskoi uchenoi arkhivnoi komissii*, *Etnografichnyi visnyk, Ukraïna*, and *Zapysky Poltavs'koho INO*. He was arrested in 1930 and sentenced at the show trial of the *Union for the Liberation of Ukraine to three years in a Siberian labor camp. He was released in 1936 but was rearrested in 1937, tortured, and shot by the NKVD.

Shcherbak, Mykola [Ščerbak], b 16 September 1924 in Savinka, Saratov oblast, Russia. Geologist; full member of the AN URSR (now ANU) since 1979. A graduate of the Donetsk Polytechnical Institute, he was a scholarly associate and department head with the ANU Institute of Geological Sciences (1955–69) and then the ANU Institute of the Geochemistry and Physics of Minerals (1969–83, as director from 1977). His main scholarly interest is the origin and development of crystalline rock formations in Ukraine. He is particularly noted for developing an isotopic method of dating rocks and for establishing a stratigraphic scheme of the Ukrainian Crystalline Shield.

Shcherbak, Oleksander [Ščerbak], b 25 June 1863 in Chernihiv gubernia, d 23 April 1934 in Sevastopol. Neurologist, psychiatrist, and physiotherapist. A graduate of the St Petersburg Military Medical Academy (1887), he upgraded his knowledge abroad and was a professor of psychiatry at Warsaw University (1894–1911). He organized and directed the Institute of Physiotherapy in Sevastopol (1914–34, from 1955 the Yalta Scientific Research Institute of Physiotherapy and Medical Climatology). He wrote on myopathies, hysteria, migraine, the classification of mental diseases, and the effect of medicines on blood circulation in the brain.

Shcherbak, Yurii [Ščerbak, Jurij], b 12 October 1934 in Kiev. Prose writer, dramatist, and publicist; physician by profession. Having obtained a degree from the Medical Institute of Kiev in 1958, he worked in the Scientific Research Institute of Epidemiology, Microbiology, and Parasitology in Kiev until the late 1980s, when he devoted himself exclusively to writing. In the early 1950s he began publishing so-called *mal'ovani retsenzii* (painted reviews). His published works include the collections of stories *Iak na viini!* (Just as at War, 1966) and *Malen'ka futbol'na komanda* (A Small Soccer Team, 1973), and the novel *Bar'ier*

Yurii Shcherbak

Danylo Shcherbakivsky

nesumisnosti (The Barrier of Incongruity, 1971). His novelistic account of medical struggles with rabies, *Prychyny i naslidky* (Causes and Effects, 1987), is among the best examples of contemporary Soviet literature. Equally notable are his popular publicistic articles in the Ukrainian and Russian press concerning the Chernobyl disaster, and his documentary account of the events, *Chornobyl'* (1988), which has been translated into several languages. Upon the accession of M. Gorbachev to power Shcherbak played an active role in the Ukrainian cultural renaissance, by contributing to enunciations of opposition to Russification, voicing ecological concerns, researching the man-made famine of 1932–3, and serving other causes. Since 1987 he has been president of the *Zelenyi Svit ecological society. In 1989 he was elected in Kiev as member of the new Congress of People's Deputies. He headed the Green party of Ukraine, was Ukraine's environment minister (1991–2), and is Ukraine's ambassador to Israel (since October 1992).

I. Koshelivets

Shcherbakivsky, Danylo [Ščerbakivs'kyj], b 17 December 1877 in Shpychyntsi, Skvyra county, Kiev gubernia, d 6 June 1927 in Kiev. Ethnographer, art scholar, archeologist, and museologist; brother of V. *Shcherbakivsky. After studying at Kiev University (1897–1901) he taught history at the Uman Gymnasium (1906–10), collected articles of folk art and handicrafts for museums in Kiev and Poltava, and conducted archeological digs in Right-Bank Ukraine. As head of the historical folkways and folk art departments of the Kiev City Museum of Antiquities and Art (later the All-Ukrainian Historical Museum and now the *Historical Museum of Ukraine) from 1910, he enriched its holdings with about 30,000 new objects and proposed for the first time to treat works of folk art as art objects in their own right. In 1923 he traveled to Moscow to save 5,000 'nationalized' gold and silver objects that had been removed from Ukrainian churches. He was one of the founders and the scientific secretary of the Ukrainian State Academy of Arts, chairman of its Department of Folk Art, a cofounder and a member of the VUAN Ethnographic Commission (from 1920), scientific secretary of the arts section of the Ukrainian Scientific Society in Kiev (from 1921), vice-chairman of the All-Ukrainian

Archeological Committee (from 1922), and founder of the Kiev Ethnographic Society (est. 1924). He also lectured on folk art and the history of Ukrainian art at the Academy of Arts and the new Kiev Archeological, Pedagogical, Architectural, and State Art institutes and conducted art seminars at the Historical Museum. Devastated by the removal of many objects from the Historical Museum and their secret sale, and by his persecution and the undermining of his work at the museum by the Communist authorities, he committed suicide by jumping off a bridge into the Dnieper.

Over 40 of Shcherbakivsky's works have been published. Several dozen of his manuscripts still await publication. His chief works are a study of the *Kozak-Mamai theme in Ukrainian painting in *Siaivo* (1913); studies of Ukrainian wooden churches and symbolism in Ukrainian art in the collection of the arts section of the Ukrainian Scientific Society (1921); and books on serf orchestras, choirs, and Kapellen in Ukraine (1924), Ukrainian portraiture (1925, with F. Ernst), book covers by 17th- and 18th-century Kievan goldsmiths (1926), Galician and Bukovynian wooden churches, chapels, crosses, and figures (*L'Art d'Ukraine*, 1926), and the Ukrainian kilim (1927).

V. Pavlovsky

Vadym Shcherbakivsky

Oleksander Shcherban

Shcherbakivsky, Vadym [Ščerbakivs'kyj], b 17 March 1876 in Shpychynsi, Skvyra county, Kiev gubernia, d 18 January 1957 in London. Ethnographer and archeologist; member of the Shevchenko Scientific Society (from 1930), the Ukrainian Academy of Arts and Sciences, the Slovak Scientific Society, the Czechoslovak Academy of Sciences, and the International Anthropological Institute (France). He studied at the Universities of St Petersburg, Moscow, and Kiev (1902) and participated in Ukrainian social-democratic political activities, for which he was arrested several times. In 1907 he moved to Galicia, where he worked in the National Museum in Lviv (1908–10). He later participated in excavations in Bilhorod, near Kiev (1910–12), and worked as curator of the archeological section of the Poltava Zemstvo Museum (1912–22). During the existence of the Ukrainian State Shcherbakivsky was a professor at the Ukrainian University in Poltava (1918). As an émigré he was a professor at the Ukrainian Free University (1922–45 in Prague and 1945–51 in Munich). In 1951 he moved to England, where he did research on ancient Ukrainian history, in London.

Shcherbakivsky wrote important works about wooden churches in Ukraine (*ZNTSh*, vol 74 [1906]), the architecture of various peoples in Ukraine (1910), churches in the Boiko region (*ZNTSh*, vol 114 [1913]), Ukrainian art (1913; 2nd edn 1925), the principal elements of Ukrainian Easter egg ornamentation (1925), the prehistoric formation of the Ukrainian nation (1937; 3rd edn 1958), and the Stone Age in Ukraine (1947). A biography of him, by P. Kurinny, was published in Geneva in 1947.

V. Pavlovsky

Shcherban, Oleksander [Ščerban'], b 2 March 1906 in Dykanka, Poltava county, Poltava gubernia, d 7 January 1992 in Kiev. Scientist in the field of mining technology and thermodynamics; full member of the ANU (formerly AN URSR) since 1957. He graduated from the Dnipropetrovske Mining Institute (1933). He served as assistant director of the ANU Institute of Mining (1946–53), the first scientific secretary of the presidium of the ANU (1953–7), and vice-president of the ANU (1957–61). He became assistant chairman of the Council of Ministers (1961–5) and headed a department at the AN URSR Institute of Thermoeconomics (now the ANU Institute of Technical Thermodynamics). He has made scientific contributions in the fields of thermal flow in mines, the automated control of air purification, and geothermal energy utilization.

Yurii Shcherbatenko: *Window* (oil, 1968)

Shcherbatenko, Yurii [Ščerbatenko, Jurij], b 29 December 1915 in Sochi, Black Sea gubernia. Painter. He graduated from the Donetske Art Tekhnikum (1935) and the Kiev State Art Institute (1942), where he studied under F. Krychevsky, S. Hryhoriev, and K. Yeleva. He has painted

works such as *Lesia Ukrainka* (1957), *Physicists* (1967), *Bowls of the Earth* (1968), and *Soccer* (1971).

Shcherbatsky, Heorhii [Ščerbac'kyj, Heorhij], b ? , d 18 August 1754 in Moscow. Churchman and teacher. A monk of the Transfiguration-St Sophia Monastery in Kiev, he served as a professor of poetics (1749–50) and philosophy (1751–2) and as prefect (1752–3) at the Kievan Mohyla Academy. In 1753–4 he taught at the Slavonic-Greek-Latin Academy in Moscow. He wrote the play *Tragedokomediia naritsaemaia Fotii* (A Tragicomedy Called Photius, 1749) and two Latin recensions of his philosophy courses, which were deeply influenced by the Cartesian method and doctrines.

Shcherbatsky, Tymofii [Ščerbac'kyj, Tymofij] (secular name: Tykhon Shcherbak), b 1698 in Trypilia, Kiev regiment, d 18 April 1767 in Moscow. Orthodox church hierarch. After graduating from the Kievan Mohyla Academy and working in church administration he was hegumen of the Mhar Transfiguration, Vydubychi, and St Michael's Golden-Domed monasteries, and then archimandrite of the Kievan Cave Monastery (1740–8). In 1748 he became metropolitan of Kiev. He entered into conflict with the Kievan academy, which he attempted to place fully under his own authority. He claimed for the Kiev metropolitan the right to name professors to the academy, and issued a statute in 1752 reforming the organization and curriculum of the school. His attempt to establish a printing press for the metropolity brought him into conflict with the Kievan Cave Monastery Press, and his efforts to take over Pereiaslav eparchy were opposed by the Russian Holy Synod. Throughout his tenure in Kiev, Shcherbatsky was embroiled in disputes with S. Liaskoronsky, the rector of the Kievan academy, and with N. Solonyna and M. Stefanovsky, the archimandrites of the Kiev Epiphany Brotherhood Monastery. The constant conflict resulted in the weakening of Kiev metropolity and contributed to its eventual subjugation by the Russian Orthodox church. Shcherbatsky moved to Moscow, where he was metropolitan (1757–67) and a member of the Holy Synod. He is the subject of a biography by I. Graevsky (1910).

Fedir Shcherbyna

Shcherbyna, Fedir [Ščerbyna], b 13 February 1849 in Novodereviankivka *stanytsia*, Kuban oblast, d 28 October 1936 in Prague. Statistician, economic historian, and teacher; corresponding member of the Russian Academy

of Sciences from 1904 and full member of the Shevchenko Scientific Society from 1924. Shcherbyna studied at the Petrovskoe Agricultural Academy near Moscow (1872–4) and at Odessa University (1874–7); in Odessa he was a member of the city's Hromada. He was exiled to Vologda gubernia in 1877–81 for his political agitation among Odessa workers. In 1884–1901 he was director of the statistical bureau of the Voronezh gubernia zemstvo and helped edit 66 volumes of statistical information. In addition he published 16 volumes of statistics dealing with Voronezh gubernia (1887) as well as a history of the Voronezh zemstvo (1891).

Shcherbyna was placed under house arrest in 1901 for his public demands for the establishment of a constitutional system within the Russian Empire, and exiled to the Kuban. There he did research and wrote about the history of the Kuban, particularly the Cossacks. In 1906 he headed the revived Kuban Cossack council (dormant since the end of the 18th century), and in 1907 he became a socialist representative to the Second Duma. After the February Revolution of 1917 he was elected a member of the Kuban Legislative Council (1917–20), and headed the supreme court of the Kuban Cossack Host. Shcherbyna emigrated to Yugoslavia (1920) and then to Prague (1921), where he became a professor (1922–36) and rector (1924–5) of the *Ukrainian Free University. He also taught statistics at the Ukrainian Husbandry Academy in Poděbrady (from 1922).

Shcherbyna is most noted for his statistical work. His first work in the field, *Ocherki iuzhno-russkikh artelei i obshchinno-artel'nikh form* (An Outline of Southern Russian Artels and *Obshchina*-Artel Forms, 1881), was based on research he had undertaken in Odessa from 1875, and had a significant impact on the development of the co-operative movement in Ukraine. He wrote many studies about zemstvo communities, and notable works such as *Krest'ianskoe khoziaistvo v ostrogoskom uezde* (Peasant Agriculture in Ostrohozke County, 1885) and *Krest'ianskie biudzhety* (Peasant Budgets, 1900). He also wrote many works about the Kuban, including *Istoriia Kubanskogo Kazach'ego Voiska* (A History of the Kuban Cossack Host, 2 vols, 1910, 1913).

A. Zhukovsky

Shcherbyna, Nykyfor [Ščerbyna], b 22 February 1900 in the Cossack settlement of Starokorsunska, Kuban, d 21 March 1977 in New York. Poet. He was active in the Prosvita society (1919–20) and the Ukrainian Literary Society (1920–3) in the Kuban and was secretary of the literary journal *Zoria* (1920–3) in Krasnodar. He contributed poems and stories to the major Soviet Ukrainian literary periodicals as a member of Hart (1923) and the Association of Panfuturists (1924–6) in Kiev and Vaplite (1927–30) and the All-Ukrainian Association of Proletarian Writers (1930–2) in Kharkiv. Published separately were his poetry collections *Ranok* (Morning, 1929) and *Homin budniv* (The Echo of Workdays, 1930). In 1931 he was accused of 'nationalism,' and his work was not published again until 1941. In the 1930s he translated 12 books of Russian literature into Ukrainian. An associate of the Taras Shevchenko Scientific Research Institute (1935–6), he graduated from Kharkiv University in 1936 and then worked as a teacher

in Novoselivka (1936–7) and a lecturer in world literature at the Kharkiv Pedagogical Institute (1937–8). As a post-war refugee he lived in Germany and, from 1950, the United States, where he contributed to émigré periodicals and published a collection of poems for children, *Prolisky* (Clearings, 1969).

Volodymyr Shcherbyna

Volodymyr Shcherbytsky

Shcherbyna, Volodymyr [Ščerbyna], b 28 May 1850 in Kiev, d 1936 in Kiev. Historian, pedagogue, and community activist; corresponding member of the VUAN. He studied at Kiev University (1868–73) under V. Antonovych and M. Drahomanov and wrote his dissertation on Hetman K. Rozumovsky. He studied pedagogy in St Petersburg (1876) and then taught history and literature in gymnasiums there and in Kiev (1879–1920). He was a member of the Kievan Historical Archives Group (headed by Antonovych in the 1880s and 1890s), the Kiev Archeographic Commission, and the Historical Society of Nestor the Chronicler. He published his studies in *Arkhiv Iugo-Zapadnoi Rossii*, *Chteniia v Istoricheskom obshchestve Nestoraletopistsa*, and *Kievskaiia starina* (mostly in 1891–9), as well as in ZNTSh (under the cryptonym 'V.I.'), *Ukraina*, and ZIFV. In 1901 he traveled through Right-Bank Ukraine to collect ancient documents and art.

Together with Ya. Shulhyn, V. Naumenko, and O. Levysky Shcherbyna was active in many Kievan community and cultural organizations. From 1920 he devoted himself to scholarly work in the National Library of Ukraine and the VUAN Archival Administration and Archeographic Commission, directed (from 1925) the VUAN Commission on the History of Kiev and Right-Bank Ukraine, and was a member of the VUAN Chair of Ukrainian History (later the *Institute of History of the AN URSR). He was an acclaimed specialist on the history of Kiev (particularly the 17th and 18th centuries), and he also wrote about the haidamaka uprisings and the Cossack period and compiled memoirs of Antonovych (1909) and Shulhyn (1912).

In 1926, on the 50th anniversary of the beginning of Shcherbyna's scholarly activity, the VUAN published *Novi studii z istorii Kyieva V.I. Shcherbyny* (New Studies of the History of Kiev by V. Shcherbyna); the publication also contained biographical and bibliographical information.

A. Zhukovsky

Shcherbytsky, Volodymyr [Ščerbyc'kyj], b 17 February 1918 in Verkhnodniprovske, Katerynoslav gubernia, d 16 February in 1990 in Kiev. Communist party and Soviet government leader. A graduate of the Dnipropetrovske Chemical Technology Institute (1941), after the Second World War he worked as an engineer in Dniprodzerzhynske. From 1948 he was a Party functionary; he rose through the ranks to the positions of first secretary of the Dniprodzerzhynske City Committee (1952–4), CC CPU candidate (1954–6) and full member (1956–89), second (1954–5) and first (1955–7, 1963–5) secretary of the Dnipropetrovske Oblast Committee, CPSU Central Auditing Commission member (1956–61), CC CPU Presidium member (1957–66), CC CPU secretary (1957–61), chairman of the Ukrainian Council of Ministers (1961–3, 1965–72), CC CPSU member (1961–89), CC CPSU Presidium candidate (1961–3, 1965–6), CC CPSU Politburo candidate (1966–71) and member (1971–89), CC CPU Politburo member (1966–89), and CPU first secretary (1972–89) and member of the USSR and Ukrainian SSR Supreme Soviet presidia (1972–89).

A protégé of L. Brezhnev and a Moscow loyalist, Shcherbytsky replaced P. *Shelest as CPU first secretary and purged Shelest's supporters from the Party and government apparatus and cultural and academic institutions. From 1972 to approx 1986 his neo-Stalinist rule in Ukraine was marked by intensified *Russification, repression of the *dissident movement, ideological conservatism (especially in *nationality policy), and economic and cultural stagnation. On Shcherbytsky's initiative all Party work and all CPU congresses were conducted in Russian. A recognized opponent of M. Gorbachev's policies, he was one of the last three Brezhnevites to be dropped from the CC CPSU Politburo, in September 1989. A few days later he was replaced as CPU first secretary by V. Ivashko.

R. Senkus

Shchirbiavy, Ivan [Ščirbjavyj], b and d ? Carpenter from Husakiv, Galicia. In 1641 he built a wooden church in Dusivtsi, near Peremyshl. It is the oldest extant wooden church in Ukraine with three domes and small side choirs near the nave.

Shchoholiv, Irynarxh [Ščoholiv, Irynarx], b 1873 in the Katerynoslav region, d 1943. Entomologist. A graduate of the Kiev Polytechnical Institute and a member of the Agricultural Scientific Committee of Ukraine (1919–24), he was a professor at the Kiev Agricultural Institute (from 1923). He compiled *Slovnnyk ukrains'kyi entomologichnoi nomenklatury* (A Ukrainian Dictionary of Entomological Terms, 1918) and coauthored *Slovnnyk zoolohychnoi nomenklatury* (Dictionary of Zoological Terms, 1928).

Shchoholiv, Ivan [Ščoholiv] (Shchoholev; pseud: Ivan Tohobichny), b 1862 in Horodyshe, Cherkasy county, Kiev gubernia, d 1933. Dramatist and stage actor, director, and entrepreneur. He headed the *Society of Ukrainian Actors (1907–10) and was an actor at the theater in the People's Home in the Kiev suburb of Lukianivka (from 1910). He wrote melodramatic 'ethnographic' plays, several of which were staged in prerevolutionary central Ukraine and Galicia. They include *Zahublenyi rai* (Lost Paradise, 1896), *Zhydivka – vykhrestka* (The Jewess – Convert, 1896, pub 1909), *Dushohuby* (The Murderers, 1898, pub 1910, based on E. Zola's *Thérèse Raquin*), *Maty – nai-*

Ivan Shchokoliv (portrait by Vitalii Kravchenko)

Yakiv Shchokoliv

mychka (The Mother – Hired Woman, 1899, pub 1909, based on T. Shevchenko's 'Naimychka'), *Kokhaitesia, chornobrovi!* (Love Each Other, Dark-browed Ones!, 1901, based on Shevchenko's 'Kateryna'), *Bortsi za mrii* (Fighters for [Their] Dreams, 1903, pub 1924), and *Chernytsia* (The Nun, 1906, with H. Ashkarenko). An edition of Shchokoliv's plays was published in Kiev in 1972.

Shchokoliv, Yakiv [Ščoholiv, Jakiv] (Shchoholev), b 6 November 1823 in Okhtyrka, Kharkiv gubernia, d 8 June 1898 in Kharkiv. Romantic poet. He studied at Kharkiv University until 1848 and worked in clerical-bureaucratic positions in various institutions. He began to publish in 1840 in *Literaturnaia gazeta*, *Otechestvennye zapiski*, and the almanac *Molodyk*. In 1883 he published the poetry collection *Vorsklo*, and in 1898, *Slobozhanshchyna* (Slobidska Ukraine). His main poetic inspiration was the poetry of T. Shevchenko and folklore. Shchokoliv was associated with the *Kharkiv Romantic School, and a great deal of his poetry is a Romantic representation of Ukrainian history, in particular of the Cossack era and the Zaporozhian Cossacks. His Cossackophile romanticism expresses a longing for the past and for the 'lost Sich.' Quite a number of his poems depict images of Ukrainian nature; others deal with social concerns. Many of his poems have been set to music and have become part of the popular repertoire; they include 'Priakha' (The Spinner), 'Cherevychky' (Shoes), and 'Zymovyi vechir' (A Winter's Evening). Shchokoliv's works have also been published posthumously: *Tvory: Povnyi zbirnyk* (Works: The Complete Collection, 1919), *Poezii* (Poems, 1926), *Tvory* (Works, 2 vols, 1930), *Poezii* (Poems, 1958), and *Tvory* (Works, 1961).

Shchors, Mykola [Ščors], b 25 May 1895 in Snovske (now Shchors), Horodnia county, Chernihiv gubernia, d 30 August 1919 in Biloshytsia (now Shchorsivka), Ovruch county, Volhynia gubernia. Bolshevik military leader. He graduated from military schools in Kiev (1914) and Vilnius and served as a captain in the Russian imperial army. From 1918 he commanded Bolshevik military units, including the Bohun Regiment, the 2nd Brigade, the 1st

Mykola Shchors

Vasyl Shchurat

Ukrainian Soviet Division, and the 44th Riflemen's Division, that fought the Army of the UNR in 1919. He died in battle against the Seventh Brigade of the Ukrainian Galician Army near Korosten. Shchors became a cult hero in the Ukrainian SSR and the USSR, and on J. Stalin's orders he was proclaimed the 'Ukrainian Chapaev.' Monuments to him were erected, and a museum in his honor was opened. He was the subject of a novel by S. Skliarenko, a film by O. Dovzhenko, and an opera by B. Liatoshynsky. In the late 1980s, Soviet historiographers began to re-examine his history in a more objective light (*Arkhiv Ukrainy*, 1985, no. 5; *Kyiv*, 1988, no. 11; *Literaturna Ukraina*, 1989, no. 33).

Shchors [Ščors]. II-12. A city (1989 pop 12,600) on the Snov River and a raion center in Chernihiv oblast. A *khutir* established at the site in the 1860s developed into a settlement after the Homel–Bakhmach railway line was constructed (1874), and adopted the name of the nearest railway station, Snovske. In 1924 the settlement was granted city status, and in 1935 it was renamed Shchors. Today it is an industrial and transportation center. It has a furniture factory and railway servicing shops.

Shchotove [Ščotove]. V-20, DB III-6. A town smt (1986 pop 6,300) in Luhanske oblast. It originated in 1783 and attained smt status in 1938. The town is administered by the Anratsyt municipal council. Its coal mine has been working since 1918. It also has a tractor-parts factory.

Shchupak, Samiilo [Ščupak, Samijlo] b 16 March 1894 or 10 April 1895 in Lypovets, Kiev gubernia, d 10 March 1937. Literary critic and political activist. He joined the Communist party in 1919 and was editor of the journal *Hlobus* and the newspapers *Bil'shovyk* and *Proletars'ka pravda* in the 1920s. His first published work appeared in 1920. In 1930 he moved to Kharkiv and became editor of *Literaturna hazeta* (1930–6) and the journal *Krytyka*. He was one of the leaders of the All-Ukrainian Association of Proletarian Writers and an organizer of the Writers' Union of Ukraine. His articles of literary criticism adhered to the Party line, and in the *Literary Discussion of 1925–8 he came out against M. Khvylovy. Collections of his writings include *Krytyka i proza* (Criticism and Prose, 1930),

Borot'ba za metodolohiiu (The Struggle for Methodology, 1933), and *Sotsialistychnyi realizm u khudozhnii literaturi* (Socialist Realism in Literature, 1934). He was arrested on 10 November 1936, accused of being a member of a Trotskyite counterrevolutionary group, and sentenced to death by shooting. He was posthumously rehabilitated.

Shchurat, Vasył [Ščurat, Vasył'] (pseuds: V. Boronchynsky, V. Iskra, I. Khmaryn, Komon, V. Konin, Omega, Omikron, V. Sava, V. Sigma, Vin, V. Vyslobotsky, Zyzyk), b 24 August 1871 in Vysloboky, Lviv county, Galicia, d 27 April 1948 in Lviv. Literary scholar, community leader, writer, and translator; member of the *Shevchenko Scientific Society (NTSh) from 1914. Shchurat entered literary and public life as a protégé of I. Franko, under whose influence he remained until 1896. He studied at Vienna University (1892–4), graduated from Lviv University (1895), and received a PH D in Slavic philology from Vienna University (1896). He worked as a state gymnasium teacher in Stanyslaviv (1897), Peremyshl (1898–1901), Brody (1901–7), and Lviv (1907–18) and was active in the Prosvita society and the NTSh. He was coeditor of the Chernivtsi newspaper *Bukovyna* (1896, 1904–6), helped edit the modernist journal *S'vit (Lviv 1906–7), and was chief editor of the pedagogical journal *Uchytel'* (1908–9) and the weekly *Nedilia* (1911).

Shchurat contributed much to the revival of the NTSh after the First World War as its president (1919–25). He was also at the forefront of the campaign for the creation of a Ukrainian university in Lviv. After the failure of that campaign he initiated the idea of establishing the *Lviv (Underground) Ukrainian University and served as its first rector (1921–3), for which involvement he was imprisoned for three months in 1921 by the Polish authorities. He refused to swear allegiance to the new Polish republic. In 1928 he became president of the Society of Writers and Journalists in Galicia. In 1929 he was elected a full member of the VUAN, but in 1930 he renounced his membership in protest against the Soviet show trial of the *Union for the Liberation of Ukraine and the Stalinist repression of Ukrainian intellectuals. After the Soviet occupation of Galicia in 1939, he was elected full member of the AN URSR (now ANU). He was director of the ANU Lviv Scientific Library (1939–41 and 1944–8) and was a professor at Lviv University.

Shchurat published scholarly articles and literary criticism in Austrian, Polish, Czech, and Western Ukrainian periodicals (mainly in *Zapysky NTSh*). His many poems, stories, translations, and literary and political articles were published from 1890 on in *Zoria*, *Dilo*, *Narod*, *Radykal*, *Pravda*, *Zhytie i slovo*, *Hromads'kyi holos*, *Bukovyna*, *Ruslan*, *S'vit*, *Uchytel'*, *Dzvinok*, *Nedilia*, *Zerkalo*, and *Zyz*. His scholarly purview ranged from medieval Ukrainian literature (eg, **Molennii Danyla Zatochnyka*) to that of the 19th century (especially T. Shevchenko, M. Shashkevych, P. Kulish, I. Kotliarevsky, Yu. Fedkovych, Franko, V. Samiilenko, and H. Kvitka-Osnovianenko). Shchurat devoted much attention to Ukrainian-Polish relations, particularly in literature. Among his many publications were booklets on the Bible in Shevchenko's poetry (1904), the Grünwald Song (1906), the Peregrination of Danylo of Korsun (1906), the Pochaiv *Bohohlasnyk* (1908), J. Slowacki in Ukrainian literature (1909), and the Koliivshchyna rebellion in Polish literature to 1841 (1910); an anthology of 19th-century po-

etry in translation (1903); a book of literary essays (1913); a collection of articles about Shevchenko (1914); a book on Shevchenko and the Poles (1917); a collection of articles on the Ukrainian revival in early 19th-century Galicia (1919); and a monograph on the philosophical foundations of Kulish's works (1922).

Shchurat wrote the poetry collections *Lux in tenebris* (1895), *Moi lysty* (My Letters, 1898), *Raz do mene molodist' pryishla* (One Time Youth Came to Me, 1904), *Na trymbiti [sic]* (On the Trembita, 1904), *Istorychni pisni* (Historical Songs, 1907; expanded posthumous edn 1937), and *Vybir pisen'* (A Selection of Songs, 1909) and the narrative poem *V suzdal's'kii tiurmi* (In a Suzdal Prison, 1916). He also wrote the versified prayer book *Iz hlybyny vozzvakh* (From the Depths [He] Called Forth, 1900, 1905) and the religious narrative poem *Zarvanytsia* (1902). He translated into Ukrainian poetry and prose from classical Greek (a book of Horace's odes [1901]), French (eg, *Chanson de Roland* [1895]), V. Hugo, G. Flaubert, G. de Maupassant), German (eg, H. Heine, J.W. von Goethe, D. von Liliencron, P. Lindau), Polish, Russian, Bulgarian, and other languages. Until 1914 his 1907 contemporary Ukrainian *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) was the best Ukrainian poetic rendition of the Rus' epic. Large editions of Shchurat's poetry were published in Lviv in 1957 and 1962, and a book of his selected scholarly works (with his bibliography) appeared in Kiev in 1963.

I. Koshelivets

Platonida Shchurovska

Shchurovska, Platonida [Ščurovs'ka] (married name: Rossinevich), b 1893 in the Cherkasy region, d 1973 in Prague. Educator and conductor. After studying music under O. Koshyts in Kiev, she was assistant conductor of the *Ukrainian Republican Kapelle during its tour of Europe (1919). She lectured at the Ukrainian Higher Pedagogical Institute in Prague and conducted its choir (1923–33). While she taught singing at a secondary school in Uzhhorod, she conducted the Banduryst choir (1934–6). Returning to Prague, she taught at the state conservatory.

Shchurovsky, Petro [Ščurovs'kyj], b 1850 in Poltava, d 1908 in Kursk, Russia. Pianist, conductor, and composer. After graduating from the Moscow Conservatory he served as choirmaster at the Moscow Opera (1878–82) and then worked in smaller centers in the empire. He wrote piano pieces, vocal solos, two orchestral suites, and the operas *Bohdan Khmelnytsky* (1883) and *Vakula the Blacksmith* (unfinished).

Shchurovsky, Tymofii [Ščurovs'kyj, Tymofij], b 1740 in Volhynia, d 15 April 1812. Basilian missionary and church figure. After graduating from a Basilian school and completing his theology training in Rome with a doctorate in canon law, he was apostolic protonotary and then head of the Basilian novitiate in Byten, Volhynia, and hegumen of the monastery in Biała Podlaska. He later administered monasteries throughout the eparchies of Berestia, Volodymyr-Volynskyyi, and Kiev. He published several spiritual poems in Latin and Polish, a collection of religious sayings and slogans (1780), an introduction to canon law and the decrees and decisions (1792), and four volumes of catechism and simple theological instruction (1792). Shchurovsky was especially noted as an orator.

Volodymyr Shchurovsky

Mykola Shchyrbra

Shchurovsky, Volodymyr [Ščurovs'kyj], b 23 February 1890 in Nyzhnii Strutyn, Dolyna county, Galicia, d 4 May 1969 in Dresden, Germany. Physician; member of the Shevchenko Scientific Society. A graduate of Lviv University (1914), he joined the Ukrainian Sich Riflemen (USS) and served at the rank of captain as chief physician of the Eastern Group of the Ukrainian Galician Army and of the First Brigade of the USS. He attended to I. Franko in 1916, while working in the USS hospital in Lviv. After the war he lectured at the Lviv (Underground) Ukrainian University. In 1939 he emigrated and settled in Dresden, where he worked as a hospital physician. His war recollections were published in *Kalendar Chervonoj Kalyny* (1924, 1935) and *Ukraiins'ka Halyts'ka Armiia* (Ukrainian Galician Army, vol 1, 1958).

Shchurovsky, Yurii [Ščurovs'kyj, Jurij], b 28 April 1927 in Kiev. Composer and educator. He graduated from the Kiev Conservatory in 1951 and studied composition with B. Liatoshynsky in 1954. He lectured at the conservatory on musical theory in 1952–5 and then taught music until 1960. He was an editor for the *Mystetstvo* publishing house from 1951, and in 1973 was appointed editor of the *Muzychna Ukraina* publishing house. His compositions include two symphonies (1962, 1966), a string quartet (1949), a piano sonata (1951) and trio (1949), several cello quartets (1966), and some radio and film music.

Shchusev, Aleksei [Ščusev, Aleksej], b 8 October 1873 in Kishinev, Bessarabia gubernia, d 24 May 1949 in Moscow. Russian architect; full member of the St Petersburg (later USSR) Academy of Arts from 1910 and the USSR Academy of Sciences from 1943. A graduate of the St Petersburg Academy of Arts (1897), from 1913 he lectured in various art institutes and designed important buildings in Moscow, including the Lenin Mausoleum (1924), and other Russian and Soviet cities. In Ukraine he oversaw the construction of the Trinity Cathedral at the Pochaiv Monastery (1905–12) and the church on I. Kharytonenko's estate in Natalivka (1908–12), and the restoration of St Basil's Church in Ovruch (1904–11). He drew up plans for the iconostasis of the Dormition Cathedral and the murals in the refectory at the Kievan Cave Monastery (1902–10). After the Second World War he helped plan the reconstruction of Kiev's Khreshchatyk Blvd and the AN URSS (now ANU) Main Astronomical Observatory (1949). N. Sokolov's book about him was published in Moscow in 1952.

Shchutska, Marusia [Ščuc'ka, Marusja], b 1941 in Vereshyna, Hrubeshiv county, Kholm region (now in Poland). Opera singer (soprano). After graduating from the Higher Music School in Łódź in 1970, she sang with the Polish National Philharmonic Orchestra in Warsaw and toured Czechoslovakia, Denmark, Italy, Yugoslavia, and Hungary with the Capella Bydgosciensis. In 1972 she joined the Łódź Opera as a soloist and appeared in roles such as Papagena in W. Mozart's *The Magic Flute*, Olympia in J. Offenbach's *Tales of Hoffmann*, the Priestess in G. Verdi's *Aida*, and Eurydice in C. Monteverdi's *The Legend of Orpheus*.

Shchyrbra, Mykola [Ščyrba] (pseud: M. Kholm'sky), b 6 December 1902 in Lotiv, Hrubeshiv county, Lublin gubernia, d 28 August 1984 in Yalta. Communist activist and publicist. In the 1920s he was a member of the Ukrainian Social Democratic party and then joined the Communist Party of Western Ukraine. In 1944 he was imprisoned in a Nazi concentration camp. Having returned to Poland in 1948, he worked in a publishing house in Warsaw. In 1955 he appealed to the Polish Party leader, E. Ochab, to establish *Nashe slovo*, the Ukrainian newspaper in Poland, and the next year he became its first editor. He was one of the founding members of the *Ukrainian Social and Cultural Society in Poland and served for many years as its vice-president. He wrote poetry, stories, and a novel, which were published in *Nasha kul'tura*, the literary supplement to *Nashe slovo*.

Shchyrsky, Ivan [Ščyrs'kyj] (monastic name: Inokentii), b ca 1650, most likely in the Chernihiv region, d 1714 in Liubech, Chernihiv regiment. Baroque engraver. He studied engraving under O. *Tarasevych at the Vilnius Academy Press (1677–80) and theology and literature at the academy. He worked as a master engraver in Vilnius (1680–3) and then in Chernihiv and Kiev, where he also taught poetics at the Kievan Mohyla College. In 1686 he took monastic vows at the Kievan Cave Monastery, and soon afterward he cofounded the St Anthony of the Caves Monastery in Liubech. Shchyrsky created over 100 copper engravings. Those from his Vilnius period included copies of the Czestochowa and other miraculous icons, coats

Ivan Shchyrsky: *Sailing of the Nymphs* (copper-engraving illustration to Stefan Yavorsky's poem *Echo głosu* [The Voice's Echo, 1689] dedicated to Hetman Ivan Mazepa)

of arms (eg. for A. Kysil), and pictures of Christ carrying the cross and SS Dominic, Thomas Aquinas, John Chrysostom, and Michael Gedroyc. During his time in Ukraine he created many fine, detailed engravings: illustrations for religious and panegyric books, such as L. Baranovych's *Blahodat' i istyna* (Grace and Truth, 1683), L. Krzczonowicz's *Redivivus Phoenix* (1683) and *Ilias oratoria* (1698), S. Yavorsky's *Echo głosu wołającego na puszczy* (Echo of a Voice of One Calling in the Wilderness, 1689), P. Orlyk's *Hippomenes Sarmacki ...* (The Sarmatian Hippomenes ..., 1698), and J. Ornowski's *Bogaty ... wirydarz Zacharzewskich ...* (The Rich ... Orchard of the Zacharzhewskis ..., 1705); L. Baranovych's coat of arms (1683); a depiction of the Dormition (1686); antimensia for Patriarch Adrian of Moscow (1694, with L. Tarasevych and Fedir), Archbishop I. Maksymovych of Chernihiv (1697), and Metropolitan I. Krokovsky of Kiev (1708); the famous engraving *Labarum triumphale ...* (1698) for the poetic *teza* honoring P. Kalachynsky, the rector of the Mohyla College; a portrait of Metropolitan V. Yasynsky (1707); and two large, complex illustrations to poetic theses of scholarly disputes at the Kievan Mohyla Academy in 1708, dedicated to Yasynsky and Field Marshal B. Sheremetev. D. Stepovyk's book about Shchyrsky and the poetic image in Ukrainian baroque engraving was published in Kiev in 1988.

D. Stepovyk

Sheatfish (*Silurus glanis*; Ukrainian: *som zvychainyi*). A large, scaleless, freshwater catfish of the family Siluridae, reaching 5 m in length and up to 300 kg in weight. It is a valuable commercial fish. In Ukraine sheatfish inhabit the Black Sea basin. In Western Ukraine a pygmy sheatfish of a different family (*Amiurus nebulosus*) has been acclimatized; its body length is about 30 cm, and its weight, 500 g.

Shebelynka gas field. One of the largest deposits of natural gas in the former USSR, covering almost 250 sq km in Balakliia and Pervomaiske raions, in Kharkiv oblast.

Ivan Shchyrsky: *Teza* in honor of Prokip Kalachynsky (1690s)

Located in the *Dnieper-Donets Trough, it was discovered in 1950 and has been exploited since 1956. The gas is found at depths of 1,300–2,500 m, primarily in the Carboniferous and Permian strata. It is high in methane (up to 93 percent) and contains some ethane (up to 4 percent), butane, propane, and coal gas. In 1970, 340 wells pumped 31 billion cu m of gas (almost 16 percent of the USSR total and over one-half the total for Ukraine) from the field. The gas is processed by the *Shebelynka Gas Industry Authority and used in industry and for heating in Kiev, Odessa, Mykolaiv, and Dnipropetrovske.

Shebelynka Gas Industry Authority (Shebelynske hazopromyslove upravlinnia, or Shebelynkahazprom). A major gas-processing complex located in Chervonyi Donets, Balakliia raion, Kharkiv oblast. It was established in 1956 to refine and process gas from the Shebelynka gas field. Most of the gas is processed by low-temperature separation plants. The complex includes four gas condensers and five compressor stations.

Shebelynka Rebellion. A peasant uprising in 1829 in Shebelynka *sloboda* and the surrounding villages and *slobody* in Slobidska Ukraine gubernia. It was provoked by the imperial Russian government's implementation of *military settlements in the gubernia and the conversion of the peasants into military settlers. Beginning on 6 June 1829 approx 3,000 peasants joined the rebellion, which was led by S. Demin (Domin) and K. Vedernikov. The revolt was mercilessly and brutally crushed on 11 June 1829; 109 people were killed, and 143 were tried by military court. The two leaders were sentenced to hard labor for life, and 48 men were deported to military settlements in Kherson gubernia.

Bohdan Shebunchak

Shebunchak, Bohdan [Šebunčak], b 26 December 1921 in Solotvyna, Nadvirna county, Galicia. Physician and civic leader. After completing his medical studies at the universities of Lviv (1942–4) and Erlangen (1948) he settled in the United States, where he opened a private practice in Bloomfield, New Jersey. He has been president of the *Ukrainian Medical Association of North America (1969–71) and the *Organization for the Rebirth of Ukraine (1970–8), as well as an executive member of the Ukrainian Congress Committee of America, the World Congress of Free Ukrainians, and the Ukrainian American Coordinating Council.

Sheep farming. A branch of *animal husbandry that breeds and raises sheep for meat, milk, wool, and hides. Sheep are a domestic ruminant artiodactyl of the genus *Ovis* and the family Bovidae. They were domesticated some 8,000 years ago. They grow to 100 cm high at the shoulder and can reach weights of 180 kg (ewes are smaller, up to 100 kg). Sheep are classified by the shape of their tails. Their principal feeds are cultivated and natural grasses, hay, spring straw, silage, and concentrates. Under favorable conditions sheep live 14 to 15 years and produce good wool for 6 to 8 years. The quality of fleece ranges from fine to coarse. The average annual clip from fine-wooled sheep is 5–6 kg of wool; coarse-wooled sheep produce 1–4 kg. The yield of pure wool after washing is 30–50 percent from fine-wooled animals and up to 75 percent from coarse-wooled animals.

Sheep have been raised in Ukraine since the Neolithic period. Sheep farming was widespread in Ukraine, especially in the steppes (before the land was tilled), the Carpathian Mountains (particularly in the high meadows or *polomynty*), and forested areas (where there were extensive

Askaniia sheep

hayfields). Sheep farming declined in importance in the forest-steppe regions of the Right Bank and Galicia as more land was brought under cultivation. Peasant households raised long-haired sheep primarily for domestic needs – for wool, which was used to make blankets and clothing (see *Weaving), as well as for meat and milk. Sheep manure was used as fertilizer. Popular local breeds of sheep included the Gray Sokil and Black Reshetylivka, both of which provided good wool. Wallachian sheep were common in the Carpathians, the Kherson region, and Bukovyna. The Hutsuls made *bryndza* cheese from their milk.

Sheep raising acquired commercial importance in the early- to mid-19th century, when large numbers of Merino sheep were imported and raised on the steppes. The virgin land provided plenty of pasture. The number of fine-wooled Merino sheep in the three steppe gubernias of Ukraine (Kherson, Katerynoslav, and Tavriia) increased from 400,000 in 1823 to 1.9 million in 1837, 3 million in 1848, and 7.1 million in 1866. Most sheep belonged to large landowners, some of whom raised as many as 100,000 sheep at a time. Ukrainian wool became an important export commodity (see *Wool industry). After peaking in the 1870s, sheep raising began to decline in importance. On the world market Ukrainian wool was displaced by cheaper Argentinian and Australian wool. At the same time, the steppes were brought under extensive cultivation. The number of fine-wooled sheep in the steppe gubernias decreased to 1.2 million in 1911–12, and the total number of sheep fell from 9 million in 1883 to 2 million in 1912. The decline in sheep raising in the other six Ukrainian gubernias was not as dramatic: from 6 million sheep in 1883 to 4 million sheep in 1911. Most of the sheep in those areas were coarse-wooled and were kept for strictly domestic use; even there, however, domestic wool was slowly displaced by manufactured textiles, and the area devoted to pasturing sheep was reduced. In Galicia the number of sheep decreased from 650,000 in the 1860s to 300,000 in 1910. The total number of sheep in Ukraine (within the current borders) was approximately 16 million (approx 12 percent of the total livestock) in 1883; by 1912 the figure was down to 7 million (approx 4 percent of all livestock). In the Kuban region at that time there were some 8 million sheep.

The sheep population declined even more during the First World War and especially in the revolutionary period. It began a rapid increase in the 1920s, however, partially owing to the unavailability of manufactured textiles. By 1928, there were 10 million sheep (approx 4 percent of all livestock) within the contemporary borders of Ukraine, and another 3.5 million on other Ukrainian territories. As before the war, the major regions for sheep farming were the Carpathians, Polisia (especially the Chernihiv region), the Crimea, and the Kuban.

The collectivization of agriculture and the man-made famine of 1932–3 again resulted in a dramatic decrease in the sheep population. Many animals were slaughtered by their owners instead of being turned over to the collective farms; others died because of neglect and feed shortages on the new farms. Their number in the Ukrainian SSR fell from 8.1 million in 1928 to 2 million in 1933, but rebounded to 4.7 million in 1940. After the Second World War the number of sheep increased steadily for several years and reached 5.8 million in 1950 and 11.1 million in 1960. Since then sheep farming has stagnated. The number of sheep in Ukraine in recent years has been 8.3 million (1970), 9 million (1980), and 8.8 million (1988).

Today most sheep in Ukraine are raised on collective farms (6.3 million in 1988). The commercial importance of wool has prompted the concentration of sheep farming especially in the traditional regions of commercial wool production (southern Ukraine). Relatively few private households keep sheep for domestic needs. Much breeding has been done in the 20th century to improve the quality of Ukrainian sheep, and particularly their wool production. The Askaniia sheep was bred by M. Ivanov at the Askaniia-Nova Nature Reserve in the 1920s, and several strains have been improved by crossbreeding. Merino sheep are an important source for much crossbreeding, and most Ukrainian sheep now are fine-wooled. Other common breeds are the *Précoce* (in Polisia and the forest-steppe region), *Tsigai* (in Donetsk, Crimea, and Odessa oblasts), *Karakul* (in Poltava, Odessa, and Chernivtsi oblasts), and *Sokil* (in Poltava oblast). Relatively few sheep are raised primarily for meat or milk: annual production of mutton and lamb (together with some goat meat) was 73,000 t in 1960 but only 42,000 t in 1987. Problems of sheep breeding and raising are studied at the Scientific Research Institute of Animal Husbandry of the Forest-Steppe and Polisia of Ukraine, at the Ukrainian Scientific Research Institute of Animal Husbandry of the Steppe Regions, and at various oblast agricultural research stations.

Vivcharstvo (Kiev 1971)
Krotov, A. *Vivcharstvo* (Kiev 1978)

V. Kubijovyč

Sheffer, Tamara [Šeffeř], b 23 April 1909 in Poltava. Musicologist. She graduated from the Kiev Conservatory in 1938 and later lectured there (1945–53). She was a coauthor of *Muzykal'naia kul'tura Ukraïnskoï SSR* (The Musical Culture of the Ukrainian SSR, 1957, repub 1961), *Narysy z istorii Ukraïns'koi muzyky* (Essays in the History of Ukrainian Music, 2 vols, 1964), and *Ryl's'kyi i muzyka* (Rylsky and Music, 1969) and the author of a monograph on L. Revutsky (1958).

Sheikovsky, Kalenyk [Šejkovs'kyj], b 1835 in Kamianets-Podilskyi, d 1903 in Menzelinsk, Ufa gubernia, Russia. Writer, linguist, educator, and ethnographer. As a student at Kiev University (1858–61) he helped organize Ukrainian Sunday schools in Kiev and published for them a book on domestic science (2 parts, 1860). He also wrote an ethnographic study on Podilian folkways (two parts, 1859–60). In 1876 he was exiled to Ufa gubernia for printing a Ukrainian translation of Ovid's *Metamorphoses*. His most important work was a Russian dictionary of vernacular Ukrainian, which contained many little-known dialectal words and his own neologisms. The first fascicle (*A-Byjak*) appeared in 1861. Because of the ban on Ukrainian-language publications (1863), financial difficulties, and the loss of materials in a fire, he managed to publish only two more fascicles (*T-Xlivec'*, 1884, 1886).

Sheka, Ivan [Šeka], b 16 October 1907 in Haichul (now Novoukrainka), Oleksandrivske county, Katerynoslav gubernia. Chemist; AN URSR (now ANU) corresponding member since 1967. A graduate of the Mykolaiv Institute of People's Education (1929), in 1933 he joined the ANU Institute of Chemistry (renamed General and Inorganic Chemistry). Sheka's research dealt with the physical chemistry of nonaqueous solutions, co-ordination chemistry, and the technology of rare elements. He introduced into industry several novel processes for obtaining indium, zirconium, and hafnium in various forms (pure powders, oxides, etc). He is the coauthor of *The Chemistry of Gallium* (English trans 1966).

Shekera, Anatolii [Šekera, Anatolij], b 17 May 1935 in Vladivostok. Ballet dancer and choreographer. In 1956 he completed study at the Perm Choreography School, and in 1964, the ballet studio at the Moscow State Theater Institute. He danced in the Lviv (1964–7) and the Kiev (1967–77; from 1974 as principal ballet master) theaters of opera and ballet; since 1977 he has been the choreographer in the latter theater.

Petro Shekeryk-Donykiv

Shekeryk-Donykiv, Petro [Šekeryk-Donykiv], b 20 April 1889 in Holove, Kosiv county, Galicia, d ? in Siberia. Hutsul civic and political leader. He was active in the Sich movement, H. Khotkevych's theater, and the Ukrainian Radical party. He was a member of the Ukrainian National Rada in Stanyslaviv in 1918–19 and a delegate to the La-

bor Congress in Kiev. An effective speaker, he was elected deputy to the Polish Sejm (1928–30) and mayor of Zhabie (1933–9). He was arrested by the Soviets in 1939 and deported to Siberia, where he disappeared. He collected ethnographic materials on the Hutsuls and wrote short stories about the opryshoks.

Shekhaiev, Roman [Šexajev] (Shekhai), b ? , d 4 July 1977 in Argentina. Ukrainian plant selection scientist. A specialist in the selection of potatoes and beans in Ukraine (1923–43), he headed the agronomy department of the Institute of the Fermentation Industry in Kiev and organized the Ukrainian Scientific Research Station for Potato Cultivation. Shekhaiev moved to Germany in 1943 and to San Miguel, Argentina, in 1950, where he worked at Tucumán University, directed a research station that he established in Catamarca, and developed potato varieties suitable for the subtropical climates of northern Argentina, Bolivia, and Peru.

Shekhonin, Mykola [Šexonin], b 1882, d 1970 in Argentina. Architect. A graduate of the St Petersburg Institute of Civil Engineering, from 1909 he lived in Kiev and taught architecture in various technical schools there, such as the Kiev Building Tekhnikum, the Kiev Polytechnical Institute, and the Kiev State Art Institute. From 1932 he headed the Second Architectural Art Workshop in Kiev. He created the plans for the façade of the Kiev Public Library (1909), the Kiev Military Engineering School (1913–17, 1918–20), the Ukrainian Printing Pavilion at the Agricultural Exhibition in Kiev (1913), the tobacco factory in Romen (1925), the Building of State Institutions on Khreshchatyk Blvd in Kiev (1929–31), the Food Workers' Club in Kiev's Podil district (1929–32), and the residential building of employees of the grain delivery department on Lysenko St in Kiev (1933–5). A postwar refugee, from 1950 he lived in Argentina.

Shekhovych, Severyn [Šexovyč], 1829–72. Galician journalist and writer. In the 1840s he was a member of a Russophile literary and civic circle known as the Pogodin Colony. He edited and published the first women's magazines in Galicia, *Lada* (1853) and *Rusalka* (1868–70), and served as editor or coeditor of many newspapers: *Zoria halytska* (1854), *Semeinaia biblioteka* (1855–6), *Pys'mo do hromady* (1864–5), *Shkola* (1865), *Hospodar* (1869), *Pravotar* (1868–9), and *Chytanka* (1879, 1886). He also wrote verses and novelettes in the *yazychiie, including *Pavlyna Petrovna* (1855) and *Popadianka i popadehraftianka* (The Priest's Daughter and the Priest-Count's Daughter, 1862).

Shekhtman, Manuil [Šextman, Manuïl], b 2 February 1900 in Lypnyky, Ovruch county, Volhynia gubernia, d 1941. Painter. He studied at the Kiev Art School (1913–20) and under M. Boichuk at the Kiev State Art Institute (1922–7). In the 1920s he belonged to the *Association of Revolutionary Art of Ukraine. From 1934 he worked in Moscow. His easel paintings include *Dina* (1926), *Expulsion of the Jews* (1927), *Refugees* (1929), and *Horrors of War* (1938). Under Boichuk's supervision he painted the frescoes *Corvée* and *Harvest Festival* at the Peasant Sanatorium in Odessa. They were condemned as 'nationalist formalist' and destroyed.

Manuil Shekhtman: *Refugees* (tempera, 1929)

Shelduck (*Tadorna tadorna*; Ukrainian: *halahaz, pehanka*). A large, short-billed, Old World duck of the family Anatidae, with white, black, and red plumage. In Ukraine it is found in the steppe zone, from the Danube River east to the shores of the Sea of Azov. It winters in western Europe. The down of shelducks is of commercial value.

Petro Shelest

Shelest, Petro [Šelest], b 14 February 1908 in Andriivka, Zmiiv county, Kharkiv gubernia. Communist party and Soviet government leader. A graduate of the Mariupil Metallurgical Institute (1935), from 1940 he worked as a Party official in defense industries in Kharkiv, Cheliabinsk, and Saratov, and from 1948 as a plant director in Leningrad and Kiev. A protégé of N. Khrushchev and M. Pidhirny, he rose in the Party to the positions of second secretary of the Kiev City Committee (1954), second (1954) and first (1957) secretary of the Kiev Oblast Committee, CC CPU candidate (1954) and member (1956), CC CPU Presidium candidate (1960) and member (1961), CC CPSU member (1961), CC CPU secretary and chief of the CC CPU Bureau for Industry and Construction (1962), CPU first secretary and member of the Presidium of the Ukrainian Supreme Soviet (1963), CC CPSU Presidium candidate (1963) and member (1964), and CC CPSU and CC CPU Politburo member and member of the Presidium of the USSR Supreme Soviet (1966).

As the CPU first secretary Shelest pursued domestic policies that fostered renewed, though limited, forms of cultural and educational Ukrainization and a measure of

autonomous administration and economic development. To some extent he tolerated the *dissident movement and the activities and patriotic writings of the nationally conscious intelligentsia in Ukraine. Consequently he came into conflict with L. Brezhnev and others in the CPSU Politburo. In 1970 Shelest published *Ukraino nasha Radians'ka* (O Ukraine, Our Soviet [Land]), a popular book that mentioned Ukraine's glorious Cossack past and cultural achievements. In January 1972 the Moscow leadership attacked the 'national deviations' in Ukraine by launching a wave of arrests of Ukrainian dissidents. In May Shelest was abruptly replaced as first secretary by V. *Shcherbytsky and transferred to Moscow, where he served in the largely symbolic post of Soviet deputy premier for 11 months. His book was harshly denounced (May 1973) for its ideological and factual 'errors,' including 'nationalism,' 'idealization of the past,' 'economic autarchism,' and 'national narrow-mindedness,' and he was rebuked by Shcherbytsky for Party failures in Ukraine. Soon after his removal from the CPSU Politburo his many supporters in the CPU were purged. A collection of his speeches, *Idei Lenina peremahaiut'* (Lenin's Ideas Triumph, 1971), came out just before his downfall.

 V. Markus, R. Senkus

Shelest, Vasyl [Šelest, Vasyl'], b ?, d 1768 in Kodnia, near Zhytomyr. Zaporozhian Cossack and haidamaka leader. In the spring of 1768 he organized a rebel detachment in Kholodnyi Yar, near Chyhyryn, consisting of peasants, Zaporozhians, and Left-Bank Cossacks. During the Koliivshchyna rebellion he led them through the Cherkasy region. He was captured by a Polish punitive expedition and executed.

Shelest, Vitalii [Šelest, Vitalij], b 15 October 1940 in Kharkiv. Theoretical physicist; AN URSR (now ANU) corresponding member since 1969; son of P. *Shelest. A graduate of Kiev University (1962), he received a doctorate in 1968 for his work under N. *Bogoliubov (M. Boholiubov) on hadronic models. He was head of the Department of Theoretical Particle Physics at the ANU Institute of Theoretical Physics in 1969–74; since 1976 he has worked at institutions of the USSR State Standards Committee in Moscow. Shelest has made several significant contributions in the fields of particle theory and statistical physics. His book *Fizyky sperechaiut'sia* (Physicists Argue, 1973), written with O. Rozhen, reveals him to be a perspicacious observer of the international physics community and a gifted popularizer of physics.

Sheliah (also *sheleh*, *sheliuh*). The Ukrainianized name of the Polish-Lithuanian 16th- and 17th-century currency known as the *szeląg* or solidus, of the schillings used in Polish-ruled Prussian and Brandenburg towns, and of the solidi used in Swedish-ruled Baltic towns in the 17th century. The *szeliąg* or solidus of the Polish-Lithuanian Com-

monwealth was at first a silver coin and then a paper note. Use of the Swedish Baltic coins, issued by Queen Christina, Charles X Gustav, and Charles XII, and the Polish copper *boratynki* (designed by T. Boratini) was particularly widespread. A *sheliah* was worth one-third of a Polish-Lithuanian grosz. It was equal to two-ninths of a Russian kopeck.

Sheliah-Sosonko, Yurii [Šeljah-Sosonko, Jurij], b 10 January 1933 in Kiev. Botanist; full member of the AN URSR (now ANU) since 1990. A graduate of Chernivtsi University (1956), he became an associate of the ANU Institute of Botany in 1962 and one of its department heads in 1972. His major research interest is theoretical and applied geobotany. He has prepared guides to several nature reserves outside Ukraine and was the editor and an author of *Rastitel'nyi mir* (The Plant World, 1985), in the series *Priroda Ukrainskoi SSR* (Nature in the Ukrainian SSR).

Sheliushko, Mykola [Šeljuško], b 18 October 1912 in Kamianske (now Dniprodzerzhynske), Katerynoslav county, d 6 February 1983 in Lviv. Opera singer (tenor). After graduating from the Lviv Conservatory in 1950, he taught there and sang as a soloist with the Lviv Theater of Opera and Ballet, with which he appeared as Bohun in K. Dankevych's *Bohdan Khmelnytsky*, the False Dmitri in M. Mussorgsky's *Boris Godunov*, and Jontek in S. Moniuszko's *Halka*.

Sheliuzhko, Lev [Šeljuško], b 26 March 1890 in Kiev, d 23 August 1969 in Munich. Entomologist. A graduate of Kiev University (1912), he worked at the AN URSR (now ANU) Zoological Museum (1920–33), to which he donated his butterfly collection, at the lepidoptera museum at Kiev University (1939–43), and at the Bavarian zoological collection in Munich (1945–69).

A shelterbelt in Ukraine

Shelterbelt. A barrier of trees and shrubs cultivated to protect crops from wind, reduce soil erosion on fields, and maintain higher water levels. Shelterbelts are located in Ukraine primarily in the steppe and forest-steppe regions. They first came into use in 1809, when V. Lomykovsky planted tall trees around the fields of his Poltava gubernia estate. In the 1890s V. Dokuchaev and Yu. Vysotsky undertook ground-breaking research in Ukraine on the use of shelterbelts for drought control. Shelterbelts started

coming into common use in Ukraine early in the 20th century and were developed systematically around mid-century as part of a state afforestation program, particularly in 1938–9 and 1948–52. Oaks, pines, birches, and poplars commonly make up higher-elevation windbreaks; lindens, maples, and apple and pear trees often form the lower shelterbelts.

Shelton, Ian (Shevchuk), b 30 March 1957 in Winnipeg, Ukrainian-Canadian astronomer. He studied at the universities of Manitoba and Toronto (M SC, 1990). As resident astronomer at the University of Toronto observatory on Las Campanas Mountain in Chile, he discovered a supernova on 23 February 1987, the first since 1604. It was officially named the Supernova Shelton 1987A.

Sheludko, Dmytro [Šelud'ko], b 21 September 1892 in Irkliiv, Zolotonosha county, Poltava gubernia, d 8 May 1954 in Sofia, Bulgaria. Linguist and literary scholar. He studied at Kiev, St Petersburg, and Halle universities and worked for some time in Germany, Italy, and Spain. From 1930 he taught at Köln University. In 1931 he published a 60-page article on Germanisms in the Ukrainian language with a dictionary of approx 700 loanwords. From 1933 he lived in Bulgaria. He also wrote articles on the Old French epics, Provençal literature, Bulgarian-Ukrainian literary relations, and T. Shevchenko and Bulgarian literature.

Serhii Shelukhyn

Shelukhyn, Serhii [Šeluxyn, Serhij] (Šeluchyn; pseud: S. Pavlenko), b 1864 in Poltava gubernia, d 25 December 1938 in Prague. Lawyer, civic activist, and state figure. A judge in various centers, he was active in the Ukrainian movement from 1905, as head of the Revolutionary Committee in Odessa and a member of the Ukrainian Party of Socialists-Federalists. In 1917–18 he was a member of the Central Rada, a general judge in the UNR, minister of justice in the governments of V. Holubovych and V. Chekhivsky, and a state senator in the Hetman government. He also headed the Ukrainian State delegation in peace negotiations with the RSFSR (1918) and participated in the Paris Peace Conference (1919) as a legal adviser. He emigrated to Czechoslovakia (via Vienna) in 1921 and taught criminal law at the Ukrainian Free University and the Ukrainian Higher Pedagogical Institute (1924–5), headed the Ukrainian Law Society and the Ukrainian Committee in Czechoslovakia, was vice-president of the People's Ukrainian Council, and wrote about the law code *Ruskaia Pravda*, the Celtic origin of Rus', the history of Ukrainian law, and international politics in Ukraine.

The first *shematyzm* of the Ukrainian Catholic eparchy of Toronto (1948–63) and the 1938 Lviv *shematyzm*

Shematyzm (from Latin *schematismus*; German: *Schematismus*; Polish: *szematyzm*). An annual handbook of institutions and officeholders. In the Austrian Empire the government published one in German for the entire empire and one in German (1785–1869) or Polish (1780–1, 1870–1914) for Galicia and Lodomeria. It listed all dignitaries, functionaries, bishops, schools, teachers, and officers of community organizations.

The Ukrainian Catholic church published eparchial *shematyzmy* containing a historical survey of the eparchy and information about all clerics, other persons active in church life, parishes, church organizations, and church property. They came out annually (with occasional interruptions) from the early 19th century until the Second World War, first only in Latin, then in both Latin and Ukrainian, and finally only in Ukrainian. Directories for Mukachiv eparchy were published from 1814, for Peremyshl eparchy from 1828, for Lviv archeparchy and Križevci eparchy from 1832, for Prešov eparchy from 1848, and for Stanyslaviv eparchy from 1886. The last ones appeared in Lviv in 1944 and in Prešov in 1948. The Roman Catholic church published *schematismi* for Lviv archdiocese (1814–1915, 1917–39) and Peremyshl diocese (1819–1914, 1916–35), and the Armenian Catholic church for its Lviv archdiocese (1843–1939). The Orthodox archeparchy of Bukovyna issued a *schematismus* from 1841 until 1914, and the Apostolic Administration in the Lemko region published one from 1936 until the Second World War. The Ukrainian Basilian Fathers published a *shematyzm* of their order in 1867 and have issued a *catalogus* from Rome every few years since the First World War. The fullest collections of such ecclesiastical directories are preserved in the libraries of Rome, Vienna, and Warsaw. They have not been published in Soviet Ukraine.

In the West only a few such directories have been compiled by the Ukrainian Catholic church. In 1951 an annual English-language directory of Philadelphia archeparchy was first published. Jubilee *shematyzmy* were published by Toronto eparchy in 1963, by Saskatoon eparchy in 1961, and by the Byzantine Ruthenian metropolitan province in Pittsburgh in 1984. In addition, annual Ukrainian Catholic and Orthodox almanacs published in Toronto, Yorkton, and South Bound Brook, New Jersey, have listed the names and addresses of Ukrainian clergy outside the USSR.

I. Patrylo

Serhii Shemet

Volodymyr Shemet

Shemet, Serhii [Šemet, Serhij], b 1875 in Poltava gubernia, d 1957 in Australia. Engineer and civic and political activist; brother of V. *Shemet. A landowner in the Poltava region, he was a founding member of the *Ukrainian Democratic Agrarian party in Lubni (1917). He favored the Ukrainianization of the Hetman government and opposed its overthrow in November 1918. After emigrating to Tarnów in 1919 and then to Vienna, Berlin, and Paris he became active, with V. Lypynsky, in the monarchist movement: he was a member of the *Ukrainian Union of Agrarians-Statists (USKhD), a contributor to the journal *Khliborob'ska Ukraina* and other hetmanite publications, personal secretary to Hetman P. Skoropadsky, and a member of the USKhD Central Council.

Shemet, Volodymyr [Šemet], b 1873, d 14 May 1933. Civic and political activist; brother of S. *Shemet. A landowner in the Poltava region, he was a member of the *Brotherhood of Taras, a deputy to the First Russian State Duma in 1905, and publisher of the paper *Khliborob* in Lubni (1905). During the First World War he helped organize a private Ukrainian gymnasium in Kiev (1915–16). He was a founding member of the *Ukrainian Democratic Agrarian party (1917) and a deputy from Poltava gubernia to the Central Rada. From 1919 he was a research associate of the Ukrainian Academy of Sciences. Under the Soviet regime he suffered political persecution and died of starvation.

Shepa, Antin [Šepa], b 17 April 1928 in Pidhirne, Transcarpathia. Painter. In 1954 he graduated from the Lviv Institute of Applied and Decorative Arts, where he studied under R. Selsky, Y. Bokshai, and A. Erdeli. His canvases are mostly landscapes, such as *The Carpathian Region* (1966), *The Hutsul Region* (1968), and *Old Transcarpathia* (1969). He has also painted murals in various public buildings, such as *Carpathian Opryshoks*, in the trade center in Bushtyna, Transcarpathia (1968), and *Highland Wedding* and *The Severe Beskyds*, in the restaurant at Nyzhni Vorota, Transcarpathia (1969).

Edmund Sheparovych

Ivan Sheparovych

Sheparovych, Edmund [Šeparovyč], b 1889 in Galicia, d 1967 in Vienna. Military officer. During the First World War he was a cavalry officer in the Austrian army. In 1919 he joined the Ukrainian Galician Army and commanded a reserve cavalry regiment in Stryi. From June 1919 he commanded the First Cavalry Brigade. In Vinnytsia he organized the First Reserve Cavalry Regiment. In 1920 he commanded the Third Cavalry Regiment of the Red Ukrainian Galician Army, which rebelled against the Bolsheviks in April and conducted partisan warfare against H. *Kotovskyy in Kherson and Kiev gubernias before joining up with the UNR Army. In late 1920 Sheparovych emigrated to Vienna, where he worked as a banker and businessman.

Sheparovych, Ivan [Šeparovyč], b 1889 in Kolodiivka, Stanyslaviv county, Galicia, d 3 December 1969 in New York. Co-operative and civic leader; brother of Yu. *Sheparovych. In the 1920s he organized and headed the Stanyslaviv branch of Silskyyi Hospodar. Then he served on the society's board of directors in Lviv and represented the society in the Agricultural Chamber, over which he presided in 1941–4. After emigrating to the United States he organized Ukrainian co-operatives and engaged in émigré political activity. From its inception he presided over the Ukrainian Economic Advisory Association (1957–63). As the US president of the *Ukrainian National Democratic Alliance he was a key member of the émigré Ukrainian National Council.

Sheparovych, Lev [Šeparovyč], b 4 March 1888 in Kolodiivka, Stanyslaviv county, Galicia, d 1 June 1941 in Cracow. Military officer. A student of electrical engineering at the Karlsruhe Polytechnic, during the First World War he was a captain in the Austrian army. When the November Uprising broke out in 1918, he took part in occupying the central postal and telegraph building in Lviv and broadcasting the proclamation of the Western Ukrainian National Republic. A captain in the Ukrainian Galician Army (UHA), he organized and commanded the Communications Regiment in Stanyslaviv. From July 1919 he was chief of telegraph services at the Supreme Command. In April 1920, while serving in the UHA Technical Battalion in Balta, he established contact with Ukrainian partisan units and helped persuade the battalion to join Gen M. Ome-lianovych-Pavlenko's UNR Army against the Red Army. In

Lev Sheparovych

Yuliiian Sheparovych

the interwar period he headed the Lviv office of the German Siemens company.

Sheparovych, Olena. See Fedak-Sheparovych, Olena.

Sheparovych, Yuliiian [Šeparovyč, Julijan], b 16 February 1886 in Kolodiivka, Stanyslaviv county, Galicia, d 28 July 1949 in Munich. Military and community figure; brother of I. *Sheparovych. He studied law at Lviv University. During the First World War he was an artillery officer in the Austrian army. As a major in the Ukrainian Galician Army (UHA), in January 1919 he commanded the Stanyslaviv Battery during battles with the Poles near Lviv and then the Third Artillery Regiment in the Third Berezhany Brigade. After the disintegration of the UHA in 1920, he was chief of staff in the anti-Bolshevik partisan force commanded by A. Volynets in Volhynia. After returning to Galicia in the summer of 1920, he founded and then directed the Co-operative Union in Stanyslaviv. From 1925 he sat on the board of directors of *Tsentrosoiuz, and from 1930 chaired the board. He also headed the *Moloda Hromada society in Lviv. During the German occupation of Galicia he was an official of the Landwirtschaftliche Zentralstelle in Lublin and defended the interests of Ukrainian farmers and co-operatives. After the war he emigrated to Germany.

Gen Volodymyr Shepel

Shepel, Volodymyr [Šepel'], b 1888, d ? Military officer. He was lieutenant colonel in the UNR Army. During the Ukrainian-Polish War he commanded the Krukenychi Group of the Ukrainian Galician Army (to June 1919). Later he was a training officer of the First Recruit Regiment of the UNR Army in Kamianets-Podilskyi. In 1920 he commanded a brigade of the Fourth Gray Division and of the Second Volhynian Division. Eventually he was promoted to brigadier general.

Shepetivka [Šepetivka]. III-8. A city (1990 pop 51,000) on the Huska River and a raion center in Khmelnytskyi oblast. It was first mentioned in historical documents in 1594. At the end of the 16th century it was granted the rights of Magdeburg law. It belonged to the Polish Commonwealth until 1793. Under Russian rule Shepetivka was part of Iziaslav county in Volhynia gubernia. The town's owners, the Sanguszko family, introduced some manufacturing in the town: they built a woolen-cloth factory in 1816 and a sugar refinery in 1843. The Kiev-Brest railway line built through Shepetivka in 1873 stimulated further economic growth. In 1919 the town was the site of battles between the Sich Riflemen and Bolshevik forces. In 1923 Shepetivka was granted city status and was chosen as the administrative center of an okruha. In 1930 it became a raion center of Vinnytsia and in 1937 of Khmelnytskyi oblast. The city is an industrial and transportation center. It is the junction of several trunk lines and highways. It has metalworking shops servicing the railway industry, a farm machinery plant, building-materials plants, and a food industry.

Shepitko, Larysa [Šepitko], b 6 January 1938, d 2 July 1979. Film director and actress. She acted in the film *Tavriia* (1959, Kiev Artistic Film Studio) and completed study at the State Institute of Cinematography in Moscow (1963, pupil of O. Dovzhenko). Her thesis film, *The Heat*, 1964, received an award at the Karlovy Vary film festival in Czechoslovakia, and *The Ascent*, 1972 was awarded the Golden Bear at the Berlin Festival. She made three other films; the last one, *Farewell*, 1979, was completed after her tragic death in an automobile accident.

Sheptytsky, Andrei [Šeptyc'kyj, Andrej] (Szeptycki; secular name: Roman Oleksander), b 29 July 1865 in Prylbychi, Yavoriv county, Galicia, d 1 November 1944 in Lviv. Church, cultural, and civic figure; metropolitan of Halych, archbishop of Lviv, and bishop of Kamianets-Podilskyi. He was a member of a prominent Ukrainian-Polish noble family, which included several influential Ukrainian (Uniate) churchmen, on his father's side, and the Fredros, a prominent Polish family, on his mother's side. Although baptized in the Roman Catholic church, he petitioned the Vatican to change his rite and in May 1888 entered the Basilian Greek Catholic monastery in Dobromyl. In August 1892, after finishing his primary theological training, he was ordained by Bishop Yu. Pelesh. He then completed his studies at the University of Cracow (PH D in law, 1894) and, in theology and philosophy, at the Jesuit seminary in Cracow.

Sheptytsky quickly rose through the Greek Catholic church ranks: he served as master of novices in Dobromyl (1893-6), hegumen of St Onuphrius's Monastery in Lviv (1896-7), and hegumen and professor of theology at the

Metropolitan Andrei Sheptytsky

Krystynopil Monastery. He also founded the journal *Missionar* (1897). He was consecrated as bishop of Stanyslaviv in September 1899 and was enthroned as metropolitan of Halych, archbishop of Lviv, and bishop of Kamianets-Podilskyi in January 1901. He was also a member and vice-marshal of the Galician Diet (from 1901) and a member of the Austrian House of Lords and the Imperial Ministerial Council (from 1903). In these capacities he often spoke in support of Ukrainian rights in Galicia and agitated for the establishment of Ukrainian schools and a university. Although his proposals were initially met with skepticism by many Ukrainians in Galicia, who feared his conservatism and believed he had been placed at the head of the Greek Catholic church to help Latinize and Polonize it, his forceful defense of Eastern church traditions and rights and of the Ukrainian movement soon won him great support and admiration (his condemnation of M. Sichynsky's 1908 assassination of Vicegerent A. Potocki, however, conflicted with wide popular support for the act).

During the Russian occupation of Galicia in the First World War, Sheptytsky was arrested (September 1914) and deported. Distrusted by the tsarist government for his Austro-Hungarian loyalties, missionary Catholic zeal, and high standing among Ukrainians, he was detained, first in Kiev and then in Nizhnii Novgorod, Kursk, Suzdal, and Yaroslavl, before being released after the February Revolution of 1917. He then traveled briefly to Petrograd and Kiev, where he met with members of the *Central Rada.

After his return to Lviv in September 1917, Sheptytsky quickly engaged in church affairs and the struggle for

Ukrainian independence. In his last speech in the Austrian House of Lords (February 1918), concerned with the Brest-Litovsk Peace Treaty, he supported the transfer of the Kholm region to the Central Rada and the general principle of national self-determination. As a member of the Ukrainian National Rada he supported the creation of the Western Ukrainian National Republic and lobbied for recognition of the new state. For this stance he was put under virtual house arrest by the Polish government and confined to Lviv from November 1918 to December 1919. When he was allowed to leave the city, he traveled extensively for over two years throughout Western Europe and North and South America, visiting Ukrainian emigrants and rallying support for the Ukrainian movement in Galicia. He lobbied Western political leaders and Catholic officials, stressing the humanitarian aspects of the Ukrainian movement. When, during his return in September 1923, he entered Poland, he was detained in Poznań for his anti-Polish activities before being permitted to proceed to Lviv in January 1924.

Sheptytsky's political influence among Galician Ukrainians was greatly enhanced by his activities during the struggle for Ukrainian independence and after. He maintained good relations with a variety of political leaders and organizations, particularly the influential Ukrainian National Democratic Alliance, and he spoke out against the *Pacification campaign in 1930 and interceded with the Polish government both directly and through the Vatican. He also did much to reinforce the Ukrainian character of his church (although this caused a negative reaction from the Polish Roman Catholic church) and to strengthen its ties to the laity. In 1931 he sponsored the creation of the *Ukrainian Catholic Union to further the church's teachings and social-political influence. He was denounced by the Ukrainian pro-Soviet groups in Galicia, especially after his strong criticism of the man-made famine of 1932–3 in Soviet Ukraine and his condemnation of communism. His relations with the radical nationalist camp were also often strained, particularly when he criticized the terrorism and assassinations of Polish officials carried out by the Organization of Ukrainian Nationalists.

Sheptytsky was an active and dynamic pastor who frequently issued pastoral letters commenting on a variety of religious and social issues. He convoked eparchial synods in 1905 and during the Soviet and German occupations of Western Ukraine (annually in 1941–3), and convened large meetings of Greek Catholic bishops (including bishops from Poland, Czechoslovakia, Yugoslavia, and North America) in Lviv in 1927 and in Rome in 1929. He also hosted the first synod of Eastern eparchs in Lviv (1940). In 1904 he established the *Studite Fathers in Galicia; in 1906 he prepared the order's rules (the *Typicon*) with his brother, Klymentii; and in 1913 he introduced the congregation of the *Redemptorist Fathers into Galicia. He dispatched many priests to minister to Ukrainian immigrants in the Americas, and arranged the nomination of the first Greek Catholic bishops for both the United States (S. Ortynsky in 1907) and Canada (N. Budka in 1912). While attending the Eucharistic Congress in Montreal in 1910 he made his first visitation to Ukrainian settlers throughout the continent. In the interwar period Sheptytsky actively supported the *Catholic Action movement and provided funds and other assistance for its various organizations and projects, and the Ukrainian Youth for Christ festival in 1933. In

1928 he founded the *Greek Catholic Theological Academy, which soon became a leading center for the study of Eastern Catholicism.

Sheptytsky was a generous patron of the arts, education, and various charitable causes. A church museum founded by him in 1905 grew to be one of the most important Ukrainian museums of its time (see *National Museum). Later renamed the Ukrainian National Museum and the Lviv Museum of Ukrainian Art, from 1913 it occupied its own impressive premises in Lviv. The museum acquired a large collection of icons, church artifacts, textiles, folk art, documents and books, and contemporary Ukrainian art, and published its own books and catalogues. Sheptytsky was a benefactor of the Novakivsky Art School and provided financial support to such artists as V. Diadyniuk, M. Sosenko, M. Boichuk, O. Kurylas, and P. Kholodny, Sr. In 1902 he founded the *Narodnia Lichnytsia society, which later established and maintained a large modern hospital in Lviv. He also donated land for an agricultural school run by the Prosvita society in Myluvannia; cofounded the Land Mortgage Bank (1910); provided funds for the Prosvita, Ridna Shkola, and other societies; and donated land in Pidliute to the Ukrainian scouting organization *Plast, for a camp.

Throughout his life Sheptytsky was especially concerned with expanding the role and prestige of the Uniate church. He first traveled to the Russian Empire in 1887 to meet with intellectuals (eg, the Russian philosopher V. Solovev and the prominent Ukrainian historian V. Antonovych) who were favorably disposed toward the church union. Under the strong influence of the Jesuits, who were actively proselytizing in Russia, he maintained many contacts with individual Catholics there. His title of bishop of Kamianets-Podilskyi, an eparchy located in the Russian Empire but in fact inactive, gave him the right to claim responsibility for all Eastern rite Catholics in the empire. Pope Pius X acknowledged this right in 1907–8, and subsequent popes reaffirmed it. In 1907 Sheptytsky formally organized the Russian (Eastern rite) Catholic church and appointed the Russian A. Zerchaninov as his administrator of Eastern rite Catholics throughout the empire, and the next year he traveled incognito to Russia and Ukraine to make contact with Catholic and Uniate supporters. Later, during his brief detention in Kiev in 1914, he managed secretly to appoint Y. Botsian as Uniate bishop of Lutske and D. Yaremko as bishop of Ostrih. Before leaving the Russian Empire in 1917, he convoked a synod of the Russian Catholic church in Petrograd and appointed the Studite L. Fedorov as his exarch for Russia. He also briefly visited Kiev, where he appointed M. Tsehelsky as his administrator for Ukrainian Catholics in eastern Ukraine.

In practice, however, Sheptytsky's efforts to establish a Uniate presence in the Russian Empire, especially eastern Ukraine, met with little success. The Russian Catholic church never attracted more than a few thousand adherents, and most Orthodox Ukrainians rejected the overtures, despite their great personal regard for the metropolitan (who always maintained good relations with such leaders as Hetman P. Skoropadsky, S. Petliura, and D. Doroshenko). Metropolitan Sheptytsky's prestige was enhanced in 1938 when he condemned the Polish government's persecution of Orthodox believers and destruction of Orthodox churches in Kholm and Volhynia. Sheptytsky was somewhat more successful in improving relations

with Western churches. From 1907 to 1927 he was a leading participant in a series of ecumenical congresses held in Velehrad, Czechoslovakia. He helped establish pro-union organizations in the Netherlands, Belgium, and even England, and he attracted several prominent converts to Eastern Catholicism.

The Second World War was a difficult time for Sheptytsky and the entire Ukrainian Catholic church. During the first Soviet occupation of Western Ukraine (1939–41) he remained in Lviv and tried to defend his church; he issued several pastoral letters exhorting his faithful to resist the atheism imposed by the regime. Although much church property was confiscated and most religious schools and other institutions were closed down, the authorities did not harm the metropolitan because of his prominence and their still precarious hold over Western Ukraine. Fearing for the future of the church, in December 1939 he secretly consecrated Y. *Slipy as his coadjutor with the right of succession. He also introduced several reforms intended to permit the church to function despite official restrictions. At the same time, however, Sheptytsky believed that the occupation of Western Ukraine presented great opportunities for his ecumenical work and the possible reunification of the Orthodox and Catholic churches. He appointed exarchs for Volhynia and Polisia (M. Charnetsky), eastern Ukraine (Y. Slipy), Belarus (A. Nemantsevich), and Russia and Siberia (his brother, K. Sheptytsky) and began to make plans to establish the Uniate church throughout the USSR.

Although Sheptytsky did not sympathize with Nazi ideology, when the Germans occupied Western Ukraine he initially believed that German rule would be better than Soviet rule, and that it could provide for the establishment of an independent Ukrainian state (earlier, in 1938, he had welcomed the declaration of an independent *Carpatho-Ukraine). In June 1941, as honorary head of the Ukrainian National Council in Lviv, he supported the creation of the Ukrainian State Administration and appealed to the German authorities to permit the establishment of a united Ukraine including all of eastern Ukraine. His optimism waned, however, when he realized that this would not be permitted, and when he witnessed the cruelty of the Nazis toward the local population and the Jews in particular. In early 1942 he sent a letter to H. Himmler protesting Nazi treatment of the Jews and the use of Ukrainians in anti-Jewish repressions. He also began to provide refuge to Jews hiding from the Nazis and instructed his monasteries and convents to do the same. In November 1942 he issued a strong pastoral letter denouncing all killing, including the politically motivated assassinations carried out by competing Ukrainian parties. He remained active in Ukrainian political life throughout the war despite his failing health, and attempted to mediate between competing factions and to come to an understanding with Ukrainian Orthodox church leaders. He also supported the creation of the *Division Galizien and assigned military chaplains to it. After the Soviets occupied Western Ukraine in 1939 and again in 1944, he remained in Lviv in order to preserve the church. Soviet attacks on the church were moderate until his death because of the recognition of his great authority. His public funeral demonstrated the continuing respect for him, but his death greatly weakened the position of the Greek Catholic church.

Sheptytsky was a prolific writer on issues of church organization and history, theology, spirituality, ecumenism, and philosophy. As background for his proposed beatification, 22 volumes of his works were collected, 6 of which had been published or republished by 1989. These were primarily Sheptytsky's pastoral letters and articles in newspapers, journals, and other publications, in Ukrainian, Polish, Latin, German, and other languages. The first volume of his pastoral letters, *Tvory Sluhy Bozhoho Mytropolyta Andreia Sheptyts'koho: Pastyrs'ki lysty* (The Works of the Servant of God Metropolitan Andrei Sheptytsky: Pastoral Letters, 1965), contains a comprehensive bibliography of his publications by A. Bazylevych. Two volumes of his pastoral letters from the period of the Second World War were published in Yorkton, Saskatchewan (1961, 1969), and three of his theological works were republished in Rome in 1978. His and his brother's study of Studite monastic rule, *Typicon*, appeared in French in 1964. In recognition of his scholarly work he was made a full member of the Shevchenko Scientific Society (1925) and of the Ukrainian Theological Scholarly Society.

In response to Sheptytsky's great accomplishments as metropolitan, his work for church unity, his readiness to die for Christ, his fearless stand against Nazi and Soviet regimes, and his death *in odore sanctitatis*, a popular movement for his beatification arose in the 1950s, spearheaded by Archbishop I. *Buchko, who appointed M. *Hrynchyshyn as official postulator. The first phase of the process was completed in 1968, when Pope Paul VI gave Sheptytsky the title 'Servant of God.' Since then, leaders of the Ukrainian Catholic church have continued their efforts to have him recognized as a saint, often in the face of opposition from leaders of the Polish Catholic church. Sheptytsky was also vilified by Soviet propaganda. This vilification did not diminish his status in Ukrainian historiography, especially among Ukrainian Catholic scholars, and with the triumph of democratic groups in Ukraine in 1990 and the re-emergence of the Ukrainian Catholic church, he has attained great popularity in contemporary Ukraine. He has been the subject of numerous biographies, articles, dissertations, and collections published in interwar Western Ukraine, Poland, North America, Rome, and elsewhere.

W. Lencyk

Metropolitan Atanasii
Sheptytsky

Archimandrite Klymentii
Sheptytsky

Sheptytsky, Atanasii [Šeptyc'kyj, Atanasij (Antonij)], b 1686 in Voshchantsi, near Rudky, Galicia, d 22 December 1746 in Lviv. Uniate metropolitan. He entered ca 1703 the Basilian monastery in Univ, where his uncle, V. Sheptytsky, was archimandrite. In 1710 he was ordained and in 1713 appointed archimandrite of the Univ monastery and coadjutor to his uncle, who was then bishop of Lviv, Halych, and Kamianets-Podilskiy. He succeeded his uncle as bishop in 1715. Sheptytsky founded the brotherhood at St George's Church in Lviv and played a key role in organizing and conducting the 1720 Synod of *Zamostia. On L. Kyshka's recommendation he succeeded him as the Uniate metropolitan of Kiev and all Rus' in 1729. His election was not supported by the Basilian superiors and all the bishops. As bishop and metropolitan, Sheptytsky led the struggle against the Polish clergy's drive to convert Uniates to Roman Catholicism, the nobles' exploitation of the clergy and peasantry, and Polonization in general. In 1732 he founded the *Univ Monastery Press to publish standardized liturgical books in accordance with the Zamostia Synod's decisions, and in 1739 he oversaw the reform of the Basilian order.

Sheptytsky, Klymentii [Šeptyc'kyj, Klymentij], b 17 November 1869 in Pryblychi, Yavoriv county, Galicia, d 1 May 1958. Studite monk; brother of A. *Sheptytsky. After entering the Studite order he studied theology in Innsbruck (1913-17). He was later (1939) secretly named ex-arch for Russia and Siberia. In 1944 he succeeded his brother as archimandrite of the Studite order. That year he led a Ukrainian Catholic delegation that went to Moscow for discussion of the future of the church following the occupation of Galicia. His arrest in 1947 was accompanied by a 25-year prison sentence, which he served in a number of concentration camps until his death.

Sheptytsky, Lev [Šeptyc'kyj] (Ludwig), b 23 August 1717 in Peremyshl, d 25 May 1779 in Radomyshl, in Right-Bank Ukraine. Uniate metropolitan. He studied at the Theatine papal college in Lviv, received a doctorate in civil and canon law from the Ecclesiastical Academy in Rome, graduated from the diplomatic academy there, and then entered the Basilian order. In 1743 he was elected archimandrite of St Nicholas's Monastery in Myltsi, near Kovel, Volhynia. In 1749 he succeeded his late uncle, A.

Metropolitan Lev Sheptytsky

Bishop Varlaam Sheptytsky

Sheptytsky, as bishop of Lviv, Halych, and Kamianets-Podilskyi. During his 30-year episcopate he created the cathedral chapters in those cities and oversaw the completion of the new St George's Cathedral (its construction was initiated and funded by his uncle) and episcopal residence in Lviv, and the compilation of a descriptive register of all Uniate parishes, buildings, and landholdings. In 1762 Sheptytsky was named coadjutor to F. Volodkovych, the ailing metropolitan of Kiev and all Rus', and thereafter he supervised the day-to-day affairs of the metropoly. After the 1772 partition of Poland, Uniate faithful under both Russian and Austrian rule were under his jurisdiction. He used his influence at the papal and Viennese courts to defend his faithful from Polish oppression and from attempts to convert them to Roman Catholicism and to Polonize them. In 1778 he succeeded Volodkovych as metropolitan. He died 15 months later. Sheptytsky convinced Empress Maria Theresa to found the *Barbareum Greek Catholic seminary in Vienna and laid the groundwork for the creation of the Greek Catholic Theological Seminary in Lviv.

Sheptytsky, Varlaam [Šeptyc'kyj] (secular name: Vasili), b 3 February 1647 in Voshchantsi, near Sambir, Galicia, d 5 April 1715 in Univ. Uniate bishop. He entered the Orthodox monastery at Univ and in 1668 was elected archimandrite. In 1669 he established the Univ Monastery Press, which published many important monographs and religious texts. Together with Bishop Y. Shumliansky of Lviv he soon began working toward extending church union to the Lviv eparchy. He participated in the Colloquium of Lublin of 1680, led by the Uniate metropolitan of Kiev, K. Zhokhovsky. After converting to Catholicism in March 1681, he defended the Uniate position at the eparchial sobor of 1694, and in July 1700 he participated in the proclamation of the union in Lviv eparchy. After Shumliansky's death (1708) Sheptytsky was nominated as bishop of Lviv by King August II Frederick. He was elected bishop in January 1710 at a congress attended by the Kievian metropolitan, A. Vynnytsky, and representatives of the Ukrainian nobility, the Stauropegion Brotherhood, and the clergy; he was consecrated in June 1710.

Sheptytsky Institute (Instytut im. A. Sheptytskoho). A Ukrainian Catholic student residence located in *Saska-

toon. Run by the Redemptorist Fathers, it was established in 1953 as a successor to the M. Shashkevych Institute (est 1935 by the Ukrainian Catholic Brotherhood of Canada). The facility accommodates approx 100 students, houses a library, hosts community activities, and occasionally sponsors Ukrainian studies courses.

Sherehii, Yevhen [Šerehij, Jevhen], b 1910 in Dusyna, Bereg county, Transcarpathia, d 1985. Composer; brother of Yu. *Sherehii. He was director of the Transcarpathian Ukrainian Music and Drama Theater in Uzhhorod in 1946–64. He wrote the music to V. Grendzha-Donsky's opera *When the Orchards Are Blooming* (1937) and composed the operettas *Tango for Oneself* (1936) and *Children of the 20th Century* (1937, both librettos by Yu. Sherehii), as well as music for dramatic works, such as O. Oles's *At the Dnieper* (1938), T. Shevchenko's *Haidamakas* (1939), and H. Kupchenko's *The Quiet Ukrainian Night*.

Yurii Sherehii

Irodion Sheremetynsky

Sherehii, Yurii [Šerehij, Jurij], b 18 January 1907 in Dusyna, Bereg Svaliava county, Transcarpathia, d 25 May 1990 in Bratislava. Theater director, actor, and playwright. He began his theatrical career in the Ruthenian Theater of the Prosvita Society in Uzhhorod (1923–7). In 1934–8 he was founder (with his brother Ye. Sherehii) and artistic director of the *Nova Stsena theater in Khust. He worked with amateur theaters in Yugoslavia (1939–40), as administrative director of the Ukrainian Theater in Drohobych (1942–4), and as stage director in the Prešov Ukrainian National Theater (1945–7 and 1954–6) and the People's Opera in Košice (1947–54). He wrote numerous dramas, including *Chasy mynaiut'* (Times Pass, 1938), and taught drama in Bratislava (1963–9).

Sherekh, Yurii. See Shevelov, George.

Sheremet, Mykola [Šeremet], b 23 December 1906 in Mahiliou, Belarus, d 28 October 1986 in Kiev. Poet and prose writer. He graduated from the Kiev Institute of People's Education in 1929. His first published work, the collection of poetry *U pokhid* (Into Battle), was published in 1929. He belonged to the literary organization *Molodniak. He published many poetry collections, all of which adhered to the Party line. His collections of essays, which are similar to his poetry in spirit, include *Krov ikh ne proshla daremno* (Their Blood Was Not Spilled in Vain, 1938),

V lisakh Ukraïny (In the Forests of Ukraine, 1944), *V partyzans'kykh zahonakh* (In the Partisan Detachments, 1947), and *Molodi mesnyky* (The Young Avengers, 1949); he also wrote the novel *Vartovi myru* (Guardians of Peace, 1936). In the early 1960s he harshly criticized the **shestydesiatnyky*.

Sheremeta, Andrii [Šeremeta, Andrij], b 13 December 1871 in Birche, Rudky county, Galicia, d 5 February 1946 in Lviv. Actor and singer. He worked in the Ruska Besida Theater (1889–1914 and 1922–4), in Ternopilski Teatralni Vechory (1916–18), in the New Lviv Theater (1919–20), in V. Kossak's troupe (1920–2), in various troupes in Galicia (1925–39), in the Lesia Ukrainka Theater (1939–41), and in the Lviv Opera Theater (1941–4).

Sheremetev, Vasiliï [Šeremetev, Vasilij], b ca 1622, d 3 November 1682. Russian military and state figure. A commander of Russian troops in Ukraine in 1654–6, he was under B. Khmelnytsky's command in the Battle of Okhmativ (1655). A voivode of Kiev in 1658–60, he was captured during a battle near Chudniv by Polish forces, who turned him over to the Crimean khan. His freedom was purchased by Muscovy in 1681.

Sheremetynsky, Irodion [Šeremetyns'kyj], b 9 November 1873 in Pliakhova, Berdychiv county, Kiev gubernia, d 5 March 1937 in Sevliush, Transcarpathia. Veterinarian and agronomist. He graduated from the Kharkiv Veterinary Institute (1896) and the Kiev Polytechnical Institute (1914). He worked as a veterinarian in Nikolaevsk-na-Amure, in the Far East, and in Kharkiv gubernia, as an agronomist for the Odessa zemstvo administration (1913–14), and as assistant head of the animal husbandry department at the Katerynoslav Agricultural Research Station (from 1915). In December 1918 he was appointed director of the animal husbandry department of the UNR Ministry of Land Affairs. From February 1919 he was also director of the ministry's veterinary department, and from May 1920 he taught animal husbandry at the Kamianets-Podilskyi Ukrainian State University. He emigrated to Tarnów, Poland, in late 1920, and in 1922 he became a professor and chairman of the general and special animal husbandry departments at the Ukrainian Husbandry Academy in Poděbrady, Bohemia. He taught at the academy until 1935 and was also its first secretary, the dean of its Faculty of Agronomy and Forestry, and prorector (1927–8). He presided over the Association of Ukrainian Agricultural Technologists. Sheremetynsky wrote the academy's animal husbandry (3 vols) and special zootechny (2 vols, 1927) textbooks.

Sheršen' (Hornet). An illustrated socialist weekly eight-page magazine of humor and satire, edited and published by V. Lozynsky in Kiev from mid-January to late July 1906 (a total of 26 issues). It was the only Ukrainian-language periodical of its kind in Russian-ruled Ukraine in its day. Contributors included many of the most prominent writers and cultural figures of the time. Its cartoons and political caricatures were drawn by F. Krasysky, I. Buriachok, V. Maslianykov, P. Naumov, V. Riznychenko, and O. Slastion. *Sheršen'* primarily satirized Russian conservatism and chauvinism, but also criticized Ukrainian political parties and newspapers. The publisher was constantly ha-

Cover of the first issue of *Sheršen'* (drawing by Fotii Krasysky)

passed by the tsarist authorities, and two issues of the journal were confiscated.

A biweekly with the same name and masthead appeared in New York City (March–November 1908) and then Scranton, Pennsylvania (to June 1911). From October 1910 it was published by the Ukrainian Workingmen's Association. The editors were A. Kichak, M. Mykytyshyn (1909), and V. Hryshko.

Sherstiuk, Hryhorii [Šerstjuk, Hryhorij] (pseud: Ya. Hetmanchuk, H. Chubrii), b 26 November 1882 in Sherstiukivka (now Novyi Tahamlyk), Poltava county, d 6 November 1911. Pedagogue, writer, and publisher. He worked briefly for the paper *Poltavskaïa mysl'* in Poltava and became secretary of **Ridnyi kraj*, in which he published book reviews and articles on civic life, education, and literature. He contributed articles to *Rada* and in 1907 founded in Kiev the Ukrainskyi Uchytel publishing house, which issued his Ukrainian school grammar (1907, 1912, 1917) and syntax (1909, 1917), translations and original works for children, and **Svitlo* (1910–14), the first Ukrainian educational journal in the Russian Empire. Sherstiuk also published and edited *Svitlo* (Light, 1908), a miscellany for children, and contributed poems and stories to almanacs and *Literaturno-naukovyi vistnyk* in Lviv.

Sherstobytov, Yevhen [Šerstobytov, Jevhen], b 19 June 1928 in Verkhnoudinsk (now Ulan-Ude), Buriat AR. Film

director and screenwriter. In 1960 he completed study in the director's faculty of the State Institute of Cinema Art in Moscow, and in 1962 he began working in the Kiev Artistic Film Studio. He has written or cowritten and produced over a dozen children's films, including *Tumanist* 'Andromedy (The Nebula of Andromeda, 1967) and *Be-remo vse dlia sebe* (We Take Everything for Ourselves, 1980).

Viktor Shestopalov

Shestopalov, Viktor [Šestopalov], b 23 January 1923 in Slovianske, Iziium county, Kharkiv gubernia. Theoretical physicist; AN URSR (now ANU) full member since 1979. A graduate of Kharkiv University (1949), he taught at post-secondary schools in Kharkiv (1952–71) and worked from 1965 at the ANU Institute of Radio Physics and Electronics, where he became director in 1973. His major contributions are in the field of the generation, propagation, and diffraction of electromagnetic submillimeter waves. Among his many publications is a monograph on sum equations in the contemporary theory of diffraction (1983).

Shestovytsia fortified settlement and burial site. A Rus' settlement of the 9th to 12th century near Shestovytsia, Chernihiv raion. Excavations from 1925 to 1958 identified the remains of an earthen wall and moat, semi-pit dwellings with clay ovens, millstones, pottery, and jewelry. Excavation of the burial ground yielded several hundred kurhans of the 10th to 12th centuries. Three types of burial traditions were encountered at the site: cremation, primary inhumation, and cenotaph (empty tomb for persons buried elsewhere). The remains of slaves and war horses buried with their masters, armor, weapons, jewelry, clothing, and items of daily use (some of which were of Scandinavian origin) were found in several kurhans.

Shestydesiatnyky (The Sixtiers). The literary generation that began to publish in the second half of the 1950s, during N. Khrushchev's 'de-Stalinization,' and reached their literary peak in the early 1960s; hence, their name. The first representatives were L. *Kostenko and V. *Symonenko. Following their lead came a veritable proliferation of poets: I. *Drach, M. *Vynhranovsky, H. Kyrychenko, V. Holoborodko, I. Kalynets, B. Mamaisur, and others. At first V. *Korotych was close to the group. The more prominent prose writers were Valerii *Shevchuk, Hryhir *Tiutiunnyk, V. *Drozd, Ye. *Hutsalo, and Ya. Stupak, and literary critics, I. *Dziuba, I. *Svitlychny, Ye. *Sverstiuk,

and I. Boichak. The *shestydesiatnyky* held their 'literary parents' responsible for Stalinist crimes, for adapting to a despotic regime, and for creative impotence (eg, Dziuba in 'Oda chesnomu boiahuzovi' [Ode to an Honest Coward]). In turn, some of the older writers, such as P. Tychna, P. Voronko, M. Sheremet, and M. Chabanivsky, exhibited a hostile attitude to the experimentation and innovation of the *shestydesiatnyky*. Characteristic of *shestydesiatnyky* poetry was the renewal of poetic forms and subjects, which had been stamped out by the dogma of *socialist realism. The prose of the group was characterized by realistic descriptions free of the constraints of socialist realism, witty humor (as in the short stories of Tiutiunnyk) or sharp satire (as in Drozd's 'Katastrofa' [Catastrophe] and 'Maslyny' [Olives]), subtle delineation of the motives of protagonists, and an interest in historical subjects (as in the works of Shevchuk).

The *shestydesiatnyky* movement lasted barely a decade. The writers concerned were harshly criticized at a special meeting of the creative intelligentsia as early as 1963, and they were completely silenced by the arrests of 1965–72. During the course of those repressions some individual writers went over to the official position without having offered particular resistance (eg, Korotych, Drozd, and Hutsalo). Some of them were denied permission to publish, or refused to do so for some time (Kostenko); others were not published again until the changes after 1985 (Mamaisur, Holoborodko, Stupak). Others, who continued to oppose national discrimination and Russification, were arrested and punished with long sentences (Svitlychny, Sverstiuk, V. Stus, Kalynets, and V. Marchenko), whereupon some died in labor camps (Stus, Marchenko). Only Dziuba recanted, and after his release he was permitted to continue his literary work. The *shestydesiatnyky* movement completely died out at the beginning of the 1970s. Elements of the literary rebirth that it had initiated remained only in the works of certain poets and prose writers (Kostenko, Shevchuk). Apart from that, the *shestydesiatnyky* movement played an important role in popularizing samvydav literature and, most of all, in strengthening the opposition movement against Russian state chauvinism and Russification (as in Dziuba's book *Internatsionalizm chy rusyfikatsiia?* [Internationalism or Russification?, 1965], the essays of Sverstiuk, the samvydav poetry of many authors, especially Symonenko and M. Kholodny, the accusatory leaflets and protest letters of Stus, Marchenko, and others). With the declaration of glasnost and perestroika in 1985, the *shestydesiatnyky* once again became active both in their own creative work and in publicistic writings in defense of the Ukrainian language and the autonomy of Ukrainian culture. Some of them, like Drach and Dziuba, became active politically.

I. Koshelivets

Aleksandr Shevchenko: *Girl with Pears* (1933)

Shevchenko, Aleksandr (Oleksandr) [Ševčenko], b 7 July 1883 in Kharkiv, d 28 August 1948 in Moscow. Artist and theorist. He began his studies in Kharkiv and continued them in Paris (1905–6) and at the Moscow School of Painting, Sculpture, and Architecture (1907–9). In March 1912 he participated in the avant-garde Donkey's Tail Exhibition in Moscow together with V. Tatlin, M. Larionov, N. Goncharova, K. Malevich, and M. Chagall. Their Neoprimitivist work was based on folk art and rural culture. In 1913 Shevchenko published, in Russian, booklets on Neoprimitivism, in which he expounded on his theory of the Eastern origins of Slavic art and its alienation from Western art, and on the principles of cubism and other modern art trends. In 1914 he took part in Exhibition No. 14: Futurists, Rayonists, Primitives, organized by Larionov. In 1919 he, O. Hryshchenko, and their students organized in Moscow the 12th State Exhibition of 182 works by 38 artists. Its catalog contained Shevchenko's and Hryshchenko's manifesto and articles on 'color dynamics' and 'tectonic primitivism.' In 1920–30 Shevchenko was an instructor in the painting division of the Moscow Higher Artistic and Technical Workshops and participated in many large group exhibitions in Moscow and abroad. He later taught at the Higher Artistic and Technical Institute in Moscow. An album of his paintings and graphics was published in Moscow in 1966, and a collection of materials by and about him appeared there in 1980.

N. Mykytyn

Shevchenko, Arkady [Ševčenko, Arkadij], b 11 October 1930 in Horlivka, Donetsk oblast. The highest-ranking Soviet official to defect from the USSR. A graduate of the Moscow Institute of International Relations (1954), in 1956

he was posted to the Department of United Nations and Disarmament Affairs of the USSR Foreign Ministry. In 1963 he was appointed chief of the Security Council and Political Affairs Division at the Soviet UN mission in New York. In December 1972 he was appointed undersecretary-general of the UN. Disillusioned with the Soviet system, he began supplying information to the CIA in 1975, and three years later he asked for asylum in the United States. He resided in Washington, DC, where he was a consultant and lecturer on Soviet affairs. In 1985 he published his memoirs, *Breaking with Moscow*.

Fedir Shevchenko

Shevchenko, Fedir [Ševčenko], b 24 August 1914 in Dunaivtsi, Nova Ushytysia county, Podilia gubernia. Historian; corresponding member of the AN URSR (now ANU) since 1969. He graduated from the Moscow Historical Archives Institute (1937), and from 1940 he worked in state archives in Chernivtsi, Krasnodar, and Uzbekistan. From 1945 to 1949 he was deputy head of the ANU commission on the history of the Great Patriotic War, and from 1949 to 1968 he worked at the ANU Institute of History (assistant director in 1964–7; PH D, 1963). He was editor in chief of *Ukrains'kyi istorychnyi zhurnal* (UIZh, 1957–72), editor of the collections *Selians'kyi rukh na Bukovyni v 40-ykh rokakh XIX st.* (The Peasant Movement in Bukovyna in the 1840s) and *Narysy z istorii Pivnichnoi Bukovyny* (Essays in the History of Northern Bukovyna, 1980), editor in chief of the annual *Istoriografichni doslidzhennia v Ukrains'kii RSR* in 1968, and a member of the editorial board of *Istoriografiia istorii Ukrainskoi SSR* (The Historiography of the History of the Ukrainian SSR, 1987), in which he wrote on the 1648–54 period.

From 1968 to 1972 Shevchenko was director of the ANU Institute of Archeology, whence he returned to the ANU Institute of History; from 1982 he headed the Section of Historical Geography and Cartography, which compiled an atlas of the history of the Ukrainian SSR. His research has centered on the Middle Ages, the Second World War, historiography, and problems of Slavic studies. He has published works on the political and economic ties of Ukraine with Russia in the mid-17th century (1959), the international significance of the 1768 uprising in Right-Bank Ukraine (UIZh, 1968, no. 9), and the use of film documentaries in history education (UIZh, 1976, no. 6). He presented M. Hrushevsky in a positive light in 'Na chasi – vsebichnyi analiz' (It Is Time for an All-Round Analysis, *Kyiv*, 1988, no. 9).

A. Zhukovsky

Shevchenko, Ihor. See Ševčenko, Ihor.

Shevchenko, Ivan [Ševčenko] b 21 September 1902 in Pavlysh, Oleksandriia county, Kherson gubernia, d 23 April 1977 in Pavlysh. Poet, journalist, and editor of provincial newspapers. He belonged to the *Molodniak literary organization. His first published work was the poem *Porohy* (The Rapids, 1920). Subsequently he published the collection *Komsomol'tsi* (The Komsomol Members, 1925). Thereafter he wrote little and worked on a collective farm in Pavlysh. His song 'Dvanadtsiat' kosariv' (The Twelve Mowers) was popular in the 1920s. A revised edition of Shevchenko's verse appeared as *Poezii* (Poems) in 1962.

Shevchenko, Ivan [Ševčenko], b 18 March 1903 in Borovytsia, Chyhyryn county, Kiev gubernia. Soviet Ukrainian party historian. A graduate of the Cherkasy Pedagogical Institute (1935), he worked in the CP (1929–39) and headed the department of CPSU history at Kiev University (from 1943, as professor from 1962). A specialist in the history of the CPU during the First World War, he wrote *Z istorii sotsial-demokratychnykh orhanizatsii na Ukraini* (From the History of Social-Democratic Organizations in Ukraine, 1956) and *Kommunisticheskaia partiia Ukrainy v bor'be za ukreplenie soiuzu rabochikh i krest'ian (1919–1920 gg.)* (The Communist Party of Ukraine in the Struggle to Strengthen the Union of Workers and Peasants [1919–20], 1968).

Shevchenko, Ivan [Ševčenko], b 22 March 1905 in Novyi Starodub, Oleksandriia county, Kherson gubernia. Surgeon. A graduate of the Kharkiv Medical Institute (1930), he worked as a physician and surgeon in the Kharkiv region. He was director of the Kiev Roentgeno-Radiological and Oncological Scientific Research Institute (1945–71) and department head at the Kiev Institute for the Upgrading of Physicians (1971–6). He introduced new methods of diagnosing and treating malignant tumors and cancer of the esophagus. His publications deal with premalignant disorders and the prevention, diagnosis, and rehabilitation of oncological patients.

Shevchenko, Ivan [Ševčenko], b 19 August 1913 in Preobrazhenka, near Tomakivka, Katerynoslav county. Scenery designer. A pupil of O. Khvostenko-Khvostov, he completed study at the Kharkiv Art College (1941) and the Kharkiv Art Institute (1951). In 1951 he became principal designer in the Zhytomyr Ukrainian Music and Drama Theater.

Shevchenko, Lazar [Ševčenko], b 1884 in Hnidyn, near Boryspil, Pereiaslav county, Poltava gubernia, d 1936. Heroic and character actor; brother of Y. *Shevchenko. He worked in the Ruska Besida Theater in Lviv (1907–14) and the State People's Theater in Kiev (1918–19) and then became an adviser in Donbas workers' theaters. In 1934 he was an art director of programs broadcast in Kiev. In 1935 he was arrested. He was poisoned in prison.

Shevchenko, Liudmyla [Ševčenko, Ljudmyla], b 9 November 1895 in Kyrylivka (now Shevchenkove), Zvenyhorodka county, Kiev gubernia, d 22 October 1969 in Kiev. Ethnographer and folklorist; daughter of T. Shevchenko's nephew, Prokop. After graduating from the Archeological

Institute (1923) she worked at the All-Ukrainian Academy of Sciences and then in various Kiev museums (1934–47). As department head at the Kiev Museum of Ukrainian Art she helped in its evacuation in 1941. From 1947 she worked at the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography. She published over 20 articles in ethnography and folklore, including recollections of V. Hnatiuk (1927), the autobiography of the kobzar P. Kulyk (1929), and works on the rites associated with the beginning of a building (1926), the family and social status of women in Ukraine, T. Shevchenko's homeland, and the art of Ukrainian highlanders.

Shevchenko, Mykhailo [Ševčenko, Myxajlo], b 26 March 1923 in Oleksiivka, Yelysavethrad county. Opera singer (baritone). A graduate of the Kiev Conservatory (1956), he studied singing under D. Yevtushenko and performed in the Red Army Chorus. In 1955–78 he was a soloist of the Kiev Theater of Opera and Ballet. He taught at the Kiev Conservatory (1974–9).

Shevchenko, Oleksander [Ševčenko], b 29 October 1908 in Katerynoslav (now Dnipropetrovske), d 20 November 1984 in Dnipropetrovske. Metallurgist and specialist in metal-coining processes; corresponding member of the AN URSR (now ANU) from 1972. He studied and taught at the Dnipropetrovske Metallurgical Institute. He worked in the All-Union Scientific Research and Design-and-Technology Institute of Pipe Production (from 1945) and taught at the Dnipropetrovske Institute of Chemical Technology (1954–60). He made contributions in the fields of refractory-metals processing, continuous pipe manufacturing processes, and bimetallic and layered pipes design.

Shevchenko, Oleksander [Ševčenko], b 1940. Journalist and political prisoner. He was arrested in March 1980 and sentenced, for editing the samvydav journal *Ukrain's'kyi visnyk*, to five years in labor camps in Perm oblast and three years' exile in Kazakhstan. During his imprisonment he wrote numerous petitions and open letters of protest on behalf of political prisoners. After his release in the spring of 1987, he returned to Kiev, where he was active in the national movement, the Ukrainian Helsinki Union, and the Ukrainian Culturalological Club and worked as the scholarly editor of *Ukrainskii biokhimičeskii zhurnal*. In March 1990 he was elected to the Ukrainian Supreme Council as a deputy from a Kiev district.

Shevchenko, Semen [Ševčenko], b ? in Novi Petrivtsi, Kiev county, d ca 1868. Potter. In 1799 he was sent to work as an apprentice at the *Mezhyhiria Faience Factory. In 1802 he became assistant to the master modeler I. Sambirsky, and in 1811, a worker at Kh. Vimert's secret laboratory. He made vases, table sets, decorative plates (including ones with applied clay portraits of T. Shevchenko, M. Kostomarov, P. Kulish, and G. Garibaldi), and figurines, such as *Winter* (1852) and *Girl with Grapes* (1852). His works are in the classicist style, enlivened with decorative folk motifs.

Shevchenko, Taras [Ševčenko], b 9 March 1814 in Moryntsi, Kiev gubernia, d 10 March 1861 in St Petersburg, Russia. Artist, poet, and national bard of Ukraine.

Born a serf, Shevchenko was orphaned in his early teens and grew up in poverty and misery. He was taught to read by the village precentor and was often beaten for 'wasting time' on drawing, for which he had an innate talent. At the age of 14 he was taken by his owner, P. Engelhardt, to serve as houseboy, and traveled extensively with him, first to Vilnius (1828–31) and then to St Petersburg. Engelhardt noticed Shevchenko's artistic talent and apprenticed him to the painter V. Shiriaev for four years. During that period Shevchenko spent his free time sketching the statues in the imperial summer gardens. There he met the Ukrainian artist I. *Soshenko, who introduced him to other compatriots in St Petersburg, Ye. *Hrebinka, V. *Hryhorovych, and O. Venetsianov. Through them he met the Russian painter K. *Briullov, whose portrait of the Russian poet V. *Zhukovsky was disposed of in a lottery, the proceeds of which were used to buy Shevchenko's freedom from Engelhardt on 22 April (OS, 5 May NS) 1838.

Shevchenko enrolled in the Academy of Fine Arts in St Petersburg and pursued his art studies as well as his general education. In 1840 he published his first collection of poems, **Kobzar*. That collection of eight Romantic poems was followed by the epic poem 'Haidamaky' (Haidamakas, 1841) and the ballad 'Hamaliia' (1844). In the 1840s Shevchenko visited Ukraine three times (1843, 1845, and 1846). Those visits made a profound impact on him. He visited his serf family, met some of the more prominent Ukrainians (P. *Kulich, M. *Maksymovych), and was befriended by the Reprin family (esp V. *Reprina). He was, furthermore, struck by the ravaged state of Ukraine. He decided to capture some of the old historical ruins and cultural monuments of Ukraine by preparing an album of etchings, which he called *Zhivopisnaia Ukraina* (Picturesque Ukraine, 1844). After graduating from the academy (1845) he became a member of the *Kiev Archeographic Commission. That position gave rise to his second visit to Ukraine and to extensive travels during which he sketched historical and architectural monuments and collected folkloric and other ethnographic materials. During those travels he wrote some of his most satirical and politically subversive poems ('Son' [Dream], 'Velykyi l'okh' [The Great Dungeon], 'Kavkaz' [Caucasus], and others), which he transcribed into the collection 'Try lita' (Three Years). The collection, however, was not published.

In 1846 Shevchenko came to Kiev and joined the secret *Cyril and Methodius Brotherhood. A denunciation resulted in the arrest of the members of the brotherhood; Shevchenko was arrested on 5 April 1847. The discovery of the satirical poems, highly critical of the tsar, in the *Try lita* manuscript collection brought him a particularly severe sentence, to military duty as a private in the Orenburg special corps in a remote area of the Caspian Sea. Tsar Nicholas I himself initiated the sentencing order with the admonition that the prisoner be prevented from writing and painting. At Orenburg and at Orsk fortresses, however, Shevchenko managed to continue doing both. He hid his poetry, written secretly in several notebooks (1847, 1848, 1849, 1850) known as *zakhaliavni knyzhечky* (bootleg booklets). Many of his sketches from that period have as their theme the life of the Kazakhs. Owing to his skill as a painter Shevchenko was included in a military expedition to survey and describe the Aral Sea (1848–9). After 1850 the terms of his imprisonment were more harshly enforced, and he was sent to the fortress in Novo-

petrovskoe (now *Fort-Shevchenko), where he stayed until his release in 1857, two years after the death of Tsar Nicholas. Shevchenko was not allowed to live in Ukraine. He waited for half a year in Nizhnii-Novgorod and then moved to St Petersburg. He was permitted to visit Ukraine in 1859 but was once again arrested and sent back to St Petersburg, where he remained under police surveillance until his death. Shevchenko was buried in St Petersburg, but two months afterward his remains were transferred to the Chernecha Hill near Kaniv, in Ukraine.

Taras Shevchenko (photograph, 1858)

Shevchenko has a uniquely important place in Ukrainian history. He created the conditions that allowed the transformation of Ukrainian literature into a fully functional modern literature. His influence on Ukrainian political thought and his role as an inspirer of a modern democratic ideal of renewed Ukrainian statehood are without parallel. His poetry contributed greatly to the evolution of national consciousness among the Ukrainian intelligentsia and people, and his influence on various facets of cultural and national life is felt to this day.

Shevchenko's literary output consists of one middle-sized collection of poetry (*Kobzar*); the drama *Nazar Stodolia*; two dramatic fragments; nine novelettes, a diary, and an autobiography in Russian; and over 250 letters. Even in the first period of his literary development (1837–43) Shevchenko wrote highly sophisticated poetical works. He adopted the stylistic and versificatory elements of the Ukrainian folk song for his verse; the poems are also remarkable for their formal originality. A complex and shifting metric structure, assonance and internal rhyme,

masterfully applied caesuras and enjambments, and sophisticated alliterations are grafted onto a 4 + 4 + 6 syllable unit derived from the **kolomyika* song structure. The regular strophe is abandoned. Innovations can also be found in Shevchenko's use of epithets, similes, metaphors, symbols, and personifications. A man of his time and influenced in his world outlook by the current of **romanticism*, Shevchenko managed to find his own manner of Romantic poetic expression, which encompassed the themes and ideas germane to Ukraine and to his personal vision of its past and future.

The early period contains the ballads 'Prychynna' (The Deranged [Girl], 1837), 'Topolia' (The Poplar, 1839), and 'Utoplenu' (The Drowned Maiden, 1841). Romantic in their style and outlook on the world, those works have an affinity with Ukrainian folk ballads that is evident in their plot and their use of supernatural motifs. Of special note is the early ballad 'Kateryna,' dedicated to Zhukovsky in memory of the purchase of Shevchenko's freedom. Although the proceeds of the sale of the Russian poet's portrait helped secure Shevchenko's freedom, he chooses a tale in which a Ukrainian girl is seduced by a Russian soldier and left with child – a memento of the fact that it was the Russian tsars who had introduced serfdom to Ukraine. Several poems besides 'Kateryna' treat the theme of the seduced woman and abandoned mother ('Vid'ma' [Witch, 1847], 'Maryna' [1848], and the ballads 'Lileia' [Lily, 1846] and 'Rusalka' [Mermaid, 1846]). The oblique reference to Ukraine's history and fate in 'Kateryna' is echoed in other early poems, such as 'Tarasova nich' (Taras's Night, 1838), 'Ivan Pidkova' (1839), 'Haidamaky' (Haidamakas, 1841), and 'Hamaliia' (1842). Cossack raids against the Turks are recalled in 'Ivan Pidkova' and 'Hamaliia'; 'Tarasova nich' and, especially, 'Haidamaky' draw on the struggle against Polish oppression. Shevchenko wrote the Romantic drama *Nazar Stodolia* at the end of the early period of his creativity. Its action takes place near Chyhyryn, the Cossack capital, during the 17th century.

Taras Shevchenko (self-portrait, pencil, 1845)

Although Shevchenko's poetic achievements were evident to his contemporaries in the early period of his creativity, it was not until the second period (1843–5) that his poetry assured him the stature of a national bard. Having spent eight months in Ukraine, Shevchenko realized the full extent of his country's misfortune under Russian rule

Taras Shevchenko (self-portrait, sepia, 1849)

Taras Shevchenko (self-portrait, etching, 1860)

and progressively identified his own role as that of a poet-spokesman for his nation's aspirations. The poems 'Rozryta mohyla' (The Plundered Grave, 1843), 'Chyhyryne, Chyhyryne' (1844), and 'Son' (Dream, 1844) were written as a reaction to what Shevchenko saw happening in Ukraine. In 'Son' he portrayed with bitter sarcasm the lawlessness of tsarist rule. Satire is also apparent in 'Velykyi l'okh' (The Great Dungeon), 'Kavkaz' (Caucasus), 'Kholodnyi iar,' and 'I mertvym, i zhyvym ...' (To the Dead and to the Living ...), all written in 1845. 'Velykyi l'okh,' called a 'mystery,' consists of three parts and allegorically summarizes Ukraine's passage from freedom to captivity. In 'Kavkaz' Shevchenko universalized Ukraine's fate by turning his attention to the myth of Prometheus, the eternal free spirit, terribly punished for rebellion against the gods yet eternally reborn. He localized the action in the Caucasus, whose inhabitants suffered a fate similar to that of Ukrainians at the hands of the Russian tsars. Finally, in his poetic epistle 'To the Dead and to the Living ...' Shevchenko turned his bitter satire against the Ukrainians themselves. He reminded them that only in 'one's own house' is there 'one's own truth' and entreated them to realize their national potential, to stop serving foreign masters, to become honorable and free people, worthy of their history and heritage, in their own free land.

Similarly, in the poem 'Try lita' (Three Years), which gave its name to the whole second period and to the body of work written at that time, Shevchenko presented his own 'awakening' to the shame around him. He wept for his lost innocence and scorned the coming new year swaddled in one more 'ukase.' His scorn for the inactivity of his compatriots is echoed also in the poem 'Mynaiut' dni, mynaiut' nochi' (The Days Pass, the Nights Pass), in which somnolent inactivity is seen as far worse than death in chains. In December 1845 Shevchenko composed a cycle of poems titled 'Davydovi psalmy' (Psalms of David). He chose the psalms that had resonance for him (1, 12, 43, 52, 53, 81, 93, 132, 136, 149) and imbued the biblical texts with contemporary political relevance. He ends the *Try lita* collection with his famous 'Zapovit' (Testament). That 24-line poem has been translated into more than 60 languages, has been set to music by H. Hladky, and has achieved a stature among Ukrainians similar to that of a national anthem. 'Zapovit' merges his own requests with exhortations to 'break the chains and christen freedom

with drops of blood.' With 'Zapovit' Shevchenko firmly laid claim to the title of national bard.

Along with other works of the *Trylita* period 'Ivan Hus' or 'Ieretyk' (Jan Hus or Heretic, 1845) introduces another of Shevchenko's major themes. Dedicated to P. Šafařík, the poem uses a historical theme (the trial and burning of Hus in Costanza in 1415) as a vehicle for the Pan-Slavic ideas of the Cyril and Methodius Brotherhood, of which Shevchenko had become a member.

The cycle 'V kazemati' (In the Casemate) was written in the spring of 1847 at the time of Shevchenko's arrest and interrogation. It marks the beginning of the hardest period of his life (1847–57). The 13 poems of the cycle contain reminiscences (the famous lyrical poem 'Sadok vyshnevyyi kolo khaty' [The Cherry Orchard by the House]), reflections on the fate of the poet and of his fellow members of the brotherhood, and poignant reassertions of his beliefs and his commitment to Ukraine. Shevchenko's stand was unequivocal, and he exhorted his fellow Cyrillo-Methodians as well as all compatriots, 'Love your Ukraine / Love her ... in the harshest time / In the very last harsh minute / Pray to God for her.' Through his exile Shevchenko's views did not change, although his poems grew more contemplative and reflective. He continued in his 'bootleg' poetry to write autobiographic, landscape, and narrative as well as historical, political, religious, and philosophical poems. Of special interest is the long poem 'Moskaleva krynytsia' (A Soldier's Well), written in two variants, 1847 and 1857, which reveals Shevchenko's preoccupation with the theme of human inhumanity to fellow human beings and of the human capacity to accept and forgive. A comparison of the two variants provides an insight into the maturation process of Shevchenko as poet and thinker.

The autobiographical poems embrace such lyrics as 'Meni trynadtsiatyi mynalo' (I Was Turning 14), 'A.O. Kozachkovs'komu' (To A.O. Kozachkovsky), 'I vyris ia na chuzhyni' (I Grew Up in a Foreign Land), 'Khiba samomu napysat' (Should I Then Myself Write?), 'I zolotoi i dorohoi' (Both Golden and Dear), and 'Lichu v nevoli dni i nochi' (I Count Both Days and Nights in Captivity). But personal reflection also occurs in some of the landscape poems, especially where Shevchenko describes the *pay-sage* of his captivity ('Sontse zakhodyt', hory chorniut' [The Sun Is Setting, the Hills Turn Dark], 'I nebo nevmyte,

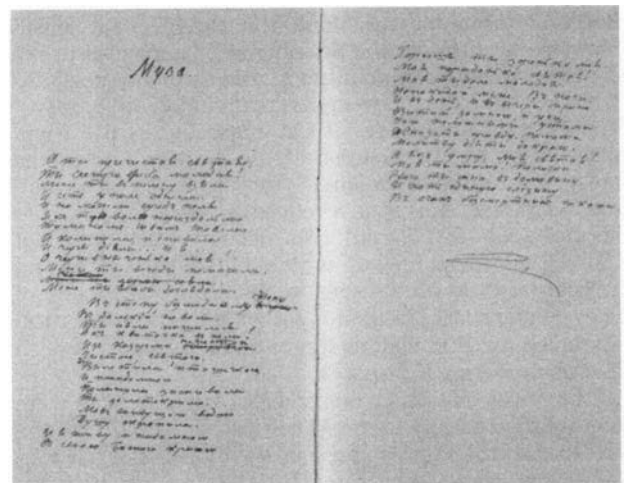

Taras Shevchenko's relatives and friends by his casket in Kiev (7 May 1861): 1, Taras's brother Mykyta; 2, Taras's brother Yosyp; 3, Mykyta's son Petro; 4, Yosyp's wife; 5, Taras's sister Yaryna; 6, Yosyp's son; 7, Taras's second cousin Varfolomii; 8 and 9, Varfolomii's daughters; 10, Varfolomii's son; 11, Varfolomii's wife; 12, Ivan Soshenko

Soldiers guarding Taras Shevchenko's grave on Cherncha Hill in Kaniv in 1861

i zaspani khvyli' [The Sky Is Unwashed and the Waves Are Not Yet Awake], and the like). Varied and rich are the poems devoted to narratives and description motivated by the memory of the village way of life. Elements of folk songs are used in depicting sadness, parting, loneliness, aspects of the daily life of Ukrainian peasants, motherhood, the harsh fate of women, and the longing for happiness. The poetic style of the poems is marked by a simplicity of vocabulary, concrete description, and metaphors. There is frequent use of personification (the wind whispers, fate wanders, thoughts sleep, evil laughs). Shevchenko consistently refined his use of folkloric material. He expanded the use of ancient folkloric symbolism and made full use of the expressivity of folk songs (typical earthiness, repetition to insinuate emotional gradation, poetical alogism, psychological parallelism, fixed imagery). The ingestion and transformation of folkloric elements was so successful that many original poems have become folk songs in their own right.

Shevchenko continued sporadically to reiterate his political convictions and to point to the enslavement of individuals (serfdom) and nations by the tsarist regime. In the

Taras Shevchenko's poem 'Muza' (Muse, 1858) in his own handwriting

poem 'Poliakam' (To the Poles, 1847), he continued his Pan-Slavic call for brotherhood between the Poles and the Ukrainians, who were set against each other by religious difference. Shevchenko used a Kazakh legend in the short poem 'U Boha za dveryma lezhala sokyra' (God Had an Ax Lying behind the Door, 1848) to describe, in allegorical terms, the misfortunes of the Kazakhs, who were also under tsarist Russian domination. Satire did not leave Shevchenko's arsenal. In the satiric 'Tsari' (Tsars, 1848) he gave glimpses of the killing, sexual debauchery, incest, and adultery which he saw as typical of royal courts, from that of the biblical King David to that of St Volodymyr of Rus'. The successful combination of an offhand burlesque style with bitter invective gave Shevchenko a powerful though somewhat veiled weapon in his attack on tsarism in general and on the Russian tsar in particular. Much more direct are his accusations against the Russian tsars in 'Irzhavets' (1847).

Parallel to the motifs of the seduced girl and the unwed mother, which occur frequently in Shevchenko's poems, is the motif of incest. It appears in 'Tsari' and in 'Vid'ma' and forms the basis for 'Kniashna' (Princess, 1847). Although in many of his poems Shevchenko harshly attacks the hypocrisy of the church and the clergy, he remains steadfast in his belief that divine justice will one day triumph for Ukraine and for all of humanity. His millenarian vision appears in many of his poems but is perhaps best encapsulated in the following lines from 'I Arkhimed i Halilei' (Both Archimedes and Galileo, 1860): 'And on the re-born earth / There will be no enemy, no tyrant / There will be a son, and there will be a mother, / And there will be human beings on the earth.'

The last period of Shevchenko's creativity begins after his return from exile (1857–61) and is marked in his works by more frequent allusion to the Bible and to classical literature and by the increasingly dominant role of contemplative lyricism. The period contains such longer poems as 'Neofity' (Neophytes, 1857), 'Iurodyvyi' (God's Fool, 1857), the second redaction of 'Vid'ma' (1858), 'Nevol'nyk' (The Captive, begun in 1845 and finished in 1859), and 'Mariia' (1859). There are also renditions of biblical texts ('Podrazhanniie Iezekiiliu Hlava 19' [Imitation of Ezekiel Chapter 19], 'Osii Hlava 14' [Esau Chapter 14], 'Isaia Hlava 35' [Isaiah Chapter 35], and 'Podrazhanniie 11 Psalmu' [Imitation of the 11th Psalm]), in which Shevchenko turns to the Scriptures for analogies to the contemporary situation. In the '11th Psalm' he proclaims what might be the motto of his creativity: 'I will glorify / Those small mute slaves! / On guard by them / I will place the word.' The last period also contains some of the most profound contemplative lyrics written by Shevchenko. The period ends with a reflective poem addressed to his muse: 'Chy ne pokynut' nam, neboho' (Should We Not Call It Quits, [My] Friend), written in two parts on 26 and 27 February, eleven days before his death. Like many of Shevchenko's last poems it is full of allusions to classical mythology, including a reference to the river Styx, which he was preparing to cross.

The novelettes which Shevchenko wrote in exile were unpublished during his life. They are connected with the tradition of the satiric-exposé prose of N. Gogol but contain many asides (excursions into the past, inserted episodes, authorial comments, reminiscences, and commentaries). Although written in Russian, they contain many Ukrainianisms. The first of the novelettes ('Nai-

Taras Shevchenko: *Shevchenko Among Friends* (sepia, 1851)

michka' [The Servant Girl, 1844] and 'Varnak' [The Convict, 1845]) share the antiservitude themes of Shevchenko's like-named poems. 'Kniashna' (Princess, 1853) is similar in theme to the poem 'Kniashna.' The remaining six ('Muzykant' [The Musician, 1854–5], 'Neschastnyi' [The Unfortunate, 1855], 'Kapitansha' [The Captain-Woman, 1855], 'Khudozhnik' [The Artist, 1856], 'Blizentsy' [The Twins, 1855–6], and 'Progulka s udovol'stviem i ne bez morali' [A Stroll with Pleasure and Not without a Moral, 1858]) are not thematically similar to any particular poems. Shevchenko's diary ('Zhurnal'), also written in Russian, consists of daily notations from his life along with comments and observations. It is of great value to the interpretation of his poetic works and also important in its revelation of his erudition and breadth of thought.

In the intellectual history of Ukraine Shevchenko has a unique position, and the importance of his poetry for Ukrainian culture cannot be underestimated. His *Kobzar* marks the beginning of a new era in the development of Ukrainian literature and language. By blending in his poetic works the vernacular Ukrainian together with elements of the bookish language drawn from Old Church Slavonic as well as from the chronicles, Shevchenko firmly established the literary Ukrainian language and made it serviceable for any future literary work or genre. Furthermore he played the main role in the national awakening and drive for national liberation of the Ukrainian people. The revolutionary and ideological content of Shevchenko's political poems found resonance among other enslaved peoples. The earliest translations of his poems – mainly into Polish, Russian, Czech, and German – ap-

peared while he was still alive. By the 1990s parts of the *Kobzar* had been translated into more than 100 languages. Shevchenko's poetry has also become a source for various other works in literature, music, and art.

Some of the more important translations have been the following: (1) into Russian, *Sobranie sochinenii v 5 tt.* (Collected Works, 5 vols, 1948–9, 1955–6, 1964–5), *Kobzar'* (1972), and a four-volume collected works in 1977; (2) into Polish, *Wiersze wybrane* (Selected Poems, 1913), *Zbiorek wybranych poezij* (A Collection of Selected Poems, 1921), *Utwory wybrane* (Selected Works, 1955), and two other selected collections in 1972 and 1974; (3) into Czech, *Výbor básní* (Selected Poems, 1900), *Výbor z díla největšího básníka a buditele Ukrajiny* (Selection from the Works of the Greatest Poet and Awakener of Ukraine, 1951), *Kobzar* (1953), *Nazar Stodola* (1958), and *Hajdamáci* (Haidamakas, 1961); (4) into Hungarian, *Kobzos* (1953); (5) into Rumanian, *Cobzarul* (1957); (6) into Serbo-Croatian, *Kobzar* (1969); (7) into Bulgarian, *Izbrani proizvedeniiia* (Selected Works, 2 vols, 1960) and *Kobzar* (1964); (8) into German, *Ausgewählte Gedichte von Taras Schewtschenko* (1911), *Der Kobzar* (2 vols, 1951), *Die Haidamaken und andere Dichtungen* (1951), and *Der Kobzar* (1962); (9) into English, *The Kobzar of Ukraine* (1922), *Selected Poems* (1945), *Song out of Darkness – Selected Poems* (1961), *The Poetical Works of Taras Shevchenko: The Kobzar* (1964, 1967), and *Selected Works: Poetry and Prose* (1979); (10) into French, *Poésies* (1964); (11) into Italian, *Liriche scelte del 'Cobzar'* (1927) and *Liriche Ukraine* (1942); and (12) into Spanish, *Obras escogidas* (1964).

Although Shevchenko is seen mainly as a poet, he was also a highly accomplished artist. There are 835 works extant from that domain of his creativity. Another 270 are known but have been lost. Although trained in the academic classicist style in St Petersburg, Shevchenko was able to move beyond stereotypical historical and mythological subjects to realistic renderings of ethnographic themes and genre scenes expressing veiled criticism of the absence of personal, social, and national freedom under tsarist domination. Shevchenko's portraits have a broad social range of subjects, from peasants (*The Kazakh Girl*, 1856) to members of the nobility (*Princess E. Keikuatova*, 1847). They are remarkable for their use of light to achieve sensitive three-dimensional modeling. Shevchenko painted over 150 portraits, 43 of them self-portraits. He also painted numerous landscapes which recorded the archi-

Taras Shevchenko: *Gifts in Chyhyryn (Foreign Emissaries at Hetman Bohdan Khmelnytsky's Residence)* (etching, 1844)

tectural monuments of Ukraine. While in exile he depicted Kirghiz folkways and the surrounding countryside, as well as the misery of life in tsarist prisons and in the Russian army. Shevchenko was also very proficient in watercolor, aquatint, and etching. On 2 September 1860 the Academy of Arts recognized his mastery of engraving by declaring him an academician engraver. Yet Shevchenko's contributions to the development of Ukrainian painting have long been overshadowed by his fame as the bard of Ukraine.

Shevchenko studies. The importance of Shevchenko and his work in the Ukrainian intellectual, literary, cultural, and political spheres has given rise to multifaceted studies of the poet and his work. The studies reflect different approaches: the biographic, bibliographic, literary, textological, linguistic, lexicographic, esthetic, psychological, pedagogical, ethical, religious, philosophical, political, sociological, and art-historical. Of prime importance to all of the studies are the poetic and artistic works of the poet. The manuscripts and originals of a majority of them are housed in the ANU Institute of Literature. A unique collection of Shevchenkiana can also be found in the ANU Central Scientific Library – over 15,000 items collected by Yu. Mezhenko. The largest collection of publications of the works of Shevchenko and documents about his life and works has been amassed in the Shevchenko Museum in Kiev. Some autographs and papers of the poet are to be found in other archives, libraries, and museums throughout Ukraine, as well as in libraries in St Petersburg, Moscow, Cracow, Geneva, and elsewhere. There is no complete register of all archival Shevchenkiana.

Although bibliographic studies of Shevchenko play a paramount role in the study of the poet and his work, and although that aspect of Shevchenko studies has been highly developed, a complete bibliography of Shevchenko's works and of works about him and his work does not exist. Especially needed is a bibliography of the Shevchenkiana of the 1970s and 1980s, in foreign languages.

The first known published works concerning Shevchenko date from 1839. During the poet's life various reviews of his works appeared in the Ukrainian, Russian, Polish, Czech, German, French, and Italian press. The first publication of Shevchenko's poems outside of the Russian Empire was *Novye stikhotvoreniia Pushkina i Shavchenki* [sic]

An edition (1961) of foreign translations of Taras Shevchenko's 'Zapovit' (Testament) and the monument to Shevchenko in Kiev (sculptor Matvii Manizer, 1939)

(The New Poems of Pushkin and Shevchenko), which appeared in Leipzig in 1859 at the initiative of Kulish. A full *Kobzar* appeared in St Petersburg in 1860 (see also **Kobzar*), and a Russian translation of the *Kobzar*, with a bibliography listing Shevchenko's published works and other Russian translations, appeared in 1860. The last book published before the poet's death was his *Bukvar' iuzhnorusskii* (A South Russian [Ukrainian] Primer, 1861), which Shevchenko prepared for Ukrainian Sunday schools and published at his own cost.

At the beginning of the 1860s most materials about Shevchenko appeared in the journal **Osnova*. The first article about Shevchenko in German, by H.-L. Zunk, appeared in *Die Gartenlaube* in 1862 in Leipzig. The first study of Shevchenko's life and work to appear separately was in Polish: *Taras Szewczenko* by L. Sowiński with a translation of 'Haidamaky' as an addendum (1861). *Przekłady pisarzy matorossyjskich: Taras Szewczenko* (Translations of Little Russian Writers: Taras Shevchenko) was published in 1862 (repub 1863) by A. Gorzałczyński. A biographical and critical study of Shevchenko by G. Battaglia, *Taras Szewczenko, życie i pisma jego* (Taras Shevchenko, His Life and Letters, 1865), did much to popularize Shevchenko among Polish readers. J.-G. Obrist, the first translator of Shevchenko into German, used Battaglia's work when he wrote his *T.G. Szewczenko, ein klein-russischer Dichter* (1870).

V. Maslov's *T.G. Shevchenko – Biograficheskii ocherk* (T.G. Shevchenko, A Biographic Sketch, 1874, 1887) was the first relatively full biography of Shevchenko to appear in Russia and was also based on Battaglia's work. The Valuev circular (1863) and the Ems Ukase (1876) put an effective stop to the publication of works in Ukrainian in the Russian Empire. Publications of Shevchenko's works and works about him thenceforth were issued primarily in Galicia and abroad. *Poezii Tarasa Shevchenka* (The Poems of Taras Shevchenko), which appeared in Lviv in 1867 in two volumes, contained mainly Shevchenko's political poems; in Ukraine under Russian rule they either were prohibited or were published after being altered by censorship. Following the appearance of the two-volume Prague edition of *Kobzar* (1876) the French literary scholar E.-A. Durand published a large promotional article in *Revue des deux mondes* (15 June 1876), 'Le poète national de la Petite-Russie, T.G. Chevtchenko,' which produced echo articles, one by J.A. Stevens in the New York monthly *The Galaxy* (June 1876) and one by C. Dickens, Jr, in the London weekly *All the Year Round* (5 May 1877). At about the same time, V. Lesevych published an article, 'Taras Shevchenko, el gran poeta de Ucrania,' and translations of some poems in the Madrid journal *La Ilustración española y americana* (1877, no. 4). A more thorough article, 'Die Kleinrussen und ihr Sänger' by K. Franzos, appeared in *Augsburger Allgemeine Zeitung* (1877, nos 164–5). It was expanded into a booklet, *Vom Don zur Donau* (1878), in which the author emphasizes the universality of Shevchenko's works. Of importance in making Shevchenko accessible to the world at large was the work done by M. Drahomanov while he was an exile from Ukraine under Russian rule. Of special note is his brochure *La littérature ukrainienne proscrite par le gouvernement russe* (which was distributed at the Literary Congress in Paris in 1878). In Geneva Drahomanov published the *Kobzar* (1881), the poem 'Maria' (*Marija Maty Isusova* [Maria Mother of Jesus, 1882]), and *Poezii T. Shevchenka*,

zaboroneni v Rosii (Poems of T. Shevchenko Forbidden in Russia, 1890).

The main promoter of Shevchenko in the 1880s was I. Franko. Beginning with his youthful study 'Prychynky do otsinennia poezii Tarasa Shevchenka' (Contributions to the Evaluation of Taras Shevchenko's Poetry, *S'vit* [1881, nos 8–12, and 1882, no. 1]), Franko continued throughout his creative life to write on various aspects of Shevchenko's creativity. His study of the poem 'Perebendia' (1889) is both perceptive and objective; it considers Shevchenko's unique brand of romanticism in the context of European romanticism and Ukrainian folk traditions. Insights into Shevchenko's use of the ballad genre are to be found in Franko's study "'Topolia" T. Shevchenka' (T. Shevchenko's 'Topolia,' 1890). The cult of Shevchenko was becoming widespread in Ukraine, and epigones of Shevchenko were appearing among Ukrainian writers; Franko cautioned against both phenomena. He published a popular sketch of Shevchenko in the newspaper *Zoria* (1891, no. 5) giving a synthetic view of Shevchenko's life and works against the background of his era. With some variations the same article appeared in Polish (*Kurier Lwowski*, 1893, nos. 62–4, 66–8), German (*Die Zeit*, no. 4136, 1914), and, after Franko's death, English (*Slavonic Review*, vol 3, 1924). The last work by Franko on Shevchenko was his study of the poem 'Mariia,' published after Franko's death in *ZNTSh* (vols 119–20, 1917). Franko considered 'Mariia' to be one of Shevchenko's best works and used it as proof that exile had not daunted the poet's creative spirit.

Interest in Shevchenko continued to grow in the late 19th century. O. Konysky collected the articles on Shevchenko which he had published in *Zoria* and expanded them into a two-volume monograph, *Taras Shevchenko-Hrushiv's'kyi: Khronika ioho zhyttia* (Taras Shevchenko-Hrushivsky: A Chronicle of His Life, 1898, 1901), which also appeared in an abridged version in Russian in Odessa in 1898. Basing his work on the sources available, Konysky corrected many errors in previous biographies of Shevchenko and presented the first scholarly biography of the poet. S. Liudkevych's 'Pro osnovu i znachennia spivnosti v poezii Tarasa Shevchenka' (On the Origin and Meaning of Musicality in the Poetry of T. Shevchenko, *Moloda Ukraina*, 1901, nos 5–6, 8–9, and 1902, no. 4) was the first in a long line of works dealing with Shevchenko's poetics. The foundation for a bibliography of Shevchenkiana was laid by M. Komarov with his *Shevchenko v literaturu i iskusstve: Bibliograficheskii ukazatel' materialov dlia izucheniia zhizni i proizvedenii T. Shevchenko* (Shevchenko in Literature and Art: A Bibliographic Guide to the Materials for the Study of the Life and Works of T. Shevchenko, 1903).

Textological problems connected with Shevchenko's *Kobzar* were studied by V. *Domanytsky, who based his findings on autographs and various publications of Shevchenko's works. He published his work in *Kievskaiia starina* (1906, nos 9–12), 'Krytychnyi rozslid nad tekstom *Kobzaria*' (A Critical Study of the Text of the *Kobzar*), and as a separate monograph in 1907. The first 'full' edition of the *Kobzar* appeared under Domanytsky's editorship in St Petersburg in 1907 (repub in 1908). The historian of the Zaporozhian Sich D. Yavornytsky published valuable archival materials in 1909 as *Materialy do biohrafii T. Shevchenka* (Materials Pertaining to the Biography of T. Shevchenko). Also of interest was his study 'Zaporozhtsy v poezii T. Shevchenko' (Zaporozhians in the Poetry of

This page intentionally left blank

Shevchenko), published in *Letopis' Ekaterinoslavskoi uchenoi arkhivnoi komissii* (no. 8, 1912).

Several works appeared on Shevchenko in connection with the centenary of his birth: V. Shchurat collected his articles on Shevchenko in *Z zhyttia i tvorchosty Tarasa Shevchenka* (From the Life and Works of T. Shevchenko, 1914); O. Novytsky published a monograph *T. Shevchenko iak maliar* (T. Shevchenko as an Artist, 1914), the first major study on Shevchenko the artist; and Ya. Yarema wrote *Uliava Shevchenka* (The Imagination of Shevchenko, 1914), focusing on metaphor in Shevchenko's poetry.

A major contribution to Shevchenko studies outside of Ukraine came from the Swedish Slavist A. Jensen, whose monograph *Taras Schewtschenko: Ein ukrainisches Dichterleben* (1916) pointed to the universal themes and concerns of Shevchenko's poetry. Of interest as the first attempt at a psychological approach to Shevchenko's work was S. Ballei's *Z psykholohii tvorchosty Shevchenka* (On the Psychology of Shevchenko's Creativity, 1916).

Shevchenko studies continued to develop during the struggle for Ukraine's independence and under the new Soviet regime. The All-Ukrainian Academy of Sciences (VUAN), established in 1918, embraced several scholars working on Shevchenko and using various approaches, such as factual research and documentation (S. Yefremov, M. Novytsky, V. Miiakovsky, Ye. Markovsky), the sociology of literature (D. Bahalii, Y. Hermaize, O. Doroshkevych, M. Plevako, V. Koriak), esthetic criticism (P. Fylypovych, V. Petrov, P. Rulin, B. Varneke), and formalism (B. Yakubsky, A. Shamrai, Ya. Aizenshtok, B. Navrotsky). Soviet Ukrainian Shevchenko studies begin with the publication of the collection of essays *Taras Shevchenko*, edited by Ye. Hryhoruk and Fylypovych, which was published in 1921 to mark the 60th anniversary of the poet's death. Most Shevchenko studies in the 1920s were published as articles collected in jubilee editions (*Shevchenkiivs'kyi zbirnyk* [The Shevchenko Miscellany, 1924], *Shevchenko ta ioho doba* [Shevchenko and His Era, 2 vols, 1925–6]), but separate studies also appeared, notably Aizenshtok's *Shevchenkoznavstvo – suchasna problema* (Shevchenko Studies: A Current Problem, 1922), Plevako's *Shevchenko i krytyka* (Shevchenko and Criticism, 1924), Bahalii's *T.H. Shevchenko i Kyrylo-Methodiivtsi* (T. Shevchenko and the Cyrillo-Methodians, 1925), and O. Bahrii's *T.G. Shevchenko v literaturnoi obstanovke* (T. Shevchenko in a Literary Setting, 1925). In Galicia, under Polish rule, two works of importance appeared, I. Svientsitsky's *Shevchenko v svitli krytyky i diisnosti* (Shevchenko in the Light of Criticism and Reality, 1922) and M. Vozniak's *Shevchenko i kniazhna Repnina* (Shevchenko and Princess Repnina, 1925).

In 1926 the Taras Shevchenko Scientific Research Institute was established in Kharkiv, with a branch in Kiev. It was devoted to the collection of Shevchenko's autographs and artworks, to the study of his biography, and to textological studies of his poems. The results of those efforts were published in annual collections of the institute (*Shevchenko*, 1928, 1930) as well as in the institute's organ *Literaturnyi arkhiv*, which appeared bimonthly in 1930–1. The Kiev branch of the institute prepared for publication a dictionary of Shevchenko's language and a dictionary of Shevchenko's acquaintances, but neither was published owing to the political repressions of the 1930s.

One of the foremost Shevchenko scholars of the first

quarter of the 20th century was Yefremov. His many articles, written over a period of more than 15 years, were collected in a single volume, *Taras Shevchenko* (1914). In 1921 Yefremov became head of the VUAN Commission for the Publication of Monuments of Modern Literature. One of the objectives was the preparation of an academic edition of Shevchenko's works. Only two volumes appeared, vol 4, *Shchodenni zapysky* (Daily Notes, 1927), and vol 3, *Lystuvannia* (Correspondence, 1929). The volumes were edited by Yefremov and annotated by the scholars A. Loboda, Miiakovsky, M. Novytsky, O. Novytsky, D. Revutsky, Rulin, and Fylypovych. The remaining volumes, as well as O. Novytsky's volume devoted to the artistic works of Shevchenko, were never published, because most of the scholars perished in the wake of the trial of the *Union for the Liberation of Ukraine.

The terror of the 1930s put a stop to meaningful study of Shevchenko. The VUAN was closed, and the scholars at the institute were arrested. Most perished. Those who remained were placed under the control of Party officials, not necessarily connected with Shevchenko scholarship, whose main role was to liquidate all expression of true scholarship. The era of systematic falsification of Shevchenko's works began, and it lasted, to a greater or lesser degree, throughout the remainder of the Soviet regime. Although works on Shevchenko did not cease to be written, most of them, by such Party scholars as V. Zatonsky, A. Khvyliia, and Ye. Shabliovsky, merit little discussion.

Meanwhile Shevchenko studies continued outside of Soviet Ukraine. D. Doroshenko prepared a popular scholarly work, *Schewtschenko, der grosse ukrainische Nationaldichter*, and published it in Berlin in 1929. The work was republished in French (Prague 1931), English (Prague, Winnipeg, and New York 1936, and Augsburg 1946), and Italian (Prague 1939). Doroshenko also presented a concise survey of Shevchenko studies in the 1920s in 'Die Forschung über T. Ševčenko in der Nachkriegszeit,' published in *Zeitschrift für slavische Philologie* (vol 9, 1932). E. Borschak pointed to Shevchenko's role in the struggle for Ukrainian self-determination in the study 'Le mouvement national ukrainien au XIXe siècle,' which appeared in *Le monde Slave* (November 1930). The Shevchenko Scientific Society (NTSh) in Lviv published Borschak's study *Shevchenko u Frantsii: Narys iz istorii franko-ukraïns'kykh*

Books about Taras Shevchenko in French and Italian

vzaiemyn (Shevchenko in France: Sketch of the History of French-Ukrainian Relations, 1933). P. *Zaitsev prepared *Szewczenko a Polacy* (Shevchenko and the Poles, 1934), in which he studied Shevchenko against the background of Ukrainian-Polish relations in the mid-19th century. V. Simovych's popular study *Taras Shevchenko: Ioho zhyttia i tvorchist'* (T. Shevchenko: His Life and Works) was published in several editions (1934, 1941, 1944). Simovych also prepared an annotated *Kobzar* in 1921. S. Smal-Stotsky's study *Taras Shevchenko: Interpretatsii* (T. Shevchenko: Interpretations, 1934) emphasized Shevchenko's critical attitude to Russia and his contention that Ukraine's greatest misfortune lay in its domination by Russia. In 1937 the Ukrainian Scientific Institute in Berlin published the collection *Taras Schewtschenko, der ukrainische Nationaldichter (1814-1861)*, which contained articles and some translations. Of note was the publication *Studii nad poetychnoiu tvorchistiu T. Shevchenka* (Studies on the Poetic Creation of T. Shevchenko, 1939) by F. Kolessa, which consisted of two monographs, 'Folkl'ornyi element u poezii T. Shevchenka' (The Folkloric Element in the Poetry of T. Shevchenko) and 'Virshova forma poezii T. Shevchenka' (The Verse Forms in the Poetry of T. Shevchenko), which remains a basic work in the field.

The main center of Shevchenko studies in the 1930s was the Ukrainian Scientific Institute in Warsaw, which published 13 volumes of a 16-volume set of the complete works of Shevchenko (1934-8). The Soviet occupation of Poland put an end to the edition. A biography of Shevchenko by Zaitsev, which had been planned for the first volume, did not appear until 1955 in the United States. Vols 2-4 and 6-12 were edited by Zaitsev, vol 14 by B. Lepky, vol 15 by R. Smal-Stotsky; vol 16, which consisted of a bibliography, was compiled by V. Doroshenko. That incomplete full edition of Shevchenko's works was the greatest achievement of prewar Shevchenko scholarship. The volumes contained commentaries and annotations by the editors and such Shevchenko scholars as L. Biletsky, I. Bryk, Doroshenko, O. Lototsky, Ye. Malaniuk, S. Siropolko, and D. Chyzhevsky.

Works which appeared during the Second World War were Aizenshtok's *Iak pratsiuвав Shevchenko* (How Shevchenko Worked, 1940), O. Borschahivsky and M. Yosypenko's *Shevchenko i teatr* (Shevchenko and the The-

ater, 1941), M. Hrinchenko's *Shevchenko i muzyka* (Shevchenko and Music, 1941), S. Hordynsky's *Shevchenko - maliar* (Shevchenko the Painter, 1942), Ye.Yu. Pelensky's *Shevchenko - klasyk* (Shevchenko: A Classic, 1942), and some articles by L. Bulakhovsky and O. Doroshkevych.

The first postwar work on Shevchenko, which appeared in English in the United States, was *Taras Shevchenko: The Poet of Ukraine* (1945) by C.A. Manning, who provided the translations and annotations. In Soviet Ukraine the AN URSR (now ANU) Institute of Literature was re-established after the war, but the Shevchenko section was slow to produce any studies. Its main work centered on the completion of a 10-volume full collection of Shevchenko's works, begun before the war: vols 3-4 (dramatic works) appeared in 1949, and vol 5 (the diary and autobiography) in 1951; vols 1-2 (the poems) were republished from the 1939 edition in 1951-3, and vol 6 (letters, notes) in 1957; finally, vols 7-10 (the artistic works) appeared in 1961-4. Unfortunately the 10-volume 'full academic' edition was not free of the standard censorship and the falsifications which marred Shevchenko scholarship in Soviet Ukraine. Some of those deficiencies were removed from the subsequent full edition in six volumes, which appeared in 1963-4. Shevchenko's artistic oeuvre was republished in a separate four-volume edition in 1961-4. Beginning in 1952 the institute held annual conferences on Shevchenko, the proceedings of which were published in collections. Their content on the whole reflected the Party line in Shevchenko studies and the want of scholarly rigor. Somewhat more scholarly were the works of S. Chavdarov (*Pedahohichni idei Tarasa Hryhorovycha Shevchenka* [Pedagogical Ideas of T. Shevchenko, 1953]), V. Shubravsky (*Dramaturhiia Shevchenka* [Shevchenko's Dramaturgy, 1957, 1959, 1961]), Yu. *Ivakin (*Satyra Shevchenka* [Satire of Shevchenko, 1959, 1964]), Ye. Nenadkevych (*Z tvorchoi laboratorii T.H. Shevchenka* [From the Creative Laboratory of Shevchenko, 1959]), and D. Iofanov (*Materialy pro zhyttia i tvorchist' Tarasa Shevchenka* [Material on the Life and Works of T. Shevchenko, 1957]).

Many works appeared to mark the 1961 and 1964 anniversaries, some of which reflected the political 'thaw.' Among the more notable were Ivakin's *Styl' politychnoi poezii Shevchenka* (The Style of Shevchenko's Political Poetry, 1961) and his two-volume commentary on the *Kobzar* (1964-8), V. Vashchenko's *Mova Tarasa Shevchenka* (The Language of T. Shevchenko, 1963), P. Prykhodko's *Shevchenko i ukraïns'kyi romantyzm* (Shevchenko and Ukrainian Romanticism, 1963), H. Verves's *T.H. Shevchenko i Pol'shcha* (Shevchenko and Poland, 1964), and a two-volume dictionary of Shevchenko's language (1964). A two-volume bibliography of Shevchenko's life and works (1963) contains information only about works written in the territory of the former USSR in the years 1839-1959. It was augmented in 1968 by F. Sarana's bibliography of the jubilee literature of 1960-4, but that bibliography also excluded works written outside of the USSR. Some work in presenting a bibliography of Shevchenko translations and foreign-language criticism was done by H. Hresko, N. Andriianova, M. Zanichkovsky, and V. Kulyk in 1967-8 in Lviv. Their works had too small pressruns, however, and are not readily available.

An attempt at summarizing the work done on Shevchenko studies in Soviet Ukraine was the institute's compendium *Shevchenkoznavstvo: Pidsumky i problemy* (Shevchenko Studies: Summations and Problems, 1975) and the

Books in Shevchenko studies by Western authors

two-volume *Shevchenkivs'kyi slovnyk* (A Shevchenko Dictionary, 1978). Also notable for its breadth was the collective volume *Tvorchyi metod i poetyka T.H. Shevchenka* (The Creative Method and the Poetics of T. Shevchenko, 1980).

In the emigration after the Second World War Shevchenko studies have been continued in the publications of the Ukrainian Free Academy of Sciences (UVAN) in Canada and the United States. The UVAN in Canada re-published the four-volume *Kobzar*, edited and annotated by Biletsky, and the UVAN in the United States prepared the English-language volume *Taras Ševčenko, 1814–1861: A Symposium* (1962), edited by G.Y. Shevelov and Miiakovsky. The NTSh established the Shevchenko Studies Commission, headed by Zaitsev, which published Zaitsev's biography of Shevchenko (1955) as well as Yu. Boiko's *Ševčenko: Sein Leben und sein Werk* (1965). Studies on Shevchenko were published in *ZNTSh* (vols 161 [1953], 167 [1958], 176 [1962], 179–80 [1965]), and 214 [1991]. The NTSh also prepared guides to Shevchenkiana in the libraries of Paris (1961) and Munich (1964). The Ukrainian Free University (UVU) published Boiko's *Shevchenko i Moskva* (Shevchenko and Moscow, 1952), *Tvorchist' Tarasa Shevchenka na tli zakhidn'o-evropejs'koi literatury* (The Creativity of Shevchenko in Relation to Western European Literature, 1956), and, in conjunction with the University of Munich, the collection *Taras Ševčenko, 1814–1861* (1964). The UVU published a four-language collection of Shevchenko's poems (Ukrainian, English, French, and German) in 1961. Hordynsky's book on Shevchenko as an artist was translated into German as *Taras Schewtschenko als Maler* (1964), and a new work on Shevchenko the artist by I. Keivan and Hordynsky, *Taras Shevchenko, obrazotvorchyi mystets'* (Taras Shevchenko the Painter Artist), appeared in 1964.

The M. Denysiuk publishing firm in Chicago re-published the Warsaw edition of the works of Shevchenko in 1959–63 (14 volumes). Vol 13, edited by B. Kravtsiv, was devoted to Shevchenko scholarship and contained articles by Kulish, Franko, Shchurat, M. Hrushevsky, Yefremov, O. Novytsky, S. Smal-Stotsky, Navrotsky, and Kolessa. In 1961 V. Barka published his *Pravda Kobzaria* (The Truth of the Kobzar). L. Lutsiv published *T. Shevchenko, spivets' ukrains'koi slavy i voli* (T. Shevchenko, the Singer of Ukrainian Glory and Freedom, 1964), and K. Uhryn and A. Zhukovsky edited a collection of articles and translations, *Taras Chevčchenko, 1814–1861: Sa vie et son oeuvre* (1964). G. Luckyj edited a compendium, *Shevchenko and the Critics, 1861–1980* (1980), which contained original essays and translations from Ukrainian.

In response to the paucity of such studies in Soviet Ukraine, some monographs appeared dealing with Shevchenko's religious beliefs, such as Biletsky's *Viruiuchy Shevchenko* (Shevchenko the Believer, 1949), V. Yashchun's *Relihiine i moral'no-etychne oblychchia Tarasa Shevchenka* (The Religious and Moral-Ethical Aspect of T. Shevchenko, 1959), I. Vlasovsky's *Obraz Tarasa Shevchenka v svitli relihiinoi dumky* (A View of Shevchenko in the Light of Religious Thought, 1961), D. Buchynsky's *Khrystians'ko-filosofichna dumka Tarasa Shevchenka* (The Christian-Philosophic Thinking of T. Shevchenko, 1962), and Metropolitan Ilarion's (I. Ohienko) *Relihiinist' Tarasa Shevchenka* (T. Shevchenko's Religiosity, 1964).

A new mythopoeic and psychoanalytic approach to the study of Shevchenko was proposed by G. Grabowicz in *The Poet as Mythmaker: A Study of Symbolic Meaning in Taras*

Ševčenko (1982; Ukrainian trans 1991) and by L. Plushch in *Ekzod Tarasa Shevchenka ...* (The Exodus of Taras Shevchenko, 1986).

Shevchenko, Valentyna [Ševčenko], b 2 March 1935 in Kryvyi Rih, Dnipropetrovske oblast. Soviet government leader and Party functionary. A graduate of Kiev University (1960), she taught secondary school and advanced through the Party hierarchy to membership in the CC CPU (by 1976), the CPU Politburo (by 1985), and the CC CPSU (by 1986). In Ukraine's government she served as deputy minister of education (1969–75) and deputy chairman (1975–85) and then chairman (1985–90) of the Presidium of the Supreme Soviet. Identified with Brezhnev's regime in Ukraine, she was criticized in the late 1980s by the Ukrainian democratic opposition. She withdrew her candidacy in the 1990 elections to the Ukrainian Supreme Soviet and disappeared from public life.

Shevchenko, Volodymyr [Ševčenko], b 23 December 1929 in Balta (now in Odessa oblast), d 30 March 1987 in Kiev. Cinematographer and director. He graduated from the State Institute of Cinema Arts in Moscow (1967) and in 1971 became a director in the Ukrainian Studio of Chronicle-Documentary Films. Among his films are *Drevnyi horod L'va* (The Ancient City of the Lion [Lviv], 1970), *Bytva za Kyïv* (The Battle for Kiev, 1973), the trilogy *Radians'ka Ukraïna: Roky borot'by i peremoh* (Soviet Ukraine: The Years of Struggle and Victory, 1974–7), *Poïzd nadzvychainoho pryznachennia* (The Train with a Singular Assignment, 1980), all propaganda films, and a documentary about Chernobyl (1986).

Yona Shevchenko

Shevchenko, Yona [Ševčenko, Jona], b 26 April 1887 in Hnidyn, near Boryspil, Pereiaslav county, Poltava gubernia, d 1940. Actor and drama critic. After completing study at the Lysenko Music and Drama School he worked in Molodyi Teatr (1917–19) and Berezil (1922–4). He is the author of *Ukrains'kyi suchasnyi teatr* (Ukrainian Contemporary Theater, 1929) and *Ukrains'ki dramaturhy* (Ukrainian Playwrights, 1929). In 1936 he was arrested. He died in prison.

Shevchenko, Yurii [Ševčenko, Jurij], b 8 July 1926 in Kiev. Scientist in mechanics; corresponding member of the ANU (formerly AN URSR) since 1982. He graduated from Kiev University (1951) and taught at the Kiev Polytechnical Institute (1956–61). He has worked at the ANU Institute of Mechanics since 1961 (as a department head since 1972). He has developed methods of calculating loading stresses in machine components and a theory of thermo-plasticity, including numerical methods of calculation that are widely used today in various types of machine design.

Shevchenko Company (Rota im. Tarasa Shevchenka). A unit of the 13th International Brigade that fought in the *Spanish Civil War. Organized in June 1937, it was composed of Ukrainians, Belarusians, Poles, and Spaniards and was staffed mostly by communists. The commander was a Belarusian communist, S. Tomashevych. The company was dissolved in the autumn of 1938.

Shevchenko First Theater of the Ukrainian Soviet Republic (Persnyi teatr Ukrainskoi Radianskoi Respubliky im. T. Shevchenka). A theater established in March

1919 in Kiev on the basis of the forced unification of the *State Drama Theater and *Molodyi Teatr (and later joined by the First Youth Theater of the Kiev Soviet of Workers' Deputies). Among its actors were H. Borysohlibska, V. Vasylo, L. Hakkebush, P. Samiilenko, M. Tereshchenko, and H. Yura. The theater's repertoire consisted mostly of Soviet and classical dramas. Its artistic directorship consisted of an artificial union (O. Zaharov from the school of realistic-psychological theater and the experimentalist stage director L. Kurbas) and did not have positive results. The only exception was Kurbas's adaptation of T. Shevchenko's *The Haidamakas* in 1920. In early 1920 Yura departed with his conservative Molodyi Teatr group to form the touring Franko New Drama Theater (see *Kiev Ukrainian Drama Theater), and Tereshchenko's radical Molodyi Teatr group formed Tsentrostudiia (later the *Mykhailychenko Theater). In the summer of 1920 Kurbas left the theater to form *Kyidramte, and in 1921 Zaharov also left. Financial difficulties and demands for service in many Ukrainian cities resulted in the regrouping of the remaining ensemble as a touring theater until 1927, when it became the *Dnipropetrovske Ukrainian Music and Drama Theater.

V. Revutsky

Shevchenko Gallery (Halereia kartyn T.H. Shevchenka). A collection of T. Shevchenko's paintings established in Kharkiv in 1933 on the basis of the Literary Museum at the Taras Shevchenko Scientific Research Institute. Its original holdings consisted of 137 canvases, most of them donated by the Russian Museum and Hermitage in Leningrad and the Tretyakov Gallery, the Pushkin Museum, and the Historical Museum in Moscow. In 1933 the Chernihiv and Kiev historical museums transferred most of the literary and artistic works by Shevchenko in their collections to the gallery, and on the 125th anniversary of Shevchenko's birthday almost all of his artistic works were displayed there. During the Second World War the collection was evacuated. In 1944 it was returned intact, and in 1948 it was transferred to the *Kiev Shevchenko Museum.

Shevchenko Museum. See Kiev Shevchenko Museum.

Shevchenko Peak [Ševčēnka pik]. A mountain peak (elevation, 4,200 m) in the Great Caucasus Range. The peak is covered with snow and ice. It was first scaled in 1938 by an expedition of Ukrainian mountaineers, who named it in honor of T. *Shevchenko.

Shevchenko prizes. See Prizes and awards.

Shevchenko Scientific Society (Naukove tovarystvo im. Shevchenka, or NTSh). The oldest, and for a long time the only, prominent Ukrainian scholarly society. It was founded on 11 December 1873 in Austrian-ruled Lviv as the Shevchenko Society (Tovarystvo im. Shevchenka) with the aim of fostering the development of Ukrainian literature. The society's initiators were leading Ukrainian community and cultural figures on both sides of the Austrian-Russian border, headed by O. *Konysky. Its benefactors included Ye. *Myloradovych, D. *Pylchikov, M. *Zhuchenko, and Rev S. *Kachala. The Shevchenko Society's first act was the purchase of a press and the establishment of its own publishing house in 1874. By 1891 it had

The building of the Shevchenko Scientific Society in Lviv

published 20 books, including O. Ohonovsky's pioneering three-volume history of Ukrainian literature and the periodicals *Pravda* (1878–9) and **Zoria* (from 1885). The society's first presidents were K. *Sushkevych (1874–85), S. *Hromnytsky (1885–6, 1887–90), D. *Hladylovych (1886–7, 1890–2), and Yu. *Tselevych (1892).

1893–1914. Because the publication of Ukrainian literature and scholarship in Russian-ruled Ukraine was severely restricted after the imposition of the 1876 *Ems Ukase and subsequent tsarist edicts, in 1893 the Shevchenko Society was reorganized on the initiative of Konysky and V. *Antonovych 'to foster and develop science and art in the Ukrainian-Ruthenian language [and] to preserve and collect ... the monuments of antiquity [and] the scientific objects of Ukraine-Rus'. Renamed the Shevchenko Scientific Society and modeled on Western European scientific institutions, the NTSh pursued the aim of becoming 'the progenitor of a future Ukrainian-Ruthenian academy of sciences.' Under the leadership of O. *Barvinsky (1893–7) a library (70,000 cataloged volumes and 500 manuscripts in 1914 – the fullest and most systematic collection of Ucrainica in the world), museum (15,047 artifacts in 1920), and bookstore were established in Lviv. The NTSh's 137 members were divided among three sections – Philological (directed by O. Ohonovsky), Historical-Philosophical (A. Vakhnianyn), and Mathematical-Natural Sciences-Medical (I. Verkhratsky).

The NTSh acquired a pan-Ukrainian importance and scholarly prestige under the presidency (1897–1913) of M. *Hrushevsky, who was also director of the Historical-Philosophical Section from 1894. Assisted by V. *Hnatiuk as NTSh secretary (1898–1926) and head of the Ethnographic Commission, and I. Franko as director (1898–1908) of the Philological Section, Hrushevsky turned the NTSh into a de facto academy of sciences to which virtually all Ukrainian scholars belonged. On his suggestion, in 1899 the NTSh was divided into 32 prominent full members, who represented the sections, and many regular members, who could not vote on scholarly matters at section meetings. As a result Lviv acquired the status of a Ukrainian cultural and scholarly capital. Seminars were created within the various NTSh commissions and other bodies, and younger scholars were gainfully employed, the NTSh thereby being given a quasi-university function. Under Hrushevsky and Franko the Historical-Philosophical

cal and Philological sections grouped together all the major Ukrainian historians and philologists. Contacts with foreign learned institutions were established by the participation of NTSh members in international congresses and conferences, and by an exchange of publications with nearly 250 foreign institutions.

The primary NTSh organ, **Zapysky NTSh* (est 1892), became a quarterly (1895) and then a bimonthly (1896) under Hrushevsky's editorship (1895–1913). A second periodical, the quarterly *Khronika NTSh*, was founded in 1900 to provide information about NTSh activities. Pioneering and fundamental research was also published in the NTSh Legal Commission's **Chasopys' pravnycha* (from 1893); the Archeographic Commission's **Zherela do istorii Ukraïny-Rusy* (from 1895) and **Pam'iatky ukrains'ko-rus'koi movy i literatury* (from 1896); the Ethnographic Commission's **Etnohrafichnyi zbirnyk* (from 1895) and **Materiialy do ukrains'koi etnolohii* (from 1899); the Mathematical–Natural Science–Medical Section's series **Zbirnyk Matematychno-pryrodopysno-likarskoi sektiï NTSh* (from 1897); the Historical–Philosophical Section's series **Rus'ka istorychna biblioteka* (from 1894) and **Zbirnyk Istorychno-filosofichnoi sektiï NTSh* (from 1898), and an annual monograph series, *Ukrains'ko-rus'kyi arkhiv* (from 1905); the Philological Section's series **Zbirnyk Filolohichnoi sektiï NTSh* (from 1898); and the Bibliographic Commission's **Materiialy do ukrains'koi bibliohrafiï* (from 1909). In addition the NTSh published the **Ukrainska biblioteka* series of annotated Ukrainian literary classics (24 vols, 1901–4) and the prominent cultural-political monthly **Literaturno-naukovyï vistnyk* (1898–1906).

Changes occurred in the NTSh's role and scope after tsarist restrictions on Ukrainian writing and scholarship were lifted in the wake of the Revolution of 1905. The **Ukrainian Scientific Society in Kiev* (est 1907), for example, took over publication of *Literaturno-naukovyï vistnyk*. Nonetheless, the NTSh retained its importance in the Ukrainian scholarly world, even after Hrushevsky resigned as president in 1913 and his functions were assumed by the vice-president, S. **Tomashivsky* (1913–18).

1915–44. The First World War interrupted all NTSh activities, including plans to transform the NTSh into an academy of sciences in 1916. During the occupation of Galicia in 1914–15, the NTSh was outlawed, and its buildings and presses were confiscated. Many of its members died at the front or were civilian casualties, and many of its valuable library, archival, and museum holdings and scholarly acquisitions, as well as its student residence, were destroyed.

The NTSh was revived during the interwar Polish occupation of Western Ukraine, but it functioned on a lesser scale. Many of its members became political émigrés in the West, some emigrated to Soviet Ukraine, and the influx of new scholarly cadres declined (in 1923 the NTSh had 106 full members, 30 of them foreign scholars). Polish interference and taxation, the slashing of government subsidies, the withdrawal of rights to print schoolbooks, and the confiscation of most Ukrainian-American and Soviet Ukrainian publications addressed to its library also impinged on the NTSh's activities, income, and ability to publish. With the establishment of the All-Ukrainian **Academy of Sciences in Kiev* and Ukrainian scholarly institutions in Poland and Bohemia in the 1920s, the NTSh was no longer the primary Ukrainian scholarly center.

The NTSh continued its activities under the presidency of V. **Shchurat* (1919–25), K. **Studynsky* (1925–31), V. **Levytsky* (1931–5), and I. **Rakovsky* (1935–49). The NTSh Museum's collections were divided up to form the new NTSh museums of Culture and History (1920, with departments of archeology, ethnography, art, numismatics, and historical monuments [75,000 artifacts in 1927]), Natural Science (1920), and the Ukrainian Military (1937). The NTSh Library was rebuilt and expanded (over 300,000 vols in 1939) under the directors I. Krevetsky and V. Doroshenko. In 1921 the Institute of Normal and Pathological Psychology (directed by S. Balei) and the Bacteriological–Chemical Institute (directed by M. Muzyka) were created as part of the NTSh. In the early 1920s the NTSh organized the **Lviv (Underground) Ukrainian University* and **Lviv (Underground) Ukrainian Higher Polytechnical School*. It established relations with the VUAN in Kiev and co-operated with it in many matters, particularly **orthography*. An outstanding example of such collaboration was a Ukrainian mathematical dictionary (1926), which was prepared jointly by the academy's Institute of the Ukrainian Scientific Language and the NTSh. The NTSh's three scholarly sections and Legal, Statistical, Classic Philology, Linguistic, Archeological, Ethnographic, Art History, Physiographic, Bibliographic, and Publishing commissions remained active. The Shevchenko Studies Commission, with its own Serial, Terminological, Scientific-Technical, and Scientific-Agronomical commissions, and two other journals, **Stara Ukraïna* (1924–5) and **S'ohochasne i mynule* (1939), were established. In the 1930s the NTSh sponsored the preparation of an atlas of Ukraine (ed by V. **Kubijovyč*) and copublished the serials **Ukrains'ka knyha*, **Ukrains'ka muzyka*, and **Likars'kyi vistnyk*. With the Stalinist suppression of Soviet Ukrainian culture in the 1930s, the NTSh partly regained its earlier status in the Ukrainian scholarly world. Its international prestige remained high, as attested by the acceptance of membership in the NTSh by M. Planck (in 1923), D. Hilbert (in 1924), and A. Einstein (in 1929).

From its founding in 1873 until 1939 the NTSh issued 591 serial volumes (including 155 vols of *Zapysky NTSh*, 121 of them in 1891–1914), 352 individual scholarly publications, textbooks, and maps, 103 books of literary journalism, 95 belletristic works, and 31 informational publications.

During the first Soviet occupation of Galicia (1939–41) the NTSh was shut down. In 1940 it was forced by the Soviet authorities to dissolve, and its properties were expropriated by the state. Many of its members disappeared or were repressed, and others fled to German-occupied Poland. During the German occupation of Galicia (1941–4) the Nazi regime did not allow the NTSh to be publicly active. Before the Soviet reoccupation of Lviv in 1944, most remaining NTSh members fled to the West.

After 1947. On the initiative of Kubijovyč and Rakovsky, the NTSh was revived in Munich in June 1947 by members who had sought refuge in postwar Germany. Rakovsky was re-elected president (1947–9) and was succeeded by Z. **Kuzelia* (1949–52); Kubijovyč was elected general secretary. New full members, particularly postwar émigré scholars from Soviet Ukraine, were elected, and the sections and several commissions resumed their work. New Nationality Research, Encyclopedia, Bibliological, and Ukrainian Language institutes were estab-

Some of the members of the first émigré executive of the Shevchenko Scientific Society (Mittenwald, 1947). Sitting, from left: Yevhen Khraplyvy, Volodymyr Kubijovyč, Zenon Kuzelia, Leonyd Biletsky; standing: Yaroslav Padokh, Ivan Rozhin, Bohdan Lonchyna, Ivan Mirchuk, Rev Vasyl Laba, Yuliiian Pavlykovsky

lished, and the journal *S'ohochasne i mynule* (1948–9) was revived. After the mass emigration of Ukrainian refugees from Germany and Austria to countries of the New World in 1947–9, chapters of the NTSh were established in the United States (1947), Canada (1949), and Australia (1950). In 1951 the NTSh executive center, library, and archives were transferred from Munich to *Sarcelles, near Paris. In 1952 the American chapter purchased its own building in New York City and established a library and archives there.

In 1953 the NTSh had 126 full members and 226 regular members; in 1964 it had 139 full members and 485 regular members, over half of them in the United States. In 1955 the European, American, Canadian, and Australian chapters became autonomous NTSh societies, headed by Kubijovyč, V. Yaniv, and A. Zhukovsky in Sarcelles, by M. Chubaty, R. Smal-Stotsky, M. Stakhiv, O. Andrushkiv, Ya. Padokh, and L. Rudnytzy in New York City, by Ye. Vertyporokh and B. Stebelsky in Toronto, and by Ye. Pelensky, P. Shulezhko, I. Rybchyn, T. Liakhovych, I. Vashchyshyn, and R. Mykytovych in Melbourne. The NTSh General Council was established in 1978. Consisting of representatives from the four societies and the three sections, it was successively headed by Smal-Stotsky, Vertyporokh, Andrushkiv, V. Mackiw, and Padokh, with Rudnytzy as scientific secretary, W. Lencyk as general secretary, and I. Sierant as secretary-treasurer.

The four NTSh societies co-operated in the work of the NTSh sections and 16 commissions. The Historical-Philosophical Section (70 members in 1985) was based in Sarcelles and New York City and directed by I. Mirchuk, Kubijovyč, and V. Markus; the Philological Section (59 members) was based in New York City and directed by Z. Kuzelia, K. Kysilevsky, and V. Lev; and the Medical-

Natural Sciences–Mathematical Section (54 members) was based in New York City and directed by M. Zaitsev, W. Petryshyn (mathematics and physics), and R. Osinchuk (chemistry, biology, and medicine).

The NTSh has continued publishing *Zapysky NTSh* (vols 156–220, 1948–91); many of the volumes have doubled as collections of the various sections and as festschriften, and others have been monographs. It has also published 13 volumes (1949–89) of *encyclopedias of Ukraine, which have served as the basis of *Ukraine: A Concise Encyclopaedia* and *Encyclopedia of Ukraine*; 57 monographs in its Biblioteka ukrainoznavstva series (since 1951); and over 40 valuable collections of historical and memoiristic articles about regions and vicinities of Galicia in its *Ukrainskyi arkhiv* series (since 1960). Beginning in 1949 it renewed the publication of its chronicle, *Khronika NTSh*, of which nos 75–81 have been issued. In addition the American NTSh has published 14 volumes of *Proceedings* (since 1951), over 40 issues of scholarly *Papers* (since 1958), several literary works, and a few dozen other books and brochures. It has also copublished several books with the Ukrainian Academy of Arts and Sciences in the US and the periodicals *Ukrains'ka knyha* (since 1971) and *Nationalities Papers* (since 1973). The Canadian NTSh has published over 20 volumes of conference materials, collections of articles, and monographs. Of special interest are two volumes of *Zakhidn'okanads'kyi zbirnyk* (1973, 1975), which describe the history of Ukrainian settlement, schools, and churches in western Canada, the works of I. Kiriak and O. Luhovy, and Ukrainian place-names in Canada.

In Lviv the Shevchenko Scientific Society was reactivated on 21 October 1989. It adopted the original NTSh statutes (from 4 July 1874, modified in 1904, 1909, and 1949) as well as the statutes of the NTSh General Council (from 27 October 1978). It is headed by O. *Romaniv (also head of the Natural Sciences Section), with Yu. Babei as vice-president in charge of the scientific sections, Ya. Isaievych as vice-president in charge of the humanities sections, and O. Kupchynsky as scientific secretary; other members of the presidium (and heads of sections) are Ya. Burak (Physical-Mathematical), M. Ilnytsky (Philological), R. Kyrchiv (Ethnography and Folkloristics), V. Ovsichuk (Art Studies), and Yu. Slyvka (Historical-Philosophical). In addition to the six sections the Lviv NTSh established ecological (M. Holubets), medical (Ya. Hanitkevych), Slavic studies (V. Chornii), Oriental studies (Ya. Dashkevych), bibliographic and bibliological (M. Lizanets), publishing and printing (R. Mashtalir), and economic (S. Zlupko) commissions. It also took over the publishing of *Zapysky NTSh* (from vol 221), began issuing the proceedings of the medical section, *Likars'kyi zbirnyk*, and in 1991 started an international edition of the NTSh *Visnyk*.

Shevchenko Society in Saint Petersburg (Tovarystvo im. T.H. Shevchenka v Peterburzi). A charitable organization founded in St Petersburg in 1898 to aid needy students from Ukraine enrolled in the city's higher schools. The society covered school fees, the cost of books and equipment, and the medical costs of sick students. It helped students find jobs and living accommodation. To raise funds it collected membership dues and donations and organized concerts, public lectures, and bazaars. By 1900 its membership was over 200, and by 1907, almost 550. Of the 280 members in 1902, only half lived in St Petersburg; the others belonged to branches of the society in Kiev, Kharkiv, Odessa, Vilnius, Sukhumi, Baku, Irkutsk, Ashkhabad, Katerynodar, and Tbilisi. In 1905 a proposal to merge with the Philanthropic Society for Publishing Generally Useful and Inexpensive Books was rejected by the general meeting, but the two societies worked closely together. They collaborated in publishing T. Shevchenko's *Kobzar* under V. Domanytsky's editorship (1907; 2nd edn 1908). The first president of the society was A. *Markovych, and the first board of directors included prominent cultural figures, such as D. Mordovets, V. Lesevyeh, I. Repin, and V. Korolenko. With the outbreak of the First World War the number of students in St Petersburg declined, and membership fell to 67. The society decided to discontinue its activities.

Shevchenko Ukrainian Drama Theater. See Shevchenko First Theater of the Ukrainian Soviet Republic.

Shevchenkove [Ševčenkove]. IV-18. A town smt (1986 pop 6,500) and raion center in Kharkiv oblast. It was established at the beginning of the 20th century as a railway settlement called Bulatselivka on the Kupianka-Kharkiv-Belgorod line. In 1922 it was renamed, and in 1935 it became a raion center. Shevchenkove has a food and a building-materials industry.

Shevchenkove [Ševčenkove]. IV-12. A village (1972 pop 3,800) in Zvenyhorodka raion, Cherkasy oblast. Until 1929 its name was Kyrlylvka. Its significance lies in the fact that T. *Shevchenko grew up there (1816–28). He also visited the village in 1843, 1845, and 1859. Today an obelisk marks the site of his home. The graves of his parents and the 18th-century cottage in which Shevchenko attended his

first school lessons have been preserved. His parents' cottage has been converted into a literary memorial museum.

Shevchuk, Anatolii [Ševčuk, Anatolij] (pseud: Ivan Yavtushenko), b 6 February 1937 in Zhytomyr. Writer and political prisoner; brother of Valerii *Shevchuk. A typesetter by profession, he published 10 stories and a few poems in Soviet Ukrainian periodicals (1962–4). He was arrested by the KGB in Zhytomyr in May 1966 and sentenced at a closed trial in September to five years' imprisonment in a Mordovian strict-regime labor camp. A collection of prose he had prepared for publication was confiscated and never published. Three of his stories and excerpts of letters to his brother were first published in V. Chornovil's *Lykho z rozumu* (Woe from Wit, Paris 1967). In the late 1980s he began publishing stories again in periodicals.

Shevchuk, Hryhorii [Ševčuk, Hryhorij], b 8 February 1916 in Krasnohirka, Skvyra county, Kiev gubernia. Historian. A graduate of the Kiev Pedagogical Institute (1938), he worked at the AN URSR (now ANU) Institute of History (1946–67) and the Kiev Institute of Culture (from 1968). He contributed to the collective works *Istoriia Ukraïns'koi RSR* (History of the Ukrainian SSR, 2 vols, 1967) and *Rozvytok Ukraïns'koi kul'tury za roky Radians'koi vlady* (The Development of Ukrainian Culture during the Years of Soviet Rule, 1967) and wrote *Borot'ba trudiashchykh Radians'koi Ukraïny proty kontrrevoliutsii na Pivdni v 1920 r.* (The Struggle of the Workers of Soviet Ukraine against the Counter-revolution in the South in 1920, 1956) and *Kul'turne budivnytstvo na Ukraïni u 1921–1925 rokakh* (Cultural Construction in Ukraine in 1921–5, 1963).

Valerii Shevchuk

Shevchuk, Valerii [Ševčuk, Valerij], b 20 August 1939 in Zhytomyr. Writer. He is a master of psychological prose on contemporary themes. His collections include *Sered tyzhnia* (Midweek, 1967), *Naberezhna, 12* (12 Naberezhna Street, 1968), *Seredokhrestia* (The Intersection, 1968), *Vechir sviatoi oseny* (An Evening of the Sacred Autumn, 1969), *Kryk pionia na svitanku* (Cock's Crow at Dawn, 1979), *Dolyna dzherel* (The Valley of Springs, 1981), *Tepla osin'* (The Warm Autumn, 1981), and *Dzygar odvoichnyi* (The Eternal Clock, 1987). He is adept at perceiving the extraordinary in the ordinary and at exalting simple humanity to greatness. His masterful construction of themes serves as a backdrop for wide-ranging portraits of life, from concise realistic descriptions to those bordering on the fantastic (particularly in 'Zhyttia ta pryhody Vitaliia Voloshyns'koho' [The Life and Adventures of Vitalii Voloshynsky]). His terse expression, the sophisticated psychological motivation of his characters (departures from the

officially sanctioned divisions between 'positive' and 'negative' ones), and his bold unwillingness to adhere to the dogmas of *socialist realism and official ideology set him apart from other writers of Soviet prose but also attracted the hostility of the Soviet literary hierarchy. His works were not fully recognized for their merit until the late 1980s. In such works as his novelette-preamble *Dim na hori* (The House on the Hill, 1983) Shevchuk has combined the native folkloric tradition of the fantastic, as in N. Gogol, with historical themes and a philosophical quest for the meaning of life and self, in multilevel prose which some critics call *khymerna proza* (chimerical prose – somewhat reminiscent of the magic realism of Latin American prose).

Shevchuk has also drawn on the medieval Kievan period for his novels *Na poli smyrennomu* (On the Peaceful Field, 1982) and *Petro uteklyi* (Peter the Fugitive, 1985), the novelistic essay *Myslenne derevo* (The Thinking Tree, 1986), and the trilogy tracing the secularization of Ukraine through the 17th, 18th, and 19th centuries, *Try lystky za viknom* (Three Leaves outside the Window, 1986). He has also translated *Litopys Samiila Velychka* (The Chronicle of Samiilo Velychko, 1986–7) and love lyrics of the 16th to 19th centuries (in *Pisni Kupidona* [Cupid's Songs] 1984) into contemporary Ukrainian.

I. Koshelivets, D.H. Struk

Shevchuk, Vasyl [Ševčuk, Vasyl'], b 30 April 1932 in Barashi, Yemilchyn raion, Zhytomyr oblast. Writer of historical fiction. He graduated from Kiev University (1955) and worked as an editor for *Pioneriia*, *Literaturna Ukraïna*, and the Dnipro publishing house, and the Kiev Artistic Film Studio. From 1953 to 1959 he published four children's poetry books and a collection of lyrical poetry (1958). He then switched to prose and wrote the novelettes *Horobynoi nochi* (A Stormy Summer Night, 1960), *Zelenyi shum* (The Green Murmur, 1963), *Vitryla* (Sails, 1964, about T. Shevchenko), and *Trubliat' lebedi nad Slavutychem* (The Swans Are Trumpeting above the Slavutych, 1967); a story collection for children (1965); a novel about H. Skovoroda, *Hryhorii Skovoroda* (1969; rev edn: *Predtecha* [The Precursor, 1972]); the Cossack novel *Pobratymy ...* (1972; English trans: *Bloodbrothers*, 1980); the novelle collection *Den' – iak zhyttia* (A Day Is like a Lifetime, 1979); *Veselych* (1980), a novel about the medieval author of **Slovo o polku Ihorevi*; the contemporary novelette "Tepla osin'" (A Warm Autumn, 1981); a reinterpretation of the *Slovo ...* titled *Slovo pro Ihoriv pokhid* (1982); the novel *Zlam* (The Break, 1982); two critically acclaimed novels about T. Shevchenko, *Syn voli* (The Son of Liberty, 1984) and *Ternovyi svit* (The Thorny World, 1986); and the historical fantasy novel *Feniks* (The Phoenix, 1988).

Shevchukevych, Opanas [Ševčukevyč], b 17 March 1902 in Vyzhenka, Chernivtsi county, Bukovyna, d ? Sculptor; physician by profession. A graduate of the medical faculty of Freiburg University (1929), he studied sculpture under K. Kollwitz at the Berlin Academy of Arts. The first exhibitions of his works in Germany and Chernivtsi in the late 1920s were favorably received by the critics. He did portraits of K. Kollwitz (1928), M. Ivasiuk (1957–8), O. Kobylanska (1962–3), T. Shevchenko (1963), and M. Drahomanov (1970) and compositions such as *Beggar* (1925) and *Death over the Dancer*.

Shevchyky. A folk dance performed by one or two people to instrumental music in 2/3 time. It mimics the movements of a shoemaker (*shvets*) through pantomime.

Shevel, Heorhii [Ševel', Heorhij], b 9 May 1919 in Kharkiv, d 16 November 1988 in Kiev. Party and Soviet government leader. A graduate of Kharkiv University (1941), he served as a secretary and first secretary of the Lviv Oblast Komsomol Committee (1944–6), a secretary (1946–50) and first secretary (1950–4) of the Ukrainian Komsomol CC, a CC CPU member (1952–80), second secretary of the CPU Kiev City Committee and agitation and propaganda secretary of the CPU Kiev Oblast Committee (1954–61), and CC CPU chief of agitation and propaganda (1961–70). As the Ukrainian minister of foreign affairs (1970–80) he headed the Ukrainian delegation at the United Nations General Assembly.

Shevelev, Arnold [Ševelev, Arnol'd], b 28 November 1928 in Balakliia (now in Kharkiv oblast). Soviet historian and CPSU functionary; corresponding member of the ANU (formerly AN URSR) since 1972. He graduated from Kiev University (1948) and taught in institutions of higher education from 1954 (from 1968 as a professor). He served as secretary (1969–72) and assistant director (from 1972) of the Kiev branch of the CPU. As director of the ANU *Institute of History (1973–8) he was instrumental in curtailing its autonomous research and eliminating most of its pre-1917 publications. He wrote many works on the history of the CPSU and the CPU and a collection of essays on the development of research in Soviet and foreign history in the Ukrainian SSR (1975). He was editor in chief of *Istoriia Ukraïns'koi RSR* (History of the Ukrainian SSR, 8 vols in 10 books, 1977–9).

Sheveliv, Borys [Ševeliv], b 2 April 1893 in Chernihiv, d ? Literary scholar. In the 1920s and early 1930s he was a member of the VUAN Chernihiv Scientific Society and an associate of the VUAN Commission for the Study of Left-Bank Ukraine. He published articles on L. Hlibov, P. Kulish, S. Nis, A. Svydnytsky, O. Lazarevsky, and the Chernihiv Hromada in VUAN serials (*Za sto lit, Ukraïna*) and compendiums, and edited an edition of Hlibov's works (1927). He stopped publishing during the Stalinist terror, and his fate is unknown.

Shevelov, George Yurii [Ševel'ov, Jurij] (pseud: Yurii Sherekh, Hryhorii Shevchuk, Yur. Sher., Yu. Sh., Hr. Sh.,

George Shevelov

et al), b 17 December 1908 in Łomża, Poland. Slavic linguist, philologist, essayist, literary historian, and critic; full member of the Shevchenko Scientific Society since 1949 and of the Ukrainian Academy of Arts and Sciences since 1945. After studying under L. Bulakhovsky at Kharkiv University (candidate 1939) he lectured there in Slavic linguistics (1939–43). Having emigrated to Germany, he taught at the Ukrainian Free University in Munich (1946–9) and obtained a doctorate there (1949). He was also vice-president of the *MUR literary association (1945–9). After settling in the United States he served as lecturer in Russian and Ukrainian at Harvard University (1952–4), associate professor (1954–8) and professor of Slavic philology at Columbia University (1958–77), and president of the *Ukrainian Academy of Arts and Sciences (1959–61, 1981–6). He was a founding member of the *Slovo Association of Ukrainian Writers in Exile.

Shevelov is the author of some 500 articles, reviews, and books on Slavic philology and linguistics and the history of literature. In Slavic linguistics he has contributed to such areas as phonology, morphology, syntax, lexicology, etymology, literary languages, and onomastics. He has devoted special attention to Old Church Slavonic, Belarusian, Polish, Russian, Slovak, Serbo-Croatian, Macedonian, and above all Ukrainian. In his most important work, *A Historical Phonology of the Ukrainian Language* (1979), Shevelov demonstrated the historical continuity of the language. His other important publications in linguistics are *Do henezhy nazvyvnoho rechennia* (On the Genesis of the Nominal Sentence, 1947), *Halychyna v formuvanni novoi ukrains'koi literaturnoi movy* (Galicia in the Formation of the Modern Ukrainian Literary Language, 1949, 1975), *Narys suchasnoi ukrains'koi literaturnoi movy* (An Outline of the Contemporary Ukrainian Literary Language, 1951), *The Syntax of Modern Literary Ukrainian: The Simple Sentence* (1963; Ukrainian version 1951), *A Prehistory of Slavic: The Historical Phonology of Common Slavic* (1964, 1965), *Die ukrainische Schriftsprache, 1798–1965* (1966), *Teasers and Appeals: Essays and Studies on Themes of Slavic Philology* (1971), and *The Ukrainian Language in the First Half of the Twentieth Century, 1900–1941: Its State and Status* (1989; Ukrainian version 1987).

His numerous articles in the field of literature, literary criticism, and theater were collected in *Ne dlia ditei* (Not for Children, 1964), *Druha cherha: literatura, teatr, ideolohii* (The Second Round: Literature, Theater, Ideologies, 1978), and *Tretia storozha* (The Third Watch, 1991). He was one of the organizers of émigré literary life in Germany after the Second World War. Shevelov was editor or coeditor of many scholarly and literary journals, serials, books, and other publications, including *Arka (1947–8), *The Annals of the Ukrainian Academy of Arts and Sciences in the US* (1960–1), *Historical Phonology of the Slavic Languages* (5 vols, 1973–83), and *Suchasnist'* (1978–87). He was also linguistics subject editor for *Entsyklopediia ukraïnoznavstva* (Encyclopedia of Ukraine, 1949–52, 1955–89), *Ukraine: A Concise Encyclopaedia* (vol 1, 1963), and *Encyclopedia of Ukraine* (vols 1–2, 1984, 1988), to which he contributed numerous articles.

A bibliography of his works by J. Hursky appeared in *Symbolae in honorem Georgii Y. Shevelov* (1971) and *Studies in Ukrainian Linguistics in Honor of George Y. Shevelov* (1985).

J. Hursky

Shiller, Nikolai [Šiller, Nikolaj], b 13 March 1848 in Moscow, d 23 November 1910 in St Petersburg. Physicist. A graduate of Moscow University (1868), he did postgraduate work at Berlin University (1871–4). In 1876 he was appointed a professor at Kiev University, and there in 1884 he assumed the first chair of theoretical physics in Ukraine. His major contributions were in the fields of thermodynamics and electromagnetism. He showed that the differential equations describing the second law of thermodynamics contain an integrating factor that is a universal function of temperature, and developed what became known as the Shiller (1900)–Carathéodory (1909) formulation of the second law of thermodynamics. His work on dielectric susceptibility and displacement currents was highly regarded by J. Maxwell. Shiller was the founder of the *Kiev Physics and Mathematics Society (1890) and served as its president until 1904. In 1903 he became the rector of the Kharkiv Applied Technology Institute.

Shilov, Evgenii [Šilov, Jevgenij], b 10 August 1893 in Serpukhov, Moscow gubernia, d 22 July 1970 in Kiev. Organic chemist; AN USSR (now ANU) full member from 1951. A graduate of Moscow University (1917), he taught at the Ivanovo-Voznesensk Polytechnical (1919–30) and Chemical-Technical institutes. From 1947 he directed the Laboratory of Organic Reaction Mechanisms at the ANU Institute of Organic Chemistry. Shilov's research was devoted to organic reaction mechanisms and analytical chemistry. He introduced (jointly with Ya. Syrkin) the concept of cyclic four- and six-center transition states in bimolecular reactions, and contributed to the theory and practice of bleaching natural fibers by processes involving chlorine or peroxides.

Shimanovskiy, Yulii [Šimanovskij, Julij], b 8 February 1829 in Riga, d 25 April 1868 in Kiev. Russian surgeon. A graduate of Tartu University (1856), he taught surgery at Helsinki University. In 1861 he was appointed a professor of operative surgery at Kiev University and director of the surgery department at the Kiev Military Hospital. He invented about 80 surgical instruments and a number of new surgical methods. He wrote a large number of articles and books, including the monographs *Operativnaia khirurgiia* (Operative Surgery, 3 vols, 1864–9) and *Voenno-khirurgicheskie pis'ma* (Military-Surgical Letters, 1868).

Shipbuilding. A branch of the *machine-building industry that builds and repairs cargo, passenger, fishing, military, and other ships, as well as barges and floating docks, cranes, derricks, and other equipment. In Ukraine the first shipbuilding facilities were constructed in Mykolaiv in 1788 by the Russian Admiralty to build sailing ships for the Russian Imperial Black Sea Fleet. Later they became the *Mykolaiv Shipyard. The first steamships were produced in the Russian Empire in 1815. A machine-building plant built in Kiev in 1862 changed to shipbuilding later in the 19th century. Two other shipyards built in Mykolaiv in the 1890s merged in 1907 to form the *Black Sea Shipyard. By 1913 in Russian-ruled Ukraine there were seven dockyards that built and repaired ships (in Odessa, Mykolaiv, Kherson, and elsewhere) and several smaller facilities that built river craft, barges, and so on. Ukraine accounted for about 13 percent of all shipbuilding in the Russian Empire.

The shipbuilding industry developed more rapidly after the Revolution of 1917. In the interwar period most of the existing factories were reconstructed, and several new ones were built. By 1928–9 shipbuilding accounted for 14 percent of all machine building in Ukraine, and Ukrainian output constituted a major share of Soviet production. The industry built ships for river and sea transportation and the fishing fleet. It was devastated during the Second World War and reconstructed after the war.

Today many different types of ships are built in Ukraine, including transport ships, tankers, whaling ships, research ships, trawlers, passenger ships, and dredges. Some of the ships weigh up to 150,000 t. In general, however, Soviet sources provided little information about the shipbuilding industry, especially about its military sector. It is known that until 1941 Ukrainian shipyards produced 15 to 20 warships annually.

Shirokov, Aleksandr [Širokov], b 18 September 1905 in Ivanovo, Russia. Geologist; corresponding member of the AN URSR (now ANU) since 1957. He graduated from (1930) and taught at (from 1946) the Dnipropetrovske Mining Institute. His major fields of interest include mining geology and estimations of the extent and quality of coal deposits in Ukraine and the European section of Russia, particularly the Donets Basin. He served as deputy head of the Supreme Soviet of the Ukrainian SSR in 1963–6.

Shishmanov, Dimitar [Šišmanov], b 1889 in Sofia, Bulgaria, d 1945. Writer and literary scholar; son of I. Shishmanov and M. Drahomanov's daughter, Lidiia. Besides contributing short stories, novels, and plays to Bulgarian literature, he acquainted the Bulgarian reader with the history of Ukraine and its literature. He accompanied his father to Kiev in 1918, where he became familiar with contemporary Ukrainian literature and translated a shortened version of S. Yefremov's history of Ukrainian literature (published in Sofia in 1919). He contributed articles on Ukrainian writers and on M. Hrushevsky (1935) to *Ukrains'ko-bolhars'kyi ohliad* and edited some of the Bulgarian translations of writers such as M. Kotsiubynsky, I. Franko, O. Oles, and Yu. Fedkovych, which appeared in the journal. In 1945 he was executed by Bulgarian Communists.

Shishmanov, Ivan [Šišmanov], b 4 July 1862 in Svishotov, Bulgaria, d 22 July 1928 in Oslo. Bulgarian literary scholar, folklorist, and civic figure; full member of the Bul-

Ivan Shishmanov

Mykhailo Shkilnyk

garian Academy of Sciences and the Shevchenko Scientific Society. After studying at Jena, Geneva, and Leipzig universities he was a professor at Sofia University (from 1894). Through his father-in-law, M. *Drahomanov, and his wife's cousin, Lesia Ukrainka, he developed friendships with other Ukrainian writers (I. Franko) and scholars (V. Hnatiuk). He later became Bulgaria's minister of education (1903–7) and Bulgarian emissary to the Central Rada in Kiev (1918–19). In 1920 he initiated the creation of the Bulgarian-Ukrainian Society. Among his many works are articles on Ukrainian literature (particularly on T. Shevchenko) and its influence on the Bulgarian revival. His collected works were published in two volumes (1965–6).

Shkandrij, Myroslav [Škandrij], b 17 March 1950 in Leeds, England. Literary scholar. A graduate of the University of Toronto (PHD, 1980), he has taught at the universities of Calgary (1978–83), Manitoba (1983–5), Ottawa (1985–7), and, since 1987, Manitoba again, where beginning in 1990 he has served as a department head. Shkandrij is the author of articles on contemporary Ukrainian literature. He has translated and edited *Mykola Khvylovy, The Cultural Renaissance in Ukraine: Polemical Pamphlets, 1926–1927* (1985) and written the monograph *Modernists, Marxists, and the Nation: The Ukrainian Literary Discussion of the 1920s* (1992).

Shkarivka settlement. A Middle *Trypilian culture (late 4th to early 3rd millennium BC) settlement located near Shkarivka, Bila Tserkva raion, Kiev oblast. Excavations in 1967–73 uncovered the remains of rectangular and L-shaped houses with domed ovens, imprinted pottery, and ritual hearths.

Shkavrytko, Myroslav [Škavrytko], b 18 October 1922 in Galicia, d 16 September 1984 in Winnipeg. Journalist and religious leader. In Galicia he studied at Lviv University and then worked as a teacher. As a postwar refugee he organized Ukrainian theaters in Italy and worked with the Ukrainian press service in Great Britain. He emigrated to Canada in 1953; in 1963–73 he was chief editor of **Kanadis'kyi farmer* in Winnipeg. From the 1970s Shkavrytko was one of the leaders of the Ukrainian Native Faith church. He wrote the church's creed and many of its prayers.

Shkilnyk, Mykhailo [Škil'nyk, Myxajlo], b 19 September 1891 in Surokhiv, Jaroslaw county, Galicia, d 14 November 1972 in Toronto. Jurist and political activist. He completed his law studies in Lviv, Cracow, and Kiev. In 1918–20 he worked in the UNR Ministry of Trade and Industry and headed the consular department at the Ministry of Foreign Affairs. After returning to Galicia, from 1921 he worked as a judge in Peremyshliany. In 1945 he left for Germany and then emigrated to Canada. In the 1960s he served as president of the Association of Ukrainian Lawyers. In addition to numerous articles on the revolutionary period, he wrote *Ukraina u borot'bi za derzhavnist' v 1917–1921 rokakh* (Ukraine in the Struggle for Statehood in 1917–1921, 1971).

Shkliarevsky, Oleksii [Škljarev's'kyj, Oleksij], b 3 April 1839 in Krasnopillia, Krolevets county, Chernihiv gubernia, d 5 July 1906 in Kiev. Pathologist and biophysicist. A graduate of Moscow University (1862), he taught general

pathology at Kiev University (from 1869) and hygiene at the Higher Courses for Women (1878–80). His publications deal with the inflammation process and blood diseases. His lectures on medical physics were published in the university's *Izvestiia* (1881–2).

Shkol'na chasopys' (School Periodical). A semimonthly paper of pedagogical and scholarly affairs, published in Lviv from September 1880 to May 1889. In 1882–3 it was the organ of the Ruthenian Pedagogical Society (later *Ridna Shkola). *Shkol'na chasopys'* published articles on pedagogy, extracurricular education, and educational policies; literary works; ethnographic studies; and professional news for teachers. The editor and publisher was H. Vretsona. The journal was succeeded by **Uchytel'*.

Shkolnyk, Arkadii [Škol'nyk, Arkadij], b 22 February 1916 in Kharkiv, d 28 October 1986 in Kharkiv. Dramatist. From 1942 on he wrote a number of plays, including *Liu-dyna shukaie shchastia* (A Person Seeks Happiness, 1955), *Iunist' moia* (My Youth, 1959), *Za tse ne sudiat'* (For This They Don't Judge, 1967), and *Pereval* (The Mountain Pass, 1969). He also wrote several plays for children. A collection of his selected plays was published in 1985.

Shkraba, Orest [Škraba], b 1898, d ? Civic and political leader in Bukovyna. In the 1920s he was active in the Zaporozhe student organization. After opening a law office in Kitsman he became active in politics and joined the Ukrainian National party. In 1930 and 1932 he was elected to the Rumanian parliament.

A sugar container by Vasyl Shkribliak, jug by Mykola Shkribliak, and plate by Yurii Shkribliak

Shkribliak [Škribljaky]. The family name of a group of Hutsul folk artists from Yavoriv, Kosiv county, Galicia (now Kosiv raion, Ivano-Frankivske oblast), who have specialized in wood carving and inlay. Yurii Shkribliak (b 28 April 1822, d 1884) was the founder of the family tradition. He made wooden flasks, miniature barrels, goblets, plates, spoons, crosses, cups, axes, pistols, rifles, and powder horns decorated with geometrical carvings and copper-wire or sheep-horn inlay. Noted for their original forms and fine technical execution, they were displayed at agricultural fairs in Vienna (1872), Lviv (1877), Trieste (1878), Stanyslaviv (1879), and Kolomyia (1880). Yurii taught his craft to his sons, Vasyl (1856–1928), Mykola (1858–1920), and Fedir (1859–1942). Vasyl specialized in flat carving and inlay of variously colored wood, beads, metal, and mother-of-pearl. His best works are plates, shelves, and furniture. In 1905–15 he taught at the provincial wood carving school in Vyzhnytsia. His works were

shown at exhibitions in Ternopil (1884), Cracow (1887), Lviv (1894, 1905), and Kolomyia (1880, 1912). Mykola introduced a pitted background to heighten the contrast with the carved design. His favorite motif was the rosette. Mykola taught the family craft to his sons, Fedir (b 28 April 1893, d 10 November 1960) and Vasyl (b 1900), and Fedir passed it on to his son, Dmytro (b 20 October 1925). Similar work has been done by the *Korpaniuk brothers (the sons of Kateryna, the daughter of Yurii Shkribliak) and their descendants. An album of works by the Shkribliak family was published in Kiev in 1979.

Yurii Shkrumeliak

Shkrumeliak, Yurii [Škrumeljak, Jurij] (pseud: Ivan Sorokaty, Yu. Ihorkiv, O. Pidhirsky, Smyk], b 18 April 1895 in Lanchyn, Nadvirna county, Galicia, d 20 October 1965 in Lviv. Writer and journalist. A veteran of the Ukrainian Sich Riflemen, in the 1920s he studied at Lviv and Prague universities and the Ukrainian Higher Pedagogical Institute in Prague. In Lviv he worked as a coeditor for the *Svit Dytyny* (1920–30) and I. Tyktor (1928–9) publishers and was chief editor of the popular weekly *Narodnia sprava* (from 1928) and the children's monthly *Dzvinochok* (1931–9). He began publishing in 1915. In the interwar years he wrote many children's books, notably *Iurza-Murza*, *Zapysky Ivasia Krilyka* (The Notes of Ivas Bunny), *Strilets' Nevmyrakha* (The Rifleman Nevmyrakha), *Mova vikiv* (The Language of Ages), and a four-part history of Ukraine for children. He also translated into Ukrainian stories for children from *The Thousand and One Nights* (tales of Aladdin, Ali Baba, and Sinbad the Sailor). His poems, stories, feuilletons, and belletristic reminiscences appeared in *Mytusa*, *Students'kyi visnyk*, *Svit dytyny*, and *Narodnia sprava* and in the Chervona Kalyna publishing house annual *Istorychnyi kalendar-al'manakh Chervonoi kalyny*. Published separately were his long poem *Son Halycha* (The Dream of Halych, 1920), the memoirs *Poizd mertsiv* (The Train of the Dead, 1922), the poetry collection *Aveleva zhertva* (Abel's Sacrifice, 1926), and the novels *Chta Krylatykh* (The Squadron of the Winged Ones, 1928), *Vohni z polonyn* (Fires from the Mountain Pastures, 1930), and *Vysoki hory i nyz'ki dolyny* (High Mountains and Low Valleys, 1939). Although he had published a pro-Soviet poetry collection in 1941, from 1946 to 1955 Shkrumeliak was a Soviet political prisoner in Siberia. He was rehabilitated in 1956, and the regime published his poetry collection *Sopilka spivaie* (The Sopilka Is Singing, 1957) and a book of selected works, *Pryvit Hoverli* (Greeting to Hoverlia, 1964).

R. Senkus

Shkurat, Stepan [Škurat], b 8 January 1886 in Kobeliaky, Poltava gubernia, d 26 February 1973 in Romen, Sumy oblast. Stage and film actor and singer. He began his acting career in an amateur troupe in Romen (1910–28). In 1918 the troupe came under the direction of I. Kavaleridze, who invited Shkurat to act in his film *Zlyva* (A Downpour, 1929). Shkurat later became a leading heroic and character actor in O. Dovzhenko's films, including *Zemlia* (The Earth, 1930); he also appeared in I. Savchenko's *Vershnyky* (The Riders, 1939) and I. Kavaleridze's *Povviiia* (The Strumpet, 1961, based on P. Myrny's novel). A biography, by V. Oleksenko, was published in Kiev in 1983.

Geo Shkurupii

Mykola Shlemkevych

Shkurupii, Geo [Škurupij] (Yurii), b 20 April 1903 in Bendery, now in Moldova, d 8 December 1937. Writer of poetry and prose. His first published work appeared in the almanac *Hrono* in 1920. He was an active member of the Association of Panfuturists, and his works were published in *Vyr revoliutsii*, *Shliakhy mystetstva*, *Hlobus*, *Hrono*, *Semafor u maibutnie*, *Zhyttia i revoliutsiia*, *Nova generatsiia*, *Chervonyi shliakh*, and *Literaturna hazeta*. His collections of poetry include *Psykhotezy* (Psychotheses, 1922), *Baraban* (The Drum, 1923), *Zharynyi sliiv* (The Embers of Words, 1925), *More* (The Sea, 1927), and *Dlia druziv poetiv – suchasnykiv vichnosti* (To My Friends the Poets, Contemporaries of Eternity, 1929). His short stories include 'Peremozhets' drakona' (The Slayer of the Dragon, 1925), 'Pryhody mashynista Khorpa' (The Adventures of Khorp the Machinist, 1925), 'Shtab smerty' (Death Staff, 1926), 'Sichneve povstannia' (The January Uprising, 1928), 'Zruinovanyi polon' (Ruined Captivity, 1930), 'Strashna myt' (A Terrible Moment, 1930), and those collected in *Monhol's'ki opovidannia* (Mongolian Stories, 1930). His novellas and novels include *Dveri v den'* (The Door to the Day, 1929), *Zhanna batal'ionerka* (Zhanna the Battalion Member, 1930), and *Mis Andriiena* (Miss Andriena, 1934). He was arrested in 1934, sentenced to 10 years in concentration camps, re-sentenced by a special NKVD tribunal, and shot.

I. Koshelivets

Shkval (Squall). A political and literary journal in Odessa, published by the CP(B)U semimonthly in Russian (1924–5), weekly in Russian (1926–9) and Ukrainian (1929), and three times a month in Ukrainian (1930–3). From mid-1929 it was a supplement to the Odessa newspaper *Chornomors'ka komuna*. The journal issued supplements devoted to science and technology (1926), sports

(1926), women's affairs (1926–7), and science and art (1927). After three issues in 1933, *Shkval* was merged with the journal *Metalevi dni* (1930–3) to form the monthly journal *Literaturnyi zhovten'*, six issues of which appeared in 1934–5. In 1929 *Shkval* had a pressrun of 33,439 copies.

Shlapak, Dmytro [Šlapak] (pseud: D. Lisovy, D. Pidhainy, D. Yakovenko), b 5 May 1923 in Yasynuvate, now in Borova raion, Kharkiv oblast. Literary scholar and critic. He graduated from the CC CPU Higher Party School (1949) and worked as deputy chief editor of *Molod' Ukrainy* and editor of **Vechirni Kyiv* in 1945–52, a lecturer at Kiev and Lviv universities and a department head and dean at the Ukrainian Printing Institute in Lviv in 1953–63, an officer of the Ministry of Culture, and a docent at the Ukrainian Institute of Theater Arts in Kiev. He is the author of many articles and books on Soviet Ukrainian literature, including studies of Soviet Ukrainian publicism during the Second World War (1955), Yu. Zbanatsky (1963), O. Dov-zhenko (1964), Soviet Ukrainian dramaturgy (1970, 1981), M. Zarudny (1981), and A. Malysenko (1982), and *Literatura heroiky i krasny* (A Literature of Heroics and Beauty, 1972).

Shleifer, Georgii [Šlejfer, Georgij], b 16 June 1855 in Kiev, d 9 April 1913 in Kiev. Architect; son of P. *Shleifer. After graduating from the St Petersburg Institute of Civil Engineering he worked in the Kiev Department of Public Works and developed the city's water-supply and sewage systems. He also designed apartment buildings and the building that is now the Kiev Ukrainian Drama Theater.

Shleifer, Pavel [Šlejfer], b 20 June 1814 in Kiev, d 24 April 1879 in Kiev. Portrait painter and architect. In 1836–40 he audited lectures at the St Petersburg Academy of Arts. He taught painting at the Kiev Institute for Daughters of the Nobility (1846–9) and then served as architect of the Kiev School District (1852–79). He designed the Kiev Stock Exchange (destroyed in 1875) and painted portraits of a woman (1836), man (1842), and his wife (late 1840s).

Shlemkevych, Mykola [Šlemkevych] (pseud: M. Ivaneiko, S. Vilshyna, R. Sribny), b 27 January 1894 in Pyliava, Buchach county, Galicia, d 14 February 1966 in Passaic, New Jersey. Philosopher, publicist, and political figure; full member of the Shevchenko Scientific Society from 1941 and the Ukrainian Academy of Arts and Sciences in the US. His studies at Vienna University were interrupted by the First World War, and in 1915 he was deported by the Russian occupational authorities from Galicia to Siberia. As editorial secretary of the paper *Robitnycha hazeta* in Kiev (1917–19) he witnessed the rebirth and defeat of Ukrainian independence. While completing his studies at Vienna University (PH D, 1926) he began contributing to *Literaturno-naukovy vistyky*. After studying at the Sorbonne (1928–9) he returned to Lviv, became an ideologue of the 'Front of National Unity, and edited its journal **Pere-moha* (1933–9) and paper *Ukrains'ki visty* (1935–9). During the Second World War he headed the publishing department of the *Ukrainske Vydavnytstvo* publishing house in Cracow and Lviv (1941–4). As a postwar refugee in Vienna and then Munich, he was a founding member of the *Ukrainian National State Union, the deputy chairman of

its executive council, a founding member of the *Ukrainian National Council, and a member of *MUR. After emigrating to New Jersey in 1949, he cofounded the *Union of Ukrainian National Democrats (1950), founded and edited **Lysty do pryiateliv* (1953–66), and founded the Kliuchi publishing house (1956) and *Ukrainian Research and Information Institute (1961). Besides many articles in the Galician and émigré press, he wrote several books on Ukrainian culture and political thought, including *Ukrain-s'ka synteza chy ukrains'ka hromadians'ka viina* (A Ukrainian Synthesis or a Ukrainian Civil War, 1946; 2nd edn, 1949), *Zahublena ukrains'ka liudyna* (The Lost Ukrainian Person, 1954), and *Halychanstvo* (Galicianness, 1956). His chief philosophical work, *Filosofiiia* (Philosophy, 1934; 2nd edn: *Sutnist' filosofii* [The Essence of Philosophy], 1981), a revised translation of his PH D dissertation, criticizes absolutist (W. Windelband, H. Rickert, W. Wundt, G. Fechner, M. Schlick, A. Comte, and E. Mach), relativist (K. Fischer and W. Dilthey), and classical (Plato and I. Kant) definitions of philosophy and argues from the historical evidence that philosophy has three tasks: to criticize the existing spiritual culture (science, art, and religion), to articulate problems to the point at which they can be handled by science, and to unify the different spheres of spiritual culture in a coherent worldview.

T. Zakydalsky

Arnold Shlepakov

Shlepakov, Arnold (Šlepakov, Arnol'd), b 16 June 1930 in Vinnytsia. Historian; full member of the ANU (formerly AN URSS) since 1982. After graduating in international relations from Kiev University (1952; PH D, 1966) he worked for the ANU (from 1955), directed the Department of Contemporary History in its Institute of History (from 1969), served as director of the ANU Institute of Social and Economic Problems of Foreign Countries (until 1991), and taught at the Kiev Institute of Culture (1968–70) and Kiev University (from 1970). He wrote *Ukrains'ka trudova emigratsiia v SShA i Kanadi (kinets' XIX–pochatok XX st.)* (Ukrainian Labor Emigrants in the United States and Canada [Late 19th to Early 20th Century], 1960), worked with UNESCO as an expert on international migration (1967), and was a member of the editorial board of *Ukrains'kyi istorychnyi zhurnal* and *Istoriia Ukrains'koi RSR* (History of the Ukrainian SSR, 8 vols, 1977–9).

Shliakh (Path). A monthly journal of literature, the arts, and politics, established in Moscow in March 1917 by Mykyta Shapoval and O. Mytsiuk. In August 1917 the journal was transferred to Kiev, where it appeared until 1919. The publisher and editor was F. Kolomyichenko.

Shliakh continued the traditions of Shapoval's earlier journal, **Ukrains'ka khata*. Among its contributors were some of the most distinguished cultural figures of the time, such as M. Vorony, O. Oles, H. Chuprynka, Ya. Mamontov, Khrystia Alchevska, O. Kobylanska, P. Tychyna, M. Rylsky, and Mykyta Shapoval (pseud: Sribliansky). The journal also contained translations of Western European literature, a cultural chronicle, and reviews. A total of 25 issues appeared.

Shliakh (Path). A monthly and later semimonthly journal published by the Orthodox Petro Mohyla Society in Lutske from May 1937 to September 1939. *Shliakh* printed articles on religious, cultural, and historical topics. The editor was Ye. Bohuslavsky.

Shliakh (The Way). A weekly organ of the Ukrainian Catholic metropoly in the United States, published in Philadelphia since 1940. Since 1946 a parallel English-language version has been published as *The Way*. Both papers contain articles on church history, popular theology, news, and belles lettres, mostly on religious themes. The editors of *Shliakh* have been V. Fedash (1946–9), P. Isaiv (1949–54), L. Mydlovsky (1954–75), M. Dolnytsky, and I. Skochyliias. *The Way* has been edited by Revs M. Fedorovych, R. Moskal, R. Popivchak, and others.

Shliakh do zdorov'ia (Way to Health). A magazine published in Kharkiv (1925–36) and then in Kiev (1937–41) by the People's Commissariat of Health of the Ukrainian SSR. It appeared monthly in 1925–8, semimonthly in 1929–30, every 10 days in 1931–2, and again monthly in 1933–41. It published the supplements *Za tverezist'* (1929–32), *Za zdorove kharchuvannia* (1931–2), and *Zdorova zmina* (1931–3). The editor of the magazine was D. Yefymov.

Shliakh osvity (Path of Education). A monthly organ of the People's Commissariat of Education. It first appeared in Kharkiv in 1922 as the Russian-language *Put' prosveshchennia*, which in 1923–6 was published in Russian and Ukrainian. From 1926 *Shliakh osvity* appeared only in Ukrainian. In 1931 it was renamed *Komunistychna osvita*, and from 1936 to June 1941 it was published in Kiev. After the Second World War it was revived as **Radians'ka shkola*. *Shliakh osvity* published articles on pedagogy, educational theory and practice, and the organization and administration of education; preschool, professional, political, and social education; education in Western Europe; and book reviews, sample curricula, and news of the teaching profession in Ukraine. The journal, which advocated the creation of a distinct Ukrainian educational system, was an important achievement of the *Ukrainization policy directed by the people's commissar of education, M. Skrypnyk. For most of the 1920s it was edited by Ya. *Riappo. In 1927 it had 7,000 subscribers.

Shliakh peremohy (Way to Victory). A weekly newspaper of the OUN (Bandera faction), published in Munich since February 1954. It supports the Anti-Bolshevik Bloc of Nations and publicizes the history of the OUN, Ukrainian Insurgent Army, and Ukrainian Supreme Liberation Council, stressing the anti-Soviet and anti-Nazi activities of these organizations during the Second World War. It has devoted separate pages to music, the Ukrainian Youth Association, the Mikhnovsky Student Association, and

Shliakh peremohy

women. The chief editors have been P. Kizko, D. Shtykal, D. Chaikovskiy, M. Styranka, B. Vitoshynskiy, S. Lenkavskiy, H. Drabat, V. Kosyuk, A. Bedrii, S. Halamai, A. Haidamakha, I. Kashuba, and V. Panchuk. Contributors have included prominent émigré publicists and activists associated with the Bandera faction.

Shliakh vykhovannia i navchannia (Path of Upbringing and Teaching). An educational journal published monthly in 1927–31 and then quarterly to 1939 in Lviv. Until 1930 it was called *Shliakh navchannia i vykhovannia*, and appeared as a supplement to **Uchytel's'ke slovo*. It published articles on educational theory and practice and sample elementary-school curricula and lessons. The journal's editors and regular contributors included distinguished pedagogues in Western Ukraine, such as P. Bilaniuk, M. Vozniak, A. Zeleny, D. Kozii, Ye. Pelensky, D. and I. Petriv, S. Rusova, V. Simovych, S. Siropolko, I. Stronsky, M. Taranko, and I. Fylypchak.

Shliakhta. See Nobility.

Shliakhy (Paths). An illustrated biweekly journal of literature and community affairs, published in Lviv from 1913 to 1918; from April 1913 to March 1914 it was the organ of the Ukrainian Student Union, and from December 1915 to August 1916 it was funded by the Press Committee of the Ukrainian Sich Riflemen. Among its editors were R. Zaklynsky, M. Strutynsky, O. Kohut, Yu. Okhrymovych, F. Fedortsiv, and D. Dontsov. It published literary contributions by V. Atamaniuk, P. Karmansky, R. Kupchynsky, V. Birchak, M. Pidhirianka, Yu. Shkrumeliak, and M. Yatskiv; Ye. Olesnytsky's memoirs; translations of works by R. Tagore, G. Hauptmann, M. Konopnicka, and D. Merezhkovsky; publicism by D. Dontsov, V. Zalizniak, V. Starosolsky, O. Nazaruk, and F. Fedortsiv; S. Balei's long work on the psychology of T. Shevchenko's works; M. Holubets's and I. Krypiakievych's articles on art; O. Zalesky's articles on music; and news and reviews.

Shliakhy mystetstva

Shliakhy mystetstva (Paths of Art). A literary and art journal, five issues of which were published in Kharkiv in 1921–3 by the art sector of the Ukrainian SSR Chief Political Education Committee. It was edited by V. Blakytyn and H. Kotsiuba and then V. Koriak, and its aim was to become the main forum for pro-communist writers and artists in Ukraine. It promoted several styles that became characteristic of Soviet Ukrainian art of the 1920s, such as monumentalism, constructivism, revolutionary realism, and anti-impressionism. Some of the major figures involved with the journal were former *Borotbists. Since it appeared before the fragmentation of the Ukrainian literary community into several competing groups, it published works by almost every prominent Soviet Ukrainian writer and critic of the time. After the dissolution of *Shliakhy mystetstva*, most of its supporters joined the *Hart literary group.

Oleksander Shlikhter

Shlikhter, Oleksander [Šlihter] (Aleksandr), b 1 November 1868 in Lubni, Poltava gubernia, d 2 December 1940 in Kiev. Bolshevik revolutionary, economist, diplomat, and functionary; full member of the VUAN from 1929. After studying at Kharkiv and Bern universities (1889–91) he worked in the Russian Social Democratic Workers' party underground in Kiev and Zlatopil and was arrested and exiled several times. He joined the Bolsheviks and helped organize a general strike in Kiev in 1903. During the Revolution of 1905–6 he organized railway workers' strikes in Ukraine, the Kiev general strike, and other revolutionary actions. In November 1917 he took part in the Bolshevik coup in Petrograd, and in 1918–19 he was V. Lenin's commissar of requisitions in Russia and Siberia (1918) and Ukraine (1919).

Under Soviet rule Shlikhter served as chairman of the Tambov Gubernia Executive Committee (1920); member of the All-Russian, USSR, and All-Ukrainian central executive committees; plenipotentiary of the USSR People's Commissariat of Foreign Affairs in Ukraine and member of its collegium (1923–7); head of the Ukrainian Association of Consumer Co-operative Societies (1923); member of the Presidium of the All-Ukrainian Central Executive Committee (1923–37); a CP(B)U Organizational Bureau member (1924–6); rector of the Artem Communist University in Kharkiv (1924–7); a CC CP(B)U member (1925–37) and Politburo candidate member (1926–37); commissar of agriculture in Ukraine (1927–30); director of the VUAN Institute for the Socialist Reconstruction of Agriculture (1928–34); director of the Ukrainian Institute of Marxism-Leninism (1930–1) and president of the All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes

(1931–3); VUAN and AN URSR (now ANU) vice-president (1931–8); and chairman of the Council for the Study of the Productive Resources of the Ukrainian SSR (1934–7). Even though he was an opponent of M. Skrypnyk's views on the national question, Shlikhter was arrested in 1937, but he survived the Stalinist terror. He wrote articles on economic, historical, and political subjects. Editions of his selected works were published in Kharkiv (4 vols, 1930–2) and Kiev (1959), and a volume of his writings on the agrarian question and early Soviet requisitioning policy appeared in Moscow in 1975.

R. Senkus

Shlopak, Tetiana [Šlopak, Tetjana], b 18 September 1918 in Kiev. Ophthalmologist. After graduating from the Odessa Medical Institute in 1946, she worked at the institute until 1953. Then she headed the ophthalmology department of the Ivano-Frankivske (1954–66) and Kiev medical institutes. Her publications deal with the pathogenesis and treatment of myopia, glaucoma, and eye tuberculosis, the theory of elastotometry, and the biochemistry of a normal and a diseased eye.

Shlykevych, Oleksander [Šlykevych], b 1849, d 1909. Statistician and zemstvo activist. He was president of the Kozelets county zemstvo and an executive member of the Chernihiv gubernia zemstvo. In the 1880s he studied the economy of each county of Chernihiv gubernia and then worked on a synthetic description of the gubernia and a comprehensive map of its soils. His invention of the so-called combinatorial tables was an important contribution to statistical methodology. An advocate of converting marshes into farmland, he oversaw the construction of a drainage canal from Zavorychi (northeast of Kiev) to the Poltava gubernia border in 1895–8.

Shmaida, Mykhailo [Šmajda, Myxajlo], b 2 November 1920 in Krásny Brod, near Medzilaborce, in the Prešov region. Writer and ethnographer. He began publishing stories, poems, and plays in Prešov periodicals in 1948. He wrote the first two Ukrainian novels published in postwar Slovakia, *Parazyty* (Parasites, 1955) and *Trishchat' kryhy* (The Ice Floes Are Breaking Up, 1957), the story collection *V'iazka kliuchiv* (Chain of Keys, 1956), and the novels *Lemky* (Lemkos, 1965) and *Rozizdy* (Travels, 1970). His works, which have served to reinforce the national identity of the Prešov region's Ukrainians, depict their society in the interwar, wartime, and postwar years. Since 1960 Shmaida has worked as an ethnographer at the *Svydnyk Museum of Ukrainian Culture; he has published transcriptions of Transcarpathian Christmas carols and oral folklore in *Duklia* and *Nove zhyttia* and has drawn on that folklore in his literary works.

Shmalhauzen, Ivan [Šmal'hauzen] (Schmalhausen) b 23 April 1884 in Kiev, d 7 October 1963 in Moscow. Biologist, zoologist, and theorist in evolutionary studies; full member of the VUAN and AN URSR (now ANU) from 1922 and the USSR Academy of Sciences (AN SSSR) from 1935; son of I. *Schmalhausen. A graduate of Kiev University (1907), he was a professor at the university (1921–41) and director of the ANU Institute of Zoology (1930–41) and the AN SSSR Institute of Animal Morphology in Moscow (1935–48). He wrote *Osnovy sravnitel'noi anatomii pozvonochnykh* (Foundations of Comparative Vertebrate Anatomy, 1923)

Ivan Shmalhauzen

Andrii Shmigelsky

and conducted innovative embryological studies of the dynamics of growth. In 1938 he became a professor of Darwinism at Moscow University, and in the next decade he developed a modern evolutionary theory that integrated systematics, morphology, embryology, and population genetics. His four major publications in this field were *Organizm kak tseloe v individual'nom i istoricheskom razviti* (The Organism as a Whole in Individual and Historical Development, 1938; repr 1982), *Puti i zakonomernosti evoliutsionnogo protsess*a (Trends and Laws of the Evolutionary Process, 1939), *Faktory evoliutsii* (Factors of Evolution, 1946; English edn 1949), and the innovative textbook of evolutionary biology *Problemy darvinizma* (Problems of Darwinism, 1946). Shmalhauzen was an outspoken critic of T. *Lysenko's 'creative Darwinism' and was removed from his appointments in 1948. For the remainder of his career he worked at the AN SSSR Institute of Zoology on the origin of terrestrial vertebrates and on cybernetic approaches to evolutionary theory.

M. Adams

Shmidt, Otto [Šmidt], b 30 September 1891 in Mahiliou, Belarus, d 7 September 1956 in Moscow. Mathematician, astronomer, and geophysicist; full member of the AN URSR (now ANU) from 1934 and of the USSR Academy of Sciences from 1935. A student of D. Grave, he completed his studies at Kiev University in 1913. He continued to work with Grave and taught at Kiev University (1917–20) before moving to Moscow. His main interest in mathematics was the abstract theory of groups. His first monograph on the subject was published in Kiev in 1916. In the 1930s he showed how the theory of groups can be applied to topology, theoretical physics, and quantum physics.

Shmigelsky, Andrii [Šmigel's'kyj, Andriij], b 1866 in Zaluzhe, Zbarazh county, Galicia, d 1920 in Proskuriv (now Khmelnytskyi). Civic and political activist. A farmer by vocation, he was active in the Ukrainian Radical party and, from 1899, in the Ukrainian Social Democratic party. He was a leading organizer of Ukrainian economic and civic institutions in Zbarazh county and a contributor to *Narod and Zemlia i volia*. In 1907 he was elected for a brief term to the Galician Diet. In December 1918 he was delegated to the Ukrainian National Rada and was appointed to its executive. In 1919 he attended the Labor Congress in

Kiev. After retreating west across the Zbruch River with the Ukrainian Galician Army he died of typhus.

Fedir Shmit

Shmit, Fedir [Šmit], b 3 May 1877 in St Petersburg, d 10 November 1942 in Tashkent, Uzbekistan. Art historian of German origin; VUAN/AN URSR (now ANU) full member from 1921. A graduate of St Petersburg University (1900), he researched the architecture and painting of Byzantium, the Balkans, the Near East, and Kievan Rus'. In 1912 he became chairman of the department of art history at Kharkiv University; later he chaired the museum section of the All-Ukrainian Committee for the Protection of Monuments of Antiquity (1919–20). In 1921 he moved to Kiev. There he chaired the St Sophia Cathedral Commission, served as the first head of the All-Ukrainian Archeological Committee, was a professor at the Architectural Institute and the Lysenko Music and Drama Institute, and became rector (in 1922) of the Archeological Institute and director (in 1923) of the Museum of Religious Cults and the Museum of the St Sophia Cathedral. In December 1924 he was appointed a professor at Leningrad University and the director of the Russian Institute of Art History. Shmit published a book in Russian on art, its psychology, its stylistics, and its evolution (1919) and books in Ukrainian on the art of ancient Rus'-Ukraine (1919), the psychology of painting (1921), monuments of Rus' art (1922), and art as a subject of study (1923).

Shmorhun, Petro [Šmorhun], b 1 January 1921 in Oslamiv, near Vinkivtsi, Nova Ushytsia county, Podilia gubernia. Historian. A graduate of the Kiev Pedagogical Institute (1948), he worked at the Institute of Party History of the CC CPU (1951–68) and as deputy chief editor of *Ukrains'kyi istorychnyi zhurnal* (1962–5, 1967–8). From 1970 he was director of the Department of CPSU History in the Institute for the Upgrading of Social Science Instructors at Kiev University. He is the author of *Rady robotnychykh deputativ na Ukraini v 1905 r.* (Councils of Workers' Deputies in Ukraine in 1905, 1955) and *Lenin i bil'shovyts'ki orhanizatsii na Ukraini (1907–1917 rr.)* (Lenin and Bolshevik Organizations in Ukraine [1907–17], 1960) and a contributor to *Narysy istorii Komunistychnoi partii Ukrainy* (Outlines of the History of the Communist Party of Ukraine, 1970).

Shmyhelsky, Anton [Šmyhel's'kyj], b 23 July 1901 in Pluhiv, Zolochiv county, Galicia, d 4 November 1972 in Lviv. Poet. After the February Revolution of 1917 he lived

in Kiev. There he headed the council of L. Kurbas's literary study group (1922) and was a founding member and secretary in charge of the Kiev branch of the writers' group Pluh (1923). After moving to Kharkiv he worked as an editor of *Narodnyi uchytel'* and *Hart*. From 1927 to 1933 he belonged to the writers' groups Zakhidna Ukraina and the All-Ukrainian Association of Proletarian Writers. After the Second World War he lived in Lviv. He began publishing in 1923 and wrote 11 poetry collections, including *Pamolod'* (The Young Generation, 1927), *Pokhid* (The Military Expedition, 1933), *Vokzaly* (Train Stations, 1939), *Velinnia sertsia* (The Heart's Command, 1955), *Povnolittia* (Adulthood, 1958 [selected poetry]), *Stiahy nad Karpatamy* (Banners above the Carpathians, 1962), *Zemli okrasa* (The Earth's Adornment, 1964), and *Veresneve polum'ia* (September's Glow, 1973). He also translated Russian, Belarussian, Polish, and Armenian poetry into Ukrainian.

Shniukov, Yevhen [Šnjukov, Jevhen], b 26 March 1930 in Arkhangelsk, Russia. Geologist; member of the AN URSR (now ANU) since 1982. He graduated from Kiev University (1953) and worked at the Institute of the Geochemistry and Physics of Minerals (1967–77) and the ANU Institute of Geological Sciences (as director from 1977). His scientific contributions are devoted to problems of the genesis and distribution patterns of manganese and other ores, to the impact of mud volcanoes upon ore formation, and to the geological structure and mineral resources of the oceans (particularly the Azov and Black seas). He discovered several deposits of iron ore in the Kerch area.

Shock-worker movement. See Socialist competition.

Memorial plaque on the building in Lviv where Sholom Aleichem lived in 1906

Sholom Aleichem [Šolom Alejxem] (pseud of Sholom Rabinovich), b 2 March 1859 in Pereiaslav (now Pereiaslav-Khmelnytskyi), Poltava gubernia, d 13 May 1916 in New York. Yiddish writer. He became a rabbi in Lubni (1880–3) and later moved to Kiev and then Odessa, where he devoted his time to writing. Beginning in 1905 he traveled to England, the United States, Switzerland, Germany, and Italy. He settled in New York City in 1914. From 1883

on he published novels, stories (including the first Yiddish stories for children), and plays. Most of them depict *shtetl* life in Ukraine and include Ukrainian proverbs, folk songs, and folklore and Ukrainian characters (children, workers, and revolutionaries). Over 30 editions of Aleichem's works have been published in Ukrainian translation. In Ukraine his plays have been staged (eg, by L. Kurbas), and films based on his works have been made. A. Kahan's Ukrainian novel about him was published in Kiev in 1963. A memorial museum was founded in Sholom Aleichem's honor in Pereiaslav-Khmelnytskyi in 1978, and a monument was erected there in 1984.

Zoltan Sholtes: *After the Rain* (1958)

Sholtes, Zoltan [Šoltes], b 21 July 1909 in Prykopa, Prešov region, d 16 December 1990 in Uzhhorod. Painter. He studied under Y. Bokshai and A. Erdeli at the Uzhhorod Art School (1930–3). A resident of Uzhhorod, he has painted many Transcarpathian landscapes, such as *Spring* (1945), *Winter Evening* (1956), *Highland* (1958), *Storm above the Beskyds* (1968), and *View of Rivna Meadow* (1979), and portraits.

Sholudko, Panas [Šolud'ko], b and d ? Master carpenter from Nizhen. In 1759–61 he built the Assumption Church in Berezna, in the Chernihiv region. This masterpiece of Ukrainian wooden architecture had five domes and two additional domed towers at the entrance. Measuring 27.5 by 19.6 m and 35 m in height, it was one of the largest wooden buildings in Ukraine in the 18th century. The church was destroyed by the Soviet authorities in the 1930s.

Shonk-Rusych, Konstantyn [Šonk-Rusyč] (Szonk-Rusych), b 3 June 1915 in Zhytomyr, Volhynia gubernia, d 3 July 1983 in New York. Enamelist and editor. He studied cinematography in Kiev and then worked as a scenery designer. A postwar émigré in the United States from 1949, he developed his own technique of enameling on copper and silver and created colorful portraits of historical figures, miniatures of animals and plants, linocuts, and mosaics. His book *Lino-Block Prints* was published in 1966. He edited the magazines *Dnipro* (1958–62) and *Nash litopys* (1980–1), wrote an illustrated history of Ukrainian art (1978) and a book on wood carving in Ukraine, and compiled *Ukraine in Postcards* (1981).

Panas Sholudko: the Assumption Church in Berezna

Shooting (*strilets'kyi sport*). The sport of firing at targets with rifles, shotguns, handguns (pistols or revolvers), and air guns. In Ukraine the sport dates from the late medieval period, when rifle brotherhoods appeared in towns of Western Ukraine, and members competed each year for the title of Rifle King. In the early 20th century, small-caliber competitions were first held in Galicia, by the *Sokil sports society. The first shooting competition in the Russian Empire took place in 1898. In Soviet Ukraine shooting competitions were first held in Zaporizhia in 1925, and then in other cities. The first all-Union meet was held in Kharkiv in 1927. Since 1952 Soviet marksmen have competed in the Olympic Games and in world and European championships; Ukrainians have been part of USSR teams. H. Kupko, D. Dobruk, M. Prozorovsky, N. Kalenychenko, V. Zemenko, V. *Romanenko, Ya. *Zheliezniak, and S. Tiahnii have won world or European championships. Olympic gold medals have been won by V. Borisov (1956, free rifle, three positions OR [prone WR]), Romanenko (1956, running-deer shooting OR), Zheliezniak (1972, moving-target WR), and D. Monakov (1988, trapshooting). Borisov also won Olympic silver (1956, small-bore rifle, prone) and bronze (1960, free rifle) medals.

Shopinsky, Vasyl [Šopins'kyj, Vasył'] (né Zhonochyn), b 22 July 1887 in Tereshivtsi, Letychiv county, Podilia gubernia, d 26 August 1967 in New York. Communist activist and writer in the United States. After emigrating to the United States in 1908, he worked at various jobs and in

1919 began to contribute to the paper *Robitnyk*, the Soviet journals *Chervonyi shliakh* and *Pluzhanyn*, and the Galician Sovietophile journal *Nova kul'tura*. His collection of short stories, *Fabrychna nevolia* (Factory Slavery, 1925), and three plays, *Zhebrats'ka Ameryka* (Beggar's America, 1930), *Peony* (Peons, 1930), and *Zmova pinkertontsiv* (Conspiracy of the Pinkerton Guards, 1931), were published in the Ukrainian SSR.

Short story. See Prose.

Short-fallow system (*parova systema*). A system of farming that divides the arable land into two parts, a sown part and a fallow part. Under a two-field fallow system, which developed out of the long-fallow (*perelohova*) system, half of the farmland lies fallow, whereas under a three-field system the farmland is divided into three parts – the winter field (in Ukraine usually sown with winter rye), the spring field (devoted to barley, oats, and wheat), and the fallow field. The three-field system predominated in central and eastern Ukraine as late as the 1920s. The main shortcoming of the system was that soil fertility was not restored. The fallow field was usually used as cattle pasture; hence, it became less porous and lost moisture. The cultivation of the same cereal crops year after year increased weed contamination. The shortage of fodder held back the growth of animal husbandry. For those reasons the fallow-field system was replaced by *crop rotation. In Western Ukraine the change took place in the mid-19th century, but in central and eastern Ukraine it occurred mostly in the 1920s. At the same time the amount of land that was left fallow was sharply reduced.

With the development of agrotechnology the fallow field becomes a part of the system of crop rotation. Fallow land is plowed and harrowed to destroy weeds, preserve moisture, and accumulate plant nourishment. There are two types of fallow, true fallow and occupied fallow. True fallow land is plowed in the fall (bare fallow) or in the spring (early fallow). This type of fallow is common in Ukraine in the forest-steppe and steppe belts. Its total area was about 5,000 ha in 1913, 3,900,000 ha in 1940, 2,200,000 ha in 1958, 700,000 ha in 1960, and 200,000 ha in 1962 (as a result of N. Khrushchev's agrarian policy). Occupied fallow is an important advance in agriculture. Under this system the fallow land is not only tilled, as under true fallow, but planted with fast-growing crops that ripen during the first half of the summer, mostly feed crops that restore nitrogen to the soil (peas, vetch, esparcet, lupine, etc) or corn for silage or early potatoes. Occupied fallow is more common in moist regions, such as Polisia and the forest-steppe belt. Lupine is grown on the fallow land in Polisia, where the soil is sandy. In dry regions tall plants, such as corn and sunflowers, are grown in strips to protect other plants from the sun and wind and to hold the snow in place. When the fallow crops are gathered, the occupied fallow land is plowed, fertilized, and seeded with winter crops.

Shostak, Peter [Šostak, Petrol], b 30 January 1943 in Bonnyville, Alberta. Artist and teacher. A graduate of the University of Alberta (1965; M ED 1970), Shostak taught curriculum development at the University of Victoria, British Columbia (1969–79), before embarking upon a full-time artistic career. His oils and serigraphs depict scenes

A 1985 painting by Peter Shostak reproduced on a Christmas card

from his childhood in the Ukrainian bloc-settlements in east central Alberta. He has published three collections of his work, *When Nights Were Long* (1982), *Saturday Came But Once a Week* (1984), and *For Our Children* (1992). Shostak is active in the Ukrainian community in Victoria and is one of the most popular Ukrainian-Canadian artists today. His works have been exhibited across Canada.

Shostakivska, Yuliia [Šostakivs'ka, Julija], b 31 May 1871 in Poltava, d 12 July 1939 in Dnipropetrovske. Stage actress. She worked in the troupes of M. Štarytsky (1888–91), M. Kropyvnytsky (1892–3 and 1895–7), H. Derkach (1893–4), and her husband, D. Haidamaka (1898–1919). She later toured with Haidamaka in various troupes (1918–26) and worked in the Donetske (1927–34) and Dnipropetrovske (1934–9) Ukrainian Music and Drama theaters.

Shostka [Šostka]. II-14. A city (1990 pop 94,000) on the Shostka River and a raion center in Sumy oblast. It originated as a workers' settlement that sprang up around a gunpowder factory built in 1739. From 1782 it belonged to Novhorod-Siverskyi vicegerency, from 1796, to Little Russia gubernia, and from 1802 to 1925, to Chernihiv gubernia. A railway built in 1893 linked Shostka with other industrial centers and stimulated its growth. In 1924 it attained city status. It has several large chemical plants, including the Svema Manufacturing Consortium, a number of building-materials factories, and a large food industry.

Shovheniv, Ivan [Šovheniv], b 25 September 1874 in Kamianka, Kupianka county, Kharkiv gubernia, d 13 April 1943 in Danzig (now Gdańsk, Poland). Hydraulic engi-

Ivan Shovheniv

neer; father of O. *Teliha. He graduated from the St Petersburg Institute of Communications (1899) and directed engineering projects on the Volga, Oka, and Moskva rivers. He then studied in Germany (1910–12), was director of an irrigation project in Turkestan, taught at the St Petersburg Polytechnical Institute, and was deputy director of the melioration department of the Imperial Russian Ministry of Agriculture. He returned to Ukraine in 1918 and became director of the Hetman government's Department of Water Communications. He worked in the VUAN melioration section, and was a professor at the Kiev Polytechnical Institute (1918–20). He emigrated in 1920 and helped found the Ukrainian Husbandry Academy in Poděbrady, Bohemia (1922–8), of which he was the first rector (1922–6). From 1929 he worked in Warsaw for the Ministry of Agriculture and the Ukrainian Scientific Institute and headed the Ukrainian Black Sea Institute (1941–2). He wrote numerous articles and larger works, including ones on water management in Ukraine (1923) and in the Dnieper Basin (1936), the hydraulics of groundwaters (1929), floods in Ukraine (1936), Ukraine's energy resources (1940) and water management (1941), and the Black Sea (1941). He also wrote textbooks on plane analytic geometry (1923), hydraulics (2 vols, 1923, 1927), hydrology (1924), and hydraulic engineering (1924, 1925).

Shovkopliias, Ivan [Šovkopljias], b 8 April 1921 in Lazirky, Lubni county, Poltava gubernia. Archeologist. A graduate of Kiev University (1945), he worked in the Historical Museum of Ukraine (1945–9) and then at the AN URSR (now ANU) Institute of Archeology (since 1949). A specialist in the Late Paleolithic and the history of archeology in Ukraine, he is best known for his survey work *Arkheolohichni doslidzhennia na Ukraïni, 1917–1957* (Archeological Studies in Ukraine, 1917–57) and the bibliographical *Rozvytok radians'koi arkheolohii na Ukraïni, 1917–1966* (The Development of Soviet Archeology in Ukraine, 1917–66, 1969). He also wrote a monograph on the Stone Age in Ukraine (1962) and a general survey of archeology (1964), and served as a member of the editorial committee for the three-volume *Arkheolohiia Ukraïns'koi RSR* (The Archeology of the Ukrainian SSR, 1971–5).

Shovkopliias, Yurii [Šovkopljias, Jurij], b 6 February 1903 in Kharkiv, d 12 October 1978 in Kharkiv. Writer and teacher. In Kharkiv he worked as a teacher (1923–30), be-

Yurii Shovkopliias

Marat Shpak

longed to the writers' group *Prolitfront (1930), and headed Kharkiv University's department of journalism (1949–51), the literature and art department of the CP(B)U city committee (1951–3), and the Kharkiv branch of the Writers' Union of Ukraine (1953–6). Later he was editor in chief of the literary journal *Prapor*. He began publishing stories in 1926 and wrote the novels *Vesna nad morem* (Spring at the Seashore, 1929), *Proiekt elektryfikatsii* (The Project of Electrification, 1929), *Zavtra* (Tomorrow, 1931), *Zemlianyi pokhid* (The Land March, 1933), *Inzhenery* (Engineers, 2 vols, 1934, 1937; rev edn 1964), *Pochynaietsia iunist'* (Youth Begins, 1938), and a trilogy, *Liudyna zhyve dvichi* (A Person Lives Twice, 1964); the story collections *Henii* (A Genius, 1929), *Pronyklyvist' doktora Piddubnoho* (The Insight of Doctor Piddubny, 1930), *Profesor* (1930), and *Studenty* (Students, 1930); the essay collections *Elektrychnyi SRSR* (The Electrical USSR, 1932) and *Narodzhennia elektrychnoho strumu* (The Birth of the Electrical Current, 1936); and a few children's books. An edition of his selected works (2 vols) appeared in 1973.

Oleksii Shovkunenko and his *Old Oak* (oil, 1955)

Shovkunenko, Oleksii [Šovkunenko, Oleksij], b 21 March 1884 in Kherson, d 12 March 1974 in Kiev. Painter and educator; full member of the USSR Academy of Arts from 1947. A graduate of the Odessa Art School (1908) and the St Petersburg Academy of Arts (1917), he took part in the exhibitions of the *Society of South Russian Artists (1913–19) and was a member of the Kostandi Society of Artists (1924–9). He taught at the Odessa Art Polytechnic (1926–9) and Art Institute (1929–35) and at the Kiev State Art Institute (1936–63). He painted portraits, including ones of prominent Ukrainian cultural figures, such as Yu. Yanovsky, P. Tychyna, M. Rylsky, I. Le, L. Pervomaisky, M. Lytyvnenko-Volgemut, V. Zabolotny, N. Uzhvii, M. Lysenko, and O. Bohomolets, and many natural, urban, and industrial landscapes of Ukraine, Caucasia, Moscow, the Urals, Moldavia, and Bashkiria, including series depicting the Odessa shipyard (1925–35) and the construction of the Dnieper Hydroelectric Station (1930–2). For the latter series he was awarded the grand prize at the Art and Technology in Contemporary Life Exhibition in Paris

(1937). A volume of recollections about Shovkunenko was published in 1980, and L. Vladych's books about him appeared in 1960 and 1983.

Shpak, Marat [Špak], b 13 April 1926 in Chupakhivka, now in Okhtyrka raion, Sumy oblast. Experimental physicist; AN URSR (now ANU) corresponding member since 1969 and full member since 1990. A graduate of Chernivtsi University (1951), he joined the ANU Institute of Physics in 1955 and served as its director in 1970–87. His major contributions are in solid-state physics, where he discovered the exciton luminescence of molecular crystals, and in quantum optics, where he contributed to the development of highly stabilized lasers.

Shpak, Mykola [Špak] (pseud of Mykola Shpakovsky), b 23 February 1909 in Lypky, Skvyra county, Kiev gubernia, d 19 July 1942 in Kiev. Poet. He was a member of the literary organization *Molodniak and the Literary Union of the Red Army and Navy. In the 1920s and early 1930s he worked for provincial newspapers, in which he began to publish his poetry in 1928. During the Second World War he was imprisoned by the Germans, escaped, and organized a partisan group. He was captured in Kiev and shot to death. During the German occupation he wrote patriotic Soviet verse under the pseudonym Pylyp Komashka. He wrote collections in the official Soviet patriotic manner: *Narkomu raport* (Report to the People's Commissar, 1933), *V dorozh* (On the Road, 1934), *Moia liubov* (My Love, 1936), *Bahatstvo* (Riches, 1938), and *Syla zemna* (Earthly Strength, 1940). Some posthumous editions of his works have been published: *Poezii* (Poems, 1946), *Zhyttia krasuiet'sia* (Life Parades Itself, 1947), *Vybrani poezii* (Selected Poems, 1950, and a few revised editions), and *Kazky* (Tales, 1960).

Shpakov, Anatolii [Špakov, Anatolij], b 8 June 1926 in Novohradkivka, Odessa okruha. Art scholar. A graduate of Leningrad University (1951), he has written articles on Ukrainian art and monographs on the artists O. Murashko (1959), V. Kasiian (1960), and M. Hlushchenko (1962), on Soviet Ukrainian painting (coauthor, 1957), and on Soviet Ukrainian book graphics (1973).

Shpol, Yuliiian. See Yalovy, Mykhailo.

Shpola [Špola]. IV-12. A city (1989 pop 22,400) on the Shpolka River and a raion center in Cherkasy oblast. The village was first mentioned in the 18th century, when it was under Polish rule. In 1768 it participated in the Koliivshchyna rebellion. After the partition of Poland in 1793, it became part of Bratslav vicegerency, Voznesenske vicegerency (1795–7), and then Kiev gubernia. A sugar refinery was built there in 1851, and a railway station in 1874. In 1938 the town attained city status. Most of its inhabitants are employed in light industry and the food industry.

Shpyhotsky, Opanas [Špyhoc'kyj], b and d ? Writer and folklorist of the early 19th century. He studied at Kharkiv University and belonged to the *Kharkiv Romantic School. He began publishing his works in *Ukrainskii al'manakh* (1831). His works include 'Malorosii's'ka balada' (Little Russian Ballad, 1831), which initiated the form of

the folkloric ballad in Ukrainian literature. He also wrote sonnets (eg, 'Til'ky tebe vbachyla' [I (female) Only Noticed You] and 'Znaiesh, Saniu-serden'ko' [You Know, Sannia Dearest Heart]). His works were republished in H. Nedilko's *Ukrains'ki poety-romantyky 20–40-ykh rokiv XIX st.* (Ukrainian Romantic Poets of the 1820s to 1840s, 1968).

Archbishop Bohdan Shpylka Osyp Shpytko

Shpylka, Bohdan [Špyl'ka], b 1892, d 1 November 1965 in Ottawa. Archbishop of the Ukrainian Orthodox Church of America in 1937–65. Originally from Galicia, he emigrated to the United States in 1936 to assume church duties. He wrote Orthodox catechisms in both Ukrainian and English and published a variety of propagandistic brochures.

Shpytko, Osyp [Špytko] (pseud: Hryts Shchypavka), b 1869 in Horodnytsia, Husiatyn county, Galicia, d 1942 in Brazil. Writer. He edited the newspaper *Bukovyna* (1899) and satirical periodical *Antsykhryst* (1906) in Chernivtsi, the literary paper *Dzvin* (1906) in Lviv, and the newspaper *Pidhirs'kyi dzvin* (1912) in Sianik. A member of the Lviv modernist writers' group Moloda Muza in the 1900s, he wrote stories, the autobiographical novella *Vyrid* (The Degenerate), humor and satire, the poetic parody collection *Novomodnyi spivannyk* (A New-fashioned Songbook, 1901), and the lyric poetry collection *Osinni kvity* (Autumn Flowers, 1910). After emigrating to Brazil in 1912, he continued writing and published in Portuguese the collection *No túmulo da vida* (1930) under the pseudonym Ossep Stefanovetch.

Shrah, Illia [Šrah, Illja], b 23 August 1847 in Sedniv, Horodnia county, Chernihiv gubernia, d 11 April 1919 in Chernihiv. Civic and political activist; son of a Saxon German who worked for the Lyzohub family. Shrah studied law at St Petersburg University, from which he was expelled in 1869 for participating in a student demonstration. Later he was admitted to Kiev University. From 1869 he was a councillor in the Chernihiv gubernia zemstvo administration, and in 1906 he was elected to the First Russian State *Duma, where he headed the 40-member Ukrainian caucus. He was also vice-president of the Autonomists' Union (1905–6) and the Society of Ukrainian Progressives. He belonged to the Radical Democratic party, out of which the Ukrainian Party of Socialists-Federalists was formed in 1917. He was a representative of

Illia Shrah

Chernihiv gubernia in the Central Rada. Shrah contributed articles to the periodicals *Zapysky Naukovoho tovarystva im. Shevchenka*, *Pravda* in Lviv, *Rada* and *Iuzhnye zapiski* in Kiev, *Ukrainskii vestnik* in St Petersburg, and *Literaturno-naukovyi vistnyk*. His autobiography (annotated by S. Yefremov) was published in *Nashe mynule* (1919, nos 1–2).

Mykola Shrah (portrait by Mykhailo Zhuk, 1915)

Shrah, Mykola [Šrah], b 4 May 1894, d 1 February 1970. Economist and political leader; son of I. *Shrah. He studied in Moscow. He was vice-president of the Central Rada from 28 June 1917 to 29 March 1918 and a member of the CC of the Ukrainian Party of Socialist Revolutionaries (UPSR). After the 4th congress of his party (May 1918) he joined the 'center current.' In 1919 he was a consul for the Ukrainian diplomatic mission in Budapest, and from 1920 to 1924 he was a member of the Foreign Delegation of the UPSR in Vienna and a coeditor of *Boritiesia – poborete!*, in which he published 'Slova i dila sotsialistiv v natsional'nii spravi' (Words and Deeds of Socialists in the National Cause, 1920, no. 2) and 'Vidrodzhennia Zakordonnoi hrupy Ukraïns'koï komunistyčnoï partii' (The Rebirth of the Foreign Group of the Ukrainian Communist Party, 1920, no. 4). In 1924 he returned with M. Hrushevsky to Ukraine, where he worked in Kharkiv with the Society of Technical and Scientific Workers (1928–31). He was imprisoned during the Stalinist terror. From 1952 he was a lecturer at the Kharkiv Institute of the National Economy,

and from 1966 he was a professor at the Lviv Polytechnical Institute. He published various articles on economics and socialist politics, as well as a book of translations of G. de Maupassant's stories called *Na vodi* (On Water, 1923).

Leontii Shramchenko

Mykola Shramchenko

Shramchenko, Leontii [Šramčenko, Leontij], b 17 November 1877 in Oleshivka, Chernihiv county, Chernihiv gubernia, d 21 June 1954 in Geneva. Economist, political activist, and educator. After graduating in law from Moscow University (1907) he worked as a zemstvo statistician in Chernihiv and Tbilisi (1910–17). In 1918 he was delegated by the Ukrainian Transcaucasian Territorial Council to the Ukrainian National Union. In the following year he served in the UNR government as deputy economics minister during B. Martos's premiership and as state secretary under Prime Minister I. Mazepa. He taught statistics at the Ukrainian Husbandry Academy in Poděbrady from 1922 and at the Ukrainian Free University in Prague from 1930. After being promoted to the rank of full professor in 1934, he served as dean of the law and social sciences faculty at the Ukrainian Free University (1937–45), dean of the economics department at the Ukrainian Technical and Husbandry Institute (1947), and director of the Ukrainian Institute of Sociology (1935–40). He wrote two statistics textbooks (1936) and studies of several Ukrainian statisticians, among them F. Shcherbyna (1929) and O. Rusov (1938).

Shramchenko, Mykola [Šramčenko], b 24 April 1909 in Chernihiv, d 26 September 1968 in Washington, DC. Painter. In 1933 he graduated from the Kiev State Art Institute, where he studied under M. Boichuk. A postwar émigré in the United States from 1949, he taught painting at the National Academy of Arts in Washington and took part in Ukrainian-American art exhibitions. Evolving in his style from realism to expressionism, he specialized in portraits, among them ones of Ye. Malaniuk and M. Omelianovych-Pavlenko. He also painted several series depicting the atrocities of the Soviet regime ('Prodigal Son,' 'The Power of Darkness,' and 'Messiah') and illustrated a Department of State publication about the NKVD massacre of Polish officers at Katyn.

Shramchenko, Oleksander [Šramčenko], b 26 March 1859 in Voronezh, Russia, d 29 April 1921 in Kiev. Ethnographer. After graduating from Kiev University in 1887, he taught school in Caucasia and the Kholm region and collected ethnographic materials. From 1909 he worked in

Kiev as an associate and longtime treasurer of the Ukrainian Scientific Society, editor of its journal *Ukraina* and its *Ukrains'kyi etnografichnyi zbirnyk*, and scientific secretary of the Committee of the National Library of Ukraine. Some of his ethnographic materials collected in the Kholm region were published in the *zbirnyk*. He also translated many of V. Antonovych's works from Russian into Ukrainian.

Sviatoslav Shramchenko

Avhustyn Shtefan

Shramchenko, Sviatoslav [Šramčenko, Svjatoslav], b 3 May 1893 in Baku, Transcaucasian krai, d 24 June 1958 in Philadelphia. Naval officer. A graduate of the Alexander Military Law Academy in St Petersburg, in 1917 he was a member of the Ukrainian Military Revolutionary Staff of the Baltic Fleet. Later he served as senior adjutant to the UNR minister for naval affairs (1918), deputy minister for naval affairs (1919), deputy commander of the UNR naval school (1919), and chief of the organizational department of the Naval General Staff (1920). He was promoted to the rank of naval commander. During the Second World War he chaired the Ukrainian Relief Committee in Kholm (1941–4). He wrote over 200 articles on naval history, which appeared in journals such as *Za derzhavnist'* and *Tabor*, and books, including *Istoriia ukrains'koho viis'ka* (History of the Ukrainian Armed Forces, 1936). After the Second World War he emigrated to the United States.

Shramenko, Mykola [Šramenko], b 9 May 1891, d 14 August 1974 in Dornstadt, West Germany. Military and political figure. During the Ukrainian-Soviet War he was a colonel in the UNR Army. In 1919–20 he commanded the Kiev Division and took part in two Winter campaigns (1919–20, 1921). After emigrating to Poland and Germany he headed the Breslau (Wrocław) chapter of the Ukrainian National Alliance (1941–4). A postwar refugee in Germany, he was secretary of the Ukrainian National Council and a member of the UNR government-in-exile in charge of military affairs.

Shramko, Borys [Šramko], b 17 January 1921 in Homel, Belarus. Archeologist and ancient historian. He graduated from Kharkiv University (1949) and taught there in 1950 (as a professor of ancient history and archeology from 1966). In the 1960s he became a member of UNESCO international committees and studied the history of agricultur-

al implements and the history of ancient iron metallurgy. Shramko has written works on the prehistory and ancient peoples of the Donets Basin (1962), the economy of the prehistoric tribes inhabiting Ukraine's forest-steppe (1971), excavations of early Iron Age kurhans in Kharkiv oblast (1983), the archeology of the early Iron Age in Eastern Europe (1983), and the *Bilske fortified settlement (the city Helon, 1987).

Shreier-Tkachenko, Onysia [Šrejer-Tkačenko, Onysja], b 10 January 1905 in Krasnostavtsi, Kamianets-Podil'skyi county, Podilia gubernia, d 16 October 1985 in Kiev. Musicologist. She completed her undergraduate (1940) and graduate (1947) degrees at the Kiev Conservatory. She lectured at the Kiev Conservatory from 1944, and in 1960 was appointed head of the department of music history. She edited and contributed chapters to *Istoriia ukrains'koi dozhovtnevoi muzyky* (History of Pre-Soviet Ukrainian Music, 1969), was a coauthor of the two-volume *Narys z istorii ukrains'koi muzyky* (Essays in the History of Ukrainian Music, 1964), and wrote *Istoriia ukrains'koi muzyky* (History of Ukrainian Music, 1980) as well as numerous articles and brochures on musicians and the history of music in Ukraine.

Shrew (Ukrainian: *zemleryjka, bilozubka, burozubka*). An insectivorous, mouselike mammal of the family Soricidae, including the genera *Sorex* and *Crocidura*. Shrews are chiefly terrestrial animals; some are burrowers, some arboreal, and some semiaquatic. They feed on invertebrates and worms and are helpful in controlling noxious insects. In Ukraine the common shrew (*S. araneus*) is the smallest mammal. Musk shrews (*C. suaveoleus* and *C. leucodon*) have few enemies because they emit an extremely unpleasant scent.

Shtaierman, Illia [Štajerman, Illja], b 10 April 1891 in Kamianets-Podil'skyi, Podilia gubernia, d 24 July 1962 in Moscow. Mathematician; corresponding member of the AN URSR (now ANU) from 1939. After completing his studies at Kiev University (1914) and the Kiev Polytechnical Institute (1918), he taught at the institute (1920–41) and the university (1930–41) and worked at the ANU Institute of Mathematics (1934–41). From 1943 he was a professor at the Moscow Institute of Civil Engineering. His works deal with applied mathematics, particularly the theory of elasticity and mechanics.

Shtanhei, Volodymyr [Štanhej], b 1895 in Moshuriv, Uman county, Kiev gubernia, d 1937. Writer. He published his first stories as a German POW in 1916–17 in the Union for the Liberation of Ukraine newspapers *Prosvitnyi lystok* and *Hromads'ka dumka*. After returning to Ukraine following the Revolution of 1917, he worked as a teacher and functionary in Uman county. Until 1932 he belonged to the writers' group Pluh. From 1927 to 1933 he published many story collections, including *Batrachka* (The Female Farmhand, 1927), *Obraza* (The Insult, 1929), *Udruhe narodzhenni* (Born Again, 1931), and *Tom novel* (A Volume of Novellas, 1932). He was arrested during the Stalinist terror in 1934 and was imprisoned on the Solovets Islands, where he was shot by the NKVD.

Shtefan, Avhustyn [Štefan], b 11 January 1893 in Poroshkove, Transcarpathia, d 4 September 1986 in Philadel-

phia. Teacher, civic activist, and Transcarpathian state figure; member of the Shevchenko Scientific Society. After completing studies in theology in Uzhhorod and in philosophy in Budapest he became a teacher in Uzhhorod (1917). A founding member of the Ruthenian People's party (1920–4), in 1922 he established and directed the State Commercial Academy in Uzhhorod (moved to Mukachiv in 1926), an institution which trained and educated an entire generation of Ukrainophile students in that region. He retained that post until 1938, after which he served as minister of educational and religious affairs in the republic of Carpatho-Ukraine. With the fall of the state to the Hungarians he fled to Bratislava, where he was director of the Ukrainian Academy of Commerce (1939–40) and the Ukrainian Gymnasium in Prague (1940–5). He oversaw the evacuation of the school to Augsburg, Germany, where he directed it in 1945–9, and then emigrated to the United States, where he taught at a Ukrainian Catholic academy for girls until 1969.

Shtefan was a leading Ukrainophile community figure in Transcarpathia. He was a cofounder of the Prosvita and Teachers' Hromada societies in the region, head of a municipal cultural-educational council for the town of Mukachiv, editor of the newspaper *Rusyn* (1921–3), and coeditor of the journals *Pidkarpats'ka Rus'* (1924–38), *Uchytel's'kyi holos* (1930–9), and *Zemlia i volia* (1934–8), the organ of the Ukrainian wing of the Czechoslovak Agrarian party. He was a long-standing member of the presidium of the Ukrainian (Ruthenian) National Council of Transcarpathia and (in addition to his ministerial duties) president of the Carpatho-Ukrainian Diet. He took an active role in émigré politics and served as deputy premier of the Government-in-exile of the UNR. He also wrote extensively; his major works include *From Carpatho-Ruthenia to Carpatho-Ukraine* (1969), *Avhustyn Voloshyn, prezident Karpats'koi Ukraïny* (Avhustyn Voloshyn, President of Carpatho-Ukraine, 1977), and *Za pravdu i voliu: Spomyyny i deshcho z istorii Karpats'koi Ukraïny* (For Justice and Freedom: Memoirs and Some of the History of Carpatho-Ukraine, 2 vols, 1973, 1981).

Shtein, Leonid [Štejn], b 12 November 1934 in Kamianets-Podilskyi, d 4 July 1973 in Lviv. Chess grand master. After settling in Lviv following the Second World War, he joined the city's new chess club and studied the game with O. Sokolsky. In 1960 and 1962 he won the chess championship of Ukraine, and in 1964 and 1965, the USSR championship. He took second place at international tournaments in Mar del Plata in 1966 and Kislovodsk in 1967, first and second place at Sarajevo in 1967 and Las Palmas in 1972, and first place at the grand master tournament in Moscow in 1967, Pärnu in 1971, and Zagreb in 1972. E. Lazarev wrote a biography about him in 1980.

Shteingel, Teodor [Štejngel'], b 1870 in Horodok, Rivne county, Volhynia gubernia, d 1946 in Dresden. Political and cultural leader and diplomat. A graduate of Kiev University, he set up a school, hospital, co-operative, and reading room in Horodok, as well as a museum (1902) to house his valuable archeological, historical, and ethnographic collections. He excavated burial sites of the medieval period in Rivne county. Although he was a Russian baron, he supported the Ukrainian national movement. In

Teodor Shteingel

Vasiliï Shternberg (self-portrait)

1906 he served as deputy from Kiev to the First State Duma, where he joined the Ukrainian caucus. He was a member of the Society of Ukrainian Progressives and vice-president of the Kiev Scientific Society. After the February Revolution of 1917 he chaired the executive committee of the Kiev City Duma, the precursor of the Central Rada. In 1918 the Hetman government sent him as a diplomatic envoy to Berlin. He returned to live in Western Ukraine during the interwar era but left for Germany in 1939.

Shtendera, Yevhen [Štendera, Jevhen] (nom de guerre: Prirva), b 2 January 1924 in Galicia. Librarian and journalist. From 1943 he fought in the ranks of the UPA as captain of the Danyliv Tactical Sector (1945–7) and commander of the raid into Eastern Prussia (1948). After making his way to West Germany he studied at the Ukrainian Free University (1949) and was coeditor of *Do zbroi* (1950–6), *Suchasna Ukraïna* (1951–6), *Ukraïns'kyi samostiinyk* (1953–6), and *Rozbudova* (1956–7). He emigrated to Canada in 1956, where he studied library science at the University of Alberta (1959–73) and coedited *Ukraïns'ki visti* (1957–64). Since 1976 he has been managing editor of the multivolume *Litopys UPA* (Chronicle of the UPA).

Shtepa, Anton [Štepa], b 22 September 1903 in Svarychivka, Borzna county, Chernihiv gubernia. Wood carver. He made liras and banduras and carved thematic sculptures, such as *The Kobzar Was Going to Kiev and Sat Down to Rest* (1966), *Lirnyk* (1968), and *Partisans* (1974), and bas-reliefs, including some inspired by T. Shevchenko's poetry. A catalog of his work was published in 1976.

Shtepa, Kostiantyn [Štepa, Kostjantyn] (Shtepa, Konstantin), b 15 December 1896 in Lohvytsia, Poltava gubernia, d 19 November 1958 in New York. Ancient and medieval historian. He studied at the Poltava Theological Seminary (1910–14), Petrograd University (1914–16), and the Nizhen Historical-Philological Institute and received a doctorate in 1927. He was a professor at the Nizhen Institute of People's Education (1922–30) and Kiev University (1930–8). In the 1930s he was also the chairman of the VUAN Byzantological Commission. He was imprisoned by the NKVD in 1938–9. During the German occupation he

was briefly rector of Kiev University and then editor of Kiev's *Novoe russkoe slovo* (1941–3). A postwar refugee, he taught Russian at the US Army school in Oberammergau (1950–2) and served on the Council of the Institute for the Study of the USSR in Munich. In 1952 he emigrated to the United States, where he worked as an analyst for the American Committee for Liberation. Shtepa wrote books in Ukrainian on ancient and Christian demonology (2 vols, 1926–7) and peasant revolts in the Roman Empire (1934); in Russian on slave revolutions in the ancient world (1941) and the Soviet system of governing the masses and its psychological consequences (pseud: V. Lagodin, 1951); and in English, titled *Russian Purge and the Extraction of Confession* (pseud: W. Godin, with F. Beck, 1951) and *Russian Historians and the Soviet State* (1962). He also wrote articles in Ukrainian on ancient religious syncretism in relation to early Ukrainian folk motifs (1927), the persecution of witches in Ukraine (1928), and Ukrainian legends about the creation of the first people (1928).

Shtepa, Pavlo [Štepa], b 12 September 1897 in Novodmytriivska Stanytsia, Kuban region, d 2 March 1980 in Toronto. Engineer and political activist; full member of the Shevchenko Scientific Society. A graduate of the Kuban Technical School (1919), he took part in the liberation struggle in the Kuban and then emigrated to Prague. After specializing in agronomy at the Ukrainian Husbandry Institute (1925–7) he emigrated to Canada in 1927. There he contributed to *Novyi shliakh* and served as vice-president of the Ukrainian War Veterans' Association of Canada. He wrote a number of publicistic works, including *Ukrainets' a moskovyn* (What's a Ukrainian and What's a Muscovite, 1959), *Moskovstvo* (Muscoviteness, 1968), and *Mafiia* (Mafia, 1971), as well as two specialized Ukrainian dictionaries.

Shternberg, Vasili [Šternberg, Vasilij], b 12 February 1818 in St Petersburg, d 8 November 1845 in Rome. Russian painter. A graduate of the St Petersburg Academy of Arts, during a three-year stay in Ukraine (1836–9) he did many Ukrainian landscapes and genre scenes (eg, the lithograph *Market in Ichnia*, 1836; the painting *Windmills in the Steppe*, 1836). A friend of T. Shevchenko, he made the frontispiece etching to the poet's *Kobzar* (1840) and drew several portraits of him. Shevchenko dedicated his poems 'Ivan Pidkova' and 'Na nezabud'' (Don't Forget) to Shternberg.

Shtets, Mykola [Štec'], b 16 March 1932 in Habura, Humenné county, Slovakia. Ukrainian linguist in the Prešov region. A graduate of Kiev University (candidate's diss, 1964), he has taught Ukrainian phonetics and historical grammar in the department of Ukrainian language and literature at the Prešov Philosophical Faculty of Košice University since 1959. He became department head in 1968 and faculty dean in 1976. He has written several articles on the Ukrainian dialects in the Prešov region and Transcarpathia, the local literary language, and Ukrainian-Slovak comparative grammar and linguistic relations; a popular booklet (with Yu. Bacha and A. Kovach) on Ukrainians in Czechoslovakia (1967); and a monograph on the post-1918 literary language of the Ukrainians in Transcarpathia and eastern Slovakia (1969).

Shtilman, Illia [Štil'man, Illja], b 3 December 1902 in Kiev, d 11 August 1966 in Kiev. Painter and educator. In 1927 he graduated from the Kiev State Art Institute, where he studied under F. Krychevsky and M. Burachek. He subsequently taught there (1933–64) and served as its director (1940–4). He painted landscapes and genre paintings, such as *Seamstresses* (1927), the series 'The Dnieper Dresses in Granite' (1936–7), *Collective-Farm Field* (1950), *The Storm Approaches* (1951), and *Sedniv Vistas* (1966).

Andrii Shtoharenko

Dmytro Shtohryn

Shtoharenko, Andrii [Štoharenyko, Andrij], b 15 October 1902 in Novi Kaidaky, now part of Dnipropetrovske. Composer and pedagogue. In 1912 he entered the Russian Musical Society's music school in Katerynoslav. He organized his own orchestra in Dnipropetrovske during the 1920s and taught singing in high schools. Shtoharenko was recruited in 1930 to study composition with S. Bohatyrov at the Kharkiv Conservatory. He graduated in 1936 and gained immediate recognition with the symphonic cantata *Pro kanal's'ki roboty* (About the Canal Work, 1936). He occupied several key administrative positions in the musical hierarchy of the Ukrainian SSR. In 1944 he became vice-chairman of the Union of Composers of Ukraine, and in 1948–54 he was vice-chairman of the USSR Union of Composers. In 1954–68 he was a teacher of composition and rector of the Kiev Conservatory. In 1968 he became head of the Faculty of Composition there and head of the Union of Composers of Ukraine. Shtoharenko's works include the symphonic cantata *Ukraino moia* (My Ukraine, 1943), the *Kiev Symphony* (1972), symphonic suites, a violin concerto, chamber and choral pieces, songs, incidental music, and film scores. His biography, by M. Borovyk, was published in Kiev in 1965.

Shtohryn, Dmytro [Štohryn], b 9 November 1923 in Zvyniach, Chortkiv county, Galicia. Librarian and educator; full member of the Shevchenko Scientific Society. After emigrating to the United States in 1950, he completed his studies in Ukrainian literature and library science at the University of Ottawa (PH D, 1970). From 1960 he served as the Slavic cataloger at the library of the University of Illinois at Urbana–Champaign. In 1961 he was appointed associate of the university's Russian and East European Center, where he has organized annual Ukrainian studies conferences. He has lectured on Ukrainian

literature since 1970 and served as president of the Ukrainian Librarians' Association of America in 1970–8. He reprinted *Kataloh vydan' Ukrain's'koï akademii nauk, 1918–1930* (Catalog of Publications of the Ukrainian Academy of Sciences, 1918–30, 1966), wrote *Svitla i tini ukrain's'kykh studii v Harvardi* (Lights and Shadows of Ukrainian Studies at Harvard, 1973), and edited the biographical guide *Ukrainians in North America* (1975).

Zinovii Shtokalko

Yosyp Shtokalo

Shtokalko, Zinovii [Štokalko, Zinovij], b 25 May 1920 in Berezhany, Galicia, d 28 June 1968 in New York. Bandura virtuoso, composer, and writer. A medical doctor by profession, he studied music with the bandurysts B. Klevchutsky and Yu. Singalevych (Lviv). He improved bandura playing techniques and developed his own distinct style of interpretation. He also acquired one of the most valuable collections of *dumas outside Ukraine. Shtokalko's legacy includes independent works for bandura ('Atonal Etude' and others); a large methodological study of the instrument, published posthumously as *A Kobzar Handbook* (1989); and a definitive recording of dumas and other Ukrainian songs (recorded for M. Surmach in New York, 1952). His literary works appeared under the pen name Zinovii Berezhany in the posthumous collection *Na okrainakh nochii* (On the Edges of Night, 1977).

Shtokalo, Yosyp [Štokalo, Josyp], b 16 November 1897 in Skomorokhy, Sokal county, Galicia, d 5 January 1987 in Kiev. Mathematician and science historian; full member of the AN URSR (now ANU) since 1951. After graduating from the Dnipropetrovske Institute of People's Education in 1931, he taught at Kharkiv University and other higher schools. He worked in Kiev at the ANU Institute of Mathematics (1942–9, 1956–63) and Kiev University (1944–51, 1956–72), chaired the presidium of the Lviv branch of the ANU (1949–56), and headed the natural sciences and technology section of the ANU Institute of History (from 1963). Shtokalo's works deal with differential equations, operational calculus, the history of mathematics, and Ukrainian terminology in various sciences. After 1945 he became particularly interested in the qualitative and stability theory of solutions of systems of linear ordinary differential equations in the Liapunov sense and in the 1940s and 1950s published a series of articles and three monographs in these areas. He is regarded as one of the founders of the history of Soviet mathematics, and particularly of the his-

tory of Ukrainian mathematics. In addition to articles on mathematics in Ukraine and articles about M. Ostrohradsky and H. Vorony, he edited the three-volume collections of Vorony's (1952–3) and Ostrohradsky's (1959–61) works, a Russian-Ukrainian mathematical dictionary (1960), and approx 18 other Russian-Ukrainian terminology dictionaries. He was the editor (with O. Boholiubov and A. Yushkevych as associates) of the four-volume *Istoriia otechestvennoi matematiki* (A History of the Fatherland's Mathematics, 1966–70), for which he and his associates received the prestigious A. Koyré award from the International Academy of the History of Sciences in 1970.

W. Petryshyn

Shtoliuk, Myron [Štoljuk] (aka Shtola), b ? in Roztoky, near Kolomyia, Galicia, d 2 June 1830 in Vyzhnytsia, Bukovyna. Rebel leader. After deserting the Austrian army in 1817, Shtoliuk led a band of Hutsul *opryshoks that attacked noble estates in Pokutia and Bukovyna. He was captured in 1829, tortured in prison, and then tried and hanged. Folk songs and legends about him were collected and published by I. Franko and others.

Shtolko, Valentyn [Štol'ko], b 14 November 1931 in Viknyna, now in Haisyn raion, Kirovohrad oblast. Architect. A graduate of the Kiev State Art Institute (1956), he collaborated in designing the Tarasova Hora Hotel in Kaniv (1962), the Turyst Hotel in Cherkasy (1967), the Hradetskyi Hotel in Chernihiv (1980), pavilions at the Exhibition of the Achievements of the National Economy in Kiev (1977, 1979), the Podil Covered Market in Kiev (1980), and the covered market in Chernivtsi (1981). He has written articles on architectural problems and a book on the architecture of constructions with hanging roofs (1979).

Oleh Shtul

Dmytro Shtykalo

Shtul, Oleh [Štul'] (pseud: O. Zhdanovych, O. Shuliak), b 1 July 1917 in Lopatychi, Ovruch county, Volhynia gubernia, d 4 November 1977 in Toronto. Political activist, publicist, and editor. He studied philology and history at Warsaw University (1934–9). From 1939 he was active in the cultural arm of the Leadership of Ukrainian Nationalists (PUN), in which he collaborated closely with O. Olzhych, served as cultural representative for the OUN executive in the Generalgouvernement, and represented

central Ukrainian territories in the Central Executive of the OUN (1941–3). From 1941 he participated in the OUN expeditionary groups, and in 1942 he began training partisan cadres in Volhynia. In 1943 he was proxy for the OUN colonel A. Melnyk at the UPA Polisian Sich under T. Borovets (later the Ukrainian People's Revolutionary Army) and coeditor of its organ *Oborona Ukraïny*. Shtul was imprisoned by the Germans in the Sachsenhausen concentration camp in 1943–4. He remained as an émigré in Germany and Austria after 1945. Continuing his activities as a journalist and publicist, he contributed to several OUN publications, *Za samostiinist'*, *Orlyk*, and the weekly *Promin'*. In 1948 he moved to Paris, where he edited the weekly *Ukraïns'ke slovo* until 1977. He was also press and information secretary for PUN (member from 1955) and later became its vice-president (1964) and president (until his death). Shtul was an active member of the Ukrainian National Alliance in France and the Ukrainian Orthodox parish in Paris, as well as head of the controlling commission of the Shevchenko Scientific Society in Europe in 1966–77.

Apart from his many articles he wrote the surveys of Ukrainian history *Viky hovoriat'* (The Ages Speak, 1940, 1941, 1954), *V im'ia pravdy* (In the Name of Truth, 1947, 1948, 1991), about the origins and actions of the UPA, and *Na zov Kyieva* (Heeding the Call of Kiev, 1977), about the life and works of O. Teliha, and edited the anthology *Olena Teliha* (1977). Shtul was buried in South Bound Brook, New Jersey. Memoirs about him and a selection of his articles were published by the Shevchenko Scientific Society in Europe under the title *Paryzh Olehovi Shtulevi* (Paris to Oleh Shtul, 1986).

A. Zhukovsky

Shtykalo, Dmytro [Štykalo], b 7 November 1909 in Ilkoviychi, Sokal county, Galicia, d 4 November 1963 in Munich. Journalist and political activist. As a law student at Lviv University he was active in student organizations and the OUN: he headed the Union of Ukrainian Student Organizations under Poland (1932–3) and contributed articles on ideological and political issues to nationalist periodicals, such as *Students'kyi shliakh* and *Nash klych*. He was arrested several times and imprisoned in *Bereza Kartuzka for two years (1934–6). After joining the Bandera faction of the OUN, during the Second World War he edited its underground publications and the broadcasts of the OUN-UPA radio station in the Carpathian Mountains. After the war he directed a Ukrainian radio program in Madrid and coedited the nationalist periodicals *Ukraïnets'-Chas* in Paris, *Vyzvol'nyi shliakh* in London, and *Ukraïns'kyi samostiinyk* and *Shliakh peremohy* in Munich. Of his poems, the duma on Bereza Kartuzka (1938) was the most popular.

Shubenko-Shubin, Leonid [Šubenko-Šubin], b 7 August 1907 in Kars, Turkey. Specialist in energetics; full member of the ANU (formerly AN URSR) since 1967. He graduated from Leningrad University (1930) and the Leningrad Boiler Turbine Institute (1931). He became director of the Central Boiler Turbine Scientific Research Institute in Leningrad (1944–50) and worked as chief designer at the Kharkiv Turbine Plant (1950–67) and the ANU Institute for Problems of Machine Building (from 1968). He contributed to the fields of steam and gas turbines, the optimization of processes and construction, and automated design.

Lev Shubnikov

Shubnikov, Lev [Šubnikov], b 29 September 1901 in St Petersburg, d 8 November 1945 in a Gulag labor camp. Experimental low-temperature physicist. A graduate of the Leningrad Polytechnical Institute (1926), from 1926 to 1930 he worked at the Cryogenic Laboratory in Leiden, Holland, where he distinguished himself as a crystal grower. Using his high-purity bismuth monocrystals, the low-temperature quantum oscillation of electrical magnetoresistance (now known as the Shubnikov–de Haas effect) was discovered in 1930. In 1930 he joined the Ukrainian Physical-Technical Institute in Kharkiv, and in 1931 he became director of its cryogenic laboratory, the first such laboratory in the USSR. From 1934 to 1937 a number of breakthrough discoveries were made by Shubnikov and his collaborators: the full diamagnetism of superconductors, the transition from the paramagnetic to the antiferromagnetic state (1934), the existence of two critical fields in superconducting alloys (1935), and the detailed conditions for the breakdown of superconductivity (1936). In 1935 Shubnikov also assumed the chair of solid-state physics at Kharkiv University. After L. *Landau was dismissed from Kharkiv University on trumped-up political charges in December 1936 and subsequently arrested, Shubnikov wrote a letter of protest to the university rector and resigned. He was arrested by the NKVD in August 1937 on fabricated charges of espionage and sentenced to 10 years' imprisonment. Attempts by the Soviet physicist P. Kapitsa to obtain his release (he succeeded in obtaining a release for Landau) remained fruitless, and Shubnikov died in a labor camp. He was posthumously rehabilitated in 1957. A book containing his selected works and memoirs about him was published in Kiev in 1989.

O. Bilaniuk

Shuhaievsky, Valentyn [Šuhajevs'kyj], b 15 April 1884 in Kiev, d 2 November 1966 in the United States. Historian, numismatist, and archeologist. He graduated from the St Petersburg Archeological Institute (1908) and was appointed to the position of department director at the Chernihiv Museum of Ukrainian Antiquities (1917, now the Chernihiv Historical Museum). He became director of the numismatic collections at the All-Ukrainian Museum Quarter on the grounds of the Kievan Cave Monastery (1919) and the Kiev Historical Museum. He was a professor of numismatics at Kiev University and a senior associate of the Kiev Institute of Archeology. During the Second World War he worked in museums in Lviv, Sambir, and Prague. He emigrated from Germany to the United States

in 1949, where he became an assistant director of the Ukrainian desk at the Voice of America. Shuhaievsky's brochures describe coins discovered in Chernihiv gubernia (1915), coins and currency in 17th-century Left-Bank Ukraine (1918), the collection and preservation of monuments of antiquity (1920), coins and currency in 17th-century Ukraine (1924, 1926, 1928, 1951–1952), 18th-century Chernihiv (1927), and the Cossack figure Yu. Dunin-Borkovsky (1925, 1928).

Hermina Shukhevych

Iryna Shukhevych: *Portrait of Marta Rozhankovska* (oil)

Shukhevych, Hermina [Šukhevyč] (née Liubovych), b 1852 in Peremyshl, d 1939 in Lviv. Women's leader and civic activist; wife of V. *Shukhevych. She was a founder of a number of women's organizations in Lviv: the *Club of Ruthenian Women (which she also headed), the *Trud women's co-operative, and the *Ukrainska Zakhoronka society. She also served as director of the St Olha Institute for Girls. She helped her husband organize the ethnographic march to the Vysoky Zamok in 1887 and the Ukrainian ethnographic section at the Lviv Exhibition of 1894.

Shukhevych, Iryna [Šuxevyč] (née Velychkovska), b 21 November 1885 in Vyshniv, Rohatyn county, Galicia, d 17 February 1979 in Stamford, Connecticut. Portrait and icon painter. She studied painting in Lviv and Cracow (1911–12) and painted the murals of village churches in Galicia, first with M. *Sosenko and then alone. She was a member of the Zarevo art society in Cracow and the Ukrainian Association of Artists in Lviv. A postwar émigré, from 1950 she lived in the United States. Her icons can be found in churches in Galicia, Bukovyna, Rome, and the United States.

Shukhevych, Osyp [Šuxevyč], b 4 January 1816 in Rakiv, Stryi circle, d 1870 in Tyshkivtsi, Horodenka county, Galicia. Priest, writer, and translator; father of V. *Shukhevych. As a student at the Greek Catholic Theological Seminary in Lviv (1835–8) he became a member of the circle headed by the *Ruthenian Triad. From 1848 he was parish priest in Tyshkivtsi. In the years 1848–9 he translated into the Galician dialect of Ukrainian works by W. Scott, Virgil, and J.G. von Herder. An edition of Shukhevych's translations, with an introduction by I. Franko, was published in 1883 by his son.

Gen Roman Shukhevych (portrait)

Shukhevych, Roman [Šuxevyč] (noms de guerre: Dzvin, Shchuka, Tur, Taras Chuprynka, R. Lozovsky), b 17 July 1907 in Krakovets, Yavoriv county, Galicia, d 5 March 1950 in Bilohorshcha, near Lviv. Supreme commander of the *Ukrainian Insurgent Army, head of the OUN Home Leadership, chairman of the General Secretariat of the *Ukrainian Supreme Liberation Council (UHVR), and its general secretary for military affairs. He joined the Ukrainian Military Organization in 1923 and the OUN in 1929; he was active in their combat branches and known as Dzvin. In 1926 he took part in the political assassination of the Lviv school superintendent S. Sobiński. In 1930–4 he headed the OUN combat branch in Galicia and Poland. After being arrested in connection with B. *Pieracki's assassination, he was held for six months in the Bereza Kartuzka concentration camp and sentenced in 1936 to four years' imprisonment, which was reduced by an amnesty to two years'. During 1938–9 he was staff officer in the Carpathian Sich. In 1941 Shukhevych was briefly chief of the OUN (Bandera faction) in Ukrainian territories within the Generalgouvernement. He joined the Nachtigall Battalion (see *Legion of Ukrainian Nationalists) in April 1941 and became its top OUN liaison and political officer. When the Nachtigall and Roland battalions were merged in October 1941 to form Schutzmannschaftbataillon 201, Shukhevych was appointed deputy battalion commander and commander of its first company with the rank of captain. The battalion was disarmed and demobilized, and its officers were arrested in January 1943. Shukhevych, however, managed to escape and join the UPA. At the Third OUN Congress on 25 August, he was confirmed as head of

the OUN Home Leadership, and in November he was appointed supreme commander of the UPA in the rank of lieutenant colonel. The UHVR elected him on 15 July 1944 to head its General Secretariat and to hold the portfolio of military affairs, and confirmed his appointment to the top post in the UPA. In 1946 he was promoted to brigadier general.

Shukhevych died in combat with special units of the MVD. Posthumously, he was awarded the UPA's highest decorations: the Gold Cross of Combat Merit First Class and the Cross of Merit in gold.

P. Sodol

Stepan Shukhevych

Volodymyr Shukhevych

Shukhevych, Stepan [Šuxevyč], b 1 January 1877 in Serafyntsi, Horodenka county, Galicia, d 6 June 1945 in Amberg, Germany. Lawyer and civic activist. During the First World War he commanded a regiment of the Ukrainian Sich Riflemen (1914–15) and then (1919) the Fourth (Zolochiv) Brigade and was in the Supreme Command of the Ukrainian Galician Army. In 1920 he returned to Lviv and opened a law office, and thenceforth often defended members of the *Ukrainian Military Organization and the OUN. For many years he chaired the audit committee of the *Chervona Kalyna publishing house, which he helped organize. He wrote short stories and a book of memoirs (1919).

Shukhevych, Volodymyr [Šuxevyč], b 15 March 1849 in Tyshkivtsi, Kolomyia circle, Galicia, d 10 April 1915 in Lviv. Ethnographer, civic leader, educator, and publicist; full member of the Shevchenko Scientific Society from 1908. After graduating from Lviv University he taught secondary school in Lviv. He founded several educational societies, such as Ruska (*Ukrainska) Besida, which he headed in 1895–1910, the *Boian society (1891), and the *Lysenko Music Society in Lviv, which he headed in 1903–15. He served on the executive of the Prosvita society. He founded and edited the journals *Dzvynok* (1890–5) and *Uchytel'* (1893–1905) and edited the newspaper *Zerkalo*. Many of his articles appeared in *Zoria* and *Dilo*. He wrote a chemistry textbook (1884) and compiled several anthologies for school use. On his expeditions to the Hutsul and other regions he collected ethnographic materials and also

valuable museum pieces, which he donated to the National Museum in Lviv. In 1902–8 he was custodian of the Dzieduszycki Museum, at which he set up a natural science and ethnographic section. In 1894 he organized an ethnographic section at the Provincial Exhibition in Lviv. Shukhevych's major work, which is unsurpassed to this day, is his five-volume ethnographic and folkloric study *Huculszczyzna* (The Hutsul Region, 1899–1908; in Polish, 4 vols, 1902–8), which propagated knowledge about the Hutsul folk life.

M. Mushynka

Yurii Shukhevych

Shukhevych, Yurii [Šuxevyč, Jurij], b 28 March 1933 in Lviv county, Galicia. Soviet political prisoner; son of R. *Shukhevych. In 1945, after his mother had been sentenced to 10 years in labor camps, he and his sister were sent to orphanages in Chornobyl and then Staline (now Donetsk). He was first arrested in August 1948, simply because he was his father's son, and was sentenced to 10 years in the Vladimir prison near Moscow. In April 1956 he was officially recognized as unjustly persecuted and released, but intervention by the Soviet procurator general, R. Rudenko, resulted in his rearrest in the fall of that year and his return to Vladimir prison. The day his 10-year term ended in 1958, he was again arrested on fabricated charges of spreading 'anti-Soviet agitation and propaganda' among his fellow inmates; he was tried in Lviv, and sentenced in December of that year to 10 years in labor camps in the Mordovian ASSR. There he participated in hunger strikes to protest the unlawful acts of the camp authorities, and in July 1967 he wrote a letter of protest to the chairman of the Presidium of the Ukrainian Supreme Soviet. When he was released in August 1968, he was forbidden to live in Ukraine for five years, and he settled in Nalchik in the Kabardino-Balkar ASSR, where he worked as an electrician. In March 1972, during the wave of arrests among the intelligentsia in Ukraine, he was arrested a third time, for compiling his prison memoirs, and sentenced to nine years in labor camps and five years' exile. In 1973, while in a Mordovian camp, he was arrested a fourth time, for writing a document in his own defense, and resented to 10 years in prison and 5 years' exile. Until 1978 he served his term in Vladimir, and then he was transferred to the prison in Chistopol, in the Tatar ASSR.

During his imprisonment Shukhevych demanded reviews of his case, participated in campaigns for the official recognition of political-prisoner status, and sought the right to leave the USSR. In 1979 he renounced his Soviet cit-

izenship and joined the *Ukrainian Helsinki Group. In March 1982 he was exiled to Tomsk oblast, in Siberia. Altogether Shukhevych was subjected to 35 years of incarceration and exile for refusing to denounce his father and the Ukrainian liberation movement. As a result he was often seriously ill; in 1982 he completely lost his sight. In 1981 the US Congress passed a resolution calling for his release and for permission for him to emigrate, and about 200 Canadian mayors and members of Parliament also spoke out on his behalf. In February 1982 he was declared 'prisoner of the month' by Amnesty International, and in August 1986, 40 US senators signed a petition to M. Gorbachev calling for his release. In 1989 he was finally allowed to return to Ukraine, where he has remained politically active.

Shul, Andrii [Šul', Andrij] (Szul, Andrij), b 21 August 1944 in Neutitschein, Germany. Musicologist, educator, and conductor; son of R. *Smerechynska-Shul. He studied piano in New York with R. Savytsky (1952–4) and at the Juilliard School of Music (1954–62). He obtained a PH D in musicology at the Ukrainian Free University in 1971 with a dissertation on the choral style of D. Bortniansky's 35 sacred concertos. Shul's writings include *Tvorchist' Dmytra Bortniansky's'koho: Krytychnyi ohliad* (The Works of Dmytro Bortniansky: A Critical Survey, 1980), and miscellaneous articles and reviews. In 1972 he was appointed staff editor of Ukrainian studies for the *Repertoire International de Littérature Musicale* (RILM Abstracts) in Pennsylvania. He has also appeared as a pianist and entertainer on American radio, television, and stage.

Shulavskyy camp site. A multi-occupational Neolithic Surskyi-Dnieper culture settlement (6th millennium BC) on Shulavskyy Island in the Dnieper River near Zvonetske, Solone raion, Dnipropetrovske oblast. Excavations in 1946 revealed the remains of pit-houses, stone tools (including some for woodworking), microlithic flint pieces, wild and domestic animal bones, and pottery fragments.

Shulezhko, Pavlo [Šuležko] (Shuleshko, Paul), b 28 June 1902 in Zolotonosha, Poltava gubernia, d 8 July 1984 in San Francisco. Mechanical engineer, physicist, and mathematician; full member of the Shevchenko Scientific Society from 1960. He studied in Poltava and Kharkiv, worked as an engineer in Kharkiv (1928–38), and taught at Kharkiv University (1938–42). As a postwar émigré he was a professor at the Ukrainian Technical and Husbandry Institute in Regensburg, Germany (1945–9), the University of New South Wales in Australia (1953–9), and the Rochester Institute of Technology in Rochester, New York (1960–73). His main contributions were in the areas of the strength of materials and boundary-value problems. He wrote over 100 technical papers and several books, including books in Ukrainian on theoretical mechanics (1947) and the strength of materials (1947). In 1958–9 he headed the Australian chapter of the Shevchenko Scientific Society.

Pavlo Shulezhko

Illia Shulha

Shulgin, Vasilii [Šul'gin, Vasilij], b 13 January 1878 in Kiev, d 15 February 1976 in Vladimir, RSFSR. Russian conservative political leader and publicist. A graduate of the law faculty at Kiev University (1900), he was a deputy from Volhynia to the Second and Fourth Russian State Dumas. Before the First World War he was a leading member of the Ukrainophobic *Kiev Club of Russian Nationalists and editor (1913–19) of the reactionary newspaper **Kievlianin*. An opponent of the UNR, during the Russian Civil War he was an ideologue of the White forces and one of the founders of the Russian Volunteer Army in the Don region and the Kuban. In 1920 he fled abroad, and in the 1920s, while living in Yugoslavia, France, and Poland, he was a leading figure among the White émigrés. He published several books in the West, including the anti-Ukrainian diatribes *Ukrainstvuiushchie i my!* (The Ukrainianizers and We!, 1929) and *Le plus grand mensonge du xxe siècle: L'Ukraine* (1939), as well as several anti-Semitic tracts.

His strong sense of Russian nationalism led him to accept the Soviet state as the continuation of the Russian Empire, and he appreciated the Soviet leadership's ability to control the various nationalities, especially the Ukrainians. In 1961 he published an open letter urging Russian émigrés to stop criticizing the Soviet Union. His memoirs of the 1917 Revolution (1925), of the year 1920 (1927), and of his time in the State Duma (1979) were published in Moscow; the last appeared in English translation as *The Years: Memoirs of a Member of the Russian Duma, 1906–1917* (1984).

Shulgin, Vitalii [Šul'gin, Vitalij], b 1822 in Kaluga, Russia, d 1878 in Kiev. Publicist and pedagogue. He grew up in Nizhen and studied (1838) and taught history at Kiev University (1849–62). In 1863 he founded the ultraconservative, anti-Ukrainian newspaper **Kievlianin* (which he edited until his death). His writings include the monograph *Iugo-Zapadnyi kraj v poslednee 25-letie* (1838–1863) (The Southwestern Land [Ukraine] in the Past 25 Years [1838–63], 1863), numerous publicistic works, and a series of history textbooks. They are characterized by a strong pro-Russian bias.

Shulha, Illia [Šul'ha, Illja], b 20 July 1878 in Kropyvna, Zolotonosha county, Poltava gubernia, d 19 December

1938 in Petropavlovsk, Kazakhstan. Realist painter. He graduated from the Kiev Drawing School (1899), the Moscow School of Painting, Sculpture, and Architecture (1903), and the St Petersburg Academy of Arts (1909), where he studied under I. Repin. He taught art in Vinnytsia (1910–19), Zolotonosha, and Kiev (1928–38; from 1934 at the Kiev State Art Institute). He produced over 1,000 impressionist and realist works. They included historical paintings, such as *Col Dzhedzhalii and His Regiment Entering Kropyvna* (1913) and *Cossack Scouts* (1916); genre scenes, such as *Young Women at Home* (1918), *Blessing of the Water* (1914); landscapes, such as *Church in Vinnytsia* (1913) and *Winter in the Woods* (1937); and portraits, including ones of his wife (1906) and T. Shevchenko (1926) and self-portraits (1928, 1936). He was arrested by the NKVD in March 1938 and died after a few months of imprisonment. His life is documented in an article by Yu. Slastion in *Vyzvol'nyi shliakh* (1961, nos 9–10).

Ivan Shulha: *Portrait of a Girl in a Green Kerchief* (oil, 1917)

Shulha, Ivan [Šul'ha], b 31 October 1889 in Mykhailivka, Oleshky county, Tavriia gubernia, d 23 April 1956 in Kiev. Painter. He studied at the Odessa Art School (1906–11) under K. Kostandi and at the St Petersburg Academy of Arts (1911–17). From 1922 he lived in Kharkiv, and in the 1920s he was a member of the *Association of Artists of Red Ukraine. During the period 1919–21 he painted propaganda posters and wall panels. His work consists mainly of historical and genre paintings, such as *The Cossacks Are*

Leaving (1909), *Cossack Campaign* (1915–17), *The Lena Executions* (1926), *Collective Fish Farm* (1932), *T. Shevchenko's Meeting with I. Soshenko* (1938), *Cossack Song* (1945), and *The Pereiaslav Council* (1951). A catalog of his posthumous exhibition was published in 1962.

Shulha, Pelaheia [Šul'ha, Pelaheja], b 30 October 1899 in Viazivok, Cherkasy county, Kiev gubernia, d 7 September 1986 in Kiev. Geologist. She graduated from the Kiev Institute of People's Education (1929) and was a scholarly associate of the AN URSR (now ANU) Institute of Geological Sciences in 1930–76 (department head, 1950–62). Her main research interest was sediment formations in Ukraine. She wrote *Paleontologii i stratigrafiia verkhnego dokembriia i nizhnego paleozoia iugo-zapada Vostochno-Evropeiskoi platformy* (*The Paleontology and Stratigraphy of the Late Precambrian and Early Paleozoic in the Southwestern Part of the East European Platform*, 1976).

Oleksander Shulhyn

Shulhyn, Oleksander [Šul'hyn] (Choulguine, Alexandre), b 30 July 1889 in Sokhvyne, Poltava gubernia, d 4 March 1960 in Paris. Political leader, community and cultural activist, historian, and sociologist; full member of the Shevchenko Scientific Society from 1948 and of the Ukrainian Academy of Arts and Sciences; son of Ya. *Shulhyn. He studied history and philosophy at St Petersburg University (1908–15) and worked there until 1917. He joined the St Petersburg branch of the Society of Ukrainian Progressives and became a member of the CC of the Ukrainian Democratic Radical party (UDRP) and a delegate to the Soviet of Workers' and Soldiers' Deputies.

Returning to Kiev after the February Revolution, Shulhyn was elected to the Central Rada and its Little Rada. From July 1917 to 30 January 1918 he served as general secretary for nationality (later international) affairs. He was a coauthor of the *Statute of the Higher Administration of Ukraine and a co-organizer of the Congress of the Peoples of Russia in Kiev (held September 1917). During his tenure as director of foreign policy Great Britain and France officially recognized the UNR, and Ukraine began peace negotiations with the Central Powers in Brest. Under the Hetman government he worked in the Ministry of External Affairs of the Ukrainian State, and from July 1918 to the end of the year he was Ukrainian ambassador to Bulgaria. In 1919 the Directory of the UNR appointed him as a delegate to the Paris Peace Conference, and in 1920 he was head of the Ukrainian delegation to the first assembly

of the *League of Nations in Geneva. From 1921 he headed the UNR extraordinary diplomatic mission in Paris.

From 1923 to 1927 Shulhyn lived in Prague, where he was a professor of history and the philosophy of history at the Ukrainian Free University and the Ukrainian Higher Pedagogical Institute, and head of the Prague committee of the renewed UDRP. In 1926 he became minister of external affairs of the *Government-in-exile of the UNR and director of its foreign policy (1926–36, 1939–40, and 1945–6).

In 1927 Shulhyn moved to Paris. There he served as head of the *Supreme Emigration Council (1929–39), head of the UNR government-in-exile (1939–40), and coeditor of the weekly *Tryzub* (editor in 1940). From 1933 to 1938 he protested against the Bolshevik terror, forced labor, and man-made famine in the Ukrainian SSR. In an open letter to F. Nansen, published as the brochure *La Société des Nations et les réfugiés ukrainiens* (1929), he petitioned for the official recognition of Ukrainian refugees. During the German occupation Shulhyn was arrested in Paris (1940–1) as a Ukrainian pro-French political activist. After 1945 he devoted himself to scholarly work. He founded and headed the *Ukrainian Academic Society in Paris (1946–60) and initiated the *International Free Academy of Arts and Sciences (vice-president in 1952–60). He was also the Ukrainian representative in the International Refugee Organization (1948–52) and a consultant to French organizations for the protection of refugees and stateless persons (1952–60).

Shulhyn wrote a number of studies about Ukraine's struggle for *independence (1917–20) and the activities of the UNR government-in-exile, including *Polityka* (Politics, 1918), *L'Ukraine, la Russie, et les puissances de l'Entente* (1918), *Les problèmes de l'Ukraine* (1919; also in English, Dutch, and Hungarian [1920] edns), *Chronologie des principaux événements en Ukraine, 1917–19* (1919), *L'Ukraine et le cauchemar rouge: Les massacres en Ukraine* (1927), *Derzhavnist' chy Haidamachchyna?* (Statehood or Haidamaka Insurgency?, 1931), *Bez terytorii* (Without a Territory, 1934), and *L'Ukraine contre Moscou, 1917* (1935; English trans 1959). Among his sociological and historiographic works are *Narysy z novoi istorii Evropy* (Essays on Modern European History, 1925), *Uvahy do istorii rozvytku raniishn'oho kapitalizmu* (Remarks on the History of the Development of Early Capitalism, 1928), *Les origines de l'esprit national moderne et J.-J. Rousseau* (1938), *L'histoire et la vie: Les lois, le hasard, la volonté humaine* (1957), and *Michel Hrouchevskyj et sa conception de l'histoire de l'Est Européen* (1959). He also contributed to émigré encyclopedias of Ukraine (*Ukrains'ka zahal'na entsyklopediia* and *Entsyklopediia ukraïnoznavstva*) and various journals and anthologies, including *Tryzub*, *Prométhée* (1926–38), *La Revue de Prométhée* (1938–40), and *Ukrains'ka literaturna hazeta* (1956–60). A biography of Shulhyn, in French, was edited by O. Perrin (1961), and a festschrift in his honor was edited by V. Yaniv (*ZNTSh*, no. 186 [1969]).

A. Zhukovsky

Shulhyn, Yakiv [Šul'hyn, Jakiv], b 19 February 1851 in Kiev, d 28 November 1911 in Kiev. Community activist, pedagogue, and historian; member of the Shevchenko Scientific Society. He graduated from Kiev University (1874), where he studied under V. Antonovych and M. Drahomanov. Shulhyn was an important figure in the Ukrainian cultural renaissance of the late 19th and early 20th centuries. He belonged to the Old Hromada of Kiev, and in 1876

Yakiv Shulhyn

Nadiia Shulhyna-Ishchuk

he donated his inheritance of 12,000 rubles to fund Drahomanov's emigration and the publication of **Hromada* in Geneva. He continued his studies abroad (1876–7) and then taught in gymnasiums in Kiev and Odessa. Shulhyn was arrested in 1879 because of his national and cultural activities and for importing a printing press for the Old Hromada. He was exiled to Siberia for four years, and upon his return he worked in a bank in Yelysavethrad. In 1899 he returned to Kiev, where he resumed teaching, contributed to the work of the Southwestern Branch of the Imperial Russian Geographic Society, wrote articles for *Kievskaiia starina*, and assisted the Vik publishing house. He was a member of the Historical Society of Nestor the Chronicler and a founding member and secretary of the Ukrainian Scientific Society in Kiev.

Later in life Shulhyn wrote articles on the history of 17th- and 18th-century Left-Bank Ukraine (1899; pub under the cryptonym 'L.Ch.'), the Koliivshchyna rebellion (1890), Right-Bank Ukraine in the mid-18th century (1891), and P. Polubotok (1890). Memoirs of him were published by M. Hrushevsky (*ZNTSh*, vol 107 [1912]) and V. Shcherbyna (*ZNTK*, vol 10 [1912]).

A. Zhukovsky

Shulhyna-Ishchuk, Nadiia [Šul'hyna-Iščuk, Nadija], b 1888 in Kiev, d 10 April 1979 in Philadelphia. Pedagogue, mathematician, and women's activist; daughter of Ya. *Shulhyn. After graduating from the Bestuzhev Courses in St Petersburg and Kiev University, she taught mathematics in secondary schools in Kiev (1913–23). Emigrating from Soviet Ukraine, she taught at the Ukrainian Higher Pedagogical Institute in Prague (1926–7) and at the Ukrainian gymnasium in Rivne (1928–44). As a postwar displaced person she emigrated to the United States in 1950. Before the First World War Shulhyna-Ishchuk was a member of the Society of School Education and contributed to the development of Ukrainian mathematical terminology and wrote the first Ukrainian-language mathematics primer in Russian-ruled Ukraine. She wrote articles on the methodology of teaching mathematics, which appeared in journals such as *Ukrains'ka shkola*. In the United States she served as a member of the Education Commission of the World Federation of Ukrainian Women's Organizations.

Shuliar, Andrii [Šul'jar, Andrij], b 15 December 1918 in Maidan, Stanyslaviv county, Galicia. Architect. A graduate of the Lviv Polytechnical Institute (1947), he took part in drawing up the general city plans for Lviv, Sokal, Chervonohrad, and Truskavets, and in the restoration of architectural monuments in Lviv and other cities. He designed the Staryi Dub restaurant in Truskavets (1979) and the village center of Vuzlove, in Lviv oblast (1982), and prepared the architectural design for over 50 monuments. He is the author of articles and books on urban planning and architectural history.

Shulte, Yurii [Šul'te, Jurij], b 30 July 1910 in Debal'tseve, Bakhmut county, Katerynoslav gubernia. Metallurgist; corresponding member of the ANU (formerly AN URSR) since 1969. He graduated from the Dnipropetrovske Metallurgical Institute (1931) and worked at the Zaporizhia Dniprosststal Electrometallurgical Plant and the Zaporizhia Machine-Building Institute (from 1947). His main technical work is in the area of improving steel manufacturing productivity and increasing the quality of cast and forged steels.

Shumborsky, Felitsian [Šumbors'kyj, Felicijan] (secular name: Pylyp), b 14 October 1771 in Östrikh, Volhynia, d 1851. Uniate bishop of Kholm. In 1811 he became secretary to the bishop of Kholm, F. Tsikhovsky, his first appointment in a steady rise in the ecclesiastic administration until his consecration as bishop of Kholm in 1830. Under his administration, jurisdiction over Kholm eparchy was transferred from the metropolitan of Halych to the Vatican, and the eparchy's ties to the rest of the Ukrainian Catholic church were thereby cut. At the same time Shumborsky was pressured to convert to Orthodoxy by the Russian church and authorities, and he was summoned to St Petersburg in 1840 by Tsar Nicholas I. He resisted these pressures, but the eparchy was finally converted in 1875. A biography of him was published in Polish by A. Kosowski (1937), and the journal of his 1840 trip to St Petersburg appeared in *Bohosloviia*, no. 45 (1981).

Shumelda, Yakiv [Šumelda, Jakiv], b 1914 in Bushkovychi, Peremysl county, Galicia, d 3 February 1993 in San Francisco. Political figure, economist, and lawyer. In the 1930s he was active in Ukrainian student organizations in Prague and Berlin and became a member of the Leadership of Ukrainian Nationalists. During the Second World War he was a leading member of the OUN Melnyk faction's expeditionary groups in central Ukraine and a member of the Kiev city administration (1941). A postwar émigré, he taught in San Francisco and wrote *Vid Marksa do Malenkova* (From Marx to Malenkov, 1955), works on changes in the USSR after Stalin (1957) and the strategy and tactics of the Ukrainian liberation movement (1966), the memoirs *Na polovyni dorohy* (Halfway, 1985), and a biography of M. Kapustiansky (1985). He also wrote articles on Ukrainian historiography and the history of Ukrainian nationalism.

Shumeyko, Stephen [Šumejko, Stepan], b 17 January 1908 in Newark, New Jersey, d 12 August 1962 in New York. Editor and community leader. After graduating in law (1931) he joined the staff of *Svoboda* and served as the first editor (1933–58) of the Ukrainian National Association's *Ukrainian Weekly*. He was a founder and the first

Stephen Shumeyko

president of the *Ukrainian Youth League of North America (1933–6). As president of the Ukrainian Congress Committee of America (1944–9) he promoted the cause of Ukraine's independence at the founding conference of the United Nations in San Francisco. He also served as general secretary of the Pan-American Ukrainian Conference. His writings include *Ukrainian National Movement* (1939) and translations of P. Kulish's *Chorna rada* (The Black Council) and other works of Ukrainian literature.

Shumka. A Ukrainian dance company founded in Edmonton in 1959 by C. Kuc. Consisting of approx 50 non-professional dancers, the troupe has developed an international reputation for the quality of its dancing and the staging of its productions. In addition to touring extensively (Tunisia, Japan, Hong Kong, Ukraine), the group held a command performance for Queen Elizabeth II in Edmonton (1978), was featured at a gala for President R. Reagan in Ottawa (1981), and performed at the opening ceremonies of the 1988 Calgary Winter Olympics. The ensemble's artistic directors have included C. Kuc, O. Semchuk, and J. Pichlyh; G. Zwozdesky has served as its longtime musical director.

Shumka. A Ukrainian folk song and dance. With its 2/4 time the *shumka* is similar to the **kolomyika*. The dance is accompanied by the song. A. Kotsypytsky published a collection of *shumka* songs.

Shumliansky, Oleksander [Šumljans'kyj], b 1748 in Yakivtsi, near Poltava, d 6 July 1795 in Moscow. Physician; brother of P. *Shumliansky. After being educated at the Kievan Mohyla Academy (1758–71) and the medical school at the St Petersburg Military Hospital (1773–6), he wrote a doctoral dissertation at Strasbourg University on the structure of the kidney (1782), in which he gave the first scientific description of Bowman's capsule (Shumliansky's capsula and loop). From 1786 he served as a professor of internal medicine and obstetrics in Moscow's medical schools. The founder of histology in the Russian Empire, he translated medical books into Russian and wrote *Mnenie odnogo istinoliubtsa o popravlenii naipoleznejshiei dlia liudei nauki* (The Opinion of a Lover of Truth on the Improvement of the Science Most Useful to Man, 1787).

Shumliansky, Pavlo [Šumljans'kyj], b 1752 in Mali Budyshcha, near Poltava, d 1821 in Kharkiv. Physician;

brother of O. *Shumliansky. He was educated at the Kievan Mohyla Academy (1763–70), the St Petersburg Medical School (1773–4), and Strasbourg University (1784–9), where he wrote a doctoral dissertation on local inflammation. He lectured at the St Petersburg Medical School and in 1795 became a professor of surgery and pharmacology at the Moscow Medical School. In 1805–17 he served as a professor of surgery at and the dean of the medical faculty of Kharkiv University. His publications deal with the medicinal properties of water, mineral waters in Poltava gubernia, and bone dislocations. He contributed to the reorganization of medical education in the Russian Empire.

Shumliansky, Yosyf [Šumljans'kyj, Josyf] (secular name: Ivan), b 1643, d 1708. Bishop of Lviv. The scion of an Orthodox noble family, he grew up with close ties to the court of Jan III Sobieski and even joined him in defending Vienna from a Turkish onslaught in 1683. In spite of strong opposition from church authorities, Shumliansky was made Orthodox bishop of Lviv in 1676. A year later he secretly converted to Catholicism and then used his position to steer the eparchy to a union with Rome. His secret negotiations with the Vatican and preparatory work among the eparchy's clergy culminated in 1700 in the conversion of the entire eparchy (with the exception of the Lviv Dormition Brotherhood, which accepted the union in 1708, and the Maniava Hermitage). M. Andrusiak published a biography of Shumliansky in Lviv in 1934.

Shumovska-Horain, Oleksandra [Šumovs'ka], b 1896 in Volhynia gubernia, d 1985 in Paris. Music teacher and composer. She studied music at the Warsaw and Paris conservatories. From the 1920s she lived in Paris and taught music. In 1927 she organized a female quartet known as *Lel* and for 12 years she toured with it through France, Belgium, Spain, and Holland. Its repertoire included Ukrainian works. She wrote music for female voice and for children, piano pieces (for four hands), and church music.

Pavlo Shumovsky

Oleksander Shumsky

Shumovsky, Pavlo [Šumovs'kyj], b 1899 in Myroshcha, Dubno county, Volhynia gubernia, d 27 January 1983 in Paris. Biologist, agronomist, and political and civic figure; full member of the Shevchenko Scientific Society from 1950. He studied agronomy at Kiev (1918–19), Berlin (1921–4), and Cracow (1925–6) universities and taught at

the Higher Agricultural School of Warsaw University (1927–39) and the Lviv Polytechnical Institute (1939–41). During the war he served as director of the Department of Animal Husbandry at the Chamber of Agriculture in Lviv, and, as a founding member of the *Ukrainian Supreme Liberation Council (UHVR), took part in the resistance movement. After emigrating to France he became a research associate and then head of the biochemistry and physiology laboratory of the State Veterinary School in Maisons-Alfort (1945–65). He did research on animal hybridization, artificial insemination, and sperm storage and published numerous scientific papers in various languages. He was active in the External Representation of the UHVR. He was a professor at the Ukrainian Technical and Husbandry Institute and president of the board of directors of the Petliura Ukrainian Library in Paris (1968–81).

Shumske [Šums'ke]. III-7. A town smt (1986 pop 4,700) on the Viliia River and a raion center in Ternopil oblast. It was first mentioned, as the fortress of Shumsk, in the Hypatian Chronicle under the year 1149. In 1224 it was briefly an independent principality. Then it became part of the Principality of Galicia-Volhynia. On Burundai's demand the town's fortifications were dismantled in 1261. From the mid-14th century Shumske was ruled by the Lithuanian dynasty. Under Polish rule (1569–1793) a Basilian monastery was built in 1637 but was transferred to the Franciscan order in 1676. In 1715 a Roman Catholic church was built. In the 19th century Shumske belonged to Kremianets county of Volhynia gubernia. By mid-century it had a distillery, a brewery, a brick factory, tanneries, and weaving factories. In the interwar period (1919–39) Shumske was ruled by Poland. Today it is an agricultural town, with a farm machinery repair plant and a consumer-goods plant. An old Slavic settlement has been discovered in its vicinity.

Shumsky, Oleksander [Šums'kyj], b 2 December 1890 in Zhytomyr county, Volhynia gubernia, d 18 September 1946 in the Solovets Islands. Revolutionary and national-communist leader. He joined the Ukrainian Social Democratic Spilka in 1908. After the February Revolution he worked for the Kiev Gubernia zemstvo administration and became a leading member of the *Ukrainian Party of Socialist Revolutionaries (UPSR), which he represented in the Central Rada. In January 1918 a UPSR group including Shumsky conspired to overthrow the Rada. At the Fourth UPSR Congress in May 1918, he was a leader of the left faction of the *Borotbists, and in the autumn he was a member of the Borotbist Chief Revolutionary Committee that took part in the popular insurrection against the Hetman government. In January 1919, together with the Russian Bolsheviks, he organized a rebellion in Left-Bank Ukraine against the UNR Directory. During the second Soviet occupation of Ukraine the Borotbists entered into an entente with the CP(B)U, and Shumsky was appointed commissar of education in Kh. Rakovsky's Soviet Ukrainian government. He introduced policies to combat Russification and foster a Ukrainian cultural rebirth. In March 1920 Shumsky merged the Borotbists with the CP(B)U, and in April he was appointed to the CC CP(B)U Politburo and Organizational Bureau and the Comintern Executive Committee. That same year he became commissar of internal affairs in

Ukraine and chairman of Poltava okruha's executive committee. After participating in negotiations on the Peace Treaty of Riga he served as the first and only Soviet Ukrainian ambassador to Poland. After returning to Ukraine in February 1923, Shumsky edited the monthly *Chervonyi shliakh* (until November 1926) and directed the CP(B)U Department of Agitation and Propaganda (May–September 1924). He replaced V. Zatonsky as Ukraine's commissar of education (September 1924 to February 1927) and actively implemented social and cultural *Ukrainization policies. In 1925 he protested to J. Stalin against the appointment of the new CP(B)U general secretary, L. *Kaganovich, and urged that he be replaced by a Ukrainian, V. Chubar. Shumsky called for accelerated Ukrainization and recruitment of Ukrainians to leadership positions in the CP(B)U and the trade unions in order to facilitate the de-Russification of Ukraine's working class. As a result of his conflicts with Kaganovich in 1925–6, a national-communist oppositional current, popularly known as Shumskyism, developed within the CP(B)U. Shumsky's ideas were echoed in the writings of M. *Khvylovy, whom Shumsky refused to condemn at a CP(B)U Politburo meeting. Shumsky's line was supported by the CC of the *Communist Party of Western Ukraine (KPZU) until Moscow, acting through the Comintern, managed to split the CC.

In February 1927 Shumsky was relieved of all his posts in Ukraine (he was replaced by M. *Skrypnyk) and transferred to Moscow. Thereafter the Party officially referred to Shumskyism as a 'nationalist deviation.' Shumsky was appointed rector of the Leningrad Institute of the National Economy and the Polytechnical Institute (September 1927), deputy head of the mass-agitation department of the All-Union Party CC (February 1930), chairman of the Trade Union of Educational Workers, and a member of the All-Union Central Council of Trade Unions (February 1931). In May 1933 he was arrested and accused of leading an anti-Party, counterrevolutionary, nationalist struggle in the CP(B)U and KPZU, of belonging to the Ukrainian Military Organization, and of preparing an armed uprising in Ukraine. He was imprisoned in a concentration camp in the Solovets Islands, where he committed suicide to protest his unlawful incarceration.

R. Senkus, A. Zhukovsky

Shumsky, Yurii [šums'kyj, Juriij] (real surname: Shomin), b 17 November 1887 in Tyraspil, Kherson gubernia, d 7 June 1954 in Kiev. Actor. He first appeared on stage in an amateur circle in Kherson (1907). Later he organized an amateur theater (1917) and a theatrical studio (1919–21), and did agitprop theater work (1921–4) for the People's Commissariat of Education. His professional career was spent in the Odessa Ukrainian Drama Theater (1925–34) and the Kiev Ukrainian Drama Theater (1934–54). Shumsky's repertoire (Ukrainian and non-Ukrainian) included such characters as Bzhostovsky in I. Kocherha's *Feia hirkoho myhdaliu* (The Fairy of the Bitter Almond, 1926), the title

Yurii Shumsky

Danylo Shumuk

character in O. Korniiuchuk's *Bohdan Khmel'nyts'kyi* (1939) and P. Beaumarchais's *Le mariage de Figaro* (1927), and Philip II in F. Schiller's *Don Carlos* (1936). In silent cinema he played the title role in *Benia Krik* (1927), Benedio Synytsia in *Boryslav smiiet'sia* (1927, based on I. Franko), and Sylin in *Maiak na Chornomu mori* (The Lighthouse on the Black Sea, 1928). A biography, by B. Stepanov, was published in Kiev in 1971.

Shumuk, Danylo [šumuk], b 30 December 1914 in Boremshchyna, Volodymyr-Volynskyi county, Volhynia gubernia. Longest-serving prisoner of conscience in the USSR. He spent 44 years of his life in prison or exile, 38 of them under Soviet rule. He was arrested in January 1934, and in 1935 he was sentenced by the Polish court in Kovel to eight years' imprisonment for his role in the underground Communist Party of Western Ukraine in Volhynia. After being amnestied by the Polish government in May 1939, he was conscripted into a Red Army penal battalion in May 1941, was captured by the Germans, and spent several months in a concentration camp holding Soviet prisoners of war, near Poltava. After managing to escape he returned to Volhynia. There he joined the anti-Soviet, anti-German *Ukrainian Insurgent Army in 1943. In February 1945 he was captured in Kiev oblast and sentenced to death by a secret military court in Rivne; the sentence was commuted to 20 years in Norilsk, Taishet, and other labor camps in Siberia, and in the Vladimir prison near Moscow. In August 1956, after a review of his case, he was freed before completing his term, and returned home. In November 1957 he was rearrested. Having refused to become a KGB informer, he was accused of 'anti-Soviet propaganda and agitation,' and in May 1958 he was tried in Lutske and sentenced to 10 years in labor camps in Siberia. After his release in 1967 he lived in Bohuslav and Kiev. In January 1972 he was again arrested, for writing memoirs, and in July he was sentenced in Lviv to 10 years in special-regime camps in Mordovia and Perm oblast, followed by five years' exile in Kazakhstan.

In the camps Shumuk renounced his Soviet citizenship (in 1972) and participated in campaigns for the acknowledgment of political-prisoner status, in strikes, and in other political protests. In 1979 he cofounded a Helsinki Accords monitoring group in the camp and joined the *Ukrainian Helsinki Group. For many years he demanded the right to join his relatives in Canada. Amnesty Interna-

tional and Ukrainian community campaigns for his release took place in many Western countries, and the Canadian government repeatedly appealed on his behalf to the USSR government. As a result he was finally allowed to emigrate, in April 1987, to Canada, after he had completed his term of exile. Shumuk's memoirs were smuggled out and published in the West in Ukrainian (1974; rev edn 1983) and English (*Life Sentence*, 1984). Selections of essays and reminiscences by Shumuk, *Perezhyte i peredumane* (My Life and Thoughts in Retrospect) and *Iz Gulagu u vil'nyi svit* (From the Gulag into a Free World), appeared in Detroit in 1983 and in Toronto in 1991, respectively.

O. Zinkevych

Shumylo, Mykyta [Šumylo], b 10 June 1903 in Mykhailivka, Cherkasy county, Kiev gubernia, d 8 March 1982 in Kiev. Writer and teacher. He concluded his studies at the Institute of Cinematography in Moscow in 1938 and taught in schools until the outbreak of the Second World War. He published collections of short stories: *Vada* (The Defect, 1934), *Urozhai* (The Harvest, 1934), *Holubyi zenit* (The Azure Zenith, 1948), *Shchedri sersem* (Generous of Heart, 1952), and *Ia – tvii brat* (I Am Your Brother, 1961). He also wrote the novel *Prokuror respubliky* (Prosecutor of the Republic, 1958), a collection of stories for children *De ty, moia chaiechko?* (Where Are You, My Little Seagull?, 1979), a volume of literary criticism titled *Oles' Honchar* (1950, 1951), and literary scenarios, and translated works of Russian and Belarusian writers.

Shumytsky, Mykola [Šumyc'kyj], b 30 April 1889 in Chernihiv, d February 1982 in Paris. Architect and civic leader. A graduate of the Kiev Polytechnical Institute, he was active in the revolutionary events of 1917–19 as chairman of the Council of Railways of Ukraine (1917), deputy of the railway workers to the Central Rada, and member of the Ukrainian Military Council. In September 1919 he was sent as a member of the UNR delegation to the Paris Peace Conference. In 1921 he was appointed head of the Ukrainian diplomatic mission in Paris. He worked closely with S. Petliura. He was the sole president of the *Union of Ukrainian Emigré Organizations in France (1925–42) and its representative in the Advisory Council on Refugees of the League of Nations. His publications include articles on Ukrainian architecture and wooden churches and recollections of the revolutionary period.

Shut, Andrii [Šut, Andrij], b ?, d 1873. The most talented kobzar of the Chernihiv region. After losing his sight at 17 as a result of smallpox, he learned to play the kobza from P. Kozel. His repertoire included the dumas about the Widow and Her Three Sons, the Cossack Fesko Handzha Andyber, Khmelnytsky and Barabash, Khmelnytsky and Vasile of Moldavia, the death of Bohdan Khmelnytsky, Ivan Konovchenko, the Bila Tserkva peace treaty, the Flight of the Three Brothers from Azov, Oleksii Popovych, Samiilo Kishka, and the Oppression of Ukraine by the Polish Gentry. He also sang historical and lyrical songs and psalms. Shut's songs were transcribed and published by P. Kulish, H. Bazylevych, and A. Metlynsky.

Shut, Vasyl [Šut', Vasyl'], b 26 April 1899 in Zolotonosha, Poltava gubernia, d 23 August 1982 in Chicago. Composer, conductor, and teacher. He graduated from

Vasyl Shut

the Lysenko Drama and Music Institute in Kiev in the composition class of V. Zolotarev (1930). In the 1930s he was composer-conductor in music-drama theaters in Kiev and the Donbas region, and he wrote music for nearly 30 plays. In 1950 he settled in Chicago, where he taught piano and conducted the St Nicholas Cathedral choir. His compositions include four symphonies; piano and violin concertos and sonatas; seven string quartets; three piano trios and a piano sextet; and 34 published solo songs to texts by T. Shevchenko, I. Franko, Lesia Ukrainka, O. Oles, O. Teliha, T. Kurpita, and others.

Shutenko, Taisiia [Šutenko, Taisija], b 5 October 1905 in Kharkiv, d 14 September 1975 in Kiev. Composer and educator. A graduate of the Kharkiv Music and Drama Institute (1930) and the Moscow Conservatory (1937), she taught in vocational music schools and secondary music schools in Kharkiv. In 1956 she moved to Kiev. She wrote orchestral works, such as the symphony *Karmeliuk* (1937), an overture, and a string quartet; works for folk instruments (including 16 pieces for bandura); and musical scores for plays, such as *Marusia Bohuslavka*, *Princess Victoria*, *Macbeth*, and *Puss in Boots*.

Shutko, Mykola [Šut'ko], b 19 December 1927 in Kryvyi Rih (now in Dnipropetrovske oblast). Stage and film actor. He completed study at the Dnipropetrovske Theater school in 1948 and then worked in the Chernivtsi Oblast Ukrainian Music and Drama Theater (1950–63), the Kiev Ukrainian Drama Theater (1963–82), and the Kiev Artistic Film Studio (1982). He acted in the films *Vony bylysia za bat'kivshchynu* (They Fought for the Fatherland, 1975) and *Vavilon xx* (Babylon xx, 1979).

Shvachka, Mykyta [Švačka], b ca 1728, d after 1768 in Nerchinsk, Siberia. Zaporozhian Cossack and haidamaka leader. At the outbreak of the *Koliivshchyna rebellion (1768) he joined forces with M. Zalizniak. Together with a detachment led by A. Zhurba he took the town of Khvastiv and established it as a rebel operations center. In the summer of 1768 he was captured by tsarist troops near Bohuslav and sentenced to hard labor in Siberia, where he died. Shvachka became a folk hero and the subject of a poem by T. Shevchenko.

Shvachko, Oleksii [Švačko, Oleksij], b 18 January 1901 in Chopylky, near Pereiaslav, Poltava gubernia, d 28 March 1988 in Kiev. Film director and stage actor. He was a student at the Lysenko Music and Drama Institute in

Kiev (1920–2) and completed his studies at the Kiev Institute of People's Education (1925). He acted in Berezhil (1922–5) and in the Odessa (1925–8) and Kiev (from 1928) artistic film studios. He directed the film productions of I. Karpenko-Kary's *Martyn Borulia* (1953) and *Zemlia* (Land, based on O. Kobylianska, 1954) and the documentaries *Daleko vid batkivshchyny* (Far from the Fatherland, 1965) and *Rozvidnyky* (The Scouts, 1968).

Shvarno Danylovyč [Švarno Danylovyč] (Lithuanian: Švarnas), b ca 1230, d 1269. Kievan Rus' prince and grand duke of Lithuania (from 1267); younger son of Danylo Romanovych. He married the daughter of Grand Duke Mindaugas in 1254 to strengthen a treaty between Lithuania and Galicia-Volhynia, and was given rule over Chorna Rus'. After Danylo's death in 1264 he also ruled the Halych, Kholm, and Dorohychyn principalities. When Mindaugas was assassinated (1263), Shvarno assisted his son, *Vaišvilka, in securing the Lithuanian throne. Vaišvilka, a monk, abdicated in 1267 in favor of Shvarno, who ruled as grand duke until his death.

Shvetlosts (Enlightenment). A literary and art quarterly published for the Ruthenians of Yugoslavia by *Ruske slovo* in Ruski Krstur in 1952–4 and 1966–7 and since 1967 in Novi Sad. It contains poetry, prose, and popular and scholarly articles on the language, history, and folklore of the Ruthenians, and it serves as a bridge between Yugoslavian culture and the culture of other countries, particularly Ukraine and Czechoslovakia. The centerpiece of the journal consists of the literary works of Ruthenian writers, such as Ya. Feisa, M. Vinai, M. Kovach, Ye. Kochish, and H. Nad (of the older generation); M. Kochish, V. Mudry, V. Kostelnyk, M. Koloshniak, M. Budynsky, L. Budynsky Falts, and M. Skuban (of the middle generation); and D. Paparhai, H. Hafich, A. Prokop, M. Striber, B. Vesermini, I. Hardy, and D. Hrubenia (of the younger generation).

Fedir Shvets

Ivan Shvets

Shvets, Fedir [Švec'], b 1882 in Cherkasy county, Kiev gubernia, d 20 June 1940 in Prague. Geologist and political activist. He graduated from Dorpat University (1910) and taught as a professor of geology at Kiev University (1917–18). He was a member of the CC of the Peasant Association and of the 'central current' of the Ukrainian Party of Socialist Revolutionaries. He was also a member of the Directory of the UNR (1918–19). He emigrated to Prague,

where he served as a professor at the Ukrainian Free University (from 1923) and the Ukrainian Higher Pedagogical Institute (1924–9). He published numerous geological studies.

Shvets, Ivan [Švec'], b 25 May 1901 in Khutir Mykhailivskyyi (now Druzhba), Hlukhiv county, Chernihiv gubernia, d 5 September 1983 in Kiev. Energy research scientist; full member of the AN URSR (now ANU) from 1950. He studied and taught at the Kiev Industrial (now Polytechnical) Institute and became director of the ANU Institute of Thermoenergetics (1942–54). He was rector of Kiev University (1952–72), and worked at the ANU Institute of Technical Thermophysics (from 1975). He developed new steam and gas turbines, served on various energy and electrification committees, and was active in energy administration and energy politics in the USSR.

Shvets, Vasyl [Švec', Vasyl'], b 17 January 1918 in Ivankiv, Radomyshl county, Kiev gubernia. Writer. He began publishing in the 1930s and has published many poetry collections, the most recent being *Spodivannia* (Expectations, 1984), and one novel, *Lysty v okopy* (Letters to the Trenches, 1985). The Second World War is a constant theme in his works. In 1982 he became the first recipient of the V. Sosiura Prize.

Anatolii Shydlovsky

Shydlovsky, Anatolii [Šydlovs'kyj, Anatolij] (Shidlovsky, Anatol), b 10 October 1933 in Vepryk, Bobrovytsia raion, Chernihiv oblast. Electrical and electric power engineer; full member of the ANU (formerly AN URSR) since 1985. He studied at the Kiev Polytechnical Institute and has worked since 1959 at the ANU Institute of Electrodynamics, where he has been director since 1973. He also served as secretary of the ANU Division of the Physical-Technical Problems of Energetics. He has made contributions in the areas of multiphase electric circuitry and the stabilization of electric power networks.

Shydlovsky, Andrii [Šydlovs'kyj, Andriij] (Shidlovsky, Andrei), b 17 November 1818 in Voronezh gubernia, Russia, d 7 May 1892 in Karabachyn, Radomyshl county, Kiev gubernia. Astronomer and geodesist. A graduate of Kharkiv (PH D, 1837) and Dorpat (M PHIL, 1841) universities, he worked as an astronomer at the Pulkovo Observatory (1841–3) and was a professor at Kharkiv University (1843–56) and Kiev University (1856–68), where he also di-

rected the Kiev Astronomical Laboratory. Shydlovsky took part in a major geodesic survey under the leadership of V. Struve; as part of this effort, he measured the exact geographic co-ordinates of a number of locations in Ukraine. He also took part in other surveys and expeditions.

Shyian, Anatolii [Šyjan, Anatolij], b 5 April 1906 in Borysivka, now in Belgorod oblast, Russia, d 11 May 1989 in Kiev. Writer. He completed studies at the Kiev Institute of Forest Technology in 1929. He is the author of many novels and short stories, such as *Balanda* (Prison Soup, 1930), *Na kryzhyni* (On the Ice Floe, 1930), *Opovidannia* (Stories, 1931), *Kateryna Kozhushana* (1938), *Magistral'* (The Highway, 1934), and *Khurtovyina* (The Storm, 1979, 1984). His stories for children include *Ivasyk-Telesyk* (1947), *Kotyhoroshko* (1947), *Ialynka* (The Christmas Tree, 1947), *P'iesy-kazky* (Plays – Fairy Tales, 1951), *Pro khloptsiv-iuntsiv, dobrykh molodtsiv* (About the Boys – Good Fellows All, 1955), and *Ivan – muzhyts'kyi syn* (Ivan, the Peasant's Son, 1959, 1982).

Shyian, Kyr [Šyjan], b 21 June 1902 in Berezova Luka, Myrhorod county, Poltava gubernia, d 1974. Historian. He graduated from the Nizhen Institute of People's Education (1930) and taught in Kharkiv at the Scientific Research Institute of the History of Ukrainian Culture (1930–4), the Pedagogical Institute (1939–56), and the university (from 1956; director of the department of the history of the USSR from 1963). He wrote *Borot'ba robotnychoho klasu Ukraïny za vidbudovu promyslovosti* (1921–1926 rr.) (The Struggle of the Working Class of Ukraine for the Rebuilding of Industry [1921–6], 1959), coauthored *Mynule i suchasne sela* (The Past and Present of the Village, 1963), and contributed to the collective works *Istoriia robotnychoho klasu Ukraïns'koï RSR* (History of the Working Class of the Ukrainian SSR, vol 2, 1967) and *Rozvytok narodnoho hospodarstva Ukraïns'koï RSR, 1917–1967* (Development of the National Economy of the Ukrainian SSR, 1917–67, 1967).

Shyianiv, Hryhorii [Šyjaniv, Hryhorij], b 30 November 1874 in the Chernihiv region, d 23 December 1955 near Poděbrady, Czechoslovakia. Lawyer, judge, and civic figure. In 1918 he was a member of the UNR General Court and the Hetman government's State Senate (supreme court). An émigré in Bohemia from 1920, he taught law at the Ukrainian Husbandry Academy in Poděbrady and was a member of its last senate. He wrote for the academy the first Ukrainian textbook about automobiles and a textbook on private law.

Shylo, Havrylo [Šylo], b 26 March 1910 in Dereviane, Rivne county, Volhynia gubernia, d 17 January 1988 in Lviv. Linguist. A graduate of Warsaw University (1937), he defended his candidate's dissertation on the palatography and phonemic system of Ukrainian at the University of Lviv (1947) and taught at pedagogical institutes in Lviv (1947–59) and Drohobych (from 1959). He wrote a monograph on the southwestern Ukrainian dialects (1957) and articles on their lexicon, phonetics, syntax, and toponyms and on Slavic prothesis. He also prepared a linguistic atlas and dictionary of the dialects of the Dniester Basin, which remain unpublished.

Kostiantyn Shylo

Yurii Shymko

Shylo, Kostiantyn [Šylo, Kostjantyn], b 11 June 1879 in Orlovskoe, Primore oblast in the Far East, d 1933. Civic and cultural activist; father of M. *Shylo. The commissioner of education in Kiev gubernia under the Central Rada, in the 1920s he headed the editorial department at the Kiev branch of the All-Ukrainian Academy of Sciences and lectured at the Kiev Agricultural Institute. He was arrested in 1929, tried for belonging to the *Union for the Liberation of Ukraine, and given a suspended three-year sentence. After the trial he worked briefly in the laboratory of a veterinary institute.

Shylo, Mykola [Šylo], b 6 September 1913 in Kiev, d 22 April 1982 in Kiev. Architect; son of K. Shylo. A graduate of the Kiev Civil-Engineering Institute (1939), in 1953 he was appointed director of the Kiev Planning Institute of Residential-Civil and Communal Construction. In Kiev he designed the building of the Ministry of Agriculture (1955–6) and residential buildings. He also helped to plan the expansion of the city center (1970).

Shymanovsky, Oleksander [Šymanovs'kyj], b 16 July 1860 in Ukraine, d 3 January 1918 in Kiev. Ophthalmologist. A graduate of Kiev University (1884), he worked there from 1891 and taught at the Higher Courses for Women (1910–11). His publications deal with conjunctivitis, eye traumas, tuberculous infections of the eye, and the transplantation of the anterior part of the eye.

Shymanovsky, Vitalii [Šymanovs'kyj, Vitalij], b 12 November 1928 in Antonivka, Bila Tserkva okruha. Specialist in construction mechanics and design; corresponding member of the ANU (formerly AN URSS) since 1982. He graduated from the Kiev Hydromelioration Institute (1954). From 1962 to 1980 he worked at the USSR Institute of Building Constructs as assistant director, and in 1980 he became director of the Ukrainian Scientific Research and Development Institute of Steel Construction. He has developed new methods of constructing and calculating loading and stresses in suspension bridge structures.

Shymanovsky, Vsevolod [Šymanovs'kyj], b 1866 in Kiev, d 1934 in Krymske, Krasnodar krai. Apiarist. He completed military training and served on the general staff of the Russian army, and then taught in rural schools in Kiev and Volhynia gubernias. In 1910–26 he taught at

the Boiarka Apiarian School. He wrote *Metody pchelovozheniia* (Methods of Beekeeping, 1926).

Shymchuk, Mykola [Šymčuk], b 9 January 1949 in Kopytkove, Zdolbuniv raion, Rivne oblast. Artist. He completed study at the Lviv Institute of Applied and Decorative Arts (1973), where he specialized in decorative glass. Since 1975 he has participated in international, local, and all-Union group exhibitions. He has shown his stained glass at solo exhibitions in Lviv (1980, 1983, and 1987).

Shymko, Yurii [Šymko, Jurij], b 6 September 1940 in Koźle, Silesia, Poland. Community leader and politician leader. After emigrating to Canada with his parents (1953) he graduated from the University of Toronto (1961) and the Ontario College of Education (1963). He taught secondary school and was active in the Progressive Conservative party. In 1978 he was elected in the High Park electoral district to the Canadian House of Commons, and in 1981 and 1985 as a member of the provincial parliament in Ontario. He has been active in a number of Ukrainian organizations, particularly the Canadian League for Ukraine's Liberation. In 1973–8 he served as general secretary of the *World Congress of Free Ukrainians, and in 1988 he was elected its president.

Ioanikii Shymonovych

Volodymyr Shynkaruk

Shymonovych, Ioanikii [Šymonovyč, Ioanikij], b 16 November 1885 in Husiatyn, Kamianets-Podilskyi county, Podilia gubernia, d 1938? Economist and statistician. He studied at St Petersburg University and was active in the Ukrainian Hromada there. In 1917 he was elected to the Ukrainian Central Rada in Kiev and appointed to the position of aide to the UNR minister of postal and telegraph services. Later he taught political economy at the Kamianets-Podilskyi Ukrainian State University (1920–1) and in Lviv. In 1926 he emigrated to Soviet Ukraine. He was a member of the Scientific Research Department of Agricultural Economics in Kiev. He taught at the Kiev Agricultural Institute and in Kazan, Russia, and Staline (Donetsk). He was imprisoned in Stalinist concentration camps in the 1930s, and his fate after 1938 is unknown. Shymonovych wrote works on Ukrainian industry (1920), Ukrainians in the Soviet Far East (1923), Galicia (1928), and agricultural co-operatives in Ukraine, and a history of political economy (1923).

Shymonovych-Semyhynovsky, Yurii [Šymonovyč-Semyhynovs'kyj, Jurij] (Polish: Jerzy Eleuter Szymonowicz Semiginowski), b ca 1660 in Lviv, d 1711. Galician painter and engraver. After studying at St Luke's Academy in Rome he was appointed painter to the court of King Jan III Sobieski in 1687. He painted allegorical presentations of the four seasons on the plafonds in the Wilanów royal castle in Warsaw and portraits of the royal family and of the royal couple on horses. The icons of St Anne at St Anne's Church in Cracow and of St Sebastian at the Holy Cross Church in Warsaw, as well as the pictures of Bacchus, Ariadne, and the Holy Family now in the Lviv Art Gallery, are attributed to him.

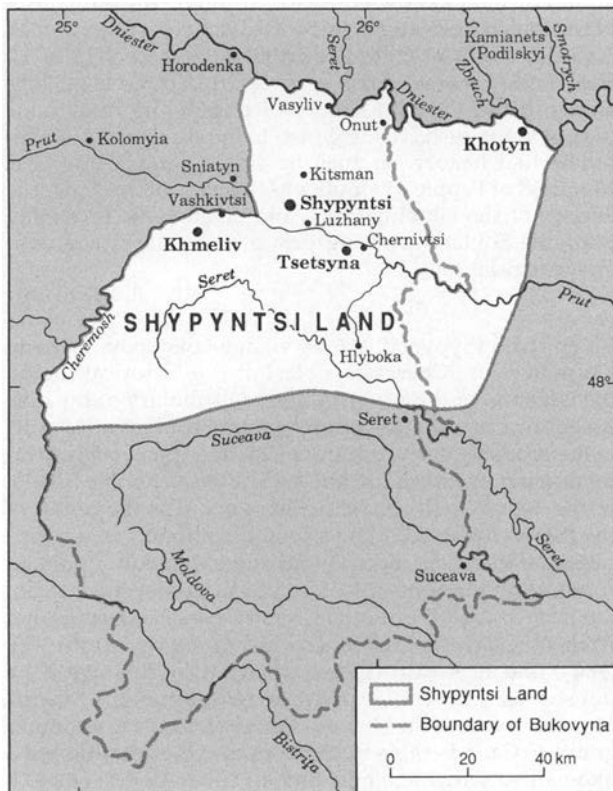

Shynkaruk, Volodymyr [Šynkaruk], b 22 April 1928 in Haivoron, Bila Tserkva okruha. Philosopher; full member of the ANU (formerly AN URSS) since 1978 and corresponding member of the USSR (now Russian) Academy of Sciences since 1981. Since graduating from Kiev University (1950; candidate of sciences, 1954) he has lectured there on the history of philosophy. He was appointed dean of the philosophy faculty in 1965 and head of the department of ethics, esthetics, and logic in 1967. Since 1968 he has directed the ANU Institute of Philosophy, and he was the first editor of its journal *Filosofs'ka dumka* (1969–71, 1979–88). He served three terms (1972–86) as president of the Ukrainian Branch of the Philosophical Society of the USSR and vice-president of the society. His numerous (over 250) publications deal chiefly with the history of dialectical materialism, the relationship between the dialectic in its ontological, logical, and epistemological sense, and the role of Marxism-Leninism, the Soviet worldview, and Soviet culture. His chief works are books in Russian on the logic, dialectic, and theory of knowledge of G. Hegel (1964) and I. Kant (1974); on the unity of the dialectic, logic, and theory of knowledge (1977); and on the humanism of the dialectico-materialistic worldview (coauthor, 1984). As chief editor of complete editions of the works of H. Skovoroda (2 vols, 1973) and T. Prokopovych (3 vols, 1979–81) and the ANU history of philosophy in Ukraine (2 vols, 1987), he has contributed to the study of Ukrainian intellectual history. In 1989 he was elected to the USSR Congress of People's Deputies as the head of the *Znannia Society of the Ukrainian SSR, and chaired the Ukrainian Supreme Soviet's working group on drafting new language legislation.

T. Zakydalsky

Shypyntsi [Šypynci]. v-6. A village (1989 pop 3,160) in Kitsman raion, Chernivtsi oblast. It is a historical site on the left bank of the Sovytsia River (a tributary of the Prut River), first mentioned in documentary sources in 1433. Its name probably derived from the hissing (*shypinnia*) of water flowing into a nearby hollow known as Kruhle Boloto. In the 13th to 15th centuries Shypyntsi was the center of the *Shypyntsi land. Many Neolithic artifacts of the Trypillian culture have been found there, including painted ceramics and figurines. A bracelet and a hatchet date from the Bronze Age, and Roman coins have also been found. Archeological digs were conducted by J. Szombathy (1893) and E. Kostin (1904–14), and their findings were transferred to the Chernivtsi Museum and the Vienna Museum of Natural History. Some of the earliest immigrants to Canada came from Shypyntsi; they established a like-named settlement near Smoky Lake, Alberta (1896).

Shypyntsi land (Shypynska zemlia; Terra Sepinecensis). The historical name of a territory in *Bukovyna from the time of the Principality of Galicia-Volhynia to the establishment of the Principality of *Moldavia (from the late 13th to the mid-15th centuries). The beginning of its existence has been variously fixed at after the Tatar invasion in the mid-13th century (M. Korduba), after the dissolution of the Galician-Volhynian principality in the mid-14th century (B. Tymoshchuk), and during the migration of Rumanian peoples from Transylvania in the mid-14th century (T. Balan). The first mention of the Shypyntsi land occurs in J. Długosz's account of Casimir III the Great's campaign against Moldavia in 1359; the last extant document to mention it is from 1444 (in E. Hurmuzaki [ed], *Documente privitoare la istoria Românilor*, vol 1, no. 2 [1874]).

The Shypyntsi land was made up of sections of northern Bukovyna and Bessarabia, covering approx the same area as present-day *Chernivtsi oblast; its capital was *Shypyntsi. The land was divided into three *volosti*, Tsetsyn (east of Chernivtsi), Khotyn, and Khmeliv (near Karapchiv, in the Cheremosh River valley). The *volost* centers were fortified settlements known in various documents as *hrady*. The Shypyntsi land developed successfully because of its relative isolation from Tatar nomads and its position on the Lviv-Suceava trade route; Shypyntsi was particularly known for its large livestock markets. In the 14th and 15th centuries there were more than 100 villages in the land, some of which had existed since the Princely era (Kitsman, Kuchuriv, Onut, Repuzhyntsi, Vasyliv); others had been established at the end of the 13th and the beginning of the 14th centuries (Hlyboka, Luzhany, Vashkivtsi). Among the few that arose after the arrival of the Rumanians in the 14th century were Rokytna and Tarasivtsi.

Because it was essentially a borderland between Moldavia and Poland, the Shypyntsi land was in most respects autonomous and sovereign until the Moldavian principality extended its control over it. The territory was then settled by *Ukrainians, who continue to make up the population.

Shyriaiève [Šyrjajev]. VI-11. A town smt (1986 pop 7,400) on the Velykyi Kuialnyk River and a raion center in Odessa oblast. It was founded at the end of the 18th century by Bulgarian settlers and runaway Ukrainian serfs, and was called Stepanivka until 1918. It is an agricultural town with several food-processing plants.

Shyroke [Šyroke]. VI-14. A town smt (1986 pop 11,700) on the Inhulets River and a raion center in Dnipropetrovske oblast. It originated in the second half of the 18th century as a Cossack wintering settlement in Inhulets palanka of the New Sich territory. In the 19th century it belonged to Kherson gubernia and developed as a farming and trading town. In 1938 it attained smt status. Today the town has a brewery and a chicken incubating station.

Shyroke burial site. A *Cimmerian burial ground of the 9th to early 8th century BC near Shyroke, Skadovske raion, Kherson oblast. Excavations in 1961-3 uncovered approx 130 flexed burials pointing south. Grave goods recovered included pottery, adornments, and stone tools.

Shyrovok, Oleksander [Šyrovok] (Shirokov, Aleksandr), b 5 September 1905 in Ivanovo, Russia. Geologist; corresponding member of the AN URSR (now ANU) since 1957. He graduated from the Dnipropetrovske Mining Institute in 1930 and worked there from 1946, becoming professor and department head in 1979. His research involved the elucidation of patterns of coal-vein formation in the major basins of the European part of the USSR, with particular emphasis on the Donetske Basin. His numerous publications include *Bol'shoi Donbass* (The Great Donbas, 1957).

Shyrotsky, Kostiantyn [Šyroc'kyj, Kostjantyn] (Shyrotsky; pseud: Kost, K. Ladyzhenko, K. Sushchynsky), b 7 June 1886 in Vilshanka, Olhopil county, Podilia gubernia, d 13 September 1919 in Bilousivka, Bratslav county, Podilia gubernia. Art historian and community figure. A graduate of the St Petersburg Archeological Institute (1911) and St Petersburg University (1912), he lectured in the university's department of art history and was active in the Ukrainian Hromada in St Petersburg. He devoted himself to the study of Ukrainian and Russian art and architecture and collected Western Ukrainian folk art. He contributed to *Rada*, *Ukrainskaia zhizn'*, and *Zapysky NTSh*. After the February Revolution he was appointed commissioner of Horodenka county in Galicia by the Russian Provisional Government, and in 1918 he organized the UNR Secretariat of Education. He wrote 16 articles

Kostiantyn Shyrotsky

on T. Shevchenko's artworks (1911–14), books on H. Levytsky (1914), the first volume of a history of Ukraine's decorative art (1914, dealing with interior home decoration), and an illustrated guide to Kiev (1917). Under the pseudonym K. Baladyzhenko he and P. Balytsky wrote, in Russian, an illustrated history of Galicia (1915), a book on Bukovyna and its past (1915), and a brief history of the Principality of Galicia (1915).

Shyshaky [Šyšaky]. IV-15. A town smt (1986 pop 5,100) on the Psol River and a raion center in Poltava oblast. The village probably originated in the 14th century. It was first mentioned in historical documents in the 17th century. Under the Hetman state it was a company center of Myrhorod regiment. In the 19th century it belonged to Myrhorod county in Poltava gubernia. Today the town has a cheese, a brick, and a mineral-water bottling factory.

Shyshatsky, Varlaam [Šyšac'kyj], b 1751 in Shyshaky, Poltava region, d 23 July 1820 in Novhorod-Siverskyi. Orthodox churchman. He probably studied at the Kievan Mohyla Academy before taking his monastic vows in 1776. He was prefect and rector of the Pereiaslav College. At the same time he served as hegumen of the Moshnohorskyi and Pereiaslav–St Michael's monasteries. He served as rector of the Novhorod-Siverskyi Seminary (1785–7), overseer of the Holy Spirit Monastery in Vilnius (1787–9), and head of several other monasteries in the Novhorod-Siverskyi region before being consecrated bishop of Zhytomyr in 1795. Subsequently he was bishop of Volhynia and of Mahiliou and Belarus (1805) and archbishop of Mahiliou and Vitsebsk (1808). In these positions he often supported the principle of an autocephalous Ukrainian-Belarusian Orthodox church, independent of the Moscow Patriarchate. During the French army's occupation of Mahiliou in 1812, he became a supporter of Napoleon Bonaparte and praised him in sermons. After the Russian army recaptured the town in 1813, Shyshatsky was defrocked and sentenced to life imprisonment in the Novhorod-Siverskyi Transfiguration Monastery.

Shyshatsky-Ilich, Oleksander [Šyšac'kyj-Ilič], b 1828 in Krasylivka, Kozelets county, Chernihiv gubernia, d 1859 in Chernihiv. Poet and ethnographer. A graduate of the Chernihiv Theological Seminary, he edited the *Chernigovskie gubernskie vedomosti* (1854–9), which printed

much information about Ukrainian folklore and ethnography. His own works include a historical and ethnographic study of Olyshivka (1854), a collection of 'Little Russian' sayings and proverbs (1857), and a two-volume collection of poetry (1856–7).

Serhii Shyshko: *Kiev: Khreshchatyk* (oil, 1973)

Shyshko, Serhii [Šhyško, Serhij], b 25 June 1911 in Novsivka, Nizhen county, Chernihiv gubernia. Painter. He studied at the Kiev State Art Institute (1929–33) under F. Krychevsky and at the Leningrad Institute of Painting, Sculpture, and Architecture (1936–43). Although he paints portraits and still lifes, he is best known for his landscapes, many of which constitute the 'Kiev Suite' begun in 1944. He has also painted series depicting the landscapes of Samarkand (1942), the Carpathians (1947), Crimea (1956), and places connected with T. Shevchenko's life. His work has been shown in numerous exhibitions in Ukraine and abroad and reproduced in three albums (1971, 1977, 1987).

Siabry. A class of peasants in Kievan Rus' and later in the Lithuanian-Ruthenian state who communally farmed land or engaged in other production, such as beekeeping, fishing, or the salt trade. The *siabr* system of ownership and economy is interpreted in different ways by historians. It is mentioned in the missive of Metropolitan K. Smoliatych, who equates the status of *siabry* to that of **izhoi*. In the laws of the Grand Duchy of Lithuania (the Lithuanian Statute of 1529) they are described as participants in peasant husbandry who do not necessarily have the same rights as **landless* peasants. The *siabr* economy expanded rapidly in central and eastern Ukraine in the 16th and 17th centuries, when those regions were colonized, but it was gradually displaced by the rule of hereditary nobles. Vestiges, such as community use of pastures and fields, remained until the early 20th century.

Siadrysty, Mykola [Sjadrystyj], b 1 September 1937 in Kolisnykivka, Kupianka raion, Kharkiv oblast. Master of microscopic miniatures. A graduate of the Kharkiv Agricultural Institute (1960) and the Kharkiv Art School (1961), he has created microscopic bas-relief portraits of T.

Mykola Siadrysty

Shevchenko, S. Krushelnytska, and Dante in cherrystones or thorn-berry stones and watercolor portraits of I. Franko, V. Symonenko, Michelangelo, and E. Hemingway on pear or apple seed sections. He has also produced some of the world's smallest books, including a 0.6-sq-mm version of Shevchenko's *Kobzar*, a synchronous motor 200 times smaller than a poppy seed, and a 3.5-mm-long frigate with 337 details. He is the author of two books, *Chy varto pidkuvaty blokhu?* (Is It Worth Shoeing a Flea?, 1966) and *Tainy mikrotekhniki* (Secrets of Microtechnology, 1969). His unbelievable works have been exhibited around the world.

Siaivo (Aura). A publishing house in Kiev, established in 1913 to publish the journal **Siaivo*. Its first book was M. Vorony's poetry collection *V siaivi mrii* (In the Aura of Dreams, 1913). In 1914 *Siaivo* was closed down in the tsarist crackdown on Ukrainian-language publications after the outbreak of the First World War. Revived in 1918 by P. Kovzhun and M. Semenko, it published several important books of poetry and prose: P. Tychna's *Soniashni klarnety* (Sunny Clarinets, 1918), O. Slisarenko's *Na berezi kastal's'komu* (On the Castalian Shore, 1918), V. Yaroshenko's *Svitotin'* (Lightshadow, 1918), M. Semenko's *Deviat' poem* (Nine Poems, 1918) and *P'iero kokhaie* (Pierrot Loves, 1918), M. Ivchenko's *Shumy vesniani* (Murmurs of Spring, 1919), and H. Zhurba's *Pokhid zhyttia* (The March of Life, 1919). *Siaivo* ceased publishing in 1919, but it was again renewed during the period of the Ukrainization policy (1926–9). In that period it published a series of classic Ukrainian novels, a library of world literature (translations of V. Hugo, U. Sinclair, S. Zweig, and others), a Desheva biblioteka (Inexpensive Library) of Ukrainian literature, a two-volume edition of T. Shevchenko's works, L. Hlibov's poetry, and a 12-volume edition of J. London's works in Ukrainian translation.

Siaivo (Aura). A monthly journal of literature and the arts published in Kiev from January 1913 to September 1914 (a total of 21 issues). It was established on the initiative of its illustrator, P. Kovzhun. The formal editor and publisher was the actor O. Korolchuk, but the actual editor was I. Steshenko. *Siaivo* published articles by prominent cultural figures: V. Krychevsky wrote on architecture; P. Chaika, Ye. Kuzmin, A. Sereda, and O. Sudomora on art; M. Biliashivsky and D. Shcherbakivsky on folk art and ethnography; V. O'Connor-Vilinska, V. Boretsky, and V. Verkhovynets on music; and M. Vorony, M. Sadovsky, I. Steshenko, S. Rusova, and K. Shyrotsky on theater. It also published original literary works by I.

Franko, O. Oles, M. Vorony, M. Rylsky, and others; literary criticism (eg, about the works of V. Vynnychenko, Yu. Fedkovych, and M. Kotsiubynsky); and reproductions of the works of T. Shevchenko, M. Burachek, F. Krasysky, M. Pymonenko, O. Sudomora, M. Paraschuk, F. Balavensky, and other artists. The journal was closed down by the Russian government following the outbreak of the First World War.

Sian dialects. Ukrainian dialects spoken in a narrow belt running along the Sian River from the upper Sian in the south to the Polish dialectal zone in the north and west. Except for a small northeastern section, the Sian dialectal area remained after 1945 within the political borders of Poland. Its speakers were dispersed as a result of postwar 'repatriation' to Soviet Ukraine and the forced resettlement of those left behind in 1947 in western and northern Poland. It is likely that the Sian dialects (and part of the contiguous *Lemko dialects) constituted a prehistoric transitional Ukrainian-Polish dialect, whose speakers in the west (between the Wisłok [Vyslyk] and Sian rivers) became Polonized during the 14th to 19th centuries.

The dialects had the following phonetic traits: (1) retention of the distinction between the ancient *i* and *ы*, though not in the groups *k'i*, *h'i*, *x'i* and *чы*, *шы*, *шы*, *ры* (eg, *Зби́ти* [Standard Ukrainian (SU) *žytyl'* 'to live']; retention of the groups *кы*, *хы*, *хы* in the south and north, but their change into *k'e*, *h'e*, *x'e* when stressed, and into *k'i*, *h'i*, *x'i* when unstressed in the center; (2) evolution of the groups *pě*, *bě*, *vě*, *mě* into *pji*, *bji*, *vji*, *mn'i* (eg, *бјі́лјј*, *mn'і́ра* [SU *bilyj*, *míra*] 'white, measure'); (3) tense pronunciation of stressed *e* and raised pronunciation of unstressed *e*, *o* as *i*, *u* (eg, *вє́рх*, *му́дї́с'ї* [SU *verx*, *molodycja*] 'top, young woman'), and lowered pronunciation of stressed *y*, *i* (eg, *бек* [SU *byk*] 'bull'); (4) lowered pronunciation of *e* as *a* before and after *r* and after *č*, *ž*, *š*, *j* (eg, *сарадї́на*, *шасты́ј* [SU *saredyna*, *šostyj*] 'middle, sixth'); (5) retention in certain dialects of 'u from *ě* (eg, *т'ї́тка* [SU *títka*] 'aunt'), and of *o*, *ou*, *ы*, *y* from *ō* (eg, *мї́ст* [SU *míst*] 'bridge'); (6) retention of 'a in the north and south, but its alteration into 'e in the middle of the zone (and 'i when unstressed [eg, *му́дї́с'ї* (SU *molodyci*) 'young women']; (7) labialization of the group *av* into *ou* (eg, *стоў* [SU *stav*] 'he stood'); (8) semisoft *l* before *e*, *i* (eg, *бу́лі* [SU *buly*] 'they were'); (9) change of *l* into *ü* after a vowel at the end of a syllable (eg, *ви́ü* [SU *vil*] 'ox'); (10) absence of epenthetic *l'* after labials in verb forms (eg, *ломі́ю* [SU *lomljú*] 'am breaking', but *зі́мі'є* [SU *zímja*] 'land'); (11) hardening of the group *r'u* (and sporadically *r'e* from *r'a*) (eg, *зү́рус'ї*, *пурэдок* [SU *žurjusja*, *porjadok*] 'I worry, order'); (12) hardening of -*t'*, -*s'*, -*c'* at the ends of words and of the suffixes -*s'k-*, -*c'k-*, -*ycju* (eg, *ході́т*, *вє́с* [fs'on in the north], *хло́пїс*, *рубї́тницю* [SU *xodyt'*, *ves'*, *xlópec'*, *robitnyčju*] 'he walks, entire, boy, worker [fem acc]'); (13) absence of lengthened consonants in nouns of the type *vis'il'ě* (SU *vesillja*) 'wedding'; (14) prothetic *v-ü-*, *j-*, and (rarely) *h-* before initial vowels (eg, *вóку*, *хóс'їн*, *ї́нцї́й* [SU *óko*, *ósin'*, *ínsyj*] 'eye, autumn, other'); (15) the changes *vn*, *bn* > *mn*, *st'* > *s'c'*, *n'k* > *jk* (eg, *мнук*, *дрї́мнї́й*, *s'c'ї́на*, *малє́к'ї́й* [SU *vnuk*, *dribnyj*, *stina*, *malen'kyj*] 'grandson, petty, wall, little'); (16) postpalatal *ŋ* in the groups *ŋk*, *ŋg* (eg, *рї́нїка* 'skillet'); (17) progressive assimilation of the groups *žk*, *žc'* as *žg*, *ždz'* (eg, *кнї́žга*, *кнї́žдз'ї* [SU *knyžka*, *knyžci*] 'book' nom and loc); (18) palatalization of consonantal groups before *i* (eg, *z'l'is*, *d'vi* [SU *zliz*, *dvi*] 'he got off, two'); and (19) phonetics between words of the type *d'it*, *mal'izmu* [SU *did*, *my*

maly] 'grandfather, we had', with changes of the preposition/prefix *v* into *f/x* before unvoiced consonants and into *h* before voiced consonants (eg, *hdóma, xpaü* [SU *vdóma, vpaü*] 'at home, he fell').

In conjugation, the dialects had features such as endings of the type *kós'c'om, tom mom rukóm/toü moü rukóü, f silü, pal'c'íma, pu pul'óx* [SU *kístju, cijéju, mojúju rukóju, v self, päl'cjamy, po poljáx*] 'with a bone, with my hand, in the village, with the fingers, on fields'; separate dual forms (eg, *d'vi ruc'f* [SU *dvi rukýj*] 'two hands'); use of nominative instead of vocative singular forms, except in personal names with zero endings (eg, *mam* [SU *mamo*] 'mother!'); uncontracted adjectival forms (eg, *ládnuji póli* [SU *harne pole*] 'fine field') and widespread use of soft-type adjectives (eg, *rid'n'ij* [SU *ridnyj*] 'native'); and enclitic pronominal forms (eg, *mi, t'i, ti, s'i, si, ji, ju/n'u* [SU *menemeni, tebe, tobi, sebe, sobi, jijij/jij, jijij*] 'myself/to me, you, to you, oneself, to oneself, her/to her, her [acc']').

In conjugation, the dialects had infinitive forms such as *mučýj, pičýj* (SU *mohtýj, pektýj*) 'to be able, to bake'; present-tense forms such as *hádam, -aš, -at* (SU *hovorju, -ryš, -rjat'*) 'I/you/they speak'; past-tense forms such as *pisáújim, -is, -álam, -álas, -álzmu, -álisti* (SU *ia pysáv, ty pysáv, ja pysála, ty pysála, my pysály, vy pysály*) 'I/you/I (fem)/you (fem)/we/you (pl) wrote'; future-tense forms such as *búdu písáú, búdu písála* (SU *budu pysaty*) 'I (masc, fem) will write'; conditional forms such as *xudíü bým, xudíü býs, xudíli býzmu, xudíli býsti* (SU *ja b xodýv, ty b xodýv, my b xodýly, vy b xodýly*) 'I/you sing/we/you (pl) would go'; and imperative forms such as *xot', xód'mu, xót'ti* (SU *xodý, xodímo, xodít'*) 'you/let us/you (pl) go'.

Other traits included adverbs ending in *-i* (eg, *lad'n'i* [SU *harno*] 'nicely'); the suffix *-isku* (eg, *zútnisku* [SU *žytnycja*] 'rye store'); the suffixes *-ê, -'êti* added to the surnames of unmarried girls (eg, *Kuval'ê* [SU *Kovalivna*] 'Koval's daughter'); the prefixes *na-* (in superlatives, eg, *nalad'n'íššyj* [SU *najharnišyj*] 'most beautiful') and *pry-* (instead of *pro-*, eg, *pryrok* [SU *prorok*] 'prophet'); prepositions and conjunctions such as *biz, bėstu, žy, žyby* (SU *bez/kriz', prote, ščo, ščob*) 'without/through, however, that, so that'; and characteristic stresses and lexemes, many of which are Polonisms, particularly calques and, along the linguistic border, phonetic substitutions.

Sian Lowland (Nadsianska kotlovyna). A triangle-shaped lowland along the Sian River situated between the Little Polish Upland, the Carpathian foothills, and the Opilia Upland and Roztochia. It merges with the Dniester Lowland in the southeast. With the exception of its southeastern tip, located in Ukraine, the lowland is situated in present-day Poland. The western section of the formation, including the Sian region and the southern Kholm region, has historically been inhabited by Ukrainians.

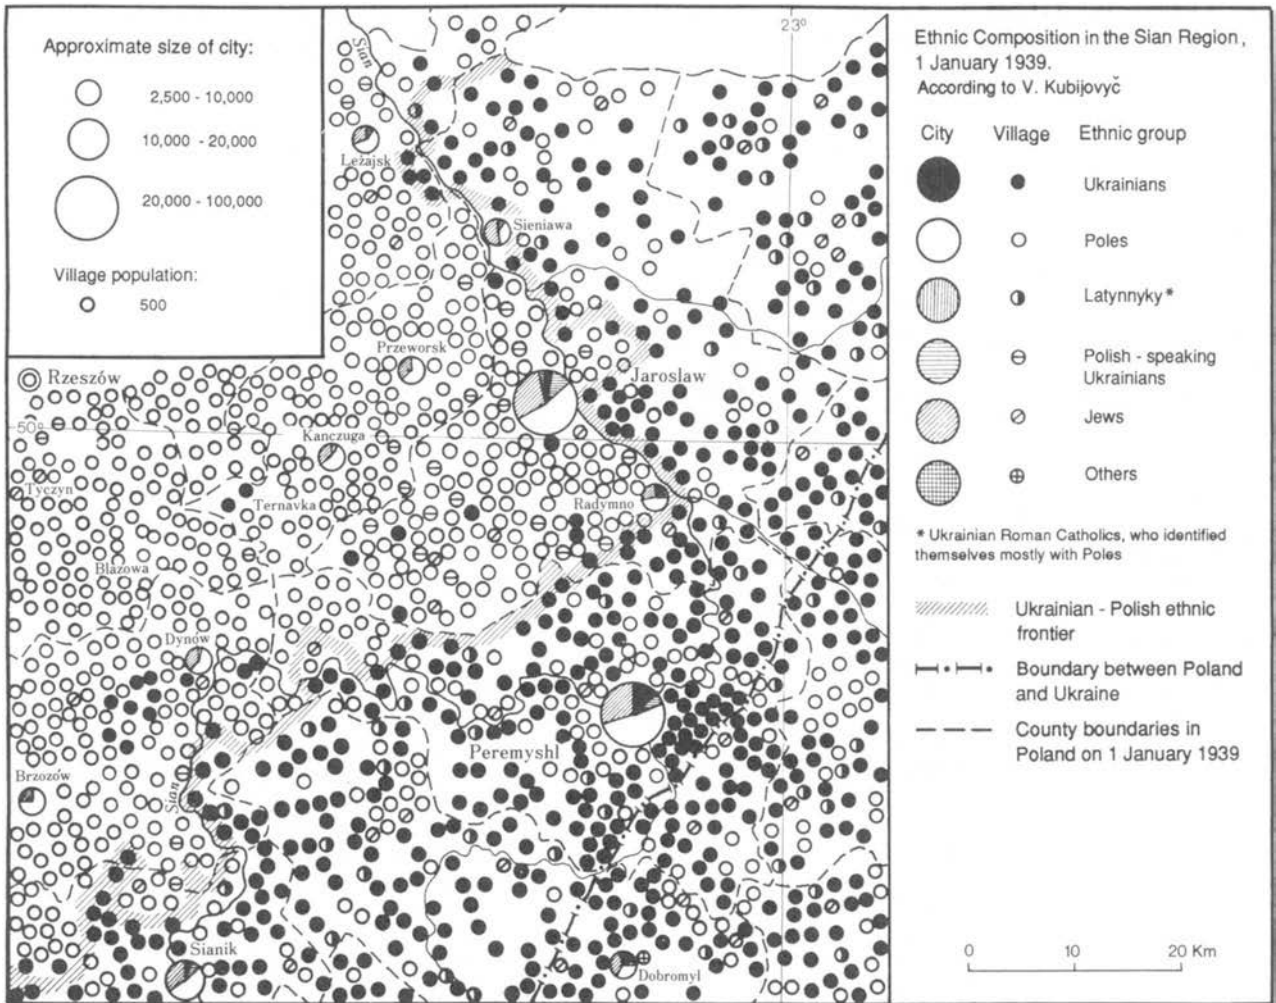

The Sian Lowland is a tectonic depression along the Carpathian foothills filled in by Miocene strata (up to 300 m thick) covered with glacial and alluvial deposits. It consists of elevated plateaus (the tallest being Tarnohorod) dissected by the valleys of rivers, such as the Tanev, the

Liubachivka, the Shklo, and the Vyshnia. Loess can be found in parts of the plateaus, and dunes are situated in some of its sandy reaches. A large proportion of the lowland's forests have been cleared out, although pine forests mixed with firs and birches occur in the region's sandy areas, and fir forests mixed with hornbeams and maples grow in its heavier soils. The lowland has a population density of 80 persons/sq km; the population is predominantly (75 percent) rural.

Sian River [Sjan] (Polish: San). The largest (right-bank) Carpathian tributary of the Vistula River. It is 444 km long and drains a basin area of 16,730 sq km. It flows quickly near its headwaters in the Beskyds. The cities of Peremyshl and Jarosław are situated on it. Although only the source of the river is located in Ukraine itself, the Sian runs for 50 km along the Polish-Ukrainian border and then continues through a large section of Ukrainian ethnic territory in Poland, notably the *Sian region.

Sian region [Sjan] (Posiannia, also Zasiannia). A name occasionally used to designate the area situated approx along both sides of the Sian River north of the Lemko region and the city of Sianik along the border between Ukrainian and Polish ethnic territory. The Sian region includes sections of the Low and Middle Beskyds, the Carpathian foothills, and the Sian Lowland. Its major centers include the cities of *Peremyshl, *Jarosław, and *Sianik as well as Brzozów (Bereziv), Radymno, Przeworsk (Perevorsk), and Leżajsk. It was part of the Kievan Rus' state and the Galician-Volhynian principality before coming under Polish control, as part of the Rus' voivodeship, in 1340–1772. In 1772–1918 the Sian region was part of the Austrian Empire, in 1918–19, part of the Western Ukrainian National Republic, and in 1923–39, part of the Polish state. In 1939 the region was divided between Germany (in the Generalgouvernement) and the Soviet Union along the Sian River, and then in 1941 occupied totally by the Germans. It was subsequently taken over by the Soviet Union and then ceded once more to Poland in a treaty signed on 16 August 1945. Only a tiny corner of the region, around Peremyshl, was incorporated into the Ukrainian SSR.

Starting in the 15th century the Sian region was subjected to extensive Polonization with the colonization of lands by Polish settlers, the Polonization of incoming German settlers, and the common switch of religious and linguistic affiliation among the local population to the Roman Catholic rite and the Polish language. Over time the area's Ukrainian population became a definite minority, and the boundary between Polish and Ukrainian ethnic territory was rolled back approx 50 km to the east, from near the Vistula River to the Sian. Only a few pockets of Ukrainians remain in those easternmost reaches, the furthest afield being in the village of Ternavka, in the Przeworsk region. Other villages in those eastern areas generally had an ethnically mixed population in which the Ukrainians (commonly known as **zamishantsi*) generally spoke Polish even though they understood the Ukrainian language and were adherents of the Greek Catholic church. It is estimated that in 1939 approx 40,000 Ukrainians lived in the Sian region west of the Polish-Ukrainian border. That number included about 50 per cent of the Ukrainian population that used Polish as its home language, but not the *zamishantsi*.

SIAN REGION

After the establishment of postwar boundaries in 1945-6, most of the Ukrainian population in the Sian region was resettled in the Ukrainian SSR. A smaller proportion was resettled in western or northern Poland, and only a tiny rump of Ukrainians was left in and around Peremyshl. The only completely Ukrainian settlement remaining in the region was the village of Kalnykiv, east of Radymno.

V. Kubijovyč

Sianik or Sianok [Sjanik or Sjanok] (Polish: Sanok). IV-3. A city (1989 pop 39,400) on the Sian River and a county center in Krosno voivodeship, Poland. It was first mentioned, as a fortified town of Kievan Rus', in the Hypatian Chronicle under the year 1150. Later it was part of Pere-myshl and then Galicia principalities. It was granted the rights of *Magdeburg law by Yuri II Boleslav in 1339, and developed into an important trade center. In the mid-14th century Sianik was annexed by Poland and turned into the capital of Sianik land in Rus' voivodeship. In 1550, during the course of Catholic persecution of the Orthodox, St Demetrius's Church was closed. Toward the end of the 16th century the town declined. With the partition of Poland in 1772, it was transferred to Austria, and became a county center of the Galician crownland. In the

second half of the 19th century the town grew as a railway link and attracted industry. Its population increased from 2,500 at mid-century to 5,100 in 1880, 9,000 in 1900, and 12,100 in 1921. At the same time Ukrainian residents of Sianik were subjected to strong Polonization pressures.

Ukrainian peasant homes in the open-air museum in Sianik

From 1880 to 1900 the Ukrainian population fell from 18 percent to 13.5 percent. In the interwar period the town remained a center of Ukrainian cultural life in the eastern Lemko region. In 1930 the *Lemkivshchyna Museum was established there, and in 1936 Sianik was chosen as the seat of the *Lemko Apostolic Administration. At the beginning of 1939, 1,800 (11.5 percent) of the town's residents were Ukrainian, 8,700 (56 percent) were Polish, and 5,100 (32.5 percent) were Jewish. Under the German occupation (1939–44) the Ukrainian population increased to 3,000, and Ukrainian cultural life revived. A Ukrainian secondary school was set up, and the Ukrainian Relief Committee, under P. Bilaniuk, was active. In 1946–7, during *Operation Wisła, Ukrainians were deported from the town, and all signs of community life died out.

Today Sianik is an industrial city. Its regional museum contains many Ukrainian monuments, including some icons from the former Lemkivshchyna Museum. The open-air Museum of Folk Architecture (est 1958) contains many exhibits by Boiko, Lemko, and other Ukrainian folk artists. Its periodical (published from 1969) often deals with Ukrainian folklore. The city's chief architectural monuments are the castle (built in 1523–48, renovated in 1672–7 and 1952–3), the Franciscan church and monastery (17th and 19th centuries), and a church in the classical style (1784–9). An Orthodox parish and a branch of the Ukrainian Social and Cultural Society have been set up.

Siberia. A large portion of Russia's territory in Asia, stretching from the Arctic Ocean south to Kazakhstan and Mongolia (3,500 km), and from the Urals east to the Pacific watershed (7,000 km). The region has an area of about 10 million sq km and a 1989 population of 26 million. In pre-Soviet usage Siberia included the *Far East and had an area of 12.5 million sq km. Its southern border with the so-called Steppe krai coincided largely with the present border, except that Omsk county belonged to the Steppe krai.

Physical features. The main geomorphological regions of Siberia are the West Siberian Lowland (a huge plain of about 2 million sq km) and its southern continuation, the South Siberian Lowland; the Central Siberian Plateau, between the Yenisei and Lena rivers (average altitude 500–700 m); the mountains of southern Siberia (Altai, Saian, Yablonovyi, and Stanovoi ranges); and the mountains of northeastern Siberia (Verkhoiansk, Cherskii, and Momskii ranges). Siberia is rich in natural resources: it had 75 percent of the former USSR coal deposits, petroleum and natural gas, iron ore, rare (gold) and nonferrous metals, and diamonds.

The climate of Siberia is continental and for the most part moderately cold: subpolar and polar in the north and moderately warm and dry in the southwest. The average annual temperature is almost everywhere below 0°C (–15 to –18°C in the northeast); the average July temperature is 2 to 5°C in the extreme north and 22°C in the southwest; and the average January temperature is –16°C in the southwest and –50°C in the northeast. The world's lowest temperatures, adjusted for elevation, were recorded at Verkhoiansk (–68°C) and Oimiakon (–71°C). Precipitation (coming mostly in the summer) ranges from 150–250 mm

in the northeast to 500–530 mm in the west and reaches 2 m in the mountains. Snow cover lasts 5 to 10 months; much of the area is covered by permafrost. The dense river network empties mostly into the Arctic Ocean. The largest rivers are the Ob, Yenisei, and Lena. Ice-free for 5 to 8 months of the year, they are important transportation routes and sources of power.

Ukrainians in Siberia. Information about Ukrainians in Siberia before the close of the 19th century, which marks the onset of mass peasant colonization, is rather incidental and inaccurate. Ukrainians made a significant contribution to the economic and cultural development of the region. There were Ukrainians among the Russian traders and state servitors who colonized Siberia and the Far East in the 17th and 18th centuries and then Kamchatka and Alaska. There were many Ukrainians among the exiles from various social strata who were banished by the authorities to Siberia. In 1642 'Cherkes' (as Ukrainians were known in Muscovy in the 17th century) families from *Slobidska Ukraine (188 people altogether) were deported to the Lena River, where they arrived only in 1646–7. This deportation was followed by others in 1646 and 1649. Even more Ukrainians were deported in the second half of the 17th century. Most of them were political exiles – opponents of Moscow's policy in Ukraine or persons suspected of 'vacillation' or treason. Among them were the relatives and supporters of Hetman I. *Vyhovsky, the opponents of the Moscow appointee I. Briukhovetsky (1660s), Hetman D. *Mnohohrishny and his relatives (1670s), and Hetman I. *Samoilovych, with his son Yakiv and nephew Mykhailo (1680s). After I. Mazepa's defeat at Poltava (1709) many 'Mazepists,' such as General Judge V. Chuikevych, Col H. Novytsky, and the Myrovych family, ended up in Siberia. In 1723 Mazepa's nephew, A. *Voinarovsky, was exiled to Yakutsk. In the 1760s participants in the Koliivshchyna rebellion were condemned to Siberian penal colonies, and in the 1770s, after the destruction of the Zaporozhian Sich, some of its officers were exiled to Siberia. In the 19th century Ukrainian revolutionaries (the *Decembrists), populists (A. Krasovsky, S. Bohomolets, S. Kovalyk, Ye. Kovalsky, and Ya. Stefanovych), Social Democrats, and Bolsheviks (H. Petrovsky and M. Skrypnik) were exiled there by court sentence or administrative order. Participants in peasant uprisings, such as U. *Karmaliuk, were deported there as convicts or so-called free settlers. Some Ukrainian civic and cultural figures suspected of 'separatism' by the authorities were transferred to government positions in Siberia. Many Ukrainians served in the Siberian Cossack hosts.

Ukrainians played an important role in the economic, administrative, and cultural life of Siberia. They were found also in the higher administrative ranks: Gen M. Sulyma, the governor general of East (1833–4) and West (1834–6) Siberia, Gen P. Kaptsevych, the governor general of Tobolsk and Tomsk gubernias (1822–6), and several other governors of Siberian gubernias were of Ukrainian origin. They were also prominent in the church hierarchy of Siberia: F. *Leshchynsky (1702–21), I. *Maksymovych (1711–15), A. Stakhovsky (1721–40), A. *Matsiievych (1741–2), and P. Koniusevych (1758–68) were metropolitans of Tobolsk and Siberia, and I. Kulchitsky (1727–31), I. Nerunovych (1732–47), and S. Krystalsky (1753–71) were bishops of Irkutsk. They surrounded themselves with clergy, mostly of Ukrainian origin, who contributed

significantly to the cultural development of Siberia. Some of them (notably H. Novytsky) did research on Siberia and the Far East.

The mass immigration of Ukrainian peasants to Siberia began in the late 1880s. In 1885–1914, 1,742,000 people (almost all of them Ukrainians) from nine Ukrainian gubernias and over 2,000,000 from all Ukrainian territories emigrated beyond the Urals. Of these, almost 35 percent settled in Siberia; the remaining settled mostly in the Steppe krai (now Kazakhstan) and the Far East. According to the 1897 census there were 142,000 Ukrainians in Siberia, 120,000 of them in the western regions. The real figure was unquestionably much higher. The proportion of Ukrainians in the population was highest in the southwestern part of Tomsk and Tobolsk gubernias. This sort of concentration reflected a desire by the Ukrainians to settle near their own people and in a forest-steppe or steppe environment with which they were familiar. During and immediately after the First World War there was little immigration to Siberia from Ukraine. Hence, the Ukrainian population of Siberia in 1914 was only slightly lower than in the 1926 census. This figure was about 1 million, or 12 percent of the total population. Since in fact about 19 percent of the inhabitants of Siberia originated from Ukraine, the actual figure was probably higher.

1917–20. The February Revolution in Russia sparked a vigorous political movement in Siberia. Ukrainians created various organizations: the Ukrainian Free Community in Omsk, the Regional Council in Tomsk, the Altai Gubernia Council in Kainsk, and other associations in Slavgorod, Kurgan, and Biisk. Branches of Kievan relief institutions for deportees from Galicia and Bukovyna and captured Ukrainian soldiers of the Austrian army were set up in Omsk and other towns. Some Ukrainian POWs became active in Ukrainian communities in Siberia. Ukrainian papers appeared, among them *Ukrains'kyi holos* in Omsk and *Ukrains'ke slovo* in Tomsk. At the same time military organizations were formed, and at the end of 1917 several separate Ukrainian units were set up, including the Sahaidachny Battalion in Omsk and a battalion in Irkutsk. At the beginning of August 1917 the First Ukrainian Congress of Siberia took place in Omsk and established the Supreme Ukrainian Council of Siberia. Headed by H. Kontsevych (vice-president, M. Novoselsky), the council sent a delegate to the Central Rada in Kiev.

In early October 1917 the democratic parties of Siberia held a conference which proclaimed Siberia's autonomy and convened the Extraordinary Congress of Siberia in Tomsk on 6–15 December 1917. The congress set up a provisional government consisting of the Siberian Provisional Oblast Duma (which included five Ukrainian deputies), an oblast council (responsible to the Duma), and an executive body (which included a Ukrainian member named Sulyma). The congress greeted the Central Rada in Kiev on the proclamation of the Third Universal, and the oblast soviet refused (7 January 1918) to recognize the Bolshevik government in Petrograd. At the end of January 1918 the Tomsk soviet of workers and soldiers disbanded the Siberian oblast council, but the provisional government continued to operate. Thus, there were two governments in Siberia. The position of the oblast council and the Provisional Autonomous Government was bolstered by the landing of Japanese and British troops at Vladivostok in April, the offensive of the Czechoslovak Corps against the

Bolsheviks in May, and the landing of American troops in August 1918.

The Second Siberian All-Ukrainian Conference took place in Omsk on 11–13 August 1918 while these events unfolded. It was an important milestone in the history of Ukrainians in Siberia. It demanded that the Siberian oblast дума proclaim the independence of Siberia, give self-government to the various nationalities (including Ukrainians), and form a Siberian army for the country's defense. These hopes were quickly dashed. The Whites had entered the military contest in Siberia and had forced the abdication of the democratic Provisional Autonomous Government in November 1918 to the central Russian Provisional Government (later headed by Admiral A. *Kolchak). This development represented a major setback to the Ukrainian movement in Siberia. A second major blow for the Ukrainians occurred in late 1919, when the Sahaidachny Battalion was dissolved after suffering heavy casualties against the Bolsheviks on the Ural front. This disaster was followed in January 1920 by the defeat of Kolchak's forces by Bolshevik forces, who then advanced and had taken control of the entire Far East by November 1920.

1920s. The population of Siberia remained fairly stable during and after the war, with relatively few casualties during the revolution but little influx, since the flow of immigrants from west of the Urals was interrupted until the end of the civil war. Immigration increased somewhat after 1924, with a planned resettlement program. As a result the population of Siberia grew only modestly, from about 10 million at the beginning of 1915 to about 11 million (including Ishim and Kurgan okrugs, which belonged officially to Ural krai) by the end of 1926. The percentage of Russians, Ukrainians, and Belarusians together was practically the same (86.9) as in 1911 (86.7); the indigenous population declined from 10.6 to 7.5 percent.

Ukrainians lived mainly in large groups on the arable lands of southwestern Siberia, which was part of the so-called Central Asian Steppe krai. In the Siberian part of this Steppe krai, consisting of almost the entire Slavgorod and parts of Omsk and Kamensk okrugs, Ukrainians formed a majority of the population: of 580,000 inhabitants, 310,000 (53.4 percent) were Ukrainians, 200,000 (34 percent) were Russians, and 25,000 (4.3 percent) were indigenous peoples. In the 17 raions of the Siberian part of the Central Asian Steppe krai Ukrainians formed a majority in 12. Another 400,000 Ukrainians lived in the part of west Siberia where Russians formed a majority. There they accounted for 10 to 40 percent of the population and lived usually in separate villages.

Most of the 115,000 Ukrainians in east Siberia settled on pockets of fertile chernozem soils. According to the 1926 census they constituted 8.8 percent of the total rural population. Their largest urban concentrations in Siberia were in Omsk (9,700), Slavgorod (4,100), Krasnoarsk (1,600), Irkutsk (1,300) and Tomsk (1,200). Ukrainians accounted for a notably high percentage of the population in Slavgorod and Omsk okrugs.

Since the 1930s. Siberian development played a key role in the long-range economic planning of the Soviet Union with the institution of *five-year plans. The region was to be developed for the exploitation of its industrial natural resources. Starting in the 1930s a number of measures were taken to facilitate these changes: new energy

SIBERIA

sources (such as the Kuznetsk Coal Basin) were developed; a second Siberian railway line was built; and mining and metallurgical facilities were built in Norilsk in order to obtain the strategic nickel and stimulate development in the far north. Millions of victims of Stalin's terror, imprisoned in Siberian forced-labor camps, worked and died in the process. Some impressive gains were made in industry; they are reflected in the growth of the urban population from 1.0 to 4.4 million (from 9.2 to 31.3 percent of the total). In the same period agriculture declined, largely as a result of the collectivization campaign.

During the Second World War Siberia's economy grew at a tremendous pace as a massive effort was made to supply the Soviet Union's military demands. About one million people and hundreds of industrial plants (mainly from Ukraine) were evacuated there; hundreds of new factories were built; and coal mining (to replace the Donets Basin deposits), heavy industry, and the chemical industry were expanded. Gross industrial production

almost doubled in 1940-5. In the postwar period the region has continued to grow, with special emphasis placed on heavy industry, machine building, coal and oil extraction, the chemical industry, and hydroelectric power. Agricultural production has also grown, mostly as a result of an increase in the area sown.

As the Siberian economy expanded, its population grew through natural increase and as a result of immigration from the western regions of the Union. In the 1950s, because of hydroelectric power dam construction and the development of resource-based industries, population growth was more rapid in east than in west Siberia. By 1960-73 the emigration of people from Siberia, particularly west Siberia, was greater than the immigration thereto. In the 1960s the population exchange between Ukraine and Siberia proved to be in Ukraine's favor for the first time: in 1968-9, 50,000 Ukrainians emigrated to Siberia, and 68,000 Siberians came to Ukraine (most of them returnees). Ukrainian workers continue to take temporary

(two- to three-year) jobs in Siberia, particularly on major projects in east Siberia (the Baikal-Amur Mainline) and the northern districts of west Siberia (the oil and gas fields), because wages in Siberia are two to three times higher than in Ukraine.

The national composition of Siberia has changed considerably in the last 50 years. From the end of the 1920s there has been a steady flow of Ukrainians into Siberia: deportees and prisoners of concentration camps (where Ukrainians constituted a majority), settlers of virgin steppes in the 1950s, and voluntary workers attracted by better living conditions and a more open political atmosphere. In the 1940s between 300,000 and 400,000 Germans from the Volga region and Ukraine were resettled in Siberia. The 1959 and 1970 censuses provide nationality figures only for separate oblasts and not for Siberia as a whole, and tend to underestimate the number of Ukrainians and other non-Russian Europeans. Siberia's national composition according to the 1979 census is shown in table 1.

TABLE 1
National composition of Siberia (1979 census)

| Nationality | Population (in 1,000s) | Percent |
|-------------|---------------------------|---------|
| Ukrainian | 682 | 2.9 |
| Russian | 19,972 | 84.8 |
| German | 460 | 2.0 |
| Tatar | 445 | 1.9 |
| Buriat | 128 | 0.5 |
| Yakut | 314 | 1.3 |
| Other | 1,558 | 6.6 |
| Total | 23,559 | 100.0 |

Between 1926 and 1959 the number of Ukrainians and indigenous peoples declined in absolute and relative terms, and the number of Russians increased. The group called 'others' grew, mainly because of the influx of Germans. In the 1960s the number of Ukrainians and other European non-Russian people continued to decline (in part because of the Soviet regime's policy of Russification), but the absolute and relative numbers of indigenous people increased, mostly because of their high birth rate (table 2).

The distribution of Ukrainians in Siberia has undergone great changes, according to the Soviet censuses. Their numbers in west Siberia fell dramatically, from 738,000 (9.8 percent of the population) in 1926 to 463,000 (3.8

TABLE 2
Changes in national composition of Siberia, 1926-1970

| Nationality | 1926 | | 1959 | | 1970 | |
|-------------|--------|-------|--------|-------|--------|-------|
| | 1,000s | % | 1,000s | % | 1,000s | % |
| Ukrainian | 853 | 7.8 | 692 | 3.6 | 580 | 2.7 |
| Russian | 8,304 | 76.2 | 16,075 | 83.6 | 18,121 | 85.1 |
| Belarusian | 323 | 3.0 | 139 | 0.7 | 141 | 0.6 |
| Indigenous | 841 | 7.7 | 1,062 | 5.6 | 1,455 | 6.8 |
| Other | 586 | 5.3 | 1,244 | 6.5 | 1,027 | 4.8 |
| Total | 10,907 | 100.0 | 19,212 | 100.0 | 21,324 | 100.0 |

percent) in 1959 and 360,000 (2.7 percent) in 1970, and then rose, with new immigrants, to 387,000 (3.0 percent) in 1979; the number of Ukrainians in east Siberia grew from 115,000 (3.4 percent) in 1926 to 229,000 (3.3 percent) in 1959, then fell to 220,000 (2.7 percent) in 1970, and rose again to 227,000 (2.8 percent) in 1979. The number of Ukrainians declined mainly in southwestern Siberia, where in the 1920s they accounted for one-third or more of the population (in the part that belonged to the Central Asian Steppe krai). Their numbers increased in east Siberia, however, particularly in the far north. In the Yakutsk ASSR, for example, Ukrainians increased from 100 (0.03 percent) in 1926 to 1,200 (0.2 percent) in 1959, 20,300 (3.1 percent) in 1970, and 46,300 (5.4 percent) in 1979. By contrast, the number and proportion of Ukrainians in Omsk oblast in 1979 was only 103,800 (5.3 percent), a decline from 104,600 (5.8 percent) in 1970, 128,000 (7.8 percent) in 1959, and 166,000 (22.2 percent) in 1926 (within the present Omsk oblast borders).

The figures on national composition do not coincide with the figures on language use, because increasingly the non-Russian immigrants and their descendants have adopted Russian. In the 1959 census 54 percent of Ukrainians in Siberia listed Ukrainian as their mother tongue, compared with 49.3 percent in 1979. In 1979 only 85,000 Ukrainians (12 percent) spoke Ukrainian fluently. Linguistic Russification is higher in those regions where Ukrainians settled at the turn of the century, and lower in areas of recent settlement, such as east Siberia and the far north. Soviet statistics on nationality and language were not entirely reliable. It is probable that there are over 2 million Siberian inhabitants of Ukrainian origin. The long-term Russification of Ukrainians in Siberia has been facilitated by urbanization and the mixing of different nationalities in the state farms. A high percentage of Ukrainians have intermarried. At the same time there are no Ukrainian schools (at the beginning of the 1930s they operated briefly in west Siberia) and no local Ukrainian press or books. The other peoples of European origin (except for the Germans) have been subjected to the same kind of Russification. Russification, however, has made little headway among the more numerous of the indigenous peoples who have had their own autonomous republics or oblasts.

Sich. A mass physical-education and fire-fighting organization that was active in Galicia from 1900 to 1930 and spread from there to Bukovyna, Transcarpathia, and

Officers of the Sich society in Lviv county

Ukrainian communities abroad. Beyond its immediate practical purpose, it strove to promote national consciousness and to raise the educational and cultural level of the peasantry and working class. Organized by leading members of the *Ukrainian Radical party, its ideology was secular and somewhat anticlerical.

The first Sich society was founded by K. *Trylovsky in Zavallia, Sniatyn county, in May 1900. In the next few years similar societies arose in Kolomyia and Horodenka counties, and then in other counties of Galicia and Bukovyna. Local village and town societies were grouped first into county organizations. A central association for all of Galicia was formed in Stanyславiv in 1908. Its head office was located in Kolomyia. The chief executive body, the Supreme Sich Committee, consisted of Trylovsky (president), I. Sanduliak (vice-president), I. Chuprei (secretary), and M. Lahodynsky (treasurer). In 1912 it was renamed the Ukrainian Sich Union (USU), and its office was moved to Lviv. USU executive members were Trylovsky (general otaman), Ya. Vesolovsky (general *osaul*), M. Balytsky (secretary), S. Vynnykiv (general treasurer), D. Katamai (general quartermaster), and F. Kalynovych (general *chetar*). In addition to those already named, the key organizers were A. Kuzmych, Yu. Solomiichuk-Yuzenchuk, P. Shekeryk-Donykiv, A. Chaikovsky, R. Stavnychy, L. Lepky, R. Dashkevych, H. Nychka, V. Hurkevych, V. Lysy, V. Bemko, D. Vitovsky, S. Ripetsky, M. Uhryn-Bezhrishny, O. Demchuk, M. Khrobak, and O. Semeniuk. The number of local societies increased steadily; by 1913 there were over 900 branches, with a combined membership of 80,000. Sich members wore the local folk costume, a crimson sash over the shoulder inscribed with the wearer's place-name, and a hat decorated with a red feather and a star-shaped badge. From 1910 a special uniform was worn by members of urban and some rural branches. Each member carried a long-handled wooden Hutsul ax. Village and county branches had their own flags.

The Sich societies held annual county and, later, province-wide congresses. Their program included a parade, choreographed exercises, and a concert. The first congress was held in Kolomyia in 1902. Larger ones took place in Stanyславiv in 1911 and Sniatyn in 1912. The largest, known as the Shevchenko assembly, was held in June 1914 in Lviv. Approx 12,000 members of the Sich, Sokil,

and Ukrainian Sich Riflemen's societies, the Plast scouting association, and sports clubs took part, and Czech, Croatian, and Slovenian Sokol and other physical education organizations sent observers.

After Trylovsky founded the *Ukrainian Sich Riflemen (USS) society in March 1913, a riflemen's section, chaired by D. Katamai, was set up in the USU to train young men in the military arts. Eventually the section broke away from the USU and formed separate Sich Riflemen's units (96 in 1914). Their field exercises were conducted according to O. Demchuk and O. Semeniuk's infantryman's manual (1914). In August 1914 the USS Legion within the Austrian army was formed out of volunteers belonging to the USS, USU, and Sokil societies.

To popularize and promote the Sich movement, Trylovsky and Chuprei edited and published songbooks; annual almanacs (11 by 1914); magazines, such as the monthly **Zoria* (1902–3) and the biweekly *Khlops'ka pravda* (1903, 1909) in Kolomyia; and the official Sich organ **Sichovi visty* (1912–14, 1922–4) in Lviv.

After the First World War, the Sich societies resumed their activities in many localities of Galicia, until the Polish authorities prohibited them, in 1924 (the last local society, in Horbachi near Lviv, was closed down in 1930). Their restricted physical-education and sports program was continued by branches of the *Luh society.

In Bukovyna the first Sich society was founded in 1903 in Kitsman by S. Yarychevsky and O. Popovych. The central body, the Union of Siches, was set up in 1904 in Chernivtsi. The presidents were Ye. Pihuliak, T. Halip, and R. Siretsky; other leading members were I. Popovych, H. Hordy, Yu. Lysan, L. Yasinchuk, and D. Rusnak. A pan-Bukovynian Sich assembly took place in Chernivtsi in 1912. By then there were 112 local branches, with a combined membership of 9,000. Under the interwar Rumanian occupation the societies were banned.

In Russian-ruled Ukraine, community leaders followed the development of the Sich movement in Galicia with great interest, but were not permitted to set up similar societies. After the 1917 Revolution they established a Sich society in Kiev, and its statute was approved in 1918 by the Ukrainian government. In February 1919 Trylovsky and O. Andriievsky organized the Supreme Sich Committee in Vinnytsia, and in October 1919 P. Shekeryk-Donykiv and A. Shmigelsky formed a Sich society in Kamianets-Podilskyi. Its membership grew to 300, but the Soviet occupation of Podilia ended all efforts to build a Sich network in the region.

In Transcarpathia a Sich Committee was formed in 1920 in Uzhhorod at the initiative of Trylovsky. That year, D. and V. Klempush founded the first Transcarpathian Sich society in Yasinia. In 1938–9 the *Carpathian Sich grew out of the Transcarpathian Sich movement.

In the United States and Canada, the Sich movement began with the founding of the physical education and rifle society of the First Branch of the Ukrainian Sich Riflemen in New York in July 1915. A central organization, the Sitch Ukrainian American Athletic Association, was set up in November 1916 under the leadership of P. Zadoretzky. By 1920 it had approx 60 branches and over 3,000 members. Besides physical education, the association was involved in various sports and in paramilitary training. It ran a commercial firm called the Sitch Bazaar, which included a publishing house and bookstore, and published physical education manuals and the magazine

American officials preparing to review a parade of Sich (Sitch) guards in Chicago in the 1930s

**Sichovi visty* (1918–24). In 1924–5, as the Ukrainian community became politically more differentiated, some Sich societies joined the hetmanite Sitch organization, others formed the **Chornomorska Sich* athletic society, and the rest remained independent organizations. In Canada the Sitch Organization was founded in 1924. In 1927 it had 21 branches, and in 1928 it was renamed the Canadian Sitch Organization. At first it was connected with the Sitch Ukrainian American Athletic Association, and in 1934 it became part of the **United Hetman Organization*, with 50 branches in Ontario and the prairie provinces.

In Western Europe the first Sich society was organized in 1912 by Ukrainian workers in Hamburg. In 1921 in Vienna, Trylovsky set up a workers' physical education society, which eventually evolved into the External Committee of Siches, consisting of former members of the Sich societies in Galicia. Emigrés in Czechoslovakia founded Sich societies in Poděbrady (1926), Prague (1927), and other cities. In 1927 they held their first congress and formed the Ukrainian Sich Union. Its members belonged to local workers' gymnastics clubs and took part in international workers' olympiads in Prague in 1927 and 1934 and in Vienna in 1931. The leaders of the union were V. Petrov, I. Sokalsky (1933–8), and O. Bezpalko.

Sich. See Zaporozhian Sich.

Sich. A semimonthly organ of the hetmanite **Sich* society in the United States, published in Chicago from July 1924 to May 1934. It succeeded **Sichovi visty*. The newspaper published memoirs, political commentaries, ideological articles, reports on the activities of Sich locals, and nation-

al and international news of interest to the Ukrainian community. The editors were O. Nazaruk and, from 1926, M. Bodrug. In 1934 it was succeeded by **Nash stiah*.

Sich Council (Sichova Rada). The highest governing body in the Zaporozhian Sich from the 16th to 18th centuries; also called the Military Council. It was empowered to decide legislative, executive, and judicial matters, as well as the participation of the army in war and the settlement of peace. It elected and summoned the officer staff (*starshyna*), with the kish otaman at its head. The Sich Council also received foreign diplomats and determined the course of diplomatic relations. It fulfilled certain economic functions, such as the distribution of the communal agricultural and fishing districts among the kurins of the Sich. As an organ of direct self-government the Sich Council upheld the right of every Cossack to participate in its meetings, but the poor Cossacks (*siromy*) and **holota* were excluded from deliberations. The council met irregularly on the central square of the Sich; in the 18th century, it met twice a year. Measures were adopted by a majority vote, which was estimated visually with no exact count of hands. Before the demise of Zaporozhian Sich the authority of the Sich Council was supplanted by that of the Sich **Council of Officers*.

Sich Riflemen (Sichovi Striltsi, Kyivski Sichovi Striltsi [KSS]). A leading regular unit of the **Army of the UNR* which operated from 1917 to 1919 under different organizational forms: as the Galician-Bukovynian Kurin of Sich Riflemen, the First Kurin of Sich Riflemen, the Regiment of Sich Riflemen, the Separate Detachment of Sich Riflemen, the Division of Sich Riflemen, the Siege Corps of Sich Riflemen, the Corps of Sich Riflemen, and the Group of Sich Riflemen. Its name was derived from the Ukrainian Sich Riflemen in Galicia.

The Galician-Bukovynian Kurin of the KSS was established in Kiev on 13 November 1917 by the **Galician-Bukovynian Committee*. Its first recruits were former soldiers of the Austro-Hungarian army who had escaped from Russian POW camps and come to Kiev to participate in the building of a Ukrainian state. By the end of January 1918 the kurin had about 500 men organized in three companies, commanded by Capt. R. Sushko, I. Chmola, and V. Kuchabsky. Under Col Ye. Konovalets's command it defended Kiev against a Bolshevik insurrection and, later, the invading Bolshevik forces, and then secured the UNR government's retreat to Zhytomyr. After recapturing Kiev on 1 March 1918, the First Kurin of the KSS was assigned the task of guarding government institutions and preserving public order in the city. It expanded into the Regiment of KSS, consisting of two infantry kurins and a reserve kurin, a cavalry recognizance unit, and an artillery battery. A third of its approx 3,000 men were from the Dnieper region of Ukraine.

When P. Skoropadsky came to power on 29 April 1918, the KSS declined to serve under him and were disarmed by German troops. The regiment's soldiers joined other military or militia units. Many of them transferred to the Second Zaporozhian Regiment (commanded by P. Bolbochan), where they formed the Third Kurin under R. Sushko's command. With the hetman's consent to a partial regrouping of the KSS, the Separate Detachment was formed at the end of August 1918 in Bila Tserkva. Its ap-

Officers of the Sich Riflemen and representatives of the Ukrainian Sich Riflemen in Kiev in 1918. First row, from left: Ivan Rykhlo (1st), Yevhen Konovalets (5th), Teodor Rozhankovsky (6th), Andrii Melnyk (8th), Roman Sushko (9th); second row: Ivan Chmola (5th), Mykhailo Matchak (6th); third row: Ivan Andrukh (3rd), Vasyl Kuchabsky (4th), Hryts Hladky (6th); fourth row: Ivan Rogulsky (3rd), Ostap Hrytsai (4th)

prox 1,200 men were divided into an infantry regiment consisting of a machine-gun company, a reconnaissance troop, an artillery battery, and a technical unit. The detachment played a key role in overthrowing the Hetman: it began the revolt in Bila Tserkva and scored a decisive victory over his guard on 18 November at *Motovylivka. During the siege of Kiev the detachment grew into the Division of KSS (11,000 men) and in early December into the Siege Corps of KSS (approx 25,000 men) by incorporating two Dnieper and the Black Sea divisions. After taking Kiev on 14–15 December 1918, the Siege Corps was dissolved into its constituent units.

Sich Riflemen listening to a kobzar in Kiev

At the beginning of the second phase of the Ukrainian-Soviet War, in January 1919, the Division of KSS was divided into three combat groups, which set out in different directions to block the Bolshevik offensive in Kiev. Having suffered heavy losses, the KSS fell back at the end of February and regrouped as the Corps of KSS (approx 7,000 men). Despite a severe setback at Berdychiv (29–30 March) the corps continued to fight in the Shepetivka and Kremianets region. In July it was renamed the Group of KSS and was

assigned to Col A. Wolf's army group for the Kiev offensive. The KSS Group (approx 8,600 men) consisted of six infantry regiments, six artillery regiments, a cavalry regiment, an automobile unit, and four or five armored trains. After fighting its way toward Korosten the group had to fall back to Shepetivka when a new front with A. Denikin opened up. In mid-October the Riflemen were transferred to the Denikin front. The group suffered heavy battle losses and was racked by disease. Pinned down near Starokostiantyniv on 6 December 1919, the KSS decided to demobilize. Some of the members joined partisan units; others were interned by the Poles until the spring of 1920.

The Sich Riflemen was one of the chief regular units of the UNR Army. As the driving force behind the anti-Het-

Members of the last supreme command of the Sich Riflemen (Lutske, January 1920). Sitting, from left: Capt Mykhailo Matchak, Col Andrii Melnyk, Col Yevhen Konovalets, Col Roman Sushko, Capt Ivan Dankiv; standing: Capt Ivan Andrukh, Col Roman Dashkevych, Capt Vasyl Kuchabsky, Capt Yaroslav Chyzh

man coup, it was very influential with the Directory. After the war some of the KSS officers founded and led the *Ukrainian Military Organization.

Sich student societies. The name of Ukrainian student societies active in Lviv, Chernivtsi, Vienna, and Graz from the late 19th to the mid-20th century. The first society of this type was formed in Lviv (1861–3). In Chernivtsi a Sich student society was formed in 1902 by members of the *Soiuz (est 1875) and *Moloda Ukraina (est 1900) Ukrainian student associations. The group was active in Ukrainian life throughout Bukovyna, in helping establish Sich societies in villages, publishing occasional brochures and journals, and sponsoring a drama group and choir. It was disbanded by the Rumanian government in 1923. The Rus' student society of Graz changed its name to Sich in 1910. It remained active until the end of the 1940s. The longest-lasting and most active of these organizations was the *Sich student society of Vienna (1868–1947).

Sich student society of Vienna (Ukrainske akademichne tovarystvo 'Sich' u Vidni). One of the oldest and most active of Ukrainian student associations. The society was formed in 1868 by A. *Vakhnianyn and Yu. *Tselevych. It was the first Ukrainian student organization to adopt an openly populist approach to Ukrainian affairs. Over the years the society lent its support to leading Ukrainian causes, and many community leaders emerged from its ranks. Thus it played a significant role in the national revival in Ukrainian lands under Austro-Hungarian rule.

In the 1870s the Sich society was active in popularizing the political ideas of M. *Drahomanov and, under the leadership of O. *Terletsyky, in promoting the development of a socialist movement among Ukrainians. Such activity caused it to be temporarily disbanded (1877). After its reconstitution the group tended to maintain more mainstream Ukrainian positions. In 1901–2 it supported the movement for the *secession of Ukrainian students from Lviv University; in the early 1900s it engaged in the struggle for a Ukrainian university in Lviv; in 1913 it organized riflemen detachments in anticipation of the war, and in 1914–18 assisted the *Union for the Liberation of Ukraine; in 1917 it called for the union of all Ukrainian lands into one state (for which it was again temporarily disbanded); and in 1930 it sharply protested the *Pacification of Ukrainians in Galicia. The society also engaged in a certain amount of publishing activity. In the 1870s it prepared booklets for general distribution among the population. In 1920–4 it published the journal *Molode zhyttia*. Other publications included *Nash svit* (prepared by the Drahomanov Hromada, affiliated with the society), the humor journal *Ieretyk*, and several anniversary almanacs

(1898, 1908, and 1932). The society was also active in cultural, educational, and intellectual work among Ukrainians in Vienna. Sich members also maintained active ties with non-Ukrainian individuals and groups and had a significant impact in establishing a profile for Ukrainians in such circles. During the wars society members provided assistance to injured Ukrainian soldiers and deported workers.

Sich actively promoted co-operation among various student groups. It initiated the first meeting between Galician and Bukovynian students, which took place in Kolomyia in 1881. It provided the earliest call for a central body for Ukrainian student groups outside the Ukrainian SSR (leading eventually to the formation of the *Central Union of Ukrainian Students in 1922).

The vitality of the Sich society in Vienna reflected the fact that for many years Vienna was the major European center of study for Ukrainians outside of Ukraine. In the early 1920s Prague overtook Vienna in this respect, and Sich, although remaining active, was somewhat diminished in status. In 1941 the association became a branch of the *Nationalist Organization of Ukrainian Students in Germany (while retaining its own name). In 1947, after the Soviet occupation of Vienna, almost all of the members of Sich left Vienna, and the last president of Sich, S. Naklovych, was arrested and sent to Siberia by the Soviet authorities.

Z. Kokhanovsky

Sicheslav. See Dnipropetrovske.

Sichko, Petro [Sičko], b 18 August 1926 in Vytvytsia, Dolyna county, Galicia. Freedom fighter and political prisoner; husband of S. *Sichko and father of V. *Sichko. An officer in the Ukrainian Insurgent Army, he studied at Chernivtsi University, where he founded the underground organization Fighters for a Free Ukraine. It was uncovered by the Stalinist authorities, and in January 1947 Sichko was arrested. A few months later he was sentenced to death; his sentence was commuted to 25 years in labor camps. Sichko was amnestied in January 1957, settled in Dolyna, and worked as an economist and engineer. He was subjected to ongoing KGB persecution. In February 1978 he joined the *Ukrainian Helsinki Group. He was arrested in July 1979, and in December he was sentenced in Lviv to three years in a strict-regime camp near Brianka, Luhanske oblast. In May 1982, 40 days before his term ended, he was rearrested for writing letters of protest; in July he was sentenced on fabricated charges to three more years in a camp near Kherson. He was released in 1985.

Sichko, Stefaniia [Sičko, Stefaniia] (née Petrash), b 1 April 1925 in Zalukva, Stanyslaviv county, Galicia. Freedom fighter and political prisoner; wife of P. *Sichko and mother of V. *Sichko. She was imprisoned in 1947–57 in a labor camp near Magadan, in far eastern Siberia, for involvement in the Ukrainian Insurgent Army. After her release she lived in Dolyna, Ivano-Frankivske oblast, and wrote appeals for the release of her husband and sons after they were arrested in 1979–80. She joined the Initiative Group for the Defense of Rights of the Believers and the Church in Ukraine in 1982, and was active in the underground Ukrainian Catholic church.

Petro and Stefaniia Sichko and their children (standing, from left) Volodymyr, Oksana, and Vasy!

Sichko, Vasy! [Sičko, Vasy!], b 22 December 1956 in Magadan, Soviet Far East. Dissident; son of P. and S. *Sichko. He was expelled from Kiev University in 1977 for refusing to become a KGB informer, and joined the *Ukrainian Helsinki Group in February 1978. In July 1979, after renouncing his Soviet citizenship while making a speech at V. *Ivasiuk's grave, he was arrested and sentenced to three years' imprisonment. In 1982 he received another three years for allegedly possessing drugs. Since his release (1985) he has been active in the Ukrainian Catholic movement. In November 1988 he was elected president of the Ukrainian Christian Democratic Front.

Sichovi visty (Sich News). Monthly organ of the Galician *Sich society, first published in Lviv in 1912–14 as a monthly supplement to *Hromads'kyi holos*. It contained articles on sports and other subjects of popular interest, and reports of Sich activities. The editor was D. *Katamai. The paper was renewed in 1922 and published separately until 1924 under the editorship of R. Dashkevych.

Sichovi visty (Sich News). A biweekly organ of the *Sich societies in the United States, published in 1918–23 in New York and in 1924 in Chicago. In 1920–3 the editor was S. Musiichuk. The paper was succeeded by *Sich.

Sichulski, Kazimierz, b 17 January 1879 in Lviv, d November 1942 in Lviv. Polish painter. A graduate of the Cracow Academy of Fine Arts (1904) and the Vienna Kunstgewerbeschule (1908), he taught at the State Applied

Arts and Crafts School in Lviv (1920–30) and the Cracow academy (1930–9). With genre painting his specialty, he devoted much of his work to the life of the Hutsuls. Some of his better-known works are *Black Lamb* (1904), *Procession from the Mountain Meadow* (1925), *Hutsul Wedding*, and *Old Woman with Rooster* (1926). He also created mosaics and stained-glass windows and designed furniture.

Denys Sichynsky

Myroslav Sichynsky

Sichynsky, Denys [Sičyns'kyj], b 2 October 1865 in Kliuvyntsi, Husiatyn county, Galicia, d 6 June 1909 in Stanyslaviv. Composer, conductor, and teacher. He received his musical training in Ternopil and at the Lviv Conservatory (1888–91) and then organized and conducted the choral association *Boian in Lviv, Kolomyia, Stanyslaviv, and Peremyshl. From 1899 he lived in Stanyslaviv, where he founded a music school and organized the Muzychna Biblioteka music publishing association, which printed numerous works by Ukrainian composers. He was also active in establishing the Union of Song and Music Societies. Sichynsky is considered to be the first professionally trained Western Ukrainian composer. His compositions include the opera *Roksoliana* (libretto by V. Lutsyk and S. Charnetsky, 1908); works for symphony and chamber orchestras; piano solos; choral works, including the cantata *Lichu v nevoli* (I Count the Days and Nights in Bondage; text by T. Shevchenko); a score for a liturgy; approx 20 songs for solo voice to texts by T. Shevchenko, I. Franko, Lesia Ukrainka, B. Lepky, U. Kravchenko, and H. Heine; and folk song arrangements. His biography, by S. Pavlyshyn, was published in Kiev in 1956 (2nd edn, 1980).

Sichynsky, Mykola [Sičyns'kyj], b 1850, d 1894. Greek Catholic priest and civic activist. An organizer of the Ukrainian community in Husiatyn county, he was elected to the Galician Diet in 1883. In 1884 he was appointed to a parish in Chernivtsi. He opposed the Russophile movement and helped found the populist People's Council. In politics he supported the *New Era policy.

Sichynsky, Myroslav [Sičyns'kyj], b 11 October 1886 in Chernykhivtsi, Zbarazh county, Galicia, d 16 March 1979 in Westland, Michigan. Civic and political activist; son of Rev M. *Sichynsky. On 12 April 1908 he assassinated the

viceroy of Galicia, A. Potocki, in protest against Polish violence and fraud in the 1908 election. After his death sentence was commuted to life imprisonment by the Austrian emperor, he escaped (1911) and eventually (1915) was accepted as a political refugee by the United States. He then immersed himself in Ukrainian-American community activity as a founder of the Ukrainian Federation of the Socialist Party and editor of its weeklies **Robitnyk* (1914–17) and *Narod* (1917). As a leading activist of the Federation of Ukrainians in the United States, he was appointed editor of its *Ukrains'ka hazeta*. In 1920 he helped found the **Oborona Ukrainy* organization and edited its paper *Ukrains'ka hromada*. He was president of the **Ukrainian Fraternal Association* in 1933–41. During the 1940s Sichynsky adopted an increasingly pro-Soviet stance, which helped precipitate the crisis that led to *Oborona Ukrainy's* dissolution. His recollections were published by M. Shapoval in 1928.

Sichynsky, Teodosii [Sičyns'kyj, Teodosij], b and d ? Church painter and sculptor at the beginning of the 18th century. He painted the iconostasis of the Krasnopushcha monastery church and served as hegumen of the Basilian monastery in Vyspa, near Bibrka.

Volodymyr Sichynsky and his drawing of the ruins of Hetman Kyrilo Rozumovskyy's palace

Sichynsky, Volodymyr [Sičyns'kyj], b 24 June 1894 in Kamianets-Podilskyi, d 25 June 1962 in Paterson, New Jersey. Architect, graphic artist, and art scholar; son of Ye. **Sitsinsky*; full member of the Shevchenko Scientific Society from 1930. Having interrupted his studies at the St Petersburg Institute of Civil Engineers (1912–17) he helped organize the Architectural Institute in Kiev (1918–19) and served as director of the construction department of Podilia gubernia. After fleeing from Soviet rule to Lviv, he taught at the Academic Gymnasium there (1921–3) and then moved to Prague to study at Charles University (PH D, 1927) and teach at the Ukrainian Higher Pedagogical Institute (1923–33). He chaired the Library and Bibliographic Commission of the **Ukrainian Society of Bibliophiles* in Prague from 1927 and served as the society's president (1934–43). In 1930 he cofounded the **Association of Independent Ukrainian Artists* in Lviv. In 1942 he was appointed an associate professor of art history at the Ukrainian Free University. In 1944–5 he was imprisoned

and tortured by the Gestapo in Prague. A postwar refugee in Germany, in 1949 he emigrated to the United States.

As an architect he adapted the styles of Kievan Rus' and the Cossack baroque to modern techniques and materials. He designed the Redemptorist Church of the Holy Spirit in Michalovce (1933–4) and the Boiko-style wooden Church of the Nativity of the Mother of God in Komarnyky (1937), both in the Prešov region; the Ukrainian churches in Whippany, New Jersey (1949), and Pôrto União, Brazil (1951); and the Orthodox cathedral in Montreal (1957). He also designed many private and public buildings and a number of grave monuments, in which he employed folk forms of the many-armed cross, and the covers of over 70 books and journals.

Sichynsky systematically researched Ukrainian architecture and art, and he wrote over 500 articles and reviews. He is the author of books on 10th- to 13th-century Ukrainian architecture (1926); the history of world art to the Renaissance (a textbook, 1926, 1928); Ukrainian publishing logos (1926, 1938); the architecture of Potylych (1928), Bardejov (1931), Lavriv (1936), and the Korniakt Tower and Residence (1932), St George's Cathedral (1934), and St Nicholas's Church (1936) in Lviv; Ukrainian wooden architecture and carving (1936); and the history of 16th- to 18th-century Ukrainian engraving (1937). He also wrote essays on the history of Ukrainian industry (1937), an introduction to Ukrainian regional studies (1937), *Ukraine in Foreign Comments and Descriptions from the Sixth to the Twentieth Century* (1938; English trans 1953), and books on wooden architecture in Transcarpathia (1940, in Czech) and Hetman I. Mazepa (1951). He compiled and illustrated the albums *Monumenta Architecturae Ukrainae* (1940, 1946; 300 illustrations) and albums of ornaments in historical styles (1940), Ukrainian historical (1943) and folk (1943, 1946) ornaments, applied art (1943), folk furniture (1945), and embroidery (1947). He also wrote booklets on artists, such as O. Tarasevych (1934), H. Levytsky (1936), T. Shevchenko (1937), and H. Narbut (1943), and on the towns of Zboriv (1939), Bardejov (1939), and Kholm (1941). His magnum opus, on the history of Ukrainian architecture, was published in 1956. A biobibliography of Sichynsky by I. Keivan was published in Toronto in 1958.

S. Hordynsky

Sichynsky, Yukhym. See Sitsinsky, Yevtym.

Siderite. A common mineral, iron carbonate (FeCO_3); member of the calcite group. Siderite ores contain iron used in the manufacture of iron and steel. They usually lie in thin beds with shale, clay, or coal seams, and in hydrothermal metallic veins. The largest concentration of siderite ores in Ukraine is found in the **Kerch Iron-ore Basin*. Smaller deposits, which are not mined, are located in the Donets Basin and the Carpathian Mountains near Rakhiv.

Sidorov, Aleksei, b 13 June 1891 in Mykolaivka, Putyvl county, Kursk gubernia (now in Sumy oblast), d 30 June 1978 in Moscow. Russian art scholar and bibliologist; corresponding member of the USSR Academy of Sciences from 1946. He is the author of studies on the history of Russian drawing and on book art, and of articles on I. Hrabar, O. Shovkunenko, H. Narbut, I. Fedorych, and T. Shevchenko.

Siechkin, Vitalii [Sječkin, Vitalij], b 5 September 1927 in Kharkiv, d 3 May 1988 in Kishinev. Composer, pianist, and teacher. After obtaining undergraduate degrees from the Kharkiv State Conservatory in piano (1947) and composition (class of M. Tits, 1950) he completed graduate studies at the Moscow Conservatory (1954). From 1955 to 1984 he was affiliated with the Kiev Conservatory, as instructor, assistant professor (1965), head of the piano department (from 1971), and full professor (1976). His works include the overture *Mii kokhanyi kraiu* (My Beloved Country, 1951) for symphony orchestra, a concerto for piano and orchestra (1962), 'Andante cantabile' for string quartet (1951), sonatas and other works for solo piano, the suite *Estonian Impressions* (1967) for cello and piano, and works for chorus and for solo voice.

Siedin, Mytrofan [Sjedin], b 1861 in the Kuban, d 1918. Writer. He wrote *Shcho posiiesh, te i pozhnesh* (What You Sow, That You Will Reap, 1899), *Na Chornomor'i* (At the Black Sea, 1910), and other Ukrainian plays, and poetry and prose in Russian. From 1915 to 1917 he published the Katerynodar journal *Prikubanskiia step'*. He was killed by soldiers of A. Denikin's army. A biography of him by his daughter appeared in Krasnodar in 1965.

Siedlce. 1-3. A city (1989 pop 70,500) and a voivodeship center in Poland. It was first mentioned in the chronicles in 1448, and it received the rights of Magdeburg law in 1547. Under Russian rule, in 1837-45 and 1867-1912 Siedlce was the center of gubernias that included Ukrainian-populated regions of Podlachia. In the 1860s the Russian authorities established a Russian gymnasium in Siedlce, which attracted many Ukrainian students from Podlachia. I. *Nechui-Levytsky taught at the school in 1861-72. Siedlce was one of the centers of Russophilism in Podlachia. In 1874, during the forcible conversion of Greek Catholic Podlachians to Russian Orthodoxy, many of them were imprisoned in Siedlce jails.

Siege Corps of Sich Riflemen (Osadnyi korpus Sichovykh striltsiv). An operational grouping of units of the Army of the UNR formed on 3 December 1918 for the purpose of capturing Kiev. Its principal combat units were the Division of Sich Riflemen, the Black Sea Division, and the Dnieper Division. It was augmented with partisan detachments, and at its peak reached a strength of 50,000 soldiers. On 15 December 1918 its units entered Kiev, and in early 1919 the corps was deactivated. Its commander was Otaman Ye. *Konovalets.

Siemiatycze (Ukrainian: Semiatychi or Simiatychi). 1-3. A town (1989 pop 13,900) in northern Podlachia and a county center in Białystok voivodeship, Poland. Over one-third of the county's population is Ukrainian. The Ukrainians are regarded as Belarusians. Many of them accept the classification; others call themselves simply 'locals' or 'Orthodox.'

Siemiński, Lucjan, b 13 August 1807 in Kamiana Hora, near Rava Ruska, Galicia, d 27 November 1877 in Cracow. Polish revolutionary, writer, and ethnographer. After the Polish Insurrection of 1830-1 he lived in Lviv, where he was close to S. Goszczyński and other writers of the Ukrainian school in Polish literature. He lived as a po-

litical émigré in Strasbourg, Poznań, and Brussels from 1837 to 1848 and then settled in Cracow. Among his literary works are *Dumki* (Little Dumas, 1838), a poetry collection based on Ukrainian folk and historical songs, and a Polish translation of fragments of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign). In Poznań he published a book of Polish, Ukrainian, and Lithuanian legends (1845). Ukrainian historical themes are found in some of his stories and other writings, and the Ukrainian legendary figure *Vernyhora appears in his long poem *Trzy wieszczby* (Three Prophecies, 1843).

Sieniawski. A Polish magnate family which was influential in Polish political and military affairs in the 16th to 18th centuries and had extensive landholdings in Galicia (around Sieniawa) and Podilia. Some of its members played a significant role in Ukrainian history. Mikołaj (ca 1489-1569) was a royal field hetman (from 1539), voivode of Rus' (from 1553), and royal grand hetman (from 1561). He defended Poland's southeastern frontier against the Tatars. His son, also Mikołaj (?-1587), was a royal field hetman (from 1569) and castellan of Kamianets-Podilskyi (from 1576). Mikołaj Hieronim (1645-83) was voivode of Volhynia (from 1680) and royal field hetman (from 1682). He fought against the Cossacks, Tatars, and Turks (in 1683 at Vienna). He was the father of A. *Sieniawski.

Sieniawski, Adam, b ca 1666, d 1726. Polish magnate; last of the Sieniawski dynasty. He was the voivode of Belz (from 1692), royal field hetman (from 1702), royal grand hetman (from 1706), and castellan of Cracow (from 1710). He fought against the Cossack forces led by S. Palii (1703-4) and was supported by Muscovy in his (unsuccessful) candidacy to the Polish throne (1706). His correspondence in 1704-8 with Hetman I. Mazepa, who hoped to bring him into a coalition against Muscovy, was published by the Ukrainian Academy of Arts and Sciences (ed O. Subtelny). As a consequence of the marriage of his daughter, Zofia, Sieniawski's considerable properties were transferred to the Czartoryski family after his death.

Sienkiewicz, Henryk, b 5 May 1846 in Wola Okrzejska, Podlachia, d 15 November 1916 in Vevey, Switzerland. Polish writer. His first novel, *Na marnie* (In Vain, 1872), was set in Kiev. In *Ogniem i mieczem* (With Fire and Sword, 1884), the first part of his famous historical trilogy, he depicted in a crude, chauvinistic manner the Cossack-Polish War, Hetman B. Khmelnytsky, and the Ukrainian Cossacks. His approach was condemned by both Ukrainian (I. Franko) and Polish (Z. Kaczkowski, A. Świętochowski, B. Prus, E. Orzeszkowa) contemporary writers, and the novel's historical distortions have been criticized in books by the Polish historians O. Górka (1934) and Z. Wójcik (1960), and in an essay by V. Antonovych.

Sierkov, Pylyp [Sjerkov] (Serkov, Filipp), b 9 October 1908 in Forpost, Smolensk gubernia, Russia. Physiologist; full member of the AN URSR (now ANU) since 1978. A graduate of the Smolensk Medical Institute (1931), he was an associate of the Kiev Medical Institute (1935-41), a department head and prorector of Vinnytsia (1944-53) and Odessa (1953-66) universities, and assistant director of the ANU Institute of Physiology. His research concerns the physiology of skeletal muscles, the myoneural transmis-

sions and electrical activity in the brain, and epilepsy, as well as the history of physiology in Ukraine.

Sieverodonetsk. See *Siverskodonetske*.

Sighetul Marmăției (Ukrainian: Syhit Marmaroskyi; Hungarian: Máramoros Sziget). VI-4. A city (1971 population, 39,300) in northern Rumania near the Ukrainian border. Situated on the Maramureș Basin along the Tysa River, the city has a diverse population of Ukrainians (15–20 percent), Rumanians, Hungarians, and Jews. Its major economic activities include construction, textile manufacturing, lumbering, and the food industry. A number of Ukrainian villages surround the city in the *Maramureș region.

The earliest references to the settlement are from the 13th century. By 1394 it had become the principal city of Máramoros komitat. In the 19th and 20th centuries the Greek Catholic church and a Ruthenian student residence were active there. The city was the site of notorious show trials early in the 20th century when the Hungarian government, fearing pro-Russian sentiment in its borderland regions, tried recent converts to Orthodoxy for treason. In 1904–6, 9 people were sentenced to varying terms of imprisonment, and in 1913 a total of 94 people from the region were tried, of whom 32 were convicted and sentenced to fines and prison terms. The trials became a cause célèbre in both the Slavic world and Western Europe. The city was also the site of a meeting of representatives from the Maramureș region on 8 December 1918, who voted to unite Transcarpathia and Ukraine, as well as the site of a battle between the Ukrainian Galician Army and Rumanian troops on 15–17 January 1919.

Sigillography. See *Sphragistics*.

Sigismund I the Old (Polish: Zygmunt Stary), b 1 January 1467 in Cracow, d 1 April 1548 in Cracow. King of Poland and grand duke of Lithuania; son of Casimir IV. After obtaining Lithuanian territories in 1506 as an inheritance from his brother, Alexander Jagiellończyk, he was elected king of Poland in 1507. He brought in fiscal and monetary reforms, but his extensions of royal power resulted in clashes with the nobility. In Galicia, Volhynia, and Podilia his reign was marked by increased Polish control over Ukrainian lands and a growing Polonization of the Ukrainian nobility. In 1535 he defeated the invading forces of Muscovy.

Sigismund II Augustus (Polish: Zygmunt), b 1 August 1520 in Cracow, d 7 July 1572 at a private estate in Knyszyn (near the Polish-Lithuanian border). King of Poland and grand duke of Lithuania; son of Sigismund I the Old. The last of the Jagiellon dynasty, he became grand duke of Lithuania while still a minor and was crowned king (and coruler) of Poland in 1530. In 1548 he assumed full control of both domains. His reign continued the **vo-loka* land reforms (1557) and the promotion of Renaissance culture initiated during his father's era. It also saw the incorporation of the Ukrainian provinces of Podlachia, Volhynia, and Kiev directly into the Polish realm, shortly before the formal merger of Poland and Lithuania by the Union of *Lublin in 1569.

Sigismund III Vasa (Polish: Zygmunt III Waza; Lithuanian: Žygimantas), b 20 June 1566 in Gripsholm, Sweden, d 30 April 1632 in Warsaw. Grand duke of Lithuania and king of Poland (1587–1632) and king of Sweden (1592–9); son of the Swedish king John III Vasa and Katarzyna, the daughter of Sigismund I. He was a zealous Catholic, and during his rule the pivotal Church Union of *Berestia was signed (1596). He transferred the capital of Poland from Cracow to Warsaw. He supported the Jesuits and tried to suppress the Orthodox church in Ukraine. The restrictions placed by Sigismund on the Cossacks sparked rebellions led by K. Kosynsky (1591–3), S. Nalyvaiko (1595–6), and T. Fedorovych (1630). The strength of the Cossack armies grew and resulted in the first clashes of the Polish-Cossack wars. Sigismund briefly held Moscow during the Time of Troubles (1610–12). In his wars against Turkey, particularly in the Battle of *Khotyn (1621), Sigismund enlisted the aid of the Cossacks, led by P. Sahaidachny.

Sihorsky, Vitalii [Sihors'kyj, Vitalij], b 19 November 1922 in Bubnivska Slobidka, Zolotonosha county, Poltava gubernia. Electrical and electronic engineer. A graduate of the Lviv Polytechnical Institute (1949), he taught there and then served as assistant director of the AN URSR (now ANU) Institute of Machine Science and Automation (1953–9). From 1959 to 1964 he headed departments at the Automation and Mathematics institutes in Novosibirsk and taught at the Electric Technology Institute and university there. Since 1964 he has held the chair of technical electronics at the Kiev Polytechnical Institute. A specialist in circuit theory, he developed powerful mathematical methods of analysis and synthesis of complex electronic circuits. He has written over 150 works, including textbooks and monographs.

Siiach (Sower). A publishing house in Cherkasy in 1917–18. It republished new editions of works by P. Hulak-Artemovsky, Ye. Hrebinka, B. Hrinchenko, A. Kashchenko, H. Kovalenko, I. Nechui-Levytsky, I. Franko, P. Kulish, M. Levytsky, I. Manzhuza, and S. Cherkasenko, and textbooks for elementary schools.

Siiach (Sower). Monthly organ of the Ukrainian Evangelical Reformed church, published in Kolomyia in 1932–3. It was edited by T. Dovhaliuk and V. Borovsky. After 1933 *Siiach* appeared as a supplement to **Vira i nauka*.

Siiach. See *Dnipro*.

Siiak, Ivan [Sijak], b 8 April 1887 in Liashky Murovani, Lviv county, Galicia, d after 1939? in the Far East (Soviet sources cite December 1937 with no location). Civic, military, and political figure. A lawyer by training, by 1914 he was a leading member of the Ukrainian Social Democratic party. During the First World War he fought for the Sich Riflemen and led the Railway Engineering Corps of the Ukrainian Galician Army. After being captured by Bolshevik forces near Stavyshe in 1919, he joined the Red Army and directed the activities of the Galician Revolutionary Committee (1920). During the 1920s he taught at educational institutions in Kiev and Kharkiv, held a position with the Soviet embassy in Warsaw, and became a member of the CC CP(B)U. From 1930 he directed the Ukrainian Institute of Linguistic Education in Kharkiv. He was

Ivan Siiak

Gen Volodymyr Sikevych

arrested in 1933 during the Stalinist terror, sent to a labor camp, and later shot.

Sikalo, Ivan, b 6 June 1909 in Sosnytsia, Chernihiv gubernia, d 24 March 1975 in Vinnytsia. Stage actor and director. He studied drama in Donetsk (1930–5) and worked in the Donetske Ukrainian Drama Theater (1935–41) and the Izmail Ukrainian Music and Drama Theater (1945–8), and from 1949 at the Vinnytsia Ukrainian Music and Drama Theater.

Sikevych, Volodymyr [Sikevyč], b 5 September 1870 in Tarashcha, Kiev gubernia, d 27 July 1952 in Toronto. Military and political leader. He served as a colonel in the general staff of the Russian army. During the Ukrainian struggle for independence he served as brigadier general of the Army of the UNR and head of the Repatriation Commission of the UNR consulates in Hungary and Austria (1919–20). From 1924 he lived in Canada (Winnipeg and Toronto) and was active in Ukrainian veterans' organizations. He wrote *Storinky iz zapysnoi knyzhky* (Pages from a Notebook, 7 vols, 1943–51).

Sikorski, Władysław, b 20 May 1881 in Tuszów Narodowy, Poland, d 4 July 1943 near Gibraltar. Polish general and statesman. From 1908 he was one of the leaders of the clandestine Polish Union of Active Struggle and its paramilitary organizations in Galicia. After the creation of the Polish Republic in November 1918, Sikorski commanded the Peremyshl Military District. During the Ukrainian-Polish War of 1918–19 he commanded Polish divisions that fought the Ukrainians for Lviv and fought at Horodok and Chortkiv; and during the Polish-Soviet War of 1919–20 he commanded the Polishian Group and the Polish Third and Fifth armies. After the war he served as Poland's chief of general staff (1921–2), prime minister (1922–3), minister of military affairs (1922–3, 1924–5), inspector general of the infantry (1923–4), and commander of the Lviv Military District (1925–8). An opponent of J. Piłsudski's 1926 coup, in 1928 he was forced into retirement. In 1936 he was a leader of the Front Morges, the centrist opposition to the Sanacja government. After the German invasion of Poland in September 1939, Sikorski fled to France; he served as prime minister of the Polish government-in-exile in France (from June 1940 in Eng-

land) and commander in chief of the Polish forces and *Polish Home Army. In July 1941 he negotiated an agreement with the USSR and the creation of Gen W. *Anders's army from among Polish soldiers (including some 2,000 Ukrainians) who had been deported and interned in the USSR. His request that the International Red Cross investigate the Katyn Massacre of Polish officers resulted in J. Stalin's severing diplomatic relations with the Polish government-in-exile in April 1943. Sikorski died in an airplane crash.

Ihor Sikorsky

Sikorsky, Ihor (Igor) [Sikors'kyj], b 25 May 1889 in Kiev, d 26 October 1972 in Easton, Connecticut. Aeronautical engineer and designer and pioneer of aviation technology; son of I. *Sikorsky. While studying at the Kiev Polytechnical Institute (1908–12) he designed two helicopters, among the first such designs in the world, as well as a series of biplanes. He was a member of the pioneering Kiev Aeronautical Society. On 29 December 1911 he established the world speed record (111 km/hr) for a loaded plane (three passengers) in a plane of his own design, the C-6. From 1912 to 1917 he worked as chief designer of a Russian-Baltic aviation company, where he designed and built the first airplanes with multiple engines, including the *Illia Muromets* and the *Vytiaz*. In 1918 he emigrated to France, and in 1919 to the United States, where he founded a number of aviation companies and headed several design teams which constructed various airplanes and hydroplanes. In 1939 he perfected the design of the first successful helicopter in the world. His Sikorsky Helicopter Co developed military and civilian helicopters and was considered the world leader in its field.

Sikorsky, Ivan [Sikors'kyj], b 7 June 1842 in Antoniv, Skvyra county, Kiev gubernia, d 14 February 1919 in Kiev. Psychiatrist and psychologist; father of I. *Sikorsky. A graduate of Kiev University (1869), he worked there and (from 1873) at I. Balinsky's clinic in St Petersburg. In 1885 he became head of the department of psychiatry and nervous diseases at Kiev University. He founded and edited the journal *Voprosy nervno-psikhologicheskoi meditsyny* (1896–1905). He was the founder of the Medical-Pedagogical Institute for Pediatric Anomalies in Kiev and president of the Scientific Society of Psychiatrists and the Kiev Froebel Society. One of the founders of child psychology, he set up the world's first institute of child psychology, in

Kiev (1912). He wrote numerous works (approx 20 in child psychology), including *Vseobshchaia psikhologiiia s fiziognomikoi v illiustrirovannom izlozhenii* (General Psychology with Physiognomy in an Illustrated Presentation, 1912). He also published a collection of his scholarly articles (5 vols, 1899–1900).

Mykhailo Sikorsky

Metropolitan Polikarp
Sikorsky

Sikorsky, Mykhailo [Sikors'kyj, Myxajlo], b 1923 in Chyhyryn, Cherkasy okruha. Museologist and historian. He graduated from Kiev University in 1951 and was appointed director of the *Pereiaslav-Khmelnytskyi Historical Museum. He founded most of the city's 17 museums and personally collected a large proportion of their holdings. His accomplishments include the Museum of Folk Architecture and Folkways, the Archeological Museum, the Museum of Kobza Playing, and the Folk-Art Museum of the Kiev Region, as well as memorial museums dedicated to A. Kozachkovsky (est 1954), H. Skovoroda (est 1972), V. Zabolotny, and Sholom Aleichem. Sikorsky also helped organize regional museums in Brovary, Tarashcha, Berezan, and Chyhyryn. He wrote numerous scholarly works, including *Na zemli pereiaslavs'kii* (In Pereiaslav Land, 1983, coauthor). A documentary novel about Sikorsky was written by M. Makhinchuk (1989).

Sikorsky, Polikarp [Sikors'kyj] (secular name: Petro), b 20 June 1875 in Zelenky, Kaniv county, Kiev gubernia, d 22 October 1953 in Aulnay-sous-Bois, near Paris. Metropolitan of the Ukrainian Autocephalous Orthodox church (UAOC). A graduate of the Kiev Theological Seminary (1898) and the law faculty of Kiev University (1910), he was a member of the *Hromada of Kiev and worked as an official of the Orthodox consistory office in Kiev (1908–18); a section head in the UNR government-in-exile's Ministry of Religious Faiths (1918–19); and deputy director of that government's Department of General Affairs in Tarnów, Poland (1919–21). He also served as a member of the All-Ukrainian Church Council and Sobor in 1917–18. An émigré in the interwar Polish Republic, he became a hieromonk in 1922 and served as superior of Orthodox monasteries in Derman, Myltsi, and Zahaitsi Mali in Volhynia and Vilnius in Lithuania; dean of the Volodymyr-Volynskyi Cathedral (1925–7); and superior of the monas-

tery in Zhyrovichy, Belarus (1927–32). In April 1932 he was consecrated Orthodox bishop of Lutske and vicar of Volhynia eparchy by Metropolitan D. Valedinsky of the Polish Autocephalous Orthodox church, but he was unable to function fully because of Polish administrative sanctions. A member of the Commission for the Translation of the Bible and Liturgical Books (1932–9) of the Ukrainian Scientific Institute in Warsaw, he organized and headed its section in Lutske from 1937. During the 1939–41 Soviet occupation of Western Ukraine, Sikorsky refused to recognize the authority of the Patriarch of Moscow. In August 1941, during the German occupation, Metropolitan Valedinsky elevated him to the office of archbishop of Lutske and Kovel, and in December appointed him provisional administrator of the revived UAOC in Reichskommissariat Ukraine. In February 1942 Sikorsky consecrated the first two bishops of the UAOC on Ukrainian territory (N. Abramovych and I. Huba), and in May 1942 the Kiev sobor of UAOC bishops elected him their head and a metropolitan. In January 1944 he fled from the Soviet reoccupation of Volhynia to Warsaw, and thence, in July, to Germany. From 1945 he headed the UAOC abroad from Gronau, near Hannover; from Heidenau, near Hamburg; and, from April 1950 to his death, from Paris. He is buried at the Pères-Lachaise cemetery in Paris.

Sikorsky, Yakiv [Sikors'kyj, Jakiv], b 8 November 1904 in Dzhuryntsi, Bratslav county, Podilia gubernia, 2 November 1980. Writer. He is the author of books of prose, including *Matrosova topolia* (The Sailor's Poplar, 1956), *Narodzhennia* (Birth, 1957), *Shturm* (The Storming, 1958), *Maiak u stepu* (The Lighthouse in the Steppe, 1961), *Ne khody maniotsiamy* (Don't Lose Your Way, 1963), *Tak pochalasia vesna* (Thus Spring Began, 1964), *Aistry* (Asters, 1966), *Suvora pam'iat'* (A Grim Memory, 1973), and *Smer-tiu khorobrykh* (With the Death of the Brave, 1980), and a few books in Russian.

Silberfarb, Moisei. See Zilberfarb, Moyshe.

Silicosis. See Pneumoconiosis.

Silk industry. A branch of the *textile industry that produces silk thread and cloth from natural and synthetic silk and related fibers. The main raw materials for the industry are natural and synthetic silk fibers.

Silk cloth has been known in Ukraine since the time of Kievan Rus'. In the 14th to 16th centuries artisans producing clothes from silk, especially women's clothes and men's shirts, formed separate guilds. Natural silk was not produced in Ukraine, but imported from Asia and sometimes Western Europe. In the 17th century the first workshops for making silk cloth appeared. A state-owned silk enterprise was established in Kiev in 1725. V. Ivanov and R. Smorazin operated small weaving shops in Kiev in the 1750s and 1760s. The Nova Vodolaha silk manufactory was opened in 1774. No silk factories were set up in the 19th century, and the silk industry in Ukraine was poorly developed until the 20th century.

Silk production began to grow after 1930. That year 88 t of silk cocoons were produced in the Ukrainian SSR. By 1940 production had reached 412 t. The real development of the industry, however, began only after the Second World War. Several large factories were established, including the Darnytsia Silk Manufacturing Complex in Kiev, which produces synthetic silk, the *Kiev Silk Manufacturing Complex, and the Cherkasy and Lutske silk complexes, both of which have produced synthetic silk since 1969. In addition silk cloth for industrial purposes is produced in Kiev, Lysychanske, and some cotton factories. In 1960, 110,000 t of synthetic and natural silk thread were produced, and by 1970 the output had reached 167,000 t. Silk production peaked in the mid-1970s. It dropped to 151,000 t in 1980, 137,000 t in 1985, and 109,000 t in 1987. The decrease is probably owing to the lack of commitment on the part of economic planners and managers to producing expensive silk cloth and clothing: the number of silk dresses produced in Ukraine, for example, increased from 1.7 million in 1970 to 2.8 million in 1980 and then dropped to 1.5 million (1987). Of the 159.2 million sq m of silk cloth produced in 1975, 89 percent was made from synthetic silk fibers, 9 percent from staple fiber, and the rest from natural silk. Overall, silk cloth accounts for 16 percent of all textiles produced in Ukraine (1982).

B. Wynar

Silkor. See *Robselkor*.

Silkworm breeding. A branch of agriculture that breeds and raises silkworms for use in the *silk industry. Silkworms of the genus *Bombyx* are an important source of commercial silk. The native Chinese silkworm was introduced in Ukraine in the 18th century with the encouragement of the Russian government, which hoped to develop a source of inexpensive domestic silk. Silkworm breeding spread slowly because of inhospitable conditions and the reluctance of the population to experiment. Some silk was produced in Kiev gubernia and Slobidska Ukraine. At the beginning of the 19th century some 1,000 kg of raw silk was produced in Russian-ruled Ukraine, much of it in the southern steppe gubernias.

At the end of the 1920s the Soviet government began to encourage silkworm breeding in Ukraine. In 1930, 88 t of cocoons were produced. The figure increased to 347 t in 1945, 1,400 t in 1970, and 33,200 t in 1984. In 1984 almost 50,000 ha of land were devoted to mulberry trees, on which silkworms feed. In 1991, silkworms were bred in 18 oblasts of Ukraine and on over 2,700 collective and state farms. The most productive areas were Crimea, Dnipropetrovske, Zaporizhia, and Odessa oblasts. Many silkworm cocoons were produced on private plots. Research in silkworm breeding was conducted at the *Ukrainian Research Station for Silk Production in Merefa, Kharkiv oblast, and at the department of general entomology at the Ukrainian Academy of Agricultural Sciences in Kiev.

Sil's'ke budivnytstvo (Rural Construction). A monthly magazine of the Ministry of Rural Construction and Ukrainian Inter-Collective Farm Construction Alliance, published from 1951 in Kiev. It published articles on rural housing construction, architecture, planning, and engineering. Its pressrun declined from 22,900 in 1970 to 16,500 in 1975.

Sil's'ki visti (Village News). A daily organ of the CC CPU and the Ukrainian SSR Ministry of Agriculture until 1991, published in Kiev since 1939. It was originally called *Kolhospnyk Ukraïny*. In 1949 this paper was merged with *Toarynnytstvo Ukraïny* and *Radians'kyi selianyn* to form *Kolhospne selo*, which was renamed *Sil's'ki visti* in 1965. The paper reported on rural life in Soviet Ukraine and promoted labor productivity and socialist values among the peasantry. In 1975 the paper's pressrun was 649,000; by 1980 it had increased to 834,000. After the Ukrainian declaration of independence the newspaper continued to appear as a government publication. In 1992 its pressrun was 2,268,000.

Members of the supreme council of the Silskyi Hospodar society in 1900. Sitting, from left: Rev Yosyp Folsy, Rev T. Dutkevych, Yevhen Olesnytsky (chairman), Ivan Kyveliuk, Rev Stepan Onyshkevych; standing: Oleksander Harasevych, Hryn Tershakovets, Kyrylo Kakhnykevych, Mykhailo Kotsiuba, Andrii Kornelia, Hryhorii Velychko, Andrii Zhuk

Silskyi Hospodar (Farmer). The most important Ukrainian agricultural organization in Galicia. It was founded in 1899 in the town of Olesko, Zolochiv county, by Revs T. and Yu. *Dutkevych with the goal of raising the living standard of the peasantry by improving agriculture and education. Initially the organization limited its activities to the Zolochiv region (Brody county and Olesko judicial district). In 1903 its headquarters was transferred to Lviv, and in 1904 it was reorganized into the Silskyi Hospodar Provincial Agricultural Society with a mandate to organize branches throughout Galicia. The organization grew slowly: in early 1909 it had only five branches and 700 members.

The rapid development of Silskyi Hospodar (SH) began with the first agricultural exhibition, organized in 1909 in Stryi by the *Prosvita society. At the annual meeting of SH held during the exhibition, its statute was amended to expand its range of activities and restructure it into a three-tiered organization, with a central office, county branches, and village locals. At the same time Ye. *Olesnytsky replaced T. Dutkevych as president of SH. Assisted by S.

Onyshkevych and H. Velychko, he extended the organization's activities to all parts of Galicia and took over almost all agricultural work formerly done by the Prosvita society and by various co-operatives. In 1910 SH had 85 branches, 317 locals, and 12,500 members.

SH acted as the legal representative of Ukrainian peasants before the government. It organized courses and lectures for agricultural instructors and farmers; established research stations and model farms, orchards, apiaries, and livestock and poultry farms; instructed peasants about agricultural machinery and equipment, the collective use of machines, and effective land management; and organized a school of orcharding and farming. It published the journal **Hospodars'ka chasopys'* (1910–18, 1920) and 27 brochures in its book series. In 1911 it established a syndicate for the distribution and sale of farm products (see **Tsentrosoiuz*) and the Provincial Union for the Breeding and Raising of Livestock. Profits from those two organizations were used to fund SH's other activities.

The First World War interrupted the operations of SH. In 1915 it began to rebuild its facilities. The effort was assisted financially by the Austrian government, which recognized the organization as the central union of Ukrainian peasants. From the end of 1918 until May 1919 it functioned in the areas controlled by the Western Ukrainian National Republic, which granted it official recognition. After the consolidation of Polish rule in Galicia, SH operations were suspended for a brief period.

Directors and administrators of the Silskyi Hospodar society in 1938. Sitting, from left: Ivan Lapchuk, Illia Lysy, Mykhailo Kholievchuk, Myron Lutsky (chief administrator), Yevhen Khraplyvy (chairman of the board of directors), Antin Romanenko, unidentified person; standing: I. Rybak, Roman Holod, Mykhailo Borovsky, N. Onyshkevych, I. Kiliar, Petro Zeleny, Kharytia Kononenko, I. Myhul, M. Kliufas, M. Lokshynsky, V. Dzerovych-Sobolts, R. Doberchak, Olha Duchyminska-Myhul

SH resumed its activities in 1920, but on a very limited scale. The number of branches fell drastically (in 1924 there were only 10), and its new organ, **Hospodars'ko-koperatyvnyi chasopys'*, was taken over by the Audit Union of Ukrainian Co-operatives (RSUK). From 1927 it increased its activity quickly, supported by the Association of Ukrainian Agronomists and various Ukrainian co-operatives, which provided funds. In 1929 SH was reorganized. A board of directors, headed by Yu. Pavlykovsky (1924–9), T. Voinarovsky-Stolobut (1929–36), and M. Lutsky (1936–9), was responsible for its general policy. The administration was left to the chairman, Ye. **Khraplyvy* (1928–39),

and his executive, which included M. Kholievchuk, I. Lapchuk, I. Lysy, B. Hnatevych, and A. Romanenko. The primary goal of the organization was to provide peasants with theoretical and practical training in agriculture. The most significant development in that area was the introduction of the **Khlivorobskyi Vyshkil Molodi* program in 1932. A section of SH organized courses in home economics for peasant women. Formed in 1936, the section was headed by O. Kysilevska, assisted by I. Pavlykovska. Its organizers included Kh. Kononenko and I. Dombchevska.

SH published several periodicals: **Sil's'kyi hospodar*, **Ukrains'kyi pasichnyk*, *Praktychne sadivnytstvo* (1933–8, edited by M. Borovsky), **Khlivorob's'ka molod'*, and *Sad i horod* (1939). During its history it published almost 180 textbooks and popular manuals on all aspects of agriculture, almost 120 of them in the interwar period. From 1928 SH issued an annual calendar, and just before the outbreak of the Second World War it began to publish an agricultural encyclopedia, edited by Khraplyvy. SH also printed hundreds of pamphlets, leaflets, and posters. In the interwar period it operated eight model farms, an agricultural school in Korshiv, and an advanced school in Yanchyn, where instructors and assistant agronomists were trained. The growth of SH is summarized in the table below.

Growth of Silskyi Hospodar, 1910–44

| | Branches | Locals | Members | Professional staff |
|------|----------|--------|---------|--------------------|
| 1910 | 85 | 317 | 12,500 | 4 |
| 1918 | 88 | 1,815 | 83,400 | 5 |
| 1927 | 52 | 112 | 18,400 | 15 |
| 1932 | 73 | 1,928 | 45,400 | 25 |
| 1939 | 60 | 2,040 | 160,000 | 167 |
| 1944 | 66 | 2,040 | 250,000 | 250 |

SH attempted to extend its activities to Volhynia during the interwar period, and from 1928 it operated a branch in Lutske, directed by V. Ostrovsky and then R. Klos, but the branch was closed by the Polish authorities in 1937. For a short period SH also maintained a branch in Kremianets, directed by B. Kozubsky. Throughout the period SH worked closely with RSUK, sometimes sharing personnel and facilities.

In 1939 the Soviet authorities liquidated SH. It continued its work in the German-occupied Generalgouvernement and established a headquarters in Jaroslav (directed by L. Bachynsky and M. Kaplysty). In practice its work was limited to the peasants of the region. That office published 17 issues of the monthly *Sil's'kyi hospodar*, several booklets, and a calendar. A regional SH organization was established in Cracow in 1940–1 and was affiliated with the Ukrainian Central Committee. It included 130 locals in the Lemko and Sian regions.

When all of Galicia was occupied by the Germans in 1941, SH renewed its activity in Lviv under the presidency of Khraplyvy and the directorship of Ya. Zaishly. It worked closely with the Lviv Agricultural Chamber, which was directed by Khraplyvy, and was recognized as the main professional association of Ukrainian farmers. It renewed the publication of *Sil's'kyi hospodar* and *Ukrains'kyi pasichnyk* and issued a few booklets and calendars. With the second Soviet occupation of Galicia in 1944, SH was dissolved.

SH not only improved the economic standing of the Ukrainian peasantry but also did much to raise their national consciousness. Among its prominent activists, in addition to ones already mentioned, were O. Duchymynska, P. Zeleny, M. Khronoviat, M. Tvorydlo, and V. Vakulovsky.

Dubrivnyi, P. (ed). *Kraiove hospodars'ke tovarystvo 'Sil's'kyi hospodar' u L'vovi, 1899–1944* (New York 1970)

P. Zeleny

Sil'skyi Hospodar (Farmer). The central organization of agricultural co-operatives in the Ukrainian SSR, founded by the government at the beginning of the New Economic Policy in 1922 in place of the *Tsentral union. By 1928 it represented over 22,000 co-operatives and had over 2.9 million members. Its turnover that year was 169 million rubles; the turnover of its member co-operatives was 448 million rubles. In 1927 3,594 general and 8,606 specialized agricultural co-operatives belonged to the organization. Of the specialized co-operatives, 582 specialized in dairy and livestock, 615 in sugar beets, 209 in fruit and vegetables, and 189 in beekeeping. There were also 3,119 machine and tractor co-operatives. The primary co-operatives were organized into 24 general, 46 specialized, and 18 credit associations. They included Dobrobut, a livestock and dairy co-operative that marketed over 16 million kg of meat and 1.6 million kg of dairy products in 1925–6; Plodospilka, an association of orcharding, gardening, grape-growing, and beekeeping co-operatives established in 1925; Buriakspilka, an association of sugar-beet producers; and Ukrkooptakh, an association of poultry farmers. All of these associations ran their own processing and distribution facilities, and many published books and brochures on the co-operative movement. Sil'skyi Hospodar also published **Sil's'kyi hospodar* (1923–7), which later became *Kooperovane selo* (1927–8) and then *Kooperovana hromada* (1928–30). The organization and almost the entire *co-operative movement were dissolved in the early 1930s with the introduction of collectivization.

Sil's'kyi hospodar (Farmer). A semimonthly organ of the *Tsentral union of agricultural co-operatives, published in Kiev from July 1918 to the end of 1919 (a total of 35 issues). It contained articles on farming and the co-operative movement in Ukraine.

Sil's'kyi hospodar (Farmer). A semimonthly organ of the *Sil'skyi Hospodar agricultural co-operative union, published in Kharkiv from 1923. In 1927 it was renamed *Kooperovane selo*, and in mid-1928 it was merged with *Radians'kyi kredyt* to form *Kooperovana hromada*, which appeared semimonthly until January 1930.

Sil's'kyi hospodar (Farmer). A popular farming journal published by the *Sil'skyi Hospodar society semimonthly in Lviv (1926–39, 1942–4) and monthly in Jaroslav (1940–1). The editors were Ye. Khraplyvy (1928–34, 1938–42), V. Sozansky (1925–9), P. Dubrivnyi, M. Borovsky (1932–6), P. Zeleny, L. Bachynsky (1940–1), and I. Drabaty. *Sil's'kyi hospodar* appeared in a pressrun of 5,000 to 10,000 in the interwar period and up to 50,000 during the Second World War. The monthly supplement *Ukrains'kyi pasichnyk* was published in 1928–39 and 1941–4.

Sil's'kyi hospodar (1926–44)

Sil's'kyi svit (Rural World). A popular agricultural monthly and, from 1926, semimonthly published in Pere-myshl (1923–4) by S. Dmokhovskyy and in Lviv (1925–8) and Lutske (1928–31) by Ye. Arkhynpenko (from November 1924). It issued the supplements *Supriaha*, *Ukrains'ke molocharstvo*, and *Ukrains'ke pasichnytstvo*.

Sil's'kyi teatr. See *Masovyj teatr*.

Ivan Silvai

Silvai, Ivan [Sil'vaj] (pseud: Uriil Meteor), b 15 March 1838 in Suskove, d 13 February 1904 in Nove Davydkove, Bereg komitat, Transcarpathia. Priest and Russophile writer. He began writing in 1855 in the **yazychiie* but later switched to Russian. His lyric poems, epic ballads ('Fedor Kor'iatovich,' 'L'voborets'), satirical stories and novellettes ('Kraitsarovaia komediia' [The Kreutzer Comedy], 'Millioner') about the Magyarone clergy and Transcarpathian rural society, and anecdotal and historical tales appeared in *Tserkovnaia gazeta* (Budapest), *Svit''*, *Novyi svit''*, *Sova*, *Karpat''*, *Lystok''*, and *Misiatseslov* (Uzhhorod), and *Slovo* (Lviv). He also wrote two volumes of sermons, a short autobiography, articles on Ruthenian life under Hungarian rule and on his enemy, Bishop S. Pankovych (I. Pankovics) of Mukachiv, and a study of Transcarpathian miracle-working icons. A book of his religious poems was published in 1903, and a Russian edition of his collected works appeared in Prešov in 1957.

Silvansky, Mykola [Sil'vans'kyj], b 5 January 1916 in Kharkiv, d 5 March 1985 in Kiev. Composer, pianist, and pedagogue. A graduate of the Moscow Conservatory (1944), he studied composition with V. Barabashov in Kharkiv and, in 1944–53, was a soloist with the Kharkiv Philharmonic. In 1947 he began teaching at Kharkiv music schools, and from 1955 at the Kiev Conservatory. His works include the ballets *Nezvychayni den'* (Unusual Day, 1964) and *Mal'chysh-Kybal'chysh* (1981), the musical *The Magical Power of Tsar Dobrylo* (1982), the symphonic tale *Ivasyk-Telesyk* (to the words of P. Tychyna, 1965), five piano concertos, chamber works, pieces for piano and bandura, art songs, arrangements of Ukrainian folk songs, and music for radio.

Tiberii Silvashi: *Summer in Mukachiv* (oil, 1985)

Silvashi, Tiberii [Sil'vashi, Tiberij], b 13 July 1947 in Mukachiv, Transcarpathia oblast. Painter. A graduate of the Kiev State Art Institute (1971) and a secretary of the Union of Artists of Ukraine in Kiev, he has worked within the representational framework. His brush stroke is gesturally abstract, however, with drips of paint and an expressionist palette; his compositions are sometimes unusual or off-balance; and the subject matter may be somewhat enigmatic (eg, *There, beyond the Window*, 1984). At the Young Ukrainian Artists Exhibition in Moscow in 1985, his works attracted international recognition (eg, *Dedication to My Daughter*, 1983; *Weekend*, 1983).

Silvestrov, Valentin. See Sylvestrov, Valentyn.

Sim Brativ fortified settlement. A Black Sea trading center of the 6th to 2nd century BC on the lower Kuban River near Varenykivska, Krasnodar krai, RF. The site was first excavated in 1878 and again in 1938–40 and 1949–50 by N. Anfimov. It originated as one of the major settlements of the Sindians, a Maeotian tribe eventually assimilated by the Sarmatians. It was fortified in the 5th century BC with walls, towers, and a moat. The inhabitants engaged in agriculture, fishing, handicraft production, and trade. Archeological excavations uncovered the remains of a large (420 sq m) 3rd-century BC stone house with an inner court. The site's archeological name is derived from its proximity to the *Sim Brativ kurhans.

Gold ornaments found in the Sim Brativ kurhans

Sim Brativ kurhans. A group of seven (hence the name 'Seven Brothers') 5th- to 4th-century BC Sindian kurhans located by the mouth of the Kuban River to the west of the *Sim Brativ fortified settlement. Excavations in 1875–8 by V. Tisenhausen revealed tombs made from stone and unfired brick, in which the remains of humans and horses, weapons, vases, gold ornaments, and harnesses were found.

The Simeiz sanatorium

Simeiz [Simejiz]. IX-15. A town smt (1986 pop 4,700) on the southern shore of the Crimea, administered by the Yalta city council. Sheltered from northern winds by the Crimean Mountains, it is a health resort area. Its sanatoriums employ climatotherapy and baths to treat pulmonary tuberculosis. A branch of the Crimean Astrophysical Observatory is located there.

Simenovych, Volodymyr [Simenovyč], b 14 January 1858 in Filvarky, Buchach county, Galicia, d 13 June 1932 in Chicago. Physician, journalist, and community leader; brother of O. *Kysilevska. After graduating in law from Lviv University (1884) he emigrated to the United States and settled in Shenandoah, Pennsylvania, in 1887. He edited the weekly **Ameryka*, organized co-operative stores in Pennsylvania, obtained a medical degree (1892), and moved to Chicago, where he taught obstetrics at the National Medical University (1905–7). An active member of the Ukrainian community, he founded the Brotherhood of the Ukrainian National Association and the Ukrainian So-

Volodymyr Simenovych

Myroslav Simenovych-Simens

cial Club, chaired the education commission of the Ukrainian National Association (1912–14), and edited the weekly *Ukraina* (1930–2).

Simenovych-Simens, Myroslav [Simenovyč-Simens], b 16 February 1885 in Chernivtsi, Bukovyna, d 14 March 1967 in Chicago. Physician and community leader. After emigrating to the United States in 1907, he graduated from Loyola University (1912) and practiced medicine in Chicago. In 1920 he served in the mission of the Western Ukrainian National Republic to London. In the interwar period he organized the hetmanite movement in the United States and served as chief otaman of the *Sich societies in the United States and Canada (1927–40). In 1933 he chaired the exhibition committee which set up the Ukrainian pavilion at the Chicago World's Fair. He was one of the founders of the Ukrainian Congress Committee of America in 1940 and then the United Ukrainian American Relief Committee. After the war he revived the United Hetman Organization and served as its president (1952–9), and helped establish the League of Americans of Ukrainian Descent and the Ukrainian Medical Association of North America. He was elected the first president of the Ukrainian Museum in Chicago, which he helped found in 1953. In recognition of his contributions to the Ukrainian cause he was awarded an honorary doctorate by the Ukrainian Free University (1959).

Valentyn Simiantsev: *Portrait of Gen Mykhailo Omelianovych-Pavlenko* (1948)

Simferopol. See Symferopil.

Simiantsev, Valentyn [Simjantsev], b 23 April 1899 in Velykyi Burluk, Vovchanske county, Kharkiv gubernia, d ? Sculptor and writer. An engineer by training, during the Ukrainian-Soviet War he served in the cavalry of the Khmelnytsky Regiment (1917–20). As an interwar émigré in Czechoslovakia, he studied art at the Ukrainian Husbandry Academy in Poděbrady (to 1929) and worked as an engineer. A postwar refugee, in 1949 he settled in the United States and worked as sculptor for the US Military Institute of Pathology in Washington. He has sculpted busts and medallions and has written four volumes of memoirs (1963, 1973, 1976, 1978).

Ludwyk Simiginowicz-Staufe

Kostiantyn Siminsky

Simiginowicz-Staufe, Ludwyk Adolph [Symyhynovyč] (pseuds: Adolph Sand, Adolph Staufe), b 28 May 1832 in Suceava, Rumania, d 19 May 1897 in Chernivtsi. German writer and ethnographer; the first German poet in Bukovyna. The son of a Ukrainian father and a German mother, he was educated in Chernivtsi and Vienna. After debuting as a poet in Chernivtsi (1848) he worked as a teacher there (1849–52, 1857–8, 1876–97) and in Kronstadt (Braşov), Transylvania (1858–71), and as a journalist and critic in Vienna (1852–6). His literary and theater reviews, stories, poems, and translations of Ukrainian, Rumanian, and Polish fairy tales were published in German periodicals in Vienna, Chernivtsi, Lviv, and elsewhere. He wrote poetry collections and compiled the first album of German poetry published in Bukovyna (1852). He also compiled and translated *Märchen aus der Bukowina* (2 vols, 1853, 1855), *Ruthenische Sagen und Märchen aus der Bukowina* (1880), and *Kleinrussische Volkslieder* (1888).

Siminsky, Kostiantyn [Simins'kyj] (Syminsky), b 6 March 1879 in Myleichytsi, Brest county, Hrodna gubernia, d 13 June 1932 in Kiev. Civil and construction mechanics engineer; full member of the VUAN from 1926. He studied at the Kiev Polytechnical Institute and in 1914 became a professor there. He taught and conducted research at various institutions in Kiev. He became director of the VUAN Institute of Technical Mechanics (in 1921) and the Kiev branch of the Scientific Research Institute of Structures of the VUAN (in 1929) and was vice-president of the VUAN (1931–2). He studied fatigue effects in metals and wood, particularly in bridges, and developed the method

of determining fatigue effects by drilling holes in materials. He also studied the strength of other building materials (eg, granite) and developed new equations and measuring methodology for structures. Among his numerous works are monographs, including textbooks on the statics of structures (1930), technical mechanics (1931), and spatial forms (1934).

Alex Simirenko

Roman Simovych

Simirenko, Alex [Symyrenko, Oleksa], b 6 September 1931 in Kiev, d 27 April 1979 in Philadelphia. Sociologist; son of V. *Symyrenko. He and his mother fled from Soviet Ukraine in the late 1930s and lived as refugees in Prague and postwar Bavaria. In 1950 they emigrated to the United States. Simirenko graduated from the University of Minnesota (PH D, 1961) and was a professor of sociology at the University of Nevada (1960–9), California State University (Northridge, 1968–71), and Pennsylvania State University (from 1969). A specialist in American ethnic studies and Soviet sociology, he wrote *Pilgrims, Colonists, and Frontiersmen: An Ethnic Community in Transition* (1964), about the Transcarpathian community in Minneapolis, and edited, with introductions, the collections *Soviet Sociology: Historical Antecedents and Current Appraisals* (1966) and *Social Thought in the Soviet Union* (1969). An edition of his selected articles, *The Professionalization of Soviet Society*, was published posthumously in 1982.

Simon (Symon), b ca 1166, d 22 May 1226. Churchman and literary figure. A monk of the Kievan Cave Monastery, he became bishop of Vladimir-Suzdal in 1215. His correspondence with the monk Polikarp provided the basis for the redaction of the *Kievan Cave Patericon. He was buried at the Cave Monastery, where he lived as an ascetic before his death. He was later canonized by the Orthodox church.

Simovych, Oksana [Simovyč] (née Boiko), b 18 August 1914 in Ternopil, Galicia, d 15 January 1986 in Philadelphia. Violinist and teacher; wife of R. *Simovych. A graduate of the Chopin School of Music in Stanyslaviv (1938), she also studied at conservatories in Warsaw, Vienna, and Philadelphia. From 1930 she performed as a solo violinist or in ensemble in Ukraine, Western Europe, and the United States. She was a member of the Munich Symphony Orchestra (1940s), the Settlement Music School

orchestra (Philadelphia, 1950s), and the orchestra of the Ukrainian Music Institute of America (Philadelphia, 1961–73).

Simovych, Roman [Simovyč], b 28 February 1901 in Sniatyn, Galicia, d 30 July 1984 in Lviv. Composer and teacher. He graduated in composition and piano from the Prague Conservatory in 1933 and completed its Master School in 1936 in the composition class of V. Novak. From 1936 he taught at the Lysenko Higher Institute of Music in Drohobych and Stanyslaviv. From 1951 he lectured at the Lviv Conservatory (professor in 1963). His compositions include the ballet *Dovbush's Sopilka* (1948), seven symphonies (including the *Hutsul* [no. 1] and the *Lemko* [no. 2]); the symphonic poems *Maksym Kryvonis* (1954), *Dovbush* (1955), and *In Memory of Ivan Franko* (1956); overtures for symphony orchestra; a string quartet; numerous works for piano (two trios and two sonatas, three suites, a sonatina, and a fantasia); and works for choir with orchestra and for choir a cappella.

Vasyl Simovych

Simovych, Vasyl [Simovyč, Vasył'] (pseud: V. Ver-nyvolia), b 9 March 1880 in Hadynkivtsi, Husiatyn county, Galicia, d 13 March 1944 in Lviv. Linguist, philologist, and cultural figure; member of the Shevchenko Scientific Society (NTSh) from 1923. As a student at Chernivtsi University (1899–1904), where his mentor was S. *Smal-Stotsky, he joined the *Revolutionary Ukrainian party and in 1902–3 was a coeditor of its journals *Haslo* and *Selianyn* and of the newspaper *Bukovyna*. He defended his PH D dissertation on the verb in I. Galiatovsky's works in 1913. During the First World War he worked with the *Union for the Liberation of Ukraine as a cultural organizer and teacher in German and Austrian POW camps holding 40,000 Ukrainian soldiers of the Russian Army. He produced for them a synchronic grammar of Ukrainian (1918); its expanded 2nd edition (1921) incorporated elements of scholarly grammar. In 1919–20 he headed the Cultural-Educational Department of the Ukrainian Military Mission for Ukrainian Prisoners in Germany, edited its periodical, *Shliakh* (Salzwedel), and wrote a popular booklet on how to become literate. In Berlin (1920–3) he worked as an editor and translator for the Ukrainiska Nakladnia publishing house and prepared annotated editions of T. Shevchenko's **Kobzar* (1921) and of works by I. Franko and B. Lepky (1922). Then, while serving as a professor (1923–33; and rector, 1926–30) at the *Ukrainian

Higher Pedagogical Institute in Prague and at the Higher Trade School in Prague, he played an active role in Ukrainian life in Czechoslovakia. He was a member of the Prague Linguistic Circle, and produced a textbook of Old Church Slavonic grammar (1926), an anthology of Old Ukrainian literature (1932), and articles in Ukrainian historical morphology (eg, on the pronoun *ščo* 'what, that', masculine nouns and male names ending in *-o*, and adjectives) and phonology (the interplay of *e* and *o*) and the history of Ukrainian linguistics and orthography (I. Galiatovskyy's translations of the Bible, M. Luchkai's grammar, the *drahomanivka* script, J. Jireček's proposal for a Ukrainian Latin alphabet).

After 1933, in Lviv, Simovych worked as an editor of the Prosvita society's publications (including the journal *Zhyttia i znannia*, in which he published articles on the Ukrainian language), *Ukrains'ka zahal'na entsyklopediia* (The Ukrainian General Encyclopedia), the cultural-literary journal *Nazustrich* (1934–8), and the scholarly journal *S'ohochasne i mynule* (1939). He was a member of the NTSh board of directors and the NTSh Language Commission. He devoted his attention to Ukrainian modern and historical phonology and morphology, the history of Ukrainian orthography, and the practical problems of the normative language. The first and most prominent Ukrainian phonologist of the 'Prague structuralist school,' he combined its ideas with the approaches of W. Humboldt and O. *Potebnia.

During the first Soviet occupation of Galicia (1939–41), Simovych served as professor, dean of philology, and rector (1941) at Lviv University. Under the German occupation (1941–4) he was briefly imprisoned, and then worked as an editor for the Lviv branch of the *Ukrainske Vydavnytstvo* publishing house and played an active role in the Ukrainian Central Committee's Scholarly Fund and Relief Committee for Eastern Ukrainian Refugees. A detailed evaluation of his scholarly contributions is found in the two-volume collection of his works *Ukrains'ke movoznavstvo* (Ukrainian Linguistics, 1981, 1984), edited by G.Y. Shevelov.

G.Y. Shevelov

Simpson, George, b 24 March 1893 in Chatsworth, Ontario, d 6 March 1969 in Saskatoon. Historian and civic figure; full member of the Shevchenko Scientific Society from 1948 and of the Ukrainian Academy of Arts and Sciences in Canada. After studying at the University of Saskatchewan (1919), the University of Toronto (1920), and the University of London he became a lecturer in history at the University of Saskatchewan in Saskatoon in 1922 (professor in 1928, department head in 1940). Simpson developed a considerable empathy for Ukrainians, through his contacts with them in the 1920s, which led him to learn the Ukrainian language and to organize the first department of Slavic studies at a Canadian university, in Saskatoon in 1945. He edited an English translation of D. Doroshenko's *History of the Ukraine* (1939), prepared a series of radio broadcasts in 1939 on the Ukrainian question, and wrote several items about Ukrainian history, including a historical atlas of Ukraine (1941). He was an adviser to public officials in Canada on Ukrainian matters and a participant in the negotiations leading to the formation of the Ukrainian Canadian Committee (now Congress).

Sindians (*syndy*). A Maeotian tribe which inhabited the Taman Peninsula, the Black Sea coastal region adjacent to it, and a portion of the Kuban during the 1st millennium BC. The Sindians practiced agriculture, fishing, manufacturing, and trade. They formed a state in the 5th century BC, and a century later they became part of the Bosporan Kingdom. The Greeks exerted a major influence on the Sindians, particularly with respect to language and religion. In the 1st to 2nd century AD they were assimilated by the Sarmatians. Many archeological remains in the Taman and Kuban regions can be traced to the Sindians. The most noted among them are the *Sim Brativ fortified settlement and the *Sim Brativ kurhans.

Volodymyr Singalevych

Gen Volodymyr Sinkler

Singalevych, Volodymyr [Singalevyč] (originally Schilling), b 1880 in Galicia, d 1945 in Austria. Politician and civic figure of German heritage. A lawyer by training, he was a member of the National Democratic party, an elected representative to the Austrian parliament from the Peremyshl region (1911–18), and a member of the Galician Diet (1913–14). From 1914 he was in Vienna as deputy chief for the military administration of the Ukrainian Sich Riflemen and as a member of the National Council of the Western Ukrainian National Republic (1919–23, responsible for finances and, later, internal affairs). In 1930–9 he was director of the Land Mortgage Bank in Lviv.

Sinkevych, Dionisii [Sinkevych, Dionisij], b ? Rozdilie, Galicia, d ? Engraver. The hegumen of the Krekhiv (1690–1700) and St George's (Lviv) monasteries, he did a large wood engraving of the Krekhiv monastery (1699), which is of interest to historians of wooden architecture, and illustrated the Akathist (1699), Hiermologion (1700), and Triodion for Eastertide (1701) published in Lviv. Western influences are evident in his work.

Sinkler, Volodymyr, b 12 January 1879 in Novoi Margelan, Fergana oblast, Turkestan, d 1945 in Kiev. UNR Army general. A graduate of the General Staff Academy in St Petersburg, during the First World War he reached the rank of brigadier general in the Russian army. In 1918 he joined the Ukrainian State army and served as general quartermaster on the General Staff. In 1919 he was chief of staff of the UNR Army, and in 1920 he became chief of the General Staff and a member of the Higher Military Council. He was promoted to major general by the UNR govern-

ment-in-exile. When the Red Army occupied Poland in 1945, he was arrested by the NKVD. He died in prison.

Title page of *Sinopsis* (1674)

Sinopsis (Synopsis). One of the first synthetic surveys of Ukrainian and East European history. It was first published by the Kievan Cave Monastery Press in 1674, and some 30 more printings had appeared by 1836, 21 of them in St Petersburg. The author is believed to have been I. *Gizel or a monk at the Kievan Cave Monastery, P. Kokhanovsky. *Sinopsis* covers events from the time of the early Slavs (relating an account of them as descendants of Mosoch, the son of Japheth) to the mid-17th century. The third Kiev edition (1680) includes an account of the Chyhyryn campaigns of 1677–9 and the reign of Tsar Fedor Alekseevich. Based on historical works by M. Strykowski, M. Bielski, M. Kromer, and A. Guagnini, as well as the Primary, Hustynia, and other Rus' and Cossack chronicles, it attempts to justify historically the unification of Ukraine and Russia. It devotes particular attention to the political history of Kievan Rus' and includes lists of Rus' princes, Polish palatines, Cossack hetmans, Russian tsars, and metropolitans of Kiev. The *Sinopsis* was for many years the standard text on the history of Kievan Rus'. It gained great popularity throughout Ukraine and Russia and was translated into Latin, Greek, and Rumanian.

Sioto (Hamlet). A bilingual Polish-Ukrainian miscellany, four volumes of which were published in the Polish alphabet in Lviv in 1866–7. The editor and publisher was P. *Svientsitsky (Święcicki), who had as his aim the strengthening of Ukrainian-Polish understanding and the combating of Galician Russophilism and Russian imperialism. *Sioto* contained articles on Ukrainian Cossack history and T. Shevchenko; prose and poetry by Svientsitsky, Shevchenko, Yu. Fedkovych, H. Kvitka-Osnovianenko, and M. Vovchok; a Ukrainian translation of the Primary Chronicle; poems dedicated to Shevchenko by Polish émigré authors; and bibliographic surveys of Ukrainian publications.

Sion, tserkov', shkola (Zion, Church, School). A semi-monthly supplement to **Vistnyk*, the official newspaper for Ukrainians in the Austrian Empire, published in Vienna in 1858–9 (a total of 53 issues). It contained belles lettres, news, sermons, and articles on current affairs, culture, and education. The editor and publisher was V. Zborovsky (pseud of Yu. Vyslobotsky).

Sion ruskii. See *Ruskii Sion*.

Siret. See Seret.

Siretsky, Bohdan [Sirec'kyj], b 1907, d 1941 in Mykolaiv. Civic figure. A secondary school teacher in Bukovyna, he was one of the leading members of the Chornomore student society. In the 1930s he revived the Plast Ukrainian Youth Association in Bukovyna and served as its leader (1933–4). During the Second World War he joined the *OUN expeditionary groups and was arrested and shot by the Germans.

Ivan Sirko's gravestone

Sirko, Ivan, b ca 1605–10 in Merefa, Kharkiv region, d 11 August 1680 in Hrushivka, (now Illinka, Tomakivka raion, Dnipropetrovske oblast). Zaporozhian Cossack military leader. He served as colonel of Vinnytsia regiment (1658–60) and was elected Kish otaman of the Zaporozhian Host eight times in the 1660s and 1670s. Sirko participated in the Cossack-Polish War (1648–57), campaigned against the Tatars in the lower Dnieper region and the Perekop Isthmus in the late 1650s, and joined the Varenysia Uprising (1664–5). He led Cossack campaigns against the Crimean Tatars (1668) and against Turkish fortifications in Ochakiv and Islamkermen (1670–1). In 1678, together with the army of Hetman I. Samoilovych and the Russian army of G. Romodanovsky, he halted the advance of Turkish and Tatar forces on Right-Bank Ukraine.

Sirko often changed his political orientation. He opposed I. *Vyhovsky, Yu. Khmelnytsky (whom he had previously supported against Vyhovsky), and P. Teteria for their pro-Polish policies, and during their hetmancies he was not hostile toward Muscovy. After the Treaty of *Andrusovo (1667), however, he became openly anti-Muscovite. Disregarding his own animosity toward the Turks and Tatars, Sirko supported Hetman P. *Doroshenko for a lengthy period before severing ties with him.

Sirko's military exploits against the Turks and Tatars became the subject of folk legends and dumas. His letters to Doroshenko (of 1 October 1673) and the Crimean khan (of 1679) have been preserved (by S. Velychko, A. Rigelman, and N. Markevych). He is associated with a famous letter written by the Zaporozhian Cossacks in reply to the demands of the Turkish sultan to surrender voluntarily (depicted in a painting by I. Repin, 1891). The historian D. Yavornytsky composed two dumas about Sirko and published a biography in 1894.

Vasyl Sirko

Stepan Siropolko

Sirko, Vasyl, b 5 March 1899 in Kinashiv, Rohatyn county, Galicia, d 3 November 1937. Galician Communist leader. In 1919 he was active in the communist underground in Stanyslaviv and took part in the founding conference of the Communist Party of Eastern Galicia. In 1920 he conducted agitation and propaganda within the Ukrainian Galician Army (UHA), helped organize Red UHA units, and, in the summer, headed the Terebovlia county Revolutionary Committee of the *Galician Socialist Soviet Republic. In 1921 he taught at the Second Kiev Red Officers School until April and then supervised CP(B)U agitation and propaganda work in Galicia. He served as a CP(B)U functionary in Kiev, Donetske, Makiivka, and Kryvyi Rih until he was arrested during the Stalinist terror in 1933. He either died in a Soviet concentration camp or was executed by the NKVD.

Siromantsi. See Graywolves Company of the Ukrainian Insurgent Army.

Siropolko, Stepan, b 1872 in Pryluka, Poltava gubernia, d 21 February 1959 in Prague. Pedagogue and bibliographer. He graduated from Moscow University, where he was an active member of the Ukrainian Hromada and co-editor of the periodical *Ukrainskaia zhizn'*. In 1917 he became director of public education in Kiev. While in Kiev he lectured at the Froebel Pedagogical Institute. He also acted as consultant to the General Secretariat of the Central Rada on educational matters. After 1921 he emigrated, first to Poland and then to Czechoslovakia. He was an active member of the Ukrainian community, in Prague in particular: he taught at the Ukrainian Higher Pedagogical Institute (1925-32), he organized and was head of the *Ukrainian Society of Bibliophiles in Prague and edited its journal **Knyholiub*, and he headed the Ukrainian Pedagogical Society in Prague and the Union of Ukrainian Journalists and Writers Abroad. He was also a member of the Ukrainian Historical-Philological Society and became an honorary member of the *Prosvita society in Lviv. He wrote articles on pedagogical topics for Ukrainian- and foreign-language periodicals. His published works include *Vzirtsevyi katalog shkilnoi i narodn'oi biblioteky* (A Model Catalog for the School and Public Library, 1918), *Narodni biblioteky* (People's Libraries, 1919), *Zavdannia shkoly* (The Task of the School, 1919), *Korotkyi kurs bibliotekoznavstva* (A Short Library Science Course, 1924),

Shkoloznavstvo (Pedagogy, 1926), *Narodnia osvita na Soviet-s'kii Ukraïni* (Public Education in Soviet Ukraine, 1934), and *Istoriia osvity na Ukraïni* (The History of Education in Ukraine, 1937).

Siry, Yurii. See Tyshchenko, Yurii.

Sisters of Saint Josaphat (Sestry Sviatoho Sviashchenomuchenyka Yosafata, or Yosafatky). A Ukrainian Catholic order of nuns founded in 1911 by Rev O. Dyky of St George's Cathedral in Lviv with the assistance of Rev I. Zhygal. Its members ran orphanages, homes for the aged, and nurseries; provided religious guidance to young female domestics and workers; and assiduously disseminated the Catholic press. Its rule (388 regulations) was confirmed by Metropolitan A. Sheptytsky and reconfirmed in 1943 by Bishop H. Khomyshyn and in 1975 by Cardinal Y. Slipy. In 1939 the order had 40 members and 16 novices, who lived in eight houses in Lviv archeparchy and two in Stanyslaviv eparchy. It was abolished after the 1944 Soviet reoccupation of Galicia and has since been inactive.

Sisters of Saint Joseph (Sestry Sviatoho Yosyfa, or Yosyfitky). A Ukrainian Catholic order of nuns founded in 1894 by Rev K. *Seletsky, the curate of Zhuzhil, Sokal county, Galicia. Its first convent was opened in 1909 in nearby Tsebliv. After Seletsky's death in 1918, Bishop Y. Kotsylovsky, the order's new guardian, modified and approved the order's rule. The sisters promoted the veneration of St Joseph; performed acts of charity; ran nurseries; and cared for orphans, the infirm, and the aged. They received spiritual guidance from the *Redemptorist Fathers. Before the order was abolished by the Soviet regime in 1945, it had 25 houses and approx 100 sisters in Galicia. Today the order exists in Poland (12 houses and approx 25 members in 1990), Brazil (4 houses and approx 30 members in 1990), and Canada (2 houses in Saskatoon and 1 in Winnipeg and 10 members in 1990). It has operated St Joseph's Home for the Aged in Saskatoon since 1964.

The first home and chapel of the Sisters Servants of Mary Immaculate in Mundare, Alberta (1903)

Sisters Servants of Mary Immaculate (Sestry sluzhebnytsi Neporochnoi Divy Marii). A congregation of Ukrainian Catholic nuns established in 1892 in Zhuzhil, Sokal county, Galicia, by the local priest, K. *Seletsky, un-

der the spiritual guidance of Y. Lomnytsky of the Basilian order. The first charter was approved by Metropolitan S. Sembratovych in May 1892, and in September of that year a novitiate was opened in Zhuzhil, with nine novices. The first prioress was Sister Y. Hordashevska. In 1894 the novitiate was moved to Krystynopil.

The congregation's aims were to educate children; to perform acts of charity; and to run nurseries, orphanages, schools, hospitals, and homes for the aged and infirm. Members of the order also assisted in various church work. Convents of the congregation were established in Canada (1902), Yugoslavia (1906), Brazil (1911), Czechoslovakia (1928), the United States (1935), and Argentina (1965).

The constitution of the Sisters Servants was revised at its first congress, held in 1907 in Galicia, and again in 1929. In 1932 the Congregation for Eastern Churches raised the status of the Sisters Servants of Mary Immaculate to that of a congregation of papal law, thereby standardizing its rules and administration, and in 1934 divided it into three provinces (Europe, Canada, and Brazil). Each province was to govern itself but accepted a common constitution and the authority of the general curia, which was initially in Zhuzhil, then in Krystynopil, and after 1934 in Lviv. After the Second World War the general curia was moved to Rome. At the same time the congregation was suppressed in Galicia by the Soviet authorities, and many of its members who did not flee the Red Army were imprisoned or exiled.

The novitiate of the Sisters Servants of Mary Immaculate in Ancaster, Ontario

Before the war the Sisters Servants had 107 houses in Ukraine, all of which were closed after its abolition by the Soviets. They also maintained 15 orphanages for approx 380 orphans (1938) and provided religious instruction for over 4,200 children. The next largest province was Canada, where by the end of the First World War there were 100 members in 20 houses. Today the Sisters Servants are organized into five provinces (Ukraine, Canada, Brazil, United States, and Poland), two vice-provinces (Czechoslovakia and Yugoslavia), and one delegation (Argentina) and have over 1,000 members in approx 120 houses. The liberalization in Ukraine since the late 1980s has permitted the congregation to re-establish itself there after almost 50 years.

I. Khoma

Sitch. See Sich.

Sitnytsky, Mykola [Sitnyc'kyj], b 1884, d 1934. Galician pedagogue. He taught German and Ukrainian language in the Zalishchyky Seminary and, from 1924 to 1932, in the Ukrainian Girls' Institute in Peremyshl, where for a time he was director. In the period of the Western Ukrainian National Republic he was director of the radio station of the Ukrainian Galician Army.

Yevtym Sitsynsky

Sitsynsky, Yevtym (Yukhym) [Sicins'kyj, Jevtym (Juxym)] (Sichynsky, Sitsynsky), b 1 October 1859 in Maznyky, Letychiv county, Podilia gubernia, d 7 December 1937 in Kamianets-Podilskyi. Historian, archeologist, teacher, and civic activist; member of the Shevchenko Scientific Society from 1894; father of V. *Sichynsky. A graduate of the Kiev Theological Academy (1885), he taught in the Kuban and then was ordained and stationed in Kamianets-Podilskyi (1889), where later he became archpriest of the cathedral parish. He established an eparchial historical-archeological museum in 1890 and directed it until 1922, headed the eparchial historical society (1903–21) and edited its publications *Podol'skie eparkhial'nye vedomosti* and *Trudy* (vols 6, 8–12), helped establish the Prosvita society in Podilia (1905), and carried out extensive field research throughout the region, during the course of which he studied architecture and collected museum pieces. His magnum opus was *Istoricheskie svedeniia o prikhodakh i tserkvakh Podol'skoi eparkhii* (Historical Information about the Parishes and Churches of Podilia Eparchy, 7 vols, 1895–1911), and his other works included *Arkheologicheskaia karta Podol'skoi gubernii* (Archeological Map of Podilia gubernia, 1901), *Ischezaiushchii tip dereviannykh tserkvei Podolii* (The Vanishing Type of Wooden Churches in Podilia, 1904), *Oboronni zamky Zakhidn'oho Podillia* (Defensive Castles of Western Podilia, 1928), and *Narys z istorii Podillia* (Studies of the History of Podilia, 2 vols, 1928). His most popular monograph was *Gorod Kamenets Podol'skii: Istoricheskoe opisaniie* (The City of Kamianets-Podilskyi: A Historical Description, 1895).

In 1918 he helped establish a state university in Kamianets-Podilskyi, at which he taught archeology and Podilian history (1918–20). Under Soviet rule he was given a lowly teaching position at the Institute of People's Ed-

ucation (1920–6) and eventually dismissed. Sitsinsky was arrested in 1929, and spent 10 months in prison. Upon his release he worked for a short time at the museum of the Kievan Cave Monastery. He returned to Kamianets-Podil'skyi, where, forbidden to teach, he lived out his days in poverty.

Siuren camp sites. Two Stone Age cave sites near the village of Tankove (formerly Siuren), Bakhchesarai raion, the Crimea. Siuren was excavated in 1879–80, in 1924–29 by G. Bonch-Osmolovsky, and in 1954–5 by E. Vekilova. Siuren I revealed three Upper Paleolithic occupations containing the remains of hearths, flint and bone tools, and wild animal bones. Of particular interest was the discovery of a piece of a deer antler inscribed with crooked lines and notches. Siuren II contained two Mesolithic occupations in which geometrically shaped flints pieces, arrowheads, and stone and flint tools were found.

Sivach (Sower). A monthly religious journal published in Lviv in 1936–9. The contributors were Revs H. Kubai, O. Gorchynsky, P. Dzedzyk, O. Hodunko, V. Rabii, I. Myroniuk, M. Mosora, and V. Popadiuk. It contained sermons and catechismal materials.

Sivach/The Sower. The semimonthly organ of the Stamford Ukrainian Catholic eparchy. It was founded by Bishop B. Losten in February 1986 and is published in English and Ukrainian. The editor of the English section is Msgr L. Mosko, and the editors of the Ukrainian section are B. Tarnavsky, O. Roshka, and W. Lencyk. The newspaper reports on religious life in the eparchy and on developments in the Ukrainian Catholic church, and includes articles on cultural and historical issues.

Siverianians (*siveriany*). An East Slavic tribe that lived in the Desna Basin and the upper reaches of the Seim, the Sula, the Psol, and the Vorskla rivers late in the 1st millennium AD. Their main settlements included *Chernihiv, Novhorod-Siverskyi, Putyvl, Kursk, and Liubech. The Siverianian territories bordered on those of the Polianians and Drehovichians in the west and the Radimichians, Krivichians, and Viaticians in the north. They settled the uninhabited southern steppes. The Siverianians were primarily farmers, herders, hunters, fishermen, and artisans. In the 8th and early 9th centuries they paid *tribute to the Khazars. Later, together with other East Slavic *tribes, they belonged to the Kievan Rus' state. According to the Primary Chronicle Oleh conquered the Siverianians in 884, and imposed a light tribute upon them and forbade them to give the Khazars any further payments. In 907 they took part in Oleh's campaign against Byzantium. The Siverianians lost their distinctive tribal features, and after 1024 they are not mentioned in the chronicles. A vestige of their name remained in *Siversk principality: the Siversk land was known as such until the 16th or 17th century. Many Siverianian settlements of the 8th to 10th centuries have been discovered near Romen (Monastyryshche, Petrivske, and Novotroitske), as well as kurhan burial sites (with evidence of the tribe's practice of cremation) and valuable treasures.

A. Zhukovsky

Siversk principality. One of the appanage principalities of the Chernihiv-Siversk land. It was founded in 1097 and was also known as Novhorod-Siverskyi principality (after its capital). Initially its territory extended along the Snov and the middle Desna rivers, and after the mid-1130s it expanded along the Seim River as far as Kursk. The region around the upper Desna and the Oka rivers, settled by the *Viaticians, also came under its control.

The first ruler of the Siversk principality was *Oleh Sviatoslavych; his successors, the Olhovych dynasty, frequently also controlled *Chernihiv principality and often contended for the Kievan throne. In the 1140s and 1150s Siversk principality separated from the Chernihiv region, and by the end of the 12th century it had been divided into several small principalities around Kursk, Putyvl, and other cities. Princes of Siversk clashed with the Cumans, particularly in the late 12th century. One of those campaigns, led by *Ihor Sviatoslavych in 1185, was celebrated in the epic poem **Slovo o polku Ihorevi* (The Tale of Ihor's Campaign).

When Batu Khan attacked Eastern Europe in the 1240s, Siversk principality was ravaged, but it continued to exist under Tatar hegemony. In the mid-14th century it came under the Grand Duchy of Lithuania; the first Lithuanian prince of Siversk was Dmytro Olgierdovych (son of Algirdas). Muscovy controlled Siversk principality from 1503 and liquidated it in 1523. The territory was later briefly held by Poland (1618–48).

Siverske [Sivers'ke]. V-19, DB II-4. A city (1989 pop 15,000) on the Bakhmutka River in Artemivske raion, Donetsk oblast. It originated as a workers' settlement around the dolomite-processing plant built in 1913. In 1961 it attained city status. Its original name, Yama, was changed to Siverske in 1973. Today, besides the dolomite-processing complex, it has a brick factory. A literary memorial museum dedicated to V. *Sosiura is located in the city.

Siverskodonetske [Sivers'kodonec'ke]. V-19, DB II-4. A city (1990 pop 132,000) on the Donets River in Luhanske oblast. It was founded in 1934 as the Lyskhimbud builders' settlement during the construction of a nitrogen-fertilizer manufacturing complex in the suburbs of Lysychanske. In 1950 the settlement was renamed, and in 1958 it was granted city status. Today the city is the largest center of the chemical industry in Ukraine. It is the home of the Azot and the Skloplastyk manufacturing consortiums, the Impuls Research and Manufacturing Consortium, a chemical-metallurgical plant, building-materials plants, construction enterprises, and woodworking factories.

Siverskodonetske Azot Manufacturing Consortium (Siverskodonetske vyrobnyche obiednannia Azot). A chemical manufacturing enterprise located in Siverskodonetske, Luhanske oblast. It is based on a chemical manufacturing complex which came into operation in 1951. The consortium produces over 100 items, including ammonium and potassium nitrate, carbamide, ammonium sulfate, ammonia water, ammonium, methanol, formalin, glues, paints, polyethelene, and adipic and sebacic acids.

Siverskodonetske Skloplastyk Manufacturing Consortium (Siverskodonetske vyrobnyche obiednannia Skloplastyk). A fiberglass manufacturing consortium located in Siverskodonetske, Luhanske oblast. It was founded in 1977 on the basis of the first specialized fiberglass factory in the USSR, which came into operation in 1963. It produces over 160 items, including pipes and tubes, noncorroding machine parts, fiberglass sheets, and thermal plastics.

Siverskyi Donets River. See Donets River.

Siverskyi Donets–Donbas Canal. See Donets–Donbas Canal.

Sixth Sich Division of the Army of the UNR (Shosta sichova divyziia Armii UNR). A military force recruited in the spring of 1920 from among Ukrainian POWs (soldiers of the UNR Army and the Russian Volunteer Army) in Polish internment camps at Łańcut and Brest-Litovsk. Its commander, Col M. Bezruchko, and chief of staff, Col V. Zmiienko, had been senior officers in the demobilized Sich Rifleman Group of the UNR Army. Its 250 officers and 1,770 soldiers were organized into the 16th Infantry Brigade (under Col R. Sushko), the 17th Infantry Brigade (Col O. Voroniv), the 6th Sich Cavalry Battalion (Lt V. Herasymenko), the 6th Light Artillery Brigade (Col Nasoniv), the 6th Sich Technical Battalion (Capt V. Bokitko), and several reserve units. As part of the Third Polish Army, the division advanced in early May 1920 from Brest-Litovsk through the Soviet rear to Berdychiv. From 8 May to 9 June it held Kiev, and then it fought the Red Army at Ihnatpil, Perha, Kovel, and Kholm. In late August it distinguished itself in the defense of Zamość. After being transferred to Galicia with the remainder of the UNR Army in September, the division suffered many casualties in the final battles with the Red Army at Popivtsi in November. After the Polish-Soviet armistice in October, most of the remaining soldiers retreated into Poland and were interned in camps at Aleksandrów Kujawski and Szczepiérno. A reserve brigade commanded by Gen Fedyniuk-Bilynsky remained on active duty at Brest-Litovsk until the Second Winter Campaign.

L. Shankovsky

Sixtus Erasmus (Sykst Erazm), b ca 1570 in Lviv, d ca 1635 in Zamostia. Philosopher and physician. After graduating from Cracow University (PH D, 1596) he taught there until 1600 and then studied medicine in Padua (MD, 1602). He worked at the Lviv Catholic Hospital and taught medicine at the Zamostia Academy (1614–29). He wrote a number of scientific books, including an analysis of the mineral waters of the Shklo resort, a study of the curative benefits of mud baths, and a medical commentary on Seneca.

Skaba, Andrii, b 12 December 1905 in Khorishky, Kobeliaky county, Poltava gubernia, d 26 June 1986 in Kiev. Soviet Party and state activist and historian; member of the AN USSR (now ANU) from 1967. After graduating from Kharkiv University (1934) he worked at the Kharkiv Pedagogical Institute and Kharkiv University (1936–40) and headed the departments of contemporary history at the universities of Lviv (1940–1) and Kharkiv (1946–9). He served as director of the Central State Archive of the October Revolution of the Ukrainian SSR in Kharkiv (1946–9) and as editor of the oblast newspaper, *Sotsialistychna Kharkivshchyna*. He was secretary of the Kharkiv oblast committee of the CPU (1951–9), minister of higher and secondary special education of the Ukrainian SSR (1959), and secretary of the CC CPU (1959–68). From 1968 to 1973 he was director of the ANU *Institute of History. Skaba published works on the history of Soviet society and of the Communist party, including a monograph on the Paris Peace Conference and foreign intervention in Soviet territory in 1919 (1971). He was editor in chief of *Radians'ka entsyklopediia istorii Ukrainy* (The Soviet Encyclopedia of the History of Ukraine, 4 vols, 1969–72). Skaba was a hard-line ideologue of the CPSU, particularly regarding *nationality policy, and a proponent of Russification. He persecuted the **shestydesiatnyky* and supported the repression of opposition groups.

A. Zhukovsky

Skadovske [Skadovs'ke]. VII-13. A city (1989 pop 22,900) on Dzharylhach Bay and a raion center in Kherson oblast. It was founded in 1894 as a seaport on the site of the fishing village of Ali-Ahok. In 1961 it attained city status. Skadovske is an industrial, transportation, and health resort center. It has a building-materials and a food industry.

Mykola Skadovsky: *Along Volodymyrka* (oil, 1891)

Skadovsky, Mykola [Skadovs'kyj], b 16 November 1846 in Bilozerka, near Kherson, d 10 June 1892 in Bilozerka. After graduating from the Moscow School of Painting, Sculpture, and Architecture (1869) he studied at the Düsseldorf Academy of Arts. He was a founder of the *Society of South Russian Artists and specialized in genre painting. His works include *Hunting* (1879), *Before the Storm* (1881), *Tavern Orator* (1881), *The Homeless* (1886), *Hunting by His Excellency* (1886), and *Along Volodymyrka* (1891). He also painted some landscapes and portraits.

Bishop Yov Skakalsky

Skakalsky, Yov [Skakal's'kyj, Jov], b 1 January 1914 in Kremianets, Volhynia, d 18 February 1974 in Curitiba, Brazil. Orthodox bishop. He graduated from the theological seminary in Kremianets and was ordained a hieromonk of the Pochaiv Monastery in 1938. During the Second World War he worked in the theological consistency in Kholm and, later, as a chaplain for Orthodox soldiers of the *Division Galizien. In 1951 he emigrated to Canada, where he served as secretary to Metropolitan I. Ohiienko (1953–64) and then as chaplain of St Andrew's College. In 1967 he moved to the United States, and in 1968 he was consecrated a bishop of the Ukrainian Orthodox Church in the USA and vicar for South America. In 1971 he was elevated to the rank of archbishop. He is the author of *Palomnytstvo po sviatykh mistsiakh skhodu* (Pilgrimages to Holy Places in the East, 1966).

Skakandii, Vasyl [Skakandij, Vasyl'], b 4 March 1941 in Serednie, Transcarpathia. Graphic artist. A graduate of the Kiev State Art Institute (1965), he has made prints and illustrated books. He has produced the linocut series 'Oleksa Borkaniuk' and 'Legends of the Carpathians' (1967) and a portrait of V. Stefanyk (1970); illustrated S. Petőfi's poem *Az Apostol* (Apostle, 1968) and a collection of Transcarpathian folk songs (1968); and designed the jacket for P. Skunts's *Na hrani epokh* (At the Turn of Epochs, 1968).

Skala (The Rock). A Ukrainian Catholic reading-room society organized in the Stanyslaviv eparchy of Galicia by Bishop H. Khomyshyn in 1931 as part of *Catholic Action. Skala reading rooms were similar to those of the *Prosvita society. They were normally under the jurisdiction of the local parish priest. In 1936 there were 187 branches of Skala, with some 5,500 members, and by 1939 there were some 3,075 branches, with a membership of 360,000. With the Soviet occupation of Western Ukraine in 1939, Skala was banned by the authorities.

Skala-Podilska [Skala-Podil's'ka]. v-7. A town smt (1986 pop 5,200) on the Zbruch River in Borshchiv raion, Ternopil oblast. Until 1940 it was known as Skala or Skala-nad-Zbruchem (Skala-on-the Zbruch). It is first mentioned in historical documents in the early 14th century. In 1518 it was granted the rights of *Magdeburg law, and in 1538 S. Lanckoroński built a fortress to defend the town from the Tatars and Turks. Nevertheless they destroyed the fortress and town in 1539 and 1615. In 1648 M. Kryvonis captured Skala, but the Poles soon recovered it. The town declined under Turkish rule (1672–99). In the 18th century the Poles tried to Polishize it, and in 1719 they built a Roman Catholic church there. In 1770 half the population

The castle ruins in Skala-Podilska

perished from the plague. The town prospered under Austrian rule (1772–1918). In the interwar period it was under the rule of Poland. Today it has an asphalt, a fruit-canning, and a food-processing plant. Its monuments include the ruins of a castle, a baroque palace, a Roman Catholic church (1719), and one of Ukraine's finest parks (34 ha).

Skala-Starytsky, Myroslav. See Starytsky, Myroslav.

Remnants of the castle in Skalat

Skalat. iv-6. A town (1989 pop 5,100) on the Hnyla River in Pidvolochyske raion, Ternopil oblast. The village was first mentioned in a historical document in 1564. In 1600 it was granted the rights of *Magdeburg law, and in 1630 its Polish landlord built a castle there. In 1648 the castle was captured by the Cossacks, and in 1672 it was destroyed by the Turks. At the partition of Poland in 1772, Skalat was annexed by Austria, and in 1867 it became a county center

of Galicia crownland. In the interwar period (1919–39) the town was under Polish rule. Today it is an industrial center with a radio factory, a chemical products plant, an asphalt factory, and a mixed-feed factory. The old castle was renovated at the end of the 19th century and is a tourist attraction.

Skalii, Raisa [Skalij, Rajisa], b 11 December 1938 in Bilashky, Pohrebyshche raion, Vinnytsia oblast. Theater and cinema critic. She completed study at the Kiev Institute of Theater Arts (1967) and since 1971 has headed the art section of *Literaturna Ukraïna*. She is the author of many articles about L. Kurbas and established the date of his death from her research in the Solovets Islands.

Skalkovsky, Apolon [Skal'kovs'kyj], b 13 January 1808 in Zhytomyr, Volhynia gubernia, d 9 January 1899 in Odessa, Kherson gubernia. Economist and historian; corresponding member of the Russian Academy of Sciences from 1856. He studied law at the universities of Vilnius and Moscow. He was one of the founders of the *Odessa Society of History and Antiquities and an active participant in the *Society of Agriculture of Southern Russia. During the preparations for the peasant reforms of 1861 he defended the serfs.

Skalkovsky wrote numerous works on the history and economics of 18th- and 19th-century Southern Ukraine, including *Khronologicheskoe obozrenie istorii Novorossiiskogo kraia, 1730–1823* (A Chronological Survey of the History of New Russia Land, 1730–1823, 2 vols, 1836, 1838), *Opyt statisticheskogo opisaniia Novorossiiskogo kraia* (An Attempt at a Statistical Description of New Russia Land, 2 vols, 1850, 1853; vol 3 remained in manuscript), and *Pervoe tridtsatiletie Odessy, 1795–1825* (The First Thirty Years of Odessa, 1795–1825, 1837). He discovered and preserved the archives of the 18th-century Zaporozhian Sich (now in Kiev) and published a number of studies based on them, particularly *Istoriia Novoi Sechi ili posledniago Kosha Zaporozhskogo* (History of the New Sich or the Last Zaporozhian Kish, 3 vols, 1840; 2nd edn 1846; 3rd edn 1885–6). He also published documentary studies on the history of the 18th-century Zaporizhia and Right-Bank Ukraine (mostly in *Kievskaiia starina*). His historical works were written from a Romantic perspective and are imbued with an idealized view of the Zaporizhia. His interpretation of the haidamaka uprisings is from the point of view of the Polish gentry. His works are a valuable historical source because of the scope of their documentation. Skalkovsky also wrote publicistic articles and several novels. His archives, including an unpublished journal (begun in Polish during his student days and later written in Russian), are preserved in St Petersburg and Odessa.

O. Ohloblyn, A. Zhukovsky

Skansens. See Museums of folk architecture and folkways.

Skarga, Piotr, b February 1536, d 27 September 1612 in Cracow. Polish Jesuit Counter-Reformation polemicist. He taught at the Jesuit academy in Vilnius and then served as an adviser on religious affairs to King Sigismund III Vasa. He engaged in polemics with both Protestants and Orthodox in the Polish-Lithuanian Commonwealth. An early proponent of the union of the Orthodox

church with Rome, in 1577 he wrote *O jedności Kościoła Bożego pod jednym pasterzem* (On the Unity of God's Church under One Shepherd), one of the first examples of *polemical literature involving the Ukrainian church. Dedicated to Prince K. *Ostrozky, the most influential Ukrainian Orthodox leader, the tract outlined the ideological basis for a church union. In 1595–6 Skarga participated in the synods and discussions that culminated in the Church Union of *Berestia; he delivered the closing speech at the synod, in October 1596, and wrote the treatise 'Synod brzeski i jego obrona' (The Berestia Synod and Its Defense), translated and published in Ukrainian in 1597. His other polemical works include *O rządzie y jedności Kościoła Bożego pod jednym pasterzem* (On the Order and Unity of God's Church under One Shepherd, 1590) and *Na treny i lament Theofila Ortologa do Rusi greckiego nabożeństwa przestroga* (On the Threnos and Lament of Theofilus Ortologion, a Warning to the Greek Faithful of Rus', 1610).

Skarzhynsky [Skarzhyns'kyj]. A family line of nobility and Cossack officers of Belarusian origin. Oleksander-Mykhailo Skarzhynsky (d ca 1753) graduated from Orsha College and in the 1730s served as a translator from Latin and Polish in the Russian army. He resettled in Ukraine and became captain of Lubni regiment (1737–50). His sons were Ivan, the flag-bearer of Lubni regiment (1773) and later a marshal of the nobility in Zolotonosha county; Mykhailo, captain of Lubni regiment (1765–73) and marshal of the nobility in Lubni county; and Petro. Three branches of the Skarzhynsky family originated from them and intermarried with many Ukrainian *starshyna* families in the 18th and 19th centuries (the Skoropadsky, Zakrevsky, Znachko-Yavorsky, Myloradovych, Mykloshchivsky, and Sudiienko families). The Lubni branch included Kateryna Skarzhynska (1853–1924), who founded the Museum of Ukrainian Antiquities of Lubni (in Kruhlyk village, 1874). The Chernihiv branch included the brothers Matvii (b 1830) and Ivan (1836–97) Skarzhynsky, who were noted activists in Chernihiv gubernia in the later 19th century. They assisted O. Lazarevsky in gathering archival materials on the history of the Hetmanate. The Kherson branch included a number of noted military and zemstvo administration officials in the 19th and 20th centuries, such as Viktor *Skarzhynsky.

O. Ohloblyn

Skarzhynsky, Viktor [Skarzhyns'kyj], b October 1787 in Trykraty, Yelysavethrad county, Katerynoslav vicegerency, d 1861. Landowner and developer of new farming methods. He graduated from Moscow University (1805) and worked with the Department of Public Education. He returned to his family's estate and introduced crop rotation and modern methods of land cultivation in Southern Ukraine. In addition to breeding fine horses, he acclimatized a breed of Caucasian sheep and a breed of Hungarian cattle. He also acclimatized various tree and bush varieties, from Western Europe and North America, to Ukrainian conditions and developed a fruit orchard with

221 varieties, a dendrological park with 281 varieties, a mulberry plantation of 150 ha, and a vineyard (100 ha). He was a strong promoter of steppe forestation and planted about 400 ha of forest on his estate. To share his experience and encourage others to follow his example, Skarzhynsky published many articles on farming and forestation, most of them in *Zapiski Imperatorskogo obshchestva sel'skogo khoziaistva Iuzhnoi Rossii*.

Skating (*kovzaniarskyi sport*). Figure skating and speed skating were introduced in Ukraine in the 19th century. They have become well developed under Soviet rule. The Skating Federation of the USSR joined the International Skating Union in 1947, and Soviet skaters have competed in world and European competitions since 1948 and in Olympic speed skating since 1956. Medals in world skating championships have been captured by the Ukrainian athletes O. Honcharenko (1953, 1956, 1958), V. Bryndzei (1977), and T. Tarasova (1981). In 1983 N. Horbenko won the gold medal at the 1984 world junior championships. In 1984 V. Huk won two men's gold medals (500 m, 1,500 m) and one silver (3,000 m) in the world junior speed skating championships and was chosen the overall world champion. In 1987 R. Popadchuk set a world junior record in the men's 500-m (37.58). V. Petrenko won a bronze medal in men's figure skating at the 1988 Winter Olympics, a silver at the 1990 and 1991 world championships, and a gold at the 1992 Winter Olympics. O. Baiul won the world championship in women's figure skating in Prague in 1993.

Skazaniie i strast' i pokhvala sviatuiu muchenyku Borysa i Hliba (The Tale and Passion and Glorification of the Holy Martyrs Borys and Hlib). One of the oldest monuments of Ukrainian literature. It describes the murder of *ss Borys and Hlib by their brother, Prince Sviatopolk I, after the death of their father, Volodymyr the Great, in 1015. The oldest extant manuscript of the tale dates from the late 11th century and is found in the **Uspenskii sbornik* of the 12th century. More than 170 manuscript copies of the tale have survived, in six redactions, many of them with different titles. They all deal with the same central issues and use a rhythmical prose, stylized laments, and complex literary devices, based in part on the Bible and other liturgical books. The tale was used to promote the cult of Borys and Hlib and their canonization and to condemn the fratricidal struggle among the Rus' princes.

Skehar, Hryhorii, b 30 August 1891 in Pohorylivka, Kitsman county, Bukovyna, d 31 August 1957 in Los Angeles. Civic activist and journalist. After emigrating to

Hryhorii Skehar

Canada in 1908 and then to the United States in 1919, he graduated from Northwestern University (DDS, 1923) and practiced dentistry in Chicago. He was active in the Organization for the Rebirth of Ukraine and a contributor to many Ukrainian papers in Canada and the United States. From 1938 he reviewed books on Ukrainian history and literature for *Books Abroad*. For many years he served as secretary of the Ukrainian Center in Los Angeles. In 1940 he published his recollections, titled *Po Amerytsi* (Through America).

Skhidnii svit (Oriental World). A scholarly journal of the *All-Ukrainian Learned Association of Oriental Studies (VUNAS), published bimonthly in Kharkiv in 1927–31 (a total of 17 issues). It succeeded *Biuletyn' VUNAS* (5 issues, 1926). After the first issue the articles appeared in Ukrainian with Russian, English, French, and German résumés. The journal published articles on the history, archeology, culture, economy, literature, and contemporary politics of the Near, Middle, and Far East; Soviet Central Asia; the Crimea; and Caucasia. Many articles focused specifically on Ukraine's relations with these areas. Attention was also devoted to contemporary political and economic developments. The journal also contained book reviews and notices and reports on VUNAS activities and Oriental studies in Ukraine and abroad. Among its 180 contributors were prominent scholars, such as A. Krymsky, V. Dubrovsky, A. Kovalivsky, V. Buzeskul, P. Ritter, M. Horban, O. Hrushevsky, V. Parkhomenko, and Ya. Riappo. In 1929 *Skhidnii svit* had a pressrun of 600. In late 1930 it was renamed *Chervoonyi skhid*; under its new name it ceased publication after its third issue. An index to it was published in Kharkiv in 1964.

The skiing team of Peremyshl's Berkut sports society in the Carpathian Mountains (1931)

Skiing (*lyzhnyi sport, leshchetarstvo*). Skiing was introduced in Western Ukraine in the 1890s and was promoted there by A. Budzynovsky and I. Bobersky in the early 20th century. The sport became popular in the 1920s, thanks to the efforts of the *Carpathian Ski Club in Lviv, which organized Alpine and Nordic competitions in Lviv and the Carpathian Mountains, and the Sokil and Luh athletic societies and Plast scouting organization. Because of central and eastern Ukraine's flatness, skiing was less popular there. In the 1920s it began developing in the Donbas, and

a Soviet Winter Spartakiad was held there in 1927. In time Alpine and Nordic skiing became a significant part of Soviet military training in various regions of Soviet Ukraine. After the Second World War, the Carpathian region, particularly the resorts of Vorokhta and Slavske, became Ukraine's main skiing center. Skiing was part of the school and Ready for Labor and Defense of the USSR physical education programs. Republican and USSR skiing championships were held annually. The Carpathian Ski Club was revived in the United States and since 1955 has cosponsored annual skiing competitions with the Ukrainian Sports Federation of the USA and Canada.

Skirgaila (Skyrhailo, Ivan), b 1354, d 1397 in Kiev. Lithuanian prince and ruler of Kiev in 1395–7; son of Algirdas. A strong supporter of his brother, Władysław II *Jagiello, he was his vicegerent from 1386 until 1392, and, being Orthodox, encouraged Ruthenian activity in the Grand Duchy of Lithuania. He lost his influence when Jagiello relinquished Lithuania to their cousin, Vytautas. In 1395 he was granted Kiev after the death of Volodymyr, the son of Algirdas. Skirgaila died under mysterious circumstances, probably from poison.

Skivsky, Ivan [Skivs'kyj], b 1777, d 1850. Basilian priest and professor. He was raised in the Volhynia region, and studied at Vilnius University and then taught at Basilian schools in Uman, Bar, and Liubar. In 1824 he became archimandrite of the Pochaiv Monastery. In 1831 he was arrested by tsarist authorities during the suppression of the Uniate church in the Russian Empire and exiled to the Kostroma region. Upon his return to Kiev in 1848, he served as a priest in a Latin rite church.

Skladka (no. 1, 1887)

Skladka (The Contribution). The title of four literary almanacs edited by V. Aleksandrov (Kharkiv 1887, 1893) and K. Bilylovsky (Kharkiv 1896, St Petersburg 1897). Published in them were poems by Aleksandrov, Bilylovsky, V. Samiilenko, B. Hrinchenko, Ya. Shchoholev, P. Hrabovsky, I. Franko, M. Vorony, V. Shchurat, I. Steshenko, L. Starytska-Cherniakhivska, P. Richytsky, S. Shelukhyn, H. Kerner, F. Korsh, and N. Shamraiev; prose by Bilylovsky, H. Barvinok, M. Hrinchenko, Starytska-Cherniakhivska, Lesia Ukrainka, D. Mordovets, I. Nechui-Levytsky, S. Nis, and A. Krymsky; V. Samiilenko's drama *Marusia Churavna* and M. Kropyvnytsky's opera *Vii*

(based on N. Gogol's story); Bilylovsky's memoirs and bibliography of Aleksandrov; and oral folklore transcriptions and ethnographic articles by D. Yavornytsky.

Składkowski, Felicjan, b 9 June 1885 in Gąbin, Warsaw gubernia, d 31 August 1962 in London. Polish military and state figure; a doctor by training. He was a close associate of J. Piłsudski, and as minister of internal affairs (1926–31) he implemented the *Pacification operation aimed against Ukrainians. He was appointed premier of Poland by E. Rydz-Śmigły (1936–9); as such he was also partly responsible for the harsh anti-Ukrainian policies of the Polish government in the prewar period. He emigrated after the Second World War. His writings were published in *Nie ostatnie słowo oskarżonego: Wspomnienia i artykuły* (Not the Last Word of the Accused: Memoirs and Articles, 1964).

Sklavenes (*sklaviny*). The Greek name for West Slavs, used by Byzantine writers of the 6th to 8th centuries AD. The term was used to distinguish the Slavic tribes inhabiting the territory between the Dniester and the Danube rivers, including southern Poland, Slovakia, and Transylvania, from the *Antes to the east. The Sklavenes practiced agriculture, animal husbandry, craft manufacturing, and trade. They formed a strong tribal confederation, which was destroyed by the *Avars in the second half of the 6th century.

Skliar, Ivan [Skliar], b 21 February 1906 in Myrhorod, Poltava gubernia, d 26 October 1970 in Myrhorod. Banduryst. He joined the Myrhorod Banduryst Ensemble in 1927 and served as its director in 1933–43. From 1943 he sang as a soloist with the Verovka State Chorus. He composed many songs and pieces for folk instruments and made technical improvements to the bandura and other instruments that allowed them to be played in a broader range of keys.

Skliarenko, Semen [Skliarenko], b 26 September 1901 in Keleberda, Zolotonosha county, Poltava gubernia, d 8 March 1962 in Kiev. Writer. In the 1920s he worked as a journalist, first in Chernihiv and then at the Kiev newspaper *Proletars'ka pravda*. He began to publish his poetry in 1918 and was coeditor of one of the first Soviet literary journals, *Vyr revoliutsii* (1921), and, later, of the journal *Zhyttia i revoliutsiia*. Skliarenko published prose works from 1930; he wrote over 60 books of stories, novelettes, and novels. During the 1930s he wrote a series of major prose works on the subject of construction, including a novel about the construction of the Dnieper Hydroelectric Station, *Burun* (The Billow, 1932). The novel-trilogy *Shliakh na Kyiv* (The Road to Kiev, 1937–40), an attack aimed at 'Ukrainian bourgeois nationalism,' distorts, according to the official Soviet interpretation, the historical events of the Ukrainian liberation struggle. During the Second World War, Skliarenko was a war correspondent and wrote the war novels *Ukraina klyche* (Ukraine Calls, 1943) and *Podarunok z Ukraïny* (Gift from Ukraine, 1944). Critics noted the formulaic nature of Skliarenko's postwar novel *Khaziaïn* (Farmer, 1948), about the rebuilding of the co-operative farms, and, similarly, his adherence to a fixed formula and his lack of knowledge of pre-Soviet Transcarpathian life in *Karpaty* (The Carpathians, 1952). Skliarenko's greatest achievements are the historical

Semen Skliarenko

Volodymyr Skliarenko

novels *Sviatoslav* (1959) and *Volodymyr* (1962). Editions of his works have been published in five (1965) and three (1981) volumes.

I. Koshelivets

Skliarenko, Volodymyr [Sklijarenko], b 7 June 1907 in Kiev, d 8 May 1984 in Kiev. Theater director; pupil of L. *Kurbas. He completed study at the Lysenko Music and Drama Institute in Kiev and worked in *Berezil (director's workshop, 1926) until 1933. He was artistic director of the Kharkiv Young Spectator's Theater (1935–44), the Lviv Young Spectator's Theater (1944–7), the Lviv Opera Theater (simultaneously he taught in the Lviv Conservatory, 1947–52), the Kharkiv Opera Theater (1952–4), the Kiev Opera Theater (1954–62), and the Kiev Ukrainian Drama Theater (1962–7). He taught at the Kiev Institute of Theater Arts (1967–75) and the Kiev Institute of Culture (1967–84). He produced approx 200 dramas, operas, and operettas, including M. Zarusny's *Maryna*, M. Lysenko's *Taras Bul'ba*, and H. Maiboroda's *Mylyana*.

Skliarenko, Yevhen [Sklijarenko, Jevhen], b 18 January 1924 in Baitsury, Belgorod region, Russia. Historian. He graduated from the Kiev Pedagogical Institute (1951), and in 1956 he began working at the AN URSR (now ANU) Institute of History. From 1966 to 1970 he headed its Department of Scientific Information and Propaganda. He published works on the CPU and on the history of the working class.

Skliar-Otava, Polina. See Otava, Polina.

Sklifosovsky, Nikolai (Sklifasovsky), b 6 April 1836 in Dubossary, Tyraspil county, Kherson gubernia (now Moldova), d 13 December 1904 in Yakivtsi (now part of Poltava). Russian surgeon. A graduate of Moscow University (1859), he practiced medicine in Odessa and defended a doctoral dissertation at Kharkiv University (1863). He was a professor of surgical pathology at Kiev University (1870) and the St Petersburg Medico-Surgical Academy (1871), head of the surgical clinic of Moscow University and consultant to the surgical department of the Moscow Military Hospital (1880), and director of the St Petersburg Institute for the Upgrading of Physicians (1893–1900). One of the leading military surgeons in Russia, he pioneered the use of anesthetics and aseptic methods in operations and promoted medical education for women. He

initiated the Pirogov medical conferences and edited a number of medical journals. His publications dealt with the improvement of medical services in the military, bone surgery, and abdominal operations.

Sklovsky, Yevhen [Sklovs'kyj, Jevhen], b 13 April 1869 in Kiev, d 10 October 1930. Pediatrician. A graduate of Kiev University (1891), he worked as a zemstvo doctor (1892–6) and at the university (from 1896), where he organized the first neonatal consultation service (1906) and the first nursery (1911) in Ukraine. He directed the maternity and childhood care section of the Kiev Regional Health Department (1918–20) and the Department of Children's Diseases at the Kiev Clinical Institute (1920–8). From 1929 he worked at the Kiev Scientific Research Institute of Maternity and Childhood Care. His publications dealt with child tuberculosis, diphtheria, and infant mortality.

Skoba, Antin, b 1856 in Bahachka, Myrhorod county, Poltava gubernia, d after 1908 in Bahachka. Lirnyk. His repertoire included dumas, humorous and historical songs, and psalms. F. Kolessa and O. Slastion transcribed many of the songs he performed. Some of them were recorded by phonograph, and some were published in 1910 in *Materiialy do ukrains'koi etnolohii* (Materials in Ukrainian Ethnology).

Skobelsky, Petro [Skobel's'ky], 1849–1912. Teacher and historian. A graduate of the theological seminary in Lviv, he started out on a promising career as a historian until material circumstances forced him to become a teacher. He then taught at the Academic Gymnasium in Lviv (1879–90), a gymnasium in Brody (1890–1902), and several gymnasiums in Lviv (from 1902). While in Lviv he wrote several essays, edited the literary journal *Zoria* (1889–90), and published collections of historical documents about the Sanguszko family (1886) and the Stauropigion Institute (1887). He also translated several works by T. Shevchenko into German and several German works into Ukrainian.

Skoblykov, Oleksander, b 25 February 1929 in Druzhkivka, Staline okruha. Sculptor. In 1954 he graduated from the Kiev State Art Institute, where he studied under M. Lysenko. He has sculpted genre compositions, such as *On Virgin Land* (1960); portraits, such as *Yuliia* (1958), *T. Shevchenko* (1964), and *B. Paton* (1980); and monuments, such as those to T. Shevchenko in Châlette-sur-Loing, France (1974), V. Vernadsky in Kiev (1981), the unification of Ukraine and Russia in Kiev (1982), and A. Tsereteli in Batumi (1984).

Skocen, Alexander. See Skotsen, Oleksander.

Skochok, Pavlo [Skočok], b 5 May 1935 in Ostriv, Rokytne raion, Kiev oblast. Journalist and political prisoner. In the 1960s he published articles concerning the ecology of Ukraine and contributed to the literary section of *Radians'ka Ukraina*. Several of his articles were circulated in samvydav form. He was arrested in December 1978 in Kiev and sentenced to an indefinite term in the Dnipropetrovsk psychiatric prison. He was released in the spring of 1987. Since that time he has been a member of the editorial board of **Ukrains'kyi visnyk*.

Skok, Volodymyr, b 4 June 1932 in Kiev. Physiologist; full member of the AN URSS (now ANU) since 1979 and its vice-president since 1988; full member of the USSR Academy of Sciences since 1987. He graduated from Kiev University (1955) and worked at its Institute of Physiology (1956–62), and then became an associate (1962), department head (1970), and assistant director (1980) at the ANU Institute of Physiology. His main research is on the physiology of the autonomic nervous system.

Skole. IV-4. A city (1989 pop 6,700) on the Opir River in the High Beskyd and a raion center in Lviv oblast. It was first mentioned in historical documents in 1397. Under Polish rule the village was destroyed by the Tatars (1594) and by the Hungarians (1610, 1657). In the 17th and 18th centuries *opryshoks were active in the area. After the partition of Poland in 1772, the town belonged to Austria, and in 1912 it was granted city status. In the interwar period it was held by Poland (1919–39). Today its main industries are lumbering, woodworking, building materials, and handicrafts. Its most valuable monument is the tripartite wooden Church of St Panteleimon (17th century), which contains a unique baroque iconostasis.

Skolozdra, Volodymyr, b 20 August 1912 in Drohovyzh, Zhydachiv county, Galicia, d 7 August 1980 in

Volodymyr Skolozdra: the monument to Vasyl Stefanyk in Lviv (granite, 1971)

Lviv. Sculptor. He studied at the Lviv Arts and Crafts School (1939–41) and sculpted mostly portraits and monuments. His works include busts of V. Stefanyk (1953), Lesia Ukrainka (1958), I. Franko (1972), and L. van Beethoven (1954); statues of O. Dovbush (with M. Riabinin, 1951) and T. Shevchenko as a soldier (1963); and monuments to V. Stefanyk in Lviv (1971) and Edmonton (1971). An album of his works was published in 1990.

Skomorokhov, Oleksander [Skomoroxov], b 6 March 1874 in Stavropol, d 22 August 1946 in Kiev. Electrical engineer. He studied in St Petersburg and from 1911 taught at the Kiev Polytechnical Institute. In 1933–41 he taught at the Kharkiv Electrotechnical Institute, and from 1944 he held the chair of electrical engineering at the Kiev Polytechnical Institute. He was the author of one of the first textbooks on electrical machinery and transformers in the Russian Empire (1914).

11th-century fresco depicting *skomorokhy* in Kiev's St Sophia Cathedral

Skomorokhy. Itinerant minstrels in Kievan Rus'. The first written reference to them dates back to 1068, but they were active in Rus' long before then. They are depicted in the frescoes of the St Sophia Cathedral in Kiev. According to some scholars the *skomorokhy* developed under the influence of foreign models. Others suggest that they evolved from pagan priests in the rural areas of Rus'. The latter hypothesis is supported by the recorded condemnation by the church authorities of the *skomorokhy* as representatives of paganism. By the 11th century the *skomorokhy* had become professional entertainers who

performed songs, dances, mime shows, acrobatics, games, puppet shows, short dramatic scenes, and animal tricks for the common people as well as for nobles and court dignitaries. By the 12th century, when court singers started joining their troupes, the *skomorokhy* added **bylyny* to their repertoire. As Kievan Rus' began to decline in the 12th and 13th centuries, many *skomorokhy* moved to safer principalities in the north and particularly to Novgorod. There they survived as a social group until 1572, when they were forcibly moved to Moscow by Ivan IV. In 1648 they were proscribed by Aleksei I, a blow from which they never recovered. The influence of the *skomorokhy* in Ukraine can be seen in Ukrainian theatrical productions of the 16th century.

Zguta, Russell. *Russian Minstrels: A History of the Skomorokhi* (New York 1978)

Skomorovsky, Kelestyn [Skomorovs'kyj] (pseud: Kelestyn Dolynianenko), b 16 April 1820 in Dolyniany, Berezhany circle, d 16 April 1866 in Ostapie, Ternopil circle, Galicia. Poet and priest. In the years 1840–9 he studied at the Greek Catholic Theological Seminary in Lviv, during which time he became a sympathizer with the Polish revolutionary movement. Inspired by the Romantic poetry of M. Shashkevych, T. Shevchenko, and K. Ujejski, he wrote poems in the Galician dialect of Ukrainian. Only three are extant: 'Ptytsi-posly' (Birds-Envoys), in the literary miscellany **Vinok rusynam na obzhynky* (Vienna 1847), *Na czest' bratej powernuuszchych z newoli* (In Honor of Brothers Who Have Returned from Imprisonment, 1848), and a translation of A. Khomiakov's *Ermak* (1849). From the early 1850s he was parish priest in Ostapie, where he wrote poems and translated the Epistles; none of those works has ever been published. The manuscripts were analyzed by Ya. Hordynsky in *Zapysky NTSh* (vol 128). The materials Skomorovsky collected for a German-Ukrainian dictionary were supplemented and published by O. Partytsky in 1867.

Viktor Skopenko

Anatolii Skorokhod

Skopenko, Viktor, b 18 December 1935 in Novhorodka, now in Kirovohrad oblast. Chemist; AN URSR (now ANU) corresponding member since 1978 and full member since 1987. After graduating from Kiev University (1958) he taught there and became a professor in 1971, prorector in

1975, and chairman of the inorganic chemistry department in 1977. He is currently rector of Kiev University. His research deals predominantly with co-ordination chemistry in nonaqueous solvents and on the surface of various support matrices. He developed extensively the co-ordination chemistry of linear and particularly nonlinear pseudohalide ligands, and he contributed to and, with A. Golub and H. Kohler, edited the definitive monograph *Chemie der Pseudohalogenide* (1979; English trans: *Chemistry of Pseudohalides*, 1986). He also introduced new catalysts based on metal complexes adsorbed on silica gel and modified with organic additives.

Skoreyko, William [Skorejko, Vasyli'], b 8 December 1922 in Edmonton. Businessman and politician. After studying commerce and opening his own business, he served as member of parliament for Edmonton East in 1958–74.

Skorobohatko, Vitalii [Skorobohat'ko, Vitalij], b 18 July 1927 in Kiev. Mathematician. After graduating from Lviv University in 1951, he taught there and then worked at different institutes of the AN URSR (now ANU): the Institute of Mathematics (1961–6), the Physical Mechanical Institute (1967–73), and the Institute of Applied Mathematics and Mechanics (since 1973). His studies deal mostly with partial differential equations, mathematical physics, computational mathematics, and geometry.

Skorodynsky, Andrii [Skorodyns'kyj, Andrij], b 1850, d 1912 in Lviv. Educator. He was director of the Prosvita society's head office (1882–1908), a founder of the society's Lviv branch, and the founder of the first Prosvita reading room in Lviv. He was also active in the Zoria society.

Skorokhod, Anatolii [Skorokhod, Anatolij], b 10 September 1930 in Nykopil, Kryvyi Rih okruha. Mathematician; full member of the AN URSR (now ANU) since 1985. After graduating from Kiev University in 1953 he worked at the ANU Institute of Mathematics and taught at Kiev University. His monograph on the theory of random processes (1961) developed certain probabilistic methods in the field of stochastic differential equations and limit theorems of Markov processes and substantially extended the existence, uniqueness, and other results for stochastic differential equations obtained independently by Y. Hihman in Kiev and K. Ito in Japan. These were the first results in the field to be obtained by probabilistic methods. Skorokhod explored a number of new notions which became known as the Skorokhod space, Skorokhod topology, and the Skorokhod version of weak convergence. In the theory of Markov processes, one of the major fields of study at the Institute of Mathematics, he demonstrated that (under weak additional conditions and manipulation) a continuous, homogeneous, and strongly Markov process in a finite-dimensional space becomes quasi-diffusive. In the early 1970s Skorokhod and Hihman wrote a three-volume treatise on the theory of stochastic processes. In another series of monographs Skorokhod made fundamental contributions to the theory of random processes with independent increments (1964), integration in Hilbert space (1974), random linear operators (1978), stochastic equations for complex systems (1983), processes with independent increments (1986), and asymptotic

methods in the theory of stochastic differential equations (1987). Many of these works have been translated into English. The work of Skorokhod, Hikhman, B. Hniedenko, and V. Koroliuk has established the reputation of the Kiev school of probability theory.

W. Petryshyn

Skorokhodko, Antin [Skoroxod'ko], b 13 March 1883 in Kaniv, Kiev gubernia, d 26 February 1954 in Kiev. Veterinarian and specialist in zoohygiene. A graduate of the Kharkiv Veterinary Institute (1909), he worked as a zemstvo veterinarian, chaired the department of zoohygiene at the Kiev Veterinary-Zootechnical Institute (1922–9), and served as rector of the institute (1924–6). From 1947 he was a professor at the Kiev Veterinary Institute (now the veterinary faculty of the Ukrainian Agricultural Academy). His publications dealt with the hygiene, care, and feeding of farm animals.

Yelysaveta Skoropadska

Skoropadska, Yelysaveta [Skoropads'ka, Jelysaveta] (married name: Kuzhim), b 27 November 1899 in St Petersburg, d 16 February 1976 in Obertsdorf, near Bremen, Germany. Civic leader and sculptor; daughter of Hetman P. *Skoropadsky. She studied sculpture in St Petersburg before the Revolution of 1917. She continued her studies in the 1920s in Berlin and Florence. Her works were exhibited in Germany, Holland, Finland, and the United States. She assisted her father in his political activities as his pri-

vate secretary, and in 1959 she assumed the leadership of the hetmanite movement from her recently deceased sister, Mariia, who had succeeded their brother, D. *Skoropadsky.

Coat of arms of the Skoropadsky family

Skoropadsky [Skoropads'kyj]. A family line of state, military, and community leaders, known since the 17th century. It was founded by Fedir Skoropadsky, who was reportedly slain in the Battle of Zhovti Vody (1648). His grandson, Ivan *Skoropadsky, was hetman of Ukraine from 1708 to 1722. Ivan had no sons; his brothers, Vasyl (d 1727) and Pavlo (d before 1739), continued the Skoropadsky line. Vasyl served as a military chancellor (1676), captain of Berezna company (1697–1709), quartermaster of Chernihiv regiment (1713–21), and a fellow of the standard (1726); his branch of the Skoropadsky family line continued into the 20th century. Pavlo Skoropadsky served as a fellow of the standard (1712); his branch of the line died out in the late 18th century.

Vasyl's more distinguished descendants included his son, Mykhailo (b ca 1697, d 2 January 1758 in Hlukhiv), a graduate of the Kievan Mohyla Academy and a political activist in the Hetmanate. He served as a fellow of the standard (1715; honored as 'first among fellows' in 1733) and as general treasurer (1741–58), and he participated in the Persian and Caucasian campaigns (1720–30), the Polish campaign (1733–4), and the Russo-Turkish War (1735–9). Mykhailo's older son, Ivan (b 9 August 1727 in Sorochyntsi, d 1782), was a noted Ukrainian autonomist and a candidate for hetman. He studied at the Kievan Mohyla Academy and in Germany and served as general osaul (1762–81) and as deputy of the nobility of Hlukhiv county (1767). Ivan's great-great-grandson, Heorhii (b 11 October 1873 in Avdiivka, Chernihiv gubernia, d ?), served as head of the Sosnytsia county zemstvo administration (1905–7) and was elected to the Third (1907) and Fourth (1912) Russian State Dumas.

Mykhailo Skoropadsky's younger son, Yakiv (b 1730, d ca 1785), served as major of a cuirassier regiment (1764). Yakiv's grandson, Ivan (b 30 January 1805, d 8 February 1887), served as marshal of Pryluka county (1844–7) and Poltava gubernia (1847–52); he supported the 1861 agrarian reforms, and he built one of the finest palaces and gardens in Left-Bank Ukraine (see *Trostianets Dendrological Park). Ivan's son, Petro (b 6 March 1834, d 30 June 1885), was a colonel of the Cavalry Guard and a veteran of the Caucasian wars (1863); he served as marshal of Starodub county (1869–85) and was a local zemstvo activist. Ivan's daughter and Petro's sister, Ye. *Myloradovych, was a noted Ukrainian activist. Petro's son, P. *Skoropadsky,

was hetman of the Ukrainian State in 1918. Pavlo's son, D. *Skoropadsky, succeeded his father as head of the émigré hetmanite movement. After his death his sister, Mariia Skoropadska-Montresor (d 11 February 1959), headed the movement.

Danylo Skoropadsky

Hetman Ivan Skoropadsky

Skoropadsky, Danylo [Skoropads'kyj], b 13 February 1904 in St Petersburg, d 22 February 1957 in London. Political and civic figure; son of Hetman P. Skoropadsky. He was heir apparent (announced in 1938) to P. Skoropadsky as leader of the hetmanite movement, and he assumed that role from his mother in 1948. He traveled to Canada and the United States in 1937–8 and 1953 in order to meet with hetmanite supporters. He moved to England in 1938, where he published (with V. Korostovets) an English-language journal about the Ukrainian question, took an active role in the Scottish League for the Liberation of Europe, and was honorary head of the Association of Ukrainians in Great Britain.

Skoropadsky, Ivan [Skoropads'kyj], b 1646 in Uman, d 14 July 1722 in Hlukhiv. Cossack leader and hetman of Ukraine (1708–22). After the Turks leveled Uman in 1674, he moved to Left-Bank Ukraine, where he served under Hetman I. Samoilovych as military chancellor (1675–6), secretary of Chernihiv regiment (1681–94), general standard-bearer (1698), and second general osaul (1701). He was sent on many diplomatic missions: on behalf of Samoilovych he went to Moscow (1675 and 1676) and the Crimea (1681), and on behalf of Hetman I. Mazepa he went to Poland (1690), Moscow (1693 and 1696), and the Zaporozhian Sich (1703). In 1706 Mazepa appointed him colonel of Starodub regiment.

Skoropadsky was elected hetman at the Council of Officers in Hlukhiv on 6 November 1708. Peter I never fully trusted him, however; he refused to ratify the *Reshetylivka Articles (1709) drawn up by Skoropadsky for a new agreement between Ukraine and Russia, and he held up the official documents confirming Skoropadsky as hetman until 1710. Skoropadsky nevertheless fought alongside Russian troops in the Battle of Poltava.

The Russian victory freed Peter from any further restraint in his policy toward Ukraine. Devastated by war, Russian repressions, and a plague epidemic, Left-Bank Ukraine became a military colony. Not only did Peter sta-

tion 10 dragoon regiments on Ukrainian territory at the expense of the local population, he also interfered increasingly in Ukraine's internal affairs, which previously came under the jurisdiction of the hetman. The Cossack army was put under Russian command, and the general artillery was deported to Russia. The capital of the Hetmanate was moved to Hlukhiv in 1709, and the hetman became subject to constant supervision by Russian residents of the tsar. The Russian tsar reserved the right to appoint higher-echelon officers (the general *starshyna*, colonels, and even captains), and he replaced Ukrainians with Russians, Moldavians, Serbs, and Poles.

On 27 May 1722 Peter set up the *Little Russian Collegium, which sharply reduced the powers of the hetman and the Ukrainian government. Cultural and religious life was also subjected to restrictions: Ukrainian printing was proscribed in 1720, and the Kievan Mohyla Academy was repressed. The terrorized Ukrainian people began to turn against the hetman and his government. Skoropadsky's protests against Russian actions had little influence on the tsar, who had already decided to limit Ukrainian autonomy and abolish the Hetman state when Mazepa allied with Sweden. Skoropadsky was buried in the Hamaliivka Monastery near Hlukhiv.

O. Ohloblyn

Hetman Pavlo Skoropadsky

Skoropadsky, Pavlo [Skoropads'kyj], b 15 May 1873 in Wiesbaden, Germany, d 26 April 1945 in Metten, Bavaria. Ukrainian noble, general, and statesman; scion of the *Skoropadsky family. He grew up on his father's estate in Trostianets (Pryluka county, Poltava gubernia), studied at the Starodub gymnasium, and graduated from the elite Page Corps cadet school in St Petersburg. He served in a cavalry guard Regiment and commanded a company of the Chita Cossack Regiment in the Russo-Japanese War. He was appointed aide-de-camp to Emperor Nicholas II in 1905, a colonel in 1906, commander of the 20th Finnish Dragoon Regiment in 1910, and a major general and commander of a cavalry regiment in the emperor's House Guard in 1911. During the First World War he command-

ed the 1st Brigade of the 1st Cavalry Guard Division, then the 5th Cavalry and 1st Cavalry Guard divisions, and the 34th Army Corps (at the rank of lieutenant general).

After the February Revolution of 1917 Skoropadsky oversaw the Ukrainization of the 34th Corps as the 1st Ukrainian Corps. He was elected honorary otaman of the Ukrainian *Free Cossacks at their first congress in October 1917. In October–November of that year the disciplined 60,000-man First Corps and the Free Cossacks under his command controlled the Vapniarka–Zhmerynka–Koziatyn–Shepetivka railway corridor. It disarmed and demobilized pro-Bolshevik military units returning from the southwestern and Rumanian fronts and thereby prevented them from attacking Kiev and plundering Ukraine. As an opponent of the Central Rada's socialist policies (especially its agrarian reforms) Skoropadsky initiated a right-wing conspiracy known as the Ukrainian People's Hromada, consisting of his fellow noble landowners and loyal officers. Its plans to overthrow the Rada and establish an authoritarian state ruled by the Skoropadsky dynasty gained the support of the *Ukrainian Democratic Agrarian party and the *All-Ukrainian Union of Landowners. On 24 April 1918 Skoropadsky was assured by Gen W. Groener, the German chief of staff, that the German army would support a coup d'état.

On 29 April 1918 the German-backed coup proved successful. Skoropadsky was proclaimed hetman of the Ukrainian State (as the UNR was renamed) at an agrarian congress convened by the Union of Landowners. The Central Rada and all land committees were dissolved, all UNR ministers were removed, the Rada's laws and reforms were revoked, and censorship of the press was introduced. The *Hetman government appointed by Skoropadsky included members of the Russian *Constitutional Democratic party and even anti-Ukrainian Russian monarchists (who were major figures in S. Gerbel's November–December cabinet). The government's social and economic policies were subject to and shaped by Germany's imperialistic aims, as well as the interests of Ukraine's large landowners, industrialists, and capitalists. The Hetman government also allowed Russian anti-Bolshevik political leaders and military organizations to turn Kiev into one of their staging areas. Ukrainian democrats refused to take part in the government, and in late May 1918 they formed the *Ukrainian National-State Union (later renamed the *Ukrainian National Union [UNS]) to co-ordinate political opposition. The left (including the Bolsheviks) exploited the dissatisfaction, and it soon erupted in the form of agrarian uprisings (see *Partisan movement), railway and other strikes, sabotage (bombings and arson in Kiev, Odessa, and elsewhere), and assassinations (eg, of the German field marshal H. von *Eichhorn). The government and the German and Austrian military responded with repressive measures.

Skoropadsky's attempts in October 1918 to diffuse opposition to his regime by entering into negotiations with the UNS and asserting his support for Ukraine's independence from the Central Powers proved unsuccessful, and his November manifesto of federation with a future non-Bolshevik Russia only accelerated the momentum of the UNS-led popular rebellion against his regime. On 14 December 1918, after German troops abandoned Kiev, Skoropadsky abdicated and fled to Germany by way of Switzerland, and his government sur-

rendered power to the *Directory of the UNR.

For most of the interwar years Skoropadsky lived in Wannsee, near Berlin, and received German financial support. From there he headed the hetmanite movement, consisting of monarchist émigré organizations such as the *Ukrainian Union of Agrarians-Statists in Europe, the *United Hetman Organization in Canada and the United States, and the Ukrainian Hetman Organization of America. He was also honorary president of the Ukrainiska Hromada society in Berlin. Because of his links with governing Junker circles, in 1926 he was able to initiate the creation of the *Ukrainian Scientific Institute in Berlin. Skoropadsky never relinquished his claim to Ukraine. During the Second World War he lobbied the Nazi government for the release of OUN leaders imprisoned in German concentration camps. He was mortally wounded during an Allied air raid on the railway station at Plattling, in Bavaria, and was buried in Wiesbaden. Excerpts from his memoirs appeared in *Khliborobs'ka Ukraina* (vols 4 and 5 [1922–3, 1924–5]).

O. Ohloblyn, A. Zhukovsky

Oleksander Skoropys-Yoltukhovskiy

Skoropys-Yoltukhovskiy, Oleksander [Skoropys-Yoltukhovs'kyj] (pseuds: H. Budiak, L. Halin, O. Vyshnevsky), b 1880 in Podilia gubernia, d 1950. Revolutionary figure and civic leader; son-in-law of Ye. *Chykalenko. He joined the *Revolutionary Ukrainian party (RUP) in 1901, became a member of its editorial committee in Lviv in 1903, and wrote one of its pamphlets (pub 1904). After the 1904–5 split in RUP he became one of the leaders of the Ukrainian Social Democratic *Spilka. During the Revolution of 1905 he established a strong Spilka network that organized peasant disturbances in Kherson and Kiev gubernias. He was arrested in September 1906 and imprisoned. In 1909 he escaped from exile in Siberia to Central Europe. After the outbreak of the First World War he became a member of the presidia of the émigré *Union for the Liberation of Ukraine (SVU, 1914–18) and the *General Ukrainian Council in Vienna (1915–16). In 1915 he established the SVU Central Bureau in Berlin and became the leading SVU organizer in German prisoner-of-war camps. In February 1918 he negotiated at Brest-Litovsk the prisoners' release and formation as the UNR Army's *Bluecoats divisions. From March 1918 he served as the UNR commissioner and Hetman government's starosta in the Entente-occupied Kholm region and Podlachia. He was arrested by the Poles in Brest and interned at Kalisz in December 1918. He was released in 1920 and lived thereafter in Berlin, where

he became a leading member of the conservative monarchist *Ukrainian Union of Agrarians-Statists. In 1926 he helped P. Skoropadsky establish the *Ukrainian Scientific Institute in Berlin and was appointed vice-chairman of its board of governors. Skoropys-Yoltukhovsky was arrested in 1945 after the Soviet occupation of Berlin, and perished in a Soviet concentration camp. He wrote political works, such as *Na perelomi: Uvahy pro suchasni vidnosyny Rosii* (At the Turning Point: Observations on Contemporary Russian Relations, 1905) and *Znachinnia samostiinoi Ukraïny dlia evropeis'koï rivnovahy* (The Significance of an Independent Ukraine for European Stability, 1913); the afterword to the SVU 1917 edition of the first RUP pamphlet, M. Mikhnovsky's *Samostiina Ukraïna* (Independent Ukraine); a booklet about Ukrainians in the POW camps (1918); and memoiristic articles about the RUP, the Spilka, and the SVU.

R. Senkus

Skorulska, Nataliia [Skorul's'ka, Natalija], b 20 February 1915 in Zhytomyr, d August 1982 in Kiev. Ballerina, ballet master, and scenarist. In 1930 she completed study at the Zhytomyr ballet school, and in 1934, the Kiev Music and Choreography College. In 1934–56 she was a soloist in the Kiev Theater of Opera and Ballet (from 1957 its ballet master). She is the scenarist of A. Svechnikov's ballet *Marusia Bohuslavka* and H. Zhukovsky's ballet *The Forest Song*. From 1972 she taught at the Kiev Institute of Culture.

Mykhailo Skorulsky

Myroslav Skoryk

Skorulsky, Mykhailo [Skorul's'kyj, Myxajlo], b 6 September 1887 in Kiev, d 21 February 1950 in Kiev. Composer, pedagogue, and music critic. A graduate in composition from the St Petersburg Conservatory (1914), he taught music theory in Zhytomyr (1915–33) and at the Kiev Conservatory (1933–50). His works include the opera *Svichchynne vesillia* (Svichka's Wedding, 1948); the ballets *Bondarivna* (The Barrelnmaker's Daughter, 1939) and *Lisova pisnia* (Forest Song, 1946); the oratorio *Holos materi* (Mother's Voice, 1943); two symphonies (1923, 1932); the symphonic poem *Mykyta Kozhumiaka* (1949); choral and chamber pieces; incidental music; songs to works by Lesia Ukrainka, P. Tychyna, and V. Sosiura; and arrangements of Ukrainian folk songs. A monograph on him has been written by M. Mykhailiv (1960).

Skorupsky, Volodymyr [Skorups'kyj], b 29 November 1912 in Kopychyntsi, Husiatyn county, Galicia, d 11 De-

cember 1985 in Toronto. Poet. His law studies at the University of Lviv (1935–9) were interrupted by the Second World War. He emigrated to Austria in 1945 and to Canada in 1948. From 1977 to 1984 he was editor of the weekly *Novyi shliakh* in Toronto. He began his literary career with lyrical poems, which were published in the semimonthly *Nazustrich* in 1938; his first separate collections, *Vesnianyi homin* (Spring Din, 1946) and *Zhyttia* (Life, 1947), were published in Austria. While in Canada Skorupsky continued writing lyrical poetry with a contemplative mood and national consciousness expressed in rather classical stanzas. Seven more collections appeared during his life: the nostalgic *Moia oselia* (My Homestead, 1954), *U dorozh* (Along the Way, 1957), and *Bez ridnoho poroha* (Without a Native Threshold, 1958); the reflective *Iz dzhherela* (From the Source, 1961), *Aistry nevidtstvi* (Asters Still Blooming, 1972), and *Spokonovichni luny: Legendy i mity* (Eternal Echoes: Legends and Myths, 1977); and *Nad mohyloiu: Vinok sonetiv* (At the Grave: A Wreath of Sonnets, 1963), commemorating his mother's death.

Skoryk, Myroslav, b 13 July 1938 in Lviv. Composer and musicologist. He graduated (1960) from the Lviv Conservatory in the classes of A. Soltys and S. Liudkevych and then completed graduate studies (1964) at the Moscow Conservatory in the composition class of D. Kabalevsky. He subsequently lectured in composition at the Lviv Conservatory (1964–6) and the Kiev Conservatory (1966–88), returning to Lviv in 1988. One of the most notable contemporary Ukrainian composers, Skoryk has written the ballet score *Stonecutters* (1967), the symphonic *Waltz* (1960), the symphonic poem *Stronger than Death* (1963), *Hutsul Triptych* (1965, based on his film score to *Tini zabutykh predkiv* [Shadows of Forgotten Ancestors]), *Carpathian Concerro* (1972), and the cantatas for voice and orchestra *Spring* (1960, text by I. Franko) and *The Person* (1964). He has also written concertos for violin (1969), for piano (1977 and 1982), and for violoncello (1983); *Suite* (1961) and *Partita* (1966) for string orchestra; *Partita II* (1970) for chamber orchestra; film scores; and music for theater. Skoryk also completed M. Leontovych's opera *Na rusalchyn velykden'* (On *Rusalka* Easter) in 1978 and published a study of S. Prokofiev's system of harmonics in 1969. A biobibliographic work on Skoryk has been prepared by Yu. Shyrytsia (1979).

Skoryna (Skaryna), Frantsisk or Georgii, b ca 1485–90 in Polatsk, Belarus, d before 1552. Pioneering Belarusian printer, physician, writer, and translator. He studied humanities at Cracow University (1504–6), and received a medical degree from Padua University in 1512. He then settled in Prague, where he established a press and published a Church Slavonic Psalter (1517) and his translations of 22 books of the Old Testament in *Bibliia ruska* (Ruthenian Bible, 1517–20). This achievement marked the beginning of publishing among the East Slavs. Ca 1520 he founded a press in Vilnius, and printed in Church Slavonic the prayer book *Malaia podorozhnaia knizhnitsa* (Small Travel Book, 1522) and an *Apostol* (1525). Skoryna's books were noted for their ornamentation, engravings, and high technical quality. The first East Slavic books with title pages, they contained extensive introductions, notes, glosses, and postscripts in the 'Ruthenian' (Belarusian-Ukrainian) literary language of the time, which feature makes them

an invaluable source for the study of East Slavic linguistic history. The books were widely distributed and copied throughout Ukraine and may have influenced early printing in Lviv and Ostrih (I. *Fedorovych and his successors), as well as Moscow, and even the language of Ukrainian manuscripts (eg, the *Peresopnytsia Gospel).

Skotsen, Oleksander [Skocen'] (Skocen, Alexander), b 28 July 1918 in Lviv. Soccer star. In 1935–9 he distinguished himself as the center forward of Lviv's Ukraina team. During the Soviet occupation of Galicia he played on Kiev's Dynamo team (1940–1), and under German rule he played again for Ukraina (1941–3) and coached Kolomyia's Dovbush team (1943–4). As a postwar émigré, he played on Ukrainian DP teams, both named Ukraina, in Salzburg, Austria (1945), and Ulm, Germany (1946–7). After turning professional he played for two years (1948–50) on Nice's team in France's highest soccer league and was recognized as the best center forward in France. After emigrating to Canada in 1950, he served as captain of the teams Ukraina in Edmonton and Ukraina (1951) and Trident (1951–4) in Toronto. In 1953 the Toronto and District Football Association awarded him the Holland Cup as best player. He then coached the Ontario All-Star team in 1956 and was a referee and sports commentator for the Ukrainian-Canadian press and radio. His memoirs, *Z futbolom u svit* (With Soccer into the World, 1985), are a valuable source on soccer and sports in Ukraine and in the postwar émigré community.

Hryhorii Skovoroda (lithograph by Mykhailo Zhuk, 1925)

Skovoroda, Hryhorii, b 3 December 1722 in Chornukhy, Lubni regiment, d 9 November 1794 in Pan-Ivanivka, Kharkiv vicegerency (now Skovorodynivka, Zolochiv raion, Kharkiv oblast). Philosopher and poet. He was educated at the Kievan Mohyla Academy (1734–53, with two interruptions). He sang in Empress Elizabeth's court Kapelle in St Petersburg (1741–4), served as music director at the Russian imperial mission in Tokai, Hungary (1745–50), and taught poetics at Pereiaslav College (1751). He resumed his studies at the Kievan academy, but left after completing only two years of the four-year theology course to serve as tutor to V. Tomara (1753–9). He spent the next 10 years in Kharkiv, teaching poetics (1759–60), syntax and Greek (1762–4), and ethics (1768–9) at Kharkiv College. After his dismissal from the college he abandoned any hope of securing a regular position and spent the rest of his life wandering about eastern Ukraine, particularly Slobidska Ukraine. Material support from friends enabled him to devote himself to reflection and

writing. Most of his works were dedicated to his friends and circulated among them in manuscript copies.

Although there is no sharp distinction between Skovoroda's literary and philosophical works, his collection of 30 verses (composed from 1753 to 1785) titled *Sad bozhestvennykh pesnei* (Garden of Divine Songs), his dozen or so songs, his collection of 30 fables (composed between 1760 and 1770) titled *Basni Khar'kovskiiia* (Kharkiv Fables), his translations of Cicero, Plutarch, Horace, Ovid, and Muretus, and his letters, written mostly in Latin, are generally grouped under the former category. Some of his songs and poems became widely known and became part of Ukrainian folklore. His philosophical works consist of a treatise on Christian morality and 12 dialogues.

Skovoroda's thought has been interpreted in different ways: as an eclectic, loose collection of ideas (F. Kudrinsky); as a strict, rationalist system (A. Efimenko, H. Tysiachenko); as a form of Christian mysticism (V. Ern, D. Chyzhevsky); as a version of Christian Platonism in the patristic tradition (D. Bahalii); and as a moral philosophy (F. Zelenohorsky, I. Mirchuk, I. Ivano, V. Shynkaruk). There have been disagreements about the character of his metaphysical doctrine (dualism vs monism, idealism vs 'semi-materialism'). The debates about its nature to a large extent have arisen because of Skovoroda's style of writing, which is literary rather than philosophical. His ideas are not organized and presented in a systematic way, but are scattered throughout his dialogues, fables, letters, and poetry. Skovoroda preferred to use symbols, metaphors, or emblems instead of well-defined philosophical concepts to convey his meaning. Moreover, he delighted in contradiction and often left it to readers to find their way out of an apparent one. In the absence of explicit statements of doctrine and expected solutions to obvious problems, it is sometimes uncertain what exactly Skovoroda had in mind.

For Skovoroda the purpose of philosophy is practical – to show the way to happiness. Hence, the two central questions for him are what happiness is and how it can be attained. For him happiness is an inner state of peace, gaiety, and confidence which is attainable by all. To reach this state, some understanding of the world and oneself and an appropriate way of life are necessary. Skovoroda approaches metaphysics and anthropology not as a speculative thinker, but as a moralist: he does no more than outline those truths that are necessary for happiness. His basic metaphysical doctrine is that there are two natures in everything: the ideal, inner, invisible, eternal, and immutable; and the material, outer, sensible, temporal, and mutable. The first is higher, for it imparts being to the second. This dualism extends through all reality – the macrocosm or universe, and the two microcosms of humanity and the Bible. In the macrocosm the inner nature is God, and the outer is the physical world. Skovoroda's view on God's relation to the world is pantheist rather than pantheist. In man the inner nature is the soul; the outer, the body. In the Bible the inner truth is the symbolical meaning; the outer, the literal meaning.

From this metaphysical scheme Skovoroda drew a number of fundamental conclusions for practical life. Since the universe is ordered by a provident God, every being has been provided with all that is necessary for happiness. The assurance that what is necessary is easy and what is difficult is unnecessary (for happiness) brings

peace of mind. It also serves as a criterion for the material conditions of happiness: we need only those goods that are necessary to health and are available to all people. But to dispel anxiety about material security is not enough for happiness. Active by nature, humans must also fulfill themselves in action by assuming the congenial task or vocation assigned to them by God. To pursue one's task regardless of external rewards is to be happy, while to pursue wealth, glory, or pleasure through uncongenial work is to be in despair. Furthermore, since vocations are distributed by God in such a way as to ensure a harmonious social order, to adopt an uncongenial task leads to social discord and unhappiness for others.

The doctrine of congenial work is the central doctrine in Skovoroda's moral system. Although it is not metaphysically plausible, it expresses his faith in the creative potential of human beings and the possibility of self-fulfillment in this life for everyone. Although they were never presented in a systematic fashion, Skovoroda's ideas form a remarkably coherent system. His chief authorities are the ancient philosophers (the Stoics, the Cynics, Epicurus, Plato, and Aristotle), from whom he selects the basic elements of his own teaching. Following the patristic tradition, he treats the Bible allegorically: he holds that its literal meaning (anthropomorphic God and miracles) is external and false, and that its inner, symbolic meaning coincides with the truth known to the ancient philosophers. In this way he reconciles secular learning with Christian faith.

Skovoroda's influence in the 19th century on writers such as I. Kotliarevsky, H. Kvitka-Osnovianenko, T. Shevchenko, and P. Kulish was minimal. But his poetic style, ideas, and moral example have played an important role in the rebirth of Ukrainian culture in the 20th century. Poets such as M. Filiansky, P. Tychna, V. Barka, V. Stus, H. Chubai, I. Kalynets, and I. Drach have found inspiration in him. The fullest editions of Skovoroda's works were published in Kharkiv in 1894 (ed D. Bahalii), in St Petersburg in 1912 (ed V. Bonch-Bruevich), in Kiev in 1961 (2 vols) and 1973 (2 vols), and in Moscow in 1973 (2 vols). An English translation of Skovoroda's fables and aphorisms, together with a biography and an analysis of the works, was published by D.B. Chopyk in 1990.

Skovoroda Society of Higher School Teachers (Tovarystvo vchyteliv vyshchych shkil im. H. Skovorody). An organization of Ukrainian secondary-school teachers, founded in 1908 in Bukovyna and centered in Chernivtsi. In 1913 it had 80 members. Its goal was to organize teachers in Bukovyna, to improve the general level of Ukrainian schooling and instruction, and to publish school hand-books and textbooks. Together with the Teacher's Hromada in Lviv it published, from 1911, the pedagogical journal **Nasha shkola*. The leaders of the organization were I. Pryima, A. Artymovych, M. Korduba, and V. Kmitykevych. It ceased operation in 1914.

Skovoroda-Zachyniaiev, Oleksander [Skovoroda-Zachynajev] (real name: Zachyniaiev), b 22 August 1877 in Voskresenka, Zadonsk county, Voronezh gubernia, Russia, d ? Educator and psychophysicologist. He was a gymnasium principal in Kiev (until 1919) and (in the 1920s) a research associate of the VUAN Scientific-Pedagogical Commission, the director of the reflexology laboratory of the VUAN, a lecturer at the Kiev Veterinary-Zootechnical, Art, and Music and Drama institutes, and a docent of the Kiev Medical Institute. He was arrested in the 1930s, and his further fate is unknown.

Skriaia, Prokip [Skrjaha], b ? in Ostapy, near Luhyny, in the Zhytomyr region, d 13 January 1770 in Kodnia, near Zhytomyr. Banduryst. He accompanied detachments of haidamakas and Don Cossacks during the Koliivshchyna rebellion of 1768 and provided them with songs and entertainment. He was captured and executed by Polish forces. His exploits were chronicled in *Kievskaiia starina* (1882, no. 4).

Rev Yosafat Skruten

Skruten, Yosafat [Skruten', Josafat] (secular name: Ivan), b 24 February 1894 in Parkhach, Sokal county, Galicia, d 12 October 1951 in Rome. Basilian priest, church historian, and journalist; full member of the Shevchenko Scientific Society from 1930. He studied at the Gregorian University in Rome and at Lviv University and was ordained in 1918. He edited the journal *Postup* (1921-4) and coedited the newspaper *Nyva* and the theological journal *Bohosloviia*. He also founded and edited **Analecta Ordinis S. Basilii Magni* (1924-39), the theological journal of the Basilian Fathers, and contributed to *Dilo*, *Nova zoria*, *Novyi chas*, *Khrystyians'kyi holos*, *Krakovs'ki visti*, and other periodicals. In 1923 he cofounded the *Ukrainian Theological Scholarly Society, and in 1929 he became a professor of philosophy at the Greek Catholic Theological Academy in Lviv. He emigrated to Bavaria in 1939 and then to Rome

in 1949, where he was chaplain of St Josaphat's Ukrainian Pontifical College. Skruten published several articles and reviews on the history of the Basilian order, on Y. Kuntsevych, and on other subjects in church history, mostly in the *Analecta*.

Skrutok, Oleksa (Skrutka), b 1861 in Peremyshl, Galicia, d 1914. Painter. After graduating from the Cracow School of Fine Arts (1891) he studied in Munich and then worked in Lviv and Peremyshl. From 1898 he belonged to the *Society for the Advancement of Ruthenian Art in Lviv and took part in its exhibitions. He painted portraits (eg, of V. Nahirny [1912]); landscapes, such as *Evening* (1893), *In the Meadow* (1893), *Silence* (1894), and *Landscape with a Pond* (1895); genre paintings, such as *Dutch Fisherman* (1892) and *Old Woman in a Window* (1898); iconostases; religious paintings, such as *Resurrection of Lazarus* (1900); and historical paintings depicting the Cossack period.

Yosyp Skrypa

Ihor Skrypnyk

Skrypa, Yosyp (pseud: Vronsky) b 1 March 1894 in Siedliska, Zamość county, Poland, d 12 February 1929 in Prague. Civic and political activist in the Kholm region. After being evacuated to Baku during the First World War, he completed a pedagogical course and then returned to his home village to work as a teacher and organizer of farmers and youth groups. He was also vice-president of the Kholm National Committee. In 1922 he was elected to the Polish Sejm, where he belonged to the Ukrainian caucus, then to a faction of the Ukrainian Social Democrats, and finally to the Communist Party of Western Ukraine.

Skrypchynska, Eleonora [Skrypčyns'ka], b 11 October 1899 in Dubno, Volhynia gubernia. Choir conductor and pedagogue; wife of H. *Verovka. A student of B. Yavorsky and V. Pukhalsky, she taught music in Kiev from 1919. She was affiliated mainly with the Lysenko Music and Drama Institute (1923–34) and its successor, the Kiev Conservatory (from 1934). She also conducted numerous professional and amateur choirs in 1920–44, and the *Verovka State Chorus in 1944–66, serving as its artistic director and principal conductor in 1964–6.

Skrypetsky, Samson [Skrypec'kyj] (secular name: Stepan), b 1723 in Khyriv (near Sambir), Galicia, d after 1784. Basilian priest and church painter. After entering the

Basilian monastery in Dobromyl and training as a church painter (1750–4), he painted at St Onuphrius's Monastery in Lviv and the Zhovkva and Univ monasteries.

Skrypnyk, Ihor, b 13 November 1940 in Zhmerynka, Vinnytsia oblast. Mathematician, full member of the AN URSR (now ANU) since 1985. After completing his graduate studies at Lviv University in 1965, he taught there and in 1967 moved to Donetsk, where he has worked at the ANU Institute of Applied Mathematics and Mechanics (director from 1977) and at Donetsk University. Skrypnyk's main works are in nonlinear functional analysis, nonlinear partial differential equations (PDEs) of mathematical physics, and function theory. In the early 1970s he introduced the notion of the topological degree for a wide class of nonlinear maps type (α) and developed the complete theory for a single-valued degree analogous to that for the Brouwer degree. He used the latter to extend many classical theorems to his general class of mappings. The topological degree theory developed by the American mathematician F. Browder in the 1980s for maps of type (S_+) is essentially the same as Skrypnyk's for type (α) . Skrypnyk used his topological results to obtain weak solutions of boundary value problems in physics, elasticity, and mechanics. He also obtained important results in his study of the regularity theory of these solutions and summarized them in a monograph on nonlinear elliptic equations of higher order (1973). He extended many of his results to nonelliptic PDEs and to elliptic PDEs that are not in divergent form. He also studied the solutions of Monge-Ampère equations and wrote a study of investigation methods for nonlinear elliptic boundary value problems (1990).

W. Petryshyn

Skrypnyk, Leonid (pseud: Leonid Lain, M. Lansky), b 1893, d 23 February 1929 in Kharkiv. Futurist writer and theorist. He graduated from the Kiev Polytechnical Institute and was involved in flying experiments at N. Zhukovskiy's Aerodynamics Institute near Moscow before the First World War. In the Soviet period he worked in Kiev in the administration of the Southwestern Railway and then operated the film laboratory at the Odessa factory of the All-Ukrainian Photo-Cinema Administration. He published prose, reviews, and criticism in the journals *Chervonyi shliakh* (the novelette 'Ivan Petrovych i Feliks,' 1928, no. 11), *Zhyttia i revoliutsiia*, *Nova generatsiia*, and *Vsesvit* (as its associate editor) and in *Kul'tura i pobut*, the supplement to *Visti VUTsVK*. From 1928 he belonged to the futurist writers' group Nova Generatsiia. He wrote the first Ukrainian reference book for the photographer (1927), the first Ukrainian book of essays on the history of cinematic art (1928), and the experimental 'screen novel' *Inteligent* (The Intellectual, 1929; repr in *Suchasnist'* in 1984), and translated into Ukrainian U. Sinclair's *100 Percent, the Story of a Patriot* (1928). His book on art and social culture and his novel 'Epizod z zhyttia chudnoi liudyny' (Episode from the Life of a Strange Person) were not completed.

Skrypnyk, Lev, b 1903 in Yasynuvata, Bakhmut county, Katerynoslav gubernia, d 1939 in Poltava. Writer. While working as a miner in the Donbas in the 1920s, he became a member of the Zaboii writers' group and the All-Ukrainian Association of Proletarian Writers. He wrote *Vybukh* (Explosion, 1928), *Dvisti p'iatdesiat persha verstva* (The

251st Verst, 1929), *Za vse* (For Everything, 1930), *Malen'ka stepova rudnia* (The Little Steppe Mine, 1930), *Smertna kamera* (Death Cell, 1931), and other 'proletarian' prose collections; *Budynok prymusovoykh prats'* (The Forced Labor Building, 1930), the first novel set in a Soviet Ukrainian prison; and the novels *Rudnia* (The Mine, 1930) and *Novosmolianka* (1930). Skrypnyk died in a hospital for the mentally ill (according to Soviet sources) or was a victim of the Stalinist terror.

Skrypnyk, Mary, b 11 December 1915 near Timmins, Ontario. Editor, translator, and community leader; a Communist party member since 1932. From 1960 she was an editor of the **Ukrainian Canadian*. In this capacity she began translating works of Ukrainian literature into English; these were published by the Dnipro publishing house in the Ukrainian SSR. She is best known for her translations of works by T. Shevchenko, I. Franko, Lesia Ukrainka, H. Kvitka-Osnovianenko, and O. Kobylanska. Skrypnyk was awarded the Maxim Gorky Prize by the Writers' Union of the USSR in 1976. She has also translated several Ukrainian-Canadian historical works by P. Krawchuk.

Patriarch Mstyslav Skrypnyk Mykola Skrypnyk

Skrypnyk, Mstyslav (secular name: Stepan), b 10 April 1898 in Poltava. Orthodox patriarch. A nephew of S. Petliura, in 1917–21 he served in the UNR Army. When the army retreated to Poland, he was interned in a camp in Kalusz. After his release he lived in Galicia and then Volhynia, where from 1926 he worked with the local government. In 1930 he completed a degree in political science in Warsaw. In the 1930s Skrypnyk was a leading member of the **Volhynian Ukrainian Alliance*. He served as a member of the Polish Sejm (1930–9), where he was especially active in defending the Ukrainian Orthodox church. He participated in church life, as a delegate to various church councils and a permanent executive member. He was ordained a priest and made bishop of Pereiaslav in 1942 (he received his chirotonium in Kiev), but was persecuted by the Gestapo in 1942–3. He emigrated to Germany in 1944 and was active in organizing émigré church life in Western Europe. In 1947–9 he was acting bishop of the Ukrainian Greek Orthodox Church of Canada. In 1950 he

became head of the consistory and deputy metropolitan of the Ukrainian Orthodox Church in the USA. In 1969 he became metropolitan of the **Ukrainian Autocephalous Orthodox church* (UAOC) in Western Europe, and in 1971, metropolitan of the church in the United States. In 1990, after the revival and legalization of the UAOC in Ukraine, Skrypnyk was installed as its patriarch. He was the founder of the religious and cultural center in South Bound Brook, New Jersey, and a supporter of the unification of all Orthodox jurisdictions. He was given an honorary doctorate from St Andrew's College in Winnipeg and made an honorary member of the Shevchenko Scientific Society in the USA. He has published a number of articles and served as editor of various periodicals and collections of works.

I. Korovytsky

Skrypnyk, Mykola, b 25 January 1872 in Yasynuvata, Bakhmut county, Katerynoslav gubernia, d 7 July 1933 in Kharkiv. Bolshevik leader and Soviet Ukrainian statesman; VUAN full member from 1929. After his first arrest in 1901, Skrypnyk abandoned his studies at the St Petersburg Technological Institute and became a full-time Marxist revolutionary in St Petersburg, Odessa, Katerynoslav, Riga, and Moscow. By 1917 he had been arrested 15 times and exiled 7 times to places such as Yakutia (1909–13) and Tambov gubernia (1914–17). During the Bolshevik coup in Petrograd in November 1917, he was a member of the supreme command of the military-revolutionary committee. In December 1917 he was elected in absentia to the **People's Secretariat*, the first Soviet government in Ukraine, and in March 1918 he was appointed its chairman by V. Lenin. At the **Tahanrih Bolshevik Conference* Skrypnyk was chosen chief of the bureau that was to set up the CP(B)U. Although he delivered the keynote address at the Party's first congress (July 1918), he was not elected to the CP(B)U leadership. Until January 1919 he was a member of the All-Russian Cheka collegium in charge of the section for combating counterrevolution. He returned as a Bolshevik commissar to Ukraine, where he served as people's commissar of worker-peasant inspection (1920–1), internal affairs (1921–2), justice (1922–7), and education (1927–33); general procurator (1922–7); and, briefly (February–July 1933), head of the Ukrainian State Planning Commission and deputy premier of the Ukrainian Council of People's Commissars. At the same time he rose in the CP(B)U to the positions of CC member (April 1920) and Politburo candidate (1923–5) and member (1925–33), and in the All-Union Communist Party (Bolshevik), CC candidate (1923–5) and member (1927–33). He also took part in organizing the **Communist International*, was a member of its Executive Committee, and headed its CP(B)U delegation. As a leading Party scholar he directed the All-Ukrainian Commission for the History of the October Revolution and the CP(B)U, the **Ukrainian Institute of Marxism-Leninism* (1928–30), and its chair of the national question (1926–31), and presided over the Ukrainian Society of Marxist Historians (from 1928).

Among the non-Ukrainian members and leaders of the CP(B)U (eg, E. Kviring and D. Lebid) he encountered Russian chauvinism and a rejection of all things Ukrainian as counterrevolutionary. To overcome this attitude Skrypnyk persuaded the CC CP(B)U to introduce **Ukrainization* policies and actively advocated the development

of a Ukrainian 'proletarian' culture and literature and Ukraine's political and economic autonomy. As people's commissar of education he Ukrainized the press and publishing, elementary and secondary education, and, to a significant extent, higher education. In 1927 he convened an all-Ukrainian conference (attended also by Western Ukrainian specialists) to standardize Ukrainian *orthography. Its so-called Skrypnykivka spelling system was officially adopted in 1928.

A dogmatic Leninist, he remained a determined enemy of the opponents of Soviet rule, including the Ukrainian 'nationalists.' He participated in the military and ideological struggle that led to the physical destruction of the postrevolutionary Ukrainian intelligentsia and the Party supporters of *national communism. At the same time he saw Russian great-power chauvinism and centralism as the chief threats to Ukrainian culture and fought against them. Convinced of the need to unite all Ukrainian ethnic territories within one Soviet Ukrainian state, he opposed Russian Bolshevik plans to establish a separate *Donets-Kryvyi Rih Soviet Republic in 1918. Later he demanded that the Ukrainian parts of adjacent Russian gubernias and the regions of compact Ukrainian settlement in Central Asia and the Far East be incorporated in the Ukrainian SSR. Throughout the 1920s he devoted much attention to the cultural needs of Ukrainians in these regions as well as in Polish, Czech, Hungarian, and Rumanian territories.

Skrypnyk's activities contradicted the imperialistic plans of the central leadership in Moscow. In January 1933 J. Stalin sent P. *Postyshev to Ukraine to take control of the CP(B)U. Skrypnyk's policies and theories were condemned, and he was removed as education commissar. Foreseeing the reversal of Ukrainization and his inevitable liquidation as an old opponent of Stalin, he committed suicide.

Skrypnyk's undeniable contributions to and defense of Ukrainian culture made him a symbol of Ukraine's struggle for sovereignty. He was rehabilitated in the mid-1950s. His policies, views, speeches, brochures (partly collected in 4 vols in 1929-30), and over 800 articles have been republished in Ukraine in a selected edition (1991).

I. Koshelivets

Skuba, Mykola, b 6 December 1907 in Horbove, Novhorod-Siverskyi county, Chernihiv gubernia, d 24 October 1937 in Kiev. Writer. A member of the writers' groups Molodniak and Nova Generatsiia, he began publishing in the Kharkiv press in 1927 and wrote the poetry collections *Perehony* (Races, 1930), *Demonstratsiia* (The Demonstration, 1931), *Pisni* (Songs, 1934), and *Novi pisni* (New Songs, 1935). He was arrested during the Stalinist terror in 1937, and executed by the NKVD. He was posthumously rehabilitated, and a book of his poems was published in Kiev in 1965.

Skubii, Ivan [Skubij], b 1858 in Leliukhivka, Kobeliaky county, Poltava gubernia, d after 1909 in Leliukhivka. Lirnyk. Blind from the age of 10, he became a well-known performer of dumas. His style of playing was closer to the kobzar style. His dumas were written down by F. Kolessa and O. Slastion and published in *Materiialy do ukrains'koi etnolohii*, 14 (1913).

Skubova, Mariia, b 1880 in Ivanivka, Skalat county, Galicia, d 11 April 1952 in New York. Civic activist. After emigrating to the United States in 1907, she founded the Ukrainian Besida society, which helped young emigrant girls. During the First World War she served as a nurse in the Austrian army and, upon being captured, in a hospital in Kiev. She returned to Lviv in 1916 through a prisoner exchange and continued to work in Ukrainian hospitals. In 1921 she returned to the United States, where she collected funds for the needy in Ukraine, organized exhibits of Ukrainian art and customs, set up women's organizations, and (after visiting Galicia in 1930) rallied public support to protest the 1930 Polish Pacification. After the Second World War she organized aid for Ukrainian refugees in DP camps. She supported the Ukrainian Academy of Arts and Sciences in the US financially and was a member of its executive board.

Skulsky, Andrii [Skul's'kyj, Andrij] (Skolsky), b in the late 16th century in Lviv, d ca 1655 in Lviv. Printer and writer. He studied at the Lviv Dormition Brotherhood School and then worked at and directed (1630-3, 1641-3) the brotherhood's press. He also co-owned, with M. Slozka, a press in Lviv (1638-40); worked as a printer in Moldavia; and directed the press established by Bishop A. Zhelyborsky at St George's Church in Lviv (1643-6) and the Univ Monastery (from 1646). In 1651 Skulsky was arrested near Sokal by the Poles, accused of spying for the Cossacks, and tortured, but he was eventually released. Skulsky wrote and published *Virshi z trahodii Khristos pashkon Hryhoriia Bohoslova* (Verses from the Tragedy of the Paschal Christ by Gregory the Theologian, 1630).

Skunts, Petro [Skunc'], b 20 May 1942 in Mizhhiria, Transcarpathia. Poet of the **shestydesiatnyky* generation. He graduated from Uzhhorod University (1963) and has worked as a newspaper and book editor in Uzhhorod. He is the author of the collections *Sontse v rosi* (Sun in the Dew, 1961), *Verkhovyns'ka pisnia* (Highland Song, 1962), *Poliusy zemli* (The Earth's Axis, 1964), *Pohliad* (A Look, 1967), *Na hranytsi epokh* (On the Threshold of Epochs, 1968), *Vsesvit, hory i ia* (The Universe, Mountains, and I, 1970), *Rozryv-trava* (Impatiens, 1979), and *Seismichna zona* (The Seismic Zone, 1983). He has also edited a book of Transcarpathian legends (1972).

Skurykhin, Volodymyr [Skuryxin], b 17 April 1926 in Viatka (now Kirov), Russia. Systems theoretist; full member of the AN URSS (now ANU) since 1978. He studied in Ivanovo and since 1958 has worked at the ANU Institute of Cybernetics. His main contributions are in applying cybernetics and computers to the automation of manufacturing processes. He was instrumental in creating the first automated and computerized industrial control system in the USSR. He also designed and put into operation some early CAD/CAM systems and other automated design and data-processing systems.

Skvarko, Zakhar, b 27 September 1870 in Kormanychi, Peremyshl county, Galicia, d 2 August 1925 in Kolomyia, Galicia. Co-operative and civic leader. After graduating from Lviv University he practiced law in Mostyska and organized a People's Home credit union and a branch of the Prosvita society. A member of the National Democratic party, in 1907 he was elected to the Galician Diet. In 1910 he was appointed director of the Pokutia credit union in Kolomyia. During the First World War he left for Vienna (1914–15), where he organized relief for Ukrainian office workers and edited the popular National Democratic organ *Svoboda*. In 1919, after returning to Kolomyia, he was elected county president of the Ukrainian National Rada.

SKVU. See World Congress of Free Ukrainians.

Skvyra. IV-10. A city (1989 pop 18,900) on the Skvyrka River and a raion center in Kiev oblast. It was first mentioned in historical documents in 1390, when it was a frontier settlement of the Grand Duchy of Lithuania. In 1482 it was destroyed by the Tatars. From 1569 it was under Polish rule. In 1616 it was granted the rights of *Magdeburg law. Under the Hetman state Skvyra was a company center of Bila Tserkva (1648–51) and Pavoloch (1651–74) regiments. It was recaptured by Poland in 1686, and supported the haidamaka rebellions of 1736 and 1768. It was acquired by Russia in 1793, and from 1797 it was a county center in Kiev gubernia. In 1938 it attained city status. Today it is an industrial and agricultural town. Its main industries are food processing, clothing, and sanitary technology. It is the home of the Selection and Seed Research Station of the Ukrainian Scientific Research Institute of Orchardng.

Skybenko, Anatolii, b 10 October 1924 in Kiev, d 17 July 1981 in Kiev. Stage director, actor, and pedagogue. He completed study at the Kiev Institute of Theater Arts (1949) and then worked in theaters in Drohobych and Vinnytsia (1950–4) and in the Kiev Ukrainian Drama Theater (1954–81). In 1956–81 he taught in the Kiev Institute of Theater Arts.

Skybynsky, Hryhorii [Skybyns'kyj, Hryhorij], b in the 1660s in Western Ukraine, d 1716 in Moscow. Theologian. In the 1670s he lived in Moscow. Then he moved, for eight years, to Rome, where in 1688 he converted from Orthodoxy to the Uniate faith. After living in France and Germany and studying Calvinism and Lutheranism for several more years, he returned to Moscow and re-embraced the Orthodox faith (although he remained labeled a 'heretic' and 'Latinizer'). He left several unpublished manuscripts, including 'Brevis poetica cum prosodia conscripta'; 'Perechnevoe skazaniie o myri' (A Listing of the Story of the World); and 'Kratkoe skazanie i opisanie ... o grade Ryme' (A Brief Story and Description ... of the City of Rome, 4 parts), a polemical work criticizing the papacy and attacking Catholicism. A biography, by A. Sobolevsky, and two of his works were published in *Chteniia v Imperatorskom obshchestve istorii i drevnostei rossiskikh* (1914, no. 2).

Skydan, Karpo, b ?, d 1638. Cossack officer. He was a colonel of unregistered Zaporozhian Cossacks and a lead-

ing figure in Cossack uprisings against the Poles, including one in 1637 led by P. Pavliuk and one in 1638 with Ya. Ostrianyn. Skydan was recruiting in Cherkasy later in 1638 and, returning to the aid of D. Hunia, was seriously injured in a battle near Zhovnyyn, captured by Polish forces, and presumably executed.

Skyrda, Liudmyla, b 15 September 1945 in Kirovohrad. Writer and literary scholar. She graduated from Kiev University (1968), where she has lectured in the department of the history of Ukrainian literature since 1972. She has written the poetry collections *Chekannia* (Waiting, 1965), *Skhody* (Stairs, 1976), *Kryla* (Wings, 1979), *Elehiia vechirn'oho sadu* (Elegy of the Evening Garden, 1983), *Muzyka dlia dvoikh* (Music for Two, 1986), and *Dni i nochi* (Days and Nights, 1987). Her scholarly publications include books about contemporary Ukrainian poetry (1983), Ye. Pluzhnyk (1989), and the contemporary Ukrainian narrative poem (1990).

Skytsiuk, Ivan [Skycjuk], b 12 August 1907 in Chornyi Ostriv, Proskuriv county, Podilia gubernia. Decorative artist; husband of M. *Tymchenko. In 1941 he graduated from the Kiev School of Applied Art. He painted dishes with floral motifs; plates, such as *Firebird* (1967) and *Red Bird* (1967); decorative panels, such as *Fishes among Flowers* (1963) and *May Bugs Hum above the Cherry Trees* (1964); and the murals in the Kazka toy store in Kiev (1978–9, with M. Tymchenko).

Mykhailo Slabchenko

Slabchenko, Mykhailo [Slabčenko, Myxajlo], b 21 July 1882 in Moldavanka, outside Odessa, d 29 November 1952 in Pervomaiske, Mykolaiv oblast. Historian; full member of the AN URSR (now ANU) in 1926–30. A graduate of Odessa University and the St Petersburg Military-Juridical Academy, he completed his studies in Germany. He took an active part in the Ukrainian national movement as a member of student organizations, the Revolutionary Ukrainian party (1903), and the Ukrainian Social Democratic Workers' party (1906–18). In the 1920s he served as a professor at the Odessa Institute of People's Education (in the chair of Ukrainian history), headed the social-historical section of the Odessa Scientific Society, and directed the Odessa branch of the (Kharkiv-based) Scientific Research Chair of Ukrainian History. He also coedited several publications of the Odessa Scientific Society's historical-philological section (three volumes, 1928–9) and social-historical section (five volumes, 1927–30).

The main body of his work was devoted to the history of the law and economy of the Hetmanate and the Zaporizhia in the 17th and 18th centuries. His important early studies include *Malorusskii polk v administrativnom otnoshenii* (The Little Russian Regiment in Its Administrative Aspect, 1909), *Opyty po istorii prava Malorossii XVII–XVIII st.* (Studies of the Legal History of Little Russia in the 17th and 18th Centuries, 1911), *Protokol otpusknykh pisem za getmana D. Apostola 1728 g.* (Record of Release Letters under Hetman D. Apostol in 1728, 1913), *Tsentral'nye uchrezhdeniia Ukrainy XVII–XVIII st.* (Central Institutions of Ukraine in the 17th and 18th Centuries, 1918), and *Pro sudivnytstvo na Ukraini* (On the Judicial System in Ukraine, 1920). In the early 1920s Slabchenko began working on a large project dealing with the organization of the Ukrainian economy from the Khmelnytsky period to the First World War. The first part of the undertaking, a series titled *Khoziaistvo Getmanshchiny v XVII–XVIII stoletiiakh* (The Economy of the Hetmanate in the 17th and 18th Centuries), was completed in four Russian-language books; they dealt with land tenure and forms of agriculture (vol 1, 1922), the development of factories and industry (vol 2, 1922), the growth of commerce and commercial capitalism (vol 3, 1923), and the state economy of the Hetmanate (vol 4, 1925). The first and fourth books in the series also appeared in Ukrainian. Slabchenko produced the groundbreaking studies *Sotsial'no-pravova orhanizatsiia Sichi Zaporoz'koi* (The Social and Legal Organization of the Zaporozhian Sich, 1927) and *Palankova orhanizatsiia Zaporoz'kykh Vol'nostiv* (The Palanka Organization of Zaporozhian Free Settlements, 1929). Those works tied in with his other studies, a monograph on feudalism in Ukraine (1929) and a collection of materials on the economic and social history of Ukraine in the 19th century (2 vols, 1925, 1927).

Slabchenko was instrumental in developing Odessa as a center of Ukrainian historical studies. His work was cut short when he was arrested in 1929 in the first major Soviet assault on the Ukrainian intelligentsia and tried for membership in the so-called *Union for the Liberation of Ukraine (SVU). He served his six-year sentence in the Solovets Islands. After the Second World War he worked in Pervomaiske (he was not allowed to return to Odessa) as a school teacher and then foreign language inspector. He was denounced by a colleague, and died in poverty and obscurity. In 1989 the Supreme Court of the Ukrainian SSR rehabilitated him along with other defendants in the SVU trial. In 1990 his name was restored to the membership list of the AN URSR (now ANU), which had expelled him in 1930.

I. Myhul, O. Ohloblyn

Slabchenko, Taras [Slabčenko], b 1904 in Odessa, d 1937? Historian; son of M. *Slabchenko. He worked as a lecturer in the workers' faculty of the Odessa Medical Institute and the Odessa Workers' University. In the 1920s he was a member of the VUAN social-historical section and the secretary of the Odessa Scientific Society affiliated with the VUAN. He wrote many works on general and cultural history, including the monograph *Z lystuvannia M.L. Kropyvnyts'koho* (From the Correspondence of M.L. Kropyvnytsky, 1927). He was arrested on 20 December 1929 in connection with the show trial of the Union for the Liberation of Ukraine, and sentenced on 19 April 1930 to

Taras Slabchenko

Yevhen Slabchenko

three years' confinement. Further details of his life are unknown, except that on 27 October 1937 he was sentenced to be shot by the military collegium of the USSR Supreme Court. Slabchenko was posthumously rehabilitated in 1959.

Slabchenko, Yevhen [Slabčenko, Jevhen], b 8 December 1898 in Kiev, d 10 September 1966 in Nice, France. Filmmaker and journalist. He studied at the universities of Prague and Berlin and at the Sorbonne in Paris. He organized the first Plast scouting group in central Ukraine (1917). From the mid-1920s he lived in France under the name Eugène Deslaw. There he was the official representative of the All-Ukrainian Photo-Cinema Administration and film correspondent for the Kharkiv futurist journal *Nova generatsiia*. In the 1930s he made pioneering short experimental sound films and worked on many French film productions. In 1936 he codirected (with J. Darroy) *La Guerre des gosses*, which received an award as best European film at a 1939 New York film festival. During the Second World War he worked in Spain and Switzerland, and after the war he worked in French television. His *Vision fantastique*, the first film with solarized images, received an honorable mention at the 1956 Venice Film Festival.

Slaboshpytsky, Mykhailo [Slabošpyts'kyj, Myxajlo], b 28 July 1946 in Marianivka, Shkola raion, Cherkasy oblast. Literary critic and writer. He graduated from Kiev University (1971), and from 1975 to 1983 he worked as editor in charge of literary criticism at the newspaper *Literaturna Ukraina*. Since 1991 he has been executive secretary of the Kiev branch of the Writers' Union of Ukraine. He has written many articles about the works of contemporary Ukrainian writers, and introductions to various literary editions, surveys, and reviews. Published separately have been his book in Russian and English on contemporary Ukrainian literature (coauthor, A. Shevchenko, 1981, 1983, 1985, 1987, 1989), a collection of literary profiles (1984), books of stories for children, the novel-essay *Mariia Bashkyrtseva* (1986), a study of R. Ivanychuk (1989), and the novel *Dushi na vitrakh* (Souls in the Winds, 1981). He has edited a collection of articles by Russian and other non-Ukrainian Soviet critics on Ukrainian writers (1987) and a book of O. Vlyzko's selected works (1988). In August 1992 he was elected head of the newly created Ukrainian World Co-ordinating Council.

Slang. Unconventional, nonstandard words and phrases used in colloquial speech, particularly in urban environments. Such words and phrases are generally used by various occupational groups (eg, merchants, craftsmen, students, and soldiers) and subcultural groups (criminals, prisoners, and drug users) before they become accepted in the dominant culture. They give new emphasis to certain attitudes or express new shades of meaning, and they can be derogatory, satirical, shocking, or euphemistic. Slang terms in Ukrainian (many of them borrowed from Polish, Russian, and Yiddish) have not been systematically studied. They have been used to achieve special effects by writers such as I. Franko, V. Vynnychenko, M. Khvylovy, Yu. Yanovsky, O. Korniiuchuk, L. Pervomaisky, I. Mykytenko, and O. Berdnyk.

Slanské Mountains (Ukrainian: Soloni hory). Volcanic mountains located in eastern Czechoslovakia between the Košice-Prešov Basin and the Tysa Lowland. A number of Ukrainian villages, including Banske, are situated along the ridge. The highest peak is Mount Šimonka, at 1,092 m.

Slastenenko, Yefym, b 1902 in the Far East. Zoologist and ichthyologist; full member of the Shevchenko Scientific Society since 1955. He worked at the Ukrainian Scientific Research Institute of Fish Management in Kiev (1930–3), the USSR Academy of Sciences in Leningrad (1932–8), and Rostov University (1938–42). He emigrated to Canada in 1950. He specialized in the fish of the Black and Azov seas.

Slastion, Opanas [Slast'on] (Slaston, pseud: Opishnianskyi Honchar), b 14 January 1855 in Berdianske, Tavriia gubernia, d 24 September 1933 in Myrhorod, Poltava ok-

Opanas Slastion: illustration in the 1886 edition of Taras Shevchenko's *Haidamaky*

ruha. Painter, illustrator, architect, art scholar, ethnographer, and kobzar. After graduating from the St Petersburg Academy of Arts (1882) he worked as an artist for the Ministry of Defense in St Petersburg (1887–1900), where he was able to study materials on the Ukrainian Cossacks, and presided over the Ukrainian Club in the capital (1897–1900). In 1883–5 he did 55 pen drawings for the 1886 St Petersburg edition of T. Shevchenko's epic poem 'Haidamaky.' His genre paintings and landscapes were reproduced frequently in the journals *Niva* and *Zhivopisnoe obozrenie*, and he contributed sketches to *Zoria* (Lviv) and to satirical magazines, such as *Shershen'*, *Oskolki*, *Strekoza*, and *Shut*. From 1900 to 1928 he taught at the Myrhorod Arts and Crafts School and created illustrations for more of Shevchenko's poems. Slastion's articles were published in periodicals such as *Kievskaiia starina*, *Ridnyi kraï*, *Rada*, and *Siaïvo*. For many years he wandered about Ukraine, painting landscapes, such as *Myrhorod* (1901) and *Evening: Village* (1904), drawing architectural monuments, collecting folklore and folk art, and writing down the songs performed by kobzars (later used by F. Kolessa in his two volumes of materials on Ukrainian ethnology, 1913). He became a skilled performer of Cossack dumas on the bandura. His gallery of kobzars in Left-Bank Ukraine, drawn from 1875 to 1928, was not published until 1961. From the ethnographic materials Slastion collected he prepared albums on Ukrainian and Zaporozhian antiquities (his lithographs of the mid-1890s perished in a flood in 1900), folk dress, folk ornaments, embroidery, wood carvings, ceramics, and architecture. He supported F. Krychevsky's architectural design of the Poltava Zemstvo Building in the Ukrainian 'folk' style, and in 1910–13 he designed dozens of village public buildings in that style (eg, in Velyki Sorochyntsi). Slastion prepared the materials for a book of Ukrainian folk dumas (1927) and wrote recollections about his friend P. Martynovych (1931). In 1920 Slastion founded the Myrhorod Regional Studies Museum, to which he donated his valuable collection of historical and ethnographic materials, and in 1928 he organized the first peasant banduryst chorus. A biography of Slastion by A. Abbasov was published in Kiev in 1973, and a catalog of a retrospective exhibition of his works appeared in 1975.

Slastion, Yurii, b 1903 in Myrhorod, Poltava gubernia. Architect, painter, and composer; son of O. *Slastion; full member of the Ukrainian Academy of Arts and Sciences in the US. A postwar émigré in the United States since 1949, he painted portraits and landscapes, composed choral music to the Liturgy of St John Chrysostom (1956), designed Hetman P. Skoropadsky's burial chamber in Wiesbaden, Germany, and painted the iconostases of the Ukrainian Orthodox churches in Minneapolis and Denver.

Slavechna River. See Slovechna River.

Slavery. Slavery existed in Ukrainian territory from ancient times. The first references to it appear in Arab historical sources of the 9th century, which speak of Magyar hordes moving from the Volga to the Pannonian Lowland and enslaving some of the local Slavs and selling them in Black Sea coastal towns to Greek buyers. The accounts of Arab and Jewish travelers attest that from the 10th to 13th centuries many slaves were shipped from Kievan Rus'

through the Black Sea towns to Byzantium, Spain, Turkestan, and Arab countries. The Greek colonies, in particular Chersonese Taurica, acted as middlemen in the slave trade. There was a particular square in Constantinople where Rus' merchants sold slaves (known then as *cheliad*). The trade in slaves is also mentioned in chronicles and other Ukrainian sources.

Slaves were taken mainly from among prisoners of war, people born in captivity or married to slaves, and those guilty of certain crimes (arson, horse theft) or of deliberately defaulting on loans. *Ruskaia Pravda* specified that slaves were not afforded the protection of the law, and treated them instead as the personal (hereditary) possessions of their owners. Nevertheless slavery in Ukraine remained relatively humane, particularly under the influence of Christianity and the church. The humanness was already apparent in the Princely era, when (under certain circumstances) slaves could be freed, and sometimes they owned property. (See also **Kholop* and **Zakup*.)

The institution of slavery continued to exist (under various categories and names) in Ukraine although in increasingly milder forms. It disappeared in the 15th century in the Ukrainian lands controlled by Poland and in the 16th century in the Ukrainian lands controlled by the Grand Duchy of Lithuania. In the late 16th century it was completely replaced by **serfdom*. By the time Ukraine began to fall under the rule of Muscovy (from the mid-17th century), slavery had largely disappeared as an institution. For Ukrainians in the 15th and 16th centuries the greatest threat of slavery was being captured by Crimean Tatars for sale in the slave markets of **Turkey*.

Zimin, A. *Kholopy na Rusi* (Moscow 1973)

M. Zhdan

Slavia. A leading Czech journal of Slavic philology, published since 1922 (except in 1941–6) by the **Slavic Institute* in Prague. Ukrainian contributors before the Second World War included S. and R. Smal-Stotsky, V. Simovych, I. Pankevych, D. Chyzhevsky, I. Ohienko, D. Doroshenko, F. Kolessa, L. Biletsky, and K. Chekhovych; after the war, only scholars from Soviet Ukraine and the satellite countries were published, among them O. Melnychuk, M. Onyshkevych, Ya. Dashkevych, B. Struminsky, T. Holynska-Baranova, O. Zilynsky, and H. Koliada.

Slavia Orientalis. A quarterly scholarly journal devoted to Slavic studies, published in Warsaw by the Polish Academy of Sciences since 1952. Until 1957 the journal was called *Kwartalnik Instytutu Polsko-Radzieckiego* and included articles on political topics. Most of the articles are published in Polish, although some appear in Ukrainian, Russian, and other languages. Contributors are primarily from Poland, republics of the former USSR, and other Slavic countries. The articles on Ukrainian subjects have usually dealt with 19th-century literature and history, early Ukrainian culture, or Western Ukrainian dialects. Books on Ukrainian topics by Soviet Ukrainian and Western scholars have been reviewed. An index to the journal up to 1986 was published in vol 36 (1987).

Slavic Congress in Prague, 1848. A congress of representatives of the Slavic peoples of the Austrian Empire,

called at the initiative of P. Šafařík and J. Jelačić and organized by Czech activists, such as F. Palacký, K. Zap, K. Havlíček-Borovský, and F. Rieger. The assembly was convened to consolidate the forces of the Slavs in response to calls for the unification of all German lands (including Austria with Czech-inhabited Bohemia) by the German parliament in Frankfurt; its formal sessions began on 2 June 1848. A number of Galician Ukrainians participated in the congress, including delegates from the **Supreme Ruthenian Council* (I. **Borysykevych*, H. **Hynylevych*, and O. **Zaklynsky*); none were present from Transcarpathia. A delegation from the pro-Polish **Ruthenian Congress* led by J. Lubomirski and including L. Sapieha, K. Cięglewicz, and L. Stecki participated in the assembly. A total of 363 delegates attended the congress, of whom 61 belonged to the Polish-Ukrainian contingent from Galicia. Three working commissions were struck: Czecho-Slovak, Polish-Ukrainian, and Southern Slav. As a result of talks held in the Polish-Ukrainian commission, formed at the initiative of Palacký and M. Bakunin and headed by Sapieha, an agreement was reached concerning the political, cultural, and national equality of Poles and Ukrainians. A majority of the commission accepted a proposal put forward by the Supreme Ruthenian Council to divide Galicia into eastern and western sections, but under Polish pressure the matter was referred to the Galician Diet and the State Council.

The congress dealt with other issues, including a formula for the restructuring of the Habsburg empire as a federation of autonomous peoples. The congress also sent a special petition to Emperor Ferdinand I demanding equal rights for all Slavic peoples of the Austrian Empire, which included a call for Ukrainian language rights in Galicia. None of the proposals discussed at the congress was ever officially adopted. Because of an uprising that broke out in Prague, the proceedings of the congress were halted on 12 June 1848. The congress produced no concrete results for Galician Ukrainians.

Slavic Institute (Slovanský ústav). A Czechoslovak state-funded research institution, founded in Prague on the initiative (1920) of President T. Masaryk. It was legally constituted in 1922 to study and develop Czechoslovakia's cultural and economic relations with other Slavic countries. Under the directors L. Niederle (1928–32) and M. Murko (1932–40) the institute was active in the field of **Slavic studies*. During that time it published many serials, over 70 monographs, and over 50 annual volumes of *Byzantinoslavica*, *Germanoslavica*, **Slavia*, and **Slavische Rundschau*. Its Slavic Library (Slovanská knihovna, est 1924) was one of the largest Slavic libraries outside the USSR; in 1946 it contained 244,000 monographs and 150,000 annual periodical runs. The institute supported scholarly

institutions and individual scholars engaged in Ukrainian studies. Ukrainian émigré scholars who were members of the institute included L. Biletsky, D. Chyzhevsky, F. and O. Kolessa, O. Lototsky, O. Mytsiuk, I. Ohienko, S. Smal-Stotsky, F. Steshko, and V. Timoshenko; they worked on its numerous commissions, particularly on its autonomous Research Board on Slovakia and Subcarpathian Ruthenia. From 1931 to 1940 the Ukrainian Historical Cabinet functioned within the institute. The institute's activities were restricted during the German occupation, and it was closed down in 1943. It was reactivated in 1945, but Soviet repression forced it to suspend its activities in 1948. In 1953 it was revived as part of the Czechoslovak Academy of Sciences.

Slavic languages. A group of languages within the Indo-European language family. They developed out of the dialects of Proto-Slavic, an ancestral language that arose between the Oder and Dnieper rivers. Today there are 12 Slavic languages: Belarusian, Russian, Ukrainian, Czech, Lower Sorbian, Polish, Slovak, Slovenian, Upper Sorbian, Bulgarian, Macedonian, and Serbo-Croatian. Of the historically recorded languages Polabian is extinct. In the period of its disintegration, Proto-Slavic consisted of a continuum of dialects. The contemporary Slavic languages were formed as a result of the unification of particular dialects around political and cultural centers.

The traditional conception of the history of language as constant disintegration is false: the theory that Proto-Slavic split first into Proto-East Slavic, Proto-West Slavic, and Proto-South Slavic is not supported by historical or linguistic facts. The widely accepted division of the Slavic languages into three groups – East, West, and South (or, less accepted, North, Central, and South) – is merely conventional and can be justified only from a geographic perspective. In reality, with the exception of regions of later colonization, the boundaries between the Slavic languages have been fluid. There are transitional dialects between them, and even between the literary languages the transitions are gradual.

The principle according to which the Slavic languages have been grouped is primarily a genetic one. Structurally they have much in common if one compares them in geographically contiguous pairs. There are, however, few traits common to all of them. For example, in prosody, phonemically relevant intonation in stressed vowels exists only in Slovene and Serbo-Croatian; lengthened vowels exist in Slovak and Czech; and stress is fixed in Polish, Slovak, Upper and Lower Sorbian, Czech, and Macedonian. In phonetics, Polish has nasal vowels, Czech and Slovak have diphthongs, and Slovenian and Macedonian have no opposition in the palatalization of consonants. In morphology, nouns are indeclinable only in Bulgarian and Macedonian, and conjugation is split only in Serbo-Croatian, Bulgarian, and Macedonian.

Traits common to all the Slavic languages are synchronically evident partly in the principles of their construction and partly in their material elements. Traits of the first type are, for example, the alternation of particular vowels with a zero morpheme (although which vowel alternates varies by language; cf Ukrainian *son* : *snu*, Polish *sen* : *snu*, Serbo-Croatian *san* : *sna* 'dream' nom : gen), similarities in the root structure, the existence of two stems in the verb versus one usually in the noun, and agreement of

the adjective with the noun. The most obvious material similarities are in vocabulary and, even more, in the repertoire of word roots (often, however, with a semantic shift; eg, Ukrainian *hora* 'mountain' vs Bulgarian *gora* 'forest', Ukrainian *šum* 'din' vs Serbo-Croatian *šuma* 'forest'), particularly in the set of prepositions and prefixes (with partial differences) and, less often, of suffixes.

Slavic studies (*slavistyka*, *slovianoznavstvo*). A branch of the humanities and social sciences dealing with the archeology, history, language, literature, culture, folklore, and ethnography of the various Slavic nations and the Slavs as a whole. Until the beginning of the 19th century knowledge about the Slavs was provided by missionaries (eg, SS Cyril and Methodius, J. Križanić), travelers, Byzantine, Arab, German, and other chroniclers, and early philologists (in Ukraine, primarily 16th- and 17th-century grammarians and lexicographers, such as L. Zyžanii, M. Smotrytsky, I. Uzhevych, P. Berynda, and Ye. Slavynetsky). The groundwork for modern Slavic studies was prepared by various pre-Romantic archeographers and collectors of Slavic ancient manuscripts, antiquities, and ethnography, as well as by the South and West Slavic liberation struggles. The biblical-textual research of the Czech scholar J. Dobrovský and his *Institutiones linguae Slavicae dialecti veteris ...* (1822) provided the basis for including the Slavic languages in the study of comparative Indo-European philology. P.J. Šafařík's two epoch-making works, *Slovanske starožitnosti* (Slavic Antiquities, 1837) and *Slovanský národopis* (Slavic Ethnography, 1842), placed the study of the origins and history of the Slavs on a scientific basis and thus served as a turning point in the history of Slavic studies.

In the early 19th-century Russian Empire the ideological influence of *Pan-Slavism engendered widespread intellectual interest in Slavic history and ethnography (by V. Lamansky and others) in addition to philology and archeology. In 1811 a Chair of Slavic Literature, held by M. Kachenovsky, was created in Moscow University. In 1835 the minister of education, S. Uvarov, established chairs of the 'history and literature of Slavic dialects' at all of the empire's universities. The first generation of Slavists (young university graduates, including the Ukrainians O. Bodiansky, I. Sreznevsky, and V. Hryhorovych) were sent abroad to study and do research in various Slavic countries and Western and Central European universities.

With the establishment of the Russian chairs, a Slavic chair at the Collège de France in Paris (1840, first held by A. Mickiewicz), and chairs of Slavic philology at Vienna University (1849, held by the pioneering Slavists F. Miklosich, V. Jagić, and N. Trubetskoi) and other universities in Austria-Hungary and Germany, Slavic studies entered their modern stage of development. Until 1918 Vienna, with its university, academy of sciences, and institutes of Slavic philology (est 1886) and Eastern European history (est 1907), was a major center, where many Western Ukrainian and other European Slavists were trained. In the interwar period Prague (with its Slavic Institute), Cracow, Warsaw, Berlin, Breslau, and Leipzig filled the same role. St Petersburg (Leningrad), Moscow, and Kiev have remained important research centers.

Large-scale development and specialization in Slavic studies has occurred during the 20th century. Since the end of the First World War, and particularly after the Sec-

ond World War, Slavic studies institutes, departments, and chairs have been created at many Western universities. The most prominent centers in the English-speaking world have been the University of London, with its School of Slavonic Studies (est 1915), Columbia University, Harvard University, and the University of California at Berkeley.

Major books on comparative Slavic grammar have been written by F. Miklosich (4 vols, 1852–75), V. Vondrák (1906, 1908), J. Mikkola (3 vols, 1913–50), V. Porzhezinsky (1916), G. Ilinsky (1916), A. Meillet (1924; 2nd edn 1934), A. Vaillant (5 vols, 1950–77), S. Bernshtein (2 vols, 1961, 1974), the Ukrainian linguists G.Y. Shevelov (1964) and O. Melnychuk (1966), Z. Stieber (1969), and S. Ivšić (1970). Comparative Slavic etymological dictionaries have been compiled by Miklosich (1886), E. Berneker (1908, 1914), L. Sadnik and R. Aitzetmüller (1963–), F. Koneczny (1973–), F. Sławski (1974–), and O. Trubachev (1974–). T. Lehr and A. Brückner (1929), M. Weingart-Splawiński (1937), R. Trautmann (1947), R. de Bray (1951; 3rd expanded edn 1980), T. Lehr-Splawiński, W. Kuraszkiewicz, F. Sławski (1954), and K. Horálek (1955) have written survey histories of the Slavic languages. Survey histories of Slavic cultures have been produced by T. Florinsky (1895), L. Niederle (1909), the Ukrainian historian D. Doroshenko (1922), and P. Diehls (1963). With the exception of the synthetic comparative histories of A. Pypin and V. Spasovich (1880–4), J. Karásek (1906), J. Máchal (1922–9), F. Wollman (1928), E. Georgiev (1958–63), and the Ukrainian scholar D. Chyzhevsky (1952, 1968), the study of Slavic literatures has been limited to national histories or the history of general developments and literary currents in relation to the non-Slavic world. Synthetic studies have been written on Slavic folk culture by K. Moszyński (3 vols, 1929–39) and on Slavic archeology by Niederle (11 vols, 1902–25) and members of the Polish archeological-linguistic (Lehr-Splawiński [1946], G. Labuda [2 vols, 1960, 1964]) and anthropological (J. Czekanowski [1957]) schools.

Thousands of Slavic studies monographs have been published around the world. Research has also been published in a multitude of scholarly serials and journals, such as *Archiv für slavische Philologie* (Berlin, 42 vols, 1876–1929), *Russkii filologicheskii vestnik* (Warsaw, 78 vols, 1879–1918), *Zhurnal Ministerstva narodnago prosveshcheniia* (St Petersburg, 1834–1917), *Prace filologiczne* (Warsaw, since 1885), *Izvestiia Otdeleniia russkogo iazyka i slovesnosti Akademii nauk* (St Petersburg, 1896–1927) and its *Sbornik* (101 vols, 1867–1928), **Slovanský přehled* (Prague, since 1899), *Rocznik slawistyczny* (Cracow, since 1908), *Južnoslovenski filolog* (Belgrade, since 1913), *Slavia occidentalis* (Poznań, since 1921), **Revue des études slaves* (Paris, since 1921), **Slavia* (Prague, since 1922), *The Slavonic and East European Review* (London, since 1922), *Zeitschrift für slavische Philologie* (Heidelberg, since 1925), **Slavische Rundschau* (Prague, Berlin, and Vienna, 17 vols, 1929–40), *Byzantinoslavica* (Prague, since 1929), *Slavic Review* (United States, since 1941), *Slavia antiqua* (Poznań, since 1948), *Pamiętnik słowiański* (Warsaw, since 1949), *Uchenye zapiski Instituta slavianovedeniia* (Moscow, since 1949), *Oxford Slavonic Papers* (since 1950), *Wiener slavistisches Jahrbuch* (Vienna, since 1950), *Osteuropa* (Stuttgart, since 1951), *Recherche slavistiche* (Rome, since 1952), **Slavia Orientalis* (Warsaw, since 1952), *Scando-Slavica* (Copenhagen, since 1954), *Studia slavica* (Budapest, since 1955), *Canadian Slavonic Papers* (since

1956), *Die Welt der Slaven* (Wiesbaden, Köln–Vienna, and Munich, since 1956), *l'Etudes slaves et est-européennes / Slavic and East European Studies* (Montreal, 1956–76), *Zeitschrift für Slawistik* (East Berlin, since 1956), *Slovo* (Zagreb, since 1957), *Slovanské štúdie* (Bratislava, since 1957), *The Slavic and East European Journal* (United States, since 1957), *Romanoslavica* (Bucharest, since 1958), *International Journal of Slavic Linguistics and Poetics* (The Hague, Lisse, and Columbus, Ohio, since 1959), *Slavica Pragensia* (Prague, since 1959), *Slavica* (Debrecen, since 1961), *Voprosy istorii slavian* (Voronezh, since 1963), *Acta Baltico-Slavica* (Białystok, since 1964), *Sovetskoe slavianovedenie* (Moscow, since 1965), *Anzeiger für slavische Philologie* (Wiesbaden and Graz, since 1966), *Slavica Slovaca* (Bratislava, since 1966), *Canadian-American Slavic Studies* (since 1967), *Slavica Wratislaviensia* (Wrocław, since 1969), *Zbornik za slavistiku* (Novi Sad, since 1970), *Folia Slavica* (Columbus, Ohio, since 1977), *International Review of Slavic Linguistics* (Edmonton, since 1979), and *Die Slavischen Sprachen* (Salzburg, since 1982).

In Ukraine. For practical reasons and because of political circumstances, Slavic studies in Ukraine have not focused on the Slavs in general, but on individual Slavic languages and literatures, especially Old Church Slavonic, Russian, and Polish. Until the Soviet period many leading Slavists at universities in Ukraine were Russian (eg, A. Sobolevsky, N. Durnovo) or Polish (eg, Lehr-Splawiński and Stieber in interwar Lviv). Among Ukrainian scholars, pioneering contributions to the study of comparative Slavic linguistics were made by O. Potebnia in the 19th century and M. Hrunsky and L. Bulakhovsky in the 20th century. After 1946 Bulakhovsky and his colleagues in Kiev (eg, O. Melnychuk, V. Kolomiets, I. Bilodid, V. Skliarenko, V. Rusanivsky, Z. Veselovska) created a major center of Slavic accentological and syntactic research. A former student of Bulakhovsky, G.Y. Shevelov of Columbia University, made significant contributions to Slavic phonology.

From 1957 Slavic studies in Ukraine were co-ordinated by the AN URSR (now ANU) Presidium's Ukrainian Committee of Slavists, headed by Bulakhovsky (1957–61), M. Rylsky (1961–4), Bilodid (1964–81), and Rusanivsky (from 1981). In addition to the many scholars of Slavic languages and literatures in Ukraine, in 1980 there were 124 professional Slavic historians (including many not specializing in Russian history): 34 in Kiev, 25 in Lviv, 13 in Kharkiv, 13 in Uzhhorod, 8 in Odessa, 5 in Donetsk, and 5 in Lutske.

Ukrainian Slavists have published in many Ukrainian, Russian, and foreign periodicals and collections and participated in many national and international Slavic studies conferences. The Ninth International Congress of Slavists was held in Kiev in 1983. The Ukrainian-language serials devoted to Slavic studies have been **Slovo* (Lviv, 1936–9), *Pytannia slov'ians'koho movoznavstva* (Lviv, 8 issues, 1948–63), *Slov'ians'ke movoznavstvo* (Kiev, 4 vols, 1958–62), *Mizhslov'ians'ki literaturni vziemyny* (Kiev, 3 vols, 1958–63), *Slov'ians'ke literaturoznavstvo i fol'klorystyka* (Kiev, since 1965), and *Problemy slov'ianoznavstva* (formerly *Ukrains'ke slov'ianoznavstvo*, Lviv, since 1976 [no. 39 in 1989]).

Old Church Slavonic studies. Until the Revolution of 1917 textbooks of Old Church Slavonic (OCS) were available only in Russian in Russian-ruled Ukraine. In Soviet Ukraine in the 1920s, such scholars as Hrunsky, P. Buzuk, and H. Holoskevych produced studies of OCS writing and

grammar in Ukrainian. In the 1930s the Stalinist suppression of Ukrainian culture and the exclusion of OCS as a subject of study in postsecondary schools brought about a decline in the area. Conditions improved significantly in the postwar period, particularly after Stalin's death. Textbooks of OCS have been written by Hrunsky (1941, 1946), K. Trofymovych (1958), V. Besedina-Nevzorova (1962), M. Stanivsky (1964), and A. Maiboroda (1975). Studies in OCS morphology have been produced by M. Boichuk (1952), Trofymovych (1958), and others.

In Austrian- and interwar Polish-ruled Western Ukraine, studies of OCS texts and language were produced by O. Kaluzhniatsky, P. Kopko, I. Svientsitsky, I. Ohienko, O. Kolessa, I. Pankevych, and Ya. Hordynsky. OCS grammars for Ukrainian gymnasiums and theological seminaries were written by M. Vozniak (1925), S. Karkhut (1931), A. Hryhoriev (1938), and N. Rusnak (1943) in Western Ukraine, and by the émigré scholars J. Rudnycky (1947) and V. Lev (1956).

Russian studies. Before the Revolution of 1917 many prominent Russian specialists (eg, I. Rizhsky, Sreznevsky, M. Maksymovych, N. Lavrovsky, Potebnia, M. Khalansky, A. Sobolevsky, D. Ovsianiko-Kulikovsky, P. Vladimirov, D. Zelenin, Durnovo, M. Dashkevych, S. Kulbakin, M. Sumtsov, V. Peretts, Hrunsky, M. Gudzi, B. Liapunov, and V. Mochulsky) taught at universities in Russian-ruled Ukraine and influenced the development of Ukrainian studies. After the revolution many Russian specialists emigrated to the West (eg, Chyzhevsky) or to Russia. Others were repressed during the Stalinist terror. In interwar Lviv Svientsitsky and V. Vavryk were Russian specialists.

Because of the Stalinist nationality policy (the promotion of Russian as the second native language in Ukraine), from the 1930s Russian studies had a preferred status in Soviet Ukraine. University departments of the Russian language also doubled as departments of general linguistics, especially after 1945, and Russian subjects were allotted increasingly more space in journals devoted to Ukrainian philology, such as *Ukrains'ka mova i literatura v shkoli*, *Movoznavstvo*, and *Radians'ke literaturoznavstvo*, in addition to having their own Russian-language serials (eg, *Voprosy russkoi literatury*, *Voprosy russkogo iazykoznaniiia*). The main centers of Russian studies were in Kiev and Kharkiv (and, to a lesser extent, Odessa), which trained the Russian specialists teaching in Dnipropetrovske and (after 1945) in Lviv and Chernivtsi.

In the Soviet period efforts were initially applied to the writing of postsecondary textbooks, some of which have been used outside Ukraine. Among the many books published were ones on the history of the Russian language by Bulakhovsky (1929, 1931, 1935; 2 vols, 1941, 1948), O. Finkel and M. Bazhenov (1941), and F. Huzhva (1967); on Russian historical grammar by Bulakhovsky (1921–31, 1935) and N. Bukatevich, S. Savitskaia, and L. Usacheva (1974); on Russian historical syntax by Ya. Sprynchak (2 vols, 1960, 1964); on the history of standard Russian by V. Brodskaia and S. Tsalenchuk (1951) and G. Shkliarevsky (1959, 1967, 1968); on Ukrainian and Russian comparative grammar by T. Baimut, Boichuk, M. Volynsky, M. Zhovtobriukh, T. Malyna, and S. Samiilenko (1957, 1961), and by M. Britsyn, Zhovtobriukh, and Maiboroda (1978); and on East Slavic comparative grammar by Bukatevich, I. Hrytsiutenko, H. Mizhevska, M. Pavliuk, Savitskaia, and

F. Smahlenko (1958). A Russian etymological dictionary was compiled by H. Tsyhanenko (1970).

Russianists in Ukraine studied various aspects of the Russian language, such as phonetics (P. Kryvoruchko, N. Yakovenko, L. Skalozub, L. Tsyptsura), morphology (H. Kyrychenko, A. Hermanovych, N. Vakulenko), word formation (I. Markovsky, E. Okhomush, V. Franchuk), lexicology (I. Sydorenko, V. Syrotina, M. Muravytska, A. Matveev), intonation (Yakovenko), stylistics (V. Masalsky, L. Loseva, L. Rikhter, S. Puhach), dialectology (M. Tikhomirova, Usacheva, Loseva, V. Stolbunova, L. Buznik, Britsyn), and especially syntax (V. Borkovsky, L. Kirina, V. Rinberg, E. Kuzmicheva, H. Pavlovska, H. Chumakov, R. Shvets, A. Akishyna, N. Arvat, M. Karpenko, Finkel, Huzhva, L. Boldyrev, Loseva, Kryvoruchko, M. Ionina, V. Kononenko).

Ukrainian specialists on Russian literature wrote about many writers, particularly N. Gogol (H. Izhakevych, N. Krutikova, D. Mirosnyk, Zaslavsky), M. Lermontov (D. Iofanov, I. Zaslavsky), A. Pushkin (Bulakhovsky, Gudzi, Rytsky, O. Biletsky, Krutikova), A. Chekhov (V. Kapustin, Krutikova, M. Levchenko), N. Nekrasov (V. Malkin, Ye. Shabliovsky, D. Chaly), L. Tolstoi (A. Chicherin, Krutikova), M. Gorky (Shkliarevsky, O. Burmistrenko, Karpenko, Syrotina, N. Zhuk), V. Maiakovsky (A. Trostianetsky, H. Makarov), M. Sholokhov (S. Koltakov), A. Tolstoi (T. Chertorizhskaia, V. Verbytska, L. Zvereva), K. Fedin (H. Sodal, V. Oleshkevych), A. Fadeev (Izhakevych, S. Tsy-pin, Tsalenchuk, I. Kruk, H. Samiilenko), L. Leonov (V. Ruban, Kruk, M. Malynovska), V. Shishkov (M. Sydorenko), and A. Tvardovsky (A. Khvyliia), as well as the Russian works of H. Kvitka-Osnovianenko (T. Velychko), T. Shevchenko (P. Petrova, Chertorizhskaia, L. Kodatska, and others), and other Ukrainian writers. A two-volume multiauthor monograph on Ukrainian-Russian literary relations (ed Krutikova et al) appeared in Kiev in 1987.

Polish studies. Until 1939 Lviv University, the Ossolineum Institute, and numerous Polish scholarly journals and learned societies made Lviv a major center of Polish scholarship, with specialists in the fields of Polish language (A. Małeczki, W. Taszycki, S. Rospond, S. Hrabec), literature (R. Pilat, E. Kucharski, J. Kleiner, S. Kolbuszewski, R. Ingarden), and ethnography (A. Kalina, A. Fiszer). Lviv's Ukrainian philologists (eg, O. Ohonovsky, P. Kopko, K. Studynsky, V. Shchurat, I. Franko) also wrote frequently on Polish subjects. In the 1920s and early 1930s the Soviet Ukrainian scholar S. Rodzevych wrote about Polish literature. After the Second World War Galicia's Polish scholars were repatriated, and only a few Ukrainian specialists in the Polish language (eg, L. Humetska, M. Onyshkevych) and literature (eg, T. Pachovsky, R. Kyrchiv) remained active in Lviv. Kiev became a major postwar center of studies in Polish literature (Rytsky, V. Vedina, H. Verves, Yu. Bulakhovska, O. Tsybenko, S. Levinska, P. Verbytsky, I. Lozynsky, V. Radyshevsky) and language (O. Tkachenko, M. Pavliuk, Levinska, M. Pylynsky, V. Rusanivsky). A few Polonists were active in Chernivtsi (eg, V. Fedorishchev). Postwar émigré scholars who wrote on Polish linguistic subjects included Shevelov and O. Horbach.

Belarusian studies. Belarusian studies were less developed in Ukraine. Until 1939 they were cultivated in Lviv by scholars such as Svientsitsky and L. Ossowski. In Soviet Ukraine scholars such as P. Buzuk in the 1920s and L. Humetska, Z. Veselovska, V. Kuprienko, H. Pivtorak,

I. Vykhoanets, and A. Nepokupny in the postwar period studied Belarusian linguistic problems. In the West, Shevelov also contributed to Belarusian linguistic studies.

Slovak, Czech, and Sorbian studies. In the early 20th century, Slovak ethnography and history were studied in Lviv by scholars such as V. Hnatiuk and S. Tomashivsky. In the interwar period Slovak linguistic subjects were studied at Lviv University by Stieber. In the postwar period scholars such as Onyshkevych and V. Andel (author of a textbook on the Slovak language [1972]) in Lviv, Y. Dzendzelivsky and M. Symulyk in Uzhhorod, and V. Kolomiets-Melnychuk, V. Skrypka, and M. Haidai in Kiev wrote on the Slovak language. Slovak literature was studied by H. Syvachenko and others. Scholars living in Slovakia, such as M. Molnar and M. Nevrlý in Bratislava and I. Matsynsky in Prešov, also wrote on Slovak literature and Slovak-Ukrainian literary relations.

In the prerevolutionary period and the 1920s the main centers of Czech philological studies were Kharkiv (Bulakhovsky) and Kiev (Florinsky, A. Stepovych, Ye. Rykhlik). In the postwar period Kiev remained the main research center of Czech linguistics (Bulakhovsky, Melnychuk, Kolomiets-Melnychuk, R. Kravchuk, V. Pitinov, V. Tsviakh, Y. Andersh), literature (P. Hontar, V. Shevchuk, F. Pohrebennyk, I. Zhuravska, V. Motorny, Syvachenko, and others), and folklore (Skrypka, Haidai). The Czech language was also studied by Lviv scholars, such as Trofymovych, H. Lastovetska, Andel, and M. Pushkar (author of textbooks on modern Czech [1963], historical phonetics [1965], and historical morphology [1970, 1972]).

In the interwar period the Sorbian languages were researched by the Lviv Polish linguists Taszycki and Stieber. In the postwar period they were studied in Drohobych by I. Kovalyk and in Lviv by Trofymovych (author of a textbook on the Upper Sorbian language [1964] and coauthor, with Motorny, of books on the history of Sorbian literature [1970, 1987]).

Bulgarian and Serbo-Croatian studies. In central Ukraine the Southern Slavic languages were studied in the context of Old Church Slavonic at Kharkiv, Odessa, and Kiev universities by scholars such as P. Biliarsky, Hryhorovych, A. Kochubinsky, B. Liapunov, Jagić, and M. Popruzhenko. M. Drinov of Kharkiv University wrote pioneering works on Bulgarian and South Slavic history. Bulgarian studies were later pursued in Kharkiv by Kulbakin and Bulakhovsky, and in Kiev by Florinsky, K. Radchenko, and Stepovych. In the 1930s D. Sheludko wrote on Bulgarian literature. In the postwar period modern Bulgarian was studied by Bernshtein (author of an atlas of Bulgarian dialects in the USSR [1958]), Pavliuk, N. Kossek, S. Ovcharuk, T. Nikolaevskaia, I. Stoianov, and others. Studies of Bulgarian literature were written by V. Zakhazhevska, N. Shumada, O. Shpylova, M. Golberg, O. Hrybovska, M. Maliarchuk, and others. O. Mordvintsev studied Bulgarian folklore and ethnography.

Serbo-Croatian studies were pursued in the prerevolutionary period by Kulbakin, Florinsky, Radchenko, Stepovych, and Hnatiuk. In the postwar period I. Zheliezniak in Kharkiv and Z. Rozova in Lviv specialized in the Serbo-Croatian language. Serbian and Croatian literatures were studied by Ye. Kyryliuk, V. Hrymych, P. Rudiakov, I. Yushchuk, and others. Serbo-Croatian folk songs in Ukraine were studied by M. Huts.

Slavin, Lazar, b 11 June 1906 in Vitsebsk, Belarus, d 30 November 1971 in Kiev. Archeologist of Jewish origin; corresponding member of the AN URSS (now ANU) from 1939. He studied at Leningrad University (1923–6) before working at the USSR Academy of Sciences Institute of the History of Material Culture (1929–38). He was sent from Leningrad to Kiev in 1938 as the deputy director of the ANU Institute of Archeology, and soon became its director (1939–41 and 1944–6). Slavin was a gifted organizer and he quickly rebuilt the institute, which had been thoroughly savaged by two purges of Ukrainian archeologists (1933 and 1937); however, this was done using mainly Russian archeologists. He remained with the institute as deputy director (1946–9), then as a scholarly associate (1949–71). From 1945 to 1970 he also headed the University of Kiev's Department of Archeology and Museum Studies. His specialization was the archeology of the northern Black Sea region, particularly the *Olbia settlement. He published over 70 scholarly articles and monographs, including *Ol'viiia* (1938) and *Drevnii gorod Ol'viiia* (The Ancient City of Olbia, 1951).

Slavinsky, Maksym [Slavins'kyj] (Slavynsky; pseud.: M. Holovaty, S. Lavynsky, Obozrevatel, Observator), b 12 August 1868 in Stavyshe, Tarashcha county, Kiev gubernia, d November 1945 in Kiev. Civic and political leader, publicist, and poet. After graduating from the law faculty of Kiev University he lived in Katerynoslav, where he edited the newspaper *Pridneprovskii kraï*. From 1898 he lived in St Petersburg, where he was a coeditor of the pro-

Maksym Slavinsky

gressive newspaper *Severnyi kur'er* and the journal *Vestnik Evropy*. He was editor of *Ukrainskii vestnik* (1906), the organ of the Ukrainian caucus of the First State Duma, and then official publisher and technical editor of *Ukrainskii narod v ego proshlom i nastoiashchem* (The Ukrainian People in the Past and Present, 2 vols, 1914, 1916). He became a member of the Ukrainian Party of Socialists-Federalists (1917–18), and in 1917 he was a representative of the Central Rada to the Provisional Government in St Petersburg. He was elected head of the commission to develop proposals for the restructuring of the Russian Empire as a federation.

Slavinsky returned to Ukraine in 1918. Under the Hetman government he was a member of the council of the foreign affairs ministry, ambassador to the Don region, and a participant in the talks with Soviet Russia (May–June 1918). In the second government of F. Lyzohub (1918) he was minister of labor. Under the Directory he headed the diplomatic mission of the UNR in Prague (1919). From 1923 Slavinsky taught modern history at the Ukrainian Husbandry Academy and the history of Western European literature at the Ukrainian Higher Pedagogical Institute in Prague. He was arrested by the Soviet authorities in Prague in 1945, and died in a Kiev prison.

Slavinsky wrote many historical, literary, and publicistic articles on nationhood, including 'Shcho take natsiia?' (What Is a Nation?), 'Natsiia i inteligentsiia' (The Nation and the Intelligentsia), and 'Natsional'na struktura Rosii' (The National Structure of Russia), as well as a popular textbook on the history of Ukraine (pub in 1947). He also wrote lyric poetry. Together with Lesia Ukrainka Slavinsky translated and published H. Heine's *Buch der Lieder* as *Knyha pisen'* (1892); some of the songs became immensely popular, particularly 'Koly rozluchaiut'sia dvoie' (When Two [People] Part; music by M. Lysenko). Slavinsky also translated the works of J. Goethe, A. Mickiewicz, and R. Rolland and works from Czech literature. His memoirs were published in the newspaper *Ameryka* during the 1950s.

A. Zhukovsky

Slavische Rundschau. A German-language journal of Slavic studies, published by the German Society for Slavic Studies in Prague in 1929–40 (a total of 17 volumes). Edited by F. Spina, G. Gesemann, and others, it contained regular chronicles of cultural and scholarly developments in Slavic countries, as well as bibliographies and book reviews, and included separate sections devoted to Ukrainian affairs and publications.

Slavistica. A series of booklets and monographs in Slavic and Ukrainian studies, primarily philology and linguistics, published in Ukrainian and English by the Ukrainian Free Academy of Sciences (now *Ukrainian Academy of Arts and Sciences), initially in Augsburg (3 issues in 1948), then in Winnipeg, and since 1977 in Montreal. Edited until 1973 by J.B. Rudnyckyj, it has published works by Rudnyckyj, V. Chaplenko, R. Smal-Stotsky, G.Y. Shevelov, P. Kovaliv, I. Ohiienko, G. Simpson, W. Kirkconnell, P. Fylypovych, M. Mandryka, C. Manning, S. Hordynsky, M. Ovcharenko, O. Woycenko, O. Baran, P. Odarchenko, and others. Its 87th title appeared in 1986.

Slavonic-Ruthenian language. The bookish language used in 15th- to 18th-century Ukrainian and Belarusian scholarly, publicistic, and literary works. The term *slavenorosskii* (Slavonic-Ruthenian [SR]) was introduced in the late 15th century and was popularized by P. *Zhytetsky (1889). SR evolved out of the Ukrainian redaction of 11th- to 14th-century Church Slavonic, which became archaized and came under the influence of Middle Bulgarian and Serbian in the 14th century as a result of the grammatical and stylistic reforms of the Bulgarian patriarch Euthymius (see *Orthography). From the mid-17th century it influenced the norms of literary Russian. From the mid-18th century its Left-Bank Ukrainian variant became so much like the Russian variant that the latter took precedence. In the 1720s and 1730s, SR was introduced in Srem and Bačka (now in Yugoslavia) by Russians and Ukrainians teaching there; it remained the foundation of the archaized Serbian bookish language for over a century. In Galicia, Bukovyna, and Transcarpathia, SR survived in the form of a lexically Russified bookish language (**yzazychiie*) until the first half of the 20th century.

SR differs from the Old Ukrainian bookish language in its lexicon and style (Latinisms, Polonisms, calques, hypotactic and periodic sentence construction, and periphrasis). Its norms were laid out in the grammar **Adelphotos* (Lviv 1591) and in the grammars of L. *Zyzanii (1596) and M. *Smotrytsky (1619). Its vocabulary was codified in the lexicons of L. Zyzanii (1596) and P. *Berynda (1627, 1653), the dictionary **Synonima slavenorosskaia*, Ye. *Slavynetsky's Latin-Slavonic (1642) and Slavonic-Latin (1649, with A. Koretsky-Satanovsky) dictionaries, and in smaller Slavonic-Polish dictionaries (anon, Suprasl 1722, repr Pochaiv 1751, 1756, 1804; Y. Levytsky, 1830).

SR avoided clearly Ukrainian and Belarusian phonetic traits (*ikan'je*), retained etymological spellings (the letters *ы* and *ѣ*), did not mark the secondary doubling of consonants, introduced the hardened *c* in suffixes, and retained the Church Slavonic cases and their endings in declension and conjugation. The meanings of obsolete verb forms (the aorist and imperfective), artificially created moods based on Greek grammar (the optative and subjunctive), and word-formation devices (eg, *-tel'nyj* [cf *-abilis, -andus*], *xlebotvorec* 'baker') were taken from the Greek and Latin. The system of conjunctions and the wide use of active participles and the 'dative absolute' were taken from Old Slavonic syntax (oriented on the language of the Ostrich Bible and liturgical books). The vocabulary was based on borrowings from the Bible, Greek, Latin, and, to the 18th century, Polish; the use of vernacular dialectal expressions was avoided. The synthetic character of SR resulted in a varied application by authors, depending on

their erudition and themes. The syntax of SR had a discernible impact on the chancery language.

Slavophiles. Adherents of a philosophical, ideological, social, and political movement in Russia in 1840-70 that idealized everything Russian; their outlook was opposed to that of the Westerners, who advocated a broad adoption of Western ways in Russia. The Slavophiles celebrated the difference between Russia and the West; they contrasted Orthodoxy ('the only true Christian religion') with Catholicism and Protestantism and Muscovite traditions with Western ones, and advocated a pan-Slavic unity under Russia's hegemony. They praised the old way of life and the social system of Muscovy, particularly of the pre-Petrine period, including the commune, artel, and village council. The chief spokesmen of Slavophilism - A. Khomiakov, I. Kireevsky, I. and K. Aksakov, Yu. Samarin,

and I. Belaev - advocated the abolition of serfdom and the introduction of some democratic rights, but they also favored a centralized Russian Empire and Russia's leadership among the Slavic nations. They opposed independence for Ukraine and even for Poland. Among Ukrainians the Slavophiles had little influence. Some ethnographic and historical works of M. Maksymovych and O. Bodiansky (both worked in Moscow) reflect Slavophile ideas. The attempts of the Aksakov brothers to gain the co-operation of T. Shevchenko, M. Kostomarov, and P. Kulish with the Slavophiles proved unsuccessful.

Slavs (*sloviany*). The largest group of ethnically and linguistically related peoples in Europe. They belong to the Indo-European linguistic family and are descended from the ancient Slavs mentioned in Greco-Roman and Byzantine sources. Occupying eastern and southeastern Europe, they are usually divided into the East Slavs (Ukrainians, Russians, and Belarusians), West Slavs (Poles, Czechs, Slovaks, and Wends), and South Slavs (Bulgarians, Serbs, Croats, Slovenes, and Macedonians).

The original homeland of the ancient Slavs has not been identified, but by the beginning of the 1st millennium BC

ORIGINAL HOMELAND OF THE SLAVS

they were the dominant population in the region extending from the Elbe and the Oder rivers in the west to the upper Dnieper in the east. They were a peaceful people who practiced farming and animal husbandry and developed handicrafts and trade. Their religion was animistic: they worshiped ancestors and various spirits in nature and a pantheon of heavenly deities, such as Perun, Dazhboh, and Svaroh.

The division of the ancient Slavs into various branches and tribes began in the 2nd to 4th centuries AD, when the Germanic tribes, such as the Goths, moved south and split the Slavs into eastern and western groups. Then, at the end of the 5th century, when the Huns had been overcome, the Slavs expanded southward. In the south they formed two tribal confederations, of the *Antes and the *Sklavenes. Soon those disintegrated into separate tribes, including the Polianians, Siverianians, Derevlianians, and Volhynians. Some of those tribes were later brought together under Kievan Rus'.

In the 19th century the idea of Slavic cultural and political unity (see *Pan-Slavism) became influential among Slavic peoples who were undergoing a national revival. Some movements, such as the Slavophile one in Russia, tried to harness that idea to the imperial ambitions of Russia.

Slavuta. III-7. A city (1989 pop 35,100) on the Horyn River and a raion center in Khmelnytskyi oblast. In 1634 the town of Slavutyna arose by the amalgamation of two villages, Derazhnia and Volia. Later it was renamed Slavuta. In 1754 the town was granted the rights of *Magdeburg law. After the second partition of Poland in 1793, Slavuta was annexed by Russia and became part of Iziaslav county in Volhynia gubernia. Its owners, the Sanguszko family, established their residence there and built a horse-breeding stable (1803), a woolen-cloth factory (1818), a paper factory, and a machine factory. Those enterprises grew during the 19th century, particularly after the construction of the Shepetivka–Zdolbuniv railway line. In 1923 Slavuta became a raion center of Volhynia gubernia, and in 1938 it attained city status. Today its chief industries are building-materials manufacturing, woodworking, and metalworking.

Slavutych, Yar [Slavutyč, Jar] (né Hryhorii Zhuchenko), b 11 January 1918 in Blahodatne, Oleksandriia county, Kherson gubernia. Poet and literary scholar; president of the Shevchenko Scientific Society in western Canada since 1976. A graduate of the Zaporizhia Pedagogical Institute (1940) and the University of Pennsylvania (PH D, 1955), he taught Ukrainian at the United States Army Language

Yar Slavutych

School in Monterey, California (1955–60), and the University of Alberta (1960–83). Since 1945 he has published 12 books of poetry, including two volumes of collected works (1963, 1978) and, the most recent collection, *Zhyvi smoloskypy* (Living Torches, 1983). His poems have appeared in Ukrainian émigré periodicals and anthologies and in Canadian English-language anthologies, and some have been translated into English (*Oasis* [1959], *The Conquerors of the Prairies* [trilingual edn 1984]), French (*L'Oiseau de feu* [1976]), German, Hungarian, Russian, and other European languages. They have also been set to music (by S. Yaremenko, H. Kytasty, and E. Wolf) and have been recorded by the Ukrainian Bandurist Chorus of Detroit. Slavutych has also written a book of memoiristic sketches (1957; 3rd rev edn 1985), the booklets *The Muse in Prison* (1956) and *Modern Ukrainian Poetry* (1957), the textbooks *Conversational Ukrainian* (1959; 4th edn 1973) and *Ukrainian for Beginners* (1962; 5th edn 1975), a survey of Ukrainian poetry in Canada (1976), and literary and onomastic articles and reviews in émigré and Canadian scholarly periodicals and collections. The editor of the literary almanac **Pivnichne siaivo* (5 vols, 1964–71), two volumes of papers on Ukrainian settlers in western Canada (1973, 1975), and an anthology of Ukrainian poetry in Canada (1975), he also compiled an annotated bibliography of books of Ukrainian literature published in Canada (1984; 2nd rev edn 1986) and translated into Ukrainian a book of selected poems by J. Keats (1958). A collection of articles and reviews about his poetic works (1978, ed W. Zyla) and a bibliography of his writings (1985; rev edn 1986) have appeared.

R. Senkus

Slavutych [Slavutyč]. A city (1989 pop 15,900) on the left bank of the Dnieper River at the mouth of the Desna River, 50 km from Chornobyl, in Chernihiv oblast. It was founded in 1987 for the workers of the Chornobyl Nuclear Power Station, who had been evacuated from Prypiat and Chornobyl after the accident at the station. In 1988 it was granted city status.

Slavynetsky, Yepifanii [Slavynec'kyj, Jepifanii], b ? , d 19 November 1675 in Moscow. Churchman, theologian, philologist, and translator. He studied Greek, Latin, Polish, and theology at the Kiev Epiphany Brotherhood School (until 1632) and then at various European academies. Upon his return to Kiev he took monastic vows and became a hieromonk of the Kievan Cave Monastery (1642–9) and a professor at the Kievan Mohyla College

(Academy). In 1649 he was summoned by Tsar Aleksei Mikhailovich to Moscow to teach at the monastery school and translate and prepare liturgical books, including a translation of the Bible. While still in Kiev, he compiled a Latin-Slavonic (Ukrainian) lexicon (1642) based on the Polish-Latin lexicons of A. Calepino and G. Knapski. He revised this dictionary with A. Koretsky-Satanovsky in Moscow (1650). He also prepared a Greek-Slavonic-Latin lexicon (before 1675) and compiled a dictionary of religious terms for use in translating church books, and authored over 50 sermons. Although none of these works were published in his lifetime, they circulated widely throughout Muscovy, Ukraine, and Eastern Europe and greatly influenced early Slavic philology. In Moscow, Slavynetsky supported the church reforms introduced by Patriarch Nikon; he drafted many reforms himself and revised numerous church books to bring them into line with the new policies.

A. Zhukovsky

Ślawek, Walery, b 2 November 1879 in Ukraine, d 2 May 1939 in Warsaw. Polish politician. A leading figure in the Polish Socialist party (PPS), he was a close associate of J. Piłsudski. As a representative of the Polish Ministry of Military Affairs he was a signatory to the Polish-Ukrainian army convention of 24 April 1920. After 1926 he emerged as one of the leaders of the *Sanacja regime. He was a cofounder and chairman of the Nonpartisan Bloc of Co-operation with the Government (1927–35), a delegate to the Polish Sejm (1928–38), marshal of the Polish Sejm (1938), and premier of Poland (1930–1 and 1935). Ślawek was a moderate in Ukrainian matters, who distanced himself from certain actions of the Polish Roman Catholic church and tried to reach an understanding with the Galician Ukrainian political mainstream (the Ukrainian National Democratic Alliance) following the *Pacification in 1930.

Sleshynsky, Ivan [Slešyns'kyj], b 23 July 1854 in Lysianka, Cherkasy county, Kiev gubernia, d 9 March 1931 in Cracow, Poland. Ukrainian-Polish mathematician. He graduated from Odessa University in 1875 and continued his studies under the great German mathematician K. Weierstrass at Berlin University (PH D, 1882). He was professor at Odessa (1883–1909) and Cracow (1911–24) universities and did research on continued fractions, the least squares method, and the axiomatic proof theory based on mathematical logic. He was one of the first promoters of mathematical logic in the Russian Empire.

Slidamy maloï sviatoï (In the Footsteps of the Little Saint). A popular Ukrainian Catholic journal published quarterly, bimonthly, and again quarterly in Bois-Colombes, France (1948–52), Edmonton (1952–66), and, since 1966, Amiens, France. The editors have been S. Saprun and, since 1952, Rev Yu. Prokopiv.

Slipansky, Andrii [Slipans'kyj, Andrii], b 5 October 1896 in Nenadykha, Tarashcha county, Kiev gubernia, d ? Agronomist. Upon graduating he worked in different research institutions in Kharkiv and was appointed a professor at the Ukrainian Scientific Research Institute of

Economics and Agricultural Organization. In the 1930s he served as vice-president of the All-Ukrainian Academy of Agricultural Sciences. His publications dealt with agronomy and agricultural economics. He was arrested in the Stalinist terror of the 1930s and sent to a prison camp, where he perished.

Slipchenko, Pavlo [Slipčenko], b 12 July 1904 in Synivka, Hadiache county, Poltava gubernia. Specialist in the field of hydro-technology. He studied in Kharkiv and worked on many major hydro-constructions in Ukraine. In 1959–61 he served as director of the Institute of the Organization and Mechanization of Construction of the Ukrainian SSR Academy of Construction and Architecture, from 1960 as a member of the academy's presidium, and in 1962–3 as its vice-president. His main technical contributions concerned the mechanization of construction technology for hydro-structures.

Slipchuk, Petro [Slipčuk], b 19 January 1914 in Minyne, Radomyshl county, Kiev gubernia, d 5 November 1979 in Kiev. Poet and humorist. He is the author of collections of humor and satire, among them *Baiky* (Fables, 1944), *Liudozhery* (Cannibals, 1945), *Iak dbaiesh, tak i maiesh* (What You Work At Is What You Get, 1955), *Otaki dila* (That's the Way It Is, 1961), *Iushka z pertsem* (Broth with Pepper, 1967), and *Vinok baiok* (A Garland of Fables, 1973).

Slipko, Yurii, b 26 May 1912 in Slipky (now Vynnyky), Kobeliaky county, Poltava gubernia, d 4 October 1969. Poet. In the early 1930s he worked as a teacher and newspaper editor. He began publishing in 1930 in *Nova generatsiia* and other journals. He was arrested during the Stalinist terror (1934–5) and imprisoned in a labor camp in the Kolyma region. After being released in 1947, he worked as a miner in the Donbas. During the post-Stalin thaw he began writing again and published the collections *Proloh do pisni* (Prologue to a Song, 1966) and *Zelena fantaziia* (The Green Fantasy, 1968). Published posthumously was the collection *Na liudnim vichi* (At the Crowded Public Assembly, 1971).

Slipko-Moskaltiv, Kostiantyn [Slipko-Moskal'civ, Kostjantyn], b 3 June 1901 in Warsaw, d ? Painter and art scholar. He taught at the Kharkiv Institute of People's Education (from 1925 to the early 1930s) and researched children's art. He published articles on art in *Chervonyi shliakh* and wrote the books *M. Boichuk* (1930), *S. Vasyl'kivs'kyi* (1930), and *O. Murashko* (1931). He was arrested during the Stalinist terror, and his fate is unknown.

Sliporid River. A right-bank tributary of the Sula River that flows for 83 km through the Dnieper Lowland in Poltava oblast and drains a basin area of 560 sq km. The river has a width of 4–10 m and is used for irrigation. Five sluices are located on it.

Slipy, Yosyf [Slipyj, Josyf] (Slipy-Kobernytsky-Dyckovskyy), b 17 February 1892 in Zazdryst, Terebovlia county, Galicia, d 7 September 1984 in Rome. Head of the Ukrainian Catholic church, major archbishop, metropolitan of Halych, archbishop of Lviv and bishop of Kamianets-Podilskyi, cardinal (from 1965), and theologian; full member of the Shevchenko Scientific Society from 1930.

Slipy began studying theology in Lviv at the Greek

Cardinal Yosyf Slipy

Catholic Theological Seminary and at the university (1911–12). He was ordained by Metropolitan A. Sheptytsky in October 1917, continued his studies at the Jesuit theological faculty in Innsbruck (Th.D., 1918), and then defended his habilitation at Innsbruck University (1920). He completed his studies in Rome at the Gregorianum with a *magister agregatus* in dogmatics and a second habilitation (1924). In 1922 Slipy began to teach dogmatics at the Lviv Theological Seminary. He soon showed his abilities as an organizer of Ukrainian theological studies, in helping to found the quarterly **Bohosloviia* (which he also edited) and the **Ukrainian Theological Scholarly Society*, whose *Pratsi* he also edited. In late 1925 he was appointed rector of the theological seminary, where he established the *Asketychna biblioteka* (Ascetic Library) monograph series. In 1928 he was named the first rector of the **Greek Catholic Theological Academy*. This institution soon emerged as the most important center of Ukrainian Catholic theological study and training; it published numerous works on religious topics, developed a large museum of church objects and icons, and trained many priests and theologians. In 1935 Metropolitan Sheptytsky named Slipy canon of St George's Cathedral and archdean of Lviv archeparchy. In October 1939, after the outbreak of the Second World War and the Soviet occupation of Western Ukraine, Sheptytsky nominated Slipy as his coadjutor. The nomination was ratified by Pope Pius XII in November 1939, and in December Slipy was secretly consecrated and given the title Archbishop of Serrei. After Sheptytsky's death on 1 November 1944, Slipy succeeded him as metropolitan of Halych, archbishop of Lviv, and bishop of Kamianets-Podilskyi.

On 11 April 1945, after the consolidation of Soviet rule in Western Ukraine, Slipy, together with all the other Greek Catholic bishops, was arrested. He was sentenced at a secret trial in 1946 to eight years of hard labor for treason. After the completion of his sentence he was taken to Kiev and told to endorse the liquidation of the Greek Catholic church and renounce his ecclesiastical rights and titles in favor of the Patriarch of Moscow. When he refused, he was again deported to a labor camp. He spent a total of over 18 years in the gulag, but he steadfastly refused to break allegiance with Rome and denounce the pope. In 1963, upon the intervention of Pope John XXIII and the American president J.F. Kennedy, N. Khrushchev finally agreed to his release from a labor camp in Mordovia and permitted him to emigrate. Slipy arrived in Rome on

9 February 1963, where he was greeted as a true Christian martyr and a Ukrainian national hero. The Vatican recognized Slipy as the Ukrainian Catholic major archbishop with expanded powers and authority, and in December 1963 Pope Paul VI named him a member of the Sacred Congregation for Eastern Rite Catholic Churches. In January 1965 he was honored with the title and dignity of cardinal.

Slipy was especially concerned with improving the organization and prestige of his church. In a 11 October 1963 speech at the Second Vatican Council, he proposed the creation of a Ukrainian Catholic patriarchate (see **Patriarch*). He also convoked a **synod* of Ukrainian bishops, which the Vatican Congregation for the Eastern Churches refused to sanction. In 1969, at the fourth synod of Ukrainian bishops, Slipy declared that the Ukrainian Catholic church 'is now organized as a patriarchate,' and in 1975 he accepted the title of patriarch; this too was opposed by the Vatican. Slipy's efforts toward realizing the separate identity of the Ukrainian Catholic church did meet with success toward the end of his life, however, when Pope John Paul II, in a 1980 letter to him, recognized the legal role of the synod in the Ukrainian Catholic church. The first officially recognized synod of Ukrainian bishops was then called by the pope in March 1980 and presided over by Slipy. The second synod (January–February 1983), also under Slipy, accepted the Statute of the Synod of the Ukrainian Catholic church.

After his 1963 release Slipy also turned his attention to reviving Ukrainian Catholic scholarship. In November 1963 he founded the **Ukrainian Catholic University* and an associated publishing house, library, and archive, and revived *Bohosloviia* as the organ of the Ukrainian Theological Scholarly Society (which had been renewed just prior to Slipy's release). He also renewed publication of *Dzvoony*, a literary and popular-scientific journal, and *Nyva*, a religious journal. Slipy built the St Sophia Cathedral in Rome, modeled on the St Sophia Cathedral in Kiev, and initiated the publication of *Blahovisnyk Verkhovnoho arkhieiepyskopa vizantiis'ko-ukraïns'koho obriadu*. He purchased a former procurator general's office for his official abode, and established there the Ukrainian Catholic parish of St Sergius and Bacchus in Rome. He revitalized the Studite Fathers and acquired a monastery for them in Castel Gandolfo, near Rome. He organized branches of the Ukrainian Catholic University in Washington, London, Chicago, and Philadelphia.

As a theologian Slipy was an authority on dogmatic theology and scholastic philosophy. His earliest theological works, including his habilitation theses *Die Trinitätslehre des byzantinischen Patriarchen Photios* (1921) and *De principio spirationis in SS Trinitate* (published in 1926), were concerned with the Holy Trinity and attempted to reconcile Eastern and Western Christian differences over the nature of the Trinity and the procession of the Holy Spirit. A series of his works on the Sacraments was smuggled out of Ukraine in manuscript during the war and published in Yorkton, Saskatchewan (5 books in 3 vols, 1953–60). Slipy also published articles on the Church Union of Brestia, the history of the Ukrainian Catholic church, the influence of St Thomas Aquinas on Ukrainian theology, and other subjects; these have been collected and published in Rome in thirteen volumes (1968–84). In recognition of his scholarly work he was made full (1930) and honorary (1964) member of the Shevchenko Scientific

Society, full member of the Tiberian Academy in Rome (1965), and a member of the Papal Academy of St Thomas (1981). He also received honorary doctorates from the Ukrainian Free University in Munich and from several universities in the United States and Canada. Slipy's remains have been transferred, in accordance with his wishes, to a crypt at St George's Cathedral in Lviv. The ceremony was conducted on 28 August 1992 with more than a million faithful in attendance.

W. Lencyk

Slisarenko, Anatolii, b 30 March 1923 in Kiev. Film director and screenwriter. He completed study in the actor's (1948) and director's (1949) faculties at the Kiev Institute of Theater Arts. He has worked in the Ukrainian Studio of Chronicle-Documentary Films (1950–6 and since 1963) and the Kiev Artistic Film Studio (1956–61). He has directed four feature films and many documentaries and written two collections of prose (1979, 1985).

Oleksa Slisarenko

Fedir Slisarenko

Slisarenko, Oleksa (pseud of Oleksa Snisar), b 28 March 1891 in Konivtsov *khutir* (now Shyputove), Vovchanske county, Kharkiv gubernia, d 3 November 1937. Poet and prose writer. In the 1920s he moved to Kharkiv, where he became editor at the Knyhospilka publishing house. He was also coeditor of *Universal'nyi zhurnal* (1928–9). His first published poems appeared in 1910–11, in the student journal *Do pratsi* and in *Rillia*. In Kiev he joined the Bila Studiia group of Ukrainian symbolists and met with members of the Muzahet group. His first anthology of symbolist poetry, *Na berezi Kastal's'komu* (On the Kastal Coast, 1919), was marked by the influence of P. Tychna, O. Oles, and K. Balmont and other Russian symbolists. It also evinced some elements of expressionism. He subsequently joined the Panfuturist organizations *Aspanfut* and *Komunkult* and published the collections of

futurist poems *Poemy* (Poems, 1923) and *Baida* (1928). His attention to form and to poetic expression is evident. He began writing prose in 1924 and published over 20 collections of English- and American-style crime-adventure stories, including *Bunt* (The Revolt, 1928), *Zlamanyi gvynt* (The Broken Bolt, 1929), *Chorny Anhel* (Black Angel, 1929), *Khlibna rika* (The River of Bread, 1932), and *Straik* (Strike, 1932). His prose deals mainly with the period immediately preceding and during the revolution, and his protagonists are antiheroes, people who are thrust into collisions with the revolution. Slisarenko also wrote poetry for children. In 1931 he published a collection of stories under the pseudonym Omelko Buts, *Posmertna zbirka tvoriv* (Posthumous Collection of Works). A selection of his works appeared in 1930, and a complete six-volume edition was published in 1931–3. Slisarenko was repressed during the Stalinist terror because of his ties to the symbolists and Panfuturists, his membership in Hart and Vaplite, and, particularly, his sharp rebuke of M. Gorky in 1927, after Gorky refused to permit the publication of a translation of *Mat'* (Mother) into Ukrainian. He was arrested in 1934 and sent to the Solovets Islands, where he was shot. In the late 1950s he was rehabilitated, and his novels *Bunt* and *Chorny Anhel* were republished in 1965 and 1990.

B. Kravtsiv

Slisarchuk, Kostiantyn [Sljusarčuk, Kostjantyn], b 1869 in Stanyslaviv county, Galicia, d autumn 1919 in Hrushky, near Kamianets-Podilskyi. Senior army officer. During the First World War he was an officer in the Austrian army; he supervised the training of the Legion of Sich Riflemen in 1917. Upon joining the Ukrainian Galician Army in November 1918 he was given command of the Southern Group, which was re-formed in January 1919 into the Lviv Brigade. He was promoted to colonel in January 1919 and was assigned to a diplomatic mission for negotiating a permanent armistice with Poland. In August 1919 Slisarchuk was put in charge of military training. He died of typhus in the so-called Quadrangle of Death.

Slisarenko, Fedir [Sljusarenko], b 1886 in Cherkasy, d 9 May 1958 in Prague. Classical philologist, historian, and educator. A graduate of the St Petersburg Historical-Philological Institute, he was active in the St Petersburg Ukrainian Hromada and read public lectures on Ukrainian history and literature. In 1918 he worked for the UNR government in Kiev. He emigrated to Vienna and then Prague and taught classical philology and archeology at the Ukrainian Free University (UVU, 1924–39), where he also served as dean of the philosophy faculty (1936–9). He also taught Slavic history at the Ukrainian Higher Pedagogical Institute, classical archeology at the Ukrainian Studio of Plastic Arts in Prague, and Latin at the Ukrainian Gymnasium in Modrřany. His studies and articles on the history of ancient Greece and Ukraine (the Greek colonies on the Black Sea littoral) were published in the serials of the UVU and the Ukrainian Historical-Philological Society in Prague.

Slisurarivna, Mariia [Sljusarivna, Marija], b 31 August 1912 in Kosiv, Galicia. Stage actress. She acted in the Tobilevych Theater (1932–8), the Kotliarevsky Theater and the Lesia Ukrainka Theater (1938–41), the Stanyslaviv Franko Ukrainian Drama Theater (1941–4), and the Ukrainian

theater in Austria under H. Sovacheva (1945–8). From 1948 she appeared sporadically with Ukrainian troupes in Canada.

Slusarsky, Anton [Sliusars'kyj], b 12 January 1901 in Syniukhy, Volodymyr-Volynskyi county, Volhynia gubernia, d 2 March 1980 in Kharkiv. Historian. He graduated from the Institute of People's Education in Kiev in 1929, assumed a lectureship at Kharkiv University in 1934, and served as dean of its Faculty of History in 1947–62. He received his doctorate in history in 1964 and was made a full professor in 1965. He studied the history of the peasantry in central and Slobidska Ukraine, in which field he published *Slobids'ka Ukraïna* (Slobidska Ukraine, 1954), *V.N. Karazin, ego nauchnaia i obshchestvennaia deiatel'nost'* (V.N. Karazyn, His Scientific and Social Activities, 1955), and *Sotsial'no-ekonomicheskoe razvitie Slobozhanshchyny XVII–XVIII vv.* (The Socioeconomic Development of Slobidska Ukraine in the 17th–18th Centuries, 1964). He was coeditor of the volume on Kharkiv oblast (1967) in the series *Istoriia mist i sil URSR* (History of the Cities and Villages of the Ukrainian SSR).

Sliuzar, Volodymyr [Sliuzar], b 20 January 1895 in Chukiv, Zastavna county, Bukovyna, d 26 December 1976 in Montreal. Ukrainian Orthodox priest and community leader. After serving as a commander in the 14th Brigade of the Ukrainian Galician Army he completed his theological and law studies at Chernivtsi University. He arrived in Canada in 1923, where he was ordained (1924) and appointed pastor of St Sophia Cathedral in Montreal (1926). He subsequently helped organize parishes in Lachine, Ottawa, Oshawa, Hamilton, and Toronto. After the Second World War he was appointed assistant to Archbishop M. Khoroshy.

Slobidska Ukraine (Slobozhanshchyna). A historical-geographic region in northeastern Ukraine that corresponds closely to the area of the Ostrohozke, Iziium, Kharkiv, Okhtyrka, and Sumy Cossack regiments. Its name, derived from the **sloboda* settlements founded there, came into use in the early 17th century and continued until the early 19th century. Slobidska Ukraine bordered on the Hetmanate to the west, the borderlands of the Crimean Khanate and the Zaporizhia to the south, the Don River to the east, and Muscovy to the north. It included sections of the Central Upland and the adjacent Donets Lowland as well as the southeastern section of the Dnieper Lowland and a small area of the Donets Ridge.

Pre-17th century. The oldest evidence of settlement in the territory dates from the Upper Paleolithic. The territory was subsequently settled by **Siverianians*. After being incorporated into the Kievan Rus' state in the late 9th century, it was, in succession, part of the Chernihiv, Pereiaslav, and Novhorod-Siverskyi principalities. After its devastation during the Tatar invasions of the 13th century it remained uninhabited. In the early 16th century it came under the control of Muscovy. At that time it was essentially an expanse of wild steppe through which Tatars passed during their raids into Muscovy – usually along the **Murava Road* or the Iziium and Kalmiius roads. The empty steppes of the region also attracted Ukrainian **ukhodnyky* or *dobychnyky*, who engaged primarily in beekeeping, fishing, and hunting. They developed a regional

**salt industry* (primarily in the Bakhmut region and near Tor [later Slovianske]).

From the later 16th century there were two contending streams of colonizers in Slobidska Ukraine: from the north came Muscovite service personnel for the construction of defense lines and fortifications (against invaders from the Crimea to the south as well as the Polish-Lithuanian Commonwealth to the southwest); from the west came Ukrainian agricultural settlers. Some of the latter group were attracted specifically by the resources of the region, and others simply sought to escape the increasingly harsh conditions under Polish rule. There were also some refugees to Slobidska Ukraine and the Don region from exploitative landowners in Muscovy. The Ukrainian migration, however, was much larger than the two sources of Russian colonization.

In the late 16th century the Muscovite government established a number of advance garrisons in the wild steppe: Orel, Livny, and Voronezh (1585); Yelets (1592); Belgorod, Oskol, and Kursk (1596); and Valuiky (1599). During Muscovy's Time of Trouble (1605–13) that expansion came to a halt, but Vilnyi, Khotmyzsk, Userd, and other centers were built (largely on the ruins of medieval towns) soon thereafter. In the 1630s and 1640s the so-called Belgorod Line was constructed, stretching from Okhtyrka (1653) in the west to Ostrohozke (1653) in the east. A string of other settlements was also founded, including Chuhuiv (1627) and Oboian (1649). In the late 17th century the Iziium Line (from the Kolomak River to Valuiky) was constructed. In the early 18th century the Belgorod Line lost its strategic significance owing to the increasingly dense settlement of Slobidska Ukraine and the establishment of the **Ukrainian Line* (1731–3), which drew upon the resources of Slobidska Ukraine to its south.

17th and 18th centuries. The Ukrainian colonization of Slobidska Ukraine proceeded in a number of waves. Immigration was particularly substantial in the 1630s in the wake of unsuccessful Cossack insurrections. A contingent of about 1,000 migrants led by Hetman Ya. **Ostriany*n settled near Chuhuiv in 1638. Migration increased as a result of the Khmelnytsky uprising, particularly after the Treaty of **Bila Tserkva* in 1651. In 1652 some 2,000 Cossacks of Chernihiv and Nizhen regiments, led by Col I. **Dzykovsky*, established Ostrohozke. Another detachment, led by H. Kondratiev, moved from Stavyshe, in Bila Tserkva regiment, to Sumy. A similar influx founded Kharkiv in 1654. The **Ruin* also resulted in a wave of colonization, primarily from Right-Bank Ukraine, in the 1670s and 1680s. Vovcha (Vovchanske) was founded in 1674, and Iziium in 1681. The suppression of the rebellion led by S. **Palii* prompted another wave of settlement in the early 18th century. The last major surge of colonization occurred in the 1720 and 1730s, after the restoration of Polish control in Right-Bank Ukraine, the defeat of the haidamaka uprising of 1734, and the entrenchment of the Cossack *starshyna* as landowners in the Hetmanate. The influx of Ukrainians into Slobidska Ukraine pushed Russian colonists (as well as some Ukrainians) toward the east and southeast, in the direction of the Don and the Volga rivers.

In the late 17th century the population of Slobidska Ukraine was about 120,000. The 1732 census indicated a population of 400,000, and that of 1773, over 660,000. The settling of the region added approx 100,000 sq km to Ukrainian ethnographic territory as its border moved

SLOBIDSKA UKRAINE

120–200 km eastward. In the mid-18th century Slobidska Ukraine constituted 25 percent of Ukrainian ethnographic territory and was inhabited by 10 percent of its population.

The Muscovite government initially encouraged Ukrainian immigration to Slobidska Ukraine. Moscow sought to benefit from the resulting economic development of its unpopulated frontier and from a capable military force that could defend its southern borders. The settlement of Slobidska Ukraine also helped to stem the flow of Russian serfs escaping to the Don region. Ukrainian colonists therefore were supplied with weapons and granted the right to establish *sloboda* settlements with title to the lands, traditional Cossack privileges, and a regimental form of administration.

In the 1650s Ostrohozke, Sumy, Okhtyrka, and Kharkiv regiments were established, and in 1685 Iziium regiment was partitioned from the Kharkiv structure. In 1734 those regiments were divided into 98 companies. The regiments and their colonels were granted official recognition in a tsar's charter. In the 18th century a more concerted effort was made to centralize the administration of the region in the hands of a higher military official. That official was usually chosen from among the local colonels or from the

ranks of Russian generals. F. Shydlovsky (a colonel of Kharkiv regiment), F. Osypov (a colonel of Okhtyrka regiment), O. Lesevytsky (a colonel of Okhtyrka regiment), V. Kapnist (brigadier general), and others served in that position.

In contrast to the Hetmanate, Slobidska Ukraine possessed no territorial autonomy. It was subject directly to Muscovite state authority. Initially it was under the voivode of Belgorod (who in turn was responsible to the War Office [Razriadnyi prikaz]). In 1688 it was placed under Muscovy's Foreign Office (Posolskii prikaz), and in 1708 under the military governor of Azov. In 1711 the administration of Sumy and Okhtyrka regiments was placed in the jurisdiction of the Kiev governor, and Kharkiv regiment followed suit in 1718. That same year the administration of Iziium and Ostrohozke regiments was transferred to the Voronezh governor. From 1726 the regiments came under the authority of the War College.

The administration of Slobidska Ukraine and the posts therein were similar, with some exceptions, to those of the regimental system of the Hetmanate. In the later 17th century the members of the general staff were elected at Cossack (officers') councils and confirmed by Muscovite officials. In the 18th century the positions became Russian

appointments, the *starshyna* usually coming from the Cossack elite, and regimental colonels and company captains occasionally being foreigners. A number of leading Cossack families filled regimental and other positions in an almost hereditary manner. Such 'dynasties' included the Kondratiev family in Sumy regiment, the Perekrestov-Osypov and Lesevytsky families in Okhtyrka, the Donets-Zakharzhevskys and Danylevskys in Iziium, the Shydlovskys, Kulykovskys, and Kvitkas in Kharkiv, and the Teviashovs in Ostrohozke.

Social organization and economy. Slobidska Ukraine was similar socially and economically to the Hetmanate. The first Ukrainian settlers in the region were divided along social lines into Cossacks, clergymen, burghers (merchants and craftsmen), and common peasants (*pospoltyti*). There was no nobility in the region in the 17th century. The majority of the population consisted of Cossacks, who constituted half of the region's population until the mid-18th century. The Cossacks themselves were divided into *Cossack helpers, *elect Cossacks, and the *Cossack *starshyna*. In 1732 there were 23,565 elect Cossacks and 72,226 helpers in the four regiments (in 1763, there were 58,231 and 108,301 respectively). *Landless peasants, mainly former Cossacks and free peasants who had lost their households and land, worked on the estates of wealthier Cossack estate owners. In 1732 there were 12,978 of them in the four regiments. The elect Cossacks gradually became a closed class of freemen, and the landless peasants became enserfed to the *starshyna* landowners. The common peasants became divided into those working their own land and those on the estates of the *starshyna*, Russian service personnel, and monasteries. The burghers were few in number.

Russians in Slobidska Ukraine formed a separate, socially heterogeneous group. Initially they came in various official capacities, but by the 18th century they had become local landowners, small independent farmers (*odnodvirtsy*), or common peasants. One estimate put the number of Russians in the four regiments at 1,650, concentrated mainly in the Kharkiv region. As in the Hetmanate the Cossack *starshyna* amassed progressively larger estates, and the local peasantry was increasingly impoverished. By 1768, 196,336 of 381,745 male peasants in the region were virtual serfs.

The largest Cossack landowner families in Slobidska Ukraine were the Danylevsky, Donets-Zakharzhevsky, Kvitka, Kovalevsky, Kondratiev, Kulykovsky, Lesevytsky, Nadarzhynsky, Osypov, Perekrestov, Teviashov, and Shydlovsky. The Kapnist, Myklashevsky, Myloradovych, and Polubotok families from the Hetmanate also had large estates in the region. The Russian landowners included the Dunin, Gendrikov, Golitsyn, Kropotkin, and Yusupov families. Among other foreign landowners was the Moldavian Kantemir family.

The local economy was also similar to that of the Hetmanate, with agriculture and animal husbandry the primary occupations. The prevalent form of farming was the rotating field system. In the late 18th century the three-field system came into use. Apart from Cossack and small peasant landholdings, large estates were also established by Cossack officeholders, the Russian aristocracy, and various monasteries. Those grew in size to approach the latifundia of Right-Bank Ukraine.

Sheepherding, beekeeping, orchard keeping, fishing,

milling, distilling, and the production of various handicrafts were also significant contributors to the region's economy. Toward the end of the 18th century there were about 34,000 craftsmen in Slobidska Ukraine. The salt industry was another significant undertaking, with plants in Tor, Bakhmut, and Spivakivka; salt peter was a particularly important product. In the 18th century, manufacturing plants were established, which concentrated on cloth and clothing manufacture as well as serving the region's agricultural economy. Of specific note was a tobacco-processing plant established in Okhtyrka, the first in Ukraine and in the Russian Empire.

The focal points of trade were the local markets, of which there were 271 in 1779. In addition there were 10 middle-sized and 2 large markets (Sumy and Kharkiv). The transit trade with Russia, the Hetmanate, Zaporizhia, Southern Ukraine, the Crimea and the Don region, Caucasia, and Iran was also important. Trade between Slobidska Ukraine and the Hetmanate was particularly significant: the Hetmanate exported manufactured goods (such as glass and steel products) in exchange for salt.

Political life. Slobidska Ukraine's political life was conducted within the framework of the Russian (later imperial Russian) state, although its frontier location initially offered it semiautonomy. Moreover, the region's geographic location, between Russia and the Crimean Khanate, the Hetmanate, and the Don region, often placed it in the midst of controversies. Slobidska Ukraine was the object of ruinous Tatar attacks from the south that continued until the Russo-Turkish wars of 1768–74 secured its borders by the Peace Treaty of *Küçük-Kaynarca (1774). Slobidska Ukraine's westernmost regions (Sumy and Okhtyrka) suffered extensive damage during the Russo-Swedish conflict of 1708–9. The Russo-Turkish War of 1735–9 was also very damaging.

The marked difference in social order between Slobidska Ukraine and Russia gave rise to repeated conflicts and even open rebellion. In 1670 a revolt began in Ostrohozke regiment in support of the peasant rebellion led by S. Razin. The colonel of the regiment, I. Dzykovsky, led the insurgency and briefly expelled all Russian officials from the eastern reaches of the territory. The uprising was suppressed, however, and Dzykovsky was executed along with many of his supporters. The inhabitants of Slobidska Ukraine also participated in the Bulavin rebellion that erupted in 1707. When the Crimean khan Devlet Girei attacked the region in 1711, some of the local population (from Nova and Stara Vodolaha) rose to assist him. Subsequently Peter I had a tenth of the captured rebels executed and the rest exiled along with their families. The Right-Bank haidamaka uprisings also spread to Slobidska Ukraine, but these resulted only in limited local disturbances.

Relations between Slobidska Ukraine and the Hetmanate were strengthened during the tenures of Hetmans I. *Samoilovych and I. *Mazepa. Both sought to expand their jurisdictions to the territory, where a large portion of the Right Bank's population had resettled. Petitions to that end were presented in Moscow in 1680 and 1681 by the hetman's emissaries, M. Samoilovych (colonel of Hadiache) and I. Mazepa (at that time a notable military fellow). They were rebuffed. Mazepa repeated the request once he became hetman, and was again refused.

A treaty concluded by P. *Petryk with the Crimean

Khanate in 1692 provided for the joining of the western regiments (Sumy and Okhtyrka) to the Hetmanate, and a transfer of population from the eastern regiments (Kharkiv, Izium, and Ostrohozke) to Right-Bank Ukraine. The territory's *starshyna* was ambivalent about such plans. The upper echelons of Sumy and Okhtyrka regiments were more closely connected (even related) to their counterparts in the Hetmanate and were therefore positively inclined. The leadership of the eastern regiments preferred the direct rule of the tsar, albeit with greater autonomy for the territory as a whole. Union with the Hetmanate ceased to be an issue after the Battle of *Poltava in 1709, when the Russian government embarked upon an intensified anti-Ukrainian policy.

That development, however, did not affect other relations between the Hetmanate and Slobidska Ukraine. Apart from economic and cultural ties, there were family connections between the leading families of the *starshyna*. Among those in the Hetmanate with kin in Slobidska Ukraine were the Apostol, Charnysh, Cherniakh, Chetvertynsky, Hamaliia, Horlenko, Hrechany, Ivanenko, Kapnist, Lisnytsky, Lyzohub, Maksymovych, Markovych, Myklashevsky, Myloradovych, Polubotok, Rodzianko, Savych, Samoilovych, Skoropadsky, Sulyma, Zabala, Zarudny, and Zhurakovsky families. Highly placed people usually did not sever their connections when moving from one territory to another. Conversely, leaders from Slobidska Ukraine often played a part in the political affairs of the Hetmanate. Slobidska Ukraine also offered a refuge for Hetmanate officials and their families during political or military crises (particularly during 1708–9).

Church relations also served to bring the two territories together. Although the church hierarchy of Slobidska Ukraine was directly tied to the Moscow patriarchate (later to the Russian Synod), religious life in the region had a distinctly Ukrainian character. The main institution was the Belgorod eparchy, whose bishops (particularly in the 18th century) tended to come from the Hetmanate and were graduates of the Kievan Mohyla Academy or Chernihiv College. Ostrohozke regiment belonged to the Voronezh eparchy, whose hierarchy and clergy also included many Ukrainians educated in Kiev, Chernihiv, or (later) Kharkiv College.

The more notable bishops of Belgorod were Ye. Tykhorsky (1722–31), who founded Kharkiv College; Y. *Horlenko (1748–54); Y. Mytkevych (1758–63); S. *Myslavsky (1769–75), a scholar, former rector of the Kievan Mohyla Academy, and future metropolitan of Kiev; and T. Mochulsky (1787–99), a member of the Russian Academy. In 1799 Slobidska Ukraine's religious center moved to the Kharkiv eparchy, whose first bishop (1799–1813) was Kh. Sulyma, a member of a notable family of Cossack leaders.

*Kharkiv College became the main institution of higher learning in Slobidska Ukraine in the 18th century. It was modeled on the Kievan Mohyla Academy, and its curriculum was mostly theological. Its professors included scholars educated at the Kievan Academy or Chernihiv and Pereiaslav colleges, as well as some who studied at German universities. The college's students were not only local but from the whole of Left-Bank Ukraine and neighboring districts of Russia. Another major educational center in Slobidska Ukraine was a Latin-Slavic school in Ostrohozke (est 1733, moved to Voronezh in 1737, and then returned to Ostrohozke in 1742). It also had a com-

plement of Ukrainian instructors educated in the Hetmanate, Galicia, and Germany. H. *Skovoroda taught at the colleges in Pereiaslav and Kharkiv. His activities and writings were closely tied to Slobidska Ukraine.

Loss of autonomy. Beginning with the reign of Peter I the imperial Russian government intervened increasingly in the internal affairs of Slobidska Ukraine's regiments. Under the empress Anna Ivanovna the territory's autonomy was abolished outright in 1732, but it was renewed by Elizabeth I in 1743. Finally, on 8 August (28 July OS) 1765, Empress Catherine II issued a decree abolishing the Cossack order and the regimental system in Slobidska Ukraine. The Slobidska Ukraine military formations were transformed into the Kharkiv uhlan and the Sumy, Okhtyrka, Izium, and Ostrohozke hussar regiments. The rank-and-file Cossacks and helpers were ranked at a status comparable to that of state peasants, and the officer class was absorbed into the Russian nobility. The territory itself was governed as Slobidska Ukraine gubernia, with its capital in Kharkiv.

The abolition of the regimental order caused dissatisfaction among the Cossack *starshyna* of Slobidska Ukraine. F. Krasnokutsky, the colonel of Izium regiment, together with members of Kharkiv regiment's *starshyna*, protested openly. This action resulted in a series of arrests and the institution of measures designed to curb a wider movement. Krasnokutsky was divested of his holdings and titles and exiled to the Kuban. Others were sentenced to flogging. Further protests were made during the election of representatives to the Legislative Commission of 1767–8, including a call for the restoration of the regimental system from the Sumy region. But the Russian government managed to suppress the dissent.

In 1835, after a number of administrative changes, the gubernia itself was dissolved. Most of it (the southern section) was reorganized as Kharkiv gubernia, and the rest was assigned to Voronezh and Kursk gubernias. That pattern was continued during the formation of the USSR. Northern Slobidska Ukraine became part of the RSFSR, and the southern section, of the Ukrainian SSR.

Slobidska Ukraine dialects. Dialects of the northern part of eastern Ukraine, spoken mainly in the southeastern districts of Sumy oblast, Kharkiv oblast, the northern areas of Luhanske oblast, the southern parts of Kursk, Bel-

gorod, and Voronezh oblasts, and the northwestern part of Rostov oblast. Their boundaries cannot be defined precisely. These dialects arose from the intermingling in 16th- to 17th-century Slobidska Ukraine of settlers from the middle Dnieper region, particularly from the northeastern Poltava area, the Chernihiv region, and the Right Bank. There are fewer local variations among these dialects than among the Middle Dnieper dialects. The distinctive phonetic features are the following: the consonants *d, t, n, l, z, s* are softened before the *i* that had evolved from the old *ō* (eg, *s't'il, pod'il* 'table, division'); the pronunciation of unstressed *e* is close to *y* (eg, *v'lyсна* 'spring'), of unstressed *y* to *e* (eg, *žy've* 'lives'), and of unstressed *o* to *u* (eg, *t'lybi* 'to you'); *r* tends to be softened (eg, *bazar', komar', r'ama* 'market, mosquito, frame') and the alveolar *l* appears in parallel with the ordinary *l* (eg, *ložka-ložka* 'spoon'). The distinctive morphological features are the following: the unstressed endings of the soft noun group are modified toward the hard group (eg, *z'at'ov'i, z'at'om* [Standard Ukrainian (SU) *z'atevi, z'ateml* 'son-in-law' dat, instr]; there is no change of *d, t, z, s* into the corresponding sibilants *ž, č, ž, š* in the conjugation of the first person singular (eg, *xod'u, nos'u* [SU *xodžu, nošu*] 'I go, I carry'; the third person of second conjugation verbs (if the ending is unstressed) takes the form *xode, nose* [SU *xodyt', nosyt'*] 'he walks, he carries'); and the third person plural of the second conjugation has the same ending as the first conjugation (eg, *nos'ut'–nos'ut* [SU *nos'at'*] 'they carry'). These dialects also have a distinctive vocabulary; eg, *hyr'avyj* 'sickly', *blahyj* 'sick', and *burta* 'pile'.

Slobidskyi Kish. See Haidamaka Battalion of Slobidska Ukraine.

Slobidskyi Regiment (Slobidskyi polk). A military formation organized in the mid-18th century by the tsarist government on the frontier of *New Serbia and the Zaporizhia, in southwestern Ukraine, for the purpose of checking the Zaporozhian Cossacks. Its main base was the St Elizabeth Fortress (now the city of Kirovohrad). Like the five Cossack regiments in Slobidska Ukraine, the regiment enjoyed a measure of autonomy. In 1760 it had 6,536 men, of which 213 were officers. In 1764 its troops were reorganized into a lancer regiment.

Sloboda. A self-governing settlement in 16th- to 18th-century Ukraine. The inhabitants of a *sloboda* were exempted by the owner (usually a magnate, also the state or the church) from obligations, such as fees and taxes, for an extended period (15 to 25 years). The privileges were offered by owners to attract peasants and skilled workers from other regions. The largest number of *slobody* sprang up in the first half of the 17th century in Right-Bank and Left-Bank Ukraine. In the 1630s and 1640s hundreds of *slobody* were created in the border regions of Muscovy, and they attracted peasants from Left-Bank and Right-Bank Ukraine. By the end of the 18th century there were 523 *slobody* in that territory, which was called *Slobidska Ukraine, and over 100 *slobody* on the lands of the New Sich.

In the 19th and early 20th centuries the term was sometimes used in central and eastern Ukraine to refer to larger villages as well as to industrial or factory settlements which did not have the status of cities or towns. About 100 places in Ukraine still retain *sloboda* or *slobidka* in their

name, usually with an adjective referring to the larger town or territory where the settlement sprang up, among them Sharhorod (Shahorodska *sloboda*) and Krasyliv (Krasylivska *slobidka*) in eastern Podilia.

Slobodian, Nataliia [Slobodjan, Natalija], b 27 February 1923 in Kiev. Ballerina. In 1941 she completed study at the Kiev Choreography School (pupil of K. Vasina). In 1944–68 she was a soloist in the Lviv Theater of Opera and Ballet, and from 1968 she was the ballet master there. She was the first performer of the heroic roles in A. Kos-Anatolsky's ballets *Orysia, Khustka Doobusha* (Dovbush's Shawl), and *Soichyne krylo* (The Jay's Wing).

Roman Slobodian

Slobodian, Roman [Slobodjan], b 17 October 1889 in Nastasiv, Ternopil county, Galicia, d 20 May 1982 in Elizabeth, New Jersey. Community leader. After emigrating to the United States in 1906, he joined the *Ukrainian National Association and, eventually, served as its financial secretary (1920–33) and supreme treasurer (1933–66). He was a founding and leading member of the United Ukrainian Organizations in America and the Ukrainian Congress Committee of America. In the interwar period he organized financial aid for Ukrainian institutions in Galicia, and after the war he was chairman of the audit committee and vice-president of the *United Ukrainian American Relief Committee.

Slobodianiuk-Podolian, Stepan [Slobodjanjuk-Podoljan], b 2 August 1876 in Lityn, Podilia gubernia, d 15 September 1932 in Leningrad. Painter. He studied at the Odessa Art School (1899–1901) and audited courses at the St Petersburg Academy of Arts (1905–12). From 1925 he lived in Katerynoslav. He painted portraits, such as *Woman's Portrait* (1915), *Ukrainian Woman* (1916), *Sailor from the Cruiser Aurora* (1917), *Ukrainian Girl* (1926), and *Moldavian Woman* (1928), and canvases on historical subjects, such as *Karmaliuk's Funeral* (1912), *Lenin's Arrival at the Finland Station* (1924), and *Karmaliuk* (1926).

Slobodianyuk, Hnat [Slobodjanyk], b 1902 in Lysivka, Proskuriv county, Podilia gubernia. Civil engineer. He studied at the Kiev Polytechnical Institute and worked at the Mezhyhiria Ceramics Institute. From 1934 he held the chair of construction materials at the Kiev Civil-Engineering Institute and served as assistant director of the Scientific Research Institute of Building Materials. He specialized in the field of building materials, particularly concrete and bricks, and developed a new method of manu-

facturing high-grade cement. He published numerous technical papers.

Oleksander Slobodianyuk

Slobodianyuk, Oleksander [Slobodjanyk] (Slobodyanik, Alexander), b 5 September 1941 in Lviv. Pianist. His initial musical education took place in Lviv, where at 6 he appeared on radio and by 14 played with the orchestra of the Lviv Philharmonic. From 1956 he studied at the Moscow Conservatory with H. Neuhaus, and in 1964 he graduated from that school in the class of V. Gornostaeva. He made his debut tour of the United States in 1968 and subsequently appeared in recitals and with orchestras throughout Europe, the Americas, and the Far East. Since 1969 he has made recordings (mainly on the Melodiya and Angel labels) of works by J. Haydn, L. van Beethoven, F. Chopin, F. Liszt, M. Mussorgsky, S. Prokofiev, I. Stravinsky, and B. Liatoshynsky.

Slobodivna, Mariia, b 8 December 1876 in Ulhivok, Rava Ruska county, Galicia, d 28 August 1935 in Kharkiv. Stage actress and writer. She worked in the Ruska Besida Theater (1893–1902) and wrote the collection of stories *I khto vona bula?* (And Who Was She?, 1901) and the drama *Vona* (She, 1911). After moving to Soviet Ukraine in 1934, she and her husband, A. *Krushelnytsky, were arrested.

Slobodnik, Włodzimierz, b 19 September 1900 in Novoukrainka, Yelysavethrad county, Kherson gubernia. Polish poet and translator. Since 1927 he has produced numerous poetry collections and several books of satire and poetry for children. Some of his poems are on Ukrainian themes. In the years 1939–41 he lived in Lviv and Kiev and belonged to the Writers' Union of Ukraine. Since 1958 he has lived in Warsaw, where he has had links with the Ukrainian Social and Cultural Society and contributed to its organs *Nashe slovo* and *Ukrains'kyi kalendar*. He has translated into Polish poems by T. Shevchenko, I. Franko, Yu. Fedkovych, Ya. Shchoholev, P. Tychyna, M. Rylsky, M. Bazhan, M. Tereshchenko, L. Pervomaisky, I. Drach, and A. Malysko; edited Polish editions of Shevchenko's (1955) and Rylsky's (1965) selected poems; and written about Shevchenko. His poems have been translated into Ukrainian by M. Marfiievych, D. Pavlychko, and Pervomaisky.

Slobodyshche, Treaty of (aka Treaty of Chudniv). A pact signed in Slobodyshche, near Chudniv, in eastern Volhynia, on 27 October 1660 by Yu. Khmelnytsky and Poland. It followed Khmelnytsky's shift to the Poles and the defeat of Russian forces near Liubar. The treaty abolished the Pereiaslav Articles of 1659 and re-established formal ties between Ukraine and Poland. Although the Ukrainians insisted on the full reinstatement of the terms of the Treaty of *Hadiache of 1658, the Poles, represented by S. Potocki and J. Lubomirski, did not agree to a provision for a separate Ukrainian state structure. The treaty thus granted Ukraine a limited autonomy under hetman rule, with obligations to ally with Poland against Muscovy and to refrain from attacking Crimean Tatar territories. It was approved by a Cossack council in Korsun, but Left-Bank regiments headed by Ya. Somko and V. Zolotareno maintained their allegiance to Muscovy. That split marked the beginning of the division of Ukraine into the Left- and Right-Bank zones.

Slota, Petro [Sl'ota], b 16 October 1911 in Paniutyne, Pavlohrad county, Katerynoslav gubernia, d 25 June 1974 in Kiev. Painter. In 1940 he graduated from the Kiev State Art Institute, where he studied under F. Krychevsky. He painted rural and urban landscapes, such as *Kiev: Khreshchatyk* (1957), *Notre Dame in Paris* (1960), *First Spring* (1964–5), and *Azure Morning* (1969). An album of his works was published in 1972.

Slovakia (Slovensko). A republic in the southwestern Carpathian region, at around the midpoint of the Danube Valley, bordering on Poland to the north, Hungary to the south, the Czech Republic to the west, and Ukraine to the east. Slovakia covers an area of 49,000 sq km and has a population of 5,400,000 (1985), of whom nearly 86 percent are Slovaks, 12 percent are Hungarians, and just over 1 percent are Czechs. Official figures indicate that 42,000 Ukrainians live in the republic, although the actual number is probably somewhere between 130,000 and 145,000. The capital is Bratislava (1990 pop 440,421).

Ukrainians and Slovaks share a 200-km border in the *Prešov region, and both peoples have had similar social structures, daily life, language, and folk art. Both Slovaks and Ukrainians, especially those living in Transcarpathia and a small area of Galicia, also lived for a long period of time under Hungarian rule.

Important trade routes that tied Ukraine to eastern, central, and western Europe have passed through Slovakia since the Middle Ages. Itinerant Slovak merchants and tradesmen traveled to Kievan Rus'. A number of leading Transcarpathian clergymen, who later became bishops or professors at theological seminaries, studied in the 18th century at the theological seminary in Trnava. That city was also a publishing center for Transcarpathian Ukrainians and produced works such as *Katekhyzys* (Catechism, 1698), *Bukvar* (Primer, 1699), and *Kratkoe pryypadkov moral'nykh sobraniie* (A Short Collection of Moral Parables, 1727).

The first Slovak scholars to develop a serious interest in Ukraine were J. Kollár (1793–1852) and P. Šafařík (1795–1861). They maintained direct contact with Ukrainian activists and supported the development of the Ukrainian national revival. Šafařík was one of the first Europeans to come out in defense of Ukrainian national, linguistic, and cultural autonomy. In the 1840s L. Štúr began studying

SLOVAKIA

Ukrainian folk poetry. The most notable exponent of Ukrainian-Slovak relations in the 19th century was B. Násak-Nezabudov (1818–77), whose Slovak translation of the Duma about the Escape of the Three Brothers from Oziv (1848) was the first Ukrainian work to be published in Slovakia. J. Hurban, A. Radlinský, P. Kellner, and others also devoted much attention to Transcarpathian Ukrainians. At the Slavic Congress in Prague in 1848, Slovaks supported Galician and Transcarpathian Ukrainian motions. In 1850 the first Ukrainian (Ruthenian) literary association was formed, in Prešov; it included four Slovaks. A. *Dobriansky, the Transcarpathian Ukrainian who contributed most to Slovak culture, was one of the co-founders (in 1863) of the Matica Slovenská cultural-educational association. In the late 19th century P. Hrabovský published several of his translations of Slovak classics in the Galician press.

In the late 19th century Slovak interest in Ukraine waned as the Slovakian intelligentsia grew increasingly Russophilie in orientation. In the early 20th century F. Votruba, a Czech, translated selections of works by I. Franko (collected for a single volume in 1914), B. Hrinchenko, B. Lepky, Lesia Ukrainka, and V. Stefanyk into Slovak, and published a number of articles about the Ukrainian language and Ukrainian literature. T. Shevchenko's works became widely known in Slovakia in 1911–14 because of translations and articles by J. Slavík, S. Vajanský, and I. Lach. Meanwhile V. Hnatiuk, I. Franko, and S. Tomashivsky published articles on Slovak community affairs in the Galician press. Nevertheless, Ukrainian-Slovak relations deteriorated significantly in the Prešov region after the Slovak national movement began to display an expansionist attitude toward Ukrainians. Many Ukrainians still preferred to identify with the Slovaks rather than the non-Slavic Hungarians, and many Ukrainian settlements subsequently were Slovakized.

Pressure on Ukrainians in Slovakia to assimilate increased after 1919, when a section of Ukrainian Transcarpathia west of the Uzh River was included in the Slovak republic. The leaders of the Slovak People's party followed a policy of Slovakization toward Ukrainians and declined to enter into a working relationship with Ukrainian politicians from Transcarpathia (although they did

work with the Magyarone A. Brodii). In response, Ukrainians cultivated ties with Czech political parties that were either neutral toward or supportive of Ukrainian concerns.

Understandably, Ukrainian-Slovak cultural ties were minimal at the time. A club of friends of Transcarpathia in Bratislava published *Podkarpatská Revue*; a few books about Transcarpathia were published; and a few works by Transcarpathian authors were translated. The other Ukrainian territories and their cultural characteristics remained totally outside the sphere of Slovak interest. Ukraine was similarly uninterested in Slovakia.

In 1938–9 there were official contacts between the governments of Carpatho-Ukraine and Slovakia which led them to issue joint declarations against Hungarian and Czech aggression. The regime of the Slovak People's Republic (1939–44) did not tolerate any manifestations of local Ukrainian national activity, and in 1942 President J. Tiso even declared that the Ukrainian-Ruthenian question no longer existed. This action led some of the Ukrainian population to sympathize with the USSR and to support the partisan movement. During the German-Soviet conflict in Ukraine, there were two divisions of the Slovak army on Ukrainian territory, but they did not participate directly in battle. Many Slovaks, along with Transcarpathian Ukrainians, joined in the Czechoslovak army corps led by Gen L. Svoboda. In 1944 they fought alongside the Soviet army in Ukraine. In 1944 and early 1945 the Ukrainian Division Galizien was stationed in western Slovakia. In 1945–6 detachments of the Ukrainian Insurgent Army crossed into Slovak territory.

The lot of Ukrainians improved dramatically after 1945, in no small measure owing to their influence in the Czechoslovakian Communist party. The Ukrainian minority did not manage to secure any political autonomy in Slovakia, but it did make some cultural gains. Ukrainian culture was popularized in Slovakia, and Slovak in Ukraine. In 1948–89 more than 150 titles in Ukrainian literature were translated (by J. Andrejčuk, J. Kokavec, M. Krno, P. and M. Ličko, A. Pestremenko, I. Rusanka, R. Skukalko, and others) and published. A number of scholars specializing in Ukrainian (including F. Gondor, P. Hapak, D. Haraksim, J. Hrozičik, V. Khoma, V. Latta, M. Molnar, and M.

Nevrlý) were given positions at the Slovak Academy of Sciences and Bratislava University. They have published monographs on the works of I. Franko and T. Shevchenko, on Ukrainian history, and on numerous other subjects. Bratislava and Kiev were proclaimed twin cities, and exchanges of writers, artists, exhibitions, and theater productions between them take place frequently. A Ukrainian cultural society (named after T. Shevchenko) with its own dramatic collective operates freely in Bratislava. In 1988–9 a telebridge program was broadcast between Kiev and Bratislava.

Another center of Ukrainian studies in Slovakia is Prešov, where, at Šafařík University, there is a chair of Ukrainian language and literature and a research department of Ukrainian studies. Ukrainian plays and operas have also been staged in Slovakia, notably those of I. Kotliarevsky, S. Hulak-Artemovsky, I. Franko, L. Dmyterko, O. Korniiuchuk, Yu. Meitus, T. Shevchenko, V. Sobko, M. Starytsky, and M. Tshlynsky, many of which have also been broadcast on radio and television. Concert tours of the Verovka State Chorus, the State Dance Ensemble of Ukraine, the State Banduryst Kapelle of Ukraine of Kiev, the Transcarpathian Folk Chorus, the Kiev Ukrainian Drama Theater, the Duklia Ukrainian Folk Ensemble, and the Ukrainian National Theater in Prešov have served to popularize Ukrainian culture. Official ties were established between the Kiev Ukrainian Drama Theater and the Zabrosky Theater of Prešov, which has resulted in yearly exchanges of productions. A similar affiliation exists with the Ukrainian theater in Uzhorod. There have also been a number of exhibits of Ukrainian books and paintings in Slovakia. Official 'Days of Ukrainian Culture in Slovakia' and 'Days of Slovak Culture in Ukraine' have also been important, as have annual festivals of song and dance held by Ukrainians in Czechoslovakia. The Ukrainian branch of the Slovak Writers' Union and the Ukrainian department of the Slovak Educational Publishing House (which has issued more than 430 Ukrainian publications) also strengthen Ukrainian-Slovak literary ties.

The equating of Slovak and Czech culture has made the popularization of Slovak culture in Ukraine more difficult. Of 152 titles of Czech and Slovak authors published in Ukraine before 1968, only 8 were by Slovaks (the first translation appeared in 1951). In order to compensate for this inequality the department of Ukrainian literature of the Slovak publishing house in Prešov printed 15 translations of Slovak works in 1958–62, the Cultural Association of Ukrainian Workers published 6 Slovak plays in Ukrainian translation, and the literary journal **Duklia* published translations of contemporary Slovak literature. Few of these publications reached Ukraine, however, and eventually such editions were halted. In 1964 an anthology of Slovak poetry was published, which included the verse of 51 Slovak authors translated by I. Drach, H. Kucher, V. Luchuk, A. Malysko, M. Rylsky, D. Pavlychko, I. Svitlychny, V. Symonenko, B. Ten, V. Zhytnyk, and others.

Despite improvements in Ukrainian-Slovak cultural relations, Slovakia has maintained a systematic policy of Slovakization of its Ukrainian population in the Prešov region in political, cultural (by closing Ukrainian schools), and religious matters (a Slovak was appointed as administrator of the Prešov eparchy in 1968). National hostility to Ukrainians was most openly expressed in 1968–9, during the Dubček administration, when calls were made for the deportation of all Ukrainians from the Prešov region

to the Ukrainian SSR. The other Ukrainian settlements in Slovakia are found mainly around Košice, a large industrial center that draws many Ukrainians from the Prešov region. Every year there is a Ukrainian folk festival at **Svydnyk*. Ukrainians are organized in the **Cultural Association of Ukrainian Workers* (renamed in 1990 the *Union of Ukrainian-Ruthenians of Czechoslovakia*), which has its own choir (*Karpaty*) and a theater group (*Dumka*). Ukrainians also live in Bratislava.

The difficulties between Ukrainians and Slovaks have been carried over into émigré affairs, particularly in the United States. Attempts have been made to Slovakize Ukrainian emigrants from the Prešov region on the grounds that there are no longer any 'Ukrainians' there and that all Greek Catholics are Slovaks. As well, the Vatican has appointed Slovak administrators to a number of Transcarpathian Greek Catholic communities in Canada.

O. Zilynsky

Slovaks. A people belonging to the West Slavs. Linguistically Slovaks are closely related to the Czechs. Since the dispersal of the Slavic tribes in the 6th and 7th centuries from their original homeland between the upper Vistula and middle Dnieper regions, the Slovaks have inhabited the southern slopes of the Carpathian Mountains, especially its western ranges. In 1985 about 5,400,000 Slovaks lived in Slovakia (area, 49,000 sq km), where they made up nearly 86 percent of the population. Another 308,000 Slovaks lived in the Czech lands of Czechoslovakia, and an estimated 600,000 lived abroad, mostly in the United States. A small minority of 12,000 Slovaks lives in Ukraine in the lowlands of Transcarpathia oblast near the border with Slovakia.

Slovak-Ukrainian relations. Slovak relations with Ukraine, which date from medieval times, have been limited. Slovaks have maintained strong ties, however, with Ukrainians (Ruthenians) living south of the Carpathians, especially those living in the **Prešov* region (since 1918, within the boundaries of **Slovakia*).

In medieval times trade routes from Halych and later Lviv to Hungary passed through Slovak towns, such as Bardejov, Prešov, and Košice. But not until the Slavic national revivals of the 19th century was a mutual awareness of the distinctness of the Slovak and Ukrainian peoples developed. The influential Slovak Pan-Slavist P. Šafařík was one of the first in Europe to argue that Ukrainians were a people distinct from both the Russians and the Poles. Relations throughout the rest of the 19th century took the form primarily of translation of Ukrainian writers for publication in Slovak periodicals. The most ac-

tive translator was B. Násak-Nezabudov (1818–77). Both I. *Franko and P. *Hrabovsky translated the Slovak poet S. Chalupka.

After 1918 Slovak-Ukrainian relations were basically limited to ties with Ukrainians living in the Prešov region and *Transcarpathia. Beginning in 1948, however, when Communist Czechoslovakia became part of the Soviet bloc, Slovak-Ukrainian relations expanded. Communist Ukrainian and Slovak governments encouraged the publication of translations of the other people's classic and contemporary writers, the exchange of folk ensembles, the twinning of cities (Bratislava and Kiev), and the holding of annual festivities, such as the 'Days of Ukrainian Culture in Slovakia' and 'Days of Slovak Culture in Ukraine.' There were also unofficial links between dissidents in Ukraine and the Ukrainian minority in Slovakia. Of particular importance in that regard was the publication program of the Ukrainian Branch of the Slovak Pedagogical Publishing House, based in Prešov. The opportunity enjoyed by banned Soviet Ukrainian authors of being published in Prešov, as well as the existence of a liberal Ukrainian-language media (radio and newspapers) in Czechoslovakia during the 1960s, contributed to the Soviet decision to intervene militarily in Czechoslovakia in 1968.

Slovak-Ukrainian relations in the Prešov region. Because of geographic proximity Slovak-Ukrainian relations have historically been most intense south of the Carpathians, in particular in the Prešov region. In that region Slovak-Ukrainian linguistic contacts are closest, since East Slovak dialects (Šariš, Zemplín) form part of a linguistic transition zone with Transcarpathian Ukrainian dialects and Ukrainian dialects of the Prešov region.

For centuries Slovaks and Ukrainians south of the Carpathians shared the same political, social, and cultural fate within the Hungarian kingdom. In an attempt to improve their status, Slovaks and Ukrainians of the Prešov region worked together closely during each group's 19th-century national revival. A. *Dobriansky was elected to the Hungarian parliament from a Slovak-inhabited district and was a founding member of Slovakia's first cultural organization, the Matica Slovenska (1863). Analogously, four Slovaks were among the founding members of the first Ruthenian (Ukrainian) cultural organization, the Prešov Literary Society, founded by the national leader O. *Dukhnovych in 1850.

Relations between the two national groups have not been completely harmonious in the 20th century. Throughout the whole interwar period Ukrainians living in the historical counties of Spiš (Szepes), Šariš (Sáros), and Zemplín (Zemplén) – the so-called Prešov region – remained under a Slovak administration. All efforts to unite the Prešov region with Transcarpathian Ukraine during the short-lived era of post-Munich federal Czechoslovakia were blocked by the Slovak autonomist government; then, under the Slovak state during the Second World War, Ukrainians experienced various degrees of discrimination.

Since the establishment of Communist rule in Czechoslovakia in 1948, Slovak-Ukrainian relations in the Prešov region have varied. The Czechoslovak and later Slovak Communist authorities have provided educational and cultural facilities for the national minorities living within their borders.

Some antagonism between the two groups has been evident also within the Greek Catholic church (forcibly liquidated in 1950, restored in 1968). Traditionally headed by bishops of Ukrainian ethnic background, since 1969 the church has been headed by a Slovak administrator (J. Hirka), who in 1991 was consecrated bishop. He has allowed services in the vast majority of churches to switch from Church Slavonic to Slovak as the liturgical language. The efforts to Slovakize the Greek Catholic church and to claim that all 'Rusnaks' living in Slovakia are by ethnicity Slovak are strongly supported by Slovak Catholic circles in the West, particularly Canada, where a distinct Slovak Byzantine (Greek Catholic) church was established in 1981.

Since the Velvet Revolution of 1989, which brought profound political, social, and economic changes to Czechoslovakia, Slovak-Ukrainian relations in the Prešov region have at times been difficult. The local Ukrainian intelligentsia is, in particular, critical of several decisions by the Slovak republic government to support that portion of the Ukrainian population which promotes the idea that Ruthenians (Rusyns) form a separate nationality. Whereas Slovakia has welcomed Ukraine's regained independence, relations between the two states have at times been strained because of differing interpretations regarding the divisions (Ruthenian vs Ukrainian) among the Ukrainians in the Prešov region.

Slovak-Ukrainian linguistic relations. Historically, the linguistic contacts between Ukrainians and Slovaks took place in the western Transcarpathian Prešov region. There they have affected the (southern) Lemko and contiguous Ukrainian Carpathian and eastern Slovak dialects and the local variants of the literary languages. Contemporary eastern Slovak dialects reveal several ancient Lechitic traits, and the eastern Zemplín dialects are under the influence of Ukrainian. Their expansion into the Lemko and Middle-Carpathian regions resulted in the development of the so-called Sotak dialect in the Snina (Snyina) vicinity of the Prešov region and of the mixed Ukrainian-Slovak dialects west of Uzhhorod. Among the oldest traits common to western Ukrainian, southern Polish, and Slovak are the endings *-ox* in the locative plural of masculine and neuter nouns (eg, Ukrainian Dniester dialect *u pal'-c'ox* 'in the fingers', Ukrainian western Transcarpathian dialect *u l'isox* 'in forests', 16th-century Polish *w ogrodoch* 'in the gardens', Slovak *o chlapoch* 'about men') and *-me* in first-person plural verbs (eg, Ukrainian *dame*, Slovak *dáme* 'we will give'). Remnants of early Ukrainian-Slovak contacts are the Slovak forms *čerieslo* (cf Ukrainian *čereslo*) 'plowshare' and the reflex *o < ь* in the eastern Slovak, and perhaps middle Slovak, dialects (eg, *moch*, *voš*, *piesok* [cf Ukrainian *mox*, *voša*, *pisok*] 'moss, louse, sand'). Greek Catholic eastern Slovaks were also influenced by the Ukrainian variant of Church Slavonic. As a result of 19th- and 20th-century Slovakization pressures, many syntactic and phraseological Slovakisms and Slovak calques en-

tered the local literary language of the Ukrainians of the Prešov region.

The influence of Slovak (as that of Polish) on the Ukrainian language was strongest and most enduring in the Lemko dialects. In those dialects (1) the labialization *CeC* > *CoC* > *ColC* in the word *pelevnyk* 'grain husk' is absent; (2) sonorous *r*, *l* in weak positions of the groups *Cr(l)δ(ε)C* retained longer their sonant character after the disappearance of the weak *jer*, and therefore the vowel *ы* appeared before them instead of, as in other Ukrainian dialects, after them (eg, *кыгавыи* [SU *kryvavij*] 'bloody', *хурмыи* [SU *hrymity*] 'to thunder', *сыўза* [SU *sl'ozal*] 'tear', *быўха* [SU *bloxa*] 'flea'); (3) the palatalization of *s*, *z* has a dorsal character, *n* before *g*, *k* becomes *ŋ*, and *l'* after labials in fourth-class verbs is replaced by *j* (eg, *робжу* [SU *roblju*] 'I make'); (4) contracted verbal endings of the type *trymam*, *-aš*, *-at*, *-ame*, *-ate* (SU *trymaju*, *-aješ*, *-aje*, *-ajemo*, *-ajete*) 'I/you (sing)/he/we/you(pl) hold', sporadic forms with *ča* < *če* (eg, *časaty*, *čalo*, *čapiha* [SU *časaty*, *čolo*, *čepiha*] 'to comb, forehead, plow handle'), and syntactic and aspectual peculiarities (eg, the atemporal use of the present tense of perfective verbs [eg, *kvočka vyl'ahne kur'jata* 'the hen broods chicks']) appeared; and (5) numerous Slovakisms entered the southern Lemko (and, to a lesser extent, the northern Lemko, Boiko, and western and middle Transcarpathian) lexicon; eg, words such as *bratranec* 'cousin', *pec* 'stove', *bradlo* 'haystack', *draha* 'road', *blanar* 'glass-maker', *l'adnyk* 'vetch', *bodak* 'bayonet', *rixtyk* 'fast train', semantic creations and calques such as *pas'ika* 'clearing', *poros'ačka* 'sow', and lexical parallels such as *rebryna* 'ladder', *lyška* 'vixen'. Hungarian, German, and other European loanwords entered the dialects partly also via Slovak.

Slovak-Ukrainian linguistic relations have been studied by scholars such as O. Broch, V. Hnatiuk, S. Tomashivsky, S. Czambel, A. Petrov, F. Pastrnek, Z. Stieber, O. Halaga, V. Latta, M. Onyshkevych, and Y. Dzendzelivsky.

Slovanský přehled (Slavonic Survey). The leading Czech journal of Slavic studies, literature, culture, and affairs, published in Prague since 1898, except during the Second World War. After the war it was the bimonthly organ of the Institute of the History of European Socialist Countries of the Czechoslovak Academy of Sciences. Founded and edited until 1931 by A. Černý, *Slovanský přehled* from the beginning was sympathetic toward Ukrainian concerns and issues. It has published translations of Ukrainian writers (I. Franko, T. Shevchenko, Lesia Ukrainka, B. Hrinchenko, B. Lepky, O. Vyshnia, I. Mykytenko, O. Korniiichuk, L. Pervomaisky, and others) as well as articles by Ukrainian scholars and publicists, such as V. Hnatiuk, S. Yefremov, O. Hrushevsky, B. Lepky, D. Doroshenko, O. Mytsiuk, Ye. Vyrovny, H. Bohkovsky, I. Bryk, A. Zhyvotko, O. Zilynsky, and M. Molnar. The journal initially contained much information about Ukrainian-Czech relations and Ukrainian life in general,

but since the Second World War it has published works by Ukrainians mainly from Soviet Ukraine or the Soviet-bloc countries and has not devoted attention to Ukrainian émigré affairs.

Slovechna River [Slovečna] (also Slavechna). A right-bank tributary of the Prypiat River that flows for 158 km through Polisia, Zhytomyr, and Homel (Belarus) oblasts and drains a basin area of 2,670 sq km. The river is 4–10 m wide, and its valley is approx 2.5 km wide. Its source is in the Ovruch Ridge. The river is used for water-supply purposes, irrigation, and, in its lower reaches, log rafting.

Slovechne-Ovruch Ridge. See Ovruch Ridge.

The 17th-century limestone church in Slovianohirske

Slovianohirske [Slovjanohirs'ke]. IV-18, DB 1-3. A city (1989 pop 5,600) on the Donets River in Donetsk oblast, administered by the Slovianske city council. Its origins can be traced to the village of Banne (or Banivske), which was established by Prince G. Potemkin near his palace and baths at the end of the 18th century. Under the Soviet regime it was converted into a health resort. In 1964 the town was granted city status and renamed Slovianohirske. It has three sanatoriums, a recreational base, and a campsite. A 17th-century limestone church and the *Sviati Hory Dormition Monastery stand within the city limits.

Sloviano-Serbia. An administrative-territorial region of the mid-18th century in Ukraine. The region was created by the Russian government in 1753 to protect the southern borders of the empire against Turko-Tatar attacks and to colonize sparsely inhabited territory; it was situated south of the Donets River in the area between the Bakhmut and

the Luhanka rivers. It bordered on the Don Cossack lands to the east and partially to the south, on the Zaporizhia to the west, on Slobidska Ukraine to the north, and on the Crimean Khanate to the south. Bakhmut (now Artemivske) became its administrative center. As in the case of *New Serbia, Serbian military units were moved in from Hungary (as well as Bulgarians, Greeks, Wallachians, and other Orthodox peoples from the Ottoman Empire). Some of the military formations, however, consisted of Ukrainian peasants and Cossacks, and the majority of new settlers were Ukrainians. The Serbs, who were granted a certain degree of autonomy, were organized into two regiments (1,300 soldiers), under R. Preradovich and I. Shevich, and placed along the *Ukrainian Line; their presence gave the region a semimilitary character. According to the census of 1760 there were 112 settlements, with a total population of 26,000, in the new territory. Frequent conflicts arose between the foreign military units and the local Ukrainian population as well as with the Ukrainians of neighboring Zaporizhia. In 1764 the territory was liquidated and included in the Catherinian province of New Russia gubernia. The foreign population eventually assimilated with local Ukrainians.

Slovianoserbske [Slov'janoserbs'ke]. V-19, DB II-5. A town smt (1986 pop 8,000) on the Donets River and a raion center in Luhanske oblast. To protect its southern frontier from the Tatars, the Russian government attracted colonists from Serbia, Croatia, Bulgaria, and Poland and in 1753 set up the military settlement of Pidhirne. In 1784 it was granted town status and renamed Donetske. Because of frequent flooding the town was moved in 1817 and renamed Slovianoserbske. Until 1882 it served as a county center of Katerynoslav gubernia. Many of its residents made their living as chumaks, carrying grain to Azov ports and bringing back salt and fish. In 1964 the settlement attained smt status, and in 1966 it became a raion center. It has a dairy, a bakery, and a fruit-canning factory.

Sloviansk [Slov'jans'k] (Russian: Slaviansk-na-Kubani). VIII-19. A city (1990 pop 58,000) on the Protoka River and a raion center in Krasnodar krai, RF. Until 1958 it was named Stanitsa Slavianskaia. The city is a highway junction and a river port. It has a large food industry. According to the census of 1926, Ukrainians accounted for 69.1 percent of the Sloviansk raion population.

Slovianske [Slov'jans'ke]. V-18, DB I-3. A city (1989 pop 143,000) on the Kazennyi Torets River and a raion center in Donetske oblast. It originated as the fortified settlement Tor (est 1645), which developed into a salt manufacturing and trading center. In 1685-1764 it was a company center of Izium regiment. Then it became a county center in Katerynoslav vicegerency. In 1784 Tor was reclassified as a town and renamed Slovenske. A decade later it was renamed Slovianske and became a part of Slobidska Ukraine (from 1835, Kharkiv) gubernia. With the construction of a railway line (1869) nearby, the town grew

rapidly. Its greatest industrial expansion occurred during the industrialization drive of the 1930s. Today the city is an important industrial and health resort center. It has machine-building plants, an electric power station, a soda and a chemicals manufacturing consortium, a salt and a ceramics manufacturing complex, and oil- and meat-processing complexes.

Slovianske Heavy-Machine-Building Plant (Slovianskyi zavod vazhkoho mashynobuduvannia). A factory of the heavy-machine-building industry, located in Slovianske, Donetske oblast. A soda factory was built on the site of the present factory in 1912 by the South Russian Joint-Stock Company. In 1923 the factory began to assemble and repair agricultural machinery. In 1927 it began to repair mining equipment. Since the 1930s it has built primarily spare parts and equipment for the coke and chemical industries. Its machinery was evacuated at the outset of the Second World War, and the facilities were rebuilt after the war. In the early 1970s over 1,300 workers were employed at the plant.

Slovianske Pedagogical Institute (Slovianskyi derzhavnyi pedahohichnyi instytut). An institution of higher learning, under the jurisdiction of the Ministry of Education, located in the city of Slovianske, Donetske oblast. It was founded in 1954 on the basis of the Teacher's Institute (1939). In 1982 the institute had five faculties: physics-mathematics, industrial and technical teacher training, elementary-school teacher training, pedagogy with specialization in preschool pedagogy and psychology, and handicapped child education. There was a correspondence and a preparatory section. The institute is fully equipped with study facilities, laboratories, and workshops. The library has 306,500 volumes in its collection. The student enrollment in 1986-7 was 5,100.

Slovo (Word). A privately owned publishing house in Kiev that operated from 1922 to 1926. Its shareholders were primarily writers, activists in the Ukrainian co-operative movement, and workers in Kiev's publishing industry. The directors were H. Holoskevych, P. Fylypovych, and S. Tytarenko. Slovo published several poetry collections by the *Neoclassicists M. Zerov, P. Fylypovych, M. Drai-Khmara, and M. Rylsky; H. Kosynka's first story collection (1922); T. Osmachka's first poetry collection (1922); two books of Zerov's essays on Ukrainian literature (1924, 1926); the poetry anthology *Siaivo* (The Aura, 1922), edited by Zerov; and a collection dedicated to the memory of P. Stebnytsky.

Slovo (Word). A newspaper of politics, literature, and current affairs, published in Lviv semiweekly in 1861-72 and then three times a week until 1887. The editor was B. Didytsky (1861-71) and then V. Ploshchansky. Initially *Slovo* published articles and literary works in the Galician vernacular and was funded by M. *Kachkovsky and Metropolitan H. Yakhymovych. From the mid-1860s, however, it was the main organ of the Russophile movement in Galicia, and published only in the artificial *yazychiie. From 1867 to 1870 it issued a biweekly journal, *Halychanyyn. From 1876 it was subsidized by the tsarist government, which it openly supported. *Slovo* published political commentaries and literary and historical works. It re-

mains a valuable source for the study of 19th-century Galicia, especially the Russophile movement. Frequent censorship and confiscations by the Austrian authorities and a steady loss of subscribers forced the paper's eventual closure.

The editorial board of *Slovo* (Kiev, 1907-9): from left: Valentyn Sadovsky, Symon Petliura, Yakym Mikhura, Mykola Porsh

Slovo (Word). A weekly newspaper of the *Ukrainian Social Democratic Workers' party, legally published in Kiev from May 1907 to July 1909 (a total of 105 issues) by O. Koroлева (1907-8) and S. Petliura (1909). The editors were M. Porsh, V. Sadovsky, Ya. Mikhura, and Petliura. The newspaper concentrated on raising the political and social consciousness of its working-class readers, but over time it began devoting more attention to the struggle for Ukrainian political and cultural rights. In addition to the editors, who wrote mostly on political (Porsh), cultural (Petliura), and economic (Sadovsky, Mikhura) topics, regular contributors included A. Zhuk, D. Dontsov, H. Kovalenko, V. and D. Doroshenko, Isaak Mazepa, L. Yurkevych, V. Chekhivsky, and V. Stepankivsky. The newspaper also published prose and poetry by S. Cherkasenko, H. Chuprynka, Dniprova Chaika, and other writers.

Slovo (Word). The organ of the *Ukrainian Social Democratic Workers' party. Its aim was to promote national consciousness among Ukraine's working class. Only one issue was published, in Kharkiv in November 1915, before the publication was closed down by the tsarist authorities. It was printed by the Dzvin publishing house (directed by Yu. Tyshchenko) and edited by V. Vynnychenko. Contributors included V. Sadovsky and S. Petliura.

Slovo (Word). A daily newspaper published in Kamianets-Podilskyi in 1920. It was edited by Kotliarenko with the assistance of N. Hryhoriiv and P. Bohatsky.

Slovo (Word). A semiannual journal of Slavic studies published by the Greek Catholic Theological Academy in Lviv in 1936-8 (a total of six issues). The journal published

several articles on Ukrainian philology. The editor was K. Chekhovych.

Slovo (Word). A weekly newspaper published in Regensburg from November 1945 to December 1946. It was one of the first papers established by Ukrainian refugees in Germany after the Second World War. The editor was S. Dovhal.

Slovo (Word). A Ukrainian-Canadian evangelical publication. It appeared in 1950 as a bimonthly tabloid in Toronto and then moved in 1951 to Saskatoon, where it became a quarterly journal. Publication soon became less regular, and ceased altogether in 1955. *Slovo* was the publication of the Independent Ukrainian Evangelical church, a faction of the Ukrainian Evangelical Alliance of North America that hoped to restore a church structure comparable to that of the *Independent Greek church in Canada in 1903-12. The main figures involved with the publication included L. Standret, P. Bodnar, M. Korak, and I. Kudryn; P. Krat and I. Bodrug served as its spiritual mentors.

Slovo, the organ of the Slovo Association of Ukrainian Writers in Exile

Slovo (The Word). A nonperiodic almanac published by the *Slovo Association of Ukrainian Writers in Exile. The almanac includes poetry, fiction, criticism, memoirs, and documents. The first almanac appeared in 1962 with H. *Kostiuk as editor in chief. The editorial note promised a continuation of the publishing tradition of *MUR and guaranteed publication access to various literary groups, movements, and generations. The editorial promise has held for the 12 issues that have appeared so far, and the almanac has reflected the various literary endeavors of Ukrainian émigré writers. Kostiuk remained editor in chief for vols 2 (1964) and 3 (1968). Vols 4 (1970) and 5 (1973) were under the editorship of S. *Hordynsky, and vol 6 (without a date), of U. *Samchuk. Vols 7-12 (1978, 1980, 1981, 1983, 1987, and 1990) did not indicate who among the editorial committee was the responsible editor. The editorial committee of the almanac consisted of the following: Yu. Boiko-Blokhyn (vols 10-12), O. Chernenko (vol 10), Hordynsky (vols 1-12), S. Hrybinska (Kuzmenko) (vols 9-12), Yu. Klynovy (Stefanyk) (vols 4-11), O. Kopach (vols 8-12), I. Korovytsky (vols 1, 3), Kostiuk (vols 1-3, 6-

12), B. Kravtsiv (vols 1–2), V. Lesych (vol 1), D. Nytchenko (vols 10–12), P. Odarchenko (vols 3, 12), B. Oleksandriv (vols 6–8), B. Rubchak (vols 2–3, 12), Samchuk (vols 6–11), Yu. Shevelov (vols 6–12), M. Shlemkevych (vols 1–2), O. Tarnavsky (vols 2–12), H. Zhurba (vol 1), O. Zinkevych (vol 12), and O. Zuievsky (vols 5–12).

Slovo Association of Ukrainian Writers in Exile

(Obiednannia ukrainskykh pysmennykiv v emigratsii Slovo). An association initiated in New York on 26 June 1954 to continue and develop the ideology and activities of its European predecessor, *MUR, and to embrace within its membership all Ukrainian writers outside of Ukraine, the Soviet Union, and its former satellite countries. There were 13 initiating members: O. Burevii, D. Humenna, I. Kernytsky, H. *Kostiuk, B. Kravtsiv, Yu. Lavrinenko, V. Lesych, L. Lyman, Ye. Malaniuk, O. *Tarnavsky, Yu. Sherekh [Shevelov], M. Shlemkevych, and H. Zhurba. Officially the association came into existence on 19 January 1957, when the bylaws of the association were signed by 22 writers in attendance and accepted by proxy by an additional 34 writers. Slovo holds periodic conventions (seven to date: 1958, 1964, 1968, 1970, 1975, 1982, and 1990) attended by delegates from the various national affiliates (the United States, Canada, England, Argentina, Brazil, Australia, Germany, and France). The presidents of the association have been Kostiuk (1954–75), Tarnavsky (1975–92), and D.H. Struk (since 1992). Since 1962 Slovo has published an irregular literary almanac, *Slovo, which includes contributions by its members. The association also fulfills the function of a publisher by allowing its authors to publish their works under the auspices and name of Slovo. There are two ongoing committees in the association, a biobibliographic one and an archival one, the latter of which also is charged with the preservation and publication of works and papers of deceased authors. In 1964 the association established a financial assistance fund for its members. At the time of the seventh convention in 1990 there were 128 members, of which 63 were in the United States, 46 in Canada, 7 in Germany, 5 in Australia, 3 each in England and France, and 1 in Brazil.

D.H. Struk

Slovo Bozhe (Word of God). A popular monthly religious supplement to the Russophile newspaper **Nauka*, published in Lviv from January 1879 to December 1881. It was edited by Rev O. Shcherban.

Slovo Dobroho Pastyria (Word of the Good Shepherd). A Basilian publishing house in New York City. From 1950 to 1962 it issued popular-educational bimonthly booklets on religious and social subjects, including the history of the Ukrainian Catholic church and the Basilian order. The editors-in-chief were Revs V. Gavlich (1950–1), S. Sabol (1951–3), M. Vavryk (1953–4), V. Vavryk (1954–61), and M. Solovii. Among the authors were M. Wojnar, A. Velyky, A. Pekar, H. Luzhnytsky, I. Nazarko, and the editors.

Slovo i chas

Slovo i chas (Word and Time). A scholarly journal of literary theory, history, and criticism; an organ of the Institute of Literature of the AN URSR (now ANU) and of the Writers' Union of Ukraine. The journal was established in Kiev in 1957 as *Radians'ke literaturoznavstvo*, and was published first as a bimonthly and from January 1965 as a monthly periodical. It was renamed *Slovo i chas* in 1990. The first editor in chief was O. *Biletsky (1957–61), who was succeeded by I. Dzeverin. As a result of the change in editors the quality of the journal noticeably deteriorated. Its large section on literary theory became limited to fatuous theorizing on the issues of *socialist realism. In addition to traces of a propagandistic Party-minded tone in the articles on literary history and literary criticism, there is a marked absence of papers on current trends in world literature and on the relationship of Ukrainian literature with foreign literature. The journal further deteriorated with the intensified persecution of the early 1960s, which resulted in a narrowing of the issues permitted for discussion and in many authors' being prohibited from publishing their work in the journal (eg, I. Dziuba, I. Svitlychny, Ye. Sverstiuk, V. Ivanysenko). The quality of *Slovo i chas*, in fact, is indicative of the general deterioration in Ukrainian literary scholarship caused by the gradual loss of scholars of the old school (eg, S. Maslov, Biletsky, P. Popov, Ye. Nenadkevych), who were gradually replaced by scholars educated in the Soviet system. Among the latter group there were few who could be considered authorities in Old Ukrainian literature, and for that reason the scope of the journal was reduced to studies of 19th- and 20th-century literature; typical contributors were those who specialized in the relationship between Ukrainian and Russian literature (N. Krutikova) or in the theory of socialist realism (M. Shamota). The democratization and policy of glasnost announced in 1985, which improved the quality of many other literary journals, have also had some effect on *Slovo i chas*.

I. Koshelivets

Slovo istyny (The Word of Truth). An Orthodox monthly journal published from November 1947 to October 1951 in Winnipeg. Edited by Bishop I. Ohienko, it contained articles on the history of Ukrainian Orthodoxy, theological, cultural, and historical topics, and the Ukrainian language. It was succeeded by *Nasha kul'tura*.

Slovo na storozhi (The Word on Guard). An annual publication of the Ukrainian Language Association, published from 1964 to 1988, first in Winnipeg and then in

Montreal (a total of 25 issues). It contained original and reprinted articles on the Ukrainian language and the teaching of it, on the use of Ukrainian in Canada, and on language policies and Russification in the Ukrainian SSR. Its editor was J. *Rudnykyj.

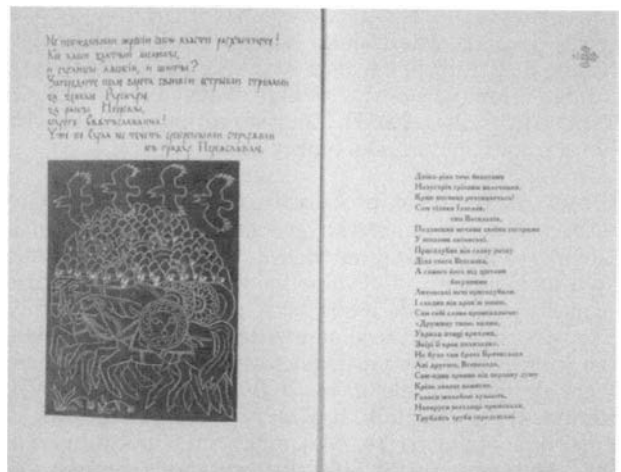

Slovo naroda (The Word of the People). The first and, until 1946, only Ukrainian-language newspaper in the Prešov region, published from December 1931 to August 1932 (a total of 15 issues). Edited by I. Nevytska, it was the unofficial organ of the local Prosvita society. Its contributors were local populists and émigrés from Soviet Ukraine. The paper spoke out against both the Russophile and regional 'Ruthenian' political orientations in Transcarpathia; demanded the introduction of teaching in Ukrainian in elementary schools; and promoted Ukrainian culture, a pan-Ukrainian national identity, and the use of Standard Ukrainian.

'Slovo o kniaz' iakh' (Sermon on Princes). A 12th-century monument of homiletic literature. It was delivered as a eulogy in the Chernihiv cathedral ca 1175 by an unidentified cleric during the feast day of the transfer of the relics of ss Borys and Hlib. In it the author spoke of the warring princes Sviatoslav III Vsevolodovych of Chernihiv and Oleh Sviatoslavych of Novhorod-Siverskyi. He invoked the lives of Borys and Hlib and the peace-loving Davyd Sviatoslavych of Chernihiv to exhort the princes to pursue peaceful coexistence, to respect the princely hierarchy, and to present a united front against the Cumans for the welfare of Rus'. A structurally and stylistically simple but moving sermon, it is thematically reminiscent of the epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign).

Slovo o polku Ihorevi (full title: *Slovo o polku Ihorevi, Ihoria syna Sviatoslavlia, vnuka Ol'hova* [The Tale of Ihor's Campaign, Ihor the Son of Sviatoslav, Grandson of Oleh]). An epic poem of the late 12th century written by an anonymous author.

History of the work. The original was discovered in 1795 by Graf A. Musin-Pushkin, *ober-prokuror* of the *Holy Synod (1791–6), in the archives of Yoil, the archimandrite of the Transfiguration Monastery in Yaroslavl, Russia, and was published in St Petersburg in 1800 with the assistance of the paleographers M. Malynovsky and M. *Bantysh-Kamensky. The original manuscript and many printed copies perished in the Moscow fire of 1812. The want of an original allowed a number of skeptical critics in the early 19th century (I. Belikov, I. Davydov, M. Kachenovsky, O. Senkovsky, and others) to consider the work a falsification of a later date. Subsequent skeptics included the French Slavists L. Léger and A. *Mazon (who believed that either Yoil or Bantysh-Kamensky wrote the work) and the Russian A. Zimin. The majority of scholars, however, believe it to be authentic. In 1818 K. Kalaidovich noticed an epigraph taken from the *Slovo* in the Pskov *Apostol* of 1307. In 1829 R. Tymkovsky published a 15th-century manuscript, *Zadonshchina* (Past the Don [River]), that was modeled on the *Slovo* (plagiarized, according to M. Speransky).

A wide range of scholars, particularly M. *Maksymovych, demonstrated connections between the *Slovo* and Ukrainian folk poetry. In the 19th century the poem served as the subject of studies by the Russians E. Barsov, V. *Miller, M. Tikhonov, A. *Veselovsky, and P. Viazem-

Pages from the 1974 Kiev edition of *Slovo o polku Ihorevi* (translation by Maksym Rylsky, linocuts by Ivan Selivanov)

sky. Ukrainian academics, apart from Maksymovych, who published works on the *Slovo* included O. *Ohonovsky, O. *Potebnia, and P. *Zhytetsky. In the 20th century more than 700 major studies of the *Slovo* have been published in a variety of languages, including works by D. *Chyzhevsky, M. *Hrunsky, V. *Peretts, and O. *Pritsak. In the late 1930s work on the subject was halted in the Ukrainian SSR and was limited to Russian-language studies commissioned by the Academy of Sciences of the USSR. Owing to political circumstances Russian scholars were the leaders in the field; nonetheless, Ukrainians, Belarusians, and Russians all considered the *Slovo* as belonging to their own literature, because it is a literary monument of Kievan Rus', to which all three East Slavic nations lay claim. But no serious scholar has disputed that it was written in Ukraine, and that much of its semantic and poetic usage is characteristically Ukrainian. In the 1920s M. *Skrypnyk sought to have the *Slovo* recognized as an exclusively Ukrainian work.

Historical basis and content. The subject of the poem is the unsuccessful campaign mounted in the spring of 1185 by Ihor Sviatoslavych, prince of Novhorod-Siverskyi, against the Cumans. Its central theme is the fate of the territories of Rus'. In addressing that theme the author condemns the various princes for their feuding and their selfishness at the expense of the general good.

The poem was written in an epic lyrical style. The historical subject matter is interspersed with dreams, laments, nature's reaction to the hero's fate, monologues of princes, and other motifs and devices.

The poem begins with an invocation of Boian, who sang the praises of princes of the 11th century. The author of the *Slovo* promises to emulate Boian's style and to join the glories of the past with those of the present. After a description of preparations for the campaign, of the three-day battle, and of Ihor's defeat the author proceeds to analyze the reasons for the decline of the Rus' land. After a description of Ihor's escape from captivity the work concludes with praise of the 'ancient princes' Ihor and Vsevolod and of the 'younger ones,' represented by Volodymyr Ihorevych.

Language and poetics. The language of the work is the contemporary Rus' literary language, similar to that of the

chronicles, but with a marked increase in the incidence of the vernacular. Most scholars believe that the author was from either Kiev or Chernihiv, but others (A. Orlov, A. Yugov) contend that he was from Galicia. Some have surmised that the copy discovered by Musin-Pushkin had already been modified by succeeding generations of copyists and changed to adhere more closely to the Bulgarian orthography that was in use in the 16th century, or that even Musin-Pushkin's copy may not have been a copy of the original but a copy of other copies. Such multicopying could explain a number of obscure passages in the epic.

The vocabulary is relatively limited; it consists of slightly more than 900 words, combining literary Church-Slavonic with contemporary Rus' terms and archaisms preserved in various old dialects. There are also some influences from other languages.

The poem is particularly rich in epithets, similes, metaphors, the use of metonymy, and hyperbole. The author frequently personifies nature and represents it as a conscious being that either aids or harms humans. The rhythmic structure of the *Slovo* is a matter of considerable debate. All efforts to define its rhythmic structure, including those of R. Abicht in 1901 (syllabic verse), F. Korsh in 1909 (4/4 rhythm), V. *Birchak in 1910 (Byzantine church canonic rhythm), E. Sievers in 1926 (theory of random stress), and Metropolitan I. *Ohienko in 1946 (rhythmic elements from ancient Hebraic verse), have been unsuccessful. Maksymovych sought to prove that the rhythm of the *Slovo* was a point of departure for the subsequent evolution of the *duma. Zhytetsky underscored the recitative character of the *Slovo* and claimed that each verse-sentence, regardless of the number of syllables, formed a poetic whole with a distinctive pattern of stresses. F. *Kolesa demonstrated a connection between the poem and the laments that developed into dumas. The *Slovo's* poetic form lends itself to a wide scope of expression and can incorporate many different rhythms depending on the theme and mood.

Translations. Translations and adaptations of the *Slovo* have appeared in many languages, but most are in Ukrainian and Russian. Ukrainian verse and prose adaptations have been done by I. Vahylevych (completed in 1836, published 1884), B. Didytsky (in the *yazychiie*, 1849), Maksymovych (1857), S. Rudansky (completed 1860, published 1896), Yu. Fedkovych (1866, 1902), I. *Franko (1873, 1952), Ohonovsky (1876), P. Myrny (1883, 1896), O. Partytsky (1884), M. Cherniavsky (1894), I. Steshenko (1899, 1967), K. Zinkivsky (1907, 1967), V. Shchurat (1907, 1912), M. Hrushevsky (1923), P. Kostruba (1928), M. Hrunsky (1931), M. Matviiv-Melnyk (1936), S. Hordynsky (1936, 1950, 1989), N. Zabala (1938), V. Svidzinsky (1938), M. Rylsky (1939), Ohienko (1949), M. Arkas (1951), L. Makhnovets (1953), O. Kovalenko (1954), and M. Kravchuk (1968).

Ukrainian adaptations of fragments of the poem have also been published, including those of the 'Lament of Yaroslavna,' by M. Shashkevych (1833), T. Shevchenko (1860), V. Mova (Lymansky, 1893), B. Lepky (1915), and others. Ya. Kupala translated it into Belarusian (prose, 1919; verse, 1921).

The first verse translation of the *Slovo* into Russian was I. Seriakov's (1803); it was followed by those of V. Kapnist (1809), V. Zhukovsky (1817–19), M. Delarue (1839), L. Mei

(1850), N. Gerbel (1854), A. Maikov (1869), Barsov (1887), K. Balmont (1929), S. Shervinsky (1934), G. Shtorm (1934), I. Novikov (1938), V. Stelletsy (1938), M. Zabolotsky (1946), A. Yugov (1950), S. Botvinnik (1957), and M. Rilencov (1962).

The first edition of 'Slovo' evoked great interest in Germany's literary world. In 1803 J. Richter published one of the first translations of the poem, followed by J. Miller (1811), A. Bolz (1854), F. Bodenstedt (1861), R. Abicht, R.M. Rilke (1904, printed 1930), A. Luther (1923), E. Sievers (1926), K.H. Meyer (1933), H. Raal (1963), H. Baumann (1968), S. Hordynsky and L. Kaczrowskyj-Kriukow (1985). The poem was translated into English by L. Wiener (1902), L.A. Magnus (1905), H. de Vere Beauclerk (1918), B.A. Guerny (1943), S.H. Cross (1948), V. Nabokov (1961), C.H. Andrushyshen and W. Kirkconnell (1963), I. Petrova (1981), D. Ward (1985), and others. French translations have been published by N. Blanchard and N. Ekstein (1823), F. de Bargon (1878), N. Koulman and M. Behagel (1937), and A. Grégoire (1945).

Polish translations of the *Slovo* include those of C. Godebski (1821), S. Krasinski (1856), Lepky (1899), and J. Tuwim (1927, 1944). Czech translations include those of V. Hanka (1921) and F. Kubka (1946). Other languages into which the epic has been translated are Serbian (I. Khadzhevich, 1842; I. Sankovic; and others), Slovene (M. Pletershnik, 1865), Bulgarian (R. Zinzifov, 1863; L. Stoianov, 1954), Italian (D. Ciampolli, 1911; E. Gatto, 1928), Spanish (J. and R. Maikiel, 1949), Danish (T. Lange, 1888), Hungarian (S. Ridl, 1858; H. Strypsky), Hebrew and Yiddish (S. Mendelsohn, 1875; D. Hofstein and I. Feffer, 1938), Abkhaz, Bashkir, Armenian, Georgian, Kazakh, Tatar, Uzbek, Rumelian-Greek, and many other languages.

H. Khotkevych wrote a historical play based on the *Slovo* in 1926. H. Luzhnytsky also adapted it for the stage. I. Borodin used motifs from the poem in his opera *Prince Igor*, as did M. Lysenko in his *Plach Yaroslavny* (Yaroslavna's Grief). Painters and graphic artists, such as H. Narbut, P. Kholodny, Sr. O. Kulchytska, P. Andrusiv, J. Hnizdovsky, P. Lopata, as well as the Russians V. Vasnetsov and V. Favorsky, drew inspiration from the epic. It is also reflected in the sculpture of M.(B). Mukhyn and A. Pavlos and in the stained-glass compositions of L. Molodozhany.

'Slovo o zakoni i blahodati' (Sermon on Law and Grace). A prominent monument of medieval Ukrainian oratorical and political literature. It was written in Kiev between 1037 and 1050, most likely by *Ilarion. In it the politically astute and erudite author affirms the independence of the Kievan Rus' state and its church and denies Constantinople's assumption of ascendancy over Kiev. Using metaphor and antithesis the author contrasts the 'law' of the Old Testament (cold, darkness, and enslavement) with the 'grace' of the New Testament (warmth, light, and freedom) and eloquently describes and praises the benefits of the Christianization of Kievan Rus'. The work's central part, a patriotic eulogy to Grand Princes Volodymyr the Great and Yaroslav the Wise, describes Volodymyr's conversion as the result of divine inspiration rather than of Byzantine influence. It ends with a prayer on behalf of 'our entire land' for deliverance from those who would conquer it. Although the sermon was intended for a select audience, its popularity was wide, and its structure and stylistic and rhetorical devices were copied by others (eg. the author of the eulogy to Prince Volodymyr Vasylykovich in the Volhynian Chronicle, and Domentijan, the Serbian author of the lives of ss Simeon and Sava [1253]). An English translation of the *Slovo* by N.L. Ickler appeared in the journal *Comitatus* (vol 9, 1978). It has been analyzed by many scholars, notably I. Zhdanov, N. Rozov, L. Müller, and A. Moldavan.

R. Senkus

Slovo o zburenniu pekla (The Tale of the Harrowing of Hell). An Easter drama dating back to the late 17th and early 18th centuries. It is based on apocryphal tales of Jesus's descent into hell, whence he led all the sinners. It is the only example of 17th-century drama that was not written according to the scholastic edicts of poetics. It has neither prologue nor epilogue and does not follow the usual three-to-five-act structure. It is written in syllabically uneven lines of richly rhyming verse and is reminiscent of contemporary Cossack dumas. The language is close to the vernacular of the day, and its robust humor and depiction of everyday life account for its popularity and its influence on contemporary verse. It has been translated into English by I. Makaryk (*About the Harrowing of Hell*, 1989). (See also *School drama.)

Słowacki, Juliusz, b 4 November 1809 in Kremianets, Volhynia gubernia, d 2 April 1849 in Paris. Polish Roman-

tic poet and dramatist; member of the *Ukrainian school in Polish literature. He spent parts of his childhood and youth in Kremianets and knew the Ukrainian language and Ukrainian folk songs and folklore. In the summer of 1827 he visited Odessa, Tulchyn, and Uman. Ukrainian linguistic and folkloric elements and themes are found in his first poem, 'Duma ukrainska' (Ukrainian Duma, 1826), in his narrative poem 'Žmija' (The Snake, 1832), and in other poems. He depicted Ukrainian historical events in his narrative poems 'Jan Kazimierz' (1839), 'Bienowski' (1841), and 'Sen srebrny Salomei' (Salome's Silver Dream, 1843) and in the dramatic romance 'Książdz Marek' (The Priest Marek, 1843). He also utilized Ukrainian settings and folklore in his plays 'Balladyna' (1834), 'Mazepa' (1839), and 'Lilla Weneda' (1840). Słowacki's works have been translated into Ukrainian by I. Verkhtsky, M. Starytsky, O. Pchilka, V. Shchurat, P. Stebnytsky, S. Tverdokhlib, M. Zerov, M. Rylsky, M. Bazhan, V. Gzhytsky, A. Malyshko, M. Tereshchenko, M. Zisman, B. Ten, Ye. Drobiazko, and others. Ukrainian editions of his works appeared in Kiev in 1959 (2 vols) and in 1969. Books about him have been written by the Soviet Ukrainian scholars Ye. Rykhlik (1929), H. Verves (1959), S. Levinska (1973), and R. Radshevsky (1985), and a Ukrainian biobibliographic guide was published by V. Stefanovych (1959).

R. Senkus

Slozka, Mykhailo [Sl'ozka, Myxajlo] (Slizka), b ? in Belarus, d 1667 in Lviv. Printer and bookseller. He worked at (1633) and directed (1634–7, 1643–51) the Lviv Dormition Brotherhood Press. From 1638 he also ran his own press in Lviv. Slozka printed over 50 books in Church Slavonic, Latin, and Polish. Among his most important publications were the *Apostol* (1639), with illustrations by the renowned engraver *Illia; I. Galiatovsky's *Kliuch razumieniia* (The Key of Understanding, 1659) and *Nebo novoie* (The New Heaven, 1665); Latin works by S. Okolski; and T. Prokopovych's panygeric in honor of Bishop A. Zhelyborsky. Slozka often clashed with the Lviv Brotherhood, who tried to maintain their publishing monopoly; in the prefaces to some of his publications he defended his independence as a publisher. In 1646 Metropolitan P. Mohyla forbade him to print church books, but Slozka disregarded the ban and was anathematized by Mohyla. Only 14 days after Slozka's death was the anathema lifted and his burial allowed.

The Sluch River in Volhynian Polisia

Engraving of St John the Evangelist in the 1639 Lviv *Apostol* printed by Mykhailo Slozka

Sluch River [Sluč]. A right-bank tributary of the Horyn River that flows northward for 451 km through Khmelnytskyi, Zhytomyr, and Rivne oblasts and drains a basin area of 13,900 sq km. Its valley is between 0.2 and 0.8 km wide in its upper reaches and up to 5 km wide downstream. The river itself is 5–50 m wide for most of its course and 110 m at its widest point. The Sluch is used for industrial and water-supply purposes as well as for irrigation, fishing, and water transportation (it is navigable for 290 km). Its main tributaries include (right) the Tnia and (left) the Korchyk, the Smolka, and the Khomora. A small hydroelectric station exists in its upper reaches. The main centers along the river include Novohrad-Volynskyyi and Sarny.

Slutsk Chronicle. A short redaction of West Ruthenian chronicles. It was compiled in the 15th century at the court of the Slutsk princes, about whom it also contains some information. The Slutsk Chronicle consists of two parts. The first part describes events in the Grand Duchy of Lithuania from the mid-14th century to 1446. The second part de-

scribes events in Kievan Rus' from 970 to 1237. The Slutsk Chronicle is a major source for the history of Belarus and Lithuania, and a source for Ukrainian history to the mid-15th century. It was published in vol 17 of *Polnoe sobranie russkikh letopisei* (Complete Collection of Russian Chronicles, 1907). Its language contains Belarusian influences.

Slutsk principality. A principality of Kievan Rus', with Slutsk as capital. It was formed out of a portion of Turiv-Pinske principality in the 1190s and was for a period a dependency of the Principality of Galicia-Volhynia. In 1326 it became a vassal of the Grand Duchy of Lithuania, and it was ruled by the descendants of Algirdas until 1612, when it was inherited by the Radziwiłłs. The principality was abolished in 1791.

Abram Slutskii

Slutskii, Abram [Sluc'kin], b 5 July 1881 in Borisoglebsk, Voronezh gubernia, Russia, d 13 July 1950 in Kharkiv. Microradiowave physicist; full AN URSR (now ANU) member from 1948. A graduate of Kharkiv University (1916), he conducted breakthrough research on the magnetron generation of centimeter waves there and at the ANU Physical-Technical Institute in Kharkiv, where from 1930 he headed the electromagnetic waves research section. Slutskii is credited with decisive contributions to the creation, in 1939, of the first Soviet decimeter radiolocation system.

Slutsky, Hryhorii [Sluc'kyj, Hryhorij], b 8 October 1916 in Kiev, d 1 March 1990 in Kiev. Architect. A graduate of the Kiev Civil-Engineering Institute (1940), he directed the group that prepared the plan for the general development of Kiev (1964–7) and the plan of development of Kiev's Vidradnyi and Obolon raions, designed residential buildings on Kiev's Bessarabska Square (1948–50) and Engels St (1950–3), collaborated on the design for Kiev's Main Post Office (1952–6) and River Station (1959–60), and wrote articles on architecture.

Slutsky, Mykhailo [Sluc'kyj, Myxajlo], b 19 July 1907 in Kiev, d 23 June 1959 in Moscow. Film director. He completed cinematography courses in the Kiev State Institute of Cinema (1932) and then worked as a director of documentary films in 1947–56 at the Ukrainian Studio of Chronicle-Documentary Films. Among his films are *Radians'ka Ukraina* (Soviet Ukraine, 1947) and *Koivtucha Ukraina* (Flowering Ukraine, 1951).

Slutsky, Oleksander [Sluc'kyj], b 20 June 1915 in Kiev, d 9 June 1967. Historian. A graduate of Kiev University (1935), he worked at the AN USSR (now ANU) Institute of History (from 1938) and taught at various institutions of higher education in Kiev. He wrote *Radians'ke i kul'turne budivnytstvo na Ukraïni v pershi roky borot'by za sotsialistychnu industrializatsiiu kraïny (1926–1929 rr.)* (Soviet and Cultural Construction in Ukraine in the First Years of the Struggle for the Socialist Industrialization of the Country [1926–9], 1957) and *Rabochii klass Ukraïny v bor'be za sozdanie fundamenta sotsialisticheskoi ekonomiki (1926–1932 gg.)* (The Working Class of Ukraine in the Struggle to Lay the Foundation of a Socialist Economy [1926–32], 1963).

Yevhen Slutsky

Gen Oleksander Slyvynsky

Slutsky, Yevhen [Sluc'kyj, Jevhen], b 19 April 1880 in Novoe, Yaroslavl gubernia, Russia, d 10 March 1948 in Moscow. Economist, mathematician, and statistician. After graduating in economics from Kiev University (MA, 1911) he taught economics and statistics at the Kiev Commercial Institute (1913–26). Then he worked in Moscow at the Institute for the Study of Business Cycles (1926–30), the Central Institute of Meteorology (1930–8), and the Mathematics Institute of the USSR Academy of Sciences (1938–48). Slutsky made fundamental contributions to economics and mathematics: he built the basis for modern indifference-curve analysis with its income and substitution effects (1915), developed the theory of stochastic processes and applied it to economic cycles (1927), and reformulated the fundamental concept of economics as part of the general theory of purposive action on praxeology (1925). His work in economics influenced O. Lange and the Polish praxeologist T. Kotarbiński. In mathematics he made an important contribution to probability theory.

Sluzhbovets' (The Civil Servant). A weekly organ of the Central Administration and Kharkiv branch of the Union of Soviet Trade Employees, published in Kharkiv in 1925–31 (a total of 269 issues). It contained trade union news, political and economic articles, prose, and poetry.

Sluzhbovyk (The Employee). A monthly organ of the *Union of Ukrainian Private Office Employees, published in Lviv in 1919–39. Its editors included V. Tsmailo-Kulchytsky, P. Podlevsky, V. Poliansky, O. Navrotsky, and A. Nyvynsky.

Sluzhebnyk. See Liturgicon.

Sluzhka, Ivan [Sluzhka], b and d ? Ukrainian civil and military engineer during the 16th century. He is mentioned in chronicles of the period as the designer and builder of five churches and the Kyselivka fortifications in Kiev in 1542–8.

Slynko, Ivan [Slyn'ko], b 25 November 1902 in Vasylykivka, Pavlohrad county, Katerynoslav gubernia. Historian and civic figure. A graduate of the Dnipropetrovske Metallurgical Institute (1935), he worked as a CP(B)U propagandist (1938), as head of the AN USSR (now ANU) presidium's Commission on the History of the Great Fatherland War (1946–50), and as department director (1950–2) and senior research associate (from 1952) at the ANU Institute of History. His published works are about the popular struggle in Ukraine during the Second World War (coauthor, 1957), socialist reconstruction and the technical rebuilding of agriculture in Ukraine (1961), and the under-ground and the partisan movement in Ukraine in 1944 (1970).

Slyvynsky, Andrii [Slyvyns'kyj, Andrii], b 1908 in Dubosari, Tyraspil county, Kherson gubernia. Civil engineer; member of the Ukrainian SSR Academy of Construction and Architecture from 1956. He designed metallurgical and chemical factories in the Donbas, the Urals, and Siberia. He contributed to theoretical foundations in the fields of the organization and mechanization of the construction industry. In 1956–7 he served as assistant minister of the metallurgical and chemical industry of the Ukrainian SSR.

Slyvynsky, Oleksander [Slyvyns'kyj], b 1886 in Poltava gubernia, d 1953 in Canada. Senior UNR Army officer. During the First World War he served as chief of staff of a division and a cavalry corps in the Russian army, and received the highest decoration for bravery in combat. In June 1917 he became a member of the General Military Committee of the Central Rada, and in November he was appointed deputy chief and then chief of the General Staff of the UNR Army. During the Hetman government he continued to serve, at the rank of colonel, as chief of the General Staff. He drafted a comprehensive organizational plan for a regular Ukrainian army. In the interwar period he lived in Germany and then emigrated to Canada.

Smakula, Oleksander (Alexander), b 9 September 1900 in Dobrovody, Zbarazh county, Galicia, d 17 May 1983 in Auburndale, Massachusetts. Physicist, crystallographer, inventor; full member of the Shevchenko Scientific Society from 1930 and the American Physical Society and fellow of the American Optical Society. A graduate of Göttingen University (PH D, 1927), he taught there and then headed the optical laboratory at the Kaiser Wilhelm Institute in Heidelberg (1930–4) and the research laboratory at the Carl Zeiss Optical Co in Jena, Germany (1934–45). From 1951 to 1966 he was a professor at the Massachusetts Institute of Technology, where he organized in 1964 and headed until 1975 the Laboratory of Crystal Physics. Smakula wrote over 100 works, among them important contributions on color centers in crystals (his formulae are basic in the field), the optical properties of solids, the measurement of dielectric properties of materials, and interactions be-

Oleksander (Alexander)
Smakula

Roman Smal-Stotsky

tween radiation and crystal lattices. He undertook important studies of the optical properties of organic crystals (his crystallographic measurements contributed to the discovery of vitamins A, B₂, and D); contributed to the development of quantum theory; and discovered and perfected the standard antireflection coating for lenses, universally used today in photographic cameras, microscopes, telescopes, and other optical lenses and apparatuses.

L. Onyshkevych

Smallpox (Ukrainian: *vispa*). An acute infectious disease caused by a virus (pox virus), for which there is no known cure. Escalating to epidemics and then leveling off through the centuries, smallpox has been known to exist and ravage nations from ancient times. In the Russian Empire 100,000 to 150,000 people succumbed to the disease every year. After the imposition of Soviet rule smallpox was controlled through isolation and vaccination, and it had been eliminated in the USSR by 1936. The campaign of the World Health Organization, begun in 1950, brought smallpox under control throughout the world; the disease was pronounced eradicated in 1977.

Smal-Stotsky, Ivan [Smal'-Stoc'kyj], b 1905 in Poltava gubernia. Writer. As a postwar refugee in Australia he published the prose collection *Potolocheni khliba* (Trampled Grain, 1954), the novel *Klepachivskiy reid* (The Klepachi Raid, 1968), and the reportage *Kinofil'mova ekspedytziia* (The Filming Expedition, 1970). He has contributed to many émigré periodicals.

Smal-Stotsky, Roman [Smal'-Stoc'kyj] (Smal-Stocki), b 8 January 1893 in Chernivtsi, d 27 April 1969 in Washington, DC. Scholar and political figure; member of the Shevchenko Scientific Society (NTSh) from 1934; son of S. *Smal-Stotsky. He studied at Vienna, Leipzig, and Munich (PH D, 1914) universities. During the First World War he was an emissary of the *Union for the Liberation of Ukraine (SVU) in Munich and worked as an SVU organizer and teacher among the Ukrainians from the Russian army held in POW camps in Germany. After the war he was a representative of the Western Ukrainian National Republic (1918–19) in Berlin and an adviser (1919–21) and extraordinary envoy and plenipotentiary minister (1921–3) of the UNR in Berlin, a professor of comparative Slavic linguistics at the Ukrainian Free University in Prague (1923–

6), a visiting professor (and unofficial UNR envoy) in London and Cambridge (1924–5), and a professor at Warsaw University (1926–39). In Warsaw he was also the UNR government-in-exile's deputy minister of foreign affairs, minister of culture, deputy premier (1926–44), and minister of foreign affairs; he was a member of the UNR delegation to the League of Nations, secretary of the Ukrainian Scientific Institute in Warsaw (1929–39) and editor of its *Pratsi*, a leading figure in the *Promethean movement, and co-publisher (with I. Ohienko) of the series *Studii do ukraïns'koi hramatyky* (Studies in Ukrainian Grammar, 7 vols, 1926–9). During the Second World War he lived under Gestapo house arrest in Prague. A postwar refugee in Germany, in 1947 he emigrated to the United States. Until 1965 he was a professor of East European history at Marquette University in Milwaukee, founding director of its Slavic Institute, and editor of the institute's publications. From 1951 he was president of the American NTSh, and from 1955 head of its Supreme Council and a member of the Political Council of the Ukrainian Congress Committee of America.

Smal-Stotsky produced studies on Ukrainian word formation (particularly of adjectives); on Rumanianisms, Hungarianisms, and Germanisms in the Ukrainian language; on etymology; and on Soviet (Russian) language policy in Ukraine. His more important works are *Abriss der ukrainischen Substantivbildung* (1915), *Narys slovotvoru prykmetnykiv ukraïns'koi movy* (A Study of the Word Formation of Ukrainian Adjectives, 1925), *Znachennia ukraïns'kykh prykmetnykiv* (The Significance of Ukrainian Adjectives, 1926), *Prymityvnyi slovotvir* (Primitive Word Formation, 1929), *Ukraiïns'ka mova v Soviets'kii Ukraïni* (The Ukrainian Language in Soviet Ukraine, 1936; 2nd expanded edn 1969), *Die germanisch-deutschen Kultureinflüsse im Spiegel der ukrainischen Sprache* (1942), *The Origin of the Word "Rus"* (1949), *The Nationality Problem of the Soviet Union and Russian Communist Imperialism* (1952), *The Captive Nations: Nationalism of the Non-Russian Nations in the Soviet Union* (1960), and *The History of Modern Bulgarian Literature* (with C. Manning, 1960). In the United States he published political articles in American newspapers, the *Ukrainian Weekly*, and the *Ukrainian Quarterly*, and contributed the chapter on the history of the Ukrainian language to *Ukraine: A Concise Encyclopaedia* (vol 1, 1963). Articles about him and a select bibliography of his works can be found in *ZNTSh* (vol 177, 1963).

O. Horbach

Smal-Stotsky, Stepan [Smal'-Stoc'kyj], b 8 January 1859 in Nemyliv, Kamenetsky county, Galicia, d 17 August 1938 in Prague. Philologist, pedagogue, and cultural, economic, and political figure; member of the Shevchenko Scientific Society from 1899 and the VUAN from 1918; father of R. *Smal-Stotsky. He studied at the universities of Chernivtsi (1879–83) and Vienna (PH D, 1884), where he became a disciple of F. *Miklosich. While serving as a professor of Ukrainian language and literature at Chernivtsi University (1885–1918), he played a key role in the national and cultural revival of Bukovyna's Ukrainians: he headed the *Soiuz (1879–82), *Ukrainska Shkola (1887–91), and *Ruska Rada (1904–14) societies and was a founding member of the People's Home, a leading member of the Ruska Besida society, a deputy from the National Democratic party in the Bukovynian Provincial Diet

Stepan Smal-Stotsky

Mark Smerchanski

(1892–1911) and the Diet's deputy marshal (1904–10), a long-term coeditor of the daily **Bukovyna*, and a member of the Provincial Executive Board and Provincial School Council. He organized over 100 village reading houses and, together with M. Vasylo and other Bukovynian leaders, fought for and attained equality for Ukrainians in Bukovyna's civil service and political life. As the head of the *Ruska Kasa* savings and loan society and **Selianska Kasa* union of agricultural credit co-operatives, he helped build the Ukrainian co-operative movement in Bukovyna.

From 1911 to 1918 Smal-Stotsky was a member of the Austrian Parliament in Vienna. During the First World War he played a leading role in the **Union for the Liberation of Ukraine*. He was a cofounder of the **Graycoats* division and represented the Western Ukrainian National Republic's (ZUNR) Ministry of Military Affairs in Vienna. In 1917 he was in charge of the Ukrainian Sich Riflemen's charity work, propaganda, and publishing. From 1919 he lived in Prague, where he served as an envoy of the ZUNR, a professor at the Ukrainian Free University (1921–38), and director of the Museum of Ukraine's Struggle for Independence (1935–8). He was buried in Cracow.

Smal-Stotsky was a precursor of the phonological method in Ukrainian linguistics. In his works on Ukrainian linguistics and literature he combined positivist language with a national-romantic *weltanschauung*. He wrote *Über die Wirkungen der Analogie in der Deklination des Kleinrussischen* (1886, PH D dissertation) and, with T. Gartner, the influential *Grammatik der ruthenischen (ukrainischen) Sprache* (4 edns, 1893, 1907, 1914, 1928). In it he proved that Ukrainian sprang directly from Proto-Slavic, and vitiated the theory of a Proto-East Slavic language. He propounded the same view in his later works, particularly in his book on the development of views concerning the relatedness of the Slavic languages and their common origin (1925; rev edn 1927). He unequivocally opposed V. **Hantsov's* view that Standard Ukrainian developed out of the northern and southern Ukrainian dialects. His obvious exaggerations (eg, regarding the particular closeness of Ukrainian and Serbian and the absence of diphthongs in the northern Ukrainian dialects), however, hindered the acceptance of his many valid views by other linguists. In literature, from 1913 Smal-Stotsky focused his attention on T. Shevchenko's works. His studies were published as

one book, *Taras Shevchenko: Interpretatsii* (Taras Shevchenko: Interpretations, 1934; repr 1965). He also wrote a book on the culture and history of Bukovynian Rus' (1897) and articles on the Hankenstein Codex; Ukrainian orthography and etymology; Ukrainian writers, such as I. Kotliarevsky, M. Shashkevych, Yu. Fedkovych, V. Stefanyk (the preface to his first novella collection, 1897), I. Franko, and O. Kobylanska; and his recollections of Nemyliv (1933).

Smerchanski, Mark [Smerčans'kyj], b 1 November 1914 in Malonton, Manitoba. Mining and metallurgical engineer, and politician. After being educated at the University of Manitoba (1937) and Virginia Polytechnical Institute (1938) Smerchanski managed mines in British Guyana (now Guyana) during the Second World War and then established several mining and manufacturing enterprises in Canada. He sat in the provincial legislature as a Liberal for the constituency of Burrows (1962–6) and in the federal House of Commons as Liberal member for Provencher (1968–72). Smerchanski played an important role in the establishment of the department of Slavic studies at the University of Manitoba, as the head of the Ukrainian Studies Fund, and in the building of the Holy Family nursing home in Winnipeg.

Smerd. The name given to a member of a class of peasantry of the Kievan state in the 11th and 12th centuries. The delineation of the group is somewhat imprecise and a subject of historical debate. Most scholars (M. Braichevsky, B. Grekov, M. Hrushevsky in his early writings, M. Maksymeiko, M. Vladimírsky-Budanov, and others) contend the name was given to two categories of peasants: the free, who gradually lost their freedom with the development of the feudal order, and the dependent peasantry. Others (V. Kliuchevsky, M. Hrushevsky in his later writings, S. Chernov, and A. Presniakov) maintain that only the free peasants, including both those who lived on their own land and those who settled on the estates of princes, were thus designated.

The name disappeared from use in the 12th century but resurfaced in the 13th and 14th centuries as a designation of dependent peasants of the Galician-Volhynian state. It sometimes surfaces in documents of the 15th and 16th centuries concerning Ukrainian territories under Poland and Lithuania as a term for people of low station. From the 13th century the name was increasingly replaced by **kmet*. The designation was also used by West Slavs, including Serbs (*smardji*) and Poles (*smardowie, smurdowie*).

Smerechynska-Shul, Rozha [Smerečyns'ka-Šul', Roža] (née Smereczynska von Dindorf), b 23 April 1914 in Lviv, d 27 October 1986 in Philadelphia. Educator, musicologist, music and art critic. After graduating from the

Szymanowski Conservatory in Lviv in the theory class of S. Barbag and Z. Lissa (1934) she studied musicology at Lviv University (1935–7) with A. Chybinski. She then taught piano and theory at the Lysenko Higher Institute of Music (1937–9) and the Lviv State Conservatory (1939–41). Emigrating to the United States in the 1950s, she taught piano at the Ukrainian Music Institute of America in New York, Jersey City, and other cities. Her writings include the handbook *Osnovy muzychnoho mystetstva: Teoriia i istoriia* (Principles of the Art of Music: Theory and History, 1973), articles, and reviews.

Smerechynsky, Serhii [Smerečyns'kyj, Serhij], b 21 September 1892 in Mechetna, Balta county, Podilia gubernia, d ? Archivist and linguist. As director of the Vinnytsia Archives, he published articles on the predicative instrumental and nominative (1928), on relative clauses in Ukrainian (1929) and a book of essays on Ukrainian syntax in relation to phraseology and stylistics (1932), in which he advocated the use of vernacular constructions in all fields of speech and writing, including science and journalism. He was assailed for this stance by Party critics, such as H. Sabaldyr and O. Matviienko. During the terror in the 1930s he was arrested, and his further fate is unknown.

Smerek, Myroslav, b 1935 in Manastyr, Jarosław county, Galicia. Modernist painter and educator. In 1962 he graduated from the art faculty of Toruń University. He painted the urban landscape series 'Birth of a Factory' and, from his travels in Ukraine, series of paintings of Ukrainian churches and Crimean landscapes (1964). The influence of the icon tradition is evident in his work.

Smereka, Antonina (real surname: Bahlii), b 14 March 1892 in Kiev, d 29 June 1981 in Kharkiv. Actress. She was one of the founders of *Molodyi Teatr (1916–19) and an actress in the Theater of the Western Ukrainian National Republic (1919), Kyidramte (1920–1), Berezil (1922–34), and the Kharkiv Ukrainian Drama Theater (1935–51).

SMERSH (Russian acronym for *smert shpionam* 'death to the spies'). A special division of the *NKVD. Active between 1942–6 under the direction of V. Abakumov and I. Serov, SMERSH acted inside the USSR and among the Russian occupational troops in Europe. Its task was to eliminate alleged opponents of the Soviet regime among Soviet citizens who during the Second World War had spent time outside of the control of Soviet authorities (prisoners of war, *Ostarbeiter, and war refugees). It terrorized its victims outside of the USSR through *repatriation and within the country by mass arrests, executions, or deportations to the gulag.

Smiach camp sites. A group of Mesolithic and Neolithic sites near Smiach, Novhorod-Siverskyi raion, Chernihiv oblast. Excavations in 1925–7 uncovered 18 separate camps and work areas. *Swiderian and *Pitted-Comb Pottery Culture artifacts have been recovered at the site.

Smidovych, Antin [Smidovyč], b 10 June 1872 in Kamianets-Podilskyi, Podilia gubernia, d 1 February 1916 in the Katerynoslav region. Sanitary physician and civic leader. After graduating from Kiev University (1898) he

worked as a physician for the Odessa (1899–1904), Voronezh (1904–6), and Kherson (1906–8) zemstvos. As director of the sanitation bureau of the Katerynoslav zemstvo (1908–16) he helped reorganize the zemstvo's sanitary system, encouraged technological applications, promoted sanitary education, and edited a zemstvo sanitary magazine. He died taking part in an organized effort to control a cholera epidemic.

Smiian, Petro [Smijan], b 13 January 1918 in Borzna, Chernihiv gubernia. Historian. A graduate of the Kiev Pedagogical Institute (1938), he taught and worked in Nizhnev, Kiev, Uzhhorod, and Lviv, and from 1955 he taught history at the Lutske Pedagogical Institute. In addition to articles on the history of Volhynia he has written the monographs *Revoliutsiinyi ta natsional'no-vyzvol'nyi rukh na Zakarpatti kintsia XIX-pochatku XX st.* (The Revolutionary and National Liberation Movement in Transcarpathia of the Late 19th to Early 20th Century, 1968) and *Zhovtneva revoliutsiia i Zakarpattia: 1917–1919 rr.* (The October Revolution and Transcarpathia: 1917–19, 1972).

Smiian, Serhii [Smijan, Serhij], b 17 May 1925 in Kiev. Theater director. He completed study at the Kiev Institute of Theater Arts (1948) and then worked as an artistic director in Ukrainian drama theaters in Poltava (1951–6), Dnipropetrovske (1956–9), Lviv (1959–66), Zaporizhia (1966–70), and Kiev (1970–8); as stage director in the Kiev Theater of Opera and Ballet (1978–81); and as artistic director of the Kiev Theater of Musical Comedy (1981–7). He has taught at the Kiev Institute of Theater Arts since 1970.

Smila. IV-12. A city (1989 pop 77,500) on the Tiasmyn River and a raion center in Cherkasy oblast. At the end of the 16th century a Cossack settlement named Tiasmyne arose at the site of a former *khutir*. In 1633 it became the estate of S. Koniecpolski, and a few years later it was renamed Smila. Under the Hetman state (1648–67) it was a company center in Chyhyryn regiment. Under Polish rule the town suffered from frequent Tatar raids and feudal oppression. Its inhabitants joined the haidamaka revolts in 1734, 1750, and 1769–70. To appease its residents the Polish king granted Smila the rights of *Magdeburg law in 1773. The town was annexed by Russia in 1793, and became part of Cherkasy county in Kiev gubernia. In 1838 it was purchased by the Bobrinsky family, who built two sugar refineries nearby. Industrial development was stimulated by the construction of the Fastiv–Znamianka railway line in 1876. By 1910 there were 23 factories in Smila, and its population had reached 29,000. In 1921, under the Soviet regime, the Institute of the Sugar Industry was established in Smila. The town was granted city status and promoted to the status of a raion center in 1926. Today it is an industrial and transportation center. It has a large machine-building plant, a sugar refinery, a brewery, and a sewing factory.

Smila Machine-Building Plant (Smilianskyi mashynobudivnyi zavod). A factory of the machine-building industry in Smila, Cherkasy oblast. It was established in 1930 as a machinery repair plant and began to produce new machines in 1957. Initially it specialized in machinery and equipment for the sugar industry, but now it makes a larger assortment of products for use in the food, trans-

portation, and other industries, including salt mills, molasses boilers, dough kneaders, distillers, and filters. In 1972 the plant employed some 1,600 workers.

Leonid Smiliansky

Adrian Smirnov

Smiliansky, Leonid [Smilians'kyj], b 27 February 1904 in Konotip, Chernihiv gubernia, d 11 November 1966 in Kiev. Writer and journalist. In 1928 he concluded his studies at the Kiev Institute of People's Education. He belonged to the literary organizations Hart, Molodniak, and the All-Ukrainian Association of Proletarian Writers and was first published in 1925. For some time he worked as a journalist and literary critic for various publications. He also showed talent in the genres of narrative prose, dramaturgy, and the film scenario (in 1956 he worked on the film *Ivan Franko*, and in 1959 he wrote a film version of the novel *Sashko*). Smiliansky's first novels were written in the constructivist style, among them *Novi oseli* (New Settlements, 1928) and *Zlochyn brygadyra* (The Crime of the Brigadier, 1930). During the Second World War he began writing psychological short stories, such as *Na zastavi* (At the Outpost, 1941), *Topky pohasheni* (The Stoves Are Out, 1941), *Pidslukhani noveli* (Overheard Novellas, 1942), and *Sertse* (Heart, 1943). Smiliansky's historical and biographical works, marred by the tendency to distort historical fact, consist of *Mykhailo Kotsiubyns'kyi* (1940), *Zoloti vorota* (The Golden Gates, 1942), *Ievshan-zillia* (Wormwood, 1943), the two-volume novel about T. Shevchenko *Poetova molodist'* (The Poet's Youth, 1960–2), the drama about Lesia Ukrainka *Chervona troianda* (The Red Rose, 1955), the drama about I. Franko *Muzhyts'kyi posol* (The Peasant Delegate, 1956), and others. An edition of his works in four volumes was published in 1970.

I. Koshelivets

Smilivsky, Ivan [Smilivs'kyj], b 1762, d 1808. Pathologist and internal medicine specialist. A graduate of the Kievan Mohyla Academy and the St Petersburg Medico-Surgical School (1790), in 1796 he was appointed an adjunct professor of pathology and internal medicine and in 1805 a professor of hygiene, physiology, and pathology at the St Petersburg Medico-Surgical Academy. He translated a number of German medical textbooks into Russian and wrote several works on diseases such as tuberculosis.

Smirnov, Adrian, b 16 November 1908 in Novgorod, Russia. Theoretical physicist; AN URSR (now ANU) full

member since 1967. A graduate of Leningrad University (1932), he has worked at the Ural Physical-Technical Institute in Sverdlovsk (1932–9), the Ural branch of the USSR Academy of Sciences (1939–49), and the ANU Institute of Physics (1949–50) and Institute of Metal Physics (since 1950). He served as scientific secretary of the ANU Physics Division (1963–6), ANU vice-president (1970–4), and editor of *Ukrainskii fizicheskii zhurnal*. Smirnov has contributed to the development of the theory of imperfect metallic crystals, the theory of the electronic energy spectrum of ordered alloys, the quantum theory of electric resistance in metals and alloys, and the molecular-kinetic theory of order and diffusion in metals and alloys. He developed the theory of phase transitions in alloys with several superstructures under high pressures and the theory of the scattering of slow neutrons in ordered alloys.

Smirnov, Boris, b 26 March 1881 in Vladikavkaz, North Ossetian region, d 4 December 1954 in Moscow. Painter and graphic artist. A lecturer at the Moscow Art Institute, he prepared illustrations for the 1914 Katerynoslav edition of T. Shevchenko's complete works and for illustrated editions of Shevchenko's *Prychynna* (The Insane Girl, 1945) and *Dumy moi* (My Thoughts, 1945). He also painted landscapes, the canvases *Shevchenko's Burial on Chernecha Hill, near Kaniv* (1944), *Raftsmen Singing* [Shevchenko's] *'The Dnieper Is Roaring and Groaning'* (1945), and *Shevchenko's Final Road* (1946), and the album *Na Vkraïni mylii* (In Dear Ukraine, 1945–7).

Smirnov, Mikhail, 1833–77. Historian. His master's dissertation at the Odessa Pedagogical Institute was among the first works to deal with the history of Galicia and Volhynia in the 14th and 15th centuries. It was published as *Sud'ba Chervonnoi ili Galitskoi Rusi* (The Destiny of Red or Galician Rus', 1860; Ukrainian trans pub in vol 5 of the *Ruska istorychna biblioteka* series [1886]). Smirnov taught at the Richelieu Lyceum (from 1861) and Odessa University (from 1868).

Smirnov, Pavel, b 21 September 1882 in Simbirsk (now Ulianovsk), d 2 April 1947 in Moscow. Russian historian. He studied history at Kiev University under M. Dovnar-Zapolsky and taught there (1912–20, as professor from 1919) and at the Kiev Institute of People's Education (1921–3). He was arrested and sent to Tashkent, where subsequently he taught at the state university (1927–34). After returning to Moscow he was a professor at the Historical-Archival Institute from 1938 (PH D, 1942). A specialist in the socioeconomic and urban history of Russia (16th–19th centuries), he also wrote a monograph about Kievan Rus', published by the VUAN as *Volz'kyi shliakh i starodavni rusy: Narysy z rus'koi istorii VI–IX vv.* (The Volga Route and the Ancient Rus': Studies of Rus' History of the 6th–9th Centuries, ZIFV, no. 75 [1928]), which challenged the notion that the Russian state descended from Kievan Rus'.

Smirnov, Valerii, b 7 March 1937 in Tahanrih, Rostov oblast. Microbiologist and virologist; full member of the AN URSR (now ANU) since 1985. A graduate of the Dnipropetrovske Medical Institute (1961), he worked for the Scientific Research Institute of Epidemiology, Microbiology, and Hygiene of the Ukrainian Ministry of Health (1961–

Valerii Smirnov

Oleksander Smohorzhevsky

74, assistant director from 1963) and directed the Lviv Scientific Research Institute of Epidemiology and Microbiology (1974–7) and the ANU Institute of Microbiology and Virology (from 1977). In 1978 he became head of the Ukrainian Microbiology Society and editor of *Mikrobiologicheskii zhurnal*.

Smishko, Markiiian [Smiško, Markijan], b 7 November 1900 in Lviv, d 20 March 1987 in Lviv. Archeologist. A graduate of the University of Lviv (1931), he taught archeology there (1932–41), then directed the Lviv branch of the AN URSR (now ANU) Institute of Archeology (1940–1 and 1944–51) before joining the ANU Institute of Social Sciences (from 1970 as a senior associate). Smishko wrote several articles about archeological research in Western Ukraine after its annexation by the USSR. A specialist in the formative period of the Eastern Slavs, he wrote several monographs, including *Karpats'ki kurhany pershoi polovyny 1 tysyacholittia nashoi ery* (Carpathian Kurhans of the First Millennium AD, 1960).

Smohorzhevsky, Oleksander [Smohorzhevsk'kyj], b 23 February 1896 in Lisovi Berlyntsi (now Lisove), Mohyliv-Podil'skiy county, Podilia gubernia, d 7 May 1969 in Kiev. Mathematician. After completing his studies at the Kiev Institute of People's Education in 1929, he worked at the Kiev Polytechnical Institute (professor from 1938). He made important contributions to geometry, particularly to the theory of geometric construction in Lobachevsky space, solved a number of construction problems in hyperbolic geometry, and constructed a two-dimensional metric geometry. He also made contributions to analysis, particularly to the theory of differential equations and orthogonal polynomials.

Smohorzhevsky, Yason [Smohorzhevsk'kyj, Jason] (Smohorzhevsky), b 1714 in Smorohov, Belarus, d 1788 in Radomyshl, in Right-Bank Ukraine. Uniate metropolitan. He joined the Basilian order and left in 1734 for Rome, where he studied at the St Athanasius College and was ordained (1740). He returned to Polatsk to serve as a preacher and then vicar to Bishop F. Hrebnytsky. In 1762–80 he was archbishop of Polatsk, and in 1780–8 he was Uniate metropolitan of Kiev. Although the 1772 partition of Poland had divided the metropolity among three powers, he at-

tempted to maintain control over all its eparchies from his see in Radomyshl. He ordained P. Biliansky as bishop of Lviv and defended the rights of the Kievan metropolitan to appoint bishops, against Roman Catholic encroachments.

Smola, Parfenii. See Kuts, Valentyn.

Smolensk nobility. The ruling class of the Smolensk region. Largely of Belarusian origin, it defended its rights as a local aristocracy from the encroachments of Muscovy after the territory's annexation by the Muscovite state in the mid-17th century. Beginning with Peter I Russian authorities incrementally limited the Smolensk nobility's rights despite numerous petitions and protests. In 1764–5 the Smolensk military organization was abolished outright, the territory was reconstituted as a Russian gubernia, and the nobility was incorporated into the Russian nobility.

Geographic proximity, historical ties and a similarity of traditions, and an autonomous legal status as well as a distaste for the centralizing tendencies of Moscow helped to develop relations between the Smolensk nobility and Cossack *starshyna*. Hetmans I. Samoilovych and D. Apostol and a number of officers' families (Dunin-Borkovskyy, Hamaliia, Lyzohub, Myklashevskyy, and others) were directly related to Smolensk aristocratic lines (Engelhardt, Khrapovitsky, Korsak, Krasno-Mylashevich, Likoshin, Paseka, Rachinsky, Ridvansky, Savitsky, Voevodsky, and others). Such family, cultural, and economic ties brought about frequent bilateral resettlement, the sale and exchange of estates, and the introduction of Smolensk peasants into Ukraine. A regiment of Smolensk nobility participated in the Chyhyryn, Crimean, and Azov campaigns led by the Cossacks.

The ties between the two areas also developed a political dimension. In the 18th century the Smolensk nobility was so impoverished and weakened by Russian policies that it sought even closer ties with Ukrainians. The extent of its effort was great enough to alarm the imperial officials, and Anna Ivanovna noted in a secret ukase to Prince A. Shakhovskoi, dated 31 January 1734, that it was necessary 'to pull the Little Russians away from relations with the Smolenskians.' The Russian government was particularly disturbed by Smolensk ties to the Hetmanate government. The autonomist aspirations of the Smolensk territory, also supported by the Polish Commonwealth, had a certain impact on Ukrainian affairs, particularly in the 1730s. The abolition of the autonomy of the Smolensk nobility was part of a broader process of centralization of power within the Russian Empire; it was followed closely by similar moves against the Ukrainian Hetmanate. The last significant episode of Ukrainian-Smolensk relations occurred in the late 18th century, when the Russian government (under Paul I) uncovered the so-called Smolensk conspiracy of 1798; among the participants were several Ukrainian officers of the Russian army (Gen P. Bilukha-Kokhanovskyy, Capt F. Lukashevych, the brother of V. Lukashevych, and others).

O. Ohloblyn

Smoliak, Vitalii [Smoljak, Vitalij], b 25 April 1915 in Ivankivtsi, Proskuriv county, Podilia gubernia, d 29 November 1982 in Ivano-Frankivske. Stage director and actor. He acted in the Kharkiv Oblast Touring Theater and

the Kiev Theater of Transport Workers (1935–47), directed in the Ivano-Frankivske Ukrainian Music and Drama Theater (1947–55 and 1968–75), and led the Poltava Ukrainian Music and Drama Theater (1955–68).

Smoliatych, Klym. See Klym Smoliatych.

Ivan Smolii

Dmytro Smolych

Smolii, Ivan [Smolij], b 14 August 1915 in Mykhnivets, Turka county, Galicia, d 24 February 1984 in Utica, New York. Writer and journalist; vice-president of the Ukrainian Journalists' Association of America. He debuted as a poet and story writer in Lviv periodicals in 1937, and in 1939 he published the play *Zhyttia na vazi* (Life in the Balance). As a postwar refugee in Germany and, from 1947, the United States he published the story collections *Divchyna z Vinnytsi* (The Girl from Vinnytsia, 1947), *Manekeny* (Mannequins, 1956), and *Zrada* (Betrayal, 1959), the play *Nich nad pshenychnoiu zemleiu* (Night over the Wheat Land, 1954), the fairy tale *Sontseborny* (The Sun Fighters, 1960), and the novels *Kordony padut'* (The Borders Are Falling, 1951), *U zelenomu Pidhir'i* (In the Green Pidhiria, 1960), and *Nespokoina osin'* (Turbulent Autumn, 1981). Most of his prose works are set in wartime Galicia. He also published poems, publicistic articles, and book reviews in the Ukrainian-American press. From 1979 to his death he was chief editor of the Ukrainian Fraternal Association weekly, **Narodna volia*.

Smoloskyp (Torch). A journal, a publishing house, an information service, and an organization in defense of human rights in Ukraine. O. *Zinkevych is the founder, director, and chief editor. The journal began as a youth supplement to the newspaper *Ukrains'ke slovo* in Paris (1952–6) under the name *Smoloskyp* before appearing as an independent journal (1956–68; a total of 130 issues). It devoted attention to émigré student issues and popularized and republished the works of the **shestydesiatnyky*.

The V. Symonenko Smoloskyp Publishers (named in honor of a prominent *shestydesiatnyk*) was founded in Baltimore in 1967. It has published works of Ukrainian *samvydav and literature banned in the USSR, such as poetry collections by L. Kostenko, V. Holoborodko, O. Teliha, I. Kalynets, M. Rudenko, M. Kholodny, S. Karavansky, T. Melnychuk, A. Pashko, and O. Berdnyk; novels by O.

Smoloskyp, a magazine published by Smoloskyp

Honchar, M. Osadchy, M. Rudenko, B. Antonenko-Davydovych, and O. Berdnyk; publicism by V. Moroz, O. Berdnyk, M. Rudenko, V. Stus, and Ye. Sverstiuk; the collected works of M. Khvylovy (5 vols, 1982–5); a book about L. Kurbas (1989); *Martyrolohiia ukrains'kykh tserkov* (Martyrology of the Ukrainian Churches, 2 vols, 1985, 1987); collections of documents of the Ukrainian Helsinki Group; the samvydav journal **Ukrains'kyi visnyk*; the memoirs of D. Shumuk, Ye. Hrytsiak, and Dokia Humenna; and other collections and anthologies. It has also published works in English, such as the pamphlet series Documents of Ukrainian Samvydav, a collection of O. Teliha's poetry (1977), *Women's Voices from Soviet Labor Camps* (1976), *Dissent in Ukraine* (1977), *The Human Rights Movement in Ukraine: Documents of the Ukrainian Helsinki Group, 1976–1980* (1980), *Ethnocide of Ukrainians in the USSR* (1980), and *A Thousand Years of Christianity in Ukraine: An Encyclopedic Chronology* (1988).

The Smoloskyp Ukrainian Information Service was founded in 1967. It has informed the émigré Ukrainian and Western media and public about developments in Ukraine, particularly political repression and the arrest and imprisonment of dissidents. To inform better the Western media and governments, an English-language service was established in 1974 (directed by B. Yasen), a Spanish-language service was established in Buenos Aires in 1975 (directed by O. Yakhno), and the English-language quarterly *Smoloskyp* has been published.

The Smoloskyp Organization for the Defense of Human Rights in Ukraine was founded in 1970 (directed by A. Zwarun and A. Fedynsky). It has distributed leaflets and brochures in English about Ukrainian political prisoners, collected thousands of signatures on petitions protesting their treatment, and submitted them to the United Nations and other international bodies. The organization was a member of Amnesty International and has participated in international conferences on human rights.

O. Zinkevych

Smoloskypy (Torches). A monthly organ of the *Union of Ukrainian Nationalist Youth (SUNM), published in Lviv in 1927–9. It was edited by O. Bodnarovych, and supported the SUNM faction that advocated co-operation with legal Ukrainian political parties in Western Ukraine (particularly the Ukrainian National Democratic Alliance) and open political activity.

Hryhorii Smolsky: *Betrothed Hutsul Woman* (1957)

Smolsky, Hryhorii [Smol's'kyj, Hryhorij], b 2 December 1893 in Pidhirky, Kalush county, Galicia, d 1 February 1985 in Lviv. Painter. He studied at the Novakivsky Art School in Lviv (1923–30) and the Académie Colarossi in Paris (1934–5). He participated in the interwar exhibitions of the Association of Independent Ukrainian Artists, the Ukrainian Art Alliance, and the Lviv Artists' Association. He painted landscapes, particularly of the Hutsul region and Paris (eg, *Notre Dame* [1934] and *Bridge on the Seine* [1935]); portraits, such as *Self-Portrait* (1923), *My Father* (1925), *S. Liudkevych* (1953), *Betrothed Hutsul Woman* (1957), and *V. Stefanyk* (1959); and many Hutsul genre paintings and still lifes. He wrote accounts of his stays in Rome and Paris and the novel *Oleksa Doobush* (1935).

Smolych, Dmytro [Smolyč], b 11 April 1919 in Petrograd, d 28 April 1987 in Kiev. Opera director. After graduating from the Stanislavsky Opera and Drama Studio in Moscow (1941), he served as an opera director (1941–53) and the chief director (1970–87) of the Kiev Theater of Opera and Ballet, a founder and the chief director of the Cheliabinsk Opera and Ballet Theater (1955–8), chief director of the Odessa Opera and Ballet Theater (1958–62), artistic director of the Minsk Opera and Ballet Theater (1962–9), and chief director of the Lviv Theater of Opera and Ballet (1969–70). He staged many Ukrainian, Russian, and other European operas, including G. Bizet's *Carmen* (1947), S. Moniuszko's *Halka* (1949), K. Dankevych's *Bohdan Khmelnytsky* (1954) and *Nazar Stodolia* (1961), Yu. Meitus's *Young Guard* (1955), and O. Sandler's *In the Steppes of Ukraine* (1962).

Yurii Smolych (part of a portrait by Anatol Petrytsky, watercolor and gouache, 1931)

Smolych, Yurii [Smolyč, Jurij], b 7 July 1900 in Uman, Kiev gubernia, d 16 August 1976 in Kiev. Writer and Soviet community activist. He was editor of the journals *Sil's'kyi teatr* (1926–9) and *Universal'nyi zhurnal* (1928–9), a member of the literary organizations *Hart and *Vaplite, and one of the organizers of the Techno-Artistic Group A. Upon the formation of the Writers' Union of Ukraine, he became editor of *Literaturnyi zhurnal* (1934) and headed the Kharkiv branch of the Writers' Union until the Second World War. After the war he lived in Kiev and for some time was editor of the periodical *Ukraina*.

Smolych is known as one of the founders of Soviet Ukrainian prose. His first collection of short stories, *Kinets' mista za bazarom* (*The City End beyond the Bazaar*, 1924), was followed by the collections *Nedili i ponedilky* (*Sundays and Mondays*, 1927) and *Pivtory liudyny* (*One and a Half Persons*, 1927). His prose from the 1920s is characterized by searching and experimentation with form, by originality and strong plots. Smolych pioneered the Soviet Ukrainian fantasy novel with *Ostannii Eidzhevud* (*The Last of the Edgewoods*, 1926), and continued to develop this genre in the trilogy *Hospodarstvo doktora Hal'vanesku* (*The Property of Doctor Galvanescu*, 1929), *Shche odna prekrasna katastrofa* (*Another Beautiful Catastrophe*, 1932), and *Shcho bulo potim* (*What Happened Next*, 1934).

From the late 1920s, the satirical novel, which was mainly directed against the Ukrainian liberation struggle and the Ukrainian national-minded intelligentsia, began to be an important genre in Smolych's work (*Fal'shyva Mel'pomena* [*The False Melpomene*, 1928], *Po toi bik sertsia* [*On the Other Side of the Heart*, 1930]). His satirical novels were also directed against people of the capitalist world and their reactions upon coming into contact with the Soviet regime, portrayed according to the image of them projected in the Soviet press (*Sorok visim hodyn* [*Forty-Eight Hours*, 1933]). Among Smolych's better works from the second half of the 1930s is an autobiographical trilogy, set in the era of the childhood and youth of his generation: *Nashi tainy* (*Our Secrets*, 1936), *Dytynstvo* (*Childhood*, 1937), *Visimnadtsiatylitni* (*The Eighteen-year-olds*, 1938). During the Second World War, Smolych published several collections of short stories (*Narod voiuie* [*The People are Fighting*, 1941], *Noveli* [*Novellas*, 1942], and others). The novel *Vony ne proishly* (*They Did Not Get Through*, 1946) is also on the subject of war.

In the 1950s, Smolych turned to the events of the Ukrainian-Soviet War in *Svitanok nad morem* (*Dawn by the Sea*, 1956) and in the two-part novel *Myr khatam, viina palatam*

(Peace to [Peasant] Houses, War on Palaces, 1958) and *Reve ta stohne Dnibr shyrokyi* (The Broad Dnieper Roars and Groans, 1960). These latter works are publicistic novels or political pamphlets on the history of the UNR and its activists, and their literary merit is overshadowed by the grotesque style of political propaganda.

One of Smolych's greatest literary achievements is the memoir trilogy *Rozpovid' pro nespokii* (A Tale of Unrest, 1968), *Rozpovid' pro nespokii tryvaie* (The Tale of Unrest Continues, 1969), and *Rozpovid' pro nespokii nemaie kintsia* (The Tale of Unrest Has No End, 1970), in which he described literary life in Kharkiv in the 1920s and 1930s. Smolych also wrote publicistic political pamphlets directed against Ukrainian nationalism (*Vorohy liudstva ta ikh naimantsi* [The Enemies of the Human Race and their Hirelings, 1953]) and popular literary criticism: *Persha knyha* (The First Book, 1951) and *Rozмова z chytachem* (Conversation with the Reader, 1953). His collected works have been published in six volumes twice (1958–9 and 1971–3), and in seven volumes (1984). In the role of community activist, Smolych participated in the activities of the Writers' Union of Ukraine, and for many years he headed the *Ukraina Society. In 1970, Smolych was decorated with the highest award of the USSR, Hero of the Soviet Union, mainly for his activities in the society, whose work was directed against Ukrainian émigré groups.

I. Koshelivets

Smorhachova, Liudmyla [Smorhačova, Ljudmyla], b 29 November 1950 in Kiev. Ballet dancer. In 1968 she completed study at the Kiev Choreography School and joined the Kiev Theater of Opera and Ballet as leading ballerina. In 1978 she won the first prize gold medal at the Second International Ballet Competition in Tokyo.

Smotrych, Oleksander [Smotryč] (pen name of Oleksander Floruk), b 28 April 1922 in Kamianets-Podilskyi. Writer. During the Second World War he worked as a journalist for the nationalist papers *Ukrains'ke slovo* (Kiev) and *Holos* (Berlin). As a postwar refugee in Germany and, since the late 1940s, Toronto he wrote the story collections *Nochi* (Nights, 1947), *Vony ne zhyvut' bil'she* (They Are No Longer Alive, 1948), *Vybrane* (Selections, 1952), and *Buttia: 16 nikomu nepotribnykh opovidan'* (Being: 16 Stories Nobody Needs, 1973). Having switched to poetry, he published on his own nine booklets of satirical and provocative poems titled *Virshi* (Verses, 1974–5) and the collections *20 korotkykh virshiv* (20 Short Verses, 1975) and *1933* (1975). A lyrical collection, *Uzhynok* (The Reaping, 1985), was published by Suchasnist. His stories and poems have appeared in *Novi dni*, *Suchasnist'*, and other émigré periodicals.

Smotrych [Smotryč]. v-7. A town smt (1986 pop 3,000) on the Smotrych River in Dunaivtsi raion, Khmelnytskyi oblast. It was first mentioned in historical documents in the 1370s. In 1448 it was granted the rights of *Magdeburg law. Since the 18th century Smotrych has developed a rep-

utation for ceramic art. On 22 July 1919 a battle between the UNR and the Bolshevik armies took place there. In 1923–62 the town served as a raion center.

The Smotrych River

Smotrych River [Smotryč]. A left-bank tributary of the Dniester River that flows southward for 168 km through Khmelnytskyi oblast and drains a basin area of 1,800 sq km. With a width of 10–15 m (40 m at its widest point), the river is particularly notable for its tall banks, which give it a ravelike appearance. It is used for water supply, irrigation, and fishing. A small hydroelectric station is situated on it, as well as the city of Kamianets-Podilskyi and the town of Horodok.

Smotrytsky, Herasym [Smotryc'kyj], b ? in Smotrych (now in Dunaivtsi raion, Khmelnytskyi oblast), d October 1594. Writer and teacher. He was secretary at the Kamianets-Podilskyi county office and in 1576 was invited by Prince K. *Ostrozky to Ostrih, where he became one of the leading activist members of the Ostrih intellectual circle. In 1580 Smotrytsky became the first rector of the Ostrih Academy. He was one of the publishers of the Ostrih Bible, to which he wrote the foreword and the verse dedication to Prince K. Ostrozky. The dedication is one of the earliest examples of Ukrainian versification (nonsyllabic) and is somewhat reminiscent of Ukrainian dumas. Smotrytsky's polemical works against those betraying the Orthodox faith and a satire on the clergy have been lost. Only his book, *Kliuch tsarstva nebesnoho* (Key to the Heavenly Kingdom, 1587), which is the first printed example of Ukrainian polemical literature, has survived. It is composed of a dedication to the prince of Ostrih, the appeal 'Do narodov ruskykh ...' (To the Rus' Peoples ...), and two polemical treatises, 'Kliuch tsarstva nebesnoho ...' (Key to the Heavenly Kingdom ...) and 'Kalendar rymskyi novyi' (The New Roman Calendar). In the last-named Smotrytsky calls for the independence of 'the Rus' faith,' polemicalizes with the Jesuit B. Herbest, criticizes the Catholic teaching on the divine origin of the pope's authority, and rejects the Gregorian calendar. Smotrytsky did not always use theological arguments in his work; instead he often used folk humor with anecdotes and proverbs, and he wrote in a language close to the vernacular, which made his work accessible to the broad masses.

I. Koshelivets

Smotrytsky, Meletii [Smotryc'kyj, Meletij] (secular name: Maksym), b 1577 in Smotrych (now in Dunaivtsi raion, Khmelnytskyi oblast), d 27 December 1633 at the

Archbishop Meletii Smotrytsky

Gen Kost Smovsky

Derman Monastery, Volhynia. Philologist, churchman, and polemicist; son of H. Smotrytsky. He studied at the Ostrih Academy; the Jesuit college in Vilnius; and, from 1605, in Leipzig, Nuremberg, and Wittenberg. In 1608, he returned to Vilnius to teach at the Orthodox brotherhood school. There he wrote (in Polish) his famous defense of the Orthodox church, *Trenos, to iest lament iedyney s. powszechnej apostolskiej wschodniej cerkwie* (Threnos, or the Lament for the One Holy Universal Apostolic Eastern Church, 1610). He entered the Holy Spirit Monastery in Vilnius in 1617 and published a *didactic gospel. He is believed to have served as a professor and rector of the Kiev Epiphany Brotherhood School in 1618–20. In 1620 he was consecrated archbishop of Polatsk by Patriarch Theophanes of Jerusalem. During the next three years he wrote several polemical tracts, including *Verificacia niewinności* (A Verification of Innocence, 1620) and *Oborona verificacii* (A Defense by Verification, 1621), justifying the re-establishment of the Orthodox hierarchy by Theophanes and defending the Orthodox against charges of collusion with the Moslems and Muscovites (see also *polemical literature). Smotrytsky travelled to Constantinople and the Holy Land, and after his return he joined the Uniate church, in 1627, and entered the Derman Monastery (some scholars believe he may have converted secretly earlier). In 1627–8 he negotiated with Y. Boretsky and P. Mohyla in an attempt to re-create a united Ruthenian church in union with Rome but under its own patriarch. In preparation for the discussions, he wrote *Apologia peregrinatii do kraioń wschodnich* (Apology for the Peregrination to Eastern Lands, 1628). When the negotiations failed, Smotrytsky was condemned at the Orthodox church synod in Kiev in 1628 and forced to recant his conversion to Catholicism. Subsequently he returned to the Derman Monastery.

Smotrytsky's most significant contribution to philology was *Grammatiki slavenskiia pravilnoe syntagma* (The Correct Syntax of Slavonic Grammar, 1619; reprinted in 1974 with an introduction by O. Horbach [Horbatsch]). This work influenced the form of the Church Slavonic used in Ukraine, Russia, Rumania, Serbia, and Croatia, and several subsequent editions were published. A shortened version, for use as a school textbook, appeared in Kremianets in 1638. Smotrytsky's grammar has been extensively studied by Ukrainian, Russian, and German linguists. Facsim-

ile reprints of most of his collected works were published in 1987 in two volumes introduced and edited by D. Frick.

O. Horbach

Smovsky, Kost [Smovs'kyj, Kost'], b 21 May 1892 in Poltavaska *stanytsia*, Kuban, d 8 February 1960 in Minneapolis. UNR Army officer. After joining the UNR Army in 1917, he commanded a number of its best units: an artillery battery of the Haidamaka Battalion, which distinguished itself in suppressing the Bolshevik insurrection in Kiev (January 1918); the Black Sea Artillery Regiment (1919); the Lubni Cavalry Regiment; the Tenth Artillery Regiment of the Graycoats, during the First Winter Campaign (1919–20); and the First Cavalry Brigade of the Separate Cavalry Division (1920). He was promoted to the rank of brigadier general. His recollections about the wars for Ukraine's independence were published in *Svoboda* in 1958.

Smt. See Urban-type settlement.

Smyk, Oleksander, b 1900 in Nekhvoroshcha, Konstantynohrad county, Poltava gubernia, d 1942 in Kiev. Architect. After graduating from the Kiev State Art Institute in 1928, he worked for various planning and construction agencies in Kiev and taught architecture at the Kiev State Art and Civil-Engineering institutes (1929–41). He designed (with A. Dobrovolsky) the Roads Administration building in Luhanske in 1935 and residential buildings in Kiev. His style displayed elements of classical architectural forms as well as distinctively Ukrainian features.

Peter Smylski

Smylski, Peter [Smyl's'kyj, Petrol], b 15 April 1915 in Dauphin, Manitoba. Stomatologist and community activist. A graduate in dentistry from the University of Alberta (1940), he served in the Dental Corps of the Canadian army (1943–6), specialized in dental surgery, and was a professor at the University of Toronto (1965–80) and head of the oral surgery division at the Toronto General Hospital. He has been president of the Ukrainian Canadian Vet-

erans' Association and chairman of the board of directors of the St Vladimir Institute in Toronto.

Smyrnov, Mykola, b 21 January 1912 in Kharkiv, d 4 October 1963 in Donetsk. Stage director and actor. He completed study at the Kharkiv Music and Drama Institute (1933) and then worked in the Donetsk Ukrainian Music and Drama Theater (1933–41, and 1949–63 as principal stage director).

Oleksandra Smyrnova-Zamkova

Smyrnova-Zamkova, Oleksandra, b 31 May 1880 in Pereiaslav, Poltava gubernia, d 22 September 1962 in Kiev. Pathologist and anatomist; full member of the AN URSS (now ANU) from 1951. A graduate of Montpellier University in France (1905), she taught at the Higher Medical Courses for Women (1908–20), the Kiev Medical Institute (1920–30), and the ANU Institute of Clinical Physiology (1931–53, department head from 1938). She also headed the Department of Pathological Anatomy at the Second Kiev Medical Institute (1933–41) and the morphology laboratory at the ANU Institute of Physiology (1953–62). She published numerous works, of which the most important dealt with the pathological anatomy of infectious diseases, radiation sickness, and the origins of tumors. She wrote *Osnovnoe argyrophil'noe veshchestvo i ego funktsional'noe znachenie* (The Basic Argyrophilic Substance and Its Functional Significance, 1955).

Snake (Ukrainian: *zmiia, hadiuka, vuzh*). Any of numerous limbless, scaled reptiles of the order Squamata, related to lizards, divided into the suborders Serpentes and Ophidia and, further, into the poisonous family Viperidae and the harmless family Colubridae. In Ukraine there are only two species of poisonous snakes, the common viper (*Vipera berus*), found in Polisia and the forest-steppe, and the steppe viper (*V. ursini*). A subspecies of the steppe viper is also found in the Carpathians. Viper bites incapacitate but are not life-threatening to adult humans. The nonpoisonous snakes include the common or grass snake (*Natrix natrix*) and the water snake (*N. tessellata*).

Snapdragon (*Antirrhinum*; Ukrainian: *rotyky, l'ovyni pashchi*). A herbaceous plant of the family Scrophulariaceae. Two species are known in Ukraine, wild snapdragons (*A. oronchium*), which grow as weeds in the fields and occasionally in brushwood, and multicolored garden snapdragons (*A. majus*), which are cultivated as decorative flowers.

Snapweed (*Impatiens*; Ukrainian: *rozryv-trava, balzamin*). A herbaceous plant of the family Balsaminaceae, of which there are about 400 species worldwide. In Ukraine *I. parviflora* (introduced from Mongolia) and *I. nolitangere* (touch-me-not) grow naturally in shady forests and ravines and near springs and orchards in Polisia, in the forest-steppe, and in the Carpathian Mountains. Orchard snapweed or garden balsam (*I. balsamina*) and *I. roylei* are cultivated as ornamentals. In folklore snapweed figures as a magic herb with powers to break chains, open locks, and so on.

The main street in Sniatyn

Sniatyn [Snjatyn]. v-6. A city (1989 pop 10,300) on the Prut River and a raion center in Ivano-Frankivske oblast. It was first mentioned in a historical document in 1158, as a fortified town in Halych principality. From 1387 it was under Polish rule. In 1448 it was granted the rights of Magdeburg law, and by the 16th century it had developed into an important trade center. After the partition of Poland in 1772, it was annexed by Austria, and in 1919 it fell under Polish rule. In 1939 it became part of the Ukrainian SSR. Today Sniatyn manufactures furniture, cheese, bricks, and reinforced concrete. It has two literary memorial museums, one dedicated to M. Cheremshyna and the other to V. Kasian.

Sniehirov, Yevhen [Snjehir'ov, Jevhen] (Helii), b 14 October 1927 in Kharkiv, d 28 December 1978 in Kiev. Writer and dissident. He graduated from the Kharkiv Theater Institute and worked as an actor, a lecturer in Ukrainian literature in secondary schools and at the institute, a member of the editorial board of *Literaturna Ukraina*, and director at the Kiev Studio of Chronicle-Documentary Films. His first published work appeared in 1954, when he began working as a prose writer and critic. He published a collection of stories, *Lito vernet'sia* (Summer Will Return, 1957), a novel, *Chy ia mav pravo?* (Did I Have the Right?, 1962), and a satire cowritten with Yu. Lubotsky, *Zoloty buty* (The Golden Boot, 1963). Continued repressions and Russification in Ukraine prompted him to join the Ukrainian dissident movement in the 1970s. For doing so he was expelled from the Party and the Writers' Union of Ukraine in 1974. He then began writing letters of protest to the leaders of the USSR, in which he renounced his Soviet citizenship. He also wrote a work circulated by samvydav (1974–7), alternately titled *Naboï dlia rozstrilu* (Bullets

Yevhen Sniehirov

Bishop Ivan Snihursky

for Execution) and *Nen'ko moia, nen'ko* (Oh, Mother of Mine, Mother). In it he denounces the show-trial of the so-called *Union for the Liberation of Ukraine in Kharkiv as a state provocation which brought about the destruction of the Ukrainian intelligentsia in the 1930s. On 22 September 1977 he was arrested. On 31 March 1978 he fell gravely ill and was taken from prison to a hospital, where he died.

The most complete collection of his samvydav writings was published as *Naboi dlia rozstrilu* (New York-Toronto 1983). It includes the aforementioned work, the satirical story *I choho oto ia liapaiu* (And Why Am I Babbling?, 1977), an account of his prison experiences, fragments of prose and verse, and recollections about him written by others. In 1990 *Naboi dlia rozstrilu* was republished in Ukraine, and Sniehirov was posthumously reinstated as a member of the Writers' Union of Ukraine.

I. Koshelivets

Snihur, Luka, b 1846 in Pohar, Stryi circle, Galicia, d 1928. Builder and wood carver. He built about 35 wooden village churches in Galicia, including those in Rosokhach (1882), Oriava (1882), Husne Vyzhne (1890), Matkiv (1899), Kryve (1922), and Klymets (1925). They are distinguished by their fine construction and original form. He also carved the iconostases in the churches of Kryve, Radych, and Dovzhky.

Snihurivka. VI-13. A city (1989 pop 18,000) on the Inhulets River and a raion center in Mykolaiv oblast. It was founded in 1812 and granted city status in 1961. Today it is an administrative and agricultural city. Its plants manufacture reinforced-concrete products and dairy products, bottle mineral water, and repair machinery. The main pumping stations of the Inhulets and the Yavkyne irrigation systems are located in Snihurivka.

Snihursky, Ivan [Snihurs'kyj], b 8 May 1784 in Berestiany, Sambir circle, Galicia, d 24 April 1847 in Peremyshl. Church and cultural leader. He studied theology in Vienna (to 1808) and then was pastor at St Barbara's Church there (1808-13) and a professor of theology and dean of the faculty (1817-18) at the University of Vienna. In 1818 he was consecrated bishop of Peremyshl. As bishop he revived the eparchial theological seminary and founded a valuable library and a publishing house. Under his patronage I. Lavrivsky and I. Mohylnytsky organized a comprehensive educational system that by 1832 included almost 400 schools. From 1824 to 1833 Snihursky also

served as principal of the Peremyshl Polish gymnasium. Yu. Zhelakhovsky published a biography of Snihursky in 1894 in Lviv.

Snip (The Sheaf). A literary almanac published in Kharkiv in 1841. Edited by O. Korsun, it contained M. Kostomarov's play *Pereiaslavs'ka nich* (Pereiaslav Night) and his translation of five of Byron's *Hebrew Melodies*; poems by M. Petrenko; poetry and fables by S. and P. Pysarevsky and O. Korsun (including his translations of five Czech poems); P. Korenytsky's satirical poem 'Vechernytsi' (Evening Parties); and the first Ukrainian translation of a poem by Petrarch, by M. Pysarevska.

Snip (1912-13)

Snip (The Sheaf). A weekly newspaper published by M. Mikhnovsky in Kharkiv from January 1912 to January 1913 (a total of 52 issues). Edited by M. Bilenky, it promoted Ukrainian patriotism among the intelligentsia and was one of the first newspapers to advocate separation of Ukraine from Russia. Among the contributors were I. Franko, L. Pakharevsky, M. Kononenko, and T. Zhoralsky.

Snitko, Oleh, b 30 April 1928 in Kiev, d 14 April 1990 in Kiev. Solid-state physicist; AN URSR (now ANU) corresponding member from 1968 and full member from 1985. After graduating from Kiev University (1951) he investigated the properties of semiconductors at the ANU Institute of Physics in Kiev. He joined the ANU Institute of Semiconductors in 1961 and served as a department head (from 1962), a deputy director (1967-70), and director (from 1970). Snitko's primary contribution comes from his investigation of electronic processes on hyperpure semiconductor surfaces. He is author of 250 publications (5 monographs) and has a number of inventions.

Snizhne [Snižne]. V-19, DB III-5. A city (1990 pop 69,000) under oblast jurisdiction in Donetsk oblast. It was founded in 1784 and was known as Vasylivka village until 1864. It belonged to the Don Cossack province. In 1900 anthracite coal began to be mined there, and thereafter the town grew quickly (1939 pop 16,200). In 1938 it attained city status. Today it has seven coal mines, a chemical machinery building plant, a machine repair factory, and several enterprises of light industry.

Snov River. A right-bank tributary of the Desna River that flows for 253 km through Briansk oblast (RF) and Chernihiv oblast and drains a basin area of 8,700 sq km. The river is 4-14 m wide in its upper reaches and 20-40 m

wide downstream (at one point reaching 200 m). The Snov is frozen over from late November to early April. It is used for water supply and irrigation. Its lower reaches are navigable.

Snovske. See Shchors.

Snowberry (*Symphoricarpos*; Ukrainian: *snizhnoiahidnyk*). A shrub belonging to the family Caprifoliaceae, with bell-shaped, pinkish or white flowers and two-seeded berries. Three species are cultivated in Ukraine as ornamentals in parks and orchards, snowberry or waxberry (*S. albus*), Indian currant or coralberry (*S. orbiculatus*), and wolfberry (*S. occidentalis*).

Snowdrop (*Galanthus*; Ukrainian: *pidsnizhnyk*). Bulbous, white-flowered plants of the family Amaryllidaceae. Two species are found in Ukraine, common snowdrop (*G. nivalis*), which grows in deciduous forests, in brushwoods on the right bank of the Dnieper River, and in Carpathian meadows and is listed as an endangered species in Ukraine, and the folded snowdrop (*G. plicatus*), native to Crimean forests. The name *pidsnizhnyk* is also commonly used for *Scilla sibirica*, *Hepatica nobilis*, and *Anemone nemorosa*.

Zenon Snylyk

Snylyk, Zenon, b 14 November 1933 in Putiatyntsi, Rohatyn county, Galicia. Journalist and athlete. A graduate of the universities of Rochester and Chicago (MA, 1958), Snylyk was a member of the US soccer team in the 1956, 1960, and 1964 Olympic Games – the only player in US soccer history to appear on three Olympic teams – and served as team captain in 1956 and 1960. He also played on and/or captained US teams in three Pan-American games and one World Cup series. He taught political science briefly at McGill University in Montreal before becoming chief editor of *The Ukrainian Weekly* in 1962. He served in that capacity until becoming chief editor of the newspaper **Svoboda* in 1980. Snylyk was also an assistant editor of *Ukraine: A Concise Encyclopaedia*, vol 2.

Snyna (Slovak: Snina). V-3. A town (1970 pop 10,000) in the Chirokha River Valley in the Prešov region of Czechoslovakia. It is on the border of Ukrainian ethnic territory. In 1961 there were 44 Ukrainian villages, with a total population of 25,000, in its vicinity.

Soaring or gliding (*shyriannia*). The sport of soaring in Ukraine began with the pioneering efforts of K. Arzeulov, Yu. *Tereverko, and M. Delone. Arzeulov, who was of Armenian descent, built and flew a glider in the Crimea in 1906, and in 1916 he made aviation history by being the first pilot to master the intentional spin. In 1908–9 Delone, a mechanics professor at the Kiev Polytechnical Institute, directed the construction of several versions of the Chanutte glider, which were successfully flown near the village of Dzvinkove in Kiev county. In 1910 he published a pamphlet on how to build and fly a glider. Tereverko was the first to fly with a passenger.

By the early 1920s glider building and flying had attracted many enthusiasts, among them S. *Korolov, the chief designer of the Soviet space program, and the aircraft designer O. *Antonov. Antonov's record-setting glider A-9 and his all-metal gliders A-11, A-13, and A-15 played an important role in the development of gliding in the USSR. Dozens of glider clubs sprang up throughout Ukraine. The most prominent were at the Kiev Polytechnical Institute, the Kiev School for Glider Instructors, the Kharkiv Aviation School, and the Odessa branch of the Aviation Society of Ukraine and the Crimea, at which S. Korolov designed and built his K-5 glider in 1924. From 1923, annual gliding competitions were held near the village of Koktebel, in the Crimea; in 1944 Koktebel was renamed Planerske (from *planer* 'glider'), and in 1970 a soaring museum was founded there. In 1925, Soviet Ukrainian pilots participated in the sixth international competition on the Wasserkuppe, a hill in the Rhön Mountains of Germany; one of them (V. Yakovchuk) placed third in the duration category, with a flight of 91 minutes. As a sport, gliding gained great popularity in the USSR in the 1930s, and Soviet pilots established several world records.

Interwar Western Ukraine. S. Chervinsky of Volhynia designed and built a biplane glider and made successful flights in 1917 in the Crimea. After the First World War he returned to Kovel and built an open-frame monoplane glider in which he made several flights in 1927. In the late 1920s, groups of enthusiasts in Dubno, Volhynia, and Zbarazh, Galicia, designed and built gliders. The first true soaring flight in Galicia was made at the Lysa Hora site, near Zolochiv, in 1928 by S. Grzeszczyk.

The most active gliding center in Galicia was the Aviation Association of Students at the Lviv Polytechnical Institute. Founded under Austrian rule in 1903, it was revived under Polish rule in 1923, and contributed significantly to advances in glider design and flight in interwar Galicia. Over 400 gliders and sailplanes were built in its government-supported workshops in the 1930s; many were exported, and several were used in Polish- and world-record flights. The last ISTUS (International Study Commission for Motorless Flight) conference and glider competition before the Second World War was held in Lviv in May 1939.

Postwar Ukraine. After the Second World War, gliding in Ukraine flourished for about two decades. In 1952 the Ukrainian pilot V. Yefymenko established a new world flight record of 636 km (it has since been surpassed) in the glider A-9. In the 1972 world championships in Yugoslavia, the Ukrainian pilot Ye. Rudensky placed second in the standard class. Ukrainians who placed high in Soviet championships are V. Honcharenko, Z. Solovei, and M.

Verytennykov. Gliding in Ukraine, and in the USSR as a whole, has been conducted under the patronage of various paramilitary defense organizations; in 1951 they were amalgamated into the *Voluntary Society for Assistance to the Army, Air Force, and Navy (DOSAAF). Because gliding could not be practiced in the USSR outside the framework of the DOSAAF, it was wholly contingent on government support. Since the 1970s, when relatively expensive fiberglass construction became the norm for high-performance sailplanes, Soviet metal-and-wood gliders ceased to be competitive on the world level. At the world championships in Austria in 1989, Soviet pilots flew sailplanes built in the West, but did not do well. Inside the USSR gliding, as a paramilitary sport, remained as popular as ever. From the 1970s it relied heavily on Czech, Polish, and Lithuanian gliders and sailplanes. Some of the more active soaring centers in Ukraine are Buzova (30 km W of Kiev), Borodianka (55 km NW of Kiev), Kamenka (10 km NW of Dnipropetrovske), Sutysky (45 km S of Vinnytsia), and Voronovo (55 km W of Rivne).

Sob River. A left-bank tributary of the Boh River that flows southward for 115 km through Vinnytsia oblast and drains a basin area of 2,840 sq km. The river originates in the Dnieper Upland; it is 3-5 m wide near its source and 60-80 m wide downstream. It supplies water for industrial and agricultural purposes and feeds a hydroelectric station. It is also used for pisciculture. The city of Haisyn is situated on it.

Hanna Sobachko-Shostak: *Whirlwind* (wall decoration in gouache and watercolor, 1920)

Sobachko-Shostak, Hanna [Sobačko-Šostak), b 15 December 1883 in Skoptsi (now Veselynivka), Pereiaslav county, Poltava gubernia, d 3 December 1965 in Cherkizovo, Moscow oblast. Master of folk decorative painting. In 1910 she began painting embroidery and kilim patterns in

A. Semigradova and E. Pribilskaia's folk-art workshop in Skoptsi. From 1932 she lived in exile in Cherkizovo and designed embroidery patterns for the local cloth factory. Her decorative paintings, with floral and faunal motifs, are distinguished by their dynamic composition, asymmetry, and use of intense colors. Sobachko's work was exhibited in Kiev (1913, 1919, 1963, 1965), St Petersburg (1913), Moscow (1915, 1927, 1936), Paris (1913, 1937), Berlin (1914, 1922), and New York (1939). A book about her by H. Miesticchkin was published in Kiev in 1965.

Sobachky archeological site. A Neolithic settlement near Zaporizhia. The site was excavated in 1928-9, then flooded by the Kakhivka Reservoir. Uncovered in the course of excavations were dwellings with stone hearths, stone and bone tools, handmade pottery with imprinted geometric designs, and granite polishing stones. The inhabitants engaged primarily in fishing.

Sobkivka settlement. A late Bronze Age *Bilohrudivka culture settlement near Sobkivka, Uman raion, Cherkasy oblast. Excavations in 1951-2 revealed dwellings, a large number of ash pits, handmade pottery (with some imprinted designs), flint tools, and bronze adornments. The settlement's inhabitants engaged in agriculture, animal husbandry, hunting, and fishing.

Sobko, Petro, b 30 May 1819 in Kiev, d 26 November 1870 in St Petersburg. Civil engineer. He studied and taught at the Engineers' Corps Institute in St Petersburg. He designed (1839-40) a suspension bridge over the Neva River and introduced steel components in wooden bridge trusses. He initiated the first course on building mechanics in the Russian Empire and set up one of the first laboratories in that field. He was a specialist in railroad construction and held an important position in the St Petersburg-Warsaw Railroad Co. He wrote a number of handbooks and textbooks on structural mechanics and railroad engineering.

Vadym Sobko

Sobko, Vadym, b 18 May 1912 in Moscow, d 12 September 1981 in Kiev. Prose writer and playwright. He graduated from the philological faculty of Kiev University in 1939. He began to publish his work in 1930. He published the poetry collections *Pohliad vpered* (Looking Ahead, 1932), *Traktorobudni* (Tractor Days, 1932), and *Mii tovarysh* (My Friend, 1933), and the narrative poem *Mikron* (Mi-

cron, 1934), among others. Sobko published collections of short stories, including *Montazhnyky* (The Assemblers, 1931) and *Liudy ryshtovan'* (People of Scaffolding, 1933). He achieved some measure of popularity with his adventure novels *Hranit* (Granite, 1937) and *Kreizer* (Cruiser, 1940). He wrote the novel trilogy *Shliakh zori* (Path of the Star), with the parts titled *Krov Ukraïny* (The Blood of Ukraine, 1943), *Kavkaz* (The Caucasus, 1946), and *Vohon' Stalinhradu* (The Fire of Stalingrad, 1947), which was based on the events of the Second World War. The play *Zhyttia pochynaiet'sia znovu* (Life Begins Anew, 1950) and the novel *Zaporuka myru* (Guarantee of Peace, 1950) deal with postwar life in Germany. Sobko's various other works discuss reconstruction and moral issues; among them are *Bile polum'ia* (White Flames, 1952), *Zvychaine zhyttia* (Ordinary Life, 1957), the play *Kyïvs'kyi zoshyt* (A Kievan Notebook, 1964), and works on youth issues and sports themes, such as the novel *Stadion* (Stadium, 1954). His selected works have been published as *Vybrani tvory v dvokh tomakh* (Selected Works in Two Volumes, 1954) and *Tvory* (Works, vols 1–4, 1979–81).

I. Koshelivets

Sobol, Mykola [Sobol'], b 19 February 1910 in Velyka Rublivka, Okhtyrka county, Kharkiv gubernia. CPU and Soviet government leader and mechanical engineer. A graduate of the Kharkiv Mechanical and Machine-Building Institute (1936), he directed the Kharkiv Machine-Building Plant (1954–8), headed the Kharkiv Economic Region's Council of the National Economy (1958–60) and the Ukrainian Council of the National Economy (1960–1), and served as first secretary of the Kharkiv Oblast Party Committee (1961–3), second secretary and member of the CPU Politburo (1963–6), first deputy premier of the Ukrainian SSR (1966–72), and a CC CPSU member (1961–71).

Sobol, Naum [Sobol'], b April 1898 in Kodyma, Balta county, Podilia gubernia, d 10 October 1967 in Kharkiv. Scenery designer. He studied in Yu. Bershadsky's private school in Odessa (1916–20). A member of the Association of Revolutionary Art in Ukraine, he created scenery for the Kharkiv Theater of Musical Comedy, the Kharkiv Russian Drama Theater, and the Lviv Theater of Opera and Ballet (eg, L. Minkus's *Don Quixote*, 1939).

Sobol, Oleksander [Sobol'], b 13 January 1909 in Biały-stok, Poland. Ballet dancer and pedagogue. In 1925 he completed study in the ballet studio at the Kharkiv Theater of Opera and Ballet, and in 1933 at the Moscow Choreography School. He was a soloist in the Kharkiv Theater of Opera and Ballet (1933–5), the Moscow Bolshoi Theater (1935–9), and the Moscow and Warsaw musical theaters (1945–61). In 1960–77 he taught in the choreography schools in Moscow, Warsaw, Łódź, and Szczecin.

Sobolev, Feliks, b 25 July 1931, d 20 April 1984 in Kiev. He completed study in the actor's (1953) and director's (1959) faculties in the Kiev Institute of Theater Arts and then worked for the Kiev Studio of Scientific-Popular Films. His film *Mova tvaryn* (The Language of the Animals, 1967) won a prize at an international film festival in Leipzig in 1969. Other films are *Ia i druihyi* (I and Another, 1971), *Biosphere* (1973), *Koly shchезaiut' bar'ieri* (When Bar-

riers Disappear, 1980), and *Kyïvs'ka symfoniia* (Kievan Symphony, 1982).

Sobolevsky, Aleksei [Sobolevskij, Aleksej], b 7 January 1857 in Moscow, d 24 May 1929 in Moscow. Russian Slavist, linguist, paleographer, and folklorist; member of the Russian (later USSR) Academy of Sciences from 1893. A graduate of Moscow (1878, 1881) and Kharkiv (PH D, 1884) universities, he taught at the universities of Kiev (1882–8) and St Petersburg (1888–1908). A specialist in Old Church Slavonic and the history of the Russian language, he defended the Russian chauvinist concept of a single Russian language divided into a 'Great Russian' (including Belarusian) and a 'Little Russian' (ie, Ukrainian) dialect. In his books of essays (1884) and lectures (1888, 1891, 1903, 1907) on the history of the Russian language, he described the phonetic features of numerous 12th- to 15th-century manuscripts written in Ukraine. He described them tentatively as 'Galician-Volhynian' and maintained that 'Great Russian' was spoken at that time in Kiev and Chernihiv. In an article on the 'ancient Kievan dialect' (1905) he explained the presence of Galician-Volhynian features in those manuscripts, as well as in the modern northeastern Ukrainian dialects, as the result of 'in-migration' of Galicians and Volhynians after the Mongol invasion and the northward 'out-migration' of the indigenous 'Russian' population. Sobolevsky's revival of the theories of M. *Pogodin led to a polemic with P. Zhytetsky, K. Mykhalchuk, A. Pypin, A. Shakhmatov, V. Jagić, and A. Krymsky, who wrote a detailed response (five articles in *Kievskaiia starina*, 1898–9). He was the most important contributor to the historical dialectology of the East Slavic languages. In his books on Russian dialectology (1890, 1911) and in an article on the 'Little Russian dialect' (1892), he divided the Ukrainian dialects into archaic northern (including archaic Carpathian) and southern groups. In his etymologies of ethnonyms, hydronyms, toponyms, anthroponyms, and contemporary place-names and surnames in Ukraine and Eastern Europe, he often suggested uncritically a derivation from the Scythian and Sarmatian languages.

O. Horbach

Sobolevsky, Hryhorii [Sobolevs'kyj, Hryhorij], b 1741 in Hlukhiv, Nizhen regiment, d 16 January 1807. Medical botanist and pharmacologist. A graduate of the school of the St Petersburg General Army Hospital in 1761, he studied in Paris and Leiden, and completed a doctoral dissertation in 1775. He practiced medicine and taught botany in St Petersburg and was director of the botanical garden (from 1779) and a professor of botany (from 1796) at the medical college there. He built a large botanical, mineralogical, and zoological collection and a sizable library. His most important work was a catalog of plants in the St Petersburg region (1796–9).

Soboliev, Dmytro [Soboljev] (Sobolev, Dmitrii), b 6 August 1872 in Khripeli, Kostroma gubernia, Russia, d 16 March 1949 in Kharkiv. Geologist. He graduated from Warsaw University in 1899. He then became a professor at Kharkiv University (1914) and chaired its geology department (1922). He conducted research on the Devonian deposits of the East European Platform and the geological

structure, paleontology, tectonics, and geomorphology of Ukraine. He was one of the first to assert, in 1933, the presence of petroleum deposits in the Dnieper-Donets Trough.

Participants of the first sobor of the Ukrainian Autocephalous Orthodox church (October 1921)

Sobor. A formal gathering or council of bishops, church officials, and monastic and lay representatives morally representing the whole particular church and dealing with matters of faith, morality, rite, and canonical and cultural life. The term is derived from the Church Slavonic word for an assembly. The sobor is distinguished from the *synod, which is usually an assembly of bishops. From the earliest days of the Christian church, councils were convened as a means of deciding matters related to church life and policy. The development of a full church infrastructure led eventually to the existence of several types of sobors reflecting different ecclesiastical jurisdictions. These include ecumenical (*vselenskyi*), particular (*pomisnyi*), provincial (*provintsiinyi*), eparchial (*eparkhiialnyi*), and minor (*soborchyk*) sobors.

The ecumenical sobor is a general council of the whole church; it brings together the church hierarchy of the whole Christian world to resolve fundamental matters of faith, morality, and ecclesiastical discipline. According to the Orthodox teaching, only seven ecumenical sobors of the Christian church have been convoked (between 325 and 787). Since the split into the Catholic and Orthodox churches, Catholics have continued to hold ecumenical sobors (8th–21st), convoked by the pope, which are not recognized but are occasionally attended by the representatives of the Orthodox church. The particular sobor brings together the clergy (occasionally the laity as well) of a particular church; it is presided over by the head of the particular or autocephalous church (ie, a patriarch, major archbishop, or metropolitan). The decisions of the sobor are binding on all the members of the particular church, although in the case of Ukrainian Catholics the decisions must first be approved by the pope.

Sobors are also held within specific ecclesiastical jurisdictions. Provincial sobors take place in metropolies not headed by a patriarch or major archbishop. In many respects they resemble particular sobors. Eparchial sobors bring together representatives of the clergy and frequently lay church leaders from within the jurisdiction of a single bishop. Minor sobors are assemblies of representatives from a deanery under the authority of a protopresbyter.

Chronicles record the first known Ukrainian church sobor as having taken place in Kiev in 1051. Sobors were convened periodically from then on; one notable assembly held in 1415 formed a separate metropol for the church in Lithuanian lands. Once established in 1596, the Ukrainian Catholic church convened sobors and synods of its own. A particularly notable sobor, held in 1640 under the leadership of Metropolitan P. Mohyla, involved a considerable body of lay people and approved a new profession of faith for the Orthodox church. Ukrainian Orthodox sobors ceased to be held for several hundred years following the church's absorption into the Russian Orthodox church in 1685. Assemblies of this sort were convened once more only in 1918 and 1921, in conjunction with the restoration of the *Ukrainian Autocephalous Orthodox church. A major tenet of this church was the primacy of the sobor, with the full participation of the laity, in church affairs (see *Sobor rule). Since the Second World War various jurisdictions of the Ukrainian Orthodox church have held a number of major sobors in the West. On 5–6 June 1990 an all-Ukrainian sobor was held in Kiev which revived the Ukrainian Autocephalous Orthodox church and elected Metropolitan M. *Skrypnyk the patriarch of Kiev and all Ukraine.

Sobor of the Greek Catholic church in 1946. See Lviv Sobor of 1946.

Sobor rule (*sobornopravnist'*). The principle under which church policy or decisions affecting a church are made by its lay membership together with the ecclesiastical hierarchy. The concept of sobor rule in Ukraine was adhered to until the absorption of the Ukrainian Orthodox by the Russian Orthodox church and its subjugation to the decrees of the Holy Synod. The principle was revived in the 20th century with the re-establishment of the Ukrainian Autocephalous Orthodox church in Ukraine and the creation of Ukrainian jurisdictions in the West.

Soborna Ukraïna (United Ukraine). A nationalist paper published in Vienna from October 1921 to May 1922. Financed by W. Habsburg-Lothringen (V. Vyshyvany) and edited by V. Andriievsky, it was antisocialist, anti-Russian, anti-Polish, and anti-hetmanite. It advocated the primacy of national over class or party interests, the creation of a national church, absolute reliance on 'our own [Ukrainian] forces,' and an 'aristocratic democracy' (later changed to a 'peasant national democracy').

Sobor-Ruled Episcopal church (*Soborno-iepyskopska tserkva*). A Ukrainian Orthodox church (officially called the Fraternal Association of Ukrainian Autocephalous Churches or simply the Ukrainian Autocephalous church) formed in 1925 by a group of Ukrainian Orthodox bishops led by T. Buldovsky of Lubni. These clerics had not joined the Ukrainian Autocephalous Orthodox church (UAOC) because of misgivings about its canonicity. At the same time they had become increasingly frustrated with

attempts to reform the Russian Orthodox church in Ukraine, which rejected Ukrainianization of church life, autocephaly for the Ukrainian church, and sobor rule. It was initially supported by the Soviet government, which hoped to discredit both the Russian church and the UAOC. Although it never attracted a large following, the Sobor-Ruled church did gain adherents, particularly in the Poltava, Katerynoslav, Vinnytsia, and Kherson regions. It went into decline following the normalization of relations between the regime and the Russian church in 1927 and the start of intensive religious persecutions in 1929. Its last church was closed in 1937. Buldovsky himself survived the Stalinist terror and during the Second World War joined the UAOC as bishop of Kharkiv.

Montreal's Ukraina soccer team in 1957

Soccer or football (*futbol, kopanyi m' iach*). The most popular team and spectator sport in the world. Soccer was introduced in Ukraine in 1878 by employees of British enterprises in Odessa. In the 1880s and 1890s other British, German, and Czechoslovak workers introduced it in the Donbas and Kiev. The first soccer clubs in Ukraine were organized during the early 1900s: Pivden (Russian: Iug; Kiev 1904), Tekhnika (Mykolaiv 1906), Politekhnik (Kiev 1906), Ukrainskiy Sportyvnyi Kliub (Lviv 1906), Sianova Chaika (Peremysl 1907), Feniks (Kharkiv 1908), Yuzivka (Kharkiv 1909), Kramatorske (Kharkiv 1909), Ukraina (Lviv 1911), and others in the Donbas region. By the eve of the First World War, soccer was played throughout Ukraine. Various clubs held intercity matches and tournaments; leagues were established in Kiev (1911), Kharkiv (1912), and the Donbas (1913); referee colleges were created; and soccer manuals were published. Odessa, Kiev, and Kharkiv teams participated in the first Russian soccer championship in 1912, and Odessa won the second championship in 1913.

Under early Soviet rule, soccer teams were formed within the many sanctioned workers' sports clubs. In 1921 the first republican competition among Soviet Ukrainian city clubs was won by Kharkiv. In 1924 Kharkiv won the USSR championship, and Mykolaiv placed second and Odessa third. The first children's soccer clubs were organized in 1933, and an advanced school for soccer coaches was established in 1935. Beginning in 1936 the republican championships were no longer competed for by city clubs

but by collectives of sport clubs affiliated with various trade unions. That year the USSR league championships and playoffs for the USSR Cup first took place. In 1937 a competition for the Ukrainian Cup was introduced. Today the best-known Ukrainian clubs are Dynamo in Kiev (est 1927), Shakhtar in Donetsk (1935), Dnipro in Dnipropetrovske (1936), and Chornomorets in Odessa (1958).

In 1961 Dynamo broke the 25-year hold on the USSR championship enjoyed by Moscow teams. It then became the most successful club in Soviet soccer; it won the USSR championship a record 12 times (1961, 1966–8, 1971, 1974–5, 1977, 1980–1, 1985–6), the USSR Cup 8 times (1954, 1964, 1966, 1974, 1978, 1982, 1985, 1987), the European Cup-Winners' Cup in 1975 and 1986, and the European Supercup in 1975. In 1976 the entire team represented the USSR at the Montreal Olympics and won the bronze medal. Two Dynamo players have been named European Footballer of the Year, O. Blokhin in 1975 and I. Belanov in 1986.

Following Dynamo's lead, other Ukrainian clubs claimed Soviet championships. League titles were won by Zoria of Luhanske (1972) and Dnipro of Dnipropetrovske (1983, 1989), and the USSR Cup was won by Shakhtar of Donetsk (1961–2, 1980, 1983), Karpaty of Lviv (1969), and Dnipro (1989). Five Ukrainians (O. Cherednyk, V. Liuty, O. Mykhailychenko, V. Tatarchuk, and V. Tyshchenko) were on the USSR soccer team that won the 1988 Olympic gold medal. In 1979 the Ukrainian SSR had 954,000 registered soccer players in 27,000 collective sport clubs, 20,000 soccer fields, and 900 stadiums. Information and statistics about soccer in Ukraine and the USSR and about international competitions appeared in *Futbol*, an annual Ukrainian calendar-reference book, issued in a pressrun of approx 100,000 copies.

In Western Ukraine under Polish rule, Ukrainian clubs formed a soccer union in 1921 in Lviv, under the aegis of the *Sokil society and then the *Ukrainian Sports Union. Beginning in 1928 many clubs played in the Polish state league. Soccer also developed successfully in Transcarpathia and Bukovyna, and clubs from Lviv, Chernivtsi, and Uzhhorod participated in competitions against each other. After the Soviet occupation of Western Ukraine all interwar clubs and leagues were disbanded, and new clubs were organized according to the Soviet trade-union model.

Postwar Ukrainian refugees organized their own soccer teams, leagues, and competitions in German and Austrian DP camps between 1945 and 1949, and then in Canada, the United States, England, and Australia. O. *Skotsen gained prominence as a professional soccer player in France. With the founding of the *Ukrainian Sports Federation of the USA and Canada, championship competitions were organized. As members of the semiprofessional American Soccer League, the Ukrainian Nationals of Philadelphia won six championships (1961, 1962, 1963–4, 1968, 1970), more than any other club in the league's history. The US National Open Challenge Cup has been captured by two Ukrainian teams: the Ukrainian Nationals (1960–1, 1963, 1966) and the New York Ukrainians (1965). The Ukraina club of Montreal won the Canadian soccer championship in 1957, and the Newark Ukrainian Sich captured the Professional American Soccer League's Lewis Cup in 1963.

Sochi [Soči]. x-20. A city (1989 pop 337,000) on the Black Sea in Krasnodar krai, RF. It was founded in 1896 at the site of Dakhivskyi outpost. Sochi is the center of the largest tourist and health resort area (350,000 ha) in the RF. The climate is subtropical, and the water is suitable for bathing between June and October. According to the census of 1926, Ukrainians accounted for 16.9 percent of the population of Sochi raion.

Sochynsky, Rostyslav [Sočyns'kyj], b 10 February 1916 in Vinnytsia, Podilia gubernia, d 17 September 1985 in New York. Physician and journalist. He completed his medical studies at Warsaw and Berlin universities. An active member of the OUN, he was arrested by the Gestapo in 1942, and spent three years in the Sachsenhausen concentration camp. After working as a doctor in DP camps he emigrated to the United States (1950) and opened a private practice in New York. He was president of the Ukrainian Medical Association of North America (1961-3) and sat on the board of directors of the Ukrainian Institute of America (from 1979). He contributed scientific articles to *Likars'kyi visnyk* and popular articles on medicine and cultural affairs to the Ukrainian press.

Sochyvets, Ivan [Sočyvec'], b 9 May 1917 in Lebedivka, Kozelets county, Chernihiv gubernia. Writer. He graduated from the CC CPU Higher Party School (1958) and has worked as a teacher, journalist, section editor of *Radians'ke Podillia* and *Radians'ka osvita*, and secretary responsible for the journal *Perets'*. Since 1958 he has published 20 collections of humorous and satirical prose, the most recent in 1987. He has published in *Perets'* under the pseudonyms I. Yosypenko and I. Lebidko.

Social insurance. In the USSR and its successor states, public programs that offer financial assistance to people whose income had been reduced because of old age, pregnancy, illness, disability, or temporary unemployment. Social insurance funds are also used to maintain health resorts and sanatoriums. Social insurance is funded directly from the state budget and from contributions by enterprises, collective farms, institutions, and organizations. There have been no deductions for the purpose from employees' wages. Until the mid-1960s, collective farmers were excluded from most social insurance schemes. In Ukraine social insurance has been administered by the Ukrainian Republican Council of Trade Unions. State expenditures on social insurance grew from 1.7 billion rubles in 1970 (12.8 percent of total state expenditures) to 6.1 billion rubles in 1988 (18.6 percent). (See also *Pension and *Social security.)

Social mobility. The movement of individuals and groups from one social level and status to another. Under Soviet rule Ukrainian society was transformed from a primarily agrarian society into an industrial one within the span of one generation. In 1940, 47 percent of Ukraine's working population were peasants, but by 1990 only 14 percent of the population still worked in agriculture. The status of peasant is, in practice, no longer inherited. The

scale of social change has been so immense that one can speak of the mobility of an entire social class and its imminent disappearance as a result of the massive rural out-migration and the catastrophically declining, and now negative, natural *population growth.

*Migration for purposes of social mobility has generally been one-directional. There has been practically no rural in-migration, because the quality of rural life has been inferior. Young unmarried women in search of a higher social status and better life have been the most active and numerous group involved in rural out-migration to the large cities and oblast centers. After completing their obligatory military service many young unmarried peasant men have followed the same route. Peasant parents have usually encouraged such out-migration, wishing the best for their children, and have provided indispensable financial support to their children while they have studied and established roots and families in the urban environment.

Such mobility was intensive even in the Stalinist 1930s, 1940s, and 1950s, despite stringent limitations on the freedom of movement (ie, the internal *passport system). The most fortunate were the many young peasant men and women who, until the mid-1950s, were brought into the cities as part of ongoing labor mobilizations and organized recruitment to study in vocational and technical schools. The peasantry was considered an inexhaustible source of renewal of the urban working class, and the state fostered the creation of such 'labor reserves.' Upon completion of their compulsory military service young men had the right to choose where they wanted to work, and most chose the city. They circumvented any remaining restrictions by obtaining the documents necessary for relocation through purchase, bribery, or the help of friends or relatives.

Most of the young people who have migrated into the cities chose vocations that guaranteed them material well-being though not a particularly high social status. Women have been attracted to the teaching profession in particular; men have found work in industry and transportation, where they have constituted two-thirds of the skilled workers. Former peasants, however, have also constituted three-quarters of the low-status manual laborers. Existing limitations on establishing residence in the city and the need to have a document of registered residency have forced young rural out-migrants to seek less attractive, physically demanding jobs at enterprises allowed to hire workers by municipal authorities. Rural out-migrants have not, in fact, had the same employment advantages as urban youths.

Because of their upbringing most urban inhabitants aspire to be more educated than their parents. The tendency increases with the level of education the parents have attained. According to a survey of young workers in Ukraine conducted in the late 1980s, getting a higher education was a goal for 48 percent of male respondents whose parents had not completed secondary school and were manual laborers, for 54 percent of male respondents whose parents had finished secondary school and were manual laborers, and for 79 percent of male and 83 percent of female respondents whose parents had higher educations.

Many urban dwellers begin their adult working lives at the bottom of the social ladder. A mobility study of work-

ing people living in Kiev conducted by the recently created Institute of Sociology of the Academy of Sciences of Ukraine indicates that the first job of every third man or woman is an unskilled, physically demanding one. Family status (ie, of the parents) does not play a role there. Only 1 of every 4 children of skilled workers finishes vocational school and becomes a skilled worker, and only 1 of 20 manages to enter a postsecondary institution immediately after finishing secondary school, compared to 39 percent of children whose parents have higher educations. Even within the latter group, however, 1 of 5 begins independent life as a manual laborer.

By the time they have reached the age of 30, most children have attained the same educational level and qualifications as their parents. By that time only 5 percent of working-class children are still unskilled manual laborers. Among sons of skilled blue-collar workers, only 16 percent have not attained the same qualifications as their fathers, 24 percent have attained the same qualifications, and the remainder have finished secondary-specialized or postsecondary school and become white-collar workers. By the age of 30 only 20 percent of children whose parents do not have higher educations and have simple white-collar jobs have followed in their parents' footsteps; 30 percent are skilled workers, and 50 percent are specialists with higher educations. Only 10 percent of children whose parents have higher educations become manual laborers; 75 percent finish postsecondary school and become part of the same social stratum their parents belong to. Among that group (in contrast to peasant children) there is a high probability that the parents' social status will be inherited through occupational mobility, though in an entirely different occupation.

A number of objective factors have influenced young people's choices of what social-mobility route to follow. Skilled blue-collar workers, for example, receive much higher wages than those who begin working only after finishing postsecondary school. The former attain material independence relatively quickly, whereas the latter spend years attaining it. The profession one chooses and the type of educational institution one attends determine the level of one's material and financial well-being basically for life. Until the early 1990s the reality was such that those involved in creative, substantive labor after many years of secondary and postgraduate studies were in effect penalized: they were not able to satisfy basic everyday needs, lagged behind their peers in terms of social status and material well-being, and were forced to prolong their material dependence on their parents and other family members.

The principal direction of inter- and intragenerational mobility has been upward. The opposite phenomenon, downward social mobility, has also occurred, however. Today it cannot be said that unattractive, physically demanding jobs are performed solely by any particular group or stratum. Occupational research has shown that the formation of the category of unskilled laborers has been gradual and that it constitutes only 6 or 7 percent of those studied. Jobs not requiring skill were performed by people who earlier had jobs requiring certain qualifications; 40-67 percent of them had vocational training and even higher educations. For them mobility has been a process of self-demotion, of the avoidance of using acquired knowledge and skills, and of descent to the bottom of the social pyramid.

Under Soviet rule upward mobility into the stratum of the Party, state, and economic leadership was different from the mobility experienced by most people. Members of all social strata were recruited, but in a strictly regulated fashion that placed tough demands on them. Candidates were expected to have a higher education, to have graduated as well from a higher Party, trade-union, or economic school that trained leading cadres, and to have practical experience in Komsomol, Party, government, or economic organs. Official cadre policy demanded of candidates work experience in all possible agencies before allowing them into the exclusive **nomenklatura*. Once part of that elite, they remained in it for life. Those involved in scandals or mismanagement were simply transferred, for it was in the best interests of the elite as a whole to protect its corporate status and its individual members. The elite's mechanism of self-preservation functioned accurately until the late 1980s.

Social security (*sotsialne zabezpechennia*). Publicly financed and administered programs intended to maintain, protect, and raise basic living standards. The term covers programs that replace income lost because of pregnancy, illness, accident, disability, the death or absence of a family's breadwinner, unemployment, old age, retirement, and other factors.

In the past the provision of social security for the infirm, the ill, and the aged was a family responsibility. Later, community organizations, such as churches and guilds, assumed some of the responsibility. With the development of industry in the second half of the 19th century the state, especially the local authorities, began to play a role in social assistance. Comprehensive social security policies, however, are a 20th-century phenomenon.

In Soviet Ukraine social security consisted of programs such as **social insurance*, **pensions*, benefits for single mothers, family income supplements, benefits for the permanently disabled, health care for old age pensioners, invalids, and war veterans, social and medical rehabilitation, and student stipends. According to Soviet convention holiday pay was classified as a social security benefit. The social security program was funded in part from an earmarked payroll tax (differentiated by sector) and in part from general budgetary revenue derived from indirect and profit taxes. The absolute value of benefits increased with the income of the recipient household.

Before 1917 in Russian-ruled Ukraine, social security as a state program was virtually nonexistent. Churches, *zemstvo* and municipal councils, benevolent associations, and various aid committees and charities provided some relief to the destitute. In 1888 a workmen's compensation scheme for victims of industrial accidents was introduced in some of the larger factories. In 1912 a factory insurance

fund providing social security payments in the case of illness was established. That benefit, however, was offered only in the Donbas and in some of the larger cities.

In interwar Western Ukraine under Polish rule, social security provisions provided support to victims of accidents. A 1927 law established pensions and disability payments for civil servants and rudimentary unemployment insurance benefits. A 1933 law unified social security benefits for workers and civil servants. Interwar Transcarpathia under Czechoslovak rule was covered by relatively advanced social security legislation from 1924 on. In 1929, pensions were extended to all civil servants. In all of interwar Western Ukraine, apart from Polish, Czechoslovak, and Rumanian state programs, there existed many privately run social insurance schemes based on the contributions of earners. Employee-contribution-based unemployment insurance programs also received subsidies from the various states.

Demands for basic social security benefits were articulated in Ukraine during the Revolution of 1917. Although the various Ukrainian governments of 1917–20 had plans to implement such programs, the conditions of war did not allow their realization. Social security (old age, disability, and survivor pensions) in Ukraine was introduced in 1922 for the urban population. All employed persons, students, and servicemen were covered by the scheme. With the adoption of the First Five-Year Plan (1928–32), the social security system was modified to make it less egalitarian and to reinforce the incentives thought necessary for industrialization. It was remodified in 1956, and from then on benefit levels were raised more or less in line with the growth in average earnings. Not until 1965, however, were state pensions provided for the collective-farm population. Other programs were extended to that social group over the next five years.

Most Soviet social security payments were related to employment in some way. There were, however, three more general programs available to the population: child allowances, family income supplements, and student stipends. Provisions were also made for burial grants. Non-military and noncooperative state employees were entitled to an old age pension on reaching the age of 60 if they were men or 55 if they were women, provided they had a record of 25 or 20 years of employment respectively. There were lower retirement ages with correspondingly reduced employment requirements for underground workers and certain other designated categories. From 1967, collective farmers were entitled to pensions at the same age and with the same employment record as state employees. The value of a pension was determined by the level of earnings either during the last 12 months before retirement or during the last consecutive five-year period of employment in the last 10 years before retirement. Certain categories of white-collar employees (eg, teachers and physicians) received long-service pensions rather than those just described, and there existed a scheme of retirement pensions for members of the Party elite at more than double the normal maximum rate.

In Ukraine between 1970 and 1990 the number of pensioners grew from 8.9 to 13.1 million. Almost 40 percent of retired state employees and 89 percent of collective farmers received less than 60 rubles a month. In 1989 the old age pension was set at a minimum of 70 rubles and a maximum of 120. Because the poverty line was a monthly per

capita income of 75 rubles or less, almost 40 percent of all pensioners were forced to continue working to supplement their pension incomes. In addition there was and still is an acute shortage of homes for the aged and disabled. In 1988 only 1 in 80 of that group received accommodation, compared to 1 in 16 in the United States.

A survivors' benefit program offered entitlements to a deceased state employee's or collective farmer's dependent children, grandchildren, siblings under the age of 16, parents, and surviving spouse (if above working age). The value of the benefit varied according to the number of dependents and the earnings of the deceased. In 1989 the maximum benefit was 60 rubles a month for a single dependent and 120 rubles for two or more dependents.

Disability pensions varied, distinctions being made between incapacity resulting from industrial accidents or occupational diseases on the one hand and general loss of working capacity on the other. In 1970 disability pensions were extended to collective farmers. Sickness benefits, including benefits for seven days to those (mainly mothers) who had to remain at home to care for sick children, depended upon earnings, type of employment, and union membership. Those benefits also were extended to collective farmers, in 1970.

From 1968 women state employees were entitled to a period of 56 days prenatal and 56 days postnatal paid leave, and they could then take further unpaid leave until their child's first birthday without loss of their jobs or seniority. Maternity benefits were extended to collective farmers in the 1960s.

Child allowances were paid to single mothers (in 1989, 20 rubles a month per child); mothers with four or more children received payments ranging from 4 to 15 rubles per child from the child's first to fifth birthdays. Single payments were also made on the birth of a child (from 50 rubles in 1989 for the first child to 100 rubles for additional children). Family income supplements of 12 rubles a month per child until the child's eighth birthday were given to families with a per capita income of less than 50 rubles a month.

Despite attempts to improve the social security system, social welfare has been and continues to be a major problem in Ukraine. Social security payments have been low. The amount paid to assist large families, for example, remained unchanged from 1944 until December 1990, when the rate was finally increased. In 1988 approx 9 percent of the average income of blue- and white-collar workers and collective farmers came from various social security payments. Yet that same year almost 40 percent of Ukraine's population lived in impoverished circumstances. The situation of the disabled has been particularly critical, because they have had few adequate facilities and programs. According to a 1989 survey, for the majority of old age pensioners and the disabled their families were still the main source of assistance. A major problem with the social security system has been the fact that many benefits have been based on employment instead of need. Because regulations governing entitlements to various benefits have been so complex, some eligible applicants have failed to qualify for assistance. The absence of protection for the unemployed has been a serious flaw remedied only by the unemployment legislation of March 1991. Because of recent economic difficulties, however, it is unlikely that social security benefits will improve. Although Ukrainian state expenditures on pensions and social security bene-

fits grew from 11.8 billion rubles in 1970 to 39.3 billion in 1988, inflation offset the real value of those increases.

Social stratification. Social ranking based on differences in age, sex, race, religion, ancestry, class, occupation, wages, material well-being, and social and political status. Because society is structured hierarchically, the ranking, and hence social inequality, is constantly maintained and replicated.

In Soviet Ukraine the process of social stratification had four main tendencies. First, certain categories of the population were forcibly excluded from the officially defined social structure and deprived of their basic civil rights and liberties. In the 1920s and 1930s (and in the 1940s and 1950s in newly annexed Western Ukraine) such discrimination affected the so-called socially foreign social strata, that is, the 'bourgeois' intelligentsia, clergy, nobility, landowners, and prosperous farmers (*kulaks). In 1953, 167,000 'socially foreign' Ukrainians were living in the Arctic and Asian parts of the USSR, where they had been deported as 'special settlers.' That social division into those who are and those who are not officially discriminated against was maintained into the 1980s. People were persecuted not only because of their social origins but for the way they thought. Also outside the official social structure were vagrants; 36,000 people were registered as such in Ukraine in 1989 (0.15 percent of the employable population).

The second tendency was the prevalent one from the 1930s to the mid-1980s. Its distinguishing trait was the Soviet state's monopoly on the right to create social inequality wherever and whenever it chose, with the aim of subordinating individuals and making them totally dependent on the state. To that end all surplus production and a significant part of essential production were taken by the state for its own use before being returned to the producers (workers and peasants) in quantities sufficient only for satisfying their basic needs. The state's view of social equality meant in practice the equalization of wages, regardless of qualifications. Thus, for example, in the late 1970s a professor's salary was no higher than a skilled worker's. The differences in wage incomes that remained were illusory, because there was a permanent shortage of basic goods and services. Wages did not reflect differences in living standards because most people were unable to buy anything with the money they earned. The state was forced, however, to create better conditions for certain groups in order to encourage their loyalty and active support and their enthusiasm for current and prospective goals and tasks. As a rule the privileges and benefits such groups received from the state were not made public.

The third tendency consisted of attempts by most indi-

viduals and groups to counter the state's efforts to subordinate them by participating in an illegal or semilegal system of trading and bartering goods and services (see *Underground economy). In order to attain an adequate standard of living, many people moonlighted, worked overtime, became seasonal *migrant workers at higher-paying construction projects in the Soviet Arctic and Asia, or did mechanical or house repairs in addition to their official jobs. Often materials stolen from state enterprises and offices and official vehicles were used to generate additional incomes. Such unsanctioned economic activity supplemented the official Soviet system of social stratification (ie, inequality between the rulers and the ruled) by creating widespread, partly latent social inequality. It was latent because Soviet ideology stated that rich people should not exist, and the state did not allow personal accumulation of wealth.

In a condition of permanent shortages of goods and services only the members of the state and Party elite (see *Nomenklatura) had full access to limited resources and were able to satisfy all of their basic and more sophisticated needs. A special system of goods and services was created for their exclusive use, and the purchase value of every ruble they earned was guaranteed (unlike the rubles paid to ordinary people). A system of symbols reflecting the inequality that rapidly developed was introduced, and even certain colors became symbols of power (eg, the white stone used for the façades of Party buildings, the black limousines available only to the elite). Prestige and its symbolic trappings became the marks of success. Those in power were credited by their peers with primary responsibility in attaining various goals and rewarded with *prizes and awards and *orders, medals, and honorific titles; some even had towns, squares, and streets named after them.

The dichotomy between the ruling elite and the rest of society generally characterized the stratification process. The power structure was not homogeneous, however, and its various participants did not enjoy the same privileges. Closest to the ruling elite were those functionaries, ideologists, writers, artists, and scientists who catered to it and consequently received certain benefits and status.

The most oppressed and impoverished class consisted of the collective-farm peasants, who relied on their small *private plots to eke out a subsistence. In the 1930s, 1940s, and 1950s they were not even paid in money for their labor. In the mid-1950s wage labor was introduced, but in 1960 the collective farmer still received a monthly wage that was less than a third that of an urban worker (in the late 1980s it was 15 percent lower). In the last few decades in rural areas homemade spirits served as the universal form of exchange and were used instead of money as payment for services. Although work absenteeism was not characteristic of the rural population, the number of work-related accidents in agriculture was higher than in industry and twice as high as in construction. The retirement pensions of collective farmers were always minimal (eg, 51 percent lower than those of urban blue- and white-collar workers in 1980). Whereas urban workers received housing from the state, rural inhabitants had to build homes at their own expense and without government support.

Practically all agricultural production was until recently shipped to urban centers, and the peasants sold the

products of their private plots at markets to earn money. In the late 1980s, rural inhabitants still consumed 30 percent less meat, 25 percent less sugar, 19 percent less milk, but nearly twice as much bread as urban inhabitants. In rural areas services virtually did not exist, qualified medical aid was in chronic short supply, and the quality of elementary education was much worse than in urban schools. Such rural-urban inequality was the primary stimulus of rural out-migration; 130,000 rural homes in Ukraine were uninhabited by 1990.

In urban areas inequality also flourished. The material and social status of individuals was determined by ministries, state agencies, and enterprises, which themselves were stratified. Employees in heavy industries received higher wages than those in light or food industries, and wages at different plants, factories, and research institutes varied. Defense-industry employees had better working conditions and wages, the newest technology and equipment, easier access to housing, and more perquisites than employees of civil industries.

The goods, services, and benefits people had access to were not determined by what they earned and could afford but by their access to the Party and state functionaries, warehouse managers, and black marketeers who controlled and distributed goods and services. Those in control and those who had access to them constituted an economically privileged stratum (approx 3 to 10 percent of the employed population). Urban housing, which was in chronic short supply, illustrates the state of affairs well. In 1989, for example, of 245,000 families in Ukraine who received new apartments, 89 percent had been on the waiting list for an average of 11 years, whereas 11 percent were not on the list, and received apartments out of turn because they knew the right people. Such privileges were far from available to everyone and were most accessible to denizens of large cities (eg, Kiev, Moscow, Leningrad) where power, goods, and services were concentrated.

In 1991 the Ukrainian Branch of the USSR Center for the Study of Public Opinion conducted a sample survey. Of the respondents 0.5 percent defined themselves as upper class; 12 percent, as higher middle class; 57 percent, as lower middle class; and 18 percent, as lower class. Fifty-six percent of the respondents stated that the material well-being of the middle class (the class of 75 percent of the respondents) had worsened, and 68 percent stated that the lot of the 'entrepreneurs' (those involved in co-operative ventures or running their own businesses) had improved.

The fourth tendency is one that became pronounced in the late 1980s, after the production of goods and provision of services outside the state-controlled sector was officially allowed: a new stratum of people owning private property individually or collectively (through co-operatives). The stratum grew rapidly, from 249,000 persons in 1989 to 779,000 (3 percent of the employed population) in 1990. By 1990 the wages of employees of co-operatives were three times those of blue and white-collar employees of the state. The new stratum was considered 'alien' and inimical to the organizational principles of a socialist society by a large part of the Soviet Ukrainian public, particularly by older people. In a State Statistics Committee public opinion survey of people aged 45 and over, only 33 percent of the respondents stated that employees of co-operatives and self-employed entrepreneurs should receive the same

old age security as state-employed blue- and white-collar workers; 50 percent stated they should not. The co-operatives' relatively high profits at a time when everyone else's material well-being had worsened created much distrust and dislike of the new stratum.

Social welfare departments (Russian: Prikazy obshchestvennogo prizreniia). Agencies set up in 1775 within gubernia administrations of the Russian Empire to oversee primary schools, hospitals, almshouses, orphanages, poorhouses, insane asylums, and homes for the aged. They also distributed welfare funds provided by the state and private contributions. Most of the welfare institutions were supported by the church and private charity. Each department in a gubernia was run by a board chaired by the provincial governor and was provided with a budget of 15,000 rubles. When zemstvos were introduced in the 1860s, the social welfare departments were abolished in most of the gubernias, including Left-Bank and Southern Ukraine, and their functions were taken over by the zemstvos. They continued to operate in Right-Bank Ukraine until the early 20th century.

Socialism. A political movement calling for collective ownership of the means of production or an egalitarian distribution of wealth.

Socialist ideas first appeared in Ukrainian territory in the 1830s and 1840s, but they were limited to the most radical factions of the Polish conspiratorial movement in Galicia and Right-Bank Ukraine, such as the Association for the Polish People. Although individual Ukrainians participated in those vaguely socialist groups, a Ukrainian socialist movement as such did not emerge until the 1870s. The most influential Ukrainian socialist thinker was M. *Drahomanov, who adapted Western European socialist theories to the particular situation of the Ukrainian nation; his peasant-oriented, decentralist brand of socialism eventually came to be known as *radicalism. Other Ukrainian socialist theorists of the 1870s were Drahomanov's close associates M. *Ziber, an interpreter and proponent of *Marxism, and S. *Podolynsky, who was influenced by Drahomanov's radicalism, Marxism, and Russian *populism. Drahomanov, Ziber, and Podolynsky were first active in Kiev, but at the end of the 1870s they emigrated to Western Europe in order to carry on political work without the interference of the tsarist police and censors. Under their influence and also under the influence of Polish socialists Ukrainian university students in Vienna and Lviv were converted to socialism, including I. *Franko, M. *Pavlyk, and O. *Terletsky. Pavlyk and especially Franko participated in the Polish socialist movement in Lviv in the late 1870s and early 1880s as well as in carrying on socialist propaganda among Ukrainians. Independently of the rest of the Ukrainian socialist movement, the socialist *South Russian Union of Workers was founded in Odessa in 1875.

The first Ukrainian political party was a socialist party, the *Ukrainian Radical party (est 1890 in Lviv). In 1899 the left wing of that party broke off to form the *Ukrainian Social Democratic party (USDP), which espoused Marxist socialism. Branches of both parties also appeared in Bukovyna in the decade before the First World War. In Rus-

sian-ruled Ukraine a Marxist group calling itself Ukrainian Social Democracy was formed in 1897; although it was small and isolated from the mainstream of Ukrainian politics, its membership included the prominent writers M. *Kotsiubynsky and Lesia *Ukrainka. Another small group, consisting of left-wing Poles who embraced Ukrainian nationality, founded the *Ukrainian Socialist party in Kiev in 1900. Much more substantial was the socialist *Revolutionary Ukrainian party (RUP), founded in Kharkiv in 1900. In the process of clarifying its ideology, RUP changed its name and split into two groups at the end of 1904. Those who remained in RUP rechristened it the *Ukrainian Social Democratic Workers' party (USDRP). Most of those who left formed the Ukrainian Social Democratic *Spilka, which became an autonomous group within the Russian Social Democratic Workers' party (RSDRP) (Mensheviks). Both parties were Marxist, but they disagreed over the national question.

National minorities in Ukraine also had their own socialist parties. The Marxist RSDRP existed in Ukraine, both its Bolshevik and Menshevik factions, with the latter having by far the larger membership before 1917. The other major Russian socialist party in Ukraine was the non-Marxist, populist Russian Socialist Revolutionary party. Polish socialists in Dnieper Ukraine belonged primarily to the Polish Socialist party, but also to the Social Democracy of the Kingdom of Poland and Lithuania; in Galicia Polish socialists belonged to the Galician (after 1897, Polish) Social Democratic party. Jewish socialists in Dnieper Ukraine belonged to the *Bund (affiliated with the Mensheviks) and to several parties that combined socialism with Zionism: Poale Zion, the Jewish Socialist Labor party, and the Zionist Socialist Labor party (the latter two joined in 1917 to form the United Jewish Workers' party). Jewish socialists in Galicia founded the Jewish Social Democratic party, which had links with the Bund.

The revolutionary events of 1917 brought socialism into greater prominence. In April 1917, after tsarism was overthrown, a *Ukrainian Party of Socialist Revolutionaries (SRs) was formed. That agrarian socialist party grew rapidly; it received the greatest number of votes in the Ukrainian elections to the *All-Russian Constituent Assembly in December 1917. Together with the USDRP it dominated the *Central Rada and the government of the *Ukrainian National Republic (UNR). In November 1917, as a result of the *October Revolution, the Bolsheviks seized power in Russia and attempted to initiate an all-European socialist revolution. The revolutionary Marxist socialism of the Bolsheviks attracted the left wings of the Ukrainian SRs (the *Borotbists) and the USDRP (Independentists), even though the UNR had been at war with the Bolsheviks since December 1917. In 1920 the majority of the Borotbists merged with the Ukrainian branch of the Bolsheviks, the *Communist Party (Bolsheviks) of Ukraine (CP[B]U), and the Independentists and a minority of the Borotbists formed the *Ukrainian Communist party (Ukapisty). The revolutionary period 1917–20 also gave rise to the *Communist Party of Western Ukraine and the *Communist Party of Transcarpathian Ukraine.

By the late 1920s the only political party left in the Ukrainian Soviet Socialist Republic was the CP(B)U; the rest had been liquidated or, like the Ukapisty in 1925, had liquidated themselves. In Western Ukraine other socialist parties continued to exist alongside the Communist par-

ties. The Ukrainian Radical party in Galicia and the Ukrainian Party of Socialist Revolutionaries in Volhynia merged in 1926 to form the moderate Ukrainian Socialist Radical party (USRP). In both Galicia and Bukovyna the USDP continued to exist, wavering between pro- and anti-communist platforms. An affiliate of the Czechoslovak Social Democratic party was established in Transcarpathia in 1920. Socialist organizations and periodicals also flourished among Ukrainian immigrants in Canada and the United States, especially in the first three decades of the 20th century. After the Revolution of 1917 most of the Ukrainian socialists in Canada regrouped around the pro-communist *Ukrainian Labour-Farmer Temple Association. In the United States they became associated with either the pro-Communist United Ukrainian Toilers Organization or the Ukrainian Workingmen's Association (which maintained connections with the Ukrainian Socialist Radical party in Galicia). With the consolidation of Stalinism in the 1930s, which brought with it forced collectivization, the man-made famine, and the annihilation of the Ukrainian intelligentsia, socialism lost much of its popularity among Ukrainians, particularly in Galicia and Bukovyna and in the emigration. During the Second World War no socialist groups were active in Ukraine, except for the thoroughly Stalinist CP(B)U.

In the postwar Ukrainian diaspora the traditional moderate Ukrainian socialist parties were revived – the USDRP, the USDP, and the USRP. In 1950 they joined together to form the Ukrainian Socialist party. The *Ukrainian Revolutionary Democratic party, a new creation composed largely of émigrés from Soviet Ukraine, was also socialist; the socialist perspective was particularly pronounced in the party's left wing, which published the newspaper *Vpered*. Under the impact of the new left movement of the 1960s and 1970s a sector of Ukrainian youth in the diaspora, primarily in Canada, adopted a revolutionary socialist and anti-Stalinist ideology; their periodicals were *Meta* and *Diialoh*.

Socialist competition. Various measures used in the Soviet Union to increase worker productivity. They included both noneconomic incentives, or appeals to the 'socialist consciousness' of the workers, and material incentives or rewards. Their use led to the characterization of socialist competition as 'the principal form of the socialist organization of labor' (J. Stalin, 1929) or 'the economic standard of socialism.' In the beginning of the 1970s, socialist competition was recognized officially as one of the most important methods for building socialism and communism and one of the moving forces behind the growth of labor productivity. It was even given juridical status in 1977, when the new Soviet constitution declared that 'working collectives develop socialist competition' (Article 8).

Soviet sources describe the 'Communist Saturdays' instituted in 1919 as precursors of socialist competition. V.

Lenin, who himself took part in the exercises, ascribed great significance to these Saturdays of 'voluntary' work for the state, and in 1920 a special law was passed defining them. They were abandoned after a few years, however, when the New Economic Policy was adopted, and a more market-based economic system was introduced. Although the Communist Saturdays did not involve competition among workers, they were the first of the extra-economic measures used to increase production and labor discipline.

Real socialist competition was introduced in the workplace in 1926, when the shock-worker movement began. In that movement individuals, groups of workers (the so-called brigades), or whole factories pledged to increase the quantity and quality of production and challenged others to emulate their initiative. One of the first factories to take part in the movement was the Odessa Factory of Industrial Textiles. The movement acquired a mass character after the First Five-Year Plan (1928–33) was approved, and J. Stalin's plan of rapid industrialization was adopted. Shock workers and shock-worker enterprises were strongly favored: they were given better machinery and equipment and more raw materials and resources so that they could meet their announced production goals. Such favorable treatment was especially significant in the 1930s, when many goods were in short supply. The first all-Union congress of shock-worker brigades, held in Moscow in December 1929, appealed to all workers to complete the goals of the First Five-Year Plan in four years. Similar congresses of collective-farm shock workers were held in 1934 and 1935.

The next stage in the development of socialist competition was competition among workers, brigades, and enterprises with respect to increases in production goals. In 1932 the Donetsk miner N. Izotov became the model for a campaign that stressed not only overfulfillment of plans but also the idea that workers should assist other, less productive, workers in the completion of their jobs, and that shock workers should oversee the work of others. 'Izotov schools' were even set up, and Izotovites trained novice workers in their techniques. Socialist competition reached its highest stage in 1935 with the emergence of the Stakhanovite movement. The purpose of that movement was to establish extremely high quotas and standards of production. The campaign was initiated by another Donbas miner, A. *Stakhanov, who set a record for coal mining in a single shift by overfulfilling his quota by a factor of 14. His accomplishments were publicized by the Soviet propaganda machine, and he was held up as an example to other workers. Within weeks hundreds of other workers and work brigades were following his lead and announcing their attainment of much higher production goals. The movement was especially popular among miners and metalworkers, although it spread to almost all branches of the economy. Many of the Stakhanovites were semiskilled workers. Ukraine's prominent Stakhanovites included M. Demchenko, a woman in Cherkasy oblast who harvested 523 centners of sugar beets from a single hectare, and P. Kryvonis, a locomotive engineer who raised his average speed on the Slovianske–Lozova line. Many Stakhanovites became '200ers' or '500ers,' by overfulfilling their production quotas by 200 or 500 percent. Many of the Stakhanovite achievements were spurious: they were usually attained with the help of other workers, better tools and equipment, or reduced job requirements.

Socialist competition was widely used after the Second World War, mostly to rationalize production and improve the use and effectiveness of machinery and equipment. Since the late 1950s the main slogan of the movement was 'Learn, Work, and Live in a Communist Manner.' A major innovation was the use of model workers to fight alcoholism and low morale in the workplace, both common problems in Soviet industry.

Formally, socialist competition was defined as a voluntary expression of working-class initiative. In reality, however, it was organized from above: resolutions of Party plenums, conferences, and congresses were often filled with directives to organize and conduct worker competitions. The competitions involved most of the working population (58.1 percent in 1930 and 85 percent in 1957). In 1976 some 87 million people in the USSR and 21 million in Ukraine took part in some form of competition. Over the years many different approaches were developed to encourage participation. On the eve of the demise of the USSR, popular programs included various *prizes and awards, often financial ones made by the Party, the Communist Youth League, government, or trade unions. Most of the campaigns were organized by the *trade unions. Despite all of these efforts, socialist competition was only partially successful. Soviet production in both industry and agriculture continued to lag considerably behind that of the West in both volume and quality of goods. Worker productivity in the USSR was less than half that in the United States. Only a very small number of model workers or record setters benefited from the material incentives provided by socialist competition. In many cases their achievements resulted in higher quotas and goals for other workers, an outcome that often caused animosity among workers.

Besides those main forms of socialist competition there were others. Soviet sources have counted as many as 300 different campaigns. The vast majority of them, however, were short-lived and had little impact. Imposed by bureaucratic orders from above, the competitions often degenerated into mere formalities, deception, and record falsification. For that reason other ways to stimulate worker interest and initiative, such as *production conferences, were tried, but those measures too were only partially successful.

Socialist International. The name of several different international associations and organizations of socialist or Communist parties. The First International, known as the International Workingmen's Association, was founded on 28 September 1864 in London by some of the most influential British and French trade-union leaders of the time.

The Second Socialist International was founded in Paris in 1889. Unlike the First International, it was a loose federation of national parties and trade unions without individual membership.

After the Bolsheviks seized power in Russia, they established the Third or *Communist International (Comintern) in Moscow, in 1919. It was totally dominated by the

Russian Communist Party (Bolshevik) (RKP[B]) and was used as an instrument of Moscow's foreign policy. The Fourth International was a coalition of parties loyal to L. Trotsky and opposed to the Stalinist Third International. It was founded at a congress in France in 1938. Racked by internal dissent, it split into two factions in 1953. Now, only a few small groups declare allegiance to the Fourth International.

In 1951 the Committee of the International Socialist Conference called a congress in Frankfurt at which the Socialist International was reconstituted. Its headquarters are in London. The membership consists of parties: each has one vote, regardless of size, and unanimity is required for a resolution to be passed. Stressing democracy and civil rights, this international was decidedly anti-Soviet in orientation.

From the 1870s some prominent Ukrainians, such as M. Drahomanov, M. Ziber, and S. Podolynsky, maintained close ties with Western European socialists and socialist organizations. In 1904 the Revolutionary Ukrainian party informed the executive of the Second International about its history and platform. In 1913 delegates of the Ukrainian Social Democratic party (of Western Ukraine) and the Ukrainian Social Democratic Workers' party (USDRP) attended the extraordinary congress of the Second International in Basel. After 1919 the CP(B)U was a member of the Comintern, even though it formed only a section of the RKP(B). The *Communist Party of Western Ukraine was also a member; the *Communist Party of Transcarpathian Ukraine belonged to the Comintern through the Czechoslovak Communist party. In the 1920s Ukrainian issues were raised and discussed frequently in the Comintern. J. Stalin's despotic centralism eventually destroyed the autonomy of Ukrainian Communists.

In the interwar period delegates from the émigré USDRP attended congresses and conferences of the Labor and Socialist International, and one of the party's leaders, P. Fedenko, served on the association's executive committee. The Ukrainian Socialist Radical party and the Ukrainian Socialist party also belonged to this international. These Ukrainian parties consistently attacked Soviet Communism and advocated Ukrainian independence at the international forum.

Socialist realism. The only officially sanctioned so-called 'creative method' in Soviet literature and art from the early 1930s. The revolutionary poets of the late 19th century (H.L. Veier, E. Potier) and the Russian revolutionary democrats (V. Belinsky, M. Chernyshevsky, M. Dobroliubov) were considered its forerunners. To a certain extent the title 'revolutionary democrat' was also applied, artificially, to I. Franko, Lesia Ukrainka, and M. Kotsiubynsky. M. Gorky is acknowledged as the writer who laid down the principles of socialist realism before 1917, and who was its leading practitioner in the early years of Soviet rule. Before its official adoption as the prescribed style the *All-Ukrainian Association of Proletarian Writers promoted their version of the form, 'proletarian realism.' The term socialist realism and its theoretical underpinnings were officially adopted by the First Congress of Writers of

the USSR in August 1934, when the Soviet Writers' Union was established. Those active in other fields (theater, painting, sculpture, cinema, music) were also organized into single artistic unions, and also adopted socialist realism as the basic creative method.

According to the resolution of the first Writers' Union congress: 'socialist realism demands a true, historical, and concrete depiction of reality in its revolutionary development. The realism and historical concreteness of the artistic rendering of reality must be tied to the ideological re-education and training of workers in the spirit of socialism. Socialist realism guarantees the artist exclusive control over creative initiative, and choice of form, style, and genre.' As applied, however, those principles had a very narrow meaning. The 'true depiction of reality in its revolutionary development' meant that literature and art were to serve as glorifying illustrations of the CPSU's policies, and to portray what was hoped for in such a way that it seemed real. Deviations into truly realistic portrayals of Soviet reality and its deficiencies were attacked as 'slavishness to facts' or 'anti-Soviet agitation and propaganda.' That response resulted in the formulation of such theoretical conceptions as the 'varnishing of reality' and the 'theory of no conflict,' that is, painting reality with a rosy hue.

Socialist realism's need to hide falsity of content gave rise to certain characteristics of style in all Soviet literature and art. In literature it was responsible for the presence of compendiums of useless information and statistical data, the use of artificial verbal ornamentation, the overuse of epithets and similes (even in the works of superior writers, such as O. Honchar and P. Zahrebelny), a decline in the lexicon to the level of journalistic vocabulary, a reliance on artificial pathos that dipped into sentimentality (in the novels of M. Stelmakh, the biographical narratives of Yu. Martych), and a preponderance of didacticism and moralizing. In painting it resulted in excessive pathos, photographism (with gestures and motion depicted as if frozen by photographs), and the tendency to dwell on luxurious uniforms and interiors.

Changes in socialist realism occurred in step with changes in the regime. The initial programmatic resolution that guaranteed choice of form, style, and genre had no practical application. In its first period (1934-41) socialist realism's range in prose and painting was restricted to depictions of industrialization and collectivization (in painting, the focus was mainly on portraits and monuments to J. Stalin). Poetry was reduced to stilted odes to the Party and its leaders (eg, P. Tychna's *Partiia vede* [The Party Leads the Way] and M. Rylsky's *Pisnia pro Stalina* [Song about Stalin]). Music consisted of cantatas dedicated to the Party. During the Second World War art was mainly the patriotic poster and the satirical caricature, and literature was dominated by patriotic themes and publicistic style (eg, narratives and articles of O. Dovzhenko). Gradually the theme of glorification of the Russian 'big brother' crept in, and it was intensified after the war. The theme reached a climax in the 'unification celebrations' of 1954. It was reflected in various genres and media: in prose, in works such as N. Rybak's *Pereiaslavs'ka rada* (The Pereiaslav Council, 2 vols, 1948, 1953), and in painting, in M. Derehus's *Pereiaslav Council* (1952) and M. Khmelko's *Forever with Moscow, Forever with the Russian People* (1951-4). The theme remained constant in Ukrainian socialist-realist literature and art; only its intensity varied.

Socialist realism was enforced in literature and the other arts by means of repressions. In the 1930s over 300 writers were executed or otherwise prevented from publishing. Some painters, such as A. Petrytsky, survived the terror, but their works were destroyed (an extensive series of Petrytsky's portraits). Many others, including M. Boichuk, S. Nalepinska, V. Sedliar, and I. Padalka, were shot. Theater was also decimated in the name of the new form. The Berezil theater was liquidated, and its founder and director, L. Kurbas, died in a prison camp, as did its principal playwright, M. Kulish. Its major actors, such as Y. Hirniak, were imprisoned. Writers of the brief literary renaissance of the 1950s and 1960s were persecuted because of their deviations from the officially sanctioned method. Departures from the norm were labeled 'formalism,' 'abstractionism,' or 'modernism' and proscribed. In its last stage socialist realism was praised for its Party orientation and its 'populism' (*narodnist*). Those terms continued to be used as synonyms for devoted service to the interests of the Party. Socialist realism also demanded isolation from the literature and art of the West, with particular emphasis on the 'revisionism' of Western Communist critics (eg, R. Garaudy, *Réalisme sans rivages*).

Theoreticians of socialist realism based their writings on those of K. Marx, F. Engels, and V. Lenin, various resolutions of the CPSU, and the speeches of various Party leaders. A large body of writings created in the last few decades consists entirely of dogmatic pronouncements and tendentious interpretations of artificially chosen quotes from officially accepted works.

Since the announcement of Perestroika and Glasnost in 1985, there have been signs that the dogmatic constraints of socialist realism have been widened. Indeed, reference to socialist realism has largely been avoided, especially since the breakup of the Soviet Union.

Socialist Revolutionaries. Representatives of a current within the Russian Empire's revolutionary movement that tried to create a synthesis of *populism and *Marxism to appeal to peasants as well as workers and the radical intelligentsia. Socialist revolutionary (SR) groups first emerged in the late 1890s. Among the earliest SR formations was the Party of Socialist Revolutionaries, founded in 1897 and known as the Southern party because it had branches primarily in the cities of Ukraine (including Kharkiv and Odessa) and southern Russia. At the end of 1901 the Southern party joined with other SR groups to form the Socialist Revolutionary party. The SRS became particularly interested in the peasantry as a result of the peasant unrest that broke out in Poltava and Kharkiv gubernias in 1902. They formed a Peasant Union in 1902, and in the program adopted at their first party congress in 1905 they called for the socialization of the land. The 1905 congress also created a regional party organization for Ukraine, uniting the pre-existing Kharkiv, Kiev, Poltava, Volhynia, and Voronezh party committees.

The SR movement in Ukraine was primarily connected with the Russian revolutionary movement, but groups of Ukrainian SRS also appeared between 1905 and 1917. Not until revolution broke out in the spring of 1917, however, was the *Ukrainian Party of Socialist Revolutionaries (UPSR) formally founded in Kiev. The UPSR played a large role in the revolutionary events in Ukraine during the next few years.

The Russian SRS had included federalism in their program prior to the revolution, but in the spring of 1917 they generally adopted a hostile attitude to the Central Rada's strivings for Ukrainian autonomy. Only when the Russian Provisional Government finally made concessions to Ukrainian autonomy in July 1917 did Russian SRS co-operate with the Rada, but they completely opposed the proclamation of Ukrainian independence in January 1918. Prominent Russian SRS in Ukraine during the revolutionary era included A. Zarubin (post and telegraph minister in the autonomous Ukrainian government) and P. Nezlobin (chairman of the Kiev soviet). Although divided over the national question, Russian and Ukrainian SRS ran joint lists in the Kharkiv, Kherson, and Poltava districts during the elections to the all-Russian constituent assembly conducted in late 1917 and early 1918. The election results demonstrated the great popularity of the SRS in Ukraine, where Russian and especially Ukrainian SRS received about two-thirds of the votes cast.

Both the Russian and the Ukrainian SRS split into left and right factions after the October Revolution of 1917, with the left SRS supporting the Bolsheviks. After the Bolsheviks solidified their power, SR influence was eliminated in Soviet Ukraine, as right SRS emigrated abroad, and left SRS merged with the Bolsheviks. The Russian SRS disappeared in late 1919, and the Ukrainian SRS (including the pro-Bolshevik *Borotbists), in 1920–1. Ukrainian SRS in western Volhynia, which came under Polish rule in 1920, joined with the Galician-based *Ukrainian Radical party in 1926 to form the Ukrainian Socialist Radical party. The UPSR also continued to exist in the emigration, although it was riven by factional divisions in 1921.

Sociedade dos Amigos da Cultura Ucranaiana. See Society of Friends of Ukrainian Culture.

Society for the Advancement of Ruthenian Art (*Tovarystvo dlia rozvoiu ruskoi shtuky*). The first Ukrainian organization in Galicia concerned with the development of 'Ruthenian art in general, and painting, sculpture, and jewelry-making in particular,' the financial well-being of its members, and the organization of exhibitions. The society was founded in 1898 in Lviv. Its board of directors was headed by V. *Nahirny, and Yu. *Pankevych headed its executive. The artists who participated in its first exhibition (1899) were Pankevych, I. Trush, A. Pylykhovsky, O. Skrutok, and K. Ustyianovych. The participants in the society's second exhibition (1900) included the aforementioned and O. Novakivsky, O. Kurylas, T. Kopystynsky, A. Manastyrsky, M. Ivasiuk, Ye. Turbatsky, Ya. Pstrak, O. Kosanovsky, and the wood sculptor A. Kavka. The third exhibition was held in 1903. The society continued to function until the First World War, but after it began accepting folk artisans as members, many of its original members left to join the *Society of Friends of Ukrainian Scholarship, Literature, and Art.

Society for the Advancement of Ukrainian Scholarship. See Association for the Advancement of Ukrainian Studies.

Society for the Preservation of Soldiers' Graves (Tovarystvo okhorony voiennykh mohyl). An organization set up in Lviv in 1927 to care for the graves of Ukrainian soldiers who were killed or died during 1914–20. Headed by B. Yaniv, the society ensured that each grave was marked by a military stone cross and kept in good order. It had 32 chapters in Galicia and was active until 1939.

Society for the Promotion of the Arts (Obshchestvo pooshchreniia khudozhestv). A philanthropic society of art patrons, established in 1821 in St Petersburg. It organized art exhibitions, lotteries, competitions, and sales of artworks; financed trips abroad for artists; and published art textbooks and journals, such as *Iskusstvo i khudozhestvennaia promyshlennost'* (1898–1902) and *Khudozhestvennyiia sokrovishcha Rossii* (1901–7). It also maintained a museum of applied art and a drawing school (from 1857). The society supported many Ukrainian artists, including T. Shevchenko, I. Soshenko, A. Mokrytsky, H. Lapchenko, P. Boryspolets, K. Trutovsky, S. Vasylykivsky, and M. Samokhysh. It was active until 1929.

Society of Agriculture of Southern Russia (Obshchestvo selskogo khoziaistva iuzhnoi Rossii). The first agricultural society in Ukraine and one of the first in the Russian Empire. Founded on the initiative of Prince M. *Vorontsov in 1828, it made its head office in Odessa and extended its operations throughout Kherson, Katerynoslav, Tavriia, and Bessarabia gubernias. To improve farming in the region the society supported scientific research, disseminated agricultural information, and promoted various enterprises related to farming. Besides funding experiments on local and foreign grains, feed crops, and industrial crops, the society ran an experimental fruit farm, helped to introduce meteorological monitoring, prepared soil maps of the southern gubernias, provided financial assistance to university students, held agricultural exhibitions, contests, and conferences, and encouraged railroad construction, the digging of artesian wells, farm-machine building and distribution, and forestation. From its inception the society published its own journal, titled at first *Listki* and then *Zapiski*. Its efforts at improving viticulture, sheep raising, and orcharding were particularly important in the economic development of Southern Ukraine.

Society of Antiquities and Art (Kyivske tovarystvo starozhytnosti i mystetstva). A society founded in 1897 on the basis of the Kiev Society of Art Promoters and an organizing committee for the creation of a museum in Kiev. It was led by B. Khanenko and numbered about 200 members. The artifacts collected by the society were kept in the Kiev Municipal Museum of Antiquities and Art (later the Kiev Museum of Ukrainian Art). The society existed until 1908. Its historical collections formed the basis of the Historical Museum of the Ukrainian SSR in 1936, and its folk-art collections formed the basis of the Kiev Museum of Ukrainian Decorative Folk Art (1964).

Society of Argentinian-Ukrainian Graduates (Tovarystvo ukrainskykh vysokoshkilnykh Argentyny, or TUVa; Spanish: La Unión de Graduados Ucranios de la República Argentina). An association of professional men and women established in 1971 in Buenos Aires to promote the development of the Ukrainian community and the growth of Ukrainian culture in Latin America. Its leading founders were O. Yakhno and V. Pokhyliak. Its two professional sections, medical and engineering, maintain contacts with Ukrainian professional associations in North America. The society organizes lectures and panel discussions by Argentinian and Ukrainian scholars and political figures as well as national conferences of Ukrainian graduates in Argentina (1984, 1987). The presidents of the society have included Yakhno and Yu. Ivanyk.

Society of Contributors to the Fine Arts in Transcarpathian Ruthenia (Tovarystvo deiatelei zobrazhachykh iskvstv na Podkarpatskoi Rusi). A society of artists, established in 1931 in Uzhhorod and headed by A. Erdeli. It had 40 non-Ukrainian and Ukrainian members, including Y. Bokshai, A. Boretsky, A. Dobosh, and E. Konratovych. The society held annual exhibitions, and its members received government travel grants. After the imposition of Hungarian rule in 1939, the society was renamed the Union of Subcarpathian Artists.

Society of Economists (Tovarystvo ekonomistiv pry VUAN). An association formed in 1919 to support research and publications on the economic history and current economic conditions of Ukraine. It consisted of three sections: statistics (headed by M. Ptukha), the study of the Ukrainian economy (headed by K. Vobly), and the study of the cooperative movement (headed by P. Pozharsky). The society was headed by Vobly (president), H. Kryvchenko (vice-president), and A. Laponohov (academic secretary). In 1929–30 it had 135 members. The society sponsored several VUAN publications. In the early 1930s it was abolished along with many other VUAN institutes and societies.

Society of Former Combatants of the Ukrainian Republican Democratic Army in France (Tovarystvo buvshykh voiakiv Armii UNR u Frantsii). A veterans' organization established in Paris in 1927 for the furthering of traditions of armed struggle for Ukrainian statehood. In 1939 it had 22 branches in France (the number declined to 12 in 1945) with nearly 1,000 members. It published various educational and informative materials until 1939 and worked with the Union of Ukrainian Emigré Organizations in France as well as French veterans' groups and other Ukrainian combatants' organizations. In 1961 the society split into two groups of the same name; they were reunited in 1977. The society has been headed by Gen O. *Udovychenko (1927–75), V. Kalinichenko (1975–9), Ya. Musianovych (1979–82), and (since 1982) Yu. Yermiiv. Its long-standing secretary was M. Kovalsky. Members included V. Lazarkevych, K. Mytrovych, V. Nedaikaska, M. Panasiuk, A. Polovyk, V. Solonar, L. Vasyliv, P. Verzhbitsky, and P. Yosypshyn. In 1928–9 the society published the journal *Viis'kova sprava* (edited by I. Rudychiv), and later, a bulletin, which continues to appear.

Society of Friends of Education (Tovarystvo prykhylnykiv osvity). A students' aid society founded in Lviv in 1927 by the Shevchenko Scientific Society. Its aim was to assist needy Ukrainian students attending institutions of higher learning. The society was the guardian of the Academic Students' Home in Lviv; it also helped run the refectory, gave loans to students, and so on. Its heads were V. Detsykevych and, from 1933, O. Kulchytsky. The society was dissolved in 1934 by the Polish authorities.

Society of Friends of Ukrainian Culture (Tovarystvo prykhylnykiv ukrainskoi kultury; Portuguese: Sociedade dos Amigos da Cultura Ucrâniana). An organization established at the General Congress of Brazilian Ukrainians in Curitiba in 1947. It was based in the country's larger settlements, and it published the *Boletim Informativo* in Portuguese in 1950–61 and broadcast a radio program during approximately the same period. With an out-migration of active supporters to North America in 1960–5, the society lost much of its dynamism. In 1975 it had three branches in Paraná and one in Rio Grande do Sul. Leading figures in the group included Rev M. Ivaniv, Rev M. Kaminsky, O. Dilai, R. Kupchynsky, and M. Hets.

Society of Friends of Ukrainian Scholarship, Literature, and Art (Tovarystvo prykhylnykiv ukrainskoi nauky, literatury i shtuky). A society founded on the initiative of M. *Hrushevsky and I. *Trush in Lviv in 1904. It united scholars, writers, and artists from Russian-ruled and Western Ukraine and popularized their work. In 1904 it organized a summer school for students from Russian-ruled Ukraine, where were offered courses in Ukrainian literature (taught by I. Franko), history (Hrushevsky), anthropology (F. Vovk), language (I. Bryk), the history of socialism (M. Hankevych), and the history of Galicia (K. Studynsky). In 1905 it sponsored the All-Ukrainian Exhibition of Art and Crafts in Lviv. The society also published several books. Although its activities slowly waned, the society continued to exist until the First World War. Its long-time president was Hrushevsky, and its secretaries were Trush and M. Mochulsky. Among its more prominent members were Franko, M. Arkas, M. Lysenko, V. Hnatiuk, F. Krasytshy, Yu. Pankevych, and M. Boichuk.

Society of Kiev Physicians. See Kiev Medical Society.

Society of Kuban Researchers (Russian: Obshchestvo liubitelei izucheniia Kubanskoi oblasti). A regional studies society in Katerynodar that was active in the years 1896–1917. Works on the Kuban's natural environment, history, ethnology, and statistics were published in its *Izvestiia* (6 vols, 1899–1913).

Society of Researchers of Ukrainian History, Literature, and Language. See Leningrad Society of Researchers of Ukrainian History, Literature, and Language.

Society of Ruthenian Church Communities in the USA and Canada. See Association of Ruthenian Church Communities in the USA and Canada.

Society of Ruthenian Ladies (Obshchestvo rusykh [ruskykh] dam). A Russophile women's organization.

Founded in Lviv in 1878, the society was the first organization of Ukrainian women. Its original aims were to decorate the altar of the Dormition Church in Lviv, to provide educational scholarships for needy Ukrainian girls, and to engage in general philanthropic work. In the mid-1880s it had about a hundred members. It published the children's fortnightly *Vinochek* (1904–8).

Society of Saint Andrew (Tovarystvo sviatoho Andriia). An association of Ukrainian Catholic priests in Galicia founded in 1930 in Stryi deanery. Its statute, which was confirmed by Metropolitan A. Sheptytsky in May 1931, stated that the society's members were to provide moral and material support to each other, their families, and the community at large. The society's chief organizer was Rev Y. Savytsky, a catechist in Stryi and later the director of its central office in Lviv. Its president was Rev Yu. Dzerovych. Deanery chapters were headed by protopresbyters. The society organized religious retreats for priests and missions, published the church statute and a religious almanac, and ran a sanatorium in Hrebeniv, Stryi county. It was forcibly abolished after the 1939 Soviet occupation of Galicia.

Society of Saint Basil the Great (Obshchestvo sv. Vasilii Velikogo). A Russophile cultural-educational society established in Uzhhorod in 1864 by O. Dukhnovych for the purpose of spreading education and preserving the religious and national traditions of the Ruthenian people of Transcarpathia. Headed by I. Rakovsky (president), A. Dobriansky (honorary president), and I. Mondok (secretary) and supported by bishops V. Popovych and Y. Gaganets, the society grew quickly to about 500 members, mostly clerical and secular intelligentsia. It published school texts, literary works, and periodicals, such as **Svit* (1867–71), *Novyi svit* (1871–2), **Karpats'* (1873–86), **Uchytel'* (1867), and **Nauka* (1897–1902). The language of its publication was an artificial mixture of Russian, Church Slavonic, and the vernacular. Owing to the intervention of the Hungarian authorities and pressure from Bishop S. Pankovych, the society changed its orientation in the 1870s to a pro-Hungarian one and began to decline. In 1895 a group of young populist-minded priests, including A. Voloshyn, V. Hadzhega, and P. Gebei, tried to revitalize it, but without success. In 1902 the society was dissolved, and its assets were transferred to the new commercial publishing venture *Unii.

Society of Saint John the Baptist (Tovarystvo sv. Ioana Khrystytelia; also Obshchestvo sv. Ioana Krestitelia). An educational society founded in September 1862 in Prešov by O. *Dukhnovych and A. *Dobriansky. Its purpose was to promote a national renaissance by providing financial aid in the form of loans and bursaries to poor students as well as peasants and even whole organizations. The society maintained a student residence in Prešov under Dukhnovych's management (1863–5). Headed by A. Dobriansky and supported by Bishop Y. Gaganets, the society had a membership of over 400. After Dukhnovych's death in 1865 the society declined, and by the end of the decade it had ceased to exist.

Society of Saint Paul the Apostle (Tovarystvo sv. apostola Pavla u Lvovi). A Ukrainian Catholic religious society founded in Lviv in 1897. It was formed under the influence of the social action ideas espoused by Pope *Leo XIII. Until the First World War it sought mainly to infuse a (Catholic) religious consciousness into Galician national populism, which had been marked by a spirit of secular liberalism or even radicalism. Indirectly it also promoted a sense of Ukrainophilism among the often Russophile Galician clergy. After the war the society promoted charitable work, particularly among orphans and other war victims. It published a series of nearly 50 popular booklets and the journal **Nyva* and led a campaign against attempts to enforce celibacy among the clergy in Stanyславiv and Peremyshl eparchies. After sending a memorandum to the League of Nations in 1925 regarding the persecution of the Ukrainian clergy by Polish authorities, the society was forcibly liquidated.

Society of School Education (Tovarystvo shkilnoi osvity; full name: Society for the Dissemination of School Education in Ukraine [Tovarystvo rozpovsiudzhennia shkilnoi osvity na Ukraini]). A Ukrainian educational and pedagogical society founded in March 1917 in Kiev by Ukrainian teachers. Its goal was to organize Ukrainian education. The ruling body of the society was the Council of the Society, the first head of which was I. Steshenko. The society organized the first all-Ukrainian conference of teachers, held on 5–6 April 1917, and the first Ukrainian gymnasium in Kiev. It set up a string of practical courses in Ukrainian studies for teachers. The society published textbooks and developed a Ukrainian educational terminology. It took part in the operations of the General Secretariat of the Ukrainian Central Rada. During the occupation of Ukraine by General A. Denikin's Volunteer Army, in the second half of 1919, the society assumed complete responsibility for maintaining Ukrainian-language education, for defending it against the administration, and for establishing a financial base to ensure its continuation. It ran its operations on generous donations from the Ukrainian community and the Ukrainian co-operative movement.

Society of South Russian Artists (Obshchestvo iuzhnorusskikh khudozhnikov). An association of artists who lived in Southern Ukraine, established in Odessa in 1890. Among its founders were K. Kostandi (its president from 1902 to 1921), M. Kuznetsov, H. Ladyzhensky, M. Skadovsky, M. Kravchenko, V. Edvards, A. Popov, and A. Rozmaritsyn. Later members included I. Aivazovsky, Yu. Bershadsky, Ye. Bukovetsky, P. Volokidin, D. Krainiev, P. Levchenko, M. Pymonenko, V. Zauze, and P. Nilus. The society organized annual general exhibitions and more frequent solo shows of works by its members. It participated in the work of the Odessa Art School and helped found the Odessa City Museum of Art. Its activities ceased in 1922 after the death of Kostandi. A book about the society by V. Afanasiev was published in Kiev in 1961.

Society of Teachers in Higher Schools. See Skovoroda Society of Higher School Teachers.

Society of Ukrainian Actors (Tovarystvo ukrainskykh artystiv pid orudoiu I. Marianenka). A theater under I.

Marianenko, created in Kiev in January 1915 with some actors who had left *Sadovsky's Theater, among them M. Zankovetska, P. Saksahansky, O. Polianska, T. Sadovska-Tymkivska, V. Vasylo, L. Linytska, M. Petlishenko, and S. Butovsky; the young actors B. *Romanytsky and I. Kozlovsky began their theatrical careers in this troupe. It successfully toured Kamianets-Podilskyi and Yelysavethrad in the summer of 1915 and spent the winter in Odessa. Its repertoire consisted of Ukrainian classical populist-realistic plays directed by Saksahansky, and O. Koshyts's student choir participated in some productions. The troupe was active until 1916. Marianenko became director of the *Ukrainian National Theater; Zankovetska and Saksahansky continued working with a group of young actors until early 1918.

Society of Ukrainian Co-operators (Tovarystvo ukrainskykh kooperativ). An organization of co-operative leaders and theoreticians, established in June 1936 in Lviv by the Audit Union of Ukrainian Co-operatives. In 1937 it had 2,285 members. The president was Yu. Pavlykovsky, and the secretary A. Zhuk. The society organized three co-operative festivals (in 1936, 1937, and 1938) with lectures, discussions, and displays of co-operative literature and periodicals. In 1938 it produced *Do dobra i krasny* (To Goodness and Beauty), a film on the co-operative movement by Yu. Dorosh, written by R. Kupchynsky and V. Levytsky-Sofroniv. The society ceased to exist after the Soviet occupation of Western Ukraine in 1939.

Society of Ukrainian Engineers and Associates in Canada (Tovarystvo ukrainskykh inzheneriv u Kanadi, or TUIK). A professional association established in Toronto in 1950 to cultivate social contacts among Ukrainian engineers, further their professional development, and maintain relations with similar non-Ukrainian associations. As branches sprang up in Montreal, Sarnia, Windsor, Winnipeg, Montreal, and Edmonton, a national executive distinct from the Toronto society was set up (1954). From 1953 to 1975 the society was known as the Ukrainian Technical Society of Canada. TUIK organizes scientific lectures, symposia, and conferences; contributes financial aid to Ukrainian academic institutions; and publishes an annual bulletin (since 1984) and the quarterly *Visti ukrains'kykh inzheneriv* (in partnership with the Ukrainian Engineers' Society of America). Since 1955 it has held eight international conferences with its American counterpart. A brief history of the society was prepared by Yu. Kurys in 1987, and in 1992 the society published a book on Ukrainian engineers in the diaspora.

Society of Ukrainian Engineers in Prague (Tovarystvo ukrainskykh inzheneriv u Prazi, or TUI). A professional organization set up in 1930 in Prague. During the next nine years it helped members with employment and legal problems, maintained contacts with Czech professional associations and the Ukrainian Technical Society in Lviv, and organized lectures for the Ukrainian community. It was a founding member of the Union of Ukrainian Engineers' Organizations Abroad, from which it seceded in 1932. The society's membership grew from 53 in 1930 to 150 in 1938. Its leading members included A. Halka, V. Domanytsky, P. Stetskiy, M. Hlavach, O. Dolny, F. Serbyn, P. Zeleny, A. Keivan, and R. Karatnytsky.

Society of Ukrainian Jurists (Tovarystvo ukrainskykh pravnykiv). A society of legal scholars established in Kiev in 1921 within the All-Ukrainian Academy of Sciences to conduct legal research and disseminate legal knowledge. Its members, varying from 35 to 70 in number, were active in various commissions and sections of the academy. The society's presidents were O. Levytsky, O. Huliaiev, and O. Malynovsky; its secretary was B. Yazlovsky. In the late 1920s the society was suppressed by the Soviet government.

Society of Ukrainian Lawyers (Tovarystvo ukrainskykh pravnykiv). An association of various legal specialists, including scholars, in Galicia, founded in Lviv in 1909. Its purpose was to promote the participation of Ukrainian lawyers in public life and to improve their professional qualifications. S. Dnistriansky was the first president. The more notable presidents in the interwar period were V. Detsykevych and Z. Lukavetsky. The society published *Pravnychiy vistnyk* (1910–13), and in 1914 it organized a national congress in Lviv. Its members collaborated with the Union of Ukrainian Lawyers in publishing the review *Zhyttia i pravo* (1928–39). After the Soviet occupation of Western Ukraine in 1939, the society was dissolved.

Society of Ukrainian Lawyers in New York. See Association of Ukrainian Lawyers.

Society of Ukrainian Progressives (Tovarystvo ukrainskykh postupovtsiv, or TUP). A clandestine, non-partisan political and civic organization of Ukrainians in the Russian Empire. It was founded in 1908 at the instigation of former members of the Ukrainian Democratic Radical party to co-ordinate the Ukrainian national movement and to protect it from the rising wave of reaction by the Russian government and Russian nationalism after the dissolution of the Second State Duma (June 1907). In addition to Democratic Radicals, some Social Democrats and politically unaffiliated people belonged to TUP. Its highest governing body, the annually elected council, included figures such as M. Hrushevsky, Ye. Chykalenko, I. Shrah, S. Yefremov, P. Stebnytsky, S. Petliura, V. Vynnychenko, N. Hryhoriiv, F. Matushevsky, D. Doroshenko, V. Prokopovych, A. Viazlov, T. Shteingel, and L. Starytska-Cherniakhivska.

The central office of TUP in Kiev, where there were also several branches (hromadas), co-ordinated the activities of about 60 TUP hromadas in Ukraine as well as 2 in St Petersburg and 1 in Moscow. The group's main aim was to defend the gains of the Ukrainian movement and to demand further rights. Its minimal program was the Ukrainization of elementary education, the introduction of the Ukrainian language and of Ukrainian literature and history instruction in secondary and higher schools, and permission for the use of Ukrainian in public institutions, the courts, and the church. Its political platform demanded constitutional parliamentarism and autonomy for Ukraine. Until 1917 TUP, in effect, directed the Ukrainian movement in central Ukraine, in that it co-ordinated the work of the Prosvita societies and various cultural and educational clubs and collaborated closely with the Ukrainian Scientific Society in Kiev. It owned the Ukrainian bookstore in Kiev (the former publisher of *Kievskaya stari-*

na). The Kiev daily **Rada* and the Moscow journal **Ukrainskaia zhizn'* were its unofficial publications.

Through its hromada in St Petersburg TUP maintained friendly contacts with the opposition in the Third and Fourth state dumas, particularly with the Constitutional Democratic party (P. Miliukov and N. Nekrasov) and a group of autonomists-federalists (V. Obninsky), who recognized Ukraine's right to national and cultural development, and with Russian scholars, such as A. Shakhmatov, F. Korsh, and S. Melgunov.

In September 1914 TUP adopted a neutral position on the war and the belligerents: it disapproved of the pro-Russian declaration of *Ukrainskaia zhizn'* and was critical (November 1914) of the activities of the Union for the Liberation of Ukraine in Austria. At the end of 1914, members of TUP (beginning with Hrushevsky) were taken into custody. In December 1914 the society issued the declaration 'Our Position,' in which it supported 'the democratic autonomy of Ukraine, guaranteed also by the federation of equal nations.' In January 1917 it responded favorably to American president W. Wilson's peace efforts and expressed 'the will of the Ukrainian people for independent development.'

On 17 March 1917, after the February Revolution, TUP convened a conference of Ukrainian organizations and parties in Kiev and set up the Central Rada. At its final conference on 7 April in Kiev, TUP decided to fight for Ukraine's autonomy by legal means and changed its name to the Union of Ukrainian Autonomists-Federalists, which in June of that year turned into the Ukrainian Party of Socialists-Federalists.

Society of Ukrainian Writers and Journalists (Tovarystvo ukrainskykh pismennykiv i zhurnalistiv). An organization uniting nationally conscious Ukrainian writers and journalists in Transcarpathia, based from 1930 to 1938 in Uzhhorod and in 1938–9 in Khust. Leading members were V. Grendzha-Donsky, S. Sabol, D. Popovych, A. Voron, and Yu. Borshosh-Kumiatsky. The society published several literary works and two almanacs.

Society of United Slavs (Tovarystvo ziednanykh slovian). A clandestine revolutionary organization founded at the beginning of 1823 in Zviahel by the brothers and officers P. and A. Borysov and the Polish revolutionary J. Lubliński. It had several dozen members, mostly lower-rank officers of troops stationed in Volhynia and the Kiev region as well as local petty civil servants. Most members were Ukrainian: the Borysov brothers, I. Horbachevsky, Ya. Andriievych, P. Hromnytsky, Ya. Drahomanov, M. Lisovsky, and I. Sukhyniv. The head of the society was P. Borysov, and its ideologists were J. Lubliński and I. *Horbachevsky.

The main aims of the society were to liberate the Slavs from foreign rule, abolish the monarchical system, reconcile the Slavic nations, and set up a federation of democratic Slavic republics, each with its own legislature and executive. The federation was to include Russians (embracing also Ukrainians and Belarusians), Poles, Hun-

garians (together with Slavs in Hungary), Bohemians, Croats, Dalmatians, Serbs, and Moravians. The social program of the society proposed to abolish serfdom and to diminish class inequalities. The society believed that the people, not just the army, had to be prepared for the revolution. The ideological principles and political program of the society were formulated in its oath and catechism (consisting of 17 rules).

In September 1825 the Society of United Slavs joined with the Southern Society (of *Decembrists) but retained its own program and separate executive. The society's members were the most active participants in the uprising of Chernihiv Regiment in Trylisy on 10–15 January 1826. Most of them were sentenced to hard labor in Siberia. The society's ideas influenced the program of the *Cyril and Methodius Brotherhood.

Society of UNR Army Soldiers (Tovarystvo voiakiv Armii UNR). An organization of UNR Army veterans formed in 1924 in Kalisz, Poland. Its purpose was to help members cope as political émigrés in Poland, and thus to preserve cadres for a future Ukrainian army. Its head office was eventually moved to Warsaw, where it published a bulletin to maintain contact among its four chapters. Its presidents were V. Kushch and M. Bezruchko. In 1939 the society was dissolved by the German authorities.

Society of Veterans of the Ukrainian Insurgent Army (UPA) in Canada (Tovarystvo kolyshnykh voiakiv UPA v Kanadi). A veterans' association established in Toronto in 1951 by former UPA members. With a membership based largely in Toronto, Montreal, Winnipeg, and Edmonton, the society has consistently supported the Ukrainian independence movement. It has published or cosponsored a number of brochures and books (including its own commemorative issue in 1982) and has prepared an irregular section for the newspaper *Homini Ukrainy* under the title 'Voiaits'ka vatra' (The Soldier's Campfire) since 1957. It maintains cordial relations with other Ukrainian veterans' associations. Its presidents have included S. Kotelets, M. Koshyk, I. Kozak, V. Kozak, and M. Kulyk.

Society of Volyn (Tovarystvo Volyn). An association of Volhynians founded by M. Dzivak in New York in 1951 to maintain contacts among former inhabitants of Volhynia, to provide aid and moral support to needy members, and to publish materials on Volhynia. Branches of the New York society sprang up in Cleveland and Buffalo (1953), and similar societies appeared in Winnipeg (1950) and Toronto (1951). Two issues of the quarterly *Volyn'* came out in New York in 1951, edited by A. Trachuk. Since 1953 the society has collaborated with the *Research Institute of Volyn in Winnipeg in publishing the popular chronicle of Volhynian studies *Litopys Volyni* and various monographs and collections.

Society of Writers and Journalists (Tovarystvo pys'mennykiv i zhurnalistiv im. Ivana Franka). A professional

The executive of the Society of Writers and Journalists. Sitting, from left: Ivan Kvasnytsia, Konstantyna Malyska, Vasyl Stefanyk (president), Mykhailo Rudnytsky (vice-president), Kyrylo Valzhetsky; standing: Ivan Nimchuk, Dmytro Paliiv, Lev Hankevych, Vasyl Mudry, Lev Lepky

association of Western Ukrainian litterateurs, which existed from 1925 to 1939. It was based in Lviv, and had about 60 full and candidate members. From 1933 on it held competitions and gave annual awards for the best literary works. The society was headed by A. Chaikovsky, V. Stefanyk, V. Shchurat, B. Lepky, and, from 1934, R. Kupchynsky.

Socinian schools (*sotsyniianski shkoly*). Educational institutions founded in Ukraine by the *Socinians. The schools existed from the end of the 16th to the first half of the 17th century. The most significant of the schools was in Kyselyn ([Kysylyn] now in Volhynia oblast); it was founded in 1612. Attempts were made to have it reorganized as an academy. Other well-known schools were in *Hoshcha, Liakhivtsi, and Cherniakhiv. The program of study placed great emphasis on the development of rational thought, mathematics, philosophy, rhetoric, Latin, and anti-Catholic polemics. Protestant scholars and publicists, such as O. Kysil, M. Tverdokhlib, P. Stehman, and S. Nemyrych, taught in these schools. The schools were closed in 1658 after the Socinian sect was banned by the Polish parliament.

Socinians (*sotsyniiany*). A Protestant sect whose name is derived from that of its Italian founders, F. and L. Socinius (Sozzini). The Socinians were Unitarians; they believed that Christ was a man whose divinity arose from his office and not his nature. They rejected communion and prayers for the dead, but respected the Sabbath and condemned war. Elders and deacons were their community leaders, and only their pastors had the right to conduct services and deliver sermons. The emphasis they placed on education led them to establish schools and publishing houses with high standards.

F. Socinius moved to Cracow in 1579 and assumed the leadership of the previously established Minor Reformed Church (Polish Brethren). Many existing Protestant communities throughout the Polish-Lithuanian Commonwealth adopted Socinianism. The movement also attracted adherents throughout Belarus and Ukraine

(particularly in Volhynia and the Kiev region), including such leading noble families as the Hoisky, Nemyrych, Seniuta, Pronsky, Peresidsky, Chaplych, and Shpanovsky families, many of whom established Socinian schools and communities on their estates. Settlements were also founded in Kyselyn, Hoshcha, Kholmilnyk, Liakhivtsi, Cherniakhiv (near Zhytomyr), Berestechko, and elsewhere. Repressions against the Socinians began in 1644 and intensified after the members of the sect showed support for Charles X Gustav of Sweden in the Polish-Swedish War (1655–7). In 1658 the Polish parliament ordered the Socinians either to convert to Catholicism or to face expulsion and the confiscation of their schools and shrines.

The Socinians were active in producing *polemical literature; some examples, as well as some anti-Socinian versified works of the late 16th century, have been preserved. Among Ukrainian translations of Socinian texts of that period, the most notable is the *Nehalevsky Gospel, published in 1581.

Sociology. The study of human relationships, the rules and norms that guide them, and the development of institutions and movements that conserve and change society. Sociological methodology includes the analysis of data obtained through questionnaires and surveys, the analysis of official statistics, the observation of human interaction, and the study of historical records. Within the discipline of sociology there are numerous specializations and subdivisions, such as the sociology of the family, of work, of political organizations and behavior, of ethnic and race relations, of sex roles, and of aging, and criminology and statistics.

Although sociology as a distinct discipline arose relatively recently, in Ukraine as in other countries elements of sociological thought can be found in earlier periods of history. Sermons and didactic works of the Kievan Rus' period and some of the polemical literature of the Renaissance and baroque periods can be considered forerunners of sociological thought in Ukraine. Ukrainian folklore also provides rich materials for sociological research, with its accurate descriptions of human relations, the nature of kinship ties, and community mores and standards, and Ukrainian ethnographers have contributed significantly to the development of sociology. The works of 19th- and early 20th-century Ukrainian writers and publicists are another important source of sociological information, especially on the behavior of various social groups.

The origins of sociology as a separate discipline in Ukraine can be traced to M. Drahomanov and his circle of scholars, who worked in Geneva in the 1880s. Members of the group included S. Podolynsky, F. Vovk, and V. Navrotsky. Their works appeared in the periodical *Hromada* (Geneva, 1878–82) and in separate monographs. Because sociology became established as a separate discipline later than other branches of the social sciences, however, the precursors of Ukrainian sociological thought

have to be sought in disciplines such as philosophy, historiography, geography, law, economics, and statistics. Scholars in those disciplines played an instrumental role in establishing various sociological schools of thought.

Philosophers such as P. Yurkevych, V. Lesevych, K. Hankevych, I. Fedorovych, and O.(A.) Stronin played significant roles in the development of sociology in Ukraine. Bold conceptions of the development of Ukrainian society and analyses of the relationship among various social groups in Ukraine were advanced by the 18th-century author of *Istoriia Rusov*, by 19th-century historians, such as M. Kostomarov, O. Lazarevsky, V. Antonovych, P. Kulish, Drahomanov, and M. Hrushevsky, and by early 20th-century political thinkers of the state school, such as V. Lypynsky and S. Tomashivsky. Rich sociological material can be found in early 20th-century works on the socioeconomic history of Ukraine by D. Bahalii and members of his school, such as M. Slabchenko and O. Hermaize, and in the anthropological-geographical works of S. Rudnytsky and V. Kubijovyč. Economic theorists such as M. Ziber (who stressed the economic factor in the development of society), Maksym *Kovalevsky (who related the early development of the Slavic tribes to a general schema of human social development), and M. Tuhan-Baranovsky (who developed ethical conceptions of understanding social problems) provided many new ideas for the development of Ukrainian sociology. Legal scholars such as B. *Kistiakovsky (who was the first to explore methodological questions) and S. Dnistriansky (who viewed law as a social construct and thus hastened a sociological analysis of law) occupy an important place in the history of sociology in Ukraine, as do the Ukrainian statisticians O. Rusov and V. and F. Shcherbyna.

The series *Studii z polia suspil'nykh nauk i statystyky* (Studies from the Field of Social Sciences and Statistics), published in Lviv in 1902–12 by the Shevchenko Scientific Society (NTSh), can be considered a turning point in the history of sociological thought in Ukraine. It provided a forum for researchers in social problems and social theory, such as V. Okhrymovych, V. Starosolsky, V. Levynsky, V. Paneiko, M. Lozynsky, M. Hekhter, Mykola Zalizniak, S. Baran, Yu. Okhrymovych, and Yu. Bachynsky. Works with substantial sociological content by that group were also published in the NTSh serials *Chasopys' pravnycha* (1889–1900), *Chasopys' pravnycha i ekonomichna* (1900–6, 1912), and *Zbirnyk Pravnychoi komisii* (1925–9). After the First World War the study of social problems and social thought in Ukraine was centered in the NTSh Economic, Sociological, and Statistical Commission in Lviv.

None of the works by the aforementioned authors, however, were grounded on the principles and methodology of modern sociological theory, and none advanced a novel theory of the development of society. Only after the cataclysms of the First World War, the Revolution of 1917, and the ensuing Ukrainian-Soviet and Ukrainian-Polish wars shook the foundations of the established social order did the need to study new social phenomena become apparent. Ukrainian social and political thought underwent great development in that period, and its authors began to understand that sociology can offer much in the attempt to understand the dynamics of Ukrainian national development.

In the 1920s in the Ukrainian SSR, sociological research was almost entirely conducted by scholars of the VUAN. The VUAN Socioeconomic Division had a department of

sociology, first headed, in 1918–20, by B. Kistiakovsky. After his death the department was headed by the Marxist S. Semkovsky, under whom, however, it did not leave much of a legacy. A Sociological Commission was also founded within the Socioeconomic Division.

After his return to Ukraine in 1924, Hrushevsky devoted much energy to the organization of sociological research in the VUAN. His closest collaborators in that undertaking were Y. Hermaize, P. Klymenko, and K. *Hrushevskya. The VUAN Cabinet for the Study of Primitive Culture, headed by Hrushevskya, focused on genetic sociology. Its members published their contributions in the journal **Pervisne hromadianstvo ta ioho perezhytty na Ukraïni* (1926–9). F. *Savchenko was a major contributor to the field.

Institutes in disciplines close to sociology, most notably the VUAN Demographic Institute headed by M. *Ptukha, provided valuable, pioneering analyses of biosociological processes. They include studies by Ptukha on Ukraine's population, its sex and age structure, and its mortality; by Yu. *Korchak-Chepurkivsky on mortality in Ukraine; by P. Pustokhod on Ukraine's demographic characteristics; by M. *Tratsevsky on natality in Ukraine; and by I. Kovalenko on suicide in Kharkiv.

Ukrains'kyi visnyk eksperymental'noi pedagogiky i refleksolohii (1925–30), published by the Ukrainian Scientific Research Institute of Pedagogy in Kharkiv, carried a number of articles in educational sociology. Research on sociopsychology and collective reflexology was also done by the Ukrainian State Psychoneurological Institute in Kharkiv and the Kiev Psychoneurological Institute.

The Ethnographic Society, the Geographic Society, and especially the Anthropological Society in Ukraine also contributed to the development of sociology. Significant were L. Nikolaev's three volumes of materials on Ukraine's anthropology (1926–7) and the three-volume compendium *Kryminal'na antropolohiia i sudova medytsyna* (Criminal Anthropology and Forensic Medicine, 1926–8).

The Ukrainian Institute of Marxism-Leninism (1922–30) in Kharkiv, despite its partisan approach to problems, published in its journal *Prapor marksyzmu* (1927–30) considerable descriptive sociological material. The institute also had a philosophical-sociological research section and a sociology department, as did its successor, the All-Ukrainian Association of Marxist-Leninist Institutes (1931–6).

The Stalinist reorganization of scholarship in Ukraine in the late 1920s and early 1930s resulted in serious restrictions on academic freedom in sociology. The authorities now allowed only a Marxist approach, and 'sociology' and 'historical materialism' were regarded as synonyms. After 1930 the terror and the repression of Ukrainian scholars put an end to serious sociological research. Most of the pre-Soviet generation of scholars were liquidated, and their replacements avoided sensitive, politically dangerous issues and limited themselves to promoting Marxist-Leninist-Stalinist dogmas and Soviet propaganda. Sociology lost its independent status and was condemned as a 'bourgeois science.' Empirical microsociological and sociometric research was unable to develop, because the use of mathematical statistics, the theory of probability, and structural-functional analysis was banned in the study of Soviet society.

With the Great Terror of 1936–8 sociology disappeared in Ukraine for some 30 years. The first hint that it was being revived came in the early 1960s, when the AN URSS Institute of Philosophy's Department of Atheism carried out field research in Western Ukraine. The results, however, were never published. After the reorganization of the Institute of Philosophy in 1963 sociological research was conducted by its departments of the Methodology of Sociological Inquiry, of the History of Philosophical and Sociological Thought in Ukraine, and of Philosophical Questions of the Construction of Communism. In 1969 the institute began publishing the journal *Filosofs'ka dumka*, which contained some quasi-sociological articles. Because Ukraine did not have a separate scholarly journal devoted to sociology, however, articles on methodological questions and the results of empirical sociological research were never published. The compendium *Sotsioloziia na Ukraïni* (Sociology in Ukraine, 1968) carried some research results and was heralded as the first issue of a Ukrainian annual review of sociology, but subsequent volumes never appeared.

From the 1960s on, sociological research in Ukraine was carried out by special sociological groups affiliated with various CPU republican, raion, and city committees; by departments of the AN URSS (now ANU) Institute of Philosophy; by sociological laboratories at postsecondary institutes and universities; and by laboratories of the sociology of labor, applied sociology, and the scientific organization of labor at Ukraine's large industrial enterprises. Most Ukrainian sociologists belonged to the USSR Sociological Association, which was founded in 1958 as a professional but not scholarly organization. It had five regional branches in Ukraine. With the establishment of the Moscow journal *Sotsiologicheskie issledovaniia* in 1974, Ukrainian sociologists had a forum for the publication of their studies. Most of the research done in Ukraine focused on the socioeconomic problems of regional, urban, and industrial-enterprise development, economic administration, demographic trends, inter-nationality and religious relations, the sociology of science and culture, industrial relations, and child socialization. Applied sociology was the norm. Scholars with unorthodox views, or those who sought to show the true sorry state of Soviet society, were not tolerated.

In the postwar period sociology was one of the most underdeveloped scholarly disciplines in Ukraine and in the USSR as a whole. Several factors account for that state of affairs: virtual total Party control over the topics and methodology of research; the fact that sociology was not considered a separate discipline but part of the study of historical materialism; the significant political risk in carrying out innovative research; stagnation in the development of alternative theoretical principles and models and the paucity of sources for independent analysis; severe restrictions on the publication of social data collected by the state; a shortage of equipment essential for research, such as computers; inadequate conditions for the training of qualified sociologists in Ukraine and the inability to study abroad; and isolation from the international sociological community. Prohibitions on the publication of sociological research potentially embarrassing to the authorities and their unwillingness to listen to, let alone implement, practical recommendations by sociologists also contributed to the degradation of sociology in Ukraine.

During the 1960s and 1970s the most significant sociological work was done by ethnographers who studied ethno-sociological processes in Ukraine, notably V. Naulko and A. Orlov. Non-Ukrainian sociologists also made important contributions. Yu. Arutiunian's Russian monograph on the sociological study of the village (1968), a politically daring study of a Ukrainian village in Zaporizhia, was widely considered one of the best Soviet sociological studies in the period. Works by dissidents, such as I. Dziuba and V. Chornovil, which circulated in *samvydav form, and articles published in the 1970s samvydav journal *Ukrains'kyi visnyk* discussed many interesting sociological questions.

The processes of democratization and openness in the late 1980s brought to the fore the need for objective and comprehensive knowledge about society, and a veritable boom of sociological research has taken place. The reorganization of the USSR Institute of Concrete Sociological Research into the Institute of Sociology and the establishment in 1988 of the All-Union Center for the Study of Public Opinion are manifestations of the new trend. In Ukraine, within the framework of the ANU Institute of Philosophy, the Department of Sociology, the Subdepartment of the Sociology of Mass Media and Public Opinion, the Sector of the Social and Psychological Problems of Public Opinion, and the Sector of the Sociology of Youth have been established. In Kiev there now also exists the Republican Sociological Center of the Sociological Association of Ukraine. Centers in Kiev, Lviv, and Dnipropetrovske now study *public opinion. In 1990, plans were announced for establishment of sociology faculties at Kiev and Kharkiv universities, and the ANU Institute of Sociology, headed by Yu. Pakhomov, was founded in Kiev. Sociological research is being done in the Center of Political Psychology established in 1990 at Kiev University, and the ANU presidium is also engaged in work in the field. Sociological research is published in the journal *Filosofs'ka i sotsiologichna dumka*, which replaced *Filosofs'ka dumka* in 1989, and in separate monographs.

Among the leading sociologists in Ukraine today are L. Sokhan, V. Chornovolenko, O. Yakuba, V. Ossovsky, V. Tykhonovych, A. Ruchka, L. Aza, K. Hryshchenko, Ye. Suimenko, M. Honcharenko, V. Piddubny, and V. Paniotto. Some of the more significant books published in Ukraine in recent years are by V. Voitovych, on the dynamics of prestige and the appeal of professions (1989); by Ye. Holovakha, on young people's life perspectives and professional self-definition (1989); by L. Kravchenko and B. Moroz, on the guarantee of societal renewal (1990); by V. Kusherets and V. Poltorak, on elections to soviets and public opinion (1990); by Paniotto and Yu. Yakovenko, on mail surveys in sociological research (1988); by Paniotto, on experience from models of social processes (1989); and by Ruchka, on the value approach in sociological knowledge (1989). Also published have been the collection *Profesiine samovyzhchennia i trudovyi shliakh molodi* (Professional Self-Definition and the Working Life of Young People, 1987), V. Picha's *After Hours: Soviet Worker at Leisure* (1989), and a multiauthor collection of sociological research on the consequences of the Chornobyl nuclear accident (1990).

Emigré sociology. In the 1920s, Ukrainian émigrés began organizing sociological research. The first significant initiatives were taken by M. Hrushevsky, who had a firm

grasp of the interrelationships among the various social sciences. The *Ukrainian Sociological Institute (1919–24), established in Vienna under his aegis, published M. Shrah's book on the state and socialist society (1923) and V. Starosolsky's book on the theory of the nation (1922).

Ukrainian sociological studies were also continued in Prague, where the Ukrainian Sociological Society was founded in 1923 on the initiative of Mykyta *Shapoval. In 1924 the *Ukrainian Institute of Sociology was established in Prague; it was headed, until his death in 1932, by Shapoval. That institute published the first and only Ukrainian sociological journal, *Suspil'stvo* (6 issues, 1925–7), and works such as an edition of M. Drahomanov's selected works (vol 1, 1937), V. Koval's booklet on the socioeconomic nature of agricultural co-operation (1925), M. Mandryka's booklet on national minorities in international law (1926), V. Petriv's booklet on society and the military (1924), and Shapoval's booklet on Ukrainian sociology (1927), and books on general sociology (1929) and the sociography of Ukraine (1933). Shapoval not only brought together established and young Ukrainian social scientists but also maintained ties with Western sociologists and ensured the institute's participation in international sociological congresses. Under him *Suspil'stvo* reviewed the latest Western sociological works and published a chronicle of the profession and bibliographies.

A real attempt was made at that time to propagate sociological education and studies through the establishment of chairs of sociology at the *Ukrainian Technical and Husbandry Institute in Poděbrady (headed by O. Bochkovsky), the Ukrainian Higher Pedagogical Institute in Prague (headed by S. Ripetsky), and the Ukrainian Free University in Prague (headed by O. Eikhelman and later V. Domanytsky). Works published by the interwar Prague circle included articles by O. Bochkovsky on 'nationology' and 'nationography' as branches of a special sociological discipline for scientific study of the nation (1927), by V. Domanytsky on 'rurbanism,' by M. Mandryka on sociology and problems of public education in the United States (1925), and by V. Starosolsky on the internal form of the word in sociological terminology (nd); and booklets by M. Shapoval on the army and the revolution (nd) and the city and the village (1926), and his book on the system of the social sciences and sociography (nd). Contributions were also made by S. Goldelman, O. Eikhelman, T. Olesevych, I. Ivasiuk, V. Sadovsky, and O. Mytsiuk.

Postwar émigré sociologists and those born in the West have not had the institutional base that existed in interwar Prague, and their research has not been systematic. Much of it has focused on the study of social processes in Ukraine (W. Isajiw, B. Levytsky, A. Simirenko, B. Krawchenko, and S. Protsiuk) and the study of Ukrainian communities in Canada and the United States (Isajiw, V. Nahirny, W. R. Petryshyn, O. Wolowyna, I. Zielyk, W. Darcovich, B. Tsymbalisty), Germany (V. Maruniak), and Brazil (O. Borushenko). Sociological studies about Ukrainians in North America have also been written by non-Ukrainian scholars. The *Ukrainian Center for Social Research in New York and the *Ukrainian Free University in Munich have been the most important community-based institutions involved in sociological research. Most sociological research about Ukrainians undertaken in the West, however, has been carried out in universities and colleges.

N. Chernysh

Soda industry. A branch of the chemical industry that processes soda, chiefly sodium carbonate as well as sodium hydroxide (caustic soda), crystal carbonate, and sodium bicarbonate decahydrate. Soda is widely used in the making of cleansers, detergents, drying agents, paper, glass, bicarbonate of soda, and other household and industrial products. The first soda factory in Ukraine was established in Lysychanske, in the Donets Basin, in 1890. The second and largest soda plant was founded in Slovianske in 1898. In 1966 a third plant was built in Crimea oblast. Total production of sodium carbonate in the Ukraine increased from 413,000 t in 1940 to 773,000 t in 1960, 1,077,000 t in 1980, and 1,325,000 t in 1987, and production of caustic soda increased from 77,600 t in 1940 to 104,400 t in 1960, 396,400 t in 1980, and 488,800 t in 1987.

Sodomora, Andrii, b 1 December 1937 in Vyryv, Kamianka Strumyl'ova county, Galicia. Translator and writer. A graduate of Lviv University (1959), he is an award-winning Ukrainian translator of classical literature. Published separately have been his translations of Menander's *Misanthrope* (1962), Aristophanes' comedies (1980), Horace's works (1982), and Ovid's *Metamorphoses* (1985). He has also written a novel about Horace, *Nache te lystia derev* (As If Those Leaves of Trees, 1982), a book of portraits of classical writers, *Zhyva antychnist'* (Live Antiquity, 1983), and many articles.

Sofia. The capital of *Bulgaria (1989 pop 1,217,024). In 1889-95 M. Drahomanov lived and worked in Sofia. In 1918-21 the UNR maintained an embassy there, headed by O. Shulhyn and then F. Shulha. P. Sikora and Yu. Nalysnyk edited the journal *Ukrainsko-bolgarski pregled* (1919-20) in Sofia. After the First World War a small Ukrainian colony, consisting mostly of veterans of the UNR Army, sprang up in Sofia. The sculptor M. Parashchuk worked there from 1921. The head offices of the Ukrainian Hromada in Bulgaria, the Ukrainian Alliance in Bulgaria, and the Union of Ukrainian Organizations in Bulgaria (from 1934) were located in the city. The Bulgarian-Ukrainian Society (headed by I. Shishmanov), the small Ukrainian Student Association, and the Sich physical-education society were also active between the wars. All Ukrainian associations were dissolved after the Second World War, although an extensive cultural exchange between Kiev and Sofia is conducted by official institutions.

Sofiia Alekseevna, b 17 September 1657 in Moscow, d 3 July 1704 in Moscow. Regent of Russia; older sister of Peter I. After the death of her brother Fedor Alekseevich in 1682, she assumed power of regency on behalf of her physically and mentally disabled brother Ivan and her half-brother, Peter. During her time in power she brought

the Ukrainian Orthodox church under the control of the patriarch of Moscow, concluded an 'eternal peace' with Poland (1686) which secured Russian control over Kiev and its vicinity, replaced Hetman I. Samoilovych with I. Mazepa (1687), entrenched Russian supremacy in the affairs of the Hetmanate through the signing of the Kolo-mak Articles (1687), and undertook two unsuccessful campaigns against the Crimean Tatars (1687 and 1689). She was deposed by Peter in 1689 and kept in a convent for the rest of her life.

Sofiivka [Sofijivka]. v-14. A town smt (1986 pop 8,200) on the Kamianka River and a raion center in Dnipropetrovske oblast. The region began to be settled at the end of the 18th century, and the village of Sofiivka was founded in 1793 by Gen I. Dunin, who was granted large tracts of land along the Kamianka River. The village developed but remained an agricultural settlement. Today it has a food industry, the administration of an irrigation system, and a regional museum.

Sofiivka burial site. A Copper Age burial ground of the mid-3rd millennium BC near Sofiivka, Baryshivka raion, Kiev oblast. Excavated by I. Samoilovsky and Yu. Zakharkuk in 1948, the site yielded approx 150 graves with cremated remains either placed in earthenware urns or wrapped in cloth. Imprinted pottery and tools and weapons made of rock, flint, and copper were interred in the graves. Sofiivka and similar *Middle-Dnieper culture sites constituted a regional variation of the *Trypilian culture.

Sofiivka Park

Sofiivka Park [Sofijivka]. A dendrological park in Uman, Cherkasy oblast. The park was built by L. Metzler for the Polish count S. Potocki, the voivode of Rus' voivodeship in 1782-8, who named it after his second wife. It is situated on a picturesque site featuring many ravines and gullies that straddle both sides of the Kamianka River along the outskirts of the city. Construction began in 1796, and by the summer of 1800 the park was ready for public viewing, although work continued on it until 1805. Sofiivka included extensive landscaping to create or enhance grottoes, rock faces, waterfalls, and a system of wa-

terways and lakes. Footbridges, sluice-gates, fountains, sculptures, and buildings were erected throughout the site. As well, a large number of trees – silver spruces, poplars, white pine – were planted in what had previously been a barren area to create the Dubnyk, Hrybok, and Zvirynets forests within the complex.

After Potocki died in 1805, possession of the property passed to his brother, who took no interest in its development or maintenance. In 1831, following the Polish uprising, the estate and its park were confiscated, and given by the Russian tsar Nicholas I to his wife. The site then became commonly known as the Empress's Park (Tsarytsyn sad) until 1859, when it was turned into a school for orchard growing. At that time a host of new architectural features were added. In 1899 the park was put under the administration of V. Pashkevych, who introduced foreign tree varieties and developed the site as an arboretum. The park was declared a state nature preserve in 1929, and its historic name was restored in 1946. In 1955 Sofiiivka was put under the jurisdiction of the AN URSR (now ANU). It houses nearly 500 local and imported varieties of trees and shrubs and is an important center of the Central Republican Botanical Garden for introduction and acclimatization research.

Sofroniv-Levytsky, Vasyl. See Levytsky-Sofroniv, Vasyl.

Soft-drink industry. In Ukrainian economic planning the soft-drink industry formally includes all plants making and bottling soft drinks, fruit drinks, soda water, kvass (a sour drink made from bread or malt), and powdered and concentrated drinks. It also includes beer brewers and bottlers, which are treated separately under *brewing industry.

Initially, most soft drinks were made from essences and artificial flavors, but since the 1960s drinks from natural flavors have predominated. Over 50 types of nonalcoholic drinks were produced in the USSR, including some soft drinks produced under license from Western companies. Kvass is especially popular: it accounted for 17 percent of all production in 1987. In Ukraine in 1980 there were almost 900 plants producing nonalcoholic beverages. The plants were distributed throughout the country, but the largest were in Kiev, Zaporizhia, Odessa, Dnipropetrovsk, and Vinnytsia. Total production of soft drinks in Ukraine increased from 413 million L in 1940 to 659 million L in 1970, 906 million L in 1980, and 1,253 million L in 1987. In general the development of the industry was not given great priority in Soviet economic planning. Most of the bottling was automated, but packaging and handling were usually not. Kvass is sold on street corners from small tanks; customers drink from the same glass, which is rinsed after each use.

S'ohochasne i mynule (The Present and the Past). A scholarly journal of Ukrainian studies, published by the Shevchenko Scientific Society. The first four issues of the journal appeared in Lviv in 1939 under the formal editorship of I. Rakovsky, with V. *Simovych as the de facto editor. The third and fourth issues were devoted to T. Shevchenko. The journal was renewed after the Second World War in Munich. Two more issues appeared there in 1948–9, one under the editorship of Z. Kuzelia and the

other of O. Kulchytsky. Both were devoted to matters concerning Ukrainian life in displaced persons camps.

Soil. See Soil classification.

Soil classification. The grouping of thousands of different soils on the basis of their common characteristics. Soil classification contributes to the organization and communication of information about soils and enhances the understanding of their genesis, the processes within them, their relationships with the physical environment, and their place in the landscape.

Despite more than a century of soil science research and international communication, there is no universal soil classification system accepted by all countries. Soil classification in Ukraine follows the Russian system. In that system the broadest soil groups (called 'soil types') are based on the properties of the soil profile (ie, horizons and other phenomena observed in a vertical cross-section of a soil body down to two meters). The old US soil classification system, which recognized three orders ('zonal soils,' 'intrazonal soils,' and 'azonal soils'), employed nomenclature for the 'great soil groups' of the 'zonal soils' and conceptually differentiated them in a way that corresponded to the 'soil types' of the Russian system. Since that classification system is also familiar to many in North America, the terminology from the old US soil classification system is employed here to describe the soils of Ukraine and their distribution.

Location and environmental relationship. In Ukraine three broad belts of soils corresponding to the belts of natural vegetation dominate most of the territory. First is the podzols of forested Polisia, formed on outwash sandy plains or on clayey till plains, which contain pockets of bog soils and ribbons of meadow soils on floodplains. The southern boundary of this belt follows along the line Lutske–Rivne–Zhytomyr–Kiev–Chernihiv–Novhorod-Siverskyi. Second is the belt of soils associated with the forest-steppe, consisting of the gray forest soils (formed under the broad-leaved deciduous forest), the deep chernozems (formed under the prairie), and the transitional podzolized chernozems or degraded chernozems (so modified under conditions of encroaching forest), all of which evolved on calcium-rich loess deposits. This belt also contains some bog soils in depressions and meadow soils in river valleys. The southern boundary of the belt follows along the line Chişinău–Pervomaiske–Kirovohrad–Kremenchuk–Krasnohrad–Kupianka–Valuiky. Third is a belt of soils associated with the steppe, consisting of common chernozems in the northern part and southern chernozems to the south. This belt arches around the Sea of Azov into the Kuban Lowland and part of the Stavropol Upland and contains chernozems particularly rich in available carbonates. Along the north coast of the Black Sea and along both sides of Syvash Lake are the chestnut soils. Interspersed among the southern chernozems and the chestnut soils, especially between the Inhul River in the west and the Molochna River in the east, are many shallow depressions consisting of leached meadow gley soils (known in Russian as *solod* and in German as *Wiesenboden*), and along the coast, solonetz soils (including the salt-laden solonchak soils).

In the Crimea there is an analogous, although inverse, sequence of soil belts associated with rising elevation from north to south: in the north, chestnut soils with asso-

ciated solonetz and solonchak soils; in the middle, southern chernozems, followed by a carbonate-rich, shallow variant of the common chernozems and small areas of chernozems on heavy clays (Kerch Peninsula); and in the mountains, stony brown mountain forest soils interspersed with small pockets of mountain meadow soils at the highest elevations. On the warm south slopes the soil is transitional into the reddish brown soils typical in a Mediterranean climate.

A similar sequence occurs in Subcaucasia, with carbonate-rich variants of the common chernozems and the deep chernozems at low elevations in the north, carbonate-rich brown mountain forest soils on the mountain slopes, and mountain meadow soils at the highest elevations. On the southern slopes to the Black Sea coast are reddish brown soils. Only the broad alluvial plain of the Kuban River is dominated by 'azonal' alluvial soils; its delta contains 'intraazonal' bog soils.

In the Carpathian region one can observe both a vertical zonation and a transition to the Central European brown forest soils. With rising elevation the degraded chernozems and the gray forest soils of the Subcarpathian Basin give way to increasingly podzolized meadow gley soils. On higher slopes appear gray mountain forest podzols in areas covered by fir trees and brown mountain forest soils in areas of beech forests. The highest elevations have mountain meadow soils. On the Transcarpathian side of the Carpathians brown forest soils cover the foothills and meadow gley soils prevail in the lowland.

Characteristics. The major representatives of the great soils groups in Ukraine include, in order of importance, the chernozems and their related chestnut soils, the various podzolized chernozems of the forest-steppe, and the podzols of the forest.

Chernozems occupy 41 percent of Ukraine's surface area and even more of its agricultural land (54 percent) and plowland (58 percent).

Chestnut soils, related to the chernozems, occupy only 3.3 percent of the area of Ukraine and 3.4 percent of its agricultural land but account for 3.9 percent of its plowland. Whereas in the chernozems the zone of calcium carbonate accumulation occurs about a meter below the surface, that mineral concentration is characterized in chestnut soils by the presence of sodium cations. Their presence causes the chestnut soils to change gradually into salinized chestnut soils and solonetz.

The solonetz is low both in humus (1–3 percent) and in available plant nutrients. In the solonetz the salts are leached to a certain depth, which allows for a broader range of plants to grow. The solonchak, by contrast, is salinized right to the surface, and only salt-loving species of plants (halophytes) can survive. The process of salinization can be reversed only with expensive meliorative measures, such as subsurface drainage, deep plowing, the application of gypsum, or other agronomic techniques.

The podzolized soils of the forest-steppe developed with the encroachment of deciduous forest into the domain of the steppe. One-third of the soils in the forest-steppe are podzolized; their area represents 12 percent of the area of Ukraine but 18 percent of its agricultural land and 21 percent of its plowland.

Degraded chernozems still retain the chernozem habitus. Chemical analyses of degraded chernozems, compared with analyses of chernozems, reveal some decline in the proportion of absorbed calcium and magnesium

and the presence of hydrogen in the absorbing complex of the soil. Inherent soil fertility is diminished as a result but can be enhanced with the application of chemical fertilizers and manure. Podzolized chernozem is more severely leached than degraded chernozem, as is apparent by the presence of a narrow leached zone at the bottom of the topsoil layer. Gray forest soils, by contrast, have a thinner (20 cm) dark gray layer of topsoil with a lower (1.5 to 3.5 percent) concentration of humus.

Podzols of the forest and associated soils are found in northern and northwestern Ukraine. The prevalent soils are the podzols, formed on the fluvioglacial deposits under conditions of humid continental climate and under the cover of coniferous and mixed forests. The podzols occupy about 13.5 percent of the area of Ukraine; another 1 percent, the remaining part of the region, consists of alluvial and organic soils. Known for their infertility, the podzols account for only 7.8 percent of the agricultural land and 6.8 percent of the plowland of Ukraine.

Bog soils, formed under poor drainage conditions, are representative of the hydromorphic suborder of the intra-azonal soils. In Ukraine bog soils are abundant in the wet regions of Polisia (the Prypiat River Basin), in Chernihiv Polisia, and in the shallow troughs of small river valleys of the forest-steppe. Because of their high organic content, bog soils can be agriculturally productive, but first they must be drained and then treated with fertilizer. Bog soils occupy about 5.5 percent of the area of Ukraine and 4.5 percent of its agricultural land but only 0.24 percent of the plowland.

Meadow soils are formed on the floodplains of streams and rivers, where occasional floods and imperfect drainage provide for increased moisture. Excluding the solonetz, meadow soils occupy 4.3 percent of the area of Ukraine and 4.4 percent of its agricultural land but only 2.1 percent of the plowland.

Rendzina soils are thin, stony, dark-colored soils developed from soft limestones, chalk, or marls. Small areas of rendzina soil are found in the Volhynia-Kholm Upland. Soviet classification referred to them as carbonate-rich turfy soils formed on marls, chalk, or limestone, and considered them a subcategory of the chernozems.

Azonal soils are determined neither by climate nor by any particular soil-forming process associated with a topographic feature, but by the nature of the parent material. Commonly found on steep slopes, azonal soils show scant soil development and are generally of little significance to agriculture.

Mountain soils, developed on weathered solid rocks, are shallow and full of rock fragments. In the Carpathian Mountains, for example, are found gray mountain forest podzols, brown mountain forest soils, and mountain meadow soils. The mountain forest soils scarcely resemble the podzols. The mountain meadow soils developed under alpine meadows (sometimes overgrown with peat moss) are shallow. They usually undergo podzolization and develop a gley horizon.

In the Caucasus Mountains the main soils at higher elevations where coniferous forests grow are gray mountain forest podzols. At lower elevations, under deciduous forests, are the brown mountain forest podzolized soils. The latter soils, also found in the Crimean Mountains, are darker than those of the Carpathian Mountains because of the warmer climate and higher concentrations of calcium carbonate; they are also less acidic (pH 5–6).

Soil conservation. A system of management and land-use methods which safeguard the soil against depletion or deterioration by natural or by man-induced (anthropogenic) factors. Soil conservation methods are usually designed by agronomists, soil scientists, or other specialists in agricultural or earth sciences and are promoted by means of education, extension services, incentives, and laws. The socioeconomic characteristics of the farmers, the organizational structure of agriculture, and the land tenure system usually influence the adoption of soil conservation practices. Since soil is the basic resource for agricultural production, the sustained development of agriculture in Ukraine depends on the maintenance of good soil quality and the retention of land area with good soils for crop production.

When it was a constituent part of the USSR, Ukraine played a disproportionately important role in Soviet agriculture. Endowed with relatively excellent climatic and land resources, Ukraine occupied only 2.7 percent of what was the USSR's land area but accounted for 7.5 percent of Soviet agricultural land, 15 percent of cultivated land, 15.6 percent of the sown area, and 22.5 percent of the value of agricultural production (1987). Of certain heat-loving but soil-demanding crops Ukraine contributed an even larger share of the sown area: 30 percent of the vegetables, 37 percent of the sunflowers, 49 percent of the sugar beets, and 53 percent of the corn for grain (1987). Under the pressure of Soviet five-year plans that compelled the republic to maximize the use of its land for agricultural output, the land uses of Ukraine were highly committed to agricultural production (see the table).

Over one-half (56.9 percent in 1984) of the total land area of Ukraine is cultivated and thus exposed for at least part of the year to wind and water erosion. Other agricultural lands too are cultivated occasionally, or grazed and trampled by livestock, and thus become susceptible to degradation. Nearly half a million hectares of formerly agricultural land is classified as loose sands and gullies. Only forested lands (16.6 percent of the land area) and wetlands (1.3 percent) provide some ecological protection. Some wetlands and forests, but mostly agricultural lands, have been lost to water reservoirs (especially the very large ones on the Dnieper Cascade, which account for most of the 3.9 percent), to roads (1.6 percent), and to

Land uses of Ukraine, 1 November 1984 (in 1,000 ha; percentage of total in parentheses)

rural settlements, cities, industrial construction, and open-pit mining (the remaining 5.3 percent).

The implementation of soil conservation has several prerequisites: (1) awareness on the part of the agricultural decision-makers (farmers, landlords, government officials) that there is a soil degradation problem; (2) knowledge about soil degradation processes; (3) recognition of their underlying causes (including socioeconomic relations and political institutions); (4) the development of methods that may be employed or the restructuring of systems that may be needed to rectify or prevent soil degradation; and (5) willingness on the part of the decision-makers to co-operate in the implementation of soil conservation. The prerequisites gradually became present in response to the very severe soil degradation that became evident in Ukraine toward the end of the 19th century (see *Soil erosion).

Before the Revolution of 1917, soil scientists, who described and mapped soil erosion in Ukraine, had conducted studies to understand the processes of degradation and worked out methods to combat soil erosion. V. *Dokuchaev (1892) proposed a variety of agronomic measures and established test plots in Ukraine for trials. P. Kostychev (1893) devised special crop rotations for dry farming. O. Izmailsky (1894) recommended snow retention and plowing perpendicular to the slope to conserve soil moisture and reduce the occurrence of dust storms. H. Vysotsky studied soil protective afforestation (1895) and devised effective blow-through *shelterbelts (1898). Cognizant of the problem and aware of local research in soil science, a few landlords and colonists (often German Mennonites) implemented afforestation, shelterbelts, and the retention of gully erosion on their own properties with some success. By contrast the peasantry appeared to be ignorant and, in any case, were economically helpless. The tsarist government neglected agricultural development. Only after pressure was applied by naturalists and physicians, who were appalled by the poverty, the soil erosion, the famines, and the cholera epidemics, did the government commission three exhaustive studies, on gullies, on rural poverty, and on land tenure. Even so, nothing more was done until the peasant revolts of 1905 shocked the Russian imperial autocracy enough to implement land reforms.

The Stolypin agrarian reforms (1906-11) began to

change the socioeconomic relations so as to allow agronomic improvement on peasant farms and the implementation of soil conservation methods. Imperial policy, however, opposed the use of the Ukrainian language in schools and publications and thus hampered the development of literacy among the Ukrainian peasantry and the improvement of agronomic practices. Consequently, efforts to curtail gully erosion by means of ridging, trenching, and the afforestation of gullies became more common on the large estates than on private plots. That whole period of agronomic improvement was curtailed by the First World War and the 1917 revolution.

Most of the estate land partitioned among the peasantry during the revolution was kept by the farmers, but it was declared nationalized by the Bolshevik government. Small portions of the estates were retained by the government as state farms, and peasants were encouraged to join into several forms of collective farms. Rural extension service, begun before the revolution, was continued, often by the same specialists who advocated the measures that would facilitate the introduction of improved crop rotation and soil conservation measures – the consolidation of land and the enclosure of land into individual family farms. Basic research was encouraged by the Agricultural Scientific Committee of Ukraine (1920–7), affiliated with the People's Commissariat of Agricultural Affairs of the Ukrainian SSR. The policy of Ukrainization broadened the base from which trained personnel could be drawn, and enhanced the dissemination of proper agronomic practices and soil conservation techniques among the rural population of Ukraine.

The mass collectivization of agriculture (1930–4), coupled with the repression of Ukrainian patriots, initiated a new phase in the history of soil conservation. Research was centralized and geared to the implementation of agronomic improvements and soil conservation practices on collective and state farms. The All-Union (soon renamed Ukrainian) Scientific Research Institute of Forest Management and Agroforest Amelioration had developed by 1941 a grandiose shelterbelt scheme for the European steppe and forest-steppe, including the selection of tree species and the planting techniques to be used. Following the Second World War a massive campaign for planting and pond construction in the steppe and forest-steppe culminated with a decree (1948) that became known as 'Stalin's plan for the transformation of nature.' The grass-field crop rotation developed by V. Viliams was touted as a means for improving soil productivity and was propagated for widespread adoption. Boasting about those measures as well as the tempo of mechanization and motorization that enabled deep plowing, the Party generated a sense of euphoria. Subsequent studies of the soil conservation efforts revealed (1954), in fact, severe soil erosion. The problems, commonly associated with large-scale mechanized farming, were aggravated either because the recommended soil conservation measures were not implemented properly or because the fragmented responsibility and narrow incentives in socialized agriculture (such as bonuses paid to achieve specific job targets or production quotas) negated the application of recommended agronomic practices. Disregard for communal land now became a basic problem.

Under N. Khrushchev priorities were placed on increasing the output of agricultural production rather than

on soil conservation. Reforms in agriculture (such as disbanding the 'machine-tractor stations and making the tractor drivers directly responsible to collective farms) could have provided the means for implementing improved agronomic practices, but the ambitious programs and erratic 'campaigns' to sow more corn at the expense of small grains or pastures relegated soil conservation to a position of low priority. Severe soil degradation was the result. Much farmland was lost to the creation of water reservoirs on the Dnieper, open-pit mining, and urban growth (for land was considered a free commodity, and the Ministries of Energy and Electrification and of Mining carried more weight than that of Agriculture). In 1963, when the leadership realized that soil conservation was imperative, it commissioned the Ukrainian Planning Institute for Land Organization (Uzkrzemproekt) to devise comprehensive soil protection measures for each watershed in Ukraine. Although Khrushchev was deposed the following year, the project continued its work.

L. Brezhnev's agricultural policy involved the adoption of long-term planning and increased capital investment in the agricultural sector. So that agricultural output from the same land area would be increased, more chemical fertilizers, herbicides, and pesticides were made available, and massive drainage and irrigation projects were undertaken. In 1967, in an effort to counteract past soil degradation, a decree was issued 'Concerning the Undeferable Measures to Protect the Soils against Wind and Water Erosion.' Responsibilities for conservation practices were identified, and fines for violations were specified. A land cadastre, designed to serve as a benchmark on soil conditions, was commissioned. In 1970 the land codex of the Ukrainian SSR was prepared, to restrict the allocation of good agricultural land to other uses. Basic research on regional systems of soil conservation practice was undertaken, and its results published, presumably as a guide for central decision-making. In areas susceptible to water erosion, soil-conserving crop rotations with more cover crops were recommended along with the use of terraces and contour strip cropping (perpendicular to upland slopes). In areas susceptible to wind erosion (mostly in the steppe) the alignment of shelterbelts and fields perpendicular to the prevailing direction of the wind was recommended, along with the use of blade cultivators (or sweep plows – to avoid the turning of the sod), the retention of stubble cover, and the use of curtains of tall crops to reduce wind velocity.

Contour strip cropping was not widely used because it would have necessitated a major reorganization of fields and a greater use of small maneuverable tractors (which, together with skilled operators, were in short supply). Instead, less effective methods, such as trenching, pitting, and other field techniques, were more commonly applied in the areas prone to water erosion. High priority was given to combating wind erosion in the steppe. Machinery for conservation tillage (such as blade cultivators or sweep plows) was pressed into production. By 1983 the plowless tillage had been expanded to 7 million ha in Ukraine. Fertilizers were provided to invigorate overgrazed pastures and treat deficient soils. Earth-moving machinery was supplied to terrace slopes and fill in the gullies. A concerted effort was made at the filling in of gullies and at afforestation to stabilize loose sands. According to official reports, between 1965 and 1983 the area in gullies was re-

duced from 324.1 thousand to 258 thousand ha, and the area of loose sands was reduced from 293.7 thousand to 177.7 thousand ha.

Despite well-publicized soil conservation efforts during the Brezhnev period, erosion continued to grow. The area suffering from soil erosion in Ukraine increased from 1961 to 1980 by 1.4 million ha on plowland alone and by more than 2 million ha on all agricultural land. The trend was related to increased soil compaction from heavy machinery, increased mineralization from heavier use of chemicals, greater quantities of industrial emissions, acid rain, and water erosion from sprinkler irrigation on sloping, clayey chernozems.

Soil erosion. The process by which unprotected soil is washed away by meltwater or rainwater (water erosion) or blown away (wind erosion). In Ukraine soil erosion occurs in regions of enhanced relief, mostly on the high right banks of rivers (as in the Kaniv region along the Dnieper), on the more elevated parts of the Dnieper Lowland, on the strips between the Dnieper and the Boh rivers, between the Dniester and the Prut, in Slobidska Ukraine, on the Donets Ridge, on the Azov Upland, and in the Carpathian Mountains. East and southeast winds (dry winds known as black storms) cause soil loss in the eastern parts of Ukraine. About 12.5 million ha of arable land in Ukraine are affected by water erosion. Erosion has increased as a result of deforestation, the tilling of slopes, and backward agrotechnology. Erosion eventually results in the formation of ravines, an increase in the amount of unusable land, and a loss of soil fertility.

The severity of soil erosion in Ukraine varies from place to place, according to natural conditions, land uses, and cultural practices. The forest zone in the northwest of Ukraine is the least susceptible to erosion. The forest-steppe zone suffers much more from water erosion, although the problem varies considerably with topography. The steppe zone, suffering from both wind and water erosion, has some of the most severely eroded soils in Ukraine. The mountain zones, despite their protective forest cover, suffer from high values of soil erosion.

Soil science. The systematized study of soils as an evolving natural resource influenced by living organisms and physical factors. It deals with the origin and formation of soils, their chemical, physical, and biological properties, their classification and geographical distribution, and their fertility. Soil science as a distinct discipline emerged only at the end of the 19th century, largely as a result of the contributions of V. *Dokuchaev.

The earliest scientific studies of soils in Ukraine, especially the first soil maps, resulted from the surveys of the country's agricultural potential conducted in the 1880s by the zemstvos. In 1888–94 Dokuchaev studied the soils of Poltava gubernia and published a detailed (1:420,000) soil map of the region. Previously he had published his research on the chernozem and the genesis of the steppes. In the prerevolutionary period the soils of Ukraine were studied by both Ukrainian scientists and specialists from St Petersburg and Moscow. A. Nabokikh, who polemicalized with the Russian soil scientists in Moscow and St Petersburg, researched the soils of Podilia and Kharkiv gubernias and founded a distinct school of soil scientists in Ukraine. F. *Levchenko studied the soils of Volhynia, N. Frolov, those of Kiev gubernia, B. Polynov, those of Chernihiv gubernia, and S. Zakharov, those of Subcaucasia and Caucasia. Methods to combat drought in the steppes were explored not only by Dokuchaev but also by the prominent Russian soil scientist P. Kostychev, the Ukrainian agronomist O. Izmailsky, and the Ukrainian forester-soil scientist Yu. *Vysotsky. K. *Gedroits was director (1922–30) of the agrochemical department of the Nosivka Agricultural Research Station near Nizhen and did research on soil colloids and soil cation-exchange capacity. His laboratory analysis of the chernozems was based mostly on samples collected in Ukraine. The contributors to soil research in Ukraine included the Ukrainian geologist P. *Tutkovsky and the botanist and geographer G. *Tanfilev.

Before the 1917 revolution Ukraine was not viewed as a separate country, so integrated studies of Ukraine's soils did not begin until the 1920s. They were undertaken mostly by the *Agricultural Scientific Committee of Ukraine and its soil science section (1920–7), which was directed by H. *Makhiv (1923–7). It compiled 10 volumes of *Materialy doslidzhennia gruntiv Ukraïny* (Research Materials on the Soils of Ukraine) and published a large (1:1,000,000) soils map of Ukraine. Soil research in Ukraine was conducted also by scientific research stations (35 in 1927), the Ukrainian Scientific Research Institute of Soil Science in Kiev, and the Ukrainian Scientific Research Institute of Fertilizers in Kiev. Soil science departments were active in post-secondary institutions, particularly at agricultural institutes. When the Agricultural Scientific Committee was abolished and many of its associates were purged during the collectivization, soil science in Ukraine suffered a grave setback.

In the 1920s and 1930s the outstanding soil scientists in Ukraine, besides those already mentioned, were D. *Vilensky, V. *Krokos, and O. *Sokolovsky. Some important contributions were made by I. Bandura, O. *Dushechkin, O. *Hrinchenko, H. Hrin, M. Krupsky, and T. *Taranets.

A new phase of soil research in Ukraine began in the second half of the 1930s. Its purpose was practical – to raise soil fertility, as promised by the leading Soviet soil scientist, V. Viliams. In the post-Stalin period soil mismanagement on collective and state farms was admitted, and research was diversified in an attempt to aid in the regional application of agronomic practices and the intensification of agriculture. With the full-scale mechanization and motorization of agriculture, the use of chemicals, and the implementation of large-scale drainage and irrigation projects, the assessment of the human impact on soil assumed primary importance. A detailed survey and inventory of soils was commissioned, to be used as a standard for rating soil management. Basic research concerning soil characteristics and soil genesis continued to be closely related to certain branches of geology (mineralogy), geography (climatology, geomorphology), biology (plant physiology), and chemistry. At the same time soil science emerged as the basis of other related applied disciplines, such as agronomy, agrochemistry, and soil mapping, and the development and testing of agrotechnical, agrochemical, and melioration techniques.

The major achievements of the post-Stalin period included a comprehensive, detailed, large-scale inventory mapping of the soils of Ukraine. Spearheaded by the Ministry of Agriculture of the Ukrainian SSR and the *Ukrainian Scientific Research Institute of Soil Science and Agrochemistry, the project involved research institutes, universities, and agricultural stations and produced maps to the scale of 1:10,000 or 1:25,000 for each farm and 1:50,000 for each raion, together with soil descriptions and agronomic recommendations (1956–62). Subsequently (1969–72), generalized soil maps were produced for each oblast (1:200,000) and for the entire republic (1:750,000). After numerous studies, such as soil-water characteristics, water-air regimes in the soil, water-salt interactions, the impact of tillage, soil erosion, and soil fertility, a comprehensive soil evaluation and mapping of the distribution of soil quality was undertaken. Some of the findings were generalized in the soils atlas of the Ukrainian SSR. The major contributors to soil science after the Second World War have been Hrinchenko, Hrin, Krupsky, H. Andrushchenko, M. Godlin, I. Hoholiv, O. Mozheiko, G. Sambur, N. Sereda, M. Shykula, S. Skorina, M. Veklich, and especially N. Vernander.

Today soil research is conducted principally at the Ukrainian Scientific Research Institute of Soil Science in Kiev, which is affiliated with the Ministry of Agriculture of Ukraine, and the Ukrainian Scientific Research Institute of Soil Science and Agrochemistry in Kharkiv, which was (until 1991) affiliated with the All-Union Academy of Agricultural Sciences in Moscow. Applied research is conducted at numerous agricultural research stations and even at agricultural laboratories on state farms and large collective farms. There are soil science departments in the geology faculties of the universities, agricultural academies, and agricultural and polytechnical institutes. Publications in soil science have been almost exclusively in the

Russian language. The main periodical, *Ahrokhimiia i hruntознаvstvo* (Kiev 1966–), published by the Ministry of Agriculture of Ukraine and the Ukrainian Scientific Research Institute of Soil Science and Agrochemistry, changed to Russian in the 1980s.

Soiuz (Union). The first Ukrainian student association in Chernivtsi. It was founded in 1875, and existed, except for 1903–5, until 1922, when it was dissolved by the Rumanian authorities. Membership varied from 50 to 100 students. The association took part in political and cultural-educational work and published *Bukovyns'kyi al'manakh* (Bukovynian Almanac, 1885) and the almanac *Soiuz* (1875–1903, 1905–10). The association's heads were D. *Vintskovsky (1875–9), S. *Smal-Stotsky (1879–83), O. *Kolesa (1891–4), P. Klym, T. *Halip, Yu. Tevtul, and V. Butsura, among others. When the association was dissolved, its members joined the academic associations *Sich and *Chornomore.

Soiuz (Union). A weekly organ of the Ukrainian Presbyterian Mission, published in New York (1908–11) and Pittsburgh (1912–21). It contained articles on religious themes, reports on the activities of Ukrainian Presbyterian and Evangelical congregations, and news relating to Ukraine and Ukrainian communities in North America. *Soiuz* was especially critical of the Catholic church. The editor was Z. Bychynsky.

The town hall in Sokal

Sokal [Sokal']. III-5. A city (1989 pop 22,400) on the Buh River and a raion center in Lviv oblast. It was first mentioned in historical documents in 1411, when it belonged to Belz principality. It obtained the rights of *Magdeburg law in 1424, and from 1462 it was a county center of Belz voivodeship. It developed slowly during the 15th and 16th centuries because of frequent Tatar attacks. In 1524 the town was rebuilt on the other side of the river, and its fortress was reinforced. During the next century it became an important center for the production of shoes, gold arti-

facts, and weapons. The Roman Catholics established two monasteries in the town. The Cossacks captured the town in 1648 and 1655, during B. Khmelnytsky's uprising. After the partition of Poland in 1772, Sokal was annexed by Austria and became a county center of the Galician crownland. It prospered as a manufacturing and trading town and by the end of the 19th century had a population of 8,000. In February 1919 the Ukrainian Galician Army successfully resisted the Polish forces, but by the summer the Poles had captured Sokal. The Polish government established the *Sokal border between Galicia and Volhynia. In 1939 the city was occupied by the Soviet army. Today Sokal is an industrial center specializing in the manufacture of synthetic fibers, reinforced concrete, bricks, hosiery, and foodstuffs. Its main architectural monuments are an Orthodox chapel (15th century), St Nicholas's Church (16th century), the remnants of the town walls and a tower (16th century), a Bernardine nunnery (1604), a Briggittine nunnery (1624), a Roman Catholic church in the Renaissance style (17th century), and St Michael's Church, in the baroque style (1778–1835). Archeologists have discovered artifacts from the Mesolithic, Neolithic, Bronze Age, and Hellenic and Celtic periods in the Sokal region.

Sokal border (Sokalskyi kordon). An administrative division separating the Ukrainian territories of interwar Poland. Its name was derived from the town of Sokal, on the Buh River. The division line ran along the former Austro-Russian border and the dividing line between the Lviv-Ternopil and Volhynia voivodeships. It effectively isolated Volhynia and other Ukrainian areas in the interwar Polish state from eastern Galicia. In that respect the Sokal border was regarded as a symbol of the desire of the Polish government to keep Ukrainians regionally fragmented (and thus limit their potential for co-ordinated political, cultural, and economic action). The Sokal border came into existence because of the signing of a Polish-Vatican *concordat (1925) which restricted the jurisdiction of Ukrainian Catholic bishops to eastern Galicia, and which supported (particularly after 1928) the Ukrainization of the Orthodox Church in Volhynia, the abolition by the Polish government of major Ukrainian co-operative and popular-education societies (Prosvita, the Audit Union of Ukrainian Co-operatives, and the like) north of the border (so that the area of their activities was restricted largely to Galicia), and the sanctioning by the Polish administration of the creation of regional Ukrainian political and economic organizations in Volhynia (such as the Volhynian Ukrainian Alliance). The main architect of the Sokal border was the Volhynia voivode, H. *Józewski. Its existence exacerbated the regional differences (political, social, and religious) in Ukrainian society in interwar Poland. The impact of the Sokal border began to lessen over time as a result of increased economic integration (through the building of railway lines connecting the regions directly) and the activities of illegal Ukrainian organizations, such as the OUN and the Communist Party of Western Ukraine.

A. Zięba

Sokal Brigade of the Ukrainian Galician Army (Sokalska [5] brygada UHA). A unit of the First Corps of the UHA formed in January 1919 from units of the Northern Group. The brigade had about 6,000 soldiers, organized into three infantry battalions, a cavalry troop, an engineer-

ing company, and an artillery regiment. During the winter and spring it operated on the Polish-Ukrainian front around Sokal and in June 1919 it took part in the Chortkiv offensive, in which it distinguished itself in battles around Terebovlia. Its commanders were Capts P. Petryk and V. Kossar. In February 1920 the brigade was reorganized into the Second Cavalry Regiment of the Red Ukrainian Galician Army, which on 28 April surrendered to the Poles.

Sokalsky, Ivan [Sokal's'kyj], b 13 May 1830 in Kharkiv, d 12 May 1896 in Kharkiv, d? Economist and statistician. A graduate of Kharkiv (1850) and Kiev (PH D, 1872) universities, he taught at the Richelieu Lyceum in Odessa and then at Kharkiv University (from 1858), where he offered the first course in the Russian Empire on the history of economic schools. In 1862-4 he traveled and studied industry, finance, and agriculture in Western Europe. After his return to Kharkiv Sokalsky organized and directed the first one-day censuses in Kharkiv (1866, 1873, and 1879) and studied the cottage industry in Slobidska Ukraine. He also edited the monthly journal of the Kharkiv gubernia statistical committee, *Statisticheskii listok* (1882-5). He wrote many articles and the monograph *Reforma na ocheredi* (The Coming Reform, 1895), in which he advocated bi-metallism.

Petro Sokalsky

Volodymyr Sokalsky
(1863-1919)

Sokalsky, Petro [Sokal's'kyj] (Sokolsky), b 26 September 1832 in Kharkiv, d 14 April 1887 in Odessa. Composer, folklorist, and music critic; brother of I. *Sokalsky. He graduated in 1852 from the Faculty of Natural Sciences at Kharkiv University and settled in 1858 in Odessa, where he worked as assistant editor of the newspaper *Odesskii vestnik*. He was active in the city's musical life as a critic in the newspaper and a promoter for the development of musical institutions. His works include the operas *Mazepa* (1859), *May Night* (1876), and *The Siege of Dubno* (1878); 14 choruses; piano music; and art songs to words by T. Shevchenko, L. Hlibov, and others. He also collected and studied Ukrainian folk songs. His research was published posthumously as *Russkaia narodnaia muzyka, velikorusskaia i malorusskaia v ee stroenii melodicheskoi i ritmicheskoi i otlichii ee ot osnov sovremennoi garmonicheskoi muzyki* (Russian Folk Music, Great Russian and Ukrainian, Its Melodic and Rhythmic Structure, and Its Differentiation from the Principles of Contemporary Harmonic Music, 1888). A

Ukrainian translation of this work, and a biography, by T. Karysheva, were published in Kiev in 1959. A collection of his essays and reviews was published in Kiev in 1977.

Sokalsky, Volodymyr [Sokal's'kyj] (secular name: Vasyly), b ca 1725, d ca 1790. After studying at the Kievan Mohyla Academy and serving as hegumen of the Samara St Nicholas's Monastery, he became (from 1762) the last pastor at the church of the Zaporozhian Sich and the last archimandrite of the monastery (1774-5). He later became archimandrite of St Nicholas's Monastery near Baturyn (1776-90).

Sokalsky, Volodymyr [Sokal's'kyj] (pseud: Don Diese), b 6 May 1863 in Heidelberg, Germany, d 1919 in Sevastopol. Composer and music critic; son of I. *Sokalsky. He graduated in 1885 from the Faculty of Law at Kharkiv University while also studying piano at the Russian Music Society school. In the fields of music history and theory he was self-taught. He was active as both a pianist and a conductor. His works include the *Symphony in G Minor* (1892); the children's opera *Ripka* (The Turnip, 1900), based on a Ukrainian folk tale; choruses; piano pieces; and art songs.

Sokha. A unit of land taxation used in Rus' from the 13th to the 17th centuries. Until the mid-16th century it was defined by the size of the work force: in the 13th to 15th centuries it consisted of an area that could be worked by two or three peasants; the size of the unit varied with the region. In the mid-16th century the great *sokha*, defined by a spatial unit, the *chetvert*, was introduced throughout Muscovy. Its size varied according to the quality of the land and the social position of the owner. In 1679 the *sokha* was replaced by the *household tax.

Pavlo Sokhan

Rev Isydor Sokhotsky

Sokhan, Pavlo [Soxan'], b 18 November 1926 in Novoi-vanivka, now in Bilopilnia raion, Sumy oblast. Historian; corresponding member of the AN URSR (now ANU) since 1985. A graduate of the Kharkiv Pedagogical Institute (1953), he joined the ANU Institute of History in 1964 and became assistant director in 1974 and head of the revived Archeographic Commission in 1988 (since 1991, the Institute of Ukrainian Archeography). His specializations include Ukraine's historical ties with East European nations and the history of Bulgaria.

Sokhanivsky, Mykhailo [Soxaniv's'kyj, Myxajlo], b 13 June 1915 in Zhyznomyr, Buchach county, Galicia. Stage actor and singer (baritone). He began his theatrical career in Lviv in the Bohema Theater (1936) and then was a member of D. Kotko's choir (1937) and an actor and singer in the Ternopil Ukrainian Music and Drama Theater (1939–44) and the Ukrainian Theater in Austria under H. Sovacheva (1945–8). After 1948 he appeared sporadically with Ukrainian troupes in Canada.

Sokhotsky, Isydor [Soxoc'kyj] (pseud: Sydir Yaroslavyn), b 4 April 1895 in Lany, Bibrka county, Galicia, d 22 May 1977 in Philadelphia. Church and community activist; member of the Shevchenko Scientific Society from 1965. He studied theology at Lviv University and philosophy at the Lviv (Underground) Ukrainian University before being ordained in 1923 and serving as a village priest. In 1944 he emigrated to Germany, and in 1950 to the United States, where he was pastor in Shamokin, Pennsylvania. He published popular studies on the role of the Ukrainian Catholic clergy (1951) and the Western Ukrainian struggle for independence in 1918–23 (1956), and co-edited a history of the Ukrainian Catholic church in the United States (1959). Sokhotsky also wrote *Istorychni postati Halychyny XIX–XX st.* (Historical Figures of Galicia in the 19th–20th Centuries, 1961).

Mariia Sokil

Vasyl Sokil

Sokil, Mariia, b 18 October 1902 in Zherebets (now Kirove), Oleksandrivske county, Katerynoslav gubernia. Operatic soprano; wife of A. *Rudnytsky. She graduated from the Dnipropetrovske Music Conservatory and performed as a soloist in opera theaters in Kharkiv (from 1927) and Kiev (from 1930). In 1932–7 she performed in Lviv, Warsaw, Prague, Vienna, and Berlin, and in 1937–8 she gave concerts in the United States and Canada. From 1958 she lectured at the Philadelphia Music Conservatory and Music Academy. Her notable roles were Marguerite in C. Gounod's *Faust*, Tatiana in P. Tchaikovsky's *Eugene Onegin*, Desdemona in G. Verdi's *Othello*, Elsa in R. Wagner's *Lohengrin*, Maryltsia in M. Lysenko's *Taras Bulba*, and Mimi in G. Puccini's *La Bohème*.

Sokil, Vasyl, b 5 March 1905 in Husarka, Oleksandrivske county, Katerynoslav gubernia. Writer and journalist. He graduated from Kharkiv University in 1932 and

began publishing his poems and short stories during the 1920s. His published works include the short stories 'Nadry' (Bowels of the Earth, 1932) and 'Potoky syl' (Stream of Forces, 1932); the plays *Mariia* (1947), *Dim na hori* (The House on the Hill, 1950, coauthored with D. Vyshensky), and *Chervona kalyna* (Red Viburnum, 1954); the comedy *Doroha mamochka* (Dear Mother, 1953, coauthored with I. Bahmut); and librettos for the operas *Pavel Korchaigin* (1962), *Vasilii Gubanov* (1970), and *Lieutenant Schmidt* (1971). Sokil also translated into Ukrainian works of Russian, Belarusian, Polish, and Kirghiz authors. In 1978 he emigrated from Ukraine to the United States, and in 1986 he moved to Australia. While in the United States he published the satirical novelette *Taka dovha nich* (Such a Long Night, 1984). In addition to his memoirs, *Zdaleka do blyz'koho* (From Far Away to Close at Hand, 1987), Sokil has published articles in émigré literary journals and newspapers.

Sokil, Yurii (Sokol), b 21 September 1937 in Dnipropetrovske. Film producer and cinematographer. He graduated from the Moscow Film Institute in 1961 and then worked at the Mosfilm Studio with directors such as D. Khzhabzovitsky, A. Mitta, and G. Chukry. In 1979 he emigrated to Australia, first to Melbourne, where he shot a number of award-winning films with the director Paul Cox (*Lonely Hearts*, *Man of Flowers*, *Cactus*), and then to Sydney, where he continued to work with such film directors as John Duigan, Lex Marinos, and Bob Ellis. In 1987 he established and developed Waterloo Studios, one of the largest film complexes in Sydney. In 1989 he received a Milli Award, one of the highest Australian professional honors, as cinematographer of the year.

The officers of Sokil-Batko with Ivan Bobersky in Lviv in 1928. Sitting, from left: Ya. Vintkovsky, N. Yatsiv, O. Sopotnytsky, S. Lavriv, Bobersky, D. Navrotska, M. Levytsky, T. Franko, S. Lototsky; standing: L. Ohonovsky, O. Liubinetsky, I. Mryts, M. Halibei, S. Haiduchok, T. Bilostotsky, B. Makarushka, I. Panchak, S. Kotsiuba, O. Verkhola, M. Tril

Sokil (Falcon; Czech: Sokol). A mass physical-education movement that played an important role in the national rebirth of several Slavic peoples, particularly the Czechs. The first Sokol society was founded in Prague in 1862. Other Slavic peoples followed the Czechs' example and established their own counterparts. In 1907 the national societies came together to form the Sokol Union, which organized international meets and congresses. After the Soviet occupation of Eastern Europe, the Sokol movement was suppressed. Some societies are still active in the various Slavic émigré communities.

The Polish Sokół society was founded in Lviv in 1867, and the Ukrainian Sokil society was founded there in February 1894. The latter's statute was based on that of the Czech society, and its activity extended to all of Galicia and Bukovyna. There it propagated national unity, self-confidence, and dignity through physical education. The first president was V. *Nahirny (1894–1900), and the first director was V. Lavrivsky. A. Budzynovsky initiated the expansion of the society's program to encompass fire fighting (practiced until 1932), hiking, fencing, cycling, and shooting (from 1912). Besides physical activities and sports, the society also encouraged amateur choral, orchestral, and theatrical activities. In 1912 rifle units were organized by S. *Goruk; thenceforth the society was often known as the Sokil Physical Activity and Riflemen's Society. I. *Bobersky, who headed the Sokil teachers' circle from 1901 and presided over Sokil in 1908–12, contributed greatly to Sokil's growth in the decade before the First World War. In Galicia's towns, beginning with Stanyславiv (1902), branches concentrating primarily on physical education were set up, while those founded in rural areas usually combined physical education and fire fighting. The local branches, which were free to call themselves Sich or Sokil, grew in number from 6 in 1902 to 70 in 1903, 243 in 1905, 373 in 1907, 601 in 1910, and 974 in 1914. They were concentrated mostly in Lviv county and Galician Podilia. In Pokutia and Bukovyna, where the *Sich societies attracted most of their followers, only a few Sokil branches existed. The combined Sokil membership grew to approx 33,000. The parent organization in Lviv served as the central office of the movement; from 1909 it was called Sokil-Batko ('Sokil-Father').

Like the rival Sich movement, Sokil organized regional (in 1906 in Stryi and in 1910 in Ternopil) and then provincial assemblies (in 1911 in Lviv) of its constituent organizations. In June 1914 the so-called Shevchenko assembly was attended by 12,000 members of Sich, Sokil, and the scouting organization Plast. It was held at the Ukrainskyi Horod, the sports field owned by Sokil-Batko in Lviv. In 1912 Sokil representatives took part in the All-Slavic Sokol congress and games in Prague celebrating the 50th anniversary of the Czech society.

Before the First World War the more important figures in the Sokil movement were K. Gutkovsky, V. Shukhevych, Yu. Vintskovsky (head of the photography and cycling sections), Ya. Yaroslavenko (composer of the Sokil anthem and other Sokil songs), M. Voloshyn, Y. Domanyk, L. Lepky, and P. Dyhdalevych.

In Russian-ruled Ukraine several dozen Russian Sokol gymnastics societies were founded in the early 20th century. The largest society was in Kiev. It hosted the 1913 Russian Sokol congress attended by 250 members from Katerynoslav, Odessa, Kharkiv, Chernihiv, Tahanrih, and Kursk.

The First World War interrupted the activities of the Sokil society in Galicia. After the war the Polish authorities obstructed the revival of the movement and prohibited its expansion into Volhynia, Podlachia, and the Kholm and Lemko regions. In 1918–20 only Sokil-Batko was able to function, and the 1933 law on associations precipitated the further decline of Sokil. In 1938 the Polish government seized, under the pretext of military need, Sokil-Batko's sports field in Lviv. The number of Sokil branches varied from 6 in 1921 to 37 in 1923, 586 in 1928, 493 in 1930, 370 in

1934, 233 in 1936 (23,000 members), and 300 in 1939 (approx 35,000 members). From 1933 Sokil devoted more attention to athletics and sports (volleyball, basketball, track-and-field sports, and boxing); its sports section was headed by O. Navrotsky. Before the *Ukrainian Sports Union was founded in 1925, and after it was abolished by the Polish authorities in 1937, Sokil-Batko functioned as the central office for the many sports clubs in Galicia. It organized the so-called Zaporozhian Games in 1923 and the third provincial Sokil assembly in 1934. It continued holding various regional Sokil public gatherings and events and conducting courses for physical-education instructors.

Prominent figures in Sokil in the 1920s and 1930s, in addition to those who had already been important before the war, were M. Zaiachkivsky (president, 1922–33), M. Khronoviat (president, 1934–9), S. Haiduchok, M. Tril, I. Mryts (head of the skiing section), M. Halibei, Ya. and E. Blahitka, T. Bilostotsky, E. Zharsky, and A. Palii.

Sokil published the monthly magazines **Visty z Zaporozha* (1910–14) and **Sokil's'ki visty* (1928–39); annual almanacs from 1894; and many sports, physical education, and organizational booklets by authors such as V. Lavrivsky, A. Budzynovsky, I. Bobersky, S. Haiduchok, M. Tril, O. Verkhola, E. Zharsky, Ya. Blahitka, T. and P. Franko, D. Navrotska, D. Siiak, K. Sukhovska, and I. Mryts.

Outside Ukraine the most active Ukrainian Sokil societies were founded by émigrés in interwar Czechoslovakia. There, beginning in 1922, Sokil branches sprang up in Poděbrady, Prague, Příbram, Liberec, Brno, and other towns. Together they formed the Union of the Ukrainian Sokil Movement Abroad in 1932; in 1934 it had 460 members. The societies took part in Czech Sokol events, sometimes as representatives of the Galician Sokil movement, and maintained contacts with Sokil-Batko and I. Bobersky in Canada and then Yugoslavia. The German occupation of Czechoslovakia brought an end to the Sokil movement in Czechoslovakia. Elsewhere, small Sokil groups existed in Zagreb, Riga, Harbin, Bucharest, Brazil, Paris, and Shanghai. A Sokil society was set up in Buenos Aires in 1931, and several smaller branches were organized in Argentina. In the United States, a small Sokil society was founded in New York in 1913. Unlike Sich, however, the Sokil movement did not take root in North America.

E. Zharsky

Sokilka sheep (*sokilska poroda ovets*). A breed of sheep developed in Ukraine in the village of Sokilka (now in Kobeliaky raion, Poltava oblast) during the 19th century from local sheep and Karakuls imported from the Crimea, selecting for high-quality pelts. These sturdy animals have high-quality pelts, strong bodies, and coarse wool and are highly productive (115–120 lambs per 100 ewes). They are raised principally for lamb pelts, the fine fur of which is usually a gray with a distinctly steel bluish tint. The sheep are now also raised on various farms in Dnipropetrovske oblast (see *Sheep farming).

Sokil's'ki visty (Sokil News). Monthly organ of the Galician *Sokil society published in Lviv in 1928–39. It contained articles on physical education, sports, and recreation. The editors of the journal included S. Koretsky, S. Haiduchok, and I. Mryts. In 1930 it had a pressrun of 1,000.

Ivan Sokoliansky

Sokoliansky, Ivan [Sokoljans'kyj], b 6 April 1889 in Dinska *stanytsia*, Katerynodar division, Kuban oblast, d 27 November 1960 in Moscow. Specialist in vision and hearing impairment. He worked at the school for deaf-mutes in Oleksandrivske before completing his studies at the St Petersburg Psychoneurological Institute (1913). He taught at the Kiev (1920–3) and Kharkiv (1923–6) institutes of People's Education. In 1925 he organized a school-clinic for deaf and blind mutes and was one of the founders of the Scientific Research Institute of Pedagogy, which he directed from 1926 to 1929. Then he was director of the Scientific Research Institute of Defectology of the Ukrainian SSR. Arrested in 1934, he was soon exonerated and given a position at the Institute of Defectology in Moscow. He introduced a new method of teaching blind and deaf mutes and invented various devices for deaf and blind people.

Sokolov, Borys, b 12 September 1897 in Kharkiv, d 1 September 1984 in Dnipropetrovske. Agronomist and selection scientist; member of the All-Union Academy of Agricultural Sciences from 1956. A graduate of the Kharkiv Agricultural Institute (1923), he worked for the Dnipropetrovske Selection and Research Station (1924–30), where he organized the first maize selection laboratory in the USSR, and the Ukrainian Scientific Research Institute of Seed Cultivation (from 1956 the All-Union Scientific Research Institute of Corn). He demonstrated the effectiveness of heterosis in Soviet selection practices and developed 18 hybrid and 4 new sorts of corn.

Sokolov, Ivan, b 10 June 1823 in Astrakhan, Russia, d 12 November 1910 in Kharkiv. Russian painter. After graduating from the St Petersburg Academy of Arts (1855) he was elected a member (1857) and appointed a professor (1864) there. He visited Ukraine often, and in 1860 he settled in Kharkiv, where he was elected vice-president of the Kharkiv Society of Friends of the Fine Arts. He was acquainted with T. Shevchenko, who did an etching based on Sokolov's *Friends* (1858). Sokolov painted many Ukrainian genre scenes and portraits of Ukrainian peasants. They include *Kobzar* (1857), *From the Market* (1859), *Girls Telling Fortunes on St John's Eve* (1859), *Seeing Off the Recruits* (1860), *Ukrainian Woman* (1860), and *Morning after a Wedding in Little Russia*. L. Zhemchuzhnikov made 17 etchings of Sokolov's paintings for the album *Zhivopisnaia Ukraina* (Picturesque Ukraine). P. Hovdia's book on Sokolov was published in 1980.

Ivan Sokolov: *Girls Telling Fortunes on St John's Eve* (oil, 1859)

Sokolov, Teodosii, b 23 January 1870 in Kahul, Bessarabia gubernia, d 1941 in Kiev. Gynecologist and obstetrician. A graduate of Kiev University (1897), he worked at the university, the Kiev Bacteriological Institute, and the Kiev Medical Institute (professor from 1921). His publications dealt with severe blood loss in women, septic abortions, and myomas. He was one of the early organizers of the system of maternity and childhood care in Ukraine.

Sokolov, Viktor, b 17 April 1919 in Taburyshche, Oleksandriia county, Kherson gubernia. Writer. A former steelworker, he headed the Donetsk branch of the Writers' Union of Ukraine (1958–66) and later was chief editor of the literary journal *Donbas*. Since 1949 he has published 19 books of poetry (most recently *Chekannia* [The Wait, 1984]), the novels in verse *Na berehakh Ishymu* (On the Banks of the Ishim, 1956) and *Moie sertse v Donbasi* (I Left My Heart in the Donbas, 1960), and the documentary novels *Volodia* (1967) and *Sertse syl'mishe vohniu* (The Heart Is Stronger Than Fire, 1973).

Yurii Sokolov (1889–1941)

Sokolov, Yurii, b 20 April 1889 in Nizhen, Chernihiv gubernia, d 15 January 1941 in Kiev. Folklorist and literary scholar; from 1939 full member of the AN URSS (now ANU). After graduating from Moscow University (1911) he worked as a teacher and collected Russian and, later,

Ukrainian folklore. With his brother, Borys, he founded the journal *Khudozhestvennyi fol'klor* (1922) and published the anthology *Poeziia derevni* (The Poetry of the Village, 1926). He helped uproot 'bourgeois' approaches to folklore and encouraged the growth of 'Soviet folklore' based on the principles of class consciousness and socialist realism. In 1939 he was appointed director of the ANU Institute of Ukrainian Folklore in Kiev and ordered to rid Ukrainian folklore of 'bourgeois nationalism.' At his initiative a folk creativity section was founded at the Writers' Union of Ukraine. He published over 150 works, including the textbook *Russkii fol'klor* (Russian Folklore, 1938).

Yurii Sokolov (1896–1971)

Oleksander Sokolovskyy

Sokolov, Yurii, b 26 May 1896 in Labinska *stanytsia* in the Kuban, d 2 February 1971 in Kiev. Mathematician and mechanic; corresponding member of the AN URSR (now ANU) from 1939. After graduating from the Kiev Institute of People's Education (1921) he worked in the Division of Applied Mathematics of the VUAN and then at the ANU Institute of Mathematics (1934–71). He also taught at various institutions of higher learning in Kiev. Sokolov made significant contributions to celestial mechanics, hydromechanics, differential equations, and the theory of filtration. He is especially known for his work on the n -body problem and for practical solutions to various problems in the filtration of groundwater. He introduced and rigorously studied a new and effective method for the approximate solution of differential and integral equations, known as the averaging method with functional corrections or the Sokolov method. As shown by Sokolov, the method was useful in various applications to physical sciences.

Sokolovska, Kateryna [Sokolovs'ka], b 1840 in Paskivka, Vovchanske county, Kharkiv gubernia, d 24 October 1883. Poet. In the 1860s, while working as a teacher in Husynka, near Kupianka, she began writing poetry and plays. An epigone of T. Shevchenko, she published a collection of poetry about peasant life, *Zirka* (The Star, 1871). An edition of her poems was published in Kharkiv in 1931.

Sokolovska, Mariia [Sokolovs'ka, Marija] (Marusia), b 1894 in Radomyshl county, Kiev gubernia, d 1919 (some sources cite 20 November 1921), near Bazar. Military figure in the anti-Bolshevik uprising of 1919. A teacher by

profession, she joined a partisan military force led by her brothers Omelko and Dmytro in March. After their death in June, she assumed leadership of the 300 cavalry and 700 infantry troops. In August her force was associated with the First Corps of the Ukrainian Galician Army. It was defeated and interned in September by a Hungarian regiment of the 58th Soviet Division, and the injured Sokolovska was captured and tortured to death.

Sokolovskyy, Oleksander [Sokolovs'kyj], b 8 September 1895 in Konotip, Chernihiv gubernia, d 29 August 1938. Writer. In 1914 he began his studies at the law faculty of Kiev University, but he was arrested in 1915 for circulating antiwar declarations and sentenced to six years of hard labor. After the February Revolution of 1917 he returned to Ukraine. Sokolovskyy's first novel, which was immensely popular, was 'Narodovol'tsi' (Members of Narodnaia Volia), printed in 1925 in the periodical *Zhyttia i revoliutsiia*. The next-published novels were *Pershi khorobri* (The First Brave Ones, 1928), *Bohun* (1931), *Nova zbroia* (The New Weapon, 1932), *Rokovani na smert'* (Destined for Death, 1933), and *Buntari* (The Rebels, 1934). Sokolovskyy was arrested in 1937 and shot. He was rehabilitated in the 1950s. His novels *Buntari* and *Rokovani na smert'* were republished posthumously in 1960. The historical novel *Bohun* was republished in 1957 in Munich and in 1964 in Kiev, and a two-volume collection of Sokolovskyy's works was published in 1971.

Oleksii Sokolovskyy

Sokolovskyy, Oleksii [Sokolovs'kyj, Oleksij], b 13 March 1884 in Velyka Burimka, Zolotonosha county, Poltava gubernia, d 25 April 1959 in Kharkiv. Agronomist and soil scientist; full member of the VUAN and AN URSR (now ANU) from 1929, the All-Ukrainian Academy of Agricultural Sciences from 1926, the All-Union Academy of Agricultural Sciences from 1935, and the Ukrainian Academy of Agricultural Sciences from 1956. He graduated from Kiev University (1908) and the Moscow Agricultural Institute (1910) and worked in the laboratories of the soil scientists D. Prianishnikov and V. Viliams. In 1924 he was appointed a professor, and in 1944 director, of the Kharkiv Agricultural Institute. He was the first president of the All-Ukrainian Academy of Agricultural Sciences. In the mid-1930s he was arrested, and spent several years in prison camps. From 1945 he headed the Laboratory of Soil Science at the ANU and then the Ukrainian Scientific Research Institute of Soil Science and Agrochemistry (1956–

9), into which the laboratory was reorganized. Sokolovsky introduced a new approach in soil colloids research, made important contributions to the theory of the soil's colloidal complex, and proposed a genetic system of soil classification. He discovered new colloidal soil technology and developed a chemical method of improving saline soils and an alkalization method of dealing with water filtration in irrigation canals. In his numerous publications he dealt with the physical and chemical properties of soil, the effect of cation exchange on the mechanical and hygroscopic properties of the soil, the melioration of podzolic and saline soils, and the role of calcium in the fixation of mineral colloids and humus in the soil. He wrote a textbook on soil science, *Kurs sil's'kohospodars'koho hruntoznavstva* (A Course in Agricultural Soil Science, 1951), which appeared in Ukrainian and Russian and was reprinted several times. An edition of his selected works came out in 1971.

Sokolovsky, Volodymyr [Sokolovs'kyj], b 1916 in Nymburk, Bohemia. Veterinary surgeon; full member of the Shevchenko Scientific Society from 1954. After completing his education in Berlin (1943) and Vienna (DVM, 1945) he worked in Bavaria. He emigrated to the United States in 1951 and settled in Chicago. He published scientific papers on small-animal surgery and artificial insemination and was a coauthor of the handbook *Management of Trauma in Dogs and Cats* (1981).

Sokolovsky, Yurii [Sokolovs'kyj, Juriij], b ? in Poltava, d 1922 in Belgrade, Serbia. Zemstvo activist and political leader. He directed the agronomy department of the Poltava gubernia zemstvo and was one of the founders of an association that helped peasants to resettle in Siberia. He was also a member of the Russian Constitutional Democratic party. Under the Hetman government of 1918 he served as minister of food supplies in F. Lyzohub's first cabinet. At the end of 1918 the UNR Directory sent him, along with V. Prokopovych and K. Matsiievych, on a diplomatic mission to Rumania and Serbia. He remained in Belgrade as an émigré.

Sokołowski, Marian, b 1839 in Czyżew Łomżyński, Poland, d 25 March 1911 in Cracow. Polish art historian; full member of the Polish Academy of Sciences. A professor at Cracow University from 1882, he wrote a book on archeological study in Galician Ruthenia (1883) and books on 'Ruthenian' painting (1885), Byzantine and Rus' medieval culture (1888), and church art (1889).

Sokolysyn, Oleksander [Sokolyšyn] (Sokolyszyn, Alexander), b 8 September 1914 in Chernivtsi, Bukovyna. Librarian; member of the Shevchenko Scientific Society. After graduating in law from Chernivtsi (1938) and Lviv (1941) universities he obtained a doctorate in political science from Innsbruck University (1947) and an MLS from Columbia University (1958). He emigrated to the United States in 1955 and worked in the United Nations library and the New York and Brooklyn public libraries as well as the law library at Yale University. He compiled *Ukrainian Selected and Classified Bibliography in English* (1972) and *Ukrainians in Canada and the United States: A Guide to Information Sources* (1981).

Yevhen Sokovych

Ivan Sokulsky

Sokovych, Yevhen [Sokovyč, Jevhen], b 1864, d 1946 in Potsdam, Germany. Civil engineer and politician. He served as minister of communications in the UNR Council of National Ministers headed by V. Holubovych (January–April 1918) and later as Ukrainian consul in Lausanne, Switzerland. He was a specialist in highway construction, and from 1922 he taught at the Ukrainian Husbandry Academy in Poděbrady, Czechoslovakia, where he prepared textbooks on geometry (1922) and melioration (1925).

Sokulsky, Ivan [Sokul's'kyj], b 7 July 1940 in Dnipropetrovske oblast, d 22 June 1992 in Dnipropetrovske. Poet, journalist, and dissident. He was expelled from Dnipropetrovske University, and worked as a journalist. In June 1969 he was arrested for composing a letter from 'the creative youth of Dnipropetrovske' protesting the suppression of Ukrainian culture. After serving over four years in a Mordovian labor camp and in the Vladimir prison he returned to Ukraine. In October 1979 he joined the Ukrainian Helsinki Group. He was arrested in April 1980 and sentenced in January 1981 to 10 years in prison and 3 years of exile for 'anti-Soviet agitation and propaganda.' He was released in 1988. His poems were published in the underground *Ukrains'kyi visnyk* (nos 1–2, 1971).

Sokyriany [Sokyryjny]. v-8. A city (1989 pop 11,700) on the Sokyrianka River and a raion center in Chernivtsi oblast. It was first mentioned in historical documents in 1666, as Sekuriany. At that time it belonged to the Moldavian principality. It was annexed by Russia in 1812, occupied by Rumania in 1918–40, and then incorporated into the Ukrainian SSR. In 1966 it was granted city status. Sokyriany is an administrative and agricultural center. Its industry includes a beverage and a cheese factory and a stone quarry.

Sokyрко, Volodymyr, b 14 January 1892 in Bilohorodka, Iziaslav county, Volhynia gubernia, d 14 October 1983 in Chernivtsi. Stage and film actor. He began his theatrical career in the Odessa Theater of Miniatures (1910) and in D. Haidamaka's troupe, and then was an actor in the Franko New Drama Theater (1921–31), the Kharkiv Theater of the Revolution (1931–41), the Kharkiv Ukrainian Drama Theater (1941–3), and the Chernivtsi Oblast Ukrainian Music and Drama Theater (1944–76). He played Ivonika in O. Kobyljanska's *Zemlia* (The Land) and the title role in W.

Shakespeare's *Othello* and acted in the films *Mirabeau* (1930) and *Nad Cheremoshem* (On the Banks of the Chere-mosh River, 1956).

The palace of the Galagan family in Sokyryntsi (architect Pavlo Dubrovsky, 1829)

Sokyryntsi [Sokyrynci]. A village (1976 pop 2,000) in Sribne raion, Chernihiv oblast. It was first mentioned in the chronicles under the year 1092. As the estate of the Galagan family the locality was developed into a cultural center. A dendrological park was set up in 1763 and redesigned as a landscape park in 1825–35, a *vertep* puppet theater was established in 1781, and a palace was built by the architect P. Dubrovsky in 1829. The kobzar O. *Veresai lived in Sokyryntsi in the 19th century. One of the first co-operatives in Ukraine, an agricultural credit union, was organized in Sokyryntsi by Hryhorii *Galagan in 1871. Today the Galagan palace and park are used by an agricultural *tekhnikum*.

Solchanyk, Roman [Sol'čanyk], b 24 September 1944 in Uzhok, Transcarpathia. Historian and political analyst. He graduated from Rutgers University and the University of Michigan (PH D, 1973), and wrote his PH D dissertation on the Communist Party of Western Ukraine. He taught Eastern European, Russian, and Soviet history at Michigan (1972–3) and Rutgers (1973–5) universities. Since 1977 he has been a research analyst specializing in Ukraine and nationality issues at Radio Liberty in Munich, and in 1988 he became director of program research and development there. His articles have appeared in *Radio Liberty Research*, *The Ukrainian Weekly*, and British and North American scholarly journals and collections. He compiled and edited, with T. Hunczak, a collection of documents and materials pertaining to 20th-century Ukrainian socio-political thought (3 vols, 1983).

Solenyk, Karpo, b 26 May 1811 in Lepel, Vitsebsk gubernia, Belarus, d 19 October 1851 in Kharkiv. Actor and one of the pioneers of Ukrainian professional theater. He studied at Vilnius University (1829–31) and first appeared on stage in 1832 as part of I. Shtein's troupe in Kharkiv. He worked with L. Mlotkovsky's troupe (1833–42) in Kursk, Kiev, and Kharkiv and then continued acting in Kharkiv, from which he toured extensively as a guest actor

throughout Russian-ruled Ukraine. He twice refused an invitation to join the Imperial Theater in St Petersburg. Solenyk's creative mastery was most evident in comic roles from the Ukrainian repertoire, including I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava) and *Moskal'-charivnyk* (The Muscovite-Sorcerer), H. Kvitka-Osnovniak's *Svatannia na Honcharivtsi* (Matchmaking at Honcharivka) and *Shel'menko-denshchuk* (Shelmenko the Orderly), V. Dmytrenko's *Kum-miroshnyk* (The Godfather-Miller), and *Vechir na khutori* (Evening on a *Khutir*), based on N. Gogol. He also played over 60 roles (in Russian) from works by Gogol, W. Shakespeare, Molière, F. von Schiller, and D. Lensky. Biographies of Solenyk have been written by O. Kysil (1928), M. Dibrovenko (1951) and A. Hrim (1963).

Solianyč, Dmytro [Soljanyč], b 1876 in Ustia, Sniatyn county, Galicia, d 1941 in Edmonton. Early Ukrainian-Canadian writer and community figure. As a young man he organized village reading houses and branches of the Sich society in Pokutia. After emigrating to Alberta in 1903, he contributed stories about Pokutian peasant and immigrant life to the Ukrainian press in Canada and the United States. A collection, *Khto vynuvatyi ta inshi opovidannia* (Who Is to Blame and Other Stories), was published in Edmonton in 1932.

Soliany route (Soliany shliakh). The overland trade route (mentioned in an 1170 chronicle) by which salt was transported from the Crimea to Kievan Rus'. It began along the left bank of the Dnieper River in the region of Kiev. Near the mouth of the Vorskla River it was met by branches from Pereiaslav and Romen. There the route crossed to the right bank of the Dnieper River and continued southward, avoiding the elbow in the Dnieper and crossing again to the left bank near the mouth of the Konk River, at Kamianka Crossing. From there (near present-day Kakhivka) the route turned toward Perekop and continued farther on to the Crimea, Chersonese Taurica, Sudak, and Teodosiia. The Soliany route was the most common but not the only route used to transport salt from the Black Sea estuaries to Kievan Rus'. Salt was also brought to Rus' from Kalush and Stryi, in Galicia.

Solntsev, Volodymyr [Solncev], b 23 July 1892 in Kiev, d 1973 in Germany. Internal medicine specialist. A graduate of Kiev University (1917), he worked at the internal medicine clinic of the Kiev Medical Institute (docent from 1928, professor from 1937). In 1939 he became chairman of functional diagnostics at the Ukrainian Institute of Clinical Medicine. In 1943 he settled in Germany. His publications, dealing with internal medicine, balneology, and geriatrics, appeared in Ukrainian, Russian, German, and English.

Solntseva, Yuliia [Solnceva, Julija], b 7 August 1901 in Moscow, d 29 October 1989 in Moscow. Film director, actress, and producer; wife of O. *Dovzhenko. Using Dovzhenko's scripts she produced the films *Poema pro more* (A Poem about the Sea, 1958), *Povist' polum'ianykh lit* (A Chronicle of Flaming Years, 1961), and *Zacharovana Desna* (The Enchanted Desna [River], 1965), as well as *Nezabutnie* (The Unforgettable, 1968) and *Zoloti vorota* (The Golden Gate, 1969), about Dovzhenko. She also edited a five-volume collection of his works (1983–5).

Andrii Solohub at his easel (Paris, 1981)

Solohub, Andrii, b 8 December 1922 in Konotip, Chernihiv gubernia. Sculptor and painter. A postwar émigré, he studied sculpting in Salzburg (1947–9) under F. Yemets and painting at the Ecole nationale des beaux arts in Paris. He has created busts (eg. of S. Petliura) and small sculptures and has painted modernist portraits (*Self-Portrait, Daria Siiak, Emma Andriievska, Irena Zhukovska, Okšana and Danylo Struk*), still lifes (*Still Life with Violin*), and landscapes (*Toledo, Paris, Istanbul, Venice*) and the iconostasis of St Simon's Ukrainian Orthodox Church in Paris (1973). Recently he has devoted himself to landscape aquarelles of Venice, southern France, and Paris. An album of his drawings was published in 1974.

Solohub, Vasyi, b 8 September 1928 near Priadivka, now is Tsarychanka raion, Dnipropetrovske oblast. Writer. He has written the poetry collections *Students'ki lita* (Student Years, 1957) and *Trudne shchastia* (Hard Luck, 1959); the children's poetry book *Ia vzhe pidris* (I've Already Grown Up, 1960); the prose collections *Stezhka vyvodyt' na shliakh* (The Path Leads Out to the Road, 1958), *U kraplyni vidbylosia sontse* (In a Droplet the Sun Was Reflected, 1960), *Vohniana spadshchyna* (A Fiery Legacy, 1962), *Polynove pryshastia* (Wormwood Communion, 1972), and *Osviachennia liubov'iu* (Sanctification by Love, 1978); and the novels *Chesnist'* (Integrity, 1967) and *Sotvory sebe* (Create Yourself, 1980).

Solohub-Bocconi, Iryna, b May 1885 in Neslykhiv, Kamianka Strumylova county, Galicia, d 1972 in Milan. Opera singer (soprano). A graduate of the Lviv Conservatory (1905; pupil of C. Zarembo and O. Myshuha), she made her debut in the Lviv Opera Theater in the name-part in S.

Moniuszko's *Halka*. In 1906–14 she performed in Poznań and Milan, notably in the name-parts in G. Puccini's *Madame Butterfly* and G. Verdi's *Aida* and *La Traviata*. She was also well known as a chamber singer in Lviv, Vienna, and a number of Italian cities, where she performed songs by M. Lysenko, A. Vakhnianyn, and O. Nyzhankivsky; folk songs; and operatic arias. She retired from the stage in 1923.

Excavation of the Solokha kurhan

Solokha kurhan. A Royal Scythian burial mound of the late 5th to early 4th century BC near Velyka Znamianka, now in Kamianka-Dniprovska raion, Zaporizhia oblast. Excavations by N. *Veselovsky in 1912–13 uncovered two burial vaults – a looted central chamber and an intact side chamber, under an 18 m mound. Among the items recovered in the course of excavations were the remains of five horses and their handler, a masterfully executed gold comb with figures of warring Scythians, a Greek helmet, a bronze mace, and domestic items. Solokha was one of the richest of the Royal Scythian kurhans found in Ukraine; the collection is housed in the Hermitage in St Petersburg.

Solomarsky, Oleksandr [Solomars'kyj], b 12 July 1897 in Yeiske, Kuban gubernia, d 12 June 1980 in Kiev. Stage director, actor, pedagogue, and public figure. He began his theatrical career in Kiev (1922) and in 1924 organized (with I. Deieva) the *Kiev Young Spectator's Theater, where he worked as actor and director until 1931. He led the Odessa Russian Drama Theater (1944–53) and, again, the Kiev Young Spectator's Theater (1953–61) and taught at the Kiev Institute of Theater Arts (1954–78).

Solomon, John, b 24 May 1910 in Zoria, Manitoba, d 25 June 1985 in Winnipeg. Judge, politician, and community leader. After graduating from the University of Manitoba (LLB, 1934) Solomon practiced law. He was elected to the Manitoba legislature as a Liberal-Progressive for Emerson constituency (1941–57) and served as deputy speaker (1953–7). He was appointed county court judge for Winnipeg in 1957 and a member of the Manitoba Court of Queen's Bench in 1970. He was president of the *Ukrainian Self-Reliance League (1941–9), president of the board of directors of St Andrew's College in Winnipeg (1957–85), and a longtime member of the consistory of the Ukrainian Orthodox Church of Canada.

John Solomon

Solomonik, Ella, b 11 June 1917 in Ekaterinburg, Perm gubernia. Historian. A graduate of Leningrad University (1941), she taught history in high schools and pedagogical institutes in 1941–5. From 1948 she worked in the archeological department of the Crimean branch of the USSR Academy of Sciences (now the Academy of Sciences of Ukraine Institute of Archeology). Among her scholarly works are *Sarmatskie znaki Severnogo Prichernomor'ia* (Sarmatian Inscriptions of the Northern Black Sea Coast, 1959), *Novye epigraficheskie pamiatniki Khersonesa* (New Epigraphic Monuments of Chersonesus, 1964), and *Graffiti s khory Khersonesa* (Graffiti from the Gallery of Chersonesus, 1984).

Anton Solomukha in his Paris studio

Solomukha, Anton [Solomuxa], b 2 November 1945 in Kiev. Painter. A graduate of the Kiev State Art Institute (1975), he worked as a muralist. He was allowed to emigrate to France in 1978, after which he participated in exhibitions of Ukrainian nonconformist art held in Munich, London, and New York in 1979 and in a group exhibition (together with V. Makarenko, V. Sazonov, and V. Strelnikov) in Toronto, Winnipeg, Chicago, Detroit, Cleveland, and New York in 1982–3. A versatile artist, in the 1970s he created surrealist compositions, such as *Ukrainian Folk Songs No. 3*, and experimented with abstraction, in which style he painted intricate compositions of interlocking shapes, such as *Symphony* (1979) and *Conversation* (1979). Solomukha has been inspired by his Ukrainian heritage to create series of works – ‘Forgotten Ancestors,’ ‘Cossack

Dreams,’ and ‘Ukrainian Folk Songs and Tales’ – filled with elements of the fantastic and grotesque (eg, *Old Woman and Dog* [1982], *Hey, Hryts* [1983], and *Rendezvous in the Steppe* [1984]). Solomukha’s more recent works are painted in a neoexpressionist manner and make use of signs and symbols as part of an overall painterly surface (eg, *Homage to My Chair* [1986] and *Snail Climbing to Heaven* [1986]). He has had numerous solo exhibitions, including Chicago (1990), New York (1991), and annual ones in Paris and Köln.

D. Zelska-Darewych

Solona River. A right-bank tributary of the Vovcha River. It flows for 81 km through Donetsk and Dnipropetrovske oblasts and drains a basin area of 946 sq km. The river is used, in parts, for irrigation. Its upper course dries out in the summer.

Solonchak soils. See Soil classification.

Solone. v-15. A town smt (1986 pop 6,400) and raion center in Dnipropetrovske oblast. It was founded at the beginning of the 18th century and named Engelhardtivka after its founder and owner. After being sold to another landowner in the 1780s, the village was renamed Solonenke. At the end of the 19th century it had just under 1,800 inhabitants and was known as Solone. In 1960 it attained smt status. Its economy rests on agriculture and food processing.

Solonetz soils. See Soil classification.

Solonyna, Kostiantyn, b ?, d 1696. Colonel of Kiev regiment in 1669–78 and 1687–8. He was Hetman I. Mnohohrshny’s emissary to Muscovy and his representative at a 1671 conference of Polish and Russian deputies in Myhnovychi. In 1672 he was a candidate for hetman, and in 1676 he represented Hetman I. Samoilovych in Moscow. He lost his office because of his opposition to Hetman I. Mazepa. His nephew, Serhii (b ca 1660, d 1737), became the first in a line of Solonyna captains of Oster company in Kiev regiment (1709–76).

Solonyinka, Mariia, b 7 January 1909 in Birky Velyki, Ternopil county, Galicia, d 26 February 1982 in Toronto. Community figure; wife of V. Solonyinka. A Maslosoiuz employee, she was jailed by the Polish authorities in 1937 for her membership in the OUN. In 1948 she arrived in Canada, where she headed the Women’s Association of the Canadian League for Ukraine’s Liberation in 1952–75 and edited the women’s section of *Homin Ukraïny* for many years.

Solonyinka, Vasyl, b 20 October 1912 in Dovzhanka, Ternopil county, Galicia, d 25 September 1990 in Toronto. Journalist and political figure. He was arrested in 1933 by the Polish authorities for his involvement in the OUN and sentenced in 1934 to eight years’ imprisonment. After his release in May 1939, he joined an OUN (Bandera faction) expeditionary group. From July 1941 to May 1943 he was imprisoned in Lviv by the Gestapo. A postwar refugee in Austria, he emigrated to Canada in 1948. There he was a leading member of the *Canadian League for Ukraine’s Liberation, served as editor in chief (1954–78) of its paper,

Vasyl Solonynka

**Homin Ukraïny*, headed the Ukrainian Journalists' Association of Canada (1970–2), and was a member of the executive of the Ethnic Press Club.

Solonytsia, Battle of. The culmination of the uprising led by S. *Nalyvaiko and H. *Loboda in 1594–6. After losing a battle near the landmark Hostryi Kamin, the rebels retreated to Left-Bank Ukraine with their families (altogether nearly 10,000 refugees) and made camp at Solonytsia, near Lubni. Polish forces, led by Crown Hetman S. Żółkiewski, began a siege of the encampment on 26 May 1596. In secret negotiations with Loboda the Poles promised amnesty for the registered Cossacks. That offer prompted an armed conflict among the Cossacks, in which Loboda was killed. As the Poles prepared for their decisive attack, the registered Cossacks seized Nalyvaiko and the other rebel leaders and turned them over to Żółkiewski (7 June 1596). The Poles attacked anyway and slaughtered everyone in the camp, including the women and children. Only a small contingent of Cossacks broke through and escaped to the Zaporozhian Sich.

Solonytsivka [Solonycivka]. IV-17. A town smt (1986 pop 11,000) on the Udy River in Derhachi raion, Kharkiv oblast. It was founded in the 17th century. It attained smt status in 1938. The town has a furniture and a silicate brick factory. It is the home of a juvenile labor colony.

Solotvyn or Solotvyna. V-5. A town smt (1986 pop 4,100) on the Bystrytsia Solotvynska River in Bohorodchany raion, Ivano-Frankivske oblast. It was first mentioned, as Krasnopol, in the 12th-century Halych Chronicle, and it has been known as Solotvyn since the second half of the 16th century. It came under Polish rule in the second half of the 14th century. By the mid-18th century it was an important center for the manufacture and sale of salt, honey, leather, and lumber. At that time its inhabitants participated in the opryshok movement. After the partition of Poland in 1772, Solotvyn was annexed by Austria, and in 1918 it fell under Polish rule. In 1939 it was incorporated into the Ukrainian SSR. Today it manufactures forest products and has a regional museum.

Solotvyna. VI-4. A town smt (1986 pop 9,200) on the Tysa River in Tiachiv raion, Transcarpathia oblast. It was first mentioned in 14th-century sources and has been known as Aknaslatyna, Maramoroska Solotvyna, and Slatynski Doly. The town was under Hungarian rule until 1919, was

ceded to Czechoslovakia in 1920, and was reoccupied by Hungary in 1939. Since 1945 it has been part of Ukraine. In 1947 it was promoted to smt status. Its main industry is salt mining. Two abandoned shafts have been converted into allergy hospitals.

One of the Solotvyna rock salt mines

Solotvyna rock salt deposits. Large salt reserves located in Tiachiv raion, Transcarpathia oblast. The salt is of a high quality. The deposit, which is 1,800 m long and 400–760 m wide, has been known since the 8th century. Industrial mining began at the end of the 18th century, and by the 20th century eight mines had been opened, and seven of them exhausted. In 1982 two underground mines were active. The salt is processed locally for domestic use and for use as feed. In 1981 total recoverable reserves were estimated at 222 million t. In 1970 the deposit yielded 451,000 t. In 1960 the 326,000 t mined there accounted for 10 percent of all Soviet salt production.

Dmytro Solovei

Solovei, Dmytro [Solovej], b 4 November 1888 in Sribne, Pryluka county, Poltava gubernia, d 9 July 1966 in St Paul, Minnesota. Historian, statistician, pedagogue, and publicist; member of the Ukrainian Academy of Arts and Sciences in the US. He entered Kharkiv University in 1910, but was suspended in 1914 for organizing a commemoration of T. Shevchenko and then exiled to Poltava. In 1920 he was arrested by Soviet security forces and sentenced to death. His sentence was commuted, and he was

allowed to move to Kharkiv to work as a statistician for a government bulletin. In 1926 he undertook graduate studies at the Scientific Research Chair of Ukrainian Culture and established himself there as a research associate. In 1943 he moved to Lviv; subsequently he emigrated to the West. He eventually settled in the United States.

Many of Solovei's writings dealt with political issues after the Second World War, and he served as an associate of the Institute for the Study of the USSR. His works include *Holhota Ukraïny* (The Golgotha of Ukraine, 1953), *Ukraïns'ke selo v rokakh 1931–1933* (The Ukrainian Village in 1931–3, 1955), *Ukraïna v systemi soviets'koho koloniializmu* (Ukraine in the Soviet Colonial System, 1959), *Holod u systemi koloniial'noho panuvannia v Ukraïni* (Famine in the System of Colonial Domination in Ukraine, 1959–60), *Polityka TsK KPRS u plianuvanni rozvytku promyslovosty ta promyslovyykh kadriv na Ukraïni* (The Policies of the CC of the CPSU for Developing Industry and Industrial Cadres in Ukraine, 1960), *Ukraïns'ka nauka v koloniial'nykh putakh* (Ukrainian Scholarship in Colonial Chains, 1963), and *Rozhrom Poltavu* (The Destruction of Poltava, 1974).

A. Zhukovsky

Solovei, Oksana (Solovej), b 2 July 1919 in Poltava. Translator and journalist; member of the Ukrainian Academy of Arts and Sciences in the US; daughter of D. Solovei. A postwar refugee in Germany and Minneapolis, she has contributed literary and cultural articles and reviews and Ukrainian translations of English, French, German, and Russian literature to periodicals such as *Suchasnist'*, *Moloda Ukraïna*, and *Ukraïns'ki visti*. Published separately have been her translations of H.W. Longfellow's *Song of Hiawatha* (1965), A. Camus's *Les justes* (1968), Vercors's *Le silence de la mer* (1970), V. Shalamov's *Kolyma Tales* (1972), and J. Cocteau's *La voix humaine* (1974).

Solovets Islands. A penal colony in the White Sea, Arkhangelsk oblast, Russia. With an area of 347 sq km, the islands are largely covered with forest and many lakes and swamps. The climate is cold and damp.

In the 1420s and 1430s monks settled on the islands; they had become a major outpost of Russian monastic life in the far north by the end of the 16th century. A strategic frontier fortress was built there. Until 1903 the islands were used by the tsars as a prison or place of banishment for political and religious offenders, but there were seldom more than a few dozen prisoners at one time. Among them were Ukrainians: some confederates of V. *Kochubei and I. *Iskra, who had denounced Hetman I. Mazepa to the tsar, and who were interned there in 1708–12; some of Mazepa's supporters after 1709, including the general osaul D. *Maksymovych and the colonel Y. Pokotylo of the serdiuk regiment; the archimandrite H. *Odorsky and the protopriest (of Lohvytsia) I. *Rohachevsky, in 1712; P. *Kalnyshevsky, the last Kish otaman of the New Sich, in 1776–1801; and Yu. *Andruzky, a member of the Cyril and Methodius Brotherhood, in 1850–4.

Most of the monks evacuated the islands after the Russian Revolution, and in 1923 the Bolsheviks established the Solovets Special Purpose Camp there, modeled on prisoner-of-war camps. Later it became part of the Northern Special Purpose camp complex, and still later, Section Eight of the White Sea–Baltic camp complex. In 1937 the camp in the Solovets Islands was renamed the Solovets

Special Purpose Prison of the Main Administration of State Security of the USSR. For most of the 1920s the regime in the camp was relatively mild, and the number of prisoners relatively small. With the onset of the Stalinist terror, however, the Solovets Islands were packed with prisoners living in severe conditions, subjected to cold, hunger, punishment cells, and beatings. In 1931–3 many prisoners were sent to work on the *White Sea Canal. Late in 1938 the prisoners were evacuated from the Solovets Islands to other camps, and the islands became a naval base.

Ukrainians in the camp in the mid-1920s were primarily Petliurists, anti-Bolshevik insurgents, and clergymen. During dekulakization and *collectivization in 1928–33 masses of Ukrainian peasants were exiled to the islands; among them were 325 peasants arrested for cannibalism during the man-made *famine of 1932–3. Arrests in the early 1930s, following the trial of the *Union for the Liberation of Ukraine, brought much of the non-Communist Ukrainian intellectual elite to the camp, as well as thousands of activists of the *Ukrainian Autocephalous Orthodox church. In 1933 Ukrainian Communists also began to fill the camps.

Among prominent Ukrainians who were interned in the Solovets Islands were the physician and political activist A. Barbar; the Communist poet V. Bobynsky; V. Chekhivsky, leader of the Ukrainian Social Democratic Workers' party and later of the Ukrainian Autocephalous Orthodox church; the writer and critic H. Epik; the poet P. Fylypovych; the historian Y. Hermaize; the writer and Communist activist M. Irchan; the Socialist Revolutionary P. Khrystiuk; the Futurist poet H. Koliada; L. Kurbas, the director of the Berezil theater; the writer and political figure A. Krushelnytsky; the playwright M. Kulish; the writer M. Liubchenko; the writer V. Mysyk; the literary historian M. Novytsky; M. Pavlushkov (arrested as head of the Association of Ukrainian Youth); S. Pidhainy, who later did much to document the history of the Solovets camps; the writers V. Pidmohylny, Ye. Pluzhnyk, and K. Polishchuk; M. Poloz, former commissar of finances of Soviet Ukraine; the geographer S. Rudnytsky; the writer M. Semenko a leading exponent of futurism; S. Semko former rector of the Kiev Institute of People's Education; the literary historian Ye. Shabliovsky; the writer G. Shkurupii; O. Shumsky, whose name became synonymous with Ukrainian national communism; the historian M. Slabchenko; the writer O. Slisarenko; the prominent CP(B)U activist P. Solodub; the hygienist V. Udovenko; the poet and journalist M. Vorony; the writer V. Vrazhlyvy; the Marxist historian M. Yavorsky; the memoirist V. Yurchenko; and the Neoclassicist poet and critic M. Zerov.

From 1924 until 1930 (perhaps longer) the Solovets camp had its own journal, *Solovetskie ostrova*. After conditions in the Solovets camp became known in the West, the Soviets released a propaganda film, *Solovki*, which mendaciously depicted life in the prison camp.

A. Zhukovsky

Solovev, Sergei (Soloviev), b 17 May 1820 in Moscow, d 16 October 1879 in Moscow. Russian historian and historiographer; member of the Imperial Russian Academy of Sciences from 1872. A graduate of Moscow University (1842; PH D, 1848), he was a professor there (1847–77) and served as dean of history and philology (1855–69) and rector (1871–7). He was a leading representative of the statist school of Russian history. Among his many works are a monumental history of Russia and its empire to 1775 (29 vols, 1851–79; 10th edn, 15 vols, 1959–66), which contains valuable information on medieval Rus' and the Hetman state (English trans ed E. Graham and pub as *History of Russia*, 1976–); a history of relations among the Riurikide princes of Rus' (PH D diss, 1847); a history of the fall of Poland (1863); and articles on Prince Danylo of Galicia (1847), Little Russia up to its subjugation by Tsar Aleksei Mikhailovich (3 pts, 1848–9), Princess Olha (1850), the grandsons of Grand Prince Yaroslav the Wise (1851), Hetman I. Vyhovsky (1859), the Cossacks up to the time of Hetman B. Khmelnytsky (1859), and L. Baranovych (1862). An edition of his selected works was published in 1983.

Anatolii Solovianenko

Rev Meletii Solovii

Solovianenko, Anatolii [Solov'janenko, Anatolij], b 25 September 1932 in Donetske. Opera singer (lyric-dramatic tenor). A graduate of the Donetske Polytechnical Institute (1954), he studied singing under O. Korobeichenko (1952–62), obtained a scholarship to Milan's La Scala, and completed study at the Kiev Conservatory (1978). Since 1965 he has been a soloist of the Kiev Theater of Opera and Ballet. His operatic roles include Andrii in S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, Petro in M. Lysenko's *Natalka from Poltava*, Lensky in P. Tchaikovsky's *Eugene Onegin*, Edgar in G. Donizetti's *Lucia di Lammermoor*, Alfredo in G. Verdi's *La Traviata*, and Ro-

dolfo in Puccini's *La Bohème*. He has concertized abroad, including with the New York Metropolitan Opera (1977–8). In recital he often performs Ukrainian folk songs.

Solovii, Meletii [Solovij, Meletij] (Solovey, Meletius), b 29 April 1918 in Perevoloka, Buchach county, Galicia, d 27 December 1984 in Edmonton. Basilian priest, church historian, and journalist. He entered the Basilian order in 1932 and was ordained in 1941. He studied theology in Olomouc, Czechoslovakia, at the University of Vienna (D TH, 1944), and at the Pontifical Oriental Institute in Rome (D TH, 1950). In 1950 he emigrated to Canada, where he helped edit the Basilian journal *Svitlo* (1957–64) and other publications and worked as a parish priest. In 1968–71 he was a professor at the University of Ottawa. A specialist in liturgics, he wrote *Bozhestvenna liturhiia* (1964; English trans *The Byzantine Divine Liturgy*, 1972), *Introduction to Eastern Liturgical Theology* (1972), *Meletii Smotryts'kyi iak pys'mennyk* (Meletii Smotrytsky as a Writer, 2 vols, 1977–8), and numerous articles, and coauthored (with A. Velyky) a biography of Y. Kuntsevych (1967).

Solovii, Tadei [Solovij, Tadej], b 1857 in Potorytsia, Sokal county, Galicia, d 31 August 1912 in Lviv. Lawyer and civic activist. A law graduate of Vienna University, he opened his own office in Lviv in 1888. He served as legal counsel of the Galician Provincial Bank (1901–12) and of the Greek Catholic metropol of Halych. He avoided politics and was active in various Ukrainian economic and cultural organizations, as a founding member of the *Land Mortgage Bank, an executive member of Silskyyi Hospodar, and a trustee of the National Museum. Many societies, students, and artists enjoyed his generous financial support.

Archbishop Varlaam Solovii

Solovii, Varlaam [Solovij] (secular name: Viktor), b 29 November 1891 in Kyryivka, Sosnytsia county, Chernihiv gubernia, d 31 January 1966 in Sydney, Australia. Community and church activist and bishop of the Ukrainian Autocephalous Orthodox church. He studied at the theological seminaries in Novhorod-Siverskyi and Chernihiv and the law faculty at Warsaw University (1914). During the struggle for Ukrainian independence he served in the Sich Riflemen and then as a legal adviser to the government of the UNR and the Directory. In the interwar period he lived in Poland and was involved in the Ukrainianization of church life in Volhynia and Polisia as an adviser to Metropolitan D. Valedinsky. A postwar émi-

gré in Germany, he moved in 1950 to Australia, where he was president of the Association of Ukrainians in Australia (1951–2). He was ordained in 1954 and consecrated bishop of Australia and New Zealand in 1958, with his see in Sydney.

Solovii, Volodymyr [Solovij], b 1891 in the Lemko region, d 15 November 1958 in Montreal. Political activist; son of T. *Solovii. In 1918–20 he served as secretary of the UNR mission to Switzerland. In the interwar period he was active in the Ukrainian National Democratic Alliance and, in the election of 1930, ran for a seat in the Polish Sejm. In 1939 he left for Paris, and in the following year was sent to London by O. Shulhyn as a representative of the *Government-in-exile of the UNR. In 1948 he emigrated to Canada.

Jurij Solovij: *Lovers* (oil, 1967)

Solovij, Jurij, b 6 June 1921 in Lviv. Painter, sculptor, and art critic. A graduate of the Lviv Arts and Crafts School (1944) and a postwar refugee in Germany and then the United States, he has experimented with several styles (postimpressionism, expressionism, abstract expressionism). Since the 1970s he has used mixed media in unusual combinations. Since the 1950s he has been preoccupied with the themes of birth and death. His later works deal with the universality of pain in human life. Some of his characteristic works are *Motherhood* (1947), *Astral* (1948), *Crucifixion* (1950, 1969), and the series '1,000 Heads.' Solo exhibitions of his works have been held in New York (1959, 1965, 1970, 1972), Chicago (1960, 1972, 1980), Toronto (1963, 1972, 1973), Munich (1971), and Winnipeg (1973). His art criticism has been published in the émigré press and separately as *Pro rechi bil'shi nizh zori* (About Things Greater than Stars, 1978).

Soloviov, Mykhailo [Solovjov, Myxajlo] (Solovev, Mikhail), b 29 May 1886 in Elets, Orel gubernia, Russia, d 3 March 1980 in Kharkiv. Epidemiologist; full member of the USSR Academy of Medical Sciences from 1945. A graduate of Moscow University (1911), he worked at the Odessa Military Hospital and in the municipal sanitation organization (1914–20), and at the Odessa Medical Institute (1920–5), the Kharkiv Institute of Microbiology and Epidemiology (1925–31), and the Kharkiv Medical Insti-

tute (professor from 1930). His publications dealt with the prevention of infectious diseases, particularly cholera, malaria, diphtheria, anthrax, and scarlet fever.

Soltan, Yosyf II, b ? , d 1522 in Smolensk, Russia. Orthodox metropolitan of Kiev. A Belarusian noble, he took monastic vows and served as an archimandrite in Slutsk and as bishop of Smolensk (1498–1507) before his elevation to the office of metropolitan of Kiev in 1507. Soltan rejected the Church Union of *Florence. He assiduously defended the rights of the Orthodox church in Ukraine and Belarus, rid it of administrative faults and abuses, and improved discipline within it. He convoked three sobors, of which the first, in Vilnius in January 1509, was the most important, and he was the author of the regulations adopted at the sobor. In 1511 King Sigismund I granted Soltan a royal privilege reaffirming the authority of Soltan and his bishops over all the Orthodox faithful and churches in the Polish Kingdom and the Grand Duchy of Lithuania, and forbade individuals of the Catholic faith to interfere in matters of the Eastern church. Soltan traveled throughout the Orthodox East and maintained good relations with the patriarch of Constantinople. His description of the Slutsk monastery was published in *Akty Zapadnoi Rossii* (vol 1).

Soltanovsky, Avtonom [Soltanovs'kyj], b 1826 in eastern Podilia, d 1886. Pedagogue. He wrote a valuable series of articles dealing with Right-Bank Ukraine during the years 1846–67, entitled 'Zapysky,' serialized in *Kievskaja starina* (1892–4). The series is an important source for the history of the region in the 19th century, in particular for the state of secondary education.

Soltys, Adam (Soltys), b 4 July 1890 in Lviv, d 6 July 1968 in Lviv. Composer, conductor, and teacher. The son of a well-known Polish conductor and composer, M. Soltys, he studied at the Lviv Conservatory (1903–11), the Berlin State Academy of Music (1911–14), the Berlin State Academy of the Arts (1914–16), and the musicological department of Berlin University (PH D, 1921). He was a professor at the Lviv State Conservatory during 1930–9 and 1945–68. His main works include the ballet *Levyne sertse* (The Lion's Heart, 1930), music for the play *Kaminnyi hospodar* (Stone Host, by Lesia Ukrainka, 1941), two symphonies (1922 and 1946), works for chorus, solo songs, and arrangements of Ukrainian and Polish folk songs.

Soltys (Polish: *soltys*, from German *Schultheiss* and Latin *scultetus*). An official appointed by the feudal owner of a village to act as his deputy in matters of local administration and justice. The office, based on Germanic law, was introduced in Western Ukrainian territories that were acquired by Poland in the 14th century. Until the 16th century the office was hereditary. It was not fixed to a specific class: a *soltys* could be a nobleman, a burgher, or a wealthy peasant. A military figure could be rewarded for service by becoming a *soltys* and receiving a *soltystvo* (a manor estate). In the 14th and 15th centuries those officials came to constitute an influential socioeconomic group. In 1923–39 in Western Ukrainian villages under Polish rule, the *soltys* was the chief of the local administration and of the territorial government overseen by the village council.

Solukha, Kost [Soluxa, Kost'], b 1869 in Podilia gubernia, d 1922. Civic and cultural activist and philanthropist. A graduate of Kiev University, he worked as a zemstvo physician in Kamianets-Podilskyi. He was active in the Podilia Prosvita society and served as its president from 1907 to 1914. In 1918 he was one of the founders of the *Kamianets-Podilskyi Ukrainian State University.

Solutrean culture. An Upper Paleolithic culture named after the La Solutré settlement site in France. Initially regarded as a separate epoch, it was reclassified (by Soviet Ukrainian archeologists) in the 1950s in conjunction with the Aurignacian culture to form a single Aurignacian-Solutrean culture. A significant discrepancy exists in the dating of this period, with starting dates ranging from 40,000 to 35,000 BC, and finishing dates from 25,000 to 15,000 BC. Major developments during this time included the appearance of Cro-Magnon man and the development of stable settlement sites and more permanent forms of shelter (specifically pit dwellings). Significant sites of this period in Ukraine include *Pekari and *Molodove. (See also *Paleolithic Period.)

Som, Mykola, b 5 January 1935 in Trebukhiv, Brovary raion, Kiev oblast. Poet of the **shestydesiatnyky* generation. He has written the poetry collections *Idu na pobachennia* (I'm Going for a Rendezvous, 1957), *Viknamy do sontsia* (With Windows Facing the Sun, 1960), *Sviaty khlib* (Sacred Bread, 1961), *Mriia* (A Dream, 1963), *Vyshyvanka* (An Embroidery, 1964), *Duma nad vohnem* (A Duma over a Fire, 1968), *Stezhka do okeanu* (The Path to the Ocean, 1973), *B'iu cholom* (I Kowtow, 1978), *Tovarystvo* (Company, 1979), and *Prysviaty i poslannia* (Dedications and Epistles, 1983), and many songs. He edited a collection of V. *Symonenko's poems and reminiscences about him, *Z matiriu na samoti* (Alone with Mother, 1990). He was awarded the annual V. Sosiura Prize in 1983.

Somko, Nadiia, b 15 January 1916 in Konotip, Chernihiv gubernia. Painter and sculptor; wife of S. *Makarenko. From 1934 to 1941 she studied at the Kharkiv and then Kiev State art institutes. As a refugee she has lived in Italy (1943–8), Argentina (1948–60), and the United States (since 1960). She has painted Ukrainian and American landscapes, genre scenes, still lifes, portraits, and historical battle scenes. They include *Glory to the Victors* (depicting George Washington, donated on the occasion of the US bicentennial to the City of Los Angeles), *Prince Ihor's Battle with the Polovtsians*, *Hetman Bohdan Khmelnytsky*, *Battle near Kaffa*, and *Hetman Vyhovsky's Victory*. In the 1970s she created 23 bronze and terra-cotta sculptures, among them *Victory*, *Prince Oleh*, *Prince Sviatoslav's Battle with a Khazar*, *Hetman Bohdan Khmelnytsky*, *Jubilant Cossack*, *Farewell*, *Buffalo Bill*, and *Don Quixote and Sancho Panza*. Solo exhibitions of her works have been held in New York, Los Angeles, Boston, Chicago, Detroit, Cleveland, and Philadelphia. A book about Somko and Makarenko (1971) and an album of her works (1981) have been published.

Somko, Yakym, b ? in Pereiaslav, d 28 September 1663 in Borzna. Cossack leader and acting hetman of Left-Bank Ukraine (1660–3); first father-in-law of B. Khmelnytsky. He was a captain of Pereiaslav regiment in 1654, and in 1658 he became its acting colonel. At the Pereiaslav Coun-

Nadiia Somko: *Dreams* (oil)

cil of 1660 that followed the conclusion of the Treaty of *Slobodyshche (to which Somko was opposed) he was again elected colonel of Pereiaslav regiment and acting hetman of Left-Bank Ukraine. In 1660–2 he fought against both the Poles and the Tatars, who sought to occupy his territory. He initially supported Muscovy but gradually became disenchanted with its policies (particularly since they hindered his efforts at uniting all of the Cossack state under his command). His withdrawal of support caused Muscovy to distrust him. Bishop M. Fylymonovych, a stalwart Moscow loyalist and supporter of I. Briukhovetsky, was also ill-disposed toward him. Somko, however, had the backing of the anti-Muscovite Kievan clergy led by I. Gizel and I. Galiatovsky.

Somko's opponents accused him of secret dealings with Yu. Khmelnytsky and P. Teteria and with Poland and the Crimea. Moscow took advantage of the accusation – and of the fact that it had not yet approved the decision of the Cossack *starshyna* council at Kozelets in 1662 to recognize Somko's tenure as hetman – to instigate a **chorna rada* in Nizhen (27–28 June 1663). The general gathering of Cossacks was convened to choose a new hetman. V. Zolotareno chose to support Somko, but a majority opted for I. Briukhovetsky, who was elected hetman. As the event became increasingly hostile, Somko, Zolotareno, and their supporters sought the protection of the Muscovite officials who were present as observers. But the officials imprisoned them and then handed them over to Briukhovetsky, who had them executed in Borzna. Somko is depicted by P. Kulish in his historical novel *Chorna rada* (The Black Council, 1857).

A. Zhukovsky

Somov, Orest (pseud: Porfirii Baisky), b 21? December 1793 in Vovcha, Kharkiv gubernia, d 8 June 1833 in St Petersburg. Russian Romantic prose writer and critic of Ukrainian origin. As a student at Kharkiv University he collected Ukrainian folklore and contributed poems and fables to **Khar'kovskii Demokrit* (1816) and **Ukrainskii vestnik* (1817). From 1817 he lived in St Petersburg, where he was close to Decembrist circles and A. Pushkin and belonged to the Free Society of Devotees of Russian Literature and the Free Society of Devotees of Literature, Sciences, and Arts. He promoted and influenced N. *Gogol as a writer and corresponded with I. Kotliarevsky and M. Maksymovych. His poems (one on B. Khmelnytsky), prose, translations, polemical and literary articles, and reviews appeared in the periodicals *Blagonamerennyi, Nevskii zritel', Sorevnovatel', Severnaia pchela, Syn otechestva, Literaturnaia gazeta* (of which he was editor, 1830–1), and *Utreanniia zvezda* and in literary almanacs. Some of his belletristic works, such as an unfinished novel about S. Harkusha, 'Gaidamak' (The Haidamaka, fragments published in 1827, 1829, and 1830), and the tales 'Gaidamak' (1825), 'Turodivyi' (The Holy Fool, 1827), 'Rusalka' (The Water Nymph, 1829), 'Oboroten'' (The Werewolf, 1829), 'Svatovstvo' (Matchmaking, 1831), 'Vidienie na iavu' (An Apparition While Awake, 1831), 'Nedobryi glaz' (The Evil Eye, 1833), and 'Kievskii ved'my' (Kievan Witches, 1833), were based on Ukrainian folktales and legends. Editions of his works were published only recently, in Ann Arbor, Michigan (1974), and Moscow (1984). Z. Kyryliuk's monograph about Somov (Kiev 1965) contains a bibliography of his works.

R. Senkus

Sonata. An instrumental composition for one or two instruments, usually in several movements. The first sonatas written by Ukrainian composers were by M. Berezovsky (for violin and cembalo) and D. Bortniansky (for piano). Among M. Lysenko's many instrumental works there is a three-part piano sonata. At the beginning of the 20th century, V. Barvinsky, Ya. Stepovy, and L. Revutsky wrote sonatas for piano; in later periods, V. Kosenko, B. Liatoshynsky, M. Tits, R. Simovych, Yu. Shurovsky, and M. Skoryk were some of the most notable Ukrainian composers to use the sonata form.

Sonechko (Little Sun). An illustrated children's magazine published semimonthly by the Ukrainska Shkola society in Rivne in 1936–9. It was edited by P. Zinchenko and A. Vivcharuk.

Sonevytsky, Ihor [Sonevyc'kyj], b 2 January 1926 in Hadynkivtsi, Kopychyntsi county, Galicia. Composer, musician, conductor, and teacher; member of the Shevchenko Scientific Society since 1977. He studied at the Staatliche Hochschule für Musik in Munich (diploma, 1950) and the Ukrainian Free University (PH D, 1961). Emigrating to the United States after the Second World War, he became a cofounder of the *Ukrainian Music Institute of America as well as president and artistic director of the Music and Art Center of Greene County, New York. His compositions include the opera *Star*, the ballet *Cinderella*, incidental music for numerous theater plays, a *Piano Concerto in G Major*, variations and miniatures for piano, approx 60 art songs for voice and piano (including cycles to

Ihor Sonevytsky

Leonid Sonevytsky

texts by T. Shevchenko, I. Franko, and V. Symonenko), the cantata *Love Ukraine*, and liturgical music. He wrote musical works, such as *Artem Vedel' i ioho muzychna spadshchyna* (Artem Vedel and His Musical Legacy, 1966), *Kompozytors'ka spadshchyna Nestora Nyzhankivskoho* (Compositional Legacy of Nestor Nyzhankivsky, 1973), and *Muzykologichni pratsi Zinovii Lys'ka* (Ethnomusical Works of Zinovii Lysko, 1976), and edited the second edition of M. Hrinchenko's *Istoriia ukrains'koï muzyky* (History of Ukrainian Music, 1961).

Sonevytsky, Leonid [Sonevyc'kyj], b 25 April 1922 in Chortkiv, Galicia, d 6 August 1966 in New York. Historian; son of M. *Sonevytsky. He studied at the universities of Lviv (1940–1), Vienna (1945–6), and Munich (1946–8) and at the Ukrainian Free University (PH D, 1948). He served as secretary of the Historical Commission of the Shevchenko Scientific Society in Europe (1949–50). After emigrating to the United States Sonevytsky studied at Columbia University (1952–3, 1957–9), lectured at Seton Hall University, and worked as a librarian at Brooklyn College (from 1960). He served as secretary of the Ukrainian Academy of Arts and Sciences in the US (1954) and editor of its publication, *Annals* (from 1959), and as editorial co-ordinator (1958–60) of *Entsyklopediia ukrainoznavstva* (EU) and *Ukraine: A Concise Encyclopaedia*.

Sonevytsky researched the history of the Ukrainian church and studied Ukrainian diplomatic history of the 20th century. Of note is his *Istoriia Ukrainy: Synkhronychno-khronolohichna tablytsia* (The History of Ukraine: A Synchronic and Chronological Table), published in vol 3 of EU and separately (1960). Most of Sonevytsky's works appeared in the monograph *Leonid Sonevyc'kyi: Studii z istorii Ukrainy* (Leonid Sonevytsky: Studies of the History of Ukraine, vol 202 [1982] of *Zapysky NTSh*).

A. Zhukovsky

Sonevytsky, Mykhailo [Sonevyc'kyj, Myxajlo], b 22 April 1892 in Hadynkivtsi, Husiatyn county, Galicia, d 30 November 1975 in New York. Classical philologist; full member of the Shevchenko Scientific Society from 1954; father of I. and L. Sonevytsky. After studying at Chernivtsi (1910–11) and Vienna (1911–14; PH D, 1923) universities he taught Latin, Greek, and classical literature at Ukrainian gymnasiums. A DP after the Second World War, he em-

Mykhailo Sonevytsky

igrated to the United States in 1950, and from 1963 was a professor at the Ukrainian Catholic University in Rome. He is the author of the children's books *Pryhody Odysseia* (Odysseus' Adventures, 1918), *Myrmidons'kyi lytsar* (The Mirmidonian Knight, 2 parts, 1936), and *Homin davnomynulykh dnyv* (The Echo of Days Long Past, 1938; repr 1955); a history of classical Greek literature (2 vols, Rome 1970, 1977); a Ukrainian translation of Xenophon's *Anabasis* (1986); and popular articles on classical culture and pedagogical subjects in *Zhyttia i znannia* and *Ukrains'ka shkola* (1936–9).

Song. The solo song with piano accompaniment is one of the most popular genres for Ukrainian composers. M. Lysenko wrote a wide variety of pieces for solo voice. At the turn of the 20th century, D. Sichynsky, K. Stetsenko, Ya. Stepovy, and S. Liudkevych were notable composers of songs. During the 20th century songs have had a prominent place in the works of B. Liatoshynsky, V. Kosenko, Yu. Meitus, F. Nadenenko, H. Maiboroda, M. Dremliuha, and others.

Songbirds. Nearly half of all birds are songbirds; they represent 35–55 families and more than 4,000 species in the suborder Oscines, order Passeriformes. In Ukraine the following families can be heard: larks (Alaudidae), *swallows, *wagtails, wrens (Troglodytidae), *thrushes, *warblers, *titmice, waxwings, treecreepers (Certhiidae), hedge *sparrows, finches (Fringillidae), *starlings, orioles (Oriolidae), and *crows. Some songbirds are kept as pets for their melodious tones. Most songbirds living in the wild are valuable because they control various agricultural pests.

Songs of the Ukrainian Sich Riflemen. Songs created by the Legion of Ukrainian Sich Riflemen (USS) during the First World War (1914–18). They included marching songs, love songs, laments, and humorous songs. The chief creators of these songs were M. *Haivoronsky (conductor of the USS orchestra), R. *Kupchynsky, and L. *Lepky. Many of the songs of the USS have been arranged for choir or for solo voice, by composers such as S. Liudkevych, L. Revutsky, O. Koshyts, A. Rudnytsky, and N. Nyzhankivsky. Labeled as 'nationalistic' and banned in Soviet Ukraine, this genre of song soared in popularity in

Ukraine during the late 1980s with the liberalization following glasnost.

Sonnet. A 14-line poem (usually in iambic pentameter) consisting of two sections of two quatrains and two tercets. The rhyme scheme of the quatrains is either a regular abba, abba or (less frequently) an alternating abab, abab. The tercets are less restricted, following a cdc, cdc; cde, cde; cde, edc; or other pattern (M. Zerov's tercets followed a ccd, ede tercet scheme). It is believed that sonnets were devised by Provençal troubadours, but they first appear in written form in Italy. F. da Barberini and A. da Tempo are considered to be the first poets to have mastered them. Petrarch (1304–74) set the number of lines and rhyme scheme. There are other forms of the sonnet extant in Italy, some ranging up to 20 or 22 lines with a short coda of 1 or 2 lines ending the poem.

In Ukrainian poetry the first sonnets were O. Shpyhotsky's translations-adaptations of a poem by Sappho and the sonnets of A. Mickiewicz. Sonnets were subsequently written by L. Borovykovsky, M. Shashkevych, Yu. Fedkovych, U. Kravchenko, and S. Charnetsky. The form became particularly common in the late 19th and early 20th centuries. I. Franko played an important role in developing sonnets, in his *Sonety* (Sonnets, 1882) and the cycles *Vil'ni sonety* (Free Sonnets) and *Tiuremni sonety* (Prison Sonnets). Lesia Ukrainka and M. Cherniavsky published *Donets'ki sonety* (The Don Sonnets) in 1898. The zenith of the Ukrainian form of sonnet was attained by the *Neoclassicists M. *Zerov (his *Sonnetarium*, published in 1948, contains 85 original sonnets and 28 in translation) and M. Rylsky. Others continued this efflorescence into the 1930s, and their products were complemented by the contributions from Galicia of B.I. Antonych (with the cycle *Zryvny i kryla* [Rises and Wings] and others). In Soviet Ukraine wholesale repressions sent all of literature into decline, and sonnets did not reappear until the mid-1950s. In the 1970s and 1980s they became popular once again. D. *Pavlychko has been particularly productive, largely in translating sonnets from other languages.

In émigré literature the form has also been popular, and in some cases the sonnets have been of high quality. E. *Andiiivska, S. Hordynsky, I. Kachurovsky, Yu. Klen, B. Kravtsiv, M. Orest, O. Tarnavsky, and O. Zuiivsky are among the form's practitioners.

Departures from the canonical scheme of the sonnet are known as sonnetoids (examples of which abound in Zerov's *Catalepton*, 1951). A wreath of sonnets is a complex composition that consists of 14 sonnets, of which the last line of a sonnet is repeated as the first line of the next, followed by a 15th sonnet that consists of the 14 first lines of the preceding sonnets. V. Bobynsky, B. Hrinchenko, Kravtsiv, V. Malyskho, L. Mosendz, O. Tarnavsky, O. Vedmitsky, M. Zhuk, and I. Kalynets are among those who have published wreaths.

I. Koshelivets

Sontsetsvit (Rockrose). An almanac published in 1922 in Tarnów, Poland. It contained works by writers and artists who had fled Soviet-occupied Ukraine, such as the graphic artists P. Kovzhun and P. Kholodny, Jr, and the symbolist poets Yu. Lypa, N. Livytska-Kholodna, M. Obidny, P. Tenianko, and Ye. Ivanenko.

Myroslava Sopilka

John Sopinka

Sopilka, Myroslava (pseud of Yuliia Mysko-Pastushenko), b 29 August 1897 in Vynnyky, now a district of Lviv, d 28 November 1937 near Kiev. Poet. She was a member of the radical group Luch in Vynnyky, and in 1928 she began to publish her poems, such as 'V tserkvi' (In the Church) and 'Son chornoï nochi' (Dream of a Black Night) in the Sovietophile journal *Vikna. She was a member of the literary group *Horno, which was made up of writers dedicated to propagating communism. In 1930 Sopilka moved to the Ukrainian SSR and became a member of the literary organization *Zakhidna Ukraina. In 1931 she published the collection of poetry *Robotiashchymy rukamy* (With Working Hands). She was arrested in 1937, and shot by the NKVD. *Do sontsia: Vybrane* (Toward the Sun: Selected Works) was published posthumously in 1973.

Sopilka (fipple flute). A wind instrument of varied construction made of wood or bark. Generally cylindrical, blocked at one end, and with 6 to 8 finger holes (up to 10 since 1970), its related forms include the *telenka*, *floiara*, and *dentsivka*. The earliest-known example found in Ukraine is a mammoth-bone flute from the Paleolithic period. The flute is known from the Princely period of the Kievan state and is depicted on an 11th-century fresco in Kiev's St Sophia Cathedral. In folk tradition it was commonly the instrument of shepherds or part of trio ensembles (*troisti muzyky). Today it is featured mainly in folk instrumental ensembles. Prominent *sopilka* performers include I. *Skliar, Y. Bobrovnykov, D. Demenchuk, and V. Zuliak.

Sopilnyk, Petro [Sopil'nyk], b 14 February 1922 in Sokolove, Katerynoslav gubernia. Painter and decorative artist. In 1961 he graduated from the Institute of Painting, Sculpture, and Architecture of the USSR Academy of Arts. His work consists of decorative wall panels, such as *Hutsul Wedding* (1963), *Kiev Legend* (at the Kiev Hotel in Ivano-Frankivske, 1965), and *Dniester* (at the Dnister Café in Ivano-Frankivske, 1966); and relief sculptures, such as the steel *Eternal Revolutionary* (1967), at the Ivano-

Frankivske Cinema, and the bronze *Danko* (1968) and a copper portrait of V. Stefanyk (1971), at the Ivano-Frankivske Pedagogical Institute. He has also designed decorative plates and a carved vase commemorating Yu. Fedkovych (1956).

Sopinka, John, b 19 March 1933 in Broderick, Saskatchewan. Lawyer and Canadian Supreme Court judge of Ukrainian origin. A graduate of the University of Toronto (LLB, 1958), he became one of the most successful civil litigation lawyers in Canada. He was involved in a number of difficult and controversial trials and served as counsel for several royal commissions. He represented the Ukrainian Canadian Committee before the Royal (Deschênes) Commission of Inquiry on War Criminals in Canada (1985-7). In 1988 Sopinka was appointed a justice of the Supreme Court of Canada.

Sopolyha, Myroslav, b 26 March 1946 in Svydnyk (Svidník), in the Prešov region of Slovakia. Ethnographer and museologist; associate of the Slovak Academy of Sciences. A graduate of the Prešov Faculty of Košice University, since 1967 he has worked at the Svydnyk Museum of Ukrainian Culture (now the Dukhnovych Museum). He acquired many of the museum's folk artifacts, organized the creation of its open-air museum, and became deputy director of its scholarly section. In 1979 he received a PhD from Bratislava University. He has published numerous articles on the material culture and folk architecture of the Prešov region in the museum's *Naukovyi zbirnyk*, Slovak scholarly periodicals, and *Nashe slovo* (Warsaw). He has also written monographs on the region's Ukrainian folk architecture (1976) and peasant dwellings (1983).

Sorghum (*Sorghum vulgare*; Ukrainian: *sorho*). A strong and hardy cereal grass of the family Gramineae (Poaceae), raised chiefly for grain. The species includes the grain sorghums – durra, milo, and millet – as well as broom corn and Sudan grass (*S. sudanense*; Ukrainian: *sudanska trava*), grown for hay and fodder. Introduced in Ukraine in 1912, sorghum is raised primarily in southern areas. The grain is rich in carbohydrates (12–18 percent sugars) and proteins (10 percent); it also contains calcium, iron, vitamin B, and nicotinic acid. It is usually ground into a meal used in porridge, flatbreads, and cakes; it is also used in making edible oil, starch, dextrose, and alcoholic beverages. Sweet sorghums, or sorgos, are used for syrup manufacture.

Sorochynsky, Lev [Soročyns'kyj], b 1895 in Haisyn, Podilia gubernia, d 31 January 1963 in Olyphant, Pennsylvania. Conductor, singer, and teacher. He studied under O. Koshyts and then in 1919 became a member of the Ukrainian Republican Kapelle. In 1921–6 he served as an assistant to Koshyts in the Ukrainian Republican Kapelle when it toured Europe and North and South America. From 1926 he conducted Ukrainian choruses in the United States, most notably in Rochester (New York), Chicago, and Olyphant.

Sorochynsky, Petro [Soročyns'kyj], b and d ? Zaporozhian Cossack leader. A representative of the older, more conservative Cossack forces, he was elected Kish otaman in 1701–2, 1796–7, and 1709. He favored an alliance with the Crimean Khanate against Muscovy rather than with

Poland or Sweden (as promoted by K. Hordiienko). The Muscovite authorities hoped that Sorochynsky's views would reverse the anti-Muscovy policies of the Zaporozhians, but he fought against them in 1709, with the assistance of the Crimea. Hordiienko was re-elected otaman and led the Zaporozhians from the Sich into exile (eventually to establish the Oleshky Sich). Sorochynsky's further fate is unknown.

Sorochyntsi. See Velyki Sorochyntsi.

Bohdan Soroka: *Carolers* (woodcut, 1991)

Soroka, Bohdan, b 2 September 1940 in Lviv. Graphic artist and painter; son of M. *Soroka and K. *Zarytska. A graduate of the Lviv Institute of Applied and Decorative Arts (1964), since the 1960s he has created imaginative, often expressionistic, line engravings and bookplates. His print series 'Folkloric Motifs' (1969), 'Slavic Mythology' (1970–2), 'Children's Games' (1974), 'Kupalo Festival Games' (1974), 'Proverbs' (1976), and 'March of the Gnomes' (1979–84) reveal his fascination with Ukrainian folklore. Soroka has also engraved prints depicting the old architecture (particularly churches) of Lviv, Drohobych, and Zhovkva (now Nesterov), and the series 'Symbols of Hryhorii Skovoroda' (1975), 'Travels in Uzbekistan' (1981–2), and 'Stations of the Cross' (1990); created graphic illustrations to works by I. Kalynets, Lesia Ukrainka, R. Ivanychuk, V. Stefanyk, and T. Shevchenko; and painted large-scale decorative murals in Lviv, including one inside the Quality Building and the large composition *Musicians*, on the ceiling of the former Carmelite Sisters' church. Solo exhibitions of his works have been held in Lviv (1983, 1989), Kiev (1987, 1990), and Toronto, Ottawa, and Edmonton (1991).

Mykhailo Soroka

Soroka, Mykhailo [Myxajlo], b 27 March 1911 in Koshliaky, Zbarazh county, Galicia, d 16 June 1971 in the Mordovian ASSR. Political prisoner; husband of K. *Zarytska and father of B. *Soroka. In 1938 he was imprisoned by the Polish authorities for his involvement in the OUN. In 1940 he was arrested in Lviv by the NKVD and sentenced to eight years in labor camps in Arctic Russia. After his release he returned to Lviv, but he was rearrested in 1949 and exiled to the Krasnoïarsk territory, in northern Siberia. In 1952 he was again arrested, for allegedly forming an underground organization of Ukrainian political prisoners in a Vorkuta camp, and in September 1953 he was sentenced to 25 years in labor camps in Kazakhstan, Siberia, and Mordovia.

Soroka, Oleksander, b 21 April 1900 in Khlypnivka, Zvenyhorod county, Kiev gubernia, d 28 December 1963 in Kiev. Choir conductor. He graduated in conducting from the Kiev Institute of Music and Drama (1930). In 1923 he joined the *DUMKA choral ensemble, and in 1935 he became its conductor and from 1937 its principal conductor. In 1940–6 he was artistic director of the Trembita choir in Lviv, after which he returned to DUMKA as principal conductor. He is best known as an interpreter of large-scale choral works, such as M. Lysenko's *Biut' porohy* (The Rapids Roar), S. Liudkevych's *Kavkaz* (The Caucasus), and A. Shtoharenko's *Ukraino moia* (My Ukraine).

Soroka, Oleksander, b 19 December 1901 in Baryshivka, Pereiaslav county, Poltava gubernia, d 12 October 1941. Poet, prose writer, and translator. He was first published in 1925 in the almanac *Kyiv – Hart*, and he continued to publish his poetry and prose in periodicals. His poetry was also published in the collections *Kymak* (1929), *Na reikakh* (On the Rails, 1931), *Zhyttia v rusi* (Life in Action, 1936), *Horno* (The Forge, 1941), and *Vybrane* (Selected Works, 1959, 1966). He was arrested by the NKVD in 1941 and killed on the way to prison in Irkutsk, Siberia.

Soroka, Petro, b 3 April 1891 in Lviv, d 1948 in Lviv. Stage actor and director. He began his theatrical career in an amateur group at the Sokil society (1908) and then acted in the Ruska Besida (1912–14) and the Ternopilski Teatralni Vechory and New Lviv theaters (1917–20), led his own troupe (1921–38), and worked in the Lesia Ukrainka Theater, Lviv Opera Theater, and Lviv Ukrainian Drama Theater (1939–46).

Osyp Sorokhtei (self-portrait, oil, 1937)

Sorokhtei, Osyp [Soroxtej], b 28 February 1890 in Baranchychi, Sambir county, Galicia, d 27 November 1941 in Stanyslaviv, Galicia. Painter and graphic artist. He studied at the Cracow Academy of Arts (1911–14, 1919–20) and taught drawing at the Ukrainian gymnasiums in Stanyslaviv (1920–6, 1929–39) and Sniatyn (1926–9). Sorokhtei worked mostly in pencil, pen, and watercolor. He drew expressionistic portraits of T. Shevchenko (1922), I. Kotliarevsky (1922), Ye. Hrebinka, and M. Menzinsky and 50 drawings on biblical themes and 42 on Christ's Passion; painted Subcarpathian landscapes and genre scenes, religious paintings, and still lifes; did caricatures of Ukrainian Sich Riflemen, public figures, church leaders, and intellectuals; and illustrated A. Lototsky's *Zhyttia i pryhody Tsiapky Skoropada* (The Life and Adventures of Tsiapka Skoropad, 1926). He took part in exhibitions organized by the Circle of Contributors to Ukrainian Art and the Association of Independent Ukrainian Artists in Lviv and in two international shows of graphic art in Warsaw (1931). Retrospective exhibitions of his works were held in Stanyslaviv (1942) and Lviv (1970).

The Soroky fortress

Soroky. v-9. A city (1975 pop 29,500) on the right bank of the Dniester River in Moldova. It was first mentioned in 1499. Today the city lies on the Ukrainian ethnic border. It manufactures electric appliances, metal goods, and clothing. The old fortress and a cave monastery are tourist attractions.

Sorrel (*Rumex acetosa*; Ukrainian: *shchavel*). A hardy perennial herb of the buckwheat family Polygonaceae. There are many species common in the temperate zone of the Northern Hemisphere; in Ukraine about 20 are known, of which *R. acetosa* (Ukrainian: *shchavel kyslyi*) is widely cultivated. Its leaves contain oxalic acid, vitamin B complex, iron, and minerals. Young leaves are used to make sorrel soup (Ukrainian green borshch), in salads, and as flavoring in omelets and sauces. Extracts from *R. confertus* (Ukrainian: *shchavel kinskyi*) roots were used in folk medicine as an astringent and as purgative agents in treating colitis.

Sosenko, Ksenofont, b 9 February 1861 in Mezhyhirka, Halych circle, Galicia, d 17 April 1941 in Koniukhy, Kozova raion, Ternopil oblast. Ethnographer. While serving as a parish priest in a number of Galician villages, he gathered ethnographic materials and wrote several insightful studies, on the spring songs, *hahilky* (1922); the Ukrainian religious worldview (1923); and the traditional Ukrainian Christmas (1928). A memorial regional museum was established in Koniukhy in 1991 in the building where Sosenko lived.

Modest Sosenko (self-portrait, oil, 1915)

Sosenko, Modest, b 23 April 1875 in Porohy, Stanyslaviv county, Galicia, d 4 February 1920 in Lviv. Painter. He studied at the Cracow (1896–1900) and Munich (1901–2) academies of art and the Ecole nationale des beaux arts in Paris (1902–5). From 1906 he lived in Lviv but traveled often, to Italy (1908–13), Russian-ruled Ukraine (1913), and Egypt and Palestine (1914). He painted portraits, such as *Portrait of a Girl* (1913), *Metropolitan Andrei Sheptytsky*, and *Self-Portrait* (1915); Hutsul genre scenes, such as *Boys on a Fence* (1912), *Trembita Players* (1914), *Dance* (1915), and *Musicians*; landscapes of Paris, the Carpathian Mountains, and southern Dalmatia; and large-scale murals, in the Lysenko Music Institute in Lviv (1915), the Wallachian (Dormition) Church in Lviv, and the Galician village churches of Pidbereztsi, Pechenizhyn, Rykiv, Bilche Zolote, Zolochiv, Tovmach, Slavsko, Puzhnyky, Deviatnyky, and Yabluniv. Together with Yu. Makarevych he painted the iconostases in the church in Zolochiv and the cathedral in Stanyslaviv. In his church paintings he combined the traditions of Byzantine painting with modern artistic approaches. He compiled a book of ornaments in 16th- and 17th-century Galician manuscripts from the Stauropogion Museum (1923). A catalog of his memorial exhibition was published in 1960.

Sosenko, Petro, b 25 September 1900 in Duliby, Galicia, d ? Legal historian; son of K. Sosenko. In the 1920s he emigrated to Soviet Ukraine, where he was a research associate of the Commission for the Study of the History of Western-Ruthenian and Ukrainian Law of the VUAN. He wrote articles on contemporary Soviet law (1924) and the importance of church registers for the history of law (1929). He was arrested during the terror in 1933, and disappeared in prison.

Ivan Soshenko: *Hay Selling by the Dnieper* (oil, before 1850)

Soshenko, Ivan [Sošenko], b 2 June 1807 in Bohuslav, Kaniv county, Kiev gubernia, d 18 July 1876 in Korsun, Kaniv county. Painter. After studying at the St Petersburg Academy of Arts (1834–8) he taught painting in gymnasiums in Nizhen (1839–46), Nemyriv (1846–56), and Kiev. He painted portraits, such as *Portrait of M. Chaly's Grandmother* and *Woman's Portrait*; genre scenes, such as *Hay Selling by the Dnieper* and *Boys Fishing* (1857); landscapes; and icons. In 1835 he introduced T. *Shevchenko to Ye. Hrebinka, V. Zhukovsky, K. Briullov, and A. Venetsianov, and in 1838 he helped to purchase Shevchenko's freedom and to place him in the St Petersburg Academy. M. Chaly's biography of Soshenko was published in Kiev in 1876.

Sosiura, Volodymyr [Sosjura], b 6 January 1898 in Debal'tseve, Katerynoslav gubernia, d 8 January 1965 in Kiev. Poet. During the Ukrainian-Soviet War he fought in the UNR Army and then in the Red Army. After the war ended, he studied at the Artem Communist University in Kharkiv (1922–3) and at the workers' faculty of the Kharkiv Institute of People's Education (1923–5). He was a member of the literary organizations *Pluh, Hart, Vaplite, and the All-Ukrainian Association of Proletarian Writers. His first poem to be published appeared in 1917. His first collection, *Poezii* (Poems), published in 1921, was followed by his Romantic revolutionary poem *Chervona zyma* (The Red Winter, 1922), which was acclaimed as the best example of epic poetry from the period of the struggle for independence in Ukraine, and brought him fame overnight. Sosiura was to write many other works thematically based on that struggle, in which he united intimate, community, and universal concerns, such as in the collec-

Volodymyr Sosiura

tions *Misto* (The City, 1924), *Snihy* (The Snows, 1925), and *Zoloti shuliky* (The Golden Hawks, 1927).

His poems, filled with an organic lyricism, leave an impression of sincerity, revolutionary enthusiasm, and passionate feeling. Sosiura drew his unique lyrical style from the wellspring of folk literature. His style leaned toward classically simple verse, a songlike quality, and a Romantic, uplifted mood. Even in his early period Sosiura's poetry reflected his era and its contradictions, such as the impossibility of uniting loyalty to the Bolshevik revolution with feelings of duty toward one's country, a dilemma faced by all the Ukrainian intelligentsia of the 1920s. It can be seen in the poem about internal strife (between communard and nationalist) *Dva Volod'ky* (The Two Volodias, 1930) and in the collection *Sertse* (The Heart, 1931), which was banned immediately after its release.

Although Sosiura had been a Party member since 1920, until the early 1930s his poetry brought him into conflict with the Communist party. That, together with the deaths of millions of Ukrainian peasants as a result of the man-made famine and the persecution and shootings of Ukrainian cultural activists during the 1930s, brought Sosiura near to a mental breakdown. Despite those difficult circumstances he was virtually the only poet in Ukraine in the 1930s who continued to work on lyric love poetry, such as in the collections *Chervoni troiandy* (Red Roses, 1932), *Novi poezii* (New Poems, 1937), *Liubliu* (I Love, 1939), and *Zhuravli pryletily* (The Cranes Have Returned, 1940). From 1942 to 1944 Sosiura was a war correspondent. During that period he produced the collections *Pid hul kryvavyi* (During the Bloody Rumbings of War, 1942) and *V hodynu hnivu* (In the Hour of Anger, 1942) and the poem 'Oleh Koshovyi' (1943), among others. The most noteworthy of his postwar collections are *Zelenyi svit* (Green World, 1949), *Solov'ini dali* (The Nightingale Distances, 1956), and *Tak nikhto ne kokhav* (No One Has Loved like This, 1960).

An important part of Sosiura's works are his poems written on a grander epic scale, such as the poems '1871' (1923) and 'Zaliznytsia' (The Railway, 1924) and the versified novel *Taras Triasylo* (1926). In 1948 Sosiura was awarded the highest prize at that time, the Stalin Prize, but beginning in 1951 he was again harshly attacked. He was accused of bourgeois nationalism for his patriotic poem 'Liubit' Ukrainu' (Love Ukraine), written in 1944. Although he was productive, Sosiura's poetic achieve-

ments were much less than his talents promised. His collected works have been published in 3-volume editions (1929–30 and 1957–8) and in 10 volumes (1970–2). In 1988 the poem 'Mazepa,' only excerpts of which had previously been published (1929), and the autobiographical novel *Tretia rota* (The Third Company) were published.

I. Koshelivets

Soskin, Marat, b 8 April 1929 in Kiev. Physicist; AN URSS (now ANU) corresponding member since 1988. A graduate of Kiev University (1952), he joined the ANU Institute of Physics in 1956. Soskin has made substantive contributions in the fields of exciton spectroscopy of molecular crystals, quantum electronics, laser spectroscopy, and dynamic holography.

Sosnivka. III-5. A city (1975 pop 11,200) on the left bank of the Buh River in Lviv oblast, administered by the Chernovhrad city council. It was founded in 1955 in connection with the development of the Lviv-Volhynia Coal Basin. In 1968 it attained city status. Sosnivka has three coal mines and an enrichment plant.

Mykhailo Sosnovsky

Sosnovsky, Mykhailo [Sosnovs'kyj, Myxajlo], b 1 December 1919 in Hai, Ternopil county, Galicia, d 25 July 1975 in Jersey City, New Jersey. Journalist, scholar, and community leader. As a refugee in postwar Germany he served on the executive of the Central Union of Ukrainian Students, edited its organs *Visti TseSUSu* and *Students'kyi visnyk*, contributed articles to the Fürth newspaper *Chas* and journal *Samostinyk*, and studied law at Erlangen University. In late 1948 he emigrated to Canada. In Toronto he cofounded the *Canadian League for Ukraine's Liberation, served as a member of its executive (1949–68), cofounded its newspaper **Homin Ukraïny*, was the newspaper's first chief editor in 1948–9, and was its editor again in 1951–4. After breaking with the OUN Bandera faction, he served as executive director of the World Congress of Free Ukrainians in Winnipeg and New York (1969–72). From 1972 he coedited the daily **Svoboda* in Jersey City.

Sosnovsky wrote widely on Soviet politics, émigré issues, and international affairs. He also published books in

Ukrainian on Ukraine in the international arena in 1945–65 (1966; his PH D diss at the Ukrainian Free University) and Dmytro Dontsov (1974), and wrote a brief survey history of Ukrainian political thought (1976). A large posthumous collection of his selected essays and articles appeared in 1979.

The Oleksander Dovzhenko Literary Memorial Museum in Sosnytsia. Bronze statue of Dovzhenko by Anatolii Fuzhenko

Sosnytsia [Sosnycja]. II-13. A town smt (1986 pop 8,000) on the Ubid River and a raion center in Chernihiv oblast. It was first mentioned in the Hypatian Chronicle under the year 1234. From 1340 it was under Lithuanian rule, and from 1618, under Polish rule. In 1637 one of its residents, K. *Skydan, raised a rebellion against the Polish nobles. In 1648 the town was captured by the Cossacks, and thereafter became a company center of Nizhen and then Chernihiv regiment. After the abolition of the Hetman state Sosnytsia belonged to Novhorod-Siverskyi vicegerency (1782–96) and then became a county center of Little Russia and Chernihiv (1802–1923) gubernias. Under the Soviet regime it was a raion center of Snov (1923–5) and Konotip okruhas and Chernihiv oblast (since 1935). Today its main industries are food processing and clothes manufacturing. The birthplace of O. *Dovzhenko, it has a literary memorial museum dedicated to him. It also has a rich regional museum founded by Yu. Vynohradsky. The wooden Church of the Holy Protectress (17th century, reconstructed in 1724) and its bell tower (19th century) remain neglected and in disrepair.

Soton, Spyrydon, b ? in Tver (now Kalinin), d 1503 in the Ferapont monastery, in Moscow. Orthodox metropolitan. He was bishop of Tver until 1474, when the patriarch of Constantinople appointed him metropolitan of Kiev and all Rus', with his jurisdiction in the Grand Duchy of Lithuania and the Kingdom of Poland. Since this was done without consultation with the local bishops or King Casimir IV Jagiellończyk (who had appointed his own candidate), Soton was not recognized as metropolitan, and was imprisoned when he arrived in Lithuania in 1476. After his release he fled to Moscow. There he was opposed by the metropolitan of Moscow, who also claimed jurisdiction over most of the Rus' eparchies, and he was imprisoned in the Ferapont-Belozerskii monastery. He re-

mained in the monastery, where he wrote theological works and a hagiography of two monks of the monastery, until his death.

Sotsialisticheskii Donbass (Socialist Donbas). A Russian-language organ of Donetsk oblast's CPU Committee and Soviet, published five times a week in Donetsk. It first appeared in July 1917 as *Izvestiia* of the Yuzivka Revolutionary and Party committees. From 1920 the newspaper appeared as *Diktatura truda*, and in 1932 it acquired its *Sotsialisticheskii Donbass* name and became the oblast paper. From July 1944, a parallel Ukrainian-language paper, *Sotsialistychnyi Donbas*, renamed in December 1945 **Radians'ka Donechchyna*, appeared. In 1975 *Sotsialisticheskii Donbass* had the largest pressrun (373,000) of any oblast-level newspaper in Ukraine.

Sotsialistychna hromada. See *Nova hromada*.

Sotsialistychna Kharkivshchyna (Socialist Kharkiv Region). An organ of Kharkiv oblast's CPU Committee and Soviet, published five times a week in Kharkiv. It began publication in Russian in 1917 and changed names several times before becoming *Proletarii* (1920–4) and then *Khar'kovskii proletarii* (1924–30). From March 1930 it appeared in Ukrainian as *Kharkivs'kyi proletar*, and in 1934 it acquired its last name. A parallel Russian-language edition, *Krasnoe znamia*, was established in 1938. In 1980 the latter had a pressrun of 131,000; that of *Sotsialistychna Kharkivshchyna* was only 62,000.

Sotsialistychna kul'tura (Socialist Culture). A popular monthly journal of cultural, political, educational, and scientific affairs, published in Kiev in 1937–41 and since 1955. It was preceded by several journals with similar profiles, such as *Kul'turno-osvitnia robota* (1947–54) and *Kolbud* (1936–7) in Kiev, and, in Kharkiv, *Kul'tfront* (1931–5), *Za masovu komunistychnu osvitu* (1931–3), *Kul'trobitnyk* (1928–30), *Selians'kyi budynok* (1924–30), and the Russian-language *Kul'trabotnik* (1927), *Rabochii klub* (1925–6), and *Put' k kommunizmu* (1921–4). Until 1970 the journal was intended for village cultural workers and librarians. From 1970 to 1990 it was an organ of the Ministry of Culture and Council of Trade Unions of the Ukrainian SSR, and dealt also with urban and working-class issues. In 1975 *Sotsialistychna kul'tura* had a pressrun of 65,000. In 1991 the journal's name was changed to *Ukrains'ka kul'tura* to reflect its new orientation. It is now published by the Ministry of Culture, the Ukrainian Cultural Fund, and the Council of the Federation of Independent Trade Unions of Ukraine, and has a pressrun of 31,000. The chief editor is V. Burban.

Sotsialistychne tvarynyystvo. See *Tvarynyystvo Ukrainy*.

Sotsial-Demokrat (Social Democrat). An organ of the Ukrainian Social Democratic Workers' party, published in Poltava in 1907 and edited by P. Diatliv. After the fifth issue the newspaper was closed down by the tsarist authorities.

Sotskyi. A term denoting a certain type of low-ranking official. It has feudal origins, and its meaning varies. In Kievan Rus' a *sotskyi* was a levy captain, although the word was used to refer to certain representatives of

princes in accounts of the looting of *sotskyi* homes in 1113. During the Lithuanian-Polish period in Galicia and Podlachia, suburban craftsmen and farmers were said to be part of *sotni* or under the jurisdiction of a *sotskyi*. The term disappeared in Lithuania in the 14th century. In the 17th and 18th centuries, in Left- and Right-Bank Ukraine and in Western Ukrainian territories, a *sotskyi* was a young messenger or minor official, particularly in municipal governments. Such officials were sometimes known as *sotnychky* or *osavul'chyky*. In the Russian Empire a *sotskyi* was a police officer of low rank in a village, chosen at a village council. Each one oversaw 100 to 200 households. In 1837 such officers were made a part of local police forces.

South Russia Consumer Society (Russian: *Potrebitel'skoe obshchestvo Yuga Rossii*). An association of consumer co-operatives, established in Kharkiv in 1912 on the initiative of the Moscow Union of Consumer Co-operatives. It attempted to impose central Russian control over the Ukrainian co-operative movement, but such control was resisted by the Ukrainian leaders. Its activities were limited to Kharkiv and Katerynoslav gubernias. With the emergence of the *Dniprosioiuz union in 1917, the South Russian Consumer Society lost its importance, and it was dissolved by 1919. It was headed by V. Tselarius and M. Kuznetsov.

South Russian Union of Workers (*Pivdenorosii'skyi soiuz robitnykiv*). The first revolutionary organization among workingmen in the Russian Empire. It was established in Odessa in October 1875 on the basis of existing workers' clubs or groups and was dedicated specifically to improving labor conditions and generally to changing the political situation in the empire. It had approx 60 members and was headed by E. Zaslavsky. It organized two strikes in Odessa, and it was in the process of attempting to establish comparable groups in other cities (Kharkiv, Tahanrih, Kerch, Sevastopol, and others) when it was shut down by the police late in 1875. Fifteen of its leading members were arrested.

South Russian Workers' Union (*Pivdenorosii'skyi robitnychi soiuz*). A revolutionary workers' organization in Kiev in 1880–1. Its membership consisted of several hundred workers, including Russians, Poles, Jews, and a majority of Ukrainians. The union was organized in the spring of 1880 by Ye. Kovalska and N. Shchedrin, two members of the Black Repartition (*Chernyi Peredel*) organization that had formed in the split of *Zemlia i Volia. The union demanded sweeping economic changes, including collective ownership of land and factories, the recognition of all basic liberties, and the satisfaction of more immediate labor demands (including shorter working days and safer conditions). Tactically, the union advocated the use of terror in order to achieve its aims. Sabotage and the murder of factory managers and owners were common threats made by the union leadership. Those tactics met with some success in the Kiev Arsenal, where Shchedrin concentrated his efforts.

With the arrest of Shchedrin and Kovalska in October 1880, the union came under new leadership. The change signaled a substantial moderation in tactics, with individual acts of terror being rejected in favor of long-term propaganda and strike activity. The union was liquidated in April 1881 upon the arrest of its remaining leaders and

the seizure of its printing press. Its leaders were sentenced by military tribunal to various terms of hard labor or exile to Siberia.

South Volhynian dialects. The northeastern group of the *southwestern dialects, spoken in the territory of what are today the southern parts of Volhynia, Rivne, and Zhytomyr oblasts and the northern parts of Lviv, Khmelnytskyi, and Vinnytsia oblasts. The dialects are bounded by the *Polisian dialects to the north, the *southeastern dialects to the east, and the *Podilian and *Dniester dialects, to which they are most similar, to the south. The phonetic features of the South Volhynian dialects are (1) raised pronunciation of unstressed *o* as *u*, particularly after labials and velars (eg, *xulódna* [Standard Ukrainian (SU) *xolódna*] 'cool'); (2) lowered pronunciation of *y* as *é* and, after *k*, *g*, *h*, and *x*, as *i* (eg, *réba*, *rúk'i* [SU *rýba*, *rúky*] 'fish, hands'); (3) prothetic *h-* before initial vowels (eg, *horáty*, *húlyc'a*, *hínšyj* [SU *oráty*, *vúlycja*, *ínšyj*] 'to plow, street, other'); (4) hardened *r'* (eg, *búra* [SU *búrja*] 'storm'); (5) *s'c'* instead of *st'* (eg, *vús'c'ilka* [SU *výstilka*] 'padding'); (6) *xv/kv* instead of *f* (eg, *xvósa* [SU *fósa*] 'ditch'); (7) *mn'* instead of *mj* (eg, *xomn'ák* [SU *xomják*] 'hamster'); (8) coronal (eastern Ukrainian) pronunciation of palatal dentals *s'*, *z'*, *c'*, *dz'* (also in the suffixes *-ec'*, *-ys'ko*, *-s'kij*); (9) bilabial or labiodental pronunciation of postvocalic *v* in the northeast (eg, *dav* [SU *daŭ*] 'he gave'); (10) doubled soft consonants in forms such as *z'il'l'e*, *s'm'ijéc'c'a* [SU *zillja*, *smijetsja*] 'herbs, he is laughing'.

In nominal declension, dual forms have been retained (eg, *doi pól'i* [SU *doja pólja*] 'two fields'). In adjectives, soft-type endings (eg, *hárn'ij*, *hírk'ij* [SU *hárnij*, *hírkýj*] 'nice, bitter') and long forms (eg, *muludája* [SU *molodá*] 'young') have been retained. Third-person pronouns after prepositions omit *n-* (eg, *do jóho*, *z jéju*, *do jíx*, *z jímy* [SU *do n'óho*, *z néju*, *do nýx*, *z nýmy*] 'to him, with her, to them, with them'). Endings of the pronominal soft declension have influenced the hard (eg, *téji*, *méji* [SU *tijéji*, *mojéji*] 'of that, of my'). Sometimes such endings are also used in adjectives. Verbs have endings and forms of the type *xód'at'*, *dasýš* [SU *xódjat'*, *dasý*] 'they walk, you (sing) will give' and, in the east, *pytát'*, *búdu robýt'* [SU *pytáty*, *búdu robýty*] 'to ask, I will make'.

Certain features of the Sian and Dniester dialects are evident in the group of so-called Buh dialects west of the upper Styr River. There the stressed *a* after palatal sibilants and *r* has changed to *e* (eg, *loš'ét'a* [SU *lošáta*] 'foals') and, in the southern Kholm region, also to *i* (eg, *t'íško* [SU *tjážko*] 'heavily'); *ky*, *gy*, *xy* have changed to *k'e*, *g'e*, *x'e* when stressed and to *k'i*, *g'i*, *x'i* when unstressed (eg, *k'énuŭ*, *rúk'i* [SU *kýnuv*, *rúky*] 'he threw, hands'); stressed *e* is lowered to *a* (eg, *dan'* [SU *den'*] 'day', and unstressed *e*, *o* is raised to *i*, *u* (eg, *pirihórujut*, *rubývoim* [SU *perehorjújut'*, *robýv*] 'they will endure, I made').

The dialects have been studied by linguists such as V. Kaminsky, S. Haievsky, P. Hladky, L. Rak, K. Dejna, H. Shylo, P. Lysenko, M. Peretiatko, L. Bova (Kovalchuk), T. Baimut, M. Kravchuk, L. Baranovska, Ya. Pura, F. Babii, H. Kozachuk, O. Horbach, and M. Korzoniuk.

O. Horbach

Southeastern dialects. A dialectal group consisting of the Middle Dnieper, Slobidska Ukrainian, and Steppe dialects. They have the same type of phonetics as the

Podilian and South Volhynian dialects of the southwestern group, and a type of simplified morphology, syntax, and, to a certain extent, vocabulary similar to that of the Polisian dialects. V. Hantsov and, later, O. Kurylo expressed the view that the southeastern dialects developed as a result of the intermingling of speakers of the southwestern and Polisian dialects who colonized southeastern Ukraine. L. Bulakhovsky and F. Zhylo maintained that they are one of the three primeval, fundamental Ukrainian dialects spoken by the ancient Polianians of the Ros River basin and the Pereiaslav region; they did not, however, point out any distinctive ancient traits, and their hypothesis is unconvincing. Modern Standard Ukrainian is based on the northern belt of the southeastern dialects.

Southern Branch of the All-Union Academy of Agricultural Sciences (Pivdenne viddilennia Vsesoiuznoi akademii silskohospodarskykh nauk). Until the demise of the USSR in 1991, a regional center for agricultural research in the Ukrainian SSR and the Moldavian SSR. In 1991 it became the Ukrainian Academy of Agrarian Sciences. It was set up in Kiev under the jurisdiction of the presidium of the All-Union Academy of Agricultural Sciences and the Council of Ministers of the Ukrainian SSR in 1969. The branch had various sections, such as agronomy, animal husbandry and veterinary medicine, the mechanization and electrification of farming, hydrotechnology and melioration, and farm economics and organization. It had a publishing department and the Central Republican Agricultural Research Library. It oversaw the work of 19 scientific research institutes and their experimental stations and seed farms. The branch planned and co-ordinated agricultural research at scientific and higher educational institutions in Ukraine and Moldavia.

Southern Buh River. See Boh River.

Southern Economic Region of the USSR. See Regional economics.

Southern Mineral Enrichment Complex (Pivdennyi hirnycho-zbahachuvalnyi kombinat). A large mineral enrichment plant located in Kryvyi Rih, Dnipropetrovsk oblast. The first plant opened in 1955, and a second plant in 1961. The complex, which consists of an open-pit mine, two crushing mills, two wet magnetic separation plants, and two agglomeration plants, processes ore from the *Kryvyi Rih Iron-ore Basin. In 1969 it processed 33.2 million t of ore to produce 15.7 million t of concentrate (with an iron content of 64.6 percent) and 8.1 million of agglomerates (with an iron content of 56.4 percent). In the 1970s it employed over 4,000 workers.

Southern Railroad. See Railroad transportation.

Southern Rebels (Pivdenni buntari). An association of populist revolutionaries active in Ukraine in the mid-1870s. Formed in 1875 in Odessa by V. *Debohorii-Mokrievych and Ya. *Stefanovych, the group was among the first to express disenchantment with the tactics adopted by the 'going to the people' movement and the populist organization *Zemlia i Volia*. The role of the intelligentsia in the countryside, the rebels believed, was to provoke the peasantry to revolution by any means possible. To that

end the group's 20 or more members, based originally in Kiev and later in Yelysavethrad, disguised themselves as peasants and tradespeople while spreading revolutionary propaganda. Stefanovych attempted his most audacious scheme in November 1876 in Chyhyryn county. Disguising himself as an 'imperial commissioner,' he claimed to be bearing documents from the tsar which urged the peasants to rise up in revolution against the nobles and imperial officials. He managed to organize a clandestine force of approx 1,000 people before the plot was discovered and the people responsible arrested in September 1877. By 1878 the remaining members of the Southern Rebels either had been arrested or had joined other revolutionary organizations.

Southern Society (Russian: Yuzhnoe obshchestvo). A conspiratorial organization of Russian military officers stationed in Ukraine that was part of what became known as the *Decembrist movement. The society was founded by Col P. *Pestel in March 1821 in place of the Tulchyn council of the *Union of Welfare. It was headed by a Fundamental Council and a Directory and, from the fall of 1825, Lt Col S. *Muravev-Apostol. Its leaders (called bo-yars) met secretly each year during the January contract fair in Kiev to debate the program and tactics for the military overthrow of tsarist absolutism, the abolition of serfdom, and the creation of a unitary Russian democratic state and constitutional monarchy. In 1823 the society was divided into three branches, Tulchyn, Kamianka, and Vasylykiv. In September 1825 the *Society of United Slavs, which had Ukrainians among its members, merged with the Vasylykiv branch. After the suppression of the uprising of the Chernihiv Regiment led by Muravev-Apostol and the Vasylykiv branch in January 1826, the members of the Southern Society were arrested. Pestel, Muravev-Apostol, and M. Bestuzhev-Riumin were hanged in St Petersburg in July, the other members were sentenced to long terms of hard labor and exile in Siberia, and the soldiers of the Chernihiv Regiment were punished and transferred to penal regiments in the Caucasus.

Southern Ukraine. The largest (250,000 sq km) historical-geographic region of Ukraine, stretching from the Black Sea and the Azov Sea in the south to the forest-steppe in the north. Also known as Steppe Ukraine, it was permanently and conclusively settled by Ukrainians only in the second half of the 18th century. From the end of the 18th century until 1917 Southern Ukraine, as part of the Russian Empire, was known as *New Russia.

Location and boundaries. The history of Southern Ukraine and the ethnic composition of its population were influenced by its location on the littoral of the Black Sea (into which flow all the major rivers of Ukraine) adjacent to the Asiatic steppes (the steppes of Southern Ukraine are their western extension). Throughout its history the region was repeatedly invaded by hordes of nomads from Asia, who severed the main territory of Ukraine and its inhabitants from the Black Sea. At the same time the Mediterranean seafaring powers tried to establish colonies and extend their influence on the northern littoral of the Black Sea, and the peoples inhabiting the main territory of Ukraine also tried to reach the Black Sea shore. Those three directions of expansion intersected on the territory of Southern Ukraine and resulted in conflicts that endured for millennia.

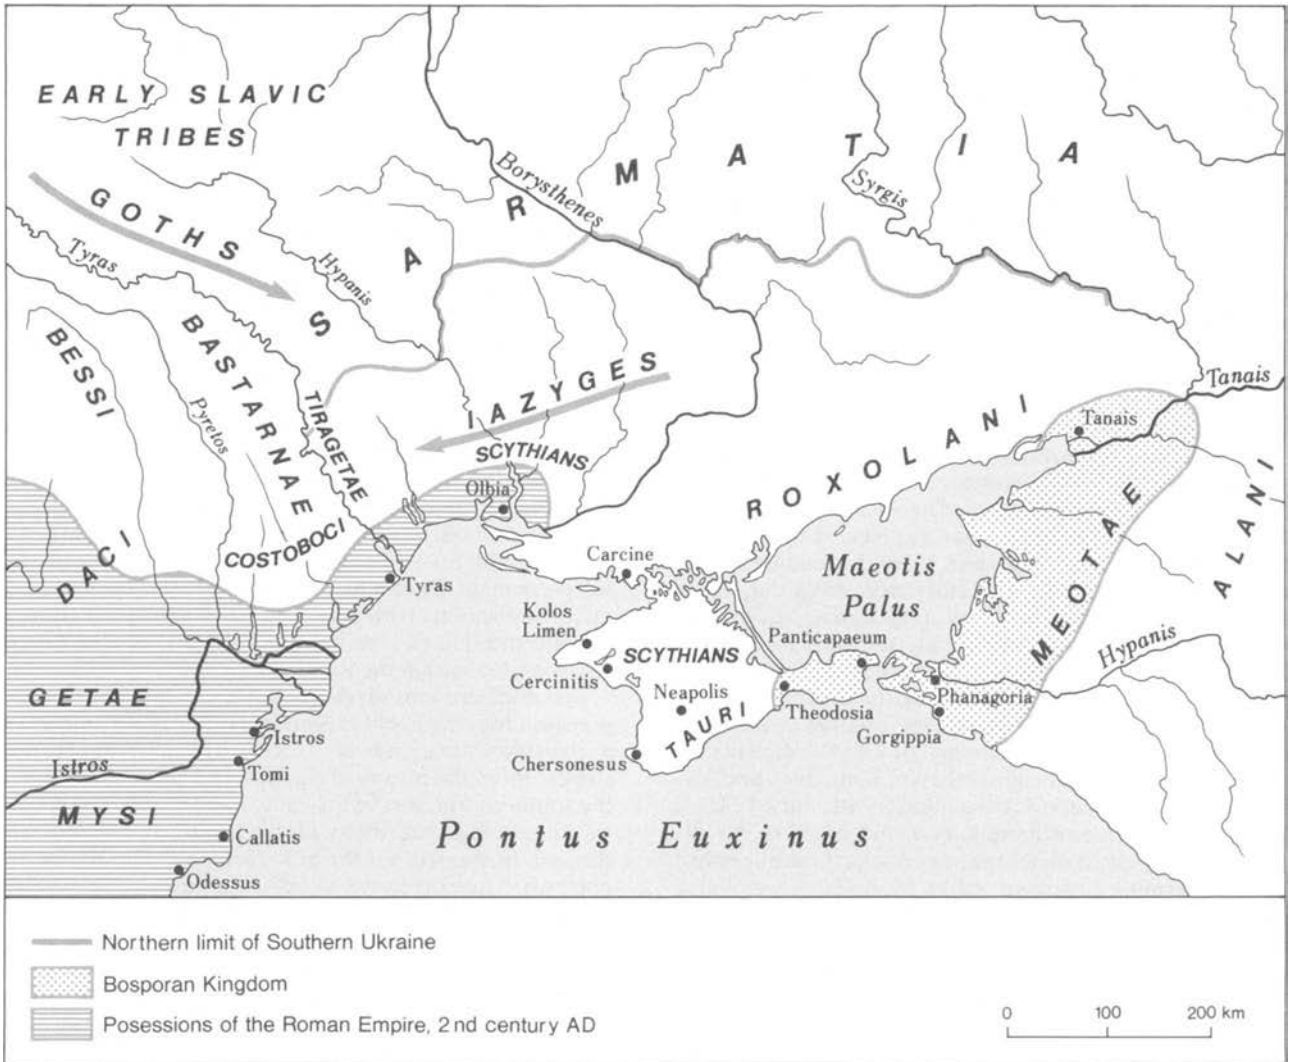

In antiquity the Greeks established *ancient states on the northern Black Sea coast, some of which were subsequently united into the *Bosporan Kingdom and later incorporated into the Roman Empire and its successor, the Byzantine Empire. The influences of the highly developed Mediterranean cultures extended from them deep into the interior. Trade with them and Byzantium contributed to the growth of the Kievan Rus' state. The latter state's link with the south became tenuous in the 10th to 12th centuries, when the *Pechenegs and then the *Cumans invaded Southern Ukraine, and was almost completely severed in the 13th century after the Mongol (*Tatar) invasion. The collapse of Byzantium and the occupation of Southern Ukraine at the end of the 15th century by Turkey through its vassal, the Crimean Khanate, converted Southern Ukraine into a depopulated steppe controlled by the nomads. The emergence of the Cossacks around the *Zaporozhian Sich in the mid-16th century resulted in a protracted struggle for control of the steppes. The matter was resolved only in the late 18th century, after Turkey's defeats in the Russo-Turkish wars created the conditions for permanent Ukrainian settlement in the steppes and their unification with the rest of Ukraine. Southern Ukraine thus joined Ukraine, which by that time had been incorporated within the Russian Empire.

The northern boundaries of Southern Ukraine are not precise. From the geographical standpoint they consist of a transition zone between the steppe and the forest-steppe. From the historical standpoint they correspond to the southern frontiers of the Kievan, Lithuanian, and Polish states, which together with the Ukrainian farming settlement fluctuated southward deep into the steppe or northward into the forest-steppe. From the end of the 18th century the northern boundary of Southern Ukraine corresponded to the northern limit of the new possessions of the Russian Empire. That limit followed the old frontiers between Poland and Turkey (from the Dniester to the Boh), Poland and Zaporizhia (to the Dnieper), and the Left Bank or Hetman Ukraine and the Zaporizhia (along the Dnieper and its left-bank tributary, the Orel). It was also the northern boundary of the three gubernias that succeeded New Russia: Kherson, Katerynoslav, and Tavriia. The other boundaries of Southern Ukraine included the southern part of Bessarabia in the west and the western part of the Don region in the east, both of which were peopled by Ukrainians.

With the rise of industry in the Donets Basin and the Dnieper Industrial Region from the 1880s, Southern Ukraine underwent economic differentiation. Over time the division became pronounced, and today Southern Ukraine consists of the agricultural steppe (Odessa, Mykolaiv, Kirovohrad, and Kherson oblasts and the Crimea), the Donets Basin (Donetske and Luhanske oblasts), and the Dnieper Industrial Region (Dnipropetrovske and Zaporizhia oblasts).

Physical geography. With the exception of southern Crimea, Southern Ukraine presents a monotonous, flat, predominantly low-lying landscape, with its particular steppe climate, vegetation, and fauna. All those characteristics vary over the great distances of Southern Ukraine, particularly on the fringe of the forest-steppe and in the east.

The largest part of Southern Ukraine is occupied by the *Black Sea Lowland and its extension: to the south, the

SOUTHERN UKRAINE, 2ND CENTURY BC TO 2ND CENTURY AD

Crimean Lowland, and to the east, the narrow Azov Lowland, which widens eastward into the broad Lower-Don Lowland. The northwestern part of Southern Ukraine is occupied by the southern extremities of the undulating *Pokutian-Bessarabian Upland between the Danube and the Dniester, and the severely dissected *Podolian Upland. A considerably larger area is occupied by the southern part of the *Dnieper Upland, the *Zaporozhian Ridge, and the *Azov Upland. The northeastern part of Southern Ukraine is occupied by the extensions of the *Dnieper Lowland and the *Central Upland, the Donets Lowland, and the highest part of Southern Ukraine, the *Donets Ridge (reaching 367 m). The southern part of the Crimea is occupied by the Crimean Mountains.

The climate of Southern Ukraine differs from that of the rest of Ukraine. Influenced to a greater extent by the easterly winds, it is moderately continental and dry. The mean annual temperature ranges from 7°C to 10°C. The coldest winters occur in the northeast (mean January temperature, -7°C); the warmest are recorded in the southwest (-2°C). Absolute minimum temperatures range from -42°C to -28°C. Summer temperatures are nearly the same

throughout Southern Ukraine (July means range from 21°C to 23°C). The frost-free period increases from 150 days in the northeast to 210 days in the southwest; the growing period, from 200 to 230 days. The mean annual precipitation is highest along the border with the forest steppe (475 mm) and lowest over the sea (250-300 mm); from year to year, however, it varies widely (from 200 to 800 mm). Maximum precipitation is obtained in May, June, and July, when downpours prevail. The snow cover is uneven and may last from 30 to 100 days per year. Strong winds often include hurricanes, desiccating winds or *sukhovii*, and dust storms. Long, warm summers are conducive to the production of heat-loving crops, but frequent droughts and *sukhovii* cause wide fluctuations in yields.

The river network of Southern Ukraine is not dense, but the region is crossed by several large rivers: the Danube, the Dniester, the Boh, the Inhul, the Dnieper and its tributaries (the Inhulets, the Orel, the Samara, and others), and the Don and its tributary, the Donets. A number of small rivers flow toward the Black Sea (such as the Kohlynyk, the Velykyi Kuialnyk, the Malyi Kuialnyk, and the Tyli-

SOUTHERN UKRAINE IN THE SECOND HALF OF THE 18TH CENTURY

hul) and the Azov Sea (the Salhyr, the Molochna, the Obytochna, the Berda, the Kalmiius, the Miius, and others), most of which empty into coastal lakes or limans. In the summer the small rivers of Southern Ukraine are shallow or dry up completely. Between the Dnieper and the Molochna and on much of the Crimean Lowland there are no rivers at all. Along the coast there are many lakes, formed out of former inlets cut off from the sea by bars.

The soils and vegetation of Southern Ukraine reveal a zonal distribution reflecting the availability of moisture.

Southern Ukraine, especially the Donets Basin and the Dnieper Industrial Region, is the richest part of Ukraine for mineral resources. Here one finds almost all the bitu-

minous coal (the Donets Basin, with total proven reserves of coal of 55.6 billion t in 1977) and iron ore (the Kryvyi Rih basin deposits, with proven reserves of 15.9 billion t in 1975) of Ukraine, all the manganese ore (the Nykopol basin deposits, with reserves of approximately 2 billion t), most of the common salt (the Artemivske rock salt deposits), and all the nonferrous metal ores (mercury at Mykytivka, northwest of Horlivka, in the Donets Basin, bauxite deposits in Dnipropetrovske oblast, chromite and nickel near Zavallia, on the Boh River). Refractory and flux materials, lignite coals, limestones, marls, gypsum, kaolin, graphite, marble, and all kinds of building materials are abundant.

ADMINISTRATIVE-TERRITORIAL SUBDIVISION OF SOUTHERN UKRAINE DURING THE 19TH AND 20TH CENTURIES

Economy and demography. In the 1860s and 1870s, great changes occurred in the economy and demography of Southern Ukraine in conjunction with the abolition of serfdom (1861), the construction of railroads (1865 to the 1880s), which provided an all-season connection between the interior and the sea, and the beginnings of heavy industry. Large-scale industrial development of Southern Ukraine began at the end of the 1870s in conjunction with the exploitation of the Donets Basin coal (the output of which increased from 1.3 million t in 1880 to 23.5 million t in 1913), Kryvyi Rih iron ore (0.1 million t in 1881, but 6.4 million t in 1913), and Nykopol manganese ore (beginning in 1886 and reaching 276,000 t in 1913) as well as the con-

struction of a dense network of railroads connecting the Donets Basin with seaports and with Kryvyi Rih (the railroad to Katerynoslav was completed in 1884). Industrial development was favored by the convenient geographical location of the coal and iron-ore deposits, not far from one another or from the sea, and stimulated by a rapid influx of foreign capital. Within a short period of time on the territory of Southern Ukraine arose two of the largest centers of heavy industry in Eastern Europe, the *Donets Basin (bituminous coal mining, metal smelting, and chemical industries) and the *Dnieper Industrial Region (including the cities of Katerynoslav, Oleksandrivske, Kryvyi Rih, and Nykopol and specializing in the mining of iron and

manganese ores, metal smelting, and machine building). Of secondary significance were the industrial cities of Mariupol and Kerch. Meanwhile the seaports, notably Odessa, Mykolaiv, Kherson, and Sevastopol, grew in industrial importance as they became sites of shipbuilding, food processing, machine building (especially for agriculture), and other branches of industry that used imported raw materials. As ports they were important centers of trade and commerce.

The ethnic composition of the population in Southern Ukraine, the most varied in all Ukrainian lands, changed over time. Until 1820 the influx of Ukrainians was by far the strongest. Later the inflow of Jews and, especially after 1880, of Russians markedly increased (see table 1).

Odessa and Katerynoslav emerged as the main cultural centers in Southern Ukraine. Lower on the scale of significance were Yelysavethrad, Kherson, and other towns.

The First World War and especially the Revolution of 1917 brought about an economic decline in Southern Ukraine. Foreign trade came to a standstill, and the port cities declined. During 1918–20 Southern Ukraine was a battleground for the armies of the Ukrainian National Republic, the Bolsheviks, the French, the Whites led by A. *Denikin and later P. *Wrangel, and the detachments of the anarchist N. *Makhno, as well as other insurgent forces. Ukraine incorporated Kherson, Katerynoslav, and Tavriia gubernias, although the Crimean Peninsula became an autonomous republic within the RSFSR. The western part of the former Don Cossack lands also went to Ukraine, but by 1924 Tahanrih and Shakhty counties had been transferred to the RSFSR. In the west, part of Bessarabia was occupied by Rumania.

During 1919–20 the heavy industry of Southern Ukraine collapsed. The sown area had declined to one-half its prewar levels by 1921–2, and the grain harvest to one-quarter by 1921, a drought year; the result was famine. Livestock declined to two-thirds of its 1916 level.

The national composition of the population changed between 1910 and the 1920s, with an increased number of Ukrainians and a decreased number of Germans, Jews, and Russians. The Ukrainian presence grew most markedly in the agricultural steppe but diminished in the Donets Basin, which continued to register an in-migration of Russians.

The development of Southern Ukraine was interrupted once more by the Second World War. Political borders again underwent change. In 1940 the southern part of Bessarabia was annexed by Ukraine, and until 1954 it formed Izmail oblast (subsequently it became part of Odessa oblast). The western portion of the Moldavian ASSR, settled by Rumanians, was ceded by the Ukrainian SSR to the newly formed Moldavian SSR. In 1946 the Crimean ASSR was transformed into an ordinary oblast which, in 1954, was transferred from the RSFSR to the Ukrainian SSR. After frequent changes in the economic regionalization of the USSR, stabilization was achieved in 1962, and Southern Ukraine was defined to include all of the South region (Crimea, Kherson, Mykolaiv, and Odessa oblasts) and most of the Donets-Dnieper region (Dnipropetrovske, Donetske, Kirovohrad, Luhanske, and Zaporizhia oblasts).

The population of Southern Ukraine as just defined reached 23.2 million on 1 January 1990. (At the end of the 18th century it was about 1 million, and in the mid-19th century 2.5 million, but by 1897 it had grown to 6.7 mil-

lion, by 1926 to 11.4 million, and by 1959 to 17.2 million.) The population growth rate of Southern Ukraine has been considerably higher than that of the rest of Ukraine, and the region's share of Ukraine's population has grown continually: from 23 percent in 1897 (still within the Russian Empire) to 30 percent in 1926, 41 percent in 1959, and 45 percent in 1990. Fully 78 percent of the people in Southern Ukraine live in cities or urban-type settlements, compared to only 22 percent in 1926.

The distribution of the population is not uniform. Population densities are highest in the two industrial regions, around Odessa, and along the southwestern coast of the Crimea, where dense clusters of cities, urban-type settlements, and suburbs abound. Rural population densities are related to natural conditions (soil fertility and moisture availability) and have not changed much since 1897, except for an increase in northern Crimea, where irrigation has been introduced. The distribution of population as of 1 January 1987 is shown in table 2. The growth of population has also been uneven. Since the 1930s the urban population has increased rapidly, and the rural population has generally declined (see table 3). As in all of Ukraine, the ethnic composition of the urban population differs from that of the rural population. Notably, Ukrainians are largely overrepresented (75.3 percent in 1970) in the rural population category.

TABLE 1
Ethnic composition of Southern Ukraine, 1897

| Ethnic group | 1,000s | % |
|------------------------|--------|-------|
| Ukrainians | 3,535 | 59.0 |
| Russians | 1,196 | 20.0 |
| Jews | 372 | 6.2 |
| Germans | 290 | 4.8 |
| Rumanians (Moldavians) | 198 | 3.3 |
| Bulgarians | 113 | 1.9 |
| Greeks | 57 | 0.9 |
| Others | 232 | 3.9 |
| Total | 5,993 | 100.0 |

TABLE 2
Population of Southern Ukraine by region, 1987

| Region | Total | | Urban | | Rural | |
|--------------------|--------|-----------|--------|------------|--------|-----------|
| | 1,000s | per sq km | 1,000s | % of total | 1,000s | per sq km |
| Donets Basin | 8,217 | 154.5 | 7,350 | 89.4 | 867 | 16.3 |
| Dnieper Industrial | 5,921 | 100.2 | 4,782 | 80.8 | 1,139 | 20.2 |

| Crimea | 2,397 | 88.8 | 1,671 | 69.7 | 726 | 26.9 |
| Total | 22,927 | 91.6 | 17,879 | 78.0 | 5,048 | 20.2 |

TABLE 3
Rural and urban population of Southern Ukraine (in thousands), 1926–87

| Year | Total | Urban | Rural |
|------|--------|--------|-------|
| 1926 | 11,440 | 2,840 | 8,600 |
| 1959 | 17,186 | 11,195 | 5,991 |
| 1987 | 22,927 | 17,879 | 5,048 |

The present distribution of population (density of settlement) is shown on the map. The ethnic composition of the population is shown in table 4.

In the 1880s the steppes of Southern Ukraine became completely plowed. Since then land use has not changed significantly. The present land uses are shown in table 5. Lands held by agricultural enterprises, which account for 85 percent of the entire land area, are mostly devoted to agricultural land uses, as shown in table 7.

The sown area of Southern Ukraine represents 45 percent of the sown area of Ukraine. The structure of the sown area in Southern Ukraine is indicated in table 6. The main grain crops of Southern Ukraine, their significance among all the grains of the region, and their share of the sown areas in Ukraine are illustrated in table 8. The number of livestock (as of 1 January 1976) and the livestock

density per 100 ha of agricultural land, with comparisons to the Ukrainian averages, are given in table 9. The annual output of animal products (the mean for 1971-5, inclusive) is given in table 10.

Southern Ukraine may be divided into several agricultural zones: (1) grain-oil seed, with the production of sugar beets and milk-meat animal husbandry, in the northern part of the steppe; (2) grain-oil seed, milk-meat animal husbandry, poultry farming, and fruit and vegetable gardening in the middle zone of the steppe; (3) grain-oil seed, fruit and vegetable gardening, melon growing, vineyard keeping, and milk-meat animal husbandry in the southern and Crimean steppe; (4) vineyard-orchard, tobacco, and vegetable growing, milk-meat animal husbandry, and sheep raising in the foothills of the Crimea and southern Crimea; and (5) milk production and fruit and vegetable growing in suburban areas in the Donets Basin, the Dnieper Industrial Region, and around large cities.

Industry. Possessing the largest supply of conveniently

located extractable mineral reserves in Eastern Europe, and having developed both heavy industry and other derivative, more complex branches of industry on the basis of those reserves, Southern Ukraine is the most industrialized part of Ukraine and one of the most highly industrialized regions in what was the Soviet Union. In 1968 it produced 185.2 million t of bituminous coal in the Donets Basin (93 percent of the Ukrainian output, 31 percent of the USSR output), 8 million t of lignite (from part of the Dnieper Lignite Coal Basin), 87.8 million t of iron ore (from Kryvyi Rih and Kerch, accounting for all of the republic's production and 55 percent of the USSR's), and 4.8 million t of manganese ore (from the Nykopol Manganese-ore Basin, contributing all of the republic's and 56 percent of the USSR's output). Ferrous metallurgy in the Donets Basin, Mariupol (formerly Zhdanov), and the Dnieper Industrial Region contributed 36.7 million t of pig iron (all of the republic's and 49 percent of the USSR's output), 42.8 million t of steel (all of the republic's and 42 percent of the USSR's output), and 30.6 million t of rolled metal (all of the republic's and 43 percent of the USSR's output). Southern Ukraine also provided all the nonferrous metallurgy of Ukraine (notably aluminum smelting in Zaporizhia), almost all its heavy-machine building (Donets Basin, Dnieper Industrial Region), and almost all the shipbuilding (in the seaports). Agricultural-machine building also was important. The region led Ukraine in the production of chemicals, especially coke-chemicals (100 percent of the country's production), sulfuric acid, caustic soda, mineral fertilizers, paints, synthetic tars, and plastics (all in the Donets Basin, the Dnieper Industrial Region, and Odessa). Southern Ukraine also produced about two-thirds of the electric power in Ukraine. The largest generating stations are found in the Donets Basin (thermal), the Dnieper (hydro as well as thermal), and Odessa (thermal). In addition four nuclear reactor complexes were to be built: near Zaporizhia, on the Boh River (the South Ukrainian), near Odessa, and in the Crimea (the plans for the Odessa and

the Crimea nuclear plants have been canceled). Of considerable significance is the preparation of building materials (Donets Basin, Dnieper Industrial Region, Crimea, Odessa), especially cement. The food-processing and textile industries are also important, particularly in the southwest steppe.

Southwestern Branch of the Imperial Russian Geographic Society (Russian: Yugo-zapadnyi otdel Imperatorskogo russkogo geograficheskogo obshchestva). A virtually independent learned association established in Kiev on 13 February 1873 to conduct geographic, ethnographic, economic, and statistical research in Ukraine. Unlike other regional branches of the imperial Russian society, such as the East Siberian, West Siberian, and Caucasian, the Southwestern branch left archeological and historical research to other, already-established learned societies in Kiev. Most of the founders and key members of the association were members of the Old *Hromada of Kiev, including V. Antonovych, V. Berenshtam, F. Vovk, M. Drahomanov, P. Zhytetsky, O. Lashkevych, M. Lysenko, and O. Rusov. The first president was Hryhorii *Galagan, and the managing director was P. *Chubynsky.

The scholarly output of the association over the brief period of its existence is impressive. It published two volumes of *Zapiski* (1874-5) containing studies by O. Klosovsky, M. Yasnopolsky, O. Rohovych, and M. Levchenko as well as the aforementioned members. As supplements to the periodical, it published a collection of O. Veresai's dumas and songs, Rohovych's bibliography of naturalist studies of the Kiev school district (1874), H. Kupchanko's materials on Bukovyna, and a folk-song collection. It supported the publication of I. Rudchenko's collection of chumak songs (1874), Drahomanov and Antonovych's collection of historical songs (1874-5), and the preparation for print of Drahomanov's collection of folk legends and stories (1876) and of M. Maksymovych's collected works (1876-80). The society conducted a voluntary census of Kiev in March 1874 and published an analysis with its results (1875). In August 1874 it participated in the Third Archeological Congress, which it had helped organize in

Kiev, and in March 1875, in a geographic congress and exhibition in Paris. The society set up a library and museum that displayed artifacts collected during field expeditions by its members and sponsored a public lecture series on various aspects of Ukrainian life. Finally, some of its members gained editorial control over the newspaper *Kievskii telegraf* and often ran articles on Ukrainian themes.

The accomplishments of the society and its success in generating interest in Ukrainian studies aroused the suspicion of Russian chauvinists. Starting in 1874, denunciations of the society arrived in the Third Section of the police in St Petersburg. The denunciations became more numerous and extreme when Antonovych was elected president and Chubynsky vice-president of the society, in May 1875. In his memorandum the curator of the Kiev school district, M. *Yuzefovych, who at first had been a strong supporter and an influential member of the association, accused the members of the society of political sedition and separatism. As a result an imperial commission was established in September 1875 to study the whole Ukrainian situation. Its recommendation of further repressive measures was approved by Alexander II and is known as the *Ems Ukase. The Southwestern Branch was dissolved in June 1876, and Chubynsky was forced to leave Kiev. According to the secret ukase, the society could be renewed if all the former members were excluded from it.

In spite of its short life the Southwestern Branch made an important contribution to the Ukrainian national revival. Not only did it publish some valuable scholarly works and monuments of the oral tradition, it also brought together a group of Ukrainian scholars and civic leaders who spearheaded the national movement until the end of the century.

Southwestern dialects. A group consisting of the Podilian, South Volhynian, Dniester, Sian, Lemko, Transcarpathian, Hutsul, and Bukovyna-Pokutia dialects. Together with the group of *southeastern dialects (the boundary between the two groups runs along the line Khvastiv-Pervomaiske-Tyraspil), they form the basic southern group of Ukrainian dialects. The dialects differ from the *northern dialects in the change, independently of stress, of the ancient vowels \bar{o} , \bar{e} into i (u , \bar{u} , $'u$, \bar{u} in the subdialects of the Carpathian region), \bar{e} into $'i$, and \bar{e} into $'a$ ($'e$ [$'y$], $'i$ in the subdialects of Bukovyna and central Galicia), and in morphological, syntactic, and lexical peculiarities. They differ from the southeastern dialects in retaining many phonetic and morphological archaisms and allowing fewer phonetic innovations.

Southwestern Economic Region of the USSR. See Regional economics.

Southwestern land (Russian: Yugo-zapadnyi krai). An administrative territory set up by the Russian government in Right-Bank Ukraine in 1832. Known officially as Kiev general gubernia, it consisted of Kiev, Podilia, and Volhynia gubernias and existed until 1917. The designation 'southwestern' was in the context of the territory of the Russian Empire, and 'Yugo-Zapadnaia Rossiia' (Southwestern Russia) was also frequently used to refer to Russian-ruled Ukraine (eg, **Arkhiv Iugo-Zapadnoi Rossii*). That

centralist Russian viewpoint remained in the terminology of the Soviet administration, wherein names such as 'Pivdenno-zakhidnyi ekonomichniy raion SSSR' (South-western Economic Region of the USSR) were used to refer to Ukraine.

Southwestern Railroad. See Railroad transportation.

Sova, Andrii, b 30 December 1912 in Odessa. Film actor and reciter. He completed study at the Odessa Theater College (1938) and then worked in the Odessa (1938–41) and Kiev (1944–50) artistic film studios and the Kiev Philharmonic Society Ukrconcert (1951–9) and became known as a reciter in the genre of satirical miniature (1959–79). He acted in the films *Taiemnychiy ostriv* (The Mysterious Island, 1940) and *V dalekomu plavanni* (On a Distant Sea Voyage, 1945).

Sova, Petro, b 1894 in Nové Zamky, Komárno county, Slovakia, d ? Russophile Transcarpathian historian and civic figure. After graduating from the Law Academy in Prešov he worked for the Czechoslovakian civil service as a department head in the Uzhhorod regional branch of the Ministry of Education and as a cultural attaché in the governor's office. He was also a city council member and vice-mayor (1924–7) of Uzhhorod and a founding member of the Russian National Autonomist party. As deputy head of the People's Council of Transcarpathian Ukraine (1944–5) he led a campaign to support the Soviet annexation of Transcarpathia after the Second World War. Sova wrote a number of regional studies, including *Proshloe Uzhoroda* (Uzhhorod's Past, 1937) and *Arkhitekturnye pamiatniki Zakarpat'ia* (Architectural Monuments of Transcarpathia, 1958). He also translated *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) into Hungarian.

Sova (Owl). A Russophile satirical paper published in 1871 in Uzhhorod (three issues) and Budapest (two issues). The journal was founded by the prominent Transcarpathian Russophile E. Hrabar. Edited by V. Kimak, it satirized the *Magyarone clergy in Transcarpathia.

Sovacheva, Hanna [Sovačeva], b 7 December 1877 in Pryluka, Poltava gubernia, d 7 July 1954 in Abondant, near Paris. Character and comic actress, singer (mezzo-soprano), and stage director. After completing study at the

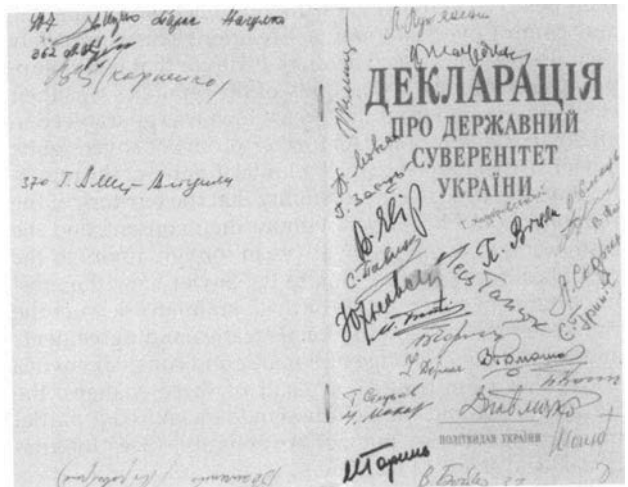

Hanna Sovacheva

Vasyl Sovachiv

Lysenko Music and Drama School in Kiev, she worked in the Kiev Opera House and was active in the drama circle of the Kiev Hromada. She joined the State Drama Theater in 1918 and then worked in the Ruska Besida Theater in Lviv (1921–3), the Ruthenian Theater of the Prosvita Society in Uzhhorod (1923–31), the Tobilevych Theater (1932–3), the Zahrava and Kotliarevsky theaters (1934–9), the Lesia Ukrainka Drama Theater (1939–41), and the Lviv Opera House (1941–4). After the Second World War she lived in Austria and, from 1949, in France. She led a Ukrainian troupe in Salzburg in 1945–9.

Sovachiv, Vasyl [Sovačiv, Vasyľ], b 1876 in Pryluka, Poltava gubernia, d 3 May 1924 in Slyvky, Kalush county, Galicia. Army physician and civic activist. As a medical student in Kiev he was president of the Young Hromada for five years. He served as an army doctor in the Russo-Japanese War and in the First World War. After returning to Kiev in 1917, he worked in the local hospitals and was active in the Ukrainian Democratic Agrarian party. With the UNR Directory's evacuation from Kiev to Vinnytsia, he was appointed chief of the Sanitary Administration of the UNR Army. Later he was a member of the chief executive of the Ukrainian Red Cross. In the 1920s he worked as a physician in the health resort of Pidliute, near Kalush.

Cover of the publication of the 1990 declaration of Ukraine's sovereignty, signed by members of Ukraine's parliament

Sovereignty. The legal and political concept that deals with ultimate authority in the decision-making process of the state. In international law it is the freedom of a state from outside interference in administering its internal and external affairs. Sovereignty is a fundamental principle of international legal relations and the essential property of a modern state. The source and locus of sovereignty may be a monarch or dictator or, as in democratic states, the people. In totalitarian regimes a single political party exercises sovereign powers. Relations of vassalage, protection, or union between states entail a limitation or loss of sovereignty.

The Ukrainian Hetman state of the 17th to 18th century enjoyed only partial sovereignty. The new states of the 19th to 20th centuries gained sovereignty by claiming the right to *self-determination. The Central Rada, acting as a sovereign power, proclaimed the establishment of the UNR

in the Third Universal (20 November 1917) and the republic's complete sovereignty in the Fourth Universal (22 January 1918). According to the latter, full sovereignty belongs to the Ukrainian people. The unilateral declaration of sovereignty gave Ukraine the right to enter into international relations. Its sovereignty was recognized by several states: the Central Powers in the Peace Treaty of Brest-Litovsk, Soviet Russia in the same treaty and in the peace agreement of 12 June 1918, and Poland in the Treaty of Warsaw.

The state organs of the Ukrainian SSR claimed sovereignty, beginning with the Declaration of the Rights of the Nations of Russia (15 November 1917) and continuing to the union agreement between the Ukrainian SSR and the Russian SSR (28 December 1920). Ukraine's agreements with Poland, the Baltic states, and others also presupposed this principle. In reality, however, the Ukrainian SSR had only nominal sovereignty, for it remained under the control of Soviet Russia and was used as a tool of Soviet foreign policy. In a formal sense Ukraine continued to exist as a separate state, but real sovereignty belonged to the central government in Moscow and the Russian Communist party.

The declaration and agreement on the establishment of the USSR in 1922 stressed the sovereignty of the new Union republics, but this sovereignty was even more fictitious than before. The powers of the republics were minimal, and control over international relations was completely assumed by the USSR. The only attribute that could support the theoretical sovereignty of the republics was their right of secession from the USSR, which was guaranteed in all Soviet constitutions. As further proofs of sovereignty, Soviet jurists pointed to the 'voluntary' entry of the republics into the USSR, the impossibility that the territory of the republics could be altered without their consent, and the restoration of some prerogatives in foreign affairs to the republics in 1944. According to the Soviet view the most important sovereign rights of the Ukrainian SSR were the right to enter into international treaties and agreements and the right to exchange diplomatic and consular envoys with other countries. As a result of these changes, the Ukrainian SSR and the Belorussian SSR acquired a partial international status, but not sovereignty. (See *International legal status of Ukraine.)

The Soviet doctrine of sovereignty was complex and eclectic. In the international arena the USSR defended sovereignty as a hard and inalienable principle which included noninterference in the domestic affairs of the USSR and the members of the Soviet bloc, their equality, and their territorial integrity, but the USSR regarded anticolonial and national liberation movements as expressions of popular sovereignty, and therefore claimed the right to support them. Limiting of the state powers of the Union republics was interpreted as the joint exercise of the sovereign rights of the Union and the republics. Soviet theory described sovereignty as 'one whole' in which there could be no conflict between Union and republican sovereignty. The theory of the 'unity of sovereignty' had replaced the doctrine of 'dual sovereignty' only in the latter years of the USSR. A modified version of this doctrine applied to members of the Soviet bloc, which were said to exercise sovereignty vis-à-vis foreign states in solidarity and with the assistance of the USSR. The so-called Brezhnev doctrine, which was invoked to justify Soviet intervention in Czechoslovakia in 1968, rested on this definition of limited sover-

eignty. Matters were further complicated by the unilateral declaration of Ukraine's sovereignty on 16 July 1990 by the elected government of the republic. Up to its dissolution in 1991 the Union government had ignored such declarations in most of the republics.

Sovetskaia Ukraina. See *Pravda Ukrainy* and *Raduga*.

Soviet (Russian: *soviet*; Ukrainian: *rada* 'council'). The basic institution of government, with both legislative and executive functions, in the USSR. Soviets controlled all other government institutions at every administrative-territorial level.

The first soviets in the Russian Empire arose spontaneously during the Revolution of 1905 as workers' strike councils. They appeared in the larger industrial cities, including Kiev, Katerynoslav, and Mykolaiv in Ukraine. The method for choosing their delegates, their internal rules of order, and their powers differed greatly from soviet to soviet. Most leftist political parties were represented in the soviets. Formally the bodies were usually called soviets of workers' deputies.

Within a month after the February Revolution of 1917 about 600 soviets sprang up in the gubernia cities and industrial centers of the empire. Initially they included representatives from a wide range of leftist parties and were usually dominated by Socialist Revolutionaries (especially in rural areas) or Mensheviks. In many instances the soviets acted as alternative parliaments or forums and won considerable popular support. At first the Bolsheviks were a small minority in most soviets and advocated 'all power to the soviets.' At the First All-Russian Congress of Soviets, held in June 1917, only 10 percent of the delegates were Bolsheviks. The second congress, held after the Bolshevik coup in November 1917, was taken over by the Bolsheviks after most of the other parties withdrew in protest. This body elected the Bolshevik-dominated All-Russian Central Executive Committee, which in January 1918 dispersed the *All-Russian Constituent Assembly and proclaimed the transfer of all power to the soviets.

In Ukraine the *All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies, which convened in Kiev on 17-19 December 1917, endorsed the Central Rada. The Bolshevik delegates rejected this action, however, and left Kiev for Kharkiv to join an alternate congress of soviets from the Kryvyi Rih and Donetsk Basin. Calling itself the *All-Ukrainian Congress of Soviets, this body proclaimed Soviet rule in Ukraine and established the *All-Ukrainian Central Executive Committee (VUTsVK). Ukrainian democratic and nationalist parties generally rejected the soviet system of government on the grounds that it gave too much power to Russian or Russified workers and soldiers at the expense of the peasantry; they advocated a single parliament elected on the basis of universal suffrage. Eventually the Bolsheviks, with the support of the *Borotbists and then the *Ukrainian Communist party, were able to establish soviet power throughout the cities and towns of Ukraine. At the same time they were able to assert their authority over rural so-

viets, most of which had been organized and controlled by the Ukrainian Party of Socialist Revolutionaries.

Beginning in 1919–20 an entire system of soviets was constructed in Ukraine. At the base of the pyramid, rural, town, and city soviets were elected by local inhabitants. In 1925 there were 10,314 rural, 155 town, and 70 city soviets. At the higher levels elections were indirect: local soviets sent delegates to raion soviets, which in turn sent delegates to gubernia (to 1925), okruha, and oblast (from 1932) soviets. Even the All-Ukrainian Congress of Soviets, the highest legislative body in Ukraine, was elected on an indirect basis by the okruha (later oblast) soviets. Soviet elections were closely controlled by the Party and dominated by workers and soldiers, who were disproportionately represented (in 1920, for every 1,000 soldiers, 10,000 urban workers, and 50,000 peasants the gubernia and city congresses of soviets sent one delegate to the All-Ukrainian Congress). The soviets were required by law to meet for a certain length of time a set number of times a year (usually two). They elected their own executive committees, which had executive authority between sessions of the soviet. Central control over the soviets was assured by the subordination of local soviets and executive committees to their higher counterparts all the way up to the VUTsVK and the All-Ukrainian Congress of Soviets. Decisions of lower bodies which were deemed unconstitutional or contradictory could be overturned by higher bodies, and the instructions-circulars and orders of higher bodies were mandatory for lower ones. In the 1920s a degree of decentralization was preserved: the administrative personnel of the soviets was elected (although the Party in practice controlled the process); within their territory and competency local soviets were the highest authority; and the soviets controlled their own assets and budgets, which were set by them and only ratified by the higher bodies.

The 1936 Constitution abolished the indirect electoral system and the unequal vote (although the 'dictatorship of the proletariat' remained a feature of Soviet political theory for many years) and introduced a system of direct elections to soviets at all levels. It also established the *Supreme Soviet of the Ukrainian SSR as the republic's highest legislative body. In 1985 there were 9,431 rural, 121 urban district, 421 town, 479 raion, and 25 oblast soviets in Ukraine, with a total of over 526,000 deputies. Elections to local soviets were held every two and a half years (formerly every two years); the Supreme Soviet was elected every five (formerly four) years. All citizens over the age of 18 were eligible and expected to vote. Candidates were usually nominated by the Party or some allied organization to ensure communist domination. Until the reforms initiated by M. Gorbachev, only one candidate per electoral district was permitted.

At every level soviets elected their own executive committees to exercise executive power between sessions of the soviet. In theory the soviets were responsible for certain services in their districts, including housing, social security, public works, food distribution, cultural affairs, and the police. In reality they had very little authority. They were severely restricted by plans and budgets set by the central planners and authorities. Although they could make reports and recommendations to the higher authorities, they had little influence on the planning. Many enterprises and institutions within a local district were directly subordinated to central (Union, Union-republi-

can, and republican) ministries and were beyond the control of the local soviet. In the last few years of the USSR there was a strong demand for decentralization.

Soviet Army (Russian: Sovetskaia Armiia; Ukrainian: Radianska Armiia). The regular army of the USSR, known until September 1946 as the Workers' and Peasants' Red Army or simply the Red Army. It was established by decree of the Soviet government on 28 January 1918 out of Red Guard Detachments. The Bolshevik troops that brought Ukraine under Soviet control in 1918–20 were generally Russian in national composition. They received support from Ukrainian or partly Ukrainian units, such as the *Red Cossacks, the *Tarashcha Division, and the Bohun Regiment, and occasional help from partisan groups led by N. Makhno, N. Hryhoriiv, and D. Zeleny. For a while (January–April 1920) Galicians formed their own unit, the *Red Ukrainian Galician Army, within the Red Army. The Communist commander of the Ukrainian front, V. Antonov-Ovsienko, was responsible to Moscow, not to the Bolshevik government of Ukraine in Kharkiv. The People's Commissariat for Military Affairs in Kharkiv had no real power and was abolished in 1919.

The Ukrainian SSR never had its own army. In the 1920s, territorial divisions consisting of Ukrainians and using Ukrainian as the language of command constituted a militia and were stationed in the larger cities. Except for the Red Cossacks, stationed near Proskuriv, Starokostiantyniv, and Berdychiv, regular army units in Ukraine were of mixed national composition, and used Russian. Most Ukrainians in the regular forces were stationed outside Ukraine. The commander of the Ukrainian-Crimean Military District was responsible not to the government of the Ukrainian SSR, but to Moscow. With the abolition of the territorial units (1934) and the division of Ukraine into three military districts (1938), Ukraine was integrated even more closely into the all-Union military system. By 1937 Russian became the language of command in all military units. Also, the military traditions of the imperial Russian army (eg, officer ranks, uniforms, insignia) were gradually reintroduced.

During the Second World War, 4.5 million Ukrainians served in the Red Army. Except for the First Ukrainian Partisan Division (est 1943) under Col P. *Vershigora, there were no separate Ukrainian units in the Soviet armed forces. Because of national discrimination, non-Russians refused at first to fight the German invaders: of 3.6 million Soviet prisoners of war by March 1943, 2 million were non-Russian. The harsh treatment of the population and POWs by the Germans eventually persuaded non-Russians to fight. Approx 1.7 million Ukrainians were decorated for bravery in the war. In 1943 the Bohdan Khmelnytsky Medal was introduced, and in 1944 a People's Commissariat of Defense was established for Ukraine (with Gen S. Kovpak as the first commissar), but this was only a symbolic gesture.

After the war the Soviet Army remained an integrated multinational force. The territory of Ukraine was reorganized into three military districts (Kiev, Odessa, and Subcarpathia), and Donetske and Luhanske oblasts were

assigned to the Northern Caucasia Military District. Because of its geographic location along the western border of the USSR and on the Black Sea, Ukraine was strategically important. It was the home of the Black Sea Fleet, major air-fields near Zhytomyr, and missile bases in the Carpathians.

The Soviet Army was an instrument of Russification. Its medium of communication was exclusively Russian; all of its recreational, cultural, and press activities were in Russian as well. Conscripts spent their term of service outside their own republics, and demobilized servicemen were encouraged to live and work in new settlements, mostly in the east. Political education in the army promoted Russian chauvinism and glorified Russian military heroes. Besides national discrimination, the army suffered from a rigid caste system similar to that of the tsarist army. The officers were separated sharply from the common soldiers by material privileges, uniforms, honors, and statutes.

In its Declaration on State Sovereignty (16 July 1990) the Supreme Soviet of the Ukrainian SSR stated its intention to nationalize the army in Ukraine. As the first step toward implementing this proclamation it demanded that all Ukrainians serving in the Soviet armed forces be stationed in Ukraine by 1 December 1990.

L. Shankovsky

Soviet partisans in Ukraine, 1941–5. In Ukraine, Soviet partisans played a less important role in the Soviet war effort against the Germans than they did in other parts of the Soviet Union. Recruited from Party cadres left behind the German lines, escapees from German POW camps, and refugees from the German terror, they found little support among the population and, except for the northeastern region, no suitable terrain for their operations.

At the end of June 1941, immediately after the Germans crossed the Soviet border, the Central Committee of the All-Union Communist Party (Bolshevik) ordered Party members to organize an underground on occupied territories. In 1941 underground cells sprang up in a few Ukrainian cities, but most Party members ignored the order. The first partisan detachments appeared in Chernihiv and Sumy oblasts. They developed out of M. Popudrenko's and S. *Kovpak's underground groups, which were joined by small army units that broke through the German encirclement of the Soviet forces east of Kiev. It was only in the spring of 1942, when these partisans established a radio link with Moscow and received special reinforcements dropped by parachute, that they began to show some activity. Apart from two other partisan detachments, which sprang up at the end of 1941 and were quickly wiped out by the Germans, one (500 men) in the Nykopol and Kryvyi Rih regions and the other (400 men) in the eastern Dnipropetrovske region, there were no other Soviet partisans in Ukraine at the time. A significant partisan movement developed by the spring of 1942 in oc-

cupied Belarusian and southwestern Russian territories, where 80 percent of the Soviet partisan activity was concentrated. In Ukraine, Soviet partisans achieved a significant strength only in mid-1943.

Soviet partisans came under the Ministry of State Security, not under the defense ministry. On 30 May 1942 the Central Staff of the USSR Partisan Movement was set up in Moscow, and on 20 June the CC CP(B)U established the Ukrainian Staff of the Partisan Movement in Voroshyllovhrad. The nominal chief of the Ukrainian Staff was N. *Khrushchev, but its actual chief was T. Strokach, deputy commissar of the NKVD of the Ukrainian SSR. On its orders S. Kovpak and A. Saburov conducted an extended raid in October 1942 to March 1943 from the Briansk forests into northern Ukraine. German troops in the region were sparse; hence, they encountered little resistance. Then, in May 1943, Kovpak was sent on a long raid from Putyvl across Volhynia to the Carpathian Mountains to cut German supply lines and to demonstrate Soviet power in Volhynia and Galicia, where UPA forces were forming. His force was crushed by the Germans at Deliatyn on 1 August, and some of its surviving bands were wiped out by the UPA. In spite of the losses, the raid had an important psychological effect on the Ukrainian population: it destroyed its belief in German invincibility. The returning survivors were assigned to the First Ukrainian Partisan Division under the command of P. *Vershigora, which in January–July 1944 conducted a raid from Volhynia through northwestern Galicia, the Kholm region, Podlachia, and Belarus. The other partisan raids in 1943 – led by M. Naumov in southern Ukraine and Ya. Melnyk and A. Fedorov in Right-Bank Ukraine and Volhynia – were less significant. V. Behma's and Col D. Medvedev's Soviet units were based in Volhynia, but their operations extended into adjacent regions. As the Red Army advanced through Ukraine the partisan movement grew rapidly. According to Soviet sources there were 13,300 partisans in Ukraine at the beginning and 43,500 at the end of 1943.

Small partisan units and Komsomol underground groups that arose spontaneously and had a distinctly national profile constituted a special branch of the Soviet partisan movement in Ukraine. They had no contact with the Ukrainian Staff and often were treated as hostile forces by the Soviets. For many years after the war, they were not recognized as Soviet partisans by Soviet authorities. The Young Guards in the Donbas, an underground group in Vinnytsia (arrested by the NKVD in 1944), a unit in the Chernihiv region (wiped out by Fedorov in March 1942), and Capt I. Kudria's group in the Dykanka forests are some examples of such groups.

At the beginning of 1944 the number of Soviet partisans in Ukraine rose to 47,800, or about 10 percent of the USSR total. Moving west in advance of the Red Army, the partisans assumed the role of a vanguard. The leading Soviet partisan units in Ukraine were under Vershigora, Naumov, I. Artiukhov, V. Shangin, and M. Shukaev. The last unit was defeated by the UPA in the Carpathians. The partisans pursued the Germans into Poland, where Vershigora's division distinguished itself, and into Czechoslovakia. The Ukrainian Staff directed the Soviet partisan movement until it was abolished on 1 June 1945.

Soviet people (*radianskyi narod*). A concept of official Soviet nationality policy which implied a total or near-total integration of the various nations and ethnic groups in the USSR. Concomitantly it implied their linguistic and cultural Russification. Less often, in casual usage, 'Soviet people' was the synonym of *sovetskie liudi* (the Soviet population). The political and scholarly concept of the Soviet people was adumbrated under N. Khrushchev and was more fully developed under L. Brezhnev.

In an emotive, nonanalytical sense V. Lenin used *sovetskie liudi* in 1919, and J. Stalin spoke of the *sovetskii narod* in his patriotic appeals during the Second World War. It was N. Khrushchev, however, who first used 'Soviet people' in a more precise sense. At the 22nd CPSU Congress in 1961 he claimed that the Soviet people were a new historical multinational community sharing a common economic base, socialist fatherland, social-class structure, worldview (Marxism-Leninism), and goal (the building of communism) and many common mental traits. Khrushchev, however, soon stopped using the concept altogether.

For a number of internal political and external diplomatic-ideological reasons (such as competing pressures from non-Russians and Russian nationalist dissidents, the frontier war with China, and the competition with the Chinese leadership for influence in the world Communist movement), Brezhnev formally adopted the concept of the Soviet people, defined in terms similar to those used by Khrushchev, at the 24th CPSU Congress in 1971 and emphasized it during the 50th anniversary of the USSR in 1972. After the political and diplomatic-ideological crises ended in the mid-1970s, Brezhnev virtually dropped the use of the concept, in 1976 and 1977. An implicit reason for his caution was the opposition to the term 'Soviet people' in 1971 by republican leaders, including P. Shelest from Ukraine. The concept was also rejected by many Soviet scholars and was never fully defined. In the face of mounting pressure from the various national movements in the USSR, M. Gorbachev suspended use of the concept in September 1989, although he later made casual references to it on occasion.

Ya. Bilinsky

Soviet Progress in Chemistry. See *Ukrains'kyi khimichnyi zhurnal*.

Sovietology. The interdisciplinary study of the Soviet Union, particularly of its political life, combining the methods of political science, history, economics, sociology, linguistics, and other sciences. Some Sovietologists have insisted that the field is *sui generis*, that it differs from French, German, or Italian studies because of the pervasiveness of politics in Soviet life and because of Soviet hostility to Western democracies. Others have questioned this claim. As recent events following Perestroika have shown, Sovietology has been too Russocentric and

has not devoted sufficient attention to the non-Russian nationalities of the USSR.

The study of Soviet Ukraine, or 'Ukrainology,' is a branch of Sovietology. The coverage of Ukrainian affairs has been uneven: some periods, such as the period of the struggle for independence (1917–20) and the period since the outbreak of the Second World War, have received more attention than the important interwar years. The first comprehensive and up-to-date studies of the development of Soviet Ukraine were by C.A. Manning (*Ukraine under the Soviets*, 1953), B. Dmytryshyn (*Moscow and the Ukraine 1918–1953: A Study of Russian Bolshevik Nationality Policy*, 1956), and R. Sullivant (*Soviet Politics and the Ukraine, 1917–1957*, 1962). Yu. Lavrynenko's annotated bibliography (*Ukrainian Communism and Soviet Russian Policy toward the Ukraine: An Annotated Bibliography, 1917–1953*, 1953) can be described as a protohistory of Soviet Ukraine up to 1953. R. Szporluk's brief popular history of Ukraine (1979) and O. Subtelny's college textbook in Ukrainian history (1988) cover the Soviet period to the year of their publication. A social history of Ukraine spanning over 60 years of Soviet rule and focusing on the development of national consciousness has been written by B. Krawchenko (*Social Change and Consciousness in Twentieth-Century Ukraine*, 1985).

The revolutionary period of 1917–20 has been comprehensively dealt with by J.S. Reshetar, Jr (*The Ukrainian Revolution, 1917–1920: A Study in Nationalism*, 1952), J. Borys (*The Russian Communist Party and the Sovietization of Ukraine: A Study in the Communist Doctrine of the Self-Determination of Nations*, 1960; 2nd rev edn: *The Sovietization of Ukraine, 1917–1923*, 1980), and T. Hunczak, ed. (*The Ukraine, 1917–1921: A Study in Revolution*, 1977). It has also given rise to more specialized monographs by A.E. Adams (*Bolsheviks in the Ukraine: The Second Campaign*, 1963), O.S. Fedyshyn (*Germany's Drive to the East and the Ukrainian Revolution, 1917–1918*, 1971), I. Majstrenko (*Borot'bism: A Chapter in the History of Ukrainian Communism*, 1954), and M. Palij (*The Anarchism of Nestor Makhno, 1917–1921: An Aspect of the Ukrainian Revolution*, 1976). The first 15 years of Soviet rule have been analyzed by J.E. Mace (*Communism and the Dilemmas of National Liberation: National Communism in Soviet Ukraine, 1918–1933*, 1983).

The most important specialized studies about the 1930s are R. Conquest's monograph (*The Harvest of Sorrow: Soviet Collectivization and the Terror-Famine*, 1986) and R. Serbyn and B. Krawchenko's (eds) collection on the famine (*Famine in Ukraine, 1932–1933*, 1986). G.S.N. Luckyj's study of literary politics (*Literary Politics in the Soviet Ukraine, 1917–1934*, 1956), and H. Kostyuk's book on the terror (*Stalinist Rule in the Ukraine: A Study of the Decade of Mass Terror, 1929–39*, 1960). On Western Ukraine there is an older study by V. Kuchabsky [W. Kutschabsky] (*Die Westukraine im Kampfe mit Polen und dem Bolschewismus*, 1934) and a recent one by J. Radziejowski (*The Communist Party of Western Ukraine, 1919–1929*, trans A. Rutkowski, 1983).

Ukrainian political life during the Second World War has been examined by J.A. Armstrong (*Ukrainian Nationalism, 1939–1945*, 1955; 2nd edn 1963; 3rd edn 1990). On the postwar period the coverage is more extensive. The Ukrainian Party apparatus has been studied briefly by Armstrong (*The Soviet Bureaucratic Elite: A Case Study of the Ukrainian Apparatus*, 1959) and B. Harasymiw (*Political Elite Recruitment in the Soviet Union*, 1984). Ya. Bilinsky's

thorough study of political developments in Ukraine (*The Second Soviet Republic: The Ukraine after World War II*, 1964) does not deal with the dissidents of the 1960s. Two wide surveys of different areas of national life, with some attention to methodology, have been edited by P. Potichnyj (*Ukraine in the Seventies*, 1975) and B. Krawchenko (*Ukraine after Shelest*, 1983). B. Lewytkyj has written an analytical study of the main changes in Ukraine in the postwar period (*Politics and Society in Soviet Ukraine, 1953–1980*, 1984). The Ukrainian dissident movement has been analyzed by K. Farmer (*Ukrainian Nationalism in the Post-Stalin Era: Myth, Symbol, and Ideology in Soviet Nationalities Policy*, 1980) and J. Bilocerkowycz (*Soviet Ukrainian Dissent: A Study of Political Alienation*, 1988). The Chernobyl disaster has been described by D.R. Marples (*Chernobyl and Nuclear Power in the USSR*, 1986; *The Social Impact of the Chernobyl Disaster*, 1988) and M. Bojczun and V. Haynes (*The Chernobyl Disaster: The True Story of a Catastrophe*, 1988). The developments of the last few years under perestroika have been examined by Marples (*Ukraine under Perestroika*, 1991).

The Ukrainian economy and Party history have been researched by V. Holubnychy, a selection of whose works came out posthumously under I. Koropecykyj's editorship (*Soviet Regional Economics: Selected Works of Vsevolod Holubnychy*, 1982). Koropecykyj has also edited three collections of articles on Ukrainian economics (*Ukraine within the USSR: An Economic Balance Sheet*, 1977; *Integration Processes in the Ukrainian Economy: A Historical Perspective*, 1988; *Studies in Ukrainian Economics*, 1988), and V. Bandera and Z. Melnyk have edited a book on the Soviet economy touching on Ukraine (*The Soviet Economy in Regional Perspective*, 1973).

Ya. Bilinsky

Sovietophilism. A political disposition among people outside the Soviet Union to support or sympathize with the USSR. The policy was justified by various theories and was adopted out of different motives, from the idealistic to the mercenary.

The left factions of the Ukrainian Party of Socialist Revolutionaries and the Ukrainian Social Democratic Workers' party, who, even before the Bolsheviks seized power in Ukraine, propagated an alliance with the Russian Communist party and the creation of a Soviet Ukraine, can be considered the first Sovietophiles. In 1919–21 these groups coalesced into the Borotbists and Ukrainian Communist party.

In the early 1920s Sovietophile tendencies arose among Ukrainian émigrés in Prague and Vienna, especially the left Socialist Revolutionaries, led by M. Hrushevsky and grouped around the journal *Boritiesia-Poborete!*; the Galician Social Democrats, under S. Vityk and grouped around his journal, *Nova hromada*; and followers of V. Vynnychenko, with his journal, *Nova doba*. In France in the 1920s, the *Union of Ukrainian Citizens in France, led by E. Borschak, and its newspaper, *Ukrains'ki visty*, were Sovietophile. Some circles of the Government-in-exile of the Western Ukrainian National Republic (those of Ye. Petrushevych and V. Paneiko) also favored rapprochement with the Soviet Ukrainian regime, especially after eastern Galicia had been awarded to Poland in 1923 by the Conference of Ambassadors in Paris. This stance was a tactical measure to gain political support from the USSR against Poland.

In the 1920s Sovietophilism became increasingly popular also in Galicia, primarily as a reaction to the colonial policies of Poland. Cultural Sovietophilism, or the belief that Ukrainian culture could develop only with the support of the Soviet Ukrainian state, was widespread. The Ukrainization policy of the early 1920s in Soviet Ukraine fed expectations of a national revival. Many soldiers and officers of the Ukrainian Galician Army who had served in central or eastern Ukraine stayed there or returned there later. Galician organizations, such as the Shevchenko Scientific Society and some Ukrainian co-operatives, worked with their Soviet counterparts but without supporting the Soviet regime. Several Western Ukrainian political parties adopted a pro-Soviet platform – the *Ukrainian Party of Labor, headed by M. Zakhidny, the *Communist Party of Western Ukraine, and the *Sel-Rob party. A section of the student movement represented by the *Working Alliance of Progressive Students in Prague was Sovietophile. Many pro-Soviet groups and organizations in Galicia were supported and sometimes even funded by the Soviet consulate in Lviv. The collectivization, the man-made famine, and the widespread repressions of the 1930s greatly undermined the strength of Sovietophilism in Western Ukraine and abroad.

Among Ukrainian immigrant communities in North and South America, Sovietophilism spread through the so-called progressive movement. It rested on many of the same hopes and expectations as those of the political émigrés in Europe. Moreover, many Ukrainian workers and farmers were influenced by leftist parties in their new homelands. The Soviet government encouraged Sovietophilism, especially during and immediately after the Second World War, when it enjoyed much sympathy in the West as an ally. The main pro-Soviet Ukrainian organizations in North America were the *League of American Ukrainians, the *Ukrainian Labour-Farmer Temple Association, and the *Association of United Ukrainian Canadians. Soviet agents and provocateurs encouraged Sovietophilism among the post-Second World War émigrés. Some effort was made to convince emigrants (especially in France and Argentina) to return to the Soviet Union. No Sovietophile organizations were established by the postwar refugees, however, and only a few people, such as Yu. *Kosach, supported the USSR openly. In the post-Stalin period Sovietophilism declined rapidly among Ukrainians in the West. Official Soviet attempts to encourage more contacts with the West often backfired: instead of attracting support for the Soviet regime they exposed its repressive and Russian-chauvinist nature. J. *Kolasky's denunciation of Russification in education, for example, made a strong impression in Canada. The arguments of advocates of accommodation and compromise with the Soviet regime, such as M. *Koliankivsky and T. *Lapychak, found no response in the Ukrainian community. Sovietophilism among Western political and trade-union circles was criticized frequently by Ukrainian human rights activists.

B. Balan

Sovietskyi [Sovjets'kyj]. VIII-15. A town smt (1986 pop 9,400) in the southeastern Crimean Lowland and a raion center in the Crimea. The village was first mentioned in historical documents in 1798, as Ichky. After the Crimean War many Tatar inhabitants of the area emigrated to Tur-

key, and Russian and German colonists came in. In the 1890s Ichky became a station on a railway line. It was renamed in 1950. The town has a food industry and a winery.

Sovnarkom. See Council of People's Commissars.

Sowa, Antoni. See Żeligowski, Edward.

Sowiński, Leonard, b 7 November 1831 in Berezivka, Novohrad-Volynskyi county, d 23 December 1887 in Stetkivtsi, Zhytomyr county, Volhynia gubernia. Polish writer and translator. The son of a Polish noble and a Ukrainian peasant woman, he studied at Kiev University (1847–55), where he was a leading student radical. In his allegorical narrative poem *Z życia* (From Life, 1860) he wrote about contemporary events in Ukraine. An early Polish popularizer of T. Shevchenko, from the beginning of the 1860s on he translated and published several of Shevchenko's narrative poems and ballads and many of his lyrical verses in *Kurier Wileński* and Warsaw periodicals. He also wrote a book of studies of Ukrainian literature (1860) and a study of Shevchenko (1861), which included his translation of 'Haidamaky' (The Haidamakas). His translation of Shevchenko's 'Naimychka' (The Servant Girl) was published separately in Lviv in 1871. In his five-act tragedy in verse *Na Ukrainie* (In Ukraine, 1875) he depicted the conflicts between the Polish gentry and Ukrainian peasantry during the Polish Insurrection of 1863–4, and in his novel *Na rozstajnych drogach* (At the Crossroads, 1887) he portrayed critically the Polish gentry in Ukraine. Sowiński's familiarity with Ukrainian history, folkways, and literature is evident in his school and university memoirs (1st edn 1961). Translations of some of his poems have appeared in a Ukrainian anthology of Polish poetry (1979).

R. Senkus

Soybean (*Glycine soja* or *max*; Ukrainian: *soia*). An annual leguminous plant of the family Fabaceae, economically the most important bean in the world. It ranges from one to more than seven feet in height. The plant was introduced in Ukraine late in the 19th century. The seeds contain 24–45 percent protein, 20–32 percent carbohydrates, and 13–37 percent fat along with vitamins D, B, and E. Soybean occupies the leading place in the world's *vegetable-oil industry. Soybean oil is used for margarine and shortening, in food preparation, and, industrially, in the manufacturing of fibers, plastics, glue, paints, and soap.

Sozh River [Sož]. A left-bank tributary of the Dnieper River that flows for 648 km through Smolensk oblast (RF) and Mahiliou and Homel oblasts (Belarus) and drains a basin area of 42,100 sq km. The river is navigable for 373 km. For approx 20 km from its mouth the Sozh demarcates the border between Ukraine and Belarus along the northern edge of Chernihiv oblast.

Sozontiv, Symon, b 20 July 1898 in Lahery, Zmiiv county, Kharkiv gubernia, d 17 March 1980 in Dammartin-sur-Tigeaux, France. Political and community activist in France. He served as a captain in the Army of the UNR, was interned in Poland, and in 1923 emigrated to Czechoslovakia. He graduated with a degree in engineering from

the Ukrainian Husbandry Academy in Poděbrady in 1927 and then moved to France, where he set up a rubber factory. He headed the UNR government-in-exile (1954–5) and several Ukrainian organizations in France, including the Ukrainian Community Aid Society (1946–54), the Ukrainian Central Civic Committee (1948–69), and the executive branch of the Ukrainian National Council (1948–54). He founded the Franco-Ukrainian Hromada publishing house, which was active in 1948–56, and was the publisher of *Vil'na Ukraina* and *L'Ukraine libre* (1953–4) in Paris.

Space travel. Along with the United States, the USSR was a world leader in exploring space as the final frontier. Scientists from Ukraine played a key role in the Soviet space program from its inception. Ukrainian scientists throughout the world have also contributed to planetary *astronomy and other space sciences. A number of Ukrainian scientists made important contributions to the development of jet engines and *rockets. The first world exhibition devoted to problems of outer space was held in Kiev from 19 June to 1 September 1925.

The era of space travel was inaugurated by the successful Soviet launching of the first satellite, Sputnik, into orbit in 1957. Its designer, and the 'invisible scientist' who actually controlled the Soviet space program, was the Ukrainian S. *Korolov, whose Luna-3 satellite brought back the first photographs of the far side of the moon (1959). Korolov put the first man in space (1961) and the first man-made object on the moon and planned the first walk of a man in space. His work was continued by another scientist of Ukrainian descent, M. *Yanhel, who headed manned and unmanned Soviet spaceflights after Korolov's death. Yu. *Kondratiuk (real name: O. Sharhei) analyzed ways to ensure the safety of the crew during space travel. As early as 1929 he proposed a manned lunar module and solved the problems of re-entry and landing on the earth. His Lunar Orbit Rendezvous technique of 1929 was used to land all US astronauts on the moon, and his works were translated and published by NASA.

A number of Ukrainian astronauts have orbited the earth. In August 1962 P. *Popovych on Vostok-4 was the fourth person and the first Ukrainian in space. In October 1968 H. *Berehovy spent four days in orbit around the earth on Soiuz-3, doing geophysical, astronomical, and medical experiments. Other Ukrainian astronauts include H. Dobrovolsky (who died tragically in the explosion of Soiuz-11), A. Fylypenko, V. Horbatko, H. Hrechko, Yu. *Romanenko, L. *Kyzym, and I. *Volk.

Besides B. *Paton and D. *Dudko, Ukrainian contributors to space technology include V. Bernadsky, V. Paton, V. Stesyn, V. Lapchynsky, A. Zahrebelny, E. Ternovy, S. Havrysh, M. Huzhva, N. Kovalenko, V. Pylypenko, V. Lakyza, A. Tsapenko, A. Bily, V. Dolodarenko, H. Tretiachenko, K. Herasymenko, A. Pidhorily, E. Oleksiienko, I. Taranenko, H. Volokyta, L. Korniienko, A. Mykolaienko, V. Fedchuk, A. Markus, V. Udovenko, N. Velychko, V. Shevchenko, E. Ivchenko, and V. Semenenko.

Spain. According to Arabic chronicles Slavs, the ancestors of Ukrainians from the Black Sea coast, served as slaves, soldiers, and scholars to the Arab rulers of Spain. In the 17th century, as the exploits of the Zaporozhian Cossacks against the Turks became widely known throughout Europe, a number of books on Ukraine and

the Cossacks appeared in Spain. Occasionally Cossacks served as mercenaries in the Spanish armies. During the Napoleonic Wars some Ukrainians served in the French forces in Spain.

During the period of Ukrainian independence Ye. Kulisher was appointed ambassador of the UNR to Spain, but he had no opportunity to serve in this capacity. Ukrainians fought on both sides in the Spanish Civil War (1936–9). A separate Ukrainian unit, the Shevchenko Company, was active on the republican side and published its own paper, *Borot'ba*. During the Second World War Yu. Karmanin served as an OUN information officer in Spain.

After the war a small Ukrainian community established itself in Spain, chiefly in Madrid. From 1947 a group of 25 or 30 young Ukrainian refugees supported by Obra Católica de Asistencia Universitaria studied in Spain. The students formed a chorus and dance group, the Obnova Society of Ukrainian Catholic Students (1947), and the Ukrainian Student Hromada (1956). A few Ukrainian families also settled in Madrid. By 1953 the Ukrainian community numbered 68 members. The Association of Ukrainian Friends of Spain, headed by A. Kishka, was set up in 1957. A Ukrainian program was broadcast three times per week (1951–5) and then daily on the national radio. In 1952 a Ukrainian section was established at the Centro de Estudios Orientales under its director, Rev S. Morillo. The center's journal, *Oriente* (renamed *Oriente europeo* in 1956), published many articles on Ukrainian questions. The monthly *Las cartas de España* came out in Ukrainian, English, Polish, Czech, Slovak, Rumanian, Hungarian, and Croatian (1950–1). Concerts and other performances by Ukrainian students have popularized Ukrainian culture among the wider public. Two Ukrainian political institutions were established in Spain: a representation of the executive board of the Ukrainian National Council and a delegation of the Anti-Bolshevik Bloc of Nations.

Spanish themes have an important place in Ukrainian literature. They are at the heart of masterpieces such as Lesia Ukrainka's *Kaminnyi hospodar* (The Stone Host), N. Koroleva's *Predok* (Ancestor), and B.I. Antonych's *Al'kazar* (Alcazar). D. Mordovets and Koroleva (a Ukrainian writer of Spanish origin) have written travel accounts of Spain. Translations of Spanish literature into Ukrainian have been done by M. Ivanov, M. Lukash, and D. Buchynsky.

Spanish Civil War. A military struggle in 1936–9 between the Popular Front coalition government of the Spanish Republic and the Falange movement and its allies led by Gen F. Franco.

In the USSR the International Organization to Assist the Fighters for the Spanish Revolution (IOAFSR) was set up; in it was a section for the Ukrainian SSR. By September 1936 the Ukrainian SSR had contributed 548,500 rubles to the IOAFSR fund. During the course of the war much material assistance to the Spanish Republic came from Ukraine. As well, a number of Ukrainians were among the 2,000 to 3,000 Soviet military and other specialists dispatched to Spain. Some 5,000 Spanish children were brought to the USSR to study in Soviet schools, a considerable number of them to Ukraine.

Many Ukrainians from Western Ukraine and the diaspora (Canada, Argentina, France, the United States, Belgium) fought in the ranks of the International Brigades,

Ukrainian-Canadian volunteers in the Mackenzie-Papineau Battalion and Shevchenko Company of the 13th International Brigade during the Spanish Civil War

which were formed of people from 54 states. Some 400 Ukrainians came from Canada alone (accounting for 30–40 percent of the total Canadian contingent), at least 200 from Galicia and Volhynia, 58 from Transcarpathia, and an undetermined number from Bukovyna and the diaspora outside Canada. Estimates of the total number of Poles and Ukrainians in the brigades run as high as 5,000, representing between 12 and 20 percent of the total International Brigade force. Ukrainians were dispersed among all the brigades, but fought mainly with the 13th and 15th. In the 13th International Brigade there was the Taras Shevchenko Company, while in the 15th International Brigade Ukrainian volunteers served in the Canadian Mackenzie-Papineau Battalion (which contained a unit informally named after Maksym *Kryvonis) and in the American Abraham Lincoln Battalion. In December 1937 the Taras Shevchenko Company began publishing its own newspaper, *Borot'ba* (The Struggle), edited by V. Krys.

In addition to participating directly in military operations, Ukrainians in Western Ukraine and the diaspora established several solidarity committees which supported the Republican efforts morally and materially. An insignificant number of Ukrainians also fought on Franco's side.

S. Cipko

Sparrow (*Passer*; Ukrainian: *horobets*). Small, chiefly seed-eating birds with conical bills in the Old World family Ploceidae, the most common being the house sparrow (*P. domesticus*). Sparrows nest in tree hollows, burrows, and buildings and often inhabit populated areas. In Ukraine the tree or field sparrow (*P. montanus*), which nests in the wild, is also common. Sparrows may be useful or harmful in that they consume the seeds of both important crops and noxious weeds.

Spartak (Spartacus). A USSR-wide sports society for white-collar employees in the state commerce, civil aviation, road transportation, culture, and health care sectors. It was founded in 1935 out of sports circles organized in 1925–6 by industrial co-operative artels. In 1960 Spartak was reorganized into a voluntary trade-union sports organization. About 50 forms of sport were cultivated by the society. In Ukraine, Spartak had over 2 million members. The Spartak Kiev women's handball team won 19 USSR and 12 European championships. Thirteen of its members were on the USSR teams that won gold medals at the 1976 and 1980 Olympic Games.

Spartak (Spartacus). An organ of the central committee of the youth wing of the Communist Party of Western Ukraine. It was published in Berlin from November 1926 to May 1928 and distributed illegally in Western Ukraine. It was succeeded in Lviv by the monthly *Molodyi Spartak* (1931–4) and the Polish-language journal *Spartak* (1933).

Spartakiad. The name applied to athletic contests in the USSR. Soviet Ukrainian republican Spartakiads were held from 1923. In 1928 the first USSR-wide Spartakiad took place as a counterpart to the Olympic Games, in which the USSR did not participate at the time. The Ukrainian SSR teams took second place overall and won gold medals in volleyball, handball, gymnastics, shooting, and motorcycling. In 1932–3 separate USSR Spartakiads for trade-union athletes and the Dynamo sports society were introduced. In the 1950s Spartakiads for the Peoples of the USSR, for the Voluntary Society for Assistance to the Army, Air Force, and Navy of the USSR, for schoolchildren, for secondary and postsecondary students, and for the military forces of the Warsaw Pact were added. The Spartakiad of the Peoples of the USSR, in which winners of republican Spartakiads competed, was the largest among them. From 1956 it took place every four years, usually a year or two before each Olympic Games, and its winners were sent as the USSR representatives to the Olympics. In the eighth such Spartakiad, held in 1983, 654 Ukrainian athletes participated and won 102 gold, 92 silver, and 91 bronze individual or team medals.

Spas. IV-3. A village on the Dniester River in Staryi Sambir raion, Lviv oblast. Until the 18th century a monastery, which was said to be the burial place of Lev I Danylovykh, stood there. In the 17th century Spas was the seat of the Orthodox Peremyshl eparchy. Today the ruins of a fortress and Queen Bona's palace remain.

Spaska, Yevheniia [Spas'ka, Jevhenija], b 1 January 1892 in Nizhen, Chernihiv gubernia, d 12 September 1980 in Alma-Ata, Kazakh SSR. Art scholar. A graduate of the Moscow Higher Courses for Women (1914), she studied Ukrainian folk art under D. Shcherbakivsky at the All-Ukrainian Historical Museum in Kiev and headed the handicrafts department at the Kiev Agricultural Museum (1925–6). Then she worked as production manager in the Kiev textile firm Tekstylkhudozhexport (1926–31), which had 6,000 employees. She studied old Chernihiv pottery and wrote *Hanchars'ki kakhli Chernihivshchyny XVIII–XIX st.* (Ceramic Tiles of the Chernihiv Region in the 18th–19th Centuries, 1928) and articles on the potters of Silesia (1929), the ornamentation of Bubnivtsi pottery (1929), P.

Yevheniia Spaska

Lytvynova's life and work (1928), and the porcelain factory of A. Miklashevsky (1959). In the 1930s she was arrested and exiled to Kazakhstan, where she worked in Uralsk, Semipalatinsk, and Alma-Ata and studied the copper pots of the nomads. Her memoirs remain unpublished.

Spasky, Vasyl [Spas'kyj, Vasyl'] (Spassky, Vasilii), b 1831 in Shchigry, Kursk gubernia, Russia, d 30 January 1884 in Kharkiv. Pedagogue and statistician. As an educational worker in Kharkiv he was active in educational organizations, associations, and the first Sunday school for men in Kharkiv. In March 1873 he organized a one-day census of Kharkiv. His major work was *Kharakteristika Kharkova v otnoshenii gramotnosti i prosveshcheniia* (The Characteristics of Kharkiv with Respect to Literacy and Education, 1875).

Special boards (*osoblyvi narady*; Russian: *osobyie soveshchaniia* or OSO). Soviet internal police courts under the *GPU, *NKVD, and *MVD which played a key role from 1928 to 1953 in the system of mass terror. Composed of members of the secret police, they reached their verdicts on the basis of materials provided by the investigative organs and in the absence of the accused. Often the accused did not see the text of the charges before the sentence was put into effect. Until 1936 the boards had the power to sentence political prisoners ('counterrevolutionaries') to a maximum of five years in concentration camp, and to exile 'socially unsafe elements' (kulaks, priests, and criminals). After 1936, and especially in 1937–8 and 1947–8, the boards sentenced vast numbers of people to 10, 15, and 25 years in concentration camp, and even to death.

Under the secret police chief N. Yezhov (see *Yezhov terror), special boards were established at the oblast and raion levels. Three-member committees called troikas, composed of the local NKVD chief, the secretary of the Party committee, and the local militia chief, prepared lists of suspects to be arrested and passed them to the boards for approval. In some cases the troikas simply carried out arrests in the name of the boards without waiting for their approval.

Special Broadcasting Service (SBS). An independent state-funded body established in 1977 to oversee ethnic broadcasting in Australia. Its mandate includes the Ukrainian radio programs produced in Adelaide (since 1975), Canberra (1976–), Newcastle (1978–), Perth (1976–), Melbourne (1975–), and Sydney (1976–). Initially all the broad-

casts were prepared and aired by volunteers, with production costs funded by the Ukrainian community. More recently the Melbourne and Sydney broadcasts have received direct SBS assistance.

Special Detachments (Russian: *osobyie otdely*). Soviet security forces established in 1918 to deal with espionage within the Soviet armed forces, military districts, arms factories, and institutions connected with defense. In wartime (1918–22, 1941–2) they were granted extralegal powers to carry out secret executions and terrorize the population. Recruited among the secret police, they were subordinate to the Cheka, then the GPU, and finally the NKVD. In 1943 the Special Detachments were replaced by the independent counterespionage agency *SMERSH, which combated the Ukrainian Insurgent Army and the OUN underground. They were revived in 1946 and abolished after eight years of operation.

Special schools (*spetsialni shkoly*). Schools for children with physical and mental disabilities, until 1991 under the jurisdiction of the USSR Ministry of Education. There are nine types of special schools organized for students with various disabilities, among them schools for the deaf and schools for the blind. Special schools are boarding schools which offer vocational, incomplete, and complete secondary education. In Ukraine special schools were organized after 1917. In 1927 there were 101 special schools, with 4,600 pupils, and in 1987–8, 406 schools, with a total enrollment of 86,000. In addition, there are special schools for adults with visual and learning disabilities, which offer evening and part-time courses.

Speedwell (*Veronica*; Ukrainian: *veronika*). Small herbs of the family Scrophulariaceae, with small white, purple, or pink blossoms, often cultivated as ornamentals. They grow in Ukraine in the natural state in forests, meadows, and marshes (43 of 300 species). Medicinal veronica (*V. officinalis*) is used as herbal tea and in folk medicine.

Spendiarov, Aleksandr (Spendiarian), b 1 November 1871 in Kakhivka, d 7 May 1928 in Yerevan, Armenia. Armenian composer and conductor. For more than 40 years he lived and worked in the Crimea, where he was exposed to Ukrainian folk music influences. His works include *Crimean Sketches* for orchestra (two cycles: 1903, 1912); *Ukrainian Suite* for chorus and orchestra; the ballad 'Song of the Dnieper Sprite' (text by A. Podolynsky) for solo voice; 'Testament' (text by T. Shevchenko) for male chorus a cappella; and arrangements of Ukrainian folk songs for chorus, duet, and solo voice.

Speransky, Aleksandr [Speranskij], b 25 July 1865 in Moscow, d 26 August 1919 in Kiev. Chemist. A graduate of Moscow University (1886), he did postgraduate work in Leipzig and taught at Moscow University. A professor at Kiev University from 1907, he established the department of physical chemistry there. His research centered on solid solutions and the thermodynamics of concentrated and saturated solutions.

Speransky, Mikhail [Speranskij, Mixail], b 1 May 1863 in Moscow, d 12 April 1938 in Moscow. Russian Slavist, Byzantinist, and archeographer; corresponding member of the Russian Academy of Sciences (from 1902) and full

member of the USSR Academy of Sciences (from 1921). He graduated from Moscow University (PH D, 1899) and taught at the Bezborodko Historical-Philological Institute (1896–1906; see *Nizhen Lyceum) and Moscow University (1907–23). He wrote numerous articles and reviews in the field of medieval East Slavic literature; book-length articles on Slavic apocryphal Gospels (his MA thesis, 1895), manuscripts at the Bezborodko institute (1901), the South Russian (Ukrainian) song (1904), and cryptography in South Slavic and Rus' literary monuments (1929); books on East Slavic translated collections of apothegms (1904) and Slavic relations in Russian literature (2 vols, 1903, 1905); numerous lithographed textbooks on the history of Russian literature (1896–1917); a history of old Rus' literature (1914; 3rd edn 1921); and a university textbook of Rus' oral literature (1917; repr 1969). He also wrote several articles about N. Gogol, one on I. Kotliarevsky's *Eneida* (*Aeneid*, 1902), and one on I. Kulzhynsky (1907).

Sperkach, Valentyn [Sperkač], b 7 November 1939 in Kiev. Film director. He completed the director's course at the Kiev Institute of Theater Arts (1967) and has worked at the Kiev Studio of Chronicle-Documentary Films, where he has produced the propagandistic *Znaiomtes'*, *Radians'ka Ukraïna* (Introducing Soviet Ukraine, 1982), *Zemlia moikh predkiv* (The Land of My Ancestors, 1982), and other films.

Spetsfondy. Special depositories in Soviet libraries and archives consisting of materials confiscated or prohibited by the authorities. They were established in 1931, although in prerevolutionary imperial Russia and Austria-Hungary political, pornographic, anti-Semitic, and anti-Christian literature was also widely censored (see *Censorship).

During the *terror 'provocative' books were taken directly out of stores and state publishing houses. Publications of political émigrés and foreign publications with an ideology contrary to the official line were also banned. Lists of such materials were published by the People's Commissariat of Education (Narkomos, only until the Second World War) and the government censorship agency *Glavlit. The names of certain prolific authors were often followed by the directive 'all titles, for all years, in all languages.'

Spetsfondy were established at research libraries, particularly those of scientific institutes, and in museums and state archives. A maximum of two copies of each banned publication were preserved, and the rest were destroyed. Libraries with unrestricted public access were forbidden to hold the works, which were thus effectively taken completely out of circulation.

In Ukraine in the 1930s, all endeavors in Ukrainian studies that were at variance with Party directives were prohibited, as were all forms of art that departed from officially sanctioned *socialist realism and some works of the Ukrainian canon, such as Lesia Ukrainka's *Boiarynia* (Noblewoman) and T. Shevchenko's works critical of B. Khmelnytsky. In the postwar period there was no consistent formula for the proscription of Russian or Ukrainian works, and censors were largely simple functionaries adhering to the latest inclinations of the Party. Numerous lists were compiled chaotically by various institutions and agencies, such as the Book Chamber of the Ukrainian SSR. The materials held in *spetsfondy* could be accessed only by

Party officials and scholars at postsecondary institutions, scientific institutes, and museums, who had to present a letter, signed by the president of the institution they represented, in which the topic of their research was outlined. *Libraries did not make available catalogs of their *spetsfond* holdings to the general readership.

In 1989, as a result of Perestroika, substantial portions of the *spetsfondy* were transferred back to the open collections of libraries, and émigré publications were also made accessible to readers. But literature deemed to be subversive, ethnically, racially, or nationally inflammatory (particularly anti-Semitic items), pornography, and certain works by authors such as V. Vynnychenko and M. Khvylovy continued to be banned and collected. With the dissolution of the USSR, *spetsfondy* in newly independent Ukraine have been merged with other library holdings.

S. Bilokin

Sphragistics (from the Greek *sphragis* 'seal'), also known as sigillography (from the Latin *sigillum*). A scholarly discipline with three branches, the art of making seals, the law of seals (legal norms in the use of seals), and the study of seals. Seals first appeared in the early civilizations (Egypt, Babylon) and were adopted by the Greeks and Romans. The use of seals was brought into Ukraine by the Scythians, the Antes, the Goths, and others. The law of seals (initially customary, then state, law) was codified in the early stages of the Kievan Rus' state. The study of seals as an academic discipline was initiated in the 13th century in Germany and in the mid-18th century in Ukraine.

Ukrainian seal making was categorized (as in Western Europe) according to the various materials in which impressions were made, such as metals (gold, silver, lead, etc) and various waxes. The use of seals engendered titles for persons whose duty it was to affix them, such as the *pechatnyk* (head of the prince's chancellery) during the Princely era, or the general chancellor during the Hetmanate. Ukrainian seals had their own national style (the octagonal seal was used almost exclusively in Ukraine) and were of high artistic quality. Early craftsmen included D. Galakhovsky, I. Shchyrsky, and I. Myhura; the best-known modern craftsmen were H. *Narbut and L. *Terletsky.

There were three basic types of state seal in the Kievan Rus' state. The oldest was the archaic or Old Rus' seal, which was used until the 10th century. Its distinguishing feature was the dynastic mark of the Kievan rulers, the *trident or bident. The exact shape and characteristics of the archaic seal depended on the station of the bearer. A two-sided seal belonging to Sviatoslav I Ihorevych is among the oldest surviving examples of the art; it has a bident on one side and a rosette on the other.

After the adoption of Christianity by the Kievan Rus' state the so-called Greco-Rus' seal was used until the late 11th century. The face bore the likeness of the saint after whom the grand prince was named, and the reverse was marked with the Greek legend God Help Your Servant (name of the bearer of the seal), Archon of Rus'. The seal used by Yaroslav the Wise, with St George on the face and the legend God Help Your Servant Georgos, Archon of Rus', was of the Greco-Rus' type.

From the left: the seals of the Kievan grand princes Sviatoslav I Ihorevych, Iziaslav Volodymyrovych, and Iziaslav Yaroslavych

In the 12th century a new form of seal emerged that was used until the late 13th or early 14th century. Its five types were as follows: (1) face with the likeness of the saint namesake of the ruler, reverse with a trident-bident; (2) face with the likeness of the saint namesake of the ruler, reverse with the likeness of the saint namesake of the ruler's father or overlord; (3) face with the likeness of the saint namesake of the ruler, reverse with the likeness of Christ; (4) face with the likeness of the saint namesake of the ruler, reverse with the Church Slavonic initials 'IC XC'; (5) face with the likeness of one of various persons, reverse with a legend in Greek or Church Slavonic and some vestigial features of the older Greco-Rus' seal. An example of the last is the seal of Volodymyr Monomakh, the face of which has a likeness of St Basil, and the reverse, the Greek legend Seal of Basileus, the Most Venerable Archon of Rus' Monomakh.

The seal of Prince Yuri I Lvovych of Galicia

Seals underwent a fundamental change beginning in the 13th century in the Principality of Galicia-Volhynia. They became heavily influenced by Western European heraldic and Gothic themes, and their legends were written in Latin. The new type of seal was subsequently adopted by the Lithuanian-Ruthenian state. The face of the seal of Yuri I Lvovych bears the likeness of the king seated on a throne and the annular legend (*sigillum*) *Domini Georgi Regis Rusie*. The reverse shows a likeness of a knight cavalryman who carries a shield on his left shoulder and a standard in his right hand. The shield is marked with the dynastic symbol of a lion, which is circumscribed by the legend *S. Domini Georgi Ducis Ladimerie*. Prince Władysław Opolczyk ruled Galicia as a vice-regent of the Hungarian king Louis I; the face of his seal bears a seated monarch, holding a sword in his right hand, positioned

between two coats of arms (Silesia and Rus'), circumscribed by a Latin legend.

The seals of the Grand Duchy of Lithuania bore a likeness of the seated ruler or a Lithuanian-Ruthenian *pohon'* (a heraldic horseman, with a sword in the right hand and a shield with an Orthodox cross on the left shoulder), surrounded by the heraldic arms of the larger constituent principalities (Lithuania, Samogitia, Volhynia, Kiev, Belarus). It also showed the title of the prince as a legend.

Beginning in 1648 new military, state, and national seals were introduced for the hetmans. They bore the likeness of a Cossack musketeer, a practice adopted from Zaporozhian Host seals, starting with Hetman B. Khmelnytsky's seals. These showed the Middle Ukrainian annular inscription Seal of the Army of His Royal Grace of the Zaporizhia. Hetman I. Vyhovsky's seal bore his coat of arms, his name, and the inscription Great Hetman of the Principality of Rus' and Starosta of Chyhyryn. On Hetman I. Mazepa's seal the traditional likeness of a Cossack warrior was circumscribed by the inscription Seal of the Little Russian Army of His Royal Illustrious Majesty of the Zaporizhia. The inscription on P. Orlyk's seal, Seal of Little Russia and of the Glorious Zaporozhian Army, reflected the schism between Ukraine and Russia. Hetman K. Rozumovsky reverted to the traditional form of seal.

The seal of Hetman Ivan Mazepa

The seal of the Zaporozhian Cossack Host

In 1766, after the abolition of the Hetmanate, a new seal was issued by the Little Russian Collegium, depicting the imperial eagle with a five-field shield on its breast (representing the five Ukrainian principalities of Kiev, Chernihiv, Pereiaslav, Novhorod-Siverskyi, and Starodub). Less important documents were frequently stamped with personal seals which bore family or personal coats of arms. In the 19th century, emblems of Ukraine's former statehood appeared on the seals of the occupying foreign monarchies. They included the archangel of Kiev principality on the seal of the Russian Empire and the coats of arms of Galicia and Lodomeria (later also the seal of Bukovyna) on the seal of Austria-Hungary.

The first seals of the independent Ukrainian state were adopted by the Ukrainian Central Rada on 22 March 1918. V. *Krychevsky designed both the Great and the Lesser seals. The Great Seal bore a trident (the heraldic emblem of the UNR) framed by a laurel ornament. The Lesser Seal showed a trident framed by a rhomboid ornament. Both seals had the annular Ukrainian inscription *Ukrains'ka Narodnia Respublika* (Ukrainian National Republic), with three rings dividing the words. Both seals had elements of Ukrainian folk art, but their design was very different

The great seal of the 1918 Ukrainian State

The oldest municipal seal of Lviv

from that of the traditional seals of ancient Ukrainian states and those of European states.

The seal of the Hetman government bore a traditional likeness of a Cossack warrior, framed by a floral ornament, placed under a trident, and circumscribed by the legend *Ukrains'ka Derzhava* (Ukrainian State). It adhered to heraldic conventions of European sphragistics, and its artistic style was closely modeled on 17th- and 18th-century Ukrainian seals.

The seal of the Directory of the UNR, used by S. Petliura, was fairly modest, consisting of a trident and the Ukrainian initials 'UNR' in annular arrangement along with the legend *Holovnyi Otaman Respublikans'kykh Ukrains'kykh Zbroinykh Syl* (Supreme Otaman of the Ukrainian Republican Armed Forces), the title of the head of state. Other seals were adopted by bodies that had jurisdiction over regions of Ukraine, including the Western Ukrainian National Republic, the Kuban, the Crimea, the Galician SSR (briefly), and Carpatho-Ukraine (in 1939). With the exception of that of the Ukrainian SSR they also all bore regional coats of arms.

The use of the seal of the Ukrainian SSR (which bore the republic's coat of arms) was established by the Central Executive Committee (CEC) of the USSR on 17 June 1925. It was used only by higher central and local government institutions and some of their autonomous departments. Lesser state agencies used seals without the arms, and their inscriptions indicated their jurisdiction. Community, co-operative, and other organizations followed suit in their use of seals. The state seal of the Ukrainian SSR underwent numerous changes, as did its coat of arms. Initially it showed a crossed hammer and sickle, illuminated by the sun's rays and framed by sheaves of wheat, with the legend *Proletari vsikh kraïn iednaitesia* (Proletarians of All Countries Unite) and the name of the republic in Ukrainian and Russian (as adopted by the CEC of the Ukrainian SSR on 14 March 1919). When the republic's new constitution was ratified in 1929, the seal was changed to have only a Ukrainian legend, and the Ukrainian initials 'USRR' were placed above the hammer and sickle. The adoption of yet another constitution on 30 January 1937 meant replacement of the initials USRR with USRS. A law passed on 5 June 1950 placed a five-point star above the coat of arms, replaced the initials with *Ukrains'ka RSR*, and restored the bilingual legend. The Moldavian ASSR, part of the Ukrainian SSR until 1941, had the Ukrainian seal with a bilingual legend in Ukrainian and Moldavian. In 1992 Ukraine, once again independent, declared the trident its seal.

Territorial seals. These were official marks used in the

appanage principalities and *volosti* of the Lithuanian principality; Ukrainian voivodeships and their subdivisions in the Polish kingdom; the regiments and palankas of the Cossack Hetmanate and the Zaporizhia; vicegerencies, gubernias, and other subdivisions of the Russian Empire; the crown territories of the Austro-Hungarian Empire; and all *zemstvos* until 1918.

The seals of the appanage principalities of Kievan Rus' were identical to the state seal. The oldest such seal to have been preserved (11th century) belonged to Iziaslav Volodymyrovych. The face shows a trident framed by a legend, and the reverse has a legend only. The seals of princes of the Lithuanian states are of a transitional stage in Ukrainian territorial sphragistics.

In the Polish kingdom all seals of voivodeships, territories, and districts bore the coat of arms framed by a Latin inscription (eg, Seal of Rus' Voivodeship). The seal of the Zaporizhia (mid-16th century) had a likeness of a Cossack musketeer with the inscription, in Middle Ukrainian, Seal of the Zaporozhian Army. The oldest extant examples date from 1576, 1596, and 1608.

In 1648 seals for the regiments and companies of the Hetmanate were introduced. They bore the family or personal coat of arms of their commanding officer and an appropriate legend. The Zaporizhia, as an autonomous constituent of the Cossack state, had three types of its own seals, the territorial army seal, palanka seals, and kurin seals. The highest seal of the Zaporizhia had to be changed after 1648, when it was adopted as the Great Seal of the Hetmanate. A spear was added, thrust into the ground before the musketeer, and the annular inscription, in Middle Ukrainian, Seal of the Glorious Zaporozhian Host. In 1763 the words 'of Little Russia' and 'Imperial Majesty' were added.

*Palanka seals showed the likeness of an animal (lion, horse, eagle, deer, etc) alongside the coat of arms of the regiment, and an appropriate legend. The seal of the Samara palanka, for example, bore a lion, the regimental arms, and the inscription Regimental Seal of the Samara Palanka. The seal of the Kodak palanka had a likeness of a horse, flanked by the regimental seal and the initials 'P.P.K.P.'

The seals of Zaporozhian kurins had various figures and inscriptions and followed no set pattern. The last form of Cossack territorial seal was the seal for Cossack armies established in the late 18th and early 19th centuries, namely the Boh, Black Sea, Budzhak, Kuban, and other armies.

Ukrainian territorial seals under the Russian Empire (for vicegerencies, gubernias, oblasts, etc) and Austria-Hungary (the crownlands of Galicia, Lodomeria, Bukovyna, Transcarpathia, etc) were heraldic, and their inscriptions were in foreign languages.

Local seals. Seals of cities, towns, and villages had many forms. City seals were already in use in the mid-13th century in Western Ukraine. The oldest extant seal is from Volodymyr-Volynskiy (late 13th century), affixed to a document from 1324. It has a likeness of St George, the patron saint of the city, and a Latin legend identifying the seal. At the beginning of the 14th century seals began appearing in Lviv, Peremyshl, and other Galician and some Volhynian cities.

The subsequent rapid development of city seals was influenced by the establishment of autonomous German ur-

ban communities. All of these seals bear the city's coat of arms (designed with considerable thematic imagination and variety) and a Latin or early Middle Ukrainian annular inscription (some in the contemporary Western Ukrainian dialect). Larger cities, such as Kiev, had a lesser and a greater seal. During the Hetmanate in the 17th and 18th centuries, seals were dominated by Cossack symbols (maces, Cossacks, weaponry, various types of crosses, heavenly lights, etc).

Rural communities in Ukraine had various seals the origins of which are difficult to trace. They have not been adequately studied, and most of them have been lost. Inscriptions on such seals were in Ukrainian, and they were adorned with emblems of everyday life, such as trees, animals, farm implements (scythes, sickles, rakes, hoes, etc), fruits, trees, and farm buildings. They were often of high artistic quality, and their style was characteristically Ukrainian.

The Russian Empire's ascendancy arrested the development of Ukrainian local seals. Established traditional seals were replaced by new ones that had no historical relevance, on which the dominant image was the imperial eagle (eg, on the seal of Poltava). The seals of newly established cities had mundane designs, and rarely did they have historical themes. Cossack sphragistic traditions were maintained in the city seals of the Kuban. The Austrian authorities rarely made changes to city seals, and then only minor ones to adapt them to Austrian forms.

In 1917–20 the independent Ukrainian government did not have sufficient time to address the issue of city seals, and after the Bolsheviks took power city seals disappeared completely. The use of city seals continued in Western Ukraine in the 1920s and 1930s but was discontinued in 1939. In the postwar Soviet period a new form of sphragistics and *heraldry emerged, most of it far removed from Ukrainian and Western European traditions. A new seal for Kiev, for example, was created with a maple leaf (allegedly the floral emblem of the city) and a drawn bow (an imperfect reference to the crossbow that once appeared on the city's seal).

Seals of lineage. In the early years of the Kiev principality leading families used their own seals or amulets, marked by emblems or runes, to denote their ancestral or personal holdings. The seals were of various provenance, including Slavic, Greek, Gothic, and Oriental sources. After the adoption of Christianity as the official religion a cross or a line perpendicular to the design was usually added. The designs of these seals of lineage provide the oldest images preserved on Rus' seals. Under the Galician-Volhynian state they became heraldic.

Western European heraldry appeared in Ukrainian territories at the beginning of the 14th century. Leading families began displaying their emblems on their coats of arms, which had to be confirmed by monarchs and grand princes. The practice led to the creation of heraldic seals. In the Middle Ages they were widely used, particularly by princesses, boyars, members of the prince's host, merchants, and other classes. The peasantry also used emblems (eg, beekeepers for the marking of their hives), but their emblems did not come to be used as seals. The revival of the Ukrainian state in the 17th century resulted in further developments in family and personal seals. They were used by the nobility, Cossack officers, the clergy, burghers, and Cossacks of lower rank. Families and indi-

viduals who did not have coats of arms created them in styles of their own choosing. Cossack traditions generated a new set of images used in seals, including those of weapons (swords, sabers, arrows, bows), heavenly bodies (the sun, half-moons, stars), and various crosses, hearts, towers, and so on. The seals provided the basis for the coats of arms of the descendants of Cossack officers and the Left-Bank nobility. In some cases Cossack officers ignored the emblems of their ancestors and created their own, based on Cossack motifs. V. Dunin-Borkovsky, a general quartermaster, for example, replaced his family emblem of a swan with a saber and cross. Ukrainian octagonal coats of arms emerged in the seals of that time, and initials denoting the bearer's name and status were also added.

In the 19th century the creation of Ukrainian family seals came to an end, since only the Russian or Austro-Hungarian imperial government conferred coats of arms and titles. Ukrainian family seals were reduced to two formats, a coat of arms without initials, or initials under the crown of a knight of the nobility, a baron, or a count. They were small, so-called signet or ring seals that served to seal letters and other missives. In the 20th century seals of lineage fell into complete disuse.

Church seals. By the mid-20th century 18 impressions of the seal of the metropolitan of Kiev had been found. The oldest belonged to Metropolitan Theopemptos, who arrived in Kiev in 1037. On the face is a likeness of John the Baptist, and on the reverse the legend, in Greek, God Help Theopemptos, the Metropolitan of Rus'. Two other extant impressions from the 11th century belonged to the metropolitans Yefrem and Georgios.

In the 12th century the standard face image of the seal of the metropolitan showed Mary with the Holy Child. The legend on the reverse went through various minor variations. Exceptions to the standard format included the seal of Nicephorus II (from 1182), which bore a legend on both sides that read O Christ, Watch Over Me, the Archpastor of All of Rus', and Keep Me in Your Thoughts, and that of Ioan II (1189–1190), which bore a likeness of St John Chrysostom and the legend Watch over Your Servant Ioan, Metropolitan of Rus'.

The seals of bishops were similar. Three impressions of the seal of Cosma, the bishop of Halych (from 1157), are extant. The face shows the traditional likeness of Mary, and the verso bears the legend Mother of God, Watch over Me, Cosma of Halych. Seals of old Ukrainian monasteries usually had only appropriate inscriptions and no images.

As heraldry developed in Ukraine in the 14th century, church seals increasingly began using heraldic images. The seals of Ukrainian clerical hierarchs of the 16th century were single-sided and had annular inscriptions. They usually had two sections for images. One section bore a likeness of Christ, Mary, a saint, or other religious figure; the other showed the family emblems of the hierarch and an appropriate symbol of his office (miter, crozier, or cross). The heraldic elements gradually became more prominent, as did elements of Western European church heraldry, such as ecclesiastical headgear, emblems, or Latin annular inscriptions. The lower orders of clergy used heraldic seals almost exclusively.

In the 15th century the seals of monasteries, monastic orders, cathedral assemblies, brotherhoods, and parishes became increasingly sophisticated and of high artistic quality. The seal of the Lviv Dormition Brotherhood bore

a likeness of its church's bell tower (16th century). The seal of Kiev metropolity and of the assembly of the St Sophia Cathedral in Kiev showed the Kievan Cave Monastery and a symbolic representation of God's wisdom (17th century). The Mezhyhiria Transfiguration Monastery's seal bore a representation of a valley, a river, and mountains (18th century). Other parishes adopted images of three-domed churches or likenesses of their patron saints. In the 20th century Ukrainian Catholic hierarchs adopted a new seal (influenced by Western European churches) that bears a two-field heraldic shield. The right field usually shows the emblem of the eparchy or exarchate (the unchanging symbol of the particular position); the left field shows the family or personal emblem of the person holding the post, accompanied by the appropriate symbol for the position.

Governmental and institutional seals. Seals were already being used by diplomatic, trade, boyar, and military officials in the 10th century, under Ihor I and Sviatoslav I Ihorevych. The oldest that have been preserved belonged to Ratybor, a vice-regent of Tmutorokan and *tysiatskyi* of Kiev in the late 11th century (the face with the likeness of St Clement, the Roman Pope [Ratybor was his Christian name], and the verso with the legend From Ratybor). The legend on the seal used by D. Dedko, vice-regent of Halych in the early 14th century, was similar to those used in Western Europe at the time (Guardian and Overseer of Rus' Lands). Seals designed for municipal governments and institutions underwent accelerated development under the Hetman state in the 17th and 18th centuries (eg, seals of the General Chancellery, the General Court, and regimental and company administrations). One of the best examples of institutional seals of the era belonged to the Kievan Mohyla Academy. It had an annular Latin inscription (*Kiioviensis Sigillum Academia*) and an image of the academy in sunlight and cloud. After the abolition of the Hetmanate this Ukrainian sphragistical style was lost as seals became copies of the Russian and Austro-Hungarian imperial models. In the mid-19th century it was revived by various community organizations in Galicia and Bukovyna, and in 1917–18 there was a brief efflorescence in the design of governmental seals, such as postal seals and the *postage stamps of the government of the Western Ukrainian National Republic (in the form of a trident) and of the military. After the Bolshevik takeover this form of seal was maintained only in Galician organizations and, partially, in émigré circles. In the first decades after the Second World War a number of émigré Ukrainian graphic artists produced seals in traditional styles for Ukrainian community institutions.

The study of seals. Ukrainian sphragistics was one of the disciplines Hetman K. Rozumovsky planned to have taught at his university in Baturyn (along with heraldry, diplomacy, and related subjects), but the university was never established. Academic study in sphragistics did not begin until the mid-19th century. Scholars and hobbyists in the field have included K. Antypovych, B. Barvinsky, K. Bolsunovsky, M. Bytynsky, M. Hrushevsky, P. Klymenko, P. Klymkevych, I. Krypiakevych, O. Lazarevsky, Ye. Liutsenko, I. Lutsky, V. Modzalevsky, H. Myloradovych, H. Narbut, Ya. Pasternak, V. Prokopovych, M. Petrov, V. Seniutovych-Berezhny, M. and M. Slabchenko, A. Storozhenko, and P. Yefymenko (Sr), as well as the Russians A. Barsukov, E. Kamentseva, A. Lappo-Danilevsky, N.

Likhachev, V. Lukomsky, B. Rybakov, and V. Yanin, the Poles A. Darowski-Weryha, M. Gumowski, F. Piekosiński, W. Semkowicz, and W. Wittig, the German W. Ewald, and the Rumanian N. Banescu. In Soviet Ukraine in the 1970s, D. Blifeld, V. Fomenko, V. Havrylenko, O. Markevych, V. Strelsky, and others published related works.

Artifacts of Ukrainian sphragistics are held in various archives and museums of Ukraine and Russia, particularly the State Hermitage in St Petersburg, state museums of history in Moscow and Kiev, the ANU Institute of Archeology, the National Museum and the ANU Institute of Social Sciences in Lviv, and in the hands of private collectors. Other Ukrainian sphragistic collections are found in Belarus, France, Germany, Greece, Hungary, Latvia, Lithuania, Poland, Turkey, and the United States.

R. Klymkevych

Spilka, A. The collective pseudonym for Spilka Adeska (Odessa Association), a group of compilers of a Russian-Ukrainian dictionary published in Lviv (1893–1900) under the direction of M. Umanets (M. Komar). Members of the group included T. Desiatyn-Lukianiv, T. Zinkivsky, O. Kosach (O. Pchilka), V. Nazarevsky, M. Starytsky, and K. Ukhach-Okhorovych.

Spilka, V. The collective pseudonym of the compilers (Yu. *Kobylansky, L. *Kohut, Z. *Kuzelia, V. *Simovych, and Ye. Tsapler) who, together with V. *Kmitsykevych, published a German-Ukrainian dictionary in Chernivtsi in 1912.

Spilka, Ukrainian Social Democratic (Ukrainska sotsial-demokratychna spilka). A party formed by M. *Melenevsky and other orthodox Marxists who left the *Revolutionary Ukrainian party (RUP) in December 1904.

They rejected as bourgeois and nationalist the program of the RUP majority. They saw as their primary goal social revolution and fusion with the Russian Social Democratic Workers' party (RSDWP) as the unitary, centralized workers' party of all nationalities in the Russian Empire. In January 1905 the Spilka (the Ukrainian word for 'association' or 'union') was constituted as the autonomous, territorial section in Ukraine of the *Menshevik wing of the RSDWP to do political work on its behalf among the Ukrainian-speaking rural proletariat. Because the Spilka worked closely with the Russian and Jewish Mensheviks and the Jewish Workers' *Bund, in 1905–7 it built a mass-based organization in Ukraine's villages and small towns that was stronger and had more influence than RUP and its successor, the *Ukrainian Social Democratic Workers' party (USDWP). The Spilka had within its ranks not only nationally conscious Ukrainians (eg, H. Dovzhenko, M. Halahan, P. Kanivets, M. Korenetsky, P. Krat, V. Mazurenko, Melenevsky, O. Skoropys-Yoltukhovsky, H. and M. Tkachenko) and nationally indifferent ones (P. Tuchapsky), but also ethnic Ukrainians who were hostile to the Ukrainian national movement (I. Kyriienko) and non-Ukrainians (Yu. Larin, V. Perekrestov, A. Podolsky [Hoikhberg], R. Rabinovich, A. Rish, L. Slutsky, S. Sokolov, Y. Soroker, S. Zavadsky).

During the Revolution of 1905–6 the Spilka's 3,000 to 7,000 members organized and led many strikes and other disturbances in Chernihiv, Kiev, Kherson, Podilia, Poltava, and Volhynia gubernias. At the same time, through its organ **Pravda* (1905) and its propagandistic brochures in Ukrainian and Russian, the Spilka waged a fierce ideological struggle against the USDWP and thus gained the support of many former RUP cells. From December 1905 the Spilka published *Pravda* and most of its literature in Russian. The Spilka's gains were the greatest during the elections to the First and Second Russian state dumas, and in the Second Duma it had 14 delegates (the USDWP had 1). At the Fifth RSDWP Congress in London in May 1907, the 10 Spilka delegates constituted 25 percent of all delegates from Ukraine.

During the tsarist reaction of 1907, mass arrests brought the Spilka to nearly total collapse, and several of its leaders (eg, Rabinovich, Rish, Soroker, H. Tkachenko) were exiled to Siberia. Thereafter the Spilka had little impact in Ukraine. In 1908 Melenevsky moved the Spilka center from Kiev abroad and formed small fraternal groups in Lviv, Vienna, Paris, Geneva, and Zurich linked by L. Trotsky's Menshevik paper, *Pravda* (1908–12), published in Lviv (nos 1–4 in Ukrainian) and then Vienna (in Russian). Because its leaders increasingly compromised with the centralist, Russian chauvinist tendencies within the RSDWP at a time when national consciousness was on the rise within the Ukrainian peasantry, many of its remaining Ukrainian members left the party and joined the USDWP, and the 'internationalists' joined the RSDWP or the Bund. The Spilka held its last conference in 1909, and its last document, an appeal by Melenevsky, appeared in 1912. By 1913 the Spilka was defunct.

R. Senkus

Spinach (*Spinacia oleracea*; Ukrainian: *shpinat*, *shpynat*). A hardy, leafy annual vegetable of the goosefoot family Chenopodiaceae that grows wild in Central Asia and in Transcaucasia. It contains high levels of iron, calcium, and iodine, vitamins A, B complex, and C, proteins, and fat. In Ukraine garden spinach grows in a cool climate on rich soil. Sowing can be repeated several times a summer. Spinach is consumed fresh or cooked and is preserved frozen or canned.

Spirea (*Spiraea*; Ukrainian: *tavolha*). Deciduous shrubs of the family Rosaceae, popularly cultivated for their attractive white, pink, or red flowers. In Ukraine seven species of spirea grow as underbrush on forest outskirts, on the slopes of ravines, in brushwood, and on steppes; they form dense ground covers. Ten other species are used as decorative hedges and ornamental borders in gardens and parks.

Spiro, Petr, b 1844 in Moscow, d 1894. Physiologist. A graduate of Moscow University (1867), he worked at Odessa University (from 1871), where he obtained a medical degree (1874) and became a professor (from 1885). He researched the physiology of respiration, digestion, and hypnosis and participated in the work of the first experimental psychology laboratory in the Russian Empire (est 1882 in Odessa).

Spiš (German: Zips, Hungarian: Szepes). A region of northeastern Slovakia, located in the central Carpathian and the western Beskyd mountains. It includes the basins of the upper Poprad and Hornád rivers, the Spišská Magura massif, a small part of the Tatra Mountains, and the Slovenské Rudohorie Mountains. It covers an area of approx 3,700 sq km, with a population (1965) of 255,000. It constitutes part of the historical *Prešov region of Ukrainian settlement. The territory was settled fairly late, initially by Slovaks in the south, Poles in the north, and Germans (13th century). In 1270 the German settlers formed a union of 24 Spiš towns. Of those, the Hungarian king Sigismund ceded 13 to Poland in 1412 (which Poland held until the 18th century). Otherwise, the region was controlled by Hungary and administered as Szepes komitat until 1919. It now belongs to Slovakia and Poland. In the 14th and 15th centuries Ukrainians (Lemkos) began settling there; they now live in the northern and eastern sections of the region, in the Stará L'ubovňa district. They are divided between a compact settlement of approx 230 sq km and a number of small pockets (the westernmost Ukrainian outpost being Osturnia). There are about 15,000 Ukrainians living in the Spiš area.

Spiš, Treaty of. An agreement concluded in 1214 between the Hungarian king Andrew II and the Polish prince Leszek the White to divide the principality of Prince Roman Mstyslavych of Halych upon that prince's death. Andrew's son, Kálmán, who was married to Leszek's daughter, Salome, was to assume the throne of Halych, and Leszek was to annex western Galicia, including Peremyshl. Soon after the plan was implemented, the Halych boyars overthrew their new master and called Mstyslav Mstyslavych to the throne.

Spišská Magura. A mountain massif in the western Beskyds in Czechoslovakia, on the border of Ukrainian and Slovak ethnic territory. The massif consists of lightly folded flysch formations with ridges reaching 1,156 m. The ridges are mostly covered with woods and meadows and are sparsely populated.

Spivak, Borys, b 12 March 1925 in Shpola (now in Cherkasy oblast), d 4 June 1971. Historian. He graduated in history from Odessa University (1951) and taught at Uzhhorod University (from 1954, as professor from 1966). He wrote *Narysy istorii revoliutsiinoi borot'by trudiashchykh Zakarpattia 1930–1945 rr.* (Essays on the History of the Revolutionary Struggle of the Workers of Transcarpathia in 1930–45, 1961), *Storinky istorii* (The Pages of History, 1962), and *Revoliutsiinyi rukh na Zakarpatti v 1924–1929 rokakh* (The Revolutionary Movement in Transcarpathia in 1924–9, 1964).

Spivak, Eliahu (Illia), b 22 October 1890 in Vasylykiv, Kiev gubernia, d 12 August 1952 in Moscow. Jewish-Ukrainian philologist; AN URSS (now ANU) corresponding member from 1939. A graduate of the Hlukhiv Teachers' Institute (1919), he taught in Yiddish secondary schools in Kiev, Kharkiv, and Odessa in the 1920s; at the Odessa Institute of People's Education (1927–30); and at the Kiev Institute of Professional Education (1930–2). In the early 1930s he was head of the philological section of the VUAN *Institute of Jewish Culture in Kiev and then director of the ANU Cabinet of Jewish Culture (1936–48). He was arrested during the Zhdanov purge of Jewish intellectuals in 1949 and condemned to death with 25 other Yiddish cultural figures by a secret Military Collegium tribunal. He was executed in Lubianka Prison. Spivak wrote a Yiddish textbook (1923) and articles on the history of the Yiddish language, on Yiddish lexicology and lexicography, and on the language and style of Sholom Aleichem and Mendele Mocher Seforim. In 1935 he initiated the academic Russian-Yiddish dictionary project. The manuscript of the dictionary was confiscated after his arrest, and was not published until 1984, in Moscow.

Spivomovky. Short verses generally based on folk anecdotes, jokes, sayings, or tales. They can be found in literary works, such as L. Borovykovsky's and Ye. Hrebinka's fables. S. Rudansky wrote three collections of *spivomovky* (1851–60), and I. Franko wrote a cycle titled *Novi spivomovky* (New *Spivomovky*).

Spokii (Tranquility). An art circle established in 1927 by Ukrainian students at the Warsaw Academy of Arts. Among its founding members were P. Andrusiv, V. Vaskivsky, N. Khasevych, and P. *Mehyk (its president). By the time it was dissolved in 1939, it had organized 13 exhibitions, including two traveling exhibitions in Volhynia, and published albums of woodcuts (1936) and N. Khasevych's bookplates (1939) and 13 catalogues of its shows. Its members also participated in the exhibitions of the Association of Independent Ukrainian Artists in Lviv and the exhibitions of Ukrainian graphic art in Berlin and Prague. In 1939 Spokii had 33 members.

Spolitakevych, Volodymyr [Spolitakevyč], b 6 January 1882 in Vytktiv Stryi, Radekhiv county, Galicia, d 6 December 1932 in Yonkers, New York. Greek Catholic priest and civic activist. After being ordained (1906) he came to the United States (1907) and served in several parishes in Pennsylvania and New York. In 1914 he was elected chairman of the education committee of the Ukrainian National Association. He also served as president of the United Ukrainian Organizations in America in 1924–6.

Spomahateli. Wealthy elect Cossacks in 18th-century Left-Bank Ukraine who hired and equipped poor Cossacks to perform their military duty. The term was also applied to Cossacks who could not serve because of old age, illness, or a handicap. Such Cossacks were excused from service but were required to pay part of the cost of equipping a substitute.

Sport (Sport). A monthly sports journal published in Kiev in 1936–41 by the Communist Youth League of Ukraine and the Committee on Physical Culture and Sports of the Council of People's Commissars of the Ukrainian SSR. *Sport* succeeded the Russian-language *Vestnik fizicheskoi kul'tury* (Kharkiv, 1922–9) and Ukrainian-language *Visnyk fizychnoi kul'tury* (Kharkiv, 1929–30) and *Fizkul'turnyk Ukraïny* (Kharkiv, 1931–4; Kiev, 1934–6).

Sportfishing (*rybalskyi sport*). The first fishing clubs were established in the larger towns of Ukraine before the 1917 Revolution. Under Soviet rule fishermen belonged to the Ukrainian Hunting and Fishing Society (est 1921); in 1984 it had over 500,000 members in its 25 oblast and 514 raion collectives. Sportfishing in the USSR as a whole was under the control of the All-Union Federation of Sportfishing in Moscow.

Sports. Organized athletic games and competitions. In medieval Ukraine, certain sporting activities were engaged in as part of military training or religious ceremonies, or for entertainment. The chronicles mention that the upper classes engaged in bear hunting; capturing wild horses; fighting; and games involving running, dancing, singing, and wrestling. During funeral feasts duels and primitive boxing matches took place.

Little is known about competitions among the Cossacks, but their reputation for marksmanship, swordsmanship, and horsemanship suggests that they trained to develop their skills and physical endurance.

Western Ukraine. Sports in the modern sense were introduced in Ukraine in the latter half of the 19th century from Western Europe. The first organized Ukrainian competitions occurred only after the founding of the *Sokil (1894) and *Sich (1900) physical education societies in Galicia. The first sports circles sprang up at Ukrainian gymnasiums. In 1907–8 a soccer team was organized by I. *Bobersky at the Ukrainian Academic Gymnasium in Lviv. By 1911 its membership and activities had expanded so much that the Ukraina sports club was established. The club organized soccer matches with Polish, Czech, Hungarian, and German teams; track-and-field meets; and wrestling, tennis, and cycling competitions. So-called Zaporozhian Games were held in Lviv in 1911 and 1914. In Peremyshl the Sianova Chaika club was organized by

local gymnasium teachers in 1912. Another club was organized in Ternopil.

After the hiatus of the First World War, the Sokil, Sich, and Ukraina societies resumed their sports activities, and new sports clubs were formed. In Lviv, the Carpathian Ski Club, the Lviv Tennis Club, the Ukrainian Student Sports Club, *Plai, Bohun, Burevii, Chornomortsi, Meta, Tryzub, Strila, and the Tur hunting society appeared; in Peremyshl, Sian, Berkut, Spartanky, and Sianova Chaika; in Stanyslaviv, the Ukrainian Sports Club and Prolom; in Sambir, Dnister; in Stryi, Skala; in Ternopil, Podilia; and in Drohobych, Vatra. The Orly Catholic youth association and the Kameniar Union of Ukrainian Progressive Youth formed sports sections within their organizations. About a dozen clubs competed in the Zaporozhian Games, which were revived by the central Sokil branch in 1923 and held annually in either Lviv or Peremyshl. Outstanding female athletes were O. Sekela and M. Husar from Berkut, and O. Kobziar and N. Nyzhankivska from Sokil in Lviv; outstanding male athletes were R. Shukhevych, Yu. Hnateiko, R. Rak, and V. Kobziar from Lviv, and Berkut's T. Kozak, M. Romanets, I. Medvid, and Yu. Sementiuk. The most popular sport was soccer; the Ukraina, Prolom, Podilia, Dnister, and Skala clubs had the best teams. In 1925 the *Ukrainian Sports Union was founded in Lviv to co-ordinate the sports activities of the various societies and clubs. The rapid rise in the popularity of soccer led clubs such as Ukraina, Prolom, and Sian to join the Polish Soccer Association. Attempts by Polish authorities to obstruct the growth of the Western Ukrainian sports movement did not succeed. In 1939 there were over 200 Ukrainian clubs and sports sections within the Sokil and *Luh societies, with a combined total of over 3,000 participants. The Zaporozhian Games of 1934 and 1939 demonstrated the vitality of Ukrainian organized sports in Galicia.

In Czechoslovak-ruled Transcarpathia, the Sich societies and the Plast scouting organization continued the sports activities they had begun before the war. The Rus' Ukrainian sports society of Uzhhorod became part of the Czechoslovak Soccer League. In interwar Bukovyna, the Rumanian authorities abolished the Sich societies that had been established there before the war. Most of the extant Ukrainian sports clubs were devoted to soccer. R. Petrusenko of the Dovbush club in Chernivtsi was a member of the Rumanian skating team in the 1936 Olympic Games.

Ukraine under tsarist rule. Before the 1917 Revolution there were no Ukrainian organized sports activities. The upper classes, however, had access to yachting, tennis, and gymnastics clubs. Workers and students organized their own unofficial sports groups, and the Russian Sokol and Boy Scout organizations promoted gymnastics. Ukrainian athletes, such as the wrestlers I. Pidubny and O. Harkavenko, the fencers Klimov and Zakharov, and the equestrians Boboshko and Rodzianko, participated in competitions throughout Europe. Some Ukrainians represented Russia at the 1908 and 1912 Olympic Games. In 1913 the first All-Russian Olympiad took place in Kiev.

Soviet Ukraine. Under Soviet rule, organized sports were well developed as a result of the Soviet state's emphasis on *physical education for the entire population. In 1922 the Spartak organization was founded by the Kom-

somol to unite all existing sports circles and to control their activities. In 1923 the first All-Ukrainian *Spartakiad took place in Kharkiv, and the Higher Council on Physical Culture of Ukraine was created to co-ordinate all physical education and organized sports in Ukraine. Thenceforth all sports clubs were part of Komsomol or trade-union organizations. At the 1928 All-Union Spartakiad, the collective Ukrainian team placed second overall and first in volleyball, handball, gymnastics, shooting, and motorcycling. In 1930 the first All-Ukrainian Rural Spartakiad took place in Kiev; competitors were the victors in 300 raion and 25 okruha Spartakiads. Prominent Ukrainian athletes who participated in republican, all-Union, and Red Sport International competitions in the 1920s and 1930s were V. Kalyna, H. Raievsky, M. Pidhaietsky, and Z. Synytska in track-and-field sports; M. Dmytriiev, Ye. Bokova, and T. Demydenko in gymnastics; V. Furmaniuk in swimming; H. Popov, H. Novak, Ya. Kutsenko, and M. Kasiyanyk in weight lifting; and P. Makhnytsky, M. Sazhko, and I. Mykhilovsky in Greco-Roman wrestling.

Sports contacts with the West increased after the Second World War, and Soviet physical education and sports training were improved. In 1959 the Committee on Physical Culture and Sports of Ukraine's Council of Ministers was reorganized into the Union of Sports Societies and Organizations of the Ukrainian SSR; like its predecessors, it was subordinated to its all-Union counterpart in Moscow. Oblast, city, raion, and local councils of physical culture oversaw the work of all voluntary sports societies, physical culture collectives at industrial enterprises and collective and state farms, and sports clubs. Until August 1991 there were nine republican branches of all-Union *sports societies in Ukraine – *Avanhard (over 3 million members), *Burevisnyk (approx 560,000 members), *Dynamo, Kolos (formerly Kolhospnyk; 4.7 million members), Lokomotyv (approx 470,000 members), *Spartak (over 2.6 million members), Trudovi Rezervy (approx 690,000 members), Vodnyk (approx 90,000 members), and Zenit – with a combined membership of over 17 million. Military reservists were trained in paramilitary sports such as fly-ing, skydiving, gliding, car racing, motorcycling, skin diving, motorboating, and shooting by clubs of the *Voluntary Society for Assistance to the Army, Air Force, and Navy.

Ukraine was deprived of its own representation in international sports, but Ukrainian athletes participated in the *Olympic Games as members of USSR teams from 1952. Since the 1950s over 80 world records and many European and Soviet records have been set by athletes from Ukraine. Kiev's Dynamo soccer team won the 1975 and 1986 European Cup-Winners' Cup and over a dozen USSR championships and cups. Many international competitions have taken place in Kiev: European equestrian championships (1973–5); international women's handball championships; European track-and-field, boxing, and judo championships (1975); the Golden Ring floor-exercises tournament (1976); a world wrestling championship (1983); and USSR–West Germany and USSR–United States track-and-field competitions (1983). Odessa hosted an international swimming and track-and-field competition in 1974; USSR–United States boxing competitions took place in Donetsk in 1979 and 1982; and a USSR–East Germany boxing competition was held in Zaporizhia in 1981. Today over 50 dif-

ferent sports are practiced in Ukraine. The 10 most popular are (in descending order) track-and-field sports, soccer, volleyball, shooting, basketball, table tennis, skiing, handball, swimming, and gymnastics.

Recognizing the political importance of sports in fostering national pride and international recognition, the Soviet central authorities ruled out separate representations from the Soviet national republics at international competitions. Like any other colonial power, the USSR exploited the athletic potential of its constituent nations to build up the central sports organizations, which were Russian. Unofficial data show a staggering mortality rate among Soviet Olympic medal winners, which suggests that Soviet athletes were forced to ingest steroids and other dangerous drugs, and to undergo physiological experiments.

Sports periodicals published in Ukraine include *Vestnik fizicheskoi kul'tury* (1922–9), *Visnyk fizychnoi kul'tury* (1929–30), *Fizkul'turnyk Ukrainy* (1930–5), *Sport* (1936–41), *Radians'kyi sport* (1934–9, 1950–64), *Fizkul'tura i sport* (1957–64), *Sportyvna hazeta* (since 1964), and *Start* (since 1965).

Abroad. In Canada, the Canadian Ukrainian Athletic Clubs (CUAC) in Winnipeg (1925) and in Oshawa (1927) were the earliest manifestations of organized sports activity by Ukrainians. Over 60 Ukrainian sports clubs, leagues, and teams have been active in Canada. The CUAC is still in existence; its women's softball team won the national championship in 1965. The other Ukraine teams have also won national championships – Montreal's soccer team in 1957 and Toronto's volleyball team in 1975.

In the interwar period Sich societies in the United States and Canada established their own track-and-field, swimming, volleyball, soccer, softball, basketball, bowling, and tennis clubs and competitions. Ukrainian youth athletic competitions were held in Philadelphia in 1935 and 1936. Young athletes from the United States and Canada competed in the first Ukrainian-American Olympiad held in Philadelphia in 1936. In 1938 the Ukrainian National Association founded a baseball league; by 1940 it had 28 teams.

Ukrainian refugees in postwar Germany set up the *Ukrainian Council for Physical Culture in November 1945 to co-ordinate the 51 sports clubs (with a combined membership of 3,700) that arose in the DP camps. The most popular sport was soccer, with 29 clubs in the US zone of Germany alone. In volleyball there were 29 men's and 16 women's teams. There were 15 basketball teams. The council's hockey team scored a victory over the best American army team. Track-and-field sports, skiing, swimming, table tennis, tennis, mountain climbing, boxing, and weight lifting were practiced also. The council organized games and athletic competitions among Ukrainian teams and between Ukrainian and non-Ukrainian teams, as well as courses for trainers and coaches (1946–7). At the 1948 DP Olympiad in Nuremberg, Ukrainian teams took first place in soccer, men's volleyball, the 400-m men's relay, and heavyweight boxing. After the mass emigration of refugees to the New World in the late 1940s, new Ukrainian sports clubs were founded in the host countries. Soccer, tennis, volleyball, and swimming have been particularly popular. The *Ukrainian Sports Federation of the USA and Canada was founded in 1953–4. In 1980 it organized, with other émigré communities of the captive nations of the USSR, the Free Olympiad in Tor-

onto. The Ukrainian delegation won 11 gold, 8 silver, and 7 bronze medals and took second place overall. At the second such Olympiad, in 1984, the Ukrainian women's team placed first overall, the men's team second overall.

Sports palaces (*palatsy sportu*). Covered buildings for sports competitions and other mass events. Most such palaces have ice rinks and movable stands seating from 3,000 to 14,000 spectators. The largest sports palaces in Ukraine are the Kiev Sports Palace, built in 1960 by M. Hrechyna, O. Zavarov, and others; the Labor Reserve Palace in Lviv, built in 1970 by S. Sokolov; and the Youth Palace in Zaporizhia, built in 1972.

Sports societies. In the USSR, the first all-Union mass voluntary societies providing the population with athletic and sports facilities, training, and activities were the Komsomol organization Spartak (est 1922) and the paramilitary Dynamo (Russian: Dinamo, est 1924). From 1926 on sports clubs were founded by various USSR trade unions, and in 1936–8 the All-Union Central Council of Trade Unions united them in 64 sports societies. By 1957 most of these societies had been amalgamated.

In Soviet Ukraine there were republican branches of nine all-Union societies: Dynamo, for employees of the MVD, KGB, and other police and security forces; Spartak (est 1935; over 2 million members in 1986), for white-collar employees in state trade, civil aviation, culture, and public health; Lokomotyv (Russian: Lokomotiv, est 1936; 462,000 members in 1985), for railway workers; Zenit (est 1936; part of the Trud society in 1957–66), for employees of the machine-building industry; Vodnyk (Russian: Vodnik, est 1938; over 100,000 members in 1985), for river and sea transportation workers; Kolos (est 1950; 4.7 million members in 1984), formerly Kolhospnyk (1950–70), the republican equivalent of the all-Union Urozhai society for collective farmers and other rural-based employees; Avanhard (est 1957; over 3 million members in 1985), the republican equivalent of the all-Union Trud society for industrial and construction workers; Burevisnyk (Russian: Burevestnik, est 1957; 525,000 members in 1985), for post-secondary students; and Trudovi Rezervy (Russian: Trudovye Rezervy, est 1943; 686,000 members in 1986), for students and employees of vocational and technical schools.

The Ukrainian societies were composed of athletic collectives (47,900 in Ukraine in 1987) and sports clubs, with a combined membership of over 17 million in 1984. All of them were governed by councils elected at society conferences held every four years and were supervised by the All-Union Council of Voluntary Sports Societies. The societies funded and trained their own individuals and teams participating in intersociety, republican, USSR, and international competitions. In the years 1952–80 Burevisnyk's athletes won 36 Olympic gold medals; Spartak's, 22; Avanhard's, 21; Dynamo's, 15; Lokomotyv's, 10; Kolos's, 5; Zenit's, 4; Trudovi Rezervy's, 1; and Vodnyk's, 1. Teams that have won Soviet and/or international cups are the Kiev Dynamo *soccer team; Avanhard's soccer teams Shakhtar in Donetsk and Dnipro in Dnipropetrovske, and its Budivelnik basketball team in Kiev; Burevisnyk's Medin women's volleyball team in Odessa; the Kharkiv Lokomotyv men's volleyball team; Spartak's women's volleyball team, Aviator rugby team, and Sokil ice hockey-team in Kiev; and Kolos's women's field-hockey team in Boryspil.

R. Senkus

Sportyvana hazeta (Sports Gazette). The only Soviet Ukrainian newspaper devoted solely to sports, founded in April 1934. It is published three times a week in Kiev as the official organ of the Committee on Physical Culture and Sports of the Ukrainian Supreme Soviet and Republican Council of Trade Unions. It was called *Radians'kyi sport* until 1964 and did not come out in 1940–9. In 1980 it had a circulation of 450,000.

Sprat (Ukrainian: *shprot, tiulka*). A valuable commercial food-fish of the herring family Clupeidae (genus *Clupea*) that is usually less than 12 cm long, lives in vast schools, and feeds on plankton. Sprats (*C. sprattus*) are sold fresh, smoked, salted, spiced, or canned in oil. Some are used as bait or are processed for fish meal and oil. In Ukraine the Black Sea sprat (*C. sprattusphalerius*) and the *tiulka* (*C. delicatula*) are found in Black Sea waters, from which they migrate in the spring toward the Danube, Dnieper, Buh, Tylihul, and Berezan estuaries.

Spravnyk (Russian: *spravnik*). A county police and court official in the Russian Empire. The office was created by Catherine II's 1775 law on gubernial administration and was introduced in Ukraine in the 1780s. The *spravnyk* was elected for a three-year term by the nobility of a county. In 1862 his powers were restricted to policing, and thenceforth he was appointed by the gubernial governor. The post existed until the Revolution of 1917.

Sprawy Narodowościowe (Nationality Issues). A bimonthly organ of the Polish *Institute for Nationalities Research, published in Warsaw in 1927–39. Edited by S. Paprocki, it printed articles and information on Polish communities outside Poland, on the various minorities within Poland, and on nationality and ethnic issues in general. It devoted attention to the League of Nations and the national question in the USSR and throughout the world, and featured an extensive book review section, bibliography, and chronicle of events. The journal remains an important source of information on interwar Ukraine. Indexes to it appeared in 1933 and 1937.

Spring of Nations. See Revolution of 1848–9 in the Habsburg monarchy.

Spring rituals. Traditional folk rituals practiced in the spring, from the equinox (20–21 March) to the summer solstice (21–22 June). Originally these rituals were believed to possess magical powers that ensured a bountiful harvest and fertility in domestic animals. The ritual cycle began with the rite of **provody* (bidding winter farewell and welcoming spring), just before the beginning of Lent. Winter was usually personified by minor deities (Kostrub, Morena, Smertka, or Masliana), effigies of which were burned or drowned ceremonially. Spring was personified by a young girl crowned with a wreath and holding a green branch in her hand. She was the central figure in the ritual games, dances, and songs (see **Vesnianky-hahilky*). The arrival of migratory birds signaled the beginning of the spring festival called *stricha* (from 'greeting'). On the Feast of the 40 Martyrs (22 March [9 March OS]) bird-shaped buns called *zhavoronky* (larks) were baked and tossed into the air by children and told to bring spring with them. The largest number of agrarian rituals was designated for the Lenten period and **Easter*. Their magical meaning is clearest in the ritual first sowing, the first release of livestock to pasture (on St George's feast), and the decorating of fields and farmhouses with green branches (see **Rosalia*).

M. Mushynka

Spruce (*Picea*; Ukrainian: *smereka, yalyna*). A coniferous, evergreen ornamental and timber tree of the family Pinaceae, with a straight trunk and thick conical crown, reaching heights of 20–80 m. Its wood is valuable in the production of construction lumber, paper, and musical instruments and as a source of tar, turpentine, and tanning substances. Two species grow naturally in Ukraine, Norway spruce (*P. abies* or *P. excelsa*) and mountain spruce (*P. montana*). Spruce trees cover an area of about 850,000 ha, or 12.5 percent of all forests in Ukraine (third most common after pine and oak trees), principally in the Carpathian Mountains, where pure spruce forests are also to be found. Smaller islands of spruce exist in the Roztochia, Podlachia, Podilia, and Chernihiv regions. Eastern spruce (*P. orientalis*) is found in Caucasia, and Engelmann spruce (*P. engelmanni*) and blue spruce (*P. pungens*) are cultivated as ornamentals.

Spurry (*Spergula*; Ukrainian: *steliushok*). A small, white-flowered herb of the family Caryophyllaceae. Three species are found in Ukraine (*S. arvensis* is the most common) growing as weeds in sandy soils, in solonchaks, along roads, and in wastelands. Spurry green is a feed suitable for silage.

Spynul, Mykola, 1867–1928. Bukovynian political and pedagogical activist. He published articles on education in the daily *Bukovyna*. He was a member of the Austrian parliament (1907–18) and the Bukovynian Diet (1911–18) from the National Democratic party, and he served as sec-

retary of the Bukovynian Ukrainian Club. He was deported to Siberia by the Russian occupational authorities in 1914 (released in 1915). Spynul participated in setting up the Ukrainian government in Bukovyna (November 1918). He served as consul for the Western Ukrainian National Republic in Vienna in 1919 and remained there until his death.

Squash (*Cucurbita pepo* or *C. maxima*; Ukrainian: *harbuz, kabachok*). An annual vegetable of the gourd family Cucurbitaceae. Summer squash is a quick-growing, small-fruited bush, the young fruit of which (7 to 12 days old) is cooked as a vegetable. Pumpkin squash (*C. pepo* var.) is a round, hollow, deep yellow fruit of a vine plant; its seeds are used to produce cooking oil or dried as a popular snack food. Ukrainian folk custom held that if a girl rejected a marriage proposal she gave the unlucky suitor a large pumpkin, which he had to carry home in view of the whole village. Overripe squash is used as livestock feed. In Ukraine squash is grown predominantly in the steppe and forest-steppe regions.

Squill (*Scilla*; Ukrainian: *proliska*). A grassy, perennial, bulbous herb of the family Liliaceae, with small white, blue, or purple flowers. Of its nearly 60 species, Ukraine has 4, including *S. autumnalis*, common in the southern steppes and the Crimea, *S. bifolia*, and *S. sibirica*, which grows naturally in forests and thickets and is also cultivated for decoration.

Squirrel, Eurasian red (*Sciurus vulgaris*; Ukrainian: *bilka, vyvirka*). A bushy-tailed, tufted, arboreal mammal of the rodent family Sciuridae. Also known as the common or pine squirrel, in Ukraine it is found in the forest and forest-steppe zones, where it lives in tree hollows or in nests of leaves and twigs. Squirrels are hunted in Ukraine for their fur.

Sreblo (aka *serebro* 'silver'). Silver coins minted in the 10th and 11th centuries by Volodymyr the Great and his sons Sviatopolk I and Yaroslav the Wise. Weighing between 1.73 and 4.68 g, they bore on one side an image of the prince and the Slavonic inscription Volodymyr (or Sviatopolk) Is on the Throne and on the other side the dynastic symbol, a trident, and This Is His Silver, or Yaroslav's Silver. The only other silver coins of the period were minted by Prince Oleh-Mykhailo of Tmutorokan in 1078. Beginning in the 13th century the word *sreblo* was used to denote any kind of coin and was interchangeable with the term *kuna*. Approx 300 silver coins of Kievan Rus' have been discovered, most of them in a hoard found in Nizhen in 1852.

Srebrenytsky, Hryhorii [Srebrenyc'kyj, Hryhorij], b 1741 in Chernechyna, Okhtyrka region, d 1773. Copper engraver. He learned engraving at the Kievan Cave Monastery Press (to 1758) and the St Petersburg Academy of Arts, where he studied under E. Chemesov. From 1767 he taught at the academy.

Srem. A historical region of what used to be northeastern Yugoslavia, lying between the Sava and Danube rivers and covering an area of 6,870 sq km. Its population is over 500,000 and includes Serbs, Croats, Hungarians, Slovaks,

and Ukrainians (about 10,000). The larger, eastern part of Srem belongs to the Autonomous Region of Vojvodina within *Serbia; the smaller, western part belongs to *Croatia. Ukrainians began to migrate into Srem from *Bačka, just north of Srem, at the end of the 18th century. After the Second World War some Ukrainians from Bosnia moved to Srem. Ukrainian communities are found in cities such as Sremska Mitrovica, Indjija, Šid, Vukovar, and Vinkovci and in villages such as Bačinci, Berkasovo, Petrovci, Andrijevi, and Mikloševci.

Sreznevsky, Borys [Sreznevs'kyj], b 31 March 1857 in St Petersburg, d 24 March 1934 in Kiev. Meteorologist and climatologist; full member of the VUAN from 1920. He graduated from St Petersburg University (1879) and was a professor at Tartu University (1894–1918). From 1919 he headed the Kiev Meteorological Observatory. He did fundamental work on storms in the Black Sea region and wrote the monograph *O vlazhnosti* (On Humidity, 1915) and others on cyclonic atmospheric disturbances. He studied the effect of weather on people and developed several meteorological instruments. He also organized the publication of a number of Ukrainian meteorological periodicals.

Izmail Sreznevsky

Sreznevsky, Izmail [Sreznevskij], b 13 June 1812 in Yaroslavl, Russia, d 21 February 1880 in St Petersburg. Russian philologist and Slavist; full member of the Imperial Academy of Sciences from 1854. A graduate in political science at Kharkiv University (MA 1837), he lectured in Slavic philology at Kharkiv (1842–6) and St Petersburg (1847–80) universities. He collected and published songs of wandering Slovak tradesmen (1832) and of Ukrainian peasants in Kharkiv, Poltava, and Katerynoslav gubernias (*Zaporozhskaia starina* [Zaporozhian Antiquity, 1833–8]). With I. Roskovshenko he published *Ukrainskii al'manakh* (Ukrainian Almanac, 1831), where his own verses in Ukrainian Romantic style and narratives in Russian appeared. He was a founder and editor of *Izvestiia Imperatorskoi akademii nauk po otdeleniiu russkogo iazyka i slovesnosti*, where he published many linguistic and historical monuments of the medieval period in Old Church Slavonic and Eastern Slavic. As a linguist Sreznevsky belonged to the Romantic school of philology. In his *Myсли ob istorii russkogo iazyka* (Reflections on the History of the Russian Language, 1849) he gave a synthetic survey of the comparative phonetics and morphology of the Slavic languages and then of the East Slavic languages, including Russian.

Treating Ukrainian as a dialect of one Russian language, he held that the 'southern' (ie, Ukrainian) dialect, as distinct from the 'northern' (Russian and Belarusian) dialect, arose only in the 13th to 14th century, and that in the 15th to 16th century the former divided into the western (Transcarpathian and Ruthenian) and the eastern ('Ukrainian') dialects, while the latter divided into the Belarusian and Great Russian dialects. He believed wrongly that until the 13th century there was no distinction between the religious and secular styles of the literary language, that the structure of the vernacular changed in the 13th to 14th century, and that elements of the popular language began to enter the literary language in the 15th to 16th century. These views and Sreznevsky's authority paved the way for the theory of the Proto-Russian and Old Russian language of the Eastern Slavs. Following A. Vostokov's example, he turned to grammatical and lexicographic studies and the publishing (not always very accurate) of medieval manuscripts. He systematically collected lexical data from old Eastern Slavic manuscripts, which his daughter edited and published posthumously as *Materialy dlia slovaria drevne-russkogo iazyka po pis'mennym pamiatnikam* (Materials for a Dictionary of the Old Russian Language of Literary Monuments, 3 vols, 1893–1912; 4th edn 1989). It is a unique lexicographic collection, based partly on monuments of Old Ukrainian.

O. Horbach

Sribliansky, M. See Shapoval, Mykyta.

Sribna Zemlia (Silver Land). A promotional and poetic name for Transcarpathia. Historically it referred to the Spiš region of western Transcarpathia.

Sribne. III-13. A town smt (1986 pop 3,600) on the Lysohir River and a raion center in Chernihiv oblast. In the medieval period the town of Serebriane, which was first mentioned in the chronicles under the year 1174, stood near the site of Sribne. In the 13th century it was destroyed by the Mongols. From the 1340s Sribne village was under Lithuanian rule, and from 1569, under Polish rule. In the 1640s an Orthodox brotherhood arose there, and it set up a school and hospital. Under the Hetman state (1648–1782) the town was a company center in Pryluka regiment. In the 19th century it belonged to Pryluka county in Poltava gubernia. A sugar refinery and a soap factory were added in the 1840s to its woolen-cloth weaving shops. In 1965 Sribne was granted smt status. Today its main industry is food processing.

Sribny, Fedir [Sribnyj], b 1881 in Nadvirna, Galicia, d 1950. Historian; member of the Shevchenko Scientific Society (NTSh) from 1917. He taught in gymnasiums in Stanyslaviv and Lviv and worked at the Lviv branch of the AN URSR (now ANU) Institute of History (1940–1). In 1943–4 he participated in the academic meetings of the historical section of the NTSh. Among his works was an important series of studies of the organization of the Lviv Stauropolegion Institute from the late 16th to the mid-18th centuries (*Zapysky NTSh*, vols 106, 108, 111–15 [1911–13]).

Sribny, Viacheslav [Sribnyj, Vjačeslav] (pseud of V. Sribnytsky), b 17 September 1911 in Myhiia, Yelysavethrad county, Kherson gubernia. Writer. He wrote the sto-

ry collections *Liudyna zalyshylas' zhyty* (A Person Stayed to Live, 1958), *Ty potrebnii liudiam* (You Are Needed by People, 1970), and *Ostannii litak* (The Last Plane, 1976) and the novel *Sosny na kameni* (Pines on a Rock, 1958).

Srochynsky, Kornilo [Sročyns'kyj], b 17 November 1731 in Peremyshl, Galicia, d 21 March 1790. Basilian priest, writer, and noted preacher. He entered the Basilian order in 1754 and, after serving as a missionary in the Za-

mostia region, became hegumen of the Krystynopil Monastery (1766–76). Later he served as consultator for the order in the Galician province and then hegumen of the Lavriv St Onuphrius's Monastery. He prepared a handbook of sermons for Basilian missionaries that was published in 1790 as *Methodus peragendi missiones*. Srochynsky also left histories of the Lavriv monastery and an account of the 1768 haidamaka uprising in Uman, which were published posthumously.
